Tearing in rectum and urethra, while urinating.
Tearing stitches in rectum while sitting.
Frequent pressure to stool, with prolapsus of rectum, also with emission of much flatus; the slightest stooping, or still more crouching down, caused rectum to protrude.
‖ Prolapsus of rectum; frequent, lumpy, slimy stool, bloody at times; much flatus; stool often unsatisfactory, passing nothing but flatus; empty eructations and distended abdomen; feces often pass involuntarily while bending over; weakness in lumbar region; frequent urination; prolapse always with and sometimes without stool; after sitting a long time at stool the prolapsed bowel becomes much swollen and difficult to replace; four or five stools a day; of years standing.
‖ Protrusion of rectum, after confinement.

Google

| | Prolapsus ani, after an attack of dysentery, half a year previously.
| | Frequently itching in rectum; at times expulsion of thread worms; slightly constipated; abdomen somewhat bloated; poor appetite; sudden prolapsus recti, with tenesmus, after eating grapes; prolapsus frequently recurred, especially after stool; after four weeks' use of *Ruta*, a mucous polypus was discharged from rectum, since then entirely well.
| | Worm complaints of children.

[21] **Urinary Organs.** Tearing pains in urethra while urinating.
Pressure on bladder, as if continually full; the pressure to urinate continues after micturition; at every step after urinating, she feels as if bladder were full and moving up and down.
Great pressure to urinate, as if bladder were constantly full, yet but little urine is passed, and micturition is followed by dragging as if much should be passed, which, however, does not occur.
| | Constant urging to urinate, could hardly retain urine; when that feeling occurred she had to hurry to water-closet; if she forcibly retained the water she could not pass any afterward and suffered severe pains.
Frequent pressure to urinate, with scanty green urine.
Spasmodic stricture of neck of bladder.
Frequent micturition.
Involuntary micturition at night in bed, and during day when walking.

[23] **Male Sexual Organs.** Varicocele following a strain; hæmatocele in which the effusion is small and firmly coagulated.

[25] **Female Sexual Organs.** Menses: too early and too profuse; feeble, followed by leucorrhœa.
Corrosive leucorrhœa after irregular or suppressed menses.

[31] **Pregnancy. Parturition. Lactation.** Lameness and soreness all over; weak, feeble contractions during labor.

[35] **Voice and Larynx. Trachea and Bronchia.** Sensation in larynx as from a bruise.

[36] **Respiration.** Short breath with tightness of chest.

[37] **Cough.** Awakened about midnight with a choking cough.
Cough with copious expectoration of thick yellow mucus, with weak feeling in chest after it.
Violent cough with expectoration of tough mucus and nausea.

[38] **Inner Chest and Lungs.** Pressure on sternum seeming to be internal and external.
A painful spot on sternum, painful to pressure.
Gnawing pain, associated with some biting and burning in r. side of chest.

Google

‖Phthisis after mechanical injuries to chest.
Sensation of coldness or heat in chest.

[29] **Heart, Pulse and Circulation.** Anxious palpitation.
Pulse unchanged; or, somewhat accelerated only during heat.

[30] **Outer Chest.** On sternum a painful spot; also painful to pressure.

[31] **Neck and Back.** ‖For twelve days pain below r. scapula < in evening, after exertion, by deep inspiration and by moving r. arm; > by pressure and lying down, especially on r. side; the pain extends over a spot as large as the palm; when severe it extends to corresponding part of l. side.
Pain as if sprained or bruised in nape and shoulders.
Bruised pain extending along back.
Drawing, bruised pain in spine, frequently taking away breath.
Pain as if beaten and lame in spine.
Pressive drawing, very acute pain in r. side of spine, opposite liver, especially on inspiration.
Pain as from a fall in dorsal vertebræ.
Severe pressure in small of back, from within outward, as if bruised; pain appears 5 o'clock in morning, and is > by moving about and by passage of flatus.
Stitches in small of back when sitting, stooping or walking; > by pressure and when lying down.
Stitches in spine while sitting; is suddenly overcome by anxiety.
‖Rheumatic pains in back, < in morning before rising.
‖Pain as if bruised in lumbar vertebræ.
‖Weakness in lumbar region; prolapsus recti.
‖Pain in back or coccyx, as from a blow or fall, or as if bruised.
Bruised sensation in hip bones.
Cramplike contraction or pulsation ascending from thighs into small of back.

[32] **Upper Limbs.** Pain in l. elbow joint as from a blow; arm weak.
Wrists feel as if sprained, stiff; < in wet, cold weather.
Bones in wrist and back of hand painful, as if bruised, during rest and motion.
π‖Ganglionic swelling on front of l. wrist.
Hands numb and tingle after exercise.
‖Soreness through small bones of hands.
‖Ganglia on sheath of flexor tendons of fourth finger, situated in palm of r. hand, as large as a hickory nut, greatly interfering with use of hand; rheumatism of r. leg.

Digitized by Google

Flat, smooth warts on inside of hands.
Contraction of fingers.
‖Bursitis.

[31] **Lower Limbs.** On rising, after sitting, he cannot walk; he falls back again.
While walking he falls from side to side; the feet will not support him; there is no power or steadiness in thighs.
Ascending or descending a hill is difficult, the legs give out.
‖Hip bones feel bruised; as if from a blow or fall.
The painful parts, especially hips and bones of legs, are sore, as if beaten, whenever touched.
‖Sciatica; pain deep-seated as if in marrow of bone, or as if bone were broken; obliged to walk about constantly during paroxysms; pain < sitting or lying down; constantly complaining about his sufferings; burning, corrosive pains, < in damp or cold weather, or from cold applications.
‖‖Shooting pains from back down outside of l. thigh, sometimes down sciatic nerve on first moving or on rising after sitting; hamstrings, chiefly outer, feel shortened and sore. θSciatic rheumatism.
‖Ischias arising from injuries and contusions.
Anterior surface of thigh feels bruised and painful to touch.
Whenever he stretches out the limbs, even a little, the thighs are painful, as if beaten.
‖Hamstrings feel shortened and weak, knees give way going up or down stairs.
Posterior portion of thigh above knee seems bruised.
‖Pain and lameness in ankles after a sprain or dislocation.
Throbbing and hacking pain as if there were an ulcer on anterior portion of l. ankle.
He dare not step heavily upon feet, on account of pains in bones of feet, with a sensation of heat.
Burning and biting pains in bones of feet during rest.
Fistulous ulcers on lower legs.

[34] **Limbs in General.** Is unable to bend on account of pains in all the joints and hip bones.
Inflammation of larger joints, especially in upper extremities.
‖‖Since five weeks severe rheumatism of r. wrist and in both feet from heels to toes; has been in bed for a month; puffy swelling of instep; sour sweat.
‖‖Lameness after sprains, especially of wrists and ankles.

[35] **Rest. Position. Motion.** Rest: wrist and back of hand painful; pains in bones of feet.

Lying down: pain below r. scapula >; stitches in small of back >; parts on which he lies sore.
Sitting: vertigo; tearing stitches in rectum; stitches in rectum; stitches in small of back in spine; on rising cannot walk, falls back again; sciatica <; pains down sciatic nerve on rising.
Lies in one position, then in another, turns from side to side; uneasiness of legs; rheumatism.
Bending over: feces often escape.
Slightest stooping or crouching down: causes rectum to protrude; stitches in small of back.
Is unable to bend: pains in all joints.
Stretching out limbs even a little: thighs painful.
Motion: of r. arm, pain below r. scapula <; > pain in small of back; wrist and back of hand painful.
Exertion: pain below scapula <.
Exercise: hands numb and tingle.
Walking: vertigo; involuntary micturition; stitches in small of back; falls from side to side; short distance, great weakness; limbs painful.
Ascending or descending a hill is difficult, legs give out.
Going up and down stairs: hamstrings feel shortened and weak.

[56] **Nerves.** Great weakness after a short walk; the limbs feel bruised; small of back and loins are painful.
Tottering, as if thighs were weak; limbs pain when walking.
Does not know where to lay his legs on account of uneasiness and heaviness; he lies now in one place, now in another, and turns from side to side.
All parts of the body upon which he lies, even in bed, are painful as if bruised.
| |Restless, turns and changes position frequently when lying. θRheumatism.
Facial paralysis after catching cold; suits robust and sanguineous persons.
Rheumatic paralysis of tarsal and carpal joints.

[57] **Sleep.** Yawning and stretching, indoors.
Sleepiness during day.
Frequent waking at night, feeling as if it were time to rise.
| |Vivid confused dreams.

[58] **Time.** Morning: vertigo on rising; rheumatic pains in back < before rising; sweat in bed.
At 5 o'clock A.M.: pressure in small of back.
During day: involuntary micturition; sleepiness.
Afternoon: thirst for cold water; heat with anxiety.
Toward evening: eyes irritable and run water.
Evening: melancholy disposition, burning in eyes; green

halo around light; sight blurred, eyes ache; pain below r. scapula.

Night: eyes feel like balls of fire; involuntary micturition in bed; feeling as if it were time to rise.

About midnight: awakened with a choking cough.

" **Temperature and Weather.** Near warm stove: chill; chilliness.

Indoors: yawning and stretching.

Open air: vertigo when walking, eyes water; after walking, general sweat.

Cold applications: sciatica <.

Cold water: thirst for.

Wet, cold weather: wrists feel stiff, sprained; sciatica <.

" **Fever.** Coldness running over one side of head.

‖Coldness down spine.

Chill mostly left-sided; < up and down back; shakes even near a warm stove.

Chill with heat of face and violent thirst.

External and internal heat of face with red cheeks and cold hands and feet.

Frequent attacks of quick flushes of heat.

Heat, mostly afternoons, with anxiety, restlessness and dyspnœa; no thirst.

Sweat, cold on face; morning in bed.

General sweat after walking in open air.

‖Chilliness through whole body even when near a warm stove, hands and feet cold, confusion and heat in head, great thirst which disappears immediately after drinking, frequent sneezing, pain in eyes as if strained, lachrymation, pain in larynx as if bruised, hoarse cough awakening him at midnight, and causing by its continuation vomiting and pain in sternum, expectoration seldom and scanty. θCatarrhal fever.

" **Attacks, Periodicity.** Day: four or five stools.

For twelve days: pain below r. scapula.

Since five weeks: severe rheumatism of r. wrist, both feet.

Years standing: prolapsus of rectum.

" **Locality and Direction.** Right: pain like a pressure in eye; biting and burning on side of chest; pain, below scapula; acute pain in side of chest; ganglion on sheath of flexor tendon of fourth finger in palm; rheumatism of leg; rheumatism of wrist.

Left: stitches in frontal bone; burning beneath eye; pressure on inner surface of eye; ganglionic swelling on front of wrist; pain down outside of thigh; as of an ulcer on ankle; chill mostly side.

From within outward: pressure in small of back.

" **Sensations.** As if from a fall, pain in periosteum; as if a nail

Google

were driven into head; head as if bruised or beaten; pains as if bruised in periosteum; as if eyes were excessively strained; as if a shadow were flitting before eyes; as if one had looked too long and intently at an object; eyes as if balls of fire; as if one were digging about in ear with a blunt piece of wood; as of a lump in throat; bladder as if continually full; spine as if beaten and lame; wrists as if sprained; as if pain were in marrow of bone or as if bone were broken; thighs as if beaten; as if there were an ulcer in ankle; as if thighs were weak; all parts of body as if bruised at night, feeling as if it were time to rise.

Pain like a pressure: in r. eye; in orbicular cartilages; in lower teeth; below l. scapula; in ankles; in bones of feet; in all joints and hip-bones; in nerves and tissues.

Shooting pains: from back down outside of l. thigh.

Rending pain: on scalp, preceding swelling.

Tearing: in rectum and urethra.

Hacking pain: in anterior portion of l. ankle.

Throbbing pain: in anterior portion of l. ankle.

Tearing stitches: in rectum.

Stitches: in l. frontal bone; in small of back; in spine.

Stitching-drawing pain: from forehead to temples.

Pressive-drawing, very acute pain: in r. side of spine.

Pain as if bruised.

Bruised pain: in orbicular cartilages; in cartilage of ear and under mastoid process; in periosteum of facial bones; in larynx; in nape and shoulders; along back; in spine; in small of back; in lumbar vertebræ; in coccyx; in hip bones, in bones of wrists and back of hand.

Pain as from a blow: below mastoid process; in coccyx; in l. elbow joint.

Pain as from a fall: in dorsal vertebræ; in back or coccyx.

Pinching: in stomach.

Pulsative pressing pain: in forehead.

Rhythmical pressive pain: in head.

Gnawing pain: in stomach, about navel; in r. side of chest.

Pricking, gnawing pains: in stomach and intestines.

Burning gnawing: in stomach.

Gnawing, pressing pain: in region of liver.

Burning: in eyes; beneath l. eye; in r. side of chest; in bones of feet.

Biting: in r. side of chest; in bones of feet.

Cramplike contraction or pulsation: ascending from thighs into small of back.

Soreness: all over; through small bones of hands; in hamstrings; of parts on which he lies.

Digitized by Google

Rheumatic pain: in back; of r. leg; of r. wrist, both feet from heels to toes.
Aching: in and over eyes.
Pressure: deep in orbits; on inner surface of l. eye; at root of nose; on bladder; on sternum; in small of back.
Painful spot: on sternum.
Twitching: in eyeballs.
Tension: at stomach.
Lameness: all over; in ankles.
Heaviness: of legs.
Uneasiness: of legs.
Heat: in head; in eyes; in chest; in feet; of face.
Weak feeling: in chest, in lumbar region.
Corrosive itching: on scalp.
Itching: on inner canthus and on lower lid; of skin after meat; in rectum.
Coldness: in chest; over one side of head; down spine; of hands and feet.

"**Tissues.** Bruised feeling all over as from a fall or blow, < in limbs and joints.
Sensation of soreness of parts on which he lies.
Pain in nerves or tissues that have been stretched, as in sprains.
Pain in long bones as if they were broken.
Bruises and other mechanical injuries of bones and periosteum; sprains; periostitis; erysipelas.
Dropsy.
Periostitis and pains in consequence of external injury, with erysipelatous inflammation of parts.
In dislocations where the inflammation is fully under control, it hastens the curative process in the joint.
Bone lesions and fractures; scrofulous exostoses.
Swelling of ankles.
Small epithelial swellings on joints of toes.

"**Touch. Passive Motion. Injuries.** Touch: swelling on scalp sore, painful parts sore; anterior surface of thigh feels painful.
Pressure: a spot on sternum painful; pain below r. scapula >; stitches in small of back >.
Rubbing: smarting of lower lid and inner canthus.
Scratching: > itching.
Walking or riding: causes chafing of skin.
Straining stomach when carrying a heavy weight: caused dyspepsia.
Mechanical injuries: inactivity of bowels or impaction of feces; to chest, phthisis.

"**Skin.** Itching over whole body, > scratching.
Itching of skin after eating meat.

Google

Jaundice from liver complaints.
Skin becomes easily chafed, from walking and riding; also in children.
Acne rosacea.
Erysipelas: after mechanical injuries; of hands.
Ulcers and scabs on scalp, with copious discharge.
Ulcerations; gnawing, jerking pains; pus sanious.
Fistulous ulcers on lower legs.
Inflamed ulcers.
Warts; with sore pains; flat, smooth on inside of hands.

[47] **Stages of Life, Constitution.** In robust, sanguineous persons.
Child, æt. 1½, suffering half a year after an attack of dysentery; prolapsus ani.
Girl æt. 6, pale, delicate, subject to slight catarrhal attacks, which generally yielded to *Acon.*; polypus and prolapsus of rectum.
Man æt. 27, nervous temperament, dark hair, blue eyes, troubled for years, it is a family complaint; prolapse of rectum.
Weaver, æt. 29; amblyopia.
Woman, æt. 34; pain in back.
Mrs. H., æt. 36, suffering a long time; urinary difficulty.
Man æt. 53, suffering five weeks; rheumatism.

[48] **Relations.** Antidoted by: *Camphor.*
It antidotes: *Mercur.*
Compatible: *Calc. ost., Caust., Lycopod., Phos. ac., Pulsat., Sepia, Sulphur, Sulph. ac.* (diseases of bones).
Compare: *Arnic., Argent. nit.* (asthenopia), *Bryon., Calc. ost., Conium* (asthenopia), *Euphras., Lycopod., Mercur., Mezer., Phosphor., Phytol., Pulsat., Rhus tox., Sepia, Silica, Sulphur.*

Google

SABADILLA.

Cebadilla. *Liliaceæ.*

Indigenous to Eastern Mexico, Guatemala and Venezuela. It is a bulbous plant bearing greenish-yellow flowers on a spikelike raceme. The tincture is prepared from the powdered seeds.

Provings by Hahnemann, Gross, Hartlaub, Hromada, Langhammer, Rückert, Schultz, Schönke, Stapf, etc., Archiv für Hom., vol. 4.

CLINICAL AUTHORITIES.—*Vertigo*, Deck, Hom. Phys., vol. 8, p. 463; *Lachrymation*, Boyce, N. Y. S. Tr., 1870, pp. 214, 217, Raue's Rec., 1870, p. 130; *Toothache*, Oehme, H. Mo., vol. 15, p. 533.

[1] **Mind.** No response to questions, loss of consciousness; afterward jumps up and runs recklessly through room.
- ‖Erroneous impressions as to the state of his body.
- ‖‖Imagines: himself sick; parts shrunken; that she is pregnant, when she is merely swollen from flatus; that she has some horrible throat disease which will end fatally.
- ‖Delirium during intermittents.

Mania; rage, quieted only by washing head in cold water.
Melancholy from deep-seated abdominal irritation.
Anxious sensation with restlessness and qualmishness.
Easily frightened; startled by noises.
Thinking produces headache.
Mental exertion aggravates headache and produces sleep.
After fright hysteric paroxysms.

[2] **Sensorium.** Vertigo: things turn black before eyes, sensation of fainting; as if things were turning, especially when rising from a seat; more sitting than walking; felt stupid.

Dulness of head. θInfluenza.
Beclouded, as after intoxication, without vertigo or pains.
- ‖‖Vertigo with sensation as if all things were turning around each other.

Google

‖Attacks of giddiness coming generally in evening; in one attack fainted, then vomited food and bile; during attacks felt suddenly as if she would fall if she did not hold on to something; felt glad to get into open air; gastric disturbance, felt sick after meals.

‖Attacks of giddiness; of short duration, affected suddenly; everything seems to be whirling round her; she has to hold on to something, otherwise she would fall down; if in the house the whole house seems to be coming down upon her; if in the street the houses seem to be falling upon her, and unless she can hold on to some support she falls down; sometimes awakes at night with the whirling sensation; attacks come on without warning, last but a few moments, and are followed by a weak, tired feeling; at other times suffers from attacks of longer duration, sometimes lasting greater part of forenoon, accompanied by nausea and visual disturbance; brain seems to go round and round, and eyes move to and fro, as if they went round with the whirling sensation; if she shuts her eyes the whirling seems to go in the opposite direction and she becomes sick; she likes to lie perfectly still and to look fixedly at one object; if she turns her eyes to look at any other object, or if she shuts her eyes she becomes sick; feels < in mornings, very weak in forenoon and > in afternoon; the sudden giddy attacks come on at any time, the attacks with nausea mostly in the mornings; has a depressed, anxious look; appetite very poor; likes milk, feels soon satisfied; some nausea after meals; mouth when she wakes very dry and burning, tongue dry and thickly coated; bad taste; palms of hands dry and horny and inclined to scale; at night they are so burning that she has to keep them outside the bedclothes; the top of her head is hot; she feels best out of doors.

Inner Head. ‖Pressure in head < in forehead and temples.

θHay fever.

Stitches in temples.

Headache after a walk; on returning to room a twisting, screwing pain from r. side of head to both temples, spreading over whole head, after going to bed, returning daily.

‖Hemicrania with tænia.

‖Headache from much thinking or too close attention.

Stupefying, oppressive sensation in forehead, producing a reeling sensation.

Corrosive, burning point on top of head.

Head feels dull and heavy.

Painful heaviness, first in forepart of r. side of forehead, whence it extends more and more toward l. side.

Google

‖Headache and vertigo, > while eyes are steadily fixed upon an object and while patient is thinking of one subject.

‖Stupefying headache with coryza, itching and burning of scalp, general heat of whole body; < in forenoon.

[4] **Outer Head.** Fine prickling stitches in skin of forehead and scalp, when becoming warm.

Burning, crawling itching on hairy scalp, > from scratching, < from getting into a sweat while walking.

Burning and tingling itching on scalp, as from lice.

Burning itching most on front of head and behind ears; feeling of heat spreading thence over whole body; after scratching violent tickling and stinging; red spots, later with a scurf, < when overheated or sweating during day.

Forehead covered with cold sweat.

[5] **Sight and Eyes.** ‖Lachrymation: when walking in open air, on looking at light, sneezing, coughing or yawning; as soon as least pain is felt in some other part of body, for instance in hand.

Pressure on eyeballs when looking upward.

Margins of lids red.

Blue rings under eyes.

[6] **Hearing and Ears.** Difficulty of hearing.

Severe stitches in l. ear.

Tickling in ears.

Jerking pains with itching in ear.

Itching of ears, with worms.

[7] **Smell and Nose.** ‖Spasmodic sneezing. θHay fever. θInfluenza.

‖Fluent coryza. θInfluenza.

‖Either nostril stuffed up, inspiration through nose labored, snoring.

Itching in nose; agreeable titillation in alæ.

Profuse bleeding from nose.

Bright red blood comes from posterior nares and is expectorated.

Very sensitive to smell of garlic.

Violent sneezing from time to time, shaking abdomen; followed by lachrymation.

‖Coryza with severe frontal pains and redness of eyelids; violent sneezing; copious watery discharge from nose.

[8] **Upper Face.** ‖Face feels hot, as after wine, face and eyes are red. θHay fever.

Face deadly pale and sunken, features distorted, great anxiety.

Beating and jerking in muscles of l. upper jaw.

Intermittent neuralgia, beginning with a shaking chill of great severity; twitching, convulsive trembling.

Digitized by Google

Swelling of face, with spotted eruption.

[9]**Lower Face.** Can hardly open mouth from pain in joints and muscles; with sore throat.

Lips hot, dry, burn as if scalded.

Cracking of articulation of jaw on opening mouth wide.

[10]**Teeth and Gums.** ‖Remittent or intermittent toothache, often extending over whole side of face; < from hot or cold food or drink, from walking in cold air, even with closed mouth.

Dull, troublesome pain in carious teeth, with sore throat.

Gums: swollen; bluish.

[11]**Taste and Tongue.** Taste: bitter; sweet; lost.

Tongue: sore, coated thick yellow; white in centre; moist, during fever; feels sore as if full of blisters; burning on tip.

Cannot protrude tongue, with sore throat.

Pain in tongue and down throat, deglutition difficult.

[12]**Inner Mouth.** Cannot bear anything hot in mouth.

Anything cold in mouth causes pain during sore throat.

‖Mouth dry; throat sore.

Saliva: seemingly hot during pyrosis; copious with nausea, vomiting and vomiturition; sweetish, collects in mouth; jellylike; ptyalism.

Frequent spitting of insipid water.

[13]**Throat.** ‖Sensation of a skin hanging loosely in throat, must swallow over it; as if uvula were down.

‖Much tough phlegm in throat; must hawk.

‖‖Hawks bright red blood from posterior nares.

‖Stitches in throat, only when swallowing; tonsils swollen and inflamed, nearly suppurating; l. to right.

‖Tonsillitis after coryza; suppuration; r. tonsil remains somewhat swollen and indurated.

‖‖Dryness of fauces and throat.

‖Constricted feeling deep in throat, as if œsophagus would be closed, as after swallowing an astringent drink.

‖Continual desire to swallow, deeply cutting pains, whole body writhes.

‖Cannot swallow saliva on account of pain, must spit it out.

‖While swallowing, or not, feeling in throat of a body which he must swallow.

Can swallow warm food more easily, in sore throat.

‖Sensation of a lump in throat with inclination to swallow.

‖Sore throat, continual desire to swallow, pale redness and slight swelling of mucous membrane; in children affected with worms.

‖Roughness in throat, as if a morsel of food had lodged there, causing cough.

Digitized by Google

‖In an epidemic of sore throat, all cases which commenced on l. and extended to r. side.
‖Angina; hydrophobia.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Morbid hunger or loathing of food. θIntermittent.
‖Disgust: for all food; for meat; for sour things; for coffee; for garlic.
‖No relish for food until she takes the first morsel, when she makes a good meal. θPregnancy.
Canine appetite, especially for sweets, farinaceous food, puddings, alternating with disgust for meat, wine or sour things.
No thirst, with moist tongue.
‖Desire for hot things. θAngina.
‖Great thirst. θAngina.
‖Thirstlessness, with exception of desire for milk.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: in intermittents; rancid; sour.
Pyrosis, heat comes up into throat; copious salivation, saliva seemingly as hot as the body, but it is not.
Constantly spits insipid water.
Nausea: before eating; with chilliness; regurgitation, vomiturition in intermittents; regurgitation of bitter mucus, leaving fatty taste; constantly spits insipid water.
Vomiting: of bile; with whooping cough; of lumbrici; or frequent nausea and vomiturition, with feeling of foreign body in œsophagus.
Nausea and retching, with feeling of worm in œsophagus.
Much nausea and vomiting, with heat in abdomen.

[17] **Scrobiculum and Stomach.** Coldness in stomach.
Empty feeling in stomach.
Spasm of stomach, with short breath and dry cough.
Troublesome bloatedness of stomach, with loss of appetite.
Beating in l. side of gastric region toward back.
Burning in œsophagus and stomach, vomiturition, cutting in abdomen; loose stool; nervous debility, twitchings.
Corroding, burning pain in stomach, when walking.
πHeat in stomach and through whole body.
Burning pain in stomach and along chest, as high as pit of throat.
A peculiar pain as if a sore spot were pressed upon, below pit of stomach on pressure and during inspiration.
Gastric symptoms, < in morning.

[18] **Hypochondria.** Stitching pains in hypochondria.

[19] **Abdomen.** Turning and twisting through whole abdomen, as from a lump.
Spasmodic contraction of abdominal muscles, l. side, with burning pains; he bends over to l. side.

Google

Sensation as if a ball of thread were moving and turning rapidly through abdomen.
Cutting in bowels as with knives.
Burning, boring, whirling in region of navel. θWorms.
Bloated abdomen.
Sensation as if abdomen were sunken.
Rumbling in abdomen as if empty.
Colic: with sensation as if a ball were moving and turning through abdomen, cries out, "O my bowels, they go like a wheel;" with violent urging to stool and borborygmus; from worms.

[20] **Stool and Rectum.** Emission of much flatus.
Violent urging to stool with croaking as of frogs; sits a long time, then passes immense quantities of flatus, which is followed by an enormous evacuation; after that burning in abdomen; stool mixed with blood.
Diarrhœa: ‖stool fermented, brown, floating on water; liquid, mixed with blood and slime.
Very difficult stools, with much burning in abdomen and a sensation as of something alive in abdomen.
Before stool: pinching around umbilicus; loud rumbling; urging; emission of flatus; drawing in spermatic cords; burning in anus; shuddering.
After stool: burning in abdomen and rectum.
‖Crawling, itching in anus; ascarides.
‖Lumbrici; tænia; worm fever.
‖‖Vomiting of lumbrici, or nausea and retching, with sensation of a foreign body in œsophagus.
‖‖Tapeworm with severe burning boring pains in abdomen, accumulation of saliva in mouth, great chilliness and sensitiveness to cold; sensation as if abdomen were sunken, or stomach gnawed; vomiturition and sensation of foreign body in throat.
‖‖Tænia; flushed face; one-sided headache with drawing extending into shoulders, and one-sided convulsive throwing about and involuntary rotations of arm of same side; *Sabad.* cured, and after a few weeks administration caused discharge of a large mass of tapeworm, with complete relief.

[21] **Urinary Organs.** Urging to urinate, especially in evening.
Burning in urethra when urinating. θGonorrhœa.
Urine thick and turbid like muddy water.

[22] **Male Sexual Organs.** Pollutions, followed by loss of power in extremities.
Lascivious dreams and emissions, with relaxed penis; afterward painful erections with extraordinary lassitude.

[23] **Female Sexual Organs.** ‖Nymphomania from ascarides.
Before menses: painful pressure downward.

Digitized by Google

‖Cutting pains, as from knives, in ovary. θOvaritis.
‖Menses: too late, with painful bearing down a few days previous; decrease, flow by fits and starts, sometimes stronger, sometimes weaker, blood bright red.

[24] **Pregnancy. Parturition. Lactation.** ‖Gastric symptoms during pregnancy.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness when pressing on larynx, throat feels sore.
‖Influenza; violent spasmodic sneezing and lachrymation on going into open air; tonsillitis begins on l. side and extends to r.; pain < when swallowing empty; sensation as of a thread or string in throat, or a sense of constriction as if it were tied by a string.
‖Epidemic influenza: great sleepiness during day; chilliness, shivering and horripilations, particularly toward evening; chilliness running upward, from feet to head; lachrymation and redness of eyelids; pressure in eyes, particularly when moving them and when looking upward; pressing headache, particularly in forehead; sore pain in tongue, which is covered with a thick yellow coating; pain in tongue extends into throat; difficult deglutition; frequent sensation as if a skin were hanging loosely in throat; bitter taste in mouth; complete loss of appetite; nausea; dryness of mouth; thirstlessness; constipation with rumbling of flatus or diarrhœa of brown fermented stool, which floats upon the water; urine yellow and turbid; cough with vomiting, headache, sharp stitches in vertex, pain in region of stomach; hoarse cough, often with hæmoptysis; painful paralytic weakness of limbs, particularly of knees; all the symptoms < from cold; aggravation toward afternoon, reaching its height in evening; heat of face with chilliness and coldness of limbs or chilliness running up back, returning every ten minutes; skin dry as parchment; sleep restless; disturbed by anxious dreams; cough immediately on lying down.

[26] **Respiration.** Sensation of narrowness in throat.
Shortness of breath, cardialgia, dry cough.
Breathing: heavy; anxious, during heat.
Wheezing in chest.
Sudden oppression of breathing, in pit of stomach, with anxiety.

[27] **Cough.** ‖Cough: dry, from scratching or roughness in throat; in children, with lachrymation; during chill, also during apyrexia; hoarse sounding with hæmoptoë; nightly, dry; short, dry, produced by a scraping in throat; as soon as one lies down; dry, with perspiration and lachrymation; with stitch in vertex, vomiting and pain in stomach.

Google

‖Cough <: from cold, or becoming cold; as soon as he lies down; violent spells recur at same hour or at new and full moon.
Expectoration: of tenacious, yellow mucus, of a repulsive sweet taste; of bright red blood, especially when lying down.

[28] **Inner Chest and Lungs.** Pain and oppression in chest during apyrexia. θIntermittent.
Stitches in side of chest, especially when inspiring or coughing.
Pleuritis, great paralytic debility.
Complains of coldness, with hot flashes intervening. θPleuritis.
Burning and stitches in chest.

[29] **Heart, Pulse and Circulation.** Pulse small, spasmodic.
Sensation as if circulation were suspended.

[30] **Outer Chest.** Red spots on chest.

[31] **Neck and Back.** ‖Spine affected; after pollutions excessive weakness shows itself in legs.
Bruised feeling in back and spine; also in sacral region.

[32] **Upper Limbs.** Sweat in axillæ.
Convulsions in arms.
Trembling of arms and hands.
Stitches in muscles of arms.
Red spots and stripes on arms and hands.
When writing trembling of hand; old people.
Thick, crippled nails.
Pain in r. shoulder extending to chest, with sensation as if a tape prevented circulation of blood.
Blisters on hands and fingers from little work.

[33] **Lower Limbs.** Rheumatic pains in hips; severe stitching; < during rest, > from motion.
Stinging sensation in both thighs at same time.
‖Smarting in r. hypochondrium; shooting down in front of thigh and up to r. scapula; pain makes her twist around; numbness and tingling down r. leg and foot. θRheumatism.
‖Loss of power in legs. θSpermatorrhœa.
Boring, tearing in thighs.
Stitches in muscles of thighs.
Severe burning and inflammation of tibia.
Feet swell, are painful on walking; feels every pebble.
Heaviness of feet.
Thick, inflamed, crippled toe nails.
Horizontal fissures between and under toes.
Swelling of feet with tenderness or profuse sweating of soles.

[34] **Limbs in General.** Paralytic drawing through limbs.
Stitches in flesh of arms or thighs.

Digitized by Google

Weariness in limbs.
Continuous heaviness in limbs, obliging one to lie down all day, but especially in later hours of forenoon and toward evening.

[35] **Rest. Position. Motion.** Lying perfectly still: vertigo >.
Lying down: cough immediately; expectoration <.
Sitting: vertigo <.
Rising from a seat: vertigo.
He bends to l. side: contraction of muscles of abdomen.
Opening mouth wide: cracking of articulation of jaw.
Writing: trembling of hands.
Walking: vertigo; afterward headache, getting into sweat < itching of scalp; pain in stomach.

[36] **Nerves.** Lassitude.
Great debility of knees with relaxation or heaviness of body.
Great debility in intermittents.
Great paralytic weakness in pleuritis.
Intense but transient bruised pain in various parts of body.
Intense pain in all the bones, especially in joints, as if interior of bones were scraped and cut with sharp knife.
Hysteria after a fright.
Twitchings, convulsive tremblings, or catalepsy from worms.
Nervous diseases from worms or deeply seated abdominal irritation.

[37] **Sleep.** Sleepiness: in forenoon; all day; can hardly overcome the inclination; before chill; during heat.
Sleep disturbed by confused unremembered dreams.
Drowsy during day, restless at night.
Many ideas occupy mind, prevent sleep or make it light; evenings.
Sleep restless, tosses about; interrupted by frightful dreams.
In morning starts up from sleep as from a fright.

[38] **Time.** Morning: feels <; vertigo and nausea; gastric symptoms <; heat on rising, mouth dry and sticky; sweat.
Forenoon: attacks of giddiness last greater part; very weak; stupefying headache <; later hours, weariness of limbs; sleepiness.
Day: itching on front of head; great sleepiness; drowsy.
Afternoon: feels >; influenza <; chill.
Evening: attacks of giddiness, urging to urinate <; toward, shivering and horripilations <; influenza <; toward, heaviness of limbs; many ideas occupy mind, prevent sleep; chill.

Google

9 P.M.: paroxysms of tertian ague.
Night: awakes with a whirling sensation; palms burn; restless; heat, only tertian ague paroxysms.

[39] **Temperature and Weather.** Hot drinks: toothache <; cannot bear anything hot in mouth.
When overheated: itching on head <.
Warm stove: chilliness >.
Warmth: stitches in forehead and scalp.
Returning to room: twisting, screwing pain from r. side of head to temple.
Open air: vertigo >; feels >; when walking, lachrymation; spasmodic sneezing and lachrymation.
Anything cold in mouth causes pain.
Cold drinks: toothache <.
Cold air: toothache < from walking.
Cold: < all symptoms; cough <; sensitive to.

[40] **Fever.** Chilliness and sensitiveness to cold.
Frequently recurring fits of shuddering, passing off quickly without being immediately followed by heat or thirst; suddenly feels hot, especially in face; feels as if a hot breath came out of mouth and nose and heated neighboring parts; no thirst; very comfortable feeling in whole body, and clearness of head; fits of shuddering recur eight or ten times at intervals; paroxysms of heat less frequent but last longer.
Chill without thirst, often without subsequent heat.
Violent chilliness, as if dashed with cold water, > by a warm stove.
Dry spasmodic cough with pain in ribs and tearing in all bones, during chill.
Thirst begins as chill leaves.
Thirst for warm drinks before heat.
Chill: afternoon or evening, returning at same hour; often without subsequent heat; predominates particularly on extremities, with heat of face; runs from below upward.
Evening fever with cold hands and feet and burning face.
Whole body feels hot during coryza. *Influenza.*
Heat mostly of head and face, often interrupted by shivering, always returning at same hour.
Feverish; he feels sick, anxious, starts easily, trembles, breathes short and hot.
Febrile condition, an unwell, sick feeling, restless anxiety, easy startings, short hot breath, trembling, great orgasm of blood, eyes weak and unsteady, as if everything were in motion, as if air itself were in tremulous motion; irresistible desire to sleep, with yawning, icy-cold, shivering without shaking, constant nausea.

Google

‖Heat: only at night and after rising in morning, more internally or only hands, forehead, lips and cheeks feel hot; hands are constantly dry and rough; mouth completely dried up and sticky, in morning; moderate thirst, desire for juicy food; no perspiration, daily for two weeks; head and face, as if he had taken wine, not perceptible to hand, for three hours.

Heat in head not felt externally; internal chilliness.

‖Sweat of soles of feet.

Apyrexia: constantly chilly; loss of appetite; eructations sour, rancid; vomiting of bile and bitter mucus; oppressive bloatedness of stomach; pain in chest; debility; sour eructations.

‖Sweat often during heat; in morning hours with sleep; on face, rest of body cold.

‖‖Tertian ague of several months' duration which had been treated with Cinchona; chill predominates; thirstlessness and bulimia alternating with aversion to food.

‖‖Violent shaking of limbs as in a severe chill, so that she could not stand and hardly speak, without any sensation of coldness, although surface was cold to touch; then heat and thirst followed by sweat; twelve to eighteen attacks during twenty-four hours, < every other day. θAgue.

‖‖Tertian ague, paroxysms at night, after use of household remedies paroxysms ceased for a short time; finally returned and set in daily, always at same hour; chill moderate, followed by thirst and severe long-continued fever with headache.

‖‖Stages not well marked, shivering often recurs after onset of heat, or there are heat and coldness at same time in different parts of body, thirst at one time present, at another absent, little alteration in pulse, sweat profuse but of short duration; transient nausea; aversion to food during paroxysm; accumulation of water in mouth; belching; scratching in throat as from something sharp, and sensation as if a soft body in throat must be constantly swallowed; paroxysms appear at 9 P.M. θTertian ague.

‖‖Intermittent fever during Spring; severe chill without subsequent heat or sweat; during apyrexia great weakness of limbs.

‖‖Ague with regurgitation of food and nausea; thirst bebetween chill and heat.

‖‖Paroxysms recur at same hour; chill predominates; thirst only between chill and heat; during apyrexia constant chilliness, cough, oppressed breathing and pain in chest.

Digitized by Google

11 Ague paroxysms consisting only of a cold stage; after abuse of Quinine.

11 Paroxysm invariably at 3 P.M., chill lasted two hours, with some thirst; heat violent of three hours' duration, and sweating for four hours; no thirst in heat or sweat. θQuartan ague.

11 Fever where gastric symptoms prevail, with dry, convulsive cough in cold stage. θQuartan ague.

11 **Attacks, Periodicity.** Alternating: canine appetite and disgust for meat and sour things; thirstlessness and bulimia with aversion to food.

At intervals: eight or ten times fits of shuddering.

Every ten minutes: chilliness up back.

At same hour: cough; chill.

Invariably at 3 P.M.: paroxysms of chills.

Daily: twisting pain in head; for two weeks heat in head and face; twelve to eighteen attacks; shaking.

Nightly: cough.

Every other day: attacks of shaking <.

At new or full moon: cough <.

Ague: of several months' duration.

Spring: intermittent fever.

12 **Locality and Direction.** Right: screwing pain, in side of head; heaviness in side of forehead; pain in shoulder; smarting in hypochondrium; numbness and tingling down leg and foot.

Left: severe stitches in ear; jerking in muscles of upper jaw; beating in side of gastric region; spasmodic contraction of abdominal muscles; he bends to side.

Left to r.: stitches in throat, sore throat; tonsillitis.

Upward: chilliness running from feet to head.

From below upward: chill.

13 **Sensations.** As if things were turning around each other; as if she would fall if she did not hold on to something; as if eyes went round with the whirling sensation; lips as if scalded; tongue as if full of blisters; as of a skin hanging loosely in throat; as if uvula were down; as if œsophagus would be closed; as of a body in throat which he must swallow down; as of a lump in throat; as if a morsel of food had lodged in throat; as of a worm in œsophagus; as if a sore spot were pressed upon; as of a lump in abdomen; as if a ball of thread were moving and turning rapidly through abdomen; as if knives were cutting abdomen; as if abdomen were sunken; abdomen as if empty; croaking as of frogs in abdomen; as of something alive in abdomen; as if stomach were gnawed; as of a thread or string in throat; as if throat were tied with a string;

Digitized by Google

as if circulation were suspended; as if tape prevented circulation in chest; as if interior of bones were scraped and cut with a sharp knife; as if hot breath came out of his mouth and nose; as if dashed with cold water; as if everything were in motion; as if air itself were in tremulous motion; as if he had taken wine; shaking as if in a severe chill; as of something sharp in throat; as if a soft body in throat must be constantly swallowed.

Pain: in joints and muscles, in tongue and down throat; in region of stomach; in chest; in r. shoulder into chest; in ribs.

Intense pain: in all bones and joints.

Severe pains: in frontal region.

Boring, tearing: in thighs.

Tearing: in all bones.

Cutting pains: in throat; in abdomen; in ovary.

Shooting: down in front of thigh and up to r. scapula.

Stitches: in temples; fine prickling, in skin of forehead and scalp; in l. ear; in throat; in vertex; in side of chest; in muscles of arms; in hips; in muscles of thighs.

Stitching pains: in hypochondria.

Boring, cutting, or scraped feeling: in bones.

Twisting, screwing pain: from r. side of head to both temples.

Pinching: around umbilicus.

Dull pain: in carious teeth.

Rheumatic pains: in hips.

Burning-boring pains in abdomen.

Burning pain: in stomach; along chest as high as pit of throat.

Burning: of mouth; of hands; in point on top of head; of scalp; of face; on tip of tongue; in œsophagus and stomach; in region of navel; in abdomen; in anus; in rectum; in urethra; in chest; in tibia.

Burning itching: most on front of head and behind ears.

Smarting: in r. hypochondrium.

Sore pain: in tongue.

Stinging: in both thighs.

Soreness: of throat; of tongue.

Bruised feeling: in back and spine and sacral region.

Drawing: in spermatic cords into shoulders; through limbs.

Stupefying oppressive sensations: in forehead.

Heat: spreading from head over whole body; of lips; in abdomen; in stomach; in head.

Tingling: down r. leg and foot.

Google

Tickling: in ears.
Scraping: in throat.
Roughness: in throat.
Jerking: in muscles of l. upper jaw.
Beating: in muscles of l. upper jaw; in l. side of gastric region.
Pressure: in head; on eyeballs; in eyes.
Heaviness: of head; r. side of forehead, then to left; of feet; of limbs.
Oppression: of chest.
Dulness: of head.
Sensation of narrowness: in throat.
Constricted feeling: deep in throat.
Turning and twisting: through whole abdomen.
Boring, whirling: in region of abdomen.
Weariness: of limbs.
Empty feeling: in stomach.
Dryness: of mouth; of tongue; of palms; of lips; of fauces and throat.
Crawling: of scalp; like ants in skin.
Numbness: down r. leg and foot.
Itching: of scalp; in ears; in nose; in anus.
Coldness: in stomach; of limbs.

[44] **Tissues.** Boring, cutting or scraped feeling in bones.
Inflammation of internal organs.

[45] **Touch. Passive Motion. Injuries.** Pressure: on larynx, throat sore.
Scratching: itching of scalp >; violent tickling and stinging on head and behind ears.

[46] **Skin.** Crawling sensation like ants in skin.
Red spots and stripes, more marked in cold.
Gray dingy color of skin.
Red spots on face or on chest.
Parchment-like dryness of skin.
Measles.

[47] **Stages of Life, Constitution.** Suited to persons of light hair, fair complexion, with a weakened, relaxed muscular system.
Children; old people.
Boy, æt. 6; ague.
Young man, æt. 16, plethoric; tænia.
Mrs. R., æt. 28, suffering more or less for about three months; she could only ascribe her condition to some extra strain, mental and physical, to which she had been exposed; there is a tendency to neurotic disease in her family; one brother has lately died in an insane asylum, and another has shown symptoms of mental weakness.

Google

Man, æt. 48, suffering 8 days; ague.
Gardener, æt. 55, large, robust, jaundiced hue, suffering several weeks; quartan ague.

[46] **Relations.** Antidoted by: *Conium*, *Pulsat.*
Compatible: After *Bryon.* in pleurisy; *Arsen.*, *Bellad.*, *Mercur.* and *Nux vom.* follow well.
Compare: *Verat. alb.*, *Colocyn.* (ovaritis); *Colchic.*, *Lycopod.*, < 4–8 P.M. *Pulsat.* > open air.

SABINA.

Savine. *Coniferæ.*

An evergreen shrub native of the south of Europe. The tincture is made from the young fresh tops of the branches.

Proved by Hahnemann, Gross, Fr. H., Herman, Hartmann, Stapf, etc.; Archiv für Hom., vol. 5; Hering, Prak. Mittheilungen, 1827; Buchner, A. H. Z., vol. 20.

[1] **Mind.** Music is intolerable to her.
Much irritability of temper, hysteria.

Digitized by Google

Hypochondriacal mood.
Great tiredness and laziness, with a feeling of deep-seated inward trouble, which makes him melancholy and sad.
Irritability of temper, with sour stomach and great anxiety; hypochondriacal mood; rheumatic subjects.
[3] **Sensorium.** Vertigo: especially in morning, fears she will fall; everything turns black before her eyes; suppressed menses; with congestion to and heat in head; when standing; as if he would fall; with obscuration of vision.
[4] **Inner Head.** Headache, especially in temporal eminences, as if parts were pressed asunder; it comes suddenly, disappears gradually and recurs frequently.
Frontal headache, pressing down on eyes as if they would be pressed out; < in morning on rising; > in open air.
Transitory tensive pain in forehead, as if skin had grown fast, with tension in eyes.
Pressure and dulness in head, especially in forehead.
Sense of painful stricture over temples.
Circumscribed pain in each temporal region.
[5] **Sight and Eyes.** Lustreless eyes.
[6] **Hearing and Ears.** Buzzing in ears.
[7] **Smell and Nose.** Dry coryza.
Epistaxis, preceded by dulness and pressure in forehead.
Redness of skin around alæ nasi, painful to touch.
[8] **Upper Face.** Flushes of heat in face, with chilliness all over and coldness of hands and feet.
Pale face; eyes lustreless with blue rings around them.
Pimples on cheeks and forehead.
Black pores in face and on nose.
[10] **Teeth and Gums.** Drawing toothache caused by masticating.
||Throbbing toothache, appearing toward evening and at night, < after eating and from warmth of bed; sensation as if tooth would burst; throbbing in all the bloodvessels; belching; profuse discharge of bright red blood from genitalia between periods.
||Toothache after a gouty pain in great toe had been driven away by external applications.
Toothache evening and night.
Tearing pain in roots of molars.
Swelling of gums around broken teeth.
[11] **Taste and Tongue.** Bitter taste of food, of milk and coffee.
[12] **Inner Mouth.** Offensive breath.
Dryness of mouth and œsophagus without thirst.
Dryness of mouth and throat; the saliva is quite white, and becomes frothy while talking.
[13] **Throat.** Dryness in throat with drawing pain.

Google

Sensation of swelling in throat, as if he had to swallow over a foreign body.

Sensation of a lump in throat; when trying to swallow, cannot; can swallow food.

[14] **Appetite, Thirst. Desires, Aversions.** Constant desire for acids (especially lemonade) and roasted coffee.

Appetite poor.

[16] **Hiccough, Belching, Nausea and Vomiting.** Burning in stomach; morning sickness.

Heartburn and sour eructations, especially when sitting bent, which position also aggravates other symptoms.

Paroxysms of nausea and qualmishness when she is in a crowd.

Frequent empty retching.

Vomiting: of bile; of undigested food eaten day previous.

[17] **Scrobiculum and Stomach.** Stitches in pit of stomach, extending to back.

Frequent burning in pit of stomach, with drawing, twisting and gurgling in bowels, bearing down toward sexual organs.

[19] **Abdomen.** Tympanitis; bloatedness of abdomen; rumbling in evening, in a warm room.

Writhing and pinching in abdomen, in umbilical region; frequently recurring with increasing violence and a sensation as if vomiting would come on, without nausea.

Slight sensation of motion in abdomen, as if something were alive.

Quivering in abdomen, as if there were something alive in it, resembling fœtal movements.

Laborlike pains in abdomen, down groins.

Soreness of abdominal muscles.

Pressing down toward genitals.

[20] **Stool and Rectum.** Diarrhœa: with pain extending from back through to pubes; in rheumatic or gouty women; with much flatulence.

Stools: of blood and mucus; frequent urging, finally a liquid portion is discharged, followed by a hard portion.

Constipation: stools hard, difficult and painful; pain from back to pubes.

Hemorrhoids with discharge of bright red blood, causing pain in back, from sacrum to pubes, biting sore pain in the varices, especially during morning stool.

Hemorrhoids with excessive discharge of bright red blood or blood mixed with mucus; cutting, pressive pain low down in abdomen; pressing, urging pain in sphincter ani; constant urging to stool; itching and burning in anus; paroxysmal stitching pain in small of back.

Google

[21] **Urinary Organs.** ‖Nephritis, with retention of urine, or discharge by drops, with burning; ardor urinæ in rheumatic subjects.
‖Vesical irritability, depending on gouty diathesis.
Diminished discharge of red urine, with strangury.
Frequent violent urging to urinate, with profuse discharge.
Urine bloody and albuminous.

[22] **Male Sexual Organs.** Sexual desire increased, with violent continuous erections.
‖Inflammatory gonorrhœa, with discharge of pus.
‖Rheumatic gonorrhœa.
‖Glans penis dark red, with burning soreness to touch; painfulness of prepuce, cannot retract it; attacks of pain in frænum præputii. θGleet.
Hard swelling on penis.
‖Sycotic excrescences, with burning soreness.
‖Fig-warts with intolerable itching and burning; exuberant granulations.

[23] **Female Sexual Organs.** Increased sexual desire almost amounting to nymphomania; almost insatiable desire for an embrace.
Ovaritis, stitches in vagina, deep from before backward.
‖‖Inflammation of ovaries or uterus after abortion or premature labor.
Contractive pain in region of uterus.
‖Uterine pains running from back to groins.
‖Painful active congestions of uterus.
‖Acute metritis; metritis hæmorrhagica.
‖Lateral and posterior displacements of uterus from general atony.
‖Remittent but fixed pain in uterus, at times stitching in character; < during menstruation; colic with the menses; long-continued leucorrhœal discharge after menses; pain during an embrace; uterus enlarged or swollen (mother died of carcinoma uteri).
‖The os tincæ is open, the blood looks red, the discharge is profuse and paroxysmal, especially during motion. θThreatened abortion.
‖Discharge of blood between periods, with sexual excitement.
‖Copious hemorrhages, accompanied by uterine colic; contractive laborlike pains extending from back to pubes and great urging to urinate.
‖Pain or feeling of malaise, extending between sacrum and pubes and experienced in those points. θMetrorrhagia.
‖‖Metrorrhagia: resulting from plethora; clotted and fluid

Google

blood, pain extending from sacrum or lumbar region, to pubes; with severe bearing down, extending from lower part of back around abdomen and down thighs, blood bright red, thin, liquid; laborlike pains in lumbar and uterine region, discharge of large clots of blood, bright red, coming in gushes, particularly profuse on motion, os uteri being constantly open; < by least motion, often > by walking; produced by great irritability of organism, in patients who have menstruated very early in life and very freely, and have always had more or less tendency to miscarriage

‖ Without any apparent cause menses recurred three times during the month, each time very abundant and lasting three days; the following month while carrying a heavy burden a stream of blood suddenly gushed from genitals, attended with violent hypogastric pains, weakness of head almost amounting to vertigo; paleness of face; eyes heavy, lustreless; great thirst; little appetite, loose stool; urine red by admixture of blood; drawing, bearing-down pains from fundus of uterus toward sacrum and along broad ligaments to each side, appearing periodically, accompanied at one time by a discharge of black fluid, at another, of coagulated blood; when the pains are absent she has constant hemorrhage; pains > by pressure; least motion increases discharge; hypogastrium distended, has a doughy feeling, but only tender on firm pressure; temperature of skin not elevated, that of extremities lowered; pulse full, soft, quick; sleep uneasy; frequent shivering and mental anxiety. θMetrorrhagia.

‖ After miscarriage (two months ago) placenta remained fourteen days; had a constant hemorrhage which could not be stopped; a tampon relieved, but when removed hemorrhage returned; had occasional laborlike pains which caused some strings and shreds to pass.

‖ Protracted uterine hemorrhage arising from a loss of tone in vessels of uterus, whether from disease or weight and pressure of fœtus in utero; blood dark and clotted; gouty subjects.

‖ Menses: too profuse, too early; last too long; partly fluid, partly clotted and offensive; flow in paroxysms; with colic and laborlike pains; pains from sacrum to pubes.

‖ Low grade of asthenic fever, violent menorrhagia; set in with great violence, discharge red, clotted, partly fluid, accompanied by a pain running from back through to pubes; the noise of the piano seemed to set her distracted.

Google

In poor health for two years, from living in a damp house in an ague neighborhood; had chills several times; menses profuse, with large coagulated, conical clots. θMenorrhagia.

Girl, æt. 14, had menstruated for more than a year and always irregularly; there was an almost incessant discharge of bright-red blood for four weeks, so that it was impossible to determine the actual periods of commencement of menstruation; walking very much lessened the hemorrhage, but it returned again very soon. θMenorrhagia.

Five months after delivery, very profuse discharge of blood, with pains in back and laborlike pressing toward pubes; for six days constant dribbling interrupted by profuse gushes of blood with discharge of large masses of dark coagula accompanied by laborlike pains; < from motion; rapid prostration; pale face; vertigo; chilliness; uterus prolapsed, os pointing to l. side while fundus lay on opposite side. θMenorrhagia.

Menorrhagia during climacteric period in women who formerly aborted.

Dysmenorrhœa accompanied by violent headache; menses generally delayed, lasting about seven days, scanty, coming for a few minutes at a time, then ceasing for six or eight hours, bright, clotted, without flow; pain in hypogastrium going to back; feeling of obstruction internally; dragging pain in back and pain throughout lower extremities which seems deep seated; easiest position is on flat of back with limbs extended; pain < walking, > from warmth; severe pain in head principally in anterior part and eyes, < stooping, walking, > from pressure; nausea, at times vomiting; feverishness; cold hands and feet; pulse 120; violent rapid pulsation felt throughout body, except in head; no premonitory symptoms, pain coming about two hours after menses and ceasing on second day.

Dysmenorrhœa with violent pain extending from back through to pubes, rheumatic in origin.

Kate R., 16 years old, has not yet menstruated, suffered three years ago from intermittent fever, and since then complained of frontal headaches pressing down on eyes as if it would push them out; < in morning when rising, > in fresh air; cachectic features with blue rings around eyes, especially in morning, toothache most severe at night in bed, > walking about, < by eating; paroxysms of nausea and qualmishness when in a crowd; frequent burning in pit of stomach, drawing, twisting and gurgling in bowels, lasting for hours;

Digitized by Google

bearing down toward sexual organs; shortness of breath; palpitation at every motion, especially when ascending; pressing pains in chest; heaviness of lower extremities, with painfulness of thighs when walking; drawing, tearing pains in extremities, especially at night; great lassitude and sleepiness. θChlorosis primaria amenorrhœica.

‖Anna L., 17 years old, strong constitution, menstruated in her thirteenth year; menses returned regularly until they became suppressed about 18 months ago from immoderate dancing; complains since of severe vertigo, especially in morning and after exertion, so that she is afraid of falling, and everything turns black before her eyes; pressing pains in forehead; burning in ears, greenish-yellow corroding leucorrhœa; shortness of breath, palpitation, sweats easily, painful lassitude; leuco-phlegmatic expression; cheeks and forehead covered with pimples; constant desire for acids and roasted coffee. θChlorosis secundaria metastatica.

‖Yellowish, ichorous, fetid leucorrhœa, and painful discharges of fetid blood every two weeks; at climaxis.

‖‖Leucorrhœa: of pudenda; of consistence of starch; copious, milky, causing itching; ropy, glairy from cervical canal; with drawing pains in broad of back through to pubes.

‖Corrosive leucorrhœa since commencement of first pregnancy, causing soreness and itching of thighs.

‖Stitches from below upward deep in vagina.

‖Condylomata which itch and burn.

‖Cysts in vulva, sensitive or with tearing pains during rest.

‖Stitches in l. nipple.

Voluptuous itching in nipples.

"**Pregnancy. Parturition. Lactation.** ‖Promotes the expulsion of moles.

‖Tendency to abortion, especially at third month; discharge of bright-red, partly clotted blood, < from any motion; pain from sacrum to pubes.

‖Greatest anxiety; constant fear that she will abort; for last two days on slightest motion, discharge of blood, alternately bright red, fluid and dark or in clots; labor-like pains from back to pubes; external genitals hot to touch; os uteri dilated half an inch. θThreatened abortion.

‖During fifth month of pregnancy labor pains come on at regular intervals of about fifteen minutes, with a slight but unceasing flow of bright-red blood. θThreatened abortion.

Digitized by Google

‖Profuse flow of blood from vagina; os considerably dilated; vagina filled with dark coagulated blood; chilly; nausea; great thirst; much prostration; third month of pregnancy.

‖Hemorrhage of dark-red blood, at times fluid, at others clotted; not the slightest pain in back or hypogastrium; great prostration. θThreatened abortion.

‖Miss Rose L., about 22 years old, a thin, delicate female of nervous temperament, forsaken and unhappy; seven months pregnant; morning sickness with loss of appetite and diarrhœa; some blood has passed at intervals of two and three weeks; profuse metrorrhagia and diarrhœa; flooding much < by moving or going to chamber, when it flows profusely and is of an arterial color; constant pain from sacral region to pubes; child has not moved since two days; face pale, she begins to feel faint; os dilated and patulous (delivered two months later of a healthy child).

‖After a miscarriage violent hemorrhages, lasting each time eight to ten days; during first five days profuse discharge of bright-red fluid blood, without pain.

‖Uterine hemorrhage of four weeks' duration after abortion.

‖Retained placenta after abortion; free discharge of blood; mouth of uterus closed; patient very nervous.

‖Premature rupture of membranes and free escape of liquor amnii; occurred forty days previous to labor, caused by overwork and followed by labor pains and discharge of blood.

‖On eighth day after labor, reappearance of blood, lochial discharge having already ceased; on ninth day three attacks of hemorrhage, discharge profuse, containing a large number of clots, < on rising, causing loss of consciousness; heat over whole body with sweat, face cold and pale.

‖Atony of uterus; painless loss of dark-red blood immediately after delivery; discharge of fluids and clots with each pain.

‖Retained placenta; pain, or an uneasy, bad feeling, extending from sacrum to pubes; a slight sensation of motion in abdomen; intense after-pains, notwithstanding the retention, with discharge of fluid blood and clots in about equal proportion with every pain.

‖Retained placenta from atony of uterus.

‖After-pains with sensitiveness of abdomen.

‖Metritis after parturition.

[25] **Voice and Larynx. Trachea and Bronchia.** Crawling and tickling in larynx exciting cough and mucous expectoration.

Google

Dry, hacking cough and tickling in trachea; expectoration streaked with blood next day.

[30] **Respiration.** Shortness of breath.

[33] **Inner Chest and Lungs.** Intermittent stitches in clavicle.

Tensive pain with pressure in middle of sternum, neither increased by expectoration nor inspiration.

Pressing pains in chest.

‖Hæmoptysis.

[39] **Heart, Pulse and Circulation.** Palpitation at every motion, especially when ascending.

Pulse unequal; generally quick, strong and hard.

Violent beating of bloodvessels in whole body.

[41] **Neck and Back.** Constant pain in small of back, obliging him to bend the back inward.

Paralytic pain in small of back; would like to stretch; > bending backward.

‖‖Drawing pains in small of back, extending to pubic region.

‖Indescribable uneasiness in lumbar vertebræ; dragging sensation from behind forward resembling weak labor pains.

Weariness in lumbar region.

Laborlike pains drawing down into groins.

[43] **Upper Limbs.** Pain as if sprained, in r. shoulder joint, even during rest.

‖Pressive pain in both upper arms, near elbow joint, from without inward, < on touch and motion.

Paralytic tearing along r. upper arm as far as hand.

Stinging in both upper arms, from within outward, near elbow joints.

Aching pain in right radius, < from motion or touch.

‖Arthritic stiffness and swelling of wrist joint, with tearing and stinging, made almost insupportable when hand hangs down.

[53] **Lower Limbs.** Rheumatism of metatarso-phalangeal joint of big toe, characterized by great swelling, bright shining red; intense sensibility to touch and motion; < at night; high fever.

Heaviness of legs, with painfulness of thighs when walking.

Stinging pains in hip joints, in morning and when breathing.

Sensation of coldness in whole (r.) leg.

Ulcers on tibia, with a lardaceous base.

Swelling, redness and stitches in big toe. θGout.

The middle of anterior surface of his thighs feels bruised and painful.

Tearing pain with pressure in metacarpal bones of both feet.

Google

Sharp stitches from within outward in heels.

Painful drawing in joints of r. toes, < during a walk.

[34] **Limbs in General.** Drawing, tearing pains in extremities, especially at night.

‖A man æt. 42; haggard, emaciated, stooping gait, thin, grey hair, hollow eyes, skin of an ashy hue; from time to time dry cough, with dyspnœa; complains of weakness and decrepitude, no strength to work, little appetite, slow digestion, sleep restless and full of dreams, sticky sweat toward morning; here and there through joints a gouty lamelike pain, now in shoulder and elbow joint, now in hip and knee; pains < in a warm room and > in open air; pains usually in one side of body, mostly r.; troublesome pulsation in different bloodvessels, especially when taking a deep breath, < in evening in bed, which he has to leave again, not being able to return until morning; transitory, tensive pain in forehead, with sensation as if skin had grown fast, with tension in eyes; redness of skin around alæ nasi, painful to touch; dryness of mouth and œsophagus without thirst; collection of white frothy mucus, filling corners of mouth when talking; sensation of a body in throat, which he tries to swallow but cannot, it offers no impediment to swallowing of food; heartburn and sour eructations, especially when sitting bent, which likewise aggravates the other symptoms; > from sitting erect, from moving and stretching limbs, for which he has an involuntary desire; rumbling and gurgling in abdomen, especially in evening, in warm room; great tiredness and laziness, with a feeling of deep-seated inward trouble, which makes him melancholy and sad. θChronic rheumatism.

Great weakness and weariness of limbs, with tearing pains at night; when very warm; > in cold air.

‖Red and shining swelling of great toe, with excessive pains, < by least touch or motion; heaviness of affected limbs; fever < in evening; wandering pains, burning, affecting one joint after another, especially big toe and hand; > by cool applications; changes her position often to get relief. θArthritis.

[35] **Rest. Position. Motion.** Rest: tearing pains in cysts; pain in shoulder joint.

Lying on flat of back with limbs extended, easiest position during dysmenorrhœa.

Must lie down: heaviness of body.

Sitting bent: heartburn and sour eructations <.

Standing: vertigo.

Stooping: pain in head <.

Digitized by Google

When hand hangs down: tearing and stinging in wrist joint <.
Must bend the back inward: pain in small of back.
Elevating limbs: > pain in ulcers.
Rising: discharge of clots <.
Changes position often to get relief: arthritis.
Motion: profuse discharge from uterus; palpitation; always increases discharge; palpitation; pain in upper arms <; pain in r. radius <; pain in big toe <.
Moving and stretching limbs: eructations and heartburn >.
Walking: metrorrhagia >; lessened hemorrhage; dysmenorrhœa <; pain in head <; painfulness of thighs; drawing in toes <.
Ascending: palpitation <.
Lies on l. side: during sleep.

[36] **Nerves.** Feels weary and weak in all her limbs with great despondency.
Heaviness and indolence of body, obliging him to lie down.
Great lassitude and heaviness.
Very tired and lazy.
Is very nervous and hysterical, and if she becomes pregnant is almost sure to abort about third month.
Nervousness so great that music becomes unbearable, it goes through bone and marrow.

[37] **Sleep.** Sleeplessness and restlessness after midnight, with heat and profuse perspiration.
Lies on l. side during sleep.

[38] **Time.** Morning: vertigo <; frontal headache <; pain in varices during stool; pain in hip joints; toward, sticky sweat; tenseness in ulcer <.
During day: great chilliness.
Toward evening: toothache.
Evening: rumbling in abdomen; pulsation in different bloodvessels < in bed; fever <; chill with shivering; tenseness in ulcer <.
Night: toothache; pains in extremities <; pain in great toe <; drawing and tearing in extremities <.
After midnight: sleepless and restless.

[39] **Temperature and Weather.** Warmth of bed, toothache <; pain (dysmenorrhœa) >; pain in ulcer <.
Warm room: rumbling in abdomen; rheumatic pains <; gout <.
Open air: frontal headache >; rheumatic pains >; tenseness in ulcer >.
Cool applications: wandering pains in joints >.
Cool air: weariness and weakness of limbs >; gout >.

Digitized by Google

40 **Fever.** Chill in evening with attacks of shivering.
Great chilliness during day.
Shivering with obscuration of sight, followed by sleepiness.
Burning heat of whole body, with great restlessness.
Flushes of heat in face, rest of body chilly, hands and feet cold.
Sweats easily; sweat every night.

41 **Attacks, Periodicity.** Paroxysms: discharge from uterus; of nausea and qualmishness.
At intervals of fifteen minutes: labor pains.
Periodically: pains in uterus.
Every night: sweat.
Three times during month: menses.
Every two weeks: painful discharge of fetid blood.

42 **Locality and Direction.** Right: pain in shoulder joint; tearing in upper arm; aching in radius; coldness in leg; painful drawing in joints of toes.
Left: stitches in nipple; lies on side during sleep.
From before backward: stitches in vagina.
From behind forward: dragging in lumbar vertebræ.
From below upward: stitches in vagina.
From within outward: stinging in upper arms; stitches in heels.
From without inward: pressive pain in arms.

43 **Sensations.** As if she would fall; as if parts of temporal eminence were pressed asunder; as if eyes would be pressed out; as if skin had grown fast on forehead; as if tooth would burst; as if he had to swallow over a foreign body; as of a lump in throat; as if vomiting would come on; as if something were alive in abdomen; r. shoulder joint as if sprained.
Pain: in temporal eminences; from back through to pubes; in frænum; in uterus from back to groins; throughout lower extremities; from sacral region to pubes; in small of back.
Violent pains: in hypogastric region; from back to pubes.
Severe pain: in head and eyes.
Tearing pain: in roots of molars; in cysts, in vulva; in wrist joints; in metacarpal bones of both feet; in extremities.
Paralytic tearing: along upper arm as far as hand.
Throbbing pain: in teeth.
Stitches: in pit of stomach; to back; in vagina; in l. nipple; in clavicle; in big toe; in heels.
Stitching pain: in small of back; in uterus.
Cutting pressive pain: low down in abdomen.
Pinching: in abdomen.
Dragging pain: in back.

Google

Pressing urging pain: in sphincter ani.
Pressing pain: in chest; in forehead; in upper arms.
Tensive pain: in forehead; in middle of sternum; in broad of back through to pubes; in small of back; in joints of r. toes; in extremities.
Contractive pain: in region of uterus.
Aching pain: in r. radius.
Bearing-down pains: from fundus of uterus toward sacrum and along the broad ligaments to each side.
Drawing pain: in teeth; in throat.
Laborlike pains: in abdomen down groins.
Paralytic pain: in small of back.
Lamelike pain: in joints.
Burning sore pain: in the varices; in glans penis.
Circumscribed pain: in each temporal region.
Dragging sensation: in lumbar vertebræ.
Burning: in stomach; in pit of stomach; in anus; of condylomata.
Stinging: in both upper arms; in wrist joint; in hip joints.
Soreness: of abdominal muscles; of thighs.
Painfulness: of thighs.
Painful stricture: over temples.
Throbbing: in all bloodvessels.
Tension: in eyes.
Pressure: in head; in forehead; in metacarpal bones of both feet.
Pressing: on eyes; toward genitals.
Heaviness: of lower extremities.
Dulness: in head; in forehead.
Drawing, twisting and gurgling: in bowels.
Writhing: in abdomen.
Weariness: in lumbar region; of limbs.
Weakness: of head; of limbs.
Dryness: of mouth and œsophagus; of throat.
Tickling: in larynx; in trachea.
Crawling: in larynx.
Itching: in anus; of pudenda; of thighs; of condylomata; voluptuous, in nipples.
Coldness: of hands and feet; in r. leg.

"**Tissues.** Drawing pains through long bones.
Red, shining swelling of affected parts.
Gout; arthritic complaints; tearing, stinging in joints after they become swollen; < in heated room; > in cool air or cool room; arthritic nodes.
Chlorosis.
Throbbing in all the bloodvessels.
Hemorrhages.

"**Touch. Passive Motion. Injuries.** Touch: skin around

Digitized by Google

alæ nasi painful; glans penis sore; pains in upper arms <; pain in r. radius <; intense sensibility of great toe.
Pressure: pains in uterus >; hypogastrium tender; pain in head >.

[46] **Skin.** Black pores in skin, especially of face.
Fig-warts, with intolerable itching and burning; exuberant granulations.
Deep ulcers; prickling feeling of tenseness in ulcer; < morning and evening, exertion, touch, warmth of bed; > open air, cold, raising or elevating limbs.

[47] **Stages of Life, Constitution.** Chronic ailments of women; arthritic pains; tendency to miscarriage.
Gouty diathesis.
Girl, æt. 12, came into puberty at the age of eleven; dysmenorrhœa.
Girl, æt. 14, tall, thin, scrofulous, has menstruated for more than a year; menorrhagia.
Girl, æt. 16, not yet menstruated, suffered three years ago from intermittents, since then complaining; amenorrhœa.
Girl, æt. 17, strong constitution, menstruated in her thirteenth year; suppressed 18 months ago from immoderate dancing; amenorrhœa.
Girl, æt. 19, sanguine temperament, thin, weakly constitution, menstruated regularly since sixteenth year, seven years ago had hæmoptysis: metrorrhagia.
Woman, æt. 21, delicate, nervous, always aborted at third month after slightest mental disturbance, hemorrhage being profuse; threatened abortion.
Mrs. D., æt. 21, nervous temperament, suffering since her first pregnancy; leucorrhœa.
Miss R. L., æt. 22, nervous temperament, thin, delicate, forsaken and unhappy, seven months pregnant; threatened abortion.
Young lady, æt. 23, in good health; menorrhagia.
J. O., æt. 24, medium height, dark complexion, dark hair, nervous temperament, very fond of music, suffering for years; dysmenorrhœa.
Woman, æt. 24; threatened abortion.
Miss P., æt. 25, ill two years; amenorrhœa and anæmia.
Woman, æt 26, delivered two months ago, since then suffering; uterine hemorrhages.
Mrs. J., æt. 27, mother of two children; retained placenta after abortion.
Mrs. S., æt. 26, brunette, married ten years; uterine hemorrhage.
Servant girl, æt. 30, tall, thin; metrorrhagia.
Mrs. A., æt. 30, in poor health for two years, from living in

Digitized by Google

a damp house in an ague neighborhood, having had chills several times; menorrhagia.

Woman, æt. 30, on ninth day after second labor; uterine hemorrhage.

Woman, æt. 30, strong, sanguine choleric temperament, aborted four times, now three months pregnant; threatened abortion.

Woman, æt. 32, three months pregnant; threatened abortion.

Mrs. N., æt. 38, nine months married; dystocia.

Woman, æt. 40, sanguine temperament, passed through four pregnancies, waters each time escaping eight days before labor; threatened abortion.

Man, æt. 42; chronic rheumatism.

Woman, well built, phlegmatic temperament, delivered five months ago, since then has not menstruated; menorrhagia.

[1] **Mind.** Anxiety; worrying, restless, yet mild.
Melancholic; wants to lie quiet; feels faint.
Excited mood.
Delirium; stupid, can hardly collect his ideas, then he laughed without cause, talked incessantly and disconnectedly, frequently looked about him with apparent hallucinations.

[2] **Sensorium.** Stupefaction; dulness of head.
Vertigo; inclines to fall to l. side, while surrounding objects seem falling to right.
Menière's disease; vertigo which comes and goes, often from no observable reason; tendency to fall to affected side, while objects seem to fall away to opposite side; headache frequent but not always present; noises in ear; defective or absent perosseous hearing; absence of gastric symptoms, or so slight as not to account for the other symptoms; indeterminate giddiness in horizontal position, but considerable when raising head or sitting up.

Digitized by Google

[3] **Inner Head.** Rush of blood to head.
Severe headache; piercing, in both temples.
Headache, commencing on top or in back of head, running down sterno-mastoid (more r. side), which is tender to touch.

[4] **Sight and Eyes.** Diminished acuteness of vision.
:Plastic iritis following inflammatory rheumatism, the pupil would contract notwithstanding the local use of a one per cent. solution of Atrop. sulph.; the nightly pain was most agonizing, temporarily > by hot applications.

[6] **Hearing and Ears.** ‖Deafness, with noises in ears.
Nervous deafness.
Diminished hearing.
‖Roaring in ears, with difficult hearing.
≈Disturbs hearing when given for rheumatism (large doses).
‖Tinnitus dependent upon hyperæmia.
‖Auditory nerve vertigo; a troublesome nausea accompanying head symptoms.
Roaring in ears and difficult hearing; hears music; rush of blood to head; excited mood.
‖‖Purulent, fetid otorrhœa.

[7] **Smell and Nose.** Wants to sneeze.
‖Incipient catarrh, patients, especially children, sneeze all day.

[8] **Upper Face.** Dull, heavy aspect; face flushes quickly on slight excitement.

[11] **Taste and Tongue.** Taste: as of something burnt; bitter; food has no taste.

[12] **Inner Mouth.** Mouth and throat dry; burning and dryness of mouth and pharynx.
‖‖Redness of buccal cavity and fauces. θDiphtheria.
‖Stomatitis, the mouth is hot and dry, tongue covered with burning vesicles.
Foul breath and offensive expectoration.
Mouth dotted with white patches, burning, scalded feeling; ulcers on tip of tongue.
‖Canker sores, with burning soreness and fetid breath.
‖‖Canker of mouth, stomach and bowels; patient rapidly sinking.

[13] **Throat.** Burning in throat.
‖Tonsils red, swollen, studded white.
Violent efforts to swallow, with difficulty in swallowing, woke him from sleep; the pain and difficulty became confined to r. side, with sticking along Eustachian tube into ear; swelling of r. tonsil noticeable externally, with sensitiveness to touch and increased temperature in

Google

vicinity; mucous membrane of throat and posterior fauces red, swollen, with ulcers size of head of a pin; after a while a small lump of cheesy matter of strong odor was expectorated.

‖Scarlatina anginosa; diphtheritic form.

‖Little or no fever, but great weakness, difficult deglutition, much inflammation, the exudate soft. θDiphtheria.

‖Diphtheritis; violent fever; entire fauces covered with a white exudate; in two cases hoarseness and barking cough (affection of larynx).

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea, gagging, waterbrash.

Frequent vomiting.

[17] **Scrobiculum and Stomach.** Ecchymoses and ulcerations in mucous membrane of stomach and bowels.

Burning in epigastric region.

Weak nervous sensation in stomach.

‖Flatulent and fermentative dyspepsia.

‖Distension and formation of gases in stomach and bowels after meals.

‖Excessive accumulation of flatus and acidity of stomach, with much belching of gas, anæmia and great irritability with despondency. θDyspepsia.

‖Dyspepsia with putrid eructations and much accumulation of gas on stomach.

‖A young lady of bilious temperament, wasted from a fleshy, strong girl to an emaciated, bony creature; as soon as she would eat, no matter how simple the food, her stomach would bloat up so that it would be necessary to loosen her dress; region of stomach looked like an inflated bladder; after from one to two hours suffering in region of stomach from this extreme distension, was a putrid flatus belched up, accompanied by collapse of stomach and temporary relief; frequent vomiting characterized by putrid fermentation; severe headaches; extremely nervous; sleep fitful and unrefreshing; bowels constipated; urine heavily loaded with sediment; fermentation and decomposition seemed to commence as soon as food reached stomach. θFlatulent dyspepsia.

‖Woman, æt. 30, of very unhealthy family; always suffering from indigestion; daily, some hours after dinner, has diarrhœa; sometimes looks very badly; least error in diet shows effect in an aggravation of the diarrhœa.

‖Girl four years old, had relapse from malignant scarlet fever; inflammation of bowels supervened, with immense distension of abdominal region.

Digitized by Google

[20] **Stool and Rectum.** Diarrhœa; stools green; flushes easily as in hectic; acid, sour, or putrid smelling.

Costive; stool dry, hard; then diarrhœa, watery, sour, yellow, with great weakness.

‖Cholera infantum or other diarrhœa in children, when eructations have a peculiarly putrid and offensive odor.

In a case where tænia solium had existed for nine years four doses of 0.5 acid Salicyl. a dose every hour, followed by half an ounce Ol. ricini, caused in half an hour discharge of tænia ten yards long, with head entire.

[21] **Urinary Organs.** Diabetes mellitus (two cases).

Albuminuria; rheumatic diathesis.

Urine very offensive, largely composed of mucus; microscope revealed pus, blood and an abundance of mucous epithelium. θCatarrh of bladder.

Urine: scanty, clear, brown; three hours after its passage it has a green tinge and deposits a feathery precipitate, consisting of oblong, six-sided, silvery-white crystals of Salicyluric acid; if these are removed the urine becomes at once putrid; if not the urine remains fresh for above a week.

[23] **Female Sexual Organs.** ‖Large leuco-phlegmatic woman, æt. 45; constant dull, heavy pain in cerebellum; great forgetfulness, excessive irritability and frequent hot flushes of fever.

[24] **Pregnancy. Parturition. Lactation.** ‖A primipara, delivered on 9th of May of a large male child; slight lesion of vagina; a piece of membrane as large as fingernail was torn up; membranes unusully tough and extensive and a small shred was left in utero; on third day chill, followed by fever; pulse 120, temperature 105; lochia offensive. θSeptic fever.

‖Confined with second child on May 15th, delivered with forceps owing to the great size of the head; no apparent lesion; lochia not offensive, disappeared on tenth day; considerable hemorrhage after labor, and I suppose a small clot or clots became impacted in uterine blood-vessels and owing to access of air (perhaps) underwent decomposition, and this septic material was absorbed; on eleventh day severe chill, repeated twice next day; pulse 130, temperature 104; chills alternated with febrile heats, and chilliness was excited by slightest touch of anything cold or a swallow of cold water, and she was very thirsty; some pain and swelling of one breast and one knee. θSepticæmia.

[26] **Respiration.** Respiration hurried, sometimes deepened, sometimes shallow or sighing and almost panting, as if labored, but no complaint of difficulty of breathing.

Digitized by Google

[27] **Cough.** Dry cough, of a hard, racking, spasmodic character, < at night in old people.

[28] **Inner Chest and Lungs.** Spasmodic, flatulent asthma; fetid bronchitis; gangrene of lungs.

[29] **Heart, Pulse and Circulation.** Pulse small, rapid, weak.

[31] **Upper Limbs.** ‖Rheumatic gout or rheumatoid arthritis, occurring in some women during climaxis; the pains disappeared, the engorgements and nodosities of fingers subsided, and the hands could again be used.

[33] **Lower Limbs.** ‖Formerly had foot sweats, and since their suppression is more liable to rheumatic pains; attacks especially at night; after an hour's sleep the pains force him to leave bed; he changes to sofa but must soon leave it again, and thus he passes a sleepless night; the seat of pain corresponds exactly to exit of l. ischiatic nerve, goes from behind forward and downward to knees and toes; pain is drawing, shooting, at the toes burning, or as he expresses himself, "as if foot were on an ant-hill" and as if the foot would like to perspire; no fever; can hardly ascend stairs, must look for some support or he might fall. θSciatica.

‖Copious foul-smelling foot sweats.

[34] **Limbs in General.** ‖Heat, redness, soreness and swelling about joints; < in knees, with acute piercing pains; < on motion, > from dry heat. θRheumatism.

[35] **Rest. Position. Motion.** Lying: indeterminate giddiness.

Wants to be quiet: melancholic.

Forced to leave bed: sciatica.

Sitting up: considerable giddiness.

Motion: rheumatism in joints <; exquisitely painful, rheumatism of affected limb causes soreness.

[36] **Nerves.** Weakness, faintness.

[38] **Time.** Night: dry cough <; attacks of rheumatic pains <.

[39] **Temperature and Weather.** Hot applications: rheumatism >.

Dry heat: rheumatism of joints >.

Sitting near open window in a hot room: rheumatism.

Touch of anything cold: excited chilliness.

[40] **Fever.** ‖Slight chill, crawls in spine; yawning; chill in finger tips.

‖Fever continuous, burning, then sweat with relief; fever again, with exacerbation of symptoms.

Sweat at times more, at others less profuse.

Profuse but short-lasting sweat.

Weak, faint after fever and sweat.

Flushes easily, as in hectic.

‖Rheumatic fever.

Google

41 **Attacks and Periodicity.** Daily: some hours after dinner, has diarrhœa.
Nightly: agonizing rheumatism.

42 **Location and Direction.** Right: difficulty of swallowing; swelling of tonsil; severe pain in several joints; pain in deltoid and gastrocnemius.
Left: inclines to fall to side, vertigo; severe pain in all joints; ankle and knee pains; elbow and wrist enormously swollen; pain in wrist and forearm.

43 **Sensations.** As if foot were on an ant-hill; as if foot wanted to perspire; as if head were squeezed between two beams.
Pain: in shoulder and elbow, then in lumbar region; in r. deltoid and gastrocnemius.
Terrific pain: in knee joint.
Severe pain: in all the joints on l. side and several on r. side.
Acute piercing pain: in joints.
Piercing pain: in head.
Shooting pain: in lower limbs.
Burning pains: in toes.
Sticking: along Eustachian tube into ear.
Drawing pain: in lower limbs.
Rheumatic pains: in hands; exit of l. ischiatic nerves to knees and toes.
Dull, heavy pain: in cerebellum.
Dull, aching distress: in stomach.
Soreness: about joints; in r. deltoid and gastrocnemius.
Burning: of mouth and pharynx; of vesicles in mouth; of canker sores; in throat; in epigastric region.
Painful stiffness: of neck.
Dulness: of head.
Weak, nervous sensations: in stomach.
Dryness: of mouth and pharynx.

44 **Tissues.** Pieces of spongy bone became soft as leather in a few days when placed in a half per cent. solution, while compact bone tissue is very slowly softened; enamel of teeth is very slightly affected by it, but the dentine, when it is exposed by caries, is rapidly destroyed.
The increased amount of the salts of lime in the urine soon after Salicylic acid has been taken shows that the acid deprives living as well as dead bone of its lime salts.
Causes a sort of necrosis, especially of tibia.
‖ Ulceration of mucous surfaces.
‖ Acute articular rheumatism.
‖ Rheumatism: acute articular; chronic; gonorrhœal; diphtheritic.

Google

Acute, inflammatory, articular rheumatism attacking one or more joints, especially elbows or knees, with great swelling and redness, high fever and excessive sensitiveness to least jar; motion impossible.

Muscular rheumatism.

Severe pain in all the joints on l. and several joints on r. side; large joints on l. side were attacked, except hip and shoulder, while on r. side the wrist and ankle alone suffered.

A tall young man, æt. 16, suffered from severe acute articular rheumatism; knee joint especially was seat of terrific pain; painful stiffness of neck; excessive perspiration, followed by miliaria; great lassitude; pulse full, soft, very frequent; went out too early and a relapse set in, with same weakening sweats; patient looked anæmic and emaciated; hurried pulse, reminding one of heart's beat in beginning of phthisis.

A teacher suffered from acute articular rheumatism; a relapse followed from carelessness, attack being very severe, with profuse sour-smelling sweats and extensive eruption of miliaria; very nervous, urine showed heavy sediment; desquamation set in just as after scarlet fever in hands and feet; pains first in shoulder and elbow, then in lumbar region, so that the patient could hardly move; during relapse hands greatly swollen, could not be used; sleeplessness or sleep interrupted by frightful dreams, as if his head were squeezed between two beams (stiffness of neck); constipation.

Acute gout.

Rheumatism after sitting near an open window in a hot room, so that she felt hot on one side and chilly on the other; l. ankle and knee joint, elbow and wrist enormously swollen, of a pinkish color, very sensitive, every motion exquisitely painful, pulse 120, high temperature, sweat, etc., even in bed, shocks passed from thigh down to foot so that she had to scream.

Polyarthritis rheumatica, temperature 105; pain intense, tenderness excessive.

Soreness and pain in r. deltoid and r. gastrocnemius, changing next day to l. wrist and forearm; some sensitiveness to touch and great soreness on moving limb; no heat; on following day pain had removed to inside of l. forefinger; when the pain appeared in one part it disappeared in the part which had previously been painful

Purpura hemorrhagica, with hemorrhages from all mucous membranes, accompanied by a constant dull aching distress in stomach and occasional vomiting of blood and mucus.

Digitized by Google

Has a specific action upon serous membranes and should be very useful in dropsical effusions; should be tried in hydrocephalus, hydropericardium and renal dropsy.

May prove useful in caries and necrosis.

[45] **Touch. Passive Motion. Injuries.**

Touch: top or back of head tender; tonsil sensitive; arm sensitive; limbs tender.

[46] **Skin.** Skin red; points on skin like flea-bites.

Skin red and sensitive; rheumatism.

Urticaria.

Sprinkled on indolent or inflamed ulcers is said to induce rapid healing.

[47] **Stages of Life, Constitution.** Healthy-looking child, æt. 5 weeks, suffering over two weeks; diarrhœa.

Girl, æt. 12; rheumatism.

Young man, æt. 16, tall; rheumatism.

Woman, æt. 30, coming from a very unhealthy family; indigestion and diarrhœa.

Man, æt. 80, robust, formerly had foot sweats, and since their suppression is more liable to rheumatic pains; sciatica.

[48] **Relations.** Compare: *Colchic.* (rheumatism, also subsequent weakness); *Kreos.* (piercing in temples; throat; diarrhœa; ulcers, antiseptic properties); *Carb. ac.* (mind; throat; weakness, especially at stomach; hectic; antiseptic properties; topical use; urine); *Salicyl. of Soda* (tinitus aurium, confusion and deafness; rheumatism); *Nitr. ac.; Arsen.; Phosphor.* (bones); *Lac. ac.* (bones, throat); *Cinchona* (preventing sepsis; fever; ringing in ears).

Google

SAMBUCUS NIGRA.

Elder. *Caprifoliaceæ.*

The European elder, Sambucus nigra, differs but slightly from the American, Sambucus canadensis. The tincture is prepared from the fresh leaves and flowers.

Introduced and proved by Hahnemann, assisted by Franz, Gross, Hartmann, Langhammer and Wislicenus, R. A. M. L., vol. 5.

CLINICAL AUTHORITIES.—*Coryza*, Tietze, Gross, Rück. Kl. Erf., vol. 1, p. 391 *Ileus* (3 cases reported cured), Lilienthal, Hah. Mo., vol. 7, p. 116; *Influenza*, Sorge, A. H. Z., vol. 92, p. 110; *Laryngismus*, Wesselhoeft, A. J. H. M. M., vol. 4, p. 19; *Spasmodic croup*, Müller, Rück. Kl. Erf., vol. 5, p. 765; *Croup*, Fielitz, Tietze, B. J. [1] **Mind.** Seeing images when shutting eyes.
Delirium without fever.
Anxiety: with vomiting; with sweat.
Very easily frightened; trembling, anxiety, restlessness.
‖Fright followed by suffocative attacks, with bluish bloated face.
‖Constant fretfulness.

[2] **Sensorium.** Dizziness, cloudiness of head.

[3] **Inner Head.** Dizziness, with tension in head when moving it, sensation as if it were filled with water.
Sudden jerks through head.
Pressive pain on temporal bones.
‖Catarrhal headaches, especially of children.

[4] **Outer Head.** The head is bent backward.
Erysipelas all over l. side of head, ear much swollen, confined to bed, could not move.
Scurfs on head with intolerable itching.
Skull feels as if stretched.

[5] **Sight and Eyes.** ‖Child could not open eyes, could not bear light, awoke from sleep screaming.
Eyes and mouth half open in sleep. θAsthma Millari.

Digitized by Google

[6] **Hearing and Ears.** Great swelling, heat, redness and lump just under r. ear, in neck, accompanied by a very sharp pain.

[7] **Smell and Nose.** ‖Child starts up suddenly as if suffocating. θAsthma Millaria.

‖‖Sniffles of children.

‖Breathing through nose impeded, with dry coryza, especially in nursing infants.

‖‖Dry coryza of infants; nose dry and completely obstructed, preventing breathing and nursing; constant sniffles.

‖Stoppage of nose with thick tenacious mucus.

[8] **Upper Face.** ‖Face: pale, bluish or red; pale, collapsed, covered with cold sweat; appears much older and yellow; bloated, dark blue; red-spotted.

Burning heat: and redness of face; with icy-cold feet.

On waking, face breaks out in a profuse sweat, which gradually extends over body.

Red, burning spots on cheeks; great heat of face; circumscribed redness of face.

Numb tension as from swelling in cheeks and on nose.

[10] **Teeth and Gums.** Tearing and stinging in teeth, with sensation of swelling of cheek.

[13] **Throat.** Dryness of throat and mouth, with thirstlessness.

[14] **Appetite, Thirst. Desires, Aversions.** Thirst, but drink is not palatable.

[15] **Eating and Drinking.** Worse after eating fruit.

[16] **Hiccough, Belching, Nausea and Vomiting.** Everything makes him feel sick.

Vomiting first of food, later of bile.

[19] **Abdomen.** Distended abdomen, with pressure and griping in stomach and umbilical region.

Painful pressure in abdomen, with nausea when leaning against a hard edge.

Great soreness in abdomen.

‖‖Griping in abdomen, with emission of flatus as after taking cold.

‖Ileus.

[20] **Stool and Rectum.** Stools: frequent, watery; thin, slimy, with much wind, followed by urging; pressure in stomach and navel; abdomen large.

[21] **Urinary Organs.** Nephritis.

Frequent urging to urinate, with profuse discharge of urine.

[23] **Female Sexual Organs.** Menses too profuse; menorrhagia.

[24] **Pregnancy. Parturition. Lactation.** Mammæ red and swollen.

Milk diminished.

[26] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness caused by much tenacious, glutinous mucus in larynx.

Google

Voice sounds hollow.

‖Hoarseness, rawness in throat and oppression of chest. θInfluenza.

‖Woke at night with agonizing fits, spasms of glottis, with agony and fear of suffocation; springing up in bed and struggling for breath. θAsthma Millari.

‖Spasm of glottis; breathing is of a wheezing, crowing character, < after midnight and from lying with head low. θCroup.

‖Spasms of larynx occurring frequently during course of acute laryngitis.

‖An infant nine months old has laryngeal spasms several times in day and night; awakes from sleep with suffocation; is able to inspire but not expire; becomes livid in face, gasps in great anguish, and very slowly recovers its breath; had two attacks of this kind in previous night, at 8 P.M. and 11 P.M. θLaryngisinus.

‖Sudden disappearance of coryza; on following night very rough, hollow, croupy cough; agitated sleep; following morning fits of hollow, deep cough; whistling respiration; constant crying; burning head; crying or coughing, as if throat were painful. θCroup.

‖Sopor; snoring and whistling, with mouth open and head bent back; starts up, strikes about, is nearly suffocated; becomes blue in face, then cough with rattling breathing; threatening suffocation and paralysis of lungs. θCroup.

‖Much dry heat with restlessness; sudden awaking in fright at night, from 9 P.M. until 2 A.M., grasping its throat; shortly after, perspiration on face, head and neck, going off with sleep; during paroxysms of hoarse, suffocating cough child had purple nails and lips; scanty, tough expectoration, yet tracheal sound was somewhat loose. θCroup.

‖In dangerous cases with excessive weakness, old-looking features and threatening paralysis pulmonum. θCroup.

[26] **Respiration.** ‖Breathing: anxious, loud; quick, wheezing, crowing.

Oppression of chest, with pressure in stomach and nausea.

‖Nightly suffocative attacks, with great restlessness; shedding of tears and throwing about of arms.

‖Suffocating attacks after midnight.

‖Child suddenly awakes, nearly suffocated, sits up in bed, turns blue, gasps for breath, which it finally gets; spell passes off; it lies down again, and is aroused sooner or later in the same manner. θAsthma Millari.

‖Drowsiness, breathes with mouth open and with a snoring whistling sound, head bent backward, suddenly

Digitized by Google

springs up, tossing arms about, face becoming blue, suffocation seems inevitable when cough recurs, then with rattling breathing child sinks back exhausted; threatened paralysis of lungs.

‖ Violent asthmatic attack, respiration rapid and whistling; occasional short but labored coughs; high degree of dyspnœa; constantly pointing to middle of chest; had been suffering twenty-four hours, with intermissions of two or three hours, the free intervals becoming gradually shorter with each attack (which lasted usually from ten to fifteen minutes); threatened suffocation with marked blueness of lips.

‖ Roused about 2 or 3 A.M. with sense of stoppage of air tubes as by phlegm.

‖ Asthma thymicum; suppressed perspiration; attack comes on suddenly; awakes from a kind of lethargy with eyes and mouth open; raises himself in bed with great anxiety and dyspnœa; respiration oppressed, with wheezing in chest; head and hands puffed and bloated, with dry heat all over body; no thirst; small, irregular and intermittent pulse; no cough; paroxysms occur principally from midnight until 4 A.M.; difficulty of inspiration but not of expiration.

‖ Attacks of suffocation, resembling last stage of croup.

[27] **Cough.** ‖ Cough: hollow, dry, at night; deep and dry before chill; with regular inhalations, but sighing exhalations; suffocative hollow, deep, whooping, caused by spasm of chest, expectoration of small quantities of tough mucus, only during day; suffocative with crying children; < about midnight, during rest, lying in bed, or with head low, from dry, cold air.

‖ After suppression of a fluent coryza; rough, hollow, deep, croupy cough; restlessness; frequent desire to nurse; whistling respiration; cries with every cough, as if throat were painful, head hot

‖ Whooping-cough; suffocative, hollow, deep cough, caused by a spasm in chest, with expectoration only during day of small quantities of tough mucus.

‖ Dry, hacking cough during chill and heat. θ Ague.

Sputa: very yellow, as if colored by bile; taste saltish.

[28] **Inner Chest and Lungs.** Oppression and pressure beneath sternum and pressure in pit of stomach and epigastric region, with nausea and sense of weakness.

Oppression and stitches in l. side of chest below nipple.

After catching cold the previous Winter, catarrhal affection of chest; violent hollow, dry cough with hoarseness and accumulation of much tough mucus in larynx, < during night; oppression of chest with stitches in l.

Google

side when lying upon that side; internal heat without thirst; profuse debilitating sweats; great nervousness; great sleepiness, but sleep is restless and he wakes often, when feeling of anxiety prevents him from falling asleep again; face pale, sunken, with circumscribed burning redness of cheeks; pressure in stomach after eating, particularly after milk, frequently with vomiting first of food, then bile; urine watery, increased in quantity; great emaciation; is fond of warmth; feels > when moving about a little than when absolutely at rest; frequent inclination to take a deep inspiration, which he can do without difficulty; dry, burning heat during sleep at once going over into profuse sweat on awaking and continuing until he falls asleep again when the heat returns.

After a cold drink while overheated, fever and severe cough and expectoration; the following condition finally developing: pressing pain on chest; constant cough day and night with profuse expectoration of offensive, sweet-tasting mucus; face pale, earthy-colored; great emaciation; pulse rapid, weak; burning heat in palms of hands; great thirst in afternoon; profuse sweats at night; complete loss of appetite. θPhthisis.

Constant severe cough, with profuse salty-tasting expectoration; great debility and emaciation; constantly increasing oppression of chest; œdematous swelling of legs, extending up above knees; as the cure progresses profuse urination and severe itching of skin and finally exfoliation of epidermis set in. θPhthisis.

Phthisis: hectic flush, night sweats, choking cough, afternoon fevers; wakes up after midnight with feeling of sudden suffocation, without being able to call for help; night sweats only when wide awake, passing over into a dry heat as soon as he falls asleep. θPhthisis.

[39] **Heart, Pulse and Circulation.** Orgasm in whole body.

Occasional omission of heart-beat.

Angina pectoris where pressure proceeds from spine; in individuals formerly fat and robust and now emaciated on account of mental emotions, sexual indulgence or excessive seminal losses; paroxysms generally come on at midnight, or in middle of night and wake patient up, compelling him to sit up or get up before he can get any relief or summon assistance; in many cases the patient can give no account of what is the matter or how it came on, only sit up in bed and moan and cry, with hand over heart.

Pulse generally very frequent and small; sometimes slow and full, sometimes intermitting.

Google

[30] **Outer Chest.** Pressure upon sternum, with a counter-pressure from spine to sternum.
Compression of chest violent, trembling from pain.
[31] **Neck and Back.** Sweat on throat and neck, with children.
[32] **Upper Limbs.** Paralytic heaviness in elbow joint.
Trembling of hands when writing.
Stitches in wrist.
Dark-blue bloatedness of forearms and hands.
Muscles between little finger and next very sore.
[33] **Lower Limbs.** Sharp, deep stitches in tibia.
Œdematous swelling of feet, extending to legs.
Sensation of coldness, numbness and deadness in middle of r. tibia.
Icy-cold feet: with warmth of body; with hot face.
[34] **Limbs in General.** Hands and feet bloated, blue.
[35] **Rest. Position. Motion.** Rest: cough <.
Lying down: dry heat after falling asleep.
Lying in bed: cough <.
Lying on left side: stitches in chest.
Head low: spasms of glottis <; cough <.
Must sit up in bed to regain breath.
Motion: of head, tension and dizziness.
Writing: trembling of hands.
[36] **Nerves.** Great weakness.
General trembling, with anxiety and ebullitions of blood.
Great tendency to start; starts at things to which he is accustomed.
[37] **Sleep.** ‖Sleepiness.
Drowsiness with inability to sleep.
‖Frequent awaking, as in a fright, with anxiety, trembling, dyspnœa, as if he would suffocate.
Slumber with eyes and mouth half open.
During sleep, dry heat; after waking profuse sweat.
[38] **Time.** 2 or 3 A.M.: roused with sense of stoppage of air tubes.
During day: expectoration of tough mucus.
Afternoon: great thirst; fevers.
Night: spasms of glottis; dry cough; profuse sweat.
7 P.M. to 1 A.M.: profuse sweat without thirst.
About midnight: cough <.
After midnight: spasms of glottis <; suffocative attacks.
[39] **Temperature and Weather.** Shunning uncovering during heat.
From dry, cold air: cough <.
After a cold drink while overheated: phthisis.
[40] **Fever.** ‖Chill running over whole body, with crawling sensation here and there.
Hands and feet icy cold; rest of body warm.

Google

Shaking chills before going to bed. θAgue.
Spasmodic deep, dry cough; may occur after chill if absent in prodroma.
Dry heat: while he sleeps; on falling asleep after lying down; without thirst, dreads uncovering.
Hot body with cold hands and feet during sleep; on awaking face breaks out into a profuse sweat which extends over body and continues more or less during waking hours; on going to sleep again dry heat returns.
Sensation of burning heat in face, with moderate warmth of body and icy-cold feet, without thirst.
Burning heat, dread of uncovering.
Hectic flush.
Profuse sweat without thirst, while awake from 7 P.M. to 1 A.M.; drops stood upon face, and there was also perspiration all over, but after sleep he was more hot than sweaty but without thirst.
General sweat except on head.
Continued perspiration while awake, changing into dry heat as soon as one goes to sleep.
Profuse non-debilitating sweat day and night.
Debilitating perspirations which often retard convalescence after delivery.
Night sweats except on head, increasing toward morning.
Profuse debilitating night sweats. θPhthisis. θAgue.
Night sweats in phthisis; sweats come even when awake.
Profuse weakening sweats, day and night, last through apyrexia.
Prodroma: cough deep, dry, racking, for half an hour; nausea and thirst.
Irregular paroxysms occurring every other day (quinine had no effect), cough deep and dry for half an hour, with nausea and thirst; chill for half an hour, without cough, nausea thirst; slight fever with moist skin; profuse sweat at night, not debilitating; apyrexia complete. θAgue.
Chills and fever, type quotidian; paroxysms commenced at 3 P.M., with hard dry cough from lower part of chest, racking and shaking whole body and producing a pain over whole head which is > by pressure or having head tightly bound up; no expectoration with cough; great thirst for large quantities of water very often; longing for acids; chills, severe and shaking, lasting for half an hour; lips and nails look blue; nausea and vomiting, < by drinking, substance vomited having a bitter-sour taste; bitter-sour taste in mouth during paroxysm; tongue coated white; skin cool, pulse 90; slight moisture on surface; chills running down back; back and limbs

Digitized by Google

ache, particularly during chill, and < when they come in contact with bed; cough, headache and thirst continued; fever, great heat with stupor and prostration; thirst and cough continue, but no headache; pains in back and limbs; great difficulty in speaking; with heat, a profuse perspiration; delirium; is distressed because of some one whom she imagines is in bed with her and oppresses her respiration as if she had to breathe for two; continual talking; sense of suffocation, with a quivering or fluttering at heart; great distress in region of heart, whence the cough seems to proceed; hearing painfully acute; great depression of spirits with anxious, vexed, desponding thoughts and weeping; moaning and weeping during sleep; at night a drenching sweat, smelling sour fetid, staining yellow, not debilitating; ineffectual desire to urinate, passing water about once in twenty-four hours, a small quantity of very turbid loam-colored urine; patient suffered for years from chronic dysentery which was cured at same time. θAgue.

Dry heat while asleep, profuse sweat while awake, then dry heat again when he sleeps; the profuse sweat is rarely debilitating and never in proportion to its profuseness; always without thirst.

No thirst during heat or sweat.

Shunning uncovering during heat; visions when shutting eyes. θTyphus.

[41] **Attacks, Periodicity.** Several times in day and night: laryngeal spasms.

Nightly: suffocative attacks.

From 9 until 2 P.M.: sudden awaking in fright.

From midnight until 4 A.M.: suffocative attacks.

Once in twenty-four hours: passes water.

Every other day: paroxysm of ague.

[42] **Locality and Direction.** Right: swelling, heat, redness and lumps just under the ear.

Left: erysipelas of whole side of head; stitches in side of chest below nipple.

[43] **Sensations.** As if head were filled with water; skull as if stretched; as if suffocating.

Pain: over whole head; in back and limbs.

Great distress: in region of heart.

Sharp pain: under r. ear.

Tearing: in teeth.

Stitches: in l. side of chest below nipple; in wrist; in tibia.

Stinging: in teeth.

Griping: in stomach and umbilical region; in abdomen.

Pressive pain: in temporal bones.

Google

Pressing pain: on chest
Jerks: through head.
Soreness: in abdomen.
Burning heat: in palms of hands.
Rawness: in throat.
Oppression: of chest, beneath sternum; in left side of chest below nipple.
Heat: of face.
Pressure: in stomach; in abdomen beneath sternum and pit of stomach and epigastric region; upon sternum; from spine to sternum.
Tension: in head, in cheeks and nose.
Dryness: of mouth and throat.
Itching: of scurfs on head.
Numbness: in middle of tibia.
Deadness: in middle of tibia.
Coldness: in middle of tibia; of feet.

[44] **Tissues.** ‖Œdematous swellings in various parts of body, especially in instep, legs and feet.
‖Œdema; anasarca; general dropsy.
‖‖Increased secretion of skin and of respiratory mucous membrane.

[45] **Touch. Passive Motion. Injuries.** ‖Leaning against hard edge: painful pressure in abdomen with nausea.
Pressure: > pain in head.
Tightly bound: > pain in head.
After contusions, tension in dark-red swelling.

[46] **Skin.** Bloatedness and dark-red swelling, with tension after contusions.

[48] **Relations.** Antidoted by: *Arsen.*, *Camphor.*
Compatible: *Bellad.*, *Conium*, *Nux vom.*, *Phosphor.*, *Rhus tox.*, *Sepia.*
Compare: *Cinchon.*, *Ipecac.*, *Sulphur.*

[1] **Mind.** Mind confused, relieved by eructations.
Anxiety: and feeling of dread; precedes vomiting and delirium.

Digitized by Google

Angry irritability; moroseness with nausea; cannot bear a person to walk in room.
Delirium with hot skin.
Mental torpor, stupor, heaviness, sleepiness.
Hopefulness, sanguine of recovery.
Disgusting ideas, and many unpleasant feelings associated with nausea.
‖ Sensation as if paralyzed and unable to move while lying on her back, with full consciousness of her surroundings.
‖ With open eyes, one dream chases another; her thoughts constantly returning, however, to the one idea, which seems droll to her, "What will become of my condition, shall I have typhoid fever, inflammation of the brain, or shall I remain paralyzed?"
‖ It seems to her as if the events that transpired in her dreams were not of hours' but of weeks' and months' duration.
‖ It seems to her as if all around her talked very rapidly, and that she is in a railroad car and begs others to hold her.

[3] **Sensorium.** ‖ Vertigo: with long-continuing nausea, debility and headache; with singing in ears; with diminished vision, before vomiting; with nausea and headache, followed by spasmodic vomiting; with dull, heavy feeling in stomach, as if caused from some hard substance there; on quickly turning head and looking upward; on lying down at night; on rising from stooping; in cold weather; during sleep; during climaxis.
Head feels dizzy, cannot turn quickly without fear of falling.

[3] **Inner Head.** Headache with nausea and chilliness, followed by flushes of heat, extending from head to stomach.
Violent pain over upper portion of whole l. side of head, especially in eye.
‖ Headache as if forehead would burst, with chill and burning in stomach.
Pressive headache in forehead.
Frontal headache with considerable vertigo, on rising from a sitting posture.
‖ Frontal headache extending into cheek bones.
‖ Pain in forepart of head, shoulders, chest and stomach.
‖ Headache over r. eye.
‖ Neuralgia in and over r. eye.
‖ Head aches as if it would burst; > walking in open air < in temples, especially in r., in afternoon.
‖ Pains in head in spots; soreness especially in temples.
‖ Dull headache.

Google

Wandering pains in head.
Headache with shuddering.
Beating headache with throbbing in temporal arteries and bitter vomiting.
Pulsations in head, with bitter vomiting, < from motion.
Headache, with rheumatic pains and stiffness of limbs and neck.
Headache every seventh day.
Pains like a flash of lightning in back of head.
Headache begins in occiput, spreads upward and settles over r. eye.
Pain in head in rays, drawing upward from neck.
Rheumatic headache, running up posterior auricular region.
Feeling as if head were drawn forward.
Severe headache only relieved by pressing back up against something hard, or by pressing back of head.
Periodical sick-headache; begins in morning, increases during day, lasts until evening; head feels as if it must burst, or as if eyes would be pressed out; throbbing, lancinating pains through brain, < in r. side, especially in forehead and vertex; followed by chills, nausea, vomiting of food or bile; must lie down and remain quiet; relieved by sleep.
A bandlike constriction across forehead just below eyebrows; < by exercise, with violent throbbing of temporal arteries; shooting pains from one temple to other, < in night; < from light, > from sleep.
Headache concentrating in a small spot over r. eye; eye becomes red and sore, yet hard pressure upon eye relieves.
Headache especially over r. eye; rheumatic pain in neck and shoulders (more in l.); > when lying perfectly still; patient approaching climacteric period.
Intermittent neuralgia coming in morning and lasting four to six hours; pain at internal superior angle of r. orbit, acute pressing with occasional darts inward and some throbbing; part sore, but he holds his hand there while pain lasts; conjunctiva considerably injected during pain; catarrhal discharge, thick, mostly from r. side of nose; every day for five or six days.
Violent pulsation and tearing in r. temple, < from motion; the slightest shaking is intolerable to her, so that she cannot bear to have any one walk across the floor. θSick-headache.
Headache with distension of temporal veins which are painfully sensitive to touch.
Pressing pains in head, extending from nape of neck

Google

over side of head and settling over l. eye, accompanied by nausea and vomiting of food, bile and mucus; must lie down; > when lying down and vomiting; attacks every eight days for last nine years.

Severe pains in head, with nausea and vomiting, frequently with bilious vomiting in weekly attacks or at longer intervals, commonly beginning in morning, increasing in violence through day, only diminished by lying quiet and sleeping.

Sick-headache from childhood; eyes weak and sore; photophobia, especially with headache; for last six weeks headache every third day, commencing A.M., pains extend from r. eye through back part of head; she is in dark room and cannot bear least light; if she is quiet all day is usually > in evening; nausea, but does not often vomit unless she goes into bright light, or moves about; catamenia every two weeks, blood dark and clotted; constipation; debility.

Sick-headache every two weeks; when overexerted so as to become very tired, she has a great appetite, but satisfying it is followed by sick-headache; is in the habit of eating late in evening; during headache hot flashes and a sensation like that of an electrical current shooting very rapidly from one part of head to the other.

Pain commencing in r. occiput, extending to r. temporal bone, a tight drawing, gradually increasing in intensity, like drawing a rope on a windlass as tight as you can get it until it is almost beyond endurance, when it gradually subsides.

Sick-headache, commencing in morning on awaking, < during day, > by sleep at night; pain confined chiefly to temples and vertex, so violent as to cause her to cry out; nausea generally in morning, followed by vomiting, first of food, afterward of pure bile, occasionally considerable acid mucus, with severe burning distress in stomach, great weakness and goneness, even worse to bear than headache; least quantity of food or drink is immediately vomited; attacks come on at irregular intervals.

Headache and nausea, symptoms increasing hour by hour; patient groaning and writhing in agony, face very red, head hot, injected eyes, sensitive to light; arteries about head and scalp distended like whip cords, blood coursing through them at a furious rate, giving a sensation to head as if temples and scalp were alive with irrepressible pulsation; pain over whole head; paroxysms of violent retching every few minutes; free flow of clear urine as the attack passes off.

Google

Distressing sick-headache, for years; in some degree the symptoms were nearly always present; headache commencing in forenoon, gradually increasing in violence until sunset, when it would either quietly subside or confine her to bed for a day or two; the pains originated low in occiput, drawing upward in rays, locating over r., sometimes over l. eye, attended with vomiting, often of bilious matter; subject to sudden flushes of heat, burning of soles of feet and quickly diffused transient thrill felt at remotest extremity; at times sensible throbbing of every pulse in body; urine generally scanty before and during severe headache, but quantities of clear urine pass when getting better.

"American sick-headache;" rush of blood to head, causing faintness and nausea, even continuing until vomiting sets in; violent pains begin in occipital region, spread thence over head and settle over r. eye; pains sharp, lancinating, at times throbbing; can bear neither sounds nor odors; cannot bear any one to walk across floor, the slightest jar annoys her; at height of headache vomiting of food and bile; is forced to remain quiet in a dark room; sleep finally relieves; sometimes pain is so violent that patient goes out of her mind, or seeks relief by pressing head against pillow or pressing head with hands.

Neuralgia in r. temple and orbit from getting feet wet.

Pain commences in back of head, rises and spreads over head and settles especially above r. eye, with nausea, vomiting and chilliness; is obliged to seek a dark room and lie perfectly still; flushes of heat; burning of soles of feet; urine at first scanty, later profuse and clear.

Frightfully severe headache, the only relief obtained by pressing back of head against headboard of bed.

Migraine with bilious vomiting, pains begin in morning, last till evening; eyes feel as if they would be pushed out, < by motion.

Sick headache, with heat and redness.

Headaches: gastric; myalgic; rheumatic; congestive; from suppressed menses; at change of life.

Congestion of blood to head, with ringing in ears; flushes of heat; accumulation of water in mouth.

Sanguineous apoplexy with vertigo, dimness of sight, vomiting, burning in stomach, distension of temporal veins.

Outer Head. Soreness in spots, especially in temporal regions.

Distension of veins in temples; feel sore when touched.

Head very painful to touch.

Google

[5] **Sight and Eyes.** Diminished power of vision.
Dimness of eyes, with sensation as if hairs were in them.
Frequent obscuration of vision.
Retinal congestion, with flushed face and congestive headache.
Pupils dilated.
‖Yellowness of sclerotica, with icterus.
Burning dryness in eyes.
‖Pain over eyes.
Redness of eyes in morning.
Superficial injection of eyeball, with feeling of soreness.
Burning and watering of r. eye, which is painful to touch, followed by coryza.
‖‖Acute conjunctivitis, with excessive redness and numerous ecchymoses in conjunctiva, tending toward trachoma, with moderate discharge and some pain in eye.
‖Catarrhal ophthalmia, granular lids.
‖Ophthalmia, followed by ulceration of cornea.
‖Copious lachrymation: following the burning and dryness; tears hot; with coryza.
‖Blepharadenitis: with a feeling of dryness under upper lid and accumulation of mucus in eye in morning; blepharitis and catarrhal conditions of conjunctiva, with burning in edges of lids, < in afternoon; dependent on stricture of lachrymal duct.
‖‖Hard swelling like scirrhus over eyebrows.
‖‖Neuralgia in and over r. eye.

[6] **Hearing and Ears.** Beating, humming, with congestion of blood.
‖Hyperexcitation of auditory nerves; painful sensitiveness, especially to sudden sounds; sensation as if she were in a railroad car or in some vehicle which was moving and jarring her, with a feeling as if all about her moved rapidly and confusedly; desires to be held in order to remove this nervous vibratory sensation through body; frequently in women in climaxis.
‖Earache with headache, singing in ears and vertigo.
Beating under ears, at irregular intervals, often only a couple of strokes.
‖Acute internal otitis.
‖Catarrhal affections of inner ear and Eustachian tube.
‖Throat affections causing deafness and otalgia.
‖Increased redness of external ear, with humming and roaring in ears from increased circulation of blood through aural structures.
‖Burning of ears, cheeks red.

[7] **Smell and Nose.** ‖Loss of smell and taste.
Dislike to odor of syrup.

Google

‖Fluent coryza, with frequent sneezing; < r. side.
‖Coryza, with dull, heavy pain over root of nose, and stinging sensation in nose; severe pain at root of nose and in frontal sinuses, with dry cough and pain in chest.
‖‖Severe cold in head; sneezing, severe fluid coryza, irritation and watering of eyes; irritation of throat with severe cough.
‖‖Severe cold in head; high fever; acrid discharge from r. nostril produced soreness of lips and side of face.
‖‖Fluid coryza alternating with stoppage; eyes painful to touch; soreness in throat; pain in chest, cough and finally diarrhœa. θInfluenza.
‖Watery, acrid coryza, rendering nose sore, with copious watering of r. eye.
‖Coryza with diarrhœa, worse at night.
‖‖Smell in nose like roasted onion; wheezing, whistling cough and finally diarrhœa, which relieves the cough. θInfluenza.
‖Rose cold with subsequent asthma; sick and faint from odor of flowers.
‖Acute or chronic coryza, with loss of smell.
‖‖Severe catarrh in head, following a cold, for some weeks, with some irritation of throat and slight cough.
‖‖Sensation of stinging and tickling, with irritative swelling of parts, with or without free discharge; yellowish or grayish-white discharge from nose; headache in r. hemisphere of brain, with drawing pain in back into neck; bilious vomiting. θChonic catarrh.
‖Ulcerative ozæna with epistaxis.
‖Chronic nasal catarrh with offensive discharges.
‖‖Nasal polypi.

[8] **Upper Face.** Distension of veins of face, with excessive redness, a feeling of stiffness and soreness of veins to touch.
Circumscribed redness of one or both cheeks.
‖‖Red cheeks: with burning in ears; with cough.
‖Cheeks and hands livid. θTyphoid pneumonia.
‖Circumscribed redness of cheeks in afternoon; patient lies on his back; pulse small and quick.
Twitching of cheeks toward eyes.
‖Neuralgia in and over r. eye.
‖‖Neuralgia in upper jaw running up to nose, eye, ear, neck and side of head; pain shooting and burning, cannot endure pain except by kneeling down and holding head tight to floor.
‖Stitches in l. side of face, with pains in forehead.
‖‖Neuralgia in face for several years; beginning of pain in upper jaw, running up to nose, eye, ear and side of head; pain shooting and burning, cannot stand pain

Digitized by Google

except by kneeling down and holding head tight to floor.

[9] **Lower Face.** Lips feel dry.
Swelling of lips toward evening.
Under lip burns, is swollen, hard and blistered; blisters dry up and form crusts, which drop off.
Stiffness in articulation of jaws.

[10] **Teeth and Gums.** ‖Toothache from picking teeth, or in hollow teeth when touched by food.
‖Grumbling toothache with pain in same side of head.
Pain in carious teeth after cold drinks.
Looseness of teeth (with salivation).
‖Spongy, bleeding, fungoid condition of gums.

[11] **Taste and Tongue.** ‖Loss of taste, with a burnt feeling on tongue.
Sweet things taste bitter, followed by burning in fauces.
White-coated tongue with slimy, fatty taste.
‖Red streak through middle of tongue.
Top of tongue burns as if scalded.
‖Tongue sore; pains like a boil.
‖Red tongue, burns as if in contact with something hot.
Pricking in point of tongue.

[12] **Inner Mouth.** Fetid breath, clammy mouth, sticky teeth.
Sores on gums and rpof of mouth.
‖Roof of mouth sore, uvula sore and burning.
‖White patches on mucous membrane of mouth, with salivation; hypertrophy of thymus gland; in a child suffering from hereditary syphilis.

[13] **Throat.** In evening after lying down, cough from tickling in throat.
Spasmodic constriction directly beneath lower jaws across throat, very distressing, lasting several hours.
‖Throat very dry, with tickling cough.
‖Burning in throat, especially after eating sweet things.
‖Roof of mouth and uvula sore and burning.
Feeling of swelling in throat on swallowing.
Pain with sensation of swelling, in throat, < r. side, especially on swallowing.
‖Throat feels swollen as if to suffocation; pain when swallowing; aphonia.
‖Tonsillitis; promotes suppuration.
Throat feels raw; some difficulty in swallowing; mouth and throat feel almost denuded of mucous membrane.
‖Heat in throat, better on inspiring cold air; throat so dry it seems as if it would crack.
‖Dryness in throat, with soreness, swelling, and redness as in scarlet fever; in one case of six years' standing, in another with hectic fever and cough.

Google

‖‖General feeling of soreness throughout pharynx; sensation as if burned or scalded by hot drinks; dry, constricted feeling; drinking did not moisten throat, mucous membrane felt as if it might crack; pharynx very red and angry looking, highly inflamed.

‖Putrid sore throat.

‖Angina; particularly a species of pharyngitis.

‖Ulcerated sore throat.

‖Tonsillitis, chronic, recurring frequently.

‖Suppuration of tonsils; quinsy.

‖‖Burning in pharynx and œsophagus.

‖‖Intense heat and redness of throat, amounting to a burning sensation; choking feeling when swallowing; pearly coating on fauces and tonsils, < on r. side; r. tonsil most inflamed. θDiphtheritis.

‖Palate and fauces covered with a continuous coating of pearly fibrinous exudation.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Craving for he knows not what, with loss of appetite; wants piquant things.

‖Loss of appetite with great weakness of digestion.

‖‖Aversion to butter.

Sugar tastes bitter and causes burning.

[15] **Eating and Drinking.** Sweet things aggravate, produce burning.

Soon after eating: feels empty; difficult breathing, nausea, waterbrash, lassitude almost to fainting, cold sweat until 12 P.M., after a little food.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖‖Hiccough whilst smoking.

Spasmodic eructations of flatus.

‖‖Frequent flatulent eructations of unpleasant odor, with disposition to vomit and paleness of face.

‖‖Pyrosis; a rising of burning, corrosive fluid from stomach, for twenty years.

‖Nausea: with a burning at stomach; with much spitting; not > by vomiting; with headache, chill and heat; intense, in paroxysms, < when stooping, with flow of saliva; followed by nettlerash; with heartburn; followed by vomiting and sometimes diarrhœa; periodic; followed by sneezing; craves food to quiet nausea.

‖‖Vomiting: of bitter water; of sour acrid fluids; of ingesta; of worms; preceded by anxiety; with headache and burning in stomach; head > afterward; with prostration.

‖During vomiting, headache, burning in stomach with craving to eat.

[17] **Scrobiculum and Stomach.** ‖Soreness and pressure in epigastrium < by eating.

Digitized by Google

‖Sudden attacks of constriction in pit of stomach as if suffocating.

‖Goneness with sick headache.

Sensation of emptiness in stomach: soon after eating; with faint, feverish feeling.

‖Pressure in stomach.

Jerking in stomach as if from something alive.

‖Feeling of warmth and heat in stomach.

‖Burning in stomach; with headache and chill.

‖Gastritis, with nausea, headache, chill and heat; vomiting with severe, painful burning in stomach and intense thirst, red tongue, red and dry lips, hot and dry throat, tickling cough.

Pyrosis; rising of burning, corrosive fluid with flatulence.

‖Great weakness of digestion, loss of appetite. θDyspepsia.

‖Burning sensation accompanied by pressure in epigastrium, coming on soon after lying down and compelling her to rise; pains < at night, but they recurred at any hour when she resumed the recumbent position, though less severe in daytime; > sitting up; appetite voracious; bowels torpid; peculiar drawing pains in shoulders and arms during sleep, so that when she awoke the fists were tightly clenched and flexed upon the sternal end of clavicle; this cramping up of the arms always occurred during sleep and was followed by a sense of lameness and weariness in the affected muscles. θNeurosis of stomach.

‖A chronic inebriate; had been drinking steadily for a couple of weeks, beer and whisky; violent emetocatharsis; *Nux vomica* did not relieve, *Arsenic* checked the bowels and relieved the intense thirst, but had no effect in quieting stomach; very irritable and angry at not being relieved; everything she took in her stomach, even water, was instantly ejected; about once in fifteen or twenty minutes a spasm of stomach, with gagging and coughing and ejection of some frothy mucus; pain in chest and abdomen from the straining; intense burning extending from stomach up œsophagus to pharynx, which felt swollen and dry; lying slightly turned on l. side; impossible for her to lie on r. side, and when rising from lying down was seized with vertigo; cheeks and hands livid; believed she was soon to die and was unwilling to be left alone.

[18] **Hypochondria.** Heat, streaming from breast to liver.

‖Liver torpid; skin yellow; colic. θJaundice. θBiliary concretions.

‖Cough from affections of liver.

‖Pain in l. hypochondrium, < from coughing, > from

pressure and when lying on l. side, very copious urination at night.
Violent stitches in splenetic region.

[19] **Abdomen.** ‖Flatulent distension of abdomen in evening, with escape of flatus from vagina (os uteri being dilated).
Beating in abdomen.
‖Indurations in abdomen.
Cutting bellyache from r. to l. of iliac fossa, thence to rectum.
‖Soreness in abdomen < by eating.
Colic: followed by diarrhœa; with torpor of liver.
Feeling as from hot water pouring from breast into abdomen, followed by diarrhœa.

[20] **Stool and Rectum.** ‖Urging, but no evacuation, with sensation of a mass in lower part of rectum and discharge of offensive flatus only.
Alternate diarrhœa and constipation.
‖Hemorrhoids.
‖Stools: thin, fecal; bright yellow; undigested; watery; watery with much flatus, preceded by cutting pain.
‖Affection of breast always ended with a feeling as if hot water were poured from chest into abdomen which was followed by diarrhœic stool.
‖Diarrhœa following coryza, pains in chest and cough.
Ineffectual urging to stool, then vomiting.
Frequent discharges of very offensive flatus.
Escape of much flatus upward and downward; also with diarrhœa.

[21] **Urinary Organs.** ‖Copious and frequent nocturnal urination, clear as water.
‖Very copious urine at night, with pain in l. hypochondrium; < from coughing; > from pressure and lying on l. side.
‖Dark-yellow urine, with icterus.
Urine scanty, high-colored, deposits reddish sediment on standing.

[22] **Male Sexual Organs.** Seminal emissions.
‖Gleet; old cases.
‖White oval patches on mucous membrane of mouth, particularly at angles, on mucous membranes of lips, on edge of tongue, on prepuce and glans penis; fetid, cheesy secretions from glans penis, later obstinate inflammatory headache, with constant congestions to head, transient heat, throbbing pain < from motion and stooping, extending upward from nape of neck, with swollen veins in temples. θSyphilis.

[23] **Female Sexual Organs.** ‖Os uteri ulcerated; fetid corrosive leucorrhœa.
Uterine polypi, or cancer.

Google

‖Distension of abdomen in evening, and flatulent discharges per vagina, from os uteri, which was constantly open; at same time a pain passing in rays from nape of neck to head.

‖Metrorrhagia occurring at climaxis; blood bright red, clotted and frequently offensive; sick-headache; flushing of face; face becomes scarlet, this high color passes off with faint, weak, sick feeling.

‖Pain in loins, extending through hypogastric and uterine region and down thighs, followed by appearance of menses (in cases of suppression).

‖Abdominal pains (at night) as if menses would appear.

‖Catamenia preceded by itching in axillæ.

Menses much more profuse than usual, with less pain and weakness in small of back, but with headache in r. side of forehead and side of head, with sensation as if eyes would be forced out of head, < in r. eye.

‖Menses: at right time, offensive smelling, bright red flow; clots, like lumps of flesh; later blood darker and less offensive; scanty, headache from occiput to frontal region, head as if bursting, face red and hot; too early, with a discharge of black blood.

‖Dysmenorrhœa in feeble, torpid subjects, with tendency to congestion of lungs, liver or head.

‖Amenorrhœa in consequence of pulmonary disease; hectic flush of face.

‖Climacteric disorders, especially flashes of heat and leucorrhœa.

‖Burning of palms of hands and soles of feet at climacteric period, compelling her to throw bedclothes off.

‖Painful enlargement of breasts at climacteric period.

‖Corrosive, fetid leucorrhœa at climacteric period; it continues after menses cease.

Sharp, piercing pain in r. breast, just beneath nipple; very difficult to take a deep inspiration, with some dyspnœa.

Pain in r. breast extends to shoulder and is so severe that it is with difficulty hand can be placed on top of head.

Stitches in mammæ.

The nipples are sore and painful.

[21] **Pregnancy. Parturition. Lactation.** ‖Threatened abortion with nausea, pains in loins, extending through epigastric and iliac regions and down thighs.

Mammæ: stitches in both; sore to touch under r. nipple, and painful soreness of nipples.

[25] **Voice and Larynx. Trachia and Bronchia.** Chronic dryness in throat, sensation of swelling in larynx and expectoration of thick mucus.

Aphonia with swelling in throat.

Digitized by Google

Dryness in throat with soreness, swelling and redness.
Tickling in throat in evening with cough and headache.
‖Tonsils and pharynx swollen; sawing respiration; expiration easier than inspiration; cough dry and harsh, > sitting, < eating or lying down; difficult expectoration of tough, glairy mucus; inflammation of cervical glands. θŒdema laryngis.
‖Acute catarrhal laryngitis.
‖‖Violent dry cough; sensation of burning behind sternum, craves cold water, which soon is vomited; fauces dark-red, not swollen; little or no fever; headache, almost crazy; eyes look inflamed, upper lid swollen; open air relieves pain; vomits as soon as he drinks or eats; sharp pain over r. eye. θInfluenza.
‖Tracheal irritation secondary to heart disease.
‖‖Sensation of dryness, soreness and swelling in larynx and expectoration of thick mucus; redness in throat; stoppage of nose with headache across eyebrows. θChronic catarrhal laryngitis.
‖‖A little girl, æt. 4, who had been subject to bronchial affections since birth; lying on her mother's lap, countenance pale and livid, lips very cold, dyspnœa extreme while cough was muffled as if head had been enveloped in a blanket; no expectoration, sibilant râles remarkably shrill; hands and feet quite cold; half delirium. θLaryngitis.
‖‖Chronic dryness of throat, sensation of swelling in larynx with expectoration of thin mucus; aphonia, with swelling of larynx; continual severe cough without expectoration, with pain in head and circumscribed redness of cheeks; tormenting cough with sensation of exhaustion. θCroup.
‖‖Pseudo-membranous croup; hoarse, muffled cough; complete aphonia; pulse 132; soft palate and fauces covered with a continuous coating of pearly fibrinous exudate; hissing sound in larynx; great difficulty in breathing; child stretched back his head and grasped his throat in his agony; features dark and swollen.
‖Croup: catarrhal, with spasmodic, crowing painful cough and stridulous breathing, with whistling cough; metallic sounding, as if coughing through a metallic tube.
‖Chronic dryness in throat and sensation of swelling in larynx and expectoration of thick mucus.
‖Chronic laryngitis, bronchitis and trachitis.
‖Pulmonary consumption.

* **Respiration.** ‖Excessive dyspnœa. θAsthma.
‖Short, accelerated, constrained breathing; extreme dysp-

nœa; cheeks and hands livid; compressible pulse. θTyphoid pneumonia.

‖Asthma, especially after "rose cold," < from odors.

Painful, sighing respiration.

Inclination to take deep inspiration, which increases constriction of chest, and causes tearing pains in chest, < r. side.

27 **Cough.** ‖Cough: dry, caused by tickling in throat or stomach; evenings after lying down, from tickling in throat; awakening him and not ceasing until he sits up in bed and passes flatus, upward and downward; dry, with considerable tickling in throat pit, and a crawling extending downward beneath sternum; very severe, causing considerable pain beneath upper part of sternum, with no expectoration; teasing, dry, hacking, with dryness in throat; tormenting, with circumscribed redness of cheeks; with vomiturition; with headache.

‖Continual severe cough, without expectoration, with pain in breast and circumscribed redness of cheeks, with coryza, followed by diarrhœa which relieves.

‖Wheezing, whistling cough; metallic sounding; stridulous breathing. θCroup.

‖‖Severe cough occurring after whooping cough, when patient takes cold, which partakes of the spasmodic nature of whooping cough.

‖Whooping cough; constricted, spasmodic action across throat beneath jaws; cough < at night with diarrhœa.

‖Severe cough for six weeks, following a cold; coughed for hours at night, keeping whole house awake.

‖Severe, harassing cough, bloody sputa, with pain in occipital region.

‖After exposure, dry hard cough; fever; pain about shoulders and chest; sore throat; headache; < coughing; cough < by eructations of gas from stomach.

‖Distressing, dry, spasmodic, exhaustive coughs, especially in children; < toward night, lying down, going into a cold room to sleep; feeling of rawness and burning in bronchi.

‖For many years shortness of breath and cough, from taking cold the distress became severe and the attack resembled croup; wheezy, whistling cough, beginning with a wheeze and ending with a whistle; < at night when lying with head low.

‖Troublesome cough for a number of years; excited by an irritation in region of bifurcation of bronchi; coughs a long time to raise a little whitish-yellow phlegm, sometimes streaked with blood, after which she experiences great relief; coughs day and night; is weak and emaciated. (Nitrate of *Sanguinaria*, 2d trit.)

Google

‖Tough, rust-colored sputa in second and third stages of pneumonia.

‖Troublesome, harassing cough, with marked inflammatory action. θChronic bronchitis. θIncipient tuberculosis.

‖Breath and sputa smell badly even to patient.

‖Hæmoptysis during phthisis pulmonalis.

‖Sputa: thick, mucous; rust-colored; offensive, purulent.

[28] **Inner Chest and Lungs.** Sharp, piercing pain midway between sternum and nipple, myalgic in character, the surface feels tender on pressure.

Pain beneath sternum and in r. breast.

Intense burning pain between breasts, < in r. side, in afternoon.

Burning sensation under sternum.

Very severe pain in r. side of chest and hypochondriac region.

Hot, burning streaming in r. side of chest commencing below r. arm and clavicle and extending to hepatic region.

Sharp stitches in r. side of chest.

Slowly shooting pain in r. chest about seventh rib; acute stitches in r. breast.

‖Pain in r. chest to shoulder, can only with difficulty place hand on top of head.

‖Stitches in lower part of l. breast to shoulder.

Pain shooting from lower part of l. chest to l. shoulder.

‖Pain in breast with periodic cough.

‖Burning and pressing in breast, then heat through abdomen and diarrhœa.

Constant pressure and heaviness in whole upper part of chest, with difficulty of breathing.

‖Cramps in chest.

‖Pain in breast: with cough and expectoration; with dry periodic cough.

‖Subacute pulmonary congestion in a lady with florid complexion and full habit, æt. 50; was much troubled with general flushings.

‖Dyspnœa, short, accelerated, constrained breathing; speech ceases to be free; sputa becomes tenacious, rust-colored, and is expectorated with much difficulty; position of patient is on his back; not much pain in chest unless pleuræ are involved, then burning stitching pulse quick and small; face and extremities inclined to be cold or hands and feet burning hot, with circumscribed redness and burning heat of cheeks, especially in afternoon. θPulmonary affections. θPneumonia.

‖Pneumonia in second and third stages; with dulness on

Digitized by Google

percussion; bronchial respiration, with red or gray hepatization and infiltration of parenchyma.

‖Pneumonia; rust-colored sputum; distressing dyspnœa; hands and feet burning hot or very cold; sometimes, even before amount of hepatization will account for it, there is failure of the heart's action; heart weak and irregular in action; weak, faint feeling about heart; patient is faint: is covered with sweat and suffers from nausea.

‖Pneumonia, with cold hands and blue nails.

‖Typhoid pneumonia with very difficult respiration; cheeks and hands livid; pulse full, soft, vibrating and easily compressed.

‖Pneumonia: l. lung particularly affected; with heart disease.

‖‖Catarrhal irritation in chest; night sweats; after a cold, several months previously.

‖Sick an indefinite period with lung trouble; complete hepatization of one lung; fever; prostration; night sweats.

‖Loose, stringy, sometimes flocculent expectoration, attending a severe cough, which seemed to rack whole frame during the paroxysm; darting pains through both lungs, < in apex of l. lung; cough < at night in bed; evening exacerbations of fever, with burning of palms of hands and soles of feet; debilitating night sweats; paroxysms of excruciating frontal headaches; dulness of percussion in l. supra- and infra-clavicular regions; fine whistling and long expiratory sounds in apex of l. lung; bronchial tubes in middle and lower parts of both lungs contained much mucus; pulse 114, easily compressible; anorexia; insomnia; thirst; urine diminished, changeable in color; marked emaciation; cheeks hollow; limbs and body small and bony; eyes sunken, glassy. #Incipient phthisis following amenorrhœa.

‖Great emaciation; bloodless skin; æt. 15, had never menstruated, but twelve months ago there was a slight discharge with pain in loins, at which time she commenced to fail; severe, painful cough, with profuse expectoration of thick, stringy, yellowish-white mucus, < at night; night sweats; chest sore to pressure; respiratory murmur faint and covered in some parts by mucous râles; bronchial tubes seemed filled with mucus; shortness of breath; headache; evening fever; burning in feet; dryness of throat; anorexia; pulse 100, soft and quick; alternate constipation and diarrhœa; high-colored, offensive smelling urine; sleeplessness; shooting, erratic pains through body and especially in chest; great exhaustion. #Anæmia with amenorrhœa.

Google

For several years cough, < in Summer; a year ago had pneumonia which left a suspicious permanent cough; cannot lie down; face bloated; pupils somewhat dilated; pulse very rapid and weak; night sweats; diarrhœa; pain in calves of legs; pain in chest, and with every respiratory effort there is rattling in chest followed by cough; paroxysms of cough with profuse offensive-smelling expectoration; the breath is offensive, even to himself; retching with the cough, throbbing and sensation of tightness in head; spasmodic belching before and after cough; heat continues for a while after the cough, followed by yawning and stretching.

Phthisis florida; hectic; fever usually comes at about 2 or 4 P.M., cheeks having a bright circumscribed flush; cough usually dry at first and seems to be excited by tickling or crawling in larynx and upper portion of chest, probably in trachea and perhaps in beginning of bronchial tubes; great deal of burning fulness in upper part of chest, as if it were too full of blood, which it really is; sharp stitching pains, especially about r. lung and in region of nipple, probably myalgic; muscles of chest are sore with this pain; great dyspnœa.

Tuberculosis pulmonalis; breath and sputa smell badly, disagreeable to patient himself; before and after coughing, belching of wind; after cough, heat; after heat, gaping and stretching; circumscribed redness of cheeks; diarrhœa; night sweats; pain in lower extremities.

Beginning of galloping consumption, cough and violent fever, with circumscribed redness of cheeks; soreness to touch of veins in temples.

Hæmoptoe during incipient phthisis, especially in women suffering from amenorrhœa, or during and after climaxis.

Vicarious hemorrhage from lungs from suppressed menstruation in a young consumptive.

Hæmoptysis during phthisis pulmonalis.

Syphilitic pulmonary inflammation.

Chronic pneumonia (rivals *Sulphur* and *Phosphor.*).

Hydrothorax; asthma; pleurisy; intercostal myalgia.

Heart, Pulse and Circulation. Painful stitches or pressing pain in region of heart.

Palpitation before vomiting, with great weakness.

Surging of blood and racing palpitation, with dry and burning skin.

Irregularity of heart's action and pulse, with coldness, insensibility, etc.

Weak feeling about heart.

Pulse: hard, frequent; small and quick; irregular, with great weakness.

Digitized by Google

‖Extreme reduction of force and frequency of pulse, together with great irregularity of action.
‖Metastasis of rheumatism (or gout) to heart, caused by outward applications in inflammatory rheumatism.

[30] **Outer Chest.** Burning in sternum.
Severe soreness under r. nipple, < from touch.

[31] **Neck and Back.** Pain in nape of neck.
‖Rheumatic pains in nape of neck, shoulders and arms.
Soreness of nape of neck on being touched.
‖Dull pain along inner edge of l. scapula, worse from breathing.
Rheumatic pains in neck, shoulders and arms, < at night.
Shifting pains in back, < when drawing a long breath.
‖Pain in sacrum, from lifting.
‖Lumbago, from lifting; or, myalgia of great muscles of back.
‖Soreness down muscles of back; pains shifting about; feels pain more when drawing long breath.

[32] **Upper Limbs.** Itching in axillæ before catamenia.
‖‖Rheumatic pain in r. arm and shoulder; < at night, on turning in bed; cannot raise arm.
‖‖Pain in r. deltoid muscle of long standing; < from lifting; not felt when swinging arms to and fro; < at night when turning in bed, it wakes him; neither warmth nor weather influences it; it gives him no rest by day or night; is not relieved by motion.
‖Pain in top of r. shoulder.
‖‖Pain in r. shoulder and upper part of r. arm, < at night on turning in bed.
‖‖Pain confined to shoulder, shoulder-cap and cervical region; neck stiff, with great pain on movement; trapezius sore under pressure and painful at every movement of head or shoulder; deltoid and biceps very tender to pressure, and so sensitive by use that it was impossible to raise arm from side. #Rheumatism.
‖‖Right arm hung at her side or lay on her lap as helpless as if there had been a fracture of humerus; could not raise it an inch without assistance. #Rheumatism.
‖‖A sensation of coldness in body and r. arm, which no amount of clothing could remove; swelling of r. arm between shoulder and elbow joint; complete inability to raise arm from lap, although lateral motion could be made; tenderness and soreness of r. trapezius and deltoid muscles. θRheumatism.
‖‖Aching in ball of r. thumb, which is swollen, pain extending around wrist and back of hand, most severe in ball of thumb; < since hot weather set in; could not use hand properly from pain and weakness in it.

Digitized by Google

‖Burning of palms; redness of hands and severe burning; lividity of hands. #Pneumonia.
‖Fungoid growth between second and third metacarpal bones, protruding about a quarter of an inch out of palm.
Stiffness of finger joints.
‖Ulceration of roots of finger nails on both hands.
‖Panaritium, first r. then l. fingers.

[33] **Lower Limbs.** Rheumatic pain in l. hip; also inside of r. thigh.
Bruiselike pain in thigh, alternating with pressure and burning in breast.
Pain through hips, extending down r. limb.
Wandering pains, < at night.
Knees are stiff.
Left leg and foot swelled in evening, with violent burning pain, did not know where to lay limb; limb externally cold; < until 12 P.M.
‖Indolent ulcer on r. shin, with dirty granulations and dry sharp-cut edges, brownish thin discharge, not sensitive, no pain.
Sharp pain in r. ankle and great toe joint.
‖Burning in soles of feet, < in bed.
Cold feet, afternoon.
‖Ingrowing toe nail, unhealthy granulations, purulent discharge (lotion).

[34] **Limbs in General.** ‖Burning of hands and feet, < at night.
Rheumatic pains < in places least covered with flesh; on touching painful part pain vanishes and appears in some other part.
‖Rheumatism in all joints, with swelling and spasmodic pain.
‖Rheumatic pains in limbs, with stiffness and rigidity.
‖Acute, inflammatory and arthritic rheumatism.

[35] **Rest. Position. Motion.** Lying still: > rheumatism.
Lying down: cough from tickling pressure in epigastrium; cough <.
Lying with head low: cough <.
Lies upon back.
Lying on l. side: pain in hypogastrium >.
Slightly turned on l. side: spasm of stomach >.
Cannot lie on r. side: spasm of stomach.
Must lie down: headache.
Sitting up: pain in epigastrium; cough >.
Stooping: nausea <; throbbing pain in head <.
Must kneel down and hold head tight to floor: neuralgia in jaw and face.
Rising from sitting posture: frontal headache with vertigo.
Motion: pulsations <: throbbing pain in head <.

Digitized by Google

Turning in bed: pain in arm and shoulder.
Turning head quickly: vertigo.
Cannot raise arm from side: rheumatism.
Swinging arm to and fro: pain in arm is not felt.
Exercise: < headache.

Nerves. Great weakness; palpitation of heart; fainting weakness.
Lassitude, torpor, languor, not disposed to move or make any mental exertion, < in damp weather.
Limbs weak while walking in open air.
Lameness of r. arm.
Chronic paralysis of r. arm.
Convulsive rigidity of limbs.

Sleep. Sleepless at night, wakes with fright, as if he would fall.
Dreams: of sailing at sea; of business matters; frightful.
Drowsiness causing mental and bodily indolence.

Time. Morning: headache begins, < during day, lasts until evening; nausea; redness of eyes; accumulation of mucus in eye.
Morning and lasting four to six hours: neuralgia.
Forenoon: headache commences, < until sunset.
Afternoon: headache; burning of eyelids <; circumscribed redness of cheeks; pain in l. breast: cold feet; fever.
2 or 4 P.M.: fever usually comes on.
Evening: cough from tickling; violent distension of abdomen; tickling in throat; l. leg and foot swollen; shivering in back.
Night: pain in temples <; pain in head >; coryza and diarrhœa <; pains in epigastrium <; copious urination; abdominal pains; cough <; shortness of breath <; sweats; expectoration <; pains in neck <; wandering pains <; burning of hands and feet <; sleepless; Rhus poisoning <.
Until 12 P.M.: cold sweat; swelling of l. leg and foot.

Temperature and Weather. Hot weather: pain in thumb <.
Open air: headache >; pain in chest >; limbs weak while walking.
Damp weather: lassitude <.
Cold room: cough <.
Cold air: inspiring, heat in throat >.
Cold drinks: cause pain in carious teeth.
Cold water: craves.

Fever. Chill with headache, nausea, pain under scapula on motion; shivering in back, < evening in bed.
Coldness of feet in afternoon, with painful, sore tongue; stiffness of knee and finger joints.

Digitized by Google

Shaking chill.
‖Flushes of heat.
‖Slight flushes of heat, followed by chills, then face flushed, hands hot, qualmish feeling all over; lassitude.
‖Heat flying from head to stomach.
‖Burning heat; rapidly alternating with chill and shivering.
‖Afternoon fever with circumscribed red cheeks; fever 2 to 3 P.M., daily.
‖Paroxysms of fever in afternoon, with circumscribed redness of cheeks; cough and expectoration.
‖Burning of palms of hands and soles of feet, compelling him to throw bedclothes off his feet to cool them; these paroxysms generally come on in afternoon or evening.
Slight chill, violent fever, headache and delirium.
‖Copious sweat; cold sweat.
‖Fevers from pulmonary, hepatic or gastric inflammation; nervous fever; marsh fever; hectic fever; scarlet fever (after *Bell.*); typhus, with characteristic headache.

[41] **Attacks, Periodicity.** Alternate: diarrhœa and constipation; pain in thigh and pressure in breast; burning heat and chill and shivering.
Periodical headache.
Every few minutes: violent retching.
Every fifteen or twenty minutes: spasm of stomach.
Every day: for five or six days, neuralgia; fever 2 to 3 P.M.
Every third day for six weeks: sick headache.
Every seventh day: headache.
Every eight days for nine years: attacks of headache and vomiting.
Every two weeks: catamenia; sick headache.
For six weeks: severe cough.
For years: distressing sick headache; neuralgia in face.
For many years: shortness of breath and cough.
For six years: dryness in throat.
For twenty years: pyrosis.

[42] **Locality and Direction.** Right: headache over eye; neuralgia in and over eye; headache in temple; headache <; neuralgia in orbit; catarrhal discharge from side of nose; tearing in temple; pains from eye through back part of head; pain from occiput to temporal bone; burning and watering of eye; coryza <; headache in hemisphere of brain; pain in throat; diphtheritis <; pain in breast; sharp pain over eye; pain in chest <; burning pain in side of chest; stitches in side of chest; shooting pain in side of chest; stitches in breast; rheumatic pain in arm and shoulder; pain in deltoid muscles; pain in top of shoulder; arm helpless with rheu-

matism; coldness in arm; swelling of arm; aching in ball of thumb; pain in thigh; indolent ulcer on shin; sharp pain in ankle and great toe joint; lameness of arm; chronic paralysis of side.

Left: violent pain over whole side of head; rheumatism in shoulder; pressing pain settling over eye; stitches in side of face; pain in hypochondrium; stitches in lower part of breast; pain from chest to shoulder; pneumonia; darting pain in apex of lung; dulness of percussion in supra- and infra-clavicular regions; pain on inner edge of scapula; rheumatic pain in hip; leg and foot swollen.

From r.: to l.; cutting bellyache in iliac fossa; panaritium.

"**Sensations.** As if paralyzed; as if events that transpired in her dreams were not of hours' but of weeks' and months' duration; as of some hard substance in stomach; as if forehead would burst; as if head were drawn forward; as if head must burst; as if eyes would be pressed out; as of a band across forehead; as of an electrical current shooting through head; pain like drawing a rope on a windlass as tight as you can get it; as if temples and scalp were alive with irrepressible pulsation; as if hairs were in eyes; as if she were in a railroad car or in some vehicle which was moving and jarring her, and as if all about her moved rapidly and confusedly; tongue as if burnt; tip of tongue as if scalded; tongue as if in contact with something hot; throat as if swollen: throat so dry it seems as if it would crack; pharynx as if burnt or scalded; constriction in pit of stomach as if suffocating; as of something alive in stomach; as of hot water pouring from breast into abdomen; as of a mass in lower part of rectum; as if menses would appear; cough as if head were enveloped in a blanket; throat and larynx as if swollen; as if upper part of chest were too full of blood.

Pain: in forehead; in forehead and cheek bones; in forepart of head, shoulders, chest and stomach; over r. eye; in head in spots; like a flash of lightning in back part of head; in head in rays; from r. occiput to r. temporal bone; over eyes; in chest; in teeth; in carious teeth; in l. hypochondrium; in loins through hypogastric and uterine region down thighs; in loins; about shoulders and chest; beneath sternum and r. breast; in breast; in calves; in lower extremities; in nape of neck; in back; in sacrum; in r. deltoid muscle; in top of r. shoulder and upper part of arm; from ball of thumb around wrist and back of hand; through hips and down r. limb; under scapula.

Google

Frightfully severe headache.
Violent pain: over upper portion of whole l. side of head; in temple and vertex; from occipital region over head settling over r. eye.
Severe pain: in head; at root of nose and in frontal sinuses; in r. breast, extends to shoulder; in r. side of chest.
Sharp pain: in r. ankle and great toe joint.
Tearing: in r. temple.
Throbbing, lancinating pains: through brain.
Darting pains: through both lungs.
Sharp, piercing pain: in r. breast, midway between sternum and r. nipple.
Cutting pain: from r. to l. iliac fossa, thence to rectum.
Beating pain: in head.
Shooting pains: from one temple to other; from l. chest to l. shoulder.
Wandering pain: in head.
Stitches: in l. side of face; violent, in splenetic region; in mammæ; sharp, in r. chest about seventh rib; in r. breast; in lower part of l. breast to shoulder; about r. lung and nipple; in region of heart.
Burning stitching: in chest.
Violent burning pain: in l. leg and foot.
Intense burning pain: between breasts.
Burning distress: in stomach.
Burning: in stomach; of r. eye; in edges of lids; of ears; of under lip; of uvula; in throat; in œsophagus and pharynx; of palms; behind sternum; under sternum; streaming in r. side of chest extending to hepatic region; in breast; of hands and feet; in soles.
Burning dryness: in eyes.
Stinging sensation: in nose.
Soreness: in spots on head; in throat; of tongue; of roof of mouth; of uvula; throughout pharynx; in epigastrium; in abdomen; of nipples; in larynx; under r. nipple; of nape of neck; down muscles of back; of r. trapezius and deltoid muscles.
Bruiselike pain: in thigh.
Pricking: in point of tongue.
Neuralgia: in and over r. eye; at internal superior angle of r. orbit; in r. temple and orbit; in upper jaw, nose, eye, ear, neck and side of head.
Rheumatic pain: in head; in neck and shoulders; in nape of neck, shoulders and arms; in r. arm and shoulder; in l. hip; in r. thigh; in places least covered with flesh; in all points.
Drawing pain: from back into neck; in shoulders and arms.

Digitized by Google

Pressive pain: in forehead; from nape of neck over head and eyes; in region of heart.
Dull pain: in head; along inner edge of l. scapula.
Grumbling pain: in teeth.
Aching: in ball of r. thumb.
Dull, heavy feeling: in stomach; over root of nose.
Heaviness: in chest.
Pressure: in epigastrium; in stomach; in breast; in upper part of chest.
Spasmodic constriction: beneath lower jaw, across throat.
Constriction: in pit of stomach.
Tightness: in head.
Stiffness: in articulation of jaw; of finger joints; of knees.
Heat: in throat; in stomach; streaming from head to liver.
Tenderness: of r. trapezius.
Rawness: of throat.
Dryness: under upper lid; of lips; of throat.
Beating: under ears; in abdomen.
Jerking: in stomach.
Throbbing: in temporal arteries; of every pulse in body.
Pulsations: in head; in r. temple.
Great weakness and goneness: in stomach.
Faint feeling: about heart.
Weak feeling: about heart.
Itching: in axilla.
Coldness: in body and r. arm.

"**Tissues.** Languid circulation, limbs cold, skin pallid, sensitive to atmospheric changes.
Veins distended, feel sore.
Surging of blood.
Red or gray hepatization of lungs.
Polypi, nasal and uterine.
Carbuncles; warts; fungous excrescences.
Roundish or oval, whitish or raised patches of mucous membrane of nose, mouth, prepuce and anus.
Polypi of larynx and nasal fossæ.
Pains in places where bones are least covered with flesh.

"**Touch. Passive Motion. Injuries.** Touch: temporal veins painfully sensitive; head very painful; eye painful; nipples sore; soreness of nape of neck; pain vanishes and appears some other part.
Pressure: hard upon eye >; > headache; pain in hypogastrium >; surface of chest tender; chest sore; deltoid and biceps tender.
Pressing back up against something hard: > headache.
Rubbing Rhus poisoning with something rough >.
Slightest jar: < headache.
Lifting: pains in sacrum; lumbago.

Google

"**Skin.** Heat and dryness of skin.
Itching and nettlerash with nausea.
Icterus, eyes yellow, stools white, dark yellow urine, during prevailing intermittent fever.
Prickling sensation of warmth spreading over body.
Eruption on face of young women, with menstrual troubles, especially deficiency.
Rhus poisoning; small pimples coalescing into blisters size of a split pea, filled with yellow watery fluid, with intense itching; < at night after 12 P.M.; the only relief he can get is to rub it with something rough, until blisters are open.
Fungous growths.
Scaly eruptions; carbuncles.
Old indolent ulcers, with callous borders and ichorous discharge; dirty granulations, dry, sharp-cut edges.

"**Stages of Life, Constitution.** C. P., æt. 15 months; cold in head.
Boy, æt. 1½, of syphilitic parents; patches in mouth.
Girl, æt. 4, subject to bronchial affections since birth; laryngitis.
Boy, æt. 5; croup.
Girl, æt. 10, lively disposition; influenza.
A. R., æt. 12, suffering six weeks; cough.
Girl, æt. 15, of French extraction, nervo-lymphatic temperament; anæmia.
Girl, æt. 16, lymphatic temperament, quiet disposition, menses appeared once, a year ago, since then absent; incipient phthisis.
Boy, æt. 18, scrofulous diathesis; diphtheritis.
Miss F., æt. 25, suffering since childhood; sick headaches.
Officer, æt. 26; syphilis.
Woman, æt. 30; headaches.
A. S., æt. 30; cold in head.
Mrs. M. L. S., æt. 30, a chronic inebriate, after drinking inordinately for several weeks; gastric derangement.
Woman, æt. 34, brunette, single; influenza.
Woman, æt. 35; migraine.
Miss S. C., æt. 38; catarrh in head.
Lady, æt 47, spare habit, suffering with heart disease; tracheal irritation.
Mrs. F., æt. 48, sanguino-bilious temperament, woman of much energy and refinement; neurosis of stomach.
Mrs. H., æt. 50, fleshy, nearly past the climacteric, suffering for years; sick headache.
Lady, æt. 50, florid complexion, full habit of body; pulmonary congestion.
Mrs. S., æt. 50; cough.

Google

Mrs. P., æt. 55, blue eyes, dark-brown hair, nervo-sanguine temperament, full habit, somewhat corpulent, suffering fifteen years; sick headache.
Mrs. C., æt. 59; œdema of glottis.
Man, æt. 60, full habit, ruddy complexion, full chest, afflicted many years; cough.
Young lady, of rheumatic tendency; rheumatism of arm.

[48] **Relations.** It antidotes: *Opium* (dynamic effects).
Compatible: *Bellad.* (scarlatina).
Compare: *Bellad.*, *Iris*, *Paullinia* and *Mellilot.* in headaches; *Ant. tart.*, *Chelid.*, *Phosphor.*, *Sulphur* and *Verat. vir.* in pneumonia.

SARRACENIA PURPUREA.

Pitcher plant. *Sarraceniaceæ.*

Grows in boggy places from Canada southward.
The tincture is prepared from the fresh plant.
Proved by Porcher, Duncan, Thomas, Hale's New Remedies, 1867; Cigliano, Am. Obs., 1871.

CLINICAL AUTHORITIES.—*Visual disorder*, Berridge, N. A. J. H., vol. 22, p. 194; *Phlyctenoid herpes*, Crica, A. J. H. M. M., vol. 3, p. 78; *Variola*, Martiny, Mowremana, Raue's Rec., 1875, p. 287; *Smallpox*, Renshaw, A. H. O., vol. 2, p. 234; *Use in smallpox*, Cigliano, A. H. O., vol. 8, p. 467; Easton, vol. 1, p. 135.

[1] **Mind.** Melancholia, anxious about everything.
Great depression of spirits from frontal headache.
Brain clearer, buoyant spirits.
Dulness of head, loss of memory, insensibility of r. side; paralysis of hearing and smell.
Want of memory with the headache.
Difficult to concentrate the attention, forgetful; feels dull and heavy; urine sp. gr. 1020; perspires freely.

[2] **Sensorium.** Head feels dull and heavy.
Feels light-headed.
Vertigo: with cramps in neck, spreading to forehead; especially at night; sensation as if he received a knock on head, with vertigo, stupor and vacillating gait; he is obliged to support himself or else to lie down; with drowsiness in head and contractions in spinal column.

[3] **Inner Head.** Frontal headache, low-spirited.
Head dull and aches at coronal region.

Digitized by Google

Severe headache in afternoon for two hours.
Full feeling through head just above ears.
Headache with chills, nausea, vomiting; dim sight, surring in ears.
Pulsations and burning heat of head with sensation as if it would split.

[4] **Outer Head.** Head is hot and aches.
Head and body warm.
Soreness of frontal bone.
Pruritus and heat of scalp.

[5] **Sight and Eyes.** Eyes weak.
Dim sight, headache.
‖Gas flame seems a brilliant yellow ring, the two not being distinct; he sees black objects moving with the eye.
Great photophobia.
Soreness of r. optic nerve, just behind eyeball.
Pain in l. eye as if congested, on waking.
Eyes feel swollen and sore.
Eyes and lids inflamed.
Increased mucous secretion.
Cutting, penetrating pains in orbits.

[6] **Hearing and Ears.** Surring in ears.
Sticking pains deep in r. ear; transient but recurring often; same in l. ear.
Intense otalgia, fears he will lose his senses.
Swelling of parotids.

[7] **Smell and Nose.** Fetid smell.
Epistaxis nearly producing fainting.
Fluent coryza, with cold chills and loss of smell.
Foul-smelling, green-yellowish or bloody discharges.
Nose swollen, red, with pressure and pulsation at root.

[8] **Upper Face.** Face flushed.
Heat and redness of face.
Face pale, with heat and chill alternating.
Erysipelatous swelling of face.
Miliary eruption on face with heat as if it were on fire.
Scaly herpes on face and forehead.

[9] **Lower Face.** Intense neuralgic pains from temples to jaws.

[11] **Taste and Tongue.** Tongue dry.
Tongue coated brownish white.

[12] **Inner Mouth.** Mouth dry.
Lips and mouth parched.

[13] **Throat.** Dryness of throat not relieved by tea or water, borborygmi.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Hungry all the time, even after a meal.
‖Appetite unusually active, but there was a sense of pain

Google

about stomach like that after inflammation or that in an overtaxed muscle.

But little appetite, yet what is eaten agrees with him; urine 1018; pulse 71; sweats freely.

[15] **Eating and Drinking.** Great desire to sleep during eating.

[16] **Hiccough, Belching, Nausea and Vomiting.** Copious painful vomiting frequently after meals, with lightness from stomach to back and colicky pains.

Vomiting of bile mixed with blood.

[17] **Scrobiculum and Stomach.** Empty, hungry feeling; for he can keep nothing on his stomach.

Burning pains in his stomach, with palpitations and contractions.

Pinching pains in stomach; it feels distended and torn.

[19] **Abdomen.** After going to bed, whole abdominal region was in commotion, extending along tract of ascending and descending colon, all in a kind of rolling motion; epigastrium tender on pressure.

Some transient pains in bowels.

Bloated about navel.

Borborygmi and some pain in bowels with constipation; dry throat.

[20] **Stool and Rectum.** Much flatus.

First part of stool natural, last diarrhœic.

Much tenesmus; dysenteric diarrhœa.

Stool at first costive, then dark, offensive, soluble.

Costive; stools very hard, covered with mucus and dark.

Stool copious, dark, fetid, evacuated with great straining; morning.

Diarrhœic stools mixed with glairy mucus, bile and blood; anorexia, prostration and painfully strong palpitation.

Rectum and anus swollen and inflamed.

Morning diarrhœa; faint after stool, which is dark, often mixed with blood, foul-smelling or smelling of musk; bloatedness with colic.

Morning diarrhœa; bloatedness with colic; faintness after stool which is dark, often mixed with blood; foul-smelling or of the odor of musk.

[21] **Urinary Organs.** Awoke 3 A.M. with urging to urinate; bladder so full it overcame resistance of sphincter and dribbled away.

Voided 27 oz. of urine; sp. gr. 1024; vesical tenesmus.

Urine increased, limpid, colorless, scarcely any sediment even after several hours.

Urine responds to tests for phosphates, earthy phosphates and chloride of sodium.

Urine copious, a little cloudy; sp. gr. 1030 (cloudy from mucus); pale yellow.

Urine scanty, limpid, 1025.

Digitized by Google

[28] **Female Organs.** Watery or milky leucorrhœa, thick, whitish, foul-smelling with spasmodic pains in uterus; pulsative pains in womb with swelling as if from a tumor or dropsy; uterus swollen as if full of cysts, especially on r. side; neck of womb swollen and hot; miliary eruption and heat in vulva; bloody discharge at other times than menstrual period as during climaxis.

[29] **Inner Chest and Lungs.** Phthisis pulmonalis and bronchial affections, joined to or depending on a psoric state; hæmoptysis, thick cough; continual tickling in larynx and bronchi; cough, with desire to vomit and vomiting, paroxysms of suffocation and epistaxis; hard cough, shaking chest and bowels and stopping only after expectorating a quantity of compact mucus, tenacious, filamentous with a bitter, putrid, oily taste.

[30] **Heart, Pulse and Circulation.** Feeling of congestion about head, with irregularity of heart's action.

Congestion to chest, heavy feeling about heart.

Slight palpitation in morning.

Pulse: full and strong; 68, general malaise; rose to 100 before morning; 61, very small; quick, 80.

[30] **Outer Chest.** Slight soreness of whole pectoralis major; pain ran up r. trapezius muscle with a wavelike motion; lumbar heat; pulse 70, full; bloated feeling at navel (probably from flatus).

Pain in angle of ribs for half an hour.

[31] **Neck and Back.** Warm sensation passed up back into head.

Weak between and below shoulders.

Back weak, wants to lean on something.

Arms and back tired and sore all over.

Deep-seated pain in back.

Heat in whole r. lumbar region.

Pain and soreness in sacrum.

[32] **Upper Limbs.** Paroxysms of pain in r. shoulder joint, pain in l. carpus and tarsus; face flushed.

Arms feel weak.

Bruised feeling from shoulders to hands.

Aching, sore pain in l. humerus.

Bones in both arms pain.

[33] **Lower Limbs.** Pain in hip joints < rising to feet from a lying posture.

Paroxysms of weakness in coxo-femoral joint with pains of luxation and fear of falling when trying to walk.

Strange lameness in femur, lower third, < in inner condyle.

Pain in condyles of femur.

Wavelike motion in muscles of femur.

Sensation of fatigue in bones of legs as if they were too thick.

Digitized by Google

Bruised and luxated feeling in joints.
Pain in r. patella and metatarsal bones.
Knees feel weak.
Bruised pain in knees as after a fall; he falls easily on his knees.
Bone pains in tibia and fibula; intermittent, but bones continually sore.
Bones of feet inflamed; nodes as in gout.

[34] **Limbs in General.** Limbs cold when still as from deficient circulation.
Limbs easily benumbed.
Weakness of limbs with paralytic debility.

[35] **Rest. Position. Motion.** Wants to lean on something; weakness of back.
Rising to feet from a lying posture: pain in hip joint <.
Trying to walk: fear of falling.

[36] **Nerves.** Debility, wants to lie down all the time.
Languid, heavy.

[38] **Time.** Morning: stool with great straining; diarrhœa; slight palpitation; feverish, with shaking chills.
Afternoon: severe headache.
Night: cramps in neck <.

[39] **Temperature and Weather.** In open air: chilly, hands and feet cold; head hot and sore, feels full.
Cold air: makes him feel chilly and increases bone pains.

[40] **Fever.** Feverish, with shaking chills < in morning.
Skin hot and dry.
Hands hot, warm all over; cold air makes him feel chilly and increases bone pains, especially in knees.
Hot, feverish; pulse 80, small and quick.

[41] **Attacks, Periodicity.** Alternating: heat and chill.
For half an hour: pain in angle of ribs.
For two hours: headache in forenoon.

[42] **Locality and Direction.** Right: insensibility of side; soreness of optic nerve; pain deep in ear; uterus swollen; pain up trapezius muscle; heat in lumbar region; pain in shoulder joint; pain in patella and metatarsal bones.
Left: pain in eye; pain in ear; pain in carpus and tarsus; pain in humerus.

[43] **Sensations.** As if he received a knock on head; as if head would split; l. eye as if congested; heat in face as if on fire; swelling in womb as if from a tumor or dropsy; uterus swollen as if full of cysts; as if bones of legs were too thick.
Pain: in l. eye; in bowels; up r. trapezius muscle; in angle of ribs; in sacrum; in r. shoulder joint; in l. carpus and tarsus; in bones of arms; in hip joints; in condyles of femur; in r. patella and metatarsal bones; in tibia and fibula.

Intense neuralgic pains: from temples to jaws.
Severe pain: in head.
Cutting, penetrating pains: in orbits.
Pinching pains: in stomach.
Spasmodic pains: in uterus.
Pulsative pains: in womb.
Deep-seated pain: in back.
Sticking pains: deep in r. ear.
Aching, sore pain: in l. humerus.
Burning pains: in his stomach.
Cramps: in neck to forehead.
Aching: at coronal region.
Soreness: of frontal bone; of r. optic nerve; of pectoralis major; of back and arms; in sacrum.
Bruised feeling: from shoulders to hands; in joints; in knees.
Burning heat: of head.
Pulsations: in head; at root of nose.
Wavelike motion: in muscles of femur.
Pressure: at root of nose.
Heaviness: of head; about heart.
Full feeling: through head.
Dryness: of tongue; of mouth; of throat.
Tickling: in larynx and bronchi.
Dulness: of head.
Luxated feeling: in joints.
Strange lameness: in femur.
Heat: in vulva; in whole r. lumbar region.
Warm sensation: up back into head.
Light feeling: in head.
Weakness: between and below shoulders; of back; in coxo-femoral joint; of knees; of limbs.

"**Tissues.** Bones feel heavy, sore.
Bones pain, especially cervical and lumbar vertebræ, sacrum and femur, < in inner condyle and great trochanter.
Phlegmonous swelling with a rosy tint on various parts.

"**Skin.** ‖Phlyctenoid herpes.
‖Psoriasis.
‖Scrofulous eruptions.
‖Variola (decoction taken when eruption is out and beginning to pustulate aborts secondary fever, pitting).
‖Fever becomes less, delirium vanishes, pains lessen, eruption develops sooner and matures rapidly, desiccating without leaving pits.
‖Eruption out, pustules dissipate, first on face, fever lessens, urine though scanty and dark becomes abundant and pale; strength returns.

Google

Arrests pustules, killing as it were the virus from within, preventing pitting.

Constitutional symptoms in three or four days subside.

Even confluent forms are helped, little or no pitting following.

Relieves restlessness, sleeplessness during variola.

A woman far advanced in pregnancy was cured of smallpox with *Sarrac.* 3, 6th and 9th, her accouchement being happily accomplished during her convalescence, the babe bearing upon its body numerous red blotches, indicating that it had been similarly affected at the same time with the mother.

An infant a few months old was attacked with a grave form of smallpox, with variolous angina, so severe that it was with difficulty it could take the breast; the mother took *Sarrac.* 3, 6th and 9th, continued to nurse the infant, which promptly recovered from the disease, and the mother did not take the disorder, notwithstanding the immediate and constant contact of the child.

In an epidemic occurring in the environs of Wavre it was given to more than two thousand persons living in the very middle of the disease and coming in constant intercourse with it, but all who took it escaped the disease; during the same time more than two hundred cases were treated by the same remedy without the loss of a single patient.

[47] **Stages of Life, Constitution.** Man, æt. 35, sanguino-bilious temperament, suffering a long time; phlyctenoid herpes.

[48] **Relations.** Antidoted by: *Podophyl.* (diarrhœa).

Google

Sensorium. Dull, stupid feeling: cannot keep the mind on his study.

‖Heaviness in head.

Vertigo: while standing at window he suddenly fell backward on floor unconscious, at same time throat was swollen, sour eructations before and afterward, severe perspiration in night; with nausea in morning while gazing long at one object; while sitting and walking, head inclined to drop forward.

‖Staggers, falls forward, in open air.

Inner Head. ‖Headache, with nausea and sour vomiting.

‖Pressure, or pressure with stitches, in l. side of forehead and head.

Headache like pressure of a great weight in head, which is inclined to sink forward.

Pressing and itching deep in r. half of head, morning.

‖Throbbing in top of head; < from walking, even when sitting down afterward, now and then aching through temples, forehead or occiput.

Violent throbbing in r. side of head, deep in brain.

A kind of buzzing in head, as if a large bell had been struck.

Dull tremor (wuwwern) with a waving in head.

Beating and sounding in r. side of head, deep in brain.

Very warm in head during dinner, with sweat on forehead.

‖Shooting in r. parietal bone forward to temple or face.

‖Pressing in vertex, increasing and decreasing slowly.

‖Mercurial syphilitic affections of head.

‖Shooting in r. parietal bone forward to temple or face; staggering and falling forward in open air. θMercurial syphilitic affection.

‖Shooting back of head to front with violent itching, after syphilis and mercurialization.

‖Darting from occiput to eyes with nausea, determination of blood to head, feet and hands cold. θNervous headache.

‖Suffering severely all day, pains becoming more violent as evening approached, causing him to jerk his head to one side and scream with every paroxysm; pains confined to r. side principally, even pulsative and stitching in character, extending from occiput upward and forward over ear, around to temple and across forehead.

‖Dull aching pain in head, mostly in forehead, < in evening; vertigo, especially in warm room; stupid feeling; prostration; great drowsiness in evening, but unable to sleep quietly through night; nocturnal emissions from one to three times a week, occurring in connection with lascivious dreams; tired feeling in morning

Digitized by Google

with bitter taste in mouth; pain in small of back extending down spermatic cords. θSpermatorrhœa.

‖Dull, stupid feeling in head, inability to keep his mind on his studies, sometimes a feeling as if something were pressing upon head; at times anguish of mind; unable to read at night on account of a mist or smoky appearance before eyes; great weakness and prostration, render him unfit for work; soft, flabby muscle; least excitement caused ejaculation of semen without sexual feeling; obstinate constipation, seminal losses since puberty from masturbation; emissions with lascivious dreams.

⁴**Outer Head.** Sensitiveness of scalp; falling off of hair.

‖Moist eruption on scalp, pus from which causes inflammation of any part it touches.

‖Crusta lactea, indicated only when it begins with little pimples in face, very itchy, forcing child to scratch; parents subject to tetter.

‖Crusta serpiginosa, with widely spread inflammatory affection of skin, child cannot bear it and is very impatient; in open air crusts fall off and new skin cracks.

‖Humid scabs on skull.

Falling off of hair, with great sensitiveness of scalp on combing.

‖Plica polonica.

‖Mercurio-syphilitic affections of head.

⁵**Sight and Eyes.** Vertigo while gazing long at one object.

Flickering before eyes, with headache.

Great dimness of l. eye, as if gauze were spread over it.

Mist before eyes, reading becomes difficult.

Reading by candlelight hurts eyes, paper looks red.

‖Obscuration before eyes as from a fog; mist when reading; < after seminal emissions.

‖Halo around the candle.

Eyes pain from light of day.

Pupils dilated.

Pressure in l. eye, as from a grain of sand.

Pain in l. then in r. eye, with dimness of vision.

On closing eyes stinging in them.

Pressing in eyes alternates with burning.

Stinging frequent in both eyes, as if dust or sand were in them; > outdoors.

‖Stinging in eyes on closing lids, and violent pain when closed eyes are pressed upon; at same time a broad red stripe extending from cornea to outer canthus.

Internal canthi bluish and bloated; headache from occiput forward; abuse of mercury.

Quivering in r. upper lid.

Google

Lachrymation in daytime; lids agglutinated in morning.
Ophthalmia after checked tetter.
Inflamed, dry eyelids.
‖Itchlike eruption on eyelids.

[6] **Hearing and Ears.** Words reverberate in ear.
Sound in head when talking as if a bell were striking.
Burning itching scab on ear lobe.

[7] **Smell and Nose.** Sneezing and running coryza in morning.
Burning in nose on blowing it, with a dry cough.
Very thick mucus from nose.
‖Chronic stoppage of nose.
Coryza and cough.
Itching on r. wing of nose, not > by scratching.
Itching on l. side of nose and around eyes.
Pricking in point of nose as from a needle.
Eruption in l. nostril; sore nose.
‖Right nostril stopped up and scurfy.
‖Pain in nose; inflamed spots on septum.
Itching eruption under nose, as if caused by acrid discharge.
A suppurating pimple on r. side of nose.
Small boils on nose.
Scabby eruption on and under nose.

[8] **Upper Face.** Violent pain in face, as if bruised about both inferior orbital edges on waking in morning, only on pressing them.
Drawing, stinging, tearing in masticatory muscles of r. side, which seem to have spasmodically contracted.
The jaws pain as if being broken.
Fine pricking itching in face and scalp, as well as about neck and shoulders, with feeling of great warmth in these parts; on scratching it begins in another place.
‖Face yellow, wrinkled, old-looking.
‖Eruption like milk crust.
‖Itching eruption on forehead, with burning; becoming humid on scratching.
‖Pimples of various sizes on face.
Heat of face; sweat on forehead, in evening in bed.

[9] **Lower Face.** Stiffness and tension in muscles and articulation of jaw.
Pressing, stinging pain on lower inner edge of r. lower jaw, but only on handling it and on bending head back.
Herpes on upper lip.

[10] **Teeth and Gums.** ‖Sensitiveness of upper front teeth.
‖Tearing in teeth, from cold air and cold drink.
‖Toothache in last molars, > from cold air.
Stinging, tearing in gums and root of last r. inferior molar.
Swelling and sore pain of gums of inner side of inferior maxilla.

Google

[11] **Taste and Tongue.** Bitter taste: of food; in mouth in morning.
Sweetish taste.
Tongue: coated white; rough several mornings on waking, passing off after eating; red, back of it white.
Mercurial aphthæ on tongue and roof of mouth.
Stitches in tongue.
Acrid sensation on tongue.
Blisters on tongue; aphthæ on tongue and palate.
Tasteless water collects in mouth.
Slimy mouth in morning.
Dryness in mouth without thirst.
Dryness in mouth and throat, mornings, in bed.
Pressing drawing pain in soft palate.
In fauces: tickling ulcerative sensation, causing a cough.
Acrid sensation in pharynx.

[13] **Throat.** Spasmodic contraction of throat, with dyspnœa, must loosen his cravat.
Dryness and roughness of throat in morning.
Refuses food on account of pain in throat.
Sore feeling in throat, r. side.
Sore throat, aphthæ on soft palate.
Trichotomous ulcers; after plica polonica had been cut off, deep ulcers on tonsils, spreading to soft palate, on back wall of fauces; pale bluish edges; covered with cauliflower excrescences; whitish thin pus, smelling like rancid butter; refuses to take food on account of too much pain; kept alive by injections of milk in rectum.

[14] **Appetite, Thirst. Desires, Aversions.** Want of appetite, the thought of food disgusts him.
Want of thirst.

[15] **Eating and Drinking.** Burning in stomach, especially after eating bread.
After eating: bitter eructations (also during); feels as if he had eaten nothing; diarrhœa; deep inspirations; heavy, short breathing; asthma; exhaustion and nausea.
Worse from warm diet; > after cold diet.
To drink water sets her to vomiting.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough 6 P.M.; after dinner.
Eructation: with taste of food, after dinner; first bitter and sour, then empty; bitter in morning after rising; during dinner; of bitter, sour matter, evenings; continuous, sour; sour after breakfast; of sour water, after noon; with shuddering.
Belching with diarrhœa.
Nausea: when thinking of food eaten; with acrid sen-

Google

sation on tongue and in pharynx; in stomach, less in throat; after breakfast; with constant ineffectual effort to vomit.

[17] **Scrobiculum and Stomach.** Burning in stomach, especially after eating bread.

Stomach has no sensation, after eating feels as if he had eaten nothing.

[19] **Abdomen.** ‖Rumbling and fermentation in abdomen, with discharge of offensive flatus.

‖Rumbling, with sensation of emptiness in abdomen.

Painful pressure inward and pinching in l. side of abdomen in a small spot, < by deep inspiration.

‖‖Pressure in abdomen from above downward; pressure on bowels.

Burning, or cold feeling in abdomen.

‖‖External abdomen very sensitive to touch.

In r. groin severe tension.

Pinching in l. inguinal region.

‖‖Hernia.

Soreness in bend of r. groin on appearance of menses.

[20] **Stool and Rectum.** ‖‖Motion in bowels as if diarrhœa would follow.

‖Loose stool in evening.

‖‖Diarrhœa: with discharge of flatus; with bellyache and backache at same time.

‖Very hard stool.

‖Constipation, violent urging to urinate, stool small, with much bearing down.

‖Difficult and painful stool, with fainting attacks; stool retarded, hard and insufficient.

‖Obstinate constipation with violent urging to urinate; urging to stool with contraction of intestines; excessive pressure from above downward, as if bowels were pressed out; during stool violent tearing and cutting in rectum.

‖Diarrhœa after every kind of food that disagrees with his stomach; with belching and rumbling in abdomen.

‖Blood with stool.

[21] **Urinary Organs.** ‖Chronic nephritis.

‖‖Neuralgia; attacks of most excruciating pains from r. kidney downward.

‖‖Renal colic and passage of gravel.

‖Small stones are expelled from bladder.

‖Stone in bladder; bloody urine.

‖‖Renal and vesical calculi.

‖Gravel, in children.

Painful constriction of bladder, without urging.

Pain and cramps in bladder, particularly with a painful urging and burning; urine copious and pale.

Digitized by Google

Tenesmus of bladder, with discharge of white acrid pus and mucus.

Tenderness and distension over region of bladder.

Nocturnal incontinence of urine in a little girl; when awake could pass urine only when standing.

Frequent discharge of pale, copious urine.

Has to get up two or three times at night to urinate and passes a great quantity; he thinks he can never finish, at first with burning, then without.

Frequent urination, with hard stool.

Frequent inefficient urging to urinate, with diminished secretion.

Frequent desire to urinate with scanty discharge accompanied by burning.

When he sits urine dribbles from him; when he stands it passes freely.

The urine passes in a thin, feeble stream, or in drops only, without pain or urging; he has to press much.

Burning while urine passes, with discharge of elongated flakes.

Strangury, with pressure on bladder, yet the urine will not come, and when it comes there is cutting pain.

Painful retention of urine.

Urine: bright and clear, but irritating; red, fiery; often and copious, must rise at night; scanty, slimy, flaky, sandy; copious, passed without sensation; pale, turbid, immediately after its passage like clay water and scanty, voided in a thin, powerless stream; deposits white sand.

Sand in urine or on diaper; child screams before and while passing it.

Each time she makes water, air passes out of urethra with a gurgling noise.

Urine passes in a thin, feeble stream or in drops without pain.

After passage of urine burning and itching, tearing pain from glans to root of penis.

Much pain at conclusion of passing water, almost unbearable.

Jerking sensation along male urethra.

Pain at meatus urinarius, with women.

Great difficulty in urinating, constant ineffectual desire; sometimes urine (which is scanty) becomes turbid on standing; pain in back, at lower part of spine, and from thence across hips and down thighs; lower part of abdomen tender to touch, hard, distended; her symptoms remind her of what she suffered after a confinement.

A man, æt. 52, addicted to whisky for years: had a copious flow of blood from bowels some four months

Google

ago; the exertion of walking a few blocks causes suffocation; after the loss of blood feet began to swell; both limbs to middle of thighs very œdematous; has had two or three nondescript chills; a few months ago a sudden paralytic weakness of l. arm and leg, passed off in three hours, leaving a numbness in l. hand, and rending pain in l. side of head and face; no appetite; bloody mucous discharges with stools; feels as if in a dream all the time; loss of memory; face covered with varicose veins and very red; general venous stasis; feeling on top of head as if he had been hit with a hammer; must pass urine several times a night; urine thick and cloudy after standing, but clear when first passed; has had much worry from financial losses; cannot pass urine while sitting at stool, but it flows freely when he is standing; albumen in urine.

‖After each urination pain at a point near neck of bladder; had to urinate often and had distress more or less all through pelvis; after each urination had chills commencing at region of neck of bladder and spreading upward until he felt them in whole upper part of body.

‖After exposure to a draft of cold air while in a profuse perspiration, next morning was unable to move or be moved; felt as if he were bound down to bed by a sort of suction; before he got into this condition had severe sharp pains, principally in back and shoulders, on least motion; but two scanty discharges of urine in the previous twenty-four hours.

▮Mrs. C., æt. 50, took a severe cold, followed by a chill and fever; next morning after chill, awoke with severe pains through bladder, back, hips and down thighs; frequent urination, passing but little and that mostly blood, with a great deal of burning and straining. #Cystitis.

‖A sickly-looking child, a girl, æt. 3, in bad health several weeks; every time the child urinates, wind comes from bladder with a noise.

‖After each urination a pain at a point in vicinity of neck of bladder; after every urination chills commencing at region of neck of bladder and spreading in an upward direction until finally he felt them in whole upper part of body.

Male Sexual Organs. ▮Seminal emissions, lascivious dreams, with backache, prostration, vertigo.

▮The least excitement causes an emission, even without sexual feeling.

‖Painful pollution nearly every night, with lascivious dreams.

▮Lascivious dreams with erections wake him up, with head-

Google

ache, dim sight, prostration and vertigo; inclination to coitus, with restless sleep and frequent emissions; spermatic cords swollen, sexual excitement makes them ache and sensitive; bloody pollutions (*Ledum*); offensive odor about genitals.

‖Swelling of spermatic cords after ungratified sexual excitement.

‖After suppressed gonorrhœal discharge by injections made of a solution of gunpowder, extremely severe rheumatic pains in limbs and extreme emaciation.

‖Gonorrhœa checked by cold, wet weather or by mercury, followed by rheumatism.

‖Herpes on prepuce.

‖Moist eruption about genitals or between scrotum and thighs.

Tearing from glans to root of penis.

Glans red and inflamed.

‖Intolerable odor about genitals.

‖Unbearable itching on scrotum and perineum; after scratching little pimples rise, oozing a moisture, and keep the part sore.

‖Sycosis.

‖Old, dry sycotic warts, remaining after mercurial treatment for gouty pains.

‖Syphilis; squamous eruption; bone pain; after abuse of mercury.

Female Sexual Organs. ‖Catamenia very copious, even to hemorrhage, with an old maid.

‖Dysmenorrhœa for twenty years; generally began in morning with bitter vomiting, diarrhœa and fainting fits, with exceedingly cold sweats; dreadful pain in back, thighs and hypogastrium; had to lie down the first day, the second the pain continued very bad, and on the third day it went off; l. nipple considerably retracted, arising from a fall when a child, and she had severe pain in l. breast extending down l. arm, and l. breast was so tender that she would often hold her hand in front of it to avoid contact.

‖Menses: too late and scanty, preceded by urging to urinate; itching eruption on forehead; flow acrid; soreness inside of thighs; griping in pit of stomach in direction of small of back.

‖Leucorrhœa: on walking; pain at meatus urinarius after urinating.

‖Leucorrhœa continuing six months after parturition, with severe laborlike pains from sacrum to crest of ilium, or around to uterus; heat and pulsation in sacrum; scanty, white leucorrhœa, when walking or exercising;

Google

scalding micturition; severe pain at close of urination: had had many abortions.
Nipples became retracted and insensible.
‖Scirrhus of breast (cured by large doses).
During climacteric period: asthmatic breathing, made < by lying down; pain in back very severe on a line with and immediately to left of sacrum; < from pressure and from turning over in bed; severe and constant nausea, with vomiting, severe frontal headache; great urging to urinate with only slight emissions of urine, accompanied with burning, stinging pain during and after severe rigors over whole body, commencing at feet; rather calm, yet feared she would not recover.

[34] **Pregnancy. Parturition. Lactation.** ‖Pregnant women: before and during stool, severe pains in sacral regions, writhing, drawing, radiating upward and downward until fingers, hands, feet and toes are involved and cramped from darting, drawing pains, with anxiety, faintness and palpitation of heart.
‖Suppuration of mammæ.

[35] **Voice and Larynx. Trachea and Bronchia.** ‖Croup, spasmodic variety; laryngismus stridulus.
Rawness and pain in larynx.
Throat rough, hoarse and dry in morning on waking.
Hoarseness in throat every other day.
Tough slime in throat in morning which cannot be removed by hawking.
Constant hawking of mucus in morning, the slime being reproduced in abundance.
Spasmodic constriction in throat and chest, with difficult breathing.
Loosens clothes from neck in order to get breath; but this is without avail.

[36] **Respiration.** Shortness of breath, he must loosen neckcloth and vest.
Stoppage of breath as if by a spasm, with constriction of throat. θSpasmodic asthma.
‖Short breathing on going up stairs.
Rigors over whole body from below upward; asthmatic breathing, < by lying down.
Oppression of chest impeding respiration, mornings.
‖Great emphysema; chest barrel-shaped; liver pressed downward; scaleni muscles hypertrophied; constant dyspnœa, < after eating and least motion (relieved).

[37] **Cough.** Cough: from tickling in chest or with rattling in chest; with colorless, tasteless expectoration, pain in larynx; with headache; dry, with burning in nose on blowing it; with coryza; with nausea, vomiting of bile, diarrhœa; in morning.

Digitized by Google

||Chronic catarrh.

[28] **Inner Chest and Lungs.** |Stitches from back through to chest with every motion.

||Arthritic tubercles in lungs.

[29] **Heart, Pulse and Circulation.** Palpitation of heart without fear; mostly during day.

Ebullition of blood and protruding veins.

Pulse accelerated in evening, slow in morning.

[30] **Outer Chest.** Breast bone feels as if bruised; sensitive to touch.

On outside of chest, tensive pain, as if it were too short, on straightening up and walking erect.

||Painful pressure on breast bone, < when touched.

The nipples are wilted, unsensitive and not irritable.

Itching about nipples.

Urticaria on chest.

[31] **Neck and Back.** |Neck emaciated; marasmus of children.

||Had to loosen his necktie; feels narrow-chested.

|Cervical glands indurated; abuse of mercury.

|Stitches in back through into chest from least motion.

Pain down a part of spine, across hips and down thighs; difficult urination.

[32] **Upper Limbs.** Stitches in joints of arms, hands and fingers, on motion.

Deep rhagades on fingers, with burning pains.

||Pain in tips of fingers on pressure, as if ulcerated or as if salt were put on a wound.

|Tips of fingers feel bruised and sore.

||Sides of fingers burning.

|Fingers burning under nails, with itching.

Urticaria on hands.

|Tetter on hands.

[33] **Lower Limbs.** Weakness in thighs and knees.

|Wrenching, excruciating pains in knees, which were hot, swollen and tender to touch, sometimes in l., sometimes in r. and sometimes in both at the same time; motion very painful, especially on going up and down stairs; seat of greatest tenderness on either side of patellæ; frequent attacks brought on by accidentally bruising knees against leg of table (which invariably produces severe inflammation).

Stitches in legs especially from motion.

||Blue spots on legs, with induration of skin under spots extending deep in, the beginning of long-lasting ulcers.

||Pains in superficial knots on shin bone.

Red spots on calves.

||A young man, æt. 30, had been salivated, and in addition to many painful symptoms had a large ulcer on r.

Google

leg, surrounding ankle, as large as hand, invading nearly whole circumference of part and extending down through fascia almost to bone; superficial veins much enlarged, some œdema of foot; constant aching gnawing; parts excessively sensitive to pressure; had been in habit of taking morphia nightly to secure sleep; ulcer irregular in form, ragged edges; dark areola; edges high and rounded; floor of ulcer flat, but uneven; pus profuse, horribly offensive and dark-colored; would frequently partially granulate, then break down again, granulations becoming black and coming away in masses; on l. leg a similar sore not quite so large; a similar ulcer on l. arm, midway between wrist and elbow, not quite as deep as the others; health poor; appetite deficient; sleepless and generally worn out (benefited).

‖ Eczema of l. leg, with piles, after being relieved by *Hepar* 6x was cured by large doses of *Sarsap.*

‖ Rheumatic pains at night in feet.

‖ Icy coldness of feet before going to bed.

‖ Rhagades on feet.

‖ Before going to bed swelled feet.

‖ Burning in sides and tips of toes, with great sensitiveness to pressure of shoes or boots; a similar burning also in fingers, under nails, with itching.

‖ Rheumatic pains in joints after gonorrhœa.

‖ Rheumatism of lower limbs; swelling and induration of glands about upper part of neck. θSyphilis and abuse of mercury.

‖ Pain in bones from mercury.

In all joints of body, tearing now here now there for several days, but only of short duration.

‖ Gout in lower limbs.

‖ Arthritis vaga.

‖ Exostoses, mercurial bone pain.

[34] **Limbs in General.** Limbs immovable as if paralyzed.

Trembling of hands and feet.

‖ Hands and feet peculiarly weary.

‖ Rheumatism, bone pains after mercury or checked gonorrhœa; pains < at night in damp weather or after taking cold in water.

[35] **Rest. Position. Motion.** Lying down: asthmatic breathing <.

Lying on back: when sleeping.

Sitting: head inclined to drop forward; urine dribbles from him.

Bending head back: causes pain in jaw.

Standing: girl could only pass urine; urine passes freely.

Stooping: pains in occiput to forehead.

Digitized by Google

Motion: causes sharp pains in neck and shoulders; dyspnœa <; stitches from back to chest; stitches in joints; of knees painful; stitches in legs <.
Turning over in bed: pain in back <.
Walking: head inclined to drop forward; throbbing in top of head <; causes suffocation: leucorrhœa; erect, chest feels too short; pain from occiput to forehead; pain in small of back.
Going up stairs: short breathing.

[36] **Nerves.** Ability to go about all day, fasting; no exertion seemed to tire; numbness of fingers, especially third and fourth on both hands.
Sensation of weakness over whole body; faint feeling.
Fainting attacks, with difficult stool.
Paralysis, muscles atrophied.

[37] **Sleep.** Sleeplessness at night; awakens frequently.
Dreams: lascivious, without erections but seminal emissions; of fatal accidents.
Sleeps lying on back.

[38] **Time.** Morning: nausea; itching deep in head; tired feeling; bitter taste; lids agglutinated; sneezing and running coryza; tongue coated white; slimy mouth; dryness in mouth and throat; tough slime in mouth and throat; oppression of chest; diarrhœa; pulse slow.
Forenoon: frequent shuddering from feet upward.
Daytime: lachrymation; palpitation of heart.
6 P.M.: hiccough.
Evening: pains increase; headache <; great drowsiness; heat of face; eructations; loose stool; pulse accelerated; heat ebullitions and palpitations; heat and sweat on forehead.
Night: severe perspiration; rheumatic pains in feet; sleeplessness.

[39] **Temperature and Weather.** Heat: pimples itch.
Warmth: symptoms >.
Warm diet: symptoms <.
Warm room: vertigo <.
From warm room into cold air: rash appears.
Open air: staggers and falls forward; crusts fall off and new skin cracks.
Cold air: tearing in teeth; pain in molars >; a draft of while in a perspiration, next morning could not move.
Cold drink: tearing in teeth.
Cold diet: symptoms >.
Cold, wet weather: checked gonorrhœa; rheumatism <.
Washing: eruptions <.
Chilliness: symptoms <.

[40] **Fever.** Chilliness predominating (day and night).

Frequent shuddering, mostly in forenoon, running from feet upward.

Rigor over whole body, from below upward.

Worse during chilliness; > as soon as he becomes warm.

Heat in evening, with ebullitions and palpitation of heart.

Ebullition of blood, protruding veins.

Heat, evenings in bed, an hour before falling asleep; blood boils, heart beats, and sweat stands on forehead.

Sweat on forehead during evening heat.

For five days, shooting pain from occiput to forehead, on stooping or walking; for two days, chilliness beginning in legs and going all over body, then general heat, then slight sweat; with heat, thirst, drinking much and often; shooting pain in small of back when walking; feels hot to herself but skin is cool to touch; pulse 120; some days ago exposed to an offensive smell from decomposing substances.

41 **Attacks, Periodicity.** Alternating: pressure and burning in eyes.

Two or three times a night: must get up to pass urine.

Every other day: hoarseness in throat.

For two days: chilliness in legs, thence all over body.

For several days: tearing in joints.

For five days: pain from occiput to forehead.

Two or three times a week: seminal emissions.

Spring: eruptions prone to appear; sycotic eruption <.

For twenty years: dysmenorrhœa.

42 **Locality and Direction.** Right: itching in half of head; throbbing in side of head; beating and sounding in side of head; shooting in parietal bone; quivering in upper eyelid; itching in wing of nose; nostril stopped; pain in masticatory muscles; pain in lower jaw; tearing in root of last inferior molar; sore throat; severe tension in groin; soreness in bend of groin; excruciating pain from kidney downward; large ulcer on leg; boils on side of nose; on dorsal side of foot.

Left: pressure and stitches in side of forehead and head; dimness of eye; pressure in eye; itching on side of nose; eruption in nostril; pinching in side of abdomen; pinching in inguinal region; weakness of arm and leg; numbness of hand; rending pain in side of head and face; nipple retracted; severe pain in breast; ulcer on leg and arm; eczema of leg; boils in gluteal regions.

First l. then r.: pressure in eyes.

Upward: chill passes from bladder.

From above downward: pressure in abdomen.

From below upward: rigors over whole body; shuddering from feet.

Digitized by Google

Upward and downward: sacral pains radiate.

"**Sensations.** As of a great weight in head; a buzzing as if a large bell had been struck in head; as if something were pressing upon head; as if gauze were spread over l. eye; as of a grain of sand in eye; as of a needle pricking point of nose; face as if bruised; jaw as if being broken; as if he had eaten nothing; as if diarrhœa would come on; as if bowels were pressed out; as if in a dream; as if he had been hit with a hammer on top of head; as if bound down to bed by a sort of suction; as if breath were stopped by a breath; breast bone as if bruised; as if chest were too short; as if tips of fingers were ulcerated or as if salt were put on a wound; limbs as if paralyzed.

Pain: in small of back and down spermatic cords; in last molars; in throat; in bladder; in lower part of spine, across hips and down thighs; at point near neck of bladder; at meatus urinarius; in larynx; in superficial knots on shin bone; in bones.

Excruciating pains: from r. kidney downward; in knees.

Dreadful pain: in back, thighs and hypogastrium.

Violent pain: in eyes; in face.

Severe, sharp pains: in back and shoulders; through bladder, back, hips and thighs; in l. breast; in back; in head.

Tearing: in masticatory muscles; in teeth; in rectum; from glans to root of penis; in all joints.

Rending pain: in l. side of head.

Cutting: in rectum.

Darting: from occiput to eyes; in sacral regions, thence upward and downward to fingers and toes.

Shooting: in r. parietal bone; back of head to front; from occiput to forehead; in small of back.

Throbbing: in top of head; in r. side of head.

Pulsative pains: in head.

Severe, laborlike pains: from sacrum to crest of ilium, or around to uterus.

Stitches: in l. side of forehead and head; in tongue; from back to chest; in joints of arms, hands and fingers; in legs.

Stitching pains: in head.

Pinching: in abdomen; in l. inguinal region.

Griping: in pit of stomach.

Cramps: in bladder.

Burning pain: in rhagades on fingers.

Aching: through temples, forehead and occiput.

Rheumatic pains: in limbs; in feet; in joints.

Sore pain: of gums.

Google

Stinging: in eyes; in masticatory muscles; in gums and root of molar.
Soreness: in throat; in bend of r. groin; inside of thighs; of tips of fingers.
Burning: in eyes; in nose; in stomach; in abdomen; while urine passes; from glans to root of penis; of sides of fingers; under finger nails; in sides and tips of toes.
Acrid sensation: on tongue; in pharynx; in stomach.
Pricking: in point of nose.
Distress: all through pelvis.
Rawness: in larynx.
Heat: in sacrum.
Tickling, ulcerative sensation: in fauces.
Jerking: along male urethra.
Pulsation: in sacrum.
Beating and sounding: in r. side of head.
Pressure: in l. side of forehead and head; in l. eye; in abdomen; on bowels; on bladder.
Pressing: deep in r. side of head; in vertex; in soft palate; on breast bone.
Drawing: in masticatory muscles; in soft palate; in sacral region and upward and downward to fingers and toes.
Tension: in muscles and articulation of jaw; in r. groin.
Heaviness: in head.
Constriction: of bladder; in throat and chest.
Dryness: in mouth; in throat.
Stiffness: in muscles and articulation of jaw.
Numbness: of l. hand; of fingers.
Weakness: in thighs and knees; over whole body.
Dull tremor with waving: in head.
Dull, stupid feeling: in head.
Pricking itching: in face and scalp; in neck and shoulders.
Itching: deep in r. half of head; in head; of scab on ear lobe; in r. wing of nose; on l. side of nose; of eruption on forehead; from glans to root of penis; on scrotum and perineum; about nipples; under finger nails; in spots on scars.
Cold feeling: in abdomen.

"**Tissues.** ‖Great emaciation, skin becomes shrivelled or lies in folds.
‖Scrofulous, sycotic or syphilitic affections.
Chronic abscesses attended by profuse discharge.
‖Rheumatic bone pains after mercury or checked gonorrhœa.
‖Children emaciated; face like old people; big belly; dry, flabby skin; mushy passages. θMarasmus.
‖Eruptions prone to appear in Spring, their bases inflamed, crusts detach readily out of doors and adjoining skin becomes chapped.

Digitized by Google

Touch. Passive Motion. Injuries. Touch: external abdomen very sensitive; l. breast very sensitive; breast bone sensitive; knees tender; boils sting.

Pressure: upon closed eyes causes violent pain; pain in back <; pain in finger tips; toes sensitive.

Loosens clothes from neck to get breath.

Handling jaw causes pain.

Combing: scalp sensitive.

Scratching: causes itching to begin in another place; eruption on forehead becomes humid.

Skin. Rash as soon as he goes from warm room into cold air.

Dry, red pimples, only itching when exposed to heat.

Rhagades deep and burning.

Base of eruption much inflamed: child cries much and is very uneasy; crusts become detached in open air and adjoining skin chapped.

Herpetic ulcers, extending in a circular form, forming no crusts, red, granulated bases, white borders; skin appears as after a warm compress; serous, reddish secretions.

Ulcers after abuse of mercury.

Shrivelled skin.

Tetters appear on all parts of body.

Tetters, herpetic ulcers, in syphilis.

Ulcers in second stage of syphilis.

Many little warts.

Horses lose hair with eruptions.

Often returning rash makes the babies chafed.

Dry, itchlike eruptions, with emaciation.

Pemphigus squamosus.

Serpiginous eruptions.

Small pus boils on r. side of nose; on r. dorsal side of foot, l. gluteal region, sometimes with stinging pain on touch.

Pustules which have been scratched open, leaving ulcers suppurating for a long time.

Skin does not heal.

Red spots, psoriasis-like, after abuse of mercury.

An endemic affection occurring in Marienwerder, occasionally with trichoma (plica); patients unwell for a long time; pale-red brownish spots appear on the extremities, rarely on trunk, turn into small, deep ulcers, edges callous, inverted, these heal after a time, but appear on other places; their size is about half an inch, seldom smaller, never larger; they spread in a line like a wreath or garland; the scars elevated, red, winding; later sore throat, pain in nose; inflamed, suppurating spots on soft palate and on septum, soon destroying it; sometimes pains in superficial knots on shin bone and other places; also exostoses.

Sycotic eruption consisting of little spots scarcely raised

above skin, often scaling a little but looking like the roseola of syphilis and itching intolerably, < in Spring.

‖ Pustular efflorescence on face, of ichorous character; on rest of body a papular efflorescence; this eruption appeared after violent nocturnal itching, causing scratching sometimes on upper, sometimes on lower extremities, sometimes on body in form of small colorless pimples, containing serum; the latter eruption began a year ago, while that on face appeared a year previously and attacked in varying degrees of intensity and extent the forehead, cheeks and particularly nose.

‖ Eruption resembling psoriasis in subjects who have taken much mercury. θ Syphilis.

‖ Itching relieved or lessened by scratching.

‖ Itching in spots on scars after smallpox.

‖ Blue spots with indurated skin on legs.

‖ Hardness of skin.

New skin cracks and burns.

‖‖ Rhagades: skin cracks on hands and feet; pain and burning, particularly on sides of fingers and toes (after *Hepar*).

‖ Eruptions following vaccination.

‖ Boils.

‖ Eczema.

Eruptions < from washing.

[47] **Stages of Life, Constitution.** Dark hair; sycosis.

Girl, æt. 3, sickly looking; wind from bladder.

Young man, æt. 19, nervo-bilious temperament, farmer; spermatorrhœa.

Servant, æt. 20; ague.

Student, æt. 20, nervous temperament, suffering since puberty; spermatorrhœa.

Man, æt. 30, had been salivated; ulcer on leg.

Miss P., maiden lady, light hair and complexion; mental depression.

Mr. ——, syphilis nine years ago, for which he received large doses of mercury; rheumatism in joints; headache.

Mrs. ——, æt. 32; dysmenorrhœa and pain in breast.

Lady, æt. 45, in poor health, passing through climaxis; asthma, etc.

Mrs. C., æt. 50, after taking a severe cold; cystitis.

Man, æt. 50, addicted to stimulants; affection of bladder.

Man, æt. 52, whisky drinker; Bright's disease.

Man, æt. 65, robust, suffering two years; eruption.

Mr. ——, ill for twenty years; affection of bladder.

[48] **Relations.** Antidoted by: *Bellad., Mercur.*

It antidotes effects of Mercury.

Compatible: *Cepa, Hepar, Phosphor., Rhus tox., Sepia, Sulph.*

Complementary: *Mercur., Sepia.*

Compare: *Natr. mur.*

Google

SECALE CORNUTUM.

Ergot; Spurred Rye. *A Fungus.*

The alcoholic tincture is prepared from the fresh ergot, gathered shortly before harvest.

This remedy awaits proving.

Toxocological reports and effects of the rye disease are extensive. See Allen's Encyclopedia, vol. 8, p. 551.

[1] **Mind.** Stupid, half-sleepy state.
Impaired power of thinking.
Delirium: quiet; wandering.
Mania: with inclination to bite; with inclination to drown.
Uncomfortableness and depression.
Fear of death.
Anxiety, sadness, melancholy.
Great anguish; wild with anxiety.
Apathy, indifference.
Constant moaning and fear of death.
Great anxiety and difficult respiration.
Excessive sadness, gradually changes to cheerfulness; talks and acts foolishly; rage, followed by continuous deep sleep.
Paralytic mental diseases; treats his relations contemptuously and sarcastically; wandering talk and hallucinations; apathy and complete disappearance of the senses.
‖Laughs, claps her hands over her head, seems beside herself. θAfter miscarriage.

[2] **Sensorium.** Unconsciousness, with heavy sleep, preceded by tingling in head and limbs.
Diminution and loss of senses, sight, hearing, etc.
All the senses benumbed.
Consciousness seems to continue until the last breath, and just before death it seems as if patient would improve.
Stupefaction; stupor.
Vertigo: constantly increasing; with stupefaction and heaviness of head; reeling, inability to stand erect; peculiar feeling of lightness of head, particularly in occiput; as from intoxication; unsteady gait.
Heaviness of head and tingling in legs.
‖Sensation of intoxication while undressing.

[3] **Inner Head.** Pulsations in head with giddiness, she cannot walk.
Pain and confusion most in occiput.
Congestion to head and chest.
Headache; hemicrania on l. side.

[4] **Outer Head.** Hair falls out.
Twisting of head to and fro.
‖Scalp sore.

Digitized by Google

[5] **Sight and Eyes.** Photophobia.
Dimness of vision; mistiness before eyes. θCataract.
Double or triple vision.
Blue and fiery dots flying before eyes.
Pain in eyes with feeling as if they were spasmodically rotated.
Stitching pain in eyes; pressure on balls.
After an epidemic of the rye disease an unusually large number of cataracts occurred in young people, twenty-three of whom gradually became blind (fifteen men and eight women), associated with headache, vertigo and roaring in ears; of the cataracts two were hard, twelve soft, and nine mixed.
‖Cataracta senilis.
‖Suppuration of cornea: < from warm applications.
‖Retinitis diabetica.
Dilatation of pupils.
Suppressed secretion of tears.
Injection of conjunctiva.
Eyes sunken, surrounded by a blue margin.
Paralysis of upper lids, from coal gas.
Immovable state of eyelids after facial erysipelas.
Eyes look fixed, wild, glazed; staring look.
‖Pustulous conjunctivitis and blepharitis.
‖Exophthalmos with struma.
;Exophthalmic goitre.

[6] **Hearing and Ears.** Undue sensitiveness of hearing, even slightest sound re-echoed in her head and made her shudder.
Confused hearing; deafness. θAfter chorea.
Singing in ears and difficult hearing.
Humming and roaring in ears, with occasional deafness.

[7] **Smell and Nose.** Sneezing.
Nose feels stopped up, yet watery discharge runs from it.
‖Nose stopped up on l. side as with a solid plug.
‖‖Nosebleed: blood dark, runs continuously, with great prostration, small, threadlike pulse; in old people or drunkards; of young women; from debility.

[8] **Upper Face.** Face: pinched, pale, earthy-looking; sunken, hippocratic, ashy; swollen; contracted, discolored, with sunken eyes, blue rings around eyes; risus sardonicus; distorted; wan, anxious.
Tingling in face.
Muscular twitchings usually commence in face and then spread all over body, sometimes increasing to dancing and jumping.
Spasmodic distortion of mouth and lips.
Forehead hot.

Google

[9] **Lower Face.** Lockjaw.
Lips deathly pale or bluish.
[10] **Teeth and Gums.** Looseness of teeth.
Grinding of teeth.
Bleeding from gums.
‖Difficult dentition; great weakness; vomiting of everything taken; great thirst; pale face; eyes dim, sunken; dry heat, with rapid pulse; restlessness and sleeplessness.
[11] **Taste and Tongue.** Tongue: thickly coated with yellowish-white, dry, tenacious substance; discolored, brown or blackish; deathly pale; cold and livid; clean, with dry, red tip; red tip and edges, centre coated.
Slight but unpleasant warmth on tongue, during day.
Spasm of tongue, projecting it from mouth, forcing it between teeth and rendering speech indistinct.
Feeble, stuttering, indistinct speech, as if tongue were paralyzed.
[12] **Inner Mouth.** Bloody or yellowish green foam at mouth.
Increased secretion of saliva; ptyalism.
Much acid fluid in mouth.
Spitting of blood.
Fetid breath.
Speech difficult, slow and weak, with a feeling at every motion as if there were some resistance to be overcome.
Dryness of mouth.
[13] **Throat.** Dryness of soft palate, throat and œsophagus, with thirst.
Burning in throat with violent thirst.
Painful tingling in throat and on tongue.
‖Throat sore on l. side running up into ear.
‖Follicular pharyngitis; hawking up of little follicular exudates.
‖Diphtheria: loss of strength; rapid loss of sensibility; numbness of extremities; painful tingling and crawling on tongue; dry gangrene; apathy; dilated pupils; burning pains of affected parts; stammering speech; absence of all reaction.
‖Severely paralyzed both in swallowing and speaking; could scarcely take food without great danger of choking; speech reduced to a whisper; could not bear heat or covering and would throw all covering off. θPost-diphtheritic paralysis.
[14] **Appetite, Thirst, Desires, Aversions.** Ravenous, insatiable appetite, even when dying from exhausting discharges from bowels.
Hunger as from long fasting.
Disgust for food, especially for meat and fatty things.
Thirst: during all stages of fever; unquenchable; for acids.

Google

Great thirst and dryness of mouth and throat, with burning and tingling of tongue.
Desire for: sour things; lemonade.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations with disagreeable taste; sour, tasteless, but with subjective, disagreeable, empyreumatic odor; empty.
Nausea: inclination to vomit; painful retchings; constant, < after eating.
Excessive nausea and debility, with very little vomiting of a dark brown coffee-grounds fluid.
Vomiting: of food; of bile; of mucus; of green, offensive, watery fluid, painless and without effort, with great weakness; immediately after eating; of lumbrici; of blood; black vomit.
‖Hæmatemesis, patient lies still; great weakness but no pain; abdomen soft.

[17] **Scrobiculum and Stomach.** ‖Tenderness of epigastrium.
Anxiety and pressure in pit of stomach, with great sensitiveness to touch.
‖Severe anxiety and burning at pit of stomach.
Pain in pit of stomach.
Violent pressure in stomach, as from a heavy weight.
Warmth and feeling of repletion.
Burning in stomach.
Painful constriction of epigastrium.
Great distress and oppression of stomach.
‖‖Bilious vomiting, with cramping pains in stomach; burning in stomach extending up œsophagus; head sunk upon breast, face pale, yellowish, voice weak, pulse small. θCardialgia.
‖‖Attacks of severe pressure and constriction in region of stomach extending through to spine, extremely painful and followed in half an hour by vomiting of tasteless fluid or of contents of stomach, thereupon an intermission of several hours occurred; during attack region of stomach felt as if contracted, and on percussion gave a tympanitic note; has three to four attacks daily.
‖Hemorrhage from stomach; lies still with great weakness but no pain; face, lips, tongue and hands deadly pale; skin covered with cold sweat, pulse frequent, threadlike; oppression; abdomen soft, without pain. θHæmatemesis.
‖‖Hæmatemesis; attacks preceded by pains in epigastrium and nausea, pain going to l. side when pressure is made in epigastrium; marked protrusion in l. hypochondrium, with pain; blood red, never containing particles of food, and when collected in a basin appears more like bloody serum than pure blood and is of offensive odor, quantity vomited not very large; frequent chilliness at night,

Google

followed by profuse sweat; strength not much impaired; appetite and sleep good.

[18] **Hypochondria.** Enlargement of liver.

Acute pain in hepatic region.

Inflammation and gangrene of liver; acute pains in hepatic region; tongue thickly coated with a brown tenacious substance, burning in throat, unquenchable thirst; great weakness, but no pain; limbs cold and covered with cold sweat.

Burning in spleen; thrombosis of abdominal vessels.

[19] **Abdomen.** Distension of abdomen; tympanitis; meteorism.

Flatulence with rumbling.

Painful sensitiveness and rumbling, with continued nausea and confusion of head.

Inclination to colic, diarrhœa, and bloatedness of abdomen.

Pain in lower belly, preventing an upright position, even forcing him to lie doubled up in bed.

Colic with convulsions.

‖Pain in abdomen with burning in stomach.

‖Pains in hypogastric region.

Pain in loins as from false labor pains.

Continual bearing down in lower abdomen.

Burning in abdomen.

Cold feeling in abdomen and back.

Srong pulsation in umbilical region.

Lumps and welts in abdomen; in affections of uterus.

‖Aneurism of mesenteric artery, in women.

[20] **Stool and Rectum.** ‖Diarrhœa: very exhausting; pernicious; very offensive; involuntary, profuse, watery, putrid, brown; discharged with great force; very exhausting; urine suppressed; painful with great prostration; painless with tingling and numbness in limbs; putrid, fetid, colliquative, patient does not want to be covered or to be near the heat, but prefers to be in the air or wishes to be fanned; sudden attacks; of children, discharges whitish, watery; chronic in overfed children, great prostration; during August; great stools undigested, or watery, at times yellowish, also greenish, with forcible expulsion, accompanied by dischare of flatus; paralytic weakness of sphincter ani with involuntary discharges.

Stools: yellowish; greenish; brownish; watery and flocculent; colorless, watery; profuse; frequent; putrid; gushing; involuntary; watery, slimy; thin, olive green; offensive, watery; fetid, dark colored; thin, involuntary; watery, yellowish or greenish, discharged rapidly with great force and even involuntarily; painless, without effort and with great weakness.

Google

Before stool: cutting and rumbling in abdomen.
During stool: cutting; great exhaustion; coldness.
After stool: exhaustion.

‖ Five to ten minutes after taking least quantity of food, severe colic which made her bend double and cry out; pain begins between region of stomach and navel, extends thence to sides and rest of abdomen and down to sacral region, accompanied by severe urging and tenesmus, followed by a thin, slimy, yellowish stool with some relief of pain; four to five such attacks follow each other, then relief until she eats again; four to five evacuations during night; she compares pains to labor pains; great thirst; thick mucous coating on tongue; sleep disturbed; prostration. θDiarrhœa.

‖ Uncomfortable fulness of abdomen, with transient pinching pains in upper abdomen as from flatus; at night severe cutting pains throughout whole abdomen; restless anxious tossing about, with short unrefreshing naps; during night anus firmly closed, "as if locked up;" in morning frequent short watery evacuations, in gushes, preceded by cutting pains in abdomen.

‖ Stools yellowish-white, slimy, undigested, escaping involuntarily, < at break of day. θDiarrhœa.

‖ Interminable diarrhœa in Summer, which resists everything, especially in scrofulous children; putrid, fetid and colliquative; choleraic symptoms, with cold, clammy perspiration; sinking spells at 3 A.M. (not the restless anguish of *Arsenicum*).

‖‖ Colliquative diarrhœa.

‖ Cholerine with more retching than vomiting.

‖ Cholera infantum; profuse undigested stools, watery and very offensive, discharged by fits and starts and followed by intense prostration; pale face, sunken eyes, dry heat, quick pulse, restlessness and sleeplessness; great aversion to heat and to being covered. θCholera infantum.

‖ Vertigo, cramps or drawing in calves of legs, rumbling in abdomen, nausea, stools in rapid succession, brownish or colorless, rapid prostration, coldness of limbs, tongue but slightly coated.

‖ Profuse prostrating evacuations, severe painful cramps in feet, toes, hands and fingers which are spread apart or extended toward back of hands; cramping pressure in stomach; dry, wrinkled, cold skin; cyanotic color θCholera.

‖ Cholera infantum; cholera morbus; cholera Asiatica.

‖ Patient cold, almost pulseless, with spasmodic twitching of muscles in various parts of body; spreads fingers asunder; eyes sunken, features pinched; much spas-

Google

modic retching although not much vomiting; skin harsh, shrivelled, dry, as if there were no moisture left in system; urine suppressed; tingling or formication all over body; stools profuse, watery, ejected with great violence; is cold but cannot bear to be covered. θCholera.

‖‖Aversion to heat or being covered, with icy coldness of extremities. θCholera.

‖Diarrhœa after cholera.

‖Cholera Asiatica, with collapse, sunken, distorted face, particularly mouth; crawling sensation as from ants.

Paralysis of rectum; anus wide open.

‖Hemorrhage from bowels.

‖Constipation.

[21] **Urinary Organs.** Retention of urine; urine pale or bloody; discharge of thick black blood from kidneys; obscuration of sight. θScarlatina.

Diabetes; great general lassitude; heaviness of limbs; loss of strength; emaciation; gangrene; skin dry and withered; furuncles; petechiæ; fever, with unquenchable thirst; diminished power of senses; dryness of mouth; morbidly great appetite; cardialgia; costiveness; diarrhœa; watery urine; increased quantity of urine.

‖‖Hæmaturia in a boy suffering from suppuration of glands of neck after scarlet fever; urine also very albuminous; anasarca; great thirst.

‖Passive hemorrhage; blood thin; blood corpuscles wanting in consequence of dissolution; or painless discharge of thick black blood in consequence of kidney disease; coldness of body; cold perspiration on forehead; great weakness. θHæmaturia.

Urine suppressed; on introducing catheter a gill of dark, prune-colored urine passed, which appeared to be full of gritty sediment emitting a very disagreeable odor.

Unsuccessful urging to urinate.

Ischuria paralytica.

‖Paralysis of bladder.

‖Enuresis: of old people; pale, watery or bloody urine.

Urinary deposit looking like white cheese.

‖Bloody, albuminous urine.

‖Discharge of thick black blood from bladder; kidney affections.

[21] **Male Sexual Organs.** After lightness in occiput, violent dragging in spermatic cord causing sensation as if testicle were being drawn up to inguinal ring.

After sexual excess palpitation of heart.

‖Weak memory after exhausting coition; impotence.

Clonic spasmodic stricture of urethra.

Google

[21] **Female Sexual Organs.** Uterus and r. ovary much congested, very sensitive to touch.

‖ Pain in ovaries and uterus.

‖ Pains of an expulsive character in uterus.

‖ Prolonged bearing down and forcing pain in uterus; thin and scrawny subjects.

Burning pains in greatly distended uterus, which felt hard and was painful to touch.

‖ Putrescence of uterus; abdomen distended, not very painful; discharge from vagina, brownish, offensive; ulcers on external genitals discolored and rapidly spreading; burning hot fever, interrupted by shaking chills; small, sometimes intermittent pulse; great anguish, pain in pit of stomach, vomiting decomposed matter; offensive diarrhœa; suppressed secretion of urine; skin covered with petechial and miliary eruptions or shows discolored, inflamed places, with a tendency to mortification; the patient lies either in quiet delirium or grows wild with great anxiety and a constant desire to get out of bed. θMetritis.

‖ Metritis; tendency to putrescence; inflammation caused by suppression of lochia or menses; discharge of thin black blood, a kind of sanies, with tingling in legs and great debility. θMetritis.

‖ Cancer and gangrene of uterus.

‖ Uterine ulcers feel as if burnt, discharge putrid, bloody fluid.

The uterus that had previously been in a normal condition descended so that it almost protruded, was hot and painful; os open as large as middle finger; excessive desire to urinate; labor pains only relieved by wet bandages or pressure upon abdomen; lasted three days, did not miscarry though os remained open during this period; afterward uterus gradually ascended, pains diminished, and after five or six days os contracted; went on to eighth month, when she miscarried.

‖ Uterus about an inch from labia inferiora, membrane around it felt hard, while rest of mucous membrane of vagina was very much relaxed and gathered into a fold at lower part.

‖ Partial prolapsus of uterus for eight months after a forceps delivery; dysuria; sense of weight over pubes as if contents of abdomen would fall forward.

‖ Prolapsus of three months' standing; frequent severe cutting pains in abdomen; occasional nausea.

‖ Dreadful bearing down, dragging out feeling in lower abdomen, so that her life is almost unbearable; every four or five days profuse, thick, yellow discharge from

Google

vagina; hesitation in urinating; rheumatism. θHysteralgia.

Hemorrhage from uterus; apparent death of newborn child.

‖Incessant metrorrhagia.

‖Uterine hemorrhage: when uterus is engorged; with pains in sacrum, extending down thighs and pressing into lower abdomen; after a severe blow upon abdomen of a pregnant woman; profuse protracted flow; tearing, cutting colic, cold extremities and cold sweat, weak, hemorrhage < from slightest motion, blood thin and black, black lumpy or brown fluid, of disgusting smell; black liquid blood.

‖A woman, æt. 45, passed through a normal confinement seven years ago; miscarried about two years ago, hemorrhage kept on for five months under allopathic treatment, with exacerbation during time of menstruation; after ceasing for seven months, hemorrhage set in again with slight intermissions of one or two weeks; excessive anæmia; sunken features; skin cold and dry; pulse small and quick; heavily coated tongue; loss of appetite; headache; since five days, daily ten or twelve painless stools, of mucous, watery, sometimes foul-smelling masses; thin, black, foul-smelling bloody discharges.

‖Feeble and extremely emaciated, skin flaccid, face very pale and sunken, with an expression of suffering, mucous membranes pale and cool, hands and feet deficient of natural warmth, action of heart quickened, breathing short and oppressed, pulse very small, 120; abdomen distended; os uteri very open, with indented and puffy edges, flaccid and soft, vagina tender and cool; manual examination caused much uneasiness and flooding; violent headache limited to one spot, throbbing in temples, roaring in ears, giddiness on slightest movement; enfeebled nervous system showed extraordinary excitability; many times in day, and especially at night, cramps in calves and spasmodic twitchings of limbs, causing exhaustion, remains several hours in bed as if paralyzed; digestion and sleep disturbed to some extent; hemorrhage still continued, even in horizontal position, and elevation of pelvis caused no diminution in large quantity of blackened coagula which were constantly passing, whilst least movement increased discharge in a very great degree. θChronic passive hemorrhage.

‖Uterine hemorrhage, flow passive, dark and may be offensive; tingling or formication all over body, holds her fingers spread asunder, asks to have her limbs rubbed; finally lies unconscious and cold.

Google

||Metrorrhagia; relaxed condition of body; depressed, anxious state of mind; unusual drowsiness by day; gush of thin black blood on least movement of body; general feeling of prostration; diminished temperature of body; wooden, numb feeling in lower extremities.

Uterine hemorrhage; did not wish to be covered, desired windows to be open, though room was very cold and surface of body like a corpse.

|Painless flooding in feeble, cachectic, dyscratic women, or such as have long resided in tropical climates.

||Since last delivery menses too seldom and very irregular, last time rather copious in consequence of unusual exertion; at night dreamed she was ascending the stairs with a heavy load, and suddenly a clot of blood came away and the blood seemed to gush forth; the alarm awakened her and she found that she was bleeding fast; on following morning strength greatly reduced; lips and whole body, even tongue, deathly pale; pulse could not be distinguished; frequent fainting fits; periodic pains with expulsion of clots of blood and between these attacks constant oozing of thin bright blood. θMenorrhagia.

||An excessive menstrual flow every two weeks, lasting seven to nine days; for last four weeks flow is continuous; very weak and thin; has severe pains in loins and uterine region; bearing down pains as if in labor.

|Menses: too profuse and lasting too long; with tearing and cutting colic, cold extremities, cold sweat, great weakness and small pulse; or with violent spasms.

|Menstrual blood: thin and black; black, lumpy or brown fluid and of disgusting smell.

||Menstrual colic; pains so severe as to frequently cause spasms; uterine region very sensitive to touch; high fever; pains > when flow appears.

||Menstrual colic; pale face; coldness of limbs; cold sweat; small, suppressed pulse; tearing, cutting pains in abdomen.

||Menses irregular; every four weeks for three to four days, copious dark-red fluid discharge of blood, with pressing, laborlike pains in abdomen; constipation; pressure in occiput; afterward continuous discharge of watery blood, until next period.

Suppression of menses with pain.

||Gangrene of whole vaginal mucous membrane; on holding apart the labiæ this membrane was found of a dark slate color, emitting the characteristic odor.

Vagina hot or cool.

|Discharge from vagina almost black, fluid and very fetid.

▮Leucorrhœa: in thin, scrawny women, with prolapsus uteri; green, brown, offensive; like cream, from weakness and venous congestion.

Ulcers on outer genitals, discolored and rapidly spreading.

"**Pregnancy. Parturition. Lactation.** Arrested development of fœtus.

Discharge of blood during pregnancy.

▮Threatened abortion: more especially at third month; with copious flow of black, liquid blood; false labor pains, with bloody discharge; in feeble, cachectic women, having a wan, anxious countenance, pulse almost extinct, fear of death; convulsive movements.

▮▮Extremely violent pains, almost without intermission, she seemed to be in the last stage of labor, but on examination os was found about the size of half a dollar, thick and somewhat rigid.

▮▮Extremely violent pressing labor pains, os, however, being only about as large as a ten cent piece; hysterical convulsions.

▮▮When advanced about seven and a half months in pregnancy was taken with labor pains, wriggling and not distinctly intermitting; os tincæ open, and about size of a shilling; dulness and slight aching of head; despondent.

▮▮Prone to abortion in third month; had passed through five although she kept her bed as soon as pregnant; some labor pains with bloody discharge; was able to attend to her household duties and went to full term.

▮▮After lifting a heavy weight during sixth month of pregnancy severe pains in stomach, abdomen and small of back and a pushing-down sensation; violent movements of fœtus; cold feet; numbness and tingling in feet; small, weak pulse.

▮After abortus: difficult contraction of uterus; thin, black, foul-smelling discharge.

▮Retained placenta, after miscarriage, especially when occurring during early months of pregnancy; offensive discharges; patient cold and often almost pulseless from loss of blood; uterine contractions very imperfect, or else prolonged tonic contraction.

▮▮During eighth month of pregnancy violent convulsions with frothing at mouth, etc., followed by variable spasms; insensibility and clonic spasms, < at every pain; on return of consciousness complained of dull frontal and occipital headache and incessant uterine pains. θPremature labor.

▮▮During pregnancy: frequent and prolonged forcing pains, particularly in thin, ill-conditioned women; cramps in calves.

Google

Uterine pains prolonged but ineffectual.

A sensation of constant tonic pressure in uterine region; causes great distress; desires fresh air; does not like to be covered.

Hour-glass contraction.

During labor: prolonged bearing-down and forcing pains in uterus; pains irregular; pains too weak; pains feeble, or ceasing; everything seems loose and open, no action; fainting fits.

Strength of uterus weakened by too early or perverted efforts.

Thin, scrawny women, skin shrivelled, dry and harsh, sallow face, weak in labor; pains seem to be entirely wanting; uterus flabby; bearing down in sacral region, a sort of prolonged urging feeling in abdomen.

While the head was passing into lower strait, she was suddenly seized with violent convulsions lasting about three to four minutes, followed by a stupid state with stertorous breathing and uneasy moaning as if from pain.

Labor ceases, and twitchings or convulsions begin.

Puerperal convulsions with opisthotonos.

Retained placenta, with constant, strong bearing down in abdomen, or with relaxed feeling of parts.

After labor, pale, weak; uterus distended, burning pains therein, hard, painful to least touch; discharge of black, coagulated or brown, watery, offensive-smelling blood; throbbing, tearing pains in thighs extending down to toes; pain < from motion; strong pulsations in umbilical region, which could be felt by the hand; pulse at wrist weak and rapid; frequent yawning.

Post-partum hemorrhage, with relaxation of uterus, only temporarily relieved by compression; after-pains excessive, < when child nursed.

After-pains: too long and too painful.

Violent after-pains with hemorrhage arising from irregular contractions; the longitudinal fibres alone contracting in such a manner as to leave a sulcus in middle, making it appear as if uterus were split open from top to bottom.

Cessation of lochia, with fever; inflammation of uterus, subsequently an abscess opened through vagina.

Lochia: dark, very offensive; scanty or profuse; painless or accompanied by prolonged bearing-down pain; suppressed, followed by metritis; suddenly change character and become of a dirty brown or chocolate color, with fetid odor, grows sad and melancholy and fears death; of too long duration.

Google

‖Fever with frequent watery stools. θPuerperal fever.
‖Strong tendency to putrescence; discharge of sanious blood, with tingling in legs and great prostration; urine suppressed; offensive diarrhœa; voice hollow with difficult breathing, feeble and inaudible; burning fever interrupted by shaking chills, does not care to be covered; cold limbs; cold sweat over whole body; gangrene. θPuerperal fever.
‖Suppression of milk; the milk will not flow from the breast.
‖Lack of milk with much stinging in mammæ.
‖In women who are much exhausted from venous hemorrhage; thin, scrawny women; the breasts do not properly fill with milk.
Thin, scrawny children with shrivelled skin; spasmodic twitchings, sudden cries, feverishness. θCyanosis.
Pendulous abdomen.

Voice and Larynx. Trachea and Bronchia. ‖Voice: hollow, hoarse, with difficult breathing; feeble and inaudible; weak, unintelligible, stammering.
Thickening of mucous membrane of air passages.

Respiration. Respiration: slow; labored and anxious; oppressed; moaning; constant sighing; hiccough.
Blood is sometimes expectorated during violent efforts to breathe.

Cough. Hard, hoarse cough, with but little expectoration.
‖Concussive cough; profuse perspiration; sleepless nights; inclination to colic; diarrhœa; bloatedness of abdomen; emphysema. θBronchitis.
‖Spitting of blood, with or without cough.

Inner Chest and Lungs. Cramp in chest.
Pains over nearly whole front part of chest, < from coughing and motion.
‖Expectoration of dark, frothy, rather viscid blood, brought up by a slight cough and amounting to a teacupful in four hours; a spot as large as a crown piece on r. side of chest to r. of nipple, dull on percussion, with bronchial respiration and mucous râle over that part.

Heart, Pulse and Circulation. ‖Palpitation; hot forehead; inclination to sleep; spasmodic shocks from r. half of chest into r. arm and leg; in paroxysms every two or three hours; oftener in night, after each meal; less in open air; coldness and numbness of r. hand, with tingling in fourth and fifth fingers; loss of muscular power and feeling in hand; after sexual excess.
‖Palpitation of heart: with contracted and frequently intermitting pulse.

Google

‖Pulse: often unchanged even during violent attacks; generally slow and contracted, at times intermittent or suppressed; somewhat accelerated during heat, small; empty, weak; threadlike, in hemorrhages.

[31] **Neck and Back.** Tumors on neck discharging yellow pus.

Gentle, creeping sensation in back, as if a soft air were blowing through it.

Tingling in back, extending to fingers and toes.

Pain in small of back.

Stitch in back.

‖Sudden "catch" or "kink" in back. θLumbago.

Pains in sacrum with bearing down as if parts would be forced out, < when moving.

‖Hard, hoarse cough, with but little expectoration; pains nearly all over front part of chest, < from coughing and motion; for several years tenderness of lower cervical and upper dorsal spinous processes, with stiffness of neck; < from every exertion or strain upon spine; pressure upon diseased portion of spine produces pain there, as well as all through chest, with irritation to cough. θSpinal irritation.

‖Stitches in upper dorsal vertebræ (between shoulders), constant when sitting, intermittent when standing, at times extending into hands, < by pressure upon vertebræ; frequent formication through all limbs; at times rigidity and spasmodic stretching of fingers so that for several minutes he cannot sew; frequent pressure and swelling beneath epigastrium; pain in back < when sewing.

Violent pain in back, especially in sacral region; anæsthesia and paralysis of limbs, convulsive jerks and shocks in paralyzed limbs; painful contraction of flexor muscles; paralysis of bladder and rectum. θMyelitis.

‖Myelitis diffusa.

Paraplegia preceded by cramps and muscular pains.

Difficult, staggering gait; complete inability to walk, not for want of power but on account of a peculiar unfitness to perform light movements with limbs and hands; contractions of lower limbs on account of which patient staggers; trembling of limbs, sometimes attended with pains; formication of hands and feet; excessive sensation of heat, with aversion to heat or being covered. θTabes dorsalis.

Spine disease with gressus vaccinus.

[33] **Upper Limbs.** Arms fall asleep.

Rough rash all over arm.

Spasmodic jerks of hand, with flexion of hand at wrist or of forearm.

Google

‖Numbness and insensibility of hands and arms. #Spinal affection.
Burning in hands.
Hands deathly pale.
Coldness and numbness of r. hand, with tingling of ring and little fingers.
Loss of feeling in backs of fingers.
Loss of muscular power and of feeling in hand.
Fingers convulsively drawn in toward palm, clasping thumb.
‖Contraction of fingers.
Fingers bent backward or spasmodically abducted.
‖Left thumb spasmodically drawn toward dorsum of hand, followed in a few minutes by cramping and flexure of rest of fingers toward palmar surface; hands feel numb, like velvet; next day both hands became affected and after several days felt a tingling and stitches in legs, followed by heaviness of same, > after walking, generally appearing while sitting, while cramps in hands always appear after using them.
Loss of sensation in tips of fingers.
Numbness of tips of fingers.
Crawling in tips of fingers as if something alive were creeping under skin or as if fingers were asleep, as from pressure upon arm.
Peculiar prickling feeling in tips of fingers; they are sensitive to cold.
Painful swelling of fingers.
Violent pains in finger tips.
‖Gangrene of fingers; senile gangrene.

Lower Limbs. Hammering, tearing pain in both thighs increased by motion.
Legs heavy and tired.
Tingling in legs.
Creeping feeling in anterior femoral and posterior tibial regions.
Shuffling gait as if feet were dragged along.
Rheumatic pains of joints.
‖Cramps in calves of legs and soles of feet, disturbing sleep at night and hindering walking in pregnant women.
‖After an attack of cholera cramps in calves and sensation of numbness and formication in toes.
‖‖Cramp in calves.
‖Burning in feet.
‖The feet seem asleep and stiff.
‖Toes of r. foot spasmodically drawn upward, continuously during day and occasionally at night, causing a peculiar limping gait; this cramp was accompanied by

Google

no pain, but by a very tiresome sensation rendering walking, particularly going up and down stairs, very difficult; tendons running along dorsum of foot to toes were tense as wires and the corresponding muscles of leg larger and harder than normal; now and then slight sensation of coldness in back and also a peculiar buzzing (formication) in spine.

Swelling of feet with black spots.

‖Beginning senile gangrene; swelling and livid coloring of r. foot extending to malleoli; foot cold; severe indescribable pains.

‖Senile gangrene commenced in great toe of r. foot and slowly extended; foot was livid and swollen; all the symptoms pointed to its complete loss.

‖Dry gangrene of foot with constant severe, burning tearing pains.

Severe pains in sole of foot and toes; black spot on plantar surface of heel; toes livid, blue, cold; burning pains; foot swollen; walking impossible. θSenile gangrene.

‖Profuse, stinking and corrosive perspiration of feet, softening and bleaching soles and destroying quickly stockings and shoes; existing two months in a girl eighteen years old.

Tingling in toes.

‖‖Gangrene of toes.

31 **Limbs in General.** Lassitude, weakness, heaviness, trembling of limbs.

Limbs cold, covered with cold sweat.

Formication; prickling; tingling; numbness; insensibility of limbs.

Spasmodic pains; drawing and crawling in limbs.

Burning in hands and feet.

‖Fuzzy feeling in limbs.

‖Cramps in hands and toes.

Painful jerkings in limbs at night.

Most violent convulsive movements of limbs occur several times a day; during intervals fingers are numb and often contracted.

Sudden periodic contractions of limbs, with tensive pain.

Contractions of hands, feet, fingers and toes.

Gangrene of limbs, limbs suddenly became cold, leaden-colored and lost all sensation.

‖Paraplegia.

Internal pain greatly < by heat, whether of bed or atmosphere; somewhat > when exposed to a cooler atmosphere, though even then it was scarcely tolerable; the pain extended by degrees from toes to legs and thighs, and from fingers to arms and shoulders, gangrene supervened.

Digitized by Google

Not the slightest pain in gangrenous limb when pricked or cut, though frequently motion is not entirely lost.
Absolute insensibility of tips of fingers and toes.
‖‖Cold gangrene of limbs.
‖True anthrax, rapidly changing into gangrene.
Hands and feet swollen with a gangrenous black and suppurating eruption.
Pain with some swelling without inflammation, followed by coldness, blue color, cold gangrene and death of limb.
The limbs become cold, pale and wrinkled as if they had been a long time in hot water.

[35] **Rest. Position. Motion.** Must lie doubled up in bed: pain in belly.
Sitting: stitches in vertebræ, constant; cannot bend forward or backward without losing his equilibrium.
Holds hands with fingers spread widely apart.
Standing: stitches in vertebræ intermittent.
Inability to stand erect: vertigo.
Every exertion: tenderness of cervical process <.
Motion: hemorrhage <; giddiness; after labor, pains <; pains over chest <; pains in sacrum <; tearing in thighs <.
Walking: heaviness of legs >; impossible from gangrene.
Every attempt to walk knees sink from under him.
Cannot walk: giddiness.

[36] **Nerves.** ‖Hyperæsthesia of cutaneous nerves, especially of spine.
‖‖Sensation of soreness in abdomen; formation of large lumps and swellings in abdomen; r. hand very weak, particularly fingers, so that she could hold nothing, nor sew with that hand; when placing open hand to side and taking it away a spasm of hand occurs, the fingers are spread apart and she cannot close the hand; rapid alternations of heat and cold in hands and feet; cramps in legs; icy coldness of knees; trembling of r. arm and hand while eating, must use the left; sensation of coldness in stomach, > for a short time by warm drinks; habitual constipation. θHysteria.
‖‖Burning: in all parts of body as if sparks of fire were falling on them.
‖Neuralgia, caused by pressure of distended veins upon a nerve trunk.
Spasmodic twitchings.
Irregular movements of whole body.
Spasmodic distortion of limbs, relieved by stretching them out.
‖‖Expression of countenance varied every moment from a constant play of the muscles; eyes rolled about, pupils

Google

dilated, tongue jerked out, head moved about from side to side; arms in constant action with most diverse movements; snatched objects rather than took hold of them, could hold nothing securely; trunk also in constant motion; urine could not be retained; pulse small, weak, quick; heart beat tumultuously; appetite poor; bowels torpid; aching in occiput; sensation of formication in extremities; memory impaired; speech difficult, hurried; no relief at night; staggered about the house almost all night. θChorea.

Chorea associated with menstrual irregularities.

The muscular twitchings usually commence in face and spread thence all over body, sometimes increase to dancing and jumping. θChorea.

Spasms, with fingers spread apart.

Convulsive jerks and starts in paralyzed limbs.

Painful contractions in flexor muscles.

Tetanic spasms, with full consciousness, followed by great exhaustion.

Convulsions.

Tonic spasms.

Epileptiform spasms; epilepsy.

Complains of great weakness, constipation, heaviness in epigastrium, formication in legs and cramps; at night while asleep gets epileptiform attacks of which she knows nothing next morning except that she feels greatly prostrated and has a constant heaviness in head.

After abortus, spasms with full consciousness, afterward great exhaustion; heaviness in head and tingling in legs.

Convulsions first occurring after a fright when a little girl, returned after each confinement.

Twitching of single muscles; twisting of head to and fro; contortions of hands and feet; labored and anxious respiration. θSpasms.

Numbness of extremities; paralysis of some parts; painful tingling (like crawling of ants) on tongue. θPost-diphtheritic paralysis.

Paralysis after spasm, and apoplexy, with rapid emaciation of affected parts and involuntary discharges from bowels and bladder.

Suddenly fell to ground, but without loss of consciousness; on every attempt to walk the knees would sink from under him, especially r.; while sitting cannot bend forward or backward without losing his equilibrium; arms slightly weak, sensation of touch not affected; general dulness; difficult speech; inclination to weep; complains of headache and pain in lumbar region; sleep

Digitized by Google

poor; urine and feces escape involuntarily; no stool for several days; at times oppression of breathing. θParalysis.

‖Paralysis of lower extremities, in a woman past climacteric; a hard, sensitive tumor in one of her breasts had been developing for several years, but for the last year or two had rapidly increased in size and become very painful; by continued application for several months of a yellowish salve the tumor was enucleated; in about a month after ceasing to use the salve a peculiar torpor or deadness was felt in great toes, which extended to whole foot and ankle joint; feet seemed large and heavy and could be moved only by moving whole limb; gait shuffling as if feet were dragged along by lifting legs; slight numbness in hands.

‖Paralysis, with rapid emaciation, with relaxation of sphincters.

Myelitis and softening of cord.

Trembling; unsteadiness of whole body.

‖‖Restlessness; extreme debility and prostration.

Loss of power of voluntary motion.

‖Sinking spells from diarrhœa, at 3 A.M.

‖‖Collapse from choleroid diseases, etc., with cold skin, yet unable to bear warmth.

[57] **Sleep.** Frequent yawning.

Inclination to sleep; drowsiness; deep, heavy sleep, stupor.

Sleep at night disturbed by frightful dreams.

Restless and sleepless.

[58] **Time.** At 3 A.M.: sinking spells.

At break of day: diarrhœa.

In morning: frequent short evacuations.

During day: warmth on tongue; unusual drowsiness; toes drawn up continuously.

During night: anus firmly closed; cramps in calves and twitchings of limbs; dreamed she was ascending stairs; palpitation; toes drawn up occasionally.

Jerkings in limbs; staggered about house with chorea; ulcers <.

[59] **Temperature and Weather.** Open air: palpitation less.

Wants to be in air or be fanned: with diarrhœa.

Warm applications: suppuration of cornea <; ulcers <.

Warm drinks: coldness of stomach <.

Does not wish to be covered; diarrhœa; uterine hemorrhage.

Heat: could not bear it and would throw off all covering, in post-diphtheritic paralysis; with diarrhœa, did not wish to be near; aversion to, with cholera; internal pain much <; gangrene <.

Google

Wet bandages: > labor pains.
Cold: ulcers >; gangrene >.

[40] **Fever.** Disagreeable sensation of coldness in back, abdomen and limbs.
Skin cold, with shivering.
Coldness of surface of body, particularly extremities.
‖Violent chill of but short duration; followed soon after by internal burning heat, with great thirst.
‖Chill with thirst.
‖Violent shaking followed by violent heat, with anxiety, delirium and almost unquenchable thirst.
‖‖Intense, icy coldness of skin, with shivering; pale, sunken face.
‖Cold limbs, cold sweats, great weakness.
Cold stage preceded by vomiting, succeeded by moderate sweating.
‖Severe and long-lasting dry heat, with great restlessness and violent thirst.
‖Heat with thirst and hot skin.
‖Burning heat, interrupted by shaking chills, then internal burning heat, with great thirst.
‖Sweat: all over body, except face; profuse cold, cold limbs; from head to pit of stomach; especially on upper body; cold, clammy over whole body; colliquative.
‖Exhausting perspiration, accompanied by evening fever and alarming cough.
‖Cold surface; sunken pale face and blue lips; will not be covered; tingling in limbs; holds hands with fingers widely spread apart; cold, clammy sweat; speech feeble, stuttering. θAgue.
‖‖Aversion to heat or to being covered; may feel cold but does not wish to be covered.
‖Great tendency to typhoid. θIntermittent.

[41] **Attacks, Periodicity.** Sudden attacks: diarrhœa.
Alternation: of heat and cold, in hands and feet.
Five to ten minutes after taking least quantityof foo d severe colic.
Every two or three hours: paroxysms of palpitation.
Several times a day: convulsive movements of limbs.
For several weeks: formication in tips of fingers.
Every two weeks: excessive menstrual flow; lasting seven to nine days.
For two weeks: profuse corrosive foot sweat.
For four weeks: flow is continuous.
During August: diarrhœa.
In Summer: interminable diarrhœa.
For several years: tenderness of cervical processes.

[42] **Locality and Direction.** Right: ovary congested; a spot

Google

on side of chest dull on percussion; spasmodic shocks from half of chest into arm and leg; coldness of hand; toes drawn up; swelling and livid coloring of foot; gangrene in great toe of foot; hand very weak; trembling of hand and arm.

Left: hemicrania; nose stopped up; throat sore; protrusion in hypochondrium; thumb spasmodically drawn toward dorsum of hand.

[43] **Sensations.** As if intoxicated while undressing; as if eyes were spasmodically rotated; as of a solid plug in nose; as if tongue were paralyzed; as if there were some resistance to overcome in speech; as of a heavy weight in stomach; region of stomach as if contracted; anus as if locked up; as if testicles were being drawn up to inguinal ring; uterus as if burnt; as if contents of uterus would fall forward; as if soft air were creeping through back; as if sacrum would be forced out; as if something alive were creeping under skin; as if fingers were asleep; as if limbs had been a long time in hot water; as if sparks of fire were falling upon different parts of body; in lumbar region; as if mice were creeping under skin.

Pain: in occiput; in eyes; in pit of stomach; in epigastrium; in lower belly; in abdomen; in hypogastric region; in loins; in ovaries and uterus; in sacrum, down thighs and into lower abdomen; over front part of chest; in small of back; in sacrum.

Excruciating pains: in spine.

Violent pain: in back; in finger tips.

Acute pain: in hepatic region.

Severe pains: in stomach; in abdomen and small of back; in sole of foot and toes.

Cutting: in abdomen.

Tearing pains: in both thighs; in foot.

Throbbing, tearing pains: in thighs.

Tearing, stinging pains: in extremities.

Pinching pains: in abdomen.

Forcing pain: in uterus.

Stitches: in upper dorsal vertebræ.

Stitching pains: in eyes; in legs.

Stitch: in back.

Sudden catch: in back.

Throbbing: in temples.

Cramps: in calves of legs; in feet, toes, hands and fingers; in chest.

Cramping pains: in stomach.

Cramping pressure: in stomach.

Rheumatic pains: in joints.

Tensive pain: in limbs.

Digitized by Google

Drawing pains: in calves of legs.
Drawing: in limbs.
Dragging: violent in spermatic cord; in abdomen.
Stinging: on mammæ.
Burning: in throat; of tongue; at pit of stomach; in spleen; in abdomen; in uterus; in hands; in feet.
Soreness: of throat; in abdomen.
Tenderness: of epigastrium; of lower cervical and upper dorsal spinous processes.
Distress: of stomach.
Painful constriction: of epigastrium.
Painful jerkings: in limbs.
Jerking: under skin.
Pulsations: in head.
Pressure: on eyeballs; in pit of stomach; in occiput; in uterine region.
Heaviness: of head; in epigastrium.
Lightness: of head.
Peculiar prickling feeling: in tips of fingers.
Tingling: in face; in throat and tongue; of legs; on tongue; in limbs; all over body; in fourth and fifth fingers; in back; in toes.
Crawling: on tongue; in tips of fingers; in limbs; all over body; between skin and flesh; in upper lip; all about mouth.
Formication: in face; in gums; in extremities; in tips of fingers; over whole body.
Gentle creeping sensation: in back.
Fuzzy feeling: in limbs.
Dryness: of soft palate, throat and œsophagus; of mouth.
Numbness: in limbs; of feet; of r. hand; of tips of fingers.
Cold feeling: in abdomen and back; in limbs; of body; of r. hand; in stomach.

Tissues. It destroys the activity of the cord; convulsive twitchings and shocks, painful contractions, tetanic manifestations; perfect paralysis, with increased reflex activity; most excruciating spinal pains, especially in sacral region; paralysis of bladder and rectum; tendency to gangrene; rapid emaciation.
Dissolution of blood corpuscles; blood thin; passive hemorrhages.
Anæmic state, either from exhaustive diseases or artificial depletion; the blood is thin and does not coagulate.
Thrombosis of abdominal vessels.
Neuralgia caused by pressure on nerves by a distended vein.
Tumefaction of glands.
Lymphatic tumors.

Google

‖‖Collapse from choleroid diseases.
‖Rapid emaciation of paralyzed parts.
Malignant pustule.
Emphysematous swellings.
Passive hemorrhage; blood dark and red, in feeble and cachectic persons, accompanied by tingling in limbs and prostration; desire for air; does not like to be covered; wishes to have limbs extended; skin cold.
Rheumatism (peliosis rheumatica of Schoenlein) generally is found in cachectic individuals, with purpura; affects joints, especially of lower extremities; thrombosis of abdominal vessels.
‖Ulcers: bleeding; becoming black; feeling as if burnt; painless; pricking, producing a prurient sensation; pus putrid; < at night, touch, from external warmth; > from cold.
‖‖Gangrene: from anæmia; external injuries, application of leeches or mustard; > from cold, < from heat; dry, of old people.
‖Dry gangrene of extremities, parts are dry, cold, hard and insensible, of a uniform black color and free from fetor; large ecchymoses, blood blisters on extremities, becoming gangrenous, black suppurating blisters; limbs become pale, cold, shrivelled or lead-colored, losing all sensibility.

Touch. Passive Motion. Injuries. Touch: pit of stomach very sensitive to; r. ovary sensitive to; uterus painful; ulcers <.
Pressure: upon abdomen > labor pains; upon vertebræ stitches <.
After lifting heavy weight: during sixth month of pregnancy; severe pain in stomach, abdomen and small of back.
External injuries: gangrene.

Skin. Skin dry and cool.
Cold and dry; dingy, wrinkled, dry and insensible; desquamation.
‖‖Formication: with a sense as if mice were creeping under skin; on face, gums and other parts of body; in extremities with tearing, stinging pains; in tips of fingers, lasting several weeks, with a partial loss of sensibility; over whole body.
‖Crawling: all over body; between skin and flesh; and jerking under skin.
Violent crawling and prickling over whole body, especially in upper lip and at times all about the mouth.
‖Bloody blisters on extremities, becoming gangrenous.
‖‖Boils, small, painful, with green contents, mature very slowly and heal in same manner; very debilitating.

Digitized by Google

Carbuncles; extensive ecchymoses.
Petechia and miliary eruptions.
Purpura hemorrhagica.
Cachectic females, with rough skin: pustules showing a tendency to gangrene.
Varicose ulcers and enlarged veins in old people.
Ulcers turn black, copious vomiting of a mixture of a thick, black, pitchy, bilious or shiny matter.
Indolent ulcer, ichorous, offensive pus, > from cold.
General desquamation in scarlatina.
Variola pustules of abnormal appearance, either fill with a bloody serum or dry up too soon.

Stages of Life, Constitution. Irritable plethoric subjects.
Nervous temperament.
Women of very lax muscular fibre.
Feeble, cachectic women; thin, scrawny.
Very old, decrepit persons.
Women of very lax muscular fibre; passive hemorrhages, copious flow of thin, black, watery blood; the corpuscles are destroyed.
Hemorrhagic diathesis; the slightest wound causes bleeding for weeks (*Phos.*); discharge of sanious liquid blood, with a strong tendency to putrescence; tingling in limbs and great debility, when weakness is not caused by previous loss of fluids.
Strumous child, æt. 18 months, suffering three weeks; diarrhœa.
Boy, æt. 5, suffering from suppuration of glands of neck after an attack of scarlet fever; hæmaturia.
Girl, æt. 10, suffering four years; hæmatemesis.
Boy, æt. 13; amaurosis.
Boy, æt. 17, slim, pale and thin, father a weaver; chorea.
Mrs. P., æt. 18, sanguine temperament, healthy, well-developed muscular system, primipara; dystocia.
Man, æt. 18, shoemaker's apprentice, weak, pale face, light hair, flabby muscles, fat cheeks; cramps in fingers.
Girl, æt. 18; offensive foot sweat.
Woman, æt. 20, gentle disposition, lymphatic temperament, gave birth to a child several weeks ago; hæmatemesis.
Man, æt. 20, tailor's apprentice, strong, well nourished; cramps in fingers.
Girl, æt. 22, sanguine temperament, robust; menstrual colic.
Mrs. A., æt. 25; hysteralgia.
Woman, æt. 28; menstrual colic.
Woman, æt. 28, lymphatic-sanguine temperament, pale, leuco-phlegmatic, has had three children and been previously healthy; menorrhagia following an abortion.

Google

Man, æt. 30, strong, well nourished, short neck, addicted to drink; epistaxis, r. side.
Woman, æt. 30; prolapsus of uterus.
Woman, æt. 32, blonde, weak, after labor; uterine hemorrhage.
Woman, æt. 32, well built, married, no children; metrorrhagia.
Man, æt. 32, married; spinal affection.
Mrs. W., æt. 35, mother of three children, very weak and thin; menorrhagia.
Woman, æt. 35, mother of three children; metrorrhagia.
Man, æt. 40, choleric temperament; dark complexion; diarrhœa.
Woman, æt. 40, mother of seven children, weak, cachectic-looking, suffering from prolapsus uteri; hysteria.
Woman, æt. 41, large frame, feeble and emaciated, suffering since her return from the tropics; metrorrhagia.
Woman, æt. 41, had metritis after a forced labor, followed by leucorrhœa, latter cured by *Stannum*; epilepsy.
Architect, æt. 42, robust constitution; spinal affection.
Woman, æt. 45; uterine hemorrhage.
Woman, æt. 45, weak, formerly suffering from hemorrhoids; menorrhagia.
Forester, æt. 50, strong, suffering three months; paralysis.
Man, æt. 53, nervo-bilious temperament, suffering many years with gastric disorder; gastralgia.
Woman, æt. 62, suffering four days; epistaxis.
Woman, æt. 70, gouty; diarrhœa.
Woman, æt. 80; senile gangrene.
Woman, æt. 82; senile gangrene.
Girl, sanguine temperament, healthy but delicate, menses normal, suffering several weeks; cardialgia.
Mrs. E., dark complexion, sickly yellow countenance, nervo-lymphatic temperament; dystocia.
Mrs. ——, nervo-bilious temperament, dark complexion, short, thick-set, has had four children; dystocia.
Woman, just past climacteric, had tumor in breast which was enucleated by applications of a salve, since then suffering; paralysis of legs.

[48] **Relations.** Compatible: *Cinchon.*
Compare: *Colchic.* (cholera morbus); *Arsen.*, but cold and heat act opposite; *Cinnam.* (hemorrhage after labor); *Plumbum* (diabetes).

SELENIUM.

Selenium. *The Element.*

The trituration is prepared from the reddish-brown, somewhat translucent metal which resembles sulphur in its chemical relations.

Introduced and proved by Hering, Archiv für Hom., vol. 12, p. 192; proving by Schreter, N. Archiv für Hom., vol. 3, p. 184; Berridge, N. Am. Jour. of Hom., 1873, p. 501.

CLINICAL AUTHORITIES.—*Headache*, Ballard, M. I., vol. 6, p. 182; *Spermatorrhœa*, Greenleaf, A. H. O., vol. 10, p. 258; *Prostatitis and ataxy of sexual organs*, Altschul, Rück. Kl. Erf., vol. 5, p. 586; *Gleet*, Nash, Hom. Phys., vol. 7, p. 289.

[1] **Mind.** Great dulness, with complete insensibility and indifference to his surroundings.
Very forgetful, especially in business; during slumber, however, he remembers all he had forgotten.
A kind of stammering; he uses syllables of words in wrong connections, therefore pronounces some words incorrectly.
Difficult comprehension.
Total unfitness for any kind of work.
Great talkativeness when excited, especially in evening.
‖Mental labor fatigues him.
‖Lascivious thoughts with impotency.
Dread of society.

[2] **Sensorium.** Vertigo: on lifting head or rising up; on moving about, with nausea, vomiting, faintness; < after breakfast and dinner.

[3] **Inner Head.** Violent stinging over l. eye, when walking in sun or from strong odors; with increased secretion of urine, and melancholy.
Headache every afternoon, especially after drinking wine, tea or lemonade.
‖Violent headache commenced in forehead and gradually involved whole head; heavily coated tongue; nausea; frequent vomiting of bilious-looking matter; her usual cup of tea was followed by an aggravation of all the symptoms.
‖Headache of drunkards; headache after debauchery.

[4] **Outer Head.** ‖Hair comes out when combing; also from eyebrows, whiskers and genitals.

‖Tingling itching on scalp in evening, oozing after scratching.
Tension and sensation of contraction of scalp.

[5] **Sight and Eyes.** Itching vesicles on edges of eyelids and on eyebrows.
Spasmodic twitching of l. eyeball.

[6] **Hearing and Ears.** Ear stopped; hardening of earwax in his deaf ear.

[7] **Smell and Nose.** Itching in nose and on edges of nostrils.
Inclination to bore fingers into nose.
Yellow, thick, jellylike mucus in nose.
Discharge of dark blood from nose.
Phlegm in choanæ.
Coryza, ending in diarrhœa.
‖Complete obstruction of nose, chronic.

[8] **Upper Face.** Twitching of muscles of face.
Great emaciation of face and hands.
Oiliness of skin on face; greasy and shining.

[10] **Teeth and Gums.** Picks teeth until they bleed; toothache.
Teeth covered with mucus.
‖Toothache from drinking tea.

[11] **Taste and Tongue.** A kind of stammering speech, made mistakes in talking, uttered syllables wrongly, and could not articulate some words.

[14] **Appetite, Thirst. Desires, Aversions.** Want of appetite in morning, white-coated tongue.
Aversion to food much salted.
‖Great longing for ardent spirits; an almost maniacal irresistible desire, has to get completely drunk and feels distressed afterward; wants to go to an insane asylum. *θ*Chronic alcoholism.
Hungry during night.

[15] **Eating and Drinking.** After eating: violent beating all over body, < in abdomen; must lie down.
‖Bad effects: from sugar; from salt food; from drinking tea; from lemonade.

[18] **Hypochondrium.** Searching pain in region of liver, < in taking a long breath, with sensitiveness to external pressure; followed by a red, itching rash in region of liver.
Stitches in spleen when walking.
Enlargement of liver with loss of appetite, particularly in morning; white coating on tongue; sharp stitching pains in hepatic region, < from motion and pressure; sensitiveness of liver; peculiar fine rash over hepatic region.

[19] **Abdomen.** Pulsation in whole body, especially in abdomen after eating.

[20] **Stool and Rectum.** ‖Stool: hard and so impacted that it

Google

requires mechanical aid; mucus or blood passes with last portion; contains threads of fecal matter like hair.

Papescent stool, with tenesmus and feeling in anus as after a hard stool.

‖Stools exceedingly difficult and threaten to tear anus, from their immense size; hours may be spent in an effort at evacuation, stool can be seen through the distended anus as an immense hard, dark-colored ball; the sufferings are great and patient becomes wonderfully agitated.

[21] **Urinary Organs.** Sensation in tip of urethra as if a biting drop were forcing its way out.

Twinging pain along urethra from behind forward, with a sensation as if drops were passing out.

‖Involuntary dribbling of urine while walking, also after urinating, especially after stool.

‖‖Urine: dark, scanty; red, in evening; sediment coarse, red, sandy.

[22] **Male Sexual Organs.** ‖Erections slow, insufficient; semen emitted too rapidly and with long-continued thrill; weak, ill-humored after an embrace, weakness in loins.

‖Semen thin, without normal odor.

‖Lewd thoughts, but physically impotent.

No erection in evening, notwithstanding he was excited; erection in morning without sexual desire.

Diminution of sexual desire.

Impotence with sexual desire.

Lascivious dreams, with seminal emissions, which awaken him, followed by lameness and weakness in small of back.

‖‖Impotence.

Involuntary dribbling of semen or prostatic fluid during sleep.

‖Seminal emissions about twice a week, lascivious dreams, is always awakened by it; always rises with weakness and lameness in small of back. θSpermatorrhœa.

‖Prostatic juice oozes while sitting, during sleep, when walking and at stool.

A drop of watery, sticky substance passes from urethra just before stool and soon afterward.

While sitting a drop of prostatic fluid passes from orifice of urethra with a peculiar, disagreeable sensation.

‖Frequent itching in small spots on skin and development of small vesicles on hands and feet; sleep disturbed by confused and lascivious dreams; glowing sensation of skin in various parts of body; severe stitching pain over l. eye, returning every afternoon; belching before eating, particularly after smoking; after eat-

Digitized by Google

ing desire to lie down with inability to fall asleep; pain in region of r. kidney, < from inspiration; dribbling of urine after stool; while at stool must wait a long while to urinate; discharge of prostatic fluid before and after stool; profuse sweat about abdomen and pubes; dull pain in perineum, < urinating, evacuating bowels and during ejaculation of semen; swelling of prostata, feels hard and causes narrowing of urethra; seminal emissions during sleep; weak erections although sexual desire may be great; premature ejaculation of semen; cough on awaking; expectoration of small lumps of mucus and blood; tearing pains in posterior part of thighs. θProstatitis and atony of sexual organs.

‖ Prostatitis caused by an immense hard stool.

‖ Discharge of slimy mucus from ten to fifteen drops or a tablespoonful looking like milk. θProstatic gleet.

Itching on scrotum.

‖ Gonorrhœa (secondary); gleet.

[23] **Female Sexual Organs.** Catamenia copious and dark.

[24] **Pregnancy, Parturition. Lactation.** During pregnancy throbbing in abdomen.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖ Voice husky when beginning to sing, or from talking long; hawks transparent lumps every morning, sometimes bloody.

‖ Hoarseness after long use of voice; frequent necessity to clear the throat on account of accumulation of clear starchy mucus.

Increased hoarseness while singing, especially at the beginning.

Is frequently obliged to clear his throat, alternating with hoarseness.

‖ Tubercular laryngitis; raising of small lumps of blood and mucus; tendency to hoarseness; cervical glands swollen, hard but not sore.

[26] **Respiration.** Frequent deep breathing with moaning.

Dyspnœa from accumulation of mucus in windpipe.

[27] **Cough.** ‖ Cough in morning though slight and weak affects whole chest, and lumps of mucus with blood are expectorated.

[28] **Inner Chest and Lungs.** ‖ Pains in r. side and under last ribs especially on inspiration, extending to kidneys, which are sensitive to external pressure.

[29] **Heart, Pulse and Circulation.** Throbbing in vessels throughout whole body, pulsation especially felt in abdomen.

[31] **Neck and Back.** Neck stiff on turning head.

Pain as from lameness in small of back, in morning.

Digitized by Google

[34] **Upper Limbs.** Tearing in hands at night, with cracking in wrists.
Emaciation of hands.
Itching in palms; vesicles on and between fingers.
Dry, scaly eruption on palms of hands with itching, having a syphilitic base.
Painful hangnails.

[35] **Lower Limbs.** Cracking of knee joint on bending it.
Flat ulcers on lower legs.
Emaciation of legs.
Itching around ankle, in evening; blisters on toes.
Cramps in calves and soles.
Legs feel weak, with fear of paralysis, after typhus.
Itching about ankles.

[36] **Rest. Position. Motion.** Must lie down: after eating.
Lifting head: vertigo.
Turning head: stiff neck.
Bending knee joint: cracking in it.
Sitting: prostatic juice oozes.
Rising up: vertigo.
Any exertion: easy fatigue; sweat.
Motion: vertigo; pains in hepatic region <.
Walking: stitches in spleen; involuntary dribbling of urine; prostatic juice oozes.

[36] **Nerves.** Weakness and general debility; easy fatigue from any exertion or labor; especially in hot weather.
Irresistible desire to lie down and sleep; strength suddenly leaves him.
Easy exhaustion; inability to perform anykind of labor, either mental or physical; sexual desire with debility and relaxation of organs; loss of prostatic juice.
Great nervous debility after typhus, particularly when sensations of patient spread from above downward.
After typhoid fever great debility of spine, fears he will be paralyzed.
Very great aversion to a draft of air either warm, cold or damp.

[37] **Sleep.** Sleepless before 12 P.M.; light sleep, least noise awakens him; starts on falling asleep; sleeps in cat naps.
Dreams of quarrels and cruelties.
Hungry in night.
Awakes early and always at same hour.
Worse after a siesta on hot days; < after sleep.

[38] **Time.** Morning: want of appetite in morning; erection without sexual desire; cough; pain in small of back.
Evening: great talkativeness; tingling itching on scalp; urine red; itching around ankle.
Night: tearing in hands; hungry.

Google

12 P.M.: sleepless.

[39] **Temperature and Weather.** Hot weather: weakness and general debility.

Draft of air either warm, cold or damp: great aversion.

[40] **Fever.** Chill alternating with heat.

External heat, burning in skin in single spots.

Sweat: profuse on chest, armpits and genitals; from least exertion; as soon as he sleeps; stains yellow, or white and stiffens linen; staining brownish-yellow.

[41] **Attacks, Periodicity.** Alternation: of chill and heat.

Every morning: hawks transparent lumps.

Every afternoon: headache; pain over l. eye.

About twice a week: seminal emissions.

[42] **Locality and Direction.** Right: pain in region of kidney; pain in side under last ribs.

Left: stinging over eye; twitching of eyeball; pain over eye.

From above downward: sensations spread.

[43] **Sensations.** As if biting drop were forcing its way out of urethra.

Pain: in region of r. kidney; in r. side under last ribs; in small of back.

Violent pain: in head.

Tearing pains: in thighs; in hands.

Twinging pain: along urethra.

Searching pain: in region of liver.

Sharp stitching pains: in hepatic region.

Stitches: in spleen.

Violent stinging: over l. eye.

Burning: in skin.

Dull pain: in perineum.

Cramps in calves and soles.

Violent beating: all over body.

Throbbing: in abdomen; in vessels throughout whole body.

Sensation of contraction: of scalp.

Tension: of scalp.

Weakness: of loins; in small of back.

Tingling itching: on scalp.

Itching: of vesicles on edges of eyelids and eyebrows; in nose and edges of nostrils; in small spots on skin; on scrotum; in palms; around ankle; in folds of skin between fingers and about joints.

[44] **Tissues.** Great emaciation, especially of face, thighs and hands.

Emaciation and withering of affected parts.

The hair falls out.

[45] **Touch. Passive Motion. Injuries.** Pressure: region of liver sensitive to; kidneys sensitive.

Google

Scratching: oozing on scalp.

[46] **Skin.** Red rash on region of liver.

Frequent tingling in small spots of skin, with great irritation to scratch; spots remain humid.

Itch checked by mercury or sulphur.

Flat ulcers.

Itching in folds of skin between fingers and about joints, particularly ankle joint.

‖Hair falls off, on head, eyebrows, whiskers and other parts of body.

[48] **Relations.** Incompatible: *Cinchon.*, wine.

Compare: *Phosphor.*, genito-urinary and respiratory symptoms; *Stannum* and *Argent. met.*, cough, transparent, starchy, mucous expectoration; *Alumina*, hard stool.

Antidotes: *Ignat.*, *Pulsat.*

SENECIO.

Golden Ragwort. *Compositæ.*

Proved by Small, U. S. Med. and Surg. Jour., 1866, p. 151; Jones, Hale's New Rem., 1876, p. 971.

Clinical Authorities.—*Dysmenorrhœa*, Blake, Hom. Rev., vol. 16, p. 403; Hale, A. H. O., vol. 1, p. 46; *Hæmoptysis*, Irish, A. H. O., vol. 1, p. 46.

[1] **Mind.** ‖Low spirits alternating with cheerful mood; ‖sleepless; sensation of a ball rising from stomach to throat. θAmenorrhœa. θHysteria.

‖Inability to fix mind on one subject for any length of time.

A feeling like homesickness.

[2] **Sensorium.** ‖Dizzy feeling while walking in open air like a wave from occiput to sinciput; he feels as if he would pitch forward; nausea.

[3] **Inner Head.** ‖Dull stupefying headache with fulness of head, as from catarrh.

[4] **Outer Head.** ‖Sharp lancinating in l. temple, upper part of l. eye and inside of l. lower jaw.

‖Sharp stitching pains from within outward in forehead; sharp shooting pains over and in eyes; catarrh; suppressed secretion.

‖Headache preceding leucorrhœa and irritation of bladder.

Forehead hot; sweaty in evening.

Digitized by Google

[6] **Sight and Eyes.** ||Sharp pains from within outward, l. eye; lachrymation in open air.
||Catarrhal ophthalmia from suppressed secretions.

[7] **Smell and Nose.** |Coryza, at first dull headache, dryness of nose and sneezing, burning and fulness in nostrils, later secretion of copious mucus.
|Coryza with nosebleed.

[8] **Upper Face.** |Face pale, depressed appearance; weary, wants to lie down.

[9] **Lower Face.** Lips: and gums pale; dry, feverish.

[10] **Teeth and Gums.** ||Teeth tender and sensitive.

[11] **Taste and Tongue.** Tongue slightly coated; catarrhal fever.

[12] **Inner Mouth.** |Mouth and fauces dry, hot. θCatarrh.

[13] **Throat.** Tightness in throat, wants to swallow; fauces dry.

[14] **Hiccough, Belching, Nausea and Vomiting.** Eructations of sour gas and ingesta.
||Nausea on rising; morning sickness of pregnancy.
|Nausea from renal derangements.

[18] **Hypochondria.** Stitches in hypochondria; sharp cutting in diaphragm; epigastrium.

[19] **Abdomen.** Pains centre about navel, spreading thence in all directions; > by stool; griping pains > bending forward.
Rumbling of wind.
Catarrh of bowels, rumbling colic and watery stools.
||Abdomen much enlarged and very tense; lower limbs œdematous; urine scanty, high-colored, not more than eight ounces a day; pain in lumbar region and in ovaries; constipation; cervix uteri congested; albuminous leucorrhœa; sense of weight in uterine region. θAscites.

[20] **Stool and Rectum.** ||Stool, thin, watery, bloody; with tenesmus and colic; catarrhal dysentery; evening.
||Stool copious, with great debility and prostration; flatulence; morning.
Stool in hard lumps mixed with yellow mucus.

[21] **Urinary Organs.** Slight pains in region of kidneys.
|Congestion and inflammation of kidneys.
||Attacks of renal inflammation, attacking particularly r. kidney, causing intense pain, fever and great prostration; on one occasion suffering intense and bladder seemed implicated; great pain on passing urine, causing him to cry out; constipation; urine reddish, very hot, and acrid; dull headache; dryness of mouth and throat; chilliness, fever and perspiration.
||Severe renal inflammation with fever, chilliness and pain in lumbar region, particularly in l. kidney; quantity of urine below normal; urine red, depositing a brickdust sediment; considerable arterial excitement;

Digitized by Google

skin hot and dry; motion caused him to cry out with pain; constipation.

‖Intense pain over r. kidney, severe pain during urination, urine red, hot, acrid; bowels constipated.

‖Renal dropsy.

‖Ascites and œdema of lower extremities in a young woman.

‖Inflammation of kidneys and ureters after passage of gravel.

Tenesmus of bladder; smarting in urethra, dropsy.

Increased urinary secretion; followed by acute inflammation.

‖Hæmaturia; renal pain with nausea.

‖Tenesmus of bladder, with heat and urging.

Urging to urinate following chilliness.

Uncomfortable heat in neck of bladder.

‖Irritation of bladder in children, preceded by heat in head and headache.

‖Renal colic with or without nausea.

‖Chronic inflammation of neck of bladder with bloody urine and tenesmus of bladder.

‖Chronic inflammation of kidneys.

‖Dysuria: of women and children evidently of catarrhal origin; mucous sediment in urine; with uterine displacement.

Smarting in fossa navicularis before urination.

[33] **Male Sexual Organs.** Lascivious dreams, emissions.

Prostate gland enlarged, feels hard and swollen to touch.

Dull heavy pain in spermatic cord, moving along cord to testicle.

Gonorrhœa, gleet.

Chronic prostatitis.

[34] **Female Sexual Organs.** ‖Menses, every three weeks, very profuse, lasting eight or nine days, accompanied by severe cutting pains in region of sacrum, hypogastrium and groins; she was pale, weak and nervous and had a slight cough, generally at night; after an abortion.

Menses premature and profuse or retarded and scanty.

‖Dysmenorrhœa with urinary symptoms; cutting in sacral and hypogastric regions; flow scanty or profuse or irregular; pale, weak, anæmic; strumous; hacking cough at night.

‖Amenorrhœa: from a cold; nervous irritability, lassitude, dropsy; wandering pains in back and shoulders; sensation of a ball rising from stomach into throat; costive; in young girls with dropsical conditions.

‖Symptoms as if menses would appear, but they fail; nervous, excitable, sleepless; loss of appetite.

Digitized by Google

‖Suppression of menses from a cold; after venesection.
‖Menstrual irregularities in consumptive patients.
‖Leucorrhœa: preceded by headache, sleeplessness and irritable bladder; in little girls, preceded by headache and sleeplessness.
‖Chlorosis, in scrofulous girls, with dropsy.

[25] **Voice and Larynx. Trachea and Bronchia.** Hawking of tough, white mucus.

[26] **Respiration.** Respiration as if greatly fatigued.
Labored breathing from mucous accumulation.

[27] **Cough.** ‖Hacking night cough.
‖Mucous rattling with suppressed cough.
‖Great debility; loss of appetite; flashes of heat during day; redness of cheeks in afternoon; occasional night sweats; menses very irregular for a year, have now been absent two months; six weeks ago had caught cold, cough, at first dry then loose with copious expectoration of yellowish, thick, sweet mucus, often streaked with blood, with sensation of rawness and soreness in chest; paroxysms of coughing were quite severe and exhausting.
‖Palliated cough and bloody sputa in a woman far gone with consumption and brought back menses which were absent four months.
Cough with bloody expectoration.

[28] **Inner Chest and Lungs.** ‖Catarrh of lungs; loose cough and copious mucous expectoration.
‖Hæmoptysis; great emaciation; dry, hacking cough; hectic flush; sleeplessness.
‖Hæmoptysis after venesection or suppressed menstruation.
‖Chronic hemorrhage from lungs with dry, hacking cough, hectic fever, emaciation, sleeplessness.
‖Incipient phthisis, attended with fatiguing cough, result of obstructed menstruation; increased bronchial secretion; loose mucous cough, rattling in chest, labored respiration.
‖Phthisis, with obstructed menstruation; bloody or copious mucous sputa.

[31] **Neck and Back.** Pain in back and loins.
Sharp, lancinating pains in lumbar region.
Dull pain in l. lumbar region.
Severe pain in small of back, in morning.
‖Cutting pains in region of sacrum, hypogastrium and groins, with too early or too profuse menses; she is pale, weak and nervous and has a slight cough at night.
‖Wandering pains in back and shoulders; pain in joints.

[33] **Lower Limbs.** Lower limbs weary.

Google

[54] **Limbs in General.** ‖Sharp stitches here and there; rheumatic pains in joints.
‖Œdema.

[56] **Nerves.** ‖Nervousness, sleeplessness and hysterical mood.
‖Much lassitude and great nervousness.
‖‖Hysteria.
‖‖Wants to lie down; pale.
Slight exertion produces syncope.

[57] **Sleep.** Great sleeplessness, with vivid, unpleasant dreams.
‖Sleeplessness: of women suffering from uterine irritation, prolapsus and its attendant nervousness (it is the *Coffea* of women); during climacteric period.
‖At night sleepless, nervous, hysterical; by day drowsy, languid.
‖‖Dreams mostly of an intellectual character; memory very active.

[58] **Time.** Morning: flatulence; severe pain in small of back; sweat toward.
Forenoon: chilly.
During day: flashes of heat; drowsy, languid; frequent desire to urinate.
Afternoon: redness of cheeks.
Evening: forehead sweaty; stools.
Night: cough; occasional sweats; sleepless; frequent desire to urinate.

[59] **Temperature and Weather.** ‖‖Sensitive to open air; tendency to catarrhs.
Open air: walking in, dizziness; lachrymation.

[60] **Fever.** Chilly forenoon as after taking cold; followed by heat and sweat in evening with moderate thirst.
Chilliness followed by urging to urinate.
Sweat toward morning; catarrh.
Hectic fever.

[61] **Attacks, Periodicity.** Alternate: low spirits and cheerful mood; urine profuse and watery or dark colored and scanty.
Every three weeks: menses.

[62] **Locality and Direction.** Left: lancinating in temple and eye; pain in lumbar region.
Right: inflammation of kidney; intense pain over kidney.
From within outward: pain in forehead; pain in eye.

[63] **Sensations.** As of a ball rising from stomach to throat; as of a wave from occiput to sinciput; as if he would pitch forward; respiration as if greatly fatigued.
Pains: centre about navel; in lumbar region and ovaries; in region of kidneys; in back and loins; in joints.
Intense pain: in r. kidney; over r. kidney.
Severe pain: in small of back.
Sharp pains: in l. eye.

Digitized by Google

Sharp, lancinating pains: in l. temple, upper part of l. eye and inside of lower jaw; in lumbar region.
Sharp cutting: in diaphragm; in region of sacrum, hypogastrium and groins.
Sharp, shooting pains: over and in eyes.
Sharp, stitching pain: in forehead.
Stitches: in hypochondria; in epigastrium; here and there in limbs.
Griping pains: in abdomen.
Rheumatic pains: in joints.
Wandering pains: in back and shoulders.
Dull pain: in l. lumbar region.
Dull, stupefying pain: in head.
Smarting: in urethra; in fossa navicularis.
Soreness: of chest.
Rawness: of chest.
Burning: in nostrils.
Sensitiveness: of teeth.
Heat: in neck of bladder; in head.
Tightness: in throat.
Fulness: in head; in nostrils.
Dryness: of nose; of mouth and fauces.
Weariness: of lower limbs.

Tissues. Catarrhal affections of mucous membranes.
Face bloated, abdomen enlarged, feet œdematous; urine alternately profuse and watery or dark-colored and scanty; frequent desire to urinate day and night. Dropsy.
Hemorrhages from uterus, kidneys, bowels, lungs, etc.
Dropsy from amenia; ascites and œdema of lower limbs in a young woman.
Anæmia.

Stages of Life, Constitution. Women and little girls of nervous temperament.
Lady, mother of one child, had an abortion three years ago, another (at second month) four months ago; dysmenorrhœa.
Mrs. H., æt. 30, lymphatic temperament, suffering six years; inflammation of neck of bladder.
Woman, æt. 30; dropsy.
Woman, æt. 40, passing through climacteric period; cough.
Merchant, æt. 45, nervous temperament, inclined to be bilious; renal inflammation.
Woman, æt. 48; amenorrhœa.
Man, æt. 50, nervo-sanguine temperament; attacks of renal inflammation.

Relations. Compare: *Aletris*, *Cinchon.* (hemorrhage); *Coffea*; *Caulophyl.*, *Sepia* (irregular menses); *Actæa racem.*, *Pulsat.*

Google

SENEGA.

Seneca Snake Root. *Polygalaceæ.*

This plant grows wild in all parts of the United States.

The alcoholic tincture is prepared from the powdered, dried root.

For general effects obtained from experiments with the powdered root and tincture see Allen's Encyclopedia, including Seidel's and Lembke's collections, vol. 8, p. 586.

CLINICAL AUTHORITIES.—*Hypopion*, Noack, B. J. H., vol. 23, p. 341; *Paresis of oculo-motor nerve*, Allen, Hah. Mo., vol. 7, p. 106; *Catarrh of pharynx*, Gerstel, A. H. [2] **Sensorium.** Confused or reeling sensation in head.

[1] Dulness and stupefaction of head, with pressure in eyes and obscuration of sight.

[3] **Inner Head.** Aching pain in head, in sinciput and occiput, not increased by pressure, every day when sitting in a warm room, accompanied by pressure in eyes which did not bear touch.

Pressing pain in forehead and orbits after dinner, especially l. side, < in open air.

[4] **Outer Head.** Shuddering on hairy scalp.

[5] **Sight and Eyes.** Drawing and pressure in eyeballs, with diminution of vision.

Weakness of sight and flickering before eyes when reading, necessitating frequent wiping of eyes, which aggravates.

While reading eyes feel dazzled.

Flickering and running together of letters when reading.

Flickering before eyes and weakness of sight when continuing to read or write.

On walking toward setting sun, another small sun seemed to float beneath it, on turning eyes outward it changed into a compressed oval, disappeared on bending head and closing eyes.

Google

Weakness of eyes with burning and lachrymation.
Obscuration of cornea.
Sensitiveness of eyes to light.
Obscuration of sight, with glistening before eyes, < from rubbing them.
‖Hypopion in scrofulous subjects.
▮To promote absorption of lens fragments after cataract operations or injuries to lens.
▮Paralysis of muscles of eye.
▮Iritis and specks upon cornea.
‖Opacities in vitreous.
▮Paresis of superior oblique.
‖Oculo-motor paresis; Mr. A., æt. 33, four years ago eyes began to be weak with difficulty in seeing clearly; drooping lids, was obliged to pull them open; began to see double with r. image obliquely above real one; stopped using eyes and improved; this summer visited Mammoth Cave, followed by a return of double vision; walked into room with head thrown backward (occasionally shutting his l. eye and holding his head straight), this position relieving confusion of vision; double vision caused him to make missteps, etc.; paresis of l. oculomotor nerve, with paralysis of superior rectus; upper lid very weak, falling half over eye; difficult convergence; weak back; deficient muscular power; subject to bilious headaches.
▮Aching over orbits, eyes tremble and water when he looks at an object intently or steadily; eyes weak and watery when reading.
▮Eyes pain as if they were pressed out, as if eyeballs were being expanded, especially in evening in candlelight.
Congestion of blood to eyes, with pulsation in them on stooping.
Swelling of eyelids, with tingling in them.
Hardened mucus in morning in eyelashes.
Lachrymation in open air when looking intently at an object.
▮Blepharitis ciliaris, < in morning, much smarting, dry, crusty lashes.
▮Cilia hang full of hard mucus; smarting of conjunctiva as if soap were in eyes, mornings; blepharitis; sometimes lids stick so after sleep they must be soaked before they can be separated.
Pimple on margin of l. lower lid.
Stye on lower lid.
Hydrophthalmia with intraocular compression.

[6] **Hearing and Ears.** Painful sensitiveness of hearing.

[7] **Smell and Nose.** Sneezing for five minutes, so violent and

Google

long continued that the head became quite heavy and dizzy; afterward a large quantity of thin watery fluid flowed from nose.

Troublesome dryness of Schneiderian membrane.

‖Frequent coryza, commencing with feeling as if red pepper were throughout nostrils and air passages, followed by distressing cough. θInfluenza.

Smell of pus before nose.

[8] **Upper Face.** ‖Paralytic feeling in l. half of face.

Heat in face.

[9] **Lower Face.** Burning blisters on upper lip and in corners of mouth.

[11] **Taste and Tongue.** Tongue coated white, yellowish-white or slimy in morning, with slimy unpleasant taste.

Taste: metallic; like urine.

[12] **Inner Mouth.** Increased secretion of saliva; offensive breath.

Burning in throat, mouth and on tongue.

[13] **Throat.** ‖Very dry, sore throat; short hacking cough, which tears and scrapes throat; loss of voice, even whispering is very painful to throat and causes cough; < in open air.

Inflammation and swelling of throat and palate.

Dryness in throat and accumulation of tough mucus which is difficult to hawk up.

[14] **Appetite, Thirst. Desires, Aversions.** Much thirst, with loss of appetite.

Gnawing hunger with sensation of emptiness in stomach.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea, vomiting of mucus.

Nausea as from stomach, with vomiturition and straining to vomit.

[17] **Scrobiculum and Stomach.** Pressure below pit of stomach; sense of gnawing hunger.

Digging pain in epigastrium, disposition to flatulence; outbursts of ill-humor.

Cramps and burning in stomach.

[19] **Abdomen.** Ascites accompanying hepatic diseases, peritonitis or abdominal tumors.

Colic, with pressing pain.

Warmth and oppression in upper part of abdomen when inhaling.

Gnawing in upper part of abdomen.

Griping in bowels.

[20] **Stool and Rectum.** Mushy or copious watery stools.

Purging, vomiting and anxiety; watery stools, spurting from anus.

Stools: scanty, hard, dry and large, insufficient.

Digitized by Google

Watery diarrhœa, with griping pain in bowels; nausea and vomiting.

[31] **Urinary Organs.** Urine: diminished; dark and frothy for a long time after passing; passed only night and morning; at first mixed with mucous filaments, afterward thick and cloudy; frequent, with greenish tinge depositing a cloudy sediment; acrid, increased in quantity.

Involuntary micturition at night in bed.

‖Irritability of bladder.

‖Urging and scalding before and after micturition; mucous shreds in urine; on cooling becomes thick and cloudy, or deposits a thick sediment, yellowish-red with the upper stratum yellow and flocculent. θCatarrh of bladder.

‖Subacute and chronic catarrh of bladder.

Burning and stinging in urethra during and after micturition.

[33] **Female Sexual Organs.** Menses come on too soon; has to press in her l. side at tenth rib to relieve gnawing pain.

[35] **Voice and Larynx. Trachea and Bronchia.** Sudden hoarseness when reading aloud.

‖Aphonia from severe cold or excessive use of voice.

Irritation in larynx inducing a short, hacking cough.

Sudden tickling in larynx excites cough.

Tenacious mucus in larynx inducing frequent hawking, which results in discharge of small lumps of mucus.

Constant inclination to clear throat and swallow saliva.

Great dryness of throat impeding speech.

Titillating, scraping feeling in throat.

‖Catarrh of pharynx in a tenor lasting six months; not hoarse but when mucus collected in fauces was uncertain of his ability to bring out either high or low tones; voice feeble; throat red, covered with a thin layer of dark green, half-transparent mucus; burning and raw feeling in throat and hawking.

‖Influenza: constant tickling and burning in throat and larynx, leaving patient not a moment's rest and preventing him from lying down; fear of suffocation.

‖Grippe with stitches in r. eye when coughing.

‖Constant burning and tickling in larynx and throat, with danger of suffocation when lying; copious expectoration of tough mucus; relief by outdoor exercise. θInfluenza.

Laryngeal phthisis.

Increased secretion of mucus in trachea, which he is constantly obliged to hawk up.

‖Copious accumulation of tough mucus in air tubes which causes the greatest, often ineffectual, efforts at coughing and hawking for its expulsion. θBronchitis.

Google

[26] **Respiration.** ‖Sensation as if chest were too narrow, with tendency to relieve this feeling by taking deep inspirations and respirations. θAsthma.

‖Short breathing and oppression of chest when going up stairs.

Dyspnœa as from stagnation in lungs.

Oppressed breathing, as if chest were not wide enough, especially in open air and when stooping.

Shortness of breath from accumulation of mucus in chest and trachea.

Dyspnœa, especially during rest.

[27] **Cough.** Dry cough with oppression of chest and roughness in throat.

Frequent short and hacking cough, occasioned by an increased secretion of mucus in larynx, especially in open air and when walking rather fast.

Dry cough with aphonia; < in cold air and walking, > by warm air and rest.

Irritating cough with secretion of mucus, with much pain about chest.

‖Soreness of chest, dry cough; throat dry; hoarseness, later much mucus in bronchi and trachea.

Cough < in morning, while dressing and before breakfast.

‖Irritating, shaking dry cough, in chronic bronchitis in the aged.

Loose, faint, hacking cough, with expectoration of a little phlegm.

Cough often ends in a sneeze.

Shaking cough like whooping cough, from burning and tickling in larynx, in morning, with copious expectoration of tough, white mucus like white of egg.

‖‖Whistling cough; great oppression of chest; pressing pains when breathing; cough dry or yellow expectoration, at times streaked with blood; inflammatory conditions of chest; useless in convulsive stage. θWhooping cough.

‖Whooping cough: chubby children; tough expectoration clear like white of egg; cough < toward evening; expectoration difficult to raise; crushing weight on chest; < at night with excessive rattling of mucus.

[28] **Inner Chest and Lungs.** Congestion to chest, with flushes of heat in face and frequent pulse in afternoon.

Tightness and oppression of chest, especially during rest.

Rattling in chest; loose but feeble cough with little expectoration; hydrothorax.

Feeling as if thorax were too narrow, with constant inclination to widen it by deep inhalation; burning in chest.

Certain movements, especially stooping, cause a pain in

Google

chest as if it were too tight; there is a disposition to expand chest by frequent stretching; this leaves considerable soreness in chest.

‖ Soreness through chest, with feeling of oppression when in open air and when reposing; headache > in open air.

Soreness in chest, < by pressure, coughing and sneezing.

Violent aching pain in chest, at night, when waking.

Burning sore pain under sternum, especially during motion and on every deep inspiration.

Stitches in chest when coughing and breathing.

Shooting stitches in chest < during inspiration and rest.

Dull stitches and burning pain in chest when lying on r. side.

‖ Walls of chest sensitive or painful when touched or when he sneezes (often as a remnant of colds).

Stepping hard, walking fast or running causes pulling, sore pain as if through mediastinum.

Accumulation of mucus in chest.

‖ Constant accumulation of phlegm in bronchial tubes, with irritation in bowels, tendency to diarrhœa; irritation may alternate from chest to bowels and vice versa.

‖‖ Profuse secretion of mucus in lungs of old people, with loose, rattling cough.

‖ Great rattling of mucus in chest, with flying pains in chest.

Great soreness in walls of chest and great accumulation of clear albuminous mucus which is difficult to expectorate; pressure on chest as if lungs were pushed back to spine.

‖ Profuse expectoration of clear, transparent mucus; whole chest filled with large mucous râles. θGrippe.

‖ Tough mucus causes the greatest, often ineffectual efforts of coughing and hawking for its expulsion. θBronchitis.

‖ Bronchitis of old people; irritating, shaking cough.

‖ Twentieth day of pneumonia in a woman, æt. 56, r. side, violent stitches, sinking strength, small, scarcely perceptible pulse, short rare cough without expectoration, great rattling of mucus in chest, somnolence, dejected features.

‖ Adynamic pneumonia; low fever and much prostration.

‖ Pleuro-pneumonia in l. lung; at first *Bry.*, *Acon.*, *Bell.* had been given; the lancinating pains had completely disappeared, but there was still some oppression; expectoration was without blood, but very difficult, and strength was greatly reduced; in evening covered with cold sweat; pulse very small and wiry; oppression so great he must sit upright constantly; mucus stagnating and rattling in chest.

Digitized by Google

‖Pleurisy in a latent form; dulness in lower three-fourths of r. side of chest; ægophony of same side toward upper part of lung; pulse 110; *Seneg.* removed not only the effusion but also the thickening of the pleura consequent on the pleurisy.

‖Pleurisy; after inflammation has passed; copious mucous secretion with difficult expectoration; tightness and burning in chest.

‖Subacute or chronic exudations of pleura; catarrhal pleuro-pneumonia.

Hydrothorax and ascites after scarlatina; anasarca; ascites; hoarse and feeble cough, with little expectoration.

‖Phthisis mucosa.

[29] **Heart, Pulse and Circulation.** ‖Boring pain about heart.

Heart's beat shakes the whole body; violent palpitation while walking.

Pulse hard and frequent.

[30] **Outer Chest.** General sensitiveness or simple pain of walls of thorax, especially when touching them, it is felt less during a deep inspiration.

‖Soreness of walls of chest on moving arms, particularly left.

[31] **Neck and Back.** Pressing pain between scapulæ, especially when stepping hard, or on other movements which concuss the chest.

Pulse rather hard and accelerated.

Pain under r. shoulder blade, as if chest would burst, when coughing or drawing a long breath.

[32] **Upper Limbs.** Sensation as if wrist were sprained.

[33] **Lower Limbs.** Sensation of great weakness or debility in legs; joints feel as if lame.

[35] **Rest. Position. Motion.** Most symptoms, especially those of chest, are < when at rest and > when walking in open air.

Rest: dyspnœa; dry cough >; tightness of chest; shooting through chest.

Cannot lie down: tickling in larynx; fear of suffocation.

Lying on r. side: pain in chest.

Stooping: oppressed breathing; pain in chest.

Motion: pain under sternum; of arm, soreness of walls of chest.

Going up stairs: shortness of breathing and oppression of chest.

Stepping hard, walking fast or running: causes pulling, sore pain as if through mediastinum; pressing pain between scapulæ.

Walking: fast, causes short, hacking cough; violent palpitation.

Digitized by Google

[36] **Nerves.** Faintness when walking in open air.
Great mental and bodily lassitude.
Lassitude and slight trembling of upper extremities.
Sensation of trembling, with no visible trembling.
Legs feel weak, joints feel lame.
Great debility with stretching of limbs, confusion, heaviness and beating in head.
Great weakness which seems to originate in chest.
Mental and physical debility, with dropsical effusions.

[37] **Sleep.** In evening, as soon as one lies down, heavy sleep; in morning awakes frequently with dyspnœa.

[38] **Time.** Morning: hardened mucus in eyelashes; blepharitis ciliaris <; tongue slimy; cough <; awakes from dyspnœa.
Afternoon: heat in face and frequent pulse.
Evening: pressure in eyes <; toward, whooping cough.
Night and morning: urine passed only.
Night: involuntary micturition; whooping cough <; aching in chest.

[39] **Temperature and Weather.** Warm air: dry cough <.
Warm room: pain in head.
Open air: pain in forehead <; lachrymation; sore throat and cough <; oppressed breathing; short, hacking cough; headache >; oppression of chest; faintness when walking; chilliness and chill only in.
Cold air: dry cough <.

[40] **Fever.** Shuddering over back, heat in face, weak, burning eyes, beating headache, difficult breathing, body feels bruised.
Flushes of heat; skin hot; skin becomes warmer and moister.
Chilliness and chill almost only in open air, with weakness in legs and dyspnœa.
Shudders over back with heat in face and chest symptoms.
Sudden flushes of heat.
Perspiration wanting.

[41] **Attacks, Periodicity.** Alternate: irritation from chest to bowels and vice versa.
For five minutes: sneezing.
For six months: catarrh of pharynx.

[42] **Locality and Direction.** Right: stitches in eye; stitches in side; pain under shoulder blade.
Left: pain in forehead <; pimple on margin of lower lid; paralytic feeling on half of face; must press side to relieve pain; pleuro-pneumonia in lung; moving arm causes soreness of walls of chest.

[43] **Sensations.** Eyes pain as if they were pressed out; as if eyeballs were being expanded; as if soap were in eyes;

Google

as if red pepper were throughout nostrils and air passages; as if chest were too narrow; dyspnœa as from stagnation in lungs; as if lungs were pushed back to spine; as if chest would burst; as if wrist were sprained; joints as if lame.

Pain: about chest; in walls of thorax; under r. shoulder blade.

Flying pains: in chest.

Boring pain: about heart.

Digging pain: in epigastrium.

Shooting stitches: in chest.

Stitches: in r. eye; in chest.

Dull stitches: in chest.

Cramps: in stomach.

Gnawing: in bowels; under tenth rib l. side.

Pressing pain: in forehead and orbits; in abdomen; between scapulæ.

Drawing: in eyeballs.

Aching pain: in head; over orbits; in chest.

Stinging: in urethra.

Smarting: of conjunctiva.

Burning: of eyes; in throat, mouth and on tongue; in stomach; in urethra; in larynx; in chest; and under sternum.

Soreness: of chest; in walls of chest.

Scraping feeling: in throat.

Heat: in face.

Beating: in head.

Pressure: in eyes; below pit of stomach; on chest.

Tingling: in eyelids.

Titillating feeling: in throat.

Dryness: of Schneiderian membrane of throat.

Oppression: in upper part of chest.

Tightness: of chest.

Dulness: in head.

Emptiness: in stomach.

Weakness: of legs.

Reeling sensation: in head.

Paralytic feeling: in l. half of face.

"**Tissues.** Catarrhs that tend to leave sore and tender places in walls of chest as if there were left circumscribed spots of inflammation.

Diseases of mucous membranes; especially of lining of larynx, trachea and bronchia.

Subacute or chronic exudations of pleura, catarrhal pleuropneumonia (after *Bry.*) in cachectic pleuritis, in hydrothorax, œdema pulmonum, in diseases of heart, primary and secondary anasarca; in dropsies after albuminuria;

Google

hydrophthalmia with intraocular compression; in ascites accompanying hepatic diseases, peritonitis and abdominal tumors; in lymphatic constitutions with tendency to mucous and serous exudations.

Dropsy of internal organs (especially after inflammation).

Inflammation of internal organs.

[45] **Touch. Passive Motion. Injuries.** Touch: walls of chest painful; of vesicles causes itching.

Pressure: on l. side >; pain; soreness of chest <.

Rubbing: glistening before eyes <.

Bites of poisonous or enraged animals.

[46] **Skin.** Burning vesicles, itching when touched.

[47] **Stages of Life, Constitution.** Especially suitable for plethoric, phlegmatic persons.

Girl, æt. 5; after scarlatina; ascites.

Girl, æt. 13, after miliary fever; hydrothorax and anasarca.

Tenor singer, æt. 26, suffering six months; catarrh of pharynx.

Miss X., æt. 30, small stature, poor constitution, pale, thin face; latent pleurisy.

Man, æt. 33; oculo-motor paresis.

Man, æt. 33, slender, leading a sedentary life, first noticed trouble with eyes four years ago; paresis of oculo-motor nerve.

Woman, æt. 56; pneumonia.

Man, æt. 60; pleuro-pneumonia.

[48] **Relations.** Compare; *Ammon.* in bronchial affections; *Calc. ost.* in fat and plethoric people predisposed to catarrhs; *Caustic.* in muscular asthenopia, loss of voice, paralytic conditions; *Phosphor.* in laryngeal and pulmonary catarrh; *Spongia* in bronchial catarrh.

SEPIA.

Cuttle Fish. *Mollusca.*

Introduced by Hahnemann.

The cuttle fish is an inhabitant of the European seas, particularly the Mediterranean. Its ink bag contains a blackish-brown excretory liquor with which it darkens the water when it wishes to escape its enemies or catch its prey.

The triturations and tincture are made from the pure, dry, genuine Sepia, not from the artificial India ink used in drawing.

Provings by Hahnemann, Gersdorff, Goullon, Hartlaub, Walde, Gross, Archiv für Hom., vol. 19, p. 187; Robinson, Br. Jour. of Hom. vol. 25, p. 331; Berridge, N. Am. Jour. of Hom., 1871, p. 69; Ibid., 1873, p. 193; N. E. Med. Gaz., 1874, p. 402; also provings with the higher dilutions and triturations upon twenty-five individuals under the auspices of the Amer. Institute of Hom., see Transactions, 1875.

CLINICAL AUTHORITIES.—*Mental derangement*, Müller, Rück. Kl. Erf., vol. 1, p. 46; Haynel, Analy. Therap., vol. 1, p. 177; Wilson, Rück. Kl. Erf., vol. 5, p. 11; *Apoplexy*, Gerson, Rück. Kl. Mind. Weak memory.

Heavy flow of ideas; inability for mental activity; it is an exertion to think.

Felt all day as if he did not care what happened; no desire to work, inattentive, absent-minded; indolent mood.

Language comes very slowly, has to drag out the words to express ideas; forget the chief points.

Uses wrong words when writing.

Great indifference to everything; no proper sense of life.

Every few minutes inclined to cry, without knowing the cause.

Great sadness and frequent attacks of weeping which she can scarcely suppress.

Very sad with unusual lassitude.

Sad and gloomy mood, mostly when walking in open air and in evening.

Sad about her health and domestic affairs, discontented with everything.

Gloominess; she feels unfortunate without cause.

Dark forebodings about his disease in regard to the future.

Felt that unless he held on to something he should scream.

Depression on awaking in morning.

Very nervous; great excitability in company; restless, fidgety; wants to go from one bed to another.

Digitized by Google

Nerves very sensitive to the least noise.
Fits of involuntary weeping and laughter.
Aversion to one's occupation and family.
Dread of being alone.
Anxiety: with fear, flushes of heat over face; about real or imaginary evils; toward evening.
Great indifference to one's family, to those they love best.
Is easily offended and inclined to be vehement.
Great irritability alternating with indifference.
Greedy, miserly.
After overexertion of mind, bookkeepers, etc.
Quiet, introspective, rarely speaks a word voluntarily, sits for hours occupied with her knitting, her answers are intelligent but curt.
Propensity to suicide from despair about his miserable existence.
Fears to starve, is peevish, and feels mortified, easily frightened and full of evil forebodings.
After metrorrhagia oversensitive, exalted nervous state; hasty speech accompanied by quick gestures; eyes fiery and glistening; pulse 110; her movements were like those of a passionate person; if she could not talk her friends had to relate stories continually in a quick way: at times in the opposite state, gave short answers and desired to be alone; was then moody and feigned sleep; the nights became more and more anxious and restless; she could not describe how terrible they were.
Contradictory, quarrelsome, complaining about others.
Passionate, irritable.
Fretful and out of humor for all business.
Greatest irritability from slightest causes; very easily offended.
Vexed and disposed to scold.
Impatience when sitting, like an uneasiness in bones.
Violent bursts of anger with furious gestures.
Great nervous irritability, with sadness, despondency and absentmindedness; everything seems strange to her; least exertion seems a great effort; it seems as if she could not understand anything and would have to learn anew everything she wished to do; greatest indifference to everything, the death of a near relative, or some happy occurrence, leaves her equally unaffected; no trace of her former love for friends or even for her child; aversion for social intercourse amounting to contempt; constant ill-humor; at times headache with anxiety, < lying down; head also hurts externally; confusion and throbbing in head; constant pains in occiput, < lying; oversensitive to noise; frequent pains in back

Google

extending down into legs and feet; circulation and action of heart weak, sensation as if heart stood still; menses irregular; at times nervous twitchings; screams on least provocation; strength and general condition good; > in a warm climate, also after nosebleed; < after coffee and opium.

[2] **Sensorium.** Stupefaction of head, mental weakness or dulness, can scarcely think.

Painful confusion in head, particularly in forehead.

Momentary attacks of giddiness when walking in open air or while writing.

Vertigo: while walking, as if every object were in motion; with staggering; when drinking; as if objects were moving around one; as if suspended in air, with unconsciousness; when rising from bed in afternoon; after losses of fluids.

Congestion of blood to head; heaviness of head.

[3] **Inner Head.** Drawing pain seeming to be external on forehead back to occiput, in single drawings.

Single, violent, undulating jerks of pressing headache in forehead.

Tearing in upper part of r. side of forehead.

Tearing in l. frontal eminence.

Violent stitches outward over l. orbit, with complete drawing together of eye, for three successive days, after rising in morning, continuing until noon, somewhat < in open air.

Stitches in forehead with nausea (she cannot eat), > from lying down.

Fulness in temples and forehead and throbbing of carotids.

Tearing in l. temple to upper part of l. side of head.

Pressure on vertex, < after mental labor.

Beating, very painful headache in vertex, in morning, soon after rising.

Dull aching frontal headache.

Headache in forehead and vertex, followed by anxiety in pit of stomach with trembling, afterward violent nosebleed.

Heavy pressing pain over l. eye extending toward side of head about 3 30 P.M.; sensation of great fulness deep in l. orbit at 4 P.M.; headache confined to l. side, > in evening and in open air; < by shaking head.

Shooting pains from within out, especially over l. eye, extorting cries, with vomiturition.

Occasionally darting pains extending from l. eye over side of head toward occiput.

Headache > after meals, < by mental labor.

Severe pressure in forehead during menses, with discharge of hardened offensive matter from nose.

Digitized by Google

Stitching, pressive headache continuous in lower part of forehead just over eye, < from motion, in house, > when walking in open air.

Headache: all day with great mental depression; in forenoon as if brain were crushed; as from pressure from within outward; as if head would burst; also from coughing; in morning, with nausea, until noon; most severe toward evening, especially when shaking head; following perspiration on r. side of head and face, with a surging in forehead, like waves of pain rolling up and beating against frontal bone.

Headache as from commotion of brain when stepping or when shaking head, > when sitting up or from slow exercise.

Pressing or bursting headache as if eyes would fall out, or head burst, < from stooping, motion, coughing or shaking head; continued hard motion relieves headache.

Pulsating headache in cerebellum, beginning in morning and lasting till noon or sometimes till evening; < from least motion, when turning eyes, when lying on back; > when lying on side, when closing eyes, when at rest and in a dark room.

Painful cracking in occiput.

Jerking pain upward like electric shocks in head.

Beating: in head; in occiput.

Paroxysms of hemicrania, stinging pain from within outward, in one (mostly l.) side of head or forehead, with nausea, vomiting and contraction of pupils; < indoors and when walking fast; > in open air and when lying on painful side.

Boring headache from within outward, forenoon till evening, feels as if he would die; < from motion and stooping; > by rest when closing eyes, from external pressure and sufficient sleep.

Sensation of coldness on vertex.

Headache with aversion to all food.

Hemicrania in hysterical women; pains stitching, pressing, tearing or twitching with passive congestion of head; in chronic cases where the nervous system has long been disordered; leucorrhœa between menses; sudor hystericus, peculiar sweet-smelling sweat, particularly in axillæ and about soles of feet; face pale, dirty yellow, slender built.

Nervous, rheumatic or gouty pains in head, particularly in delicate, sensitive women.

Frequently recurring tearing, stitching pains in r. side of head, during pregnancy.

Hemicrania, r. side; drawing, tearing pains and now

Google

and then stitches as if from needles; < morning and evening; menses scanty and of too short duration.

Severe pressure in occiput with heat and redness of face; eyes painful; lassitude and tiredness of limbs; inclination to cry; is not disposed to do anything.

Sore pain in l. eye and temple; throbbing, tearing and stitching pains in l. temple extending downward; stitching, like in an ulcer, in l. zygoma and teeth; hair of head sensitive to touch; pains < in paroxysms, with fainting; shivering; coldness of feet; transient heat; thirst; anxiety; despair of recovery.

Migraine after catching least cold; tearing, boring pains and at times stitches; must lie down and keep very quiet; closes eyes and presses head firmly to painful part; exposure to rough wind brings on an attack; aversion to food; stools pappy; menses too early.

Severe headaches, l. side, hysterical in character; tearing, drawing pains beginning at l. parietal region and becoming a pressing, throbbing pain in occiput, accompanied by nausea and vomiting; could not open eyes or move them; photophobia; obstinate constipation; violent desire for an embrace during attack.

Subject to headaches for five or six years; the pain is shooting, at a fixed point over eyebrow, generally r., but to-day over l.; pain causes twitching of eyebrow and desire to close eyes; headache is < on moving eyes, also on walking, every step seemed to jar; attacks come on suddenly and are intolerable first day, but always leave him very weak and dreading a return for a day or two; attacks excited by overfatigue, anxiety and vexation or overwork in school; occasionally severe sexual excitement with emission, not always with dreams, during sleep; this precedes but seldom accompanies headache; during headache there is inability to read, think or study; a more frequent attack of bowels, nausea, dislike to any food except toast or biscuits and tea; urine increased, nearly colorless; tenderness of bone of side of head affected and under corresponding supraorbital ridge.

Vertigo as if intoxicated; tension in forehead and pressure as from a weight over eyes; pressure and burning in eyes and fog before r. eye (is blind in l. eye), lassitude; leucorrhœa, milky white, < during day.

Violent stitches in forehead, cries out; they distort his face; stitches return every five minutes during the day and night with unabating force, and extend into l. eye and ear; lachrymation; painfulness of scalp; cannot find an easy position for his head; every noise aggra-

Google

vates his symptoms; talking in the room is unbearable, cannot sleep.

‖ Headache every Saturday for several years; boring pain from within outward, accompanied by nausea and vomiting; > binding head up tightly and after a good sleep.

‖ Periodical headache coming on at 2 P.M., lasting till bedtime.

‖ Headache in terrific shocks.

‖ Dull, stupid headache, with great mental depression; anæmia.

‖ Shooting from forehead to vertex and both sides of face.

‖ Chronic congestive headaches with photophobia and impossibility to open eyes on account of weight on upper lid.

‖ Gouty, or nervous headaches, from abdominal plethora or menstrual disturbances.

‖ Headache with aversion to all food.

‖ Chronic paroxysmal headaches in women during climaxis; disorders of digestion, abdominal plethora and leucorrhœa.

‖ Attacks of sick headache and sudden obscuration of sight with each attack.

‖ Every time she goes shopping she has a severe nervous headache.

‖ Attacks of gouty pains in head, boring in character, causing patient to scream with pain, accompanied by vomiting.

‖ Congestive, gastric, hysteric, nervous and rheumatic headaches.

‖ Clavus hystericus.

‖ Headache with aversion to all kinds of food, a feeling of emptiness and goneness in pit of stomach, very distressing; headache occurring every morning with nausea, vertigo, epistaxis; in women who have moth-patches on their foreheads, of sallow complexion, or who have a yellow streak across bridge of nose and under eyes; smell of food repulsive.

‖ Hemicrania from an affection of reproductive system; especially in young women in whom the cerebral nerves have excited the sympathetic, producing a long train of hysterical symptoms.

‖ Boring stinging over r. eye, < in a thunderstorm, in cold air, north wind, taking cold on head, etc.

‖ Losing hair after chronic headaches.

‖ Chronic meningitis, headache < when lying down; > by remaining in a sitting position; when pain increased a sensation like globus hystericus; all coverings

Digitized by Google

of neck felt too tight; fulness, pulsation and beating in head; had her fingers continually on dress covering neck even when it was wide, the very touch of it distressed her.

‖Meningitis; the child is in a torpid condition, with great depression of vital power; urine has a putrid odor and deposits a clay-colored sediment which adheres to vessel or diaper.

‖Rush of blood to head.

‖Apoplexy: in men addicted to drinking and sexual excesses, with a disposition to gout and hemorrhoids; in women from affections of reproductive system; venous form; headache coming on in terrific shocks; dizziness in walking, with staggering; forgetfulness; coldness of feet; intermitting pulse.

‖Threatening apoplexy in dissipated, middle-aged men who are plethoric, have a large fat abdomen, and are subject to arthritic and hemorrhoidal complaints; they have usually passed through several slight attacks of apoplexy and are frequently visited by the prodromic symptoms.

Outer Head. ‖Involuntary jerking of head backward and forward, especially forenoons and when sitting.

‖Fontanelles remain open, with jerking of head, pale bloated face, stomacace, green diarrhœic stools.

‖Sensation of coldness on vertex, < when moving head and stooping; > when at rest and in open air.

‖Disposition to take cold from dry, cold wind or getting head wet.

External coldness of head.

Swelling on forehead.

Swelling on one side of head above temple, with itching; sensation of coldness and tearing in it, < when touching it; > when lying on it or after rising from bed.

‖Sweat on head smelling sour, with faintish weakness in evening before sleep or in morning.

‖Scalp pains when touched as if roots of hair were sore.

Itching of scalp.

‖Violent itching, like from insects, on occiput or behind ears.

Small red pimples on forehead, roughness.

‖Eruption on vertex and back part of head dry, offensive, stinging, itching and tingling with cracks; feeling sore when scratching; falling off of hair.

‖Sensitiveness of roots of hair, < in evening, to contact, to cold north winds; burning after scratching.

‖Dandruff comes in circles, like ringworm. θHerpes.

‖‖Great falling out of hair. θClimacteric period.

Google

‖Scurfs very moist, almost constantly discharging puslike fluid.

‖Much scurf on head; moist scalp; tinea tonsurans.

‖Sensitiveness of roots of hair, < in evening, to contact, to cold north winds; burning after scratching.

‖‖A boy, æt. 9, had a bald spot on front part of head as large as a silver twenty-five cent piece, of glossy smoothness, hair around appeared as if cut short near roots, place covered with dry, crusty scales; soon after a similar spot on r. side of head; finally four bald spots differing in size from a dollar to a quarter.

‖‖The large coils of hair, for a distance of about two inches from head, became kinky so as to make combing of this part of hair an impossibility; there was no moisture about scalp on these places, nor was the hair itself tangled; the smaller coils at sides of head showed this condition also in the lower third of their length; menses absent; congestion of blood to head and chest; face red; headache.

Sight and Eyes. ‖Vanishing of sight; vision impeded by fiery zigzags or sparks (whooping cough); flickering before eyes when looking into light; green halo around candlelight; ‖‖black spots

Candlelight fatigues eyes when reading or writing by causing a contractive sensation.

Cannot bear reflected light from bright objects.

‖Gauze, black spots, or stripes before eyes.

‖Dulness of sight; when writing; sees only one-half of object clearly, the other half is obscured.

‖Great sensitiveness to light of day.

‖Prickling of eyes, evening by candlelight.

‖Asthenopia: associated with exhaustion dependent upon loss of semen; dependent upon reflex irritation from uterus (kopiopia hysterica).

‖‖Mr. B., æt. 32, sick several months; has abused eyes by reading, writing, sewing; trouble began in r. eye, which is the worse; sensation as if eye were gone and a cool wind blew out of socket; severe pains and itching around back of eye, when closing eyes flashes of light; mist like a veil or cloud before eye; < in strong light; using eyes causes intense headache over them; desire to spasmodically close eyes, which gives relief; menses regular, accompanied by severe bearing-down pain, with pain in hips and back and sexual excitement; feeling of weight and heaviness of upper lids as if she could not raise them, < in morning. #Asthenopia.

‖Obscuration of vision dependent upon hepatic derangement.

Google

‖‖Astigmatism from granular lids, on reading, black seemed grey; sight > when looking out from under brows, pain on using eyes by artificial light.

‖‖A lady, æt. 67, was suddenly attacked after taking cold, with pressing pain around eyes, < in open air; constantly sees dark figures before eyes, like spider-web or lace, of size of a hand; acute pain in orbit of a pressive character, < in open air; r. eye only so affected; sight had been gradually failing for a long time; has been subject to sick headaches all her life. θIncipient cataract.

‖‖Keratitis pust.; lashes of l. eye gone and edges of lids raw and sore, considerable purulent discharge from eyes, face covered with an eruption, child cries on washing.

‖Very large pustules around cornea with much redness, no pain or photophobia, < in evening, corners of mouth cracked.

‖Keratitis parenchymatosa, with uterine troubles.

‖Pustules on cornea, also fungus hæmatodes.

‖Trachoma, with or without pannus, especially in tea drinkers.

The eyes feel tired and look injected; tendency to keep them closed.

Eyes feel sore as if bruised.

Pressure in r. eye as from a grain of sand, < by rubbing; < when pressing eyelids together.

Pressure in eyes at night.

Great burning of eyes and lachrymation.

Aching over eyes if he goes into bright daylight.

Lids pain on waking as if too heavy to open.

Itching of internal canthus morning after waking; after rubbing, biting and severe lachrymation and sore sensation in external canthus, which is agglutinated.

Biting in r. eye evenings, with inclination of lids to forcibly close.

Sticking in l. eye.

Smarting pain in both eyes.

Burning of eyes mornings with weakness afternoons.

Eyes hot and dry; feel like balls of fire.

Redness of conjunctivæ.

‖‖Inflammatory affections of asthenic character, conjunctiva a dull red, some photophobia and swelling of lids, < in mornings.

‖Acute catarrhal conjunctivitis, with drawing in external canthus and smarting in eyes, > by bathing in cold water, < morning and evening.

‖Conjunctivitis with muco-purulent discharge in morning and great dryness in evening.

Inflammation of eyes, with stitching and pressure.

Right eye inflamed; heat, vessels much enlarged, with a patch of congestion; sometimes feeling of grit in it; eyeball aches at back, smarts when reading; subject to faceache and indigestion, weight after food and spasmodic flatulent pains.

Right side of face much swollen, deep red, covered with pimples filled with pus and covered with yellow crusts; during day did not open eyes, only raised lids for an instant in the dark; rubbed and scratched cheeks and eyes; lids glued together in morning by thick matter; no appetite; much thirst; little sleep; r. eye seemed much smaller than l.; r. angle of mouth drawn upward.

Stitches in eyes; lids swollen; photophobia, can hardly open eyes; profuse lachrymation; sensation of heat in eyes; stuffiness of l. nostril; head confused, dull.

Coryza with ophthalmia and photophobia recurring often without apparent cause; lids red; spots on cornea. θScrofulous ophthalmia.

Eyes agglutinated in morning; great photophobia and pains in eyes; pustules form on cornea which suppurate and burst, leaving long-lasting maculæ; recurring attacks since a year.

Conjunctivitis; photophobia < in morning; dull redness of conjunctiva; lachrymation; swelling of lids and great heat in them.

Pustular inflammation, dependent on uterine troubles, especially when cornea is affected and inflammation is not confined to conjunctiva; drawing, aching, piercing pains, < rubbing, pressing lids together or pressing upon eye; light of day dazzles and causes head to ache; conjunctiva swollen; eyes agglutinated, morning and evening; considerable purulent discharge; edges of lids raw and sore; feeling as if lids were too tight and did not cover ball; eruption on face. θConjunctivitis.

Conjunctiva palp. injected in morning on awaking; discharge of purulent mucus; toward evening gradually increasing dryness of eye; biting-excoriating sensation in lids; photophobia; later burning pain; blepharospasmus; lachrymation suppressed; pulse hard, rapid; dull pain in forehead; during paroxysm cries aloud, and is greatly agitated; toward midnight spasm of lids ceases, pain decreases and arrested secretions reappear; brown spots in face; sediment in urine like brickdust. θConjunctivitis.

Severe conjunctivitis, every Summer for twenty years, from beginning of warm weather in Spring until its close in the Fall; much enlargement of papillæ; marked aggravation in morning and usually in evening.

Google

▮Phlyctenular conjunctivitis.
▮Follicular conjunctivitis, or a mixed form of follicular and trachomatous conjunctivitis, which is observed only during the Summer, or always < in hot weather.
▮▮Soreness in internal canthi with entropium, eyes < at night and at any time during day on closing them, the lids feel as if they were too tight and did not cover eye; scratching in eyes.
▮Amaurosis: with contracted pupils; after violent headaches.
▮Yellow color of whites of eyes. θJaundice.
▮▮Drawing sensation in external canthi, smarting in eyes > by bathing in cold water, < night and morning.
▮Drooping of lids with dull headache; feels as if he had not sense enough left to lift them.
▮Heat and dryness of margins of lids.
Eyelids pain on awaking as if too heavy, and as if he could not hold them open.
▮Lachrymation morning and evening, and in open air.
▮▮Redness of eyelids, with styes.
▮▮Nightly agglutination of eyes or dry scurf on lids on awaking.
Great itching on margins of lids.
Granulated lids, especially in tea drinkers.
▮▮Chronic ciliary blepharitis; scaly condition of lid margins; small pustules (acne ciliaris) on ciliary border.
▮Tarsal tumors.
▮▮After repeated styes, hard, indurated tarsal tumor as large as a pea, hindering motion of lid; of two years' standing.
▮Heaviness and falling of under lids as if they were paralyzed.
▮Difficulty of opening eyes in morning; paralyzed condition of lids. θPtosis.
▮▮Spasmodic entropion, with soreness of internal canthi and scratching in eyes, < at night and at any time during day on closing them; lids feel as if too tight and did not cover eyes.
▮▮A boy, æt. 12, had many little tumors on lower lids, the result of styes, which impeded movement of lids.
▮Brown-yellowish color of eyelids.

Hearing and Ears. ▮Oversensitive to noise, and particularly to music.
▮Loud sounds and humming in ears followed by loss of hearing.
▮Sudden attacks of brief deafness.
Dragging pain or stitches in ears.
▮▮Chronic otalgia, one-sided, with toothache, returns after every slight cold.

Google

‖Discharge of thin matter from ear.
‖Much itching in affected ear.
‖Swelling of and eruptions on external ear.
‖Tetter on lobes of ear, behind ears and on nape of neck.
‖Stitches in parotid glands, which swell, with tensive pain on turning head.
‖‖Stitches into r. ear, going into brain, commenced several days ago, at 9 A.M., while working in field, l. ear affected first; stitches < at night; small pustules on l. wrist, which, when opened, discharge a milky fluid; before this had panaritia of l. thumb and middle finger; since typhoid fever has been more sensitive to changes of weather, for the last few years bee-stings bother him more than they used to do.

Smell and Nose. ‖Great sensitiveness to odors.
‖Loss of smell, or fetid, subjective smell.
‖Nosebleed: during menses; during menses, in young girls; during pregnancy and with hemorrhoids; after slightest blow or when becoming overheated in slightest degree.
Nose dry; every symptom of cold in head; stuffed nose.
Dry feeling in nose and fauces.
Frequent sneezing without coryza.
‖Dry coryza, especially of l. nostril.
‖Fluent coryza with sneezing, early morning.
‖Blowing of large lumps of yellow-green mucus, or yellow-green crusts, with blood from nose.
‖‖Dry coryza; nostrils sore, swollen, ulcerated and scabby; discharging large green plugs.
‖Swollen, inflamed nose; nostrils sore, ulcerated and scabby.
‖Tip of nose: inflamed, swelled, scurfy; painful eruption.
‖Extremely offensive smell from nose, profuse greenish-yellow discharge; menses scanty, preceded by yellow, excoriating leucorrhœa, < from motion.
‖‖Large, offensive-smelling plugs from nose, often so large that they had to be drawn back into mouth and expectorated, causing vomiting; offensive-smelling, greenish discharge from l. nostril; severe throbbing pains in forehead (relieved by *Bellad.*); of thirteen years' standing. θOzæna.
‖Catarrh: pressive pain in root of nose; sore feeling in nose on drawing air through; nose swollen and inflamed, nostrils angry and ulcerated; small ulcers in nostrils; scurfy nostrils; discharge of yellow water from nose, with cutting pains in forehead; dryness in nose and throat; dryness in choanæ (though there is much mucus in mouth) with involuntary urging to swallow; catarrhs arising from a retrocession of an eruption.

Google

‖The smell of cooking nauseates.
‖‖Yellow saddle across bridge of nose.

[8] **Upper Face.** ‖Face: puffed; pale; yellow, earthy; in morning red, in evening pale; red and flushed.
‖‖Yellow saddle across upper part of cheeks and nose, and yellow spots on face; yellow around mouth.
‖Pale, sallow, puffiness, with margins around eyes.
‖Yellowish face with dyspepsia.
‖Small red pimples on forehead; rough forehead.
‖‖Circular spots on face and under chin from quarter to half an inch in diameter; several appeared in rapid succession; spots at first bright red, later covered with a white scurf, then returning to original red color; spots are very slightly raised above the skin and attended with but little itching or sensibility; neuralgic pains shifting about in various parts of body, but more persistently located in occipital region, < remaining long in one position, at night in bed, in morning on rising; > changing position, and from slight exertion; constant feeling of languor and weariness, making least exertion disagreeable; complete anorexia. θPsoriasis.
‖Eczema narium.
‖Herpes, scurfs and black pores on face.
‖Tetters around mouth, with itching of face.
‖Swelling of under lip.
‖‖Inflammation and swelling on one side of face, from root of a decayed tooth.
‖‖Intermittent prosopalgia, with congestion of eyes and head, jerking pains like electric shocks.
‖Faceache: intermittent, with congestion of eyes and head; during pregnancy; jerking, like electric shocks upward; pain appears in morning immediately on awaking, none in daytime but severe at night, spreading over lower and upper maxillæ, radiating to vertex, occiput, neck, arms and fingers; tearing, drawing pains in face and nose, with swelling of cheeks; pains frequently extend through ear, especially l.; < by taking either hot or cold things into mouth; in delicate, sensitive, nervous women, especially when uterine functions are disturbed.
‖‖Paroxysms of facial neuralgia brought on by riding in wind and from excitement; menstrual nisus nearly always attended with neuralgic pains of greater or less severity; when wind is the exciting cause the paroxysm comes on with a chill, and when excitement, it begins with trembling; pains > from pressure, being in a warm room and lying quiet; paroxysms manifest themselves by a slight chill or trembling; cold chills run-

Google

ning down spine; neuralgic pains commence in l. temple and run over l. side of face and down ramus of l. jaw; pains are throbbing and digging; noise and odors from cooking make her <; attacks last about a day, usually < in evening; > from sleep; menses last two or three days, are dark, scanty, somewhat stringy; pain and heaviness in r. ovarian region, > by leaning forward; costive; stool alternately hard and soft with straining; emission of urine on coughing, walking or standing on her feet; urine light-colored and frequent; abdomen distended; appetite good; pain running down r. leg; < from northeasterly winds, damp weather and excitement. θFacial neuralgia.

‖Neuralgic pains in face, l. side, from abuse of tobacco.

Jerking of muscles of face when talking.

Lower Face. ▮Yellowness around mouth.

▮Great dryness of lips.

▮Moist scaly eruptions on red part of lips and on chin.

▮▮Swelling and cracking of lower lip. θHerpes.

‖Fistula in l. cheek in region of lower molars, with ulcerating circumference, size of a ten-cent piece; painless, discharges blood and pus, has lasted about a year; cough, at times with hoarseness, bloody expectoration; has lasted about two years; fine vesicular râles at l. apex; cough < in a dry east wind much more than in damp air or by getting wet; < in morning; is not so well on Sundays, being then at rest and in room, > while at work; < when lying on l. side; appetite good, thirsty in evening, sleeps well; his feet are sweaty and have an offensive odor.

‖Suspicious tubercle on lower lip as large as a bean, of cartilaginous appearance, with a broad base and frequently bleeding, looking very much like a scirrhus.

‖An epithelial cancer of lower lip far developed, had been excised; the wound healed kindly; after a few months the patient began to emaciate and to exhibit every sign of cancer cachexy; the decline was alarmingly rapid; eminent surgeons diagnosticated internal cancer; no hope of recovery was entertained.

▮Swelling and soreness of lower lip, burning pain and a prickling as from a splinter of wood. θEpithelioma of lip.

‖Carcinoma of lower lip was removed three times in the course of six months; it had again grown and was of size of a walnut, stony hard, etc.; tendency to reappearance every Spring for three years, *i. e.*, painful cracks in scars left by the operations.

‖Appearance of warts on face, one after another, until

Google

there were twelve about mouth and chin; they were rather long, quite roughed at the top, somewhat pedunculated, and speedily returned after ligation.

▮Swelling of submaxillary glands.

[10] **Teeth and Gums.** ▮▮Toothache: drawing in upper molars; in a hollow tooth, extending to ear; throbbing; stitching; all teeth painful, particularly in hollow molar, which pains as if elongated and swollen, with swelling of gums and cheeks, with which the pain ceases; drawing < if anything hot or cold is taken into mouth; during menses drawing from teeth into cheek, which becomes swollen; tearing out through l. ear, during and after eating; sticking, she could have cried; stitches in teeth and jaw extending to ear, she could not sleep at night on account of it and during day had to tie a cloth over it; with rapid decay of teeth; and throbbing in gums during menses; during pregnancy with shortness of breath, worse from every cold draft of air, when touching teeth, when talking; biting teeth together.

▮▮Paroxysmal, beating throbbing toothache; can feel beating of pulse all over body; pains > from cold water, returning as soon as water gets warm; walks about crying; when pain is at its height, tingling in fingers of left hand, becoming a tearing pain as it extends up arm and is ended by a spasmodic attack of asthma; eyelids red, burning; blowing of blood from nose; anxious, despondent, lachrymose; during pregnancy.

▮▮Toothache starts from carious teeth of lower jaw, then spreads over whole left side, with tearing pains; nausea with waterbrash; > in fresh air, < from cold water and at night; no intermissions, difficulty of speaking or chewing; fear of trismus; no swelling or abscess; hot flashes with cold feet; during climaxis.

▮▮Severe pains in teeth for several days, on one side only, extending to r. side of head; great internal heat; obliged to keep her mouth half open to cool the mouth, hence great dryness in it; afraid of tetanus.

▮▮Long-continued severe toothache, caries; l. sided, tearing, drawing pain; waterbrash during pain; < during night, especially before midnight, in bed, by cold and eating; nervousness; migraine; leucorrhœa; climaxis.

▮Chronic throbbing in teeth.

▮The teeth feel dull, are loose, bleed easily and decay rapidly.

▮Swelling of gums, dark red, painful bleeding from slightest touch.

Google

‖Gums painful as if burned.
Swollen dark red gums, with painful throbbing, as if beginning to suppurate, so severe that it was scarcely endurable.
Sore ulcerated gums.
‖Dentition: grinding teeth; dry ringworms make their appearance, or seem to brighten up at evolution of every fresh group of teeth; bad smell from mouth; aggravation of diarrhœa after taking boiled milk; very exhausting diarrhœa.

[11] **Taste and Tongue.** ‖Taste: bitter; saltish; putrid or offensive; sour in morning on waking; disagreeably bitter in morning; bitterish sour; unpleasant in morning, mouth dry and slimy; foul, as from an old catarrh; slimy, putrid; food tastes too salt; like manure; metallic; sour after eating.
Tongue and cavity of mouth feel as if scalded.
Tip of tongue feels scalded.
Soreness of tip of tongue, little blisters, sore edges.
‖Tongue painful as if sore.
‖Tongue pale, flabby and indentated. θAtonic dyspepsia.
Blister on tongue and pain as if burned.
‖Vesicles on tongue.
‖Tongue coated: white; with mucus; dirty yellow; brown, with red edges.
Talking is only a stammering.
Tongue stiff.

[12] **Inner Mouth.** ‖Offensive smell from mouth.
Sour smell from mouth.
Rinsing mouth sets her to vomiting.
Dryness of mouth, throat and tongue, which in the morning were quite rough.
‖Profuse flow of saliva.
Dryness in fauces; roughness and burning < by hawking.

[13] **Throat.** Dryness and soreness in throat at night, it feels quite parched.
Dryness in posterior nares, yet much mucus in mouth with involuntary urging to swallow.
Pressure in throat in region of tonsils, as if neckcloth were tied too tight.
‖During first sleep she often imagines she has swallowed something, which wakes her up in a fright, with a sensation as if it had lodged in her throat, sensation remains after waking.
‖Sensation of a plug in throat.
‖‖Much mucus in throat; hawking of mucus in morning.
Burning of pharynx.
‖‖Sore throat, with swelling of cervical glands.

Digitized by Google

‖Soreness and stinging in throat, with swelling of submaxillary glands.

|Pain in throat as if raw, when swallowing; also stitching and scraping from empty deglutition.

|Inflammation of throat: < on l. side; with stitching pain on swallowing; mucous membrane much swollen, but only slightly red; sensation of a lump in throat; secretion of tough, sticky phlegm causing constant hemming, with feeling of dryness in throat.

|Chronic swelling of tonsils; sensation like a plug when swallowing.

|Contraction of throat without swallowing.

‖Disposition to inflammation of tonsils, usually ending in suppuration.

‖Chronic pharyngitis; pharynx dark-red; sensation of a plug in throat, particularly when swallowing and frequently accompanied by feeling of constriction in throat; stasis of portal circulation.

[14] **Appetite, Thirst. Desires, Aversions.** |Canine hunger, or no appetite, nothing tastes well.

|Sudden craving, sudden satiety.

Thirstlessness; or much thirst in morning.

Desire: for vinegar; for wine.

|Aversion to food: particularly meat and fat; to bread, during pregnancy; to milk, which causes diarrhœa; loathing.

[15] **Eating and Drinking.** |Disordered stomach after bread, milk, fat food or acids.

|During and immediately after eating, pains are renewed and aggravated.

|After eating: acidity in mouth; eructations, empty or bitter; bloatedness of abdomen.

It creates an aversion to drinking beer.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough after a meal, lasting a quarter of an hour.

|Eructations: frequent, with efforts to vomit; bitter; sour; taste like rotten eggs or manure; after eating but little; cause blood to rise in mouth.

|Heartburn extending from stomach to throat.

|Waterbrash after eating or drinking.

‖Nausea: after eating, also in morning, fasting; from smell of food or cooking; when riding in carriage; with anxiety when exerting eyes; with weakness.

|Morning nausea as if everything in abdomen were turning round.

‖Morning sickness of pregnancy.

|The thought of food sickens her, with sense of great weight in anus.

Google

‖Nausea as if viscera were turning inside out; inclination to vomit in morning when rinsing mouth.

‖‖Vomiting: of food and bile in morning; of milky fluid; during pregnancy; frequently strains her so that blood comes up; of mucus, caused by taking even simplest food.

[17] **Scrobiculum and Stomach.** ‖Sensitiveness of pit of stomach to touch.

‖‖Peculiar faint, sinking emptiness or goneness at pit of stomach.

Pressure in stomach: as from a stone; as if it were sore internally; after a meal and from touch.

‖‖Beating at pit of stomach; sour stomach; fiery zigzag before eyes; metallic taste in mouth; cracking in knee and ankle joints, and painful cracking in occiput.

‖Painful sensation of emptiness in stomach and abdomen.

Uneasy sensation in stomach, cannot describe sensation.

Slight pressure on region of stomach causes great pain.

Painful sensation of hunger in stomach; has to eat something in night or early morning.

Violent pressure under l. ribs passing off when lying down.

‖Pain in stomach after simplest food.

‖Cramp in stomach.

‖Stitches or burning in stomach.

‖Beating in pit of stomach.

‖‖Twisting in stomach and rising in throat, tongue becomes stiff, speechless, body rigid. θHysteria.

‖Pain in stomach < by vomiting; extends to back, with anxiety.

‖Dyspepsia from injury by overlifting.

Cutting, boring, from region of stomach toward spine.

‖Hardness in pyloric region.

‖‖Attacks of a severe cramping pain commencing in pit of stomach, pain goes to r. side, under short ribs, comes in paroxysms and when at its height is almost continuous until she vomits a sour and then a thick fluid substance; generally no nausea, nor does she vomit until she takes something to make her vomit; countenance a dirty-yellow, with distinct eruptions near hair on forehead; dark urine becomes clear as soon as pain leaves; after an attack of pain, is very hungry and eats enormously; the attacks last about six hours or until relieved by vomiting; no day passes without an attack; when at its height pain goes through to back, between shoulders; at times pain commences between shoulders; thirst after spell passes off; breath offensive; constipation; stool in hard, green lumps.

‖Acute catarrh of stomach, especially in young people;

Google

pain in forehead; violent fever heat; inclination to sleep, with restless tossing about; complete anorexia; white or yellow fur on tongue, without lustre; small blisters on edges, sometimes red spots on surface.

‖ Vertigo at night with vomiting of bile and food; shivering, heat with great thirst; gums sore behind incisors; pressure in stomach; stitches in r. hypochondrium on touch; constipation, stools hard, difficult, followed by burning in anus; oppression of chest; sleeplessness; itching eruption on hands and thighs. θGastric fever.

‖ Since several days fever; drowsiness; vomiting of green slime; lips dry; smell from mouth as of sour milk; urine and perspiration have same smell; perspiration only partial. θCatarrh of stomach.

‖ Digestion poor, frequently disordered; loss of appetite; pressure in stomach; diarrhœa alternating with constipation; hemorrhoids bleed profusely; menses too profuse, lasting eight to ten days; tearing pains in head, teeth and limbs on change of temperature; gums swollen, bleeding; frequent pains in throat; at times itching all over body and eruption of small pimples; eyes red, inflamed; earthy-colored face; despondency.

‖ Vomits all her food; painful sensation of emptiness in stomach; sleep broken and unrefreshing; costive, stools knotty and difficult, has scarcely been moved for two years without an injection; urine cloudy, offensive, a hard crust difficult to scrape from vessel.

‖ For some time pressure in stomach, and drawing from stomach through r. chest into shoulder, one hour after eating; > by loosening her dress and eructating; appetite good; no thirst; hypochondriasis; falls asleep late; dreams constantly and feels unrefreshed in morning; tires easily; feels < in snowy weather.

‖ Digestion excites heat and palpitation of heart.

‖ Beating at pit of stomach; sour stomach; fiery zigzag before eyes; metallic taste in mouth; cracking in knee and ankle joints and painful cracking in occiput.

[18] **Hypochondria.** In region of liver: fulness; pressing; sore pain; dull stitches; frequent stitches; stitches when riding.

‖ Stitches in l. hypochondrium.

‖ Pain in liver after moving.

‖ Sensation in hypochondria as if ribs were broken and sharp points were sticking in flesh.

‖ Sensation as of a strap as wide as her hand drawn tightly around her waist, in evening, after supper.

‖ Dull, aching pain all around body and feeling of something hard boring through liver; spasms in liver, which catch breath; fulness as if bursting, > by urination.

Google

Hepatic neuralgia, with great depression of spirits; weight, fulness and tightness in region of liver.

Stitching, pressing pains in hepatic region, extending thence to region of r. shoulder; vesical tenesmus; yellow spots on forehead and over bridge of nose; urine reddish-brown, containing a thick, whitish-yellow mucus; heaviness over eyes and in nape of neck; uterus anteflexed.

Persistent febrile condition; very weak, keeping his bed; extreme depression of spirits and irritability of temper; occipital headache; sudden excessive desire for food, but eats only a small quantity; two or three stools daily and one or two at night, of normal consistency, but clay-colored and offensive; successive outbreaks of furuncles on nates; on r. side of abdomen, just below arch of ribs, a very tender spot which is the seat of constant pain; whole r. hypochondrium tender and heavy; aching in r. shoulder; restless sleep; urine has a pink deposit; heavy sweats at night. θFunctional derangement of liver.

Remittent febrile condition with evening exacerbations, no chills, pulse at 11 A.M. 96; aching weight and soreness in r. hypochondrium, and distress and aching in r. shoulder and scapula; cheeks flushed; forehead and conjunctivæ yellow; irregular yellow patches on forehead; lassitude; limbs and back ache; obstinate constipation; occipital headache; anorexia, loathes fat and milk; thirst; tongue flabby and indented; great flatulence after food; restless sleep; dry, hot skin; urine scanty and loaded with urates. θFunctional derangement of liver.

A woman subject to gall-stones, two attacks of shivering, the last at 3 A.M., followed at 7 A.M. by pain in liver, afterward going across to stomach and spleen and around back; liver > by lying on it; pain > by eructations, she feels it would be better if she could pass flatus downward.

Jaundice, with pain in hepatic region.

Jaundice, with stitching pains in forehead, epigastrium and small of back; tearing pains in knees and feet; cannot sleep at night, must constantly change position of legs; lassitude; great thirst; urine stains yellow.

Mrs. R., æt. 51, black hair and thin, has had jaundice for three months; has been for some weeks confined to bed; when pregnant seventeen years before had same illness for several months; appetite poor; no thirst; stool every day, whitish; urine like dark tea, with greenish sediment; sleeps badly and has difficulty in

falling asleep; heat, sweat and twitchings, especially in bed; liver much enlarged, smooth and not sensitive; about every two weeks has an attack of gall-stone colic; she lies upon her back; looks wretched, face yellowish-grey, apathetic and silent.

[19] **Abdomen.** In abdomen: sensation of emptiness; lax feeling, after stool; soreness and pain as if menses would appear; pain and weight on rising in morning; pain and tenderness; heaviness; sensation of a load, during motion; drawing tensive pressure; bearing down with menses; feeling of crowding and pressing downward; pressure as if everything would issue through vulva; pressing; cutting; stinging; burning; coldness.

Feeling of bearing down of all pelvic organs.

Pelvic distress through night, > by lying on either side, with legs flexed on thighs and thighs on abdomen.

Distress in hypogastric region as of overdistended bladder; < sitting and lying, > on walking about.

Severe pelvic pain, commencing in sacrum, passing forward and down to r. knee.

Bearing down in pelvic region, with dragging pain from sacrum; pain extending into loins and down thighs.

Frequent attacks of contractive pain in r. side of abdomen, < in morning; following this, more constrictive pain in stomach; thence the pain extends to chest; > by eructation.

In r. side of abdomen: severe stitches; pressing pain.

Distension of abdomen; puffed after dinner; loud rumbling noises; distension of lower portion.

Feeling as of something adherent in abdomen, with hiccough.

Spasmodic contractions in abdomen, with terrible bearing down.

Flatulence from lack of bile; abdomen very much distended after least bit of food; constipation.

Colic: with great distension and sensitiveness of abdomen; recurring toward evening; colic and faintness before menses.

Pot-belliedness of mothers.

Soreness of abdomen in pregnant women.

Many brown spots on abdomen; chloasma.

Neuralgia of plexus mesogastricus; burning, boring pains; abdomen greatly swollen and very sensitive to touch; terrible anxiety; attacks came on in evening.

Pain in abdomen, > by hot flannels; loss of appetite; cannot always swallow solid food, must take it out of mouth; riding causes pain in hypochondria, abdomen and lumbar region, with desire to lie down; full feeling

Google

from abdomen to throat; comes on from 11 A.M. to 1 P.M., and then lasts all day; > by resting.

‖ Supposed tænia; complains several times a day of rolling in abdomen, as if something alive were there, with spasmodic griping in præcordial region; it then rises upward in her throat; tongue becomes stiff; she loses her voice, and whole body becomes stiff; no appetite; abdomen always tense; stools irregular; menses painful, scanty, irregular.

| Empty, gone feeling in epigastrium, common to patients with tapeworm.

[20] **Stool and Rectum.** | Stools: jelly-like, with colic and tenesmus; green mucus; sour-smelling; debilitating; bloody; oozing almost constantly from anus; expelled quickly; frequent; not profuse; fetid; sour; putrid; whitish; grey.

| Diarrhœa, < after drinking milk; rapid exhaustion.

‖ Discharge of blood with stool.

| Before loose stool: nausea; colic.

| During loose stool: prolapsus ani; jerking pains from anus upward through rectum.

| After loose stool: exhaustion; debility; prolapsus ani.

‖ Feeling as of a weight in anus, during stool and for an hour after.

| Stool has a putrid, sourish, fetid smell, expelled suddenly and the whole of it at once.

‖ Summer complaint, sunken eyes and face; emaciation; heat of palms of hands and soles of feet, green stools, but little pain.

‖ Painless diarrhœa, of three weeks' standing, four or five stools in twenty-four hours; evacuations dark brown, pappy, very offensive, coming very suddenly; loss of appetite, tongue thickly coated; frequent belching, particularly after eating; meteorism.

‖ Painful diarrhœa of several years' duration, extreme emaciation; great disturbance of digestive organs; whole nervous system greatly prostrated.

‖ Chronic diarrhœa in women who suffer from leucorrhœa, hysteria, hysterical hemicrania, sudor hystericus, transient flushes of heat, frequent chilliness, particularly when at stool, and whole facial expression indicates uterine disturbance.

| Stool insufficient, retarded, like sheep-dung.

| Pain in rectum during and long after stool; involuntary straining.

‖ Constipation: during pregnancy; slow and difficult discharge even of soft stool; stools hard, knotty, insufficient, scanty, like sheep-dung; stools difficult, covered

Google

with mucus; stool retarded with discharge of blood; in pregnant women and in children where manual assistance must be rendered in consequence of excessive straining; with dyspepsia and chronic affections of stomach; chronic or obstinate, especially after failure of *Nux vom.* and *Sulph.*; especially in women, or persons subject to rheumatism; discharge of blood with stools.

During constipated stool: pain in rectum extending to perineum and vagina; shooting and tearing in rectum and at anus; prolapse of anus; sense of weight at anus; terrible straining to pass stool, which is covered with mucus; bloody discharge.

After constipated stool: sensation of weight at anus; hemorrhoids.

Chronic constipation of forty years' standing, in a lady æt. 76, had become so inveterate that she never had a natural evacuation.

No stools excepting under influence of purgatives; no movement for several days; abdomen swollen; congestion to head; great torpidity of intestinal canal.

Hemorrhoids: painful sensation of emptiness in epigastric region; delicate and sensitive skin; protrusion of varices and of rectum, with difficult micturition; heat, burning and swelling of anus when piles do not protrude, defecation excessively painful, stool being rather small, narrowed by diminished calibre of anus; sometimes fecal mass is triangular and very painful; constant oozing of moisture from anus; stitches and jerkings from anus upward into rectum and abdomen.

Pain in rectum: extending to genitals; as from contraction; burning, the entire day; soreness; stitches.

Itching in rectum and anus.

Prolapse of rectum, < from smoking.

Cancer of rectum.

Sense of weight or ball in anus, not > by stool.

Soreness in anus.

Congestion to anus soon after dinner.

Heat, burning and swelling of anus.

Constrictive pain in rectum extending to perineum and into vagina; pain in rectum on going to stool, persists a long time after sitting down, and finally an imperfect stool is voided, with sore, smarting pain, weight in anus, like a constant drag. θFissure of anus.

Anus encircled by a ring of condylomata.

Expulsion of ascarides.

Oozing of moisture from rectum; soreness between buttocks.

Google

[21] **Urinary Organs.** Feeling as if bladder were full and contents would fall out over pubes, with constant desire to push them back.

Pressure on bladder; with burning after micturition, in evening; in morning, and urging to urinate, urine passing only after waiting several minutes; and frequent micturition with tension of lower abdomen.

Burning in bladder and forepart of urethra.

‖Smarting in urethra.

‖Frequent and strong urging to urinate, with painful bearing down in pelvis, in morning; sensation referred to neck of bladder; must rise frequently at night.

‖‖Urine: clear like water; thick, slimy, offensive, depositing a yellowish, pasty sediment; with much white sediment, fetid; cloudy and dark, as if mixed with mucus; scanty, red deposit; sour-smelling; high-colored, looks like powdered brick; dark-red; deposit of a white, adherent film; turbid, clay-colored, with reddish sediment; blood-red, with white sediment and a cuticle on surface; with dark-brown admixture; lithiasis.

Occasional stitches along urethra.

‖Urging to urinate from pressure on bladder.

‖‖Involuntary discharge of urine at night, especially during first sleep. θEnuresis.

‖Mucous discharge periodical, not at each micturition; sometimes pieces of coagulated mucus clog up urethra.

‖Smarting in urethra, when urinating.

‖Difficulty of urinating especially in morning, a feeling as if drops came out of bladder.

‖‖Pressure on bladder and frequent micturition with tension in lower abdomen.

‖Annoying itching sensation in region of bladder, with urging to urinate, especially in night.

‖Only through night a drop or so discharges from urethra, staining linen yellowish.

Stitching pain in female urethra.

Discharge of mucus from urethra, not at each evacuation of urine, but periodically.

‖During and after micturition chilliness and heat in head.

‖Intense burning and cutting pain when urinating.

‖Difficulty of urinating, especially in morning.

‖‖The bed is wet almost as soon as child goes to sleep, always during first sleep.

‖‖Urine passed within space of two hours after going to bed, during first sleep.

‖Nocturnal enuresis: boys of light complexion; with onanists.

‖‖Constant pressure on bladder with urgent inclination to

Google

pass water; sensation as if bladder and urinary organs would be pressed out, > by standing or sitting with legs crossed or by lying down; if desire to pass water is not immediately complied with, urine passes involuntarily; urine scanty, sometimes only a few drops, sometimes clear, generally thick and muddy, with a very adhesive brickdust sediment; no pain before or during passage of water, but immediately after, a sharp, shooting pain passes from l. side of urethra to a spot half way between sternum and shoulder on a level with the second rib on l. side, a sore pain constantly remaining in that spot, sensitive to touch or pressure; sleep very much disturbed at night from having to urinate as often as every half hour; dreams of urinating, and finds on waking an urgent desire to do so; weakness and aching in small of back. θIrritable bladder.

‖ Very urgent desire to urinate and difficult discharge throughout day and several times each night, but particularly for some hours after rising in morning, with a feeling of bearing down in region of bladder, above os pubis; constant soreness throughout urethra, bladder and vagina; sore spot to l. of pubis, above Poupart's ligament, near ovarian region, especially tender on pressure; soreness disappears suddenly for a day or two, returns and is most violent during menses, when entire vesical and uterine region burns and aches; constant tickling in bladder; something seems to move in bladder like a worm and causes tickling; sensation of enlargement of bladder (subjective) which seems to fall from side to side; menses appear regularly but very painful, with bearing down; discharge is profuse, blood light-red without clots; pains resemble labor pains, is obliged to brace her feet; this condition lasts two days, after which soreness reappears in l. side mostly; depressed in spirits, owing to tormenting desire to pass water, which prevents her leaving home; sleeps well but has bad dreams; feels bright on awaking till she rises only to be tormented by constant desire to void urine; appetite good but food causes pressure in stomach, with frequent fulness in epigastrium; later, thirst; oppression of respiration, which is sometimes sighing. θChronic cystitis and irritability of bladder.

Male Sexual Organs. ‖ Increased sexual desire with weakness of genitals; profuse sweat particularly on scrotum; itching around genitals.

Continued erections at night.

‖ After coition: great weakness; weakness in knees; urethra burns.

Google

Nightly emissions with sexual dreams; great despondency; sensitive to cold, damp air, it chills him through and through.

During coition insufficient erection and but little thrill; after it great weakness.

Weak and watery pollutions.

After emission burning in forepart of urethra, languid and drowsy.

Emissions after onanism; despondency, relaxation of body.

Very debilitating seminal emissions nearly every night; frequent one-sided stitches in forehead; constant offensive sweet taste in mouth, which is always dry, but without much thirst; stools hard; pain in abdomen as soon as inclination is felt for stool; feeling of tiredness and restlessness in legs, particularly calves.

Cutting in testes.

Swelling in scrotum.

Prepuce ulcerates and itches continually; cracks on foreskin.

Indolent chancres; on glans and prepuce.

Burning, itching, humid or scurfy herpes præputialis; chappy herpes, with a circular desquamation of skin.

Eruption on glans.

Itching and dry eruption on genitals.

Profuse yellowish-white discharge from urethra. θGonorrhœa.

Gonorrhœa after acute symptoms have subsided; urine is loaded with urates, staining everything red and often excoriating and very fetid, associated with prostatitis.

Gleet: no pain, discharge only during night, a drop or so staining linen yellowish; yellowish discharge, no burning on urinating; painless, of a year and a half's standing, orifice of urethra stuck together in the morning; particularly where sexual organs are debilitated by long continuance of disease or through frequent seminal emissions; of two years' duration.

Condylomata completely surrounding head of penis.

Female Sexual Organs. Sterility.

Sexual intercourse is intolerable.

Jerking pains in vagina from below upward in morning on waking.

Contractive pain or almost continuous stitches in vagina.

Tenderness of sexual parts to touch.

Redness, swelling and itching eruption of inner labia.

Married fourteen years without conceiving, irregular and scanty menses, followed by leucorrhœa; nausea, disgust for food: frequent desire to urinate; a bearing

down or drawing pain in lumbar region; pain in l. side of face, disposed to weep and think married life a blank.
Pressure and heavy weight or dull, heavy pain in ovaries.
‖Congestion; stinging in ovary; pain in ovarian region running outward and backward.
‖Neuralgia of ovaries and appendages; stitching or burning pains.
‖Indurated ovaries.
‖Induration of neck of uterus.
‖Dropsy of uterus.
‖Ulceration and congestion of os and cervix uteri.
‖Induration of cervix uteri, with stitching pains extending upward.
‖For three or four months previous to last confinement, suffered from great distension of abdomen with pain and soreness; one month previous to confinement labor-like pains with discharge of serous fluid; pains subsided and returned again every three or four days until her confinement; thinks she must have discharged at least three gallons of fluid during four weeks; child was alive, after seven months, great distension of abdomen with pressure and bearing down, especially when standing or sitting a long time, a feeling as if contents would issue through external organs; general soreness through bowels; occasional discharges of serous fluid, similar to those before confinement, gushing out with force; feeling of soreness in uterus and external organs; urine scanty, high-colored, with frequent inclination and involuntary discharge when coughing or sneezing; darting pricking pains through hips and sides, sometimes shooting down to bones of pelvis; pains in back and extremity of sacrum; general debility; easy perspiration from least exercise; night sweats; sometimes flushes of heat at night followed by chill; poor appetite; bowels loose, several thin evacuations daily; neck of uterus low in pelvis, nearly as large as at eighth month of gestation. θHydrometra.
‖Burning, shooting, stitching pains in neck of uterus.
‖Constant sense of pressing into vagina; crossing limbs to prevent prolapsus.
‖Painful stiffness in uterine region.
Pressure in uterus, causing oppression of breath; pressure downward is as if everything would fall out, accompanied by pain in abdomen; she must cross her limbs in order to prevent protrusion of vagina, yet nothing protrudes, increase of gelatinous leucorrhœa.
Prolapsus uteri, with inclination of fundus to l. side, producing a numb feeling in lower half of l. side of body;

Google

dull aching pain; aching in pelvic region somewhat > by recumbent posture, especially when lying on r. side; tenderness of os uteri.

|| Acne on face < before menses; perspires easily, hands moist, perspiration of strong odor, not removed by bathing; urine of very disagreeable odor and depositing sediment adhering to vessel; almost constant severe backache with pains through both ovarian regions, < on l.; frequent headache and stitching pain in vagina. θ Displacement of uterus.

|| Frequent urging to urinate, with scanty discharge; stools tardy although soft; fulness and pressure in pelvis; pressure toward genitals as if everything would fall out; abdomen bloated, as if pregnant; uterus prolapsed, vaginal portion lying between external labia; os uteri open.

|| Vaginal portion of uterus swollen, dry, protruding from between labia; os uteri open, admitting point of index finger, internal os closed; body of uterus fills up pelvis; efforts at manual replacement futile; during twelfth week of pregnancy.

|| Confined two months ago; womb at vulva; unable to sit up, on attempting it violent bearing down; emaciation; loss of appetite; empty, deathly sensation in epigastrium; feeling of weight in anus not > by stool; claylike sediment in urine; fever in afternoon.

|| Face pale; yellow spots on face and saddle across nose; throbbing headache every morning on waking and lasting all day; desire to urinate very frequently; abdomen naturally was very large and she was greatly annoyed by rumbling in abdomen; all kinds of food disagreed, causing bitter eructations; full feeling after eating; complete procidentia with dreadful bearing-down sensation, > crossing limbs.

|| For two years cough and pains in l. lung; discouraged, sad, thinks she will not recover, feels cross and irritable, especially in morning; alternate sensation of burning and coldness (like ice) on vertex; constant dull frontal headaches, has been subject to sick-headaches, usually pain centres over l. eye; empty, gone sensation at pit of stomach; loss of appetite, even smell of cooking disagrees; constipation; cutting and burning during micturition; urine deposits a claylike sediment, which adheres tenaciously to vessel; menses irregular as to time and quantity; leucorrhœa most profuse before and after menses, of a yellowish color; stitches in cervix uteri; bearing-down pain, as if everything would protrude, must lie down or cross her limbs; cough dry and hacking, most in morning, no expectoration; stitches

Digitized by Google

to l. scapula, < by coughing, inspiration, touch, > by gentle pressure; weakness of back, it gives out in walking; much heat and pain in sacrum; all symptoms < in morning, > in evening. θProlapsus uteri.

‖‖General health much impaired; nerves weakened; constant pain in back and pelvic region; extremely painful menstruation; general depression of spirits; is convinced no one understands her case, and that she cannot be cured; uterus retroverted, os uteri pressed high up against os pubis, fundus low down in hollow of sacrum; slightest attempt to replace organ gave such severe pain as to make all such attempts futile.

‖‖Sensation of weight in rectum not > by an evacuation and a sensation that limbs must be crossed to prevent everything being pressed out of vagina.

‖‖Prolapsus: of uterus; of vagina; with constipation.

‖‖Pain in uterus, bearing down, comes from back to abdomen, causes oppression of breathing; crosses limbs to prevent protrusion of parts.

‖Stitches or shooting, lancinating pains mostly in neck of uterus go up to umbilicus and pit of stomach.

Uterine pains very severe; the uterus feels as if clutched and then suddenly relaxed, causing nausea.

‖‖Metrorrhagia, during climacteric age or during pregnancy, especially fifth and seventh months.

‖‖Menses every four weeks, very profuse for five days, dark, slimy, flowing more profusely at night when in bed and sleeping; preceded two weeks by severe pain in small of back; during catamenia a dull, sickish pain in pubic region, with bearing-down pain and aggravation of that in back, which is > by flow when very abundant; after menses, leucorrhœa, yellow and thick and pain in small of back for two weeks. θMetrorrhagia.

‖Before menses: sadness; acrid leucorrhœa; especially in young women; violent colic, shuddering all over body whole day; sensation as if vulva were enlarged and soreness in perineum.

‖Mania from profuse menstruation.

‖Dysmenorrhœa in women with scanty menses; half-sided headache; weakness of eyes; nausea; constipation.

‖‖Menses regular but accompanied by hemicrania, nausea and vomiting, and great prostration, so that she must lie down.

‖During menses: sadness; toothache; headache; obscuration of sight; violent pressure in forehead, with discharge of plugs from nose; bleeding from nose; soreness of limbs; tearing in tibia; colicky pains.

‖‖Day before menses frequent chilliness and pressure in

abdomen; night previous dry heat in body, restless sleep, with frequent starting and screaming; in morning crampy drawing down along thighs; some hours previous to appearance of menstrual flow pressure in abdomen becomes a violent pain in umbilical region as if intestines were drawn into a lump; frequently faints, and pain continues until menses appear; after menses, mild leucorrhœa. θDysmenorrhœa.

‖‖Menses: too late, scanty; too early, scanty; preceded by violent aching in abdomen; causing faintness, chilliness and shuddering; eight days too early, scanty, appearing only in morning; a week too soon and lasting only one day; five days too late; regular, but scanty and flow dark; only in morning.

‖Insufficient or retarded menses in feeble women of dark complexion with fine, delicate skin and extreme sensitiveness to all impressions.

‖‖Scanty menses preceded by abdominal distress, pain in back and palpitation; constipation with discomfort in rectum; itching papular eruption on chin, cheeks and temples.

‖‖For fifteen months, pain in kidneys, slight leucorrhœa, deficient menses, little appetite, difficult digestion, profuse perspiration of hands and feet, chilliness of lower extremities.

‖‖Great lassitude and tiredness; loss of appetite; belching of wind; disturbed sleep; despondency; pressure in stomach when eating; pinching pains in epigastrium extending to pubes; menses very irregular, scanty, appearing but three times in twelve months; sensation as if something heavy would force itself from vagina; yellow spots on face and forehead; cervix uteri broad and thick but not sensitive to pressure.

‖‖Amenorrhœa: at age of puberty or later; from a cold; in chlorotic women; in feeble women with delicate, thin skin.

‖‖Amenorrhœa: every eight to fourteen days in afternoon and evening, severe burning and stitching pains in centre of chest < from deep inspiration, lasting several hours; lassitude; palpitation of heart, when walking rapidly or ascending steps; bitter taste; loss of appetite; constipation; sensation of fulness and at times cutting pains in abdomen.

‖When menses fail to appear in mothers who do not nurse; abdomen remains very large.

‖‖For three years in place of menses profuse leucorrhœal discharge.

‖Amenorrhœa and profuse yellowish-green leucorrhœa.

Google

Between menstrual periods a peculiar offensive perspiration (sudor hystericus), with a pungent, offensive perspiration in axilla and soles of feet.

Tenderness of vagina; painful coition; blood from vagina after coition.

Leucorrhœa of a yellowish, excoriating character, sometimes attended with a burning sensation; heat and pain in sacrum; menses a dirty-brown color; offensive, mucopurulent sputa; abnormal nasal discharge. θVaginitis.

Vaginitis in a blonde child, 5 years old.

Burning pain in rectum, could hardly sit on a chair, same pain in vagina and at vulva; constipated, headache, vertigo.

Great dryness of vulva and vagina, causing a very disagreeable sensation when walking, after cessation of menses.

Diphtheritic ulcers in vagina and on labia.

Brown-reddish color of vagina.

Redness, swelling and itching eruption on inner labia.

Soreness and redness of labia, in perineum and between thighs.

Pruritus vulva.

Troublesome and severe itching of vulva, with pimples all around; painless vesicles in outer parts of vulva.

Severe itching of vulva; labia swollen with humid eruption.

Leucorrhœa: bloody, slimy; yellowish; yellow; like milk; especially profuse after urinating; profuse lumpy, fetid mucus; acrid, with soreness of pudendum; looking like pus; clear as water; green red; during pregnancy; yellow or greenish water; of bad-smelling fluids; at climacteric period; at puberty; with stitches in uterus; with itching of vulva and vagina; < when she has frequent eructations and retchings, face pale: especially profuse after urinating, after making an effort to vomit; only in daytime, with burning pain; pains while walking on account of soreness; with bearing down in pelvis; stinging pain in ovarian region; frequent urging to urinate; itching in genitals; with stitches in neck of uterus; terrible pain during coition; between menses; coming away in starts.

Gonorrhœa in women after acute symptoms have subsided.

Thick yellow, acrid leucorrhœa during day, none at night; fulness, heaviness and tension in abdomen; constant painful pressure in sides as from a burden.

A child, æt. 5, body emaciated, appetite gone, strength rapidly decreasing, afflicted for fifteen months with an

Digitized by Google

unceasing exhausting leucorrhœa; discharge sometimes thick and of a yellowish-green color, sometimes thin and always very profuse, running through night dress, sheet, and down into mattress on which she lay at night.

‖Induration and sensation of enlargement in mammary gland; stitches; carcinoma.

‖Scirrhous tumor of r. breast, about size of hen's egg, hard, nodulated and tender to touch; stinging pain.

‖Scirrhus mammæ; burning pain.

‖‖Sudden hot flushes at climacteric, with momentary sweat, weakness and great tendency to faint.

[21] **Pregnancy. Parturition. Lactation.** ‖Disposition to miscarriages from fifth to seventh month.

‖‖Retained placenta after miscarriage; discharges offensive, corrosive, with recurrent hemorrhages.

‖Soreness of abdomen; feels the motions of child too sensitively.

‖During pregnancy: yellow-brown spots on face; thought of food sickens her; sensation of emptiness; painful feeling of hunger; vomiting; toothache; colic; diarrhœa; costiveness; congestion to chest; palpitation; pain in mammæ; swelling of labia; too quick escape of urine; laborlike pains in seventh month; loose morning cough.

‖Terrible itching of vulva, causing abortion.

‖Labor: os half open, pain insufficient, tenderness of anterior lip of mouth of uterus, pain above pubes, as if everything would come out; shuddering with pains, can bear them > when warmly covered; shooting pains in neck of womb; indurated os uteri, dyspnœa; spasmodic contraction of os; numerous fine needlelike, darting pains, shooting upward from neck of uterus; flushes of heat; cold feet; hour-glass contraction; constant sensation of weight in anus; pain shooting upward in vagina; pain felt mostly in back; severe bearing down or forcing in back, occurring in regular paroxysms.

‖Offensive excoriating lochia; very long lasting.

‖Nipples cracked across crown, bleeding and sore, preceded by itching.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Reflex or sympathetic aphonia from functional or organic disease of uterus.

‖Hoarseness: with tickling in larynx and bronchi; with coryza and dry cough from titillation in throat.

‖Sensation of dryness in larynx.

‖Roughness and soreness of larynx and throat.

[26] **Respiration.** ‖Oppression of chest and shortness of breath, when walking.

‖Severe oppression of chest, toward evening.

Digitized by Google

After emotions of mind loses breath and gets palpitation.
Awakes in morning with great dyspnœa, covered with sweat.
Oppression of chest and cold sweat.
Is suddenly aroused from a deep sleep by asthma.
Breathing < after sleep.
Shortness of breath, < sitting a long time, particularly in a stooping posture and after motion; walks rapidly without feeling any dyspnœa, but if he is stopped gets so short of breath that he cannot speak and is seized with a feeling of deathly anxiety which disappears when he resumes his walk; sweats very easily on slightest exertion; very sensitive to cold wind; clothing oppressive after eating; very easily irritated.
Great shortness of breath, hindering her in her household work, must pause while eating to get breath; after eating pressure in stomach; oppression of breathing > in open air, < in room, morning and evening; dancing and running cause no shortness of breath.
Asthma: short, easy inspiration and long, slow, wheezing expiration.
Spasmodic asthma.

Cough. Dry cough: especially in evening, in bed, until midnight, frequently with nausea and bitter vomiting; during sleep without waking; from tickling in larynx or in bronchi, toward morning; whooping and choking, with pain in pit of stomach and scraping sore pain in larynx not felt when swallowing saliva; does not awake from her sleep, but after waking it becomes very severe and continuous; short, seems to come out of stomach; hard, concussive; short evening cough, with intermittent stitches in r. hypochondrium, with eruptions on skin, with women; as if proceeding from stomach and abdomen or from constipation, or as if something remained lodged in stomach that would not pass off; after a meal.
Cough: especially evening and morning, with salty expectoration; with rattling of mucus in chest; with expectoration only in morning or only during night; only during day; wakes one at night; with expectoration only before midnight as soon as he gets into bed, not during day; short hacking in evening, after lying down, with much expectoration of pure coagulated blood, once every minute; wakes her at night, with sensation in chest as if hollow, and smarting therein as if sore; most severe in evening after lying down; spasmodic; severe, with little expectoration, with little vomiting, evenings, when lying in bed; day and night, pain there-

Digitized by Google

from in pit of stomach; affects chest and stomach greatly; from tickling in larynx without expectoration; every evening, not ceasing until he coughs loose a little phlegm; loose in morning, with efforts to vomit; loose especially at night; with expectoration; with taste in mouth as of rotten eggs; with soreness in chest; stitches in chest and back.

Cough <: from repose; standing and sitting; lying in bed, or upon (l.) side; after walking rapidly; going up stairs; getting wet through; taking cold; cold damp air, as in churches and cellars; cold north wind; deep inspiration; eating; sour food and vinegar.

Cough and coryza with sneezing commence every morning before getting out of bed and last until 9 A.M.

Coughs phlegm loose, but cannot get it up; is obliged to swallow it.

During evening cough after lying down, he can raise > if he turns from l. to r. side.

When she cannot expectorate with the cough her breath almost leaves her.

Expectoration: profuse; purulent; offensive; fetid; green; tasting salty; only in morning.

Dry, fatiguing cough, provoked by a sensation in region of stomach, and seeming to come therefrom; or the cough comes, as it seems, from the abdomen.

Affection of lungs with hæmoptysis and cough for six years; > since appearance in face of a red papular eruption, now existing for two years; hard papulæ on a red base, without suppuration on her cheeks, forehead, nose and chin, burning, itching and smarting intensely, especially in wet, cold weather; appetite good, though food causes pressure in stomach; constipation; menses too often and too profuse; easily exhausted; backache; cough reappeared dry and hard, slight expectoration on rising in morning; constant desire to clear throat, which feels as if filled with phlegm, which it is impossible to raise; oppressed feeling through chest after a hard paroxysm of cough; nausea during and after cough; eruption not very thick on face; cough seemed to come from stomach, which felt as if it were being scraped.

Cough and dyspnœa < in dry air, fog, east and north wind; in stormy weather she is almost suffocated; in walking dyspnœa often disappears; lying on l. side is disagreeable to her; she has to lie with her head high, often sitting in bed; a warm room is oppressive; expectoration yellow or green, with salty taste; appetite moderate; no thirst; urine has a blood-red sediment; menses regular but scanty; always < before and during period;

Google

mood depressed and weeping; formerly had cough, bladder trouble, hemorrhoids, weakness of memory and melancholic state.

‖Catarrh every Winter with violent coughing; after being in a draft cough tormenting and dry; severe orthopnœa, had to sit straight up day and night, with horrible anxiety about a rattling in chest, with soreness as if raw on chest; fears to suffocate.

‖Tickling cough in bed at night, particularly before midnight; spasmodic, coming in rapid concussions, till breath is exhausted, then expectoration of mucus, with temporary relief.

‖Paroxysms of spasmodic cough resembling whooping cough, excited by tickling in chest, from larynx to stomach; daytime without, morning with expectoration of yellow, green or grey pus, or of a milk-white, tenacious mucus, generally of saltish taste.

‖Child cries each time it coughs at night; can hardly get its breath, the cough coming in such rapid succession; retching with cough, unless quickly picked up; very cross and cannot be put to sleep as usual during the day; soreness in bends of knees and elbows, on neck and behind ears, rapidly spreading and exuding an offensive-smelling serum, paining when washed.

‖Cough constant whenever child is laid down, particularly violent at night; with spasm of diaphragm and larynx as in whooping cough.

‖Child, 8 months, blonde and fat; teeth developing rapidly; cough day and night, but principally at night, with retching and complete loss of breath; cough comes in rapid succession until the breath is exhausted, then gagging and vomiting of mucus. θWhooping cough.

‖Sudden severe spasmodic cough at night, cannot get enough breath, chest constricted, retching, loud crying; early in second stage. θPertussis.

‖A poor child growing up under most wretched external conditions; characteristic ulcer on frenulum linguæ; complication with bronchitis and later lobular pneumonia. θWhooping cough.

Inner Chest and Lungs. ‖Oppression of chest.

Severe pressure in chest, evening in bed.

‖Sensation of emptiness in chest.

‖Great pressure on chest, more l. side.

‖Stitch in l. side of chest and scapula, when breathing or coughing.

‖Sensation of soreness in middle of chest.

‖Frequent sensation as if a knife were thrust into top of l. lung, then turned around with pain streaking off through shoulder.

Google

Itching and tickling in chest.
Fulness and pressure in chest.
Constriction of chest with cough.
Rattling in chest with cough.
‖Chest symptoms > by pressing on chest with hand.
‖Burning pain in a fixed spot under r. nipple; itching of external chest; dry cough when reflecting; pain < reading and thinking; rarely seminal emissions, which, however, aggravate pains; difficult expectoration of whitish mucus; sweats at night; cold knees at night in bed; slow digestion especially of acids, with sensation of weight in epigastrium; has old pleuritic adhesions in r. chest.
‖Pleuritis after a chronic headache had suddenly vanished.
‖Severe attack of pleurisy in two old men.
‖Pleurisy in a boy, æt. 6; exudation had spread over whole l. chest.
‖Severe attack of pleurisy in a young woman where *Phos.*, though apparently indicated, failed.
‖Chronic pleurisy, threatened phthisis.
‖Congestion of blood to lungs, palpitation and great anxiety.
‖Tuberculous and other chronic diseased conditions, of central third of r. lung (*Arsenicum* upper third).
‖Stretching or darting pains through central portion of r. lung.
‖Neglected pneumonia, with copious, very offensive expectoration.
‖Short, dry cough, titillation in larynx, sometimes a thick, deep voice, without metallic timbre; sensation of dryness in chest and larynx; dry, screeching, deep, hollow cough, > lying down; difficult expectoration of a little mucus, which is tough, slimy or albuminoid. θPhthisis pulmonum.
‖Sharp darting pain through r. side of chest, rather below centre of r. lung; at times very acute, preventing full respiration, then again more dull, but all the time more or less painful; after suppression of a cough some months previously.
‖Dulness on percussion in r. lung, posterior to third and fourth ribs; much pain, both dull and sharp, in that region; severe dry cough, < in evening, with expectoration in morning; chills, fever and night sweats; greatly emaciated. θPhthisis pulmonalis.
‖Complete anorexia; sleeplessness; cough with a milky-looking expectoration; fever; after a severe paroxysm of cough which lasted two hours coughed up several

Digitized by Google

cupfuls of blood and a large quantity of offensive-smelling pus; this had occurred once before; next day expectoration was again slimy, milky-looking and very profuse, with almost uninterrupted loose cough, respiration becoming easier. θPhthisis pulmonalis.

‖After relief of a chronic dyspepsia attended with sick-headache he began to suffer with uneasiness and pain just below centre of r. lung; pain increased in severity and he soon began to cough; during a very hot day without unusual effort or exposure was seized with a sense of suffocation, probably from congestion of r. lung; much pressure and sharp pain through central portion of r. chest; cough night and day; an abscess broke in lung, and he expectorated more than a pint of fetid matter; at first discharge greenish, then bloody and yellow, finally grey, excessively fetid, so profuse it came near strangling him; while abscess was gathering, chills, fever and night sweats; abscess broke, continued to cough very severely day and night; great emaciation; very pale; pulse 120; extremely feeble. θPhthisis.

[29] **Heart, Pulse and Circulation.** Heart gives an occasional hard thump.

Violent palpitation and beating of arteries in evening in bed.

‖Palpitation: after emotions; with stitches in l. side; with anxiety about things which happened years ago; on walking fast.

‖Interruption of beating of heart most after dinner, alarmed, quivering motion.

‖Wakes up with violent beating of heart.

‖Nervous palpitation > by walking fast.

‖A man, about 30, stout, healthy-looking, complains of palpitation and constipation; appetite good; no thirst; after eating, bloatedness of abdomen, anguish and palpitation, especially with alvine discharge; < when sitting down after having had a walk, never during walking or dancing; flatulency in l. side of abdomen rising upward, > by pressure; < in cold wind; cannot lie on l. side, prefers to walk with head uncovered; sweats easily, especially on feet, which often feel cold.

‖Affections of heart, with violent intermittent, palpitating and tremulous motion of heart; violent, rather loud and sometimes intermittent sounds of heart, with dulness of percussion over a larger surface; flushes of heat, redness, determination of blood to head and r. temple, with cold hands and feet; scanty urine; costiveness.

Much ebullition of blood in whole body, at night, producing restless sleep.

Digitized by Google

Orgasm of blood with congestion to head and chest.
She feels pulse beating through body, particularly through whole l. chest.
‖‖Congestion of blood to chest, with violent palpitation of heart.
Pulse: full and quick during night and then intermitting; slow during day; accelerated by motion or being angry; tremulous; intermitting.
Pulsation in all the bloodvessels.
‖‖Dropsy in consequence of valvular insufficiency.

[30] **Outer Chest.** ‖‖Brown spots on chest.
‖‖Stitches in breasts.
‖Soreness of nipples.
‖‖Fungus hæmatodes in clavicular region, bleeding profusely.

[31] **Neck and Back.** Pain constantly between shoulders and down back.
Great aching between shoulders and under l. scapula, extending into l. lung, < on expiration.
‖Pressure and stitches in r. shoulder blade.
‖Stiffness in small of back and neck.
‖‖In small of back: pain; pain and weakness; at 6 P.M. pain or great weakness; weakness when walking, from uterine troubles; pulsations; aching; pain as if sprained in afternoons and evening in bed; tired pain; pain particularly with stiffness, > by walking.
During whole menstrual period she could not sleep on account of tearing in back, chills and heat with thirst and painful contraction of chest.
Heaviness in back in morning on awaking as if she could not turn or raise herself, or as if she had lain in a wrong position, almost as if parts had gone to sleep.
‖‖When stooping sudden pain in back as if struck by a hammer, > by pressing back against something hard.
‖Stitches in back when coughing.
‖‖Pain in back across hips.
Stitches posteriorly over r. hip, for four days almost continuous; she could not lie on r. side on account of pain, when touching part it pained as from subcutaneous ulceration.
‖Aching pain across loins < on moving.
‖Aching in sacrum in evening, > by pressure.
‖Dull pain in sacrum.
‖Soreness and pain in back in sacral region.
‖Constant dull, heavy pain in sacrum and abdomen extending to thighs and legs.
Pain in sacrum extending through hips and thighs to below knee, with weakness and lassitude when moving,

Digitized by Google

especially when going up stairs, as if limbs would refuse to act before reaching top.

‖Pressing, dragging pain over sacrum and at same time over hips, burning pressure in spine extending across dorsal region and under scapula, like that produced by sewing.

‖Weakness of sacro-iliac region.

‖Belching relieves pain in back.

‖Pains extending from other parts to back.

‖Herpes circinatus r. side of neck, appearing at one time in front, then at back, then at side of neck, at times they extend about ear, swelling of surrounding parts.

‖‖Throbbing in small of back > by sitting upright, < sitting, leaning back; on turning in bed or stretching out arms a pain catches her there as if something were going to break, stopping breath. θRheumatism.

‖‖Crick in back; of eight years' standing; caused by a sudden strain when lifting; < when first attempting to move; > by continued motion; leucorrhœa; riding, a jar or a misstep hurts her back severely.

‖Is obliged to walk stooping and gets painful stitches in back by accidentally kicking foot against something.

‖Sudden stitch in back while lifting, cannot move without great pain.

‖Backache causes nausea and faint feeling while standing.

‖‖Pains in small of back after exposure to wet and cold weather; < in morning, sitting or on beginning to move about; falls asleep late and cannot lie on l. side or upon back; vertigo in morning when rising; feels uncomfortable in a hot room or when sitting too long; perspires easily.

‖‖After a severe cold, chilliness along back in evening, followed by a severe pain in back, < slightest motion of back, on account of which she must lie very quietly on back; great oppression of chest with shortness of breath and violent beating of heart; pressing pain in region of stomach; > from touch; frequent twitching of arms; pulse tense, 120; loss of appetite; thirst moderate; sweats. θPerimyelitis.

‖The spine is tender to touch on pressure.

*** Upper Limbs.** ‖Swelling and suppuration of axillary glands.

‖Humid tetter in armpit.

‖Pain as from dislocation in shoulder joint after exertion.

Paralytic drawing and tearing in arm and armpit to fingers.

‖Lameness and falling asleep of arms and fingers.

‖Drawing in arms down to fingers.

‖Bruised pain in arms.

Digitized by Google

‖Herpes on elbow (scaling off).
‖Stiffness of elbow and wrist joints.
‖Stitches in joints of arm, hands and fingers.
Tensive pain in metacarpal joints of fingers, particularly during flexion.
‖Red, hard spot on skin covering first and second metacarpal bones, rapidly spreading over dorsal surface of hand; scales formed upon the red base falling off in centre and renewed toward periphery.
‖Scaly tetter on backs of hands; < in cold weather.
‖White scaly tetter on back of hand and fingers.
‖Itch and scabs on hands; soldier's itch.
‖Heat in hands during day, with nervous excitement.
‖Cold hands even in warm room, and from hands chill through whole body.
‖Profuse perspiration of hands so that all needles rusted and soiled her work; frequent and severe migraine.
‖‖Hands sweat profusely; cold, sweaty hands.
Things drop from hands.
Burning of palms of hands.
‖Cold perspiration on hands.
‖Skin on palms peels off.
‖Whitlow for six or seven days; last joint of r. thumb inflamed, swollen and itches, with throbbing, shooting and burning in it; redness mostly on dorsal surface of phalanx, throbbing < in palmar surface; the part is dark-red and pus invisible (relieved the pain).
‖Panaritium, with violent beating and stitching pains.
‖Painless ulcers on tips of finger or on joints.
‖Warts on hand and fingers; on sides of fingers; horny.
Many warts of young girls (onanists).
Finger nails yellowish, discolored.

Lower Limbs. ‖Coxagra with lancinating stitches, must get out of bed for relief; pains < from rising but > from slow walking.
‖Severe tearing pains in l. thigh; along course of sciatic nerve, pain extending to calf of leg and toes; pain 3 to 5 A.M.; during attack veins of affected part are greatly distended, she cannot remain in bed, gets up and walks about room sobbing; lassitude during day; eight months pregnant. θSciatica.
Swelling of limbs and feet; feet swollen and feel as if asleep; feet burn much at night; at the climacteric.
Pains in hips and thighs extending to near the knees.
‖Cramp: in hip joint and thigh; in buttocks at night in bed when stretching out limb; in calves, particularly during latter months of pregnancy; feet mostly in daytime, ankles weak and turn easily when walking.

Google

Pain as if bruised in r. hip joint.
Stiffness of legs to hip joint, after sitting for a short time.
Drawing in thighs.
‖Soreness and burning between nates.
‖Lower limbs go to sleep when walking.
‖Much weakness in lower limbs.
‖Lower limbs pain as if beaten; desires to sit down, when sitting she feels as if she must stand up.
‖Stitches and sticking, drawing pains, with lassitude, coldness of feet or knees; sweat of feet.
‖Restlessness in legs every evening, with formication.
‖Sensation of running as from a mouse in lower limbs.
‖Icy coldness of lower limbs.
‖Swelling of limbs and feet, < when sitting or standing, > when walking.
‖Swelling of knee, soft and painless.
‖Cracking in knee and ankle joints, stiffness.
‖‖Acute attack of rheumatism in r. knee, which is semiflexed, stiff, swollen, red and painful; < at night; great sense of weakness in joint; external lateral ligament especially sensitive and painful to touch; extreme sensibility to cold air and to every change of weather.
‖‖For fifteen years, scaly eruption on legs or a dark, dusky redness of skin; it occasionally improved but never disappeared.
‖‖Papular, dry, scurfy, ring-shaped eruption, on anterior surface of legs, immediately below knees.
‖‖Aching in calves, extending to knees, with a feeling almost as if bones were decaying; excitement and occupation of business during morning make him forget his aching limbs; has had much worry lately.
‖Coldness in legs and feet, especially in evening in bed; when feet get warm, hands get cold.
‖Burning or heat of feet at night.
‖Feet swollen, with sensation as if fallen asleep.
‖‖Feet hot, red, swollen, dorsal surface covered with large pustules, some of which had burst, discharging a thick, yellow greenish pus; severe tensive pains; < in r. foot.
‖‖Heaviness in feet when walking.
‖Icy coldness of feet. θMetritis.
‖Profuse sweat of feet; or sweat of unbearable odor, causing soreness of toes.
‖Suppressed foot sweat.
‖Tension in tendo-achillis, also swelling of tendon.
Ulcer on heel from a spreading blister.
Stitches in heels and corns during day.
Crumbling misshapen toe nails.

[31] **Limbs in General.** ‖Heaviness of limbs.

Stiffness and cracking of joints with arthritic pains.
Jerking and twitching of limbs and head, during day.
Limbs go to sleep easily after manual labor.
Weakness of joints, especially of knees.
Patient fears joints cannot bear exertion of lifting.
Stinging pains in limbs, inner parts, bones.
Neuralgia in limbs going up into head.
Painful indolent little boils in armpits and thighs; irregular catamenia; peculiarly offensive sweaty condition of feet, painful excoriation between toes.
Itching in bends of knees, elbows and on hands.
Palms of hands and soles of feet burning hot.
Ulcers on upper part of joints of fingers and toes.

Rest. Position. Motion. Rest: pulsating headache >; boring headache >; coldness in vertex <; fistula of cheek <; neuralgia of plexus mesogastricus >; cough worse.

Lying: headache with anxiety <; pain in occiput <; stitches in forehead >; on back, headache <; on painful side, headache >; on it, swelling on side of head >; on painless side, roots of hair more sore; quiet facial neuralgia >; > pressure under ribs; on liver > pain; on back with gallstone colic; distress in hypogastric region <; sensation as if urinary organs would be pressed out >; aching in pelvic region; hacking cough; cough >.

Lying with head high: cough and dyspnœa >.

Lying on side: pulsating pain >; legs flexed on thighs and thighs on abdomen > pelvic distress.

Lying on r. side: aching in pelvic region >.

Lying on l. side: fistula of cheek <; cough <; is disagreeable to her; cannot, pain in back; anxious dreams.

Lying on back: impossible; pain in back; very quietly, compulsory on account of pain; cough with expectoration <.

Must lie down: migraine during menses.

Could not be raised from recumbent position without fainting.

Sitting: impatience; headache >; involuntary jerking of head; distress in hypogastric region <; bearing down a long time shortness of breath <; cough <; palpitation > after a walk; throbbing in small of back, > upright, < leaning back; backache <; too long, feels uncomfortable; a short time, stiffness of legs; swelling of limbs or feet <.

Sitting with legs crossed: sensation as if urinary organs would be pressed out >; to prevent protrusion of vagina; bearing-down sensation >.

Digitized by Google

Has to sit straight up day and night: orthopnœa.
Stooping: bursting headache <; boring headache <; coldness on vertex <; shortness of breath <; sudden pain in back.
Standing: emission of urine; as if urinary organs would be pressed out; bearing down; cough <; backache causes nausea and faint feeling; swelling of legs and feet <.
Turning in bed: stretching out arms, catching pain in small of back; stitches in back.
Turning from l. to r. side: facilitates raising phlegm.
Could not lie quiet for five minutes: restless sleep.
Rising from bed: pain in swelling on head >.
Rising: pains from coxagra <; very tired in morning.
Leaning forward: heaviness in ovarian region.
Must bend over: pain in stomach.
Kneeling at church: fainting.
Stretching out limb: cramps in buttocks.
Remaining in one position long: neuralgic pains <.
Changing position: neuralgic pains >; of legs imperative.
Desires to sit down, when sitting must stand up again; pain in limbs.
Cannot find easy position for head.
Stepping: headache <.
Motion: pain over eye <; bursting headache <; pain in cerebellum; boring headache <; of eyes < headache; of head < coldness on vertex; leucorrhœa <; fistula of cheek >; pain in liver after; sensation of a load in abdomen; shortness of breath <; pulse accelerated; aching across loins <; weakness and lassitude in sacrum; at first < crick in back, continued >; causes great pain in back; at first < pain in back; chilliness; flushes of heat from least.
Slight exertion: neuralgic pains >; disagreeable from weariness; easy perspiration; fatigues; irritable and faint; sweat.
Slow exercise: headache >.
Exertion: pain in shoulder joint.
Hard motion: continued > headache.
Shaking head: headache <.
Walking: vertigo; hemicrania <; headache <; emission of urine; distress in hypogastric region >; back gives out; after menses a very disagreeable sensation; oppression of chest; rapidly no shortness of breath, only when stopped; cough <; dyspnœa often disappears; fast, palpitation; nervous palpitation >.
Weakness: in small of back; pain and stiffness in small

Google

of back; slowly > coxagra; ankles turn easily; lower limbs go to sleep; swelling of legs and feet >; heaviness of feet; profuse sweat.
A short walk: fatigues much.
Must get up and walk about: sciatica.
Going up stairs: cough <; as if limbs would refuse to act; fatigues.
Dancing and running: cause no shortness of breathing.

Nerves. Very faint all day.
Great exhaustion in morning during menses.
Great exhaustion and indolence; everything seems an exertion; the least exertion fatigues, even going up stairs.
Feeling of prostration; general languid feeling of whole body.
Feels weary and trembles all over.
Very tired in morning, when rising from bed.
In morning on waking weak feeling as from nausea.
A short walk fatigues much.
Debility usually characterized by a painful sensation of emptiness at pit of stomach; icy coldness of feet and hands.
Sudden prostration and sinking faintness.
Very irritable and faint from least exertion.
Great faintness from heat, then coldness; great exhaustion in morning, during menses.
Sudden faintness, with profuse sweats and undisturbed consciousness, without being able to speak or stir; rigid like a statue.
Fainting: after getting wet; from riding in a carriage; while kneeling in church; at trifles.
Frequent trembling of whole body.
Extreme nervous restlessness; uneasiness in whole body; fidgety.
Feels as if she could feel every muscle and fibre of her r. side, from shoulder to feet, an indescribable sensation.
Frequent starts of upper part of body.
Jerking and twitching of head and limbs.
Cramps in buttocks in bed, at night, when stretching out limbs.
Twitching of limbs during sleep.
General muscular agitation.
Hysterical spasms; sensation of a ball in inner parts.
Sensation of an icy-cold hand between scapulæ, then coldness over whole body, followed by cramping of chest as if she would suffocate, lasting several minutes; this is followed by clonic spasms of r. leg with twitching therein, and twitching of r. arm when leg is held, finally trembling of legs; sleep frequently disturbed by

attacks of anxiety, sudden fainting, profuse sweats, and a condition in which she is conscious and can move about but not speak. θHysteria.

In early childhood received a blow upon spine and has ever since complained of tenderness along its course; whole spine very sensitive, could bear no pressure upon it; also a spot in abdomen a little to l. and below umbilicus extremely tender; pain in l. shoulder extending down l. arm and side, at times so severe that she cried out; at times peculiar sensation in l. arm, feels very stiff although flexible as ever; constipation; menses regular; vomiting each meal almost as soon as eaten; continued in this state for two months, sometimes >, at others <; then whole l. side of abdomen became tender, could not bear slightest touch, patient stated that a circumscribed redness appeared over painful spot; paroxysms of great pain and anguish every evening in this spot accompanied by vomiting of bloody water and sometimes of pure blood to the amount of several tablespoonfuls; numbness of l. side and limbs, soon followed by complete paralysis of l. arm; difficulty in urinating, would postpone urinating for two days, then three or four days, each time having terrible paroxysms of suffering; could not be raised from recumbent posture without fainting and aggravation of pains; had several paroxysms of pain during night, summoning whole household to her bedside by her screams; would roll from side to side panting, speaking only in broken words and sentences, then would become unconscious for several minutes, slowly recover and vomit some blood; finally lost all desire to pass urine and during five weeks never passed a drop, suffering no inconvenience therefrom; pulse 72. θHysteria.

Paroxysm of something twisting about in her stomach and rising toward throat; her tongue becomes stiff; she became speechless and rigid like a statue.

She is very uneasy about the state of her health; constantly worrying, fretting and crying about her real or imaginary illness. θHysteria.

Violent spasmodic movement of all the limbs of body, and particularly of head, so that most of hair was rubbed off; talking amounts only to a stutter and is accompanied by twitching of muscles of face; great restlessness, constant desire to change his place and position; red tettery eruption on l. thigh. θChorea.

Convulsive motions of head and limbs; when talking (which is only a stammering), jerking of facial muscles; general muscular agitation; desire to constantly change

Google

position and place; ringworm-like eruption on skin every Spring; uterine chorea with menstrual irregularities; > after menses and after a thunderstorm. θChorea.

‖Hysterical paralysis.

‖Paralysis with atrophy.

‖Great sensitiveness to pain (*Coff., Cham., Hep.*).

‖Sensitiveness to cold air.

[37] **Sleep.** ‖Sleepiness: in forenoon; during day falls asleep as soon as she sits down; too early in evening.

‖Difficult awaking, no desire to rise, weariness of limbs.

‖Talks aloud during sleep.

‖Restless sleep: confused dreams; felt that she had a weight pressing on her thighs, momentary; on account of anxious dreams and heat; she could not lie quiet for five minutes.

‖Sleep does not refresh, but leaves tired, aching feeling through whole body.

‖Frequent awaking from sleep without cause or because he thinks he has been called.

‖During first sleep, she often imagines she has swallowed something, which wakens her up in a fright, with a sensation as if it had lodged in her throat.

Awakes at night in a fright and screaming.

‖Twitching of limbs.

‖Ebullitions at night, with restlessness.

Nightly delirium.

Awakes in morning at 3 o'clock and cannot go to sleep again.

‖Wakeful, sleepless, from rush of thoughts.

‖Sleeplessness, cannot fall asleep, is nervously oversensitive.

Anxious dreams when lying on l. side.

[38] **Time.** 3 A.M.: attack of shivering; awakes and cannot go to sleep again.

3 to 5 A.M.: pains in l. thigh.

Toward morning: tickling in larynx or bronchi.

Morning: depression; beating in vertex; hemicrania; heaviness of eyelids <; itching of inner canthus; burning in eyes; photophobia and swelling of eyelids <; acute conjunctivitis; conjunctivitis with muco-purulent discharge; lids glued together by thick matter; photophobia <; conjunctiva palp. injected on waking; smarting in eyes; lachrymation; difficulty of opening eyes; fluent coryza with sneezing; face red; on rising neuralgic pains <; prosopalgia appears; cough <; sour taste on waking; bitter taste; unpleasant taste; roughness of mouth, throat and tongue; hawking of

Digitized by Google

mucus; much thirst; in morning vomiting of food and bile; on rising pain and weight in abdomen; pain in abdomen <; strong desire to urinate; difficulty of urinating; pain in vagina; cross and irritable <; cough dry and hacking <; prolapsus uteri symptoms <; crampy drawing down along thighs; menses only; loose cough; great dyspnœa; oppression of breathing <; expectoration; cough loose, with effort to vomit; heaviness in back; pain in back <; vertigo when rising; great exhaustion during menses; very tired; on waking weak feeling as from nausea; very cold feet; after waking sweat; sweat with anxiety; paroxysms of ague appear sometimes.

10 A.M.: paroxysm of ague.

From 11 A.M. to 1 P.M.: neuralgia of plexus mesogastricus.

From morning till noon: stitches over orbit; headache with nausea.

Forenoon: as if brain were crushed; till evening boring pain; involuntary jerking of head; weakness of eyes; sleepiness.

During day: milky leucorrhœa <; did not open eyes; on closing eyes; scratching in them <; prosopalgia disappears; leucorrhœa; cough only; no expectoration; pulse slow; heat in hands; cramp in feet; stitches in heels and corns; jerking and twitching of limbs and head <; falls asleep as soon as she sits down; shuddering without chill.

All day: headache; shuddering all over body; very faint; feet damp and cold.

Day and night: pain from cough.

Afternoon: vertigo when rising from bed; pain in small of back; paroxysms of quotidian ague; fever <.

Between 3 and 4 P.M.: paroxysms of ague.

3.30 P.M.: pain over eye.

4 P.M.: fulness deep in orbit.

6 P.M.: pain and weakness in small of back.

Toward evening: increasing dryness of eyes; colic recurring; severe oppression of chest; chilliness with thirst; very cold feet.

8.30 P.M.: flushes of heat all over body.

Evening: sad and gloomy; toward anxiety; headache >; hemicrania <; prickling of eyes by candlelight; pustules around cornea with redness <; biting in r. eye; acute conjunctivitis; great dryness in eyes; agglutination of lids; lachrymation; face pale; thirsty; as of a strap around waist; fever <; attacks of neuralgia; prolapsus uteri symptoms >; oppression of breathing <; dry cough; short cough; hacking cough; pressure in chest;

Google

beating of arteries; pain in small of back; aching in sacrum; chilliness along back; in bed cold feet; early, sleepy; chilliness; very cold feet; face heated; paroxysms of ague; itching of spot on r. hand; acarus-itch itching <.

Night: pressure in eyes; smarting in eyes <; scratching in eyes <; stitches in ears <; neuralgic pains < in bed; very severe prosopalgia; toothache <; throat parched; has to eat something; vertigo; heavy sweat; pelvic distress; involuntary discharge of urine; much disturbed from having to urinate; gleet discharge only; menses more profuse; no leucorrhœa; expectoration; wakes with feeling as if chest were hollow; cough <; spasmodic cough; cold knees; much ebullition of blood in whole body; pulse full and quick; burning of feet; cramp in buttocks; rheumatism in knee <; paroxysms of pain; awakes in a fright and screaming; cold sweat <; itching and burning of skin in bends of elbows and knees.

Before midnight: cough with expectoration; tickling cough.

Toward midnight: spasms of eyelids cease.

*** Temperature and Weather.** In hot weather: conjunctivitis always <.

Becoming overheated: nosebleed.

Hot flannel: > pains in abdomen.

Warmth: was unbearable during violent headache.

Warm room: facial neuralgia >; oppressive; feels uncomfortable; cold hands; internal chilliness; fine rash over body remains; nettlerash disappears.

Warm climate: nervous irritability >.

Warmly covered: can bear labor pains better.

In room: oppression of breathing <.

In bed: toothache <.

Open air: sad and gloomy; while walking, vertigo; stitches over orbit >; headache >; pain over eye >; in head >; coldness on head >; pressing pain around eyes <; acute pain in orbit <; lachrymation; toothache > in fresh air; oppression of breathing >; chilliness; while walking profuse sweat; urticaria appears.

In dry air, fog, east and north wind: cough and dyspnœa <.

Change of weather: rheumatism of knee very sensitive.

In a thunderstorm: boring stinging over eye <.

After a thunderstorm: ringworm-like eruption >.

Wind: riding in, brings on facial neuralgia.

North wind: boring stinging over eye <.

Northeasterly wind: facial neuralgia <.

Digitized by Google

Rough wind: exposure to, brings on migraine; walking against, profuse sweat.
Cold north wind: roots of hair sore; cough <; flatulency >.
Dry east wind: cough <.
Stormy weather: she feels almost suffocated.
Snowy weather: feels <.
Damp weather: facial neuralgia; pain in small of back after exposure.
Getting wet through: cough <; fainting.
Cold, damp air: sensitive to; cough <; eruption on face itches and smarts <.
Cold water: acute conjunctivitis >; smarting in eyes >; toothache >; when water gets warm toothache returns.
Cold: toothache <.
In cold air: boring stinging over eye <; scaly tetter on back of hands <; rheumatism of knee very sensitive; sensitiveness; nettlerash breaks out.
Cold room: fine rash disappeared.
Cold draft of air: toothache <.
Hot or cold: things in mouth < prosopalgia.

40 **Fever.** Want of natural bodily warmth.
Very sensitive to cold air.
Shuddering during day without chill.
Chilliness: evening in open air, and from every motion; with thirst, toward evening, followed by night sweat; for many nights; internal, in warm room; with the pains.
External warmth was unbearable to her during violent headache, yet she was chilly.
Coldness: over whole body; between shoulders, followed by general coldness and convulsive twitching of r. side and difficulty of breathing; begins in feet and rises upward.
Chill frequently setting in after previous heat.
During chill more thirst than during heat.
Cold hands and feet, with frequent flushes of heat to head and face.
Hands generally cold but moist with perspiration.
Icy coldness of both hands, in warm room they send a chilly feeling through whole body.
Very cold feet, particularly in evening, mainly in bed, and afterward, when this passes off, very cold hands.
Very cold feet with headaches, especially toward evening and in morning.
Feet damp and cold all day, feeling as if they stood in cold water up to ankles.
Heat with attacks of chilliness, with thirst.

Google

‖Face much heated: from talking; with heat in evening, in head.

Painful heat in head, frequently, with flushes of heat over body.

Hot flush over face and whole head lasting but a few seconds, followed by slight perspiration.

Flashes of heat all over body about 8.30 P.M.

Attacks of flushes of heat, as if hot water were poured over one, with redness of face, sweat of whole body and anxiety without thirst, yet without dryness of throat.

‖Flushes of heat from least motion.

‖Heat ascends.

‖Sweat: during sleep, particularly on head; profuse, while walking; especially in bends of joints; while walking in open air even against cold wind; over whole body, in morning, after waking, profuse; with anxiety in morning; from least exertion; every morning in bed, after awaking, mostly on lower limbs; of the feet; on upper part of body; continuous, debilitating; pungent, offensive in axillæ, and soles of feet, causing soreness.

‖Night sweat: cold on chest, back and thighs; from above downward to calves, every third night; smelling sour; offensive or like elder blossoms.

‖Paroxysms appear 10 A.M.; shaking chill with thirst and vomiting; then severe laborlike pains, > after cold stage, which varies in duration and is followed by profuse sweat with headache in forehead and occiput and palpitation, also night sweats, throbbing in temples, oppression of chest and pain along spine (all during sweat); thirst only during chill, but water is then immediately vomited; falls asleep during night sweat; after paroxysm > although greatly prostrated; mouth full of white mucus; irritable during paroxysm; constipation; urine dark; loss of appetite and irritability of stomach; is three months pregnant. θAgue.

‖Paroxysms appear in afternoon, begin with heat in head, redness and stitching pains in temples, pressure in occiput; then shivering and chilliness along back, lasting an hour and a half, with thirst, dry cough, stitches in hypochondria and swelling or r. submaxillary gland; fever; has had six paroxysms. θQuotidian ague.

‖Tertian ague; paroxysms appear sometimes in morning, sometimes in evening; chilliness and shivering, followed by heat, then sweat, particularly in face; thirst in all three stages; loss of appetite; bitter taste in mouth; thirst; itching of forehead; vertigo, causing him to fall; stitches in splenic region, also during cough, with expectoration of blood-streaked mucus; epistaxis; stitches in back on turning in bed; rumbling in abdomen.

Google

Paroxysms between 3 and 4 P.M.; chill preceded by thirst; during chill, thirst; severe tearing pains in upper and lower limbs; hands and feet blue, icy-cold, hands seem dead; cough, with scanty expectoration, lasting through hot stage; heat predominates, is of two hours' duration and is followed by sleep and finally cold sweat, particularly at night; during apyrexia, paleness of face; tearing pain in head from ear to ear, also in forearms from elbows into fingers and both knees; cold hands and feet with weakness; no food seems salted enough; cough with scanty expectoration, particularly when lying on back. θQuartan ague.

A girl, æt. 16; every four weeks, to the day, taken in morning with severe chill, lasting two or three hours, followed by very high fever, lasting as long as chill, this is succeeded by profuse sweating; the attack was repeated a second and third time with an intervening well day, after which the ague disappeared until expiration of four weeks from commencement; ague did not return at expected time; instead of it a rather copious menstruation appeared and returned monthly, with entire restoration to health.

Quartan ague chill beginning in legs; preceded by a small, hard lump in l. breast, above nipple, sore to touch; each time (twice) it waked her at 4 A.M.; one hour later, chill; constant cold, damp feeling in front of chest; air seems damp. θAgue.

Heat ascending, or sensation as if hot water were poured over him.

Attacks, Periodicity. Alternately: hard and soft stool; diarrhœa and constipation; burning and coldness on vertex.

Periodical: headache from 2 P.M. till bedtime; discharge of mucus from urethra.

Every minute: expectoration of pure blood.

Every five minutes: during day and night, stitches in forehead.

Every half hour: having to urinate at night.

Several times a day: rolling in abdomen.

Several paroxysms during night: of pain.

Every morning: headache with nausea; sweat in bed; cough and coryza with sneezing last till 9 A.M.

Every evening: cough; restlessness in legs; great pain and anguish in spot in abdomen.

Nightly: emissions with sexual dreams; delirium.

Every Saturday for years: headache.

For two days: postponed urinating.

Every third night: night sweat.

Google

Every three or four days: laborlike pains.
For four days: stitches over hip.
For several days: pain in teeth.
Eight or ten days: menses.
Every eight to fourteen days in afternoon and evening; amenorrhœa.
For many nights: chilliness.
Every two weeks: gallstone colic.
Of three weeks' standing: painless diarrhœa.
Every four weeks: to the day taken with severe chill, then fever and sweat.
For five weeks: passed no urine.
For three months: jaundice.
For four months: menses suppressed.
Every Spring: for three years, tendency to reappearance of carcinoma of lip; ringworm-like eruption.
Every Summer: for twenty years, from beginning of warm weather in Spring until its close in the Fall.
Every Winter: catarrh with cough.
Since a year: recurring attacks; agglutination, photophobia, pustules, pain.
A year and a half standing: gleet.
Of several years' duration: painless diarrhœa.
Of two years' standing: hard, indurated tarsal tumor on lid; costiveness; gleet; eruption on face.
For five or six years: headache; affection of lungs.
Eight years' standing: crick in back.
Of thirteen years' standing: ozæna.
For fifteen years: scaly eruption on legs.

"**Locality and Direction.** Right: tearing in side of forehead; headache follows perspiration on side of head; stitching pains in side of head; hemicrania; boring stinging over eye; as if eye were gone and cool wind blew through socket; pressure in eye; biting in eye; eye inflamed; side of face much swollen, deep red; eye seemed much smaller than left; angle of mouth drawn upward; stitches into ear; heaviness in ovarian region; pain running down leg; stitches in hypochondrium; drawing through chest into shoulder; pain from hepatic region to shoulder; tender spot on side of abdomen; hypochondrium tender and heavy; aching in shoulder; pelvic pain to knee; pain and stitching in side of abdomen; scirrhous tumor of breast; stitches in hypochondrium; pain in spot under nipple; pleuritic adhesions in chest: diseased condition of lung; stitching darting through lung: pressure and pain through chest; determination of blood to temple; stitches in shoulder blade; stitches over hip; could not lie on side,

Digitized by Google

stitches in hip; herpes circinatus on side of neck; last joint of thumb inflamed; acute rheumatism in knee; as if she could feel every muscle and fibre of her side; clonic spasm of leg; twitching of arm when leg is held; twitching of side; swelling of submaxillary gland; a roundish bright-red spot on ball of hand.

Left: tearing in frontal eminence; stitches over orbit; tearing in temple and side of head; pressing pain over eye; fulness deep in orbit; shooting over eye; sore pain in eye and temple; pain in temple downward; stitching in zygoma; severe pain in head; pain beginning in parietal region becoming throbbing in occiput; violent stitches in forehead; lashes of eye gone, edges raw and sore; sticking in eye; stuffiness of nostril; small pustules on wrist; panaritia of thumb and middle finger; dry coryza in nostril; offensive greenish discharge from nostril; neuralgic pains commence in temple over side of face; fistula in cheek; râles at apex; tearing through ear; tingling then tearing in hand; toothache; inflammation of throat <; violent pressure under ribs; stitches in hypochondrium; pain from side of urethra to a spot between sternum and shoulder; inclination of fundus to side; numb feeling in lower half of side of body; pain in lung; stitches to scapula; pressure on chest; stitch in side of chest and scapula as if knife were thrust into top of lung; flatulency on side of abdomen; cannot lie on side on account of flatulency; feels pulse beat through chest; aching under scapula into lung; severe pains in thigh; of umbilicus, tender spot; pain in shoulder and under arm; peculiar stiffness of arm; numbness of side and limbs; paralysis of arm; tettery eruption on thigh; humid tetter in axilla.

From within out; pains over l. eye; stinging pain in side of head; boring pain in head.

From below upward: pain in vagina; coldness.

From above downward: night sweat.

Sensations. As if heart stood still; as if every object were in motion; as if suspended in air; as if brain were crushed; as if head would burst; as of waves of pain rolling up and beating against frontal bone; as if eyes would fall out; stitches as from needles in head; vertigo, as if intoxicated; as of a weight over eyes; as if roots of hair were sore, as if cut short near roots; as if eyes were gone and a cool wind blew out of socket; eyes as if bruised; as of a grain of sand in eye; as if lids were too heavy to open; eyes as if balls of fire; as if eyelids were too tight and did not cover eyeballs;

Google

as if eyelids were too heavy; as if lids were paralyzed; hollow molar as if swollen and elongated; gums as if burned; gums as if beginning to suppurate; tongue and cavity of mouth as if scalded; as if something had lodged in her throat; as of a plug in throat; throat as if raw; as if everything in abdomen were turning around; as if viscera were turning inside out; as if stomach were sore internally; as if ribs were broken and sharp points were sticking in flesh; as of a strap as wide as her hand drawn tightly around her waist; liver as if bursting; as if menses would appear; as of a load in abdomen; as if everything would issue through vulva; as of something adherent in abdomen; as if something alive were in abdomen; as of a weight in anus; as if bladder were full and contents would fall out over pubes; as if drops came out of bladder; as if bladder and urinary organs would be pressed out; as if everything would fall out of uterus; uterus as if clutched; as if vulva were enlarged; as if something heavy would force itself from vagina; as from a weight in sides; as if mammary glands were enlarged; as if cough came from stomach and abdomen; as if something remained lodged in stomach; chest as if hollow; chest as if sore; throat as if filled with phlegm; as if stomach were being scraped; as if knife were thrust into top of l. lung, then turned around; as if intestines were drawn into a lump; small of back as if sprained; back as if she could not turn or raise herself, or as if she had lain in a wrong position, almost as if parts had gone to sleep; sudden pain in back as if struck by a hammer; pain in back as from subcutaneous ulceration; as if limbs would refuse to act; as if something were going to break in back; as if shoulder were dislocated; feet as if asleep; r. hip joint as if bruised; lower limbs as if beaten; as of a a mouse running in lower limbs; as if bones of legs were decaying; as if she could feel every muscle and fibre of her r. side from shoulder to feet; as of a ball in inner parts; as of an icy hand between scapulæ; as if she would suffocate; something twisting in stomach and rising to throat; as of a weight pressing on thighs; as if feet stood in cold water up to ankles; as if hot water were poured over one.

Pains: in occiput; in back down to legs and feet; in hips and back; in lids; in r. ovarian region; down r. leg; in stomach; in liver; in tender spot in side of abdomen; in liver going across to stomach and spleen and around back; in abdomen from sacrum; in rectum; in rectum into genitals; in l. side of face; in back and ex-

[1] **Mind.** Indifferent, apathetic.

Confusion of mind; difficulty in fixing the attention.

Mental labor is very difficult.

Reading and writing fatigue, cannot bear to think.

Becomes confused, makes mistakes; she is unable to control herself.

Affections from egotism.

Compunction of conscience about trifles.

Overanxious about himself; low-spirited; weeps every evening.

Longing for his relations and home.

Very irritable, low-spirited, peevish mood.

Sensitiveness to noise and anxiety therefrom.

Very sensitive, weeping mood.

Desponding, melancholy, tired of life. θSpermatorrhœa.

Gloomy, feels as if she would die.

Wishes to drown herself.

Yielding, faint-hearted, anxious mood.

Restless, fidgety, starts at least noise.

Child becomes obstinate, headstrong; cries when kindly spoken to.

When crossed has to restrain himself to keep from doing violence. θMegrim.

Screaming violently, groaning. θEpilepsy.

She screams during increase of moon. θSomnambulism.

Imagines to be in two places at the same time.

Complains of pain in throat on swallowing; although there is no indication of any inflammation, the condition of her throat is the sole thing occupying her mind; believes she has swallowed pins, and asks those about her whether she has not done so; seeks for hours for lost pins; will take no sewing into her hand, and carefully examines her food for fear of pins; very indifferent to friends and former amusements; restlessness; anxiety; vertigo, < stooping; headache daily, < mornings; loss of appetite; constipation; emaciation; entire absence of menses; < during increase of moon. θHysteria.

[2] **Sensorium.** Vertigo: as if one would fall forward; ascend-

Digitized by Google

ing from dorsal region, through nape of neck into head; inclining to fall backward; < from motion or looking upward; accompanied by nausea; with rachitis; from excessive use of eyes; when riding; with sleepiness; all day, while stooping at work; during sleep; when rising from a recumbent position; is obliged to walk to the r. side; commencing in cerebellum; in neurasthenia and epilepsy; as if drunk; is obliged to sit down; when closing eyes; from lying on l. side.

The brain feels muddled and thick.

‖ Heaviness in head. θ Paralysis.

Disagreeable feeling, as if head were teeming with live things whirling around it.

‖ Fainting; when taking cold; from suppressed foot sweat.

Inner Head. ‖ Headache or cold feeling rising from nape of neck to vertex; extreme heaviness of head.

‖ Congestion to head; cheeks hot; slight burning in soles of feet.

‖ Burning in head, with pulsation and sweat of head; < at night from mental exertion, talking; > by wrapping head up warmly.

‖ Shooting from nape to vertex.

‖ Violent periodic headache, in vertex, occiput or forehead; one-sided, as if beaten; throbbing in forehead; coming in night, with nausea, vomiting.

‖ Violent headache, with loss of consciousness or reason.

‖ Loud cries, nausea to fainting; subsequent obscuration of sight. θ Megrim.

‖ Obstinate morning headaches, with chilliness and nausea.

‖ Headaches, with or followed by severe pain in small of back; heaviness and uncomfortable feeling in limbs.

‖ Tearing, frequently one-sided, with stitches through eyes and in cheek bones.

‖ Pulsating, beating, most violent in forehead and vertex, with chilliness.

‖ Headache worse: from mental exertion; excessive study; noise; motion, even jarring of room by footstep; light; stooping; pressing at stool; talking; cold air; touch.

‖ Headache better: from wrapping head up warmly; hot compresses; in warm room; lying down in dark.

‖ Headache every seventh day.

‖ Vibratory shaking sensation in head when stepping hard, with tension in forehead and eyes.

‖ Headache caused by hunger.

‖ Headache as if everything would press out and burst skull; as if brain and eyes were forced forward.

‖ Headache wakes him at night.

Tearing in whole head starting from occipital protuberances and extending upward and forward over both sides.

Google

Tearing pain as if head would burst, with throbbing in it, commencing at crown as if internal and external at same time, with chilliness; was obliged to lie down and tossed about in bed for four hours; > by binding head tightly.
Violent tearing in head as if forehead would be torn asunder.
Violent headache above eyes so that he could scarcely open them.
Stitches in temples.
Hard jerklike pressure in top of head, extending deep into brain, in paroxysms lasting one or two minutes.
The hat causes acute pain in occipital protuberance.
Pressive headache in occiput as if in bone.
Pressure in occiput, followed by stitches in forehead, with chilliness in nape of neck and back.
Pressure in both sides of occiput.
Bruised pain above eyes, could scarcely open them; first affected l. side of forehead, a sticking extending to r. side, pressive, < by opening eyes.
Pressive jerking in middle of forehead renewed by suddenly turning around, stooping or talking.
Pressure as from a heavy weight in forehead over eyes.
Tearing in frontal region.
Acute sticking pain in forehead.
Roaring and shattering in brain when stepping hard or knocking foot.
Tension and pressing in head as if pressed or forced asunder.
Pressive headache at night; could not remember where she was; everything turned around, with throbbing at heart.
Violent pressive headache in morning, extending into eyes, with violent chill in afternoon, nausea and weakness, thought she would faint; eyes painful on turning them sideways or closing them, and when closed are still more painful to touch.
Constant pressive headache from above downward over whole head, with intermittent itching at vulva.
Pressure at occiput and nape of neck in morning.
‖Headache with small lumps or nodules on scalp.
‖Diseases of brain, spinal marrow and nerves of a paralytic nature.
Fluttering feeling in both temples and aching at occiput.
‖Frontal sinus affected; pounding and throbbing in forehead and up into head. θChronic coryza.
Feeling like water pipes bursting in head.
‖Headache from organic causes, excessive study, nervous prostration with vertigo and weak memory.
Sickening pain in l. side of head, < from pressure or least movement.
When coming into dark she feels a pressure on vertex as if a tremendous weight were falling on it.

Google

Strange coldness about breadth of two fingers across vertex in a line with forepart of ears; rush of blood to forehead.

Extreme heaviness of head; she cannot hold it up, it feels so weighty.

Rushes of blood to forehead.

Congestion to head, hot cheeks and burning in soles of feet. θChronic hepatitis.

Heat in head. θSpermatorrhœa.

For years terrible headaches coming on in evening in bed, with shivering and coldness over body; the pain began in cervical vertebræ, extending to cerebellum and from there went to forehead where it was most severe; pain > wrapping head warmly; feeling in neck as if some one pulled downward on cords of neck.

Chronic headache; never entirely free, at times fearful; when it reaches its height scalp becomes covered with papules and is then so sensitive that she cannot comb her hair; these violent spells are caused by draft and scrubbing; cannot bear cold or heat; during headache she has violent roaring in ears, as if something alive were in them; chronic sweat of feet; habitual constipation.

Head felt constantly as if it were in a cushion and some one were pressing his two fingers in it at occiput, as if feeling for pins in side; with occasional lightning-like flashes in eyes and feeling as if something obscured vision; < in cold weather or in a draft; > wrapping head up warmly.

Cephalalgia from spinal irritation; pain began in spine and neck, coming up and over r. temple and thence to l. temple; scalding feeling in vertex; burning pain in head; feeling of internal soreness as if sore brain collided with skull; pain very hard to bear; < from light, noise, least jar and odors; sore aching in nape, < by moving head, > from wrapping head in pillow and from contact of any warm hand.

Pain at one time in vertex and occiput, at another in forehead; sometimes affects only one side, head then paining as if bruised and being very sensitive to touch; throbbing in forehead, with weakness of sight; is awakened from sleep by the pain and has then nausea and vomiting; pain < from touch, motion, open air; food tastes like clay; discharge of particles of tapeworm; trembling of limb and general feeling of weakness with the pains. θHeadache.

Severe headache, every two or three weeks, lasting from thirty-six to forty-eight hours; pain commences in nape of neck and base of brain and extends up and over whole head in paroxysms; pain so severe that she calls for some one to hold her head tightly to keep it from bursting.

Digitized by Google

‖‖Feeling of waves of water from occiput over vertex to forehead, making her feel with each wave as if she would gradually lose her senses, > from warm wraps around head; vomiting of bitter yellow substance on moving, > when perfectly quiet.

‖‖Chronic sick headaches since some severe disease in youth; rising from nape of neck to vertex, as if coming from spine and locating in one eye, especially r; > by pressure and wrapping up warmly.

‖Congestive, gastric, nervous and rheumatic headaches.

‖Headaches from excessive mental exertion, from overheating, from nervous exhaustion.

‖Cerebral apoplexy, preceded by deep-seated stitches in r. parietal region and dull, heavy, crampy pain in arms.

‖Child grasps at its gums continually, as if they were painful; profuse sweat about head at night, scrofulous diathesis. θMeningitis. θHydrocephalus.

Outer Head. ‖‖Open fontanelles; head too large and rest of body emaciated, with pale face; abdomen swollen, hot.

‖Rolling of head from side to side.

‖Head feels as if too large.

Head feels as if falling off, causing straining pains at back of neck as if head were hanging by a piece of skin at nape.

‖Head falls forward. θSpinal disease.

Strange coldness, about breadth of two fingers, across vertex, in a line with forepart of ears.

‖‖Tendency to take cold in head, which cannot be uncovered.

‖Tearing in scalp, < from pressure and at night.

‖‖Tenderness of scalp in region of coronal suture; brushing or combing hair causes violent attacks of sneezing.

‖‖Head sore to touch externally; sensibility of pericranium; scalp sensitive to pressure of hat and to contact; she cannot brush her hair, the scalp is so tender.

‖Much itching on scalp.

‖‖Itching spots on head painful, as if sore, after scratching.

‖‖Itching on occiput.

Pricking and itching of scalp.

Burning and itching, mostly on back part of head; < from scratching, which causes burning and soreness; < when undressing in evening and on getting warm in bed.

‖‖Lumps rise on head, hair falls out, scalp sensitive to touch; tearing pains.

‖‖Profuse head sweat; body dry; likes wrapping up; sweat sour; face pale; emaciated; large abdomen; weak ankles.

Digitized by Google

Profuse sweat of head, body being dry or nearly so.
Head wet from sweating, particularly at night, likes wrapping up.
Profuse perspiration on head, sour-smelling and offensive, in first sleep.
Patches of eruption on scalp, exfoliated thin, dry, furfuraceous scales.
Eruption on back of head, moist or dry, offensive, scabby, burning, itching, discharging pus.
Impetigo capitis; entire head covered; eruption humid, discharging a greenish fluid of somewhat putrid odor.
Eczema capitis; patch of eruption on scalp, over occipital protuberance, dry, furfuraceous scales, with some itching; enlarged cervical glands; headache with shooting pains from nape of neck to vertex; leucorrhœa; backache.
Scaly eruption on scalp; > in Summer, but < upon approach of Winter; cervical glands enlarged.
Itching pimples on head and nape of neck.
Itching pustules on scalp and neck very sensitive, > wrapping up warmly.
Moist eruption on occiput.
Scalp becomes covered with papulæ and is then so sensitive that she cannot comb her hair. θChronic headache.
Itching pustules and bulbous swellings on hairy scalp and on neck.
Hair falls out; premature baldness.
Suppurating wound of scalp.
Phagedenic ulcer on forehead painful and discharging offensive pus.
Keloid on temporal region; frontal headache.
Cephalhæmatoma; almost the whole l. parietal bone is covered with a large, soft, elastic swelling; the characteristic ring of the bone can be traced by the finger.
Cephalatoma neonatorum.
Enchondrosis; large, hard swelling, but soft in some places, on a child's head, beginning above ears and extending to larynx; whistling, breathing and suffocative attacks.
Painful distension of frontal bone; periostitis.

Sight and Eyes. Long-lasting photophobia; daylight dazzles the eye.
Letters run together, appear pale.
Dim vision after suppressed foot sweat.
Occasional lightning-like flashes in eyes and a feeling as if something obscured vision; nervous sensation in head.
Black spots, or sparks, before eyes; a persistent speck before r. eye.

Google

Momentary loss of sight, with uterine affections; pregnancy.

Eyes weak; vision indistinct, misty, with flickering before eyes.

Dimness of vision; could neither read nor write; everything ran together; as if looking through a grey cover.

Amblyopia: from checked foot sweat; from abuse of stimulants; nervous, sensitive persons; after diphtheria.

Momentary attacks of sudden blindness.

Day blindness, with sudden appearance of furuncles.

Slight fluttering before eyes.

Cataract; a decided, greyish cloudiness of lens of r. eye was reduced to a small spot size of head of pin; smoke or vapor before eyes, cannot discern objects; eyes red, inflamed, watering.

Sclero-choroiditis ant. relieved by this remedy; conjunctiva and sclera injected and a bluish irregular bulging around cornea; retina hazy, no vitreous opacities; severe pains extending from eyes into head on one side, >by warmth; severe aching in back of head on one side, corresponding to eye which is worse; symptoms alternate from one eye to the other.

Choroiditis in a myope, in whom upon any exertion of eye excessive pain extended to head and ears.

Irido-choroiditis and other forms of inflammation of uveal tract.

Irido-choroiditis and other forms of inflammation.

Irido-choroiditis, great tenderness of eye to touch, deep ciliary injection, contraction of pupils, posterior synechiæ, excessive sensitiveness to a draft of air.

Parenchymatous iritis with abscess in upper part of iris, violent supraorbital pain, night and day.

Ciliary neuralgia.

Iritis, with hypopion and corneitis.

Fungus medullaris.

Formation of abscess size of a lentil in upper portion of iris, having appearance of a yellowish-red swelling, coloring the pupil; the pus of which a small portion had entered the anterior chamber was absorbed.

Cataract: after suppressed foot sweat; preceding worms.

Cataract of right eye (diagnosis confirmed by two physicians) cured in one year by repeating *Silica* once a month. *θ* Cataract.

Cataract of r. eye in a man, æt. 61.

Perforating or sloughing ulcer of cornea.

Small round ulcers, with a tendency to perforate, especially if situated near centre of cornea and having no bloodvessels running to them.

Google

‖Deep or crescentic ulcers of cornea.
‖Sloughing ulcer with hypopion in a syphilitic patient; iris inflamed; ulcer quite deep with profuse purulent discharge, small flakes on cornea, chemosis of conjunctiva.
‖Ulcus corneæ sloughed through; sticking pains night and morning.
‖Pustular keratitis after psoriasis.
‖Opaque cornea after smallpox.
‖Spots and cicatrices on cornea.
‖Corneal fistula.
‖Total pannus in a boy æt. 9; both corneæ completely opaque, presenting a wholly whitened appearance.
‖Cornea thick, rough, warty as if it were a mass of hypertrophied tissue loosened up little by little and scaled off from cornea leaving it clear and healthy.
‖Ulceration of cornea; painless tumefaction of lids.
‖Fungus hæmatodes.
‖*Silica* 3x caused the discharge of lead particles (arising from lead lotion) from cornea.
‖Eyes painful as if too dry and full of sand in morning.
Tension in eyes and forehead, with weakness of body.
Piercing stinging pain in l. eye.
‖Tearing, shooting, or at times throbbing, stinging pains in eyes, in paroxysms.
‖Smarting of eyes.
Aching in upper lid, with severe stitches in it as from a splinter, with vanishing of sight.
‖Pressure and soreness in orbits.
‖Ciliary neuralgia: especially over r. eye; darting pains through eyes and head upon exposure to any draft of air or just before a storm.
‖Every day about 1 o'clock, severe burning pains in r. eye and flow of tears over cheek, which feel scalding; these symptoms last for several hours; r. conjunctiva injected; pain on pressure in r. lachrymal sac, which feels somewhat swelled; mucous secretion in eye in morning; finally great swelling of lachrymal sac, forming a little lump at corner of eye exquisitely painful to touch, the seat of throbbing pains, the skin over it being red; hot tears run over cheek; nasal duct quite obstructed.
A feeling as if both her eyes were dragged back into head with strings.
‖Pain over eyes from wearing steel spectacles.
Pressive pain over l. eye about size of a sixpence.
Pain from occiput to eyeball, mostly r., sharp darting and a steady ache; eyeball sore and painful when revolved.

Google

Smarting and pricking in l. eye.
Redness at first around eyes then also of conjunctivæ, with inflammation and lachrymation.
▮Redness of whites of eyes with pressive pain.
▮▮Trachoma of conjunctiva of r. eye, hyperæmia and swelling of conjunctiva and copious secretion of tears and mucus, after exposure to a storm the inflammation increased and there was also cloudiness of lenticular capsule; horizontal oval dilatation of pupil; violent supraorbital pain day and night; urine strongly ammoniacal, deposited a yellowish sediment and contained a large amount of albumen; sight very much diminished; copious muco-serous secretion from conjunctiva; after some time there was an abscess arising from upper part of iris, having a yellowish-red coloration, and covering whole pupil. θParenchymatous iritis.
▮▮Pain and photophobia and inability to open eyes even in dark; ulceration of r. cornea, with a deep, transparent base, threatening perforation; great hyperæmia of lids, of conjunctiva, and of epithelial layer of cornea; engorgement of submaxillary gland; moist vesicular eruption on back of head. θScrofulous ophthalmia.
▮▮Woman, æt. 28, has suffered for two months with recurrent phlyctenular conjunctivitis; phlyctenules have varied both in size and location, being at times very large and isolated, appearing almost like pustules and coming on any part of ocular conjunctiva; again they are smaller, like minute vesicles but more numerous, and sometimes form almost a complete circle at sclero-corneal junction; conjunctival redness, profuse lachrymation, intense photophobia, at times very severe pain; pain neuralgic, < at exit of supraorbital nerve; duration of attacks from eight to twelve days.
▮▮Eye inflamed from traumatic causes; foreign particles have lodged in the eye; abscesses.
▮▮Hypopion.
▮Blennorrhœa with suppuration; sensitive to cold air, wishes to keep warmly covered.
▮▮Twitching of eyelids.
▮Blepharitis: with agglutination in morning; caused or aggravated by working in a damp place or from being in cold air; objects seem as if in a fog, > by wiping eyes, fluent coryza, corners of mouth cracked, with psoriasis on arm.
▮▮For four months, constant discharge and ulceration under r. lower lid, the result of a severe inflammation; over r. inferior orbital ridge, cicatrices which everted the lid and three openings as found over dead bone,

Google

discharging a yellow white pus, on probing caries of lower orbital arch was found extending over malar and superior maxillary bones and connected by sinuses with the upper jaw opening over first molar tooth, through which opening the discharge escaped into mouth.

‖Boils around eye and lids.

‖Cystic tumors of lids.

‖Tarsal tumors; styes.

‖‖Cystic tumor of lower lid existing one year.

‖Styes, nodules and indurations on eyelids.

‖Affections appearing in angles of eyes.

‖Swelling in region of r. lachrymal gland and sac.

‖Lachrymation in open air.

‖‖Fistula lachrymalis; bone affected.

‖‖Swelling of r. lachrymal sac, skin over it inflamed; glistening; throbbing pain; tears hot; < evening.

‖‖Obstruction of canaliculi attending an attack of ophthalmia of six weeks' standing and affecting both eyes; acrid tears overflowed lower lids.

‖‖A completely established fistula of sac, with disorganization of walls of sac, denudation of internal horny wall and closure of nasal canal.

‖Stricture of lachrymal duct.

‖Blennorrhœa of lachrymal sac.

‖‖Swelling of r. tear bag forming a perceptible protrusion, skin covering it inflamed and glistening; throbbing in it; the flowing tears are hot, particularly in evening.

θSwelling of lachrymal sac.

Soreness and smarting of eyelids, she cannot close them.

Hearing and Ears. ‖Oversensitive to noises; ears painfully sensitive to loud sounds.

‖Ringing or roaring in ears.

The ears seemed stopped.

‖Stoppage of ears, which open at times with a loud report.

‖Difficult hearing, especially of human voice and during full moon.

‖Diminished hearing from roaring in head.

‖‖Hardness of hearing, of long standing; < from washing and changing of linen; > from application of electricity.

Dulness of hearing with swelling and catarrh of Eustachian tubes and tympanic cavity.

‖Deafness without noise in ear, disappearing on blowing nose and coughing.

‖Hardness of hearing: of nervous origin; suddenly after a faint; ringing in ears and deafness with paralysis.

‖During headache roaring in ears as if something alive were in them.

Digitized by Google

‖Deafness in a hemorrhoidal patient of twelve years' standing.
‖Menière's disease.
‖Itching: in Eustachian tubes, chronic coryza; in both ears, in ear, especially on swallowing.
Drawing pain in meatus auditorius, like otalgia.
‖Stitches in ears.
‖Otalgia; with stitches from within outward.
Shooting pain in l. ear, with a feeling as if humor were flowing from it.
Pricking, aching and itching in ears, l. chiefly.
‖Sleep disturbed by pain in ears. θScarlatina.
‖Boring pain. θOtorrhœa.
‖Inflammation of labyrinth after cerebro-spinal meningitis.
‖After overexertion, heaviness of head, earache and difficulty of hearing; hypersensitiveness to sounds, even sound of voices in speaking; catarrhal cough, pain in stomach and severe pain in back; between the shoulder blades any pressure on spinal column produced a violent and long-continued pain, so that she had a well-marked spinal irritation.
‖Constant, watery, curdy and ichorous discharge without pain except after a fresh cold; pain drawing, shooting < at night and from change of weather or movement, also after being long seated.
‖External meatus dry at outer portion, ulcerated farther in and at drumhead.
‖Child bores into its ears with fingers when asleep, causing a discharge of blood and pus; it enjoys having the ear cleansed.
‖Feeling of sudden stoppage in ear, > by gaping or swallowing.
‖Hissing sounds in perforated ear.
‖Increased secretion of thin cerumen.
‖‖Otorrhœa: offensive, watery, curdy; with soreness of inner nose and crusts on upper lip, after abuse of mercury; with caries.
‖Constant discharge, usually thin and watery, sometimes ichorous and curdy, from r. ear; quite deaf on affected side; after scarlatina, six years ago. θOtorrhœa.
‖Purulent discharges from ears.
‖Swelling of external ear, with discharge of pus from ear.
‖Discharge of bloody mucus. θSuppuration of middle ear.
‖Offensive discharge from ears, of several years' standing, with soreness of inner nose and crusts on upper lip. θOtorrhœa scrofulosa.

Digitized by Google

Discharge from ear after abuse of mercury.
Chronic sinus in front of l. ear; an ill-conditioned fistulous wound, had existed three years.
For six days pain in mastoid region; membrana tympani highly injected; tuning fork heard indifferently on either side when pressed against parietal bones; temperature 102; very weak and nervous; complete muscular paralysis of r. side of face; found some relief and sleep by placing head in a warm poultice of Indian meal. θMastoid periostitis.
Child puts hand behind ears. θScarlatina.
Caries of mastoid process.
Scabs behind ears.
Itching of outer ears.
Hard swelling of parotid; suppuration, especially if slow, painless.

Smell and Nose. Loss of smell.
Smell of blood or of recently slaughtered animals. θChronic coryza.
Fetor from nose. θNasal catarrh.
Nosebleed.
Complete stoppage of nose, could scarcely speak.
Soreness on back of nose as if nasal bone had been beaten.
Drawing in root of nose and in r. malar bone.
Itching in nose.
Much sneezing, sometimes ineffectual; with acrid coryza.
Painful dryness of nose.
Troublesome itching, feeling of dryness in nose extending to forehead and antrum; periosteum is affected.
Dryness and stoppage after checked foot sweat.
Long-continued stoppage of nose from hardened mucus.
Coryza: fluent; violent for several weeks; dry, could not get air through nose; long-lasting, oft-returning; acrid, corroding; chronic, with swelling of mucous membrane; constant.
Nose stuffed up, or alternately dry and fluent; obstructed mornings, fluent during day.
With every fresh cold, stoppage and acrid discharge; makes inner nose sore and bloody.
Obstruction of nose in morning, followed by coryza during day.
Discharge of acrid water from nose, making inner nose and nostrils sore and bloody. θChronic coryza.
Food and drink rise into choanæ.
Nose inwardly dry, excoriated, covered with crusts.
Swelling of nasal mucous membrane. θChronic coryza.
A smarting, painful scab deep in r. nostril.
Gnawing and ulcers high up in nose, with great sensitiveness of place to contact.

Google

Sore, painful scabs below septum of nose, with sticking pain when touched.

Ozæna with fetid, offensive discharge when the affection is seated in submucous connective tissue or in periosteum.

Offensive smelling nasal catarrh; every morning blows from nose hard, dry masses of mucus, followed by a quantity of offensive-smelling pus; headache; lassitude; loss of appetite; miserable appearance; profuse, offensive-smelling foot sweat; excoriation between toes when walking much.

Chronic catarrh: with stoppage of nose, loss of smell and taste; slimy, tough, purulent secretion stopping frequently in morning; swelling of nasal membrane; chronic inflammation of tonsils and painless swelling of submaxillary glands; tough slime in fauces, with hoarseness and rough cough; stoppage in morning followed by thick, green-yellow fetid masses after getting up; frontal sinuses inflamed, with pounding and throbbing pain in forehead; fauces dry and painful; uvula swollen; Eustachian tubes itching; chronic inflammation of tonsils and swelling of submaxillary glands.

Miss A., æt. 26, lymphatic and delicate, suffers since two years from inflammation of nasal duct, discharging large clots of blood mixed with dry mucus of a very foul smell; corner of eye red, oculo-palpebral mucous membrane slightly inflamed and itching, sac on l. side swollen so that the sore appears larger; frontal headache.

Caries of nasal bones from syphilis or scrofulosis.

Intolerable itching of tip of nose.

Man, æt. 48, ten years ago was much shocked on seeing tip of a friend's nose destroyed by cancer; since then his own has itched intolerably, < when thinking of it, and often keeping him awake at night.

Voluptuous itching about nose obliges constant rubbing in evening.

Tip of nose red.

Nose cold.

Herpetic eruption around nostrils and lips.

Burning, shooting pains in tip of nose flying up to forehead.

Tetters on nose (after *Calc. ostr.*).

Upper Face. Face: pale; cachectic, body cool, sweaty; earthy; yellow, distorted; waxy; white and red spots.

Paleness of face before fainting.

Pale, cachectic appearance. θEczema capitis. θCancer of lip. θPanaritium. θCoxalgia. θMastitis. θTumor of eye. θCcaries of tibia.

Google

‖Yellowish color of face. θGastralgia. θPerforating ulcer of stomach.
‖Face emaciated, pale, yellowish. θAbscess of l. arm after dissecting wound.
|Rhagades about lids and lips.
|Skin of face cracks.
|Acne on forehead and back of hands.
Face distorted, eyes closed.
|Neuralgia of face, head, eyes, teeth and ears; pains < after being in bed a short time.
‖Boring, tearing pains day and night, < during night, spreading over whole chest, also in bones of face.
|Prosopalgia; with hemorrhoids; with affection of periosteum; itching, with sensation of dryness in inner nose, extends into frontal cavities and antrum; with small lumps and nodules on scalp and face.
‖Large hives on face and body before appearance of caries on lower jaw; after caries got well, vesicles appeared on whole body, with fever.
‖A thick crop of papules on forehead, face and back of both hands. θAcne.
‖Slight papular eruption upon forehead, similar to varicella. θPertussis.
‖An induration extending from l. corner of mouth to a great portion of cheek.
‖Induration of cellular tissue on one side of face, after parulis.
|Lupus; serrated ulcers, with greyish purulent surfaces; corroding, threatening to perforate cheek.
‖Lupus; whole face corroded; tubercles on face, with ulceration of their apices; suppressed perspiration of feet (improved).
‖Lupus in face, at interior extremity of cicatrix a deep ulcer threatening to perforate cheek, border of ulcer serrated, its surface greyish, bathed in a purulent sanies.
‖Lupus in face, began on r. ear lobe, healing one side, corroding on other, advancing downward and forward, leaving irregular cicatrix (after *Bellad.*).
|Comedones.
‖Swelling on r. cheek, made its appearance after scratching a pustule; burning pain on centre of swelling formed a black vesicle which broke and discharged burning ichor.
|Red spots on cheeks with burning heat.
|Blood-boils on cheeks.
Sycosis menti.
|Herpes on chin.

Lower Face. |Articulation of jaw spasmodically closed.

Rheumatic pains in jaw and decayed teeth extending to temple.
Aching of both jaws.
‖Pricking and lancinating pains in region of r. inferior maxillary, with cancerous diathesis.
‖Pains more in jawbone than in teeth, swelling of jaw.
‖Bony swelling of the inferior maxillary, size of half a walnut.
▮Swelling and caries on lower jaw.
‖Caries of l. lower jaw.
▮Necrosis of lower jaw.
Boil on chin, with stinging pain when touched.
Ulceration of corners of mouth.
Painful ulcer in corner of mouth.
Corner of mouth ulcerated with an itching sensation with scabs for many days.
▮Nose and lips large, swollen and distorted.
▮Dry and parched feeling of lips.
‖Foam at mouth. θEpilepsy.
Swelling of lower lip.
‖Blisters on margins of lips.
▮Scabby eruption on lips, which smarts.
▮Large, hard, brownish crusts on lips, especially about corners of mouth.
‖Woman, æt. 61, cancer of lower lip after having picked lip. θCancer of lip.
‖External third of lower lip on r. side swollen and congested with an induration size of an apricot-stone in centre of swelling, on red border superficial ulceration with greyish base; excrutiacing pain. θCancer of lower lip.
‖For more than a month, felt an itching, sometimes burning, in a very circumscribed spot in a part of lower lip, finally succeeded by intolerable shooting pains; a hard spot became perceptible in thickness of lip which soon made its appearance externally in shape of a conical pimple; tumor soon became black, wrinkled and as large as a good-sized hazelnut.
▮Cancer of lower lip; ulcer greyish, superficial, excruciatingly painful.
▮‖Painful or painless swelling of submaxillary glands.

[10] **Teeth and Gums.** ‖Difficult dentition: teething delayed; gums sensitive, blistered; frequently grasping at gums; scrofulous children having worms, with profuse salivation; fever toward evening and all night with heat in head; difficult stools; stool recedes before child can effect its passage; feet smell badly, notwithstanding every effort to prevent it; profuse sour-smelling perspi-

Google

ration upon head in evening; fontanelles large, head larger in proportion than rest of body; protruding gum seems blistered and is sensitive; stools when loose are usually dark and sometimes offensive.

▮Teeth feel too large and too long for the mouth.

▮Looseness of teeth.

Teeth loose and gum painful to slightest pressure.

▮Caries of teeth, pains < at night and on inhaling cold air.

▮Throbbing toothache, swelling of periosteum.

▮Stinging toothache, preventing sleep.

Constant aching in all the teeth.

▮▮Neuralgia in all the teeth, with heat and tearing pain in head; constant spitting of tenacious slimy saliva; raging at night; not affected by cold or warmth.

In scrofulous and rachitic subjects with carious teeth toothache is particularly < at night from inhaling cold air.

▮Throbbing toothache with swelling of periosteum or lower jaw, where the pain is more severe than in teeth; unable to sleep on account of general heat; every hurt festers and is slow to heal.

▮▮Erysipelatous swelling on gums and roof of mouth after extraction of teeth.

▮Tedious, boring, tearing pains day and night, < during night, spreading over whole cheek, and into bones of face; discharge of offensive matter from openings near roots of teeth or from gums; swelling of jaw.

▮Burning stitching in several teeth, < at night, < by cold air in mouth, with heat in head and burning in chest; pain in submaxillary glands, with or without swelling.

Gum is painfully sensitive on taking cold water into mouth.

▮▮Gums very sore, inflamed; gum-boils.

Cool feeling in upper gums, soreness of palate, lips feel much parched.

▮▮Tumor, size of a walnut, in place of two bicuspid teeth.

" **Taste and Tongue.** ▮Taste: of blood, morning; of soapsuds; bitter, morning, with thick mucus in throat; of rotten eggs.

▮Loss of taste and appetite.

▮Water tastes badly; vomits after drinking.

▮Tongue feels sore.

Sensation as if a hair were on tip of tongue extending into trachea, where it causes a crawling so that he is frequently obliged to cough and hack.

▮▮Whitish, trembling tongue. θAbscess of l. arm.

Soreness of tongue.

▮Tongue coated with brownish mucus.

Digitized by Google

Glossitis.
Indurations in tongue.
Ulcer on r. border of tongue eating into it and discharging a great deal of pus. θCarcinoma.
One-sided swelling of tongue.

[13] **Inner Mouth.** Acidity in mouth, after eating.
Bad odor from mouth in morning.
Constant dryness in mouth; without thirst.
Accumulation of mucus in mouth.
Saliva runs out of mouth.
Inflammation and suppuration of salivary glands.
Irritable condition of mucous membrane of mouth; skin of body pale and flabby. θNeuralgia.
Stomacace; mouth gangrenous, with perforating ulcer of palate.

[13] **Throat.** Soreness of palate, which assumed a pale yellow color.
Swelling in palate; swelling of uvula. θChronic coryza.
Fauces affected, dry painful throat. θChronic coryza.
Tough slime in fauces.
Hawking up of thick, green, yellow, fetid mucus, or yellow, very offensive balls.
Swelling in front of throat, region of thyroid body extending around to parotids, commencing on l., extending to r. side, cannot move, holds neck stiffly.
Sensation as of a lump in r. side of throat; she could only swallow with great difficulty.
Pricking in throat, as from a pin, causing cough, l. side.
Tonsils swollen, each effort to swallow distorts face.
Tonsillitis when suppurating gland will not heal; pus continues to flow, but gets thinner, less laudable, darker and more fetid.
Periodical quinsy.
Inflammation of tonsils when too late for absorption.
Chronic inflammation of tonsils.
Throat feels as if filled up, as if he could not swallow; frequent cough bringing up white, frothy, saltish mucus; < toward evening.
Swallowing painful, no inflammation. θHysteria.
Sore throat, as from a lump in l. side, on swallowing.
Burning in throat.
Dryness of throat as from a cold.
Soreness of throat, as if he swallowed over a sore spot, at times stitches in it.
Pressive soreness on l. side of throat when swallowing.
Sticking sore throat only on swallowing, with pain in throat even to touch.
Feeling as if throat were filled up, as if he could not swallow. θChronic sore throat.

Google

after eating; stool delayed two or three days; constant severe cough all day, awakening her at night, < from motion; scanty, slimy expectoration; sensation as if sternum were grasped; tearing in limbs, stitches, and a dropping or running sensation; muscles weak, flabby; emaciation; after eating, chilliness along back, congestion to head, heat in face, slight burning in soles of feet; feet icy-cold in evening; sweat on slight motion, profuse and debilitating in morning in bed; pulse small, weak, rapid, irregular; lassitude, desire to sleep, restless sleep, at night suddenly starts from sleep, trembling and frightened; despondency. θHepatic disorder.

‖Liver complaint with obstinate constipation; want of expulsive power in rectum; hardness and distension in region of liver; abscesses; throbbing, ulcerative pain < from touch and motion; < at night and during new and full moon; scrofulous diathesis.

‖Neurosis of chest with pain in region of spleen and indescribably quick breathing.

Morbus maculosis Werlhofii, with disorganization of spleen.

19 **Abdomen.** ‖Pressure in abdomen, especially after eating, clothing feels too tight.

‖Tightness transversely across abdomen.

Abdomen constantly hard, greatly distended, making him very uncomfortable.

‖Hard, hot, distended abdomen, especially in children.

‖‖Large abdomen in children.

Abdomen feels thick and heavy like a weight.

Abdomen hot, tense, constant rumbling and grumbling in it, diarrhœa.

‖‖Flatulence: much rumbling; incarcerated; very offensive; shifting; difficult to discharge; with costiveness; with distended abdomen; rumbling and gurgling in abdomen; fetid, smelling like wet brass.

Violent cutting in lower abdomen with incarcerated flatus; every step is painfully felt.

Colicky pains in lower abdomen, with straining and increased pain during stool.

‖Tenderness about hernial tumor.

‖Colic: from worms; with constipation or difficult stool; with yellow hands, blue nails; with reddish, bloody stools; > by warmth.

Momentary pinching pain at navel.

Cutting pain in region of navel going through to back and coming on at intervals.

‖‖Abdominal pains relieved by warmth.

‖‖Abdominal dropsy; effusion so great that his weight was thirty-six pounds in excess; frequent attacks of

Google

watery diarrhœa, lasting several days, leaving him exhausted, emaciated and unable to leave his bed; would then rally and filling-up process recommence.

‖Rhagades and cracks on surface of abdomen.

‖Discharge of pus, intestinal gases and fecal matter through abdominal fistula.

‖Inflamed inguinal glands, painful to touch.

‖Inguinal hernia.

‖Mr. D., æt. 67; abscess in r. groin, hernia both sides; irritation of truss the supposed cause; syphilitic taint; tumor increased till it contained as much as two gills of matter; got well without breaking; both hernia got well without further treatment.

Stool and Rectum. ‖Stools: frequent, scanty, liquid, offensive as carrion; pasty; paplike; offensive; contain undigested food, with great exhaustion, but painless; mucous, followed by itching in anus; watery, weakening; liquid, slimy, frothy, mucous or bloody; mushy, horribly offensive; purulent; cadaverous-smelling; putrid; sour (during dentition).

‖Diarrhœa: from exposure to cold air; after vaccination; with griping pains in bowels; in morning before rising, from 6 to 8 A.M.; watery, weakening; chronic, from ulceration of bowels; in thin, scrawny children with sweaty head and sweaty, offensive-smelling feet; child very much emaciated, nurses well but food passes through undigested, open fontanelles; much perspiration about head; great thirst; emaciation; cold hands and feet with cold sweat on them; rolling of head; suppressed secretion of urine.

Before stool: pain in bowels.

During stool: chilliness and nausea in throat; colic; itching and stinging in rectum; piles; succus prostaticus.

After stool: burning and smarting in anus; remission of abdominal pains; pressing and burning in anus; burning in prepuce; eructation.

‖Child, 1 year old; on mother's side dyscrasia, scrofula, softening of brain, tuberculosis; teething process delayed; relapsing summer complaint; feet very dry and smelled like an old person's.

‖Natural stool, evacuated with much pressure and straining.

‖‖Constipation: very hard, unsatisfactory stools, with very great effort; constant but ineffectual desire for stool in evening; stool dry, hard and light-colored; stool very hard, followed by burning in anus; very hard, nodular, like clay stools, evacuated only with great effort; stool scanty, difficult, after great urging and straining until

Google

abdominal walls are sore, the stool that has alredy protruded slips back again; stool remains a long time in rectum as if there were no power to expel it; from inactivity in rectum, with pain and ineffectual desire for stool; prolonged efforts during stool render muscles of abdomen sore; before and during menses; stool comes to verge of anus then slips back into rectum; with spinal affections, as if rectum were paralyzed.

‖Loss of expulsive power with a large but soft stool.

‖Constipation; large slime-covered feces; stools five to seven days apart and occurred then only upon use of injections or cathartics; copious sweat on head and face directly upon falling asleep; child, æt. 8 mos., suffering since birth.

‖In rectum: sharp stitches when walking; jerking, almost dull sticking pain; cutting; stinging; burning, stinging, itching during stool.

‖Hemorrhoids; intensely painful, boring cramping from anus to rectum or testicles; protrude during stool, become incarcerated; suppuration; discharge of bloody mucus from rectum; intense pain with slight protrusion.

‖In anus: tension; boring cramplike pain extending into rectum and testicles; pain as if constricted, during stool; sticking; burning after a dry hard stool; itching; stitches and shooting pains; moisture.

‖Fissura ani, great pain half an hour after stool, lasting several hours.

‖‖Fissura ani and fistula in ano.

‖‖Aching, beating throbbing pain in lumbo-sacral region, with occasional perineal tumefaction which discharged blood and pus; constipation, stools slipping back after much effort; great anxiety.

‖‖Fistula in ano; also with chest symptoms.

21 **Urinary Organs.** ‖Suppuration of kidneys; abscesses.

‖Diabetes mellitus.

‖Purulent blennorrhœa of bladder.

‖Tenesmus of bladder and anus.

‖Paralysis of bladder.

Obliged to rise nearly every night to urinate.

Desire to urinate without emission.

‖Continuous urging, with scanty discharge; also at night.

‖Weakness in urinary organs; constant desire to urinate.

‖Profuse urination relieves headache.

‖Involuntary micturition at night; also in children, with worms and in chorea.

‖‖Nightly incontinence of urine, after a blow upon head, when three years old, in a girl æt. 7.

Google

‖A boy, æt. 15, troubled ever since his recollection with nocturnal enuresis nearly every night, until he was thirteen, when he left home; by a strong effort of will and care it was not so frequent, but still quite beyond his control.

‖Enuresis nocturna, complicated with worms or chorea.

‖Urine: light-colored; suppressed; turbid; sediment of red or yellow sand.

During urination: burning and soreness in urethra; pressure in bladder; itching of vulva; cutting pain.

Strangury.

After urination: involuntary discharge of urine.

Suppression of urine.

‖Renal and vesical calculus.

[21] **Male Sexual Organs.** ‖Sexual desire increased, or decreased.

‖Painful erections, before rising in morning; frequent violent erections.

‖Sexual erethism, with spinal or paralytic disease.

‖After an embrace, sensation on r. side of head as if paralyzed with soreness of limbs.

‖Lascivious thoughts and dreams; nocturnal emissions, followed by great exhaustion; prostatitis.

Violent erections without sexual desire.

‖Sexual desire very weak.

‖After masturbation seminal emissions twice a week, between 3 and 5 A.M.; great depression of spirits; aching in sacrum; sweat of scrotum; heat in head; burning of feet with sweat; weakness and heaviness of arms; melancholy; < A.M. and before an emission; > after an emission.

‖‖Discharge of prostatic fluid while straining at stool.

‖Prostate gland enlarged, without pain, but irregularly indurated, one point being hard, another soft.

‖Prostatitis; suppuration, thick fetid pus from urethra.

‖Gonorrhœa, with thick fetid pus; < after exertion to the extent of sweating.

‖Gonorrhœa; pus or puslike bloody discharge; slight shreddy discharge.

‖Chronic syphilis; suppurations and indurations.

‖Chancres: with raised edges; inflamed, painful, irritable, discolored; thin bloody discharge; granulations indistinct or absent.

‖Red spots and itching on corona glandis.

‖Painful eruptions on mons veneris; itching, moist or dry eruptions of red pimples or spots on genitals. θSyphilis.

‖Slight swelling of penis and testicles.

‖Squeezing pain in testicles.

Google

At the height of chill penis and testicles are hot.
Sharp pricking pains in penis.
Prepuce red and itching; swollen and itching humid pimples on it.
‖Itching moist spots on genitals, mostly on scrotum; sweat on scrotum.
‖Pale-red, sensitive swelling hard as a stone extending from l. inguinal region across mons veneris, with burning stinging tearing pain in swelling, sacrum, and l. thigh, preventing sleep; slimy fluid discharges from two fistulous openings.
‖Hydrocele; men and scrofulous children.

[21] **Female Sexual Organs.** ‖Sterility.
‖Increased sexual desire, with paralytic or spinal affections.
‖She feels nauseated during coition. θUterine cancer.
‖Nymphomania due to plethora or spinal irritation.
‖Prolapsus uteri in consequence of myelitis.
‖Serous cysts in vagina.
‖Pressing-down feeling in vagina.
‖Indurations of cervix uteri.
‖Ulceration of neck of womb and os.
‖Periuterine cellulitis; areolar hyperplasia.
‖Metrorrhagia of six weeks' duration in a washerwoman who attributes her sickness to constantly standing in cold water.
‖Metrorrhagia: offensive foot sweat; icy-cold body; painful hemorrhoids.
‖Bloody discharge between periods.
‖Menses: too early and scanty; too late and profuse; irregular, every two or three months; during lactation; strong-smelling, acrid; repeated paroxysms of icy coldness over whole body.
‖Before menses: pressing pain in forehead; violent colic, shuddering all over body whole day, acrid leucorrhœa; sensation as if vulva were enlarged, with soreness in perineum.
‖During menses: pain in abdomen; tearing pain in tibia; toothache and obscuration of sight; violent pressure in forehead, with discharge of plugs from nose; constipation; sensation as of a heavy lump in anus; cold feet; burning and soreness about vulva; eruption on inside of thighs; drawing between shoulders; melancholy, anxiety and weariness of life.
‖Discharge of a quantity of white water from uterus instead of menses.
‖Amenorrhœa with suppressed foot sweat; pain in abdomen.

Google

‖‖Mucous surfaces of external genitals red, vascular, moist and exquisitely sensitive to touch; married six months, but there was no possibility of sexual intercourse; examination of internal surfaces impossible without inducing anæsthesia artificially; chronic headache of a pressing, pulsating or tearing character, < by mental exertion, stooping, talking, or cold air; > by warmth and warm wraps; frequently profuse, sour perspiration on head in evening; tendency to take cold in head from slight causes, especially if head is uncovered; weight or pressure in vagina, with painful bearing down, vagina being tender to touch. θVaginismus.

Discharge of a quantity of white watery fluid from vagina.

‖‖Serous cysts of vagina; vaginal fistula.

‖‖Itching of pudenda.

‖Violent burning and soreness of pudenda, with eruption on inner sides of thighs, during menses.

‖Itching of vulva; acrid leucorrhœa.

‖Ascarides of vulva.

‖‖Leucorrhœa: profuse, acrid, corroding; milky, preceded by cutting around navel; causes biting pain, especially after acrid food; during urinating; in gushes; with cancer of uterus.

‖‖Profuse, yellow, excoriating leucorrhœa; discharge tenacious; astringent injections produced a peculiar sensation at pit of stomach; continual headache; feels > with head covered up warmly.

‖‖Inflammation, induration, and suppuration of breasts; fistulous ulcers, discharge thin and watery or thick and offensive; substance of mamma seems to be discharged in pus; one lobe after another ulcerates and discharges into one common ulcer, often with pain, or there may be several orifices, one for each lobe.

‖Inflammation of nipples; they crack and ulcerate.

‖‖Hard nodular tumor of breast.

‖‖Scirrhus of r. breast in an old lady, æt. 70; great itching of swollen gland.

‖‖Scirrhus mammæ, in a woman æt. 40, weakly constitution; since frequent catarrhal affections, somewhat asthmatic; for some time observed a lump in r. mamma; near nipple toward right, a scirrhus as hard as cartilage, of uneven surface, movable, and size of a hazelnut.

‖‖A lady, æt. 65, thin; for six months a tumor of r. breast, making it twice natural size; had itch twenty years ago; palpation showed fluctuation; trochar detected pus; further examination showed carious rib.

[21] **Parturition. Pregnancy. Lactation.** ‖Threatened abortion; hemorrhage after abortion.

Google

‖Hemorrhage after abortion, < from least motion, mental or sexual excitement; painful hemorrhoids and obstinate constipation.

❙Promotes expulsion of moles; shooting pains.

❙Nausea and vomiting of pregnancy; menses had been accompanied by palpitation.

Soreness and lameness of feet from instep to sole, during pregnancy.

❙Too violent motion of fœtus.

❙After-pains felt in hips.

Suppressed lochia followed by boring pain in l. temple, l. supraorbital nerve, and orbit of eye; < by talking, or mental exertion; before suppression, nursing produced a venous metrorrhagia.

❙❙While nursing: sharp pain in breast or uterus, pain in back, increase of lochia; pure blood flows every time child nurses; complains every time she puts child to breast.

❙❙Aversion to mother's milk; child refuses to nurse, or if it does nurse, it vomits.

❙Milk suppressed.

❙Mammæ swollen, dark red, sensitive, burning pains prevent rest at night.

❙❙Hard lumps in mammæ.

❙Great itching of swollen mammæ. θScirrhus.

❙Inflammation of nipples.

❙Darting, burning in l. nipple.

❙Nipple is drawn in, like a funnel.

‖Scirrhus near r. nipple, hard as gristle, uneven surface.

❙Nipple ulcerates; is very sore and tender.

❙Hard-edged fistulous ulcers remaining after mammary abscesses.

❙Fistula of mammæ discharging serum or milk.

❙Rhagades of mammæ, or other parts covered with delicate skin, or on parts affected by tettery eruptions.

‖Pain in nodular swelling of l. breast, cutting pains in abdomen.

❙Inflamed breast, deep-red in centre, rose-colored toward periphery, swollen, hard and sensitive to touch; constant burning pain prevents her from resting at night; high fever, face sunken, but excited. θMastitis.

* **Voice and Larnyx. Trachea and Bronchia.** ❙Hoarseness, roughness of larynx.

❙Husky voice; < in morning; chronic coryza.

‖Fibrous, painless swelling of larynx, connected with thyroid cartilage.

❙Foreign bodies in larynx.

❙Laryngeal morning cough commencing immediately on

Google

rising, with tough, gelatinous and very tenacious expectoration.

‖Bronchial affections of rachitic children; copious purulent or transparent expectoration.

Tickling in larynx with slight cough and hoarseness.

Roughness and soreness in trachea and bronchia.

[36] **Respiration.** Deep sighing breathing.

‖Shortness of breath and panting from walking fast, or from manual labor.

‖Dyspnœa: when lying on back; when stooping; when running; also after running; when coughing.

‖Oppression of chest, cannot take a long breath.

‖Asthma: < when lying down; spasmodic cough; spasm of larnyx; pulsations in chest; often with profuse, purulent sputa; cannot bear a draft of air on back of neck.

‖Nervous asthma, dry spasmodic cough; oppression does not permit him to lie down or stoop; spasm of larynx and pulsations in chest.

‖Breathing so difficult that eyes seemed to protrude from their sockets and the doors and windows had to be thrown open; attacks came only during a thunderstorm.

‖Hay asthma coming on about the last of August.

[37] **Cough.** ‖Cough: dry, with hoarseness; with soreness in chest; excited by tickling in throat pit; hollow, spasmodic; loose, day and night; with profuse expectoration; vomiting of tenacious mucus in morning; with thick purulent sputa; awakens him at night; < from motion; scanty mucous expectoration; especially troublesome after lying down in evening and after waking in morning; hacking caused by nightly tickling in pharynx; at first caused by tickling in throat, gradually seeming to come from lower down in throat until it came from chest and shook the abdomen, during day consisting of sudden explosive coughs without expectoration, < in evening.

‖Cough and sore throat with expectoration of small badly smelling granules.

‖Cough with purulent expectoration; prevented the ulcers in lungs from spreading.

‖Phthisis; cough with profuse expectoration, vomiting of tenacious mucus in morning, during attack of cough; dyspnœa; blood-spitting; night sweats.

‖Child 3 years old, strongly marked scrofulous constitution; suffocative cough; obstructed, difficult, rattling respiration; profuse expectoration of purulent matter; great emaciation; frequent, copious, fetid, papescent stools, with great exhaustion; slight pustular eruption, (similar to varicella) upon forehead.

Google

‖Cough < from cold, > from warm drinks. θChronic bronchitis.
‖Influenza with difficulty of hearing, at times ringing in ears.
‖‖Stonecutters' pulmonary affections, copious fetid expectoration.
‖‖After artificial evacuation of an empyema continuing suppuration, hectic fever, emaciation, night sweats and diarrhœa. θPhthisis.
‖‖Expectoration: profuse, fetid, purulent, green; only during day; of viscid, milky, acrid mucus; at times pale frothy blood; tastes greasy; makes water turbid, that which sinks to bottom has an offensive odor; when thrown into water falls to bottom and spreads like a heavy sediment.

Inner Chest and Lungs. ‖Lungs feel sore.
‖Stitches in chest and sides through to back.
‖Excruciating deep-seated pains in chest.
‖Pain under sternum.
‖Painless throbbing and beating in breast bone.
‖Sticking pains in chest on inspiration.
Pressive pain in sternum toward pit of stomach.
‖Pressing pain, stitches; general sensation of weakness in chest; can hardly speak, is so weak. θPhthisis.
‖‖Severe stitching pain in r. lung two inches below nipple, extending through to back; < on motion of any kind and deep breathing.
Painful stitches in chest, shooting from sternum around to back.
Tensive pain across chest lasting for some hours.
Tight feeling around chest, as if she were tied in with a tape.
Pressure at lower sternum as from a stone; pain under sternum.
‖‖Inflammation of lungs resulting in suppuration.
‖Dropsy of chest, or empyema; motion produces severe palpitation of heart; from anæmia and lack of nutrition; also in stonecutters.
‖Empyema after pleurisy.
‖Congestion to chest; body chilly.
‖Chronic neglected pneumonia, passing over into suppuration.
‖‖Chronic bronchitis and phthisis.
‖Phthisical abscess of lungs; formation of cavities.
‖‖Several attacks of hæmoptysis, after which he gradually declined; about eight months afterward large cavity in r. lung at second intercostal space about three inches to r. of sternum; heavy râles in l. bronchus with decided in-

dications of breaking down of parenchymatous structure and cavernous lesions there, also sputa very heavy and largely purulent; cadaverous odor present, musty and offensive; no appetite; could hardly sit up long enough to have bed made; skin cold, clammy; drenching night sweats; marked absence of vital warmth. θPhthisis.

‖Hemorrhage from lungs for nine months; cavities in both lungs; symptoms of septicæmia from absorption of pus from cavities; clammy, cadaverous sweat covering whole body, which had the feeling as if mould was forming; no appetite; large quantities of thick, heavy mucopus, largely purulent. θConsumption.

‖Stonecutters' consumption.

» **Heart, Pulse and Circulation.** ‖Palpitation: while sitting, the hand in which he is holding something trembles; violent hammering after every quick or violent motion; and throbbing over whole body while sitting.

Awoke with rapid pulse, palpitation and sensation of heat.

Orgasm of blood at night; throbbing in all the vessels.

The circulation is easily agitated.

‖Heart troubles from nervous exhaustion.

‖Pulse: small, hard, rapid; frequently irregular and then slow; imperceptible, with earthy complexion (carbuncle).

» **Outer Chest.** ‖Painless throbbing in sternum.

‖Tightness across chest; after suppressed foot sweat.

‖Sensation as if a hand had grasped her breast bone. θChronic hepatitis.

‖A scrofulous child æt. 11, swelling size of a plum, occasioned by closing of an issue; between fifth and sixth ribs on r. side, below nipple.

A man, æt. about 60, had a tumor in l. breast, one and a quarter inches in diameter, and a half inch in depth, the nipple occupying the centre; it slowly increased and became painful, pain sharp, stinging and twinging; almost intolerable itching of whole breast, had an ulcer about three inches long and one inch wide on r. leg, over upper end of fibula, which had been carious and a part of it removed, but the ulcer did not heal. θCancerous tumor.

‖When convalescing from a severe attack of typhoid fever, a tumor appeared in one of the right intercostal spaces, which, after being frequently poulticed, broke open and commenced to discharge first a thick, creamy pus, mixed with some blood, but becoming thinner and more offensive every day; was pale and weak, and the discharge, which, by its long duration, was causing de-

Google

cided harm to the organism, consisted of thin, dirty, fetid ichorous fluid, and the surrounding parts were hard, swollen and bluish; pain in ribs < in a warm room, but as soon as he would go out into cold air (being Winter) his sufferings became unbearable.

‖Necrosis of acromio-clavicular articulation with complete anchylosis of l. shoulder joint.

‖Malignant scrofulous ulcers and fistulous openings of lymphatic glands of neck, with caries of clavicle.

‖Fistulous opening near sixth rib from an abscess, with gnawing pain; a spongy growth size of a nut, broken by fistulous openings, protrudes; fistulous openings have a scarlet border, discharge ichorous, stinking pus.

‖Small tumor in l. breast of a man, æt. 60, with sharp, stinging, twinging pain and intolerable itching.

‖Eruption like varicella, covering breast and itching violently.

An eruption like chicken pox covering the breast, with vehement itching, which obliges one to scratch and rub the affected parts with force.

[31] **Neck and Back.** ‖Pain in nape of neck follows lumbar pain. θSpinal disease.

‖Rheumatism of lower cervical vertebræ.

Stiffness and chilliness at nape of neck, and chilliness all down back.

‖Stiffness: of nape of neck; of one side of neck, cannot turn head on account of pain; of nape of neck, with headache.

‖A recurrent fibroid tumor the size of a hen's egg and very hard in l. side of neck, not connected with parotid, though growing a little below it, he was > by wraping up, even head; timid about going into a new enterprise; lacks confidence in his own ability.

‖Purulent infiltration of tissues of neck, following carbuncle.

‖‖Cervical glands and parotids swollen, indurated.

‖‖Glandular swellings of neck and in armpits, with suppuration.

‖Scrofulous swelling and induration of cervical and parotid glands, coming gradually, of long duration, often attaining an enormous size; hot skin, without pain or redness.

‖‖Boils or carbuncles on nape of neck; anthrax; want of vital warmth; slow progress of disease.

‖Swelling hard, discolored, purplish-red, discharging from an opening near edge, acrid, corroding, stinking, yellowish-green ichor. θCarbuncle.

‖Large dusky patch on front of neck, and another on

nape of neck, extending to scalp, covered with minute scales. θEczema.

Itching pimples, like nettlerash, on nape of neck.

‖‖Swelling and soreness in old cicatricial tissues about neck and breast, the result of scrofulous abscesses.

‖Right lobe of thyroid gland swollen, having the appearance of an elastic cyst.

‖Struma, with suppurating fistula.

‖Rheumatism of lower cervical vertebræ; violent tearing pain between scapulæ.

Tearing pain beneath scapulæ while walking.

Frequent sticking in r. scapula.

‖In small of back: violent pain; pain after stooping; pain as if beaten, at night; pain when getting out of bed in morning; feeling as if dead after suppressed foot sweat; spasmodic pain does not allow him to rise; stiffness and pain on rising from a seat; spasmodic drawing compelling him to lie still.

Weakness of back and a paralyzed feeling in lower extremities, could scarcely walk.

‖‖Pain in curved spine.

Burning in back while walking in open air and becoming warm.

Violent shooting pain in back between hips.

‖Aching, beating, throbbing in back.

Stiff, sore feeling down r. side of spine, then across loins and over r. hip joint.

‖Constant aching in centre of spine.

‖‖Spinal irritation, paralytic symptoms; cold feet; constipation.

‖Aching in loins, shooting down legs.

‖Spinal curvature to the right, painful to touch and motion.

‖‖H., æt. 16, eighteen months ago fell; after first shock felt well until nine months, when pain appeared in sacrum and hip; applied *Rhus* liniment; now suffers from pain from sacrum upward to lumbar region, and across l. ilium to superior spinal process; pain throbbing, < on pressure over lumbar vertebræ, and this, when severe, gives rise to a pain in nape of neck and a sense of loss of power in lower extremities; stooping causes severe pain darting up spine. θTraumatic periostitis of sacrum and lower vertebræ.

‖‖Disease of cervical vertebræ in a boy, æt. 3; when sixteen months old head would fall forward, chin resting on sternum, and he began instinctively to support head by placing hands under chin, and when lifted up, especially if hands were not supporting chin, opened his

mouth in a gaping manner; by-and-by had no longer any power to hold things in hands, soon after the power of walking and then of standing ceased, nor could he even sit up; bowels costive; urine free; intellect precocious; memory excellent; emaciation.

‖ Bony structure of spine affected; chronic gouty nodosities. θ Myelitis.

‖ Caries of lumbar vertebræ.

‖ Spina bifida.

‖ Psoas abscess.

‖ Diseases brought on by exposure of back to draft of air.

‖ Aching in sacrum. θ Spermatorrhœa.

‖‖ Lame feeling in region of sacrum.

‖ Aching, beating, throbbing pain in lumbo-sacral region.

‖ Coccyx hurts after riding; coccygodynia.

Elevated scabby spots on coccyx above fissure of nates.

Stinging in os coccygis, which is painful to pressure.

* **Upper Limbs.** Pain in shoulder and arm at night, > by warm wrappings.

Momentary sharp pain in r. shoulder joint.

Acute pain in r. shoulder blade.

‖ Swelling on l. scapula seven inches broad, five inches long, of thickness of a finger, raised in middle and inflamed, after two weeks it opened in several places and discharged profuse matter.

‖‖ Swelling, induration and suppuration of axillary glands.

‖‖ Offensive axillary sweat.

‖ Bones of arm feel bruised.

‖ Shaking of l. arm; before epilepsy.

Arms and hands feel heavy, paralyzed; as if filled with lead.

‖ Right arm and wrist weak; cannot raise anything heavy.

‖ Arms go to sleep when resting on them; pricking in them.

‖ Limbs tremble; forearm jerks so could not feel pulse; after bleeding.

Numb feeling in r. arm, like pins and needles.

‖ Arms cold after the fever. θ Intermittent.

‖ A child, æt. 2, vaccinated three weeks ago; about ninth or tenth day, arm was inflamed and swollen; in a few days an ulcer as large as a half-penny, excavated, laying bare the muscles, occurred in the spot where the operation had been performed.

‖‖ After vaccination, red and inflamed swellings sometimes extending over whole arm; fever; sickness at stomach; headache; backache; abscess in axilla, etc.

‖ Blood-boils and warts on arms.

‖ Abscess and œdematous swelling of arm after dissection wound.

▮Gouty deposits in large joints of fingers.
▮▮A corroding blister with violent itching on first joint of index finger.
▮▮A robust middle-aged man was bitten in l. thumb by a man, four weeks previous; the thumb was swollen to double its size; the whole length was hot, red; a small opening on the inside of the middle of the first phalanx surrounded by a red elevated margin; the probe could be introduced to ball of thumb; there was great pain on pressure with a very copious discharge of a very offensive fluid, appearing like the yeast of wine; burning, shooting pain, < on pressure, from motion and at night.
A small crack in index finger began to burn and pain, a lymphatic becomes inflamed, extending thence over wrist, and in the sore spot a corroding vesicle forms with burning, pressing, stinging pains.
▮▮Mrs. H., æt. about 50, called to have r. index finger amputated; one year ago she ran a fine splinter of glass into apex of index finger and did not succeed in removing all the glass, as it became finely comminuted; gave no trouble until early last Summer, when end of finger became painful and very sensitive; pain extended up r. arm to axilla, thence to r. side of thorax; some lymphatic swellings and loss of power in r. arm, threatening paralysis; was unable to perform household duties without pain; pain no longer durable; worn out in body and mind; face pale, cachectic; scrofulous diathesis; restless, fidgety; r. arm and wrist weak; felt as if she could not lift or do anything; nails yellow and brittle; insomnia from pain; feels unrefreshed in morning; after *Silica* fine splinters of glass came out; general health improved and she resumed her duties, which are arduous, and has had no more pain or trouble in side, arm or finger.
▮▮Whitlow; panaritium; lancinating pains; inflammation extends deep to tendons and cartilages and bones.
▮▮Burning, itching, stinging, aching in r. forefinger. θWhitlow.
▮Caries on fingers.
▮▮After a bite thumb swollen to double its size, hot, inflamed, painful to pressure.

After cutting one finger and grazing the skin off another the wounds would not heal; they suppurated, pus being a dirty white color; throbbing pain in abraded surface.

Painful hard swelling on middle joint of little finger, with reddened skin over swelling.

Disease of bone of forefinger midway between knuckle and next joint; slight whitish discharge from a minute opening and flesh much swollen and discolored at the place.

Metacarpal bones of first four fingers of r. hand swollen to such a degree that oval, hard, knobby masses of uniform surface were formed; joints obliterated and immovable; in places ulcerated surfaces under which the bones gave a rough sound to the probe; formation of sinuses; no appetite; great pain; drowsiness during day; lassitude and depression.

Bone felons; deep-seated pains; < from warm bed; burning stinging, aching in superficial parts.

Felon on lower third of second phalangeal bone of r. middle finger, from the first very painful and much swollen, preventing sleep; a free opening had been made (lengthwise) an inch long and was now widely spread out in centre, but this had only relieved for two or three hours and it had been much more painful since; it was much swollen and highly inflamed nearly to wrist with a red streak extending nearly to elbow; pain felt up to shoulder, severe throbbing, twinging; ichorous discharge; felt exhausted from pain.

Whitlow on r. forefinger where matter had already formed; the whole finger was swollen, bluish-red and painful to touch; palm of hand also much swollen; in a few days four separate deposits of pus were formed, one in each of the three phalanges, the fourth on metacarpal bone of r. forefinger; the destruction of soft parts was so great that in some places the bone was visible; small necrosed osseous splinters came away from metacarpal bone and the first phalanx.

Run-arounds; ulceration about nails; hang-nails.

Subcutaneous whitlow of r. forefinger; finger swollen, red, on its dorsum a large collection of pus beneath skin; burning, itching, stinging, aching; every little injury caused ulceration.

Nails: rough, yellow, crippled, brittle; white spots; blue, in fever; stimulates growth of new ones.

Great dryness in tips of fingers, in afternoon.

Lower Limbs. Hip joint inflammation.

Hip disease with fistulous openings.

Tearing pain in hips.

Violent bruised sensation in hips and small of back, painful on stooping.
‖‖Suppuration and caries of hip joint; fistulous openings very tender to touch.
‖|Spontaneous luxation of head of femur backward, in a babe eight days old; shortening of limb half an inch.
‖|Severe pain extending from hip to foot; > at night so that she moans and cries and cannot sleep; slightest pressure causes trembling of whole body and at times spasms; cannot move foot; temperature elevated; loss of appetite; great thirst; stool difficult; emaciation.
‖|Sciatica of seven years' standing.
Weakness of lower extremities; great weariness from a short walk.
Heaviness of lower extremities.
Limbs and feet feel very tired and as if paralyzed.
‖Trembling of legs with extreme nervousness.
‖Sensation of loss of power in legs.
‖|Left thigh affected below trochanter. θNecrosis.
Aching pains in loins, shooting down both legs.
Pricking and shooting pain in left thigh.
Dragging feeling from r. hip down to toes.
The femur pains as if beaten while walking, sitting, and lying, even in morning on waking.
Frequent pain in thigh, drawing and sticking.
Drawing in thighs, extending to feet.
Tearing or sticking pain in thighs.
Pulsative sensation in r. thigh.
‖‖Gressus gallinaceus.
‖Phlegmasia with contraction of tissues and sheaths of tendons.
‖|Inflammation of cellular tissue of thigh which has reached double its size, rest of body emaciated; motion and touch cause violent pain.
‖|Abscess on inside of r. thigh; l. ankle and foot swollen.
‖Furuncles on thighs.
‖|Two fistulæ at inferior third of femur. θCaries.
‖|Pains and fistula in upper third of r. leg. θCaries.
‖|Necrosis of femur of two years' standing.
‖|Swollen and necrosed femur with sequesters.
‖|Two fistulæ at inferior third of femur, which (in spite of caustics) refused to close; whole foot swollen and red, and caries easily demonstrated.
‖|Boy, æt. 15, two years ago had a painless soft swelling on outer side of l. femur, just below trochanter, as large as a hen's egg, which in a few days opened and discharged thin, excoriating, watery pus; soon spiculæ of bone of a dark color were thrown out, some almost black and oc-

Google

casionally in form of scales; there were three openings about size of a wheat straw, with elevated rounded edges; limb flexed, walked with the aid of a cane; occasional attacks of constipation, when, after much straining, feces were brought to verge of anus, they seemed to slip back. θNecrosis of femur.

▮Blood-boils on thighs and calves.

▮Weakness of knees.

Knee is painful as if too tightly bound.

Tearing in knees, while sitting, disappearing on motion.

Weakness of legs particularly on descending steps, trembling of knees.

▮▮Violent stinging or lacinating pains in knees. θGonorthrocace.

▮▮Inflammation of knee joint with considerable swelling and lacinating pain deep in joints. θTumor albus of l. knee.

▮▮Left knee joint double size of healthy one, white shiny doughy swelling, temperature but slightly raised, motion limited, leg contracted, moderately emaciated.

▮▮For years inflammation of r. knee; unable to get about at times; joint fully one-half larger than its mate, œdematous and painful on pressure, or from exercise.

▮▮Enlarged bursa over patella.

▮▮Large cyst on r. patella, not inflamed but extremely sensitive to contact, interfering with walking, or working on sewing machine; cold feet, especially at night, and cramps in calves; feet always cold during menstruation. θHygroma of patella.

▮▮Gonocace, pains stinging, lancinating; swelling doughy; fistulous openings with hard edges, discharging greenish-yellow pus.

▮Chronic synovitis of knee with great swelling and anchylosis.

▮▮Gonitis after suppression of gonorrhœa; pale swelling, great stiffness; < at night; sensation of heat in affected part; painful to touch; sweaty skin; restlessness in bed; > from warmth.

▮▮Incipient anchylosis of knee. θCaries.

▮▮In bend of l. knee, thin crusty eruption eating its way and discharging thin, corroding ichor.

▮▮Elephantiasis Arabum; both feet, legs and lower part of thighs affected; back of hand also affected; now and then erysipelatous manifestations.

Red, smarting spot on r. tibia.

Ulcers on lower leg on tibia.

▮▮Caries of tibia.

▮▮A boy, æt. 18 months, injury of tibia after a fall about

nine months ago; almost entirely deprived of use of leg, walked with apparently great pain; upper part of tibia much inflamed, pus discharged from two openings.

‖ Periostitis on inside and anterior ridge of tibia from its upper third to within two inches of ankle.

‖ Boy, æt. 16, lymphatic temperament, from a bruise eighteen months ago, the leg sore, discharging a thin excoriating watery pus; spiculæ of bone were thrown out.

‖ Anterior border of tibia hypertrophied. θ Caries.

‖‖ Caries of tibia and fibula.

Pressive-stinging pain in ulcerating part of leg.

Sticking and burning in and about an ulcer on leg.

Nightly pains in ulcer.

‖ A swelling size of a walnut in r. popliteal space.

Furuncle on calves.

Lameness of legs, < in morning with heaviness in head and buzzing in ears.

When one leg is in great pain the other is quite numb.

‖ Ulcers on lower leg with pale face.

‖ Cold legs and feet after suppressed foot sweat.

When walking sensation as if calves were too short, immediately disappearing on sitting.

‖ Tension in calves as from cramp when walking.

‖‖ Cramps: in calves; in soles.

Calves tense and contracted.

‖ Four months after cutting r. calf of leg with an axe; wound was about three and a half inches long and middle spread out a full inch and filled up with soft fungoid granulations, discharging a thin serous secretion like meat-washings, of fetid odor, which had also traversed down fascia, covering muscles to ankle so as to fill space just above and beside ankle, it got quite full during day, had to raise foot above knee to let it discharge by the opening; cavity was about nine inches deep; whole calf swollen and in hard, knotted bunches, tender to pressure, with dull, heavy aching.

‖ Boils on calves.

‖ Weak ankles.

Spasmodic pain in ankle.

‖ John D., æt. 34, sat with his feet in water; next day glands of neck swollen; a large abscess then formed on inside of r. thigh, and at same time l. ankle and foot swelled up, with formation of pus; seven weeks later abscess in thigh still discharging, and from five to six fistulous openings in ankle and foot a large quantity of unhealthy pus is being discharged; foot enormously swollen; general health greatly impaired; hectic fever;

Google

pulse 130; appetite poor; amputation probable result; openings were enlarged by free incisions; internal malleolus was found to be carious and tarsal bones similarly affected; after *Silica* 2c., one dose a day and warm poultices of linseed meal, there was marked improvement in two weeks; abscess in thigh had closed; after *Silica* 6m., in four weeks more, swelling was almost gone and discharge had ceased; there was slight motion in ankle joint, this gradually improved, and when the man left the hospital several weeks later he could walk with a cane.

‖Weakness of feet.

‖Cannot walk on account of a lameness or soreness in feet, from instep down through foot to sole, and all through that part of foot. θPregnancy.

Painful tonic spasm in feet and toes during a long walk.

Pains through foot from ankle to sole.

Feet insufferably tender.

Burning of feet.

Feet give way under her when walking.

Swelling of feet as far as ankles.

Swelling of feet with redness in which pressure caused a white spot in a short time; with pains extending from toes to malleoli.

‖Man, æt. 55, from wearing tight boots, a blister size of silver quarter on dorsum of r. foot which peeled leaving an ulcer which did not heal, increasing in depth.

‖Woman, æt. 80, sprained toes of r. foot by slipping; signs of abscess here and there; on opening one of them, blood and fluid oozed out; blisters formed; gangrene threatened.

‖Mme. P., æt. 25, in delicate health, had been afflicted for three years with a malady which annually began at commencement of Winter and caused intense suffering for two or three months, during which time she was obliged to remain in bed; there appeared on dorsum of foot, pains, redness and swelling; this became an abscess and suppurated for two or three months with much violent pain; discharge ichorous and sometimes brought away fragments of bone.

‖Caries of tarsus.

Pricking and stitches in l. heel.

‖Cramps in soles.

‖Voluptuous tingling in soles, driving to despair.

‖Caries in bones of heel.

‖Icy-coldness of feet.

‖Hot feet in evening, at other times extremities are cold.

‖Feet very dry, smelled like an old person's. θDiarrhœa of dentition.

Google

Burning of soles of feet.
Intolerably bad, sour or carrion-like odor of feet, without perspiration, every evening.
Foot sweat: offensive, making feet sore; rawness between toes; fetid, suppression causes other ailments; excessive.
Extreme perspiration of feet which were cold in Winter and sore in Summer.
Feet perspire constantly but get easily cold, then follows fainting, afterward great exhaustion; before fainting fit, paleness of face and trembling; must sit down; formerly had nosebleed almost every week.
A young vigorous farmer, who had never been sick, caused a suppression of sweat of his feet by getting them wet; from that time on, two months since, he cannot get his feet warm; feels prostrated and as if beaten all over; has pressure and tightness over chest; small of back and whole of back feel as if dead; in morning nausea and vomiting of slimy substances, whereby he becomes much exhausted.
Suppressed foot sweat: mist before eyes; cataract; continual toothache; loss of appetite; icy-cold feet evenings in bed.
A large corrosive ulcer with violent itching on heel.
Constant violent pain in great toe so that he can scarcely step.
Pains beneath nail of great toe and stitches in it.
Frequent boring pain in great toe.
Tearing in great toe in evening.
Violent stitches in corns.
Stitches in corn, jerking up the feet.
Itching cutting pain beneath toe nail.
Itching, suppurating scabs upon toes that had been frozen.
Ingrowing toe nails.
Ulceration of big toe, with stinging pain.
Enchondroma in a little boy began in index finger, this was amputated; soon the other had the same history and the toe became affected.
Offensive toe sweat.
Drawing feeling in joints of toes as if being pulled out of their sockets.
Caries of l. great toe and metatarsal bone discharging watery fluid through fistulous openings.
Abscess after spraining toes of r. foot.

[34] **Limbs in General.** Trembling of limbs, especially arms.
Weakness in limbs.
Twitching of limbs day and night.
Limbs: go to sleep easily; sore and lame, evenings.

Google

‖Stinging in limbs at night.
‖Limbs cold; transient local sweats of feet and armpits.
‖Rheumatic pains in limbs.
‖Obstinate pains in limbs, < when weather changes; after a cold.
‖‖Tearing pain in limbs, dropping and running sensation.
θChronic hepatitis.
‖Sweat on hands and feet after fever.
‖Frequent ulceration about nails.
‖Nails grey, dirty as if decayed, when cut scattering like powder and splitting into layers.
‖‖Crippled nails on fingers and toes.

[35] **Rest. Position. Motion.** Rest: feeling of waves of water over head >.
Lying down: asthma <; compulsory drawing in back; femur pains.
Lying on side: fainting.
Lying on r. side: pains in liver <.
Lying on l. side: vertigo.
Lying on back: dyspnœa.
Wants to lie down: sense of great weariness; debility.
Must lie down: headache.
Cannot lie down: oppression.
Resting on arms: they go to sleep.
Sitting: long, earache <; palpitation; throbbing over whole body; femur pains; tearing in knees; sensation as if calves were too short disappears; long, great restlessness of body.
Gaping or swallowing: stoppage in ear >.
Must sit down: vertigo.
Stooping: vertigo; headache; renews jerking in forehead; headache <; dyspnœa; pain in small of back; severe pain up spine; bruised sensation <.
Rising from recumbent position: vertigo; impossible; pain in back.
Rising from a seat: pain in small of back.
Motion: vertigo <; headache <; pains in head <; vomiting of bitter, yellow substance; pain in ears <; beating soreness in liver <; cough <; sweat; pain in region of liver <; least, < hemorrhage; pain in lungs; curvature of spine painful; pain in stiff fingers; pain in elbows <; of fingers, flexor tendons painful; of sore swollen thumb pain <; of foot impossible from pain; tearing in knees disappears; of leg limited, swelled knee; muscles painful; causes chilliness.
Opening eyes: pressive pain <.
Writing: tonic spasms of hand.
Sudden turning around: renews jerking in forehead.

Google

Walking: excoriation between toes; beating soreness of liver <; sharp stitches in rectum; shortness of breath and panting; difficult, weakness and paralyzed feeling in back, burning in back; causes great weariness; femur pains; as if calves were too short; tension in calves; long, tonic spasms in feet and toes; feet give way.
Stepping hard: vibratory shaking sensation in head.
Every step is painfully felt; incarcerated flatus.
Cannot step upon r. foot without greatly aggravating pain in liver.
Descending stairs: weakness of legs and trembling of knees.
Exercise: after every, nausea; to sweating gonorrhœa <; inflamed knee painful; want of vital warmth.
Exertion: slight pain and lameness of hand; least, sweat.
Running: dyspnœa.

Nerves. Strong desire to be mesmerized.
Sense of great weariness and debility, wants to lie down.
Great weakness, in morning.
Very weak and tremulous, after walking in evening.
Excessive debility. θTyphus.
Protracted convalescence. θCerebro-spinal meningitis.
Sensation of great debility and sleepiness during a thunderstorm.
Great nervous debility; emaciation; fainting when lying on side.
The child is slow in learning to walk.
Cannot hold things. θSpine disease.
Feels prostrated and as if beaten all over. θSuppressed foot sweat.
Great nervous debility; exhaustion with erethism; depression may be overcome by will force.
Dissipation, hard work, with close confinement, cause obstinate neuralgias, hysterical attacks or paralysis.
Oversensitive persons imperfectly nourished, not from want of food but from imperfect assimilation, they are usually constipated and are subject to sudden neuralgias, erethism and melancholy.
Dreadful trembling in limbs, hands in particular at times quite unable to lift a cup of tea.
Tremulousness when working.
Great restlessness in body when sitting long.
Internal restlessness and excitement.
Restless; fidgety; starts at least noise.
Sensitiveness to cold air; takes cold very easily.
Takes cold easily, especially when uncovering head or feet.
Want of vital warmth, even when taking exercise.

Google

‖The limbs go to sleep easily, especially the parts on which one lies.
Easy orgasm of blood, and constant excitement.
‖Ebullition with thirst from drinking small quantities of wine.
Easily overstrained by lifting.
Bruised pain over whole body, as if he had lain in an uncomfortable position.
Bruised feeling over whole body, after coition.
All the muscles are painful on motion.
‖Progressive sclerosis of posterior column.
Great coldness of whole l. side of body, followed by frequent slumbering and starting up, as if she would go away without knowing whither, then she begins to lose consciousness, speaks unintelligibly, recognizes no one, and becomes so weak that she cannot turn over alone; after this violent convulsion, with staring look, distortion of eyes, twitching of lips, lolling of tongue, stretching and distortion of head and limbs, lasting quarter of an hour.
‖Epilepsy: spasms spread from solar plexus to brain; come at night or at new moon; attacks preceded by coldness of l. side, shaking and twisting of l. arm.
‖‖Convulsions after vaccination.
‖‖Spasms (probably due to worms) in a child, æt. 1½, within three weeks gradually increasing in number until there were fifteen attacks daily, and finally paralysis of r. side.
‖Spasms or paralysis from checked foot sweat.
‖Spasms or paralysis depending on alterations in connective tissue in brain or spinal cord.
‖Spasms; aura, like a mouse running through limbs or from solar plexus to brain; l. side cold; l. arm twists; starts in sleep; moaning, loud groaning.
‖Spasms from slight provocation.
‖‖Woman, æt. 30, epileptic convulsions occurring monthly at exact full of the moon.
‖Paralysis from tabes dorsalis.
‖Progressive locomotor ataxia.

Sleep. Excessive gaping.
Drowsiness with lassitude and depression.
Sleepiness: after eating; in evening.
Restless sleep: frequent waking with chilliness; dreams crowding one upon another; starting with trembling of whole body.
Woke at 2 A.M. and could not fall asleep again on account of rush of thoughts.
‖During sleep: whining and laughing; loud talking;

Google

starts, jerkings of limbs, snoring; night sweats; nightmare.

‖Night walking; gets up while asleep, walks about and lies down again; somnambulism.

‖Child wakes and throws arms about and screams. θScarlatina.

‖Sleep walking at new and full moon. θLumbricoid worms.

‖Sleepy but cannot sleep.

‖Sleepless; from ebullitions, orgasm of blood.

Sleeplessness or sleep broken by lascivious or frightening dreams; heat and congestions.

‖Sleeplessness with tuberculosis.

‖Dreams: pleasant; lascivious; anxious, of murders, horrid things; vivid of past events; with violent weeping; of some one choking her.

‖Night sweats; obstinate morning headache; chilly, nauseated.

Erections and urging to urinate awake him.

‖Feels unrefreshed, wishes to remain in bed.

[38] **Time.** Between 1 and 7 A.M.: violent chill.

2 A.M.: woke and could not go to sleep again from rush of thoughts.

6 A.M.: sweat.

From 6 to 8 A.M.: diarrhœa.

Morning: headaches; violent headache; pressure at occiput and nape of neck; sticking pains in cornea; mucous secretion in eye; agglutination of eyes; nose obstructed; taste of blood; bitter taste; bad odor from mouth; nausea and vomiting; profuse debilitating sweat; diarrhœa; painful erections before rising; husky voice <; vomiting of tenacious mucus; cough after waking; pain in small of back when getting out of bed; unrefreshed; femur pains; lameness of legs <; great weakness; obstinate headache; sweat.

Day: supraorbital pain; coryza; tearing pains in chest and bones of face; sudden explosive cough; expectoration only; drowsiness; chilliness; acne eruption itching only.

Afternoon: violent chill; dryness of finger tips; chilliness; violent heat and thirst.

3 to 5 P.M.: sweat.

5 P.M.: shaking chill.

Evening: terrible headaches; pain in swelling of lachrymal sac <; the flowing tears are hot; itching of nose causes constant rubbing; fever; toward, throat <; acute pain from abdomen to testes; icy-cold feet; constant desire for stool; perspiration on head; cough after lying

Digitized by Google

down; cough <; hot feet; cold feet; tearing in great toe; limbs sore and lame; very weak and tremulous after walking; sleepiness; chill in bed; legs icy-cold; violent heat and thirst; sweat on scrotum.

Day and night: toothache; trembling of limbs.

11 P.M.: sweat.

Night: burning in head <; headache wakes him; sweat about head; tearing in scalp <; head wet from sweating; supraorbital pain; sticking pains in cornea; shooting in ears <; tearing pains over whole chest <; fever; pain in teeth <; neuralgia in teeth raging; toothache <; vomiting of ingesta; pain in region of liver <; urging to urinate, involuntary micturition; burning pain prevents rest; cough wakes him; orgasm of blood; pain in small of back; pain in shoulder and arm; stitches in wrist; falling asleep of hands; pain in thumb <; pain from hip to foot <; cold feet; gonitis <; stinging in limbs; epilepsy; sweats; chilliness; violent heat and thirst; fever <; profuse sweat; itching and pricking in various parts of body <.

" **Temperature and Weather.** Hot compresses: headache >.

Overheating: headaches.

Sitting near fire: shivering; a cold, starved feeling.

Warmth: pains in eyes >; colic >; abdominal pains >; headache >; burning in back; gonitis >.

Wrapping up warmly: burning of head >; feeling of waves of water over head >; chronic sick-headache >; desires it; itching pustules on scalp >; headache >; feels > if head is wrapped; tumor on neck >; pain in shoulder >.

Wishes to keep warmly covered: blennorrhœa.

Warm poultice: > pain in mastoid region.

Warm room: headache >; pain in ribs >; chilliness.

Getting warm in bed: burning and itching of head <; pain in felons <.

After being in bed a short time: neuralgia <.

Contact of warm hand: cephalalgia >.

Warm food: averse to.

Warm drinks: cough >.

Uncovering head or feet: takes cold.

Cannot uncover head: tendency to take cold.

Undressing: burning and itching on back part of head <.

Changing linen: hardness of hearing <.

Open air: headache <; lachrymation; burning in back.

Draft: causes headache; eyes sensitive; cannot bear it on back of neck; on back causes trouble.

Cannot bear cold or heat: headache.

Cold air: headache <; sensitive to, blennorrhœa; bleph-

Google

aritis <; inhaling, toothache <; diarrhœa from exposure; headache <; sufferings unbearable; sensitiveness to.
Change of weather: pain in ears <; pains in limbs <.
Washing: < hardness of hearing.
Cold water: gum is painfully sensitive; dry cough; standing in, causes metrorrhagia.
Cold drinks: desire for; cough <.
Getting feet wet: suppressed foot sweat.
After sitting with feet in water: abscess on thigh.
Just before a storm: ciliary neuralgia.
During a thunderstorm: attacks of difficult breathing come only; great debility and sleepiness.
After exposure to storm: inflammation in eye <.

[40] **Fever.** ‖Want of animal heat; always chilly, even when exercising.
|Suffering parts feel cold.
|Left side suddenly cold; before epilepsy.
|Chill, in evening in bed.
|Frequent chilliness, with occasional feverishness.
‖Chilliness: constant, internal; on every movement, all day; at night, while half awake; in evening; in afternoon, especially in arms, in a warm room; in evening in bed so that he shivered.
Did not dare to put her hands out of bed.
Shaking chill at 5 P.M.
Icy-cold shivering, frequent creeps over whole body.
The legs so far as knees and feet are icy-cold in evening.
Shivering all over, a cold, starved feeling, if he sat ever so near the fire he could not get warm.
Violent chills between 1 and 7 A.M.
|Frequently short flushes of heat, principally in face and head.
|Violent general heat, violent thirst in afternoon, evening and all night.
|Fever < at night.
|Periodical returning heat during day, no previous chill; followed by slight sweat.
‖Sweat: on head; of a strong odor; running from face; wetting pillow; on scrotum, in evening; profuse sweat on hands; only on head and face; from least exertion; warm, after epilepsy; profuse in typhus; periodically 11 P.M., 6 A.M. or 3 to 5 P.M.; profuse at night; on loins; in morning.
|Night sweats; sour and offensive; debilitating; mostly after midnight; profuse from suppuration or in phthisis.
|Fever during dentition.
‖In a child, æt. 21 months, every day on awaking

Google

after morning sleep, about 12 or 1 P.M., fever lasting till 4 or 5 P.M., followed by sweat on hands and feet; with the fever short, quick breathing, cold feet, no appetite; lies still; arms cold and has cutis anserina.

‖ Worm fevers assume a slow chronic form in scrofulous children with large bellies and much perspiration about head.

‖ Hectic fever, particularly during long suppurative processes.

‖ Intermittent fever, heat predominating.

‖ Typhoid forms of fever, great debility, profuse sweat; desire to be magnetized.

‖ Spotted fever; also in slow convalescence.

" **Attacks, Periodicity.** Paroxysms: one or two minutes, jerklike pressure in head; pains in eyes.

Attacks: of whistling breathing and suffocation.

Periodic: headache; heat during day; sweats.

Alternation; symptoms from one eye to the other; dry and fluent nose.

Lasting several hours: pain after stool; pain across chest.

For four hours: tossed in bed with headache.

Every morning: blows from nose hard, dry masses of mucus followed by pus.

Every day; about 1 o'clock, severe burning pains in r. eye; on waking, about 12 or 1 P.M., fever lasting till 4 or 5 P.M.

Daily: fifteen attacks of spasms.

Every evening: intolerable odor of feet without perspiration.

Nightly: incontinence of urine; tickling in pharynx.

Nearly every night: obliged to rise to urinate; nocturnal enuresis.

For several days: attacks of watery diarrhœa.

Twice a week: seminal emissions.

Five to seven days: stools apart.

For six days: pain in mastoid region.

Every seventh day: headache.

Almost every week: nosebleed.

For several weeks: violent coryza.

Every two weeks: menses.

Every two or three weeks: severe headaches lasting thirty-eight to forty-eight hours.

Of six weeks' standing: ophthalmia.

For six weeks: metrorrhagia.

During new and full moon: pains in region of liver <.

At new moon: epilepsy; sleep walking.

At full moon: epileptic convulsions; sleep walking.

For two months: phlyctenular conjunctivitis.

Every two or three months: menses.

Google

For four months: discharge and ulceration under r. lower lid.
For nine months: hemorrhages from lungs.
Last of August: hay asthma.
Summer: scaly eruption on scalp >; sore feet.
Approach of Winter: scaly eruption of scalp <; pain, swelling and suppuration of foot.
Winter: cold feet.
For one year: cystic tumor of lower lid.
For two years: suffered from inflammation of nasal duct; necrosis of femur.
For three years: pain, redness and swelling on dorsum of foot, then abscess.
For years: terrible headaches; inflammation of knee.
Of several years' standing: offensive discharge from ears.
Seven years' standing: sciatica.
Of twelve years' standing: deafness.

[12] **Locality and Direction.** Right: must walk to side, vertigo; stitches in parietal region; persistent speck before eye; cloudiness of lens of eye; cataract; neuralgia over eye; burning pains in eye; conjunctiva injected; pains in lachrymal sac; trachoma of conjunctiva of eye; ulceration of cornea; discharge and ulceration under lower lid; cicatrices over inferior orbital ridge; swelling in region of lachrymal gland and sac; swelling of tear-bag; ichorous discharge from ear; muscular paralysis of side of face; drawing in malar bone; painful scab deep in nostril; lupus on ear lobe; swelling on cheek; pain in region of inferior maxillary; side of lower lip swollen; ulcer on border of tongue; as of a lump in side of throat; lying on side soreness of liver <; below floating ribs ulcerative pain; cannot step upon foot without < pain in liver; abscess in groin; as if side of hand were paralyzed; scirrhus in breast; lump in mamma; tumor of breast; scirrhus near nipple; great itching of swollen mamma; stitching pain in lung; large cavity in lung; swelling below nipple; ulcer on leg; lobe of thyroid gland swollen; sticking in scapula; sore feeling side of spine over hip joint; pain in shoulder joint; acute pain in shoulder blade; weakness of arm and wrist; numb feeling in arm; suppuration of cellular tissue of forearm; lameness in hand; enchondroma on hand; drawing in joints of finger; index finger injured by splinter of glass, pain extending to arm, thence to thorax; loss of power of arm; weakness of arm and wrist; aching in forefinger; bones of fingers swollen; felon on middle finger; whitlow on forefinger; dragging from hip to toes; pulsative sensation in thigh;

Google

abscess on inside of thigh; pains and fistula on leg; inflammation of knee; large cyst on patella; smarting spot on tibia; swelling in popliteal space; wound in calf of leg; abscess on thigh; blister on dorsum of foot; abscess after spraining toes; paralysis.

Left: lying on side, vertigo; sickening pain in side of head; parietal bone is covered with a large, soft, elastic swelling; piercing stinging in eye; pressive pain over eye; shooting pain in ear; pricking, aching, itching in ear; chronic sinus in front of ear; sac swollen and itching; abscess of arm; induration from corner of mouth to cheek; caries of lower jaw; abscess of arm; pricking in throat as of a lump in side of throat; soreness, swelling from inguinal region across mons veneris; tearing in thigh; boring pain in temple, supraorbital nerve and orbit of eye; darting in nipple; pain in nodular swelling of breast; heavy râles in bronchus; tumor in breast; anchylosis of shoulder joint; small tumor in breast; tumor side of neck; swelling of scapula; shaking of arm; a large fleshy wart on forearm; a ganglion on wrist; middle fingers flexed and stiffened; pain in index finger; thumb swollen from a bite; necrosis of thigh; shooting in thigh; ankle and foot swollen; painless soft swelling on femur; knee joint double size of healthy one; eruption in bend of knee; pricking and stitches in heel; caries of great toe; coldness of side; shaking and twisting of arm.

From r. to l.: pain in temples.

First l. then r.: bruised pain above eyes; swelling in front of throat.

From above downward: pressive headache.

From within outward: stitches in ears.

* **Sensations.** Susceptible to nervous stimuli, to magnetism; as if she were divided into halves and that the l. side did not belong to her; as if one would fall forward; vertigo as if drunk; as if head were teeming with live things whirling round in it; headache as if beaten; as if everything would press out and burst skull; as if brain and eyes were forced forward; as if head would burst with throbbing in it, internal and external at same time; as if forehead would be torn asunder; as from a heavy weight over eyes; as if head were forced asunder; as of water pipes bursting in head; as if tremendous weight were falling on vertex; as if some one pulled downward on cords of neck; as if something alive were in ears; head as if in a cushion and some one were pressing two fingers into it at occiput; as if feeling for pins; as if something obscured vision; as if brain col-

Google

lided with skull; head as if bruised; as of waves of water from occiput over vertex to forehead; as if gradually losing senses; sick-headaches as if coming from spine and locating in one eye; head as if too large; as if head were falling off; as if head were hanging by a piece of skin at nape; as if looking through a grey cover; as if cornea were a mass of hypertrophied tissue; eyes as if too dry and full of sand; as of a splinter in upper lid; as if both eyes were dragged back into head by strings; objects as if in a fog; as if nasal bone had been beaten; as if a hair were on tip of tongue extending into trachea; as of a lump on r. side of throat; as of a pin in throat; throat as if filled up; as if he could not swallow; as if he swallowed over a sore spot; as of a load in epigastrium; as if knives were running into her stomach; as if a cold stone were in stomach; as of lead in stomach; as if sternum were grasped; as if there were no power in rectum to expel stool; as if rectum were paralyzed; as if anus were constricted; r. side of head as if paralyzed; as if vulva were enlarged; as of a heavy lump in anus; as if she were tied around chest with a tape; as of a stone under sternum; as if mould were forming over whole body; as if a hand had grasped her breast bone; small of back as if beaten; small of back as if dead; arms and hands as if filled with lead; as of a splinter in finger; as if a panaritium would form in index finger; as if tips of fingers were suppurating; as if finger were thick and bone enlarged; as if joints of fingers were being pulled out of sockets; limbs and feet as if paralyzed; as of loss of power in legs; femur as if beaten; knee as if too tightly bound; as if calves were too short; as if spasms in ankles; whole of back feels as if dead; as if joints of toes were being pulled out of their sockets; nails as if decayed; as if beaten all over; as if he had lain in an uncomfortable position; feels as if she would die.

Pain: in spine and neck up and over r. temple, thence to l.; in vertex and occiput, at another time in forehead; first in nape and base of brain, then up and over whole head; in r. lachrymal sac; over eyes; in stomach; in mastoid region; in jaw bones; in submaxillary glands; in throat; in stomach; in region of spleen; in bowels; in abdomen; in back; in nodular swelling of l. breast; under sternum; in ribs; in nape of neck; in curved spine; from sacrum up to lumbar region, across l. ilium to superior spinal process; in shoulder and arm; in flexor surface of one finger; up r. arm to axilla, thence to r. side of thorax; in ulcer; through foot from ankle

Digitized by Google

to sole; from toes to malleoli; beneath nail of great toe; in limbs.
Excruciating pain: in cancer of lower lip; deep-seated pain in chest.
Terrible pain: from cervical vertebræ to cerebellum, thence to forehead.
Excessive pain: from eye to head and ears.
Violent pain: vertex, occiput or forehead; above eyes; in small of back; in abscess on foot; in great toe; in joints.
Severe pain: in small of back; from eyes into head on one side; in back; from hip to foot.
Great pain: along extensor tendon on back of hand.
Acute pain: in occipital protuberances; from abdomen to testes; in r. shoulder blade.
Sharp pain: in breast or uterus; in r. shoulder joint.
Anguish: in pit of stomach.
Sickening pain: in l. side of head.
Lancinating pains: in region of r. inferior maxillary; whitlow; in knees; deep in joints of knees; gonocace.
Tearing: one-sided in head; in whole head in frontal region; in lumps on head; in eyes; over whole chest and bones of face; in teeth and cheeks; in limbs; in swelling; in sacrum and l. thigh; in tibia; between scapulæ; beneath scapulæ; in bones of elbows; in wrist and ball of hand; fingers, joints, thumbs; in thighs; in knees; in great toe; in limbs.
Cutting: at pit of stomach; violent, in lower abdomen; in region of navel to back; in rectum; around navel; beneath toe nail.
Pounding pain: in forehead and into head.
Beating: in lumbo-sacral region; in breast bone; in back.
Throbbing pain: in forehead and into head; in eyes; in lump in corner of eye; in teeth; in lumbo-sacral region; in abraded surface of finger.
Darting pains: through eyes and head; sharp, from occiput to eyeball; in l. nipple; up spine.
Spasmodic pain: in small of back.
Shooting: from nape to vertex; in eyes; in l. ear; in tip of nose; in anus; from sternum around to back; in back between hips; down both legs; in l. thigh.
Piercing, stinging pain: in l. eye.
Stitches: through eyes and in cheek bones; in temples; in forehead; deep-seated in r. parietal region; in upper lid; in ears; in throat; in rectum; in anus; in sides and chest to back; in wrist; in ball of thumb; in l. heel; in great toe; violent, in corns.
Acute sticking pain: in forehead.
Burning stitching: in several teeth.

Google

Stitching pain: in r. lung.
Sticking pain: in ulcer on cornea; below septum of nose; in rectum; in anus; in chest; in r. scapulæ; in fingers; in thighs; in ulcer on leg.
Ulcerative pain: below r. floating ribs.
Screwing pain: in stomach.
Pinching pain: at navel.
Twinging pain: in tumor of breast.
Squeezing pain: in testicles.
Twisting pains: in stomach.
Boring pains: in ears; over whole chest and bones of face; in teeth and cheek; in l. temple, l. supraorbital nerve and orbit of eye; in great toe.
Boring cramping: from anus to rectum or testicles.
Crampy pain: dull, heavy, in arms; at pit of stomach; in hand.
Griping pain: after eating; in bowels.
Digging: in stomach.
Gnawing: high up in nose; in fistulous opening near sixth rib.
Colicky pains: in lower abdomen.
Cramps: in calves; in soles.
Pressive, stinging pain: in ulcerating part of leg.
Pressive pain: in occiput; in head; over l. eye; in eyes; in stomach; in forehead; in sternum; in chest.
Neuralgic pains: at exit of supraorbital nerve; of face, head, eyes, teeth and ears; in all the teeth.
Rheumatic pains: in jaws and teeth to temple; of lower cervical vertebræ; in limbs.
Drawing pain: in meatus auditorius; in ears; in thigh.
Tensive pain: across chest.
Pressive jerking: in middle of forehead.
Aching: at occiput; sore, in nape; severe, in back of head, one side; in upper lid; from occiput to r. eyeball; in ears; of both jaws; in all the teeth; in hypochondrium; in lumbo-sacral region; of sacrum; in back; in centre of spine; in loins; in sacrum; in r. forefinger; in wound in calf.
Dull pain: in occiput.
Burning pain: in r. eye; in tip of nose in centre; in breast.
Stinging pains: in eyes; in boil on chin; in teeth; in rectum; in tumor of breast; in os coccygis; in bones of elbows; in sore spot on finger; in r. forefinger; in felon; in whitlow; in knees; in ulcerated big toe; in limbs.
Pricking: of scalp; of l. eye; in ears; in region of r. inferior maxillary; in throat; sharp, in penis; in arms; in l. thigh; in l. heel.

Google

Smarting: in eyes; of l. eye; of eyelids; of scab deep in r. nostril; of eruption on lips; in anus; spot on tibia.
Scalding feeling: in vertex.
Bruised pain: above eyes; in hips and back; all over body.
Beating soreness: in liver.
Soreness: in limbs; in perineum; about vulva; of pudenda; of feet; in trachea and bronchia; in chest; in lungs; in feet.
Soreness: internal, in head; in orbits; of eyelids; of inner nose; on back of nose; of palate; of tongue; of throat; in urethra.
Stiff, sore feeling: down r. side of spine.
Burning: in soles; in head; on back of head; in chest; in throat; in pit of stomach; in anus; in prepuce; during stool in rectum; in urethra; of feet; of swelling; sacrum and l. thigh; about vulva; of pudenda; in l. nipple; in back and finger tips; in sore spot on finger; in r. forefinger; in felon; in whitlow; in and about ulcer on leg; of feet; of soles of feet.
Painfulness: of epigastrium.
Tenderness: about hernial tumor.
Peculiar sensation: at pit of stomach.
Running sensation: in limbs.
Dropping sensation: in limbs.
Shattering; in brain.
Vibratory shaking: in head.
Violent tearing: in head.
Dragging: from r. hip to toes.
Fulness: in stomach.
Heaviness: in head; in all the limbs; in stomach; of arms; of lower extremities.
Hard, jerklike pressure: in top of head deep into brain.
Pressure: in occiput; in both sides of occiput; in forehead; nape of neck; on vertex; in orbits; in stomach; in hypochondrium; in abdomen; in bladder; downward in vagina; at lower sternum; over chest.
Pressing: in head: in sore spot on finger.
Drawing: in root of nose and in r. malar bone; between shoulders; in fingers; in joints of r. finger; from thighs to feet; in joints of toes.
Tension: in forehead and eyes; in eyes and forehead; in anus; in calves.
Tightness: at pit of stomach; transversely across abdomen; around chest; over chest.
Throbbing: in forehead; at heart; in pit of stomach; in breast bone; over whole body; in all the vessels; in back; in lumbo-sacral region.
Pulsative sensation: in r. thigh.

Digitized by Google

Pulsations: in chest.
Lameness: of feet; of hand; of legs.
Lame feeling: in region of sacrum.
Stiffness: at nape of neck in small of back; of fingers.
Heat: in head; in penis and testicles; in affected parts; in feet.
Painful dryness: of nose.
Dryness: in inner nose into frontal cavities and antrum; of lips; in mouth; of throat; in finger tips.
Roughness: of trachea and bronchia.
Tingling: voluptuous in soles.
Fluttering feeling: in both temples.
Tickling: in larynx; in throat pit; in pharynx.
Emptiness: at stomach.
Trembling: of limbs.
Weakness: of body; of arms; in chest; in back; arm and wrist; of lower extremities; of legs; of feet; of limbs.
Paralyzed feeling: in lower extremities.
Itching: at vulva; on scalp; spot on head; on occiput; on back part of head; of eruption on back of head; of eczema capitis; of pimples on head and nape; pustules on scalp and neck; in Eustachian tubes; of outer ears; in nose; of tip of nose; in ulcerated corner of mouth; in anus; in rectum; in rectum during stool; of vulva; on corona glandis; of eruptions on genitals; of prepuce; of pudenda; of breast; of swollen mammæ; of whole breast; of eruption covering breast; of pimples on nape of neck; on first joint of index fingers; in r. forefinger; in whitlow; on heel; beneath toe nail; of scabs on toes; of face, arms and back.
Voluptuous itching: about nose.
Numb feeling: in r. arm; in hands; in one finger.
Chilliness: in nape of neck and back.
Cool feeling: in upper gums.
Cold feeling: rising from nape of neck to vertex; about breadth of two fingers, across vertex.
Coldness: of nose; of feet; over whole body; icy, of feet; of extremities; of l. side; in ulcers.
Cold pain: at epigastrium.

"**Tissues.** ‖‖Emaciation with pale, suffering expression.
‖Fungi easily bleeding.
‖Discharges and excretions offensive: pus, stools, sweat of feet, etc.
‖Hemorrhages from nose, stomach, bowels and lungs.
‖‖Swelling, inflammation and suppuration of glands, cervical, parotid, axillary, inguinal, mammary, sebaceous.
‖Inflammation of lymphatic vessels.
‖‖Hard lumps on neck, not of glands, extending to l. side, in a gouty subject.

Google

Painless swelling of glands, very unpleasant itching.
Inflammation, swelling, caries and necrosis of bones.
Exostoses; curvatures.
Inflammation of fibrous portions of joints, particularly knee.
Children or young people suffering during growth with fever, violent pains in joints, swelling of limbs and congestions.
Gout.
Multiple cheloid, which appeared after excision of a tumor, but rapidly returned and increased in size.
Rachitis; open fontanelles; head too large, rest of body emaciated; head sweats and body dry.
Cellular tissues inflamed; deep-seated suppurations, including tendons, ligaments and bone.
Suppuration: pus copious or scanty; brown and watery; gelatinous; thin and watery; very putrid.
Suppurating chilblains.
Neglected cases of injury if suppuration threatens.
Inflammation followed by suppuration or gangrene.
Suppurative conditions after protracted disease.
Proud flesh.
Chronic gouty nodosities.
Mercurio-syphilitic ulceration of skin and bones.
Swellings which became hard after threatening to suppurate.
Indurations hardening as of a stye on eyelid, hardening of tissues around a part formerly acutely diseased.
Anasarca. θStonecutters.
Old ulcers with burning and lancinating pains.
Boils, carbuncles, felons, and malignant pustule, during suppurative stage.
Boils, little lumps, not mattering; blood-boils.
Carbuncles, if intractable and very hard, or with very profuse discharge of matter.
During process of ulceration it seems to clear wound of its decayed masses and to promote healthy granulations. θCarbuncle.
Ailments following vaccination, abscesses, etc., even convulsions.
Ulceration constantly extending in depth; edges irregular.
Malignant and gangrenous inflammations.
Tumors in persons with herpetic dyscrasia; wens smooth and shining on scalp; sebaceous cysts, particularly when atheromatous; pus scanty and smelling like herring-brine.
Palpebral cyst.

Google

Synovial cysts.
Fibrous tumor.
Epulis.
Encephaloma oculi.
Scirrhus mammæ; cancer.
Uterine cancer, strong putrescent odor.
Enchondroma.
Tumor albus.
Fistulous openings, discharge offensive, parts around hard, swollen, bluish-red.
Disease caused by suppressed foot sweat: exposing back to any slight draft of air, from vaccination; chest complaints of stonecutters, with total loss of strength.

Suffering parts feel cold.

"Touch. Passive Motion. Injuries. Touch: headache <; eyes painful; scalp sensitive; head very sensitive; < pain in head; scalp tender; eye very tender; sticking pains in scabs below septum of nose; stinging in boil on chin; submaxillary gland painful; pains in region of liver <; inflamed inguinal glands painful; vagina tender; curvature of spine painful; pain in elbows <; whitlow painful; fistulous openings on hip joint tender; gonitis painful.

Contact: ulcerated place in nose sensitive; cyst on patella very sensitive.

Combing hair: causes violent attacks of sneezing; impossible, scalp covered with papulæ.

Wiping eyes: blepharitis >; wants head tightly held.

Binding tightly: headache.

Pressure: of hat causes pain; pain in head <; chronic sick-headache >; tearing in scalp <; of hat, scalp sensitive; pains in lachrymal sac; gum painful; epigastrium painful; sensitiveness of pit of stomach; cannot tolerate, below floating ribs; over lumbar vertebræ pain <; os coccygis painful; pain in swollen thumb; slightest on hip causes trembling of whole body; inflamed knee painful; whole wounded calf tender; causes white spots in swelled feet; the parts upon which he lies go to sleep.

Riding: vertigo; coccyx hurts.

Scratching: itching spots on head painful.

Irritation of truss: supposed cause of abscesses.

From tight boot; blister on dorsum of r. foot.

From a bruise: sore leg.

Strain: caused exudation of synovial fluid in wrist.

Sprain of r. foot: signs of abscess.

Every little injury causes ulceration; every hurt festers.

Google

Pricked lip with a sharp point: cancer.
Splinter of glass: in r. index finger, pain and swelling.
From a bite: thumb swollen and painful.
After a cut: wound would not heal.
After a fall: pain in sacrum and hip; injury of tibia.
After a blow upon head: nightly incontinence of urine.
Ailments following vaccination, abscesses, etc., even convulsions.
‖‖Small foreign bodies under skin or in larynx; fishbones; needles in hands or elsewhere; to promote expulsion of bone splinters.

"**Skin.** ‖Skin waxlike: tuberculosis, caries, etc.
‖Icterus.
‖Cutis anserina.
‖Earthy, yellowish, dry, relaxed skin sometimes covered with pityriasis.
‖Skin painful and sensitive.
‖Itching over whole body.
Itching and pricking of skin of arms, face and back.
Itching and sticking in various parts of body, especially at night.
‖Itching exanthema; small pustules filled with lymph, drying quickly.
‖Acne: eruption, itches and burns only by day; solaris and rosacea.
‖Eczema of scalp, hands and forearms.
‖‖Small wounds in skin heal with difficulty and easily suppurate.
‖Small wounds suppurate profusely.
‖Suppuration of skin and cellular tissues beneath it.
‖Intertrigo; impetigo; psoriasis inveterata; scabies maligna; herpes exedens; pemphigus; zona; zoster; ecthyma.
‖Eczematous, impetiginous, or herpetic eruptions.
‖Rhagages around eyelids, lips, etc.
‖Rose-colored blotches; brownish-white spots.
‖Small blisters.
‖Phlegmonous erysipelas; excessive, ichorous, offensive suppuration; tendency to extend in depth rather than superficially.
‖‖Large dusky patch on front of neck as large as a medium-sized orange, first appearing about a year ago as a very small discoloration after some boils on back had healed; similar one on nape of neck rapidly extending up scalp; spots covered with minute scales, place being redder and darker than surrounding skin; menses too profuse, every two weeks. θEczema.
‖Variola-like pustules on forehead, occiput, sternum and spine, extremely painful and at last suppurate.

Digitized by Google

Crusta lactea.
Small foreign bodies under skin or in larynx.
Papulous psoric impetiginous forms of eruption with dry relaxed skin, furuncle.
Boils come in crops; tendency to boils; leave indurations.
Abscesses speedily point, but secretion of pus is too scanty.
Malignant pustule.
Ulcers: form suppuration of membranous parts; phagedenic; extend in depth; after abuse of mercury; flat, with bluish-white base; offensive, with ichor, proud flesh, stinging, burning, itching; edges hard, high or spongy; readily bleeding; carcinomatous.
Sensation of coldness in ulcers.
Large fleshy warts, suppurating.
Variola; suppuration exhausts patient and desiccation delays; bone diseases as sequelæ.
Elephantiasis of lower limbs in a negro.

[47] **Stages of Life, Constitution.** Especially suitable for children, large heads, open sutures; much sweat about head; large bellies.
Nervous, irritable persons, with dry skin, profuse saliva, diarrhœa, night sweats.
Weakly persons, fine skin, pale face; light complexion; lax muscles.
Scrofulous diathesis.
Rachitic, anæmic conditions; caries.
Oversensitive, imperfectly nourished, not from want of food but from imperfect assimilation.
Stonecutters; chest affections and total loss of strength.
Scrofulous children, who have worm diseases, during dentition.
Baby, æt. 4 days; hydrocele.
Child, æt. 8 months, fair and vigorous, suffering since birth; constipation.
Boy, æt. 18 months, after a fall; injury of tibia.
Child, æt. 21 months, suffering six days; ague.
Child, æt. 1, scrofulous; summer complaint.
Boy, æt. 2; enchondroma of toe.
Child, æt. 2; ulceration after vaccination.
Boy, æt. 3, strumous constitution, after scarlet fever three weeks ago; abscesses on head.
Child, æt. 3 months; pertussis.
Boy, æt. 4; light hair and complexion, lymphatic temperament; psoas abscess.
Boy, æt. 4, swelling and suppuration of knee.
W. B., æt. 5, after scarlet fever; otorrhœa and cough.
Boy, æt. 7, affected since birth; impetigo capitis.
Girl, æt. 7, scrofulous, frequently troubled with cutaneous

Digitized by Google

eruptions and inflammation of eye, since her vaccination; scrofulous ophthalmia.
Boy, æt. 7, suffering three years; sinus before l. ear.
Girl, æt. 7, after a blow upon head when three years old; incontinence of urine.
Girl, æt. 7, blonde, blue eyes, four weeks ago had pleurisy; compression of lung after exudation and curvature of spine.
Boy, æt. 8; eczema capitis.
Girl, æt. 8, had scarlatina six years ago, since then affected; otorrhœa.
Boy, æt. 10, after vaccination; spasms.
Boy, æt. 11, tall; phthisis.
Scrofulous child, æt. 11; swelling on chest.
Girl, æt. 11; swelling of knee.
Boy, æt. 12; caries of mastoid process.
Boy, æt. 12; palpitation of heart.
G. N., æt. 12, cachectic and anæmic; fistulæ of thigh.
Girl, æt. 13, scrofulous; caries of bones of leg.
Girl, æt. 14, blonde, pale, phlegmatic, short in stature, corpulent; keloid on temporal region.
Girl, æt. 14, suffering four months; caries of orbit.
Boy, æt. 14; caries of metacarpal bones.
Boy, æt. 15, suffering ever since his recollection; nocturnal enuresis.
Boy, æt. 15, suffering two years; necrosis of femur.
Boy, æt. 15, laborer; acne.
Girl, æt. 16; eruption on occiput.
Girl, æt. 16, servant, after a fall eleven months previously; affection of spine and sacrum.
Boy, æt. 16, lymphatic temperament, from a bruise, eighteen months since; suppuration of leg.
Boy, æt. 16, after revaccination; convulsions.
Boy, æt. 17, farmer, light complexion, blue eyes, scrofulous during childhood, about nine months ago had typhoid pneumonia, has been suffering four months; abdominal dropsy.
Girl, æt. 17; goitre.
Girl, æt. 17, after some boils on back had healed, a year ago; eczema squamosum.
Girl, æt. 18; mental disturbance.
Miss B., æt. 18, suffering many months; headache.
Negro, æt. 18; contraction of fingers.
Girl, æt. 18, strong; caries of tibia.
Girl, æt. 18, phlegmatic, torpid disposition, mind poorly developed, subject to skin eruptions; hysteria.
Girl, æt. 20, suffering for weeks; hard swelling of cheek.
Girl, æt. 20; epilepsy.

Digitized by Google

Girl, æt. 21, nine months ago had nephritis, since then suffering; hepatic disorder.
Man, æt. 21, pale, transparent skin, suffering eight months; fistula in leg.
Man, æt. 23, light complexion; seminal emissions.
Woman, æt. 23, single, suffering five years; epilepsy.
Woman, æt. 24, married six months; vaginismus.
Man, æt. 24; phthisis.
Governess, æt. 24; housemaid's knee.
Woman, æt. 25, brunette; swelling of eyelid.
Miss A., æt. 26, lymphatic and delicate, suffering two years; inflammation of nasal duct.
Mrs. H., æt. 26, mother of three children, suffering since birth of last child, three months ago; constipation.
Mrs. C., æt. 26, has had two children; periuterine cellulitis.
Woman, æt. 26, single; pain in leg.
Housemaid, æt. 26, suffering eighteen months; bursitis.
Mme. P., æt. 26, delicate health, suffering three years; abscess of foot.
Country-woman, æt. 26; elephantiasis.
Woman, æt. 28, single, brunette, suffering a long time, headache.
Mrs. K., æt. 28, suffering four months; recurrent phlyctenular conjunctivitis.
Woman, æt. 29; chronic headache.
Mrs. T., æt. 29; ulceration of cornea.
Man, æt. 30, sanguine bilious temperament, five feet ten inches high, weight in health 160, family consumptive, two sisters and a brother having died of this disease; phthisis.
Woman, æt. 30, suffering since death of her husband, six years ago; epilepsy.
Woman, æt. 30; epilepsy.
Woman, æt. 32, blonde, sanguine temperament, formerly had scrofulous ophthalmia; eruption about mouth.
Man, æt. 32, in good health, a little pale, habitually sad and anxious, having lost his father at the age of 60 from cancer of face; threatened cancer.
Woman, æt. 33, single; tumor albus.
Man, æt. 34; abscess of ankle and foot with caries.
Man, æt. 36, four months ago cut leg with an axe, since then suffering; chronic suppuration.
Man, æt. 37, cigarmaker, after attack of typhoid fever; abscess.
Lady, æt. 40, school-teacher, single; vertigo.
Woman, æt. 40; swelling of lachrymal sac.
Mrs. M., æt. 40; inflammation of lachrymal sac.

Google

Woman, æt. 40, suffering seven months; cancer of tongue.
Man, æt. 40, face somewhat yellowish, with red cheeks, suffering six years; gastric disorder.
Woman, æt. 40, weakly constitution, subject to catarrhal affections, somewhat asthmatic; scirrhus mammæ.
Mrs. B., æt. 42, strong, well nourished; headache.
Woman, æt. 44, married, medium stature, weak constitution, light complexion, still menstruates regularly, has been cured of catarrh of stomach, and psoriasis diffusa; parenchymatous iritis.
Green-grocer, æt. 45; enlarged bursa over l. knee.
Mrs. H., æt. 47; scirrhus mammæ.
Man, æt. 48, ten years ago saw a cancer of nose, since then affected; itching of nose.
Woman, æt. 50, married, Irish; eczema capitis.
Man, æt. 50, large, apparently good constitution; pain in lung.
Miss M., æt. 55, suffering for a year; tumor in mouth.
Man, æt. 55, suffering five days; felon on finger.
Mrs. G., æt. 55; glass in finger.
Man, æt. 55, in good health, after wearing tight boots; ulcer on foot.
Man, æt. 60, formerly suffering from glandular swellings; induration of cheek.
Man, æt. 60; tumor in breast.
Mrs. P., æt. 60, tall, dark complexion, dark hair, rather masculine appearance, predisposed to lung disease; cough for several weeks.
Woman, æt. 60; carbuncle on neck.
Woman, over 60, in moderately good health; elephantiasis.
Madam X. de Cerveirac, æt. 61, enjoying good health, never been seriously sick, melancholic disposition; cancer of lip.
Mme. C., æt. 63, apparently in good health but having a leaden-hued, earthy complexion, for about twenty years; lupus.
Man, æt. 67, syphilitic; inguinal abscess and hernia.
Lady, æt. 70; scirrhus mammæ.
Woman, æt. 80, after a sprain; inflammation of foot.
Young lady; tumor of lip.
Young woman, delicate health, pale, earthy complexion, suffering a month; panaritium.
Washerwoman, fat, robust, brown complexion, standing much in cold water; metrorrhagia.
Mrs. J., mother of four children, apparently healthy, suffering several months; constipation.
Robust, middle-aged man, bitten in thumb by a man four weeks ago; swelling and suppuration of thumb.

Google

Lady, ten years past climacteric; leucorrhœa.

SINAPIS NIGRA ET ALBA.

Black and White Mustard. *Cruciferæ.*

Provings by Butler, N. Am. Jour. of Hom., 1872, p. 541; some symptoms by Cattel, Brit. J. of Hom., vol. 11, p. 524.
The symptoms belonging to Sinapis alba are designated *a.*

Clinical Authorities.—*Coryza, Hay fever,* Butler, Med. Adv., vol. 21, p. 353; *Sore mouth,* Ellis, Hah. Mo., vol. 24, p. 61, from Hom. Jour. Obstet., Nov., 1888; *Cough,* Walser, A. J. H. M. M., vol. 4, p. 134; *Variola,* Rockwith, Med. Union, vol. 1, p. 59.

Note.—Found of use in Philadelphia with potassium cyanide as a means of prevention in the epidemic of smallpox, 1870–71, by Hering, Korndoerfer, Farrington, Knerr, and others.

[1] **Mind.** Irritable disposition.
Cross, dissatisfied without cause; must guard himself constantly or be uncivil and pettish.
[11] From fright during coition, impotence.
Cannot keep his attention fixed.
From least mental exertion: sweat.

[3] **Sensorium.** [8] Vertigo of old people.
[8] Violent attacks of vertigo, with hard hearing after eating heavy food; mostly after fat.
Every evening while conversing sudden headache and loss of consciousness of surrounding objects. *a.*

[5] **Inner Head.** Dull pain across forehead commencing at outer angle of each eye, more severe around edges of orbits and across bridge of nose.
Dull, dragging-down sensation in anterior part of head, not amounting to decided pain.
Heavy headache in top and sides of head.

Google

Dull headache, with qualmishness about pit of stomach.
Dull headache, replaced (at 11 A.M.) by burning prickling in face, moderately full pulse, dull feeling in top of head, as if empty.
Headache does not interfere with mental exertion, in fact, is forgotten during it; < when attention is drawn to it; in warm room; better in open air, eating and lying down.
Pains are < on one side, r.; sometimes on the other, l.; mostly anterior part of head and less often vertex is involved (no prover had it in occiput).
Headache as if she had taken cold, with tired feeling all over.
Dull, heavy, drawing or pressing pain in head.
‖Apoplexy.

[4] **Outer Head.** Sensation as if scalp were adherent to bones.
Forehead hot and dry.

[5] **Sight and Eyes.** When pressing on eyeballs, sensation as of pins sticking.
Eyeballs as if pressed on from above, with tired feeling of eyes and some dull pain in them, > closing eyes and by eating.
Sudden feeling of warmth, with stitching in l. eye; it fills with tears, which relieve.
Sticking or smarting in l. eye.
Eyes sore, weak.
Eyes feel tired.
Pain over eye, sometimes r., sometimes l.; sometimes passing from outer angle to root of nose.
Eyes smart with profuse lachrymation.
Hard work to keep eyes open.
Headache and confusion, especially over eyes, < on moving about. *a.*

[6] **Hearing and Ears.** Hard hearing, with vertigo.

[7] **Smell and Nose.** ‖Dryness of anterior nares.
‖Nostrils dry; l. < with discharge of some dried mucus; tender to pressure.
Dryness of posterior nares and pharynx, > swallowing and clearing throat of small white lumps of tenacious mucus with slight hacking.
Scanty acrid discharge from anterior nares, makes skin red.
‖Left nostril stopped up all day; scanty acrid discharge from nose.
‖Mucous membrane of nose dry and hot; no discharge; symptoms < in afternoon and evening; either nostril may be affected alone or alternately with the other. *θ* Hay fever.

Google

Dryness in posterior nares and pharynx > by swallowing and attempts to clear throat, which brings up small lumps of white tenacious mucus with slight hawking.

Much discharge of mucus from posterior nares, it accumulates there and requires an effort to dislodge; tasteless, cold and in quite large, tenacious white masses.

Accumulation of mucus, usually white, at times yellow, drops from posterior nares, causing nausea and even vomiting.

Scurvy, with copious and frequent nosebleed.

Profuse, thin, watery discharge from anterior nares, excoriating and acrid; wings of nose red and sore; draws considerable mucus into throat from posterior nares; voice thick, nasal; frequent short, hacking cough, painless, < during day; > by lying down. θAcute coryza.

A man of nervous temperament was caught in a thunder-shower and wet through; nasal passages feel stopped up while a thin acrid mucus is discharged profusely from anterior nares; wings of nose red; eyelids smart and itch.

For some years subject to severe colds; severe acrid nasal discharge with much lachrymation and irritation of eyelids; sneezes frequently, with coryza; hacking cough harder and more paroxysmal, lasts for weeks; nose feels stopped up, especially at bridge, although he has considerable nasal discharge which irritates and reddens skin; voice very nasal; partial loss of taste and smell.

Feeling as if nostrils were stopped up although they discharge profusely a thin mucus, which excoriates nose and lip; itching and smarting of eyelids; post-nasal discharge; continually clearing throat; infrequent hacking cough; dull frontal headache; voice nasal. θAcute coryza.

Hay fever; eyes suffused, itched and smarted; nose swollen and discharging continually a thin acrid mucus; oppression of chest, as if movement were impeded all around her chest, not a contraction, but as if something heavy oppressed her in all sides from her neck to diaphragm; < at night lying down.

Subject to hay fever for eight years; comes on July 28th of each year and stays until after first hard frost; two weeks after commencement of attack, smarting and itching of eyelids, < toward inner canthi; margins of lids reddened; eyes filled with tears; nasal discharge profuse, watery and excoriating; much sneezing, < in morning for a while, and on lying down at night, but continuing more or less all day long; itching, burning,

Google

tickling in nostrils high up; frequent hacking cough during day, but none at night; dull frontal headache; mentally irritable.

‖ Has been for two weeks suffering from her annual attack of hay fever, which came on, as usual, about middle of August; nose swollen, alæ nasi excoriated, while lips were but little reddened; eyes watery, must keep wiping them; eyelids itch; voice nasal; nose feels stopped up at bridge and posterior nares; post-nasal discharge, which she draws down in considerable quantities and expectorates; it is thick, of brownish color and tastes cold; breathing much oppressed all the time, but < at night; every night she has attacks of asthmatic breathing, which last an hour or more; during attacks must sit upright and has a dull pain from upper part of chest through to shoulder blades, and dull, hard aching in temples; can never lie with head low because it brings on attacks; attacks more frequent in damp weather, and < on lying down and moving, > by sitting up in bed with shoulders drawn forward (round-shouldered position) and by perfect quiet.

‖ Mrs. D., æt. 71, small, dark, dried-up old woman, bronchial asthma; sat in one chair, leaning her head upon back of another; breathing labored and noisy, wheezing and rattling of mucus in chest plainly audible all over room; anxious for death that she might be relieved; intensely despondent and sure that she would not recover; acrid nasal discharge reddened skin about nose and slightly on upper lip.

[8] **Upper Face.** Sensation as if cheeks were bulged out by a bubble of air just below malar bone.

[9] **Lower Face.** Lips dry, skin as if stiff; smarting of lips; red around mouth.

[10] **Teeth and Gums.** Teeth, especially such as have been filled, sensitive to warm drinks or cold air.

Gums sore, tender to touch, can hardly eat hard food.

‖ Swollen, bleeding gums.

Convulsions during dentition.

[11] **Taste and Tongue.** Tingling, scalded feeling of tongue.

Tongue can hardly bear weight of teeth; raw, sore.

Tongue feels dry, sticky, sense of blisters on tip.

Tongue dirty white in middle, edges and tip hot.

Fissure down median line.

Tongue yellow at base, on waking. *a.*

‖ Black tongue.

[12] **Inner Mouth.** Breath offensive, smelling like onions.

Mouth dry.

Burning in mouth to stomach; with nausea, > by eating.

Digitized by Google

Saliva increased; alkaline.

‖Sore mouth, accompanied by hot, burning, sour eructations; burning started in stomach and would come up throat to mouth, with sour eructations; mouth very sore all over, with little white points surrounded by red mucous membrane.

‖Ulcers in mouth, especially on tongue, with violent burning pain, where whole buccal cavity is so sensitive that even blandest food or drink is unbearable.

‖A woman eight months pregnant, constantly suffering with burning in stomach extending up œsophagus to throat and mouth; mouth full of canker sores; < from food or drink.

[13] **Throat.** Left side sore, felt only on swallowing saliva and forcing mucus from choanæ; very slight when eating or drinking.

Throat behind uvula injected light red.

Sore throat r. to left.

‖Burning along œsophagus. *a.*

‖Angina œdematosa; pale swelling with much phlegm.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Appetite good.

‖Averse to sweets.

Toward evening, thirst.

[15] **Eating and Drinking.** While eating: headache >; nausea >; pain in eyes >.

After eating: vertigo <; desire for stool; fulness after a little, must loosen garments.

After eating or drinking: fulness and heaviness; distension, clothing must be loosened.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Obstinate hiccough.

‖Heartburn.

‖Frequent belching: tasteless, or tasting like horseradish or of ingesta; of hot air which increases heartburn.

Nausea: > in repose, < from motion. *a.*

Copious vomiting, much straining; it relieves nausea.

Vomit contains pieces of mucus mixed with dark lines like coagulated blood. *a.*

[17] **Scrobiculum and Stomach.** Sensation of a load in stomach.

Burning, later sharp and intermittent with faintness, > bending forward in sitting posture.

Burning in stomach and umbilical region.

Burning, nausea and waterbrash. *a.*

After a moderate meal, aching and pressure in stomach, as if a hard body lay there, < from touch and pressure, extending to both sides under false ribs. *a.*

Burning pressure under ensiform cartilage, frequent itching, abundant salivation. *a.*

Google

Burning pressure in cardiac region, with frequent inodorous, tasteless belching. *a.*
Ulceration of stomach and intestines.
‖Chronic catarrh of stomach.

[18] **Hypochondria.** Pressure in epigastric region.
Dull pain across epigastrium on bending forward, > sitting erect.
Dull pain in l. hypochondrium.

[19] **Abdomen.** Abdomen and epigastrium sensitive to pressure. *a.*
After a scanty breakfast, weight and distension of abdomen, with tenderness on respiration and touch. *a.*
All day fulness and tension in abdomen, with qualmishness and an occasional pain in stomach and epigastrium. *a.*
Pains < about navel; sometimes in lumbar region.
Pains from navel down to l. inguina.
Rumbling of flatus.
Heavy, dull pain below navel as from a weight.
Fulness and tension in abdomen, with qualmishness and occasional pain in stomach and epigastrium. *a.*
Continuous dull pain in r. groin, > by pressure.
Sharp pain in r. groin.
Dull, heavy pain in l. groin, at times sharp and sticking.
Gland in l. groin swollen, painful.
‖Chronic catarrh of intestines.

[20] **Stool and Rectum.** Stool once in three days.
Stool large in amount and rather hard, with no difficulty in passing; or loose, scanty, expelled with difficulty.
Frequent desire without any passage, passage small, in balls or lumps, at first large then tapering.
After stool feeling as if all had not passed; sharp smarting pain in lower rectum and anus.
Dark blackish-green, not copious stool, of normal consistency. *a.*
A small, friable, hard, dark-green stool in evening. *a.*
A dark green stool, of which one-half is normal in consistency, and the other pappy, after 8 A.M. *a.*
Scanty, pappy, dirty brown stool, with much undigested food. *a.*
Copious pappy stools of dirty, grey yellow color. *a.*
Copious, half hard, half soft, pappy stool, preceded by urging desire; first part dark brown, second part yellow, with many worms and covered with dark-red blood. *a.*
A dark, blackish green, not copious stool, of normal consistency. *a.*
Pappy, dark brown stool, with burning in anus; much undigested food with mucus and dead worms.

Digitized by Google

Copious, half hard, half pappy stool, preceded by urging; first part dark brown, later dark yellow, with many worms and covered with dark red blood. *a.*

Stitching in anus while sitting, so severe he nearly screamed out. *a.*

In evening small, blackish stool covered with mucus, followed by pricking and burning in anus. *a.*

: Cholera, with cyanosis.

[21] **Urinary Organs.** Urine frequent but normal in quantity; of a pale straw-color; sometimes increased; sp. gr. 1025.

Large quantities of urine are passed during night, passage preceded by a violent erection.

After urinating: sensation as if more would be voided and a little later dribbling of a few drops.

Urine: darker; golden, acid; clear yellow; a cloud suspended in it with little granules like frog spawn.

‖ Catarrh of bladder.

[22] **Male Sexual Organs.** Sexual desire excited.

Violent erections during the day with lascivious thoughts.

Obstinate and violent erections at night, usually with lascivious dreams and even emission of semen.

‖ Impotence, from a fright during coition.

[23] **Female Sexual Organs.** Menses appeared in a few hours, long before period.

‖ Amenorrhœa and chlorosis.

‖ Cessation of catamenia.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖ Hoarseness; toward night and in evening, with frequent attempts to clear throat.

Rough scraping sensation in throat extending to trachea, with a continual desire to clear throat and a slight hacking cough, < in evening.

Continual desire to clear throat, with difficult dislodgment of small lumps of tenacious white mucus, freer in forenoon, scanty at night.

[26] **Respiration.** ‖ Asphyxia.

‖ Pituitous asthma.

[27] **Cough.** Short, hacking cough in evening, leaves on retiring; usually dry, but sometimes sputa in small tenacious lumps of white mucus; excited by laughing; < in cold air; > on lying down and while eating; sensation of an obstruction low down in trachea.

‖ Neurosis of nerves of respiration since two years; loud coughing spells, lasting about ten minutes at a time; loud barking respirations could be heard at a distance.

[28] **Inner Chest and Lungs.** Pain in r. side as if heart were there and one could feel its beating.

Sharp, severe pain in l. side of chest in cardiac region, passing off soon.

Digitized by Google

Wandering pains in chest.
‖Catarrh of lungs.

[30] **Heart, Pulse and Circulation.** Uneasiness and occasional dull pains in region of heart, unaltered by pressure, deep inspiration or motion.
Occasional sensation of oppression and pricking in region of heart, soon passing off.
Quite persistent dull, circumscribed pain in heart toward apex.
Pains about heart recur daily about 10 A.M., and from 4 to 6 P.M., lasting a short time only, sometimes quite persistent, with a feeling of dread and oppression.
Pulse grows less frequent and later rises until it is a little too frequent.

[31] **Neck and Back.** Dull but quite severe pulsating pain under lower angle of l. scapula.
Cannot sleep on account of pain in small of back and hips; > by motion.
Pain in small of back, becoming intolerable near bedtime.

[32] **Upper Limbs.** Drawing pain at insertion of r. biceps brachialis on flexing and extending arm.
Occasional dull pains in l. shoulder joint.

[33] **Lower Limbs.** Weakness of muscles of calves.
Cramps in calves.
Dull, heavy aching in legs, calves and ankles.
Œdema of feet.
‖Ulcers on legs.

[35] **Rest. Position. Motion.** Rest: oppressed breathing; nausea >.
Lying down: headache >; hay fever <; oppressed breathing >; short, hacking cough <.
Sitting: burning in stomach >; erect, pain across epigastrium >; stitches in anus.
Sitting up in bed with shoulders drawn forward: hay fever and oppressed breathing >.
Must sit upright: oppressed breathing.
Bending forward: pain across epigastrium.
Movement: hay fever <; oppressed breathing <; nausea <; pain in back and hips >; sweats easily.
Flexing and extending arm: pain at biceps.

[36] **Nerves.** Weak, languid, with desire to sleep during day.
‖Chorea.

[37] **Sleep.** ‖Sleepless at night, but no inconvenience from loss of sleep.
Sleepy during day, vivid or lascivious dreams.
Sleep after dinner with anxious dreams.
Dreams of the dead and of thieves.

[38] **Time.** Forenoon: desire to clear throat >.

Digitized by Google

11 A.M.: headache replaced by prickling and burning in face.
Day: acute coryza <; frequent hacking cough; desire to sleep.
Evening: toward, thirst; dark green stool; small blackish stool; hoarseness <; short, hacking cough.
Night: hacking cough <; oppressed breathing <; large quantities of urine passed; hoarseness; desire to clear throat.

[39] **Temperature and Weather.** In warm room: headache <.
Warm drinks: teeth sensitive to.
In open air: headache >.
Damp weather: attacks of oppressed breathing <.
After getting wet through: nose feels stopped while thin mucus is discharged.
Cold air: teeth sensitive; short, hacking cough <.

[40] **Fever.** Chilly all over, with cold hands and feet, after vomiting.
Heat through whole body, < down spine.
Sweat, with feeling of hot water in bloodvessels, disappearing when nausea comes on.
Sweat general; more on forehead and upper lip.
Sweats easily from least exertion, mental or physical.
Quartan ague and inflammatory fever.
Typhoid and putrid fevers; delirious; great prostration; petechia.
Febris mucosa.

[41] **Attacks, Periodicity.** Daily: return of pains about heart about 10 A.M., and from 4 to 6 P.M.
Every evening: sudden headache while conversing.
Every night: attacks of asthma.
Middle of August: hay fever.
Since two years: neurosis of nerves of respiration lasting ten minutes.
For eight years: subject to hay fever; comes on July 28th and lasts until after first hard frost.

[42] **Locality and Direction.** Right: dull pain in groin; sharp pain in groin; pain in side as if heart were there; drawing pain at insertion of biceps brachialis.
Left: nostril stopped; pain in hypochondrium; dull, heavy pain in groin; gland in groin swollen, painful; severe pain in side of chest; pain under lower angle of scapula; dull pain in shoulder joint.

[43] **Sensations.** Head as if empty; as if she had taken cold; as if scalp were adherent to bones; as of pins sticking in eyeballs; eyeball as if pressed on from above; as if nostrils were stopped up; as if movements were impeded all around her chest; as if something heavy oppressed

Digitized by Google

her on all sides from neck to diaphragm; as if cheeks were bulged out by a bubble of air below malar bone; skin of lips as if stiff; as of blisters on tip of tongue; as of a load in stomach; as of a hard body lying there; as if more urine could be voided; pain, as if heart were on r. side; as of hot water in bloodvessels.

Pain: over eyes; in eyes; about navel; from navel down to l. inguina; in stomach and epigastrium; in r. side; about heart; in small of back and hips.

Sharp pain: in r. groin; in lower rectum and anus; in l. side of chest.

Dull but quite severe pulsating pain: under angle of l. scapula.

Stitching: in l. eye.

Wandering pains: in chest.

Aching: in stomach.

Dull pain: across forehead; in eyes; upper part of chest through to shoulder blades; across epigastrium; in l. hypochondrium; in r. groin; in region of heart; in heart toward apex; in l. shoulder joint.

Heavy pain: in top and sides of head; below navel; in l. groin.

Dull, hard aching: in temples.

Dull, heavy aching: in legs; in calves; in ankles.

Dull, heavy, drawing or pressing pain: in head.

Drawing pain: at insertion of r. biceps brachialis.

Dull feeling: in top of head.

Dull, dragging-down sensation: in anterior part of head.

Burning pressure: under ensiform cartilage; in cardiac region.

Pressure: in stomach; in epigastric region.

Tension: in abdomen.

Heaviness: in stomach.

Fulness: in stomach; in abdomen.

Tired feeling: all over.

Violent burning pain: in ulcers in mouth.

Sticking: in l. eye.

Burning: in nostrils; in mouth to stomach; from stomach up to throat and into mouth; along œsophagus; in stomach and umbilical region; in anus.

Burning prickling: in face.

Smarting: in l. eye; of eyelids; of lips.

Soreness: in eyes; of tongue; of mouth; of throat.

Sudden feeling of warmth: in l. eye.

Tingling scalded feeling: of tongue.

Pricking: in region of heart.

Rough, scraping sensation: in throat.

Tickling: in nostrils.

Digitized by Google

Dryness: of anterior nares; of nostrils; of posterior nares and pharynx; of lips; of tongue; of mouth.
Itching: of eyelids; in nostrils.

[45] **Tissues.** Great muscular weakness.
Mucous secretion increased, tenacious, lumpy.
Anasarca after intermittents.
Rheumatalgia.
Pituitous dyspepsia.
Constipation from want of action of bowels.
Flatulency.
Disposition to nervous apoplexy.
Epilepsy.
Hypochondriasis.
Chlorosis.
Asthma.
Intermittent fever in swampy districts.
Autumnal intermittent, quartan septimana.
Pleurisy.
Smallpox.

[46] **Touch. Passive Motion. Injuries.** Touch: gums sore; pressure in stomach <; abdomen tender.
Pressure: nostrils tender; abdomen and epigastrium sensitive; pain in r. groin >; pain in region of heart unaltered.

[46] **Skin.** ‖General ecchymosis.
|Eczema chronica.
‖Smallpox; to be given until sulphocyanides reappear in saliva.
Ulcers on legs.

[47] **Stages of Life, Constitution.** Vertigo of old people.
Convulsions of teething children.
Girl, æt. 13, tall, slender, dark complexion; hay fever.
Mr. H. B., dark complexion, grey eyes; acute coryza.
Mrs. K., æt. 28, small, dark complexion, slender figure, nervous temperament; hay fever.
Lawyer, æt. 36, dark complexion, nervo-bilious temperament; coryza.
Mrs. D., widow, short, stout, florid, light complexion; acute coryza.
Mr. A., light complexion, nervous temperament, after exposure; coryza.

[48] **Relations.** Antidoted by: *Sapo sodæ* for blisters from external application; *Nux vom.* when abused as a condiment.

[1] **Mind.** Weak memory.
Disinclined to work.
Restless and anxious; solicitude about the future.

Digitized by Google

‖Gloomy suicidal mood.
‖Afraid of pointed things, pins, etc.
‖Easily irritated or offended.

[2] **Sensorium.** ‖Vertigo: as if he would fall, < in morning on rising, with headache, depriving him of his senses; when looking down or turning eyes; with nausea; with heart disease.

Vertigo while sitting, standing or walking (most tolerable while lying); head sinks backward with nausea at palate and discomfort in abdomen and thorax; in abdomen a pinching pain, with a sensation as if he would be obliged to go to stool, whereupon he loses all consciousness.

‖‖Stumbling and falling as if intoxicated; pressing pain in top of head, < from stooping, walking and talking; > when lying; feeling of fainting. θHypertrophy of heart.

[3] **Inner Head.** ‖Nervous headache, < from thinking, from noise or jarring; face pale; anxious palpitation; nausea and vomiting.

‖Boring from within outward, in forehead, vertex or cerebellum.

‖Pulsating stitches in frontal protuberances.

‖Stitches in l. side of head and out of l. eye.

‖Pressing headache, mostly in r. temple; < from stooping, least motion or noise; > at rest and lying with head high.

‖Headache beginning at cerebellum (in morning), spreading over l. side of head, causing violent and pulsating pain in l. temple and over l. eye, periodical.

‖Dull stitches from within outward, on top of head; < from touch and after washing, but > while washing.

‖Feels as if head would burst.

‖Painfulness of cerebellum, with stiff neck.

‖Headache when stooping, as from a band around head.

Sensation in brain as if head were tightly bound.

Headache like a heaviness; on drawing facial muscles it seems as if skull would burst, upward and asunder.

Does not dare to shake head; it hurts in brain and he becomes dizzy.

Swashing in brain when walking; he feels every step.

Fine burning, tearing pain in brain; violent pain in l. parietal bone on motion or walking, or making a misstep; toward evening.

Violent pressure and pressing outward in forehead; < on stooping; < by pressure with hand.

Tensive, tearing pain in forehead, especially beneath frontal eminence extending toward orbits.

Digitized by Google

Thrustlike tearing pain in forehead, < in r. frontal eminence, causes an involuntary fixing of eyes on object on which he is looking, while standing and sitting.

‖Very violent tearing in forehead, occiput and temple.

‖Shooting pain through forehead.

‖Sharp sticking just behind and above frontal eminence.

‖Burning pain in r. side of forehead, extending to eye, could not move it without pain.

Burning pain in l. side of frontal bone.

Violent pressure from without inward, in both temples, especially in right.

Jerking tearing in r. zygoma.

Violent, fine stitches, as from electric sparks, in l. temple.

Pressive drawing in r. side of vertex and occiput.

Pressive pain in r. side of head, involving r. eye, in morning in bed, but still more after rising; pain deeply seated, unaffected by pressure, very acute on motion; on suddenly turning head brain seemed to be loose; < from every jar, step or straining at stool.

Burrowing and tearing pain in occiput, in l. side of vertex and in forehead, < on motion, from loud noise and when he speaks loudly or even on opening mouth slightly; > when lying down.

Pain darting from behind forward through eyeball, causing violent pulsating pain in l. temple and over l. eye.

Pulsating headache, mostly in r. temple; < from least motion or noise; > at rest and lying with head high.

Painfulness of cerebellum with stiff neck.

Headache every morning at sunrise, at its height at noon, gradually declines till sun sets, appearing even in cloudy weather.

‖When moving muscles of face, sensation as if skull would burst.

‖Sensation as of a band around head.

‖Severe stitches in l. temple.

‖‖Supraorbital neuralgia, especially on l. side; pain recurs at regular intervals, tends to spread to face or neck and to involve eyes; < from least concussion or motion, but especially by stooping; pale face; restlessness; palpitation.

‖‖Neuralgia, pain centres in, above or below eye, from cold, in damp rainy weather; hyperæsthesia of filaments of fifth pair.

‖‖Violent throbbing shooting pains over l. eye; moderate fever; attack followed by general perspiration; urine dark but without sediment; after confinement.

‖‖Excruciating, burning, stitching pains, that seemed to come from deep in head, affecting l. eye, and seemed to

Google

follow supraorbital nerve of same side; attacks every morning at 4 o'clock, growing < each succeeding morning; at time of attack eye slightly congested with profuse acrid lachrymation; nausea, vomiting and no thirst, tongue clean; > by being bolstered up in bed. θSuppressed intermittent.

‖Headache several times a week, begins soon after rising, generally lasts whole day; tearing, rooting up pain, < from motion, especially walking in open air, when every step is attended by a violent jerk in head, but especially severe when lying down; > sitting still, or walking about room a long time; head confused, often a feeling of emptiness, almost destroying power of thought; any concussion, even loud speaking, aggravates headache; feeling as if brain were shaking in skull on quickly moving head. θChlorosis.

‖Migraine, affecting either supraorbital region during cold rainy weather; severe throbbing or tearing stitching pains, with redness and lachrymation of eye of affected side; attacks last twenty-four hours.

‖Severe uninterrupted twitching, tearing, at times sawing pains, as if nerves were being torn out by a fine instrument, in r. side of forehead and temple, extending over eye and into malar bone; r. eye inflamed, profuse lachrymation, sensation as if eye would be pushed out of head, photophobia; burning heat in affected parts of face; distension and violent pulsation of temporal arteries; coryza; disturbed sleep.

‖Frequent headaches, sometimes on r., sometimes on l. side, then in forehead, vertex or occiput, often spreading to face and shoulder; throbbing, shooting, drawing, pressing; weak digestion and catarrh of stomach after eating fat food; after catamenial period, attacks of pain in upper and lower jaw, tearing lightning-like twitches, with palpitation and fluttering of heart; < from cold water, cold air, and chewing.

‖Any quick movement converts the dull aching pains into acute stabbing.

‖Headache <: from thinking; by a bright light; by noise; by sneezing; by motion of eyes or facial muscles; by opening mouth; by speaking aloud; by cough; from stooping; shaking or jarring head; making a misstep; from least motion; by touch; by warmth.

‖Headache >: when lying with head high; from pressure, and laying hand on it; from washing head with cold water; while at rest.

'Outer Head. ‖Shaking in brain, < when moving head or stepping hard.

Google

‖Tension of scalp; feels sore externally and is sore to touch.
‖Head feels as if too large.

Sight and Eyes. Illusion as if hairs or feathers were on lashes; < on wiping them.
‖Weakness and dimness of vision; sparks before eyes.
Farsighted.
‖Photophobia: oversensitive retina.
‖Accommodative asthenopia with slight retinitis, neuralgia, anæmia of optic nerve from excessive tea-drinking.
Sparks before eyes.
On shutting eyes a sea of fire appears.
Vanishing of sight; all things appear as if through a mist; dimness of lens.
‖Rheumatic cataract of l. eye.
‖Dilated pupils. θHelminthiasis.
‖Eyes look dim and faint; upper lid hangs down as if paralyzed.
‖‖Sharp, stabbing, sticking pains through eyeball back into head, or radiating; < from moving eyes and at night.
‖Eyeballs feel too large.
Violent burrowing stitch in middle of eye and in inner canthus, does not prevent vision but presses upper lid downward.
‖Intolerable pressive pain in eyeball, < on turning eyes, dizzy on attempting to move eyes, is obliged to turn whole head to see.
Pressive pain in eyeballs.
Contractive burning pain in r. eyeball.
Tensive pain in l. eyeball.
Constant sticking pain in r. eyeball.
Itching stitch in r. eyeball, returns after rubbing.
‖Eyes hurt on motion, as if too large for their orbits.
Pain as if sand were in eyes.
‖Shooting pain through r. eye going back into head, causing eye to fill with hot water.
‖Pains as if needles were thrust into r. eyeball.
‖Stabbing pains through eye and around it, often commencing at one point and then seeming to radiate in every direction. θChoroiditis.
‖Dry heat and burning in eyes; is compelled to close them.
‖Excruciating pains as if eye would be pressed out of socket.
‖Eyeball sensitive to touch. θIritis.
‖Eyes < when thinking about them.
‖Pain in eye < at night.

Google

Eyes pain in open air.

‖‖Pain spreads from eye to frontal sinuses and head.

Eyeball painful when moved, feels tense.

‖‖Sensation as if eyes were too large for their orbits.

‖Muscles of eyeball stiff on movement. θIritis.

‖Squinting; convergent strabismus. θHelminthiasis.

‖Severe neuralgic pains, particularly in rheumatic arthritic inflammations.

‖Pterygium, from inner canthus of r. eye some distance over cornea, beginning after a severe pain two years ago; pain in l. eye as if it would fly into pieces, < on stooping and in morning, continuing till noon, then suddenly disappearing.

‖Pains of glaucoma and sclero-choroiditis.

‖Rheumatic iritis in l. eye with excessive ciliary neuralgia, for three weeks; much redness, deep ciliary injection and posterior synechiæ, with violent pain from 3 A.M., for two or three hours, continuing more or less until 3 P.M. (*Atropine* was used externally and *Sulphur* internally), the adhesions were torn and pain relieved the first night; on second night, although pupil was widely dilated, pain returned more severely than ever; pain as if eye were being pulled forward and backward, with numb pain through head, which woke him at 2 A.M., and continued the remainder of the night and all the forenoon; it seemed as if it would drive him crazy; each attack of pain was accompanied by a chill.

Redness of conjunctiva; vessels strongly injected.

Inflammation of cornea.

‖Inflammation of l. eye of four weeks' standing; lachrymation; photophobia; high degree of injection; severe stitching pains in eye, and l. temple; sleeplessness.

‖Scrofulous conjunctivitis and keratitis, if accompanied by sharp pains.

‖Rheumatic ophthalmia, profuse lachrymation with or without pain; ptosis.

‖Gonorrhœal ophthalmia, nocturnal pains in eye extremely severe and extend to bones of cavity of eye.

Bluish ring around cornea; iris discolored.

‖Ten years ago was struck over l. eye with a brick, leaving a large scar and considerable depression over supra-orbital nerve; at irregular intervals extreme pain over site of wound, at times so severe that he feared he would lose his mind; pain came about 10 A.M. and reached its height about 3 P.M., sharp and cutting, extending over temple and forehead, with profuse flow of water from eyes; > in a dark room, when quiet, and almost entirely relieved at night.

Google

‖Upper lids feel hard and immovable.
‖Lids inflamed and ulcerated.
‖Great inclination to wink.
‖Lids lax and paralyzed, they hang low down and must be raised.
‖Lachrymation; tears acrid.
‖Pricking in lids.
Agglutination of eyelids by a viscous gum.
‖‖Everted eyelids.

[6] **Hearing and Ears.** ‖Oversensitive hearing, in neuralgia and headache.
‖‖Sensation of distant ringing in both ears, with a sensation as if ear were loosely stopped or a thick mist were in front of it.
‖Periodical deafness; ears feel as if stuffed.
‖Otalgia, pressing pain as from a plug.
‖Neuralgia of ear, sudden stitch extending to eye, zygoma, jaw, teeth, throat.
‖Pinching, drawing, itching pain in external ear; loud noises painful, when speaking the sound of one's voice resounds like a bell through brain.
‖‖Itching in r. concha.

[7] **Smell and Nose.** ‖Tickling and itching in nose.
‖‖Tickling on back of nose, as if lightly touched by hairs, or as if a gentle wind were blowing across it, lasting a long time.
‖‖Smarting in nose. θHelminthiasis.
‖‖Violent nosebleed. θEndocarditis.
‖Coryza: fluent or dry; with dry heat, no thirst; eyes water; headache, with hoarseness; anxiety about heart; discharge so profuse that it causes coughing and suffocating fits as soon as patient lies down.
Stoppage of anterior part of nose, with profuse discharge of mucus through posterior nares.
‖‖Flow of water from nose. θProsopalgia.
‖‖Discharge of large quantities of mucus through choanæ, nose being dry. θNasal catarrh.
‖‖Mucus from choanæ tastes and smells badly. θNasal catarrh.
‖Copious offensive mucus flows through posterior nares, causing choking at night.
‖Chronic nasal catarrh.
‖Herpetic eruption on nose.

[8] **Upper Face.** ‖Face: bloated, distorted, < morning on awaking; pale, sickly; yellow around eyes; red; sweaty; anxious, in rheumatism.
‖‖Prosopalgia: mostly l. sided, with tearing, shooting, burning into eye, malar bone and teeth; periodical;

Google

from morning till sunset, < at noon; < from motion or noise; with lachrymation, ciliary neuralgia, palpitation; cheek dark red.

Neuralgia affecting infraorbital and maxillary branches of fifth pair of nerves.

Periodical faceache; pains burning and tensive, especially in cheek bones, above eyebrows, in l. side, spreads out over face; frequent nosebleed; red face.

For fourteen days neuralgia, comes on between 11.15 and 11.30 P.M., about fifteen or twenty minutes after lying down in bed; beginning in l. malar bone, extending down face sometimes to neck and only on l. side; pain shooting downward, with burning and throbbing, parts feel swollen; continues till about 3.15 or 3.30 A.M., when she gets to sleep; < lying, > directly she stands up; > by hard pressure, and either cold or warm applications; during day l. side of face feels as if it had been scorched, no actual pain, only a throbbing; pain > after eating.

A heavy cold in head developed into severe neuralgia of l. side of head and face, involving eye; pains seemed to start from l. occipital region and extend forward, sharp and tearing, especially in and around eye; much lachrymation, constant nausea and occasional vomiting of bile; least noise, even talking, < pain; light is intolerable.

Feeling as if all muscles of l. side of face from forehead to neck and l. axilla were pierced with red-hot needles; muscles of cheek and around eye spasmodically affected, muscles of eye contracted, making eye look smaller; dreadful banging, throbbing, burning, tearing pains; > when lying quietly on her face; < from coffee; after the pains affected side of face almost paralyzed; very weak, inclined to weeping; pain preceded by violent beating of heart; attacks renewed by eating.

Stinging, darting pains on l. half of face, commencing under l. eye, going downward to cheek bone, where they were severest, and toward l. side of nose and farther, radiating not so painful down to teeth of upper jaw; > from heat.

Facial neuralgia, l. side; zygomatic region and eyelids slightly reddened and swollen; conjunctiva injected, slight dacryorrhœa; pain commences near infraorbital foramen and extends into eye, temple, ear, nose and teeth, jerking and tearing; increased flow of saliva and increased temperature of parts, which are very sensitive to touch; usually commences in afternoon, rages until midnight, drives out of bed, and remits toward morn-

Google

ing, when patient falls asleep from sheer exhaustion; during spell acceleration of pulse; præcordial anxiety; palpitation and great nervous agitation, with trembliug of limbs; at first pain > by application of water, later this could not be borne; < in open, damp cold air; from lying upon affected side, and chewing; > from rest and wrapping up head.

‖Facial neuralgia of r. side; pain distributed about and within r. orbit, darted through from frontal to occipital region (> by *Cimicif.*, cured by *Spigel.*).

‖Facial neuralgia, l. side, suddenly coming and suddenly going, with palpitation of heart and sleeplessness.

‖Facial neuralgia, r. side; pain began in lower jaw, extending upward to ear and temple; hot feeling around eye; teeth feel too long; pain occurs whenever she lies down. θProsopalgia.

‖Severe tearing, burning pain shooting from l. side of forehead to temple, especially in l. supraorbital ridge with ptosis of l. upper lid.

‖Prosopalgia from drinking tea.

‖When moving muscles of face sensation as if skull would burst.

Stitches from upper maxilla to vertex.

Burning or tearing pressive pains in l. zygomatic region, leaving a dull sensation of swelling.

‖Facial pains: < from stooping, slightest motion, concussion, noise and during stool.

Sweat on face.

[9] **Lower Face.** Lips dry, pale, cracked.

Burning tension in upper lip during rest.

Burning in r. side of upper lip even on touch.

Tearing in lower jaw extending to ear and about it, as far as into nape of neck, so that he could not move head without pain.

Pain as if r. side of lower jaw would be torn out of its joint.

‖Neuralgia radiating to nose, face, temples and neck.

[10] **Teeth and Gums.** Painful jerks in nerve of a hollow tooth; tobacco smoke seemed to relieve.

‖Toothache: throbbing, tearing in decayed teeth; pressing outward, teeth feel cold; > while eating and lying down; < after eating, from cold air and water, from stooping, at night, driving out of bed; from tobacco smoking.

‖Burning, twitching pains in carious teeth; they feel loose and too long; cold sensation when touched; pain < from pressure and stooping, extending into neck and toward r. ear and temple, so that she could not locate the pain; had hot, pale face, feet cold.

Digitized by Google

‖Sudden twitching pain in several teeth, r side, > from warmth of bed, < from slightest draft of air; > sitting quiet with eyes closed.

‖Toothache, r. side; free from pain all day, but when laying head upon pillow at night pain comes on, must sit up or walk about, pain then leaves but returns when she places head upon pillow.

‖Throbbing toothache attended by a rending, burning pain in malar bone, paleness and swelling of face, with yellow rings under eyes; pain in eyes, frequent urging to urinate, with copious discharges, palpitation of heart, a sensation in chest resembling purring of a cat, chilliness and great uneasiness.

Digging pain in carious teeth.

‖Toothache returns when thinking about it.

[11] **Taste and Tongue.** Taste foul like putrid water.

Stammering, with abdominal ailments.

‖Repeats first syllable of a word three or four times. θHelminthiasis.

‖‖Tongue: coated yellow or white; burning, with blisters; cracked.

Fine stitches in r. side of tongue.

‖Stitches in r. side of tongue, < from least motion of tongue; formication in tongue extending into head; pain prevents her turning head to r. side; swelling below chin as large as a hazelnut, < mornings. θNeuralgia of tongue.

[12] **Inner Mouth.** Breath fetid, putrid.

Mouth dry on awaking mornings, with stinging.

Mouth feels dry and pricks as from pins, yet filled with tenacious and nauseous saliva.

White or yellow mucus in mouth and throat.

‖Much spitting of frothy saliva, or slimy mucus. θRheumatic dyspepsia.

[13] **Throat.** Sensation as of a worm rising in throat, > after eating. θHelminthiasis.

Tingling in œsophagus.

Sensation as if a half-fluid body were ascending in throat.

‖Neuralgic affection of pharynx. θSclerotitis.

‖‖Phlegm from choanæ drops down into throat.

[14] **Appetite, Thirst. Desires, Aversions.** Ravenous hunger, with nausea and thirst.

Loss of appetite, with violent thirst.

Desire for alcoholic drinks.

[15] **Eating and Drinking.** Better during, and generally after eating, excepting toothache.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Nausea: before breakfast, with sensation of a worm rising in throat; > after eating; sickly, pale face.

Digitized by Google

Vomits food, with sour rising like vinegar.

[17] **Scrobiculum and Stomach.** ‖Pit of stomach sensitive to touch.

Dull stitches in pit of stomach and oppression of chest < on inspiration.

‖Pressure on stomach as from a hard lump.

‖Neuralgic pains in stomach.

‖‖Acrid, sour regurgitation after eating, followed by vomiting of food taken; constant severe pressing, corrosive pain in stomach; pressure in head and vertigo; stomach not sensitive to pressure; four years ago discharged a segment of tapeworm.

[18] **Hypochondria.** Stitches in region of diaphragm, l. side, arresting breathing.

Heavy pressure in præcordial region, causing constriction and anxiety; with cutting and griping in bowels as from wind.

[19] **Abdomen.** ‖Cutting colic at navel.

Pressure in umbilical region, as from a hard lump.

Stitches in abdomen.

Painful pressure in lower abdomen, as if it would burst, especially in evening before a soft stool, after which it was somewhat relieved.

Griping in abdomen as if all the intestines would be constricted, caused great anxiety and made respiration difficult.

Sharp stitches, like spleen stitches, in abdomen in region of os innominatum, only when walking, and disappearing after thirty or forty steps.

Lancinating pain in abdomen, with falling back of head and loss of senses.

‖‖Pinching and cutting pain in abdomen.

‖Intestinal irritation. θStrabismus. θHelminthiasis.

Noisy, sometimes painful borborygmus.

‖Swelling of abdomen.

Tension in groin.

‖Hernia inguinalis.

[20] **Stool and Rectum.** Emission of fetid flatus.

‖Stools: of mucus, with tenesmus; large lumps of mucus, without feces; of feces, with masses of worms; hard, like sheep's dung, and enveloped in mucus; thin, mushy.

Frequent inefficient urging to stool.

‖Itching and tickling in anus and rectum; ascarides and lumbricoides.

Itching in anus and on coccyx.

‖‖Helminthiasis: dilated pupils; strabismus; putrid smell from mouth, itching of nose, griping pain in belly; throat inflamed, swallows often, pale redness in throat and swelling of mucous membrane; palpitation.

Digitized by Google

Boring stitch in perineum.

[21] **Urinary Organs.** ‖Diabetes insipidus.

‖Urine: copious; with frequent urging, mostly at night; drips involuntarily, with burning in orifice of urethra; whitish sediment; watery, frequent, nervous.

[23] **Male Sexual Organs.** Erections with voluptuous fancies, but without sexual desire.

Itching stitch in r. testicle and penis, from behind forward.

‖‖Prostatic fluid presses out of urethra.

Swelling of one-half of corona glandis.

Tingling around corona glandis.

[24] **Pregnancy. Parturition. Lactation.** Stitches under either nipple.

‖‖Puerperal peritonitis.

[25] **Voice and Larynx. Trachea and Bronchia.** Chronic hoarseness.

Catarrh with hoarseness; continuous coryza; dry heat without thirst; protruded eyes; violent headache; lachrymation.

Tickling in windpipe.

‖Influenza accompanied by facial neuralgia.

[26] **Respiration.** ‖Short breath, < when talking, with red cheeks and lips.

‖‖Dyspnœa and suffocating attacks when moving in bed or raising arms; must lie on r. side or with head high. θHeart disease. θHydrothorax.

‖‖Hardly speaks or takes a deep breath for fear of aggravating the pain. θCardiac rheumatism or neuralgia.

‖Oppression of chest with palpitation when walking fast or from other bodily exertion. θInsufficiency of valves.

‖Suffocating spell from least motion. θCarditis.

[27] **Cough.** ‖Cough: at night, with catarrh; dry, hard; with worm affections; with dyspnœa, < when bending forward; suffocating, as if from a quantity of water flowing into windpipe; dry, violent, hollow, from an irritation in trachea.

‖Catarrh of air passages with fever, hot skin, but no thirst or sweat.

[28] **Inner Chest and Lungs.** ‖Constriction in chest, with anxiety and difficult breathing.

Violent pressure upon chest beneath l. clavicle, and on middle of chest.

Cutting constriction in chest, with anxiety.

Dull stitches in r. side of chest, only during inspiration.

‖‖Stitches in chest, < from least movement or when breathing.

Violent stitch in l. side, just beneath heart.

Google

Dull sticking at point where beat of heart is felt.
Recurrent dull stitches, rhythmical with pulse, at point where impulse of heart is felt or rather more externally.
▮Sensation of tearing in chest.
Tearing boring pain, extending from within outward, beneath r. nipple, pain always extends to sternum and becomes a sharp pressive tearing pain.
Dull sticking pinching pain beneath r. nipple, in thorax, from within outward, violent only on inspiration.
▮▮Stitching needlelike pains in chest.
▮▮Cutting piercing pain through l. chest, near sternum to back; heart not beating, but an uninterrupted rush of blood through it; pulse not beating, but appeared to finger like a thread quickly pulled through artery; hands icy cold with cold sweat; great anguish expressed in face. θCardiac rheumatism.
▮Trembling feeling in chest on moving arms, or from any movement.
▮Can lie only on r. side, with head high. θHydrothorax.
▮▮Rheumatic troubles, especially in l. side of chest.

» **Heart, Pulse and Circulation.** ▮▮Stitches about heart: synchronous with pulse; with anxiety and oppression; with commencing valvular disease, endocarditis, etc.; can only lie on r. side, or with head very high, least motion aggravates.
▮Stitches in heart, and violent throbbing motion of heart may be seen through clothing.
▮▮Drawing sensation in region of heart. θAneurism.
▮Violent stitch in l. side, just under heart, returns periodically.
▮Stitches between heart and epigastrium.
▮Feeling as if heart were compressed or squeezed with a hand.
▮Purring feeling over heart; wavelike motion, not synchronous with pulse.
▮▮Palpitation: violent, < bending forward; high fever; when he sits down, after rising in morning; from deep inspiration or holding breath; from worms; from least motion; with anxious oppression of chest.
▮▮Violent palpitation of heart and frequent attacks of fainting; blowing murmur with first sound of heart. θChlorosis.
▮Waving palpitation, not synchronous with pulse; purring feeling over heart; trembling of carotids.
▮▮In morning, as soon as he sat down, after rising from bed, heart began to beat violently, with great oppression and cutting pains in lower abdomen as from incarcerated flatulence.

Google

Unusually violent palpitation, could hear pulsation, and beats could be seen through clothes.

Tremulous action of heart in nervous and hysterical disorders.

Sudden severe pain in l. side of chest, about region of heart, so violent it "almost knocks her down;" it then passes rapidly around body, from l. to r., seemingly on inside to scrobiculum cordis, where it remains about twelve hours; pain spasmodic, often induces vomiting; attacks every four weeks, but with no distinct regularity, for fifteen years. θAngina pectoris.

Severe pains in all the limbs; hands stiff, cannot move them, particularly fingers; pressing cutting pain in abdomen, beneath floating ribs; terrible palpitation; audible beating of heart, causing pains in back; periodical cutting pains extending to shoulders, head and arms; constriction of chest; great dyspnœa, cannot get enough air, with great oppression of chest and anxious face; extreme emaciation; must be careful while eating lest pain be < to an intolerable degree. θArthritic rheumatism.

Attacks of cramplike, grinding pain across chest; body convulsed; face pale; dyspnœa, nausea, anxiety and faintness accompanied attack, which lasted uninterruptedly for half an hour; rapid and strong beating of heart; bellows' sound during diastole, and friction sound during systole; < by slightest motion; pulse very feeble; extremely sensitive to cold. θRheumatic carditis.

Severe stitching pains in cardiac region; violent palpitation, perceptible to eye; dyspnœa on moving in bed; oppression of chest; anxiety; slight cyanosis of upper lip; heartbeat weak; increased area of dulness on percussion; friction sounds; pulse weak, 120; had swelling of joints of r. thumb, knee, foot and elbow; dark brown sediment in urine; loss of appetite; sleeplessness. θPericarditis.

Acute pericarditis with anxiety and weight in præcordia.

Neurotic form of suffocative breast pang with cardiac hyperthophy.

Endocarditis with insufficiency of mitral valve, after acute articular rheumatism, in a girl æt. 14; purring over region of heart, noise with first tick; throbbing of carotids and subclavian; violent nosebleed.

Strong systolic blowing sound at apex of l. ventricle. θInsufficiency of mitral valves.

Constant pressing, burning and ulcerative pain in

thorax; dyspnœa, with fear of suffocation on motion, so that she is afraid to get out of bed; tremulous sensation in chest and in temples, < from least motion of arms, particularly when raising them toward head, when there is a sensation as of something tearing in chest, with great dyspnœa and anxiety; flushing with sweat on face on touching epigastrium, she cannot bear pressure of clothing; at times cramping sensation, beginning in abdomen and extending into chest, causing dyspnœa; at times violent palpitation with sensation as if heart were being crushed, or with stitches and trembling sensation; at other times as if everything in chest were too short, loose and wabbling about; is very careful when moving and is filled with anxiety on seeing any one move quickly; frequent wabbling sensation in abdomen; head rests upon chest when lying and sitting, if she raises it she becomes anxious, feels as if something were tearing in chest and is seized with nervous spasmodic respiration, with violent and convulsive efforts at distension of chest, face becomes bluish-red and heart beats tumultuously, also violent pulsation in all the arteries; pulse 80 when lying, 93 sitting, and not synchronous with beat of heart; heartbeat weak, indistinct, one running into the other; change from systole to diastole indicated rather by a wavelike motion than by any distinct sound or impulse.

‖‖ Systolic blowing at apex.

‖‖ Rheumatic affections of heart.

‖ Pulse: irregular; strong, but slow; trembling; weak and irregular, at one time rapid, at another slow; quicker than beating of heart; like a thread quickly pulled through artery; intermitting, every other beat drops out.

‖ | Aneurism; a girl æt. 15, light complexion; a few itching pustules on forehead and chin; for two years, visible and felt by hand, a throbbing lump in second intercostal space; feels lump when stretching either arm backward; from stooping or lifting throbbing in chest, with vertigo; drawing in region of heart; stethescope over tumor reveals continuous rushing sound, more marked during heart's systole; first sound somewhat confused; second sound usually prolonged, and of increased intensity; a murmur upward from each side of sternum; frightened when examined; headache like band around head when stooping; nausea (*Spigel.* cured, assisted by *Carb. veg.* and later *Bryon.*).

[30] **Outer Chest.** ‖ Violent shootings in walls of chest, mostly on l., under clavicle or on a line with heart.

Digitized by Google

‖Painful contraction of muscles of chest.

[31] **Neck and Back.** ‖Rheumatism of nape of neck with painful numbness; < lying on back.
Stitches in back; also when breathing.
Bruised feeling in spine, even during rest.
‖Throbbing of carotids and subclavian. θEndocarditis.

[32] **Upper Limbs.** ‖Trembling of arms.
‖Stitches in bends of elbows and joints of hands and fingers.
Twitching in muscles of l. forearm just above wrist, only during rest.
Pressive pain above r. wrist, during rest.
Painful drawing on first joint of thumb where it unites with the metacarpal bone.
Tearing pain in phalanges of r. thumb.
Burning itching in palms.
‖Hands icy cold with cold sweat. θRheumatism.
‖Cold viscous sweat in hands.
Subcutaneous tubercles in palms of hands.
Hard, burning itching nodosities in hands.
Contraction of flexor of fingers.

[33] **Lower Limbs.** Drawing tearing in r. thigh, while sitting.
Persistent tensive stitch in l. thigh, while walking, ceases on standing, returns on sitting.
Persistent itching stitch in l. thigh.
Tearing pain, like a sprain, in l. knee, only when walking, at times he limped because he could not bend knee as usual.
Stitching in calves, with jerking and pulsating, in both patellæ, if knees are held stiffly stretched out.
Stitches in joints of legs and feet, and in thigh.
Pulling in legs from below upward, with heat, or from above downward with coldness of feet.
Contusive pain in knee.
Sprain of foot (after *Arnica*).
Burning pain in instep, without redness.
Deep-seated and lancinating pain in sole of foot when resting body upon it.
Wartlike excrescences on toes.

[34] **Limbs in General.** Constant restlessness during night.
Pressive, pulling or cutting pain in limbs, running lengthwise.
Stinging pain in limbs, principally in joints.
Trembling of limbs, lassitude and heaviness.
‖Stinging pain in limbs.
‖Stinging or stitching in joints.
Tearing pains in limbs, with great weakness of body; tearing in joints; rheumatism.

Google

Acute inflammatory rheumatism; very sensitive to cold air and to touch; slightest jar or knock causes intense pain.

ℓTwitching of limbs. θFracture of bones.

Hard nodosities on hands and toes.

Rest. Position. Motion. Rest: headache >; facial neuralgia >; burning tension of upper lip; bruised feeling in spine; twitching in muscles of forearm; pressive pain above r. wrist.

Lying: vertigo >; pressing pain in head >; headache very severe; causes suffocating fits; neuralgia in face <; on face, pains >; upon affected side facial neuralgia <; toothache >; head rests upon chest; pulse 80.

Lying on back: rheumatism of nape of neck <.

Laying head upon pillow at night: toothache comes on.

Lying with head high: pressing headache >.

Bolstered up in bed: suppressed intermittent >.

Must lie on r. side or with head high: heart disease; hydrothorax.

Sitting: vertigo; pain in forehead; headache >; toothache >; palpitation; head rests upon chest; pulse 93; tearing in thigh; stitch in thigh returns.

Standing: vertigo; pain in forehead; facial neuralgia <; stitch in thigh ceases.

Must sit up or walk about: toothache.

Knees stiffly stretched out: stitches in calves.

Rising: vertigo <; headache <; from a seat, body feels sore and heavy.

Bending forward: cough <; palpitation <.

Stooping: pressing pain in head <; headache as of a band; neuralgia <; pterygium <; toothache <; throbbing in chest.

Raising arms toward head: sensation of something tearing in chest.

Stretching arms backward: feels lump in intercostal space.

Motion: of eyes < vertigo; pressing headache <; violent pain in parietal bone; headache very acute; neuralgia <; rooting pain in head <; quick, as if brain were shaking in skull; quick, converts dull pain into acute; shaking in brain <; of eyes < pains; of eyes, dizzy; eyeball stiff; prosopalgia <; of muscles of face sensation as if skull would burst; of tongue pain <; in bed suffocating attacks; least, suffocating spells; stitches in chest <; of arms, trembling feeling in chest; palpitation; pain in chest <; in bed, dyspnœa; fear of suffocation; of arms, trembling sensation in chest and temples <; least, chill.

Very careful when moving.

Google

Opening mouth: headache <.
Exertion: oppression and palpitation.
Walking: vertigo; pressing pain in head <; swashing in brain; pain in parietal bone; in open air, headache <; about room a long time, headache >; sharp stitches in abdomen disappeared after thirty or forty steps; fast, oppression of chest and palpitation; stitches in thigh; pain in knee; sensation of lightness in body; after, weakness.
Making misstep: violent pain in parietal bone.
Every step attended by violent jerks in head.
Resting body upon foot: pain in sole.
Lifting: throbbing in chest.

[56] **Nerves.** Exaltation of special senses.
Great agitation of nerves.
Restlessness; cannot keep limbs still at night.
Body painfully sensitive to touch, it sends a shudder through whole frame; part touched feels chilly; tingling through body; if he knocks against any part there is a sudden painful crawling through whole body to head.
Body feels heavy and sore when rising from a seat.
Sensation of lightness in body when walking.
Weakness: in morning on waking; after walking.
Sense of weariness all over, with sensation of or real coldness of body.

[57] **Sleep.** Sleepy by day, even mornings; goes to sleep late.
Sleep restless, unrefreshing.
Confused dreams, in which he seemed so busy that he felt weary in morning; could either indistinctly, or not at all, remember his dream.

[58] **Time.** Morning: vertigo <; headache beginning; pterygium <; face bloated <; neuralgia of tongue <; mouth dry on waking; palpitation; weakness; sleepy; feels weary after dreaming.
Day: side of face as if it had been scorched; free from toothache; sleepy.
Noon: headache at height; headache suddenly disappears; prosopalgia <.
Afternoon: neuralgia commences, raging until midnight.
Toward evening: violent pain in parietal bone.
Evening: painful pressure in abdomen.
Night: pains through eyeballs <; choking; toothache commences; frequent urging; cough; constant restlessness; heat in flushes; sweat.

[59] **Temperature and Weather.** Heat: pains in face >.
Warmth: headache <; toothache >.
Warm applications: > neuralgia.

Google

Wrapping head up: facial neuralgia.
Open air: walking, headache <; eyes pain.
Slightest draft of air: toothache <.
Damp, rainy weather: neuralgia; migraine affecting supraorbital region; facial neuralgia <.
Water: applied in facial neuralgia > at first, afterward could not be borne.
Washing: stitches in head <; during, stitches >.
Cold water: pain in jaws <; head >.
Cold: neuralgia; air, < pain in jaws; applications > neuralgia; air, facial neuralgia <; rheumatic carditis, extremely sensitive.

[40] **Fever.** Chill: often recurs at same hour each morning; alternating with heat or sweat, on some parts, others being hot; from least movement; spreads from chest.
Heat: especially in back; flushes, at night, with thirst for beer; on face and hands, with chill in back; with desire to uncover.
Sweat: chiefly on upper part of body; night sweats; offensive smelling, with heat at same time; clammy, on hands; cold.

[41] **Attacks, Periodicity.** Alternate: chill and heat or sweat.
Periodical: pain in head; supraorbital neuralgia; deafness; prosopalgia; cutting pains to shoulders, head and arms.
3 A.M. for two or three hours: violent pain in eyes, continuing until 3 P.M.
From 10 A.M. to 3 P.M. pain increases.
Every morning: at sunrise, headache; attacks of excruciating pain in head at 4 o'clock; each succeeding morning attack <; chill at same hour.
From morning until sunset: prosopalgia.
Sunset: headache declines.
For half an hour: attacks of pain in chest.
For twelve hours: pain in scrobiculum.
For twenty-four hours: migraine.
For fourteen days: neuralgia comes on between 11.15 and 11.30 P.M., about fifteen minutes after lying down in bed.
Several times a week: headache.
For three weeks: rheumatic iritis.
For four weeks: inflammation of eye.
For four weeks: attacks of angina pectoris for fifteen years.
For two years: a throbbing lump in second intercostal space.
Ten years ago: struck over eye with a brick, extreme pain at irregular intervals.

[42] **Locality and Direction.** Right: pressing pain in temple; tearing in frontal eminence; jerking tearing in zygoma;

Digitized by Google

pressive drawing in side of vertex and occiput; cutting pain in forehead and temple, extending over eye; eye inflamed; contractive burning pain in eyeball; sticking pain in eyeball; itching stitch in eyeball; shooting pain through eye; as if needles were thrust into eyeball; itching in concha; facial neuralgia; burning in side of upper lip; pain as if side of lower jaw would be torn out of its joint; pain from teeth into temple and ear; pain in teeth; stitches in side of tongue; cannot turn head to side on account of pain; itching stitch in testicle; dull stitches in side of chest; tearing boring pain beneath nipple; pinching pain beneath nipple; swelling of joints of thumb, knee, foot and elbow; pressive pain above wrist; tearing pain in phalanges of thumb; tearing in thigh.

Left: stitches in head and out of eye; headache spreading to side of head, temple and eye; violent pain in parietal bone; burning pain in side of frontal bone; violent stitches in temple; burrowing pain in vertex and forehead; violent pulsating pain in temple and over eye; neuralgia; violent throbbing shooting over eye; excruciating pain from deep in head affecting eye; cataract of eye; tensive pain in eyeball; rheumatic iritis; prosopalgia <; neuralgia, beginning in malar bone; side of face as if it had been scorched; as if muscles of side of face from forehead to neck and axilla were pierced with red-hot needles; stinging darting in half of face; facial neuralgia coming and going suddenly; tearing, shooting from side of forehead to temple < in supraorbital ridge, with ptosis of upper lid; tearing pain in zygomatic region; stitches in region of diaphragm; pressure upon chest beneath clavicle; violent stitch just beneath heart; piercing pain through chest; rheumatic troubles < on side of chest; severe pain in side of chest; systolic blowing sound at apex of ventricle.

Shooting in walls of chest, under clavicle or on a line with heart; twitching in muscles of forearm; stitch in thigh; itching stitch in thigh; tearing pain in knee.

From l. to r.: pain passes around body.

From within outward: boring in head; dull stitches on top of head; tearing, boring pain beneath nipple; pinching pain beneath nipple.

From without inward: pressure in temples.

From behind forward: pain through eyeball; stitch in testicle and penis.

From below upward: pulling in legs.

[43] **Sensations.** As if he would fall; as if he would be obliged to go to stool; as if intoxicated; as if head would burst;

Google

as of a band around head; as if head were tightly bound; as of electric sparks in temples; brain seemed to be loose; as if brain were shaking in skull; as if nerves were being cut by a fine instrument in forehead and temple; as if eye would be pushed out of head; head as if too large; as if hairs or feathers were on lashes; upper lids hang as if paralyzed; eyeballs as if too large; as if sand were in eyes; as if needles were thrust into eyeball; as if eye would be pressed out of socket; as if eye would fly into pieces; as if eye were being pulled forward and backward; pain in eye as if it would drive him crazy; as if ear were loosely stopped or a thick mist were in front of it; ears as if stuffed; as if back of nose were lightly touched by hairs, or as if a gentle wind were blowing across it; face feels as if it had been scorched; as if all muscles of l. side of face from head to neck and l. axilla were pierced with red-hot needles; teeth as if too long; as if l. side of lower jaw would be torn out off its joint; sensation resembling purring of cat; as of a worm rising in throat; as if a half fluid body were ascending in throat; as of a hard lump in stomach; as if abdomen would burst; as if all the intestines would be constricted; suffocating as if from a quantity of water flowing into windpipe; pulse as if a thread pulled through arteries; as if heart were compressed or squeezed with a hand; as if heart were being crushed; as if everything in chest were too short, loose and wabbling about; as if something were tearing in chest.

Pain: at cerebellum; in upper and lower jaw.

Excruciating pains: in eye.

Extreme pain: over eye.

Violent pain: in l. parietal bone.

Sudden severe pain: in l. side of chest; about region of heart.

Severe pains: in all the limbs.

Excruciating, burning, stitching pains: from deep in head to eye.

Dreadful banging, throbbing, burning, tearing pains: in face and neck.

Sharp, stabbing, sticking pains: through eyeball back into head.

Stabbing pain: through eye.

Lancinating pain: in abdomen; in sole of foot.

Violent throbbing, shooting pains: over l. eye.

Cutting, piercing pain: through l. chest, near sternum to back.

Cutting: in bowels; at navel; in abdomen; extending to shoulders, head and arms.

Google

Pressing cutting pain: in abdomen.
Shooting pain: through forehead.
Shooting pain: through eye, back into head; in walls of chest.
Darting pain: through eyeball.
Stinging, darting pains: in l. half of face.
Burning, twitching pains: in carious teeth.
Twitching pain: in several teeth.
Painful jerks: in nerves of a hollow tooth.
Violent stitch: in l. side, just below heart.
Severe stitching pains: in cardiac region.
Stitching, needlelike pain: in chest.
Stitching pain: in eye and temple; in calves.
Sudden stitch: extending to eye, zygoma, jaw, teeth, throat.
Violent burrowing stitch: in middle of eye and in inner canthus.
Boring stitch: in perineum.
Pulsating stitches: in frontal protuberances.
Stitches: in l. side of head and out of l. eye; dull, on top of head; in l. temple; from upper maxilla to vertex; in region of diaphragm; in abdomen; under either nipple; in chest; about heart; in heart; between heart and epigastrium; in back; in bends of elbows and joints of fingers and hands; in joints of legs and feet and in thigh.
Fine stitches: in l. temple; in l. side of tongue.
Persistent itching stitch: in l. thigh.
Persistent tensive stitch: in l. thigh.
Itching stitch: in r. eyeball; in r. testicle and penis.
Dull stitches: in pit of stomach; in r. side of chest; where heartbeat is felt.
A violent jerk: in head.
Very violent tearing: in occiput, forehead and temple.
Tearing pains: in occiput, in vertex and in forehead; in lower jaw to ear and nape of neck; in chest; in phalanges of r. thumb; in l. knee; in limbs; in joints.
Tearing, boring pain: beneath r. nipple.
Tearing: rooting up pain.
Tearing, lightning-like twitches: in head.
Jerking tearing: in r. zygoma.
Thrustlike tearing pain: in forehead.
Throbbing, tearing: in decayed teeth.
Burning or tearing pressive pain: in l. zygomatic region.
Tearing, burning pain: shooting from l. side of forehead to temple.
Burning, tearing pain: in brain.
Tensive, tearing pain: in forehead.

Google

Drawing, tearing: in r. thigh.
Rending, burning pain: in malar bone.
Digging pain: in carious teeth.
Burrowing pain: in occiput.
Pinching pain: in abdomen.
Griping: in bowels.
Cramplike grinding pain: across chest.
Boring: in forehead, vertex, cerebellum.
Pinching, drawing, itching pain: in external ear.
Pulsating pain: in l. temple, and over l. eye.
Neuralgic pain: in and about eye; in face; radiating to nose, face, temple and neck.
Cutting constriction: in chest.
Constant pressing burning and ulcerative pain: in thorax.
Contractive, burning pain: in r. eyeball.
Burning pain: in r. side of forehead to eyes; in l. side of frontal bone; in face; in instep.
Pressive, corrosve pain: in stomach.
Contusive pain: in knee.
Sharp sticking: just behind and above frontal eminence.
Constant sticking pain: in r. eyeball.
Dull sticking: at point where beat of heart is felt; beneath r. nipple; in thorax.
Rheumatic pain: at nape of neck.
Tensive pain: in l. eyeball; in face.
Intolerable pressive pain: in eyeball.
Pressing pain: in top of head; in r. temple; in r. side of head and eye; in eyeballs; in ears; above r. wrist.
Numb pain: through head.
Stinging: in mouth; in limbs.
Smarting: in nose.
Burning: in r. side of upper lip; in orifice of urethra.
Burning tension: in upper lip.
Burning itching: in palms.
Soreness: of body.
Painfulness: of cerebellum.
Bruised feeling: in spine.
Soreness: of scalp.
Painful numbness: of nape of neck.
Cramping sensation: from abdomen into chest.
Violent pressure: in forehead; in both temples.
Painful drawing: on first joint of thumb.
Pressive drawing: in r. side of vertex and occiput.
Drawing sensation: in region of heart.
Jerking: in both patellæ.
Pulling: in legs.
Throbbing: in face; in teeth; in lump in second intercostal space; in chest; of carotids and subclavian.

Digitized by Google

Pulsating: in both patellæ.
Heat: in back; on face, and hands.
Dry heat and burning: in eyes.
Tingling: in œsophagus; through body.
Tension: of scalp; of groin.
Pressure: in stomach; in head; in præcordial region; in umbilical region; in lower abdomen; violent upon chest.
Constriction: in chest.
Heavy feeling: of body.
Weight: in præcordia.
Oppression: of chest.
Tickling: in nose; on back of nose; in anus and rectum; in windpipe.
Pricking: in lids.
Painful crawling: through whole body to head.
Dryness: of mouth.
Anxiety: in præcordia.
Discomfort: in abdomen and thorax.
Lightness: of body.
Wabbling sensation: in abdomen.
Swashing: in brain.
Purring feeling: over heart.
Trembling: of arms.
Trembling feeling: in chest.
Tremulous sensation: in chest and temples.
Formication: in tongue, extending up into head.
Itching: in r. concha; in nose; in anus and rectum; on coccyx; in pustules.
Coldness: of feet; of body.

44 **Tissues.** Neuralgic affections; sensitiveness to concussion or shock.
Dropsy of internal parts.
Painful glandular swellings.
Rheumatism attacking heart.

45 **Touch. Passive Motion. Injuries.** Touch: dull stitches in head <; headache <; scalp sore; eyeball sensitive; face during neuralgia sensitive; burning in upper lip; cold sensation in teeth; pit of stomach sensitive; on epigastrium, flushing with sweat on face; acute inflammatory rheumatism; sends a shudder through whole frame.
Lying on hand: headache >.
Wiping eyes: as if hairs were on lashes <.
Pressure: > pressing headache; headache >; neuralgia > by hard; toothache <; stomach not sensitive; of clothes unbearable.
Rubbing: itching stitch in eyeball returns.
Jar, every: headache <; or knock causes sudden painful crawling through whole body to head.

Google

" **Skin.** Pale, wrinkled, yellow, earthy skin.

" **Stages of Life, Constitution.** Light hair, debilitated, pale, thin, bloated persons, complaining of weakness.

" Worse from every shaking, commotion, or concussion.

Adapted to anæmic, debilitated subjects, of rheumatic diathesis; scrofulous children afflicted with ascarides and lumbrici.

Boy, æt. 5; stuttering speech.

Boy, æt. 10, three years ago had an attack of rheumatism, a year thereafter another attack, followed by dropsy, six weeks ago a third attack; cardiac disorder.

Girl, æt. 14, after acute articular rheumatism; endocarditis.

Girl, æt. 15, suffering seven years; headache.

Boy, æt. 17, well developed, naturally vigorous and active, dark hair, blue eyes, fair complexion; rheumatic carditis.

Girl, æt. 19, suffering from chlorosis; headache.

Young man, æt. 19; iritis.

Miss R., æt. 23, complexion fair, hair dark, lymphatic temperament, after suppression of ague; supraorbital neuralgia.

Alice T., æt. 23, suffering a month; prosopalgia.

Miss W., æt. 23, suffering two years; mitral insufficiency.

Man, æt. 25, choleric-sanguine temperament, strong constitution; neuralgic headache.

Woman, æt. 26, ill since birth of last child, which was her fourth; cardiac disorder.

Woman, æt. 27, nervous, ill seven years; gastric disorder.

Woman, æt. 28, single, suffering four years; neuralgia of tongue.

Woman, æt. 35, suffering one month; conjunctivitis.

Woman, æt. 36, cook; toothache.

Laborer, æt. 36, after rheumatism pericarditis.

Man, æt. 38, German, ten years ago was struck over l. eye with a brick, since then suffering; supraorbital neuralgia.

A lady, æt. 38, a brunette, of robust habit, mother of several children, had always a tendency to nervous affections, especially when under external influences; neuralgia of face.

Miss H., æt. 44, suffering fourteen days; facial neuralgia.

Man, æt. 51, suffering from rheumatic iritis; ciliary neuralgia.

Shoemaker, æt. 52; toothache.

Lady, æt. 54; ciliary neuralgia.

Man, æt. 56; facial neuralgia.

Watchmaker, nervo-bilious temperament, always suffered when compelled to use persistently the eye-glass; facial neuralgia.

Google

Mind. Conscious, but unable to act upon her limbs.
Insensibility (loss of feeling) with the chills.
Mental dulness; difficult comprehension.
Irresistible desire to sing, excessive mirth, followed by sadness.
Paroxysms of anxiety or anguish. θCardiac troubles.
Fear of the future; tired of life. θChronic orchitis.
Aggravation from excitement.
Fancies appear on shutting eyes. θTyphus.
Taciturn and discontented mood, not disposed to talk.
Delirium: with the heat; when falling asleep, with the chills.
Crazy feeling, head feels blown up.
Feels awkward about her work, which she cannot accomplish satisfactorily.
Alternating merry, peevish, vexed and scolding mood.
Dulness with gloominess over root of nose.
Inconsolability, would rather die on the spot; with the heat.
Weeping and inconsolable mood.
Inclination to weep: with the dreams; with whooping cough; with heat; with sweat.
Anxiety: in features; looks around anxiously; with the dreams; and heat, suddenly; nausea, pallor, after exercise out-doors; restlessness; with attacks in throat; in croup; with dyspnœa; in typhus.
She is very fretful and anxious about her condition, fears she will die of suffocation.
Anxious sweat and faintness; with angina pectoris.
She is very timid, and is especially pursued and incessantly tormented by a frightful scene of some mournful event of the past.
She is very timorous, and starts at every trifle, which affects her feet, so as to make them feel heavy.
Timidity of mind with the sweat.
Terror and fear: of approaching death; that she will die of suffocation; with heart disease; with whooping cough; with the heat; with the sweat.
He is anxious, as if some misfortune would occur of which he has a presentiment.
Apprehension of a fatal termination of his disease.
Great alarm, agitation, anxiety, difficult respiration.
Fright awakens.
Nervous; desponding about loss of sexual power.
Satiety of life, with the heat.
Ill-humored; dislikes to talk and answer.
Out of temper and lazy; would rather rest, and is not disposed to talk.

Google

Peevish, vexed and scolding mood.
Sulky, obstinate and improper behavior.
‖Obstinacy, with whooping cough.
‖‖Every excitement increases the cough.
Thinking of it increases one-sided heat of face.

[2] **Sensorium.** ‖Vertigo: with danger of falling; at night, when awaking, with nausea; when sitting, as if head would fall to one side, with a feeling of heat in head; as if one would fall backward; as if tipsy; after sleep, with the heat; with rush of blood to head.
‖Congestion of blood to head, with throbbing and pressure in forehead.
‖Heaviness and fulness in head, as if all blood were mounting to head, with vertigo.

[1] **Inner Head.** Stitches in temples.
Sharp stitches externally in l. temple, extending to forehead.
While lying feels a strong pulsation, < about ear on which she is lying.
Dull headache in r. side of brain, on coming into warm room from open air.
Headache as if skull would burst, in vertex and forehead.
Pressing sensation: in r. temple, from within outward; downward drawing pain in r. side of head and neck; outward on r. parietal bone, while lying.
Pressing headache in vertex.
‖Pressing headache in r. frontal eminence, from within outward, < while sitting, on entering warm room after walking in open air, and from looking at anything sharply; > when lying in horizontal position, especially when lying on back.
‖Forehead: blood accumulated, pressing out; burning heat; violent heat; pain; stitches from temples; pressure.
‖Occiput: headache; stitches; pain; heaviness before fever; stitch on turning head; burning.
‖Headache: when gazing steadily; on rising, > after washing and taking breakfast; from dry, cold weather; after intoxication; with the chill; with heat of face.
‖Congestion of blood to head, with pressing, knocking and pulsating in forehead; redness of face, with anxious mien; > when lying in a horizontal position.
While lying, she feels a dull, tremulous roaring (wuwwern), like a strong pulsation, each time with a double stroke, in head, in region of ear upon which she lies in bed; when turning on other ear she feels it in that side.
Bursting pain in head, with whooping cough.
‖Meningitis, scrofulous or tuberculous; congestion of blood

to head, with pressing, knocking and pulsating in forehead; redness of face with anxious mien; > when lying in horizontal position; heat in head; bending head backward, with tension in neck; eyes staring, lids wide open; double sight; face pale and cold, with heat, or alternately red and pale; twitching of muscles with fever; frequent waking with a start; tossing about; stupid slumber.

[4] **Outer Head.** ‖Sharp stitches in l. temple, externally, extending into forehead.

Sharp stitches in scalp, with heat of scalp.

‖Sensation as if hair were standing on end on vertex; during chill.

Sharp pressure externally, at both temples.

Gnawing pain, externally on crown of head.

Forehead painful to touch.

Disagreeable sensitiveness of cranial integuments, particularly on moving scalp.

‖Violent itching on scalp.

‖Yellow, scabby eruption.

Turning head: a stitch in occiput; to right, neck pains; neck stiff; tensive pain in neck.

‖Bending head back: tension in neck; in croup and suffocative attacks.

Jerks head downward.

‖Bending backward and sinking of head, with painful stiffness of neck; piping, anxious inspiration, with dry, barking cough. θCroup.

Holding head in an upright position, > dull pressure in occiput.

[5] **Sight and Eyes.** Sees visions on closing eyes.

Double vision; > lying down.

Pressing and stinging in eyes.

Coldness of eyes.

Lachrymation and headache, when looking fixedly at one spot.

Things appear in flames, at night.

Objects appear to move up and down.

Could not distinguish objects.

She can recognize distant objects only with great exertion.

Looking sharply at anything increases headache and causes lachrymation.

Pressing in outer half of l. eye.

Tension about l. eye, near temple.

Tearing and stinging in l. eye, after fever.

Stinging about eye.

Stinging, finally pressing pain in both eyes, in evening.

Stinging itching under l. eye, > by rubbing.

Google

Coldness or heat in eyes.
Redness of conjunctiva; eyes fill with puslike matter.
Burning in l. eye about eyeball.
‖Heaviness and nightly agglutination of lids.
Tears exude from between closed lids.
Sudden stinging drawing at outer canthus of l. orbit, which spreads around, above and below to inner canthus.
Tensive stinging pain in l. outer canthus, most severe on moving eyes; disappearing when touched.
Eyes close involuntarily, almost spasmodically.
Pressing under eyelids.
Burning pain on external surface of l. lower lid.
Itching of eyelids.
‖Redness of eyes, with lachrymation and burning.
‖Eyes protruding, staring, or deeply sunken.
‖‖Inflammation with dryness of lids.
Eyes have a dull, swollen look, as after intoxication.
Pressing pain over r. eye, externally.
‖Maculæ of cornea.
‖‖Eyeballs staring and perceptibly protruding; stitches in balls and burning around eyes, with lachrymation, > from any sudden light; often eye feels as if twisted around; there is constant flashing of colors, mostly deep red, with figures of light, etc., even when eye is closed, especially at night; thyroid gland is considerably hypertrophied; palpitation very marked, makes her uneasy, restless and easily frightened, especially at night. θBasedow's disease.

[6] **Hearing and Ears.** Hardness of hearing.
Congestion of blood to ears; burning.
Dull ringing in ears; ringing in r. ear; hears a pulsating roar in ear upon which she lies; as if a battery of guns were discharged, at night.
Cramplike pain in l. ear, while walking in open air.
Pressure in ears, and crowding sensation in same.
Drawing pain in internal r. ear.
Earache of a contracting kind.
Fine stitches in r. ear, outwardly, as if passing through tympanum.
Digging stitches in depth of l. ear.
‖Heat in ears.
Burning: in ears from throat; behind ear.
‖Suppuration of external ear.
Pain in cartilages of ears.
Burning in orifice of r. ear.
An inflamed nodule finally covered with a scab, painful to touch and remaining several days, in l. concha,

Google

close to entrance of meatus auditorius; tensive pain, creeping as if it would gather and break, at times stitches.

Red swelling of r. helix, with a pimple on same, exuding moisture like an ulcer, for nine days; painful on external pressure.

Boils on l. ear, painful to touch.

[7] **Smell and Nose.** Bleeding of nose: when blowing it; during dinner; with whooping cough.

Dulness and sensation of gloominess over root of nose like that preceding a common cold.

Tensive constricting sensation above root of nose.

Tearing in nose.

Creeping stitches in l. nasal bone.

❙Nose stuffed up. θCoryza. θWhooping cough.

❙Coryza: fluent; hoarseness; croupy cough; after dry, cold winds; with chills; in measles.

❙❙Breathing through nose obstructed by a swelling in fauces.

❙Dryness of nose.

❙Retention and thickening of nasal mucus.

❙Nasal mucus viscous, grows thick. θMembranous croup.

❙Chronic dry nasal catarrh; nose entirely occluded.

❙❙Coryza; nose running, or stopped up, with fever; hoarseness; at same time catarrhal affection of larynx, with hollow or crouplike cough; respiration difficult, with a noise sounding as in laryngo-stenosis.

❙❙Nostrils wide open; fanlike motion.

❙Nose pinched; cold.

Eruption on point of nose, and on lips.

[8] **Upper Face.** ❙Face: distressed, in croup; anxious; livid; pale and bloated; blue; pale, with sunken eyes; red, with anxious expression; alternately red and pale; ❙❙cold sweat.

Heat on one side of face, < when thinking of it.

Swelling of cheeks.

Itching and stinging in cheeks.

Cramplike pain from l. articulation of jaw to cheek; evenings, while eating or when walking in open air.

A vexed expression, with cough at night.

Coldness, pallor and sweat of face, with heat of body.

❙Cold sweat in face, in evening.

Flying heat in face and in blood, with excitement of nerves.

❙Herpes on face, especially in scrofulous persons, after a cold, with dry, croupy cough.

[9] **Lower Face.** Tearing and stinging in l. cheek after fever.

Into cheeks throbbing, down from head; down from articulation of jaw; tearing from cheek to neck.

Google

Pressing, tearing sensation in r. zygomatic arch.
‖Pricking pains passing transversely across upper jaw.
Jerking fine stitch from posterior portion of r. upper jaw into r. internal ear, at night in bed.
‖Cramplike pain extending from l. articulation of jaw, down cheek; evenings while eating.
Tension in articulation of l. jaw when walking in open air.
Pain in articulation of jaw as if dislocated.
Lower jaw drawn by cramp; painful to touch.
Swelling of cheeks.
Stinging, itching in l. cheek.
Fine stitches beneath lower lip.
‖Mouth firmly closed, only slightly opened with a groaning breath.
Lips livid.
▮Eruptions on lips; after fever.
▮Swelling of maxillary glands, with tension.
After opening mouth wide, and then biting teeth firmly together, cramp in neck.
Protracted violent burning under r. angle of mouth, near chin, as if eruption were to appear; < on stretching skin.
Left side of chin to angle of mouth painful to touch, as if ulcerated.
▮Numbness in chin.
Heat in chin.
Pimples beneath chin, on neck, painful to pressure.

[10] **Teeth and Gums.** Teeth feel dull and loose when masticating.
Itching and stinging in teeth.
Pain as if something had got jammed between teeth in chewing.
Pain in posterior molars of r. lower jaw, as if gums and teeth were swollen and latter being lifted.
Burning pain in l. upper molars.
‖Heat in teeth.
Itching in upper and lower teeth.
Gums painful while chewing, with swelling; thin white coating.

[11] **Taste and Tongue.** ▮Taste: bitter, only in throat; bitter, with dry tongue; bitter, with chill; sweetish, in mouth; like glycerine; of fresh nuts; coffee is bitter and disgusting; tobacco has a scratchy, bitter taste in mouth and fauces.
▮Tongue: brown, dry; dry and red; vesicles at edge of tongue, with soreness.
▮Difficulty of speech.

Google

[12] **Inner Mouth.** Mouth raw.

Mouth and tongue full of vesicles, with burning and stinging pains, cannot eat solid food.

‖Mouth burning, dry. θCroup.

Saliva diminished; or with whooping cough, increased.

[13] **Throat.** ‖Burning and stinging in throat; rawness and scratching.

‖Penetrating tickling in throat, toward ear.

‖‖Sore throat, < after eating sweet things.

‖Thyroid gland swollen, even with chin; at night suffocating spells, barking, with stinging in throat and soreness in abdomen.

‖Throat externally swollen; suffocating attacks.

‖Relief of throat symptoms, when lying on back.

Stitches in goitre, even when not swallowing.

Constantly recurring needlelike stitches above pit of throat, externally, in lower portion of goitre.

‖Pulse 100; respiration 50, wheezing, whistling, occasionally sawing; head thrown back, muscles of chest working, abdomen contracted under ribs with every effort to inflate lungs; cold, clammy sweat all over; lies quietly on side, anxious for breath; does not want to be fanned; eyes fixed, pupils dilated; does not notice attendants; loose involuntary discharge from bowels in morning. θDiphtheria.

π Tension and pressure in throat (relieved by *Calc*).

‖Pain in throat when coughing and speaking.

Stinging in throat, particularly after eating, and a sensation outside of throat as if something were being pressed out; < morning and evening.

‖Stitches in throat.

‖Dryness in throat; < by hawking.

Roughness of throat on coughing; in whooping cough.

Scraping in throat.

Quick and strong hawking ends a suffocating attack.

‖Tickling in throat causes cough.

Continual very bitter taste deep in throat, not in mouth.

Burning in throat, in front, and then in ears.

Attack of sudden burning and compression; drawing toward throat; and anxiety, passing off on sitting up in bed.

‖Frequent burning and dryness in throat.

‖Tonsils, soft palate and uvula somewhat swollen and highly reddened.

Painful pressure above thyroid cartilage, < by palpitation.

Very disagreeable sensation of relaxation in œsophagus and stomach, as if he had drunk a great deal of lukewarm water.

Google

Heat in œsophagus.
‖Swelling in fauces, with a broad basis, projecting from r. to l., allowing in l. but a small passage of food and obstructing breathing through nose; voice somewhat nasal; snoring and rattling breathing at night; wakes up several times during night with want of breath, increasing to suffocation; a slight cough and a numbness in chin and in front of throat.
‖Deglutition prevented.
▮Difficult swallowing. θCroup.
▮On swallowing: stitches in neck pass off; violent straining pain; pain in goitre; a moving sensation in goitre.

[14] **Appetite, Thirst. Desires, Aversions.** ▮Insatiable appetite and thirst; or diminished appetite, out of humor.
Desire for dainties.
▮Thirstlessness; rarely thirst with the chill.
‖Thirst, but is only able to swallow small quantity and with difficulty.
Violent thirst after smoking.

[15] **Eating and Drinking.** ‖Eating and drinking relieve cough.
▮Drinking milk, ale or spirits, or cold or hot tea, or cold water brings on cough.
During dinner, nosebleed.
While eating, cramp in articulation of jaw.
On chewing: gums pain; pain in molars.
After eating: stinging in throat; sweet things < sore throat; fulness and distress; cutting in upper part of abdomen; colic.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough.
Eructations: repeated; empty; sour; bitter.
Nausea: continuous; and vertigo, when waking; when smoking; and waterbrash.
Retching of mucus.
Sense of sickness and faintness at stomach as if one had drunk a quantity of warm water.

[17] **Scrobiculum and Stomach.** She cannot endure tight clothing about body, particularly around epigastric region.
Pressure in epigastrium, in afternoon.
Internal sensation of coldness in epigastrium, with fulness in that region.
Pressing pain in gastric region, lasting all forenoon.
Beneath short ribs pain on coughing.
‖Chill in pit of stomach.
▮Pit of stomach drawn in during croup.
Ulcerative feeling in pit of stomach; must lie on back.
Drawing, as if growing together, in pit of stomach as far

Digitized by Google

as throat, when it seems to press windpipe so that she can hardly breathe.

‖Craves dainties; after eating has dyspeptic distress and fulness of stomach; > from warm drinks, particularly colicky pains in abdomen.

Cannot tolerate tight clothing about stomach.

Stitches in region of stomach.

‖Stomach feels flaccid and as if standing open. θWhooping cough.

‖Craving at stomach before menses.

‖Dyspeptic distress and fulness in stomach, after eating.

[18] **Hypochondria.** ‖Pressure in hypochondria. θWhooping cough.

‖Chronic pancreatitis.

[19] **Abdomen.** Rumbling in abdomen < evenings and mornings.

‖Violent action of abdominal muscles during inspiration.

‖Viscera drawn up against diaphragm.

‖Cannot bear tight clothing on abdomen. θWhooping cough. θDyspepsia.

‖Pain in l. side of abdomen; digging and choking; > after discharge of wind; at times as if something alive were moving there.

‖Pain in abdomen, instead of catamenia.

Tensive pain from middle of hypogastrium to anus; cutting in hypogastrium, extending toward l. breast, in evening.

Boring stinging in l. hypogastrium on expiration, < on stooping.

Tense abdomen.

Tensive pain in upper abdomen while sitting or walking, < on stooping.

While sitting, painful constriction in l. side, beneath stomach, particularly when lying on r. side.

‖‖Cramps in abdomen; pinching colic.

Lower part of abdomen feels empty; viscera drawn up against diaphragm.

‖Gurgling in abdomen, urging and rumbling before stool.

Sensation like a fine digging, as if something alive were beneath skin of abdomen, above l. hip in the side upon which he lies, in morning.

A twisting sensation in l. side of abdomen, < when pressed with hand.

Stitches in r. side of abdomen, in region of liver.

Fine stitch, externally, on navel.

‖Colic: before menses, before chill; with the sweat.

‖Violent commotion of abdominal muscles during inspiration. θWhooping cough.

Digitized by Google

Squalmishness in abdomen, with frequent fluid stools, like diarrhœa.
When smoking tobacco, heat in abdomen rises into chest, rest of body chilly.
‖Heat in abdomen.
‖‖Peritonitis.
Cramplike pain in l. groin, while sitting.
Stitches below groin.
Pain in abdominal ring as in inguinal hernia.
Only while sitting, pressing, tearing pain in region of abdominal ring, on both sides.
Itching near groin.
Glandular swelling in r. groin, with tensive pain while walking.
Small boil in l. groin, very painful.
Swelling of inguinal glands.

[20] **Stool and Rectum.** ‖Diarrhœic stools: with tenesmus; frequent, fluid; white.
‖After cholera, croup.
‖‖Occasional diarrhœa with a large number of ascarides, after which she always feels great relief.
‖‖Stools small and hard, with tenesmus.
‖Before stool: noise in abdomen; urging and rumbling; itching in anus.
During stool: pressure, caused by flatus in lumbar region; straining in anus as if diarrhœa would ensue; sore pain in anus lasting for some days.
After stool: blood passes from anus.
‖Costive; hard stool, insufficient, with tenesmus; soreness of anus.
‖‖Formication in rectum.
Pain from hypogastrium to anus.
‖Smarting in anus.
Stitches in anus, and snarling noise in abdomen, before each stool.
Itching, biting and soreness at anus, discharge of ascarides.
‖‖Ascarides with whooping cough.

[21] **Urinary Organs.** Very thin stream of urine.
‖Frequent urging to urinate, with small discharges; at times without discharge; at others with discharges of acrid smelling urine, which deposited a dirty-white sediment.
Increased flow of urine.
‖Involuntary discharge of urine. θWhooping cough.
‖Urine frothy; sediment thick, greyish white or yellow.

[22] **Male Sexual Organs.** Drawing, painful stitches, extending from body through glans penis.
Voluptuous itching at point of glans penis, for several hours, urging him to rub the part.

Digitized by Google

Itching, burning in scrotum and body of penis.
Total want of sexual desire.
‖Chronic enlargement of prostate gland.
‖Swollen, painful spermatic cords.
‖Stitches into spermatic cord; drawing.
Large, somewhat blunt stitch, shooting from testicle into spermatic cord.
Pressive swelling of testicles.
Simple pain in testicles, also when touched.
A pinching, bruised, squeezing pain in testicles.
‖Shooting up entire cord; any motion of bed or clothing brought on throbbing, in addition to constant, heavy, dragging pains.
‖Since two years swelling of l. testicle as large as a hen's egg, smooth and hard; obstruction of vasa efferentia; shooting pain from testicle into inguinal region.
‖After checked gonorrhœa orchitis, first r. then left.
‖Maltreated orchitis; also after checked gonorrhœa.
‖Right epididymis enlarged and hardened, with little pain; cord also thickened and hard; fistulous opening (in connection with lower part of epididymis), discharges a little thick, whitish matter; scrotum has an irregular and discolored appearance from a sinus and cicatrization of former abscesses and sinuses; urine always thick; total want of sexual desire; both testicles soft and small; nervous and despondent about loss of sexual power; apprehensive of a fatal termination.
‖Scirrhous testicle.
‖Heat in male genitals; in penis, scrotum, testicle and spermatic cords.

[23] **Female Sexual Organs.** Enlargement and induration of ovaries.
‖Menses too soon, too profuse.
‖Before menses: colic, backache, soreness in sacrum and craving in stomach, palpitation.
‖During menses: drawing in all the limbs; awakes with suffocating spells.
Catamenia suppressed; at the time violent pains in small of back and abdomen.
‖Violent drawing in upper and lower limbs, during menses.

[24] **Pregnancy. Parturition. Lactation.** ‖A particular condition of placenta seems only cause for protracted, painful and unsuccessful labor.
‖Twice, after a few doses of *Spongia* 200, miscarried at about six or eight weeks; a few doses brought on flowing like menses, continuing several days.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness, cough, coryza.

Digitized by Google

‖Hoarse, voice cracked or faint, choking sensation; whistling inspiration.
‖Hoarseness with soreness and burning.
‖Feeling of a plug in larynx; larynx sensitive to touch and when turning neck; talking hurts.
Pressure in larynx when singing.
Cracked voice in evening; increasing hoarseness, can only speak with difficulty.
‖Voice: nasal; hollow; low; lisping; weak; cracked; not clear; failing, when talking or singing; giving out, with chronic hoarseness.
‖Chronic catarrhal hoarseness.
‖Hoarseness: with coryza; with cough; whooping cough; typhus; sweat; measles; after laryngotomy.
‖Rough, crowing cry with the cough.
‖‖Aphonia in a boy, æt. 3, who had undergone laryngotomy for removal of a bean.
‖Chronic sore throat, < when reading aloud, talking or singing; < after eating sweet things.
‖‖Laryngeal phthisis.
‖Great dryness of larynx.
‖Laryngismus stridulus.
‖‖Talking, singing or swallowing hurts larynx.
‖Inflammation of larynx, trachea and bronchia.
‖Attacks of mucous rattling in windpipe; at times strangling.
‖Feeling of stoppage in windpipe.
‖Starts from sleep suddenly with contraction of larynx.
‖Region of thyroid gland indurated.
‖Contraction in larynx, constriction, suffocation; also during sleep.
‖As if a stopper or valve were in larynx. θCroup. θWhooping cough.
‖After plastic lymph has been deposited a foreign body is audible in larynx or trachea moving to and fro; child coughs up cutaneous masses or tough, thick phlegm.
Severe pressing inward in larynx, as if with a nail, when moving, in evening.
Drawing toward larynx and contraction therein, in evening.
Jerking, fine stitches externally in region of larynx.
‖Irritation in upper part of larynx.
‖Tickling in larynx, with whooping cough.
‖Burning, tickling in larynx and trachea.
‖Scraping, roughness, in larynx and trachea.
‖Dryness of larynx; < by hawking; with the sweat; with short, barking cough, embarrassed breathing

Digitized by Google

as if larynx and trachea were narrower; with difficult speech, hoarseness; expectoration of more or less yellow mucus, consisting of little lumps; beginning phthisis laryngea.

▮Laryngeal catarrh: with coryza; with dry cough, tormenting during night; with ulcers in larynx.

▮▮Larynx sensitive to touch. θCroup. θWhooping cough.

▮▮Perichondritis laryngea; hollow, barking, dry cough, day and night, constriction in larynx; pain in larynx on touching it, and on turning neck; whistling breathing.

▮▮Larynx elevated and depressed, during respiration. θCroup.

▮▮Swollen larynx, almost protruding above chin.

▮Glandular swellings about larynx and trachea.

▮In trachea: pain; shock upward, like a suffocative paroxysm, starting out of sleep; contraction; burning; rattling; pain on coughing; dryness.

▮Catarrhal affections of air passages with dry cough and hoarseness, no fever, in grown persons.

▮▮Fever and irritation in throat, with hoarse, croupy cough, < in evening; breathing wheezy; spells of choking in middle of night. θLaryngitis.

▮Dry bronchitis, with terrible, hard, dry, racking cough; much dyspnœa and slight expectoration; < in hot room, > by eating or drinking.

▮Spasmodic paroxysms of cough and dyspnœa; < from a sudden change of atmosphere, a wind arising or an unpleasant moral impression; wheezing, sibilant ronchi.

▮▮Cough dry and sibilant, sounding like a saw driven through a pine board. θCroup.

▮▮Awoke with a violent, harsh, hollow-sounding cough; voice hoarse; respiration quick, little impeded, but with much rattling; high fever; skin hot and dry. θCroup.

▮▮After cessation of coryza, hollow, barking, dry cough, with croupy sound; short attacks of rattling in windpipe while breathing; skin hot; frequent stretching and yawning; while coughing, makes faces and complains of pain under larynx; cough < in afternoon; lachrymose humor; pulse hard, rapid. θCroup.

▮▮Sat up in bed; face bloated and bluish; anxious expression; breathing difficult, rattling, with much effort of chest and distortion of face; eyes project; head bent backward; cough whistling and resonant; seizes hold of nearest object, grasps at larynx, which is painful; anxious sweat; pulse 110; great heat, constant thirst; involuntary discharge of feces and urine while coughing. θCroup.

Google

Burning fever; face red; skin dry; violent thirst; constipation; hoarse, rough, deep, barking cough, which he tries to suppress; rattling, whistling respiration; starting up in sleep and anxious breathing; when lying bores head backward into pillow. θCroup.

After a chill, at night burning heat of skin, redness of face, headache, delirium; violent, hoarse, hollow, barking cough, with great pain in larynx; rough, hoarse voice; rattling, whistling respiration. θCroup.

High fever, frequent attacks of suffocation and cough; hoarse, rough voice; whistling respiration, audible at a distance; region of larynx painful; starting up in bed as if she would suffocate; boring backward of head; ill-humor, crying, indifference to everything. θCroup.

Sudden attack of croup about 9 P.M.; threw back her head; face first red, then blue, cold and moist; eyes red and suffused; cough dry and painful; limbs cold and moist; during paroxysms struggled and writhed into erect position.

Hoarseness, cough, and dryness of Schneiderian membrane for two days; sudden development of croup; child sits on mother's lap with head thrown back; fanlike motion of nostrils; laborious breathing, with a sawing sound; now and then sharp whistling cough; protrusion of eyes; eyelids wide open; great anxiety depicted on countenance.

Sits up in bed; cannot lie on account of want of breath; eyes protruding, staring; nose pinched and cold; face pale and bloated; mouth firmly closed or only slightly opened, with a groaning breath; loss of voice; deglutition prevented; head drawn backward; swollen larynx almost protruding above chin; lower part of abdomen feels empty; viscera drawn up against diaphragm; groaning respiration without any motion of chest; pulse imperceptible; hands and feet cold; whole body covered with a cold, clammy sweat.

A little girl, 2½ years old; aroused by cough, sits up suddenly in bed, looks around anxiously; gasps for breath as if it could not get any; in a short time a second attack, more violent than first, followed by repeated attacks, each more violent; infrequent dry cough; hoarseness; breathing somewhat accelerated and difficult; every quarter of an hour restlessness and anxiety increased; wanted to be carried about, threw its head back, or imploringly stretched out its hands for relief; face turned dark red when in height of attack; eyes protruded and neck commenced to swell rapidly; between attacks child showed signs of thirst,

Google

but is unable to swallow but a small quantity, and with difficulty; frequent urging to urinate, at times without discharge, at others with discharge of normally colored, acrid-smelling urine, which deposited a dirty white sediment.

‖A young lady, æt. 24; three days after convalescence from cholera, face bluish-red, somewhat bloated, anxious and distorted; increased bodily temperature, with diminished warmth of extremities; tonsils, soft palate and uvula somewhat swollen and highly reddened; breathing very rapid and short; on deeper inhalation a whistling noise in larynx, with sinking in of intercostal spaces; weak, vesicular breathing; at times sudden, dull concussions of cough, ending in a long-drawn whistling inspiration; dyspnœa; anxiety; blueness of face; lisping voice; weak pulse, 100; violent straining pain on swallowing; pain in throat when coughing and speaking; larynx sensitive to touch; constant anxiety; great heat and feeling of exhaustion; thin, white coating on gums.

‖‖Croup < before midnight (< before morning, *Hepar*).

‖Cough rough, dull, hollow and barking; either perfectly dry, or difficult loosening of phlegm; breathing slow and drawing, noisy, whistling, sawing (when phlegm commences to rattle, *Hepar*).

‖Fair complexion; < before midnight; dry sound of breathing and cough.

‖‖Cough is dry and sibilant, or sounds like a saw driven through a pine board, each cough corresponding to a thrust of the saw; no mucous rattle; cough dry and hoarse, causes pain in throat. θCroup.

‖Wakes with suffocation about larynx on falling asleep, early at night.

[26] **Respiration.** ‖Breathing: wheezing, anxious, < during inhalation, with violent laboring of abdominal muscles; piping, anxious; whistling, sawing between coughs, with whooping cough or croup; rattling; loud; snoring; noisy; weak, slow and drawn; accelerated and difficult; very rapid and short; very quick, gasping; laborious; gasping; panting; groaning, without motion of chest; slow, deep, as after exhaustion; as if through a sponge.

‖Dyspnœa: with palpitation; severe, on lying down; exhaustion in chest, < after every exertion; sudden weakness, tottering while walking, blood seems to rush into chest as if it would burst; with frothy, white sputa and much retching; an hour after slight coughing brings up grey lumpy mucus; > by bending body forward.

Digitized by Google

‖‖Asthma: from taking cold, cannot lie down; sibilant ronchi; after menses; breathing always tight, cannot inspire nor expire freely; in consequence of goitre; breathing, rattling and panting; after every slight motion loses her breath and becomes faint; blood rushes to her chest and head; hot in face, anxious; fears she will die of suffocation; spasmodic, with organic disease of heart; must throw head back; < at full moon.

‖Awakes with suffocative sensation; wakes up choking when falling asleep.

‖‖Came slowly into office, walked stooped, sat down carefully, leaned forward and kept very quiet and seemed to be much exhausted; labored inspiration involving abdominal muscles, quite marked; had not slept for two nights, obliged to sit upright in his chair; leaning backward, lying down, or exertion takes his breath away.

‖Dyspnœa and great weakness in chest, could hardly talk after exercise.

Suffocation on moment of falling asleep.

‖‖Wakes with suffocation about larynx; on falling asleep early at night; fair skin.

Suffocative paroxysm, with pain in chest.

‖‖On deep inhalation, whistling in larynx and sucking in of intercostal spaces.

On slow, deep inspiration, stitch in chest.

‖On breathing, sensation of air passing into glands of neck. θGoitre.

On expiration, pain in hypogastrium.

Cough. ‖‖Cough: dry, barking, hollow, croupy; wheezing, asthmatic; caused by burning or tickling in larynx, sensation like a plug or valve, or by feeling of accumulation of mucus and weight in chest; dry, with burning in chest; loose, suddenly changing to dryness and hoarseness (typhus); without expectoration, with chill; incessant, from a place low down in chest, where it pains, as if sore and bloody; slight, from swelling in fauces; short, infrequent; short, dry, irritating, with feeling of roughness in larynx, and pains in chest; dry, rough, barking, with dyspnœa; sudden concussion; spasmodic; violent; dry, hollow, wheezing, < in evening; dry or sibilant, or sounds like a saw driven through a pine board, each cough corresponding to a thrust of the saw; hollow, with some expectoration, day and night; hollow in croup or remaining after croup; in measles; with a high crowing sound; sharp, whistling; exceedingly painful, in croup; hurting larynx.

‖‖Cough caused by tickling in throat; expectoration easy,

Google

sometimes salty; < on rising from bed and when indoors; brought on by smoking, lying on back or r. side, drinking milk, ale, spirits, cold tea, or cold water; > by eating or by warm tea or warm coffee; disturbs sleep; < in wet weather; > in frosty weather.

‖Frequent night cough in paroxysms of two minutes, with a vexed expression.

‖Aneurism of descending aorta, a paroxysmal, dry, suffocative cough, coming at irregular intervals, but especially on lying down, or when drinking hot tea; dyspeptic distress and fulness in stomach after eating (relieved).

‖When coughing, sweat.

‖On coughing, pain in chest and trachea, with roughness of throat.

On coughing, painful pressure beneath short ribs.

‖Whooping cough, deep, hollow, barking, caused by sensation of a plug in larynx, with expectoration only in morning of small quantities of tough, yellow, hardened mucus, compelling one to swallow it again.

‖Cough caused by feeling of a plug in throat; brought on by movement and lying down, especially on r. side or back; > by sitting up or eating; dyspnœa < by talking or moving, or lying down, especially on r. side or back, and by bending back or stooping, or by lying with head low; > by bending forward slightly, by eating or by drinking warm cocoa; excited by a feeling of large accumulation of mucus and weight at chest; voice lost at times, subject to such attacks, in cold weather, for six years.

‖Chronic cough, violent attacks, brought up small, hard tubercle.

‖Expectoration: scanty, of saltish tasting mucus; scanty, tenacious, yellow, indurated, slightly sour-tasting; loosened mornings, but must be swallowed again; profuse, mucous, cannot lie down (pneumonia in stage of resolution); smelling like milk (whooping cough); of yellow mucus in little lumps; of cutaneous masses.

Inner Chest and Lungs. Pain in chest and bronchi, with rawness in throat when coughing.

After exertion suddenly exhausted, chest particularly affected, could hardly speak; heat in face and nausea; heaviness in head.

‖Oppression of chest.

Weight dragging down on r. chest; tightness of chest from a cold.

‖Constricting or contracting pain in chest; spasmodic constriction. θWhooping cough. θHeart disease.

Pressure in l. chest, sometimes stitches.
Pressing, cutting pain on deep inspiration, in l. side of chest.
Sudden pain, in chest and dorsal muscles of l. side, as if a broad body armed with points were pressing upward, a broad pressure with many fine stitches.
Drawing stitches beneath second rib of l. side of chest, only on walking.
Drawing stitches in l. side of chest, while sitting with back slightly bent, but particularly on slow, deep inspiration.
Severe intermittent stitches in l. side of chest.
Transient, painful stitches on r. side of chest; when the part is rubbed it seems as if a weight were dragging down in that place, under skin
Severe pricking pain in r. breast, from within outward.
Stinging, pinching, crawling pain in l. side of chest in region of sixth and seventh ribs, < from pressure.
A pinching jerk in l. side of chest, from without inward.
Boring stitch in r. costal muscles, continuous on inspiration and expiration.
Constrictive spasmodic pain through chest and larynx.
Stitches, resembling pleuritic stitches, in both sides.
Pain in chest on coughing.
A spot deep in chest causes coughing.
Heat in chest; sensation as if she had something hot inside of chest.
Heat from abdomen.
Burning in chest, with cough.
She grows weak after every trifling motion of body; blood rushes up into chest, face grows hot, body begins to glow, bloodvessels are hard and distended and she loses her breath; she recovers only after a long rest.
Burning, soreness, rawness, heaviness in chest.
Congestion to chest from least movement or exertion; dyspnœa, nausea, faintish weakness.
Orgasm of blood in chest after least exertion, with dyspnœa, anguish, nausea and faintish weakness.
After moderate motion out of doors, she suddenly grows weak and totters to a chair; amid great anxiety, nausea, pallor, short gasping breath, blood seems to rush from heart up into chest as if to burst out above; eyes close involuntarily, almost spasmodically, tears exude from between closed lids; she is conscious, but is unable to act upon her limbs by means of volition.
Bronchial catarrh: with dry cough and hoarseness, without fever; with measles.
Acute bronchitis, with profuse secretion of mucus; much oppression of breathing; all symptoms < by lying with

Google

head low; cough < by room getting too warm; > by eating, even eating a little.

‖Inflammation of air-passages, with dry, irritating cough and burning tickling in larynx.

‖Bronchitis: with continuous, dry, fatiguing cough; mucous râles subcrepitant, whistling and sonorous; following croup.

‖‖Chronic bronchitis, with a dry spasmodic cough.

A spot deep in chest as if raw and bloody from coughing.

‖Broncho and croupous pneumonia.

Pneumonia: in stage of resolution, with profuse secretion and expectoration of mucus; inability to lie down; cough > by eating and drinking.

‖Tuberculous consumption: beginning in apex of (l.) lung; severe dyspnœa on lying down; exhaustion after every exertion, especially of chest; hoarseness, with sudden aphonia while speaking; chilliness in back, not removed by artificial heat, yet if the room becomes too warm the cough is increased; cough < from evening until midnight, from cold air, from talking, singing or moving; > from eating or drinking.

[29] **Heart, Pulse and Circulation.** ‖Constricting pain in cardiac region with anxiety; anxious sweat. θAngina pectoris.

Heart beating a double stroke; pulsating sound in ear.

πSuffering with an organic affection of heart, she ate and swallowed a piece of sponge, just roasted; sudden and terrible beating of heart and suffocation; lips livid; respiration violently gasping, great pain in heart; terror and fear of approaching death.

‖‖Attacks of oppression and cardiac pain; < lying with head low.

‖Rheumatic endocarditis, loud blowing with each heart-beat.

‖Stinging pressing pains in præcordial region.

‖‖Violent palpitation, awakens after 12 P.M.; sensation of suffocation; bellows' murmur; loud cough, which is hard, tight, dry; great alarm, agitation, anxiety, dyspnœa.

‖‖Palpitation: violent, with pain, gasping respiration; suddenly awakened after midnight, with suffocation, great alarm, anxiety; valvular insufficiency; before catamenia; with congestion to chest.

‖‖Rheumatism left lumbar muscles and seized heart (second similar metastasis); awakened between 1 and 2 A.M. by a sense of suffocation, accompanied by loud, violent cough, great alarm, agitation, anxiety and difficult respiration; action of heart violent and rapid, and

each beat accompanied by a loud blowing as of a bellows.

‖Irregular action of heart, suffocating palpitation on making even slight exertion, or on going up stairs or ascending ground; if she raises arms above head she becomes faint; lay in bed with her head high; awoke often in a fright and felt as if she were suffocating; physical signs of valvular deposit unmistakable.

‖In fibrinous deposit upon valves of heart, it causes a gradual disappearance of valvular murmur.

‖Rheumatic endocarditis, valvular insufficiency (usually mitral), systolic murmur.

‖Valvular insufficiency; awaking at night with fear and terror.

‖‖Angina pectoris; contracting pain in chest, heat, suffocation, faintness, and anxious sweat.

‖Aneurism of descending aorta; paroxysmal, dry, suffocative cough, coming at irregular intervals, but especially on lying down or drinking hot tea; dyspeptic distress and fulness in stomach after eating (relieved).

Pulse: frequent, hard, full or feeble; rapid, full; very rapid, full and hard; hard, small, full; imperceptible.

‖Symptoms of circulation are <: from mental lassitude; from coughing; when lying on r. side; before menstruation; after lying down; sitting bent forward; from smoking; from going up stairs.

‖Congestion to head, ears, nose (nose bleeding), face, chest, abdomen, lower limbs.

‖Ebullition of blood, distension of veins.

[30] **Outer Chest.** Fine stitches externally on chest and arms.

Stinging itching on l. breast near shoulder.

Induration of l. breast, a space of two inches in length by half inch thickness, painful to touch, coming on in evening and disappearing in morning.

Itching on breast.

‖Intercostal spaces sinking in with inhalation.

[31] **Neck and Back.** ‖Pricking sensation above throat pit.

‖Numbness in front of throat.

Carotids pulsating perceptibly.

‖Throat pressed forward; croup.

‖External swelling of throat.

Glandular swellings under r. lower jaw hinder motion of neck and are painful to touch.

Pain as if cervical glands were swelling by side of trachea and larynx.

‖Swelling of glands of neck, with tensive pain on moving neck, or when pressing on them.

‖Scrofulous swelling and induration of cervical glands.

Google

Painful sensation of stiffness in l. side of neck on turning head to r. side.
Stiffness of neck on stooping and turning head.
Painful stiffness of muscles of neck and throat.
After opening mouth wide, and then biting teeth firmly together, a painful cramp in cervical muscles; violent drawing in lower jaw, with pain in articulation of jaw as if it would be dislocated.
Crampy pain in cervical muscles.
Frequently returning, pressing, cracking pain on l. posterior side of neck, near shoulder blade, not changed by any motion.
The back of neck snaps on stooping.
Intermittent, slow pressure on r. side of neck, as if skin were compressed between fingers; downward in region of carotid artery, also painful externally to touch.
Tension of cervical muscles, particularly of r. side, on bending head backward.
Painful tension in l. side of neck, near thyroid cartilage, on turning head to r. side.
Transient creeping sensation on neck.
Great, slow stitches in r. cervical muscles, just after waking from sleep, passing off while swallowing, but returning again soon afterward.
A transient stitch in l. side of neck.
Drawing pricking through l. side of neck.
Twitching of r. cervical muscles while lying.
Neck cold in evening; distended veins.
Sensation in thyroid and cervical glands on breathing as if air were passing up and down those glands.
Thyroid gland very much swollen, painful on touching neck and on pressure.
Region of thyroid gland seems as if hardened.
Pressing sensation in goitre, several times daily.
πJerking pain in side where small goitre exists; throbbing in head, descends into cheeks, and extends thence into neck in shape of tearing pain.
πStinging pain in goitre on swallowing; slight pain when parts are at rest.
πStitches in goitre, when not swallowing.
πSensation in goitre as if everything were shaking and moving about in same, as if it were alive, particularly on swallowing.
Sensation in goitre like motion, a working about, distension and bracing.
Goitre occurring with the inhabitants of valleys.
Goitre; three years' growth, very large, unsightly, lumpy, irregular, hard, slightly tender, always on having a cold.

Google

‖Goitre; six years' growth, constantly increasing, becoming somewhat fuller, with some slight pain and tenderness on handling every time she has a cold.
‖Goitre; of many years' standing, extremely unsightly and repulsive; larger than both her breasts; hard, knotty, somewhat tender.
‖Goitre: from earliest youth (æt. 19) has attained a considerable size.
‖Thyroid gland of both sides swollen, even with chin; at night suffocating spells and stinging in throat, with soreness in abdomen.
‖For four years, large goitre, rather soft, located especially in r. lobe of thyroid body; menses profuse; nervous palpitation.
‖Pressing pain in small of back.
Feeling of coldness in back, in region of last ribs.
Chill on back, in small of back.
Itching on back.
Pressing sensation passing up and down through spine, while sitting erect.
Pressure in lumbar region.
Dull stitch in r. lumbar muscles.
Dull pain in region of symphysis of r. ilium and sacrum, while standing.
A pressing pain in sacral region only while walking, and particularly on setting down l. foot.
Pressing pains in small of back with whooping cough.
A fine tearing pain in sacrum, while sitting only, passing from r. to l. side and upward.
Severe stitch in small of back.
‖Pain in small of back instead of catamenia.
‖Sacrum sore before menses.
Small of back and nates are very numb.

Upper Limbs. Very painful flying stitch on r. shoulder-blade.
‖Muscular twitching about l. shoulder joint.
Burning on l. shoulder.
Pain in scapulæ as if a pointed instrument were thrust in, a continuous stabbing pain, combined with soreness.
Fine stitches in armpit, while sitting.
Continuous prickling itching in l. armpit, while sitting.
In l. armpit drawing pressure, by jerks, alternating with similar sensation in l. popliteal space.
Arms most tired.
Stretching of arms.
‖Pains in upper limbs with chills.
Stinging drawing through upper arm.
Bruised pain in arms, almost like soreness.

Google

Burning in arms and hands.
‖Heat in upper limbs, shoulders and hands.
Beneath upper arms, itching.
Stitches in elbow joint on motion.
Stitches in point of elbow and then tearing in joint as long as he holds his arm bent.
Pressing pain in joint of l. elbow.
‖Boring pain at elbow.
A cramplike pain, with slow throbbing, beneath elbow joint, at upper end of forearm, particularly on supporting arm.
Heaviness in forearms.
Trembling of forearms and hands.
Pain in l. forearm as if bones were being pressed together.
Pain from thumb into forearm.
Drawing pain in forearms.
Severe stitches, boring from within outward, in internal muscles of r. forearm.
‖Drawing stitches in forearms and hands.
A feeling in and between wrists as if parts were weakened by decay.
Heaviness and trembling of forearms and hands.
Large vesicles on forearms.
Swelling of hands and stiffness of fingers.
Several stitches in r. wrist, during rest.
Severe drawing in l. wrist.
Drawing, pressing pain above r. wrist.
‖Stretches hands out for relief.
Hands trembling.
‖Stitches in hands.
‖Hands: cold; cold and bluish, with chill; burning; hot, with chill; swollen, could not bend fingers.
‖Cramplike pain in balls of thumbs.
‖Redness and swelling of finger joints, with tension on bending them.
Painful drawing in posterior joint of l. thumb, extending into forearm.
A protracted stitch, combined with sore pain in anterior joint of thumb.
Itching in ball of l. thumb not dispelled by rubbing.
The tips of index fingers lose their feeling, without growing pale.
Pressing pain in metacarpal joint of middle finger of r. hand.
Middle joint of l. middle finger became thick and red and seemed tense on motion.
‖Numbness of tips of fingers, with whooping cough.

Lower Limbs. Nates numb.

Google

Rapid twitching of a portion of r. gluteal muscles.
Stitch near hip.
Thigh spasmodically drawn forward or backward.
Thighs numb, cold, with fever.
Thighs numb and chilly, while the rest of body is hot.
Numbness or coldness of thighs, with fever.
Tension as if a muscle were too short, in upper end of thigh, on stepping, accompanied each time by a stitch.
Protracted, drawing stitches at upper part of l. thigh, below groin, particularly when walking.
Itching, tickling on l. thigh, near groin, with desire to rub the part.
Severe stitches, boring outward in r. thigh, in front, near hip.
Fine, very sensitive stitch in skin of inner r. thigh.
In morning, while in bed, pulsating, sharp stitches through r. thigh, above knee.
Pain in inner side of thigh, above r. knee, pressing toward posterior part.
Pressing, stinging pain above r. knee, while sitting.
Pain from foot to thigh.
Heaviness in knee joints, felt on walking.
Feeling of lameness from r. knee to r. hip.
While walking, tiredness in knee as if they would give way, although he sets his foot down firmly.
Severe drawing in l. knee, followed by profuse sweat, for several nights.
Dull stinging in l. knee, in evening, while lying down.
Tearing in tibia all afternoon.
During rapid walking, a feeling at lower end of l. tibia as if a weight were hanging on it.
Pain in ankles extending up tibia.
Tearing from ankle to knee.
Drawing pressure, coming by jerks, in l. popliteal space, arising only on bending knee and alternating with a similar sensation in l. armpit.
Pressing pain in external tendon of flexor muscle, in popliteal space (r. leg), more violent on walking than while sitting.
Sharp stitches in r. calf, while walking.
Continuous prickling itching in popliteal spaces while walking, with desire to scratch parts.
Numbness, first of r. then of l. lower leg, after brief afternoon naps; when he tried to walk, l. lower leg was spasmodically drawn up to thigh; even when sitting he could not keep it stretched out, it was then drawn spasmodically backward.
Stiffness of legs.

Google

Drawing, tearing from r. ankle joint to knee.
Tearing in ankles; feet heavy as lead, heaviness extending up tibia.
Pressing pain in r. heel, < while walking.
While standing, a severe stitch out at r. heel.
Stitches passing upward in r. heel while sitting.
Severe intermitting stitches in l. heel, from within outward, while standing, passing off on motion.
After a long walk, pricking as if from pins in heels.
Feet heavy as lead.
Her feet are affected; she starts at every trifle.
Feet feel heavy.
‖Heat in feet: veins distended; with the chill; particularly in heels.
Creeping in lower portion of l. foot.
Itching on feet.
Tiredness in lower limbs.
Great commotion and restlessness in both lower legs; is obliged to change his posture frequently.
‖Drawing pain from lower portion of r. foot to thigh; drawing during menses; pains in lower extremities with chill and fever.
Cold feeling in legs; legs are cold.
‖Chill on lower limbs, especially on thighs.

[34] **Limbs in General.** ‖Stiffness in limbs.
‖Trembling in all the limbs.
Sense of weariness in upper portion of body as if bruised and of numbness in lower portion.
Stretching of limbs.
‖Hands and feet cold.
Protracted, exhausted and tired lameness of all limbs.

[35] **Rest. Position. Motion.** Slight pain in goitre; stitches in wrist.
Lying: strong pulsation about ear on which she is lying; dull, tremulous roaring in head; double vision >; bores head backward; dyspnœa <; suffocative cough <; after, symptoms of circulation <; twitching of cervical muscles; stinging in knee.
Lying in a horizontal position: headache >; congestion of blood to head >.
Lying on back: pressing headache >; throat symptoms >; brings on cough; dyspnœa <.
Must lie on back: ulcerative feeling in pit of stomach.
Lying on r. side: painful constriction of l. side; brings on cough; symptoms of circulation <.
In side on which he lies: digging in hip.
Cannot lie: on account of want of breath; asthma; pneumonia.

Google

Lying with head low: dyspnœa <; all symptoms of bronchitis <; attacks of oppression and cardiac pain <.
Sitting: as if head would fall to one side; pain in frontal eminence <; up in bed, sudden burning and compression passes off; tensive pain in abdomen; painful constriction in l. side; cramplike pain in l. groin; pressing tearing pain in region of abdominal ring; cough >; stitches in l. chest; fine tearing pain in sacrum.
Stitches in armpit; prickling in armpit; stinging above r. knee; could not keep leg stretched out; stitches in heels.
Sits up in bed: croup; suffocative paroxysm passes off.
Must sit up: on account of shortness of breath.
Stooping: stinging in l. hypogastrium <; tensive pain in abdomen <; dyspnœa <; stiffness of neck; back of neck snaps.
Bending body forward: dyspnœa >; symptoms of circulation <.
Bending back: dyspnœa <.
Holding head upright: dull pressure in occiput >.
Bending head backward; congestion of blood to head; tension in neck; in croup; tension of cervical muscles.
Bending fingers: tension.
Could not bend fingers: swollen.
When holding arm bent: tearing in joint.
Raising arms above head: becomes faint.
Erect position: writhed and struggled into with croup; pressing sensation up and down spine.
Standing: pain in ilium and sacrum; stitch out at heel.
Rising: headache; cough <.
Must change posture frequently: restlessness in legs.
Motion: of scalp, sensitiveness of cranial integuments; of eyes, < stinging pain; every slight, loses her breath and becomes faint; brings on cough; every trifling, grows weak; congestion to chest; after moderate, grows suddenly weak; cough <; of neck, pain in swollen glands; stitches in elbow joint; finger seemed tense; stitches in heel pass off.
After every exertion: dyspnœa <.
Exertion: suddenly exhausted; congestion to chest; exhaustion of chest; slight, suffocating palpitation.
Opening mouth wide, then biting teeth firmly together: cramp in neck.
Masticating: teeth feel dull and loose; gums painful; pain in molars.
Swallowing: stitches in neck pass off; violent straining pain; pain in goitre; a moving sensation in goitre; stinging pain in goitre; as if goitre were alive.

Digitized by Google

Turning head: stitch in occiput; neck pains; neck stiff; tensive pain in head; larynx sensitive; to r. side, stiffness of left.
Stepping: tension in thigh.
Walking: tensive pain in abdomen and r. groin; tottering; stitches beneath second rib; pain in sacral region, particularly setting down l. foot; stitches in thigh <; heaviness in knee joint; tiredness in knees; as if weight were hanging to tibia; stitches in calf; itching in popliteal space; l. lower leg spasmodically drawn up; pain in heel <; long time, pricking in heels.
Going up stairs: suffocating palpitation; symptoms of circulation <.
Ascending ground: suffocating palpitation.
After exercise: heat.

[36] **Nerves.** Excitement of nerves.
Stiff, without ability to move.
Strange feeling all over.
Tendency to start.
Twitching of muscles, with fever.
Unable to act upon her limbs by means of volition.
Clumsiness of body.
Weak: after every trifling motion; suddenly, after motion out-doors; exhausted after exercise.
Tiredness of whole body, especially arms.
Great tiredness and inclination to sleep.
Lassitude of body and mind; prefers to be inactive and rest.
As if she were going to faint, with heat in face, and anxiety.
Faint when losing her breath.
Feeling of numbness of lower half of body.

[37] **Sleep.** Sleepiness with yawning.
Stupid slumber, with fever.
When falling asleep, awakes choking.
Falling asleep early at night; suffocation awakens.
Lies asleep with head low.
Restless slumber after chills, with heat.
Sleeplessness until midnight.
Sleepless, with violent ebullitions.
Dreams: about murder and assassination; fatiguing; vexatious, with anxiety and disposition to weep; mournful.
As soon as he fell asleep, his mind wandered and he was delirious.
Spoke aloud in her sleep, but not anxiously.
Very short sleep, with many dreams, four consecutive nights; wakes at midnight, but cannot sleep again on

Digitized by Google

account of restlessness; whenever he closes his lids, the most vivid pictures would immediately arise before his vision, while waking; it seemed to him as if a battery of guns were discharged, or as if everything were in flames; again scientific subjects forced themselves upon his mind, in short, a mass of subjects crossed each other in his imagination, disappearing at once when opening his eyelids, but reappearing as soon as the lids were closed.

‖‖Awakens in a fright and feels as if suffocating.

‖Awakening with fear and terror.

‖Frequent waking with a start.

‖Starting out of sleep toward morning from a shock in trachea upward like a suffocative paroxysm, passing off after sitting up in bed.

‖‖Awakened between 1 and 2 A.M. by sense of suffocation.

Tossing about at night.

After siesta legs numb.

‖‖Worse after sleep.

[33] **Time.** Toward morning: starting out of sleep.

Between 1 and 2 A.M.: awakened by suffocation.

Morning: involuntary discharge from bowels; stinging in throat <; rumbling in abdomen <; digging in hip; expectoration only of small quantities of tough, yellow, hardened mucus; pulsating, sharp stitches through thigh; early, sweat.

Forenoon: pressing pain in gastric region.

Day and night: dry cough; hollow cough, with some expectoration.

Afternoon: pressure in epigastrium; cough <; tearing in tibia; after brief naps numbness of legs; chill <.

Evening: stinging and pressing pain in eyes; cramplike pain from jaw to cheek; cold sweat in face; stinging in throat <; rumbling in abdomen <; cutting in hypogastrium; cracked voice; pressing inward in larynx; contraction in larynx; croupy cough <; till midnight cough <; induration of breast comes on; neck cold; stinging in knee; chill <.

9 P.M.: sudden attack of croup.

Night: vertigo when awaking, with nausea; things appear in flames; figures of light; restless and easily frightened; as if a battery of guns were discharged in ears; a vexed expression, with cough; stitch from jaw to ear; suffocating spells; rattling breathing, terminating cough; in middle, spells of choking; after a chill burning heat of skin; suffocation about larynx; awakes in fear and terror; tossing about; chill <; heat; sweat.

Before midnight: croup <; dry sound of breathing and cough; sleepless until.

Digitized by Google

At midnight: wakes and cannot get to sleep again.
After 12 P.M.: awakes, violent palpitation; awakes with suffocation.

[39] **Temperature and Weather.** Heat does not > chilliness of back.
Hot room: dry bronchitis <.
Hot tea: cough <.
Near warm stove: chill with shaking.
Warm room: coming into from open air, headache; cough <.
Warm drinks: distress in stomach >; cough >; dyspnœa.
In bed: chill <.
Indoors: cough <.
Open air: pain in l. ear; pain from jaw to cheek; tension in articulation of jaw; grows suddenly weak; after walking, chill.
Sudden change of atmosphere: spasmodic paroxysms of cough and dyspnœa <.
After taking cold: asthma.
Dry, cold weather: headache >.
Dry, cold winds: coryza.
Washing: headache >.
Wet weather: cough <.
Cold: tea or water brings on cough; weather, subject to attacks of dyspnœa; air, cough <.
Frosty weather: cough >.

[40] **Fever.** Coldness: all over; of eyes; of neck; in epigastrium; of hands of thigh; pallor and sweat of face with heat of whole body.
Cold feeling: in head; in stomach; on back; on lower limbs; on small of back; on thighs.
When feeling cold an itching arises.
Shuddering across back.
Chill: with shaking, even near a warm stove; mostly across back; after walking in open air; < in bed; in afternoon; in evening; at night; with coryza; with internal heat; with heat at same time; alternating with heat.
Chill, then heat, then sweat.
Strong heat soon after chill, with dry, burning heat over whole body, with exception of thighs, which remain cold, numb and chilly.
Heat: with external chill; rises from abdomen, rest of body chilly; with thirst, at night; anxious, dry, with red face and weeping, and inconsolable mood, or with whooping cough; after exercise; in bed; with sweats.
He suddenly grows anxious and warm over whole body, with heat and redness in face, with sweat.

Google

Daily several attacks of heat with anxiety, pain in region of heart, weeping and inconsolability; she would rather die on the spot.
Dry, hot skin and congestion to head.
Attacks of spreading, flying heat.
Synochal fever, in croup.
Flushes of heat returning when thinking of them.
Heat, sweat and itching of skin.
Sweat: anxious; cold, clammy; copious, during night; over whole body early in morning; with whooping cough; cool on face, evenings; of itching parts; profuse, follows drawing pain in knee; breaking out too easily.
Stupid sleep with the sweat.
Worse with the sweat; > after it.
Want of perspiration.
Typhus; loose cough suddenly changing to dryness and hoarseness, increasing to dyspnœa, with anxiousness.

Attacks, Periodicity. Alternately: face red and pale; pressure in armpit and popliteal space; chill and heat.
Attacks: repeated, of want of breath.
Frequent paroxysms of two minutes: cough.
For several hours: itching at glans penis.
Daily: several times, pressing sensation in goitre; several attacks of heat, with anxiety.
Nightly: agglutination of lids; wakes up several times with want of breath.
For two days: dryness of Schneiderian membrane.
For several nights: drawing in knee and sweat.
Four consecutive nights: very short sleep with many dreams.
For nine days: red swelling of r. helix.
For several days: sore pains in anus; flowing like menses.
Full moon: asthma <.
Since two years: swelling of l. testicle.
Three years' growth: goitre.
Four years' growth: goitre.
For six years: subject to attacks of dyspnœa.
Six years' growth: goitre.
Many years' standing: goitre.

Locality and Direction. Right: dull pain on side of brain; pressing sensation in temple; downward drawing pain in side of head and neck; pressing outward on parietal bone; pressing in frontal eminence; pressing pain over eye; ringing in ear; drawing pain in ear; fine stitches in ear; burning in orifice of ear; red swelling of helix; tearing in zygomatic arch; jerking fine stitch from upper jaw into internal ear; violent burning under angle of mouth; pain in molars of lower jaw;

Google

stitches in side of abdomen; glandular swelling in groin; epididymis enlarged and hardened; weight dragging down in chest; painful stitches in chest; severe pricking in breast; crawling pain in side of chest; boring stitch in costal muscles; glandular swelling under lower jaw; slow pressure on side of neck; tension of cervical muscles; slow stitches in cervical muscles; twitching of cervical muscles; goitre in lobe of thyroid body; dull stitch in lumbar muscle; dull pain in region of symphysis of ilium and sacrum; flying stitch in shoulder blade; stitches in muscles of forearm; stitches in wrist; drawing pressing pain above; pressing pain in middle finger; rapid twitching of portion of gluteal muscles; stitches in thigh; stitch in inner thigh; pain in thigh above knee; pressing stinging above knee; lameness from knee to hip; stitches in calf; tearing from ankle joint to knee; pressing pain in heel; stitch at heel.

Left: stitches in temple to forehead; pressing in outer half of eye; tension about eye; stinging in eye; stinging itching under eye; burning in eye; sudden stinging drawing at external canthus of orbit; tensive stinging pain in external canthus; burning pain on external surface of lower lid; cramplike pain in ear; digging stitches in depth of ear; boils on ear; creeping stitches in nasal bone; cramplike pain from articulation of jaw to cheek; tearing stinging in cheek; tension in articulation of jaw; stinging itching in cheek; side of chin to angle of mouth painful to touch; burning pain in upper molars; pain in side of abdomen; cutting toward breast; boring stinging in hypogastrium; painful constriction in side; fine digging above hip; twisting sensation in side of abdomen; cramplike pain in groin; small boil in groin; swelling of testicle; pressure in chest; cutting in side of chest; broad pressure, with many fine points in side of chest; drawing stitches beneath second rib; pinching jerk in side of chest; consumption beginning at apex of lung; rheumatism in lumbar muscles; stinging itching on breast; induration of breast; stiffness in side of neck; cracking pain on posterior side of neck; tension in side of neck; transient stitch in side of neck; pricking through side of neck; setting down foot pain in sacral region; muscular twitching about shoulder joint; burning on shoulder; prickling itching in armpit; drawing pressure in armpit; drawing pressure in popliteal space; pressing pain in joint of elbow; pain in forearm; drawing in wrist; painful drawing in posterior joint of thumb; itching in ball of thumb; middle joint of middle finger; stitches in thigh; itching tick-

Google

ling in thigh; severe drawing in knee; dull stinging in knee, as if weight were hanging to tibia; leg drawn up when walking; stitches in heel; creeping in lower portion of foot.

From r. to l.: swelling in fauces; orchitis; pain in sacrum; numbness of legs.

From within outward: pressing in temple; pressing in frontal eminence; pricking in breast; stitches in r. forearm; stitches in thigh; stitches in heel.

From without inward: jerk in chest.

[41] **Sensations.** As if head would fall to one side; as if one would fall backward; as if tipsy; as if all her blood were mounting to head; as if skull would burst; as if hair were standing on end; eye as if twisted around; as if a battery of guns were discharged in ears; stitches as if passing through tympanum; nodule in concha as if it would gather and break; jaw as if dislocated; as if eruption were to appear near chin; l. side of chin as if ulcerated; as if something had got jammed between teeth in chewing; as if gums and teeth were swollen, and latter being lifted; outside of throat as if something were being pressed out; as if he had drunk a great deal of lukewarm water, relaxation of stomach and œsophagus; pit of stomach as if growing together; stomach as if standing open; as if something alive were moving in abdomen; as if something alive were beneath skin of abdomen; as if diarrhœa would ensue; as of a plug in larynx; as of a stopper or valve were in larynx; as of a nail pressing in larynx; as if larynx and trachea were narrower; as if she would suffocate; as if child could not get breath; as if breathing through a sponge; as if chest would burst; chest as if sore and bloody; as of a plug in throat; as of a large accumulation of mucus and weight at chest; as if a broad body armed with points were pressing upward; as if a weight were dragging down in chest; as if she had something hot inside of chest; as if blood would burst out of chest; as if cervical glands were swelling; as if jaw would be dislocated; as if skin of neck were compressed between fingers; as if air were passing up and down thyroid and cervical glands; thyroid gland as if hardened; as if everything were shaking and moving about in goitre; as if goitre were alive; as if a pointed instrument were thrust into scapulæ; as if bones of forearm were being pressed together; as if parts in and between wrists were weakened by decay; as if a muscle were too short in upper end of thigh; as if knees would give way; as if a weight were hanging on lower end of tibia; as of pins in heels; as if she were

Google

going to faint; as if everything were in flames; as if sweat would break out.

Pain: in vertex and forehead; in occiput; in neck; in cartilages of ears; in articulation of jaw; in posterior molars; in gums while chewing; in throat; in goitre; beneath short ribs; in l. side of abdomen; in abdominal ring; from hypogastrium to anus; in testicles; in larynx; in trachea; in chest; in bronchi; in small of back; in scapulæ; in upper limbs; from thumb into forearm; in inner side of thigh; from foot to thigh; in ankles up tibiæ; in lower extremities; in region of heart.

Violent pains: in small of back and abdomen.

Great pains: in larynx; in heart.

Sudden pain: in chest and dorsal muscles; of l. side.

Stabbing pain: in scapulæ.

Cutting: in upper part of abdomen; from hypogastrium to breast; in l. side of chest.

Tearing: in l. eye; in nose; in cheeks; from cheek to neck; in r. zygomatic arch; in elbow joint; in tibia; from ankle to knee; in ankles.

Fine tearing pain: in sacrum.

Pressing tearing pain: in region of abdominal ring.

Drawing tearing: from r. ankle joint to knee.

Bursting pain: in head; in trachea.

Pinching pain: in l. side of chest.

Pinching, bruised, squeezing pain: in testicles.

Boring pain: at elbow.

Boring stitch: in r. costal muscles.

Stitches: in temples; externally in l. temple; in forehead; in occiput; in scalp; in eyeballs; in nodule in concha; in goitre; above pit of throat; in throat; in region of stomach; in r. side of abdomen; below groin; in anus; into spermatic cord; in chest; in both sides; in goitre; in elbow joint; in point of elbow; in hands; near hip; in heel.

Severe stitch: in small of back; in internal muscles of r. forearm; in r. wrist; in r. thigh; out at heel.

Sharp stitches: in r. calf.

Flying stitch: on r. shoulder blade.

Transient, painful stitches: on r. side of chest; in l. side of neck.

Severe intermittent stitches: in l. side of chest; in heel.

Pulsating sharp stitches: through thigh.

Great slow stitches: in cervical muscles.

Protracted stitch: in joint of thumb.

Drawing painful stitches: from body through glans penis; beneath second rib of l. side of chest; in forearms and hands; at upper part of thigh.

Google

Digging stitches: in depth of l. ear.
Jerking fine stitch: from posterior portion of r. upper jaw into r. internal ear; external, in region of larynx.
Fine stitches: in r. ear; beneath lower lip; externally on navel; externally on chest and arms; in armpits; in skin of inner thigh.
Large, somewhat blunt stitch: from testicle into spermatic cord.
Dull stitch: in r. lumbar muscles.
Creeping stitches: in nasal bone.
Itching stitch: as if caused by a very fine needle.
Shooting: up entire cord; from testicle into inguinal region.
Jerking pain; in side where goitre exists.
Pinching jerk: in l. side of chest.
Violent straining pain: on swallowing.
Pressing pain: in vertex; in r. frontal eminence; over r. eye; in gastric region; in l. side of chest; in præcordial region; in small of back; in joint of elbow; in metacarpal joint of middle finger; in tendon of flexor muscles; in heel.
Pressing cracking pain: on l. posterior side of neck.
Contracting pain: in ear; in chest.
Gnawing pain: on crown of head.
Heavy, dragging pains: in spermatic cord.
Drawing pain: in internal ear; in forearms; in joint of l. thumb; from lower portion of r. foot to thigh.
Colicky pains: in abdomen.
Painful cramp: in cervical muscles.
Cramp: lower jaw drawn; in neck; in abdomen.
Cramplike pain: in l. ear; from l. articulation of jaw to cheek; in l. groin; in cervical muscles; below elbow joint; in balls of thumbs.
Boring stinging: in l. hypogastrium.
Tensive stinging pain: in external canthus.
Stinging drawing: at external canthus of l. orbit; through upper arms.
Pressing stinging pain: above knee.
Stinging itching: under l. eye; on l. breast near shoulder.
Stinging: in eyes; about eye; in cheeks; in teeth; in mouth; in throat; in l. side of chest; in præcordial region; in goitre.
Biting: in anus.
Burning pain: on external surface of lower lid; in l. upper molars.
Violent burning: under r. angle of mouth.
Burning heat: in forehead; over whole body.
Burning: in occiput; in l. eye; in ears; in ears from

Google

throat; behind ears; in orifice of r. ear; in mouth; in throat; in larynx and trachea; in chest; on l. shoulder; in arms and hands.
Itching burning: in scrotum and body of penis.
Heat: in head; in forehead; in scalp; in eyes; in ears; on chin; in teeth; in œsophagus; in male genitals; in chest; from abdomen in upper limbs, shoulders and hands; in feet.
Flying heat: in face; in blood.
Sore pain: in anus; in joint of thumb.
Bruised pain: in arms.
Itching biting: on breast, epigastrium, back and beneath arms; on feet.
Smarting: in anus.
Soreness: of tongue; of throat; in abdomen; of anus; in sacrum; in chest; of sacrum; of scapulæ.
Pricking pains: across upper jaw; in r. breast; above throat pit; in heels.
Crawling pain: in l. side of chest.
Tensive pain: in neck; from hypogastrium to anus; in upper abdomen; in r. groin; in l. side of neck.
Dull pain: in r. side of brain; in region of symphysis of r. ilium and sacrum.
Painful constriction: in l. side beneath skin; in chest; spasmodic, through chest and larynx; in cardiac region.
Severe drawing: in knee.
Drawing: in pit of stomach; in all the limbs; toward larynx; in l. wrist.
Drawing pressure: in armpit and popliteal space; above r. wrist.
Severe pressing: in larynx.
Pressure: in forehead; sharp, at both temples; in ears; in throat; above thyroid cartilage; in epigastrium; in hypochondria; in larynx; in l. chest; on r. side of neck; in lumbar region.
Pressing: in eyes; in outer half of l. eye; under eyelids.
Pressing sensation: in r. temple; in r. side of head and neck; on r. parietal bone; in r. zygomatic arch; in goitre; up and down spine.
Violent drawing: in upper and lower limbs; in lower jaw.
Tension: in neck; about l. eye, near temple; in articulation of l. jaw; of maxillary glands; in throat; of cervical muscles; in finger joints.
Tensive constrictive sensation: above root of nose.
Constriction: in larynx.
Heaviness: in head; in occiput; of lids; in chest; in forearms; in knee joints; of feet.

Digitized by Google

Crowding sensation: in ears.
Weight: dragging down on r. chest.
Oppression: of chest.
Fulness: in head; in epigastrium; in stomach.
Tightness: of chest.
Pulsation: about ear; in forehead.
Knocking: in forehead.
Twitching: of r. cervical muscles.
Throbbing: in forehead; into cheeks; in spermatic cord; in head, thence into cheeks and neck.
Twisting sensation: in l. side of abdomen.
Itching tickling: on l. thigh.
Prickling itching: in l. armpit; in popliteal space.
Drawing pricking: through l. side of neck.
Penetrating tickling: in throat, toward ear.
Tickling: in throat; in layrnx; in trachea.
Ulcerative feeling: in pit of stomach.
Irritation: in upper part of larynx.
Sensitiveness: of cranial integuments.
Rawness: of throat; in chest.
Roughness: of throat; in larynx and trachea.
Scratching: in throat.
Scraping: in throat; in larynx and trachea.
Dryness: of lids; of nose; of tongue; of throat; of larynx; in trachea; of Schneiderian membrane.
Moving sensation: in goitre.
Restlessness: in both lower legs.
Lameness: from knee to hip.
Stiffness: in neck; of muscles of neck and throat; of fingers; of legs; in limbs.
Strange feeling: all over.
Dyspeptic distress: in stomach.
Craving: in stomach.
Empty feeling: in lower abdomen.
Weariness: of upper portion of body.
Tiredness: in lower limbs; of whole body, especially arms.
Faintness: at stomach.
Weakness: in chest.
Relaxation: in œsophagus and stomach.
Numbness: on chin; in front of throat; of small of back and nates; of tips of fingers; of thighs; of lower legs; of lower portion of body.
Dulness: over root of nose.
Gloominess: over root of nose.
Creeping: in nodule in concha; on neck; in lower portion of foot; in skin.
Formication: in rectum.
Voluptuous itching: at point of glans penis.

Google

Itching: violent, on scalp; of eyelids; in cheeks; in teeth; near groin; in anus; on breast; on back; beneath upper arms; in ball of thumb; on feet; of skin.
Cold feeling: in head; in stomach; on back; on lower limbs; on small of back; on thighs.
Coldness: of eyes; of nose; in epigastrium; of neck; in back; of hands; of thighs; in epigastrium.

"**Tissues.** Ebullitions; distended veins.
Swelling and induration of glands; goitre.
Dropsy in cavities of body.
Scrofulosis; skin and muscles lax; light hair.
Rheumatic affections of valves of heart; fibrous deposits upon valves.
Inflammation of larynx, trachea or bronchia.
Croup; bronchitis; tuberculous phthisis.
Tubercular diathesis.

"**Touch. Passive Motion. Injuries.** Touch: forehead painful; nodule in l. concha painful; boils on ear painful; lower jaw painful; chin at angle of mouth painful; pain in testicle; larynx sensitive; pain in larynx; induration painful; swelling under lower jaw painful; r. side of neck painful; thyroid gland painful; goitre tender; skin sensitive.
Pressure: pimples beneath chin on neck painful; of hand < twisting sensation in abdomen; crawling pain in chest <; on glands causes pain; thyroid gland painful.
Cannot endure tight clothing about body, particularly epigastric region; and abdomen.
Rubbing: > itching under eye; seems as if weight were dragging down in r. side of chest; does not > itching in thumb; makes red spots; does not > itching stitch.
Scratching: does not diminish biting itching.

"**Skin.** Sensitive to touch.
Red, itching blotches on skin.
Herpes.
Particularly when she feels cold, there arises an itching biting on breast, epigastrium, back and beneath upper arms, at other times it is only on feet; rubbing makes spot red, which seems to bite more severely for a short time, vesicles arise on these spots, which, however, soon vanish again.
Ringworm.
Here and there, about whole body, a protracted itching stitch, as if caused by a very fine needle, making it necessary to rub the part without being relieved thereby.
Burning itching, with desire to scratch.
Itching on skin: pricking with fever; as if sweat would break out; with heat and sweat.

Google

First a creeping sensation in skin; then spot becomes red and hot, followed by biting itching, like a flea moving along (without stinging), upon which rashlike pimples appear; scratching does not dimish biting-itching, it appears to make it last longer.

‖Measles; barking cough, with hoarseness, coryza and bronchial catarrh.

‖Pruritus universalis; biting itching, in chronic cases.

‖‖Fistulous opening in scrotum; discharges little thick whitish matter.

‖‖Ulcers with scanty discharge; erysipelas; erythema.

[47] **Stages of Life, Constitution.** Often indicated with children and women.

‖‖Light hair, lax fibre; fair complexion.

‖Scrofulous affections.

Child, æt. 6 months; croup.

Girl, æt. 6 months; croup.

Girl, æt. 11 months; irritability of larynx.

Boy, æt. 18 months, strong and lively; croup.

Girl, æt. 18 months, neck had been leeched and calomel given; croup.

Girl, æt. 2; croup.

Girl, æt. 2; croup.

Boy, æt. 3¼ years; croup.

Boy, æt. 4, scrofulous, cachectic-looking; croup.

Boy, æt. 5, robust, after a chill; croup.

Girl, æt. 6, frail, slender, dark hair and eyes; diphtheria.

Girl, æt. 19, lymphatic temperament, affected four years; goitre.

Young lady, æt. 19, well built, well nourished, scrofulous until her fourteenth year, has bronchocele; asthma.

Lady, æt. 23, suffering two years; enlargement of thyroid gland.

Miss M., æt. 25, healthy, plump, ruddy, weight 150, dark hair and eyes, affected three years; bronchocele.

Man, æt. 30, suffering eighteen months; pain in abdomen.

Lady, æt. 30, lymphatic constitution; Basedow's disease.

Lady, æt. 32, single, tall, slender, thick skin and thick lips, strumous, affected many years; bronchocele.

Man, æt. 35; affection of testicle.

Man, æt. 40, dark hair and complexion, after pneumonia; circumscribed gangrene of lung.

Woman, æt. 40; Basedow's disease.

Mrs. S., æt. 45, mother of six children, spare habit, scrofulous, affected six years; bronchocele.

Man, æt. 53, suffering fourteen years; cough.

SQUILLA.

Squills, Sea Onion. *Liliaceæ.*

A bulbous plant, bearing a long spike of whitish flowers, found on the sandy shores of the Mediterranean.

Introduced by Hahnemann, proved by himself, Becher, Hartmann, Hornburg, Mossdorf, Stapf, Teuthorn, Walther and Wislicenus, Mat. Med. Pura, vol. 3, p. 265.

CLINICAL AUTHORITIES.—*Affection of eye*, Sawyer, Med. Adv., June, 1889, p. 398; *Phlyctenule of conjunctiva*, Deady, Norton's Ophth. Therap., p. 171; *Enuresis nocturna*, Blaisdell, Stitson, A. H. O., vol. 12, p. 390; *Asthma*, Frank, N. A. J. H., vol. 9, p. 257; *Bronchitis*, Knorre, Rück. Kl. Erf., vol. 3, p. 27; Neidhard, Hah. Mo., vol. 20, p. 27; *Pertussis*, A. R., Rück. Kl. Erf., vol. 5, p. 729; *Whooping cough* Wesselhœft, A. J. H. M. M., vol. 4, p. 3; *Pneumonia*, Deschere, T. A. I. H., 1886, p. 323; *Dropsical affections*, Hahnemann, Hartmann, Rück. Kl. Erf., vol. 4, p. 355.

[1] **Mind.** Great anxiety of mind, with fear of death.
Angry about trifles.
Aversion to mental or bodily labor.

[2] **Sensorium.** Vertigo in morning, with nausea.
Head beclouded and dizzy.

[3] **Inner Head.** Drawing lancinating headache.
Pulsation in head when raising it.
Headache in morning on waking, with pressing pains.
Contractive pain in both temples.
Quickly passing pain in occiput, from l. to right.
Stitching pain in r. side of forehead.
Affections of brain: child rubs its face and eyes a great deal, especially its eyes, as if to relieve itching; profuse or scanty urination.

[4] **Outer Head.** Painful sensitiveness of vertex, mornings.

[5] **Sight and Eyes.** [1]Staring look, eyes wide open.
[1]Left eye looks smaller than right; upper eyelid swollen.
Contraction of pupils.
The eyes feel as if swimming in cold water.
[1]For two weeks a large phlyctenule of conjunctiva on outer side of cornea; sensation as of cold water in eye, when in a cold wind.

[6] **Hearing and Ears.** Tearing pain back of l. ear.

[7] **Smell and Nose.** [1]Sneezes during cough; eyes water; rubs eyes and nose. [θ]Measles.
[1]Acrid, corrosive, fluent coryza, in morning; a regular general snizzle; coryza; mucous cough, with spurting of urine, and even of watery stools.

Digitized by Google

Nostrils painful as if sore, with violent coryza.
Humid eruptions under nose, with stinging itching.
[8] **Upper Face.** Changeable expression and color of face.
During heat, redness of face, followed by paleness, without coldness.
Distorted countenance, with red cheeks, no thirst.
[9] **Lower Face.** Lips: twitch and are covered with yellow crusts; black and cracked.
Humid spreading eruption on upper lip.
[11] **Taste and Tongue.** Food tastes bitter, especially bread; or sweetish, especially soup and meat.
[12] **Inner Mouth.** Open, dry mouth.
Much viscid mucus in mouth.
Burning in mouth and throat.
[13] **Throat.** Burning in palate and throat; dryness in throat.
Irritation in throat, with heat and tickling, causing constant cough.
Irritation to cough in pit of throat, in upper part of trachea.
[14] **Appetite, Thirst. Desires, Aversions.** Insatiable appetite.
Desire for acids.
Thirst for cold water, but dyspnœa allows her to take but a sip at a time.
[16] **Hiccough, Belching, Nausea and Vomiting.** Empty eructations.
Nausea: during morning cough; continuous in pit of stomach, alternating with a pain in abdomen, as with diarrhœa.
Excessive nausea.
Nausea in back of throat, almost constant accumulation of saliva in mouth.
Nausea in pit of stomach, alternating with pain in abdomen, or sensation as if diarrhœa would set in.
[17] **Scrobiculum and Stomach.** Pressure in stomach as from a stone.
[19] **Abdomen.** Cutting pain in abdomen as from flatulence.
Painful sensitiveness of abdomen and region of bladder.
[20] **Stool and Rectum.** Frequent discharge of very fetid flatus.
Diarrhœa, stools very offensive, watery, during measles, or looking black.
Stools: dark-brown or black, sliny, fluid, in frothy bubbles; very offensive; painless; involuntary (when coughing, sneezing or passing urine).
Painless constipation.
[21] **Urinary Organs.** Continuous, painful pressure on bladder.
Tenesmus of bladder after micturition.
Frequent calls to urinate, especially at night, with scanty or profuse discharge of pale urine.

Digitized by Google

Sanguinolent urine with a deposit of red sediment.
Violent urging to urinate, with frequent emission of pale, limpid urine, looking like water. θDiabetes insipidus.
‖‖Involuntary micturition, especially when coughing.
‖Continuous painful pressure on bladder and inability to retain urine. θEnuresis nocturna.
Unable to retain urine, because the amount is too large.
‖Urine: increased, pale, with frequent urging; involuntary, scanty, dark-red. θHydrothorax.
When urinating feces escape.

[25] **Female Sexual Organs.** Atony of cervix uteri.

[26] **Respiration.** Moaning, with open mouth; wheezing; rattling, with pleurisy, must sit up; short, with least exertion.
Dyspnœa, cannot drink; child seizes cup eagerly, but can drink only in sips.
Difficult or embarrassed respiration.
Frequently obliged to take a deep breath, which provokes cough.
‖Dyspnœa and stitches in chest, most distressing on inspiration.
Oppression across chest, as if it were too tight.
Shortness of breath from every exertion, especially when ascending.
Difficulty of breathing, with stitches in chest when breathing and coughing.
‖‖Dry asthma for three years, and persistent panting respiration, no actual loss of breath at first; finally was obliged to get out of bed and sit at open window; could not lie on r. side without bringing on oppression; drawing pain through both hypochondriæ; urine scanty, reddish-yellow and neutral.

[27] **Cough.** ‖‖Cough: dry, night and morning; short, rattling, disturbing sleep; spasmodic, from mucus in trachea, or tickling creeping sensation in chest; with headache, dyspnœa, spurting of urine, stitches in chest or pain in abdomen; caused by cold drinks; during measles; after eating; from every exertion; by changing from warm to cold air.
‖Frequent irritation to a short dry cough in four or five shocks caused by tickling beneath thyroid cartilage.
‖A violent sudden cough in morning, with stitch in side with every cough, with expectoration.
‖Cough, in morning, with profuse slimy expectoration.
‖‖Constant expectoration of mucus.
Cough in morning, with copious expectoration of thin, frequently reddish-colored mucus.
‖‖The loose cough in morning is more fatiguing than the dry in evening.

Google

‖Cough seems to proceed from lowest ramifications of bronchial tubes, with wheezing in lower part of lungs. θBronchitis.

‖Every fit of coughing winds up with sneezing and involuntary urination.

‖Sputa: white or reddish mucus; sweetish, or empyreumatic or offensive in odor; in small round balls, very difficult to expectorate.

‖Dry spasmodic cough, brought on by taking a deep inspiration, causing pain in abdomen as from a shock and sensation as if intestines would burst out through abdomen, with retching, stitches in sides, pressure upon bladder and involuntary escape of urine; white, slimy, often sweetish-tasting expectoration in morning; none in evening; rattling of mucus before onset of paroxysm. θPertussis.

‖Cough less troublesome in daytime, yet somewhat spasmodic and with whooping, but every night at 11 o'clock, or between 11 and 3 o'clock, she has a sudden attack of suffocation; it is very severe and compels her to spring to her feet and stand on tiptoe on her bed, stretching her body and arms upward in her agony; she cannot gain her breath for many seconds; anxiety and fear is extreme; at length the breath returns, with a whooping sound on inspiration; this is soon followed by a milder attack; the rest of the night is comparatively quiet; but drinking of cold water always brings on severe cough.

[28] **Inner Chest and Lungs.** ‖Stitches in chest, especially when inhaling and coughing; in sides of chest; pleurisy.

Compressive pain in r. side of chest, ending in a stitch.

Broad pressive stitches beneath last ribs of both sides.

‖On inspiration, jerking stitches in r. and l. sides of chest, not far from sternum.

‖Stitches in l. and r. true ribs, at same time.

Drawing stitch from last true rib to shoulder.

‖Broad blunt stitches in last ribs of l. side, in morning in bed, that awakened him.

A contracting stitch in l. side, just beneath last ribs.

Drawing pain in chest.

Sharp stitches in scapular end of clavicle during inspiration and expiration.

Severe stitches near sternum, extending downward so that he could with great difficulty get his breath.

‖Pains in chest < in morning.

‖Heaviness on chest; congestion of blood to chest.

‖Chronic catarrh, profuse secretion of tenacious white

Google

mucus, which is only expectorated after severe cough; especially in children.

‖ Circle of size of palm of hand, dull on percussion, in chest of a young lady.

‖ Pneumonia r. side; cough very painful; high fever; breathing short and anxious, with general anxiety; dulness over r. lung on percussion, fine whistling breathing on auscultation; in some places no respiratory murmur; excessive dyspnœa, suffering during cough making child almost frantic; could take no nourishment on account of cough not allowing him to swallow; during fits of coughing, in his agony would rub his face all over briskly with his fist.

‖ Especially suitable in pneumonia and pleurisy, after bloodletting.

[30] **Heart, Pulse and Circulation.** Pulse small and slow, slightly hard.

[31] **Neck and Back.** Stiffness of neck.

Painful jerking above l. scapula.

Painless drawing in l. scapula.

[32] **Upper Limbs.** Sweat in armpits.

Convulsive twitching in arms; cold hands.

[33] **Lower Limbs.** Convulsive twitching of legs.

Cold foot sweat.

Sweat only on toes.

Soles red and sore when walking.

[34] **Limbs in General.** Tearing and restlessness in upper and lower extremities.

Convulsive twitching and motions of limbs, < morning and evening and during motion.

Soreness in bends of joints.

Dull rheumatic pain; < when exercising, > while at rest.

[35] **Rest. Position. Motion.** Rest: rheumatic pains >.

Could not lie on r. side without bringing on oppression.

Raising head: pulsation in it.

Must sit up: pleurisy.

Sitting: chilliness ceases.

Motion: twitching of limbs <.

Least exertion: short respiration; cough.

Ascending: shortness of breath.

Walking: soles red and sore; chilliness.

Exercising: rheumatic pains <.

[37] **Sleep.** Frequent yawning, without sleepiness.

Restless sleep with much tossing about.

[38] **Time.** Morning: vertigo and nausea; headache; painful sensitiveness of vertex; fluent coryza; nausea during cough; dry cough; violent sudden cough in morning; cough, with profuse expectoration; loose cough, very

Google

fatiguing; stitches in ribs; pains in chest <; twitching of limbs <.
Daytime; cough less troublesome.
Afternoon: great heat in body.
Toward evening: chilliness.
Evening: dry cough; sweetish expectoration; twitching of limbs <; great heat in body.
Night: frequent calls to urinate; dry cough; internal chill.

[39] **Temperature and Weather.** From warm to cold air: cough.
Aversion: to being uncovered, with heat.
Must get out of bed and sit at open window.
Cold wind: sensation as of cold water in eye.
Cold drinks: caused cough.

[40] **Fever.** Chill internally at night, with external heat.
Chilliness toward evening when walking, not when sitting.
Icy-cold hands and feet, with warmth of rest of body.
Icy-cold feet.
Heat dry, burning, mostly internally.
Heat of whole body, with cold hands and feet, with aversion to being uncovered; face pale after heat.
Sensation of great heat in body, in afternoon and evening, generally with cold feet.
Whenever he uncovers himself during heat, he suffers from chilliness and pain.
Sweat wanting.

[41] **Attacks, Periodicity.** Alternating: nausea in pit of stomach, with pain in abdomen.
Every night at 11 o'clock or between 11 and 3: sudden attacks of suffocation.
For three years: dry asthma.

[42] **Locality and Direction.** Right: pain in forehead; compressive pain, side of chest; blunt stitch in last ribs; pneumonia, dulness over lung.
Left: eye smaller than right; pain back of ear; stitch in side; jerking above scapula; drawing on scapula.
From l. to r.: pain in occiput.
Right and left: stitches in side of chest; stitches in true ribs at same time.

[43] **Sensations.** Eyes as if swimming in water; nostrils as if sore; as if diarrhœa would set in; as if chest were too tight; as if intestines would burst through abdomen.
Pain: in abdomen; in chest.
Tearing pain: back of l. ear; in upper and lower limbs.
Cutting pain: in abdomen.
Drawing lancinating pain: in head.
Severe stitches: near sternum.

Google

Sharp stitches: in scapular end of clavicle.
Jerking stitches: in r. and l. side of chest.
Stitches: in chest; in side; in l. and r. true ribs.
Contracting stitch: in l. side.
Drawing stitch: from last true rib to shoulder.
Broad pressive stitches: beneath last ribs.
Broad blunt stitches: in last rib of r. side.
Stitching pain: in forehead.
Contractive pain; in both temples; in occiput.
Compressive pain: in r. side of chest.
Drawing pain: through both hypochondriæ; in chest.
Pressing pain: in head.
Dull rheumatic pains: in limbs.
Painful jerking: above scapula.
Painful pressure: on bladder.
Painful sensitiveness: of abdomen and region of bladder.
Soreness: of soles; in bends of joints.
Burning: in mouth and throat; in palate.
Great heat: in body.
Dryness: of mouth; of throat.
Pulsation: in head.
Painless drawing: on scapula.
Stiffness: of neck.
Pressure: in stomach, as from a stone.
Heaviness: on chest.
Tickling creeping sensation: in chest.
Stinging itching: under nose.
Icy-coldness: of hands; of feet.

[46] **Skin.** Eruptions like itch, with burning, itching.
Excoriation in bends of limbs.

[47] **Stages of Life, Constitution.** Boy, æt. 9, negro; pneumonia.
Miss H., æt. 15, fleshy, light complexion, blue eyes, large for her age, recovering from varicella; affection of eye.
Man, æt. 25, suffering two weeks; phlyctenule of conjunctiva.
Widow, æt. 63, suffering three years; asthma.

[1] **Mind.** Sadness, with aversion to men and disinclination to talk.

Continued restlessness and anxiety.

[1] Uneasy, does not know what to do with himself, pains > by walking, yet so weak he soon must rest. θAnæmia.

Sullen, answers unwillingly and shortly.

Her distress of mind ceases as soon as menses begin to flow.

[1] A woman, æt. 39, pregnant in fourth month; continued anxiety and restlessness; must keep in bed not only on account of bodily weakness, but also on account of her inability to do anything, as she cannot muster sufficient

Digitized by Google

courage, and is forgetful and absent-minded; feels like crying all the time, but crying makes her feel worse; great palpitation of heart and anxiety, especially if she has to give directions in her domestic affairs; thinking makes her feel wretched, and she cannot get rid of what once gets fixed in her mind; oversensitive smell; vertigo on moving head; visions in morning and through day of all kinds of fancied things; drawing pains in different places; difficult evacuation even of soft stool; urging to stool; urine profuse and pale and then scanty and brown, sometimes white like milk; flatus; dry, tiresome cough; lies always upon her back with one leg stretched and the other drawn up. ♂Pregnancy.

[2] **Sensorium.** Vertigo: when reading, with loss of thought; < walking in open air or raising head; it seems as if all objects were too far off; dizzy pressure through head; head feels heavy, with sadness.

[3] **Inner Head.** Sharp jerking pains in anterior lobe of brain above orbit.

Headache in frontal region.

Pain as if forehead were shattered.

Dull pressure from within outward, in forehead.

Pressive tearing: in forehead; in r. half of forehead, at intervals; < by stooping.

‖Pressure in l. temple beginning slight, then increasing and so again diminishing as if forehead would be pressed inward.

Crushing pain, like a pressing inward in temples, all day.

‖Painful jerks through l. temple, forehead and cerebellum, leaving a dull pressure, < during rest, > from motion.

‖Throbbing headache in temples.

Stupefying, aching pain in brain.

Constriction and sudden pressure in whole upper part of head, slowly increasing and decreasing.

‖Heaviness in head, during rest and motion, evenings.

‖Headache every morning, over one or other eye, mostly l., gradually extending over whole forehead, increasing and decreasing gradually; often with vomiting.

‖Soon after rising, dull, stupefying pain over eyes, sometimes more over l., increasing gradually in intensity and involving whole forehead, attaining its climax in about two hours, after which it as gradually subsided and in about two hours was quite gone; pain of a pressing in, cramping, crushing character.

‖Regularly at 5 A.M. awakened by headache, occupying forehead and both eyes; severe pressive or grinding pains, < from motion; great sensitiveness to noise and light; pain not particularly severe at first, but it gradu-

Digitized by Google

ally increased, maintained its intensity when at its height for some time (generally from 8 to 9), then gradually diminished, finally disappeared.

‖ Violent, glowing, beating pain, extending from upper part of forehead to vertex; felt as if head would burst from inward blows; skin of forehead seems swollen, eyelids were forced together and could be but slightly opened; least noise increased pain to an intolerable degree, so that he crept to farthest corner of house; daily paroxysm lasting from 10 A.M. to 4 P.M., attaining its greatest intensity about noon.

‖ For a week past has had a slight cold, sneezing, some heated excoriating water running from nose and eyes; after third day of this cold he had an aching pain over l. eye, in l. temple, coming on about 4 A.M., very gradually increasing until 11 A.M., and from 3 P.M. as slowly decreasing, until by 6 P.M. it was entirely gone, not to return until 4 A.M.; at first, pain only aching, but after a few days it became sharp, cutting and boring, with a terrible sense of fulness; by end of a week so excruciating at its acme that patient, whose ability to bear pain was more than ordinary, would roll or toss over bed, exhibiting usual expressions of greatest agony; lachrymation of eye on affected side, with slight excoriation of lower lid; pain > for a time by pressure. θSolar neuralgia.

‖‖ Neuralgia of head; begins lightly and increases gradually to its highest point and then gradually declines.

[4] **Outer Head.** Burning in forehead, with nausea, > in open air.

[5] **Sight and Eyes.** Sees a rainbow about the candlelight.

Weak, sunken, lustreless eyes.

Pupils contracted.

‖ Neuralgia in l. eye, gradually increasing from 10 A.M. to noon, then gradually decreasing, with lachrymation during pain.

Biting in eyes, as from rubbing with a woolen cloth.

Agglutination of lids at night.

Pressure in l. inner canthus as from a stye, with lachrymation.

Pustular swelling at inner canthus of l. eye; like a lachrymal fistula.

Pressive pain in r. inner canthus.

Burning stitches in eyelids. θStyes.

‖ Blennorrhœa of lachrymal sac; profuse yellow-white discharge.

‖ Ptosis from sympathetic paralysis; returning every Tuesday.

Google

[6] **Hearing and Ears.** Ringing in l. ear.
Shrieking noise in ear when blowing nose.
Ulceration of ear-ring hole.

[7] **Smell and Nose.** Oversensitive smell.
Stuffed feeling and heaviness, high up in nostrils.
Dry coryza on one side, with soreness, redness and swelling of nostril.

[8] **Upper Face.** ‖Flushes of heat in face from any movement, > in open air; one cheek hot and red.
‖Face pale, eyes sunk, mind dull.
‖Face pale and sunken, sickly, features elongated.
‖Face pale, sickly-looking, flushing easily on exertion.
Drawing pain in face, in malar bone and orbits.
Malar bone painful to touch before menses, during the flow it is painful even to move muscles of face.
Contusive pain in region of malar bone during menses.
‖‖Prosopalgia: pains increase and decrease gradually; after suppressed chills by quinine.
‖Intermittent supraorbital neuralgia from 10 A.M. to 3 or 4 P.M., gradually increasing until attaining its acme, and then again decreasing as gradually; after abuse of quinine.
‖‖Violent neuralgia of face and head, pains stealing on in a "slow-and-sure" fashion, requiring hours to reach its maximum, then beginning its decrease, which is quite as slow.

[10] **Teeth and Tongue.** Teeth feel loose, elongated, with painful jerking shortly after eating.
‖‖Neuralgia from temples down over upper and lower maxilla and lips, a drawing, gnawing pain, begins at a certain hour for several days, rises up to its greatest severity and then decreases again gradually (from morning until evening).
‖‖Pain in upper incisors for four days; pains severe, coming at first lightly, gradually increasing in intensity, and then gradually subsiding.
‖‖Epileptiform convulsions from teething; child is more comfortable by lying with abdomen across some hard substance; clenching of thumbs.

[11] **Taste and Tongue.** ‖Taste: sour; sweet; offensive; everything bitter but water.
‖‖Difficult, weak speech, occasioned by weakness, particularly in chest.
Tongue: red; yellow; coated with yellowish mucus.

[12] **Inner Mouth.** ‖Fetid smell from mouth.

[13] **Throat.** Permanent rawness and dryness in throat; during deglutition a painful feeling of being denuded.
Extreme rawness and dryness of throat, without thirst,

Google

these sensations are much more painful during deglutition; thick greyish or greenish mucus adheres to throat; strong efforts are required to raise it, and these excite inclination to vomit.

‖Rawness in throat, in morning. θChronic catarrh.

‖Stinging dryness in throat.

Cutting in throat as from knives, when swallowing.

‖Hawks mucus, with soreness in throat; voice then becomes clearer for singing.

Inclination to hawk up much mucus from throat, in evening, followed by a sore pain in throat.

‖Mucus sticks in throat, efforts to raise it excite vomiturition.

Thick, grey-green mucus, mixed with blood, is detached from throat.

[16] **Appetite, Thirst. Desires, Aversions.** ‖Canine hunger during day, with loss of appetite in evening.

Appetite irregular, with hypochondriasis.

Aversion to beer; it tastes flat or bitter.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: bitter, after eating; sour.

Nausea after eating, followed by vomiting of bile, or undigested food.

Vomiting: of blood; of bile and mucus on awaking in morning; of water on smelling cooking.

[17] **Scrobiculum and Stomach.** ‖Sinking, gone feeling in epigastrium.

‖Pressure and obstruction in pit of stomach.

‖Heavy pressure in stomach, with soreness of it to touch.

‖Oppression of stomach in hysterical women, with nausea, pale face, great weakness, phlegmatic temperament.

‖Uneasy, knows not what to do with himself; pains > by walking, yet so weak he must soon rest.

‖Cardialgia, pains gradually come and go, extend to navel and are > from hard pressure; sickly expression; uneasy, does not know what to do with himself; > by walking, yet so weak he must soon rest.

‖Gastralgia; clawing, kneading pain, extending to umbilicus; epigastrium sensitive to pressure; tension, pressure, shortness of breath, with anxiety and nausea; chronic diarrhœa; frequent bitter belching; distension of stomach; hunger.

‖Hæmatemesis, < when lying, > from pressure on stomach; slight touch causes a feeling of subcutaneous ulceration.

[18] **Hypochondria.** Occasionally through day great epigastric weakness and hunger, but cannot eat.

‖Burning in hepatic region; cutting pains about navel; pain as if from an ulcer; empty feeling after eating.

Digitized by Google

Burning in hepatic region; stinging.
Boring stitches in l. hypochondrium.
Hysteric spasms in region of diaphragm.

[19] **Abdomen.** Empty feeling, even after eating.
Sensation of soreness in whole abdomen, < by touch.
‖Digging in abdomen before every stool.
‖Cutting about navel; with bitter eructations, hunger and diarrhœa; > from hard pressure.
‖Sensitiveness of abdomen to touch; sore as from subcutaneous ulceration.
‖Stitches from both sides through hips; < from slightest motion, or touch, and when lying on r. side; > by bending double against a chair or table; vomiting of water when smelling any kind of cooking. θColic.
‖Colic and twisting pains in region of spleen, lasting about six hours; usually coming on at night, and when going off leaving a soreness, which wears off during course of week; for last few days pains were constant; pain commences lightly, gets worse and worse until it reaches its acme and then decreases, leaving a feeling as if there were a hole in his side.
Spasmodic colic above and below navel.
‖Colic > by hard pressure or by laying abdomen of child across knees, or against shoulder.
‖Babe 4 months old, double inguinal hernia; diarrhœa of green, curdy stools and much colic, > by laying its abdomen across nurse's knee, or against point of shoulder.

[20] **Stool and Rectum.** ‖Stools: green, curdy, with colic; mucous; with bitter eructations; hard, dry, knotty or insufficient, with renewed desire afterward.
‖Diarrhœa: in nursing infants; it is exhausting to talk much or read aloud; it is more difficult to descend than to ascend, to sit down than to rise up; although stool has been fully accomplished does not feel relieved.
Before stool: motion, pinching and distension in abdomen.
During stool: cutting in anus; drawing from back through thighs; rigors.
‖Rectum inactive; much urging even with soft stool.
‖Constipation; stool hard, dry, knotty, or insufficient and green.
‖Constipation appearing every Monday or on days after a fete, but only in winter, while for the rest of the week the stools were regular; fulness in lower part of abdomen, with swelling, malaise, great heat in head, > in open air, returning when in house, with ill-humor and sadness; felt hungry at noon but no appetite in evening.

Google

‖Passes worms; lumbrici; colic; sickly face; spells of abdominal pain, during which wishes to lean over on something hard for relief.

‖Tænia.

[21] **Urinary Organs.** Urine: profuse and pale, then scanty, brown, and sometimes white like milk; scanty and loaded with phosphates.

After urination continued urging.

Urging to urinate is wanting as if there were no sensation in bladder; only a sensation of fulness indicates necessity to urinate; atony of bladder.

[22] **Male Sexual Organs.** ‖Voluptuous sensation in genitals, ending in an emission.

‖Irritation, with great weakness and nocturnal emissions; marked neurasthenia.

‖Spermatorrhœa with excessive prostration.

‖‖Emissions without lascivious dreams.

[23] **Female Sexual Organs.** ‖Excited sexual desire; easy orgasm.

‖Scratching arm produces an intolerable sensation of pleasure in genital organs which extends to uterus and produces sexual orgasm. θNeurasthenia.

‖‖Bearing down in uterine region; prolapsus uteri and vaginæ; < during stool; feels so weak must drop down suddenly, but can get up readily. θNeurasthenia.

‖Prolapse strangulated, tends to gangrene.

‖Menses: too early and too profuse; preceded by melancholy; pain in malar bones, continues during menses.

‖‖Leucorrhœa: with great debility; weakness, seems to proceed from chest; of yellow, white or transparent mucus; thin, watery, in debilitated subjects; profuse white or yellow, causing great general debility.

[24] **Pregnancy. Parturition. Lactation.** ‖‖Melancholia. See Chapter 1.

‖Spasmodic labor pains; they exhaust her, she is out of breath.

Child refuses mother's milk.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Voice husky, deep, hoarse, hollow; clearer or higher after hawking up mucus.

‖Roughness and hoarseness, momentarily > by coughing.

‖‖Talking weakens, particularly the chest.

‖‖Cannot read to her children, it causes aching in throat, chest and deltoids.

‖‖Complete aphonia; pain in larynx; severe cough, with profuse purulent expectoration; hectic fever; debilitating night sweats; diarrhœa.

‖Hoarseness, weakness and emptiness in chest on begin-

Digitized by Google

ning to sing, so that she was constantly obliged to stop and take a deep breath; at times a few expulsive coughs removed hoarseness for a moment.

‖Rawness in larynx.

‖Irritation to cough in trachea, as from mucus, on breathing, with a cough neither loose nor dry, felt more while sitting bent over than when walking.

‖Mucus in trachea, in forenoon, easily expelled by a forcible cough, with great weakness of chest as if eviscerated; weakness of body and limbs, in which sensation of weakness extended upward and downward, several mornings in succession.

‖Bronchial dilatations, with purulent expectoration.

‖‖Cough, tickling in throat, loss of appetite, fever, debilitating night sweats; deglutition gradually became more difficult, caused severe cough and attacks of suffocation, expectoration more and more profuse, at first mucous, finally purulent, more than a pint in twenty-four hours; hoarseness; emaciation; epiglottis ulcerated, edges eaten away.

‖‖Laryngeal phthisis, with constant short hacking cough and aphonia; empty feeling in chest.

‖‖Accumulation of great quantities of mucus in trachea, easily thrown off by coughing. θBronchitis.

[26] **Respiration.** Disposition to take a deep breath, causing a feeling of lightness.

Crowing, snoring respiration.

‖Oppressed breathing: from every movement; when lying down; in evening; from coughing.

Short, difficult respiration, caused by weakness of respiratory organs, with great emptiness in chest, though without dyspnœa.

‖Dyspnœa and want of breath on ascending steps and on slightest motion.

‖Evening dyspnœa; must loosen clothing.

‖‖Mrs. ——, æt. 37, spare, brunette, subject to asthma for many years; attacks, preceded by symptoms of ordinary cold, usually set in about 4–5 A.M., lasting from thirty-six to forty-eight hours; attacks increase and decrease gradually.

‖‖A man, æt. 40, had for a year and a quarter asthmatic attacks which, day or night, did not permit him to lie down; paroxysms increased and decreased gradually; retinitis albuminurica; albumen in urine and œdema of feet.

[27] **Cough.** ‖‖Cough: in fatiguing paroxysms; epigastric region painful, as if beaten; violent, shattering, deep; short, from time to time, as from weakness in chest, with a

hoarse, weak sound; tickling as from soreness low down in trachea, a scraping extending upward into throat; constant inclination to hack, as if caused by much mucus in chest, with an internal sensation of scraping and rattling; frightful, with expectoration and spitting of blood; dry, in evening in bed; concussive in paroxysms of three coughs; caused by mucus in chest and by stitches in trachea, and dryness; with copious, green, salty sputum, most profuse in morning.

Scraping cough, with greenish expectoration of an offensive sweetish taste, < in evening before lying down with a hoarse voice; a sore sensation in chest and trachea after every cough (the irritation which provokes it is low down in trachea).

❙Accumulation of much mucus in trachea, easily thrown off by coughing; afterward, soreness or stitches in chest.

❙Cough caused by talking, singing, laughing, lying on side and from drinking anything warm.

❙❙Phthisis pituitosa.

❙❙Cough, particularly during day, with shortness of breath; profuse, white, thick, tasteless expectoration, without effort.

❙❙Cough, returned every February and lasted until Summer or warm weather; had measles three years before, and taken cold; severe racking cough; inclination to vomit during cough; < in morning; expectoration of yellowish mucus of a sweetish taste.

❙Whooping cough, with hoarseness, loss of breath, soreness and heaviness in chest, inclination to breathe deeply, sore or empty sensation in epigastrium, profuse offensive or salty tasting, yellowish or greenish expectoration, < at night lying down, face pale and emaciated, eyes sunken.

Expectoration of a globular, greyish lump of thick mucus, containing a clot of black blood, and appearing to come from throat.

❙❙Sputum: like white of an egg; yellow green pus; sweetish; putrid, sour or saltish; during day.

Inner Chest. Oppression of chest as if it were internally constricted.

Distressing oppression in upper part of chest, was frequently obliged to take a deep breath, with a sensation of great emptiness in pit of stomach.

❙Tension across upper part of chest with emptiness in lower.

❙Constriction of chest with anxiety in evening.

❙❙Chest so weak he cannot talk; empty feeling in chest.

Great dyspnœa, with anxiety, in evening, compelling one to loosen clothing.

Google

Drawing a long breath causes a pleasant sensation of lightness, for a short time.

▮Great sore feeling in chest; bruised pain.

Stitches in chest and sides hinder respiration.

Sudden, sharp, knifelike stitches in l. side of chest.

▮Stitches in l. side of chest, when breathing or lying on that side.

Sudden drawing beneath l. breast on rising up in bed, followed by sharp knifelike stitches, extending thence into clavicle, toward shoulder, where pain persisted, and into l. side, extending downward into lower abdomen, < by bending inward, pressing upon it, and especially by inspiration and hacking which also caused a painful shock.

Itching tickling in chest.

Tension in chest. θHydrothorax.

▮▮After great fright, and in consequence of a severe cold, dull paralyzing pain in l. arm which on continuing to walk extended to l. side of chest, obstructing respiration and forcing him to stand still, pain then soon diminished, but was soon obliged to make another halt; during night suddenly aroused by violent pain at a point in l. breast which could not be definitely pointed out; pain increased gradually and was accompanied by an indescribable terror which drove him out of bed; could find relief in no position; profuse, cold sweat on head and upper part of trunk; when pain was at its height was unable to make a motion or utter a sound; for an hour was obliged to remain sitting, with head and trunk bent forward, with gasping, noisy respiration, spasmodically clutching arms of a chair; pain then diminished as gradually as it had increased and disappeared by morning. θNeuralgia of l. phrenic nerve.

▮▮Several days after a fright, while walking, an unusual feeling of weakness which appeared to proceed from chest and obliged her to loosen her dress and lie down; after remaining quiet for an hour the attack disappeared, but returned in a few days and gradually changed into a gnawing pain, seated at middle of sternum, commencing gently, gradually increasing for two hours and then disappearing just as gradually; at beginning of paroxysm, which returned more and more frequently, irresistible inclination to lie down, and at the height of attack was unable, for half an hour, to make any motion or sound; she became more chlorotic and menses more scanty and pale. θNeuralgia.

▮▮Hæmoptysis; tendency to copious expectoration.

▮▮Weakness in chest: with copious expectoration; as if

Google

eviscerated, with weakness of whole body and limbs; and emptiness on beginning to sing, she was constantly obliged to stop and take a deep breath.

‖Chronic catarrhal affections of chest, with copious expectoration of yellowish, greenish, offensive-tasting mucus; great prostration; emaciation; œdema of limbs.

‖Shortness of breath; profuse but difficult expectoration of thick, offensive, salty-tasting mucus; expectoration entirely absent for nine or ten weeks, then recurs and lasts for five or six weeks; oozing of a watery clear fluid from umbilicus during the periods when she expectorates; sleep disturbed; sleeps upon back with head flexed upon chest; cannot lie upon side; stooping posture; great prostration; large mucous and whistling râles in chest; after a pneumonia several years previously.

‖Profuse expectoration; wheezing, oppressed breathing, < from motion; cough day and night, with nausea; expectoration white, thin, slimy; frequent stitches in sides of chest, < from breathing and coughing; prostration; cannot sleep on account of shortness of breath: can do no work; menses and stool normal.

‖Cough with copious, greenish, or yellowish offensive-tasting expectoration; cough generally dry in evening and at night, or else expectoration is difficult, while during day and in morning it is profuse and easy. θPhthisis.

‖Pulse 150 to 160; hectic fever; racking, exhausting cough day and night; expectorating every twenty-four hours about a quart of tough glairy mucus, mixed with purulent matter; large cavity in upper third of r. lobe; *Calc.* 30 reduced pulse to 120 and diminished sputa about one-fourth; in four or five weeks pulse quickened and improvement ceased, *Stannum* then cured. θPhthisis.

‖Cough which seemed to come from low down in chest, < at night, with profuse expectoration; tension across chest; dyspnœa < from motion; cannot lie down at night; rattling of mucus in chest; anorexia; night sweats; prostration; weakening of limbs; emaciation. θPhthisis.

‖Teeth loose, feel too long; accumulation of much mucus in throat; scratching in throat in evening; hoarseness; tickling cough; cough with greenish expectoration, of offensive whitish taste, < evenings; constriction of chest and anxiety in evening; shortness of breath, < from least motion; must unloosen clothing; stool scanty, greenish; intense burning of hands and feet;

Digitized by Google

general prostration; very tired and sleepy; profuse sweats every morning at 4 o'clock; emaciation; despondent, will not talk, is dissatisfied. θPhthisis.

‖Cough day and night, copious expectoration; great emaciation; pulse weak, rapid; burning heat of palms of hands, < in afternoon; profuse sweats early in morning; tongue red; severe diarrhœa; great prostration, compelling her to stay in bed. θPhthisis.

‖Prostration; pain in all limbs; constant irritation to cough; frequent shivering during day, and profuse sweats early in morning in bed; is no longer able to get up; constant cough; copious expectoration of masses of tasteless white mucus; unquenchable thirst; craving for sour things. θPhthisis.

‖Pale and emaciated; respiration rapid, short; cough often dry, often with profuse greenish-yellow sweetish-tasting mucus; < morning and evening; stitching pains in head, < in forehead, < after paroxysms of cough; abnormal appetite; pressure in stomach after eating; scanty stool; heaviness, coldness and swelling of hands and feet; in evening transient flushes of heat and thirst. θPhthisis.

‖Mucous expectoration in first stage of consumption, or when a neglected catarrh or grippe threatens to pass into phthisis; can talk only a few words at a time for want of breath; more or less hoarseness; roughness of throat and sore pain in chest; feeling of weakness in chest as if deprived of its contents after expectorating or talking; constriction of chest and constant chilliness, alternating with flushes of heat; profuse night sweats; pressure and bloatedness of stomach always after eating; great lassitude, hands and feet heavy and cold or else burning hot. θPhthisis.

‖Phthisis mucosa, with the characteristic cough, weakness and sputa; profuse sweats.

[29] **Heart, Pulse and Circulation.** Pulse frequent and small.

[30] **Outer Chest.** ‖A lady, æt. 50, formerly healthy, suffers since her climaxis from disease of liver; looks yellow, has no appetite, nauseous taste, tongue coated yellow, obstinate constipation; tongue villous, yellow, heavily coated, somewhat dry; weak voice, sounds of heart slow, weak, hardly 60 to minute, but regular; urine strongly saturated with sour secretion and vermilion precipitate firmly adhering to walls of vessels; some withered varices on anus; whole appearance anæmic; every Saturday morning wakes up with nausea and choking; feels a shock in region of liver, leaving behind, along second and third false ribs, a spas-

Google

modic pain, which increases gradually in severity up to 3 or 4 P.M., when she vomits up food taken day before, and then pain decreases gradually so that by 10 o'clock in evening she is entirely relieved; next two days so weak that she is obliged to keep in bed; next four days tolerably well, until Saturday brings on return of her sufferings; during paroxysm passes a large quantity of watery urine. θIntercostal neuralgia.

[31] **Neck and Back.** Weakness of nape of neck.
Stitches in back, in small of back and into limbs.

[32] **Upper Limbs.** Jerking in muscles of arm when resting it; fingers jerk when holding pen.
Weakness and heaviness of arms, especially r.; < from motion.
Paralytic weakness of arms, if he holds a light weight for only a short time.
‖The arms easily become fatigued from moderate exercise, so that everything he holds is allowed to fall.
Aching in deltoids from reading.
Swelling of hands evenings.
‖Weakness and trembling of hands.
‖Cramping of fingers of writers and shoemakers; on attempting to pick up a small object, as a needle or a pen, or when they have been used a long time, fingers become suddenly rigid, distorted, spread out or contracted, in which position they remain for some time; the spasm can often be ended by opening fingers with unaffected hand; usually r. hand is affected; the toes in one case were also affected.
Burning in hands.
Chilblains on hands.
Painful hangnails.

[33] **Lower Limbs.** Weakness and heaviness, especially of thigh and knee joint, must sit down.
‖Paralytic heaviness and weakness, especially in thighs and knee joints.
Stiffness and tension in bends of knees.
Swelling of ankles, evenings.
Burning of feet.

[34] **Limbs in General.** ‖Paralytic heaviness of limbs; < using arms or walking, particularly descending.
‖Insupportable restlessness of all the limbs.
Swelling of hands and feet in evening.
‖Pains in limbs increase gradually and decrease in same manner.

[35] **Rest. Position. Motion.** Rest: pains in head <; heaviness in head; of arm, jerking in muscles.
Lying: hæmatemesis <; asthma does not permit; whooping cough <.

Digitized by Google

Lying on back: one leg stretched, other drawn up during pregnancy; head flexed on chest; shortness of breath.
Lies on stomach: when asleep.
Lying on r. side: pain through hips <; causes cough.
Constantly wishes to lie or sit down: excessive prostration.
Must lie down: weakness of chest.
Cannot lie down: phthisis.
Obliged to remain sitting with head and trunk forward: pain in l. breast.
Sitting bent over: irritation to cough >.
Bending double against chair or table: > pains through hips.
Bending inward: stitches in abdomen <.
Must sit down: weakness and heaviness of thighs and knee joint.
Stooping: tearing in forehead <; with shortness of breath.
Raising head: vertigo <.
Rising up in bed: drawing beneath l. breast.
Rising from bed: sudden weakness.
Motion: pains in head >; heaviness in head; headache <; flushes of heat in face; stitches through hips <; oppressed breathing; want of breath; impossible from pain in breast; impossible, neuralgia of chest; wheezing <; dyspnœa <; shortness of breath <; weakness of arms <.
Walking: pains >, but must soon rest: vertigo <; pain goes from arm to chest; heaviness of limbs <; great lassitude.
Ascending steps: want of breath; weariness of body <.
Descending more difficult than ascending, sitting than rising; heaviness of limbs <.
Going down stairs: faintness.
Exertion: face flushes easily.
Exercise: arm easily fatigued; slow trembling <.

[56] **Nerves.** Feels as if she would faint.
Faintness from going down stairs.
!Great lassitude when walking.
!Weariness of whole body, especially after ascending steps.
Was suddenly attacked by weakness; she could scarcely breathe, while dressing, after rising from bed.
!Great weariness during day; was obliged to lie down.
Excessive prostration; constantly wishes to sit or lie down, and when about to sit down falls upon chair because she has not the power to sit down slowly.
!Extreme exhaustion of mind and body.
!Loss of power as if limbs were beaten.
!!Very much exhausted from talking or reading aloud.

Digitized by Google

‖‖Great sense of weakness in larynx and chest, thence all over body.
‖Trembling, < from slow exercise.
‖‖Neuralgia; the pain increases gradually to a very high degree, and decreases again as slowly.
‖Hysterical spasms, with pain in abdomen and in diaphragm.
Hysteria with frightful pains in head; full of notions.
‖Renewal of convulsions with cutting of every tooth; also in consequence of worms; child is weak; looks miserable.
‖Epilepsy: with tossing of limbs, clenching thumbs; opisthotonos; unconsciousness; with sexual complications; during dentition, with symptoms of worms; in evening: paleness of face, twitching of hands and eyes.
‖Hemiplegia, paralyzed parts constantly moist from perspiration; especially on l. side, with a feeling of a heavy load in affected arm and corresponding side of chest, and frequent night sweats.
‖Paralysis, from worms, onanism, spasms, emotions.

[37] **Sleep.** ‖‖Sleeplessness.
‖Sleepy during day; goes to sleep late at night.
Restless, child moans during sleep, or supplicates in a timid manner.
So weak on waking it puts her out of breath to dress.

[38] **Time.** Morning: visions of all kinds of fancied things; rawness in throat; vomiting of bile and mucus; mucus in trachea; inclination to cough <; expectoration easy; debilitating sweats; sweat < after 4 A.M.
10 A.M.: finger tips numb.
During day: canine hunger; great epigastric weakness and hunger; copious green salty sputa; cough <, with shortness of breath; expectoration easy; cough exhausting; frequent shivering; great weariness; sleepy.
Afternoon: burning heat of palms of hands <.
Evenings: heaviness in head; inclination to hawk up much mucus from throat; loss of appetite; dyspnœa; dry cough; cough < before lying down; constriction of chest; dyspnœa; scratching in throat; cough, with expectoration <; swelling of hands; swelling of ankles; swelling of feet; epilepsy.
Night: agglutination of lids; colic comes on; whooping cough <; cough exhausting; cough <; goes to sleep late; debilitating sweats.

[39] **Temperature and Weather.** Warm drinks: cause cough.
Open air: while walking vertigo <; burning in forehead >; flushes of heat in face >.

[40] **Fever.** Chill: 10 A.M., finger tips numb; in evening, over

back; only on head, with thirst; slight, but with chattering teeth, as from convulsions, of masseter muscles; over whole body, lasting half an hour.

Heat: from 4 to 5 P.M., with sweat; burning, in limbs, mostly in hands, every evening; anxious, as if sweat would break out.

Sweat: smells mouldy, musty; debilitating, night and morning, most profuse on neck; debilitating, from least movement; profuse, after 4 A.M., every morning; in morning, mostly on neck, nape of neck and forehead.

Sweat principally on forehead and nape of neck, in morning after 4 A.M.

Hectic fever.

Worm fever, in a very excitable and restless boy; pain in stomach, lay upon stomach when asleep.

Attacks, Periodicity. Increasing and decreasing gradually: headache over eyes; cramping, crushing pain in head; grinding or pressive pains; neuralgia of head; neuralgia in l. eye; colic and pain in region of spleen; paroxysms of asthma; pain in l. breast; weakness in chest; spasmodic pain in region of liver; pains in limbs.

Alternating: chilliness and flushes of heat.

Every morning: headache; profuse sweat at 4 o'clock.

Several mornings in succession: weakness of body and limbs.

At 5 A.M.: regularly awakened by headache.

Daily: paroxysms from 10 A.M. to 4 P.M.

Every evening: heat in limbs.

Half an hour: chill lasts.

From 4 to 5 P.M.: heat.

For six hours: colic or twisting pains in region of spleen.

Every twenty-four hours: expectorates about a quart.

For four days: pain in upper incisors, increasing and decreasing gradually.

Several days after a fright: weakness in chest.

Every Monday: constipation.

Every Tuesday: ptosis from sympathetic paralysis.

Every Saturday morning: wakes up with nausea and choking.

For nine or ten weeks: expectoration absent, then recurs and lasts for five or six weeks.

Every February: cough returned.

For a year and a quarter: asthmatic attacks.

Locality and Direction. Right: tearing in half of forehead; pressive pain in inner canthus; heaviness and weakness of arm; spasm of hand.

Left: pressure in temple; jerks through temple; head-

Google

ache < over eye; aching over eye and in temple; neuralgia in l. eye: pressure in inner canthus; pustular swelling at inner canthus; ringing in ear; boring stitches in hypochondrium; stitches in side of chest when lying on side; drawing beneath breast; paralyzing pain in arm, thence to side of chest; violent pain at a point in breast.

From within outward: pressure in forehead.

[43] **Sensations.** As if all objects were too far off; as if forehead were shattered; as if forehead would be pressed inward; pain as if from an ulcer in hypogastrium; as if there were a hole in his side; as if there were no sensation in bladder; chest as if eviscerated; epigastric region as if beaten; tickling as from soreness in trachea; inclination to hawk as if mucus were in chest; as if it were internally constricted; as if chest were deprived of its contents; as if she would faint; as if limbs were beaten; as of a heavy load in affected arm and side of chest; as if sweat would break out.

Pain: in frontal region; in upper incisors; larynx; in all limbs; in abdomen and in diaphragm; in stomach.

Violent pain: at a point in l. breast.

Frightful pains: in head.

Sharp jerking pains: above orbit.

Beating pain: from forehead to vertex.

Throbbing pain: in temples.

Cutting pain: in forehead and eyes; in throat; about navel; in anus.

Pressive tearing: in forehead; in r. half of forehead.

Boring pain: in forehead and eyes.

Crushing pain: in temples.

Stitches: from both sides through hips; in trachea; in chest; in l. side of chest; in back; in small of back and into limbs.

Burning stitches: in eyelids.

Boring stitches: in l. hypochondrium.

Sharp, knifelike stitches: in l. side of chest; from chest into clavicle.

Stitching pains: in head.

Bruised pain: in chest.

Gnawing pain: seated at middle of sternum.

Twisting pains: in region of spleen.

Pinching pain: in abdomen.

Grinding pain: in forehead and eyes.

Clawing, kneading pain: about umbilicus.

Digging: in abdomen.

Severe pressive pain: forehead and both eyes.

Pressive pain: in r. inner canthus.

Google

Stupefying pain: in brain; over eyes.
Dull paralyzing pain: in l. arm.
Neuralgic pain: in l. eye; of face and head; from temples to lower maxilla and lips.
Glowing pain: from forehead to vertex.
Aching pain: in brain; over l. eye; in l. temple; in throat; in deltoids.
Drawing pain: in different places; in face, in malar bone and orbits; beneath l. breast.
Painful jerks: through l. temple and cerebellum.
Sore pain: in chest.
Contusive pain: in region of malar bone.
Biting: in eyes.
Stinging: in throat; in hepatic region.
Soreness: in nostrils; in throat; of stomach; in abdomen; in chest.
Burning: in forehead; in hepatic region; of hands and feet; of palms of hands; of feet.
Heat: in head.
Scraping: in throat.
Rawness: in throat; in larynx.
Pressure: dizzy, through head; in forehead; in l. temple; in l. inner canthus; in pit of stomach; in stomach.
Sudden pressure: in whole upper part of head.
Constriction: in upper part of head; of chest.
Tension: across upper part of chest; in bend of knees.
Heaviness: in head; in nostrils; in chest; of hands and feet; of arms; in thighs and knee joints; of limbs.
Distressing oppression: in upper part of chest.
Weakness: in chest; of body and limbs; in nape of neck; of arms; in larynx and chest.
Stuffed feeling: in nostrils.
Empty feeling: in epigastrium.
Gone feeling: in chest; in epigastrium; in pit of stomach.
Dryness: in throat; in trachea.
Pleasant lightness: by drawing a long breath.
Insupportable restlessness: of all the limbs.
Fulness: in abdomen.
Itching tickling: in chest.
Coldness: of hands and feet.

" **Touch. Passive Motion. Injuries.** Touch: malar bone painful; stomach sore; slight, causes feeling of subcutaneous ulceration; soreness of abdomen <; pain through hips <.

Pressure: headache > for a time; cardialgia; pains go to navel, are > by hard pressure; epigastrium >; on stomach >; hæmatemesis >; hard >, colic; stitches in abdomen <.

Google

Must loosen dress: weakness in chest.
Lying across something hard: abdomen more comfortable.

47 **Stages of Life, Constitution.** Child, æt. 4 months; hernia.
Girl, æt. 15; phthisis.
Girl, æt. 18, weak, poorly nourished, suffering ten weeks; cough.
Girl, æt. 18, of remarkable beauty, somewhat scrofulous in early childhood, temperament lively and cheerful, after a violent shock; neuralgia.
Miss W. P., æt. 18, plump, healthy, active; solar neuralgia.
Mr. M. E., æt. 22, hardy, active, muscular, accustomed to outdoor exercise; solar neuralgia.
Man, æt. 25, kicked by a horse in region of spleen thirteen years ago, since then suffering; colic.
Man, æt. 25, just recovered from typhoid fever, after a cold; affection of larynx.
Man, æt. 27; cough.
Lady, æt. 30, good constitution, somewhat reduced by the exhausting mode of life peculiar to St. Petersburg, and by domestic troubles; headache.
Man, æt. 30, bottlemaker; headache.
Man, æt. 30, for several years had cough; phthisis.
Man, æt. 32, ill two years; phthisis.
Woman, æt. 36, single, five months ago had severe catarrh of chest; phthisis.
Woman, æt. 36, for several years had cough in Spring and Autumn; phthisis.
Man, æt. 36; phthisis.
Mrs. ——, æt. 37, spare, brunette, suffering many years; asthma.
Man, æt. 37, ill two years; phthisis.
Mr. E. J., æt. 38, fleshy, hearty, plethoric; solar neuralgia.
Mrs. ——, æt. 39, four months pregnant; disorders of pregnancy.
Man, æt. 40, suffering fifteen months; asthma.
Woman, æt. 40, nurse, suffering several weeks; headache.
Mrs. W. S., æt. 42, somewhat broken down by other diseases, suffering many days; solar neuralgia.
Man, æt. 45, large frame, six feet high; solar neuralgia.
Man, æt. 50, tall, thin; phthisis.
Man, æt, 50, powerful, after a violent fright; neuralgia.
Lady, æt. 50, formerly always healthy, suffering since climaxis with supposed disease of liver; intercostal neuralgia.
Woman, æt. 53, single, weak, irritable, after la grippe; phthisis.
Man, æt. 54, had itch, in consequence of much scratching foot became ulcerated, for five years was subjected to

Google

heroic treatment, and constitution was finally completely ruined, had many digestive disturbances, jaundice, dyspnœa, etc.; affection of larynx simulating phthisis.

Woman, æt. 59, several years ago had pneumonia, since then suffering; affection of chest.

Woman, rather stout, sanguine bilious temperament, lost her husband a few months previously, after having a scrofulous tumor discussed from neck by iodine; phthisis.

PREFACE.

AT last the TENTH and final volume of *The Guiding Symptoms* is completed, and the promise made to Dr. Hering, shortly before his death, and subsequently to the homœopathic profession, that the literary executors would finish the colossal work, is fulfilled. Too much cannot be said in praise of the assiduity and faithfulness of Drs. Raue, Knerr and Mohr in the execution of their editorial labors, covering a period of nearly a dozen years. And to Walter E. Hering belongs the credit of furnishing the means for the mechanical execution of his father's *chef-d'œuvre*.

It now remains for the homœopathic profession, for whose weal the genius and fifty years' labor of Dr. Constantine Hering were ungrudgingly given, to receive the completed work, and use it, as intended by its projector, for the healing of the nations.

THERESE HERING.

PHILADELPHIA, *October* 31, 1891.

GUIDING SYMPTOMS

OF OUR

MATERIA MEDICA.

STAPHISAGRIA.

Stavesacre. *Ranunculaceæ.*

A native of the south of Europe.

The alcoholic solution is prepared from the ripe seed.

Introduced by Hahnemann, and proved by himself, Cubitz, Franz, Gross, Gutmann, Hartmann, Hornburg, Haynel, Hermann, Kummer, Langhammer, Stapf, and Teuthorn, Arzneimittellehre, vol. 5, p. 291.

CLINICAL AUTHORITIES.—*Mental disturbance*, Lippe, Org., vol. 1, p. 269; *Want of memory*, Neidhard, B. J. H., vol. 27, p. 554; *Brain-fag*, Kent, Hom. Phys., vol. 6, p. 317; *Tinea capitis*, Bell, Org., vol. 3, p. 373; Adams, Org., vol. 3, p. 361; *Scald-head*, McNeil, Org., vol. 2, p. 382; *Tinea capitis, and blepharitis marginalis*, Way, Hah. Mo., vol. 15, p. 86; *Syphilitic iritis*, Bacon, Norton's Ophth. Therap., p. 172; *Laceration of cornea*, Gilchrist, M. I., vol. 2, p. 659; *Affection of eye*, Berridge, N. A. J. H., vol. 22, p. 194; *Hordeolum*, Tietze, Rück. Kl. Erf., vol. 1, p. 242; Ostrom, Org., vol. 3, p. 204; *Chalazion*, Lorbacher, A. H. Z., vol. 94, p. 100; *Steatoma of eyelid*, Koch, A. J. H. M. M., vol. 2, p. 221; *Tumors of eyelid* (2 cases), Allen, Am. Hom., Aug., 1878, p. 75; Allen, Org., vol. 2, p. 131; *Affection of eyelids*, Nash, Org., vol. 2, p. 220; *Prosopalgia*, Neumann, Rück. Kl. Erf., vol. 1, p. 433; Bayes, A. H. Z., vol. 112, p. 181; *Caries of lower jaw*, Lentin, A. H. Z., vol. 112, p. 181; *Toothache*, Clarke, Hom. World, Oct., 1889; *Vascular tumor of gums*, Fauconnier, H. M., vol. 13, p. 318; *Stomacace*, Rummel, Rück. Kl. Erf., vol. 1, p. 512; *Affections of tonsils*, Hirsch, Hendrichs, Rück. Kl. ' **Mind.** ❙Want of memory: with heavy weight between eyes; a few minutes after reading anything, the sense escapes him, and he is scarcely able to recall it after long reflection.

❙❙Indifference, low-spirited, dulness of mind; after onanism.

❙Listless, sad, dreaming of the future.

❙Sad distressing thoughts about one's illness.

❙Aversion to mental or physical labor; inability to think.

❙Hypochondriasis; apathy; weak memory; caused by unmerited insults, sexual excesses, or by persistently dwelling on sexual subjects.

❙Suffering from pride, envy or chagrin.

❙Fretful peevishness, with excessive ill-humor.

❙Very sensitive to least impression; least word that seems wrong hurts her very much.

❙❙Children are ill-humored, and cry for things, which, after getting, they petulantly push or throw away; < early in morning.

❙❙Great indignation about things done by others or by himself; grieves about consequences.

❙❙Ailments from indignation and vexation, or reserved displeasure; sleeplessness.

❙Continual concern about the future.

❙❙Brain-tire, with great genital weakness; irritability, inability to sustain a mental effort; was insulted, being too dignified to fight, subdued his wrath and went home sick, trembling and exhausted.

❙❙For sixteen years attacks of mental disturbance, every four years, beginning on the 4th of January, always lasting two months; great restlessness, would go about house in search of something, not knowing what, but if attracted by any object, would put it in his pocket if

Digitized by Google

possible, and, if not, would hide it in his coat; excessive loquaciousness; inability to read, on account of letters running together; firmly believed he would lose his fortune, constantly told his wife to be careful that they did not starve; thinks his wife will run away from him; sleep greatly disturbed, lies down a few moments, and suddenly jumps from bed to middle of room, stands there about a minute, scratches his head, and looks about as if a new idea had struck him; constant chilliness, sits by fire for hours without getting warm, amuses himself by throwing into the fire any article near at hand, regardless of value; at times more violent, strikes at any one coming near him, although he is conscious something is the matter with him, and tells his wife he will try not to kill any one; great thirst; canine hunger, eats anything set before him, complete loss of taste; general appearance is marked by extreme nervous excitement; face wears an anxious expression; shuffling gait; hands tremble, cannot retain anything in their grasp, not even long enough to drink water without spilling it; all symptoms < about midnight; in intervals between attacks, feeling of pressure over nape of neck; at times this disappears, and is followed by a throbbing sensation, and a rush of blood to crown of head; vertigo, especially when walking in open air; from slightest gust of wind legs feel as if they were going out from under him, and that he will fall backward.

Sensorium. Dull feeling of head, with inability to perform any mental labor.

Heaviness of head, > by resting it upon hand.

Vertigo: only in room, as if stupefied, particularly when sitting, diminished by walking about; on stooping and turning head rapidly.

Inner Head. Dull feeling in head, with inability to perform any mental labor.

Sensation of a round ball in forehead, sitting firmly there even when shaking head.

Pressive stupefying headache, especially in forehead, < on moving head and while standing.

Sensation as if head would burst, especially in forehead and when stooping.

Headache as if brain were compressed, mostly in forehead, with paroxysms of roaring in ears, which ceases much sooner than headache.

Dulness of head, anteriorly in middle of forehead, in a small spot as large as tip of finger; had to be very careful when walking in street, did not know whether he was going to the r. or left.

Digitized by Google

‖Hard pressure in r. side of forehead.
A pressing boring stitch, lasting for a minute, in morning, from within outward, in l. half of forehead, so violent that it awoke him twice.
Hard pressure in head in region of r. temporal bone and on vertex.
Sharp, burning, needlelike stitches in. l. temple.
‖Dull stitches in r. temple, internally and externally, as if bones would be pressed out, < by touch.
‖Brain aches, as if torn to pieces, morning on rising from bed, < from motion, > from rest and warmth; headache passes off with much yawning.
‖Sharp, burning, needlelike stitches in l. temple.
Dull stitches in r. temple, < from touch.
‖Feeling in occiput as if hollow, or as if brain were not large enough for the space.
Feeling as if occiput were compressed internally and externally.
‖Neuralgia of scalp, in a literary man, who had taken mercury and was debilitated; pain < by excitement, worry, mental work, pressure of hat, and change of air; > by quiet, solitude, rest and a warm room; pain dull and stupefying, producing a muddled feeling in brain, or as if a hard substance were pressing on skull; all mental work was a trouble to him; could not find right word, and ideas were slow in coming.

'**Outer Head.** ‖Painful drawing in several places in head, externally; < by touch.
‖Itching on scalp which was scurfy and moist.
Fine burning needle stitches externally on vertex.
Itching biting on scalp; < by rubbing; lasting several days.
‖Biting itching on upper part of occiput; with sore pain; recurring in same place about same time in evening.
‖Humid, itching, fetid eruption on occiput, sides of head and behind ears; scratching changes place of itching, but increases oozing.
‖Chronic tinea capitis sicca; whole hairy scalp covered with a dark scaly eruption, thickest at occiput, gradually thinning out till it reaches line of hair on forehead; violent itching, < at occiput; scratching causes bleeding and discharge of clear, non-glutinous fluid, which dries very quickly; hair is rapidly disappearing; accumulated scales at thickest part, about on a line with mastoid process, measure a quarter of an inch in thickness; the head is generally washed with soap and water daily, detaching all scales and leaving scalp red and moist; after washing there is a feeling of tension over whole scalp,

Digitized by Google

very disagreeable, and particularly so around occiput, where it is actually painful; marginal blepharitis and ectropion of l. eye.

‖ Purulent scald-head on occiput, with sour stinking smell, pediculi capitis, and itching preventing sleep.

‖ Crusta lactea; crusts from under which oozes a yellowish excoriating discharge; small vesicles form where crusts have been removed, soon burst and discharge a yellowish corrosive fluid.

▮ Painful sensitiveness of scalp, skin peels off, with itching and smarting, < in evening and from getting warm.

▮ Hair falls off, mostly from occiput and around ears, with humid, fetid eruption, or dandruff on scalp.

▮ Pressing, stinging and tearing pains in bones and in periosteum on cranium; swelling and suppuration of bones (caries), with putrid-smelling sweat, day and night; < from motion and contact.

▮ Burning stinging on head, mostly on l. temple; < from heat of bed, at 3 P.M., and when lying on it.

[5] **Sight and Eyes.** ‖ On looking at sun, hot water runs out of l. eye, scalding cheek and making eye smart.

▮ Dimness of sight, scintillations or flames before eyes, especially at night; halos around candle.

The eyes lie excessively deep, with blue raised rings around them, as after great excesses.

Pupils dilated.

‖ Syphilitic iritis, with bursting pain in eyeball, temple, and side of face, < from evening to morning, and upon using eyes by any light.

‖ Laceration of cornea, with prolapse of iris, in a man, æt. 25, who was struck by a chip while chopping, tearing cornea from below upward. (*Acon.* 30, followed by *Staphis.* 2c.)

▮ Lacerated or incised wounds of cornea; after operation for cataract.

▮ Dryness of eyes: in morning on waking; in evening, with sensation of pressure.

▮ Arthritic ophthalmia, pains extending to teeth; eyes burn on least exertion, as if very dry, yet lachrymation is constant.

▮ Sympathetic forms of chronic conjunctival catarrh, with inflammation of meibomian or ciliary glands.

Pain as if a hard substance were lying beneath l. upper lid.

Pressure in upper lid, < on closing eye.

‖ Itching of margins of lids.

‖ Anchylosis, every month before full moon, leaving a small, hard tumor; tensive pains from eye to teeth and

Digitized by Google

cheek, aggravated at night, with headache, sneezing, coryza, etc.

▮Dryness of margin of lids, with hard nodules on borders, and destruction of hair follicles.

▮▮Blepharitis, margins of lids dry, with hardened styes, or tarsal tumors.

▮▮Left upper tarsal edge itches; > by rubbing.

▮▮Styes, nodosities, chalazæ on eyelids, one after another, sometimes ulcerating.

▮Steatoma on conjunctiva palpebrarum.

▮Polypi of conjunctiva.

▮▮For eight months, styes on l. upper eyelid; severe pain; pain confining her to a dark room, and usually to bed; > from application of cold water; thick, creamy, mild leucorrhœa.

▮▮Eyelids ulcerated and covered with styes and nodosities, look like a mass of corruption; many sore places and ulcerated spots on face.

▮▮Mrs. B., æt. 32, six years ago had a steatoma cut out as large as a pea, on l. upper lid; two years ago had another on lower lid of same side similarly removed; a third on same place, size of a lentil, situated on conjunctiva palpebrarum; itching.

▮▮Steatoma of upper lid as large as a large bean, growing for years; had one removed by knife only to make room for present one, much larger than first.

▮Stye does not suppurate and break, but remains a hard nodule.

[6] **Hearing and Ears.** Ringing in ears on moving head; reports in ears; sensation as if wind blew into them.

▮Hardness of hearing, with swelling of tonsils, especially after abuse of mercury.

▮Stitches in ears.

[7] **Smell and Nose.** Scratching in choanæ.

Ulceration of nostrils, with scabs deep in nose.

▮▮Frequent sneezing, without coryza.

Coryza; at first discharge of thick mucus, afterward of thin water.

▮Violent coryza, one nostril stuffed up, much sneezing and lachrymation; nasal voice.

[8] **Upper Face.** ▮Countenance sunken, nose peaked, eyes sunken, with blue margins around them.

▮Brown and blue color of face, when getting angry.

Sharp burning stitches in l. cheek, which provoke scratching.

▮▮Prosopalgia in an old lady, made life unendurable; on touching spoon or fork to lips inexpressible pains shot from lips over face; fluid food had to be eaten with fingers, could take no solid food, mastication impossible.

Digitized by Google

‖Tearing pain beginning in a carious tooth of l. upper jaw, and extending through all upper teeth of that side; pain in l. cheek; pain most severe in pes anserina, < from touch; when very severe, pain extends behind l. ear and into l. arm; sensation as if cheek were swollen; spasm of œsophagus; griping in abdomen; spasmodic weeping; oppressed breathing; cold hands; cold sweat on face. θProsopalgia.

‖Pressing and beating pain extending from decayed tooth to eye; < from pressure or from contact of a metallic substance, > from heavy pressure; pains stitching, burning, drawing, cutting, with sensation of swelling of affected side.

‖Inflammation of bones of face.

‖A boy æt. 3 months, with lichen, or a dry, itchy, pimply eruption over face and behind ears, skin rough, free from natural color and moisture, due to subcutaneous effusions of plastic lymph.

‖Serpiginous ulcer, with excruciating pain.

[9] **Lower Face.** Lips full of ulcers and scurfs, with burning pains.

Easy dislocation of jaw.

Painfulness of submaxillary glands, with or without swelling.

Induration like a cartilage, as large as a hazelnut, as if the glands were swollen beneath the chin anteriorly by the symphysis, with a hard pressive pain, when swallowing or when touched, or when rubbed by the neckband.

‖Caries of lower jaw, following osteitis, latter being brought about by injury to jaw bone during extraction of a carious tooth.

[10] **Teeth and Gums.** Black, crumbling, carious, exfoliate; very sensitive to touch and to cold drinks.

‖‖Teeth turn black, or show dark streaks; gums ache.

A piece scales off from posterior surface of an incisor.

Pain in a hollow tooth, always after eating, a biting drawing (in incisors a pressure) excessively < in open air, even while mouth is closed, gradually ceased in house.

Hollow teeth sensitive to slightest touch, if after eating slightest food remains in cavities, a violent pain extends into roots, gum becomes painfully sore.

Cold drinks seem to penetrate teeth, as if they were hollow.

Piercing-drawing in carious tooth and in corresponding one on other side in morning.

Tickling-sticking in back teeth of r. lower jaw.

Digitized by Google

‖‖Toothache: in decayed teeth; in roots of teeth; in a whole row of teeth; during menses; gnawing tearing; shooting into ear, throbbing in temples; < from cold drinks and touch, not from biting on teeth; < from drawing in cold air, < after eating.

‖Gums: spongy, fall away from teeth, or present fistulous-looking ulcers; pale, white, ulcerated and swollen; aching when touched; bleed when pressed upon and on cleaning teeth, burning-swelling with heat in cheek; fungous excrescences; nodosities.

‖‖Toothache for three days and nights; pain gnawing and jumping, affected l. upper bicuspid; palate swollen, but apparently no abscess, tooth not decayed; pain < when tooth is touched, especially by hot things; also < out of doors, or drawing cold air into mouth, and at night.

‖‖A woman, æt. 32, had upon gum of upper jaw, before and behind, two central incisors, a vascular tumor size of a hazelnut; upper lip swollen and pushed out; tumor movable, general condition good; salivation so abundant patient is obliged to have constant recourse to handkerchief; tumor excised, in consequence a violent hemorrhage, yielding only to cautery; some time afterward tumor recurred, and was cured by *Staph.* 30.

‖Fistula dentalis.

‖Dentition: child very sensitive to mental or physical impressions; winces and shrinks from every wry look or harsh word, and cries from least pain; pale white appearance of gums, which are tender to touch; pot-bellied children; frequent desire for stool, not relieved even by a free evacuation; moist scald-head, with yellow scabs, offensive; teeth decay as soon as they are cut.

[11] **Taste and Tongue.** Taste: flat; of food, bitter.

‖‖Glossitis; mercurialized cases; pain excessive, patients frantic; beg to be killed, etherized or narcotized, as they cannot live in such agony; threatened ulceration, or deep, foul, painful, sloughing ulcers.

‖Ulcerations or numerous vesicles in mouth or on tongue; swelling of glands of neck and of follicles under tongue.

[12] **Inner Mouth.** Constant accumulation of saliva.

Painful excrescence on inside of cheek.

‖Mouth and tongue ulcerated and covered with blisters; discharge of saliva, at times bloody; fetid breath; sickly complexion, with sunken cheeks; hollow eyes with blue rings; swelling of cervical glands, and blisters under tongue. θStomatitis.

Digitized by Google

Thrush changing into canker sores, with a bluish-red or yellowish bottom; more or less flow of saliva and bad smell.

[15] **Throat.** Throat dry and rough, with soreness when talking and swallowing.

While talking she swallows continually.

Swelling of tonsils, also after abuse of mercury.

Induration of tonsils; hypertrophy of tonsils with nasal voice.

Chronic tonsillitis, tonsils are not large, but hard from previous attacks of acute tonsillitis, strumous diathesis, cross and irritable.

[14] **Appetite, Thirst. Desires, Aversions.** Extreme hunger, even when stomach is full; ravenous hunger for days.

Appetite for bread or milk.

Longing only for thin, fluid food (soup).

Great desire for wine, brandy or tobacco.

Want of thirst.

[15] **Eating and Drinking.** Child cries as soon as it eats.

After eating: cutting in abdomen; dysenteric stool; meat, cough worse.

After drinking: cutting in abdomen; dysenteric stool.

[16] **Hiccough, Belching, Nausea and Vomiting.** Frequent hiccough.

Belching makes a scratching in throat, irritable larynx, and then is followed by cough.

Bitter eructations after sour food.

Waterbrash.

Nausea from vertigo, as in seasickness.

[17] **Scrobiculum and Stomach.** Sensation as if stomach were hanging down, relaxed.

Cardialgia; aching and tensive pain in stomach, at times <, at other times >; after eating, especially bread, with frequent nausea and constipation; after indignation.

After becoming angry, trembling of whole body, oppression of chest and dyspnœa, so that he feared he would suffocate; pressure as of a heavy weight lying upon stomach, severe tension in epigastrium; nausea, and salty-bitter eructations; pains so severe that he wished death would relieve him.

[18] **Hypochondria.** Biliary colic, after domestic disturbances; after indignation.

[19] **Abdomen.** A feeling of weakness in abdomen, as if it would drop; wants to hold it up.

Hard painful pressure in r. side beneath umbilicus.

Griping pain, twisting about, here and there, in whole abdomen.

Spasmodic cutting in abdomen after eating and drinking.

Digitized by Google

Sufferings of pot-bellied children, with much colic and humid scald-head; pains caused by a fit of chagrin or indisposition of nurse; children in bad humor, cry for things, which, after getting, they petulantly push or throw away.

Colic: after indignation; after lithotomy; with urging to stool, or with urging to urinate and squeamishness, < after food or drink.

Incarceration of flatus in abdomen.

Painful swelling of inguinal glands.

Stitching toward l. groin and testicle, each dart or stitch followed by such itching that patient was compelled to scratch; darts and stitches began deep in flesh, and ended upon surface, point of ending being place that itched.

Eruption of pimples as large as peas over whole abdomen and thighs, which itch, and when scratched off are moist, but then have a burning pain.

[20] **Stool and Rectum.** Flatus: hot; smells like rotten eggs.

Stool: yellowish, slimy; mucous; hot; excoriating; bloody; offensive; smelling like rotten eggs; involuntary when passing flatus.

Diarrhœa: < after drinking cold water; < after eating; in children.

Before stool: cutting pain; urging.

During stool: tenesmus of bladder and rectum; discharge of hot flatus.

After stool: cutting pain; smarting in rectum; itching of anus.

Chronic diarrhœa, or even dysentery, of weak, sickly children; humid, fetid eruptions.

Dysenteric yellowish slimy stools, with much tenesmus, cutting colic, and general prostration.

After least food or drink, or after chagrin, griping and dysenteric stool.

Stool: retarded but soft; costive, with much urging; frequent enough, but hard and insufficient; inertia of rectum; impaction.

A fair-haired, delicate-looking girl is much troubled with constipation, bowels only act once a week; motions are hard, round, and dry, and come away like dog's feces.

Constipation with bad taste in mouth, pain in gums, irregular appetite; when *Mercur.* has been insufficient.

Itching in anus while sitting, when not at stool.

Hemorrhoids, with enlarged prostate; intense pain in back and through whole pelvis.

[21] **Urinary Organs.** Itching needlelike stitches in region of kidneys.

Google

Constant darting pain in region of l. kidney, < from cold, lying in cold bed, > from heat, when becoming warm in bed.

Urine scanty, dark, heavily loaded with mixed urates.

Pressure upon bladder.

Frequent urging to urinate, with a scanty discharge in a thin stream, or discharge of dark urine in drops.

Urging to urinate; scarcely a spoonful was passed, mostly of a dark yellow red color, in a thin stream; at times dribbling of urine, always followed by a sensation as if bladder were not yet empty,

Frequent urging to urinate in newly married people, especially the women; great irritability of bladder and urethra.

Involuntary discharge of urine, acrid and corroding, with burning; < from motion; constipation.

Straining or external pressure causes no discharge of urine; after difficult confinement.

Micturition copious and very frequent.

Profuse discharge of pale urine with urging.

Burning in urethra during and after urinating.

[22] **Male Sexual Organs.** Sexual desire excited.

Impotence.

Impotency with irritability of bladder and urethra, brought on by sexual excess.

Effects of onanism or sexual excesses; loss of memory; hypochondriasis; taciturnity; face sunken; abashed look; nocturnal emissions; backache; weak legs; relaxed organs; deficiency of vital heat and tendency to take cold; deep-sunken, red, and lustreless eyes; hair falls out; loss of prostatic fluid and impairment of sexual desire; dull and contusive pains in testicles; voluptuous itching of scrotum; atrophy of testicles.

Seminal emissions followed by great chagrin and mortification; prostration; dyspnœa.

A man, æt. 25, sanguine temperament, single, general health good; emissions followed by prostration; three succeeding nights profuse and sticky; spermatic cord full and knotty before emissions; r. testicle lower than l.; less fulness and no knots in cord after emission; shooting pains through r. testicle and up cord of that side; emissions take place before dawn, seldom waking him; subject to headache; restless, unrefreshing sleep; unpleasant dreams, in trouble, sees naked women; scrotal perspiration, with unpleasant, fleshy odor after sleep, not noticed during day; sticky smegma, not acrid; discontented, low-spirited (*Staphis.* controlled emissions, *Selenium* cured).

Google

Chronic prostatitis in old men; pain extending from anus along urethra, coming on after walking or riding, with frequent micturition by day, urine passing in small quantities, with dribbling afterward.

Pressive pain in l. testicle while walking, also after rubbing; still more violent when touched.

Stitching toward l. groin and testicle, each dart or stitch followed by such itching that he was compelled to scratch; darts and stitches began deep in flesh and ended upon surface, point of ending being place that itched.

Testicles inflamed, with burning, stinging, pressing and drawing pains; shooting and drawing in cords; r. testicle feels as if compressed.

Atrophy of testicle in a man, æt. 50, of robust constitution; about twenty-five years ago had mumps on l. side; on exposure to cold, l. testicle began to swell until it nearly reached size of a goose-egg; as swelling receded testicle dwindled down to size of little finger, very soft and flabby; nearly ever since he has suffered from an aching pain in it, especially on outer side; great sensitiveness to touch; pain more violent after touching it, or after any friction, with sharp shooting pain up cord into abdomen; walking upon frozen ground causes uneasiness; at times so sensitive at night, he cannot sleep without keeping his knees widely separated; there does not seem to be any inflammation in it; unpleasant sensation in cerebellum, can hardly describe it, extends from occipital protuberance to l. ear, seems as if it were hollow, yet there is a dull ache, a feeling as if brain were not large enough to fill space; when he happens to hurt testicle, head trouble is $<$; region of head alluded to is sensitive to pressure; $>$ after sexual intercourse; at times thoughtful; if reading, and some one calls his attention suddenly, he forgets where he was reading and what about; scrotum on that side contracts, itches, and he has often to pinch and rub it between thumb and finger.

Atrophy of testicles.

Soft, humid excrescences on and behind the corona glandis.

Large, easily-bleeding lardaceous ulcer on penis; condylomata about anus, and erosion like a chronic eczema, with profuse discharge of offensive-smelling serum; burning, twitching, stitching pains, $<$ to an intolerable degree during stool, and allowing him no rest.

Mercurial syphilis; dry, pediculated fig-warts, and mucous tubercles; nervous weakness.

Google

[23] **Female Sexual Organs.** ‖Nymphomania, with extreme sensitiveness to mental and physical impressions; mind has been dwelling too much on sexual subjects.
‖Very sharp shooting pains in ovary, which is exquisitely sensitive to pressure; pains extending into crural region and thighs.
Flow of blood from genitals, a long time after critical age.
‖Menses: irregular, late and profuse; sometimes wanting; first of pale blood, then dark and clotted; occasionally spasmodic uterine contractions.
Amenorrhœa in consequence of chagrin with severe indignation.
‖Scorbutic diathesis, granular vegetations of vagina.
‖Painful sensitiveness of sexual organs, especially when sitting.
‖ Spasmodic pains in vulva and vagina.
‖Stinging itching of vulva.
‖Prurigo senilis, or from parasites.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Feeble voice from weakness of vocal organs, after anger.
‖Hoarseness, with much tenacious mucus in larynx and chest.
Nasal voice from stoppage of posterior nares.
While talking she swallows continually.
‖Rawness in larynx from talking.
‖Sensation of constriction and pressure in throat pit after anger, < when swallowing.

[26] **Respiration.** ‖Dyspnœa: with constriction; after seminal emissions; toward end of coition.
Shortness of breath from fulness and constriction in hypochondria and upper portion of abdomen.

[27] **Cough.** ‖Cough: spasmodic, hollow, with expectoration of yellow, tough, purulent mucus at night; only during day; after vexation or indignation; < after eating meat; excited by cleaning teeth.
‖Sputum loosened at night and generally swallowed.
‖Croupy cough in Winter, alternating with sciatica in Summer; cough drove him out of bed compelling him to sit up all night, could not breathe while lying down, sensation as if something were loose in pit of stomach, like loose flesh, that pulled every time he coughed; cough excited by tobacco smoke.

[28] **Inner Chest and Lungs.** ‖Soreness and rawness in chest, especially when coughing.
Sticking itching between costal cartilages.
Sharp stitches with intermissions of several seconds, in region of fourth costal cartilage of r. and l. sides; they

slowly penetrate from within outward, without affecting inspiration or expiration.

Fine itching sharp stitches, which provoke scratching in upper part of sternum, just beneath pit of throat.

‖Pain in muscles of chest, as if bruised, in morning when she moves in bed, and by day when she folds her arms; no sensitiveness to touch, and none in breathing.

‖Pain sometimes sticking, in and through diaphragm and lower part of chest, affecting her only on turning and rising in bed after waking in morning, especially when she goes to bed early, *i.e.*, has been lying a long time, and when stretching out arms in drawing for a long time during day.

Tightly adherent mucus in chest.

[29] **Heart, Pulse and Circulation.** ‖Palpitation: from least motion; from mental exertion; from music; after siesta; nervous; so marked it can be seen, shakes the whole body.

‖Stitching pains in heart, or region of heart, stopping breathing.

‖Trembling beating of heart.

Pulse frequent and small; often trembling.

[31] **Neck and Back.** Painful swelling of glands of throat, neck and axillæ.

‖Itching pimples on nape of neck.

‖Rheumatic drawing, pressure and tension in neck, with stiffness.

Pain as from a sprain in r. shoulder, only in motion.

Violent pressive pain in l. shoulder joint, not > by any motion.

Dull sticking pains in shoulder joint, < on touch and motion.

Itching stitches in both axillæ.

Pain in small of back as if broken to pieces, in morning in bed.

‖Pain in small of back as after overlifting; < at rest, at night and in morning, and when rising from a seat.

In small of back stitches and pain, as from a sprain, during rest, ceasing on walking.

All joints are stiff in morning on rising from bed, especially shoulders, and sacral and hip joints.

Violent stitches upward in back.

Suppurating swelling in psoas muscles.

[32] **Upper Limbs.** Paralytic pressure in both upper and forearms, < by motion and touch.

‖Herpes: with scabs on elbows; on hands.

‖Eruption of small pustules on arms and hands, gradually spreading, and exuding a yellowish corroding discharge; severe tensive burning pains.

Digitized by Google

‖Tetter on hands, itches in evening and burns after scratching.
‖Numbness in tips of fingers.
Sensation as if a hard skin were drawn over tips of fingers of l. hand; there is little feeling in them, and sensation of touch is suspended.
Paralytic drawing pain in first joints of fingers at union of metacarpal bones, < by motion.
Fine jerking tearing in muscles of several fingers and in thumb, especially in tips.
Deep burning itching, sharp, needlelike stitches in l. thumb, provokes scratching.
‖Osteitis of phalanges of fingers.
| |First phalanx of l. index finger affected; ulceration and swelling about joint.
Bones, especially of fingers, imperfectly developed.
‖Arthritic nodosities on fingers.

[33] **Lower Limbs.** | |Nates ache while sitting; pain extend sto small of back, sacrum and hip joint.
Sticking itching in gluteal muscles.
Pulsating in hip joint, as from beginning suppuration.
Aching pain around hip joint when walking and sitting.
Daily pains beginning at crest of ilium, r. side, extending backward and downward to thigh, < early morning, on rising or on sitting down, > standing and from warmth.
| |Exceedingly severe pain in r. leg, extending into genitals, particularly testicles; attacks followed by great prostration. θSciatica.
| |Morbus coxarius, with abscess in r. iliac region; temperature 103.2°, pulse 120; r. leg one-half inch shorter than l.; r. foot everted and gluteo-femoral crease on that side obliterated; limps in walking; night sweats; had a severe fall before present series of symptoms.
‖Crural neuralgia, stinging, stitching pains during movement.
| |Mrs. A., æt. 30, never pregnant; menses irregular, uncertain, always late, sometimes wanting, but profuse, continuing a week or longer, consisting at first of pale blood, which became dark and clotted; occasionally spasmodic uterine contractions; from ten days to two weeks previous to menses, sharp pains during motion, extending from point of egress of r. crural nerve on thigh down over inner surface of knee, to great toe; constant aching of limbs, with great heaviness during rest; after first sense of pain, paralysis of leg, till catamenia fully appeared, when it gradually became normal; dull aching of nates while sitting, extending to sacral and

Digitized by Google

hip joint regions and small of back; dull stitches during movement, and drawing sensation during rest, about knee and patella; paroxysms of stinging pain along fibula, near malleolus; sweat at night, great general prostration; sinking feeling in stomach and abdomen; complete amelioration of all pains during rest at night. θSciatica.

Aching in thighs, when walking.

Fine itching stitches in inner side of thigh provoke scratching.

‖Legs painfully weak, especially knees.

‖Stitches in knee and knee joint.

Drawing stitches in r. knee joint, < by motion.

Dull stitches in knee joint near patella; on touch stitches change to pressive pain.

Dull stitches in r. knee joint, immediately after rising in morning, < by motion.

‖Burning stitches on outer side beneath l. knee, at intervals.

‖Sensation of stiffness and contraction in hollows of knees; dribbling of urine.

Tearing pain in muscles of one or other leg, while standing and sitting.

Burning stitch in r. tibia during rest.

Sticking tearing in and beneath r. calf and above l. heel.

Sticking itching just above r. outer malleolus; provokes scratching but leaves no special sensation.

On putting foot to ground, pricking in balls of feet as if toes would be drawn down.

[31] **Limbs in General.** All the limbs are affected; everything is sore.

‖Osteitis of phalanges, with sweating and suppuration.

‖Arthritic nodosities of joints, especially of fingers.

‖Gout, rheumatic gout, and gouty nodosities, in corpulent men advanced in life, feeble pulse, palpitation, dyspnœa on exertion, pains in smaller joints of hands and feet, with much swelling and hardness; generally skin coaffection, alternating with pains in joints; soles of feet tender, knees weak.

‖Acute articular rheumatism of fast or debilitated men, with shifting pains.

[35] **Rest. Position. Motion.** Rest: aching of brain >; neuralgia of scalp >; pain in small of back <; drawing about knee and patella; burning stitch in r. tibia; great heaviness of limbs, and aching.

Lying: on head, stinging in head <; impossible to breathe; a long time, pain through diaphragm.

Resting head upon hand: heaviness of head >.

Digitized by Google

Sitting: vertigo <; itching in anus; painful sensitiveness of sexual organs; nates ache; aching around hip joints; pain from crest of ilium to thighs <; pain in muscles of legs.
Standing: pressive headache <; pain from crest of ilium to thighs >; pain in muscles of legs.
Stooping: vertigo; as if head would burst.
Turning or rising in bed: pain through diaphragm and lower part of chest; all joints are stiff.
Rising from a seat: pain in small of back <; pain from crest of ilium to thighs.
Motion: headache <; tearing pains in bones and periosteum; cranium <; head, ringing in ears; involuntary discharge of urine <; least, palpitation; pain in shoulder; pain in l. shoulder not >; pain in shoulder joint <; pressure in arms <; drawing pain in joints of fingers <; crural neuralgia; sharp pains before menses; dull stitches about knee; stitches in knee joint; sharp pains; chill.
Turning head rapidly: vertigo.
On putting foot to ground: pricking in balls of feet.
Walking: vertigo; vertigo >; pain from anus along urethra; pressive pain in testicle; pain in small of back ceased; aching pain around hip joint; aching in thighs; weakness of whole body; knees <.
Exercising: in open air, chill.
Riding: pain from anus along urethra.
Swallowing: pressure in throat pit <.

[36] **Nerves.** ▮Very sensitive to least impression, either mental or physical.
▮Neuralgia: facial; of shoulder joint and arms; crural; sharp pains during motion, aching of limbs with great heaviness during rest.
Weakness of whole body, especially knees, when walking.
Weariness and weakness, in morning.
Great weariness and sleeplessness; after eating feels the need of lying down.
Painfulness of whole body as if bruised, with an excessively weak sensation.
▮▮Nervous weakness; a feeling as if done up after much hard work.
Paralysis on one side, from anger.
Twitches at night.
▮▮Convulsions, with loss of consciousness, retraction of thumbs and foaming at mouth, brought on by domestic troubles (being unjustly accused of infidelity); intervals between fits from two to three days, at first, later a fit every month or two; duration of each attack in pro-

Digitized by Google

portion to free interval; from 1850 to 1865 was continually under allopathic treatment, without least benefit; in spite of her many years of sickness she still looked robust; neither cranium, spine nor any other part of her body showed anything remarkable, only her physiognomy was rather stupid and her intellectual faculties weak; she complained of loss of memory and impossibility to think.

[57] **Sleep.** Violent yawning, forces tears from eyes; as if he had not slept enough; with desire to stretch.

Amorous dreams with emissions.

Sleepy all day, awake all night, body aches all over.

Goes to sleep late: from crowding of ideas; because herpes or ulcers burn and itch.

Child wakes, pushes everything away and wants everybody to go away; restless at night, as from frightful dreams, calls for mother often.

[58] **Time.** Morning: child's ill-humor <; brain aches; dryness of eyes; piercing drawing in carious tooth; chest as if bruised; pain in small of back; all joints are stiff; pain from crest of ilium to thighs <; after rising stitches in knee joints; weariness and weakness; sleepy.

During day: fleshy odor about genitals not noticed; cough only; when folding arms chest as if bruised.

3 P.M.: stinging on head <; chill.

Day and night: putrid-smelling sweat.

Evening: sensitiveness of scalp; dryness and pressure of eyes; tetter on hands itches; chill, with heat.

From evening to morning: pain in eyeball, temple and side <; pains from eye to teeth <.

Night: scintillations before eyes <; toothache <; testicle very sensitive; expectoration of mucus with cough; pain in small of back <; sweat; sciatica, symptoms <; twitches; awake; restless; burning heat on hands and feet; fetid sweat.

Midnight: all symptoms <.

After 12 P.M.: external heat followed by chill.

[59] **Temperature and Weather.** Heat: pain in kidney <.

Hot things: touching teeth < pain.

Heat of bed: stinging on head <.

Warmth: sensitiveness of scalp <; pain from crest of ilium to thighs >.

Becoming warm in bed: pain in kidney >.

Warm room: neuralgia of scalp >.

In room: vertigo; warm, chill <.

Change of air: neuralgia of scalp <.

Open air: vertigo when walking; toothache <.

Slightest gust of wind: legs feel as if they were going out from under him.

Digitized by Google

Cold: pain in kidney <.
Cold bed: pain in kidney <
Cold air: drawing in, < toothache.
Application of cold water: pain in stye >.
Cold water: teeth and gums very sensitive.
Washing causes feeling of tension of scalp.
Winter: croupy cough.

[40] **Fever.** Chill: predominates; without thirst or subsequent heat; 3 P.M.; > exercising in open air; in evening, with heat in face; ascending from neck over head, or running down back; more in a warm room.

Heat: wants to uncover; thirst; external, after 12 P.M., followed by chill toward morning; burning at night, mostly on hands and feet.

Sweat: profuse; cold on forehead and feet; smelling like rotten eggs; with desire to uncover; at night, fetid.

Tertian fever, with symptoms of scurvy; constipation.

Before and after ague, ravenous hunger.

[41] **Attacks, Periodicity.** Alternate: croupy cough and sciatica.

Daily: pains from crest of ilium to thighs.

Nightly: twitching.

Same time in evening: biting itching on upper part of occiput.

Several days: itching biting on scalp.

For three days and nights: toothache.

For three successive nights: profuse emissions.

From two to three days: convulsions, later one fit every month or two.

Once a week: bowels act.

Every month before full moon: anchylosis.

For eight months: styes on upper eyelid.

Six years ago: had a steatoma cut out as large as a pea, two years ago had another cut out, then a third.

For sixteen years: attacks of mental disturbance every four years, beginning at 4th of January and lasting two months.

[42] **Locality and Direction.** Right: hard pressure of forehead; pressure in temporal region; dull stitches in temple; sticking in back teeth of lower jaw; painful pressure in side beneath umbilicus; shooting through testicle; testicle lower than l., feels as if compressed; pain in shoulder; from crest of ilium to thigh; abscess in iliac region; leg one-half inch shorter than l.; foot everted; severe pain in leg; from egress of crural nerve on thigh to knee and toe; stitches in knee joint; stitch in r. tibia; tearing in and beneath calf; sticking itching just above outer malleolus; boring stitch in tibia.

Google

Left: pressing stitch in half of forehead; stitches in temple; marginal blepharitis and ectropion of eye; burning stinging on temple; looking at sun hot water runs out of eye; as of a hard substance beneath upper lid; upper tarsal edge itches; styes on upper eyelid; burning stitches in cheek; tearing pain in upper jaw and in cheek; severe pain behind ear and into arm; toothache in upper bicuspid; stitching toward groin; pain in region of kidney; pressive pain in testicle; stitching toward groin and testicle; had mumps on side; testicle swelled; occipital protuberance to ear, as if it were hollow; pain in shoulder; as if a hard skin were drawn over tips of fingers; stitches in thumb; ulceration and swelling about joint of index finger; burning stitches beneath knee; tearing above heel.

From within outward: stitches in sides.

[42] **Sensations.** As if legs would go from under him; as if stupefied; as of a round ball in forehead; as if head would burst; as if brain were compressed; as if bones would be pressed out; brain as if torn to pieces; as if occiput were hollow; as if brain were not large enough for space; as if occiput were compressed internally and externally; as if hard substance were pressing on skull; as if eyes were very dry; as if a hard substance were lying beneath l. upper lid; as if wind blew into ears; as if cheek were swollen; as if glands beneath chin were swollen; as if teeth were hollow; as if stomach were hanging down; as of a heavy weight lying upon stomach; as if abdomen would drop; as if bladder were not yet empty; testicle feels as if compressed; as if something were loose in pit of stomach; as if chest were bruised; as if small of back were broken to pieces; as if a hard skin were drawn over tips of fingers of l. hand; as if toes would be drawn down; whole body as if bruised; as if done up after much hard work.

Pain: in a hollow tooth; in roots of teeth; in gums; from anus along urethra; in muscles of chest; in shoulder; in small of back; from nates to small of back, sacrum, hip joint; at crest of ilium; in smaller joints of hands and feet; in bones.

Inexpressible pain: shot from lips over face.

Intense pain: in back and through pelvis.

Violent pain: in teeth.

Severe pain: in styes; behind ear into arm; in r. leg to genitals.

Sharp pain: from point of egress of r. crural nerve on thigh down over inner surface of knee to great toe.

Stupefying pain: in head.

Digitized by Google

Cutting pain: in teeth; in abdomen.
Tearing pains: in bones of head; through upper teeth; in muscles of one or other leg.
Fine jerking tearing: in muscles of several fingers and in thumb.
Gnawing tearing: in teeth.
Sticking tearing: in and beneath r. calf and above l. heel.
Bursting pain: in eyeball, temple and sides of face.
Beating pain: from tooth to eye.
Shooting: pain from teeth into ear; through r. testicle and up cord; sharp, in ovary.
Throbbing: in temples.
Darting pain: in region of l. kidney.
Jumping pain: in teeth.
Spasmodic pains: in vulva and vagina.
Severe tensive, burning pains; in pustules on arms and hands.
Gnawing pain: in teeth.
Griping pain: in abdomen.
Stitching pain: in teeth; toward l. groin and testicle; in heart or region of heart; crural neuralgia.
Stitches: in ears; in region of fourth costal cartilage; in small of back; violent; in knee and knee joint.
Boring stitches: in r. tibia.
Pressing boring stitch: in forehead.
Drawing stitches: in r. knee joint.
Burning stitches: on outer side beneath l. knee; in r. tibia.
Sharp, burning, needlelike stitches: in l. temple; externally on vertex; in l. cheek; in l. thumb.
Fine itching sharp stitches: in upper part of sternum; in both axillæ.
Itching needlelike stitches: in region of kidneys; in inner side of thigh.
Dull stitches: in r. temple; in knee joint near patella.
Biting drawing: in hollow tooth.
Piercing drawing: in carious tooth.
Paralytic drawing pain: in first joints of fingers.
Drawing pain: in testicles.
Pressing pain: from teeth to eye; in induration beneath chin; in l. testicle; in l. shoulder joint.
Aching: in gums; in stomach; in l. testicle; in nates; around hip joint; of limbs; in thighs.
Tensive pains: from eye-teeth and cheeks; in stomach.
Contusive pain: in testicles.
Dull pain: in testicles.
Tickling sticking: in back teeth of lower jaw.
Sticking itching: between costal cartilages; in gluteal muscles; just above r. outer malleolus.

Digitized by Google

Burning stinging: on head.
Itching biting: on scalp; on upper part of occiput.
Burning itching: in l. thumb.
Stinging itching: of vulva.
Sticking pain: through diaphragm and lower part of chest; in shoulder joint.
Burning pain: in teeth; in testicles.
Stinging: in bones of head; in testicles; crural neuralgia; along fibula.
Smarting: of scalp; of eyes; in rectum; in ulcer.
Burning: in urethra; in ulcers.
Pricking: in balls of feet.
Rawness: in larynx; in chest.
Scratching: in choanæ; in throat.
Soreness: in chest.
Heat: in cheek; in face.
Painful drawing: in several places in head.
Rheumatic drawing: in neck.
Hard painful pressure: in abdomen.
Constriction: in throat pit; in hypochondria.
Tension: over whole scalp; in epigastrium; in neck.
Drawing: about knee and patella.
Pressing: in bones of head; in testicles; in neck.
Paralytic pressure: in both upper and forearms.
Pressure: over nape of neck; in r. side of forehead; in head; in upper lid; in incisors; upon bladder; in throat pit; in outer part of tibia.
Heavy weight: between eyes.
Heaviness: of head; in limbs.
Pulsating: in hip joints.
Dull feeling: of head.
Sensation of fatigue: in all joints.
Sinking feeling: in abdomen and stomach.
Unpleasant sensation: in cerebellum.
Muddled feeling: in brain.
Dryness: of eyes; of margins of lids.
Stiffness: in hollows of knees; in all joints.
Numbness: in tips of fingers.
Itching: on scalp; at occiput; in margins of lids; toward groin and testicle; of anus; of scrotum; of pimple on nape of neck; of tetter on hands; in ulcers.

"**Tissues.** Stiffness and sensation of fatigue in all joints, on motion.
Painful swelling of glands.
Swelling and suppuration of bones and of periosteum.
Arthritic nodosities on joints.
Large abdomen; voracious and canine hunger; swelling of submaxillary and cervical glands; frequent and con-

Digitized by Google

stant attacks of catarrh; unhealthy and readily ulcerating skin; fetid night sweats; frequent boils; teeth as they appear, turn dark or crumble; mouth aphthous, gums appearing pale, spongy and bleeding when touched; nostrils sore from catarrh; eyelids and corners of mouth ulcerated; colic after least food or drink; stools hot, smelling like rotten eggs or dysenteric; irritability. θAtrophy of children. θRachitis.

❙Mercurial bone diseases: pain in bones with a debilitated feeling in joints; swelling of bones; boring stitches in r. tibia; drawing, with pressure, in outer part of tibia; periostitis, and osteitis, running their course together, with very severe pains; scrofulous osteitis.

❙Caries, following syphilitic nodes, in broken-down patients; there is a painful ulcer, with scanty or watery discharges; bone is easily broken down under probe; skin for some distance around ulcer is dusky-red or brown, with vesicles or pin-holes discharging a watery fluid.

❙Scorbutic ulcers; itching and burning in ulcers; gnawing, jerking, tearing or shooting pains; pus excessive, acrid, ichorous and fetid, or scanty, < from touch and pressure.

❙Mechanical injuries from sharp, cutting instruments; after surgical operations, colic, f. i. lithotomy or ovariotomy.

❙Injuries caused by sharp, cutting instruments, glass, etc.

❙❙Incised wounds.

45 **Touch. Passive Motion. Injuries.** Touch: stitch in temple; drawing in head <; of spoon or fork to lips caused inexpressible pain; toothache <; pain in induration beneath chin; teeth and gums very sensitive; gums ache; pressive pain in testicle more violent; l. testicle very sensitive; pain in shoulder joint <; pressure in arms <; stitches turn to pressive pain in knee joint; gums bleed; ulcers <.

Contact: pains in bones and periosteum <.

Pressure: of hat, neuralgia of scalp <; toothache >; on gums causes bleeding; occipital protuberance to ear sensitive; ovary very sensitive; ulcers <.

Rubbing: itching biting on scalp <; itching of upper tarsal edge >; of neckband caused pain in induration; after, pressive pain in l. testicle.

Scratching: causes bleeding of scalp and discharge of non-glutinous fluid; tetter on hands burns; causes burning.

Lacerated or incised wounds.

After severe fall: morbus coxarius.

46 **Skin.** ❙Herpes: dry, with scabs on joints; chronic, with nightly twitching; burn after scratching.

Digitized by Google

Ulcers: in scurvy; mercurial; syphilitic.
Fig-warts: dry, pediculated; after abuse of mercury.
Eczema; yellow, acrid moisture oozes from under crusts; upon denuded surface new vesicles form which burst; by scratching one place itching ceases, but appears in another.
Whole body covered with pustules, spots, stripes and pimples; severe itching.
Itching or burning in ulcer; gnawing, jerking, shooting or tearing pains; smarting in ulcer; pus excessive, acrid, ichorous, and fetid or scanty.

47 **Stages of Life, Constitution.** Boy, æt. 3 months; lichen.
Girl, æt. 3; affection of finger.
Boy, æt. 12, slender build, light complexion, scrofulous; morbus coxarius.
Woman, æt. 23, moderately strong constitution, confined 6 months ago, labor very severe and instrumental, since then suffering; enuresis.
Man, æt. 25; laceration of cornea.
Mrs. T., æt. 25, suffering eight years; tinea capitis and inflammation of eyelids.
Mr. B., æt. 25, sanguine temperament, single, general health good; nocturnal emissions.
Woman, æt. 30, rheumatic; prosopalgia.
Mrs. A., æt. 30, never pregnant; crural neuralgia.
Man, æt. 32, of Irish parentage; mental disturbance.
Mrs. B., æt. 32; steatoma of eyelid.
Woman, æt. 32; tumor of gums.
Woman, æt. 36, suffering since last pregnancy, seven years ago; eruption on arms.
Man, æt. 44, formerly had frequent attacks of conjunctivitis; styes.
Man, æt. 50, robust constitution; atrophy of testicle.
Man, æt. 54, hotel-keeper, mild, amiable, blonde, sanguine sympathetic temperament, years ago supposed to be dying of consumption; cough.
Woman, æt. 60; convulsions.
Girl, fair hair, delicate-looking; constipation.
Young woman, tall and slender, dark complexion, mild and gentle disposition, suffering eight months; hordeolum.

[1] **Mind.** General confusion of ideas, inability to concentrate them.

Great desire to talk about anything and everything, does not care whether any one listens or not, she must talk; feels as if she cannot keep her tongue still.

[3] **Inner Head.** Dull sensation in head, with sharp darting pains through vertex, side of face and lower jaw.

Darting in temporal region.

Dull heavy pressure in forehead and root of nose, increasing during day.

Catarrhal headache before nasal discharge sets in.

Sick-headache; must lie down, < from light and noise; nausea and vomiting, nearly to faintness.

Headache, with severe pain in eyes, felt very sore on closing lids or turning eyeball.

[5] **Sight and Eyes.** Burning in eyelids, with soreness of ball on closing lids or turning eyes.

Profuse mild discharge; catarrhal conjunctivitis.

Digitized by Google

[7] **Smell and Nose.** ‖‖Constant need to blow nose, but no discharge results on account of dryness.

‖Excessive and painful dryness of mucous membrane; secretions dry rapidly, forming scabs difficult to dislodge. θInfluenza.

‖‖Nose is stuffed up, nasal secretion drying up so rapidly that it cannot be discharged.

‖‖Almost incessant sneezing, with a feeling of fulness in r. side of forehead, extending to root of nose, tingling in r. side of nose. θCoryza.

‖‖Desire to put finger in nose to clear out gluish secretion.

‖Acute coryza with fever.

‖Chronic catarrh of head.

‖Influenza: excessive and painful dryness of mucous membrane; secretions rapidly dried and formed scabby concretions, requiring great effort to discharge them; soft palate felt like dried leather, making deglutition painful; irritation in chest, more in evening and night.

‖‖Violent coryza, stuffed feeling at root of nose; feels well in morning, much < in afternoon, > in open air. θInfluenza.

‖‖Catarrh of head for four years; sneezing mornings with green discharge; frontal headache and epistaxis.

‖‖Obstruction of nose, blows to no purpose; interfered with breathing and changed his voice; < at night, depriving him of sleep; constant perspiration of hands so severe as to interfere with comfort; could not wear a pair of kid gloves a second time.

‖‖Chronic catarrh of fifteen years' standing; constantly blowing his nose, without secretion; dry scales frequently formed upon mucous surface, which not only added greatly to his misery, but also prevented his smoking with any degree of comfort on account of obstruction of breathing.

‖‖Constant desire to blow nose without discharge. θTertiary syphilis.

[8] **Upper Face.** Darting pains in side of face.

[9] **Lower Face.** Darting pains in lower jaw.

[13] **Throat.** ‖Excessive dryness of soft palate, feels like dried leather, causing painful deglutition.

‖Dropping of mucus from posterior nares, throat feels and looks raw.

‖‖Soreness of throat; coryza from slightest cold; subject to attacks for last ten to fifteen years.

[17] **Scrobiculum and Stomach.** ‖‖Severe pain from sternum to spinal column, and a feeling of rumbling, turning in stomach, as if full of yeast.

[18] **Hypochondria.** Dull pain in r. hypochondrium. θCatarrh.

Google

Full feeling in l. hypochondrium.

[19] **Abdomen.** Rumbling as if full of yeast, with severe pain from sternum to spine.

[20] **Stool and Rectum.** ‖Diarrhœa mucosa, and loose cough.

[25] **Voice and Larynx. Trachea and Bronchia.** ▮Tickling in larynx and bronchi causing cough.

Tickling in r. side of trachea below larynx.

▮Clergyman's sore throat, characterized by great dryness of mucous membranes.

‖For last twelve years, annual attack of hay catarrh; slight itching and tingling in anterior nares, followed immediately by paroxysms of sneezing, frequently repeated for first forty-eight hours; mucous membrane of nose reddened and swollen, highly hyperæmic; dull headache; stuffed up feeling in frontal sinuses; conjunctiva reddened, swollen, dry; pulse accelerated, temperature above normal; great thirst; during day profuse, thin, excoriating discharge from nose; burning lachrymation; hacking cough, preceded by tickling and burning in larynx; at night discharges almost cease, air passages become dry, paroxysms of sneezing more frequent, explosions seem to number more at each paroxysm, until sneezing and coughing are almost incessant; very little sleep until toward morning; when hyperæmia gradually subsides, air passages become moist, and at sunrise there is again a profuse discharge from eyes and nose, which is hot and excoriating, causing rawness and soreness of cheeks, borders of nose and upper lip; throat and mouth burn as if scalded, sneezing and coughing continue, and considerable thin, glairy expectoration is coughed up during day; at night dry stage again comes on, breathing is more labored and difficult, wheezing, whistling, sibilant sounds in chest, with rhonchus sufficiently to be heard across a large room; obliged to breathe with mouth open; drinks often but not in large quantities; becomes weak and irritable, is worn out with sneezing and coughing and for want of sleep; has a horror of night, for then he suffers most. θHay catarrh.

‖Severe catarrh of head, obliging him to keep his room for a week at a time; discharge of quantities of bloody pus from nose and throat; distressing cough and oppression of lungs, causing sensation of a hard mass collected in them; cough at first dry and hacking, from tickling in larynx, which finally extended to lungs; during day comparatively free from cough, but returned every evening about 6 o'clock, continued entire night, almost incessant; could not sleep or lie down; completely worn out.

Digitized by Google

[27] **Cough.** ‖Cough: dry, < evening and night, can neither sleep nor lie down; dry, noisy; severe, dry, racking, caused by tickling in r. side of trachea, below larynx; splitting frontal headache; loose morning, less free during day; pain l. side, below scapula; tickling in larynx and bronchi; incessant, wearing or racking, in consumptives; croupy; incessant, at night, comparatively free during day; hard, dry, barking; dry and noisy, spasmodic stage of whooping cough; causing splitting headache.

‖During or closely following influenza, incessant, short, dry, hacking cough; sputa scanty, whitish or frothy, or entirely absent; dull aching or heaviness in upper chest; frontal headache, < from coughing.

‖Cough, < night and morning; diarrhœa, pain before each passage, < in morning; emaciation; restless sleep on account of cough. θAfter measles.

‖After taking a severe cold, hard, racking cough, < at every inspiration; considerable oppression of chest.

‖Cough at first dry and hacking, from tickling in larynx, which finally extends to lungs.

‖Barking cough, like whooping cough, after catching cold.

[28] **Inner Chest and Lungs.** Oppression of chest and feeling of a hard mass there; hard, racking cough, excited by inspiration.

‖Sudden pain reaching through chest from sternum to spinal column; constant, < on movement; arms powerless from extreme pain, if an attempt was made to move them; difficult breathing and speaking.

‖A lady contracted a bad cold, characterized by a pulsation from r. side of sternum down to abdomen.

‖Every cold, damp spell brings on a cough, with expectoration of dark blood; loose cough in morning, expectoration less free during day; pain in l. side, below scapula; foul taste in mouth; tickling in larynx and bronchi; constipation; menses regular; nervous headache in temples; hæmoptysis three years ago.

[29] **Heart, Pulse and Circulation.** Dull, oppressive pain in cardiac region.

‖Attacks of great anxiety about heart; very nervous; has had much mental trouble; awakes at night with a strange sensation about heart, and for a few moments after feels as if she were floating in air.

[31] **Upper Limbs.** ‖Rheumatism in r. shoulder joint, deltoid and triceps, extending at times to forearm; commencing at night; arm nearly helpless, could not put on coat; during day lameness nearly disappears; no heat or swelling.

Digitized by Google

‖Rheumatism of wrist joints of three months' duration; wrists and hands swollen, little redness, very painful on moving.

[33] **Lower Limbs.** ‖General confusion of ideas; legs felt as if floating in air; she felt light and airy, staggering gait.

‖Rheumatism, larger joints principally affected; dull, heavy pains; no appetite; steak tastes like sand, or has no taste at all; restless at night, little or no sleep; weak, debilitated, general feeling of malaise; much pain in head, catarrhal.

‖Rheumatism in r. ankle joint, swollen and very painful; could not get about without help of cane.

‖Severe rheumatic inflammation of knee in a boy æt. 8; pain, soreness to touch, redness, followed by an effusion, patella being lifted up, with elastic swelling underneath and around.

‖Two years ago fell upon knee, which has since been painful and sensitive; several months after fall knee began slowly to swell until there was a large collection of fluid in patellar bursa; swelling about an inch and a half in diameter, and also projects forward about so much; distinct fluctuation. θBursitis.

‖Large swelling over r. patella; knee painful, especially in joint, which is very stiff, particularly after having sat a few minutes; must stretch leg, or get up and move about for relief; had applied some liniments, which were followed by aggravation. θBursitis.

‖‖Bursitis of knee joint, simple or diffused.

[34] **Limbs in General.** ‖Darting pains in arms, fingers, joints, thighs and toes.

‖Swelling and stiffness of hands and feet.

‖Heat, swelling and circumscribed redness of joints; subsequent synovitis with exudation of serum. θInflammatory rheumatism.

‖Rheumatism affecting knee, ankle, toes, wrists and fingers; on second day large collection of water in knee joint.

‖Sharp, darting, lancinating pain, first in knee joints, then in elbow and shoulder; finger-joints were next involved, gradually extended to every joint in body; intense pain in neck and head; joints swollen and stiff; cannot sleep for pain, can scarcely walk; of six months' duration. θRheumatism.

[35] **Rest. Position. Motion.** Lying down: limbs feel as if floating in air.

Motion: pain in chest <; of wrists, rheumatism <.

Must get up and move about for relief from pain in knee.

Turning eyeballs: eyes feel sore.

Digitized by Google

Attempt to move arms: they are powerless from excessive pain.

[36] **Nerves.** Legs as if floating in air; she felt light and airy, without any sensation of resting on bed.

‖General feeling of dulness and malaise, as when a catarrh is coming on.

‖Hysteria: after loss of blood; strange sensation about heart; ‖hysterical chorea; migraine; she has to lie down; light and noise aggravate; nausea and vomiting with faintness.

‖After severe hemorrhage from bowel controlled by *Hamam.:* could not sleep for over a week; as soon as night comes on feet and legs dance and jump around in spite of her, so that she is compelled to hold, or have them held to floor; on lying down, limbs feel as if floating in air; as light as feathers. θHysterical chorea.

[37] **Sleep.** ‖Sleeplessness: from nervousness; from cough; of children; after surgical operations, *e. g.*, setting fractured leg.

[38] **Time.** During day: pressure in forehead and nose <; profuse thin, excoriating discharge from nose; coughing up glairy mucus; comparatively free from cough; cough <; pain before each passage <; rheumatism of arms <.

Afternoon: influenza <.

Evening: irritation in chest <; cough <.

Night: irritation in chest <; obstruction of nose <; discharge almost ceases; dry stage of catarrh; incessant cough; awakes with strange sensation about heart; rheumatism of shoulder commences; restless; feet and legs dance and jump around.

[39] **Temperature and Weather.** Open air: influenza >.

[41] **Attacks, Periodicity.** Every evening about 6 o'clock: cough returned.

Second day after rheumatism: large collection of water in knee joint.

Three months: rheumatism of wrist joints.

Six months: rheumatism.

Two years ago: fell upon knee, swelling and painfulness.

For twelve years: annual attack of hay catarrh.

Fifteen-years' standing: chronic catarrh; attacks of coryza.

[42] **Locality and Direction.** Right: feeling of fulness in forehead; tingling in side of nose; dull pain in hypochondrium; tickling in side of trachea; pulsation from side of sternum down to abdomen; rheumatism of shoulder joint; rheumatism of ankle joint; large swelling over patella.

Left: full feeling in hypochondrium; pain below scapulæ; pain in side.

Digitized by Google

[46] **Sensations.** As if she cannot keep her tongue still; as if stomach were full of yeast; throat and mouth burn as if scalded; as of a hard mass collected in lungs; as if floating in air; legs as if floating in air.
Pain: l. side below scapula; in head.
Intense pain: in neck and head.
Severe pain: in eyes; from sternum to spinal column.
Splitting pain: in forehead.
Sharp darting pains: through vertex; side of face and lower jaw; in temporal region; in side of face; in lower jaw; in arms, fingers, joints, thighs and toes; in knee joints, then elbow and shoulder and finger joints.
Sudden pain: through chest, from sternum to spinal column.
Rheumatic pain: in r. shoulder joint, deltoid and triceps; of wrist joint.
Dull aching: in upper chest.
Dull oppressive pain: in cardiac region; in joints.
Dull pain: in r. hypochondrium.
Burning: in eyelids; in larynx; of mouth and throat.
Soreness: of eyeball; of throat; of cheeks; of nose and upper lip.
Tingling: in anterior nares; in r. side of nose.
Tickling: in larynx and bronchi; in r. side of trachea, below larynx.
Dryness: of nose; of soft palate; of mucous membranes.
Dull, heavy pressure: in forehead and root of nose.
Dull sensation: in head.
Strange sensation: about heart.
Pulsation: from r. side of sternum down to abdomen.
Stiffness: of hands and feet.
Heaviness: in upper chest.
Fulness: in side of forehead and root of nose.
Full feeling: in l. hypochondrium.
Stuffed feeling: in nose; in frontal sinuses.
Itching: in anterior nares.

[46] **Touch. Passive Motion. Injuries.** Touch: knee sore.
After a fall upon knee: swelling.

[47] **Stages of Life, Constitution.** Boy, æt. 4, after measles; cough.
Boy, æt. 7, after catching cold; cough.
Boy, æt. 7 to 8, had severe attack year before, followed by heart disease, was under treatment four months, present attack cured in nine days; rheumatism.
Boy, æt. 8; rheumatic bursitis.
Girl, æt. 10, nervous sanguine temperament, medium size, skin pale, transparent, freckled, hair auburn; rheumatism.

Digitized by Google

Boy, æt. 12, suffering four years; catarrh of head.
Girl, æt. 12, lively; influenza.
Girl, æt. 19, scrofulous, had hæmoptysis three years ago; cough.
Young lady, æt. 20, married, nervous sanguine temperament, slightly built, hair deep auburn, suffering six months; rheumatism.
Woman, æt. 30, after catching cold two or three weeks ago; pulsation in chest.
Woman, æt. 38, two years ago fell upon knee, since then suffering; bursitis.
Negro, æt. 38, suffering four weeks; bursitis.
Mrs. G., æt. about 40, suffering three months; rheumatism.
Mrs. F., æt. 40, after hemorrhage from bowels, which was arrested by *Hamam.*; chorea.
Woman, æt. 41; rheumatic pain in chest.
Man, æt. 45; rheumatism of arm.
Man, æt. 48; rheumatism.
Lady, æt. 50, nervous, has had much mental trouble; affection of heart.
Man, æt. 50, suffering six months; rheumatism.
Man, æt. 56; soreness of throat.
Farmer, æt. 58; hay fever.

[48] **Relations.** Compare: *Drosera*, *Nux vom*, *Rumex*, *Sambucus*, in catarrhs and coughs; *Act. rac.*, in rheumatism; *Asarum*, *Tarent.*, in nervous phenomena.

STILLINGIA SYLVATICA.

Cockup Hat, Queen's Root. *Euphorbiaceæ.*

Grows in pine barrens from Virginia to Florida.

The male and female flowers are distinct upon the same plant, they are yellow and grow in the form of a spike; the plant, if wounded, emits a milky juice.

Provings by Frost, Nichols, Eckles, Cunningham, Ingraham, Hale's New Rem., 2d ed.; Preston, Tr. Penn. Soc.; Taber, Lype, Ohio Med. and Surg. Rep., vol. 9.

CLINICAL AUTHORITIES.—*Laryngitis*, Hale, A. H. O., vol. 7, p. 537; *Bone pains*, Martin, T. H. M. S. Pa., 1870, p. 78; *Secondary syphilis*, McMechan, Hale, A. H. O., vol. 7, p. 31; Martin, Hah. Mo., vol. 6, p. 126; *Scrofulosis*, Hale, N. E. M. G., vol. 12, p. 445.

[1] **Mind.** Depression of spirits, gloomy forebodings.
‖Deplorably downhearted; suffering extreme torture from bone pains; immense nodes on head and legs; looks thin and miserable. θSecondary syphilis.

[2] **Sensorium.** Dizziness with throbbing in head.

[3] **Inner Head.** ‖Mercurial, syphilitic or catarrhal headaches.

[4] **Outer Head.** Persistent dull headache in vertex.
Dull heavy pain in r. side of head.
In frontal region a feeling as of a heavy substance pressing upon brain, becomes sharp and darting, almost unendurable.
Pains in head, with inflamed and watery eyes, and general soreness of muscles.
‖Bone swellings on head and forehead, on latter as large as a hen's egg.
‖Mercurial periostitis of skull. θSyphilis.

[5] **Sight and Eyes.** Eyes inflamed and watery, with severe headache and general muscular soreness, as if he had taken cold.

[6] **Hearing and Ears.** Burning in l. ear in evening; next morning a vesicular eruption.

[7] **Smell and Nose.** Catarrhal discharge from nose, at first watery, then muco-purulent, with soreness of mucous membrane, followed by a small abscess on inside of r. nostril.
‖Influenza.
‖Inflammation and necrosis of bones of nose.

[8] **Upper Face.** Stinging, darting pains in face, with frontal headache.

Digitized by Google

Pain under malar bone, extending transversely across face.

‖Periostitis of facial bones.

[10] **Teeth and Gums.** Paroxysms of neuralgic toothache.

[11] **Taste and Tongue.** Tongue coated: yellowish white; heavily; white; slightly, in morning.

Scalded sensation on tongue, with soreness in region of larynx.

[13] **Throat.** ‖Smarting, stinging, dryness and rawness of fauces.

Constriction of throat.

Slight inflammation of l. tonsil, lasting several days.

Burning in throat, with painful deglutition.

[18] **Hypochondria.** ‖Torpidity of liver, with jaundice and great depression of mind, with constipation.

[19] **Abdomen.** Colic, periodical.

[21] **Urinary Organs.** Dull pain in region of kidneys.

Incontinence of urine.

[22] **Male Sexual Organs.** Sharp pains in penis.

‖Violent smarting burning pains throughout entire length of urethra; difficult micturition.

While urinating has a sharp pain in glans penis, extending up urethra.

Pains in urethra so severe as to cause perspiration.

Urethral irritation and chordee.

‖Gonorrhœa; gleet.

‖Syphilis; primary, secondary and mercurial.

[24] **Female Sexual Organs.** ‖Copious muco-purulent leucorrhœa, with rheumatic pains.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Laryngitis, especially if syphilitic, with hoarseness and dry spasmodic cough, or it may be loose.

‖Hoarseness and chronic laryngeal affections of public speakers.

‖Croup.

Slight uneasiness and tickling in trachea and bronchi, < on rising in morning.

‖Tickling sensation in trachea toward evening, which caused a dry, spasmodic cough.

Dryness and soreness in region of larynx.

After exerting her voice unusually and catching cold, tickling in larynx, with loose cough; sensation of lameness in cartilages of larynx and trachea; constriction in region of larynx; bruised sore feeling in cartilages of larynx.

‖Bronchial troubles, asthma, whooping cough, etc.

[27] **Cough.** ‖Short hacking cough.

Toward evening, excessively dry, spasmodic cough, produced by a tickling in trachea.

Google

‖Cough deep and loose.
Short hacking cough with inflammation of fauces.

[28] **Inner Chest and Lungs.** Oppression of chest.
Darting pains in thorax, with tickling in throat, and short hacking cough.
Sharp, darting pains through chest and shoulders.
‖Incipient phthisis, in strumous habits.

[29] **Heart, Pulse and Circulation.** ‖Pulse weak and irregular.
Boring pains about region of heart, with irregular pulse and a feeling of distress.
Pulse about 90; weak and very irregular, except at times during day, when he has spells as if room were too warm, and pulse becomes regular, with general perspiration.

[30] **Upper Limbs.** Sharp shooting pains in both arms, from middle third of humerus down to fingers.
Sharp shooting pains in upper third and inner side of forearm.
‖Very large node upon olecranon.

[31] **Lower Limbs.** Aching pain in r. leg.
Pains in l. lower anterior third of leg.
‖Burning itching of legs.
‖Enlargement of tibia to such a degree as to deprive child of all power of motion; limbs contracted and swollen.
‖Ulcers on legs, venereal, chronic and indolent.
‖Periostitis and nodes of tibia.
‖Syphilitic and gonorrhœal sciatica; left-sided complaints.

[34] **Limbs in General.** In evening pains in r. elbow and leg, aching and pulsating, with soreness.

[37] **Sleep.** Unusual drowsiness all day, with general malaise and headache.
Very sleepy after eating.
Dull and sleepy.

[38] **Time.** Morning: after burning vesicular eruption, tongue slightly coated; slight tickling in trachea and bronchi < on rising.
During day: pulse 90, except at times when room seems too warm, then normal.
All day: drowsiness.
1 P.M.: fever; gets into heavy sleep.
Toward evening: tickling sensation in trachea; excessively dry spasmodic cough.
Evening: burning in l. ear; pain in elbow and leg; feverish heat.
At night: excessive warmth.

[39] **Temperature and Weather.** Warmth: itching of legs >.
Exposure to cold air: legs itch.

Digitized by Google

40 **Fever.** Cold on going to bed; immediately after, broke out in perspiration, with excessive warmth all night.
Feverish heat in evening.
Fever at 1 P.M.; gets into a heavy sleep.
" **Attacks, Periodicity.** Periodical: colic.
For six or eight weeks: itching of legs.
" **Locality and Direction.** Right: heavy pain in side of head; abscess on inside of nostril; aching in leg; pain in elbow and leg.
Left: burning in ear; slight inflammation of tonsil; pain in lower anterior third of leg; syphilitic complaints.
" **Sensations.** As of a heavy substance pressing upon brain; tongue as if scalded; as if room were too warm.
Pains: in head; under malar bone; in urethra; in lower anterior third of leg; in r. elbow and leg.
Sharp pain: in penis; in glans penis.
Sharp darting: in frontal region in face; in thorax; through chest and shoulders.
Sharp shooting pains: in both arms.
Violent burning pain: along urethra.
Boring pains: about region of heart.
Throbbing: in head.
Aching pain: in r. leg; in long bones.
Dull pain: in vertex; in r. side of head; in region of kidneys.
Burning: in l. ear; in throat.
Burning itching: of legs.
Stinging: in face; of fauces.
Smarting: of fauces; along urethra.
Soreness: of muscles; of mucous membrane; in region of larynx; in elbow and leg.
Rawness: of fauces.
Constriction: of throat; in region of larynx.
Lameness: in cartilages of larynx and trachea.
Tickling: in trachea and bronchi.
Dryness: of fauces; in region of larynx.
" **Tissues.** ‖Secondary syphilis; eruptions, bone affections; great depression of spirits; sciatica; patient is broken down, mercury cannot be used, iodide of potassium is useless.
‖Chronic periosteal rheumatism.
‖Distressing aching pains in long bones, with nodes. ℞Secondary syphilis.
‖Malaise, drowsiness, and feeling of distress.
‖Scrofulous periostitis.
‖Enlarged cervical glands; moist, brownish, excoriating eruption on scalp; muco-purulent discharge from nose, with excoriations of upper lip and alæ nasi; dull, pasty

complexion; capricious and unnatural appetites; tumid and enlarged abdomen; white, pasty stools, very fetid; dull, red, tubercular (or syphilitic) eruption on skin, ulcerating, and discharging a large quantity of unhealthy pus; tendency to laryngeal cough. θScrofulosis of children.

"**Skin.** ‖Pustular eruption on arm.

‖Ulcers, with unhealthy skin.

‖Scrofulous, venereal, and other skin diseases.

‖Chronic eruptions on hands and fingers.

Excessive itching of legs below knees, continuing six or eight weeks, but no eruption; this itching occurred only on exposure of parts to atmosphere or cold,‖ > by warmth and in bed.

Elephantiasis; lepra.

"**Relations.** It antidotes: *Mercur.*

Compare: *Staphis.* in bone affections; *Natrum sulph.* in sycosis.

STRAMONIUM.

Jamestown Weed, Thorn Apple. *Solonaceæ.*

The plant is found in vicinity of cultivation, on rank soil, where refuse is deposited, in all parts of the world.

The alcoholic tincture is prepared from the ripe seed, finely powdered.

Introduced by Hahnemann, proved by himself, Fr. Hahnemann and Franz, Reine Arzneimittelehre, vol. 3; Berridge, Mon. Hom. Rev., vol. 15, p. 298; vol. 16, p. 34; N. Am. Jour. of Hom., N. S., vol. 2, 1871, p. 62. Toxicological reports are numerous; see Allen's Encyclopedia, vol. 9, p. 175.

[1] **Mind.** Dulness of senses; before a rash.

Coma, spasms; later snoring, unconscious, jaw hangs, hands and feet twitch, eyes roll; pupils dilated; automatic grasping of hands toward nose, ears, etc.; difficult to swallow liquids.

Continual motions with hands and arms as if spinning or weaving; frequent lifting up head, red face, staring eyes, with large immovable pupils, constant murmuring, frequent sighing, total stupefaction of senses.

Semi-conscious; dilatation of pupils marked.

Consciousness totally lost; did not answer questions; stared around stupidly; pupils much dilated, insensible to light; signs of vertigo, aversion to fluids.

Face red; eyes uneasy, shining; pupils much dilated,

Digitized by Google

staring, immovable; drunken look; unconscious; disconnected talk; jumped up; restless; started; grasped about in air, catching at imaginary things, no fever; slow, tardy pulse; chills; perspired, skin warm; drink swallowed hastily.

‖Unconscious; snoring; lower jaw hanging down; twitches of hands and feet; rolling eyes; dilated, immovable pupils; automatic motions; grasping about with hands; skin cool; pulse somewhat frequent, single beats omit; greatest difficulty to swallow liquids.

Sat up in bed unconscious, continually babbling, occasionally starting up suddenly, his hands apparently directed to imaginary things in air; pulse very slow, no fever, intense thirst and violent sweat from incessant motion.

He was mute, did not move; pulseless; limbs lame for six or seven hours; lying without consciousness; after that tossed about in bed with great rage, made innumerable signs to those around him, which were not understood, and then became quiet again.

‖Unconscious and stupid: during chill; < in hot stage, sometimes during sweat; in typhus.

‖Stupor: weakened intellect; torpor and fits; extreme excitement of sexual parts, constipation; resembling highest state of intoxication from spirituous liquors.

‖Loss of memory.

‖Paroxysms of loss of memory, during which he recognizes neither persons nor objects; questions remain unanswered.

‖Memory confused; great restlessness; red face and staring eyes; sadness, weeping, thoughts of dying; stammering, gets words out with great difficulty; cold feet, restless sleep, with visions; fear of wild animals and black dogs.

‖Memory weak; loses thoughts before she can give them utterance; weeps about her weak mind. θAfter sunstroke.

Loss of recollection appears connected with an inward uneasiness and to proceed from it.

‖Does not recognize his friends and family, calling bystanders as if absent. θTyphus.

After awaking he recognizes nothing about him.

Recognizes no one, did not take any notice of loudest calling, moved her head constantly from one side to other; forehead covered with perspiration.

Does not recognize the one to whom he is speaking.

Does not seem to notice objects around him.

Calls things by wrong names, his boots logs of wood; his bedroom the stable, and this without knowing it.

Digitized by Google

No correct estimation of distance, or size of objects; reaching hands to catch hold of objects across room, and running against persons and things, which they appeared to view as distant.

During fever she cannot speak or reply to any question; shows with hands where pain is seated, and when writing down has to think what letters to use.

Uses wrong words in talking.

Desires to relate a story, but cannot connect a sentence; cannot find right words, and becomes displeased at this interruption.

Inability to give a proper answer, rapid change of ideas, so that he seldom completed a sentence, but, *e. g.*, united the half sentence of answer to a question addressed to a person not present.

Conversing in different languages. θTyphus.

Talking in Jewish jargon. θMania.

Tries to find right expression.

Dull, difficult thinking; cannot think clearly about anything; loses thoughts before she can give them utterance.

After getting out of bed, vertigo and loss of thought; everything hovers dimly and distantly before his memory, there seems to be a veil before his eyes.

Walks about room, absorbed in himself, with fixed, sparkling eyes, surrounded by blue circles, takes no notice of surrounding objects, is solely occupied with objects of his fancy.

Sits silent, with her eyes fixed on ground, as if absorbed in contemplation, while her hands are occupied in picking at her clothes.

Talks disconnected words in a high screaming voice.

Mind wandering, and unusual quick motions with eyes and hands.

Confusion of mind.

Wild thoughts when she is awake; frightful sensations, without perspiration.

Mental derangement; violent headache, followed by excessive delirium, loss of sight and hearing, striking about with hands and feet, excessive dilatation of pupils, slow pulse.

Mental derangement, with spasmodic symptoms, staring look, attempts to escape with shrieks, frightful visions, fever heat, redness of face, moist skin.

Aberration of mind; one carries home all sorts of wood, in order to manufacture brandy; another placed two axes across each other in order to split wood in this way; a third burrowed in ground like a pig with his mouth; a fourth alleged he was a wheelwright and

began to bore holes; a fifth ran into forge to catch fish, which he saw swimming there; a lacemaker threw about her bobbins incessantly, and threw everything into confusion; another girl ran about the room and cried out that all evil spirits were pursuing her.

Stares stupidly; looks vacantly around.

‖She feels dull; stupid in head, almost insensible and indifferent to everything and everybody.

Stupid, unable to articulate, with a certain peculiar wildness of countenance and flushed face, lying in bed.

‖Physiognomy expresses stupidity and perturbation; insensibility to mental impressions, with fixed, weeping eyes and enlarged pupils, hardly responding to irritation.

‖Stupid, after delirium.

He is like one enchanted and beside himself.

‖Ecstatic.

‖‖Alternations between exalted states and settled melancholy.

‖‖After spasms she fell into a trance, says she is under influence of spirits, and has had conversation with spirits, communications from God; delivers emphatic sermons, prophecies.

‖‖Very restless in evening in bed; converses with spirits who approach his bed, lays hold of a stick and strikes about him, to drive fiend who is after him from room; red face, glistening eyes, great thirst, distended abdomen and great sexual excitement.

The things and persons around him appear to be changed; although he knows that his friends are there he forgets it immediately afterward; imagines he is quite alone in a wilderness, abandoned; is afraid; animals jump suddenly out of ground sideways, so that he moved quickly to other side, where, however, others start up pursuing him, so that he runs forward.

‖‖Dreaming with open eyes. θTyphus.

‖Hallucinations which terrify patient; sees ghosts, hears voices back of his ear; sees strangers.

He thinks that he is dying and that he will not live over night, rejoices and gives directions about his funeral.

‖‖Believes to be in his grave; shrives, prays, asks to be killed; accuses his wife of infidelity; scolds, strikes at everybody who wishes to restrain him; thinks they are dogs and barks at them to make himself understood.

‖Strange, absurd ideas; thinks herself tall, double or lying crosswise; one-half of body cut off; bed is full of creases; that he was killed, roasted and being eaten.

‖‖Imagines objects smaller than they really are.

Google

Imagines he is alone, and is frightened.

Started with great force and alarm, crying out that she is going to fall, clings to her mother with as much desperation as if she were going to be thrown from a precipice.

Imagines that he is very large and tall, but surrounding objects small.

Thinks she is not fitted for her position.

Imagines she sees a number of strange people, and tries to seize them, though there are none present.

An old lady had a vision every night since six weeks, in which many persons, all strangers, came into her room and to her bedside, causing her such fear that she had to leave bed.

Saw people coming out of all corners.

"There," he replied, "a long train of bedbugs, and after them a procession of beetles, and here come crawling over me a host of cockroaches;" sank back in alarm, then suddenly said: "I believe I know they are not really bugs, but, except once in a while, they seem real to me."

Woke suddenly in night and said there were snakes under and about her; looked wild, screamed and pointed to them.

After waking, all things appeared to him as if they were new, even his friends, as if he had never seen them.

Hears dancing, music, sees men and hears them talk in foreign tongues.

Hallucinations, as if near r. mastoid process a voice were scolding her, < at night, sometimes voice seemed to be under bed.

Hallucinations bring him into a rage.

Fears: he will lose his senses; his lips will grow together; to suffocate; falling; everything is falling on her.

Frightful fancies take hold of his mind, his features express fright and terror.

Sees more horrifying images at his side than in front of him, and they all occasion terror.

Hallucinations cause fear and fright.

Exclaims about cats, dogs and rabbits approaching her from above, from side and middle of room.

Frightful figures, rats, mice; saw animals moving, cats, dogs, etc.

He converses with absent individuals as if they were present, and addresses inanimate objects, as chessmen, by names of such persons, but observes none of those standing about him.

Patient had a constant vision of an executioner standing before him, in spite of which he was lively, talkative, laughed and joked about his hallucination, yet it seemed to him a reality.

Google

Boy seemed to see black objects, spoke of black people and black clouds, and grasped at air.

Awakens with a shrinking look, as if afraid of first thing she sees. θMetritis.

Delirium: bland; murmuring; violent; foolish; joyful; loquacious; incoherent; chattering; with open eyes; vivid; merry; with spasmodic laughter; furious; raving; wild, attempts to stab and bite; with queerest notions; with sexual excitement; fear, as if a dog were attacking him; conscious of her condition; calls for papa and mamma, who are present and trying to console child; with open eyes; noisy, with hallucinations; shy, hides himself; tries to escape; full of fear; talks incessantly, absurdly, laughs, claps her hands over head, wide-open eyes.

Rush of blood to head, with furious loquacious delirium.

Loquacious delirium; disposed to talk continually, with desire to escape out of bed; exposes genital organs.

Delirious and unintelligible, patient was busy with a thousand not unpleasant fantasies, made known his wants by gestures, without speaking, ran about for several days busy with his fantasies with a joyful mood.

Delirium of a lively, active, vivid character, alternating in short periods with apparent horrified fright, seeming to dread approach of some imaginary monster, and giving utterance to most piteous appeals for help.

She rapidly became furiously delirious, struck at, pushed or attempted to bite every person who came near, or any object that was offered to her.

Delirium by day and night, without rest or sleep; sang or whistled or entertained himself in different languages with departing people, or jumped wildly from bed to run away or to attend to business. θVesicular erysipelas.

After a dreadful shock, occasioned by the death of his brother, who fell dead in his arms, talked incoherently, struck at all around him with his feet and hands, raved and spat in face of his attendants, tore his clothes, spoke at one time in Hungarian, and then in Wallachian language; sang Latin paternosters, declared that he was God, and then that he was the devil; talks incessantly unintelligible nonsense; sits down and rises again; kneels and then pushes against wall, alternately stretching out his hands to full extent, and laying his finger in his mouth; tore his clothes and broke a very strong chain and padlock, with wonderful rapidity; bored large holes in wall with his fingers; will not answer any questions, avoids the eye; pupils are contracted, eyes weary and collapsed; cannot sleep or eat.

Digitized by Google

Furibund delirium, during an attack of erysipelas faciei et capitis; suppression of urine; singing and whistling between paroxysms.

Delirium, tendency to throw herself out of bed, great restlessness and sleeplessness. θFacial erysipelas.

Loquacious delirium, with desire to escape out of bed; tongue yellowish-brown, dry on centre; lips sore and cracked; sordes on teeth. θBilious typhoid.

Mania: with fits of rage, hallucinations of sight and hearing, loss of memory; complains that a dog is biting and tearing flesh off his chest; merry exaltation; with pride and affectation; runs about, complains of violent headache; claps his hands together, steals from his room-mates everything he can get hold of; with anxiety, and disposition by words and deeds to scold persons whom he otherwise loved.

Mania; thinks he is lying on his sepulchre; confessing, praying, wants to be killed; laughs as if tickled; wants to be kissed; accuses his wife of being faithless; scolding, beating in a rage, will not be taken hold of by attendants; takes them for dogs, and barks at them; talking in Jewish jargon; supposes his house to be surrounded by carts, Jews and geese, offending him, driving him into a rage; pale, eats nothing, does not sleep, while muscles of face are in constant twitching motion.

Mania; great restlessness, confused memory; a hot face, with coldness of body alternating with anxiousness and thirst; frequently a red face, with a staring look; sadness, weeping, thoughts of death; stammering and muttering before a word comes out; cold feet; nervous, anxious sleep, with strange visions; fear of malicious animals, black dogs; a young man of loose habits.

Conjunctiva injected, pupils immensely dilated; whole expression of eyes brilliant, restless, suspicious and roving; brow corrugated.

Mania, with convulsive attacks every half hour; sudden falling; grasping with fingers; intended to scream, but could not, as mouth was full of rattling phlegm and froth on lips; bending spine backward; beating with one arm, grasping with other; face pale; no consciousness.

Mania puerperalis.

Mania; affects being a distinguished person, of high rank; is full of fear.

Acute mania; frenzy; tears his clothing; hallucinations; violent impulse to be active; threatens to use knife on those about him.

Paroxysms, during which he threatens to knock everybody down, to break furniture, to throw himself out of window.

Digitized by Google

Mania for light and company, cannot bear to be alone.

Mania, with insomnia; very talkative; thinks he has every imaginable disease; that he has power over all disease; masturbates; at times perfectly rational; fills his pockets with anything he can find; thinks he has snakes in him.

Had many strange fancies, such as imagining his wife had lovers concealed behind stove; wandered restlessly about, and could only be restrained by force from running out into street; afterward had a fit that looked so much like apoplexy that he was bled.

Mania puerperalis in course of peritonitis; phlebitis puerperalis.

Mania, originating in childbed; sitting up, talking incessantly, in one strain for fifteen minutes, and with great vehemence; always wants to go away.

Timid mania, in childbirth.

Delirium tremens: hallucinations which, especially at night, put patient in wildest restlessness, is chased about as if crazy; heard continually, on r. side of occiput, a loud voice, scolding, vituperating and accusing him of ungodliness; region of bladder distended, urine very scanty, for a few days previous, since day before, almost entirely suppressed; constipated; tongue white; conjunctiva dirty yellow; on reading letters blended, and danced before eyes; talked continually, sometimes prayed, expecting, with great anxiety, the flash of lightning which was to kill him; considerable thirst; profuse, fetid, warm sweat; on lower extremities, which sweat much, a red, granular, itching eruption (lichen); trembling of limbs violent; pulse small; makes mistakes about time, speaks of all sorts of affairs, which have happened at his office; people seem to appear before him; night very restless, talked much to himself, wanted to leave bed; quaking, trembling of limbs; misplaces words in speaking; glittering eyes, with sharp, staring look, pupils generally dilated; inability to distinguish objects at a short distance; on looking at objects a little way off (twenty to thirty steps) fantasies disappeared, hence sought the open air.

Young man with delirium tremens, had received, shortly before, a cut in cheek, and wound was in an inflamed condition; pain in forehead; tendency to sweat; motions unsteady, hasty; hands and tongue tremble; appetite poor; chills in back; continuous scintillations before eyes; spoke of lizards and worms being on his clothes, and in air before him; starts up suddenly as from fright; pulse weak.

Digitized by Google

Often leaves his chair to rush at people whom he thought he saw fighting and quarrelling before him.

‖Has been drinking too hard, weather very hot; since about five days, is walking day and night, can find no rest; could not sleep; saw a door open where there was none; frightful dreams about fighting and killing; takes offensive in imaginary quarrels, and attacks aggressor; runs against supposed object to attack it; personifies voices, hears clock talk, and argues with it; sores in mouth and tongue, probably from biting; unquenchable thirst; tingling in hands, which sometimes get cold; heavy, dull sensation in head; l. nostril closed; feels > in cold air; would like to die; rolling of eyes; trembling of hands; urine scanty, red; pulse full and hard; afraid of delirium tremens; weather very hot.

Nymphomania; with diaphragmitis; violent attacks, even to rage; exalted sexual passion.

▮Religious mania; pious looks, praying; restless nights; inspired talking, singing; despairs of her salvation.

▮Hydrophobia; water, a mirror, or anything bright, excites convulsions; screams or howls in a high voice; bites; mouth dry; pupils large; unconscious; afraid to be alone; great desire to bite and to tear himself with his teeth; wants to bite those around him, with a terrible cry and rage; fancies full of fright and terror, staring eyes, dilated pupils, turgid, swollen face, bloody froth at mouth, excessive restlessness; aversion to watery liquids; frequent spitting, slaver hanging from mouth; horrible convulsions; stiffness of whole body.

‖Very violent; loquacious; wild; difficult of restraint; seeing rats and cats in room, and on walls; pulse 120; high fever; several men required to prevent him from getting out of bed, or jumping out of window; wanted a razor; would take nothing out of a spoon or cup. θErysipelas of head and face.

▮Rage: unmanageable; grasping with his hands; laughing; rolling and creeping around in bed; unable to stand on his feet; pupils wide open; insensible; wants to kill people or himself.

With horrible cries he strikes at those around him, and is furious.

Uncontrollable fury, can scarcely be restrained; flies at people; strikes and endeavors to seize them.

Very changeable disposition, alternate anticipations of death and rage; laughable gestures, and melancholy deportment; affected haughtiness and inconsolableness; loud laughing and groaning.

‖A woman, æt. 50, became weak-minded, childish, and

laughed without cause; had two paralytic attacks, each at 2 A.M.; lay quietly on her back, with closed eyes; delirious talk, < in evening; wants to get away, throws things out of window; at 3 A.M. violent spasms, return every half hour; wants to scream but cannot; gurgling sound in throat; foams at mouth; opisthotonos; strikes with one arm, grasps with other; pale face; unconsciousness.

Incoherent talking; incessant; like that of dementia; says many curious, incomprehensible, foolish things; prattling; continual babbling; constant senseless chattering; talking in one strain, with distressed face. θTyphus.

Talkative; but talking is impeded.

Excessive loquacity each time during menses; tears and prayers and earnest supplications.

Inspired talking.

Great talkativeness; full of wit, but indecent, sometimes in a rage, tearing his clothes; pulse frequent, full and hard.

Talkativeness about lewd subjects.

Talks incessantly foolish things which nobody can understand; sits down, rises up, kneels, or takes other queer positions; tears his clothing and breaks chairs with remarkable celerity; gives no answer, and evades carefully looks of other persons.

Ceaseless talking, mostly devout; very earnestly beseeching. θDysmenorrhœa.

Constant muttering to himself.

His thoughts ran upon obscene things, frequently put his hands to erected penis; sought to bite or to catch flies.

Talks in a foreign tongue. θTyphus.

Loquacious, talks all the time, sings, makes verses.

Child awakens terrified, knows no one, screams with fright, clings to those near.

Sings, talks, fancies there are dogs in room, which he describes and attempts to chase, springing suddenly to his feet, and as suddenly toppling over.

Sings and utters obscene things.

Delirious laughing, making faces and behaving generally like an intoxicated person or like a fool, pulling his clothes, making laughing grimaces, with a staring look.

Prattling incessantly, without any sense or understanding.

Screams until he is hoarse, or loses his voice.

Crazy with distress; jumps out of bed; acts as if bed were being drawn from under her; with spasmodic motions of head.

Google

Falling down with a scream; loud shriek, during fits.
Screams about growling in abdomen.
Would like to scream, but could not on account of phlegm.
Moaning; tossing about.
He uttered constant moans, with occasional shrieks, and could only be pacified by holding his chest pressed close to his mother's breast.
Groaning; moaning after menses; restless motions.
Wife complains of husband neglecting her; man accuses his wife of being faithless.
He is mute, does not answer; expresses a wish by pointing to things.
He talks little and utters single, broken words in higher voice.
At times active efforts at utterance.
Could not utter a word; sitting silent and brooding.
Disposed to weep: violently; involuntarily; during day; at night; about her mental weakness.
Laughing.
Making all kinds of faces and imitating motions, gestures and voices of different animals.
After suffocative paroxysms with elevations of sternum had been > by tinc. amygd. amarae: face red all over, eyes glassy and staring impudently or spitefully, followed with her eyes her little brother, moving her lips backward and forward, lips covered with shining moisture; choking frequently; bitten by dog a year ago, dog not known to be mad.
When his father got him to recognize him, boy said: "Why, papa, is that you?" and commenced stroking, or rather clawing, with his fingers his father's face
Tears clothes; breaks chairs with incredible quickness; destroys things.
Disposition to suicide; wanted a razor to cut his throat.
Endeavors to escape, imagines he is alone all the time, and is afraid.
Wandering up and down floor.
Starts involuntarily, quick as if a shock of electricity had passed through her body, with an air of affright and a loud shriek; limbs writhed with convulsive motions, and her countenance and body distorted in every direction.
Grasps at things quickly and in a hurry, thinks he has seized a thing before touching it; if he does hold the object he does not feel that he has hold of it.
He makes all motions hastily, with great force and hurriedly, so that he feels an anxiety if he cannot finish them at once.

Digitized by Google

While sitting on a sofa, fancied she was falling off, kept holding on to everything; while in bed said that bed was being drawn from under her.

In his conscious moments, he asked to be held because he was falling.

‖ Cries out fearfully, hides face in pillow, is terrified by presence or approach of physician; after an attack of typhoid.

‖ Intense pain in r. side of head, with profuse lachrymation; had frightful imaginings, would start up, scream out; if spoken to would answer correctly, but immediately relapse into her wild state, head drawn spasmodically to one side, not continuous.

Inclination to climb up.

▮ Hasty; hurries off too fast, with all his might, if he wants to go to another place.

Gay excitement, alternations of laughing, crying out, singing, whistling, leaping up, catching at flies, picking at flocks.

‖ Phlegmatic, with weariness of mind and sadness of heart; everything is indifferent to him.

‖ Not disposed to any real work.

▮ Doleful, weeping, thoughts of death.

▮ Crying mood, with inclination to give offence and to feel offended.

▮ Downcast and full of anguish, believes herself unworthy of eternal bliss, because she is unable to perform her duties.

‖ Feels as if nothing could give her any enjoyment.

‖ In evening after lying down, very sad, with thoughts of death, and violent weeping.

Sad; apprehends evil consequences from trifling things.

‖ Melancholia, with walking about, crying and lamentations; complains her husband has neglected her.

Inconsolable; much affected by trifles; disposed to weep, sometimes vexed; neglects her duties, thinks she is not fitted for her position; < after Fall equinox; in darkness, when alone, and in morning; wants light (sunshine) and company; heat and anxiety, rise from abdomen, causing redness of checks.

A peculiar sensation of anxiety; anguish; despair.

‖ Pangs of conscience; thinks he is not honest.

Ill-humor unto vehemence, followed immediately by a disposition to laugh, even aloud.

When spoken to appeared peevish and irritable, and answered by a sharp cry, or said sharply, "Let me alone," all his words being curtailed in a curious way.

‖ Formerly an obedient boy, he is now headstrong and

Google

obstinate; but in presence of strangers timid and anxious.

Very passionate, easily provoked into a rage.

Extreme irritability; makes all his motions so fast that finally he cannot move any more, and all turns black before his eyes.

‖Slightest contradiction irritates her so much that she sobs with anger.

Continued violent scolding; senseless quarrelling.

‖Child is very cross, and strikes or bites.

‖After fright: mania; melancholy; chorea; epileptic attacks; spasms.

‖On being reprimanded pupils dilate immediately.

‡**Sensorium.** Drunkenness; reeling, loss of voluntary motion.

Unsteady when walking in dark, with tendency to fall to l. or backward, in evening after sunset.

‖Staggers as if dizzy; gait unstable; impossible for him to walk in a straight line; must be led.

Staggers, yet limbs obey will so readily that he feels as if he had none; they seemed to him much longer than they were, so that when walking he thinks he has already touched floor, when foot is six inches away from it, hence he always puts down foot too quickly.

Stumbles against door before going through room.

π When sitting on a sofa she fancied she was falling off, kept holding on to everything.

π When in bed, lying on r. side, screamed and said that bed was being drawn from under her and that everything was falling on her, kept holding on to walls; asked her mother not to leave her as something was going to hurt her; from 9.30 P.M. until midnight.

‖Vertigo: cannot walk in dark, or with eyes closed; staggering, obscuration of vision, or flickering before eyes, red face; reeling as if drunk; head feels as if drawn backward, at same time excessively sleepy; with colicky pain and diarrhœa; with heat; before catalepsy; with hallucination of sight and confusion of thoughts.

‖Vertigo, especially at night; < lying on side, had to lie upon back; pressure like heavy load in forepart of head; could only half open eyes, could not raise eyes to ceiling; painful twitching over face, followed by spasms in chest, which entirely arrested respiration for a minute, alternating with fits of laughter, lasting a quarter of an hour.

‖Stupefaction, from which he at times started up in a wild manner, opened his eyes, which were partly closed, but could not keep them open; spoke disconnectedly,

Digitized by Google

quarrelled with his mother, whom he did not know; face very red, cheeks glowing hot, with dry heat over whole body; at times he moved lips and tongue, called for liquid; throbbing carotids, full, very rapid pulse, rapid respiration, pupils excessively dilated, insensible; swallowing difficult.

- Dulness of sensorium, especially noticeable when talking by confounding words.
- Stupefaction with vanishing vision and hearing and convulsive movements of head.
- Fainting, with paleness of face, dryness in throat and subsequent red face.
- Suddenly falls, with pale face and almost insensible breathing; sometimes face is bloated red; fainting may continue a long time.

Inner Head. Lightness, weakness, dulness and stupid feeling in head.

- Heaviness of head; before catalepsy.
- Congestion to head, beating of carotids; sparkling eyes; pulsation in vertex, loss of sight and hearing, bloated, turgid face, total loss of consciousness.
- Head hot, also whole body.
- Heat of head: during chill; with headache; then general coldness, followed by heat with thirst; with sweat on forehead.
- After a sunstroke, a tormenting sensation of heat in whole head, most on vertex, with great dulness: pain in nape of neck, preventing bending of head further than to a certain point; got in habit of supporting head with hands while bending or rising; constant pain in cervical and upper dorsal vertebræ; memory and power of thinking disturbed; loses thoughts before she can give them utterance; tries to find right expressions and weeps about her weakness of thought; very sensitive to noise; slightest contradiction irritates her so much that she sobs for anger.
- Violent affections of brain, during or after vesicular erysipelas.
- Meningitis: eyes red and inflamed, wild and staring, shrinking look as if from fear, accompanied by some degree of delirium, dilated pupils, pain in head and nausea; convulsive motions of head and frequently lifting it from pillow; head is thrust forward; conjunctivæ injected; pupils contracted; desire for light, or bright light and glistening things cause spasms; calls for parents, who are present, and does not know them; violent delirium; stammering; great dryness of mouth; dysphagia; urine suppressed; trembling and

Digitized by Google

convulsive movements of limbs; striking with hands and feet; frequent torsions of trunk; frightful visions; screaming; pleading for help, or very irritable, with raving or disposition to strike, bite or injure others; suppressed miliary eruptions.

‖Hydrocephalus; convulsive motions of head, sensation of lightness of head, and frequently raising head up; great loquacity; merry delirium; desire to escape from bed and room; grinding of teeth; glittering eyes; staring look; dark-colored stools; during convulsions head is jerked from pillow and falls back again.

‖Apoplectic seizures; paroxysms of syncope, with stertorous breathing; bloody froth at mouth; dark-brown face; lies on back with open staring eyes; fetches breath with great difficulty.

‖Paralysis, after apoplexy, spasmodic drawing of head to either side; screaming, with convulsive movements of arms above head, especially in eclampsia.

‖When rising, pressure on forehead; could open eyes only half; could not look upward.

Squeezing, clawing headache.

‖Throbbing headache: in forehead; in r. temple, with diarrhœa; in vertex; in typhus, with fainting fits.

Pain in r. temple, sticking and stabbing, from 8 P.M. until he fell asleep at 11 P.M.

Headache in both temples, shooting to back of head, with thirst.

Dull pain in occiput.

‖Pain in head and nausea.

Headache, with dryness of throat, nausea and vomiting.

Alternate headache and tumefaction of abdomen.

‖Headache from being exposed to sun.

‖Periodical neuralgic pain in forehead over either eyebrow, commences about 9 A.M.; < until about noon, when it begins to decline, and by 3 P.M. has passed off, but returns at 9 next morning.

‖Tormenting sensation of heat in whole head, mostly vertex, with great dulness; after sunstroke.

‖Pressure on forehead when rising, could only half open eyes, could not look up.

‖Congestive headaches, in morning, < toward noon, gradually > toward evening; pains terrible, fears going mad, runs or presses head against wall.

‖Heat, pulsating in vertex, attacks of fainting, loss of sight and hearing, face bloated, turgid; convulsive motions of head, frequently raising head from pillow or bending it backward; > lying still.

‖Sensation of lightness of head.

‖Pain in head, nausea, delirium, eyes wild, staring, inflamed; frenzy, convulsive spasms and twitching of nerves; hands and feet become cold, pulse sinking. θMeningitis.

‖Headache with loss of sight and hearing.

Rheumatic headache, with dulness; difficult thinking; < in vertex or forehead, < evening and night.

‖Tearing in neck and over head, shunning light; > from warmth; < from cold; < on getting up in morning

‖Rheumatic inflammatory affections of brain with children under seven years, epidemic during a Winter season; starting in sleep; moaning with restless motions; when awake they look with staring eyes and despair in their faces, to one point, and either move slowly and shyly backward or run away with a violent, fearful scream; taking hold of things near them; feverish heat, red face; moist skin.

‖Rheumatic pain, for several years, on top of head.

‖When getting up in morning, tearing in neck and over head; impaired sight; shunning light; chilly crawls over whole body; fingers and heels numb, latter sometimes painful; > in warmth, < in cold.

Outer Head. ‖Jerks head up from pillow.

‖Boring head into pillow.

‖Head bent backward.

‖Moves head, thrusts it in all directions; in spasms mostly to right.

‖Supports head with hands while bending or rising; after sunstroke.

‖Head drawn to one side; rolling of head, or spasmodic raising and dropping of head.

‖Head numb on l. side.

‖Head and forehead hot to touch.

Head perspires more than usual.

Sight and Eyes. ‖Light dazzles; shuns light; convulsions from bright light, water or brilliant objects; eyes water.

Change of light, either going from dark to light, or suddenly from a light to a dark place causes pain in eyeball.

Greatest sensitiveness to daylight, and desire for lamplight.

‖Hemeralopia.

‖Dimness of vision: complained of darkness, wanted a light; vision cloudy as through a veil; total blindness, in typhus; like a fog, or gauze before eyes; like seeing through a glass of turbid water; things seem as if dissolved, or too distant; in morning.

‖Visual illusions: when looking at an object believes he sees cats, dogs, rats and all sorts of insects in continual mo-

tion; fiery visions; flickering before eyes; the silk he supposes to wind is blue; he seems to see a reddish-grey border around white things; black things seem to him grey; the black letters seem to him grey, and as if a second one of the same light-grey color were placed sideways or above (a kind of diplopia); writing an F he went with pencil a second time over same line, supposing to have drawn a second one; sees objects multiplied, and in different colors; all things appear awry, in an oblique position; sometimes cannot see entire object, and then again sees it double; he saw things as if through coarse linen, only by pieces, and as if cut through, of a face he only saw nose etc.; as if eyes had but a small circle of vision, and he was only able to see a small point at once; half hour after dinner sees everything double; objects seem smaller and at a greater distance.

When reading he was unable to distinguish a syllable; letters seemed to move and become blurred.

Suddenly he feels very strangely, because everything appears in a green color; at same time he gets confused in head, and says he cannot help to strike with his spade (while working in garden) strange blows in air, and to make strange gestures, as if he were possessed.

Hallucinations dark (*Bellad.*, fiery, shining).

If attention was fixed upon objects only twenty or thirty paces distant, though they could not distinguish them exactly, still the moving figures were lost when they looked again.

In morning hours, cannot distinguish objects, although he sees them; knocks against them as if he were in the dark.

Strabismus from brain affections, epilepsy, eclampsia or chorea, if < by mental emotions, terror, fear, etc.

Small things, such as point of a pin, patient was unable to discern.

Long-lasting farsightedness; he was only able to read print at a distance.

When going down stairs, he takes two steps for one, and is not aware of it until he falls.

On fixing attention on objects not very far off, they saw animals; looking at a distance over thirty yards all disappeared.

Amblyopia amaurotica.

Darkening of sight, could not read, or see thread when spinning.

The eyes were open, but he took no notice of anything or anybody about him, and when objects were held before his eyes he could not see them.

Google

‖Eyes insensible to strongest light; to bright sunlight, in typhus.

‖Caught cold when eruption was out; at once cannot see or hear, everything looks black before eyes; calls for persons standing close by, and cannot believe in their presence, although they speak to him in a loud voice; grasps with hands and kicks with feet.

Almost complete blindness for six hours; on day following, a pressure as from middle of eyeball, at every change of light, either when going from a dark place into a lighter, or from a light place suddenly into a darker.

‖Pupils dilated; sometimes immovable and insensible to light.

‖Eyes wide open, prominent; pupils exceedingly dilated, insensible; injected conjunctivæ, as if vessels were filled with dirty liquid.

Pupils dilate when child is reprimanded.

Pupils dilated to their fullest capacity, immovable and insensible to light, yet holding a lighted candle before eyes caused violent convulsions of extremities, particularly opisthotonic spasms with rigidity.

π Paralysis of iris.

Contraction of pupils; paralysis of œsophagus and lower limbs; involuntary passage of urine and bloody feces; face, hands and feet blue and cold.

‖Pupils contracted after vinegar or lemonade.

‖Eyes: restless, glistening, wide open, staring, with a peculiar intoxicated look; brilliant; glassy; wild and red; protrude; vacillate, vessels injected; contorted; rolling; squinting; half open in sleep; inflamed; in constant motion.

‖Contortion of eyes and eyelids.

‖Fixed and sinister look from time to time.

‖Stares fixedly from eyes, which are surrounded by a dull bluish border.

‖Eyes anxiously fixed sideways, on one point, where she imagines to see a terrible, hostile figure.

‖Eyes dull and heavy.

‖Sensation as if eye were forced out, with twitching of lids.

General suffusion of eyes.

Whites of eyes and margins of eyelids red; tears run from eyes; sheds tears unconsciously.

Dimsightedness, blear-eyes, sore, running, as with old people.

‖Profuse lachrymation, with headache; during fever heat; from otalgia.

Upper eyelid hangs down, as if caused by a cramp of orbicularis.

Google

| | Could open eyes only half, not look upward.
| Eyes half open in sleep.
Closed eyes, opening only when spoken to.
Pressure in eyelids, as if swollen, which is the case, or as if oppressed with sleep.
Swollen and inflamed eyelids.
Agglutination of eyelids at night.
Suppurating eyelids.

[6] **Hearing and Ears.** Sense of hearing very acute, while vision was lost.
| | Very sensitive to noises, least noise startles him.
| Hardness of hearing; complete deafness.
Sensation as of wind rushing out of ears.
| Hallucination of hearing; talks about a train in his ear; singing in ears with giddiness.
Pain in l. ear, passing down to l. side of cheek.
| | Shooting in ears.
| | Otalgia, l. side, pain violent, without intermission, only remitting somewhat at night, when covering head warmly; tears come from l. eye when pains are most violent.
| | Neuralgia in cheek, near l. ear, as if sawing bone, on a small spot as if a hole were there, and when touched horrible sensation as if brain were touched; muscles of l. face in an oscillating motion; eye feels as if it were driven out of its socket; at first warmth > pain, now <; patient in constant motion, throwing his arms about; evening and night.

[7] **Smell and Nose.** Nasal discharge yellow, bad smelling; quickly liquefies.
Nosebleed: dark, in lumps; with whooping cough.
Spasmodic sneezing.
Feels as if nose were stopped, although he breathes freely.
Stoppage of nose with feeling of dryness.
Influenza.
| | In wing of nose, tearing and shooting.
Intolerable itching in nose.
Alæ nasi white, face red.
Erysipelas on nose.

[8] **Upper Face.** | Expression: wild and staring; vacant, bewildered; anxious; of great fear and terror; that of a drunken person; maniacal; wild, idiotic; despairing, on awaking; constantly changes; makes foolish faces; stupid and disturbed; as if he were seeking something.
| Forehead wrinkled, corrugated; frowning in brain diseases.
| | Tingling feeling, as if pins and needles were in her forehead; redness and swelling about r. eye.

An old cicatrix on forehead became very red.
▮Sardonic grin.
▮Thinks face elongated. θHysteria.
▮▮Painful twitchings over face, spasms of chest spasmodic laughter.
▮Facial muscles constantly in play during delirium.
▮▮Prosopalgia, in evening after lying down, < in l. cheek, close to ear, seizing temporal and zygomatic region, with sensation as if bones were sawed through, radiating to os petrosum, with sensation at a small place as if there were a hole in bone, which feels at touch as if brain were touched.
▮▮Prosopalgia began over l. eye, with severe stitches in ear; passed over l. cheek to l. ala nasi; stitching, tearing at different times for three or four days.
▮Prosopalgia nervosa, pains maddening, spasmodic starts and shocks through body, throws arms upward; skin of forehead wrinkled.
▮▮Pain spreads over all branches of facial nerve, from foramen stylo-mastoideum to ala nasi; tearing, and of such severity as to produce oscillation of facial muscles, with distortion.
▮▮Left side of face is, for moments, distorted with painless convulsions; contractions of zygomatic muscles draw cheeks and mouth from below upward, and from face backward to temples.
▮▮Since three days, at 9 A.M., severe tearing pain over whole r. side of face, with cold extremities and very warm face.
▮▮Painful twitching over face and chest, with spasmodic laughing.
▮Face: red, bloated, hot; red, eyes wild; ▮▮hot and red, with cold hands and feet; circumscribed redness of cheeks; pale; blue, with difficult breathing; swollen and very red, puffy, purple; dark-brown, copper-colored.
▮▮Hot cheeks.
▮▮Blood rushing to face.
Felt as if l. side of her face were swollen, which was not the case.
▮▮Swelling of face before formation of vesicles, with muttering delirium. θSmallpox.
Face covered with patches of irregular shape, not elevated above rest of skin, and of a brilliant, fiery-red color.
Erysipelas on r. side of cheek, nose and face.
▮▮Erysipelas in face; on l. cheek, after catamenia; with mania
▮One-sided erysipelas, with meningitis; spasmodic symptoms alternate with paralytic.

Digitized by Google

‖Facial erysipelas, eruption was smooth, patient delirious, with constant talking, and wild staring eyes.
Itching eruption on face, petechiæ.
Frequent sweat on face and forehead.

[9] **Lower Face.** Moves lips backward and forward.
Lips: red; with yellow streak on vermilion border, as in malignant fevers; dry; sore and cracked; tremble; convulsed; have a yellow streak along their red part, as in malignant fevers, and stick together, he fears they will grow together; bluish, swollen; covered with shining moisture.
Swelling of under lip.
‖Froth on lips; white or bloody.
Crawling sensation on chin.
Pain in submaxillary glands.
‖‖White circle around mouth. θDiarrhœa of children. θHysterical mania.
‖Puts fingers on mouth.
‖Distortion of mouth, drawn to one side.
‖Chewing motion of mouth.
‖Mouth spasmodically closed.
Mouth open, but tongue immovable.
Thick frothy saliva about mouth.
Lower jaw: hanging down; convulsed; tension; locked, with closed lips.
‖Lockjaw after convulsions.

[10] **Teeth and Gums.** Grinding teeth, with shuddering over whole body; raises hands above head, and moves them as if he were winding a ball of thread; with gloominess in head; contortion of hands and shuddering; with chill.
Throbbing toothache, as if some teeth would fall out.
‖Sudden pain in upper teeth, then in lower; teeth feel pressed together.
‖Pains begin in carious bicuspid of r. lower maxilla, spread hence over all branches of facial nerve on that side of head; tearing.
‖Sordes on teeth. θTyphoid.
Dentition: grinding of teeth; moving of fingers in sleep as if searching for something; desire for light; disposition to stammer; convulsions, with cries as if from sight of hideous objects; throwing about of limbs, especially upper ones.

[11] **Taste and Tongue.** ‖Taste: bitter; all food tastes bitter, or like straw to her, or sand; a loss of taste, drank vinegar without tasting it.
Tongue: whitish, with fine red dots; point redder than usual; dry, red; dry and parched; pale red, in constant motion; swollen, coated, dry; yellow in centre; dry;

Digitized by Google

swollen, hangs out of mouth; moist, papillæ enlarged and projecting through a soft, white fur; swollen, stiff, and difficult to move; feels blistered.

Scratched their tongues with their nails.

‖Speech: stammering; difficult and unintelligible; indistinct; has to exert himself a long time before he can utter a word, stammers, and utters unconnected sounds.

‖Stammering; distorts face; makes great efforts to speak; mouth drawn now to r. again to left.

‖A family had gone to bed, when suddenly from a room near sleeping chamber there came a crash awaking a 2-year-old boy out of sleep in affright; cause of disturbance was the breaking of an oaken table leaf; boy a blonde, light-haired child, with prominent forehead, lively and intelligent, was a considerable time in getting quieted and to sleep again; on next day, parents observed that boy, who had formerly spoken with correctness, now stuttered, and that his tongue was in involuntary motion in different ways; toward evening he appeared fearful and anxious, that some one was under bed; the fearfulness disappeared in a few days, but stuttering and disordered movements of tongue continued, until relieved by *Stramon.* 30.

‖Speechlessness, with a girl 4 years old, since weeks, with spasmodic laughter, clapping of hands; spasmodic laughter at night, weeping during day.

‖Speechlessness, for several days, with a girl of seven years. θCholera Asiatica.

‖Could not talk, in typhus.

‖Aphasia.

[12] **Inner Mouth.** ‖Dryness of mouth: and fauces; dry, sticky lips; glistening; is unable to spit, although tongue looks moist and clean; can hardly take a mouthful of bread, drinks a great deal; and no taste; has to moisten it, no thirst.

‖Saliva: increased; drivelling; with chills and fever; glairy, dribbling from mouth.

Viscid slime in mouth.

Whole inner mouth as if raw.

‖After dinner, sudden ebullition and spitting of blood; with a little hawking, his mouth got full of bright, red blood; oppression of chest, palpitation and headache.

‖Bloody froth before mouth.

Soft palate as if drawn down; food and drink pass with difficulty under it, and with a scratching pain in it.

Palate feels parched, so that he is unable to eat a mouthful of bread.

[13] **Throat.** Burning in throat, great thirst, dryness of tongue, which is very red.

Google

Burning in throat, violent thirst, pain in stomach, stupor.
‖Feeling as of boiling water, rising in throat.
‖‖Dryness of throat: and fauces; not benefited by any sort of drink; and copious urination; with difficult swallowing.
‖Swallowing difficult: impeded, with stinging pain in throat; with pain in submaxillary glands; with convulsions; particularly fluids; from spasmodic constriction of throat.
‖Paralysis of pharynx and œsophagus.
Contracting burning pain in throat, and a sensation as if ball were wedged in throat; after this delirium, with queerest notions; later, blindness with dilated pupils.
Choking in throat.
‖Constriction about throat; frequent hemming and hawking.
‖Constriction of muscles of throat in attempting to swallow.
‖‖Spasmodic affection of œsophagus. θMeasles.
‖Averse to fluids; shrinks from the proffered cup; became enraged when his lips were moistened.
‖Averse to water; even sight of it causes spasm; constriction of throat, froth, spitting.
‖Hydrophobia; restlessness, violent convulsions, patient being so violent that he had to be tied; rolled about in bed, sleepless, uttering shrill screams; delirious, without memory or consciousness; pupils extremely dilated; violent desire to bite and to tear everything with his teeth; extreme dryness of inner mouth and fauces; sight of a light, a mirror, or water excited horrible convulsions; constriction and spasms of œsophagus, froth at mouth and frequent spitting.
‖Drink is swallowed hastily.
Throat feels sore with stiff neck.
‖Inflammation of posterior wall of pharynx; spasmodic contractions.
‖Tetanic spasms of muscles of glottis; added to angina, after copious venesections, with impending danger of a local motory paralysis.

" **Appetite, Thirst. Desires, Aversions.** ‖Increased appetite; with diarrhœa; with sweat; with chorea.
‖Loss of appetite: with oppression at pit of stomach; with sweat; cannot eat bread.
While eating: arms tremble.
After eating: double sight; fauces constricted.
‖Thirst: with great dryness of mouth and throat; intense and unallayed by water; ‖‖violent; with desire for sour drinks; in mania; with vertigo; with headache; abdomen inflamed; for large quantities, drinking with

avidity; with dim sight; even with much saliva; and vomiting; after vomiting; with bellyache and looseness of bowels; with copious secretion of burning urine; when awakening; violent, with heat; followed by sweat; between heat and sweat; with sweat.

Thirstless: sometimes with cold or hot stage and sweat; averse to water during fever.

‖Great desire for acids.

‖‖Fear of water and aversion to all fluids.

16 **Hiccough, Belching, Nausea and Vomiting.** ‖‖Very violent spasmodic hiccough.

‖Singultus in most obstinate form, in children, with restlessness in night, and screaming during sleep. θSingultus.

‖Sour eructations, with cardialgia.

‖Nausea: flow of very salt saliva; but cannot vomit; and disgust; with anxiety; with sensation as if falling; with profuse salivation, in evening; with incessant hiccough; with inability to bring up anything; as if he would vomit, but it never comes to it.

‖Watery vomiting: of mucus in evening; of a sour-smelling mucus; of green mucus, with thirst; of bile, with mucus; of a dark greenish substance, mixed with food; of bile, after least motion, even after sitting up in bed; as soon as he raises head from pillow; from exposure to bright light; in morning; of sour mucus, or green bile; all food, with cardialgia; or whooping cough; rarely with chill, often with heat; sometimes with sweat.

After vomiting: thirst; deep sleep; fever and sweat.

‖Diaphragmitis; delirium; burning along diaphragm; short-breathed; spasms; struggles against water offered.

17 **Scrobiculum and Stomach.** Great distress at pit of stomach.

Anxiety at pit of stomach, with dyspnœa.

‖Burning in pit of stomach, extending to both sides.

‖Epigastrium tense, hard, painful.

Stomach very sensitive to touch.

Inflammation of stomach, burning; anxiety.

Pressing pain in stomach.

Violent pressing pain in l. half of stomach, < by pressure.

‖‖Drawing pain in back part of stomach.

‖Pain in stomach and cæcum.

Corroding pain in stomach.

‖‖Intense pain, vomits nearly all food; since ten years.

‖‖Cardialgia for several years; several attacks every day, ending with vomiting and eructation; tongue pale, somewhat furred at back; retarded stool; small, weak pulse; emaciation.

[19] **Abdomen.** Heat and anxiety in abdomen.
Pain in abdomen; pressing, creeping; writhing; drawing.
Tearing; as if navel were to be torn out, pain goes into chest; colicky.
Colic: vertigo; watery vomiting, and diarrhœa; with rumbling and diarrhœa; with sweat; coming on suddenly in evening, with sensation of fainting and cold shivers; as if puffed up, abdomen painful, even when touching side.
Abdomen: hard, tense; tympanitic; distended, but not hard.
Hysterical spasms in belly.
Wind in abdomen awakens her; screams, thinking herself full of creeping things.
Sensation as if abdomen were expanded to extremest degree.

[20] **Stool and Rectum.** ‖Stool and urine suppressed.
Constipation: unsuccessful urging to stool; with convulsions; cardialgia; alternating with diarrhœa, and bleeding hemorrhoids.
Diarrhœa: with vertigo; with headache; with paleness of face; with increase of appetite; ceasing after a profuse sweat; evacuations involuntary; ‖of typhoid fever; ‖in childbed.
‖Stools: black, preceded by writhing in bowels, and delirium; blackish; smelling like carrion, painless, diarrhœic.
‖Cholera infantum: foul-smelling stools; strabismus; awakes with fright; pale face.
Coagulated blood passes from anus.
Hemorrhoidal flux for several days.
‖Hemorrhoids: painful; bleeding.
Before stool: twisting in bowels; writhing pain in abdomen.
During stool: colic, distension of abdomen, rolling in abdomen, vomiting, paleness; perspiration.
Worms; abdominal spasms, and frequent desire for stool; on awaking child shrinks from sight of objects, even from those with which it is familiar.

[21] **Urinary Organs.** Retention of urine: with sensation as if urine could not be passed on account of narrowness of urethra; after straining a while a few drops are passed, no stream being formed in spite of all straining; without any painful sensation, but as if a cylindrical body were being pushed through urethra, > after drinking vinegar.
Urine discharged in drops, with constant painful urging.
‖Kidneys secrete less urine than usual, or none, in acute

Digitized by Google

diseases, especially of children, eruptive fevers, etc., also in typhoid, or typhus; after miscarriage or labor; great desire to urinate, although secretion is suppressed.

Often obliged to make water, but passage was delayed for a minute before it came, and although it came out merely in drops, yet during forenoon a large quantity was discharged.

Suddenly, at night, an astonishing quantity of urine as clear as water; after delirium.

Profuse flow of burning urine.

Urine passes without any power; was able to retain it, but felt as if he had not power to close neck of bladder; sometimes a sensation as if urethra were too narrow and unable to expand.

Passed urine involuntarily; in bed; in walking and sitting.

‖Micturition dribbling; dribbles away very slowly and feebly.

‖Rigor during urination, rumbling in abdomen.

Male Sexual Organs. ‖Exalted sexual passion.

‖Lasciviousness; priapism; penis in erection, as in chordee; testicles drawn up.

‖Sexual irritation; constantly uncovering sexual parts; ‖indecent talking.

‖Very little consciousness; keeps his hands constantly on his genitals.

‖Constant pulling at genitals in little boys.

‖Onanism, causing epilepsy.

Impotence; from onanism, often but temporary.

Female Sexual Organs. ‖Nymphomania; sexual delirium; ‖talks about lewd subjects; sings obscene songs; insatiable sexual desire; has a lascivious smell of semen; excessive menstrual flow, with drawing in thighs, abdomen and upper limbs; after menses, sobbing and whining.

‖‖Ovarian tumor, size of hen's egg, lancinating pain; hysterical convulsions, during which patient shrinks back with fear on seeing any one.

‖Shrinking look, when awaking, in metritis.

Discharge of black blood from uterus.

Menorrhagia.

‖Metrorrhagia, with excessive loquacity, singing, prayers, and praise; full of strange and absurd ideas; drawing pains in abdomen, upper and lower extremities; sometimes passing large coagula.

‖Menstrual flow: excessive; drawing in thighs, abdomen, and upper limbs; very watery; too profuse, of black blood, in large clots; every three weeks, lasting longer than usual.

Digitized by Google

‖Dysmenorrhœa; ceaseless talking, mostly devout; very earnestly beseeching; drawing in thighs and aching in knees, with a sensation of being very tall; pains are unbearable, drive patient to despair.

‖During menses: loquacity; extreme degree of nervous erethism; convulsions; trembling and restlessness; strong smell as of semen; rank smell of body.

‖After menses: sobbing, whining; erysipelas of l. cheek.

[24] **Pregnancy. Parturition. Lactation.** ‖During pregnancy: mania; faceache; is full of strange ideas.

‖Threatened abortion; unceasing talking, singing, imploring.

‖Puerperal convulsions: frightened appearance before and during convulsions; sardonic grin; stammering or loss of speech; loss of consciousness and sensibility; frightful visions; laughter, singing; attempts to escape; fits are renewed by sight of some brilliant object, sometimes by contact; with copious sweating and great fear.

‖‖Convulsions: epileptic form; skin hot and dry; pulse sharp and quick (130); face red and bloated; eyes sparkling and projecting, with frothing at mouth; arms and limbs convulsed; head drawn backward. θPuerperal convulsions.

‖‖A woman, æt. 32, during fourth labor, was harshly manipulated in attempt to dilate os, became excited, scolded, struck, spat about her, cried and laughed, face flushed, pupils dilated, in great terror; spasms with writhing and floundering in manifold gyrations; every muscle in play, especially flexors and extensors; pudendum swollen, tender; os uteri tilted back, dilatable; child was born during spasm. θPuerperal convulsions.

‖Cadaverous odor of lochia; she is full of strange fancies and visions.

Too profuse secretion of milk in nursing women.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Voice: higher and finer; screeching; indistinct; vocal organs partly paralyzed; weak.

Attempts to speak hastily, cannot utter a word, only a bellowing or stammering; voice hoarse and croaking.

‖Constriction of larynx and thoracic muscles.

Hoarseness from screaming; with salivation; in morning.

‖Aphonia from great mental excitement, with hysterical and maniacal symptoms.

‖Aphasia in cerebral disease.

‖‖Laryngeal spasm for an hour, in cholera, at midnight, patient nearly suffocated, seemed to pray for help, with folded hands and despairing look.

‖‖Tries in vain to speak a word; facial muscles become

Digitized by Google

distorted, and an attack of suffocation sets in, lasting several minutes.

‖Spasmodic laughing at night; spasmodic weeping during daytime; perfect aphonia.

‖Loss of speech in cholera; total dumbness for several days.

[36] **Respiration.** ‖Rattling breathing: toward midnight; in whooping cough; in chill or sweat.

Breathing: at times stertorous and labored; snoring; hurried and difficult; very deep, with great exertion; inspiration slow, expiration quick; oppressed, with feeling of tightness across chest; anxious, during heat or sweat; oppressed in a high degree; stertorous as in croup.

Frequent sighs.

‖Excessive sense of suffocation.

‖Angina pectoris; tightness across chest; oppression, contraction; interrupted breathing.

‖Spasms of muscles of chest; single parts twitch; spasmodic motion of arms; sometimes chest fixed; breathing only with diaphragm and abdominal muscles.

‖A mixture of hyperæmia and spasm in consequence of affections of spine and diaphragm, with hiccough, sympathetic spasms of epiglottis.

‖Spasms of chest, particularly in hysterical females.

‖Spasmodic asthma.

Hard pressure on cartilages of third and fourth ribs, with difficult breathing; he is unable to inhale enough breath without great anxiety.

[37] **Cough.** ‖Cough: periodical, painless, spasmodic, shrill, screeching tone; < in evening and morning, from touching throat, from walking in wind, in vaulted rooms, after debauch, after fright, from looking at bright objects, from drinking water; of drunkards; dry, with excessive sense of suffocation; sonorous, croupy, barking.

When coughing while sitting, lower extremities are jerked up.

‖Whooping cough, barking, crouplike, with suffocating contraction of chest, violent beating of heart, rattling, anxiety, congestion, blood-spitting; convulsions; vomits all food, extremely emaciated, crying day and night, bleeding from nose with violent attacks.

During cough: palpitation, anxiety; constriction of chest, convulsions.

[38] **Inner Chest and Lungs.** Feeling of dryness in chest.

Aching pain in chest and sternum, excited by talking.

Feeling as if something turned around in chest; afterward heat in face.

Digitized by Google

Pain in breast, cough and other peri-pneumonic symptoms during recovery from meningitis.

‖Spasms in chest preventing breathing. θProsopalgia.

‖Diaphragmitis; violent burning in region of pit of stomach, extends along diaphragm, both sides; short, difficult breathing; pulse frequent, hard; laughing and crying; spasms; delirium, but is conscious of her condition and bursts out in bitter complaint about her misfortunes; on offering her water she struggles against it. θNymphomania.

‖Pulse 132; temperature 103.3; breathing very short and labored, with a continuous rattling in chest, > by a profuse, slimy, watery expectoration, mixed with reddish purulent matter; large bubbling râles all over both lungs, percussion sound flat over entire back; urine had not been voided since morning, but there had been a loose alvine evacuation at 1 P.M.; as soon as she falls into a doze, a profuse perspiration breaks out all over her; cough < by cold drinks; fits of suffocation follow cough, with desire to have doors and windows open; craving for beer; great desire for light, if room is dark she thinks she will be smothered. θPneumonia.

‖Right-sided pneumonia four days; pulse 102; temperature 103; very thirsty for cold water; moaning and great loquacity, with high delirium; wants to jump out of bed, can hardly be kept there; talks about horses in a barn that he has to feed, etc.; thinks one of his legs is cut off; wants his wife with him all the time, and light in room; imagines he is going to die; countenance besotted; coughs considerably and raises yellow and bloody mucus; severe frontal headache; high fever from 4 P.M. until 5 A.M.; no movement from bowels since commencement of sickness; urine clear, but dark-red; bronchial breathing and dulness on percussion over lower l. lung.

» **Heart, Pulse and Circulation.** Pressure about heart.

Heart's action feeble and slow.

Beating of heart could not be felt.

‖Palpitation; with anxiety.

‖Beating of heart so increased by motion he cannot speak for hours; trembling, twitching as in chorea; murmurs instead of regular sounds; after fright.

‖Angina pectoris. (See 26.)

‖Pulse: full, strong; frequent, hard; irregular; small and spasmodic; slow, in typhus; trembling or imperceptible; double and very quick, with quiet respiration; rapid; soft and feeble; quick, intermitting; tremulous, weak, unequal, sometimes intermitting.

Digitized by Google

‖Pulse small, weak, scarcely perceptible, heart tumultuous, carotids full, pulsating.

[30] **Outer Chest.** Cutting pain in sternum after lying down in night, ceases when wind passes off, but returns.

Chest eruptions.

‖Red rash on chest. θTyphus.

‖Spasms in pectoral muscles.

[31] **Neck and Back.** Throat externally swollen, as in mumps.

Great rigidity of muscles of neck and back.

‖Neck stiff; cannot bend head backward.

Drawing rheumatic pain from side of neck into limbs.

‖Pain in nape of neck; from neck over head.

‖Pain in cervical and upper dorsal vertebræ.

‖Tearing burning pains from neck to l. axilla.

Great sensitiveness along spine in cervical region, slightest pressure caused most violent outcries and raving.

Trunk equally rigid as limbs.

Back very stiff, not very painful.

‖Red, stupid, staring visage; inability to articulate; lying on l. side and constantly thrusting his r. side forward by spasms of r. erector spinal muscles. θAfter sunstroke.

‖Drawing pains in middle of spine, with drawing pain opposite to it, on back part of stomach.

Spot in back pains when touched.

‖Puts r. arm to small of back and draws mouth as if he had severe pain.

Pain as if beaten in back, shoulder and abdomen, excited by motion.

Chilly along back, like cold water.

Sweat on back.

Eruption on back.

Severe pains in loins.

Pains in lumbar region, like rheumatism.

Drawing pains in small of back.

The back is drawn backward.

‖Myelitis: trembling contractions; tonic epileptoid convulsions, consciousness undisturbed; sudden jerks through body, spots in back pain when touched; constant pain in cervical and upper dorsal vertebræ; muscles will not obey will; alternate exaltation and melancholy; vertigo when walking in dark; diplopia, cloudiness of vision; strabismus; stammering speech, or aphonia; spasms of muscles of face, or twitching of single parts; trembling, or paralysis of limbs.

[32] **Upper Limbs.** Pain in shoulder and back.

Fine, sharp stitches in forearm, and a rheumatic constrictive pain in deltoid.

Digitized by Google

‖Aching, drawing pain in r. arm, above elbow.
Jerks of elbows; stitches in forearm.
‖Arms thrown about; in neuralgia; thrown upward.
Constant motion of hands and arms as if spinning or weaving.
‖Convulsive movement of arms over head.
‖Raises arms over head, claps hands, makes graceful, gyratory motions.
Spasmodic motions of hands and forearms.
‖Arms convulsed, more than legs. θSpasms.
‖Beating with one arm, grasping with other.
Motion with hands, as if child, which was bent backward, feared every moment to fall deep down.
Grasping about with hands, not trembling and uncertain, but firm.
‖Trembling hands incessantly. θTyphus.
‖‖Moving hand: strangely, in different directions; straight forward; as if keeping off something; as if doing some work; as if searching something; as if endeavoring to seize some object which he indistinctly perceives in air; catching at imaginary things; picking; searching with hands on bedcovers; toward nose, ears and head; grasps throat, with sighing and groaning.
‖Contortion and wringing of hands.
Hands: opening and shutting; many motions with fingers; jerking; twitching; clenched (not thumbs), but can be opened; could not close hands to make a fist; dropped things; loosened in joints; trembling.
‖‖Difficult to bring hand to tumbler, or tumbler to mouth.
‖Fingers numb.
‖Hands and arms tremble.
Trembling of hand when he seizes anything; when eating.
Upper extremities hot.
Hands constantly cold.
Itching blotches in palms of hands.
Spots on arms like flea-bites.
‖Panaritium, pain intolerable, drives to despair; relieves pain of suppuration.

Lower Limbs. ‖‖Coxalgia, l. hip; violent distracting pains, when abscesses form.
‖Morbus coxarius, l. limb affected and about half an inch longer than sound limb; fistulous openings from l. hip.
‖‖Drawing pains in thighs.
Sharp stitches on r. shin bone.
Rheumatic, drawing, pressing pain in l. tarsus.
Numbness and stiffness of l. leg, with tickling, creeping feeling under cutis.
Creeping; in thigh; in foot; in toes.

Digitized by Google

Heels numb, sometimes painful.
Feet and lower extremities cold and palsied, rest of body agitated.
Paralysis of lower limbs, loss of speech; staring.
Feet loose in joints.
When placed on his legs, he would kick them forward, but could not stand on them, they could not remain quiet one minute.
Weariness of feet.
Spasmodic rigidity of lower limbs.
Twitching in limbs.
Trembling of feet.
Legs give way when walking; falls over his own feet.
Convulsions of l. lower limb; they commence with shocks, drawing limb inward and upward.
Spasms in leg.
Jerking in thigh; in knee joints.
Drawing up leg in sleep.
Pushing with feet. θTyphus.
In afternoon, a tremulous tossing of knees and feet, as of a violent chill, his mind being intact.
Twitching of toes.
Constant trembling of feet.
Inferior extremities cold.
Always cold feet.
Burning on dorsum of foot.
Burning and itching of feet.
Lower part of paralyzed lower limbs covered with sweat.
Limbs deep red.
Copper color visible on l. knee.
Inside of r. thigh, red and swollen. θTyphus.
Eruption on leg; itching on feet.
Inflamed, painful pustules on r. leg, emitting an acrid water.
Several boils on feet.

31 **Limbs in General.** Arms agitated, lower limbs quiet.
Drawing, laming, somewhat spasmodic pains in muscles.
Fingers and heels numb, latter at times painful, rheumatic headaches.
Limbs paralyzed after apoplexy, or from spinal softening.
Limbs feel numb, as if gone to sleep; hands and feet very cold, in nervous diseases, brain highly congested.
Twitching of hands and feet.

32 **Rest. Position. Motion.** Lying: on side vertigo <; pulsating heat in vertex >; in evening prosopalgia in l. cheek; cutting pain in sternum.
Sitting: passed urine involuntarily; while coughing lower extremities are jerked up.

Supports head with hands while bending or rising, after sunstroke.
As soon as he raises head from pillow: vomiting.
Puts r. arm to small of back: as if in pain.
Rising: pressure in forehead.
After motion: vomiting of bile; beating of heart very much increased; pain in back, shoulder and abdomen.
Walking: involuntary passing of urine; in dark, vertigo.

Nerves. Great inclination to lie down.
Weariness of limbs.
Great debility; lassitude and weariness.
Fainting: with headache; in forenoon, with great paleness of face; with great dryness in mouth; with colic; during cold stage; in typhus.
Fainting fits every day; suddenly falls as if dead, with pale face, almost imperceptible breathing, waking after one to three hours; if disturbed during paroxysm, she rolls about floor, becomes enraged, bites those around her.
Totters as if giddy; cannot make even a few steps without help.
Falls down with full consciousness, and bent backward so that heels touch occiput; suddenly snaps forward again.
Falling in dark; can walk well in light.
Excessive uneasiness and restlessness.
Constant restless movements of limbs and of whole body.
Great mobility of all extremities, still he is not able to rise.
The muscles of voluntary motion fail to follow influence of will; with great labor he carries a glass to his lips.
Entire loss of voluntary motion, although conscious.
Voluntary muscles do not obey will, in spite of his exertions to moderate his disagreeable motions.
Lameness of different parts of body.
Paralyzed limbs, after apoplexy.
Paralytic symptoms alternating with spasmodic.
Trembling: of lips; of limbs; of hands and feet; of whole body; as if child were in a great fright; of limbs, with mania-a-potu.
Jerking: of head from pillow; of extremities; through body.
Twitching: of hands and feet; of tendons; of extremities; during chill; through body, like chorea.
Starts and shocks through body.
Continual cramp in hands and feet.
Slow contracting and stretching of limbs, repeatedly in paroxysms.

Digitized by Google

Alternate contractions of hands and feet.

‖‖Convulsions: alternating with rage; opisthotonic, from bright, dazzling objects, a lighted candle, a mirror, or touch, child rigid as a board; when loudly spoken to, or when touched; rejects every kind of liquid, like in hydrophobia, moment it touches lips spasms return with great violence; shrieks violently in a hoarse voice.

Throwing about of arms and legs, most of arms; with opening and shutting of hands, and many motions of fingers.

‖Great movability of limbs.

‖Strange involuntary motions, great agility.

False perception of his limbs, missing steps going down stairs.

Sensation in joints as if all parts of limbs were completely separated from each other.

Sensation in arms and legs as if they were separated from body.

Hands and feet feel as if loosened in joints.

‖Progressive locomotor ataxia.

‖Chorea is preceded for some length of time by great irritability and sensitiveness, inclination to weep, with laughing and sprightly humor; trembling in one or more extremities; movements of extremities are performed with ease and with force; walking degenerates into hurried running; crawling in extremities.

‖Chorea in persons of weakly constitution, with increased action of higher nervous system, easy mobility of muscles subject to will, with simultaneous depression of abdominal nervous system, lassitude and retention of stool and urine.

‖Chorea: from fright; creeping in limbs, then violent movements, generally crosswise, of l. arm and r. foot; rotate arms over head; jump up, climb over tables, etc.; caused by cerebral disease; severe involuntary motion of tongue, with impossibility to utter a word.

‖Sardonic grin; on attempting to pick an object up from floor, hand would steer quite wide of it in spite of best efforts. θChorea.

‖Hysteria: preceded by great sensitiveness, weeping and laughing alternately; sexual excitement; full of strange and absurd fancies; full of fear, starts back and stares wildly, even at familiar objects; does not wish to be left alone; great loquacity; puffed-up face; praying and imploring; convulsions; rigid; nervous chills; frothing at mouth; faces appear elongated; shrinks back with fear, tries to escape; without loss of consciousness; from fright; attacks sudden, with screams, afterward drowsy,

Google

but cannot sleep; attacks periodical, and there are premonitory symptoms; tonic spasms, as catelepsy, limbs can be moved by others; stiffness of body, with loss of consciousness, preceded by headache, with vertigo.

Opisthotonos and trismus, with congestion to head; red face; heat of body, profuse urine; deep, snoring sleep.

‖Screams, then draws legs up and arms across chest, grinds and clenches teeth, becomes blue under eyes and around mouth, sometimes nausea or retching; urine high-colored when attacks are most frequent; asks for something to eat directly after attacks; pain in stomach, with attacks; during attacks, face first flushed, then pale, followed by blueness; skin dry and hot; body becomes stiff and bent backward, head retracted, knees drawn up, elbows pressed into sides, and hands clenched; eleven to twelve attacks daily, each lasting three minutes; moans in sleep after having had attacks; has thread-worms.

‖Convulsions of head and arms, with hiccough; moves head to and fro, this movement is only interrupted by hiccough.

‖Severe spasms, opisthotonos, emprosthotonos, alternating with somnambulism.

‖Spasms: alternation of clonic and tonic; body very hot; continually change character; abdomen puffed; nightly; from suppression of eruption, or exanthem failing to come out; suppression of all secretions and excretions.

‖Epilepsy: from fright; attacks sudden, with screams, afterward drowsy; aching in stomach; periodical; gives warning of approach by premonitory symptoms.

‖Epileptiform spasms, thrusting head continually in quick succession to r.; continual rotary motion with l. arm; pain in pit of stomach; obstinate constipation; deep, snoring sleep; low-spirited, fear of death; desire to be alone.

‖Epilepsy, after onanism.

‖Spasmodic symptoms, alternating with a trance; a woman suffering for three years, every Summer.

Immobility of limbs; unable to make least motion. θCatalepsy.

‖Cataleptic attacks, limbs easily moved by others, remaining in given position; before attacks headache, vertigo and heaviness of head.

‖Cataleptic state, after a wound on r. parietal bone; picking with hands on bedcovers.

‖Tetanus and trismus.

‖He can only slowly advance, as legs can only be raised in a stiff manner and feet remain in full extension;

patient falls easily, and tip of foot pointed inwardly, only touches ground.

‖ Extremities retain any position given to them, only eyelids reopen after they are closed; head remains wherever it is put, and when foot is flexed forward or backward on joint it remains so, or returns only slowly to its former position.

‖ Paralysis of one, convulsions of other side.

‖ Left side paralyzed, stammering unconnected words; sheds tears.

‖ Paralyzed limbs after apoplexy.

‖ Lies perfectly quiet, eyes half open, staring and tired-looking, upper eyelids move spasmodically, trembling mouth open, does not reply to any question.

‖ Traumatic neuritis.

Said to be effective for hydrophobia (vary dose even to production of symptoms).

\# **Sleep.** Drowsy and staggering.

After sleeping in daytime, wakes with an important and solemn look.

Great desire to lie down and sleep.

‖ Drowsiness succeeded by coma.

‖ Sleepy, but cannot sleep; after convulsions.

‖ Stupefied half slumber, or deep sleep with snoring; stertorous breathing.

‖ Coma, rattling respiration, bloody froth at mouth. θScarlatina.

‖‖ Child will not go to sleep in dark, but soon falls asleep in a lighted room.

‖ Restless sleep, lies with legs drawn up; moves arms in different directions; snores and utters inarticulate sounds.

‖ Walking about at night; got up after midnight, confused; rising up in bed; sat up in bed.

‖ Dreams with open eyes. θTyphus.

‖ Strange dreams of a frightful kind.

‖ Insomnia, with low adynamic fevers.

‖ During sleep: laughs; screams; starts; sexual excitement; twitching of limbs; emissions; spasms; sits up, looks up, talks incoherently.

‖ Restless sleep, full of dreams; tossing about in bed.

‖ Hallucinations: dancing in churchyard; hears two persons talk, but does not know who they are; as if bed were being drawn from under her.

‖ Awakens: does not know where he is; with a solemn air of importance; screaming, seems frightened, knows no one, shrinks away, or jumps out of bed; with staring eyes at one point; assumes a comically majestic ap-

Digitized by Google

pearance; sees as through a gauze; violent thirst; tired; with itching.

[35] **Time.** Morning: inconsolable; congestive headache on getting up, tearing in head and neck <; dimness of vision; vomiting; cough <; feet cold early; itching over whole body.

2 A.M.: paralytic attacks.

3 A.M.: violent spasms.

Forenoon: fainting.

During day: weeping; after sleep wakes with an important and solemn look.

1 P.M.: alvine evacuation.

Afternoon: tremulous tossing of knees and feet; chilliness along back; first heat of head and face, then general coldness; fever.

Evening: delirious talk <; sad with thoughts of death; after sunset unsteady gait; congestive headache >; rheumatic headache <; neuralgia of cheek; prosopalgia in l. cheek; nausea with profuse salivation; vomiting of mucus; sudden colic; cough <; fever.

Night: hallucinations <; disposed to weep; vertigo <; rheumatic headache <; agglutination of eyelids; neuralgia of cheek; spasmodic laughing; singultus with restlessness; suddenly an astonishing quantity of clear urine was passed, after delirium; cutting pain in sternum after lying down; walking about; shuddering of limbs; profuse sweat.

Midnight: laryngeal spasm for an hour; toward, rattling breathing.

[39] **Temperature and Weather.** Warmth: tearing in neck and head >; otalgia >; neuralgia of cheek first > then <.

Wind: walking in, cough <.

Cold: tearing in neck and head <; drinks, cough <; very sensitive to draft.

[40] **Fever.** Shivering sensation in chin.

Chills: run down back; and general coldness, with red face and twitchings; with great sensitiveness to uncovering; with heat of head and shuddering of limbs; at night; through whole body, with single jerks, partly of whole body, partly of single limbs, of elbows and knee joints, without any thirst.

Creeping: under skin; from l. side into thigh, or into toes of same side, thence into abdomen, whence creeping again descends into r. thigh and foot.

Chilliness: along back in afternoon; chilliness and trembling, feels as if cold water were poured down her back; of limbs.

Google

Cold shivers with colic.
Shuddering: and diuresis; over whole body, and grinding teeth.
Skin cold, hands and feet cold; pulse threadlike, easily compressed, small.
Feet cold early in morning, nevertheless very sensitive to least cold draft.
Coldness of whole body; limbs and trunk are cold all over.
‖Cold body, hot face.
‖Stiffness and coldness of extremities, with unusual redness and bloatedness of face.
‖Fever in children: cry out in sleep; start, jerk; eyes half open, pupils large; urine suppressed.
Afternoon, first heat of head and face, then general coldness, then general heat.
Heat: anxious with vomiting; delirium, thirst and sweat; in face; of whole body, face vivid red; at same time sweat; dry over whole body; in face, when coldness and chilliness passed; and talking during sleep; covers himself carefully, if he puts a finger out from under cover, pain becomes very violent.
Covers up during heat.
Fever: in afternoon; in evening; first heat in head, afterward coldness of whole body, followed by heat of whole body with anguish, sleeps during heat, after awaking violent thirst, feels a stinging in palate until he drinks.
During hot stage: restless and anxious, often with screams; thoughts of suicide; excitable; talking, singing and trilling; vertigo, headache, pains in eyes; impaired speech; puffed-up abdomen.
During heat and sweat, numbness or crawly trembling of limbs, drowsiness and stupid sleep.
‖Heat of face, alternating with coldness of body.
‖Fever, with profuse sweat, which does not relieve.
Sweat: with great thirst; cold all over; with delirium; with impaired vision or shunning light; oily or putrid odor; on forehead; in back; covers paralyzed limbs; profuse at night.
During sweat: dulness and dizziness; apoplectic symptoms; anxiety, violent screaming, sighing and moaning; sometimes changeable mood and often trilling and singing.
‖Boy, æt. 12½, suffering since three years old with peculiar febrile attacks, for first six years accompanied by an asthmatic condition and blueness of face; fever appears every two or three weeks, with intermissions of

same duration, appears every afternoon between three and four; no chilliness; presence of fever can often only be determined by use of thermometer; no sweat; extreme activity during fever; writes constantly, although he cannot form his letters; distorts face and talks a great deal; duration of fever variable; sleep disturbed by many dreams; pupils normal; functions of body normal; hearing somewhat impaired, particularly during attacks; during fourth and fifth years had various hallucinations.

‖E. C., æt. 25, had sunstroke twice, afterward was subject for some time to epileptic convulsions, which only occur at present during febrile stage of paroxysm; has had quotidian ague four or five times in last three months, each time palliated by chloral hydrate and suppressed by quinine; chill usually began at 9 or 10 A.M., with pain in head and limbs, great thirst, headache, nausea and vomiting; fever comes on slowly with congested face, eyes heavy and dry, pain becomes intense, with general muscular twitchings; during convulsions eyes become bright and staring, body rigid, jaws locked, frothing at mouth, with insensibility; duration of paroxysm from five to fifteen minutes, after which he is unconscious of all that transpired; sometimes three or four spasms in succession. θAgue.

‖Congestive fever; heat of face with moist and cold limbs.

‖Nightly fever, child cries out in its sleep; starts and jerks; sleeps with its eyes half open, pupils widely dilated, urine and feces suppressed.

‖Worm fevers.

‖In bilious fever; shrieking voice, false conception of things.

‖Gastric fevers, with jerking of arms and fingers.

‖Bilious typhoid fever; loquacious delirium with constant desire to get out of bed; yellowish-brown tongue dry on centre; lips sore and cracked and sordes on teeth.

‖Bilious typhoid fever; swelled, dry, coated tongue, with no desire for water, although his mouth is dry, he has to moisten it; suppression of urine; lies constantly on r. side, as it is painful to lie on l. side.

‖Typhus; moving her trembling hands incessantly; could not talk.

‖Typhus; delirious, singing, whistling, conversing in different languages, or jumping out of bed to run away, or to go to his business.

‖Typhus; after throbbing headache, black before eyes,

Digitized by Google

fainting away; grasping with hands and pushing with feet, confused talking; did not know his family or friends; calling bystanders as if they were absent; pupils extremely dilated, insensible to bright light or sunlight, pulse slow; called for help, thought he would die; next day sopor, with loud snoring.

‖Typhus, with loss of consciousness; lying flat, with staring, immovable pupils; desire to run away; with rage, talkative, furious delirium, singing, laughing, whistling, constant restlessness, involuntary strange motions with great agility, dreaming with open eyes, loss of sight, loss of speech, red pimples on chest.

‖Typhoid fever of remittent character, pains beginning in l. ear and terminating in l. side of chest, with dry cough, which < pain.

▮In typhus, typhoid, or other fevers, when patient frequently raises or jerks head from pillow.

▮Typhoid fever, with parched and dry tongue; eyes dull and heavy; passages from bowels very dark, almost black.

▮Typhoid fever, involuntary muscular motions characterized by extraordinary celerity, also a peculiar morbidly altered state of mind, risus sardonicus, spasmodic distortion of facial muscles, oblique appearance of objects; lies either unconscious with staring eyes, dilated, immovabte pupils, or talks continually, and dreams with open eyes, trying to grasp everything with hands.

‖Stupor, with delirious muttering; constant raising of head from pillow or boring into pillow, so that he finally pushes head against headboard of bed; raises hands to face, ears, etc., or waves them in air, or scratches on wall; violent twitching of muscles; rigidity of back, and limbs; masseter muscles rigid, clenching jaws; pupils dilated, eyes injected and staring; frowning; moving of lips back and forth; coldness of face, chin, nose, ears, hands and feet; involuntary loose but small stools; no urine; hot sweat on body; tongue, when last seen, red on edges and tip dry, and heavily coated in centre; delirium constant; patient unconscious, yet wanted to get up and dress, or to walk about room; fever and delirium < from 4 P.M. to midnight.

‖Abdominal typhus, in a boy, æt. 14; on looking at him he stared, and there appeared on his forehead, and in his emaciated face, deep wrinkles; cried out loud till he became hoarse; mouth and lips ulcerated to such a degree that he declined to drink on account of severe pain caused by any fluid or solid coming in contact with his mouth; lips peeling off, and bleed when he picks

Digitized by Google

them; abdomen sunken, and tender to contact; vomited occasionally mucus, with specks and streaks of blood; frequent watery, offensive stools; no sleep; no appetite; urine scanty; pulse very frequent and not regular; great emaciation.

‖ Very restless, uttering inarticulate cries day and night; tossing arms, legs and head about continually; high fever; tongue coated yellow, and dry; mouth open, and covered with a thick, dry coating; lips sooty; snoring breathing; thin, fetid profuse diarrhœa, involuntary; conjunctiva bulbi much injected; much muco-purulent matter in inner angles of eyes. θTyphoid fever.

" **Attacks, Periodicity.** Periodical: neuralgic pains in forehead from 9 A.M. until noon, by 3 P.M. has passed away, but returns in morning; cough; attacks of hysteria; epilepsy.

Alternation: exalted states and settled melancholy; lively delirium and fright; coldness of body anxiousness and thirst; anticipations of death and rage; laughing and crying out; spasms of chest and fits of laughter; headache and tumefaction of abdomen; spasmodic and paralytic symptoms; constipation and diarrhœa; exaltations and melancholy; paralytic and spasmodic symptoms; contractions of hands and feet; convulsions and rage; weeping and laughing; severe spasms and somnambulism; clonic and tonic spasms; heat of face; and coldness of body.

Every half hour: convulsive attacks; spasms.

For six hours: complete blindness.

For six or seven hours: limbs lame.

Every day: fainting fits, eleven to twelve attacks.

Every afternoon: fever appears.

Every night: since six weeks had visions.

Nightly: spasms; fever.

From 4 P.M. to 5 A.M.: high fever.

From 4 P.M. to midnight: fever; delirium <.

From 8 P.M. until 11 P.M.: pain in r. temple.

From 9.30 P.M. until midnight: as if bed were drawn from under her.

For several days: speechlessness; hemorrhoidal flux.

Since three days: at 9 A.M. severe tearing pain over r. side of face.

For three or four days: stitching tearing at different times; prosopalgia.

For five days: walking day and night.

Every two or three weeks: fever.

After Fall equinox: inconsolable.

For several years: rheumatic pain on top of head.

Google

Since ten years: intense pain and vomiting of food.

"**Locality and Direction.** Right: hallucinations as if near mastoid process; heard loud voice on side of occiput; intense pain in side of head; when lying on side felt as if bed were being drawn from under her; throbbing headache in temple; in spasms moves head mostly to side; redness and swelling about eye; erysipelas of cheek, nose and face; sided pneumonia; thrusting side forward by spasms of erector spinal muscles; drawing pain in arm; stitches on shin bones; inside of thigh red and swollen; pustules on leg; violent movements crosswise of foot; thrusting head to side; creeping into thigh and foot; lies constantly on side.

Left: tendency to fall; head numb on side; pain in ear down to cheek; tears come from eye when otalgia is most violent; neuralgia in cheek near ear; muscles of side of face in an oscillating motion; prosopalgia of cheek; prosopalgia began over eye to pass over cheek ala nasi; side of face distorted with painless convulsions; as if side of face were swollen; erysipelas on cheek; pressing pain in half of stomach; dulness on percussion over lung; after sunstroke lying on; coxalgia; morbus coxarius; fistulous openings from hip; pain in tarsus; numbness and stiffness of leg; convulsions of lower limb; copper color visible on knee; violent movement crosswise of arm; rotary motion of arm during spasm; side paralyzed; pains beginning in ear and terminating in side of chest; eruption of small blisters on leg.

"**Sensations.** As if spinning or weaving; as if objects were smaller than they really are; as if dizzy; as if he had no limbs; as if drunk; head as if drawn backward; starts as if a shock of electricity had passed through her body; as if eyes were forced out; eyelids as if swollen or as if oppressed with sleep; as of wind rushing out of ears; as if sawing cheek bone; as if hole were there and as if brain were touched; as if nose were stopped; as if pins and needles were in forehead; as if he were seeking something; as if bones were sawed through; as if l. side of face were swollen; as if some teeth would fall out; teeth as if pressed together; moving fingers as if searching for something; cries as if from sight of hideous objects; inner mouth as if raw; soft palate as if drawn down; as of boiling water in throat; as if a ball were wedged in throat; as if falling; as if he would vomit; as if navel were to be torn out; abdomen as if puffed up; as if abdomen were expanded to extremest degree; as if urine could not be passed on account of narrowness

Digitized by Google

of urethra; as if a cylindrical body were being passed through urethra; as if he had not power to close neck of bladder; as if urethra were too narrow; as if very tall; as if something turned around in chest; limbs feel as if gone to sleep; as if parts of limbs were completely separated from body; hands and feet as if loosened in joints; as if cold water were poured down her back.

Pain: in nape of neck; in cervical and upper dorsal vertebræ; in head; in r. temple; in eyeball; in l. ear, down to cheek; spreads over all branches of facial nerve; in submaxillary glands; pain in upper teeth, then in lower; in stomach; in cæcum; in abdomen; in breast; in nape of neck; from neck over head; in cervical and upper dorsal vertebræ; as if beaten in back, shoulder and abdomen; in lumbar region; in cervical and upper dorsal vertebræ; in shoulder and back; in pit of stomach.

Terrible pain: of hip disease.

Intense pain: in stomach; in r. side of head.

Severe pain: in loins.

Great distress: in pit of stomach.

Cutting pain: in sternum.

Lancinating pain: ovarian tumor.

Tearing: in neck and over head; in wing of nose; over whole r. side of face; in abdomen into chest.

Tearing burning pains: from neck to l. axilla.

Stabbing: in r. temple.

Shooting: to back of head; in ears; in wing of nose.

Stitches: in ear; fine, sharp in forearm; on r. shin bone.

Clawing pain: in head.

Corroding pain: in stomach.

Neuralgic pain: in forehead; in cheek.

Sticking: pain in r. temple.

Scratching pain: in palate.

Stinging pain: in throat; in palate.

Contracting burning pain: in throat.

Pressing pain: in stomach; in l. half of stomach; in abdomen; in l. tarsus.

Drawing pain: in back part of stomach; in abdomen; in upper and lower extremities; from side of neck into limbs; in middle of spine and opposite to it; in small of back; in r. arm; in thighs; in l. tarsus; in muscles of limbs.

Rheumatic pain: on top of head; in deltoid; in l. tarsus.

Dull pain: in occiput.

Aching: in knees; in chest and sternum; in r. arm.

Writhing: in abdomen.

Cramps: in hands and feet.

Google

Throbbing: in head; in teeth.
Burning: in throat; along diaphragm; at pit of stomach; in region of pit of stomach; on dorsum of foot; of feet.
Soreness: of throat.
Sensitiveness: along spine.
Heat: in whole head; in abdomen; in face.
Pulsating: in vertex.
Jerking: in thigh; in knee joints.
Drawing: in thighs, abdomen and upper limbs.
Pressure: in forepart of head; on forehead; on cartilages of third and fourth ribs; about heart.
Constriction: about throat; of muscles of throat; of œsophagus; of chest.
Tightness: across chest.
Heaviness: of head.
Oppression: at pit of stomach.
Anxiety: in abdomen.
Lightness: of head.
Dulness: of head.
Weariness: of feet; of limbs.
Lameness: of different parts of body.
Stiffness: of l. leg.
Numbness: on l. side; of l. leg; heels; of fingers.
Dryness: of mouth; of tongue; of fauces; of throat; in chest.
Tingling: in hands; in forehead.
Creeping: in abdomen; under cutis of l. leg; in thigh; in foot; in toes; in limbs.
Crawling: on chin; in extremities.
Itching: in nose; of feet; over whole body.
Shivering sensation: on chin.
Coldness: of face, chin, nose, ears, hands and feet.

"**Tissues.** Abscess, with redness, heat and intolerable pain.
Mitigates terrible pains of hip disease, tumors, abscesses, anthrax, whitlow, etc.
‖Plethoric, especially young persons.
‖Emaciated, cries day and night; cough.
‖Anasarca, after scarlatina.

"**Touch. Passive Motion. Injuries.** Touch: on spot on os petrosum, as if brain were touched; stomach very painful; on side abdomen painful; spot in back pains.
Pressure: pressing pain in stomach <.
Rubbing: increases itching.

"**Skin.** Skin: hot and dry; flabby and dry; dirty.
‖Anasarca after scarlatina.
‖Emaciation; like an old man; with cardialgia.
Itching over whole body, early in morning, after waking.
After dulness of senses, and anxiety, a red rash breaks out on back, with sweat.

Google

Violent fever; delirium; tremors in limbs; general eruption on skin, swelling, itching and inflammation.

Agony, high fever, burning heat and redness of skin, with itching eruption over whole face and trunk.

‖‖Suppression of an eruption, or eruption fails to come out.

Petechiæ on face, neck and breast.

Many pimples, like blotches on several parts of body, also in palms of hands, with a stinging itching like nettles, increased by rubbing.

Spots on arm like flea-bites.

‖Measles: fever before eruption, great heat of body and copious sweat; very great redness of puffed-up face; peculiar delirium; full of fear and anxiety; children see frightful figures, rats and mice, attempted to hide; spasmodic affection of œsophagus.

‖Scarlet redness over whole body; peculiar boiled-lobster hue of scarlatina.

‖‖Intensely red rash on skin, resembling scarlet fever, but having a more shining appearance.

Very marked flushing of hands, arms, face, neck and back; rash resembled that of scarlatina simplex, the bright red disappearing under pressure, and immediately returning after removal of pressure.

‖Scarlatina, similar to *Bellad.*, but eruption is less bright, shows a disposition to recede or fade, and urine is small in quantity or secretion suppressed; parenchymatous nephritis; delirium, hallucinations, convulsions; great dryness of throat, compelling frequent drinking; swelling or paralysis of tongue; it hangs out of mouth.

‖‖Child, æt. 6, violent vomiting; high fever; restlessness, with somnolence; pulse 140; tongue dry; throat sore; tonsils swollen; fetid breath; fifth day parotid and submaxillary glands much swollen, especially r.; swallowing difficult and painful; could scarcely open mouth; respirations snoring or rattling, whether asleep or awake, as in diphtheria; breath very offensive; deafness; dirty, putrid sanies from mouth and nose; pulse 150; rash fading; wild mania, with terror, imagined he was to be killed, but struck friends who came to help him; desire to leave bed, imagined he was driving a horse; feigned he would take medicine, often poured it out. θMalignant scarlatina.

‖Restless; skin itching; rash coppery red; skin dry, hot.

Skin suddenly turning dark, red-brown, like an Indian's.

Front of chest copper-colored.

Fifth day, many vesications on skin, filled with a pellucid fluid, extremely numerous and very small, many of them not larger than a pin's head, covering her whole face and trunk, drying up on sixth day.

Eruption of small blisters on l. leg near calf; spreading over whole leg; blisters very painful, with much heat and redness, and oozing a hot, sharp, acrid fluid.
Boils: several on feet.
‖Burns, and scalds.
‖Abscesses and tumors, with intolerable pain, driving to desperation.
‖‖Ulcers: irritable, with thickened edges, and a sanious discharge; promotes granulation and cicatrization; syphilitic; after mercury; scrofulous, of ill condition.
Old cicatrix very red.

[47] **Stages of Life, Constitution.** ‖‖Children especially; chorea, mania, fever.
‖‖Young, plethoric persons.
Boy, æt. 2, light hair, lively and intelligent, after fright; stuttering speech.
Boy, æt. 3, father insane; mental derangement.
Boy, æt. 3, ill a year; spasms.
Girl, æt. 4; loss of speech.
Girl, æt. 4; spasms.
Girl, æt. 5; mental disturbance.
Child, æt. 6; typhoid fever.
Boy, æt. 6; malignant scarlatina.
Boy, æt. 10, scrofulous, after a fall from swing; spasms.
Girl, æt. 10, pale, anæmic, slender, unable to study much, with sore eyes, etc.; chorea.
Boy, æt. 11, after fright; mental derangement.
Boy, æt. 11, after fright four months previously; chorea.
Girl, æt. 11, weak, sensitive; chorea.
Girl, æt. 12, lively disposition; chorea.
Boy, æt. 12½; periodical fever.
Girl, æt. 13, severe attack of facial erysipelas; delirium.
Girl, æt. 13; chorea.
Young man, æt. 14; typhoid fever.
Girl, æt. 16, nervous, blonde, delicate skin, frequently suffering from headache; prosopalgia.
Young man, æt. 18, tall, slim; typhoid fever.
Miss S., æt. 19, delicate, blonde, blue eyes; pneumonia.
Young man, æt. 22, frivolous, has had three previous attacks; mental disturbance.
Man, æt. 22, suffering several days; mania.
Young woman, æt. 22, single, strong and healthy, dark hair, brown eyes; prosopalgia.
Mrs. S., æt. 23, bilious, nervous temperament; puerperal convulsions.
Woman, æt. 23, single, choleric temperament; spasms.
Man, æt. 24, has had several attacks during last five years; delirium tremens.
Man, æt. 25, after severe fright; affection of heart.

Digitized by Google

Man, æt. 25, had sunstroke twice, for some time afterward subject to epileptic convulsions; ague.
Man, æt. 26, sanguine temperament, after fright; mania.
Man, æt. 28; delirium tremens.
Man, æt 29, short, thick set; delirium.
Woman, æt. 30, single, weak, timorous disposition, after fright; melancholia.
Lady, æt. 30, leuco-phlegmatic temperament, had five children, each time lost much blood; vertigo.
Woman, æt. 30; vertigo.
Man, æt. 30, blonde, robust; pneumonia.
Man, æt. 32; delirium tremens.
Woman, æt. 32, during fourth labor, was harshly manipulated in attempts to dilate os; convulsions.
Man, æt. 33, tendency to obesity; prosopalgia.
Man, æt. 35, light complexion, mild, taciturn, blue eyes, light sandy hair, amiable disposition, during an attack of erysipelas of head and face; delirium tremens.
Man, æt. 36, suffering several months; mental disorder.
Man, æt. 37, tall and thin, irritable nervous system; prosopalgia.
Woman, æt. 37, emaciated, phthisical; typhoid fever.
Man, æt. 40, suffering three weeks; mental disorder.
Man, æt. 40; delirium tremens.
Woman, æt. 40; spasms.
Man, æt. 40, suffering four years; epilepsy.
Man, æt. 41; delirium tremens.
Woman, æt. 42; delirium tremens.
Woman, æt. 42; delirium tremens.
Man, æt. 42; mental disturbance.
Lady, æt. 42, robust, dark complexion, black eyes, subject to rheumatism; headache.
Woman, æt. 42, after uterine hemorrhage; prosopalgia.
Woman, æt. 42, strong, dark skin, eyes black; prosopalgia.
Man, æt. 43; mania.
Man, æt. 45, strong; typhoid fever.
Lady, æt. 62, suffering several weeks; mental derangement.
Weaver's wife, æt. 62, had in her first childbed puerperal mania; got better, but had, for fifth time, several attacks, even after six years; mania.
Woman, æt. 65, nervous temperament; insanity.

[48] **Relations.** Antidoted by: Vinegar, lemon juice, tobacco injections; senna for cerebral symptoms; *Bellad.*, *Hyosc.*, *Nux vom.*
It antidotes: *Mercur.*, *Plumbum.*
Compatible: after *Bellad.*, *Cuprum.*
Incompatible: coffee.
Compare: *Secale* (delirium, metrorrhagia).

STRONTIANA CARBONICA.

Carbonate of Strontian. S_2O, CO_2.

Proved by Nenning, Schreter, Seidel, Trinks and Woost, Hartlaub and Trinks, R. A. M. L.

CLINICAL AUTHORITIES.—*Cardalgia*, Hartmann, Rück. Kl. Erf., vol. 1, p. 664; *Cramps in legs*, Veith, Hom. Rec., vol. 3, p. 151; *Sprain of ankle*, Hg., A. J. H. M. M., vol. 4, p. 60.

[1] **Mind.** Apprehensive and anxious, as from a bad conscience.
Ill-humored, angry, impetuous; is inclined to beat everything that comes in his way.
Great forgetfulness.
Disinclined to talk.

[2] **Sensorium.** Vertigo: and nausea, in morning; at noon, with pressive headache in l. side; in afternoon, with sticking headache in forehead; in evening, with weariness; with pressing sensation from within outward, in temples; as from drinking wine.

[3] **Inner Head.** Burning in forehead.
‖Threatening apoplexy, with violent congestion of head; hot, red face every time patient walks; exertion increases circulation toward head; some erethism of chest; smothering feeling about heart; cannot rest; feeling as of a load on chest; during climaxis; > wrapping head up warmly, cannot bear least draft of air.
Tension from vertex to upper jaw, as if head were expanded from within, and as if scalp were too tight, < in evening when lying low with head, slowly increasing and decreasing, > from heat.
Stitches in head.
Dull or pressive pain in occiput.
Boring pain in a small spot in r. side of occiput.
‖Headache > when wrapping head up warmly.

[4] **Outer Head.** ‖Chilliness over scalp and upper back; < at night and in cold air.
Tension on head (externally and internally), < in evening and from cold, > from warmth, especially in heat of sun.
Sensation of heat of head and face, with red face, anxiety and sleepiness.

[5] **Sight and Eyes.** Burning in eyes; < when moving them; followed by sticking; with lachrymation.

Pressing pain on upper surface of eyes.
Pressing in eyes after rubbing them, which causes one to see red and blue margins.
Green spots before eyes in dark.
Luminous vibrations before eyes; flickering.
‖Photopsia, remaining after an operation, particularly when objects appear covered with blood.
Twitching of l. upper lid.
Itching in inner canthi.

[6] **Hearing and Ears.** Roaring and tearing pains in r. ear, in paroxysms.
Sticking in front of l. ear, extending into it.

[7] **Smell and Nose.** Nosebleed.
Dark bloody scabs are blown from nose.

[8] **Upper Face.** ‖Itching of r. cheek, becoming < after scratching.
Violent boring pain in r. cheek bone.
Neuralgic, tearing pain in face.
Flushes in face and violent pulsation of arteries.

[9] **Lower Face.** Face red, burning hot.
Tearing pain in r. lower jaw.
Stitch in l. side of chin, extending into articulation of jaw.

[10] **Teeth and Gums.** Front teeth feel on edge.
Violent clawing in teeth.
A screwing-together sensation in teeth.
Jerking, tearing pain in teeth and in roots.
Swelling, burning, and stitches in gums.

[11] **Taste and Tongue.** Taste: bitter, in morning; dry, earthy.
Tongue: tip painful; coated with mucus, feeling dry.

[12] **Inner Mouth.** Bad odor from mouth.
Mouth slimy, or dry on awaking.
Sensation of numbness in mouth, early on waking.
Heat emanating from mouth and nose, with thirst.
Fauces inflamed and painful (stinging) during deglutition.

[13] **Throat.** Rawness and dryness provoke hawking and hacking cough.
Pain in l. side of throat on swallowing.
Itching in pharynx, on swallowing.

[14] **Appetite, Thirst. Desires, Aversions.** No appetite; meat disgusts him.
Hunger soon after dinner.
Violent thirst, especially for beer.

[15] **Hiccough, Belching, Nausea and Vomiting.** Violent long-continued hiccough, causes pain in chest.
Empty eructations.
Nausea: with burning heat in face; with diminished appetite; with weakness and ill-humor.

Google

[17] **Scrobiculum and Stomach.** Pressure in pit of stomach, aching in stomach, especially after a meal, with fulness.
Pressure in stomach; > by eating; < on walking.
Severe pressure in stomach, after eating; chronic.
Constriction in stomach, with uprisings of clear water.
Burrowing in stomach and upper abdomen.
Twinging feeling in stomach.
Cutting in epigastric region.
Stitches in stomach, now in r., now in l. side.
[18] **Hypochondria.** Pressive bruised pain in hypochondria.
[19] **Abdomen.** Colic with flatulent distension, diarrhœa, and chilliness.
[20] **Stool and Rectum.** Diarrhœa of yellow water.
Diarrhœa, < at night, is scarcely off vessel before he must return, > toward morning, at 3 or 4 o'clock.
Stool retarded, compact and in large lumps; expelled with great effort and violent pain in anus.
After stool: contractive sensation in rectum; burning at anus.
[21] **Urinary Organs.** Urine: pale, strongly smelling of ammonia; diminished.
[23] **Female Sexual Organs.** Menses: too early, and of too short duration; retarded, discharge being serous at first, later clots of blood.
Leucorrhœa while walking.
[25] **Voice and Larynx. Trachea and Bronchia.** Hoarse voice.
Irritation in larynx causes violent dry cough at night.
[26] **Respiration.** Dyspnœa, with hot, red face, while walking.
[27] **Cough.** Cough: constant, < at night; short, now and then with pressive pain in chest; dry, hacking, in evening; from irritation in larynx or trachea.
[28] **Inner Chest and Lungs.** In chest: constriction; pressive pain, especially on motion.
Spasmodic drawing and clawing; stitches on coughing and inspiring.
[29] **Heart, Pulse and Circulation.** Dull intermitting pressure in præcordial region.
Violent beating of arteries and of heart.
[30] **Outer Chest.** Sternum painful to touch; burning in l. side, extending upward; pressure; pressive pain beneath; lightning stitches from both sides through chest, in a vertical direction.
Stitches below ensiform cartilage.
Drawing pain in r. pectoral muscles.
[31] **Neck and Back.** Tearing tension in nape of neck, as if tendons were drawn up.
Drawing, sticking pain in small of back.

Digitized by Google

Sensation as if bruised in back and sacrum, < from stooping and when touched.
Slight drawing pain along spine in afternoon, changes to a seated, dull tearing in joints of legs, < by walking.

[32] **Upper Limbs.** Painful paralytic sensation in l. shoulder, and elbow joint, at night.
Constant burning pain in r. shoulder joint.
Tearing rheumatic pains in shoulders and arms, particularly in joints.
Veins of arms and hands injected and tense; prostration; ill-humor.
Weakness of r. arm as if all power had left it, > on motion.
Violent tearing pains in joints of r. arm, < in evening, in bed; l. arm slightly affected.
Trembling and numbness of fingers.

[33] **Lower Limbs.** Rheumatic, paralytic pain, tearing, drawing, jerking; gnawing as if in marrow of bones.
‖Swelling and caries of femur, usually in scrofulous children; diarrhœa.
‖Cramps in calves and soles of feet, especially in persons who suffer from cold feet.
‖Chronic sprains, particularly of ankle joint, after failure of *Ruta* and *Arnica;* œdema about joint.
‖Œdematous swelling of r. foot, sprained some years ago (*Bovista* in some cases).
Sensation of icy coldness on outer surface of calf, the length of a finger.
Icy-cold feet in evening.

[31] **Limbs in General.** Rheumatic pains, especially in joints, < in evening, and at night in bed.
Great emaciation.
Immovability of limbs (on one, r., side of body) like paralysis, in evening.
Most symptoms can hardly be determined as to locality, but seem to be in marrow of bones.
One side of body is generally only affected (r. side).

[30] **Rest. Position. Motion.** Lying: low with head, tension in head <.
Stooping: bruised sensation in back and sacrum <.
Walking: causes hot, red face; pressure in stomach <; leucorrhœa; tearing in joints of legs <.
Motion: of eyes < burning; pressive pain in chest <; weakness of r. arm >.

[36] **Nerves.** ‖Great weakness in morning; weak, tremulous sensation.
A single sudden jerk through upper part of body on falling asleep, makes her wide awake.

Pains appear like phantoms, can scarcely tell where they are.

[37] **Sleep.** Restless sleep; frequent waking.

When going to sleep: twitching and starting; jerk through body awakens her.

Dreams: of fire; grieving; filled with joy.

[36] **Time.** Morning: nausea; taste bitter; diarrhœa < toward 2 or 3 o'clock; great weakness; perspiration; trembling sensation in body <.

Forenoon: chill.

Noon: nausea, with pressive headache in l. side.

Afternoon: nausea, with sticking headache; drawing pain along spine.

Evening: nausea, with weariness; tension over head <; dry, hacking cough; tearing in joints of arm <; icy-cold feet; rheumatic pains <; immovability of limbs, like paralysis; tension of skin on various parts; trembling sensation in body <.

Night: chilliness over scalp <; diarrhœa <; irritation in larynx causes cough; cough <; paralytic sensation in shoulder and elbow; rheumatic pains <; dry heat, with thirst; perspiration mostly on affected parts.

[38] **Temperature and Weather.** Heat of sun: > tension on head.

Heat: tension over head >.

Wrapping up warmly: threatened apoplexy >.

Desire to keep warm.

When uncovering: pains <.

Cannot bear least draft of air: threatened apoplexy.

Cold air: chilliness over scalp and back <.

[40] **Fever.** Pulse full and hard, with violent pulsation in arteries.

Chill in forenoon, descending from sacrum to posterior part of thighs.

Chilliness from head over shoulder blades.

Dry heat at night, with thirst.

Heat seems to stream from mouth and nostrils.

Perspiration during morning hours; at night, mostly on affected parts; pain < when uncovering.

[41] **Attacks, Periodicity.** Alternations: of pain and itching.

[42] **Locality and Direction.** Right: boring pain in spot of occiput; boring in ear; itching of cheek; violent boring in cheek bone; pain in lower jaw; pain in pectoral muscles; burning pain in shoulder joint; weakness of arm; tearing pain in joints of arm; swelling of foot; immobility of limbs.

Left: headache in side; twitching of upper lid; sticking in front of ear; stitch in chin; pain in throat when

Digitized by Google

swallowing; burning in side; paralytic sensation in shoulder and elbow joint.
One side of body is generally only affected (r. side).
Now r. now l. side: stitches in stomach.
From within: as if head were expanded.
From within outward: pressing in temples.

"**Sensations.** As of a load on chest; as if head were expanded from within; as if scalp were too tight; as if tendons of neck were drawn up; as if bruised in back and sacrum; as if all power had left r. arm; gnawing as if in marrow of bones; symptoms as if in marrow of bones; as of phantoms, difficult to locate.
Pain: in l. side of throat; in chest.
Violent pain: in anus.
Tearing pain: in r. ear; in face; in r. lower jaw; in teeth; in joints of legs; in joints of r. arm; in limbs.
Cutting: in epigastric region.
Violent clawing: in teeth.
Lightning stitches: from both sides through chest.
Stitches: in head; in l. side of chin into jaw; in gums: in r. and l. side; in chest; from ensiform cartilage.
Jerking pain: in teeth and in roots.
Tearing rheumatic pain: in shoulder and arms; in limbs; in joints.
Boring pain: in a small spot in r. side of occiput; in r. cheek bones.
Drawing pain: in r. pectoral muscles; in small of back; slight, along spine; in limbs.
Burning pain: in r. shoulder joint.
Sticking pain: in forehead; in eyes; in front of l. ear; in small of back.
Dull pressive pain: in occiput.
Pressive pain: in l. side of head on upper surface of eyes; in chest; beneath sternum.
Pressive bruised pain: in hypochondria.
Cramp: in calves and soles.
Aching: in stomach.
Stinging: in fauces.
Burning: in forehead; in eyes; in gums; at anus; in l. side.
Heat: of head and face; seems to stream from mouth and nostrils.
Tearing tension: in nape of neck.
Burrowing: in stomach and upper abdomen.
Twinging feeling: in stomach.
Painful paralytic sensation: in l. shoulder and elbow-joint.
Pressure: in eyes; in pit of stomach; in stomach.

Digitized by Google

Smothering feeling: about heart.
Contractive sensation: in rectum.
Screwing-together sensation: in teeth.
Tension: from vertex to upper jaw; of various parts of skin.
Pulsation: of arteries.
Twitching: of l. upper lid.
Weakness: of r. arm.
Numbness: in mouth; of fingers.
Chilliness: over scalp and upper back.
Itching: in inner canthi; of r. cheek; in pharynx; of pimples on skin; of sycotic eruption.

[44] **Tissues.** ‖Emaciation.
Symptoms seem located in marrow of bones.
Chronic sequelæ of hemorrhages; great forgetfulness; bright colors before eyes; semilateral (r. side) affections; rheumatic pains, debility, trembling, emaciation, desire to keep warm; old sprains.

[45] **Touch. Passive Motion. Injuries.** Touch: sternum painful; bruised sensation in back and sacrum <.
Rubbing: eyes causes pressing, and objects have red and blue margins.
Scratching: < itching of cheek; increases itching.

[46] **Skin.** Itching pimples on skin.
‖Sycotic eruption on face or other parts of body, is moist, itches and burns.
Tension of skin, on various parts, in evening in bed.
Itching grows < from scratching.
When pains cease, itching begins, and vice versa.
Rheumatic pains are < in evening, and at night.
Trembling sensation in body, and debility, < in evening (and morning).
Tension of skin in various parts.
Skin adherent to scar in forearm, becomes looser.

[48] **Relations.** Compare: *Baryta carb.*, *Ferrum* (congestion to head and chest); *Silica* and *Mag. mur.* (head symptoms better from wrapping up warmly); *Arnica* and *Ruta* (sprains of joints with œdema).

[1] **Mind.** Unconsciousness.

Weak memory, particularly for names; no memory for what transpired recently; forgetfulness.

After meals congestion to head, with throbbing and forgetfulness; feels as if crazy; does not know whether

Google

she has done what she intended or whether objects seen are really there, or whether she only imagines them to be, until she has touched them; menses scanty and late.

Repeats everything said to him on account of difficult comprehension.

Great distraction of mind; cannot fix his mind on present objects, and does his work awkwardly.

Seems stupid, senseless, confused, avoids conversation.

Dulness; difficult thinking; misplaces or cannot find proper words when talking or writing.

Numerous morbid ideas, extremely disagreeable, causing rancor; neglect of business; < in evening in bed, when ideas prevent falling asleep.

Rack their brains about metaphysical subtleties.

Fantastical illusions; monomania; fancies.

Foolish happiness and pride, thinks himself in possession of beautiful things; even rags seem beautiful.

Delirium; imbecility; insanity.

A little girl with religious insanity, takes passages of Scripture literally and acts upon them.

Furiously mad; wanders about streets; after suppression of tinea capitis.

Greatly inclined to weep without cause.

Moaning and complaining, with wringing of hands day and night, much thirst, little appetite, swallows food hastily.

About an hour after he falls asleep, he suddenly starts up and screams, leaps out of bed, and runs about like a maniac, two or three times every night; wrings his hands, sweats profusely and trembles.

Involuntary haste when taking hold of anything and when walking.

Indisposed to everything, work, pleasure, talking or motion; indolence of mind and body.

Great obstinacy; dislikes to have any one near him.

Satiety of life, longing for death.

Disgust, to nausea, about any effluvia arising from his own body.

Sentimental; changing mood.

Sensitive disposition.

Weeps easily at slightest provocation.

Sadness: without cause; without courage; weary of life.

During day sad, lachrymose; weeps if one attempts to console her.

In evening sudden sadness and disinclination for everything.

While walking in open air sudden sadness; is filled with anxious, despondent thoughts, from which she cannot

Google

free herself, they make her suspicious, peevish and lachrymose.

Greatly depressed, hypochondriacal and sighing.

▮Depressed about her illness, and out of humor.

▮▮Melancholy mood; dwelling on religious or philosophic speculations; anxiety about soul's salvation; indifference about lot of others.

▮▮Sleepless, disgusted with life, fears the future, where she sees nothing but misery and suffering. θMelancholia.

▮▮Woman, æt. 41; menses irregular; profound melancholy; considers herself disgraced; speaks of dying, finds life insupportable; noise and odors irritate her greatly, also least contradiction or advice (*Nux vom.*[600] restored menstruation).

▮▮Melancholia and epilepsy, with strong impulsive tendency to suicide, by drowning or by precipitating herself from window; epileptic fits, as many as five a day, with at times two hours of unconsciousness, always < during menstruation, *Sulph.* 10[m] cured.

Frequently during day attacks of melancholy lasting a few minutes, feels extremely unhappy without cause, she wishes to die.

▮▮Great dejection, with thoughts of suicide; feels inferior to everybody; can decide nothing; listless, unable to work; can understand nothing she reads; great disgust, amounting to nausea, at odors of her own body; chronic catarrh, with a bland yellow discharge; a lump comes in her throat, must swallow continually; < in a warm room; constipation with frequent ineffectual desire for stool, with passage of fetid flatus which disgusts her much; amenorrhœa of five months' standing; a sense of weight in pelvic region when walking; muddy complexion with occasional acne.

▮Destroys clothing, imagines she has everything in abundance.

▮▮Too lazy to rouse himself up, and too unhappy to live.

▮Hypochondriac mood through day, merry in evening.

▮▮Hypochondriasis after suppression of eruption.

▮▮Worried by trifles. θUterine displacement.

Vexations and morbid ideas of past arise from most indifferent thoughts, and from every occurrence in life, which continue to be united with new vexations, so that she cannot free herself from them.

Violent starting up, even when his name is called.

▮Anxious, fearful.

▮▮Great anxiety, fear lest she should come to ruin; went about wringing her hands; tried to run away; pale face; dull eyes; pressure on head; pain in epigastrium; stools white, hard; frequent rigors.

Digitized by Google

Anxiety: in evening in bed; with heat of head and cold feet; on awaking, with heat at night; as if some great misfortune were impending; with palpitation, prevents falling asleep.

Very much excited and very passionate.

Excitable mood, easily irritated, but quickly penitent.

Irritable mood; easily excited and always absorbed in himself.

Dread of being washed (in children).

Peevish; irritable; quick-tempered.

Ill-humored and fault-finding.

Bad humor and great disinclination to speak.

Ill-humored; vexed with herself; everything makes her impatient.

He could tear himself to pieces with vexation.

Child is intolerably violent and difficult to quiet.

So obstinate and morose that he answers no one, and will tolerate no one about him; he cannot obtain quickly enough what he wants.

Egotism.

Has no rest anywhere day or night.

Sensorium. Dulness of head: in evening; on waking at night; in morning, with pressure in forehead until noon; after walking in open air; and confusion; as from rush of blood, especially on ascending steps.

Heaviness in head: every motion was disagreeable; while sitting, lying, moving and stooping; and dizziness; and confusion.

Heaviness and fulness in forehead, < when raising head, after sleep, after talking; > when sitting, or lying with head high.

Confusion of head: as from insufficient sleep; on awaking, in morning; frequently recurring; painful; after sleeping; after dinner; in forenoon; with giddiness; long-continued; 11 A.M., and giddiness, with dimness of vision; and aching in occiput, as if a band were tied tightly around forehead; and weight of head, after sleeping; in evening; and pressing in forehead.

Head seems distended.

Vertigo: while sitting or standing; with nosebleed, in morning; when stooping; when rising from bed; when walking in open air; with nausea; with vanishing of sight; with inclination to fall to l. side; < after meals, particularly after dinner; in forenoon; when walking over running water or looking at objects in rapid motion; as if swinging and as if bed were not large enough to hold him; like reeling, when walking; while walking in open air, could not step firmly; did not dare to

Google

stoop or look down, was obliged to steady herself to avoid falling; tendency to fall forward on suddenly rising from a seat; in morning, as if one stood on wavering ground; from venous stagnation, and feeling of fulness in abdomen, constipation, flatulency; suppressed hemorrhoids; from receded or suppressed cutaneous eruption; chronic, with irritating discharges.

‖Stupor, with pale face, dropping of lower jaw, eyes half open, cold sweat on face, suppression of urine, and frequent twitching of muscles.

[3] **Inner Head.** ‖Rush of blood to head: a pressure out at eyes; with roaring in ears, and heat of face; during menses; during a soft stool; at night in bed; arising from chest with throbbing; < when stooping, talking, in open air; > sitting in warm room.

‖Headache: in forehead in morning; as from a weight pressing upon top of brain, and a cord tied around head; > by shutting eyes; with nausea; on stooping; on ascending steps; as if brain were beating against skull, on nodding head; every step is painfully felt; violent, at night, disturbing sleep; pressive in forehead, in morning after rising, also in afternoon, during menses; pressive, from one temple to other; pressive, in vertex, morning and evening, as if eyes would be pressed down; jerking; tensive; tearing, as with a saw; stitching; stitches out at eyes; hammering, from vivacious talking; like blows through head; throbbing, in morning; aching in forehead, and confusion as if he had taken too much alcoholic drink, in morning, lasting until noon; in forehead on waking, going off after getting up and washing; pressive, in occiput; pressive, over eyebrows, almost all day; above r. eye, lasting until noon; over eyes, every morning; as from stopped coryza; as from a board in front of head; as if screwed together, in and over forehead; tearing, in forehead; pinching, from one temple to other; shooting, in temples close to eyes, on moving them or on looking at anything; sticking, in temples; violent, in vertex, in evening as if hair would be torn out, it bristles on most painful spots; boring, on top, beneath vertex, the spot is painful to touch; pressive, in vertex, compels wrinkling forehead and screwing up eyes; burning, on vertex on awaking, succeeded by a cool feeling in same place; aching throbbing, in crown; in l. side of occiput, as from congestion, after waking; pulsating, in l. side of occiput, at last changes to a jerking every day, as if head would burst; throbbing, at night; pressive, in occiput, at night; nightly, with sleeplessness; every

Google

seventh day; congestive; nervous; catarrhal; rheumatic; gouty; syphilitic; from suppressed eruptions; from abuse of spirits or metallic substances, hairwashes, etc.; from debility, loss of animal fluids, severe study, etc.

Tearing or stitches in forehead or temples, from within outward; < from eating or stooping; > when pressing head together, or when moving about.

Painful tingling on vertex, and in temples.

Sensation of emptiness in occiput; < in open air, and from talking; > indoors.

Drawing and tearing through head.

Sick headache, very weakening, once a week or every two weeks; pain lacerating, stupefying, numbing.

Feeling of coldness about head, a cold spot on vertex continually; piercing, with buzzing in ears.

Feeling as if head were enlarged.

Heat on crown of head; cold feet; frequent flushing.

Severe tearing in frontal region; particularly around eyes and nose, affected parts extremely sensitive to touch, as if a blister had been applied; at same time, coldness in head and of body; on application of warmth, pulse becomes more rapid; stitches through eyes; attacks daily, paroxysmal, also at night, preceded by formication in nose, as if she would sneeze, short cough, yawning, followed by sweat. θHeadache.

Throbbing, tearing pains in occiput, extending forward, with nausea, vomiting and pressure in eyes; attacks preceded by flatulency; after two or three days headache disappears, then vesicles form in mouth, with heat of mouth, which disappear and are followed by pains in throat; attacks every three or four weeks. θHeadache.

Every morning 9 o'clock, severe pressive pain in forehead with heat, humming in head, increasing until midday, and disappearing 4 P.M.; of several months' duration; after suppressed itch. θHeadache.

Severe throbbing, pressing pains in head, < from warm food, warmth of room and in sun; congestion to head with loss of consciousness, > sprinkling with cold water; at times, itching of anus; constipation; flatulency; after suppression of itch.

About 10 A.M. pain begins at inner point of l. eyebrow and passes steadily along until it involves whole superciliary ridge, which becomes very sensitive to touch; lachrymation of l. eye and impairment of sight; pain reaches its acme by midday, then gradually declines and by evening has worn away; average dura-

tion of attacks ten days; pain < from worry, and during menses; often hysterical and faint; acne of face; usually passes a week without action of bowels. θSick headache.

Nocturnal headaches < from least motion in bed; heaviness in head, particularly in occiput; pains in head as if head would burst; stitching, humming in head; throbbing pain in vertex, coldness, a cold spot on head.

For three years, headache; symptoms get worse and worse until middle of Summer, and then steadily decline; cannot endure being excited; cannot remain long in a heated place; frequently faints with pain; is extremely nervous; paroxysms generally every two or three days; pain begins l. side of head, sometimes extends all over it; > from cold; < from warmth, meditation, excitement and after food; generally lasts twenty-four hours.

Pain confined to one spot on top of head, near middle line, inclining to l. side; came on about a year and a half ago from cold; quinine temporarily > pain; pain at its acme about 5 or 6 P.M., continues to be violent until 2 A.M., when it quits him instantaneously; < in Winter, and whenever weather is unusually cold; pain appears to be in brain, and when violent almost drives him mad; dyspeptic, foul breath; furred tongue, very weak, perspires profusely, low-spirited, nervous, cannot bear moving about.

For two years, severe headache, extending from forehead to occiput; < when he catches cold; begins every morning after rising; gets a little > through day; violent pains in shoulders flying to head; pain prevents him raising arms to head, particularly r.; tightness on chest.

For two months, constant pricking pain across forehead, with giddiness, < on stooping, in evening; cannot sleep until after 1 or 2 A.M.; after checked diarrhœa.

Pain in forehead and vertex extending to eyes; sharp, violent, > by warmth; scalp tender when pain is worst.

Pain coming on at 10 A.M., sometimes as early as 6 A.M., and lasting an hour, seldom longer; confined to occiput; sensation as if head had been beaten.

After cessation of chronic diarrhœa, which was more frequent in morning than evening, a headache ensued which awakened her at night, with sensation as if top of head were being pressed against wall, with heat in whole head; headache lasts all day.

Google

Severe, sharp, darting pains in and about l. eye, extending to inner ear of same side; pains suddenly leave eye and manifest themselves about l. ovary; great tenderness of scalp.

Headache apt to commence in l. side and go round to r.; vomiting of acid matter, usually little or no thirst.

Pain commences in l. temple, extends to r., over r. eyeball to occiput; pain from superior portion of sternum through to back, and crosswise between shoulders, tenderness on pressure; swelling and soreness of l. side of cervical spine; sudden vertigo, nausea and vomiting; loss of memory, forgets his own name; deafness in l. ear.

Intermittent periodic neuralgia, < every twenty-four hours, generally at 12 M. or 12 P.M., and analogously < in midsummer and midwinter.

Chronic headache of four years' standing; scarcely a day without; generally begins about 5 or 6 P.M., front or back, splitting, with nausea and anorexia; ceases as he falls asleep; forehead is hot, > by sponging with cold water; head always more or less painful; emotional, easily moved to tears; strong desire for highly spiced food, apples, pickles, cider, etc.

Periodic neuralgic headache, affecting greater part of head, and coming on about noon every day, and lasting until evening, when it gradually subsides.

Headache with throbbing, increasing with increase of fever.

Headache is attended by nausea; hair falls out; forehead is covered with acne.

Pressive headache in forehead, < on motion, with great restlessness.

Sick headache once a week; pains stupefying; numbing; walking painful; < at night and damp, cold weather.

Head symptoms <: when awaking; in evening; from motion; stooping; talking; mental exertion and out doors; every seventh day; during rest; sitting; from pressure; moving head; in a warm room.

Meningitis: soporous sleep, from which they awake every ten to twenty minutes with loud screams; grinding of teeth; chewing motion of lower jaw; vomiting of food; photophobia; constipation; small, frequent pulse; thirst; dry, white tongue; sour smell from mouth; cheeks alternately red and pale, or one cheek red, one pale; changes color frequently; head hot, skin of rest of body dry and cool; head sweats and has odor of musk; can only lie in one certain position, that is with occiput drawn far backward, on changing this

Digitized by Google

position, screaming and vomiting; delirious talking, during which they fall asleep; startled awaking; sopor, cannot be aroused by loud calls.

‖‖Brain affections in children who do not like to be washed, have pimples, boils and other eruptions on head, face and everywhere, pick at nose, have red lips, crave sour things, feel faint in forenoon, may have diarrhœa early in morning; sleep restless, start when falling asleep, cry out during sleep, or murmur, moan, whine or snore; feet cold in morning and hot in evening; they run about but do not like to stand, sit hunched and walk stooping.

‖Fell, striking on back of head, was taken up insensible; following night, restless, followed by vomiting, dizziness on stooping, or standing on an elevation, with a tendency to fall backward; darting pain through eyes; frontal cephalalgia, pupils dilated.

‖Hydrocephalus: developing slowly after psoric eruptions; head drops backward; likes to lie with head low; face changing, often red or pale; nausea while lifting head up; breath sour; urine as if mixed with flour; subacute and chronic, in scrofulous children, where effusion has not progressed too far; spasms, in scrofulous children; regularly protrudes and retracts tongue.

'**Outer Head.** ‖Sensitiveness of vertex, pressing pain when touched; < in evening, from heat of bed, in morning when awaking; smarting and burning after scratching.

‖Roots of hair painful, especially to touch.

‖‖Severe itching on forehead and scalp.

Feeling of coldness about head.

‖Falling out of hair.

‖Itching or painful pimples on scalp.

‖‖Itching pimples on forehead; inflamed, painful to touch.

‖On forehead patches and groups of black points, like comedones.

‖Humid eruption on top of head, like tinea capitis, small, grainlike pustules, filled with pus, drying up into honeylike scabs.

On two spots on vertex, tender, scabby elevations, size of a pea.

‖‖Inflamed and suppurating pimples on hairy scalp.

‖Small vesicles on top of head, filled with limpid fluid; itch a great deal and form yellow or brown crusts.

‖‖Eruption on scalp; pus oozing out on different parts of head; scalp and hair matted with scales of dry pus; small boils behind ears; rash over body. θImpetigo.

‖‖Eruption on scalp since two years; part covered with a thick scab; when crust is removed from poulticing an

eruption appears, which is vesicular at beginning, but soon becomes pustular, these burst, fluid concretes, and a thick crust is developed. θEczema impetiginodes.

‖ Thick, yellowish crust, somewhat moist, covering whole scalp and matted in with hair. θEczema.

‖ Large, thick, moist crust on back of head. θEczema.

‖ Thick, moist, greenish-yellow crust covering nearly whole l. side of head; has a tendency to suppurate and has suppurated, leaving a large scar; of four years' duration. θEczema.

‖ Eczema around margin of hairy scalp, from ear to ear, posteriorly.

‖‖ Humid, offensive eruption on top of head, filled with pus, drying up into honeylike scabs. θTinea capitis.

‖‖ Dry, offensive, easily bleeding, burning eruption, begins on back of head and behind ears; pains and cracks; > from scratching.

‖‖ Humid, offensive eruption, with thick pus, yellow crusts, bleeding and burning.

‖ Hair dry, falling off; scalp sore to touch, itching violently, in evening, when getting warm in bed; dandruff.

‖ Eruption on head since seven years; commenced with a few pustules and gradually spread over a surface about three times as large as a silver dollar; crusts thick, yellow and very adherent; part devoid of hair; eyes weak, lids much inflamed and agglutinated in morning. θPorrigo favosa.

‖ Contractive pain as from a band around cranium, with sensation as if flesh were loose, followed by inflammation, swelling and caries of bones; < in wet, cold weather and when at rest; > from motion.

‖ Fontanelles close too late.

‖ Dandruff.

‖ A sanguineous tumor, size of a black walnut, on r. of occipital bone; anterior fontanelle closed, posterior open and connected with tumor; after *Calc. phos.*[200], tumor lessened, but came to a standstill; anterior fontanelle opened more, and connection between posterior and tumor disappeared; *Sulphur.*[200] one dose, completed cure.

[5] **Sight and Eyes.** ‖ Sensitiveness of eyes to daylight; intolerance of sunlight; photophobia, with stitches, < in sultry weather; shuns light during sweat.

‖‖ Dimness of vision: as of a veil or gauze before eyes; as from a fog; with headache; as if cornea had lost its transparency; sudden paroxysms of nyctalopia; while reading; objects seem more distant; for near and distant objects; with weakness of eyes, blindness, cataract,

Google

glaucoma; with innumerable, confused, dark spots floating before eyes.

‖Hallucinations of sight: flickering before eyes; small dark specks; dark points and spots; black flies seem to float not far from eyes; gas or lamp lights appear to be surrounded with a halo (cataract or glaucoma); like black, gauze or feather dust; scintillations and white spots; black points or stripes before eyes.

‖Impairment of vision of both eyes, when attempting to read, letters become instantly so muddled and blurred, one running into other, that it is impossible for him to read at all, without powerful convex glasses; wears convexes of eleven inches focus, prescribed by an oculist; there was no organic change in eye, and no objective symptoms to account for impairment; sinking, hungry and exhausted feeling at epigastrium, at 11 A.M. daily; heat rising to face, especially after washing; faint feeling on going into a bath; feet cold; very timid and easily startled; teeth and gums tender, bleed at times, < from chewing, especially cheese; feeling of a lump in epigastrium after food; at times canine appetite; food returns if he runs.

‖Amaurosis after a sudden disappearance of an eruption on head; can only see outlines of objects; spots and weblike forms appear before eyes; single objects seem double and indistinct; pupils greatly dilated, do not contract in strong light.

‖After disappearance of a severe tearing pain in l. side of forehead, from which she suffered four months, muscæ volitantes; for last four days gradual impairment of sight; can scarcely distinguish day from night; burning, tearing pains in eyes. θAmaurosis.

‖Amaurosis in a child 4 years old; no structural change in eye, but eyeballs in continual motion from side to side; has had an eruption suppressed; itchiness of skin (removed by *Arsen.*).

‖Asthenopia, muscular and accommodative; gaslight hurts more than sunlight.

‖Amaurosis and amblyopia, with or without diplopia, from suppression of an eruption.

‖After severe neuralgia in head, especially on l. side, an appearance of threads before eyes which she could not wipe away; increased until she could only distinguish day from night; burning, tearing in eyes, and conjunctiva slightly red. θAmaurosis.

‖Has abused eyes by reading, writing, sewing; trouble began in r. eye, which is <; sensation as if eye were gone, and a cool wind blew out of empty socket; severe

Digitized by Google

pains and itching around back of eye; when closing eyes, flashes of light; mist like a veil or cloud before eye; < from strong light; using eyes causes intense headache over them; desire to spasmodically close eyes, which gives relief; menses regular, accompanied by severe bearing-down pains, with pain in hips and back, and sexual excitement; using eyes causes nausea, heartburn, faintness at stomach, with a desire to eat between meals (*Sepia* relieved, *Sulphur* finished the cure). θAsthenopia.

‖Blindness of l. eye after suppressed itch; eye has a dead look; pupil enlarged and immovable; in middle of lens an opacity, as if it had been punctured by a needle; lids and conjunctiva somewhat reddened; on holding hand quite near to eye, he can dimly discern fingers.

‖Hyperæmia of retina.

‖Retinitis, from overuse of eyes; congestion of optic nerve; outlines ill-defined, pain around eye, and itching in internal canthi.

‖Chorio-retinitis, and uncomplicated choroiditis; darting pains; chronic trouble, based upon abdominal venosity, stagnation in portal circulation, habitual constipation and cerebral congestion; psoric taint.

‖Opacities in vitreous, resulting from choroideal exudations, old hemorrhages, etc.

‖Sympathetic irritation of r. eye, after removal of l.; sharp pain in stump, extending in stitches to healthy eye, in which there is considerable irritation and photophobia, occasional obscuration of vision and commencing presbyopia; constant discharge from stump, which is excessively sensitive to touch.

‖For three years, dimness of vision of l. eye, finally so marked as to prevent recognition of friends without aid of r. eye; sees a bright halo around flame of candle; skin of face dry and hard; his work frequently obliged him to stand in water for a length of time. θCortical cataract.

‖Mrs. E., æt. 48, complains of heaviness of eyelids; mist and grey fog before eyes, and a feeling as of sand in eyes; nursing a baby; in r. eye beginning of cataract; burning in forehead; flashes in r. eye; pain as if beaten in small of back; nebulous sight; eruption on ears (*Caustic.*[30] finished cure).

‖Cataract after suppression of an eruption.

Redness of iris.

‖Iritis, scrofulous and syphilitic; chronic cases; drawing pain around eye, sharp sticking pains in eyes, < at night and toward morning; eyeball painful on motion.

Digitized by Google

Adhesions (posterior synechiæ) after iritis.
Hypopion; from iritis, or other circumstances.
Trachoma, acute and chronic; pains sharp and sticking in morning, lids glued together; water is not a favorite application, and usually aggravates trouble.
Pterygium, dependent upon hereditary psora.
Pannus, in patients of strumous diathesis; true pannus crassum, whole of cornea presenting appearance of a piece of fresh raw beef; green halo around candlelight; herpetic pannus, resulting from phlyctenules, etc.
Wound of cornea, with hemorrhage into eye, and prolapse of iris.
Hypopion, with deep ulceration of centre of cornea involving one-third its surface.
Pustular inflammation of cornea, or conjunctiva, with marked lachrymation; pains sharp and stitching, as if a needle or splinter were sticking in eye.
Superficial and deep ulcers on cornea, intense redness of eye, great photophobia.
Specks or ulcers on cornea; opacities.
Keratitis parenchymatosa in a scrofulous subject, cornea like ground glass, photophobia, lids swollen and bleed easily.
Keratitis pustulosa: with sharp pain in eye at 2 P.M., also awakened early in morning by pain; of seven years' duration, cornea hazy, and very fine vessels on edge, with pustules, conjunctiva injected, sharp pain in l. eye like knives, moderate photophobia, and lachrymation; in a large, fat, unhealthy child, much photophobia, discharge from ears and nose, eruptions on head and face, head dry and hot, so that it dries rapidly after washing, restless at night, etc.; photophobia < morning and evening, face rough and nose sore; photophobia, lachrymation and cracking of external canthi, restless first part of night; from suppression of an eruption behind ears; dislikes having eye washed, appetite poor, and restless at night; with sharp sticking pains and pustular eruptions around eye; from a cold, with much sharp, darting pains in eye; < in morning and darting pain through temples.
Conjunctivitis pustulosa; child restless at night; with sharp sticking pain, < by moving eyes; at first > by bathing, afterward <; stinging pain, > by washing in warm water; with great redness and sharp sticking pains; with sore pain in l. eye, > by cold applications, burning in palms of hands; with dryness of lids.
Incipient sclerotitis; feeling of fulness and largeness of ball, < by use, or bright light, especially gaslight.

Digitized by Google

‖Subretinal tumor, in a girl 9 years old; a year previous, slight drooping of lid of r. eye, has slightly increased; child cannot see from this eye; had suffered from enlarged glands and abscesses in neck, scars of which remained; in r. eye a partial ptosis and a divergent squint of about half a line; movement of eye seems perfect in all directions; no external congestion or inflammation; pupil sensitive to changes of light before l. eye, but sluggish to light and shade before its own eye; vision is for fingers only at eight inches; examination revealed a tumor under or in the retina, which covered macula lutea; vessels could be traced over tumor and small hemorrhagic spots were found around it; size of tumor equalled two diameters of optic disk, and its elevation nine millimetres.

Eyes sunken, surrounded by blue rings.

Biting of eyes and lachrymation, every evening.

‖A feeling as of sand in eyes.

‖Stitches as with a knife in r. eye.

‖Itching and burning of eyes.

‖‖Burning heat in eyes; painful smarting.

‖Sensation as of a foreign body in eyes.

‖Burning and easy fatigue of eyes when reading.

Burning of eyes without redness.

‖Burning shooting beneath lids of l. eye, as if sand had got into it.

‖Heaviness of eyes.

‖Dryness of eyes.

Eyeballs are painful on moving them.

Pressure in eyeballs on walking in open air.

‖In evening, dull aching and feeling of weight in both eyeballs, with loss of vision as if a thick veil were before eyes.

‖Pain as from dryness of eyeballs, and a sensation as if they rubbed against lids.

‖Violent pains in l. eye, as if it were rubbed against spiculæ of glass, and drawn in toward pupil.

‖Severe cutting in r. eye.

‖Shooting in l. eye, < from reading.

‖Redness of eyes during day; itching in evening.

‖Purulent mucus in eyes.

‖Inflammation of eyes or lids; aching; smarting, burning, or a feeling like sand.

‖Painful inflammation of eye, from presence of foreign body (after *Acon.*).

‖‖Left eye very red, lids puffy, upper one heavy and raised with difficulty; sensation as of a foreign body in eye; pustule on lower part of conjunctiva; lids covered with

Digitized by Google

secretion, agglutinated in morning; dark circles around eyes, mist before them; headache above eyebrows as from a blow; forehead painful to touch; constant desire to vomit; disgust for food; repugnance for meat; wishes for nothing but vinegar and raw things; after eating, suffocating weight on stomach, causing rush of blood to head and ringing in ears; uterus presses upon bladder when she walks; on rising up, limbs totter. θCatarrhal ophthalmia.

‖Sclerotic of l. eye, highly injected and puffy; naturally brown iris appears reddish; at lower portion of iris, a white spot, as large as a lentil; photophobia; profuse lachrymation; agglutination of lids at night; eyeball pains when moved; drawing pains round about eye; pain in occiput as if hollow, when lying; stool hard.

‖For twelve days ophthalmia and diarrhœa; severe paroxysmal cutting pains in abdomen, with diarrhœa and tenesmus, < at night; pulse rapid, feverish.

‖Conjunctiva and meibomian glands swollen and inflamed; eyes injected; a thin, acrid, excoriating discharge on opening eyes; pain as if salt were in them; cornea dim; photophobia; cannot clearly distinguish objects; sobs, cries, fears she will become blind.

‖Conjunctiva of r. eye greatly injected and inflamed; cornea very dim, dirty, dusty-looking, as if covered by a film; vision greatly impaired; objects appear as if through a fog, are indistinct; lids red, burning pains, tenacious, acrid, excoriating discharge; agglutination of lids at night; constant lachrymation, < in damp weather; boy, æt. 18, after an attack of smallpox, when 5 years old.

‖For many years, periodical attacks of conjunctivitis, frequently lasting three months; conjunctiva of l. eye highly injected; pressing, tensive burning, itching pains through eye; fog before eyes; tearing pain in l. side of head; constipation; chilliness during day; heat at night; pulse hard, irritable.

‖Caught cold in r. eye, about two months ago, which caused lachrymation and pricking pains; application of rose-water; three weeks ago both eyes were affected; constant lachrymation, of a rather gelatinous character, all day, but < morning and evening; in morning sees a halo around artificial light, yellow inside, then green, then yellow outside; removed by washing; gaslight looks dim; smarting in external canthi, which are red and prick at times.

‖Redness of both eyes, cannot stand light; headache almost every day, commencing in occiput, spreading to

Digitized by Google

forehead; tongue coated red in middle, borders red; papillæ on apex prominent; hungry, gone feeling, between 10 and 11 A.M.

||Eyes red and hot, occasional stitches or stinging, obscuration of sight, mist before eyes, lachrymation when looking sharp out of doors.

||Arthritic ophthalmia, frequent attacks for years, intense photophobia, confining him to a dark room for weeks and months; sclerotic red; cornea surrounded by a bluish ring; pains about eyes.

||For years attacks of arthritic ophthalmia, which made him blind for weeks or months; photophobia, could not bear least exercise of eyes; conjunctiva but slightly reddened; sclerotic bright, rose-colored; bluish circle around cornea; pain around eye.

||Scrofulous inflammation of eyes since birth; l. eye <; looks like a piece of raw meat, was larger and protruded from socket; r. eye also considerably affected; with l. eye could not see anything by day, while at night he could distinguish a light; sight of r. eye good; feeling as if eye were full of sand; green halo around light.

||Attack of scrofulous ophthalmia every eighth year of her life, in month of January, or February; ulcers on cornea, with almost total blindness for six or eight weeks; always affects l. eye.

||Whole l. eye seems to have grown larger, and its coverings are extraordinarily swollen; albuginea is blood-red from turgid vessels in it; cornea appears dimmed, as if covered with fine dust; an ulcer on cornea which had recently cicatrized was now again in full suppuration and had become deeper and broader; intolerance of light; constant, violent, pressive pains all around orbit, increased to a frightful degree on moving eyes, or exposure to light of sun, even though lids are closed, pain then almost drives him to despair, includes whole head, and deprives him of all rest and sense. θScrofulous ophthalmia.

||Right eye greatly injected; iris obscure; lids swollen, red, suppurating; photophobia; shooting pain above eye traversing head; great lachrymation; little appetite; from time to time, pain in stomach and abdomen. θScrofulous ophthalmia.

||From her youth has been subject to weak eyes, with occasional epiphora, injection of eyes with much pain; now lay in bed, eyes covered with a bandage, as light was intolerable; conjunctiva and meibomian glands swollen and inflamed; sclerotic red; on opening lids, a large quantity of acrid, corrosive water gushed out,

Digitized by Google

which excoriated skin; eyes pain as if salt had gotten into them; cornea dim; could not distinguish objects rightly; fears she will become blind.

Borders of lids thick and puffy, ulcerated; cornea covered with maculæ, and, independently of these, visual power of eye so diminished that she could not see small objects at all, and larger ones appeared as if enveloped in smoke and mist; general health much affected; after *Sulph.*, there appeared an eruption of pocks, warts, hepatic spots, pustules, herpetic scabs in different parts of body, this lasted eight days after leaving off remedy, after which eyes were completely cured. θScrofulous ophthalmia.

Scrofulous ophthalmia; much photophobia and lachrymation, lids convulsively closed and could not be opened.

Traumatic ophthalmia; violent palpebral conjunctivitis; opacity of cornea; abscess in layers; hypopion.

Opthalmia neonatorum, profuse, thick, yellow discharge, swelling of lids, etc.; tendency to relapse; non-syphilitic.

Paresis of r. nervous abducens: woman, æt. 40, had for three months been troubled with double images to r. and downward; no perceptible diminution in movements of eye, no apparent cause for paresis; some pain in eye on looking upward; headache and restlessness at night.

Lachrymation: in morning, followed by dryness; and burning in morning; profuse and burning from acrid, excoriating tears; in open air, dry in room; itching and biting in eyes.

Lids: dryness of inner surface; pressure, in evening; burning, inflamed, red, tense on motion; burning, externally; burning, in afternoon, with flow of tears; burning in edges in morning; cutting-burning in borders; smarting, in inner side, after midnight, followed by a rubbing dryness upon inner surface; smarting as from dryness of margins; with inclination to rub them; sensitiveness of edges in morning; itching as if they would become inflamed; itching, with intolerance of light; itching, burning, redness and swelling; itching in morning, on awaking; prickling, causing him to scratch and rub; agglutinated mornings; twitching, jerking; ulceration of margins; drawn together spasmodically, in morning; itching pustules on margins; granulated; dry, crusts in lashes; lashes fall out; eczematous; chronic blepharitis; ectropium or entropium; < from bathing eyes.

Itching, burning and smarting in canthi.

Digitized by Google

Dryness of eyes in room, lachrymation in open air.
Recurrence of successive crops of styes.
Blennorrhœa of lachrymal sac.
Lachrymal fistula.
Itching in eyebrows.

Hearing and Ears. Sensation as if sounds did not come through ears, but through forehead and brain.

Deafness: preceded by oversensitiveness of hearing; especially for human voice; from disposition to catarrhs; < after eating, or blowing nose.

Deafness of r. ear from aural catarrh; mild conjunctivitis; dry throat; empty feeling in pit of stomach; swollen toes, with large corns, so that he had to slit his shoes; gleet of ten years' duration.

After scarlatina eleven years ago, gradually lost hearing; can hear loud noises, such as locomotive whistle, when near, but only with great effort voice in conversation; at times slight purulent discharge from ears; feeling of hunger at 10 A.M.

Impaired hearing; heat and heavy pressure on top of head, with soreness of brain extending to inner ear.

Hardness of hearing of long standing, with hissing and humming in ears.

Deafness; surging noise in r. ear; < on excitement or moving; had rheumatism in Winter; < when warm in bed; at night, pain in face, comes on 11 to 12 P.M.

Frequent stoppage of ears, especially when eating, or blowing one's nose, also on one side only.

Undulating feeling in ears, as of water, or whizzing and roaring.

Sounds in ears: much ringing; swashing as from water; humming or hissing.

Something seems to have come before l. ear.

Stinging, tearing and itching in l. ear.

Sharp, shooting, stitching pains in ears, to throat.

Stitching, tearing, pressing pains in ears, from ulceration.

Violent pressure in ears on swallowing and sneezing.

Tingling in ears.

Otitis: in psoric patients with tendency to skin eruptions, coryzas, and cerebral congestion; from a furuncle in meatus; in children who suddenly cry out with pain, while they appear listless and unobservant, and where it seems doubtful whether irritation is in brain or in intestinal canal; in complication with meningitis or eruptive fevers; lancinating, stinging, tearing in ear, extending to head and throat, < by disturbance, musical sounds, and all noises, and human voice is heard imperfectly; chronic with a purulent discharge.

Digitized by Google

‖Discharge from both ears, dirty, very offensive; profuse, of a penetrating odor, at times causing an eruption about auricles; very much objects to have ears washed out.
‖For ten years has had otorrhœa from both ears, resulting from scarlatina; constant discharge of a very offensive, sour-smelling odor, so disagreeable that stench could not be removed by washing or syringing.
‖Diphtheria a month ago, left her with a running of ears, eczematous eruption behind ears; discharge very fetid; dislikes to be washed; mucous discharge from nose.
‖Purulent offensive-smelling discharge from ears; eczema behind ears, bleeding from scratching; nose and l. upper eyelid covered with crusts.
‖Fetid, thin, corroding discharge from ear.
‖Discharge from ears, every seventh day.
‖Purulent, offensive otorrhœa, < in l. ear.
‖Ears very red, with children.
‖Itching in external ear.

[7] **Smell and Nose.** ‖Smell before nose as of an old catarrh; as of old offensive mucus.
Pressure in r. nasal bone, in evening.
Burning in septum of nose.
Crawling in nose, as in coryza.
‖Stoppage and dryness of inner nose.
‖At one time acrid fluid from nose, again dry and stiff as parchment.
On inside of nose, especially in alæ nasi, great itching and feeling as if nose were swelled.
‖Itching and burning in nostrils, as if sore.
‖‖Frequent sneezing.
‖Coryza: with sneezing, chilliness, catarrh and cough; fluent like water, trickling from nose; with bloody mucus; distressing, dry; yellow, glutinous, strong-smelling; profuse discharge of burning water; fluent, burning, outdoors, stopped up indoors; with soreness and ulceration of nostrils; chronic, with loss of taste and smell.
‖Mucus passes down choanæ. θCoryza. θScarlatina.
‖Pains in nose, which is swollen, or ulcerated within, with yellowish, ropy fluid trickling from nostrils. θScarlatina.
‖Secretion increases from day to day, runs freely from nose, and is blown into little crepitant bubbles. θScarlatina.
‖Mucus removed by a handkerchief, wells forth again from nostrils, taking its way over cheeks, nose and lips, making them sore and red.
‖Nosebleed: for seven days; at 3 P.M., with vertigo, afterward nose sore to touch.

‖Bloody discharge when blowing nose.
‖Chronic stoppage, also of one nostril.
‖‖On blowing nose, a stinging pain, beginning in r. side of nose and going up to forehead in middle line; swelling of a vein in forehead just above nose; darting pain in r. knee, < when r. leg is lifted to step, or when it is off floor while sitting, or if it is too far back in walking, or if she puts it too far back when sitting.
‖‖Two reddish growths in nose, as large as peas, stitching pains when touched. θNasal polypi.
‖‖Ulcers and scabs in nose; bloody discharge on blowing nose; profuse nauseous saliva.
‖Dry ulcers, or scabs in nose.
‖‖Swelling and inflammation in nose; red nose.
‖Freckles and black pores on nose.
‖Shining red swelling of point of nose.
‖Wings of nose inflamed, swollen.
Herpes across nose, like a saddle.
‖‖Eczema narium, with piles.
‖Lipoma nasi, lobulated arrangement, no subjective symptoms, old cases.

Upper Face. ‖Face: pale and collapsed, with expression of great anxiety, as if worn out by long suffering; pale, sickly-looking; pale, eyes sunken, with blue margins; flushed; spotted red; circumscribed redness of cheeks; freckled; sallow, yellow, rough; covered with cold sweat.
‖Tearing pain: in r. half of face; in malar bone, also at other times in lower jaw, as if parts would be torn out.
Boring above root of nose.
‖Burning: in face and throat, without redness; recurring several times during day; seeming to rise from chest.
Painful pressure on malar bone, and beneath eye.
‖‖Pain in all three divisions of fifth pair of nerves, l. side; exposure to cold, draft of air, worry or anxiety always brings on an attack; generally begins about 5 P.M., and lasts with little intermission three or four days; besides sharp dartings which occur every few moments, affected side of face is extremely sore and tender, while scalp is so sensitive that she can hardly bear touch of comb, and cannot find a pillow soft enough.
‖‖Sharp stabbing pains below l. zygoma, at times darting up to side of head, implicating gums and dental nerves; teeth sound; chewing and talking very difficult, at times impossible; sleep greatly disturbed; pains come and go suddenly.
‖‖Pains extending up l. side of face, teeth and head, stiff neck; face greatly swollen; pain < in cold air, > from

warmth and walking about; < in evening; pain often comes on with a twinge when sucking teeth, and darts up side of head and then as suddenly leaves; at times pains shoot up to eyes, sometimes one side, sometimes other; pain in back of head as if scalp had been beaten.

Neuralgic pains in r. infraorbital region, along course of r. inferior maxillary nerve, down back of head and on both sides and back of neck; sight of r. eye extremely dim, with profuse lachrymation and constant desire to rub eye to remove dimness; sense of heat on vertex and down back of neck; great tenderness of scalp, is so sore can scarcely touch it with comb; hair comes out in handfuls when combing; nervous, restless, fingers and feet moving constantly; restless desire to move, and while telling her story walks about room nervously pulling and rubbing her fingers; very miserable, and profoundly depressed, determination to commit suicide, but cannot make up her mind how; all cervical vertebræ extremely sensitive to pressure; slightest pressure on spinous processes < pain in infraorbital region, side of face, and side and back of neck, makes her shrink and almost leap from chair; feels as if air just in front of her were hot; cannot get a full, easy and satisfactory breath.

Since three months, pain in r. side of face and head; pain commences in upper and lower jaw bones, extends to infra and supraorbital nerves and up side of head; comes on in afternoon, lasts three or four hours, and returns again late at night, continuing until 1 A.M., comes on again in morning and disappears before afternoon.

Pain comes on about noon and lasts till evening, pain centres in r. temple; going up to top of head over eyebrow, below eye and down along inferior maxilla.

For two days, pain in r. side of face and head, extending over jaw of that side and to top of head; comes on in evening, lasts all night, > toward morning.

For several days, pain all over lower jaw, extending to shoulders and supra and infraorbital nerves on both sides and over whole head; pain commences in evening and lasts all night, keeping her awake.

Severe intermittent pains in r. side of head, for a month; pain commences over malar bone and extends backward over side of head, < at night; commences gradually at 9 P.M., becoming more severe till about 3 A.M., when at its height, it gradually subsides; also comes on at breakfast and lasts till 4 P.M.

After catching cold, neuralgia of jaws and temples, some-

Digitized by Google

times one side, sometimes other; at first, attacks come on at a regular hour at night, and lasted about an hour and a half; he then caught fresh cold, and pains were almost incessant, < during night; dull aching, often very severe.

‖ Tic douloureux, r. cheek; several decayed teeth on same side.

‖ Erysipelas of face, following an attack of congestion to head, for which leeches were applied; eyes lustreless, sopor; fever irregular, begins with coldness of hands, then heat and sweat on forearms, thirst, rest of body dry, parchment-like; emaciation; debility.

‖ Erysipelas, beginning at r. ear and spreading over face.

‖ Swelling of cheek, with pricking.

‖ Acne; great itchiness and bluish color of face.

‖ For three months, itching of face and scalp; bruised feeling there; twisting pains in abdomen; fluttering in chest; painful menses; leucorrhœa.

‖ Red spots in face.

‖ Acne punctata, completely covering face.

‖ Whole surface of forehead and cheeks red and scurfy. θAfter vaccination.

‖ Eruption on face, crusta serpiginosa, with terrible itching; child scratched herself raw; < on cheeks and around eyes; hands and arms cold, swollen and bluish.

‖ Excoriations, pimples, vesicles; violent itching, < at night; bleeding from scratching; diarrhœa in morning. θCrusta lactea.

‖ Whole face covered with a moist, much itching tetter, eruption thickest on nose, and about eyes.

Lower Face. ‖ Sore pain in oral commissures.

‖ Glandular swellings on lower jaw.

‖ Drawing jerking on l. lower jaw.

A scabby ulcer, with burning pain on margin of lower lip.

‖ Swelling of upper lip.

‖ Swelling of lower lip, with eruption on it.

On internal surface of l. lower lip, a group of greyish-white aphthæ, rather painful.

‖ Painful eruptions about chin.

‖ Herpes at corners of mouth.

‖ Bright redness of lips, particularly with children, complexion sallow.

‖ Lips dry, rough and cracked.

‖ Burning, twitching or trembling of lips.

‖ Corners of mouth ulcerated. θScarlatina.

‖ Eczema impetiginoides, on nose and lips, of several years' standing; itching and burning terribly; nose and lips swollen, presenting a loathsome appearance.

Digitized by Google

‖Mentagra, commencing a year and a half ago, as a nodous, crusty eruption below nose, spreading gradually through whiskers, and finally to chin; nodous infiltration and pustules, with and without crusts; each pustules and node is pierced by a hair which sits quite fast; on pulling a few hairs out and examining the roots under microscope, found them thoroughly invested by microscopic fungus tricophyton.

‖Enlarged submaxillary gland; swelling as large as hen's egg, under ramus of jaw; gland tender to touch, painful on swallowing; skin covering it slightly red; constipation.

[10] **Teeth and Gums.** ‖Great sensitiveness of teeth.

‖Teeth feel too long.

‖Tearing toothache on l. side.

‖Pulsating and boring in teeth, < from heat.

‖‖Toothache coming on in open air, from least draft, at night in bed, from washing with cold water; with congestion to head, or stitches in ears.

‖Painful feeling of looseness of teeth.

‖Pain in teeth: drawing; tearing; throbbing; boring; boring, as with a hot iron; pressive; sticking, extending into ear.

‖Jumping pain in hollow teeth, extending to upper and lower jaw, or to ear.

‖Violent stitches through teeth from every cold drink.

‖Throbbing toothache after suppressed eruptions.

‖Swelling of gums: with throbbing pain; about old stumps.

‖Gums bleed and recede from teeth. θScorbutus.

‖Abscess of gum, r. side, lower jaw; hard round swelling from which there ooze pus and blood through a small opening at side of a carious tooth; r. submaxillary gland swollen and painful; cheek swollen, painful, red, in streaks, especially directly over seat of abscess; mouth opened with difficulty; tearing pain in teeth.

‖‖Easily bleeding, fungous growth, looking like raw meat, recurring after excision, seeming to spring from cavities remaining after extraction of teeth, and growing to about same height as teeth; stitching pains in lower jaw; gums greatly swollen, dark-red; congestion of blood to head; fever toward evening; chill, fever with constant coldness of hands and feet.

‖Fistula dentalis.

[11] **Taste and Tongue.** ‖Taste: sour; bitter; sweetish; bitter, or foul, when awaking in morning; bitter soon after eating; metallic; coppery; pasty; vinegary; sweetish; sour; putrid; sweet, nauseating.

Digitized by Google

Food tastes like straw or too salt.
Tongue: white, with red tip and borders; red and cracked; white or yellow; brown, parched, rough; furred in morning, but wears off during day; very dry, particularly in morning.
Burning pain on tongue.
On r. anterior border of tongue a hard raised spot size of a lentil; on moving tongue, shooting pain in it.
A smarting blister on r. side of tongue.
Ulcerated tongue.

[12] **Inner Mouth.** Bad odor from mouth: after eating; in scarlatina; sour smell.
Great dryness of palate with much thirst; is obliged to drink much.
Dryness of mouth: after eating; in morning on awaking; insipid, and sticky, in morning.
Heat in mouth and much thirst at night.
Saliva: collects even after eating; bloody; salty; sour; bitter; profuse, with nauseous taste.
Ptyalism, from abuse of mercury, during a fever, or in scarlatina.
Vesicles on palate, and ulcer on uvula, making eating and talking painful.
White or sore patches, similar to those of diphtheria; sore throat when swallowing, with redness and swelling of tongue and uvula. θScarlatina.
Vesicles in mouth, with burning pain; vesicles on roof of mouth. θScarlatina.
Exfoliation of membrane of mouth. θScarlatina.
Blisters in mouth. θScarlatina.
Thrush.
Stomatitis: whole mouth, tongue, and lips covered with aphthæ; restlessness; greenish evacuations with severe tenesmus; emaciation; rash; excoriation of inner surface of thighs; pustular eruption on back, pustules containing thin, yellow pus.
Stomacace; aphthæ.
Child grasps everything within reach and thrusts it into mouth.

[13] **Throat.** Feeling of roughness in fauces and uvula.
Burning in fauces.
A hard ball seems to rise in throat, close pharynx and take away breath.
Sensation as if swallowing a piece of meat, during empty deglutition.
Sensation of a lump in throat.
Dryness of throat: exciting cough; at night; constant desire to swallow saliva in order to moisten affected parts.

Digitized by Google

Roughness in throat; scraping; hawking and clearing.
Rawness of throat.
Sore throat with swelling of cervical glands.
Choking and sensation of soreness in throat, as if tonsils were swollen, with stitches extending into ears, always on swallowing.
Sore throat, great burning and dryness, first r., then l. side.
Violent sore throat with redness of tonsils, frequent coughing and dyspnœa; agitation and sleeplessness.
On swallowing, pressive pain in throat, as from swelling of palate.
Stitches in throat on swallowing; painful contraction.
Burning coming up into throat, with sour eructations.
Sensation as of a hair in throat.
Coldness in throat during an inspiration.
Spasmodic contractive sensation in middle of pharynx, food will not go down.
Burning in pharynx, with sour eructations.
Rawness in fauces, with hoarseness and aphonia.
Needlelike stitches in submaxillary glands, which are painful to touch.
Violent stitches in swollen parotid glands.
Swelling of palate and tonsils, elongation of palate.
Whole back part of pharynx in a state of ulceration or sloughing; much nauseous saliva; after suppuration parts heal slowly.
Posterior walls of fauces look dry, dryness causing a constant inclination to swallow.
Frequently recurring and long lasting sore throat; throat, tonsils and uvula swollen; difficult deglutition; stitches in throat; sensation of a lump in throat; as if throat were too narrow; dryness and rawness in throat.
Enlargement of l. tonsil.
Tonsillitis: after bursting of abscess parts remain irritated, and patient is slow in recovering.
Fauces, palate, and uvula bluish-red; considerable discharge of transparent mucus; continuous necessity to swallow and clear throat, which is painful, from constant irritation down to upper part of chest; < in evening, and raw air, and from cold food and drink; warm things are agreeable.
Angina gangrenosa.
Diphtheria: yellow deposit about posterior wall of pharynx; quick pulse; flashes of heat; faintness; sinking spells; complaining of closeness of room; sluggish cases; empty swallowing more painful than that of liquids; inflamed parts purple; dryness of throat; diph-

Digitized by Google

theritic membrane yellowish, commencing on each side of throat, or on r. side going to l.; mucous membrane livid or bright red; tongue coated white with red border, or yellow as if sprinkled with sulphur; thirsty, but vomits everything; very restless, must move about in bed, but movements start chills on back, running from below upward; clammy, cold perspiration; shooting pains from back of neck into l. ear; empty gone feeling in stomach; cold drinks do not agree with stomach; desire for beer; when the indicated medicine does not have the desired effect; useful as an intercurrent.

[11] **Appetite, Thirst. Desires, Aversions.** ‖Appetite: excessive; canine; ravenous, obliged to eat frequently, if he does not he has a headache and great lassitude, and has to lie down; feeling of faintness with strong craving for food, at 11 A.M.; voracious children put everything they see into mouth, swallow everything, watch every one eating.

|Complaints after eating, even a little.

|He is hungry, but as soon as he sees food his appetite vanishes and he feels full in abdomen; when he begins to eat he is averse to it.

|Loss of appetite: complete; nothing is relished; with constant thirst.

‖Drinks much, but eats little.

|Violent thirst for ale or beer; longing for brandy.

‖Desire for sweets; diseases from eating sweet things, candy, etc.

|Milk disagrees, causing sour taste and sour eructations.

‖Desire to imbibe alcoholic drinks, from morning until night (*Sulphur tincture*).

|Aversion: to meat; to sour and sweet things; to smoking tobacco; to wine.

[15] **Eating and Drinking.** |Feels fulness in stomach after eating but little.

|Milk causes much distress; is vomited curdled; sour taste, sour eructations.

Complaints from farinaceous food.

‖Drinks much, eats but little.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.

|Eructations: generally empty, or tasting of food; sour; after eating; as soon as he presses on stomach; tasting of bad eggs; empty, every morning; empty, after eating.

||Heartburn all day; waterbrash.

||Severe heartburn; is afraid to eat anything but soup; emaciation.

Food rises into throat.

|Regurgitations: sour; of food and drink.

Digitized by Google

Nausea: in morning; before or after each meal; during stool, in evening; qualmish, in morning; retching.

Vomiting: of food, especially in morning and in evening; first watery, then of food; bitter; sour; of blood in evening, of food at noon; in morning, with trembling of hands and feet; sour or bitter, with cold perspiration in face; chronic.

17 **Scrobiculum and Stomach.** Sensitiveness to touch in region of stomach; even bedcover causes pain.

Weak, empty, gone or faint feeling in stomach about 11 A.M.

Fulness in stomach: and empty eructations; after eating but a little; as if puffed up; and swelling; with nausea and vomiting.

Pressure in stomach: after eating; at night; > by eructations; with headache, after midnight; causing anxiety at night, with palpitation; during menses; very violent, while lying down.

Heaviness in stomach; feeling of weight.

Burning in stomach: like violent heartburn; in morning.

Stitches in stomach: in pit of stomach on deep breathing.

Pain in chest for last eight years, like spasms and cramps, coming on generally before dinner, at noon, somewhat > by eating, getting < before tea, and ceasing on partaking of it; is then free from pain until midnight, when he is awakened by an intensely severe but short paroxysm; must lean against something for relief, must bend double; at height of paroxysm, arms and hands seem paralyzed; > from warm food; much flatulence and audible gurgling and rumbling in abdomen; symptoms appear to come on with slight dyspepsia, such as heartburn, etc.; tongue white, irritable looking; stomach acid. θGastralgia.

Chronic cardialgia; constant pain in epigastrium and back; loss of appetite; constipation.

Pressing, constricting pains in region of stomach, < from eating; fixed stitching pain in l. side of chest.

Constant bloating of epigastrium, with oppression of breathing, even in morning before breakfast, < after eating slightest amount of food; empty and sour belching, nausea, at times vomiting; constant pressure in stomach, and a periodical burning; constipation.

Gastralgia: pain in r. hypochondrium extends over stomach to l.; cannot lie on either side; when lying on back, pain spreads to chest under sternum, and hinders respiration; must get up and walk about; after repercussion of eruptions.

Google

‖Pressing pain and swelling of stomach; some pain in back opposite stomach, coming on an hour or so after meals, causing difficulty of breathing and speaking, faint feeling, giddiness and weakness; feeling of coldness in centre of chest, which makes mouth water; for about four weeks cough only in morning while dressing, with easy green sputa; wakes with pain above l. eye, increases gradually, is < from 2 to 5 P.M., then decreases gradually (but more quickly than it increased) after tea; sleepy during day; when stomach swells, cannot bear pressure of clothing; shooting from centre of chest to between scapulæ, soon after meals, generally preceding pain in stomach; palpitation after meals.

‖Violent pains in stomach, sickness and vomiting of food soon after eating; pain < after eating; emaciation; a tender spot on spine at about centre of dorsal vertebræ.

‖Tight, crampy pain in stomach, preventing him from rising from a seat, and felt when laughing or sneezing, < waking in morning and attempting any muscular exertion.

‖For several years, a hard swelling could be felt in abdomen; abdomen greatly but regularly distended, as in ascites; region of stomach sensitive to pressure; when lying on back, a circumscribed hard mass, as large as two fists, could be felt in epigastrium, extending toward liver; at times severe tearing pains in intestines; flatulency and belching; watery diarrhœa of four weeks' standing; anorexia; after eating, oppression of chest, bloating and pain in abdomen; pale, emaciated; febris lenta; menses regular, preceded by severe pains in lower abdomen; after *Sulph.* aggravation, followed by discharge of masses of mucus per rectum and complete cure.

‖Nocturnal heat; much thirst and desire for beer; pressure in stomach; urine like beer; no alvine evacuation; craves sour things.

‖Acute dyspepsia; food taken in morning distresses him all day; sour vomiting, especially after meals; irritating condition of scrotum every summer, until fourteen or fifteen years ago, after this all over body; when 18 years old, had boils in different parts of his body.

Cramp in stomach immediately after a meal.

‖Dyspeptic symptoms, from eating too rapidly; œsophagus from cardia to pharynx ached incessantly, proceeding from place where she felt pressure.

[18] **Hypochondria.** ‖Sore feeling in hypochondria, tender to touch.

‖In hepatic region, dull pain, accompanied by a little dry cough; pressing pain; stitches; fine burning stitches while sitting bent over.

Google

‖Pressure in region of liver; wind accumulates in l. side; feeling of weight in abdomen. θChronic indigestion.
‖Swelling and induration of liver; increased secretion of bile.
‖‖Acute hepatitis; engorgement, enlargement and tenderness; protracted jaundice; stinging or aching pains in r. side, tenderness on pressure; weight and heaviness; depression of spirits.
‖‖Fulness in region of liver; fulness and pressure across stomach, with distension of transverse colon; chronic diarrhœa, has to get out of bed in a hurry; sometimes dizzy in morning, bed whirls when turning over at night; dizzy when going down stairs; constant inclination to sleep; neuralgia of liver, > by application of mustard, and by lying on painful side; faint and hungry by 11 A.M.; disinclination to bathing; partial paralysis of muscles of l. side of face.
‖‖Chronic inflammation, enlargement and tenderness of liver of fifteen years' standing; inclination to dwell constantly on her condition; tendency to fainting; menses either too early or too late, thick, blackish, acrid.
‖Icterus; skin has a greenish-yellow tint; lassitude; itching of skin at night; in psoric persons with or without hardness and swelling of liver; vomiting of ingesta or blood; pain in pit of stomach and r. hypochondrium; abdomen bloated; stool constipated; sleeplessness; hectic fever; red lips.
‖‖Pain from stomach through to back, with a forcing-asunder feeling in back; all action of bowels stopped; urine loaded with bile. θBiliary obstruction.
‖Frequent shoots in splenic region.
Movements of flatus cause painful sticking, especially in l. hypochondrium.
‖Stitches in spleen < when taking a deep inspiration, and when walking.
‖Stitches in l. side of abdomen when coughing.

[19] **Abdomen.** ‖Intestines feel as if strung in knots.
‖Griping about navel extending upward toward stomach, disappearing on emission of flatus.
‖Tension and pressure in umbilical region.
Pressure across, above navel, with little appetite; cannot sleep at night on account of it.
Pinching, constrictive pain about navel, while sitting.
Stitches in l. side of abdomen on deep breathing.
‖Distension and hardness of abdomen.
‖‖Inflation of abdomen with wind; rumbling and gurgling in bowels.
‖‖Emission of flatus: especially in evening and night;

Digitized by Google

having odor of bad eggs, or sulphuretted hydrogen; inodorous.

‖‖Rumbling and gurgling in bowels; painless diarrhœa, driving patient out of bed at 5 A.M.

‖Rolling and rumbling in bowels as if empty.

‖Incarcerated flatus in l. side of abdomen, with heaviness, fulness and constipation.

‖Movements in abdomen as of the fist of a child.

Anxiety in abdomen, followed by a feeling of weakness of feet, extending above malleoli, like an internal trembling.

‖Feeling of fulness and tension in abdomen: bearing down toward anus, and excessive tickling there; in morning; after eating; immediately after a little food, with dyspnœa; as from incarcerated flatus

‖Tension in abdominal muscles, could not readily straighten up.

‖Griping in abdomen: before morning stool; after stool; with diarrhœa; at night; followed soon by a liquid motion, whereupon pain ceased.

‖Drawing colic during menses.

‖Pressure downward: toward anus; while lying in bed at night; as if a hernia would form, toward female genitals.

‖Colic, always after eating.

‖Sensitiveness of upper part of abdomen; clothes press disagreeably.

Feeling of soreness in intestines before stool.

‖Sore feeling in abdominal walls, as if muscles of abdomen and peritoneum had been bruised.

Sore pain in whole abdomen as if raw, particularly on taking a full breath, coughing on taking violent exercise.

‖Cutting in abdomen, loins, and sacrum, > from dry heat.

‖‖Big belly and emaciated limbs; children dislike to be washed.

‖Painful sensitiveness of abdomen to touch, as if internally raw and sore.

‖Awakens about 5 A.M. with cutting, colicky pain in abdomen, compelling instant resort to stool.

‖Colic after eating or drinking, obliging one to bend double, < from sweet things.

‖‖Cystic tumor just within abdominal walls, with pyogenic membrane, caused by heavy lifting; large quantities of serum and sanious pus discharged through a drainage tube; cachectic appearance; no appetite; great emaciation; diarrhœa; stools brown, watery, frothy, at times undigested, painless, more frequent in morning and early forenoon; pulse 120, weak; wakeful at night, sleep disturbed by dreams.

Digitized by Google

‖Eczema umbilicale; soreness and itching about navel, so that child is continually picking at it, and augmenting trouble.

‖Itching eruption over abdomen.

‖‖Portal stasis: hemorrhoidal congestions; with indigestion, constipation, etc.

‖Abdominal infarctions.

‖Incarcerated hernia (after *Acon.*).

‖Ascites; dropsy.

‖Painful swelling of inguinal glands.

[20] **Stool and Rectum.** ‖‖Sudden call to stool on waking in morning.

‖‖Desire to stool, with colic, awakes him about 5 A.M.

Constant urging to stool and to urinate, with evacuation of a few drops of blood immediately after urinating, and violent stitching in urethra, with apprehension and discomfort.

‖‖Thin stool every morning, with cutting in lower abdomen.

Soft stool with tenesmus and burning in anus, in evening; preceded by distension of abdomen, followed by emissions of hot, offensive flatus, with gripings in small of back.

‖Stools: soft and very thin; frequent, pasty; semi-liquid; brown, watery, fecal; green mucous; bloody mucous; undigested; frothy; sour; changeable; fetid; bloody in evening; green, watery; leaving pale green stain on diaper; brown mucous; white mucous; bloody in streaks; bilious; purulent; corrosive; sometimes painless; putrid; expulsion sudden, often involuntary.

‖Diarrhœa: at night, with colic, tenesmus, watery white mucous stools, of sour smell; driving out of bed in morning, painless; fetid, watery, or involuntary; of scrofulous children; as if bowels were too weak to retain their contents; stools involuntary, with a sensation as if wind would pass; alternating with constipation; after taking cold; in damp weather; after taking milk or acids; during dentition; after ale or beer; from artificial food; during sleep; during pregnancy.

‖‖Abdomen distended; stools watery, flocculent, occasional lienteria, large and very offensive and passed by day and night, none, however, during morning hours; little or no fever; great thirst, particularly at night; urine passed frequently and in large quantities; great desire for meat, would scarcely eat anything else; cross and peevish; emaciation. †Marasmus.

‖‖Sudden attack of diarrhœa, during heat of Summer; ten discharges in seven hours, watery, greenish; next day

Digitized by Google

had twenty discharges in twelve hours, more frequent in morning, consisting of green, slimy, watery fluid; eyes swollen; lies very quiet and pale; in evening stool every half hour.

Diarrhœa, stools only during sleep; if kept awake whole day, no stool occurred; stools of green and yellow mucus; stools sudden, would come before child could tell of it, though she invariably awoke before stool; aversion to bathing.

Diarrhœa after midnight; painless, driving out of bed early in morning; as if bowels were too weak to retain their contents.

Several thin, watery stools, driving patients out of bed about 5 A.M., after which they had one stool every hour until 9 A.M.

Violent diarrhœa every night; after midnight and later, five to eight times, with much painful urging; had to wait a long time, then it came as thin as water, slimy, bright yellow, and burning hot; slept and was > when waking at 5 o'clock; movements in bowels, rumbling and grumbling; > when sitting up; < when lying down; weak in legs; had not right kind of appetite, except sometimes in evening; tongue coated thinly white; he could not bear milk; after drinking beer he must vomit; after brandy burning aching, especially burning in abdomen; after eggs, and anything prepared with eggs, he must vomit; after a glass of wine with nutmeg, tearing and twitching in legs, heat and burning, especially in stomach, a tearing as if stomach were torn with pincers; burning rising in throat; stomach swells; after eating, eructation, which ameliorates; had sweat every night, especially in neck; distended veins.

Diarrhœa acrid, excoriating anus, producing an eruption; emaciation; abdomen hard, distended; diarrhœa after every cold.

Vomited night or morning; impaired appetite, feculent diarrhœa, with undigested food, what he ate in morning; febrile symptoms, with prostration, languor and fretfulness; felt like a lump of ice in r. chest.

After having a diarrhœa checked with opium, a pain in belly; attempts to induce a passage from bowels produced vomiting, finally of fecal matter; whole lower belly swollen, in l. side in region of sigmoid flexure, an elastic swelling, quite fixed, as large as two fists, and painful to pressure; rest of abdomen not sensitive to touch; tongue red, cracked and dry; pulse full, soft, not accelerated; much thirst and great weakness.

Stool of, first, small round lumps, very dark green, al-

Digitized by Google

most black, difficult, remaining part softer and larger; stool sometimes slips back when about to escape; with stool passes blood, sometimes bright, sometimes like jelly.

Diarrhœa, with great emaciation, excessive prostration; child conscious, but lies as if unable to move; < between 10 P.M. and 1 A.M.; stools watery, putrid.

After childbirth, offensive-smelling diarrhœa, frequent, with faint feeling before and after stools.

After stool, continued urging, anus swollen, sore, stitching and pulsating pain all day.

Chronic diarrhœa; stools watery, greenish, like chopped eggs, painless, of a very offensive, putrid odor; belching, followed by vomiting; abdomen distended and hard in places; constant rumbling in abdomen; sleeplessness; thirst, constant desire to drink; great emaciation.

Diarrhœa of eighteen months' duration, after suppression of gonorrhœa by *Bals. copaiva.*

Great debility, can only sit up a few minutes at a time; pulse 100; skin sallow, dry; tongue coated yellow; bitter taste; no appetite; what little she eats occasions distress in stomach and bowels, especialy latter; pain < about an hour after eating; bowels bloated and tender to touch; urine high-colored and scanty; lower limbs cold; burning pain in vertex; diarrhœa < in morning, obliging her to get up usually before daylight; ten evacuations before noon, not more than two or three after that time until early morning again; stools undigested, frothy, yellow, watery; pain before, during and after stool; weakness and faintness after stool. θChronic diarrhœa.

Smell of stool follows him all around, as if he had soiled himself.

Before stool: sudden and violent urging, driving out of bed; cutting colic; rumbling.

During stool: heat; warm sweat; rush of blood to head; chilliness; fainting; nausea; tenesmus; headache; soreness in abdomen; itching in anus and rectum; spasmodic constricting pain extending to chest, groins and genitals; cutting pains, < from pressure or bending backward; prolapsus ani; cramps in legs; burning in anus.

After stool: tenesmus; burning in anus; cold sweat on face and feet; excoriation about anus; soreness in whole intestines; pressure in rectum; prolapsus ani; child falls asleep as soon as tenesmus ceases.

Accompaniments to diarrhœa: sleepiness in daytime, af-

Google

ternoon and after sunset; sleeping with eyes half open; wakefulness; awaking often; aversion to washing.

‖Dysenteric stools at night, with colic and violent tenesmus.

‖‖Dysentery: child was faint regularly at 11 A.M.; early morning aggravation.

‖‖Five or ten bloody stools in twenty-four hours, generally one or two at night; < always early morning; had to rise in a hurry at 6 A.M.; considerable straining and tenesmus; cold feet by day, burning of soles at night; faint and empty about 11 A.M.; feeble, cannot walk; has lasted four or or five years. θChronic dysentery.

‖Dysentery: after *Acon.* has removed acute symptoms, when tenesmus has ceased but blood is still discharged; when remedies have failed to act; during stool burning, cutting, pressing and prolapsus recti, cutting in urethra, catching of breath, palpitation, chills about lower part of body, afterward straining and throbbing in rectum, bruised pains and itching in abdomen, chills and lassitude; < early in morning, driving out of bed; faintish feeling in pit of stomach about 10 or 11 A.M.; passages make perineum red all around anus; frequent relapses; child seems to be doing well when, without any apparent cause, it gets <.

Sulphur follows well after *Nux vom.*, especially when < at night; discharge of blood, slime and pus, with fever, loss of appetite, pain in bowels often so violent as to cause nausea and drenching perspiration; fever consists of dry heat without thirst. θDysentery.

‖Cholera infantum, generally begins after midnight; diarrhœa and vomiting; discharges from bowels watery, green and involuntary; sometimes smell sour, at other times very offensive; vomiting frequent, often sour, with cold perspiration on face; face pale, fontanelles open; hands and feet cold; child lies in a stupor with eyes half open; not much thirst and entire suppression of urine; psoric patients prone to eruptions, and excoriations; hydrocephaloid symptoms.

‖‖Cholera Asiatica; as a prophylactic, a pinch of the powdered milk of sulphur worn in stockings in contact with soles of feet; diarrhœa commences between midnight and morning, with or without pain, with or without vomiting, ineffectual desire to evacuate; diarrhœa and vomiting at same time; numbness of limbs, cramps in soles of feet and calves; blueness under eyes; coldness of skin; indifference of mind; during convalescence, red spots, furuncles, etc.; susceptibility to temperature, warm things feel hot; nerve symptoms.

Google

Stool, with a sensation as if something remained, and as if stool had been insufficient.

Chronic constipation; bowels had not moved for years without aid of purgatives; dull feeling in brain; heaviness on top of head; weak, hungry feeling in stomach before dinner; burning of soles of feet at night.

First part of stool in small round lumps, very dark green, almost black, difficult; remaining part softer and larger; stool sometimes slips back when about to escape; with stool passes blood, sometimes bright, sometimes like jelly.

Constipation, especially in hemorrhoidal and hypochondriac persons; in pregnant women and newborn; alternating with diarrhœa; with paralysis; with skin trouble.

Frequent unsuccessful desire for stool; first effort is painful; is compelled to desist.

Constipated stools: hard, knotty and dry, as if burnt; insufficient; chestnut- or olive-shaped; flat; like sheep's dung.

After constipated stool: prolapse of rectum; lancinating pains from anus upward; stinging, sore, burning, itching, pulsating pains in anus.

Passage of fetid flatus; smelling like rotten eggs.

Burning and pressure in rectum.

Constant bearing down in rectum; feeling of fulness.

Cutting in rectum during normal stool.

Violent stitches in rectum, especially in evening.

Violent sticking in rectum even when not at stool, taking away breath.

Crawling and biting in rectum as from worms, while sitting, in evening.

Itching in rectum.

Throbbing pain in rectum.

Passes blood with stool for two years, since he had scarlatina; prolapsus of rectum for three weeks; hemorrhage has been < for last month; easily tired; restless at night; pain in back; overexertion will bring prolapsus and bleeding; stools very dark, almost black.

Hemorrhage per anum, looks blanched and bloodless, with a passive flow of blood from anus; almost pulseless, lips pale and quiver; talks and answers questions only in a whisper. θCirrhosis of liver.

Rectocele; stools flat and thin.

Increased congestion of hemorrhoidal vessels.

Hemorrhoids: painful and bleeding; regular, hard stools; tongue coated; bad taste in mouth; appetite good, but everything turns sour; much wind in bowels; aching in pit of stomach, making her faint; must ex-

ercise hard, then feels >, when sitting or lying down, faint; despondent.

‖‖Hemorrhoids so large and painful that he could not stand up; constipation, with continual urging in rectum; frequent involuntary discharge of mucus and feces covered with blood; stitching pains from anus upward; painful tension in anus and small of back preventing rising or walking; loss of appetite; sleepless at night; every four to eight weeks swelling of hemorrhoids and discharge of blood.

‖‖Piles, now internal, at first external; during and after stool throbbing, burning, smarting in piles and shooting upward, catches breath; also dull aching in coccyx and sacrum, extending around side of pelvis, lasting seven hours after stool; stool once in two to four days; pain makes her feel faint, trembling, sick, inclined to move about, hot and as if she would lose her senses; pain at anus > when standing than lying.

‖‖Shooting pains in anus, with heat and soreness; sleeps lightly and awakens very often; falls asleep when he attempts to read; least exertion fatigues him; pain in l. pelvis extending to foot of that side, < when sitting after a long walk; at every stool, which is not hard, passes much blood. θHemorrhoids.

▮▮Hemorrhoids, moist, blind, or flowing dark blood, with violent bearing-down pains from small of back toward anus.

▮▮Suppressed hemorrhoids, with colic, palpitation, congestion to lungs; back feels stiff as if bruised.

▮Piles with chronic hemorrhages from bowels, great itching and sore feeling of anus; burning and intolerable itching of anus at night; cannot sleep from itching.

▮▮Large hemorrhoids, violent burning and sticking in anus; pressing in rectum during and after stool; it feels full.

▮Sore feeling at anus and escape of moisture; itching in skin surrounding anus.

▮▮Burning in anus: after sitting a while; after soft stools in evening.

▮Pressure and burning in anus.

▮▮Constant bearing down toward anus; forcing down after sitting.

▮Aching in anus.

▮Frequent stitches through anus.

▮▮Itching in anus.

Itching in perineum with soft stool.

▮Swelling of anus with burning itching.

▮▮Bleeding from anus.

Google

Discharge of liquid from anus, followed by feces at night during sleep.
Involuntary discharge of moisture from anus followed by itching.
Feeling of soreness of anus and exudation of a viscid, slimy fluid.
Excoriation about anus.
Anal fissures.
Burning, tearing and itching in rectum and anus, with feeling of fulness; cannot bear to have hemorrhoidal tumors washed; constant desire to scratch parts.
Lancinating pain from anus upward, especially after stool.
Pulsating pain in anus all day.
Itching, burning and stinging in anus.
Anus swollen, with sore, stitching pains.
Broad flat condylomata in anus.
Thread-worms with stool; ascarides; lumbrici; tænia.

[21] **Urinary Organs.** Violent pain in region of kidneys after stooping a long time.
Retention of urine.
Frequent micturition, especially at night; large quantities of colorless urine after hysteria.
Nocturnal enuresis.
Burning in orifice of urethra, during micturition.
Redness and inflammation of orifice of urethra.
Painful desire, with discharge of bloody urine, requiring great effort.
Mucous discharge from urethra.
Stream of urine much thinner than usual; intermits.
Urine: profuse, colorless; scanty; reddish; very offensive; turbid; greasy pellicles upon it.
Constant desire to urinate; a few drops pass involuntarily.
Great desire to urinate, with burning in urethra.
Hard pressure upon bladder.
A feeling in urethra as if he were constantly obliged to urinate.
Burning in urethra.
Pains in urethra as in beginning of gonorrhœa.
In morning on passing water, flying shoots in urethra.
Painful shoots in urethra, with rigor.
Stitches in forepart of urethra.
Itching in urethra.
Weak, slow stream of urine from paresis of sphincter vesicæ.
Desire to urinate comes suddenly and is imperative; if not gratified, urine passes involuntarily.
Hemorrhage from urethra.

Digitized by Google

‖‖Irresistible desire to urinate on seeing water running from hydrant (*Canthar.* and *Lyssin*). θIrritability of bladder.

‖Diabetes; morbus Brightii.

‖Hæmaturia; stitching and burning in urethra during micturition.

‖‖Frequent urging to urinate, but only a few drops are discharged, accompanied by severe cutting pains in vesical region and burning sensation in urethra; urine escapes slowly in drops from urethra; pains continue after urination; urine brown, turbid, slimy, depositing a tenacious mucous sediment; loss of strength and weight.

‖‖Constant painful urging to urinate, with frequent discharge of a few drops of urine, with increase of pain and followed by drawing pain along ureters, compelling her to bend double; thirty to forty efforts to urinate in twenty-four hours; urine brown, turbid, depositing a mucous sediment; dyschesia; complaining mood; loss of appetite; fever toward evening; great lassitude.

‖‖Four years ago while on a journey wanted to urinate, but suppressed it for the time, and when finally he wished to urinate could not pass any; only after several days' catheterizing was enabled to pass water, but always with excessive tenesmus, so that he had to try it twelve to twenty-four times in a day.

‖‖Chronic irritability of bladder; must rise several times at night to urinate, and rush from his work during day to relieve bladder, at risk of wetting his clothes if he did not yield to urgency of case; profuse sweats at night.

‖‖Involuntary urination at night, for two years; scarcely a night passed without his wetting bed; disagreeable sensation of hunger, with flushes of heat, about 11 A.M.

‖Enuresis: pale, lean children, with large abdomen, who love sugar and highly seasoned food, and abhor to be washed; micturition copious after midnight.

‖Urine excoriates parts.

‖‖Both flow of urine and discharge of feces are painful to parts over which they pass.

Male Sexual Organs. ‖Coldness of penis; weak sexual power; impotence.

‖‖Involuntary discharge of semen, with burning in urethra.

‖Increased sexual desire, with stitches in testicles; chronic prostatitis after gonorrhœa.

‖Too quick discharge of semen during coition, or before erection is complete, or before he succeeds in inserting penis.

‖‖Testicles relaxed, hanging down; soreness and moisture of scrotum, or offensive sweat of genitals.

Digitized by Google

Itching of prepuce.
Waning of sexual desire from overindulgence, with weakness of back and threatening paralysis.
Offensive sweat about genitals.
Prepuce and glans penis icy cold.
Burning and redness of prepuce.
Stitches in penis.
Itching on glans penis.
Pressure and tension in testicles and spermatic cords.
Itching at mouth of urethra as at commencement of gonorrhœa; of great value in second stage.
Chronic gonorrhœa, with shooting burning pains, or without pain, with discharge of white or yellow acrid mucus.
Inflammation of urethra, and especially prepuce, with acrid discharge.
Inflammation and swelling, with deep rhagades, burning and redness of prepuce with phimosis.
Deep suppurating ulcer on glans and prepuce, with puffed edges.
Phimosis, with discharge of fetid pus.
Discharge of prostatic fluid after micturition and stool.
Mercurial syphilis; itching ulcers which are soon covered with a crust, discharging pus from underneath; cockscomblike excrescences on glans, soft, spongy, easily bleeding; excoriations on genitals with burning; copper-colored spots on forehead; hard, large inflamed buboes.
Chancre, phagedenic, destroying lower half of glans penis; paraphimosis; ulcer consists at first in numerous little specks of pus, sievelike, dispersed, gradually unite into one whole; sudden eruption of varicella syphilitica over whole body (followed by *Cinnab.*).
Chancres, with boardlike hardness of red and swollen prepuce.
Ulcer on dorsum of penis; discolored, greenish crust; not much pain.
Fistula urinaria, after gonorrhœa, edges indurated, discharge of pus and urine from fistula; formication in rectum, tenesmus, burning during stool; constipation.
Suppressed gonorrhœa.
Scanty, light yellow discharge from urethra; burning on beginning to urinate and during coitus; hemorrhoids, with pains in head and back; itching and stitches in anus, constipation, flatulency. θGleet.
Varicocele, continuous relaxation of scrotum.
Hydrocele, in a boy æt. 5, for several years; tumor large, very tense and shining, prevents running and playing; general health suffering.

Google

Old discharging buboes which do not heal.
Moist excoriation about genitals.
Soreness and moisture of scrotum; soreness between thighs when walking.
Chronic enlargement of prostate gland.
Fetid perspiration on genital organs, with soreness and excoriation destroying most of hair, painful in walking, with thickening and induration of scrotum.

Female Sexual Organs. Sterility, with too early and too profuse menstruation.
A weak feeling in genital organs.
Sore feeling in vagina during an embrace.
Pain alternating between eye and ovary; pains from ovarian region to back.
Continued bearing down: in pelvis toward genitals; congestion to uterus.
Laborlike pain over symphysis.
Uterine pains, running from groins to back.
Moroseness and apprehension with uterine pain; menses two days too late, with anxious and uncomfortable feeling.
Cancer of uterus; offensive, corrosive, ichorous leucorrhœa; sensation of heat in crown of head; coldness of feet, or burning in soles of feet at night; flushes of heat, pass off in a perspiration with faintness; remarkably weak at pit of stomach from eleven in morning until noon; violent burning in vagina, with painful soreness during sexual intercourse.
Prolapsus from reaching high; prolapsus, with pain in hypogastrium, in r. side especially.
Prolapsus uteri; metritis; dropsy of uterus.
Uterine discharge, watery, whitish, copious, in gushes, and scalding; sometimes thicker, whitish-yellow, staining napkins a mustard yellow, with yellow granules like crushed mustard-seed and of fecal odor.
Leucorrhœa, greenish-yellow, excoriating parts.
Chronic leucorrhœa, thin and very profuse, or scanty, yellow, causing burning and smarting of vulva and thighs.
Hot flushes at climacteric period, with hot head, hands and feet, and a great goneness in stomach.
Menses: too early, too profuse, last too long; every fourteen to eighteen days, lasting eight days, discharge scanty, dark; dark, putrid, clotted; thick, acrid, makes thighs sore; smelling sour; pale; too late, of short duration, or suppressed; late, with constipation and distended abdomen; scanty, recurring at long and variable intervals; absent four months; suppressed, causing congestion to other parts.

Digitized by Google

‖Menorrhagia; profuse, with liability to miscarriage; has not been well since her last miscarriage; strong-smelling perspiration in axillæ; heat in sacral region; dull aching in ovarian region; hunger at 11 A.M., cannot wait for dinner; inflation of abdomen every afternoon; sleep restless, feet cold.

‖Dysmenorrhœa; spasmodic pain in hypogastrium, as if intestines were strung up in knots, scanty flow, with colicky pain in small of back.

‖A young lady, unmarried, had not menstruated for a year, although she did not in any way feel unwell.

‖Amenia in scrofulous constitutions, tendency to papular skin eruption, or portal and pelvic congestion.

‖Girl, æt. 19, menstruated but once ten months ago, no reappearance of flow; after *Sulph.* regular menstruation.

‖Before menses: headache; cough, in evening; nosebleed; leucorrhœa; itching of vulva; lumbar pains; cramp in splenic region; restless and anxious; headache; toothache; heartburn; cough, in evening in bed; night sweat.

‖During menses: nosebleed; rush of blood to head; weak, faint spells; colic; irritability; day-sleepiness; pressure in forehead; vertigo; excitement of circulation; palpitation; epistaxis; sore throat; lassitude and heaviness of feet; pressure in epigastrium; laborlike pains in abdomen and back.

‖‖Burning in vagina, scarcely able to keep still.

‖Violent itching of clitoris and vagina. θNymphomania. θPruritus vulvæ.

‖‖Troublesome itching of vulva, with pimples.

‖Leucorrhœa: very profuse, pudenda sore and burning; milky; smarting like salt, must scratch till parts bleed; < at night, must rise and bathe parts; mucous, a fortnight before menses; yellow, excoriating, accompanied by palpitation during motion, followed by burning in abdomen; preceded by cutting or pinching around navel; < in moring after rising; scanty, acrid; mild.

‖Ascarides of vulva.

‖Swelling of mammæ.

‖Nodosities in mammæ.

‖Nipples cracked, stinging and burning, bleeding when nursing; areolæ covered with yellowish scales oozing acrid fluid, itching and burning in night.

‖‖Scirrhus of breast.

21 **Pregnancy. Parturition. Lactation.** Promotes expulsion of moles.

‖Pelvic sufferings, with flushes of heat and weak, fainty spells.

‖Morning sickness of pregnancy, not amounting to vomiting, with faint, sickish spells during forenoon; profuse salivation, taste of which causes nausea; aversion to meat; craving beer or brandy.

‖‖Constant nausea, vomits everything that is taken into stomach; obstinate constipation; heat on top of head; faintness at pit of stomach; icy-cold feet.

‖Cramps in calves, hot flushes, weak, faint spells; burning of soles; must put them outside of covers or in a cool place.

‖‖Feels hungry and faint about 11 A.M.; cannot wait for dinner.

‖Labor: frequent weak, fainty spells; wishes to be fanned; wants more air; flushes of heat and cold feet.

‖Puerperal mania.

‖After-pains begin in sacrum, pass around pubes and run down thighs.

‖Phlegmasia alba dolens.

‖‖Swelling of r. breast as large as a hen's egg, after an attack of erysipelatous mastitis; surface of swelling covered with excessive granulations; severe itching; discharge of thin, sanious pus.

‖Suppuration of mammæ, with chilliness in forenoon, heat in afternoon; inflammation runs in radii from nipple.

‖Soreness of nipples.

‖Nipples cracked, sore, bleeding, burn like fire; deep cracks at base of nipples, as if they would drop off.

‖After nursing, nipples smart, burn and bleed; chapped nipples.

‖Hemorrhoids during pregnancy and in childbed.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness: evening or morning; roughness of voice, with dryness of throat and burning on swallowing; in morning, with irritation of throat.

A rough nasal sound, like snoring, in trachea.

‖Voice rough, hoarse, with much mucus on chest; aphonia.

Talking excites pain and fatigues whole body; shooting pains through l. chest to back.

‖Chronic aphonia on a psoric basis.

‖‖Complete aphonia; hoarse, suffocating cough, with smarting in chest, when coughing. θSequel of pneumonia.

‖‖A boy, æt. 10, sudden aphonia; emaciation; aversion to everything sweet.

‖Great hoarseness, gradually ending in complete loss of voice.

‖‖Suddenly awakes from sleep with a cry, cannot breathe, face bluish, eyes projecting from head, throws arms

Digitized by Google

above head, trembling and rigidity of limbs; after a minute, rapid whistling respiration and cough, face gets pale, cries, is greatly prostrated; attacks < after crying or getting angry. θSpasmus glottidis.

Drawing and dryness in larynx at times.

‖Perfect aphonia; with harassing dry cough, preceded by hoarseness; cough caused by constant pricking, and itching or tickling in l. side of larynx; coughs, particularly at night in bed, after midnight until 2 A.M.; hacking all day, with frequent paroxysms of cough; loss of smell and taste; coughs always after eating; subject to these attacks since childhood, each lasting usually two or three weeks. θLaryngitis.

❙Chronic laryngitis; cough in evening before and when going to bed; catarrh of mucous membranes; disposition to skin affections; suppressed eruptions.

❙Catarrh, with fluent coryza, chilliness, rawness of chest and cough.

‖Cough of several weeks' duration, with soreness of upper portion of chest and slight whitish expectoration; < during day and in evening when lying down; cough occasioned by an itching sensation in bronchi, accompanied by retching; hot flushes; cold feet; faint and hungry at 10 A.M.; rheumatic pains in knees and hips at night, with soreness and coldness; itching of skin on retiring. θAcute bronchial catarrh.

‖Night sweats and cough with copious expectoration of blood streaked mucus; fever and cough; hoarseness; a sensation as of ice in chest when chilled, or perspiration is checked. θBronchitis.

❙Chronic bronchitis, with arterial and venous vascular irritability, great impressionability of skin, which suffers from slightest atmospheric variation; in rheumatic, gouty, herpetic and scrofulous individuals, also when seemingly well-indicated remedies refuse to act.

❙Dilatation of air tubes and putrid sputa.

[26] **Respiration.** ‖Shortness of breath: and oppression on bending arms backward; from talking much; when walking in open air; in evening in bed.

‖‖Feels suffocated; wants doors and windows wide open; particularly in night.

❙Labored, heavy breathing; audible beats of heart.

❙Asthma at night.

‖Asthma: attack every eight days; has rough, harsh hair; stooping posture; hunger and weakness every day at 11 A.M.

‖Asthmatic attacks following swelling of hemorrhoids; chest oppressed, constricted; nightly attack of suffoca-

Digitized by Google

tion; great anxiety, rush of blood to chest, sudden cessation of respiration, gasps for air, jumps out of bed for relief; several attacks every night, followed by palpitation.

‖ Asthma: alternating with fits of gout or attacks of lepra and psoriasis.

‖ Asthma, arising from suppressed eruptions, especially itch; or from suppressed chronic discharges; periodical, spasmodic stinging in back; congestion to chest; comes on in sleep, when turning over in bed, or in evening.

‖ Rattling in chest, < after expectorating.

¶ **Cough.** Cough: dry, choking; short, dry, with stitches in chest, or under l. scapula; dry, with hoarseness, dryness in throat, and watery coryza; with much rattling of mucus in chest; loose, with soreness and pressure in chest; with expectoration of thick mucus; with rattling in trachea, hoarseness; with expectoration of greenish lumps of sweetish taste; caused by roughness in throat; short, in evening, while sitting asleep; when going to sleep, with heat in head and face, and cold hands; only at night; with shooting pains in chest; caused by rawness in larynx; woke him from sleep at night; dry, with hoarseness, dryness of throat, and fluent coryza of clear water; short, dry, violent, with pain in sternum, or stitches in chest; excited by tickling in larynx, as if caused by down, evening and night without, morning and day with, expectoration of dark blood, or of yellow, greenish, purulent, or milk-white watery mucus, usually of sourish, sometimes putrid, flat, or saltish taste, or like offensive discharge of an old catarrh; dry, a long time in evening in bed, before falling asleep.

Expectoration of bloody pus.

‖ Dry cough, for seven weeks, < at night; tosses about at night; kicks off covers; much itching of nose; itching over body, < at night; great thirst.

‖ For four months, cough with salty expectoration; pain in head from nape to eyes; feels sick at times.

‖ Following pleurisy, a cough for nearly two years; in pleurisy had great sinking of stomach; cough only on lying down in daytime, not severe, always ending with a little easy expectoration.

‖ Cough ever since a child; hollow, hard, like a stroke of a sledge-hammer on a piece of timber; short, dry shock, in paroxysms, racking her to pieces.

‖ Chronic, severe dry cough in evening in bed and in morning; hoarseness, voice deeper than usual; < in cold, damp weather; sensation as of something in larynx, followed by cough and expectoration of mucus.

Digitized by Google

Chronic cough, < at night; wheezing in chest; child coughs like an old man; feet and hands cold; pain in chest; disease confined to large bronchial tubes.

When coughing: headache as if bruised or torn; sometimes vomiting; hoarseness; soreness in trachea; constriction of air passages; sensation as if lungs came in contact with back; pressing, tension, cramplike pain, cutting, stinging, soreness and bursting pain in chest; pain in sternum; jarring of chest and abdomen; reverberation in crown of head; bursting pain in head, > by pressure, during cough; cervical pain, epistaxis, palpitation; rattling; retching and vomiting; paleness with cold hands; sleeplessness; night sweats; hypochondriac pains; pains in abdomen, back, hips and legs; discharge of feces; convulsions.

Chronic bronchial catarrh, with excessive collection of mucus or muco-purulent matter, with loose rattling cough and easy expectoration, especially in daytime; at night mucus is more tenacious and raised with difficulty; becomes easy in morning; patient very sensitive to rainy weather, feels least change.

Spasmodic whooping cough: two paroxysms in quick succession; successions follow each other rapidly; suppressed and choking, without being pronounced; with tickling in larynx as if caused by down, evening and night; expectoration of dark blood, or of yellowish greenish, purulent, white, watery mucus; sour, or putrid saltish taste; face becomes pale during paroxysms; frequent relapses without any known cause; third stage.

Aggravation of cough: from afternoon to midnight; from cold; cold damp weather; in open cold air; driving in an open wagon; after sleep; lying upon side; standing; talking; after eating; from highly seasoned food; vinegar and other acids; before menses.

Inner Chest and Lungs. Anxiety in chest.

Weakness of chest when talking or reading aloud; during evening, while lying down.

Weak feeling in chest, could get her breath only with difficulty.

Fulness in chest before menses, is frequently obliged to take a deep breath.

Sensation as if lungs touched back.

Feeling as if a lump of ice were in r. chest.

Oppression, heaviness and pressure in chest.

Oppression of chest with stitches in l. side.

Pain in chest as if strained, with oppression.

Chest painful on moving arm.

Pain in upper part of chest as if he had fallen upon it.

Google

Pains in whole thorax.
‖Pains in chest from overlifting, or after inflammation of lungs.
‖‖Burning in chest, rising to face.
‖Pain as if chest would fly to pieces, when coughing or drawing a deep breath.
‖Roughness and soreness in chest.
Pain in sternum; aching.
‖Violent cramp in chest.
‖Tightness of chest as if something had grown fast; constriction; occasional shootings.
‖On taking a deep breath, chest feels constricted.
‖Tightness and constriction of chest on bringing arms together in front.
‖Painful constriction of chest.
Tormenting shootings behind lowest rib of l. side, toward back, < by breathing deeply.
‖‖Shooting in l. side of chest through to back.
Thrusts in l. chest toward heart, which took away her breath; great thirst at night.
Stitches in r. side of chest, through stomach and pit of stomach.
‖A stitch extending from r. side of chest into scapula.
Painful shattering stitches shoot into r. chest.
‖Stitches in l. chest when breathing.
‖‖Stitches through chest, extending into l. scapula; < lying on back and during least motion.
Flying stitches in l. side of chest, < by walking quickly and going up stairs.
‖Stitches in sternum.
Sensation of coldness in chest.
‖‖Burning pain all around l. side, below heart and across stomach, < evenings; it sometimes extends down as far as kidney; it causes him to shake all over; hands, legs and whole body tremble; retching, frequent aching in forehead, increasing with pain in sides, latter < every third night, lasts two or three hours, and gradually leaves him; often feels it when drawing a deep breath. θRemittent neuralgia of chest.
‖Severe acute pain deep in l. lung, outside of nipple; < in evening.
‖‖Congestion of blood to chest.
‖‖Dry cough, oppression of chest, emaciation; daily expectoration of red, frothy blood, particularly in morning; voice hoarse; painful pressure beneath sternum and in region of stomach; occasional stitches in l. side; after suppression of an eruption. θHæmoptysis.
‖Neglected influenza and pleuritis; dull stitches in r. side

and severe oppression of chest, so that he cannot talk, on taking a deep inspiration, or coughing; respiration difficult; pulse weak, small.

Yesterday morning cough, afternoon feverish or hurried breathing, also last night; this morning cough, which sounds loose; pulse 184; skin hot; palms and body perspire; breathing very rapid, could not well be counted, as it was interrupted every few seconds by cough, it was certainly 72; tongue dry; sibilous all over chest, especially lower r. lobe; crepitation in both lower lobes; chilly yesterday; no alæ nasi movement except when she voluntarily moves them; breathing very loud when lying on r. side, less loud when lying on l.; during cough noisy escape of flatus per anum; l. chest dull on percussion. θPneumonia.

Three days ago several chills lasting till afternoon; then intense heat < in evening, with headache and thirst, calling for frequent mouthfuls of cold water; great restlessness during night; next morning when heat had somewhat subsided pulse 112; during heat it was 130; paroxysms of heat came every two hours without any more chills; congestion of lower half of l. lung and lower two-thirds of r. lung, very distinct; marked dyspnœa; short, troublesome cough; anxious and distressed for breath. θPneumonia.

Four days ago shivering, heat, severe stitch in side, dry exhausting cough, distressing heat at night, with thirst and anxiety; diarrhœa; then fever, circumscribed redness of cheeks, moist coated tongue, rapid short breathing, l. side less raised during respiration than r.; percussion sound on l. side posteriorly as far as fourth rib tympanitic, and from fifth rib downward dull; increased vocal fremitus; on auscultation consonating râle and indeterminate respiratory murmurs at fourth rib; from fifth rib downward strong bronchial respiration; on r. side superiorly and posteriorly feeble but distinct crepitation, and in upper part of chest respiration was sharp and expiratory murmur distinct; pulse 100, hard; cough frequent; expectoration moderate in quantity, tough, adherent, without bubbles and colored with blood; urine scanty, turbid; giddiness on rising; general heat, especially of head; prostration; pain in all limbs; anxiety; urgent thirst; dryness of mouth; pappy taste; want of appetite; nausea; stabbing pain in l. chest, on least movement; coughing on breathing deeply. θPneumonia.

Pneumonia, with hepatization after violence of fever has abated; before red hepatization and afterward grey hepatization; dry hacking cough especially at night;

Google

severe dyspnœa and suffocation, < at night, with stitches and soreness on coughing, stitches in chest, dulness in mind, stupidity, forgets what he has to say; cannot make an exertion to think; almost complete hepatization of both lungs. θTyphoid pneumonia.

Pneumonia, badly treated cases; hepatization or abscess, with pale, cold, damp skin, emaciation, hectic fever, swelling of extremities; purulent sputa, quick, weak pulse.

Pneumonia: l. lower lung; can lie on back or l. side, not on r.; fanlike motion of nostrils.

Pneumonia assumes a torpid character with slow solidification; rattling in chest; frequent weak, faint spells and flushes of heat; feels suffocated, wants doors and windows open; constant heat on top of head.

Torpid typhoid pneumonia, with short rapid breathing, a mere heaving of chest; cough and expectoration nearly impossible; patient responds sluggishly, comprehends slowly; < about midnight.

Neglected or occult pneumonia in psoric patients, threatens to terminate in tuberculosis or in phthisis pituitosa.

Pneumonia passes through its first stages normally and then remains stationary; deficiency of reaction; absorbs infiltration and prevents suppuration.

Left thorax overfilled with pleuritic exudations, not a trace of respiratory murmur; vertebral column strongly bent to r. side; wall of thorax perforated near l. nipple; decided fluctuation and formation of abscess, which broke and discharged a large quantity of pus; after a week cannot get a trace of respiratory murmur; everywhere dull sound on percussion.

Pleurisy (after *Acon.*) acute, plastic form.

Parenchymatous pleuritis after removal of febrile eruptions, at termination of process of exudation and to render innocuous those parts of exudation which are not absorbed; pleuritis in course of acute articular rheumatism, or articular gout; fibrous pleuro-pneumonia.

Hydrothorax, with sudden arrest of breathing at night in bed when turning, going off when sitting.

Sensation of fulness in chest, alternating with a sense of weakness in evening on going to bed; eruption on arms, which are numb after scratching; quite costive; feels hungry 10 A.M.

Since an attack of pleurisy about twenty years ago, pain in l. lower thorax, back and front, as if something fell forward on turning over on r. side when lying; if she continues to lie on r. side it feels as if it pressed against

Google

front lower chest; if she still continues in that position, there is also heat in part affected; pressure causes dyspnœa when lying on r. side.

‖ Pressure and tension in chest and in region of stomach; sensation as if chest were too narrow, frequently draws shoulders back to overcome this and to get air; has had several attacks of hæmoptysis; salty-tasting, purulent blood-streaked expectoration; hemorrhoids; sleep restless, dry heat prevents him falling asleep, much thirst at night. θPhthisis.

‖ A boy, æt. 7, sickly since a long time, fevered at night, slept badly, restless whole night; upper parts of superior lobe of lungs without respiratory murmur, empty, dull percussion sound; exudative condensation of lung tissues.

‖ Difficult expectoration of small quantities of muco-purulent matter; night sweat; forenoon chills followed by mild hectic; dulness in apex of l. lobe extending down to third intercostal; bronchial râle, with distinct voice sounds; pain in chest from front, back into shoulder blade; small cavity in this part of l. lobe. θPhthisis.

‖ Cough so severe as to cause retching, extreme prostration, paleness of face and cold sweat on forehead; stitches in various parts of chest on coughing; cough < at night, constant as soon as he closes his eyes; expectoration profuse, purulent, of very offensive odor; appetite poor; extreme prostration; copious night sweats; despairing mood. θPhthisis.

‖ Severe harassing cough, with thick, yellow, purulent expectoration; thirst; night sweats; hectic; pulse 125; loss of appetite; hurried respiration; oppression on chest and occasional looseness of stools, running off in painless diarrhœa, cold, clammy hands and feet and stinging in same, with flashes of heat and coldness throughout body; ears discharge profuse offensive pus; chronic ulceration of external meatus with perforation and complete destruction of drums.

‖ Tuberculosis of lungs; especially indicated as a preventive when there are congestions to head and chest; dry, teasing night cough; breath hot; pain like a rivet through upper third of l. lung to scapula; sweats; flashes of heat; burning of feet, with desire to uncover them.

[29] **Heart, Pulse and Circulation.** ‖ Rush of blood to heart.

‖‖ Palpitation: anxious; in evening in bed; and fluttering of heart; without anxiety, at any time of day; during stool; violent at night, on turning in bed; violent and rapid on falling asleep; when going up stairs or when climbing a hill; visible.

Google

‖‖Sensation as if heart were enlarged.
‖Stitches in region of heart, or in r. side of chest, at night, while lying on back, on slightest motion.
‖‖Short stitches in præcordial region.
‖Pericarditis; pericardial effusion; exudation.
‖Stitches in cardiac region, < taking a deep breath.
‖‖Sharp pain at heart going through chest, to between shoulders; especially with dyspeptic symptoms.
‖‖Cutting pains about heart as with knives, which decrease or increase, last a few hours, with redness of face, followed by general coldness; attacks only when waking up.
‖‖Has been sick over a year; failing appetite and diminishing strength; skin very yellow, like icterus; six months ago began to complain of palpitation whenever he took exercise; œdema on both sides of tibia; for a month confined to bed, slightest exercise caused dyspnœa and palpitation; insufficiency of mitral valve; (received Quinine, Strychnia, Arsenic, Digitalis, Bromide of Potassium, etc.), debility and sleeplessness increased; stomach retained no food or drink; nausea continued, had not slept for five nights, great emaciation; very weak; dyspnœa caused by talking even in a low voice; could only lie on back; when he turned head, he heard a noise in r. carotid artery, as from escaping steam; skin dry; mouth and throat very dry, not > by drinking; frequent, scanty micturition; urine pale; constipated; aversion to food; aversion to light; pulse feeble, 140.
‖ Pulse: full, hard and accelerated, at times intermittent.
‖‖Great orgasm of blood, with violent burning in hands.

[20] **Outer Chest.** ‖Shootings in sternum.
‖Does not walk erect; stoops or bends forward in walking or sitting; morning sweat after walking.
‖‖Seven years ago noticed a deep yellow spot, size of a silver dollar, on l. breast; now covers her person from hips to neck; inordinate hunger from 10 to 11 A.M. θChloasma.
‖‖A keloid on sternum which had a diameter of one and one-half inches, and an elevation of one-tenth of an inch; it was hard and shone like mother of pearl and pained at times; man suffered from enteritis, which by bad treatment had become chronic.

[21] **Neck and Back.** ‖Glands of neck swollen.
‖Stiffness of neck: in nape, with paralytic sprained pain; with cracking of vertebræ on bending head backward.
Tearing and tension in l. side of nape, before midnight, after waking feels as if too short; in morning must cry out with pain; > during rest.
Drawing pain in nape of neck and scapulæ.

Digitized by Google

Stitches: in nape of neck, on stooping; in cervical muscles; beneath scapulæ, which take away breath, and do not permit stooping; in scapulæ.

An itching tetter on nape of neck below hair.

Pressive pain in back, beneath scapulæ, in evening.

Tensive pain between scapulæ while lying or moving.

Pain in small of back: could not walk erect, was obliged to walk bent over; violent only on stooping, tensive as if everything were too short; on rising from a seat; gnawing; after heavy lifting and taking cold at same time; violent, as if bruised, also in coccyx; tiresome feeling, as if bruised; stitches.

Sticking pain in lumbar vertebræ with every expiration.

Stitches transversely across small of back.

Pain in back as if sprained, or from a false step.

Sensation as if vertebræ were gliding one over the other when turning in bed.

Stiffness, now in back, now in hips, painful on turning over in bed; obliged to hold breath.

Pain in back on stooping.

Pulsating stitches in region of loins and kidneys.

Pain in loins; urine thick, dark; pains in chest; hot sweats; flatulence.

Piercing pain and tension in sacrum.

Cannot lie on her back on account of rush of blood to head. θNightmare.

Finds himself, in night, lying on back.

Does not walk erect; stoops or bends over forward in walking and sitting.

Large goitre, interfered with respiration, caused oppression when ascending heights or walking quickly; snoring during sleep; for past year chills, night sweats, and difficult expectoration; stammering and deafness; after vaccination pustular eruption on head.

Woman, æt. 60, removed a mole from l. shoulder; an ulcer two inches in diameter was result, a year later; had been treated with ointments; sore, intolerant of water, heat in vertex; distressing headache, a "breeze of pain" as it was called.

Constant backache for several years.

For seven weeks, constant pain in small of back, < from motion and stooping, disturbing sleep at night; pain as if he would have to sink down, shooting, stitching, causing a sensation of lameness in thighs; can hardly walk; must lie on l. side at night; hands cold. θLumbago.

Burning and tensive aching between scapulæ; heat on top of head; palpitation of heart; sleeplessness; remedies do not seem to take effect. θMyelitis.

Google

‖Child, 3 years old, of psoric constitution, dorsal inflammation, and an ill-conditioned ulcer, two inches in front of spine, and one inch above spine of ilium, with hard, elevated edges, no granulations, deep and long enough to receive half of a hen's egg divided longitudinally, from edges of which were growing twenty or thirty black and coarse hairs.

‖Tabes dorsalis; unsteady gait; great debility and trembling; limbs go to sleep.

‖Pott's curvature; muscles soft and flabby; great prostration; well-marked curvature in lumbo-dorsal region.

‖Spinal curvature occurring after suppression of scabies by ointment.

‖‖Angular curvature and abscess in a child, æt. 8, result of a fall; great and rapid emaciation; violent hectic; skin hot and dry, covered with fine rash; thirst; inflamed eyelids; constipation; no appetite; urine scanty and high-colored; breathing difficult, especially inspiration; neuralgic pains in thoracic and abdominal walls, extending from back; abscess discharging large quantities of pus daily (had been punctured); hump prominent and increasing very fast.

‖‖Curvature of spine, vertebræ softened.

" **Upper Limbs.** ‖Pain as if sprained, or as if bruised, in l. shoulder.

‖‖Rheumatic pains in shoulders, especially in left.

‖Lacerating pains in shoulders and shoulder joints, especially at night.

‖Pain in l. shoulder as if luxated, or bruised.

Pressure, like a weight, in shoulder when walking in open air.

Drawing pains in shoulder joint, arms and hands.

Stitches extending from shoulder into chest, on motion.

Stitches beneath r. axilla.

Weakness of upper arm, could not raise it.

Jerking pressure in deltoid muscle.

‖‖Perspiration in armpits, smelling like garlic; offensive to patient.

Sensation as if something heavy were hanging on upper arm.

Heaviness and tension in humeri.

‖Arms pain as if beaten.

‖Drawing and tearing pain in arms and hands.

‖Sensation as of a mouse running up arms and back before a fit.

‖‖Scabs on r. arm. θEczema.

‖‖Irritating rash on arms for two months, pustular, on elbow apparently from contact with coarse shirt; in

some parts patches like lichen; in others linear appearance of psoriasis.

‖ Erysipelas under l. elbow; joint very painful, skin hot, very red and infiltrated; arm sensitive, slightest motion < pain; headache; thirst; restless sleep; constricting sensation in throat; pulse small and thin; erysipelas extending from elbow all around to extensor side of forearm, and continued to progress to upper arm, showing at first a pale reddish hue, which finally became darkened and reached its acme in production of vesicles of different size; enormous tension and swelling of skin, with excessive burning pain; extension of redness upward, copious hemorrhages from blisters, which turned black and dried up slowly; spread steadily upward; soon reached shoulder, and began to radiate toward neck and head; pulse became still smaller and sensorium not quite free; excessive prostration.

Stiffness of wrists, especially in morning.

Pain in wrist as if sprained.

‖‖ Tremulous sensation in hands when writing; cold trembling hands.

‖‖ Burning of hands.

‖ Crawling in hands.

‖ Psoriasis inveterata, with dry, scaly eruption on backs of hands; intense itching when warm; after scratching relief, followed by burning and at times bleeding; knuckles crack; at night in bed, feet burn, is obliged to put them in a cool place.

‖‖ Rhagades on hands, especially between fingers, on finger joints and in palms.

Perspiration of hands, and in palms of hands.

‖ Hands covered with sweat, particularly palms.

Pain in flexor surface of r. middle finger as from a sticking splinter.

Pain as from a sprain in first joint of thumb.

‖ Cramp in three middle fingers.

‖ Burning in balls and tips of fingers.

‖ Stitches in tips of fingers.

Crawling and prickling in tips of fingers, very acute, < on hanging arms down.

‖ Pain in end of finger like a brier sticking there; redness and swelling so painful she had to desist from work; burning and stinging, > in cold water (*Apis* had been given without relief).

‖ Panaritium in l. index finger; pus collected beneath nail which soon came off and was succeeded by a thick, yellow distorted one, from beneath which pus continued to discharge; point of finger swollen, shining, yellowish-

Digitized by Google

white; frequent severe stitching pains; pain on touching nail; whole hand at times as if lame.

‖Panaritium affecting thumb: great swelling and inflammation; formation of pus around and beneath nail; intolerable throbbing and boring pains, < at night.

‖For three weeks, whitlow on l. forefinger, whole finger inflamed, last phalanx contains pus along its entire extent, except at dorsum; shooting pain in ulnar surface of last phalanx, throbbing all along finger, aching to axilla and scapula; burning in whole finger, it is very tender; sleep disturbed by pain; > by cold water, holding arm up; < by letting it hang down and from hot water; a lump as large as a marble in ulnar side of bend of elbow, with aching in it; often has hangnails; has had five whitlows in nine years.

‖Deadness of fingers in morning.

‖Thick, red chilblains on fingers.

Cracking and chapping on finger joints.

Erysipelatous swelling of fingers with numbness.

‖Hangnails.

‖Cold hands and feet.

[31] **Lower Limbs.** ‖Coxalgia after catching cold; leg longer than sound one; gluteal fold sunken; foot on affected side thrown forward, and is supported by great toe.

Sudden cramp like very painful jerks about hip joint.

‖Tensive pain in hip joint on walking.

‖Drawing pain in l. hip.

In morning violent shooting pains in r. hip joint, compelled him to keep his bed, as he could not raise himself, nor move without greatest effort; shooting extended through r. half of pelvis and down r. femur, avoided knee and reappeared as severely in foot.

Shooting pains in hip in evening, extending to upper third of thigh, < when at rest, > by motion and pressure.

Pain in l. hip as if bruised, or luxated.

‖Dull, heavy pain in r. hip extending to knee, producing lameness, soreness and tumefaction; tendons forming lateral boundaries of popliteal space contracted, hard and sensitive to touch, making it difficult for her to touch heel to floor; sense of confusion and fulness in head; heat and weight in vertex. θRheumatism.

Pain in posterior muscles of thigh while sitting.

‖Soreness between thighs, especially on walking.

‖Cramp in thighs.

Drawing and bruised pain in thighs.

‖Middle of thigh as if broken.

‖White painless, elastic swelling of r. knee; no heat.

Google

‖Doughy swelling of r. knee, especially above patella; pain on pressure; cannot straighten leg on account of pain.

‖Periodical, transient, shooting pains in l. knee; constant pain < in paroxysms, in l. hip joint, < walking, from external pressure, and especially by pushing leg upward toward hip joint; affected leg one inch longer than sound one, flexed at knee and thrown outward; limping gait.

Cramplike pressure in hollows of knee, extending to ankles.

Pressure in l. patella and knee joint.

Violent drawing and tearing through knees and tibia, especially in evening, does not know where to lay legs.

Tearing and a feeling as if sprained in l. knee.

‖Stitches in knee.

‖Stitching pain in r. knee extending to toes, < after midnight, then so severe as to cause spasmodic twitchings; burning in knee; knee and leg swollen; severe pain on inner surface of knee from least touch; constant severe chilliness, not followed by heat; stool hard.

‖‖Stiffness in knees and cracking.

‖Tightness in hollows of knees, as if too short on stooping.

‖Pain in knees as from stiffness, on rising from a seat.

‖‖Knee red, swollen, painful, has a doughy feel, synovial fluid in surrounding cellular tissue; feels < at night in bed, when it burns and itches; > moving about, < keeping quiet, with stiffness when beginning to move. θGonitis.

‖‖Swelling of r. knee; every Summer is troubled with an eruption on one hand, terribly itching and burning after scratching, < at night, spreads up arm to shoulder; knee pan feels elastic, as if some fluid were in joint; burning pain during rest.

‖Dropsy of knee joints; subacute and chronic synovitis.

‖Sciatica: subacute and chronic; pain in small of back; stitching drawing on rising from a seat; tensive pain in hip, < on l. side; drawing down limb, with sensation as if bruised; limb feels heavy, as if paralyzed, < walking; knees rigid; feet swollen.

Bruised sensation in lower extremities.

‖Drawing pain in lower extremities in morning and evening in bed.

He puts lower extremities out of bed on account of tearing pain in them.

‖Heaviness and weakness of limbs when walking.

‖Pains in limbs are greatly < by heat and at night.

‖Arthritic swelling of joints, with cracking on motion.

‖‖On going to sleep, one leg is suddenly drawn up, and shot out again, partially rousing him.

Digitized by Google

Inclined to cramp in leg, on stretching out foot.
Tearing in legs from knees to feet, while walking and sitting.
‖After convalescence from pneumonia, pain in both shins, especially l., < when standing; outer side of l. lower leg swelled; boring pain in l. lower leg, like a gimlet going from just below knee to ankle.
‖Ulcer on tibia in a man broken down by rheumatism and strong drink.
‖Phlegmasia alba dolens.
‖Erysipelas of legs.
‖Chronic abscess at head of tibia, with serous discharge.
‖‖Cramps in calves and soles, particularly at night; looseness of bowels. θAsiatic cholera.
‖Cramps in calves: while dancing; when walking; in stretching out legs; at night; in morning in bed.
Weary pain in calves, at night in bed.
‖Enlarged vein in r. calf for last six days, with aching, tingling and burning in it.
‖‖Stiffness of ankle joints.
Pain as from a sprain in l. ankle on standing and walking.
‖Ankles weak.
‖Ulcer of more than two years' duration on l. leg, above outer malleolus, as large as a quarter dollar, with areola much swelled, very hard, dull purplish red; stinging pains; scanty watery discharge; before appearance of ulcer had much rheumatism, > in Winter, < before a storm; feet hot at night, keeps them out of bed.
‖A deep ulcer on inner side of r. ankle, discharging thin ichor of bad odor; some swelling about ulcer.
‖Swelling and redness of inner side of r. foot and r. inner malleolus; part very tender; sharp darting pain from r. inner malleolus, going up to knee, and down along instep toward toes; < by standing on it with foot flat; can stand a little on toes.
‖Aching, drawing, tearing pains in feet.
‖Tensive pain in r. foot, after dinner and in morning.
Drawing in feet extending up to hips, with cracking of joints on every movement.
‖Great heaviness of feet, especially of ankles.
Stitches: in ball of r. foot.
‖‖Burning in feet, wants to find a cool place for them; puts them out of bed to cool them off.
‖On putting feet to ground prickling in balls of feet, as if it would draw toes down.
‖Children kick off clothes to cool their feet.
Sensation of cold feet, though they really are not cold.
‖Cold feet and hands; cold soles.

Digitized by Google

Feet cold, or covered with cold sweat.
Intense icy coldness of feet; < when head is congested.
Herpetic eruption on foot, from a blow received six months ago; heals and then breaks out again.
Ulcer on instep.
Chronic badly smelling feet; gnawing empty feeling at pit of stomach an hour or so before dinner; dry, burning heat in soles at night, even when cold through day; had itch suppressed by Sulphur.
Sticking, crawling in r. heel.
Cramp in soles of feet at every step.
Burning in soles: on stepping after sitting a long time; and itching, especially on walking; wishes to find a cool place for them, puts them out of bed; wants them uncovered.
Soles cold and sweating.
Pressive pain and soreness on inside of great toe.
Sudden sharp cutting pain from behind forward in l. great toe; also shoots as from a fine needle.
Sharp shoots as from a blunt nail, in rapid succession, at root of nail of great toe.
Cramps in toes on stretching out feet.
Red, shining swelling of toes.
Eczema under toes.
Itching in toes that had been frozen.
Pain in corns.
Corns and frost-bite; had not been able to wear boots for two years; feet very sore, tender, swollen, inflamed; burning, boring and stitching pains.
Redness and swelling of chilblain, with tendency to suppuration; chilblain thick, and red, with cracks on joints; itching < in warm bed.

31 **Limbs in General.** Trembling of limbs, hands and feet, with weariness and prostration.
Unsteady gait; tremor of hands.
Limbs go to sleep easily.
Tearing in limbs, muscles and joints, from above downward.
Weariness, cracking, swelling of joints.
Arthritic swelling and heat.
Pains in knees, ankles and elbows, every night about 11 P.M., continuing till 7 A.M.
Gouty or rheumatic complaints, with or without swelling.
Pains in limbs, < when covered with feather covering.
Severe inflammation of joints, much redness, swelling, and excruciating pain on motion; all joints may be successively attacked; is apt to begin in feet and pass from them successively to upper joints; pains decidedly < at night. θRheumatism.

Digitized by Google

Chronic rheumatism; stiffness of joints, and pain in lumbar region.

In second stage of articular rheumatism, where deposits are to be removed; feet in particular are affected and very stiff.

Chronic rheumatism; podagra; tearing, stitching pain or when after *Bryon.*, stitch-pain leaves and a dull, aching, pressive pain remains; sleeplessness; hot head and cold feet.

Bursæ, hard or soft, inflamed; feeling of formication.

Eruption of minute, almost confluent vesicles, on arms up to elbows, and on legs below knees, on no other part of body; excessive pruritus, < scratching; for three weeks harsh, dry cough, < at night; spells almost continuous, cough provoked by tickling in throat below glottis; constant sensation of weight in centre of sternum, with a heavy, dull, aching pain; has pains at times in lower edges of pleura.

Chilblains, thick and red, with cracks on joints.

Corns with aching and stinging pain.

Hands and feet cold; or palms and soles burning hot.

Rest. Position. Motion. Rest: head symptoms <; caries of bones of cranium <; > pain in nape of neck; shooting pain in hip <; < pain in knee.

Sitting: heaviness of head >; vertigo; head symptoms <; hunched, in brain affections; bent over, stitches in hepatic region; pain about navel; rumbling and grumbling >; pains in anus <; burning in anus; forcing down in anus; pain in posterior muscles of thigh; tearing in legs; restlessness.

Standing: vertigo; > hemorrhoids; pain in shins <; on foot flat, < swelling of foot and ankle.

Can only lie in one position, with occiput drawn far backward.

Lying: heaviness of head; occiput as if hollow; very violent pressure in stomach; rumbling <; hemorrhoids <; weakness of chest; on r. side as if something fell forward in thorax; pain between scapulæ; constantly moving feet; chilliness >.

Lying on back: hard mass in epigastrium; stitches through chest into l. scapula; stitches in region of heart or in chest; rush of blood to head; assumes position in sleep.

Lying on painful side: neuralgia of liver >.

Likes to lie with head low: hydrocephalus.

Lying with head high: heaviness and dulness >.

Stooping: heaviness of head; rush of blood to head; vertigo; headache; stitches in forehead <; pricking across

Google

forehead <; head symptoms <; pain in region of kidneys; when walking or sitting; stitches in nape of neck; pain in back; tension in bends of knees.

Must bend double: painful urging to urinate.

Motion: disagreeable from heaviness of head; of head > stitches; headache <; cannot bear, with headache; head symptoms <; caries of bones of cranium >; eyeball painful; lids tense; noises in ears <; > hemorrhoids; soreness between thighs; < stitches through chest; stabbing pain in l. chest; pain between scapulæ; < pain in erysipelas on arm; < shooting pain in hip joint; > shooting pain in hip; > pain in knee; cracking of joints; in bed, chilliness.

Walking: painful, with sick-headache; pressure upon bladder; pain in face >; prevented by hemorrhoids; < stitches in l. chest; tensive pain in hip joint; soreness between thighs; < pain in hip joint; sciatica <; heaviness and weakness of limbs; tearing in legs; cramp in calves; burning in soles; weariness disappears; lassitude; sleepiness; in open air, sweat; in open air, sticking itching.

Moving arm: chest painful.

At every step: cramp in soles of feet; burning in soles.

Regularly protrudes and retracts tongue.

Raising head: heaviness and fulness <.

Nodding head: as if brain were beating against skull.

Bending head backward: cracking of vertebræ.

Bending arms backward: shortness of breath and oppression.

On bringing arms together in front: tightness of chest.

When turning over in bed: asthma; as if vertebræ were gliding over each other; stiffness in back <.

Talking: fatigues whole body.

Dancing: cramp in calves.

Stretching out feet: cramps in toes.

When r. leg is lifted to step: pain in knee <.

Stretching out foot: cramp in leg.

Rising: limbs totter; rising from seat prevented by pain in stomach; pain in small of back <; stiffness and pain in knees; sciatica <.

Ascending: confusion and dulness of head; headache; stitches in l. chest <; palpitation; oppressed respiration, with goitre.

Going down stairs: dizzy.

Writing: tremulous sensation in hands.

Nerves. Feels tired and used up; not rested in morning.

Weariness disappears on walking.

Lassitude: in morning; in evening; after walking, with sleepiness.

Google

Weakness: after a short walk; after a stool; in afternoon.
Exhaustion of whole body; extreme faintness; uneasiness.
Uneasiness and excitation of nervous system; could not sit long; even while lying was constantly moving feet.
Uneasiness in blood; orgasm.
Unsteady gait, tremor of hands.
Cannot walk erect, stoop-shouldered.
Great debility and trembling; talking fatigues.
Weak, faint spells, frequently during day, after nursing or night-watching, with great sleepiness.
Excessive prostration and rapid emaciation.
Great prostration with entire loss of appetite and general coldness of surface.
Weak, fainting spells frequently during day; feels very faint and weak, with a strong craving for food, from 11 to 12 every morning.
Child easily fatigued; sits bent forward; refuses to stand long, but crawls about.
Since an attack of diphtheria five years ago, exhaustion on least exertion; nausea or vomiting in morning; attacks of diarrhœa occasionally; micturition frequent and painful; urine turbid; complexion sallow and pallid.
Excessively sensitive to open air and will not be washed; very much inclined to take cold.
Universal tremors.
Hysteria: she comes out of her spasms feeling very happy, everything seems very beautiful to her; discharges a large quantity of colorless urine.
Child jumps, starts and screams.
Frequent spasmodic jerking in whole body.
Lays her head upon table; sighs and groans; unconsciously slides to and fro upon bench; struggles with her limbs; throws herself upon floor and rolls about; falls into a sleep and wakes up well.
Spasms set in with twitching of hands, then general convulsed movements of body and limbs; sensitiveness of abdomen, felt even in stupor which followed spasm, causing wincing from firm pressure over r. ovarian region; face red, spotted; had complained for several days of a violent pain in vertex.
Spasms after suppressed eruptions; often removes tendency to convulsions.
Chorea; in chronic cases, particularly after suppressed eruptions; frequent spasmodic jerking of whole body; tremor of hands; unsteady walk; peevish, irritable, ob-

Google

stinate; faint and hungry spells at 10 A.M.; soles of feet burn.

Epilepsy since infancy in a boy æt. 4; attacks occur at periods varying from three to six months; often has severe attacks in rapid succession; comes in after playing and running, leans head against a chair and complains of headache; feels tired and exhausted; falls asleep with jerkings, and anxious starting in sleep, which is followed by a fit; froth at mouth, eyes set, throws hands above head, and grows stiff; trembling of limbs; attacks last some minutes with only slight remissions; body jerks, legs rapidly drawn up and extended with force, thumbs clenched; coldness of extremities; blueness around mouth; attacks preceded by vertigo, soporific sleep, gritting of teeth, nausea and vomiting; unconscious of what has happened.

Epilepsy for six days; as many as twenty-three fits in one night; convulsions confined to upper extremities and trunk; head moving about in all directions, but mostly to side; trying to rise; eyes constantly moving up and down; foaming at mouth; hands clenched, thumbs not turned in; both arms nearly in position of r. arm when standing at guard in boxing, and trembling as if in a shaking chill; lower extremities unmoved and rigid; convulsions began in l. side and went to r.; now more frequently they are reversed.

Æt. 18, good health until eighth year, when he was suddenly seized with epileptic fits; sometimes had three or four paroxysms a day, seldom passing twenty-four hours without one; produced by sudden noise, touch or excitement; contracted itch at school when about 8 years old, which had been repelled by external treatment; eruption disappeared almost immediately after application of ointment, and within three weeks thereafter had his first fit; after taking *Sulphur*, an eruption, resembling small boils, appeared, sometimes painful, and when touched would throw him into a spasm; febrile symptoms increased and finally assumed a typhoid form.

Had fallen from a ladder upon back of his head ten years ago; three days after fall, an epileptic fit, repeating ever since at intervals from five days to six weeks; before each fit aura from hands into head; fits mostly in morning, one to two hours after rising; on days of attack two diarrhœic stools, otherwise stool normal; after fit sour taste in mouth and dejected spirit; during well time every morning throbbing, pressing pain in front of head; restless sleep; in air, during windy, cold weather, jerkings in arm and about mouth, without a

fit, > in warm room; when a child was subject to scrofulous eruptions; grandmother and stepbrother were epileptic.

‖ Epilepsy, three or four attacks a week; general health and strength much deteriorated, cannot walk much, memory has quite failed him, has become partly an imbecile.

‖ Epilepsy of five years' standing.

‖ Epilepsy; before spell crawling and running as of a mouse up back and arms, or a sudden feeling as if a mouse were running from r. foot up leg to r. side of abdomen; after attack, which consists of various convulsive motions, he wipes tears from his eyes; soporous sleep; great exhaustion; jerking in arms and about mouth in cold air; chronic cases of psoric taint; suppressed itch.

‖ Paralysis of l. leg; could not bear to have head raised from pillow; constipation; paralysis; everything appears dark to her; sinking sensation; lay coiled in bed.

‖ Involuntary stool, with retention of urine and partial paraplegia, after miscarriage.

Palsy, from repercussion of eruptions.

‖ Rheumatic paralysis.

Sleep. ‖ Totally disinclined to rise from bed in morning; not refreshed by sleep.

‖ Sudden jerking of limbs when going to sleep.

‖ Child kicks clothes off at night.

‖ Yawning and sleepiness during day.

‖ Dropsy in afternoon and after sunset; wakeful at night.

‖‖ Irresistible drowsiness in daytime, wakefulness at night.

‖ Sleepiness in evening, but night is full of unrest, tossing, nervous excitement, orgasm of blood; pains of various kinds and but little sleep throughout night.

‖ Difficult falling asleep: on account of great flow of thoughts; with inclination to perspire; with itching on skin.

‖ Wakes as with fright from a fearful dream, and after waking was still occupied with anxious thoughts, as of ghosts, from which he could not free himself.

‖ Anxious, frightful dreams of dead and dying; speaks, weeps and shouts in her sleep, so as to wake herself, and after waking remains long in a confused state.

‖ Much sighing and groaning in sleep.

‖ Sleeping with half-open eyes.

‖ Frequent turning over in bed without waking.

‖‖ Wakes up at 3, 4 or 5 A.M., and cannot fall asleep again.

‖ Screaming out in sleep; lamentation and moaning; talks loudly.

Dreams of fire and death.
‖‖Heavy, unrefreshing sleep.
‖Jerks and twitches during sleep.
‖Awakes with a start or scream.
‖Easily awakened, takes short naps.
‖‖Finds himself in night lying on his back.
‖Has happy dreams, wakes singing, is very happy.
‖‖Nightmare.
‖‖Dreams: vivid, anxious, as if pursued by wild beasts; vivid, comic, with loud laughter, continued for some time after waking; vivid, believing she sits on chamber causes her to wet bed; horrible, with great palpitation; that he has been bitten by a dog; that he is falling.
‖‖About an hour after he falls asleep he suddenly starts up and screams; leaps out of bed and runs about like a maniac; wrings hands, sweats profusely and trembles.
‖‖Crying attacks at night in a child æt. 8 months; would have to be carried most of time; cried < if it approached fire; rubbing head seemed to quiet it.
‖‖Aggravation after a long-protracted sleep; diarrhœa and fever, < after sleep.

[38] **Time.** Morning: dulness of head with pressure in forehead until noon; confusion of head; vertigo; after rising, headache; throbbing headache; diarrhœa early; cold feet; when waking, sensitiveness of vertex; on waking, lids agglutinated; pains in eyes sharp and sticking; photophobia <; sees halo around artificial light; dryness of eyes following lachrymation; burning of eyes; burning in edges of lids; sensitiveness of eyelids; itching of lids; lids drawn together spasmodically; diarrhœa; taste foul and bitter; tongue furred; tongue dry; mouth sticky; nausea; vomiting; pain in stomach <; fulness and tension in abdomen; griping before stool; stools undigested, more frequent; vomiting; dysentery <; on passing water, flying shoots in urethra; leucorrhœa <; sickness of pregnancy; hoarseness; irritation of throat; stiffness of wrists; deadness of fingers; shooting pain in hip joint; in bed, cramp in calves; tensive pain in foot; tired, not rested; epileptic fits; in bed, dry heat; hot head, glowing face; sweat, profuse on itching parts; sweat during sleep.
Toward morning: sweat.
3, 4 or 5 A.M.: wakes, cannot fall asleep again.
5 A.M.: painless diarrhœa, driving out of bed.
6 or 7 A.M.: sweat, after waking.
8 or 9 A.M.: every second day, febrile attacks.
9 or 10 A.M.: febrile attacks, postponing ten to fifteen minutes each day.

Digitized by Google

10 A.M.: pain at l. eyebrow to superciliary ridge; feeling of hunger; faintish feeling.
Between 10 and 11 A.M.: gone feeling.
11 A.M.: weak, empty, gone or faint feeling in stomach; hungry and faint, in pregnancy.
Forenoon; confusion of head; children feel faint; sick spells in pregnancy; chilliness with suppuration of mammæ; chills, followed by hectic.
Afternoon: headache; lids burning with flow of tears; pain in face comes on; heat, with suppuration of mammæ; weakness; drowsy.
2 P.M.: sharp pain in eye.
At 3 P.M.: nosebleed with vertigo.
All day: heartburn; pulsating pain in anus.
During day: sad, lachrymose attacks of melancholy for a few moments; hypochondriac mood; pressive pain over eyebrows; headache lasts; redness of eyes; chilliness; could not see anything with l. eye; sleepy; cold feet; drowsiness.
Toward evening: febrile heat.
From 6 to 8 P.M.: chilliness in back.
At 11 or 12 P.M.: pain in face comes on.
Evening: dulness of head; confusion of head; morbid ideas <; sudden sadness; merry; anxiety in bed; tearing in vertex; pricking across forehead; feet hot; sensitiveness of scalp <; photophobia <; dull aching and weight in eyeballs; itching of eyes; pressure in lids; pressure in nasal bone; pain in face <; toward, fever; throat and chest painful; nausea during stool; vomiting; vomiting of food eaten at noon; emission of flatus <; burning in anus; bloody stools; stool every half hour; stitches in rectum; crawling in rectum as from worms; burning in anus; hoarseness; cough before and when going to bed; shortness of breath in bed; asthma; burning in l. side <; palpitation; pressive pain in back; shooting pains in hip to thigh; drawing and tearing through knees and tibia; lassitude; drowsiness; chilliness; in bed, burning hot feet; sweat; sweat, most on hands; in bed, itching and prickling of skin.
Before midnight: tearing and tension in nape of neck.
About midnight: typhoid pneumonia <.
Night: dulness of head; rush of blood to head; violent headache; awaking with heat and anxiety; throbbing pain in head; pressive pain in occiput; headache awoke her; sick-headache <; pains in eyes <; restless first part; agglutination of lids; diarrhœa and tenesmus <; could distingush light with l. eye; pain in side of head <; neuralgia of jaw and temples <; itching <; in bed,

Warmth: headache <; pain in forehead >; of bed, deafness <; pain in face >; of bed < itching of scabies.
Cannot remain long in heated place: headache.
Heat: boring in teeth <; dry > cutting in abdomen, loins and sacrum >; itching < on backs of hands; < pains in limbs; of stove does not relieve chilliness; of bed < itching.
Sun: headache <.
Sultry weather: stitches in eyes <.
Aversion to bathing: hemorrhoidal tumors; children suffering from enuresis.
Going into bath: faint feeling.
After washing: aching in forehead >; heat rises to face; eyes first > then <; halo around light removed; ectropium or entropium <; rhagades <.
Dread of being washed.
Objects to washing out ears.
Cold water: sprinkling, > pain in head; sponging, headache >; sore pain in l. eye >, toothache <; > pain in end of finger; > pain in whitlow.
Cold food and drink; throat <.
Cold, damp weather: cough and hoarseness <.
Cold: headache >; pain in face <; drink causes violent stitches through teeth.
During windy cold weather: jerking in arm and about mouth.
Damp cold weather: sick headache <; swelling and caries of bones of cranium <; diarrhœa.
Before a storm: ulcer on leg <.

[40] **Fever.** ‖Chilliness: after dinner; at night; creeps from small of back up back, from 6 to 8 P.M.; with headache, in evening; and shivering over whole body, without subsequent heat, or thirst; and rigor, with blue nails, pale face, heavy, giddy head, not > by heat of stove, but by lying down; in open air, as if naked; shivering, on slightest movement in bed; in back, in evening for an hour without subsequent heat; constantly creeps from sacrum up back, without subsequent heat or thirst; sometimes > by warmth of stove; about lower part of body; every evening in bed, followed by heat and profuse perspiration; in forenoon, heat with cold feet in afternoon.
Coldness transient, of nose, hands, feet, chest, arms, back and abdomen.
Hands and feet very cold, with livid, pale face.
‖Chill: with delirium; begins in feet, hands, fingers or toes; mostly internal and without thirst, generally in evening, also at other times of day; external, with

simultaneous internal heat and red face; with thirst, preceded by heat; running up back.

‖Chill and fever: no reaction; stupid, sinking.

‖‖Orgasm of blood; frequent flushes of heat.

Heat of face every evening from 5 to 9.

‖Heat and burning in face.

‖Redness and heat of face with burning, especially about mouth.

‖Great heat of face with chilliness over back.

‖‖Flushing heat in face, with febrile shivering over whole body.

At night feeling of heat over whole body, especially in palms of hands.

‖‖Dry heat in morning in bed.

‖Violent dry heat in head, with glowing face in morning on waking.

‖‖Heat in head: prevents falling asleep; in morning; in evening, with cold feet.

‖Burning heat of palms of hands.

Dry heat in thighs and small of back, with coldness of back.

‖Heat of feet, with a burning sensation in evening in bed, so that she was obliged to uncover them for several hours; followed by uneasiness, itching and crawling in them; was obliged to rub them.

‖‖Hot flushes with spells of faintness, or passing off with a little moisture, faintness or debility.

Continued dry heat or coldness and cold sweat.

‖Heat: afternoon or evening, skin dry, much thirst; with thirst; frequent flushes in face, with shivering sensation over body; and sinking sensation in stomach; burning of palms of hands and soles of feet; and redness of face with burning in single parts, as on malar bones, around eyes, nose, ears and mouth; alternates with chilliness.

‖Sweat: on slightest motion; offensive, in axillæ; profuse, between fingers; of hands; about knees, at night; profuse in morning on itching parts; always after waking about 6 or 7 A.M.; in morning during sleep, disappearing on waking; in evening in bed; at night, with restless sleep; at night, all over body; while walking in open air; smelling of sulphur; profuse, sour-smelling all night; in evening, mostly on hands at night, only on nape and occiput; only on one side of body; only on back part of body.

‖‖Pulse 94; great weakness; no appetite; face flushed; mind sluggish and depressed; answers questions slowly and with effort; nights restless; fever paroxysms most marked in evening, with much thirst at night. θContinuous remittent fever.

Digitized by Google

‖Fever of continuous, remittent type, occurring in Autumn and Winter; rigors of various intensity precede heat, never follow it; chills remittent, lasting half an hour, or appear in paroxysms for a whole day, accompanied by thirst; heat, also in paroxysms, there may be from five to seven in a day; pulse from 130 to 160; heat most intense toward evening and forepart of night, with sweat after midnight; thirst and dryness of mouth, > by small quantities of water frequently repeated; headache and restlessness at night; jaundiced appearance of skin and dryness of tongue; craving for acids; typhoid symptoms with great dulness of mind, slowness in responding to questions.

‖Continued fever, no sweat; skin hot and dry, with scaling into bed; pulse intermits every third or fourth beat; could not speak a word from debility, but nodded his head in answer to questions; ash-colored, emaciated, cadaveric face; tried to find a cool place in bed; urine yellow, color of sulphur; violent spells of loose cough, no expectoration.

‖Boy, æt. 10, sick nineteen days, commencing with diarrhœa; unconscious last five days; pulse 135 to 140, small, hard; no eruption; febrile aggravations very indistinct, recognizable only by periods of restlessness and screaming, is appeased by a little water; mouth closed and jaw rigid; sordes on teeth and tongue; stiffness of jaw apparently caused by inflammation and gangrenous sloughing of buccal mucous membrane; offensive bloody ichor runs from corner of mouth.

‖Chronic rheumatic fever with heart disease and mitral regurgitation; very passive, quiet disposition; no swelling or redness; pain on moving, but afterward > by movement.

‖Hectic: febrile heat especially toward evening, with sharply circumscribed redness of cheeks (especially l.); dry skin, with thirst; thin, pale face; dry or diarrhœic and slimy stools; short, oppressed breathing; palpitation; sweat toward morning; debility, tired feeling in limbs, with heaviness, dry cough, etc.

‖Febrile attacks every second day at 8 or 9 A.M., last eight or nine hours; cold sweat first, then heat; thirst, with heat in mouth, both stages; cold stage lasts only two hours, remainder of time consumed by hot; at times very violent pains in back; is very weak; can hardly eat anything; great restlessness; perspires much at night; has taken much quinine. θAgue.

‖For two years shivering fits like ague every three or four weeks; attacks last three or four hours; duration of cold

Digitized by Google

stage depending upon way in which he wraps up, if warmly wrapped it lasts an hour; if not, two or three hours; this is succeeded by extraordinary heat of entire body, but no sweat; when attack seizes him, he piles blankets upon himself until he begins to get warm, he then becomes sick, and vomits contents of stomach; there follows fearful pain in head, which generally continues two or three days after paroxysm has ceased. θAgue.

‖ Intermittent fever of long duration, repeated attacks, suppressed by large doses of quinine, with much detriment to an already broken-down constitution; very weak and emaciated; violent burning in palms of hands and soles of feet; burning heat on vertex; marked venosity of hands.

‖ Intermittent fever a month after passing through a stage of bilious fever; had two paroxysms, tertian; severe gastrosis, that nothing could allay; diarrhœa driving him out of bed early in morning.

‖ Obstinate case of intermittent fever, characterized by hot flushes and hot soles at night; massive doses of quinine had failed even to suppress paroxysms; loss of health and flesh.

‖ A boy, æt. 8; for three days chill beginning in belly, then going around to back and all over body, six times a day; for one day, cold feeling on r. side of head, which quickly rises to vertex, making hair on vertex feel as if it stood on end.

▮ Patient partially recovers, and then relapses; chronic cases; enlarged spleen; constitutional symptoms; no reaction; stupid, constantly sinking.

‖ Appears particularly dull and forgetful, cannot remember what he was about to say, is very slow to answer, it requires some effort to rouse him; lies in a dull, stupid state, with muttering delirium, talking incoherently. θTyphoid fever.

▮ Typhoid fever in psoric individuals; well-selected remedy has no effect; sleepless nights; slow comprehension; heat and fulness in head; sore and inflamed eyelids; dryness of ears; pale, sickly aspect; bright, red lips; undefined redness on tip of tongue; bleeding from nose, teeth and gums; offensive smell from mouth; diarrhœa, < early in morning, unpainful or with tenesmus; great prostration after stool; offensive urine; catarrh and inflammation of lungs, especially during commencement of infiltration, recognizable by crepitation sound. θTyphoid fever.

▮ Yellow fever: melancholic; fearful; undecided; sad;

Digitized by Google

absentminded; dizziness; headache; face pale or yellowish; eyes red, or yellowish; itching and burning in eyes; noises in ears; tongue dry, red, or with white or brown coating; aphthæ in mouth; nausea with trembling and weakness; vomiting of sour, bilious, or bloody and black masses; pressure in stomach; pain in back and loins.

‖ Febrile attacks every morning about 9 or 10, generally ten to fifteen minutes later each day; tremendous shivering and chill lasting ten to fifteen minutes, shortened by rolling up in blankets; hot stage lasts two hours, followed by sweat; with heat, thirst, vertigo, and peculiar cough, he coughs twice, and twice only, a heavy straining cough, which strains pit of chest, and a light hacking cough, which seems to come from pit of chest; sweat lasts half an hour, is not free, depends upon amount of covering; thirst greater during heat than sweat; paroxysm ends about 4 o'clock, followed by complete prostration; bowels sometimes confined, sometimes diarrhœa, latter generally after breakfast; at times stools undigested. θChagres fever.

‖ **Attacks, Periodicity.** ‖ Complaints continually relapsing.

Alternate: pale and red cheeks; diarrhœa and constipation; asthma, or gout, and skin eruptions.

Periodical: neuralgia; stinging in back with asthma.

In paroxysms: pain in knee.

Climacteric period: hot flushes; goneness in stomach.

1 or 2 A.M.: cannot sleep; headache.

Every morning: pain over eyes.

9 A.M.: severe pain in forehead with heat, increasing until midday, disappearing at 4 P.M.; after rising headache begins; empty eructations; thin stool.

10 A.M., sometimes 6 A.M.: pain in head comes on, lasting an hour; pain at eyebrow and superciliary ridge, reaches its height about midday.

11 A.M.: regularly, child was faint.

About noon: pain comes on and lasts till evening.

Beginning afternoon: pain in face lasts three or four hours, returns late at night continuing till 1 A.M., comes again morning and disappears before afternoon.

From 2 to 5 P.M.: pain over l. eye gradually increasing and decreasing.

About 5 P.M.: pain in fifth pair of nerves, last three or four days.

5 or 6 P.M.: headache at acme, continues violent until 2 A.M., quits instantaneously.

5 to 9 P.M.: heat of face.

9 P.M.: pain in head commences, < till about 3 A.M.; also comes on at breakfast and lasts till 4 P.M.

Google

11 P.M. until 7 A.M.: pain in knees, ankles and elbows.
Every evening: biting of eyes and lachrymation.
10 P.M. to 1 A.M.: diarrhœa <.
From morning until night: desire for alcoholic drinks.
During day: weak, faint spells.
Every day: pain as if head would burst; severe tearing in frontal region; neuralgic headache comes on at noon and lasts until evening; at 11 A.M. exhausted feeling at epigastrium.
Every night: headache; at regular hours neuralgia of jaw and temple, lasting one and a half hours; violent diarrhœa; sweat.
Every ten to twenty minutes: awoke from soporous sleep with screams.
Every half hour: stools, in evening.
Several times during day: burning in throat.
In twenty-four hours: five or ten bloody stools.
Every two hours: paroxysms of heat.
Every twenty-four hours: intermittent neuralgia <, generally at 12 M. or 12 P.M.
Twenty-three fits in one night: epilepsy.
Twelve to twenty-four times a day: efforts to urinate.
Every second day: febrile attacks.
Every two or three days: paroxysms of headache.
Every third night: pain in side <; neuralgia of chest.
Three or four attacks a week: epilepsy.
Every seventh day: headache; head symptoms <; discharge from ears.
Every eight days: asthma.
Every three or four weeks: attacks of headache; fits of ague, for two years.
Every four to six weeks: vesicular eruption.
At intervals: three to six months, epileptic fits; from five days to six weeks, epileptic fits.
Lasting half an hour: remittent chills.
For seven hours: after stool, aching in coccyx and sacrum, with hemorrhoids.
For two days: pain in side of face, comes in evening, lasts all night, > toward morning.
For three days: chills, six times a day.
For several days: pain over lower jaw.
For seven days: nosebleed.
For twelve days: ophthalmia and diarrhœa.
Once a week: sick-headache.
Every two weeks: sick-headache.
For three weeks: prolapsus of rectum.
For six or eight weeks: total blindness.
A fortnight before menses: leucorrhœa.

Google

For four weeks: watery diarrhœa.
For seven weeks: dry cough at night; constant backache.
For two months: pricking pain across forehead.
For three months: pain in r. side of face and head; itching of face and scalp.
For four months: menses suppressed; cough, with salty expectoration.
For ten months: menses suppressed.
For a year: menses suppressed.
Eighteen months: diarrhœa.
A year and a half ago: mentagra.
For two years: severe headache; eruption on scalp; passes blood with stool; nocturnal enuresis; cough, following pleurisy; not able to wear boot on account of corns, and frostbite; ague fits every three or four weeks.
For three years: headache, symptoms < till midsummer, then >; dimness of vision; eczema.
For several years: eczema impetigenoides; a hard swelling in abdomen; hydrocele; constant backache.
For many years: attacks of conjunctivitis lasting three months; attacks of arthritic ophthalmia.
Of five years' standing: epilepsy.
Since seven years: eruption on head, keratitis pustulosa.
In nine years: five whitlows.
For ten years: has had otorrhœa from both ears.
Fifteen years' standing: inflammation of liver.
For ten years: gleet.
Eleven years ago: scarlatina, gradually losing hearing.
Every eighth year of her life in months of January or February: attacks of scrofulous ophthalmia.
Every Summer: eruption on hand.
Midsummer: neuralgia <.
In Autumn: remittent fever.
Midwinter: neuralgia <.
Winter: headache <; ulcer on leg >; remittent fever.

[42] **Locality and Direction.** Left: pain in side of occiput; pulsating in side of occiput; pain in inner point of eyebrow; lachrymation; headache begins on side; severe pains about eye, leave suddenly and appear about ovary; headache apt to commence in side; swelling and soreness of side of cervical spine; deafness; thick crust on head; tearing pain in side of forehead; neuralgia in head < side; blindness; dimness of vision; like knives in eye; sore pain in eye; shooting beneath lids; violent pain in eye; shooting in eye; eye agglutinated; sclerotic of eye; could not see anything by day; whole eye seems to have grown larger; deafness; something seems to have come before ear; itching in ear; upper lid

Skin very painful for a long time after rubbing, as if denuded and sore.
‖Spots feel hot after scratching.
‖‖Burning in skin of whole body.
‖Night's rest often disturbed by burning pains in skin of parts upon which he lies.
‖Burning in hands and feet, with weakness of whole body.
‖‖Formication over skin of whole body.
‖Stitchlike prickling in skin, in evening after getting warm in bed.
Sticking itching, especially when walking in open air.
‖‖Voluptuous itching; scratching relieves, after it burning; sometimes little vesicles.
‖‖After violent scratching aching, numbness of skin, swelling of skin, even ulceration.
‖Cracks and cuts (rhagades) in skin of hands, especially on joints, painfully sore.
‖Skin of hands hard and dry.
‖‖Nettlerash: with fever; on face, arms, neck and lower extremities; on back of hand.
‖‖Itching hives over whole body, hands and feet.
Itching pimples on inner side of thigh.
Tetter on nape of neck.
‖Itching vesicular eruption on back of hand.
‖‖Boils.
Eruption of furunculous pimples, with a red areola and very itching sensation, especially on face.
‖Ulcers about nails; nails crumble off.
‖Skin dry and flabby: cold, pale, dry.
‖Skin harsh and wrinkled; child looks like an old man.
‖Bright redness of whole body. θScarlatina.
‖Freckles; yellow, brown, flat spots; liver spots.
‖‖Skin rough, scaly, scabby.
‖Herpes, scabby and scurfy.
‖Sore feeling of skin, with disposition to excoriation.
‖‖Soreness in folds of skin.
‖Ecchymosis from a slight bruise; every little scratch has a tendency to fester.
‖Rhagades, < after washing.
‖Furuncles, particularly on nates.
‖Dropsical, burning swelling of external parts.
‖Ulcers: cancerous; crusty; pricking; pulsating, swollen, tearing, with tension; pus from them offensive; spongy, proud flesh; raised, swollen edges, bleeding easily, surrounded with pimples; tearing, stinging pains, discharging fetid pus.
Hangnails.

Google

Erysipelas with throbbing and stinging; migrating from place to place.

For several years, every four to six weeks, eruption of vesicles as large as peas on upper and lower limbs, appearing over night, filled with watery serum, soon becoming purulent, lasting six to seven days, then becoming scurfy, rapidly dry, and falling off; severe itching.

Comedones; black pores of skin, particularly in face.

Acne punctata.

Prurigo and intertrigo in children; sore, raw places.

Eczema of three years' standing; appeared on face and head in usual form, going through papulation, pustulation, incrustation, and in some parts of skin, desquamation; covered entire surface of body; it had become infiltrated and thickened, divided by an innumerable number of fissures running in all directions like so many rivulets made to carry off exudation; child had a vulgar, filthy look, was intensely irritable day and night; bleeding from some of fissures.

Eruption on face, neck and arms; yellow scabs thickly cover diseased surface, while fissures, especially on elbows, occasion soreness and bleeding; there is much itching.

Shortly after local treatment of a chancre, an eruption appeared on skin, and grew < until he was completely covered; itching so bad that he had to walk floor at night nude, could get no sleep until 3 or 4 A.M.; scrotum and lower limbs looked raw and red.

Disgusting crop of pustules on hands and wrists; also a few on face, like those of pocky itch; around eruption, epidermis is undermined as with shingles; a few pocks have dried and desquamated; much burning and itching about hands and wrists. θPsoric pustulation.

Soon after vaccination pustular eruption affecting scalp, ears, face, groins and legs; also otorrhœa.

Crops of scabs upon scalp, arms and legs ever since he was vaccinated; head covered with hard, elevated scabs, very much like rupia; scabs on arms and legs not so thick, because he scratched them off as fast as they formed on account of their being so very itchy.

Molluscum in a child; body and limbs covered with soft, round, smooth, apparently painless tumors with broad base; at first of color of skin, then assuming a bluish, and finally a purple or pinkish hue; found on puncture to contain a semi-fluid, sebaceous (atheromatous) matter; these tumors originated apparently in sebaceous follicles of skin, varied in size from a bean to a

Digitized by Google

filbert, and were in all stages of development, about eighty.

‖Scabious eruptions with burning itching, surrounded by a yellowish or brownish areola; secretion of a sanious, fetid or thick and yellow pus; spots covered with small vesicles discharging serous lymph.

‖Eruption and sores upon arms and chest, commencing as small vesicles filled with serum, mattering to pustules and afterward covered with thick, dirty-looking scabs, often close together, arms itch very much when he gets warm. θRupia syphilitica.

‖Hereditary syphilis in a girl, æt. 13, from infancy; eruption appearing on bend of elbow, and spreading over a large portion of arms and body.

‖Scabies: voluptuous tingling itching, with burning and soreness after scratching; < in warm bed; disposition to excoriation; glandular swellings.

‖Miliaria: inveterate cases, skin rough and scaly.

‖Varicose ulcers, bleed easily, secrete a fetid pus, and burn and itch much.

‖Indolent and ill-conditioned ulcers, devoid of granulations, and a healthy pus formation.

‖After suppression of measles: cough with muco-purulent expectoration; roaring in ears and deafness; hard swelling of muscular structures, in r. side, painful to touch.

‖Measles, during first stage when eruption makes a tardy progress, or after complaints such as chronic coughs, originating in remnants of partial pneumonia; chronic diarrhœa; hardness of hearing; chronic discharge from ears.

‖Constant delirium; face swollen and distorted, bright red; tongue dry, cracked bright red, here and there covered with brown mucus; angina, could hardly swallow water; nose stopped up; pulse rapid, small, hard, incompressible; bright-red eruption over whole body; skin dry; constipation. θScarlet fever.

‖Eruption bluish; skin cold; pulse scarcely perceptible; faint rattling in chest and slight twitching of body alone indicated that child was not dead. θScarlet fever.

‖A girl, æt. 5, chills, vomiting, violent headache, prostration, peevishness, flushed face, injected eyes; eruption in miliary form, patchy and evanescent; at times bright and full, then faded and partially disappeared; mind wandering, character of delirium being active rather than muttering; heat of skin great, skin dry, hard and somewhat roughened; throat moderately swollen, internally and externally, impeding somewhat speech and deglutition; *Bellad.* until evening of fourth day, rather

[1] **Mind.** Mental excitability.

Must do everything in a great hurry; nothing can be finished quickly enough.

Unwilling to answer; says yes or no with difficulty; pulse small and frequent.

Disheartened; inclined to weep.

Irritable, restless; fretful and peevish if his work is not done to suit.

‖ Extreme mental dejection; unfit for work, would sit and weep whole day long; constant pain at vertex; after a fall upon head.

[2] **Sensorium.** ‖ Vertigo, in room, going off in open air; must lie down, as soon as he raises himself dizziness returns.

[3] **Inner Head.** Sensation in forehead as if brain were loose and falling from side to side; < walking in open air; > sitting quiet in room.

Digitized by Google

‖Rush of blood to head, headache.
Painful shocks in forehead and temples, < in forenoon and evening.
Headache as if a plug were thrust quickly, by increasingly severe blows, into head.
Gradually increasing and suddenly ceasing headache.
‖Chronic headache in leuco-phlegmatic people, with relaxed muscles and general debility.

[4] **Outer Head.** Hair turns grey, falls out; eruption on scalp very sore; < in open air.
Cold sweat on forehead when eating, even warm food.
‖Pain of outer parts of head, as from subcutaneous ulceration, parts painful to touch.

[5] **Sight and Eyes.** Eyes fill with tears when reading.
Tension in lids in morning; difficult to open.
Sensation of a foreign body in r. outer canthus, in morning, when walking.
‖Feeling as of a lump in r. outer canthus; on closing eye seems to move to inner canthus, and to return on opening it.
Deep blue circle under r. eye.
‖Chronic inflammation of eyes; frequently useful in beginning (later *Sulph.*).

[6] **Hearing and Ears.** ‖Hardness of hearing; feeling as of a leaf lying before ear.
Buzzing in r. ear; neuralgia.

[7] **Smell and Nose.** ‖Nosebleed; oozing of dark, thin blood; evenings; < from smelling coffee; of old people; in cachectic persons.
‖Coryza: alternately dry and fluent; with loss of smell and taste, hunger, sore eyes and tension in forehead.

[8] **Upper Face.** ‖Face: deadly pale; feels swollen and as if white of egg had dried on it.
Dry, shrivelled spots in face. θHemorrhoids.
‖Crusta lactea, with stringy, yellow stools.
‖Gnawing pain commences at 9 P.M.; affects ramus of lower jaw, and temple of r. side, > by warmth and lying on affected side; comes on gradually and leaves suddenly.
‖Right-sided neuralgia, affecting face from temple to lower canine teeth, aching and jerking pain, with twitches and contortion of face, and deep blue circle under r. eye; chattering of teeth; dimness of sight; black appearance of objects; wavering of objects.
‖Buzzing in r. ear; frequent sensation as if skin of cheek and chin were pinched; pain came gradually and left suddenly; < in bed, and from excess of heat or cold.

Lower Face. Shooting, stinging pain in a red scar on lower jaw.

Google

Lips peel off.
Swelling and inflammation of submaxillary glands.
Pain in submaxillary gland, extends to tongue; tongue feels burnt.

[10] **Teeth and Gums.** ‖Toothache: < in evening in bed, and from cold; > from heat; dull, concentrating in r. eye-tooth, hurts when eating and on pressure; pain increases slowly, ceases suddenly when reaching highest point.
Dulness of teeth; teeth on edge.
Destruction of teeth. θDiabetes mellitus.

[11] **Taste and Tongue.** Loss of taste.
Talking difficult, as from want of elasticity of parts.
Tongue dry.
‖Ulcers on inflamed tongue. θGlossitis.

[12] **Inner Mouth.** Sensation of dryness in mouth.
Profuse flow of tasteless or sweetish saliva.
‖Breath very offensive.
Vesicles on inside of cheek.
‖Aphthous mouth and gums; painful yellowish or whitish ulcers. θStomatitis ulcerosa. θThrush.
‖Swollen, ulcerated and readily bleeding gums.
‖Aphthous ulceration of entire inner mouth surface; sour eructations and heartburn; longing for acids, especially fresh tart fruits; pallor of skin; trembling and weakness all over; sense of general soreness; capricious temper; restless or irritable.
‖Hemorrhage from mucous membrane of mouth and from gums on slightest motion of tongue, also when speaking, drinking, or blowing nose; purpura spots over body.
‖Cancrum oris, not so much sloughing, but rapid extension of ulceration; parts seem to be eaten away; ulcers irregular in shape, edges sharp cut and flat; much bleeding but not violent or long-continued.

[13] **Throat.** Throat sensitive.
Roughness and rawness in throat.
Lancinating pain in throat.
Stinging in chest and throat at same time.
Constricted feeling in throat.
Great difficulty in swallowing.
Throat swollen as if there were a lump in it.
Uvula and root of palate œdematous.
Mucous membrane of palate and pharynx swollen and injected; several ulcerations.
‖Thick yellow membrane on fauces, tonsils, teeth and lips, sticks like glue; impeded deglutition; voice thick; parotids swollen, hard; sopor; stench from mouth. θDiphtheria.

Digitized by Google

‖Diphtheria; ulceration of throat, with large exudations, thick, greyish or yellowish, sticky and tenacious; tonsils bright red; liquids run out of nose; speech and respiration difficult on account of accumulation of exudation in fauces; excessive salivation; fetor oris; pulse frequent, small, weak; apathy, somnolency; excessive paleness and weakness.

‖Swelling of mucous membrane of palate and pharynx, with white spots which cannot be removed; difficult swallowing; over entire cavity of mouth a thick, white coating; large, painful swelling of l. parotid; excessive paleness; weakness, languor; severe sopor.

‖On bright-red swollen tonsils a white coating, which changed after a few days to a thick greyish or yellowish-white substance, also on hard palate and inside of cheeks; when pressing tongue down a quantity of exudate was squeezed out of fauces; it feels like paste, and is so tenacious that it can scarcely be crushed between fingers; very difficult swallowing, all liquids run out of nose; no appetite; apathy, somnolency; child whines when being lifted; pulse frequent, small; excessive fetor oris. θDiphtheria.

‖On fourth day teeth, lips and inside of cheeks covered with a thick, yellow, membranous substance, which can be removed only with greatest difficulty, and is very sticky; tonsils cannot be seen; speech thick, indistinct; swallowing almost impossible; frequent loose cough; both parotids swollen and very hard; great apathy; sopor; very fetid breath; pulse frequent and weak; breathing difficult on account of accumulation of exudate. θDiphtheria.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Desire: for fresh fruit; for brandy.

‖Loss of appetite and great debility.

‖Chronic alcoholism; vomiting in morning; acidity of stomach; burning in œsophagus and stomach; sour, acrid or foul eructations.*

Aversion to smell of coffee.

[15] **Eating and Drinking.** ‖Water chills stomach if not mixed with alcoholic liquor.

‖Ailments from drinking brandy (symptoms are palliated by drinking wine).

After eating, pain in stomach and rising of food by mouthful.

After warm food: sweat.

---

* Successfully used in subduing craving for liquor by taking for two or four weeks, three times daily, from ten to fifteen drops of a mixture of one part of sulphuric acid with three parts of alcohol.

Digitized by Google

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough: violent; obstinate; causing great suffering and exhaustion.

Belching after cough: sour.

‖Chronic heartburn; acidity of stomach.

Nausea with chilliness.

‖Vomiting: of drunkards; of cachectic persons; sour, first water, then food.

Rising of mucus so sour that it sets teeth on edge.

[17] **Scrobiculum and Stomach.** ‖Coldness of stomach, with relaxed feeling; loss of appetite and great debility.

‖Cold water chills stomach and is rejected unless mixed with alcoholic liquor.

‖Acidity of stomach.

‖Gastralgia; pains contractive and violent or of a dull, heavy, aching character, with pyrosis and much flatulence.

‖For two years pains in pit of stomach, first with sickness and severe gastralgia; for months unable to walk about house from excessive weakness and painfulness of limbs and cramp; pains across stomach terrific, causing him to writhe in agony; too powerless to get in and out of bed without help; one attack confined him to house seven weeks, and from this he has never fully recovered; pain at lower part of chest, commences at l. and extends around hypochondria to r. side; comes on every now and then during day so that he can do only very light work, but is < at night; pain < about an hour before going to bed, wakens him before midnight, beginning about 11 and lasting till about 1 or 2 A.M.; commences very suddenly and with intense severity, and declines gradually; urine thick and high-colored, with red sediment; constipation; teeth loose and decayed, ascribes this to effects of strong medicines he has taken. θGastralgia, probably due to metallic poisoning.

‖Indigestion in a child from too frequent and too rapid feeding; stool of chopped-up yellow and green matter, held together by long strings of yellowish matter; irritable, feverish and exceedingly prostrated.

‖Dyspepsia; vomiting in morning; constant acidity of stomach; empty, sour, acrid, offensive belching; sour vomiting, particularly after eating.

‖Dyspepsia, with great debility, constriction of throat, raising of mucus so sour that it sets teeth on edge.

‖Increased secretion of gastric mucus, which rises into mouth and sets teeth on edge.

[18] **Hypochondria.** ‖Spleen enlarged: hard and painful; hurts when coughing; after intermittent fever.

Digitized by Google

‖Stitches in liver and spleen.

[19] **Abdomen.** Weak feeling in abdomen, as if menses would come on.

Laborlike pains in abdomen extending to hips and back.

‖Lead colic (antidote).

‖Pain like an instrument going through r. groin into abdomen.

Colic, with sensation as if a hernia would protrude.

‖Inguinal hernia.

‖Incarcerated hernia in old people, constriction coming on in a very gradual manner; pinching constricted feeling in hernia; sensation of fulness in abdomen; periodical nausea and constipation; hernia not very sensitive; incarcerated part not very hard or tense, but has a doughy feel; incarceration may last for days without symptoms growing severe; gradual accumulation of flatus, pinching in abdomen, periodical transient tearing pains, constant nausea, belching of sweet, salty or bitter fluid, finally vomiting; hernia on l. side; melancholic-phlegmatic temperament.

[20] **Stool and Rectum.** Stools: yellowish-white; diarrhœic, with passage of much flatus; saffron-yellow; bright yellow, mucous, looking stringy or chopped (cholera infantum); of hard, small, black lumps, mixed with blood, with violent pinching in anus; green, watery; black, undigested; watery and offensive, smelling like rotten eggs; soft, followed by a feeling of emptiness in abdomen; soft, pasty, with pressing in anus.

Aggravation: in children during dentition; after eating; ‖after oysters.

Before stool: pressing in anus.

During stool: burning in rectum.

After stool: empty, weary, exhausted feeling in abdomen; pressing in anus.

‖Diarrhœa with great debility and nervous prostration; a sensation of trembling all over body.

‖Diarrhœa of yellow, stringy mucus. θCrusta lactea.

‖Summer diarrhœa from eating bad or unripe fruit; commencing with nausea, sweat, violent colic, pinching and burning in abdomen.

‖Chronic diarrhœa: bowels moved frequently; during intervals free from pain in abdomen, nausea, etc.

‖Violent pricking in anus, she has to rise up on account of pain.

‖Varices feel damp and are painful to touch; itch violently; pain at stool, as if rectum were torn to pieces; stool like sheep's dung; piles in hard drinkers.

[21] **Urinary Organs.** Diabetes; lassitude; debility; despon-

Google

dency, dulness of mind and of sight, itching over whole body; flatulency; stitches in hepatic region; skin completely inactive, cold and dry; large quantities of sugar in urine; typhoid condition.

Diminished secretion of brown urine becoming turbid, like loam water, on standing.

Sediment like blood and a cuticle on urine.

Pain in bladder if call to urinate is postponed.

" **Male Sexual Organs.** ‖Orchitis, r. side.

" **Female Sexual Organs.** Menses too early and too profuse, preceded by distressing nightmare.

Oozing of dark, thin blood.

Prolapsus of vagina; parts look greenish and smell badly.

‖Leucorrhœa: acrid or burning; milky or transparent; of bloody mucus, with sensation as if menses would appear.

‖Climacteric age, with constant hot flushes, and a feeling of tremor all over body, with great debility, and as if everything must be done in a hurry; spitting of blood; constipation; symptoms are < by smelling (not drinking) coffee.

" **Pregnancy. Parturition. Lactation.** ‖Nausea and vomiting during pregnancy.

Sterility; menses too early and too profuse.

‖Never vomited food, but could not eat because it increased distress in stomach and vomiting of mucus.

" **Voice and Larynx. Trachea and Bronchia.** Hoarseness with dryness and roughness in throat and larynx.

Larynx painful; feels inelastic, causing difficulty in swallowing.

" **Respiration.** Shortness of breath.

Respiration: rapid with shooting in cervical muscles, and movement of wings of nose; very difficult, larynx moved up and down violently.

" **Cough.** Cough: dry, two short hacks, soreness between scapulæ, tiredness; from irritation in chest, with expectoration in morning of dark blood, or of a thin, yellow, blood-streaked mucus tasting sour; followed by belching (phthisis); in open air, < from walking, riding, cold water and odor of coffee; and hæmoptysis after typhus.

" **Inner Chest and Lungs.** Stitches: in chest; about heart; through upper part of l. chest to shoulder blade.

Sensation of great weakness in chest.

Burning in l. side of chest to throat.

Shooting stinging, now in scapula, again in armpit, or in chest.

Pressure on l. side of chest and in pit of stomach.

Google

Irritation in chest with cough and expectoration in morning of dark blood, or of thin, yellow, blood-streaked mucus, generally of a sourish taste.
‖Profuse hemorrhage from lungs. θTuberculosis.
‖Hæmoptysis; after pneumonia; in climacteric period.
Ulceration in different parts of lungs.
‖‖Abundant pleuritic exudation, patient could not sit up, heart displaced; legs had to hang, otherwise oppression of chest.
‖‖Phthisis; severe hemorrhages; ulcers in lungs broke and expectoration was exceedingly foul, exhausting sweats, great prostration.

Heart, Pulse and Circulation. Palpitation, without fear or anxiety.
Shooting through heart.
Pulse: small, feeble, accelerated; affected by alcoholic drinks.

Outer Chest. Sternum sore, as if beaten.

Neck and Back. ‖‖Pain in small of back.
Weakness in back, can scarcely stand alone.
Stiffness in back on rising in morning.
Blood-boils on back.
Large suppurating swelling on r. side of neck.

Upper Limbs. Stitches: in shoulder joints on lifting arms; in finger joints.
Tension in elbow joint.
‖Blue spots on arms; purpura.
Chilblains on hands.
Red swelling on back of hands, not painful.
After erysipelas, inflamed swelling of little finger.

Lower Limbs. ‖‖Inner surface of thighs red, sore, excoriated after riding.
Knees painfully weak.
Red itching spots on tibia.
Blood-red very painful scar on tibia.
Ankles weak, cannot walk.
Feet cold, swollen.
Distension of veins of feet.
Stitches in corns.

Rest. Position. Motion. Lying down: dizziness >; on affected side, gnawing in face >.
Sitting: could not, pleuritic exudation.
Legs have to hang: otherwise oppression of chest; pleuritic exudation.
Motion: of tongue causes bleeding of gums; coughing hurts spleen.
On rising: vertigo returns; stiffness in back.
On lifting arms: stitches in shoulder joints.

Digitized by Google

Walking: in open air, brain as if loose; cough <.
Riding: cough <; soreness of thighs.

[36] **Nerves.** ‖Great debility; sensation of tremor all over body, without trembling.
‖Great exhaustion and nervous prostration.
Restlessness; does everything hurriedly.

[37] **Sleep.** Falls asleep late and wakens too early.
During sleep twitches, especially of fingers.

[38] **Time.** Morning: tension in lids, difficult to open; as of a lump or foreign body in r. outer canthus; vomiting, in alcoholism, and dyspepsia; expectoration of dark blood; stiffness in back; sweat.
Forenoon: painful shocks in head <.
Evening: painful shocks in head; nosebleed; toothache <: heat <.
9 P.M.: facial neuralgia.
Night: gastralgic pain <, wakes him before midnight, lasts until 2 A.M.; sweat.

[39] **Temperature and Weather.** Open air: soreness in scalp <; cough.
Indoors: chilliness <.
Warmth: gnawing pain in face >.
Heat: toothache >.
Cold: toothache <.
Cold water: chills stomach; cough <.
Excess of heat or cold: < faceache.

[40] **Fever.** Frequently chilly during day; < indoors, > outdoors when exercising.
Frequent chills running down body.
Heat in evening and in bed.
‖Flushes of heat, with sweat. θClimaxis.
Sweat: excessive, mostly on upper body; from motion, continued after sitting down; sour; cold, immediately after eating warm food; mornings; at night, profuse, > by drinking wine; with great debility.
‖‖Pains across loins, much shaking of whole body, with shivering as from cold, coming in paroxysms; attacks begin with coldness and trembling, then comes general tremor; keeps about for two or three days, attacks come irregularly, sometimes in evening, sometimes in morning; tongue parched, appetite failing, urination painful, much ardor urinæ and tenesmus; after cold shivers cease gets warm and perspires; thirst throughout. θAgue.
‖Typhus putridus, with great disposition to hemorrhage from capillaries and rapid sinking of vital forces; oozing of dark, thin blood; face deadly pale; tendency to gangrene.
‖‖Black vomit. θYellow fever.

Digitized by Google

" **Attacks, Periodicity.** Attacks come on regularly: ague.
Commences suddenly, declines gradually: gastralgia.
Gradually increasing and suddenly ceasing: headache; gnawing pain in face; toothache.
Climacteric period: hot flushes; hæmoptysis.
For two years: gastralgia.
For seven weeks: attack of gastralgia.
Every Spring: pustular eruption after itch.

" **Locality and Direction.** Left: swelling of parotis; hernia; stitches from chest to shoulder blade; burning in chest; pressure on chest.
Right: outer canthus as of a lump or foreign body; blue circle under eye; buzzing in ear; neuralgia in ear; gnawing pain in temple and jaw; pain in eyetooth; pain in groin; suppurating swelling in neck.
Left to r.: pain around hypochondria.

" **Sensations.** As if brain were loose and falling from side to side; as if a plug were thrust quickly into head; as from subcutaneous ulceration in scalp; as of a foreign body in r. outer canthus; as of a lump in r. outer canthus; as of a leaf lying before ear; as if white of egg had dried on face; as if skin of cheek and chin were pinched; as of want of elasticity of vocal organs; as if there were a lump in throat; as if menses would come on; as of an instrument going through r. groin into abdomen; as if a hernia would protrude; as if rectum were torn to pieces during stool.
Pain: in submaxillary glands; in stomach after eating; in pit of stomach; in spleen; in small of back; in scar on tibia; across loins.
Terrific pain: across stomach.
Painful shocks: in forehead and temples.
Lancinating: in throat.
Jerking pain: from temple to lower teeth.
Tearing pain: in abdomen; in knees, joints of feet, arms, etc.
Laborlike pains: in abdomen, hips and back.
Stitches: in liver; in spleen; in chest; about heart; through upper l. chest to shoulder blade; in shoulder joints; in finger joints; in corns.
Shooting stinging: in scar on lower jaws; in scapula; armpit and chest.
Shooting: in cervical muscles; through heart.
Stinging: in chest and throat.
Pricking: in anus.
Gnawing pain: in ramus of lower jaw and temple; in ulcers.
Burning: in œsophagus and stomach; in rectum; in abdomen; in l. chest to throat.

Google

Burnt feeling: on tongue.
Pinching: in abdomen; in anus.
Contractive pain: in stomach.
Constriction: in throat; in hernia.
Dull, heavy pain: in stomach.
Aching pain: from temple to lower teeth; in stomach.
Soreness: general; between scapulæ; of sternum, as if beaten; of skin.
Rawness: in throat.
Pressure: on l. chest; in pit of stomach; painful, in different parts, increases slowly, suddenly disappears.
Stiffness: in back.
Tension: in lids; in forehead; in elbow joints.
Roughness: in throat.
Tingling: of skin.
Weakness: in abdomen; in chest; in back; of knees; of ankles.
Trembling sensation: all over body.
Emptiness: in abdomen.
Fulness: in abdomen.
Dulness: of teeth.
Coldness: and relaxed feeling in stomach.
Itching: in varices; over whole body; spots on tibia; of eruptions.
Dryness: in mouth.

"**Tissues.** ‖Purpura hæmorrhagica.
Scars become blood-red or blue, and painful.
Painful sensitiveness of glands.
Veins (of feet) distended; venous plethora.
‖‖Weak and exhausted from deep-seated dyscrasia.
‖‖Hemorrhages of black blood from all outlets of body.
Marasmus in nervous, restless, weakly children; they do everything hurriedly but without vim; child smells sour despite most careful washing.
‖In injuries from being bruised or cut, especially when ecchymosed.
‖Pressing pains in different parts, increasing slowly and suddenly disappearing.

"**Touch. Passive Motion. Injuries.** ‖Bad effects from mechanical injuries, when there are bruises, chafing, lividity of skin.
Scratching seldom relieves itching, but changes its locality.
Touch: scalp painful.
Pressure: pain in eyetooth <.

"**Skin.** ‖Distressing itching and tingling of skin with eruptions; urticaria; pemphigus; pruritus vulvæ.
Scars turn blood-red and hurt.
‖‖Blue spots like ecchymosis, or as from suggillation; purpura hæmorrhagica.

Digitized by Google

Red itching blotches on skin.
Yellow skin, livid spots.
‖Gangrenous tendency after bruises; particularly in old people.
Soreness of skin; chafed when walking or riding; gangrenous ulceration.
Painful sensitiveness of glands.
Gnawing pain in ulcers.
‖Itchiness of skin; single pustules appear every Spring, after imperfectly cured itch.
Secondary syphilis, aphthæ, maculæ, etc.
‖Hemorrhages from all outlets of body. θPurpura.
‖Boils, bruises, bedsores, contusions, injuries by falling, knocking, etc., chilblains.
Erythema nodosum.
‖Appearance of small, red spots about ankles, thence spreading rapidly over whole body, becoming grouped, coalescing, forming suggillations as large as palm of hand, at first bright-red, then bluish, violet-colored, finally greenish-yellow; mucous membrane of nose and mouth affected; hemorrhages from these parts.
‖Man syphilitic, taken large quantities of Mercury, and had been salivated; during war ball entered r. eye, destroying it, and remained embedded in brain; tearing pains in knees, joints of feet, arms and nearly all joints; purpura hæmorrhagica; gums bleed and fall off in pieces; at inside of cheeks cancrum oris, with disgustingly foul odor; whole face swelled and general anasarca; urine showed seven-eighths albumen.

[47] **Stages of Life, Constitution.** Frequently indicated for old people, particularly women.
Child sour despite careful washing.
Light-haired people.
In climacteric years, flushes of heat.
When some deep-seated dyscrasia prevails, the child weak and exhausted, with no other symptoms.
Child, æt. 2; diphtheria.
Child, æt. 3; diphtheria.
Girl, æt. 9, delicate, slender, anæmic; purpura.
Girl, æt. 9; morbus maculosis.
Young man, æt. 17; pleuritic exudation and palpitation of heart.
Lady, æt. 25; facial neuralgia.
Woman, æt. 30; pleuritic exudation.
French woman, æt. 35; toothache.
Man, æt. 36, during rheumatic attack; purpura.
Woman, æt. 36, always had a very irritable stomach; during fourth pregnancy, vomiting.

Google

Man, æt. 46, apparently strong and healthy, suffering two years; gastralgia.

Man, æt. 49, gardener, fine hearty looking, three years ago fell thirty feet and struck top of head, after which he was unconscious five weeks, since then suffering; mental dejection.

[48] **Relations.** Antidoted by: *Pulsat.*
It antidotes: lead poisoning.
Compatible: after *Arnic.*
Complementary: *Pulsat.*

SUMBUL.

Musk Root. *Umbelliferæ.*

The plant, a perennial, is a native of the Orient; the root enters commerce by way of Russia; from it, finely powdered, is prepared the alcoholic tincture.

Provings by Lembke, A. H. Z., vol. 34, p. 273; Cattell, Brit. Jour. Hom., vol. 9, p. 256, 1852; Muranjew, Med. Zeit. Russ., 1853; Hirschel's Arch., vol. 1, p. 241; Altschul, Brit. Jour. of Hom., vol. 11, p. 678, 1853.

Clinical Authorities.—*Diarrhœa*, Altschul, Rück. Kl. Erf., vol. 5, p. 435; *Ascarides*, Cattell, B. J. H., vol. 9, p. 289; *Chorea*, Cattell, B. J. H., vol. 9, p. 289; *Porrigo*, Cattell, B. J. H., vol. 9, p. 290.

[1] **Mind.** ‖Intellect dull in morning; inability to study; clearer in evening and in warmth.
Happy disposition with continued smiling; expression idiotic; fear of becoming insane. *0*Chorea.
‖Hysterical mood, even in men; alternate laughter and tears; easily excited; emotional; irritable; fidgety, at first spirits are exalted, then depressed.

[2] **Sensorium.** Vertigo on stooping, using warm water, moving about or rising from a seat, feeling a want of security.
Hysteria, with tendency to faint from slightest cause.
Fits, with falling forward.

[3] **Inner Head.** Cold in head, < in morning.

[4] **Outer Head.** ‖Porrigo in infants, l. side of scalp; spots round and dry, slightly raised, and reddened at edges, with branlike scales in centre.

[7] **Smell and Nose.** Stuffing in nose.
Tenacious yellow mucus in nose; < in l. nostril.

[8] **Upper Face.** Acne punctata, black pores on face.

[11] **Taste and Tongue.** Brown coating on tongue in morning.
Tongue feels rough as if scraped, with heat in throat.

Google

[18] **Throat.** Erosion, burning heat and rawness in throat, with tenacious mucus.

Catarrhs of children, with great nervous irritation, sleeplessness and spasms.

[19] **Abdomen.** Tensive pain and gnawing in r. hypogastrium.

Abdomen full, distended, painful.

[20] **Stool and Rectum.** ‖Ascarides, with bloated, drumlike abdomen and constipation; picking at nostrils.

‖Chronic diarrhœa due to torpid, inert condition of intestinal canal; discharges cause atony; diarrhœa in typhoid fever.

[21] **Urinary Organs.** Urine clear, yellowish-red, cloud on bottom, and an oily pellicle on surface.

Constant desire to urinate.

Much urinary difficulty.

[22] **Male Sexual Organs.** Absence of erections and all sexual desire.

[23] **Female Sexual Organs.** ‖Corkscrew pains in l. region of uterus and its appendages.

Tensive pain like a string pulling in r. breast.

Tightness, tensive stretched feeling across chest between l. breast and sternum and in l. breast, < on inspiration.

White leucorrhœa, < after sitting.

Menses too early.

Flushings at climacteric period.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness.

[26] **Respiration.** ‖Asthma, catarrhal, but more especially spasmodic, hysterical.

[27] **Cough.** Hacking cough.

[28] **Heart, Pulse and Circulation.** Pulse very irregular, compressible; want of elasticity in vessels.

‖Nervous affections of heart; rheumatic carditis; heart's impulse strong, jerking, especially after exertion or during digestion; action of heart full and sharp, strokes at times irregular; beating rapidly eight or ten times, then slowly; bellows sound of heart, with violent and irregular palpitations and flushes of heat in floods from back; sharp pains, like a knife, in chest; oppression in l. chest, clogged sensation; < on stooping; l. arm numb, heavy and weary, with sharp, wiry shooting in fingers; hysterical mood.

‖Nervous palpitation in hysterical subjects, or at change of life.

Heart beats softly, as if in water, with sinking of heart, and sickliness and faintness all over.

Palpitation at least exertion, < by paying attention to it.

Posteriorly over l. scapular region, an indistinct mixed murmur and purring sound, associated with rheumatism; not heard anteriorly.

Digitized by Google

[31] **Neck and Back.** Cannot keep warm; least draft is felt down spine.

[35] **Rest. Position. Motion.** Stooping: vertigo; heart symptoms <.
Sitting: leucorrhœa < after.
Motion: vertigo; palpitation.
Rising: vertigo.

[36] **Nerves.** Chorea: constant jerking of head and limbs, with protrusion of tongue; voracious appetite.
‖ Dropsy dependent on impaired nervous vitality.
‖ Hysteria and hysterical spasms.
‖ Epilepsy, she falls suddenly forward, foaming at mouth; unconsciousness.
‖ Tendency to faint from slightest cause.

[38] **Time.** Morning: intellect dull; cold in head <; brown coating on tongue.
Evening: intellect clearer.

[39] **Temperature and Weather.** Least draft is felt down spine.
Warmth: intellect clearer.

[40] **Fever.** Dry, transient heat all over body.
Coldness of body, pulse 66.
‖ Typhoid fever with cerebral excitement; low and nervous fevers succeeding to typhus.
Numbness and coldness of tips of fingers.

[41] **Attacks, Periodicity.** Irregular action of heart, beats rapidly eight or ten times, then slowly.
Climacteric period: flushes; nervous palpitation.

[42] **Locality and Direction.** Left: porrigo on scalp; yellow mucus in nostril; corkscrew pains in uterus; oppression in chest; arm numb; shooting in fingers; murmur over scapular region.
Right: tensive pain and gnawing in hypogastrium; tensive pain in breast; miliary spots on shoulder blade and hip.

[43] **Sensations.** As if scraped, tongue; like a string pulling in r. breast; clogged sensation in l. chest; as if heart were beating in water.
Knifelike pains in chest.
Corkscrew pains in region of uterus and appendages.
Sharp wiry shooting: in fingers.
Burning heat: in throat.
Gnawing: in r. hypogastrium.
Rawness: in throat.
Tensive pain: in r. hypogastrium; in r. breast.
Tightness: across chest; in l. breast.
Numbness: in l. arm; of tips of fingers.
Heaviness: in l. arm.

[44] **Tissues.** Deranges action of inhibitory nerves, while at

Digitized by Google

same time it causes a paresis of cardiac branches of vagi.

Vertigo, faintness; dreams and mental conditions show deficient innervation.

Anomalous functional disorders of heart, occurring in persons possessing a peculiarly sensitive nervous system, especially in hysterical subjects.

Weakened heart.

[46] **Skin.** Acne punctata, black pores on face.

Porrigo in infants on l. side of scalp; spots round and dry, slightly raised and reddened at edges, with bran-like scales in centre.

Skin cold, white, shrunken and dry as if washed in acrid water.

Miliary spots on back, r. shoulder blade and hip.

Reddish spots on forehead, chin and cheeks, containing either water, or thick, white, curdy matter.

Itching in skin.

[47] **Stages of Life, Constitution.** Child, æt. 2; ascarides.

Girl, æt. 10, bilious-sanguine temperament; chorea.

[48] **Relations.** Compare: *Asafœt.* and *Moschus* in low fevers, hysteria, etc.

SYMPHYTUM.

Comfrey; Healing Herb. *Borraginaceæ.*

A native of Europe, where it grows on banks of streams and in meadows; also found in United States.

The tincture is prepared from the fresh root.

Introduced by Jeanes.

Fragmentary proving by Macfarlan.

CLINICAL AUTHORITIES.—*Injury to eye*, Gross, Rück. Kl. Erf., vol. 1, p. 317; *Inflammation of inferior maxillary bone*, Cate, B. J. H., vol. 34, p. 378; *Pain in knee*, Funk, Rück. Kl. Erf., vol. 5, p. 928; *Fracture of bones*, Gilchrist, Med. Inv., vol. 9, p. 79; *Non-union of fracture*, Hendrichs, A. H. Z., vol. 107, p. 71.

[3] **Inner Head.** Headache in occiput, in top of head, in forehead, changing places.

[4] **Sight and Eyes.** Pain in eyes after a knock or contusion of an obtuse body.

Digitized by Google

‖After being struck upon eye with a cane by a child, no visible injury, but a sensation on closing eye as if upper lid passed over an elevation on bulb of eye; on waking eye could not be easily opened, seemed spasmodically closed.

[8] **Hearing and Ears.** Cannot hear well; feels as if ears were stopped up.

Inflamed ears.

[9] **Lower Face.** ‖Inflammation of inferior maxillary bone; hard, red swelling.

[17] **Scrobiculum and Stomach.** Pains across epigastrium from one side to other, < opposite spleen, in walking; when sitting < about navel; griping pain.

[21] **Female Sexual Organs.** Menses stopped; headache, weight in forehead when she stoops; has it almost all time; a good deal of fever every other hour; cold all day, cramp and diarrhœa; nose sore inside alæ, wants to pick it; wants to rub her eyes; inflamed ears; feels as if something were in them, stopped up, cannot hear well.

[31] **Neck and Back.** ‖Psoas abscess.

[33] **Lower Limbs.** ‖More than a year ago fell and struck knee upon a stone; wound healed and left scarcely any trace, but there remained an acute stitching pain in place, felt when clothing touched part, or when knee was bent.

‖Man suffering with a spontaneous luxation of thigh since childhood, fell and received a fracture of affected thigh; after two months fragments were quite movable, and as union was despaired of, an apparatus was made which allowed him to sit on a chair during day; *Symphytum* 4, four globules every six hours, brought about complete union in twenty days.

[35] **Rest. Position. Motion.** Sitting: pain about navel.

Stooping: weight in forehead.

Walking: pain opposite spleen.

[41] **Attacks, Periodicity.** Every other hour: fever.

All day: cold.

[43] **Sensations.** As if upper lid passed over an elevation on closing eye; as if ears were stopped up.

Peculiar pain: in periosteum, after wounds have healed.

Pain: in eyes after a knock or contusion; across epigastrium.

Stitching pain: in healed wound on knee.

Griping pain: about navel.

Weight: in forehead when stooping.

[47] **Tissues.** Bruises, sprains; sore breasts.

‖Inflammation of bones; diseased spinous processes.

‖Psoas abscess.

Digitized by Google

Facilitates union of fractured bones and lessens peculiar pricking pain; favors production of callous.

[45] **Touch. Passive Motion. Injuries.** Touch of clothing: acute pain in injured knee, after wound healed.

Wants to rest eyes.

Mechanical injuries, bad effects from blows, bruises, thrusts on eye.

Non-union of fracture, particularly when trouble is of nervous origin.

Injury to bones; for example, when a blow on eyes injures orbital plates of frontal bone.

Irritable stump after amputation.

Peculiar pain in periosteum after wounds have healed.

Irritability of bone at point of fracture.

Gunshot wounds.

[47] **Stages of Life, Constitution.** Girl, æt. 7, psoas abscess.

Miss P., æt. 48; inflammation of inferior maxillary bone.

[48] **Relations.** Compare: *Arnic.* in blows; *Fluor. ac.*, *Hepar*, *Calc. phos.* and *Silica* in injuries to bones.

SYPHILINUM. (Luesinum.)

Syphilitic Virus. *A Nosode.*

Provings by Swan, Med. Adv., 1880, vol. 21, pp. 123–142.

Authorities quoted by Swan, Boardman, Wildes, Ballard, Eggert, Morgan, Ostrom, Bradshaw, Skinner, Theobald, Morrison, Clausen, Berridge, Burritt, Nichols, Jackson, Foster, Nash, Schmidt, Boyce, Hawley, Morrow, Haynes, Carr, Allen, H. C., Kent, etc.

The collection of cures and observations, by Thomas Wildes, Kingston, Jamaica published in the Homœopathic Physician, 1891, is incorporated.

The *n* signifies nosodes or symptoms from cases of disease.

Clinical Authorities.—*Chronic syphilitic headache affecting mind*, Wildes, Hom. Phys., vol. 11, p. 272; *Rheumatic ophthalmia*, Berridge, Org., vol. 2, p. 461; *Inflammation of cornea*, Norton, Ophth. Therap., p. 180; *Ozæna syphilitica*, Wildes, Hom. Phys., vol. 11, p. 274; *Ptosis*, Wildes, Hom. Phys., vol. 11, p. 269; *Cancer of r. maxilla* (relieved nightly pain), W. L. Reed, MSS., per Kent; *Facial paralysis*, Wildes, Hom. eruption, Wildes, Hom. Phys., vol. 11; *Blood-boil, Lepra-syphilis from vaccination*, Wildes, Hom. Phys., vol. 11; *Osteo-sarcoma in labia*, Wildes, Hom. Phys., vol. 11; *Syphilitic destruction of hard and soft palates*, Wildes, Hom. Phys., vol. 11, p. 274; *Syphilis*, Skinner, Med. Inv., vol. 4, p. 568; *Syphilitic neuralgia* (worse at night), W. L. Reed, MSS., per Kent; *Syphilitic prurigo and herpes*, Wildes, Hom. Phys., vol. 11.

[1] **Mind.** Loss of memory. *n.*

Loses remembrance of passing occurrences, names, dates, etc., while all occurrences previous to inception of disease are remembered as distinctly as ever. *n.*

Great difficulty, and sometimes impossibility of concentrating thoughts on particular subjects; yet at same time can recollect consecutive events and details which occurred twenty-five or thirty years previously, in order of occurrence, almost without effort. *n.*

Cannot remember names of persons, books or places.

Difficulty in making arithmetical calculations.

Very nervous, weeping without cause.

‖Cross, irritable, peevish. *θ*Periodical neuralgia in head.

‖Very despondent, does not think will ever get better. *θ*Syphilitic sore mouth.

‖Terrible dread of night, not on account of cough so much as on account of mental and physical exhaustion when she awakes; it is intolerable, death is preferable; she fears to prepare for night and is positively in abject fear of suffering, in form of exhaustion, on waking; it is < by cough, but it is quite independent of cough as she wakes in this awful state; always < as night approaches; leaves her about daylight, which she prays for. *θ*Spring cough.

Feeling as if going insane, or about to be paralyzed.

A far-away feeling, with apathy and indifference to future.

[2] **Sensorium.** Vertigo on looking up, seems to be caused by heat.

[3] **Inner Head.** ‖Headache: linear, from or near one eye backward; lateral; frontal; from temple to temple; deep into brain from vertex; as from pressure on vertex; in either temple, extending into or from eye, > by warmth; in bones of head; < by heat of sun; after sunstroke.

Sick-headache, pains intolerable, arteries of head full and pulsating violently; high fever, frequent retching on trying to vomit; menses regular, but very scanty.

‖Lancinating pain in occiput, invariably < at night. *n.*

Headache and great debility.

‖Neuralgic cephalalgia causing sleeplessness or delirium

Google

at night, always commencing about 4 P.M.; < at from 10 to 11, and ceasing at daylight.

Great loss of hair. *n.*

‖Nervous chills preceded by aching pains in head, especially in occiput and integuments thereof, head feeling heavy, sore, congested; also frontal headache about one-half or two-thirds inch wide across forehead under eyebrows; aching pains below waist, in pelvis and extremities, especially in tibia, which is sensitive to touch; pains commence about 4 P.M., culminate about midnight in delirium, and cease entirely at daylight,

Bursting sensation in vertex as from severe cold.

Pain from eyes through to occiput, with sensation of weight in occiput drawing head back, or as if it were pulled back; eyes ache and smart.

‖Constant linear headache, commencing at both angles of forehead and extending in parallel lines backward—a precursor of epileptic attack.

Heavy, crushing, cutting pain across base of cerebellum.

Heavy, clouded, dull feeling in base of brain.

‖Syphilitic cephalalgia in occiput, intolerable, extending to nervous ganglia of neck, causing hardening of cords; attacks at irregular intervals, especially after excitement. *θ*Secondary syphilis.

‖Headache through temples, thence vertically, like an inverted letter T.

‖Coronal headache. *θ*Secondary syphilis.

‖Headaches accompanied by great restlessness, sleeplessness and general nervous erethism.

‖Syphilitic headache for many months, piercing, pressing, excruciating over r. eye, extending deep into brain; losing continuity of thought and memory; makes repeated mistakes in figures.

Outer Head. Suffusion and full feeling in face, throat and head, with innumerable small enlarged cervical glands.

Sore, one and a half inches in diameter, on occipital bone, covered with a thick, yellow-white scab.

‖Dirty eruption on scalp.

Sight and Eyes. ‖Red papulous eruption around l. inner canthus, with isolated pimples on side of nose, cheek and eyebrow; these pimples were red, with depressed centre, circumscribed areola, became confluent where they were most dense; pimples bleed when scabs come off; agglutination of lids.

Myopia. *n.*

Sensation of heat with a little pain in outer half of l. lids.

Sharp pulsating pain, occasionally at outer end of superior border of r. orbit, apparently in periosteum.

Google

▮Upper lids swollen.
▮During sleep lids adhere. θInfantile syphilis.
▮Ptosis: paralytica; eyes look sleepy from lowering of upper lid.
Diplopia, one image seen lower than other.
Strabismus paralytica, eye turning inward, and pupil can only be turned outward as far as median line.
▮Paralysis of superior oblique.
▮Chronic recurrent phlyctenular inflammation of cornea; successive crops of phlyctenules and abrasion of epithelial layer of cornea; intense photophobia; profuse lachrymation; redness and pain well marked; delicate scrofulous children, especially if any trace of hereditary syphilis remains.
Interstitial keratitis.
▮Chronic congested spots on eye, more often on temporal side, usually about one to three lines behind cornea, of a dark-red color, apparently embedded in sclera. θSyphilis.
Photophobia, black spots, shreds or veils before sight.
Itching of l. inner canthus.
▮▮Left eyeball covered with funguslike growth, pain intense, < at night.
▮▮Eyes red and inflamed.
▮Acute ophthalmia neonatorum. *n.*
▮▮Eyes swollen and closed with syphilitic ophthalmia, pus running out of them. θInfantile syphilis.
▮▮Redness and swelling of outer half of both lower tarsal edges.
▮▮Acute l. conjunctivitis, with considerable pain in eyeball, photophobia and lachrymation, followed by iritis; nocturnal aching in eyeball, pain extremely violent from 2 to 5 A.M.; sight impaired. θAfter syphilis three or four years ago.
▮▮Syphilitic iritis, intense pain steadily increasing night after night; < between 2 and 5 A.M., coming almost to the minute and ceasing same way. θSecondary syphilis.
Iritis with photophobia, congestion of conjunctiva and sclerotica, with puffiness of conjunctival mucous membrane; chemosis, pupil immovable, diminution of sight; supraorbital pain.
▮▮Pain in r. inner canthus as if blood went there and could go no further, also in r. temple. θRheumatic iritis.
▮▮At 1 P.M. scalding lachrymation of r. eye with shooting therein, followed by shooting from around eye into eye; eye red and closed; this lasted about an hour, then decreased, ceasing about 3 P.M.; recurred for two succes-

Digitized by Google

sive days and again four days afterward in a slighter degree, but at same hour. θRheumatic iritis.

| | On turning eye to l. feels momentary coldness in inner half of r. eye. θRheumatic iritis.

| | On waking, gum in r. canthus. θRheumatic iritis.

| | On walking across room, r. eye sensitive to air, aches on using it. θRheumatic iritis.

| | Both eyes glued in morning; conjunctiva injected; photophobia, constantly wears a shade. θOzæna.

| | Eyes dull. θInfantile syphilis.

| | Ophthalmic pains, < at night, > by cold water.

| | Right eye alone affected, congestion of conjunctiva and sclerotica, with some chemosis; lids inflamed, especially at outer canthus; sensation of sand in eyes; lids agglutinated in morning; great photophobia. θHereditary syphilis.

| | Left eye closed, upper lid swollen as large as half an English walnut; deep red, not much pain, with oozing of purulent matter from between lids.

| | Neuralgia every night, beginning about 8 or 9 P.M., gradually increasing in severity until it reached its height about 3 or 4 A.M., and after continuing thus for two or three hours gradually decreased and finally ceased about 10 A.M.; attacks gradually get more severe and last longer; first feels cold all over, almost a shiver; then soreness as if beaten in r. half of head, extending a little beyond middle line on vertex; in about thirty minutes scalding lachrymation from r. eye, with shooting backward increasing to a boring backward therein; eye is very red and closes, with photophobia; gnawing pains extend down r. side of face and whole of nose; head is worst when eye is bad; during paroxysm r. eye feels as if lids were open wide, and cold air blowing on exposed eye; she perceives a horizontal band across pupil of r. eye hindering sight; this came on soon after paroxysms commenced; eye > by placing handkerchief on head and letting it hang over eyes, also by gentle pressure, though she cannot bear much pressure; it is more painful when lying on r. (affected) side when also r. side of head feels sore; r. eye red, and red vessels run all over it, converging toward iris; r. pupil horizontally oval; r. iris looks dull and there is a slight brown hue around pupil; l. eye normal; attacks seem to have originated from sitting at a window in a cold draft, r. eye being next window. θRheumatic ophthalmia.

⁶ **Hearing and Ears.** | | Intense earache in r. ear, incisive pains thrusting into ear; purulent, watery discharge from ear with pain.

Google

| | Gathering in l. ear which discharges a great quantity of pus. θHereditary syphilis in a child.
| | Deafness gradually increasing until she could scarcely hear at all.
| | Complete deafness; nothing abnormal to be seen.
▮ Catarrhal or nerve deafness with marked cachexia.
| | Calcareous deposit on tympanum.
| | Small, acrid, watery discharge occasionally from ears, no deafness. θOzæna.

[7] **Smell and Nose.** Left side of nose, inside ala, itching.

Nose stuffed up and burning.

▮ Attacks of fluent coryza.

| | Offensive, thick yellow-green nasal discharge; during sleep dry scabs form in both nostrils; following an application of salve for sore eyes; l. submaxillary gland, which had been swollen and indurated, softens, discharges and, after forty-five days, begins to heal slowly.
| | Ozæna syphilitica; *Syph.* brought out an eruption of sores with a fiery-red base on nose and over frontal sinuses.
| | Left side of nose inside and out very sore, likewise lips and chin; sores itching and scabbing over. θHereditary syphilis.

▮ Itching in nostrils.

[8] **Upper Face.** Face drawn to one side, difficulty of speaking, masticating, blowing. *n.*

| | Spasmodic twitching of many muscles, especially in face (paralysis agitans), with great melancholy and depression of spirits.
| | Facial paralysis r. side, thick speech, hemicrania, jactitation of r. eye and lid.

An old gentleman has had, for some years, cancer on r. malar bone; no rest, his agonies excruciating in extreme (relieved).

| | Face pale. θCurvature and caries of cervical spine.

▮ Itching, scabby, eczematous eruptions singly or in clusters, looking like herpes.

| | Nose and cheeks covered with eruptions and scabs; scabs in layers rising to a point.

▮ Dark purple lines between alæ nasi and cheeks.

| | A boy, æt. 20 months, fretful, peevish, cross and crying, tossing in his sleep, grinding his teeth, face dotted with papules filled with a watery yellowish matter, most on edges of lids; teeth irregular, arms and legs emaciated, very tottery on his feet, very nervous.

[9] **Lower Face.** | | Lips and teeth covered with bloody mucus. θInfantile syphilis.

Sores on lips and chin, especially l. side scabbing over.

[10] **Teeth and Gums.** Single small lunæ cleft in upper inci-

Digitized by Google

sors, permanent set, which incisors are dwarfed in their general dimensions, and converge at their tips; inherited syphilis. *n.*

First central upper incisors serrated, permanent teeth point toward each other, inner side concave, edges serrated. *n.*

Children's teeth are cupped.

Teeth decaying at edge of gum and breaking off. *n.*

Pain in r. upper jaw, as if from teeth, with swelling of face.

Painless fluttering occasionally in teeth, very peculiar, as of something alive, cannot detect which tooth it is.

‖Felt like a worm in tooth, could not tell which tooth.

Singular feeling as if teeth had all got out of place, and on closing jaws teeth do not come well together.

Occasional aching in l. upper teeth.

[11] **Taste and Tongue.** Tongue red and thick; two deep cracks running lengthwise in it; one on each side of median line.

‖Aphasia; facial paralysis l. side; ptosis and sudden paralysis of l. optic nerve, causing many weeks of blindness; partial paralysis of tongue, which also protruded, crooked; sluggish heaviness of speech, complete hemiplegia for first thirty-six hours, afterward partial for several weeks.

‖Aphasia, difficulty of finding words; debility.

[12] **Inner Mouth.** ‖Fetid breath. θSecondary syphilis.

‖Tongue coated; white, edges indented by teeth.

Tongue turns to one side when protruded; difficulty in mastication, cannot turn food with tongue so readily from r. to l., as in other direction. *n.*

‖Putrid taste in mouth before epileptic fit.

‖Tongue very red and thick; covered with herpetic eruption, two deep cracks running lengthwise on each side of median line, making it difficult to swallow. θSecondary syphilis.

Tongue thickly coated, dirty, edges indented or serrated by teeth. *n.*

‖Twenty ulcers in mouth, every part of which was involved, on top and under side of tongue, on lips, in buccal cavity, fauces and in nose; two large ones, one on each side near apex of tongue, very much swollen, one on r. side had a gangrenous centre, rest lardaceous bottoms with bright, fiery-red edges, and were cut down as with a knife, felt hard like an indurated chancre; septum of nose threatened, both alæ nasi very painful, smarting with burning as if on fire; pains and burning prevented sleep; hungry but could eat nothing but fluids as mastication was impossible; tongue heavily

Google

coated white, large quantities of stringy viscid saliva running from mouth, of a sweetish taste; a putrid sickening odor filled whole house; all symptoms < toward night. θSecondary syphilis.

‖Herpetic eruption in mouth, tonsils, hard palate and fauces, completely covering inside of mouth and throat, making it very difficult to swallow even liquids. θSecondary syphilis.

‖Syphilitic destruction of hard and soft palates.

[13] **Throat.** ‖Chronic hypertrophy of tonsils. θHereditary syphilis.

‖Chancrous ulcer extending across velum palati to l. pillar of pharynx. θSecondary syphilis.

‖Acute pharyngitis. θSecondary syphilis.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Appetite indifferent and capricious. θPsoas abscess.

‖Total loss of appetite for months, little or nothing satisfies him; formerly was generally ravenous. θCaries of dorsal vertebræ.

‖Loss of appetite. θRheumatism.

Thirst.

‖Tendency to heavy drinking; alcoholism.

‖Aversion to meat.

‖Dyspepsia; flatulence, belching of wind; nervous dyspepsia.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea.

‖Heartburn with pain and rawness from stomach to throat pit, often with cough.

‖Vomiting for weeks or months due to erosion from superficial ulceration of lining of viscus, herpetic, of syphilitic origin.

[9] **Abdomen.** Pain or distress deep in abdomen as if in omentum.

Feeling of heat internally in hypogastric region.

Pains in r. groin followed by swelling of glands.

‖Large painless bubo in r. groin opened and discharged freely. θSecondary syphilis.

Slight lancinating pains in one groin, < at night.

‖Inguinal bubo.

[20] **Stool and Rectum.** ‖Bowels torpid for five weeks. θPeriodical neuralgia in head.

‖Obstinate constipation for many years; rectum seemed tied up with strictures; when injections were given agony of passage was like child-bearing.

‖Chronic constipation, with fetid breath, earthy complexion, gaunt appearance.

‖Stools very dark and offensive. θInfantile syphilis.

‖Stools too light-colored. θRheumatism.

Google

‖Bilious diarrhœa at seashore, painless, driving her out of bed about 5 A.M.; stools during day, later causing excoriation; face red, suffers from heat; occasional painless, whitish diarrhœa when at home, always > by going to mountains.

‖Obstinate cases of cholera infantum.

‖Lower portion of rectum hanging out like a ruffle, looking like a full-blown rose fully three inches in diameter, and sensitive; constant weak dragging sensation in rectum, extending as far as sacrum.

‖Fissures in anus and rectum.

‖Two indurated ulcers at mouth of anus somewhat sore; slight itching of moist anus. θPrimary syphilis.

[31] **Urinary Organs.** Itching in orifice of urethra.

πA sensation, in morning on going to urinate, as if male urethra were stuffed up, or clogged, about an inch from orifice.

Scalding urine.

‖Urination difficult and very slow; no pain, but a want of power, so that he has to strain. θSecondary syphilis.

‖Urine infrequent, not oftener than once in twenty-four hours, scanty, of a golden-yellow color.

‖Profuse urination after chill; passed during night nearly a chamberful.

‖Rich lemon-yellow scanty urine.

‖Frequent urging to urinate all night, at least from 5 to 7 P.M. until 5. A.M.

[32] **Male Sexual Organs.** ‖Chancre on prepuce.

‖Buboes.

Burning in chancre size of a split pea, on prepuce above corona glandis; edges red and raised, bottom covered with lardaceous deposit; glans purple, on l. side covered by an exudation.

‖Chancre on penis, third in two years, all on same spot. θSecondary syphilis.

Aching of genitals, could not sit still for over a month.

‖After suppressed chancre, disease attacked testes and scrotum, which became painful and swollen; this was supposed to be cured, but ever since, every few weeks, if exposed at all to damp weather, would be seized with pains as if in kidneys, seemingly traversing ureters, but instead of passing into bladder followed spermatic cord, down groins and into testes; pain agonizing, chiefly in cord, in present attack in r.; pricking in chancre.

‖Constant pain in anterior part of r. thigh, < while standing, painful all night, preventing sleep; bubo in l. inguinal region size of a pigeon's egg, purple, fluctuating; night sweats.

Google

‖Chancroid, phagedenic, spreading rapidly; buboes commencing in each groin.

‖Inflammation and induration of spermatic cord.

[25] **Female Sexual Organs.** ‖Uterus and all surrounding parts loose, soft and flabby; profuse, thick, yellow leucorrhœa; constant pain across small of back.

Slight whitish leucorrhœa.

‖Yellow offensive leucorrhœa, watery or not, so profuse it daily soaks through napkins and runs to heels of stockings if much on her feet.

‖Profuse yellow leucorrhœa, < at night; in sickly, nervous children. θInherited syphilis.

‖Soreness of genitals, and muco-purulent discharge, in a child.

‖Acrid discharge causing violent itching and inflammation of external organs, < at night from warmth of bed, parts very tender; itching and inflammation > during menses.

‖Nocturnal aggravation of r. ovarian pain, preventing sleep.

‖Sore on r. labium majora, extending to left. θSecondary syphilis.

Intense itching of vulva on rising in morning, continuing until 10 o'clock.

Menstruation painful, two weeks too soon; pink-red, bright, profuse, running free for some days; napkins wash easily.

‖Painful menstruation.

Sensitiveness of os uteri, increasing to intolerable pain at menses, or on introduction of fingers or penis; frequently causes abortion. *n.*

Sharp zigzag shooting pains in region of uterus.

‖Ovaries congested and inflamed; tendency to ovarian tumors.

Sore aching in l. ovarian region, extending to r. with darting pains.

Left ovary swollen, during coitus, at moment of orgasm, a sharp cutting pain like a knife, and twice there was smarting as of a sore; ovary swelled so much that its size and shape could easily be felt through abdominal walls (caused by Buboin).

‖Uterine and ovarian diseases with pronounced nervous disorders, especially in married women.

Mammæ sensitive to touch, feeling sore; during menses, and at other times.

[26] **Voice and Larynx. Trachea and Bronchia.** Hoarse, almost complete aphonia, day before menses.

‖Diseased cartilages of larynx. θTertiary syphilis.

[28] **Respiration.** ‖Chronic asthma; in Summer, especially

Google

when weather was warm and damp; most frequently in evening, passing off at daybreak; soreness of chest, with great anguish and inability to retain a recumbent position; in Winter, severe bronchial cough succeeded asthmatic attacks; a regular type of chills and fever developed; suffered from this many years before.

Oppression of chest to such an extent as almost to arrest breathing; asthma caused by sensation as if sternum were being gradually drawn toward dorsal vertebræ; expansion of chest difficult; confusion of mind, as if unconsciousness might follow.

Lack of sleep produces a sudden faintness and sinking sensation in chest; three spells succeeded each other during a single night.

‖Attacks of spasmodic bronchial asthma for twenty-five years; they come on only at night after lying down or during a thunderstorm, producing most intense nervous insomnia, entirely preventing sleep for days and nights.

‖Violent attacks of dyspnœa, wheezing and rattling of mucus, from 1 to 4 A.M.

[27] **Cough.** ‖Hard cough, < at night, when it is continuous, preventing sleep.

Hard, constant cough, with thick, yellow, tasteless expectoration.

‖Dry, racking cough, with thick, purulent expectoration, caused by a sensation of rasping or scraping in throat, always < at night. θSecondary syphilis.

‖Whooping cough, with terrible vomiting.

‖Dry, sharp, hacking cough without expectoration, but with rawness, scraping and burning from fauces to stomach pit; with a whoop in inspiration and a choking sensation from fauces to bifurcation of bronchia, great mental distress.

‖Cannot lie on r. side, as it causes a dry cough.

Cough and dyspnœa come on after midday dinner, has to fight for breath, feels as if she would be suffocated; symptoms last all night, > at daybreak (improved).

Expectoration of white phlegm.

‖Muco-purulent expectoration, greyish, greenish, greenish-yellow, tasteless.

‖Expectoration without cough, quite clear white, feels like a round ball and rushes into mouth. θNervous asthma.

[28] **Inner Chest and Lungs.** Pain and oppression at bifurcation of bronchia and in larynx, it hurts her to breathe.

‖Rattling in chest and throat. θInfantile syphilis.

Pain in centre of chest as if skin were drawn up, on drawing head back.

Sensation of pressure under upper part of sternum.

‖Pain and pressure behind sternum.

‖Angina; ptosis l. eye; facial paralysis l. side, slight aphasia; impotence (relieved).

[29] **Heart, Pulse and Circulation.** Lancinating pains in heart, at night, from base to apex (*Medorrhinum* has reverse).

Valvular disease of heart.

[30] **Outer Chest.** ‖Eczematous herpetic eruptions.

[31] **Neck and Back.** ‖Heavy aching and stiffness from base of neck up through muscles and cords into brain.

‖Great pain in back in region of kidneys, < after urinating. θSecondary syphilis.

Pain in coccyx at its junction with sacrum, sometimes in lower sacral vertebræ; < on sitting, with a sensation as if swollen, though it is not.

Pains commencing in sacral regions internally, and apparently coming around to uterus.

‖Caries of cervical spine with very great curvature in same region, directly forward, occiput sinking down to a level with it and resting on protuberance of curvature; often nearly a teaspoonful of calcareous matter would be discharged at a time, and on evaporating it a quantity of dry powder, looking like phosphate of lime, would be left; pain in curvature always < at night (no proof of syphilis).

Rigidity of muscles.

A heavy, dragging, dull feeling in lumbar region, with stiffness and want of elasticity.

‖Caries of dorsal vertebræ with acute curvature, numerous cloacæ communicating with diseased bone, one much larger than rest, exuding a sanious, offensive pus, and surrounded with proud flesh; great thickening and induration of surrounding parts from effusion of lymph; percussion or pressure not endurable; two abscesses in groins, l. having been opened a year before, r. about a month ago; least motion gave him great pain by day, and terrific pain by night; for five months, every night most intense neuralgic pains, commencing generally from 5 to 7 P.M. and never terminating till about daylight or about 5 A.M.; pains in muscles of loins, generally in l., sharp, cutting spasms, terrible to bear, preventing sleep and forcing him to cry out; < by least motion, and slightly > by warm poultices.

‖Psoas abscess first l. then r., latter discharged more than a quart of offensive greeinsh pus when opened; severe nocturnal pains, affecting upper sacral, lower dorsal and l. cervico-facial regions, steadily increasing; they occurred twice, each time twenty-one days after either psoas abscess had been opened.

Google

‖Enlargement of cervical glands and a number of pedunculated pin-head warts on neck; cured by Syco-syphilinum. θHereditary syphilis; girl æt. 10.

Enlargement of glands in different parts of body, particularly abundant about neck; indurated and slightly painful, causing a sensation of uncomfortable fulness and suffusion in face, throat and head. *n.*

‖Nocturnal aggravation of pains in back, hips and thighs.

‖Enormous swelling of glands of head and neck. θHodgkin's disease.

[32] **Upper Limbs.** ‖Rheumatism of shoulder joint or at insertion of deltoid, < from raising arm laterally.

Can only raise arms to a right angle with axilla; trying to force them higher causes muscles to suddenly become paralyzed and they drop pendant. *n.*

Lameness and pain of arm on motion, particularly on raising arm up in front as if reaching; pain located about insertion of deltoid in upper third of humerus, not painful to pressure.

‖Fingers and thumbs have runarounds. θInfantile syphilis.

‖Hands badly ulcerated on backs. θSecondary syphilis.

‖Right second finger swollen and stiffened. θSecondary syphilis.

[33] **Lower Limbs.** Swelling of legs from knees down, soles painful when standing on them; swelling goes down in morning, comes back at night.

Pains in lower extremities, excruciating, completely banish sleep; < from hot fomentations; > pouring cold water on them. *n.*

Cannot sit in a low chair, or squat down, owing to loss of control over knee and hip joints. *n.*

Pains in long bones of lower extremities, also in joints. *n.*

Dull pain over backs of feet to toes, began soon after getting into bed, lasting until 4 or 5 A.M.

‖For two or three winters intense cold pain in both legs, < in l., came on every night on lying down, lasting all night; > by getting up and walking, and in warm weather.

Pain in three toes of r. foot as if disjointed.

‖Slight contraction of tendons beneath r. knee. θPsoas abscess.

‖Tearing pains in hip and thighs, < at night, > about daybreak, > by walking, not affected by weather (improved).

‖Sharp rheumatic pain, burning like fire, in l. side of r. instep and below inner malleolus, prevents her from moving foot, > when toe is pointed inward; < in evening, continuing during night, waking her up suddenly

every two or three hours, worst from 1.30 to 3.30 A.M., > toward daybreak (improved).

‖Redness and rawness with terrible itching between toes. θSecondary syphilis.

‖Bone pains in knees and feet. θSecondary syphilis.

‖Bubo with pain in spot on middle of r. thigh in front, only when standing and on deep pressure, which seemed to touch spot, which was apparently on periosteum.

‖Two ulcers larger than a crown piece, dirty, stinking, sloughing, with jagged, elevated edges, one on thigh above patella, another on head of tibia; two large pieces of bone came away from head of tibia. θSecondary syphilis.

‖Osteosarcoma in centre of r. tibia the size of half an ostrich egg, pains agonizing at night, growth irregular, spongy, partly laminated, very hard. θSecondary syphilis.

‖Severe attacks of aching in lower limbs. θSecondary syphilis.

‖Contracted painful feeling in soles of feet, as if tendons were too short.

Limbs in General. Aching pains in limbs like growing pains.

Gradual rigidity of all joints after eruption; flexors seem contracted.

‖Rheumatic swelling of l. wrist and big toe, bluish-red, with pains as if somebody sawed at his bones with a dull saw; > by heat of stove; < from sundown to sunrise; no appetite; has lasted two weeks. θRheumatism.

Feeling of numbness in palms and soles, at times a prickly sensation as if numb parts were punctured by a great number of needles.

‖Excruciating arthritis; swelling, heat and redness intense.

‖Rheumatism, muscles are caked in hard knots or lumps.

Rest. Position. Motion. No position suits him. θSyphilitic neuralgia.

Standing: pain in thigh; soles painful; pain in thigh <.

Sitting: pain in coccyx <; or squatting, can not on account of loss of control over knee and hip joints; on stool > pain in head.

Recumbent position: impossible with asthma.

Lying: on r. side causes cough; sore throat <.

Motion: pain in groins <; raising arm pain in deltoid <; pain in instep <; slow, > tearing pain through body.

On drawing back head: pain in chest as if skin were drawn up; pain in neck >.

Pointing toe inward: pain in instep >.

Walking: pain in hip and thighs >.

Digitized by Google

[36] **Nerves.** Utter prostration and debility in morning.
‖Epilepsy.
Epileptic convulsions after menses.
‖Body, extremities and face covered with syphilides; a sticking soreness begins in throat every evening between 6 and 7 o'clock and continues to grow < during night; exceedingly restless until 4 A.M.; then a restless sleep for a few hours; can scarcely swallow; when swallowing a sensation as of throat tearing to pieces; continual throbbing in throat, < from cold and hot drinks, and < lying down; throbbing in temples and ears, boring in ears meeting in centre of brain; sensation as if top of head were coming off; drawing pain in eyes < from lamplight; teeth pain when eating, also when taking anything hot or cold, feel as if they were loose, > pressing teeth together and pressing throat with hands; excessive flow of saliva, it runs out of mouth when sleeping; severe pain in neck; bending back head, > pain in neck; aching pain in shoulders and knees; rending tearing pains throughout body, > moving about slowly; had his wife hide his revolver lest in a fit of desperation he might kill himself, as was his desire during extreme paroxysms of pain; strikes wall with fist and beats head against wall for relief; stools hard, dry like sheep dung; desire for stool three or four times a day, but only a little scentless wind passes which gives relief; sitting on stool > pain in head; is easily offended, gets desperate, cannot bear to be alone, great anxiety about getting well; at night no position suits him, walks floor or goes into street and moves about slowly; sleepy all time but cannot sleep; dreams about his disease; > in open air; frequent urination with sudden desire; discharges large quantities of muddy urine. θSyphilitic neuralgia.

[37] **Sleep.** Great restlessness at night, impossiblity to keep long in one position. *n.*
‖Absolute sleeplessness (vies with *Sulphur* in producing quiet, refreshing sleep).
Wakes soon after midnight and cannot sleep again until 6 A.M.

[38] **Time.** After midnight: weary, tired pains.
1.30 to 3.30 A.M.: pain in instep <.
Midnight until 6 A.M.: cannot sleep.
Morning: lids agglutinated; urethra as if clogged; until 10 itching of vulva; prostration.
1 to 4 A.M.: attacks of dyspnœa.
5 A.M.: diarrhœa drives her out of bed.
11 to 1 P.M.: fever.

Google

After midday dinner: cough and dyspnœa.
2 P.M.: pains begin, reach acme 9 P.M., continue until daybreak.
1 to 3 P.M.: rheumatic iritis <.
4 P.M.: headache begins.
2 to 5 A.M.: aching in eyeball <.
6 to 7 P.M.: sticking soreness in throat begins.
8 or 9 P.M.: neuralgia begins
Night: headache <; lancinating in occiput <; delirium; neuralgic cephalalgia <; pain in fungous growth of eyeball <; ophthalmic pains <; pains in groin; profuse urination; frequent urging to urinate; pain in thigh <; acrid leucorrhœa <; ovarian pain <; asthma <; cough <; cardiac pain; pain in spinal curvature <; pain in back, hips and thighs <; swelling of legs; pains in feet <; pain in tibia; restlessness; rheumatic pains <; biting sensation.

[39] **Temperature and Weather.** Warmth: > headache; of bed, syphilitic eruption <.
Heat of sun: < headache.
Heat of stove: > pain in swollen wrist and big toe.
Hot or cold things: toothache <.
Hot fomentations: pains in legs <.
Cold draft: rheumatic ophthalmia.
Cold water: ophthalmic pains; pains in lower extremities <.
Damp weather: pains across kidneys into spermatic cord and testes; pains in muscles.
Warm and damp weather: asthma <.
At seashore: bilious diarrhœa.
Air: eye sensitive to; syphilitic neuralgia.
In mountains: bilious diarrhœa >.
During thunderstorm: bronchial asthma <.

[40] **Fever.** ||Great pain in head, whole body extremely cold, looked blue; wanted to be covered with blankets, yet could not get warm, no appetite; sleeping almost all time, could scarcely be aroused. θSecondary syphilis.
||Nervous chills preceded by aching pains in head, especially occiput and in scalp over that part of head; pains below waist, in pelvis, in legs, especially in tibia, which is sensitive to touch; head feels heavy and sore, as if congested; bowels torpid for five weeks; cross, irritable, peevish; pains commence every day about 4 P.M., culminating at midnight with delirium, and disappear at daylight.
After retiring, nervous chill commencing in anus and running down legs with spasmodic sensation; followed by distress in bowels and immediate desire for stool;

Digitized by Google

passed a little urine when chill and desire for stool ceased; afterward profuse urination, eructations > chill.

Dry, hot fever shortly after going to bed, with dry, parched lips and great thirst; during fever intensely hot, wants to throw off covering, puts feet out of bed and against wall to cool them; high fever in middle of day, heat being intense, with sensation as if burning up; thirst for large quantities often, sensation of burning internal heat very marked; fever preceded by slight chill and followed by sweat and great debility.

Fever from 11 to 1 P.M. daily; perspires when she begins to get over fever; pain in back, < between shoulders, no ambition or desire to move.

Profuse night sweats, sleepless and restless.

Excessive general debility and continued night sweats, latter being most marked between scapulæ and down to waist. *n.*

Attacks, Periodicity. Gradually increasing: nightly neuralgia; deafness.

Gradually increase and decrease: pains in muscles.

Three or four times a day: desire for stool.

Three spells in one night: faintness and sinking in chest.

Every night: neuralgia, 8 or 9 P.M.

For days and nights: nervous insomnia with asthma.

Lasting a week or two: rheumatic neuralgic pains in muscles.

Two weeks: rheumatic swelling of wrist and big toe.

For five weeks: bowels torpid.

For many weeks: blindness.

For months: total loss of appetite.

For many months: syphilitic headache.

For many years: constipation.

For twenty-five years: bronchial asthma.

Spring: cough.

Summer: chronic asthma.

Winter: bronchial cough succeeding asthma in Summer; cold pain in legs.

Locality and Direction. Left: eruption about inner canthus; heat and pain in outer half of lids; itching of inner canthus; fungous growth on eyeball; conjunctivitis, eye closed; gathering in ear; itching in nostril; abscess in submaxillary gland; nose sore inside and out; sores on lips and chin; aching in upper teeth; facial paralysis; ptosis and paralysis of optic nerve; chancrous ulcer from velum palati to pillar of pharynx; exudation on glans penis; bubo; swollen ovary painful during coitus; swelling of wrist and big toe.

Right: headache over eye; pulsating pain at outer end of

superior border of orbit; pain in inner canthus; gum in canthus on waking; eye sensitive to air; conjunctiva and sclerotica congested; perceives a horizontal band across pupils; iris looks dull; head as if beaten; scalding lachrymation; gnawing in face and nose; eye feels as if lids were open and air blowing on it; earache; facial paralysis; jactitation of eye and lid; pain in cancer on malar bone; pain in upper jaw; pain and swelling in groin; painless bubo opens and discharges; pain in anterior thigh; second finger swollen and stiff; pain in toes as if disjointed; contraction of tendons beneath knee; pain in instep.

From l. to r.: pain in ovaries; psoas abscess.

From r. to l.: cannot turn food readily with tongue; sore on labia majora,

On turning eye to l.: coldness in under half of r. eye.

Linear pain: from or near eye backward.

Sensations. A seething feeling as of hot water or hot oil running through all veins of the body, all night long; as if going insane or about to be paralyzed; a far-away feeling, with apathy; as if head were pulled back by weight; as if blood went to r. inner canthus and temple and could get no farther; as of sand in eyes; as if r. eye were open wide and cold air blowing on it; fluttering as of something alive in teeth; as of a worm in tooth; as if teeth had gotten out of place; distress as if in omentum; as if rectum were tied up with strictures; as if urethra were stuffed up or clogged; as if sternum were being drawn toward dorsal vertebræ; as if she would suffocate with cough; as if skin were drawn up in centre of chest on drawing head back; coccyx as if swollen; as if toes of r. foot were disjointed; like growing pains in limbs; as if bones were sawed; palms and soles as if punctured by needles; as of throat tearing to pieces; as if top of head were coming off; as if teeth were loose; as of a nervous chill commencing in anus and running down legs; as if bitten by bugs.

Pain: in eyeball; in r. upper jaw; deep in abdomen; in r. groin; across small of back; in larynx and bifurcation of bronchia; in region of kidneys; in sacrum; in coccyx; in long bones of legs; in joints; in periosteum and bones.

Excruciating pain: over r. eye; in cancer on r. malar bone; in spermatic cord; in lower extremities; in joints, with arthritis.

Lancinating: in occiput; in groin; in heart.

Cutting: across base of cerebellum; in l. ovary during coitus; in muscles of loins.

Bursting: in vertex.
Tearing: in hip and thighs; throughout body.
Gnawing: in r. side of face and in nose.
Crushing: across base of cerebellum.
Piercing: over r. eye.
Shooting: in r. eye; from around eye into eye; in region of uterus.
Incisive thrusting pain: in r. ear.
Boring: in r. eye; in ears.
Sticking soreness: in throat.
Pricking: in chancre; in palms and soles.
Darting: in ovarian region.
Neuralgic pains: in r. side of head, face and eye.
Rheumatic pain: in shoulder joint and insertion of deltoid; in r. instep and below inner malleolus.
Burning: in nose; in ulcers in mouth; in chancre; from fauces to stomach pit; in r. instep and below inner malleolus.
Aching: in pelvis and extremities; in tibia; in eyes; in eyeball; in teeth; in genitals; from base of neck to brain; in lower limbs; in shoulders and knees.
Sore aching: in ovarian region.
Soreness: in head; as if beaten in r. half of head; in nose; in mamma; of chest; in soles.
Smarting: in eyes; in ulcers in mouth.
Biting: in skin in different parts of body.
Rawness: from fauces to stomach pit.
Choking: from fauces to bifurcation of bronchia.
Scraping: from fauces to stomach pit.
Dragging: in rectum; in lumbar region.
Drawing pain: in eyes.
Pulsating pain: at outer end of superior border of r. orbit.
Throbbing: in temple and ears; in throat.
Pressing: over r. eye; under sternum.
Dull pain: over backs of feet to toes.
Tired pain: in limbs.
Cold pain: in legs.
Contraction: in soles of feet.
Stiffness: in lumbar region.
Numbness: in palms and soles.
Full feeling: in face, throat and head.
Heaviness: in head; in base of brain; in lumbar region.
Weight: in occiput.
Sinking sensation: in chest.
Heat: in outer half of l. eyelids; in hypogastric region.
Coldness: in inner half of r. eye.
Itching; in l. inner canthus; inside of nostrils; of anus; in orifice of urethra; of female genitals; between toes.

Google

"**Tissues.** Shifting pains of a rheumatic character obliging a repeated change of position and posture. *n.*

‖Pains commence at 2 P.M., gradually increase until they reach their acme at 9 P.M., continuing exceedingly acute until 3 or 4 A.M.; subsiding with daybreak.

Pain more particularly < in, or confined to, muscles and joints of lower limbs, for four or five weeks, then they seemed to go to periosteum and bone itself, becoming deeper and more profound *n.*

Pains produce two sensations, an external one which seems to lie in muscles and joints and an internal one which is deeper and much more unbearable, so much so that it seems by its profound nature to control external ones and to cause them to disappear, afterward reappearing intensified in external sensation. *n.*

‖Pains in limbs every night after midnight, weary, tired pains, making rest impossible, could lie nowhere without suffering in part on which he rested; < in lower limbs; much perspiration which partly relieved. *θ*Rheumatic fever.

‖Rheumatic neuralgic pains in all muscles, even in cremaster, not in joints; darting pains in irregular attacks, sometimes lasting a week or two; pains gradually increase and decrease; < in damp and especially in frosty weather; < at 4 or 5 P.M., attain their height at 2 or 3 A.M., ceasing about 8 A.M. (improved).

‖Rheumatism with sweating of hands, wrists and legs below knees and feet, with great soreness of soles, < at night.

‖Extreme emaciation. *θ*Psoas abscess. *θ*Infantile syphilis. *θ*Caries and curvature of cervical vertebræ.

‖Though 17, looked 12, was so reduced and dwarfed; great attenuation of soft parts throughout, spare and hollow; confined to couch for about three years and for one year scarcely off his back; after disappearance of pustular eruption a gradual rigidity of all joints ensues and all flexors seem to become contracted and shortened; this causes inability to close fingers on a fork, knife or spoon, and a partial inability to lift foot in order to step up stairs, except with great difficulty, by using a cane and only a step up or down at a time.

Peculiar disagreeable odor from body.

Adenitis, leaving almond-shaped kernels of varying sizes abundant about neck.

"**Touch. Passive Motion. Injuries.** Touch: tibia sensitive; os uteri sensitive.

Pressure: pain in spot on middle of r. thigh in front <; of teeth together > pain; throat better.

Digitized by Google

Sunstroke: headache.

"**Skin.** Pustular eruption on different parts of body; in patches on certain places, particularly on wrists and shins, where bones are nearest cuticle, and isolated other large pustules on other parts, these break, discharging an ichorous fluid for one or two days, then heal, leaving characteristic pockmark cicatrice; patches take longer to heal, discharging same fluid till healing process commences.

After healing of chancre a fresh pustular eruption appears on different parts of body, which, when pustules have discharged an ichorous liquid and healed up, leaves fresh, coppery pockmarks; *Medorrhinum* removed it permanently causing it to turn yellow-brown, dry at edges and scale off, leaving skin permanently clear and free.

Biting sensation in different parts of body, as if bitten by bugs, at night only.

Syphilitic rash, very prominent on forehead, chin, arms and front of thorax, an abundance of fine scales peeling off; large prominent spot on centre of forehead, filled with fluid, as also are some smaller patches. θSecondary syphilis.

Syphilitic bullæ discharging freely on cheeks, under chin, on back of shoulders, on scalp and other parts of body. θInfantile syphilis.

Maculæ over back, chest, abdomen, arms and legs, but not on any uncovered part of body. θSecondary syphilis.

Several elevated spots on arm, stomach, leg and finger; has them habitually on face, chiefly on l. cheek.

A blood-boil on arm; face broken out with a lumpy fiery rash.

Eruption over whole body not elevated, but could be distinctly felt by passing hand over skin; after *Syphilinum* 1m eruption came rapidly to surface; at same time a disagreeable odor began to be developed; eruption reddish-brown like smallpox pustules, without central depression; body covered with it, except scrotum and penis; increased, completely covering inside of mouth and throat, making it difficult to swallow even liquids; eyes also covered, making him completely blind; intolerable smell from body; tips of pimples became filled with pus; < from warmth of bed; fetid breath; eruption developed still more, a great quantity of pus, with intolerable itching, yet could not scratch as it was extremely sore; eruption left skin of entire body covered with dull, reddish, copper-colored spots, which in cold looked blue. θSecondary syphilis.

Digitized by Google

‖Copper-colored maculæ from crown of head to sole of foot. θSecondary syphilis.

‖Pemphigus looks like a pock, often confluent, and persistently reappears.

Skin is bluish.

[47] **Stages of Life, Constitution.** A boy, æt. 20 months; papular eruption.

A boy, æt. 4½; syphilitic prurigo and herpes.

A boy, æt. 10; destruction of tissue in hard and soft palates.

Girl, æt. 10; enlarged cervical glands, and warts in neck (Syco-syphilinum); hereditary syphilis.

Though 17, looked 12, emaciated; syphilitic eruption; affection of joints.

A young lady, blood-boil on arm, lepra-syphilis after vaccination.

A woman, æt. 29, delicate from a child; ozæna syphilitica.

A woman, æt. 40; facial paralysis.

Man, æt. 48, robust, weight 250 lbs., height 5 feet 9 inches; rheumatism.

A man, syphilitic; osteosarcoma on tibia.

A bookkeeper, chronic syphilitis; headache.

A man; aphasia with hemiplegia.

Mrs. —, suffering from diabetes mellitus, subject to rheumatism in rainy weather; rheumatic ophthalmia.

Mr. Y., nocturnal syphilitic neuralgia.

A man, æt. 60; syphilitic destruction of hard and soft palates.

A man, æt. 76; aphasia and debility.

[48] **Relations.** Compare: *Aurum*, *Mercur.*, *Kali jod.* and other anti-syphilitics.

M., vol. 7, p. 510.

[1] **Mind.** Forgetful; slow perception.

Difficulty in concentrating his mind for any length of time on one subject.

Idiotic; epileptic idiocy.

Cheerful, merry, loquacious; sings all day; talks nonsense.

Becomes quite stupid, loses his senses; præcordial anguish, with faintness.

Melancholy; anxiety > from weeping.

Sudden anxiety, with angina pectoris; also with oppression of chest, driving him from place to place.

Excessive depression of mind, with indigestion and palpitation; intermittent pulse; great despondency.

[2] **Sensorium.** Vertigo: excessive heaviness in head; with qualmishness in stomach; deathlike paleness of face and sensation as if he could not support himself, increasing to loss of consciousness; > in open air and by vomiting; cannot rise up; face deathly pale; vertigo < on rising and looking upward, brought on by immoderate smoking of cigars.

Apoplexy and paralysis.

[3] **Inner Head.** Headache: with vertigo; < indoors; > in open air.

Digitized by Google

‖Sick-headache coming on early in morning, intolerable by noon; deathly nausea, violent vomiting greatly < by noise and light.

‖When walking, indoors or outdoors, suddenly, as if struck by a hammer or club on r. side of head, throws him to left. θAgue.

‖Periodical sick-headache, lasting one or two days and generally brought on by fatigue or excitement; intense, agonizing pain as if head would burst, and again as if brain were being bored out; sought continually to hide her head in pillow, or to change it to a position that might relieve; faintness, nausea and vomiting of food, and painful retching to vomit small quantities of mucus and bile; skin pale and cold with clammy sweat; breathing oppressed and labored; face sunken and anxious.

[5] **Sight and Eyes.** Dimsightedness, sees as through a veil, evenings.

Heat and burning in eyes.

Contraction of lids.

Retinal images retained.

‖Strabismus, dependent upon brain troubles.

Amblyopia, vision twenty-one hundredths, refraction normal, divergence of one and a half lines behind a screen, diplopia in distance; dimness and confusion of sight, as if black dots filled visual field; < after stimulants.

‖Asthenopia; strabismus; white atrophy of retina with amaurosis.

[6] **Hearing and Ears.** Nervous deafness.

Sensation as if ears were closed.

Ears burning hot and red.

[7] **Smell and Nose.** Smell feeble.

[8] **Upper Face.** ‖Emaciation, deathlike pallor of face. θCholera infantum.

‖Face: blue, pinched; sunken; deathly; pale; pale and collapsed, covered with cold sweat; pale, with drawn features and deeply-sunken eyes, surrounded by blue rings.

Glowing heat in face, with redness, frequently only on one side.

Violent tearing in bones of face and teeth, in evening.

[10] **Teeth and Gums.** Drawing, rending toothache; violent tearing pains in facial bones.

[11] **Taste and Tongue.** ‖Cannot speak. θAngina pectoris.

While reading cannot articulate; hoarse, reads very indistinctly, quite contrary to habit; speech difficult, unintelligible.

[12] **Inner Mouth.** ‖Burning in mouth and throat.

Frothing from mouth.

Digitized by Google

Mouth full of white tenacious mucus which must be frequently expectorated.
Increased secretion of thin, watery saliva; spits much.

[13] **Throat.** Throat dry, can hardly swallow; burning in throat and mouth.
Violent constriction of throat. θAngina pectoris.
Much viscid phlegm in throat.

[14] **Appetite, Thirst. Desires, Aversions.** Constant hunger; nausea if stomach is not satisfied.
Complete loss of appetite.
Thirst: especially at night; in cholera infantum.
Thirstlessness.
Does not eat, but drinks eagerly, < at night; violent vomiting.
Dyspeptic; uses tobacco; knows chewing hurts him and has tried in vain to stop; *Tabacum* 2c appeased craving for tobacco and stimulants.

[15] **Eating and Drinking.** Sensitive to smell of wine; fumes all but intoxicate her.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.
Nausea: incessant, with frequent vomiting; as if seasick, vertigo in paroxysms, cold sweat; amounting to faintness, disappears in open air; when moving in least; with a sinking feeling in epigastrium.
Nausea and vomiting on least motion. θCholera.
Nausea and cold sweat remaining after *Verat.* and *Secale* checked stools. θCholera.
Violent efforts to vomit.
Vomiting: violent; in morning, before breakfast; of watery liquid, sometimes insipid, sometimes bitter; as soon as he begins to move; during pregnancy, deathly nausea; of water; of sour fluid, with mucus.
Seasickness, deathly nausea; pallor; coldness; < from least bodily motion; > on deck in fresh, cold air.

[17] **Scrobiculum and Stomach.** Sinking at pit of stomach.
Cardialgia with frequent fluttering sensation in epigastrium.
Shocks in stomach, at night while sleeping, so great that patient is awakened.
Weakness of stomach.
Sensation of relaxation of stomach with nausea.
Dreadful faint feeling in stomach.
Spasmodic pressure in pyloric region.
Writhing in pit of stomach. θCardialgia.
Sticking in pit of stomach through to back.
Feeling of coldness in stomach with nausea.
Burning in stomach.
A lady, æt. about 70, ailing for upward of a year, always

Digitized by Google

sick, constant pains in stomach, throws up all food, often mucus and blood, lives on biscuits and champagne; moans incessantly from pain in stomach; formerly chronic diarrhœa, now bowels not open freely, motions very small, light-colored; urine color of blood; sleeps badly; feeling of sickness intense and constant; *Tabacum* 2 relieved, but patient was tormented by smell of tobacco, which seemed to be all through her; could not divest herself of strong odor of tobacco she constantly perceived.

[18] **Hypochondria.** Pressure, heaviness or stitches in liver.
Hepatic and renal regions sensitive to pressure.

[19] **Abdomen.** Gurgling in bowels; shifting of flatus.
Abdomen tympanitic; constipation.
Violent burning in abdomen, horrible pains, must shriek.
‖Spasmodic pressure in hypogastrium. θCardialgia.
‖Violent contractions in abdominal muscles; navel retracted.
‖Coldness in abdomen.
Tympanitic bloating of abdomen; dyspnœa.
‖Child wants abdomen uncovered, which relieves nausea and vomiting.
‖Spasms of bowels; nausea, vomiting and cold sweat.
‖Strangulated hernia; nausea, deathly faintness, cold; cold sweat; vomiting; sudden cerebral hyperæmia.
‖‖Deathly nausea and sickness; slimy stool. θStrangulated hernia.

[20] **Stool and Rectum.** Sudden, papescent, yellow-green or greenish, slimy stools; tenesmus; shifting flatus.
Diarrhœa: urgent, watery, painless stools; stools resembling those of cholera; with colic, nausea, vomiting, flatulence and soreness of anus; with sudden attacks of extreme faintness, with cold perspiration.
Stools: yellowish, greenish, slimy; papescent, fecal.
During stool: colic; ‖tenesmus.
Violent pain in small of back during soft stool; tenesmus and burning in anus. θDysentery.
‖Cholera infantum: body cold, abdomen hot; not satisfied until clothing is off abdomen; stools yellow, sometimes greenish slime; vomiting, debility, cold sweat; icy coldness of legs from knees down; warmth of body with icy-cold hands; great thirst; emaciation and death-like pallor; nausea and vomiting on making least motion; violent vomiting and diarrhœa with debility and cold sweat; face blue and pinched; < at night.
‖Sporadic cholera: coldness of body; distorted countenance; fainting; clonic spasms; cold sweats and nausea remained after copious evacuations had been checked by

Digitized by Google

Verat. and *Secale;* nausea and vomiting persistent after purging yielded, recurring in constant paroxysms, with cold sweat, oppressed stomach, anguish and restlessness, cramp and tearing in limbs, occasional drawing in calves; vomiting, sometimes in a stream; body cold, face distorted, spasms, vomiting, or no stool or vomiting, but complete collapse; all sphincters paralyzed.

‖Gastric cholera, when spasmodic condition prevails; cold skin covered with clammy perspiration, cyanosis not prominent.

‖Sudden vomiting and diarrhœa in morning, discharges whitish, colorless; attacks of fainting; sitting up or moving caused vomiting; stools every ten, twenty to thirty minutes; deathlike pallor; surface cold; pulse small and weak. θSporadic cholera.

‖Attack of sporadic cholera after catching cold while overheated; cramps with every attack of vomiting, at one time tonic, at another clonic; loss of consciousness; involuntary evacuations, generally accompanied, or quickly followed by vomiting; whole body cold; face distorted; great prostration and thirst.

‖Constipation.

‖Chronic constipation, great pain in and tympanitic distension of intestines; great dyspnœa.

‖An elderly lady whose bowels for last twenty years had always been a trouble to her, could not be moved without an enema, and very often not with one; when moved stools generally were of a clay color, or at least mottled clay color and brown.

‖Habitual constipation; paralysis of rectum; spasms of anal sphincter.

‖Prolapsus ani; great drowsiness during day when trying to read or study.

[21] **Urinary Organs.** ‖Renal colic; violent pains along ureters; cold sweat, deathly nausea.

Increased discharge of urine, or scanty high-colored urine.

Paralysis of sphincter vesicæ, constant dribbling of urine.

Enuresis.

[22] **Male Sexual Organs.** Nocturnal emissions; without waking.

Genital organs flabby; no erections or sexual desire.

Discharge of prostatic fluid.

Varicocele.

[23] **Female Sexual Organs.** ‖In climacteric period, also during catamenia: subjective coldness, epigastric sinking, palpitation, slight diarrhœa, muscular relaxation, excessive sense of wretchedness.

Leucorrhœa of serous fluid after menses.

Digitized by Google

[31] **Pregnancy. Parturition. Lactation.** ‖Morning sickness.
Nausea and vomiting, patient dreads least movement.
‖During pregnancy, insupportable pruritus over whole body, pyrosis, toothache and other gastric symptoms.

[30] **Respiration.** ‖Difficult, oppressed respiration; paroxysms of suffocation.
Dyspnœa; costiveness.
Hurried, anxious, irregular respirations.
Asphyxia
Sticking under sternum, with inability to take a deep breath.
Continual paroxysms of sneezing, for weeks. θCatarrhal asthma affecting nostrils.
‖Spasmodic asthma; laryngismus stridulus.
‖Freely developed asphyxia; great dyspnœa (almost as important as *Hydrocyanic acid*).
‖‖Periodical attacks of asthma; sits up in bed suffering with extreme dyspnœa; face blue; terrified expression; respiration short and rapid; gasps for air, fears suffocation; jugular veins swollen; pulse 100; heart beats very strong; liver and heart displaced; spleen enlarged; had ague for a year.

[27] **Cough.** Dry cough.
‖‖Hiccough following a severe cough.
‖‖Cough and hiccough at same time.
‖Whooping cough, violent straining and vomiting, stitches in pit of stomach, inability to breathe deeply; hiccough, as if he would suffocate, after coughing.
Cough produces in pit of stomach sensation as of a wound by some sharp instrument.

[28] **Inner Chest and Lungs.** Very violent constriction of chest.
On taking a deep breath it seemed as if chest were too tight.
Sensation as if a crowbar were pressed tightly from r. breast to l., till it came and twisted in knot around heart, which stopped, then leaped violently; after the attack heart missed every fourth beat.
‖Tightness across upper part of chest. θAngina pectoris.
Phthisis is said to make less rapid progress among tobacco workers.
Hæmoptysis, laryngitis, chronic bronchitis with general emaciation, anæmia, palpitation, oppression and pains in shoulders at night.

[29] **Heart, Pulse and Circulation.** ‖Palpitation: violent when lying on l. side, goes off when turning to r.; in attacks, at night, with tightness across chest (angina pectoris).
‖Oppression at heart; pulse feeble, irregular. θCholera.

Google

Violent beating of heart and carotids.
‖Sudden præcordial anguish.
‖Angina pectoris: pallor; features drawn; cannot speak or walk; coldness all over; sudden periodical anxiety; violent constriction in throat; tightness across upper part of chest; nocturnal attacks of tightness in chest, with paroxsymal oppression and palpitation; neuralgia up into neck; pain between shoulders; pulse small, irregular or imperceptible.
‖Heart's action very feeble.
‖Dilated heart; frequent pallor, lividity of face; diarrhœa alternating with constipation; palpitation while lying on l. side; muscæ volitantes; tinnitus aurium; dry cough, cardiac in origin; paroxysms of suffocation with tightness across upper part of chest; feeble, irregular pulse; pains like those of angina pectoris shoot from heart down l. arm, or up into neck, and involve different plexuses of nerves; extremities cold and covered with clammy sweat; neuralgia of face.
‖Functional diseases of heart, hypochondriasis, intermittent pulse, palpitation, dyspepsia, sinking, gone feeling in stomach.
‖Pulse: quick, full, large; small, intermittent; exceedingly slow; soft, full and feeble; feeble and irregular; imperceptible.

[31] **Neck and Back.** ‖Neuralgic pains into neck and between shoulders. θAngina pectoris.
‖Violent pain in small of back and loins. θRenal calculi.
Pain in small of back most severe after stool.
Throbbing in sacral region, evening.

[32] **Upper Limbs.** Left arm exhausted, painful.
Cramps in arms and hands.
Spasmodic contractions in arms and hands.
Hands feel lame, cold, then burning, with bloated finger-tips.
‖Hands icy-cold; body warm.
‖Trembling of hands.
‖Cramps in single fingers, especially while washing; early morning.

[33] **Lower Limbs.** ‖Legs icy-cold from knees down.
Cannot walk. θAngina pectoris.
Formication in l. leg from knee to toes.
Tremor and disabling weakness of feet.
Cramps in legs.

[34] **Limbs in General.** ‖Coldness, trembling of limbs.
Cramp: tearing in limbs; in hands and arms; from toes to knee.
Spasmodic contraction of arms, hands and legs.

Digitized by Google

[35] **Rest. Position. Motion.** Changes position: to relieve head.
Lying: on l. side, palpitation.
Sitting up: asthma >.
On rising: vertigo <.
On looking upward: vertigo <.
Motion: nausea and vomiting <; seasickness.
Coughing: causes hiccough; stitches in pit of stomach.
Walking: as if struck by a hammer on head.

[36] **Nerves.** ‖Weary, languid; tremor; general debility; feeling of great exhaustion; profound prostration with cold sweat.
Restlessness, requiring continual change of place.
‖Mrs. H., black eyes, heavy black hair, nursing a babe of three weeks, complained of spells of debility, with cold perspiration, especially on feet and lower limbs; < from least exposure to air; goose skin; weakness and numbness in general; pain in head over eyes; dimness of vision by spells; no appetite; had a hard labor and has not been well since.
‖Horrid pains with involuntary contractions.
‖Spasmodic contraction of muscles, spasms, general insensibility, relaxation.
‖Head drawn back, with rigidity of muscles of neck and back; contraction of eyelids and masseter muscles; hissing respiration from spasms of laryngeal and bronchial muscles; alternate tonic and clonic spasms, followed by general relaxation and trembling; retraction of abdominal muscles; contraction of parts supplied with involuntary muscles, as intestines, ureters, etc., accompanied by intense pains, nausea, cold sweat, and speedy collapse, with asphyxia.
From excessive use of tobacco: convulsions, head drawn firmly back, with rigidity of muscles of posterior part of neck; constantly recurring, rigid, tetanic spasms, muscles of back being principally affected.
‖Spasms of paralysis.
‖Collapse, anguish and restlessness, deathlike pallor, coldness, fainting, cold sweat, deathly nausea, without vomiting, or vomiting of water, when moving.

[37] **Sleep.** Drowsiness, going off in open air.
Stupefying sleep, at night.
‖Insomnia; especially with dilated heart.

[38] **Time.** Morning: vomiting; diarrhœa; sickness of pregnancy; cramps in fingers; sick-headache begins.
During day: drowsiness.
Evening: dim sight; tearing in facial bones and teeth; throbbing in sacral region; coldness and shuddering.

Digitized by Google

Night: thirst; shocks in stomach; palpitation; stupefying sleep; insomnia.

[39] **Temperature and Weather.** Open air: vertigo >; headache >; faintness and nausea >; seasickness >; drowsiness >.

Indoors: headache <.

[40] **Fever.** ‖Chilliness, with cold sweat.

‖Cold skin.

Coldness and shuddering in whole body, evenings.

‖Icy coldness of legs from knees to toes.

‖Body warm, hands icy-cold, or body cold. θCholera.

‖Sweat: cold on hands, forehead and face; viscid, cold; cold over whole body.

[41] **Attacks, Periodicity.** ‖Symptoms come on in paroxysms.

Periodical: sick-headache; asthma.

For weeks: paroxysms of sneezing.

[42] **Locality and Direction.** Right: as if struck on head with a hammer, throws him to l.; spots on shoulder.

Left: pains in arm from heart; formication in leg.

Right to left: as if crowbar were pressed through chest to heart.

[43] **Sensations.** ‖Sensation of excessive wretchedness.

As if struck by a hammer on r. side of head; as if head would burst; as if brain were being bored out; as if black dots filled visual field; as if ears were closed; as if seasick; as if stomach were relaxed; as if chest were too tight; as if a crowbar were twisted around heart.

Pain: in stomach; between shoulders.

Agonizing pain: in head.

Writhing: in pit of stomach.

Horrible pain: in abdomen.

Violent pain: in small of back during soft stool; along ureters; in small of back and loins from renal calculi.

Drawing rending: toothache.

Stitches in liver: in pit of stomach.

Sticking: in pit of stomach through to back; under sternum.

Tearing: in facial bones and teeth; in limbs.

Neuralgic pains: in neck and between shoulders; in face.

Burning: in eyes; of ears; in mouth and throat; in stomach; in abdomen; in anus; of hands; spots on face and r. shoulder.

Drawing: in calves.

Pressure: in liver.

Spasmodic pressure: in pyloric region; in hypogastrium.

Tightness: across chest.

Constriction: of throat; of chest.

Cramps: in limbs; in arms and hands; in fingers; in legs.

Digitized by Google

Shocks: in stomach.
Throbbing: in sacral region.
Oppression: at heart.
Dreadful faint feeling: in stomach.
Sinking feeling: in epigastrium; in stomach.
Weakness: in stomach.
Heaviness: in head; in liver.
Heat: in eyes; of ears; in face.
Coldness: in stomach; in abdomen; of hands.
Formication: in l. leg from knee to toes.
Lameness: of hands.
Itching: in spots on chest and shoulders; of whole surface; as from flea-bites.

[44] **Tissues.** Diseases originating in cerebral irritation, followed by marked gastric symptoms.
Emaciation, especially of back and cheeks.
Adapted to diseases of nervous system, where there is prominent irritation of functions of vagi, or sick-headache that comes on early in morning and by noon is intolerable, with deathly nausea and violent vomiting, greatly < by noise and light, with dreadful faint feeling at stomach.
Spasmodic contractions of muscles; spasms and general insensibility.
Complete prostration of whole muscular system.

[45] **Touch. Passive Motion. Injuries.** Uncovering: abdomen, > nausea and vomiting.
Pressure: hepatic and renal regions sensitive.
Motion of vessel: seasickness.
Strychnia poisoning: tetanus.

[46] **Skin.** Skin: cold, in cholera; livid, with angina pectoris.
Red spots on face and on r. shoulder, burning when touched.
Itching, with red or yellow spots on chest and shoulders.
Violent itching of whole surface. θPrurigo.
Dark, walnut color of skin: jaundice.
Red eruption on back.
Pimples on chest and fingers.
Pustules on nape of neck and upper limbs.
Miliary rash on both cheeks.
Increased turgescence of skin, which is yellow, hot and dry.
Vesicles contain a yellow serum, and are surrounded by a red areola.
Itching as from flea-bites.

[47] **Stages of Life, Constitution.** Woman, æt. 26, single, for a year has suffered from ague, which greatly affected her health; asthma.
Lady, æt. 30, lymphatic temperament; sick-headache.

Google

Woman, æt. 70, thin, sickly; sporadic cholera.
Lady, æt. 70, suffering a year; gastric disorder.

[48] **Relations.** Antidoted by: *Ipec.*, vomiting; *Arsen.*, chewing tobacco; *Nux vom.*, gastric symptoms next morning after smoking; *Phosphor.*, palpitation; *Ignat.*, *Pulsat.*, hiccough; *Clemat.*, toothache; *Sepia*, neuralgia right side of face, dyspepsia, chronic nervousness; *Lycop.*, impotence; wine, spasms, cold sweat from excessive smoking.
Plant. maj. has several times caused an aversion to tobacco.
It antidotes: *Cicuta*, *Stramon.*

TARAXACUM.

Dandelion. *Compositæ.*

Introduced and proved by Hahnemann, assisted by Franz, Gutmann, Kummer, Langhammer and Rasazemsky.

CLINICAL AUTHORITIES.—*Ague*, Bartl., Newmann, Rück. Kl. Erf., vol. 4, p. 990; *Typhoid fever*, Bœnninghausen, Hom. Cl., vol. 3, p. 54; Rück. Kl. Erf., vol. 4, p. 790.

[1] **Mind.** ‖Constant muttering to himself. θTyphus.
Inclined to talk, laugh and be merry.
Undecided, shunning labor, but after beginning, works well.

[2] **Sensorium.** ‖Vertigo when walking about; apyrexia of ague.
Dulness of head during a walk in open air, with reeling and dizziness; unsteady gait, head inclines at times to l., at others to r. side.

[3] **Inner Head.** Drawing pain or needlelike stitches in l. temple while sitting, ceasing when walking and standing.
‖Violent tearing in occiput. θTyphus.
Pressure with heaviness in lower part of occiput, after lying down.
Sharp stitches externally in l. side of forehead.
‖Pressive pain in r. temple.
Sensation in head as if brain were constricted on all sides by pressure.
Nausea with headache; anxiety.

[4] **Outer Head.** Head falls now to l., now to r. side, with vertigo.
‖Sweat on falling asleep, most on head. θQuotidian ague.

[5] **Sight and Eyes.** Aversion to light.
Burning in l. eyeball.
Burning sticking in l. eyeball, toward external canthus.

Digitized by Google

[8] **Hearing and Ears.** Drawing pain in external ear.
[7] **Smell and Nose.** Nosebleed, l. side.
‖Nose cold. θQuotidian ague.
[8] **Upper Face.** Face hot and red.
Pimples on cheeks, alæ nasi and corners of mouth.
[9] **Lower Face.** Upper lip cracked.
[10] **Teeth and Gums.** Teeth: feel dull; set on edge, as from acids, when chewing food.
Bleeding from carious teeth, blood having a sour taste.
[11] **Taste and Tongue.** ▮Taste: bitter, before eating; bitter, rising from pharynx into mouth; sour; saltish, especially of butter and meat.
▮▮White spots on tongue among the red.
▮Tongue: coated white; cleans off in patches, leaving dark-red, tender, very sensitive spots; mapped tongue.
[12] **Inner Mouth.** Tough, ropy, sour-tasting saliva.
Sour water accumulates in mouth.
Accumulation of saliva in mouth, with sensation as if larynx were compressed.
Suppurating pimple in right corner of mouth.
Smarting, burning and rawness in mouth and fauces.
[13] **Throat.** Throat and larynx feel as if closed.
During and after swallowing of food, aching across clavicles, up l. side of her neck into ear; gullet feels too small for food.
Dryness in throat.
Hawking up of sour mucus setting teeth on edge.
Sharp pressure in anterior wall of pharynx and larynx, disappears on swallowing.
[14] **Appetite, Thirst. Desires, Aversions.** ‖Great thirst, day and night.
‖Loss of appetite. θJaundice.
[15] **Eating and Drinking.** ▮After taking anything to eat or drink, great chilliness. θTyphus.
Coughs after eating.
Bitterish taste in mouth before eating.
Empty belching, after drinking.
Burning in throat from smoking, > from drinking.
Irresistible drowsiness after a meal.
[16] **Hiccough, Belching, Nausea and Vomiting.** ▮Eructations bitter; hiccough.
‖Belching, gagging, nausea at night. θAgue.
Nausea, with headache, anxiety; after fat food.
[17] **Scrobiculum and Stomach.** Rawness extending from mouth to stomach, with burning in stomach, rising up toward throat.
‖Digestion disturbed. θJaundice.
▮Bilious dyspepsia; bitter taste; nausea as after fat food; mapped tongue; pain in legs > when moving.

Digitized by Google

[18] **Hypochondria.** ‖Liver enlarged, indurated. θJaundice.
‖Pain in region of spleen. θAgue.
‖Tongue mapped, bitter taste in mouth, chilliness after eating or drinking, pain and soreness in region of liver, bilious diarrhœa.

[19] **Abdomen.** Motions in lower abdomen as if bubbles were forming and bursting.
‖Abdomen puffed. θJaundice.
Stitching pains in abdomen, especially in sides.

[20] **Stool and Rectum.** ‖Ineffectual urging, with much pressing; scanty hard stool. θAgue.
‖Stool difficult, even if not hard. θAgue.
Voluptuous itching in perineum, compelling scratching.
‖Constipation. θJaundice.

[21] **Urinary Organs.** Frequent, profuse pale urine. θDiabetes.

[22] **Male Sexual Organs.** ‖In a hard swelling in l. epididymis, following an inflammation after contusion, violent shooting pains, running upward and spreading over whole pubic region, after urinating.

[24] **Female Sexual Organs.** ‖Suppressed menses.

[25] **Voice and Larynx. Trachea and Bronchia.** As if larynx were compressed, with saliva in mouth, hoarse in speaking, with bitter phlegm in throat.

[26] **Respiration.** With deeper inhalations tensive pain in region of diaphragm.
With exhalation, more than with inhalation, burning pressure in sternum.
With exhalation, pressure from inside to short ribs in region of liver, extending up chest.
Deeper respirations > pressive stitch in r. chest.

[27] **Cough.** Sour-tasting sputa.

[28] **Inner Chest and Lungs.** Stitches in chest, during inspiration.
‖Boring, digging in chest.
Pressing pain in chest.

[30] **Outer Chest.** ‖Twitching in r. intercostal muscles.
Pressure on xiphoid process.

[31] **Neck and Back.** Tearing from ear down to neck.
Rolling and gurgling sensation in r. scapula, feeling chilly.
Pressing stitches along spine, mostly in sacrum, with dyspnœa.
Twitching in lower portion of side of neck.
Sticking, as with a somewhat blunt needle, in l. side of nape of neck, disappearing on sitting down.

[32] **Upper Limbs.** Twitching in muscles of arms.
Numbness in l. arm, side of head and ear.
Pressive pain in r. middle, ring and little fingers.
Hands hot or cold.

Digitized by Google

Finger tips icy-cold.
Twitching of muscles of l. forearm.

[33] **Lower Limbs.** Stitches in thighs, calves and soles.
Tension in l. thigh when stooping.
Pressive pain in l. calf.
Jerking pain in r. calf, ceases quickly when touched.
‖Tearing pains only in lower limbs, < during rest. θTyphus.
Pressure in dorsum of r. foot, while sitting.
Burning in knees, legs and toes.
Drawing pain in dorsum of r. foot, when standing; ceasing when sitting.
Severe, or fine stitching pains in r. sole from within outward, while sitting.

[34] **Limbs in General.** Can move limbs, but they feel as if bound or powerless.
Limbs painful to touch and when in a wrong position.

[35] **Rest. Position. Motion.** Rest: tearing pains in limbs <.
Lying: pressure in occiput.
Sitting: pain in l. temple; pressure in dorsum of r. foot; drawing in dorsum of r. foot >; stitching pains in r. sole; yawning.
Standing: drawing in dorsum of r. foot.
Stooping: tension in l. thigh.
A wrong position: causes pain in limbs.
Walking: vertigo; in open air, dulness of head.
Motion: > pain in legs; vertigo.

[36] **Nerves.** Exhausted, inclined to sit or lie down; semi-conscious.
‖Debility, loss of appetite, profuse, exhausting night sweat; thirst; restless sleep.

[37] **Sleep.** ‖Yawning, sleepy when sitting.
At night on waking, heat, mostly in face and hands.
Sleep disturbed by: dreams; sweat.
Vivid, unremembered dreams.
‖Unconquerable desire to sleep on leaving table; frightful dreams, of which he preserves no recollection other than a painful impression.

[38] **Time.** 8 P.M.: hands and nose cold.
Night: nausea; heat in face and hands; chilliness, with sweat.

[39] **Temperature and Weather.** ‖Inclined to open air.
In open air; chill.

[40] **Fever.** ‖Tips of fingers icy-cold.
‖Chilliness: all over; at night, with sweat and gastric ailments; after food or drink.
Chill in open air.
‖Long-lasting chill, copious sweat; pain in spleen. θAgue.

Google

Heat: at night, on waking; most in face and hands; without thirst.

Sweat: mostly with thirst; copious, debilitating, at night, causing biting on skin.

Chilliness of long duration, often whole day, followed in night by general and profuse sweat; gastric disturbances; nausea; belching; stools delayed, scanty, hard, with much pressing; pain in region of spleen. θAgue.

About 8 P.M. hands and nose get cold, desires to go to bed and is soon asleep; is hardly asleep before a profuse sweat appears, particularly on head, lasting an hour; lassitude; tendency to vertigo when moving about. θQuotidian ague.

Great prostration, loss of appetite; profuse sweats at night, was compelled to change his shirt three times every night; great thirst, day and night; restless sleep. θAgue.

A hard chill, after eating or drinking. θTyphus.

Ague: where Cinchona has only slightly delayed paroxysms, and where disease degenerated into a slow fever, especially in dry and bilious subjects.

Typhoid fever; during rest intolerable tearing pains, in lower extremities; constant muttering delirium; violent tearing pain in occiput; great chilliness after eating or drinking; mapped tongue.

Violent pains of typhoid or typho-malarial fevers, particularly in thighs.

[42] **Locality and Direction.** Left: drawing or stitches in temples; stitches in forehead; burning sticking in eyeball; nosebleed; aching from neck into ear; epididymitis; sticking in side of neck; numbness of arm; twitching in forearm; tension in thigh; pressive pain in calf.

Right: pressive pain in temple; pimple in corner of mouth; twitching in intercostal muscles; rolling and gurgling in scapula; pressive pain in fingers; jerking pain in calf; pressure in dorsum of foot; stitching pains in sole.

[43] **Sensations.** As if brain were constricted; as if teeth were set on edge; as if larynx were compressed; as if closed, throat and larynx; as if bubbles were forming and bursting in abdomen; as if rolling and gurgling in r. scapula; as if limbs were bound or powerless.

Pain: in region of spleen; in region of liver.

Jerking pain: in r. calf.

Needlelike stitches: in l. temple.

Stitches: in l. forehead; in abdomen, especially sides; in chest; in thighs, calves and soles; in r. sole.

Pressing stitches: along spine; in sacrum.

Digitized by Google

Shooting: from epididymis over pubic region.
Sticking: in l. eyeball; as with blunt needle on l. side of nape.
Stinging: in skin.
Tearing: in occiput; from ear to neck; in lower limbs.
Boring digging: in chest.
Drawing pain: in l. temple; in external ear; on dorsum of r. foot.
Burning: in l. eyeball; in mouth and fauces; in throat; in stomach; in knees, legs and toes.
Burning pressure: in sternum, < with exhalation.
Biting: in skin with sweat.
Smarting: in mouth and fauces.
Soreness: in region of liver.
Rawness: in mouth and fauces; from mouth to stomach.
Pressure: in occiput; from region of liver into chest; in chest; on xiphoid process; in fingers; upon back of foot.
Aching: across clavicles; up l. neck into ear.
Tensive pain: in region of diaphragm with deep inhalation.
Pressive pain: in r. temple; in l. calf.
Tension: in l. thigh when stooping.
Dulness: of head.
Heaviness: in occiput.
Numbness: in l. arm.
Itching: in perineum.

[44] **Tissues.** Gastric bilious attacks, with mapped tongue.
Neuralgia and rheumatism during and after typhus.

[45] **Touch. Passive Motion. Injuries.** Touch: > in r. calf; limbs painful.

[46] **Skin.** Unhealthy, pimply, sycotic skin.
Stinging in skin.
Eruption over body and limbs, itching severely and appearing to be a mixture of lichen and urticaria.
Biting in skin with sweat.

[47] **Stages of Life, Constitution.** Boy, æt. 8; ague.
Girl, æt. 19, servant; typhoid fever.
Man, æt. 46; ague.
A man; unhealthy, pimply, sycotic skin.

[48] **Relations.** Compatible: *Arsen.* in night-sweats.
Compare: *Chelid., Hydrast., Pulsat.*

Google

TARENTULA.

Spanish Tarantula. *Araneideæ.*

The male and female Tarantulæ used in the provings were collected by Dr. Mariano de la Paz Grælls, at the royal residence of Pardo, Spain, in the month of July, during which time the poison is stronger; dilutions used, 3, 6, 12 and 200; the medicine was prepared from the live spider, all its parts triturated in sugar of milk to complete dryness, and from this the alcoholic dilution.

The Mygale Cubanensis, which may be called the Cuban Tarantula, also found in South Carolina and Texas, is a larger spider of a dark-brown color, not so poisonous, and covered with more hairs than the Tarantula Hispanica. Dr. Howard had some specimens sent from Cuba, and the medicine he uses is prepared by macerating the whole spider in alcohol. We have not had a good proving of it. In the Hah. M., vol. 5, p. 8, something has been done in that direction, and some interesting facts were collected by Dr. Howard.

Provings made by Monge, del Rio, Tejero, Fejedor, Cuesta, Dubost, Perry, Ros, Iturralde, Gonzales and Chategnier, were reported by Nunez, translated by Terry, see Am. Jour. of Hom., N. S., vol. 2, p. 387.

Mind. Complete loss of memory.

Great taciturnity and irritability; desire to strike himself and others.

Profound grief and anxiety.

Consciousness of unnatural state of mind, hence despondency, sadness, moral depression, disgust for everything.

Mental chorea; hyperæmia and hyperæsthesia of female sexual organs.

Hysteria, with bitter belching and repeated yawning, > by lying down and by music; restlessness of hands and legs; constant motion, cannot remain in one place; heat in epigastrium.

Fits of nervous laughter.

Desire to joke, to play and to laugh; extreme gayety.

Great excitement caused by music; one hour after it, copious and general perspiration.

Singing until hoarse and exhausted.

Nervous excitement; hysteria and mania; restlessness and dreaming.

Sudden foxlike destructive efforts, requiring utmost vigilance to prevent damage; followed by laughter and apologies.

Cross, tendency to get angry and to speak abruptly; is obliged to move limbs.

Paroxysms of insanity; restlessness of legs; threatening words of destruction and death.

Suddenly sprang away from her attendants and swept ornaments from mantelpiece; said she was sorry, but could not help it; very mischievous and destructive, amusing and cheerful; at times pain in l. ovary.

Attacks of hystero-mania appearing daily about same hour, beginning with great nervous irritability, despondency and quarrelsome mood; sudden transition from this state to one of great exaltation, hits and abuses every one, destroys whatever she can lay hold of, tears her clothing, sings and laughs; mocks aged people with their old age, if restrained becomes violent; attacks end in a comatose sleep, during which she answers questions correctly; after waking remembers but little of what has occurred; during first part of attack pulse is slow, artery greatly contracted; during second stage pulse frequent and full; thirstlessness and loss of appetite; pressure and confusion of head.

Digitized by Google

While in a highly nervous state from too close application to musical studies, was operated upon to remove lens of eye by absorption; this was followed by great nervous depression and prostration, with occasional symptoms of mental aberration; was then treated several months for a retroverted and inflamed uterus, without mental improvement; severe pain through r. eye extending to occiput and nose; restlessness; cold feet; mahogany-colored and large papular eruption upon face, particularly large in region of malar bone; sleepless and nervous and very troublesome; retroversion, with swollen uterus; finally violent, soils bed with feces and urine; furious; sings loud and continuously, with laughter; no sleep for five days; thirst; suddenly springs from bed destroying whatever she could get hold of, this was done so quickly that she could not be prevented. θInsanity.

[3] **Sensorium.** Vertigo: falls to ground without losing consciousness; malaise, belching, nausea, bloating of stomach, gagging and efforts to vomit, with vomiting of food; after breakfast, with a bad taste in mouth; when fixing sight on any object, with headache, severe pain in cerebellum, accompanied by incomplete erection of penis, and formication in soft palate.

[3] **Inner Head.** Headache, as if a large quantity of cold water were poured on head, and body, > by pressure and rubbing head against pillow; great distress in cardiac region.

Migraine; cannot open eyes; tendency of head to incline backward.

Frontal headache, pain in vertex and parietal bones; > by pressure and fresh air.

Compressive headache, with lachrymation and heaviness of upper lids.

Intense headache with restlessness, compelling to move from place to place.

Pain flies to forehead and occiput, with photophobia.

Neuralgia in temples.

When waking in morning, headache as if head were knocked, < to 9 A.M., affecting throat and neck; stiffness of neck.

Intense headache, as if thousands of needles were pricking into brain.

Severe headache, < by touch.

Pain in occiput as if struck with a hammer, extending to temples.

Burning, scorching heat in occiput; pricking and itching over whole body; convulsive trembling of body; con-

Digitized by Google

vulsions, paralysis, complete retention of urine and feces. θMeningitis cerebro-spinalis.

[8] **Sight and Eyes.** Right pupil much dilated.

‖Feeling of a hair in l. eye, which pricked it; pricking made her rub it; < on waking. θChronic opacity of cornea.

[9] **Upper Face.** Pain in angles of inferior maxilla, so severe as to think he is going crazy.

Pain in inferior maxilla, as if all teeth were going to fall out; neither cold nor heat relieves.

Pain in direction of r. inferior maxillary nerve, with a tickling sensation in stomach.

[12] **Inner Mouth.** Great dryness of mouth and teeth.

[13] **Throat.** ‖Tonsillitis; high fever, delirium, red face, tonsils so swollen, suffocation was feared.

‖Tonsils greatly swollen, membrane covering both, also uvula; neck much swollen, excessive fetor oris, high fever and cerebral congestion. θDiphtheria.

‖High fever, delirium, vomiting, great prostration; throat swollen externally on both sides, internally entire fauces red, both tonsils covered by a firm membrane, color of pearl; both sides equally affected; offensive odor from mouth. θDiphtheria.

‖Hot, fiery-red face, pungent heat of surface of body, drowsy with starting in sleep, throat swollen internally, both tonsils slightly covered with membrane, distinct odor of diphtheria.

‖Tonsils much swollen and well covered with membrane; violent onset of disease; high fever; tendency to vomit. θDiphtheria.

‖High fever and delirium for two nights; throat swollen externally and both tonsils covered by a yellowish membrane; fetor oris. θDiphtheria.

[14] **Appetite, Thirst, Desires, Aversions.** ‖Loss of appetite, intense thirst; general prostration; vomiting after eating and getting out of bed; craving for raw food. θDisorders of pregnancy.

Opium habit.

[17] **Scrobiculum and Stomach.** Gastric disturbance; mouth dry; gums bleed; tongue ulcerated; throat sore, swollen, inflamed, constricted; great thirst; flat, bad taste; appetite lost, with anguish, nausea and vomiting.

[18] **Hypochondria.** Hepatic region painful to touch.

‖Severe burning pain in cancer of liver (relieved).

[19] **Abdomen.** ‖Sharp pain in umbilical region; violent burning in abdomen and rectum; stools profuse, dark, fetid, bloody, with violent urging; constipation.

[20] **Stool and Rectum.** ‖Constipation.

Digitized by Google

Stools three or four times daily, very dark, fetid, partly formed, containing much mucus, expelled with difficulty and followed by smarting and burning in anus, but no tenesmus; stools occur immediately on having head washed.

‖ Nausea and vomiting; diarrhœa; pain and tenderness in bowels; constant thirst; tongue red; pulse 140; position on back, limbs flexed; sleepless and restless; inflammation of bowels, probably caused by eating baked beans.

‖ Fainting, sinking, chill; great nervousness; vomiting; purging; severe cramps in bowels and pain in bladder; pulse weak, 100; no thirst; tongue dark as if stained with nitrate of silver; excruciating pain in bowels, < at night; evacuations frequent, eight to ten every night, and four or five by day; frequent and painful micturition, patient seemed unable to locate pain or to distinguish whether it was < in bladder or bowels; stools thin and brown, with very little odor; great restlessness; desire to change position or to get out of bed and walk floor; face pale and haggard, with perceptible diminution of flesh and strength from day to day. θ After injecting nitrate of silver for gonorrhœa.

‖ Headache, pain in back and limbs; tenderness in region of liver and bowels; pulse 96; tongue brownish and dry; bilious diarrhœa; fifteen evacuations, not painful, in twenty-four hours, over half of these at night; stools dark-brown and thin, with some lumps of feces of same color; abdomen sore; no nausea, but disgust of food.

‖ Weakness of sphincter ani, feces appeared to be natural but passed as fast as accumulated.

[21] **Urinary Organs.** Diabetes; profound grief and anxiety; great prostration and pain as if whole body were bruised; loss of memory and dimness of sight; constant craving for raw articles; intense thirst; disgust for meat and general wasting away; constipation; polyuria, with violent pains in lumbar region and paralysis of lower extremities; miliary eruptions and furuncles.

Involuntary emission of urine when coughing, laughing, or making any effort whatever.

‖ Pain in region of bladder; urination frequent, very painful; extremely nervous; could get no relief in any position; pulse somewhat quickened from pain; tongue only slightly coated; all symptoms < at night; sleep disturbed.

Cystitis, with high fever, gastric derangement, excruciating pains, and impossibility to pass a drop of urine; bladder seems swollen and hard; great tenesmus from

Digitized by Google

spasmodic action, debilitating patient, who passes only by drops a dark-red, brown, fetid urine, with gravel-like sediment.

‖Urine hot, thick, much sediment; difficult micturition, incontinence, and pain in kidneys. θSeptic diseases.

[20] **Male Sexual Organs.** Extreme sexual excitement, lasciviousness, almost to insanity.

‖Onanism, followed by prostatic ailments and hypochondriasis.

‖Seminal emissions after onanism; imbecility, stupid laughter, progressive wasting.

‖Gonorrhœa; five different injections, producing great irritation in urethra, particularly when urinating, with smarting, unbearable pains; redness on tip and edges of tongue, anorexia, dyspepsia and pyrosis, flatulence and stubborn constipation; emaciation in face, eyes sunken and without expression; dizziness when moving, dyspnœa, and alarming palpitation; loss of memory so great, he failed to recognize persons with whom he was intimately acquainted; little perception, inertia and weakness for any mental labor; full of deep sadness, shy, shuns his friends; nervous agitation, restlessness, inability to find a comfortable position; if sleep was obtained, it only lasted for three or four hours; pains; getting weaker; felt a general burning, more in palms and soles, with shaking, twitching and incessant movement of lower extremities, especially when quiet; gonorrhœa, though not so profuse, stains shirt a light yellow; seminal emissions two or three times a week; want of appetite.

[21] **Female Sexual Organs.** ‖Extreme sexual excitement: menses too early and profuse; pains and spasms of uterus; pruritus vulvæ; leucorrhœa.

‖Violent nymphomania; could not suppress lascivious inclination; < from sexual intercourse; has suffered since her twentieth year; woman, æt. 45.

‖Nymphomania; reflex chorea; hyperæmia and hyperæsthesia of sexual organs.

Fibrous tumors of uterus, with bearing-down pains.

Displacement of uterus, with retention of urine and difficult defecation.

Sensation of great weight, with burning in hypogastrium and uterus, as if there were not sufficient space, with upward pressure.

Pruritus vulvæ; frequent hemorrhages; pale face, constant fatigue.

Profuse menstruation accompanied by frequent erotic spasms; crossness, ennui, and deep dissatisfaction; cata-

Digitized by Google

menia too early, pain in lumbar region as soon as menses commence and ceasing with it; great pruritus in vulva after menses; hysteria.

After a fall down stairs complains of pain in lower part of abdomen and hips; very sensitive to manipulation, some hardness and swelling in hypogastric region and in uterus, which was seat of burning, crampy pains, < by every movement; sanguineous leucorrhœa, constant desire to pass water, which was clear but difficult to void, falling drop by drop, with burning pain; præcordial anguish, sadness, weeping and fear of death (*Conium* improved, *Tarentula* cured). θUterine neuralgia.

Strong bearing-down pelvic pains for nearly a week previous to catamenia; severe backache extending to hypogastric region; wearying fidgetiness of legs, pains felt more from knees to feet, compelling patient to move about, > by riding horseback; pains < as menses approach, severest at greatest flow, violent enough to produce convulsive movements; chorealike restlessness, twitching and trembling of muscles, which worked painfully from side to side; draws herself together, legs close to abdomen and head bent forward, hands clutching at bedclothes, immediately afterward seizing something else; motion of inferior extremities almost incessant; hands and feet cold and moist; pains and spasms kept pace with menstrual flow, increasing or decreasing with it; menses usually regular except for last four months, when they were delayed, owing to a slight sanguineous intermenstrual discharge, lasting two days and generally appearing at fifteenth day, which was painless; flow nearly right in quantity, light-colored and with small dark clots when patient was recumbent, darker and more profuse when rising to chamber; on first day usually a slight frontal headache, increasing second day to a violent, throbbing pain, < from light and motion; during headache exacerbation, a remission of pelvic pains, latter reappearing soon with original force, but not remaining so long; on third day a brief relief, followed by a return of old pains, lasting a shorter time; meantime urinary tenesmus, nausea, and bad taste in mouth; occasionally globus hystericus and dry hacking cough; with convalescence great weakness and shooting, grasping pains at heart with occasional interruption of its rhythm, and with increased action; preceding and following menses, yellowish leucorrhœa; in morning, hawking up brown mucus, often tinged with blood; breathing short, painful; occasionally, at long intervals, a sudden waking from dreamless sleep, under a feeling of suffo-

Google

cation; violent palpitation and acute pains through heart, compelling upright position; pulse regular, quick, irritable; r. heart-ventricle slightly dilated; infraclavicular pain in r. side of chest, penetrating to back, so as to catch breath; since childhood has wanted sand, cuttlefish, ashes, etc., highly spiced food, cigarettes; > during warm weather, when outdoors; < during cold. θDysmenorrhœa.

‖Engorgement of cervix uteri, with granulations, extending to vagina, whose mucous membrane was highly injected; violent convulsions of whole body during rest.

‖Chronic vaginitis, granulations and excrescences in vagina and neck of uterus; cancerous ulcer on os destroyed its l. lateral part; induration of neck and body of uterus; flushes of heat to face, perspiration, congestion to head, menorrhagia; severe pains in region of sacrum, extending to hips and terminating in uterus; menstruation lasted twelve to fifteen days, followed by pressive, shooting pains in uterus and a fetid, bloody discharge; nausea, anorexia, great thirst, slow and difficult digestion, obstinate constipation, general malaise; at 2 A.M., some days after, severe, violent, tearing pains in uterus, extending to sacrum, and along vertebral column, with rigidity of trunk and convulsive movements in head and legs; icy coldness, chattering teeth, trembling, anxiety and uneasiness; small, contracted pulse, oppression of chest, dryness of mouth without thirst, and pale face.

Burning smarting leucorrhœa and painful uneasiness in coccyx, > by standing, < by slightest movement, sitting or lying on bed, or by least pressure.

Leucorrhœa: alternating with bloody discharge; following hemorrhage, with great weakness.

Expulsion of gas from vagina.

‖Sensation of motion in uterus, like a fœtus; singing, like a tea-kettle in l. ear; obstinate constipation; stoppage of urine, which is high-colored, with red sediment; pain in region of kidneys; palpitation; sensation of something crawling up legs, under skin, from feet till it reaches uterus, causing great sexual desire, intense pruritus and rubbing, which it is impossible to resist, makes her almost crazy. θPruritus vulvæ.

‖Intense, unbearable pruritus vulvæ, extending into vagina, < at night, with dryness and heat of parts; white, thin leucorrhœa; thick white sediment in urine; pain in r. side of abdomen; nausea; accumulation of mucus in throat; mouth parched and dry; thirst often and for large quantities; very restless at night. θPruritus vulvæ.

Google

[31] **Pregnancy. Parturition. Lactation.** ||Loss of appetite; intense thirst; general prostration; vomiting after eating, and getting out of bed; craving raw food. θDisorders of pregnancy.

[24] **Inner Chest and Lungs.** Great oppression; panting perspiration.

||Chronic suffocative catarrh.

[29] **Heart, Pulse and Circulation.** Præcordial anxiety, tumultuous beating of heart.

Murmurs and palpitation; alternate acceleration and suspension of movements of heart.

Trembling and thumping of heart as from fright.

Præcordial anguish; movements of heart not felt; suffocation.

Constant want of air; heart suddenly ceases to beat and patient fears to die.

Sensation as if heart turned and twisted around, with pain in chest and general perspiration.

Pain in heart as if squeezed or compressed; also in aorta, under l. clavicle and in carotids, with violent throbbing of heart and arteries; rheumatic pains in chest extending to umbilical region.

‖Angina pectoris.

||Nervous spells with pain in l. ovary, pain seems to affect her heart and she becomes unconscious, seems to stop breathing; as spell comes on again she begins to breathe short and to call for more air; pulls her dress away from her heart; gasping for air; pulse intermits, weak and slow; many times she is reported dying.

[30] **Outer Chest.** ||Brown-colored mole about the size of a grain of wheat on back of neck; burning, no inflammation; when touching it complains of needles sticking in it.

||Carbuncle as large around at its base as a silver dollar, apex studded with small openings on side of chest; no pus discharging; intense burning and stinging extending to mamma and down arm; had not slept for forty-eight hours.

[31] **Neck and Back.** ||Abscess in back of neck, burning, excruciating pain, completely banished sleep for six or seven nights; fever, with great thirst and prostration. θAnthrax.

||Anthrax in interscapular region, with severe burning pain; unable to sleep from excessive pain.

||Anthrax in back of neck; local applications, first emollient, then caustic, at last knife was resorted to with stimulants internally, and hydrate of chloral and morphine to relieve burning, agonizing pain, all to no effect;

muscular and cellular tissues destroyed from neck to waist, and from shoulder to shoulder, leaving a cavity about six inches long and four wide, at bottom of which several dorsal vertebræ were plainly visible; infiltration of surrounding tissues; quotidian fever and diarrhœa; on third day after *Tarantula Cub.* line of demarcation was formed, and two days afterward surrounding mortified tissues came off; with continuance of this remedy and an occasional dose of *Sulphur*, patient was entirely cured in seven weeks.

Irritable spine; excessive hyperæsthesia, a slight touch along spine provokes spasmodic pain in chest and indescribable distress in cardiac region, at times heart feels as if twisted (spiral fibres); intense headache, as if thousands of needles were pricking into brain; body burned all over; trembled so she could hardly talk; headache > by rubbing head against pillow, termini of nerves become so irritated that some kind of friction is resorted to in order to obtain relief.

Multiple sclerosis in consequence of fright and rheumatism; trembling commenced in l. hand, always < by mental trouble; after fright it affected all limbs; intense pain during night prevents her rest and sleep, and an itching and crawling of l. leg make her rise and walk about; bathing < pain, but fresh air >, even at night; intelligence and memory considerably diminished; trembling and pricking prevent from doing any fine work; motility and sensibility unaltered; neither paralysis, anæsthesia nor hyperæsthesia; head trembles as much as l. hand and foot, and a slight tremor could be observed on tongue when opening mouth; no appetite, chronic constipation; since menopause acne in face; slight hyperæmia of retina.

Difficulty of moving legs, they do not obey will; weakness of legs. θTabes dorsalis.

Burning, smarting leucorrhœa, and painful uneasiness in coccyx, > by standing, < by slightest movement, sitting or lying on bed or by least pressure. θCoccygodynia after confinement.

51 **Lower Limbs.** Uneasiness in legs with necessity of constantly moving them.

Weakness of legs not allowing feet when walking to be placed squarely on ground; difficult walking; inability to kneel down; difficulty of moving legs, they do not obey will.

Large hard abscess in r. thigh, exceedingly painful and inflamed, no fever, glands in groin swollen, indurated and painful.

Digitized by Google

[31] **Limbs in General.** Rheumatism checked by putting extremities in cold water, panting respiration, anxiety, cramps in heart or twisting pains; pulse full, hard, frequent; aorta feels full, tense, stretched, with stitching pains; morning and night cold extremities.

[35] **Rest. Position. Motion.** Cannot keep quiet in any position.

Lying: hysteria >; on back limbs flexed.

Sitting or lying: uneasiness in coccyx <.

Standing: > uneasiness in coccyx.

Motion: > headache; dizziness; < crampy pains in uterus; < frontal headache; < uneasiness in coccyx; constant, of hands, feet and head; can better run than walk.

Walking: difficult from weakness of legs.

Riding horseback: > pains in legs.

[36] **Nerves.** Great restlessness and agitation, particularly of inferior extremities; has to change position; need of constantly moving hands, feet and head.

‖Trembling of body; limbs agitated.

‖St. Vitus' dance.

‖Great restlessness, could not keep quiet anywhere or in any position; felt that he must keep in motion though walking aggravated all symptoms.

‖‖Somnambulism; frequent desire to urinate; clear urine; quantity lessened until secretion ceased; much excited at night; convulsions, a kind of St. Vitus' dance, with inclination to bite and tear everything that comes near him; when fit ceases, falls asleep, on awaking is unconscious of what has happened; has not voided urine since fifteen days; exalted state of mind; could not speak, but could write; falls every day into a somnambulistic kind of sleep, the exact time of which he states every morning; this state continued several months.

‖Trembling of body; all limbs agitated; convulsive hysteria and chorea, with excessive hyperæsthesia.

‖Excessive hyperæsthesia; least excitement irritates.

‖‖Hysteria of two months' standing in a girl æt. 11, particularly characterized by attacks of spasmus glottidis, occurring about every five minutes, and accompanied by a whistling tone.

‖Spasmodic, hysterical symptoms from uterine irritation.

‖‖Great disorder of motion, convulsive form; necessity for continual motion; fright, terror, fear of speedy death, with vertigo and præcordial anguish, with intolerance of pressure and touch, and periodicity. θHysteria.

‖Choreic restlessness of limbs; music has a soothing influence.

Digitized by Google

Suffers on account of deep grief; severe convulsions at 8.30, exactly, lasting about two hours; they are preceded by an intense chill all over, beginning with short chills on back and extremities, lasting about half an hour, and followed immediately by convulsions, with severe involuntary muscular contractions, beginning in upper or lower extremities and extending to whole body; consciousness retained during paroxysms, but lost power of co-ordination. θIntermittent nervous affection.

For several months spasms of an extraordinary character, increasing in intensity and frequency; attacks preceded by spells of gaping and irregular breathing, then muscular contortions of all kinds, fixed look; followed by wild shrieks, long-continued coma, occasionally hysterical outbursts of laughing or crying; paroxysms most severe at menses.

A few days after getting out of bed after fourth confinement, violent convulsions of whole body during rest, necessity of moving and walking up and down room; on attempting to sit or lie down, violent shaking of head and limbs, with bruised pains all over and dizziness, compelling her to get up again and walk room; was unable to sleep for nine days, dreading convulsions every time she attempted to sit down; want of appetite, great anxiety and malaise; fear of death; cervix uteri engorged, with granulations extending to vagina, mucous membrane of which was highly injected.

A boy, æt. 14, looks thoughtful and melancholy, shuns his companions and stays most of the time in most retired part of house; lost his appetite, in a few days was taken with chorea; head drawn downward, afraid to look at strangers, idiotic expression of face, great loss of flesh, dirty and ashy color of skin, impetigo around lips, choreic movements of head, movements of r. arm alternating with those of head; all movements ceased in bed; involuntary micturition.

Inordinate and irresistible movements, with alternate relaxation and contraction of muscles of l. hand and foot. θChorea.

In constant motion; can better run than walk; speech impeded; feels best in bed. θChorea.

Constant irregular movements of r. arm and leg; is unable to walk or feed herself; speech difficult, tongue heavy; frequent epistaxis; starting during sleep which is light; great thirst; constipation; good appetite; changeable mood; any observation or steady look was enough to make her cry; dragged leg when trying to walk, steadily getting worse. θChorea.

Google

Child can retain its seat with difficulty, arms tossed from side to side, legs cannot be controlled; walking impossible; head turned violently from side to side; eyes rotated and eyelids almost in constant motion; frequent hideous grimaces; violent contortions of trunk; every effort to take food causes involuntary movements of tongue, causing her to drop from mouth two-thirds of what she has taken; movements not so violent at night, but cannot sleep more than a few moments at a time. θChorea.

Chorea of superior extremities without any appreciable cause; head thrown with violence in different directions; nervous contractions in muscles of face; r. leg thrown about with such violence, could hardly keep from falling.

Disorderly and irregular muscular movements; limited to l. arm or leg or to one of these parts; very seldom l. arm and r. leg; with grimaces of mouth.

Inordinate, irregular movements of hands and feet, which subside almost entirely on hearing notes of hornpipe.

Chronic irregular movements of superior extremities, also head; was thrown with violence in different directions; contraction of muscles of face; legs somewhat affected.

Head, r. arm and hand affected, head drawn downward; involuntary micturition.

Falling down unconsciously without any warning, general rigidity, grinding of teeth, bites her tongue, squinting of eyes which remain open during attack, fit lasting two or three minutes, followed by dejection and dizziness for twenty-four hours; attacks occurring every eight, fifteen or twenty days. θEpilepsy.

Dizziness before fit; great præcordial anguish.

For five years peculiar fits, which begin with a sensation as of a cloud before l. eye, gradually increasing to complete blindness on that side; then follows a numbness of l. arm and r. leg, gradually increasing until former becomes powerless; after this, drowsiness, followed by a deep sleep, from which he awakes with a throbbing frontal headache and blindness in l. eye, these two symptoms gradually disappear together; urine normal; fundus oculi normal; longest interval between attacks was five months; of late, attacks have been coming every week. θEpileptoid.

During attack squinting of eyes which remain open; after dizziness and dejection for twenty-four hours. θEpilepsy.

Digitized by Google

‖Paralysis agitans caused by great mental distress, commencing with pain in arms and a continual itching and trembling in l. leg, with inability to remain in bed; had to walk floor; trembling extended to head and tongue; appetite lost; sleepless nights.

‖Intelligence and memory diminished; trembling; pricking, and peculiar sensation in phalanges of hands and feet, unable to perform any fine work; motility and sensibility unaltered, neither paralysis, anæsthesia nor hyperæsthesia; head trembled just as l. foot and arm, and a slight tremor could be perceived on tongue when she opened her mouth; could only sleep for a few minutes, pains woke her in spite of her sleepiness; no appetite; chronic constipation, since menopause acne in face; a slight hyperæmia of retina, excess of uric acid in urine. θParalysis agitans.

‖Paralysis; general formication beginning with a severe pain in occiput, followed by numbness of trunk and limbs, and complete loss of motory power.

[37] **Sleep.** ‖Sleeplessness.

[38] **Time.** Morning: to 9 A.M. headache <; hawking of brown mucus; cold extremities.

Night: pain in bladder <; pruritus vulvæ <; restlessness; cold extremities; somnambulism; sleeplessness.

[39] **Temperature and Weather.** Fresh air: > headache; > pains of tabes dorsalis.

Warm weather: dysmenorrhœa >.

[40] **Fever.** Constant chill and coldness during four days.

Scorching heat in whole body alternating with icy coldness.

‖Scorching heat of skin which is of a scarlet color.

‖Intermittent febrile attacks; during heat continued coldness of feet. θHysteria.

‖Intermittent fever of nervous hysterical women.

‖General emaciation particularly of face, icteric color; tongue coated yellowish, want of appetite, no thirst, dryness of mouth; constant pain in hepatic region, < before paroxysms, with nausea and vomiting; severe headache, præcordial anxiety, sadness, taciturnity, despair of recovery; cold stage intense, with shaking; blue color of nails, lasting about two hours; gastric symptoms < at onset of heat; fever scorching, no thirst; great dryness of mouth; hot stage lasted five to six hours, during which time eyes were shut and she lay in a comatose condition; sweat lasted three to four hours, followed by great debility and prostration. θAgue.

‖Chills and fever with choreic convulsions; shakes almost continuously with involuntary movements in limbs,

Digitized by Google

abdomen, chest, trunk and face, < in l. side; could not speak a word, tongue and pharynx being implicated; after a severe scolding, or punishment.

Toxæmic fevers of a typhoid or intermittent form; chilliness or burning heat, chilliness predominating.

Attacks, Periodicity. Daily at same hour: attacks of hystero-mania.

Locality and Direction. Left: pain in ovary; feeling of a hair in eye; singing in ear; pain under clavicle; trembling begins in hand; itching and drawing in leg; alternate relaxation and contraction of muscles of hand and foot; chorea of arm and leg; as of a cloud before eye, blindness; numbness of arm; trembling in leg.

Right: pain through eye to occiput and nose; pupil dilated; pain in maxillary nerve; heart ventricle dilated; infraclavicular pain; pain in abdomen; abscess in thigh; glands in groin swollen; choreic movements of arm alternate with those of head; irregular movements of arm and leg; leg thrown about with violence; numbness of leg.

Sensations. As if head were knocked in morning; as if thousands of needles were pricking into brain; as if occiput were struck with a hammer; as of a hair in l. eye; as if lower teeth were going to fall out; as if body were bruised; as if there were not sufficient space in hypogastrium; painful uneasiness in coccyx; motion in uterus as of a fœtus; singing like a tea-kettle in l. ear; as of something crawling up legs under skin from feet to uterus; as if heart turned and twisted around; heart as if squeezed or compressed; as of needles sticking into mole on neck when touched; as of a cloud before l. eye; as of insects creeping and crawling.

Pain: in vertex and parietal bones; in angles of inferior maxilla; in r. inferior maxillary nerve; in bladder; in back and limbs; in uterus; under r. clavicle to back; in r. side of abdomen.

Excruciating pain: in bowels; in bladder; in abscess on back of neck.

Neuralgic pain: in temples; in l. ovary affecting heart.

Severe pain: through r. eye to occiput; in cerebellum.

Sharp pain: in umbilical region.

Twisting pains: in heart.

Tearing: in uterus; to sacrum.

Stitching pains: in aorta.

Pricking: over whole body.

Shooting pains: at heart; in uterus after menses.

Stinging: in carbuncle on side of chest.

Burning: in occiput; in cancer of liver; in abdomen and

rectum; in palms and soles; in hypogastrium and uterus; leucorrhœa; in carbuncle on side of chest; in abscess on back of neck; in anthrax between shoulder blades; all over body, irritable spine; of skin.
Smarting: in anus; urethra; leucorrhœa.
Grasping pain: at heart.
Constriction: in throat.
Cramps: in bowels; in heart.
Rheumatic pains: in chest, extending to umbilical region.
Pressive pains: in uterus after menses.
Bearing-down pains: in uterus.
Heaviness: in lids; in hypogastrium and uterus.
Uneasiness: in legs.
Fidgety feeling: in legs.
Trembling: in limbs.
Tickling: in stomach.
Crawling: on l. leg.
Numbness: of trunk and limbs.
Formication: in soft palate; with paralysis.
Heat: in occiput; in vagina; of skin; scorching.
Itching: on l. leg; of skin.

Tissues. Termini of nerves become so irritated that some kind of friction is necessary in order to obtain relief; must move hands or legs; must rub head against something; must roll something between fingers; must put fingers in mouth.
Weakness of all limbs; rheumatic pains; restlessness; formication; paralysis; spasmodic paralytic affections: neuralgia; rheumatism; nervous diseases where functions of vagi are more or less disturbed.
Anthrax; carbuncles; atrocious pains.
Syphilitic buboes, painful boils, all kinds of abscesses where pain or inflammation predominates.

Touch. Passive Motion. Injuries. Music: hysteria >; causes excitement.
Touch: headache <; hepatic region painful; pain in mole on neck, as of needles; along spine provokes spasmodic pain in chest and distress in cardiac region.
Rubbing: head against pillow > headache.
Pressure: headache >; uneasiness in coccyx.
After a fall down stairs: uterine neuralgia.

Skin. Terrible pruritus, a sensation as of insects creeping and crawling.
Outer parts feel as if worms or insects were boring and crawling, no relief from cold or heat; continual irritation and titillation.
Malignant ulcers and unhealthy skin; anthrax and gangrene.

Google

Itching: burning; formication; ecchymosed spots; painless vesicular and especially pustular eruptions.

Stages of Life, Constitution. Nervous, hysterical patients, subject to choreic affections.

Foxy, mischievous and destructive tendency.

Boy, æt. 2; diphtheria.

Child, æt. 3; diphtheria.

Boy, æt. 5; diphtheria.

Boy, æt. 5, light complexion, nervous temperament; diphtheria.

Girl, æt. 6, stout; diphtheria.

Girl, æt. 6, delicate; diphtheria.

Girl, æt. 6; chorea.

Girl, æt. 7, nervo-lymphatic temperament; chorea.

Girl, æt. 8, bright, healthy, intelligent-looking; weakness of sphincter ani.

Boy, æt. 8, delicate, scrofulous, two children in same family died of the disease; diphtheria.

Girl, æt. 9; tonsillitis.

Boy, æt. 9, suffering a year; chorea.

Girl, æt. 9, nervous temperament; chorea.

Girl, æt. 9, fleshy, lymphatic temperament, anæmia, suffering four months; chorea.

Girl, æt. 10; diphtheria.

Boy, æt. 11, suffering five years; epileptoid.

Girl, æt. 11, suffering two months; chorea.

Girl, æt. 11; severe burning in mole on neck.

Girl, æt. 11, thin, delicate, nervous; intermittent fever and choreic convulsions.

Girl, æt. 12, weak constitution, belongs to poor class; chorea.

Girl, æt. 14, suffering four months; hystero-mania.

Boy, æt. 14; chorea.

Young lady, æt. 18, dark complexion, slender, delicate, consumptive; diarrhœa, etc.

Miss B., æt. 19, nervo-lymphatic temperament, after a fright; chorea.

Man, æt. 21, dark complexion, large, strong; diarrhœa, etc.

Girl, æt. 24, tall, slender, lymphatic, nervous temperament, with scanty menstruation, irritable mood; epilepsy and hysteria.

Negro, æt. 26; abscess in thigh.

Woman, æt. 27; insanity.

Miss M., æt. 27, confirmed dyspeptic for years, a musical amateur, suffering with myopia, amblyopia and incipient cataract, while in a highly nervous condition from overstudy, was operated on to remove opacity of lens of r. eye by absorption; insanity.

Mrs. ——, æt. 30, affected two years; insanity.

Woman, æt. 32, single, blonde, blue eyes, cheerful, weak and emaciated frame, suffering ten years; dysmenorrhœa.

Lady, æt. 32, widow, blonde, lymphatic temperament; uterine neuralgia.

Man, æt. 32, nervous temperament, gastro-hepatic diathesis, after great grief; intermittent nervous affections.

Man, æt. 34, nervo-sanguineous temperament, gonorrhœa.

Madam B., æt. 36, lymphatic temperament, after fourth confinement; spasms.

Unmarried lady, æt. 36, slim, bilious, nervous, of irritable character, and scanty menstruation, suffering since 18 years of age; attacks of chorea.

Woman, æt. 36; carbuncle.

Lady, æt. 40, blonde; urinary difficulty.

Mrs. C., æt. 40; irritable spine.

Mrs. ——, æt. 40; affection of heart.

Mrs. R., sanguine temperament, full habit, suffering since last confinement, four years ago; coccygodynia.

Lady, æt. 45, good constitution, profuse menstruation, suffering since 20 years of age; nymphomania.

Widow, æt. about 45, suffering sixteen years; pruritus vulvæ.

Mrs. F., æt. 48, sanguineous constitution, mother of seven children; uterine affection.

Man, æt. 50, dark complexion; diarrhœa.

Woman, æt. 51, past climacteric, thin, spare body, delicate constitution; anthrax.

Mrs. K., æt. 61, strong constitution, menstruation ceased at age of 52; paralysis agitans.

Mrs. S., æt. 68, strong constitution, suffering eighteen months; ague.

Man, æt. 72, good constitution; abscess back of neck.

Woman, æt. 84, delicate constitution; anthrax back of neck.

[1] **Mind.** Forgetful; when engaged in doing one thing, forgets and neglects others.
Fear of being touched in sensitive places.
Excitable and disposed to fly into a passion.
Rough, angular disposition.
Mind depressed.

[2] **Sensorium.** Vertigo: morning after rising from bed; < when walking, sitting up, or turning head; pulse accelerated, nausea, vomiting of food; > lying perfectly quiet; when going to sleep.

[3] **Inner Head.** Brain feels as if beaten on slightest movement.
Heaviness and fulness in head in morning.
Violent linear pain in small spot over l. eye; pain short, sharp and defined.
Congestion to temples and forehead on awaking in morning; < on stooping, when there is a heavy full feeling.
Sudden rush of blood to head.
While sitting, face red.
Headache on being awakened toward morning.
Congestion to head and nape of neck, followed by weakness, faintness in stomach.

[4] **Outer Head.** Tearing in l. half of head.
Itching in scalp.

Digitized by Google

Red spots, with fine blisters on occiput, neck and behind ears, and on posterior surface of ears.

[5] **Sight and Eyes.** Deposit of chalky-looking white mass on anterior surface of lens. #Cataract.

Pterygium.

Herpes conjunctivæ bulbi; veins enlarged, running horizontally toward cornea, ending in little blisters near edge of cornea; < from crying.

‖Conjunctivitis pustulosa; with eczema impetiginoides on lids and much purulent discharge from eyes; offensive discharge from ears.

‖Scrofulous inflammations; < l. upper lid; lachrymation; itching and pressure in lid.

‖‖Eyelids: thickened, inflamed, covered with pustules; itching; pale, red, œdematous, oozing.

‖A feeling as if lashes of lower lid were turned in.

‖Palpebral swelling of upper lid, l. side; ulceration on outer surface of lid near external canthus; pain < at night.

[6] **Hearing and Ears.** ‖Left ear began to itch, burn and swell; aching and throbbing pain in meatus, followed by a copious, watery acrid discharge.

‖Dull throbbing pain in ears day and night; thin, watery, excoriating discharge.

‖Vesicular eruption on membrana; suppurating and perforating.

Membrana tympani permanently injured and hearing greatly diminished.

‖‖Itching and swelling, with painful throbbing in external meatus; in three or four days discharge of watery fluid smelling like fish-pickle, which causes vesicles wherever it touches; ear is bluish-red, œdematous; hearing impaired.

Sensation as if something suddenly closed in ear, or as if air whistled through l. eustachian tube; when snuffing or belching, air passes through.

‖Waked during night with dull aching deep in r. ear, continued, with great depression of spirits, for three days.

‖Constant rather severe pain deep in r. ear.

A transparent yellowish watery fluid constantly oozed from meatus, which was obstructed by amberlike crusts; discharge offensive, sometimes putrid, but generally of a musty smell like fish-brine; ears itched; outer ear swollen, inflamed; some pustules had arisen wherever discharge had touched any abraded surface of ear or face.

‖A girl, æt. 13; for nearly five years discharge of pus

Digitized by Google

and blood from both ears; frequent attacks of intolerable otalgia; deafness with thunderous roaring in ears; frontal headache and frequent epistaxis.

‖Deaf, with a purulent offensive discharge from ears; bleeding from ear very profuse, provoked by slightest touch on meatus by finger; external ear swollen; bluish-red, shining and studded with vesicles; it exuded a thin watery fluid; whole ear looked as if water-soaked. θAfter scarlatina.

Ulceration in external auditory meatus.

‖Eczema behind ears, with formation of thick crusts; scrofulous conjunctivitis, blepharitis and catarrh of middle ear.

[7] **Smell and Nose.** Fluent coryza, lachrymation and hoarseness when walking in open air, with short cough and pressure in middle of chest under sternum; after being some time in open air it goes away.

Nose dry, then becomes fluent with relief of headache; r. eye becomes hot with profuse lachrymation.

Nose obstructed, must breathe through mouth.

Hawks from posterior nares dried yellowish-red phlegm tasting salty, mornings.

[8] **Upper Face.** Sudden flushes of redness over face.

Twitching in l. facial muscles, l. corner of mouth drawn upward when talking.

‖Ringworms on face; barber's itch.

[10] **Teeth and Gums.** Salivation; gums bleed easily and profusely.

[11] **Taste and Tongue.** Taste earthy, metallic.

Tongue: somewhat swollen; furred white; shows prints of teeth.

[12] **Inner Mouth.** Breath has a garlicklike odor.

Coldness in mouth and pharynx on drawing in air.

Tenacious mucus runs from mouth; a dog.

Copious saliva.

[13] **Throat.** Painful dryness of fauces.

In morning hawking from back of nose pieces of yellowish-reddish phlegm of a saltish taste.

Rough, scratching sensation in throat; < toward evening.

Throat feels sore, with a prickly, rough sensation evening and morning; throat sore on empty swallowing; > after eating and drinking.

Pain in throat extends into ear.

[14] **Appetite, Thirst. Desires, Aversions.** Hungry at night; wants an apple in middle of night.

Longs for beer.

[15] **Eating and Drinking.** Eating or drinking: sore throat disappears.

Google

After meals great drowsiness.
After eating rice was obliged to vomit.

[16] **Hiccough, Belching, Nausea and Vomiting.** Belching, with taste of what has been eaten.
Heartburn, with warmth in stomach as from alcohol.

[17] **Scrobiculum and Stomach.** Sensation of weakness, like faintness, in stomach after local congestion of blood to head and nape of neck, also with chest symptoms.
Fulness in pit of stomach, must lie down after dinner.
Constrictive feeling, as if strapped together.

[18] **Hypochondria.** Fulness and oppression in hypogastrium; her dress must be loosened.
Pressing, first l. then r. side, as from wind.
When lying on l. side, throbbing under r. ribs and vice versa.

[19] **Abdomen.** Pinching in abdomen.
Frequent spasmodic pains in bowels as from incarcerated wind; mostly from 5 to 9 P.M.

[20] **Stool and Rectum.** Passes very offensive flatus.
Passes a large quantity of thread worms.
Spasmodic pains with urging to stool, copious stool with feeling of flatulence in bowels.
Costive.
Tetter on perineum, itching.

[21] **Urinary Organs.** Increased urination.
High-colored, acid urine.
A drop sticking at mouth of urethra.

[22] **Male Sexual Organs.** Increased sexual desire, followed by long-lasting indifference.
A drop of viscid fluid glues meatus urinarius.
Secondary gonorrhœa.
Herpes on scrotum and perineum.

[23] **Female Sexual Organs.** Painful soreness in region of kidneys, extending downward like a weight, mostly to r., and in sacrum; < in morning, making her irritable.
Shooting deep in pelvis across to left.
Menses too early, in climacteric years.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness in morning with fluent coryza, a rough, pressing, tickling sensation in larynx.

[26] **Respiration.** Coughing or laughing increases aching in small of back.

[27] **Cough.** Cough toward morning; after a few days looser.

[28] **Inner Chest and Lungs.** Pain in region of clavicle.
Cutting in l. nipple, across and through to scapula.
Pain in middle of chest: going through to back; from dorsal vertebræ through to sternum; in or behind sternum.
Shooting in l. chest, fifth rib.

Google

Feeling as if some fluid wanted to discharge, pressing downward in middle lobe of r. lung.

For five days, bubbling in middle lobe of r. lung for a few minutes, chiefly in afternoon.

[29] **Heart, Pulse and Circulation.** Dull pain in region of heart when lying on l. side; > lying on back.

Palpitation of heart, with throbbing through whole body, and full pulse, followed by sweat.

[30] **Outer Chest.** Eruption about nipple.

[31] **Neck and Back.** Painful sensitiveness of spine from last cervical to fifth dorsal vertebra; sensitive to pressure and touch.

Weak feeling in back.

Pain in sacrum passing into r. thigh; < pressing at stool, coughing and laughing. θSciatica.

[32] **Upper Limbs.** ‖Offensive smelling perspiration of armpit, smelling like garlic.

Pressing ache in r. scapula, later in left.

Lump in anterior wall of l. axilla, painful from pressure or motion.

Tearing near thumb joint.

Finger tips feel dead on stretching hand.

Rheumatism of r. little finger, < moving finger.

[33] **Lower Limbs.** ‖Sciatica of r. side; < when lying on affected side.

Sciatica accompanied by sensitiveness of vertebral column, pains radiating from sacrum to r. sciatic nerve.

‖Fetid sweating of feet.

‖Tonic muscular contraction of long standing.

‖Contraction of tendons in bends of knees.

Bruised pain in hip joints after walking.

Feet sweaty, mostly on toes.

[34] **Limbs in General.** Sharp quick pains in elbows, ankles and other parts.

Aching all over, mostly in limbs, < r. side and on walking.

[35] **Rest. Position. Motion.** Rest: pricking <.

Lying: vertigo >; on l. side, throbbing under r. ribs and vice versa; on l. side, pain in region of heart, > on back; on affected side, sciatica <.

Sitting up: vertigo; face red.

Stooping: fulness on head <.

Motion: brain feels as if beaten; lump in axilla painful; of finger, rheumatism <.

Turning head: vertigo.

Coughing or laughing: < aching in small of back; < sciatica.

Walking: vertigo, followed by bruised pain in hip joints; aching in limbs.

Google

[36] **Nerves.** Restlessness.
Lassitude and weakness.

[37] **Sleep.** Yawning and belching.
Drowsy after a meal.
Sleepless; restless turning from weariness and bruised feeling.
At night pains all over.
On going to sleep feels as if in air, quick drawing toward feet awakens him.

[38] **Time.** Toward morning: cough.
Morning: vertigo; heaviness and fulness in head; on being awakened, headache; hawking from posterior nares; soreness in region of kidneys <; hoarseness and coryza.
Toward evening: roughness and scratching in throat <.
5 to 9 P.M.: pain as from wind in bowels.
Night: pain in l. upper lid <; waking with dull aching deep in r. ear; hungry; pains all over; itching of pimples <.

[39] **Temperature and Weather.** Open air: fluent coryza and hoarseness.
In cold or cool air: itching <.
Cool breeze: warm sweat.

[40] **Fever.** Chilly, with pains.
Sweat: on face; on spots, with increased itching of these places; after throbbing through whole body; generally warm, while sitting in a cool breeze.

[41] **Attacks, Periodicity.** Day and night: dull throbbing pain in ears.

[42] **Locality and Direction.** Left: sharp pain in small spot over eye; tearing in head; scrofulous inflammation of upper lid; swelling and ulceration of upper lid; inflammation of ear; as if air whistled through eustachian tube; twitching in facial muscles; cutting from nipple to scapula; shooting in chest; lump in axilla; small, red, itching points on hand; foot itches more; herpes between ribs and crest of ilium.
Right: heat in eye with lachrymation; pressing downward and bubbling in middle lobe of lung; pain in thigh from sacrum; rheumatism in l. finger; sciatica; aching in limbs <; herpes above eye.
Right to l.: shooting in pelvis; pressing ache in scapulæ.
Left to r.: pressure in hypochondria.

[43] **Sensations.** Fear of being touched in sensitive places.
As if in air on going to sleep; brain as if beaten; as if lashes were turned in; as if something closed in ear; as if air whistled through l. eustachian tube; as if strapped together in epigastric region; as if fluid wanted to discharge in lobe of r. lung.

Digitized by Google

Pain: in region of clavicle; in middle of chest, through to back; in or behind sternum; in sacrum, extending into r. thigh.
Spasmodic pains: in bowels; with urging to stool.
Violent pain: linear, in small spot over l. eye.
Sharp, quick pain: in elbows, ankles and other parts.
Cutting: in l. nipple through to scapula.
Tearing: in l. half of head; near thumb joints.
Shooting: in pelvis; in l. chest, fifth rib.
Stinging: in skin.
Prickly sensation: in throat; in skin.
Burning: in l. ear.
Aching: in meatus auditorius; deep in r. ear; in small of back; in shoulder blades; of limbs.
Soreness: in region of kidneys.
Bruised pain: in hip joints.
Pinching: in abdomen.
Dull pain: in region of heart.
Constriction: in epigastrium.
Pressure: in l. upper lid; under sternum; in hypochondria; in larynx; in shoulder blades.
Scratching: in throat.
Roughness: in throat.
Bubbling: in middle lobe of r. lung.
Throbbing: in ears; under ribs; through whole body.
Fulness: in head; in pit of stomach.
Heaviness: in head.
Weight: in back and sacrum.
Deadness: in finger tips.
Faintness: in stomach.
Weak feeling: in back.
Tickling: in larynx.
Itching: in scalp; in l. upper lid; in ears; of sweaty places; in pimples; in small, red points; of feet.
Coldness: in mouth and pharynx on drawing in air.
Dryness: of fauces.

[45] **Touch. Passive Motion. Injuries.** Touch: fear of, in sensitive places; provokes bleeding from ear; spine sensitive.
Pressure: lump in axilla painful.

[46] **Skin.** Ringworms: on face; barber's itch; cover whole body, more distinct on lower limbs; on single parts.
Stinging in skin.
Small red pimples, very bright red, and very sharply defined, with minute vesicles upon them, first on lower extremities, then also on upper, most on l. side; they began first on outside of calves and then on inside of forearms, above wrist, and spread from that point, caused

Digitized by Google

very severe itching day and night, but most at night, after going to bed.

On l. hand, small red points shining through skin, which sometimes itch; feet also itch, especially l., as if there were some heat vesicles there.

Little stinging prickings in various parts of skin of whole body, continuing all afternoon and evening and forcing him to rub spot; came on like flea-bites here and there, lasting all day; pricking continued very troublesome at times, principally when at rest, for several weeks, but gradually subsided; a little spot of herpes circinatus made its appearance a few days since, on forehead, perpendicularly above external canthus of r. eye, and about half an inch above brow; it was at first a little cluster of globular vesicles, on an inflamed base, which dried into thin scales and spread by circumference; itches and pricks slightly; the herpetic spot is now circular about half an inch in diameter, and consists of an elevated ring of vesicles, some larger than others, on an inflamed base, enclosing a depressed area of red skin, which desquamates but contains no vesicles, it continues to itch slightly and to furnish successive crops of thin, white scales; troublesome stinging, very annoying, in evening, when sitting still, wandering all over body; a herpetic spot similar to one on forehead made its appearance on l. side, midway between ribs and crest of ilium, accompanied by very troublesome itching which changed to smarting on being rubbed; it forms about three-quarters of a circle and is irregular; there are indications of another spot just above it; stinging in skin succeeded by constant itching of scalp, which requires continual scratching; itching is apparently due to eruption of fine vesicles on a slightly inflamed base, which after remaining a few days dry up and fall off in little white scales; they are most plentiful on occipital scalp, on nape, in borders of hair, and on posterior surface of auricles; this itching has been constant and annoying for a week, and bids fair to continue; spot on forehead is breaking up, there being several gaps in ring, which is now three-quarters of an inch in diameter; just above it another spot has appeared, precisely similar but smaller; eruption has nearly disappeared from head and itching has almost ceased; spot on forehead is no longer to be discerned, skin being scarcely reddened where it existed; new one is slightly increasing and forms about two-thirds of a circle, but not as vigorous as its predecessor; spots on side have disappeared.

Body thickly covered with elevated rings of herpes cir-

Google

cinatus; eruption very marked, especially on lower limbs; vesicles quite perceptible at a glance; rings intersect each other and in some places so crowded as to obliterate specific character of affection; great heat of skin; restlessness; rapid pulse; thirst; headache.
Psoriasis.
Fetid exhalations from body.
Prickling itching all over skin, with papular eruption.
Skin dry, hot.
Itching more in cold or cool air.
Scrofulous eczematous eruption.

[47] **Stages of Life, Constitution.** Boy, æt. 3; herpes circinatus.
Girl, æt. 4; conjunctivitis.
Boy, æt. 9, had scarlatina in infancy, since then suffering; otorrhœa.
Girl, æt. 13, suffering five years; otorrhœa.

[48] **Relations.** Antidoted by: *Nux vom.* (epigastric oppression).
Compare: *Arsen.* (restlessness); *Cepa* (coryza); *Pulsat.* (otitis); *Rhus tox.* (restlessness); *Sepia* (ringworm); *Sulphur, Selenium.*

TEREBINTHINA.

Oil of Turpentine. *A Volatile Oil.*

Obtained by distilling the oleoresinous exudation of various species of pine.

The dilutions are prepared from the alcoholic solution.

Ozonized oil of turpentine, recommended as a prophylactic in malarial and African fevers, is prepared by exposing a quantity of common oil of turpentine, in a partly-filled bottle, for several days to the influence of sun and air, frequently removing the stopper to admit the air and shaking the bottle while so exposed. Take a few drops several times daily on a lump of sugar.

Introduced by Hartlaub; see Hartlaub and Trinks' Annalen, vol. 3, p. 118.

The collection of symptoms published by C. Hering, in N. Am. Jour. of Hom., 1877, is here incorporated.

Inability to concentrate mind.
Inability to think or to work. θNervous headache.
Stupefaction and deep sleep. θUræmia. θFainting.
Slight delirium, stupor and diarrhœa. θTyphus.
Unconscious, followed by inability to concentrate mind.
Dull, languid; > by free micturition.
Maniacal state lasting several days.
Despondency. θNervous headache.
Hypochondriasis.
Worse from being engaged in mental work, dull pressing above l. eye.
Weary of life. θNervous headache.
Suicide by hanging, in two cases followed washing of laces in oil of turpentine and alcohol.
Anxiety on going to bed.
Fears apoplexy; fulness and pressure in head.

[2] **Sensorium.** Slightly drunk for several hours.
Vertigo: sudden, with obscuration of sight; he falls down; latter stage of typhus; and dulness with lassitude; slight, with general chilliness; with nausea and diminished appetite.
Dulness in head.
Tendency to syncope. θNervous headache.
Comatose; can be roused only by shaking out of apparent stupor, but falls immediately into it again.

[3] **Inner Head.** Slight neuralgic headache coming and going all day.
Headache with thirst. θPuerperal peritonitis.
Dull headache with colic.
Headache. θUrethral catarrh.
Pain in head continuous and fixed; chronic, with rare intermissions.
Stitch in forehead as from a knife.
Neuralgic pains going to r. side of head.
Pain dull or shooting, throbbing in top of head or in whole cranium.

Great fulness and pressure in head; she cried, "My head, my head;" apoplexy was feared.

Dull pressing above l. eye; evening while engaged in mental work.

‖Pressing headache in whole head, coming and going, with vomituritio.

‖Intense pressure and great fulness of head; dull headache with violent nosebleed. θSeptic fever. θScarlatina.

‖Sensation as of a band around head.

Contusive headache.

Painful drawing extending from neck to occiput, whence it spread to forehead.

Drawing pain in forehead, extending to hips. θHæmaturia.

Neuralgic and nervous headaches, > by free micturition.

‖Inaction of kidneys, with scanty smoky urine; brain poisoned with unexcreted urea.

⁝Hydrocephalus, acute and chronic.

⁴**Outer Head.** Rending tickling pain in l. temporal region, coming and going, while in bed in evening; rubbing removes it.

⁝Erysipelas capitis.

⁵**Sight and Eyes.** ‖Ciliary neuralgia, with acute conjunctivitis; injection of conjunctiva variable, sometimes excessive, again very moderate, amounting to hardly more than a simple hyperæmia, at no time commensurate with severity of pain; redness, usually dark, especially in later stages, though during height of inflammation may be bright; chemosis; infiltration into cellular tissue of orbit; deep ciliary injection, swelling of lids, photophobia and lachrymation; pupil contracted, dilates regularly, but slowly, under Atropine; tension changeable even within a short time, though more frequently diminished than otherwise; eyeball sensitive to touch; pain excessive and always present; varies from a dull, grumbling, aching, beating, sore pain to a severe sharp darting, almost driving patient crazy, especially severe over and around eye, extending through to occiput on corresponding side, often following course of supraorbital nerve; always < at night and frequently accompanied by severe paroxysms, particularly in early morning, 1 to 3 A.M.; corresponding side of face flushed; scanty high-colored urine; pain in back.

‖Amblyopia potatorum; for eight weeks sight began to grow dim; almost constant dull aching pain in region of kidneys; urine dark-colored and loaded with acid phosphates, sp. gr. 1028; vision $\frac{5}{10}$ in both eyes; fundus normal in appearance.

While walking in open air muscæ volitantes and transient dizziness.

Google

Obscuration of sight.
: Photophobia. θScrofulous ophthalmia.
Pain above l. eye.
| | Episcleritis in l. eye for over three weeks; eye very red, especially at inner side of cornea, where there was a hard bluish-red elevation; intense pain day and night in eye and corresponding side of head; pupil reacted well; urine very dark.
| Rheumatic iritis; frequent desire to urinate, pain in kidneys, burning in urethra, dark urine; suppression of habitual foot sweat.
| Recent adhesion of iris to lens. θPosterior synechiæ.
: Chronic iritis of traumatic or rheumatic origin.
| | In outer corner of each eye ecchymosis of conjunctiva. θPurpura hæmorrhagica.
Chemosis of. l. eye; urine dark-red, like blood, becoming thick after standing, and leaving red adherent sediment; pain across kidneys.
| | Redness of l. conjunctiva, iris sluggish, much pain in and above eye, always < at night, tongue coated yellow at base; on eighth day woke at 1 A.M. with much beating pain in eye, especially at internal canthus, for one hour; now some pain on l. side of head, lachrymation on looking down, eyeball sensitive to touch and very red, especially inner half; sharp darting pains from above r. eye down through eye, and feeling as if sand were thrown violently into eye; urine dark and scanty, with dark sediment; pain in back.
| | Very severe pain over l. eye and in l. temple day and night (had chancre a year ago); for one year no perspiration on l. side of head, while profuse on r.; conjunctiva very red with deep ciliary injection, much lachrymation; some photophobia, aqueous apparently hazy.
| | Sore pain in l. eye, occasionally shooting with much redness of conjunctiva, adhesion of lids in morning, lachrymation in evening; blur before vision, severe pain in back, dark urine.
| Eye dark-red, face red on affected side.
| Inflamed eyes and eyelids.
Half-open, upward turned, or rolling eyes.
Opened his eyes only when swallowing, closed them again at once during sopor.

Hearing and Ears. Hearing affected, voice sounds unnatural, r. ear <; sounding and humming in l. ear as of a seashell; cannot tell where person is who speaks, unless she sees him; talking loud to her is very painful; from r. to l. ear.
Sensation in ears as of striking of a clock.

Digitized by Google

Pains from forehead to r. ear, which feels to her very hot; l. ear feels cold.
Otitis, with enlarged tonsils; granular condition of naso-pharyngeal cavity.
Otalgia of children; during dentition signs of cerebral and abdominal irritation.
Eczema in front of ear tending to affect eyelids.
Sudden stitch in r. mastoid process.

[7] **Smell and Nose.** ‖Violent nosebleed. θAlbuminuria. θTyphus.
‖Passive epistaxis in children.
|Frequent watery coryza, now from one, then from both nostrils.

[8] **Upper Face.** |Spasmodic sensation, but no visible contractions, extending from chin to superior maxillary bones, followed by contusive headache over eyes.
||Drawing in bones, r. side, and forehead.
‖Fulness and flushes in face. θClimaxis. θTyphus.
‖Hot flushes in face, followed by slight sweat. θNeuralgia vaga.
||Earthy color of face, sunken features.
‖Face very pale. θAlbuminuria.
Pale cold face.
‖Erysipelas of face; chronic.

[9] **Lower Face.** Lips cracked and slightly bleeding. θAlbuminuria.
:Lockjaw.

[10] **Teeth and Gums.** ||Drawing in teeth.
:Toothache.
‖Scorbutic affections with hæmaturia.
‖Gums burned every morning, were spongy and painful to touch; brushing sets them to bleeding.
‖Bleeding gums. θAlbuminuria.
Dentition: suppression of urine with convulsions; child wakeful at night, screaming as if frightened, has a staring look, clenches his fingers; twitchings in different parts of body; picking of nose, dry, short cough; aching in limbs and head; burning soreness and interstitial distension of gums; otitis.

[11] **Taste and Tongue.** Tongue: bright or red; coating peels off in patches presenting bright-red spots here and there, or whole substance cleans off simultaneously; dry and red; brown, dry; burning in tip of tongue; elevated papillæ; as if deprived of its papillæ, or as if glazed or varnished.
‖‖Tongue remains dry, with abdominal tension; after cleansing becomes dry again with increase of tympanitis. θTyphoid.

Google

‖‖Tongue does not clean gradually but rapidly and in large flakes, first from middle, leaving tongue smooth and glossy. θTyphoid.

‖Tongue red and glossy. θStomatitis. θEntero-colitis.

‖‖Tongue swollen hard and stiff with violent fever.

[12] **Inner Mouth.** ‖Foul breath. θHelminthiasis.

Burning in mouth.

‖‖Ulcers in mouth.

⁝Mercurial ptyalism; stomacace.

‖In mouth and at angles of lips, ecchymosis, which bleed. θPurpura hæmorrhagica.

‖Stomatitis extending from mouth to anus; tongue very sore, red and glossy, burning like fire; immense tympanitis; no pain; prostration.

[13] **Throat.** ‖‖Scraping, scratching in throat, frequently with coughing in evening.

Burning in throat.

Warmth and scratching in pharynx and stomach.

[14] **Appetite, Thirst. Desires, Aversions.** Hunger and thirst, with debility.

Craving for drink; appetite lessened.

‖Loss of appetite, great thirst. θGastro-enteritis.

‖While engaged in pleasant mental work in evening, after a full satisfying meal, a sudden desire to eat rue.

‖‖Aversion to meat.

[15] **Eating and Drinking.** After eating: sick at stomach; loud rumbling in bowels, while pain in hypochondria disappears.

After a satisfying meal strange appetite.

Pressure in epigastrium as from hasty swallowing.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖‖Eructations rancid.

‖Flatulent; acrid eructations. θHæmatemesis.

Heartburn and waterbrash in evening.

Belching and nausea; > after belching.

‖Nausea: and vertigo; and vomiting.

‖Vomiting of mucus; of yellowish mucus; of food (albuminuria); of blood.

[17] **Scrobiculum and Stomach.** Dull pain in epigastrium.

Pressure as if he had swallowed a bullet which had lodged in pit of stomach.

Slight pressing pain in small spot in epigastrium; > stooping, lying down or taking a deep breath.

Pressure in scrobiculum as from without.

‖Tension and pain about epigastrium, with faintness and a sense of utter prostration or anxiety in this region. θHæmatemesis.

Pinching below pit of stomach, with belching and nausea.

Digitized by Google

‖Burning in stomach and hypochondria.
‖Heat in stomach.
‖Intense burning in stomach, with nausea and vomiting of mucus, bile or blood; copious hemorrhages.
Pressing in stomach turning into slight nausea; > by belching.
Pressing in stomach evening in bed, lying on l. side, preventing sleep; > on turning to r., and passing wind.
‖Gastritis; cannot bear least touch.

[18] **Hypochondria.** Aching and burning in hypochondriac region.
Severe burning pressure in hypochondrium.
⁝Pressing below diaphragm extending from l. to right.
‖Liver can be felt below ribs. θEmphysematous asthma.
⁝Colic from calculi; chronic liver complaints.
Pressing and cutting pains in l. hypochondriac region while sitting, disappearing on moving about.

[19] **Abdomen.** Sensation as if intestines were being drawn toward spine.
Irritability and weakness of bowels. θAlbuminuria.
Anxiety in epigastric region; abdomen fuller than usual.
Fulness as after eating too much.
Heaviness in abdomen after siesta.
Pressure and heaviness in abdomen and passage of flatus.
‖Rumbling, with bellyache and brown stools.
Rumbling and gurgling in abdomen in evening; colic in morning.
‖Feeling of distension in abdomen as from flatus, soon obliging him to rest.
‖‖Meteorismus; excessive tympanitis, abdomen sensitive. θTyphus. θPuerperal disorders.
‖Distension and flatulency; distended abdomen sore to touch. θPuerperal peritonitis.
‖Sensitiveness of bowels. θUterine tumor.
‖Distended abdomen; frequent colic, with constipation.
‖Abdomen tender to pressure.
‖Colicky griping pains in abdomen. θSeptic fevers.
‖Griping, pinching colic, with muco-purulent stools.
‖Pain shooting across bowels from l. to r. and upward.
Colic: with headache; with diarrhœa; with mushy stools.
Constant cutting extending into thighs.
‖Colic with lively motion of intestines and meteorism, after warmth and scratching in pharynx and stomach; anxiety; nausea, rarely vomiting.
Cutting in abdomen, with local distensions as if a hernia would protrude; painfulness in groin.
Cold sensation in abdomen as if exposed.
Coldness in umbilical region.

Google

On lying down umbilical region feels retracted and cold, as if covered by a round cold plate.
Sensation as if intestines were being drawn toward spine.
Pain in umbilicus.
Sensation in abdomen as if diarrhœa would follow.
Burning itching on abdomen.
▮Pain in iliac region. θTyphus.
Groins slightly swollen and painful in evening, while sitting.
▮▮Pains and movements in groin as if hernia would appear, most when, in sitting, thigh is extended; is felt sometimes in r., sometimes in l. groin.
Urging and cutting pain in r. groin.
⁝Strangulated hernia.
Burning itching of skin in r. groin.
▮Effusion of serum into abdominal cavity. θTyphus.
▮Beginning of ulceration of bowels. θTyphus.
▮Ulceration of bowels, increase of tympanitis; tongue gets dry again. θTyphus.
▮Peritonitis and other inflammatory affections of abdomen.
▮▮On sixth day of enteritis, patient almost pulseless; face, hands and limbs cold; great agitation of mind; fear of death; much difficulty of breathing owing to tympanitic condition of abdomen, which was of enormous size, not sensitive, but hard and resonant like a drum; tongue dry, looked as if seared with a hot iron in centre.

[30] **Stool and Rectum.** ▮▮Ineffectual urging to stool.
▮▮Tenesmus; bloody stools. θDysentery.
After flatus passes stomach is relieved.
▮▮With a loose stool immediate cessation of nausea.
Copious and frequent evacuations upward and downward.
Stools of mucus and water; < in morning.
Mushy evacuations, with burning in rectum and colic.
▮▮Copious discharges with burning in anus.
▮Diarrhœa, abdomen tense and tender; tongue dry or moist. θTyphus.
Stools: ▮watery, greenish; mucous and watery; ▮frequent; ▮profuse; ▮fetid; bloody.
Aggravation: in afternoon and evening; in mornings during typhoid fever; during nephritis; from living in damp, dark cellars.
Before stool: colicky pain in abdomen.
After stool: violent burning in rectum and anus; ▮exhaustion; ▮fainting.
▮Intestinal catarrh and diarrhœa. θNephritis.
▮Diarrhœa; prostration excessive; burning in anus.
Soon after sweat, toward morning, a very bad-smelling diarrhœa.

Digitized by Google

‖‖Diarrhœa with tetanic spasms.
‖‖Bilious diarrhœa. θAlbuminuria.
‖‖Sooty stools like coffee-grounds. θHæmatemesis. θPurpura hæmorrhagica.
‖Entero-colitis, with hemorrhages and ulceration of bowels, especially epithelial degeneration; stools of mucus and water. θTyphoid diseases.
‖Constipation. θUterine tumor. θAlbuminuria.
‖‖Constipation with abdominal distension.
‖‖Stools scanty, hard and dry; dark brown.
‖‖Hemorrhages: from bowels; with ulceration; epithelial degeneration; passive.
‖‖On fourteenth day of typhoid fever, profuse diarrhœa of color of prune juice, dark red, showing under microscope a large amount of branlike particles mingled with disorganized blood globules; pieces of linen dipped in it became red; it had a peculiar fetid odor; small coagula in bottom of vessel not firm, but deliquescent; excessive tenderness in l. iliac region, stupor, mild delirium, dry tongue, red at tips, heavily coated at back, subsultus.
‖Hemorrhoids. θUterine tumor.
‖Piles internal, bleeding.
‖Hemorrhage from anus. θTyphus.
‖Burning and tingling in anus and rectum, > by applying cold water.
‖Passes segments of tapeworm; ‖‖ascarides.
‖Worms: with foul breath, choking sensation; dry, hacking cough; burning and tingling at anus, with sensation as if ascarides were crawling about; sometimes with spasms.

[31] **Urinary Organs.** ‖‖Violent burning drawing pains in kidneys. θNephritis. θHæmaturia.
‖‖Pressure in kidneys when sitting, > from motion.
Transient drawing in r. kidney extending into r. hip.
‖Stiff all over; heaviness and pains in region of kidneys.
⁞Neuralgia of kidneys.
⁞Prevents and dissolves renal calculi.
Dull pain and burning in renal region; extending down ureters.
‖Burning during urination.
‖‖Sensation as if he would pitch forward on face when walking; at times loss of sight and diplopia; pain over kidneys when tired; urine a little darker; albumen and blood corpuscles in urine; lids, face and feet swell.
‖‖Renal disease producing dropsy, attack comes on rapidly with pain in lumbar region, urine greatly diminished, loaded with albumen, containing casts of tubes and blood disks. θPost-scarlatinal dropsy.

Google

‖Dropsy dependent on congestion of kidneys; dull aching in renal region; smoky-looking urine.

‖‖Fatty degeneration of kidney (enlargement); general dropsy; limbs enormously swollen, skin deeply pitting on pressure and distended nearly to bursting, could with difficulty move a step; much general muscular weakness; menses absent four months; urine of a deep, smoky opalescent color, sp. gr. 1018, average quantity 30 to 35 ounces in twenty-four hours; on boiling became a nearly solid mass of albumen; blood globules visible under microscope. θBright's disease.

‖‖Albuminuria; early stages when blood and albumen abound more than casts and epithelium.

Girl, æt. 9, scarlatina mild; became languid; vomiting yellow mucus; tongue coated white; attack of lancinating pain in head, would cry out suddenly; > by holding head firmly; face and abdomen swollen; feet not swollen; urine scanty, turbid, dark; albumen abundant. θPost-scarlatinal albuminuria.

Sugar in urine. θDiabetes.

:Suppuration of kidneys and bladder.

‖Affections of kidneys, < from living in damp dwellings.

‖‖Sensitiveness of hypogastrium, tenesmus of bladder.

Spasmodic urging and pressing in region of bladder while sitting; going up in streaks to either kidney; > from exercise.

‖Tenesmus of bladder. θGonorrhœa.

‖‖Violent burning and cutting in bladder, alternating with a similar pain in umbilicus; < at rest; > when walking in open air. θHæmaturia.

Suppression of urine.

Retained urine from atony of fundus vesicæ.

Incontinence of urine; also at night.

‖Catarrh of bladder, particularly in old persons of sedentary habits.

‖‖Cystitis and retention of urine; pressure in region of bladder caused convulsions.

‖‖Man, æt. 62, suffers every year with a sero-purulent discharge from urethra, especially after squeezing a thickish, greenish matter oozes from urethra; some pain after urination, but no swelling; cold drinking after being heated seems to be exciting cause; patient complains of headache, febrile motions, anorexia, etc.

‖Dysuria.

‖‖Burning in urethra, when urinating.

‖‖Strangury; spasmodic retention of urine. θGonorrhœa.

‖‖Frequent urination at night, with intense burning and pain in small of back.

Google

Urine increased. θTyphus.
Smarting in urethra. θGonorrhœa.
Urine: violet odor; fetid; albuminous; scanty; dark; cloudy and smoky, bloody; clear, watery, profuse.
Hæmaturia.
Urine red, thick, scanty. θArticular rheumatism.
Blood in urine, from a cut, extracting a tooth, etc., with bleeders.
Scanty urine dark, sometimes bloody; containing albumen, cylindrical coagula, renal elements, oxalate of lime. θAlbuminuria.
Urine highly charged with blood, especially if it is bright and passing in very small quantities. θAlbuminuria.
Urine black, with coffee-grounds sediment. θLiver complaint.
Urine contains blood after scarlatina.
Dull pain in lumbar region and across middle of abdomen; pulse 100, firm, not large; urine resembles port wine in color, in a spoon looks quite clear, almost black on looking down upon it in a chamber vessel; it coagulates very strongly by heat; tongue foul; appetite and sleep disturbed. θHæmaturia from kidneys.
Few months previous to birth of child, now 1 year old, had unusual pain in back, renal region and down ureters into bladder, urine very dark and of strong odor, depositing a black sediment; emaciation, anæmic appearance as of having lost much blood, weakness, exhaustion on walking a short distance; after going up stairs, palpitation, dyspnœa, throbbing in head; skin very pale and had an unhealthy feel; flushes of fever in afternoon followed by profuse night sweats; constipation; tongue pale and flabby; urine dark, almost black when first emitted, depositing a sediment amounting to nearly one-twelfth of its quantity, and black as coal; urine not much below its normal amount, looked smoky. θChronic passive hemorrhage from kidneys.
On standing urine deposits a reddish-white sediment.
Urine deposits a slimy, thick, muddy sediment. θVesical catarrh.
After scarlatina: passes small quantities of dark, sweet-smelling urine, turbid and having a sediment like coffee-grounds; sometimes mind dull, or patient drowsy, even in a stupor; dropsy; urine, though rich in albumen and blood, contains but few if any casts.

Male Sexual Organs. Spermatorrhœa in a man æt. 25; no bad habits; urine turbid and had a yellowish mucous sediment.

Tearing pain in os pubis.
Feels as if symphysis pubis were suddenly forced asunder.
Transient burning in posterior part of r. testicle.
Spasmodic drawing in l. testicle and along cord.
Cutting drawing from ring into l. testicle; passes off on stooping.
▮Chordee; gleet. θGonorrhœa.
▮Gonorrhœal rheumatism.
▮Gonorrhœa with strangury, tenesmus of bladder, smarting in urethra; painful urination every ten minutes, relief by micturition.

[23] **Female Sexual Organs.** ⁝Ovarian dropsy.
▮▮Terrible burning in uterus, with great bearing-down pain; caused great heat all over her; craves drink; inward heat; abdomen fuller than usual.
▮▮From wearing tight corsets peritonitis after confinement. θUterine tumor.
▮Uterine diseases after wearing supporter of uterus. θTraumatic erysipelas.
▮Fibroid enlargement of uterus; bloody, offensive leucorrhœa; burning in uterus; pain at crest of ilium, < from motion or least jar in walking or riding; menorrhagia, black blood.
▮Uterus and ovaries very painful.
Drawing in thighs, and colic as if menses would set in, a week after she had had them.
⁝Menorrhagia; leucorrhœa; herpes labialis.
▮Menses two days late and scanty, with disturbed menstrual function, or during climaxis. θNeuralgia vaga.
▮During climaxis: neuralgia; flushes; sweat; pains.

[24] **Pregnancy. Parturition. Lactation.** During pregnancy. θNeuralgia.
⁝Abortion.
▮▮Burning and bearing down in uterus, and burning urination.
▮▮Metritis and peritonitis puerperalis, with tendency to mortification; lochia checked, terrible burning in uterus, abdomen fuller than usual; headache with thirst; brown dry tongue, nausea and vomiting; distended abdomen, sore to touch; pulse small, frequent, with general debility.

[25] **Voice and Larynx. Trachea and Bronchia.** Respiratory tract dry, mucous membrane feels hot and congested.
Burning in air passages, with thin expectoration, very difficult to detach.
⁝Bronchial catarrh of aged with muco-purulent sputa.
▮Secretion of bronchial mucous membrane greatly in-

Google

creased, with spasmodic convulsive cough; herpes labialis, heavy substernal pain, and tickling in trachea, as at commencement of bronchitis; phlegm streaked with blood.

; Membranous croup.

[26] **Respiration.** ‖Short breathing; difficult respiration as from congestion of lungs.

‖Difficult breathing for six months; < from motion. θEmphysema.

▮Dyspnœa all night, propped up in bed, scarcely able to breathe. θAlbuminuria.

Choking sensations. θWorms.

‖Sits erect, breathes rapidly, cannot expand chest, abdominal respiration; > by a deep breath.

With stupefied condition, restless; unequal breathing, now heavy, then quick, at times interrupted as if it would cease.

[27] **Cough.** Cough as if a foreign body had entered windpipe, with a spasmodic inspiration similar to pertussis, but with interruptions, finally all inspirations ceasing.

Cough with a bloody expectoration, without pain in chest.

▮Bronchial catarrh with spitting of much phlegm.

Dry cough, no expectoration or blood-streaked sputa.

▮Dry hacking cough. θWorms.

Dry cough, < on lying down after eating.

‖Copious mucous sputa. θAlbuminuria.

▮Bloody expectoration. θTyphus.

▮Great distress and restlessness, followed by hæmoptysis.

▮Dangerous bronchial symptoms in cases of typhus.

‖Frothy sputa.

[28] **Inner Chest and Lungs.** After spasmodic cough with loss of breath, a very pronounced or long-lasting soreness in lower part of chest.

Pressing pain behind sternum.

‖Warm drinks cause in their descent pain in sternal region, with tenderness to touch; pain is somewhat burning.

Burning in chest along sternum.

‖Distension of air vessels to highest degree; apex of heart is felt beating in pit of stomach; heart and liver pushed down; loses his breath from least exertion, avoids even walking. θEmphysema.

▮Typhoid pneumonia; unbearable burning and tightness across chest, with great dryness of mucous membranes or profuse expectoration; hepatization of lungs; moist crepitating râles in upper or middle lobes; entire posterior inferior region of r. side of chest dull on percussion; pulse intermitting, irregular; great prostration.

Digitized by Google

‖Capillary bronchitis, child drowsy, lungs all clogged up; urine scanty, almost dark from admixture of blood.
‖‖Bronchial catarrh and pneumonia in typhus.
‖In upper or middle parts of chest, moist crepitating râles; l. side same, but slighter. θAlbuminuria.
‖Effusion of serum into pleural cavity. θTyphus.
‖‖Hemorrhage from lungs.
‖‖Hæmoptysis; great distress and restlessness before hemorrhage, and immediately relieved by it.

[30] **Heart, Pulse and Circulation.** Palpitation with irregular pulse on going to bed.
Organic diseases of heart and large vessels. θMorbus Brightii.
Pulse: intermitting, irregular on going to bed, with great weakness; increased in force and frequency; feeble or rapid; slow, in diarrhœa (typhus); small, with general debility; 130 to 140 (puerperal peritonitis); small, wiry (typhus); thready and scarcely perceptible.

[31] **Outer Chest.** Burning in chest along sternum, gradually spreading over whole chest; passes off with stitches through nipples; after a warm drink.
Stitching in l. pectoralis major.
Muscular stiffness; contraction of muscles of thorax.

[32] **Neck and Back.** Pressing pain in back, comes up between shoulders, is felt as a throbbing.
Drawing in back while sitting down in evening.
Drawing in back and lumbar muscles, with lassitude on exercising in open air.
‖Backache and soreness in kidney affections.
Severe pains in lumbar region, with fever.
‖‖Severe rheumatic pain in lumbar muscles, contracted by removing his flannels too soon; impossible for him to stoop or lie upon back; pains sharp, rendering motion, when not in an erect position, intolerable.

[33] **Upper Limbs.** Drawing in bones of upper arm in morning.
Pain as if sprained in muscles of l. upper arm.
Hands trembling, with debility.
Neuralgia brachialis or subscapularis.

[34] **Lower Limbs.** Insensibility of extremities, particularly lower.
‖Lumbago; ischias.
Pain going from hip to forehead; or from kidneys.
Drawing tearing in r. hip joint.
Neuralgia of hips.
Drawing along thighs.
‖Sciatica, in rheumatic patients; urinary symptoms.
‖‖Erythema on thighs and body resembling scarlet rash.
Pain in groins extending to thighs.

Google

Contracting spasms of thigh muscles during remission of neuralgia.

‖Swelling and stiffness of r. knee, with pain in calf, and swelling of vastus externus.

Profuse sweat on legs evenings in bed.

‖Intense neuralgia in lower limbs, especially in damp weather.

‖Tearing in feet now here now there; principally in soles and heels. θNeuralgia vaga.

‖Legs œdematous. θAlbuminuria.

Staggering gait, as if drunk.

[34] **Limbs in General.** ‖Numbness of limbs. θNervous headache.

Heaviness in limbs.

Nerves of limbs, particularly lower, exceedingly sensitive.

Intense pain along larger nerves.

‖Limbs enormously swollen. θAlbuminuria.

Coldness of extremities.

Limbs hanging loosely without motion.

[35] **Rest. Position. Motion.** Stands with feet far apart; cannot balance body.

Lying: umbilical region feels retracted and cold; > pain in epigastrium; on l. side pressing in stomach; cough <.

Sitting: pain in l. hypochondrium; groins painful; pressure in kidneys; urging and pressing in bladder; drawing in back.

Stooping: pain in epigastrium >; > pain in l. testicle.

Motion: > pain in hypochondrium; > pressure in kidneys; pressure in bladder >; < pain at crest of ilium; < difficult breathing.

Walking: in open air muscæ volitantes and dizziness; sensation as if he would pitch forward; emphysema <.

[36] **Nerves.** Tired feeling.

‖‖Intense pains along tracks of large nerve trunks.

‖Violent neuralgia in course of supraorbital nerve.

‖‖Sudden twitching of limbs as from electric shock. θNeuralgia vaga.

‖Shooting pain, like lightning or heavy beating, squeezing.

‖‖Crawling tingling, with a feeling as if asleep or of heaviness. θNeuralgia.

‖Neuralgia with a sensation of coldness in nerve, occasionally like hot water running through a tube.

‖Prostration, with cold clammy sweat and thready, almost imperceptible pulse.

‖Great prostration with unusual loss of flesh. θTyphus.

Has no power of balancing body, stands with feet far apart (after large doses for tænia).

Great weakness. θLiver complaint.

‖Tendency to syncope. θNervous headache.
‖Bodily weakness increases rapidly. θPurpura hæmorrhagica.
‖General debility. θAlbuminuria. θNeuralgia vaga.
Nervous and muscular weakness; want of sensibility.
⁝Paralysis; paraplegia.
Occasional subsultus.
⁝Puerperal convulsions from uræmic poisoning.
‖Uræmic spasms in albuminuria, with great prostration.
Spasms. θHelminthiasis.
⁝Tetanic spasms; lockjaw.
⁝Chorea; epilepsy.

[37] **Sleep.** ‖Somnolency. θTyphus. θScarlatina.
Cannot go to sleep, tosses in bed.
Sleep prevented by pain in stomach.
Sleepless, excitable; skin hot.
Nightmare wakens him as he drops off to sleep.
‖‖Habitual dreams.

[38] **Time.** Toward morning: offensive diarrhœa.
Morning: gums burn; colic; stools of mucus and water; drawing in bones of upper arm.
Evening: dull pressing above l. eye; scraping in throat with cough; desire to eat rue; heartburn and waterbrash; rumbling in abdomen; groins swollen and painful; in bed sweat on legs.
Night: ciliary neuralgia <, particularly 1 to 3 A.M.; pain in eye <; child wakeful, dentition; frequent urination; incontinence of urine; dyspnœa; nightmare.

[39] **Temperature and Weather.** Damp dwellings: kidney affections <.
Damp, dark cellars: diarrhœa.
Damp weather: neuralgia in legs.
Cold water: > burning in anus.

[40] **Fever.** ‖Rigors followed by feverish heat through whole body; headache, red face. θBright's disease.
Violent coldness with restless tossing about.
Violent chill, cold limbs, trunk hot.
‖After a strong chill violent pain in abdomen. θPeritonitis puerperalis.
Chilliness.
‖Irregular chills and flushes of heat. θHæmatemesis.
Coldness and chill in abdomen.
‖‖Great heat; inward heat.
Great heat all over from uterine pain.
‖Skin hot and dry; diarrhœa. θTyphus.
‖Fever with violent thirst; face red; mucous surfaces feel dry; pulse hard and frequent; profuse sweat, excessive prostration.

Google

Suddenly checked sweat. θNeuralgia.
Cold clammy sweat all over body. θToxæmic fevers.
Typhoid fever; excessive tympanitis; languor and prostration; frequent loose stools; copious hemorrhages from bowels with ulceration of Peyer's glands; muttering delirium; toward end of second week bright-red tongue, smooth and glossy, as if deprived of its papillæ; vertigo, fulness and flushes of face; pain in iliac region or all over abdomen on pressure; thick scanty urine with mucus and disintegrated blood corpuscles; fetid urine and stools; diarrhœa, stools intermixed with blood, small wiry pulse; hemorrhages from nose and anus; bloody expectoration; profuse serous effusions in pleural and abdominal cavities; great prostration and emaciation.
Typhus; stupor; delirium, subsultus tendinum; contracted pupils; dry tongue; meteorism; bloody stools; tongue becomes dry about middle or toward close of second week.
Typhoid pneumonia.
Malarial and African fevers.*

Attacks, Periodicity. Spreading gradually: burning in chest.
All day coming and going: neuralgic headache.
Day and night: pain in eye.
Lasting several days: maniacal state.
For eight weeks: sight dim.
Four months: menses absent.
For six months: difficult breathing.
During climaxis: neuralgia; flushes; sweat; pains.

Locality and Direction. Left: pressing above eye; rending tickling in temporal region; episcleritis; chemosis of eye; redness of conjunctiva; sore pain in eye; humming in ear; ear feels cold; pressing and cutting in hypochondrium; tenderness in iliac region; drawing in testicle and cord; râles in chest; stitches in pectoralis major; sprained pain in arm.
Right: neuralgia in head; darting from above eye through eye; perspiration on head, none on l.; hearing <; pain from forehead to ear; stitch in mastoid process; drawing in bones of head; pain in groin; itching of skin in groin; drawing from kidney to hip; burning in posterior part of testicle; pneumonia; drawing tearing in hip joint; swelling and stiffness of knee; erythematous eruption on foot.

*Ozonized oil of turpentine, a few drops on sugar, several times a day (see Introduction), is recommended as a prophylactic.—Hg.

Left to r.: pressing below diaphragm; shooting in bowels.
Right to l.: affection of hearing.
Upward: shooting in bowels.

[c] **Sensations.** As if he would pitch forward on walking; as of a band around head; as if sand were thrown violently in eye; as of a seashell sounding in l. ears; in ear as of striking of a clock; as from hasty swallowing in epigastrium; umbilical region as if covered with a round, cold plate; as if he had swallowed a bullet, which had odged in pit of stomach; a sense of anxiety and utter prostration about epigastrium; as if intestines were being drawn toward spine; as if abdomen were distended with flatus; in abdomen as if diarrhœa would set in; as if inguinal hernia would appear; as if symphysis pubis were suddenly forced asunder; as if a foreign body had entered windpipe; as from electric shocks, twitching of limbs; crawling tingling as if parts were asleep; as if hot water were running through a tube in nerve.

Pain: above l. eye; in umbilicus; in groins; in kidneys; in lumbar region; at crest of ilium; in uterus and ovaries.

Severe pain: over l. eye and in l. temple; in lumbar region.

Intense pain: in eye and side of head; along tracks of large nerve trunks.

Neuralgic pains: in head; in kidneys; tracheal, or subscapular; in hips; in lower limbs; along larger nerves; supraorbital.

Lancinating: in head.

Cutting: in l. hypochondriac region; from abdomen into thighs; in r. groin; in bladder; in umbilicus; from ring into l. testicle.

Stitches: in forehead; in r. mastoid process; through nipples; in l. pectoralis major.

Darting: ciliary neuralgia; from above r. eye through eye.

Shooting: in top of head; in l. eye; across bowels from l. to r. and upward.

Tearing: in os pubis; in r. hip joint; in feet, soles and heels.

Griping: in abdomen.

Sprained pain: in muscles of l. upper arm.

Rheumatic pain: in lumbar muscles.

Dull grumbling pain: ciliary neuralgia.

Pinching: below pit of stomach, in abdomen.

Scratching: in throat; in pharynx and stomach.

Smarting: in urethra.

Burning: in gums; in tip of tongue; in mouth; of tongue like fire; in throat; in stomach and hypochon-

Digitized by Google

dria; on abdomen; of skin in r. groin; in rectum and anus; in kidneys; in bladder; in umbilicus; in urethra; in small of back; in posterior part of r. testicle; in uterus; in air passages; across chest; along sternum.
Burning pressure: in hypochondrium.
Pressure: in head; in epigastrium; below diaphragm from l. to r.; in pit of stomach; in stomach; in l. hypochondriac region; in abdomen; in kidneys; behind sternum; in back, comes up between shoulders.
Urging pain: in r. groin; in region of bladder.
Drawing: from neck to occiput, thence to forehead, from forehead to hips; in bones of head; in teeth; in kidneys; in r. kidney to hip; in l. testicle and along cord; in thighs; in back; in lumbar muscles; in bones of upper arm; in r. hip joint; along thighs.
Aching: in limbs and head, during dentition; in hypochondria.
Dull aching: in region of kidneys; in renal region.
Dull pain: in epigastrium; in renal region, down ureters.
Sore pain: in l. eye; in gums; in lower part of chest.
Contusive: headache.
Dull pressing: above l. eye.
Bearing down: in uterus.
Rending tickling: in l. temporal region.
Beating pain: in eyes.
Throbbing: in top of head; between shoulders.
Spasmodic sensation: from chin to superior maxillary.
Choking: from worms.
Fulness: in head; in face; in abdomen.
Heaviness: in abdomen; in kidneys; in limbs.
Tightness: across chest.
Tension: about epigastrium.
Tingling: in anus and rectum.
Numbness: of limbs.
Tickling: in trachea.
Itching: on abdomen; of skin in r. groin.
Heat: in stomach.
Coldness: in abdomen; in umbilical region; in nerve.

"**Tissues.** Passive hemorrhages.
‖Fresh ecchymoses in great numbers from day to day.
‖‖Purpura hæmorrhagica.
‖Scorbutic affections with hæmaturia; earthy color of face, sunken features; exhaustion and debility.
Increases number of colorless blood corpuscles (probably by causing hyperæmia of lymphatic glands).
‖‖Congestion and inflammation of viscera; kidneys, bladder, lungs, intestines and uterus.
‖Mucous membranes dry, burning; later secretion of mucus which may be blood-streaked.

Digitized by Google

‖Joints swollen stiff; pain on motion. θRheumatism.
‖Dropsy with kidney affections; associated with great prostration.
‖General dropsy dependent upon degeneration of kidney, probably granular.
‖Legs and body œdematous. θAlbuminuria.
‖‖Ascites with anasarca.
‖General dropsy. θAfter pleurisy. θAlbuminuria. θScarlatina.
‖Emaciation. θLiver complaint. θBright's disease. θTyphus.
¦Atonic gout; rheumatism and gout; asthenic inflammation; passive hemorrhages; purpura hæmorrhagica; burns; hospital gangrene; cold gangrene; hydrophobia; gangrenous wound from bite of a dog; wounds of skin, tendons and nerves; dissection wounds; old ulcers.
¦Chian turpentine is said to destroy cancer cells, leaving vessels to become atrophied, acting on periphery of growth with great vigor, causing its speedy disappearance, and entire cessation of pain in a few days.
Gangrene; locally on lint.
Corns (locally).

"**Touch. Passive Motion. Injuries.** Touch: eyeball sensitive; gastritis <; tenderness in sternal region.
Pressure: in region of bladder caused convulsions.
¦Traumatic iritis; dissection wounds, etc.
‖Purpura hæmorrhagica.
Injuries to kidneys from falls.
‖From a cut or extracting a tooth; bleeding; hæmaturia. θPurpura hæmorrhagica.

"**Skin.** ‖Pulse 67 to 70; skin dry; tongue thickly coated with sordes and dark blood; blood oozing from its side and under surface as well as from gums and whole mucous lining of mouth, palate, tonsils and fauces; three isolated phlyctenæ of size of a large lima bean, resembling thrombi, on r., and one on l. inner surface of cheek, which was very prominent and from which dark blood oozed freely; blood passed per anum without fecal admixture; urine contained black, ropy blood which constituted about three-fourths of its entire quantity; ecchymotic spots on petechiæ were very numerous on upper and lower extremities, and were increasing in number; *Phos.* without effect. *Tereb.* 6th cent., cured. θPurpura hæmorrhagica.
‖Lower limbs and abdomen covered with black and blue spots, from size of a pin-head to that of a pea; chest, arms and face not so thickly spotted; nose bled continually for five days and nights; blood very thin, dark;

Digitized by Google

very distressing, weak, sore feeling all through body; pure blood from bladder with burning. θPurpura hæmorrhagica.

‖Pitting deeply on pressure. θAlbuminuria.

‖Skin warm and moist, diarrhœa. θTyphus.

Eruption of pale-red, round and elevated blotches; at first isolated, later confluent; these vesicles appear with fever and itching.

Erysipelas bullosa; here and there yellow vesicles with large red areola turning bluish-black; tendency to gangrene.

Erythema resembling scarlet rash, spreading over thigh and greater part of body (after external applications to r. knee for rheumatism), for a few hours parts swelled rapidly, assuming a look like erysipelas vesiculosa.

Erythematous, scrofulous, even vesicular eruptions, analogous to those appearing after eating shell fish.

Burning pains, irritation and fever, no sleep, no appetite; later desquamation.

‖‖Scarlatina, especially when kidneys are involved, with stupor; bloody, smoky urine. θDropsy.

Scarlatina eruption slow in appearing.

Chronic icterus.

Scabies; pityriasis of old people.

‖Erysipelas of face and lower leg.

Eruption in spots, often about noon, or after vomiting.

Erythematous eruption resembling scarlet rash, passing from affected knee down to ankle joint, afterward appearing in chest and r. foot, spreading over better portion of body.

A girl wore long gloves cleansed with turpentine; in half an hour violent itching of skin as far as covered by gloves; intense redness spread over hands and arms, with innumerable vesicles filled with transparent lymph, many of them becoming confluent, forming blisters resembling pemphigus; increasing pain and fever; affected skin peeled off.

⁝Parasitic affections of skin.

Stages of Life, Constitution. Children: nosebleed, worms.

Bleeders.

‖Nervous women, amenorrhœa; dysmenorrhœa; headache.

Complaints of old people; people of sedentary habits, catarrh of bladder.

Chronic rheumatic and gouty complaints.

Girl, æt. 9, after scarlatina; albuminuria.

G. G., æt. 20; purpura hæmorrhagica.

Mrs. C., æt. 22, wife of a clergyman, mother of one child; hæmaturia.

THERIDION CURASSAVICUM.

Orange Spider. *Araneidæ.*

A small spider known to people as very poisonous, chiefly found in the island of uraçoa.

This spider, about the size of a cherry stone, is found upon orange trees in the West Indies. When young it is velvety-black in appearance, marked with antero-posterior lines composed of white dots; on posterior part of body there are three orange-red spots, while upon belly there is a large square yellow spot.—Am. Hom. Pharmacopœa.

The alcoholic tincture is prepared from the live spider crushed.

Introduced and proved by Hering in 1832; symptoms printed in Stapf's Archives, vol. 14, p. 157.

Clinical Authorities.—*Vertigo,* Cochran, Hah. Mo., vol. 5, p. 24; *Affection of head,* Berridge, A. J. H. M. M., vol. 4, p. 84; *Nasal catarrh,* Korndoerfer, Hah.

[1] **Mind.** Time passes too quickly.
Talkative, inclined to mental exertion; hilarity.
Want of self-confidence. θHysteria.
Great aversion to work; especially to his usual avocation.
Great depression during headache; weeping during toothache.

[2] **Sensorium.** Vertigo: with nausea even to vomiting; < from stooping, from least movement; ▮on closing eyes; on board a vessel; from every noise or sound; with cold sweat; awakes from sleep at night, at 11 o'clock; with slow pulse.
It feels so thick in her head as if it were another strange head; nausea and vomiting on least movement, particularly on closing eyes.
❙❙Vertigo with blindness caused by pain in eyes.
❙❙Whenever she closes her eyes she is afflicted with nausea and vertigo, < by noise and motion.

[3] **Inner Head.** ❙❙Violent frontal headache with throbbing extending into occiput.
▮Violent frontal headache with heavy dull pressure behind eyes.
❙❙Heavy pressure on head; pressing downward. θHysteria.
▮Headache on beginning to move.
❙❙Headache which she cannot describe or make clear to herself.
❙❙For fourteen days feeling as if vertex did not belong to her; it felt as if separated from rest of head, as if she could lift it off; felt she would like to remove it.
❙❙Headache deep in socket of eyes, < in l. eye; head feels thick. θHysteria.
▮Sunstroke.
It feels so thick in her head as if it were another strange head, or as if she had something else upon it.
Head very much oppressed and heavy.
Oppression and fulness behind ears.
❙❙Headache behind eyes.
Headache like a pressing band in root of nose and over and around ears.
Pressing together in temples.
Stinging in l. temple.
❙❙Suddenly in morning pressing pain over l. eye, < by slightest motion, talking; sickness of stomach with

Digitized by Google

retching; > from drinking warm water; bowels open twice with colic and flatulency, after which head is <.

‖Throbbing over l. eye and across forehead; also in a slight degree in r. eye, with sick stomach, particularly on rising from a reclining position, like seasickness.

Head internally hot, oppressed and heavy; at same time joyousness and singing.

Evenings while walking is attacked with general headache with great depression.

Owing to pains deep in brain she must sit or walk; it is impossible to lie.

‖Headache with nausea and vomiting like seasickness, and shaking chills. θClimacteric period.

[4] **Outer Head.** Itching on scalp.

Itching on head and nape of neck, in evening.

[5] **Sight and Eyes.** ‖Flickering before eyes in frequent paroxysms, even when closing eyes; like a veil before eyes; she must lie down. θHysteria.

Sensitive to light; things look double; fluttering, nausea and cold hands.

‖Dizziness and confusion of vision, everything went together, and became indistinct. θHysteria.

‖Hard, heavy dull pressure behind eyes.

‖Twitching in r. eye.

On awaking, burning pain, internally, above inner canthus.

‖Sensitiveness to light; when in light she experiences a dark sparkling before eyes; everything appears double, and through this fluttering nausea is created; cold hands; long afterward dares not stoop.

πNausea while closing eyes; changed into nausea when opening eyes (relieved by *Moschus*).

‖On closing eyes nausea and vomiting.

[6] **Hearing and Ears.** ‖Worse from least noise, every shrill sound and reverberation penetrates her whole body, especially teeth, makes vertigo <, and causes nausea.

Rushing in both ears like a waterfall; roaring.

‖Itching behind ears; would like to scratch them off.

Pressure above ears; fulness behind ears.

[7] **Smell and Nose.** Sneezing; watery discharge, < in evening.

‖Chronic, offensive-smelling discharge, thick, yellow or yellowish-green. θNasal catarrh. θScrofulous ozæna.

Pressure in root of nose and heaviness.

Nose dry as if too much air passed in; itching in nose.

Paroxysms of frequent violent sneezing, and frequent necessity of blowing nose; heaviness deep in upper nose.

[8] **Upper Face.** Face pale.

[9] **Lower Face.** In morning on awaking and sometimes at other times of day, lower jaw is immovable. θTetanus.

Digitized by Google

Froth before mouth with shaking chill.

[10] **Teeth and Gums.** ||Cool water affects teeth as if too cold.
|Every shrill sound penetrates teeth.
Toothache in afternoon and evening causes weeping.
Burning, tensive pain in teeth, gums and palate.
Soreness of gums.

[11] **Taste and Tongue.** Mouth feels furred, benumbed; no proper taste; tongue as if burned.
||Salty taste, hawking of salty mucus.

[13] **Inner Mouth.** Mouth feels numb or slimy.
Foam at mouth during chill.
Mouth and nose feel too dry; as if too much air were passing into mouth.

[13] **Throat.** Sore throat; chilly; bones sore; difficult swallowing; constipation; urine scanty and high-colored.

[14] **Appetite, Thirst. Desires, Aversions.** Desire for wine, brandy, tobacco and acidulous fruits and drinks.
||Much thirst.
||Desire for food, does not know what to eat; craves oranges and bananas. θHysteria.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea: with headache; on rising in morning; from sounds; with vertigo; on closing eyes; like seasickness; from sparkling before eyes; when gazing steadfastly on an object; on motion; from talking; from fast riding in a carriage.
A woman having had in childbed a violent spell of sickness at end of first week and apparently recovered, was, in third week after washing clothes, suddenly attacked by nausea and vomiting; after it very pale and sick at stomach as soon as she closed her eyes, with vanishing of thoughts.
||Nausea increased to vomiting during vertigo.
|Nausea and vomiting like seasickness, with headache.
Vomiting: from vertigo, on least motion; first of slimy, acrid water, then ineffectual retching; of bile in morning; of bile at 4 A.M., chronic consumption, cough.
||Nausea and retching > by drinking warm water.
|Seasickness of nervous women; they shut their eyes to get rid of motion of vessel, and grow deathly sick.

[17] **Scrobiculum and Stomach.** ||Sensitiveness of region of stomach and epigastrium.

[18] **Hypochondria.** ||Violent burning pain in hepatic region < from touch; retching, bilious vomit.
|Abscess of liver; vertigo and nausea.
||Anthrax of sheep, with great tumefaction of hypogastrium and great thirst.

[19] **Abdomen.** Pain in groins, after coitus.

Pains in region of groin on motion; when she draws up her leg it seems as if some one tapped her hard on groin.

[30] **Stool and Rectum.** Small, soft stool daily, with much straining.

Diarrhœa without colic, with vomiting and vertigo at night.

Spasmodic contraction of rectum and anus.

‖Bowels open twice with colic and flatulency, after which headache is <.

‖Heaviness in perineal region noticeable at every step; it seems to him as if a lump were lying there.

[31] **Urinary Organs.** Increased urination.

Has to get up four or five times at night to pass water, does not pass much during day.

[32] **Male Sexual Organs.** Sexual desire lessened; weak erection during coition; after coitus, pain in groins.

Seminal emission during siesta, with great force.

Small red spots upon glans.

Scrotum very much shrivelled.

[33] **Female Sexual Organs.** ‖Hysteria: during puberty; at climaxis.

Menses omitted more than ten weeks in a woman in climacteric years; gave birth to a son in following year.

‖Bruised sore pain in both ovarian regions, < from motion and pressure; pain in lower part of abdomen, like labor pains, with sensation as if a child were bounding in body; tickling in both sides. θHysteria.

[36] **Respiration.** Increased inclination to take deep breaths, to sigh.

‖Difficulty in breathing on going up and down stairs. θHysteria.

[37] **Cough.** Night cough.

[38] **Inner Chest and Lungs.** Violent stitches in chest beneath l. shoulder through to throat.

‖Phthisis florida, in beginning.

Pinching stitches in l. pectoral muscle.

Pressure as if something in œsophagus were slipping toward epigastrium, taking away breath for a few moments.

[39] **Heart, Pulse and Circulation.** ‖Anxiety about heart; sharp pains radiate to arm and l. shoulder. θClimaxis.

‖Pulse slow with vertigo.

[41] **Neck and Back.** Itching in nape of neck, at edge of shoulder and on back.

Pain between shoulders.

‖Spinal irritation; great sensitiveness between vertebræ sits sideways in a chair to avoid pressure against spine.

‖Could not bear least noise, and jar of foot on floor was

so aggravating that it made her cry out. θSpinal irritation.

[32] **Upper Limbs.** Stinging pain from elbow to shoulder.
Violent burning itching on inner and upper part of l. ring-finger; spot becomes very red, soon disappears.
Small hard pimple beside ball of thumb.

[33] **Lower Limbs.** Itching and nodes on nates.
In evening, while sitting, and later, peculiar drawing in r. thigh; it began in hip and passed downward with a cold sensation below knee; it felt everywhere cold, internally, but not to touch; external warmth was agreeable.
Little toe pains as if pressed in walking.
Violent itching on calf.
Swelling of feet.

[34] **Limbs in General.** Pains in bones as if broken, as if they were about to fall asunder.
Heaviness in limbs before chill.

[35] **Rest. Position. Motion.** Lying: impossible, pains deep in brain; must lie down with flickering before eyes.
Sitting: drawing in r. thigh.
Stooping: < vertigo.
On rising: sick stomach <.
Drawing up leg: as if some one tapped her on groin.
Motion: least, vertigo <; < headache; pain over l. eye <; nausea <; vomiting <; pains in groin; pain in ovarian regions.
Walking: headache with depression; little toe pains; sweats easily.
After every exertion: fainting.
Going up and down stairs: dyspnœa.
After washing clothes: nausea and fainting.

[36] **Nerves.** ‖Every shrill sound and reverberation penetrates through her whole body, particularly through teeth, and increases vertigo, which causes nausea.
‖Hysteria during puberty and in climacteric years, and from spinal irritation; is sensitive to light, faints after every exertion, and has weakness, trembling, chilliness and anxiety; restless, must busy herself about something, though nothing gives her pleasure; great sensitiveness to noise and sensitiveness between vertebræ, sits sideways in a chair to avoid pressure.
‖From washing clothes in third week after confinement, attack of fainting.
πCould not move hands or feet; sitting with feet crossed, could not uncross them; head bent down on chest; eyes partially closed, could not move any part of body; looks and feels as if dying, but hears and understands all that is said. θHysteria.

Digitized by Google

Great lassitude and debility as if from great losses of blood. θAnæmia.
Tetanus.

[37] **Sleep.** Sleepy all morning.
Deep night sleep.
During sleep bites tip of tongue.
Long and dreamful midday sleep; dreams of journeys in distant regions and riding on horses; a person who scarcely ever sat upon a horse.
Dreams that he broke off a tooth.

[38] **Time.** 4 A.M.: vomiting of bile.
Morning: lower jaw immovable; nausea; vomiting of bile; sleepy.
Midday: long and dreamful sleep.
Afternoon: toothache.
Evening: headache with depression; itching on head and back of neck; coryza <; toothache; drawing in r. thigh.
11 P.M.: wakes with vertigo.
Night: cough; deep sleep; vomiting.

[39] **Temperature and Weather.** Warm water: nausea and retching >.
Warmth: agreeable; pain in r. leg with cold sensation.

[40] **Fever.** Shaking chill; with foam at mouth; during headache with vomiting.
Bones pain as if they would fall asunder; coldness, cannot get warm.
Sweats easily after walking.
Icy sweat covers body, with fainting and vertigo, and vomiting at night.

[41] **Attacks, Periodicity.** For more than ten weeks: menses omitted.
During puberty: hysteria.
At climaxis: hysteria; suppression of menses.

[42] **Locality and Direction.** Left: throbbing over eye and across forehead; pain in socket of eye; stinging in temple; pressing pain over eye; stitches from shoulder to throat; stitches in pectoral muscle; pains from heart to shoulder and arm; burning itching on ring finger.
Right: twitching in eye.

[43] **Sensations.** As if her head were another, strange head; as if vertex did not belong to her; like a pressing band in root of nose and about ears; as of a veil before eyes; as if too much air passed into nose and mouth; mouth as if furred, benumbed; as if some one tapped her on groin when raising leg; as if a lump were lying in perineal region; like labor pains in lower part of abdomen; as if a child were bounding in body; as if something in œsophagus were slipping toward epigastrium; as if bones were broken and would fall asunder; feels as if dying.

Pain: deep in brain; in region of groin; between shoulders.
Sharp pain: from heart to l. shoulder and arm.
Stitches: beneath l. shoulder through to throat.
Pinching stitches: in l. pectoral muscle.
Stinging: in l. temple; from elbow to shoulder.
Burning: above inner canthus; in teeth, gums and palate; in hepatic region; in l. ring finger.
Bruised pain: in ovarian regions.
Soreness: in throat; in bones.
Pressure: behind eyes; on head; in temples; over l. eye; above ears; in root of nose; in little toe.
Drawing: in r. thigh.
Throbbing: over l. eye and across forehead; in r. eye.
Tensive pain: in teeth, gums and palate.
Fulness: in head; behind ears.
Heaviness: in head; in root of nose; in perineal region; in limbs.
Thickness: in head.
Numbness: in mouth.
Tickling: in both sides of abdomen.
Itching: in head; in nape of neck; behind ears; in nose; at edge of shoulder and on back; in l. ring finger; on nates; on calf; of skin on various parts.
Dryness: in mouth and nose.
Coldness: below r. knee.

"**Tissues.** Hysteria; spinal irritation.
Scrofula; rachitis, caries, necrosis.
Bones pain as if they would fall asunder.
Chronic catarrh of nose, discharge offensive, thick, yellow or yellowish-green.
Phthisis florida.
Infantile atrophy, scrofulous enlargement of glands; constant desire for food and drink, but does not know what.
Nodosities on various parts, especially buttocks; scrofulosis.

"**Touch. Passive Motion. Injuries.** Touch: pain in hepatic region <.
Pressure: pain in ovarian regions; spine sensitive.
Closing eyes: vertigo.
On board a vessel: vertigo and seasickness.
Riding in a carriage: nausea.
From person walking over floor: headache <; spine sensitive, must cry out.
From least noise: headache <; vertigo <; penetrates whole body, especially teeth.

"**Skin.** Violent itching.
‖Itching of skin on various parts of body. θHysteria.

Itching: on head; behind ears; in nose; on back of neck; on edge of shoulders; on back; on nates; on calf.
Pimples near ball of thumb.
Knots on nates.
Scrofula.

[47] **Stages of Life, Constitution.** Mrs. S., æt. 38, rather fleshy, bilious temperament, suffering several weeks; vertigo.
F., in W., suffered for five years from painful pressure in region of liver, with periodical vomiting.
Mrs. ——, symptoms of spasms during labor; second month after confinement hysteria.
A woman, æt. 70; sick headache.

Compare: *Aranea.*

THLASPI BURSA PASTORIS.

Shepherd's Purse. *Cruciferæ.*

An annual bearing small white flowers in elongated terminal corymbs, native to Europe but found in most civilized countries. It flowers from early Spring to Autumn.

The tincture is prepared from the fresh flowering plant.

Short provings by Macfarlan and McGeorge.

Observations by Bœnninghausen, Lippe and Hale.

Refer to British Quarterly, vol. 3, p. 63; N. A. J. of Hom., vol. 2, p. 185.

CLINICAL AUTHORITIES.—*Metrorrhagia*, Rafinesque, B. J. H., vol. 32, p. 370; Claude, T. W. H. Conv., 1876, p. 955; *Menorrhagia*, Lange, B. J. H., vol. 3, p. 63; *Bloody leucorrhœa*, Rafinesque.

[5] **Inner Head.** Slight headache.

[6] **Hearing and Ears.** Deafness and pain in l. ear.

[7] **Smell and Nose.** Frequent epistaxis, of a passive nature.
Free discharge of blood and mucus from l. nostril.
Dull pain at root of nose.

[9] **Lower Face.** Lips sore.

[10] **Teeth and Gums.** Teeth sore on closing jaws.
Gums sore; neuralgic feeling in teeth.
Inside of gums feels as if full of blisters.

[11] **Taste and Tongue.** Ranula; caused enlargement of submaxillary duct.

Google

[13] **Throat.** Soreness of upper part of throat.
Swelling of throat and face, most on l. side.
Tonsils swollen.
Dryness on swallowing.
[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea.
[17] **Scrobiculum and Stomach.** Crampy pain in stomach; toes hurt, as well as stomach.
Sick faint feeling in stomach.
[19] **Abdomen.** Pain between end of sternum and umbilicus, like needles or like a shock from a battery.
Severe cramp pains, > bending over.
[21] **Urinary Organs.** ‖Hæmaturia.
Urine burning, passing frequently, of strong odor.
[22] **Female Sexual Organs.** ‖Metrorrhagia; with uterine colic; in hemorrhagic chlorosis; in sequelæ of abortion or accouchement.
‖Premature menstruation; first day she hardly had a show, on second a hemorrhage, with severe colic, vomiting, and expulsion of clots; flow continued very long, eight, ten, even fifteen days, then left patient in a state of exhaustion, from which she had not time to recover before another period; one period very profuse, next less so.
‖Hemorrhages: with violent uterine colic and cramps; consequent on abortion; at critical age; with cancer of cervix.
‖Too frequent and copious menstruation, especially in persons of a relaxed constitution.
‖Menses three days too soon, very profuse, uterine colic and discharge of clots.
‖Delaying menses caused by inertia of uterus.
‖Leucorrhœa; bloody, dark, fetid, before and some days after catamenia, which was profuse and dark.
[24] **Pregnancy. Parturition. Lactation.** ‖Hemorrhage after abortion.
[25] **Voice and Larynx. Trachea and Bronchia.** Hoarse in morning, with slight sore throat.
[28] **Inner Chest and Lungs.** Pulsating pain in l. chest.
‖Hæmoptysis.
[33] **Upper Limbs.** Pain in l. shoulder so great, he thought neck and shoulder would break.
Strong, almost painful pulsation in r. radial artery; pulse 84, uneven.
Pain in finger; felon, on tenth day.
[35] **Rest. Position. Motion.** Motion: bending over > cramp.
[38] **Time.** Morning: hoarseness.
[40] **Fever.** Violent fever with panting.
[43] **Locality and Direction.** Left: deafness and pain in ear;

blood and mucus from nostril; swelling of throat and face; pulsating pain in chest; as if neck and shoulder would break.

Right: painful pulsation in radial artery.

Sensations. As of needles or a shock from a battery between end of sternum and umbilicus; as if neck and l. shoulder would break with pain.

Pain: in l. ear; in finger.

Neuralgic pain: in teeth.

Crampy pain: in stomach and toes; in abdomen; in uterus.

Bruised feeling: all over.

Pulsating pain: in l. chest.

Dull pain: at root of nose.

Faintness: in stomach.

Tissues. Profuse passive hemorrhage from all parts of body; blood dark and clotted.

Relations. Compare: *Sinapis.*

THUJA.

Arbor Vitæ. *Coniferæ.*

The tincture is prepared from the fresh twigs.

Introduced by Hahnemann, proved by himself, Fr. Hn., Franz, Gross, Hartmann, Haynel, Hempel, Langhammer, Teuthorn, Wagner, and Wislicenus, R. A. M., vol. 5; Wolf, Hom. Erf., vol. 2, p. 203; Schreter, A. H. Z., vol. 62, pp. 66 and 68; Austrian Provings, Oestr. Zeit. für Hom., vol. 2, p. 310.

[1] **Mind.** Forgetfulness, could scarcely collect his senses for half an hour in morning on waking; unable to go on with her dressing, constantly requires reminding.

Makes mistakes in talking, writing and looking.

In reading or writing uses wrong expressions, and omits words and syllables.

Commences every sentence anew without ability to finish it in spite of every effort of memory.

Stupefaction of head; vertigo, reeling sensation, as after turning in a circle.

Cannot think, talks slowly as if hunting for words; uses wrong words.

Mental dulness with pious fanaticism; no desire to work; anxious restlessness, sleeplessness, constipation and suppression of catamenia.

Very desponding. θGonorrhœa.

Sensation as if whole body were very thin and delicate, and could not resist least attack; as if continuity of body would be dissolved. θChronic hysteria.

Fixed ideas: as if a strange person were at his side; as if soul and body were separated; that body, particularly limbs, are made of glass and will readily break; as if a living animal were in abdomen; talks about being under the influence of a superior power.

Imbecility of mind and loss of speech after vaccination; restless sleep, fretfulness, peevishness; cries all day; eyes stare vaguely; occasional flow of saliva from mouth; looks like an idiot.

Insane women will not be touched or approached.

Nervousness to such a degree that approach of a stranger gave her sudden twitches; when spoken to answered with tears and sobbing; skin on chest and r. side of abdomen deep yellow.

Walks her room in a circle; inability to accomplish most simple work, even dressing; makes no demand for food, has to be reminded to take it, which she does without reluctance; several old warts on neck, and several of later growth, soft to touch, like lipoma and pointed; prolapsus vaginæ; amenorrhœa.

Talks hastily and swallows words.

Thoughtlessness; forgetfulness.

Hurried, with ill-humor; talks hastily.

Speaks very slowly, and in monosyllables.

Music causes him to weep, with trembling of feet.

Google

Disinclined to talk, < on awaking mornings.
Want of disposition to do anything, ill-humor, anger.
Indisposition to any kind of intellectual labor.
‖Mental depression, after childbirth, in consequence of being told that there had been a slight rupture of perineum; grows quiet; thinks she must die; cannot sleep; has no appetite; shuns people; does not answer; seems not to understand a question; cannot count; is in constant anguish; wants to jump out of window; does not care for children or her relatives; stares before herself; hydrogenoid constitution.
Very depressed, sad, irritable.
Exceedingly out of tune; sad and disposed to weep.
‖Mental uneasiness; low-spirited and desponding; passionate; tired of life; morose; dissatisfied; unsteady.
‖Extremely scrupulous about small things. θHysteralgia.
‖Sleeplessness at night; restlessness and tossing about; anguish which does not allow him to sleep; sleep full of dreams and startings.
‖Feels as if she cannot exist any longer; quiet, shunning everybody.
‖Loathing of life; very ill-humored and depressed.
‖Overexcited, quarrelsome; easily angered about trifles.
The child is excessively obstinate.

Sensorium. Vertigo: with eyes shut, ceases on opening them; when rising from sitting; on stooping, looking upward or sideways.
‖Epileptic vertigo, hair dry, and finger nails ribbed.

Inner Head. Tearing in forehead, temples, and occiput, < at night.
Pressing in vertex as from a nail; < afternoon and from 3 to 4 A.M.; > in motion and after sweat.
Boring through temples.
‖Headache: < from sexual excesses, overheating, overlifting; > from exercising in open air, looking upward, and turning head backward.
‖Headache from tea.
Violent stitch through l. temple.
Transient pain in vertex as if bone were repeatedly pierced with needle near sagittal suture.
Violent pressing pain in region of vertex.
A feeling in vertex as if a nail were driven from within outward.
‖Sensation in r. parietal bone and in l. frontal eminence as if a nail were driven in, disappears on pressure.
Drawing, sticking pain in l. temporal muscle, < by mastication, > by contact.
Boring pressure in head.

Digitized by Google

Intolerable tearing in head drives him from bed at night and obliges him to walk about, < on lying down.

Boring sticking in head and r. eye.

Alternately boring, sticking, griping, lightning-like piercing headache in forehead, in and above eyes and in nasal bones.

A drawing, intermittent pain in l. side of forehead.

Tearing in r. side of head and face transversely across nose, extending into malar bone, teeth and across eye, < in morning and evening.

Headache on l. side as if a convex button were being pressed on part. θRheumatic affections.

Headache: early in morning; as if head were screwed asunder in articulation of malar bone and upper jaw; as if a nail were driven into vertex with a jerk; as if forehead would fall out.

Intense nervous (anæmic) headache; remitting attacks after midnight; < raising head; eyelids affected; could not speak from severe pain; palpitation of heart; vomiting, nausea, eructations; sleeplessness; profuse menstruation.

7 to 9 P.M., latterly about midnight, severe bone pains in head, with sleep during intervals; pain < on sides of head, making a circle round it; continual pressure from outside deeply inward, as if bones were being knocked to pieces; sometimes knocks so severe that he cries out; sensitiveness of affected spots to touch, even combing hair; cannot lie on pillow, especially on l. side; > by bending head backward, by compressing it with hands, and remaining without least motion; during paroxysms head bathed in perspiration; nose dry, obstructed; face red, injected, general heat of body; hard stool, with blood every third day; urine leaves yellow sediment. θSyphilitic headache.

Pains in head so severe she screams constantly; nearly loses consciousness and is unable to speak; pains and vomiting < when rising up; > in rest, and horizontal position; paroxysm at its height about midnight; pain prevents eyes from closing, has passed nearly two weeks with hardly any sleep; weak and exhausted; excessive menstruation appearing too often and lasting too long; forehead, region of ears and eyes felt as if stabbed with knives, and as if knives went tearing around in her brain; chilly; palpitation.

Neuralgia going from before backward.

Violent headache, especially at night; tearing in forehead, temples and occiput.

Hemicrania of sycotic origin, < soon after midnight.

Google

Nervous, sycotic or syphilitic headaches.
Meningitis: children of sycotic or syphilitic taint, rather thin than fat, prone to eruptions, which, on healing, leave purple spots; teeth soon turn black and decay at gums; salivary glands swell; thrush or ranula; offensive discharge from ears; soreness of penis or vulva and about buttocks; frequently recurring morning diarrhœa; pain in l. iliac region; fetid foot sweats; uncovered parts sweat, while covered parts are dry and hot; parents have a greasy skin, warts and moles, and crave salt.
Everything seemed jumping, < when sitting up or from talking a long time, or if she closes eyes; fears she will lose consciousness; face red and feels hot; vomited tea, bitter as gall. θSunstroke.

[4] **Outer Head.** Scalp sensitive to touch or pressure of pillow; > if rubbed; violent burning, tearing, stitching pains, < in warm bed; as if beaten; very sensitive to touch on vertex.
Wants head and face wrapped up warm.
Dry herpes on head extending to eyebrows; dandruff.
White, scaly peeling-off eruption over scalp, extending over forehead, temples, ears and neck. θPityriasis.
White, scaly dandruff; hair dry and falling out.
Tingling, biting, stinging, itching in scalp, > by scratching.
Sensation in occiput and temples as of insects.
Eruption moist, corroding on occiput and temples; < from touch, > from rubbing.
Sweat smelling like honey, mostly on uncovered parts.
On r. side of sagittal suture a round ulcer, a little over an inch in diameter, edges little elevated, but hard for the space of a centimetre; bottom covered with a dull grey layer which yielded a serous, fetid pus; sharp, shooting pains, < evening and during night; had first appeared several years ago in the shape of a large tubercle which had almost immediately opened and assumed present form; paleness of face; frequent cough, followed by copious expectoration of frothy mucus; emaciation; great susceptibility to cold.
Hair thin, grows slowly, splits.

[5] **Sight and Eyes.** Flames of light mostly yellow; looking into light of day sees spots like bottles of water moving; colored flashes; clouds and streaks (muscæ volitantes); flickering; a luminous disk, shining like a firefly; streaks of light or sparks passing downward, seen to one side of eye when in dusk, in daylight they appear like dark drops.

Digitized by Google

Double vision.
Objects appear smaller (before r. eye).
‖When looking into light of day sees white spots like bottles of water moving about.
Mistiness or obscuration of sight with dilatation of pupils; burning of eyelids.
Shortsightedness.
Dimness of vision like a mist before eyes; pressure in them as if they would be pressed out of head, or as if swollen.
Dimness of vision in open air like a veil, for near and distant objects, with confusion of head.
Weak eyes; pressure as from fine sand in them.
‖Amblyopia with blurring of vision, > by rubbing, black spots and bright sparks before eyes; dull aching above eye to back of head, with nausea.
Feeling of dryness, burning, or of sand in eyes.
Burning and stinging in eyes and lids, with injection of cornea.
A painful stitch through centre of l. eye, commencing in centre of brain.
Tearing pain in l. eyebrow, disappearing after touch.
Aching over r. eye.
Heat and dryness in l. external canthus, as if it would inflame.
Constant aching in eye, < in bright light.
▮Malignant blennorrhœa, leuco-phlegmatic temperaments; always chilly.
▮Better when eyes are warmly covered; if uncovered, feels as if a cold stream of air were blowing out through them.
‖Large wartlike excrescences on iris with sharp, sticking pains in eye, < at night, > by warmth; heat around eye and side of face, tearing pain above l. eye, injection of sclerotic and conjunctival vessels, feeling of fine sand under lids, tears stand in eyes, lids swollen and indurated θSyphilitic iritis.
▮Inflammation of cornea; ulcerations of a syphilitic origin; hypopyon.
‖Inflammation of cornea with excessive photophobia; has been kept for seven years in a dark room; hair dry, brittle, short and falls out; sleepless at night; toward morning slumber, with many dreams; no appetite; pale, greyish color of face; every afternoon at 4 a shaking chill, followed by heat and thirst; urging to urinate; many dreams. θChronic keratitis after vaccination.
‖Vascular tumor of cornea, which covered nearly two-thirds of its inner surface.
‖Small brown spots on cornea; photophobia.
▮Episcleritis; sclero-choroiditis; staphyloma.

Google

Sclera becomes soft in consequence of extension of inflammation of cornea and iris; tenderness of globe; intolerance of light; general cachectic condition, either scrofulous or syphilitic; long deprivation of fresh air. θScleritis.

Congestion of sclerotic conjunctiva.

Suffusion of eyes, especially in open air; tears do not flow, but remain in eye.

The whites of eyes are blood-red.

Dermoid swellings in conjunctiva; polypi; carcinoma.

Great photophobia; every time he breathes it seems as if cold air rushed in and out of his eyes; for this reason he must cover them up very warm. θOphthalmia.

Ophthalmia neonatorum.

Congestion of conjunctival covering of sclerotic tunic from childhood; slight prurigo.

Conjunctivitis after vaccination; a whooping cough; scanty urine.

Chronic catarrhal conjunctivitis, granulations large, like warts or blisters, with burning in lids; < at night; excessive photophobia.

Chronic cases of large phyctenules of conjunctiva, very slow in progress, unyielding to treatment, and decidedly involving subconjunctival tissue.

Small brownish spots on cornea; photophobia; watery purulent otorrhœa; dissatisfied with everything, quarrelsome; sleep disturbed by anxious dreams; after sleep miserable, fretful; sighing inspirations; hair grows slowly, splits at point; potbelliedness; thick upper lip with a tumor in its parenchyma of size of a pea, enlarging when taking cold; stings of insects cause inflammation of skin. θChronic inflammation of eyes and otorrhœa after vaccination.

Dry branny eruption upon eyelids, chiefly about cilia; eyelashes irregular and imperfectly grown; scales covering skin very fine; eyes weak and watery. θ'Tinea ciliaris.

Exophthalmus consequent upon a tumor behind eyeball (relieved).

Fungous tumor in orbit.

Agglutination of lids at night.

Feeling as if eyelids were swollen and a foreign body in eye.

Burning and stinging in edges of lids, in evening.

Inflammatory softening of inner surface of lids.

Inflammation of lids; they seem indurated.

Styes and tarsal tumors; chalazæ, thick, hard knots.

Verrucæ and tumors that resemble small condylomata.

Google

‖Granular lids, granules large, wartlike.
‖‖Epithelioma of l. lower lid; two cases, one of eight months, the other of three years' standing.

[6] **Hearing and Ears.** Inner ear feels swollen; hardness of hearing.
Noise in ear as from boiling water.
Creaking in l. ear when swallowing saliva.
Stitches from neck into ear.
‖Chronic otitis media; watery or purulent discharge, smells like putrid meat; granulations in middle ear similar to condylomata; polypi.
‖‖Orifice of l. meatus blocked up by a polypus, of raspberry-cellular variety, pale-red in color, bleeding readily when touched by probe; on detaching edges from rim of meatus, much muco-pus issued; deafness; shooting pains.

[7] **Smell and Nose.** Smell in nose as of fish-brine or sour beer.
Coryza fluent outdoors, dry in room; violent, sudden.
Troublesome dryness and sensitiveness of nose.
Painful pressure at root of nose.
In r. nostril a feeling of soreness or ulceration, < by pressure; swelling and induration of l. ala with tensive pain.
Ulceration half an inch within nose, where there is a scab.
Discharge of offensive purulent mucus from nose.
‖Blows out much thick, green mucus mixed with blood and pus; later brown scabs form; nose sore; red eruption on alæ, often moist.
‖Painful scabs in nostrils.
‖Chronic catarrh after measles, scarlatina, variola.
Frequent blowing of blood from nose.
A red itching spot, painfully sore to touch, in fissure of r. wing of nose.
Nose red and hot.
Red eruption on nose, at times humid.
Eruptions on wings of nose.
Swelling and induration of alæ nasi.
‖Warts on nose.
‖‖Lupus exedens on nostril (improved).

[8] **Upper Face.** Face: red and hot, with a fine network of capillaries; circumscribed burning redness of cheeks; bloated, dropsical, erysipelatous; skin hot and red, peels off when washed; bloodvessels on temples distended; light-brown spots, freckles; red nodosities on temples; eruption leaves livid spots; scabious eruption; perspiration, especially on side on which he does not lie; dropsically bloated.
(Edematous erysipelas of face.
Faceache originating in l. cheek bone, near ear, extend-

Google

ing through teeth to nose, through eyes to temples into head; painful spots, burn like fire and are very sensitive to rays of sun.

Faceache, r. side, after checking eruption on ear, leaving numb feeling.

‖Neuralgia of trigeminus after suppressed gonorrhœa or eczema of ear.

Boring pain in l. malar bone, > by touch.

Intense sticking between l. ear and zygomatic arch.

‖Prosopalgia of twelve years' duration after suppression of an eczematous eruption on ear; during day paroxysms of pain every five to six minutes, very intense but of short duration, less often at night; pain begins about lips and gums, spreads thence over whole r. side of face, which is congested and is followed by a feeling of tension and numbness.

‖Almost constant terrible neuralgia in l. face, on level with zygomatic process and malar bone.

‖General feeling of illness, debility in extremities, loss of appetite, sleeplessness with agitation, melancholy and inability to work; chill in morning; dryness of mouth, thirst; chill returned at close of day; painful stiffness of neck; swelling of cervical glands; a pimple in middle of r. eyebrow, conical, hard and red; hears with difficulty; shooting pain in l. ear; ephelides on face; loss of taste; tearing pain in abdomen, < walking; tubercle opened, next day presented a greyish bottom, elevated edges, hardness of which extended nearly a centimetre beyond opening; violent shooting pains in ulcer, extending to root of nose, and internal angle of eye; toward evening chill with chattering of teeth; sensation of icy coldness through whole length of spine; sleeplessness; great depression of spirits, and discouragement.

‖Tumor on cheek.

‖Large, hard, dark-colored wart with a large base, on a lady's cheek, of several years' continuance, of late rapidly increasing in size.

Lower Face. Upper lip sensitive.

Lips pale, swollen, peeling off.

On upper lip, an elevated, red, violently itching spot.

Twitching of under lip, and here and there in places on skin.

Jerking sensation in upper lip near corner of mouth.

Pimples on lips and chin.

‖A wart on upper lip; grew upon a pedicle and split when allowed to grow into three or four hard, horny portions.

‖Thick upper lip, with a pea-sized tumor in its parenchyma, enlarging when taking cold.

Digitized by Google

Cracking of articulation of jaw.
White flat ulcers on inside of lips and corners of mouth.
‖Fungus on l. lower jaw, purplish and easily bleeding, pedunculated, more angry in damp weather; eruption like zoster around abdomen.

[10] **Teeth and Gums.** ‖Teeth: decay at roots (as in sycosis), crown remaining sound; crumble, turn yellow.
‖Gnawing pain in second l. lower bicuspid, which was decayed close to gum; excitement removed pain; > by pressure of hand; < in bed; it extended over l. forehead and into l. side of neck.
‖A woman, æt. 72, faceache, with much soreness after pain; in paroxysms, with an hour's interval, for two months; unable to masticate; side of face sore and throbbing when lying on it; pains extend all over r. side of head, when violent shoot to opposite side; < in cold or very warm room; dares not venture into a draft; teeth decayed, pain shoots up from these; pains come suddenly and go as suddenly, sometimes shoot into ear, attempts to read or think bring on pain. θNeuralgic alveolar periostitis.
Toothache from drinking tea.
Gums swollen, inflamed, dark red in streaks.

[11] **Taste and Tongue.** Taste: sweet; of rotten eggs, mornings; food seems not salt enough; of bread, as if dry or bitter.
Bites tongue frequently.
Burning and redness of tip of tongue, frequently covered with sore points; painfully sore to touch.
A painful ulcer on l. margin of tongue, afterward on right.
Small white vesicles on tongue resembling miliary rash.
A white blister on side of tongue close to its root, painfully sore.
‖Ulcer of roundish shape under tongue in a child, after vaccination; its edge consists of a number of pointed condylomata, which could be separated by a fine probe.
Tongue swollen, < r. side.
‖Varicose veins under tongue, excess of venosity everywhere, especially in throat.
‖Ranula, bluish, surrounded by varicose veins.
‖Semi-transparent, jellylike tumor, bluish tumor size of a small walnut, at root of tongue, l. side, painless, soft; impeded speech, first noticed nine months ago; moans a good deal in her sleep; is liable to swelling of glands of neck; slight swelling of thyroid gland. θRanula.

[12] **Inner Mouth.** Aphthæ; ulcers in mouth.
Inner mouth as if filled with blisters, or as if burnt.
Flat white ulcers on inside of lips and on corners of mouth.

Digitized by Google

While masticating food becomes very dry.
‖In l. lower jaw, location that of first molar tooth, a fungous growth, purplish, bled easily; father sycotic; fungus < in damp weather; eruption like zoster around abdomen.

[12] **Throat.** Redness in fauces.
Erosions in fauces with mucous tubercles.
Suspicious-looking ulcers in throat.
Throat dry and rough.
Throat feels raw, dry, as if containing a plug, or as if constricted when swallowing.
Hawking of tenacious mucus difficult to loosen.
Swallowing painful, especially of saliva.
‖A feeling of upward pressure in soft palate. θCatarrh.
‖Diphtheria.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Craving alternates with want of appetite.
‖No appetite. θMental depression.
‖Thirst, especially at night; longs for cold food and drinks.
‖Dislike to fresh meats and potatoes.

[15] **Eating and Drinking.** ‖Bad effects from beer, fat, acids, sweets, tobacco, tea, wine and onions.
Feels badly after eating even a little.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: rancid or acrid; of air, while eating; afford instant relief.
Gulping up of large quantities of acids.
Vomiting of mucus or of oily, greasy substances.

[17] **Scrobiculum and Stomach.** Contraction of epigastrium; pain.
Drinks fall audibly into stomach; they enter with a gurgling noise.
Pit of stomach swollen, sensitive.
Indurations in stomach and abdomen.

[18] **Hypochondria.** Stitches in hypochondria, now r. then left.

[19] **Abdomen.** Tension in abdomen; pressure in hypogastric region.
‖Stinging in abdomen as from needles, only while sitting.
Cutting pain in lower abdomen.
‖Attacks of pain beginning in l. side, sometimes going around to l. side of back, on waking in morning; when she begins to move, flesh there feels torn from bones; slightly > by eructations, though eructations cause spasms across spleen and around stomach.
Upper part of abdomen drawn in.
‖Abdomen large, particularly after eating.
‖Distension of flatus; rumbling; croaking and grumbling; as if an animal were crying in abdomen.

Digitized by Google

Emission of flatus without noise.
‖Sensation of something alive in abdomen.
‖Movement, as of something in lower abdomen, like a pushing of abdominal muscles by arm of a child, without pain.
A sudden starting, bounding sensation in r. iliac region as from something alive.
‖Abdomen puffed, big, protrudes here and there, as from arm of fœtus; motions therein as if it contained something alive (in old maids).
‖Ileus; spasmodic stricture, feels as if something alive were pushing out.
‖‖Ileus in r. lower part of abdomen lasting two weeks; sweat only on uncovered parts, while covered parts were dry and hot. θTyphlitis.
‖‖After cord had fallen off umbilicus remained moist, and when seven days old, child presented at navel a swelling size and appearance of a raspberry.
‖Soreness of navel.
‖Painful swelling of inguinal glands.
Stitches in inguinal glands.
‖‖Tendency to hernia on l. side after labor; feet sore and swollen.
‖‖Infantile hernia on l. side; inguinal, child cries all time, and only quiet when l. inguinal region is relieved from pressure or when thigh is flexed on abdomen.
‖Herpes zoster; zona.
‖Yellowish or brownish spots upon abdomen.
Hemorrhoidal colic.
Intussusception of intestines.
‖Potbelliedness.

Stool and Rectum. ‖Diarrhœa: daily in morning after breakfast; with colic; < after eating; watery, painless; bright-yellow, watery, streaming out with much gas, as if cork were pulled out of a full jug, excessive exhaustion, short and difficult breathing, anxiety, intermitting pulse, acute pressive pain in back opposite pit of stomach with a feeling as if no blood could circulate there, rapid disappearance of fat; recurring at same hour; chronic, traceable to vaccination; cholera morbus; cholera infantum.
Stool: pale-yellow, watery, copious, expelled forcibly with much noisy flatus; with blood; oily or greasy; gurgling like water from a bung-hole.
With fluid stools sensation in rectum as if boiling lead were passing through.
‖‖Stools grey, brown, offensive; great thirst, distended abdomen; irritable, moody; hair grows very slowly, is

Digitized by Google

thin and stiff; appetite poor; excoriation in inguinal region and at orifice of prepuce; at times very frequent urination. θDiarrhœa.

‖Child 7 weeks old, diarrhœa since birth; two weeks ago stools began to be watery, gushing and yellow, would saturate everything; mother scyotic.

‖Pale, yellow, watery stools, forcibly expelled, copious, great gurgling in bowels; oozed from anus during sleep; great debility after stool with weakness by spells; loss of appetite, oppressed breathing; drinks roll into stomach audibly.

Aggravation: in morning; ▮after breakfast; ▮after coffee; after fat food; after onions; ▮after vaccination; periodically returning at same hour.

Before stool: rumbling of wind.

During stool: passing of much loud flatus.

After stool: debility; repeated ineffectual urging.

Ineffectual urging to stool with erections.

‖A boy, æt. 4, vaccinated two years ago, since then ailing; urging to stool and urination at same time with great pain on discharging feces and urine, suppresses urging as long as possible; feces white; oxyuris vermicularis; pale face; often dejected.

▮Constipation: stool in hard balls; obstinate, from inactivity or intussusception; stools large, hard, coated with blood; hard, thick and knotty stools; hard, followed by soft stool; stools retarded and insufficient.

Violent pain in rectum which prevents a passage, offensive perspiration about anus and on perineum.

‖Extreme constipation for several years despite an active country life; menses normal; irritable, easily provoked; craving for salt; hands and feet cold; stools large and very hard; has had rarely copious watery stools.

▮Burning soreness in anus lasting all day.

‖Much flatus, hard to expel, anus feels constricted, incarcerated flatus below r. side of diaphragm. θRheumatic fever.

Stitches from rectum into bladder.

During constipated stool: only a small quantity of stool passed each time, with pain in anus as if it would fly to pieces; great trouble in passing stool, as if anus had been constricted (hard, followed by soft stool); violent pains in rectum compel cessation of effort at stool, especially with hemorrhoids; flow of prostatic fluid.

After constipated stool: repeated ineffectual urging.

A stool at 6 P.M., with subsequent burning in anus, and shortly after a reiterated discharge of mucus, attended by very violent stitches in rectum, in direction of a line from anus to sacrum.

Digitized by Google

Painful constriction of anus with almost every stool.
‖Burning in anus.
Distinct violent stitches from anus into region of l. iliac bone.
‖Sticking in anus.
Single flying, very painful stitches, in anus as from a fine needle while sitting.
‖Itching in anus.
‖Smarting in anus between intervals of stool.
Anus became sensitive after a slimy discharge, as if skin were cracked and chapped there.
Feeling of soreness in anus.
‖Pains in anus < from motion.
‖Hemorrhoids: during stool pains so great that she has to desist; burning violently while walking; anus fissured; sensitive to touch; with condylomata; ‖burning, itching, pressing.
‖Two cases of perineal fistula.
‖Two cases of blind external fistula; cauliflower excrescence at verge of anus of size of a quarter of a dollar, and offensive perspiration around parts affected.
‖Fistula in ano.
Burning pain in perineum, the raphus of which was more prominent than usual, and one inch from anus a tubercle size of a pea appeared, which increased for three days, became moist, smarted, in walking, and then day by day became smaller, disappeared in about ten days.
‖Red blotches at anus like figwarts.
Knotty puffiness and excoriations on perineum.
‖‖Condylomata at anus.
‖‖Anus fissured, painful to touch, often with warts, sometimes immense numbers of flat, moist, mucous tubercles or condylomata surround anus, especially in syphilitic subjects.

31 **Urinary Organs.** Kidneys inflamed; feet swollen.
Diabetes.
Stitches to bladder from rectum.
‖Bladder feels paralyzed, has no power to expel urine.
Pain in region of bladder, with painful drawing up of testes.
Violent burning in fundus of bladder.
A jerking, voluptuous formication in forepart of urethra.
‖Sensation of moisture running forward in urethra; orifice of urethra closed with a slimy fluid, a serous liquid, or a lump of mucus.
Urging to urinate frequent and hasty.
Obliged to urinate five or six times before bladder is empty.
Continued urging; passes a few drops of blood.

Digitized by Google

Wants to pass water, but feels as if a tape prevented.
Frequent urging, with profuse flow, more toward and in evening; with stitches in urethra.
‖Burning in urethra during, and for some time after micturition.
Frequent inclination to urinate; stream often interrupted.
Has to rise several times at night to urinate.
During micturition: cutting in urethra; burning.
Smarting and itching of female pudendum, with discharge of some drops of urine after micturition.
‖After urination feels as if a drop were running down urethra.
Continued dropping of urine; dribbling.
‖Burning, smarting, itching, cutting, stitching in urethra.
Urine: too frequent and too copious; profuse, light-yellow; contains sugar; foams, scanty, exceedingly dark; dark-red in morning; deposits a brown mucus; with dark, cloudy sediment, in rheumatism; red, depositing a brickdust sediment; highly colored and of strong smell.
‖Involuntary urination at night or when coughing.
‖Incontinence of urine for six weeks; got up at least six times nightly, and saturated bed frequently; was unable to attend school; urine highly colored and of a strong odor; had a large wart on l. index finger, which had fallen off three weeks previously, leaving a hard, white base.
‖Incontinence of urine; desire came suddenly, was not able to retain urine an instant without grasping penis; urine scanty and scalding, slight backache; it seems as if a single drop at a time were running along.
‖For three months subparalysis of sphincter vesicæ; especially in daytime he cannot hold his urine when riding or on long walks.
‖Warts on her hand; incontinence of urine for three or four years.
Urine highly colored and of a strong smell, warts here and there. θEnuresis nocturna.
‖Chronic incontinence of urine from paralysis of sphincter vesicæ (in old, flabby constitutions).

Male Sexual Organs. ‖Excitation or depression in genital system.
‖Nightly painful erections causing sleeplessness.
Irresistible inclination to onanism even during sleep.
‖Nocturnal emissions: wake him; followed by heaviness and ill-humor.
‖Discharge of prostatic fluid.
‖Painful spermatic cords from suppressed gonorrhœa.

Digitized by Google

Renewed gonorrhœa after coiton.
Impotence after gonorrhœa.
Prostatic affections from suppressed or badly-treated gonorrhœa.
Gonorrhœa: scalding when urinating, urethra swollen; urinal stream forked; discharge yellow, green, watery; with warts; red erosions on glans; subacute and chronic cases, especially when injections have been used and prostate is involved.
Gonorrhœa, with a soft lump having an abrasion upon it, on l. side of frenum preputiæ; lump smooth and painless.
Checked gonorrhœa: articular rheumatism; prostatitis; impotence; condylomata; sycosis, etc.
Jerking in penis.
Burning sensation between prepuce and glans penis.
Itching on inner surface of prepuce.
Round, flat, unclean ulcer on corona glandis.
Small flat vesicle on glans penis.
A red growth like condyloma on inner surface of prepuce.
Moisture on glans penis.
Glans very sensitive.
Swelling of prepuce.
Eczema on genitals.
Red excrescence on inner surface of prepuce like figwarts.
Smooth red excrescences behind glans penis.
Inner surface of prepuce as well as point of penis below corona glandis covered with small, pointed condylomata; slight discharge of viscid fluid; whole perineum occupied by one broad condyloma half an inch in height; it was constantly moistened by a slimy, purulent discharge; could scarcely bear pain, especially when walking, and acrid discharge had irritated thigh on inside of which another small condyloma had formed; margin of anus occupied by three large condylomata.
For three weeks a large number of condylomata surrounding glans penis, red, pedunculated, growing rapidly, quite exuberant and dry, and following gonorrhœa; weakness of back; frequent urination.
Round, unclean, elevated ulcers with red margin, moist and painful; condylomatous excrescences.
Erosions and rawness between legs and on sides of scrotum; constantly oozing moisture.
Condylomata, mucous tubercles, sycotic cauliflower excrescences; figwarts, smelling like old cheese or herring brine.
Condylomata: fan-shaped; moist; suppurating; large.
Red spots on prepuce changing to an ulcer with scurf.

Google

Smallpox on inner surface of prepuce, humid and suppurating and depressed in centre.
Chancres, with pain as from splinters sticking.
Itching ulcers with unclean bottoms, or whitish chancres with hard edges.
Feeling in testicles as if they moved.
Left testicle drawn up.
Aching in testes as if contused, < when walking.
Sweetish-smelling sweat on scrotum.
Strong, sweetish, honeylike smelling sweat on genitals, staining linen yellow; humid pimples on scrotum.

Female Sexual Organs. Warts, condylomata and other excrescences about vulva.
Ulcers on internal surface of vulva; vulva has a sore and smarting feeling.
Pressing and contracting pain in vulva while sitting.
Cramplike pain in vulva and perineum when rising from a seat.
Cramp pain in vulva extending as far as abdomen.
Burning and smarting in vagina when walking and sitting.
Whitish ulcers on inner surface of labium majorum.
Coition prevented by extreme sensitiveness of vagina.
Left ovary inflamed, < at each menstrual nisus; distressing pain, burning, when walking or riding; must lie down; pain extends through l. iliac region into groin, and sometimes into l. leg, pain sometimes burning.
Cutting, shooting, squeezing pains in region of l. ovary.
Ovarian, or severe pain in ovaries, uterus and abdomen result of an overphysiological action, always located in ovaries or duct.
Erosions on os uteri like aphthæ.
Uterine polypus which had been operated on eighteen months before; could not walk or ride in a carriage from distress of l. iliac region, extending up to loin; pain in l. groin.
Sickly appearance; oppression of breathing; congestion to head and face; impairment of memory; bowels irregular; colicky pains; menorrhagia followed by leucorrhœa; pains in small of back; tiredness of legs; polypus attached by a long pedicle. θUterine polypus.
Menses every two weeks and lasting too long; blood dark and profuse for three days, then remaining as a slightly-colored secretion up to next period; uterus prolapsed, firm, fleshy; oval body with a thick pedicle extended out of os about size of a thumb; os appeared widely open; exploring finger could surround polypus; labia of orifice strongly hypertrophied and swollen. θUterine polypus.

Digitized by Google

Displacement of uterus; prolapsus.
Cauliflower excrescences of os uteri.
Cancer of uterus from sycosis.
After several premature labors, womb twice its natural size; no unnatural color of os; os closed laterally on itself in form of a mouth half an inch wide; in anterior lip a hard tubercle size of a bean; whole os and cervix had a hard resisting feel; a cutting and burning pain which patient was sure was at point of finger, when finger pressed os; pricking, disagreeable feeling above pubis into bowels; burning and at times cutting above l. ilium and in region of ovary; yellowish leucorrhœa, causing smarting of vagina; menses seven to fourteen days, very profuse, bright-red, no clots; steady burning pain in sacrum; frequent urination; smarting in anus; aching in l. hypochondrium.
Menses: too early and too short; preceded by profuse sweat; scanty, with terrible distressing pain in l. ovarian and iliac region.
Before menses: excitement and pulsation of arteries, heat of head, headache and toothache; laborlike abdominal pains, tenesmus and faintness; much perspiration.
During menses: tiredness, palpitation, spasmodic weeping; restlessness in legs; retching, pressing in stomach, distension, pain in abdomen and back; bearing down out of genital organs; burning in varicose veins of genitals, sensitiveness and swelling of breasts; general coldness.
After menses: tiredness, rush of blood upward; toothache; sleeplessness; nightmare.
Dysmenorrhœa; interstitial tumor, fibroid.
Leucorrhœa: mucous, from one period to another, mild, leaves a yellowish-green stain; sycotic.
Upon spots formerly occupied by erosions, caused by extreme distension during labor, little pea-sized excrescenses, surface of which was continuous, without any pedicle, with mucous membrane of vagina; three or four were situated on posterior wall; one at orifice on anterior wall and another at fourchette.
After a fall a wartlike growth on r. labium, painful to touch, bleeding easily, preventing walking.
Condylomatous enlargement of clitoris, vagina and anus.
Figwarts from syphilis.
Condylomata moist, suppurating, stinging and bleeding.
Erectile tumors with burning.
Bleeding fungus of breast (completed cure after *Phos.*).

[21] **Pregnancy. Parturition. Lactation.** Child moves so

violently it awakens her, causes cutting in bladder with urging to urinate; pains in l. sacro-iliac articulation, running into groin; eighth month.

Abortion at third month.

‖Labor: pains weak or ceasing; contractility hindered by sycotic complications; pains in l. sacro-iliac articulation running into l. groin; pain from walking, insupportable, must lie down.

Voice and Larynx. Trachea and Bronchia. Voice low. Sensation as of a skin in larynx.

‖Polypus of vocal cord.

‖Condylomata. θSyphilis.

Respiration. Short-breathed: from mucus in trachea; from fulness and constriction in hypochondria and upper abdomen; as from adhesion of lungs; at night.

‖Asthma: with gonorrhœa, without having been exposed to contagion.

‖Asthma, < at night, with red face; coughing spells or sensation of adhesion of lungs.

‖Asthmatic attacks in longer and shorter intervals, and at different times of day; palpitation periodically, in rest and motion; craving appetite; violent headache, especially at night; tearing in forehead, temples, occiput; nose stopped up; coryza after spells of asthma.

‖Asthmatic attacks, since a year, in a child æt. 2½, after vaccination; paroxysms in day as well as night, with whistling respiration, last about two hours; sleep restless; occasional obstinate constipation; singular dark-colored excoriations on nates; dry, thin hair.

‖Asthma, with little cough, but sensation as if something were growing fast in region of l. lower ribs.

‖A man, æt. 47, had been vaccinated, since then complaining; paroxysms usually at night, with mucous rattle or whistling respiration, also coughing spells with intense redness of face; very irritable; sleeps poorly; stitches in hypochondria, now on r. then on l. side; feels bad after eating slightest quantity of food; excessive flatulence; pain at times in all joints; after asthmatic paroxysms, profuse perspiration, oily; hollow-eyed; < every other night; urine scanty; excretion slow; toward end of paroxysm drawing in lower limbs, which are at all times red like a boiled lobster; obstinate constipation.

‖Breathing short and quick, < from deep inspiration and talking, > by lying on affected side, but pains compel him to lie on back. θRheumatic fever.

Cough. Cough: constant, without difficulty in breathing; short, interrupted, convulsive; frequent, dry, hacking; during day; none after lying down; evenings after

Digitized by Google

lying down; sputum loose and easier when he turns from l. to r. side; in morning, after rising; immediately after eating; as soon as he eats or drinks anything cold.

‖Whooping cough: immediately after vaccination, in two scrofulous boys.

‖Sputa: green; taste like old cheese.

[28] **Inner Chest and Lungs.** Spasm of lungs from drinking cold water.

Stitches in chest from drinking anything cold.

Sensation as of falling drops in chest.

Hot rising into chest.

Ebullition in chest, with audible palpitation.

‖Pain in l. pectoral region going down to ant. sup. spinous process of innominate bone; pain in head sharp in back of crown; < in morning and in warm weather; both pains < at same time; sharp pain in lung; has to go to bed; palpitation on walking fast in open air; a jar seems to throw the wind out of him; when pain is severe, draws himself up to l. side; < when putting l. side upon stretch, and on pressure.

‖Hemorrhage from lungs; quantity of blood very great, smell terribly offensive.

[29] **Heart, Pulse and Circulation.** ‖Cramp in heart.

Palpitation: periodical, in rest or motion; from ascending; anxious, when awaking mornings; audible, with violent congestion to chest.

Violent pulsations in evening.

Pulse, full, accelerated evening; slow and weak morning.

Swelling of veins.

[30] **Outer Chest.** Skin blue over clavicles.

Brownish spots upon chest.

[31] **Neck and Back.** Cervical glands swollen.

Oily brown skin on back of neck.

Blueness of external throat from distension of veins.

Small red pimples on neck close together.

‖Pustular eruption on neck and face, soon drying up.

‖Large fungous excrescence on neck, back of l. ear, growth of three or four years; it measured about one and a half inches in diameter and about same from base to top, very tender and vascular, bleeding from slightest touch. θFungus hæmatodes.

Painful stiffness of nape of neck.

Sensation of stiffness in nape of neck and on l. side of neck, extending into ear, even during rest, in no way impedes movement of neck.

Drawing tension in nape of neck.

Painful tension in r. side of nape and in small of back, slight in l. side of nape.

Digitized by Google

Burning from small of back and sacrum to between scapulæ.

Drawing pain in small of back, sacrum, os coccygis and thighs, preventing erect position, after prolonged sitting; pressive bruised sensation in back and loins, early on rising, < on turning trunk and while standing, > in walking; tensive pain.

Throbbing and pulsation in back.

Cramplike pain in lumbar region after long standing when attempting to walk feels as if he would fall.

Violent stitch between coccyx and anus.

| |Spinal curvature in a boy æt. 11; spine from fifth to twelfth vertebræ bent backward, long dorsal muscles in this region atrophied; cannot stand erect, is bent forward, and supports body by putting hands upon his knees; on sitting on a chair, supports himself by holding fast to back of chair; on sitting upon floor head sinks upon knees; hair is thin, of slow growth; urethra reddened; belly enlarged, potbellied; nose always stopped up. θAfter vaccination.

Boils on back.

Boils near small of back with large red borders.

| |Steatomous tumors, one over first dorsal vertebra, other over middle of spine of l. scapula, of violet color, rounded shape, slightly yielding to pressure of fingers; they measure across middle, taken perpendicularly, about two inches and a half, rather more transversely; tumors somewhat pedunculated, could be handled without pain, but lying on back, in bed, caused bruised or smarting pain; constant thirst.

[32] **Upper Limbs.** Sticking in shoulders.

| |Tearing throbbing, ulcerative pains in shoulder extending to fingers; twitching of muscles of arm; forearm and fingers numb as if dead, insensible to heat of stove; pain < when arm is left hanging, also < from warmth of bed at night, and when placing arm over head; > from motion, in cold air and during sweat; chilliness and yawning after midnight; falls asleep late; terrifying dreams; every three or four days difficult stools; frequent urging to stool; feces at times colored with blood; thirst only at night; cold sensation in arms; audible palpitation of heart with nausea; despondent. θRheumatism.

| |Involuntary jerking of arm during day.

| |Atrophy of r. arm after revaccination; heavy sleep, feels badly in morning, stool extremely hard; bleeding after stool; urine scanty; especially prominent is atrophy of abductor pollicis, flexion of thumb and forefinger impos-

Digitized by Google

sible; function of biceps wanting; extension tolerable, normal; lower arm icy-cold.
Burning pain in all muscles.
Herpes on elbow.
Brown spots under arms like nævi materni.
‖Thirty to forty warts on hands, especially on dorsa; surface of smaller ones smooth, almost transparent; larger ones rough like cauliflower.
‖Twenty to twenty-five warts on r. hand, hard, horny, with rough surfaces; spots of eczematous eruption as large as a penny, covered with small scales, on extensor surface of arm near wrist.
‖Four horny, painful warts on hands, of three years' duration.
‖Very numerous warts on hands of a girl æt. 12.
Brown color of dorsum of hand.
White scabby herpes on dorsum of hand and on fingers.
Hands covered with cold sweat.
Finger tips: erysipelatous, with tingling; numb and cold as if dead.
Erysipelas of fingers.
‖Suppuration of finger nails. θAfter vaccination.
▮Finger nails distorted, crumbling and discolored.

"Lower Limbs. Painful laxity in hip joints, as if capsules of joints were too weak and relaxed; when walking legs feel as if made of wood.
Tension from hip joint to groin, and along posterior part of thigh down to knee.
Drawing in both hips.
Shooting in l. hip, with sensation of lower extremities being elongated.
‖Sciatica in l. leg, exacerbations gradually growing more and more severe, until she was finally confined to bed for several weeks; l. leg atrophied; first twinges of sciatica felt when she was pronounced cured of a gonorrhœa which had been treated with injections three years ago.
▮Coxalgia, with lengthening of limb.
‖Paresis and atrophy of r. leg with considerable coldness of same, after vaccination, in a child æt. 2; occasional pain in back and abdomen; pale face.
Weariness in internal muscles of both thighs as if they would break down.
Ulcers on thighs.
‖Enlarged nævus on thigh in a child æt. 5 months.
Brown skin on legs, particularly on inner surface of thighs.
▮Gonorrhœal rheumatism located in fibrous part of knee joint.

Google

Weakness of l. leg while sitting, changing into a cutting in muscles of calves when walking.
White blotches on calves of legs.
Pains in feet and ankles after suppressed gonorrhœa, could not walk.
Numbness of l. foot.
Pain in heel as if gone to sleep.
Stitches above heel in tendo-Achillis.
Inflammatory red swelling of dorsa of feet and of toes with tension when stepping on them.
Shining red inflammatory swelling of toes.
Burning, tearing, stitching in corns.
White nodosities on toes.
Tips of toes red and swollen.
Fetid sweat on toes; suppressed foot sweat.
Nets of veins as if marbled, on backs of feet.
Red spot on dorsum of foot.
Toe nails: brittle and distorted; crumbling; misshapen.
Ingrowing toe nails.

Limbs in General. Trembling of hands and feet.
Drawing and sensation of weariness with apparent dulness of feeling.
Limbs go to sleep.
One-sided complaints; paralysis.
Rheumatism, with numb feeling; < in warmth, from moving, at night after 12 P.M.; > from cold and after sweating.
Stitches in limbs and joints.
Joints crack when limb is stretched.
Frozen limbs.
Nails of fingers and toes become wavy and dry so that they partly crumble.
Nails crippled, brittle, discolored or soft.
Cracking of joints when they are extended.
Numerous hangnails.
Pimples on knee like varicella, others with tips full of pus, surrounded by a red areola, especially on thighs, elbows and forearms.

Rest. Position. Motion. Rest: headache >.
Lying: < pain in head; < on painful side of face; on affected side, asthma >; cough >; on back, pain in tumors <; on l. side, anxious dreams.
Horizontal position: headache >.
Sitting: stinging in abdomen; stitches in anus; pain in vulva; burning and smarting in vagina; pain in small of back <; weakness of l. leg.
Standing: cramplike pain in lumbar region.
Motion: pressing in vertex >; pain in anus <; pain in shoulder and arm >; rheumatism <.

Digitized by Google

Stooping: vertigo.
Sitting up: everything seems jumping.
Rising: vertigo; headache and vomiting <; pain in vulva and perineum; bruised sensation in back and loins <.
Looking upward: headache >.
Turning head backward: headache >.
Stepping: tension in swelling of feet and toes.
Walking: is obliged to at night with pain in head; pain in abdomen <; cannot hold his urine; condylomata <; aching in testes <; burning and smarting in vagina; pain in ovary <; prevented by wartlike growth on r. labium; labor pains <; in open air, palpitation; bruised sensation in back and loins >; legs feel as if made of wood.
Talking: asthma <.
Coughing: involuntary urination.
Ascending: palpitation.
Riding: cannot hold his urine; pain in ovary <.

[36] **Nerves.** Limbs go to sleep.
Sensation of lightness in body when walking.
‖Flesh feels as if beaten loose from bones.
‖Feeling as if body were frail and easily broken.
Frequent starts or jerks of upper part of body. θChorea.
Weakness; debility, < mornings; debilitated all over as from fatigue.
‖Rapid exhaustion, causing oppressed and short breathing; irregular and intermitting pulse.
‖‖After revaccination, falling out of hair, which is very dry; headache; vertigo; poor sleep; difficult falling asleep; nightly restlessness; weakness in lower extremities; constant thirst; pain in epigastrium.
‖‖After revaccination, cannot sleep; canine hunger; after eating, great fulness; had been drinking hard some weeks ago, since then sleeplessness; loss of appetite; profuse sweats day and night; slight unpainful discharge from urethra; tremulous limbs; visions of strange people at night; great anxiety and restlessness; cannot remain in bed, must walk about; scanty urine; frequent urination.
‖‖Chorea, at night and in morning; craving appetite; dry hair; very ill-humored and obstinate; laughs a good deal without cause.
‖Chorea; catalepsy.
Paralysis of one side.

[37] **Sleep.** Sleep heavy, cannot get fully awake mornings.
‖‖Sleeplessness: sees apparitions on closing eyes; parts lain on painful; from heat and restlessness; from mental depression; after revaccination.
‖‖Uneasy sleep with dreams.

Digitized by Google

Nightmare.
Anxious dreams when sleeping on l. side; of dying, or dead people or corpses.

Time. 3 A.M.: chill.
3 to 4 A.M.: pressing in vertex <.
Morning: disinclined to talk; faceache <; headache; diarrhœa; chill; taste of rotten eggs; on waking, pain from l. side to back; urine dark-red; cough; pain in l. side <; palpitation; pulse slow and weak; debility; chorea; cannot get fully awake; chill; heat; sweat.
Afternoon: pressing in vertex <.
During day: cannot hold his urine; cough; jerking of arm.
All day: burning soreness in anus.
5.30 P.M.: chill.
Evening: faceache <; pain in ulcers on head <; burning and stinging in lids; chill; frequent urging to urinate; violent palpitation; pulse full, accelerated; chill; cold creeps on back.
6 P.M.: stool followed by burning in anus.
7 to 9 P.M.: bone pains in head.
Night: sleeplessness; tearing in head <; violent headache; pain in ulcer on head <; pains in eye <; conjunctivitis <; frequent urination; involuntary urination; painful erections; dyspnœa; asthma <; thirst; chorea; cold creeps on back; heat; itching and shooting in eruption.
Midnight: headache at its height.
After midnight: hemicrania <; chilliness and yawning; rheumatism <; chill.

Temperature and Weather. Warmth: > eyes; < rheumatism.
Warm air: seems cold; uncovering, shivering.
Warmth of bed: headache <; toothache <; pain in shoulder and arm <.
Warm weather: pain in l. side <.
Cold water: drinking, causes spasms of lungs; stitches in chest; causes eruption to burn.
Cold air: pain in shoulder and arm >.
Cold: great susceptibility, ulcer on head, also in blennorrhœa; tumor on upper lip <; rheumatism >.
Worse in cold or very warm room: faceache.
Open air: exercising, headache >; dim vision, suffusion of eye; coryza fluent; on walking, palpitation.
Least change of weather: chilly.
Draft: faceache <.
Damp weather: fungus on lower jaw <.
Overheating: headache <.

Digitized by Google

Rays of sun: painful spots on face sensitive.

[40] **Fever.** ‖Shivering through and through from slightest uncovering of body in warm air.

Cold creeps on back in evening and night.

Always chilly from least change of weather.

Chilly and weak some time before regular paroxysms.

Chill: in attacks, mostly evenings; with yawning, warm air seems cold and sun seems to have no power; on l. side which feels cold to touch; after 12 P.M. and in morning, without thirst; with thirst; beginning in thighs; about 3 A.M., followed by thirst, then profuse perspiration all over except on head; as if drenched with cold water; internal with external heat and violent sweat; followed by sweat.

Heat: morning, chill afternoon; evenings, mostly on face; dry, of covered parts; burning in face without redness; with thirst neither preceded nor followed by chilliness.

Sensation of burning heat in face which causes neither real heat nor redness; or perspiration with icy-cold hands, with moderate warmth of rest of body.

Flushes of heat in face without thirst.

Dry heat: of covered parts; during sleep.

Sweat: only on uncovered parts; general, except head; when walking in morning, mostly on head; during sleep, stops when he awakens; oily, fetid, smelling sweetish; with congestion of blood to head; sour-smelling, or fetid, almost every night; profuse, at night, staining clothes yellow as if saturated with oil; staining brownish yellow; most on upper part of body; profuse about genitals; scrotum, perineum and inner surface of thighs dripping; on feet; > indoors.

‖Chills began promptly at half past five every afternoon, and lasted for an hour; very severe, always beginning in thigh from knee to hip, and from there extending over body; sits with a leg on each side of register and remains until chill has passed; fever several hours, followed by a profuse drenching sweat, which ends about 2 or 3 A.M., even wetting bed.

‖Intermittent fever with chronic gonorrhœal contamination.

[41] **Attacks, Periodicity.** Periodically: palpitation.

Recurring at same hour: diarrhœa.

Every five or six minutes: paroxysms of faceache.

Every hour: for two months, faceache.

Lasting two hours: asthmatic attacks.

Every afternoon at 4: chills.

Every other night: asthma <.

Every two weeks: menses.

Digitized by Google

Every three or four days: difficult stools.
Third month: abortion.

"**Locality and Direction.** Left: stitch in temple; as if a nail were driven in frontal eminence; pain in temporal muscle; drawing pain in forehead; as if a button were pressed on head; stitch through centre of eye from brain; tearing pain in eyebrow; heat and dryness in canthus; tearing pain above eye; epithelioma on lower lid; creaking in ear; meatus of ear blocked up by polypus; swelling and induration of nostril; faceache; sticking between ear and zygomatic arch; shooting in ear; fungus on lower jaw; gnawing in lower bicuspid; toothache extends to forehead and neck; pain from side to back; hernia; stitches from anus into iliac bone; a soft lump on frenum preputiæ; ovaritis; pain in groin; pain in iliac region; as if something had grown fast to lower ribs; pain from pectoral region to anterior superior spinous process of innominate bone; fungus back of ear; stiffness of neck; shooting in hip, sciatica; leg atrophied; weakness of leg when sitting; numbness of foot; chill; red itching spot with vesicles on forearm.

Right: skin on chest and abdomen yellow; as if a nail were driven into parietal bone; boring sticking in head and eye; ulcer on head; eye, objects appear smaller; aching over eye; soreness of nostril; faceache; pimple in eyebrow; sudden motion in iliac region; ileus; incarcerated flatus below diaphragm; wartlike growth on labium; painful tension in nape of neck; atrophy of arm after vaccination; warts on hand; paresis and atrophy of leg after vaccination; tubercle between scrotum and thigh.

Left to r.: ulcer on tongue.
Right to l.: faceache; stitches in hypochondria.
From before backward: neuralgia in head.

"**Sensations.** As if whole body were very thin and delicate; as if its continuity would be dissolved; as if frail and easily broken; as if made of glass; as if a living animal were in abdomen; as if a nail were pressing into vertex; as if vertex were pierced with a needle; as if a nail were driven from within outward in vertex; as if a nail were driven into r. parietal bone and l. frontal eminence; lightning-like headache; as if a convex button were pressed on l. head; as if head were screwed asunder; as if forehead would fall out; as if bones of head were being knocked to pieces; forehead, ears and eyes as if stabbed; as if knives went tearing around in brain; as if beaten; as of insects on occiput and temples; as if

Google

eyes were swollen and would be pressed out of head; as of fine sand in eyes; as if a cold stream of air were blowing through eyes; as of a foreign body in eye; as if flesh were torn from bones in l. side and back; as if abdominal muscles were pushed out by arm of a child; sudden bounding in r. iliac region as of something alive; as if blood could not circulate in back opposite pit of stomach; as if boiling lead were passing through rectum; as if anus would fly to pieces during stool; as if skin of anus were cracked and chapped; bladder as if paralyzed; as of moisture running in urethra; as if a tape prevented urination; as of a single drop running along urethra; as if testicles moved; as if testicles were contused; as of a skin in larynx; as if something were grown fast in region of l. lower ribs; as of falling drops in chest; legs as if made of wood when waking; as if lower extremities were elongated; as if muscles of thighs would break down; lightness in body when walking; as if flesh were beaten from bones; as if skin were pricked with needles; as from flea-bites.

Pain: in epigastrium; in abdomen and back; during menses.

Cutting: in lower abdomen; in urethra; in l. ovary; above l. ilium; in muscles of calves.

Piercing pain: in head.

Boring: in temples; in head; in r. eye; in l. malar bone.

Stitches: through l. temple; in scalp; through l. eye from centre of brain; from neck into ear; in hypochondria; in inguinal glands; from rectum into bladder; from anus to sacrum; from anus into l. iliac bone; in anus; in urethra; in chest; between coccyx and anus; in tendo-Achillis; in corns; in limbs and joints.

Shooting: in ulcer on head; in l. ear; in face; in l. ovary; in l. hip; in eruption.

Sticking: in l. temporal muscle; in head; in r. eye; in eye; between l. ear and zygomatic arch; in anus; as from splinters in chancres; in shoulders.

Stinging: in scalp; in eyes and lids; in edges of lids; in abdomen as from needles; in condyloma.

Pricking: above pubis into bowels; in ulcers.

Tearing: in forehead, temples and occiput; in head; in face; in scalp; in l. eyebrow; above l. eye; in abdomen; in shoulder to fingers; in corns.

Drawing: in l. temporal muscle; in l. forehead; in nape of neck; in small of back; in sacrum; in os coccygis; in thighs; in hips; in limbs.

Pressure: in vertex; in head; in eyes; at root of nose; in soft palate, upward; in hypogastric region; in vulva; in stomach during menses; in back and loins.

Digitized by Google

Burning: in scalp; in eyes; in lids; in edges of lids; in spots in face; in anus; in perineum; in fundus of bladder; in urethra; between prepuce and glans; in vagina; in l. ovary; above l. ilium; in sacrum; in varicose veins of genitals during menses; in erectile tumors; from small of back to between scapulæ; in all muscles; in corns; in face; of skin; of eruption after cold water; in fistulous ulcers.
Biting: in scalp.
Smarting: in anus; in tubercle near anus; in pudendum; in vagina; in tumors on back.
Throbbing: in face; in back; in shoulder to fingers.
Gnawing: in decayed tooth.
Contracting pain: in vulva.
Cramplike pain: in vulva and perineum; in heart; in lumbar region.
Constriction: in anus.
Bearing down: during menses.
Ulcerative pain: from shoulder to fingers.
Griping pain: in head.
Squeezing: in l. ovary.
Jerking: in upper lip; in penis.
Aching: above eye to back of head; over r. eye; in eye; in testes; in l. hypochondrium.
Soreness: of penis; of vulva; about buttocks; in r. nostril; after faceache; of tip of tongue; of navel; in anus.
Bruised feeling: in back and loins; in tumors on back.
Tensive pain: in l. ala nasi.
Tension: in abdomen; in nape of neck; in small of back; from hip joint to groin; along posterior part of thigh to knee; in dorsa of feet and of toes.
Swollen feeling: in eyes and lids; in inner ears.
Stiffness: in nape and l. side of neck.
Heat: in l. outer canthus; around eye and side of face; in face.
Tingling: in scalp; in finger tips.
Numbness: after faceache; in forearm and fingers; in heel; in l. foot; with rheumatism.
Formication: in urethra.
Coldness: through whole length of spine; in arms.
Dryness: in eyes; in l. outer canthus; of nose.
Itching: in scalp; in anus; in pudendum; in urethra; on inner surface of prepuce; of ulcers; on abdomen; on back; on arms and legs; in ulcers.

"**Tissues.** A surplus of producing life; nearly unlimited proliferation of pathological vegetations, condylomata, warty sycotic excrescences, spongy tumors and spongy pock exudates organize hastily; all morbid manifes-

Google

tations are excessive, but appear quietly, so that beginning of diseased state is scarcely known.
Acts prominently on sclerotic coat of eye.
Rapid emaciation, with deadness of affected parts.
Chlorosis.
Dissolution of fluids of body, which become acrid, probably caused by *Thuja* perverting lymphatic secretions; disturbs digestion and sanguification.
Œdema about joints.
Rheumatism; flesh feels as if beaten off bones.
Rheumatic or arthritic pains, especially of a gonorrhœal nature; arthritis deformans.
Cold, painless glandular swellings.
Indurations, later softening.
Rachitis.
Bad effects from vaccination.
Sycosis; syphilis.

"**Touch. Passive Motion. Injuries.** Touch: scalp sensitive to; vertex sensitive; eruption on head <; > pain in eyebrow; < soreness of r. nostril; pain in malar bone >; hemorrhoids sensitive; fissured anus painful; wartlike growth on r. labium painful; causes fungus to bleed; condylomata painful.
Pressure: pain as of a nail in head >; headache >; < sore nostril; > pain in tooth; pain in l. side <.
Rubbing: > head; > eruption on head; blurring of vision >; gently, > itching; ulcers >.
Scratching: > scalp.
Closing eyes: everything seemed jumping.
After vaccination: ulcer under tongue; diarrhœa; asthmatic attacks; whooping cough; atrophy of r. arm; paresis and atrophy of r. leg; falling out of hair; sleeplessness.
After a fall: wartlike growth on r. labium.
Overlifting: headache <.

"**Skin.** Itching on different parts or a sensation as if skin were pricked with needles.
Itching as from flea-bites on abdomen, back, arms and lower extremities.
Biting itching on skin, > by scratching, but continuing to burn.
Fine capillary network on skin, looking like veining of marble.
Luxuriant growth of hair on parts otherwise not covered by hair.
Eruption burns after applying cold water.
Skin: looks dirty; brown, here and there; brown-white spots; dirty brownish discoloration.

Digitized by Google

Cadaverous exhalation from skin.
Eruptions on covered parts.
White, scaly, dry, mealy, or itching crusty herpes.
Skin of whole body looks dirty, cannot be washed clean.
Ringworm.
Shingles; herpes zoster.
Impetigo; eruption all over body; itching and shooting, especially at night; pustular eruption about knee; > by gentle rubbing.
‖ Epidermis on one-third of body and almost half of back raised as if by an enormous blister; serous fluid has escaped and is still flowing through small openings in epidermis; great fever; indescribable restlessness; child could obtain no ease in any position and was utterly sleepless. θ Pemphigus foliaceus.
Pemphigus especially when painful.
‖ Brown or red mottled spots with itching shooting in evening; purulent pimples containing fluid like varnish. θ Rupia.
‖ Chicken-pox; varicella.
Pocks appeared which reached their height sixth or seventh day, when suppuration diminished, fever disappeared and pocks began to dry up, and soon scaled off without leaving any mark.
‖ Variola, confluent on face; third day of eruption, which extends all over body and limbs; restless at night; feverish; r. upper lid swollen; begins to scab on face; swelling under eyes; two variolous pustules on tip of tongue; pustules on face and legs have black centres; diarrhœa slimy and green; no pits.
‖ Variola; pains in upper arms, fingers and hands, with fulness and soreness of throat; areola around pustules marked and dark-red, pustules milky and flat, painful to touch; especially during suppurative stage where it may prevent pitting; recommended as a preventive as well as a curative by Boenninghausen, who states that it shortened all cases in epidemic of 1849, and prevented scars.
A red tubercle between scrotum and r. thigh.
On l. forearm a red, round, itching spot with white vesicles raised upon it.
Wart-shaped excrescences size of poppy seed, on hands.
‖ ‖ Wartlike excrescences on back of hand, on chin and on other places.
‖ ‖ Warts and condylomata, large, seedy and pedunculated; sometimes oozing moisture and bleeding readily.
‖ Condylomata about anus painfully sore, even to touch.
‖ Ulcers: flat, with a bluish-white bottom; with indurated

edges surrounded by blisters containing pus; deep, burning, and fistulous; itching, pricking, containing proud flesh; spongy on edges; ulcers with serrated edges; > from rubbing or scratching.

Epithelioma.

Eruptions only on covered parts, burn violently after scratching.

Bleeding fungous growths.

Nævus.

Moist, mucous tubercles.

Blood-boils on back.

Sweat only on uncovered parts, while covered parts were dry and hot; very restless and desponding.

Strong perspiration, especially in axillæ.

Stages of Life, Constitution. Hydrogenoid constitution; this constitution is distinguished from the oxygenoid and the carbo-nitrogenoid, in that it is more hygroscopic *i. e.*, it possesses an increased capacity to contain water; hence, rain, cold, damp weather, baths, and food that increases the number of molecules of water in the system, aggravate the symptoms of the hydrogenoid constitution.

Strumous and sycotic persons.

Lax muscles; light hair; children.

Child, æt. 7 weeks, suffering since birth; diarrhœa.

Boy, æt. 13 months; variola.

Child, æt. 15 months, after vaccination; swelling of glands.

Boy, æt. 1½, suffering seven weeks; diarrhœa.

Boy, æt. 1½, strong and healthy, after vaccination; ulceration of fingers.

Child, æt. 2, after vaccination; paresis of leg.

Child, æt. 2½, after vaccination; asthma.

Girl, æt. 3, after vaccination; conjunctivitis.

Girl, æt. 3, after vaccination; imbecility of mind and loss of speech.

Child, æt. 3, after vaccination; atrophy of dorsal muscles.

Child, æt. 4, after vaccination; ulcer of tongue.

Boy, æt. 4, vaccinated two years ago, since then ailing; affection of bowels and bladder.

Girl, æt. 6; chorea.

Child, æt. 7, after vaccination; pustular eruption.

Girl, æt. 8; warts.

Girl, æt. 9, vaccinated when two years old, ailing ever since; chronic ophthalmia and otorrhœa.

Boy, æt. 9, handsome, well developed, suffering six weeks; incontinence of urine.

Girl, æt. 9, brother died of same disease; pemphigus.

Girl, æt. 10, father sycotic; fungus on lower jaw.

Girl, æt. 11, vaccinated when three and a half years old, ailing ever since; keratitis.

Digitized by Google

Boy, æt. 11; spinal curvature.
Girl, æt. 12, light complexion, scrofulous diathesis, suffering four years; enuresis.
Girl, æt. 12; warts on hands.
Girl, æt. 14; ranula.
Girl, æt. 14, leuco-phlegmatic temperament, scrofulous diathesis, suffering two years; enuresis.
Boy, æt. 14, scrofulous; warts on hand.
Girl, æt. 14, dark hair and eyes; warts on hands.
Girl, æt. 19, blonde, in apparent health, suffering several years; constipation.
Miss C., æt. 21, thin and fair; diarrhœa.
Man, æt. 21; pains in chest.
Man, æt. 24, after revaccination; nervous disturbances.
Musician, æt. 25, gonorrhœa.
Man, æt. 26; syphilitic iritis.
Girl, æt. 26; tinea ciliaris.
Man, æt. 30, weight 240, ill seven days; rheumatic fever.
Man, æt. 32, dark; hemorrhoids.
Man, æt. 34, tall, chestnut hair, pale complexion, face puffy, had scabies twice; steatomatous tumors on back.
Farmer, æt. 36, suffering three months; incontinence of urine.
Mrs. B., æt. 40, mother of several children, has had several premature deliveries; uterine disorder.
Woman, æt. 41, washerwoman, suffering twelve years; prosopalgia.
Man, æt. 44, affected with chronic hemorrhoids, suffers since nine years from syphilis, had energetic treatment with Merc. and Iodide of Potash; headache.
Woman, æt. 46, tall, stout, mother of three children; polypus of uterus.
Man, æt. 47, after vaccination; asthma.
Mrs. W., æt. 50; sunstroke.
Man, æt. 50, lymphatic sanguine temperament, laborer, of regular habits; ulcer above eye.
Lady, æt. 50; ulcer on head.
Man, æt. 52, after revaccination twelve weeks ago; nervous disturbances.
A man, æt. 60, day laborer, poorly nourished, had gonorrhœa several times, large l.-sided hydrocele from inguinal hernia; incontinence of urine.
Mr. A., æt. 63, auctioneer; polypus of ear.
Woman, æt. 72; neuralgic alveolar periostitis.
Mrs. H., æt. 72, suffering three or four years; fungous excrescence on neck.
Young man, nervo-sanguine temperament, dark complexion, good habits; inflammation of sclerotic.

Google

Young married woman, of good social standing, suffering three years; sciatica.

[10] **Teeth and Gums.** ‖Bleeding from cavity after extraction of tooth.
‖Hemorrhage from gums and mouth.
[12] **Inner Mouth.** ‖Cancrum oris.
[13] **Throat.** ‖Putrid sore throat.
[17] **Scrobiculum and Stomach.** ‖Sinking in stomach. θHemorrhage.
Heat and burning in stomach; rising up in œsophagus.
Hæmatemesis, with erosion of mucous coat of stomach.
[19] **Abdomen.** Constipation; hard, dry stool.
[20] **Stool and Rectum.** ‖Dysentery, passages almost pure blood.
Chronic diarrhœa of bloody mucus.
[21] **Urinary Organs.** ‖Hæmaturia, passive.
‖Chronic catarrh of bladder.
‖Diabetes.
[23] **Female Sexual Organs.** Displaced uterus with consequent menorrhagia; profuse flow.
‖Gushing of bright-red blood from uterus, at least movement, later blood pale from anæmia; at times dark clots; frequent desire to urinate.

Digitized by Google

||Great bearing-down feeling in pelvis when walking and standing; backache; sore pains in vaginal and uterine regions; copious discharge of yellowish, stringy leucorrhœa; constipation; menstruation inclined to menorrhagia; monthly flow lingers several days longer than usual.

||Sallow face with white lips and tongue; tossing in bed from evening until after midnight, with a feeling as if hips and small of back were falling in pieces and a desire to bind them up tightly. θMetrorrhagia.

|Excessive flooding with fainting; face pale and anxious; extremities cold; no pain; flabby subjects.

|Passive internal uterine hemorrhages, with occasional clots and much fetor.

||Flooding with fainting.

|Profuse uterine hemorrhage, at climacteric period, with prostration, vertigo, dimness of sight, palpitation and painful sinking at pit of stomach.

||Hemorrhage in abortion at third month.

||Ante-partum hemorrhage; os uteri dilated to size of half dollar; no pains; flooding excessive.

|Menses come on after overexertion, too long a ride, etc., profuse flow.

Profuse flow every two weeks, lasting a week or longer; yellow and thick leucorrhœa between periods.

Leucorrhœa: bloody, with great prostration; yellow, creamy, profuse, between menses.

|Climaxis with weak sight, anxious look; pale; faint; flow returns every two weeks.

[31] **Pregnancy. Parturition. Lactation.** Threatened abortion; profuse hemorrhage.

Lochia too profuse; lasts too long.

Post-partum hemorrhage.

TROMBIDIUM.

Acaridæ.

A parasite found singly or in groups upon the common housefly, of a bright-red color, nearly circular in shape.

The alcoholic tincture, a brilliant orange in color, was prepared from specimens, about one hundred and fifteen in number, collected in Frankford, Philadelphia in September, 1864.

The provings, under supervision of Hering, were made by Harvey, Heath, J. F. R., and Bancroft, the potencies used 3d dec., 6th dec., 9th cent., 18th cent., and 30th cent., see H. M., Sept., 1865, p. 83.

CLINICAL AUTHORITIES.—*Diarrhœa*, Lippe, Org., vol. 1, p. 364, vol. 2, p. 205; Rushmore, Hom. Phys., vol. 2, p. 318; *Diarrhœa and dysentery*, Lippe, Hom. Phys., vol. 5, p. 232.

[1] **Mind.** Loss of memory; inability to collect ideas; absence of ideas.

Talkative during day; disposed to be contrary; constant disposition to gape.

[3] **Inner Head.** Dull, heavy, sometimes sharp pains in temples extending over frontal region, < l. side; 9.30 P.M.

Dull pain in l. side of head; < shaking head and walking; 10 P.M.

Shooting pain in r. side of head, near parietal eminence; 11 A.M.

Shooting pains in r. side of head, just above temporal region; 3 P.M.

Dull feeling through head; forenoon.

Oppressive headache; lightness of head; dizziness of head from lightness; it felt as if there were no weight in head.

[4] **Outer Head.** Intolerable itching of scalp, especially vertex and occiput; 7 A.M.

[5] **Sight and Eyes.** Redness of internal portion of conjunctiva, similar to pterygium.

Lachrymation in open air.

Intolerable itching in inner canthus of r. eye; 9 P.M.

[6] **Hearing and Ears.** Shooting pains in r. ear; 3 P.M.

Dull, occasionally severe shooting pains in r. ear, < swallowing or blowing nose; slight soreness in r. side of throat; shooting pains in l. heel and l. wrist in forenoon.

Afternoon shooting pains in both ears, occurring quite frequently, and felt more severe in r. one.

Digitized by Google

Itching in ears soon after rising; eructations tasting of ingesta, lasting an hour after each meal.

Burning in pinna of both ears, more especially in right.

[7] **Smell and Nose.** Dryness in nose, like sniffles.

On rising, nasal passages much obstructed, in afternoon and evening fluent coryza, especially while eating, and in open air; in evening dryness and scabs in nose.

Mucous discharge from anterior nares, < while eating dinner.

[8] **Upper Face.** Evening congestion to head with red face and ears.

[9] **Lower Face.** Awoke with pain in l. mastoid region; 7 A.M. Itching in spots on chin and among whiskers.

[10] **Teeth and Gums.** Severe dull pain in a decayed tooth of l. side, brought on during evening by reading aloud; prevented sleep; < lying down, eating, talking, and from cold air; > taking warm drink into mouth. (*Staphis.* relieved.)

[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations after meals tasting of ingesta.

[18] **Hypochondria.** Sore, dull, aching pain in region of liver, just beneath free end of floating ribs; place very sensitive to touch; evening.

[19] **Abdomen.** Forenoon dull, heavy pain over whole abdomen, < by drinking cold water; shooting pain in phalangeal joint of third finger, at the same time in l. knee joint; pain in pit of stomach (dull griping), which together with abdominal pain was < from eating dinner.

Brown fluid discharges, with or without bloody streaks, occurring every half hour; violent colic causing patient (a strong man) to scream with pain; severe tenesmus.

Violent shooting pain in abdomen, beginning in l. side, in hypogastric region.

Griping pains in abdomen, < from eating or drinking.

Abdomen very sore.

Entire abdomen much distended with flatus; 10 P.M.

Pain in abdomen as from incarcerated flatus.

Dull pain in abdomen < from pressure.

Darting pain in abdomen, < r. side, above hips; 10 A.M.

[20] **Stool and Rectum.** Sudden griping pain in abdomen, more on l. side, which induced a stool.

Immediately after rising was seized with a griping in abdomen, obliging a stool which was diarrhœic, relieving pain for a while, when it returned with greater violence and induced a second stool, accompanied by severe tenesmus causing prolapsus ani, and followed by a burning sensation about anus.

Google

Diarrhœic stool of brownish color, followed by a second at 10 A.M.; light brown in color; preceded and followed by a dull pain in abdomen; at 2 P.M. another of same nature with much straining.

Stools: ‖thin, brown, fecal; mucous; ‖blood-streaked; bloody; purulent; mucous and bloody with hard fecal lumps; frequent; scanty; ‖in small fecal grains, constantly oozing; soft, pappy; brown, with some tenesmus preceded by pain in abdomen; with severe tenesmus and slight prolapsus ani.

Small, loose stools preceded by terrible sore pains in intestines, attended with tenesmus and shivering along back; on attempting to rise was obliged to lie down instantly, to prevent fainting; in afternoon fever, with pulsation of arteries of head, dull aching in occiput, aching in small of back; awoke about 5 A.M. with pain and urging to stool.

Tenesmus with prolapsus, followed by pain lasting for several minutes as if excoriated.

Aggravation: ‖in morning; ‖after eating and drinking; from fruit; from sugar; in childbed.

Before stool: ‖pain in l. side of abdomen, with perspiration; ‖griping pains; sore pain in intestines.

During stool: ‖pain in abdomen continues; ‖tenesmus; ‖chills in back; much urging.

After stool: ‖tenesmus; ‖prolapsus ani; ‖burning in anus; great debility; weakness in knees; colic temporarily relieved, but soon returns.

‖Diarrhœa after dinner and supper; before stool, colicky pains; during stool, urging and tenesmus; after stool, burning in anus.

‖Thin, brown, sometimes yellow, frequent stools, expelled with force; crampy pains before, during and after stools; griping pains starting from both groins and meeting in centre of abdomen on a line with groins; then a small passage; then more pain, and so on; prostration after stool and coldness of whole body except face, which is hot; stools after dinner or supper, never after breakfast; bearing down during stool, < after stool, as if everything were coming out at anus; bloatedness of abdomen after stool; debility after stool; cramps in calf of r. leg after one of these paroxysms; sensation as of hot air blowing over lower part of abdomen, and over lower part of thighs after stool; thirst after stool; appetite good; bruised and dragging-down feeling in abdomen; feels as if abdomen needed support.

A man of full habit, subject to attacks of rheumatism and congestion of liver, complained that when he began to

Google

eat his dinner at 5 P.M. he experienced violent pain in intestines, pain increased until he had to seek relief suddenly, passed very thin feces and some mucus, with flatus and great tenesmus; pains not > until he had three or four similar passages, when he ceased to suffer till he dined again next day.

‖Great tenesmus, prolapsus ani, discharge of mucus and soft feces, or pus, blood and mucus, with occasional very small pieces of feces; skin dry, tongue coated, thirst moderate, pain in bowels moderate. θDysentery.

‖Dysentery; begins early in morning; discharges consist of thin brown substances, later mixed with mucus, and finally consisting of mucus; pain preceding discharges, < on l. side of abdomen, causing perspiration; discharge creates tenesmus, from it prolapsus ani, followed by burning in anus; chills in back; great debility; pain and discharges < from eating and drinking.

‖Prolapsus ani and burning about anus after stool.

[27] **Cough.** Slight hacking cough from irritation in throat.

[28] **Inner Chest and Lungs.** Sharp pain in lower part of l. chest; 7 A.M.

Shooting pains in l. chest in region of heart; 7.30 A.M.

Cutting pain in r. side of chest, on r. of lower part of sternum; 7 A.M.

[29] **Heart, Pulse and Circulation.** Dull pain in region of heart, rendered sharp by drawing a long breath; 4 P.M.

9 A.M., pulse full and quick and beating 100 per minute, usually 70; throbbing all over chest.

Pulse intermittent.

[31] **Neck and Back.** Pimples on back of neck; itching sensation about neck and on chin among whiskers.

[32] **Upper Limbs.** Severe shooting pains in shoulder joints.

Shooting pains in r. shoulder, forenoon.

Dull intermittent pain in l. forearm, afterward shooting; 11 P.M.

Dull pain in bones of l. forearm; 12 M.

Shooting pain in r. elbow, wrist and finger joints, at different times, all forenoon.

Sharp stinging pain at a single small spot on inner dorsum of wrist, lasting about a minute; 4 P.M.

Pains in r. wrist joint, at first shooting and intermittent, afterward constant; at noon.

Shooting pains in phalangeal joint of second finger on l. hand; 8.30 A.M.

Stinging pain in palmar surface of r. thumb, ungual phalanx.

[33] **Lower Limbs.** Dull pain in l. hip joint, felt only after rising from a sitting posture and attempting to walk, a limping gait; > after a few steps.

Digitized by Google

Tearing pain in lower part of l. thigh; 2.30 P.M.
Flying sharp pain in r. thigh.
Boring pain in r. tibia during forenoon.
Slight intermitting pains in r. knee joint; 9 A.M.
Dull pain in l. ankle, inner part, made sharp by bearing weight on it; 12 P.M.
Shooting pains in r. ankle; 3 P.M.
Tearing pain in tarsus of l. foot; 1 P.M.
Shooting pains in outer side of r. metatarsus; 3 P.M.
Dull shooting pain in l. heel inner side.
Shooting pains in l. tarsal bones; 6 P.M.
As if three small toes on l. foot would be twisted off.

[34] **Limbs in General.** Shooting pains in joints of upper and lower extremities afternoon and evenings.
Heaviness of all limbs.

[35] **Rest. Position. Motion.** Inability to keep quiet.
Lying down: toothache <; prevents fainting.
Swallowing, or blowing nose: shooting in r. ear.
Shaking head: pain in l. side of head <.
Reading aloud: brought on toothache.
Rising up: fainting.
After a few steps: pain in hip joint >.
Walking: pain in l. side of head <; pain in hip joint.

[36] **Nerves.** Fainting on rising up; debility after stools.
Inability to keep quiet.

[37] **Sleep.** Almost constant inclination to gape.
8 P.M., sleepiness and hoarseness; restless during sleep; chilliness during night, < morning on waking.
Lewd dreams during night.
Wakeful and restless after 4 A.M.

[38] **Time.** 4 A.M.: wakeful and restless.
5 A.M.: woke with pain and urging to stool.
Morning: diarrhœa <; dysentery begins; chilliness <.
7 A.M.: itching of scalp; pain in l. mastoid region; pain in lower l. chest; cutting in r. chest near sternum.
7.30 A.M.: shooting in cardiac region.
8.30 A.M.: pain in phalangeal joint of second finger of l. hand.
9 A.M.: pain in r. knee joint.
10 A.M.: darting in abdomen.
11 A.M.: pain in r. side of head.
Forenoon: dull feeling in head; shooting in l. heel and wrist; dull pain in abdomen; shooting in r. shoulder; shooting in elbow, wrist and finger joints; boring in r. tibia.
Noon: pain in r. wrist joint; dull pain in bones of l. forearm.
1 P.M.: tearing in l. tarsus.

Digitized by Google

2.30 P.M.: tearing in l. thigh.
3 P.M.: pains in r. side of head; shooting in r. ear; shooting in r. ankle; shooting in r. metatarsus.
4 P.M.: pain in cardiac region; stinging pain in wrist.
6 P.M.: shooting in l. tarsal bones.
Afternoon: shooting in joints.
During day: talkative.
Evening: congestion to head; dryness and scabs in nose; pain in region of liver; shooting in joints.
8 P.M.: hoarseness and sleepiness.
9 P.M.: itching in r. inner canthus.
9.30 P.M.: pains in temples.
10 P.M.: pain in l. side of head; abdomen distended.
11 P.M.: dull pain in l. forearm.
12 P.M.: pain in l. ankle.
Night: chilliness; lewd dreams.

[39] **Temperature and Weather.** Warm drink: toothache >.
Open air: fluent coryza; felt >.
Cold air: toothache <.
Cold water: pain in abdomen <.

[40] **Fever.** Heats come over her; thinks her breath is leaving her.

[41] **Attacks, Periodicity.** Every half hour: brown fluid discharges from bowels.

[42] **Locality and Direction.** Left: pains in temple; pain in head; shooting in heel and wrist; pain in mastoid region; pain in decayed tooth; shooting in knee joints; shooting in abdomen begins; griping in abdomen <; pain in lower chest; shooting in region of heart; pain in forearm; shooting in joint of second finger; pain in hip joint; tearing in thigh; pain in ankle; pain in tarsus; shooting in heel; shooting in tarsal bones; as if toes would be twisted off.
Right: shooting pain in side of head; itching in inner canthus; shooting in ear; sore throat; burning in pinna of ear; darting in abdomen <; cramp in calf; cutting in chest near sternum; shooting in shoulder; pain in wrist joint; stinging in thumb: sharp pain in thigh; boring in tibia; pain in knee joint; shooting in ankle; shooting in metatarsus.

[43] **Sensations.** As if there were no weight in head, lightness; as from incarcerated flatus in abdomen; as if excoriated after tenesmus; as if everything were coming out of anus; as of hot air blowing over lower part of abdomen and thighs; as if abdomen needed support; as if three toes on l. foot would be twisted off; as if her breath were leaving her.
Pain: in l. mastoid region.

Digitized by Google

Sharp pains: in temples and frontal region; in lower l. chest; in region of heart when taking a long breath; in l. inner ankle when bearing weight on it.
Cutting pain: on r. of lower part of sternum.
Tearing pain: in lower l. thigh; in l. tarsus.
Boring pain: in r. tibia.
Flying pain: in r. thigh.
Darting pain: in abdomen.
Shooting pain: in r. side of head; in ears; in l. wrist and heel; in phalangeal joints of third finger; in l. knee joint; in abdomen; in region of heart; in shoulder joints; in r. shoulder; in r. elbow, wrist and finger joints; in phalangeal joints of second finger l. hand; in r. ankle; in outer side of r. metatarsus; in l. heel, inner side; in l. tarsal bones; in joints.
Stinging pain: at a spot on inner dorsum of wrist; in palmar surface of r. thumb.
Burning: in pinna of ears; about anus; in anus.
Dull aching: in occiput; in region of liver; in small of back.
Soreness: on r. side of throat; of abdomen; in intestines.
Bruised feeling: in abdomen.
Throbbing: all over chest.
Griping: in pit of stomach; in abdomen; from groins meeting in centre of abdomen.
Crampy pains: before, during and after stools; in calf of r. leg.
Dull pain: in temples and frontal region; in l. side of head; in a decayed tooth; over whole abdomen; in region of heart; in l. forearm; in l. hip joint; in l. ankle, inner part.
Heaviness: of limbs.
Weakness: in knees.
Itching: of scalp; in r. inner canthus; in ears; on chin; in whiskers; about neck.
Dryness: of nose.

[45] **Touch. Passive Motion. Injuries.** Touch: pain in region of liver <.
Pressure: pain in abdomen <.

[47] **Stages of Life, Constitution.** Mrs. B., æt. 35; diarrhœa.
Lady, æt. 50, suffering every Summer for several years; dysentery.
Gentleman of full habits, subject to attacks of rheumatism and congestion of liver; diarrhœa.

[49] **Relations.** Antidoted by: *Merc. cor.* (diarrhœa).
Compare: *Ledum* (rheumatism); *Sulphur* (diarrhœa).

TUBERCULINUM.

The Nosode.

Fragmentary provings by Swan, upon M. B. B. with cm.; Edna Rose, with cmm. Authorities:—Refer to New Organon, July, 1879, pp. 342, 439, 449; Swan's Morbific Products, 1886; Burnett's New Cures, 1885 to 1890; J. A. Biegler's Report; C. F. Nichol's paper in Popular Science News, April, 1891.

CLINICAL AUTHORITIES.—*Tubercular meningitis*, Biegler, Org., vol. 2, p. 439; Hom. Phys., vol. 11, p. 187; Burnett, Consumption, pp. 9, 13, 31, 53; *Chronic headache*, Swan, Org., vol. 3, p. 41; *Vomiting*, Kent, MSS.; *Tabes mesenterica*, Burnett, Consumption, pp. 52, 82; *Cholera infantum*, Swan, MSS.; *Cough*, Boardman, Org., vol. 2, p. 448; Burnett, Consumption, p. 15; *Threatened phthisis, Incipient tuberculosis*, Burnett, Consumption; *Tubercular synovitis of knee*, Burnett, Consumption, p. 47; *Spasms*, Swan, Organon, vol. 2, p. 342; Hom. Phys., vol. 11, p. 187; *Ringworm*, Burnett, Consumption, pp. 96–100.

[1] **Mind.** ||Although naturally of a sweet disposition, became taciturn, sulky, snappish, fretty, irritable, morose, depressed and melancholic, even to insanity. θTubercular meningitis. Burnett.

||Fretful, ailing, whines and complains; mind given to be frightened, particularly by dogs. θHydrocephaloid. Burnett.

[3] **Inner Head.** πSevere headache, < on second day, lasting until third, recurring from time to time for many weeks and compelling quiet fixedness. Burnett.

|Headache, with frequent sharp, cutting pains passing from above r. eye through head to back of l. ear. Rose.

||Headache of great intensity preceded by a shuddering chill passing from brain down spine; with attack a feeling as if head above eyes were swollen; became unconscious with screaming, tearing her hair, beating her head with her fists or trying to dash it against wall or floor. Swan.

||Headache of forty-five years' standing, pain passing from r. frontal protuberance to r. occipital region. Swan.

||Terrible pain in head, as if he had a tight hoop of iron around it; trembling of hands; distressing sensation of damp clothes on his spine; almost absolute sleeplessness; profound adynamia; was thought by his friends to be on verge of insanity; most of his brothers and

Digitized by Google

sisters had died of water on brain; r. lung solid, probably from healed-up cavities, as he at one time suffered from pulmonary phthisis. Burnett.

‖Sullen, taciturn, irritable, screams in his sleep, is very restless at night, costive; sister died of tubercular meningitis. Burnett.

‖Fretful and ailing, whines and complains, indurated glands can be felt everywhere, child hot, drowsy, urine red and sandy, much given to be frightened, particularly by dogs; was vaccinated and had a very bad arm for four months thereafter; would not smile, whimpers when spoken to, skin dingy, skull hydrocephalic. Burnett.

‖Boy, æt. 20 months, ill for days with head, high fever, restlessness and constant screaming; finally no sleep for forty hours, followed by a condition of collapse; peculiar smell of body; family history of tuberculosis. Burnett.

‖Tubercular meningitis, with effusion; head greatly enlarged; alternately wakeful and delirious at night, talked nonsense by day, at intervals; nocturnal hallucinations and fright; delirium; pyrexia; had eczema which almost disappeared after two unsuccessful vaccinations, and which were soon followed by above condition; after administration of remedy there occurred a severe pustular eruption, then patches of a lepra and eczema appeared. Burnett.

‖Basilar meningitis. Sinker.

‖Tubercular meningitis. Sinker.

‖Acute cerebral meningitis, with intense strabismus. Biegler.

[7] **Smell and Nose.** Soreness inside of nose, commencing as watery pimples, which, suppurating, form scabs; nose and lips somewhat swollen; itched slightly. Rose.

[9] **Lower Face.** Slight swelling and itching of lips. Rose.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea before breakfast, with sudden diarrhœa. M. B. B.

‖Frequent vomiting. Kent.

[17] **Scrobiculum and Stomach.** ‖Windy dyspepsia, with pinching pains under ribs of r. side in mammary line. Burnett.

[19] **Abdomen.** ‖Fever, emaciation, abdominal pains and discomfort, restless at night, glands of both groins enlarged and indurated; cries out in sleep; strawberry tongue. θPhthisis. Burnett.

‖Tabes mesenterica; swelling on l. side, also on r.; complains of a stitch in side after running; languid and indisposed to talk; nervous and irritable; talks in his

sleep, grinds his teeth; appetite poor; hands blue; indurated and palpable glands everywhere; a drum belly, spleen region bulging out. Burnett.

| | Inguinal glands indurated and visible; excessive sweats; chronic diarrhœa. θTabes mesenterica. Burnett.

[20] **Stool and Rectum.** Sudden diarrhœa before breakfast, with nausea.

| | Diarrhœa, furious fever, burning hot skin, great heat in head, red, flushed face, eyes turned upward, quivering and rolling; peculiar fetid smell of body. θIncipient tuberculosis. Burnett.

| | Cholera infantum. Swan.

| | Severe hemorrhages from bowels, cough; emaciation; family history of phthisis. Burnett.

[21] **Cough.** | | Slight tedious hacking cough, which had lasted for months in a girl of a distinctly phthisic habit. Burnett.

| | Hard, dry cough, sometimes slight, but generally no expectoration, slightly feverish. Boardman.

| | Hard, dry cough, shaking patient, more during sleep, but did not waken him. Boardman.

| | Expectoration of non-viscid, very easily detached, thick phlegm from air passages, followed after a day or two by a very clear ring of voice. Burnett.

[22] **Inner Chest and Lungs.** | | Slight hacking cough, continuing all day, < at bedtime and on rising; emaciation; dulness on percussion at apex of r. lung. θThreatened phthisis. Burnett.

| | Girl, æt. 15, tall for her age; tonsils enlarged; chronic discharge from nose, < early morning on rising; speech thick; thorax of pigeon-breast type; menstruated freely; perspires much across nose; very bad perspiration of chest, armpits, palms, nose and feet; feels very chilly; spleen swollen; distinct dulness on percussion at apex of r. lung; suffered badly from vaccination; gets chilblains. θIncipient tuberculosis. Burnett.

| | Hectic flush of cheeks; shortness of breath; slight hacking cough; several strumous scars on neck; dusky skin; large, moist râles in both lungs; increased vocal resonance of r. lung; amphoric sounds in r. lung; large, soft-feeling gland in l. side of neck; very pronounced endocardial bruit, best heard at apex beat (*Iodoformum* 3x in four grain doses for two months, with improvement, followed by *Tuberculinum* c. in very infrequent doses). Burnett.

| | Incipient phthisis in a boy æt. 7; loss of flesh; great prostration; morbid timidity; glands of groins and on both sides of neck very much enlarged and indurated,

Google

particularly glands over apex of r. lung; as he had suffered much from vaccination, *Thuja* 30 and *Sabina* 30 were first given, then *Tuberculinum* c. Burnett.

‖Nocturnal perspirations; notched incisors; indurated glands everywhere, very large and numerous; drum-bellied; grinding of teeth at night; great susceptibility to taking cold; perspiration < at back of lungs and on head; big head, with bulging forehead; subject to attacks of fever and diarrhœa. θIncipient phthisis. Burnett.

‖Incipient tubercular disease; restless at nights; sleepless; grinds teeth; tendency to diarrhœa; want of appetite; foul breath; notched teeth; pain after food; vomiting of food; indurated glands; strawberry tongue; naughty; very irritable temper; puny growth; very thin; girl, æt. 6. Burnett.

‖A nasty little cough for seven weeks; much expectoration; pains in r. lung; evening fever; liver and spleen enlarged; cough < morning after breakfast; neck slightly goitrous; eats hardly any breakfast. Burnett.

‖Cough, < 6 A.M.; notched incisors; thin and puny; cervical and inguinal glands much enlarged and indurated; strawberry tongue; girl, æt. 7. θIncipient phthisis. Burnett.

‖No respiratory sounds at top of r. lung, and vocal resonance slightly increased; pain in l. side; profuse perspiration; girl, æt. 18. Burnett.

‖Much fever, < evenings; restless and terribly irritable; much depressed and in almost constant agitation; tongue very red; chronic diarrhœa; has lost fourteen pounds during last six weeks; has no appetite; evacuations discharged from bowels as from a pop-gun. θThreatened phthisis. Burnett.

‖Bad cough of about twelve months' duration; expectoration of blood; one of apices was audibly diseased; has had pneumonia; chest flat; respiration accelerated; tanned unduly in sun. Burnett.

‖Anæmic, sickly, pale; profound debility; dyspnœa, cannot mount or hurry; menses irregular. θPhthisis pulmonum. Burnett.

‖Lady, æt. 26, in first stage of consumption; dyspnœa and rapid breathing; loss of flesh; greasy, dingy skin. Burnett.

‖Stout man, bright, florid complexion, mother died of phthisis, with which disease her sister is suffering; gets pneumonia very often in cold weather; hence travels from place to place to avoid colds; coughs much, brings up much phlegm; perspired profusely and drank great quantities of fluids; wretched sleepless nights, with

Google

almost constant fever; glands of neck much enlarged. θPhthisis. Burnett.

‖Complains that she has been in consumption for many years; is very thin and consumed with fever; lungs very flat; respiration almost imperceptible; fever; poor appetite; languid. Burnett.

‖Ringworm on scalp; lymphatic glands everywhere palpable; ribs very flat; strawberry tongue, bad cough, < at night; although 11 years old she had practically no teeth, they were rudimentary, and not above level of of gums. Burnett.

‖Pronounced phthisical habit; severe piles; constipation; brown cutaneous affection on abdomen. Burnett.

[31] **Neck and Back.** ‖Indurated cervical glands.

Lump size of a walnut on cord of neck, is movable and occasionally itches. Rose.

[33] **Lower Limbs.** Lame feet for three weeks, would walk or stand on sides of feet to rest them. M. B. B.

Cramps in calves. M. B. B.

‖Tubercular swelling of knee; intermittent attacks of pain in it; has expectorated clots of blood and suffered from exhausting sweats; family history of phthisis. Burnett.

‖Tuberculous disease of l. knee; for eleven months had been limping; knee much enlarged and very tender; teeth dirty and carious; strawberry tongue. Burnett.

‖Tubercular synovitis of l. knee. Burnett.

[36] **Nerves.** ‖Suddenly became unconscious while sewing or talking, began screaming, tearing her hair, beating her head with her fists, or trying to dash it against wall or floor; attacks daily, for a month, then spasms set in, with rolling of head from side to side and moaning; continuing five weeks, followed by a recurrence of fainting fits, at least twice a week; a few hours before an attack of fainting, a shuddering like a chill seemed to go from brain down spine; when questioned about an attack, she said head would suddenly seem to swell over eyes and pain became "horrid," and she knew no more; between attacks she was free from all complaints except fatigue and an ever-present frontal headache. Swan.

[37] **Sleep.** Disturbed, distressful sleep. Burnett.

[38] **Time.** Morning: before breakfast, sudden diarrhœa; on rising, hacking cough <; on rising, discharge from nose <; after breakfast, cough <.

6 A.M.: cough <.

Evening: at bedtime, hacking cough <; fever.

All day: hacking cough.

Night: wakeful and delirious; restless; grinding of teeth; cough <.

Google

[40] **Fever.** ‖Fever. θPhthisis. Burnett.

[41] **Attacks, Periodicity.** Intermittent attack: of pain in tuberculous knee.
For forty hours: no sleep.
Twice a week: fainting fits.
For three weeks: lame feet.
During six weeks: lost fourteen pounds.
For seven weeks: a nasty little cough.
For eleven months: limping, from tubercular knee.
For about twelve months: a bad cough.
For forty-five years: headache.

[42] **Locality and Direction.** Left: enlarged gland on neck; pains in side; tuberculous knee.
Right: sharp pain above eye, through to l. ear; pain from forehead to occiput; pinching pains under ribs; dulness in apex of lung; increased vocal resonance in lung; amphoric sounds in lungs; pain in lung.

[43] **Sensations.** As if head, above eyes, were swollen, followed by unconsciousness; as if he had a tight hoop of iron around head; as of damp clothes on his spine; a shuddering like a chill seems to go from brain down spine.
Terrible pain: in head.
Cutting: from above r. eye, through head to back of l. ear.
Stitch: in l. side, after running.
Pinching: under r. ribs.
Cramps: in calves.
Itching: of nose and lips; in lumps on neck.

[46] **Skin.** ‖Very bad tempered; very much pigmented where sun's rays impinged upon him; teeth dirty, greenish. θPhthisical habit. Burnett.
Eruption of itching blotches all over body, with exception of face and hands. Rose.
‖Ringworm. Burnett.

[47] **Stages of Life, Constitution.** Boy, æt. 15 months, dark, fat, sister died of consumption of brain; incipient tubercular meningitis.
Boy, æt. 20 months; threatened tubercular meningitis.
Boy, æt. 2 years and 8 months, brother of two children who died of tubercular meningitis; tuberculosis.
Boy, æt. 3; incipient tuberculosis.
Girl, æt. 6, daughter of a country squire who was suffering from chronic phthisis; phthisis.
Girl, æt. 7; incipient phthisis.
Girl, æt. 7, family history of phthisis; tubercular affection of knee.
Boy, æt. 7, family history of phthisis; incipient phthisis.
Boy, æt. 8, family history of consumption; threatened phthisis.

URANIUM NITRICUM.

Uranium nitrate. $UO_2 2NO_3 6H_2O$.

A salt prepared from pitch blende. The minerals which contain Uranium are found in the lead and silver mines of Bohemia and Saxony, Bavaria, and in France near Limoges.

The triturations are made from the pure nitrate.

Provings by Blake, Hah. Mat. Med., Part 2, 1871.

Toxicological experiments, Carniet, Glycoluries toxiques, Paris, 1891.

CLINICAL AUTHORITIES.—*Ophthalmia*, Berridge, Org., vol. 2, p. 175; *Diabetes*, Koeck, H. M., vol. 12, p. 493; Koeck, Times Ret., 1877, p. 102; Hale, N. A. J. H., vol. 10, pp. 274, 384; Hale, B. J. H., vol. 20, p. 166; Hallock, N. A. J. H., May, 1882; Dudley, Hah. Mo., vol. 11, p. 270; Magdeburg, B. J. H., vol. 34, p. 67; Hughes, Bradford, B. J. H., vol. 24, pp. 253–269; McLean, H. W., vol. 7, p. 132; Cornell, N. A. J. H., vol. 16, p. 594; Jousset, Hom. Cl., vol. 1, p. 270; *Albuminuria*, Walker, Hah. Mo., vol. 11, p. 387; *Diuresis*, Bradford, N. A. J. H., vol. 8, p. 502; *Nocturnal enuresis*, Blake, A. H. O., vol. 9, p. 413; *Incontinence of urine*, Cook, A. H. O., vol. 3, p 29.

[1] **Mind.** Great despondency; ill-temper; cross; disagreeable.

[2] **Sensorium.** Vertigo; heaviness of head; restless at night, with shivering.

[3] **Inner Head.** Head heavy on waking; general languor; aching at occipital protuberance.

Pain shooting from r. orbit to occipital protuberance in evening.

Frontal headache.

Dull aching in r. temple.

Slight pain over l. eye, with contracted feeling in throat, and eructations, followed by diuresis.

Heavy, burning pain in r. side of vertex; fulness of head and sensation of blood flowing to that part, before eating.

Giddy, faint; flushing of upper body during catamenia.

Headache in l. temple, with feeling as if he had taken cold.

Severe pain at posterior edge of r. and l. temporal bones.

Headache; dull, heavy pains in forehead, r. temple and occiput.

[5] **Sight and Eyes.** Pain over l. eye.

Eyelids inflamed and agglutinated; glands enlarged.

Child 12 days old, had from birth yellow discharge from l. eye, causing adhesion of lids, l. eye red and watery; afterward same kind of discharge from r. eye, but less; discharge chiefly in inner canthus.

[7] **Smell and Nose.** Nostrils sore with purulent, acrid discharge; chronic catarrh.

Google

Dry coryza; l. nostril stuffed.

Itching in nose, small scab in r. nostril, purulent discharge from l. nostril.

‖Scabbing of inner nostril, chronic.

[12] **Inner Mouth.** ‖Ulcers in buccal cavity, with copious salivation; nausea and great thirst.

[14] **Appetite, Thirst. Desires, Aversions.** ▮Loss of appetite. θDuring catamenia.

‖Craves raw ham and tea; amenorrhœa. θDiabetes.

[15] **Eating and Drinking.** ▮Excessive thirst, emaciation. θDiabetes.

[16] **Hiccough, Belching, Nausea and Vomiting.** ▮Much nausea; vomiting; intermittent vomiting, with great thirst.

[17] **Scrobiculum and Stomach.** ▮Boring pain in pyloric region.

▮Dyspepsia, intermittent attacks of pain, with sinking at epigastrium and acid eructations, flatulency and copious urination.

‖Dyspeptic feelings quarter of an hour before dinner, with gnawing sinking at cardiac end of stomach; but without hunger or faintness.

▮Gastric and duodenal ulcers.

‖Recurring hæmatemesis. θGastric ulcer.

[19] **Abdomen.** ▮Abdomen bloated; slight diarrhœa; sharp colic and tenesmus, with burning in rectum.

▮Enteritis and peritonitis, with meteorism; great prostration.

Peritonitis followed by copious effusion.

[21] **Urinary Organs.** ‖A corpulent, temperate old man had constantly increasing debility and emaciation; œdema of legs; great pain and weariness of legs; crawling and formication of limbs; clammy state of mouth and tongue; tongue coated with white fur; sensation of dryness in mouth and fauces, with intense thirst; severe acid dyspepsia; burning, cramps and faintness in pit of stomach; bowels constipated, feces pale, odorless and dry; constant desire to urinate; enormous quantity of urine (sixteen pints in twenty-four hours); perspiration and breath have a sweet odor; skin dry and hard; night sweats; pulse 90, small (greatly relieved). θDiabetes.

‖Profuse nocturnal urination; since six months, in a man æt. 40, accompanied by burning and scalding; urine milky at times, often straw-colored, fetid, voids ten to twelve pints in twenty-four hours; dispirited, morose; constipation; mouth dry; saliva tenacious; tongue coated white; good appetite, but distress after eating; constant faintness at stomach, even after a hearty meal; debility; renal pain.

Google

| | Urination profuse, painful, pale, milky, with ammoniacal odor; nocturnal urination frequent; great debility; night sweats; constant pain and soreness in lumbar region; legs ache and feel heavy and weary; < toward evening; almost complete loss of sexual power, organs cold, relaxed and sweaty; afternoon fever; great thirst; canine hunger; bloated abdomen and constipation. θAlbuminuria.
| | A delicate, nervous woman had sudden attacks of diuresis, followed by scanty urine, dark-colored, with fever.
| | Constipation; distressing thirst; canine hunger; tongue red; loss of sleep (improved). θDiabetes mellitus.
▮ Diabetes: in two cases specific gravity decreased; in one from 1042 to 1030, in other from 1039 to 1031; thirst, hunger and quantity of urine decreased greatly.
▮ Diabetes mellitus; five cases improved.
| | Incontinence of urine at night and frequency during day.
| | A boy, æt. 3, pale, dark circles around eyes; color in cheeks changes to deep red; exceedingly restless at night with fever; urine profuse and very pale; appetite capricious. θDiabetes mellitus.
| | A man, æt. 70, hale and hearty for his age; since three years has to urinate frequently and loses flesh; drinks a great deal to assuage his constant thirst. θDiabetes mellitus.
| | A man, æt. 52, fat and full-blooded, intense thirst, had to get up several times at night to drink; good appetite, loses strength; passes large quantities of urine, giving a specific gravity of 1044, and containing 85 grs. glucose per litre.
| | Commenced to decline five years ago and has been gradually growing <; could not walk; was entirely colorless, not slightest appearance of blood in lips, tongue, ears or over entire surface; eyes sunken; cheek bones prominent; emaciation; acidity of stomach; constipation; hemorrhoids; palpitation; inordinate thirst; roaring in ears, with fainting spells; tenderness of spine near and extending to kidneys; eight to ten quarts of urine in twenty-four hours. θDiabetes.
| | For three months getting thinner every day; cannot eat enough to satisfy craving; excessive thirst, especially at night, drinking four to six quarts of water in twenty-four hours; abundant flow of urine; has to empty pot de chambre two or three times a night; urine contains sugar.
▮ Acute and chronic diuresis of children and adults.
▮ Incontinence of urine at night, from worms; urine often excoriating.

Digitized by Google

‖Burning in urethra, with very acid urine; urinary tenesmus.
‖Nocturnal enuresis. θAlbuminuria.
Urine greenish and smelling fishy.
‖Weakness of bladder from infancy; unable to retain urine without extreme pain, amounting almost to spasms during day; at night passed it freely without waking, and in cold weather in very large quantities; on taking cold, bloating of bowels and extremities, also of face; some tenderness of bowels, with frequent pain in l. side; appetite poor, and extremely dainty, craving sweets; always complaining of deranged stomach; very thin and pale.

[22] **Male Sexual Organs.** ‖Completely impotent, with nocturnal emissions.
‖Almost complete loss of sexual powers, organs cold, relaxed and sweaty. θAlbuminuria.

[23] **Female Sexual Organs.** During menstruation: vertigo; faint; flushing of upper part of body.
‖No menstrual flow during diabetic attack; pale, anæmic; craving raw ham and tea.

[24] **Pregnancy. Parturition. Lactation.** ‖Excessive lacteal secretion.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Bronchitis, with copious mucous expectoration and much emaciation; old chronic cases.

[27] **Cough.** Cough, with purulent discharge from l. nostril; loss of appetite and great prostration; lung infiltrated with grey tubercle.

[28] **Inner Chest and Lungs.** Pain at lower angle of l. scapula, < by taking a deep inspiration.
Hydrothorax and congestion of lungs.

[31] **Neck and Back.** Stiffness in loins.

[34] **Limbs in General.** White vesicles on hands and legs, with red areolæ; burn and itch.

[35] **Rest. Position. Motion.** Walking: head heavy.

[36] **Nerves.** Extreme languor on rising from bed.
Great prostration and drowsiness during catamenia.
Debility and cold feeling, with vertigo.
Debility, prostration resulting from severe organic lesion.

[37] **Sleep.** ‖Sleeplessness. θDiabetes.

[38] **Time.** During day: frequent urination; shivering.
Afternoon: fever.
Evening: shooting from r. orbit to occiput.
Night: restless; shivering; incontinence of urine; thirst.

[40] **Fever.** Shivering: alternately with heat; at night, and great restlessness.
Prostration, somnolence and shivering during day; restless at night during menstrual period.

Google

[41] **Attacks, Periodicity.** Intermittent attacks: of pain with dyspepsia.

[42] **Locality and Direction.** Left: pain over eye; headache in temple; adherence of eyelids; nostrils stuffed; purulent discharge from nose; pain at angle of scapula.

Right: aching in temple; burning in vertex; scab in nostril.

[43] **Sensations.** As if blood were flowing to head; as if he had taken cold with headache.

Pain: over l. eye; in renal region; in l. side; at lower angle of l. scapula.

Severe pain: posterior edge of temporal bones.

Boring: in pyloric region.

Shooting: from r. orbit to occiput.

Aching: at occipital protuberance; dull, in r. temple; in legs.

Gnawing: at cardiac end of stomach.

Burning: in r. side of vertex; in rectum; in pit of stomach; with urination; in urethra; in vesicles on hands and legs.

Dull pain: in head.

Cramp: in pit of stomach.

Contraction: in throat.

Heaviness: of head; in legs.

Faintness: at stomach.

Sinking: at epigastrium.

Stiffness: in loins.

Formication: in limbs.

Dryness: in mouth and fauces.

Itching: in nose; in vesicles on hands and legs.

[44] **Tissues.** Torpor; somnolency; coma.

Gastric and duodenal inflammation and ulceration.

Great emaciation; diabetes; tendency to general dropsy; effusion of serum from all serous membranes, especially pleura and peritoneum.

Diabetes mellitus and insipidus; Bright's disease, and kindred renal maladies; contracted, gouty kidneys, with gastric disturbances; irritable condition of renal plexus, of sympathetic.

Muscular paralysis.

[46] **Skin.** Epithelioma; lupus exedens; ecchymosis.

[47] **Stages of Life, Constitution.** Child, æt. 12 days; ophthalmia.

Boy, æt. 3; diabetes.

Girl, æt. 12, suffering from infancy; incontinence of urine.

Man, æt. 70, hale and hearty; diabetes.

[48] **Relations.** Compare: *Phos. ac.* (saccharine urine); *Arsen.* and *Kali bich.* (gastro-duodenal symptoms).

URTICA URENS.

Nettle. *Urticaceæ.*

The tincture is prepared from the fresh plant.
Proved by Coxe, Jr., and Shaw, reported by Neidhard, Hale's New Rem.

CLINICAL AUTHORITIES.—*Scalding of arm*, Wurmb, B. J. H., vol. 19, p. 146; *Helminthiasis*, Richards, H. W., Apr., 1870, p. 84; Richards, H. W., vol. 7, p. 260; *Itching of scrotum*, Wesselhoeft, N. E. M. G., vol. 8, p. 55; *Pruritus vulvæ*, Wesselhoeft, N. E. M. G., vol. 8, p. 55; *Agalactia*, Terry, Hom. Times, vol. 5, p. 12; *Urticaria*, Chapusot, A. J. H. M. M., vol. 3, p. 34.

4 **Outer Head.** Dull aching in head, with stitches in region of spleen.

11 Dull aching in occiput and over eyes.

Urticaria of scalp, suddenly appearing, and determining internally.

5 **Sight and Eyes.** Pain in r. eye and r. parietal bone, a stinging pain compelling one to rub and press it.

Pressing pain: over r. eye and in eyeball; in l. eye; over both eyes, they feel weak and sore.

Pain in eyeballs as from a blow, and a sensation as of sand in eyes.

7 **Smell and Nose.** Itching of nose.

8 **Upper Face.** Fever blisters on lips itching.

Lips, nose and ears swollen; eyelids closed and œdematous, followed by small transparent vesicles filled with serum, afterward desquamation.

13 **Throat.** Burning in throat with frequent throwing up of frothy mucus, with cough and frothy expectoration.

Burning in throat with nausea.

14 **Appetite, Thirst. Desires, Aversions.** Loss of appetite.

16 **Hiccough, Belching, Nausea and Vomiting.** Nausea, with burning in throat.

17 Vomiting from suppression of nettlerash.

19 **Abdomen.** Soreness in bowels while lying down; on pressure a sound as if bowels were filled with water.

20 **Stool and Rectum.** Pain around umbilicus, with dysenteric stool of whitish slime.

Stools: white and yellow, with slimy mucus, tenesmus and colicklike pains; small, dysenteric, of greenish-brown slime, with urging and tenesmus; small and painful, mixed with white matter, like the boiled white of an egg, with much pain over whole abdomen.

Digitized by Google

‖Dysentery accompanied or preceded by nettlerash; during and after passage of stool, a sensation of rawness and burning in anus.
‖Constipation.
‖Enteritis, with stools of mucus and blood.
‖Diarrhœa, from suppression of eruption.
A small hemorrhoidal tumor, itching and burning, at times quite severe.
‖Hemorrhage from bowels.
‖Ascarides, with great rectal irritation.
‖Severe itching of fundament, especially in evening, caused by pin-worms.
‖A girl, æt. 3½, for several months itching of seat, variable appetite; slight attacks of fever, restlessness at night; occasional thread-worms.

[21] **Urinary Organs.** Suppression of urine for twelve days; œdematous swelling of whole upper body to umbilicus.
‖Strangury; gravel; disease of bladder and kidneys.
‖Hemorrhage from bladder.

[22] **Male Sexual Organs.** ‖Itching of scrotum, keeping him awake at night, and tormenting him nearly all day; scrotum swollen; stinging and itching, no moisture.

[23] **Female Sexual Organs.** ‖Menorrhagia; uterine hemorrhage.
Leucorrhœa, discharge very acrid and excoriating.
‖Pruritus vulvæ, with great stinging and itching and œdema of parts.

[24] **Pregnancy. Parturition. Lactation.** ‖Insufficiency or entire want of secretion of milk.
Arrests flow of milk after weaning.

[27] **Cough.** ‖Whooping cough.

[28] **Inner Chest and Lungs.** ‖Hæmoptysis from violent exertion of lungs.

[31] **Neck and Back.** ‖Goitre.

[32] **Upper Limbs.** Continuous pain in r. deltoid.
Rheumatic pains in r. arm, < when lying on it.
A sharp stitch darting through arm.
Muscles of r. arm sore as if bruised.
Inability to stretch or raise r. arm on account of pain in r. hypochondriac region.
Rheumatic pains in r. wrist and in ankles.
‖Blotches, "hives," on hands and fingers, itching.
‖Urticaria nodosa on hands and fingers.
Soreness on inside of r. knee joint.
‖Raised red itching blotches on skin of hands and fingers.

[35] **Rest. Position. Motion.** Lying down: soreness in bowels; nettlerash >.

Digitized by Google

[37] **Sleep.** Nocturnal restlessness.
Lethargic sleep.
[38] **Time.** All day: itching of scrotum.
Evening: itching of fundament; rheumatic pain <.
Night: itching of scrotum.
[41] **Attacks, Periodicity.** Every year at same season: nettle-rash.
[42] **Locality and Direction.** Right: pain in eye and parietal bone; pain in deltoid; rheumatic pain in arm; muscles of arm sore; pain in hypochondriac region; rheumatic pain in wrist and ankle; soreness on inside of knee joint.
[43] **Sensations.** As from a blow in eyeballs; as of sand in eyes; as if bruised, muscles of r. arm.
Pain: in r. hypochondriac region; in r. deltoid.
Stitches: in spleen; through arm.
Stinging: in r. eye and parietal bone; in scrotum; in vulva; in nettlerash.
Burning: in throat; in anus; in hemorrhoidal tumor; of skin; of nettlerash; of erythema.
Rawness: in anus.
Aching: dull, in head; dull, over eyes; dull, in occiput.
Soreness: in eyeballs; in bowels; in muscles of r. arm; on inside of r. knee joint.
Pressing: over eyes; in eyeballs.
Rheumatic pain: in r. arm; in r. wrist, and in ankles.
Itching: of nose; in hemorrhoidal tumor; of fundament; of scrotum; in vulva; in hives; of nettlerash; erythema.
[44] **Tissues.** Hemorrhages from various organs.
‖Burns, when integuments and subjacent tissues are not destroyed, and when injury is confined to skin.
Rheumatism attending, following, or alternating with nettlerash.
Rheumatic pains < in evening.
‖Dropsy, chronic diarrhœa, urticaria, etc.
[45] **Touch. Passive Motion. Injuries.** Lying on arm: rheumatic pain <.
Violent exertion: hæmoptysis.
Burns: confined to skin.
[46] **Skin.** In skin of face, arms, shoulders and chest, extremely distressing burning heat with formication, numbness and violent itching.
‖‖Nettlerash: itching and burning of skin as if scorched; raised, red blotches; fine stinging points; pale, and requires constant rubbing; attending or preceding rheumatism.
‖Consequences of suppressed nettlerash.
‖Eruption and itching disappear as soon as she lies down and reappear immediately after rising.

Google

| | Nettlerash affects patient every year at same season.
| | Scalding of l. forearm and hand; epidermis removed; suppuration followed with much pain.
| | Vesicular erysipelas.
| | Erythema with burning and itching.

[47] **Stages of Life, Constitution.** Girl, æt. 3½, suffering several months; helminthiasis.
Child, æt. 4; helminthiasis.
Girl, æt. 16; urticaria.
Cook, æt. 33; scalding of arm.

[48] **Relations.** Compare: *Apis*, *Canthar.*, *Rhus tox.*, in skin symptoms; *Ricin.*, in diminished mammary secretion.

USTILAGO.

Corn-smut. *Fungi.*

A fungus found growing on Indian corn.
The tincture is prepared from the fresh ripe fungus.
Introduced and proved by Burt, see Monograph; proved by Hoyne, Trans. Am. I. Hom., 1872, p. 493.

CLINICAL AUTHORITIES.—*Spermatorrhœa*, Burt, Monog.; *Ovarian irritation*, Burt, Monog.; *Ovaritis*, Burt, Monog.; *Ovarian tumor*, Jones, Burt, Monog.; *Metritis, ovarian irritation*, Wesselhoeft, T. [1] **Mind.** Great depression of spirits; irritable.
| | Very sad, cries frequently; excessively prostrated from sexual abuse and loss of semen; sleep restless.

Digitized by Google

[2] **Sensorium.** Frequent attacks of vertigo.
Vertigo during climaxis, with too frequent and profuse menstruation.

[3] **Inner Head.** Feeling of fulness in head, with dull, pressive frontal headache.
Frontal headache, < by walking.
Violent frontal headache as if forehead would burst open.
Sharp flying pains in forehead, congestion of brain.
Pain on top and side of head; climaxis.
Nervous headache from menstrual irregularities in atonic women.

[4] **Outer Head.** Scalp dry, hot and congested, with loss of hair.
Scald-head; two-thirds of scalp one filthy mass of inflammation, with loss of most of hair; a watery serum constantly oozing from scalp.

[5] **Sight and Eyes.** Things whirl before eyes, appear double; white specks come into view and blot all else.
Twitching of eyes, they seem to revolve in circles and dart from object to object.
Eyes feel hot on closing lids.
Aching and smarting in eyeballs, with profuse secretion of tears; in open air.
Dull aching pain in r. eyeball.

[6] **Hearing and Ears.** Constant dull pain in l. ear, caused by extension from inflamed tonsil.

[7] **Smell and Nose.** Dryness of nostrils as if he had taken cold.
Rhinitis, bitter taste, offensive odor noticeable to patient himself.

[8] **Upper Face.** Sudden pallor; evening while sitting.
Burning of face and scalp from congestion.

[10] **Teeth and Gums.** Constant dull aching pain in first and second upper molars, which are decayed and have ached before.
Shedding of teeth (in animals).

[11] **Taste and Tongue.** Slimy, coppery taste.
Pricking sensation in tongue, with a feeling as if something were under its root pressing it upward.

[12] **Inner Mouth.** Saliva profuse; bitter.

[13] **Throat.** Dryness of fauces, with difficult deglutition; with burning distress in stomach.
Tonsils congested, inflamed, l. very large dark-colored, with dull pain, < from swallowing.
Feeling as of a lump behind larynx; producing constant desire to swallow.
Sharp lancinating pain in r. tonsil.
Burning in œsophagus at cardiac orifice.

[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite followed by canine hunger.

Google

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations of food, strongly acid.

[17] **Scrobiculum and Stomach.** Goneness in epigastrium. θClimaxis.

Faint feeling in epigastrium, with pain in region of liver and bowels.

Repeated fine sharp cutting pains in epigastrium.

Constant distress in region of stomach.

Burning distress in sternum and stomach, accompanied by fine neuralgic pains in same region, lasting about three minutes at a time; come on every ten or fifteen minutes for several hours; sharp cutting pain in stomach.

‖Hæmatemesis of a passive nature, profuse, blood venous, accompanied by nausea, which improves after hemorrhage.

[18] **Hypochondria.** Pain in region of r. lobe of liver.

Dull pains in r. hypochondrium, with distress in small intestines.

[19] **Abdomen.** Grumbling pains in abdomen all afternoon, followed by dry, hard stool, fine, cutting colicky pains every few minutes all day, > by hard constipated stool, followed by dull distress in bowels.

Pain in l. inguinal region, while walking.

[20] **Stool and Rectum.** Black, dry, lumpy stools, costive.

[21] **Urinary Organs.** Urine first increased and light, with great desire; later scanty and dark.

[22] **Male Sexual Organs.** ‖Erotic fancies; emissions.

‖Seminal emissions and irresistible tendency to masturbation.

Great depression of sexual system, with relaxed scrotum.

‖One to four emissions with sexual dreams every week, followed next day by great prostration, dull pain in lumbar region, with great despondency and irritability.

‖Spermatorrhœa after onanism; emissions every night, talking about women causes an emission; very sad; cries frequently; says he cannot break off habit, has no control of himself when passion is aroused; knows it is fast killing him, cannot work, is so prostrated.

Chronic orchitis; neuralgia and irritable testicle; indurated testicle.

[23] **Female Sexual Organs.** Burning distress in ovaries.

Acute pain, < in l. ovary, with swelling; pains intermittent; shoot rapidly down legs.

Ovaritis, constant pains in ovary, sharp pains passing down legs rapidly; ovary much swollen and tender, with scanty menstruation.

‖Intermittent neuralgia of l. ovary, which is as large as a hen's egg and very tender to touch.

Digitized by Google

‖Ovaritis; took cold after menstruation; constant dull pain in r groin and back, three or four times an hour; sharp neuralgic pains in ovary; walking painful; bowels torpid; very languid.

‖Vicarious menstruation from lungs and bowels.

‖Ovarian irritation, constant pain in l. ovary passing down hip, has to limp when walking; pains sharp and at times pass down leg with great rapidity; every few days has quite a swelling in l. groin; cannot bear pressure over ovary.

‖Every day from about 12 M. to about 4 P.M., constant pain from l. ovary to uterus; every few minutes, pain in ovary is intensely severe, cutting like a knife; pain in r. ovary and hypogastric region, but all starting from l. ovary; ovary can be distinctly felt in groin about as large as a hen's egg and very hard; when pressed upon gives intense pain; every day thinks she has fever with paroxysms of pain but no chill; slight leucorrhœa; loss of appetite; constipated.

‖Constant aching distress referred to mouth of womb.

Displaced uterus with menorrhagia; cervix tumefied; bleeds when touched.

‖Hypertrophy of uterus with a soft and spongy os and cervix; sufficiently dilated to easily admit fingers.

‖Uterus hypertrophied, sensitive; blood bright, fresh, without coagula.

‖Subserous or interstitial fibroid of uterus (two cases), fibroid much diminished.

‖Prolapsus with menorrhagia.

‖Cervix tumefied, bleeds when touched.

‖Menses: too scanty, with ovarian irritation; too profuse and too early; blood clotted; as if everything would come through.

Between menstrual periods, constant suffering under l. breast, at margin of ribs.

‖For days oozing of dark blood with small coagula; uterus enlarged, cervix tumefied or dilated.

‖Metrorrhagia after confinement and after miscarriage.

‖‖Oozing of dark blood, highly coagulated, forming occasionally long, black stringy clots.

‖Chronic uterine hemorrhages, and passive congestions.

‖Blood dark, but so thin as to scarcely color fingers.

‖Metrorrhagia after miscarriage.

‖Extreme pain during menstrual period; flow very profuse and did not cease entirely until next period; most of time confined to bed. θMetrorrhagia.

‖Menorrhagia at climacteric period; active and constant flowing with frequent clots.

Digitized by Google

‖Profuse menstruation, flow lasting from ten days to two weeks, at first very abundant, gradually wearing off; always < from motion; discharge dark and quite painless.

‖Menses every three weeks, with dark coagulum; profuse, with gushes of bright-red blood when rising from a seat, or after having been startled or frightened; two days before menses, a heavy backache with sharp pain across abdomen from hip to hip, followed by expulsive pains; pains diminish after flow commences and stop with it; between menstrual periods heavy dragging backache on exertion; pain shooting up back from hips to shoulder; abdomen tender to touch; excessive bearing down; pressure in head; sensation of contraction in vertex, and feeling as if head were lifting off; vertigo; excoriating, albuminous leucorrhœa, < before menses; ravenous appetite; excessive tired feeling; pulse 80 and weak; mental depression.

‖Subject to profuse menstruation; childless; large, fleshy, flabby, bloated-looking, with a very sallow complexion, inclined to be (and formerly had been) dropsical from excessive loss of blood; profuse menstruation, which seems to her to be be principally water and clots; says there is no outward flow when she lies still, but clots and water pass out of uterus when she gets up; feels so full in uterus that she must rise to get rid of clots; flowed fearfully during night; very low, scarcely able to speak aloud.

‖Severe menorrhagia for past twelve years at every menstrual period, lasting a week or ten days, sometimes longer; pale, thin, weak, very nervous.

‖Profuse discharge of dark, clotted blood of fetid odor, with pain and tenderness in one or both ovaries. θMenorrhagia.

‖Menorrhagia at change of life.

‖Dysmenorrhœa of a congestive character, with much ovarian irritation; severe pain in ovaries, uterus and back every few minutes; scanty, pale flow accompanied by false membranes; poor appetite, thickly-coated tongue.

‖Subject to headaches ever since menstruation appeared at age of fifteen; headache mostly on top of head; appetite poor; pain in l. chest with some cough; total suppression of menses for last eight months; severe pain in back, is unable to ride in carriage; pain in uterine region, especially over ovarian region, < l. side; vomiting of mucus and blood daily; no sleep; some leucorrhœa; hysterical; no uterine displacement, but great congestion in pelvic region.

Digitized by Google

‖Suppression of menses without apparent cause; troublesome cough; considerable expectoration; sometimes also dry cough; stitching pains in chest, especially l. side; night sweats; loss of appetite; pain in ovaries, especially l.; general debility; headache; leucorrhœa; chlorotic; anæmic, as if in first stage of consumption.

‖Menses suppressed for last fourteen months; very irritable and depressed; uneasiness in region of stomach; pain in ovarian region, especially l.; skin hot and dry; constipation, stools dry and hard; no appetite; stitching pains in chest, < l. side; constant hacking cough; considerable expectoration; night sweats; general prostration; great uneasiness in lower extremities.

‖Climaxis: vertigo; frequent flushing; metrorrhagia.

‖Mild leucorrhœa.

" **Pregnancy. Parturition. Lactation.** ‖Abortion: bearing-down pains, as if everything would come from her; in flabby constitutions; from general atony of uterus; with or without hemorrhage.

‖Has aborted a number of times at third month; is now about three months pregnant; for last ten days has had more or less hemorrhage every day, some days quite bad; not so much at night; blood passes a number of times through day, in dark-colored clots.

‖Labor pains deficient; os soft, pliable, dilatable.

‖Post-partum hemorrhages from a flabby, atonic condition of uterus.

‖Constant flooding; every few minutes, expulsion of a large clot of bright-red blood, with bearing-down pains. θPost-partum hemorrhage.

‖Persistent hemorrhage of brownish blood, with want of uterine contraction.

‖One and a half hours after delivery commenced to flow violently.

‖Passive hemorrhage after miscarriage, blood in lumps, flooding for days and weeks.

‖Severe flooding two weeks after labor; large bright red clots; no pain; very weak.

‖‖Lochia too profuse, partly fluid, partly clotted; prolonged bearing-down pains; uterus feels as if drawn into a knot.

Very profuse lochial discharge, very dark in color, almost black.

‖Agalactia; chronic inflammation, and induration of mammæ.

Galactorrhœa.

‖Puerperal peritonitis, with constant flooding; high fever; secretion putrid; abdomen excessively tender and tympanitic. θAbortion.

Google

‖Puerperal peritonitis; aborted about two days since, at about three months; constant fever; pulse 120; cannot bear least pressure on any portion of bowels; about six times to-day has had sharp, cutting pains in l. ovary; has flowed constantly for two days; blood dark, not copious, nor attended with bearing-down pains; cannot move in bed; is compelled to lie upon her back; constant dull, frontal headache; loss of appetite, tongue not furred.

‖For last year vertigo every day, some days so bad she has to go to bed; menses every three weeks for last year, last about ten days and profuse; flows as much again as she did when in health; constant aching distress under l. mamma; rheumatic pains in shoulders and back; very weak, not able to work. θClimaxis.

‖Hypertrophy and subinvolution of uterus with great atony.

‖Fibroids and induration of os.

‖Discharge of blood from uterus, bright-red, partly fluid, partly clotted; passive congestion of uterus, so that there is a slight oozing of blood after each examination; tissues of uterus feel soft and spongy; os patulous. θSubinvolution of uterus.

[25] **Voice and Larynx. Trachea and Bronchia.** Feeling as if there were a lump behind larynx, which produces constant inclination to swallow.

[28] **Inner Chest and Lungs.** Sharp tearing in l. side from top of chest down to sixth or seventh rib, < by breathing.

[29] **Heart, Pulse and Circulation.** Burning pain in cardiac region.

[30] **Outer Chest.** Sudden flying pains from heart to stomach, that arrested breathing, lasted but a moment, probably myalgic.

[31] **Neck and Back.** Severe rheumatic pains in lumbar region, < by walking; aching distress in small of back.

[32] **Upper Limbs.** Dull aching pains in shoulder joints.

Severe rheumatic pains in muscles of r. shoulder, all night.

Rheumatic pains in arms, hands and fingers.

Dull rheumatic pains in r. elbow joint, < on motion.

Rheumatic drawing pains in finger joints, more especially in second joint of r. forefinger.

Severe drawing pains in joints of all fingers.

Fine, sticking pains along metacarpal bone of r. forefinger, every few seconds.

Sharp, cutting pains along metacarpal bones of r. hand.

‖Hypertrophy or loss of nails.

[33] **Lower Limbs.** Rheumatic pains in legs.

Flying rheumatic pains in metatarsal bones of r. foot.

Digitized by Google

[31] **Limbs in General.** Rheumatic pain in legs, arms and fingers.

[35] **Rest. Position. Motion.** Rising: menorrhagia <.
Motion: menorrhagia <.
Walking: frontal headache <; pain in l. inguinal region; pain in lumbar region <.

[37] **Sleep.** Sleep: troubled, tosses about, troublesome dreams; heat over body.

[38] **Time.** 12 to 4 P.M.: pain from l. ovary to uterus and r. ovary.
All afternoon: grumbling in abdomen.
Evening: sudden pallor.
All night: rheumatism in r. shoulder; general heat.
Night: itching urticaria.

[39] **Temperature and Weather.** In a warm room: felt oppressed, faint.
Open air: aching in eyes and lachrymation.

[40] **Fever.** Internal heat through body, but < in eyes, which are sensitive to light and sore to touch; pulse normal.
General heat at night during sleep.
Relapsing agues; very profuse sweat; slight nausea; oppression of chest; cerebral disturbance, and great irritability.

[41] **Attacks, Periodicity.** Lasting three minutes: neuralgic pains in sternum and stomach.
Every few minutes: colicky pains.
Every ten or fifteen minutes: neuralgic pains in sternum and stomach.
Every night: emissions.
For two days: constant flooding.
Every week: one to four emissions.
Every three weeks: menses.
Third month: abortion.
For eight months: suppression of menses.
For fourteen months: suppression of menses.
For twelve years: menorrhagia, lasting ten days.
Climacteric period: vertigo; frequent flushing; pain on top and side of head; menorrhagia; metrorrhagia.

[42] **Locality and Direction.** Left: dull pain in ear; tonsil inflamed; pain in inguinal region; pain in ovary; neuralgia of ovary; ovary enlarged; ovarian irritation; pain from ovary down hip; suffering under breast; pain in chest with cough; stitches in chest; aching distress under mamma; tearing from top of chest to sixth or seventh rib.
Right: aching in eyeball; lancinating in tonsil; pain in region of liver; dull pains in hypochondrium; dull pain in groin and back; neuralgia of ovary; rheumatism in shoulder, elbow joint and second joint of forefinger;

Google

cutting pains along metacarpal bones; rheumatic pains in metatarsal bones.

Sensations. As if forehead would burst open; as if something were under root of tongue, pressing upward; as of a lump behind larynx; as if head were being lifted off; excessively tired feeling; as if everything would come from her, bearing down; uterus as if drawn into a knot.

Pain: on top and side of head; in region of liver and bowels; in region of liver; in l. inguinal region; in r. ovary.

Acute pain: in l. ovary.

Lancinating: in r. tonsil.

Cutting: in epigastrium; in stomach; in abdomen; in l. ovary; along metacarpal bones of r. hand.

Sharp pain: across abdomen from hip to hip; in ovaries, uterus and back

Stitches: in chest, < l. side.

Shooting: down legs.

Sticking: along metacarpal bone of r. forefinger.

Pricking: in tongue.

Tearing: in l. chest.

Drawing: in finger joints.

Pressure: in frontal region; in head.

Aching: in eyeballs; dull, in r. eyeball; dull, in decayed molars; in mouth of womb; under l. mamma; in small of back; in shoulder joints.

Burning: of scalp; of face; in stomach; in œsophagus; in sternum; in ovaries; in cardiac region.

Smarting: in eyeballs.

Flying pains: in forehead; from heart to stomach.

Neuralgic pains: in sternum and stomach; in testicles; in l. ovary.

Rheumatic pain: in shoulders and back; in lumbar region; in muscles of r. shoulder; in r. elbow joint; in arms, hands and fingers; in legs; in metatarsal bones of r. foot.

Bearing down: in abdomen.

Contraction: in vertex.

Dull pain: in l. ear; in tonsils; in r hypochondrium; in lumbar region; in r. groin and back.

Grumbling: in abdomen.

Fulness: in head; in uterus.

Uneasiness: in region of stomach; in lower extremities.

Goneness: in epigastrium.

Faintness: in epigastrium.

Heat: of scalp; in eyes; through body.

Dryness: of nostril; of fauces.

Itching: urticaria.

Google

"**Tissues.** Vascular system of ovaries is most powerfully affected, producing congestion, enlargement, and great irritation, with ovaralgia, dysmenorrhœa, and especially menorrhagia.

"**Touch. Passive Motion. Injuries.** Touch: abdomen tender; eyes sore.

Pressure: ovaries <.

Riding in a carriage: unable from backache.

"**Skin.** Whole skin is dry, hot, and congested.

Negro, urticaria of six years' standing, troubled more or less all time; every night itching, scratching parts produces large pale welts on body, arms and legs.

Copper-colored spots on skin; secondary syphilis; maculæ.

Pustular ulceration of skin, scald-head, and various forms of eczema.

Painful destructive diseases of nails.

Alopecia; complete loss of hair from long-lasting congestion of scalp; tendency to small boils; skin dry and hot.

"**Stages of Life, Constitution.** Very lymphatic women, with clear, white skin.

Tall, slim, fair complexion, "consumptive persons."

Miss E., æt. 19, nervous temperament; menorrhagia.

Miss M., æt. 19, nervous temperament; dysmenorrhœa.

Miss O., æt. 20, light hair, very pale and anæmic, slim, delicate from childhood, history of consumption on father's side; amenorrhœa, cough, etc.

Mrs. B, æt. 23, nervous temperament, two weeks after third labor; metrorrhagia.

Mrs. W., æt. 26, nervo-bilious temperament; suppression of menses.

Mrs. B., æt. 27, nervous temperament; dysmenorrhœa.

Lady, æt. 27, nervous temperament; scanty menses.

Man, æt. 28, nervo-sanguine temperament, suffering several years; spermatorrhœa.

Mrs. F., æt 28, blonde, scrofulous hemorrhagic diathesis, married five years, never pregnant; menorrhagia.

Mrs. H., æt. 28, large, lymphatic, weight about 200, after third labor; uterine hemorrhage.

Mrs. S., æt. 29, nervous temperament; dysmenorrhœa.

Mrs. W., æt. 30, nervo-bilious; ovarian irritation.

Irishman, æt. 30, bilious temperament; spermatorrhœa.

Mrs. H., æt. 30, nervous temperament, two months ago miscarried between third and fourth month; metrorrhagia.

Lady, æt. 30, tall, slim, nervous; menorrhagia.

Mrs. D, æt. 31, nervo-bilious; ovaritis.

Mrs. H., æt. 32, sanguine temperament, nursing a babe 14 months old, suffering six weeks; metrorrhagia.

Digitized by Google

Mrs. B., æt. 34, two children, youngest æt. 10, subject to headaches since puberty; suppression of menses.
Mrs. H., æt. 34, bilious temperament; hemorrhage after abortion.
Lady, æt. 35, suffering six years; tumor of uterus.
Mrs. H., æt. 38, two months ago miscarried when three months gone; metrorrhagia.
Mrs. F., æt. 39, nervous temperament, married nine years, never pregnant; metrorrhagia.
Mrs. B., æt. 40, large, fleshy, flabby, bloated-looking, no children; metrorrhagia.
Mrs. F., æt. 50, nervo-bilious; menorrhagia.
Mrs. N., æt. 54, nervous temperament; ovarian irritation.
Lady, tall, slim, bilious; suppression of menses.

[48] **Relations.** Compare: *Secale* and *Sabina.*

UVA URSI.

Bearberry. *Ericaceæ.*

The tincture is prepared from the fresh leaves gathered in Autumn.

Provings by Hahnemann, Heberden, Sauvanges, Noak and Trinks; Mitchell, Essay; and Bartram.

CLINICAL AUTHORITIES.—*Cysto-blennorrhœa*, Genzke, A. J. H. M. M., vol. 4, p. 56; *Dysuria*, Hull, A. J. H. M. M., vol. 3, p. 350; *Vesical catarrh*, Nottingham, N. Y. J. H., vol. 1, p. 162; *Urinary difficulty*, Kershaw, Org., vol. 3, p. 367.

[7] **Smell and Nose.** Fluent coryza, with rawness.

[17] **Scrobiculum and Stomach.** Weak, sick at stomach, sore all over as if bruised.

[21] **Urinary Organs.** Hæmaturia.

Constant urging to urinate and straining, with discharge of blood and slime, or constant straining without any discharge at all, or only a few drops of urine; after this cutting and burning in urethra, which is succeeded by discharge of blood; hard stools.

[11] Shooting pains from hip to hip; bladder and urethra sensitive; frequent urination, with pain and burning during and after urinating, relief of all symptoms when lying upon back; tongue thick, brown coat; pulse 110;

great thirst, no appetite; second day drowsy and stupid; urine turbid and on fifth day passed blood, mucus and pus. θCatarrh of bladder.

‖Man, æt. 48; since four months severe urinary difficulties; emaciated, features sallow and œdematous; frequent and severe inclination to urinate, with burning in glans when urine passes guttatim, and in small quantities, taking ten minutes and more to pass a small quantity; before urinating frequent and continued spasm of bladder; after great straining passes a few drops; at all times burning and tearing pains in hypogastric region, which is warmer, swollen, and sensitive to touch; frequent intense chills; severe heat, but no sweat; pulse 86 to 90, small and soft; tenesmus of bladder robs him of sleep; downcast, wishes to die; no appetite; tongue coated with mucus; stool retarded, hard and painful; thirst increased, but afraid to drink; great and general languor; unsteadiness of lower extremities; brown, muddy, foul-smelling urine, with large deposit of greyish slimy sediment, more than one-third its quantity; sediment showed alkaline reaction, produced flakes in boiling, and Nitric acid gave it a pink color; membranous particles at times clogged up urethra, producing excruciating pain till they are discharged with some blood (*Uva ursi* relieved greatly; *Cannabis* 1, daily two doses, in weekly alternation with *Uva ursi* finished the cure). θCysto-blennorrhœa.

‖Pain, burning and straining, dribbling of urine, sometimes spasms of bladder, could not urinate.

‖Painful dysuria, with frequent but difficult discharge of thick, ropy urine of strong, pungent odor.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness with pains in bones; stopped up in throat; no appetite.

[27] **Cough.** Throat tickles, feels like coughing all time, sore and bruised all over; cough; nose raw and running; cutting and burning on urinating.

[28] **Inner Chest and Lungs.** Pains in chest.

[35] **Rest. Position. Motion.** Lying upon back: bladder symptoms >.

[43] **Sensations.** As if bruised all over.

Pain: in chest; in bones.

Spasmodic pain: in bladder.

Cutting: in urethra; on urinating.

Shooting: from hip to hip.

Tearing: in hypogastric region.

Burning: in urethra; in glans penis, when urinating; in hypogastric region; in bladder.

Digitized by Google

[45] **Touch. Passive Motion. Injuries.** Touch: hypogastric region sensitive.

[47] **Stages of Life, Constitution.** Man, æt. 48, suffering four months; cysto-blennorrhœa.

Man, æt. 70; dysuria, etc.

[48] **Relations.** Compare: *Secale, Cannab.*

VACCININUM AND VARIOLINUM.

The lymph from coupox, and the nosode.

Fragmentary provings by Fincke and Swan.

Observations by Schuklitsch, A. H. Z., vol. 4, p. 12; Kanstatt, A. H. Z., vol. 45, p. 373; Power, Phil. Jour. of Hom., vol. 1, p. 493; Berridge, Am. J. H. M. M., vol. 8, p. 126; Le Normand, Hygea, vol. 10, p. 68; Hencke, A. H. Z., vol. 45, p. 373.

Vacc. stands for Vaccininum; Var. for Variolinum; S., Swan; F., Fincke; M., Morrison; Ma, Matthes; W. M., for W. in Magdeburg; C., Craigin; B., Blakly; Mo., Mossa; A., Anderson.

CLINICAL AUTHORITIES.—*Chronic conjunctivitis*, Morrison, Hom. Rev., vol. 18, p. 223; *Epistaxis*, cured by vaccination, Matthes, N. E. M. G., vol. 6, p. 7; *Morbid fear of smallpox*, Swan, Med. Inv., Jan, 1871, p. 190; Hah. Mo., vol. 6, p. 172; *Eczema*, cured by vaccination, Hom. Phys., Feb., 1884, p. 41; *Variola*, Kazkowski, B. J. H., vol. 31, p. 599; Craigin, Med. M. S. Pa., 1872, p. 122.

[1] **Mind.** Crying. Vacc. F.

Ill-humor, with restless sleep. Vacc. A.

Nervous, impatient, irritable; disposition to be troubled by things. Vacc. F.

Delirium with the initial fever. Var. S.

Fear of death; wild excitement and begging to know if he was to die, and before the sentence was complete drops into a heavy sleep with loud breathing. Var. S.

Morbid fear of taking smallpox. Vacc. S.

[2] **Sensorium.** Vertigo. Var. S.

Digitized by Google

Syncope in attempting to rise.

[3] **Inner Head.** Frontal headache. Vacc. A.

Forehead very hot, face red and bloated, carotids pulsating violently. Var. S.

Forehead felt as if it would split in two in median line from root of nose to top of head. Vacc. F.

Stitches in r. temple. Vacc. F.

Headache: with or after chill; all over head; particularly in forehead; severe in vertex; as if a band tightly encircled head; severe, lancinating, throbbing; < with every pulsation. Var. S.

Intolerable pain in occiput. Var. S.

Crazy feeling through brain, hard to describe. Var. S.

[4] **Outer Head.** Eruption like crusta lactea. Vacc. A.

[5] **Sight and Eyes.** ||Tinea tarsi and conjunctivitis in a woman, æt. 28, remaining as result of variola in infancy, conjunctivæ painfully sensitive. Vacc. M.

||Weak eyes; feeling in forehead as if it were split. Vacc. F.

Inflamed eyelids. Vacc.

Redness of eyes and face, with small pimples on face and hands. Vacc. F.

Keratitis, with smallpox and after vaccination. Vacc. or Var.

||Chronic ophthalmia with loss of sight. Var. S.

||Pupils contracted. Var. S.

[6] **Hearing and Ears.** Deafness. Var. S.

[7] **Smell and Nose.** ||Chronic catarrh. Vacc. S.

Full feeling of head, with running at nose. Vacc. S.

||Bleeding at nose preceded by a feeling of contraction above and between eyebrows, soon after eating meat; menses rather profuse and too frequent; cured by revaccination. Ma.

[8] **Upper Face.** ||Redness and distension of face, chill running down back. Vacc. F.

Skin of face and neck deep dark-purple hue. Var. S.

[9] **Lower Face.** Jaw falling when asleep, with trembling when aroused. Var. S.

Swelling of neck under r. ear (parotid gland) with sensation like being cut. Vacc. F.

[10] **Teeth and Gums.** ||Teeth covered with thick brown slime. Var. S.

[11] **Taste and Tongue.** Tongue coated, dryish yellow, with papillæ showing through coat. Vacc. F.

||Thick dirty yellow coating on tongue. Var. S.

||When asleep tongue protruded, black coating, when raised it is with difficulty drawn back; looks like a mass of putrid flesh. Var. S.

Digitized by Google

[12] **Inner Mouth.** Dry mouth and tongue. Vacc. A.

[13] **Throat.** Throat very sore, redness of fauces. Var. S.

|| Pharynx and fauces deep purplish crimson, with gangrenous appearance; breath horribly offensive. Var. S.

Painful deglutition. Var. S.

Sensation as if throat were closed. Var. S.

Sensation as of a lump in r. side of throat. Var. S.

Diphtheria with horrible fetor oris. Var. S.

[14] **Appetite, Thirst. Desires, Aversions.** Food, especially water, tastes sickish, sweet. Var. S.

Appetite gone, disgust to taste, smell and appearance of food. Vacc. A.

Coffee tastes sour. Vacc. F.

[17] **Scrobiculum and Stomach.** Aching in pit of stomach, with short breath. Vacc. F.

Soreness in pit of stomach and across epigastric region. Var. S.

Severe pain in præcordial region, frequent nausea and vomiting of bilious and bloody matter. Var. S.

|| Frequent bilious vomiting. Var. S.

As soon as he drinks milk he vomits it up. Var. S.

[18] **Hypochondria.** A stitch in hepatic region, at margin of last lower rib, axillary line. Vacc. F.

Stitch in splenic region. Vacc. F.

[20] **Stool and Rectum.** Thin, bloody stools. Var. S.

Several brown, green, at last grass-green stools, painless, loose, of intolerable fetid odor; no thirst; last stool slimy, with small quantity of blood. Var. S.

|| Dysentery. Var. S.

Constipation. Var. S.

[21] **Urinary Organs.** Urine: high colored, like brandy; turbid and offensive; stains a rose tea-color, difficult to remove. Var. S.

[22] **Male Sexual Organs.** Enlargement of testicle. Var. S.

Hard swelling of l. testicle in consequence of a contusion. Var. S.

[26] **Respiration.** Oppressed respiration. Var. S.

Short breath, with aching in pit of stomach, and pressure in region of heart. Vacc. F.

|| Asthma. Var. S.

[27] **Cough.** Troublesome cough, with serous and sometimes bloody sputa. Var. S.

|| Hawking up thick, viscid slime, smelling bad. Var. S.

[28] **Inner Chest and Lungs.** Stitch in l. side of chest, anteriorly under short ribs. Vacc. F.

Stitches in r. side under short ribs in front from r. to l., then at corresponding place in l. side, but from l. to r., lasting five minutes, felt in liver and spleen. Vacc. F.

Google

[29] **Heart, Pulse and Circulation.** Febrile action of heart and arteries. Vacc. A.

[31] **Neck and Back.** Stiffness of neck, with tense drawing in muscles, < on motion. Var. S.

Pain in base of brain and neck. Var. S.

Backache. Vacc. A.

Aching pain in back, < in lumbar region, extending around waist. Vacc. S.

Chills like streams of ice-water, running down from between scapulæ to sacral region. Var. S.

Intolerable aching in lumbar and sacral region. Var. S.

Pain as if back were broken. Var. S.

Pains in muscles of back like rheumatism; < on motion. Var. S.

[32] **Upper Limbs.** Severe pains in l. upper arm, at vaccination mark, could not raise it in morning. Vacc. F.

Hands icy-cold during invasion. Var. S.

Tumefaction of arm, which had been half paralyzed. Var. S.

Rheumatic pains in wrists and hands. Vacc. S.

[33] **Lower Limbs.** Tearing in l. thigh downward. Vacc. F

Soreness of lower extremities, as if heated or overexerted. Vacc. A.

Legs ached immoderately, hardly able to get about, a break-bone sensation, and a feeling as if bones were undergoing process of comminution. Vacc. A.

Muscular rheumatism; < on motion. Var. S.

[35] **Rest. Position. Motion.** Motion: stiff neck <; rheumatic pain in back <; < muscular rheumatism.

Carried: child wishes to be.

[36] **Nerves.** Restlessness. Vacc. A.

General malaise. Vacc. A.

Languor, lassitude. Vacc. A.

Tired all over, with stretching, gaping feeling; unnatural fatigue. Vacc. S.

[37] **Sleep.** Waked in middle of night by pain in forehead and eyes as if split, and stinging in temples. Vacc. F.

[40] **Fever.** Fever, with heat, thirst, tossing about, crying, aversion to food. Vacc. A.

Chill, with shaking. Vacc. F.

Very severe chill, followed by high fever. Var. S.

Intense fever, commencing with chills running down back like streams of cold water, causing shivering, and chattering of teeth. Var. S.

Fever, with intense radiating heat, burning hot to touch. Var. S.

Hot fever, no thirst. Var. S.

Very profuse, bad smelling perspiration. Var. S.

Google

"**Locality and Direction.** Left: hard swelling of testicle; tearing in thigh; heaviness in arm.
Right: as of a lump in throat; stitches in temple; swelling under ear.
From r. to l.: stitches under ribs.
From l. to r.: stitches under ribs.

"**Sensations.** As if a band tightly encircled head; as if forehead were split; crazy feeling through brain; as if throat were closed; as of a lump in r. side of throat; like streams of ice-water running down back; pain as if back were broken; as if heated or overexerted in lower extremities; as if bones of legs were broken, and undergoing process of comminution.
Pain: in base of brain and neck; in back.
Intolerable pain: in occiput.
Lancinating: in head.
Cutting: in swelling under r. ear.
Tearing: in l. thigh downward.
Severe pain: in præcordial region; in vaccination mark on l. upper arm.
Stitches: in r. temple; in hepatic region; in splenic region; in chest under short ribs.
Rheumatic pain: in muscles of back; in wrists and hands.
Burning: in skin.
Aching: in pit of stomach; in back; in lumbar and sacral region.
Drawing: in muscles of neck; in upper jaw and teeth.
Pressure: in region of heart; in small of back.
Soreness: in epigastric region; in lower extremities.
Heaviness: in l. arm.
Fulness: in head.
Tingling: in skin.
Crawling: in back.
Itching: of exanthem; of pustular eruption.

"**Touch. Passive Motion. Injuries.** Contusion: hard swelling of l. testicle.

"**Skin.** Skin hot and dry. Vacc. A.
A general eruption similar to cowpox. Vacc. A.
Small pimples develop at point of vaccination with fourth dilution. Vacc. A.
Exanthema of sharp-pointed pimples, usually small, seldom large and suppurating, dry, resting upon small red areolæ, frequently interspersed with small round spots of red color, sometimes severe itching. Var. S.
Red pimples or blotches in various parts, most evident when warm. Vacc. A.
Eruption of pustules with a dark-red base and a roundish

or oblong elevation, filled with pus of a greenish-yellow color, resembling varioloid, some as large as a pea, some less, without depression in centre, coming with a round, hard feel in skin (like a shot), very itchy. Vacc. F.

Petechial eruptions, erythematous, on lower abdominal region, apex of triangular form, being at pubis, and the base crossing the abdomen transversely in neighborhood of umbilicus; also on lateral surface of trunk to axilla, invading folds of axilla, corresponding portion of arm and pectoralis major. Var. S.

A child, æt. 8 months, received a drop of lymph from a healthy vaccination, diluted with one hundred drops of distilled water, and well shaken; on fourth day small bright-red pimples on face, which on following day formed vesicles of a pearly look, with depressed tips and surrounded by red areolæ; on eighth day very restless, screamed and cried, wished to be carried constantly; sleepless, febrile heat, rapid pulse, thirst, desire to nurse constantly without taking much; constipation, high-colored urine; pocks elastic, tense, hard, pearly; inflamed redness and swelling of face; on tenth day, on forehead and nose pocks became confluent, looked turbid, were filled with purulent liquid, and somewhat shrivelled; on eleventh day pustules burst and discharged purulent matter, which formed yellowish-brown scabs, which afterward became dark; these suppurated and exuded for a long time, gradually healed in about fourteen days; the whole course was like that of crusta lactea; the child was very well afterward, but still had on forehead and cheeks some small, very white spots, without scars; subsequent repeated vaccinations at six months' intervals were ineffectual. Vacc. A.

Tingling burning in skin over whole body, most intense in skin of forehead and in lower and anterior portion of hairy scalp, which parts are tinged with a scarlet blush, or efflorescence, similar to the immediate precursor of variolous eruption. Vacc. A.

Terrible pains in back on r. side of spine, and over and below shoulder blade; muscles sore to touch, nausea, pains all over, especially in legs; tongue clean; pulse 120; *Variolin.*$^{cm.}$; body completely covered with large pustules, face one mass of confluent pustules, pulse still high, constant expectoration of viscid mucus, mouth and fauces lined with pustules, even tongue covered with them; bowels constipated, mild delirium at times; eight days later temperature 104½°; pulse 120, very weak and stopping at intervals; great fear of death; begging to know if he must die, and before sentence was

completed would drop into a heavy sleep with stertorous breathing, jaw dropped on breast, pupils contracted, teeth covered with thick, brown slime, centre of tongue perfectly black, mucous membrane of mouth and pharynx of a deep purplish-crimson, with gangrenous appearance and breath horribly offensive; skin of face and neck of a deep dark-purple; odor from body like a fetid steam; little control over tongue or jaw, latter hanging down, and tongue protruding like a mass of decayed liver when asleep; an effort to speak when roused up caused violent trembling of jaw and tongue, which was drawn back into mouth with difficulty, was stiff, but looked like a mass of putrid flesh; urine dark-colored, passing freely through whole attack; had continued the cm., till now, gave one dose cmm. dry on tongue; next day almost convalescent; made a good recovery with but few marks. Var. S.

Severe chill, followed by high fever; severe pain in back, as if broken; pain all over head, very severe and constant in occiput; frequent bilious vomiting; thick, dirty, yellowish coating on tongue; wild delirium and spasms; night before eruption appeared, obstinate constipation; on third day very thick eruption of smallpox pustules, soon assuming confluent form, *Variolin.*[cmm.] S.

Vaccininum 6, in water, for one day with strict diet, repeated after eight days, as preventive in six hundred cases. W. M.

Treated a great many cases of variola and varioloid, during last eighteen years, some of them of most desperate character, and yet never lost a case when employing vaccine virus as a remedy; moreover, none of the cases so treated were ever troubled with hemorrhage, or with delirium or secondary fevers, or were ever disfigured by pitting. C.

Have used and seen it used in many and severe cases, and when treated with *Variolin.* 200, disease is shortened nearly or quite one-half, sufferings of patient much mitigated, secondary fever either absent or very much lighter, pustules do not burst, but wither or wilt and fall off, suppurative stage immeasurably hastened and shortened, and patients are not marked. B.

Vaccininum 200th quickly relieved severer symptoms of variola, occurring in a child, æt. 6 months; two days before appearance of eruption had been revaccinated (after an interval of eight days) on a nævus near r. nipple; deglutition difficult through implication of tongue and fauces; pustules many of large size, scattered over scalp, face, body and limbs. M.

Digitized by Google

About tenth or twelfth day of disease, variola confluent; patient quite blind from swollen eyelids, cheeks and forehead; nothing of nose visible except two bloody orifices, exuding clotted blood and pus; similar matter was also constantly discharged from throat and mouth by severe cough which attended disease from first; *Vaccin.* 3d cent. trit. C.

Smallpox; peculiar smell causes intense sickness of stomach; congestion toward head, palpitation of heart; two hours after took a dose *Variolin.* 30; an hour later crawling in back and feeling of coldness in lower extremities; cold feet; lame, heavy feeling in l. arm; no appetite; sleep disturbed by heat; toward morning some perspiration over body; next day continuous pressing headache, especially in occiput; pulse somewhat irritated; disinclined to mental work; when reading heat in head and forehead; weak when walking; pain in joints of upper and lower extremities, as if lame; toward evening again feverish; pressing pain in small of back, down to sacrum (*Glonoin.* 3 relieved headache); in bed, drawing in upper jaw and teeth; sleep full of dreams; toward morning again perspiration; urine smells ammoniacal; on fourth day red pimples on back of l. hand, staying for several days without filling with pus; mental work still causes heat in forehead and pressure in head; escaped smallpox. Mo.

On third day of eruption, when pustules had filled, and were confluent on face, intense itching; *Variolin.* 1$^{m.}$ in water, every two hours; on second day itching nearly gone, pustules shrinking; third day drying; fifth day crusts fell from face; seventh day other crusts fell off, and tongue cleaned. S.

Tongue coated as if with a piece of white velvet, in variola, with headache, backache, etc. Var. S.

Eczema cured by vaccination, in two children. A.

[47] **Stages of Life, Constitution.** Boy, æt. 6; variola.

Man, æt. 23; variola.

Man, æt. 25; variola.

A young lady, healthy and robust looking; epistaxis after eating meat; cured by revaccination.

Woman, æt. 28, suffering since infancy; conjunctivitis.

Google

VALERIANA.

Valerian. *Valerianaceæ.*

A native of Europe, where it grows in damp woods and meadows, or on dry, elevated ground. The root is collected in Spring or Autumn.

The alcoholic tincture is prepared from the powdered dry root.

Introduced by Franz.

Provings by Hahnemann, Franz, Gross, Stapf, etc., Stapf's Beiträge; Jörg, Provings, 1825; Abell, Bost. Med. and Surg. Jour., 1856, p. 117.

CLINICAL AUTHORITIES.—*Hallucinations*, Schweikert, A. H. Z., vol. 109, p. 29; *Diarrhœa of children*, Kkht., Rück. Kl. Erf., vol. 5, p. 435; *Pain in lumbar region*, Pettit, Med. Adv., vol. 2, p. 14; *Coxalgia*, Stens, B. J. H., vol. 15, p. 131; *Sciatica*, Stens, Rück. Kl. Erf., vol. 5, p. 908; Nash, Hah. Mo., vol. 24, p. 60; *Hysteria*, Hartmann, Rück. Kl. Erf., vol. 2, p. 290; *Spasms*, Marsden, Rück. Kl. Erf., vol. 4, p. 599; *Ague*, Pettit, Med. Adv., vol. 2, p. 13.

[1] **Mind.** Easy comprehension; intellect predominates over mind.

Passes quickly from one subject to another; hysteria.

Intellect confused; replies incoherently.

‖ Erroneous ideas; thinks she is some one else, moves to edge of bed to make room; imagines animals lying near her which she fears she may hurt. θ Typhoid fever.

Ecstasy.

‖ Mild delirium, with great excitement and trembling. θ Typhoid.

Fear, especially evening in dark, palpitation, trembling.

Changeable; hypochondriacal anxiety, or trembling excitability.

‖ Hysteria, overexcitable, changeable disposition and ideas.

Great melancholy and irritability; morose, easily exasperated.

‖ Hallucinations, particularly at night; sees figures, animals, men, etc.

[2] **Sensorium.** ‖ Feels light as if flying in air.

Vertigo, with a sensation as if flying.

Vertigo when stooping.

Oversensitiveness of all senses.

[3] **Inner Head.** Headache appearing suddenly or in jerks.

Pressing as from a stupefying constriction in forehead, drawing into orbits; face pale; < evenings, at rest, and in open air; > from movement, in room, and from changing position.

One-sided drawing headache from a draft of air.
Headache in sun.
‖Violent pressure in forehead, followed in a few minutes by sticking in forehead, and especially over orbits; soon sticking changes into pressure, and so on in constant alternation; sticking is like a darting tearing, as if it would pierce eyes from within outward.
Sensation in head of great coldness; hysterical subjects.
‖Nervous headaches.

[4] **Outer Head.** Sensation of icy coldness in vertex when pressing firmly with hand, or when covering it with hat.

[5] **Sight and Eyes.** Vivid light like lightning, accompanied by dark spot to side of line of vision.
Frequent flashes of light before eyes, with dilated pupils.
Luminous appearance before eyes in evening, in dark.
Better from light; < in dark.
Expression of eyes peculiarly wild; hysterical neuralgia.
Edges of lids inflamed, with biting stinging.
Pressure in eyes only in morning on rising; margins of eyelids seem swollen and sore.
Smarting in eyes as if occasioned by smoke.
Long-lasting nervous diseases of eye; eye has a wild look and sight is much confused. θHysteria.
Styes.

[6] **Hearing and Ears.** Nervous affections of ears, with ringing and hissing; jerking and cramping pains; hyperæsthesia.

[8] **Upper Face.** Cheeks red and hot, especially in open air.
Fierce pains through l. side of face, darting into teeth and ear; muscles twitch; hysterical neuralgia.
Facial pains appearing suddenly and in jerks.
Spasmodic twitching and drawing in cheek bones.
White blisters with elevated red base on cheek and upper lip, painful to touch.
‖Twitching of muscles of face. θHysterical neuralgia.

[9] **Lower Face.** Lips incrusted.

[10] **Teeth and Gums.** Stinging pain in teeth.

[11] **Taste and Tongue.** Taste as of rancid tallow.
Tongue thickly coated, foul.
‖A greasy taste in mouth, with uneasiness in throat. θNeuralgia of limbs.

[12] **Inner Mouth.** Flat, slimy taste in mouth on waking.

[13] **Throat.** Nausea, mostly in throat.
‖Sensation as if a thread were hanging down throat, with salivation and vomiting. θHysteria.

[14] **Appetite, Thirst. Desires, Aversions.** Voracious hunger, with nausea.
Worse on an empty stomach, > after breakfast.

Digitized by Google

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: like putrid eggs, morning on waking; frequent, empty.

Heartburn, with gulping up of rancid fluid, which, however, does not rise into mouth.

Nausea: with sensation as of a string hanging down throat; beginning in umbilical region, rising into pharynx; with faintness, lips white, body icy-cold.

[17] **Scrobiculum and Stomach.** Pressing aching in pit of stomach, as from something forcing a passage through it. θNeuralgia of limbs.

Cardialgia, with sleeplessness and migrating pains.

Sudden warm rising from epigastrium, with difficult breathing. θHysteria.

[18] **Hypochondria.** Spleen affections.

Pain about lower ribs.

[19] **Abdomen.** Abdomen bloated, distended, hard.

‖Colic: hysterical, especially evening in bed; after dinner; from hemorrhoids; from worms.

Involuntary inclination to draw abdomen in, on account of cutting and pinching pain.

Hysterical cramps in abdomen, most frequently evenings in bed, and after dinner; not > in any position.

[20] **Stool and Rectum.** Discharge of ascarides.

‖Thin, watery diarrhœa, with lumps of coagulated milk; diarrhœa of children.

‖Greenish papescent stool, passing with blood; constant pressing and violent screaming; diarrhœa of children.

‖‖Nightly itching; muscular spasms; sleeplessness. θWorms.

Bubbling pressure above anus in region of coccyx.

[21] **Urinary Organs.** Urine increased and more frequent.

During urination, much straining and prolapsus recti.

Sediment of urine red or white.

[23] **Female Sexual Organs.** Menses too late and scanty.

Neurasthenia of sexual organs of women.

[24] **Pregnancy. Parturition. Lactation.** ‖Child vomits as soon as it is nursed, after mother has been angry.

‖‖Child vomits curdled milk, in large lumps, the same in stools.

[26] **Respiration.** Choking in throat pit on falling asleep; wakens as if suffocating.

Inspirations grow less deep and more rapid until they cease; then catches her breath by a sobbing effort, in spells. θSpasmodic asthma.

On sitting down to meals a sensation of constriction in pharynx, as if in chest, with a suffocating feeling, followed by frequent yawning.

Digitized by Google

A sensation as if something warm were rising from her stomach, arresting breathing, with tickling deep in throat, and cough.

‖Paroxysm commences with a very rapid, convulsive movement of diaphragm, giving rise to extreme inhalations somewhat resembling panting of a dog. θSpasmodic asthma.

[28] **Inner Chest and Lungs.** Frequent jerks and stitches in chest, with a sensation as if something pressed out, < in lower part of chest.

When walking, feels a pressure over lower half of chest, with oppression of breathing.

Sudden stitches in chest and region of liver, from within outward.

‖Stitches in l. side and arm.

[29] **Heart, Pulse and Circulation.** Stitches in region of heart.

Pulse rapid, somewhat tense, or small and weak.

[31] **Neck and Back.** Spine irritated, in beginning of typhoid fever.

Pain in loins as from cold or overlifting.

Bubbling pressure above anus, in coccygeal region.

Intense pain in l. lumbar region above hip, as if he had strained part, < standing, especially sitting.

[32] **Upper Limbs.** Rheumatic pains in scapulæ.

Darting along arms, shoulders and face; hysterical neuralgia.

‖In muscles of l. arm from shoulder to fingers, a very painful drawing mixed with single stitches; a sort of tearing.

Crampy darting tearing, like an electric shock, repeatedly through humerus, in bone, intensely painful.

‖Crampy drawing in region of biceps, in r. arm, from above downward, when writing.

[33] **Lower Limbs.** ‖Pain in hip and thigh intolerable when standing, as if thigh would break. θSciatica.

Crampy tearing (tearing-darting) pain in outer side of thigh, extending into hip.

Twinging pain in outer side of calf when sitting.

When laying r. limb across l., tearing in l. calf.

Acute crampy tearing pain in posterior muscles, especially those of calf, > in morning and when rubbing affected part; < toward evening and when quiet.

‖Violent drawing, darting, jerking pains in limbs, which appear suddenly; < sitting; > from motion; strained feeling in lumbar region; lumbago.

Pulsative tearing in r. calf when sitting, in afternoon.

Drawing and weak feeling along tendo-Achillis, toward heel, as if part had lost all strength, when sitting; disappearing when rising from a seat.

Digitized by Google

Transient pain as if strained in r. ankle; pain came on after running up stairs fast; it was most felt when standing; > when walking.

Sudden pain as if bruised in outer malleolus of r. foot; feels pain more when standing.

Drawing in tarsal joints when sitting.

When sitting, heels, especially r. heel, feel painful.

‖Constant pain in heels.

‖Sciatica of r. side; < when straightening out limb, especially while standing, could stand at her work with comparative comfort if she stood with foot of affected side upon a chair.

‖Obstinate coxalgia of nine months' duration; pain greatly < by standing, with feeling as if thigh would break.

A feeling of lightness in leg after walking.

[34] **Limbs in General.** Rheumatic pains in limbs, rarely in joints; < during rest after previous exertion; > from movement.

Arms and legs move normally, but when at rest, jerk and twitch. θHysteria.

Slow painful drawing and jerking, as if in bones of upper and lower extremities, when sitting quietly.

‖Constant jerking of limbs. θHysterical neuralgia.

Heaviness like lead in limbs, a drawing, feels as if he must move limbs, but cannot.

[35] **Rest. Position. Motion.** Rest: headache <; cramp in calf; rheumatic pain <; arms and legs twitch.

Sitting: pain in lumbar region <; twinging in calf; pain in limbs <; pulsative tearing in r. calf; drawing, weak feeling along tendo-Achillis; drawing in tarsal joints; pain in heels; drawing and jerking in bones of limbs.

Stooping: vertigo.

Standing: pain in lumbar region <; pain in hip and thigh intolerable; pain in r. ankle <; sciatica <; coxalgia <.

Changing positions: headache >.

Laying r. limb across l.: tearing in l. calf.

Motion: headache >; pain in limbs >; rheumatic pain >.

Straightening out limb: sciatica <.

Writing: crampy drawing in r. biceps.

Walking: pain in r. ankle >; lightness in leg, after.

Running up stairs: pain in r. ankle.

[36] **Nerves.** Ecstasy, overexcitable, changable disposition and ideas; jerking, twitching, trembling; a sensation as if something warm were rising from stomach, arresting breathing, with tickling deep in throat, and cough; feels a sensation as if a thread were hanging down

Digitized by Google

œsophagus from pharynx; fearfulness, tremulousness and palpitation of heart. θHysteria.

‖Agitation of all nerves; jerks, twitches, trembling.

‖‖Oversensitiveness of all senses.

‖‖Hysterical complaints.

Drawing in many places, now here, now there, like transient jerks.

Restlessness and spasmodic movements of limbs; staggering gait.

‖Spasms after slight injuries.

‖Nervous affections when apparently well-chosen remedy fails; defective reaction; slightest exertion causes violent headache, slightest pain fainting; warm sensation rising from stomach into throat, with globus hystericus; pains simulating rheumatism in limbs, < sitting, > walking about; hysterical women

‖‖Severe shooting pains in l. side of face, teeth, ear and arm; complete sleeplessness; convulsive tossing about of limbs; twitching of muscles of face; lips covered with a crust; thick dirty-looking coating on tongue, edges of which were torn by teeth during convulsions; gloomy expression; eyes staring, restless, wild; during conversation, eyes wander from object to object, and she does not understand questions; menses normal; wanders about house.

‖Great excitement and trembling. θTyphoid fever.

[37] **Sleep.** Sleepless, restless tossing, cannot sleep before 12 P.M.; nightly itching, muscular spasms; falls asleep only toward morning, when he had vivid dreams.

Worse on awaking.

[38] **Time.** Morning: eructations.

Toward evening: cramp in calf.

Evening: headache <; in bed, colic; heat <.

Night: profuse sweat.

12 P.M.: cannot sleep before.

[39] **Temperature and Weather.** Open air: headache <; cheeks red and hot.

Draft of air: headache.

[40] **Fever.** Chill: of short duration; followed by long-lasting heat, with dulness of head and thirst; begins in neck and runs down back; fainting during cold stage.

‖‖Chill almost wanting, heat exceeds considerably in intensity and endurance, followed by perspiration.

Heat: in whole body, with uneasiness; flushes over cheeks; long-lasting; with sweat on face; < evenings and when eating; with thirst; predominates.

‖‖In evening spells of fugitive heat with thirst, no shivering. θNeuralgia of limbs.

Google

Sweat: profuse, < at night, or from exertion, with violent heat; on face with heat; frequent, suddenly ceasing, mostly on forehead; > after.

" **Attacks, Periodicity.** Suddenly, or in jerks: headache; facial pains; pain in limbs.

Alternation: of sticking pain and pressure in forehead.

Now here, now there: transient jerks

" **Locality and Direction.** Left: prosopalgia; stitches in side and arm; pain in lumbar region as if strained; drawing in arm.

Right: drawing in biceps; strained feeling in ankle; bruised pain in outer malleolus; sciatica.

" **Sensations.** As if flying in air; as if eyes would be pierced from within outward; as of smoke in eyes; as if a thread were hanging down throat; as of something forcing a passage through pit of stomach; as if suffocating on falling asleep; as if something warm were rising from stomach; as if something pressed out in lower chest; as from cold or overlifting, pain in loins; as if he had strained l. lumbar region; as of an electric shock through humerus; as if thigh would break; as if strained in r. ankle; as if bruised in outer malleolus of r. foot; lightness in leg; like lead in limbs.

Pain: about lower ribs; in hip and thigh; in heels; in eruptions.

Jerking: headache; in ears; in face; in chest; in limbs; in bones of limbs.

Darting: in forehead; from face into teeth and ears; in face; in shoulders; along arms; in humerus; from thigh to hip; in limbs.

Cutting: in abdomen.

Stitches: in chest; in region of liver; in l. side and arm; in region of heart; in l. arm.

Shooting: face, teeth, ear and arms.

Sticking: in forehead; over orbits

Stinging: in edges of lids; in teeth.

Tearing: in forehead; in l. arm; in humerus; in thigh to hip; in l. calf; pulsative; in r. calf.

Drawing: headache; in cheek bones; in muscles of l. arm; in r. biceps; in limbs; along tendo-Achillis; in tarsal joints; in bones of limbs.

Rheumatic pains: in scapulæ; in limbs.

Aching: in pit of stomach.

Smarting: in eyes.

Biting: in edges of lids.

Pressure: in forehead; in eyes; in pit of stomach; over lower chest; bubbling, above anus.

Pinching: in abdomen.

Digitized by Google

Cramping: in ears; through humerus; in r. biceps; in thigh to hip; in posterior muscles, especially in calf.
Constriction: in forehead; in pharynx.
Twinging: in outer side of calf.
Heaviness: in limbs.
Tickling: in throat.
Weakness: in tendo-Achillis.
Coldness: of head; in vertex.

[44] **Tissues.** "Nervous affections occurring in excitable temperaments; in hypochondriasis, it calms the nervousness, abates the excitement of the circulation, removes the wakefulness, promotes sleep, and induces sensations of quietude and comfort; sadness is removed; in globus, in all asthmatical and hysterical coughs, and nervous palpitation of heart, profuse flow of limpid urine."
Excessive nervous excitability; exaltation; hysterical spasms; fearfulness and tremulousness with palpitation; hysterical element predominates.
Red parts become white.

[45] **Touch. Passive Motion. Injuries.** Touch: blisters on cheek and lip painful.
Rubbing: > cramp in calf.
Pressure: of hand or hat, icy coldness in vertex.
After slight injuries: spasms.
Decubitus: early in typhoid.

[46] **Skin.** Painful eruptions.
| | White miliaria on chest and back. θ Typhoid.
| | Skin too dry and warm. θ Hysterical neuralgia.

[47] **Stages of Life, Constitution.** Hysterical women who have taken too much chamomile tea.
Nervous, irritable, hysterical subjects, in whom the intellectual faculties predominate, and who suffer from hysterical neuralgia.
Woman, æt. 24, tall, dark hair and eyes, mother of a 9-months-old child; spasms.
Woman, æt. 50; hysterical hallucinations.
A man, æt. 50, of florid complexion, almost ruddy, habitual cheerful temper; neuralgia of limbs.
Mrs. ——, tall in stature, fair complexion, dark hair and eyes, usually feeble, subject to nightly attacks of asthma; spasmodic asthma.
A highly nervous and irritable constitution; neuralgia.

[48] **Relations.** Antidoted by: *Bellad.*, *Camphor*, *Cina*, *Coffea*, *Pulsat.*
It antidotes: *Mercur.*, abuse of chamomile tea.
Compare: *Arnic.*, *Asafœt*, *Crocus*, *Dulcam.*, *Hyperic.*, *Ignat.*, *Nux vom.*, *Spigel.*, *Sulph.* (spasms after injuries).

Google

VERATRUM ALBUM.

White Hellebore. *Melanthaceæ.*

The European Hellebore grows in moist meadows in the Alps and Pyrenees, through Russia, Northern China and Japan.

The tincture is prepared from the powdered dry root.

Introduced by Hahnemann, and proved by himself, Becher, Franz, Fr. Hahnemann, Stapf, Teuthorn, etc., R. A. M. L., vol. 3; Lembke, N. Z. für H. K, vol. 7, p. 73; Schelling, A. H. Z., vol. 83, p. 19.

Toxicological reports are numerous, see Allen's Encyclopedia, vol. 10, p. 73.

CLINICAL AUTHORITIES.—*Melancholia*, Dulac, A. J. H. M. M., vol. 3, p. 56; *Mania*, Schreter, Woost, Hirsch, Rück. Kl. Erf., vol. 5, p. 12; Knorre, A. H. Z., vol. 19; B. J. H., vol. 12, p. 482; *Insanity*, Jahr, B. J. H., vol. 12, p. 468; Jahr, B. J. H., vol. 12, p. 476; Foote, N. A. J. H., vol. 22, p. 546; Frost, N. E. M. Mind. ‖Is conscious only as in a dream.
Stupid from excess in alcoholic drinks.
‖Fancies herself pregnant, or that she will be delivered soon; that she is in throes of childbirth. θHysterical mania.
‖Erroneous and haughty notions.
‖Never speaks the truth; does not know herself what she is saying.
‖She is inconsolable over a fancied misfortune, runs about room howling and screaming; or sits brooding, wailing and weeping; < in evening; sleeps only till 2 A.M.
Alternation of laughing and moaning.
Attempts a great many things, but accomplishes nothing.
Rage, with great heat of body; eats his own feces.
Suicidal tendency from religious despair.
‖Thinks himself distinguished; squanders his money; proud of his position.
‖For six days no sleep; sees people about her constantly, speaks to them; cries out; sings; knows nobody, takes no notice of anything; laughs frequently; does not

answer when talked to; wants nothing; passes urine and feces unconsciously; no heat of face; pulse regular; confined two weeks previously.

After a severe illness, aversion to husband and children; desire to leave house; hallucinations, room appeared full of people, crowding in where there was no longer room; each apparition personating some one in particular, and keeping her company for hours; she would both see and converse with forms sitting beside her, nor could she always distinguish semblance from reality.

Attacks of pain with delirium, driving to madness.

Delirium: religious or exalted; heavy, soporous sleep; restless, thirsty, cramps in legs, cold sweat, tingling; irregular pulse; in cerebro-spinal meningitis.

Slight delirium; coldness over whole body, open eyes, with cheerful, sometimes laughing expression; prattles about religious subjects and about vows to be performed, prays, believes that he is not in his own house.

A tendency to violent outbreaks, desire to strike those about him.

Attacks of rage with swearing; inclination to run away.

A woman, æt. 36, has lectrophilie, red burning face, anxiety, hopelessness, despair, continual moaning and screaming without a cause; does not eat or drink, is sleepless; brought on by sexual excitement.

Persistent raging, with great heat of body.

Mania: with desire to cut and tear everything, especially clothes; with lewdness and lascivious talk; religious or amorous; de grandeur.

Nymphomania, with violence and destructiveness; had been disappointed in love; melancholia; at times loquacious; great desire for sexual intercourse; void of shame; obscenity; very troublesome, requiring close confinement; had been confined a year in an asylum.

Puerperal mania and convulsions, with violent cerebral congestion; bluish and bloated face; protruded eyes; wild shrieks, with disposition to bite and tear.

Disposed to silence, or to talk about faults of others; if irritated scolding and calling names.

A desire to wander about house. θ Hysteria.

Chases his family out of house; declares the sun travels around the earth; fear of death, restlessness, despair; foolish actions.

Loquacity, he talks rapidly.

Talks much on religious subjects; praying; is overconscientious.

Sleeplessness; face distorted; cries; prays, says it is a secret and a misfortune; refuses to talk, only motions

Google

with hands; turns hands around in a circle, saying she must strengthen herself, and then motions become more violent; complains of dust in throat; imagines herself in heaven talking with God. θMania.

‖‖Constant talking, wild expression of eye, constant smiling, at times loud laughter; distorts face and repulses any one approaching him; will answer no question; runs behind table and scolds; refuses food.

‖‖Complete sleeplessness; talks constantly; on hearing any sound, as striking of clock, etc., becomes wild, dances about, must be held; rapid speech.

‖He groans, is beside himself.

‖Cursing and howling all night.

‖Curses all night and complains of stupid feeling with headache and ptyalism.

‖‖Roaring and raving, five men could scarcely control her; tears her clothes; pale distorted features; look threatening, wild; hair dishevelled; utters sounds more like a beast than a human being; bites, strikes about her, spits; body in constant swaying motion; murmurs and groans; takes no notice of questions; eats nothing; quite sleepless.

‖Kisses everybody; before menses.

‖Impudent behavior in childbed.

‖‖Taciturn; disinclined to talk, except in delirium.

Cannot bear to be left alone.

‖Depression and despondency.

‖Fear and anxiety; fear takes breath away.

‖Fearfulness: starts; with running about and shouting.

‖Anxious, restless, easily frightened, whining, weeping, apathetic, delirium, blue face. θTyphoid.

‖‖Cold sweat on forehead, with anguish and fear of death.

Unable to rise for eight hours, obliged to either sit or lie; if he stands he is tormented by fearful anxiety, wherewith forehead becomes covered with cold sweat and he becomes sick to vomiting.

‖Anxiety as from a bad conscience, as if he had committed a crime.

‖Anxiety as after committing an evil deed, < evening and after dinner.

‖‖A crippled girl fell down suddenly in convulsions, was brought to bed and had a shaking chill; sat up in semiconscious state, refusing assistance, food or drink; anxiety with groaning and sighing all night long; chides her father for taking part in revolution; thinks she hears drum which proclaims his execution; this is followed by silent brooding and occasional starts; menses checked, abdomen tense, face pale, arms cold, eyes fixed

Digitized by Google

with contracted pupils; pulse slow and almost imperceptible.

‖Melancholy, head hangs down, sits brooding in silence.

‖Religious melancholy or nymphomania, with desire to embrace everybody, even inanimate objects; much thirst for very cold water; constantly craving cool and refreshing things. θPuerperal mania.

‖Despair; hopelessness, loss of courage.

‖Despair about his position in society, feels very unlucky.

‖‖Despair of her salvation; with suppressed catamenia.

‖‖Despair of his recovery; attempts suicide. θMania.

‖After fright: fear, anxiety; coldness; fainting; involuntary diarrhœa.

‖‖Consequences of injured pride or honor. θInsanity. θHysteria.

[2]**Sensorium.** ‖Vertigo: with cold sweat on forehead; with loss of vision; sudden fainting; from opium eating; from abuse of tobacco or alcohol.

Heaviness of head, things seem to whirl in a circle. θTyphoid.

‖Faints from least exertion, turning in bed, straining at stool, retching as if to vomit, etc.; from slight wounds; from violent pains; after loss of fluids; anxiety, nausea, convulsive twitchings.

Fainting preceded by great anguish or despondency, or attended by spasms, lockjaw, convulsive motion of eyes, eyelids, etc.

[3]**Inner Head.** Burning in brain.

Paroxysmal pain here and there in brain, consisting of a bruised sensation and pressure.

‖‖Sensation of a lump of ice in vertex.

‖Neuralgia of head, with indigestion; features sunken.

Head hot and covered with sweat; children rub head, cannot bear to be left alone; put hands to head. θTyphoid.

‖Headache: with nausea, vomiting, diarrhœa, pale face; with vomiting of green mucus; like a pressure on vertex; stiff neck; frequent and profuse micturition; as if brain were torn to pieces; chronic, coming on in afternoon, lasting through night; drawing in both arms; > toward morning; violent pains drive to despair; great prostration; fainting, with cold sweat and great thirst; with obstinate constipation; nervous, at every menstrual period, in girls and hysterical women; < by movement, especially stooping.

‖‖Pressing, throbbing, nervous headache affecting one side, with stiffness of neck and sensation as if head would burst; vomiting.

Digitized by Google

‖Hemicrania.
‖Neuralgia of head, with dyspepsia; sunken eyes and chest cold limbs.
‖Sick-headache in which diuresis forms a crisis.
‖Blood rushes violently to head on stooping.
‖Hyperæmia of brain from whooping cough.
‖Sopor; eyes half closed; face pale, emaciated; tosses head about and screams; bores head into pillow; transient flushes of face; kicks coverings off; when raised up head falls to l. side; eyes dull, pupils contracted; cornea looks like ground glass, is covered with a thin layer of mucus, which has become dry at angles of eyes; loud cries do not rouse him from stupor; when raised up eructations and retching; pulse weak, slow; refuses to nurse; head hot, rest of body cool. θMeningitis.
‖Cerebro-spinal meningitis; cold sweat all over body, vomiting, with cramps in stomach; great thirst for icy-cold water or craves ice; muscles of head too weak to support head; pulse irregular, very weak and slow; coldness predominates; great debility persistent; cramps in legs; wants to escape from bed; heavy comatose sleep.
‖Meningitis; violent headache with delirium or unconsciousness; copious vomiting, pale, cold and cadaverous face; stiffness of neck, choking in throat, feeling as if head would burst; rolling head violently from side to side, with short screams, bores head into pillow; convulsive shocks and vomiting as soon as head is raised; clonic and tonic spasms, with loss of sense and motion; cramps in limbs; tingling and coldness in limbs; choleraic collapse, simultaneously with intense congestion.
‖Hydrocephaloid; great inequality in division of heat; skin cold and clammy; vomiting and all symptoms < when raising himself up, and comparatively well-feeling in horizontal position; least motion produces nausea and vomiting; loss of strength in extremities; stiff neck, great tendency to convulsions; great thirst for ice water or ice; disfigured pale face or redness of one cheek; great prostration after a stool.

'**Outer Head.** Head burning hot; limbs alternately hot and cold.
‖Scalp very sensitive, with headache.
‖Sensation like a piece of ice on head; or of warmth and coldness at same time, on scalp, hair being sensitive.
Sensation in hair on r. side of head as if a bunch of hair were electrified, crawling and bristling of hair, with slight shivering of skin under hair.
‖Sensation of soreness of head, with nausea.
‖Plica polonica.

Digitized by Google

‖‖Cold sweat on forehead.
Compelled to rub forehead, with a kind of insensibility. θTyphoid.
‖Neck too weak to hold head up. θWhooping cough. θMeningitis.

[5] **Sight and Eyes.** Black motes or specks before eyes, with diplopia; photophobia; < on rising from bed or chair.
‖Hemeralopia.
‖‖Hemeralopia, with nightly diarrhœa.
Impaired vision; dilated pupils.
‖Eyes: turned upward, showing only whites; distorted, protruding; fixed, watery, sunken, lustreless; full of tears; lids livid, blue edges; surrounded by black rings; have a weak look; look yellow or blue.
‖Pupils: contracted; dilated, with weak sight; fails to recognize those near, or does so but slowly.
Tearing pains in eyes, depriving one of sleep; < in cold, damp weather. θRheumatic ophthalmia.
Pressing in eyes.
Heat in eyes.
‖Extreme dryness of lids; especially after sleeping; painful, as if rubbed sore; stiff and agglutinated.
‖Acute sensation of dryness in upper lid, as if salt were between it and ball.
‖Lids: heavy, can scarcely lift them; trembling; paralysis.
Profuse lachrymation and cutting pains, with feeling of dryness and heat.
Frequent lachrymation, with redness of eyes as in coryza.
‖‖Neuralgia palpebralis in upper lid, r. side; pain severe on slightest pressure or least touch, as if hundreds of fine needle-points were suddenly thrust into lid; in morning on first waking could not open eyes, it seemed as if inner surface of lids were too dry, and that they stuck fast to ball.

[6] **Hearing and Ears.** Deaf, as if ears were stopped.

[7] **Smell and Nose.** Smell before nose as from manure or smoke.
‖Nose: grows more pointed, seems longer; icy-cold.
‖Epistaxis: right-sided, only at night in sleep; face deathly pale, body cold; pulse slow, intermittent.
Sensation as if nose internally were completely dry.
Boring in nose.
Frequent sneezing.

[8] **Upper Face.** ‖Restless, wild look; pale, distorted face.
‖Blue or green circles around eyes.
‖Face: collapsed, pale, bluish; nose pointed; of leaden hue; red in bed, becomes pale on rising; alternately pale and red; risus sardonicus; sunken, with anxious expression; pinched up, deathlike, hippocratic.

Digitized by Google

‖‖Cold sweat on face, particularly on forehead.

‖Neuralgia, drawing, tearing pains, with bluish, pale face, sunken eyes; prostration.

‖Tearing in cheeks, temples and eyes, with heat and redness, driving to madness; < in damp weather; r. side or l. to r.; especially in anæmic persons.

‖‖Suddenly aroused from sleep by severe attack of prosopalgia; l. side of face and head affected; constant crying; pain continuous, not > by warmth; face red, particularly affected side, which is hot and bluish-red; l. eye is injected; pain in supra- and infraorbital nerves and branches; trembling of whole body; twitching of limbs; after attack general cold sweat and prostration.

‖‖Intermittent frontal neuralgia; face very pale, eyes sunken, dull; coldness of limbs; nearly every fifteen minutes vomiting of greenish-yellow serum, ceasing as pain abates. θProsopalgia.

‖Neuralgia of trigeminus, with vomiting, pale, sunken face.

‖Acne rosacea.

[9] **Lower Face.** Lips: bluish or hanging down; rubbing mouth and nose; dry, black, parched; wrinkled, pale or black, and cracked.

‖Black around mouth and nostrils. θTyphoid.

Twitching in cheeks, sparks before l. eye, paleness of face and faintness, followed by vomiting of a quantity of white froth.

Spasms of muscles when masticating.

Lockjaw.

Risus sardonicus.

‖Stiffness of masseter muscles.

Froth from mouth.

[10] **Teeth and Gums.** ‖Violent toothache, throbbing; face swollen, cold sweat on forehead; sickness at stomach, vomiting of bile, lassitude of extremities, great sinking of strength, even to fainting, external coldness, and internal heat, thirst for cold drinks scarcely to be satisfied.

‖Violent throbbing toothache driving to madness; nervous, excitable persons.

Teeth feel heavy, as if filled with lead.

Toothache, with pain in head, and red, swollen face.

Grinding teeth.

[11] **Taste and Tongue.** Taste: bitter; and coolness, as from peppermint; flat or sweetish; putrid; diminished; pasty; sour.

‖Tongue: pale, cold, withered; swollen, dry, cracked and too red; white, with red tip and edges; coated yellowish-brown; back part black.

‖Speech lisping, stammering; as if tongue were too heavy. θTyphoid.

[12] **Inner Mouth.** Froth at mouth; spasms.
‖Mouth dry and sticky; saliva lessened.
‖Dryness of mouth and palate, with thirst.
‖Burning in mouth and throat.
Cool sensation in mouth as from peppermint.
‖Constant flow of saliva like waterbrash.
Salivation, with nausea and sharp, salty taste.

[13] **Throat.** Dryness in throat, cannot be removed by drinking.
Scraping or roughness in throat; sensation of dust.
‖Sensation of coldness or burning in throat.
‖Sensation of constriction of throat; spasmodic, with suffocation.
‖Spasmodic affections of œsophagus, resulting in paralysis of tube; nearly all food and drink taken is thrown up, with suffocating sensation, redness and heat of face.
‖Chronic catarrh of œsophagus with asthma.
Feeling of distension in pharynx.
‖Swelling of sublingual or r. submaxillary gland, also of cheek, external neck, throat and soft palate; tensive stitching pains; constant accumulation of saliva which he cannot swallow; fear of suffocation; cannot talk distinctly; remitting fever, < every other day, evening exacerbation; delirium at night; anorexia; præcordial anxiety; dry cough; pain in back and hips; dry stool; reddish-brown urine; swelling increases or grows less as fever rises or falls.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Appetite voracious. θAfter typhoid.
Hunger: between paroxysms of vomiting; with diarrhœa.
‖Attacks of bulimia, intense, but of short duration, even soon after a full meal, particularly after exercise in open air; if craving is not at once satisfied, is seized with great weakness, nausea and vomiting, darkness before eyes and ringing in ears; becomes dizzy, hands tremble, raves, and finally falls into a fit of deep unconsciousness; attack prevented by eating a little food at onset; attack preceded by feeling of warmth and prickling in fingers and toes, and twitching of muscles of face.
Appetite diminished, mouth as if lined with mucus; flat or sweetish taste.
‖Thirst: drinks frequently but only a little at a time; wants everything cold; during perspiration; for large quantities of very cold water and acid drinks.
‖‖Thirst for coldest drinks; craves ice.
‖Craves fruit, juicy or cold food, saltish things, herring, sardines, etc.

‖Better from eating meat and drinking milk.
Aversion for warm things.
▮Bad effects: of opium eating; tobacco chewing.

[16] **Hiccough, Belching, Nausea and Vomiting.** ▮Hiccough: after hot drinks; by spasms of œsophagus with nausea.
Eructations violent, empty, sour, or bitter.
▮Nausea: with weakness, is obliged to lie down; with sensation of fainting; with violent thirst, followed by violent and frequent vomiting; with profuse salivation; with great appetite and thirst; < from least motion; qualmishness with frothing from mouth.
▮▮Vomiting: forcible, excessive; violent with continued nausea, retching and great prostration; of thin blackish or yellowish substances; of bile and blood, black; of food and drink, or drink only; of food, or of acid, bitter, foamy, white or yellowish-green mucus; whenever he moves or drinks; with vertigo, pale face, clean tongue, good appetite; with hiccough and fainting; with painful retraction of abdomen; with painful distortion of face; with cold sweats; with diarrhœa and pressure in pit of stomach.
Before vomiting, cold hands, becoming hot afterward.
‖Food causes pain when passing along œsophagus; choking sensation when swallowing food or drink; regurgitation of a portion of food eaten; for nearly two years, nearly all food and beverage taken has been thrown up very soon after meals; vomiting with a suffocating sensation, redness and heat in face; very much emaciated and weak; a strong longing for food, but dreaded to eat; constipated, low-spirited; palpitation, weak pulse and cold extremities.
‖On rising in morning nausea, belching, ptyalism, vertigo, diarrhœa and vomiting; appetite good, but must vomit immediately after eating; vomiting day and night; three to six thin, slimy, brownish stools; vertigo; emaciation; lassitude.
‖Spasmodic retching and vomiting of watery tasteless fluid; constipation; tearing pains in limbs.
‖Vomiting of food and large masses of mucus.
‖Frothy vomiting, followed by yellow matter or bile; intermittent pulse. θMeningitis. θPneumonia.
‖Child, æt 6 months, lay quiet and stupid; face pale; forehead cold and damp on vomiting.

[17] **Scrobiculum and Stomach.** In pit of stomach: ▮anguish; painful distension; pressure; acute pain; great sensitiveness; burning.
Pain in stomach as from ravenous hunger.
Sensation of weakness in stomach, with internal sensation of coldness.

Digitized by Google

Hysterical cramps in stomach.

Pain coming gradually, first in epigastrium, thence radiating upward and to both sides, reaching to back between lowest point of scapulæ; becomes agonizing, then gradually subsides; shakes with cold. θGastrodynia.

Great distress over heart and epigastrium, deathlike look, could only speak a few words, cold, pulse weak and fluttering, and just perceptible, nausea and attempt to vomit, > from rubbing spine between shoulders; followed application of strong liniment for neuralgia of shoulders, back and arms.

Ten minutes after eating, food began to return in mouthfuls, and continued doing so at intervals for two hours; cramplike pain in epigastrium; < for a week after menses, vomiting with violent pain in loins; menses regular, but too profuse; constipation; extremely weak; throbbing pain in r. temple. θGastralgia.

Intense burning sensation extending into œsophagus; vomiting of greenish masses; great anxiety; coldness of limbs; slow, intermitting pulse. θGastritis.

Hæmatemesis, with slow pulse, coldness, fainting fits, cold sweat.

Pains under scapulæ; loss of sight; vertigo; urine thick when passed and very dark, sometimes almost black; cold sweats at times; food has no taste; smoking makes throat dry and he does not enjoy it; craving for food; nausea when eating, cannot get food down without retching; tongue white.

Thick brownish-white coating on tongue; aversion to food; attempting to eat causes nausea and vomiting; pappy, flat, but especially sweetish taste in mouth; dulness of mind; want of animal heat; chilliness, seeks warmth. θGastric disturbance.

Pain half an hour after food or after walking or other fatigue. θIndigestion.

Dyspepsia; severe pain an hour after eating; waterbrash; relaxed motions, three or four during night; urine loaded with lithates; great debility.

Chronic weakness of stomach; from dampness of climate and want of fresh air; from abuse of quinine.

All fruits cause painful distension of stomach.

Gastric catarrh, great weakness, cold, sudden sinking.

Softening of stomach; nausea before fainting; vomit greenish, acid; copious, watery, without smell; colic, collapse, convulsions.

Softening of stomach in children, in course of hydrocephaloid.

Hæmatemesis, with slow pulse, coldness, fainting fits, cold sweat; nausea when moving or rising.

Digitized by Google

[18] **Hypochondria.** ‖Hyperæmia of liver, gastric catarrh, putrid taste, disgust for warm food, great pressure in hepatic region, alternating with vomiting and diarrhœa.

‖Hyperæmia of liver, with cholera-like symptoms, or with asthma and bronchial catarrh.

Spleen swollen. θIntermittent fever.

‖Spasms of diaphragm during prevailing south winds, in persons with cold hands, great oppression and anxiety in chest.

‖Diaphragmitis, with peritonitis, vomiting and coldness.

[19] **Abdomen.** ‖Great sinking and empty feeling.

‖Empty feeling in abdomen after stool as if she needed food; headache on vertex about 5 P.M.

‖‖Cold feeling in abdomen.

‖Burning in abdomen as from hot coals.

‖Cutting in abdomen as with knives.

Griping in abdomen, at times above, at times below navel, in afternoon soon after eating.

‖Intermittent neuralgia of bowels; about 4 P.M. commences throwing up quantities of wind, about 5 P.M. intense, agonizing neuralgia, like knives cutting her bowels, chiefly affecting l. side, coming on at intervals of a few minutes, so intense that it took three or four men to hold her; attacks lasted from 3 o'clock to 9 P.M., then terminated by two deep sighs or gapes.

‖Violent attacks of neuralgia; a certain movement felt about navel, then suddenly, always at same place, a pinching as by pincers, with most intolerable pain lasting half or a whole minute; each time it went away with borborygmus, extending to cæcal region; sensation of constriction above and below, preventing flatus from passing; attacks of anxiety and pain increase from half to a whole hour, abdomen swelled and became painful to touch; inclination to vomit, chest constricted, breathing shorter, more and more difficult, cold sweat, stupefaction and total exhaustion; could not swallow a drop of liquid, much less any solid food; lay many hours stupefied, unconscious, with a swollen face and protruding eyes, without sleep; > after wind passes up or down.

‖Colic; face pale; abdomen sunken, bloated during paroxysm; pain, particularly in epigastrium; burning pain under l. ribs; sensitiveness to pressure; pain over whole abdomen extending to back and thighs; here and there hard spots in abdomen; finally belching of wind with relief; constipation; loss of appetite; tongue coated; at times vomiting, chilliness; lassitude; sleeplessness.

‖‖Colic; with burning; as if intestines were twisted into

a knot; after a cold; turning, twisting, pressure, constriction, cutting, tension; after abuse of quinine; from fruits and vegetables; abdomen swollen, sensitive; no flatus either way; cold sweat; with burning pain, twisting, cutting, nausea and vomiting, < from food; > after wind passes; with morning diarrhœa.

‖For several years distension of abdomen, sometimes in stomach and sometimes in bowels, with violent eructations, coming on about 4 A.M. and lasting for two hours, somewhat > drinking warm fluids.

‖Abdomen distended, very sensitive.

‖Painful retraction of abdomen during vomiting.

‖Intussusception of bowels; great anguish; rushes about bent double, pressing abdomen.

‖Sudden severe pains in l. hypochondrium, with attacks of vomiting; sleeplessness; severe pains in descending colon; obstinate constipation; rumbling and gurgling in abdomen on pressure. θIntussusception.

‖Peritonitis, with vomiting and diarrhœa, skin cold; features sunken; pulse small, weak; restless, anxious.

‖Incarcerated hernia, not inflamed; anti-peristaltic action; cold sweat, nausea.

Protrusion of inguinal hernia during cough.

[20] **Stool and Rectum.** ‖Stools: frequent; watery, greenish, mixed with flakes; gushing, profuse; rice-water discharges, with tonic cramps, commencing in hands and feet, spreading all over; sunken, even hippocratic face; watery, inodorous; watery, gushing, flaky; thin, papescent, mucous; green, gushing, exhausting after fright; brownish, watery; blackish, watery; bloody; bilious; mucous; corrosive; sometimes painless; involuntary (while passing flatus); from least movement of body; thin and painless, with rumbling of bowels.

‖Before stool: chilliness, anxiousness, nausea, vomiting; severe pinching colic; rumbling in abdomen; weakness in hypogastrium like faintness.

‖During stool: chills and shivering; anxiety, nausea, vomiting; faintness; paleness; cold sweat on forehead; pinching colic; burning in anus and cold perspiration on forehead; weakness.

‖After stool: improvement of cervical pains; squalmishness in epigastrium; nausea, vomiting; colic; great sinking and empty feeling in abdomen; weakness; faintness; great exhaustion.

‖Diarrhœa: with vomiting of turbid water, and cold sweat on forehead; as Autumn comes on, when vomiting is superadded to purging, and intestinal evacuations are expelled in a forcible gush, with little or no griping,

Digitized by Google

colic, with hiccough and suffocation; stools involuntary, watery; hippocratic countenance, and cold extremities; stools frequent, violent, profuse and painful; much exhaustion after every passage, with cold sweat upon forehead and skin in general; in frequent attacks, face sunken, greyish; after wet feet; of phthisical patients.

Diarrhœa after drinking much cold water on a hot day; bilious vomiting, with watery, painful stools; great præcordial anxiety; long-lasting faintlike nausea; skin pale; limbs cold.

Several diarrhœic stools during day, particularly directly after eating; pressure in stomach after eating, < at night, with nausea, becoming a cutting pain on motion; sensation of trembling in stomach; thirst.

For some years, morning diarrhœa, with despair of salvation.

Sharp pains in hypogastric region for two weeks; by day very profuse light-brown, watery diarrhœa, almost involuntary, preceded by sharp pain in same region, > after stool; very weak; profuse warm sweat; red face and lips; urine diminished.

Diarrhœa for three weeks; three or four stools, sometimes more, every day; stools dark, clay-colored, rather slimy, very offensive; before stool, cold in face, with cold sweat on face and forehead; diarrhœa < from time of rising till 10 A.M., then > till 3 P.M. when it gets < again; < directly after food; came on with hot weather.

For ten months lassitude, coated tongue, malaise, nausea and diarrhœa; vomiting first of food, then of yellow, bitter bile, without pain; stools liquid, always occur with vomiting as well as at other times; pain in lower abdomen before diarrhœa, except when she vomits, then diarrhœa is painless; exhausted after vomiting; after much straining there was froth in vomit.

Simultaneous purging and vomiting. θCholera.

Sudden attack of diarrhœa coming on during dinner; while eating suddenly seized with colic in transverse colon, followed speedily by urgent desire for stool, which gushed out suddenly, and consisted of dark-brown, frothy feces.

Severe diarrhœa from fright; stools liquid, gushing out with force; feels exhausted; cold sweat all over body with every stool, but especially on forehead.

Diarrhœa, discharges white, prostrating urging to stool; great prostration, with attacks of fainting.

Unconscious discharge of thin feces while passing flatus.

Diarrhœa of six months' duration; stools brown, painless, one to four daily, < from manual labor and after

potatoes; loss of appetite; great thirst; sensation as if something alive were rising from stomach into throat.

‖ Extreme collapse; coldness of surface; clammy sweat; pale face; sunken eyes; great thirst; vomiting and purging of almost colorless fluid very freely; pain not excessive, but feeling of weakness intense. θDysentery.

‖‖ Intestinal catarrh, diarrhœa coming on suddenly at night, in Summer; vomiting and purging.

‖ Cholera infantum: attack sudden; violent watery vomiting and purging, cold surface, prostration, vomiting excited by least amount of liquid taken; great thirst for large quantities of water, excessive weakness; stools watery and inodorous; tongue and breath cold; difficulty in breathing; desire to sit up; blueness around eyes; skin seems drawn tightly over bones of face; wrinkling of skin of hands and fingers; sensitiveness over abdomen.

‖ Face ashy pale, of a waxy hue; cold, eyes sunken, with dark rings around them; nose pinched, lips and nose blue; extremities cold as ice; pulse imperceptible; temperature in axilla 104.2 F.; abdomen warm, soft, though distended; eyes look wild, rolls them up showing only sclerotic; head rolling from side to side, constant moaning (meningeal irritation); tongue coated at base, clean at lips, dry; mouth and lips parched; thirst constant; very restless; > by being carried; vomiting and retching; had not kept anything on his stomach for three days; from twelve to fifteen stools in twenty-four hours, green, watery, gushing, changing to a blue-slate color on standing; pain in abdomen before stool, which appeared to be of a griping nature, > after passing stool; much weakness and exhaustion after a motion, child lying perfectly limp; skin dry; emaciation especially marked about face and neck; sleeplessness, had not slept for three days and nights; < at night, > toward morning; next morning constant twitching and jerking of arms and legs; head rolling from side to side. θCholera infantum.

‖‖ Cholera morbus: < at night; cold sweat on forehead; vomiting and purging at same time; after fruits; with profuse brownish discharges, thirst, cramps in calves, feet and fingers; prostration; cold sweat; great weakness after stool.

‖ Bathed in a cold perspiration, very weak and badly frightened; had been vomiting and purging for about two hours; severe cramping pains through bowels and lower extremities; stools thin, green and watery; constant thirst and drinking large quantities of cold water. θCholera morbus.

Digitized by Google

‖Sporadic cholera; blueness of hands, face and feet; cramps in calves; contraction of abdominal muscles; great prostration; hippocratic countenance; vomiting; green flocculent discharges; surface of body cold as marble (3 cases).

‖Cold sweat on forehead; dilated pupils; lachrymation; froth at mouth; shuddering after eating; vomiting of food and of green mucus, soon followed by acrid, watery stools; great prostration; craving sour things; abdomen distended; outcries; flexing of legs on abdomen; grasping at abdomen; somnolency.

‖Ten to twenty greenish evacuations in twenty-four hours, preceded by severe pains in umbilical region, causing her to cry out; sweat over body; abdomen painful to touch, but not bloated; epigastrium and r. hypochondrium tense, sensitive to pressure; bitter vomiting of fluids which have been taken; mouth dry, yellow coating on tongue, moist; hoarseness; ringing in ears; vertigo; cramps in calves of legs; skin cool; after cold and fright.

‖Distorted hippocratic face, constant hiccough, anxious, restless tossing about; cramping of hands and feet; pains in abdomen; speechless; severe retching with vomiting of yellowish fluids, < after drinking; stools watery, pass unconsciously; surface of body cold; face bathed in cold sweat. θSporadic cholera.

‖‖Cholera Asiatica: great torpor of vegetative system, without any great mental or sensory disturbance; little depression of spirits; fear of death or indifference; vertigo; violent evacuation upward and downward; icy coldness of body; great debility; cramps in calves; vomiting, with constant desire for cold drinks; copious, watery, inodorous stools, mixed with white flocks; face pale, without any color, or bluish; blue margins around eyes; deathly anguish in features; cold tongue and breath; hoarse, feeble voice; great oppressive anguish in chest, giving patient a desire to escape from bed; violent colic, especially around umbilicus, as if abdomen would be torn open; abdomen sensitive to contact, with drawing and cramps in fingers; wrinkled skin in palms of hands; retention of urine.

‖Profuse rice-water dejections every fifteen to twenty minutes, with slight burning in anus; frequent watery vomiting, especially after drinking; excessive thirst for cold drink; nose and ears icy-cold, body and limbs tolerably warm; chilliness on motion; tongue moist, slightly furred; soft, accelerated pulse; dry skin; violent tonic cramps in calves, thighs and masseter muscles, occurring after vomiting or purging. θCholera.

Google

‖Vomiting and purging; stools watery, flocculent; severe burning in epigastrium; great desire for cold water; severe cramps in calves of legs; great præcordial anxiety; face pale, anxious; pulse small, frequent; white-coated tongue. θCholera.

‖Sudden vomiting and purging; anxious, disturbed look of face; eyes sunken, surrounded by dark circles; temperature of skin of body slightly elevated, limbs cold; skin dry; pulse weak, 130; great thirst but vomits immediately fluids taken into stomach; watery stools every half hour; paroxysmal cramps in calves of legs, with tossing about and crying. θCholera.

‖Vomiting and purging; very cold surface; constant nausea; watery vomiting on moving or drinking; watery purging; great thirst; pulse small; tongue white; skin warm; no cramps. θCholera.

‖Rice-water purging; vomiting; eyes sunken, surrounded by dark circles; tongue white; face pale; pulse quick, feeble. θCholera.

‖Weakness bordering on syncope; cold sweat; very quick, empty, weak pulse; stools loose, quite white, like a solution of starch, passed with fatiguing straining, and followed by excessive prostration and failure of senses; no nausea or vomiting.

Unsuccessful urging to stool.

‖Constipation on account of hardness and large size of stools. θParalysis.

‖Constipation; chronic, stools large and hard, or first part hard, latter part smaller; stools in round black balls; chronic, with children; as from inactivity of rectum; in cold weather; of nursing infants; in hypochondriacs and maniacs.

‖Obstinate constipation; bitter, sour eructations, fulness of stomach and bowels after eating; pain in hepatic region; eruption over body.

‖Constipation of infants after *Nux vom.* or *Lycopodium.*

Before constipated stool: no desire; desire for stool felt in epigastrium; pressure toward anus, with blind hemorrhoids; tenesmus.

‖During constipated stool: great straining; cold sweat on forehead; heat in anus; painless discharge of masses of blood in clots, with sinking feeling.

‖After constipated stool: weakness or prostration.

Fecal mass flattened and thin like a ribbon.

‖Hemorrhoids with diseases of lungs or pleura; painless discharge of masses of blood in clots, with sinking feeling; bruised feeling in sacral region.

‖Attacks of vomiting and purging, with cold sweat on forehead, and symptoms of worms.

Google

‖Tapeworm.

[21] **Urinary Organs.** Continuous urging to urinate.

Frequent micturition, with violent thirst and hunger.

‖Urine: scanty, red-brown or suppressed; greenish.

‖Involuntary urination; during cough, also during typhoid.

‖Urine thick when passed and very dark, sometimes almost black; cold sweats at times; food has no taste; smoking makes throat dry and he does not enjoy it; craving for food; nausea when eating, cannot get food down without retching; tongue white.

[25] **Female Sexual Organs.** ‖Nymphomania: before menses; from unsatisfied passion or mental causes; puerperal mania; violent and destructive, loquacious; from disappointed love; during confinement.

‖Metritis, with fits of vomiting, delirium, anxiety, and diarrhœa; body hot, limbs cold.

‖Aborted four months after marriage, flooding and violent uterine pains, following great weakness; pale face; eyes sunken with a dull expression, revealing great suffering; extremities cool; violent uterine pains, stitching, particularly in posterior wall of uterus; palpitation shows volume of womb increased, hard and sensitive to touch; inspection reveals congestion of neck of uterus, which is hard and appears a little flattened in its anteroposterior diameter; slightest touch causes patient to scream; cannot rise on account of pain produced by doing so; entire loss of appetite; slimy diarrhœic stools; constantly cold, particularly in extremities. θMetritis.

‖Chronic womb disease, < at night, then cold sweat; in morning, vomiting of frothy mucus.

‖Menses: too early, too profuse; suppressed, with despair of salvation or with blood-spitting; very exhausting.

Before menses: headache, vertigo, bleeding of nose, night sweats.

During menses: morning headache, nausea, ringing in ears, thirst, and pain in all limbs.

At end of menses: grinding of teeth and bluish face.

‖Menorrhagia, with nausea, vomiting, diarrhœa, cold sweat on forehead, and weak pulse.

‖Dysmenorrhœa: with prolapsus; nausea, vomiting, diarrhœa, exhaustion; cold sweat; coldness of body; with chilliness; with pain in kidneys and uterus before and during menses.

‖Since three months, on awaking, nausea, vomituritio and constricting sensation in throat; dulness in head, sometimes sensation as of a piece of ice lying on vertex; frequent chilliness, can scarcely get warm, feet, hands

Google

and nose icy-cold; catamenia irregular, generally every three weeks; early on day on which menses appear diarrhœa, nausea, chilliness, four to six watery evacuations with burning pain in rectum; irritability; sensitive, gets angry at trifles or weeps about little things.

‖A girl, æt. 19, ailing for several years; almost constant headache; scanty and delayed menses; several months ago suddenly attacked with hemeralopia some six or eight days before her menstrual period, every afternoon toward sundown, increased as night came on; then could not see anything, consequently could not walk out of doors, was unable to discern things only when quite near candlelight; also in morning for half an hour after waking, sight was deficient; dizziness in head, as if all blood were mounting into head; menses delayed as usual some two or three weeks, when they finally came, was seized as often before, with vomiting and purging, lasting until flow was fully established; at other times constipated, passage only every three days of round, hard, black lumps; monthly discharges always scanty, partly fluid, partly clotted; never lasting over two days; during period headache much more severe; felt so weak she had to lie down.

‖Amenorrhœa, with nervous headache, leaden face, nausea, vomiting and diarrhœa.

‖Strangulated prolapsed vagina, with cold sweat, exhausting vomit and diarrhœa.

"**Pregnancy. Parturition. Lactation.** ‖Threatened abortion; pains, with cold sweat, nausea and vomiting.

‖During pregnancy: wants to wander about house; taciturn; haughty; thirsty; vomiting; wants everything cold; craving for acids and salt food; canine hunger; feels very weak and faint; cramp in extremities, with cold perspiration; hardness of feces and inactive rectum.

‖Vomiting during pregnancy of four months' duration; constantly feels cold; feet cold as ice; occasionally flushes of heat with thirst; on eating, pressure in stomach; hiccough, retching, waterbrash, bitter taste in mouth; cutting pains in abdomen; tearing pains in legs; lassitude and prostration.

‖Craves fruit and juicy articles.

‖Labor pains exhaust her; fainting on least motion; cold sweat.

‖Lochia suppressed, with nymphomania.

‖In childbed: impudent behavior; nymphomania; exhaustion.

‖Mania puerperalis, wants to kiss everybody; religious; despairs of her salvation.

Google

‖Eclampsia parturientium; pallor, collapse, anæmia or violent cerebral congestion, with bloated face, wild shrieks, tearing clothing.

Painfulness of mammæ.

Suppression of milk.

Voice and Larynx. Trachea and Bronchia. ‖Voice weak, hollow, hoarse, husky. θCholera.

‖Spasmus glottidis.

‖Paroxysms of constriction of larynx; suffocating fits, with protruding eyes.

Spasmodic contraction of glottis with contraced pupils.

‖Suddenly awakes from sleep with a long, harsh, crowing inspiration, lasting four to six seconds, no expiration follows, there being a cessation of respiration from forty to sixty seconds, face becomes blue and covered with cold sweat; eyes protruded, staring; mouth widely opened, thorax distended, pulsations of heart normal; finally child begins to toss about arms and legs, which are bathed in cold sweat, and there occurs a long, loud expiration sounding like a sigh, and respiration becomes re-established; diarrhœa; abdomen bloated; emaciation; frequently cries during sleep. θSpasmus glottidis.

‖Suddenly awakes from sleep with a whistling cry, suffocation seems imminent, face becomes cyanotic, only regains his breath after a few minutes have elapsed; attacks also excited by crying. θSpasmus glottidis.

Tickling very low down in trachea, provoking cough, without expectoration.

‖Laryngo-tracheitis, cough excessively straining and shaking, giving no rest day or night, with pain in head, chest and abdomen from concussion.

‖Debility great, catarrhal symptoms slight. θInfluenza during cholera season.

‖Capillary bronchitis; blue face; œdema of lungs, and great fear of suffocation.

‖Bronchitis, especially of old people; constant rattling of mucus without being able to expectorate; prostration, frequent, irregular pulse, and sticky perspiration about head.

Respiration. ‖Respiration weak, interrupted.

‖Shortness of breath on slight movement, even in house; > if he sits still.

Extremely difficult and distressing respiration; seems in danger of suffocation.

Excessive anguish arresting breathing, with desire to sit up or jump out of bed.

Oppression on chest when coughing.

‖Contractive spasm of chest.

‖Asthma: in damp, cold weather; in early morning; > throwing head back; inclination for motion; cold sweat of upper part of body; chronic cases.

‖‖Cold breath. θCholera.

[27] **Cough.** Cough: dry, tickling after walking in sharp, cold air; dry, spasmodic, rattling, but nothing loosens; deep, hollow, ringing, whooping, excited by tickling in lowest branches of bronchi, expectoration of yellow, tough, tenacious mucus of bitter, saltish, sour or putrid taste; spasmodic, cyanosis, cold sweat; with blood-spitting; after great exertion; loud barking, in hysteria; hollow, in shocks, with cutting pain in abdomen; with blueness of face, with involuntary micturition; < morning, and late evening until 12 P.M.; on going into warm room; on getting warm in bed; < in change of weather; from eating and drinking cold things, especially water, with crying and vexation.

‖‖Spasmodic cough, with great burning and dryness in mouth and fauces; long-continued sleeplessness; anxiety in præcordial region; irritability of senses. θMeasles.

‖‖Babe, skin very hot; cold sweat on forehead when coughing; eyes half open during sleep.

‖Titillation, with sensation of constriction in throat; oppression, nausea, vomiting of food and mucus after cough.

‖Whooping cough: convulsive stage; great exhaustion, children fail to recover strength after a paroxysm, and are inclined to lean head against something for support; fever, with cold perspiration, especially on forehead; intense thirst; small quick pulse; emission of urine when coughing; cough ceases on lying down and recurs when rising; spells brought on by entering a warm room or drinking cold water; face pale and sunken; restlessness and anxiety; vomiting of tough, thin mucus; Fall and Spring epidemic.

[28] **Inner Chest and Lungs.** ‖Constriction of chest.

Pressing in region of sternum after eating and drinking.

‖Constant rattling of mucus, but cannot expectorate; sticky sweat about head; weak; frequent irregular pulse; bronchitis of old people.

‖Capillary bronchitis; livid face, blue nails, cold extremities and tumultuous irregular contractions of heart; cold sweat on forehead when coughing; eyes half open during sleep.

‖Acute bronchial catarrh in emphysematous subjects.

‖Rattling in lungs, fear of suffocation; frothy, serous sputa; blue face; œdema of lungs.

Stitches in sides of chest.

Digitized by Google

‖Croupous pneumonia; pneumonia supervenes during whooping cough.

Diaphragmitis and peritonitis with vomiting.

[30] **Heart, Pulse and Circulation.** ‖Strong palpitation of heart, with chorea.

‖Violent, visible anxious palpitation with fainting.

‖Tumultuous irregular contractions of heart, forerunner of paralysis. θCapillary bronchitis.

‖Intermittent action of heart in feeble persons, with some obstruction to hepatic circulation.

‖Palpitation in the anæmic; nervous; agony of death, legs cold; difficult breathing; > at rest or lying down; with anxiety and rapid audible respiration; at night; with prostration or fainting; driving out of bed.

‖Angina pectoris; periodical attacks of pain in l. chest, or cutting, with excessive agony extending to shoulders; general prostration, skin cold and clammy; difficulty of breathing; suffocative constriction of chest, so distressing that he sweats from agony; general prostration; cramps in limbs; skin cold and clammy.

‖Pulse: frequent, small, hard; slow, soft, intermittent; slower than heart beat; very small, irregular; imperceptible.

‖The blood runs like cold water through veins.

Great activity of arterial system.

[31] **Neck and Back.** Muscles of nape of neck seem paralyzed.

‖Neck too weak to hold head up. θWhooping cough.

‖Constant pain in shoulders of ten years' standing, extending thence to occiput and arms, < from motion, and in damp weather. θMyalgia.

Rheumatism between scapulæ, extending from nape of neck to small of back; burning along spine.

‖Myelitis; painful, paralytic weakness in upper and lower limbs; tingling in fingers, causing anxiety; painful jerkings in limbs; electric jerks in limbs, < in bed, sits up, legs hanging out of bed, or must walk about.

Bruised feeling in sacral region.

[32] **Upper Limbs.** Neuralgia in brachial plexus as if beaten or bruised.

‖Aroused from sleep every morning at 4 or 5 o'clock by intense, indescribable pains in arms; they feel as if bruised or broken, pains extend from shoulder to wrist, can hardly move arm; pain continues as long as he lies in bed, can tolerate no covering; > getting up and moving about; trembling of arm rest of day, particularly l.; < in bad weather, Spring and Autumn; of three years' duration. θNeuralgia in brachial plexus.

Arms feel cold when raising them; feel as if too full and swollen.

Digitized by Google

Arm trembles when anything is grasped.
‖Pain in middle of l. forearm, as if bones were pressed.
‖Tingling in hands and fingers, causing anxiety. θMyelitis.
‖Crawling in hands as if they had been asleep.
‖‖Hands icy-cold, blue.
‖Wrinkling of skin of hands and fingers. θCholera.

[33] **Lower Limbs.** ‖Violent coxalgia coming on every morning about 4 o'clock.
‖Tearing pain in l. leg from thigh to toes; frequent shocks therein; leg sensitive to touch, at other times cold and insensible; frequent restlessness of leg; pain < at night after being in bed a while, must rise and let leg hang over side of bed, or walk about; r. leg also affected, but to a less degree.
Shocks in r. hip.
‖Electric jerks in limbs; < in bed, must sit up and let legs hang out of bed or must walk about; rheumatism. θMyelitis.
Walking very difficult; like paralysis, changes from r. to l. hip (or in patients from l. to r.).
‖Trembling of limbs; spasms; great debility following.
‖Complete muscular prostration; rapid sinking of forces; sinks down completely exhausted; great paleness of face.
Violent cramps in extremities.
‖‖During wet weather pains in legs, < by warmth of bed, > in walking up and down.
‖Legs stiff in forenoon and while standing; rheumatism; alternately hot and cold, head hot; cold.
Pain in shin bones as if broken.
‖‖Cramps in calves. θCholera.
‖Pains in feet, especially knees, as if heavy stones were tied to parts; must move about for relief.
Sudden swelling of feet; they are cold and anasarcous.
‖‖Feet icy-cold.
‖Very cold feet, with colic.
Transient stinging pain in toes of r. foot, while standing.

[34] **Limbs in General.** ‖Limbs go to sleep, also when lying down.
‖‖Painful paralytic weakness in limbs.
‖Paralysis of limbs.
‖Pains in limbs, as if exhausted by excessive fatigue.
‖Pains in limbs, < during wet cold weather; < in warmth of bed; > when walking up and down.
‖Nails blue on account of coldness.

[35] **Rest. Position. Motion.** Rest: palpitation >.
Horizontal position: vomiting >; comparatively well feeling.

Google

Lying: cough ceases; palpitation >; limbs go to sleep.
Sitting: still, breathing >; with legs hanging out of bed, myelitis, jerks in limbs.
Stooping: headache <; rush of blood to head.
Standing: stiffness in legs; stinging in toes of r. foot.
Motion: headache <; least, produces nausea and vomiting; cutting pain in stomach <; shortness of breath; inclination for, asthma; neuralgia in arms <; debility <.
Rising: black motes or specks before eyes; cough <.
Desire to sit up or jump out of bed: asthma.
Rushes about bent double: intussusception.
Raising head: causes vomiting.
Raising arms: they feel cold.
Manual labor: diarrhœa <.
Throwing head back: asthma >.
Grasping: arm trembles.
Driving out of bed: palpitation; jerks in limbs, myelitis.
After getting out of bed: chill >.
Walking: must walk about, to > jerks in limbs; neuralgia in arms >; neuralgia in legs >; very difficult, like paralysis in hip; > pains in feet and knees.
Exertion: least, causes fainting; causes cough; causes sweat.

Nerves. ‖Nervous, as if she would have to fly away.
‖Faintness; faints from least exertion or from slight pain.
‖‖Rapid sinking of forces; complete prostration; cold sweat and cold breath; collapse.
‖General debility, with blue hands and cold feet.
‖‖Excessive weakness; is obliged to move very slowly; so weak she can hardly raise her hand, and every motion seems to increase debility; even a movement of bowels causes great debility; very weak, almost imperceptible pulse; cold sweat, particularly on forehead; thirst for icy-cold water.
‖Sudden sinking of strength.
‖Excessive weakness after abuse of Cinchona.
‖‖Child feeble, with a sort of hectic. θWhooping cough.
‖Must lie down; anguish; cold sweat on forehead when he rises.
‖‖Extreme collapse, coldness of surface, clammy sweat, pale face, sunken eyes, great thirst, vomiting and purging of almost colorless fluid; feeling of intense weakness.
‖Chronic weakness; trembling of whole body.
‖Trembling; jerking; spasms; convulsions.
Tetanic stiffness of body.
‖Convulsions: puerperal; caused by religious excitement; hysterical; of children; anxiety, pale face, cold sweat

on forehead; cough before or after; syncope after spasms; with cyanosis.

‖Tonic spasms with contraction of palms of hands and soles of feet.

‖Cannot dress herself; constant twitches and silly motions; legs twitch even in sleep; cannot walk; vomits food; cries at least trifles.

‖Cold as ice; breath cold; tongue cold; great weakness; distorted face; expression of terror. θShock from injury.

‖Paralysis: after cholera; from debilitating losses.

[37] **Sleep.** Yawning.

Sleepiness.

‖Uninterrupted sleep for three days. θTyphoid.

Drowsy, starts as if frightened, preventing sleep; fever follows.

Arms stretched above head, moaning during sleep.

Nightly anxiety and sleeplessness.

Dreams: of being drowned; of being bitten by a dog and cannot escape; of being hunted; of robbers, with frightened awaking and a fixed idea that dream is true.

[38] **Time.** 4 A.M.: eructations.

Toward morning: headache >; diarrhœa >.

Morning: on waking could not open eyes; lids seemed to stick to ball; diarrhœa; twitching and jerking of limbs; headache during menses; asthma; cough <; sweat; chill.

Forenoon: stiffness in legs.

From time of rising until 10 A.M.: diarrhœa <.

From 10 A.M. until 3 P.M.: diarrhœa >.

Afternoon: griping in abdomen.

3 to 9 P.M.: neuralgia of bowels.

4 P.M.: neuralgia of bowels.

5 P.M.: headache on vertex.

Evening: anxiety; remitting fever <; late, cough <; heat; sweat.

Night: cursing and howling; groaning and sighing; headache, beginning in afternoon; in sleep, epistaxis; delirium, remitting fever; pressure in stomach <; in Summer sudden diarrhœa; cholera morbus <; womb disease <; hemeralopia; palpitation; sweat.

[39] **Temperature and Weather.** Open air: after exercise, bulimia.

Warmth: does not > prosopalgia; of bed, cough <; of bed, neuralgia in leg <.

Warm room: going into, cough <.

Hot day: drinking cold water causes diarrhœa.

Hot weather: diarrhœa; scarlatina.

Cold: eating and drinking, cough <.

In sharp, cold air: dry, tickling cough.
Cold, damp weather: rheumatic ophthalmia; asthma.
Damp weather: neuralgia in face.
Wet weather: pains in limbs.
Bad weather: neuralgia in arms.
Change of weather: cough <.

Fever. Chill and coldness: mostly external, with internal heat, and cold, clammy sweat; running downward; shaking chill with sweat, which soon passes off into general coldness; of nursing children; with desire for cold drinks.
Chill increased by drinking; > after getting out of bed.
‖‖Whole body icy-cold.
Chill and heat alternating, now here now there, on single parts.
‖‖Internal sensation of chilliness running from head to toes.
‖‖Cold skin; cold clammy sweat.
‖‖Face cold, collapsed.
‖‖Coldness over back.
‖‖Extremities cold.
‖Heat: of head; and redness of face; mostly internal, with thirst, but no desire to drink; in evening, with sweat; ascends; alternating with chilliness.
‖Sweat: profuse; morning, evening or all night; with every stool; cold, clammy; offensive; bitter smelling; staining yellow; with deathly pale face; general, cold, < on forehead; from least exertion.
‖Intermittent fever, often pernicious, during cholera; also after abuse of quinine.
‖‖Quotidian ague, chill lasts an hour, with blueness of nails, then heat mingled with chilliness, finally general profuse cold sweat; thirst during fever and particularly during sweat; nausea; bitter vomiting; diarrhœa; urine dark, depositing brick-red sediment.
‖‖Several chills every other day; chill commences with coldness in abdomen, spreading thence all over body; frequent stools, thin and watery; coldness became general, but no shaking; breathing oppressed and labored; stools became bloody, finally nothing but pure blood running from bowels steadily; vomiting of blood, part of time blood thin and bright-red, afterward dark and thick; prostration excessive; speechlessness; chill lasted eight hours and patient seemed at the point of death.
‖‖A boy, æt. 12, had ague for two months; at first chill every other, now every day, alternately weak and strong; shivering, with thirst for half an hour, followed by heat, lasting some hours, with dry cough and headache; per-

Digitized by Google

spiration profuse, with thirst; soon after chill sets in patient falls asleep; during hot stage sleep turns into coma, out of which he awakes occasionally and asks for drinks; during whole intermission sleeps and drinks a good deal, but has little appetite.

‖ Intermittent fever coming on early in morning.

‖ After chill no heat, but sweat.

‖ Pernicious intermittent; collapse during chill.

‖ Bilious fever; cramps in stomach; costiveness; colic; depression; despair.

‖ Rheumatic fever, with profuse sweat, great weakness, diarrhœa.

‖‖ Typhoid forms of fever, especially in cholera season; also when vital forces suddenly sink; cold sweat; coma; vomiting and watery diarrhœa; bluish face; pointed nose; wrinkled skin.

‖ A boy, æt. 5, lay on his r. side; excited, loquacious; answered sometimes clearly, again irrelevantly; delirious talk or moaning; kicked off bedclothes; head hot, feet and body cool; liked cool water on head; skin dry; red spot, came and went on abdomen and nape; abdomen full but not hard; stool had been painful, now painless, clay-colored, thin, copious, frequent; for ten days has been vomiting everything at once, but is hungry while nauseated; thirst sudden and occasional; tongue dry, thickly coated, white, papillæ project; mucus in mouth and on teeth, sticky, dark.

‖ Yellow fever; gastro-hepatic type, with thin blackish or yellowish diarrhœa; thin, blackish or yellowish vomiting of bile or blood; burning in stomach; lips and tongue dry, brown and cracked; cold perspiration on forehead; great exhaustion and small intermitting pulse; face yellowish, bluish, cold, covered with sweat; eyes dull, yellow, watery; deafness; difficult swallowing; hiccough; thirst; cold hands and feet; trembling, cramps; coma; unconsciousness, delirium; vertigo; fear, depressed, restless.

" **Attacks, Periodicity.** Intermittent: frontal neuralgia; neuralgia of bowels.

Gradually: pain radiating from epigastrium to sides and back.

Every few minutes: neuralgia in bowels.

Every fifteen minutes: vomiting.

For two hours: vomiting and purging in cholera.

For eight hours: chills.

Every morning 4 or 5 A.M.: pains in arms; coxalgia.

Every day: chills.

Every other day: remitting fever; chills.

Digitized by Google

For three days: uninterrupted sleep.
For two weeks: pain in hypogastric region.
For three weeks: diarrhœa.
For six months: painless diarrhœa.
For ten months: exhaustion with diarrhœa.
For nearly two years: vomiting after meals.
For some years: morning diarrhœa.
For ten years: myalgia.
Fall and Spring: whooping-cough epidemics; neuralgia in arms.

" **Locality and Direction.** Left: head falls when raised up; prosopalgia, eye injected; sparks before eye; neuralgia in bowels <; burning pain under ribs; severe pain in hypochondrium; pain in chest; pain in forearm; tearing in leg.

Right: as if a bunch of hair were electrified; neuralgia palpebraris; epistaxis; facial neuralgia; hypochondrium tense, sensitive to pressure; shocks in hip; stinging in toes.

Left to r.: facial neuralgia.

" **Sensations.** As if pregnant or in throes of childbirth; as if he had a bad conscience or had committed a crime; as if things whirled in a circle; as of a lump of ice on vertex; as if brain were torn to pieces; as if head would burst; as of heat and cold at same time on scalp; as if a bunch of hair were electrified; eyelids as if rubbed sore; as if salt were between upper lid and eyeball; as if inner surface of lids were too dry; as if hundreds of fine needle points were thrust into eyelids; as if ears were stopped; as if nose were dry; teeth feel as if filled with lead; as if tongue were too heavy; coolness, as from peppermint in mouth; as of dust in throat; as if mouth were lined with mucus; as if something alive were rising from stomach into throat; as from ravenous hunger, pain in stomach; radiating pain, from abdomen; distress over heart and epigastrium; sinking and empty feeling in abdomen; as of knives cutting bowels; as of hot coals in abdomen; pinching, as with pincers in abdomen; as if intestines were twisted into a knot; as if cold water were running through veins; arms as if bruised or broken; as if bones of l. forearm were pressed; as if arms were too full and swollen, feel cold when raising them; as if hands had been asleep; as if heavy stone were tied to feet and knees; limbs pain as if exhausted by excessive fatigue; as if she would have to fly away.

Pain: under scapulæ; in hepatic region; in shoulders; in shin bones, as if broken.

Google

Intense pain: in arms, waking from sleep, at 4 or 5 A.M.
Violent pain: in hip, 4 A.M.
Severe pain: in stomach, an hour after eating; in l. hypochondrium; in descending colon.
Sharp pain: in hypogastric region.
Cutting: in abdomen; colic; in stomach; in l. chest.
Tearing: in eyes; in face; in cheeks, temples and eyes; in legs; in l. leg from thigh to toes.
Stitches: in submaxillary gland; in posterior wall of uterus; in sides of chest; in corns.
Stinging: in toes of r. foot.
Pricking: in fingers and toes before unconsciousness.
Burning: in brain; in mouth and throat; in pit of stomach; in stomach and œsophagus; in abdomen; under l. ribs; colic; in anus; in rectum.
Aching: in bowels.
Bruised sensation: in brain; in sacral region.
Drawing: in face; in fingers.
Pressure: in brain; on vertex; in eyes; in pit of stomach; in hepatic region; in region of sternum; in bones of l. forearm.
Griping: in abdomen, above and below navel.
Twisting: colic.
Neuralgic pain: in head; in face; in bowels; in brachial plexus.
Rheumatic pain: between scapulæ; in limbs.
Soreness: of head; of eyelids, as if rubbed.
Scraping: in throat.
Roughness: in throat.
Pinching: colic.
Cramps: in calves, feet and fingers; in bowels; in masseter muscles; in thighs.
Cramplike pain: in epigastrium.
Constriction: of throat; in bowels; in chest; of larynx.
Choking: when swallowing.
Suffocating: with vomiting.
Stiffness: of neck; of eyelids; of masseter muscles.
Throbbing: headache; toothache; in r. temple.
Distension: in pharynx; in pit of stomach.
Fulness: of stomach and bowels.
Heaviness: of head; of eyelids; in teeth; in tongue.
Tension: in abdomen.
Tingling: in limbs; in fingers; in hands; all over.
Tickling: in trachea; in bronchi, lowest branches; in throat.
Crawling: in hands.
Weakness: in stomach; hypogastrium.
Trembling: in stomach.

Google

Fainting: with nausea.
Sinking: in abdomen; during or after stool.
Warmth: in fingers and toes, before unconsciousness.
Heat: in eyes; in anus; all over.
Coldness: in mouth; in throat; in stomach; in abdomen.
Chilliness: running from head to feet.
Dryness: of eyelids; of mouth and palate; in throat; of fauces.

"**Tissues.** Rapid sinking of vital forces; collapse.
Whole body and face pale; cold sweat.
Skin and muscles lax.
Pyæmia.
Anasarca; vomiting, purging, great prostration.
Cramps in limbs.

"**Touch. Passive Motion. Injuries.** Touch: abdomen painful.
Pressure: slightest, neuralgia palpebraris <; l. hypochondrium sensitive.
Slight wounds: cause fainting.
Shock from injury.

"**Skin.** Skin blue, purple, cold; wrinkled; remaining in folds when pinched.
Skin livid, cold; pulse thready; drowsy and restless.
Rash over body, or on face and hands.
Dry eruptions like itch.
Desquamation of indurated or thickened portions of skin.
Erysipelas.
Burning after scratching.
Heat and tingling all over.
Itching and corrosive itching.
Severe stitches in corns while sitting.
Skin anæmic, or cyanotic.
Measles tardy and pale; skin livid; hemorrhages, but no relief; drowsy; weak; cold; thready pulse; spasmodic pulse and vomiturition.
Scarlatina in hot Summer weather; eruption bluish; pulse feeble; burning heat of limbs, alternating with coldness.
Ulcers bluish, hard, indurated, itching, painless, but with redness of areola; pus scanty.

"**Stages of Life, Constitution.** Children and old people.
Anæmia.
Lean, choleric or melancholy persons.
Young people and women of a sanguine or nervo-sanguine temperament; also people who are habitually cold and deficient in vital reaction; gay dispositions; fitful mood.
Boy, æt. 6 months, ill-nourished, fretful, suffering five weeks with pertussis; spasmus glottidis.

Google

Child, æt. 9 months; spasmus glottidis.
Baby, æt. 9 months; cholera infantum.
Boy, æt. 11 months; meningitis.
Girl, æt. 15 months; cholera morbus.
Boy, æt. 3, suffering three weeks; diarrhœa.
Girl, æt. 5; cholera.
Boy, æt. 5; typhoid fever.
Boy, æt. 9, after typhoid fever; bulimia.
Boy, æt. 9; vomiting.
Girl, æt. 11, has had ague; neuralgia of bowels.
Boy, æt. 12; ague.
Boy, æt. 13; diarrhœa.
Girl, æt. 15, delicate-looking; chorea.
Girl, æt. 17; cholera.
Girl, æt. 18, strong, pale, slender; prosopalgia.
Girl, æt. 19, ailing several years; dysmenorrhœa and hemeralopia.
Jewess, æt 20, rest of family similarly affected; plica polonica.
Miss ——, æt. 20; diarrhœa.
Woman, æt. 21, ill three months; gastralgia.
Compositor, æt. 24, lean, pale, earthy complexion; colicodynia.
Miss B., æt. 26; insanity.
Mrs. C., æt. 26, light complexion, mild; insanity.
Man, æt. 29; mania.
Woman, æt. 30, confined two weeks previously; insanity.
Woman, æt. 30; insanity.
Woman, æt. 30; insanity.
Woman, æt. 30, nervous; prosopalgia.
Mrs. B., æt. 30; empty feeling in abdomen.
Man, æt. 30; ague.
Peasant woman, æt. 32; mania.
Man, æt. 32, strong, suffering three years; pains in arms.
Miss ——, æt 33; mania.
Woman, æt. 34, ill one week; dyspepsia.
Woman, æt. 36, suffering eight days; insanity.
Man, æt. 36, delicate, after a cold drink six months previously; diarrhœa.
Woman, æt. 38; insanity.
Woman, æt. 40; vomiting.
Woman, æt. 40, ill five weeks; dyspepsia.
Woman, æt. 43, suffering three years since cessation of menstruation; vomiting.
Woman, æt. 44, ill six months; dyspepsia.
Woman, æt. 47, weak, emaciated; colic.
Man, æt. 50, suffering from rheumatism and hemorrhoids; affection of throat.

Man, æt. 50; gastric disorder.
Man, æt. 50; cholera morbus.
Woman, æt. 54; gastrodynia.
Woman, æt. 55, ill six years; dyspepsia.
Woman, æt. 56, medium height, weak, gouty; colic.
Man, æt. 60, miller; insanity.
Man, æt. 60; intussusception of bowel.
Woman, æt. 60, after fright; diarrhœa.
Merchant, æt. 62, strong, well nourished, leading a life full of excitement and care; bulimia.
Miss F., ill ten months; diarrhœa.
Old lady, small, thin, weak, is hard of hearing and has an impediment of speech; sciatica.

[48] **Relations.** Antidoted by: *Acon., Camphor., Cinchon., Coffea.*
It antidotes: *Arsen., Cinchon., Cuprum* (colic), *Ferrum, Opium*, and removes bad effects of alcohol and tobacco.
Compatible: *Arsen., Arnic., Cinchon., Cuprum, Ipec.*

VERATRUM VIRIDE

American or Green Hellebore. *Melanthaceæ.*

This species of Veratrum is found from Canada to the Carolinas, growing in swamps, wet meadows and along mountain creeks.

The tincture is prepared from the fresh root gathered in Autumn.

Introduced by Burt, proved by him, Hale's New Rem., p. 1033; Am. Obs., vol. 7, p. 1870; Berridge and Lillie, N. A. Jour. of Hom., N. S., vol. 2 (1872), p. 505; Sullivan, Allen's Encyclopedia, vol. 10, p. 97.

[1] **Mind.** Stupefaction; congestion.

Mental confusion, loss of memory; vertigo. θCerebral hyperæmia.

From sudden cerebral congestion: quarrelsome delirium; great mental depression and fear of death; semi-stupor, sometimes complete coma; puerperal convulsions; insanity.

‖Puerperal mania: silent, suspicious; will not see her physician, he seems to terrify her; fears being poisoned; sleepless, can hardly be kept in her bedroom.

Depression of spirits.

‖Loquacity, with exaltation of ideas, or an exalted opinion of her own ideas and powers; everything seems clear to her; now clearly understands former mysterious things; wants no medicine, as that will restore her to former condition; at times talks and laughs; some days laughter is constant; talks long about one thing; persists in talking and will pay no attention to what is said to her; will not answer questions; knows all that is going on about house, does not want anything said that she cannot hear; lies in bed and does not want to get up long enough to get clothes changed; says head feels bad; eyes red, vision not affected; appetite poor, or capricious; bowels torpid; limbs cold and moist; pulse small and frequent. θInsanity.

[2] **Sensorium.** ‖Sunstroke, with prostration, febrile motion, accelerated pulse.

Headache, with vertigo, dimness of vision and dilated vessels.

Head felt full and heavy.

‖Vertigo: with nausea; with vomiting as soon as he rises.

[3] **Inner Head.** Frontal headache: severe; with vomiting; dull, with neuralgic pain in r. temple, close to eye.

‖Headache from nape of neck, with vertigo, dim vision, dilated pupils.

‖Congestion to head: from high living, abuse of stimulants; during dentition.

‖Fulness in head, throbbing arteries; increased sensitiveness to sounds; buzzing in ears; double or partial vision. θSunstroke.

Great pain, with fulness in head; face much flushed; burning in head; spots before eyes; delirium or a kind of stupefaction.

Digitized by Google

‖Congestive headache from suppression of menses; intense congestion, almost apoplectic, accompanied by violent nausea and vomiting.

‖Nervous or sick-headaches.

‖Intense cerebral congestion: feeling as if head would burst open; with nausea and vomiting; sudden spasms; from plethora, vascular irritation, coup de soleil, alcoholic stimulants, teething in children, and from suppressed discharges; weight or distension of head; giddiness; intense headache; fulness and throbbing of arteries; stupefaction; increased sensitiveness to sounds, with buzzing, roaring, etc., and double vision.

‖‖Constrictive pain in head, increased by warm drinks.

‖Congestive apoplexy; intense headache; stupid, ringing in ears, bloodshot eyes, thick speech, hot head; slow, full pulse, hard as iron; convulsions; dimness of vision, nausea and vomiting.

‖Cerebro-spinal congestion.

‖Acute inflammatory meningitis.

‖Meningitis; high fever, intense congestion, later rolling of head or vomiting; face haggard, cold, pulse slow; breathing labored; trembling, as if child were frightened and on verge of spasms.

‖‖Cerebro-spinal disease; pulse quick and wiry; pupils dilated; muscles of back and neck contracted, drawing head back on shoulders; delirium; spasmodic cough; finally tetanic convulsions every five or ten minutes, for five days; opisthotonus; cold, clammy sweat over body.

‖‖Cerebro-spinal disease in a child; burning fever, frequent vomiting, cries out on attempt to move him, draws head backward, rolls up eyes, puts hand back of ears, rolls head from side to side, pulse wiry, rapid, 150; spinal column pungently hot and dry, with petechiæ.

‖‖A child, æt. 3 months, very much emaciated, head much enlarged and misshapen, drawn back, from contraction of spinal muscles is compelled to lie on side, eyes rolled upward, rolling of head, moaning and screaming, great heat in back of head and spine, respiration feeble and sighing, pulse 160 and feeble, watery diarrhœa, urine scanty and high-colored.

‖Basilar meningitis.

‖Cerebral irritation; threatening hydrocephalus.

'**Outer Head.** ‖‖Right side of head and face much swollen and covered with large blisters; headache; high fever; no sleep; no appetite; intermitting attacks of nausea; occasional vomiting of water drunk. θErysipelas.

‖Phlegmonous erysipelas of scalp; red streak down centre of tongue, yellow at edges.

Google

Sight and Eyes. ‖Double vision.

Photophobia and vertigo > by closing eyes and resting head.

‖Unsteady vision.

‖Dimness of vision: with dilated pupils; from congestion of blood to base of brain, with nausea and vomiting; when assuming erect position, with partial syncope; walking brings on blindness, with fainting; after loss of vital fluids.

Immense green circles appear around candle, which, as vertigo comes on, turn to red.

‖Amaurosis: from irritation or congestion of optic nerve; from anæmia.

‖Mrs. ——, æt. 32, never had any previous eye trouble; vision good at all distances; has always suffered from dysmenorrhœa, with severe cephalalgia just before or after menses; for last six years has had occasional epileptiform convulsions, all of which were interrupted during her only pregnancy, and subsequent period of lactation; child died when 9 months old, and with re-establishment of menstrual function occurred dysmenorrhœa, head pains and convulsions, latter more frequent than ever; at menstrual period pain in orbital region, gradually extending backward through base to cord; opisthotonos, body and limbs highly hyperæsthetic, consecutively, from above downward, following course of development of pain; a few hours later these parts anæsthetic, followed by marked atrophic changes in muscles; particularly in lower extremities; sudden complete loss of qualitative vision of r. eye, with contracted pupil; vision of l. eye only slightly hazy; no pain or uneasiness in eyes until two days after loss of vision was noticed, when she had a severe attack of cephalalgia, lasting one week with unconscious state, fainting and vomiting, objects appearing like balls of fire before eyes; aching in one or other eye constantly, < in evening, with appearance of stars, flashes of fire, etc.; L. E. V. $\frac{1}{80}$; R. E. V. = perception of light; choroiditis circumscripta, a single nodule just external to macula; nodule, and tissues between it and macula, having characteristic prominence and yellow-red color, while small lines and dots of choroidal pigment gave evidence of approaching atrophy in that tissue; after *Veratr. vir.*, R. E. V. $\frac{1}{80}$; L. E. V. $\frac{1}{16}$; circumscribed atrophy of choroid about same dimensions, remaining portions of choroid and retina in all respects normal; no return of headache, dysmenorrhœa or convulsions, vision remaining good.

‖Mrs. ——, æt. 21, brunette; brown irides; good phy-

Digitized by Google

sique; family history paraplegia, hemiplegia and apoplexy; attacked six weeks ago with violent pain in small of back, and through pelvis; burning as if boiling water were being poured over parts; pain and violent cramping in calves and feet, with numbness and itching; preceding these symptoms, violent cephalalgia beginning in nape and base; < lying down; scalp sensitive; menses infrequent and scanty; acute metritic cellulitis; dull pain in l. eye, with gradual failure of vision; some heavy pain in l. side of head, > by pressure, < by lying down; L. E. V. $\frac{4}{70}$; inspection of fundus shows a typical "congestion papille," papillary margins being entirely obscured, and presenting characteristic grey, woolly appearance; both veins and arteries large and tortuous; R. E. V. $\frac{1}{20}$, with $+\frac{1}{40} = \frac{1}{15}$; retinal veins markedly tortuous and dilated; after *Veratr. vir.*, R. E. V. $\frac{1}{15}$; L. E. V. $\frac{1}{10}$.

‖Became suddenly blind in upper half of visual field; R. E. V. $\frac{1}{15}$; L. E. V. $\frac{1}{10}$; optic disk can be distinctly outlined; only superior retinal vessels can be with difficulty traced.

‖Twitching in lids, contortion of eyes, rolling of eyeballs, paralysis of lids.

‖Traumatic erysipelas of lids; excessive dryness with difficulty of moving them; great heat in interior of eyes.

[4] **Hearing and Ears.** Deafness from moving quickly, with faintness.

Roaring in ears, congestion; nausea, vomiting.

Humming in ears and sensitiveness to noise.

Paralysis of auditory nerve, producing deafness.

Neuralgia of auditory nerve.

Acute otitis.

Ears cold and pale.

[7] **Smell and Nose.** Profuse secretion of mucus from nose.

Itching first in r., then in l. side of ala nasi.

[8] **Upper Face.** Face: cold, bluish, covered with cold sweat; nose pinched, cold, blue; paleness of lips and around alæ nasi.

Convulsive twitchings of facial muscles.

‖Face flushed; cerebral congestion.

‖Right eye completely closed from inflammation and swelling of upper lid; half of forehead and most of scalp on same side inflamed and covered with large blisters; much pain; restless; sleepless; fever; headache; tongue coated dirty yellow; breath offensive; no appetite; at times considerable thirst; nausea from one to three hours, seldom vomiting, and then of water drunk. *θ*Erysipelas bullosum.

Google

‖Phlegmonous erysipelas of face and head; furious delirium, screaming, howling, striking so that it required several to keep her on bed; pulse high, strong; no sleep for sixty hours; tongue very red, inclined to a brown color on edges, with a red dark streak through centre; about three-quarters of an inch wide.

[9] **Lower Face.** Mouth drawn down at one corner.

Lips dry; mouth dry, or thick mucus in mouth.

[10] **Teeth and Gums.** ‖Dentition; cerebral congestion, excited pulse; convulsions.

[11] **Taste and Tongue.** ‖Tongue: white or yellow, with red streak down middle; dry or moist with white or yellow coating, or no coating at all on either side; feels scalded; inclined to be dry.

[12] **Inner Mouth.** ‖A peculiarly characteristic odor of breath, not offensive, but reminding one of a faint odor of chloroform or ether. θMalarial fever.

Dry lips and mucus of mouth thick; dry mouth and lips all day.

Copious secretion of saliva.

[13] **Throat.** Dryness and heat in throat, with severe hiccough.

‖Burning in fauces and œsophagus, with constant inclination to swallow.

‖Spasms of œsophagus, with or without rising of frothy, bloody mucus.

‖Sensation as of a ball rising into œsophagus.

‖Acute inflammation of whole length of œsophagus, with constant hiccough; nausea and violent vomiting.

‖Acute spasmodic stricture of œsophagus.

[14] **Appetite, Thirst. Desires, Aversions.** Thirst.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough: almost constant; painful; with spasms of upper part of œsophagus.

‖Heartburn, with bitter, sour rising.

Nausea: and vomiting, with cold sweat; with dizziness, followed by heat of surface; painful empty retching, with ejection of only a little bloody mucus.

‖Vomiting: long continuing; of glairy mucus after food; of blood; of bile; with inflammatory and cerebral diseases; smallest quantity of food or drink is immediately rejected; with collapse, very slow pulse and cold sweat.

[17] **Scrobiculum and Stomach.** Sharp, flying pains in epigastrium and umbilical region, passing to pubes.

‖Excruciating pain covering space size of hand, in lower part of stomach.

Twisting tearing pain in stomach.

Intense drawing twisting pains in stomach, as if it were tightly drawn against spine, causing pain in dorsal region.

Digitized by Google

Pains culminate, every five minutes, in severe vomiting.
‖Acute gastritis.
‖Neuralgic or spasmodic affections of stomach, accompanied by vomiting, retching and excessive irritation.
‖‖Heartburn and sour eructations; could take any form of hot food or drink, but a single mouthful of ice water would cause immediate vomiting, without much nausea, followed by empty retching often lasting for hours; stabbing pain in dorsal region, sometimes extending through to umbilicus.

[19] **Abdomen.** Abdomen as if drawn in, following cramp in stomach.
Pain and soreness across abdomen, just above pelvis.
Pain in lower portion of bowels.
‖‖Neuralgic pains at r. side of umbilicus, passing down to groin.
‖‖Cutting aching pains in umbilical region, with rumbling in bowels and desire for stool.
‖Enteritis, with high fever, great vascular excitement; vomiting; dark, bloody stools.

[20] **Stool and Rectum.** Stools: bloody; black, in typhoid; copious, light, mornings; mushy, preceded and followed by cutting in bowels.
‖Acute enteritis, with high fever, dark and bloody stools.
‖Cholera and cholera morbus.
‖‖Purging and vomiting almost constantly from 1 until 10 P.M.; lies doubled up with agony; profuse cold sweat; frequent attempts at vomiting, at same time watery stool mixed with small flakes of mucus; burning in stomach which was cramped and felt like a stone to external pressure. θCholera morbus.
Hemorrhoids red or dark blue.
Neuralgic pains in rectum.

[21] **Urinary Organs.** Urine increased, pale, deposits a reddish sediment; specific gravity diminished.
‖Acute cystitis, with fever.

[22] **Male Sexual Organs.** Acute orchitis takes an erysipelatous nature.

[23] **Female Sexual Organs.** ‖Acute metritis and ovaritis, with a high grade of fever.
‖Pelvic cellulitis.
‖Congestion of pelvic organs, tenderness of uterus; fever; heat; restlessness; palpitation; local or general hyperæsthesia.
‖Menstrual colic, preceded by great congestion or troublesome strangury; plethoric women.
‖‖Menstrual colic or dysmenorrhœa; much nausea and vomiting; plethora; cerebral congestion.

Google

‖Menses regular, preceded for three days by most terrible menstrual colic; pains extend all over body; face and head bloodshot; pains running into head from neck; pulsations in head, neck and carotids; sight disappears at times, and at others everything is moving in confusion before eyes; tongue feels heavy, but is clear and looks natural; great thirst; pulse full and bounding. θDysmenorrhœa.

‖Membranous dysmenorrhœa; soreness as of a boil in uterine region.

‖Suppressed menses, with cerebral congestion; plethora.

‖After being caught in a shower a few days before menses, chill, followed by intense fever, congestion to head, throbbing and fulness of carotid and temporal arteries, great heat of head with coldness of feet, intense pain in head, occasional delirium, pulse 120, hard and full. θAmenorrhœa.

‖Amenorrhœa from exposure; chill, complete suppression of discharge; heavy pressive aching in uterine region; intense pain in head with heat, fulness and beating of arteries; mind wandering; hysteric sobbing and tendency to tonic spasms.

Pregnancy. Parturition. Lactation. ‖Vomiting during pregnancy.

‖Rigid os uteri during labor.

‖Puerperal convulsions during labor after blood-letting; furious delirium; arterial excitement; cold, clammy sweat.

‖Intense congestion of blood to brain, blue, livid face, profound coma or wild delirium. θPuerperal convulsions.

‖During nearly whole period of pregnancy, severe vomiting, constant nausea with severe burning pain in stomach, entire inability to retain food except a very small quantity of thin gruel or beef broth, these would often excite protracted vomiting; constant pressure and confused feeling in head, with paroxysms of intense burning pain, prostration of strength, coldness of limbs, dryness of mouth, without much thirst; pain and pressure in head, extending over entire head, with a confused feeling, partial loss of memory; face flushed; heat in head and face; pulse wiry and increased in frequency; dryness in mouth with some thirst, no pain except in head; premonitory to convulsions, slight chilliness with a little nausea and twitching of muscles of face, followed by a rapid convulsed movement of muscles of body and limbs; dilated pupils, difficult breathing, continuing with slight intermissions for fifteen minutes; stupor from which she could not be aroused for fifteen minutes;

Digitized by Google

afterward pain and pressure in head, with nausea and faintness. θPuerperal convulsions.

‖Violent convulsions setting in as head of child was passing through vagina, and continuing after expulsion of placenta; face turgid, livid, expression hideous, great activity of arterial system; violent clonic spasms.

▮Convulsions with mania, or mania continues after convulsions have ceased.

‖Puerperal mania: silent, suspicious and distrustful; would not see her physician, his presence seemed to terrify her, feared he would poison her; complete sleeplessness, could be with difficulty confined to bedroom.

‖After excitement during confinement, sixth day, semi-unconscious state, muttering to herself; face hot and flushed, extremities cold; pulse full and bounding, 160, temperature 105.5° F.

▮Puerperal fever: sudden suppression of milk and lochia; intense fever, restlessness; excessive pain, tenesmus, tympanitis; skin cold and clammy; quick, weak or bounding hard pulse, cerebral congestion and delirium.

‖After abortion, retained placenta; high fever; severe congestion to head; abdomen distended and very tender over uterine region; sudden cessation of profuse hemorrhage.

‖Sudden suppression of lochia on fourth day after labor, from exposure to a draft; severe chills, mingled with and followed by intense fever; bursting headache; throbbing of arteries; occasional delirium; slight spasms; tenderness of abdomen; with sharp pain in uterus and ovaries; breasts flaccid; no secretions of milk. θPuerperal fever.

▮Mastitis, with great arterial and nervous excitement.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Membranous croup (after *Aconite*).

[26] **Respiration.** Breathing: labored, must sit up, cold sweat on face: π decreased from 40 to 16, pneumonia; difficult, convulsive, almost to suffocation; sensation as of a heavy load on chest; patient has to sit up, cannot lie down; cold sweat on face.

Oppression of chest; anxiety.

[27] **Cough.** Cough: short, dry, hacking; loose, rattling; < going from warm to cold.

[28] **Inner Chest and Lungs.** ▮Congestion of chest, with rapid respiration, nausea, vomiting; dull burning in region of heart.

▮▮Pneumonia, pulse hard, strong, quick; engorgement of lungs, with faint feeling in stomach, nausea, vomiting, slow or intermittent pulse.

Digitized by Google

‖After exposure, severe chills and headache, pain in r. side, cough; after five days, fever, quick pulse, pain in r. side of chest, cough, frequent and labored respiration; profuse, bloody expectoration; clear, bloody mucus. θPneumonia.

‖Tongue feels as if scalded; violent nausea and vomiting every fifteen minutes; soft mushy stool; anxious oppression of chest; high fever. θPneumonia.

‖Holding his side complaining that he cannot breathe; cannot take a full inspiration; stitching pleuritic pain, very severe in r. side. θPleurisy.

‖High fever; face flushed; vomiting; labored breathing and expectoration of pus and florid blood; tongue has a red streak through centre. θPneumonia.

[29] **Heart, Pulse and Circulation.** In cardiac region: burning; prickling; dull aching.

‖Heart's beat: loud, strong, with great arterial excitement; low and feeble; fluttering.

Palpitation with dyspnœa.

Faintness and blindness: when rising from lying; from sudden motions; lying quietly.

Idiopathic and rheumatic peri- and endocarditis; violent fever; full, hard, bounding pulse; congestion to head, without delirium; throbbing carotids; constant burning pain, with oppression of chest; sensation as of a heavy load on chest; heart's action violent and tremulous; respiration rapid, labored and sighing.

‖Pulse: suddenly increases and gradually decreases below normal; slow, soft, weak; irregular, intermittent.

[31] **Neck and Back.** ‖Aching in back of neck and shoulders.

Muscles of back contracted, drawing head backward.

Opisthotonos: arterial excitement; hands and feet cold; shocks in limbs; congestion of brain and spine; loss of consciousness.

Heat and redness down spine; back of head hot; spotted fever.

[33] **Lower Limbs.** Pain in either great trochanter when lying on it.

Much pain in hip joints and about condyles.

Lancinating pain in r. hip.

‖Inflammatory rheumatism affecting knees, ankles and hips; joints swollen, red, very painful and tender; high fever; loss of appetite; much sweat without relief; red streak down centre of tongue, white at edge.

‖After wrenching, knee tender and swollen; severe pain preventing sleep; excruciating jumping of limb, controlled by a splint. θSynovitis.

Right ankle feels as if dislocated, can scarcely walk; later left.

Digitized by Google

[31] **Limbs in General.** Rheumatism, especially in l. shoulder, hip and knee; high fever; scanty, red urine.

‖Acute rheumatism; knees, ankles, wrists and fingers much swollen and very painful; some general fever; tongue exhibited central red stripe with coated edges.

‖Flying pains; pains in joints; shuddering. θRheumatism.

Galvanic shocks in limbs of great violence.

Cramps of legs, fingers and toes.

Pains, especially about condyles.

[35] **Rest. Position. Motion.** Lying: headache <; doubled up, cholera morbus; cannot, difficult breathing; quietly, faintness and blindness >; on back with thighs flexed on pelvis.

Rising: faintness and blindness.

Sudden motion: faintness and blindness.

[36] **Nerves.** Faintness after rising from recumbent position.

Trembling as if child were frightened and on verge of a spasm.

‖Convulsive motions of facial muscles. θChorea.

‖Chorea; twitchings and contortions of body, unaffected by sleep, froth about lips; champing of teeth; difficult swallowing; head jerking or continually nodding; sexual excitement.

Violent spasms like galvanic shocks.

‖Convulsions: of all limbs; trembling of whole body; coming on suddenly, frothing at mouth and violent jactitations of all voluntary muscles; twitching and contortions of body, cramps in legs and fingers, ankles feel as if dislocated; hysterical; after scarlet fever, great dilatation of pupils, inability to sleep; during dentition; puerperal, with mania, which keeps on after cessation of spasms; face flushed, pulse wiry, thirst; epileptiform; with opisthotonus, anæmia from diarrhœa; trismus.

‖Epileptiform convulsions, with high fever, pulse 190, rapid respirations, 76 in a minute, and much cerebro-spinal irritation.

‖Chorea in a woman, childless and subject to menorrhagia; continual nodding of head, and violent convulsive action of one arm and jactitation of one leg.

‖Chorea of two months' duration, entire muscular system in a continuous and tumultuous motion, face worked into most horrible and ludicrous contortions; head constantly jerking; writhing of whole body, no sleep.

‖Chorea in a lady, æt. 30, constant moving of head, lower jaw, larynx and tongue, twitching of head, jerking of arms and lower extremities, when these symptoms subside she is attacked by violent palpitation of heart.

‖Chorea for a month; movements continue in sleep;

Digitized by Google

throws about arms and legs while asleep; is unable to hold a spoon; speech affected, drops his words when speaking; complains of pain in hands if he keeps them still for a few moments; constantly "on move" as to his legs and arms; since choreic movements showed themselves has been continually eating; pain extending up arms and shoulders to head, and a like pain in legs.

‖A girl, æt. 13, began having choreic symptoms during her eleventh year; at times quite well then for several days making faces; bobbing head; face livid and covered with cold perspiration; pain in back of head, desire to press it against pillow; pulse slow but heavy; on attempting to rise makes a series of springs, apparently from impossibility of raising one foot from ground without lifting both.

‖A boy, æt. 13; St. Vitus' dance for four years; began throwing arms and legs about before being put to bed, when spoken to harshly; frightened by a chimney sweep previous day; fractious, obstinate boy; becomes much < when he cannot have his own way.

Paralysis; tingling in limbs; cerebral hyperæmia.

[37] **Sleep.** Sleeplessness.

Coma; blue face; spasms.

Restless sleep; dreams of drowning; of being on water.

[38] **Time.** All day: dry mouth and lips.

From 1 to 10 P.M.: purging and vomiting.

[39] **Temperature and Weather.** Going from warm to cold: cough <.

After exposure: chills and headache.

[40] **Fever.** Coldness of whole body, cold sweat on hands, face and feet.

Chilliness with nausea.

Coldness with pale skin, flabby muscles; quick but weak pulse.

‖Profuse, cold, clammy perspiration.

‖Irritative fever, with cerebral congestions, causing convulsions; particularly in children.

‖Fevers during dentition, with irritation of brain, spasms or tendency to them.

‖Scarlatina, during first or febrile stage, when arterial excitement is intense, and there is cerebral congestion.

‖A girl, æt. 13, had been suffering with continued fever for ten days; violent pain in back; inclination to sleep most of day; very sick at stomach; black diarrhœa; pulse varying from 98 to 110 during day; pain and weakness in lower limbs. θTyphoid.

‖A man, æt. 18; sick two weeks; high fever; pulse 120; face very flushed; fulness with slight pain and great

Digitized by Google

buzzing in head; gnats and bugs flying before eyes; inclined to jump out of bed; talking at random; slight bearing-down pain in bowels, attended with black diarrhœa; great weakness in lower extremities, general prostration.

‖A girl, æt. 20; violent inflammation of bowels for three days; pulse 110.

‖A girl, æt. 14; high fever; face flushed, white spots as large as a quarter here and there.

‖Ephemeral fevers with vertigo, headache, dimness of sight, nausea and weakness.

‖Remittent and bilious fevers not dependent on miasmatic influences.

‖Congestive fevers of malarial districts.

‖A girl, æt. 9, unconscious for four or five hours; complete anæsthesia; heart laboring tumultuously; pulse weak at wrist, 150 per minute; breathing panting and irregular; extremities cold and clammy; back and neck very hot; complexion ashy pale, with purplish lips; now and then a spasmodic twitching of arms and hands.

‖Cerebro-spinal fever in first stage.

‖Typhoid fever: pulse is full, hard, frequent; pain violent in back of head; delirium; black stools; constant talking and muttering unintelligibly, with open eyes; squinting; ocular conjunctiva injected; secretion of yellow mucus at inner canthus; nightly agglutination; face pale with cold sweat; boring occiput into pillow, jerking head backward, sometimes forward; pupils dilated; dropping of lower jaw; corner of mouth drawn down on l. side; champing teeth; tongue coated white; red streak down centre; beating of heart when turning over in bed, shaking l. side of thorax; pulse irregular; urine dark and turbid, fetid, involuntary; great restlessness; constant moving, thrusting out one leg, then drawing it up; position on back, with thighs flexed on pelvis; picking at bedclothes; subsultus tendinum, like galvanic shocks; twitching of facial muscles.

‖Yellow fever; intense fever with occipital pains, and vascular and nervous erethism, threatening convulsions; development of local inflammations; præcordial distress; vomiting with cold sweat on face; great and sudden changes in pulse.

" **Attacks, Periodicity.** Every five minutes: pains culminate in vomiting.

For hours: empty retching.

For a month: chorea.

For four years: St. Vitus' dance.

" **Locality and Direction.** Left: vision hazy; dull pain in

eye; heavy pain in head; rheumatism in shoulder, hip and knee; corner of mouth drawn down.

Right: neuralgic pain in temple; head and face swollen, with blisters; loss of vision; inflammation and swelling of upper lid; neuralgic pains from umbilicus to groin; pain in chest; lancinating in hip.

Right then l.: itching in ala nasi; ankles feel as if dislocated.

Sensations. As if head would burst; as if boiling water were being poured over parts; as of a ball rising into œsophagus; as if stomach were tightly drawn against spine; confused feeling in head; tongue as if scalded; as of a load on chest; as if ankles were dislocated; as of galvanic shocks in limbs.

Pain: in orbital region; in calves and feet; in lower portion of bowels; all over body from uterus; into head from neck; in r. side; in joints; about condyles; in back of head; in lower limbs.

Intense pain: in head, with dysmenorrhœa.

Sharp pain: in uterus and ovaries.

Sharp flying pains: in epigastrium and umbilical region to pubis.

Excruciating pain: in lower part of stomach.

Violent pains: in small of back and through pelvis; in back.

Lancinating: in r. hip.

Cutting: in umbilical region; in bowels.

Stabbing: in dorsal region, sometimes to umbilicus.

Stitches: pleuritic in r. side.

Pricking: in skin.

Prickling: in cardiac region.

Tearing: in stomach.

Neuralgic pain: in r. temple; in stomach; r. side of umbilicus to groin; in rectum.

Rheumatic pain: in joints.

Twisting pain: in stomach.

Drawing: in stomach.

Pressure: in head.

Heavy pain: in l. side of head.

Bearing down: in bowels.

Constrictive pain: in head.

Cramp: in stomach; in calves and feet; of legs, fingers and toes.

Dull pain: in l. eye.

Soreness: across abdomen; as of a boil in uterine region.

Aching: in umbilical region; heavy pressive, in uterine region; dull, in cardiac region; in back of neck and shoulders.

Digitized by Google

Burning: in head; in fauces and œsophagus; in stomach; dull, in region of heart; in chest; in skin.
Fulness: in head; in arteries.
Distension: of head.
Faint feeling: in stomach.
Numbness: in calves and feet.
Tingling: in limbs; in skin.
Heat: in eyes; in head and face; down spine.
Dryness: in mouth.
Itching: in calves and feet; in ala nasi; in skin.

[44] **Tissues.** ‖Congestions, especially to base of brain, chest, spine and stomach.
Dropsy: with fever; after scarlatina.
Violent pains attending inflammations.
Acute rheumatism with high fever, full, hard, rapid pulse, pains in joints and muscles; scanty red urine.
Inflammatory rheumatism with gastric complications; tongue coated on sides with a red streak through centre; creeping chilliness; aching in all bones, followed by headache and fever; affects especially l. shoulder, hip and knee.
Endo- and pericarditis; cardiac oppression with passive congestion.

[45] **Touch. Passive Motion. Injuries.** Rubbing: > pain and itching.
‖Sunstroke.
Pressure: > pain in head.

[46] **Skin.** Itching of different parts from rubbing.
Tingling and pricking in skin.
Itching and burning of skin; high fever.
Skin cold, clammy, bluish, insensible, shrivelled.
Eruptions, with intense fever.
Erythema and vesication of skin.
Phlegmonous and vesicular erysipelas.
‖Skin cold and moist, or hot and burning.
‖Scarlatina: with intense arterial excitement; during febrile stage cerebral congestion or irritation of spinal centres; convulsions, with greatly dilated pupils, perfect sleeplessness; sequelæ, as rheumatism, dropsy; when inflammatory symptoms are present.
‖Measles during febrile stage, especially if pulmonary congestion is impending; convulsions before eruption.
‖Smallpox before eruption; cerebral congestion and excessive nausea, vomiting and great prostration.
‖In erysipelas, if cerebral symptoms should set in from metastasis of inflammation to brain, with hard, very full pulse.

[47] **Stages of Life, Constitution.** Full-blooded, plethoric persons.

Digitized by Google

Boy, æt. 5; rheumatism.
Girl, æt. 6; erysipelas.
Boy æt. 7, delicate constitution, sickly aspect and color, has passed through several pulmonic attacks; pneumonia.
Boy, æt. 10, scrofulous; rheumatism.
Boy, æt. 11, suffering one month; chorea.
Boy, æt. 13, suffering four years; chorea.
Girl, æt. 13; chorea.
Girl, æt. 13, ill ten days; continued fever.
Girl, æt. 14; fever.
Mr. H., æt. 18, ill two weeks; typhoid fever.
Miss C., æt. 20; inflammatory fever.
Mrs. M., æt. 26, primipara; puerperal convulsions.
Lady, æt. 30; rheumatism.
Man, æt. 35; rheumatism.
Widow, æt. 36, has two children, since death of husband nervous and excitable, rather insane for years; after an attack of erysipelas; insanity.
Mrs. B., æt. 55; bilious pneumonia.
Young lady, strong and plethoric, after sweeping a cold, damp floor in her slippers; amenorrhœa.
Mrs. G., delicate, after being caught in shower; amenorrhœa.
Lady, middle-aged, sick five days; erysipelas of face.
Lady, middle-aged, fleshy; erysipelas of scalp.

[48] **Relations.** *Verat. vir.* cured spasms from *Strychnine.*

Google

VERBASCUM THAPSUS.

Mullein. *Scrophulariaceæ.*

A native of Europe, naturalized in North America. Inhabits fields and waste places; the tall stems and leaves are woolly, flowers yellow on a cylindrical spike. The alcoholic tincture is prepared from the fresh plant, chopped and pounded to a pulp.

Proved by Hahnemann, Gross, Hartmann, Langhammer, Moesdorf, R. A. M L., vol. 5.

CLINICAL AUTHORITIES.—*Migraine*, Müller, B. J. H., vol. 21, p. 19; *Deafness*, Cushing, A. H. O., 1876, p. 563; *Prosopalgia*, Battmann, Gersung, Rück. Kl. Erf., vol. 5, p. 196; Berridge, Hom. Rev., vol. 16, p. 495; Y., Rück. Kl. Erf., vol. 1, p. 436; *Facial neuralgia*, Gersung, B. J. H., vol. 11, p. 299; *Nocturnal enuresis* (2 cases), Cushing, N. E. M. G., vol. 8, p. 548; *Cough*, Kurtz, Hirsch, Rück. Kl. Erf., vol. 5, p. 697; Hirsch, N. A. J. H., vol. 4, p. 337.

[1] **Mind.** Diminished memory; it was with great difficulty he could recall thoughts he had just had.
Excited phantasies, especially of a sensual nature.
Excessive joy with laughter.
Very fretful and morose without cause; desire and inclination for work; he finds satisfaction in having people about him, and in talking with them.
Anxious mood all day; more lively toward evening.
Depressed all day, all his efforts and hopes seem unavailing.
Indifferent to things to which he is usually attentive.
Disinclination for work.
Distraction of mind; different trains of thought and phantasies throng upon him.

[2] **Sensorium.** Vertigo: on pressing l. cheek, while supporting head; sudden as from pressure on whole head.
Dulness of head.

[3] **Inner Head.** Dull painful heaviness of head.
Violent pressure in whole forehead.
Pressing stupefying headache, especially affecting both sides of forehead, in every position.
Incessant pressure from within outward, in forehead, especially between eyebrows; > on stooping.
Head dull and confused, as if everything would press out at forehead.
Slow hammering in l. frontal eminence.
Sticking in l. frontal sinus.

Google

Intermittent, fine needlelike stitches in l. side of forehead.
Violent, slowly appearing and disappearing stitch extending from within outward in l. frontal eminence.
Benumbing drawing in l. frontal eminence in a draft of air.
Violent benumbing, pressing inward in l. side of frontal bone.
Intermittent pressure and beating near l. frontal eminence.
Deep, sharp, intermittent stitches between l. frontal eminence and parietal eminence.
Violent intermittent deep sticking behind l. parietal eminence.
Violent stupefying pressure deep in r. frontal eminence on going from cold into warmth.
Pressing headache on crown.
Tension in l. side of vertex, which gradually becomes a sharp pressure, at same time l. ramus of lower jaw seems pressed against upper jaw.
Burning and prickling in l. temple.
Pressure from behind forward in l. temple.
‖Dull pressure in articular eminence of temporal bone, just in front of l. ear.
Sharp, benumbing, knifelike stitches just above r. temple.
A pressing pain in r. temple.
‖Benumbing, sticking piercing, deeply in r. temple while eating, < by external pressure; after a few hours is extended into upper teeth of same side like a tearing.
‖Sensation as if both articular eminences of temporal bones were violently pinched and crushed together with pincers.
Sticking jerking, externally, first in l. temple, then in r.
Jerking pressure in l. half of brain.
Violent pressing, but very transient pain, extending from within outward in whole r. half of brain, which gradually diminishes.
Tearing pressure in r. half of brain.
Benumbing pressure in whole l. side of head and face.
‖Pressing, long-drawn stitch from behind forward, through l. hemisphere of brain.
Stitch in l. side of occiput.
Pressing pain in occiput.
Violent pressure in r. occipital protuberance.
Tingling in head while walking.
‖Migraine of twenty years' standing; peculiar sympathetic affection of ear on affected side; at height of headache, which mainly consisted in pressure and pinching in temple and zygoma, there commenced an intolerable drawing in ear, with a sensation as if something stopped it up, < moving jaw and masticating.

Digitized by Google

[5] **Sight and Eyes.** Pupils dilated.
A short-sighted person became still more short-sighted; could scarcely recognize objects a yard away, on account of watery dimness of vision; objects seemed indistinct and enlarged, daylight less bright.
Pressing pain above l. orbit.
Heat in eyes and sensation of contraction of orbits.

[6] **Hearing and Ears.** ‖Difficult hearing, as if ears closed, as if something had fallen before ear.
‖Numbness in l. ear.
A tearing stitch in l. ear, while eating.
‖Painful tearing and drawing in l. ear, extending inward.
Tearing stitches in front of l. ear, extending downward.
‖Sensation as if l. ear would be drawn inward.
‖Sensation as if something stopped ears; first l. then r.
Violent tearing within r. ear.
Sudden pressure, with a violent stitch behind r. ear, disappears gradually.
Sensation as if ear (nose and larynx) were stopped up when reading aloud.
Deafness caused by water filling ears (oil of *Verbascum thapsus*).

[7] **Smell and Nose.** Sensation of stoppage in nose, larynx and ears which does not affect hearing, while reading aloud.
‖Painful coryza from frontal sinuses, with hot, burning, profuse lachrymation.

[8] **Upper Face.** Violent pressure on r. malar bone.
Intermittent, frightful sticking in l. malar bone.
‖Sensation as if one were violently pressing upon l. malar bone as far as ear, < by pressure with hand, frequently during day, in evening before going to bed, and in morning on waking.
‖Tension in l. malar bone, in articular elevation of temporal bone, and in frontal eminence, on going into open air, and in a draft of air.
‖Benumbing, intermittent pressure in upper margin of l. malar bone.
‖Dull, pressing-sticking sensation in l. zygoma.
‖Whole cheek becomes involved in a dull pressure in l. articulation of jaw, and on pressure becomes a benumbing tension.
‖Facial neuralgia, like a crushing with tongs, often occurs twice a day.
‖For two years almost constant pain in face; lightning-like pain shoots over r. side of face on talking, sneezing, biting hard, or touching teeth with tongue; attacks < in morning, lasting from ten minutes to an hour; tear-

Google

ing, twitching, stitching, frequently intolerable pain from r. temple to angle of mouth; during attacks face red, head hot, belching of wind, expectoration of tenacious saliva, severe vertigo, pressing, tearing pains in l. side of head.

‖ Prosopalgia, l. side, < at exit of supraorbital nerve, tearing cutting pains from thence to forehead, zygoma and cheek, and during height of paroxysm affecting also r. side; painful spots very sensitive to touch, not entirely lost during free periods; attacks appear about 9 A.M., attain their height about noon, then gradually diminish in intensity until 4 P.M., and disappear; during attack eyes dim, dull, look smaller than usual, particularly l. eye, which is swollen, face red, sees as if through a fog; despondency; pain < from least motion.

‖ For two days dull hot pains in r. face, and shooting from r. face into r. eye; r. face swollen and watery swelling below r. eye; r. eye waters, and partly closed from swelling under it; tensive pain in vertex, > on sitting up; face pain < from a draft of air; cause, exposure to cold air after perspiring.

‖ Facial neuralgia; seemed mad with agony, howling, inarticulate sounds.

‖ Left-sided prosopalgia seated in supraorbital nerve.

[9] **Lower Face.** ‖ Violent tension in integuments of chin, masseter muscles and throat.

‖ Pressing pinching pain on side of lower jaw.

[10] **Teeth and Gums.** Tearing in large molars of r. lower jaw.

Intermittent tearing in small molars of l. lower jaw.

[11] **Taste and Tongue.** Root of tongue brown, with a flat, nauseous taste in forenoon.

Tongue brownish-yellow, coated with tenacious mucus, without a bad taste.

Flat taste for some time after dinner.

Flat taste with an offensive odor to breath, with brownish-yellow coated tongue in morning.

[12] **Inner Mouth.** Salt water collects in mouth.

[13] **Throat.** ‖ Very severe pain in throat on swallowing; had it many years.

[14] **Appetite, Thirst. Desires, Aversions.** Hunger without appetite throughout day; nothing is relished, yet he wishes to eat.

Unquenchable thirst.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.

Eructations: bitter, qualmish; tasteless; empty.

[17] **Scrobiculum and Stomach.** Pressure in stomach.

Sensation of great emptiness in pit of stomach, which disappears with a rumbling below l. ribs.

Google

[18] **Hypochondria.** Incessant rumbling and gurgling in region beneath l. ribs.
A deep, sharp stitch in l. side where ribs cease.
Sticking pinching in r. hypochondrium.

[19] **Abdomen.** Sharp intermittent stitches in l. side above navel.
Intermittent dull sticking in l. side beneath navel, < on bending body forward after eating.
Abdomen tympanitic, followed by frequent rumbling in region beneath l. ribs, which caused violent eructations.
Acute, deep, knifelike stitches in r. side of lower abdomen, above pubis.
Intermittent dull needle stitches in r. side, by navel.
Tearing sticking in abdomen extending downward.
Pain in abdomen extending low down, causing spasmodic contraction of sphincter ani and a transient desire for stool.
Hard, painful pressure as from a stone upon umbilicus, < by stooping.
Stitches as from many needles in umbilical region round to back and even in dorsal vertebræ, on deep inspiration and on stooping.
Sensation as if intestines at umbilicus were adherent to wall of abdomen and were being torn away forcibly, < by external pressure.
Griping in abdomen as from incarcerated flatus, in every position.
Cutting griping in whole abdomen, with frequent eructations.
Cutting griping colic, here and there, though always rising toward ribs, where it becomes seated.
Gurgling in lower abdomen.
Constriction of abdomen at umbilical region at various times.
Cramps around navel, seems as if pain would give her a twist, burning on making water, made it often; heels hurt her awfully; great stiffness in l. ankle joint.

[20] **Stool and Rectum.** Fearful diarrhœa on third day, eighteen to twenty movements a day; griping; a great deal of pain, as if pierced with a lance, through inside of l. ankle joint; pain in both cheek bones and above eyebrows; menses came on early this time, and she has coughed a good deal.
Soft stool, with straining.
Stool like sheep's dung, scanty, very hard, and expelled with great effort.

[21] **Urinary Organs.** Frequent desire to urinate, with scanty or profuse discharge.
Enuresis nocturna.

Digitized by Google

[26] **Male Sexual Organs.** Emissions without lewd dreams.

[28] **Voice and Larynx. Trachea and Bronchia.** Hoarseness from reading aloud; deep voice.

[27] **Cough.** Dry, hoarse cough, < at night; in children during sleep.

‖Frequent attacks of a deep, hollow, hoarse cough, with sound like a trumpet, caused by tickling in larynx and chest.

‖Spasmodic, rough, deep-sounding night cough.

The cough is lessened as soon as the patient succeeds in taking a deep breath.

[29] **Inner Chest and Lungs.** A benumbing, oppressive stitch, taking away breath, in region of first and second costal cartilages.

Sharp pressure beneath l. nipple.

Violent stitch on inspiration, several times, beneath l. nipple, which slowly disappeared, but which always returned on deep inspiration.

Intermittent, dull, needlelike stitches near l. side of ensiform cartilage.

Intermittent, benumbing, frightful cutting near l. side of ensiform cartilage, below last ribs.

Painful tension across chest, with stitches in region of heart, immediately after lying down in bed in evening.

Pressing-sticking pain in next to last rib where it passes into cartilage, suddenly disappearing on external pressure, but immediately returning.

[31] **Neck and Back.** Sharp intermittent stitches in l. scapula.

A very fine persistent stitch in last dorsal vertebra, when sitting bent over.

In middle, between r. loin and spine, intermittent, deep, sharp, knifelike stitches, quite internal, in intestines.

Backache, < from pressure.

[32] **Upper Limbs.** Pain on top of shoulder, pressing rather than tearing, disappearing on motion.

Cramplike pressing in l. elbow, extending into forearm, in every position.

Tearing extending downward in l. ulna.

Tensive pain in l. wrist during rest and motion.

‖Some dull stitches in joint where carpal bone of thumb articulates with radius, like a kind of sprain (or numbness).

Tearing sticking in palm of hand.

Pain in back of r. hand, pressing rather than tearing.

Cramplike pressure now in r., now in l. metacarpus, on moving arm, disappearing during rest.

Sharp sticking in first phalanx of l. thumb.

Cramplike pressure in first phalanx of r. thumb, disappearing on motion.

Google

Numbness and insensibility of thumb.
Violent sticking as with a dull knife, in thick flesh between metacarpal bone of r. thumb and index finger.
Violent pricking, intermittent, dull stitches in middle joint of index finger.
Violent dull intermittent sticking in last phalanx of index finger; on moving finger pain extended into first joint.
Paralytic drawing in whole of l. index finger.
Violent tearing stitch through whole of l. little finger.
Pain on outer side of metacarpal bones of little fingers, as from a bruise, only noticed on touch.
Paralytic pain in l. fingers, especially in their metacarpal joints.

[33] **Lower Limbs.** Weariness of lower extremities.
Tearing from above downward in leg.
Paralytic pain in inner side of r. thigh, while leg is drawn up in a sitting position; on stooping pain extended toward knee, painful like a sticking.
While riding r. thigh over l., weakness and sensation of weariness in bone of r. thigh, not noticed on walking.
| | A cramplike pain in muscles of r. thigh, while walking in open air.
Drawing, pressing sensation extending from middle of r. thigh to knee, while sitting.
A pressing, cramplike pain in muscles above r. knee, while sitting and standing.
Dull stitches just above l. patella only on stepping.
Knees tremble as if one had received a great fright.
| | Sudden pain through r. knee, while standing, sitting and walking.
Cramplike pressure in l. leg near ankle.
| | A cramplike pressure in sole of r. foot, while standing, which disappears on walking.
Violent intermittent dull sticking in metatarsal bones of great and adjacent toes of l. foot during rest.
Gait tottering, while walking in open air, as if limbs could not support body on account of weakness.
Very great heaviness in lower extremities, as if a weight were hanging upon them on going up and down stairs.

[34] **Limbs in General.** Stretching in limbs.
Stinging pains in limbs.

[35] **Rest. Position. Motion.** Rest: sticking in l. metatarsal bones.
Lying: tension across chest, stitches in region of heart.
Sitting: drawing pressing from middle of r. thigh to knee; cramplike pain in muscles above r. knee; pain in r. knee.
Sitting up: > pain in vertex.

Riding r. thigh over l.: weakness and weariness in bone of r. thigh.
Standing: cramplike pain in muscles above r. knee; in r. knee; cramplike pressure in sole of r. foot.
Motion: least, prosopalgia <; > pain on top of shoulder; cramplike pressure in metacarpus.
Bending body forward: stitches near navel <.
Stooping: > pressure in forehead; < pressure as from a stone upon umbilicus; stitches in umbilical region; sticking from r. thigh to knee.
Stepping: stitches above l. patella.
Walking: tingling in head; cramplike pain in muscles of thigh; pain in r. knee; > cramplike pressure in sole of r. foot; in open air, tottering gait; up and down stairs, heaviness in legs.

[37] **Sleep.** Frequent yawning and stretching, as if he had not slept enough.
He cannot keep awake immediately after dinner, lids close.
Restless sleep at night, he tosses from side to side.
Sleep only till 4 A.M., filled with dreams of war and of corpses, several nights.
Indolence and sleepiness in morning after rising.

[38] **Time.** After 4 A.M.: no sleep.
Morning: facial neuralgia <; flat taste and offensive breath, with coated tongue; lassitude and sleepiness.
Forenoon: flat, nauseous taste.
All day: anxious and depressed.
Night: cough <; restless sleep.

[39] **Temperature and Weather.** Draft of air: causes drawing in frontal eminence; pain in malar bone; faceache <.
Exposure to cold air after perspiring: faceache.
Going from cold into warmth: pressure in frontal eminence.

[40] **Fever.** Slight transient coldness over whole body, even perceptible externally on hands and feet.
External and internal sensation of coldness over whole body.
Coldness and chill predominate.
Shivering, especially over one side of body from shoulder to thigh, as if cold water were poured over it.

[41] **Attacks, Periodicity.** Attacks: appear 9 A.M., attain their height about noon, gradually diminish until 4 P.M.; prosopalgia.
Intermittent: benumbing pressure in malar bone; tearing in molars; stitches near navel; stitches near ensiform cartilage; stitches in back; stitches in index fingers; stitches in l. metatarsal bones.
From ten minutes to an hour: attacks of facial neuralgia.

Digitized by Google

Twice a day: facial neuralgia.
For two days: faceache.
For two or three days: pimple on neck near thyroid cartilage.
For two years: facial neuralgia.

"**Locality and Direction.** Left: hammering in frontal eminence; sticking in frontal sinus; needlelike stitches in forehead; benumbing drawing in frontal eminence; benumbing pressure in side of frontal bone; pressure and beating near frontal eminence; stitches between frontal and parietal eminence; sticking behind parietal eminence; tension in vertex; ramus of lower jaw seems pushed upward; burning and prickling in temple; pressure from behind forward in temple; pressure in front of ear; jerking pressure in brain; benumbing pressure in side of head and face; stitch from behind forward through brain; stitch in occiput; pressing above orbit; numbness in ear; tearing stitch in ear; tearing and drawing in ear; stitches in front of ear downward; sticking in malar bone; tension in malar bone; pressing sticking in zygoma; dull pressure in articulation of jaw; pressing tearing in head; prosopalgia; eye swollen, prosopalgia; tearing in lower molars; rumbling below ribs; sharp stitch under ribs; stitches above navel; stitch beneath navel; stiffness in ankle joint; pressure below nipple; stitch below nipple; stitches and cutting near ensiform cartilage; stitches in scapula; pain in elbow; tearing down ulna; tensive pain in wrist; sticking in thumb; paralytic drawing in index finger; stitch through little finger; paralytic pain in fingers; stitches above patella; sticking in metatarsal bones; itching, crawling, tickling on side of middle finger.

Right: pressure in frontal eminence; stitches above temple; pressing in temple; sticking piercing in temple; pressing outward in brain; tearing pressure in brain; pressure in occipital protuberance; tearing in ear; pressure and stitch behind ear; pressure on malar bone; lightning-like pain in face; shooting from face into eye; face swollen; eye waters; pressing pinching in lower jaw; tearing in lower molars; sticking pinching in hypochondrium; knifelike stitches in lower abdomen; stitches near navel; stitches between loin and spine; pain in back of hand; cramplike pressure in thumb; sticking between thumb and index finger; paralytic pain in thigh; cramplike pain in muscles of thigh; sudden pain through knee; cramplike pressure in sole of foot; pimple in front of ear.

Digitized by Google

Left then r.: sticking jerking in temples; as if something stopped ears; prosopalgia.

[43] **Sensations.** As if everything would press out at forehead; as if l. ramus of lower jaw were pressed against upper jaw; as if temples were pinched and crushed; as if ears were stopped up; as if nose and larynx were stopped up; as if something had fallen before ear; as if one were violently pressing on l. malar bone; as of a crushing with tongs; facial neuralgia; pressure, as from a stone upon umbilicus; as from needles in umbilical region to back; as if intestines were adherent to wall of abdomen, and were being torn away; as of a twist around navel; as if a weight were hanging on lower extremities; as if cold water were poured over side of body from shoulder to thigh.

Sudden pain: through r. knee.

Lightning-like pain: over r. side of face.

Severe pain: in throat, on swallowing.

Jerking: in temples; in l. half of brain.

Lancinating: in l. ankle joint.

Cutting: in l. side of face; in abdomen; near l. side of ensiform cartilage.

Stitches: in l. side of forehead; sharp, deep, between l. frontal eminence and parietal eminence; above r. temple; from behind forward in l. half of brain; in l. side of occiput; in l. ear; in front of l. ear; behind r. ear; in r. side of face; in l. hypochondrium; in l. side, above navel; in r. side of lower abdomen; in umbilical region; in region of first and second costal cartilages; beneath l. nipple; near l. side of ensiform cartilage; in region of heart; in l. scapula; in last dorsal vertebra; between r. loin and spine; in wrist; dull, in middle joint of index finger and last phalanx; through little finger; above l. patella.

Sticking: in l. frontal sinus; behind l. parietal eminence; in r. temple and upper teeth; in temples; in l. malar bone; in l. zygoma; in r. hypochondrium; in l. side beneath navel; in abdomen; in next to last rib, where it passes into cartilage; in palm of hand; in first phalanx of l. thumb; in r. thumb and index finger; in metatarsal bones of great and adjacent toes of l. foot.

Pricking: in middle joint of index finger.

Stinging: in limbs; in pimple in front of r. ear.

Burning: in l. temple; on urinating.

Hammering: in l. frontal eminence.

Tearing: in r. temple and upper teeth; in r. half of brain; in l. ear; in front of l. ear; in r. ear; r. side of face; in l. side of face; in l. side of head; in molars; in abdo-

men; on top of r. shoulder; in l. ulna; in palm of hand; in back of r. hand; in l. little finger, in leg.
Drawing: benumbing, in l. frontal eminence; in ear; in l. ear; in l. index finger; from middle of r. thigh to knee.
Bruised pain: in outer side of metacarpal bones of little fingers.
Pressure: in forehead; benumbing, in l. side of frontal bone; stupefying, in r. frontal eminence; on vertex; on l. side of vertex; in l. temple; in articular eminence of temporal bone; in front of l. ear; in r. temple; in l. half of brain; in r. half of brain; in l. side of head and face; in occiput; above l. orbit; behind r. ear; on r. malar bone; in upper margin of l. malar bone; in l. zygoma; in l. side of head; in r. side of lower jaw; in stomach; beneath l. nipple; in next to last rib, where it passes into cartilage; on top of r. shoulder; cramplike, from l. elbow into forearm; in back of r. hand; in metacarpus; in first phalanx of r. thumb; from middle of r. thigh to knee.
Pinching: in r. side of lower jaw; in r. hypochondrium.
Griping: in abdomen.
Contraction: of orbits; at umbilical region.
Cramps: around navel.
Cramplike pain: in muscles of r. thigh; in muscles above r. knee; in l. leg near ankle; in sole of r. foot.
Tension: in l. side of vertex; in l. malar bone; in articular elevation of temporal bone; in frontal eminence; in vertex; in integuments of chin, masseter muscles and throat; across chest; in l wrist.
Paralytic pain: in l. fingers; in inner side of r. thigh.
Tickling: in larynx and chest; on side of l. middle finger.
Tingling: in head.
Weariness: in bone of r. thigh.
Heaviness: of head, painful.
Emptiness: in pit of stomach.
Dull hot pain: in r. face.
Heat: in eyes.
Numbness: in l. ear; of thumb.
Benumbing: in head; in face; in region of first and second costal cartilages.
Crawling: on side of l. middle finger.
Itching: on forearm; on side of l. middle finger.

"**Touch. Passive Motion. Injuries.** Touching teeth: neuralgia of face <.
Touch: painful spots on face < neuralgia; stinging pain in pimple in front of r. ear.
Pressure: < pain in r. temple; < pressing pain in l. malar bone; < sensation as if intestines were adherent to

Google

wall of abdomen; > pressing sticking in next to last rib; < backache.

[46] **Skin.** Pimple on cheek in front of r. ear, with stinging pain, when touched.

A large red pimple on neck near thyroid cartilage, painful pressure lasting two or three days.

Itching on forearm.

Itching crawling tickling on side of l. middle finger, provoking scratching.

[47] **Stages of Life, Constitution.** Girl, æt. 8; enuresis.

Boy, æt. 12; enuresis.

Woman, æt. 32, suffering two years; prosopalgia.

Woman, æt. 45, brunette, thin, lively disposition, suffering five days; prosopalgia.

Woman, æt. 50, suffering twenty years; migraine.

[48] **Relations.** Compare: *Platin.* in facial neuralgia.

VESPA.

The Wasp, including Hornet and Yellow Jacket.

Introduced by Hering, Amerikanische Arzneiprüfungen (see Bienengifte).

There are no provings with the exception of those by Berridge of Vespa crabro, the hornet, 30th dilution, Med. Inv., vol. 1, New Ser., 1875, p. 100.

The symptoms quoted are mainly the results of the sting.

Authorities: See Allen's Encyclopedia, vol. 10, pp. 119 and 639.

CLINICAL AUTHORITIES.—*Œdema of face, etc.*, Blake, Org., vol. 1, p. 320, from Hom. Rev., vol. 22, p. 270; *Ophthalmia* (Vespa crabro), Berridge, Org., vol. 2, p. 318; *Vesical catarrh*, Hering, MSS.

[1] **Mind.** Insensibility; loss of consciousness; inability to move.

Anxiety and universal distress.

Low-spirited.

[1] **Sensorium.** Fainting, loses consciousness.

A violent heat came over him, felt sick; then turned giddy and spun round and round like a top till he fell headlong into a currant bush; managed to stagger like a drunken man to house, got into chair, in a moment fell out of it upon his knees, all but fainting; dashed water

Digitized by Google

into his face, at length he was able to lie down upon his bed.

[3] **Inner Head.** Headache.

[4] **Outer Head.** Face swollen and inflamed; swelling extends upward over head.

Alopecia.

[5] **Sight and Eyes.** Vision, especially r. eye, growing dim.

Eyes turned red and twitched.

Swelling and puffiness of lower lids.

Eyes nearly closed, two or three hours after sting.

Injection of conjunctiva of r. eye.

Itching of eyelids; adhesion in morning.

Itching and redness in eyes.

Itching of r. lid in evening, slight tumefaction; lids more swollen and painful; swelling increased, considerable pain in eyeball and lids all night; lids greatly tumefied with what seemed to be erysipelatous inflammation; whole side of face painful and swollen; on opening lids discovered almost complete chemosis of conjunctiva, it being raised up on sclerotic membrane more than half over eye to border of cornea, as if fatty matter were underneath it, caused by effusion of lymph; an abscess opened upon inside of upper lid about its centre; swelling began to abate and chemosis to flatten down, assuming instead of a semi-transparent, a reddish hue, as in common ophthalmia; discharge from abscess profuse; in fourteen days chemosis entirely disappeared.

[11] Right eye inflamed for six days; it had commenced with lachrymation; had taken *Acon.* without relief; now there is redness of conjunctiva of r. lower lid; in l. lower half of r. eye is a semi-transparent baggy swelling of conjunctiva extending up to cornea, and on pressing it upward it partly covers cornea; much lachrymation of r. eye, < in open air, r. eyelids adhere in morning; man, æt. 60.

[6] **Hearing and Ears.** Subdued, stitchlike pain deep in r. ear.

[8] **Upper Face.** Face: anxious; livid; bluish; smooth, dark-red and bloated.

Facial neuralgia.

An ulcer lasting three months after a sting in cheek.

Stings in face, swelling closing eyes.

Swelling and redness of face like erysipelas.

After a sting in cheek a violent sensation burning like fire, as if it were going deep in; a sensation followed as if something were sticking deep in, like a harpoon, and were drawn on frequently; place of sting bright-red, elevated, and a hard swelling followed; there was a very marked chilly-cold sensation all around red middle and this was followed by a general chill.

Google

Face and ears became red as if covered with scarlet rash.
Face, especially eyelids, swollen and puffy.

[11] Face swollen and puffy; skin transparent and etiolated; scalding urine, followed by itching; itching of r. arm; vision, especially of r. eye, growing slowly dim; palpitation on exertion; flatulence.

Next day, about 4 A.M., I was suddenly awakened by a burning, stinging sensation in cheek, and a great soreness and smarting along course of lymphatics down into neck; I found my cheek much swollen and red, and there was a patch of redness about size of a florin that felt as if it were being pierced with red-hot needles; temporo-maxillary joint stiff and painful, and a feeling of soreness ran along gums to tonsils on that side of face; after bathing for a while affected parts, I got into bed again, feeling somewhat >, and fell asleep again; about two hours afterward I was again suddenly aroused, this time by a sense of suffocation and difficulty of swallowing with renewal of former distress with intensified severity; feeling alarmed, I obtained some hot water, to which I added a few drops of tincture of *Ledum* and fomented whole of affected part until severity of symptoms abated; during remainer of that day and for four days afterward attacks continued to return in paroxysms of more or less severity; submaxillary and cervical glands on that side of face became increasingly swollen and tender until fourth day, when these conditions began gradually to abate; in immediate locality of wound pains began to assume a more constant character, throbbing, smarting and burning; still there was a marked periodicity about stinging and lancinating pains experienced for more than a month afterward, although wound suppurated and discharged freely; general constitutional disturbances were marked by slight rigors and febrile conditions felt mostly in evening.

[10] **Teeth and Gums.** Quaked and trembled; teeth chattered as if he had a paroxysm of ague.

[11] **Taste and Tongue.** Pain for a minute or two intense, followed by a peculiar taste, a singular combination of palatal and nasal sensation, such as is noticed when a nest of these wasps is disturbed and they dart about through air; for a week constant and annoying, then intermittent and very pungent, and whenever heated by exercise or near a hot fire.

Swelling of tongue, could scarcely talk; pain exceedingly violent, burning stinging (*Apis* 30 relieved).

Tongue very red, greatly swollen and rounded; could not move it about or protrude it, it appeared to entirely fill

Digitized by Google

mouth; could not speak, only mumble, swallowing painful and difficult.

Tongue very much swollen and tense; considerable swelling immediately below chin, between that and hyoid bone; pain referred to a point in middle line of tongue about three-quarters of an inch from apex.

Found her in a state of terrible anxiety, with eyes and face œdematous, and quite unable to articulate or to protrude her tongue, but she could open her mouth a little and I could see sting embedded in middle third of tongue; I at once extracted it; tongue itself with its root and whole floor of mouth swelled so that cavity of mouth was entirely filled therewith and then nothing else could be seen; she could not articulate a single word; suffered great pain in tongue, which she described afterward as burning, throbbing and aching; great anxiety, appearance of face, mouth and throat that of severe cynanche; great dysphagia; surface of tongue and lining of cavity of mouth did not seem especially red, swelling being diffused and deep-seated.

[12] **Inner Mouth.** Sting on roof of mouth caused immediately swelling in mouth and throat; burning pain; nausea and vertigo; two hours afterward violent fever, pulse 126 per minute; loss of consciousness, delirium; face, neck, arms and chest swollen and red and glistening; breathing oppressed; swallowing very difficult. (Spirits of Camphor relieved.)

[13] **Throat.** Sore throat.

Sensation of heat in throat.

Throat greatly swelled.

Dangerous swelling in œsophagus.

Erythema spread into mouth and down into stomach, causing vomiting with temporary relief.

Tonsils repeatedly inflamed.

Pharyngeal varicosis.

Hypertrophied tonsils secreted a cheesy matter.

Swelling of mouth and throat with violent burning pains, nausea and vertigo so that patient was obliged to go to bed; after two hours a violent fever, unconscious and delirious, face, neck and arms swollen and shining red; respiration impeded, swallowing very difficult; pulse 126; heart's action irregular and tumultuous. (Cured by Camphor.)

[15] **Eating and Drinking.** Indigestion with flushing after meals.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations.

Nausea, with faint feeling and trembling.

Vomiting.

Digitized by Google

[17] **Scrobiculum and Stomach.** Weight in stomach with nausea.

Heat or cold feeling in stomach.

[19] **Abdomen.** Uneasiness in bowels.

Restlessness in abdomen.

Flatulence.

[20] **Stool and Rectum.** Constipation.

[21] **Urinary Organs.** Marked tenderness on deep pressure over renal region.

The pelves of kidneys shrunk irregularly to one-third of their usual capacity.

Kidneys enlarged and flabby, lobulated in outline, soft on section; cortical part pale, medullary portions deep red and hypertrophied.

Mucous membrane lining both ureters much thickened and loaded with tenacious mucus.

Bladder free from disease; mucous membrane thickened and tuberculated from previous inflammation.

Urine sometimes red and hot, always too frequent.

In urine frequent blood disks, no casts of any kind.

Irritation invaded urinary passages; remittent dysuria with backache.

Incessant enuresis.

[22] **Male Sexual Organs.** In less than an hour his hand became greatly swollen and painful, followed by swelling and puffiness of lower lids and scrotum, together with integuments of penis; parts swollen more than twice their usual size; almost immediately skin on abdomen, arms, legs, neck and nearly all of back turned purple (almost black), followed by an eruption of urticaria, which completely covered body; two or three hours after sting his eyes were nearly closed, and this dark color and urticaria were fully developed; they all continued about twenty-four hours, when they gradually disappeared in order in which they came.

[23] **Female Sexual Organs.** Pain in l. ovarian region.

Catamenia: intermittent; sometimes brown; always accompanied by pain and flatulence, preceded by mental depression, pain, pressure and constipation.

Fundus purple from congestion, dark blood oozing from incised surface.

An irritable ulcer surrounded os tincæ.

Vagina healthy, an ulcer encircled os and extended irregularly into cavity of cervix, half an inch in deepest part.

Irritation passing into pudenda, gives rise to ulceration.

Irritation especially painful in inguinal regions; thence passing to pudenda.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness; entire loss of voice.

Google

[28] **Respiration.** Dyspnœa; suffocation.
Respiration: hurried, 34, not particularly labored, and not strikingly laryngeal; and deglutition much impeded.
[29] **Heart, Pulse and Circulation.** Aching in heart.
Slow beating of heart, hardly perceptible.
Palpitation on exertion.
Pulse: small and quick; feeble, quick; 64; 160.
[31] **Neck and Back.** Beating of carotid arteries violent.
Woke with pain in l. neck, preventing her from turning it to l. side; felt least when lying on back, best on r. side.
Aching of part (r. side of neck) all day; next burning, lasting all night; cold water > burning for a time, but afterward it returned < than before.
Part (r. side of neck) began to swell that night, and was red and burning; swelling gradually increased to size of an egg and lasted three weeks.
Much pain and soreness on shoulder blade where stings were received.
[32] **Upper Limbs.** Itching of r. arm.
Hand and arm painfully inflamed and swollen.
Pain in shoulder in region of wasp sting; glands in r. axilla swollen.
Pain in l. shoulder joint on moving it, as if sprained; < on lifting whole arm and on twisting it.
Aching of hand and arm up to shoulder, lasting all day.
Burning of part (r. thumb), then swelling red, with burning pain.
Within ten minutes his thumb became considerably swollen, and whole of his face, especially eyelids, became swollen and puffy; very shortly face, and more particularly ears, became very red, as if covered with scarlet rash; child very restless during night; complained of a sensation of heat and much irritation; wherever he scratched there arose little spots, like blains of nettle-rash; there was some swelling with redness of l. hand and arm, but most marked symptom was swelling and redness of face, which reminded him of erysipelas; after forty hours there was considerable œdema of eyelids, especially of lower, and face was pallid and puffy.
[33] **Lower Limbs.** Feet cold, except in Summer, when they burn uncomfortably.
Slight œdema of feet.
Rheumatic pain in l. instep lasting a week.
[34] **Limbs in General.** It seemed as if a cutting instrument were piercing all joints; he likened sensations to electric shocks; arm, face and head became swollen; eyes became red and twitched; red lines extending along

Digitized by Google

absorbents; itching over whole body; complete insensibility, after ten minutes; vomiting; pulse slow; heart's action scarcely perceptible.

[35] **Rest. Position. Motion.** Motion: pain in l. shoulder joint <.

[36] **Nerves.** Convulsions, if pain is violent.
Great lassitude; cannot stand up, cannot move.
Universal distress.
Felt once or twice as if actually dying.
Faint feeling and trembling all day, with nausea.
Great prostration for several days.
Faintness.
Marked nervo-muscular excitement.

[37] **Sleep.** Sleeplessness.
Desire for rest and sleep.
Disturbed sleep; restless.

[38] **Time.** 3 or 4 A.M.: itching of r. side of neck; itching of r. thumb.
4 A.M: woke with burning stinging in cheek.
Morning: adhesion of eyelids.
8 or 9 A.M.: itching of r. thumb.
3 P.M.: itching of r. thumb.
Evening: rigors and febrile conditions.
Night: pain in eyeball and lids.

[39] **Temperature and Weather.** Cold water relieved burning for a time, it returned < than before.
Open air: lachrymation <.

[40] **Fever.** A chilly-cold sensation in a circle all around red middle of sting, soon followed by chill running all over him, in short intervals, like waves.
Quaked and trembled and teeth chattered as if he had a paroxysm of ague.
Complained much of sensation of heat and much irritation.
A lady was stung by a wasp on back of l. middle finger; pain extremely intense; in a few moments whole body tumefied, skin became red, and violent fever developed.

[42] **Locality and Direction.** Left: pain in ovarian region; pain in neck; pain in shoulder joint; swelling and redness of hand and arm; pain in middle finger; erythematous blush on body.
Right: vision dim; injected conjunctiva; itching of eyelid; eye inflamed; lower lid inflamed; l. lower half of eye a baggy swelling; lachrymation eyelids adhere; stitches in ear; itching of arm; glands in axilla swollen; itching of neck; itching of thumb.

[43] **Sensations.** As if a harpoon were sticking deep in and were drawn on; chilly-cold sensation around sting; as if

Digitized by Google

pierced with red-hot needles; patch of redness on cheek; as if about to suffocate; as if l. shoulder joint were sprained; as if a cutting instrument were piercing all joints, like an electric shock; as if dying.

Pain: in l. ovarian region; in l. stomach; in shoulder blade; in l. shoulder joint; in l. middle finger.

Lancinating: in wound.

Stitches: in r. ear.

Stinging: in wound.

Burning: like fire, in place stung; in wound; in tongue; in throat; r. side of neck; in r. thumb.

Aching: in tongue; in heart; r. side of neck.

Soreness: and smarting along course of lymphatics; along gums to tonsils; in shoulder blade.

Rheumatic pain: in l. instep.

Throbbing: in wound; in tongue.

Weight: in stomach.

Uneasiness: in bowels.

Heat: in throat.

Cold feeling: in stomach; around sting; like waves all over body.

Itching: of eyelids; in eyes; of r. lid; of r. arm; over whole body; of r. thumb.

"**Tissues.** Red lines showed the course of the absorbing vessels.

Rapid decomposition of body.

"**Skin.** Cheek much swollen and skin of bright-red tint; redness spread rapidly in all directions over head and down neck, shoulders, back and front of chest; wherever it traveled it was accompanied with pain and tenderness.

Hands, feet and chest becoming as red as if he had scarlet fever.

Erythematous blush on l. half of body, from head downward, lasted eight to ten days and desquamated; then rheumatic pain in l. instep lasting a week.

Prurigo-like, pinkish, lentil-shaped spots on hand and forehead, on neck and all over to feet.

Sting followed by a burning sensation as if something were sticking and drawing out; part stung was bright-red, elevated, with a hard swelling, redness surrounded by a circle of cold, chilly sensation, soon changing to general chill, repeated at short intervals that seemed to extend in waves all over body.

Intense itching of part (r. side of neck) every day about 3 or 4 A.M., lasting about half an hour, slightly > by vinegar applications (after third day); immediately after itching there was burning for half an hour.

Intense itching of part (r. thumb); it came on about 3 or

Google

4 A.M., about 8 or 9 A.M., and again 3 P.M.; it lasted half an hour each time and was immediately followed by burning for half an hour; itching > by application of salt and vinegar; this lasted four days; for next three days itching only came between 8 and 9 A.M. and was shorter and less severe.

Itching all over to a dreadful degree.

Subsequent desquamation of whole abdomen.

Was stung all over by wasps four or five years ago, followed by abscesses all over body, that caused great emaciation; every now and then gets seizures of prostration, with enuresis somni; heat especially overpowers him; purulent catarrh of middle ear of both sides.

An ulcer, lasting three months after sting.

[47] **Stages of Life, Constitution.** Æt. 16, scrofulous since birth, stung by a wasp, carious bones, severe rheumatism, suppurating in hands.

A pale, light-haired, worn-looking woman; swollen face.

Mrs. E., æt. 58; œdema of face, etc.

Man, æt. 66, suffering six days; ophthalmia.

[48] **Relations.** Antidoted by: *Apis*, salt water and vinegar.

Incompatible: *Argent. nitr.*

VIBURNUM OPULUS.

High Cranberry bush. *Caprifoliaceæ.*

This shrub, belonging to the honeysuckle family, grows from five to ten feet high, is common in Canada and the Northern and Western States, abundant in the Catskill and Allegheny Mountains. It flowers in June and July. The bright-red acid fruit is a substitute for cranberries. The Viburnum prunifolium (black haw) should not be confounded with it.

The tincture is prepared from the fresh bark.

Provings by H. C. Allen, assisted by eleven provers, male and female; Trans. Am. I. of Hom., 1881, p. 160.

The tincture and first and thirtieth dilutions were used.

[1] **Mind.** Depressed.
Unable to concentrate mind on usual mental labor.
Inability to study.
Stupid feeling, as if she could not tell where she was or what to do on awaking in morning.

[2] **Sensorium.** Vertigo: inclines to turn to l.; in rising, as if would fall forward; on closing eyes.

[3] **Inner Head.** Slight frontal headache in forenoon.
‖ Dull frontal headache.
Dull throbbing, frontal headache, extending to eyeballs, < by mental exertion, and > by moving about.
Dull, confusing frontal headache, extending to temporal regions, as after night watching, or loss of sleep, so severe as to compel cessation of mental exertion.
A severe frontal headache with occasional vertigo set in, continuing with severity for six or seven days, almost incapacitating for study, and accompanied by profuse and frequent urination.
Severe pain in l. parietal region; pain sharp and penetrates into brain, < by every cough, moving head and when bowels move.
Dull aching pain over l. eye.
Dull, heavy headache, mostly over eyes, < on l. side, at times extending to vertex and occiput (principally when delayed menses should appear), < by a sudden jar or bending over, false step and movement.
Dull supraorbital and frontal headache, with profuse flow of watery clear urine.
Severe pain in head just over eyes on opening them; soreness extending back into head.
Severe pressive pain in r. supraorbital region.
Severe l.-sided headache; eyes heavy; felt sick enough to go to bed.
Headache beginning about 3 P.M., < at night.
Dull, throbbing headache, continuing all evening, and so severe on retiring that she felt sick all over.
Every cough hurts head.

[5] **Sight and Eyes.** ‖ Amaurosis.
Heaviness over eyes and in balls, at times, must look twice to be sure of seeing an object.
Sore feeling in eyeballs; sharp jerking pains as from knife.
Eyes burn; can hardly see on account of profuse flow of tears.

Digitized by Google

[6] **Hearing and Ears.** Awakes during night with great pain in ears, ||deep in bone.

Sharp jerking pains in ears, as if stabbing with a sharp knife, lasting nearly an hour, with more or less severity.

||External ear sore as if bruised; could not lie on affected side (of head).

Would have to rub ear and seemed as if she would have to straighten it out; as if it were pinned to head; would lie on other side and be awakened with same feeling in that ear; compelled to change position many times during night in consequence.

[8] **Upper Face.** Face flushed and hot.

[11] **Taste and Tongue.** ||Tongue dry; broad and white, centre brown, takes print of teeth.

||Taste coppery; disagreeable.

[12] **Inner Mouth.** Lips and mouth dry.

[13] **Hiccough, Belching, Nausea and Vomiting.** ||Nausea and faintness; every little while, at noon, is obliged to lie down; > by eating, but felt immediately afterward.

||Constant nausea (no inclination to vomit), > by eating.

Deathly sick feeling at stomach, as if she could not live, every night, not > by any position.

When lying perfectly quiet had no unpleasant feeling, but as soon as she moved a ||deathly nausea at pit of stomach came on; every time she tried to get up she fainted.

[17] **Scrobiculum and Stomach.** Food lies heavily.

||A sensation of goneness, as if empty and had been for days.

Aching pain in stomach in afternoon, > by stretching body and throwing stomach forward.

||Dyspepsia with constipation and incontinence of urine.

[18] **Hypochondria.** Severe, sticking darting pain in l. hypochondrium, deep-seated as if in spleen, with a sensation as if some hot fluid were running through splenic vessels; > by walking about room.

Pain in l. lumbar and l. hypochondriac regions so intense as to produce faintness; although night was cool a warm perspiration broke out all over body, giving relief.

Violent throbbing in l. hypochondrium if he attempted to lie on l. side; could not lie on l. side.

Retired at 11 P.M., but was unable to remain in bed on account of severe throbbing pain under floating ribs of l. side, walked room until 3 A.M., pain > by pressure.

[19] **Abdomen.** Whole abdomen tender and sensitive to pressure, especially about umbilicus.

Rumbling, darting pains in bowels.

Cramping pains in lower abdomen as before catamenia, mostly or wholly at night.

Digitized by Google

‖She has cramping colic pains in lower abdomen almost unbearable, pains come suddenly and with terrible severity.

‖Cramplike colic pains in lower abdomen (during menstruation).

Severe, heavy, aching, bearing-down pain, accompanied by drawing pains in anterior muscles of thighs, and occasionally by sharp, shooting pains in ovarian regions.

Bearing-down pains in abdomen as during menstruation, with heavy aching pain over pubes.

[20] **Stool and Rectum.** Diarrhœa at menstrual period profuse, watery, four or five stools in an hour, accompanied by terrible chills, at same time cold sweat would roll off her forehead. (*Veratrum* relieved.)

‖Great inactivity of rectum; no inclination to stool.

‖Constipation: stool small, dry and composed of hard, round balls, evacuated with much effort; stool large, dry, painful and so difficult that mechanical assistance is needed; stool large, hard, and when passed attended with a ‖cutting sensation in rectum and anus; stool long, large, hard, and difficult to expel, having a desire to evacuate, but when attempted feels as if there were nothing there, and evacuation occurs slowly and only after long straining; urging to stool as if it would be dangerous to postpone, but stool was ‖large and difficult to pass; desire for stool, with much straining; stool hard, dry, with blood and ‖great soreness of anus.

During and immediately after stool, profuse hemorrhage of dark-red blood.

Stool scanty and hard, with hemorrhage; a sensation of constriction of rectum and anus.

Constipation, during entire proving, ‖with great tenesmus; when bowels moved a pain felt in l. orbital region.

[21] **Urinary Organs.** ‖Spasmodic dysuria in hysterical subjects.

‖Urine profuse and pale, specific gravity 1021.

Profuse, clear, watery, must be voided every hour or two; specific gravity 1019.

‖Profuse discharge of pale watery urine, repeated quite regularly every hour during afternoon and evening.

Profuse discharge of clear, watery urine for several days in succession; specific gravity low, but no morphological elements were found.

Profuse and frequent flow of clear, watery urine, accompanying frontal headache.

Following each act of urination was a sensation as if urine continued to flow.

During menses, obliged every hour or two to urinate,

Digitized by Google

passed at each time large ||quantities of clear, light-colored urine.

Male Sexual Organs. Seminal emissions without dreams.

Severe pain and swelling of epididymis and testicle of l. side.

Epididymis of r. side painful and swollen, was obliged to use a suspensory bandage. (*Aconite* relieved.)

Female Sexual Organs. |Before menses: severe bearing down; drawing in anterior muscles of thighs; heavy aching in sacral region and over pubes; occasional sharp, shooting pains in ovaries, pains make her so nervous she cannot sit still; excruciating cramping, colicky pains in lower abdomen, and through womb; pains begin in back and go around, ending in cramps in uterus.

|During menses: nausea; cramping pain and great nervous restlessness; flow ceases for several hours, then returns in clots.

|Menstrual flow scanty, thin, light-colored, with sensation of lightness of head, faint when trying to sit up; spasmodic or membranous dysmenorrhœa.

|Leucorrhœa thin, yellow-white or colorless, except with stool, when it is thick, white, blood-streaked.

||Neuralgic and spasmodic dysmenorrhœa.

Pain in back, loins and across lower abdomen, as if menses were coming on; < in early part of evening and in a close room; > in open air and by moving about.

|Pain beginning in back and going around to loins and across to pubic bone like labor pains.

||Excruciating colicky pain through womb and lower abdomen coming on quite suddenly, just preceding menstrual flow, sometimes lasting ten or twelve hours. θDysmenorrhœa.

||Cramping pains in lower abdomen as if menses were about to appear.

Menses delayed ten days.

Uneasy sensation in pelvic region and slight bearing-down pains continuing all week.

||Leucorrhœa thin, yellowish-white, for two days following menstruation.

|Irritable ovaries, with dysmenorrhœa.

|Cramplike pains and spasms of stomach, bowels, bladder or other organs when reflex from uterine irritation.

||Flushes of heat, pain in l. side, dizziness when stooping. θUterine affection.

||Painful menstruation and menorrhagia for six years; always discharged a large clot at each period, after which pain diminished; on being requested to wash

out the next clot, a perfect membrana decidualis was revealed. #Membranous dysmenorrhœa.

[21] **Pregnancy. Parturition. Lactation.** During pregnancy: cramps in abdomen and legs.

‖Threatened abortion; intense cramp in uterus and bearing down; or pain around from back, ending in excruciating cramps in lower abdomen.

‖Spasmodic pains, shooting from abdomen into legs; frequent and very early miscarriages, so that ovum is expelled at every menstrual period, thus causing sterility.

‖Threatened miscarriage with severe backache; severe cramping, bearing-down pains almost unbearable, causing constant restless moving about in bed; cannot sit or lie still, so severe are the pains.

Labor pains: false pains precede the real pains; cramps in abdomen, shooting down legs.

‖Cramps in abdomen and legs of pregnant women.

‖Will prevent miscarriage if given before the membranes are injured, and when the pains are spasmodic and threatening.

‖Mrs. R——, five months pregnant, while out driving received a severe strain from holding her frightened horse; three days after severe bearing-down pains began in abdomen and back, interspersed with colicky, crampy pains through abdomen from hip prominences downward toward vagina; irritable, would hardly answer questions, twisted about when pains came on, placing her fists under hips, and raising them from couch; complained of nausea and dizziness when rising from couch; twice within an hour felt preparatory symptoms of vomiting, which did not occur; face flushed (probably from straining), pupils dilated, warm perspiration on forehead; frontal headache; crampy pain down face of thighs, with heaviness of lower limbs; dizziness on attempting to rise; urging to urinate.

[27] **Cough.** Cough during second month of pregnancy; < night and morning, and on lying down; urine spurting out when coughing.

[28] **Inner Chest and Lungs.** Severe throbbing pain under l. floating ribs, > from hard pressure and walking; cannot lie on l. side.

Sharp shooting pains in l. chest over sixth rib near sternum.

[29] **Heart, Pulse and Circulation.** During proving an old heart trouble, an irregularity of pulse (remission every third beat), of which she had felt nothing for over six months, returned.

Felt as if her breath would leave her body, and her heart would cease beating (during severe menstrual pain).

Digitized by Google

[31] **Neck and Back.** A stiff, sore feeling in nape of neck.
Neck stiff for several days, with pain in occiput.
Muscles of back lame and bruised, as after severe physical exertion.
Tired, bruised pain in muscles of back extending from points of scapulæ to ilium on each side of spine, > by firm pressure.
Wandering, tired pains in muscles of back, < l. side.
Most intense pain in l. lumbar region between floating ribs and ilium; pressure > its intensity, but must keep continually moving.
Dull throbbing pain in l. lumbar region, < by lying down; was compelled to walk room with a walking-stick pressed across back to obtain relief.
Severe pain in back, region of kidney, > by pressure across back with arms crossed.

[32] **Upper Limbs.** Buzzing feeling in hands, as if they would burst.

[33] **Lower Limbs.** Cramps in feet after long walking.
Wandering, tired pains extending to hips and knees, with disinclination to move about.

[34] **Limbs in General.** ‖Cramps and contractions of extremities, especially during pregnancy.

[36] **Rest. Position. Motion.** Inability to lie on l. side.
Lying: on affected side ear <; quiet, nausea >; cough during pregnancy; pain in lumbar region <.
Stooping: dizziness.
Rising: fainting; nausea and dizziness.
Motion: frontal headache <; pain in l. parietal region <; nausea <; menstrual colic >; backache >.
Stretching body: > aching in stomach.
Straining at stool: headache <.
Walking: about, > pain in hypochondrium; long, cramps in feet.

[36] **Nerves.** ‖Paralytic conditions, coming on after convulsions.
‖Hysterical convulsions from uterine irritation.
‖General irritation of nervous system.
‖Cramps and contractions of extremities, especially during pregnancy.

[37] **Sleep.** Sleep restless, unrefreshing.
Sleepy after dinner.
Tired in morning on rising.

[38] **Time.** Morning: cough during pregnancy <; tired.
Noon: must lie down, nausea and faintness.
Afternoon: aching in stomach.
3 P.M.: headache begins.
Afternoon and evening: profuse urination.

Evening: throbbing headache; early, pain in back, loins and abdomen.
Night: headache <; awakes with pain in ears; deathly nausea; cramp in abdomen; cough during pregnancy <.
11 P.M. to 3 A.M.: pain in l. hypochondrium.

[39] **Temperature and Weather.** Close room: menstrual colic <.
Open air: menstrual colic >.

[40] **Fever.** Chill, followed by severe headache.

[41] **Attacks, Periodicity.** Suddenly: cramping colic.
For an hour: jerking pains in ears.
Every hour or two: profuse urination.
For ten or twelve hours: menstrual colic.
For several days: profuse urination; stiff neck.
For six or seven days: frontal headache.
All week: uneasy sensation in pelvic region.
For ten days: menses delayed.
Second month of pregnancy: cough.
For six years: painful menstruation.

[42] **Locality and Direction.** Left: inclination to turn, vertigo; pain in parietal region; dull aching over eye; pain in hypochondrium; throbbing under floating ribs; shooting pains in chest over sixth rib near sternum; pain in back <; muscles of entire side of body sore, as if bruised or strained by overlifting.
Right: pain above eye.

[43] **Sensations.** As if she could not tell where she was or what to do on awaking; as if stabbing with a sharp knife in eyes and ears; ear as if bruised; as if ear were pinned to head; as if she could not live, sick feeling at stomach; goneness, as if stomach were empty; as if a hot fluid were running through splenic vessels; as if urine continued to flow after urinating; as if menses were coming on; pain in back and across lower abdomen; as if breath would leave body and heart would cease beating; bruised feeling in back, as after severe physical exertion; buzzing in hands as if they would burst; l. side as if bruised or strained by overlifting.
Pain: in ears deep in bone; in l. lumbar and hypochondriac regions; produces faintness; in testicles; in occiput.
Excruciating pain: through womb and lower abdomen.
Intense pain: in l. lumbar region.
Severe pain: in l. parietal region penetrates into brain; over eyes on opening them.
Jerking: in eyeballs; in ears.
Cutting: in rectum and anus.
Darting: in l. hypochondrium; in bowels.
Stabbing: in eyes and ears.
Sticking: in spleen.

Digitized by Google

Shooting: in ovarian regions; in l. chest over sixth rib near sternum.
Burning: in eyes.
Aching: dull, over l. eye; in stomach; over pubes; in sacral region.
Bruised pain: in muscles of back.
Soreness: in eyeballs; in anus; in nape of neck.
Pressure: in r. supraorbital region.
Throbbing: headache; in l. hypochondrium; in l. lumbar region.
Drawing: in anterior muscles of thighs.
Cramp: in lower abdomen; through womb; in extremities during pregnancy.
Constriction: of rectum and anus.
Bearing down: in lower abdomen; before menses.
Uneasy sensation: in pelvic region.
Stiffness: in nape of neck.
Heaviness: over eyes and in balls.
Dryness: in lips and mouth.

[44] **Tissues.** Amenorrhœa.
Dysmenorrhœa, spasmodic or membranous.

[45] **Touch. Passive Motion. Injuries.** A sudden jar: headache <.
Pressure: > pain in l. hypochondrium; backache >.

[47] **Stages of Life, Constitution.** Tall, slender, dark- or fair-haired hysterical subjects.
Girl, æt. 16, suffering four years; dysmenorrhœa.
Girl, æt. 17, slender, dark hair and eyes, thin, fair skin, suffering since first menstruation, two years previous; dysmenorrhœa.
Girl, æt. 20, servant, large, florid; dysmenorrhœa.
Mrs. ——, æt. 24, two months pregnant; cough.
Mrs. ——, æt. 25, short, heavy set, light hair and eyes, thick, white skin, suffering since girlhood; dysmenorrhœa.
Mrs. B., æt. 26, tall, slender, eyes and hair black, mother of one child, one miscarriage at six months; dysmenorrhœa.
Miss ——, æt. 27, suffering six years; membranous dysmenorrhœa.
Miss B. L., æt. 28, dark complexion, brown hair and eyes, heavy, languid manner, complaining and anxious; dysmenorrhœa.
Mrs. McK., æt. 30, dark hair and eyes, divorced; dysmenorrhœa for about six years.
Mrs. ——, æt. 35, tall, large frame, dark hair, eyes and skin, scrofulous; dysmenorrhœa.
Mrs. H. T., æt. 38, mother of several children; violent after-pains.

Digitized by Google

Mrs. D., married fourteen years, never pregnant, dark hair and eyes, sallow complexion, subject to eczema; dysmenorrhœa since she began to menstruate.

[48] **Relations.** Antidoted by: *Acon.* (epididymitis), *Veratr.* (diarrhœa).

Compare: *Act. rac.* (nervous, rheumatic diathesis), *Caulophl.* (cramplike abdominal pains and menstrual symptoms).

VINCA MINOR.

Lesser Periwinkle. *Asclepiadaceæ.*

A native of Europe, found in shaded woods; cultivated in gardens, flowers in April and May.

The tincture is prepared from the fresh plant.

Proved by Rosenburg, A. H. Z., vol. 17, p. 41.

CLINICAL AUTHORITIES.—*Eruption on head*, Schüler, Rück. Kl. Erf., vol. 4, p. 268.

[1] **Mind.** Lachrymose.

Sadness, with fear of death.

Peevish and quarrelsome, soon followed by repentance.

[2] **Sensorium.** Whirling vertigo with flickering before eyes.

[3] **Inner Head.** Headache.

Pressure in temples.

Sticking in l. temple extending toward malar bone.

Tearing pain in vertex, with a feeling as if a hammer were beating from within outward.

Dulness of sinciput, with slow pressure toward eyes and dimness of eyes, < by stooping when writing.

[4] **Outer Head.** Pressure upon head externally.

[5]Spots on scalp, oozing moisture, matting hair together; hair falls out on single spots, and white hair grows on it. θCrusta lactea. θFavus. θPlica polonica.

Corrosive itching on scalp, with irresistible desire to scratch.

Itching biting on scalp, especially on vertex, frequently provoking scratching.

Humid eruptions on head, with vermin, nightly itching, burning after scratching.

Bald spots, covered with short woolly hair.

Google

[11] Chronic, moist, offensive-smelling eruption on head, face, and behind ears.

[5] **Sight and Eyes.** Obscuration of vision, like fog before eye, while reading, at times also when walking.

So little secretion in eye that on getting snuff into it he was obliged to wash it out with water.

Itching and burning of lids which become red.

[6] **Hearing and Ears.** Ringing and whistling in ears, with a feeling of cold wind, especially in l. ear.

[7] **Smell and Nose.** Frequent nosebleed.

Itching in nose.

Distressing dryness and heat in nose, extending into frontal sinuses.

Stoppage of nose, mostly of one nostril, with discharge of much mucus through posterior nares.

Tip of nose becomes red on getting least angry.

Moist eruption on septum of nose, discharging a moisture which, drying, formed a light-brown scab; skin was dirty white, elevated, with red areola.

[8] **Upper Face.** Paleness of face.

Tearing in malar bones.

Swelling of face with papular eruptions.

[9] **Lower Face.** Lips dry.

Swelling of upper lip and corner of mouth.

Itching of upper lip, which provokes scratching.

[11] **Taste and Tongue.** Insipid taste: in mouth; to all food.

[12] **Inner Mouth.** Toothache; tearing in teeth > by warmth of bed.

Increased secretion of saliva.

Aphthæ in mouth.

[13] **Throat.** Frequent hawking through day.

Sensation as if something were sticking low down in œsophagus, which provokes swallowing.

Sore throat with difficulty in swallowing.

Ulcers in throat.

[14] **Appetite, Thirst. Desires, Aversions.** Hunger, with loss of appetite before hunger has been satisfied.

Scarcely any thirst.

[16] **Hiccough, Belching, Nausea and Vomiting.** Empty eructations after drinking beer, and generally < from taking liquids.

Nausea after coffee.

Violent, bitter, copious vomiting of yellowish-green liquid.

[17] **Scrobiculum and Stomach.** Sensation of emptiness in stomach.

Gastric disturbances.

[19] **Abdomen.** Griping in abdomen.

Rumbling and gurgling in abdomen, with emission of much offensive flatus.

Google

Abdomen full, tense, but painless.
Distension of abdomen after stool.
[20] **Stool and Rectum.** Flatulence.
Urging to stool.
Stool first hard, then soft.
Stool exhausting, with burning in anus.
[21] **Urinary Organs.** Diminished secretion of urine.
Urine pale yellow.
[23] **Female Sexual Organs.** ‖Excessive, profuse menses, flowing like a stream, with great debility.
‖Passive uterine hemorrhage from fibroid tumors.
‖Passive uterine hemorrhage in women long past their climacteric period.
[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness.
Tenacious mucus in trachea.
[26] **Respiration.** Rapid respiration.
[27] **Cough.** Spasmodic cough, with little tickling in larynx.
[28] **Inner Chest and Lungs.** Pains in chest, with sticking and dyspnœa.
[29] **Heart, Pulse and Circulation.** Pulse full and hard.
[30] **Outer Chest.** Stitches in sternum.
Pressure in sternum, with feeling of emptiness in chest.
[31] **Neck and Back.** Painful tension and stiffness of cervical muscles, with a sensation as if a weight were lying upon them.
[32] **Upper Limbs.** Cramplike drawing in upper arm and tips of fingers.
Swelling and stiffness of first joints of fingers, with burning pain in nails.
[33] **Lower Limbs.** Cramplike drawing in feet and toes.
[34] **Limbs in General.** Inclination to stretch limbs.
Tearing pains in limbs.
Arthritic tearing in bones.
[35] **Rest. Position. Motion.** Stooping: pressure in head.
Walking: fog before eye.
[36] **Nerves.** Great weakness and prostration.
Weakness as if he would die.
Tremulous feeling, especially in upper extremities, with tendency to start, especially on exerting mind.
Tremulous feeling in bloodvessels.
[37] **Sleep.** Frequent yawning.
Sleeplessness and restlessness at night.
Lascivious dreams.
[38] **Time.** Night: sleeplessness; restlessness.
[39] **Temperature and Weather.** Most of symptoms > by moving in open air.
Warmth: toothache >.
[40] **Fever.** Sudden paroxysms of shivering.

Digitized by Google

Great sensation of warmth in scalp, with prickling.
Heat: of cheeks without redness; with full, hard pulse.

[43] **Locality and Direction.** Left: sticking in temple; a feeling of cold wind in ears; ulcers on nates.
Right: moist spots on ankle.

[45] **Sensations.** As if a hammer were beating from within outward in vertex; a feeling of cold wind in ears; as if something were sticking low down in œsophagus; as if a weight were lying upon cervical muscles; as if he would die from weakness.
Stitches: in sternum.
Sticking: in l. temple to malar bone; in chest.
Prickling: in scalp.
Tearing: in vertex; in malar bones; in teeth; in limbs; in bones.
Burning: of lids; in anus; in fingers; in ulcers on l. natis.
Biting: on scalp.
Pressure: in temples; toward eye in sinciput; upon head externally; in sternum.
Griping: in abdomen.
Cramp: in upper arm and tips of fingers; in feet and toes.
Tension: and stiffness of cervical muscles.
Tremulous feeling: in upper extremities; in bloodvessels.
Emptiness: in stomach; in chest.
Heat: in scalp; of cheeks.
Tickling: in larynx.
Itching: on scalp; of lids; in nose; of upper lip; corrosive, of skin; in moist spots on upper part of r. ankle.
Dryness: in nose.

[46] **Tissues.** Passive uterine hemorrhages.
Arthritic tearing in bones.

[46] **Skin.** Corrosive itching provoking scratching.
Great sensitiveness of skin, with redness and soreness, even from slight rubbing.
Itching moist spots on upper part of r. ankle.
Burning in ulcers, like bedsores, on l. natis.

[47] **Stages of Life, Constitution.** Child, æt. 6; eruption on head.

[48] **Relations.** Compare: *Oleander*, *Viola tri.*, *Arctium lappa* and *Staphis.* in eruptions; *Cinchon.* and *Secale* in hemorrhages.

Google

VIOLA ODORATA.

Sweet-scented Violet. *Violaceæ.*

The tincture is prepared from the fresh plant in flower.
Introduced by Wm. Gross.
Provings by Gross, Hahnemann and Stapf, Archiv für Hom., vol. 8, p. 182.

CLINICAL AUTHORITIES.—*Rheumatism*, Kitchen, Phila. Jour. Hom., vol. 1, p. 49; B. J. H., vol. 24, p. 314; *Hysteria*, P. Pop. Hom. Zeitschr., vol. 13.

[1] **Mind.** Very great intellectual and emotional activity, with constant weak memory, followed by headache.

Weakness of memory; or increased mental activity, easy comprehension; intellect predominates over emotions.

Momentary vanishing of thought.

Weakness of memory; when he reaches a period in reading, he has already forgotten beginning of sentence.

Confusion of thought; when he attempted to express his thoughts in words, they immediately disappeared, and strange thoughts took their place; he could not recall former.

He seems able to recognize but half an idea; he puts it in proper place but cannot hold it; he makes great effort to grasp the other half, but at same moment half of another incomplete idea presses upon him, and so on; thoughts chase one another, but he always has but half a thought which he cannot hold to and cannot think out; judgment remains, he recognizes morbid fancies, but cannot prevent them; he looks like one meditating and despondent.

Disconnected thoughts thronged one upon the other, he was able to grasp none of them; his judgment remained good because he knew how little he would be understood if he expressed his thoughts; on this account he kept quiet, yet for most part was unable to express his phantasies even by a word.

[1] Hysterical; inclined to weep without knowing why.

Sadness turning to gloomy despondency; hypochondriacal mood.

Aversion to all music, especially violin.

Aversion to talking.

Very restless, talking much. θMeasles.

[1] Insane confusion, childish behavior, disobedience, refusing nourishment, talks in a low, soft voice.

Google

[3] **Sensorium.** Vertigo: while sitting; everything in head seems to whirl around.

[3] **Inner Head.** Dull, confused headache.

‖A prickling in forehead from rush of blood.

‖Heaviness of whole head, it sinks forward, cervical muscles seem very weak.

Headache, with cramp in one eye, with vision of a fiery tremulous half-circle.

[4] **Outer Head.** Drawing in l. frontal eminence.

Head feels heavy and sinks forward.

Tension in scalp extending to upper part of face.

Tension of scalp of occiput even when not moving, though < on bending head forward and backward; a painful sensation which compels him to wrinkle frontal muscles.

[5] **Sight and Eyes.** ‖Toward evening a feeling of dryness and burning in lids; sensitiveness to light; painful forcible drawing together of lids as from irresistible sleep.

Sharp vision, ease in looking.

Contours of letters are not sharply defined while reading, they seem to run together.

Is obliged to hold objects somewhat nearer than usual in order to see distinctly.

It seems thick before eyes and everything seems dim.

Illusion of vision; at point to which he looks he seems to see a half point which then becomes a tremulous light, constantly more fiery, at last looks like a half circle, and a zigzag fiery appearance following a serpentine course which at last becomes weaker and gradually disappears; white of eye looks red.

Pupils contracted.

It seems to him as if each eyeball were compressed from both sides.

Heat and burning in eyes.

Burning pain in l. eye.

Cramplike spasms in eyelids, extending to malar region, especially of l. side.

Heaviness of lids, as from sleepiness.

Tendency of lids to close without physical sleepiness.

Tension beneath eyes.

[6] **Hearing and Ears.** Rushing and ringing in ears.

Aversion to music, especially to violin; < from music.

Stitches in and around ears.

Drawing and tension in l. ear, rather externally.

Sticking from within outward in l. ear.

Deep, transient stitches alternately beneath one or other ear, especially left.

Pressing pain behind l. ear, externally.

Google

[7] **Smell and Nose.** Numbness of tip of nose, as if it had been beaten and blood were pressing out.

[8] **Upper Face.** Hot forehead.

Tension below eyes and above nose to temples.

‖Tension in scalp, which at times extends to upper half of face, especially of nose, then to forehead and temples, as far as ears, alternating with a similar sensation in occiput and cervical muscles.

Pressure on malar bone.

Violent drawing pressure from malar bone to temple.

[9] **Lower Face.** Tearing pain in l. lower jaw extending to ear.

[10] **Teeth and Gums.** Tearing in teeth of r. lower jaw.

[11] **Inner Mouth.** A sensation in hard palate as if it were completely dried up.

Aphthæ of infants.

[19] **Abdomen.** Distension of abdomen.

[20] **Stool and Rectum.** Helminthiasis.

Constipation.

Itching of anus, every afternoon.

[23] **Male Sexual Organs.** Extremely unusual nocturnal emission, which does him no good, followed by headache.

[24] **Pregnancy. Parturition. Lactation.** During pregnancy, dyspnœa.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness, followed by coryza.

[26] **Respiration.** Short breath.

‖Difficulty of breathing, with painful exhalation, anxiety and palpitation.

Dyspnœa, with occasional cough; < in daytime than at night. θPregnancy.

Shortness of breathing and violent dyspnœa, as if a stone were lying on chest.

Soft, noiseless breathing, respiration is scarcely noticed.

[27] **Cough.** By day chiefly, in long-lasting spells, dry, short, violent, with much dyspnœa.

Whooping cough in nervous, thin little girls.

Sputum profuse, clear, ropy, jellylike.

[28] **Inner Chest and Lungs.** Oppression of chest as from a weight, awakening her at night. θHysteria.

Frightful oppression of chest and dyspnœa, with pain in chest as from a stone lying upon it.

[31] **Neck and Back.** Jerking drawing in cervical muscles near nape of neck, extending downward, in evening, while lying on opposite side.

[32] **Upper Limbs.** Slight trembling of arms; dyspnœa.

‖Rheumatic affections of upper limbs.

‖Aching in wrists, particularly right.

Drawing in elbow joint and in dorsum of hand.

Google

‖Rheumatism of deltoid muscle for nearly two weeks; wrist and hand of same side also affected.
Drawing pain in r. elbow.
‖Pressing pain in r. wrist.
Drawing pain in back of l. metacarpus, extending toward wrist
Cramplike pain in first joint of l. index finger, even during rest.
Sticking in tip of middle finger.
Man, æt. 31, rheumatism of joints of r. hand; robust, slightly lymphatic, not scrofulous; swelling of r. wrist, also hand and fingers of same side, with intense heat in these parts; acute pains; motion impossible, hand being half flexed on forearm; slight pains and swelling in l. wrist; sleeplessness; temperature of skin greatly elevated with some acceleration of pulse; sounds of heart normal.
‖Rheumatism affecting r. carpal and metacarpal joints.

[33] **Lower Limbs.** Œdematous swelling of lower limbs, with stitching pains.

[34] **Limbs in General.** ‖Rheumatism of r. side; upper and lower extremities; lancinating pains in joints of fingers of r. hand: r. wrist joint painful, swollen, stiff and cannot be moved without great pain; r. shoulder slightly painful, but no swelling; r. foot and ankle joints painful, swollen, least motion painful, almost impossible; r. knee joint swollen and painful; wandering pains, occasionally in r. side of head; no fever; heart normal; slightly emaciated; motion of r. side almost impossible.
‖Trembling of limbs.
Bruised pain in all bones in morning, in bed, after waking, disappears after rising.

[35] **Rest. Position. Motion.** Lies on back during sleep, l. hand above head, knees bent.
Bending head forward and backward: tension in scalp <.

[36] **Nerves.** Trembling of limbs.
Relaxation of all muscles.
Great nervous debility.
Hypochondriasis.
Hysteria; much weeping without knowing why; difficulty of breathing; anxiety and palpitation.

[37] **Sleep.** Yawning: and stretching without sleepiness; every morning so that eyes fill with water.
‖Sleepiness in eyes and lids, they will close.
He lies on back at night during sleep with l. hand above head contrary to habit, and with knees bent and lying far to side.

[38] **Time.** Morning: bruised pain in bones on awaking; yawning.

Google

Daytime: dyspnœa and cough <.
Toward evening; dryness and burning in lids.
Evening: pain in cervical muscles.

[39] **Temperature and Weather.** After staying in a cold room during Fall season: hoarseness.

[40] **Fever.** Forehead hot.
Chilly disposition.
Febrile shivering.
Night sweats.

[41] **Attacks, Periodicity.** Every afternoon: itching of anus.

[42] **Locality and Direction.** Left: drawing in frontal eminence; burning in eye; cramp in eyelids to malar region; drawing and tension in ear; sticking from within outward in ear; pressing pain behind ear; tearing in lower jaw to ear; drawing pain in back of hand toward wrist; cramplike pain in index finger.
Right: tearing in teeth of lower jaw; drawing in elbow; pressing pain in wrist; rheumatism of wrist; rheumatism <.

[43] **Sensations.** As if everything in head whirled around; as if eyeballs were compressed; as if nose had been beaten and blood were pressing out; as if hard palate were dried up; as if a stone were lying on chest; burning like a small transient flame in spots here and there.
Lancinating: in joints of fingers of r. hand.
Stitches: in and about ears; in swelling of lower lids.
Sticking: from within outward in l. ear; in tip of middle finger.
Prickling: in forehead.
Jerking: in cervical muscles.
Tearing: in l. lower jaw to ear; in teeth of r. lower jaw.
Aching: in wrists.
Pressure: behind l. ear; in malar bone; in r. wrist.
Burning: in lids; in eyes; transient, in various places.
Drawing: in l. frontal eminence; in l. ear; from malar bone to temple; in cervical muscles; in elbow joint and dorsum of hand; in r. elbow; on back of l. metacarpus toward wrist.
Bruised pain: in bones.
Cramp: in eye, with headache; in eyelids; in first joint of l. index finger.
Tension: in scalp; beneath eyes; in l. ear.
Heaviness: in head; of lids.
Numbness: of tip of nose.
Heat: in eyes.
Itching: of anus.
Dryness: in lids.

[44] **Skin.** Dry, warm skin, want of sweat; only palms moist; measles running an irregular course.

Digitized by Google

Transient burning here and there on body; seems concentrated in a small spot, like a small transient flame, while sitting during day, as well as while lying at night.

[47] **Stages of Life, Constitution.** Hysteria.

Tall, thin, nervous girls; mild, impressive, of fair complexion; tuberculous.

Boy, æt. 19; rheumatism.

Woman, æt. 29, robust; rheumatism.

Man, æt. 31, robust, slightly lymphatic; rheumatism.

Man, æt. 61; rheumatism.

Mrs. ——, æt. 70; rheumatism.

[48] **Relations.** Compatible: *Corall.* in whooping cough; *Cina* in helminthiasis.

VIOLA TRICOLOR (See Jacea).

XANTHOXYLUM.

Prickly Ash. *Rutaceæ.*

A shrub from five to ten feet in height, growing in woods and moist, shady places throughout the Northern, Middle and Western States.

The tincture is prepared from the fresh bark.

Proved by Cullis, Pub. Mass. Hom. Soc., vol. 2, 1861–6, p. 267.

Clinical Authorities.—*Dysmenorrhœa*, Burck, Org., vol. 1, p. 484; Woodvine, N. E. M. G., vol. 8, p. 22; Frantz, Hah. Mo., vol. 12, p. 382; *Amenorrhœa*, N. N., Anal. Therap., vol. 1, p. 129; Williams, U. S. M. & S. J., Oct., 1871; Davis, M. I., vol. 11, p. 584; *Incipient phthisis*, Conant, Org., vol. 1, p. 324; *Cough*, Davis, M. I., vol. 11, p. 584.

[1] **Mind.** Nervous, frightened feeling.
Depression and weakness.
Indifference and malaise.

[2] **Inner Head.** Pain over eyes, with throbbing above root of nose.
Head dull and aching.
Frontal headache.
Severe frontal headache with dizziness.
A dull headache, in a space not larger than half a dollar, over nose.
Diffused pain in upper part of forehead; < in r. side; pain extends to base of brain, with soreness.
Throbbing headache over r. eye, with nausea.
Darting pain in l. temple, recurring again and again.
A tightening of scalp and heavy pain in temples; increase of head difficulties with a great heat and quiet flowing (menstrual), being two days in advance of proper time; some headache.
Pain in l. side of head and l. elbow.
Heavy feeling in top of head.
About upper part of cranium, an achy feeling accompanied by flashes of throblike pain, as if top of head were about to be taken off.
Pain in back of head, also a bewildered sensation.
| |Head feels full.
Pressure in head, with fulness of veins.
Tightness of head, with pain increasing over eyes.
Headache, with sleepy feeling in morning.
Shaking head produces a feeling of looseness or quivering of brain, followed by dizziness.
| |As if head were surrounded by a tight band. θDysmenorrhœa.

[5] **Sight and Eyes.** Watering of eyes and nose.
Lachrymation, pain in lid of r. eye.
Dull, heavy, grinding pain in l. eye.
| |Ophthalmia.

[6] **Hearing and Ears.** Ringing in ears, more particularly in r.
Dull pain in r. ear seeming to affect jaw socket; does not know whether his tooth or his ear aches.
Darting pain under and back of r. ear.

[7] **Smell and Nose.** Right nostril seems filled up; discharge of dry and bloody scales of mucus.
Dryness of both nostrils.
Discharge of mucus from nose, with congested feeling, as if it were about to bleed.
Fluent coryza.

[8] **Upper Face.** Pain in r. jaw-socket.

[9] **Lower Face.** | |Dull pain in l. side of lower jaw.

Google

[11] **Taste and Tongue.** Ptyalism; tongue coated yellow.
[12] **Inner Mouth.** Peppery taste in mouth, fauces and throat.
Burning and dry feeling in mouth and tongue.
[13] **Throat.** Peppery sensation; soreness, with expectoration of tough mucus.
Feeling of a bunch in l. side of throat when swallowing, shifting to right.
Pain and soreness in r. side of throat.
Throbbing in throat, and sensation of swelling.
A feeling of enlargement of throat.
[14] **Appetite, Thirst. Desires, Aversions.** No appetite.
[15] **Eating and Drinking.** Anorexia, could eat but a few mouthfuls at breakfast, and could only drink half a cup of coffee, which was vomited soon afterward.
[16] **Hiccough, Belching, Nausea and Vomiting.** Empty eructations, with slight taste of ingesta.
Nausea, with headache.
Slight nausea, with sense of oppression at stomach; nausea increased, accompanied by frequent chills.
[17] **Scrobiculum and Stomach.** Feeling of fulness or pressure in epigastrium; fluttering.
[18] **Hypochondria.** Some pain in r. side below ribs.
[19] **Abdomen.** Colic pain in r. iliac region.
Rumbling, with soreness on pressure.
Flatulence.
Soon after waking, at 7 A.M., severe griping abdominal pains, with thin, brown, diarrhœic discharge, mixed with some mucus.
Griping pain, on waking, in morning, continued at intervals through day, with general feeling of indifference and malaise.
[20] **Stool and Rectum.** Constipation in morning.
Griping pains 7 A.M., with thin, brown stools, mixed with mucus.
‖ Epidemic dysentery, characterized by spasmodic tenesmus, intestinal spasms, tympanitis, etc.
Inodorous discharges, with tenesmus.
‖ Cholera, in stage of collapse.
[21] **Urinary Organs.** Urine at night and next morning, scanty and high-colored.
Profuse, light-colored urine; nervous women.
[22] **Female Sexual Organs.** ‖ Ovarian pain: with scanty and retarded menses; extending down genito-crural nerves; and sacral pains during pregnancy.
‖ Menses appeared one week before usual time; attended with a good deal of pain.
‖ Dysmenorrhœa: with agonizing pains, driving patient almost distracted; neuralgic pain runs along course of

genito-crural nerve; in women of spare habit and of a delicate, nervous temperament; with headache, especially over l. eye, commencing day before menses; fulness in head; eyes congested, with photophobia; face flushed and feverish; agonizing bearing down; abundant discharge; excruciating pain in loins and lower abdomen.

‖Menstrual flow: too early and profuse; pains down thighs; scanty and retarded.

‖Constant headache, < during menses, at which time she also suffered agonizing pains in pelvic region.

‖Severe headache, generally over l. eye, commencing day before menses; sense of fulness in head, with feeling as if surrounded by a tight band; eyes congested, great photophobia; noises aggravate symptoms; face flushed and feverish; constant agonizing bearing-down in abdomen as if everything were being forced out; pain in back as if broken; pain starting at iliac crest and shooting down limbs to knees; screams out in agony; no relief in any position; discharge very scanty, thick, almost black, in strings and clots, intermitting every other day, and lasting two weeks; perfectly well between periods. θDysmenorrhœa.

‖Amenorrhœa for five months; face and legs œdematous; very nervous, sensitive to least noise, hysterical mood; voice tremulous; fears she is going to die; general chlorotic appearance, constipation, scanty frequent and dark urine.

‖Amenorrhœa for five months, with severe pains in r. ovary; constant headache; bearing down and tension in hypogastric region.

‖Amenorrhœa from getting feet wet; lasting six months; emaciation with cough; dirty-grey expectoration; pale face, night sweats.

‖Miss ——, æt. 19, four months ago took cold by getting her feet wet; no menses since; no appetite; the sight of food almost nauseates, smallest amount distresses; cannot sleep; bowels constipated, bloated; urine scant and high-colored; nervous; discouraged, don't care whether she lives or dies; limbs below knees bloated; shortness of breath; cheeks colorless. θAmenorrhœa.

‖Great increase of leucorrhœa during the time when menses should appear.

[31] **Pregnancy. Parturition. Lactation.** ‖After pains.

‖Profuse lochia.

[35] **Voice and Larynx. Trachea and Bronchia.** Hoarseness, with husky feeling in throat; obliged to clear throat frequently.

‖Aphonia from cold or general debility.

[26] **Respiration.** Shortness of breath.
Constant desire to take a long breath.

[27] **Cough.** Slight hacking cough.
‖Dry cough night and day, from sheer exhaustion could scarcely turn herself in bed; face pale, bloated; dark rings about eyes; head full and heavy; lips colorless; tongue pale and flabby; shortness of breath; no appetite; bowels constipated; urine light-colored, alkaline, sp. gr. 1025; fluttering in stomach, pain in l. side; limbs weak and bloated.

[28] **Inner Chest and Lungs.** Tightening about chest, with inclination to gape.
Tightness of chest, difficulty to inflate chest.
Pain in l. side, under fourth rib.
Sharp pains in r. side, of a neuralgic character.
Oppression of chest, with a desire to take deep inspiration.
Sharp shooting pains in r. side (like pleurisy pains), occasionally extending through to shoulder blade; continual desire to take a long breath.
‖Menses irregular and scanty; tight, dry cough, which hurts chest and shoulders; bowels almost constantly loose; profuse night sweats; is getting very much wasted and weakened; frequent violent headache, affecting whole head, and sometimes accompanied by vomiting; feet and ankles œdematous; bubbly mucous râles, especially distinct in apex of l. lung; whole appearance bloodless and miserable; family history of phthisis; thinks she is "going into a decline."

[31] **Neck and Back.** Slight pain in l. side and under l. shoulder blade, also in l. hip.

[32] **Upper Limbs.** Pain in r. shoulder and arm.
‖Pain and pricking feeling in r. arm, extending to third finger.
‖Pricking and throbbing sensation in l. arm and fingers.
Severe pain in r. arm, commencing just above bend of elbow.
Whole l. arm and shoulder numb.
Pain in l. elbow and l. side of head.
Dull pain in l. elbow, passing to palm of hand, then to shoulder.
Pain in both elbows.
Severe pain in wrist, extending to thumb.
A flash of pain in r. thumb, extending to hand.

[33] **Lower Limbs.** ‖Severe neuralgic pains in course of genito-crural nerves. θDysmenorrhœa.
Excessive weakness of lower limbs. θChlorosis.
Pain in l. leg, between hip and knee.
Weakness in lower limbs, with pain in knees; pain of extremities increased, accompanied by frequent chills.

Digitized by Google

Legs and feet feel tired.
Pain in l. knee very severe; pain has lasted, without cessation, a little more than half an hour.
Dull pain in r. knee.
A flash of pain in calf of r. leg.
Pain in ankle.
Pain in l. heel.
Pain in both feet, shooting up to knees.

[34] **Limbs in General.** Pain in limbs, neuralgic, shooting; numbness and weakness.
Dull pain in l. knee; also in l. elbow, extending to hand, then in l. side and top of l. foot.

[36] **Nerves.** ‖ Paralysis of single members.
‖ Hemiplegia (after *Nux vom.* failed).
Pricking sensation, shocks as from electricity.
Numbness, < on l. side.

[37] **Sleep.** Continued gaping; drowsiness.
Slept hard and heavy; dreamed of flying about over tops of houses.
Awoke in morning, languid and depressed.

[38] **Time.** Morning: headache, with sleepy feeling; griping pain on waking; languid and depressed.
7 A.M.: griping pains in abdomen.
Night and day: dry cough.

[39] **Temperature and Weather.** Getting feet wet: amenorrhœa.

[40] **Fever.** Sense of heat all over veins, with a desire to be bled; flash of heat from head to foot.
Frequent chills, with pains in extremities; nausea.
‖ Typhoid fever, in stage of collapse.

[41] **Attacks, Periodicity.** Intermittent: darting in l. temple.
At intervals: griping pain.

[42] **Locality and Direction.** A feeling of numbness through whole of l. side of body from head to foot, the division made perceptible in head, affecting half of nose; this feeling lasted two or three minutes.
Left: darting in temple; pain in head and elbow; pain in eye; pain in lower jaw; headache over eye; pain under fourth rib; pain under shoulder blade; pain in hip; pricking and throbbing in arm and fingers; arm and shoulder numb; pain in thigh; pain in knee; pain in heel; pain in top of foot; numbness <.
Right: pain in forehead <; throbbing over eye; pain in eyelid; ringing in ear <; dull pain in ear and jaw-socket; darting under and back of ear; pain and soreness in throat; pain below ribs; neuralgic pain in side; pain in shoulder and arm; pricking in arm; flash of pain in thumb; pain in knee; pain in calf.
Left to r.: feeling of a bunch in throat.

Digitized by Google

"**Sensations.** As if top of head would be taken off by flashes of throblike pain; as if bewildered, with pain in back of head; a feeling of looseness or quivering of brain; as of pepper in mouth and throat; as of a bunch in throat; as if throat were swollen and enlarged; as if head were surrounded by a tight band; as if legs and feet were tired; pricking as from electric shocks.

Pain: over eyes; in l. side of head; in back of head; in lid of r. eye; in r. jaw-socket; in r. side of throat; in r. side below ribs; in l. side under shoulder blade and in hip; in r. shoulder and arm; in r. arm to third finger; in l. elbow; in elbows; in l. leg between hip and knee; in knees; in ankle and l. heel.

Agonizing pain: dysmenorrhœa.

Excruciating pain: in loins and lower abdomen.

Severe pain: in r. ovary; in r. arm above bend of elbow; in wrist to thumb.

Dull, heavy, grinding pain: in l. eye.

Shooting: like pleurisy, in r. side; from feet to knees; in limbs.

Pricking: in r. arm to third finger; in l. arm and fingers.

Darting: in l. temple; under and back of r. ear.

Neuralgic pain: along course of genito-crural nerve; in r. side; in limbs.

Colic pain: in r. iliac region; after waking.

Throbbing: above root of nose; over r. eye; in vertex; in throat.

Burning: in mouth and tongue.

Soreness: in r. side of throat.

Dull pain: in r. ear and jaw-socket; in l. side of lower jaw; in l. elbow to palm of hand, then to shoulder; in r. knee; in l. knee; in top of l. foot.

Pressure: in head; in epigastrium.

Tension: in hypogastric region; about chest.

Tightness: of head.

Fulness: in head; in veins; in epigastrium.

Heaviness: in top of head.

Heat: in veins; in flashes from head to foot.

Dryness: of nostrils; in mouth.

Numbness: in l. arm and shoulder; in limbs; of l. side.

"**Tissues.** Acts upon nervous system, mostly upon sensory nerves, but causes a marked depression of vitality, a non-reactive state; hence its use in chlorosis, measles, neuralgia, etc., when there is sensorial and bodily depression.

Mucous membrane smarts as from pepper.

Old and indolent ulcers.

Dysmenorrhœa.

Digitized by Google

[46] **Skin.** Measles, dulness, bewilderment, drowsiness, want of sufficient development of the eruption.

[47] **Stages of Life, Constitution.** Spare habit, nervous temperament, delicate organization.

Girl, æt. 16, suffering four years; dysmenorrhœa.

Girl, æt. 17, family history of phthisis; incipient phthisis.

Girl, æt. 20, well developed and healthy-looking, nervous temperament; dysmenorrhœa.

[48] **Relations.** Compare: *Act. rac.* (headache), *Bryon.* (lack of eruption in measles, etc.), *Colocyn.* (dysmenorrhœa with reflex neuralgias), *Gnaphal.* (sciatica).

ZINCUM.

Zinc. *The element.*

Mind. Unconscious; signs of effusion into brain; feet constantly moving; often from undeveloped eruptions.

Weak memory, with stinging pains in head.

Great forgetfulness; forgetful of what has been accomplished during day.

Mental operations very difficult; difficult to grasp ideas and to co-ordinate thoughts.

Repeats all questions before answering them.

Loss of thought and a soporous condition of mind.

Stares as if frightened on waking, head rolls from side to side.

Imaginative power lively and excited; attacks of great loquacity.

Fanciful illusions when holding head down, as if she had a large goitre which she could not see over.

Anxiety on account of thieves or horrible apparitions, while awake, like a feverish fancy.

Apprehensive and lachrymose mood, which disappears in evening.

Apprehension and ennui, she seeks society.

Anxious mood as from a misfortune.

Very uneasy mood as if he had committed a crime.

Anxiety: makes her restless in morning; during menses.

Thinks of death calmly; hypochondriacal, with gastric symptoms; pressure in spine and fear of death.

Low-spirited at noon; lively in evening, or vice versa.

Sensitive to others talking and to noise.

Talking or listening is distressing; much talking of other people, even of those of whom he is fond, affects his nerves and makes him morose and impatient.

Mood uneasy, unsteady.

Digitized by Google

Irritable, startled.
At noon irritable, peevish, terrified; > in evening.
Fretful, morose; for several days inclined to have a secret grudge, and to vexation; quiet; it frets him to be obliged to speak a word.
‖Fretful, despondent mood, especially in evening.
▮Child cross toward evening; brain affected.
Very impatient, but not bad-humored.
‖Easily angered and very much affected thereby.
He wishes that he might get hold of some one on whom he might vent his anger.
‖Iracible, impatient; sad, weeps frequently; despairs of her recovery; is querulous; objects to noise, or talking of others; dislikes work, cannot or will not walk.
Morose in morning, afternoon and evening
Answers were slow, and he spoke as if in a bad temper.
‖Sobbing on account of vexation, without obvious reason, with pressive pain in top of head.
Ill-humored and sad.
She looks very morose, gloomy and disturbed, even in morning.
Peevish and lachrymose during menses.
Indifferent; despondent; disinclination to work.
Overpowering sadness.
Quiet thoughts of death in afternoon, with weakness.
Hypochondriacal mood three hours after dinner, with pressure under short ribs, especially of r. side, with aversion to work and discomfort over whole body.
Extremely variable mood; alternately fretful, irritable, quarrelsome, despondent and depressed.
He is frequently able to laugh excessively over a trifle, but is just as easily vexed.
▮Delirium, with attempts to get out of bed; staring eyes; constant trembling of hands and coldness of extremities.
‖Great fear, as if persecuted by men or the devil, on account of crimes which he has never done; is afraid of becoming imprisoned, or poisoned, or shot, or buried alive, with great excitation, pappy taste, whitish-coated tongue, eructations, loss of appetite, retarded stool, vertigo and heat in head and face. θDelirium tremens.
‖After an attack of typhoid fever, repeated over and over again, in a singing tone, any question put to him, until interrupted by a second question, which he repeated as the first, and so on.
‖A teacher of leuco-phlegmatic habit, frequently vertigo, for several months an involuntary, periodically appearing fit of laughing, which he cannot suppress; fits appear several times a day and cause severe convulsions

Digitized by Google

of chest and abdomen, rush of blood to head and brain; a tendency to constipation and apoplexy.

‖A woman in her climacteric years suffered from delusions caused by grief and anger; believed herself to be called before court on account of her wicked actions; at night she could not sleep, and during day sleep was light and not refreshing; believes the devil is after her; face and head feel hot, features sunken, moderate heat alternates with chill all over body; vertigo, gait tottering, loss of appetite, constipation; muddy urine, with brickdust sediment; after waking up feels languid and cannot rouse herself; is very sensitive, weeps easily; pulse not frequent, but irregular in strength of beats.

‖A gracile, delicate, but healthy girl of 23, who made her living by embroidery, nursed her old father during a long and tedious sickness, and then felt mentally and bodily exhausted; after recovery of her parent she returned to her usual labors, but a sleepiness, without any other morbid symptom, set in, with loss of appetite, though her tongue was perfectly clean; when sitting at her embroidery or at her sewing table she heaved a deep sigh, needle fell from her hand, she fell back in her chair, and slept with eyelids spasmodically closed and eye whirled around in circle; after sleeping from five to fifteen minutes, she began to weep, or to sing, or to speak incoherently, waked up then, after a few moments to fall again asleep, in a quarter of an hour to awake again in a similar manner.

Sensorium. ‖Vertigo: violent, after stooping, as if everything were whirling round, with buzzing in head, in morning; as if he would have apoplexy, with anxiety and fear of falling headlong; he could scarcely stand; in morning on waking, as if head were moving up and down, with a similar floating of images of his fancy, all during semi-consciousness; after dinner; as if he saw through a mist, after eating; in occiput, in evening while sitting and smoking, with desire for stool; in whole brain, especially in occiput, as if he would fall over; in occiput as if he would fall to left, while walking; with headache, in morning; while sitting up in bed, as if bed were constantly swaying back and forth; while sitting and standing, disappears on walking; when standing on a height, as if he would fall to right; with weakness of head and abdomen, she is obliged to lie down; from morning till noon, it frequently seems as if she would fall; with flushing heat.

Dizzy, nauseating weakness on remaining up rather late in evening, as after smoking too strong tobacco.

Digitized by Google

Frequent attacks of vertigo, preceded by sharp pressure at root of nose, and a sensation of drawing together of eyes, as if by a cord, followed immediately by excessive menses, faintness, and trembling of hands.

Fainting.

Inner Head. Dulness of head: on waking; after a meal.

Heaviness of head, as if it would fall down.

Inability to support head in evening.

Head heavy, dizzy and confused in morning, as from loss of sleep.

Weak feeling in head, especially in eyes.

Head oppressed; stupefied and dizzy at noon.

Dizzy stupefaction in short paroxysms, with blackness before eyes and general weakness, especially in forenoon and evening.

Stupefying headache, as from coal gas, all morning.

Pressure in head, with dulness.

Headache: at night, with vertigo; intense, with violent shivering; > by washing in cold water; > in open air; < in warm room, after eating and from wine.

Intense pain in brain, almost driving one mad, followed by excessive vomiting of bile and trembling.

Pain as from a tearing in whole brain.

Sticking and tearing in head and cutting in abdomen, with yawning during and after dinner.

Headache from drinking even small quantities of wine.

Painful raging here and there in head.

Tingling and resounding in head, when speaking loud.

Violent throbbing and tearing in whole head, especially in r. frontal region, from morning until evening, after lying down.

Headache in region of l. frontal eminence after dinner.

Pressure on root of nose, as if it would be pressed into head.

Continual dull pain across frontal sinuses, with extreme sensibility of cartilages of ear and nose.

In forehead: constant dull pain; heaviness during menses, with a feeling as if head would be drawn backward in evening; pressing headache every morning; pressing in r. frontal eminence; pressure with dulness, makes thought difficult; a sharp pressure in morning on waking, afterward becomes a simple pressure in temples; sensation as if air forced itself into frontal sinuses; extreme sensitiveness; tension and pressure; pressing headache, with dulness in head, sleepiness and pain in eyes in forenoon; sharp pressure upon a small spot in middle, in evening; pressing tearing in frontal eminence, after dinner; drawing; throbbing; sticking;

Google

tearing; tearing and crawling, during supper; sticking tearing, with violent ineffectual inclination to sneeze; sticking, with a tearing as if head would burst; a dull boring stitch above r. frontal eminence; gnawing as from worms.

In temples: sharp, pinching pressure in l.; transient tearing; tearing in r.; jerking tearing above l.; sticking tearing; dull stitches in r. from time to time; stitches as with needles in l.; sense of tightness; cramplike tearing; tearing, after dinner, with stitches in r. ear; a persistent aching and pressure; dull, cramplike pressure; pressure in r. suddenly shooting inward; pressure in l.

In vertex: drawing, pressing, throbbing tearing; pressing tearing near r. side; sharp tearing, also in l. parietal bone; fine burning stitches, in middle; dulness and heaviness; tense and dull pain; pressure, < after dinner.

Hemicrania, < after dinner; tearing and stinging.

In r. side of head: tearing and sticking, after dinner; painful boring and pressure; pulsating pressing, and twinging; boring in parietal bone, with a sensation of bursting, in evening, while standing; throbbing pain, in evening.

In l. side of head: dull pain; pressing, drawing, boring, after dinner; boring in parietal bone; drawing tearing.

Frequent screwing-together pain in both sides of head, in evening.

In occiput: dulness and acute heaviness; a pressing asunder in r. side; pressure, for several hours after walking in open air; drawing; drawing in l. side; painful forcing asunder, in l. side, close to cervical vertebræ; gnawing in r. occipital protuberance as by a mouse; continual gnawing in upper part; bruised pain; boring; painful raging like beating of waves, with a feeling of heat in a spot on r. side, extending up over vertex, in evening; tearing in r. and l. sides; tearing in r. side, with dull stitches on top of head; tearing in r. side when laughing; dull sticking pressure in a small spot.

Periodic attacks of cephalalgia, with impairment of vision, as if a thick fog lay before eyes, cannot distinguish even large objects; pressure in vertex and forehead from without inward; great confusion of head; face pale; loss of appetite; despondency; irritability; pains grow more severe as day advances, and are very severe in evening; at times vomiting; with appearance of pain, amblyopia, < as pain increases; on cessation of pain, sight normal; attacks every ten to fourteen days, last

Digitized by Google

two to three days with varying intensity; stool every two to three days.

‖ A girl, æt. 24, robust and regularly menstruating, suffered for four years from pressing tearing pains in occiput; stitches in r. eye and tearing-stitching in ears, sometimes in teeth; pains steadily increase from year to year, till her mind begins to suffer (*Bellad.* 30 relieved stitches in eye).

‖ A man, æt. 34, suffered for years from severe paroxysms of vertigo, fell down several times a day without losing consciousness; dull pressing frontal headache and at vertex; loss of memory, pains in back; obstinate constipation, sometimes bright-red blood passed with stool; intestinal gurgling, followed by flatus and heat in rectum; urine pale; deep, not refreshing sleep, with restless dreams, felt sleepy all day; very irritable.

‖ Headache; pain began in forehead, ran to vertex, then down to occiput, then settled on top of head, and while it lasted seemed intolerable; > by squeezing both hands upon sides of head.

‖ Chronic occipital headache; pain at times extending to eyes, makes her feel weak and good for nothing; sensation of heavy weight on top of head; scalp and hair feel sore (bruised feeling); a feeling in occiput as if stunned; stupid feeling during pain; pain lasts all day.

‖ Occipital headache; great dulness; indescribable heavy dragging pain in occiput; sensation as if scalp wrinkled up and kept tightening and remained so; sometimes as if insects were crawling from occiput to forehead; scalp felt sore, even to touch the hair; pain always came on when the gas was lighted and continued till he retired; could not keep still, had to keep moving; < from liquors.

‖ Chlorotic cephalalgia for two years; pressure on top of head and in forehead, gradually increasing in intensity after dinner; frequently dizzy, followed by nausea and vomiting of bile; face pale; pulse quick and small; tongue coated; anorexia and constipation, stools hard, small and dry; menses absent two years; well-marked cerebral depression.

▮ Chlorotic headaches, especially in patients whose blood has been saturated with iron.

▮ Cerebral and nervous exhaustion; chronic sick-headache, with great weakness of sight; fidgety feeling in legs and feet.

▮ Brain-fag from anæmia of brain.

▮ Great cerebral and nervous depression, with melancholy.

‖ Headache in morning from overstudy; temperature

105°; skin cold, particularly on head; pulse slow and soft; wanted to be in a dark room, did not want to be annoyed or touched, simply said she was sleepy and had headache.

‖Constant slumber, with occiput deeply pressed into pillow; eyes half open, with dilated and upward-drawn pupils; squinting, staring, rolling of eyeballs: features peculiarly changed, collapsed, pale, cold, or alternating with heat and redness of cheeks; frequent, penetrating, loud screaming, with trembling, continuous moaning; pulling at dry fissured lips, or boring with fingers in nose till it bleeds; automatic motions with head and hands; respiration irregular; short, dry, spasmodic cough; pulse small, frequent, very changeable; wants to drink hastily; does not want to nurse; abdomen hot, dry, sunken in, with constipation; involuntary micturition; child lies in perfect apathy, is restless during motion, which aggravates cough and vomiturition.

‖Epidemic meningitis cerebro-spinalis; short breathing, anguish, pressure in chest, and frequently returning dry tussiculation, pulse remarkably slow; pulse small, frequent, very changeable, breathing irregular; short, dry, spasmodic cough; mental disturbance.

▮Threatening paralysis of brain; complete unconsciousness; child lies motionless, or jerking of whole body and twitchings of single limbs; grating of teeth; shrill, frightful screams, with altered voice; cannot speak; occiput very hot; forehead cold, covered with cold perspiration; white, pale, distorted face; breathing short and quick, but no rattling; discharge from bowels and bladder involuntary; limbs icy-cold, and whole body cool; bluish-red all over; pulse threadlike, scarcely countable; convulsions, followed by stupor; occiput hotter than forehead; screams before spasms; trembling of muscles; constant motion of feet between attacks; urine scanty, bloody. #Scarlatina.

‖Concussion of brain, resulting in inflammation after a fall; did not fully recover, but after a few weeks began to lose appetite, complained of constant pain in head, < walking or riding; pale, languid, indisposed to move, dragged her feet, especially r., when walking.

▮Meningitis, stage of irritation (*Bellad.* does not act).

▮Hydrocephalus following gastro-enteritis; comatose from narcotic convulsions, had been frequent the past twenty-four hours.

▮Hydrocephalus; child has its feet in constant motion; distension of abdomen; constipation, with hard and dry feces; on awaking child gives evidence of fear, and rolls

Digitized by Google

its head from side to side; it cries out, starts and jumps during sleep.

‘ **Outer Head.** ‖Sensation of soreness of vertex, as from ulceration; < in evening in bed and after eating; > after scratching.

‖Hair: falls out on vertex, causing complete baldness, with sensation of soreness of scalp; falls out profusely; sensation as if it bristled, especially above l. ear; on vertex; painful on slightest touch.

‖Forehead cool, base of brain hot.

Itching pimples on scalp.

Itching moist eruption on and above both temples.

Suppurative pain on one side of scalp.

Sharp tearing sticking in skin of l. forehead above eyebrow.

Feeling as if scalp were drawn together to one spot.

Drawing in skin on vertex.

Painful sore feeling in a small spot on r. side of scalp.

Frequent sore itching in a small spot in middle of scalp.

‘ **Sight and Eyes.** Photophobia; dread of sunlight, with dim, watery eyes.

‖Sensitive to light; brain affected.

‖Amaurosis: during severe headache, passing away with headache; with contracted pupils.

‖Eyes dim, watery; brain affections.

‖Sees luminous bodies; after operations.

When looking up, a dark, diagonal line before l. eye, directly upward and to r, about six feet in length.

Yellow, blue and green rings before eyes, with a suffering look and sleepiness.

Objects apparently elongated and at times double.

Flickering before eyes.

Fiery flakes float in large circles in front of eyes, when looking at sky.

Dimness and mistiness of vision in morning after waking.

Vanishing of vision: with absence of mind; with lachrymation and burning, after dinner and frequently when writing.

Diplopia: l. eye more affected than r.; increased, and decided strabismus developed.

Pupils alternately dilated and contracted, usually dilated.

Profuse moisture of eyes during day, agglutinated lids in morning.

Lachrymation in morning on waking, also in open air.

Eyes turned outward.

Weak, sick feeling in eyes.

Eyes feel as if she had wept much.

Pain in eyes as if pressed inward.

Great uneasiness and intolerable pain in l. eye, frequently with great weakness of head.

Google

Pressure: on eyes, also toward evening; tensive, in r. eye like rheumatism; violent in r. eye, and in temples; violent in l. eye while walking in open air; and tearing in l. eye; constant in l. eye, in evening.
Tearing stitch above l. eye, at same time in umbilical region.
Prickling biting in lower portion of l. eye, and below it upon cheek.
Biting in l. eye, > by rubbing.
Sticking tearing in eyes and head.
Cutting, pressing stitch in r. eye.
Twitching in l. eyeball.
‖Constant burning in eyes in afternoon.
‖Much burning in eyes and lids, in morning and evening, with feeling of dryness and pressure in them.
‖‖Burning and biting, with photophobia of eye, which waters, especially in evening, and is agglutinated in morning.
‖Tickling in r. eye, as from dust.
‖‖Sore painful biting in eyes, toward evening, especially in r. eye.
‖Itching of eyes.
‖Agglutination of inner canthus, in morning, with a pressing sore feeling.
‖‖Burning of l. lid, as if too dry.
‖Feeling of soreness in inner canthi.
‖‖Pressure on margin of l. lower lid, near inner canthus.
‖‖Soreness and almost constant itching in inner canthus of r. eye; also of itching in other portions of body, back, hands and arms; all symptoms < toward night; r. lower lid literally filled with small tumors, in upper lid several making their appearance; caruncle swollen and bright-red, ocular conjunctiva congested toward inner canthus; margin of lower lid thickened, indurated, bright-red, somewhat everted. θTarsal tumors.
‖‖Painful pressure in r. inner canthus, with redness of conjunctiva.
Biting in r. inner canthus > by rubbing.
‖Itching and sticking pain in inner angles of eyes, with cloudiness of sight.
‖Feeling of dryness in eyeball.
‖‖Kerato-iritis with severe night pains, especially in inner angle of eye.
‖‖Attacks of amblyopia came on suddenly, with severe pressure in vertex and forehead, from without inward, < in afternoon and evening; amblyopia appeared as a thick cloud, grew worse until she became completely blind, and then disappeared with the pain; face pale, appetite poor, very irritable.

Google

| | Syphilitic iritis; pains did not come on until he lay down at night, then profuse, hot, scalding lachrymation; pains dull, involved balls and brows; cannot sleep over ten minutes; must wake with eyes full of burning water; no discharge of mucus or pus, rather dryness of conjunctiva, ball and lids very much inflamed; < on lying down. .
| | Keratitis pustulosa (*Euphrasia* relieved); a persistent redness of conjunctiva remained, without any discharge; < toward evening and in cool air.
| | Pterygium covered one-half of pupil and growing rapidly; much conjunctival injection, lachrymation in evening, discharge and photophobia, especially by artificial light, pricking pain and soreness, < in inner angle and in evening; great pressure across root of nose and supraorbital region.
| | Pterygium; in r. eye just encroaching on cornea; in l. eye extending to pupil from internal canthus; had a breadth of one and a half lines, and was thick and vascular; interior portion of conjunctiva much injected; inner surface of lids contracted, lashes inclined to turn in, though they do not rest against ball; external canthi sore and cracked; eyes feel sore and hot on going into cold air, > in warm room; at night itching, heat and profuse lachrymation; she sees a green halo around evening light with l. eye; only counts fingers at ten feet; attacks of rush of blood to head and over face, followed by perspiration over body.
| | Redness with intense burning and smarting as from salt in l. eye, especially upper part, and intolerable itching, especially in lower part; scalding lachrymation from eye; l. lids adhere on waking, either in night or in morning, with yellow discharge; conjunctiva of l. eye, and that of inner surface of l. lower lid, is red, and there is a pink zone around l. cornea, which is dim; aching over l. eye; photophobia, especially to sunlight, even light falling on sound eye causes pain in diseased one; blisters form on eyeball, with intense burning throbbing pain, like a whitlow, they break and discharge a white gummy matter, eye gets well next day; with the attacks, discharge from l. nostril; pressure > pains and itching; burning and smarting are < from application of cold water; > by warm water; < by lying on back or r. (unpainful) side; > by lying on l. (painful) side; burning after 8 P M.; attacks always come in the night, sometimes waking her; all symptoms < at night.

Inflammation and redness of conjunctiva of r. eye; suppuration in inner canthus; eyes most painful in even-

ing and night, as from sand, with frequent lachrymation; even upper lid toward inner canthus is red and swollen.
‖ Inflammation of eyes during menses.
‖ Persistent redness, especially at inner angle, < in evening and in open air, remaining after pustular keratitis.
θ Phlyctenular ophthalmia.
‖ Conjunctivitis, pains < at night; inflammation more in inner canthus.
‖ Inflammation and redness of conjunctiva of r. eye, and matter in inner canthus; eye pains most evening and night, as from sand in it; frequent lachrymation; upper lid red and swollen toward inner canthus.
Jerking in l. eyebrow.
Pressure above r. eye sudden and painful, with a pressing-down sensation in lids.
Fine sticking tearing in and above l. brow.
Twitching of l. lower lid.
Falling of upper lid and œdema of lower.
Feeling of soreness in r. upper lid.
Soreness of outer canthus with biting pain.
A pressing burning, especially in l. eyelid, when reading.
Fine sticking as with needles in r. lower and l. upper lids.
Itching in margin of l. upper lid.
‖ Intense burning after operations.
‖ Strabismus.
‖ Upper lids heavy, as if paralyzed; ptosis.
‖ Granular lids; after ophthalmia neonatorum.

° **Hearing and Ears.** Loss of hearing.
Noise in ears: continuous during night; dull whizzing, in evening pulsating, very annoying while writing; whizzing in front of r. ear; ringing; violent roaring; ringing in r. ear at night; cracking and beating in ear after breakfast; a crash as from breaking of a pane of glass, on falling asleep.
‖ Tearing in ears.
‖ Frequent persistent cutting-tearing stitches deep in r. ear, near drum.
Otalgia, with tearing stitches and external swelling, especially with children.
‖ Neuralgia of middle ear, pains tearing and cutting, often with suppuration.
‖ Earache of children, especially boys.
‖ Otorrhœa of fetid pus.
Much purulent discharge from l. ear day and night; orifice swollen and hot, with l.-sided headache.
Offensive moisture from l. ear.
Increase of earwax in l. ear thinner than usual, impeded hearing; beating of pulse very distinct, causes roaring in ear.

Digitized by Google

Extreme sensibility of cartilages of ear and nose, with pain across frontal sinuses, least friction or bending of ear or nasal cartilages causes acute pain.
Violent cramplike pain in lobule of l. ear, extending into neck, on boring finger into ear.
Pain as after a blow, on touch, beneath and in front of r. ear, in bone.
Tearing in bone in front of l. ear.
Pressive constrictive pain in bone beneath and in front of r. ear, with dulness in forehead.
Pinching drawing behind l. ear, extending into lower jaw.
Earache jerklike, from mouth along eustachian tube.
Tearing in ears at various times, at times with itching, or in morning with crawling, in evening with burning.
Sticking and tearing in l. ear close to lobule.
A kind of pinching jerking within ear.
Tickling in l. ear not > by rubbing.
Itching in r. ear, > by boring into it.
Itching in l. ear, with a feeling on putting finger into it as if fleas were jumping about.

[7] **Smell and Nose.** ‖Nose dry; brain affected.
Frequent blowing of blood from nose.
Nosebleed for a short time on blowing nose, after dinner, followed by stupefaction in forehead as from a stroke of apoplexy, with swimming of objects before eyes.
‖Sneezing: preceded by cutting crawling in nose, in morning and afternoon; after a meal; frequent, without coryza.
‖Coryza: with hoarseness and burning in chest; with sore sensitiveness of nostrils; with feeling of stoppage; fluent, with crawling in nose and frequent sneezing; profuse, with a raw throat; fluent, toward evening, with pressure in r. tonsil on swallowing and yawning; violent, dry, all day, with pain in back, especially while sitting; sudden, in evening after lying down; fluent, alternating with dryness, especially in evening.
‖Stoppage of nose.
‖Nose feels sore internally.
‖Swelling of one side of nose, with loss of smell.
‖Boring of fingers into nose, or pulling at dry lips.
‖Feeling of soreness high up in nostrils, a tearing in r. nostril.
Sharp cutting on inner margin of l. wing of nose.
Swelling and painfulness of l. wing of nose.
Itching in l. nostril, followed by frequent sneezing, succeeded by profuse nosebleed, stopped by cold water.
Itching in r. nostril.
Drawing and tearing in r. nostril after dinner.

Digitized by Google

Sticking pain in septum of nose when touched.
Fine tearing in r. side of nose externally.
Swelling on r. side of nose.
Pinching in root of nose: with dulness in forehead; extending into eye; with stitches in jaws.
‖Pressure upon root of nose, as if it would be pressed into head, almost intolerable.
‖Redness of nose, remaining after freezing; tip of nose is easily frosted.

Upper Face. Face: vacant; apathetic; irritable; cadaverous; pinched; unnatural; earthy, as after a long illness; cachectic complexion, bluish-white; flushed; pale, alternately red, in brain affections and with vertigo; earthy, with wandering expression; waxy, white or yellow, in typhus; pale, in chronic diseases, with much emaciation; pewterlike hue, with scirrhous tumors.
‖Tearing in malar bone, extending into upper jaw.
‖A sudden pressing stitch from r. zygoma to upper margin of orbit, deep in bone, followed by great sensitiveness of spot, in evening.
Spasmodic twitching of musculi risores, with constant inclination to laugh.
Contraction and spasmodic twitching of muscles of face, with nausea and incessant vomiting.
Bruised pain in bones of face and orbit.
Jerklike stitches as from needles in face.
Swelling and itching of l. cheek.
Pressing pain in upper jaw near l. wing of nose.
Tearing in l. cheek.
Tearing in r. malar bone, with bruised pain in that spot on pressure.
Neuralgia of fifth pair, < from touch and in evenings.
‖Severe burning, lancinations and lightning-like shocks and jerks from foramen infraorbitale over r. side of head to occiput and mandibula; face on r. side swollen, tense and hot, eye smaller and retracted into orbit, eyelids bluish, a sensation in teeth as if they would be pulled out, tongue numb, throat constricted, secretion of saliva increased; attacks mostly after eating (between 5 and 7 P.M), lasted one to three hours, and during that time patient could not bear least touch of head, and screamed from severity of pain.
‖A scirrhous lump on r. cheek, size of a walnut, cold sweat on forehead.

Lower Face. Swelling of lips; dry, cracked.
Thick viscid humor on lips, without odor or taste.
Dryness of lips.
Upper lip: violent muscular twitches in l. side; sore,

ulcerating in middle; a jerking tearing in r. side; a transient stitch; fine stitches.

Lower lip: tensive, painful smarting; burning smarting on inner surface.

Lips and corners of mouth cracked, with yellowish ulceration.

Cramplike tearing here and there in lower jaw, especially in chin.

Tearing stitches which pass into one another, in chin and throat.

Sticking pain in articulation of jaw, beneath and in front of l. ear, on moving jaw backward and biting strongly, and on pressing finger upon joint.

Redness and itching eruption on chin.

[10] **Teeth and Gums.** Teeth feel on edge.

Toothache: painful jerking; jerking, violent tearing in last lower molars; jerking in r. lower molars in evening, after lying down; jerking in l. teeth from time to time; jerking stitches in l. lower molars, also in evening after falling asleep, suddenly waking from sleep; sharp, jerklike drawing, suddenly in all incisors; tearing in roots of r. upper teeth; tearing, in l. upper molars; tearing extending from root of r. upper tooth toward temple, in evening after lying down; tearing in a hollow molar, on sucking it blood comes, and on pressure pain is for a time <; tearing in last lower l. molars in evening; tearing in l. last molars above and below, then in cheek, extending to temple and forehead; tearing and drawing in l. lower teeth, especially in incisors; sticking in roots of l. upper canine and adjacent incisors; sticking in l. lower molars, constantly in evening; stitches in l. row of teeth and jaw, extending into neck; drawing in l. upper incisors; drawing, now in r., then in l. side of lower back teeth; drawing, or smarting and stinging in roots of (upper) front teeth and in hard palate; pressing drawing in r. lower back teeth; drawing in roots of upper front teeth, and at same time in pharynx, extending into cervical muscles; throbbing in a hollow tooth after eating or after becoming heated and getting cold; throbbing drawing alternately of back teeth of r. and l. sides; painful burning in front teeth, with biting on lower surface of tongue.

Sensation of soreness of teeth.

Teeth feel long and loose, with swelling of submaxillary glands.

Grits teeth.

Picking and prickling in sound teeth, with drawing pains in jaws.

Ulcer at root of a bad tooth, sensitive to touch, with an elongated feeling in tooth; when pressing upon it blood comes.

Water seemed to come from r. last lower back tooth; when she touched it with tongue there was a violent sticking in it.

Gums: white; swollen; sore, painful; cannot chew; white pellicles; biting and itching on inner surface; inner side painful, as if sore; and separated from teeth; painful while eating, ulcerated, white, bleed easily; bleed on slightest touch.

[11] **Taste and Tongue.** Taste: sweetish; metallic; like spoiled cheese; bloody; bitter, in fauces; flat; of a sweetish powder, in throat; sweet, beneath forepart of tongue; of blood in mouth, and a disagreeable sweet rising from stomach; of blood, with a feeling of dryness in throat, and sensation of soreness rising from chest; of bad cheese in forepart of mouth, disappearing on swallowing, to which he is impelled on account of mucus in throat; bitter, slimy, in morning on waking; coppery; clammy; saltish, with dryness in throat; as after eating raw peas.

Tongue: dry, does not want to talk; coated at root, and dry (brain diseases); swollen on l. side, hindering talking; covered with vesicles; white, or yellowish-white; white, as from cheese, without taste; dirty, moist; dry; painful as if sore; covered with white mucus; blistered, painful on eating.

Echo speech; patients repeat in a monotonous, singing way words and sentences of their neighbors without being conscious of it.

Weakness of organs of speech when reading.

[12] **Inner Mouth.** Sticking biting on palate close to and in roots of incisors.

Increased flow of saliva, with crawling in inner surface of cheeks.

Collection of sour, bitter water in mouth.

Accumulation of saliva: with qualmishness; with a metallic taste; with inclination to vomit; with stitches in tip of tongue; with tingling on inside of cheek.

Swelling of palate and cavity just behind incisors, with pain on touch.

Inflammation of palate.

Yellow ulcers on inner surface, lower lip, and l. cheek, especially painful in morning.

Fetid breath.

Pain in palate and velum palati, especially on yawning.

Tetters on tonsils, soft palate, and root of tongue; whit-

Digitized by Google

ish, somewhat elevated, ulcerated spots in mouth, sequelæ to gonorrhœa.
Herpes (yellowish) in mouth from sea-bathing.
Swelling of submaxillary glands.

[13] **Throat.** Dryness of throat: in evening; with accumulation of mucus in larynx, and constant inclination to hawk up tenacious mucus, which soon again collects and causes irritation; when swallowing, or when not, after dinner; mucus collects from posterior nares.
Soreness in throat; tearing in posterior fauces, more between acts of empty deglutition or after eating.
Rawness and dryness in throat and larynx frequently and at various times, especially in morning or after dinner, compelling to hawk or cough, at times disappearing after food.
Hoarseness and rawness in throat, could scarcely breathe.
Sore throat, swelling and ulceration of tonsils.
Anxious, sore feeling in throat, especially at night.
Sore pain in throat and a feeling of fulness in œsophagus.
Pain in throat on swallowing, with swelling of throat externally and in tonsils.
Pain in throat as from an internal swelling, also on empty swallowing.
Violent pain in throat and at angle of jaw and laryngeal region.
Spasmodic and cramplike feeling in pit of throat or upper part of œsophagus, like a pressure from below upward, or as when swallowing.
Constriction and spasm in throat.
Feeling of constriction in throat on swallowing, with desire to swallow frequently.
Swelling and painfulness of tonsils, especially on swallowing, she could not even swallow mucus without pain.
Pressing pain in tonsils on swallowing, in evening and through night.
Frequent biting scraping posteriorly in fauces, as in violent coryza.
Dryness posteriorly in fauces, in morning on waking, and also afterward with thirst.
Pressure from pharynx down into abdomen, as if a hard body were opposing from below.
After dinner food seemed to remain sticking in pharynx.
Acrid rising up into pharynx after eating sweets, which caused a distressing scraping in larynx, like heartburn.
Scraping rawness in pharynx toward evening.
Sharp jerking tearing extending from pharynx into l. cervical muscles.
Raising of much black, clotted blood, preceded by rawness

Digitized by Google

and dryness in throat, and hawking of mucus in morning while walking, with sore pain low down in throat, followed all day by sweet taste in mouth, dryness in throat and bloody saliva.

Large lumps of white mucus pass through posterior nares into mouth without hawking.

Greenish mucus low down in throat, is expectorated, with sore pain in upper part of chest.

Something like blood with a sweetish taste comes into throat, in evening after lying down.

A peculiar and persistent inflammation of throat, with extensive ulceration of pharynx and tonsils; ulcers round, sharply defined, with red, everted edges; they gradually coalesce; were filled with yellowish-white matter.

Burning in throat; like heartburn, even on swallowing; a hot vapor rises.

Sensation of choking in r. side of throat, only when not deglutition.

‖ Dryness in throat; speaking difficult, had to clear his throat constantly.

‖ Pain in throat as from an internal swelling.

▮ Tearing drawing sore throat posteriorly in both sides of pharynx, more when not swallowing than on empty swallowing.

▮ Cramplike, strangling pain externally in muscles of throat when swallowing.

▮ Pain in posterior part of hard palate and in velum palati, especially when yawning.

‖ Bitter taste in fauces, mostly at night and when belching, with liver complaint.

▮ Herpetic-like eruption on tonsils, soft palate and root of tongue; whitish, somewhat elevated ulcerated spots in mouth. θSequelæ to gonorrhœa.

14 **Appetite, Thirst. Desires, Aversions.** Hunger: ravenous, especially about 11 or 12 A.M., with weakness of legs and trembling; scarcely to be satisfied; greediness and hasty swallowing; insatiable, but no appetite for breakfast, with hurried deglutition; insatiable at noon and in evening; after eating, a feeling of full distension; desire to eat, in pharynx, even after a meal, after satisfying it an overloaded feeling in stomach, and pressure in head.

▮ Loss of appetite.

‖ Loss of appetite, with a perfectly clean tongue. θSomnambulism.

▮ Thirst: from forenoon until evening; with heat in palms, in afternoon; burning; extreme; in evening until lying

Google

down, with increased warmth of body; in afternoon, during menses; with hasty drinking; for beer, in evening.

Aversion: to meat, fish and sweet things; to cooked or warm things; to veal.

[15] **Eating and Drinking.** Worse from: sugar (heartburn); wine (nearly all symptoms); milk (sour eructation).

Hasty eating.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough: especially after breakfast; for half an hour; violent in evening; disappearing after eructations of bile.

Eructations: frequent, empty; after drinking, or after dinner; with pressure in middle of spine; sour, especially after drinking milk; gaseous; at first empty, afterward tasting of fat eaten; frequent, loud, with at times rapid, at times weak, slow pulse; bitter; bitter, of yellow water and bile, after eating, followed by vomiting; sweetish; acid; at night, of food eaten at noon; tasting of milk, in afternoon; tasting of meat eaten; ineffectual.

Pyrosis.

‖Heartburn: with swollen feet and varicose veins (during pregnancy); after taking sweetish things.

‖Sweetish rising into throat, with sweet taste in mouth, or taste of blood.

Nausea: continual; and retching; with eructations, salivation; and colic; and perspiration; with trembling and weariness; in morning; during breakfast; during day; was obliged to sit down, would vomit, but could not, with eructations and desire for stool; with general sick feeling in head and chest; with a dreadful sensation in stomach; renewed by least motion.

Nausea, with retching and vomiting of bitter, slimy liquid, and at last of food, with shocks of coughing, with a feeling of warmth, especially in abdomen, perspiration, chilliness over arms, shuddering of body, empty eructations, hiccough, rumbling and griping in abdomen; nausea, > by sitting bent over; on sitting erect, on moving and on pressure on abdomen nausea and vomiting immediately return.

Qualmishness: after breakfast and dinner; in morning in bed, disappearing after rising.

‖Nausea and headache, < from taking even a small sip of wine.

‖Retching of bloody mucus.

‖Vomiting: as soon as first spoonful of liquid reaches stomach; of pregnancy; of blood or of sanguineous mucus, with effort; of mucus; first of mucus then bile; easy, of watery bile, followed by great relief; of almost all food immediately after swallowing it; acrid, caus-

Google

ing burning on face and rawness in throat; almost continuous.

[17] **Scrobiculum and Stomach.** In epigastrium: burning, when pressing thereon, in evening; burning, before breakfast, extending into œsophagus; burning, when fasting; dull pain, and on r. side of umbilicus; pain, during inspiration; pain, caused by excitement and spasmodic pressure; cramplike pain; cramplike dragging; sharp pains; oppression; pressure; griping deep in, < by deep breathing; sensation like a worm creeping up into throat, causing coughing; screwing-together sensation; frequent pinching; drawing; tearing and sharp sticking, frequently repeated; sudden tightness and oppression during menses, everything must be loosened.

Patient has sudden oppression at stomach, has to unfasten her dress; tendency to clonic spasms in children.

In stomach: burning; stitches from both sides; tearing and sharp sticking; constriction from both sides, with anxiety and increased warmth; pressure, with pain in abdomen; pressure, after eating, in evening; pressure, afterward sticking in præcordial region, in morning after rising; pressure, and a feeling of coldness, at noon; pain, as if stomach were compressed, in morning, fasting; aching, as from emptiness, with nausea; heavy pains; oppression and pain; disgust, distension and qualmishness after dinner and supper, with inclination to eructate; gurgling and rumbling while yawning, at noon, also in evening; motion, with feeling of coldness, at noon; fulness, with heaving; feeling of emptiness, soon after eating; feeling of uneasiness, with shuddering of body on washing, and while sitting down after stooping; tenderness to pressure; deathly sinking, for hours after eating anything acid; disagreeable feeling in cardiac orifice, extending upward along œsophagus; burning, with qualmish eructations.

Stomach considerably dilated as far down as navel, its peristaltic movement at times appreciable through abdominal wall; pylorus hypertrophied, sunken and movable, formed a tumor sensible to touch, sometimes to r., sometimes to l. of umbilicus; under r. false ribs another hard tumor, slightly indented, not well defined, but painful when pressed, giving rise to idea that a new growth depended from liver; its size was variable, prolonged pressure of fingers caused its gradual disappearance, it was most evident during violent gastric crises; it was caused by contraction of hypertrophied muscle, on r. side, resting on a solid surface formed by increased mass of liver.

Google

‖Spasm of stomach and hypochondria, and a constriction in œsophagus, with dyspnœa and increased heat of body; < during inspiration.

‖Very irritable stomach, with constant burning, nausea, and a sweetish rising, with a sensation of worms creeping in œsophagus; downward pressure on bladder, rectum and uterus, compelling her to sit cross-legged, and trembling; bloody, mucous and corroding leucorrhœa.

‖After supper gastralgia, with nausea; a tensive pain in sides of abdomen.

‖Before appearance of scanty and irregular menses palpitation, dyspnœa, pains in back and spasmodic constriction in gastric region; every afternoon between 3 and 4, severe stitching pain in stomach, with nausea, vomiturition, sometimes vomiting of tough phlegm and pain in l. hypochondrium; tongue clean, appetite normal; after a meal for two hours pressure over stomach, hardy food is more easily digested; constipation and lassitude. θCardialgia.

‖A lady of delicate constitution, æt. 52, having passed her climaxis, complained for the last two years of palpitations, anxious respiration, pains in head and back, tension in abdomen, pain in pit of stomach, nausea, sometimes vomiting and a sensation as if cold water were poured down her back; tongue clean, appetite good, but after eating, especially sweet things, severe pressure in stomach, constipation; looks weak, pale and emaciated.

‖Hæmatemesis.

[18] **Hypochondria.** In l. hypochondrium: pressure with stitches; stitches, also in evening while walking and standing; slow pulsating sore feeling; pressing pinching.

In r. hypochondrium: jerklike tearing-drawing and pressure, as from incarcerated flatus, < by motion; sticking during sour eructations, and on inspiration; pressure in a small spot.

In hepatic region: intermittent tearing; sharp jerking stitches, after supper; sticking, also in r. hip; pinching griping pressure in a small spot; cramp-pains, with dyspnœa and hypochondriasis after eating.

Heaviness and pain in hypochondria and loins, followed by prostration.

Feeling of a heavy weight in hypochondria.

‖Cramplike pains in hypochondria, alternating with oppression of chest and difficult breathing.

‖Pressure under short ribs, after eating, with depression of spirits.

‖Dull sticking in region of spleen.

Digitized by Google

‖Liver hard, enlarged, sore to touch, could be felt much more to left and above navel as a small hard lump; several hard lumps in abdomen; abdomen enlarged, soft as mush, softest around navel; sore pains all over belly, most around navel; hectic fever, unquenchable thirst; when swallowing he feels a small hard lump in throat, sometimes like a worm creeping up from pit of stomach into throat, which makes him cough; frequent gagging and vomiting of a little bloody phlegm or thin blood, sometimes pus, of a saltish taste, particularly with coughing; cough < at night, with a shooting in scrobiculum, a kind of a weak but very deep cough, has to cough until he raises; stool either in little lumps or frothy; rumbling in bowels; cannot lie on l. side; during night a dull moaning, feels so weak that he talks with difficulty; feet commence to swell and swelling rises gradually upward.

‖Neuralgia of spleen and intercostal neuralgia.

Abdomen. Sticking in diaphragm.

Fulness in abdomen, immediately after eating, as if filled with flatus.

Heaviness, pressure and tension in abdomen.

Pressure and gurgling in upper abdomen after eating.

‖Severe stabbing pains.

‖Pressure and aching in pubic region.

Aching pressure and griping in sides of abdomen and umbilical region, with feeling as if abdominal walls were retracting against spine.

‖Hard pressure as from flatulence in sides of abdomen, hypochondria and back, even in morning in bed, < by walking, without emission of flatus; only somewhat > after a stool, and again renewed on moving about when walking.

Pressure in r. side of abdomen close to hip.

Dull stitches from an internal ulcer on a small spot on r. side above navel, < by touch and motion.

Stitches in r. side of abdomen.

Sudden violent stitches in l. side of abdomen, < by breathing and by pressure.

‖Rumbling and gurgling in whole abdomen, followed by painful retraction, with a feeling as if stool would occur.

‖Rumbling and rolling in abdomen: in morning; with frequent emission of flatus in evening; with cutting in lower abdomen after dinner; violent and frequent, without pain; in l. side of abdomen in evening.

Flatus causes biting pain in abdomen, extending toward chest.

Flatus: frequent emission, hot, very offensive; frequently

Digitized by Google

after dinner till night; much in abdomen, which is not passed, afterward pressing flatulent colic; incarcerated; presses out hemorrhoids, which are then very painful, especially when lying down; moves about in abdomen; hot, loud and soft, in evening; noisy, offensive, in evening.

Violent pain in abdomen, head and eyes, in evening on lying down.

Pressure in middle of abdomen soon after a moderate supper.

Cramplike drawing in middle of abdomen, with dull colic.

Dragging pains and rumbling in abdomen.

Acute drawing and crawling from abdomen into urethra.

‖Severe stabbing pains in abdomen, without diarrhœa or constipation, continuing several hours and returning periodically every seven days, or once in three weeks.

Cutting: in upper abdomen, also while eating; from evening after lying down until morning; transversely through abdomen, below navel; violent after milk, with rumbling and frequent emission of flatus.

Griping: here and there in abdomen; in upper abdomen, after soup and during dinner; as far as stomach, where it is a constriction; is obliged to bend up in evening; with profuse emission of flatus, and with itching over hips in evening; tensive, followed by dull sticking toward pit of stomach, < from a jar or on retracting abdomen; or cutting, followed by soft or diarrhœa-like stools.

Twisting pain in abdomen before emission of flatus, in morning in bed.

Pains in diaphragm and between shoulders, extending to sacrum.

Stitches in abdomen with distension.

Sticking pain in abdomen after a natural stool.

Sharp sticking in abdomen as if intestines were pierced with fine needles.

Sticking pains in diaphragm and between shoulders.

Burning stitches in abdomen.

Feeling of coldness within abdomen.

Occasional soothing pain in hypogastrium on rising.

Pressing feeling low down in lower abdomen, with crawling extending to beginning of urethra.

Constrictive pain in l. side of lower abdomen, on walking and on pressure; disappears while sitting, after dinner.

Bruised sensation in r. side of lower abdomen, as if a spot there were diseased.

Dull tearing low down in r. lower abdomen, extending into groin.

Digitized by Google

Dull tearing deep in l. side of lower abdomen, beginning in region of hip.

Stitches in l. side of lower abdomen.

Violent penetrating stitch through r. ilium, from above downward, on bending body over, with a hard abdomen.

Colic: constrictive; takes away breath; violent, constricts whole abdomen, even while lying down after midnight, still more on rising; below navel, tearing from one side to other; below navel as from flatus, while walking; dull, above and below navel; tensive, in l. side of abdomen, > by eructations; awoke at night with it, followed by thick leucorrhœa; and repugnance to food, and wine and brandy; violent, at times with nausea and running of water from mouth, often accompanied by offensive mucus, which took away her appetite; after a copious stool; as if diarrhœa would come on; with every stool and emission of flatus; severe, rolled on floor; in an aggravated form, was confined to bed for about a month on account of exhaustion produced by want of sleep and almost total anorexia; about the navel.

‖Dull pressure on a small spot beneath navel, as from internal induration, < from external pressure and by drawing in abdomen.

Sharp pressure between pit of stomach and navel, especially < by drawing in abdomen, but > by eructations caused thereby.

Tearing stitches in umbilical region.

Cutting stitch transversely across umbilical region.

‖Griping in abdomen, at various times, sometimes when yawning, or after breakfast, or with cutting pain after dinner.

‖Great distension of abdomen.

‖Flatulency: before setting in of catamenia, menstrual spasms; for several years, frequent noises and gurgling in abdomen, especially below navel and in l. hypochondrium, accompanied by pressing pain; neither food nor drink, nor passing flatus, made any difference, only firm lacing moderated it.

‖Oppressive wind colic after supper, or later, after midnight.

‖Flatulent colic, < from wine, toward evening or during night, and at rest; loud rumbling and rolling; retraction of abdomen; hot, moist, fetid flatus, passing off without relief; lead-colic.

‖Violent bearing down in abdomen after a difficult scanty stool; > by passing flatus.

‖Cutting upward in l. iliac region, in paroxysms; in a pregnant woman.

Digitized by Google

Inguinal hernia.
Jerking from groin toward penis.
Painful pressing in l. groin, as if hernia would occur.
Screwing-together sensation in l. inguinal region, extending up into chest.
Jerking pressure in r. inguinal region.
Sticking pressure somewhat above inguinal region.
Violent pinching in r. groin and inguinal region, as in retention of urine during rest and motion, and renewed on rising from seat.
Drawing pain in l. inguinal region while sitting.
Drawing and pressure in groin and pubic region.
Prickling, alternating with drawing, in l. groin, at night, disturbing sleep.
Stitches in l. groin in morning after waking.
A hernia presses downward forcibly.
Feeling as if an inguinal gland were swollen.
Buboes, syphilitic or otherwise, in l inguinal region.

Stool and Rectum. Stool: frequent, small, sometimes involuntary; profuse; soft, papescent, or thin, with pale or bright-red, foamy blood; difficult; hard, dry, insufficient, expelled with much pressure; bilious; bloody; offensive, diarrhœic, alternating with constipation; pasty, without pain, only some straining after a stool as if more were to pass; diarrhœa-like, followed by leucorrhœa; involuntary, thin, in morning on waking; loose, with griping and tenesmus in anus, at night; soft, mushy, enveloped in bright-red, frothy blood, preceded by colic; soft, difficult to evacuate, with emission of prostatic fluid; light-colored, first part large and hard, last part soft; scanty, hard, preceded by soft and small evacuations; at first solid, then liquid; in morning hard, without pressure; immediately after dinner very soft, accompanied and followed by vertigo and roaring in head; scanty, tenacious, followed by straining and heat and burning in anus; tenacious, light-yellow, with sticking in anus.

Diarrhœa in evening, with griping in abdomen.
Diarrhœic stools, involuntary, with stupor. θTyphus.
Frequent small discharges from anus, sometimes involuntary; either like pitch, or dry, brittle and granulous.
Diarrhœa, with stupor, seeming to call for *Opium*, which failed.
Later stages of diarrhœa or dysentery, when cerebral symptoms indicate approaching hydrocephaloid; deficient nerve power, convulsions, pale face, without any increase of temperature.
Before stool: colic.

Google

During stool: painful tenesmus; burning at anus; prolonged desire, which is only satisfied after great efforts, although materials are soft; emission of prostatic fluid; slight discharge of blood (with hard stool); pressure and clawing in anus.

After stool: tenesmus; burning at anus.

‖Nervous diarrhœa from depression of nerve-centres.

‖Cholera morbus: feet constantly fidgety; on waking child appears frightened, head rolls from side to side; during sleep it cries out, starts and jumps; painless papescent diarrhœa for many days, some colic after stool; emission of flatulence; hydrocephaloid.

‖Frequent discharges of green mucus from bowels, little or no fecal matter, pain and tenesmus; face pinched, contracted; face and head cool; eyes staring, pupils contracted, head thrown back and rolling on pillow, crying out, starting in sleep, sleeping with eyes half-closed, at times strabismus, throwing its limbs around, urine high-colored and passed at long intervals and rarely. θDysentery.

‖Child, 8 months old, bottle-fed; head cold, with slight alternations of heat, rest of body fairly warm; continued rolling of head and eyes, violent crying out during sleep, frequent spasms of facial muscles, less frequently of muscles of extremities; pulse maintained a high rate; temperature 105° to 107°, with slight fluctuations; comatose. θCholera infantum.

Desire for stool: with movement in abdomen; morning and after eating.

Ineffectual desire: long urging, at last follows soft, with great effort.

‖Constipated stool: stool large in size, evacuated only with great effort of abdominal muscles; stool dry, unsatisfactory; hard, often crumbling, and in pieces, with pressure and clawing in anus; hard, small, rather dry, with much pressure and rumbling in abdomen, in evening; dry, hard, insufficient, difficult; dry, brittle, granulous.

‖Unusual dryness of stool, with difficult defecation, followed by involuntary urination.

‖Constipation due to spasmodic action of intestines.

‖Constipation of the newborn.

‖For two and a half hours violent bearing down in abdomen, after a difficult, scanty stool; > by passage of flatus up or down.

Heaviness in rectum while standing, disappearing on emission of flatus.

Soreness in rectum.

Digitized by Google

Pressing and boring from rectum into abdomen, on account of which she could not sit down.
Rectum seems pressed by flatus, though none passes.
A feeling in rectum as if flatus were pressing against coccyx, by which it was retained.
Drawing pain in rectum extending into abdomen.
Cutting and smarting in rectum.
Jerking stitches extending from rectum into root of penis.
Itching in rectum.
‖Burning in anus; also during or after a stool.
‖Crawling, as from worms, in anus.
‖Violent itching in anus.
‖Soreness and itching at anus.
Tingling at anus, as from ascarides.
‖Chronic dysentery; extreme emaciation; thin, pale, bloody stools, with painful tenesmus; great desire for food, which fails to be assimilated.
Jerklike cutting; tearing in anus.
Burning sticking in anus, in evening while walking.
Stitches in anus.
A twinging stitch, like lightning, from anus into rectum, causing him to start.
Itching in anus, ending in a dull pain.
Itching in anus and oozing of corrosive moisture.
Itching in anus after a soft stool.
Protrusion of hemorrhoids, with smarting.
Discharge of blood from anus.

[21] **Urinary Organs.** In region of both kidneys: pain; pinching; sticking pressure; sore pain in l.; pressure in l., at times violent pinching; l. sensitive to touch; sharp intermittent tearing in l.; tearing in r., at times sticking; stitches, extending toward chest; dull stitches in r.; stitches in l. at intervals; sticking and bruised pain in l., while standing and walking; cutting tearing, at times drawing pressure in r.
‖Very acute drawing in forepart of urethra and penis.
Burning micturition during menses.
Flow of blood from urethra after painful micturition.
Much blood flows from urethra.
Profuse emission of prostatic fluid without apparent cause.
Sore pain in forepart of urethra when not urinating.
Burning in urethra before, during and after micturition.
Tearing burning in urethra.
Drawing and tearing in forepart of urethra.
Cutting in orifice of urethra, in evening while sitting.
Biting in orifice of urethra after urinating.
Tearing and biting in forepart of urethra, when not urinating.

Digitized by Google

Sharp tearing cutting in middle of urethra, extending forward.
Stitches in orifice and through urethra.
Twinging stitch, like lightning, from before backward in urethra.
Itching in urethra.
Feeling of cramp in bladder, preceded by colic.
Pressure upon bladder, but not to urinate.
Urine in bladder presses her greatly.
Frequent urging to urinate, at night, with scanty discharge.
Urging to urinate after urinating, every evening on lying down, but only three or four drops pass each time, but without pain.
Excessive desire to urinate; very much urine is passed.
Frequent and rather increased micturition of a watery or lemon-yellow color.
Frequent micturition, not very copious, very light urine, after midnight.
‖Involuntary urination while walking, blowing nose, coughing and sneezing.
Emission of urine very slow and in a thin stream.
Dribbling discharge of urine in evening.
‖Violent pressure of urine on bladder; sits with legs crossed, and though bladder feels full, none passes.
‖Can only pass water while sitting bent backward; much sand in urine.
‖Urine passed at night is turbid and muddy in morning.
‖Frequent micturition of pale-yellow urine, which, on standing, deposits a white, flaky sediment.
Diminished secretion of urine approaching at one time entire suppression.
Urine: dark and turbid; scanty, not unnatural; reddish; deposits a flocculent sediment; scanty, becomes turbid like clay water; very yellow, deposits white flakes on standing a long time; yellow, deposits a mealy sediment.
‖Paralysis of bladder, with pruritis; leucorrhœa with much itching; pain in l. ovary > by flow; nervous insomnia with intolerable itching of skin at night without eruption; no itching in daytime; headache, with nervous, fidgety feet, has to cross feet to keep them still.
‖Paretic condition of sphincter vesicæ, with frequent micturition of pale-yellow urine; hæmaturia, or a discharge of blood per anum (vicarious menstruation); constant desire to urinate, but urine can only be passed while sitting, bent backward.
‖Sitting with legs crossed, bending forward, and cannot

Digitized by Google

make water, or but very little, and feels as if his bladder would burst.

‖A man, æt. about 45, cannot pass his water standing, can only do so when sitting down, brought on or < by any kind of worry.

‖Atony of cervix.

‖Vesical irritability from nephritic irritation.

‖Vesical neuralgia, especially if vesical symptoms are preceded by nephralgia.

‖Vicarious bleeding through urethra in consequence of suppressed menstruation, with pain in bowels, diarrhœa, and night-cough with expectoration of mucus.

¤ **Male Sexual Organs.** Tearing in tip of glans penis.

Excoriation on upper surface of glans penis near tip just to l. of mesial line, sore to touch; it healed next day, but scab remains on it till to-day.

Dull stitches in glans penis coming up from scrotum.

Tearing drawing in root of penis, preceded by dull sticking in lower abdomen near genitals.

Painful jerking in root of penis.

Penis painfully sensitive when walking, as if shirt were rough and rubbed it.

‖Persistent, strong erections with pain, also pressure in abdomen.

‖Easily excited; emission during an embrace too rapid, or difficult and almost impossible.

‖Spermatorrhœa: emissions without dreams; face pale, sunken, blue rings around eyes.

‖Copious discharge of prostatic juice, without any cause.

Prickling, drawing pain in testicles, mostly while sitting and stooping, at times extending up along spermatic cord.

Drawing pain in l., afterward in r. testicle.

‖Drawing up of r. or l. testicle, with some pain and swelling.

Transient pressing stitches in l. testicle during rest.

‖Orchitis from a bruise, with drawing and retraction of one or other testicle, goes from r. to l. θAfter checked otorrhœa.

A farmer, of sanguineous temperament, injured his testicle, and complained of pain, with periodical aggravation; < from walking; it feels as if testicles were too tight, compressed and drawn upward; stitches when making a wrong step; in inguinal region, sensation of increased heat; during micturition, a peculiar sensation in urethra; when he answers call immediately, urine flows freely, but when he delays, he feels a constant pressure downward; feels breathing and coughing down into testes.

Digitized by Google

Atrophy of testicles.
Shrivelling of scrotum.
Pain in r. side of scrotum, especially when touched.
Sore sensation in sides of scrotum and contiguous parts of thighs.
‖Hair falls off from genitals.
‖Removes buboes, syphilitic or otherwise, in l. inguinal region.

[23] **Female Sexual Organs.** ‖Irresistible sexual desire at night; desire for onanism.
‖Complete loss of sexual desire.
‖Nymphomania caused by onanism, menses which were suppressed suddenly appear, with alternate redness and paleness of face, severe pains and pressing in abdomen and back.
‖Boring pain in l. ovarian region, > from pressure, entirely relieved during menstrual flow.
Ovarian tumor; a sensation as of boring in tumor, which requires pressure and shaking of part for relief.
‖Ovarian neuralgia, particularly of l. ovary, in women who have had overwork; tenderness along spinal cord; when walking any distance they become very tired; stooping, or descending stairs will cause legs to give out; < from using sewing machine; pains are boring, burning, felt between menstrual periods, > when flow sets in.
‖Ovarian pains are> by excessive flow; heaviness and tremulous weakness of lower extremities; trembles as if chilly and is easily frightened; we find a constant drawing in knees, as if they would be twisted off; pain so severe in limbs that she cannot keep them still, but moves them constantly.
‖A maiden lady, æt. 42, ovarian difficulties; obstinate constipation, stools quite small, passed with pain; digital examination discovered a tumor, which involved rectum; severe pains in rectum, urging similar to that of *Nux vom.*; fidgety feet, preventing sleep.
‖Miss ——, æt. 30, had been healthy up to her seventeenth year, at which time she was caught in a rainstorm during her menstrual period; suffered greatly at each period; menses very profuse, long lasting and light-colored; neuralgia through face and brain continually, < at menstrual period, was obliged to lie with her head hanging over side of bed, her body in a prone position; the only nourishment she had taken for two years was a crust of dry bread and a cup of clear tea three times a day; the thought of food made her sick, the sight of meat or anything oily nauseates her; eats ice cream

Digitized by Google

occasionally; whole length of spine burned and pained, sharp pains > by lying on back; tender in epigastric region, slightest touch causes pain; in middle of Summer requires six blankets over her, and four hot water bottles before she would be comfortable; hands and feet icy-cold, clammy; eyes bright; clear complexion and red cheeks; least noise makes her frantic; every morning about 6 o'clock, had a sensation as if a web were drawn across throat, > by drinking hot tea or hot water; whenever a stranger came into ward a jerking of r. limb commenced, which she was powerless to control.

‖Ulceration of uterus, discharge bloody, acrid, but ulcers are rather destitute of feeling.

‖Varicose veins of external genitals, with fidgety feet.

‖Pruritus vulvæ causes masturbation; irresistible sexual desire at night.

‖A very severe and obstinate pain in brain accompanies uterine ulcer, and is of an intermitting character.

‖Uterine cancer; sleeplessness and pain; fidgety feet.

‖Hysteralgia; flow of menses relieves all her sufferings, but they return after cessation of menses; boring pain in l. ovary; fidgety feet.

Menses: too early and too profuse, lumps of coagulated blood pass away mostly when walking; flow most profuse at night; preceded by toothache in a hollow tooth; with alternation of paleness and redness of face; with violent cutting and dragging in abdomen and small of back; with sticking biting and itching in pudenda, and a feeling as if swollen; too early, painful, with bloating of abdomen.

‖After menses, discharge of bloody mucus, causes itching on pudenda.

‖Dysmenorrhœa, when during menses limbs feel heavy, with violent drawing about knees, as if they would be twisted off; sudden oppression of stomach, has to loosen her dress; chilliness; sore eyes; soreness of vulva and mammæ; pale face; weakness of memory.

‖Coughing during catamenia.

‖Amenorrhœa, with alternately red and pale face; great weakness in hands and feet, with cramp in hypochondria and knees, especially at noon, when she is hungry; sensation of goneness at pit of stomach at 11 A.M.; anorexia, with constipation, hard, small and dry stools; with painfulness of breasts and genitals.

‖Leucorrhœa: preceded by cutting colic; of thick mucus; of bloody mucus after menses, causing itching of vulva; of thick mucus, three days before and after menses; acrid, with burning in pudenda; slimy, with griping in upper

Google

abdomen; of thick mucus, especially in morning and evening; also before and during menses; especially after stool; thick, slimy, with great sensitiveness of sexual parts, cutting and pressing in abdomen, bloatedness of abdomen; acrid and excoriating; instead of menses; discharge white or yellowish.

‖ White ulcer inside of labia majora, first causing a pain as if sore when touching it, afterward smarting.

‖ Smarting pain in pudendum, as if parts were sore, especially during micturition.

Stinging in pudendum when walking.

‖ Itching of vulva during menses.

‖ Pruritus vulvæ causes masturbation.

‖ Varicose veins of external genitals, with fidgety feet.

‖ Mammæ swollen and sore to touch; sore nipples; catamenia suppressed.

Pressure on pudenda and rectum.

Pressure toward pudenda, with cutting pain about navel.

Profuse falling of hair from genitals.

[24] **Pregnancy. Parturition. Lactation.** ‖ During pregnancy: metallic taste; taste of blood in mouth and sweetish risings from stomach.

Terrible heartburn after taking sweetish things; great greediness when eating, cannot eat fast enough, from canine hunger; aversion to meat; much nausea and vomiting; fidgety feet; swollen feet and varicose veins.

‖ Cutting upward in l. iliac region, in paroxysms, in a pregnant woman.

‖ Sensation of stagnation of blood in l. leg; varices during pregnancy.

‖ Tendency to miscarry.

‖ Puerperal convulsions if an eruption (especially a chronic one) has recently disappeared.

‖ Nymphomania, lochia suppressed, scanty secretion of milk, painful sensitiveness of internal and external genital organs.

‖ Mammæ swollen and sore to touch; catamenia suppressed.

‖ Soreness of nipples.

[25] **Voice and Larynx. Trachea and Bronchia.** Weakness of vocal organs while talking loud.

‖ Hoarseness; with burning in trachea; as if chest were filled with mucus.

Accumulation of mucus in larynx and posterior nares, with obstruction of both nostrils, and with nasal speech.

Accumulation of mucus, causing tickling in larynx.

Tickling in larynx, together with sticking in it.

Frequent acute tickling in region of larynx.

Digitized by Google

[36] **Respiration.** ‖Respiration: oppressed and difficult; very heavy and deep; through nose, impeded, with apprehension and oppression; difficult, especially in l. lung.
Spasmodic oppression of breathing.
Shortness of breath from flatulence after eating.
‖Tight breathing and oppression, especially in evening.
Severe croupy condition, with symptoms of paralysis of cervical muscles.
‖Asthma, evening after eating, from flatus, with increase of dyspnœa when expectoration stops, decreasing when it recommences
‖‖Asthma for several years; fits of dyspnœa, very severe at night, but is never quite free even during day.

[37] **Cough.** Cough: with stitches in head; all night, with dull pains in chest; violent; ‖spasmodic, child puts hands to genitals; with varicose veins on legs; with shooting in scrobiculum, leaving when sputum is raised; < after eating sweets, ‖‖or taking wine; ‖during menses; does not permit him to sleep all night, with sticking in chest and slight thirst; hacking, but seldom, with persistent rawness in throat, in evening; tickling, very fatiguing during day, < at night; short, caused by tickling beneath sternum; frequent, dry hacking, without pain; dry, in evening, with heaviness in chest, which disappears after lying down, in evening; dry, frequently wakes her at night, during menses; dry, with violent stitches in chest, and a feeling as if it would burst, could only breathe and talk with difficulty; suffocative, a tickling irritation takes away breath; and oppression; troublesome, as soon as he brings up something he feels much relieved; spasmodic, with such as have large varicosities on legs, disposed to burst and bleed.
Incessant tendency to cough and spit.
Bloody expectoration, with dry cough, with burning and sore pain in chest, morning and evening, always before and during menses.
‖‖Frequent short cough; abundant easy expectoration of frothy mucus; cough < at night and in recumbent position, could not go to bed, sat in chair whole night, cough almost incessant. θBronchitis.
‖‖For last three months frightful cough, so constant as to leave him but little sleep, took away his appetite; much reduced in flesh and strength; irritation to cough, a constant tickling in upper third of chest on both sides; dyspnœa, anxiety; coughed a long time and then raised a little mucus; some soreness in chest; has a hernia, every cough presses down on sac and testicles.
‖Whooping cough: exhausting, spasmodic, exerted by

a tickling in larynx and trachea and as far down as middle of chest; in evening and at night without expectoration, in morning and during day with expectoration of a yellow, purulent, blood-streaked, tenacious mucus, having a repulsive, sweetish, putrid or metallic taste, or of bright blood; children grasp genitals when coughing.

‖Sputa: yellow, purulent; blood-streaked; bloody; tenacious; sweetish; putrid; metallic tasting; pure blood, morning and during day; raises a large amount of mucus of a milky color; of tenacious mucus like old catarrh, with cough, after expectoration a sensation as if hollow and cold in chest.

Expectoration of bloody mucus when coughing, preceded by stitches in side.

Inner Chest and Lungs. ‖Roughness and rawness in chest, with heat and sweat at night.

‖Anxiety in chest; angina; oppression, pressure, tightness.

Tightness in chest on walking in open air, as if constricted by a band transversely across it.

Tightness like a constriction about chest, with pain as if cut to pieces.

Tensive pains in chest.

Pressure: upon chest; in whole thorax; here and thereupon chest and back; cramplike, in chest and pit of stomach; as from rheumatism and incarcerated flatus; in morning, at r. extremity of l. clavicle; coming up from pit of stomach, > by eructations; extending into throat, as if a foreign substance were rising up; like a rheumatic drawing just beneath clavicle near shoulder joint; intermittent, outward, with drawing tension, here and there in l. chest; sharp, in r. chest near axilla; in l. side, or here and there over whole chest; on l. clavicle; and sticking in l. side of chest; tearing, in lower portion of l. chest.

Pain in chest as if beaten, while riding in a carriage.

Pain in chest, especially in r. side, as if blood were forcing its way into finest vessels in lungs.

Pain in a small spot in upper part of chest, as if internally there were a sore bruised spot.

Sensation of cramp in chest, extending to stomach and abdomen, 7 to 8 P.M.

Pinching and twinging pain in chest, from time to time.

Pinching pain in chest at intervals, with qualmishness, in morning.

Dull tearing pain in chest above pit of stomach.

Tearing stitches in chest beneath axilla, followed by a sore feeling.

Digitized by Google

Dull pressing sticking and tension in chest beneath r. axilla.
Violent stitches in chest when walking in open air, extending to l. side of neck, with difficult breathing.
Sticking in one spot in chest on deep breathing.
Chest symptoms < by motion, or when she lifts or takes hold of anything with hands.
A feeling of weakness and burning in sternum.
Tightness in middle of chest, beneath sternum, in evening.
Tightness of chest, with dull sticking and pressure in middle of sternum, with small, rapid pulse.
Burning in chest.
Dull stitches in r. side of chest.
Sticking pain in a spot in l. side of chest as large as a hand, with a feeling as if part were corroded and bruised.
Convulsive tightness of chest.
Chest is loaded with mucus, fails to hawk up mucus for some time, becomes dyspnœic, without anguish, passes off as soon as mucus is expectorated.
Coldness in chest.
Stitches in l. chest and in heart at every beat.
Sensation of emptiness behind sternum.
Tension in sternum.
Pressure upon upper part of sternum or lower portion of chest after eating.
Sticking pain in sternum.
Sticking and tightness in middle of chest during and after inspiration.
Stitches in middle of sternum, at times, on stooping, so severe that he cried out, at times followed by painful pressure deep internally, extending up into throat.
A stitch in upper part of sternum, extending into l. lumbar region, with a fear of stooping.
Dull stitch beneath sternum while eating.
Pain in l. pectoral muscles as if beaten or sore.
Ribs of whole l. thorax painful and sensitive to touch.
Burning in a small spot in r. side of chest, near pit of stomach, also above l. nipple.
Tension, bruised pain, and stitches in whole r. side of chest.
Tension and drawing in l. clavicle.
Tearing: in r. upper ribs near back; in r. chest; in l. chest beneath axilla.
Pinching pain in forepart of r. chest, followed by stitches in hypochondrium, extending to præcordial region, with long-remaining bruised pain in part.
Stitches: in r. side of chest, at times on turning body to r. or after dinner, followed by pressure, or alternating with stitches in r. groin and side of abdomen; constant,

Google

pressing, in r. side of chest, especially < by violent expiration; sharp, deep within r. chest; dull, in r. short ribs; beneath r. nipple; in l. chest, at times very violent; in side, at night; in region of l. ribs opposite pit of stomach, with ulcerative pain; in l. side of chest on moving arm; in l. chest, in evening, while standing, with bruised pain in spot; dull, in upper part of l. chest; beneath heart, pleuritic, in evening; violent, in l. side, < by breathing, > on stretching out; acute, in l. clavicle.

Sticking in l. thorax, with painful sensation in l. nipple.

Sharp sticking tearing in l. chest.

Painful pulsating throbbing in l. chest, near axilla.

‖Left chest; painfulness of l. nipple; spasmodic sensation in lungs and heart; cough lasting all night, with shooting pains passing to stomach; spitting of blood after a hard coughing spell, followed by burning and soreness in chest; sputa sometimes yellow, purulent, tenacious or sweetish, with a metallic taste; jerking of body during sleep; cramps in external muscles of neck when swallowing. θPhthisis.

‖A young, delicate girl, æt. 19, with a very fine skin and constantly ailing, passed through three attacks of pneumonia, treated antiphlogistically; attacked anew with pneumonia; on sixth day both lungs implicated, a stitching pain in trachea, increased by pressure, by breathing and by continuous short cough; lies on her back, does not stir, every motion increases pain; answers only by signs, every word spoken and every movement causes excruciating, tearing pain in occiput and from there to forehead, as if it would tear it asunder; bruised sensation in trachea and above manubrium sterni; respiratio nasalis; burning hot, dry skin; pulse full and exceedingly rapid; cold hands, with sensation of numbness, < at night; ægophony and mucous râles on r. side.

Heart, Pulse and Circulation. Severe pain in region of heart, with a slight swelling externally; great tenderness over cardiac region.

Pressure, spasmodic tension, and heaviness in heart.

Cramplike feeling in heart and lungs.

Stitches above heart in evening.

Sharp stitches in præcordial region, < by violent expiration.

‖Tension and stitches in præcordial region.

First cardiac sound hoarse and rather prolonged.

Palpitation: and a stitch with every beat of heart; frequent; momentary; with anguish, irregular spasmodic

Digitized by Google

movements of heart; beat of heart so strong that it takes breath away; beat of heart intermits.
‖Feels as if a cap were over heart; spine affected.
▮Irregular, spasmodic action of heart; occasionally one violent thump.
‖Man subject to rheumatism and suffering from aortic insufficiency and albuminuria; legs, scrotum and abdomen enormously swollen; heart's action very irregular; fearful attacks of dyspnœa.
▮Violent pulsations in bloodvessels, during heat.
Pulse: irregular; small and frequent evenings, slow mornings; increased by wine; scarcely perceptible; tense, accelerated, irregular, hard; small and hard; slow, easily compressed; slow, very feeble; 40 and intermitting; wiry and irregular.

30 **Outer Chest.** ‖Left-sided intercostal neuralgia, < on motion and on becoming tired, at times with palpitation.
Burning on r. chest as if in skin, extending to back.
Pressure beneath l. nipple.
Fine sharp drawing about l. nipple, with sore pain when touched; soon becomes pulsating.
A stitch beneath r. mamma.
Sticking beneath l. breast.
Stitches in l. mamma, dull and painful in morning.
Feeling of distension in l. mamma.
Left nipple very painful and sensitive.
Violent pressing pain in r. mamma.
Pressing sore pain about r. nipple.

31 **Neck and Back.** ▮Nape of neck feels weary and tired from writing or any exertion.
▮Stiffness and tension in neck.
Tearing pains in neck.
▮Stiffness and pain in cervical and upper dorsal muscles, in morning.
Cramplike stiffness in l. side of neck.
‖Pains as if beaten, and as if wearied by too great effort, in neck and back.
‖Pain in cervical muscles, at night, as if head had been held in an uncomfortable position, even felt during sleep.
‖Tearing in r. side of neck.
Pain in side of neck extending to shoulder, with stiffness of part, several mornings in bed, disappearing during day.
Tension and drawing in r. side of neck.
Tension in anterior cervical muscles.
Pressure as with finger on r. side of neck when talking.
A pinching feeling on both sides of neck, near trunk.

Digitized by Google

Cramplike drawing: down cervical muscles while chewing; on r. side of neck while holding head erect, as if neck were stiff.
Tearing stitches which pass into each other in neck and chin.
Tearing in r. side of neck posteriorly, also just below jaw, and behind and beneath ear.
Tearing in l. side of neck, extending behind l. ear.
Frequent violent tearing in l. side of neck, always disappearing on pressure, in morning.
Sticking tearing posteriorly and inferiorly, in a small spot in r. side of neck.
Stitches in cervical muscles.
Pain in back, more while sitting.
Bruised pain in back while walking in open air.
Burning pressure upon spine, somewhat above small of back.
Burning drawing pain in back and small of back during sleep, in morning, also a sensation of falling asleep, in shoulder joint, disturbing sleep, disappearing on waking.
Tensive pressure upon a small spot on back, by border of r. scapula.
Tensive rheumatic pain in spine.
Pinching and burning pain in small spots in back.
Stiffness and pain in upper dorsal muscles, especially on movement, < at night.
Burning tearing between spine and r. scapula.
Burning in l side and l. scapula.
Pain between shoulders; extending through small of back to sacrum.
Pressure: in r. side near middle of spine; in back beneath l. scapula; sharp, in back, close to r. scapula; in lower portion of spine, in small of back.
Pressing tension in back beneath r. scapula, extending down back and toward axilla.
Tensive pain between shoulders during rest and motion; as from an adhesive plaster, near inner margin of r. scapula.
Stitches: dull, beneath r. scapula; sharp, close to upper part of r. scapula, most acute during eructations; violent, in middle of spine and in abdomen, immediately after supper; violent, in middle of back while standing; beneath l. scapula, extending forward into l. pectoral region; extending into l. scapula.
Sticking: from r. to l. scapula; constant, in margin of l. scapula, extending toward axilla, so violent that she started, with rising of heat to head; dull jerking, just beneath and near l. scapula.

Digitized by Google

Beating throbbing under lower third of l. scapula.
Aching in lumbar region with a feeling of languor.
Pain in lumbar region of spine.
Tensive pains, very violent, rheumatic, in lumbar region and in shoulders.
Cracking in small of back while walking.
Feeling of weakness in small of back and transient weakness in lower extremities, on beginning to walk.
Paralyzed feeling in small of back, extending to hips, and l. side.
Pressing paralytic pain in small of back, as if one had been lying in an uncomfortable position, < on rising from a seat and beginning to walk.
Pain in small of back; on turning over in bed at night; and loins on stooping; when walking and sitting down; and abdomen, with stitches in l. side and drawing pain in lower extremities.
Feeling of tension and weakness in small of back while sitting, with tension in head.
Screwed-in sensation in small of back, on rising from a seat.
Drawing burning in back and small of back.
Drawing like a painful weakness in small of back and spine, while sitting and stooping.
Violent cutting in small of back from slightest movement, extending into calves and feet, so that he could neither walk, stand nor lie.
‖Burning along whole spine, < sitting.
‖Pain in small of back, when sitting, or when in act of sitting down; diminishes by continuous walking.
‖Pain at last dorsal vertebra.
‖‖Violent bruised pain in back, while walking in open air, with weakness.
‖‖Violent pain in small of back, when walking, was frequently obliged to stand still, though it was steadily relieved by continuing to walk.
‖‖Constant pain, night and day; either in back or loins; severe pains now here, now there. θNeuralgia.
‖Violent, long-lasting, aching pain about last lumbar vertebræ.
‖Patients cannot sit at all; they are so much < from sitting, particularly backache; burning along whole spine.
‖‖Spinal affections.
‖Pushing, aching, or at times pinching pain in coccyx; lancination in sacrum; pressure, tension and weakness in lumbar and sacral regions.
‖‖Numbness and formication in lower extremities; spinal irritation, with great prostration of strength.

Digitized by Google

‖Sexual power lost.
‖Twitching in back or any part of body; sensitiveness of spine to touch.
‖Burning along whole spine, < worse when sitting; pain in small of back, < by walking.
‖Burning in shoulder blades, tension between shoulders; extreme restlessness of legs. θSpinal irritation.

Upper Limbs. Burning in l. axilla.
Dull sticking tearing in r. axilla.
Stitches in l. axilla and down the forepart of chest, arresting breath in evening.
Sticking tearing on top of r. shoulder.
Dull stitches beneath r. shoulder.
Stitches in l. shoulder.
Bruised pain in l. arm, he is unable to raise it on account of pain in deltoid muscle.
Pressure and heaviness in both shoulders on waking.
Feeling of soreness as after a bruise, in a small spot in axilla.
Falling-asleep sensation in shoulder joint.
Rheumatic pains in both deltoid muscles, < by raising arm.
Acute rheumatic drawing extending from top of shoulder, in deltoid muscles down both arms, < by raising arms.
Jerking in r. shoulder, followed by bruised pain in l. scapula.
Tension and tearing in both shoulder joints.
Rheumatic tension in head of l. humerus.
Tearing arthritic pain in shoulder joint, extending down to fingers.
Tearing pain deep in r. shoulder.
Tearing in r. shoulder, with pressure in middle of upper arm, disappearing on scratching.
Tearing pressure in l. shoulder, about beginning of neck.
Violent tearing in shoulder joint upon which she was lying, deep in bone, in evening in bed.
Tearing, extending into axilla, beneath l. arm.
Tearing in both upper arms from deltoid downward.
Tearing in anterior surface of l. upper arm, near elbow, in r. arm near shoulder.
Intermittent tearing in middle of inner side of l. upper arm.
‖Tearing in l. upper arm near shoulder.
Sticking in r. upper arm, in morning.
Sticking and burning in anterior surface of l. upper arm, after dinner.
Bubbling in l. upper arm.
‖Burning in l. forearm.

Digitized by Google

Dull pain in r. upper arm.
Bruised pain in bone of r. upper arm.
Drawing in l. upper arm close to elbow.
Tearing in both upper arms close to elbows.
Prostration of both arms with tension.
Loss of power in arm and pain at wrist.
Paralytic feeling in arms; in brain diseases; paralysis from cerebral hemorrhages.
Twitching of l. arm in morning during sleep.
Drawing pain extending from tips of fingers up both arms.
Tearing in r. elbow joint, > by rubbing, in morning.
Constant painful heaviness, as if paralyzed, in bend of l. elbow.
Disagreeable jerking in elbow joint, between olecranon and on inner condyle of humerus.
Bruised sensation in bend of r. arm.
Rheumatic pressure in elbows.
Rheumatic drawing in r. elbow.
Tearing in bend of elbows.
Tearing up and down in l. elbow, in a spot of a hand's breadth.
Sticking and tension in r. elbow joint in evening, when yawning.
Bruised pain in forearm on touch and on turning arm, at times with tearing in thick portion of it.
Drawing pain in forearm as if in bone.
Cramplike drawing in forearm or in fingers.
Dull bubbling tearing in muscles of inner side of r. forearm, not far from elbow.
Sharp tearing in l. forearm, mostly in upper part.
Burning in forearm above r. wrist, on moving arm.
Tension in r. wrist as if muscles were too short.
Rheumatic tension above l. wrist.
Drawing pain in r wrist as if sprained.
Rheumatic drawing and tearing in r. wrist.
Tearing internally in wrist.
Tearing in middle of r. wrist, followed by tearing toward backs of fingers.
Tearing in bend of l. wrist, with tearing stitches on back of l. hand.
Burning pain in r. wrist and ball of hand.
Tearing and painful throbbing in l. thumb toward tip as if in an ulcer, with falling asleep and a numb sensation in it, and with externally perceptible heat.
Tearing in tips of index, middle and little fingers.
Tearing drawing in last phalanges of l. middle and ring fingers.
Drawing tearing in r. thumb.

Digitized by Google

Jerking tearing extending from first finger joint of l. hand toward tips in evening.
Sharp sticking tearing in last joint of r. thumb.
Tearing stitches in fingers.
Tearing stitches in middle joints of last three fingers of both hands.
Sharp cutting stitches in tips of both thumbs.
Large needle stitches through first phalanx of l. thumb.
Crawling and throbbing frequently in l. thumb, with a feeling of heat in it.
Jerking in first joint of r. thumb without pain.
Tearing in r. thumb and above it, and in two adjacent fingers.
Tearing beneath nail of r. thumb.
Tearing in metacarpal bones of both index fingers.
Pressing pain in middle joint of r. index finger, and at intervals in its first phalanx.
‖Tearing in first joints and phalanges of fingers.
‖Tearing in back of l. hand.
‖Spasmodic tension of r. hand.
‖Weakness and trembling of hands while writing.
‖Trembling of hands during menses.
‖Lameness and deadness of hands; they look bluish.
Trembling of hand, more when resting it quietly upon table than when leaning upon elbow.
Stiffness of back of hand and a feeling of cramp in extensor muscles of thumb, while playing piano.
Rigidity of hands, mostly of r. hand.
Tension in metacarpal bone of little finger, extending toward wrist.
‖Spasmodic tension of r. hand; it was quite blue, cadaverous, heavy and insensible, with a small thready and scarcely perceptible pulse
Hands are asleep in morning on waking.
Pressure in ball of l. hand.
Burning in a small spot in l. hand.
Pinching or bruised sticking in ball of l. hand, above little finger, very painful.
Tearing in hand extending from wrist to first phalanx of thumb, while riding in a carriage.
Sticking tearing in r. hand in bend of wrist, and in palm near little finger.
Sharp tearing in r. hand just beneath joints.
Pressing tearing at root of hand near region of pisiform bone.
Tearing on back of r. hand, in fourth and fifth metacarpal bones and in wrist.
Tensive tearing in r. palm.

Digitized by Google

Tearing in back of l. hand, also at times alternating with tearing of r. hand.
Tearing drawing in palm of l. hand, between thumb and index finger.
Cracks between fingers.
Dry herpes on hands and fingers; they are rough and itch.
Cracked and dry skin of hands, even in mild weather.
Chilblains itch and swell.

Lower Limbs. Tearing anteriorly on crest of ilium while sitting.
Sticking tearing on r. natis below hip.
Tearing in natis beneath l. hip.
Pulsation in l. natis.
Bubbling in r. natis.
Pressing drawing just above r. natis.
Drawing pain in nates after drinking wine.
Bruised pain in gluteal and posterior femoral muscles.
Sticking on posterior surface of thigh while yawning, in evening.
Tearing just beneath both hips, and posteriorly on r. hip.
Pressing drawing on posterior portion of thigh, so that he could not sit down; when walking it gradually disappeared.
Bruised pain with pinching, heat and burning in region of l. hip, extending to middle of thigh, with weakness of leg, and persistent sensitiveness in hip, while walking and standing, pain disappears while sitting.
Bruised pain in hip joint, as if flesh were loosened from bone.
Violent pain in hip joints, as if beaten, tension and pain on motion.
Left hip painful posteriorly.
Dull pressure above r. hip.
Drawing, tearing and burning posteriorly in l. hip.
Pressing tearing in l. hip.
Painful sensation of heaviness and lameness in r. thigh while walking.
Heaviness and paralytic pain in l. femur, above knee, very violent while walking, standing and sitting, in evening.
Paralytic pain in r. thigh, first in upper part, then extending downward toward knee, while standing, > by sitting, in evening.
Bruised pain on anterior surface of l. thigh, sore on pressure.
Rheumatic drawing in thighs.
Tearing in thighs.

Drawing pain in inner side of r. thigh.
Drawing sore pain in outer muscles of thigh.
Dull jerking pain on inner side of thigh.
‖Tearing in thighs, especially in their thick portions, violent and persistent.
Violent tearing on outer side of thigh as if in bone, extending from hip down middle of thigh, while sitting.
Painful tearing in l. thigh, extending upward from knee to middle.
Tearing in inner side of l. thigh, disappearing on motion.
Tearing stitches in thigh while walking and lying.
‖Severe, extensive, but superficial moist excoriations of inner and upper parts of thighs.
‖Itching of thighs and hollows of knees, in evening.
‖Varices in thigh, extending to labiæ.
Falling asleep of r. leg, as far as knee, at night.
Great weakness in hollows of knees and in small of back, while walking.
Dull pain in knee gradually increasing and decreasing.
While walking a feeling of pain in bend of knee, as if muscles were too short.
Pain in r. ligamentum patellæ on pressure or walking, especially on ascending or descending.
Pain in joints of knees and ankles.
Violent pains, first in r., then in l. patellæ and in heel, in evening and night.
Bruised feeling in knee joints.
Gnawing and boring in l. knee, with tension in upper part of calf, renewed after sitting down.
Frequent dull boring pain in knees.
Painful boring in knees, especially in r. in evening.
Painful tension in hollows of knees while walking in open air.
Tension, then burning, just below r. knee, in upper part of tibia.
Tensive pain in r. knee joint while walking.
Drawing pain in knee at night.
Rheumatic drawing in r. knee, and downward in tibia.
Tearing and bruised pain in bends of knees, < while walking, > while sitting, in morning.
Tearing in r. knee and also in outer margin of bend of knee, extending into calf.
Tearing in r. knee disappearing on rubbing.
Tearing on outer side of l. patella.
Tearing and gnawing in l. knee, extending upward and downward.
Tearing and contraction in l. knee, as if in bone, very painful during rest and motion.

Digitized by Google

Tearing in l. knee joint or from knee upward, with bruised pain in spot.
Pressing stitch on inner side of r. knee during rest.
Stitches in knee.
Stitch like a flea-bite on inner side of r. knee.
Beating in knees while sitting after a short walk.
Frequent crawling in l. knee joint.
Violent itching on r. knee joint.
Tightness and stiffness of muscles of calf while walking.
Tension and pressure in leg down along tibia.
Tensive pain in l. leg.
Tension and drawing in calves.
Alternating pressure and drawing in both bones of r. leg.
Pressure followed by tearing on inner side of l. leg, between ankle and calf.
Cramp in leg in morning in bed drawing it up.
Tearing in calves.
Tearing downward in tibia to back of foot.
Piercing stitches in tibia.
Burning pain in tibia.
Cramp in calves threatens on turning over.
Cramplike pain in calf and l. foot, also at night.
Jerking in l. calf.
Drawing pain in legs in evening.
Rheumatic drawing and tension in r. tibia.
Drawing pain in r. tibia and down both calves.
Tearing in r. leg beneath knee followed by a bruised pain.
Tearing in l. leg between tibia and ankle.
Tearing in calf extending to malleoli.
Tearing in lower end of r. tibia.
Sticking pain in both tibiæ while walking.
Swelling about malleoli of foot formerly diseased.
Rheumatic tension in l. ankle during rest.
Pain as if sprained in ankle on moving foot.
Pressing pain beneath outer malleolus.
Tearing beneath r. inner malleolus, extending to heel in evening while sitting.
Tearing in bend of ankle and also in margin and on back of l. foot.
Tearing in r. outer malleolus disappearing on rubbing.
Pulsating tearing in both tendons Achillis.
Burning beneath r. inner malleolus.
Violent inflamed swelling of foot.
Trembling of feet; on raising them when sitting.
Trembling of feet and difficulty of raising them, with frequent stumbling.
During menses weakness and trembling of feet.
Burning beneath r. heel, < when stepping and walking than while sitting, in evening.

Digitized by Google

Burning and ulcerative pain in both soles, in morning.
Pain in outer margin of foot as if bone would break while walking, on raising foot, also on holding it sideways and resting it upon tip.
Pain in soles on stepping upon them, they seem swollen, with a feeling as if scratched by toothed instrument.
Frequent acute falling asleep of feet during evening.
Paralyzed feeling in whole r. foot.
Tension in r. foot, as if foot had been sprained or muscles were too short.
Tension in r. sole, as if tendons were too short, while stepping or walking, in evening.
Drawing in bones of l. foot.
Drawing tearing in r. foot extending into malleoli, with a feeling of heaviness during rest.
‖Drawing tearing about both malleoli, and in tendons Achillis.
Tearing in outer margin of r. foot toward toes, disappearing on rubbing.
Tearing and crawling on back of l. foot, with a feeling of numbness in soles, disappearing on walking.
Tearing and pain in heels, feet seem beaten from body.
Tearing in both soles.
Sticking tearing in soles, in bend of joints of r. little toe.
A stitch above r. foot while running.
Burning stitches in bones of back of foot, here and there.
Stitches in heel.
Piercing stitches in ball of foot.
Toes painful, as if sore after walking.
Ulcerative pain in r. great toe, in evening.
Pain, like suppuration in nail of great toe, when touched.
Feeling as if there were blisters on toe, as after walking.
Drawing, tearing, sticking in toes and forepart of foot.
Tearing in lower portion of first two r. toes.
Tearing sore pain in tip of great toe and beneath nail.
‖Sprained pain in bend of first joint of toes.
‖Sticking tearing in first joint of r. great toe.
Sticking tearing in bends of first joints of first two r. toes.
Tearing in r. great toe, with jerking tearing in outer side of l. calf.
Tearing in r. little toe in evening.
Burning and sticking in ball of great toe, as if part had been frozen.
Prickling stitches in l. great toe.
Pulsating sticking in tip of r. great toe.
‖Paralysis of feet from spinal or chronic nervous disease, softening of brain or cerebral hemorrhage.
‖‖Feet sweaty and sore about toes; fetid suppressed foot sweat, with much nervous excitement.

Digitized by Google

Chilblains, < from friction; painful.
Excessive nervous moving of feet in bed for hours after retiring, even when asleep.
Great weakness of feet, in morning in bed, disappearing after rising and walking about.
Intolerable boring pain in heel after drinking wine.
Ulcerative pain in heels, < when walking.
Tearing and tension in margins of r. foot.
Paralysis of feet from suppressed foot sweat, by getting wet; < from wine.
Coldness of feet at night.
Great heaviness of lower extremities during menses, with violent drawing about knees, as if they would be twisted around.
Uneasiness in lower extremities at night, could not keep them still.
In morning in bed cannot allow one leg to be bent on account of discomfort; is obliged to stretch it out.
Feeling of congestion of blood in l. leg.
Attacks of tremulous weakness in lower extremities, with paleness of face.
Weakness of lower extremities, especially of calves, as after a long walk, on rising from a seat.
Paralytic weakness and heaviness of lower extremities, in afternoon on beginning to walk, disappearing on continuing to walk.
Weakness and pain in lower extremities, she could scarcely step, with sensitiveness to draft.
Heaviness in lower extremities, with tearing, could scarcely raise them.
Varices in legs, with fidgety feet.
Stiffness of leg, could not walk.
Great weakness of limbs; formication and cold feet at night; chronic neurasthenia.
Incessant and violent fidgety feeling in feet or lower limbs, must move them constantly.
Inflammation of tendo-Achillis, erysipelatous; < from touching heel to ground and from wine.
Sensation of drawing and contraction in r. tendo-Achillis.
Legs œdematous.

[34] **Limbs in General.** Weakness and weariness of limbs.
Sudden sensation of weakness in limbs, with canine hunger.
Great weakness of limbs, lumbar region and bends of knees, when walking in open air.
Trembling of limbs, with twitching of muscles of thighs.
Aching of limbs.
Rheumatism, tearing, lameness and trembling; or crampy

pains; twisting in affected limbs and frequent jerking of whole body during sleep; < from being overheated and from exertion.

Piercing sticking in joints.

Acute darting pain through joints, especially in ankles, knees and elbows, with numbness of adjacent parts and an exhausted, paralyzed sensation in muscles of upper arms and thighs, < on r. side.

Sticking and tearing in limbs, < after being heated, while sitting.

Tearing in limbs after physical effort and rapid walking.

Drawing in limbs; sometimes ending in slow, dull stitches.

‖Violent drawing tearing in middle of almost all bones of limbs; unsteadiness on account of pain.

‖Bruised feeling in limbs and weariness, in morning on waking.

Pressure on joints produces soreness and pricking pains.

Cramp in extremities, especially in calves of legs.

‖Stiffness of joints, with sharp, lancinating pains above joints, transverse.

Tetanic stiffness and rigidity of limbs, with soreness.

Here and there oscillatory movements and frequent formication of limbs.

‖Violent itching in all joints in succession.

Itching in bends of joints.

Itching in extremities, not in joints.

Violent itching in all joints in succession, last in hip joint.

[35] **Rest. Position. Motion.** Rest: stitch in r. knee; rheumatic tension in l. ankle; heaviness in r. foot; stitches in l. testicle; puerperal convulsions <; crawling and formication in calves extending into toes.

Lying: vertigo >; on back, conjunctivitis <; on painful side, conjunctivitis >; on l. side, pain in liver <; hemorrhoids painful from pressure of flatus; with head hanging over side of bed, body prone, dysmenorrhœa; on back, > pain in spine; bronchial cough <; feels numb all over; on back typhoid.

Sitting: in bed, as if bed were swaying; backache, with coryza; nausea >; > constrictive pain in l. side of lower abdomen; drawing in l. inguinal region; prevented by pressing and boring in rectum; cutting in orifice of urethra; can only pass water while sitting bent backward; pain in back <; pain in small of back; tension and weakness in small of back; drawing and painful weakness in small of back; burning along spine; pain in small of back; backache <; burning in spine <; could not; pressing drawing on posterior portion of thigh; sensitiveness of hip disappears; tear-

Digitized by Google

ing anteriorly on crest of ilium; heaviness and paralytic pain in femur; paralytic pain in r. thigh >; pain in bends of knees >; beating in knee; tearing beneath r. inner malleolus; prickling drawing in testicles; sticking and tearing in limbs; burning in small places.

Sits with legs crossed; pressure of urine on bladder, none passes.

Holding head down: illusion as if she had a large goitre.

Stooping: vertigo; after, while sitting, uneasiness in stomach; stitches in sternum; pain in small of back and loins; drawing and painful weakness in small of back; prickling drawing in testicles.

Standing: vertigo; stitches in l. hypochondrium; heaviness in rectum; sticking and bruised pain in region of l. kidney; sensitiveness of hip; heaviness and paralytic pain in femur; paralytic pain in r. thigh.

Inclination to stretch.

‖Sliding down in bed. θTyphoid.

Motion: nausea <; pain in r. hypochondrium <; < stitches in internal ulcer above navel; chest symptoms <; intercostal neuralgia <; stiffness in dorsal muscles <; slightest, causes cutting from small of back into calves and feet; knee painful; constant, of feet; crawling and formication in both calves, extending into toes.

Turning in bed: pain in small of back.

Blowing nose, coughing or sneezing: involuntary urination.

Writing: neck weary and tired; chilliness.

Playing piano: stiffness in back of hand; cramp in extensor muscles of thumb.

Yawning: sticking and tension in r. elbow joint; sticking in posterior surface of thigh.

Eating: neuralgia <; gums painful.

Laughing: tearing in r. side of occiput.

Moving arm: burning in forearm above r. wrist.

Raising arm: pain in deltoids <.

Rising: shooting in hypogastrium; from a seat, pinching in r. groin; from a seat, screwed-in sensation in small of back; from a seat, weakness of lower extremities, especially calves.

Stepping: upon feet, pain in soles; tension in sole.

Walking: vertigo in occiput; headache <; stitches in l. hypochondrium; flatulent colic <; constrictive pain in l. side of lower abdomen; burning sticking in anus; sticking and bruised pain in region of l. kidney; involuntary urination; lumps of coagulated blood during menses; in open air, tightness of chest; in open air, stitches in chest; bruised pain in back; cracking in

Digitized by Google

small of back; weakness in small of back and legs on beginning; pain in small of back; pain in small of back >; pressing drawing in posterior portion of thigh gradually disappeared; sensitiveness of hip; heaviness and lameness in r. thigh; heaviness and paralytic pain in femur; pain in bend of knee; pain in r. ligamentum patellæ; painful tension in hollows of knees; tensive pain in r. knee joint; pain in bends of knees <; stiffness of calf; sticking in tibiæ; burning beneath heel; pain in outer margin of foot, as if bone would break; tension in sole; after, toes painful as if sore; ulcerative pain in heels <; on beginning, paralytic weakness and heaviness in lower extremities; penis sensitive; weakness in lumbar region and bends of knees; tearing in limbs; sweat; stinging pain in bunion on l. little toe and ball of foot.

Running: stitch over r. foot.

Exertion: neck feels weary and tired; rheumatism <; tearing in limbs.

Lifting: chest symptoms <.

Trembling of feet on raising them.

[35] **Nerves.** General internal discomfort.

Every slight emotional excitement causes trembling.

Sensation of general trembling without trembling.

Frequent fainting several times daily, followed by prostration and general numbness.

Faintness, unconsciousness, almost without pulse.

Sudden faintlike weakness while standing, so that she could scarcely reach a chair.

Weariness, frequent yawning, great exhaustion in whole body; heaviness and weariness in morning in bed.

Lassitude, prostration and pains in limbs.

Feeling of languor, with aching in lumbar region.

Body weak and prostrate, especially after dinner, at times with tremulousness and heaviness of head.

General lassitude and sensation all over, as if beaten.

General exhaustion, sleepiness, aversion to noise, and yet difficult hearing, a dreamy condition, as after a sleepless night, with shivering and cold creepings.

On waking in morning, inability to move head and limbs, with extreme sensibility to contact over whole surface; after about an hour this paralytic state improved enough to permit walking, but with a staggering uncertain gait, and a marked tendency to fall to l. side.

Decrease of sensibility to touch; tickling, on contrary, was more quickly responded to than in normal state.

When he lies down feels numb all over; fears apoplexy.

Great inclination to stretch body and limbs.

Digitized by Google

Uncomfortable feeling of pressure and pressing upon inner walls of trunk, as if whole body would be forced asunder, without trace of flatulence, rather caused by nerves, < in r. than in l. side.

Cramplike pain here and there in muscles.

Sensation of swelling.

Hands tremble; grasps at flocks, or slides down in bed.

Much visible twitching of body and face.

Twitching and jerking in various muscles.

Fidgety feet; must move them constantly.

Jerking through whole body during sleep.

Spasms; child cross before attack, body hot, restless at night, cries out in sleep, looks afraid and anxious on awakening; involuntary or more frequent urination; body very hot; rolls head anxiously from side to side; child has been cross and irritable for days previous, with hurried motions, distended abdomen; fidgety feet, r. side twitches; pale children during teething; with hydrocephaloid after cholera infantum, great emaciation and prostration; after disappearance of old eruptions; coma from cerebral exhaustion; loss of sensation of whole body; with mania from mental excitement; somnambulism.

Puerperal convulsions after *Phos.*, apparently indicated, had failed; cerebral epilepsy; symptoms felt mostly during rest; < after dinner and toward evening; twitching in various muscles; whole body jerks during sleep.

Convulsions during dentition, with pale face and no heat, except in occiput; ushered in with twitching of single muscles, fidgety feet or loud screams; gnashing of teeth; rolling of eyes; sharp cries, caused by pain in head; automatic motion of hands and head, or of one hand and head; coma, pulse coming in long waves; sleep restless, with starting, jumping, screaming out, twitching of muscles and jerking through whole body, wakes frightened, stares, rolls head from side to side.

A young mulatto girl, æt. 18, in good health until a few months ago, when she hurt her leg, and had a running sore, which was dried up; at next menstrual period she had convulsion, which lasted several hours; *Zincum* 200, in water, every two hours, for two days; it stopped spasms, but was followed by suppression of urine lasting two weeks.

A young lady, æt. 21, small, slender, and a brunette, from injuries received three years ago, had a very weak and tender spine; touching her on spine would give her pain, and a child slapping her on back threw her into a tonic spasm which lasted several hours; *Zincum* 200

Digitized by Google

in four months (a powder once in two weeks) cured weakness of back, but almost invariably produced suppression of urine for two or three days.

‖After sitting in spiritual circles, shocks in upper and lower limbs; gradually they became more and more threatening, and two months later he received nervous shocks in hands and legs, during prayer and sleep at night, sometimes at other hours; felt great heat in head; peace of mind forsook him; heard voices speaking from within him in abusive and filthy language; felt depression of spirits; it seemed that small balls coursing along hands and legs caused the shocks; *Nux vom.* did some good, lessened heat of head, but mesmerizing made him <, as if nerves were violently torn; as if fire were coursing through body, running from l. foot to head, burning forehead, eyebrows, ears and eyes; constant desire to put an end to his life; always restless; feels < in morning, > in evening; sleep disturbed; peace of mind gone; prejudices and superstitious beliefs began to trouble him; shocks convulsed him frightfully; vicious and abominable thoughts, chiefly lustful, trouble him; sometimes workings of limbs ludicrous, sometimes grave; had to laugh or cry against his will; sensation of creeping, warm, throbbing, shifting, running, encircling, in all parts of his body; visions of living and dead; did not speak, suffering continually his shocks; sometimes falling down as if paralyzed; walks with heavy steps, or runs as if in fright; utters in agony the loudest lamentations and cries; would not eat unless forced to; pale and emaciated, suffering, distracted countenance; after *Zincum* a small abscess a little below middle of r. clavicle.

‖Chorea, depressed spirits, general health suffers; caused by fright, suppressed eruptions; fidgety condition of feet whilst lying in bed; jerks through whole body during sleep, sometimes with screaming; chronic, starting and rolling from side to side on waking; cries out as if frightened; < after drinking wine, after dinner, toward evening, during rest; > from exercise. θChorea.

‖After spending weeks with friends, on returning could remember nothing she had said or done; *Zincum* 30, followed by cure of epilepsy of more than three years' standing.

‖Neuralgia after herpes zoster.

Sensation of soreness in internal and external parts.

Violent throbbing through whole body.

‖Neuralgic pains between skin and muscle, in subcutaneous cellular tissue; great weakness of limbs; deficiency of vital power.

Digitized by Google

Nervous insomnia, with intolerable itching of skin at night without eruption.

Weakness, numbness and tremor of hands when writing.

Paralysis after suppressed foot sweat.

Sleep. Sleeplessness.

Falling asleep prevented by mental activity.

Loud screaming out at night in sleep without knowing it.

Child cries out during sleep, if awakened, expresses fear, and rolls its head anxiously from side to side.

In evening immediately after lying down, rises up in bed, talks unintelligibly, with short, tremulous respiration.

Starting from sleep with involuntary jerking in l. lower extremity.

Unconscious starting during night's sleep, during menses.

Frequent waking at night on account of anxiety.

Woke frequently at night, could not sleep after 5 A.M.

Sleep very restless, full of dreams.

Frequent waking at night, with difficult falling asleep; anxious dreams toward morning.

Very restless sleep, full of fantasies and thoughts upon which he was obliged to reflect.

Sleep at night frequently interrupted; nights seem very long.

Restless night; awoke screaming as if delirious, as if geese were biting him.

Uneasiness during sleep after midnight; awoke much too early, with great weariness and a feeling as if eyes lay deep in head.

Waking about midnight from vivid dreams, with a feeling of great heat over whole body, without being warm, without sweat, with a feeling of dryness and without thirst, is obliged to uncover arms and limbs.

Sleep disturbed by violent headaches and painful cramps in calves of legs.

Sleep agitated and unrefreshing, with occasional nightly sweat.

Could not go to sleep for three or four hours after retiring, because of a sensation as if bugs were crawling from her feet to her knees, extending later to thighs; this sensation would also rouse her from sleep.

Constant yawning.

Drowsiness: with frequent gaping; yet cannot sleep, head feels so light; in morning; immediately after dinner; with dulness of head, without being able to sleep; at her work, > in open air.

Deep exhausting sleep with many dreams.

Awoke frequently, with violent palpitation and screaming, from anxious dreams of thieves.

Digitized by Google

Reveries during sleep.

Dreams: anxious; anxiety continued after waking; with mental excitement, talking about midnight about his dreams; vexatious; quarrelsome; sad; as if she were being strangled, in morning, fear lest the man who strangled her would return; disgusting, of being smeared with human excrement; of corpses and horses which changed into dogs under him; vivid, feeling weary in morning on waking; anxious, of water and of drowning; of fire; of fleeing, followed by sweat.

During sleep: cries out, awakes with fear; limbs and body jerk; nightmare.

[38] **Time.** Toward morning: anxious dreams; sweat.

After 5 A.M.: could not sleep.

Morning: anxious restlessness; morose; vertigo; headache; head heavy, dizzy and confused; headache as from coal gas; pressing headache; dimness of vision; lids agglutinated; lachrymation; burning in eyes and lids; inner canthus agglutinated; crawling in ears; sneezing; bitter, slimy taste; pain in ulcer on inner surface of l. cheek <; rawness and dryness in throat; dryness in fauces; hawking of mucus; nausea; burning from epigastrium into œsophagus; pressure in stomach; sticking in præcordial region; rumbling and rolling in abdomen; twisting pain in abdomen; stitches in l. groin; involuntary diarrhœa; hard stool; expectoration; pressure on clavicle; pinching in chest, with qualmishness; pulse slow; stitches in l. mamma; stiffness in cervical and upper dorsal muscles; burning drawing in back; sticking in r. upper arm; during sleep, twitching of l. arm; tearing in r. elbow joint; cramp in leg; burning and ulcerative pain in soles; in bed, weakness of feet; in bed, cannot allow one leg to be bent; bruised pain in limbs; heaviness and weariness; inability to move head and limbs; morning in bed, chilliness.

Forenoon: headache with pain in eyes; until evening, thirst; chilliness; febrile paroxysms; hot face, cool body.

11 or 12 A.M.: ravenous hunger, with weakness of legs and trembling.

Noon: low-spirited, lively in evening; irritable, peevish, terrified, stupefied and dizzy; insatiable; pressure and coldness in stomach; gurgling and rumbling in stomach; motion with feeling of coldness in stomach.

After dinner: sticking and burning in anterior surface of l. upper arm.

Afternoon: morose; quiet thoughts of death; dizzy stupefaction; burning in eyes; sneezing; thirst, with heat

Digitized by Google

in palate; during menses, thirst; eructations; paralytic weakness and heaviness in lower extremities; sensitive to open air; as if sweat would break out.

Toward evening: child cross; pressure on eyes; biting in eye; keratitis pustulosa <; fluid coryza; flatulent colic; puerperal convulsions <.

3 to 4 P.M.: cardialgia.

During day: moisture of eyes; nausea.

All day: frontal headache; dry coryza; sweet taste.

Night and day: pain in back and loins.

From 4 to 8 P.M.: chill.

Evening: low-spirited, lively at noon; soreness in vertex; fretful, despondent, morose; vertigo in occiput; inability to support head; dizzy stupefaction; heaviness in forehead; pressure upon a small spot in forehead; throbbing in head; screwing together in sides of head; painful raging in r. side of occiput; pressure in l. eye; burning in eyes and lids; photophobia and lachrymation; pterygium <; green halo around light; feeling of sand in eye; pulsating in ears; burning in ears; sudden coryza; alternate fluent and dry coryza; neuralgia of fifth pair <; toothache; pressing pain in tonsils; sweetish blood in mouth; insatiable thirst; thirst for beer; violent hiccough; burning in epigastrium; pressing in stomach; stitches in l. hypochondrium; frequent emissions of flatus; rumbling in l. side of abdomen; offensive flatus; pain in abdomen, head and eyes; diarrhœa with griping; burning sticking in anus; cutting in orifice of urethra; urging to urinate; dribbling of urine; asthma; hacking cough; no expectoration; stitches above heart; pulse small and frequent; stitches in l. axilla and down on forepart of chest, arresting breathing; sticking and tension in elbow joint; jerking tearing from first finger joints of l. hand toward tips; sticking on posterior surface of thigh; heaviness and paralytic pain in femur; paralytic pain in r. thigh, fierce in upper part, then extending down toward knee; pain in patellæ and heels; painful boring in knees; drawing in legs; tearing beneath r. inner malleolus; tension in sole; ulcerative pain in r. great toe; tearing in little toe; sensitive to open air; cold feet; could not get warm in bed; chills; coldness in abdomen; hot head and cheeks; burning in soles; coldness of forehead; itching on face; itching on scrotum; itching between scapulæ; itching of thighs and hollows of knees, as if toes had been frozen; violent sticking itching in anterior ball of great toe; sticking, pricking, itching on forehead, thigh, malleoli, feet and other parts of skin, in bed; sudden itching here and there.

Digitized by Google

After 8 P.M.: burning in eye <.
Night: headache; pain of kerato-iritis <; syphilitic iritis <; itching and heat in pterygium <; ophthalmia <; noise in ears; an anxious sore feeling in throat; bitter taste in fauces; eructations; cough with indurated liver <; dull moaning, indurated liver; cutting in abdomen, colic followed by thick leucorrhœa; prickling and drawing in l. groin; loose stool with griping and tenesmus; frequent urging to urinate; irresistible sexual desire in women; fits of dyspnœa; cough prevents sleep; tickling cough <; heat and sweat; stiffness in dorsal muscles <; falling asleep of r. leg as far as knee; pains in patellæ and heels; drawing in knee; cramplike pain in calf; coldness of feet; uneasiness in lower extremities; restless, fidgety feet; unconscious starting; frequent waking; sweats; nightmare; chill; sense of heat without heat; itching as from flea-bites; itching of soles, and calves and thighs; twitching of limbs, shocks through whole body, violent screaming, scarlatina; skin hot and dry; muttering during sleep; threatened convulsions; scarlatina.
About midnight: talks about her dreams.
After midnight: wind colic; frequent micturition; uneasiness during sleep.

[39] **Temperature and Weather.** Wants to uncover: during sweat.
Overheating: rheumatism <.
After becoming heated and getting cold: throbbing in hollow tooth.
Warm room: headache <.
Warm water: conjunctivitis >.
Open air: headache >; after walking, pressure in occiput; lachrymation; violent pressure in eye while walking; painful tension in hollows of knees while walking; drowsiness >; sensitive; chills; sweat.
Draft: sensitiveness.
Cold: tips of fingers and feet sensitive; touching anything causes chill; dry rhagades on hands.
Cold air: eyes feel sore and hot, pterygium; conjunctivitis <.
Cold water: headache >; stopped nosebleed.
Washing: uneasiness in stomach and shuddering.
Sea-bathing: herpes in mouth.
Cold weather: roughness and irritation on back of r. hand.
Approach of a storm: chills.

[40] **Fever.** Sensitiveness to open air in afternoon and evening.
Great sensitiveness to cold, especially in tips of fingers and in feet.

Digitized by Google

Cold nose, hands and feet.
Cold feet: awaken at night; in evening, lasting a long time, in bed.
Frequent febrile shivering down back.
‖Violent trembling of limbs.
Rigors, trembling of limbs.
Chilliness: and coldness of whole body; in forenoon; followed by febrile symptoms, over whole body, with chilly creeping and drawing through back; with nausea; for a quarter of an hour while writing, with a sensation as if a foreign stony hard substance were in throat, with constant yawning; over upper and lower abdomen; during menses; constant, with increased internal warmth; with general sick feeling; on waking in morning in bed.
Shivering: with intense headache; with shuddering nausea; on scrotum, with shrivelling and gooseflesh on it and neighboring parts; in evening, could not get warm in bed for a long time; in open air, in evening; from penetrating wind, not from cold; with discomfort, like premonition of a storm; followed by cold sweats.
Febrile paroxysms several times a day, recurring in forenoon and afterward; chilliness and shivering, flushes of heat over whole body, violent trembling of all limbs, extreme sickness, even to faintness, qualmish taste, with loathing of morsels of food in mouth, feeling of emptiness in stomach, violent throbbing through whole body, with short hot breath, with very dry mouth, hot, dry hands.
Chills: begin after eating dinner; in open air; on approach of a storm; run down back; alternate with heat; external, with increased internal warmth; from touching anything cold; in evening; followed by nausea, eructations, and accumulation of sour water; from 4 to 8 P.M., on lying down, with subsequent heat and sweat.
Shaking chill with pale, sunken face, weak, rapid and irregular pulse, often with nausea and vomiting; at last pulse became large and full, with general heat, red face, skin swollen, followed by restless sleep, with distressing dreams and exhaustion, at last copious sweat; attack usually lasted from eight to ten hours, began at end of a day's work, continued through night and ceased in morning.
‖Violent throbbing through whole body, with short, hot breath.
Increased warmth of whole body; only a feeling of coldness in abdomen in evening; except of feet, as if sweat would break out, in afternoon; with sweat in axillæ.

Digitized by Google

Flushes of heat.

Febrile flushes, with sudden crying out to be fanned, and thirst.

Heat: internal, with cold sensation in abdomen and on feet; anxious sensation of heat, without any external heat, during night; of face, with cool body, in forenoon; in flushes, with violent trembling, and short, hot breath; with redness of face in afternon; in head, in evening with redness and increased warmth in cheeks; in head, eyes burned; especially in back; of fingers, followed by heat about throat and in face, with redness of face, followed by a sensation of coldness in nape of neck; almost burning, in various small places, while sitting, for example between thigh and abdomen, on sides of lower abdomen; and burning in soles in evening; with coldness of forehead in evening; and thirst with cold skin, over almost whole body; in evening; in evening after lying down, with anxiety all night; followed by cold sweat.

Sweat: profuse all night, wants to uncover; easy, during day, from exercise; offensive; sour-smelling; sour, with fine sticking itching over whole body; very profuse; profuse on feet; on exercising; on head and hands; toward morning; while walking in open air.

Night sweat.

Hands very sweaty.

Profuse sweat on feet, of a bad odor; he walks feet sore.

Night sweat, especially on lower extremities; all night, with heat, cannot tolerate any covering.

Typhoid: staring eyes; delirium with attempts to get out of bed; complete unconsciousness; lying on back and sliding down in bed; grasping at flocks; subsultus tendinum; constant trembling of hands and coldness of extremities; relaxation of muscles of face; hippocratic face; pale, waxy complexion of face; decubitus on sacrum and trochanter; impending paralysis of brain; constant restlessness, tosses about, throws limbs about, slides down in bed; automatic convulsive motions of hands and feet, as in hydrocephalus; utters inarticulate sounds and cries of pain; head hot; lids ulcerated, half closed; pupils fixed, do not react to light; tongue reddish-brown, cracked; lips and nose sooty; fluids swallowed eagerly but with difficulty; involuntary stool and urination; stools contain threads of epithelium; pulse very rapid, weak, irregular, or small, intermittent, scarcely perceptible; upper extremities cool, often covered with cold, clammy sweat.

Typhus in a man æt. 32, second stage; stupefaction with

Google

staring eyes; spoke unconnectedly, with a kind of half-smiling garrulity; pneumonic symptoms, painful cough, sero-sanguineous sputa, quick superficial breathing, limited pneumonic exudation, frequent involuntary stools, eyes set, facial muscles relaxed, nearly hippocratic, features looked waxy; subsultus tendinum, continuous trembling of hands and coldness of extremities, perfect unconsciousness, murmuring deliria, with desire to leave bed; small, frequent filiform pulse; decubitus.

[41] **Attacks, Periodicity.** Periodic attacks: cephalalgia, with impaired vision.

At intervals: stitches in region of l. kidney; pressing pain in first phalanx of r. index finger.

Intermittent: tearing in l. kidney; pain in brain; pressure in l. chest; action of heart; tearing in middle of inner side of l. upper arm.

Alternating: prickling and drawing in l. groin; chills and heat.

Every morning, 6 A.M.: sensation as if a web were drawn across throat.

As day advances: headache grows <.

For half an hour: hiccough.

Three hours after dinner: hypochondriac mood.

Every seven days: stabbing pains in abdomen.

Every ten to fourteen days: cephalalgia with amblyopia.

Once in three weeks: stabbing pains in abdomen.

[42] **Locality and Direction.** Left: as if he would fall to, vertigo; frontal headache; pressing tearing in frontal eminence; pressure in temple; jerking tearing above temple; stitches in temple; pressure in temple; sharp tearing in parietal bone; dull pain in head; pressing, drawing, boring in head; boring in parietal bone; drawing tearing in head; drawing in occiput; forcing asunder in occiput; a dark diagonal line before eye; diplopia <; intolerable pain in eye; violent pressure in eye; tearing in eye; tearing stitch above eye; prickling biting in lower part of eye and on cheek; twitching in eyeball; itching of eye; burning of lid; pressure on margin of lower lid near inner canthus; green halo around light; burning and smarting in eye; scalding lachrymation; lids adhere on waking; jerking in eyebrow; sticking tearing in and above brow; twitching of lower lid; pressing burning in lid; sticking as with needles in upper lid; itching in margin of upper lid; purulent discharge from ear; offensive moisture from ear; cramplike pain in lobule of ear; tearing in bone in front of ear; pinching drawing behind ear; sticking tearing in ear; tickling in ear; itching in ear; cutting

in wing of nose; swelling and painfulness of wing of nose; itching in nostril; swelling and itching of cheek; pressing pain in upper jaw; tearing in cheek; muscular twitches in upper lip; jerking in teeth; stitches in lower molars; tearing in upper molars; tearing in molars, cheek and temple; tearing and drawing in lower incisors; sticking in roots of upper canines and incisors; sticking in lower molars; stitches in teeth and jaw to neck; drawing in upper incisors; tongue swollen; ulcer on inner surface of cheek; pressure and stitches in hypochondrium; stitches in abdomen; rumbling in abdomen; constrictive pain in lower abdomen; pain in lower abdomen beginning in region of hip; stitches in lower abdomen; tensive pain in abdomen; as if hernia would occur in groin; screwing-together sensation in inguinal region; drawing in inguinal region; prickling and drawing in groin; stitches in groin; soreness in region of kidney; tearing in region of kidney; stitches in region of kidney; bruised pain in region of kidney; boring in ovarian region; pressure on clavicle; a spot as large as a hand in chest feels corroded and bruised; soreness as if beaten in pectoral muscles; ribs painful; burning above nipple; pressure, drawing tension in chest; pressure and sticking in chest; tearing in lower chest; tearing beneath axilla; stitches in ribs opposite pit of stomach; dull stitches in upper part of chest; sticking tearing in chest; pain in nipple; stitch in clavicle; pulsating near axilla; intercostal neuralgia; pressure beneath nipple; drawing about nipple, pulsating; sticking beneath breast; stitches in mamma; feeling of distension in mamma; cramplike stiffness in neck; tearing in neck; burning in side and scapula; pressure beneath scapula, sticking in margin of scapula to axilla; sticking beneath scapula; jerking beneath scapula; throbbing under lower third of scapula; burning in axilla; sticking in axilla; stitches in shoulder; bruised pain in arm; bruised pain in scapula; rheumatic tension in head of humerus; tearing pressure in shoulder; tearing, extending into axilla beneath arm; tearing in anterior surface of upper arm; intermittent tearing in middle of inner side of upper arm; tearing in upper arm near shoulder; sticking and burning in anterior surface of upper arm; bubbling in upper arm; burning in forearm; drawing in upper arm close to elbow; twitching of arm in morning; constant painful heaviness, as if paralyzed, in bend of elbow; tearing up and down in elbow; sharp tearing in forearm; rheumatic tension above wrist; tearing in bend of wrist, with tearing stitches on back of hand;

Digitized by Google

tearing and painful throbbing in thumb toward tip; tearing drawing in last phalanges of middle and ring fingers; jerking tearing from first finger joints toward tips; needle stitches through first phalanx of thumb; crawling and throbbing in thumb; tearing in back of hand; pressure in ball of hand; burning in a small spot in hand; pinching or bruised sticking in ball of hand above little finger; tearing on back of hand; tearing drawing in palm of hand between thumb and index finger; tearing in nates beneath hip; pulsation in nates; bruised pain with pinching, heat and burning in hip to middle of thigh; hip painful posteriorly; drawing, tearing and burning on hip; pressing tearing in hip; heaviness and paralytic pain in femur; bruised pain on anterior surface of thigh; painful tearing in thigh; tearing on inner side of thigh; gnawing and boring in knee; tearing in patella and knee; contraction in knee; crawling in knee joint; tensive pain in leg; pressure between ankle and calf; cramp in calf and foot; jerking in calf; tearing in leg; rheumatic tension in ankle; tearing in ankle and back of foot; drawing in bones of foot; tearing and crawling in back of foot; jerking tearing in outer side of calf; prickling stitches in great toe; feeling of congestion of blood in leg; stitches in testicle; buboes; involuntary jerking in leg, waking from sleep; pimples on third toe; swelling on wing of nose; furuncle in pubic region; boil on upper arm; biting burning in skin of upper arm posteriorly; painful burning cracks between two fingers; sticking itching in a small spot on fourth finger; bunion on little toe and ball of foot.

Right: frontal headache; pressing in frontal eminence; dull boring stitch above frontal eminence; tearing in temple; stitches in temple; stitches in ear; pressure in temple shooting inward; pressing tearing near vertex; tearing and sticking in head; boring and pressure in head; pulsating, pressing and twinging in head; bursting sensation in head; throbbing pain in head; pressing asunder in occiput; gnawing in occipital protuberance; painful raging in a spot in occiput; tearing in occiput; tensive pressure in eye; violent pressure in eye and temple; cutting, pressing stitch in eye; tickling in eye; biting in eye; soreness and itching in inner canthus; painful pressure in inner canthus and redness of conjunctiva; biting in inner canthus; conjunctivitis; pressure above eye; pressing down in lids; soreness in upper lid; sticking as with needles in lower lid; whizzing in front of ear; ringing in ear; stitches in ear; pain

Digitized by Google

beneath and in front of ear; itching in ear; pressure in tonsil; tearing in nostril; itching in nostril; drawing in nostril; tearing in nose externally; nose swollen; pressing stitch from zygoma to upper margin of orbit; tearing bruised pain in malar bone; neuralgia in head; face swollen; eye smaller and retracted with neuralgia; scirrhous lump on cheek; jerking tearing in upper lip; jerking tearing in lower molars; tearing in upper teeth; tearing from tooth to temple; pressing drawing in lower back teeth; phantom tumor in region of liver; jerklike tearing drawing and pressure in hypochondrium; pressure in abdomen close to hip; stitches in abdomen; bruised sensation in lower abdomen; dull tearing from lower abdomen into groin; jerking pressure in inguinal region; pinching in groin; tearing in region of kidney; dull stitches in region of kidney; cutting, tearing or drawing pressure in region of kidney; stitches in chest; burning in chest near pit of stomach; tensive, bruised pain and stitches in side of chest; pressure, sharp near axilla; tearing in upper ribs and chest; stitches in short ribs; stitch beneath nipple; burning in skin of chest; stitch beneath mamma; pressing pain in mamma; sore pain about nipple; pressure as with finger on neck when talking; tearing in neck; pressure near scapula; pressure near middle of spine, and below scapula; tension near inner margin of scapula; stitches beneath scapula; tearing in neck; dull sticking tearing in axilla; sticking tearing on top of shoulder; dull stitches beneath shoulder; jerking in shoulder; tearing deep in shoulder; sticking in upper arm; dull pain in upper arm; bruised pain in bone of upper arm; tearing in elbow joint; bruised sensation in bend of arm; rheumatic drawing in elbow; sticking and tension in elbow joint; dull bubbling tearing in muscles of inner side of forearm, not far from elbow; burning in forearm above wrist; tension in wrist; drawing pain in wrist; rheumatic drawing and tearing in wrist; tearing in middle of wrist; burning pain in wrist and ball of hand; drawing tearing in thumb; sharp sticking tearing in last joint of thumb; jerking in first joint of thumb; tearing in thumb, above it and in two adjacent fingers; tearing beneath nail of thumb; pressing pain in middle joint of index finger, and at intervals in its first phalanx; spasmodic tension of hand; sticking tearing in hand in bend of wrist, and in palm near little finger; sharp tearing in hand beneath joints; tearing on back of hand, in fourth and fifth metacarpal bones and in wrist; tensive tearing in palm; tearing in palm near fingers; sticking tearing in natis

Digitized by Google

below hip; bubbling in natis; tearing posteriorly on hip; pressing drawing above natis; dull pressure above hip; heaviness and lameness in thigh; paralytic pain in thigh, first in upper part, then down toward knee; drawing pain in inner side of thigh; falling asleep of leg as far as knee; pain in ligamentum patellæ; painful boring in knee <; tension, then burning beneath knee, in upper part of tibia; tensive pain in knee joint; drawing in knee; tearing in knee; stitch in knee; itching in knee joint; pressure and drawing in bones of leg; drawing in tibia; tearing in leg; tearing in end of tibia; tearing beneath inner malleolus; tearing in outer malleolus; burning beneath inner malleolus; burning beneath heel; paralyzed feeling in foot; tension in foot; tension in sole; drawing tearing in foot extending into malleoli; tearing in outer margin of foot toward toes; sticking tearing in bend of joints of little toe; stitch above foot; ulcerative pain in great toe; tearing in lower portion of two first toes; sticking tearing in first joint of great toe; sticking tearing in bends of first joints of first two toes; tearing in great toe; tearing in little toe; pulsating sticking in tip of great toe; tearing and tension in margins of foot; drawing and contraction in tendo-Achillis; pain in scrotum; pimple on neck; burning in skin of scapula; eruption and fissure on hand; burning in skin on margin of hand; roughness of skin on back of hand; itching burning on outer side of thigh above knee; burning in skin of lower portion of calf; ulcerative blisters on back of foot; as if toes had been frozen; itching on sole.

Left, then r.: drawing pain in testicles.

Right to l.: drawing in lower back teeth; sticking in scapula; drawing and retraction of testicle.

Alternately r. and l.: throbbing drawing in back teeth; pains in patella and heel.

[13] **Sensations.** As if she had a large goitre which she could not see over; as if hair bristled; uneasy, as if he had committed a crime; as if he would have apoplexy, vertigo; as if scalp were drawn together; as if head were moving up and down, with a similar floating of images of his fancy; as if he saw through a mist; as if he would fall over to other side; as if bed were swaying back and forth; nauseating weakness, as after smoking too strong tobacco; as if eyes were drawn together by a cord; stupefying headache, as from coal gas; as if root of nose would be pressed into head; as if head would be drawn backward; as if air forced itself into frontal sinuses; as if head would burst; as if stunned in occi-

Google

put; as if scalp wrinkled up and kept tightening; as if insects were crawling from occiput to forehead: pain like beating of waves in a spot on r. side of occiput to outer; as if she had wept much, feeling in eyes; as from l. eye, smarting; like a whitlow, burning and throbbing in eye; as from sand in eyes; as if upper lids were paralyzed; as if teeth would be pulled out, with neuralgia; as if teeth were long and loose; as if a hard body were opposing pressure from pharynx into abdomen; as if food remained sticking in pharynx after dinner; as if choking in r. side of throat; as of a worm creeping up throat from stomach; as if stomach were compressed or empty; disagreeable feeling in cardiac orifice of stomach extending upward; as if cold water were poured down her back; as of a heavy weight in hypochondria; as if filled with flatus; as if abdominal walls were retracting against spine; as if intestines were pierced with fine needles; as if hernia would occur in l. groin; as if inguinal gland were swollen; as if flatus were pressing against coccyx; as from worms crawling in anus; trembling, as if chilly; as if knees would be twisted off; as if a web were drawn across throat; as if pudenda were swollen; goneness at pit of stomach at 11 A.M.; as if chest would burst, cough and stitches; as if chest were hollow and cold; as if chest were constricted by a band; as if chest were cut to pieces; as if a foreign substance were rising up throat; as if beaten in chest; as of blood forcing its way into finest vessels in lungs; as if there were a sore bruised spot in upper chest; as if corroded and bruised in a spot as large as a hand in l. chest; emptiness behind sternum; as if a cap were over heart; as of finger pressed on r. side of neck when talking; as if shoulder joint were asleep; as from an adhesive plaster near inner margin of r. scapula; as if weary and beaten in neck and back; as if head had been held in an uncomfortable position, pain in cervical muscles; as if one had been lying in an uncomfortable position, pain in small of back; as if muscles in r. wrist were too short; as if sprained in r. wrist; as if flesh were loosened from bone in hip joint; as if muscles in bend of knee were too short, contraction in l. knee, as if in bone; stitch like a flea-bite, on inner side of r. knee; ankle as if sprained; as if bone on outer margin of foot would break; as if soles were swollen and scratched by a toothed instrument; as if foot had been sprained; as if tendons in r. sole were too short; as if feet were beaten from body; as if toes were sore from walking; as if there were blisters on toe; as if toes were sprained; as if

Google

ball of great toe had been frozen; as of congestion of blood in l. leg; as if shirt were rough and rubbed penis when walking; as if testicles were tightly compressed and drawn upward; as if body would be forced asunder from pressure upon inner walls of trunk; as of swelling; as if eyes lay deep in head; as if a foreign, stony, hard substance were in throat; irritation of skin on back of r. hand, when rubbed seems to go through whole body; as if toes had been frozen; as if covered with ants.

Intolerable pain: in l. eye.

Violent pain: in throat; at angle of jaw; in laryngeal region; in patella and heel.

Severe pain: in region of heart.

Sharp pain: in stomach and pit of stomach.

Heavy pressure: in stomach.

Painful raging: in head, from r. side of occiput over vertex.

Lightning-like shocks and jerks: neuralgia in r. side of head.

Boring: above r. frontal eminence; in r. side of head; in l. side of head; in occiput; from rectum into abdomen; in l. ovarian region; in knee; in heel.

Lancinations: burning, from foramen infraorbitalis, over r. side of head to occiput; in sacrum; in suppurating herpes.

Stabbing: in abdomen.

Stitches: above r. frontal eminence; in temples; in r. ear; burning, in middle of vertex; dull, on top of head; in r. eye; in ears; in jaw; from r. zygoma to upper margin of orbit; in face; in upper lip; fine, in upper lip; in l. lower molars; from l. teeth into neck; in l. hypochondrium; in spleen; dull, from an internal ulcer on r. side above navel; in r. side of abdomen; in lower abdomen; through r. ilium; in umbilical region; in groins; in glans penis; in l. testicle; from rectum into root of penis; in anus; like lightning, from anus into rectum; in region of kidneys toward chest; dull, in region of r. kidney; in region of l. kidney; in urethra; beneath axilla; in r. side of chest; in l. chest and heart; in middle of sternum; in upper part of sternum to lumbar region; beneath sternum; from r. hypochondrium to præcordial region; deep in r. chest; dull, in r. short ribs; beneath r. nipple; in region of l. ribs opposite pit of stomach; in upper part of l. chest; beneath heart; in l. clavicle; in trachea; above heart, in præcordial region; beneath r. mamma; in l. mamma; in neck and chin; in cervical muscle; beneath r. scapula; close to upper part of r. scapula; in middle of spine; beneath l.

Google

scapula; in l. axilla; dull, beneath r. shoulder; in l. shoulder; on back of l. hand; in fingers; in middle joints of last three fingers; in tips of thumbs; through first phalanx of l. thumb; in thigh; in knee; on inner side of r. knee; in tibia; above r. foot; in bones of back of foot; in ball of foot; in heel; in l. great toe.

Sticking: in head, above l. eyebrow; in forehead; in temples; in r. side of head; in a small spot in occiput; in eyes and head; in inner angles of eyes; above l. brow; in eyelids; in l. ear; in septum of nose; in articulation of jaw; beneath and in front of l. ear; in roots of l. upper canine and adjacent molars; in l. lower molars; in palate; in pit of stomach; in præcordial region; in r. hypochondrium; dull, in region of spleen; in diaphragm; in abdomen; between shoulders; above inguinal region; in anus; in region of kidneys; in pudenda; in larynx; beneath r. axilla; in middle of sternum; in sternum; in middle of chest; in l. thorax; beneath l. breast; from r. to l. scapula; in margin of l. scapula to axilla; beneath l. scapula; in r. axilla; on top of r. shoulder; in r. upper arm; in anterior surface of l. upper arm; in r elbow joint; in last joint of r. thumb; in ball of l. hand; in bend of r. wrist and palm near little finger; in r. natis below hip; on back of thigh; in tibiæ; in soles; in toes; in first joint of r. great toe; in bends of first joints of first two r. toes; in ball of great toe; in top of r. great toe; in joints; in limbs; in a small spot in l. fourth finger, followed by a red pustule; in anterior ball of great toe.

Darting: through joints.

Stinging: in head; in roots of upper front teeth and in hard palate; in pudenda; in bunion; nettlerash.

Cutting: in abdomen; in r. eye; in r. ear; in nose; in l. ala nasi; across umbilical region; in rectum; in anus; in region of kidney; in urethra; in abdomen during menses; in small of back during menses; upward in l. iliac region during pregnancy; in small of back to calves and feet; in tips of thumbs.

Shooting: in r. temple; in hypogastrium.

Prickling: in l. eye and cheek; in pterygium; in sound teeth; in l. groin; in l. great toe; in testicles.

Picking: in sound teeth.

Jerking: above l. temple; earache; in upper lip; toothache; in last lower r. molars; tearing, from pharynx into l. cervical muscles; in r. hypochondrium; from groin toward penis; in r. inguinal region; from rectum into root of penis; in anus; beneath l. scapula; in r. shoulder; in elbow joint; from first finger joints of l.

Digitized by Google

hand toward tips; in first joint of r. thumb; dull, on inner side of thigh; in l. calf; in root of penis.

Tearing: in brain; in head, above l. eyebrow; in l. frontal eminence; in forehead; in temples; above l. temple; cramplike in temples; in vertex; in l. parietal bone; in r. side of head; in r. side of occiput; in ears; in l. eye; stitch above l. eye and in umbilical region; in eyes and head; above l. brow; in ears; in front of l. ear; in l. ear close to lobule; in r. nostril; in l. cheek; in r. malar bone; in upper lip; cramplike in lower jaw, especially chin; stitches in chin and throat; in roots of r. upper teeth; in l. upper molars; from root of r. upper tooth toward temple; in a hollow molar; in last lower l. molars; in posterior fauces; in pharynx; in pit of stomach; in r. hypochondrium; from r. lower abdomen into groin; in l. side of lower abdomen, beginning in region of hip; in umbilical region; in anus; in region of l. kidney; in region of r. kidney; in urethra; above pit of stomach; beneath axilla; in r. upper ribs near back; in r. chest; in l. chest; in neck and chin; in r. side of neck and below jaw; in neck behind l. ear; between spine and r. scapula; in r. side of neck; in r. axilla; on top of r. shoulder; in shoulder joints; arthritic, in shoulder joint to fingers; deep in r. shoulder; in l. shoulder; in shoulder joint deep in bone; in l. axilla; in upper arms from deltoid down; in anterior surface of l. upper arm near elbow; in r. arm near shoulder; in middle of inner side of l. upper arm; in l. upper arm near shoulder; in arms close to elbow; in r. elbow joint; in bend of elbows; in thick portion of forearm; dull bubbling, in muscles of inner side of r. forearm near elbow; in l. forearm; in r. wrist toward backs of fingers; in bend of l. wrist; in l. thumb toward tip; in tips of fingers; in last phalanges of l. middle and ring finger; in r. thumb; in last joint of r. thumb; in fingers; in middle joints of last three fingers; beneath nail of r. thumb; in metacarpal bones of index fingers; in first joints and phalanges of fingers; in back of l. hand; from wrist to first phalanx of thumb; in bend of r. wrist and palm near little finger; in r. hand; at root of hand; on back of r. hand and in wrist; in r. palm; in back of l. hand; in l. palm; in nates below hips; on back of r. hip; posteriorly in l. hip; on crest of ilium; in thighs; in thick portions of thighs; on outer side of thigh as if in bone; in l. thigh upward from knee; in inner side of l. thigh; in bends of knees; in r. knee; in r. calf; in outer side of l. patella; in l. knee; on inner side of l. leg, between ankle and calf; in calves; in tibia to back of foot; in r. leg beneath knee;

Google

in l. leg between tibia and ankle; in calf to malleoli; in lower end of r. tibia; in r. outer malleolus; beneath r. inner malleolus to heel; in bend of ankle; on margin and on back of l. foot; in tendons Achillis; in r. foot and malleoli; in inner malleoli; in outer margin of r. foot; on back of l. foot; in heels; in soles; in toes; in tip of great toe and beneath nail; in first joint of r. great toe; in bends of first joints of first two r. toes; in r. great toe; in r. little toe; in margins of r. foot; in tip of glans penis; in root of penis; in limbs; in middles of bones of limbs.

Drawing: in forehead; in vertex; in l. side of head; in r. parietal bone; in r. occiput; in l. side of occiput; behind l. ear; in r. nostril; jerklike in incisors; in l. lower teeth; in l. upper incisors; in lower back teeth; in roots of upper front teeth and in hard palate; in r. lower back teeth; alternately of back teeth of r. and l. sides; in jaws; in pharynx; in pit of stomach; in r. hypochondrium; cramplike in middle of abdomen; from abdomen into urethra; in l. inguinal region; in groin and pubic regions; in l. groin; from rectum into abdomen; in region of r. kidney; acute, in forepart of urethra and penis; rheumatic, beneath clavicle; tension here and there in l. chest; about l. nipple; in r. side of neck; in cervical muscles; in back; from top of shoulder down arms; in l. upper arm close to elbow; from tips of fingers up arm; rheumatic, in r. elbow; in bone of forearm; cramplike, in forearm and fingers; in r. wrist; rheumatic, in r. wrist; in l. phalanges of l. middle and ring fingers; in r. thumb; in l. palm; in nates; above r. natis; on posterior portion of thigh; posteriorly in l. hip; in thighs; in inner side of r. thigh; in outer muscles of thigh; in r. knee; in calves; in bones of r. leg; in legs; in r. tibia; in bones of l. foot; in r. foot and malleoli; in inner malleoli and tendons Achillis; in toes; in root of penis; in testicles; in spermatic cord; in middles of bones of limbs.

Twinging: in r. side of head; stitch like lightning in urethra; in chest.

Twisting pain: in abdomen.

Gnawing: as from worms in forehead; in r. occipital protuberances; in upper part of occiput; in l. knee.

Pinching: behind l. ear; in ear; in root of nose; in pit of stomach; in hepatic region; in l. hypochondrium; in r. groin; in region of kidneys; in chest; in forepart of r. chest; in both sides of neck near trunk; in small spots in back; in coccyx; in region of l. hip; in ball of l. hand.

Stiffness: in neck; in cervical and upper dorsal muscles; of muscles of calf; of legs.
Dulness: in forehead; in occiput.
Lightness: in head.
Heaviness: of head; in forehead; in vertex; in occiput; in hypochondria and loins; in abdomen; in rectum; in heart; in shoulders; in bend of l elbow; in r. thigh; in l. femur; in r. foot and malleoli; in legs.
Fulness: in œsophagus; in abdomen.
Uneasiness: in legs.
Bubbling: in l. upper arm; in r. natis.
Formication: in calves and toes.
Tickling: in r. eye as from dust; in l. ear; in larynx; beneath sternum; in trachea and middle of chest; in upper third of chest, both sides.
Crawling: in forehead; in ears; in nose; from abdomen into urethra; in anus; in l. thumb; in l. knee joints; of back of l. foot; in calves to toes; in skin of whole body.
Tingling: in head; inside of cheek; at anus.
Itching: of eyes; in r. inner canthus; in inner angles of eyes; in margin of l. upper lid; in ears; in nostrils; of l. cheek; on inner surface of gums; in rectum; in anus; in urethra; in pudenda; of vulva; of thighs and hollows of knees; on r. knee joint; in joints and bends of joints; as from flea-bites on back and abdomen; on scrotum; about nipples; between scapulæ; spots on back; papular eruption on forearm; points in skin; on outer side of r. thigh above knee; on thigh above knee; of thighs and hollows of knee; pimples on legs; on r. toes; of great toe as if frozen; on anterior ball of great toe; in r. sole; in soles; on flexor surface of joints; nettlerash.
Roughness: in chest.
Weakness: in head and eyes; in hands and feet; in sternum; in small of back and legs; in lumbar and sacral regions; in arms; of hands; in hollows of knees; of limbs.
Numbness: of tongue; of shoulder joint; in l. thumb; of r. leg; of feet; in soles.
Lameness: of hands; in r. thigh.
Deadness: of hands.
Paralyzed feeling: in small of back and hips; in arms; in bend of l. elbow; in r. foot.
Fidgety feeling: in legs and feet.
Heat: in eye; in palate; in l. thumb; in region of l. hip.
Coldness: in stomach; within abdomen; in chest; in nape of neck.

Google

Dryness: in eyes and lids; in eyeballs; of lips; in throat.

"**Tissues.** Cerebral exhaustion.

Emaciation; feeble appearance, face wrinkled and bluish.

Paleness of mucous surfaces, with disappearance of subcutaneous cellular tissue, and atrophy of muscular system.

Weak digestion, depressed function of nutrition, with cerebral affections; constipation, with affections of liver or flatulent colic; gastric troubles during pregnancy.

Anæmia; brain exhausted; not able to develop exanthemata.

Dropsy, with uneasiness in renal region.

A state of the blood which in its qualitative analysis approaches chlorosis; want of vitality, as we find it after physical and psychical depression; heaviness and weakness in all organs, as we see in suppressed catamenia, but when menses flow it relieves all her sufferings; cough harassing and troublesome, strength is wanting for expectoration; feels as if his bladder would burst, still there is not energy enough to pass a good stream, small quantities only are discharged; stools scanty, dry, brittle, granulous.

Dyspeptic symptoms; subdued nausea, with a universal tremulous feeling; irregular spasmodic action of heart.

Clonic spasms, as well as following coma, find their cause in cerebral exhaustion.

General articular rheumatism, with tearing pain, lameness, trembling and crampy pain; twisting in affected limbs, frequent jerking of whole body during sleep, < from being overheated and from exertion.

"Rheumatism affecting muscles of sacrum, coccyx, ilium and l. hip joint, and leg of l. side; soreness of parts upon pressure by ends of fingers, and sore pains from any movement requiring exercise of muscles; when sitting or lying down little or no pain; < rising from chair, from stooping, turning body or bending it backward, drawing a long breath, coughing or sneezing; pains in hip joint and knee, occasionally passing along course of great ischiatic nerve to foot.

Ulcers: old; indolent; herpetic; bleeding and burning; destitute of feeling; redness of surrounding skin, with sensation of tenseness; pus bloody and corroding.

A large abscess on l. heel matured more quickly after *Zincum* 30.

Œdema and general anasarca of cellular tissue; dropsies following scarlet fever.

Dropsical effusions of all serous cavities.

Relief of thoracic symptoms by expectoration; relief of

Google

cystic symptoms by urination; in male, relief of backache by seminal emission, and in female, general amelioration from menstrual flow.

[45] **Touch. Passive Motion. Injuries.** Touch: scalp feels sore; pain as after a blow beneath and in front of r. ear; neuralgia fifth pair <; ulcer at root of a bad tooth sensitive; gums bleed; swelling of palate painful; enlarged liver sore; < stitches in internal ulcer above navel; l. kidney sensitive; mammæ swollen and sore; ribs of l. thorax painful; tenderness over cardiac region; l. nipple sore; spine sensitive; bruised pain in forearm; soreness of glans penis; r. side of scrotum painful; decrease of sensibility; soreness of pimples; tetter on back painful; itching here and there in skin >.

Contact: itching >.

Pressure: conjunctivitis >; bruised pain in r. malar bone; pain in hollow molar <; in abdomen, nausea and vomiting; tenderness over stomach; stitches in spleen <; stitches in l. side of abdomen <; constrictive pain in lower abdomen; pain in l. ovarian region >; stitches in trachea <; l. thigh sore; pain in r. ligamentum patellæ; soreness and pricking pains in joints.

Squeezing hands upon sides of head: headache >.

Must unfasten dress: during menses.

Rubbing: > biting in l. eye; biting in r. inner canthus >; tearing in r. elbow joint >; tearing in r. knee >; tearing in r. outer malleolus >; skin on back of r. hand sends irritation through whole body; feeling as if toes had been frozen <; stinging itching in skin, with nettlerash; general formication >.

Scratching: soreness of vertex >; tearing in r. shoulder >; causes itching to appear in another place; urticaria-like eruption on thighs and hollows of knees; > itching in pimples on thigh; feeling as if toes had been frozen <.

Jarring: pain in abdomen <.

Riding: headache <; tearing in hand from wrist to first phalanx of thumb.

Bruise: orchitis.

After operation to eye: sees luminous bodies; intense burning.

[46] **Skin.** Skin dry.

Pains, seemingly between skin and flesh.

Itching: of skin; in bends of joints; sudden, here and there, especially in evening in bed, goes off by contact; as from lice at night, after scratching it appears in another place.

Pimples on forehead, back and third l. toe, with sore, pressing pain when touched.

Digitized by Google

Small white pimples with some moisture, on upper lip, chin and forehead after moderate wine drinking.
Papular eruption on face.
Crusty eruption on face.
Itching on face in evening.
A red, hard, painful swelling on l. wing of nose, painful to pressure.
Clear water blisters or suppurated pimples on upper lip.
Papular eruption on upper lip.
Flat red pimples in middle of upper lip, in margin painful to touch.
Itching on upper lip, chin and about mouth without eruption.
Very itching pimples almost in middle of chin.
Violent itching and redness over whole protruding portion of chin.
Many small pustules near together beneath chin, with violent itching.
Large, yellowish-white itching pimples on lower lip.
Frequent violent itching as from numerous flea-bites, at night, especially on back and abdomen.
A red, finally a dark-red furuncle, with a hard areola, containing a dark-yellow pus developed on pubic region, somewhat to l. side.
Itching on scrotum violent, almost sore, not > by scratching, several evenings in succession.
A small, red, painfully sore pimple at root of hair on scrotum.
Red pimples on chest and face.
Itching about nipples, she constantly wanted to scratch.
A pimple with ulcerative pain on pressure on r. side of neck.
Small pimples like boils on both shoulders.
Itching between scapulæ in evening, with much eruption.
Burning on skin of r. scapula.
Small boils on back and between scapulæ.
Itching spots on back; tetter painful to touch.
A large boil on l. upper arm.
Biting burning posteriorly in upper part of skin of l. arm.
Eruption of rash in bend of elbow.
Papular eruption on forearm, itching violently during day.
Right hand very much broken out with well-marked tendency to formation of painful fissures.
Itching pimple on back of hand.
Biting on back of r. hand, extending above wrist, as if an eruption would appear.
Some itching points in skin, especially on hands, without external redness or elevations.

Digitized by Google

Small round red spots on hands and fingers.
A pimple beneath skin of bend of last joint of ring finger.
Burning in skin on margin of r. hand.
Roughness of skin on back of r. hand, accompanied by very intense irritation when rubbed, seems to go through whole body; discharging vesicles; < when he takes cold, and in cold weather.
Epidermis of hands cracks from slight cold, becomes fissured and painful.
Large chilblains on hands, which swell and itch violently.
Rhagades, mostly between fingers, bad even in mild weather.
Painful burning cracks between two fingers of l. hand.
Sticking itching in a small spot in l. fourth finger, soon followed by a red pustule with throbbing burning pain.
Burning on flexor surface of fingers.
Itching burning on outer side of r. thigh above knee.
Itching on anterior part of thigh above knee, five minutes in succession, with pimples which are easily scratched off.
Itching of thighs and hollows of knees in evening, very violent with urticaria-like eruption after scratching.
Eruption of itching rash in hollow of knees.
A red spot on leg becomes covered with a scab, with itching.
Small pimples on thigh, calves and about knees, with violent itching which ceases immediately after scratching.
Crawling and formication in both calves, extending into toes.
Burning in skin of lower portion of r. calf.
Ulcerative blisters on back of r. foot, as after a burn.
Painful itching, with heat, redness and swelling on r. toes, as if they had been frozen, in evening; < rubbing and scratching.
Itching of great toe as if it had been frozen.
Violent sticking itching in anterior ball of great toe, in evening.
Bunion on l. little toe and ball of foot, with stinging pain on walking.
Painful itching on r. sole.
Itching on soles.
Itching on flexor surface of joints.
Violent itching over whole of lower extremities.
Itching of soles of feet, calves of legs and thighs, almost intolerable at night.
Sticking, pricking, itching in evening in bed, on forehead, thigh, malleoli, feet and other parts of skin.
Sudden itching here and there, especially in evening in bed, immediately disappearing on touch.

Digitized by Google

Itching over whole body without eruption.
Fine sticking itching over whole body, with sour sweat.
Crawling in skin of whole body.
Stinging itching in skin, with nettlerash after rubbing.
General formication as if covered with ants, > only by rubbing.
Slight injury of skin bleeds very profusely.
Biting and burning pain in an ulcer.
‖Dry herpes over whole body.
Suppurating herpes; with lancinating pains.
‖Neuralgia, following herpes zoster.
‖After disappearance of old eruptions: coma from cerebral exhaustion; loss of sensation of whole body; mania; somnambulism.
‖Exanthematic fevers, brain exhausted; not able to develop eruption; fever in flashes, or violent convulsions from suppressed eruptions.
‖Lies unconscious and motionless; pulse weak, cannot be counted; limbs icy-cold; skin of body bluish-red, except about eyes, forehead and chin, which were white; eruption very scanty. θScarlatina.
‖Scarlet fever eruption appeared two days ago, now of a dark-brownish or purple look; skin flabby; cold; child lying unconscious, having neither feeling, sight nor hearing; remained quiet, apparently having no power of motion; involuntary urination and defecation; one pupil contracted, the other dilated, acting feebly and slowly to light; face puffed and red.
‖A child, æt. 2½, somewhat scrofulous; in night twitching of limbs, shocks through whole body, violent screaming, face pale and sunken, forehead cold, covered with clammy perspiration; skin cool and dry, pulse small, quick, easily compressed, breathing short and quick, stool involuntary. θScarlatina.
‖During desquamation took cold, following night skin hot and dry, muttering during sleep; symptoms of convulsions, urine scanty, brown; face œdematous. θScarlatina.
‖Child, æt. 4, scrofulous, overfed; does not move, pulse filiform; perfect unconsciousness; extremities icy-cold, body cool, skin everywhere livid except parts around eyes, forehead and chin, which were white; exanthem here and there.
‖While suffering with scarlatina, with the eruption fully out, ran out of doors during his delirium; eruption rapidly disappeared; was soon seized with convulsions; collapse.
‖A woman æt. 34, slight eruption on neck and upper

Digitized by Google

part of chest; head and face swollen like a case of confluent smallpox, all the same color, brown mahogany; high fever; hoarse, croupy cough; conscious but convulsed; it was with great difficulty hands, especially thumbs, could be moved; wrists and arms stiff, numb and dead. θMeasles.

Retrocession of eruption; child lies motionless and unconscious; involuntary jerking and twitching of muscles; grinding of teeth; screaming spells; loss of speech; occiput very hot and forehead covered with cold perspiration; face distorted; body and limbs cold and of a bluish-red hue; pulse threadlike and difficult to count. θScarlet fever.

[47] **Stages of Life, Constitution.** Girl, æt. 2½, well nourished, scrofulous; scarlet fever.

Girl, æt. 3; meningitis.

Boy, æt. 3, blonde, well nourished, ill ten days; typhoid fever.

Boy, æt. 4, tall, strong, scrofulous; scarlet fever.

Boy, æt. 4, after an attack of typhoid; affection of brain.

Child, æt. 4; scarlet fever.

Girl, æt. 16, blonde; hæmaturia.

Girl, æt. 18, mulatto; spasms.

Miss, æt. 21, small, slender, brunette; spasms.

Miss, æt. 24, robust, suffering four years; headache.

Miss, æt. 24, tall, suffers with dysmenorrhœa; colic.

Miss B., æt. 24, suffering two years; chlorotic headache.

Miss T., æt. 30, caught cold when 17 years old, during menstruation, since then suffering; neuralgia, dysmenorrhœa, etc.

Man, æt. 32, sanguine-choleric temperament; typhoid fever.

Woman, æt. 34, dark-skinned, had taken arsenic for an eruption on face; measles.

Miss, æt. 37; affection of eyes.

Woman, æt. 38, brunette, thin, nervous, gentle disposition; prosopalgia.

Woman, æt. 40; pterygium.

Woman, æt. 40, suffering several years; asthma.

Woman, æt. 40, strong, suffering two years; headache.

Miss, æt. 42; ovarian difficulty.

Man, æt. 45; urinary difficulty.

Man, æt. 48, sandy hair, blue eyes; tarsal tumors.

Woman, æt. 48, suffering three years; epilepsy.

Captain Erickson, æt. 50, sailor, after great exposure; bronchitis.

Woman, æt. 55; pain in back.

Farmer, æt. 55, suffering three years; pterygium.

Digitized by Google

Man, æt. 70, suffering three weeks; bronchitis.

[1] **Mind.** Cheerful, good-humored, a pleasing sensation in his system.
‖Not in the least anxious, in physical suffering from threatened suffocation. θAsthma.
Increased activity of brain.
‖Forgetful; weak memory.
Irritable and chilly, in evening, also during menses.
Nervous and fidgety.
‖Felt very uncomfortable, did not know what to do.

[2] **Sensorium.** ‖Coma.
Vertigo, limbs heavy.
Head feels too large.
Feels confused and empty in his head.
‖Dizziness; vertigo.
Dizziness and heaviness in all her limbs.

[3] **Inner Head.** Frontal headache in morning.
Sensation as if contents of head pressed into forehead and root of nose, when stooping.
Drawing: frontal headache, especially over root of nose, at 6 A.M.
Frontal headache over eyes and root of nose; also when he exerts himself.
Very fine, but violent stitches in forehead.
Headache when he exerts himself; a drawing pressure on frontal bone.
Frontal headache, especially over eyes; < when laughing, talking or stooping.

Digitized by Google

Pressing-drawing headache, as if r. eye were pressing out.
Headache, at first over l. forehead, then changing about, at 11 A.M.
Slight dull pain over l. eye, with stitches now and then; < by going into cold air, afternoon and evening; dull, heavy, with stitches now and then during day.
Stinging pain over l. eye, at 5 P.M., when it passed off she had a pressing frontal headache, eyes somewhat sensitive to light.
Drawing-pressing pain over l. eye, at 7 P.M.
Over l. eye a dull headache, from 9 till 10 P.M.
Twitching over r. eye and in muscles of neck.
Sharp aching, drawing pain over eyebrows; followed by nausea, lasting but a few moments in a warm room; later, more aching with heavier sensation than in morning, extending all around head, more heavy on l. vertex; afterward heavier over r. eye and in l. occiput; this diagonal direction it took after circular pain passed off; later pain over r. eye, and heavy pressing pain in l. occiput, all in a warm room, continuing in cold, damp air, and in motion, and by sitting at rest.
Dull pressing headache, more in forehead and temples, with same pain in l. eye.
πPressing pain and numbness in both temples, pressure on eyes, heat in face, fainting weakness.
πHeavy pressure in forehead, especially in temples; head feels too large, with heat in face, and humming in ears.
Rush of blood to head, especially in temples.
A beating pain in l. temple.
Drawing pain in l. temple and over l. eyebrow, at 5 P.M.
Dull aching-pressing pain in l. temple till she went to sleep, 8 P.M.; pressing headache in temples in afternoon and evening.
Headache internally, above temples, like a pressing-drawing while walking in open air, with head covered; > when standing still, uncovering head, and in a warm room.
Slight headache in both temples; dull and sore feeling over l. eye at 11 P.M.; dull pressing-drawing headache, which at last settled in r. temple.
After eating bread, immediately a pressing headache in temples.
Headache in temples, and stiff neck.
Left vertex sore, < on touching.
Dull heavy pain in l. vertex and in arms and legs, at 11 A.M.
Pulsating pain in vertex, r. side; < by rising.
Dull, pressing headache on l. side, with heat in head and much thirst, in evening.

Digitized by Google

Pressing-drawing frontal headache, more on l. side, at noon; dull drawing with oppressive heat; afterward pain over eye; dull, pressive, heavy all over, but more on forehead, with stiff neck.

When in church, pain over l. eye, drawing extended a little to r., and then settled in r. occiput, where she felt heavy drawing pain for about two hours, with headache in front, with nausea, and as if she were going to faint; at same time very chilly.

Beating pressure in l. occiput.

Pain encircling head; dull, heavy pain, like a board pressing through whole head, continuing for one and a half hours, at 11 A.M.

Circle of pain extended in a line around head through cerebellum; shifting.

Dull, heavy pain encircling head above eyes, to occiput.

Headache, with stiffness of neck on l. side.

Head feels as if pressed.

Heavy pressure in head from without inward, when walking in cold, damp air.

Pressing pain with heat all over head, in morning.

Headache < from moving, stooping and noise; > after dinner and in a room.

Headache, with heat in head.

Head feels sore to touch; dull headache.

‖Hemicrania; nervous headache.

[4] **Outer Head.** Itching on scalp, head and cheeks.

[5] **Sight and Eyes.** Sudden glimmering before eyes.

Eyes sensitive to light: with headache; in evening; with stinging pain in eyeballs.

Weakness of sight; dimness of cornea.

Smarting burning in eyes.

In l. eye a sensation as from a grain of sand, ceases on rubbing.

Sharp, drawing pain through and around eyeballs and superciliary ridges.

Pressure: on eyes; in l. eye; dull, in l. eye, with headache; in and over l. eye; beating pressure in l. occiput, in evening.

Watery eyes.

Fine stitches inside eyelids.

Transient sensation on margin of eyelids, like a cutting from above downward.

[6] **Hearing and Ears.** During day more sensitive to noise, increases her headache.

π Humming in ears.

Drawing tearing in r. ear; tearing at 7 P.M.

[7] **Smell and Nose.** Sneezing and ineffectual attempts to sneeze.

Google

While her cough is worse, streaks of blood in watery discharge from nose.
Discharge of pure water from r. nostril, later all symptoms of a cold in head; running from r. nostril seems <; l. nostril is becoming affected like r.; watery discharge from both nostrils, especially in open air.
Sense of painful dryness in nose.
Dryness and obstruction in posterior nares, with discharge of thick mucus.
‖Ozæna.
Intolerable itching of nose, not > by scratching.
Red pimples on both sides of alæ nasi.
Nose feels obstructed; much thirst, dryness in mouth, cannot breathe through nose; when obstruction passed off she had more watery discharge.

[8] **Upper Face.** πFace red and hot.
Exhausted look, blue under eyes, before menses.
Two large red pimples on l. cheek.
Drawing in l. upper jaw to temples.

[9] **Lower Face.** Soreness in r. lower jaw, with a little swelling, in morning.
Drawing pain: in l. lower jaw; in two molar teeth; from second molar tooth to first incisor; in all teeth, at 5 P.M.; at 9 P.M.
‖Drawing, stinging pain from l. lower jaw to first incisor at 10 P.M. and in night.
Dry lips and mouth in morning.
Itching in beard.
Large scarlet-red pimples on face, on forepart of head and on neck.

[10] **Teeth and Gums.** Pressure and drawing in roots of teeth.
All teeth of lower jaw began to be painfully sensitive with a pressing-drawing in roots.
Drawing pain in l. lower teeth, has a decayed tooth in this side, at 7 P.M., returns after being in air.

[11] **Taste and Tongue.** Taste of food remains, especially that of bread.
Slimy bad taste in morning, with diarrhœa.

[12] **Inner Mouth.** Breath smells foul to herself, as from disordered stomach.
Great dryness of roof of mouth and posterior nares, which are entirely stopped.
Slimy mouth, in morning; very slimy taste on rising.
Burning in mouth.
Much saliva, with little vesicles on tongue and gums, which feel sore.

[13] **Throat.** Choanæ stopped up; increased mucous secretion, no fever.

Digitized by Google

Tickling in throat, more on l. side, irritates to cough.
Soreness in throat and pit of stomach, with looseness of mucus in throat.
On awaking, dryness of throat and difficult swallowing, it is as if there were an obstacle in the way; same dryness in throatpit in swallowing; there is something in way over which it has to pass, raised thick, hard mucus.
Dryness of throat, feeling of swelling externally, constant desire to swallow, and pressure with slight stinging pain.

[14] **Appetite, Thirst. Desires, Aversions.** Much thirst; mouth dry; with heat in head and headache; at night; in morning; dry lips and mouth.
No desire to smoke.
Drinks water on account of rancid feeling, with cough.

[15] **Eating and Drinking.** After bread: headache, pressure in stomach.
‖ Complaints from eating melons, particularly canteloupes. θ Colic. θ Diarrhœa.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: of wind; incomplete eructations; in evening; with diarrhœa.
Nausea: on rising; much rumbling; after morning stool; with empty feeling in stomach; with headache; with backache; after a short unrefreshing sleep, could not get to sleep again; with colic after drastics.
Sickness, sick feeling through whole day and night.
Frequently a nauseous rising from stomach into chest.
On rising, qualmishness; much wind and rumbling in bowels, preceded by a slight drawing pain in lower part of abdomen, at 7 A.M.
Nausea; vomiting of mucus in drunkards.

[17] **Scrobiculum and Stomach.** Acidity of stomach, eructations.
‖ Weak digestion; stomach heavy like a stone; retarded stool.
Soreness in pit of stomach and in throat.
Pressure in stomach after eating bread.
Pain in stomach and back.
Heaviness, like a stone in stomach, cannot sleep, feels nervous and fidgety, with cramps in soles and palms, and hoarseness such as she had in cholera; drawing pain from pit of stomach under sternum, where it feels like flatulence.

[18] **Hypochondria.** Heavy pain in r. hypochondrium, toward back, < from deep breathing.
Stitches in spleen and pressure in l. eye; slight headache, < by moving.
Stitching pain in l. hypochondrium.

Google

Stinging pain in l. hypochondrium at night.

[19] **Abdomen.** Sensation of nausea in abdomen two hours after usual stool in morning.

Abdomen distended; moving, rolling in bowels.

Rumbling in l. side of abdomen; flatus; sometimes a slight pain through bowels.

A sudden drawing-stinging pain in l. iliac region, going upward, at 3 P.M.

Sore pain in a small place in r. side of abdomen.

Contracting colic passes through abdomen, while standing; soon followed by desire for stool.

‖Colic and nausea after drastics.

Colic whole night, feeling of weight and drawing, with much wind.

Slight cutting pain in l. umbilical region.

Pressing-stinging pain in bowels, especially in l. iliac region, at 6.15 P.M.

Pressing pain in l. inguinal region, with superficial soreness in a small spot at 2 P.M., over Poupart's ligament at 8 P.M.

Pressure in l. and r. iliac region till he sleeps, 5 P.M.; pressing pain in l., in evening; sore with pressing pain at 5 P.M.

Drawing pain in lower abdomen and back, had to go to stool.

Toward evening a drawing downward in bowels and lower abdomen, especially in both sides, and when this passed off she had nausea; pressing downward in abdomen; drawing downward in bowels at 8 P.M.

Slight drawing pain low down in abdomen, passing from r. to l. side; it went higher up before passing off.

[20] **Stool and Rectum.** Diarrhœa: of brown mucus, in morning; in morning, followed by nausea; from impure water; from water containing coal oil; from deranged stomach; from cold, damp weather; frequent mucous stools during day, with much wind; with acidity of stomach, and a bad, slimy taste.

πExtremely loose bowels and griping all night, for two days; stools previously black, are now light in color.

Stools soft; is thirsty all the time.

‖Mr. N., æt. 18, tall, slender, fair, healthy: drank impure water impregnated with coal oil; watery diarrhœa, at first copious, afterward scanty, with much flatulence, cutting pain in bowels; great depression of spirits, and fear that something would happen to him before he got home; weakness; anorexia; sphincter ani relaxed; four or five stools in twenty-four hours.

‖Had been chilled by the northeast wind, in Summer at

the shore, felt hot and chilly at same time; and after improper food had disagreed with her stomach, much belching and diarrhœa, pain in stomach, felt very uncomfortable, did not know what to do; could eat nothing, as taste of everything remained, particularly for hours after eating bread, and still more after toast.

Constipation with belching.

Hot and painfully sore feeling in anus continually.

Redness, inflammation, burning-itching at anus.

‖In and around anus a redness, inflammation, burning, itching extends higher up to back; hemorrhoidal tumors very hot and painfully sore (*Nux vom.* cured).

πChewing ginger for an asthma which it did not relieve; very soon hemorrhoidal tumors very hot and painfully sore; the same whether sitting or lying (*Nux vom.* cured).

‖Hot and painfully sore feeling in anus; continually during pregnancy.

[21] **Urinary Organs.** ‖Dull aching and hot sensation in kidneys, with frequent desire to urinate.

Stinging-burning in orifice of urethra, no pain while urinating; urine very pale.

Urine: thick, turbid; dark brown; of strong smell; clear, bright and in great quantity; very pale.

While urinating, acute pain in orifice of urethra (cured by *Nux vom*).

After urinating urine continues to ooze in drops.

‖Complete cessation of function of kidneys, up to fifty hours' duration, in reconvalescents from typhus.

[22] **Male Sexual Organs.** Yellow, nightly discharge from urethra (cured by *Nux vom.*).

Excites sexual desire.

Painful erections (cured by *Nux vom.*).

Increases secretion of sperma.

Emissions at night.

Itching on prepuce; which feels cold and moist.

[23] **Female Sexual Organs.** Menses too early and profuse, dark-clotted; irritable; exhausted look before; drawing pain in sacrum.

During menses: felt very sick and irritable; pain in lumbar region, more on l. side.

[24] **Pregnancy. Parturition. Lactation.** During pregnancy: hot and painfully sore feeling in anus.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness, such as she had in cholera.

‖Smarting below larynx followed by cough, with mucous rattling.

Scratching in larynx irritates to a dry hacking cough, feels rancid, makes her drink water.

Digitized by Google

Soreness in upper larynx, like a ridge in it.

[36] **Respiration.** ‖Asthma humidum; loosens the phlegm.

Breathing difficult, had to sit up; pain in r. lung.

Breathing shorter for fifteen minutes.

Difficult breathing from pain in r. lung.

‖Violent asthma after a proving of *Caladium*; most laborious breathing, but without anxiety of mind; chewing fresh ginger root caused a burning of mouth, a running of saliva, and loosening of white, easy phlegm from larynx, and difficulty in breathing passed away.

‖Asthma: respiration very painful; oppression; scratching sensation in throat, which excites cough; burning and smarting in throat; cough dry, with pains in chest and copious expectoration only in morning; at night, difficulty of breathing greater; patient is obliged to remain sitting up in bed; aggravation for two hours in morning.

[37] **Cough.** Dry, hacking; from tickling in larynx or l. side of throat; from smarting or scratching; with pain in lungs, difficult breathing; morning sputa, which is copious.

Cough: excited by a contraction of skin in region of larynx, without previous pain; from scratching in larynx, 1 to 2 A.M.; from tickling and dryness of larynx; especially in morning, with much expectoration, which she has to swallow; before midnight; in night; excited by a burning and smarting; dry, hacking, with pain in lungs and difficult breathing.

[38] **Inner Chest and Lungs.** Stitches and pleuritic pains through chest.

Stinging pains after motion, also stinging pressing in region of heart.

Slept very well until 2 A.M., when she awoke with a violent stinging pain in lower portion of r. lung, breathing difficult, had to sit up in bed; a dry, hacking cough made pain and difficulty in breathing worse; in morning much expectoration, pain in r. lung lasting whole day, with external soreness.

After motion, now and then, stinging pain in lungs.

Asthenic pleurisy.

External soreness of chest, with internal pain.

π Broken feeling around chest in evening.

A soft pressure on chest while walking, the time when he does not cough.

Dull, pressing pain in r. lung, from second to sixth rib; in front, < at intervals, somewhat difficult breathing, at 7 P.M.

Several times pain through middle lobe of l. lung at 9 P.M.

Stitches: through chest in l. lower lung; in r. side of chest.

Digitized by Google

All day pain under breast bone.
Pain under sternum from pit of stomach.
Pressure from within outward under upper part of sternum, more on r. side.
Pressing pain under sternum at 4 P.M.
Violent stinging pressing pain on l. side of chest, in region of heart at 4 P.M.

[30] **Heart, Pulse and Circulation.** Fluttering of heart.
She feels exhausted; fluttering of heart; languid; has an empty sensation.
Accelerated circulation.
Pulse, hard and full, heat with redness in face; humming in ears; in evening, full, hard and slow; from 72 and weak to 84 and full, with rush of blood to head.

[31] **Neck and Back.** ≈Stiffness in neck, < on motion.
Stiffness of back of neck, with headache and nausea.
Backache as from weakness; > when sitting and leaning against something.
Lower part of back: as if beaten; lame from walking or standing; feels stiff and heavy.
Stiffness of neck on l. side, with headache.
Cracking sound in first cervical vertebra: on rising from sitting, with stiffness in l. side of neck; on looking upward, in evening.
Dull, aching, drawing pain in back, between shoulders, at 6 P.M.
Dull pain in r. lumbar region.
Stiffness and heavy feeling in lower part of back.
Pain in small of back, as if beaten while walking or standing.
Drawing, sometimes stitching, pain in small of back, and lower down in abdomen; could not sit erect; this pain went up with stitches through chest, and settled as stingy pains under l. shoulder blade; pain increased by deep breathing at 7 P.M.
Stitching pain in small of back.
Backache, first low down, but passing off, he feels it higher up at 8 P.M., several times with nausea.
In l. loin a shocklike moving downward, as from a dropping fluid.
Backache in sacral region.
Drawing pain in l. sacral region, in evening, first day of menstruation.
Pain as from weakness in sacral region after lying down in evening (cured by *Nux vom.*).

[32] **Upper Limbs.** Heavy, lame feeling in l. arm; numbness, < in forearm.
Rheumatic drawing pains in backs of hands.

Digitized by Google

Heat of palms and face.
Dull aching pain in r. arm going down to wrist.
Jumping twitching in muscles of l. arm downward.
Drawing pain: in l. arm; first in r., then in l. arm.
After coming into a warm room, at noon (in December), drawing pain in l. arm, continuing all afternoon and evening, especially in l. upper arm.
After working some, she felt violent drawing pain from r. axilla to sternum, from third to sixth ribs, in intercostal muscles.
Drawing pain in l. shoulder, at 11 P.M.
Fell on ice and strained l. shoulder joint; his arm felt as if paralyzed, could not use it much, very difficult and painful to raise it, much more than was to be expected from a fall; had all through proving a weakness and drawing pain in l. shoulder joint.
Pain along l. deltoid as from overwork; a sensation of lameness, < from motion.
Heavy feeling, a kind of lameness in upper arms.
Twitching in muscles: of r. upper arm; of back part of r. humerus, and in r. thigh.
Pulling-tearing pain along triceps of r. arm.
Drawing pain in r. upper arm, in evening.
Felt a loud crack in l. elbow on moving.
Internal trembling of muscles of forearm while holding something.
Twitching in muscles of l. forearm.
Drawing pain: in r. forearm toward wrist; in back of hand, like rheumatism; cramplike, in palm of l. hand at 5 P.M.

Lower Limbs. Pains in hip joints; joints stiff, lame.
Burning, stinging, tingling in feet.
Painful swelling of feet.
Broken feeling around hips, very tired when standing.
Drawing pain in both hip joints, with a feeling of lameness afterward; pain came by spells; after two drawing pains followed a little rest, then pain again; it is < in l. joint.
Had long ago a fall injuring l. hip, but for several weeks felt nothing of it at all; as soon as he commenced proving, same soreness returned as after fall.
Drawing pain: in thighs; in outer side of l. thigh; below l. patella, in afternoon; along inner side of r. patella.
A pain as from overstraining muscles in bend of knee.
Dull aching drawing pain, first in l., then in both knees, extending down to feet.
Exceedingly painful crawling, like that in parts that have gone to sleep, and prickling in balls and soles of feet while sitting; evenings.

Digitized by Google

A very acute drawing (digging) pain on top of foot while it is stretched out.
Heels ache after long standing.
Cramps in soles.
Prickling crawling pains in sole of foot, while walking or standing.
While sitting in evening a fine pricking crawling, almost like a sore pain, in sole of foot.
Burning pricking crawling in soles, heels and toes while sitting, particularly burning in a corn on sole, in evening.

34 **Limbs in General.** Very weak in all joints; in back a kind of lameness; had been walking much day before.
Dull, heavy feeling; lassitude also with dizziness.
Joints weak; back lame
‖ Dull, heavy pain in l. vertex and in arms and legs; 11 A.M.
Drawing and stinging pain in all her limbs, as after taking cold.
Cramps in soles and palms.

35 **Rest. Position. Motion.** Lying: breathing difficult; weakness in sacral region.
Sitting: leaning back, backache >; prickling in balls and soles of feet; prickling, crawling in sole of foot; burning, prickling crawling in soles, heels and toes.
Standing: headache internally above temples >; contracting colic passes through abdomen; lower part of back lame; tired; long, headache; prickling crawling in sole of foot.
Stooping: sensation as if contents of head pressed into forehead and root of nose; headache <.
Motion: headache <; after, stinging pains, also stinging pressure in region of heart; after, stinging pain in lungs; stiffness in back <.
Rising: pulsating pain in vertex <; cracking in cervical vertebræ.
Laughing or talking: frontal headache <.
Deep breathing: heavy pain in r. hypochondrium.
Exertion: frontal headache
Walking: soft pressure on chest; lower part of back lame; prickling crawling in sole of foot.

36 **Nerves.** Foaming at mouth, free urination, spasms.
π Faintish weakness; wants to lie down.
π Prostrated and feverish.
Sensation as if she were going to faint.
‖ Hypochondriasis.
Brings on spasms in epileptics.
Feels tired all over in afternoon.

Feels very unwell all day.

[37] **Sleep.** Coma: sleepy morning; afternoon; as from spring fever.

Awakens 3 A.M.; falls asleep again late in morning.

After a good sleep at night, very sleepy all morning, with frequent yawning.

Sleepless till toward morning; falls from one dream into another; dreams of fire, fright, etc.

Cannot sleep, feels nervous and fidgety.

Wakefulness latter part of night.

Dreams: of dancing, throwing somersaults (by an old man), incomplete emissions; of fire; frightful; anxious.

[38] **Time.** 1 to 2 A.M.: cough, from scratching in larynx.

2 A.M.: awoke with stinging pain in lower portion of r. lung.

6 A.M.: drawing frontal headache.

Morning: frontal headache; pressing pain, with heat over head; soreness in r. lower jaw; dry lips and mouth; slimy, bad taste; on awaking, dryness of throat and difficult swallowing; much thirst; two hours after usual stool, nausea in abdomen; copious expectoration; cough; sleepy.

11 A.M.: headache over forehead; dull, heavy pain in l. vertex and in arms and legs; dull, heavy pain encircling head.

Toward noon: chilly.

Noon: pressing, drawing frontal headache.

After dinner: headache >.

Afternoon: stitches over l. eye <; pressing headache in temples; tired all over; sleepiness <; drawing pain in l. patella.

2 P.M.: pressing pain in l. inguinal region.

3 P.M.: drawing, stinging pain in l. iliac region.

4 P.M.: pressing pain under sternum; stinging, pressing pain on l. side of chest.

Toward evening: drawing downward in bowels.

All day: pain under breast bone; feels unwell.

During day: more sensitive to noise; diarrhœa, with much wind.

5 P.M.: stinging over l. eye; drawing pain in l. temple and over l. brow; drawing pain in all teeth; pressing in iliac regions; cramplike pain in palm.

6 P.M.: aching between shoulders.

Evening: irritable and chilly; stitches over l. eye <; pressing headache in temples; dull, pressing headache on l. side, with heat on head, and much thirst; eyes sensitive to light; beating pressure in l. occiput; eructations; pulse full, hard and slow; chill goes upward; chilliness, more about trunk; irritable; prickling in

Google

balls and soles of feet while sitting; burning in corn on sole.

Day and night: sick feeling.

6.15 P.M.: pressing, stinging pain in bowels, especially l. iliac region.

7 P.M.: drawing pressing over l. eye; tearing in r. ear; drawing pain in l. lower teeth; difficult breathing.

8 P.M.: dull, aching-pressing pain in l. temple; pressing pain over Poupart's ligament; drawing downward in bowels.

Night: drawing, stinging pain from l. lower jaw to first incisors; much thirst; stinging pain in hypochondrium: colic; loose bowels and griping; emissions; difficulty of breathing <; cough; sleepless.

9 P.M.: drawing pain in l. lower jaw; pain in lung; pain through middle lobe of r. lung.

9 to 10 P.M.: dull headache over l. eye.

10 P.M.: drawing, stinging pain from l. lower jaw to first incisors.

11 P.M.: dull and sore feeling over l. eye; drawing in shoulder.

Before midnight: cough.

[39] **Temperature and Weather.** Uncovering head: headache internally above temples >.

Head covered: headache internally above temples.

Open air: headache internally above temples; watery discharge from nostrils <; drawing pain in l. lower teeth returns; chilly.

Cold air: stitches over l. eye <.

Cold, damp air: headache; pressure in head.

In a room: headache >.

Warm room: nausea, headache; headache internally above temples >; drawing in l. arm; chilliness, more about trunk in evening.

Crawling: in sole.

Heat: in head; in kidneys; in anus; of palms and face; in ears; in skin.

Itching: on head and cheeks; of nose; in beard; at anus; on prepuce; on scalp and in pubic parts.

Dryness: of nose; of lips and mouth; of roof of mouth and posterior nares; in throat; of larynx.

[40] **Fever.** Chilly in open air; in evening; chill goes upward.

Hot and chilly at same time.

Cold shiverings.

Chilly toward noon; first cold feet, then cold hands.

Creeping chilliness, more about trunk, evenings in warm room.

Sensibility to open cold air.

Google

Irritable and chilly in evening.
Heat in face and in palms of hands.
Chilliness with headache.
Very chilly with faintness and sick-headache.
Cold hands and feet alternately.
Heat: with headache; in ears; in face; in palm.
Profuse perspiration.

41 **Attacks, Periodicity.** At intervals: dull, pressing pain in r. lung <.
Alternately: cold hands and feet.
For fifteen minutes: breathing shorter.
Lasting one and a half hours: pain encircling head.
For two days: loose bowels and griping at night.

42 **Locality and Direction.** Left: headache over forehead; stitches over eye; stinging over eye; drawing over eye; pressing over eye; dull headache over eye; pressing in occiput; pressing in and over eye; beating in temple; drawing pain in temple and over eyebrow; dull aching-pressing pain in temple; dull and sore feeling over eye; vertex sore; dull, heavy pain in vertex; dull, pressing headache, pain over eye; beating pressure in occiput; stiffness of neck; sensation as from a grain of sand in eye; beating pressure in occiput; two large red pimples on cheek; drawing pain in upper jaw to temples; drawing in lower jaw; drawing stinging pain from lower jaw to first incisors; drawing pain in lower teeth; tickling in throat <; pressure in eye; stitching pain in hypochondrium; stinging pain in hypochondrium; rumbling in abdomen; drawing-stinging pain in iliac region; slight cutting pain in umbilical region; pressing stinging in iliac region; pressing pain in inguinal region; pressing in iliac region; pain in lumbar region <; tickling in throat; pain through middle lobe of lung; stitches in lower lung; stinging pressing pain on side of chest; stiff neck; stinging pains under shoulder blade; a shocklike moving downward as from a dropping fluid in loin; drawing in sacral region; lame feeling in arm; twitching in muscles of arm; drawing in arm; drawing in shoulder; pain along deltoid; cracking in elbow; twitching in muscles of forearm; cramplike pain in palm; pain in hip joint <; drawing pain on outer side of thigh; dull aching drawing in knee.
Right: as if eye were pressing out; twitching over eye and in muscles of neck; dull pressing drawing headache in temple; pulsating pain in vertex; drawing tearing in ear; discharge of pure water from nostril; soreness in lower jaw; heavy pain in hypochondrium;

sore pain in a small place in abdomen; pressing in iliac region; pain in lung; stinging pain in lower portion of lung; dull, pressing pain in lung; stitches in side of chest; pain in lumbar region; aching in arm; drawing from axilla to sternum, and from third to sixth ribs; twitching in muscles of upper arm and thigh; pain along triceps; drawing in forearm to wrist; drawing along inner side of patella.

Right to l. drawing pain low down in bowels; drawing in arms.

Without inward: pressure in head.

Diagonal direction: headache in l. vertex or occiput, and r. eye.

Circular direction: aching around head.

[43] **Sensations.** As if head were too large; confused and empty in head; as if contents of head pressed into forehead and root of nose on stooping; as if r. eye were pressing out, like a board pressing through head; as if head were pressed; as from a grain of sand in l. eye; as if there were an obstacle in throat to swallow over; as of a stone in stomach; empty feeling; as if beaten, lower back; a shocklike moving downward, as from a dropping fluid in l. loin; pain as from weakness in sacral region; pain as from overwork in l. deltoid; as from overstraining muscles in bend of knee; as if she were going to faint.

Pain: in stomach and back; in lumbar region; in r. lung; through middle lobe of l. lung; under breast bone; in hip joints.

Acute pain: in orifice of urethra.

Cutting: on margin of lids; in l. umbilical region; in bowels.

Digging: on top of foot.

Stitches: in forehead; over l. eye; inside eyelids; in spleen; through chest; in l. lower lung; in r. side of chest; in small of back.

Stinging: over l. eye; in eyeballs; in l. lower jaw and teeth; in throat; in l. hypochondrium; in l. iliac region; in bowels; in orifice of urethra; in chest; in region of heart; in lower r. lung and under l. shoulder blade; in feet; in all her limbs; in skin.

Prickling: in sole.

Drawing: frontal headache; over l. eye; over eyebrows; in l. temple and over eyebrow; above temples; in r. temple; sharp, through and around eyes; in r. ear; in l. upper jaw to temples, l. lower jaw and in teeth; in roots of teeth; in lower abdomen and back; in pit of stomach and under sternum; in l. iliac region; on sa-

crum; between shoulders; in small of back; in l. sacral region; in backs of hands; in arms; from r. axilla to sternum, and third to sixth ribs; in l. shoulder; in r. upper arm; in r. forearm to wrist; in hip joints; in thighs; in outer side of l. thigh; below l. patella; along inner side of r. patella; on top of foot; in all her limbs.

Pressure: in frontal bone; over l. eye; in l. occiput; in temples; in l. eye; l. side of head; in head from without inward; in and about eyes; in roots of teeth; in stomach after bread; in bowels and iliac regions; in l. inguinal region; in region of heart; on chest while walking; in r. lung; under upper sternum.

Tearing: in r. ear; along triceps of r. arm.

Scratching: in larynx.

Broken feeling: in head; around hips.

Pulling pain: along triceps of r. arm.

Pleuritic pains: through chest.

Rheumatic pains: in backs of hands.

Aching: over eyebrows; in l. temple; in kidneys; between shoulders; in r. arm to wrist; in knees; in heels.

Burning: in eyes; in mouth; in anus; in orifice of urethra; in throat; in larynx; in feet; in soles, heels and toes; in a corn on sole.

Smarting: in eyes; below larynx; in throat.

Soreness: over l. eye; of l. vertex; in r. lower jaw; in vesicles on tongue and gums; in throat and pit of stomach; in a small place in r. side of abdomen; over Poupart's ligament, l. side; about anus; in upper larynx, like a ridge; of outer chest; of l. hip.

Griping: in bowels, with loose stools.

Cramps: in soles and palms.

Dull pain: in l. vertex, arms and legs; encircling head; in r. lumbar region.

Pulsating pain: in vertex, r. side.

Beating: in l. temple; in l. occiput.

Heavy pain: from r. hypochondrium to back.

Heaviness: in all her limbs; in stomach, like a stone; in lower back; in upper arms.

Weight: in abdomen with colic.

Stiffness: in neck and back; in hip joints.

Lameness: in upper arms; in l. deltoid; in hip joints; in back.

Numbness: in temples; in forearm.

Tickling: in throat; in larynx.

Tingling: in feet.

"**Tissues.** | | Dropsy.

"**Touch. Passive Motion. Injuries.** Touch: sore feeling in l. vertex <; head sore.

Rubbing: sensation as from a grain of sand in l. eye >.
Scratching: itching of nose not >.

[46] **Skin.** Skin feels relaxed, soft and pliable.
Itching on scalp, in beard, and on pubic parts.
Reddening of skin; with sensation of heat and stinging.
Large scarlet-red pimples on face, on forepart of head and on neck.
Two large red pimples on cheek.
Red pimples on both sides of alæ nasi.

[47] **Stages of Life, Constitution.** Man, æt. 18, tall, slender, fair complexion, strong and healthy, after drinking water impregnated with coal oil; diarrhœa.

[48] **Relations.** Antidoted by: *Nux vom.*

ZIZIA.

Meadow Parsnips. *Umbelliferæ.*

The tincture is prepared from the root.
Proving by Marcy, assisted by Fulgraff, in 1855, N. Am. Jour. of Hom., vol. 4, p. 52.

[1] **Mind.** Exhilaration: like intoxication; of all faculties, followed by a strong desire to sleep; lasting twelve hours, then great depression for several days.
Laughing and weeping moods in alternation.
Depression of spirits: with disgust of life, followed by great exhilaration and desire for conversation.
Irritability, with lowness of spirits and indifference to everything.
Nervous irritability and depression of spirits; self-dissatisfaction, with weeping.
Indolence, with contentment.
Dreamy, imaginative mood.
Behavior quiet, with much apparent suffering and sadness.

[2] **Sensorium.** Giddiness; swimming in head.

[3] **Inner Head.** Rush of blood to head and face, with feeling of fulness.
Sensation of tightness around head.
Headache sharp over r. eye, begins slightly on second

Digitized by Google

day and increases until eighth (*Pulsatilla* 6, which promptly relieved it until third day, acts but feebly on seventh); in its full development on seventh day, headache is grievous, with nausea, inclination to bilious vomiting, need to lie still in a darkened and quiet room; < from light, noise and jar; permanent on r. side, not shifting; at its worst pain descends behind r. ear into neck; lips parched as from fever; severe backache between or at borders of shoulder blades; forehead is affected by a sharp cutting pain by jar of coughing.

Severe pain in r. temple, with nausea.

Pressure upon top of brain.

Acute aching pain in whole l. side of head, increased by light or noise.

Dull pains in occipital region, extending down muscles of neck.

11 Affections of brain and nervous system.

5 **Sight and Eyes.** Eyes sensitive to light, watery.

Redness of both eyes.

While both eyes exhibit a diffused injection, r. eye is more particularly the seat of painful and quite unaccustomed symptoms.

Smarting of lids.

Shooting pains through orbits.

Sharp pains in r. orbit, < by moving eyeball, by stooping or stepping.

7 **Smell and Nose.** Nasal catarrh with sneezing and coughing.

Nasal discharge of thick mucus.

Obstruction and soreness of r. nostril, which is painful to touch.

Right nostril only is affected, it became sore and tender to external touch; a diffused injection of mucous membrane covering arches of pharynx, with ordinary sensations of catarrhal sore throat; conjunctival membrane exhibited a similar diffused injection.

11 Catarrhal, asthmatic and pleuritic maladies.

8 **Upper Face.** Face pale and puffy.

Redness of one cheek and paleness of other.

Boring pains in cheek bones.

9 **Lower Face.** Dull pains in jaws.

Painful tenderness over lower jawbone, an inch below root of ear.

11 **Taste and Tongue.** Taste: bitter; bitter, bilious, after sick-headache.

Redness of tongue, with unusual sensitiveness to cold and warm drinks.

Tongue covered with a whitish fur.

Yellow fur upon tongue, and oppressed respiration.

Digitized by Google

Tongue broad, furred in middle and reddened at tip and sides.

[13] **Inner Mouth.** Dryness of mouth.

[15] **Throat.** Increased secretion of mucus in throat.

Slight redness of tonsils and palate, with soreness of throat.

Inflammation of mucous membrane of pharynx.

[14] **Appetite, Thirst. Desires, Aversions.** Craving for acids and stimulants.

Loss of appetite.

Thirst.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea.

Acid and bilious vomiting.

[17] **Scrobiculum and Stomach.** Stomach sensitive to touch.

Pressure occasioning nausea and faintness.

[22] **Male Sexual Organs.** Involuntary emissions two nights in succession.

Excitement of male genital organs.

Lassitude and prostration after connection.

[23] **Female Sexual Organs.** Profuse menstrual discharge, followed by acrid leucorrhœa.

Catamenia appeared in due time, but ceased after twelve hours.

Sudden suppression of menses.

Leucorrhœa: bland and profuse; acrid; commences on second day and continues, slight as to quantity, and at first acrid, afterward more bland and copious; with retarded or suppressed menses; chronic, attended by irritation of spine or brain.

Uterine affections, with increased vascular and nervous excitement.

[25] **Voice and Larynx. Trachea and Bronchia.** Roughness in upper portion of larynx when inspiring or coughing.

Raw and smarting sensation in larynx from coughing.

Sensitiveness of trachea to touch.

[26] **Respiration.** Respiration accelerated and oppressed.

Respiration oppressed, yellow fur upon tongue.

Asthmatic respiration, with inability to retain recumbent position.

She cannot draw a full breath, without severe pain, it catches her about sixth rib in front, and pierces through to back, r. side.

[27] **Cough.** Dry cough, with shooting pains in chest.

Tight cough caused by taking a deep inspiration, or by dryness of larynx.

Short, dry cough, attended by severe stitching pains in r. side, and a sense of suffocation.

Cough hard, dry and short, with stitching pain in r. side,

Google

from region beneath sixth rib down as far as two inches below xiphoid cartilage.

[28] **Inner Chest and Lungs.** Dull, aching pains under r. scapula.

Severe shooting pain extending from front part of thorax to scapula.

Sharp pains, extending from sides of chest to both shoulder blades.

Severe stitching pains in chest, accompanied by feverish symptoms.

Pleuritic stitches in r. side, much increased by coughing, or taking or attempting to take a long breath.

Pleural symptoms severe, painful.

[30] **Outer Chest.** Bruised feeling in muscles of chest.

Pressure excites pain in intercostal muscles.

Over xiphoid cartilage and at circumscribed spots on each side, about size of a fifty-cent piece, two inches below, there is a painful tenderness to external touch.

[31] **Neck and Back.** Dorsal symptoms painful, perhaps sympathetic with uterine sphere; their seat is at posterior lateral margins of scapulæ, generally < on l. side; pains aching, smarting and stinging.

Dull pains in loins increased by movement.

Smarting-burning pain in small of back.

[32] **Upper Limbs.** Lameness in muscles of both arms, from shoulders to elbows.

Pricking sensation in r. arm, with slightly diminished sensibility of part.

[33] **Lower Limbs.** Dragging sensation in both hips.

Unusually tired feeling of legs, after slightest muscular exertion.

[35] **Rest. Position. Motion.** Lying: asthmatic breathing <.

Stooping: pain in r. orbit <.

Motion: of eyeball, pain in r. orbit <; pains in loins <; desire for, but causes fatigue; spasmodic movements <.

Coughing: cutting pain in forehead; pleuritic stitches in r. side <.

Stepping: pain in r. orbit <.

[36] **Nerves.** Increased physical strength, with inclination for muscular exertion.

General aspect and sensation of prover were those of grave and chronic deterioration of health.

Sensitiveness of entire surface of body to touch.

Great desire to move about, with apparent increase of strength, but slight exercise causes fatigue.

Spasmodic movements of muscles of face and extremities.

Before spasms labor pains cease, and feels pains in epigastrium.

Digitized by Google

Convulsions, epilepsy.
Chorea, with twitchings during sleep; spasmodic movements of muscles of face and extremities; < by movement, noise, light or contact.
Intermittent neuralgia of l. ovary.

[37] **Sleep.** Drowsiness, with a sense of lassitude and fatigue.
Sleep is sound until sixth night, when it is prevented by pain.
Spasmodic twitching during sleep. θChorea.
Talking during sleep.
Sleep disturbed by unpleasant dreams.

[38] **Time.** Morning: eyelids adhere.

[40] **Fever.** Chilliness and heat, alternating with faintness, nausea, pain in r. temple, redness of eyeballs, dry and red tongue, and thirst for cold water.
Chilliness, accompanied with spasmodic twitching of muscles of face and lower extremities, followed by fever.
Fever, with headache, pain in back, thirst.
Feverish symptoms, accompanying severe stitching pains in chest.
Severe sense of heat and fulness in both cheeks.
Flushed cheeks, hot head, visible pulsations of carotid and temporal arteries, coldness of hands and feet, drowsiness and irritability.
Redness and heat of cheeks.
Hot flushes in face and head followed by perspiration.

[41] **Attacks, Periodicity.** In alternation: laughing and weeping moods.
For twelve hours: great exhilaration; duration of catamenia.
Two nights in succession: involuntary emissions.
For several days: great depression.

[42] **Locality and Direction.** Left: acute aching in head; neuralgia of ovary.
Right: sharp pain over eye; headache; pain in temple; pain descends behind ear into neck; severe pain in temple; eye <; stye upon lid; sharp pain in orbit; obstruction and soreness of nostril; piercing pain from sixth rib in front through to back; stitches in side; dull aching under scapula; pricking in arm.

[43] **Sensations.** Pain: in r. temple; in back.
Severe pain: in r. temple.
Sharp pain: over r. eye; in r. orbit; from sides of chest to shoulder blades.
Cutting: in forehead.
Boring: in cheek bones.
Piercing pain: from sixth rib in front through to back, r. side.

Google

Stitches: in r. side; in chest; pleuritic in r. side.
Shooting: through orbits; in chest; from front part of thorax to scapula.
Pricking: in r. arm.
Stinging: in lateral margins of scapulæ.
Severe aching: between shoulder blades; in whole l. side of head.
Aching: in back.
Smarting: of lids; in larynx; in small of back; in lateral margins of scapulæ.
Burning: in small of back.
Dull pain: in occipital region down muscles of neck; in jaws; in loins.
Soreness: of r. nostril; of throat.
Rawness: in larynx.
Dull aching: under r. scapula.
Pressure: on top of brain.
Dragging: in both hips.
Bruised feeling: in muscles of chest.
Tenderness: over lower jawbone, an inch below root of ear.
Tightness: around head.
Lameness: in muscles of arms.
Tired feeling: in legs.
Roughness: in larynx.
Fulness: in head and face; in cheeks.
Heat: in cheeks.
Coldness: of hands and feet.
Itching: pimples on forehead, wrist and legs.
Dryness: of mouth; of larynx; of tongue.
Pains increased by movement, noise, light or contact.

[44] **Tissues.** White and puffy appearance of whole body.
Surface of whole body paler than natural.
Face and ankles œdematous.

[45] **Touch. Passive Motion. Injuries.** Touch: r. nostril painful; stomach sensitive; trachea sensitive; tenderness over xiphoid cartilage; entire surface of body sensitive.
Contact: spasmodic movements <.
Pressure: on stomach causes nausea and faintness; excites pain in intercostal muscles.
Jarring: headache <.

[46] **Skin.** Itching pimples upon forehead, wrists and legs.

[46] **Relations.** Compare: *Mygale* and *Tarent.* in chorea.
