PREFACE.

THIS work will especially commend itself to the busy practitioner, because it is an attempt to give our Materia Medica in such a form as will make the selection of a curative medicine in any given case as easy as possible. It is a *complement* to all other works on our Materia Medica, being principally a collection of CURED SYMPTOMS. We could fill pages with quotations from our best practitioners in favor of their use in the selection of remedies. A cured symptom only, has never such an intrinsic value as one *produced and cured*, and yet, such a one should not be ignored; in course of time it may be added to the *characteristics*. Of course all *characteristics* will be found here, and many other symptoms produced and cured, which further experience may warrant us in marking up in degree until they attain the grade we denominate characteristics.

As so many peculiar views have been expressed in regard to what is meant by a characteristic, a few words on the subject may not be out of place. Some of our best observers have been sneered at by would-be critics, as if they had been guilty of manufacturing characteristics. This, of course, proves them to be sadly deficient in a knowledge of the Organon. Let us

Digitized by Google

see what Hahnemann says there, in his masterly advice how to examine the sick.

§ 95. In chronic diseases the investigation of all symptoms should be conducted as carefully and circumstantially as possible, and made to penetrate the minutest details, because they are most peculiar and most unlike those of acute affections, and also because they never can be too accurately considered for the purpose of successful treatment. Again, chronic patients are so inured to suffering, that circumstances, however *characteristic and decisive in the selection of the remedy*, are rarely, if at all, mentioned by them, but rather considered as a part of their unavoidable condition. It rarely occurs to them that other small or great deviations from the healthy condition might be connected with the main disease.

§ 101. A physician *accustomed to exact observation* may approach the true condition of an *epidemic* so closely that he is enabled to construe a *characteristic image* of the same, and even to discover the appropriate homœopathic remedy.

§ 102. By writing down the symptoms of several cases of this kind, the sketch of the disease will gradually become more complete; without being enlarged by *additional phrases*, it will be *more closely defined* (more *characteristic*) and made to embrace more of the peculiarity of such collective diseases. General signs, such as want of appetite, sleeplessness, etc., are specified and defined. More prominent and special symptoms will be made conspicuous by proper notation, and constitute the *characteristics of the epidemic.*

§ 104. When all the prominent and characteristic

Digitized by Google

symptoms, collectively forming an image of a disease, have been carefully committed to writing, the most difficult part of the work will have been done.

§ 153. The search for a remedy consists in the *comparison* of the totality of the symptoms (of the sick) with the symptoms of our proved drugs. In making this comparison, the *more prominent, uncommon and peculiar* (characteristic) features of the case are especially and almost exclusively considered and noted; *for these in particular should bear the closest similitude to the symptoms of the desired medicine,* if that is to accomplish the cure. More general and indefinite symptoms, such as want of appetite, headache, weakness, restless sleep, distress, etc., unless more clearly defined, deserve but little notice on account of their vagueness.

In paragraphs 164, 165 and 178 nearly the same is repeated.

For the benefit of all who may have an opportunity of comparing the master's first edition of 1810, we quote the paragraphs and pages where he used the word "characteristic." § 74, p. 73, more fully explained; § 129, p. 108; § 135, p. 114; § 152, p. 122; § 169, p. 132; § 183, p. 151.

Every word contained in his masterly advice how to examine the sick was new and unheard of in the history of medical science.

According to this practical advice of Hahnemann, we have endeavored to find out the characteristics of our drugs.

What are the ways our School has followed? The first is, we allow the *possibility* that symptoms may follow when a drug is taken in health, and that these

Digitized by Google

symptoms are produced conjointly by the drug and the prover.

"Could Cinchona bark produce altered sensations on myself, if I took it now in health?" This was the question which induced Hahnemann to make his first proving, in 1790. The answer was, he felt a group of symptoms exactly such as he had when he suffered from intermittent fever, twenty years before, in Siebenbürgen. Was he satisfied with this observation? Certainly not. He repeated his experiment, and he repeated it several times with exactly the same result. "I stopped taking it, and got well," he says.

Throughout all, we see the fine result of the thinking lessons given to Hahnemann by his father when a boy.

His very first step already refuted the slander which was subsequently flung at our school, that it was based on the conclusion, post hoc, ergo propter hoc. If the same or similar symptoms appeared in the proving of a drug on the healthy, they were considered as having been probably caused by it, and the oftener the symptoms appeared in the provings, the greater became the *probability*. How anxiously the first builders of our Materia Medica looked for the printing of the provings, in order to compare their own with the symptoms of others, deriving enjoyment from each *confirmation!*

The next step was to look for physiological and pathological *corroborations*. But all this was only considered as magnifying the probability.

The next step was to give a drug to the sick, according to the symptoms it had produced on the healthy, and the cures made were the *verifications*.

Digitized by Google

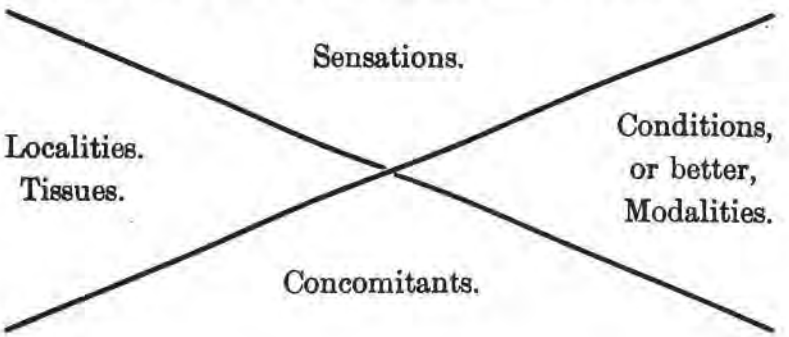
Finally we obtained the CHARACTERISTIC, the ripe fruit hanging upon the tree.

We never selected the remedy according to the loose generalizations in fashion with many, and considered more scientific. We never walked on pathological stilts, but always took the symptom as a reality, on the one side observed by the prover, and on the other side observed on the sick.

Phrases of "grand starting-points" and "centres of action in the ganglionic nerve-centres" are vagaries of a scientific appearance which every tyro can manufacture anew according to the latest fashion.

The definition of a *characteristic* being "a symptom not found under more than one remedy" is quite erroneous. Such a unicum occurring among a large collection of symptoms should be looked upon with suspicion. On the contrary, all our most approved characteristics, as they have been corroborated time and time again, are *never* such as are found in one medicine alone.

Many years ago, for the benefit of the students at Allentown, the following little scheme was written on the blackboard in the lectures on Materia Medica:



Digitized by Google

The characteristic may be found in one or more of these. Three points of rest, according to mathematics, being enough to support any object, we may assume that three characteristics should be sufficient to make a cure very probable.

All the so-called *dynamics* have been omitted. Thus the various applications of heat and cold, the water treatment, the two electricities, light and the use of colors, especially the indispensable blue light, magnetism (the work of many years of our master), the contact of metals (lately taken up again by the Old School), the highly valuable mesmerism, and the movement cure; not as if one could be a physician without them, but because they ought to be treated of in a separate work. So also all medicinal springs have been left out for the same reason. Some of the drugs have not found a place in this work for want of trustworthy cures.

Very little notice has been taken of the so-called "critics," remembering the "*razzia*" of Roth in Paris, who had no other intention but to destroy our Materia Medica, and that by striking out, for the most trivial reasons, symptoms by the thousand. Like a Don Quixote, he was fighting with windmills, and was not without a Sancho Panza, who wrote a treatise to show that Hahnemann's quotations of *Dulcamara* were erroneous, and that we had no right to give it for symptoms following exposure to cold. The poor critic did not know that there was scarcely a practitioner of homœopathy who had not made such cures by the score.

Digitized by Google

THE ARRANGEMENT

Is the same as that in the "Analytical Therapeutics" and in the "Condensed Materia Medica." A more complete and concise review of the arrangement will precede the Repertory, which is to follow close upon the last volume of this work.

To facilitate the study of the relative value of symptoms, four marks of distinction have been adopted, ', '', !, !!, which correspond to the four degrees in Bönninghausen's Repertory.

' Is the lowest, and designates an occasionally confirmed symptom. It is omitted in most cases, and is sometimes used to mark a difference of value in the same line.

'' Symptoms more frequently confirmed.

! Symptoms verified by cures.

!! Symptoms repeatedly verified.

☞ Indicates an approved characteristic, but is seldom used, by reason of our not wishing to appear authoritative. It is to be hoped that the combined experience of many practitioners, solicited from all sides, will enable us in a future edition to designate many more symptoms with this mark.

θ The Greek letter "theta" stands between the cured symptom and the pathological condition, or the physiological general state, f. i., pregnancy or climacteric years. This by no means excludes the characteristic nature of the symptom in other forms of disease.

: Such observations from the Old School or the New as are worthy of our consideration.

t. Toxicological.

r. Right. l. Left.

< Increase, or aggravation; worse.

> Decrease, or amelioration; better.

π The Greek "pi" stands before symptoms observed only on the sick.

Digitized by Google

Like all employers with a good conscience, we are not governed by "strikers."

It has been my rule through life never to accept anything as true, unless it came as near mathematical proof as possible in its domain of science; and, on the other hand, never to reject anything as false, unless there was stronger proof of its falsity.

Some will say, "but so many things—a majority of all observations—will thus remain between the two undecided." So they will; and can it be helped? It can, but only by accumulating most careful observations and contributing them to the general fund of knowledge.

CONSTANTINE HERING.

GUIDING SYMPTOMS

OF OUR

MATERIA MEDICA.

ABIES NIGRA.

Black Spruce. *Coniferæ.*

The Pinus nigra or black spruce of this country.
Proved by Dr. Leaman, *Ohio Medical and Surgical Reporter.*

[1] **Mind.** Inability to think or study.
| Very low-spirited; melancholy.
[2] **Sensorium.** Dizziness; bad feeling in head.
[3] **Inner Head.** | | Headache.
| Terrible distress in head, generally with some flushing of face. θDyspepsia.
[4] **Outer Head.** Head hot, with flushed cheeks.
[10] **Gums.** : Scurvy.
[13] **Throat.** Choking sensation in throat.
[14] **Appetite.** Exceedingly hungry and wakeful at night.
| | Total loss of appetite in morning, craving for food noon and night.
[15] **Eating.** | Pain after a hearty meal.
| Abstinence from particular food does not >. θDyspepsia.
[16] **Belching and Vomiting.** | Belching.
| Acid eructations.
| Frequent vomiting of food.
[17] **Scrobiculum and Stomach.** | Severe pain in stomach after eating.

Digitized by Google

‖Distressing pain in stomach, extending to l. side.
‖Sensation of an undigested hard-boiled egg in stomach. θDyspepsia.
‖Continual distressing constriction just above pit of stomach, as if everything was knotted up, or as if a hard lump of undigested food remained there. θDyspepsia.

[20] **Rectum and Stool.** ‖Constipation.

[23] **Female Sexual Organs.** Menses did not appear until third month after proving.

[26] **Respiration.** Gets out of breath easily.

[31] **Back.** Pain in small of back.

[36] **Nerves.** Nervousness.
Fatigue.

[37] **Sleep.** Dull and sleepy during day; restless and wakeful at night.
Wakeful at night with hunger.
Bad dreams.

[38] **Time.** Morning: total loss of appetite.
Noon: craving for food.
Night: hungry; wakeful and restless.
Day: dull and sleepy.

[40] **Fever.** Alternate heat and cold.
‖Malarial fevers.*
‖Chronic intermittent fever, accompanied by stomach-ache.

[42] **Locality and Direction.** Left: pain in stomach extends to side.

[43] **Sensations:** As if choking; of an undigested hard-boiled egg in stomach; as if everything was knotted up in stomach.
Pain: in stomach after eating; in small of back.
Aching: in bones.
Rheumatic pain: in bones.
Constriction: above pit of stomach.

[44] **Tissues.** Rheumatic pains and aching in bones.

[46] **Relationship.** Used in preparation of spruce beer.
Similar to: *Nux vom.* (pressure as from a stone after a meal); *Bismuth; Calc. carb.* (like a load after a moderate supper); *Bryon.* (like a stone, worse moving); *Kali carb.; Arsen.; Zincum* (as if food lodged in œsophagus); *Ignat.* (food feels as if lying above cardiac orifice); *Sepia* (nightly pressure as from a stone, also after food); *Agar.* (burning after food, followed by pressure as from a foreign body); *Phosphor.; Pulsat.* (like a stone, early, on awaking); *Sulphur; Cinchon.* (accompanied by bloating); *Natr. mur.* (sensation of a foreign body sticking in cardiac orifice).

* Used in New York in the Fall of 1877. *Abies Nigra* is said to be one of the ingredients in "Holman's Fever and Ague Pad."

Digitized by Google

ABROTANUM.

Southernwood. *Compositæ.*

Artimisia abrôtanum, or *southernwood*, growing on sunny hills in Southern Europe, and cultivated in gardens. Celebrated as an old popular medicine. Introduced into our practice by Deventer. Proved by Gatchell on two women.

[1] **Mind.** Feebleness and dulness of mind.
No capacity for thinking, as if all bodily and mental power were gone.
Thinks her brain is softening.
Excited, loquacious, feels like shouting.
Taciturnity.
Indolence, averion to physical exercise.
Good humored, happy.
Gloomy, desponding.
‖Great anxiety and depression. θGastralgia.
‖The child is cross and depressed. θMarasmus.
Ill-natured, irritable, violent.
Exceedingly peevish, feels as if she would like to do something cruel; no humanity.
Easily fatigued by conversation or mental effort.
[3] **Inner Head.** The left brain seemed especially weak; easily fatigued by conversation or mental effort.
Sensation as of creeping chills along convolutions of brain, accompanied by prickling.
[4] **Outer Head.** Head weak, could not hold it up.
Scalp sore, especially side.
Itching of scalp.
[5] **Eyes.** ‖Blue rings around dull looking eyes. θChlorosis.
Inflamed eyes.
[7] **Nose.** Dryness of inner nose.
‖Nosebleed with boys.
[8] **Face.** ‖Face wrinkled, old, pale. θMarasmus.
‖Comedones with emaciation.
Face feels cold.
Drawing pains in upper maxilla.
[10] **Teeth.** Drawing and tearing pains in carious teeth.
[11] **Taste.** ‖Slimy taste. θGastralgia.
Acid taste.
[13] **Throat.** Scraping in throat.
[14] **Appetite.** Gnawing hunger; craves bread boiled in milk.

Digitized by Google

Appetite great; ravenous while emaciating; marasmus.
Loss of appetite. θGastralgia.

[17] **Scrobiculum and Stomach.** Burning in stomach as from acidity.
Fulness and bloating in region of stomach.
Sensation as if stomach was hanging or swimming in water, with a peculiar feeling of coldness and a dulness to all irritants. θGastralgia.
Pains cutting, gnawing, burning, sometimes contracting and stinging, mostly < at night; never entirely free from pain, even in intervals. θGastralgia.
Disturbed digestion. θChlorosis.

[19] **Abdomen.** Weak, sinking feeling in bowels.
Frequent colicky pain. θMarasmus.
Distended abdomen. θChlorosis; marasmus; colic.
Hard lumps in different parts of abdomen.

[20] **Rectum and Stool.** After sudden checking of diarrhœa, rheumatism.
Piles appear and become < as rheumatic pains abate; frequent inclination to stool; hardly anything but blood passes.
Constipation. θGastralgia.
Worms, especially ascarides. θMarasmus.
Alternate diarrhœa and constipation; food passes undigested. θMarasmus.
Protruding hemorrhoidal tumors, burning when touched and when pressing.

[21] **Urinary Organs.** Bladder full, urging to urinate.
Urine scanty.

[22] **Male Sexual Organs.** Hydrocele of children.

[23] **Female Sexual Organs.** Darting pain in region of l. ovary.
Twitching in ovarian regions, seems to extend to back.
Ulcers on os tincæ.
Dysmenorrhœa; suppressed catamenia.

[24] **Pregnancy and Parturition.** Difficult parturition.
Blood and moisture oozing from navel of newborn children.

[25] **Voice and Larynx.** Sudden hoarseness; weak voice.

[26] **Respiration.** Impeded breathing.

[27] **Cough.** Troublesome cough. θRheumatism.

[28] **Inner Chest.** Raw feeling in respiratory tract from cold air.
In pleurisy (after *Acon.* and *Bryon.*), when a pressing sensation remains in affected side, impeding free breathing.

[29] **Heart, Pulse and Circulation.** Pain across chest, sharp and severe in region of heart. θRheumatism.
Pulse weak and small. θChlorosis.
Ebullitions, with general heat and distended veins on forehead and hands. θHemorrhoidal colic.

Digitized by Google

[30] **Outer Chest.** Drawing pains in chest-muscles, especially from motion.

[31] **Back.** Weak back, with ovarian pains.
‖Pains in sacrum. θHemorrhoidal colic.

[32] **Upper Limbs.** Fugitive pains in shoulders all night, preventing sleep.
Aching from shoulder joints to elbow.
Arms very weak.
Numb sensation in fingers.
Dull aching in first finger of r. hand, followed by similar pain in other fingers of r. and l. hand.
Pricking and coldness of finger tips.

[33] **Lower Limbs.** ‖Emaciation, mostly of legs. θMarasmus.
Drawing sensation in ankle joint.
Deadness and coldness of feet.
Sticking, tearing and itching sensations in old foot-sores.

[34] **Limbs in General.** ‖Inability to move arms; legs only with difficulty. θRheumatism.
Frost-bitten limbs.

[35] **Rest. Position. Motion.** Lies prone; cannot hold head up.
Motion: pains in muscles of chest; averse to exercise; rheumatic pains <.
Inability to move arms; legs with difficulty.

[36] **Nerves.** Remains very much relaxed and incapacitated.
Disposed to lie prone.
A weak, sickly feeling continued many days, with internal trembling when excited.
‖Very lame and sore all over. θRheumatism.
‖‖Great weakness and prostration, and a kind of hectic fever with children, after influenza.
Head so weak, cannot hold it up.
‖Hysteria.

[37] **Sleep.** ‖Sleepless and restless. θHemorrhoidal colic.

[38] **Time.** Night: cutting, gnawing, stinging in stomach <; fugitive pains in shoulders.

[39] **Temperature and Weather.** Cold air produces raw feeling in chest.
‖‖Itching chilblains.

[40] **Fever.** ‖High fever. θRheumatism.
‖Hectic fever, very weakening. θMarasmus.

[41] **Attacks.** Suddenly: hoarseness.
Piles < as rheumatism gets >.
Alternating: diarrhœa and constipation.

[42] **Locality and Direction.** Left: brain seems weak; scalp sore; darting in ovary; sharp pains in region of heart.
Right to left: dull aching in fingers.
Right and left: twitching in ovarian region; aching in fingers

Digitized by Google

[43] **Sensations.** As of creeping chills along convolutions of brain, with prickling; as if stomach was hanging or swimming in water; weak with internal trembling.
Aching: in shoulder joints and first finger of r. hand.
Pain: across chest, sharp in region of heart; in sacrum.
Darting: in l. ovary.
Cutting: in stomach.
Sticking: in foot-sores.
Stinging: in stomach.
Pricking: in brain; in stiff joints; finger tips.
Tearing: in teeth; in foot-sores.
Burning: in stomach and hemorrhoids.
Soreness: of scalp all over.
Aching: from shoulder joints to elbow; in fingers.
Contracting: in stomach.
Gouty pains: in wrists and ankle joints.
Fugitive pains: in shoulders.
Gnawing: in stomach.
Drawing: in upper maxilla, carious teeth, chest muscles; ankle joint.
Pressing: in pleurisy.
Scraping: in throat.
Rawness: in respiratory tract.
Twitching: in ovaries.
Numbness: in fingers.
Deadness: of feet.
Coldness: in face, stomach, finger tips; feet.
Weak sinking feeling: in bowels.
Dryness: of inner nose.
Itching: of scalp, foot-sores, chilblains.

[44] **Tissues.** ‖Gout: painful and inflamed wrists and ankle joints.
Joints stiff, with pricking sensation.
‖Painful, inflammatory rheumatism before swelling.
|Chlorosis.
⋮In phagedenic diseases.
|Rheumatism from suddenly checked diarrhœa, cannot move her head, arms or limbs, and suffers much pain, no swelling.
|After suppressed gout. θGastralgia.
‖Marasmus of children.
Contractions of limbs from cramps or following colic.

[46] **Skin.** |Furuncles, if *Hepar sulph.* is insufficient.
|The skin is flabby and hangs loose. θMarasmus.
‖Itching chilblains.

[47] **Stages of Life, Constitution.** Children: emaciation, especially of legs. θMarasmus.
Boys: epistaxis; hydrocele.

Digitized by Google

[48] **Relationship.** After *Acon.* and *Bryon.*, in pleurisy; after *Hepar sulph.*, in furuncle.
Itching chilblains: compare *Nux vom.* and *Amanita.*

ABSINTHIUM.

Wormwood. *Compositæ.*

A bitter herb, a native of Europe, and cultivated in gardens, much used in France for a *liqueur*, the effects of which are very injurious.

Most symptoms toxicological from French authorities. The only provings, Gybtchell, in *Medical Investigator.*

[1] **Mind.** After recovering from epileptic spasms no recollection of taking the poison, nor the cause of his doing so.
Brutality, mental dulness, insanity.
The mania from the liqueur is worse than that from alcohol.
Soothed, as if going into a beautiful dream.
Great terror; terrifying hallucinations.
[2] **Sensorium.** Stupefaction, alternately with dangerous violence.
Drunkenness.
Vertigo, dizzy on rising.
Insensibility (with convulsions).
[3] **Inner Head.** Causes congestion of head, medulla and spine.
Headache.
[4] **Outer Head.** Wants to lie with the head low.
Baldness and chronic tinea.
[5] **Sight and Eyes.** Dim-sightedness.
Pain in eyes.
Eyelids swollen; eyes red and suffused with tears.
Eyes itch.
Lids heavy.
[6] **Ears.** Otorrhœa. θEspecially after hemicrania.
[8] **Face.** Foolish look.
Makes facial grimaces. θEpileptiform convulsions.
Ebullitions of blood in face.
[9] **Lower Part of Face.** Jaws firmly fixed.
[11] **Tongue.** Bites his tongue. θEpileptiform convulsions.
Tongue thick, protruding, can scarcely talk.
Trembling of tongue.
Complains that tongue is paralyzed.

Digitized by Google

[12] **Inner Mouth.** Foams at mouth. θEpileptiform convulsions.
[13] **Throat.** Scalded feeling in throat.
Throat inflamed.
[16] **Belching and Nausea.** Eructations.
Nausea and vomiting in morning.
Nausea, apparently in region of gall-bladder.
[17] **Stomach.** Food lies heavy; stomach feels cold and oppressed; thinks it would not absorb much.
[18] **Hypochondria.** ‖Liver feels swollen. θAutumnal fever.
:Liver and stomach diseases.
‖Pain in spleen; it feels swollen. θAutumnal fever.
[19] **Abdomen.** Bloated: around waist and in abdomen, as after ague; with flatus.
[20] **Rectum and Stool.** Constipation.
Destroys worms.
Hemorrhoids.
[21] **Urinary Organs.** Constant desire to urinate.
Urine deep orange, having a strong, horse-like smell.
[22] **Male Sexual Organs.** Spermatorrhœa with relaxed parts.
[23] **Female Sexual Organs.** Pains in uterus.
Darting pain in r. ovary.
Promotes menses.
[27] **Cough.** Cough with liver complaint.
[29] **Heart.** Tremor of heart, felt toward back.
Heart thumps; can be heard in scapular region.
[31] **Back.** Pain in sacrum.
[32] **Upper Limbs.** Pain in shoulders.
Trembling of hands.
[33] **Lower Limbs.** ‖Horses kick with hind legs toward belly. θAscarides.
[34] **Limbs in General.** Throws about limbs. θEpileptiform convulsions.
Pains in limbs.
Limbs swell.
[35] **Position and Motion.** Rising: causes vertigo.
Wants to lie with head low.
Bends backwards: in spasms.
[36] **Nerves.** Trembling precedes epileptic attack.
Epileptiform convulsions: loses consciousness, falls, bites his tongue, foams at mouth, features distorted; throws his limbs about; weak afterwards.
Excited, opisthotonos, grinding teeth; followed by stupor.
[37] **Sleep.** Restless at night, with disturbing dreams.
[38] **Time.** Morning: nausea and vomiting.
Night: restlessness, with disturbing dreams.
[40] **Fever.** Chill, heat, then sweat; thirst in all stages; sleeps during heat.

Digitized by Google

‖Obstinate autumnal fevers, with swollen liver and spleen.

[41] **Attacks.** Attacks antepone.
Alternate: stupefaction and violence.

[42] **Locality.** Right: darting pain in ovary.

[43] **Sensations.** Nausea apparently in region of gall-bladder; tremor of heart.
Pain: in eyes; in spleen; in uterus; in sacrum; in shoulders; in limbs.
Darting: in r. ovary.
Scalded feeling: in throat.
Swollen feeling: in liver; in spleen.
Heaviness: of lids.
Oppression: in stomach.
Itching: of eyes.
Cold feeling: in stomach.

[44] **Tissues.** Causes hyperæmia of brain, medulla and spine, more intense when combined with alcohol.
Occasionally stomach, more frequently endocardium and pericardium show small ecchymoses.
‖Paralysis of inner organs.

[45] **Injuries.** Bruises and consequent inflammation.

[46] **Skin.** Jaundiced skin.

[47] **Stages of Life.** ‖Especially younger patients. θ Chlorosis.

[48] **Relationship.** Collateral relations: *Art. vulg., Abrot.*
Similar to: *Alcohol, Bellad. Chamom., Hyosc., Stramon.*
Is said to cure poisoning by mushrooms.
Secondary effects of absinthe are much worse than those from abuse of alcohol, opium or tobacco.

Digitized by Google

ACALYPHA INDICA.

Acalypha Indica Linn. *Euphorbiaceæ.*

A weed common in the East Indies, like nettle. Proved and applied by Tonnere, of Calcutta, and Payne, of Bath. Holcombe's cure.

[1] **Mind.** ❙Gloomy and despairing, but very unwilling to die. *θ* Hæmoptysis.

[23] **Female Sexual Organs.** ❙Leucorrhœa, sometimes thick, sometimes watery. *θ* Consumptive patient.

[37] **Cough.** ❙Cough, with bloody expectoration. *θ* Tuberculosis.
❙Violent dry cough, followed by bloody expectoration.
❙❙Hæmoptysis.
Hæmoptysis: expectorates pure blood in morning, dark lumps (clotted) in evening. Cough most violent at night. *θ* Tubercular deposits in apex of lung.

[28] **Inner Chest.** ❙Dulness in chest on percussion. *θ* Hæmoptysis.
❙Constant and severe pain in chest. *θ* Hæmoptysis

[29] **Pulse.** Pulse small and depressed.
❙Pulse from 100 to 120. *θ* Hæmoptysis.

[38] **Time.** Night: cough most violent.
Morning: expectorates pure blood.
Evening: expectorates dark clotted blood.

[40] **Fever.** Slow fever.

[44] **Tissues.** ❙❙Progressive emaciation. *θ* Hæmoptysis.

[48] **Other Drugs.** Collaterally related to all *Euphorbiaceæ;* especially to *Mercurialis annua* and *Mancin.*

Digitized by Google

ACETICUM ACIDUM.

Acetic Acid. $C_4 H_3 O_3$.

Should be procured from trustworthy chemists; vinegar from the shops is generally adulterated.

Introduced by C. Hg. See *Jahr's Manual*, p. 19, published in Allentown, 1838.

Toxicological symptoms have been collected from several authors; really proved only by Berridge.

Inflammation of bowels in dentition, Guernsey, MSS.

[1] **Mind.** Intellect clouded, can hardly express herself.

‖Confusion of ideas. θ Headache.

Fancies he has an ulcer in his stomach.

Does not recollect what has happened; knows no one, not even her own children.

❙Horrible attacks of anxiety with difficult breathing. θ Liver complaint.

Anxiety; grieves about his sickness and his children.

Apparently alarmed at everybody and everything about her (poisoning).

❙Irritable, with abdominal complaints.

❙Greatest irritability. θ Headache. θ Liver complaint.

‖Worse from any nervous excitement. θ Headache.

Dull and low-spirited.

❙Delirium: with distended belly and obstinate constipation, or with rumbling in bowels, bellyache and diarrœa; alternately with stupor. θ Typhus.

[2] **Sensorium.** ‖Vertigo, with feebleness and fainting.

Giddy, dull aching in forehead and top of head.

‖Giddiness, symptoms of cerebral congestion. θ Headache.

Blood rushes to head, with delirium.

Appears as if drunk, with heavy head.

❙Stupor only interrupted by delirious talking. θ Typhus.

Falls to ground insensible; foaming at mouth.

❙Faints.

Inner Head. Dull pains in forehead and vertex; giddiness.

Heaviness of head, with sense of drunkenness.

‖Confused dull aching over frontal region. θ Nervous cephalalgia.

Shooting through temples.

Digitized by Google

Nervous headache, caused by abuse of narcotic stimulants or by chronic gastric irritation.
Headache from abuse of tobacco, opium, coffee or alcohol.
[4] **Outer Head.** Dull aching on frontal protuberance; later on left.
Distension of temporal blood-vessels, increased heat of head.
Blood-vessels on temples distended.
Red patches on scalp, crusts between hair.
Hair bristles.
‖Child does not want its head touched. θInflammation of bowels in dentition.
[5] **Sight and Eyes.** ‖Weak sight. θLiver complaint.
Dilated pupils.
Protruding eyeballs.
Conjunctiva inflamed, accompanied by sour stomach.
Flow of tears.
[7] **Nose.** Nosebleed, especially from a fall or blow.
Liable to frequent catarrhal attacks.
[8] **Face.** Expression wild, pupils dilated.
‖Face pale, waxen, emaciated. θDropsy.
‖One cheek red, the other pale. θInflammation of bowels in dentition.
Eyes sunken and surrounded by dark rings.
‖Left cheek bright red with fever. θCroup.
Sweat on forehead in spots.
[9] **Lower Part of Face.** Lips: become of a deep purple tint; peel off in flakes.
Aching in upper part of joint of jaw; < from pressure and motion.
[10] **Teeth and Gums.** ‖Scorbutic ulcers; ‖toothache.
[11] **Taste and Tongue.** Taste sour.
Pain across root of tongue impedes speech and motion of jaw.
Tongue: pale and flabby, with diminished appetite and no thirst; dry and cold; red, sore and burning; livid, swollen, protruding.
Glands under tongue and lower jaw swollen, sore to touch.
[12] **Inner Mouth.** Foul breath.
Buccal membrane whitish, like apthæ.
‖Salivation.
‖White gums.
[13] **Throat.** ‖Children thirsty, but swallow with some difficulty, even a teaspoonful of water. θCroup.
Has to eat very slowly, difficult swallowing.
Throat inflamed, ulcerated.
‖A white film low down in fauces. θCroup.

Digitized by Google

▮False membranes in throat.

[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite.
▮Greatest burning thirst, insatiable even by taking large quantities.
▮▮Intense thirst. θDiabetes. θDropsy. θChronic diarrhœa.
▮▮Thirsty with dry lips, which peel off in flakes. θInflammation of bowels in dentition.
▮▮No thirst with fever. θCroup.
Disgust for salted things and cold victuals.

[15] **Eating and Drinking.** After a meal: vomiting.
Bread and butter disagree.
▮Vomits after every kind of food. θLiver complaint.
Cannot drink anything cold, it lies like a load in stomach.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough and fetid belching,
▮Belching > pain in abdomen. θInflammation of bowels in dentition.
Hot eructations, heat in stomach.
Nausea and sweat; retching with anxiety; sour risings.
Towards 12 P.M. very sick; vomits a thick gruelly substance with great relief.
Vomiting: after every meal; of blood; like yeast.

[17] **Scrobiculum and Stomach.** Great pain in scrobiculum; cannot bear slightest pressure.
Contents of stomach feel as if in a ferment.
Violent burning pain in stomach and chest, followed by coldness of skin and cold sweat on forehead.
Heat with colicky uneasiness, as if diarrhœa would follow.
Ulcerative gnawing at a single spot in stomach. θCancer.
Hypertrophy of walls of stomach.
▮▮Local indurations in stomach.
▮Scirrhus of pylorus.

[18] **Hypochondria.** ▮Violent local pains. θLiver complaint.

[19] **Abdomen.** Pain in abdomen and rumbling in gastric region.
▮▮Bellyache, rumbling, diarrhœa, delirium. θTyphus.
Severe burning in intestines; ▮plethora abdominalis.
▮Abdomen distended and sensitive to touch. θInflammation of bowels in dentition.
▮Abdomen distended, with costiveness. θTyphus.
Tympany, with difficult breathing.
▮Ascites, with violent orthopnœa. Compare dropsy, 44.
▮▮Incarcerated hernia (clysmata).
▮Abdomen sore to touch.
Abdomen feels as if sunken in when lying on back.

Digitized by Google

[20] **Stool and Rectum.** Liquid stools with pain.
▮Passages green and slimy come with an explosion of odorless wind. θInflammation of bowels in dentition.
▮▮Diarrhœa: with swelling of legs and feet (phthisis); in later stages of abdominal typhus; chronic with thirst (ascites); more in morning; profuse, very weakening (fifteen passages) on seventeenth day (typhus).
▮▮Costiveness, with tympanitis and stupor; ▮chronic constipation.
Profuse hemorrhoidal bleeding.
Hemorrhage from bowels, after checked metrorrhagia.
▮Ascarides.

[21] **Urinary Organs.** Urine: increased and light-colored; acid, with increased sweat; cloudy, with phosphatic deposits.
Diabetes.

[22] **Male Sexual Organs.** ▮Very weakening nightly emissions.
Semen passes at stool.
Male parts flush and sweat.

[23] **Female Sexual Organs.** ▮▮Metrorrhagia.

[24] **Pregnancy and Parturition.** During pregnancy, sour belching and vomiting, with profuse water-brash and salivation, day and night.
▮After labor, hemorrhages (outward application of vinegar).
Breasts greatly and painfully distended with milk.
Mammary abscesses threatening.
Milk impoverished, bluish, transparent, strong sour taste and odor; deficient in caseine and butter.
▮Sucklings droop, loose flesh. θMarasmus.

[25] **Voice and Larynx.** Hoarse, with laryngeal irritation.
▮Hissing respiration, with rattling in throat. θMembranous croup (10 drops to a tumbler of sweetened water, a teaspoonful every hour or two).

[26] **Respiration.** ▮Breathing: difficult from laryngeal obstruction; hissing in croup; ▮▮hurried and laborious; loses breath on going up stairs; labored when lying on back.
▮▮Difficult breathing, with attacks of anxiety. θLiver complaint.
Must often take a deep breath, which relieves.
Heaviness, with sense of oppression.

[27] **Cough.** Cough: croupy; a hollow sound with inhalation; dry, with oppression, later moist with fever, greater dyspnœa, emaciation, diarrhœa, night sweats, œdema of feet and legs; titillating, with much purulent sputum; hectic fever; attacks in evening with coldness; at night, heat, dry skin and delirium.
▮▮Hæmoptysis; coughs blood.

[28] **Inner Chest and Lungs.** Violent pain and sensation of burning in region of chest and stomach.

Digitized by Google

Lungs beginning to fill with tubercles.
‖Chronic bronchitis; phthisis.
Hydrothorax.
‖Rattling of phlegm in chest. θInflammation of bowels in dentition.
Many complaints, apparently overcome by *Borax*, reappear after use of *Acet. ac.*, especially shooting in chest.

[29] **Heart and Pulse.** Angina pectoris.
Heart beats: more frequent; cannot be felt by hand.
Pulse: 96 and full (poisoning); accelerated and small, contracted; weak and small.

[32] **Upper Limbs.** Sensation of lameness in wrists and hands.
Coldness and pricking of hands.
‖Skin on hands dry. θInflammation of bowels in dentition.
‖Restlessness of hands in sleep. θInflammation of bowels in dentition.

[33] **Lower Limbs.** Weak and weary.
Lessened sensibility.
‖Œdematous swelling, with diarrhœa.

[35] **Position and Motion.** ‖Cannot remain long in same position. θInflammation of bowels in dentition.
‖Child wants to be carried. θInflammation of bowels in dentition.
Springs from bed; crawls on ground from pain.
Lying on back: cannot sleep; labored breathing; abdomen feels sunken.
Lying on belly: rests > during sleep.
Ascending stairs: loses breath.
Motion: aching in jaw <; of jaw impeded by pain across root of tongue.

[36] **Nerves.** Great prostration after injuries; shock.
‖Great debility. θChronic diarrhœa, diabetes, etc.
Prostration and lameness.
Paralyzed and giddy.
Trembling from head to foot (poisoning).
‖Apparent death.
Spasms: with insensibility; with great debility; hysterical.
Springs out of bed, crawls on ground howling with pain.
: Hydrophobia.

[37] **Sleep.** Cannot sleep lying on his back; feels as if abdomen was sinking in, causing labored breathing; rests > lying on belly.
Sleep broken without known cause.
Cannot fall asleep because of distress and agony.
Sleepless, with other sufferings.
‖Sleeplessness. θLiver complaint.

[38] **Time.** Night: heat, dry skin, delirium; emissions; sweating.

Digitized by Google

Day and night: stomach symptoms during pregnancy.
Morning: diarrhœa.
Evening: cough.
Toward midnight: vomiting.

[40] **Fever.** Skin cold; bodily warmth decreased.
Flushes of heat more in outer parts, increasing sweat.
‖Febrile heat, with a dry, hot skin: in bilious, ‖putrid and typhoid fevers; inflammation of bowels in dentition.
‖‖Profuse sweating; ‖night-sweats.
Typhus, with delirium.
‖‖Hectic fevers, with cough, dyspnœa, diarrhœa, night-sweats, œdema and emaciation.
‖‖Inflammatory fever.
‖Slow fever, with night-sweats.

[41] **Attacks.** Severe paroxysmal headache.
‖‖Lethargic paroxysms.
‖Hysteric paroxysms.
Frequent catarrhal attacks.

[42] **Locality and Direction.** Right then left: dull aching in frontal protuberances.
Left: cheek bright red in fever; aching in upper joint of jaw.
In spots: sweat on forehead.

[43] **Sensations.** As if drunk with heavy head; like a load in stomach after cold drinks; as if contents of stomach were in a ferment; abdomen feels as if sunken in.
Shooting: through temples.
Pricking: of hands.
Burning: of tongue; with thirst; in stomach; in chest; in inner and outer parts; of skin.
Gnawing: in stomach.
Aching: in forehead and top of head; in upper part of joint of l. jaw.
Pain: across root of tongue: in scrobiculum; in liver; in abdomen; with liquid stools; in chest.
Lameness: in wrists and hands.
Heat: in stomach.
Coldness: of skin; of hands.

[44] **Tissues.** ‖Ebullitions.
Hemorrhages from nose, lungs, stomach, bowels, uterus; also passive hemorrhages.
Blood coagulated in veins.
Blood-vessels contracted.
‖‖Varicose swellings.
Chlorosis; anæmia; wasting away; great emaciation.
Prevents corpulency, but may superinduce fatal marasmus.
Dissolves cancer cells.

Digitized by Google

Separates sequestrum from new bone.
Scurvy.
‖Dropsy of abdomen and legs; anasarca; great thirst; pale, waxen skin.
Changes gangrenous ulcers; hospital gangrene; prevents decomposition of animal matter.

[45] **Touch. Passive Motion. Injuries.** Touch: soreness of glands on lower jaw; soreness of abdomen; head sensitive.
Pressure: aching in jaw <; pain in scrobiculum <.
Diminished sensibility over whole surface of body.
Burns and scalds.
‖Sting of wasps or other insects.
‖After bite of a mad cat, lacerated wound, upper and lower leg swollen (externally and internally).
‖‖Sugillations.
Bruises or sprains, if dry heat follows.
Fall or blow: nosebleed.

[46] **Skin.** ‖‖Burning dry skin. θInflammation of bowels in dentition.
‖‖Tetter-like eruptions.
Diseased cuticle separates in flakes.
‖Skin pale and waxen.
Broad, flat condylomata, dry or moist.
‖‖Nævi, warts, corns.
‖Dropsy after scarlet fever.
⁝Scarlet fever and smallpox.
Morbus maculosus Werlhofii.

[47] **Stages of Life, Constitution.** Injurious to children and the aged.
Lax, pale, lean persons.
A boy, æt. 14 mos.; inflammation of bowels in dentition.
A boy, æt. 2; typhus.

[48] **Relationship.** Antidotes to *Acet. ac.:* large doses are best counteracted by *Magnesia* or *Calcarea*, according to bodily peculiarities of sick; fluid magnesia or lime-water, a teaspoonful in a cup of water taken in sips. Higher preparations: for depressing, agonizing feeling: *Tabac.*, if insufficient, *Acon.;* for gastric, pulmonary and febrile symptoms: *Natr. mur.*, may be followed by *Sepia.*
Acet. ac. is an antidote to all anæsthetic vapors; a finger dipped in vinegar, rubbed within the lips, antidotes fumes of charcoal; further, to *Acon.*, *Asar.*, *Coffea*, *Euphorb.*, *Hepar*, ‖‖*Ignat.*, ‖*Opium*, *Plumbum* (colic), *Sepia*, ‖‖*Stramon.*, *Tabac.*, *Tongo* and *Alcohol.*
May be given in cases of sausage poisoning.
It follows well after *Cinchon.* in hemorrhages.

Digitized by Google

The sick have an aversion to it in poisonings with *Agar. emet.*
Unpleasant symptoms of *Bellad.* are aggravated by it; headache from *Bellad.* became unbearable.
It aggravates symptoms of *Arnic.*, *Laches.* and *Mercur.*
Disagrees when given after *Borax, Caustic., Nux vom., Ran. bulb,* and *Sarsap.*
Scilla, Colchic. and *Sanguin.* have had more effect in curing some diseases when prepared in *Acet. ac.* than with alcohol.
What had disappeared after *Borax* returned after its use.
Has been used after *Digit.* in dropsy.

ACONITUM NAPELLUS.

Monkshood. *Ranunculaceæ.*

Abundant in the mountain forests of France, Switzerland and Germany. Also cultivated in gardens.

The root is stronger than the herb, and the seed most uniform in strength. The symptoms of the herb, root and seed have not been separated, not even those of somewhat different species.

[1] **Mind.** Now perfectly conscious, now raving.
Clairvoyance; conscious that his beloved, miles away, was singing a certain piece.
Dulness and confusion of mind.
Unconscious, as if dying; speechless. θ Apoplexy.
Insensible, stupid; also during convulsions.
Stupid, eyes closed, facial muscles twitch, mouth compressed, no power of speech.
Memory lively, or weak; what has just been done seems like a remote dream; cannot remember dates.
Ideas haunt him, cannot get rid of them.
Cannot finish a half-written idea without great effort.
Attention distracted while reading, thought seems to cease.
Cannot reflect, ideas seem to come from stomach; after two attacks of vertigo, thought is again normal.
Excited, or sits buried in thought.
Rapid change of thought; great exertion is required to fix train of thought.

Digitized by Google

On attempting to think of one thing, another intrudes; this is soon supplanted by another and so on.
Diminished intellectual power, cannot perform even light mental work.
Lively imagination.
Ecstasy; inclined to be gay, to dance and sing.
‖Delirium, crying out, staring look. θInflammation of brain.
‖Delirium, with convulsive motions. θMyelitis.
Delirium, with great heat, dilated pupils or convulsions; childish, nonsensical talk.
‖Delirium, with talk about death. θIn childbed.
‖‖Delirium, especially at night, raves, springs out of bed; in morning, excessive sweat.
‖‖Pains are so intolerable, they drive him crazy; he becomes very restless.
Desire to be alone; ‖shuns people.
‖Disposition to weep; ‖cried violently, with facial jactitation.
Loquacity; speech hurried.
‖Alternate laughter and crying; ‖at one time gay, at another gloomy.
‖‖Moaning, anxious lamentations; reproaches from trifling causes.
‖Screams aloud at slightest touch, screams with pains; cannot bear light; will not be touched or uncovered; buzzing in ears.
‖Impatience, throws himself about, constantly changes position.
‖Restlessness, agony, internal anxiety; does everything in great haste; must move about or change position often.
‖Cannot continue long at one thing.
‖‖Dislikes to talk; answers laconically yes or no.
‖‖Music is unbearable, it makes her quite sad.
‖Sadness with solicitude; concerned about future; about her recovery or fears loss of reason.
‖Extreme timidity, especially after a fright; afraid in dark.
‖Fears to go where there is any excitement or many people; thinks she is jostling against every one she meets; countenance expressive of timidity; constant dread lest she stagger and fall. θDuring pregnancy.
Fear of ghosts.
☞Fear of death: during pregnancy or confinement; with prolapsus uteri; with great loquacity or anxiety in region of heart.
Thrice he became blind and affirmed that death was at hand.

Digitized by Google

‖‖Predicts day of death; bids her friends good-bye. θIn childbed.

‖Inconsolable anxiety, piteous wailing; peevish and impatient.

‖Anxiety: transiently > by drinking cold water; followed by apathy; with cold sweat (prolapsus uteri).

‖‖Has no affection for anybody. θDuring pregnancy.

Morose, misanthropic, peevish; malicious mood.

‖Children get angry and have spells of rage.

‖Vexed at trifles; takes every joke in bad part.

Quarrelsome, with constantly varying delirium; chatters like a child, is gay.

‖Obstinate, tosses about impatiently.

Sinks into lethargy, but rarely sleeps; complains of crawls.

‖‖Ailments from fright: afraid in dark; vertigo; faintness; trembling; cardiac weakness; threatened miscarriage; impending cessation of menstrual flow; burning in stomach.

‖Remote effects of fright, especially jaundice.

Ailments from vexation, with fear or vehemence: ‖‖congestion; palpitation; fever; ‖anxiety, beside himself; ‖threatened miscarriage; ‖apoplectic congestion.

[1] **Sensorium.** Confusion: as after drunkenness, with pressure in temples; early in morning on awaking.

‖Head feels dull, stupefied. θCoryza. Fevers.

‖Dull, stupid; pressure outwards, < sitting up; with anxiety and fear of death. θSunstroke.

‖‖Apoplexy or ‖apoplectic congestions.

‖‖Vertigo: after fright; from congestion, as in sun; on stooping; staggers to right; as if drunk, with nausea, < on rising from seat, > while walking, none while sitting; blackness before eyes when shaking head; with nosebleed; from sudden suppression of catamenia by cold.

‖‖On rising from a recumbent posture, red face becomes deathly pale, or he becomes dizzy and falls over, he fears to rise again; often accompanied by nausea, vanishing of sight or unconsciousness.

‖Vertigo, headache, nausea, gagging, coldness. θCholera.

‖‖Turns suddenly red and falls unconscious. θTeething child.

‖‖From a fall or concussion; face pale or red, but no stupor.

Fulness of head, with erratic pains in r. supraorbital, temporal or frontal regions.

Suddenly faints while standing to urinate; all blood seemed to rush to head; he fell unconscious.

‖Alternate stupefaction and restlessness, with mild de-

Digitized by Google

lirium twitchings, starts as in a fright, pulse frequent. θBrain fever.

‖Stupor, with cold feet.

[3] **Inner Head.** ‖Constant burning in forehead. θJaundice.

‖‖Burning headache, as of brain agitated by boiling water.

Headache, as if a hot iron was bound around head.

‖‖Fulness and heavy feeling, as if everything would push out of forehead.

‖Squeezing in forehead above root of nose, feels as if she would lose her reason; < walking in open air.

Furious headache, vision obscured, pain mostly pressing and contracting in upper part of forehead; face swollen, pale; < from light or noise; > lying quietly in a dark room.

‖Pressing shooting pain in forehead. θCoryza.

Violent headache limited to a small spot over l. supraorbital ridge.

‖Pulsation in l. side of forehead along with attacks, as from severe blows in r. side of forehead.

Headache in vertex, as if compressed uniformly by a pitch-cap; ceases when walking in open air.

‖‖Sunstroke; especially from sleeping in sun's rays.

‖Headache, as if brain was moved or raised; < during motion, drinking, talking or sunlight.

‖Congestive headaches. θMenorrhagia.

‖‖Congestion, anxiety; face hot and red, or pale; carotids pulsate strongly; pulse full, strong, or small and quick; < toward evening. θApoplexy.

Headache, with increased secretion of urine.

On going into a warm room, forehead feels as if compressed.

‖Throbbing in temples. θRheumatic ophthalmia.

Pressure in forehead, temples and top of head.

‖Headache and roaring in ears. θCoryza.

‖Pressive, stupefying headache; sleeplessness. θChildbed fever.

‖‖Congestion to head. θHeart disease.

‖Head hot, throbbing carotids, limbs cold; l. side lame; staring; burning pain in brain. θApoplexy.

‖Inflammation of brain in children.

‖Congestion to head. θCystitis.

[4] **Outer Head.** ‖‖Head excessively hot.

‖‖Bends head far back. θCroup.

Sensation in vertex as if pulled by the hair.

Sensation of crackling, as from bending tinsel, in temples, forehead and nose; < toward evening from motion; > from sitting.

Formication of scalp, > by heat.

Digitized by Google

Constantly tosses head about. θCroup.
Sensation as if hair stood on end.
Vertex feels hot to touch; hair bristles up.
If he raises his head, he vomits phlegm or what he drank. θInflammation of brain.
Constantly puts hand to head. θMeningitis.
Better lying with head high.
Stitches under scalp.
Sweat on head; > out of doors.
Cold sweat on forehead.

Sight and Eyes. Disturbed by flickering; fears he may touch others passing by.
Vision of sparks, with burning and twitching in eyes.
Vision as if through a veil; difficult to distinguish faces; anxiety and vertigo.
Total blindness after catching cold.
Optical illusions in dark colors, or black.
Sensitive to light, especially sun; light dazzles.
Desire for light; photomania.
Eyes excessively hot and dry; conjunctiva of lids very red, constant winking and closing of lids, could hardly force them open; temporary relief from cold water; asthenopia from straining eyes.
Staring. θApoplexy. θAsthma.
Eyes glaring. θPleuritis. θPneumonia.
Eyes contorted. θTetanus.
Pupils contracted, then dilated.
Eyeball feels enlarged, as if coming out of socket.
Sclerotica yellow. θEnteritis.
Eyes bloodshot.
Sticking pains in r. eyeball.
Rough feeling, as from sand in l. inner canthus.
Inflammatory conditions, resulting from irritant action of foreign bodies, as chips of steel, or stone, or coal, in cornea, which produce dry rubbing of lid over ball, with injected vessels; irritation caused by ingrowing lashes.
In true sclerotis, acute stage, with contracted pupils, sticking or tearing pains, photophobia, a blue circle around cornea and violent aching in balls.
Eyes red, inflamed, vessels deep red; burning, pressive shooting pains, especially on moving balls; no discharge;. conjunctivitis from exposure to cold, dry winds.
Catarrhal inflammation, first stage prior to exudation; chemosis of conjunctiva, with pains so terrible that one wishes to die.
Ophthalmia neonatorum; in beginning.
Acute aggravations of granulated lids and pannus of

Digitized by Google

cornea, with excessive hyperæmia, heat and dryness, especially if induced by overheating from violent exercise, ‖‖or by exposure to dry, cold air.

‖‖In earlier stages of violent acute inflammations of deep structures of ball, when it becomes sensitive to touch and feels as if it were protruding; rarely after exudation.

Itching, smarting, burning in eyes, < in evening.

‖Sticking and tearing pains around eyes; < at night.

Violent pain over r. eye.

Stitches in upper orbital region, from pressure and toward evening.

‖Upper half of eyeball sore when moved; feels as if it would be forced out of orbit (> on stooping).

Eyes water, < evening and night; tarsi sore, red, inflamed.

‖Profuse lachrymation with intense pain; tears flow, with or without local inflammation.

‖Copious tears and red conjunctiva. θCoryza. θCough.

‖‖Lids feel dry, burn and are sensitive to air.

Pressure in upper lids as if whole ball was pushed into orbit, causing a bruised pain in eye.

‖Lids hard, swollen, red, with a tense feeling; < mornings.

6 **Hearing and Ears.** ‖‖Averse to noises, they startle him; they are intolerable.

‖‖Music goes through every limb; makes her sad.

‖Roaring in ears; humming; ‖ringing.

‖‖Left ear deaf, with buzzing in whole head. θApoplexy.

‖Tearing pain (left ear); pains in r. ear.

‖Stinging in ear; meatus red and narrowed; ‖‖external ear hot and red; ‖noise intolerable.

7 **Smell and Nose.** ‖‖Sense of smell very acute, especially for unpleasant odors.

‖Distressing cramp or pressure at root of nose.

‖‖Nosebleed; blood bright red. θPlethora. θFever. θEndocarditis. θMeasles.

‖Nosebleeding and headache. θMenorrhagia.

Frequent sneezing.

Nose dry, stopped up, cannot breathe through nose.

‖‖Coryza: dry, with headache, roaring in ears, fever, thirst, sleeplessness, caused by cold, dry winds; ‖checked with headache; > in open air, < from talking; ‖fluent, frequent sneezing; dropping of a clear, hot water; fluent mornings; inner nose red, swollen, interfering with breathing.

8 **Face.** ‖‖Anxious expression; frightened.

‖Face: pale, with restlessness and expression of anxiety; burning fiery red; ‖red and pale alternately; livid; lips blackish; ‖‖bloated, unequally red; feels as if it was growing larger.

▮Trismus.
▮Constantly moving lower jaw, as in chewing. θMeningitis.

10 **Teeth and Gums.** Cold feeling in incisors.
▮Grinding teeth.
Teeth sensitive to air.
▮▮Toothache: even in sound teeth; with throbbing in one side of face, intense redness of one cheek, congestion to head, restlessness; most left-sided, or going from r. to l.: caused by ▮▮dry, cold winds; ▮taking cold in raw air; ▮during pregnancy; especially in young, plethoric sedentary persons.
Teeth feel as if they would fall out.
After getting wet, tearing, beating pain in a carious molar, increasing after going to bed.

11 **Taste, Speech, Tongue.** Taste: ▮▮bitter; ▮▮everything tastes bitter except water; slimy (jaundice); foul; fishy; flat; nauseous, compels hawking of tough mucus, which he swallows.
▮Mouth as if filled with air tasting of rotten eggs.
Things which formerly tasted strong now have no taste.
▮Worse from talking; stinging, choking, in throat. θ Headache. θ Checked coryza.

Digitized by Google

Trembling and temporary stammering.
Speech imperfect, lisping. θApoplexy.
Tongue feels swollen, burning, prickling and tingling.
Tongue numb; also mouth and lips.
Sensation of dryness and numbness in middle of tongue, without thirst.
Sensation of dryness and rawness in middle of tongue.
Burning on tip of tongue and lips.
Burning vesicles on tongue.
Sensation of cold air passing over tongue.
Tongue coated white or thick yellow-white. θBilious fever.
Tongue dry, furred, white. θFevers.
Tongue red, with great thirst. θLiver complaint.
Tongue dry, red on sides, centre thinly coated white. θ Peritonitis.
Tongue red and dry. θCystitis.
Chronic affections of tongue.

[12] **Inner Mouth.** Mouth dry.
Burning, biting in mouth.
Saliva frothy, copious, streaked red, sweet taste in mouth.
Accumulation of water in mouth. θSeat worms.
Orifices of salivary ducts sore, as if corroded.
Yellowish-white thick fur in mouth. θJaundice.

[13] **Palate and Throat.** Dry feeling in palate and posterior nares.
Redness of uvula and soft palate.
Uvula: swollen and elongated; feels as if elongated and coming in contact with tongue. θCough.
Feeling of dryness and as if something stuck in throat.
Acute inflammation of throat (palate, tonsils and fauces) with high fever, dark redness of parts, burning and stinging in fauces.
Burning sensation in back of throat, causing him to hawk.
Severe sticking pains in posterior fauces.
Burning and numbness in throat; throat almost insensible.
Pricking, burning in throat and along eustachian tube, compelling swallowing.
Roof of mouth and fauces dotted with eruption. θ Scarlatina.
Burning sensation in pharynx.
Constriction of throat, causing hawking and spitting even to an irritation to vomit.
Swallowing: stinging choking in throat.
When swallowing food, it feels as if it had lodged in cardiac region. θStricture of œsophagus.

Google

▮Swallowing much impeded. θ Tonsillitis.

▮Almost entire inability to swallow. θ Hoarseness.
Urging to swallow.
▮Burning from mouth along œsophagus to stomach.
▮Tingling in œsophagus.

[14] **Appetite, Thirst and Desires.** ▮Lively sensation of hunger, renewed soon after eating.
▮Excessive hunger and thirst, but eats slowly.
▮▮Thirst burning, unquenchable. θ During all stages of fever. θ Local inflammations.
▮Excessive thirst, yet can retain nothing. θ Cholera.
▮No appetite; loathing of food, qualmishness.
Desires: ▮wine; brandy; ▮▮beer; bitter drinks.

[15] **Eating and Drinking.** Worse before breakfast.
After eating: distressed feeling; vomits food (liver complaint); bitter vomit; ▮violent pain in stomach, with warmth and tenderness; ▮▮hiccough; nausea (after meat broths).
▮Momentary relief from cold water. θ Anxiety.
Generally worse after drinking.
▮▮Gastric catarrh from chilling stomach with ice water, especially when overheated.
▮▮Drinking ice water excites cough; generally better from cold drink, especially anxiety.
▮Worse from smoking. θPalpitation.
▮▮Wine generally relieves, but sometimes brings on congestions, hæmoptysis or palpitation, and augments rheumatic pains.

[16] **Hiccough, Nausea and Vomiting.** ▮Painful hiccough.
Hiccough and belching.
▮▮Better from eructations. θTension in stomach.
Nausea in œsophagus or stomach, rarely in throat.
▮▮Violent but ineffectual urging to vomit. θGastric catarrh.
▮Gagging, retching, gasping for breath. θAfter scarlatina.
▮Vomiting: of lumbrici; of bile; of green masses, with diarrhœa of same appearance; of mucus; of blood, of bloody mucus; of what has been drunk, followed by thirst.
▮Vomiting bile. θIncarcerated hernia with inflammation.
▮▮Vomiting with anxiety, heat, thirst, profuse sweat and increased micturition.
▮▮Green vomit, like verdigris. θMeningitis.
▮Vomiting, meteorism and inability to make water. θPeritonitis.

Digitized by Google

‖On sitting up, vomits clear water. θAfter a fall on head.
‖Vomiting and purging of a green water. ‖Cholera.
‖Vomits sour phlegm. θCholera sporadica.
After repeated vomiting and stools, still complained of a feeling as if a cold stone lay in stomach.

[17] **Scrobiculum and Stomach.** ‖Region of pit of stomach sore to touch and meteoristic. θJaundice.
‖Burning from stomach up through œsophagus to mouth.
‖‖Sudden excruciating pain, with gagging, retching, vomiting blood, gasping; cold sweat on forehead; congestion of mucous lining of stomach. θScarlatina; desquamation.
‖When breathing, pit of stomach is drawn to spine. θCroup.
Palpitation in pit of stomach, with peevish anxiety.
‖Pressure in stomach and pit of stomach, as from a weight or hard stone.
‖Stitch-like, burning, pressing pain in pit of stomach, with fear of death. θGastritis from chilling stomach.
Warmth in stomach.
Pressive, tensive pain, as from fulness or an oppressive weight in stomach and hypochondria.

[18] **Hypochondria.** Anxious feeling in præcordia.
Liver somewhat sensitive to deep pressure.
‖Burning, stinging, hepatic pains.
‖Hot, tense swelling under r. short ribs.
‖Pressure and constriction in hepatic region, with obstruction of breathing.
‖‖Acute hepatitis, with violent fever.
Pain on pressure over l. lobe of liver.
‖Tension and heaviness in hypochondria.
‖‖Agony, has to sit straight up, can hardly breathe, pulse thread-like, vomituritio, sweats with anxiety; abdomen swollen, particularly under short ribs. θAfter scarlet fever.
‖Stitches in region of liver taking the breath.
‖Severe and constant pain in epigastrium, pressing outward. θJaundice.
‖‖Stitches and heat in diaphragm.
‖Pain going to umbilicus, or changing from stomach to liver. θJaundice.
‖‖Jaundice: during pregnancy, liver atrophied; in newborn children; after fright; ‖from a cold, with catarrh of small intestines.
‖Splenitis with inflammatory fever.

[19] **Abdomen and Loins.** ‖‖Colic forces him double, yet relieved in no position. θInflammatory after a cold.

Digitized by Google

▮Colic involving bladder, contraction of hypogastrium in region of bladder; constant ineffectual urging to urinate.
Cutting in intestines, extending through chest to r. shoulder, almost making him cry out, during stool.
▮Burning in umbilical region.
▮Umbilical region hard, swollen. θSeat worms.
▮▮Meteorism, vomiting, inability to urinate. θPeritonitis.
▮▮Abdomen burning hot, tense, tympanitic, sensitive to least touch, cutting pains, fever, anguish. θPeritonitis.
▮Abdomen puffed and hard.
▮A feeling of weight, as if a heavy load were resting on abdomen and bearing one down.
Paralyzed, inactive feeling in intestines, < about transverse colon.
▮Hernia, recent and small, also incarcerated with bilious vomiting and cold sweat; burning as from coals of fire.
▮Sensitiveness of lower abdomen to touch.
▮▮Pain in loins, as if bruised.

20 **Stools and Rectum.** ▮▮Diarrhœa: watery; frequent small stools; like chopped spinach (summer complaint); bilious, of infants, with colic, which no position relieves; from getting wet; slimy, bloody, violent pains in bowels; tenesmus, also between discharges.
▮Scanty, loose, frequent, with tenesmus; small, brown, painful; at last bloody. θDysentery.
▮Pure blood passes without feces. θDysentery.
▮▮Urging; slimy stools; intolerable nightly tingling, itching at anus. θSeat worms.
▮▮Dysentery or inflammatory diarrhœa during hot days and cold nights.
▮Cutting, griping, followed by frequent urging to stool, after anger or fright.
▮Hemorrhage from bowels bright red, in streams.
▮Alternate slimy stools and constipation. θIcterus.
▮▮Constipation; clay-colored stools.
▮▮Stool and urine suppressed. θMyelitis.
▮Stool white, with dark red urine.
▮Stool white, with saffron-colored urine. θJaundice.
Stools black, with dry skin and fever; despondency, anxiety.
▮Cholera, congestive stage; stage of reaction.
Involuntary stools, passing when flatus passes.
▮Bleeding piles; stinging and pressure in anus, burning and heat in piles.
Sensation as of a warm fluid escaping from anus.

21 **Urinary Organs.** ▮Stinging and pressing pains in region of kidneys. θNephritis.

Digitized by Google

Kidneys act but slightly; urine contained albumen and fragments of casts (poisoning).
‖Renal region sensitive, with shooting pains. θNephritis.
‖Violent burning in bladder. θCystitis.
‖‖Inflammation of bladder; constant urging, water passes in drops, with burning, admixed with blood; tension, heat and tenderness over pubes.
Burning in neck of bladder when not urinating.
Tenesmus of neck of bladder.
‖‖Painful anxious urging to urinate.
‖Children reach with hands to genitals and cry out. θCystitis.
‖Burning in urethra when urinating.
‖Must rise each night between 12 and 3 A.M. to urinate. θIn pregnancy.
‖Dysuria during pregnancy.
‖‖Urine scanty, red and hot. θRheumatism. θPeritonitis.
‖‖Urine: hot, dark colored; ‖red, with white feces; ‖red and clear.
‖Urine dark brown, frothy or yellow. θJaundice.
‖‖Urine turbid. θEnteritis.
‖‖Urine yellow-red and no sediment. θPeritonitis.
‖‖Ischuria. θCholera.
‖‖Involuntary urination. θApoplexy.
‖Enuresis, with thirst.
‖‖Diuresis, with headache and profuse sweat.
‖‖Retention or suppression of urine, with pressure in bladder or stitches in region of kidneys.
‖‖Retention from cold, especially in children, with much crying and restlessness.
‖Hæmaturia, with hemorrhoids of anus or bladder; burning distress in urethra.
During urination: faint feeling; splashing sensation in region of bladder; pinching about navel; pain in glans penis.

¤ **Male Sexual Organs.** ‖‖Increa-ed sexual desire; lascivious dreams; fits of lasciviousness.
Sexual desire lessened, parts relaxed; tingling.
Emissions even after coitus.
‖Testicles feel swollen and hard, as if surcharged with semen.
‖Bruised pain in testicles.
‖‖Violent orchitis.
Slight drawing pain in r. testicle and slight uneasiness in r. renal region.
Scrotum drawn up.
Skin of l. side of scrotum studded with minute vesicles, pouring out a humid discharge.

Digitized by Google

Several painful, fugitive stitches in glans, as though poles of a galvanic battery had been applied to part; pains came on most unexpectedly.

‖Gonorrhœa, first stage.

[23] **Female Sexual Organs.** ‖Stitching pains, more to r. of fundus uteri; ‖sharp, shooting pains, abdomen exceedingly sensitive.

‖Ovaritis from suddenly checked menstrual flow.

‖Prolapsus uteri, occurring suddenly, with inflammation, bitter vomit, cold sweat, or dry, hot skin; with or without hemorrhage.

‖Labor-like pressing in womb; has to bend double, but relieved in no position. θDysmenorrhœa.

‖Uterine hemorrhage, active, much excitability, giddy, cannot sit up, fear of death.

‖After a fright with vexation; during catamenia, to prevent suppression.

‖Menses too late, diminished and protracted; plethoric females, who lead a sedentary life.

‖Menses profuse in plethoric women.

‖Menses suppressed by getting feet wet, or by a cold bath.

‖Amenorrhœa during puberty; nosebleed; palpitation; congestions.

‖Restores menses of plethoric women, after their suppression from any cause.

‖Inflammation of genitals. θProlapsus uteri.

‖Vagina dry, hot, sensitive.

‖Leucorrhœa copious, tenacious, yellow.

[24] **Pregnancy and Parturition.** During pregnancy: ‖restlessness, ‖fear of death, predicts time of death; jaundice; blood-spitting; disturbed between 12 and 3 o'clock at night, compelled to get up to urinate; has no affection for anybody.

‖Impending abortion from fright, with vexation; circulation excited, rapid breathing.

‖Pains of labor: distressing; vagina hot, dry, tender and undilatable; violent, following in rapid succession, particularly with a large child (head seems immovable), contractions insufficient, pains overwhelming; shrieking; red, sweating face; thirsty; head and hands glowing, pulse hard, skin scarcely moist, increased action of heart; ineffectual from defective position of child.

‖Puerperal convulsions, cerebral congestion, hot, dry skin, thirst, restlessness and fear of death.

‖After tedious and difficult parturition.

‖After-pains too painful, too long-lasting.

‖Milk-fever with delirium; mammæ hot, hard, tense, with scanty milk.

Digitized by Google

‖Lochia offensive, bloody, slimy. θChildbed fever.
‖Return of lochial discharge, when women commence going about after confinement.
‖Childbed fever after suppression of lochia; mammæ lax, no milk; dry, hot skin; hard, frequent pulse, or tensive, contracted; fearful, wild, staring, glittering eyes; dry tongue, great thirst; inflated abdomen, sensitive to slightest touch.
‖Newborn children: asphyxia, apoplectic symptoms, hot, purplish, breathless, pulseless; icterus; ophthalmia; retained urine; vomit blood, with bloody stools.

[25] **Voice, Larnyx and Trachea.** Voice tremulous; croaking.
‖Hoarseness and rattling. θCoryza.
‖Hoarseness, with pain when talking. θMeasles.
‖Hoarseness after speaking or singing.
‖Voice crowing, croupy.
‖Voice husky, can scarcely speak, points to larynx, wants to cough, but cannot. θCroup.
‖‖Larynx sensitive to touch and to inspired air, as if denuded.
‖‖Laryngitis, with inflammatory fever; also with suffocative spasms (spasms of glottis).
‖‖Laryngeal complaints after straining voice.
‖Dryness in windpipe causing a frequent little cough.
‖‖Croup: awaking in first sleep; child in agony, impatient, tosses about; dry, short cough, but not much wheezing nor sawing breathing; cough and loud breathing during expiration; every expiration ending with a hoarse, hacking cough; ‖‖after exposure to dry, cold winds.
‖‖Burning low down in larynx. θPeritonitis.

[26] **Respiration.** ‖‖Breath cold. θCholera.
‖‖Breath hot. θCroup. θBlood-spitting.
Breath fetid.
Breathing: ‖short, in sleep, after 12 P.M.; ‖‖labored, anxious or quick, and superficial; ‖deep, slow, sighing; ‖difficult, must breathe deeply; slow, rattling (apoplexy), whistling (croup in old age), short, when raising one's self.
‖‖Asthma from active hyperæmia of lungs and brain; face red, eyes staring; after emotions; can talk but little at a time.
‖‖Asthma after suppression of acute rash; feeling of band around chest; muscles of chest rigid; occasionally vomiting; urine scanty, dark; after paroxysm, sputa yellow or blood-streaked.
‖‖Agony, sits up straight, can hardly breathe; pulse like a thread, vomituritio; sweat, with anxiety; swelling under short ribs. θAfter scarlatina.

Digitized by Google

▮▮Oppression of chest when moving fast or ascending. θHeart disease.
▮Inhalation difficult and noisy. θTracheitis.
▮Worse during inspiration; better during expiration.
▮▮Constant short, dry cough, with feeling of suffocation, which increases with every inspiration.
▮Difficult breathing. θEndocarditis.
▮Breathes only with diaphragm. θPneumonia.
▮Cannot breathe freely from a sensation as if lungs would not expand; frequently takes deep breaths.

27 **Cough.** ▮▮Clear ringing or whistling cough, caused by burning, pricking in larynx or trachea.
▮Cough short, dry, forcible, excited by scratching in throat.
▮Short cough after 12 P.M., from tickling in larynx; the more he attempts to repress it, the more severe it becomes.
▮▮Cough hoarse, dry, loud; spasmodic, rough, croaking, with danger of suffocation; dry, hard, ringing. θInfantile bronchitis.
▮Dry cough, with shooting in chest; with raw pain in chest, caused by change of temperature.
▮Wants to cough, but cannot. θCroup.
▮Cough hollow, hoarse, choking, causing blueness of face.
▮▮Violent hollow cough at night; shorter and more panting during day. θLaryngitis.
▮Dry, barking cough. θMeasles.
▮Dry, whistling cough; beginning of pertussis; feverish, anxious, restless.
▮▮Hæmoptysis: blood comes up with an easy hawking, hemming or slight cough; expression of anxiety; great fear of death; palpitation, quick pulse, stitches in chest; caused by mental excitement; exposure to dry, cold air, or after taking wine
Sputa: ▮▮absent; ▮thin, gelatinous, more mornings and during day; ▮▮scanty, falls in round lumps, dark cherry-red (pneumonia); ▮▮bloody or blood-streaked; ▮▮bright red blood.
▮Expectoration brownish-red, rust-colored; cough frequent, with severe pains from shock through chest.
▮▮Cough awakens him from sleep, is dry, croupy, suffocating; great anxiety.
▮▮Cough > lying on back; < on side.
▮Cough with nervous excitability.
Cough worse: ▮after eating or drinking; ▮lying, must sit up from a constrictive feeling and suffocation (tracheitis) until 3 A.M.; evening, night, more after 12 P.M.; ▮from tobacco smoke; ▮during sleep; ▮from vexation,

especially fright; when overheated; ‖‖from dry, cold winds, or currents of air; from walking in open air; when assuming an upright position; from deep inspiration; from speaking.

[28] **Inner Chest and Lungs.** ‖Tightness of chest.

‖Oppression of chest, feeling of great weight, must breathe deeply, with anxiety.

‖Pressure, weight and burning under sternum.

‖Pain in middle of chest drawing toward back, < with every motion of body. θŒsophagitis.

‖Stitches in r. side of chest, but only when lying on that side. θEndocarditis.

‖‖Stitches: when breathing; with cough; ‖from lowest rib, r. side, through lung to apex of scapula, at every inspiration; ‖in l. chest; ‖last rib, r. side, through to back; transient, now here, now there; ‖ < bending sideways: ‖between scapulæ, on deep breathing; ‖and burning shooting in chest.

‖‖Cannot lie on r. side, only on back. θPleurisy.

‖Lancinating through chest, with dry heat, difficult breathing, often violent chill.

‖‖Synochal fever, hot sweat, oppression; children have rattling in chest; sensation of fulness in chest; must lie on back. θPneumonia, first stage.

‖‖Cough after drinking, sputum thin, frothy, blood-streaked; burning, shooting in chest; dulness on percussion. θPneumonia, second stage.

‖Heat in lungs.

‖Rush of blood to lungs. θChildbed fever.

[29] **Heart, Pulse and Circulation.** ‖Palpitation, anxiety, restlessness; < lying; face pale, anxious. θBlood-spitting.

‖‖Hyperæmia of lungs, violent palpitation of heart; face red; spitting of blood.

‖Palpitation; feeling as if boiling water was poured into chest.

‖Oppression about heart, burning flushes along back.

‖‖Anxiety about præcordia, heart beats quicker and stronger; fear of death. θDuring pregnancy.

‖Anxiety, difficulty of breathing, flying heat in face, sensation of something rushing into head.

‖‖Feeling of fulness; pulse hard, strong, contracted; stitches at heart; lies on back, with raised shoulders; constriction of chest. θPericarditis.

‖‖Uncomplicated cardiac hypertrophy; especially with numbness in l. arm and tingling in fingers.

‖‖Great agitation of heart, anxiety. θAcute rheumatism.

Heart beats quickly, pulse slow, apparently intermitting with attacks of powerlessness.

Digitized by Google

Heart's action feeble, quick, incomplete; pulse small and weak; cardiac weakness.

‖Intense pains in all directions, especially down l. arm, with numbness and tingling; anxiety, fear of death, coldness, cold sweat; feeble pulse. θAngina pectoris.

‖‖Fainting, with tingling. θHypertrophy.

‖Pulse quicker than beat of heart; ‖during three beats apex strikes only once.

‖‖Pulse strong, full, hard. θIn fever and inflammations.

‖‖Full, strong, hard pulse, with heat and thirst. θMeningitis infantum.

‖Pulse: small, intermitting, irregular (asthma); ‖accelerated, with heat of skin (jaundice); ‖contracted, full, powerful, over 100 per minute; ‖full, powerful, intermitting every six beats with cardiac heaviness; ‖slow, intermittent; ‖slow, feeble, weak and small; ‖like a thread, with anxiety; ‖quick, hard and small (peritonitis).

‖Carotids beat violently. θApoplexy.

‖Veins of throat expanded. θInflammation of lungs.

[30] **Outer Chest.** ‖Muscles rigid. θAsthma.

[31] **Neck and Back.** ‖Neck sore and painful; glands swollen. θScarlet fever.

Drawing in muscles of throat and neck.

Weariness in neck on motion as if involving single muscles, especially evenings and nights.

‖‖Tearing in nape of neck.

‖Painful stiff neck, <moving neck; pains down neck to r. shoulder.

Bruised pain between shoulders.

Drawing, tearing pain in scapulæ.

Stiffness of back.

Burning, shooting in spine.

‖Cutting pains extending in a circle from spine to abdomen.

‖‖Crawling in spine, as from beetles; formication.

‖After injury or checked sweat. θSpinal meningitis.

Pain in small of back, last lumbar vertebra, as if beaten.

‖‖Numbness of small of back, extending into lower limbs. θSpinal meningitis.

Spasms from inflammatory affections of spine.

Slightest touch of spine excites spasms.

Tensive, pressive pain in lumbar and sacral regions, noticed on stepping.

[32] **Upper Limbs.** Tearing pain in shoulder-joint.

‖‖Formication in arms, hands and fingers.

‖‖Arms hang powerless, as if paralyzed by blows. θMeningitis.

Digitized by Google

‖‖Numbness of l. arm; can scarcely move hand; tingling of fingers. θHeart disease.
‖Shooting, tearing, erratic; in arms, forearms, wrists and finger-joints.
Shooting in wrist joint as if from needles.
‖‖Automatic motion of l. hand; he strikes his face. θMeasles.
Drawing and tearing pains in wrists and fingers.
‖Trembling of hands.
‖Paralysis of wrists.
Palms of hands quite insensible.
‖Creeping pain in fingers.
‖‖Creeping in fingers, also while writing.
‖Hands icy cold; cold, sweaty palms.
Finger-nails blue.
‖‖Hot palms.
‖‖Red pimples on back of hands; stinging itching.

[33] **Lower Limbs.** ‖Hip and hip-joint (left) swollen, hot and exceedingly painful to touch; feverish, thirsty, anxious. θAcute articular rheumatism.
‖‖Drawing tearing in l. hip-joint on moving.
Sensation as if drops of cold water trickled down front of thighs.
‖‖Thighs when walking feel as if tightly bandaged.
Drawing pain, especially in joints of limbs.
Drawing in tendinous expansions of lower limbs.
‖‖Lower limbs sore. θPeritonitis.
‖Shooting, tearing pains in legs, knees, ankles, toes, etc.
‖‖Legs almost powerless; after sitting, numbness. θSpinal meningitis.
‖Numbness in gouty limb.
Trembling of limbs.
‖Unsteadiness of knees; bend while standing or walking.
‖Knees swollen; painful, throbbing, cutting, stinging pains; cannot sleep, had to sit up. θAcute rheumatism.
‖Knifelike pains in knee joint.
‖Legs stiff when moved, after taking cold.
Coldness of knee, alternating with flying shooting.
‖Cramps in calves, also in feet.
‖Legs and feet feel numb; ‖‖tingling, commencing in feet and spreading upward.
‖‖Ankles feel as if tied with a ligature.
‖Hot pricking in toes; they "go to sleep" while walking.
‖Coldness of feet and ankles; ‖soles and toes cold and sweaty.

[34] **Limbs in General.** Drawing, tearing pains in limbs.
Transient pains, like bone pains, in long bones of limbs and in metacarpal bones.

Digitized by Google

‖Rheumatic inflammation of joints, < evening and night; intense, bright red, shining swelling of parts; sensitive to least contact, with high fever.
Crawling in upper and lower limbs.
‖Trembling and tingling in limbs, accompanied by shooting pains.
‖Convulsive trembling of limbs.
‖Convulsive contraction of limbs.
‖Slight starting of limbs, alternating with trembling. θMeningitis.
‖Limbs feel weak, heavy and painful. θCoryza.
‖Limbs feel tired during repose.
‖Lameness and numb feeling in affected parts; pain intolerable. θRheumatism.
‖Numbness, icy coldness and insensibility of hands and feet. θMeningitis.
Bruised, heavy feeling.
‖Coldness of extremities.
Hot hands and cold feet.
‖Twitching of fingers and toes.

[35] **Rest. Position. Motion.** Rest: generally >, but during night, in bed, pains intolerable; limbs feel tired; rigors <.
Lying: headache >; palpitation <; shudders; fever unbearable.
Lying on back: cough >; stitches in chest >.
Lying with head high: headache >.
Lying on r. side; stitches in chest.
Lying on side: cough <; cheek lain on sweats.
Must lie down: with vertigo.
Cannot sit up: uterine hemorrhage.
Sitting: vertigo >: crackling in forehead >.
Sitting up: pressure in sunstroke <; cough <.
Must sit up: in difficult breathing; with painful knees.
Rising from a seat: vertigo.
Rising from recumbent posture: red face becomes pale.
After sitting: legs numb.
Rising: shortness of breath; fainting.
Springs out of bed: in delirium at night.
Changes position constantly: when impatient; during anxiety; at night; puts hand to head.
Standing: faints while urinating; causes great weakness.
Stooping: vertigo <; as if eyeballs were forced out >.
Bent backward: head in croup; body in spasms.
Bending sideways: stitches in chest.
Must bend double: colic; dysmenorrhœa.
Shaking head: vertigo; blackness before eyes.
Raising head: vomits.

Digitized by Google

Walking: vertigo >; squeezing in forehead <; vertex headache >; cough <; thighs feel as if bandaged; unsteady knees; toes "go to sleep."
Stepping: tensive, pressive pain in back.
Must walk or move about: at night restlessness, fever.
Motion: sensation as if brain moved <; crackling in temples, forehead and nose; of eyeballs painful; pain in chest <; weariness in neck <; stiff neck <; drawing, tearing in l. hip; legs stiff; chill; rigors >.
Violent exercise: produces overheating and conjunctivitis.

[36] **Nerves.** ‖Restless, though motion < pain. θPleurisy.
‖Nervous excitability. θProlapsus uteri.
Timid and uncertain in his actions.
‖‖Excessive restlessness and tossing about for several hours.
Trembling and tendency to palpitation.
‖Jerks of l. leg or arm, grinding teeth; comatose; restless, moaning. θMeasles.
‖‖Convulsions of teething children; heat, startings, twitches of single muscles; ‖‖child gnaws its fists, frets, cries; costive or dark, watery stools.
Spasms of eyes; clenched jaws; body becomes rigid and bends backward; limbs distorted with spasms.
‖Loud lamentations; body rigid and bent backward; fists clenched across throat; gnashing of teeth; eyes drawn up spasmodically under lids.
‖‖Towards noon convulsions of whole body. θMyelitis.
Whole body feels as heavy as lead; swollen in size and stature, except head and neck.
‖Great muscular weakness, weariness, prostration, almost total inability to stand.
Progressive failure of strength.
‖Feeling very drowsy, languid and unable to rise from couch; obliged to discontine all work; system feels prostrated with sense of inward fever.
‖‖Numbness, tingling; l. side. θParalysis of limbs.
‖Sudden falling down senseless. θApoplexy.
Collapse; cholera.
‖‖Faintness on attempting to sit up.
Formication, now in one, now in another part.

[37] **Sleep.** Sleepiness; spasmodic yawning.
On going to sleep: ‖‖fever becomes intolerable; ‖jerks; ‖restless tossing.
‖‖Somnolency, eyes closed; in a little child.
‖Senseless; snoring. θApoplexy.
Sleeping light, imagines in morning he has not slept at all, yet not weak.
During sleep: ‖delirium; ‖starts; ‖profuse sweat; ‖hot, restless and talking; ‖slow breathing.

Digitized by Google

‖‖Restless nights; must walk or move about; ‖alternately cold and hot, partial sweat.
‖Excessive wakefulness; nervous sleeplessness.
‖‖Sleeplessness after midnight with anxiety, restlessness, continual tossing about; eyes closed.
‖‖Sleeplessness caused by fear, fright or anxiety, with fear of future. θConsumption of lungs.
‖Vivid dreams of day's occurrences.
‖At night anxious dreams, several times waking with start.
‖Long dreams with anxiety in chest, taking away breath and causing him to awaken.
‖Anxious heavy dreams with oppression of chest.
Awakened: ‖by asthma; ‖by nightmare; ‖with starts; ‖by cough.
Worse after sleep.

[38] **Time.** Night: delirium; sticking, tearing around eyes <; lachrymation; violent hollow cough; weariness of neck; rheumatic pains in joints <; sleepless; dreaming; shuddering; alternate heat and chill; pains intolerable.
Midnight: burning in throat, causing hawking.
After midnight: short breath during sleep; short cough; sweat.
Midnight to 3 A.M.: must rise to urinate.
Until 3 A.M.: cough worse.
Morning: excessive sweat; anxious lamentations; confused as if drunken; swollen eyelids <; coryza fluent; thin, gelatinous sputum; thinks he has not slept.
Towards noon: convulsions.
Day: short cough and panting; thin, gelatinous sputum.
Towards evening: congestion to head <; crackling in head; stitches in orbital region; fever unbearable.
Evening: congestive headache <; crackling in temples, forehead and nose; itching, burning, smarting in eye; stitches in eye<; lachrymation; cough <; weariness of neck; rheumatic pains in joints <; sudden chill.

[39] **Temperature and Weather.** Heat of sun: headache <.
Rays of sun: produce erythema; sunstroke.
Heat: relieves formication of scalp.
Warm room: forehead feels compressed; chill <.
Overheating: causes eye troubles; cough results.
In bed: fever unbearable.
When covered: sweats.
Uncovering: will not be uncovered.
Open air: headache in forehead <; vertex headache >; sweat on head >; eyelids sensitive; headache from checked coryza >; teeth sensitive; cough <.
Cold, dry winds: conjunctivitis, coryza, toothache, croup; cough <; articular rheumatism.

Digitized by Google

Raw air: produces toothache.
Cold water: relieves conjunctivitis and anxiety.
Ice water: causes gastric catarrh; excites cough.
Cold bathing: suppresses menses.
Getting wet: causes tearing and beating in carious molar; diarrhœa; suppresses menses.
Hot days, cold nights: dysentery.

40 **Fever.** Sensation of coldness in bloodvessels.
Chill: ‖anxious; ‖on slightest movement; being uncovered or touched; ‖‖ascends from feet to chest; with formication between shoulders and down back; finger tips cold, nails blue, < in a warm room.
‖Shuddering on lying down at night.
Rigor commencing in limbs and going over whole body, with gooseflesh; < in rest; disappearing on motion.
‖Skin cool, dry or cold and viscous; or cold to touch, but patient feels as if burning. θCholera.
‖‖Whole body stiff and cold. θMyelitis.
‖‖Rigors and vomiting. θPuerperal convulsions.
‖Frequent shudders. θInflammation of lungs.
‖‖Cold crawls over back, with hot skin. θCatarrh.
‖Sudden chill in evening, followed by heat.
‖‖After a violent chill, dry heat with difficult breathing and lancinating pain through chest.
‖With chill, internal heat, anxiety, red cheeks; body chilly, hot forehead and ears, internal heat.
‖Chill at beginning violent, more in evening after lying down, often with one hot cheek and contracted pupils.
‖Alternate heat and chill all night; restless, wants to uncover, yet chilly therefrom.
‖Face hot, hands and feet cold; face flushes, with cold hands and feet, mostly evenings.
‖Skin hot and dry, with anxious tossing about. θMeningitis.
‖Heat and dry skin. θProlapsus uteri.
‖‖Heat with thirst, hard, full and frequent pulse, anxious impatience, inappeasable, beside himself, tossing about with agony.
‖‖Heat, with agonized tossing about.
‖‖Dry, burning heat, generally extending from head and face, with much thirst for cold drinks.
‖‖Heat, with inclination to uncover; ‖fever unbearable towards evening and after getting into bed.
‖Heat, with chilliness at same time.
‖Red cheeks, with obstinacy, complaining mood; burning in region of navel and pressive headache.
‖Thirst for beer during heat; ‖‖burning thirst during heat.

Digitized by Google

‖‖Inflammatory fevers and inflammations, with much heat, dry burning skin, violent thirst, red face, or alternate red and pale face; nervous excitability, groaning and agonized tossing about; shortness of breath, and congestion to head. θSynochal fever.

Profuse sweat, with copious flow of urine and diarrhœa.

‖‖Free sweat.

‖Profuse sweat during sleep, even in consumptives; sweat after 12 P.M.

‖Long continued, general sweat, of a somewhat sour odor.

‖Affected parts and covered parts sweat; likes to be uncovered.

‖Worse while sweating; better afterward.

‖Profuse sweat relieves rheumatic pains.

‖‖Bad effects of suppressed sweat: catarrhs; fever; local inflammations, etc.

‖Cold sweat.

[41] **Attacks.** Attacks of pain, with redness of face and thirst.

Suddenly: turns red and falls unconscious; faints while standing to urinate; excrutiating pain in stomach (scarlatina).

Alternately: heat and chill; stupefaction and restlessness; face red and pale; slimy stools and constipation; coldness and shooting in knee.

[42] **Locality and Direction.** Right: staggers to side; erratic pains in head; pains like severe blows in forehead; sticking in eyeballs; pains over eye; ear painful; mouth drawn to r. side; tense swelling under short ribs; drawing in testicle and uneasiness in renal region; stitching pains in fundus uteri; stitches in chest; pains in neck and shoulder.

Left: pain in small spot over supraorbital ridge; pulsations in forehead; side lame; apoplexy; as if sand in inner canthus; deafness, with buzzing in head; tearing in ear; neuralgia of trigeminus; lips motionless during breathing; toothache; lobe of liver painful; side of scrotum studded with vesicles; stitches in chest; numbness of arm; tingling in fingers; hip swollen; jerking of arm or leg; side lame.

Within outward: pressure in head; fulness in forehead; eyeballs feel as if protruding; pressing in epigastrium.

Out inward: pressure in upper eyelids.

Below upward: cutting in intestines; numbness and tingling in lower extremities; chill.

Left to right: paralysis (poisoning).

Right to left: toothache; blows in forehead, pulsations.

Front to back: pain in chest.

Towards right side: staggers to right in vertigo.

Digitized by Google

Limited to a small spot: headache over l. supraorbital ridge.

Sensations. ‖Pains intolerable; more so at night.

‖‖Stitches here and there; erratic.

‖Stinging burning, as if in skin.

‖‖Tearing, cutting, wandering pains. θRheumatism, etc.

‖‖Neuralgia with congestions, from dry cold air or checked sweat.

Trembling, like a boiling and seething, as if parts were going to sleep; or as if becoming drunk; always with an unpleasant sensation of coldness.

‖As if bruised or beaten in different parts.

As if ideas came from stomach; as if she would lose her reason; as if brain was agitated by boiling water; as if a hot iron was bound around head; as if everything would push out of forehead; pulsation as from severe blows in forehead; vertex as if compressed by a pitch-cap; headache as if brain was moved or raised; as if pulled by hair on vertex; as from bending crackling tinsel in temples, forehead, nose; as if hair stood on end; as if eye would be forced out of orbit; as if eye-ball was pushed into orbit; music goes through every limb; as if face was growing larger; as if muscles of face were spasmodically contracted; tongue feels as after eating pepper or smoking; as if teeth would fall out; mouth as if filled with air tasting of rotten eggs; as of cold air on tongue; as if uvula was elongated and touching tongue; as if something had stuck in throat; as if food had lodged in cardiac region when swallowing; as if a cold stone lay in stomach; anxious feeling in præcordia; as if a heavy load were resting on abdomen; splashing in region of bladder; as though poles of a galvanic battery had been applied to glans penis; feeling of a band around chest; feeling of suffocation; as if boiling water was poured into chest; as of beetles crawling on spine; arms as if paralyzed by blows; as of needles in wrist joints; as if drops of water trickled down front of thighs; as if thighs were tightly bandaged when walking; ankles as if tied with a ligature.

Violent pain: over r. eye; in stomach; down l. arm.

Burning: headache; in eyes; of lids; of lips and mouth; of tongue; on tip of tongue; vesicles on tongue; in fauces; in back of throat; in throat; along eustachian tube; in pharynx; along œsophagus to stomach; from stomach up to mouth; in pit of stomach; in hepatic region; in umbilical region; in hernia, like coals of fire; in anus; in bladder; in neck of bladder; in urethra; in larynx; under sternum; in spine.

Digitized by Google

Prickling: in tongue; in throat; in larynx or trachea; in toes.
Smarting: in eyes.
Stitches: under scalp; in orbital region; in pit of stomach; in region of liver; in diaphragm; in region of kidneys; in glans; to r. of fundus uteri; in chest.
Shooting pains: in renal region; in uterus; in chest; in upper limbs; in legs, knees ankles, toes.
Stitching thrusts: in lower jaw; in spine.
Knifelike pains in knee joint.
Stinging: in ear; in throat; in fauces; in hepatic region; in anus; in region of kidneys; in knees.
Sticking pains: in r. eyeball; in sclerotitis; around eyes; in posterior fauces.
Cutting: in intestines; in a circle from spine to abdomen.
Twitching: in knees; in eyes.
Choking: in throat.
Swollen feeling: of tongue; of testicles; of many parts, generally with shuddering, cold or rigor.
Pain: in r. ear; in epigastrium; in glans penis; in middle of chest.
Tearing pains: in sclerotitis; around eyes; in l. ear; in a carious molar; in nape of neck; in scapulæ; in shoulder joint; in wrists and fingers; in l. hip joint; in limbs.
Pressive shooting: in eyeballs.
Aching: in eyeballs; in face.
Bone-pains: in long bones of limbs and metacarpal bones.
Drawing pain: in r. testicle; in muscles of neck and throat; in scapulæ; in wrists and fingers; in l. hip-joint; in joints of limbs; in tendinous expansions of lower limbs; in limbs.
Pinching: about navel.
Squeezing: in forehead, above root of nose.
Pressing shooting: in forehead, coryza.
Pressure: in upper part of forehead; in temples; in vertex; in upper lids; at root of nose; in stomach and pit of stomach; in hepatic region; in anus; in region of kidneys; in bladder; under sternum; in lumbar and sacral region.
Bruised pain: in eye; in loins; in testicles; between shoulders; in small of back.
Fulness: in forehead.
Throbbing: in temples; in one side of face; in carious molar; in pit of stomach.
Constriction: of throat; in hepatic region.
Contracting: in upper part of forehead.
Cramps: at root of nose; in calves.

Digitized by Google

Tensive pain: in lumbar and sacral regions.
Tense feeling: in eyelids; in stomach and hypochondria.
Tightness: of chest.
Heaviness: in forehead; in hypochondria; in abdomen, bearing down; under sternum; in limbs.
Paralyzed feeling: in intestines.
Formication: of scalp; on spine; between shoulders; in arms, hands and fingers.
Creeping: in face; in fingers.
Creeping pain: in fingers.
Crawling: in face, in spine; in limbs.
Tickling: in larynx.
Tingling: in face, lips and mouth; in tongue; in œsophagus; at anus; in sexual parts; in l. arm; in fingers; in feet, spreading upward; in limbs.
Roughness: as from sand in inner canthus.
Rawness: in middle of tongue.
Raw pain: in chest.
Distressed feeling: after eating.
Laborlike pressing: in womb.
Scratching: in throat causing cough.
Soreness: neck; of lower limbs.
Weariness: in neck.
Stiffness: of back.
Tired feeling: in limbs during repose.
Numbness: of lips and mouth; of tongue; in l. arm; of small of back; in gouty limb; in legs and feet; with rheumatism of hands and feet.
Stinging itching: pimples on hands.
Itching: of eyes; at anus.
Heat: in eyes; of external ear; of lips and mouth; in stomach; in diaphragm; in vagina; in lungs; of palms; in l. hip joint.
Coldness: in incisors; of hands; of palms; of knee; of extremities; in bloodvessels.
Dryness: of eyes; of lids; of tongue; in palate; in posterior nares; in throat; in windpipe.

"**Tissues.** ‖Has but little effect on disorganized blood-globules, hence seldom useful in true typhoid states.
‖Acts more on arterial system.
‖Plethora; active capillary congestions (from overactive serous membranes).
‖Local congestions and inflammations.
‖Neuritis, with tingling.
‖Complaints in joints: shooting, cramp, cracking, loss of power; drawing in joints and aponeuroses.
‖Articular rheumatism, much fever, restlessness and anxiety; swellings are red and hot or pale; shifting

Digitized by Google

from one point to another; especially if caused by suddenly checked sweat or by dry cold air or winds.

‖‖Acute catarrhs, with usual *Aconite* fever.

Skin and muscles rigid.

‖Muscular rheumatism with high fever.

‖Glands painful, hot, swollen.

[45] **Touch. Injuries.** Touch: causes loud screams; pains worse; eyeballs sensitive; soreness in pit of stomach <; pains of peritonitis <; lower abdomen sensitive; larynx sensitive; excites spasms; hip painful; rheumatic swelling of joints sensitive; chilly.

Pressure: stitches in supraorbital region <; liver sensitive.

Scratching: no effect on itching.

Fall or concussion: vertigo.

‖‖Foreign bodies: irritation and inflammation of eyes.

‖Wounds painfully sensitive after surgical operations; fever.

‖‖Shock from injury or surgical operations.

[46] **Skin.** ‖Skin dry; absence of sweat.

‖Tingling over whole surface.

‖‖Red, shining, hot swellings; violent pains.

‖Fine prickings, as from needles, here and there.

‖‖Spots like flea-bites; itching unchanged by scratching.

‖Erythema from sun's rays; papular erythema.

‖Erysipelas, smooth skin; violent fever.

‖‖Yellow skin. θJaundice. θDuring pregnancy.

‖Red rash all over, except on abdomen. θChildbed fever, second week.

‖‖Measles: dry, barking cough; painful hoarseness; eyes red; cannot bear light; tongue red; jerks of l. leg or arm, or grinding of teeth; restless moaning and lamenting; lying in a comatose state; pains in joints; free sweat.

‖In red miliary fever: increasing restlessness, agonizing anxiety and heat of body.

‖Rash of children.

‖‖Seldom in scarlatina, except as specified below or during desquamation.

‖‖Scarlet rash, with high fever.

‖Scarlet fever, with dry skin and very great restlessness and distress; must frequently sit erect in bed in consequence of dyspnœa.

Skin cold and dry; cold, clammy.

Single long dartings, here and there, mixed with a raw sensation, ending with pain as of a wound.

[47] **Stages of Life, Constitution.** ‖‖Children's diseases; with high fever.

Digitized by Google

Especially persons with tonicity (rigidity) of fibre.
Old age; sleeplessness.
Contraindicated in fevers which bring out eruptions or are otherwise salutary, unless there is agonizing tossing with dry skin.
Dark hair and eyes.
Persons leading a sedentary life; plethora, etc.
Tendency to apoplectic congestion; plethora.

[48] **Relationship.** Antidotes to *Acon.: Acet. ac., Paris, Vin.*

Is antidote to *Bellad.*, *Chamom.*, *Coffea*, *Nux vom.*, *Petrol.*, *Sepia*, *Sulphur*, *Veratr.*, and secondary symptoms of *Morphine.*

After *Acon.* follow well: *Arnic.*, *Bellad.*, in gastric states; after pulmonary febrile affections: *Ipec.*, *Bryon.*, *Hepar*, *Pulsat.*, *Sepia* and *Sulphur;* in colic: *Arsen.;* in cough: *Bryon.*, *Spongia;* in croup: *Spongia* or *Hepar;* in strangury of children: *Pulsat.;* in dysentery: *Mercur.*

Acon. may often be indicated after *Arnic.*, *Coffea*, *Sulphur* and *Veratr.*

Complementary to *Coffea*, in fever, sleeplessness, intolerance of pain; to *Arnic.* in bruises; to *Sulphur* high in all cases.

Ailments from: *Act. rac.*, *Chamom.*, *Coffea*, *Nux vom.*, *Petrol.*, *Sepia*, *Sulphur.*

Abuse of *Acon.* calls for *Sulphur.*

ACTEA RACEMOSA.* (Cimicifuga.)

Actea racemosa, Linnæ. Black Cohosh. Ranunculaceæ.

Grows in woodlands from Canada to Florida. Famous as a popular medicine, particularly for snake-bites. Has received so many improper names that the oldest one is preferred. Proved in 1853 by H. M. Paine, in 1858 by Ch. H. Burr, in 1859 by Hill and Douglas, in 1871 by Bœmeister, and used like a polychrest by most practitioners.

[1] **Mind.** ‖Sensation as if a heavy black cloud had settled all over her, and enveloped her head, so that all was darkness and confusion, while, at the same time, it weighed like lead on her head.
Forgetful.
Unable to find right word in speaking.
Mind dull and heavy.
‖‖Thinks she is going crazy.
‖Often started by illusion of a mouse running from under her chair.
‖Imagines strange objects about bed, as rats, sheep, etc. θDelirium tremens.
‖‖Delirium with great headache. θPuerperal fever.
Delirium with nausea, retching, dilated pupils.
‖Fear of death; fears those in house will kill him; saw wires encaging him; visions of rats and of strange objects. θDelirium tremens.
‖‖Mania following disappearance of neuralgia.
‖‖Puerperal mania.
Desire for solitude, or to wander from place to place.
Answers questions hurriedly and evasively.

---

* The observation that a drug may produce different symptoms on the different sexes is of the utmost importance for the scientific development of our Materia Medica.

Professors Hill and Douglas state in their valuable report of provings with Actea racemosa, in the *New York Quarterly*, Vol. VII., 1859, p. 450: "It produced nausea, vomiting and much gastric irritation in the six women, while in forty men it was hardly noticed as affecting the stomach in the least." Being an important remedy in morning sickness of the pregnant, we may conclude that all the gastric symptoms observed by female provers depended on the uterus.

It has also been observed that *Cuprum* acts more on the female and *Ferrum* on the male organs.

Digitized by Google

Declares she has been poisoned.
‖‖Incessant talking, changing from one subject to another. θDelirium tremens.
‖Frequent sighs and ejaculations. θMental disorder.
Would not answer; at other times very loquacious.
‖‖Feels grieved and troubled, with sighing; ‖next day a feeling of tremulous joy, with mirthfulness, playfulness and clear intellect.
‖Miserable dejected feeling; anxious, weeping.
‖Mental depression, with suicidal mood; also after checked neuralgia.
‖Great melancholy with sleeplessness.
‖Apprehensive and sleepless. θPregnancy.
‖Fears she will become crazy, with headache on vertex.
‖‖Fear of death.
‖Indifferent, taciturn, takes no interest in household matters. θMental disorder.
‖Irritable; the least thing that goes wrong makes her angry.
Nervous and irritable.
‖Suspicious of everything, would not take medicine if she knew it. θMental disorder.
‖‖Restless and impatient, can read only a few minutes, must get up and walk about, yet soon tires.
Headache when reading or writing; cannot write a letter.
‖Headache of students.
Mental emotions cause: ‖amenorrhœa; ‖suppression of lochia.
‖Mind disturbed by disappointed love, business failures.
‖Feels faint at epigastrium when meeting a friend.
‖After fright: threatened abortion.

[2] **Sensorium.** Constant dull feeling in vertex.
Dulness and heaviness in head; like after "a spree."
‖Dizzy on rising in morning, with pain over eyes; faintness, nausea and occasional vomiting. θIn mental diseases.
Vertigo, head feels too large and heavy; when stooping, head swims.
Vertigo, dizziness with impaired vision.
‖Fainting fits generally with some uterine affection.
‖Sensation as if a heavy black cloud had settled all over her and enveloped her head, so that all was darkness and confusion. θMental disorder.

[3] **Inner Head.** Dulness in head as after "a spree."
‖Rush of blood to head, brain feels too large for cranium; after suppressed uterine discharges or suddenly ceasing neuralgic pains.
Waving sensation in brain.

Digitized by Google

Opening and shutting sensation when moving head and eyes.
Dull frontal headache relieved by pressure.
‖Great pain in head and eyeballs, increased by slightest movement of head or eyeballs. θMeningitis.
Sensation as if temples were compressed.
‖Headache down to nose.
‖Headache every day at same hour.
‖‖Severe pains in r. side of head, back of orbit. θAfter pains.
‖Aching and shooting pains in vertex, occiput, l. temple, eye and ear; < lying down; hysterical crying.
‖‖Brain as if too large; pressing from within outward.
‖Head feels as if pounded, full; as if too large. θIntermittent.
‖Top of head feels as if it would fly off, < going up-stairs; declares she will go crazy.
‖Intense pain as if a ball had been driven from neck to vertex, < at every throb of heart.
‖Aching pain in head, particularly at occiput, only indoors; < in afternoon and still more in evening, disappearing entirely at 9 P.M. after a walk in open air.
‖Great pain in head, back and limbs.
‖Pain over and in eyes, extending along back to occiput.
‖Excruciating pain in forehead, eyeballs and temples, with cold forehead on waking, 2 A.M.
Dull boring in forehead over left brow, 10 A.M.
‖Pain in forehead, temple and vertex, with fulness, throbbing and heat.
‖Dull pain in occiput, with shooting down back of neck.
‖Headache better in open air.

[4] **Outer Head.** ‖Sensation as if vertex opened and let in cold air. θClimaxis.

[5] **Sight and Eyes.** ‖Peculiar wild look out of eyes. θDelirium tremens.
‖‖Eyes expressionless. θChorea.
‖Dark spots before eyes.
‖‖Pupils dilated. θDelirium.
Aching and heaviness of eyes.
Eyeballs painful, with lachrymation.
Sensation of enlargement of eyeballs; they feel as if they would be pressed out of head.
Ulcerated cornea, ‖with sharp pains through eye into head.
‖Eyes congested during headache.
‖Pain in centre of eyeballs, and also a sensation as if pain was situated between eyeball and orbital plate of parietal bone; more severe in morning, < on going up-stairs.

Digitized by Google

‖Pain over eyes extending to occiput.
‖Ciliary neuralgia; aching pains in eyeballs or in temples, extending to eyes, so severe, especially at night, it seemed as if patient would go crazy.
Ciliary neuralgia; sharp, shooting pains from occiput through to eyes, or darting from eyes to top of head, with redness of eyes and photophobia; < on r. side, afternoon and night; > on lying down.
‖Blisters on eyelids.
‖Severe pains darting into l. eye; feels as if needles were run into eyeball through cornea; < on closing eyes; sleepy, but cannot sleep on this account. θNeuralgia.

[6] **Hearing and Ears.** Sensitive to least noise, with spasmodic labor-pains.
Singing in l., later in both ears.
‖Buzzing in ears. θPuerperal fever.
Sweat behind ears.

[7] **Nose.** Pain in head followed by coryza and sore throat.
Coryza: dry in evening, white mucus during day; sneezing; aching pains in head and eyes, sensitive to cold air; every inhalation seems to bring cold air in contact with brain.
Greenish, slightly bloody coryza.

[8] **Face.** ‖Face bluish. θPuerperal fever.
‖Wild, fearful expression. θDelirium tremens.
Face: pale; eyes large and sunken, surrounded by dark rings.
‖Forehead feels cold; deadly pale.
‖Neuralgia affecting malar bone, pain goes off at night, reappears next day.
Frequent flushes of heat, wants to be in open air.
‖Suddenly very faint, face became ashy white, weakness so great that she believed she was dying. θPuerperal fever.

[9] **Lower Part of Face.** Lips dry.
Lower lip cracked, as if bitten.
‖Jaw sunken. θTyphus.

[10] **Teeth.** Toothache in neuralgic and rheumatic patients.
Thick mucus on teeth.

[11] **Taste, Speech, Tongue.** Taste: disagreeable; coppery.
Cannot speak a syllable, though she makes the effort.
Talking provokes cough.
Tongue: clean but pointed and trembling; ‖swollen. θCerebral diseases.

[12] **Inner Mouth.** Breath offensive.
Mouth and tongue feel warm and dry.
Spitting of thick, sticky saliva.

[13] **Palate and Throat.** Dry spot in throat, causing cough;

Digitized by Google

dryness of pharynx, with constant desire to swallow; fulness in pharynx; uvula and palate swollen; neck stiff.

Hawks up a viscid, coppery tasting mucus.

Thick mucus lodges in throat.

Inflamed throat, pains awaking him at night.

[14] **Appetite, Thirst.** No thirst, slight feeling of hunger in stomach; rumbling in abdomen.

Appetite variable.

No appetite for dinner, wants to drink cold water; little at a time suffices.

‖Great thirst. θPuerperal fever.

[15] **Eating and Drinking.** After breakfast: headache >; pain in l. temple; faint before breakfast, overfilled after.

After dinner: pain through chest.

[16] **Nausea and Vomiting.** ‖Eructations, with nausea, vomiting and headache, more in women.

Nausea with pain in region of kidneys.

Vomiting of a green substance; groans, raves; presses both hands to her head for relief.

‖‖Nausea, retching, dilated pupils, tremor of limbs. θDelirium tremens.

[17] **Scrobiculum and Stomach.** Acute, darting pains in stomach.

‖Sinking or goneness in epigastrium, nausea, internal tremor; women.

Faint sinking feeling at epigastrium with palpitation of heart.

[19] **Abdomen.** ‖Periodical colicky pains, > bending double and after stool.

Flatulence, causing a sensation of fulness.

Severe pains in bowels, small of back and down limbs.

Excruciating pains in bowels, much rumbling and wind.

‖‖Sharp pain across hypogastrium. θIn uterine affections.

‖‖Abdominal muscles sore.

[20] **Stools.** ‖Frequent, thin, dark, offensive stools. θSpotted fever.

Morning diarrhœa, of children.

Pains go from limbs to bowels, producing diarrhœa and partial retention of urine.

‖Alternate diarrhœa and constipation.

[21] **Urinary Organs.** Pressing in region of kidneys and small of back.

‖Irritable bladder.

Urine: profuse, pale, watery; bloody, frequent; scanty, hot.

‖Increased flow of urine makes her feel weak.

Sp. gr. 1.005, then 1.019, 1, 020; deposit of uric acid.

Digitized by Google

[22] **Male Sexual Organs.** Pain and tenderness in testicles.
Pain and retraction in r. spermatic cord.

[23] **Female Sexual Organs.** Spasms of broad ligaments.
Ovarian pains shoot up to side.
‖Severe pain in lower part of abdomen, < from motion.
‖Uterine neuralgia.
‖‖Pains in uterine region dart from side to side.
Dull dragging in uterine region, with frontal headache.
‖Bearing down as if something was passing out; > lying down.
‖Bearing down in uterine region and small of back; limbs feel heavy, torpid.
Great tenderness on pressure over uterine region.
‖Menses: profuse, early; dark, coagulated blood; ‖scanty, slightly coagulated; sharp pains across abdomen, has to double up; laborlike pains; debility between periods; scanty flow between menses.
Menses suppressed: ‖by emotions; ‖from cold; from fever.
‖‖Menses irregular, delayed or suppressed, with chorea, hysteria, or mental disease.
During menses: ‖‖hysterical or epileptic spasms; ‖‖increase mental symptoms; ‖"shivers."
‖Severe bearing-down pains.
‖Rheumatic dysmenorrhœa.
‖Leucorrhœa, with sensation of weight in uterus.
‖Exhausting menstruation; with a young girl who was unable to open her eyelids.

[24] **Pregnancy and Parturition.** ‖‖Given during last month, it shortens labor.
Complaints in pregnancy: ‖‖nausea: false laborlike pains; ‖sharp pains across abdomen; ‖sleeplessness.
‖Threatened miscarriage, third month; nervous, anxious.
‖Labor-pains: severe, tedious or spasmodic, with fainting fits or cramps; too strong, spasmodic; feels < from least noise; ceased for thirty-six hours.
‖Cardiac neuralgia in parturition.
‖Convulsions in labor from nervous excitement.
‖‖"Shivers," first stage of labor.
‖After pains, < in groins; oversensitiveness; nausea and vomiting.
‖Lochia, suppressed, by cold or emotions; watery, mixed with small clots; suddenly ceased (puerperal fever).
‖‖Inframammary pains, < l. side.
‖Burning in mammæ.
‖Rigidity of os uteri in labor (should be taken some weeks before parturition).
Puerperal fever.

Digitized by Google

Puerperal mania: does not know what is the matter with her head, it feels so strange, talks incoherently, screams, clutches her breast as though in pain, tries to injure herself.

[25] **Larynx, Bronchia.** Hoarseness, roughness and scraping, < in evening; very sensitive to cold air.

Tickling in throat, with violent cough.

[26] **Respiration.** Frequent sighing, respiration quickened on waking.

Difficult breathing after slight exertion, with general feeling of illness.

[27] **Cough.** Dry spot in throat causes cough.

Night cough, dry, constant, short. θIncipient tuberculosis.

Cough at every attempt to speak.

Expectoration of a viscid, stringy mucus.

[28] **Inner Chest and Lungs.** Severe pain in l. chest, below fifth or sixth rib.

Pain in r. side of chest, must lie quietly on back and press with hand; breath short; slight cough.

Congestion to chest from exposure to cold air, with dry cough, night-sweats and diarrhœa.

Pain through l. lung and heaviness over heart.

Tuberculosis, not hereditary, but from exposure.

Sharp pains from side to side.

Acute pain from apex to base of r. lung, < from every inspiration.

[29] **Heart, Pulse and Circulation.** Palpitation from least motion.

Pains from region of heart, all over chest and down l. arm; palpitation; unconsciousness; cerebral congestion; dyspnœa; face livid; cold sweat on hands; numbness of body; l. arm numb and as if bound to side. θAngina pectoris.

Heart's action ceases suddenly; impending suffocation.

Pulse weak, irregular, eighty per minute; feeble in morning, with trembling and weakness.

Quick full pulse. θDelirium tremens.

Sensation as if a heavy black cloud had settled all over her, and weighed like lead upon her heart. θMental disorder.

[30] **Outer Chest.** Pains about r. chest, < from motion, extorting cries. θPleurodynia.

[31] **Neck and Back.** Head and neck retracted. θSpotted fever.

Rheumatic pains in muscles of neck and back; feeling of stiffness and contraction.

Cramp in muscles of neck on moving head.

Digitized by Google

‖Stiff neck from cold air, pain from moving even hands.
‖Sensitiveness of spine, especially in cervical and upper dorsal regions; soreness of all muscles. θSpotted fever.
Rheumatism of dorsal muscles.
‖Severe pain in back, down thighs and through hips, with heavy pressing down.
‖Violent aching in small of back. θUterine affections.
‖Weight and pain in lumbar and sacral regions, sometimes extending all around body.
Weak trembling pain in small of back.
Pulsating pains in lumbar region.
Dull, heavy aching in small of back, > by rest, < by motion.

[32] **Upper Limbs.** Severe pains down arms, with numbness as if a nerve had been compressed.
‖Excruciating pains in arms, < as evening approaches. θRheumatism.
Pains in muscles, < from motion.
‖Left arm feels as if bound to side. θChorea.
‖Constant irregular motions of l. arm, which is useless. θChorea.
‖Cold sweat on hands.
Trembling of fingers, especially when writing.

[33] **Lower Limbs.** ‖Aching in sacrum, lumbar region and down l. leg. θSciatica.
Severe pain in ileo-sacral symphysis and down leg.
‖Pressure around hips, with pain in sacrum. θThreatened miscarriage.
Fearful pains through lower limbs, like growing pains.
‖Rheumatic pains in joints, with heat and swelling.
‖Towards evening, soreness, aching and stiffness in region of tendo-achillis; < walking; soreness of heels as if bruised.
‖Dull aching-burning pain in second joint of r. great toe, extending up limb.

[34] **Limbs in General.** ‖Aching in limbs.
‖‖Excessive muscular soreness.
‖Rheumatism affecting bellies of muscles; cramping, stitching pains.
Uneasy feeling in limbs, causing restlessness.
Torpidity of limbs, with uterine affections.
Joints feel stiff in morning, as if he had worked hard day before.

[35] **Rest. Position. Motion.** Rest: improves aching in back.
Wants to lie down and close eyes.
Lying down: shooting and aching in head <; ciliary neuralgia >; uterine troubles >; jerking commences.

Digitized by Google

Must lie quietly on back: in chest pains.
Rising from bed: dizzy.
Stooping: head swims.
Bending double: colic >; menstrual troubles >.
Must change position: to quiet jerking, in bed.
Walking: aggravates soreness, aching and stiffness of tendo-achillis.
After walking in open air: headache relieved.
Can scarcely walk: from trembling of legs.
Must walk about; when restless and impatient.
Desire to move about: when restless.
Exertion: sighing, difficult respiration.
Motion: increases pain in head and eyeballs; causes palpitation; increases pain in r. side of chest; dull aching in back <.
Going up-stairs: aggravates feeling as if top of head would fly off; pain in eyes <.
Moving head: causes opening and shutting sensation head; produces cramps in muscles of neck.
Moving eyes: causes opening and shutting sensation of head.
Moving eyelids; aggravates pain through l. eye.
Moving hands: increases pains of stiff neck.
When writing: fingers tremble.
Clutches at breast: in puerperal mania.

[36] **Nerves.** ‖Nervous shuddering through upper and back part of body.
‖Twitching of fingers and toes.
‖Trembling of legs, scarcely able to walk.
Great debility between menses.
‖Irregular motion of limbs, < l.; legs unsteady. θChorea.
‖Alternate tonic and clonic spasms. θSpotted fever.
‖Epilepsy, periodical convulsions, with uterine diseases.
‖Hysteric spasms.
‖Restless forenoon: desire to move about, not knowing where to go or what to do.
‖Nervous uneasiness during afternoon, so uneasy can scarcely fix his attention on any subject.
‖Paralytic affections.
‖Limbs cold, twitching, subsultus. θPuerperal fever.

[37] **Sleep.** ‖Comatose state.
‖Sleeeplessness: with excited brain. θAfter nursing the sick. θDuring pregnancy. θDelirium tremens.
‖Cannot sleep, because she feels numb all over. θAfter an abortion.
Sleepy, but cannot sleep because of pain through l. eye on closing lid.

Digitized by Google

Awakens 11 P.M. as in a fright.
‖Unpleasant dreams of being in trouble or in a sad plight.
‖After going to bed jerking commences on side on which he is lying, must change position.

[38] **Time.** Night: ciliary neuralgia<; facial neuralgia >; sore throat awakens; cough constant; sweats; fever with clammy sweat.
Morning: dizzy; pains in eyeballs <; diarrhœa in teething children; pulse feeble; joints feel stiff.
2 A.M.: violent headache.
Forenoon: restless.
10 A.M.: dull boring in forehead, chilliness, heat, languor.
11 A.M. to noon: chilliness.
Day: mucous discharge in coryza; facial neuralgia <.
Afternoon: headache; ciliary neuralgia; uneasy, nervous.
5 P.M.: chill, heat and sweat.
Towards evening: pains in arms <; pain in region of tendo-achillis <.
Evening: headache; coryza dry; hoarseness <.
9 P.M.: headache disappears after a walk in open air.
11 P.M.: awakes as if frightened.

[39] **Temperature and Weather.** Cold air: seems to penetrate the system; aching pains in head and eyes sensitive to it; larynx sensitive to it; from exposure congestion to the chest; causes stiff neck; when suffering with flushes of heat wants to be in cold air.
Open air: relieves headache.
In-doors: headache, mostly occipital.

[40] **Fever.** Chilliness down back, from 11 to 12 M., with pain under l. scapula.
‖Chilly before and during discharge. θDysmenorrhœa.
Chillines, then heat; languid, stretches her limbs, 10 A.M.
Feet and hands cold, then hot.
Chill, heat, sweat, alternating with dry skin, 5 P.M.
Chills, cold tremors from back; hot flushes, then slight sweat on abdomen.
Night-sweats, diarrhœa. θTuberculosis of lungs.
Sweat smells offensive.
‖Skin cold and moist. θDelirium tremens.
Fever during night with clammy sweat, pulse 150 and small, with great prostration. θPuerperal fever.

[41] **Attacks.** Periodical: attacks of colic; epileptic convulsions.
Pains come on suddenly.
Headache at intervals.
Headache every day at same hour.
Tendency to abort at third month.
Alternate: diarrhœa and constipation; tonic and clonic spasms.

Digitized by Google

42 **Locality and Direction.** Right: pains in head and back of orbit; ciliary neuralgia; pain in spermatic cord; pain in chest; aching in great toe.

Left: dull boring over brow, aching and shooting in temple, eye and ear; pain in temple; inframammary pains; pain in chest; arm numb and seems bound to the side; irregular motions of arm; aching down leg; pain under scapula, with chill.

Side to side: darting pains in uterine region; pains in chest.

Behind forward, diagonally: shooting pains through head.

Below upward: shooting pains through head, ovarian pains; aching and burning, beginning in r. toe; pains from limbs to bowels, causing diarrhœa.

Above downward: shooting from occiput along neck; sharp pains in lung; pain from heart; pain in arms; chilliness in back.

Within outward: pressure of brain; pressure of eyeballs.

Without inward: sharp pains with keratitis.

43 **Sensations.** Like electric shocks here and there.

Feels faint at epigastrium when meeting a friend; head feels too large and heavy; as if a heavy black cloud had settled over her; brain feels too large for cranium; opening and shutting sensation when moving head and eyes; as if temples were compressed; head as if pounded; as if top of head would fly off; as if a ball had been driven from neck to vertex; as if vertex opened and let in cold air; as if eyes were enlarged and would be pressed out of head; as if needles were run into eyeball through cornea; bearing down in uterine region and small of back; head feels strange, puerperal mania; l. arm numb as if bound to side; numbness in arms as if a nerve had been compressed; like growing pains through legs; uneasy feeling in limbs; stiff joints as after hard work; nervous shuddering.

Sharp, lancinating pains in various parts, associated with ovarian or uterine irritation.

Whole body, especially arms, feels numb.

General bruised feeling as if sore.

Pricking all over.

Pain: over eyes; in head and eyeballs; in r. side of head back of orbit; in back and limbs; in centre of eyeballs; over eyes extending to occiput; through chest; under l. scapula; region of kidneys; in bowels; small of back and limbs; in testicles; in r. spermatic cord; in lower abdomen; from heart all over chest and down l. arm; in back, down thighs, through hips; down arms; in muscles; in ileo-sacral symphysis; in sacrum; in limbs.

Digitized by Google

Aching pains: in head; eye and ear; in occiput; in eyes; in small of back; in sacrum; down l. leg; in region of tendo-achillis.
Sharp pains: through eye into head; across hypogastrium; from apex to base of r. lung.
Excruciating pain: in forehead, eyeballs and temples; in bowels; in arms.
Shooting: in head; in eye and ear; down back of neck; from occiput through to eyes; from ovaries up to side.
Stitching pains: in muscles.
Darting: from eyes to top of head; into l. eye; in stomach; from side to side in uterus.
Dull boring: in forehead.
Dull aching burning; in second joint of r. great toe.
Weak trembling pain: in small of back.
Pulsating pain: in lumbar region.
Burning: in mammæ.
Soreness: of abdominal muscles; of muscles of spine; in region of tendo-achillis; of all muscles.
Dull pain: in occiput.
Dull, heavy aching: in small of back.
Rheumatic pains: in neck and back; in joints.
Scraping: in larynx.
Bruised feeling: in heels.
Pressing: in region of kidneys; around hips.
Waving sensation: in brain.
Throbbing: in head.
Fulness: in head; from flatulence.
Sinking or goneness: in epigastrium.
Dull feeling: in vertex; in head as after a "spree."
Dull dragging: in uterine region.
Cramp: in muscles of neck; in muscles.
Heaviness: in head; of eyes; in uterus; of limbs; over heart; in lumbar and sacral regions.
Tickling: in throat.
Heat: in head; in mouth and tongue; of urine; of whole surface.
Dryness: of mouth and tongue; spot in throat; in pharynx.
Numbness: of l. arm; all over, preventing sleep.

" **Tissues.** ‖Affects nerves, especially of muscles. θMyalgia.
‖Serous membranes.
‖Chorea from rheumatic irritation.

" **Touch. Passive Motion.** ‖Surface sensitive.
Pressure: relieves dull frontal headache; desires it during vomiting; aggravates tenderness over uterine region.
Must press with hand: during pain in r. side of chest.

" **Skin.** Eruption of white pustules over face and neck; sometimes large, red, papular.

Digitized by Google

Prickling, itching, heat of whole surface.

[47] **Stages of Life, Constitution.** Climacteric years.
‖Nervousness from anxiety or overexertion.
‖‖Rheumatic persons.
Children, teething; diarrhœa.

[48] **Relationship.** Side relations, *Act. spic.* and other Ranunculaceæ.
‖*Acon.* relieves sleeplessness.
Act. spic., *Bryon.* and *Pulsat.*, similar in rheumatism.
Baptis. relieved headache and nausea.
‖‖*Cauloph.* similar in uterine and rheumatic affections.
Compare: *Pulsat.*, *Sepia*, *Nat. mur.*, *Lil. tig.*, and *Ignat.*

ACTEA SPICATA.

Baneberry. *Ranunculaceæ.*

Grows in the woods of Europe and Asia, as does the racemosa in North America. Proved by Petroz and Lemercier in France, and Macfarlan of Philadelphia.

[1] **Mind.** Weakness of memory, incapacity to recollect.
Occasional absence of mind.
Judgment perplexed; bewildering fits, almost to insanity.
Self-deception; self-satisfaction.
Furious delirium; also during fever.
Great desire to work, though incapable of it.
Inclined to debauchery.
Indisposed to close thinking.
Mental enjoyment while exercising.
Sad, lamenting and sighing.
Melancholy; dejection with inclination to weep.
Hopelessness; constant apprehension; anxious solicitude when quiet.
Anxiety with urging in heart. See 29.
Fear of death, especially at night in bed.
Distaste of life.
Desperation about success of every, even most trifling undertaking.
Irresolution, inconstancy and caprice.
Obstinacy and anger.
‖‖Impatient and restless. θRheumatism.
Mental exhaustion. See 40.
Worse from fright; from mental anxiety.

Digitized by Google

[2] **Sensorium.** Loss of consciousness.
A kind of drunkenness.
Giddiness and reeling in open air.
Vertigo with darkness before eyes.
Dizziness; forehead fells empty when stooping.
[3] **Inner Head.** Twitching in temples; ‖pain from a decayed tooth to temples.
Pressure in vertex.
Hammering pain in occiput.
Boring pain in head.
Pressure in forehead after having been in sun.
Head symptoms < at night, from walking; return periodically; also after fever.
Tearing and dulness in forehead.
Racking in vertex, extending to eyebrows, causing despair.
[4] **Outer Head.** Pain seemingly in periosteum, and even in bones.
‖Warm sweat on head.
‖Small pimples on scalp.
[5] **Sight and Eyes.** Objects seemed colored blue.
Spots before eyes when looking steadily.
Catarrhal inflammation of eyes.
Sharp pain through eye into head.
Flow of burning tears.
[6] **Hearing and Ears.** Murmuring in ears after sleeping; < from mental anxiety.
Twitching pain in ears when blowing nose or sneezing.
[7] **Nose.** Nosebleed during oppression of chest.
Nostrils red.
Nasal mucus blood-tinged; bruised pain in nose.
[8] **Face.** Face sensitive.
‖Pain as if rheumatism in face; pulling, tearing from a decayed tooth to temples; < from slightest touch or movement of muscles.
The cheek he lies on sweats.
[9] **Lower Part of Face.** Yellow around mouth.
Lips chapped.
Submaxillary glands hurt during mastication.
[10] **Teeth.** Pulling, tearing from a decayed tooth to temples.
[12] **Inner Mouth.** Increased saliva.
Fetid odor from mouth.
[13] **Throat.** Throat becomes sore when speaking.
Tearing pains in throat, especially when breathing cold air.
[14] **Appetite.** Hunger, with aversion to food.
More appetite in morning.
‖Disgust for food. θRheumatism.

Google

[15] **Eating and Drinking.** Worse from salt meat; beer; smoking tobacco.
After a meal: uneasiness; lassitude.
After drinking, shuddering.
[16] **Belching, Nausea and Vomiting.** Belching during chill.
Nausea; vomituritio, with dizziness.
Sour vomiting. θCancer of stomach.
[17] **Scrobiculum and Stomach.** Painful pressure in pit of stomach.
Drawing in epigastrium.
‖Tearing, darting pain in epigastric region, with vomiting. θCancer.
Cramp in stomach.
[18] **Hypochondria.** ‖Beating, throbbing in hypochondria. θHepatitis.
‖Pressure in region of liver hurts. θHepatitis.
Region of spleen insensible.
[19] **Abdomen.** Spasmodic contraction of bowels.
Uneasiness; as before diarrhœa.
Abdomen sensitive.
[20] **Stool.** Copious emission of wind; no stool; constipation from lack of bile.
[21] **Urinary Organs.** Throbbing in region of kidneys.
Renal calculi.
Frequent urging; pains in passing urine.
White sediment.
‖Urine deposit a brick-dust sediment. θRheumatism.
[23] **Female Sexual Organs.** Menses suppressed by fright.
‖Menses suppressed from cold. θPleurisy.
[26] **Respiration.** Too weak to breathe; obvious mostly during expiration.
Nosebleed, with oppression of chest.
Difficult inhalation; stitches in epigastrium during deep breathing or a painful shock, or pain in hip.
[29] **Heart and Pulse.** Urging sensation in heart towards abdomen and region of liver, with great anxiety at night.
‖Pulse, 120. θFever. θRheumatism.
[31] **Back.** Bruised pain in sacral region, lying on side.
[32] **Upper Limbs.** ‖Lameness in right arm.
‖‖Right wrist pains intolerably, is swollen; motion impossible; slightest pressure on palm of hand near little finger causes him to cry out. θRheumatism.
‖Pain as from paralytic weakness of hands.
Fingers numb, cold, discolored.
[33] **Lower Limbs.** Boring pains, better from stretching.
Thighs tremble when raised.
Knees weary.

Digitized by Google

Legs weak after changes of temperature.

[34] **Limbs in General.** ‖Swelling of joints after slight fatigue.
‖Rheumatism of small joints, especially of those of hands.
‖Small joints swell after walking.

[35] **Rest. Position. Motion.** After slight fatigue: joints swell.
Lying on side: bruised pain in sacral region.
Motion: rheumatic pains of face <; impossible in r. wrist.
Exertion: causes cold sweat.
Walking: small joints swell; debility.
Raising thighs: they tremble.
Stretching: relieves boring.
Blowing nose or sneezing: twitching pain in ears.

[36] **Strength.** Sudden lassitude.
Debility from walking in open air.
‖Weakness and tingling.

[38] **Time.** Night: headache worse.
Morning: appetite better.

[39] **Temperature and Weather.** Change of temperature: legs weak afterwards.
Sun: pressure in forehead from being in it.
Open air: debility when walking in it.
Cold air: tearing pains in throat when breathing it.

[40] **Fever.** Chill, with belching.
Shuddering, with vomiting after heat.
Delirium during fever.
After fever, headache persists.
Sweat: viscid; cold after slightest exertion of mind or body in nervous people.
‖‖Suppressed sweat. θRheumatism.

[41] **Attacks.** Periodical: headache and other symptoms.

[42] **Locality.** Right: lameness of arm; wrist pains and is swollen.

[43] **Sensations.** Forehead feels empty when stooping; urging sensation in heart towards abdomen and liver; pain as from paralytic weakness of hands; tingling and weakness; throbbing in whole body.
Pain: from decayed tooth to temple; in periosteum and bones; sharp, acute, rheumatic in small spots.
Stitches: in epigastrium.
Sharp pain: through eye into head.
Darting: in epigastrium.
Pressure: in vertex; in forehead; in pit of stomach.
Hammering pain: in occiput.
Boring pain: in head; in lower limbs.
Tearing pain: in forehead; from decayed tooth into temples; in throat.
Racking: in vertex.

Digitized by Google

Drawing: in epigastrium.
Twitching pain: in temples; in ears.
Cramp: in stomach.
Spasmodic contraction: of bowels.
Bruised pain: in nose; in sacral region.
Rheumatic pain: in face; in r. wrist; in small joints, especially hands.
Beating, throbbing: in hyochondria; in region of kidneys.
Dulness: in forehead.
Numbness: of fingers.

[41] **Tissues.** Affections of parenchymatous organs.
Seat of old inflammations.
Active sanguineous congestions.
‖‖Rheumatism showing itself partly in small joints; pains in wrists or finger joints, very tender to touch, excruciating, < at night.

[45] **Touch.** Touch: rheumatic pains of face worse.
Pressure: causes pain in palm of hand.

[47] **Stages of Life, Constitution.** Especially suited to men (*Act. rac.* to women).
Weak, nervous; cold sweat.
‖Rheumatic diathesis.

[48] **Relationship.** Answers well after *Nux vom.*
Collateral relations: *Act rac.* and other Ranunculaceæ.
Discrete relations; *Arnic.; Bryon.; Cauloph.* (rheumatism of fingers); *Lycop.; Rhus tox.; Sal. ac.* and *Sticta* (small joints).

ÆSCULUS GLABRA.

Ohio Buckeye. *Sapindaceæ.*

A beautiful tree growing in the bottom lands of the Ohio river. The tincture is to be made of the whole fruit; the bark may differ. Symptoms mostly toxic; provings commenced only by Hale.

[2] **Sensorium.** Confusion of mind, with vertigo, often followed by stupefaction and coma.
Vertigo with staggering, reeling, unconsciousness.
Vertigo with full, heavy head, dim sight, thick speech, nausea and vomiting.
[3] **Inner Head.** ‖Fulness and heaviness in head without pain, with vertigo and faintness towards evening.
: According to the wry neck, the vertigo, sensation of fulness and heaviness of head, stupor, great weakness and trembling of limbs, it may be used in meningitis.
[5] **Sight and Eyes.** Sight dim or lost.
Eyes fixed and dead.
Eyes expressionless.
[11] **Speech. Tongue.** Speech thick, and tongue as if lame.
[16] **Nausea and Vomiting.** Nausea, with loathing of food and vomiting.
[17] **Stomach.** Cramplike pain.
Sensation of fulness.
[19] **Abdomen.** Distension (with cattle).
[20] **Rectum and Stool.** Hard, knotty stools.
‖Constipation.
‖Very painful, dark purple hemorrhoidal tumors, with lame back and lower limbs.
It is popular to carry the fruit in the breeches-pocket, as a preventive of piles.
[31] **Neck. Back.** Wry neck (cattle).
Great lameness and weakness of back.
[35] **Lower Limbs.** Trembling of lower limbs.
Hind limbs lame; falling (cattle).
A strong tendency to contraction of legs.
[36] **Nerves.** Spasms and convulsions, followed by lameness (cattle).
Great weakness.
[37] **Sleep.** Stuper and confusion, followed by coma.
[38] **Time.** Towards evening: vertigo and faintness.
[40] **Fever.** ‖Some typhoid symptoms.

Digitized by Google

[43] **Sensations.** Pain: in hemorrhoids.
Cramplike pain: in stomach.
Fulness and heaviness: in head; in stomach.
Relationship. Collateral relations: *Æsc. hipp.*
Discrete relations: *Aloes; Colinsonia; Ignat.; Nux vom.*

ÆSCULUS HIPPOCASTANUM.

Horse Chestnut. *Sapindaceæ.*

Brought from the East, and extensively cultivated as an ornamental tree. Both fruit *and* capsule should be used.
Proved by Helbig, in 1844; by Buchman, in 1859, and later by C. W. Boyce, Cooley, Duncan, Warren, H. M. Paine, W. H. Burt, C. H. Lee and J. C. Raymond, to which we add a very good proving by Neville, from a Thesis in 1864 to 1865.

[1] **Mind.** Mind clear; anterior lobes feel light; posterior dull, heavy.
On awaking knows not where she is nor whence came the objects around her.
Unable to fix his attention.
Disinclination to perform any labor.
Inward cheerfulness and placidity of temper.
Feeling of sadness, lasting all day.
Depressed, low-spirited.
Feels dull, gloomy and despondent.
Very irritable all day, and restless during forepart of night.
Extremely irritable; loses temper easily, and gains control over it but slowly.
Feels miserably cross.

[2] **Sensorium.** Confused feeling in head, with giddiness; slight while sitting, worse when rising from a seat, afternoon.
Vertigo with a sensation as if he had to balance the head; very annoying all afternoon.

[3] **Inner Head.** Dull pain in r. temple and occiput, followed by dull stitches in forehead and l. temple.
Feeling as if a board was on head; < rising from a seat.
Neuralgic pains in different parts of head, temples, occiput and frontal region, coming and going.
Severe lancinating headache at base of brain, as if too full; tympany; tongue white.

Digitized by Google

Dull heavy pain deep in brain.

‖ Headache all over as if it would burst. θFever.

A sensation of fulness and pressure, rather than of acute pain.

Sensation of fulness in head, beating of temporal arteries, and pain extending through head from one temporal region to other; < by stooping, laughing and study.

Congestion to head with beating of temporal arteries, lasting half an hour, and accompanied by a dull pain on top of head.

Heaviness, with dull stupefying pain in head.

Heaviness in forehead, with aching in back part of head.

Fulness in forehead with dull heavy pain.

Aching in forehead; sometimes over l., sometimes over r. eye; also r. temple.

Dull pain over r. eye; eyes heavy; after sleep.

‖ Dull pressure in forehead with slight nausea in stomach, followed at once by stitches in r. hypochondrium.

‖ Dull frontal headache, from r. to l., with constrictive feeling of skin of forehead, followed by flying pains in epigastrium.

Shooting pain in forehead.

Neuralgic pains in r. supraorbital region.

Severe frontal headache; back aches and is weak.

Pressing in l. temple, followed by same sensation in right.

Beating in r. temple.

Frequent flying pains through temples and forehead; throat constricted.

Dull heavy pain extending through top of head.

Neuralgic pains in l. side of head.

Very severe pain in r. side of head above temple.

Dull aching pain in l. side of head.

Dull pain in r. side of head, followed by same sensation in l. side, continuing about an hour.

‖ Dull pain in occiput, with flushes of heat over occiput, neck and shoulders, and lame feeling in small of back. θProlapsus uteri.

Heavy feeling in back of head.

Dull aching sensation in back part of head, afterwards extending to forehead, much < by stooping.

Dull pain in occiput; a bruised feeling with heat, extending to ears.

Burning pain in back part of head.

Headache with dull pain and stitches, chiefly in forehead, temple and occiput; accompanied by confusion and vertigo, with sensation of fulness and pressure rather than other pain.

Sensations in head, accompanied by beating of arteries all over body and accelerated pulse.

Digitized by Google

Sick-headache; feeling of fulness in forehead, with sickness of stomach in evening.
Neuralgic darting from r. to l. across forehead; followed by flying pains in epigastrium.
Stitches in r. side of head, r. breast and anterior part of r. thigh simultaneously.
Sensation of fulness in upper part of head, with stiffness of neck and spine.
Dull aching sensation in forehead, with beating in temples, flashes of heat and accelerated pulse.
Dull heavy pains in forehead, and pains in back, loins, l. shoulder and elbow, as if from exertion.
Headache with drowsiness; too weak to walk.

[4] **Outer Head.** Shooting in l. parietal bone, later in right.
Pains in vertex, with a very annoying sensation, as though a number of pin-points were inserted in skin.
Hyperæsthesia of scalp.
Soreness of side of scalp rested on (r).
Formication in front of temple.

[5] **Sight and Eyes.** Flickering before eyes.
Pupils dilated; contract slowly.
‖Can read well at a distance, can now read without spectacles.
Eyes feel heavy and hot.
Burning and stinging deep in l. orbit, as if pain surrounded ball.
Painful aching over l. eye.
‖Weight in eyes, they feel heavy and dull.
Twitching: of lids; of muscles under l. eye.
Eyes filled with tears.
Balls feel sore, dull aching in them.
‖Sharp shooting in l. eyeball, sometimes through l. ear.
Dull pain over the eyes; shooting over left.

[6] **Hearing and Ears.** ‖Ringing in r. ear.
Shooting pain in l. ear and eye, later in r. ear.
Burning in ears: pressure.
Fulness: in ears.

[7] **Smell and Nose.** ‖Dryness of posterior nares and throat, with sneezing, followed by severe coryza.
Fluent coryza, dull frontal headache, thin watery discharge; burning, rawness; sensitive to inhaled air.
Pain in r. nasal bone; soreness in left.
Sneezing.
‖Stinging and burning in posterior nares and soft palate.
Formication on nose.

[8] **Face.** Stitches in l. malar bone.
‖Pale, miserable appearance.
Ill-looking countenance.

Digitized by Google

Flying heat and redness of l. side of face.
After rubbing face it flushes.
Rubbing after washing causes red spots.
Face swells enormously after washing in water.

[9] **Lower Part of Face.** Severe neuralgic pains from upper lip, extending around to r. side of head; all forenoon.
Severe pains in r. mastoid region.
Lips hot.

[10] **Teeth.** Shooting in lower molar teeth, later in r. only.
Ache in middle lower molar, < by warm drinks and pressing teeth together, > by holding cold water in mouth.
Teeth feel as if covered with oil.

[11] **Taste, Speech, Tongue.** Taste: bitter, afterwards sweetish; sweet with ropy mucus; oily or coppery, with salivation; metallic.
Cannot control tongue so as to form words rightly.
‖Tongue furred. θHemorrhoids.
Tongue coated white or yellow; feels scalded.
Tip of tongue sore, as if ulcerated.

[12] **Inner Mouth.** Thick yellow phlegm in mouth, and on tongue.
Mouth dry, as if excoriated and constricted.
Increased flow of saliva, with oily taste.

[13] **Palate, Fauces and Throat.** Stinging and burning in soft palate.
▮Pricking, formication, burning and stinging in fauces; shooting in l. side.
Feeling as if something had lodged in fauces, causing constant inclination to swallow.
Throat feels dry and stiff when swallowing.
Dry feeling, or a constrictive sensation, with desire to swallow.
Tonsils swollen, fiery red; neck swollen and stiff.
Tonsils dark, congested, with an aching distress.
▮Violent burning in throat, with raw feeling.
Frequent neuralgic pains in fauces.
Constricted sensation in fauces, tongue feels as if scalded.
Hawks up ropy mucus, of a sweetish taste.
Tonsils dark and congested, swollen; l. worse; inclination to swallow, with dull aching pain, burning like fire.
▮Feeling of dryness and roughness of throat as from taking cold.
▮Frequent inclination to swallow, with dry constricted fauces, burning.
‖Throat and œsophagus constricted, scraped, causes hawking.
▮Dark congested state of fauces, with a full feeling and irritation. θChronic angina.

Digitized by Google

[14] **Appetite and Thirst.** ▮Loss of appetite. θHemorrhoids. ▮Considerable thirst.

[15] **Eating and Drinking.** Burning in pit of stomach and feeling as if about to vomit, is removed by eating dinner.
Stomach feels dull, as if walls were thickened, after eating; a distended feeling the only sign which tells him to stop.
Pain in stomach, continuing until he eats again.
Regurgitation of food an hour after eating.

[16] **Belching, Nausea and Vomiting.** Eructations: sour; greasy; bitter; frequent; empty; ▮▮taste of food, with nausea.
▮Nausea. θHemorrhoids.
Nausea with increase of saliva and slight burning in stomach.
▮▮Nausea most after eating or in afternoon.
▮Nausea with heavy pressure in epigastric region.
Sickness with heaviness in base of brain from forehead to occiput.
▮▮Desire to vomit.
▮Violent retching and vomiting, with burning in stomach.
▮Heartburn and gulping up all food after eating; can hardly eat anything.

[17] **Scrobiculum and Stomach.** ▮▮Pressure as from a stone in pit of stomach.
Periodical tightness in scrobiculum, with labored breathing.
At the epigastrium: ▮▮fulness; ▮burning distress, aching; ▮pressure as from a stone; flying pains after headache.
Sinking at pit of stomach, emptiness with gnawing.
Gnawing and emptiness in stomach early mornings.
Fluttering, with faintness in stomach.
▮Constant distress and burning in stomach, inclination to vomit.
Aching, cutting, burning distress in stomach.
Sharp pain in region of stomach and apex of heart.
Pain in stomach and rumbling in abdomen.
▮Violent burning in stomach, bowels and liver, with distress, nausea and violent vomiting.

[18] **Hypochondria.** Dull aching in r. hypochondriac region.
▮Constant, severe aching, from pit of stomach to lower lobe of liver.
Tenderness in r. hypochondrium.
Pinching pain in r. hypochondrium, with colic; pain through to back on inspiring.
Stitches in hypochondria following headache.
Stitches, pinching and aching in liver, extending between shoulders.
▮Tenderness in r. hypochondriac region; ▮full feeling.

Digitized by Google

‖Constant dull aching distress in r. lower lobe of liver and region of gall bladder; ▮much distress in liver and epigastrium.
▮Constant aching pain from pit of stomach to r. lobe of liver.
▮Congestion of liver and portal system.
Fine stitching in l. hypochondrium, < moving and laughing.
Pain in region of spleen.

[19] **Addomen and Groins.** Burning distress, soreness and aching at navel.
‖Abdomen tender to touch.
Rumbling in bowels, with cutting about navel, with distension and bearing down.
▮Flatulent pains in bowels. θHemorrhoids.
Rumbling noise and abdominal pain extending downward, evenings.
At navel: pain, soreness and aching; pricking; great distress with urging to stool; colicky pains after hard stool.
▮Sensation of fulness in abdomen. θHemorrhoids.
Stitches in l. side below ribs.
Sensation of soreness in lumbar region.
Deep-seated shooting in r. side just above hip; tearing above r. hip.
Flying pains in bowels.
Cramp pain, cutting in bowels before stool.
Cramplike contraction of bowels.
Colicky pains in bowels, with severe cutting in rectum.
▮Throbbing in abdomen. θPortal congestion.
▮Hemorrhoidal colic.
▮Throbbing in pelvic cavity and hypogastrium. θProlapsus uteri.
▮Pain in hypogastric region. θProlapsus uteri.
Cutting in r. inguinal region.
Severe neuralgic pain in r. inguinal region.
▮Inguinal hernia.

[20] **Rectum and Stool.** ▮▮Rectum: feels full; ▮▮dryness and itching. θHemorrhoids.
▮▮Rectum feels as if full of small sticks.
Dryness, heat and constriction of rectum.
‖Mucous lining feels thickened, obstructing defecation.
Dryness and itching in rectum, with a feeling of stiffness of skin and adjacent cellular tissues.
Sensation in rectum as though a bug was creeping out.
Feeling in rectum as though folds of mucous membrane obstructed passage, and as if, were effort continued, rectum would protrude.

Digitized by Google

Prolapsus of rectum.
Soreness of rectum: with a feeling as if something would pass off all the time; aching and fulness; with increased secretion of mucus.
‖‖Rectum sore, with burning and itching.
‖Considerable pain, aching, swelling and rigid hardness of rectum, commencing an hour after stool, continuing from two to six hours. θHemorrhoids.
Pressure in rectum, with constant desire but ineffectual efforts to stool.
‖Urging to stool, often ineffectual; rectum seems swollen.
Passes fetid flatus.
Much flatus passed in evening.
Stool softer than natural.
Stools loose, preceded by griping.
Frequent loose stools, with constant urging; composed of ingesta.
‖Light-colored soft stool. θProlapsus uteri.
Stools mushy, light brown.
Copious, soft stool, followed by burning, and a feeling of swelling and constriction of rectum.
Diarrhœa; desire to have bowels evacuated coming on suddenly, preceded by passage of flatus and followed by pain in abdomen and eructations tasting of ingesta.
Diarrhœa, evacuations yellow, thin, preceded by pain in abdomen which passed off with stool.
In afternoon, watery discharges from bowels not attended with any pain.
‖Chronic diarrhœa.
An evacuation, at first black and hard, then white and soft.
‖First part hard, black, last of about natural consistency, but white as milk, followed by tearing in anus. θLiver complaint.
‖Very dark stools. θHemorrhoids.
Stool large, dry, hard, difficult, dark.
Stool very hard and dry, with colicky pains in umbilical region, followed by severe cutting pains in rectum.
‖Stool large, hard, dry, knotted, voided with difficulty and followed by severe cutting, burning or constricting pains in anus, a portion of which seems to protrude; with dull pains in lower abdomen and ‖‖severe lumbo-sacral backache.
‖Sense of fulness and bearing down with constipation. θHemorrhoids.
‖Bowels always wanted to be relieved. θHemorrhoids.
‖‖Constipation. θHemorrhoids.
‖‖Hard dry stool passed with difficulty, with dryness of rectum and heat; no bleeding.

Digitized by Google

After stool, pain in anus intense, lasting till evening; every other day stool, inclined to bleeding. θHemorrhoids.

Stool followed by rectal fulness. θHemorrhoids.

Much pain after stool in morning, not subsiding till evening.

Intolerable burning, itching, stinging pain at anus, with feeling of fulness, which could only be relieved by rubbing or by pressure; only felt while walking.

Anus feels raw.

Pain like a knife sawing backward and forward through anus. θHemorrhoids.

Dryness of passage for several days, followed by a secretion of moisture.

Stricture of the sphincter ani.

Anus sore, it protrudes at or after stool.

Prolapsus ani after stool, with dull backache.

Fulness and itching in anus after a walk.

Rubbing induces a flow of blood to anus.

Troublesome itching of anus.

Fissure of anus.

Pain in anus commences about an hour after evacuation, and continues from two to six hours. θHemorrhoids.

Occasional attacks of hemorrhoids, attended with very little hemorrhage, although considerable pain, aching, swelling and rigid hardness of rectum; attacks usually accompany constipation.

Hemorrhoids, blind and painful, rarely bleeding.

Blind piles of ten years' standing; bleeding of twenty years.

Several large piles which seem to block up rectum, little or no bleeding, great suffering, constipation.

Sharp, shooting pains running through hemorrhoidal tumors, up to sacrum and along back.

Large protruding painful hemorrhoids. θProlapsus uteri.

Appearance of hemorrhoids, like ground-nuts, of a purple color, very painful, and with a sensation of burning.

Hemorrhoids painful, burning, purplish; generally "blind;" aching and lameness, or sharp, shooting pains up back.

Hemorrhoids severe and of long standing, patient felt as if the gut was turned inside out.

Pain worse in tumors when standing on feet or walking.

Hemorrhoids, could not sit or lie down with ease.

Pain in hemorrhoids, like a knife sawing up and down,

could not sit, stand or lie, only possible position was kneeling; slight protrusion.

‖‖Some carry nuts in their breeches-pockets as a preventive.

[21] **Urinary Organs.** Terrible pain in region of kidney, continuing about an hour and aggravated by motion.

Shooting pain in l. kidney.

Shooting pain in l. ureter, from below upward.

‖Desires to urinate often, but passes little at a time, scanty and dark yellow, with scalding in passing through urethra.

Frequent urging to urinate, with scanty, high-colored urine.

Urine: ‖dark, muddy, passed with much pain; scalding; ‖with dark-brown sediment; ‖yellow, with thick-white mucous sediment; ‖hot.

Diminished quantity of urine passed during day.

During day urine passed was deep red, with strong odor.

[22] **Male Sexual Organs.** Amorous dreams and seminal emissions.

‖‖Seminal emissions. θDisease of prostate.

Transient pains in genitals.

Testicles: feel sore, itch; drawing in left.

Drawing from r. testicle in direction of spermatic cord.

Dull and heavy shooting pain through penis.

Shooting pain in r. testicle.

[23] **Female Sexual Organs.** ‖Inflamed cervix uteri attended with retroversion, prolapsus, ulceration, enlargement and induration, when characterized by great tenderness, heat and throbbing.

‖Uterine soreness, with throbbing in hypogastrium. θHemorrhoids.

‖Old cases of leucorrhœa; discharge of a dark, yellow color, thick and sticky; < after a menstrual period, increased by walking, corrodes labia, aching in sacrum and knees.

‖‖Leucorrhœa, with lameness in back, across sacro-iliac articulations, and great fatigue from walking, because that part of back gives out in walking even but a little way.

‖Thick, dark and corroding leucorrhœa, with constant backache. θProlapsus uteri.

[24] **Pregnancy. Parturition. Lactation.** ‖During pregnancy, sacro-iliac symphysis gives out while she walks; she must sit down; feels best lying.

‖Piles troublesome during pregnancy.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarse voice.

Digitized by Google

Larynx feels dry and stiff; later mucus is secreted.
Glottis feels dry and stiff; also pharyngo-laryngeal mucous membrane.
Tickling in larynx, causing a cough, with mucous expectoration.
Throbbing, darting pain in trachea, produces titillation.
‖Catarrhal laryngitis, laryngeal cough, and perhaps coughs dependent on hepatic disorders.
Pressure in throat-pit, as if something had stuck there which required to be expelled.

[26] **Respiration.** Rapid, labored breathing.
After a full breath, lungs feel sore, with great rush of blood.
Pain on inhaling in scapula and chest.

[27] **Cough.** Cough caused by tickling in larynx.
‖Dry short cough, increased by swallowing and deep breathing.
Dry hacking cough, caused by constriction of fauces, with irritation of epiglottis.
Spits blood on getting up in morning.
‖Chronic cough, with emaciation.

[28] **Inner Chest and Lungs.** Heat in thorax and stomach.
Hot feeling in chest with cold rising, as after peppermint.
Raw feeling in chest and throat.
Stitches in l. side, 10 P.M.
Sudden stitches through chest; going from l. to r.
Crampy pains in chest, 10 to 11 A.M.
Tightness of chest.
Constant burning distress, with a constrictive feeling of lower part of chest.
Pains alternate with those in abdomen.
Lungs feel engorged, heavy.
‖‖Soreness over lungs on taking a deep breath. θRush of blood.
Sensation as if lung moved up and down painfully, on r. side, with each respiration.
Stitching pain in lower and lateral parts of r. chest, increased by breathing.
Pain in r. scapula and in l. side of chest, < on inspiration.
‖Pituitous consumption.
‖‖Chest-complaints of horses.

[29] **Heart, Pulse and Circulation.** Darting in region of heart, with fulness and palpitation.
Dull aching, burning in region of heart.
Frequent stitches and shooting, < when breathing, 4 P.M.
Twitching over region of heart, darting, with fulness and palpitation.
Neuralgic pain so severe as to arrest breath, also pain at apex, and pit of stomach.

Digitized by Google

Sharp pains about apex, in forehead and between shoulders.
A peculiar sensation from apex to l. axilla, and, at times, down arms.
Heart-beat full and rapid; jars prover while lying down.
Palpitation, heart's action full, heavy; can feel pulsation all over body.
Severe periodical palpitation, with great anguish.
Pulse: accelerated and hard, or soft and weak.
Pulse 66, soft and regular, with burning pain in heart.
‖Disturbances of heart, with hemorrhoidal complaints.

[30] **Outer Chest.** Pains in sternum, as if a piece was torn out of chest.

[31] **Neck and Back.** Neck: dull heavy pain; stiff and swollen (with tonsillitis); glands sensitive, slightly swollen.
‖Weakness, lameness and weariness in back of neck.
Aching between shoulder blades.
Continual pain in back, neck and shoulders, at times with pricking sensation and with fulness in both ears.
Drawing in muscles of r. side of neck.
Stiffness in muscles of neck.
Heat in back of neck and shoulders.
‖Spine feels weak.
‖Great lameness of back, < on walking. θProlapsus uteri.
Chilliness extending up back.
Stiffness of back when moving.
Backache is attended with aching in legs and knees.
Caused spinal diseases with sheep.
Pains attending curvature of spine.
‖‖Constant dull backache; walking almost impossible; ‖scarcely able to rise or stoop or to rise after sitting.
Dull aching sensation in lumbar region.
Weak and bruised feeling in lumbar region.
Painful weakness of loins with dull aching pain, accompanied by several tumors around anus.
Chilly sensation followed by pain in lumbar region, rendered much < by pressure.
Severe dull aching pain in the lumbar and sacral region, aggravated by walking.
‖Weakness, weariness and lameness in small of back.
Pain extends from bowels to small of back.
Sensation of lameness and soreness in small of back.
‖‖Constant backache affecting sacrum and hips, much < by walking or stooping forward.
‖Tearing in small of back and hips when walking.
‖Severe pain across back and hips, as if they would break in two. θHemorrhoids.
‖Pain, especially in hip and sacrum. θProlapsus uteri.
‖Backache in cervical, lumbar and sacral region, or sacro-iliac symphysis, < from motion.

Digitized by Google

‖Constant dull pain across hips and sacrum.
‖Dull aching in small of back, < from motion.
‖Pain and lameness in each sacro-iliac symphysis, < when walking; patient can hardly walk on account of this lameness in back, which seems to be of a rheumatic character. θLeucorrhœa. θConstipation. θHemorrhoids. θRheumatism.
‖Pain across sacro-iliac symphysis, more or less constant, with a feeling as if back would give way at that point, causing great fatigue when walking. θUterine complaints.

[52] **Upper Limbs.** ‖Rheumatic pain in r. scapula and r. side of chest; ‖< when inhaling.
Pains in scapula and chest; < during inspiration.
Strange trembling of muscles of l. shoulder, continuing two hours and followed by a sensation of soreness.
Aching in l. acromion process, with shooting down arm.
Left upper arm and shoulder feel as if one had taken violent exercise.
Shooting pain extending down arms.
Neuralgic pains in arms.
Twitches in l. arm.
Arm and hand of l. side become numb, as if paralyzed.
Right arm feels paralyzed, cannot raise it.
Hands weak, cannot control muscles well when writing.
Shooting pain in l. arm extending to wrist.
Neuralgic pain of l. arm extending down to end of index finger, followed by a tingling sensation.
Tearing pain in r. arm extending down index finger.
Pain extending to ulnar side of forearm from elbow to little finger, as if nerve had been compressed.
Drawing tearing in l. arm extending to ends of fingers.
Stinging sensation in r. arm extending to fingers.
Drawing in metacarpal bones of l. hand.
Left arm and hand much warmer, feel heavy and swollen.
Pricking, swollen feeling of hands after washing them.
‖Cracking of skin on hands.
Nails blue.

[53] **Lower Limbs.** Constant aching bruised feeling in r. hip joint, pain extending downward.
Shooting down r. thigh; soreness and lameness in r. hip joint.
Stinging on anterior part of r. thigh, just above knee.
Sensation of soreness in l. hip and knee joints.
In morning pain in r. knee and leg, as after violent exercise.
Stiffness of knee joints, particularly when rising from a seat.

Digitized by Google

▮Left knee swollen, painful and stiff; unable to bear slightest pressure.
Aching in legs and knees.
▮Legs so weak she can hardly walk; spine weak. See 31.
▮Back and legs weak: can hardly walk, must lie down.
Calves feel sore.
Neuralgic pains in r. leg extending downward.
Wandering pains in lower extremities.
Soreness of lower extremities felt most when walking.
Legs much affected, can't walk; bowels loose.
Feet swell after walking.
Tendo-achillis sore.
Tension and soreness in l. ankle.
Tension in r. ankle, also in l. knee.
Boring pain in dorsum of l. foot.
Burning pain in l. great toe.

[34] **Limbs in General.** Darting and shooting pains in upper and lower extremities; most on l. side.
Shooting pains extending down l. arm and leg.
Feeling of lameness in l. shoulder and r. ankle joint.
Joints stiff, aching and painful.
Limbs feel heavy.
Spasms of muscles of limbs.
Muscles sore, < on awaking and on motion.

[35] **Rest. Position. Motion.** ▮Could not sit nor lie down with ease; bleeding of piles gives some relief. θHemorrhoids.
▮▮Dreadful pain, could not sit, stand or lie; only possible motion was kneeling. θHemorrhoids.
Lying: back feels best in pregnancy; increases heart troubles.
Must sit down: during pregnancy when back gives out. See 24.
Stooping: back aches more.
Rising after sitting: backache <; can hardly get up.
Motion: muscles feel sore; ▮▮backache <; ▮▮soreness >.
Walking: increases leucorrhœa; causes burning in epigastrium; fulness and itching in anus; back gives out; aching tearing in back and hips; almost impossible when back aches; causes feet to swell; totters.
Writing: hands become weak.

[36] **Nerves.** Flying, neuralgic pains.
Lameness and paralytic feelings.
Feels faint, weak; weariness, faintness at stomach.
Cannot control muscles to speak or to write.
▮▮Cannot walk, feels so weak. θHeadache with drowsiness.
▮Very much weakened. θHemorrhoids.
Feels faint and weak; totters when walking.
Weariness and faintness in stomach.

Digitized by Google

Feeling of malaise.
‖‖Paralytic feeling in arms, legs and spine.
Too sore and languid to attend to business.
Feeling of extreme illness, great weakness, faintness and tottering gait.
‖A kind of tetanus after a horrible constriction in pit of stomach, she got stiff with the pain, hands blue with a pricking and stinging, lasting two hours; second attack of same kind.

[37] **Sleep.** Dreams and restless nights, with obstinate erections, but no emission.
Disposition to stretch and yawn.
Yawning and stupefying sleepiness.
Drowsy; falls asleep; on awaking, knows not where she is.
‖‖Restless all night; ‖thoughts continually crowding on mind prevent sleep.
Awakened by burning pain in stomach.
Mornings, on awaking, sore and tired.
Awaking: does not want to rise; wants to sleep again; eyes heavy, dull headache over r. eye; feels sore and is red all over, morning; muscles sore; pressing in stomach.

[38] **Time.** Morning: gnawing emptiness in stomach; feels sore all over; spitting blood.
Day: drowsy.
Afternoon: throat better; vertigo.
4 P.M.: chills.
7 to 12 P.M.: fever.
Forepart of night: restless.

[39] **Temperature and Weather.** Chilly from cold air.
Cold air: teeth chatter and skin feels chilly; riding in it makes him chilly; nose and throat sensitive when inhaling.
After washing in water: hands prick; skin, face and hands swell and redden.
Heat of stove: relieves chill.
‖‖Worse in Winter and better in Summer. θHemorrhoids.

[40] **Fever.** Chilliness: creeping up and down back; with burning in anus; better from heat of fire.
Chills: along spine; up back; cannot get warm.
Chill 4 P.M., with gooseskin, > from heat of fire; fever 7 to 12 P.M.
Chilliness, with rigor.
Feverish pulsations, with hot and dry hands.
Flashes of heat over occiput, face, neck, shoulders and body.
Skin hot and dry; evening fever; palms and soles burn; disposed to yawn and stretch; head aches as if it would burst.

Digitized by Google

Fever: 7 to 12 P.M., no thirst, bursting headache, photophobia; with profuse hot sweat; lungs feel engorged, heart beats violently.

Sweat profuse, hot, with fever.

Sweat: abdominal symptoms decline; on head and face.

‖Intermittent fevers.

[41] **Attacks, Periodicity.** Periodically: tightness in scrobiculum; palpitation and anxiety.

Alternating: pains in chest and abdomen.

[42] **Locality and Direction.** Right: dull pain over eye; stitches in hypochondrium; soreness of scalp; pain and aching in lower lobe of liver; pinching pain in hypochondrium; tenderness in hypochondrium; shooting in side above hip; neuralgia in inguinal region; lung painful; rheumatic pain in scapula; rheumatic pain in side of chest; arm feels paralyzed.

Left: stinging and burning deep in orbit; heat and redness of side of face; spleen painful; drawing in testicle; arm and hand feel warm, heavy and swollen.

Right to left: dull frontal headache; stitches in chest.

Left to right: stitches in chest; lameness of arms.

Front to back: pinching pain in r. hypochondrium.

Below upward: shooting in back; chills along spine.

Wandering pains: in legs.

[43] **Sensations.** Sensation of fulness, as from too much blood in different parts of body.

‖Sensation like hot lightning.

The whole body feels as if bruised or beaten.

Soreness: on side of scalp rested on; eyeballs; nose; stomach; hypochondrium; protruding anus; testicles; calves; tendo-achillis; muscles; all over.

As if he had to balance head, vertigo; as if a board was on head; as if too full at base of brain; as if head would burst; beating of arteries all over body, with headache; pains as from overexertion; as though pin points were inserted in skin of vertex; as if pain surrounded eyeball; as if teeth were covered with oil; as if something had lodged in fauces; aching distress in tonsils; tongue as if scalded; stomach feels full as if walls were thickened; sinking at pit of stomach; gnawing and emptiness in pit of stomach; fluttering with faintness in stomach; dull aching distress in r. lower lobe of liver and gall bladder; rectum as if full of small sticks; feeling of stiffness of skin and tissues about anus; as though a bug was creeping out of rectum; as though folds of mucous membrane obstructed rectum, as if it would protrude, as if something would pass off all the time; like a knife sawing backward and forward

Digitized by Google

through anus; as if something had got stuck in throat-pit; as if r. lung moved up and down painfully; cold rising in chest as after peppermint; in chest as if lungs were engorged; in region of heart; in l. great toe; a peculiar sensation from apex of heart to axilla; can feel pulsation all over body; as if a piece was torn out of sternum; as if back and hips would break in two; as if back would give at sacro-iliac symphysis; as after violent exercise in l. upper arm, shoulder, r. knee and leg; as if ulnar nerve had been compressed.

Terrible pain: in region of l. kidney.

Tearing pain: above r. hip; in small of back and hips; down arms and fingers.

Neuralgic pains: in head; in r. supraorbital region; in l. side of head; from upper lip to r. side of head; in fauces; in r. inguinal region; about heart; in arms; in r. leg downward.

Lancinating: in head, at base of brain.

Cutting: in stomach; about navel; in rectum; in r. inguinal region; in rectum.

Stitches: in r. hypochondrium; in forehead, temples and occiput; in r. side of head; in r. breast; in r. thigh; in l. malar bone; in hypochondria; in liver; in l. side below ribs; sudden through chest from l. to r.; in lower r. chest; in region of heart.

Stinging: deep in l. orbit; in posterior nares; in soft palate; at anus; in r. arm; on anterior part of r. thigh above knee; in hands.

Burning: in back part of head; deep in l. orbit; in ears; in nose; coryza; in posterior nares and soft palate; in fauces; in throat; in tonsils; in pit of stomach; in stomach, bowels and liver; at navel; in rectum; in anus; in hemorrhoids.

Scalding: in urethra.

Pricking: in fauces; in back, neck and shoulders; in hands.

Shooting pain: in forehead; in parietal bones; in l. eyeball; over l. eye; in ears; in lower molars; above r. hip; through hemorrhoidal tumors; up sacrum; along back; in l. kidney and ureter; through penis; in r. testicle; in region of heart; down arms; down r. thigh: down l. arm and leg.

Darting: in larynx; in region of heart.

Boring: in dorsum of l. foot.

Flying pains: through temples and forehead; in epigastrium; in bowels.

Bruising feeling: in occiput; in lumbar region; in r. hip joint.

Digitized by Google

Aching: in occiput; in forehead; over eyes; in r. temple; in eyeballs; in lower molars; in tonsils; from pit of stomach to lower lobe of liver; in liver; at navel; of rectum; in hemorrhoids; in sacrum; in legs and knees; in region of heart; between shoulder blades; in lumbar region; in l. acromion process; in r. hip joint; in legs and knees; of joints.

Soreness: in l. nasal bone; of tip of tongue; at navel; in lumbar region; of rectum; at anus; in testicles; over lungs; in l. shoulder, after trembling; in r. hip joint; in l. knee and hip joint; of tendo-achillis; in l. ankle; of muscles; all over.

Rawness: in nose, coryza; in throat; of anus; in chest and throat.

Dull pressure: in forehead.

Pinching: in r. hypochondrium; in liver.

Dull stitches: in forehead and l. temple.

Pain: in r. nasal bone; in r. mastoid region; in region of spleen; in hypogastric region; in r. scapula and l. side of chest; at apex of heart; at pit of stomach; in sternum; in back, neck and shoulders; in spinal curvature; in hip and sacrum.

Dull pain: in r. temple and occiput; deep in brain; in vertex; in forehead over orbits; over r. eye; in l. side of head; in r. hypochondriac region.

Fulness: in head; in forehead; in vertex; in ears; in fauces; in r. hypochondriac region; in abdomen; in rectum; at anus.

Swollen feeling: in rectum; in l. arm; of hands.

Heaviness: in forehead; of eyes; in occiput; from forehead to occiput; in l. arm; in limbs.

Rheumatic pain: in lungs; in r. scapula and r. side of chest.

Twitching: over region of heart.

Drawing: in l. testicle; in muscles of r. side of neck; in metacarpal bones of l. hand.

Dull heavy pain: in neck.

Pressure: in temples; ears; bones of face; epigastric region; in stomach; in rectum; in throat-pit.

Tightness: of chest.

Tension: in ankles.

Constricted feeling: of skin of forehead; in throat; of mouth; in fauces; in œsophagus; in scrobiculum; in stomach; of rectum; in anus; in lower chest.

Cramp pain: in bowels; in chest.

Beating: in temples.

Throbbing: in abdomen; in pelvic cavity and hypogastrium; in trachea.

Digitized by Google

Lame feeling: in small of back; in neck; in sacro-iliac symphysis; in r. hip joint; in l. shoulder and r. ankle.
Paralytic feeling: in arms, legs and spine.
Weariness: in neck; in back; in stomach.
Stiffness: in larynx and glottis; of neck; of back; of knee joints; of joints.
Formication: in front of temple; on nose; in fauces.
Tingling: in l. arm and index finger.
Tickling: in larynx.
Heat: of eyes; of l. side of face; of lips; in stomach; in rectum; in thorax; in back of neck and shoulders.
Chilliness: up back; in lumbar region; with gooseskin.
Dryness: of posterior nares and throat; of mouth; in rectum; of larynx.
Itching: in rectum; at anus; of testicles.

[44] **Tissues.** ‖Fulness in various parts, as if they contained an undue amount of blood.
Venous congestion, especially portal and hemorrhoidal.
Sore muscles, mornings on awaking and on motion.
‖Mucous membranes dry, swollen; burn and feel raw.
‖Glandular swellings of bone.
Joints weak; lumbo-sacral region aches.

[45] **Touch. Passive Motion. Injuries.** Touch: abdomen tender; glands sensitive; side of head he has been lying on feels sore.
Rubbing: causes face to flush; produces red spots on hands after washing; induces a flow of blood to anus.

[46] **Skin.** Formication: scalp, nose, fauces.
Itching of body, especially about waist.
After washing: red spots on face.

[47] **Stages of Life, Constitution.** ‖Bilious temperament. θAnal troubles.
‖Climacteric years. θPiles.
Suitable for persons with hemorrhoidal tendencies who suffer with gastric, bilious or catarrhal troubles.

[48] **Relationship.** Collateral relation: *Aesc. glab.*
Similar to: *Aloes*, *Collinsonia*, *Mercur.*, *Nux vom.*, *Podoph.*, *Sulphur* (weak spine).
Nux vom. antidotes symptoms of piles.
Found useful after *Collinsonia* had improved piles.
Useful after *Nux vom.* and *Sulphur* had failed in piles.

Digitized by Google

ÆTHUSA CYNAPIUM

Fool's Parsley. *Umbelliferæ.*

Apt to be mistaken for parsley; a narcotico-acrid poison on account of an adherent alkaloid substance called *cynapine*. The plant mentioned by Hahnemann in the Organon. Proved 1828 by Nenning, later by Hartlaub, Sr.; edited with the toxic symptoms, *Annalen*, 4, 113, 1833. Observations on a patient by Bigler, 1872. Brugman's and Touman's valuable observations, *A. H. Z.*, 72, 56, and Catell's in *Br. Q.*, 11, 523, from *Med. Times*, omitted by Allen.

[1] **Mind.** Lies unconscious, dilated pupils, staring eyes (child).
Loss of comprehension; a kind of stupefaction, as if there was a barrier between senses and external objects.
❙Unable to read after overexertion of mental faculties.
❙Incapacity to think; confused.
Cannot retain any idea.
❙❙Idiocy, in some cases alternating with furor.
Idiotic children.
❙Hallucinations.
❙Imagined she saw rats run across room.
❙Delirium: imagines he sees cats and dogs; jumps out of window; even with the chill.
After a glass of wine, mind symptoms became predominant.
Cries of anguish (in a child).
❙❙Well-disposed, serene, in forenoon; in afternoon, ill-humored, anxious and sad.
❙❙Great sadness when alone.
Anxiousness, sensation as if a heavy load was lying on chest.
Constant anxiety and weak feeling.
❙Great anxiety and restlessness; soon afterwards, violent pains in head and abdomen.
Moroseness: with heavy feeling in forehead; with heat in head.
❙Bad humor, irritability, especially in afternoon, and in open air.
Great agitation.
❙Anxiety and restlessness. θMegrim.
After social talking, all symptoms disappear.

[2] **Sensorium.** A kind of stupefaction, as if there was a barrier between his organs of sense and external objects.
Dizziness, with headache.
❙Head confused; brain feels bound up.

Digitized by Google

Dizziness; he cannot keep erect.
Vertigo: ▮with sleepiness, can't raise head; giddiness ceases and head gets hot; with palpitation.
Vertigo and weakness.
Complete insensibility; eyes staring, pupils dilated.
Stupor.

[3] **Inner Head.** Heaviness in forehead; ill humor.
Headache in whole forepart of head, as if strongly compressed, behind and above.
▮Sensation as if both sides of head were in a vise.
▮Pressing pain in forehead, as if it would split; at its height vomiting and finally diarrhœa.
▮All day throbbing pain in l. forehead, temple and side of head, > by pressure (felt as though she would like a band tightly fixed around head) and in open air, < by walking.
Stitches and pulsations in head.
Violent pain, as if brain was dashed to pieces.
▮Headache with vertigo, < walking and looking upward.
Violent headache, with thirst and nausea.
Headache ceases, with discharge of flatus downward.
▮Headache since five weeks, after checked menses.
Pains in head return periodically, are often accompanied by pale face, trembling in jaws and pains in præcordial region.
Heat rises to head; body becomes warmer; face becomes red and giddiness ceases.

[4] **Outer Head.** ▮Distressing pain in occiput, nape and down spine, > by friction with hot whiskey.
▮Inability to hold head erect or to sit up.
▮Sensation as if she was constantly pulled by the hair.

[5] **Sight and Eyes.** Looking upward increases headache with vertigo.
▮Pupils dilated, but sensitive to touch.
▮Pupils dilated, staring eyes, stupid. θCholera infantum.
Chronic photophobia.
Objects seem much larger than natural.
Vision confused, sometimes objects appear double.
Great pain in eyes; eyes inflamed and bloodshot.
▮Eyes brilliant and protruding.
▮Eyeballs turned downward. θConvulsions of children.
▮Pustules on cornea.
▮Chronic inflammation of edges of eyelids.
▮Adhesion of eyelids in morning, requiring them to be softened by a fluid to prevent pulling out lashes.
Scrofulous ophthalmia; ▮swelling of Meibomian glands.

[6] **Hearing and Ears.** Stitches in ears, especially in r.; sensation as if something hot was streaming from it.

Digitized by Google

Yellow discharge from r. ear, with stitching pains.

[7] **Smell and Nose.** Nose stopped up with thick mucus; frequent but ineffectual desire to sneeze.

‖‖Herpetic eruption at end of nose.

[8] **Upper Face.** Tearing in face, in malar bones.

Face wears a cold expression.

Displeased morose face, during headache.

‖Face pale. θMegrim.

‖Face sunken, earthy pale, withered. θCholerine.

Red, sunken face.

Œdematous swelling of cheeks.

Circumscribed and painful swellings in face, transient and flying from place to place.

‖Heat in face with trembling in head. θCholerine.

|Face pale, puffed and spotted red.

‖‖A drawn condition, beginning at alæ nasi, and extending to angle of mouth, gave face an expression of great anxiety and pain.

‖The features have an expression of anguish and pain.

[9] **Lower Face.** Trembling of jaws.

Inability to swallow; lower jaw is fixed to upper.

Chin and corners of mouth feel cold.

[10] **Teeth and Gums.** Stinging or tearing in gums.

[11] **Taste and Tongue.** Taste: bitter; like cheese; like onions; sweetish in morning when awaking.

Speech impeded, slow.

||Feeling as if tongue was too long. θAphthæ.

Moist tongue.

Tongue black.

[12] **Inner Mouth.** A very copious salivation relieved poisoning symptoms.

Aphthæ in mouth and throat; tongue feels as if too long.

[13] **Throat.** Soft palate, red and swollen.

Burning in throat.

Sensation of pungent heat in mouth and throat, with great difficulty in swallowing.

Sensation of constriction, preventing deglutition.

Stinging in throat, between acts of deglutition.

Inflamed aphthæ and pustules in throat, making patient's condition almost desperate.

[14] **Appetite, Thirst. Desires, Aversions.** Thirst with total loss of appetite for every kind of aliment.

Burning thirst; t.

Desire for wine, aggravation from its use.

‖‖Intolerance of milk.

[15] **Eating and Drinking.** While eating: sudden heaviness in forehead.

After eating: pain below navel, lienteric stool, dry cough.

Digitized by Google

▮Regurgitation of food an hour or so after eating.
▮▮Suitable to children who cannot bear milk.
Worse from coffee.
Desire for wine, but mental symptoms are increased.

[16] **Hiccough, Belching, Nausea and Vomiting.** ▮Spasmodic hiccough. θMegrim. θCholerine.
▮Empty eructation. θMegrim.
Violent sudden vomiting: ▮of a frothy milk-white substance; of yellow fluid, ▮▮followed by curdled milk and cheesy matter.
▮Vomiting of greenish phlegm, similar to stools.
▮▮The milk is forcibly ejected soon after taken; then weakness causes drowsiness. θNursing children.
▮▮Profuse vomiting of water. θYoung children.
▮Copious greenish vomiting.
▮Gripes accompanied by fearful vomiting, weakness and indescribable anguish.
Vomits bloody mucus; with swollen abdomen.
▮Vomiting spells at height of headache. θMegrim.
▮▮After vomiting, cold and clammy. θCholera infantum.
Vomiting, with diarrhœa.

[17] **Scrobiculum and Stomach.** Tearing, rending pains in pit of stomach, extending to œsophagus.
▮Pain in pit of stomach and abdomen, followed by nausea, with or without vomiting.
▮Cramp in stomach. θMegrim.
▮Painful contractions of stomach so severe as to prevent vomiting. θCholerine.
Sense of pungent heat in stomach.
Complaints with cramp in stomach and cries with anguish.

[18] **Hypochondria.** ▮Painfulness of epigastric region, nausea.
Stitches in epigastrium.
Lancinating in r. hypochondrium, in afternoon.
Painful pressing, with burning and stitching in l. hypochondrium.
Shooting in l. hypochondrium, often and long continued.
Soreness and painfulness in both hypochondria.
Liver hard, yellowish, spleen livid, tongue black; t.

[19] **Abdomen.** Excessive griping pains in belly.
▮Colic, with diarrhœa.
▮Excessive griping pain in abdomen.
▮Colic, followed by vomiting, vertigo and weakness.
▮▮Cutting and violent vomiting.
▮▮Cutting, with distension of abdomen.
Contracted and tense abdomen.
▮Abdomen puffed, sensitive to touch; convulsions of children. θGastroenteritis.
Violent colic, followed by death of the boy.

Digitized by Google

Abdomen distended, with tension; t.
‖Sensation of coldness in abdomen.
Coldness of abdomen and lower limbs, especially left one, with aching of bowels; > by warm, wet applications.
Black bluish swelling of abdomen.

[20] **Stool and Rectum.** Loose stools, preceded by cutting in abdomen, with tenesmus in morning, after rising.
‖A thin stool finishes headache. θMegrim.
‖Stools of partly digested food, shortly after a meal or at night.
‖Diarrhœa; discharges green, thin, bilious, with violent tenesmus before and after stool. θConvulsions of children. θGastroenteritis.
‖Bright yellow or greenish, watery, slimy stools; crying, drawing up feet. Child, æt. 6 months.
Evacuations of a thin, bright yellow or greenish fluid, mixed with much bile, with severe tenesmus.
‖Greyish-green fluid stools. θ Cholerine.
Bloody stools.
‖With stools, painful contraction in stomach. θCholerine.
‖Most obstinate constipation, with feeling as if all action of bowels had been lost.

[21] **Urinary Organs.** Pain in kidneys, < from sneezing, deep inhalation and lying down.
Cutting pains in bladder, with frequent calls to urinate.
Urine: red, sediment white; ‖copious, clear as water; too frequent after exertion.
Nocturnal enuresis, with vomiting of coagulated milk after sucking bottle; greenish watery diarrhœa.
‖No urine. θCholerine.

[22] **Male Sexual Organs.** Right testicle drawn up, with pain in kidneys.

[23] **Female Sexual Organs.** Checked catamenia.
‖Menses checked by a warm bath. θ Headache.
Menses watery.
Lancinating pains in sexual organs.
Pimples on external parts, itching when patient becomes warm.

[24] **Pregnancy. Parturition. Lactation.** Labor-pains: too weak; not regular.
Violent stinging pain in mammæ; t.
‖‖Intolerance of milk; child by a sudden and violent effort throws it up, curdled or not; then weakness makes it drowsy for some minutes.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖No voice. θCholerine.
The sufferings seem to render him speechless.

[26] **Respiration.** Short breath, interrupted by hiccough.

Digitized by Google

Short, anxious, whistling breathing, while lying on back.
Great dyspnœa; t.

[27] **Cough.** Cough, with stunning pain in head.

[28] **Inner Chest and Lungs.** Stitches in l. side of chest.
Sensation as if chest was in a vise, with difficult breathing.

[29] **Heart, Pulse and Circulation.** Anxiety in præcordia; t.
Violent palpitation of heart.
‖Palpitation: with headache; with vertigo; with weariness and exaltation; t.
‖Pulse frequent, small, somewhat hard and unrythmical.
Pulse full, rapid.
‖Weak intermittent pulse, with palpitation and headache.
‖Pulse feeble, sometimes not to be felt, much exhausted. θCholerine.
Slow strong beats of heart, stupor and death (dog).

[31] **Neck and Back.** Distressing pain in occiput and nape of neck, extending down spine, > by friction with hot whiskey.
Lymphatic ganglions of neck swollen, like beads.
Sensation as if small of back was in a vise.
Painful furuncle in sacral region.
A feeling as if pain in back would be > by straightening out and bending stiffly backward, as in opisthotonos.

[32] **Upper Limbs.** Axillary glands swollen.
Sensation as if arms had become much shorter.
Numbness of arms.
Aching about scapulæ, extending to arms.
‖Thumb and fingers bent inward. θConvulsions of children.

[33] **Lower Limbs.** ‖Excoriations of thighs from walking.
Boring and shooting in lower limbs, with great weariness.
Lancinating and drawing from l. hip into thigh.
Laming ache in middle of r. thigh while sitting; > when rubbing.
Lancinating in sole, from r. heel as far as balls of toes.
Crawling in feet.

[34] **Limbs in General.** Coldness, stiffness and rigor of limbs.
Cold limbs and body convulsed.
Eruption in neighborhood of joints.

[35] **Rest. Position. Motion.** Cannot keep erect: when dizzy.
Inability to raise head: with vertigo.
Cannot sit up.
Cannot stand: from weakness.
Lying down: pain in kidneys.
Lying on back: short, anxious, whistling breathing.
Sitting: laming ache in r. thigh.
Exertion: urinates too frequently; sweats therefrom.
Walking: throbbing headache <; headache with vertigo

Digitized by Google

<; excoriation of thighs; languor and listlessness to such a degree that he supports himself with difficulty.

[36] **Nerves.** ||Trembling at heart with anxious restlessness.
Body convulsed, with cold limbs; t.
|Epileptic spasms, with clenched thumbs, red face, eyes turned downward, pupils fixed, dilated; foam at mouth, jaws locked; small, hard and quick pulse.
|Spasms, with stupor and delirium.
|General malaise.
||Convulsions. θGastroenteritis.
|Weakness after colic.
|Great weakness; children cannot stand; cannot hold up head.
|Great weakness and prostration, with sleepiness.
|He lies stretched out without consciousness.

[37] **Sleep.** Sleepiness all day.
Longing for sleep.
||Dozing of child after vomiting spells or after stool.
|On falling asleep, rolling of eyes or slight convulsions.
|Sleep after headache. θMegrim.
Sopor, dilated pupils; t.
Sleep restless first hours.
Restless night; great disposition to slumber, but calm repose is prevented by frequent startings and excessive agitation.
Deep sleep, with snoring.
Sopor, dilated pupils and death (dog).

[38] **Time.** Night: stools of partly digested food; enuresis and vomiting; restless, cannot sleep, though disposed to.
From 3 to 4 A.M.: aggravation of all symptoms.
Morning: sweetish taste on awaking; tenesmus.
Day: sleepy.
Forenoon: well disposed and serene.
Afternoon: ill-humored, anxious and sad; lancinating in r. hypochondrium.
Towards evening: aggravation of all symptoms.
At 6 P.M.: cramps in stomach.

[39] **Temperature and Weather.** Frequently indicated in Summer.
Open air: relieves throbbing in head.
Room: relieves mental conditions; relieves sensation of swelling of head, face and hands.
Warmth: causes itching.
Warmth of bed: causes vesicular eruption to itch.
Heat: causes itching and burning.
Moist heat: relieves itching, and coldness in abdomen and lower limbs.
Warm bath: checked catamenia.

Digitized by Google

Hot whiskey: friction > pain in occiput, neck and spine.
Washing: increases sensation of swelling of head, face and hands.

[40] **Fever.** Delirium even during cold stage.
Coldness, rigors, stiffness of limbs.
Skin hot, dry; absence of thirst.
Sweat: from least exertion; cannot bear uncovering; profuse, cold; malaise and tendency to delirium >.

[41] **Attacks, Periodicity.** ‖Periodical headache. θMegrim.

[42] **Locality and Direction.** Right: discharge from ear; stitches in ear; sensation of something hot streaming from ear; lancinating in hypochondrium; testicle drawn up; laming ache in middle of thigh.
Left: throbbing in head; pressing, burning, stitching and shooting in hypochondrium; coldness of leg; stitches in chest; lancinating and drawing from hip into thigh; appearance and disappearance of reddish-blue spots on leg.
Fly from place to place: painful swellings in face.

[43] **Sensations.** Sensation as if head, face and hands were swollen; < after washing; > coming into room.
As if a heavy load was lying on chest; as if there was a barrier between his organs of sense and external objects; brain feels bound up; compressed feeling in head; as if both sides of head were in a vise; as if forehead would split; as if brain was dashed to pieces; as if she was pulled by the hair; as if something hot was streaming from ear; as if tongue was too long; indescribable anguish with gripes; as if all action of bowels had been lost; as if chest was in a vise; anxiety in præcordia; as if small of back was in a vise; as if arms had become shorter.
Pain: in eyes; in pit of stomach and abdomen; in hypochondria; below navel, after eating; in kidneys; in furuncle, sacral region.
Griping: in abdomen.
Distressing pains: in occiput, nape and down spine.
Boring: in lower limbs.
Lancinating: in l. hypochondrium; in female sexual organs; from l. hip into thigh; in sole, from r. heel to balls of toes.
Cutting: in abdomen; in bladder.
Stitches: in head; in ears; in r. ear; in epigastrium; in l. hypochondrium; in l. side of chest.
Stinging: in gums; in throat; in mammæ.
Shooting: in l. hypochondrium; in lower limbs.
Tearing: in face, in malar bones; in gums; in pit of stomach.

Digitized by Google

Rending: in pit of stomach.
Burning: in throat; in l. hypochondrium; of herpetic eruption.
Drawing: from l. hip into thigh.
Pressing pain: in forehead; in l. hypochondrium.
Aching: in bowels; about scapulæ; extending to arms.
Soreness: in hypochondria.
Throbbing pain: in l. side of head.
Pulsations: in head
Stunning pain: in head.
Crawling: in feet.
Heaviness: in forehead.
Constriction: in throat.
Contraction: painful, of stomach.
Cramp: in stomach.
Laming ache: in middle of r. thigh.
Heat: in forehead; in face; pungent, in mouth and throat.
Coldness: of chin and corners of mouth; in abdomen; of lower limbs; of limbs.
Numbness: of arms.
Stiffness: of limbs.
Itching: of pimples; of water-blisters; of eruption in heat.
Dryness: of skin.

[44] **Tissues.** Ecchymoses; black and blue spots all over.
Whole body livid and swollen, and death of boy; poisoning.
Anasarca.
Wasting away of children.

[45] **Touch. Passive Motion. Injuries.** Touch: abdomen sensitive.
Pressure: relieves throbbing headache.
Rubbing: with hot whiskey relieves pain in occiput, neck and spine; relieves laming ache of r. thigh.

[46] **Skin.** Dryness of skin.
Dry burning skin; red spots.
‖Cool skin. θCholerine.
Hard knots in skin.
Liability to excoriation of thighs when walking.
During one day, appearance and disappearance of reddish blue spots on trunk and l. leg, causing an apprehension of spotted fever; aggravation of all symptoms towards evening and during night, 3 to 4 A.M.
Tetters bleed easily.
Little water-blisters; itching in bed.
Eruption itching when exposed to heat.
Herpetic eruptions; itching and burning during heat.

Digitized by Google

Phlyctenular eruption; t.

[47] **Stages of Life, Constitution.** ‖Children, during dentition. ‖Old woman during cholera season. θCholerine.

[48] **Relationship.** Similar to: *Ant. Crud.* (vomiting of milk); *Aren.; Asar.; Calc. ostr.* (vomiting of milk); *Cuprum; Ipec.; Opium.*

Related to *Cicut., Conium, Œnanth. croc.*

Is antidoted by vegetable acids.

It antidotes *Opium.*

AGARICUS MUSCARIUS. (See Amanita.)

AGNUS CASTUS.

Vitex Agnus Castus. *Verbenaceæ.*

A shrub growing in damp places in Southern Europe. Since Dioscorides one of the most famous medicines.

Proved by Hahnemann and his school, and published in 1841, in the *Archives*, by Stapf; later proved by Helbig.

[1] **Mind.** ‖‖Absent-minded, reduced power of insight; cannot recollect things.

‖He finds reading difficult; has to read several things twice; is unable to fix his attention.

‖Low-spirited, fears of approaching death.

‖Despairing sadness; keeps repeating that she will die, that there is no use doing anything. θCephalalgia. θAgalactia.

‖Melancholy, hypochondriac mood. θCephalalgia.

Anxious, fear and weakness.

Peevish; inclined to get angry; with hiccough.

[2] **Sensorium.** After dulness in head, a pressing, long-lasting headache, followed by vomiting and spasmodic trembling.

Heaviness of head and pressure in neck, as if head would fall forward.

[3] **Inner Head.** Tearing, with pressure in temples and forehead, in brain, worse during motion.

Digitized by Google

Tearing pain above r. eye and temple, as if one had received a blow upon eye, attended with soreness to touch, < by motion, < in evening, lasting several days.
Contractive headache above temples from reading.
‖Headache in upper part of head, as from staying in a room filled with a thick and dusky atmosphere; looking to one point relieves it.
Pain in temple as from a blow.
Megrim.

[4] **Outer Head.** Biting itching on scalp, < evenings and when falling asleep.
Tearing, tension and chilliness in scalp, which is warm to touch.
Biting pains on upper r. side, on bone, from behind forward, < evening and in sleep.

[5] **Sight and Eyes.** Burning in eyes and headache from reading in evening.
‖Pupils widely dilated.
‖Dilated pupils.
‖Photophobia.
Looking at a fixed point relieves pain in upper head.
‖Tearing pains above r. eye and temple, as if one had received a blow upon eye. θCephalalgia.
Corrosive itching over and on eyebrows and lids, and below eyes.

[6] **Hearing and Ears.** Ringing or roaring in ears.
Hardness of hearing.
Drawing pain in l. parotid.

[7] **Smell and Nose.** Illusion of smell: as of herring; musk.
Soreness and pain in l. side of nose.
Hard aching pain in dorsum of nose, as if a stone was pressing there, > by pressure.

[8] **Upper Face.** Corrosive itching on either cheek, obliging him to scratch.
Erysipelas on l. cheek, spreading from nose over face and head.
A long stitch followed by a fine pricking itching.
Formication of cheeks.

[9] **Lower Face.** Rending, tearing, under alveoli of r. lower jaw.
Deep tearing in r. ramus of lower jaw, below socket.

[10] **Teeth and Gums.** Toothache from warm things.
Teeth painful, when touched by warm food or drink.
‖Throbbing, tearing toothache in l. eye-tooth, small boil near tooth, very painful to touch; in attacks.
Ulcers on gums.

[11] **Taste and Tongue.** Taste: metallic; ‖coppery; bitter.
‖Tongue coated white.

Google

[12] **Inner Mouth.** Mouth very dry, saliva viscid and tough, drawing out in strings.
⋮ Ulcers on gums and in mouth.
[13] **Throat.** Corrosive itching in pit of throat.
[14] **Appetite, Thirst. Desires, Aversions.** Hunger.
Relishes food, but it does not agree with him.
Lessened appetite.
‖Thirstlessness; aversion to drink.
[15] **Eating and Drinking.** ‖Abdomen distended after meals.
Nausea in pit of stomach after eating.
Food makes him feel uneasy and replete.
Warm food and drink cause teeth to ache.
[16] **Hiccough, Belching, Nausea and Vomiting.** The wind he brings up smells like old urine allowed to remain on clothes.
Hiccough; inclined to get angry; peevish.
‖Nausea in pit of stomach when standing; later, qualmishness in abdomen, with a sensation as if intestines were pressing downward; wants to support himself with his hands.
Nausea as from eating fat food. θChecked catamenia.
[17] **Scrobiculum and Stomach.** Pinching in scrobiculum when sitting bent over.
[18] **Hypochondria.** Aching in region of liver, < from touch.
‖Soreness in region of spleen.
‖Swelling and induration of spleen. θIntermittent.
[19] **Abdomen.** ‖Rumbling in abdomen during sleep.
‖Abdomen sensitive to pressure.
Incarcerated flatus.
‖Abdomen sore to touch.
‖Flatulency.
‖Feels as if entrails were sinking down, constantly inclined to support bowels with hands. θUterine complaint.
‖‖Violent, contracting bellyache, coming suddenly in morning, with bearing down. θSuppressed menses.
⋮ Ascites.
[20] **Stool and Rectum.** ‖Diarrhœa of children, ‖chronic diarrhœa of adults.
Feels as if diarrhœa would set in, when standing; anguish, great weakness. See 36.
Difficult expulsion of soft stool.
‖Hard stools. θConstipation.
‖When pressing at stool, discharge of prostatic fluid.
Great accumulation of wind.
Wind expelled by rectum smells like urine remaining long on clothes.
‖Ascarides.

Digitized by Google

❙A sore feeling under skin near anus, only when walking.
Corrosive itching of perineum, ❙pruritus podicis.
Excoriated anus.
❙Deep rhagades or fissures of anus.

[21] **Urinary Organs.** Pains in bladder.
Passes more urine.
❙❙Gets up twice at night and even once during siesta.
When urinating, sometimes pain in lower abdomen, sometimes in kidneys.
Red, turbid urine, with burning and pressure in urethra.
❙Emission of prostatic fluid.
A yellow discharge from urethra.

[22] **Male Sexual Organs.** ❙❙Complete loss of sexual desire, penis is small, flaccid and cold.
❙❙Frequent erections, but without voluptuous thoughts.
❙Usual morning erection with desire, but parts flaccid.
After an embrace involuntary emissions same night, and long-continued erection.
❙❙Sexual desire lessened, almost lost.
❙❙Penis so relaxed that voluptuous fancies excite no erections.
❙❙Testes cold, swollen, hard and painful; penis small, flaccid.
Spermatic fluid thin, watery and deficient.
❙❙Impotence, with gleet, especially with those who have frequently had gonorrhœa.
❙❙Yellow urethral discharge. θGonorrhœa.
❙❙Gleet, with want of sexual desire or erections.
❙Induration of testicles. θSuppressed gonorrhœa.
Drawing along spermatic cords.
❙Pollution from irritable weakness with prostatorrhœa.
❙Prostatic juice passes with hard stools.
❙Want of erection and sexual desire. θSecondary gonorrhœa.
Itching of genitals.

[23] **Female Sexual Organs.** Hysteria, with maniacal lasciviousness.
Sterility; absence of menses and sexual desire.
Menses lasting from ten to eighteen days.
❙Metrorrhagia.
Suppressed menses, with drawing pain in abdomen.
❙A transparent leucorrhœal discharge passes imperceptibly from the ❙❙very relaxed parts.
❙❙Leucorrhœa, not copious, but spotting her linen yellow. θSuppressed menses.
❙Intumescence of the uterus.
Before menses: vertigo, headache, dim sight.
During menses: pain in pelvis and loins.

Digitized by Google

Inflammation of uterus.

[24] **Pregnancy. Parturition. Lactation.** Retained placenta.

Milk scanty, or disappears; often with great sadness; says she will die.

Suppression of milk in childbed, or during nursing period.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice as if passing through wool, has no timbre.

[26] **Respiration.** Oppression on going up-stairs.

Dyspnœa; < in evening.

[27] **Cough.** Cough: in evening, in bed, before falling asleep; with raising of blood, followed by copious mucus; in paroxysms, with palpitation and nosebleed, mostly in morning; when inhaling cold air.

Tough sputa, hanging like a rag in fauces.

[28] **Inner Chest and Lungs.** Feeling of dryness in chest.

[29] **Heart, Pulse and Circulation.** Palpitation; with cough.

Slow and weak pulse, often imperceptible.

[30] **Outer Chest.** Pressure in region of sternum, < when breathing deeply.

Pressure in xiphoid cartilage, just above pit of stomach.

[31] **Neck and Back.** A creaking noise in vertebræ.

Acute, sharp stitches in coccyx, and on l. side near coccyx and sacrum.

Pain in sacrum from flatus.

[32] **Upper Limbs.** Hard pressure in right axilla and upper arm, < from touch or motion.

Swelling of finger joints, tearing pains, arthritic nodes.

Gouty swelling of finger joints.

[33] **Lower Limbs.** Pain in left hip.

Thighs feel tired and swollen towards evening.

Lancinating pain in r. hip joint, < during motion, > in rest.

Legs much fatigued and swollen towards evening.

Cold knees.

Ankles swollen after a sprain.

Tearing, rending in feet and toes, < on walking.

Stitches in legs and l. big toe.

Fine lancinations in bottom of either foot.

Feet easily turn under when walking on a stone pavement.

[35] **Rest. Position. Motion.** Rest: relieves pain in hip.

Sitting bent over: causes pain in scrobiculum.

Standing: causes nausea and qualmishness in stomach and abdomen; sensation as if diarrhœa would set in.

Motion: aggravates tearing and pressure in head, pressure in axilla and arm; pain in hips.

Walking: soreness near anus; tearing in feet and toes <; feet turn under; hands sweat.

Ascending stairs: causes oppressed breathing.

Digitized by Google

[36] **Nerves.** Spasmodic complaints of hypochondriac men.
‖Great weakness: as from violent anguish; from depression of spirits. θAgalactia.
Lethargy or phrenzy.

[37] **Sleep.** Coma.
‖Sleeplessness.
‖‖Awaking often, ‖as if alarmed; ‖startings.
Anxious dreams.

[38] **Time.** Night: gets up twice to urinate.
Morning: violent bellyache; cough, with palpitation and nosebleed.
Evening: tearing pains, with pressure above r. eye and temple; itching on scalp <; eyes burn when reading; dyspnœa <; cough in bed; legs tired and swollen; chilliness, followed by heat and sweat; flushes of heat, knees cold.

[39] **Temperature and Weather.** Bad effects from getting feet wet.
Warm things: teeth pain.
In bed: heat of face, coldness of knees.
Cold air: coughs when inhaling it.
Open air: hands sweat when walking.

[40] **Fever.** Internal chilliness, with trembling, skin warm.
Slight chilliness towards evening, followed by heat, with headache, no thirst, slight delirium, tormenting, profuse sweat.
Chill and heat alternate.
‖‖Chilly all over, but only hands feel cold to touch.
Flushes of burning heat, mostly in face, with cold knees; evening in bed.
‖‖Heat with coryza, thirst. θBorborygmus.
Sweat on hands when walking in open air.
Sweats easily.

[41] **Attacks, Periodicity.** Sudden attacks of bellyache.

[42] **Locality and Direction.** Right: tearing in lower jaw; aching in liver; pressure in axilla and arm; lancinating in hip joint.
Left: drawing in parotid gland; painful soreness in side of nose; erysipelas on cheek; ‖‖soreness in spleen; stitches side of sacrum and coccyx.
Above downward: nausea and qualmishness.

[43] **Sensations.** Bruised feeling all over.
As if head would fall forward; as if one had received a blow on eye; headache as from staying in a room with thick atmosphere; pain in temple as from a blow; as if a stone was pressing in dorsum of nose; a long stitch followed by a fine pricking itching in face; as if intestines were pressing downward; voice as if passing through wool; pains as if luxated.

Pain: in l. side of nose; in bladder; in testicles; in sacrum; in l. hip.
Burning: in eyes; in eyelids; in nose; in throat; in mouth; in urethra; in bladder; in skin.
Lancinating: in r. hip joint; in soles of feet.
Stitches: in head; in face; in eyes; in ears; in rectum; in coccyx; near sacrum; in legs; in l. big toe; in skin.
Tearing: in head; above r. eye and temple; in scalp; under alveoli of r. lower jaw; deep in ramus of lower jaw; toothache; in finger joints; in feet and toes.
Gnawing: in different parts.
Rending: under alveoli of r. lower jaw; in feet and toes.
Pinching: in scrobiculum.
Aching pain: in dorsum of nose; in region of liver.
Soreness: in l. side of nose; in region of spleen; under skin near anus.
Biting pains: in outer head.
Drawing pain: in l. parotid; along spermatic cords; in abdomen.
Pressing: headache; in neck; in temples, forehead and brain; in urethra; in region of sternum; in xiphoid cartilage; in r. axilla and upper arm.
Throbbing: toothache.
Contractive pain: in head above temples; in abdomen.
Tension: in scalp.
Dulness: in head.
Tired feeling: in thighs; in legs.
Heaviness: of head.
Swollen feeling: in thighs.
Biting itching: on scalp.
Corrosive itching: on eyebrows and lids and beneath eyes; on cheeks; in pit of throat; of perineum.
Itching: of male genitals; on different parts of body; around ulcers.
Formication: of cheeks.
Heat: burning; flushes; with coryza.
Chilliness: in scalp; internal; all over.
Coldness: of knees.
Dryness: of mouth; in chest.
Stitches: head, face, eyes, ears, rectum and skin.

" **Tissues.** Inflammatory, rheumatic swelling of joints.
Gouty nodosities.

" **Touch. Passive Motion. Injuries.** : May be indicated in bruises or wounds.
Sprains and luxations of joints.
Strains from lifting a little too much.
Prevents excoriation from walking.
Pressure: relieves aching on dorsum of nose; abdomen sensitive therefrom.

Digitized by Google

Touch: aggravates toothache; aching in liver; abdomen sore; pressure in axilla and arm.

Must scratch: in corrosive itching of cheeks.

[46] **Skin.** Pungent odor exhaled from him, gives him a dulness and headache, followed by vomiting and trembling.

Gnawing or itching on different parts of body, relieved temporarily by scratching.

Itching around ulcers, in evening.

Yellow tint of the skin.

[47] **Stages of Life, Constitution.** Lymphatic constitution. θAgalactia.

Premature old age, in young persons from abuse of sexual powers, melancholy, apathy, mental distraction, self-contempt, general debility, frequent loss of spermatic fluid.

Unmarried persons suffering from nervous debility. θCephalalgia.

"Old sinners," with impotence and gleet.

[48] **Relationship.** The only one proved from the large family of Verbenaceæ. Helbig calls attention to the nearly related family of Labiatæ, from which we have several valuable remedies.

Antidotes to *Agn. cast.*: *Camphor.*, *Natr. mur.* (the headache), strong solution of table-salt.

After *Agnus* are useful: *Arsen.*, *Bryon.*, *Ignat.*, *Lycop.*, *Pulsat.*, *Sulphur*, *Selen.* (impotence).

AILANTUS GLANDULOSA.

Tree of Heaven. *Simarubeæ.*

A very poisonous tree introduced from the Molucca Islands, and cultivated extensively as a shade tree, on account of its rapid growth, straight stem and shady leaves, until it was observed to make the month of June, the most healthy in the year, a sickly one, by the stench of its flowers. See 20 and 36. The opening flowers are used for a tincture. Introduced by Dr. P. P. Wells, of Brooklyn, in 1864, as corresponding to Scarlatina, and proved by H. Minton and J. T. Alley, 1861. Toxic observations were made by many.

[1] **Mind.** Past events are forgotten, remembered as belonging to some one else, or as matters read.

Cannot concentrate mental effort; compelled to read a subject several times to get even a dim understanding of it.

‖Great anxiety and restlessness.

Stoical indifference to what happens.

‖Low-spirited. θBronchial catarrh.

‖Continual sighing, with depression of spirits.

Stupor; mental indifference and weakness.

‖Great anxiety.

Restlessness, with great anxiety.

‖Extremely irritable.

Confusion of intellect; found it almost impossible to add columns of figures correctly; had to go over it several times to get it right.

Loss of memory.

Mental alienation.

Recklessness in regard to present and future events.

‖‖Semi-conscious, evidently cannot comprehend what is said to him. θScarlatina.

‖Stupor, delirium and insensibility. θAfter suppressed scarlatinal eruption.

‖Muttering delirium with sleeplessness and restlessness. θTyphoid scarlatina.

[2] **Sensorium.** ‖Dizzy and throat dry.

Vertigo, with nausea, faintness and cold sweat.

Vertigo when stooping.

‖‖Dizzy, face hot, cannot sit up; drowsy, yet very restless and anxious; later insensible, with muttering delirium; recognizes no one. θScarlatina.

Staggers when rising or moving.

Digitized by Google

Drunken feeling in brain, with fulness.
Thick, heavy feeling in head; figures look blurred.
Feeling as if an electric current was passing through l. side of head or down to extremities.
Apoplectic fulness of head.
‖Dizziness when rising up. θTyphoid scarlatina.

[3] **Inner Head.** Severe headache and giddiness; face red and hot.
Headache, with nausea.
Dull headache: with burning in eyes; with great oppression of chest; with heavy feeling in sternal region; with tingling in l. arm and hand.
Dull compressed feeling, confusion and pain in forehead.
‖Dull heavy pressing in forehead; disinclined to think or act.
‖‖Darting through temples and back part of head, with confusion of ideas; beating in occiput.
Thick, heavy feeling in base and r. side of head.
Severe pain through temple on awaking.
Pain in occiput, with dizziness and ringing; pain in forehead; also swelling under l. eye from cheek.
‖Head burning hot, with piercing pains.
‖Severe headache, interrupted by delirium of a frightful kind, with fever and anxiety. θTyphoid scarlatina.

[4] **Outer Head.** Beating in occipital arteries.
Tender, bruised feeling over parieto-frontal sutures.

[5] **Sight and Eyes.** Uncertainty in seeing.
Figures and letters look blurred; thick feeling in head.
‖Shunning light.
Wild-looking eyes with intolerance of light.
‖Pupils widely dilated. θScarlatina.
‖‖Eyes suffused and congested; startled look when aroused; pupils dilated and sluggish. θScarlatina.
Burning in eyes.
Conjunctivitis, with redness and inflammation extending around external canthus.
Purulent discharge agglutinating lids in morning.
Smarting and aching eyes.
Lachrymation in open air or brilliant light.

[6] **Hearing and Ears.** Pain in ear when swallowing.
The ear, when touched or scratched, gets red all over.
‖Parotid gland sensitive and enlarged. θScarlatina.

[7] **Smell and Nose.** Loss of smell.
‖‖Copious thin, ichorous discharge without fetor. θCoryza.
Coryza, with rawness in nostrils; nose and upper lip covered with thick grey-brown scabs; ichorous pus discharged every forenoon.
‖Fluent catarrh, with sneezing.
‖‖Copious, thin, ichorous and bloody discharge from nose.

Digitized by Google

Chronic catarrh, difficult breathing through nose.
Dryness of nose; secretion suppressed.
Itching and uneasy feeling around nose.
‖Nostrils congested. θScarlatina.

[8] **Upper Face.** Face sallow, jaundiced; pale; blue circles around eyes.
Irregular spots of capillary congestion, as after a debauch.
‖Face red and hot, covered with a rash. θScarlatina.
‖Face dark as mahogany. θSuppressed scarlatina.
Face puffed, erysipelatous; soreness and pain on l. side of nose.
Tearing in face and head, with toothache.
‖Chronic speckled, spotted face; a sort of acne.
Eruption miliary, more on forehead and face.
‖Great prostration and a countenance indicating much distress. θTyphoid scarlatina.

[9] **Lower Face.** Lips cracked.
Lip becomes puffed and sore when touched.
Small but deep, ragged ulcer near angle of mouth.
Inflamed vesicles on lower lip; chin bright red.

[10] **Teeth and Gums.** ‖Teeth covered with sordes. θScarlatina.
Tearing in upper and lower teeth, l. side, also in face; < lying down, forcing him to walk about; external pressure relieves.

[11] **Taste and Tongue.** Great bitterness (chewing the bark).
‖Taste insipid, flat, feverish. θBronchial catarrh.
‖Tongue dry, parched, cracked.
‖Tongue moist and covered with white fur; ‖tip and edges livid. θScarlatina.
Tongue thickly covered with a whitish coat, brown in centre.

[12] **Inner Mouth.** Fetid discharge from throat.

[13] **Throat.** ‖Thick, œdematous and dry choky feeling in throat.
‖Throat dry, rough and scrapy; worse in morning.
‖Irritability of throat and hawking up of mucus.
‖Hawks up greenish puruloid matter.
‖Throat tender and sore on swallowing, or on admission of air.
‖‖Throat livid, swollen; tonsils prominent and studded with deep ulcers, oozing a fetid, scanty discharge; external neck swollen, sensitive. θScarlatina.
Hawking of mucus, constant effort to raise hard lumps of whitish matter.
Thyroid gland enlarged and tender.
‖Diphtheria, with extreme prostration.
‖‖Refused to swallow anything for 12 hours. θScarlatina.
‖‖Throat much swollen, dark red, almost purple in color. θScarlatina.

Digitized by Google

[14] **Appetite, Thirst. Desires, Aversions.** No appetite, everything tastes insipid; sight of food makes her worse; disgust for food.

Hunger and distressing sense of general emptiness during chill.

Thirst for cold drinks, for brandy.

[15] **Eating and Drinking.** After wine, sleepy.

Water tastes brackish and flat; no desire for drink except when eating.

[16] **Hiccough, Belching, Nausea and Vomiting.** Frequent belching, with sick-headache.

Nausea: with giddiness; similar to that in pregnancy; with vomiting diarrhœa and spasmodic pains in abdomen.

Vomits food speedily during chill; suddenly and violently when sitting up; with stupor.

[17] **Scrobiculum and Stomach.** Stomach inactive, as though its contractive power was impaired.

Constant violent increasing pain in stomach.

Peculiar feeling of emptiness in stomach.

[18] **Hypochondria.** Debilitating oppression like a stricture below hypochondria, with nausea.

Tenderness over hepatic region.

[19] **Abdomen.** Weak, burning, uneasy feeling in bowels, as of approaching diarrhœa.

Tympanitis.

Burning in stomach and bowels.

Colicky, griping pains in bowels.

Pains in hypogastrium and hips.

[20] **Stool and Rectum.** Stools frequent, watery, forcibly expelled; burning in stomach and bowels with griping (from smoking).

Frequent painful stool, little fecal matter, much bloody mucus, with very little fever (from odor of blossoms).

‖Bowels for days too freely moved; thin, watery, offensive, passing involuntarily with the urine. θScarlatina.

‖Tapeworm.

[21] **Urinary Organs.** Urine supressed or scanty; passed unconsciously; acid.

‖Suppression of urine, impending uræmia, stupor or delirium, with dusky red face. θScarlatina.

[22] **Male Sexual Organs.** Sore on prepuce looking like an incipient chancre.

[24] **Pregnancy. Parturition. Lactation.** Malignant puerperal fever.

[25] **Voice and Larynx. Trachea and Bronchia.** Aphonia preceding cough.

Voice hoarse, failing; ‖almost lost on awaking in morning.

‖Croupy choking.

Digitized by Google

Oppression of bronchia, with dull headache.

[26] **Respiration.** ‖‖Breathing hurried, irregular, heavy. θScarlatina.

Equable oppression as if chest was strapped; feels as though air cells were stuck together.

Sensation of fulness and smothering before expectorating.

‖‖Wheezing, fluent coryza and sneezing; asthmatic oppression in bronchi; dyspnœa. θBronchial catarrh.

[27] **Cough.** Cough: deep, exhausting, with asthmatic expansion of lungs; ‖deep and painful; ‖‖dry, hacking; ‖in violent fits before retiring and on rising until sputum is raised; dry, constant, with oppression, burning and pains in chest; preceded by aphonia for a day or two.

‖Cough with headache and congestion of face. θBronchial catarrh.

‖Sputa: blood-mixed; twice raised a mouthful of blood; bitter, yellow, more mornings; muco-purulent sputum, free in morning, sticky and scanty during day.

[28] **Inner Chest and Lungs.** ‖Stitching and aching in chest, under the clavicle, sometimes extending to sternum.

‖Pressure on chest and sense of fulness.

‖‖Lungs feel excessively sore and tender.

‖‖Burning in r. lung and under l. shoulder.

‖Pain and contracted feeling especially through centre of l. lung, sternal edge.

Tired feeling in lungs, too much exertion to breathe.

[29] **Heart, Pulse and Circulation.** ‖Dull pain and contracted feeling in region of base of heart and through centre of l. lung.

‖Pulse: so rapid and small as scarcely to be counted, surface cold and dry; ‖weak, frequent, irregular. θScarlatina.

Pulse accelerated.

‖Rapid small pulse. θTyphoid scarlatina.

[30] **Outer Chest.** ‖‖Pressure of clothes on chest is uncomfortable. θBronchial catarrh.

[31] **Neck and Back.** Soreness in glands, with pain under l. shoulder blade.

Thickened swollen feeling of muscles of neck.

Constant aching between shoulders.

‖‖Neck tender and very much swollen. θScarlatina.

Subacute congestion of cord, leading to paralysis; limbs heavy, feel as if asleep.

Constant sharp pain through small of back and hips.

[32] **Upper Limbs.** Pain deep in r. scapula, hindering motion of arm.

Numbness of l. arm; fingers feel as if asleep; tingling of arm and fingers on awaking.

Digitized by Google

Large water-blisters on end of thumb, with smaller ones at side of finger nails.

[33] **Lower Limbs.** Feeling of uneasiness and aching restlessness in limbs.

Left leg feels numb, with tingling and pricking pain in foot and toes.

Limbs feel as if they were asleep.

Severe pain in l. foot; a tension while walking.

[35] **Rest. Position. Motion.** Lying on r. side: can sleep better in bronchial affections.

Lying down: aggravates toothache.

Sitting up: vomits violently.

Cannot sit up: owing to dizziness.

Rising: staggers; cough.

Motion: staggers; prevented by pain in scapula.

While walking: tension in foot.

Must walk about: with toothache.

Standing: debility.

[36] **Nerves.** ‖Jerking cramps of limbs during sleep. θBronchial catarrh.

Electric thrill from brain to extremities.

‖Great debility, ‖tottering gait, ‖cannot stand long.

Heaviness of limbs.

Limbs feel as if they were asleep.

General malaise, increasing weakness.

‖In low, adynamic forms of disease, characterized by sudden and extreme prostration, torpor, vomiting, pulse small and rapid, purplish appearance of skin.

Kills canary birds, if cage is hung over night in tree while in flower.

[37] **Sleep.** Sleep heavy or disturbed and unrefreshing.

Sleepy: morning and forenoon; after a glass of wine, with fulness of head.

Drowsiness, followed by insensibility.

‖During sleep: talks, moans, has sweat, is restless.

‖‖Sleeps best on r. side. θBronchial affections.

Worse on waking.

‖Restless and incoherent, most at night; kept in bed with difficulty. θScarlatina.

[38] **Time.** Night: itching of skin.

Morning: eyes agglutinated; throat <; voice lost on awaking; free expectoration; yellow, bitter expectoration <; sleepy; dry hot skin.

Forenoon: ichorous nasal discharge; sleepy; skin dry and hot.

Day: sticky and scanty expectoration.

[39] **Temperature and Weather.** Air: throat more tender.

Open air: lachrymation.

Digitized by Google

40 **Fever.** Chill preceded by a miliary eruption, < on forehead and face.
During chill: hunger, empty feeling; intolerable pain in back of neck, upper part of back and hip joint.
After chill: flushes of heat, severe pain in head and soreness of lungs.
During heat: delirium, urgent thirst, longing for brandy.
Skin dry and hot, especially in morning, until midday.
Cold sweat and nausea.
‖Cold sweat. θCholera.

41 **Attacks, Periodicity.** ‖Attacks characterized by fulness of head, with heat; pains burning, darting in temples and occiput; vertigo and nausea.
Every forenoon: ichorous nasal discharge.
Rash returns annually.

42 **Locality and Direction.** Right: heaviness of side of head; tenderness over liver; burning in lung; pain in scapula; pain in hip joint.
Left: electric current through head; tingling in arm and hand; swelling under eye; sore pain side of nose; tearing in teeth and face; burning under shoulder; pain and contraction in lung; pain under scapula; arm and fingers feel numb and as if asleep; leg feels numb, foot and toes tingle and prick; pain in foot; tension in foot while walking; itching around ear.
Above downward: electric current from head to extremities; stitching and aching in chest.

43 **Sensations.** As if she would go crazy; drunken feeling in brain; thick, heavy feeling in head; as if an electric current was passing through l. side of head, or down extremities; uneasy feeling around nose; throat rough and scrapy; sense of general emptiness during chill; peculiar feeling of emptiness in stomach; as if chest was strapped; as if air cells were stuck together; aching restlessness in limbs; as if limbs were asleep; electric thrill from brain to extremities.
Pain: in forehead; in occiput; in open air when swallowing; in l. side of nose; in hypogastrium and hips; through l. lung; under l. shoulder blade; deep in r. scapula.
Severe pain: through temple; in stomach; in l. foot.
Sharp pain: through small of back and hips.
Burning: in eyes; in stomach; in bowels; in chest; in r. lung; under l. shoulder.
Smarting: in eyes.
Rawness: in nostrils.
Darting: through temples and back part of head.
Jerking cramps: of limbs.

Digitized by Google

Piercing pains: in head.
Stitching: in chest.
Griping: in bowels.
Aching: in eyes; in chest; between shoulders.
Soreness: on l. side of nose; of throat; of lungs; in glands.
Tearing: in face and head, with toothache; in upper and lower teeth.
Oppression: of bronchia; of chest.
Beating: in occiput.
Bruised feeling: over parieto-frontal sutures.
Dull pain: in region of heart.
Contracted feeling: through centre of l. lung; in region of base of heart.
Compressed feeling: in forehead.
Pressure: in forehead; in chest.
Uneasy feeling: about nose; in bowels; in legs.
Thick feeling: in head.
Confusion: in forehead.
Heaviness: in head; in sternal region; in base of brain in r. side of head; of limbs.
Fulness: on chest.
Weak feeling: in bowels.
Tired feeling: in lungs.
Tingling: in l. arm and hand; in l. foot and toes.
Numbness: of l. arm; of fingers; of l. leg.
Heat: in head.
Coldness: of skin.
Itching: around nose; l. ear; face, back and neck.
Dryness: of nose; of tongue; of throat; of skin.

"**Touch. Passive Motion. Injuries.** Touch: reddens ear; lips become sore and puffy.
Pressure: relieves heaviness in head, toothache; pressure of clothes on chest uncomfortable; causes eruptions to disappear.
Scratching: reddens ear.

"**Skin.** Skin cold, dry, livid.
Itching around l. ear, face, back and neck at night; felt as if she would go crazy.
‖Skin dry, but not hot. θScarlatina.
Rash returns annually when the Ailantus tree blossoms (after poisoning).
‖‖Eruption of miliary rash in patches of a dark, almost livid color.
Rash looking like measles, but without catarrh (looks like syphilis).
‖Irregular patchy, livid eruption, disappearing on pressure and returning very slowly; interspersed with small vesicles; < on forehead, neck and chest. θScarlatina.

Digitized by Google

‖‖Eruption appeared scantily for two days, with sore throat and mild fever. θScarlatina.
Large bullæ filled with a claret-colored serum.
‖Petechiæ. θScarlatina.
‖‖Malignant scarlet fever.
‖Purple rash, with stupor. θScarlet fever.
‖A livid miliary eruption. θScarlatina.
‖‖Eruption plentiful, of a bluish tint. θTyphoid scarlatina.
‖Eruption is slow to make its appearance, remains livid, and even forehead and face take on a rather purplish color. θTyphoid scarlatina.
‖‖Body and limbs covered with an irregular patchy eruption of a very livid color, disappearing on pressure and returning very slowly. θScarlatina.

[47] **Stages of Life, Constitution.** The odor affects the asthmatic; also women and children more than men, and old people least of all.
Nervous, sensitive persons.
Bilious temperaments; stout and robust.

[48] **Relationship.** The nearest relation is *Ptelea*, proved by G. Bute, and the Zanthoxyleæ, if any ever should be proved.
Similar are: *Amm. carb.; Arnic.* (sore lungs); ‖*Arum. triph.; Aloes; Baptis.; Bryon.; Gelsem.; Hyos.;* ‖*Laches.; Nitr. acid; Nux vom.;* ‖*Phytol.; Prussic acid;* ‖*Rhus tox.; Stramon.*
Antidoted by: Bourbon whiskey (poisoning); *Rhus tox.* (headache and erysipelatous face, nausea, heavy sleepy feeling); *Nux vom.* (general effects).

Digitized by Google

ALETRIS FARINOSA.

Star Grass. *Hæmadoraceæ.*

The most bitter plant; much more so than Aloes, Gentian or Quassia.—(BIGELOW.)

[1] **Mind.** Weariness of body and mind.
[2] **Sensorium.** Vertigo, sleepiness, vomiting and purging; even stupefaction.
Dizzy when stooping.
[5] **Sight and Eyes.** Eyes feel sore and look dim.
[12] **Inner Mouth.** Spits a good deal and raises froth.
[11] **Appetite, Thirst. Desires, Aversions.** ⁝Want of appetite with weakness.
‖Want of appetite. θProlapsus uteri.
[13] **Eating and Drinking.** ‖Least food distresses stomach; fainting attacks with vertigo; sleepy, emaciated; disgust for food, nausea; obstinate indigestion; constipation; debility.
‖Indigestion. θProlapsus uteri.
[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Obstinate vomiting during pregnancy.
[19] **Abdomen.** ‖Flatulent colic in weak, emaciated persons.
⁝Hysteric colic.
[20] **Stool and Rectum.** Fearful pains in rectum and anus; during a movement terrible pains as if forcing a passage.
[23] **Female Sexual Organs.** ‖Premature, profuse menses, with laborlike pains.
‖Amenorrhœa or delayed menses, from uterine or ovarian atony; weariness of mind and body; abdomen distended, bearing down; lassitude.
‖Prolapsus from muscular atony.
‖Menorrhagia from a congested state of uterus and ovaries; profuse black blood and coagula; fulness and weight in uterine region.
‖Leucorrhœa from loss of fluids or defective nutrition; debility from protracted illness.
‖Leucorrhœa. θProlapsus uteri.
‖Menses too early and too profuse. θProlapsus uteri.
‖Sterility from uterine atony.
[21] **Pregnancy. Parturition. Lactation.** ‖Habitual tendency to abortion, sensation of weight in uterine region, and tendency to prolapsus.

Digitized by Google

‖Myalgic pains, simulating "false pains," during pregnancy.

[27] **Cough.** Raises a great deal of froth; feels as if wanting to cough, but cannot.

[35] **Rest. Position. Motion.** Stooping: causes dizziness; has a great sense of weakness.

[36] **Nerves.** ‖‖Debility, especially of females, from protracted illness or defective nutrition; no organic disease.
‖Great debility. θProlapsus uteri.
‖‖Debility after diphtheria.
⁞Fits. ⁞Epilepsy with young persons.

[40] **Fever.** ⁞In many fevers.

[43] **Sensations.** Pain in rectum as if forcing a passage.
Fearful pains: in rectum and anus.
Myalgic pains: during pregnancy.
Soreness: of eyes.
Fulness: in uterine region.
Weight: in uterine region.

[44] **Tissues.** ⁞Chronic rheumatism.
⁞Dropsy.

[47] **Stages of Life, Constitution.** ‖‖Most suitable for chlorotic girls and pregnant women.
‖Weak, emaciated people.

[48] **Relationship.** Similar to *Helon.*, *Cinchon.*, *Hydrast.*, *Sabin.*, *Senec.*, *Pulsat.* and *Cauloph.*
In collecting the root not to be mistaken for *Helon. dioic.*

ALLIUM CEPA. (See Cepa.)

ALLIUM SATIVUM.

Garlic. *Liliaceæ.*

Tincture from the fresh bulb; used as a condiment since olden times, and against worms and some fevers.
Proved in France by Petroz and Teste, 1852.

[1] **Mind.** Weak memory.
Lack of ideas.
Desire to escape.
Sadness when alone; moral uneasiness; afraid of never

Digitized by Google

getting well; fear of not being able to bear any kind of medicine; fear of being poisoned; sensitiveness; impatience.

Cannot bear anything; wants many things and is not pleased with any; every afternoon.

[2] **Sensorium.** Vertigo: on looking long and steadily at anything; transient on rising from a seat and heaviness of head, > as soon as menses appear.

[3] **Inner Head.** Heaviness in head: in forehead, can hardly open eyes; with mucus in throat; ceases with onset of menses, and returns afterwards.

Pulsations in temples.

Dull pain in occiput in morning when lying on back.

Pressing pains from within outward.

; Headache. θ In dyspeptic subjects.

[4] **Outer Head.** ‖ Dandruff.

Baldness.

[5] **Sight and Eyes.** Could read only with spectacles; heaviness in eyes.

‖ Catarrhal ophthalmia at night; smarting, burning, lachrymation; eyelids agglutinated; returns every night when he tries to read.

Tarsi sore, with irritation of eyes.

Profuse watering of eyes without coryza.

[6] **Hearing and Ears.** ‖ Deafness of l. ear (catarrhal).

‖ Hardened earwax (topically with milk).

‖ Hardened crusts in outer canal.

‖ His customary aural catarrh disappeared; he heard better in diseased ear.

[7] **Smell and Nose.** Increased secretion of nasal mucus, with slight stoppage of both nostrils.

Coryza more dry than fluent, with pressive pain from above root of nose.

Ozæna.

Smarting at junction of alæ and face, mostly left.

[8] **Upper Face.** Smarting, itching of face.

‖ Spots in face.

Stinging in one side of face.

[9] **Lower Face.** Smarting as from herpetic eruption, near l. angle of lips.

Lips dry.

[10] **Teeth and Gums.** Toothache paroxysmal and severe.

Tickling sensation in lower teeth.

Drawing in teeth, swollen gums, sensation of a hair on tongue, < from reading.

Pressing, transitory jerking in jaws and upper molars of r. side, in forenoon.

Scurvy.

Digitized by Google

[11] **Taste and Tongue.** Taste: hot, as from throat, causing increase of saliva.
Tongue furred white, with a disagreeable taste.
‖Tongue dry at night.

[12] **Inner Mouth.** Copious, sweetish saliva; after meals, more after supper and at night.
Mouth symptoms worse from reading.
‖Sores in mouth.

[13] **Throat.** ‖Sticky feeling in throat, with dryness, tickling heat and raw feeling in larynx.
Anterior part of throat not sensitive to touch.
Ulcerated throat.
Accumulation of mucus in throat with heaviness of head in morning.
Feels as if something cold, then again something hot and stinging ascended œsophagus.

[14] **Appetite, Thirst. Desires, Aversions.** Voracious appetite.
Hunger and emptiness in stomach, without appetite.
Desire for butter.
Thirst.

[15] **Eating and Drinking.** ‖Bowels disturbed by slightest deviation in diet.
‖The least change in his usual manner of living increases dyspepsia.
‖Complaints from bad water.
Chests complaints worse after eating.
‖Copious flow of saliva after eating.
Burning eructations after a meal.
Weight in hypogastrium immediately after a meal.
‖Complaints of those who eat to excess; gluttony.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Belching after every change of diet.

[17] **Scrobiculum and Stomach.** ‖Heartburn.
Pressure as from a stone.
Long-standing dyspepsia, especially in old, fleshy people, whose bowels are disturbed by slightest deviation from a regular diet.

[18] **Hypochondria.** In forenoon pressure in epigastrium and transverse colon, had to sit bent forward and press with hands.
Pain under short ribs, back, r. side.

[19] **Abdomen.** Pain in region of descending colon, just below ribs.
Violent burning in abdomen.
‖Wind-colic.
Everything (in abdomen) seems to drag downward.
Every step on pavement caused excruciating pain, as if intestines would be torn apart; > by lying down.

[20] **Stool and Rectum.** Expels flatus.

Digitized by Google

Stools at first fecal, then watery and hot.
Looseness of bowels.
Constipation with almost constant dull pains in bowels.
Normal stool immediately after a meal.
Prolapsus ani.
Expels worms.

[21] **Urinary Organs.** Pain in region of kidneys.
Bladder distended, could bear no pressure; continual urging to urinate with passing of a few drops.
Ulceration of bladder, caused by calculi.
Urine whitish, abundant, becomes cloudy from nitric acid.
Urine increased, or lessened in quantity.
Urine dark brown with copious sediment.
A kind of diabetes.

[23] **Female Sexual Organs.** Menses too early; headache and dizziness lessen as flow becomes established.
Soreness of vulva and thighs during menstrual flow.
Pustules on vulva during menses.
Bright red spots, with itching and smarting on inside of labia majora and at vulva.

[24] **Pregnancy Parturition. Lactation.** Said to be injurious during pregnancy.
After-birth remains.
Mammæ swollen and painful to touch.
Dull stitches in right mamma.
Said to be injurious to the nursing.
Mammæ swell after weaning.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice rough; hoarse.
Sore sensation in larynx.
Chronic catarrh of windpipe without fever, but with difficult breathing and moist cough.
Almost continuous mucous rales in bronchi.

[26] **Respiration.** Difficult respiration as if sternum was compressed.
Periodical asthma.

[27] **Cough.** Chronic cough, dyspnœa; ropy sputum.
Cough hollow, dry, not very frequent.
Morning cough, after leaving his bed-room, with extremely copious mucous expectoration.
Cough which seems to come from stomach.
Dry cough after eating.
Cough which gives rise to a fetid smell.
Sudden paroxysm of hard dry cough while smoking, obliging him to quit.
Expectoration of a thin, yellowish, purulent-looking, blood-streaked mucus, of a putrid odor.
Great difficulty in expectorating a glutinous mucus.

Digitized by Google

[28] **Inner Chest and Lungs.** Pain in l. side of chest, with dark urine.
Lancinating in one side of chest.
[29] **Heart, Pulse and Circulation.** Palpitation.
Jerking pulsations of heart.
Accelerates circulation.
[30] **Outer Chest.** Stitches in pectoral muscles and beneath scapulæ.
[31] **Neck and Back.** Drawing or darting pains in neck.
Backache.
Weak back, child does not learn to walk; marasmus (topically).
Red spots like ringworm on back.
Cutting pain in sacrum in morning.
[32] **Upper Limbs.** Red spots on hands.
Skin peels off the hand.
Dry heat on back of hands; slight moisture of palms.
[33] **Lower Limbs.** Rheumatism of hips.
Tearing pain in hip.
Intolerable pain confined to common tendon of iliac and psoas muscles; < from least movement; extorts cries when he tries to cross his limbs; no pain if he lifts leg gently with hand; < 8 P.M. in bed, cannot then change his position or sleep.
Pains in limbs < from changes of temperature and under influence of moist heat.
Weakness of legs; worse at knees.
Legs do not grow as rapidly as rest of body.
Pain as from a sprain in ankle joint.
Tearing pain in feet.
Sensation of stiffness in feet.
Toe joints pain as if sprained.
Burning in soles.
[35] **Rest. Position. Motion.** Lying down: relieves pain in abdomen.
Lying on back: dull pain in occiput.
In bed: pain in tendon <; cold at night.
Must sit bent forward: with pain in epigastrium.
Rising from a seat: transient vertigo.
Motion: increases pain in common tendon of iliac and psoas muscles; makes rheumatism <.
Every step: causes excruciating pain in intestines.
[36] **Nerves.** Lassitude, especially in lower limbs; a muscular weakness, with rheumatic pains; generally worse in morning.
Child drowsy, lifeless; would not walk; torpor of bowels; great paleness.
[37] **Sleep.** Drowsiness after a meal.
Muscles twitching on falling asleep.

Digitized by Google

Sleep prevented by: stitches in chest; weight in stomach; thirst.
Coldness felt in sleep and awakening him frequently.
Restless sleep.
Dreams: of water and storm; of rapid transit from place to place; anxious; continue after waking.

[38] **Time.** Night: catarrhal ophthalmia.
Morning: dull pain in occiput; heaviness of head and accumulation of mucus in throat; cutting pain in sacrum; rheumatic pains worse.
Forenoon: jerking in jaws and upper molars; pressure in epigastrium and transverse colon.
Afternoon: sweat.

[39] **Temperature and Weather.** Worse in open air: chest complaints.
Change of temperature: pains in limbs worse.
Moist heat: pains in limbs worse.
Damp cold weather: tearing and stinging in different parts of body.

[40] **Fever.** Chilliness and heat alternate, more evenings; acrid sweat causing itching; hard pulse.
Cold at night in bed.
Vomiting during fever.
Sweat acrid, offensive.
Sweat in afternoon.

[41] **Attacks, Periodicity.** Periodical asthma.
Stitches with paralytic weakness or tearing; sometimes increasing to a high degree and then diminishing in same way.

[42] **Locality and Direction.** Right: pressing, jerking in upper molars; pain in side; dull stitches in mammæ.
Left: catarrhal deafness; smarting at junction of alæ nasi and face; smarting near angle of lips; pain in chest.
Pains go from within out, expanding sensation.

[43] **Sensations.** As of a hair on tongue; as if something cold then hot and stinging ascended œsophagus; as if intestines would be torn apart when stepping; expanding sensation, pains go from within out.
Pain: in region of kidneys; in l. side of chest; in tendon of iliac and psoas muscles; in limbs.
Dull stitches: in r. mamma.
Lancinating: in one side of chest.
Stitches: in pectoral muscles and beneath scapulæ.
Transitory jerking: in jaws and upper molars.
Darting pains: in neck.
Cutting: in sacrum.
Drawing: in teeth; in neck.
Tearing pain: in hip; in feet.

Digitized by Google

Pressing pain: from within out in head; in jaws and upper molars.
Dull pain: in occiput; in bowels.
Pressive pain: from above root of nose.
Sprained feeling: in ankle; in toe joints.
Soreness: of tarsi; of vulva and thighs; in larynx.
Raw feeling: in larynx.
Burning: in soles; of skin.
Smarting: at junction of alæ nasi and face; near l. angle of lips; of vulva.
Stinging: in one side of face.
Heaviness: in head; in eyes.
Weakness: of legs; muscular.
Stiffness: in feet.
Heat: in larynx; on back of hands.
Coldness: felt in sleep.
Tickling: in lower teeth; in larynx.
Itching: of face; of vulva; of skin.
Dryness: of lips; of tongue; in larynx.

[44] **Tissues.** Stings and bites.
Dropsy; after protracted intermittent in marshy districts.

[45] **Touch. Passive Motion. Injuries.** Touch: causes pain in swollen mammæ.
Pressure: must use it during pain in epigastrium and transverse colon; cannot bear it on distended bladder.
Stings and bites.

[46] **Skin.** Skin sensitive; dry; wilted.
Swelling with itching and burning.
Herpetic, itching, burning, red or whitish spots on a swollen surface.
Tetter on ankle.

[47] **Stages of Life, Constitution.** Fleshy people: catarrhs.
Fleshy, old people; dyspepsia.
Those accustomed to high living and excessive eating.

[48] **Relationship.** Similar to: *Bryon.*; *Capsic.* (asthma, fetid breath with cough); *Coloc.* (colic, hip-pain); *Ignat.*; *Lycop.*; *Nux vom.* and *Senega.*
Not following well: *Aloes*, *All. cep.*, *Scilla.*
Complementary to *Arsen.*, especially in catarrh, asthma and effects of overexertion.
Antidote to *All. sat.*: *Lycop.*

ALOE SOCOTRINA.

Socotrine Aloes. *Liliaceæ.*

One of the oldest and most famous drugs, largely cultivated, and in use as a horse-medicine, hence rarely to be obtained pure from the shops. From the collection of the College of Pharmacy some of the genuine *socrotine aloes* was obtained. It was brought from the Sultan of Muscat, by a physician, in the service of the U. S. Navy, who made the Sultan's acquaintance while on an expedition from the United States. This was made the basis of all of Boèricke & Tafel's preparations.

Aloe was most proved by Helbig in 1833, and several under his lead. The first publication of provings was made by Buchner, 1821. A complete monography, adding to all the former the provings made in this country with the genuine Socotrina, was given by C. Hg. in his American provings, 1856, pp. 764 to 862.

[1] **Mind.** Lassitude, alternating with great mental activity.
- She knew she would die in a week. θHysteria.
- Life is a burden. θColic.

Great disposition for desultory thinking.
Children chat and laugh.
Aversion to labor; disinclination to mental labor; it fatigues him; general languor.
- Disinclined to move.

Anxiety and ebullitions.
Restlessness and fear; fear of men.
Ill-humored; hypochondriacal, < in cloudy weather.
Dissatisfied and angry about himself, more so when he is constipated or suffers from pain.
- An easily excited, angry, revengeful state of mind, could not brook opposition, wanted to destroy object of wrath, relief from tea or mild stimulants; < in middle of day.
- Attacks make her frantic, often loses consciousness. θColic.

Hates people, repels everyone.
- When sitting in a chair or lying in bed, complains of persons stepping hard or quickly. θHysteria.

Restlessness with ebullitions of blood.
Fright at slight noises, after a nocturnal emission.

[2] **Sensorium.** Giddiness and starts.
Giddiness, with anxiety when moving; he feels as if he was sitting too high (after dinner).

Digitized by Google

Dulness in forehead, with chilliness.
Vertigo: as if everything whirled with her, < on going upstairs or turning quickly; everything seems insecure; > after nasal catarrh sets in.
Loses consciousness, with frantic spells.

[5] **Inner Head.** ▮Congestion to head, compelling one to sit up.
▮▮Headache across forehead, with heaviness of eyes and nausea.
▮Weight on vertex; pressure in forehead and occiput.
▮Dull pressive pain: in supraorbital region; in ▮sinciput.
Pressing outward to temples, with periodic heat of face and flickering before eyes.
▮Stitches in temples aggravated by every footstep.
▮Headache after insufficient stool; with abdominal pains.
▮▮Headaches < from heat, > from cold applications.
▮▮A pain in forehead which compels patient to close eyes, or, if he wishes to look at anything, he must make aperture of lids very small.
Headache alternating with lumbago.

[4] **Outer Head.** Sensitiveness of scalp in spots.
Dryness of hair.

[5] **Sight and Eyes.** ▮Yellow rings moving before eyes.
Unsteady, anxious look.
Dimness before eyes while writing.
Flickering.
▮Pain deep in orbits, as if in muscles, < on r. side.
Congestion to eyes; pressure in orbits.
Lachrymation.
▮Occasional attacks of twitching of l. eyelids during day, and a spasmodic jerk of whole body just when falling asleep at night.
Heaviness of eyes, with frontal headache.
Has to close eyes, with pain in forehead.

[6] **Hearing and Ears.** ▮▮Hates musical sounds and noises, they set her all in a tremor. θHysteria.
Cracking in ears when moving jaw.
Sticking pain in l. ear, later in r.
Internal and external heat of ears.

[7] **Smell and Nose.** Nosebleed, in bed after waking.
Coryza, with burning and pain in nose; on sneezing, stitches in umbilical region.
Redness of nose in open cold air.
Coldness of point of nose.
Dryness of nose in morning, in bed.

[8] **Upper Face.** Heat of face with headache or when excited.
Face pale, during cloudy weather.
Face sickly, sunken.

Digitized by Google

[9] **Lower Face.** Lips: redder than usual; dry, cracked; moist, soreness of borders; white, scaly.
Pain when yawning or masticating solid food; < in evening and in morning, when waking.

[10] **Teeth and Gums.** Sensitiveness in a hollow molar; < when eating; later a pustule appears on gum, near diseased tooth.
Concave edges of teeth seem sharp, they hurt the tongue.

[11] **Taste and Tongue.** ‖Metallic taste, with dry, irritative hacking.
Taste: bitter, sour, like ink or iron.
Tongue: coated yellowish-white; stiff; dry, red.
Severe fine stitches, from behind forward, in under part of tongue when moving it.
Yellow ulcers on tongue.
Dry tongue and mouth, with increased thirst and greater redness of lips.

[12] **Inner Mouth.** Inflamed, sore spots in the mouth, on tongue, inside of cheeks; yellow ulcers on tongue.
Sickening smell from mouth.
Increase of saliva.

[13] **Throat.** Fauces raw, hot, as if burnt.
Palate swollen; arches of velum palati pain on chewing hard food, or on yawning, < in evening and in morning on awaking; < on empty swallowing.
Hawking of thick jelly-like mucus, in lumps, from fauces and posterior nares; rawness and swollen feeling in pharynx.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Appetite for salt food.
‖No appetite. θHysteria.
Thirst: with dryness of mouth; awakens at night.
Longing for juicy articles; fruits, especially apples.
Aversion to meat.

[15] **Eating and Drinking.** Soon after supper, growling in abdomen, as if griping of bowels would take place.
‖As soon as he eats anything, he must go to stool.
‖‖He has to hurry to closet immediately after eating and drinking. θColic.
After eating: flatulency, pulsations in rectum and sexual irritation.
After meals: distension of abdomen.
Hungry during diarrhœa; hungry after morning stool.
Sour food does not agree.
Beer relieves pains in anus; drinking vinegar, colic.
Water causes pains in stomach.
Thirst while eating, after eating, and during night.
Sweats after drinking.

Digitized by Google

[16] **Hiccough, Belching, Nausea and Vomiting.** Belching, with oppression of stomach.
Eructations: bitter; acrid; sour or tasteless.
Rising of flatulence towards throat, with sensation as if vomiting were coming on.
Nausea: with frontal headache; with empty feeling in stomach; with pain at umbilicus.
Vomiting of blood.

[17] **Scrobiculum and Stomach.** Painful pressure under sternum; pressure through pit of stomach to back.
Pain in scrobiculum on making a false step.
Fulness in stomach, followed by distension of epigastrium.
Pain and fulness in stomach after drinking water.

[18] **Hypochondria.** Painfulness in hypochondria, with chilliness and diarrhœa; painful weakness of legs.
Hepatic region: burning; ‖uneasiness, heat, pressure and tension; dull pain, worse on standing, so that he bends forward.
Stitches from liver into chest, obstructing respiration.
Stitches in liver, when drawing a long breath.
Distension of hypochondria, better after passing flatus.
Increases the flow of bile.
Stitches from spleen into chest, or drawing into loins.

[19] **Abdomen.** Pulsation in region of navel.
Distension of abdomen, especially epigastrium, with flatus moving about; worse after meals; during menstruation; on motion.
‖Congestion to abdomen (portal system); burning sensation.
‖‖Sensation of fulness, heaviness; heat and inflammation.
Pelvis feels if filled with hot water.
Pain around navel, worse from pressure.
Stitches in umbilical region from sneezing.
‖Rumbling in abdomen.
‖‖Discharge of much flatulency, burning, smelling offensive, relieving pain in abdomen; after each meal, in evening and morning, before stool.
‖Cutting across abdomen; with ill humor, anthropophobia; not disposed to go into open air, although it relieves.
‖Abdominal walls painful when rising, pressing to stool, when touched, and when standing erect.
‖Heaviness, fulness, and pressing downward in pelvis.
Left side of abdomen bloated, with gurgling in descending colon; worse after eating.
‖A twisting and griping pain in upper abdomen and

Digitized by Google

around navel, forcing him to sit bent up, which relieves; therewith, repeated urging to stool, but only offensive burning flatus passes, with short relief of pain.

‖Griping in abdomen, before, with and after stool.

‖Feeling of weakness in abdomen as if diarrhœa would result; but evacuation did not ensue for eight hours.

Shooting and boring in region of navel, < from pressure.

‖Painfulness in whole abdomen, especially in sides and along both sides of navel, which cannot endure being touched; on making a false step on stone pavements it hurts very much in pit of stomach.

‖Dull abdominal pain, as after taking cold, morning and evening repeatedly, still without inclination to stool.

‖‖Great and cutting-griping pain in r. and lower portion of abdomen, which was excruciating before and during stool; after stool all pains ceased, leaving profuse sweating and extreme weakness. θColic.

‖Fulness, heat and heaviness in epigastrium; laborlike pains in groins and loins, < when standing. θProlapsus uteri.

‖‖Feeling as if a plug was wedged in between symphysis pubis and os coccygis.

‖Dragging down in abdomen.

[20] **Stool and Rectum.** Urging to stool continuously; worse immediately after eating; feeling of fulness and weight in pelvis; only flatus passes.

‖Urging to stool with passage of urine; every time on passing urine, feeling as if stool would pass.

‖‖Urging to stool, only hot flatus passes, giving relief; but urging soon returns, with a sensation as of a plug wedged between symphysis pubis and os coccygis.

‖‖Flatus offensive, burning, copious; much flatus with small stool; burning in anus after passage of flatus.

‖‖Stools quite profuse with jelly-like lumps, and accompanied with wind. θColic.

‖Watery stools, aggravated by standing or walking.

‖‖Bloody water. θDysentery.

‖‖Lumpy watery stool.

‖Profuse watery diarrhœa, accompanied by wind, containing lumps "looking like frog-spawn." θColic.

‖Diarrhœa yellow fecal, bright yellow, bilious; great rumbling in bowels, escape of large quantities of wind; < morning; evening; in damp weather; from overheating; after cold taken in a damp room; after chagrin.

‖‖Diarrhœa driving out of bed very early in morning.

Stools yellow fecal, worse after eating; before stool violent urging; during stool tenesmus and discharge of much flatus; after stool faintness.

Digitized by Google

‖Hospital diarrhœa.
Small stools.
‖‖Dysenteric diarrhœa.
‖Frequent stools of bloody water, violent tenesmus; fainting; passage of mucus in jelly-like lumps, much flatus. θDysentery.
‖‖When passing wind, feeling as if stool would escape.
‖‖Want of confidence in sphincter ani; rectum seems full of fluid which feels heavy, as if it would fall out. θDiarrhœa.
‖Stool passes without exertion, when walking or standing, after eating.
‖‖Solid stool passes involuntarily; dropping away unnoticed by the sick, even children at night in bed.
During stool: congestion to head and face; hunger; cutting about navel extorting cries; chilliness; fainting; heat in rectum; much flatus; tenesmus.
‖Pains disappear after stool, when she appeared very weak and covered by a cold sweat.
‖‖Stools leaving him with a feeling of extreme weakness and prostration.
‖‖Sensation of heat and burning in rectum.
‖Heaviness in rectum.
‖Stricture of rectum.
‖Itching, pulsating in rectum as from fissures, < sitting.
After stool: burning weight and itching in anus; protruding piles; cutting; feeling as if still more would come.
‖The not too hard feces cause a pricking in anus, later continuous pain in anus compelling him to draw it together frequently, whereby it becomes tense and achy.
‖Fulness and pressing out in anus.
‖‖Hemorrhoids: protude like a bunch of grapes; constant bearing down in rectum; bleeding; sore, tender, hot; relieved by cold water.
‖Itching and burning in anus, preventing sleep.

[21] **Urinary Organs.** ‖‖Pain in l. side down along ureter. θHysteria.
‖Every time on passing urine, feeling as if some thin stool would escape with it.
‖Burning when urinating.
‖Frequent urging to urinate; > at night; or in afternoon.
Urine copious; especially after stool.
Urine saffron-yellow, becoming cloudy; scanty, hot.
Sediment yellowish, like bran, or slimy.
‖Incontinence of urine. θIn an old man with enlarged prostate (diarrhœa and urinary symptoms are present).

Digitized by Google

‖So urgent a desire that he can hardly retain urine.
Erections after urinating.

[22] **Male Sexual Organs.** Semen comes too soon.
All the semen is not ejected.
‖Sexual desire increased: after awaking; after eating; in evening.
Seminal emissions; strong desire afterwards.
Involuntary emissions during siesta.
Testicles cold; penis small; scrotum relaxed; epididymis sensitive, especially to touch or while walking.
Offensive sweat on genitals.
Erections in morning and after passing water.
Gonorrhœa.
Itching of prepuce.

[23] **Female Sexual Organs.** ‖Pain in hypogastrium as if menses were coming on.
‖Fulness, heaviness in uterine region, with laborlike pains in loins and groin; worse standing.
‖Laborlike pains extending down legs. θProlapsus uteri.
‖Uterine hemorrhage about climaxis. θProlapsus uteri.
‖Menses too early and too profuse; with dragging down in rectum and fulness in pelvis. θProlapsus uteri.
‖Menses too early and last too long. θProlapsus uteri.
During menses: earache; headache relieved by cold water; distension of abdomen; backache.
‖Leucorrhœa of bloody mucus preceded by colic. θProlapsus.

[24] **Pregnancy. Parturition. Lactation.** ‖Lameness, which seems to arise from a sense of weight and pressure into pelvis.
‖After confinement, dysentery with faint feeling after each effort at stool.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice husky. Hawking.
Scraping in larynx.

[26] **Respiration.** Whistling in throat, as if something had fallen into trachea.
Difficult respiration.
Respiration impeded: by stitches through l. side of chest; by stitches from liver into chest.
When drawing a long breath: stitches in liver.

[27] **Cough.** Cough with stitches in r. side of larynx; sputa of yellow, tenacious mucus.
Cough with scratching in throat.
‖When she would sit down after standing, or stand up after sitting down, she would cough and tears would flow. θHysteria.

Digitized by Google

Spitting blood.

[28] **Inner Chest and Lungs.** Congestion to chest; dry cough; bloody expectoration.

Front of chest feels sore on deep inspiration.

Weakness of chest.

Stitches into chest from spleen.

[29] **Heart, Pulse and Circulation.** Strong beat of heart occasionally; pain through to l. scapula.

Pulse: accelerated; weak, suppressed, after vomiting: slow in afternoon.

Ebullitions, with anxiety; restlessness.

[31] **Neck and Back.** Dull, steady pain on either side, just above innominata, running into rectum, later becomes a throbbing, itching sensation of fulness, always with a feeling as if prostate was swollen and sensitive; < in wet weather. Sometimes there was twitching in perineum, at one time feeling as if "asleep," all ending with a slight pain and lameness in l. thigh of short duration.

❙Backache. θProlapsus uteri.

Lumbago, alternating with headache.

Stitches through sacrum to loins.

Pressure and heaviness in sacral region while sitting; better from motion.

Creeping beginning in sacrum, in bone, extending to coccyx, until it was a creeping in bones over whole body.

[32] **Upper Limbs.** Heaviness of r. arm; weakness of wrist joint.

[33] **Lower Limbs.** ❙❙Extending down legs: laborlike pains. θProlapsus uteri.

Painful weakness of legs.

❙Painful weariness in calves.

Weakness of ankle joint.

❙Soles of feet pain when walking on pavement.

Great toe feels as if sprained.

[34] **Limbs in General.** ❙Lameness, weariness in limbs; weakness of joints; often with abdominal disturbances.

Pains of short duration, as if bruised or dislocated (l. forearm, r. scapula, l. ribs).

Pricking, dull twitching, drawing pains in joints (fingers, knees, elbows).

Cold hands with warm feet.

[35] **Rest. Position. Motion.** Standing: dull pain in hepatic region, watery stools <; causes involuntary stools; laborlike pains <.

Sitting bent: relieves griping in abdomen.

Sitting: pulsating pains in rectum <; backache; congestion >.

Motion: causes giddiness, with anxiety; nausea and pain in distended abdomen.

Digitized by Google

Walking: watery stools worse; causes involuntary stools; epididymis sensitive.
False step: causes pain in scrobiculum.
Stepping: aggravates stitches in temples.
Rising: abdominal walls painful.
Turning quickly: vertigo.
Ascending stairs: vertigo.

[36] **Nerves.** ‖Debility. θProlapsus uteri.
‖General weakness, weariness.
‖Weakness inconsiderable, even when skin was golden color.
Lassitude alternating with mental activity.
‖‖Extreme prostration, with perspiration.
Paralytic drawing in muscles.
‖Faint feeling after stool. θDysentery.
‖Trembling from musical sounds or noises. θHysteria.
‖Hysteria from poisoning of blood with uric acid.

[37] **Sleep.** ‖Sleeps soundly for 8 hours, awakes very lazy and refreshed; feels better in A.M.
Drowsy, dozing in morning.
Awakened: by thirst; urgency to urinate; pollutions and sexual desire; pains in back; chill.
Oppressive dreams of danger, could not cry out; dreams of soiling himself.
Spasmodic jerks when falling asleep.
Cannot sleep: heat and a crowd of thoughts busy him; itching and burning in anus; cold hands and feet.
During siesta: seminal emission.

[38] **Time.** Middle of day: angry, revengeful disposition.
Afternoon: frequent urging to urinate.
Night: urging to urinate worse; sweat.

[39] **Temperature and Weather.** ‖Relieved by cold water: headache; prolapsus uteri.
Heat: aggravates headache.
In cloudy weather: out of humor; face pale.
Damp weather: causes diarrhœa; flatulency worse.
Wet weather: pain in back.
Worse in hot, damp weather.
Cold applications: relieve headache and piles.
In open air: nose red; raw voice; averse to walk in wind; not disposed to go into air although it relieves.
‖Better in cold weather; but cannot take a cold-water bath as it acts as stimulus to genitals.

[40] **Fever.** Chilly: with coryza, in cold open air; at stool, shivering.
Cold hands and feet in bed, preventing sleep.
Cold hands, warm feet.
Heat in spots, on scalp or in face.

Digitized by Google

Ebullitions, with anxiety and restlessness.
Sweat: smells strong; offensive on genitals; at night, after drinking.

41 **Attacks, Periodicity.** Twitching of eyelids.
Periodic heat of face, with headache.
‖Attacks preceded by obstinate constipation. θColic.
‖Sudden, quickly passing urging to stool.
Pains of short duration.
‖As Winter approaches each year itch manifests itself.
Alternate: headache and lumbago.

42 **Locality and Direction.** Right: eyes, nose, stitches in larynx; scapula bruised; arm heavy; wrist joint weak.
Left: wind in descending colon; stitches in chest; pain through to l. scapula; ribs bruised; pain along ureter; pain and lameness in thigh.
Left to right: earache.
From behind forward: stitches in tongue.
In spots: sensitiveness of scalp.

43 **Sensations.** ‖Feeling of vermin running over body. θHysteria.
Giddiness, feels as if he was sitting too high; as if everything whirled with her; musical sounds and noises set her in a tremor; fauces as if burnt; as if griping of bowels would take place; as if vomiting was coming on; empty feeling in stomach; pelvis as if filled with hot water; as if diarrhœa would result; as if a plug was wedged between symphysis pubis and os coccygis; as if stool would pass; as if stool would escape with flatus; as if rectum was full of fluid which feels heavy, as if it would fall out; feeling as from fissures in rectum; is compelled to contract anus, which makes it tense and achy; as if stool would escape when passing urine; can hardly retain urine; faint feeling after effort at stool; as if something had fallen into trachea causing whistling; as if prostate was swollen and sensitive; feeling as if asleep in perineum; female organs feel as if torn; as of hairs on back of hand and fingers.
Pain: in forehead; deep in orbits; at umbilicus; in scrobilicum; in stomach; in hypochondria; in l. side along ureter; in hypogastrium.
Boring: in region of navel; in rectum.
Stitches: in temples; in umbilical region; in under part of tongue; from liver into chest; from spleen into chest; through l. chest; in r. side of larynx; through sacrum to loins.
Pricking: caused by feces in anus; in joints; in fingers, knees, elbows.
Sticking: in ears.

Digitized by Google

Shooting: in region of navel.
Cutting: across abdomen; in r. and lower portion of abdomen; in anus.
Griping: in upper abdomen; around navel; in r. and lower portion of abdomen.
Burning: in nose; in hepatic region; in abdomen; in anus; when urinating.
Scraping: in larynx.
Soreness: of borders of lips; in mouth; in front of chest.
Rawness: in pharynx.
Pressure: in forehead and occiput; under sternum; through pit of stomach to back; in hepatic region; in sacral region.
Pressing outward: to temples; in anus.
Pressing downward: in pelvis; in rectum.
Drawing: into loins; in joints; in fingers, knees, elbows.
Laborlike pains: in groins and loins; down legs.
Dragging: in abdomen; in rectum.
Dull pressive pain: in supraorbital region; in sinciput; in hepatic region.
Painful weakness: of legs.
Bruised feeling: l. forearm; r. scapula; l ribs.
Dulness: in forehead.
Dull steady pain: on either side just above innominata, running into rectum.
Pulsations: in region of navel; in rectum.
Sprained feeling: in great toe.
Dislocated feeling: l. forearm; r. scapula; l. ribs.
Heaviness: of eyes; in abdomen; in hypogastrium; in rectum; in uterine region; in sacral region.
Burning weight: in anus.
Fulness: in stomach; in abdomen; in anus; in uterine region; in pelvis.
Tensive: in hepatic region.
Swollen feeling: in pharynx.
Uneasiness: in hepatic region.
Lameness: from weight and pressure in pelvis; in l. thigh; in limbs.
Heat: of face; of ears; in hepatic region; in hypogastrium; in rectum; of r. arm; in spots on scalp or in face.
Coldness: of point of nose.
Creeping: from sacrum over whole body.
Weakness: of chest; of wrist joint; of ankle joint; of joints.
Dryness: of hair; of nose; of mouth.
Itching: in rectum; in anus; of prepuce; of legs.

" **Tissues.** Congestion to head and chest, but especially to portal system.

Digitized by Google

Mucous membranes; especially causes production of mucus in jelly-like lumps or cakes.
Acts mainly on rectal mucous lining.

[45] **Touch. Passive Motion. Injuries.** Touch: muscles (especially of abdomen) sensitive; scalp tender; epididymis sensitive.
Pressure: aggravates pains in head; abdominal pains.

[46] **Skin.** Itching, especially of legs.
Pimples on abdomen.
Spots which, when scratched, pain and become sensitive.

[47] **Stages of Life, Constitution.** ‖Old people. θColic and diarrhœa.
Man æt. 45 taken with dysentery confining him to his bed a month at a time.
Old men with enlarged prostate.
Women æt. 55; and 65; colic.
Climacteric years.
Phlegmatic, indolent.
‖Women of relaxed phlegmatic habit. θProlapsus uteri.

[48] **Relationship.** *Aloe* has many symptoms like *Sulphur*, and is equally important in chronic diseases, with abdominal plethora, etc.
Similar to *Ailant.* (dull frontal headache); *Gum. gutt.* (diarrhœa); *Amm. mur.* (abdominal and diarrhœic symptoms); *Nux vom.* (gastric abdominal and uterine troubles; bad effects of sedentary habits).
Antidotes to *Aloe: Sulphur*, mustard.
Camphor relieves for awhile.
Nux vom. and *Lycop.* relieve the earache.

ALUMEN.

Alum. *Aluminii et Potassii Sulphas.*

The well-known astringent double salt, found as a native mineral near the volcanoes of the Lipari Isles, in Sicily; abundant in this country in Maryland and in Tennessee. One of the oldest medicines ever used.

Introduced and proved by C. Hg., in 1845, with the assistance of Drs. Husmann and Rhees. Also proved by Dr. Jeanes, whose frequently corroborated symptoms are included.

A full monography was published in the Journals, in 1872, and is contained in C. Hg.'s *Mat. Med.*, Vol. I., published by Boericke and Tafel, 1873. 734 numbers on thirty-nine pages.

[1] **Mind.** Lectrophilie, keeps bed without necessity, plaguing her family.
‖ Anxiety, doubts if medicine will relieve her.
Feels like after unpleasant news.
Spells of rage, attacks people.
Thinking about her disease causes palpitation.
Unpleasant news excites and causes nervous tremors.

[2] **Sensorium.** Vertigo: lying on his back, with weakness in pit of stomach; > opening eyes; > turning on r. side.
Giddy looking down, as if falling forward; rush of blood to head.
Deathlike fainting spell, with loss of all faculties.

[3] **Inner Head.** ▮Neuralgic headache. θNasal polypus.
Jerking in l. forehead, evening.
‖ Pressing on top of head.
Pains coming and going, from place to place; in forenoon.
‖ Pain < morning, on awaking.
Shooting through temples, with sickness, > by drinking cold water.
Rush of blood to head.

[5] **Sight and Eyes.** ▮Wild look, with spells of rage.
▮Sees things double by candlelight.
Pupils dilated.
▮Right eye squints towards nose.
▮Spots on cornea.
▮Prolapsus iridis after cataract operation.
▮Staphyloma corneæ.
Bruised feeling on inferior edge of orbit of l. eye, on pressure, or by moving eyelids.

Digitized by Google

‖Varicosities of conjunctiva.
‖Trachoma (topically and internally).
‖Purulent ophthalmia of infants.
Itching burning on border of lower lids; right to left.

[6] **Hearing and Ears.** ‖‖Hears every little noise in sleep.
Heat in both ears and l. side of face at night.
‖Purulent otorrhœa.

[7] **Smell and Nose.** Dryness of nostrils and choanæ.
Nosebleed.
‖Nasal polypus l. side, with rough skin all over face and body, and neuralgic headache.
‖Lupus or cancer.

[8] **Upper Face.** Expression animated; with fever.
Left side red and hot.
Complexion sickly, sallow; yellow.
Pale as a corpse, lips blue.

[9] **Lower Face.** Pain in l. articulation of jaw close to ear.

[10] **Teeth and Gums.** ‖Teeth loose.
‖Gums swollen, inflamed, spongy, with a grey, dirty coating; teeth surrounded by proud flesh. θStomatitis.
‖Profuse hemorrhage after extraction of a tooth.

[11] **Taste and Tongue.** Taste: ‖bitter; sourish, astringent; sweetish, disgusting after taste.
Tongue clean, except a slight coating of slime on back part.
Tongue: ‖‖dry; burning in evening; sour feeling; stitches worse at tip.
‖Scirrhus of tongue.

[12] **Inner Mouth.** Mouth dry, without thirst.
‖Spreading ulcers in mouth.
‖Noma.
Mouth burning, ulcerated; grey, dirty spongy skin about a tooth, which is surrounded with proud flesh; offensive saliva.
‖Profuse ptyalism, mercurial in origin or not.

[13] **Throat.** ‖Uvula inflamed and enlarged.
‖Uvula elongated, relaxed after catarrh.
‖Predisposed to tonsillitis.
‖Veins about fauces distended; velum red; much hawking.
Catarrh of fauces and throat.
‖Neuralgia of throat.
Spat a lump of coagulated blood in morning after rising.
‖Throat sore and dry when talking or swallowing fluids; difficult swallowing.
‖Throat relaxed, ulcerated.
‖Burning and severe pains; heat up from stomach.
‖Spasmodic constriction in œsophagus; fluids can scarcely be swallowed.

Digitized by Google

Prickling sensation in both sides of throat and great dryness, with constant desire to drink.

‖Throat chronically affected; mucous membrane covered with mucus, causing troublesome cough.

[14] **Appetite, Thirst. Desires, Aversions.** Appetite increased, even with fulness in stomach.

Loathes food.

Thirst: throat dry; and increased appetite; with heat in stomach, > by drinking cold water; intense, with fever.

Mouth dry, but no increase of thirst.

[15] **Eating and Drinking.** Before breakfast: attacks of nausea; cough.

During breakfast: cough worse.

After breakfast: cough better.

Eating > her sinking feeling in stomach.

After meal, heaviness in stomach; throbbing; distension; vomited everything.

At dinner: erections.

Drinking cold water: relieves headache.

[16] **Hiccough, Belching, Nausea and Vomiting.** Squalmish at intervals, when awaking at night, prevents falling asleep again.

Nausea with headache, pain in stomach and retching.

Nausea with faintness and weakness, more in morning, with restlessness and excitement, giddiness; chilliness.

‖Vomits large quantities of glairy mucus, or tough, colorless, sour slime, seldom containing bile, oftener food.

‖Atonic hæmatemesis: vomiting of blood.

Habitual hæmatemesis in hard drinkers.

‖Vomits everything he eats.

‖Vomiting, with colic.

[17] **Scrobiculum and Stomach.** A sensation of fulness in pit of stomach urges him to take a deep breath, but he cannot.

Weak faint feeling in pit of stomach; sinking sensation.

Pain, nausea and rush of blood to head and drowsiness.

‖Pain with faintness, sickness and cold sweat.

‖Burning heat and feeling of fulness.

‖Heat in stomach, > by drinking cold water.

Severe pain to l. of scrobiculum, > standing still and pressing on it.

‖Pyrosis and gastric catarrh.

Villi of stomach becoming disorganized; mucus lining dark red or brown; walls thickened, more at pylorus, and hardened, as if tanned (toxic).

Pressing followed by throbbing; lying on back in evening.

Digitized by Google

[19] **Abdomen.** Warm creeps running down, followed by jerking contractions of abdominal muscles, towards linea alba.
Relaxed feeling in abdomen.
Distension from wind.
‖Burning pain low down and in small of back prevents him getting up; as if back would break.
‖Colic pain > from pressure; < when walking, with fulness and heaviness.
‖Spasmodic wind-colic.
‖Abdomen sensitive to touch during colic.
‖Abdomen and navel sunken in; walls hard and retracted towards spine.
‖Potter's colic with sleeplessness, headache, crawling, tingling in limbs, constipation; > from pressure; abdomen retracted; tongue dry, black; urine red and scanty; violent delirium and debility; also after opium.
‖Lead colic, violent as if drunk and enraged; pulse slow; tongue in folds and dry; trembling of limbs and pain as if beaten.

[20] **Stool and Rectum.** Violent ineffectual urging.
Stool: less frequent, dryer and harder; large, black, hard or in small pieces like sheep's dung; no relief afterwards.
‖Difficult stool with some blood and subsequent beating in anus.
‖First hard, then soft stools and pains following.
‖Diarrhœa yellow as an infant's; ‖slimy after colic pains, causing great weakness.
‖Diarrhœa ichorous, mixed with blood of an offensive odor; abdominal typhus; ‖great exhaustion.
‖Very weakening colliquative diarrhœa.
‖‖Masses of coagulated blood. θTyphus abdominalis.
‖Putrid dysentery.
Violent pains going from rectum down thighs.
During stool: ‖dyspnœa; pains in rectum; tenesmus.
After stool: ‖‖scarcely endurable pain, with scirrhous indurations in rectum; no fissures.
‖‖Ulcerations in rectum, painful excrescences; fetid bloody ichor.
‖Anus protruding, tumors inflamed and painful.
A small lump at anus itching violently, < at night.
Itching at anus all evening; pruritus.
‖Long-lasting pain in rectum after each stool.
‖Painful, bleeding piles; with aching in anus.
Bleeding from anus after wine or whiskey.

[21] **Urinary Organs.** ‖Diabetes mellitus.
‖Contractive sensations deep in pelvis with complaints of rectum and bladder.

Digitized by Google

Urine increased, free, acid.
‖Frequent urging, with scanty, clear flow, containing lumps of blood; sediment slimy, tough or membranaceous.
‖Frequent and painful urging, with painful passing of small quantities; now and then mixed with blood, at others, clear; after standing, thick as if mixed with clay, dirty, fibrous sediment; catarrh of bladder, mostly with the aged.
Incontinentia urinæ; enuresis.
‖Must urinate every hour or two, night and day.
Urine has an oily, iridescent film on it.
Urine scanty, reddish, in colic; bloody.
Blennorrhœa urethræ.
Itching of orifice of urethra.
[22] **Male Sexual Organs.** Unusual erections while at dinner.
‖Male parts weak, frequent emissions. θOnanism.
Spongy, sycotic warts.
‖‖Gonorrhœa; gonorrhœa preputialis; gleet.
Shooting pain from middle line of belly, as along a thread, down into penis.
Cutting pain in l. side of penis.
[23] **Female Sexual Organs.** ‖Affections of l. ovary with troublesome constipation.
Insupportable pain near l. groin, towards region of ovary.
‖Weight of uterus presses down collum; granulations of vagina; leucorrhœa copious; emaciation, yellow complexion.
‖Indurations of uterus, even scirrhus.
‖Ulcers of uterus.
‖Discharge of coagula from uterus (and rectum). θTyphus.
Menses scanty, watery; during catamenia, hands weak.
Metrorrhagia with atony.
Vagina very sensitive, narrowed by swellings of various size.
Pruritus vaginæ.
[24] **Pregnancy. Parturition. Lactation.** Faintish weakness during pregnancy, no vomiting; flushing, followed by throbbing of heart.
‖Flooding after childbirth.
:Cancer of mammæ.
‖Sore, inflamed nipples.
[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness; voice shrill, cannot talk loud; < from talking.
Voice sometimes high, sometimes low.
‖‖Voice entirely lost.
Talking increases hoarseness, causes tickling cough.
Scratching in larynx as from dust, roughness, brings up much clear mucus.

Digitized by Google

‖Epidemic membranous croup.
Constrictive feeling in windpipe.
‖Bronchitis.

[26] **Respiration.** ‖Inclined to take a deep breath.
‖Cannot take a full breath.
‖Oppression of chest, with colic.
Breathing oppressed, anxious, as from a heavy stone in chest.
Tightness across upper part of chest.
Rapid, short breathing with uneasiness in stomach.

[27] **Cough.** ‖With cough scraping in throat.
‖Dry cough in evening after lying down.
‖Cough from tickling in larynx caused by talking.
‖Coughs a long time every morning, with scratching in middle of sternum, pain in groin, in region of ovary.
θWhooping-cough.
‖Cough immediately after rising, excited by a tickling in throat; < during, > after, breakfast.
‖Chronic morning cough of old people.
‖Sputa: ropy (bronchitis and phthisis), scanty.
‖Atonic hæmoptysis.
:Phthisis.

[28] **Inner Chest and Lungs.** Pain under clavicle and r. shoulder when inhaling.
Stinging from upper chest through to back, awakens at night.
When bending, sore pain under r. nipple or in l. chest.
Feeling of weakness in lower part of chest and in abdomen.

[29] **Heart, Pulse and Circulation.** Feels warm in l. side opposite shoulder, also very tired.
At times feels well, then, when beginning to think of her disease, she feels the heart beat, and yet to the hand it seems to beat very little stronger than natural, and at other times motion is scarcely perceptible; sometimes contractions are frequent, at others seldom.
Violent palpitation from a throbbing in epigastrium extending to heart.
Palpitation from mental excitement.
Rapid, violent palpitation, < lying on r. side, or a length of time in one position.
Palpitation in attacks.
‖Dilatation of heart.
‖Pain from heart to lower part of r. leg.
Pulse frequent with fever; slow or threadlike with colic; intermitting.
Strong pulsation through whole body.

[30] **Outer Chest.** Chest sore and tender to touch above clavicle and over second or third rib, l. side.

Digitized by Google

[31] **Neck and Back.** Spine weak; evening.
Feels as if cold water was poured down back, with headache.
Pain where shoulder blade ends, near spine, r. side.
A warm, cramplike feeling below hips, going up l. side.
Pain all evening on both sides of spine on a line with inferior angles of scapulæ, with every deep inhalation.

[32] **Upper Limbs.** Weakness in shoulders, > bending forward.
Pain in l. shoulder; > from motion.
Feels as if a cord was drawn tightly around upper arm, causing pain in lines from ligature.
Trembling and twitching of arms.
Right wrist feels sprained.
‖ Hands weak, dropping things. θ During menses.
Pains in hands with other suffering.

[33] **Lower Limbs.** Pains in limbs, particularly at night.
Lassitude, numbness.
Bruised pain when standing.
Feels as if a cord was tied around leg under knee.
Cramps in calves.
Soles sensitive to pressure, when walking.
Stitches in r. big toe.
‖ Feet numb and cold, although covered up warm in bed.
Legs cold from knees down.
‖ Frozen feet.
; Ingrowing toe nails.

[34] **Limbs in General.** ‖ Bruised pains.
‖ Crawling, tingling.
Cold hands and feet with stomachache.

[35] **Rest. Position. Motion.** Lying on back: vertigo; pressing followed by throbbing in stomach.
Lying down: dry cough in evening.
Lying on r. side: palpitation worse.
Lying in one position long: palpitation worse.
Turning on r. side: relieves vertigo.
Standing still: pain in scrobiculum >; bruised feeling in limbs.
Motion: of eyelids, bruised feeling of orbit; pain in l. shoulder better.
Bending: sore pain in chest; weakness in shoulders better.
Cannot get up: pain in small of back.
Can hardly hold head up: with fever.
Walking: colic worse; soles sensitive.

[36] **Nerves.** Trembling, after rising, most in arms; excited.
‖ Trembling with pain as if beaten.
Nervous tremor and excitability of feeling as if agitated by unpleasant news.

Digitized by Google

‖Weak. θTyphus.
‖‖Weak and relaxed in stomach, abdomen and all the limbs.
‖Tired, faint, as if he would fall from his seat, forenoon.

[37] **Sleep.** Light sleep, hears every little noise.
Cannot get to sleep on account of orgasm.
Anxiety at night, nausea, headache.
‖‖Sleepless from fever. θColic.
Wakened by stinging in chest.
Disturbed by nightmare, 4 A.M.

[38] **Time.** Night: heat in ears and face; squalmish when awaking; itching lump in anus worse; stinging in chest; pain in limbs; anxiety, nausea and headache.
Night and day: must urinate.
Forenoon: pains in head change from place to place; tired and faint; internal heat.
Evening: jerking in l. forehead; tongue burns; pressing and throbbing in stomach; itching at anus; dry cough; spine week; pain on both sides of spine.
Morning: pain in head on awaking; spat coagulated blood after rising; nausea, fainting, giddiness and chilliness; coughs a long time.
4 A.M.: nightmare.

[39] **Temperature and Weather.** ‖‖Very sensitive to cold.
After taking cold, has a sore throat.
While washing, chest pains.
Exposure to air: roughens and chaps skin.

[40] **Fever.** Chill: metallic taste, slight nausea, palpitation; pain striking from heart across to lower extremity of r. lung; sensation as of cold water poured down back, and numbing coldness of feet, though covered warmly in bed; deathlike faintness with chill.
Chilly with sick stomach.
Coldness followed by headache.
Coldness of skin followed by heat and tingling.
Fever with intense thirst, nausea, etc.
Inward heat throughout body, in forehead.
Warm creeps over belly.
Chilliness, and another time inward heat.
Coldness with stomach pain, followed by heat with rush of blood to head; can hardly hold it up.

[41] **Attacks, Periodicity.** ‖Sudden attacks disappearing quickly: of beating or fluttering of heart.
Nausea, flushes, cramps, etc., disappear soon, return quickly.
‖‖Same hour, 3 P.M., pain in arm.
‖Every other morning: nausea, faintness and weakness, with restlessness and excitement.

Digitized by Google

Every hour or two: must urinate.

42 **Locality and Direction.** Right: eye squints towards nose; pain under shoulder; soreness under nipple when bending; pain to leg through heart; pain near spine; wrist feels sprained; stitches in big toe.

Right to l.: itching on border of eyelids.

Left: jerking in forehead; heat in side of face; nasal polypus; pain in jaw; pain in scrobiculum; cutting side of penis; affection of ovary; pain in groin; pain in chest when bending; soreness about clavicle and second and third ribs; warm feeling from hips up side; pain in shoulder.

Above downward: warm creeps in abdomen; pains from rectum to thighs; shooting from belly to penis; pain from heart to r. leg; feeling as of water being poured down back.

Front to back: stinging in upper chest.

Diagonally: pain from heart to r. leg.

Below upward: warm sensation from hips.

43 **Sensations.** As if agitated by unpleasant news; sinking faint feeling in stomach; warm creeps running down abdomen; relaxed feeling in abdomen; pain in limbs as if beaten; as from a heavy stone in chest; uneasiness in stomach; as if cold water was poured down back; warm cramplike feeling below hips; as if a cord was drawn tightly around upper arm; as if a cord was tied around leg under knee; as if he would fall from his seat, faint.

Pain: in l. articulation of jaw close to ears, to l. of scrobiculum; from rectum down thighs; in groin; in ovary; under clavicle and r. shoulder; from heart to lower part of r. leg; where shoulder blade ends; in both sides of spine; in l. shoulder; in hands; in limbs.

Jerking: in l. forehead.

Burning: in lids; in tongue; in throat; in stomach; low down and in small of back; in anus.

Shooting: through temples; from middle line of belly as along a thread down into penis.

Cutting: in l. side of penis.

Stitches: in tip of tongue.

Stinging: in vertex; in temple; in tip of tongue; in rectum; from upper chest through to back; in chest.

Prickling: in throat.

Sore pain: under r. nipple.

Bruised feeling: orbit of l. eye; in lower limbs; joints of arms; hands and feet.

Sprained feeling: in r. wrist.

Scraping: in throat.

Digitized by Google

Scratching: in middle of sternum.
Pressing: on top of head; in stomach.
Throbbing: in epigastrium; in stomach; in anus; through whole body.
Tightness: across chest.
Constriction: in œsophagus; in windpipe.
Contractive sensation: deep in pelvis.
Cramps: in calves.
Neuralgia: of throat.
Crawling tingling: in limbs.
Tingling: in skin.
Itching burning: on border of lower limbs.
Itching: in eyelids; in small lump at anus; of orifice of urethra; of scrotum; of shoulder.
Tickling: in larynx.
Heaviness: in stomach; in abdomen.
Fulness: in pit of stomach; in abdomen.
Faintish weakness: during pregnancy.
Weakness: in lower chest and abdomen; in shoulders.
Heat: in ears; in l. side of face; from stomach; in l. side opposite shoulder; in skin.
Coldness: of skin.
Dryness: of nostrils and choanæ; of throat; of skin.

" **Tissues.** ‖Hemorrhages from leech bites, extracting teeth, etc.
‖‖Parenchymatous bleeding from mouth, gums, nose, uterus.
Mucous membrane: dry in nose, on tongue, in mouth, larynx.
Emaciation.
Joints of arms, hands and feet feel bruised.

" **Touch. Passive Motion. Injuries.** Touch: abdomen sensitive; tenderness of upper l. chest.
Slight scratches bleed.
After extracting teeth, profuse bleeding.
After cataract operation, prolapse of iris.
‖After metallic pessaries, scirrhus.
Pressure relieves or increases colic.
‖‖In powdered substance or solutions, in burns or scalds, after a plunge of arm in boiling oil.
Pressure: causes bruised feeling in orbit; relieves pain in scrobiculum; colic better.

" **Skin.** Itching in eyelids, anus, scrotum and shoulder.
‖Skin dry; exposed to air, rough and chapped.
‖Rough skin all over body and face. θNasal polypus.
Furuncles on body, on thighs.
‖‖Ulceration less after a burning, or such as remain after different other applications to skin.

Digitized by Google

‖Fungous granulations.
‖Proud flesh.
‖Chilblains.
‖Indolent ulcers.
‖Scorbutic ulcers.

[47] **Stages of Life, Constitution.** Old people. θDisease of the bladder. See 21.
Children, profuse bronchial catarrh.

[48] **Relationship.** Similar to its relatives, *Aluminium*, *Alumina*, etc., and to: *Aloes* (rectum); *Capsic.* (long uvula); *Ferrum* (relaxed abdominal walls, prolapsed uterus, etc.); *Ferr. jod.* (leucorrhœa and prolapsus); *Kali bichr.* (stringy discharges from mucous membranes); *Mercur.* (prolapsed vaginia, uterus and rectum; tenesmus of rectum, etc.); *Merc. corr.* (burning and tenesmus of rectum); *Mur. ac.* (fluttering of heart, anal pains after stool with fissures); *Nitr. ac.* (ulcers; cancer recti; hemorrhages from all orifices; clots from rectum in typhoid; tenesmus, fissures, etc., of rectum); *Nux vom.* (rectum); *Opium; Plumbum* (colic; tenesmus of rectum; granular lids, etc.); *Ratan.* (fissure of rectum); *Stannum* (prolapsed vagina); *Sulphur* (pain through l. lung, etc.); *Sulph. ac.* (hemorrhages, etc.); *Zinc. met. et. sulph.* (eyelids; ulcers of cervix uteri; colic, etc.).
Antidote to: ‖lead poisoning; calomel and other mercurial preparations: *Aloes* (for vomiting of blood.)
Antidoted by: *Chamom.* (cramps in abdomen); *Nux vom.; Ipec.* (nausea and faintness); *Sulphur.*

Digitized by Google

ALUMINA, OR ARGILLA.

Pure Clay. *Aluminium Oxide.* $Al_2.O_3$.

Used by the Old School, but only according to very poor indications. Hahnemann had proved the pure earth when Hartlaub edited a collection of 975 symptoms, obtained from four provers, in his *Mat. Med.*, in 1829. The year after, Hahnemann published his own observations in *Stapf's Archiv.*, viz., 215 symptoms, from a much better preparation. Hartlaub simply purified his preparation by washing it, which never can suffice, but Hahnemann subjected his to red heat. A careful comparison of symptoms will show that there is a difference. In 1835, in the second edition of his *Chronic Diseases*, Hahnemann gives it place among the antipsorics, adding a few symptoms from Dr. Bute, and condensing Hartlaub's collection to about 900 symptoms.

Bœnninghausen published very remarkable cures with the pure metal, in the *A. H. Z.*, being guided by the symptoms of the oxide.

The symptoms of a remarkable cure of spinal disease with *Alum. metallicum*, by Rehfuss, translated by Dunham, and distinguished by the abbreviation met., are here included.

[1] **Mind.** Consciousness not clear.

Consciousness of his personal identity confused. θParalysis.

Great weakness or loss of memory.

Inability to recollect things or follow up a train of thought. θCephalalgia.

Confusion and obscuration of intellect; met. θSpinal disease.

Makes mistakes in speaking, using words not intended.

Time passes too slowly; intolerable ennui; an hour seems half a day.

Difficulty of thinking.

Mania to kill himself with a sharp weapon.

Seeing blood on a knife, she has horrid ideas of killing herself, though she abhors the idea.

Crying, against his will.

No desire to do anything, especially anything serious. θCephalalgia.

Depressed and lachrymose. θMelancholia.

Fearfulness.

Sad thoughts in morning, joyless and comfortless on awaking.

Low-spirited, trifling things appeared insurmountable. θLiver complaint.

Digitized by Google

Apprehensiveness.
‖Apprehensive of losing his reason.
Uneasy evenings, as from impending evil.
Fears he is not to recover.
Dread of death, with thoughts of suicide.
Great anxiety, is fearful and peevish.
‖Anguish, oppressive and vague fearfulness, or uneasiness, as if he had committed a crime. θCephalalgia.
Anxiety as if threatened with an epileptic fit; depressed with grief.
‖Variable mood, at one time confident, at another timid.
‖Disposition quiet and resigned; met. θSpinal disease.
Moroseness.
‖Peevish and whining, with hot earlobes.
Easily startled.
Sufferings following anger.
‖Mental symptoms worse in morning on awaking.

[2] **Sensorium.** Quickly passing vertigo in morning.
‖Vertigo: ‖everything turns in a circle; with nausea; < before breakfast; ‖on opening eyes; on stooping; > after breakfast, and from wiping eyes; nausea, faintness, pain in nape of neck; as if drunken; with seeing white stars; when closing eyes.
‖Stupefaction, with dread of falling forward.
Heaviness of head, with pale, languid face.
Dulness and numbness of head.
‖Inability to walk, except with eyes open, and in daytime. θLocomotor ataxia.
‖Cloudiness and drunken feeling, alternating with pain in kidneys.
Easily made drunk, even by weakest spirituous drink.
‖When his eyes were closed, his whole body tottered; if not firmly held, he fell to ground; met. θSpinal disease.

[3] **Inner Head.** Headache attended with nausea, pressure in forehead and congestion to eyes and nose, with nosebleed.
Pressure in forehead from without inward, or rather outward, or over eyes; in evening, sometimes with a chill, or nocturnal heat or sweat.
Throbbing, frontal pain, < going up-stairs, or stepping.
Burning, pressive pain, with heat in forehead, while standing or sitting, > in open air.
Headache sometimes in l. side, < by walking in open air.
Lacerating pain in head.
Severe stitches in brain, with nausea and dulness of mind.
Sensation in head as if its contents were in a vise, with a weight on top.
‖Headache: from chronic catarrhs of head; with constipa-

Digitized by Google

tion; > by lying quiet in bed, or resting head upon a cushion.
‖Heaviness of head, with pale, languid face; vertex painful to touch.
Pulsations in vertex with congestion to eyes and nose.
Stupefying tightness in r. temple, > by pressing upon it.
Heat in head.
‖Headache in region of both parietal bones. θSpinal disease.
Pulsative headache in vertex, over r. temple, early on waking.
Pain in vertex, < on moving head or stooping, > by pressure; shooting in vertex on coughing.
Tightness, with drawing and beating in r. side of occiput.
Pain in head and nape of neck, it increases on going to bed, and only leaves off in morning on rising.
Semilateral affections of head, old rheumatic affections, always appearing on same side.
‖Increased pulsation of temporal arteries. θSpinal disease.

4 **Outer Head.** Itching of scalp, with dry, white scales.
Humid scurf, < about temples, bleeding when scratched; < in evening, or at new and full moon.
Scalp feels numb.
Pressure on forehead, as from a tight hat.
‖Headache, as if hair was pulled; with nausea.
‖‖Falling off and excessive dryness of hair; scalp sore when hair is touched; creeping and titillation of scalp.
‖Pain in head and nape of neck < on going to bed; leaves on rising in morning.
Itching on forehead.
Exanthema on forehead, feels as if glue had dried on it.

5 **Sight and Eyes.** Far-sightedness.
‖Vision dim and eyes dry in evening. θChronic catarrh.
‖Seeing fiery spots; met. θSpinal disease.
White stars before eyes, with vertigo.
‖Dim-sightedness, like looking through a fog, or as if feathers were before eyes; must rub eyes.
Objects appear yellow. θLiver complaint.
‖Burning and pressure in eyes.
‖‖Red eyes with lachrymation.
‖‖Eyes inflamed, itching at inner canthus; agglutination at night, and lachrymation by day; yellow halo around candle; burning and dryness, smarting, but with very little ulceration.
Sensation of coldness in eyes when walking in open air.
‖Spasmodic closure of lids at night, and burning in eyes in morning and evening. θOphthalmia.
Inclination to stare.

Digitized by Google

‖Strabismus of either eye; especially from loss of power of internal rectus.
‖Pressure in eyes, which are sensitive to light.
Stitches in eyes.
In evening pressure in canthus as from a grain of sand.
‖‖Eyelids thickened, dry, burning.
‖Chronic granular lids.
Eyelids stick together with matter; lachrymation.
‖Upper lids seem to hang down as if paralyzed, especially left. θOld, dry granular lids.
‖Burning and dryness in lids every evening, with pain in internal canthus of l. eye, with much dry mucus in morning on waking.
‖Burning, dryness; burning on waking, especially on looking up, with dread of light.
Eyes generally better from being bathed.
‖Itching in canthi with burning.
Eyelashes fall out.
‖Tottering and falling when closing eyes; met. θSpinal disease.

[6] **Hearing and Ears.** ‖Buzzing as if outside ear.
Humming; roaring; whistling; sound as of large bells.
‖Redness and heat of one ear; evenings.
Hot earlobes with peevishness and whining.
Sensation as if something lay before ear; on blowing nose it is felt, swallowing removes it.
‖Stitches in ears, evening or night.
‖Purulent otorrhœa.
Crepitation in ears on swallowing or chewing.

[7] **Smell and Nose.** ‖Sense of smell weak.
Nosebleed with pressure in forehead and congestion to eyes.
Disposition to colds in head.
‖Nose stopped up, more l. side, with glairy mucus.
Fluent coryza, with frequent sneezing, free from one nostril, the other obstructed; lachrymation.
‖Chronic nasal catarrh, with scurfy sore nostrils, and discharge of thick yellow mucus.
‖Catarrhs of long standing with old people.
‖Discharge of dry, hard, yellow-green mucus from nose; nose swollen, red and sore to touch, worse in evening.
‖Nose dry; met. θSpinal disease.
‖Violent pain in root of nose. θOzæna.
‖Copious, yellow, sour-smelling mucus, with sore nostrils.
‖Septum narium swollen, red and painful to touch; more painful evenings.
‖‖Redness of nose.
‖Nose ulcerated.

Digitized by Google

‖Swelling and hardness of l. alæ nasi.
‖‖Point of nose cracked.
After blowing nose, glittering before eyes.

[8] **Upper Face.** Sallow skin.
Pale languid face with heaviness of head.
Tearing and lancinating in malar bone.
‖Tension of skin of face, as though white of egg had dried on it.
Itching of various parts of face; of forehead, with rough skin.
Blood-boils on face and nose.
‖Tetter on temples and forearm. θLeucorrhœa.
Gloomy, pale, or alternately red and pale.
‖Heat and redness; met. θSpinal disease.
Coppery cheeks.
Bloated places, like bulbous excrescences; nodular swellings.

[9] **Lower Face.** Tension and drawing in jaws and cheeks, with increase of saliva.
Tensive pain in articulation of jaw, when chewing or opening mouth.
Upper lip covered with little blisters.
Lower jaw seems shortened.
Lips dry, chapped.
‖‖Involuntary spasmodic twitching of lower jaw, with hemorrhage of bowels; dark, offensive stools.
‖‖Trismus.

[10] **Teeth and Gums** ‖‖Teeth feel long and sore.
‖Toothache; teeth feel loose and elongated, < from chewing, in open air, evening.
‖Drawing toothache, extending to other parts, as down larynx, neck or shoulders. θDuring pregnancy.
Teeth covered with sordes.
Swelling of gums; they easily bleed and ulcerate.
Saltish blood seems to come from teeth.

[11] **Taste and Tongue.** ‖Taste flat; met. θSpinal disease.
‖Tongue coated with a thin slimy fur; met. θSpinal disease.
Taste: ‖‖acrid, sweetish or fatty; almost lost; like blood.
‖‖Tingling, itching on tongue, must scratch it. θDuring pregnancy.
Bites his tongue while asleep.

[12] **Inner Mouth.** ‖Musty, bad odor from mouth.
‖Small ulcers in mouth.
‖Saliva increased, although mouth may feel dry.
Sensation of soreness in mouth when eating.
‖Increased saliva and mucus.
Dryness in mouth.

Digitized by Google

[13] **Throat.** ‖Inflammatory redness in back of throat.
‖Transient stitches in throat.
‖Dryness of throat, as if parched.
‖Rawness and roughness in throat, inducing hawking or coughing in evening, with secretion of mucus.
‖Pressure in throat as from a plug, with soreness and dryness.
Sensation of swelling in sides of throat.
‖Sense of constriction from pharynx down to stomach, as if food could not pass.
‖Great dryness of throat especially on awaking, voice husky; constant hawking, and sensation of a lump in throat. θChronic catarrh.
‖Feeling of a splinter in throat, ‖stinging on swallowing.
Copious, thick, tenacious mucus in throat, evening and morning on awaking; can be expectorated only in lumps, with great effort.
‖Thick mucus, dropping from posterior nares.
‖Ulcers in fauces, spongy; secreting a yellowish-brown, badly smelling pus; with boring pains from fauces to r. temple and head.
Painful soreness in throat and upper part of œsophagus, < swallowing empty.
‖Throat feels relaxed.
‖Feels food whole length of œsophagus.
‖Swallowing painful, > after warm drinks; swallowing saliva or liquids often >; swallows solids with difficulty.
On waking in morning, pharynx feels narrower than usual, as if contracted and lame.
‖Violent, pressive pain, as if a portion of œsophagus was contracted or compressed, in middle of chest, especially during deglutition, but also when not swallowing, with oppression of chest, alternately with palpitation of heart, especially after a meal.
Swallowing causes crepitation in ears.
Pains in throat; < evening and night.

[14] **Appetite, Thirst. Desires, Aversions.** ‖No desire to eat.
‖Has no appetite, food has no taste.
‖‖Irregular appetite.
Longing for fruit and vegetables; ‖potatoes disagree.
‖Aversion to meat; to beer; meat has no taste.
Thirst all day.
‖Appetite for starch, chalk; clean white rags; charcoal, cloves, acids, coffee or tea-grounds, dry rice, and other indigestible things. θChlorosis.

[15] **Eating and Drinking.** Before eating: canine hunger; seems to quiver all over.
Better while eating.

Digitized by Google

‖‖Worse from eating potatoes. θColic. θIndigestion.
Worse from tobacco smoke.
‖All irritating things, like salt, wine, vinegar, pepper, etc., immediately start cough.
Throat sore after using onions in food.
‖Easily drunken from weakest spirituous drinks.
Mucus in throat, tasting sweet, after dinner.
Worse from cold, > from warm diet.
Worse after eating soups.
After eating: languor in evening; must lie down at noon; phlegm in chest.
Eating removes faintness at stomach.
After breakfast: vertigo; nausea better.
After dinner: sweet tasting mucus.
Aggravation or appearance of all symptoms immediately after dinner or in evening.
Worse from warm drink: chill.
Better from warm drink: throat.

[16] **Hiccough, Belching, Nausea and Vomiting.** Chronic inclination to belch, in old people.
Eructations: ‖sour; ‖bitter, after potatoes; < evenings.
Heartburn after supper; sourish risings, with profuse flow of water from mouth.
Nausea: with vertigo; stitches in brain; chilliness; pale face, desire to lie down, faintness; > after breakfast.
Frequent nausea; faint nausea.
Vomits mucus and water.
‖Vomiting of food, mucus or bile; met. θSpinal disease.

[17] **Scrobiculum and Stomach.** Distension of stomach.
‖Constriction and twisting in stomach, extending up œsophagus to throat.
Stitches in pit of stomach, extending upward to chest.
Drawing or oppressive pain, going upward to chest and throat; after potatoes.

[18] **Hypochondria.** ‖‖Pains in epigastrium and hypochondria when stooping.
‖Contractions in both hypochonders.
Spasmodic pains in hypochondria and stomach with dyspnœa almost to suffocation.
‖Liver pains, as if bruised, when stooping; stitches when rising again.
Tearing from liver to hip.
Shooting pain in region of spleen.
Stitches in both hypochondria; < from motion.
Shooting in l. hypochondrium going upward and forward to cardiac region, < on deep inspiration.

[19] **Abdomen.** Seems to hang down heavily, like a load, when walking, afternoons.

Digitized by Google

Reaching too high strains abdominal muscles.
Pains < sitting bent.
▮Pressing in both groins, towards sexual organs, evenings.
▮Stitching, pressing pain in region of abdominal ring, like from hernia, with tension as far as side of abdomen.
Flatulent colic, bellyache.
Colic in morning.
▮▮Painters' colic.
▮▮Soreness and twitching of r. inguinal glands.

[20] **Stool and Rectum.** ▮▮Inactivity of rectum; even soft stool requires great straining.
▮▮No desire for, and no ability to pass stool, until there is a large accumulation.
After each dysenteric stool, involuntary urination.
▮▮Severe hemorrhage from bowels with flow of urine. θTyphoid.
Pressing to stool aggravates her symptoms.
▮▮Tenesmus in rectum and bladder at same time. θProctitis.
Stools too scanty.
▮▮Stools: hard and knotty or covered with mucus; like sheep's dung, with cutting in anus, followed by blood; like pipe stems.
▮Constipation from great dryness of mucous follicles of rectum, with long-lasting pain in rectum.
▮Diarrhœa, urging in rectum, bloody, scanty stools.
▮Clots of blood pass from anus.
▮▮Dropping of blood during an evacuation.
Hemorrhoids, < in evening, > after night's rest.
▮Itching and burning at anus.
Perineum: pressure when blowing nose; sweats and is tender to touch.
▮▮Soft and thin stool, passing with difficulty.
▮Chronic diarrhœa; < on alternate days; from walking; > from a short sleep or warm applications.
▮▮Diarrhœa whenever she urinates.
▮▮Chronic diarrhœa. θChlorosis.
▮Blind piles protrude, become moist, with lancinating pain; are hard and itch.
During stool: ▮rectum as if constricted and dried up; throbbing in small of back; ▮excoriated feeling in rectum; chills all over; discharge of prostatic juice.
▮▮Varices become moist, sting and burn.
▮Itching with burning excoriation and great sensitiveness. θHemorrhoids.
▮Fistula ani.
Sensation of weakness of sphincter ani.
Pulsating in anus.

Digitized by Google

Torpidity of rectum; rectum seems paralyzed.
Itching of anus.

[21] **Urinary Organs.** Renal pains as from riding over a rough road; alternating with cloudiness as if drunk; dancing makes worse.
▮Frequent micturition. θProlapsus uteri.
▮▮Tenesmus vesicæ. θDysentery.
▮▮Urine voided while straining at stool; or cannot pass urine without such straining.
Frequent urination at night.
Frequent emissions of very small quantities of light-colored urine with great straining, severe smarting and burning, with a feeling as though a few drops remained in urethra which could not be expelled.
Urine: scanty, with red sediment, in arthritic affections; copious and pale, in nervous diseases; with thick, white sediment; more frequent, copious and dark.
▮Urine red without sediment; met. θSpinal disease.
Feeling of weakness in bladder and genitals, in evening, with fear that he will wet the bed.
Pouting of meatus urinarius, with swelling and discharge of light yellow pus from urethra.
During urination: burning, with discharge of urine and desire to evacuate bowels.
▮Urine smarting, corroding. θProlapsus uteri.

[22] **Male Sexual Organs.** ▮▮Excessive sexual desire.
▮▮Frequent and painful erections, < at night.
▮Involuntary emissions, followed by all his old symptoms.
▮▮Sexual desire lessened. θImpotence.
▮Feeling of weakness in bladder and genitals; he fears he will wet the bed.
▮▮Discharge of prostatic fluid during difficult stool.
Light yellow pus from urethra, causing itching of glans penis.
Sensation of weakness in penis.
Left testicle hard and very painful.
Tickling on genitals and thighs.
Sweat on perineum, with sensitiveness to touch.
▮Pressure in perineum at beginning of an erection or during coitus.

[23] **Female Sexual Organs.** Sexual desire decreased.
Weakness of sexual parts.
▮Prolapsus uteri.
▮Bland, painless ulcers upon os. θProlapsus uteri.
▮▮Severe painful swelling in either or both ovaries, very sensitive to touch. θMetritis.
▮▮During an evacuation before menses, she has pinching, writhing and pressing like labor-pains.

Digitized by Google

Menses: too early, short, scanty, and of pale blood; too early, preceded by headache; delay, finally appear, being pale and scanty.

‖Menses scanty, pale and painful. θProlapsus uteri.

Before menses: many dreams, on awaking face hot, headache and palpitation; abundant mucous discharge.

During menses: corroding urine and diarrhœa; bloatedness.

‖‖After menses: exhausted in body and mind. θLeucorrhœa.

‖Leucorrhœa: of transparent mucus, attended with tremor and sensation as if everything would fall out of abdomen; acrid, corrosive; profuse, relieved by cold washing; during day; ‖with tetter on temples; corroding, profuse, running down to heels, often only in daytime, relieved by cold washes.

Painful throbbing in l. side of vagina, like the tick of a watch.

Stitches in l. side of vulva, extending up to chest.

‖‖Free light yellow excoriating discharge from vagina.

‖‖Itching and burning pimples on labia.

‖‖Inflammation and swelling of vagina.

‖Stitches, throbbing and itching in vagina. θProlapsus uteri.

[21] **Pregnancy. Parturition. Lactation.** ‖Gastric and abdominal symptoms during pregnancy: heartburn; ‖‖constipation from inactive rectum; ‖‖groaning at night, crying out "it is not I," begging them to stop; tongue tingles; mucous leucorrhœa, which runs down limbs.

Itching in mammæ.

‖‖Constipation of sucklings.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice: has a nasal twang; husky; rough.

Hoarseness, evening and night, especially towards morning; disappearing while walking in open air.

Sudden, complete aphonia.

Hoarseness.

Hoarse afternoons and evenings, with roughness and dryness.

‖Voice hoarse, rough, hollow, almost aphonic; met. θSpinal disease.

Much talking, particularly in lively company, makes her hoarse.

Talking or singing makes him cough.

Talking increases soreness of chest.

Rawness in larynx on awaking.

‖Tickling in larynx, with irritation to cough.

Digitized by Google

Sensation of tightly adhering phlegm in larynx, not removed by hawking or cough; wheezing on inspiration.
Thyroid cartilage painful to touch.
Throat dry and voice husky on waking.

[26] **Respiration.** Rattling, asthmatic breathing; < coughing.
Oppression < when sitting stooped; > straightening up, or walking in open air.
Talking or singing makes him cough.
Breathing arrested by copious, thick, tenacious, saltish mucus.
Oppressive pain in chest, tight feeling.
Dyspnœa, with spasmodic pains in stomach and hypochondria.
Short-breathed when lying on back; goes off by turning on side.
Worse getting tired from exerting voice.
Worse from deep inspiration; shooting from l. hypochondria to heart.
Wheezing inspiration, with tough mucus in larynx.

[27] **Cough.** ‖Dry, hacking cough, with frequent sneezing.
Cough: from sensation as of loose skin hanging in throat; from tickling in larynx; ‖from elongated uvula; ‖from talking or singing; short; causes pains in r. temple and top of head, sometimes also difficult breathing; ‖soon after waking in morning; ‖every morning a long attack of dry cough, ending in difficult raising of a little white mucus; ‖with tearing pain and involuntary emission of urine, in old or withered looking people; sudden, violent irrepressible cough in evening while sitting; sometimes yields a piece of mucus mixed with blood; causes shooting in vertex.
All irritating things excite cough.
Painless evening cough.
‖Dry cough at night, with dryness of throat.
‖Continued dry hacking cough, with vomiting and arrest of breathing.
Sputum difficult and of a putrid taste.

[28] **Inner Chest and Lungs.** Chronic bronchitis with inclination to sing.
Constriction of chest, with apprehension.
Oppression of chest, with constriction in œsophagus.
Violent, oppressive pain in chest, < at night.
Chest feels constricted, < from sitting bent or stooping, > on straightening up, or on walking.
Congestion of blood to chest and head, with redness of face and one ear, caused by suppressed hemorrhoidal flux.

Digitized by Google

Shooting stitches in chest r. to l. in afternoon, < on going down-stairs.
‖Talking increases soreness of chest; lifting aggravates or produces soreness in l. chest.
Riding in a carriage gives pain in chest.
‖When stooping, a stitch from l. side of abdomen to middle of chest.
Stitches extending from l. side of vulva to chest.
Chest feels as if too large.
Chilliness in chest.

[29] **Heart, Pulse and Circulation.** In cardiac region: shocks; shooting from l. hypochonder.
Awakens with palpitation.
‖Palpitation of heart. θProlapsus uteri. θDysphagia.
‖Palpitation irregular, large and small beats intermixed.
Pulse either unchanged, or full and accelerated.
‖Pulse hard, 90 to 100; met. θSpinal disease.

[31] **Neck and Back.** Itching in nape of neck and of throat.
‖Shooting in r side of neck, posterior portion.
Pain in back and small of back, as if beaten.
‖Pain in back, as if a hot iron was thrust through lower vertebræ.
At intervals, sudden sharp pains like a stab in lower part of back, which made her feel for the moment as if she could not straighten spine.
‖Cervical muscles drew head back during sleep; met. θSpinal disease.
‖Violent stitch in middle of back.
‖Gnawing pain in back.
Throbbing in small of back during stool.
Pain in small of back during rest.
‖Pain in sacrum. θUterine troubles.

[32] **Upper Limbs.** Skin of hands peels off.
Red rhagades on hands, worse in winter and from washing.
Panaritium, with brittle nails, lancinating pains and tendency to ulceration of finger-tips.
Brittle nails and brittle skin on tips of fingers.
Nails brittle, or thick; spots on nails.
Pain in arms when letting them hang down, or on stretching in bed.
Sudden jerk or concussion in shoulder.
Pain, as from a sprain, in shoulder joint, especially on raising arm.
Sense of tightness in arm, as from cold.
Burning on arms and fingers, and in elbow, as from a glowing iron.
Arms feel heavy, as if paralyzed; they go to sleep.
Arms feel shorter.

Digitized by Google

‖Tetter on forearm. θLeucorrhœa.
Veins of hands distended.
Gnawing beneath finger nails, with crawling along arm, as far as clavicle.
Stitches in wrist while working.

[33] **Lower Limbs.** Tearing in thighs and legs, when sitting and lying, especially at night.
‖Long continued tension in thighs and legs, almost like a cramp, extending downward.
Legs feel numb and stiff, especially at night.
‖Nates go to sleep when sitting.
‖Great heaviness in lower limbs, can scarcely drag them; when walking he staggers, and must sit down; evenings.
Burning and smarting itching on thighs, > from scratching.
‖Frequent cramps in calves.
Tearing in knees and patellæ, or from knee to toes.
‖Trembling of knees.
‖Numbness of heel when stepping.
Soles of feet too sore to step on.
‖Pain in sole of foot, on stepping, as though it were too soft and swollen. θTabes dorsalis.
Itching and redness of toes, < after scratching.
Stitches in corns and toes.
Great weariness of legs when sitting.
‖Heaviness in feet with great lassitude of legs.
Cold feet, followed by burning under toes.
Smarting stitches in corns.
Pain as from fatigue, in articulation of foot when sitting.

[34] **Limbs in General.** ‖Arms and legs feel heavy.
Frequent stretching of limbs when sitting.
Trembling of limbs.
Jerking and twitching of limbs.
‖Pains in limbs as if bones were squeezed narrower, with pressure in joints.
‖Drawing in extremities.

[35] **Rest. Position. Motion.** Resting head relieves headache.
‖Raising head: increases vertigo, nausea and vomiting; met. θSpinal disease.
During rest: pain in small of back.
Aversion to motion.
Complaints from carrying on back; or bodily exertion.
Pain in chest from lifting or carrying things.
Stitches in hypochondria, worse from motion.
Moderate exercise (in open air) relieves.
Walking about or moving feet relieves uneasiness.
Headache, > lying, < walking in open air.

Digitized by Google

When attempting to walk, great weakness and uncertainty in lower limbs, has to be led; met. θSpinal disease.

When walking: abdomen hangs heavily; discharge of dark blood from rectum; fluor albus more profuse.

Talking or a short walk fatigues very much; causes numbness of limbs, flushes of heat.

Lying down: > headache; < lassitude, yet there is desire to lie down.

Going down-stairs: stitches in chest.

Worse from dancing: renal pains.

Worse ascending: frontal headache.

Stepping: < frontal headache; numbness of heel; pain in sole of foot.

Straining, lifting, etc., cause soreness in chest and abdomen.

Reaching high: strains abdominal muscles.

Sitting: weariness of legs; pain in foot joint; stretching limbs.

Sitting bent: pain in abdomen <; oppressed respiration; constriction in chest.

Stooping: vertigo; pain in vertex; constriction of chest; pain in scrobiculum, liver, hypochondria and abdomen; stitch from abdomen to chest.

Short-breathed lying on back, not on side.

Better lying on l. side; < lying on right.

Worse from standing and sitting: pain and heat in forehead.

[35] **Nerves.** Want of bodily irritability.

Great exhaustion of strength, especially after walking in open air; accompanied by yawning, stretching, drowsiness and inclination to lie down; lying, however, increases lassitude.

Much fatigued by talking.

Faint and tired, must sit down.

Involuntary movements of single parts.

Spasms, with attacks of laughing and weeping.

Paralysis from spinal disease; cannot walk with eyes closed.

Rheumatic and traumatic paralysis, in gouty patients.

One-sided paralysis, especially of extensors.

Hysteria. θProlapsus uteri.

Excited condition of mind and body; acute smell, red face, tingling tongue, constriction in internal parts, involuntary jerks, all alternating with dulness of sight, loss of smell, pale face, lassitude and drowsiness.

Tremor. θLeucorrhœa and prolapsus.

Tremulousness, when he touches anything, he feels electrified.

Digitized by Google

Suddenly jerks head backward; involuntary motions: laughing and crying.
‖Slow tottering gait, as after severe illness.

[37] **Sleep.** Drowsiness by day.
Lies awake from crowding of ideas or fancies, or from heaviness in arms.
‖Sleepiness, with inclination to lie down.
‖Unrefreshing night sleep; a mere slumbering, with feeling in morning as if he had not slept enough. θCephalalgia.
Restless sleep; turns frequently; feels too warm; lies uncovered in unrefreshing slumber, ‖with many dreams and frequent awaking; starts in affright; muttering or crying.
‖Restless sleep, always awaking with palpitation of heart.
Dreams: anxious; of boat foundering; ghosts; thieves; confused.
During sleep: lies on side; bites his tongue.
Frequent urination in night.
‖During sleep cervical muscles drew head backward; met. θSpinal disease.
Worse on awaking: mind; weak and faint, until he eats; wakes unrefreshed; heat in face; huskiness; dryness in throat, tenacious mucus; rawness in larynx; palpitation.

[38] **Time.** Time passes too slowly.
Remission from evening until morning.
Worse evening and night: throat complaints.
Towards morning: hoarseness.
Before breakfast: vertigo, faint nausea, relieved after eating.
Morning: mental depression; transient vertigo; pain in head and neck >; burning in eyes; dry mucus in eyes; cough and sputa; pressure on chest; colic.
Worse morning and evening: burning of eyes; mucus in throat.
Worse all day: mucous leucorrhœa; drowsiness.
Worse alternate days: constipation; chronic diarrhœa; prolapsus uteri; chlorosis.
Worse afternoon: hoarseness.
Worse evening: apprehension; tetter on scalp; dim sight, dryness, pressure and burning in eyes; spasmodic closure of eyelids; one ear red and hot; tearing and stitches in ear; ozæna; toothache; pains in throat; eructations; hemorrhoids; weakness in bladder; hoarseness; languor; heaviness in lower limbs; heat.
On going to bed: pains in head and neck.
From 4 P.M. till going to bed she feels well. θMelancholy.

Digitized by Google

At night: headache <; spasmodic closure of lids; pains in throat <; frequent urination; pain in chest <.
New and full moon: tetter on scalp; heat.

[39] **Temperature and Weather.** Unpleasant want of animal heat.
Warm food and drinks relieve throat.
‖She feels better in open air. θProlapsus uteri.
Takes cold easily sitting in room, gets hoarse; this lessens when walking in open air.
Generally > in warmth; < in cold air, outdoors.
Better walking, outdoors, in mild weather; inclination to be in open air.
Cannot bear the cold, nor a warm room.
Warmth of bed: body itches.
Open air: pain in forehead, dulness of sight, cold feeling in eyes; toothache <; hoarseness; oppressed breathing >; chilliness with headache.
Worse in dry weather; ‖thin fecal stools.
Winter: rhagades; eruptions.
Cold washing: leucorrhœa >; rhagades.
Better in wet weather or moistening the diseased part.

[40] **Fever.** Chill: with great thirst; with nausea.
Internal chill and shivering, with desire for warmth of stove, with stretching and bending of limbs, < after warm drink; often with heat of face.
Chill during day, heat at night.
Frequent repetition of chills in evening.
Heat at night, with anxiety and sweat.
Heat in evening, commencing in and spreading from face, sometimes of only r. side.
‖Chill appeared after eating soup at dinner. θIntermittent.
‖Slight chill in evening; met. θSpinal disease.
Sweat at night, towards morning most profuse in face, frequently only on r. side of face; less when walking out of doors.
Entire inability to sweat.

[41] **Attacks, Periodicity.** At intervals sudden, sharp pains, like a stab.
‖Worse at new and full moon. θSkin symptoms.
‖Worse in winter. θSkin symptoms.
‖Worse on alternate days. θChronic diarrhœa. θChlorosis. θProlapsus uteri.

[42] **Locality and Direction.** Complaints chiefly in external parts (burning, etc.).
Semilateral affections of head.
Paralysis l. sided, painless.
Pains go upward.
Jerks go from head over body.

Digitized by Google

Upper l., lower r. side, most affected.

Drawing toothache, extending to other parts, as down to larynx, neck, shoulder, etc.

Left: headache; upper lid hangs down; pain in internal canthus; side of nose stopped up; throbbing from hypochondria to heart; throbbing in vagina; stitches in vulva.

Right: heat and sweat of face; inguinal glands sore and swollen; shooting in side of neck.

Right to left: stitches in lungs.

43 **Sensations.** Cloudiness and drunken feeling; as if contents of head were in a vise; pressure on forehead as from a tight hat; as if hair was pulled; pressure as from a grain of sand in canthus; as if something lay before ear; as if white of egg had dried on face; teeth feel long and sore; as from a plug or lump in throat; as if food could not pass to stomach; as of a splinter in throat; pharynx feels narrower on waking, as if contracted and lame; abdomen seems to hang down heavily; rectum as if paralyzed; renal pains as from riding over a rough road; as if a few drops remained in urethra; as if everything would fall out of abdomen: like tick of a watch in l. side of vagina; as of tightly adhering phlegm in larynx; as of loose skin hanging in throat; as if beaten in small of back; as if a hot iron was thrust through lower vertebræ; like a stab in lower part of back; sudden jerk or concussion in shoulder; arms feel shorter; as from fatigue in articulation of foot; as if bones were squeezed narrower; feels electrified when touching anything.

Pain: in vertex; in head and nape of neck; in root of nose; in throat; in epigastrium and hypochondria; in l. testicle; in back; in small of back; in sacrum; in arms; in sole of foot.

Burning: in forehead; in eyes; of lids; at anus; in varices; in urethra; pimples on labia; on arms and fingers; on elbow; on thighs; under toes.

Tearing: in malar bone; from liver to hip; in thighs and legs; in knees and patellæ; from knees to toes.

Lancinating: in malar bone; in hemorrhoids; in finger tips.

Lacerating: in head.

Gnawing pain: in back; beneath finger nails.

Cutting: in anus.

Stitches: in brain; in eyes; in ears; in throat; in pit of stomach; in liver; in both hypochondria; in region of abdominal ring; in l. side of vulva; in vagina; in middle of back.

Digitized by Google

Shooting stitches: in chest, r. to l.; from l. hypochonder to cardiac region; in wrist; in corns and toes.
Smarting stitches: in corns.
Shooting: in vertex; in region of spleen; from l. hypochondrium to cardiac region.
Stinging: on swallowing; in varices.
Drawing: in r. side of occiput; in jaws and cheeks; toothache, extending to other parts; from stomach to chest and throat; in extremities.
Painful throbbing: in l. side of vagina.
Spasmodic pains: in hypochondria and stomach.
Pressive pain: in forehead; as if a portion of œsophagus was contracted in middle of chest.
Tensive pain: in articulation of jaw.
Bruised pains: of liver.
Soreness: of scalp; in mouth; in throat, or r. inguinal glands; in chest; of soles of feet.
Smarting: in urethra.
Rawness: in throat; in larynx.
Excoriated feeling: in rectum.
Urging: in rectum.
Pressure: in forehead; over eyes; in eyes; in throat; in both groins; in perineum; in joints.
Constriction: from pharynx to stomach; in stomach; in œsophagus; of rectum; of chest.
Contractions: in both hypochonders.
Cramps: in calves.
Tightness: in r. side of occiput; in chest; in arm.
Tension: of skin of face; in jaws; in region of abdominal ring; in thighs and legs.
Stupefying tightness: in r. temple.
Beating: in r. side of occiput.
Throbbing: in small of back.
Pulsations: in vertex; over r. temple; in temporal arteries increased; in anus; in vagina.
Roughness: in throat.
Sprained feeling: in shoulder joint.
Swollen feeling: in sides of throat; in sole of foot.
Weakness: of sphincter ani; in bladder and genitals; in penis; of female sexual parts; of legs.
Heaviness: of head; in abdomen; of arms; in lower limbs; in arms and legs.
Oppressive pain: in chest; in feet.
Weight: on top of head.
Paralyzed feeling: of arms.
Numbness: of head; of scalp; in legs; of heel.
Tingling: in tongue.
Itching: of scalp; at inner canthus; of canthi; of various

Digitized by Google

parts of face; on tongue; at anus; of piles; of glans penis; of pimples on labia; in vagina; in mammæ; in nape of neck; of thighs; on thighs; of throat; of toes; of whole body.
Crawling: along arm as far as clavicle.
Creeping titillation: of scalp.
Tickling: on genitals and thighs; in larynx.
Heat: in head.
Coldness: in eyes; of feet.
Stiffness: in legs.
Dryness: of hair; in eyes; of lids; in mouth; of throat; in throat.

[44] **Tissues.** Veins distended.
Mucous membranes very dry or secreting scantily.
Emaciation.
‖Chlorosis.
‖Scrofula.

[45] **Touch. Passive Motion. Injuries.** Touch and pressure relieve pain in r. temple.
Sensitive to touch: vertex; scalp; perineum; ovaries.
Better from scratching, but bleeding follows.
Pressing teeth together aggravates.
Better from wiping eyes.
Riding in carriage gives her pain in chest.

[46] **Skin.** ‖Skin yellow. θLiver complaint.
‖Intolerable itching of whole body, especially when getting warm and in bed; scratches until skin bleeds, which is then painful.
Eruptions humid, scabby, sore, gnawing.
Ulcerated surface secretes a yellow-brownish, badly smelling pus.
Blood-boils. Rhagades. Bulbous excrescences. ‖Leprosy.
‖Dry, tettery, itching eruption.
Tetter itching in evening.
Formication in skin.

[47] **Stages of Life, Constitution.** Suitable to persons of a scrofulous habit who suffer from chronic diseases.
Constitutions with diminished animal heat.
Infancy: constipation, especially when artificial food is used.
Cholera infantum, ‖stools green; acidity of primæ viæ.
Puberty: chlorosis, with longing for indigestible substances.
Dark complexion, excitable.
Mild disposition: mild, tearful, anxious. θConstipation and catarrh.
Spare habit; dry, thin subjects.
Boy, æt. 12, cerebro-spinal disease. After *Bellad., Phos.*

Digitized by Google

and *Nux vom.* had been given with very little improvement, *Alum. met.*[30] cured.

Old people, hypochondriacal, or suffering from chronic diseases, especially catarrhs.

Vertigo in old people, with atheromata or earthy deposits on the cerebral or cardiac arteries.

Chronic catarrh of head.

Cough with involuntary emission of urine in old withered looking people.

[48] **Relationship.** Similar to: *Bar. carb.* (hypochondriasis of aged; constipation); *Bryon.* (peevish, irritable; gastric and abdominal symptoms; constipation; throbbing headache; dry cough with vomiting; stitches in chest; dryness of mucous surfaces; fever, etc.); *Calc. ostr.; Chamom.* (useful as an intermediate remedy); *Conium* (old people; loss of power of internal recti of eyes); *Ferrum* (chlorosis; relaxed abdomen; disgust for meat, etc.); *Ferr. jod.* (profuse, transparent leucorrhœa); *Graphit.* (chlorosis; skin rough, chapped, itching; nails; blepharitis, etc.); *Ipec.; Laches.* (sad on waking; climaxis); *Pulsat.* (tearful, peevish; head, etc., better in open air; ozæna; taste lost; averse to meat; chlorosis; scanty menses; complaints at puberty; lack of animal heat; soles of feet sore, < walking; toes red, itching, etc.); *Plumbum* (colic; constipation, etc.); *Ruta* (loss of power of internal recti of eyes); *Sepia* (irritable, tearful; ozæna; scanty menses; puberty; prolapsus uteri; inactive rectum: weakness in urinary organs, etc.); *Silic.; Sulphur; Zincum* (inner canthus; granular lids).

Compare with the following in clergyman's sore throat: *Arg. nitr., Kali bich., Lycop.*, etc.

Alumin. follows: *Bryon., Laches., Sulphur;* and is followed by: *Bryon.*

Alumin. and *Bryon.* are complementary.

Antidotes to *Alumin.: Bryon., Camphor, Chamom., Ipec.*

Alumin. antidotes: lead-poisoning, as in painters' colic; ailments from lead.

AMANITA, OR AGARICUS MUSCARIUS.

Fly Fungus. *Nat. order, Fungi.*

One of the most poisonous fungi known as *Agaricus muscarius*, abused by Asiatic tribes of savages in the form of a real intoxicating drink, the effects of which have been reported by numerous travelers.

The usual name of "Agaricus" given by Linnée is too vague.

Persoon and Fries have split this Linnean genus into seven families, and the numerous species received forty-four different generic names, of which *Amanita* is one. Before long we may have a few relations introduced on account of their essential difference in effect.

First proved by Schreter and E. Stapf, and published by the latter in 1828. Hahnemann and his students' proving was published in the *Archives*, 1830, with some toxic symptoms.

In 1831 the best proving of all, that of Apelt, was published in connection with many reliable provings on the sick, and some valuable cured symptoms.

In the same year Hartlaub published in the third volume of his *Materia Medica* two provings by very trustworthy men, Drs. Woost and Seidel, with some of the observations by travelers in Asia.

In 1835 Hahnemann incorporated it in the second edition of his *Chronic Diseases* as one of the antipsorics, adopting only 715 symptoms.

In 1859 in Clotar Müller's *Quarterly*, vol. x., p. 217 to 260, a so-called critical review was made; it is enough to say that nearly every symptom there condemned to be stricken out has been confirmed by the Vienna provings published since; in the list of toxic symptoms, given with great pretension, one of the main sources was overlooked, the report of Langsdorf (therefore not in Allen), and 15 symptoms of it belong to an entirely different Agaricus.

In 1869 Zlatarowich published the provings of the Vienna Society, undertaken with great zeal and courage. We may say *Amanita* has suffered an overproving similar to what our *Thuya* and *Lycopodium* had to undergo.

An addition has been made of Th. Rückert's essay, comparing the symptoms of this remedy with the symptoms of incipient tuberculosis; they are marked ⁞

The carefully dried cap (pileus) is triturated in the regular way.

[1] **Mind.** Cannot find proper word, uses wrong words; < after exertion and sleepless nights.

‖ Dulness almost amounting to idiocy. θChorea.

The whole psychological sphere as if paralyzed, hence a kind of idiocy.

Ecstasy, fancies excited; makes verses; prophesies.

Talks incoherently; passes rapidly from subject to subject.

Falls into a delirium as with high fever; becomes now gay, now melancholic.

Google

‖Delirium: tries to get out of bed; ‖‖constant raving without exacerbation; constant, does not know his relations, and throws his wine and medicine at his nurse. θTyphus.

‖‖Delirium tremens.

Fearless, menacing, mischievous frenzy; frenzy causing him to assail and injure himself, great exertion of power.

Silly merriness.

Great loquacity, convulsive motions of facial and cervical muscles, mostly r. side, drawing head down to shoulder; merry, incoherent talk, ‖followed by malaise.

‖Sings, talks, but does not answer questions; strength augmented.

Laughs at his attempts to stand and walk.

‖Disinclined to answer questions.

‖Aversion to work. θProlapsus uteri.

Indisposed to perform any labor, especially mental.

‖She is indifferent, though naturally very solicitous.

‖Very much out of humor.

Takes offence easily.

⁝Mental solicitude about his condition. θIncipient tuberculosis.

‖Cross, self-willed, stubborn. θChronic spasms of eyes.

‖His mind much depressed. θChorea.

‖‖Great selfishness. θNymphomania.

‖Morose, self-willed, stubborn, slow in learning to walk and talk; on trying to walk stumbled singularly often. θNystagmus.

‖Protracted mental application or exciting debates brought on vertigo.

Complaints after getting angry.

⁝Epilepsy after fright.

While meditating: vertigo.

When thinking of pain: undefined disagreeable sensation.

² **Sensorium.** Vertigo: when walking in open air, reeling as if drunk; long-lasting, with great sensitiveness to cold air; momentary; ‖‖from strong light of sun; with stupefaction and burning in vertex; combined with a tottering gait and indistinct sight, even of near objects; > thinking of something else; in attacks; objects whirling; tendency to fall forward; brought on by protracted mental application or exciting debates.

‖‖When walking does not arrive at point he sets out for. θChorea.

‖Constant dizziness. θFrom overwork at desk.

‖Lay almost always unconscious, though he could be raised for a minute when questioned. θTyphoid.

Google

‖Confusion of head.
Heaviness as after drunkenness.
‖As if drunken and always sleepy. θEpilepsy.
Unconscious and speechless with convulsions; t.
Fainting after moving head, hearing others talk, smelling aromatics or perfumeries, even smelling vinegar.

[3] **Inner Head.** Nervous headache.
‖Great weight in head, A.M. θChorea.
‖Throbbing, beating cephalalgia, with a sensation of stiffness of muscles of face. θClimacteric years.
‖Beating pain, with despair bordering on rage.
Burning in head.
‖Pain as though sharp ice touched head or cold needles pierced it.
Dull pain, especially in forehead; must move head constantly to and fro and close eyes as for sleep.
‖Violent oppressive pains, chiefly in forehead, with delirium.
‖Fulness and pain in temples. θFrom overwork at desk.
In temples: burrowing pain; drawing; shooting cramp-like pain.
‖Pressing in r. side, as if a nail was thrust in; worse sitting quietly; better moving slowly about.
‖Tearing and pressure in l. half of brain.
Heaviness or sense of bearing down; weight in top of head, with a feeling of pressing together of brain.
In vertex: pressure; burning; throbbing.
Dull fulness after waking.
Heaviness, drawing and tension; heaviness towards nape.
‖‖Dull, drawing headache in morning, extending into root of nose, with nosebleed or thick mucous discharge.
‖Headache from spine affection.
‖‖Headaches of those who are subject to chorea; or who readily become delirious in fever or with pain; twitchings or grimaces.

[4] **Outer Head.** Various sensations in l. half of occipital bone, when seated.
Sensation of coldness on r. side of frontal bone, though warm to touch.
‖Icy coldness in region of coronal suture after itching and scratching.
‖Sensation of icy coldness on head.
Twitching in skin of forehead, above r. eye.
‖Twitching of head and cervical muscles on r. side; drawing of head towards shoulder. θPregnancy.
‖Drawing or stitching pains in head, shifting from side to side. θNeuralgia.
Such a violent shock of whole head, starting in first cervical articulation, he involuntarily bit his tongue.

Digitized by Google

Drawing from both sides in frontal bone as far as root of nose.
Chronic tenderness of scalp, like that with spinal irritation.
Chorea-like muscular motions of galea aponeurotica (scalp), temporal muscles in cheek and lower jaw.
Head constantly falling backward as if a weight were attached to occiput.
‖Head in constant motion. θChorea.
‖Sweat all over, even on scalp.
‖Biting itching on scalp and other parts of head; ‖like tetter on a small spot on border of forehead, l. side.
Scalp sensitive as from subcutaneous ulceration.
Itching of scalp, especially early in morning, after rising.
‖Itching nettle-rash on scalp with stupefaction and vertigo. θClimacteric years.
‖Tinea capitis with crusts sometimes spreading to other parts of body.
‖Right half of head higher and thicker at birth of child.
‖Head appeared crooked and displaced; both halves of head grew almost even. θClonic spasms of eyes.

[5]**Sight and Eyes.** Sensitive to light, even candlelight; confusion, dizziness from it.
‖Feeling of weakness in eyes without having exerted them.
‖Shortsightedness.
‖Dim sight: focal distance changes while reading, first grows shorter then longer; things look obscured as from turbid water; ‖muscæ volitantes; vibrating spectra; with vertigo.
‖Reads with difficulty, type seems to move.
Flickering before eyes while writing.
‖If she grasped at any object held before her, her hand did not generally come near it. θNystagmus.
Yellow, brown or black spot before l. eye.
‖Brown muscæ volitantes.
‖Pupils dilated; light glares.
Optical illusions in dark colors.
‖Diplopia; sees things double. θFrom overwork at desk.
‖Myopia, dependent upon spasm of ciliary muscle, especially if complicated with twitching of lids.
‖Muscular asthenopia, with weakness of internal recti, and consequent inability to keep eyes fixed on reading (vanishing of sight), with pain around eyes, soreness of balls, twitchings and jerkings of balls and lids.
‖Muscular asthenopia consequent upon uterine disorders and spinal anæmia; cannot fix eyes long even on distant objects, could not converge them; lids heavy, as if stuck together, but are not.

Digitized by Google

‖Pupils dilated, eyes dull, tarsi reddened; constant lachrymation; ‖balls and lids twitch. θChorea.
‖Pupils rather contracted. θTyphus.
Exertion of eyes makes a pressure in balls, flimmering and mistiness.
‖Black motes hover before eyes, everything surrounded by mist, as if covered by cobweb, eyes hurt; dizzy; disposed to shut eyes. θHeadache.
‖Viscid yellow humor gluing lids; gum in canthi.
Heat in eyes.
‖Burning most in inner canthi; they itch, burn and are red; < from touch; stick together. θLachrymal fistula.
‖Frequent slight twitching in eyelids.
‖Spasmodic twitching in eyes and lids, clear water runs out of them.
Twitching in eyeballs; while reading, frequent twitching and pressing in l. eyeball.
‖Moving eyes hurts, burns and presses, and brows are sore to touch.
Jerks and pressing in l. eyeball at all times of day, and under all conditions.
Jerks in eyeballs frequently following each other.
While reading, frequent jerking and pressing in eyeballs.
Trembling and jerking of eyelids.
‖Child usually stared blankly and without taking notice of things, also squinted. θClonic spasms of eyes.
‖As soon as she opens her eyes in morning, both eyeballs, no matter whether they are fixed upon an object or not, begin to revolve towards r. and l. with a velocity of half a second, and this continues whole day, with but few intermissions. θClonic spasms of eyes.
Spasms, with aching in l. eyeball.
Narrowing of space between eyelids.
Clonic spasms; lids open and close in quick succession; ‖quivering of lids.
‖Eyes suffused. θTyphus.
Swelling of tear-glands.
‖Little blisters on cornea; ‖ulcers of cornea; ‖‖eyes inflamed, with flow of tears, from smells, from coughing.

Hearing and Ears. After listening to exciting debates, vertigo.
Every slight noise causes palpitation.
Hearing very acute; t.
Feels worse from hearing people talk.
Dulness of hearing.
‖Increasing deafness, seventeenth day. θTyphus.
Creaking in both ears, as from a wooden screw at each attempt to swallow.

Digitized by Google

Jumping of tensor tympani, sounding like a leather-covered metal valve.
Twitching, rattling, fluttering in tympanic cavity.
Tearing in r. ear; twitching stitches.
Painful stitches in l. ear.
Itching in l. external auditory tube, with a stitch in inner ear, as of an ice-cold needle.
Stitches in l. mastoid process.
Stitches from fauces along eustachian tube, r. side.
Excessive secretion of wax.
‖‖Redness, burning itching of ears, as if they had been frozen.
⁞Frost-bitten ears pain and itch.

[7] **Smell and Nose.** Smell of vinegar unbearable.
Smell sensitive; mucous membrane very sensitive.
‖Nosebleed of old people, with a relaxed state of blood-vessels.
‖Profuse fetid discharge from nose; epistaxis. θFrom overwork at desk.
Frequent dropping of clear water from nose, without coryza.
‖‖Dry and fluent coryza, with sneezing.
‖‖Frequent sneezing, even when there is no coryza, in morning in bed.
‖‖Copious discharge of thick tenacious mucus from nose.
‖Occasionally discharge dark and bloody. θChronic nasal catarrh.
‖Running coryza, with bad odor from nose and running of water from eyes.
‖‖Accumulation of dry mucus in nose, with sensation as if nose was entirely filled with it.
‖‖Stoppage of nose, especially when stooping.
‖Constant, copious and offensive discharge from nose, no one could inhale his breath without disgust. θChronic nasal catarrh.
Nose turns bluish.
‖Chronic inflammation of external nose.
⁞Frost-bitten nose with itching.
Little hard pimples on side of her nose and lips.
Headache extending into root of nose.
Drawing in nose (see 3), with nosebleed or much thick nasal mucus, followed by dropping of water from nose.

[8] **Upper Face.** Face red and hot. θHeadache.
⁞Heat in face and upper part of body, in spells lasting from five to ten minutes. θIncipient tuberculosis.
Puffy, pale; blue under eyes; nose and lips bluish.
‖Face blue and puffed. θEpilepsy.
Tearing in face and jaw bones.

Digitized by Google

Twitching in r. cheek.
Pulsating and throbbing in cheeks.
‖Twitching of facial muscles. θChorea.
‖Lancinating, tearing and drawing pain in r. cheek.
‖Faceache with toothache.
Itching in face, with redness and burning, as if frost-bitten.
‖Paralysis of muscles of face, so that one or both corners of mouth drop, allowing saliva to run out. θTyphus.
‖Expression of face somewhat idiotic; child had a senseless stare right before her and sometimes squinted. θNystagmus.
‖Expression of face wore appearance of idiocy. θClonic spasms of eyes.

[9] **Lower Face.** ‖Froth at mouth, face bluish and puffed θEpilepsy.
Jaws clenched.
Sensation as if splinters had been run into r. lower jaw.
Trembling vibration in lips and muscles of lower jaw; convulsive shaking.
Pricking in chin, as from needles.
On awaking, so violent a pain in l. articulation of jaw, he could scarcely open his mouth.
Violent tearing in r. side of lower jaw.
: Chaps and fissures of lips.
Herpetic eruption principally on upper lip.
Many little blisters on skin.

[10] **Teeth and Gums.** ‖Pains in superior maxillary bones and teeth.
Teeth feel too long.
Teeth sensitive to touch, pressure, or while chewing.
Painful jerk in teeth each time he drinks cold water.
Tearing in lower molars, worse from cold air.
‖‖Swelling and bleeding of gums, with pain.
‖Bleeding gums.
‖Shooting from r. lower teeth up to r. side of head.
: Inflammation of lining membrane of alveolar processes.

[11] **Taste and Tongue.** Taste: ‖‖sweetish, disagreeable, nauseous; foul; flat; ‖‖bitter; sharp and bitter; ‖‖metallic; offensive, gummy, sweet, after breakfast; sweetish-bitter when smoking; bad at root of tongue, with slight nausea; salty, as after herring; rancid.
‖Inarticulate speech. θChorea.
‖Inarticulate speech, like from trismus. θTyphoid fever.
‖Learned to speak with difficulty. θClonic spasm of eyes.
‖‖Left side of tongue numb, with vertigo.
Tongue: ‖‖coated white, mornings; smarting, burning in

Digitized by Google

tip, as from pepper; coated with thick, tough mucus in morning.

▮Tongue very tremulous and quite dry and bluish. θTyphus.

▮▮Tongue dry. θTyphus.

Soreness of tongue.

⁝Tip of tongue studded with small dirty yellow aphthæ. θIncipient tuberculosis.

▮▮Papillæ enlarged, sensation of dryness and contraction like after an astringent, tongue covered with a tough viscid phlegm, especially in morning.

▮Phagadenic ulcers on ligament of tongue.

[12] **Inner Mouth.** ▮▮Offensive odor like that after eating horse-radish.

▮Bad odor from mouth. θIncipient tuberculosis. θCatarrh.

▮▮Dryness of whole mouth and back of it.

Increased flow of acrid saliva.

▮▮Water accumulates in mouth, with pain in abdomen.

▮Mercurial aphthæ on roof of mouth and tongue.

Sometimes in erecting head, saliva gets into windpipe, causing a violent ejecting cough.

▮▮Frequently suffering from aphthæ, want of appetite, diarrhœa. θClonic spasms of eyes.

[13] **Throat.** ▮Feeling of dryness of fauces extending into pharynx, causing contraction, as when drinking an astringent.

▮Great difficulty in swallowing, with ravenous appetite. θChorea.

▮Throws up some flocculi or solid lumps of phlegm, almost without cough.

Pressure in fauces as though a foreign body stuck there, which could not be removed by swallowing.

Angina tonsillaris with great dryness in throat and general weakness. θCured by *Pulsat.*

▮Induration of tonsils, thymus and other glands.

Feeling of tension externally in region of thyroid gland.

Neck distended; cravat feels too tight.

A burning-cooling feeling along œsophagus to stomach, as after eating cress.

▮Scratching sensation in throat, renewed with every attempt to sing. θA professional singer after an epidemic influenza.

[14] **Appetite, Thirst. Desires, Aversions.** Much hunger, but no appetite.

Towards evening, suddenly attacked with rabid hunger; body covered with sweat; tremor and weariness of limbs.

▮Ravenous appetite, but difficult swallowing. θChorea.

Digitized by Google

‖Much hunger, but no appetite; early in morning; stomach feels as if empty.

‖Violent thirst.

▮Burning thirst. θTyphus.

Thirst rather rare, particularly in throat during chill.

[15] **Eating and Drinking.** Before breakfast: better.

During breakfast: nausea; very soon satisfied while eating, and pressure and bearing down in stomach.

‖After breakfast: headache, a very offensive taste, dryness, burning in throat, nausea and vomiting, and pressure in stomach.

Before dinner: bitter taste, but eats with appetite.

After dinner: inability to think; inner uneasiness; disgust for work; pressing in forehead and temples; painful drawing in occiput; same in eyeballs; buzzing in ears; earache; uneasiness in muscles of lower jaw and lips; unpleasant taste; biting behind on l. edge of tongue; a tearing sensation in pharynx, when swallowing saliva; very soon hungry again; belching; nausea and gagging; vomiting; sore feeling under ribs; ‖fulness in stomach, even after using light food moderately; pressure and fulness in abdomen; expansion; bloating; wind passing off; a stool with pain in anus; short dry cough or sneezing, causing violent pain; tension in sides of chest, and burning; pain in back; convulsive shaking of l. shoulder; a cold feeling as from quicksilver on l. nates, in hollow of knee, on a small spot towards r.; tearing pain in l. tibia; prostration of lower limbs; burning in thighs; violent burning in a corn on r. little toe, which does not allow him to take his siesta.

▮▮Very drowsy after dinner, quite unusual; he sleeps very deeply and gets awake with pains in all limbs.

After supper: molesting fulness in abdomen, backache, chills.

Sleepy while eating, distended abdomen; griping around navel; pappy stools; tension across chest; nervous sensation running through body.

Better for an hour after eating while he is so exhausted; but great sleepiness remains.

After a meal: nausea, eructations; abdomen distended (even after moderate eating).

Eating is almost always followed by heartburn; prunes by pressure in stomach.

After a swallow of cold water, nausea, the same quiets vomiting of phlegm; wine indisposes to work; coffee accelerates pulse.

▮Daily about three hours after a meal she has a burning

Digitized by Google

at stomach, which changes into a dull pressure with nausea.

After smoking: peeling off inside of lips; saltish bitter, exceedingly offensive taste; belching and hiccough alternating; sudden nausea and vomiting; attacks of violent cough.

[16] **Hiccough, Belching, Nausea and Vomiting.** ||Hiccough alternating with belching.

With hiccoughing: burning pains in region of heart.

||Belching: with taste of food.

Eructations: empty; ▮taste of rotten eggs; taste of apples.

||Nausea: with anxiety, depression, vertigo, sneezing, unpleasant sensation in stomach, stitches in liver, cutting in abdomen, rapid breathing, great weakness; in chest.

||Heartburn.

||Vomituritio and great prostration, fainting.

Vomiting: in evenings; middle of night; of ingesta.

||Bitter vomit, with stitches in rectum and loin, followed by headache and irritation to sneeze.

[17] **Scrobiculum and Stomach.** ▮Sensitive to pressure in pit of stomach. θChorea.

Spasmodic drawing from pit of stomach up into chest.

Drawing in of pit of stomach.

||Burning below sternum.

▮Sense of oppression at cardiac region, as if cavity of thorax was narrowed.

⁝Bilious dyspepsia in very nervous persons.

▮Cardialgia for three hours after a meal.

Burning in stomach, changing into a dull pressure, as from a foreign body, with nausea.

|Heavy sensation in stomach; faintness, with an empty feeling, sometimes alternating with a jerking sensation as of some heavy object. See 29.

||From 12 to 2 P.M. daily, cramp from middle of spine through into stomach; severe gagging and vomiting; legs feel as if pricked all over with ice-cold needles.

[18] **Hypochondria.** ▮Liver enlarged, congested.

Sensation of pain and drawing in r. hypochondrium, as if liver had increased in weight and dragged at its ligaments.

||Sharp stitches, as from needles, in region of liver; dull stitches during breathing.

||Stitches under short ribs, l. side.

▮Pain in stomach and liver, burning from acidity.

⁝Enlargement of liver.

▮Pain in l. hypochondrium, with rumbling in region of l. superior flexure of colon.

Digitized by Google

[19] **Abdomen.** ||Violent colic, cutting, griping, pinching.
:Popular medicine for colic with the Korjäkes.
||Great noises in abdomen.
Rumbling, with constant pain deep in umbilical region; < from pressure.
|Loud rolling and rumbling in bowels, with constipation. θDuring pregnancy.
:Flatulency of stomach and bowels.
Pinching below umbilicus, attended with a bloated condition of abdomen.
|Pain in abdomen with fetid discharges. θTyphus.
|Burning in abdomen.
:Ulceration of stomach and bowels. θTyphoid fever.
A great heaviness like from a weight, most below navel.
|A pressure as from a swelling from l. hypogastrium to back.
||In region of cæcum, violent stitches, with sneezing.
Sensation of emptiness, hollowness or coldness in abdomen.
||Distension of abdomen.
Undulatory jumping of upper abdominal muscles.
Twitching, tension, tearing and stitches in loins.
||Subsultus of abdominal muscles.
Bruised feeling in loins, in sitting and lying.
Laming pains in loins, < walking and standing.
:Abdominal plethora.
|Weakness in loins. θRheumatism.
In groins, peculiar tensive sensation as if wrenched, less when walking, |quivering in left.

[20] **Stool and Rectum.** In rectum: a sharp itching, invites to drawing upward, but is only relieved by pressing down; burning and loss of blood; biting after wind passes; bearing down, tenesmus.
Prickling, itching in rectum and anus, as from worms.
Passes much inodorous flatus, every day for weeks; more after breakfast.
Wind of odor like carrion; like garlic.
Stool thin, yellow, fecal, slimy.
||Stool mushy, most after breakfast, oftener than usual.
Stool pappy, passage of a large quantity of wind.
||Stool has an abominable stench; t.
|Fetid stools.
Diarrhœa mostly in morning, after rising and eating, with much rumbling; crampy colic and passing of wind.
|Diarrhœa in children; liver involved, with grass-green, bilious stools.
|Diarrhœa, with cutting in abdomen; bowels loose, stools light and offensive. θTyphus.
|Looseness commencing in morning, immediately after

Digitized by Google

rising, returning after each meal with much rumbling, passing wind and spasmodic bellyache; crampy colic. θChronic diarrhœa.

Very hard stools; at first hard and knotty, then soft, finally diarrhœic.

‖Costiveness. θRheumatism.

Before stool: pinching and cutting in abdomen; urgent tenesmus; painful straining in rectum.

During stool: colic and passing of flatus; burning soreness, smarting and cutting in anus; sweat; pain in loins to legs, continuing after stool.

After stool: headache >; biting in anus; straining in rectum; cutting pain in anus; griping in hypogastrium; distension of abdomen; heaviness in abdomen and around naval; pain in chest.

In anus: periodical violent stitches, afternoon; tearing pain with hard stool; ‖heaviness and fulness; ‖pressing, at noon; an urging towards it from wind; very unpleasant sensation of dryness, ‖had to draw it upward; sensation as if completely closed; ‖paralytic weakness in sphincter; warm feeling, ‖burning with cadaverous smelling flatus; heat and itching, ‖itching and burning; crawling as from worms, has to scratch; moisture and oozing out; slime appears without a stool.

A copious mushlike stool, followed by burning in anus.

Hemorrhoidal tumors burning, inflamed, swollen.

[21] **Urinary Organs.** Pressing pain in region of kidneys, disturbs sleep.

Stitch in r. kidney.

‖Lameness in l. kidney, sore to touch, with cramp extending into thighs.

Tensive pain while riding.

Twitching pain in bladder.

‖Paralytic weakness in sphincter, can hardly hold urine.

Sphincter vesicæ weak, with dribbling.

‖Urine passes at intervals and dribbles away, ‖with a cold shrunken penis.

Urine passes in intermissions; flows and stops.

‖Constant desire to urinate.

‖Quantity of urine very much increased, even with diarrhœa.

Urination, with coldness down legs, numbness and twitches.

After urination, urine passes off involuntarily.

Urine passes slowly in a small stream or in drops, has to press to promote flow.

Urine: watery, clear, lemon-colored, ‖bright yellow; dark yellow and hot; red; red, flocculent or powdery

Digitized by Google

sediment; watery in forenoon, ||in afternoon milky; like whey; turbid; with a red or white sediment (phosphate of magnesia); iridizing on surface.

|Urine profuse, colorless. θChorea.

|Urination lessened. θRheumatism.

A little shimmering pellicle on urine.

Urine with red, flaky sediment; sediment white, of phosphate of magnesia.

With urination: spasmodic drawing in l. groin; ||burning in urethra, |at night in orifice; sensation as if a cold drop of urine was passing; |painful urging along urethra.

Urethra: burning stitches; stitch like from a red-hot iron; ||several fine stitches, most in orifice; ||crawling, itching, tickling in orifice |lessened by cold water; ||discharge of prostatic juice or of a tough viscous slime; momentary burning in orifice during night.

Viscid, glutinous mucus from urethra.

[2] **Male Sexual Organs.** ||Excited sexual desire, most mornings.

After siesta, an irresistible urging, and, after emission, tensive pressure in hypochondria.

Erections night and morning.

Great desire for coition, with relaxed penis.

||Pollutions: several nights; |in siesta.

|After emission, pains and weakness in thighs.

||Sexual power much diminished, apathy, nothing can produce an erection.

|During coition: burning in urethra; most painful with ejaculation; insufficient ejaculation, or very late; voluptuous ecstasy wanting.

After coitus: |loss of appetite; ||each time great relaxation for several days, |lassitude; |night-sweats; for two nights burning itching of skin, with sweat on upper chest and shoulders, afterwards on abdomen and arms.

||Complaints after sexual debauches.

||Drawing in testicles, with a sense of discomfort, heaviness and drowsiness; evenings.

Spasmodic drawing in l. testicle and spermatic cord.

||Excessive and painful retraction of testes towards inguinal ring, has to palliate it by pressing them off with fingers.

Disagreeable sensation in urethra, only in front part of penis, like a crawling, has to squeeze penis.

Penis cold and shrunken.

Itching in penis, on foreskin and scrotum.

On left side of scrotum red swelling, tickles and itches.

|Old gleets and other sequelæ of gonorrhœa.

Digitized by Google

‖Excessive itching of genitals, in mons veneris; unbearable for several days.

‖Itching and burning at night above genitals, lichen pilaris urticatus.

[23] **Female Sexual Organs.** ‖Awful, almost intolerable bearing-down pain.

Cramps as if she must have a child, obliged to lie down.

|Itching and irritation of parts, with strong desire for an embrace.

‖Menses too profuse, with tearing, pressive pains in back and abdomen.

At beginning of menses: nightly restlessness on account of troublesome rigors; toothache and wakefulness.

During menses: headache, toothache, pain and itching in l. ear, lessened by boring; pains, like those of labor, in belly and back; pains in l. arm; itching here and there, particularly about genitals; rigors; palpitation; running of water from mouth.

|Swelling of vagina and several nodules (with horses).

After menses: pain as from exhaustion; palpitation; headache and dizziness; |prolapsus after cessation of menses; interrupted sleep with anxiety.

|Leucorrhœa very profuse, dark colored. θProlapsus uteri.

Leucorrhœa, with much itching internally and externally.

[24] **Pregnancy. Lactation. Parturition.** |Constipation with rumbling in bowels during pregnancy.

|Four weeks after childbirth a pressing pain like a swelling from l. side of hypogastrium, extending towards back; motion aggravates; thirst; loss of appetite.

|Metastasis of milk to brain. θEpilepsy.

Nipples itch, burn, look red.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Worse from singing.

|During singing a scratching in throat; after "grippe."

Oppression and constriction of larynx; he fears suffocation.

Tickling along windpipe, with a violent, raking dry cough.

|Tickling in trachea. θLaryngo-phthisis.

:Frequent tickling irritation in windpipe. θIncipient tuberculosis.

[26] **Respiration.** |At night breathing was impeded, owing to closure of nose by thick mucus. θChronic nasal catarrh.

‖Oppression of chest with pain in stomach.

During inhalation: stitches in l. side and ‖below short ribs; increasing pressure on middle of sternum; dull stitches in liver.

Digitized by Google

With a deep inspiration: pains in different parts of chest and abdomen; shooting from heart to shoulder blade.
| | Frequent deep inspirations.
Rapid breathing, evenings, with heat all over and sweat, most in face.
| | Great inclination to sighing, involuntary, with rapid beating of heart.
Suffocative fits with anxiety and fainting; t.
| | Difficulty in breathing, as if chest was too full; he must breathe more deeply.
| | Chest as if too narrow, pressure on both sides of sternum.
Difficult and noisy respiration.
: Short breath in walking, has to stand still to get breath. θ Incipient tuberculosis.
Constriction of chest, with deep inspirations at times, and visible beating of heart, and a kind of oppression, especially behind two borders of sternum, along its whole length.
In region of diaphragm painful drawing with difficult breathing.

π **Cough.** Dry cough with whistling behind sternum.
: Frequent dry cough, after meals. θ Incipient tuberculosis.
| | Cough with rattling of phlegm, without expectoration.
| | Dry cough from a tickling in trachea at night, shaking whole body violently.
| | Constant irritation to cough which can mostly be suppressed, but, if he cannot resist it, several violent convulsive shocks of cough succeed one another, which are very painful, tears run from eyes, and he has to double up.
▮ Violent cough in isolated attacks, ending in repeated sneezing.
: Hacking cough. θ Incipient tuberculosis.
| | Convulsive, hacking cough, with oppressive sweat.
▮▮ Sudden convulsive coughs, < forenoons, or during day.
| | Violent spasmodic cough at night.
Cough most at night, less in morning, in forenoon, < towards evening.
| | Dry cough after dinner.
During cough: burning in chest; stitches in l. side; palpitation.
▮ Convulsive cough with anxious sweat.
| | Has to sit up in bed, or cough takes his breath.
With cough pressure in l. head, running in scalp; burning in eyes, tears run from eyes.
Spasmodic contraction of chest, threatening suffocation;

Digitized by Google

rawness of chest, shooting in l. side of chest; some saliva flies out of mouth; nausea, retching; burning in stomach; heaviness in abdomen; colicky pain impedes coughing.

‖Cough towards evening with frequent pulse (100) intermitting.

‖After each cough violent sneezing; sometimes so rapid that he does not know if he coughs or sneezes.

‖Frequent hemming and bringing up small, firm lumps of phlegm, without cough. θLaryngo-phthisis.

‖Mucous sputa most in morning.

⁝Mucus is loosened by slight clearing and comes up in small, hard, round balls. θIncipient tuberculosis.

⁝Expectoration of small flakes of mucus raised almost without any cough. θIncipient tuberculosis.

Sputa sometimes consisting of large brown lumps.

‖Long-lasting cough and puslike sputa.

‖Rattling of phlegm in chest, < mornings and when lying on back.

‖Chronic catarrh.

Loose cough; with distension of abdomen; heaviness most in region of navel; noise in belly; ‖passing of wind.

[28] **Inner Chest and Lungs.** Sudden stitches in middle of chest.

⁝Incipient tuberculosis.

Stitching behind sternum most at end of expiration.

Very painful stinging pressure in chest, below shoulder blades, and on corresponding places in front; has to breathe deeply.

Stitches: in r. lung while walking; with every breath in l. chest; between sternum and nipple, pulse 90, hard and full, 3 P.M.

‖Jerking stitches through r. lung.

‖Oppression of chest in region of diaphragm, with drawing pains. θAngina pectoris.

‖Pressure on chest and heavy sensation.

⁝Sense of constriction in cardiac region, as if chest were too narrow or too full of blood. θIncipient tuberculosis.

Sprained sensation in chest, increased by taking a deep breath, evenings.

‖Tension in lower part of chest during motion and when sitting, taking away his breath.

Tension, pressure, heaviness and constriction of chest.

‖Tension over whole chest, most in front after breakfast.

Oppression behind sternum with strange beating of heart.

Anxious sensation in chest.

‖Burning in l. chest, worse after dinner.

Digitized by Google

Severe burning in chest. θIncipient tuberculosis.
Sensation of sore pain deep in chest, first l., then r.
Inflammation of lungs.
All symptoms of incipient phthisis.
Sticking, under nipple. θIncipient tuberculosis.
Twitches running across chest in rapid succession, accompanied by prickling. θIncipient tuberculosis.
Consumption of lungs; tuberculous consumption.

[29] **Heart, Pulse and Circulation.** Sticking pain in apex of heart.
Stitches in region of heart, through to shoulder blade; < from cough.
Violent stitches in region of heart, with an intermitting pulse and great weakness.
Burning, shooting pains in region of heart, extending to l. shoulder blade; caused by deep inspiration and much worse from coughing, sneezing and hiccough.
Sense of oppression in cardiac region as if cavity of thorax was narrowed; confined feeling.
Constant feeling of a lump in epigastrium, with pain under sternum; drawing in region of diaphragm, sharp pains in l. side. θAngina pectoris, gastralgic form.
When he lay down at night he felt several blows in heart with trembling in pit of stomach and anxiety, caused by every slight noise.
Several twitching shocks of heart.
At night transient painful shocks at heart, with anxiety.
Oppression at heart on bending body down, with violent beating of heart.
The r. heart overfilled with blood; t.
When he awoke, trembling of heart.
Palpitation most in evening. θReal convulsio cordis.
After a feeling of compression with omission of beats of heart, some very quick irregular beats.
Palpitation violent, strongly felt, < evenings, with redness of face; on sitting down, some irregular, strong beats; anxious oppression.
Attack of violent palpitation of heart, with anxiety breaking out in a sweat.
Forcible beats of heart, lifting hand lying on chest and moving a newspaper she had in her hand up and down.
The prover hears the heart-throbs.
Accompanying palpitation: anxiety; trembling in pit of stomach; dull headache; vertigo; red face; oppression.
Paralyzed feeling in l. arm and hand; shudders, crawls; water runs together in mouth; all the limbs are weary.
Pulse: frequent, 100 in a minute, irritated, full, strong; beats quick, 87; weak, small, 60; felt in all parts of

Digitized by Google

body, most in epigastrium; intermits after 30 or 40 beats; dicrotic; weak, small; small, irregular; t.; exceedingly weak; t.; ⁝small (incipient tuberculosis); feeble, scarcely perceptible; becomes slower during day, more frequent in morning; small, uneven, very unequal, irregular, at times intermitting; weak, tremulous (from overworking).

▮Pulse very frequent and small, 140; first sound of heart scarcely audible. θTyphus.

General inactivity of circulation.

[30] **Outer Chest.** Peculiar sensation of contraction of sternum.

Jerking, subsultus of all pectoral muscles.

Pressure on r. chest near nipple, throbbing sore feeling.

⁝Painful pressure on middle of sternum, < when inhaling. θIncipient tuberculosis.

Sharp stitches: like splinters in pectoralis near nipple, first r., then l., later on lowest ribs; on different parts of thorax.

Pain in l. intercostal muscles.

Twitches of pectoral muscles.

Shooting tearing pains in small spots.

⁝Throbbing aching pain in small spots on chest. θIncipient tuberculosis.

Soreness deep in chest in two spots, four inches on either side of sternum; it hurts or weakens her to breathe or speak.

Copious sweat on chest during night.

Burning, biting pimples on outer chest.

[31] **Neck and Back.** Tension in region of thymus gland.

⁝Struma.

▮Cervical glands swollen. θChorea.

▮▮Muscles in neck feel as if beaten.

Stitches in cervical vertebræ.

▮Twitching of cervical muscles.

▮▮Stiff neck.

▮▮Tension and stiffness of muscles of neck.

▮▮Sensation as if sprained in neck when turning head to left.

Extending to nape of neck: crick in back.

Itching pimples on neck.

In back below shoulder blades, a gnawing, shooting, tearing pain.

⁝Sticking between shoulder blades. θIncipient tuberculosis.

Frequent sharp stitches like from splinters on dorsal vertebræ.

▮▮Feels as if large splinters were pushed into back.

▮Violent shooting, burning pains, deep in spine.

Digitized by Google

Spasmodic, pressive, drawing pain starts from back, extends to middle of chest and into œsophagus.
Painful pulsation in spinal canal.
Dorsal muscles feel as if beaten or bruised; on bending forward they feel short.
Backaches disturbing sleep at night; cannot find a position to lie in, with heat.
Aching along spine and limbs.
Pain in back, as after continued stooping.
Pain along spinal column, < when stooping.
Every motion, every turn of body, causes pain in spine.
Crepitation in vertebræ of neck when stooping and crackling all along spine when moving body, in loins when stooping.
Crick in back extending from sacrum to nape of neck.
After dinner, pain in spine, especially a spot size of palm in middle of spinal column; is very sensitive to touch, as well as at every motion of body.
Shooting pains in single vertebræ.
Violent shocks starting from one of lower vertebræ.
Sensitiveness of single vertebræ to hot sponge. θChorea.
The whole spinal column is very sensitive to touch, even by a sponge, or leaning against a chair.
Biting burning in a small place on spine.
Spine sensitive to touch; < mornings.
Pain along spine in several places, tender to touch.
Sensation as if cold air was spreading from spine over body, like an aura epileptica.
Coldness below shoulder blade, as if touched by a piece of ice.
Chilliness over whole back.
Crawls over back and limbs.
Running heat through limbs.
Sensation of soreness and great weakness in back.
Numbness and weakness in back. θChorea.
Great uneasiness and weakness in spine, with twitchings.
Great weakness in muscles of back, can hardly sit straight.
Peculiar sensation of weakness and stiffness between shoulders; extends to neck.
When stooping, spine pains as if too weak to support.
Sensation of ants creeping along spine.
Burning, biting on back.
Itching on back; suppurating pimples.
Violent pains in first and second lumbar vertebræ when turning.
Pain in first two lumbar vertebræ, with sense of coldness in glutei muscles, spreading down legs, and formication in feet.

Digitized by Google

Spinal column sensitive to pressure of a hot sponge in region of second and third lumbar vertebræ. θChorea.
Sensitiveness of lumbar vertebræ. θChorea.
Pain in lumbar region and sacrum, especially during exertion in daytime and while sitting; pain, sore aching; back not sensitive to touch.
Pressure in sacrum like a heavy load, as if it would burst.
Pain in sacrum: a sort of crick in back; extends along spine to nape of neck; < in evening, or goes into lower limbs.
Sudden violent stitch in sacrum while walking in open air.
Pain in back and sacrum so violent that he has to keep in bed, some palpitation, no appetite, no stool, but frequent discharge of pale yellow urine.
As if beaten in sacrum, or dislocated feeling.
Feels palpitation even in os coccyx.
Dry feeling in os coccyx.

Upper Limbs. Shoulder joint as if dislocated.
Convulsive shakes in l. shoulder.
Tearing in r. shoulder.
Shooting in axilla.
Icy feeling in r. axilla and l. inner ankle.
Rheumatism of r. deltoid worse when moving joint backward, with great weakness in loins, costiveness and less urination.
Spasmodic pains in l. upper arm below deltoid, followed by a similar pain in r. upper leg.
Sprained feeling in deltoid and as if thousands of splinters were in it when lifting arm; at 5 P.M.
Drawing pain: from l. upper arm to forearm; in muscles of l. forearm.
Tearing in l. upper arm, lower teeth and l. ear, with violent itching in ear; pains < from lying on sore side; from 2 P.M. till evening.
Irregular and hurried movements of arms.
Twitching and spasms in arms, ceasing when doing hard work with hands.
Violent shock of l. arm, followed by wavelike twitchings of abdominal muscles; during siesta.
Upper arm shaken like from an electric shock.
Subsultus tendinum on upper arm.
Such constant motions of upper limbs that pulse cannot be felt, lower limbs are drawn up to trunk; t.
Irregular quick motions in upper limbs; t.
Tension in l. upper arm.
Has to put his arms often into another position.
Violent laming or paralytic pain in l. hand and arm five minutes after palpitation commences.

Digitized by Google

Cannot lift his arm; arms are stiff.
‖Prostration, weariness and paralytic feeling in l. arm.
Burning above l. elbow.
Itching on arms.
‖‖Burning itching on both hands, as if frozen; parts hot, swollen, red.
‖Burning itching pimples size of millet-seed on arms.
A small painful abscess on middle of r. deltoid.
Violent rheumatic pains in forearm, extending into thumb; afternoon, in rest.
‖Drawing in forearm, in l., or both.
Tearing drawing pains in l. elbow joint.
‖Rheumatic or gouty stiffness of l. hand and elbow joint.
Electric stitches in olecranon of each arm.
In point of elbow, coldness like from ice.
Forearm: ‖tearing in bones of l.; tearing between bones; strong painless pulsation near and above r. olecranon; tension, lameness and numbness; starting and quivering on upper surface of r. hand, extending to ball of hand; pressive trembling in r. hand.
In extensor side of r. forearm, sudden awful pain like thousands of splinters, with a momentary sensation as if he would lose consciousness.
Sensation like from splinters in point of l. elbow.
Burning in front of l. forearm near wrist as if he had burnt himself.
Burning itching on r. forearm; after scratching, white nodules, size of millet-seed, and furfuraceous peeling off.
Itching on point of elbow.
‖Tearing: in l. wrist; in both hands.
Burning sore pain in skin of r. hand from wrist to thumb and index finger; slightest touch with finger painful.
‖Trembling and coldness of hands. θFrom overwork at desk.
‖‖Trembling of hands. θTyphus.
Right hand unsteady while writing; arm feels paralyzed from much writing.
‖Left hand up to forearm asleep at night in bed; from leading a little boy during a walk.
Cold hands.
Hands chilly, nails blue, with a small, hard pulse and prostration of whole body, at noon.
Face and ‖hands blue and icy cold.
Sometimes a warm sweat on palms.
‖Itching on r. wrist.
Itching, redness and burning in hands like chilblains.
‖Tearing burning in thumbs, stitches like needles.
‖Spasmodic pain in thumb.

Digitized by Google

‖Tearing between thumb and index finger.
Drawing, tearing in l. index finger as from splinters.
Burning and crawling in r. index finger as if a felon would come.
Icy cold sensation in joint of middle finger; somewhat reddened and sensitive to touch; violent tearing.
Finger often deadens and remains a long time sensitive to cold.
Tearing in l. little finger.
Frequent sudden motions of r. fingers.
Tearing in joints and drawing, as if in periosteum, of all fingers.
‖Stiffness in fingers from gout.
Fingers itch, burn and look red, as if frost-bitten.
Points of fingers blue; t.
Nails blue.

[53] **Lower Limbs.** Pains over both hip joints, he gets up stiff.
‖Tensive, pressing tearing in hip joints as if heads of bones were pulled from sockets.
Violent ischiatic pain; neither touch nor pressure, neither walking nor rest has any influence, but < by stooping or change of position.
Stretching pain in acetabula.
Stitches, pressing and feeling of dislocation or as if beaten in hip joint.
Coldness in region of trochanter; at intervals shaking, pushing concussions now in l. hip, now in r. hand, commencing in joints of lower limbs.
‖Pains in legs, especially in region of r. hip joint, like from fatigue.
Itching on condyles of hip bone.
‖Violent pains in limbs, especially l. hip under gluteal muscles.
‖In l. buttock violent tearing with sensation of coldness, wakening him out of sleep.
‖Twitching of gluteal muscles.
‖Icy coldness from glutei down to feet, most in big toes, with numbness and twitches.
Furuncle on r. gluteus, size of hen's egg, very painful, discharging black blood on seventh day, with most violent burning pains; lasted five days.
Pressing in thighs, < in right.
Sensation of a plug on outer side of thigh, ‖above knee.
Rending drawing in thigh, extending to knee.
Tendons of thigh are stretched.
From groin down to middle of anterior thigh, violent contraction in flexors.
Tearing from hip joint to knee, with numbness.

Digitized by Google

||Crossing legs causes pain in thighs.
Thighs pain as after a long journey on foot.
Painful weariness and heaviness in thighs.
||Electric stitches or spasmodic pain in anterior part of thigh.
Burning, itching on inner and anterior portion of thigh.
Biting and burning pimples above knee.
All along flexor side of thigh violent burning, and later a thick rash like from nettles.
On front of thigh and on buttocks very painful furuncles.
In knee joint: drawing, tearing, stinging; ||weakness; ||sprained feeling.
Tearing drawing in knee; < sitting, > walking.
||Violent stitches in both knees, followed by weakness.
Muscular twitches, or ||weakness in knees, ||they knock together.
Itching, violent pain, a tremulous feeling, or coldness on a small spot in bend of knee.
||Pain in bones of lower legs, sometimes as if in periosteum.
Pains in bones of legs, as if in marrow.
||Violent pressing pains in l. tibia beginning in morning, < at noon, > afternoon and evening.
Pains similar to syphilitic bone-pain, not worse in warmth of bed, but rather better.
||Tearing drawing pains in shin bones, < sitting, > walking.
Burning in tibia.
|Pains in legs most marked when standing or sitting; > when walking or from motion.
||Dull pain along tibia; drawing pains in shin.
In calves: ||tearing; ||painful contraction; ||stitches; |burning; heaviness.
While walking, alternate stretching and flexion in lower limbs, causing a strange lifting and sinking of body, accompanied by merry, incoherent talking; t.
Heaviness, weariness, or a tearing with a paralytic numbness in lower legs.
Painful prostration in legs, cannot go up-stairs.
The legs ache as after a prostrating sickness.
||Lower limbs weak, weary, cannot support body, cannot stand, has to sit.
||Heaviness: as if lead was hanging on legs; with languor.
|Weight in legs; they feel weary and as if they had been knocked from under.
|Weak and heavy in legs all day; yellow urine.
On crossing thighs he feels a violent pain in them.

Digitized by Google

||Trembling of lower limbs.
Electric shock through lower limbs, most in left, suddenly awaking him.
Jerking motion in lower limbs.
Sudden concussions in legs.
Muscular twitching, followed by biting itching on soles.
In lower limbs: coldness, ||burning, evening and night copious sweat.
At night in warmth of bed an itching, forcing to scratch, leaving bloody streaks.
||Burning on r. lower leg.
Burning itching, skin dry and peeling or small nodules.
||Sweats much on lower leg.
|Drawing, pressive pains in legs; especially in ankles.
Pain < in standing, has to walk or sit.
Pains in ankle joint waken him at 2 A.M.
||Crampy pain in ankle joints extending over heels; shooting burning pains.
||Crawling and itching on dorsi of feet.
||Shooting in metatarsal bones and feet while walking.
||Feet cold like ice up to ankles.
Burning in feet, as if blood was glowing in veins.
||Great weakness, |heaviness, or formication in feet.
Stiffness in tendo-achillis.
Heels as if beaten, when standing.
In soles: tearing, ||shooting, like splinters, ||biting itching.
|Cramp in soles at night.
Right little toe pains as from narrow shoes, in l. second toe same sensation in a corn.
In big toe: ||tearing, jerking pain, digging, sudden stitches like splinters.
In all the toes: ||drawing, |digging, ||shooting, crawling or prickling; painful swellings, like nails growing in; ||itching, burning and redness, as if frost-bitten.
||Pain and inflammation of frost-bitten toes.
||Chilblains.
||Violent pains in a corn on r. little toe.

34 **Limbs in General.** Tearing in l. forearm and r. thigh.
||Tearing in limbs, < in rest or sitting, > moving.
Shooting pains: in all limbs; most in knees and nape of neck; r. knee < going up-stairs; in fingers and toes.
Violent pains all night along back, on chest, in loins and legs.
|Pain in r. knee and l. hand; pain shifts about every third day; during attack cough only on moving about; pains < when he begins to move about in morning. ∂Rheumatism.

‖Tearing and drawing in tubular bones, < in their ends.
Pains in bones of legs and forearm, alternating with similar pains in r. tibia.
‖Cracking and other noises in joints.
‖Trembling of limbs.
Restless, tremulous feeling in upper and lower limbs, with shaking and twitching.
|Subsultus tendinum.
|All the limbs as if beaten, after slight exertion.
After repeated and severe epistaxis, great soreness and bruised feeling of joints of limbs.
Muscular soreness as it remains in some cases after fever, in attacks of influenza.
|Violent ulcerative pains in limbs prevent sleep at night, from l. elbow to little finger, and from calves to heel, with beating pains in little toe; general heat. θA young, leprous lame girl.
|Feels as if her limbs did not belong to her.
‖Pains in limbs with lameness and numbness.
|Weakness and coldness in limbs. θChorea.
Limbs cold, blue; t.
|Livid limbs. θTyphus.
‖Formication in upper and lower limbs, as if gone to sleep.

[35] **Rest. Position. Motion.** In rest: pains in forearm, metatarsus, toes; symptoms generally <.
In standing: vertigo; headache; pressure in stomach; tension in groin; prostration in chest; ‖very painful palpitation; pain in sacrum, loins, thumb, |legs, knees, heels and toes; legs weak.
|Uncertain footing when standing. θFrom overwork at desk.
‖Stooping: nose stopped up; stitches under ribs; oppression at heart; spine pains.
|After using flexors: most after stooping or bending forward, painful tension and soreness in different places.
When sitting: vertigo; ‖headache; pressure in stomach; cutting in diaphragm; colic-like spasm in stomach; tension in groin; itching on scrotum; dry cough; pressure on chest; sudden violent stitches in chest; tension lower part of chest; anxious, irregular beats of heart; sore as if beaten in neck, loins, back, ‖sacrum, |hips, ‖thighs, |knees, shinbone, ‖buttocks and ‖lower limbs; stitches on outer ankle; tearing in inner heel, foot, big toe, little toe and corns; cramps in muscles; painful sensations in anus disappear.
Has to sit down when cough comes.
‖After changing position, most when rising from sitting

Digitized by Google

and using extensor muscles, different, painful and other sensations in limbs.

Lying on back: rattling in chest; pain in occiput through to glabella.

Pain in sacrum and loins lying on r. side, > turning to l.

Worse lying on suffering side.

Lying in bed: headache, extending to l. ear.

Lying down: rushing in r. ear; palpitation; shocks at heart; pains in loins, sacrum, knees; shaking chill; twitches of muscles.

‖With every attempt at voluntary motion twitches are increased; no twitchings at night. θChorea.

Moderate motion: relieves pain in limbs, in head and limbs, in small of back, in knees, in corn, also weakness.

Motion: moving head, neck hurts; any motion of body, back pains; chilly; joints crack; pressure in eyes; eyeballs burn; hands tremble; tension lower part of chest.

‖From slightest exertion: copious sweat.

In going up-stairs: greatest weariness in lower limbs.

Walking up hill: makes him faint.

Worse in walking: vertigo; headache; thirst; stitches in chest; pain in knees, they give way; pain in lower limbs, in ankle joint, heel, metatarsus, soles.

From walking: vertigo; oppression of stomach; colic; difficult breathing; stitches in lungs; stitches in sacrum; pressure in upper part of chest.

‖Uncertainty in walking, tumbling over everything in the way.

‖Unsteady walk. θChorea.

While walking, pains in lower limbs and groins disappear.

‖Thigh most affected and painful after walking.

In writing: lameness in upper arm; weariness in forearm; uncertainty in hand; cramp in ball of thumb.

‖If she reaches for an object, she usually misses her mark. θClonic spasms of eyes.

‖Uncertainty in his carriage and when walking. θChorea.

He stumbles over everything in his way.

‖Learned to walk and to speak with difficulty, and at a late date. θClonic spasms of eyes.

In turning around: pain in back or neck.

[36] **Nerves.** Increase of strength during delirium; t.

The slightest influence of the will seems to have the most powerful effect; t.

All motions are much easier and are made with much more dexterity; t.

‖Extraordinary strength of muscles. θEpilepsy.

They lift up heavy loads and carry them with great facility for distances; t.

Digitized by Google

It seems as if they were dancing, they make the strangest pantomimes with the hands; t.
They run to places where they had no intention to go; t.
Nervous excitement bordering on convulsions.
Extreme wakefulness and restlessness, and continual fever.
At night, 3 A.M., awakes with an inner restlessness in all voluntary muscles, followed by a trembling and finally an irresistible playing and twitching of all muscles.
Very restless. θTyphus.
Trembling of lower jaw and lips.
Chattering of jaws and trembling of limbs. θTyphoid fever.
Great weakness and trembling. θProlapsus uteri.
Tremulous sensation in whole body.
Tremor of whole body. θTyphus.
Trembling of parts or all over. θChorea.
Trembling, with anxiousness and prostration.
Trembling of legs and hands, with debility; soreness of spine; < at approach of thunder-storm.
Twitching of muscles in different places, now here, now there; subsultus tendinum.
Twitching and spasms during sleep.
Muscular twitchings grow more violent; only a few hours sleep. θChorea.
Twitchings: of eyelids and eyeballs; of cheeks: in chest posteriorly; in abdomen.
Twitching of arms ceased when patient used them in his work of shoemaking. θChorea.
Involuntary movements (especially with children) while awake; ceasing during sleep. θChorea.
As soon as she opened her eyes in morning the two eyeballs began to turn to right and left at intervals of half a second, and this continued all day.
Spasmodic motions, from simple involuntary motions and jerks of single muscles, to a dancing of whole body. θChorea. θHysteria.
Eclampsia.
Frequent attacks of slight convulsions. θClonic spasms of eyes.
Cramps in hands and feet; body convulsed, as if a galvanic battery was applied to spine.
Convulsions and tremor.
Convulsions, fever with hot head, lying in a lethargic state; distortion of eyes and crying out in sleep. θNystagmus.
Catalepsy.
Epilepsy: with great exertion of strength; from fright, every seven days: he falls and lies almost motionless;

Digitized by Google

from suppressed eruptions; two or three attacks a week, after suppression of tinea capitis; attacks increase at first and lessen gradually.

‖ Discomfort and heaviness in whole body; general indescribable malaise.

Great debility.

Powerlessness and great weariness, had to remain in bed on account of great weakness.

Great prostration and inability to think.

Exhaustion with delirium; t.

Debility: after coitus; with trembling of limbs; from least exertion, with frequent palpitation; with vertigo.

‖ Gets tired from a short walk.

: Greatest lassitude with irresistible drowsiness, > after eating.

Great lassitude and heaviness in limbs, after a short walk, or even in bed, accompanied by anxiety and trembling. θ Incipient tuberculosis.

Great weakness and viscous sweats; t.

‖ Sense of languor as if body were bruised and joints dislocated. θ Headache.

‖ Sense of uneasiness and weakness all down spine. θ Headache.

Paralysis of lower limbs, with slight spasms of arms.

‖‖ Paralysis of upper and lower limbs. θ Incipient softening of spinal marrow.

Paraplegia from congestion of lumbar part of cord.

A child, æt. 15 months, paralyzed all over, eyes turned, face bluish pale, puffed up, small, irregular pulse, slight tearing and twitches in upper limbs; t.

In all paralyzed parts, violent pains.

37 **Sleep.** ‖ Very frequent gaping all day.

Gaping: followed each time by involuntary laughter; makes him giddy; and sneezing, with pain in maxillary joint; with stretching, most of arms; and shaking chill.

Frequent yawning: before spasms, or paroxyms of headache.

‖ Drowsiness, cannot resist sleep, even soon after getting up.

‖ Irresistible drowsiness in day time. θ Prolapsus uteri.

Early in evening very sleepy; has to go to bed, but a peculiar fear as if somebody would come and disturb him prevents sleep for hours.

Great drowsiness and weariness during day; at night a rush of ideas prevents sleep.

Sleepy and heavy headed, mist before eyes, pressure in eyes, lower limbs very tired.

Digitized by Google

Sleepiness, especially after or even while eating.
Afternoon drowsy and weary, with sexual desire.
‖Weary and drowsy by day, sleepless at night. θFrom overworking at desk.
‖On falling asleep starts, twitches; sudden complete awakening. θChorea.
Sopor and convulsions; t.
‖Coma, with paralysis of face and limbs. θTyphus.
Convulsive affections, which cease during sleep.
‖‖During sleep, one does not notice any motion of eyes whatever. θClonic spasms of eyes.
Uneasy, restless sleep; from violent itching and burning of skin.
‖‖Restless night and chilliness.
Tosses about from annoying crawls over whole body, head, chest, abdomen and feet.
Restless nights, suffers pain in back, chest, loins and thighs.
Restless night, a burning itching pain on different parts awakens him.
Restless night, a heaviness in whole body, in head, chest, abdomen and feet induces him to toss about.
Unpleasant dreams waking him from sleep.
Dreams he could not open his mouth on account of pain in maxillary joint, and that they made him smell caustic ammonia, which wakened him.
Dreams as if he was walking up and down in his room and reading, while he was sure he was in his bed; could not overcome it.
In his dreams, anxiety as if suffocating.

[88] **Time.** At night: ‖frequent anxious waking; tearing pain in scalp; buzzing in ears; ‖sneezing in sleep; pain in cracked lip; ‖toothache, after midnight; grinding teeth (an elderly man).
At 2 A.M.: pain in ankle joint.
Morning: itching of scalp; spasm of eyes; tongue coated; hunger without appetite; diarrhœa; excited sexual desire; cough >; mucous sputa; rattling of phlegm in chest; pulse more frequent; spine more sensitive; pains in tibia begin; pain in r. knee and l. hand <.
Towards noon: ‖headache; ‖stitch like a needle over l. brow; trembling of l. upper lid; nausea; pressing around navel; disagreeable full, heavy feeling in anus; stinging and tension in chest; backache; ‖pain in both tibiæ; out of humor.
At noon: ‖headache; pressure like a piece of sand under upper lid; trembling of l. upper lid; ‖very unpleasant, saltish, bitter, sweetish metallic taste, most on root of

Digitized by Google

tongue; cramp in stomach; sudden stitch in region of liver; colic; pressure, heat and itching in anus; cough with sneezing; pain in chest, in region of heart; stitch in sacrum; in l. tibia; burning runs all along corn in little toe.

Afternoon: dizziness and dull head; pain over eyes, ||in vertex, in occiput; painful sensitiveness in upper part of nose; coryza: toothache and pain in lower jaw; nauseous sweetish taste; violent thirst; frequent belching; pressure or burning and digging pain in epigastrium; dull pressure in hypochondrium; stitches in region of spleen; ||rumbling in abdomen; ||cutting in upper and later in lower abdomen; soft, dark green stool; stool with copious urination; urine milky, fiery; drawing in both testicles; violent cough; pressure here and there in chest; sudden stitches deep in chest; ||soreness in chest <; constant pressure near heart and uninterrupted palpitation; irregular beats of heart; neck puffed up; sudden violent stitch in sacrum; pain and lameness in arm; ||pains in elbow and forearm; burning in r. thumb; in r. hip joint, and along outside of lower leg, annoying pains; drawing, tearing in thigh; electric shock through legs; giving way of knee with painful drawing on back of l. lower leg; stinging in r. little toe; ||pains in corns; epileptic shock of body; sleepiness; crawling all over.

In evening: general malaise; ||dizziness with loss of sight and weakness; double sight; momentary jerk in side of head; viscous yellow moisture in internal canthi; bubbling noise in r. ear and noise as if bells were ringing in distance; warmth in face; front teeth as if too long and sensitive; ||bad taste returns, with chest and abdominal symptoms; tip of tongue feels sore; ||more appetite, even ravenous hunger; sudden nausea and vomiting of food; burning in scrobiculum, with a spasmodic drawing up into chest; digging, pinching cutting in abdomen; cutting itching in rectum; tension in r. groin; unpleasant sensation in urethra; drawing in testicles; ||< cough with blowing nose or expectoration of phlegm; stitches in lung; ||violent palpitation; burning or itching on sternum; quivering in muscles of r. loin; tension along whole spine; pains in back of sacrum; itching on back and inflamed nodules; tearing in l. upper arm; stitches like needles in l. thumb; in r. hip joint and outside of r. lower leg very tormenting pains; electric shock in lower limbs; ||pains in lower limbs; burning in upper part of foot and violent pains in little toe; pains in corns; gaping; weak-

Digitized by Google

ness; ||crawls and chills, shaking chill; attack of heat; sweat without heat.

[39] **Temperature and Weather.** Very sensitive to cool air.

Cold air: increases earache and toothache; looking out of an open window, toothache and pains in limbs; easily chilled, least cool air makes "goose skin."

Easily chilled on slight movement, and in a cooler air, or if cold finger touches a warm part of body.

Very sensitive to cold, mostly hands and feet; his face is pale and haggard.

In cold weather <, especially headache.

||When lifting bedcovers at night, crawling and shaking chill.

||To drink cold water after it increases effect and lengthens it; t.

||After a swallow of cold water: toothache; nausea.

Washing or bathing palliates.

|Itching, burning and redness of fingers, toes and other parts, as though they had been frozen.

|Complaints from frost. θHeadache. θChilblains.

||Chilblains, frost-bite, and all consequences of exposure to cold, particularly in face.

In open air: vertigo > or <; pressing in eye; momentary attacks of drunkenness; headache; nausea; colic, stitches in sacrum; ||dulness; drowsiness.

Walking in open air: ||staggering; a stitch like lightning through brain; half-sided digging headache; vanishing of sight; singing in r. ear; pressure in stomach; sensation like a dislocation in groin: sudden violent stitches in sacrum; painful drawing in r. foot; ||tired in feet, weak; a painful pressure in region of r. nipple, feeling as if a deep breath would remove its cause; frequent gaping.

After walking in open air: such a sudden weakness that he can hardly get along; severe fluid stools with burning in anus, and a copious sweat even on scalp; pulse frequent and small.

In room: vertigo < or >; nausea; chilliness; all symptoms < in-doors and in rest.

In bright sunshine: as if drunken.

Heat of sun: caused violent vertigo.

In warmth of bed: feet burn.

|Vertebræ sensitive to a hot sponge. θChorea.

|Worse before a thunder-storm. θChorea.

[40] **Fever.** ||Shiverings over body, run from above downward.

Shudders: with bitter vomiting after supper, lasting all night.

||Feels chilly with headache, giddiness, cold hands and feet; chilly feeling runs along limbs.

Digitized by Google

Chilly feeling: with gaping; blue hands; want of strength; bad humor; dull senses and no appetite; at noon.
Feels chilly all the time, cannot get warm in room, early in morning.
After sleep a chilly sensation all over, but most in feet.
Chilly on slight movement, or from raising bedclothes.
Great chilliness in open air, strikes through whole body.
Inner chilliness: with cool skin; with natural warmth of skin; in evening.
Sensation as if touched by ice, keeping time with pulse.
Sensation of coldness on r. side of frontal bone, though the surface is warm to touch.
Coldness on buttocks.
Cold hands and toes, with contracted pulse.
Cold and blue limbs; t.
Coldness and heat in alternation, towards evening.
Unpleasant coolness in whole body after going to bed.
Body cold, head hot.
Partial chill on upper part of body.
Chill with warm face, hands and feet.
Shaking chill with gaping; chill continues until he shakes.
Chill in back as if cold water was running down, if he leans back in chair.
Feverish chill every evening without thirst and without heat.
Shaking chills when lifting his bedcover.
During violent shaking chill, after undressing in evening, a peculiar inclination to laugh.
A gradually increasing rigor, face and hands bluish, icy cold; pulse very small and hard, forenoon 10 to 11.
Attacks of rigor, shaking whole body; cold hands, tremble when writing; face warm, no thirst, and no heat following.
Violent rigor with gooseflesh, followed by heat in head, painful throbbing in forehead and sweat.
After dozing awhile, violent rigor, chattering of teeth, he lies doubled up, violent headache, hands blue, no thirst.
Heat slight, chiefly on upper part of body.
Heat in face and upper half of body in repeated attacks, lasting five to ten minutes.
Heat all over: becomes burning, he has to uncover lower limbs; blood seems to run glowing through vessels; pulse strong, hard, tense and more frequent, disappearing gradually after midnight.

Digitized by Google

Heat at night; turning in bed or lifting covers makes her chilly.
Violent attacks of heat, evenings; cheeks glowing, hands cold, continual thirst, no sweat.
‖Frequent attacks of fever with heat in head, associated with a soporific state, rolling of eyes and screaming during sleep. θClonic spasms of eyes.
Heat and sweat in attacks, all afternoon, with a dull headache, no thirst.
‖General heat with cold finger ends, dry lips, thirst, clean tongue, want of appetite, with violent pains in upper and lower limbs. θA young leprous girl.
Continual heat followed by sweat.
Anxious palpitation causing sweat to break out at night.
‖Sweat most on lower limbs, evening and night.
Sweat all forenoon.
‖Night-sweat, towards morning, with relief.
Much sweat with fainting.
Sweat all over, even on scalp.
‖Cold sweats; t.
Viscous sweat and great prostration; t.
With sweat exhausted feeling and trembling of limbs, canine hunger.
Sweat: greasy, but not offensive, all night, during sleep; from least exertion; ‖often only on front of body; at night, especially about legs; cold, on face, neck and chest; ‖profuse.
‖Sweat when walking or ‖with slightest exertion.
⁝Slight exercise causes sweat; oily night-sweats. θIncipient tuberculosis.
‖Coma following febrile excitement of dentition; eyes half open, showing whites; breathing not hurried, but often a deep inspiration, followed by a sigh and slight convulsive twitchings of extremities.
⁝Ataxic typhus.
⁝Obstinate, intermittent.

" **Attacks. Periodicity.** In attacks: itching on scalp; violent pressure on r. eyeball upward and outward; coughing; pain in sternum; pain between eighth and ninth dorsal vertebra; heat in face.
Momentary stitches in eyeball.
Pressure first in l., then in r. eyebrow.
After toothache lessens, complaints in abdomen return.
Periodical drawing up into os hyoideum.
Gets awake exactly at midnight three nights in succession.
‖Every seven days. θEpileptic attacks.

Digitized by Google

[42] **Locality and Direction.** ||Very often complaints appear diagonally; that is, appear in upper l. and lower r. side.*
From within outward: stitches in chest and belly.
From without inward: pressing, boring, drawing pains.
From below up: a cutting boring from nostrils up to frontal bone; drawing from pelvis up to hypochondria.
From back to front: violent momentary tearing through chest.
From l. to r.: shooting headache; painful drawing in forehead; pressure above eyes; pain in temples; running coryza; ||griping in belly; pain in tibia; splinter sensation in lower limbs.
From r. to l.: stitches in temples; burning soreness in back.
Worse l. side: inner head, external ears, teeth, abdomen, groin, male parts, shoulder, upper and forearm.
Worse r. side: outer head, hypochondrium, loins and lower limbs.
Very few semilateral symptoms.

[43] **Sensations.** Heaviness, as after drunkenness; as though sharp ice touched head or cold needles pierced it; as if a nail was thrust in r. side of head; various in l. half of occipital bone; as from subcutaneous ulcers in scalp; stitch as of an ice cold needle in ear; as if ears, nose and face had been frost-bitten; as if splinters had been run into jaw; as from needles in chin; teeth feel too long; as from pepper on tip of tongue; as from an astringent on tongue and in throat; as if a foreign body stuck in fauces; cravat feels too tight; burning-cooling feeling, as after eating cress, along œsophagus; dull pressure as from a foreign body in stomach; jerking as of some heavy object in stomach; legs as if picked all over with ice cold needles; as if liver had increased in weight; as of a swelling from l. hypogastrium to back; hollowness in abdomen; as if wrenched in loins; crawling as from worms in anus; coldness down legs when urinating; stitch as from a red-hot iron in urethra; painful retraction of testes towards inguinal ring; disagreeable crawling in front of penis, has to squeeze it; anxious sensation in chest; as if cavity of thorax was narrowed; feeling of

*If we compare the symptoms of our Materia Medica with regard to right and left sides, we will find that in many of them there is a decided difference between the upper and lower limbs as regards the sides, one or the other side predominating. *Amanita* is one of the few remedies in which the symptoms appear at the same time on opposite sides, but diagonally. If, after giving a medicine, the symptoms do not disappear in a reverse direction to their origin, we may know it is not the right remedy.

a lump in epigastrium; felt several blows in heart with trembling; like splinters in pectoralis near nipple, and in back; as after continued pain in back; shocks starting from lower vertebræ; as if cold air was spreading from spine over body; as if touched below shoulder blade by a piece of ice; spine as if too weak to support; as of ants creeping along spine; as of a heavy load in sacrum, as if it would burst; a sort of crick in back; as if beaten in sacrum, or dislocated feeling; feels palpitation in os coccyx; as if thousands of splinters were in deltoid, extensor side of r. forearm, in l. elbow and index finger; hands as if frostbitten; as of an electric shock in upper arm; as if a felon would come in r. index finger; as if heads of thighbones were pulled from their sockets; shaking pushing concussions in l. hip, in r. hand, in joints of lower limbs; as of a plug on outer side of thigh above knee; pain in thighs as after a long journey on foot: as if lead was hanging on legs; electric shock in lower limbs, most in l.; sudden concussions in legs; as if blood was glowing in veins of feet; like splinters in soles; pains in toes as from narrow shoes; like splinters in big toe; painful swellings in toes like nails growing in; toes as if frost-bitten; as if her limbs did not belong to her; as if touched by ice, keeping time with pulse; as if cold water was running down back; as from living quicksilver in different parts; as if whole body was shaken inwardly; as if cold needles ran through nerves; as if whole body would dwindle to nothing; as if skin was pasted on.

Pain: in temples; around eyes; in l. ear during menses; in l. articulation of jaw; in superior maxilla and teeth; in r. hypochondrium; in stomach and liver; in l. hypochondrium; deep in umbilical region; in loins to legs; in chest; in l. intercostal muscles; in back; along spinal column; in first and second lumbar vertebræ; in sacrum; over both hip joints; in legs; in r. hip joint; in l. hip under gluteal muscles; in bend of knee; in bones of lower legs; in ankle joint; in frost-bitten toes; in corn on r. little toe; in paralyzed parts.

Spasmodic pains: in l. upper arm; in r. upper leg; in thumb.

Lancinating: in r. cheek.

Jerking stitches: through r. lung.

Twitching shocks: of heart.

Gnawing: below shoulder blades.

Ulcerative pains: in limbs, from l. elbow to little finger; from calves to heel.

Digitized by Google

Cutting: in abdomen; in anus.
Biting: in anus; on back; on soles.
Biting itching: on scalp; in soles.
Smarting: in tip of tongue; in anus.
Burning: in vertex; in head; in inner canthi; of ears; in face; in tip of tongue; in region of heart; below sternum; in stomach; in abdomen; in anus; in hemorrhoids; in l. chest; in region of heart; pimples on outer chest; deep in spine; in a small place on spine; on back; above l. elbow; of hands; in pimples on arms; in front of l. forearm near wrist; on r. forearm; in skin of r. hand from wrist to thumb and index finger; in hands; in thumbs; in r. index finger; in glutei muscles; in furuncle on r. gluteus; on thigh; pimples above knee; in tibia; in calves; in legs; in ankle joints to heels; in feet; in toes; of skin; internal and external; miliary eruption.
Stitches: in head; in ears; in l. mastoid process; from fauces along r. eustachian tube; in region of liver; under short ribs, l. side; in region of cæcum; in loins; in anus; in r. kidney; in urethra; in middle of chest; behind sternum; in l. breast; in r. lung; between sternum and nipple; in region of heart; in different parts of thorax; in cervical muscles; on dorsal vertebræ; in sacrum; in olecranon of each arm; in thumbs; in hip joint; in anterior part of thigh; in knees; in calves; in big toe.
Stinging: in knee joint.
Shooting pain: in temples; from r. lower teeth to side of head; in region of heart; in outer chest; in nape of neck; in back below shoulder blades; deep in spine; in single vertebræ; in axillæ; in knees; in ankle joints; in metatarsal bones and feet; in soles; in toes.
Pricking: in head; in chin; in rectum and anus; in chest; in fingers; in toes.
Sticking: under nipple; in apex of heart; between shoulder blades.
Tearing pain: in l. half of brain; in r. ear; in face and jaw bones; in r. side of lower jaw; in loins; in anus; in r. shoulder; in l. upper arm, lower teeth and l. ear; in l. elbow joint; in l. wrist; in hands; in thumbs; between thumb and index finger; in l. index finger; in joint of middle finger; in l. little finger; in joints of fingers; in hip joints; in l. buttock; from hip joint to knee; in knee joint; in shinbones; in calves; in soles; in big toe; in l. forearm and r. thigh; in tubular bones.

Twitching pain: in bladder; in back during menses; in outer chest; below shoulder blades; in arms.
Jerking pain: in teeth; in big toe.
Pinching: below umbilicus.
Digging: in big toe; in all toes.
Burrowing pain: in temples.
Spasmodic drawing: from pit of stomach into chest; in l. testicle and spermatic cord.
Drawing pain: in temples; in head; into root of nose; in r. cheek; in pit of stomach; in r. hypochondrium; in testicles; in chest; in region of diaphragm; from back to middle of chest; from l. upper arm to forearm; in forearms; in l. elbow joint; as if in periosteum of fingers; from thigh to knee; in knee joints; in shinbones; in shin; in legs; in ankles; in toes; in tubular bones.
Dull pains: in forehead; along tibia.
Soreness: of eyeballs; of tongue; in anus; in chest; in r. chest near nipple; deep in chest in two spots; in back: of joints, after epistaxis; muscular, after fever or influenza.
Cramplike pain: in temples; from middle of spine into stomach; into thighs; as if she must have a child; in ankle joints to heels; in soles; in muscles; erratic.
Oppressive pains: in forehead.
Bearing down: in rectum; in female sexual parts.
Stinging pressure: in chest.
Pressure: in r. side of head; in l. half of brain; in vertex; in eyeballs; in fauces; from l. hypogastrium to back; in region of kidneys; in back during menses; like a swelling from l. hypogastrium to back; on chest; on r. chest near nipple; on middle of sternum; in hip joints; in thighs; in l. tibia; in legs; in ankles.
Throbbing: headache; in vertex; in cheeks; in r. chest near nipple; in small spots on chest; in os coccyx.
Painful pulsation: in spinal canal.
Scratching: in throat, after influenza.
As if beaten: in heels; in all the limbs.
Bruised feeling: in loins; in muscles of neck; in muscles of back; of joints, after epistaxis.
Stretching pain: in acetabula.
Laming pain: in loins.
Rheumatic pain: in r. deltoid; in forearm and thumb.
Contraction: of sternum.
Constriction: in cardiac region; in chest.
Compression: of heart.
Weight: in head; in top of head; in legs.
Oppression: in cardiac region; behind sternum; at heart.

Google

Heaviness: in head; towards nape of neck; in stomach; below navel; in abdomen; in chest; in thighs; in calves; in lower legs; in feet.
Fulness: in temples; in anus.
Emptiness: in abdomen.
Tension: in head; in loins; in l. upper arm; in lower chest; in region of thymus gland; in muscles of neck.
Stiffness: of muscles of face and neck; between shoulders; in l. hand and elbow; in fingers; in tendo-achillis.
Lameness: in l. kidney.
Laming pain: in l. hand and arm.
Dislocated feeling: in sacrum; in shoulder joint; in hip joint.
Tremulous feeling: in bend of knee; in upper and lower limbs; in whole body.
Painful weariness: in thighs; in legs.
Weariness: in lower legs.
Weakness: in eyes; between shoulders; in loins; in back; in knee joint; in legs; in feet.
Sprained sensation: in chest; in neck; in deltoid; in knee joint.
Paralytic pain: in l. hand and arm.
Paralytic weakness: in sphincter.
Paralyzed feeling: in l. arm and hand; in arm after writing.
Paralytic numbness: in lower legs.
Numbness: l. side of tongue; l. hand; in legs; in back; in thigh.
Crawling: over back and limbs; in r. index finger; in toes; over whole body.
Tickling: in orifice of urethra; on l. side of scrotum.
Formication: in feet; in upper and lower limbs; in glutei muscles.
Crawling itching: in urethra; on dorsi of feet.
Uneasiness: in spine.
Itching: in inner canthi; in l. ear; of ears; in frost-bitten nose; in face; in rectum; in anus; in mons veneris; in penis, foreskin and scrotum; of female sexual parts; with leucorrhœa; of nipples; pimples on neck; on back; on arms; on both hands as if frozen; in pimples on arms; on r. forearm; on r. wrist; in hands; on hip bone; on thigh; in bend of knee; on soles; of skin; between thumb and forefinger l. hand; miliary eruption; whitish nodules on abdomen and legs; small nodules deep in skin.
Itching stitches: on different parts of body.
Burning cooling: along œsophagus to stomach.

Digitized by Google

Heat: in eyes; in face and upper part of body; in anus; running through limbs; on point of elbow.

Icy feeling: on l. side of chest near shoulder blade; in r. axilla; in point of elbow; in l. inner ankle; in joint of middle finger; from glutei down to feet, most in big toes; of feet.

Coldness: on r. side of frontal bone; in region of cervical suture; icy, on head; of face; in abdomen; of penis; below shoulder blade; in glutei muscles; of hands; in region of trochanter; in buttocks; in bend of knee; in lower limbs; in limbs; on r. side of frontal bone; of hands and toes.

Dryness: of tongue; of mouth, fauces and pharynx; in os coccyx.

" **Tissues.** Induration of glands.

Pains in bones of face, eyes, cheeks, tubular bones, and in tibia, sometimes in elbow.

In all joints, stitching pain, stiffness in arms, back of neck and both hip joints.

All joints stiff on getting up.

Sudden tearing in tendinous tissues of different parts.

Makes blood thin.

Veins swollen, with cool skin.

Mucous membranes coated with a yellow mucus.

‖Muscles feel bruised from touch; > from walking. θChronic rheumatism.

Pain in long bones, as if bruised, after motion.

Pains in bones morning and forenoon, especially l. tibia, condyle of l. elbow (like syphilitic pains; but >, rather than <, in warmth of bed).

‖Joints feel as if dislocated. θChorea.

Obesity.

‖Emaciation. θChorea.

‖Dropsy.

45 **Touch. Passive Motion. Injuries.** Body sensitive to touch or pressure; burning in canthi; pain in spine, between vertebræ; muscles feel bruised; pricking in l. thumb, etc.

Slight touch causes shooting, even the coming near of some one.

Touch of hair: < pressure on temple.

When touched: pain in parietal bones, in eyeballs, above eyes, maxillary joint, tip of tongue; teeth sensitive; stitch in throat; abdomen sensitive; convulsive dartings if chest or arms are touched; small spot in middle of spine very sensitive; wrist-pains; back of hand sore; stitches in thumb; metacarpal joint of index and middle finger.

Digitized by Google

When touching or feeling with fingers: headache <; pain in groins; pain in vertebræ; all parts sensitive.
When but feeble pressure is applied to any spot, it pains a long while after.
Pressure: < pain in scalp, in l. temporal bone; pain in stomach and in hypochondria.
Sensitive to pressure: dorsal and lumbar vertebræ.
Better from pressure; pain in temples; boring headache; colic in abdomen; painless pulsation in eighth and ninth dorsal vertebræ.
‖Limbs sensitive to pressure. θChorea.
‖A pressure on painful parts increases pain.
Rubbing: > itching in r. eye.
Scratching: > itching in scalp; ‖stitch over l. brow.
After scratching: white nodule, size of millet-seed, furfuracious peeling of epidermis.
‖Better from shaving: blisters on chin.
Leaning back in chair: < pressure in sacrum.
Crossing legs: they fall asleep.
In stepping down: stitches in heel.
Slight blows: cause ecchymoses.
‖While riding in a carriage: tensive pain in region of bladder.

[46] **Skin.** General jaundice after convulsion; t.
‖‖Burning itching, redness and swelling, as from frost-bites.
Itching stitches in various parts.
Violent itching between thumb and forefinger, l. hand.
‖Itching and burning all over body, causing great distress. θChorea.
Miliary eruptions; close and white, with burning and itching.
Feeling in skin as if it was pasted on.
Skin very smooth, most in face.
‖Pricking as from needles on different places.
Itching stitches on different parts of body.
Electric stitches, stitches as from splinters; corroding biting; itching, burning, biting, stinging.
Itching all over; changing place; disturbing sleep; without any eruption.
Itching eruption of easily bleeding whitish nodules on abdomen and lower limbs, spreading.
‖Miliary eruption in blotches.
Small suppurating pimples between index finger and thumb; on neck; on sternum.
Very painful furuncle in front of thigh and on buttock, very large, discharging blood, no pus.
Little red, hard pimples scattered over body, like flea-bites.

etc.); *Thea* (verbose; spinal irritation); *Ver. alb.* (icy cold feeling on head); *Zincum* (chorea).

Vinegar and Eau de Cologne induce fainting. *Sal Ammoniæ* also aggravates; t.

Mushrooms will not grow in ground containing either iron or coal.

Antidoted by: charcoal; coffee; wine; brandy; camphor; fat or oil (relieves stomach); *Calc. ostr.* (relieves icy coldness); *Pulsat., Rhus tox.* (nightly backache).

Atropine is said to be antagonistic to *Muscarine*, but they both, when topically used, dilate the pupil.

Muscarine is very similar to *Pilocarpine*, (jaborandi) since both cause arrest of heart's action; profuse sweat; salivation, lachrymation; contracted pupils, etc. *Muscarine* acts more on lachrymal glands, less on sweat and salivary glands; *Pilocarpine* causes more urging to urinate. *Muscarine*, given internally, contracts pupil more than *Pilocarpine;* used topically, only the former dilates the pupil. *Gelsem.* is here similar to *Muscarine.*

Follow well: *Bellad., Calc. ostr., Mercur., Opium, Pulsat., Rhus tox.* and *Silicea.*

Acted well after *Dulcam., Phosph. ac., Pulsat.*, and *Cuprum* had failed. θChronic diarrhœa.

Cured where *Bellad., Stram.* and *Hyosc.* failed. θClonic spasms of eyes.

Digitized by Google

AMBRA GRISEA.

Ambergris.

Probably a nosode or morbid product found in belly of sperm-whale. The best is that which whalers cut out, and which is usually to be had in Boston. Most of it is picked up in the Eastern seas. Used by the Arabians and since. Introduced by Hahnemann in 1827; especially proved by his friend, the Count de Gersdorf, from whom are nearly one-third of the symptoms. The alcoholic tincture is the best preparation. The so-called oil of amber is oleum succinum, and was used by Holcombe in hiccough.

[1] **Mind.** ❙Memory impaired.
❙Comprehension slow, has to read everything three or four times, and then does not understand it.
❙Is not able to reflect upon anything properly, feels stupid. θOften indicated in old age.
Confusion of head; of occiput.
❙Difficult thinking in morning, θOld people.
❙Distorted images, grimaces; diabolical faces crowd upon his fancy.
She is excited, loquacious; talking fatigues her; was unable to sleep at night, or averse to talking and laughing.
Great sadness.
❙Melancholy, sits for days weeping; with great weakness, loss of muscular power and pain in small of back with constipation.
Fear of becoming crazy.
Despair; loathing of life.
Anguish and sweat all over at night.
Anxiety, oppression, nervous weakness, with irritability and impatience.
❙After business embarrassment cannot sleep, must get up.
Hurries too much while engaged in mental labor.
Embarrassed manner in company.
Cough < when many persons are present.
The presence of other people aggravates the symptoms.

[2] **Sensorium.** ❙Vertigo with feeling of weight on vertex; < after sleep.
❙Had to lie down on account of vertigo and feeling of weakness in stomach.
Music causes blood to rush to head.

Digitized by Google

Great weakness in head with vertigo.

[5] **Inner Head.** Pressure in forehead and vertex with fear of becoming crazy.

Tearing: in forehead; in l. temple up to vertex; in r. frontal eminence and behind l. ear.

Extremely painful tearing on top of head and apparently in whole upper half of brain, with paleness of face and coldness of l. hand.

Pressive drawing, ascending from nape of neck, and extending through head towards forehead, considerable oppression remaining in lower part of occiput.

Dulness in occiput.

Tearing pains predominate in head.

Rush of blood to head caused by music.

Weakness in head with vertigo.

[4] **Outer Head.** Falling off of hair.

On r. side of head, a spot, where hair when touched pains, as if sore.

Scalp feels sore in morning, when awaking; this is followed by a sensation of numbness, extending over whole body.

[5] **Sight and Eyes.** Dulness of vision, as if from looking through a mist.

Pressure and smarting in eyes, as from dust; lachrymation.

Pressure on eyes, which are difficult to open, and pain in eyes as if they had been closed too firmly, particularly in morning.

Itching on eyelid as if a stye was forming.

[6] **Hearing and Ears.** Roaring and whistling in ears, in afternoon.

Deafness of one ear.

Crackling in l. ear (like sound made when winding a watch).

Hearing decreases; with cold sensation in abdomen.

Violent tearing pain in and behind r. auricle.

Tearing: in r. ear.

Crawling, itching and tickling in ears.

Music aggravates cough.

Listening to music brings on congestion to head.

[7] **Smell and Nose.** Dried blood gathered in nose.

Bleeding of nose early in morning.

Nosebleed with menses.

Copious nosebleed early in bed, several successive days. θOld lady.

Nose stopped up and paining as if sore internally.

Long-continued dryness of nose, frequent irritation as from sneezing.

Digitized by Google

[8] **Upper Face.** Paleness of face with headache.
Flushes of heat in face.
Heat in face with chill of other parts.
Tearing in upper part of face, particularly near r. ala nasi.
Pimples, and itching in whiskers.
Painful swelling of cheek on upper jaw, with throbbing in gums.
Jaundiced color of face.
Spasmodic twitching of facial muscles.

[9] **Lower Face.** Lips hot.
Lips numb and dry in morning on awaking.
Cramp of lower lip.

[10] **Teeth and Gums.** Drawing pain now in one and again in another tooth; < by warmth, momentarily removed by cold; not < by chewing, and passes off after a meal; at same time inner portion of gums was swollen.
Bleeding of gums.

[11] **Taste and Tongue.** Bitter taste in mouth in morning on awaking.
Sour taste after drinking milk.
Folds under tongue pain as if sore, like small growths.
‖Ranula.

[12] **Inner Mouth.** ‖Fetor of mouth, worse mornings. θWhooping cough.
Blisters in mouth pain as if burnt.
Smarting and cracked painful condition of mouth.
Accumulation of water in mouth with cough.

[13] **Throat.** ‖Sensation of rawness in region of velum pendulum palati.
Rawness in throat with cough.
Tearing in palate, extending into l. ear.
Dryness of throat in morning.
Sore feeling in throat during empty deglutition, and from outward pressure, not when swallowing food, with tension of glands of throat as if swollen.
‖Sore throat after exposure to a draught of air; stitching from throat into r. ear; pains particularly from motion of tongue.
Tickling in throat, which induces coughing.
Tickling in throat and thyroid body, during act of coughing.
‖Accumulation of greyish phlegm in throat, which is difficult to hawk up, accompanied by rawness.
Hawking phlegm from fauces produces vomiting and choking.
Papular eruption in pharynx.

[14] **Appetite, Thirst. Desires, Aversions.** Thirstlessness.

Google

[15] **Eating and Drinking.** After breakfast, nausea.
After eating: ‖cough and gagging; anxiety; pressure in pit of stomach, as if food stuck and would not go down
‖Aggravation from warm drinks, especially from warm milk.
Better after eating: toothache; oppression in chest; chill.
After drinking milk: sour taste; heartburn.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Belching with and after cough.
‖Eructations either empty, sour or bitter.
‖Eructations with cough, so as almost to cause choking.
Belching removes pressure under scrobiculum.
‖Hiccough.
Heartburn: with abortive eructations; when walking in open air; from drinking milk.
Every evening, sensation as of disordered stomach and acrid risings up to larynx.
Nausea after breakfast.
Vomiting and choking when hawking phlegm from fauces.

[17] **Scrobiculum and Stomach.** Pressure and burning under scrobiculum; belching removes it.
‖Pressure in stomach and hypochondria. θWhooping cough.
Tension and pressure or stitches and pressure in stomach.
Concussion in pit of stomach with cough.
Weakness in stomach accompanying vertigo.

[18] **Hypochondria.** Pressing pain in a small spot in upper r. side of abdomen, though not felt to touch.
Tearing pain in region of spleen, as if something was torn away.
‖Pain in r. hypochondriac region, > while lying upon it.

[19] **Abdomen.** Distended abdomen; accumulation of much flatus, which subsides without being passed.
‖‖Sensation of coldness in abdomen.
‖Coldness of one side of abdomen (l.); also with deafness.
Colic, sometimes followed by diarrhœa.
Pressure deep in hypogastrium after evacuation.

[20] **Stool and Rectum.** First copious, soft, light brown stools, after a few days constipation.
‖Constipation. θWhooping cough. θMelancholy.
Diarrhœa preceded by colic.
Stool not hard, though large.
‖Frequent ineffectual desire for stool; this makes her very anxious, ‖‖at this time presence of other persons becomes unbearable.

Digitized by Google

Large flow of blood with stool.
Itching in anus.
Stitches in anus.
After evacuation pressure deep in hypogastrium.

[21] **Urinary Organs.** Frequent micturition at night and in morning after rising.
Urine when emitted is clouded, yellowish brown and deposits a brownish sediment, after which urine looks clear and yellow; coffee grounds sediment. θDropsy after scarlatina.
Sour smelling urine. θWhooping cough.
Urinates three times as much as drink taken, especially in morning; followed by a dull pain in region of kidneys.
Sensation as if a few drops passed through urethra.
During urination, burning, smarting, itching and titillation in the urethra and vulva. θOvaritis.

[22] **Male Sexual Organs.** A man, æt. 80, gets asthma when attempting coition.
Impotence.
Violent morning erections without desire, with numbness in parts.
Internal, strong, voluptuous sensation in genital organs.
Itching pimple over male genitals.
Sore rawness between thighs.
Voluptuous itching on scrotum. θFollowing use of *Staphis.*

[23] **Female Sexual Organs.** Nymphomania: often with discharge of bluish white mucus.
Burning in sexual parts, with discharge of a few drops of blood.
Stitches in ovarian region, when drawing in abdomen or pressing upon it.
Discharge of blood between periods, at every little accident, at every hard stool or after a walk a little longer than usual.
During menses, l. leg becomes quite blue from distended varices, with pressive pain in leg.
Lying down aggravates uterine symptoms.
Is said to cause uterine atony.
Suppressed catamenia.
Menses too early and too profuse.
Menses appear seven days before time.
Severe itching on pudenda, must rub parts.
Soreness and itching, with swelling of labia. θPruritus.
Itching, titillation, burning of vulva and urethra during urination.
Thick, mucous leucorrhœa, increased from day to day, or

Digitized by Google

leucorrhœa at night, of bluish white mucus; preceding each discharge, a stitch in vagina.

[24] **Pregnancy. Parturition. Lactation.** During pregnancy: nervous, restless; pruritus vulvæ.

Impending abortion.

‖Puerperal eclampsia.

Lessens severity of labor pains.

‖In childbed obstinate constipation and tenesmus; abdomen puffed, causing much anxiety; so nervous she cannot attempt a stool in presence of other people, not even nurse.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Titillation in larynx with spasmodic cough.

‖Titillation in throat, larynx and trachea, causing violent cough.

Hoarseness and roughness of voice, with accumulation of thick, tough mucus, easily thrown off by coughing.

‖Itching, scraping and soreness in larynx and trachea. θWhooping cough.

Reading aloud or talking aggravates cough.

Itching in thyroid gland.

[26] **Respiration.** Tightness of chest, cannot take a deep breath or yawn deeply.

‖Oppression felt in chest and between scapulæ; it subsides for a short time after eating. θAsthma.

Feeling of pressure in chest < during exhalation.

‖Asthma of old people and children. θAsthma siccum.

‖Asthma comes on while he is attempting coition. θOld man.

‖Whistling in chest during breathing.

Gets out of breath with cough, which is spasmodic; rush of blood to head.

[27] **Cough.** Spasmodic cough, loses her breath; with rush of blood to head; finally some phlegm comes up.

‖Hollow, spasmodic, barking cough; < from talking or reading aloud.

‖Spasmodic cough of elderly or of emaciated persons.

‖Paroxysms of cough coming from deep in chest, excited by violent tickling in throat, evening without, morning with expectoration, generally of greyish white, seldom of yellow mucus, of salty or sour taste.

‖‖Violent spasmodic cough, with frequent eructations and hoarseness.

Lifting a heavy weight aggravates cough.

‖Cough only at night, produced by excessive irritation in throat.

‖Cough every evening with pain under l. ribs, as if something was torn loose there.

Digitized by Google

Cough worse when many persons are present.
Cough causes concussion in pit of stomach.
‖Cough with emaciation.
‖A kind of whooping cough; paroxysmal, but without crowing inspiration.
‖Deep dry cough, with accumulation of water in mouth, and subsequent rawness in throat.
‖Choking and vomiting when hawking up phlegm.
Sputa yellow white, creamlike.
Collection of phlegm in throat difficult to cough up.
⁝Old coughs.

[28] **Inner Chest and Lungs.** Pain in lower part of r. chest, relieved by lying on back.
‖Sensation of pressure deep in r. chest; also in l. chest or in upper part of chest.
‖Sensation of rawness in chest.
‖Itching in chest. θWhooping cough.
Sensation of lump in chest.

[29] **Heart, Pulse and Circulation.** ‖Anxiety at heart, causing oppression of breathing, with flushes of heat; oppression beginning in heart. θAsthma.
Palpitation when walking in open air, with paleness of face.
‖Violent palpitation, with pressure in chest, as if a lump lay there, or as if the chest was stuffed up.
Pulse accelerated, with ebullitions.
He perceives pulse in body; it feels like tick of a watch.

[30] **Outer Chest.** Burning on chest.

[31] **Neck and Back.** Glands of throat tense as if swollen.
Burning in l. scapula.
Tearing in l., or in both shoulders.
Rheumatic pains in r. side of back.
Painful tension in lumbar muscles.
Stitches in small of back, when sitting.
‖Stiffness in small of back after sitting.
Pain in small of back, with loss of muscular power and constipation.

[32] **Upper Limbs.** Tearing in l. shoulder joint.
Drawing, as if sprained and lame in shoulder.
‖The arms go to sleep when lying on them, when carrying anything in hands or at night; with numbness, especially of l. arm in rest; tingling in thumb.
Tearing pains in shoulder, elbow, forearm and hand.
Weakness of fingers at night.
Stinging in hands and fingers, as from insects.
Drawing in fingers and thumb.
Itching in palms of hands.
Cramps in hands, sometimes when taking hold of anything.

Digitized by Google

Tips of fingers are shrivelled.
Tearing, lancinating or itching in tips of fingers and thumb.
Skin on fingers feels tense.
Long lasting icy coldness of hands.
Coldness of l. hand with headache.
Finger nails brittle, with a very old man; they got soft, elastic and pink.

[33] **Lower Limbs.** Tearing pain, first in l., then in r. hip joint.
Sense of contraction in r. thigh; limb seems to be shortened.
Tearing in nates, hip, knee, leg, ankle and foot.
Heaviness of legs.
Strumming sensation in legs.
Sensation as if "gone to sleep" in both legs; no firm step.
Cramps in legs and calves nearly every night.
Cold feet.
Gouty pain in ball of great toes.
Itching on inner border of sole of r. foot, not relieved by scratching.
Sore and raw between thighs, and in hollow of knees.
Left leg becomes blue from distended varices during menses.

[31] **Limbs in General.** Tearing or rheumatic pains in parts of all the limbs.
Uncommon twitching and coldness of body at night.
Uneasiness, like a crawling, with anxiety, only by day.
Weariness, with painful soreness of all limbs.

[35] **Rest. Position. Motion.** In rest: numbness of l. arm.
In bed, early in the morning: weakness.
Lying down: cough <; uterine symptoms <.
Desire to bend and stretch limbs.
Worse in room with other persons: cough.
When sitting: stitches in small of back.
After sitting: stiffness in small of back.
Better lying on painful part: pain in hypochondriac region; pain in r. side of chest.
When lying on them: arms go to sleep.
Lying down: aggravates uterine symptoms.
Worse after lying down. θPertussis.
Must lie down: with vertigo and weakness in stomach.
Motion of tongue: < pain in throat.
When walking in open air: palpitation and pale face; uneasiness in blood, more rapid circulation; weakness <.
After a longer walk than usual: discharge of blood between menstrual periods.
During exercise: profuse sweat on abdomen and thighs.
Lifting a heavy weight: aggravates cough.

Digitized by Google

When carrying anything in hands: arms go to sleep.
When taking hold of anything: cramps in hands.
▮Sweat from slightest exertion. θIntermittent.

[36] **Nerves.** ⁝Trismus neonatorum.
Restlessness.
▮Jerks and twitches.
Convulsions.
⁝Epilepsy.
▮Infantile spasms.
▮Spasms and twitches in the muscular parts.
⁝Spasmodic complaints.
▮Arms and limbs "go to sleep" easily.
▮Great lassitude, especially mornings in bed.
⁝Fainting.
▮Weakness: of the whole body; of the knees, as if they would give way; of the feet, with loss of sensation; in the stomach, so that she must lie down.
⁝Great prostration after lingering fevers.
⁝Chlorosis.
▮Loss of muscular power. θMelancholy.
⁝Vertigo and nervous apoplexy.
⁝Paralytic complaints.
Numbness of the whole body.
When walking in open air, an uneasiness in blood and more rapid circulation, with greater weakness of body.
Conversation causes fatigue, heaviness of head, sleeplessness, oppression of chest, sweat, anxiety; tremor and quivering; nervousness and irritability.

[37] **Sleep.** ▮Cannot sleep, must get up; worriment from business embarrassment.
Cannot sleep at night, yet knows not why.
Restless sleep, with anxious dreams.
▮Vexatious, anxious dreams and talking in sleep; awaken frightened. θChildren.
Sleepless after 1 A.M.
Worse from too little sleep.
Uneasy sleep from coldness and twitching.
Nearly every night cramp in calves.
Worse after sleep: vertigo; weight on vertex; whooping cough; feels weak; mouth dry; weary, eyes feel as if they had been closed too tightly.
When awaking: soreness of scalp; lips numb and dry; bitter taste in mouth.
Early in bed: nosebleed; great lassitude.

[38] **Time.** Given in the evening apt to make aggravations.
Worse evening and night. θWhooping cough.
At night: unable to sleep; anguish and sweat all over; frequent urination; leucorrhœa; cough; numbness in

Digitized by Google

arms; weakness of fingers; cramp in legs and calves; twitching in limbs; coldness of body; profuse sweat, < after midnight.

In morning: soreness of scalp; pressure on eyes and difficulty in opening them; nosebleed; lips numb and dry; bitter taste; fetor of mouth; dryness of throat; frequent and copious urination; violent erections with numbness in the parts

In forenoon: chill with lassitude and sleepiness.

In afternoon: roaring and whistling in ears.

Towards evening: < anxious flushes of heat.

In evening: sensation of disordered stomach; cough.

[39] **Temperature and Weather.** Warmth: toothache <.

Cold: toothache >.

In warm room: cough <.

Better from motion in open air.

Warm drinks: aggravate.

After exposure to draught of air: sore throat.

When walking in open air: heartburn; palpitation; uneasiness in blood; < weakness.

Took cold and had perspiration checked, after a thunderstorm, by north wind in face; tormenting cough for several weeks.

[40] **Fever.** ▮Chill in forenoon, with lassitude and sleepiness; relieved by eating. θIntermittent fever.

Chill of single parts of body, with heat of face.

Anxious flushes of heat returning every quarter hour; ▮most violent towards evening. θIntermittent fever. θWhooping cough.

Profuse sweat at night, worse after midnight and most on affected side.

Profuse sweat, particularly on abdomen and thighs, during exercise.

; Malignant fevers.

[41] **Attacks, Periodicity.** ▮▮Cough in spasmodic paroxysms.

Anxious flushes of heat return every quarter of an hour.

[42] **Locality and Direction.** One-sided complaints: perspiration, tearing, numbness, sensation of coldness in abdomen.

Right: spot on head sore to touch; tearing pain in auricle; tearing pain in ear; tearing near ala nasi; pressing pain in side of abdomen; pain in hypochondriac region; pain in lower part of chest; rheumatic pains in back; itching on border of foot-sole.

Left: hand cold; crackling in ear; coldness in abdomen; leg becomes blue during menses; pain under ribs, with cough; burning in scapula; tearing in shoulder; arms get numb.

Digitized by Google

Left to r.: tearing pain in hip joints.
Upper limbs, r. side; lower limbs, l. side.
Ascending: pressing drawing from nape of neck through head to forehead.
Extending over whole body: soreness in scalp on waking.

" **Sensations.** Ebullitions and pulsations in whole body, especially after walking in open air; as if eyes had been closed too firmly; as if a stye was forming; glands of throat tense as if swollen; as if food stuck and would not go down; as of disordered stomach; as if something was torn away in region of spleen; as if a few drops passed through urethra; as if a lump lay in chest; as if chest was stuffed up; pulse in body perceived like tick of a watch; as if r. leg was shortened.
Pain: in lower r. chest; in small of back.
Lancinating: in tips of fingers and thumb.
Stitches: from throat into r. ear; in stomach; in anus; in ovarian region; in vagina preceding leucorrhœal discharge; in small of back.
Stinging as from insects: in hands and fingers.
Tearing pain: in forehead; in l. temple up to vertex; in r. frontal eminence; behind l. ear; in upper half of brain; in and behind r. auricle; in r. ear; in upper part of face, near r. ala nasi; from palate into l. ear; in region of spleen; in l. shoulder, elbow, forearm and hand; in tips of fingers and thumb; in hip joints, nates, hip, knee, leg, ankle and foot.
Burning: under scrobiculum; in urethra and vulva; in sexual parts; in l. scapula; on chest; of herpes.
Soreness: spot on side of head, in scalp; in nose; under tongue; in throat during empty deglutition; between thighs and hollow of knees; in female sexual parts; in larynx and trachea; of all limbs; of wart on finger.
Burnt feeling: blisters in mouth.
Drawing: in teeth; in shoulder; in fingers and thumb.
Pressive drawing: from nape of neck through head to forehead.
Pressure: in forehead and vertex; in eyes; on eyes, difficult to open; in pit of stomach; under scrobiculum: in stomach and hypochondria; in stomach; in small spot upper r. side of abdomen; in hypogastrium; in chest; in l. varicose leg during menses.
Smarting: in eyes; in mouth; in urethra and vulva.
Rawness: velum palati; in throat; in chest; between thighs; in hollow of knees.
Scraping: in larynx and trachea.
Gouty pain: in balls of great toes.

Digitized by Google

Rheumatic pain: in r. side of back; in limbs.
Dull pain: in region of kidneys.
Cramp: of lower lip; in hands; in legs and calves.
Sprained feeling: in shoulder.
Twitching: of facial muscles.
Throbbing: in gums.
Concussion: in pit of stomach, with cough.
Weight: on vertex.
Heaviness: of legs.
Oppression: in lower part of occiput; in chest and between scapulæ; beginning in heart.
Tightness: of chest.
Contraction: in r. thigh.
Dulness: in occiput.
Weakness: in head; in stomach; of fingers.
Titillation: in urethra and vulva; in throat, larynx and trachea.
Stiffness: in small of back.
Crawling: in ears; in all limbs.
Strumming: in legs.
Itching: on eyelid; in ears; pimples in whiskers; in anus; in urethra and vulva; pimples over male genitals; voluptuous on scrotum; itching on pudendum; in larynx and trachea; in thyroid gland; in chest; in palms of hands; in tips of fingers and thumbs; on inner border of sole of r. foot.
Tickling: in ears; in throat induces cough; in thyroid body.
Tingling: in thumb.
Heat: in face; in lips.
Coldness: of l. hand with headache; in abdomen; of hands and feet.
Dryness: of nose; of lips; of throat.

41 **Tissues.** Small growths under tongue.
Ranula.
Tearing in muscles and joints, often on one side.
Softening of brain.
Emaciation.

45 **Touch. Passive Motion. Injuries.** Slight touch: < pain in thumb.
Rubbing: relieves itching and tickling in rectum.
Sore to touch: spot on r. side of head.
From outward pressure: soreness in throat <.
Worse from overlifting.

46 **Skin.** Itching.
Jaundiced color of face.
Burning in skin.
Tips of fingers become shrivelled.

Digitized by Google

Soreness of a wart on finger.
Numbness of skin.
: Burning herpes.
: Leprous complaints.
Itching pimples in whiskers.
Sore and raw between legs and in hollow of knees.
Distended varices on leg during menses.
Reproduces itch eruption.

[47] **Stages of Life, Constitution.** ‖Children who are excitable, nervous and weak.
‖Nervous persons, infants or young girls.
‖In old age. θAsthma. θColds.
The so-called bilious or nervous bilious temperament.
‖Lean persons.
‖Old persons and children. θAsthma.
‖A very old man. θBrittle finger nails. θAsthma when attempting coition.

[48] **Relations.** Similar to: *Arsen.* (cardiac asthma); *Act. rac.* (night cough); *Castor.; Asaf.* (women who are nervous and fail to react); *Coca.* (embarrassed, bashful); *Coffea; Cinchon.; Ignat.*

Kali brom. (increase of reflex action); *Moschus* (hysteric asthma); *Nux vom.* (both suit nervous, thin, bilious, persons); *Opium; Phosphor.* (asthma; nervous excitability; "irritable weakness;" slender build, etc.); *Phosph. ac.*; *Pulsat.; Sepia; Staphis.; Sulphur.; Sulph. ac.* (cough and belching); *Valer.* (nervousness, hysteria; lack of reaction in nervous weakness); *Laches.*, and *Sepia* (worse from overlifting); *Laches., Ver. alb.* (cough with belching; coldness, etc.)

Antidotes to *Ambra: Camphor, Coffea, Nux vom., Pulsat., Staphis.*

Ambra antidotes: *Staphis.* (especially voluptuous itching of scrotum); *Nux vom.*

AMMONIUM BENZOICUM.

Benzoate of Ammonium. $C_7H_5O(NH_4)O.$

Proved by Wibmer; also proved and used by Jeanes.

[5] **Sight and Eyes.** Feeling of swelling and soreness, apparently in puncta and saccus lachrymalis.
↓Eyelids swollen. θAlbuminuria.
[8] **Upper Face.** ↓Face bloated. θAlbuminuria.
[11] **Taste and Tongue.** Swelling under tongue, r. side, like ranula.
[16] **Hiccough, Belching, Nausea and Vomiting.** Eructation of food without acidity, with apparent weakness of digestion, or acid eructations.
[17] **Scrobiculum and Stomach.** Increased warmth in stomach. Slight discomfort in stomach.
[19] **Abdomen.** Sensation of soreness between abdominal rings, in spermatic cord, and extending slightly downward.
[20] **Stool and Rectum.** Pain across sacrum with urgency to stool.
[21] **Urinary Organs.** Sensation of internal soreness on pressure in leaning back against cushioned back of carriage, in region of r. kidney.
↓Bloated face, eyelids swollen, head heavy, stupid; urine scanty, smoky. θAlbuminuria.
[25] **Voice and Larynx. Trachea and Bronchia.** Increased mucous secretion in larynx, causes frequent hawking and spitting.
[29] **Heart, Pulse and Circulation.** Increased frequency of pulse.
[31] **Neck and Back.** Pain across sacrum with urgency to stool. Soreness in region of r. kidney when pressing back against seat of carriage.
[42] **Locality and Direction.** Right: swelling under tongue; soreness in kidney.
[43] **Sensations.** Soreness: and swelling in eyes; in region of r. kidney; between abdominal rings, in spermatic cord. Increased warmth and discomfort in stomach.
Pain: across sacrum.
[44] **Tissues.** ↓Albuminuria.
Gout with fluid in great toejoint or with lithates.
[45] **Touch. Passive Motion. Injuries.** Pressure: against seat of carriage; soreness in kidney.

Digitized by Google

[48] **Relations.** Similar to its relatives, the ammonia salts and *Benz. ac.*, especially the latter in gout, rheumatism and kidney affections, and the *Amm. phosph.*, in gouty deposits.

Also similar to: *Gnaphal.* (gouty concretions); *Caustic.*; *Tereb.*. (smoky, albuminous urine; rheumatism).

AMMONIUM BROMIDUM.

Bromide of Ammonium. NH_4 *Br.*

Proved by A. M. Cushing, 1870, after the very interesting report by J. Kitchen. See Record, 1870, p. 297.

[1] **Mind.** Feared he might die. See 17.

[3] **Inner Head.** At times a feeling during day as of a band tied around head above ears, pressing hardest just above ears.

Pain in side of head near eye, as if a nail was driven into it.

Sharp pains in l. side of head near eye.

Headache from congestion to brain.

[5] **Sight and Eyes.** In evening, eyes feel very large, with constant blue before them.

Right eye feels large and smarts; has to wear a shade evenings to read or write; full of stringy mucus; as if bathed in hot water.

Eyes feel sore as if sand was in them.

‖Pterygium.

‖In morning eyes red and sore, with white mucus in corners, < l. eye. θOphthalmia scrofulosa.

Lids swollen.

Every evening eyelids droop; difficult and painful to raise.

Lids stick together.

‖Scrofulous ophthalmia.

Pains around eyes and into head.

Sharp pain near eye in l. side of head.

[7] **Smell and Nose.** Sneezing relieves stinging in throat.

Nose stopped up; then clear discharge.

Occasional discharge of watery fluid from l. nostril.

[11] **Taste and Tongue.** Tongue smarts severely as if just burned; morning.

[12] **Inner Mouth.** Must hold mouth open when walking, on account of heat in throat and lungs.
Mouth feels as if burned, in morning.
Stringy, tasteless mucus in mouth.
Tasting of food eaten several hours before.
[13] **Throat.** Throat during day filled with white, sticky mucus, streaked with blood.
Throat sore, looks mottled, as if a diphtheritic deposit were commencing.
Irritation of throat, mostly on sides, with inclination to cough; evening.
Fauces dark red; congested.
Preparing to swallow is painful, the act is not.
Sensation of hot air passing up throat, r. side, though stomach feels cold.
Fauces and tongue feel scalded.
Stinging in fuces with inclination to cough, > by sneezing.
Stringy, sometimes blood-streaked mucus in throat.
[15] **Eating and Drinking.** Food does not digest.
[16] **Hiccough, Belching, Nausea and Vomiting.** Belching relieves faint stomach.
Something seems to rise from pit of stomach, almost stopping breath, causing a faint and very disagreeable sensation, partially > by raising wind.
[17] **Scrobiculum and Stomach.** Swallowing anything causes distress the length of œsophagus and into stomach.
During afternoon and evening, sensation of fainting or suffocation, beginning at epigastrium and rising on both sides of sternum to throat, causing him to sigh and walk around room; feared he might die.
Sharp cutting pain in stomach.
Terrible distress in upper part of epigastrium; could not sit still had to walk the room; much belching; pain through to back and to both hypochondria; caused sweat; could scarcely get his breath.
[19] **Abdomen.** Sharp, twisting pain just above crest of r. ilium.
[20] **Stool and Rectum.** Sudden urgent desire, with loose stool.
‖An old hemorrhoidal tumor returned quite hard, sore and small, but soon left.
[21] **Urinary Organs.** Feeling over r. kidney as if something were pressed hard against it; relieved by pressure, but leaving a pulling sensation.
[23] **Female Sexual Organs.** ‖Dull constant pain and hard swelling in l. ovary.
‖Ovarian neuralgia.
‖Uterine hemorrhage from ovarian irritation or inflammation.

Digitized by Google

[25] **Voice and Larynx. Trachea and Bronchia.** Tickling in throat causing cough, in evening.

When walking, must hold mouth open on account of heat in throat and lungs.

[26] **Respiration.** Inclination to draw a long breath.

Sense of suffocation from lung, she must move about from fear of suffocation.

[27] **Cough.** Cough dry, spasmodic and very severe, at times an interval of only a few minutes.

An almost continuous cough for hours, especially when lying down at night; sensation of tickling irritation, with heat and burning.

Sudden short cough when rising from bed in morning, from sensation of mucus in throat.

Sudden cough from tickling in throat just below tonsils.

Sudden desire to cough coming so suddenly it strangles one. θPertussis.

Expectoration of white sticky mucus; sharp pain in both lungs, and during forenoon, pain seems to be mostly in pleura.

[28] **Inner Chest and Lungs.** Pain under middle of left clavicle.

Frequent constrictive pain across chest.

Sharp pain in lungs, < upper part of right.

Lungs feel cold inside.

Sharp pain in both lungs, and during forenoon pain seems to be mostly in pleura.

[31] **Neck and Back.** Feeling over r. kidney as if something pressed hard against it; > by pressure, but leaving a pulling sensation.

[32] **Upper Limbs.** Sensation in r. shoulder as if pressed by a weight.

[33] **Lower Limbs.** Legs ache.

Like a cord around r. leg, midway between hips and knee, causing limping and pain all forenoon; in afternoon pain went to l. leg below knee; in evening in ankle, then in foot, soon passing off, and inclination to cough returning.

Feet cold in warm room, causing legs to ache.

[35] **Rest. Position. Motion.** Could not sit still, had to walk floor with distress in stomach.

When walking: must hold mouth open on account of heat in throat and lungs.

Must move about from fear of suffocation.

When rising from bed in morning sudden short cough.

[36] **Nerves.** : Epilepsy.

Decrease of irritability, followed by tetanic convulsions; later all excitability gone, the frog lies in whatever position it is placed, the spasms become more violent, and death ensues from asphyxia.

Digitized by Google

Weakness and uncertain movements in a rabbit (after non-fatal doses).

[38] **Time.** Morning: eyes red and sore; tongue dry; tongue smarts; mouth dry; mouth as if burnt and full of mucus, also throat; tickling in throat; short cough on rising.

Forenoon: pain in pleura; as if cord was tied around leg.

Afternoon: stomach easier.

Afternoon and evening: fainty; cough deeper.

Evening: eyes feel large, smart, lids droop; tickling in throat, hacking cough, feet cold.

[39] **Temperature and Weather.** Swallowing anything cold causes distress along œsophagus.

Feels the cold more than usual.

Must warm the feet while in a warm room.

[40] **Fever.** Troubled with the cold more than any other time during winter; must warm feet even in warm room.

Inclined to be chilly and flashes of heat.

Flashes of heat over body as if sweat would come on.

[41] **Attacks, Periodicity.** Coughing spells with but a few moments interval.

[42] **Locality and Direction.** Right: eye feels large and smarts; full of stringy mucus, as if bathed in hot water; as if hot air passed up throat; pain above crest of ileum; pain over kidney; sharp pain in upper lung; pressure as from a weight in shoulder.

Left: eye sore and red; watery discharge from nostril; pain under middle of clavicle; dull pain in ovary.

[43] **Sensations.** Feeling of a band tied around head above ears; like a cord around r. leg; as if a nail was driven into side of head; eyes feel large in evening; as of sand in eyes; eyes as if bathed in hot water: tongue as if burned; as of hot air passing up throat; as of something rising from stomach causing suffocation; sense of fainting, beginning at epigastrium; terrible distress in epigastrium; sense of suffocation from lung; as if pressed by a weight in r. shoulder.

Pain: around eyes and in head; from epigastrium to back and into hypochondria; in l. leg below knee; in ankle, then in foot.

Sharp pain: in l. head near eye; in lungs and pleura.

Sharp cutting: in stomach.

Stinging: in fauces; in throat.

Sharp twisting pains: above crest of r. ileum.

Smarting: in r. eye; on tongue.

Scalded feeling: in fauces and tongue.

Constrictive pain: across chest.

Pulling sensation: over r. kidney.

Digitized by Google

Pressure: over r. kidney; in r. shoulder.
Aching: in legs.
Dull pain: in l. ovary.
Distress: in œsophagus and scrobiculum.
Tickling: in throat.
Heat: in throat and lungs; in flushes over body.
Cold feeling: in lungs; in stomach.

[44] **Tissues.** ‖Obesity.

[45] **Touch. Passive Motion. Injuries.** Pressure > pain over right kidney.

[48] **Relations.** Antidoted spasms caused by a low dose of *Hyosc.*

Similar to its relatives: *Amm. carb.*, *Amm. mur.*, *Amm. caust.*, *Amm. phosph.*, and to *Kali brom.*, *Kali bichr.* (stringy mucus); *Cinnab.* (scrof. ophthal., pains around orbit); *Natr. ars.* (throat): *Kali permang.* (throat); *Zincum*, *Ratan.*, and *Arg. nitr.* (pterygium); *Calc. ostr.* (scrof. ophthal.); *Kali brom.*; *Silic.* (aura begins in epigas.); *Nux vom.* (aura from stomach); *Art. vulg.* (must walk about); *Caustic.*; *Sulphur*; *Bufo*; bromide of camphor.

AMMONIUM CARBONICUM.

Smelling Salts. Ammoniæ Sesquicarbonas. $2NH_4O,3CO_2$.

Much used and abused by the Old School and the people. Introduced by Hahnemann in 1828. Classed among the antipsorics in 1835, in the second edition, with additions from the six later provers. In 1859 were published Professor Martin's provings on himself and students under his direction. Buchner's proving was omitted by Allen.

[1] **Mind.** Very forgetful and absent-minded; makes mistakes in writing and speaking.
Confusion and dulness of head.
Disposition to weep, particularly in evening.
Aversion to work, not disposed for anything.
Gloomy, depressed, with feeling of impending trouble, with sensation of coldness.
Anxious concern about one's sickness.
Anxiety, with inclination to weep.
Anguish as if a crime had been committed.
‖Listlessness and lethargy. θHysteria.

Digitized by Google

‖Utter dejection of mind. θChlorosis.
Ill humor: during wet, stormy weather; after dinner, lasting whole day.
From thinking: pain in face.
Hearing others talk, or talking himself, affects him.
After vexation or fright, red spots in face.

[2] **Sensorium.** ‖Feeling of lightness in head.
Giddiness, especially in morning, when sitting and reading; better when walking.
Frequent giddiness, as if surroundings were turning with him in a circle, in morning after rising, lasting whole day, worse in evening; also at night, when moving head.
Congestion of blood to head at night and when awaking, heat of face.
Vertigo mostly in morning; on moving his head sensation as if brain fell to and fro, towards the side where he stoops; sometimes with stinging pain.

[3] **Inner Head.** ‖Heaviness and beating in forehead after dinner.
Pressing fulness in forehead as from vapor of coal.
Sensation as if all was to be pressed out at forehead.
‖‖Sense of oppressive fulness, pushing as if forehead would burst.
‖Severe pain in forehead. θUndeveloped measles.
‖Pulsating, beating and pressing in forehead, as if it would burst; worse after eating; while walking in open air; better from pressure; in warm room.
‖Headache, thrusts in forehead, as if it would burst.
Tearing: in whole head; in temples; back of l. ear, ascending to vertex.
Boring, stitching headache at night.
Stitches in various parts of head.
Sensation of looseness of brain; as if the brain fell to side towards which he leaned.
Congestive and menstrual headache.
When stooping, sensation as if blood was accumulating.
Headache: in morning in bed, with nausea and risings in throat, as if to vomit; in morning, but < in afternoon.

[4] **Outer Head.** Pain on head resembling hammering or hacking with a flat instrument.
Drawing pain in periosteum of forehead, wakens from sleep in morning, passes off after rising.
Severe itching of scalp, especially on occiput.
Sensation as if hair would stand on end, with crawling and cold feeling on head, after coming into room from open air.

Scalp, even hair, painful to touch.

[5] **Sight and Eyes.** Double vision.
Aversion to light, with burning in eyes.
Optical illusions, particularly in white or bright colors.
‖Sparks before eyes at night. θHeadache.
‖‖Large black spot floats before eyes after sewing.
‖‖Eyes weak and watery, especially after reading; muscular asthenopia; affections from overstraining eyes.
‖‖Yellow spots on looking at white objects.
‖Cataract of r. eye.
Burning in eyes all day.
Inflammation of eyes; vision obscured.
Eyes bloodshot, with lachrymation.
Pressure on eyelids so that he cannot open them, even though internally awake.
Pressure with cutting or stitching in eyes.
Smarting in eyes and itching on margin of lids.
Stye on r. upper eyelid, with tension.

[6] **Hearing and Ears.** Painful sensitiveness of dull ear to loud noise.
Dull sense of hearing.
Humming and buzzing before ears.
‖Hard hearing; ear itches and discharges pus.
Indistinct hearing.
Itching above ears, spreads over whole body.
‖‖Hard swelling of r. parotid gland. θScarlatina.

[7] **Smell and Nose.** Nosebleed; dry coryza, especially at night, without slightest air passing through; redness of tip of nose, when stooping.
‖Nosebleed; severe pain as if brain was forcing itself out just above nose.
‖‖Nosebleed: when washing face or hands in morning nose bleeds from l. nostril; ‖from r. several days in succession, weakening boy. θUndeveloped measles.
‖When stooping, blood rushes to tip of nose.
‖Bloody mucus blown from nose frequently. θOzæna.
‖Burning water runs from nose; < when stooping.
‖‖Stoppage, mostly at night; must breathe through mouth, with long-lasting coryza. θScarlatina.
‖Child's nose stopped up, starts from sleep; rattling of phlegm in trachea.
‖Coryza in hysterical females, in feeble or aged people.
Pustules on nose.

[8] **Upper Face.** Heat in face: during mental exertion; during and after dinner.
Heat in face, with red cheeks.
Redness of l. cheek.
Pale face, bloated.

Digitized by Google

Hard swelling of cheek, also of parotid and cervical glands.
Pustulous eruption on forehead, cheeks and chin.
Small boils and indurations, emitting water and blood on cheek, at corner of mouth and on chin.
Freckles.

[9] **Lower Face.** Herpetic eruption around mouth.
Itching eruption on lips.
Upper lip pains, as if cracked.
Lower lip cracked in middle, bleeding and burning.
Painful burning blister on inside of lower lip.
Blueness of lips.

[10] **Teeth and Gums.** Pricking pain, especially in molars; < when masticating or touching decayed teeth with tongue.
Pressing teeth together sends a shock through head, ears and nose.
Teeth feel too long, too dull.
Violent toothache, evenings, immediately on going to bed.
Stitching pain in molars when biting; can use incisors only.
Drawing toothache during catamenia; > from eating, < from warm fluids.
Sensation as of an ulcer at root of a tooth.
Looseness and rapid decay of teeth.
Gums swollen, easily bleeding.

[11] **Taste and Tongue.** Taste: sweetish; of blood, offensive; of food, sourish or metallic; bitter in morning.
Talking difficult at times, like from weakness of parts; also from pain.
Vesicles on tongue, at tip, on borders, burning, hindering eating and speaking.

[12] **Inner Mouth.** Redness and inflammation of inner mouth and gullet; pain as if raw.
Sensation as if mouth was swollen.
Great dryness of mouth and throat. θScarlatina. θHeadache.
‖Swelling of internal mouth, especially inside of cheeks.
Has to spit a great deal.
Salivation with headache.

[13] **Throat.** Pain in throat, as if r. tonsil was swollen when swallowing.
‖Enlarged tonsils, bluish, much offensive mucus there. θScarlatina.
Sensation as if something had lodged in throat, impeding deglutition.
‖Putrid sore throat; glands engorged. θScarlatina.
‖Tendency to gangrenous ulceration of tonsils. θScarlatina.
‖Angina after checking an old ulcer on leg; ceased when ulcer returned.

Digitized by Google

Dryness of throat.
‖Burning pain in throat and down œsophagus as from alcohol.
‖Roughness and scraping in throat.
‖Diphtheria, when nose is stopped up; child starts from sleep, cannot get its breath.
‖Diphtheria; nose stopped both sides, membrane extends to upper lip, which is excoriated from watery discharge.

[14] **Appetite, Thirst. Desires, Aversions.** Continual thirst; no appetite, excepting for bread and cold food.
Great hunger and appetite, yet a small quantity satiates.
Unconquerable appetite for sugar.

[15] **Eating and Drinking.** Cannot eat (dinner) without drinking.
Worse during eating: heat in face; headache, nausea and prostration; dizziness.
Worse after eating: nausea; pressure in stomach and forehead; speech becomes difficult; sweat increased.
After dinner: is ill-humored; has headache; face is hot.
Worse from warm diet.
When masticating, decayed tooth pains more.
After eating: heartburn; drawing toothache during menses >.
Toothache during menses < from warm fluids.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough, morning after chill.
Eructations: ‖empty; imperfect; taste of food; sour.
Heartburn after eating.
Nausea and vomiting of all that has been eaten; afterwards sour taste in mouth.

[17] **Scrobiculum and Stomach.** Stitches in pit of stomach, with cough.
Burning and heat in stomach.
Pain as from constriction in stomach, with nausea, waterbrash and chilliness, > by pressure and lying down.
Stomach feels full, trembling.
Empty feeling in stomach.
‖Pressure in stomach after eating or at night; clothes feel oppressive.
Heat in stomach, spreading through bowels.
Pain in stomach, with tendency to waterbrash.

[18] **Hypochondria.** Burning pain in liver.
Boring stitches in liver in evening while sitting.
Pressure or sore feeling in hypochondrium.
Numbness in r. hypochondrium.
Stitches in hypochondrium.
‖Splenic affections.

[19] **Abdomen.** Pressure above navel, as from a button.

Digitized by Google

Pressive pain in l. side of abdomen.
Sudden painful contraction of bowels, extending to epigastrium; > from pressure; on lying down it ceases.
Cutting pain, with retraction of abdominal walls.
‖Colic with pain between scapulæ. θAmenorrhœa.
Stitches through abdomen.
Elastic swelling (size of a fist) in l. groin, evenings; bruised pain therein; cannot lie on l. side; on awaking, both swelling and pain gone.
Painful concussion in lower part of abdomen when stepping.

[20] **Stool and Rectum.** Painful diarrhœa.
Stool of feces and mucus.
Stools at first retarded, later soft.
‖Costiveness on account of hardness of feces.
‖‖Constipation; stool hard and dry, difficult to expel, with headache.
‖Constipation with hemorrhoids.
Protrusion of hemorrhoids after stool, with long-lasting pains; cannot walk.
Hemorrhoids protrude, independent of stool.
Burning at anus with tenesmus, prevents sleep at night; must rise from bed on that account.
Itching at anus.

[21] **Urinary Organs.** Pressure of urine on bladder, with cutting pain.
‖‖Frequent urination at night.
‖Involuntary urination during sleep; urine pale with red sediment.
Pale urine, with sandy sediment.
Whitish sediment.
: Diabetes.
During micturition, vulva and anus, which are sore, become painful.

[22] **Male Sexual Organs.** After coition, excited circulation and palpitation.
Forcing (würgend) pain in testicles and seminal cords; sensitiveness of testicles to touch, aggravated by erections.
Testicles and scrotum relaxed, necessitating a supporter.
Erections without sexual desire, mornings.
Violent sexual desire, almost without erections.
Seminal emissions almost every night.
Itching of genitals.

[23] **Female Sexual Organs.** ‖Great excitement of female sexual organs. θHysteria.
Before catamenia: face pale; pain in belly and small of back; want of appetite.

Digitized by Google

‖Cholera-like symptoms at commencement of catamenia.
During catamenia: toothache; colic; face pale; very sad; ‖great fatigue, especially of thighs, with yawning, toothache, pain in small of back and chilliness.
After a long drive in open air, courses come on four days too soon; they are very copious, especially at night, and when sitting and driving previously; she experienced griping colic, with want of appetite.
‖The courses come on six days too soon.
‖The menstrual blood is blackish, often in clots, passing off with spasmodic pain in belly and hard stools, with tenesmus; flow abundant.
‖Menstrual blood acrid, makes thighs sore; soreness causes a burning pain.
‖Acrid leucorrhœa, with sensation of excoriation or ulceration in vulva. θHysteria.
‖Leucorrhœa: watery, burning, from uterus; acrid, profuse, from vagina.
‖Violent tearing in abdomen and vagina.
‖Irritation of clitoris. θHysteria.
‖Swelling, itching and burning of pudenda.
Vulvitis with tendency to gangrene.
Menses premature, abundant, blackish, often in clots, preceded by griping and colic.
Menses scanty and too late, always accompanied by frontal headache.

[24] **Pregnancy. Parturition. Lactation.** During pregnancy: albuminuria; yellow spots before eyes.
Right mamma painful to touch.

[25] **Voice and Larynx. Trachea and Bronchia.** Slight difficulty in speech; incipient paralysis of laryngeal nerves. θSoftening of brain.
Great dryness of throat and hoarseness.
Hoarseness: with roughness in throat; cannot speak a loud word; < from speaking.
Larynx as if drawn shut from both sides of throat.
Rattling in larynx as from mucus.
‖Accumulation of mucus in trachea. θSoftening of brain.
‖Catarrh.

[26] **Respiration.** Shortness of breath and palpitation after every exertion.
Dyspnœa, with palpitation of heart.
‖Great difficulty of breathing in going up even a few steps; less in open air.
‖Dares not come into a warm room, in which he becomes deathly pale and can do nothing but sit quiet. θAsthma.
‖Difficult breathing; causing short cough.
‖Oppression of breathing.

Digitized by Google

Catarrh, dyspnœa, asthma.
One of the best remedies in emphysema.
Chronic asthma, tendency to hydrothorax.
Œdema pulmonum with somnolence from poisoning of blood with carbonic acid.

[27] **Cough.** Dry cough at night with tickling in larynx, headache.
Cough dry and worse at night, like from feather down in throat.
Cough at night; every morning, at 3 o'clock, dry cough from tickling in throat, as of dust.
Cough: with spitting of blood, previous sweet taste and great dyspnœa, with stitches in small of back and pit of stomach; short, asthmatic, from irritation in larynx, with painful sensation of spasmodic contraction of chest; with asthma, evening in bed; with hoarseness, body being warm; with spitting of bloody phlegm, heaviness on chest, short breath, especially on ascending a hill.
Coughs up dark blood.
Roughness and bloody taste in mouth, succeeded by cough and sputum of light-red blood, with burning and heaviness in chest, face red and hot, body trembling.
Much hawking of saltish mucus at night.
Expectoration seldom; or morning and during day.
Sputa thin, foamy; adynamic state, with rattling of large bubbles in chest. θBronchitis in the aged.

[28] **Inner Chest and Lungs.** Chronic weakness of chest and coryza.
Cracking in chest.
Burning in chest; also with hydrothorax.
Stitches in r. chest: when stooping; when walking; when raising up in bed.
Stitches in l. chest, prevents lying on l. side.
Lower part of chest most affected.
Heaviness as from accumulation of blood in chest.
Rush of blood to chest (after writing).
Tearing from upper l. chest to scapula.
Heaviness and oppression at sternum at night.
Heaviness and tightness when walking in open air.
Pneumonia with great weakness and suspected heart-clot.

[29] **Heart, Pulse and Circulation.** Vehement palpitation of heart and great præcordial distress, followed by syncope. θHysteria.
Palpitation of heart. θHeadache.
Palpitation and asthma after every exertion.
Frequent palpitation, with contraction of epigastrium and weak feeling in pit of stomach.

Digitized by Google

Audible palpitation, with attacks of great anxiety, as if dying; cold sweat; involuntary flow of tears; unable to speak; loud, difficult breathing and trembling of hands.

| | Pulse hard, tense, frequent.

Ebullition of blood at night; seems as if heart and veins would burst.

‖ Angina pectoris.

[30] **Outer Chest.** Small pimple on sternum; when touched it feels as if it had a splinter in it.

Red rash on chest.

[31] **Neck and Back.** Burning on throat externally.

| Lymphatic glands swollen. θScarlatina.

: Goitre.

Pain in nape of neck.

| | Pain between scapulæ.

| | Violent pain in small of back, with great coldness. θAmenorrhœa.

Pressive drawing pain in small of back and loins, only when at rest, during day; passing off when walking.

Stitches at coccyx, where before there was itching.

[32] **Upper Limbs.** Axillary glands painful and swollen.

Tearing, also bruised pains in shoulder.

Weight and lameness in r. arm; has no power in it, must let it hang; hand swollen.

Cramp in r. arm, drawing it backward.

Rigidity of arms and fingers as if dead, at night, early in morning, and when grasping things.

Cracking of elbow joint when moved.

Boring pain in olecranon depression.

Itching eruption on inside of r. forearm.

Pain in wrist joint which had been sprained some time ago.

Pain in wrist; in back of hands; in fingers and thumbs.

Trembling of hands.

Cracking of skin of hands.

Peeling of skin from palms.

Hands look blue and veins distended, after washing in cold water.

Fingers swell when hands hang down.

Whitlow, in beginning: red streak up to axilla.

‖ Panaritium; finger inflamed; deep-seated periosteal pain.

Fingers "go to sleep."

[33] **Lower Limbs.** Restlessness in legs.

Great weakness and languor of lower limbs.

Soreness between limbs of children.

Violent pain in hip joint when walking.

Blue spot, with great burning, above knee.

Digitized by Google

Boring and drawing pains in knees.
Leg frequently "goes to sleep" when sitting or standing, also when lying on it at night.
Drawing pains in legs when sitting.
Cramp in leg; also in soles of feet.
Severe pain in heels when awaking in morning, as if ulcerated to bone.
Heel hurts when standing or walking much; sometimes suppuration.
Tearing in ankle and bones of feet; ceases when warm in bed.
Cold feet, particularly when going to bed.
Trembling of feet.
Ball of great toe painful and hot.
Great toe becomes red, swollen and painful, particularly in bed, evenings.
The big toe is hot and burns; < from pressure of boots.
Feet and toes swollen.
Crawling in toes.

34 **Limbs in General.** Pain in limbs at night, with gnawing pain in small of back.
Inclination to stretch limbs.
Burning of hands and feet.

35 **Rest. Position. Motion.** At rest: pain in back and loins <.
Relieved lying on abdomen.
Lying down: pain in stomach >; pain in bowels ceases; leg goes to sleep.
Must lie down from debility.
Cannot lie on l. side: bruised pain in l. groin; stitches in l. side.
Raising up in bed: stitches in chest.
When sitting: dizziness; boring stitches in liver; leg goes to sleep; drawing in legs.
Ascending steps: difficult breathing.
Ascending a hill: shortness of breath.
Stepping causes painful concussion in abdomen.
Standing: leg goes to sleep; heel hurts.
Walking: dizziness better; pulsating pressure and beating in forehead; painful commotion in bowels; stitches in chest; heaviness and tightness in chest; improves pain in back or loins; pain in hip.
Every exertion: heel hurts; weakness in limbs; palpitation and asthma.
Moving head: giddiness; sensation as if brain fell to and fro.
Stooping: brain seems to fall towards side leaned to; nosebleed; burning water runs from nose; rush of blood to tip of nose; stitches in chest.

Digitized by Google

[86] **Nerves.** Tetanic or epileptic convulsions from violent cerebral irritation.
Debility, must lie down; also with soreness of whole body.
Feeling of weakness in limbs > walking in open air.
Great lassitude.
‖Exhaustion with defective reaction.
‖Hysteria with symptoms simulating organic affections.
; Epilepsy.

[87] **Sleep.** Loses breath at moment when falling asleep; wakens to get breath.
Must sleep in afternoon, or eyes pain.
Restless, unrefreshing sleep; tosses about.
‖Frequent violent starting out of sleep, with great fear afterwards.
‖Nightmare every night, sometimes in a sweat when awaking. θHeart disease.
‖Somnolence, with blood overcarbonized. θŒdema pulmonum.
Dreams: vivid; romantic; lewd; anxious; of danger and want; of ghosts; of dying; of dead persons; offensive, of lice; of scolding.
Talks during sleep.
‖Heart-beats disturb sleep; ‖stupor. θScarlatina.
Sleepless until 4 A.M
Unrefreshing sleep.

[88] **Time.** Night: giddiness; rush of blood to head; boring and stitching in head; nosebleed; stoppage of nose; pressure in stomach; burning at anus and tenesmus; frequent urination; seminal emissions; cough <; hawks much saltish mucus; heaviness and oppression at sternum; ebullition of blood; rigidity of hands and arms; pain in all limbs; continuous sweat.
3 A.M.: dry cough from tickling in throat.
Early morning: rigidity of arms and fingers.
Morning: vertigo; headache with nausea, etc.; nosebleed when washing face; bitter taste; hiccough; erections without desire; expectoration; pain in heels on awaking; sweat most about joints.
All day: burning in eyes; continuous sweat.
During day: expectoration; pains in back and loins.
Afternoon: must sleep to relieve pain in eyes.
Evening: disposed to weep; giddiness <; violent toothache; boring stitches in liver; swelling in l. groin; cough with asthma in bed; great toe swollen and painful in bed; chill alternating with heat till midnight; much flatus.
7 P.M.: strange uneasiness arousing child from sleep.
10 P.M.: child falls asleep suddenly after previous uneasiness.

Digitized by Google

[39] **Temperature and Weather.** ‖In wet, stormy weather: ill humor; < headache.
Winter: stout women readily take cold.
‖Very sensitive to cold air out-doors.
Worse in cold air; menorrhagia.
Worse from wet poultices.
From washing: reappearance of symptoms; nosebleed; blue hands, swollen veins.
‖Children dislike washing.
‖In a warm room: headache >; get deathly pale. θAsthma.
Better in-doors, from warmth, in dry weather.
Worse while walking in open air, evening.
‖Averse to walking in open air.
After entering warm room from open air, sensation as if hair stood on end.
‖Aversion to walking in open air.
Open air: increases headache while walking; difficult breathing >; heaviness and tightness in chest when walking; weakness of limbs when walking; chill increased.
Warmth of bed: relieves tearing in ankle and feet.
In bed: great toe becomes red and painful.
Warm room: chill lessened.

[40] **Fever.** Chill evening; frequently alternating with heat, till towards midnight.
Chill increased in open air, lessened in warm room.
Great chilliness with headache.
Thirst before chill.
In afternoon a chill followed by heat.
Heat, evening, particularly of face; with cold feet.
‖Hectic fever. θScurvy.
Sweat in morning, mostly at joints.
Sweat on lower part of body.
Continuous day or night-sweat.
‖Cold, cyanotic, semiconscious, pulseless. θBeginning of spotted fever.

[41] **Attacks, Periodicity.** Worse during new moon.

[42] **Locality and Direction.** Right: stye on upper lid; cataract; swelling of parotid gland; tonsil feels swollen; numbness in hypochondrium; stitches in chest; weight and lameness in arm; cramp in arm.
Left: tearing behind ear; cheek red; stitches in hypochondrium; pressing pain in side of abdomen; swelling in groin; tearing from upper chest to scapula.

[43] **Sensations.** Lightness in head; as if surroundings were turning with him; as if brain fell to and fro; as from vapor of coal in forehead; as if all were to be passed out

Digitized by Google

at forehead; as if forehead would burst; of looseness of brain; as if hammering with a flat instrument on head; as if hair would stand on end; as if brain was forcing itself out above nose; a shock through head, ears and nose on pressing teeth together; as if mouth was swollen; as if r. tonsil was swollen; as if something had lodged in throat; as from a button pressing above navel; larynx as if drawn shut; as of dust in throat; spasmodic contraction of chest; as of a splinter in pimple on sternum; fingers and leg "go to sleep;" as if ulcerated to bone, in heels; as if joints were sprained; as from festering under skin.

Pain: in forehead; between scapulæ, with colic; in nape of neck; in small of back; in wrist; in back of hands; in fingers and thumbs; in hip joint.

As of an ulcer: at root of a tooth; in heels.

Thrusts: in forehead.

Stitches: in various parts of head; in eyes; in molars; in scrobiculum, with cough; in hypochondrium; through abdomen; in small of back and pit of stomach, with cough; in chest; at coccyx, preceded by itching.

Boring stitches: in head; in liver.

Boring pain: in olecranon depression and in knees.

Stinging: in head; thrusts in forehead; in warts.

Pricking: in molars.

Cutting: in eyes; in abdomen; in bladder.

Tearing pain: in head; temples; back of l. ear to vertex; in abdomen and vagina; from upper l. chest to scapula; in shoulder; in ankle and bones of feet; in joints; in warts.

Burning: in eyes; of lower lip; vesicles on tongue; in throat and down œsophagus; and heat in stomach; in liver; at anus; leucorrhœa; of pudenda; in chest; on throat; of hands and feet; in spot above knee; in warts; in vesicles and pustules.

Smarting: in eyes.

Rawness: of mouth and gullet.

Painful constriction: in stomach; in bowels; of chest.

Cramp: in r. arm; in leg; in soles of feet.

Painful concussion: in lower part of abdomen when stepping.

Bruised pain: in swelling in groin; in shoulder.

Pressive drawing: in small of back and loins.

Forcing pain: in testicles and seminal cords.

Drawing: in periosteum of forehead; in teeth during catamenia; in legs; in knees.

Gnawing pain: in small of back.

Pressure: outward in forehead; on eyelids; in eyes; in

Digitized by Google

stomach: in r. hypochondrium; above navel; in l. side of abdomen; of urine on bladder.
Pulsating: in forehead.
Itching: of scalp, especially on occiput; on margin of lids; in and above ear; of genitals; at anus; at coccyx, followed by stitches; and stinging in skin; of eruption on inside of r. forearm.
Tickling: as from feather in throat; in larynx.
Crawling: on head; in toes.
Heaviness: and beating in forehead; in chest; at sternum; in r. arm; of internal parts.
Loose sensation: of brain.
Weak feeling: in pit of stomach; of legs.
Roughness and scraping: in throat.
Tension: on r. upper eyelid, as from shortness of muscles.
Swollen feeling: in mouth; in r. tonsil.
Lameness: in r. arm.
Numbness: in r. hypochondrium.
Coldness: on head; with backache.
Dryness: of mouth and throat.

[44] **Tissues.** Hemorrhagic diathesis, from fluidity of blood and dissolution of red blood corpuscles; tendency to gangrenous ulcerations.
Hemorrhages: dark; from nose, gums and bowels.
Lymphatic and parotid gland swollen and indurated.
Erythema, then vesication; finally gangrenous degeneration.
Long used, it develops a scorbutic condition; muscles soft and flabby; teeth drop out; hemorrhages; hectic.

[45] **Touch. Passive Motion. Injuries.** Worse from pressing teeth together.
Outer pressure: headache >; constrictive pain in stomach >; pain in bowels >.
Pressure of boot aggravates pain in big toe.
After a ride: menses come four days too soon; < at night and when sitting.
Touch: scalp painful: testicles sensitive; r. mamma painful; sensation of splinter in pimple.
Scratching: burning blisters appear afterwards.
After a fall from a horse and sprain of l. great toe, frequent inflammation, joint red, hot and painful, and so sensitive to touch that he could not bear the bedcovers; continual sensation as if joint was dislocated.

[46] **Skin.** Chronic miliary eruption.
Violent itching; after scratching, burning blisters appear.
Itching lessened by scratching.
Desquamation.
Itching and stinging of skin keep him awake.

Digitized by Google

Burning stinging, tearing in warts.
Burning vesicles and pustules.
‖Putrid flat ulcers with a pungent sensation, pain > by keeping limb elevated and from outward pressure; pus white and putrid.
Child becomes sore between legs.
‖Brought out measles after three months' delay.
Strange uneasiness every evening, 7 o'clock, which arouses child from sleep; it tosses about in bed and screams until it falls soundly asleep, about 10 P.M.; during uneasiness head feels bloated and burning; next day rash on face as if scarlatina would break out.
‖‖Body red as if covered with scarlatina.
‖‖Malignant scarlatina with somnolence, starting from sleep; dark red or putrid sore throat; sticky salivation; parotitis; external throat swollen; stertorous breathing; involuntary stools with excessive vomiting; body red, with miliary rash, or faintly developed eruption; threatened paralysis of brain.
‖Scarlatina receding.
‖Erysipelas of old people when cerebral symptoms are developed; while eruption is still out, debility and soreness of whole body; tendency to gangrenous destruction.
⋮Psoriasis.
⋮Lepra vulgaris.

[47] **Stages of Life, Constitution.** ‖Scrofulous children.
‖Stout women, who lead a sedentary life, have various troubles in consequence, and readily catch cold in winter.
Erysipelas of old people.

[48] **Relations.** Similar to its relatives, *Amm. mur.*, *Amm. phosph.*, etc., and to *Ant. tart.* (emphysema, etc.; blood poisoned with carbonic acid); *Arnic.; Arsen.* (inflammations); *Aurum* (heart); *Apis* (scarlatina, miliaria; burning stinging); *Bellad.; Coccul.* (muscular asthenopia); *Calc. ostr.* (parotitis in scarlatina; pale, flabby, etc.); *Hepar; Kali bichr.; Kali carb.; Laches.* (erysipelas); *Lauroc.; Natr. mur.* (muscular asthenopia); *Phosphor.; Pulsat.; Rhus tox.* (rash, scarlatina with parotitis, etc.); *Ruta* (muscular asthenopia); *Staphis.; Sulphur; Veratr.* (cholera-like symptoms during menses).
‖The presence of miliary rash may distinguish it from the sometimes similar *Bellad.* in scarlatina.
‖Inimical to *Laches.*
Antidote to: poisoning with *Rhus tox.;* stings of insects.
Antidoted by: *Arnic., Camphor, Hepar;* vegetable acids, fixed oils, as castor, linseed, almond and olive oils.
The Chenopodium vulvaria exhales pure ammonia during its whole existence.

Digitized by Google

AMMONIUM MURIATICUM.

Sal Ammoniæ. *Ammonium chloride.* *N H 4 Cl.*

The first prover was the much-slandered Nenning, whose masterly provings, comprising 448 symptoms, were published by Hartlaub in his Annalen, in 1833. Hahnemann added his own symptoms (84) in the second edition of the Chronic Diseases, and a valuable proving of Rummel, consisting of 23 symptoms, and condensed Nenning's 448 to 290, without thereby occasioning a loss. The symptoms from a poisoning by the fumes belong to Amm. causticum.

[1] **Mind.** Neither unconsciousness nor delirium; no apoplexy.
Desire to cry, and at times crying.
Disinclination to speak.
Involuntary aversion to certain persons.
Melancholy and anxious, as if laboring under some grief or sorrow.
Apprehensive and gloomy, like from internal grief.
Great earnestness.
Indifferent mood.
Fretfulness; irritability, mostly mornings.
Mood irritable, malicious.
Consequences of grief.

[2] **Sensorium.** Fulness of head with giddiness; feels as if it was very heavy.
Heaviness of forehead, in morning after rising and during day.
Vertigo and fulness of head; at times as if she would fall sideways.

[3] **Inner Head.** ▮Dull heavy pains with vertigo and pallor. θPrevailing fever.
▮Congestive headache with flushed face and enlarged veins. θPrevailing fever.
Heaviness in forehead, frequently during day (internal sensation of heat and some sweat).
Pressure in forehead, towards root of nose, with sensation as if brain was torn; < after rising.
Tearing mostly in r. temple, through r. side of face.
Stitches in l. temple and side of head, and when stooping, in vertex, with sensation as if head would split.
Contractive pain in occiput as though screwed in, extending to side of head.
Rheumatic, tearing pains in head, temple and occiput.

Digitized by Google

Rheumatic pains in head so severe as to cause nausea, burning of ears and deafness.
‖Neuralgic headaches.

⁴ **Outer Head.** ‖Falling out of hair, with great itching of scalp.
‖Itching of scalp; also with dandruff.
Itching pimples on r. side of occiput.

⁵ **Sight and Eyes.** Mist before eyes, < in bright light, outdoors; > better in room.
Sensation in l. eye as if a body arose which impeded sight.
Yellow spots before eyes.
Optical illusions in dark colors.
‖Capsular cataract.
‖‖Flying spots and points before eyes.
Burning of eyes at twilight; ceases after lighting lamp.
Eyes gum together in morning, with burning in canthi after washing.
‖‖Eyes dim, glassy, watery.
⁝ Yellow eyes.

⁶ **Hearing and Ears.** Humming and roaring in r. ear.
Hard hearing, with discharge.
Itching in both ears, not relieved by scratching, with discharge of fluid earwax.
Stitches in ears, also with boring or burning, mostly when walking in open air.
Digging and tearing in r. ear, also at night; when lying thereon, a rooting and rolling, as if something would come out.
‖Right ear affected for years; it commences in throat and he cannot talk right; it is as if ear and throat were connected.

⁷ **Smell and Nose.** ‖Loss of smell, with coryza and stoppage of the nose.
‖Nose sore internally and at edges of nostrils. θScarlatina.
Ulcerative pain in l. nostril, with sensitiveness to touch.
External swelling of l. nostril, with discharge of bloody crusts.
Bleeding from l. nostril, preceded by itching.
Constant itching in nose, with irritation to blow it, and sensation as of a large rough body up in the nose, with obstruction.
‖Coryza, with stoppage of nose, hoarseness and burning in larynx.
‖‖Watery, acrid coryza, corroding the lip.
‖Frequent sneezng; ‖rou^{ses}d her from sleep, with crawling in throat making her cough.
‖‖Coryza in children, with bluish discharge.
Coryza with stoppage, great soreness and tenderness of nose, and loss of smell.

Digitized by Google

‖The nose either more dry than natural, or a watery discharge and obstruction. θPrevailing fever.

[8] **Upper Face.** ‖Very pale face.

‖Burning heat of face, passes off in open air.

Tearing in bones of face, especially in malar and lower maxilla.

Swelling of cheek, with swelling of a gland under angle of lower jaw, with beating, stitching pain.

‖Eruption on face which burns; he cannot sleep without cold applications.

[9] **Lower Face.** ‖Mouth and lips sore and excoriated. θPrevailing fever.

Lips burn like fire.

‖Corners of mouth ulcerated.

⁝Dry, shrivelled, cracked lips, must moisten them with tongue continually.

Pimples, blisters, on upper lip.

Tensive pain in articulations of jaw when chewing or opening mouth.

Submaxillary glands swollen; pulsating pains.

[10] **Teeth and Gums.** Pain in a decayed root, ceases when pressed upon with finger.

Stitching pain in upper incisors.

Swelling of gums of lower l. side, with stitches up to l. temple.

[11] **Taste and Tongue.** ‖Tongue swollen and pasty. θPrevailing fever.

‖Blister on tip of tongue, with burning pain.

‖Tongue furred white.

[13] **Throat.** ‖Throat full and sore with increase of glairy mucus, and difficult swallowing. θPrevailing fever.

Dryness in throat.

Stitches in throat during and between deglutition, also when yawning.

‖External and internal swelling of throat, with pressing pain when swallowing, and with drawing, stitching pain in swollen submaxillary glands.

‖Sore throat, with viscid phlegm; so tough that it cannot be hawked up.

Tonsils throb, but are not swollen, with uneasiness and oppressive anxiety.

Throbbing in glands of neck, which, however, are not swollen; with flushes of heat and want of air in throat.

[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite.

‖Loss of appetite and thirstlessness. θPrevailing fever.

Much thirst, mostly evenings.

‖Sometimes extreme thirst. θPrevailing fever.

⁝Want of appetite alternating with canine hunger.

Digitized by Google

[15] **Eating and Drinking.** ¦After eating, beating in breast near œsophagus, with heat of face and restless mood; < on an empty stomach, but also nearly always after eating; must often eat a little, but not enough to satisfy hunger.

‖Sore spot behind soft palate, which is relieved or passes away for a short time by eating.

Eating and drinking cold things aggravate cough.

After dinner: sudden prostration when walking in open air.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough, with stitches in chest.

Eructations: empty; bitter; tasting of food.

Nausea: with waterbrash, after eating, with shudderings.

Regurgitation: of food; of bitter, sour water.

‖Frequent vomiting. θPrevailing fever.

[17] **Scrobiculum and Stomach.** ‖Stomach too apt to be overloaded, feels lame and sore, sometimes flatulent. θPrevailing fever.

Empty or hungry feeling in stomach.

Sensation as from fasting, yet fulness in stomach; < after breakfast.

Rooting and rolling in stomach, in morning; passes off after breakfast.

Gnawing in stomach, as if worms were in it.

Burning and itching in scrobiculum, from thence drawing to r. axilla, and into upper arm.

‖Empty sensation in stomach, but she cannot make up her mind to eat anything.

[18] **Hypochondria.** Intermittent pains in both hypochondria.

Stitching and burning in r. hypochondrium, afternoons, when walking.

‖Splenic stitches, while sitting; also in morning on awaking, with difficulty of breathing, obliging him to rise.

⁝Liver complaint. Gallstones.

[19] **Abdomen.** ‖Abdomen full and distended, sometimes severe pains. θPrevailing fever.

Bellyache, griping pains about navel.

Heaviness in lower abdomen, as from a load, with anxiety as if abdomen would burst; ceases after sleep.

Distension of abdomen, without accumulation of wind.

Stitches in abdomen, above l. hip.

Pain from r. side of pubes, to hip and small of back.

Cutting and stitches from both ossa pubium to small of back, with urging to urinate, evenings.

Stitches in r. groin, coming out behind hip, when sitting.

‖Groins feel sore and as if swollen. θUterine displacement.

Digitized by Google

Tearing and tensive pain in groin when walking.
Pain as if sprained in l. abdomen.
Pain as from a sprain in l. groin. θDuring pregnancy.
Pain in abdomen and back with menses. θProlapsus uteri.
Excessive amount of fat in abdomen; lax and hanging.

[20] **Stool and Rectum.** The various affections of bowels are accompanied by flatus. θPrevailing fever.
Soreness up along rectum, when sitting.
Itching soreness of rectum, several pustules being formed at side of it; often with diarrhœa.
Much burning and smarting in rectum during and for hours after stool.
Stitching or tearing pain in perineum, when walking. θPregnancy.
Green, slimy, diarrhœic stools, in morning.
Color of stools varies; white and undigested, or green and watery, or green slimy, or yellow and bloody watery and slimy. θPrevailing fever.
Diarrhœa after eating, with pain in abdomen, back, small of back and limbs.
Hard, crumbling stools, requiring great effort in their expulsion.
Obstinate and extreme constipation. Prevailing fever.
Watery stools copious, other kinds scanty, though often repeated. θPrevailing fever.
Stool hard, crumbling, scanty.
Stools like scrapings of meat or copious, consisting of coagulated blood. θPrevailing fever.
Discharge of blood during stool.
Hard stool covered with mucus.
Glassy, tough mucus in stool.
Hemorrhoidal trouble with burning and stinging in rectum.
Hemorrhoids sore and smarting. θAfter suppressed leucorrhœa.
Constipation changing with diarrhœa.

[21] **Urinary Organs.** Constant tenesmus vesicæ; < 4 A.M.
Frequent urging, with frequent urination.
Urging, yet only a few drops pass, until next stool, when it flows freely.
Profuse and frequent discharge during night.
Sediment like clay.
Copious urine smells strongly ammoniacal; sometimes mouldy or musty.

[22] **Male Sexual Organs.** Stitches and beating in l. spermatic cord.
Frequent erections.

Digitized by Google

Hypertrophy of prostate.
Blennorrhœa of urethra.
Strictures and contracted urethra.
Old gonorrhœa.

[23] **Female Sexual Organs.** Neuralgic pains in ovaries.
Hypertrophy of uterus.
Uterus displaced, with soreness in groins as if swollen; crumbling stools; profuse menses.
Menses too early, with pain in abdomen and small of back, continuing at night; flow more profuse at night. θProlapsus uteri.
Menses black, clotted.
During menses: diarrhœa and vomiting; bloody discharge from bowels; neuralgic pains in feet.
Violent metrorrhagia; delicate, small-built woman, æt. 47.
Leucorrhœa preceded by pain around navel.
Constant leucorrhœa.
Leucorrhœa: with tension of abdomen, without collection of wind; like white of egg, preceded by griping about navel; brown, slimy, after every urination.
Painless leucorrhœa.

[24] **Pregnancy. Parturition. Lactation.** During pregnancy: crumbling stool; feeling as if sprained in l. groin; hemorrhoids.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice husky. θPrevailing fever.
Hoarseness, with burning in larynx, afternoon; could scarcely speak.
Frequent hawking, with expectoration of small lumps of mucus, with sensation of rawness in throat, back of uvula.
Every branch of bronchial tubes affected to end. θPrevailing fever.
Constant hawking, groaning and crowing from a tickling in throat, with raising much mucus.

[26] **Respiration.** Worse when taking a deep breath.
Shortness of breath.
Heaviness of chest, when walking in open air.
Asthma when moving arms with force and when stooping.

[27] **Cough.** Many groups of symptoms are accompanied by cough.
Daily recurring, dry, rapid, suffocating cough, with inability to utter a single word during the paroxysms, attacks beginning at 6 P.M.; no sputa, but much water in mouth.
Cough deep and violent, attended by tolerably free expectoration. θPrevailing fever.

Digitized by Google

Cough: ‖dry, from tickling in throat; night or day; dry in morning, with stitches in chest or l. hypochondrium; becomes loose in afternoon; loose at night, with stitches in l. hypochondrium, lying on back; < when turning on side; < before eating or drinking cold things.

Expectoration of blood, following an itching in throat.

[28] **Inner Chest and Lungs.** ‖Bronchitis.

Heaviness on chest nights in bed, which awakes him, with restlessness; awoke again at 3 A.M.

Heaviness so great when walking she cannot breathe, must stand still.

Pressure, heaviness and stitches in chest, as if a morsel of food had lodged there.

Painful tension below r. breast.

Bruised pain in lower r. chest.

‖Lungs sore and paralytic. θPrevailing fever.

‖Burning at small spots in chest.

‖‖Beating, like a pulse, at a small spot in l. chest, only when standing, mornings.

‖‖In pulmonary affections, coldness between the scapulæ.

[29] **Heart, Pulse and Circulation.** ‖Soreness in l. chest.

Tearing in region of heart, going thence into l. forearm.

Pulse accelerated.

[30] **Outer Chest.** Burning, itching, red spots on l. chest, which pale under pressure.

[31] **Neck and Back.** Stiff neck, with pain from nape to between shoulders, when turning.

Tearing pains in sides of neck, alternating with tearing in cheek.

; A fatty swelling on neck, extending from ear to ear.

Small, painful, nonsuppurating tubercles on r. scapula.

Bruised and sprained pain between scapulæ.

Stitches in l. scapula.

Pinching in muscles of r. scapula.

‖Coldness in back and between shoulders, not relieved by feather or wool covering, followed by itching. θPulmonary affections.

‖Backache, especially at night.

Pain in small of back, as if bruised or crushed, during rest or motion, also at night, in bed; could neither lie on back nor side.

Stiffness in small of back.

‖‖Severe pain in lumbo-sacral region. θPrevailing fever.

[32] **Upper Limbs.** Swelling of axillary glands.

Rheumatic pain, first in r., then in l. shoulder joint.

Tearing in l. arm, as if in tendons, to fingers; ceases from strong motion.

Digitized by Google

Small, painful, nonsuppurating tubercles on r. scapula.
Stitches in r. scapula when inspiring.
Blisters on r. scapula, tensive and burning; scurf forms.
‖Right arm heavy and feels rigid.
Drawing and tearing, from r. elbow to fingers.
Itching on inside of forearm, with eruption in bend of elbow.
:Fatty swelling on l. shoulder, extending into axilla.
Right forearm heavy and as if "asleep."
Tearing in l. wrist, with swelling of back of hand.
Small blisters on wrist itching, then burning when scratched.
‖Pulsation in a finger like that from panaritium.
Stitches and painful beating under nail of l. thumb.
Skin peels off between thumb and forefinger of both hands.

[33] **Lower Limbs.** Languor and weakness of lower limbs, with dizziness.
‖Pain in l. hip, as if tendons were too short, must limp when walking; when sitting, gnawing pain in bone.
‖Tearing pain in front part of thighs, when sitting.
‖Drawing tension in legs when sitting or lying.
Restored mobility in knee, which had been swollen and stiff (child).
‖Stitches in knee joint, evening, when sitting.
‖Hamstrings painful when walking, as if too short.
Cramplike contraction in lower part of l. leg.
:Large buttocks.
Violent tearing and stitches, with ulcerative pain in heels; at times relieved by rubbing; occurs also at night, in bed.
Feet feel as if "asleep."
‖Cold feet, especially in evening in bed.
Itching in sole of r. foot: evenings.
Stitching in toes, coming slowly and going slowly.
Offensive sweat of feet.

[34] **Limbs in General.** Tearing and painful jerks, now here, and again there, through all limbs.
Tearing rheumatic pains in extremities.

[35] **Rest. Position. Motion.** ‖Has to walk crooked. θUterine displacement.
‖Cannot walk erect, on account of a pain as from a sprain in groins.
During rest: backache.
Lying: drawing tension in legs; chilly in evening.
Lying on ear: sensation as if something would come out.
Lying on back: loose cough at night with stitches in l. hypochondrium.
Cannot lie on back or side: with backache.

Digitized by Google

Walking: stitches in ears in open air; stitching and burning in r. hypochondrium; tearing and tension in groin; stitching and tearing in perineum; heaviness of chest in open air; heaviness on chest very great; must limp from pain in l. hip; hamstrings seem too short; ‖sudden prostration.
Motion: backache; increases sweat; pains in limbs better.
From exertion: heat and puffiness of face.
After rising: pressure in forehead.
Must rise: with stitches in spleen.
Stooping: stitches in head and splitting sensation; asthma.
Turning: pain from stiff neck to between shoulders.
Turning from back to side: cough with stitches in l. hypochondrium worse.
Sitting: stitches in spleen; stitches in r. groin; soreness up rectum; gnawing in l. hip bone; tearing in front of thighs; drawing tension in legs; stitches in knee.
Moving arms: asthma.
Must stand still: from heaviness on chest.
Standing: beating like pulse in l. chest.

[36] **Nerves.** Ebullitions with anxiety and weakness as if paralyzed.
Sudden prostration after dinner, when walking in open air.
Great weakness, mornings.
‖Prostration and great weariness.

[37] **Sleep.** Languor during day, with laziness.
Constant yawning without sleepiness, mornings.
Sleepiness early in evening, eyelids fall shut; > after candlelight.
Cannot fall asleep before midnight, on account of cold feet.
Heat in head prevents sleep before midnight.
Restless sleep, and waking after midnight.
Anxious, fearful dreams, starts out of sleep.
Dreams: of falling into water; of sickness; lascivious.
‖Wakes at 2 A.M. from violent cutting in abdomen.
Wakes at night: from sneezing, with tickling in throat, causing cough; pain in small of back.
Generally < after getting out of bed.

[38] **Time.** Worse after rising in morning.
Night: digging and tearing in r. ear; frequent and profuse urination; menstrual flow most profuse; cough loose; heaviness in chest; backache; tearing in heels, in bed; cold feet in bed; restless sleep, awakes frequently; chill from uncovering; sweating, most copious after midnight.
2 A.M.: awakened by cutting in abdomen.
3 A.M.: awakened with heaviness in chest.
4 A.M.: tenesmus vesicæ worse.

Digitized by Google

Early morning: sweating most copious.
Morning: irritability; heaviness of forehead after rising; eyes agglutinated; stitches in spleen; green diarrhœic stools; cough dry; beating in l. chest; great weakness; constant yawning and sleepiness; bruised pain all over after rising.
Night and day: dry cough; sweat.
All day: heaviness of forehead; languor and laziness.
Afternoon: burning and stitching in r. hypochondrium; hoarseness and burning in larynx; cough loose.
Twilight: burning of eyes.
6 P.M.: attacks of cough begin daily.
Evening: has most thirst; cutting and stitching in ossa pubium to back; stitches in knee when sitting; itching in sole of r. foot; sleepy early; chilliness; itching in various parts.
Midnight: cannot fall asleep till then from cold feet and heat in head.

[39] **Temperature and Weather.** A warm bath relieves.
Warm covering: does not relieve coldness in back.
Out-doors: mist before eyes worse.
Open air: stitches in ears when walking; heat of face passes off; heaviness of chest when walking; sudden prostration when walking.
In room: mist before eyes >; heat and puffiness of face when warm.
In bed: tearing in heels; cold feet; itching in various parts becomes better.
Uncovering: chilly at night.
After washing: burning in canthi.

[40] **Fever.** ‖Chilliness evenings, after lying down, and as often as she awakens; without thirst.
‖Chill, with external coldness in evening and from uncovering at night.
Chill running up back.
Chill alternating every half hour, with heat.
‖Chill and heat, ending with copious sweat; seventh day of typhoid.
Heat with red, puffed-up face, particularly in warm room, and after bodily exertion.
Thirst with heat.
Flushes of heat in frequent attacks, ending each time with sweat, which is most profuse in face, palms of hands, and soles of feet.
Sweat day and night, following heat.
‖Profuse night-sweat over whole body, most copious after midnight and early in morning in bed.
Sweat without thirst.

Digitized by Google

Sweat increased by every motion.
Sweat on lower part of body.

41 **Attacks, Periodicity.** Stitching pain in toes, comes slowly and goes slowly.
Septimani: chill and fever followed by profuse sweat every seventh day.
Daily: cough beginning at 6 P.M.
Chills alternating with heat every half hour.
Seventh day of typhus; chill and heat ending with copious sweat.
Flushes of heat ending with sweat in frequent attacks.

42 **Locality and Direction.** Tearing and jerking through all limbs change locality often.
Right: tearing in temple and side of face; itching pimples side of occiput; humming and roaring in ear; digging and tearing in ear; ear affected for years; burning and stitching in axilla, and in hypochondrium; pain from side of pubes to back; stitches in groin; painful tension below breast; bruised pain in lower chest; small tubercles, blisters, scurf on scapula; pinching in muscles of scapula; stitches in scapula when inspiring; arm heavy and rigid; tearing from elbow to fingers.
Left: stitches in temple and side of head; ulcerative pain in nostril; external swelling of nostril; bleeding from nostril; swelling of gums side of lower jaw; stitches in abdomen above hip; pain as if sprained in side of abdomen and groin; stitches and beating in spermatic cord; stitches in chest and hypochondrium with cough; beating at a small spot in chest; soreness in chest; red spots on chest; stitches in scapula; tearing in arm; tearing in wrist; stitching and beating under thumb-nail; pain in hip; contraction in lower part of leg.
Right and left: rheumatic pain in shoulder joint.
Diagonally: burning and stitching from scrobiculum to r. axilla.
Before backward: stitches in abdomen and groin.
Tearing from heart to l. forearm.

43 **Sensations.** As if brain was torn; as if head was split; as if occiput was screwed in; as if a body arose in l. eye which impeded sight; as if ear and throat were connected; as from a load in lower abdomen; as if abdomen would burst; swollen feeling in groins; as if a morsel of food had lodged in throat; blood seems to be in constant ebullition; a running sensation between skin and muscles.
Dull heavy pains: in head, with vertigo and pallor.

Digitized by Google

Pain: from r. side of pubes to hip and small of back; in lumbo-sacral region; in l. hip as if tendons were too short; in abdomen and back, with menses.
Stitches: in l. temple and side of head; in vertex when stooping; in ears; in submaxillary gland; in upper incisors; to l. temple, from swollen gums; in throat; in chest with hiccough or cough; in scrobiculum; in hypochondria; in spleen; in abdomen above l. hip; from pubes to small of back; in r. groin, coming out behind hip; in perineum; in l. spermatic cord; in l. scapula; in r. scapula when inspiring; under l. thumb-nail; in knee joint; and tearing in heels; in toes.
Stinging: in rectum.
Cutting: from ossa pubium to small of back.
Tearing pain: in r. temple and through r. side of face; in temples and occiput; in head, causing nausea; in r. ear; in bones of face; in groin; in perineum; from cardiac region into l. arm; in side of neck, alternating with tearing in cheek; in l. arm to fingers; and drawing from r. elbow to fingers; in l. wrist; in front part of thighs; and stitches in heels; through limbs.
Burning: of eyes; in canthi; of ears; in larynx; heat of face; eruption on face; of lips; in blister on tip of tongue; in scrobiculum; in r. hypochondrium; in rectum; at small spots in chest; red spots on l. chest; in blisters on r. scapula; in small blisters on wrist.
Smarting: in rectum.
Rawness: in throat, back of uvula.
Soreness: and tenderness of nose; of nose and nostrils; of mouth and lips; in throat; in a spot behind soft palate; in stomach; in groins; in rectum; itching in rectum; in lungs; in l. chest.
Pressure: in forehead towards root of nose; in throat when swallowing; and stitches in chest.
Bruised pain: in lower r. chest; between scapulæ; in small of back; in whole body in morning after rising.
Tensive pain: in articulations of jaw; in groin; below r. breast; in blisters on r. scapula; and drawing in legs.
Ulcerative pain: in l. nostril; in heels.
Gnawing: in stomach; in l. hip bone.
Boring and digging: in ears.
Pinching: in muscles of r. scapula.
Griping: about navel.
Contractive pain: in occiput.
Cramplike contraction: in l. hip; in hamstrings; in lower l. leg.
Sprained feeling: in l. side of abdomen; in groin; between scapulæ.

Digitized by Google

Lame feeling: in stomach.
Rooting and rolling: in r. ear as if something would come out; in stomach.
Neuralgic pains: in head; in feet.
Rheumatic pains: in head; in varices; first in r., then in l. shoulder joint; in limbs.
Heaviness: with fulness in head; in forehead; in lower abdomen; of chest; and rigidity of r. arm.
Fulness: of head; in throat; in stomach; in abdomen.
Empty sensation: in stomach as from fasting; in throat, with no desire to eat.
Pulsating: in submaxillary gland; in tonsils; in glands of neck; in breast near œsophagus; in l. spermatic cord; small spot in l. chest; in finger, like panaritium; under nail of l. thumb; in various places.
Drawing: in submaxillary gland; from r. elbow to fingers.
"Gone to sleep" feeling: in feet.
Itching: of scalp; pimples on r. side of occiput; in ears; in nose with sensation of a foreign body; of rectum; in throat, followed by expectoration of blood; red spots on l. chest; between scapulæ; on inside of forearm; in small blisters on wrist; in sole of r. foot; on various parts before going to bed.
Tickling: in throat.
Crawling: in throat, causing cough.
Coldness: between scapulæ; of feet.
Stiffness: in small of back.
Dryness: in throat.

[41] **Tissues.** ||Orgasm of blood.
|Produces an increased secretion of mucus; hence useful in catarrhs.
|Burning, rawness, on mucous surfaces; later formation of vesicles and ulcers.
||Tension in joints as from shortening of muscles.
:Fatty tumors.
:Obesity.

[45] **Touch. Passive Motion. Injuries.** Touch: l. nostril sensitive.
Pressure: with finger relieves pain in decayed tooth; red spots on chest become pale.
Scratching: does not relieve itching in ears; causes itching blisters on wrist to burn.
Rubbing: relieves pain in heels.

[46] **Skin.** Itching on various parts of body, generally evenings, before going to bed, > afterwards.
Fine rash over whole body, like measles.
Smallpox more on trunk and upper limbs.

Digitized by Google

Blisters on various parts, with tension, burning and formation of scurf.

[47] **Stages of Life, Constitution.** Suitable to those who are fat and sluggish; body fat, but legs thin.

[48] **Relations.** Similar to its relatives and to: *Ant. crud.* (mucous membranes); *Aloes* (abdominal symptoms); *Arsen.* (catarrhs); *Arg. nitr.* (mucus in throat); *Calc. ostr.* (fat people; coldness between scapulæ; profuse menses); *Conium* (night cough); *Caustic.* (stiff joints, contractions of muscles; burning hoarseness); *Carb. veg.* (hoarseness; burning on chest, etc.); *Coloc.* (in colic); *Hepar; Iodine; Kali bichr.* (stringy mucus, etc.); *Kali chlor.* (catarrh); *Kali hydr.* (pimples on back, etc.); *Mercur.; Merc. corr.; Magn. mur.* (especially bloody sputum; crumbling stool; atonic bladder); *Natr. mur.* (catarrh); *Nux. vom.; Phosphor.; Rhus tox.* (sprains; joints < sitting, etc.); *Seneg.* (fat people; mucous secretions; stitches in scapula with lung affections, etc.); *Sepia* (blisters about joints; atonic bladder, etc.); *Silic.; Sulphur.*

Aggravations from *Amm. mur.* are relieved by a hot bath.

Antidoted by: bitter almonds; *Coffea; Nux vom.*

AMMONIACUM.

Gum Ammoniac. *Umbelliferæ.*

A Persian gum obtained from Dorema ammoniacum, an umbelliferous plant. A drug famous since ancient times. Proved and introduced by I. G. Jahnel in 1837, proved again by J. B. Buchner in 1840, and by several others in 1847.

[1] **Mind.** Anxiety, with congestion of lungs.

Low-spirited; sluggish; drowsy.

Indisposed to mental work.

Intellectual labor prevented by headache.

[2] **Sensorium.** Aching in forehead with confusion of whole head, and such drowsiness that any effort or labor was impossible.

Forehead confused, with weakness of sight and heaviness in loins.

Confusion of head and sleepiness, with a sensation as if bruised in limbs, and pains in course of crural nerve.

[3] **Inner Head.** Pains throughout whole forehead; increasing all day till evening, preventing intellectual labor.

Digitized by Google

Severe headache continuing during night, preventing sleep.
Aching in forehead, with confusion of whole head, and such drowsiness that any effort or labor was utterly impossible.
Pressive pains in whole forehead, and over eyes.
Transient, stitching pains in l. temporal region.
Tearings in l. side of head.
Pressive pain in whole head, especially in supraorbital region and occiput.
Stitching pains through head.
Heaviness of the head.

4 **Outer Head.** Itching, mostly on border of hair in nape of neck.
Pimples on border of scalp.
Frequently returning knifelike stitches in middle of hairy scalp.
Stitching in occiput, on edge of hair; under hair pustules formed.
Numbness in occiput.

5 **Sight and Eyes.** ‖Stars and fiery points floating before his eyes.
Beams of light and sparks proceeding from eyes.
Candlelight surrounded by brilliant colored rings.
Glaring as from melted metal before eyes; sparks and streaks < in evening.
Sees things through a thick mist or a cloud of dust.
‖‖Dim sight after a blow on head.
‖Eyes fatigued from reading; they become injected and throb.
‖‖Dimness and obstruction of sight in evening, amounting almost to blindness.
‖He sees before him smoke, which, taking flight of small birds, forms a large circle and is most distinct at twenty paces, on a white ground. Generally smaller circles are present; in which case the smoke seems only an appendage to these circles. The appearance and motion of these circles depend upon the unsteadiness of the look and correspond to an appearance of congestion at internal corners of eye. The margins of the circles are always grey, and become black on sudden motion. On first looking at an object, circles appear above lens, but on looking steadily they sink to middle and remain floating there. They are clearer in clear weather and dimmer in dark weather. Sometimes he also sees a black spot which becomes larger as night advances. θAmblyopia, after a blow.
Daylight hurts his eyes.

Digitized by Google

Aching in upper part of eye.

[6] **Hearing and Ears.** Buzzing, roaring in ears, with hardness of hearing.

Pain in ears, with toothache.

Large secretion of earwax.

[7] **Smell and Nose.** ‖Mucous discharge from nose with frequent sneezing and mucous expectoration. θCoryza.

Dry nose on waking.

‖Constant motion of alæ nasi. θCongestion of lungs.

[8] **Upper Face.** Pale face, feels sick; frequent change of color.

Drawing in r. malar bone towards temple.

‖Dark face, anxious, parched look. θCongestion of lungs.

[9] **Lower Face.** Darting from region of lower jaw to interior of mouth.

[10] **Teeth and Gums.** ‖Toothache, pain extending into ear.

[11] **Taste and Tongue.** Insipid taste.

[12] **Inner Mouth.** Darting from region of lower jaw into mouth.

[13] **Throat.** Bitterish unpleasant taste in throat.

After swallowing, a sensation in throat as from a dry cough.

Sensation of sharpness and burning in throat and œsophagus.

‖Dryness of throat, most troublesome in morning, always increases by inhaling fresh air.

[14] **Appetite, Thirst. Desires, Aversions.** Want of appetite.

[15] **Eating and Drinking.** Belching after eating.

[16] **Hiccough, Belching, Nausea and Vomiting.** Disgust, with inclination to vomit.

⁝Vomiting and purging.

[17] **Scrobiculum and Stomach.** Aching in pit of stomach.

[18] **Hypochondria.** ⁝Induration of liver.

⁝Infarcts of liver, spleen and pancreas.

[19] **Abdomen.** Slight pains in belly with borborygmi.

Chilliness and wandering pain in abdomen, followed by an abundant mucous stool.

Dull, shooting, jerking pain in region of cæcum; < when turning on to r. side.

Pressure and heaviness in pubic region.

[20] **Stool and Rectum.** Constipation.

Abundant mucous stool, after chilliness and wandering pain in abdomen.

Stools sometimes fluid.

Fetid flatulence with papescent stool.

‖Chronic diarrhœa, with cutting pains, weakness, discharges bilious or mucous.

‖Summer complaint of children.

[21] **Urinary Organs.** After a few days many torulæ were formed in urine.

Digitized by Google

Lactate of urea much increased.
Burning in urethra.
Dribbling after urination.

[22] **Male Sexual Organs.** Heaviness and aching in pubic region.
Itching in pubic region.
Shooting and drawing in r. spermatic cord and penis.
Indurated testicles.
; ‖Hydrocele.

[23] **Female Sexual Organs.** Menotasia, dysmenorrhœa from obstructions in portal system.
; Irregular menstruation, amenorrhœa from chlorosis.

[25] **Voice and Larynx. Trachea and Bronchia.** Rough throat.
Tickling without cough.
; Chronic bronchitis.

[26] **Respiration.** Short, loud, accelerated breathing, with anxiety.
Oppression and stitches in l. chest, when inspiring.
‖Difficult breathing. θCongestion of lungs.
Oppression of chest relieved by raising tough phlegm.
; Spasmodic asthma.

[27] **Cough.** Mucous expectoration.
; Asthenic pulmonary complaints.
Promotes power of ejecting sputa if sick have not the strength.
Mucus tough, profuse and hard.
; Chronic pulmonary and bronchial catarrh, with nauseous thick fluid, puslike sputa.
; Large accumulation of purulent or viscid matter, with feeble or difficult expectoration.
‖Aged people suffer in cold weather from bronchial affections, with accumulation of mucus and much difficulty in raising it.

[28] **Inner Chest and Lungs.** Pressure in chest.
Dull and numb feeling in posterior part of r. chest, followed by pressure deep in.
‖Lungs congested; dulness on both sides; great difficulty in breathing and anxiety, constant motion of alæ nasi; face dark with anxious and parched look; no expectoration; with this an attack of asthma. θSuppressed eczema following vaccination.

[29] **Heart, Pulse and Circulation.** ‖Heart-beat stronger, but not more rapid; extends into pit of stomach; < in evening when lying down and when lying on back or l. side.
‖At night, when lying down, heart and arteries throb; eyes weary after reading; cannot get to sleep.

Digitized by Google

Pulse small, corded, quick and hard.
Pulse quickened, frequent and hard.
Pulse tense.

[31] **Neck and Back.** Weight and pressure in lumbar vertebræ, with stitches in loins during inhalation, and rheumatic pain in l. pelvis.

[32] **Upper Limbs.** Lancination in shoulder joints.
Left arm weak.
Rheumatic pain, as if bruised, most in elbow joint and l. wrist, with tearing in r. hand.
Pain in l. shoulder joint and arm.
Panaritium.

[33] **Lower Limbs.** Stitches in r. hip when sitting.
Stitches over hip when walking, he limps.
Cannot walk from pain in r. hip joint.
Darting pain in l. thigh along crural nerve.
Violent pain over knee when walking.
Knee swollen in evening, while sitting, with pinching in bend of joint.
Stitches in r. knee, in tibia and tarsal joint.
Gouty pain in l. big toe.
Itching on soles of feet.
Tingling in r. foot.
Pinching, tearing, drawing, burning in l. foot.
Swelling of toes.

[34] **Limbs in General.** Tearing pain in wrist and ankles, followed by swollen toes and fingers.
Tired feeling and heaviness in limbs, even after slightest exertion.

[35] **Rest. Position. Motion.** Lying down on back or on l. side: heart symptoms worse.
Turning on r. side: increases pain in cæcum.
Sitting: stitches in r. hip; knee swollen, pricking in bend of joint.
Walking; stitches over hip; pain over knee.
Cannot walk: from pain in r. hip joint.
After slightest exertion: tiredness and heaviness of limbs.

[36] **Nerves.** Uneasiness; weariness.
Hysteria with weakness.

[37] **Sleep.** Drowsiness all day, sleep full of dreams.
Drowsiness with headache, making labor impossible.
Gaping because stomach is empty, brings tears in eyes.
On awaking: nose, mouth and throat very dry.
On getting up in morning: lazy, drowsy and depressed in spirits.

[38] **Time.** Night: headache continues; heart and arteries throb.

Digitized by Google

Morning: dryness of throat <; lazy, drowsy and depressed on rising.
All day till evening: pain throughout whole forehead.
All day: drowsy.
Evening: glaring before eyes; sparks and streaks before eyes <; dimness of vision; heart symptoms <; knee swollen.
As night advances: sees a black spot. θAmblyopia.

[39] **Temperature and Weather.** Fresh air: inhaling it makes dryness of throat worse.
Cold weather: increase of bronchial troubles.
In clear weather, objects look clearer; in dull weather, dimmer. θAmblyopia.

[40] **Fever.** Chilliness followed by slight fever and headache.
A running chill from feet up over back.
Disposition to sweat.

[42] **Locality and Direction.** Right: drawing in malar bone; dull and numb, posterior part of chest; tearing in hand; stitches in hip; stitches in knee; tingling in foot.
Left: transient stitches in temple; tearing in side of head; stitches in chest; rheumatic pains in pelvis; arm weak; rheumatic pains in wrist, arm and shoulder joint; darting pain in thigh; gouty pain in big toe; pinching, tearing, drawing and burning in foot.
Below upward: running chill from feet up back.

[43] **Sensations.** Stitches: in l. temporal region; through head; in hairy scalp; in occiput on edge of hair; in l. chest when inspiring; in loins during inhalation; in shoulder joints; in r. hip when sitting; over hip when walking; in r. knee, tibia and tarsal joint; as from dry cough in throat after swallowing.
Lancination: in shoulder joints.
Darting: from region of lower jaw into mouth; in l. thigh along crural nerve.
Shooting: in r. spermatic cord and penis.
Tearing: in l. side of head; in r. hand; in wrist and ankles; in l. foot.
Cutting pain: with diarrhœa.
Sharpness and burning: in throat and œsophagus.
Drawing: in r. malar bone towards temple; in spermatic cord and penis; in l. foot.
Burning: in urethra.
Aching: in forehead; in upper part of eye; in pit of stomach; in pubic region.
Bruised feeling: in limbs; in upper limbs.
Pinching: in bend of joint; in l. foot.
Heaviness: of head; in loins with headache; in pubic region; in lumbar vertebræ; in limbs.

Digitized by Google

Itching: on border of hair in nape of neck; in pubic region; on soles of feet.
Tingling: in r. foot.
Numbness: in occiput; in posterior part of r. chest.
Dryness: of nose; in throat.
Chilliness: in abdomen with wandering pain.
Pain: in forehead; in course of crural nerves; in ears; in l. shoulder joint and arm; over knee:
Stinging, tearing, pricking pain, here and there, mostly in lower limbs.
Tired feeling and heaviness: in limbs after slight exertion.
Dull shooting jerking pain: in region of cæcum.
Toothache extending into ears.
Pressure: in chest; in pubic region; in lumbar vertebræ.
Rheumatic pain: in l. pelvis; in elbow joint and l. wrist.
Gouty pain: in l. big toe.
Pressive pains: in forehead; in whole head.

[44] **Tissues.** ⁞Hemorrhages.
⁞Causes abundant serous discharges.
⁞Dropsical complaints.
⁞Gout not developing in usual form of attacks, but disturbing general health.
⁞Scrofulous tumors or enlarged joints.

[45] **Touch. Passive Motion. Injuries.** ‖Blows with a stick over the head, followed by dim sight. θAmblyopia.

[46] **Skin.** Red rash over whole body.
After itching, little blisters like rash in typhus, but containing a yellow fluid; afternoon, violent fever with swelling of face, more like a red rash.
‖Suppression of eczema following vaccination. θCongestion of lungs.

[47] **Stages of Life, Constitution.** Man, æt. 26, fair haired, robust frame. θAmblyopia.
Aged people suffering during cold weather. See bronchial affections.

[48] **Relations.** Similar to its relatives: the umbelliferæ, especially *Conium* (glands, eyes, etc.); *Opoponax; Asaf.* (asthma); *Cicut.* (eruption in whiskers); *Galban.; Sagap.; Sumbul* (heart-throb too strong). Also: *Acon.* (heart); *Ambra* (asthma); *Arnic.* (traumatic amblyopia); *Arsen.* (heart; asthma); *Aurum* (congestion to eyes; heart; indurated testicle, etc.); *Bellad.* (eyes; heart; *Ammoniac* in asthenopia, stands between *Bellad.* and *Ruta.*); *Chelid.* (strong, but not quickened heart-throb); *Cotyl.* (strong heart-throb); *Fagopyr.* (strong throb of heart and arteries); *Iber.* (strong heart-beat); *Lycop.; Myrrh.; Natr. mur.* (asthenopia, eruption at nape, etc.); *Nitr. ac.* (See 27); *Oliban.; Phosphor.* (strong heart-throb;

eyes; asthma); *Pulsat.* (styes; heart < when lying on l. side); *Sulphur* (congestive palpitation and throbbing all over at night, etc.); *Seneg.* (asthma from mucus; heart-beat too strong, etc.).

Antidoted by: *Arnic.* and *Bryon.*

AMYGDALA AMARA.

Bitter Almond. *Rosaceæ.*

According to Wöhler and Liebig, the hydrocyanic acid, formerly supposed to be contained in the almond, is the result of the reaction of water on amygdalin, the characteristic constituent of bitter almonds.

The bitter almond is used for flavoring, and peach kernels and cherry seeds, which have similar properties, are often substituted.

The observations of Jörg, made in 1822, hardly deserving to be called a proving, were published in 1825. Regarding his trustworthiness, see British Quart., XVI, 693. These were added to a collection of symptoms from the Laurocerasus, the Aqua laurocerasi, and Hydrocyanic acid, and printed in Hartlaub's Mat. Med., in 1828. In 1844 they were printed separately in Noak and Trinks' Handbuch, with the addition of some toxic symptoms. Allen's Encyclopedia contains all, and a carefully made, almost complete collection of poisonings. We only miss Gazin, Traite Pratique, 1853. The experiments of Douglas Maclagan are with a different preparation.

[1] **Mind.** ‖ Loss of consciousness.

Stupor.

‖ Delirium, he mutters to himself and converses with persons not present; speaks incoherently.

Delirium with face lit up with an expression of excessive joy, eyes shine brilliantly, with quiet intermittent pulse.

Delirium with slight convulsions.

She commences to cry; t.

She suddenly raves and looks wildly around her, with dilated pupils and indistinct vision.

[2] **Sensorium.** Dulness of l. half of head.

Insensibility; drunkenness.

Excitement as after drinking champagne, succeeded by sudden insensibility.

‖ Syncope, face deathly pale, nauseated; pulse imperceptible; on reviving vomits some undigested food and bile.

Vertigo with nausea and dimness of sight.

Faintness and pallid look.

Stupor.

Digitized by Google

[3] **Inner Head.** Heaviness in forehead.
Pressure over eyes.
Sense of weight and oppression on top of head.
Congestion or turgescence of vessels of brain; t.
General effusion on both hemispheres; t.
Dura mater gorged.
[4] **Outer Head.** ‖Head drawn backward.
[5] **Sight and Eyes.** Dimness of sight with vertigo.
Sight confused.
Pupils very much contracted, size of a pinhead.
‖Pupils dilated and fixed.
Eyes rolling from side to side; half open, with dilated pupils.
Eyeballs directed upward, especially left.
Pupils dilated to their fullest extent, she cannot see distinctly.
Iris immovable.
Eyes almost protruding from their sockets.
‖Excessive brilliancy of eyes, even after death.
The eye had a ‖brilliant and glassy appearance throughout; mere physical brilliancy, ‖without mental expression.
Lid does not move when eye is touched.
Eyelids closed, both eyes drawn to l. side.
Eyes half shut and glassy.
Upper lids convulsed for hours.
[8] **Upper Face.** Face wears a natural expression, even with serious symptoms.
‖Face placid and deathly pale.
‖Mouth tightly closed.
‖Face very livid, lips separated, teeth clenched, eyes fixed and open, pupils dilated, features distorted, eyes turned upward, starting from their sockets.
Face lights up with an expression of excessive joy.
[9] **Lower Face.** Jaws firmly clenched in rigid spasm.
Lips pale and bluish.
Lips separated, teeth clenched, much froth about mouth.
[11] **Taste and Tongue.** Bitter taste in roof of mouth, palate and fauces.
Cannot speak a loud word.
[13] **Throat.** Bitter taste in fauces.
Swallowing impeded, or ‖impossible.
Rattling in throat.
Excessive burning heat in laryngo-pharyngeal region.
[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.
Nausea with pallor.
‖Vomiting of undigested food and bile.
[17] **Scrobiculum and Stomach.** A disagreeable sensation seems to come from epigastric region.

Digitized by Google

Pain and heat in epigastrium without tenderness.
Gastric mucous membrane red, ‖congested, especially at cardiac end; t.
Gastric mucous membrane pale with some red petechial patches along greater curvature; t.
Mucous coat of stomach softened; t.

[19] **Abdomen.** Colicky pains, abdomen distended like a balloon; convulsive movements of jaws, loss of consciousness, frothing at mouth.

[20] **Stool and Rectum.** Involuntary stools and micturition.

[21] **Urinary Organs.** Scanty and painful urination.
Involuntary micturition and stools.

[22] **Male Sexual Organs.** ⁞Gonorrhœa.
Gangrene of penis; scrotum bluish and greenish-yellow.

[25] **Voice and Larynx. Trachea and Bronchia.** Cannot speak a loud word.
Scratching in larynx, followed by copious phlegm all evening and next day.
Hoarseness.
Talking distresses her.

[26] **Respiration.** Difficult breathing.
Snoring breathing getting slower and slower.
Panting.
Chest heaved spasmodically; its movements were hurried.
Respiration slow and gentle.
Regular respiration had ceased; chest expanded at intervals by convulsive action.
Rolling and panting for breath.
Hurried and convulsive heaving of chest.
Chest expands convulsively at short intervals.
Respiration 12, regular, slow and prolonged, with rattling in throat.
‖Convulsive and at intervals very short respiration, with fear of suffocation.

[27] **Cough.** ‖Cough, with soreness of chest extending down to stomach.

[28] **Inner Chest and Lungs.** Great soreness of chest extending to stomach.
Stitches under l. nipple, going deep in, making exhalation more difficult.
‖Lungs congested.

[29] **Heart, Pulse and Circulation.** ‖Slow, full, hard pulse.
‖Pulse almost imperceptible.
Absence of radial pulse on either side.
Heart beats feebly.
Carotids beat full and quick.
Heart's palpitation extremely feeble, scarcely perceptible, absence of radial pulse.

Digitized by Google

Pulse: slow and vibrating; strong or frequent and wiry; rapid and feeble; quick and intermittent; 30, very feeble in carotid and radial arteries; 100, 130, 140, very small, thready.

Right side of heart gorged with dark fluid blood.

[31] **Neck and Back.** Considerable swelling and undulatory motion of jugular veins.

Carotids beat free and quick.

[32] **Upper Limbs.** Jactitation of arms.

[33] **Lower Limbs.** Knees flexed on abdomen.

Formication, staggering gait.

[34] **Limbs in General.** Limbs cold, heavy.

Extremities almost bloodless.

Spasms of limbs.

Weakness of limbs.

| | Limbs relaxed, | feet lifeless when lifted.

Limbs numbed, arms and hands cold and livid; with sleepiness.

Limbs supple and powerless.

[36] **Nerves.** Muscular power diminished or entirely lost, he is afraid of falling.

So weak as to fall down, lost control over muscles.

Spasms of limbs.

Convulsions; head drawn back; trismus, knees drawn up; scanty urine; opisthotonos.

Strong convulsive twitches of muscles.

Almost complete loss of motive power; cannot stand, limbs as if lifeless; or staggering gait.

Convulsions: eyes open, staring, fixed pupils, or with jactitation of arms.

Violent tetanic convulsions with complete opisthotonos.

Head and neck drawn backward, elbows drawn behind back and firmly fixed there.

| | Opisthotonos.

[37] **Sleep.** Deep snoring sleep.

Yawning.

Drowsiness and irresistible tendency to sleep.

Coma with stertorous respiration and involuntary micturition and stools.

[40] **Fever.** Body cold; surface cold, clammy.

Fever.

[42] **Locality and Direction.** Left: dulness in head; eyes drawn to side; stitches under nipple.

[43] **Sensations.** A disagreeable sensation proceeding from scrobiculum.

Pain: in epigastrium.

Stitches: under l. nipple.

Burning heat: in laryngo-pharyngeal region.

Digitized by Google

Soreness: of chest extending to stomach.
Pressure: over eyes.
Dulness: of l. half of head.
Numbness: in limbs.
Heaviness: in forehead.
Weight and oppression: on top of head.
Heat: in epigastrium.
Coldness: of limbs.

[44] **Tissues.** Venous system gorged with dark liquid blood.
Blood, muscles and bile of a violet color.
Congestion or turgescence of vessels of brain; general effusion on both hemispheres; dura mater gorged.

[46] **Skin.** Pallid skin.
Skin blue, bluish-red, especially scrotum.
Wheals over whole skin.
Urticaria febrilis.
Surface cold, clammy.

[48] **Relations.** Nearly identical with *Amygd. persic.*
Similar to its relatives, especially the *Pruneæ* and *Pomeæ* of the *Rosaceæ*, and to *Manihot util.*, *Chardinia xeranthemoides*, *Ximenia Americana*, *Ipomœa dissecta* and the *Agaricus Oreades*, all of which emit *Hydr. ac.* Also similar to: *Opium* (spasms, stertor, slow pulse, stupor, etc.,); *Hyosc.* (weeping, spasms, spasmodic twitching, etc.); *Stramon.*, *Bellad.*; *Tabac.*; *Ant. tart.*; *Laches.* and *Naja tri.* (heart).
Chewing the kernels prevents drunkenness from wine.
Amygd. amar. has dulness of l. half of head, *Hydr. ac.* of right.
Both *Amygd.* and *Laucroc.* have heaviness in forehead.
Amygd. amar. is antidoted by: *Opium* (convulsions), and by strong coffee, and in bad cases cold water may be poured over head.

AMYLENUM NITROSUM.

Nitrite of Amyl. $C_{10}\ H_{11}\ O,\ NO_3$.

Discovered by Ballard in 1884, proposed as a medicine by Guthrie in 1859, introduced into the Materia Medica of Old School in 1866. Introduced into our School in 1871. Proved by T. F. Allen and published in his Encyclopedia in 1874. Again proved by the Boston School and published by C. Wesselhœft in 1876, a first-rate proving, which could not be dispensed with. There are very few cures on record, mostly palliations of incurable cases; but it is of the utmost importance as regards euthanasia. Before going to press we received an excellent collection, through J. H. McClelland, by S. B. Chanter.

[1] **Mind.** ||Mental confusion and a dreamlike state. θEpilepsy.
A trancelike state, everything seeming unreal to her.
|Unconsciousness, with inability to swallow. θConvulsions of a child.
|Unable to do any business; head in a constant state of dull confusion. θAfter long-continued convulsions.
||Increasing sense of stupefaction, with flushing of face and scalp.
Flow of ideas becomes more lively.
|Frequent piercing shrieks. θChild in convulsions.
|Melancholy.
|Melancholy without sensation of anguish.
Actual fright at throbbing of head.
|Cannot sit still for fear of something dreadful happening.
Anxiety as if something might happen; must have fresh air.
|Haunted many times a day with an indescribable dread and sensation as of an oncoming fit, although it came on only once or twice a week. θEpilepsy.
From the slightest emotion flushing of face.

[2] **Sensorium.** |Dulness in head, and peculiar confusion. θHeadache.
Confused feeling after congestion to head.
Confusion of head with vertigo and drowsiness.
|Vertigo, headache and nausea on rising.
Giddy; drunken feeling.
|Dizziness.
|Heaviness of head.
|Dizziness with slight nausea, < when eyes are closed.

Digitized by Google

Produced so much giddiness and sensation of fulness in head that he preferred ether. θAngina pectoris.
Giddiness, confusion of mind, heaviness in head, headache and general weakness.
Giddiness, mental confusion and a dreamlike state.
Congestive state of head.
Great rush of blood to head and face.

[3] **Inner Head.** Dull heavy aching all through head.
Conscious of a dull headache for about three hours.
Headache in frontal region.
Severe dull heavy pains across forehead, without marked external heat.
Heaviness and pressure outward in forehead and temples.
When pain in forehead was <, pain in occiput was >.
Sense of fulness, pressure, tension and throbbing in temples.
Pain in r. temple.
Painful pressure outward in temples, < in l., with dull, heavy aching pain in occipital region extending to nape of neck, while walking.
Severe pain in temples, occiput and over eyes, with burning in stomach.
Visible pulsating in temples.
Headache on l. side, parietal region.
Hemicrania, especially where affected side looks pale in comparison with sound one.
A dull aching in cervical region, gradually moving to suboccipital region, during morning.
Sensation of something rushing upward and throbbing in vertex.
No pain in head is felt until some time after attack comes on, and it is then of a dull aching character in vertex, accompanied by unusual paleness of face and coldness of feet and hands.
Severe occipito-frontal headache, felt most in suboccipital region.
Pain in r. occipital region.
Dull pain in occiput.
Pain in occiput < in heat of room and from writing.
Constant occipital headache and aching across loins, < from fatigue.
Occipito-frontal headache, with aching in r. renal region.
Heat and throbbing in head; feeling of fulness to bursting.
A quick, somewhat sharp throbbing in head.
Throbbing headache with flushed face and confusion of mind.
Beating and throbbing in head and ears with constriction of throat and heart.

Digitized by Google

A sense of fulness and distension of head amounting at last to severe pain, and accompanied by intense flushing of face, starting perspiration on head, face and neck.

| Pressure in head, forehead and temples, with moist skin.

Severe pain accompanied with sense of distension of head.

Bursting sensation in head and ears as if all blood was rushing to head.

| Pain in head, with a stupid, drowsy sensation and burning in stomach and up throat.

⁝ Hemicrania or sick headache; pain most violent l. side.

‖ Sick headache.

Outer Head. | Oppression in fronto-parietal suture, extending to frontal bone.

| Redness and heat of head, face and neck, with violent throbbing in top of head and carotids.

| Intense crushing pain upon head, which seemed to gather into a feeling of confusion, threatening for a moment to make him unconscious.

Visible pulsation in temples.

Temporal artery protruding, hard, pulsating audibly.

| Sensation as though scalp was jerked forward from occiput towards forehead, ceasing just before it reached that point, repeated several times.

Heat and perspiration of head, face and neck, while hands and feet are very cold, which continue so for hours.

‖ Head would first fall to one side, then to the other.

Sight and Eyes. If the eye is fixed on a spot or a blank wall, the spot itself with the surrounding surface appears of a yellowish hue, the yellow circle being encircled by a violet blue halo, with undulating lines at the edge.

Objects appear pea green or yellow.

| Slight blurring of letters when reading.

Everything appears as if trembling, wavering.

‖ Aching pains in eyes in sunlight, with profuse running of tears, followed by sneezing.

On closing eyes: dizziness <.

| Pain back of eyes on looking at near objects.

| Dimness of sight.

Pupils dilated.

| Dull heavy pressure over eyes, as if a heavy weight was within.

| Pain over both eyes.

‖ Ciliary neuralgia; eye injected; face or cheek suffused.

‖ Sudden smarting of conjunctivæ with injection of both eyes, with dimness of vision, as if caused by a film.

Conjunctivæ smarting and bloodshot.

The eye shines.

Google

Eyes glazed, protruding with a staring look and immovable. θChild in convulsions.
‖Eyes protruded, staring.
‖‖Exophthalmic goitre.
|Sudden sharp pain under l. eye.
Twitching under outer l. canthus.
|Twitching and creeping under l. eye, momentary.
Arteries of optic disc small, but veins enlarged and tortuous.

[6] **Hearing and Ears.** Throbbing in ears; bursting sensation as if membrane would be forced out with each beat of heart.
‖‖Burning of ears.
Heat in l. ear.

[7] **Smell and Nose.** |Constant desire to sneeze.
|Numb feeling of nasal bones lasting several hours.
|Slight nosebleed from l. side, about an hour after inhalation, very unusual with him.

[8] **Upper Face.** Features show more vivacity.
‖Neuralgia of fifth pair.
|Creeping sensation in r. cheek below malar bone, which was momentary.
|Creeping in l. cheek.
‖Intense surging of blood to face and head, heat and redness; feels as if blood would start through skin, with lachrymation.
|Face flushed scarlet and hot.
‖Face and even back of hands deeply reddened.
‖‖Face flushes at slightest emotion. θClimaxis. θHeart disease, etc.
‖‖Intense redness of surface with great subjective feeling of heat in face and head.
‖Left side of face and l. ear get intensely red, coming suddenly and disappearing suddenly during intervals of attacks of headache; most after mental symptoms.
‖Intense redness and heat in face, often with a sensation of giddiness.
|Intense glowing of face, with general sweat, most marked in palms of hands.
‖‖Burning sensation in face.
|Burning of r. cheek, extending up into eye and around to r. ear.
Intensely hot and red face; on passing off face paler than usual.
Turned deadly pale, felt very giddy, became partially unconscious for ten minutes.
‖Left side of face pale and haggard. θHeadache.

Lower Face. |A smacking of lips as if in act of tasting.

Digitized by Google

| A short munching movement of lower jaw, which was depressed and elevated as if in act of chewing.

[12] **Inner Mouth.** Mouth dry, throat sore.

[13] **Throat.** | Awoke at 5 A.M. with an extremely dry, parched sensation in throat and mouth; arose to rinse mouth with water; marked stiffness and dryness of lips.

As if a vapor spread from throat through her head, rendering her quite powerless for one or two seconds.

| Sore throat.

Feeling of constriction in throat.

‖ Choking feeling on either side of trachea, along carotids; feeling of constriction.

‖ Inability to swallow, with unconsciousness. θ Child in convulsions.

| Heat in head and along œsophagus to stomach, lasting thirty minutes.

Tickling in throat.

| Left tonsil swollen and inflamed.

Catarrh and dysphagia (sequelæ of a recent attack of diphtheria) entirely relieved during action of drug, but returned after its effects had passed off.

‖ Collar seems too tight; desires to loosen it.

[14] **Appetite, Thirst. Desires, Aversions.** | Loss of appetite.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖ Hiccough.

| Eructation.

| Nausea, with dryness in throat.

| Great nausea.

Nausea and uncomfortable feeling in stomach.

Nausea and heat in stomach, with pains.

| Slight nausea, followed by inclination to vomit.

[17] **Scrobiculum and Stomach.** | Crampy pains in epigastric region.

‖ Fulness and pressure in stomach, with belching.

‖ Cardialgia.

| | Hot burning sensation in stomach, with empty belching.

| Heat principally in stomach, moist skin.

Burning in stomach and up to throat; nausea.

[18] **Hypochondria.** | Sense of oppression near liver.

[19] **Abdomen.** | Crampy, colicky pains in umbilical region and abdomen, increased when lying down.

| | Rumbling in bowels.

| Slight distension of abdomen, with dull pain.

[20] **Stool and Rectum.** | Bowels moved at 7.40 A.M. with rumbling, followed by a feeling of emptiness.

[21] **Urinary Organs.** Urine, sp. gr. 1012, 1014.

| Urine clear, acid, sp. gr. 1014; free from albumen and phosphates.

| Light cloud of an oxalate and distinct traces of sugar.

Digitized by Google

Urine clear, free, acid, sp. gr. 1016, saccharine.
Urine clear, acid, sp. gr. 1020, trace of oxalate and sugar in marked quantity.
Increased flow of urine which contains an abundance of sugar.

[23] **Female Sexual Organs.** Contraction of muscles in lower part of abdomen, as though they were all being drawn together over region of uterus.
Region of uterus, fallopian tubes and ovaries felt very hard on pressure.
During catamenia most violent l.-sided headache, beginning in morning; most violent at noon, lasting till evening, with frequent vomiting.
Neuralgia during catamenia.
Chronic blushing in climacteric years; blushing with disease of r. heart in male.
Nervous dysmenorrhœa.

[24] **Pregnancy. Parturition. Lactation.** Convulsions occurring immediately after delivery.

[25] **Voice and Larynx. Trachea and Bronchia.** The feeling of constriction in throat extended to chest, and produced dyspnœa and asthmatic feeling in larynx and trachea, with desire to eructate.

[26] **Respiration.** Inhalation followed immediately by dizziness and nausea.
After inhalation: blood is forced up to head; redness of face, later very pale, more than usual. θ Headache.
Pains at times accompanied by sinking respiration.
Very deep, not more frequent breathing.
Oppressed, difficult and rapid breathing.
Hastens and deepens breathing.
Two or three full inspirations were succeeded by one of extreme depth, accompanied by depression of lower jaw and elevation of ribs and scapulæ.
Breathing panting in trancelike state.
Choking feeling in throat and chest.
Increasing dyspnœa, with sneezings, nasal catarrh and sighing respiration.
Could hardly breathe for about a minute.
Cardiac dyspnœa with extreme anasarca, due to a dilated and hypertrophied heart.
Asthma; arrests paroxysm, yet on cessation of effect dyspnœa returned.
Dyspnœa, constriction of throat and heart; driven by actual fright to window for fresh air.
Feeling of suffocation from palpitation of heart.
Dyspnœa and asthmatic feeling in larynx and trachea.
Suffocation and cough in paroxysms of several minutes. θ Disease of heart.

Digitized by Google

[27] **Cough.** Slight breathlessness and cough.
| Sensation in throat producing a desire to cough, similar to that produced by fumes of a burning match.
|| Some inclination to cough.
|| Bronchial irritation, cough.
| Hacking cough five minutes after inhalation, repeated forty-five minutes after.
: Whooping cough.

[28] **Inner Chest and Lungs.** | Slight, dull, aching pain in r. chest, more severe after awhile.
|| Commotion in chest.
| Peculiar sensation in r. lung or chest.
| Drawing pains in l. side, between seventh and ninth ribs, short but frequent.
| Feeling as if a band was drawn tightly around chest.
| Sense of oppression in chest, < at lower part of sternum, < on going down-stairs.
| Feeling as if weight was on sternum.
| Oppression of chest on walking about.

[29] **Heart, Pulse and Circulation.** || Angina pectoris.
▮ Præcordial anxiety.
▮ Cardiac oppression and tumultuous heart action.
|| Anxious feeling in præcordial region with faintness and oppression of head.
| Stitching pains in cardiac region and feeling of constriction (no palpitation).
| Aching and constricted feeling about heart.
|| Violent beating of heart and throbbing of arteries with a sense of constriction.
The aching and constriction of the heart continued more or less for at least three weeks, when it was relieved after taking *Cact. grand.*
| Depression of heart's action.
| Sharp pain in region of heart < by belching, several days.
| Pain in l. side, in region of heart, extending around to back.
|| Quicker circulation.
Rapid dilatation of arteries, with quickened but weakened circulation.
Relaxes whole arterial system, greatly reducing arterial pressure.
Great dilatation of arterioles.
Causes a dilatation of capillaries, especially of head.
|| Violent pulsation of carotids.
Visible arteries, like the temporal, often become notably large, sometimes doubled in size.
▮ Sudden beating of carotids, which extends to head and

Digitized by Google

temples, accompanied by intense flushing of face, which precedes debilitating perspiration.

‖Throbbing of heart and carotids, felt as high as ears. θAngina pectoris.

Accelerated heart's action, with increased cardiac pulsations.

‖Fluttering at heart on slightest excitement.

‖Violent palpitation.

‖Tumultuous action of heart, with great præcordial anxiety and quick respiration. θDisease of heart.

‖During paroxysm of cough pulsations of heart could not be counted, neither was it possible to count radial pulsations. θDisease of heart.

‖The irregular rumbling sound of heart could be perceived almost instantaneously to change into a more regular pulsation. θDisease of heart.

‖The heart gave one strong beat, and from the state of agony the patient passed to one of perfect repose and peace. θAngina pectoris.

‖Aortic insufficiency with excessive hypertrophy of heart; with severe frontal headache.

Pulse slow and very strong, then quicker and jerking, accelerated.

|Beating of pulse distinctly felt in fingers.

|Pulse accelerated, full and hard.

‖Pulse slightly quickened. θAngina pectoris.

Quickens pulse in a very variable degree.

|Pulse increased about twelve beats in minute, but could not count it at once owing to confusion of head.

|Pulse rose twenty beats, remaining a few minutes, gradually coming to normal standard.

Pulse increased in number of beats, but not in force.

|Pulse not accelerated but irregular in action, almost impossible to count.

‖Increase of pulse by 20 to 30 beats in a minute, during which tension of radial artery is much diminished.

|Pulse, sitting: 78 to 84, feeble; 66, regular, feeble; 68, small, feeble.

|Pulse before taking it, 83, in 25 minutes, 63, in 2 hours, 73, not returning to usual state till two days after.

In some pulse sank below average, in most it rose higher, became fast, full and hard.

The sphygmograph pulse-curve ends abruptly in a very sudden downfall.

|As the pain in arm increases, the curve of the sphygmograph becomes lower, both the ascent and the descent more gradual, and dichrotism disappeared. θAngina pectoris.

Google

If blood does not flow after cupping, the cuts immediately begin to bleed freely after inhaling it.

[31] **Neck and Back.** ‖Twinges near dorsal vertebræ.
|Pain and weakness in lower lumbar region.

[32] **Upper Limbs.** |Slight discomfort in r. shoulder.
|Lameness in r. scapula.
‖Soreness in r. arm and shoulder.
|Lameness of flexor muscles of r. arm.
‖Severe præcordial pain, extending to r. arm. θAngina pectoris.
|Pain and stiffness in r. arm, most near wrist, < from motion; effort of bending arm or of writing very painful.
|Drawing, tensive pains in wrist and finger joints of l. hand.
‖Veins of hands dilating to double the previous size.
‖Hands trembling and grasping at imaginary objects. θChild in convulsions.
‖Hands tremble.
‖Tremulousness of hands and stiffness and slight numbness of fingers.
|Pulsations distinctly felt in tips of fingers.
|Profuse sweat on hands.

[33] **Lower Limbs.** |Stiffness in lower limbs.
|Rheumatic pains in l. knee and leg.
|Sharp pains in l. calf.
‖Cold feet, sometimes cold hands.

[34] **Limbs in General.** Pain and stiffness in upper and lower limbs.
‖Weakness in limbs.
‖Lameness and soreness in muscles of arms and thighs.
‖Tired feeling of limbs.
Stiffness and pain in r. side of neck and r. shoulder, extends down r. arm to wrist, neuralgic or rheumatic.

[35] **Rest. Position. Motion.** ‖The slightest exertion brought on intense pain. θAngina pectoris.
|After rising, sneezing violently three times.
Suboccipital and loin aching, < by fatigue.
|During and after a walk of a mile (two hours after inhalation) heaviness and pressure in head and oppressed breathing remain, passed off two hours later.
‖Least exertion or excitement may bring on "heats."
|Violent exercise during one minute produced a dull headache.
|After exercise heart beats more violently.
‖Weak, emaciated, walking with tottering gait, inclining to go to one side when walking. θAfter long-continued convulsions.
Cannot sit still.

Digitized by Google

On rising: vertigo, headache and nausea.
Worse from motion: pains and stiffness in r. arm; pains in dorsal surface of r. hand.
Worse from writing: pain in occiput.
Worse on going down-stairs: oppression in chest.
While walking: painful outward pressure in temples, and pain in occiput; oppression of chest.

[36] **Nerves.** | Great restlessness and uneasiness.
| Trembling sensation all over.
| Trembling of limbs with feeling of weakness.
‖ Every muscle seems to be in motion. θChorea.
Epileptiform spasms.
‖ Convulsions. θA child.
⋮ Eclampsia.
‖ Epilepsy.
‖ On occurrence of aura or before onset of fit (inhalation). θEpilepsy.
‖ Tetanus.
‖ Succession of fits, linking together by intervening unconsciousness, fits recurring with increasing frequency, till at last no sooner is one fit ended, or before it has finished, another begins. θStatus epilepticus.
‖ After an extensive burn, violent acute tetanus, beginning fourth day and advancing rapidly in forty hours, temperature 102, pulse 133, breathing 32 in minute, marked opisthotonos, trismus, horrid tetanic grin; swallowing interfered; five drops inhaled twice a day, in forty-six days restored, having inhaled one ounce.
| General lassitude, did not feel like doing anything.
| | Relaxed feeling in all muscles and heaviness, most when rising, with an uncertainty.
| | General weakness with a tendency to sweat easily on slight exertion.
‖ Weak feeling all over.

[37] **Sleep.** ‖ Yawning, profoundly and repeatedly in coma during an unconscious state. θStatus epilepticus.
| | Drowsiness.
| | Sleep restless, full of anxious dreams.
Restless, awakes with pains in temples, stomach, etc.
‖ Sleep often much broken, waking with frequent starts, feels unrefreshed in morning. θFlushings.
| Frequent waking, with severe pain in temples, stomach and bowels.
| On awaking pains returned with increased intensity, most in spine, lungs and conjunctivæ, with shifting pains caused by movement on dorsal surface of r. hand, l. patella, and from l. thumb to axilla, with catarrhal symptoms and severe fronto-orbital cephalalgia.

Digitized by Google

[38] **Time.** ‖Hemicrania beginning in morning, most violent at noon, lasting till evening.
|Many symptoms returned with varying intensity during day.
||Most marked during evenings.
Restless in night.
‖Flushes sometimes occur chiefly at night.
At 5 A.M.: awoke with parched sensation.
At 7.40 A.M.: bowels moved.
Morning: aching in neck and occiput.

[39] **Temperature and Weather.** |Warm room causes dull pain from temple to occiput, < l., for two or three hours.
Must have fresh air.
|All symptoms > by exercise out-doors.
||Cold water and air relieve symptoms.
‖Open their clothes or remove greater part of bed-covering and throw open window in coldest weather.
‖Severe burning sensation over loins followed by sweat, burning so unendurable that she was constrained to open window at night even in Winter, sometimes to rush out of doors; for three years several times daily.

[40] **Fever.** ‖Frequent chilly crawlings over whole body, face pale all day.
|Cold chills running down back, during sweat.
|Slight chill crept over back and sides after heat and moisture.
Sometimes warmth and sweat affect whole surface, or while surface glows hands and feet may become very cold.
‖Flushings occasionally, peculiarly and abruptly limited, reaching to thighs, knees or elbows, while all parts above it feel burning hot, parts below feel icy cold. θClimaxis.
‖After heats pass away skin sometimes becomes cold and clammy, and may turn very pale.
‖Dry heats.
‖Flushings or "heats," starting from various parts, as face, epigastrium, etc., thence spreading over greater part of body.
‖Heats are followed by sweatings, often very profuse.
‖Heats with great throbbing throughout whole body, and followed by much prostration, seeming scarcely able to rouse herself.
|Hands moist, head and body warm, especially abdomen, later greater warmth in chest.
|Though not warm, sweat started freely.
|Skin moist, free sweat during moderate exercise.
General sudden perspiration with great debility.

Digitized by Google

Lowers temperature by checking oxidation.
Reduces animal heat.

42 **Locality and Direction.** Outward pressure: in forehead and temples.
Right to l. cheek and to l. eye.
Right: pain in temple; in occipital region; aching in renal region; creeping sensation in cheek; burning of cheek extending into eye and ear; heart affected; pain in chest; peculiar sensation in lung; lameness in scapula; soreness in and around shoulder; pain and stiffness in arm; præcordial pain extending to arm; stiffness and pain inside of neck and in shoulder extending to arm; pains in dorsal surface of hand.
Left: headache; outward pressure in temple; sharp pain under eye; twitching pain under outer canthus and creeping under eye; heat in ear; nosebleed; creeping in cheek; flushing of face and ear; face pale and haggard; tonsil swollen and inflamed; headache during catamenia; drawing pains in chest; contraction of heart; pains in cardiac region; drawing tensive pain in wrist and finger joints; rheumatic pain in knee; sharp pain in calf.

43 **Sensations.** As of something rushing upward and throbbing in vertex; fulness to bursting in head; quick, sharp throbbing in head; as if all the blood was rushing to head; a stupid drowsy feeling; confusion threatening to make unconscious; as though scalp was jerked forward; as of a heavy weight over eyes; as if membrane in ear would be forced out with each beat of heart; as if blood would start through skin of face; as if a vapor spread from throat through head; uncomfortable feeling in stomach; peculiar sensation in r. lung or chest; as if a band was tightly drawn around chest; as if a weight was in sternum; anxiety in præcordial region; discomfort in r. shoulder.
Pain: in r. temple; in r. occiput; in occiput; back of eyes; over eyes in region of heart; in lower lumbar region; in r. arm, near wrist.
Dull pain: in occiput.
Sharp pain: under l. eye; in region of heart.
Stitches: in cardiac region.
Twinges: near dorsal vertebræ.
Rheumatic pains: in l. knee and leg.
Burning: of ears; in face; of r. cheek; in stomach and up throat.
Smarting: of conjunctivæ.
Soreness: in r. arm and shoulder; in muscles of arms and thighs.

Digitized by Google

Aching: all through head; in vertex; in eyes; in cervical region; across loins; in r. renal region; in r. chest.
Soreness: of throat; of extensor muscles.
Drawing: in l. side; in l. wrist and finger joints.
Pressure: in head; over eyes; in forehead and temples, outward; in stomach; on sternum.
Crushing pain: upon head.
Tension: in temples; in l. wrist and finger joints.
Constriction: of throat and heart; of abdominal muscles, over uterus.
Choking feeling: from throat to chest; on either side of trachea, along carotids.
Crampy pains: in epigastric region; in abdomen; in umbilical region.
Twitching: under outer l. canthus; under l. eye.
Distension: in head.
Bursting sensation: in head; in ears.
Throbbing: in head; in temples; in top of head; in ears; in carotids; of heart; in tips of fingers.
Fulness: in head; in temples; in stomach.
Dull heavy pains: across forehead; in occiput.
Heaviness: of head; in forehead and temples.
Oppression: in fronto-parietal suture; near liver; in chest; at lower part of sternum.
Lameness: in r. scapula; in flexor muscles of r. arm; in muscles of arms and thighs.
Tired feeling: of limbs.
Weakness: in lower lumbar region; in limbs.
Creeping: under l. eye; in l. cheek; in r. cheek below malar bone.
Numbness: of nasal bones.
Stiffness: of lips; in r. arm near wrist; in lower limbs.
Heat: of head, face and neck; in l. ear; along œsophagus; in stomach.
Parched sensation: in throat and mouth.
Dryness: of mouth; of lips.
Coldness: of hands and feet.
Tickling: in throat.
Tingling sensation: in different parts of body.
Subacute smartings in præcordial region, then in renal region, then in r. axilla, then of midsternum, then in lumbar region, then in lower lobe of r. lung, at apex of heart and in lower lobe of r. lung, with tenderness on pressure.
The smartings changed position rapidly, being most persistent in eyes, basis of lungs and spine.

" **Tissues.** Intense surging of blood to face and head; later veins turgid.

Digitized by Google

‖‖Rapidly dilates arteries and quickens but weakens circulation.

Venous and arterial blood are of same hue.

‖Rigidity of muscles of limbs. θChild in convulsions.

‖Weak and emaciated. θA man after convulsions.

A green spot at point of subcutaneous injection.

Quantity of urine increased, and 2 per cent. of sugar in it.

[45] **Touch. Passive Motion. Injuries.** Collar feels too tight.

‖‖Seasickness.

[47] **Stages of Life, Constitution.** Nervous, sensitive women are far more powerfully affected by it than men.

‖A man, æt. 60, with enlargement and softening of heart caused by years of depression, care and anxiety; > only, but wonderfully.

[48] **Relations.** Ringer compares it with *Glonoine*, with respect to varying effect of even small doses on different persons, but the greatest similarity is the first accelerated and afterwards retarded pulse.

There is a remarkable correspondence between this remedy and the *Glonoine*, the first characterizing the Old School, the second ours.

In some cases more useful than 20, 30 gr. bromide of potassium taken daily. Old School.

Sometimes pain returns as soon as the effect of the drug passes away. θAngina pectoris.

In some cases it loses its effects and must be taken in increased quantities and at shorter intervals, even to an ounce a week. θAngina pectoris.

Two drachms a fortnight for a year still unfailing relief. θAngina pectoris.

Similar to: *Glonoine* (circulation of blood, congestion, etc.); *Acon.; Ether; Cactus* (constriction of heart; pulsations, etc.); *Nitr. dulc. spir.* (heart, lungs, etc); *Laches.* (flushes at climaxis; *Coca* (flushing when excited, as in company;) chloroform; *Bellad.* (neuralgia with red face).

Antidote in failure of respiration by chloroform; and to convulsions of strychnine.

Antidoted by: *Cactus* (cardiac constriction).

Digitized by Google

ANACARDIUM OCCIDENTALE.

Cashew Nut. *Anacardiaceæ.*

The common cashew nut of the West Indies. It is easily distinguished from our Anacardium which comes from the East Indies, by its being kidney-shaped, while the Oriental nut, our well-proved medicine, is heart-shaped. It was never proved and is only known by the frequent cases of poisoning which occur from peeling or roasting the nut. The kernel is edible, but it is advisable first to remove the germ between the halves.

The poisonous black juice contained between the outer and inner shell contains two peculiar principles, Anacardic acid and Cardol. Poisonings are frequently mistaken for Rhus poisoning.

The effects on the skin are mentioned by C. Hg. in Cl. Müller's Vierteljahrschrift in 1861, Vol. 12, p. 276. No cures on record excepting from Segin in Hygea.

[1] **Mind.** ‖Loss of will; cannot control voluntary muscles. θParalysis with imbecility.
‖Did not know his surroundings. θParalysis with imbecility.
‖Weak memory.
‖Difficult thinking.
‖Melancholy.
‖Hypochondriasis.

[2] **Sensorium.** ‖Apathy or anæsthesia.

[3] **Inner Head.** Tearing headache on l. side.

[4] **Outer Head.** ‖Head falls forward, difficult to keep it up. θParalysis and imbecility.

[5] **Sight and Eyes.** ⁝Scrofulous ophthalmia.

[6] **Hearing and Ears.** Swelling of ears with burning and itching.

[8] **Upper Face.** ‖Erysipelas over whole face (from applying juice to destroy marks).
Swelling of face with itching and burning; next night after handling nuts.
Applied to face to remove cuticle and produce a fresher and more youthful appearance.
Face so much swollen that for a time not a feature was discernible (in a lady exposed to fumes of nut while roasting).

[9] **Lower Face.** The juice corrodes lips and mouth.

[11] **Taste and Tongue.** ‖Cannot speak, only mutters unintelligible sounds. θParalysis and imbecility.

Digitized by Google

Painfully swollen tongue from handling nuts.

[12] **Inner Mouth.** ⁞Aphthæ.

[15] **Eating and Drinking.** Drinks run out of mouth. θParalysis with imbecility.

[20] **Stool and Rectum.** ⁞Dysentery.

[21] **Urinary Organs.** Increased urination.

[23] **Male Sexual Organs.** Stimulates sexual desire.

Testicles swelled when touched with hands after handling nuts.

[25] **Female Sexual Organs.** When during menses juice is applied, it causes erysipelas of face.

⁞Uterine complaints and dropsy.

[26] **Respiration.** ▮Respiration free. θParalysis and imbecility.

[29] **Heart, Pulse and Circulation.** ▮Pulse slow, moderately full, 60. θParalysis with imbecility.

[32] **Upper Limbs.** Large blisters filled with a yellow fluid are raised on hands, followed by desquamation.

⁞Warts.

[33] **Lower Limbs.** ⁞Corns.

[40] **Fever.** Temperature of body cool. θParalysis.

[42] **Locality and Direction.** Left: tearing headache.

Left to r.: red itching spots.

[43] **Sensations.** Tearing pain: in l. side of head.

Burning and itching: of ears and face.

[44] **Tissues.** ⁞Scirrhous swellings.

⁞Hard excrescences.

⁞Proud flesh.

[46] **Skin.** If hands are not washed carefully after handling nuts, they cause itching and painful burning swellings wherever they touch skin.

⁞Corroding or dry tetters.

Red itching spots like nettlerash, similar to that of *Rhus tox.*, spreading from l. to right.

Used as a vesicant it causes itching and burning; then gradual reddening and swelling, followed by vesicles which become pustular; these are large and flat at first and gradually become confluent and break; the epidermis peels off, but leaves surface swollen, hyperæmic and suppurating for days.

The juice is used on corns, warts, ringworms and obstinate ulcers.

[47] **Stages of Life, Constitution.** ▮A woman, æt. 70, lost two grown-up children who died in the insane asylum; ulcers on the leg and attacks of vertigo so that she fell from chair; a year ago had what was called an apoplectic attack. θParalysis with imbecility.

A lady, swollen face, from exposure to fumes when roasting nuts.

Digitized by Google

[48] **Relations.** Collateral relations: *Anac. orien.; Rhoes.*
Similar to: *Canthar.; Mezer.* (as a vesicant); *Crot. tigl.; Rhus rad.; Rhus tox.*
Antidoted by: *Rhus tox.*
The tincture of Iodine was found useful as a local application to parts affected.

ANACARDIUM ORIENTALE.

Marking Nut. *Anacardiaceæ.*

The nut of Semecarpus Anacardium; not identical with Avicennia tomentosa, as Hahnemann erroneously stated. It is imported from the East Indies, and if Schwabe, in his Pharmacopœia, recommends the soft resin of the seed for trituration, it is only to avoid too old and dry ones.

The common tincture of the whole nut was proved by Hahnemann and his original disciples, because it had been one of the most famous medicines in the old Arabian school, forgotten for nearly a thousand years.

The provings were arranged and published by E. Stapf, in the second volume of his Archives, in 1823. The next edition was made by Hahnemann, in his Chronic Diseases, in 1835, where he condensed the 484 symptoms of the first publication, and added (without having another prover) 158 new symptoms.

[1] **Mind.** ❙Everything appears as in a dream. θMelancholia.
Feeling as if spirit was separated from body.
❙Stupor.
❙Did not know those around her. θPalsy.
❙Memory and senses are affected.
In afternoon his memory is > than in forenoon, although his recollections only come to him after the time when he is in need of them; however, he easily remembers what he reads.
❙❙Weak memory.
❙❙Loss of memory. θMeningitis.
❙❙Loss of memory after general paralysis. θApoplexy.
❙Forgetfulness. θHysteria.
❙Forgets everything she has seen. θMania.
❙Her forgetfulness troubles her so much that she loses her appetite. θMelancholy.
❙After having caressed her husband or child she pushes them away from her, as if they were not what she supposed. θMelancholy.
He remembers with difficulty; he retains nothing in his memory; he is deficient in ideas and he soon loses his subject without being aware of it.

Digitized by Google

Cannot remember anything about his previous state. θImbecility.

A very intelligent man, æt. 60, after having been a few hours in his grapery, where powdered sulphur had been sprinkled, suddenly lost all power of recollection so completely, that even what had happened a few minutes or a few hours ago was gone from his memory, and he was quite imbecile. One dose *Anac.*, 2°, restored him very soon and permanently.

Memory quite useless, particularly for single names, mornings.

Weakness of mind.

Dulness of mind and inability to think.

Imbecility. θAfter apoplexy.

Idiocy. θAfter poisoning with stramonium seed.

Intellect remains weak or impaired after having passed through severe fevers, smallpox, etc.

From 9 to 10 P.M., first extreme excitement of fancy and projective ideas; later, by degrees, becomes dull and does not think at all.

Imagines he hears voice of mother or sister, who are far away.

Has a devil in his ear whispering blasphemous words.

Idea as if everything perceived had no reality, all things appear as in a dream. θMelancholy. θMania.

Thinks he is double.

Fixed ideas: that mind and body are separated; about redemption of soul and about the devil; that a stranger is constantly by his side; that strange forms accompany him, one to his right and one to his left.

Has the fixed idea that her husband is not her husband, her child not her child; now she fondles them and again pushes them away. θMania.

Hallucination; a demon sits on his neck and tells him most offensive things.

Delirous mania.

Disposed to malice, seems bent on wickedness.

Irresistible desire to curse and swear.

Talks constantly in senseless, stupid phrases.

Extreme merriment, laughs when he should be serious.

Continual talking of senseless twaddle. θAfter a grievance.

Strange temper, she laughs at serious and is grave over ludicrous occurrences.

Screaming and crying of infants. θFever.

Every five minutes he screams loudly, as if he would call someone. θRage.

Uses profane language, swears, thinks himself a demon.

Digitized by Google

Furious, has to be kept in a straight jacket.
Dull and stupid, fixed gaze. θImbecility.
Every motion extremely awkward and sluggish.
It is difficult to get an answer from him, it takes a long while; his answers are short and incomplete, but correct. θImbecility.
Disinclined to talk. θHeadache.
Estrangement from individuals and society, with fear of future.
Cannot be persuaded to do anything. θImbecility.
Aversion to work.
Sadness: looks on dark side of everything.
Low-spirited, disheartened. θDysmenorrhœa.
Melancholy. θAmenorrhœa. θAfter parturition.
Hypochondriac mood in forenoon, dejected and despondng, with foolish, clumsy actions.
Hypochondriasis. θHemorrhoids and constipation.
Anxiety: with wabbling sensation in epigastrium; with stupidity; with fidgety legs.
Anxious and hypochondriac, shuns people.
When walking he felt anxious, as if some one were pursuing him; he suspected everything around him.
Apprehensive of death being close at hand.
Fearfulness.
Fear of paralysis.
Inward anxiety and heat. θAngina.
Anxiety and feeling of impending misfortune.
Internal anxiety, which did not leave him any peace; he felt solicitous on account of every trifle, as if it would lead to some great trouble; with apprehension of future.
Despondency and fear of approaching death. θPertussis.
Anxiousness; despairs of getting well. θApoplexy.
He is very indifferent and unfeeling; neither agreeable nor disagreeable objects excite his interest.
He is separated from whole world and has so little confidence in himself that he despairs of being able to do that which is required of him.
Contradiction between reason and will. θHeadache. θPertussis.
Feels as though he had two wills, one commanding to do what the other forbids.
In one ear a devil, in the other an angel, prompts him to do murder or acts of benevolence.
Loss of will power. θAfter apoplexy.
Cowardice.
Morose and restless.
His great forgetfulness makes him very morose. θMelancholy after typhus.

Digitized by Google

Hypochondriac sullen mood.
‖Excessively peevish and ill-humored. θHeadache.
Extreme irritability.
Irritable, passionate and contradictory.
‖He takes everything in bad part and becomes violent.
‖‖Unsocial, complains of weak memory. θCoryza.
‖A slight offence makes him excessively angry, breaking out in personal violence.
Want of moral feeling; depravity, ungodliness, inhumanity, and hardness of heart.
Malicious, wicked and cruel.
‖Excited mood.
Dull insusceptibility.
‖Bad effect of mental exertion.
Exertion of mind brings on tearing pressing headache in forehead, temples and occiput.
Weeping relieves oppression of chest.
‖Melancholy after quarreling with her husband.
‖Consequences of fright or mortification. θLoss of memory.

[2] **Sensorium.** Overacuteness of the senses.
Senses less acute; lessening of sight, hearing, smell and taste.
‖Numbness and pressure in head, most when he exerts himself in writing. θApoplexy.
‖Dulness of head and pale face. θMania.
Feels dull and prostrated.
‖Weakness of special senses. θSequelæ of meningitis.
‖‖Weakness of all senses.
‖Dulness and confusion in head.
Vertigo: getting black before eyes; when walking; as if surroundings or self were tottering.
Sensation as if everything was moving around.
‖Vertigo on stooping and rising from stooping, as if he were turning round to l.; with vertigo dim sight.
‖Giddiness as if drunken, out-of-doors. θHeadache.

[3] **Inner Head.** Pressure: in forehead, mornings when awaking, and in evening.
‖Dull pressure as with a plug on upper border of r. orbit, extending into brain, with stupefaction of whole side of head.
Most headache in temples.
Violent pressure in temples.
‖Dull pressure, as from a plug, on l. side of vertex.
Constrictive headache in forehead, with very irritable mood, pains increase hourly; momentarily relieved by strong pressure; finally whole head affected; later whole head pains as if a tense band was reaching from nape of neck to ears; must lie down.

Digitized by Google

Pressing from temples toward eyes.
Stitches: over r. eye; in l. side of head.
‖Throbbing headache.
Hot head, with icy-cold hands and feet.
‖Digging and throbbing pains in r. side of head and along border of orbit; ‖‖relieved entirely when eating, ‖and when lying down in bed at night and when about falling asleep; ‖‖< during motion and work.
‖Stitches in brain. θPertussis.
‖Nervous headache. θHypochondriasis.
‖Pressive pain in top of head when coughing or taking a deep inspiration.
‖Pressing headache mostly in temples from without inward, with diminished sight and hearing; < a few hours after a meal, on exerting mind or stepping hard.
Tearing headache during hard labor.
Tearing throbbing in vertex.
Tearing and pressing in forehead and temples.
Tearing pain in occiput.
Throbbing in occiput.
Headache in occiput, < from making a misstep and from loud noise.
‖Congestion of blood to head, with pain in cerebellum. θPertussis.
Pressure: in r. side of occiput; from without, in jerks, spreading from forehead over whole head; from within outward; from forehead backward.
‖‖Gastric and nervous headaches.

[4] **Outer Head.** Tearing headaches extending into muscles of neck and throat.
Bending head backward, pain in occiput aggravated.
Violent itching of scalp.
Itching on forehead.
Many lentil-sized boils on scalp, with sore pain when touched or scratched.
Small pimply eruption on head.
Dry heat on whole head.
Baldness.
Many little boils on hairy scalp, very sensitive to touch, and about size of a flax-seed.

[5] **Sight and Eyes.** Great sensitiveness to light.
‖The light seems to have a halo around it.
Flickering before eyes during day, blind at night.
Optical illusions in dark colors.
Halo around light.
‖Pupils first contracted, later dilated.
‖Weakness of sight. θApoplexy.
‖‖Vision indistinct.

▮Weakness and dimness of eyes. θCoryza.
▮Blackness before eyes with vertigo.
▮Eyes sunken.
▮▮Shortsightedness.
After a half hour's sleep, every object appeared a long way off.
▮Objects appear too far off.
Stitches over r. eye.
▮Pain in l. eye with a twitching in it.
▮Strange, uncanny look. θMania.
Lachrymation with coryza; also with a contracting pain in nose.
Lids so swollen he could hardly see.
Eyelids felt swollen, but without pain.
▮Pressure as from a plug, on upper margin of r. orbit.
Pressure on eyeball from before backward, or from above downward.
Blue circles around eyes.

[6] **Hearing and Ears.** ▮Speaks of a devil who whispers blasphemy into his ear.
Humming in ears.
Roaring before ears.
▮Hearing at times very weak, at others very acute.
▮Hardness of hearing.
Sensation of obstruction, as from cotton or a plug in ear.
▮▮Want of ear-wax. θCoryza.
Otorrhœa.
Dragging pains with polypus auris.
Tearing or stitching pains in l. ear; < when swallowing.
Sore pain in ear when biting teeth together.
Itching in ears.
Painful swelling of external ear.
Ear inflamed with headache.

[7] **Smell and Nose.** ▮▮Worse from strong smells. θHeadache.
▮▮Sense of smell too acute. θCoryza.
Sensitive smell and bitter taste.
▮Illusory smell as of burning tinder, morning, when rising.
Constant smell before nose like pigeon or chicken dung, especially when smelling his clothes or his body.
▮Smell seems quite lost, though nose is not obstructed. θCoryza.
Nosebleed.
Feeling of dryness in nose.
▮▮Obstruction of nose; ▮of l. nostril. θCoryza.
Chronic coryza and discharge of mucus from nose.
▮Chronic dry coryza, with anosmia and a discharge of purulent phlegm.

Digitized by Google

‖Fluent coryza, with sneezing and lachrymation.
Red pustule in r. nostril on septum, with sore pain when touched.
‖Much sneezing and long-continued disposition thereto. θPertussis.
Irritation to sneeze with cough.

[8] **Upper Face.** ‖Strange expression in face. θMania.
‖Face disfigured, look wild, childish, without expression. θPalsy.
‖Tearing pains in face. θHeadache.
Violent burning in face.
Complains of heat in head and red cheeks, forehead cold.
‖Face red, more frequent pulse. θMania.
Heat in face with great prostration.
Paleness of face.
‖Pale, wan looking; blue rings around eyes. θHeadache.
White scaly herpes on r. cheek, near upper lip.
‖‖Strange expression. θMelancholy.
Face swelled, beginning from eyes.
‖Left side of face swollen and covered with small pocklike blisters.
‖Repeated tearing in r. side of face and neck. θFaceache.
‖Itching in face. θHeadache.
‖Acute eczema of face and neck, with redness and eruption of small blisters with intense itching.

[9] **Lower Face.** Rough, scaly skin around mouth, with crawling itching.
Burning dryness of outer border of lips, almost like from pepper.
Violent burning on chin.
Mouth twitches in sleep.
Small blisters on chin, discharging liquid when broken.

[10] **Teeth and Gums.** Tearing in teeth of l. side.
Toothache on taking something warm into mouth.
Toothache in one lower incisor, < by contact with tongue and open air.
Teeth of lower jaw seem most affected.
Swelling of gums.
Bleeding of gums upon slight rubbing.

[11] **Taste and Tongue.** Bitter taste in mouth after smoking tobacco.
Everything tastes like herring-brine.
‖‖Flat, offensive taste in mouth, and taste of food.
Taste lost.
Heaviness of tongue and sensation as if swollen; impedes speech.
‖Impeded speech. θApoplexy.
Speech firmer and surer in afternoon than forenoon.

Digitized by Google

‖Was unable to speak, and made only unintelligible sounds. θPalsy.
Tongue white and rough like a grater.

[12] **Inner Mouth.** ‖Fetid odor from mouth, without his perceiving it. θHeadache.
‖Painful vesicles in mouth.
‖Ulcers in mouth.
‖Water accumulates in mouth, until it provokes vomiting; also with violent thirst and red face.
‖Water flows together in mouth and runs out. θApoplexy.

[13] **Throat.** Roughness and scraping in throat.
Sensation of rawness in throat, during cough, after eating.
‖Firm tough mucus in fauces; raising it causes gagging and retching. θCoryza.
‖Suppuration of tonsils.

[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite and feverishness, with cutaneous symptoms.
‖The torturing forgetfulness makes her low-spirited, and she loses her appetite. θMania.
All food offensive and flat.
‖At times violent hunger, at others no appetite.
Constant thirst; yet drinking takes breath; must stop frequently during a draught.
‖Thirst during heat.
Thirst for milk with sweat all over.

[15] **Eating and Drinking.** Apt to "choke" when eating and drinking. (Verschlückern.)
‖Swallows food and drink hastily. θRage.
‖‖Symptoms disappear during dinner, but begin anew after two hours. θHeadache, dry throat, dyspepsia, etc.
‖Worse after eating: head, stomach and bowel symptoms; rough throat; nausea; pressure in liver; short breath; violent cough (after drinking); heartburn; flying heat over face.
Warm food causes toothache.
Sweat lessened while eating.
‖Weak digestion in hypochondriacs.
Hypochondriac mood after eating.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.
Eructations: empty; fluid, causing choking; with spasmodic pain in stomach.
Heartburn, after eating soup.
Burning rising from stomach to throat.
‖Nausea in morning, with empty feeling in stomach.
Nausea, with retching, returning soon after drinking cold water; vomiting of water with pain, as if œsophagus was distended by a large ball.
‖After cough vomiting of ingesta, which gives relief.

[17] **Scrobiculum and Stomach.** Sensation of fasting in pit of stomach, followed by pressure in stomach; < awaking mornings.
Stitch in pit of stomach during inspiration.
Rumbling and fermentation in pit of stomach.
❙Weak digestion, with fulness and distension of abdomen and hypochondriacal humor.
Spasmodic pain in stomach, with belching.
Every step shakes the stomach.
❙Catarrh of stomach, with drawing together and shooting pains.
❙Drawing pain in cardiac end of stomach on walking fast.

[18] **Hypochondria.** Stitches in hypochondria.
Pressure in liver.
Pain in spleen, with fever.

[19] **Abdomen.** ❙Pain around navel, as if a blunt plug was pressed into intestines.
Continual rumbling in abdomen, especially in umbilical region.
Pinching and griping in abdomen.
❙❙Bursting pain in abdomen. θPertussis.
❙Hardness of abdomen.
❙❙Faintlike weakness in abdomen and knees.
Fulness and distension of abdomen.

[20] **Stool and Rectum.** Stools of very pale color.
Stools mushlike, bloody, brown, liverlike; painless.
❙❙Great and urgent desire for stool, but with effort the desire passes away, without an evacuation; rectum seems powerless, with sensation as if plugged up.
Diarrhœa-like stools.
Summer complaint with stupor, thirst, vomiting, fever.
❙Frequent profuse hemorrhage when at stool. θHemorrhoids.
Itching at anus.
Moisture from rectum.
❙Inactivity of rectum, even soft stool is passed with difficulty.
Unsuccessful urging to stool.
❙Painful hemorrhoidal tumors.
Internal piles, especially if fissured.

[21] **Urinary Organs.** Constant desire to urinate.
Frequent urging, with but small discharge.
Urine: clear as water; turbid when passed, deposits a dirty sediment; when shaken urine looks clay colored; passed involuntarily.
❙Frequent urination at night. θApoplexy.
Prostatic juice with even a soft stool; also after urinating.

Digitized by Google

[22] **Male Sexual Organs.** Violent sexual desire.
Erections during day.
Seminal emissions at night, without amorous dreams.
Want of enjoyment during coitus.
Cutting pain along penis.
Voluptuous itching of scrotum, exciting sexual desire.
Burning in glans before and after urinating.

[23] **Female Sexual Organs.** Pain in abdomen with pressing in uterus.
Menses scanty but frequent. θDysmenorrhœa.
Spasmodic pains deep in abdomen. θDysmenorrhœa.
Leucorrhœa, causing soreness and itching.

[24] **Pregnancy. Parturition. Lactation.** Nausea during pregnancy, < before and after, but better while eating.
Much loss of blood after an abortion.
Melancholia after childbed.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice hoarse and deep, with roughness in throat.
Talking excites cough.
Pressure or aching near larynx.
Pressure in pit of throat.
Rattling in windpipe when lying on side.

[26] **Respiration.** The breath has a bad odor.
From breathing deeply or coughing: pain in vertex.
Shortness of breath, oppression in region of sternum.
Anxiety in region of sternum, without pain; feels as if he must go into open air and busy himself.
Loss of breath on beginning to cough.
Oppression of chest, with internal heat and anxiety driving him into open air.
Attacks of suffocation. θPertussis.

[27] **Cough.** Excited by: talking; tickling in trachea.
Cough worse, not while eating, but after eating, with vomiting of food.
Cough worse after meals. θApoplexy.
Paroxysms every three or four hours; more violent every other or every third day.
Violent cough, with loss of smell and taste.
When coughing: pain in occiput; abdomen feels as if it would burst.
Deep hollow cough, wakes him at night.
Violent, concussive cough. θPertussis.
Yawning and sleepiness after cough.
Expectoration: of sweetish, flat-tasting mucus; tenacious greyish yellow; purulent.
Expectoration only during day.

[28] **Inner Chest and Lungs.** Chest oppressed with anxiety and internal heat.

Digitized by Google

Dull pressure, as from a plug in r. side of chest.
Sharp stitches in præcordial region, extending thence to small of back.
Rawness and scraping in chest.
Violent pressure in chest. θPertussis.
Chest contracted in walking. θHeadache.

[29] **Heart, Pulse and Circulation.** Restless feeling at heart.
Rheumatic affections of pericardium.
Stitch in region of heart, during inspiration, at night.
Stitches piercing through and through at heart; each time two quickly succeeding each other.
Pulse generally accelerated, with beating in bloodvessels.
Pulse frequent, face red. θMelancholia.

[30] **Outer Chest.** Itching on chest.
Violent eczema on breast and throat.
Redness of skin, with little blisters itching intolerably.

[31] **Neck and Back.** Pain in nape of neck and occiput.
Stiffness of nape of neck.
Feeling as from a tightly-drawn tape from ear to ear.
Dull intermittent pressure, as from a heavy load on r. side of neck and l. acromion.
Painful tearing between scapulæ.
Dull stitches in l. scapula.
Backache, upper part feels as if beaten. θHeadache.
Stiffness in small of back.

[32] **Upper Limbs.** Dull stitches in l. scapula, return slowly and radiate to all sides.
Sensation of weakness in arms, with trembling.
Very painful strokes, as from a heavy body at middle of l. upper arm.
Left arm "goes to sleep," also fingers.
Stitches and heaviness in forearm.
Tensive pain and weakness in arms.
Small blisters on back of hands.
Sweat in inside of hands; l. worse.
Fingers twitch during sleep.
Cramplike pain at metacarpo-phalangeal articulations: cramplike twitches in fingers.
Great feeling of dryness of hands.
Hands, even palms, covered with warts.
Numbness of fingers.
Fourth and fifth fingers fall asleep if cool. θAnosmia.
Writers' spasm.
Panaritium.
Trembling of r. hand.
Pustules on fingers.

[33] **Lower Limbs.** Pain in head of femur, extending to groin.
Shooting burning from thigh to foot, ceasing at times and suddenly returning. θRheumatism.

Digitized by Google

Dull pressure, as from a plug, in l. glutei muscles.
Painful dull-pointed pressure in thigh, at times in rhythmical intermissions.
Legs tense, as if too short.
‖Legs stiff, as if bandaged, with painful restlessness in them.
‖‖Legs lame after apoplexy.
‖Painful uneasiness about knees, with sensation of stiffness as if bandaged or made tense, when sitting.
Wavelike twitches, here and there, in legs.
‖Knees feel paralyzed, with stiffness, great lassitude and drowsiness; is scarcely able to walk.
‖An ulcer below knee.
‖Limbs start violently when lying down; in an old woman.
‖‖Cramp in calves when walking, ‖or rising from a seat; better lying down.
Painful drawing in tibia.
‖Cramplike pressure in calves, externally, towards tibia.
‖Cramplike, intermittent drawing, from heel up into calves.
Pain in ankle, as if sprained, when stepping on l. foot.
‖Stitches in dorsum of foot.
‖Cramplike drawing and tearing pains, from toes to dorsum of foot.
Burning in soles, while sitting.
Coldness of feet in morning.
‖Chilblains.

[31] **Limbs in General.** Tired feeling in limbs, trembling, with feverish restlessness.
‖‖Repeated tearings in paroxysms, through upper and lower limbs at same time. #Headache.
Heaviness in limbs, especially in knees.
Weakness in arms and knees, with trembling.

[35] **Rest. Position. Motion.** Lying down: headache relieved; limbs start violently; cramps in calf >.
Lying on side: rattling in windpipe.
Must lie down: headache.
Sitting: painful uneasiness and stiffness of knees; burning in soles; sweats.
Rising from a seat: cramp in calf.
Rising from stooping: feels as if turning around to left.
Stooping: feels as if turning around to left.
Beginning to walk: is toilsome, but by continuing he feels better.
Walking: feels anxious: vertigo; drawing pain in stomach; cramp in calf; pains in lower limbs.
Stepping: headache <; stomach shakes; pain in ankle.
Ascending stairs: feels faint.

Digitized by Google

Motion: ‖headache <; causes trembling.
Playing piano: heaviness and fulness of whole body.
After hard labor: headache.

[36] **Nerves.** Paralysis of single parts.
‖Incomplete palsy of muscles subject to volition.
Restlessness.
Tired feeling in all limbs.
‖Wants to lie or sit continually; can scarcely move a hand.
Trembling: from every motion.
‖Trembling weakness of limbs. θApoplexy.
‖Very faint from going up-stairs.
Heaviness and fulness of whole body from playing piano.
‖Violent concussion of whole body. θPertussis.
‖Tetanus.
‖Epilepsy.

[37] **Sleep.** ‖Gaping and drowsiness after cough. θPertussis.
Headache better after falling asleep.
Sleepless from restlessness, cannot keep still.
‖Could not sleep well on account of itching.
Sound sleep until 9 A.M.
Vivid dreams at night, which recurred to him during day, as if things dreamed of had really happened.
Dreams: of smelling burning punk or sulphur, continues after waking; of fire; of dead bodies.
On lying down to sleep: legs start.
Headache < after getting awake in morning.

[38] **Time.** Most prominent times of aggravation, morning, and evening until midnight.
Remission after midnight and during day.
Day: flickering before eyes; expectoration from cough; erections.
Night: blindness; seminal emissions; cough; vivid dreams.
Morning: memory impaired; pressure in forehead; smell of tinder when rising; nausea; sensation of fasting and pressure in stomach; cold feet; sound sleep till 9 o'clock.
Forenoon: memory deficient; hypochondriac mood; speech less firm than in afternoon.
Afternoon: memory > than in forenoon; speech firmer than in forenoon.
4 P.M.: heat daily.
Evening: pressure in forehead; heat from 4 P.M.; sweat on abdomen and back; itching.
9 to 10 P.M.: excitement of fancy; later, dull.
After 10 P.M.: dull, does not think.

[39] **Temperature and Weather.** Sensitive to draught; liable to take cold.

Digitized by Google

Open air: toothache <; feels as if he must go into it; chill; blisters harden to a crust.
Sunshine: relieves chill.
Warm room: internal chill.

[40] **Fever.** Chill especially in open air, > in sunshine.
Internal chill, even in a warm room.
Shaking chill, with ill humor and restlessness.
Cold forehead and red cheeks.
External heat, with internal chill.
Shivering over back, as if cold water was poured over it, with heat of face.
Heat of upper part of body, with cold feet; internal chilliness and hot breath.
Internal heat with cold sweat.
Outer and inner heat, with thirst and whimpering in sleep.
Heat from 4 P.M. till evening, daily; passing off after supper.
Heat of l. side.
‖Violent fever heat; headache and great thirst. θPemphigus.
Sweat on head, abdomen and back, evenings.
Night-sweat on abdomen and back.
Clammy sweat in palms, particularly left.
Sweat lessened while eating.
‖Sweats when sitting.

[41] **Attacks, Periodicity.** The attacks cease for one or two days and then continue again for a couple of days.
‖Tertian and quartan intermittents.
Paroxysms of cough every three to four hours, more violent every other or every third day.
Two stitches quickly succeed each other. See 29.
Dull radiating stitches return slowly. See 32.
Ceasing and suddenly returning. See 33.
Heat daily from 4 P.M. till evening.

[42] **Locality and Direction.** Right: dull pressure, digging and throbbing in upper border of orbit; pressure in temple; stupefaction of whole side of head; digging and throbbing in side of head; pressure in side of occiput; pustule in nostril; herpes on cheek; tearing in face and neck; pressure in chest; dull pressure on side of neck; trembling of hand.
Left: pressure in temple; pressure in side of vertex; stitches in side of head; ‖obstruction in ear; ‖tearing or stitching in ear; obstructed nostril; face swollen and covered with blisters; tearing in teeth; sharp stitches in chest; pressure in acromion; dull stitches in scapula; ‖painfulness of middle of upper arm; ‖arm and fingers "go to sleep;" dull pressure in glutei muscles; pain in ankle; heat; clammy sweat in palm.

Digitized by Google

Without inward: pressive pain in temples.
Before backward: pressure on eyeball.
Above downward: pressure on eyeball.
Below upward: cramplike drawing in lower limbs.
Diagonally: stitches from præcordia to small of back.

43 **Sensations.** As if everything was moving around; pressure as with a plug on upper border of r. orbit into brain; as of a tense band from nape of neck to ears: as from cotton or plug in ear; as from pepper on border of lips; as from fasting in pit of stomach; as if a blunt plug was pressed into intestines; as if abdomen would burst when coughing; as from a plug in l. glutei muscles; legs tense as if too short; as from a plug in r. side of chest; restless feeling at heart; as if cold water was poured over back; as of a hoop or band around part; as if stuffed up.

The burning changes to an extremely painful itching, combined with pricking, like stings of insects.

Stitches: over r. eye; in l. side of head; in brain; in l. ear; in pit of stomach during inspiration; in hypochondria; in præcordial region to small of back; in region of heart during inspiration; piercing heart; dull in l. scapula; in forearm; in dorsum of foot.

Cutting: along penis.

Pinching and griping: in abdomen.

Digging: in r. side of head and along border of orbit.

Tearing pain: in vertex; in forehead and temples; in occiput; headache extending into muscles of neck and throat; in l. ear; in face; repeatedly in r. side of face and neck; in teeth; between scapulæ; from toes to dorsum of foot; in paroxysms through limbs.

Shooting burning: from thigh to foot.

Burning: in face; dryness of lips; on chin; from stomach to throat; in glans, before and after urinating; and shooting from thigh to foot; in soles; herpes; in skin.

Soreness: in boils on scalp; in ear when biting teeth together; in pustule, in r. nostril when touched; from leucorrhœa.

Rawness: and roughness in throat; in chest.

Pressure: in head; in forehead; as from a plug on l. side of vertex and on upper border of r. orbit; in temples; from temples towards eyes; in top of head; from without inward, in temples; in r. side of occiput; without inward, from forehead over head; from within outward, from forehead backward; on eyeball, from before backward; in stomach, preceded by emptiness; in liver; as from a plug around navel; in rectum; on uterus; near larynx; in throat pit; as from a plug in r. side of chest; in l. glutei muscles; in thigh.

Digitized by Google

Drawing pain: in cardiac end of stomach; in tibia; cramplike, from heel into calves.
Dragging pain: with polypus auris.
Tensive pain: in arm.
Spasmodic pain: in stomach; deep in abdomen.
Aching: near larynx.
Pain: in l. eye; in spleen; in abdomen; in head of femur to groin.
Cramplike pain: at metacarpo-phalangeal articulations; in calves; from toes to dorsum of foot; in muscles; from heel into calves.
Cramp: in calves when walking.
Contracting pain: in nose.
Constriction: in forehead; like a band around head.
Sprained feeling: in ankle.
Lameness: in legs; in knees.
Paralyzed feeling: in knees.
Stiffness: in nape of neck; in small of back; in legs, as if bandaged; about the knees.
Swollen feeling: in eyelids; of tongue.
Dulness: of head.
Stupefaction: of side of head.
Tired feeling: in limbs.
Throbbing: headache; in r. side of head; in vertex; in occiput.
Bursting pain: in abdomen, when coughing.
Weakness: in abdomen and knees; in arms and knees with trembling.
Heaviness: of tongue: in forearm; in limbs, especially in knees.
Oppression: in region of sternum; of chest.
Numbness: in head; l. arm; fingers.
Itching: of scalp; on forehead; of ears; in face; and crawling in eruption around mouth; at anus; of scrotum, exciting sexual desire; on chest; of little blisters on breast and throat.
Crawling: around mouth.
Trembling: in limbs.
Twitching: in l. eye; of mouth in sleep; of fingers during sleep.
Wavelike twitches: here and there in legs.
Painful uneasiness: in knees and legs.
Painful strokes at middle of l. upper arm
Dryness: in nose; of hands; of lips.
Heat: in head; in face; internally with anxiety; in upper part of body while feet are cold; internally, with cold sweat; from 4 P.M. till evening, daily; of l. side.
Coldness: on forehead; of feet in morning; as if cold water was poured over back.

Digitized by Google

[44] **Tissues.** Cramplike pains in muscles.
Contraction of joints.
Complaints of external parts.
Emaciation.
Such a swelling of the affected parts that the patient looks like a hogshead (from wearing the nut).

[45] **Touch. Passive Motion. Injuries.** Touch: soreness of boils on scalp <; soreness of pustule in nose <; toothache <.
Pressure: relieves pain in forehead for a while.
Scratching: itching generally <, but sometimes > or changed in location; boils on scalp <.
Rubbing: gums bleed.
Wounded tendons.

[46] **Skin.** Bright scarlet eruptions on whole body, especially on thighs in contact with nut, and of abdomen.
Destruction of epidermis, leaving an inflamed surface covered with small miliary pustules, with unbearable itching and discharging a yellow liquid, forming crusts (by applying the juice).
Intense redness of skin, with eruption of little blisters and unbearable itching.
Chest, neck, axillæ, upper arms, abdomen, scrotum and thighs were not only covered with raised crusts, discharging a thick yellowish liquid, but these had partly changed into wartlike excrescences, with thickened epidermis, the whole intermediate skin being of an erythematous redness, and the itching fearful (from wearing the nut).
White herpetic spots, scaling.
Want of irritability of skin; sinapisms will not excite it.
Itching < in evening and when he went to bed.
Burning and stinging herpes.
Excessively itching eruptions.
Blisters discharging a yellowish transparent liquid, hardening to a crust in open air.
Effects like those of *Rhus tox.* plant on skin.
Warts even on palms of hands.
Skin burns her very much. θPemphigus.
Scarlet redness over whole body. θPemphigus.
Covered all over with blisters from size of a pin-head up to a pea. θPemphigus.
Furuncles.
Memory impaired after smallpox.

[47] **Stages of Life, Constitution.** Ill-natured children with pertussis.
Old people.
Frequently indicated in nervous and hysterical females.
Women during pregnancy, gastric and nervous disorders.

Digitized by Google

Hypochondriacs.
Man, æt. 72, apoplexy; after it *Bellad.*, *Opium* and *Anac.* and after it *Baryta.*
Widow, æt. 69, talkative after mortification. θInsanity.

[48] **Relations.** Similar to: *Ant. tart.* (cough in high-tempered children; gaping, drowsy after cough); *Apis.* (skin); *Coriaria ruscifolia* (loss of memory, etc.); *Ferrum* (occiput pains in cough); *Iodium; Juglans; Lycop.; Nitr. ac.* (cursing); *Nux vom.; Phosph. ac.* (brain); *Platin.; Pulsat.; Urt. ur.* (skin; *Zincum* (brain); *Pulsat., Natr. mur.* (dry coryza); *Caustic.* (in writers' spasm).
Relatives: *Anac. occid., Comoc., Rhus glab., Rhus rad., Rhus tox., Rhus ven.*
Antidotes: *Coffea* and *Juglans.*
Anac. antidotes: *Rhus tox.*, especially if there are gastric symptoms, or symptoms go from r. to left.
It follows well after *Lycop., Pulsat.* and *Platin.*
After *Anac.: Platin.* follows well.
Belongs to same family as *Rhoes*, and there is a similarity with *Terebinthineæ.*
Neither *Camphor.* nor *Spir. nitr. dulc.* antidotes its effects, but for anger and violence of mind, smelling of raw coffee is a very effectual antidote.

ANAGALLIS ARVENSIS.

Scarlet Pimpernel. *Primulaceæ.*

The common red chickweed. A little herb growing by the wayside, in fields and gardens, known since Dioscorides, and a famous polychrest through all ages. Allen has only Schreter's provings, not the French. We add Dr. Günther's valuable proving. He collected the plants in Rhode Island. Günther and his son took 10 drops of the tincture in water, finally the tincture itself from 10 to 15 drops every day from January 27th to February 14th, 1854. He took the red-flowered variety; some make a distinction between this and the blue-flowered, or cœrulea.

[1] **Mind.** Exhilarated, mind very active; thinks of everything.
Cannot collect his thoughts while listening to a sermon, on account of very joyful feelings, without special cause.
Great hilarity for several days; everything gives him pleasure.
Frenzy in continued fever; febrile delirium.

Digitized by Google

Anxiety in chest.
Despondency.
After mental exertion, great prostration.
⁞ Hypochondriasis, (hence its Greek name, signifying "to laugh").
⁞ Mania.

[2] **Sensorium.** ‖ Vertigo (cœrulea).
⁞ Epilepsy.

[3] **Inner Head.** Heat rising to head, slight sweat on forehead, followed by pressing stitching in eyeballs and a tickling pricking in urethra, inclining him to coition.
Headache just over supraorbital ridges, with eructations and rumbling in bowels.
Spasmodic lancinations in both temples, extending to eyes.
Headache with fever (cœrulea).
Pressive aching in forehead and occiput from a current of air blowing on him.
Intense headache and nausea, with pains throughout body.
Occiput: dull or tearing pains and inclination to vomit; violent headache, with hard, knotty stools; knocking pain in l. side; dull pain all night.
Headache relieved by coffee.

[4] **Outer Head.** Skin of forehead feels too tight, when closing eyes or wrinkling brows, < on l. side.
Vehement itching on vertex and occiput.
Stitches on several places on scalp, chiefly over l. ear and on occiput.
Chilly sensation on r. frontal protuberance.
Violent pain as if occasioned by external pressure on occiput behind l. ear.

[5] **Sight and Eyes.** ‖ Things seem to float to and fro, he cannot write.
⁞ Amblyopia.
⁞ Cataract.
Glittering before l. eye; evening by candlelight.
Pressing in eyes after headache.
Stitching in temples extending into eyes.
Pain in r. eyeball, < from touching lids.
Itching of eyelids.
⁞ Spots on cornea.

[6] **Hearing and Ears.** Obstruction and pain in r. ear following pressure in eyes.
Violent stitches in r. ear.
Pain in r. ear as if meatus auditorius externus was obstructed.
‖ Tickling and itching in l. ear.

[7] **Smell and Nose.** ‖ Nosebleed. θ Syphilis.
Violent sneezing, expelling a lump of viscid yellow phlegm.
Unpleasant tickling on tip of nose, with violent sneezing.

Digitized by Google

Violent sneezing following pain in r. side of back.
Frequent running of water from nose.
Copious secretion of yellow phlegm.

[8] **Upper Face.** Neuralgic pains in r. cheek bone, extending to supraorbital region; during night.
Pains in facial muscles.
‖Branlike, ring-shaped tetters on face.
Itching on cheek bones.

[9] **Lower Face.** Itching and tickling stitches on l. corner of mouth and lower lip, just under border.

[10] **Teeth and Gums.** Dull pain in a hollow tooth, with trembling of heart.
Dull pain in upper molars and tearing pain in r. cheek bone.
Teeth pain as from cold; < from touch; chilly sensation in teeth.
Gums swollen around a hollow tooth.
‖Dull pain in gums, accompanied by very hard stools.

[11] **Taste and Tongue.** Sensation on tongue as if something cold was placed upon it; also near frænum.

[12] **Inner Mouth.** Viscid saliva in mouth, raised by coughing.
Collection of water in mouth, with slight tearing pains in molars.

[13] **Throat.** ‖Sensation of dryness in throat, with scraping.
Tickling at soft palate at night, as from touch of something cold.

[15] **Eating and Drinking.** After eating: scratching in throat; pressure on lungs.
Coffee: relieves headache.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations, nausea, inclination to vomit and rumbling in bowels, with headache.

[17] **Scrobiculum and Stomach.** Inflammation of stomach (horses).

[18] **Hypochondria.** : Hepatitis and indurated liver.

[19] **Abdomen.** Abdomen distended with wind.
Weak feeling in abdomen.
Rumbling in bowels, with headache.
: Visceral obstructions.

[20] **Stool and Rectum.** Inflammation of rectum (horses).
Itching in rectum; pressure in sacrum; piles.
Passes offensive flatus.
Stools soft and pappy.
Diarrhœa watery.
Stool hard like stone, knotty.
Itching at anus after evacuation of bowels.
: Hemorrhoids.

[21] **Urinary Organs.** : Inflammation of kidneys.

Digitized by Google

Burning in urethra when urinating, mostly in morning.
Orifice seems agglutinated; presses to urinate; urine escapes in a divided stream.
Tickling, prickling along urethra, inclining to coitus.
Urine dark, sometimes straw-colored.
Copious urination (horses).
: Gravel.

[22] **Male Sexual Organs.** Desire for coition.
: Is said to be useful in syphilis with deranged mind, nosebleed, pain in small of back; skin itches.
The burning in urethra before and during erection ceases during coition.
| | Drawing pains in r. testicle and cord.
| | Tearing pains in spermatic cords.
Tickling on symphysis pubis.
▮Gonorrhœa.

[23] **Female Sexual Organs.** : Amenorrhœa.
: Cancer of mammæ.

[24] **Pregnancy. Parturition. Lactation.** Is given to cows if they fail to become pregnant.

[25] **Voice and Larynx. Trachea and Bronchia.** Sensation as if a brush was brought in contact with epiglottis, with hoarseness.
| | Scratching and scraping in throat, especially after meals.
| | Hoarseness proceeding from trachea.

[27] **Cough.** Cough dry: with a scratching sensation when reading aloud; with yellow phlegm from nose; with spitting of saliva.

[28] **Inner Chest and Lungs.** A kind of restlessness in chest.
▮Soreness on chest with fever.
Pressure on r. lung after a meal or when walking fast.
Stitches in l. side in region of fourth and fifth ribs.
Pulsations in r. side of chest.
Pains in lungs felt in front and in back up to scapulæ.
Suddenly a feeling internally in chest, as if struck with a cushion full of pins.
: Consumption.
Bluish red spot on condensed lungs.

[29] **Heart, Pulse and Circulation.** Violent trembling of heart, with general trembling and weakness, preceded by aching in a carious tooth and anxiety in chest in evening in bed.
| | Palpitation.
Coagulated black blood in chambers of heart (horses).

[30] **Outer Chest.** Itching on l. side of chest, principally on nipple.
| | Eruption on chest.

[31] **Neck and Back.** Tensive drawing from l. shoulder up to neck; returns when lifting or stretching arm.

Digitized by Google

Itching on neck and scapula; on r. scapula.
Pains in r. side of back, followed by violent sneezing.
Trembling of muscles of neck (horses).
Violent pains in sacrum when lifting a slight load, they take her breath.

[32] **Upper Limbs.** Tensive drawing ascending from l. shoulder to nape of neck, < raising and extending arm.
Pain in shoulder (cœrulea).
Pain in lungs and back into shoulder blade.
Pains in muscles of upper arm, outside, near shoulder.
Drawing pains in muscles of upper arm, lasting for some time, especially felt when moving hand or arm, e. g., in writing.
Vehement pains in muscles of forearm, inside, near elbow joint.
Violent pains in carpal and metacarpal bones of r. hand, extending up arm to shoulder.
Drawing pains in carpal and metacarpal bones of r. hand.
Pains in l. thumb, violent twitching in it.
Drawing tearing in r. metacarpus, sometimes l., returning at regular intervals.
In metacarpus of thumb a dull drawing, or tearing mostly r. side, sometimes also in left.
When cutting with shears cramp in ball of thumb, when it ceased it appeared on l., in evening.
Intense pains in palm of r. hand, in fork of thumb and forefinger, with a sensation as if a pin was thrust through it.
Gouty swellings on joints of fingers.
Itching on upper arm, inside, immediately above joint of elbow.
Itching on back of r. hand.
Skin of hands and fingers very dry, sticky and dirty looking.
Tetter on hands dry, branlike, squamous; or groups of small vesicles, smarting and itching, oozing a yellow brown lymph when scratched, which soon turns into a scurf; new vesicles appear beneath.
Dry, branlike, squamous tetters on hands and fingers, principally on fore and middle fingers of r. hand.

[33] **Lower Limbs.** Pain in hip (cœrulea).
Lumbago and itching.
Tickling pains in r. leg and at os ileum.
Drawing pains in muscles of l. leg; tearing during night.
Weakness like lameness in r. leg, as if it was too short.
Pains in bend of l. knee.
Slight pain near l. knee and in posterior muscles of l. leg.
Sensation of tightness in bend of l. knee, as if there was something swollen or sore.

Digitized by Google

Pains in r. leg, above knee, in knee and shin bone, when in a sitting posture and having legs lightly crossed.
Stitches in l. shin bone, when in a sitting posture, but only in moving leg or foot.
Pain in r. shin bone when extending leg.
Cramps in r. calf, slight in left.
Pain in upper part of metatarsus of r. foot.
Pains in great toe and little toe of l. foot, in morning.
Pain in curved or concave part of l. sole.
Pain in sole of l. foot near toes.

[34] **Limbs in General.** Trembling of muscles of hind legs and neck (horses).
: Gout.

[35] **Rest. Position. Motion.** In bed: trembling of heart with toothache; chilliness.
Sitting with legs crossed: pains in and about r. knee.
Stretching arm: tensive drawing from l. shoulder to neck.
Lifting: tensive drawing in l. shoulder; pain in sacrum.
Walking: pressure on r. lung.
Motion of leg or foot: stitches in r. and l. tibia <.

[36] **Nerves.** A sort of chilly trembling; trembling all over.
Great prostration, especially after mental work.
|| Exhausted and drowsy.
: Epilepsy.

[37] **Sleep.** Falls asleep late; sleep restless; awakens early, feeling unrefreshed.
Agitation disturbs rest at night.
Sleep troubled by tearing or stitching pains.
Lascivious dreams.

[38] **Time.** Night: dull pain in occiput; neuralgia in cheek; tickling at palate; erections.
Morning: burning in urethra when urinating; pain in feet.
Towards evening: spells of chilliness.
Evening: glittering before l. eye; trembling, anxious feeling in chest; toothache.

[40] **Fever.** Trembling with chills.
Crawling and trembling.
|| Chilliness followed by heat (cœrulea).
Spells of chilliness towards evening and in bed.
Chilliness penetrating teeth.
Fever with headache and sore chest.
Heat rises into head, with sweat on forehead, followed by sensation in eyeballs and tickling in urethra.
: Bloody sweat; murrain of calves.

[42] **Locality and Direction.** Below upward: pains in upper limbs.
Right: chilly sensation on frontal protuberance; pain in

eyeball; pain and stitches in ear; drawing in testis and cord; pressure on lungs; itching on scapula; pains in palm of hand; tickling pains in leg and os ilium; weak, lame feeling in leg; pains in and about knee and tibia; pain in foot.

Left: knocking in side of occiput; stitches over ear; glittering before eye; itching in ear; itching and stitches in corner of mouth; itching on side of chest; tensive drawing from shoulder; drawing in muscles of leg; pain in knee and posterior muscles of leg; tight feeling in bend of knee; pain in tibia; pain in feet, in sole of foot.

[43] **Sensations.** As if skin of forehead was too tight; feeling of obstruction in r. ear; itching and tickling stitches in l. corner of mouth and lower lip: as if something cold was placed upon tongue; a kind of restlessness in chest; as if a brush was brought in contact with epiglottis; as if struck with a cushion full of pins in chest; as if a pin was thrust into palm of r. hand; lameness in r. leg as if too short; as if swollen or sore in bend of l. knee.

Pain: in r. eyeball; in r. ear; in r. side of back; in facial muscles; in lungs; in shoulder; in shoulder blade; in upper arm; in l. thumb; in hip; in bend of l. knee; in r. leg above knee; in r. knee and shin bone; in r. metatarsus; in great toe and little toe of l. foot; in l. sole.

Teeth pain as from cold.

Violent pain: on occiput behind l. ear; in sacrum; in muscles of forearm; in carpal and metacarpal bones; in palm of r. hand, in fork of thumb.

Lancinations: in temples.

Stitches: in eyeballs; in temples; in scalp; in eyes, from temples; in r. ear; in l. corner of mouth; in l. side, region of fourth and fifth ribs; in l. tibia; disturb sleep.

Pricking: in urethra.

Neuralgic pains: in r. cheek bone.

Tearing pain: in occiput; in r. cheek bone; in molars; in spermatic cords; in muscles of l. leg; disturbs sleep.

Drawing pain: in r. testicle and cord; tensive drawing from l. shoulder to neck; in r. carpus and metacarpus, also tearing; in muscles of upper arm; in muscles of l. leg.

Pressing: in eyeballs; in forehead and occiput; in eyes; on lungs; in sacrum.

Scratching: in throat, after eating; when reading aloud.

Scraping: in throat.

Soreness: on chest.

Aching: in forehead; in occiput.

Digitized by Google

Dull pain: in occiput; in hollow tooth; in upper molars; in gums.
Tension: in skin of forehead; tensive drawing from l. shoulder to neck; in bend of l. knee.
Weakness: in abdomen; in r. leg.
Pulsations: in r. side of chest.
Cramp: in balls of thumbs; in r. calf, slightly in left.
Burning: in urethra.
Heat: rising to head.
Dryness: in throat with scraping; of hands.
Cold or chilly sensation: on r. frontal protuberance; in teeth; as if something cold were placed on tongue; at soft palate, as from touch of something cold; a sort of chilly trembling.
Tickling: in urethra; in l. ear; on tip of nose; at soft palate as from something cold; in urethra, and prickling; on symphysis pubis; as from a brush against epiglottis; pains in r. leg and at os ilium.
Itching: on vertex and occiput; of eyelids; in l. ear; in face; on cheek bones; in rectum; at anus; on l. side of chest; on l. nipple; on neck and scapula; on upper arm, inside, above elbow joint; on back of r. hand; tetter; all over skin.

[41] **Tissues.** Pains in joints going from place to place (cœrulea).
Rheumatic and gouty pains.
: Dropsy.

[45] **Touch. Passive Motion. Injuries.** Touch: aggravates pain in r. eyeball; teeth painful.
: Used in snake-bites and hydrophobia.

[46] **Skin.** Skin itches all over.
Skin rough, dry.
|| Dry, branlike tetter in rings.
Ulcers and swelling on joints.
: Ill-conditioned ulcers.
: Promotes expulsion of splinters.

[48] **Relations.** Collateral relation. *Cyclam.*
Similar to: *Coffea* (joyous, excited); *Cyclam.* (sneezing); *Lith. c.* (rough skin, ringworm); *Sepia, Tellur.* (ringworm); *Pulsat.* (chilliness; catarrhs); *Rhus tox.* (see below).
Smelling of *Rhus tox.* and an hour later taking *Coloc.*, relieved sacral pain; *Rhus tox.* relieved swollen gums.
Coffee relieved headache.
It is said to form an important part of Stoy's medicine for hydrophobia.

Digitized by Google

ANANTHERUM MURICATUM.

Vetiveria Odorata. *Gramineæ.*

A well-known grass in the East Indies, cultivated on the Markarentas Islands for its medical use; the root is aromatic and stimulating or diaphoretic.

Proved and introduced by Dr. L. J. Houat in Nouvelles Donnees, second series, translated in Criterio Medico, 1869, vol. 10, p. 183, and by S. Lilienthal, in North American Journal of Homœopathy, 1870, vol. xviii, p. 176; again in Allen's Encyclopedia, vol. 1, p. 330.

S. Lilienthal's indications in his masterly treatise on Skin Diseases have been inserted as cured symptoms.

[1] **Mind.** Gay humor, with disposition to laugh and sing.
Sadness, sheds tears easily.
Hypochondriasis and dread of society.
Restlessness, irritability and suspicion.
Ungovernable jealousy.
Self-esteem.
Blunted intellect and loss of memory.
Monomania for doing same thing and frequenting same places.
Delirium, idiocy, mania.

[2] **Sensorium.** Vertigo with cerebral congestion, red face and tendency to fall backward.
Drunkenness and staggering.
Vertigo with weakness in back and legs, unable to remain upright.
Vertigo with contraction and digging in inner canthi of eyes, extending into brain.

[3] **Inner Head.** ||Burning, lancinating, pulsating headache, most r. side, forehead and temples, with nausea, vomiting and great heaviness of eyes.
||Neuralgic pain in temples, with sensation as if pointed irons were thrust in, producing fits of craziness; < afternoon and night, from noise, light and motion.
As if head was crushed.
Heaviness and weakness of head, with pressure in occiput, lets head drop to one side.
As if something turned round in head, with pains in stomach, great appetite, colic, venereal desire, chills and choking.
As if he had water in head, < when walking.

Digitized by Google

As if brain was laid bare and cold air passed over it.
As if heavy objects and balls moved about in head; < at night and lying on r. side.
Cramps and cold chill in head.
Pains piercing brain like steel arrows from forehead to nape of neck.
Headache < in afternoon: from noise, motion and light.

[4] **Outer Head.** Itching and heat in head extending to face.
Nervous trembling of head.
Herpes and ulcers on scalp with compact, thick, humid scabs and prurigo.
Large tumors like lupia suppurate and form ulcers.
Protuberances, like exostoses, on sinciput and temples.

[5] **Sight and Eyes.** Photophobia, light produces itching in eyes.
Pupils contracted or dilated, has to wink in order to distinguish objects.
Amaurosis.
The images of objects are retained in an annoying manner.
Black points, muscæ volitantes and fiery circles before eyes.
Everything seems excessively bright and shining.
Sensation of a great weight on eyelids which keeps them closed.
Dull, dim, wild, wandering eyes, without expression.
Heat, burning, pressure, tickling, pricking and painful stitches in eyes.
Swelling and pain as if an abscess would form in r. eye.
Spasmodic contraction of eyes, which remain turned upward.
Yellowness of sclerotica.
Inflammatory swelling and ulceration of margin of lids, with inability to separate them.
Inverted lids.
Swelling and ulceration of lachrymal glands.
Growths like warts and lupia on eyebrows.

[6] **Hearing and Ears.** Heat in ears, pulsation, as of abscesses.
Digging stitches; discharge of purulent matter.
Copious ear-wax; sensation of dirt or spongy substance which swells up.
Tissues in lobes; burning crusty eruption, inability to lie on ears.
Deafness, < in evening and damp weather.
Tinnitus.

[7] **Smell and Nose.** Stitches in nose with a crushing sensation at root.

Google

The air which passes through nostrils seems icy cold and causes sneezing.
‖Ulcers in nostrils. θEpistaxis.
Fluent coryza, with pressive pains in head and root of nose; burning in nostrils; lachrymation and sneezing.
Copious greenish, badly smelling discharge.
Nose enlarged, red and covered with many small blood-vessels.
Inflammation and swelling of nasal bones, with hammering pains.
Boils and small tumors, like lupia, on tip.
Nose cold, pale and pointed.

[8] **Upper Face.** Tic douleureux.
Face yellowish, congested, pale or cyanotic.
Itching and burning in cheeks.
▮Yellow or red spots; stinging pimples.
▮Ulcers, scabs or scaly herpes; falling off of eyebrows and beard.
Erysipelatous swelling; closed eyes, fever, delirium, desire for open air, even to throw himself out of window.
Face puffy; boils and abscesses.
Spasm of facial muscles, < l. side.
Painful shocks in different parts of face.
Miliary and urticarious eruptions.
Pain in facial bones as if crushed or dislocated.

[9] **Lower Face.** ‖Convulsive movements as from tic douleureux, or trismus, with pains in lips and chin; jaws spasmodically clenched.
Lips fatty, oily, enlarged, inflamed, covered with phlyctenæ constantly renewed; dry, pinched and contracted.
Lips enormously swollen, ulcerated, everted, of a bluish yellow.
▮Submaxillary and cervical glands swell and tend to suppuration.
▮Ulcers at labial commissures; syphilitic.

[10] **Teeth and Gums.** ▮Scurvy.
Lancinating, digging and drawing in teeth, or as if forcibly separated or pulled and torn out with pincers.
Constant inclination to clench teeth.
Sensation of cold in teeth with heat in gums and mouth.
Toothache in afternoon and from taking anything cold; < at night, in cool air, when eating, in changes of weather, from wine and coffee.
Decayed crumbling teeth; bad smell from mouth.

[11] **Taste and Tongue.** Taste bitter, bloody, sweet or flat.
Difficult speech, stammering.
Tongue inflamed and enormously swollen, great difficulty in speaking.

Digitized by Google

Severe pains at root of tongue as if it were cut off.
Tongue fissured, lacerated, and as if cut on its edges, with copious salivation and debility, as from effects of mercury.
Greyish, yellowish, bloody or brickdust coating on tongue.

[12] **Inner Mouth.** Gum boils, ulcers, aphthæ, swollen salivary and submaxillary glands.
Flow of thick viscid saliva.

[13] **Throat.** Inflammation of throat with sensation of fulness and obstruction, as if it were plugged.
Burning, as of mustard, with violent convulsive cough.
Inflammation, swelling and suppuration of tonsils.
Angina with almost impossible deglutition.
Constriction with danger of suffocation; debility.
Burning and stitches in throat.
Sensation as if he had a burning stick in throat, reaching down into stomach.
Granulations and greyish ulcers like false membranes; much mucus.
Inability to drink, in spite of great thirst, on account of spasms in throat, which contracts and feels tight, as soon as he hears anything said about water, or sees shining objects.
Sensation, sometimes of burning heat, sometimes of icy coldness in œsophagus.
Tickling as of some live thing in œsophagus, with fits of suffocating cough.

[14] **Appetite, Thirst. Desires, Aversions.** Morbid hunger, wakes up in night to eat; as if he had a tapeworm.
Burning unquenchable thirst.
Longing for aromatic drinks.

[15] **Eating and Drinking.** Worse from coffee, which subsequently relieves.
Toothache < from wine and coffee.

[16] **Hiccough, Belching, Nausea and Vomiting.** Frequent empty belching; painful; tasting of food; foul.
Nausea; vomiting of food, bile or blood; horrible pains in stomach.

[17] **Scrobiculum and Stomach.** Very painful pressure, like a bar, on epigastrium, with short anxious respiration.
Fulness and ulcerated feeling.
Stitches and cramps in stomach and extremities; watery vomiting; urging to stool, very liquid diarrhœa; painful icy coldness over whole body; excessive thirst; pressure and constriction in epigastrium; spasms; agitation; cold perspiration, especially in head.
Contractive, gnawing and tearing pain as if caused by some living thing.

Digitized by Google

Spasms and cramps in stomach hindering respiration.
Sensation as of tumors, holes or sharp pebbles in his stomach.
Extreme debility coming from stomach.
Sensation as of a hard tumor starting from pylorus, extending to liver.
Stitches in stomach extending into chest.

[18] **Hypochondria.** Cramps in hepatic region; with sensation as if it was full of painful tuberosities.
Pulsative burning and digging pains in region of liver.
Inflammation and swelling of liver as if caused by abscesses.
Burning pulsating and lancinating pain in region of spleen.

[19] **Abdomen.** Tympanitis and colic.
Twisting and tearing pains in bowels, as in iliac passion, with nausea and vomiting.
Tumor, like hernia, or like buboes in groin.

[20] **Stool and Rectum.** Stools mucous, bloody, brownish yellow, whitish, choleraic; offensive, with colic, and burning in abdomen and rectum.
Obstinate constipation, stool hard, knotty, like sheep-dung.
Large hemorrhoidal tumors and abscesses.
Itching at anus.

[21] **Urinary Organs.** Stitches and crushing pains in kidneys.
Ardor urinæ.
Urine discharged by drops.
Chalky sediment.
Incontinence; involuntary urination when walking and during sleep.

[22] **Male Sexual Organs.** Sores on penis and in urethra resembling chancres.
The venereal appetite is increased by every attempt to satisfy it, until it drives him to onanism and madness.
Syphilis; sycosis.

[23] **Female Sexual Organs.** Burning pain in ovaries.
Burning, crampy, pinching and gnawing pain in womb, with great debility and general prostration.
Hard tumors, like scirrhus on neck of womb.
Stitches passing like strokes of lightning into womb.
Prolapsus and displacement.
Sterility, as from atrophy of ovaries.
Eruptions, whitish and reddish, like sycosis, in vulva.
Pustules like confluent smallpox, like measles and scarlet fever.

[24] **Pregnancy. Parturition. Lactation.** Erysipelatous swelling of mammæ.
Ulcerated, indurated tumor in breast.

Digitized by Google

‖Excoriation of nipples.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness and frequent aphonia, with symptoms of tuberculous or granular laryngitis.

‖Difficulty of speaking with drowsiness, with glandular inflammation.

Liquids pass frequently into larynx and through nasal fossæ, with violent jerking cough.

Raw corrosive sensations in larynx, or as if it was ulcerated and cut.

Very prominent swelling of laryngeal cartilages.

[27] **Cough.** Obstinate, paroxysmal, shaking cough, < in evening and night and from heat.

Dry cough and bloody expectoration.

Sensation during cough as if a very rough cord was drawn through bronchi.

[28] **Inner Chest and Lungs.** Heaviness and stitches in various parts of chest.

Burning and raw feeling in chest.

[29] **Heart, Pulse and Circulation.** Burning, stitches and cramps in cardiac region, with oppression.

Heart seems paralyzed, with deathlike weakness.

Pulse slow and full, then accelerated, hard and dicrotic.

[31] **Neck and Back.** Stiffness of neck and back.

Paralytic weakness of vertebral column and extremities.

Pain as if scapulæ were broken.

Twisting stabbing pains in kidneys.

Lumbago.

[32] **Upper Limbs.** Rheumatic pain and swelling of articulations of arms and hands.

Burning, pulsative pains, and pain as from whitlow on fingers.

Diseased and deformed nails.

‖Swelling of ganglia of axillæ and chest (with breast tumor).

‖Abscesses, ulcers and fissures on arms and hands; also eruptions like itch or lichen.

[33] **Lower Limbs.** Stiffness, lancinating and crampy pains in sacrum and iliac bone.

Sciatic, gouty and rheumatic pains in legs and feet, especially in heels.

Paralytic weakness and palsy of legs, with complete insensibility.

The nails grow awry and hurt toes.

Offensive foot sweat.

‖Ulcers and boils on legs and feet.

[34] **Limbs in General.** ‖Erysipelatous swellings of arms and legs.

Digitized by Google

‖Boils, abscesses and ulcers on legs.
Ulcers on hands and legs and soles of feet.

[35] **Rest. Position. Motion.** Motion: increases neuralgic pains in temples.
Walking: sensation of water in head <; incontinence of urine.
Lying on r. side: sensation of balls and heavy objects in head <.

[37] **Sleep.** ‖Drowsiness, difficulty of speaking.

[38] **Time.** Afternoon: neuralgia in temples <; toothache <.
Evening: deafness <; cough <.
Night: neuralgia in temples <; sensation of heavy objects in head <; toothache <; cough <.

[39] **Temperature and Weather.** Heat: cough <.
Damp weather: deafness <.
Air passing through nostrils seems icy cold.
In cool air: toothache <.
Desire for open air: facial erysipelas.
Changes of weather: toothache <.

[40] **Fever.** ‖Skin cold and frigid and pale or violet.
‖Stinging and burning heat.

[42] **Locality and Direction.** Right: headache most on side of forehead and temple; as if abscess would form in eye.
Left: spasm of facial muscles < on l. side.

[43] **Sensations.** Lancinating, burning, deep-seated pains (in tumors).
As if pointed irons were thrust into temples; as if something turned round in head; as if he had water in head; as if brain was laid bare and cold air passed over it; as if head was crushed; as if heavy objects and balls moved about in head; as of dirt or spongy substance in ears; teeth as if forcibly separated; as if root of tongue was cut off; tongue as if cut on its edges; as if throat was plugged; as of a burning stick in throat; as of some live thing in œsophagus; like a bar pressing on epigastrium; as from a hard tumor from pylorus to liver; as if hepatic region was full of painful tuberosities; as if larynx was ulcerated and cut; as if a rough cord was drawn through bronchi, when coughing; as if scapulæ were broken; pain as from a whitlow on fingers; as of tumors, holes or sharp pebbles in stomach.
Pains piercing brain like steel arrows.
‖Formication and itching as of ants, with loss of sensibility.
Painful shocks in face.
Pains: in stomach; as of an abscess in r. eye; at root of tongue, as if cut off; horrible, in stomach; in scapulæ, as if broken: in fingers, like whitlow.

Lancinating: headache; in teeth; in sacrum and iliac bone; in tumors.
Stabbing pains: in kidneys.
Stitches: in eyes; in ears; in nose; in throat; in stomach; in kidneys; through womb; in chest; in cardiac region.
Stinging: pimples.
Pricking: in eyes.
Burning: headache; in eyes; eruption on ears; in nostrils; in cheeks; in throat; in region of liver and spleen; in abdomen and rectum; in ovaries; in chest; in cardiac region; in fingers.
Drawing: in teeth.
Twisting: in bowels; in kidneys.
Crushed sensation: in head; at root of nose; in facial bones; in kidneys.
Gnawing: in stomach; in womb.
Digging: in inner canthi; in ears; in teeth.
Rawness: in larynx; in chest.
Ulcerated feeling: in stomach.
Hammering: in nasal bones; in chest.
Pulsating: headache; in ears; in region of liver and spleen; in fingers.
Contraction: in inner canthi, extending into brain; spasmodic of eyes; of lips; of throat; in epigastrium; in stomach.
Cramps: in head; in stomach; in limbs; in hepatic region; in cardiac region; crampy pains in sacrum.
Neuralgic pain: in temples; and weakness of head.
Rheumatic pain: in joints; in legs and feet.
Dislocated feeling: in facial bones.
Pressing: in occiput; in head and root of nose; in eyes; on epigastrium.
Weight: on eyelids.
Heaviness: of eyes.
Heat: in eyes; in ears; in gums and mouth; in œsophagus.
Coldness: of inhaled air, in nose; of nose; in teeth; in œsophagus; icy, over whole body.
Fulness: in throat; in stomach.
Weakness: of head; of vertebral column and extremities.
Tickling: in eyes.
Itching: in head, to face; in eyes, from light; in cheeks; at anus.

" **Tissues.** Glandular inflammation.
Painful swelling of various parts extending to suppuration; especially of submaxillary and cervical glands.

" **Skin.** Abscesses, boils and ulcers.
Erysipelas.

Digitized by Google

‖Herpes.
‖Miliaria; measles, smallpox, scarlet fever.
‖Pruritus.
‖Red pimples, like miliaria or urticaria.
‖Bluish scorbutic spots on body.
‖Scarlet redness of skin.
‖Ulcers yellowish, violet, swollen, everted, syphilitic, on different places.

[45] **Relations.** Coffee aggravates at first, relieves afterwards.
Aromatic liquors relieve pains.
Similar to: *Act. rac.*, *Agar.*, *Arnic.*, *Bellad.*, *Cannab.*, *Coffea*, *Ignat.*, *Kali hydr.*, *Moschus.*, *Staphys.* (especially in headache); *Bellad.*, *Euphras.* (eyes); *Caustic.* and *Gelsem.* (heaviness of eyelids); *Act. rac.*, *Corall. rub.*, *Hydrast.* (air feels cold in nose); *Bryon.*, *Calcar.*, *Chamom.*, etc. (toothache < from cold air or food); *Acon.*, *Carb. veg.*, *Chamom.*, *Coccul.*, *Ignat.*, *Mercur.*, *Nux vom.*, *Pulsat.*, *Rhus tox.*, *Zincum* (toothache, < from wine or coffee); *Bellad.*, *Canthar.*, *Hydroph.*, *Hyosc.*, *Laches*, *Stramon.* (hydrophobia, see 13). *Sulphur* (hunger at night); *Mercur.* (syphilis); *Thuya* (sycosis).

ANGUSTURA.

Galipea Cusparia (U. S. D.). *Rutaceæ.*

A bark from Angustura, South America, said to come from Galipea officinalis (Hancock), or Blonplandia trifoliata (Bonpland and Humboldt), but according to Schomburgk the tree is not known.

Proved by Hahnemann and introduced on account of the horrible poisoning cases which filled the journals from 1804 to 1815. He published it in 1821, in Part VI. of his Mat. Med. His own symptoms, 93 in number; those of his pupils, 209.

A British wholesale druggist had sent a lot of unsalable bark, coming from the East Indies, to Holland, and from Holland it went all over Germany, under the name of Angustura, a bark which had come into fashion for fever and diarrhœa, until so many were killed by it that the sale of it was forbidden. It was then found that there were two kinds of the bark in trade, the one the *vera*, the other a *falsa*.

Chemistry showed that the one called *falsa* contained strychnine. In our toxicologies we find eleven cases of poisoning with it. Hahnemann held the erroneous opinion, which he subsequently modified (Mat. Med. Pura, 2d edit., 1827),

Digitized by Google

that the poisonings were due to the massive doses given the sick, and he did not include the symptoms of Angustura falsa, as did Bœnninghausen some time later.

In the last number of his Archives, 1848, Stapf published valuable observations of Dr. Schreter on a sensitive woman, with the 30th centes., in water; a tablespoonful daily for sixteen consecutive days. Lembke made a proving in 1872. All are contained in Allen's Encyclopedia. For symptoms of *Angustura falsa*, see *Nucis vomicæ cortex* (erroneously called Bruces antidysenterica.)

[1] **Mind.** ‖Disheartened.
No confidence in use of voluntary muscles; could not finish what he attempted.
Ill-humored, oversensitive to jokes, slight offences fill him with bitterness.
‖The slightest offence, a mere trifle, irritates. θCaries.
Pusillanimity.
‖Great gloom. θThreatening paralysis of lower limbs.
Lively in afternoon.
Thinks about one project and nothing else, with great activity of mind.
A kind of waking dream in afternoon.
Kind of absence of mind, wants now this, then that thing.
Anxiety with outward pressing in abdomen, and outward cutting in chest, < in bed, at night.
Easily frightened and starts.

[2] **Sensorium.** Vertigo: when crossing a running stream; as if he was turned backward and around; periodical; from occiput forward, with pulsating in temples.
Heaviness in head, with dizziness.
When pressing head on pillow, benumbing dizziness.

[3] **Inner Head.** ‖Megrim.
‖Pressure in both temples, as if about to faint.
Pressure in forehead with heat in face.
Headache in evening until falling asleep.

[4] **Outer Head.** ‖Drawing of head to r. side, later to left.
Could not turn head.
Tensive pain in temporal muscles, when opening jaws.
Pains in bones of head.

[5] **Sight and Eyes.** Dimness before eyes from obscuration of cornea, in morning.
‖Shortsightedness.
Reading makes dizzy, sleepy, and causes quivering between brows.
Dull aching over eyes while riding (improved by *Coffea*).

[6] **Hearing and Ears.** Hearing more acute.
Sensation as of something sticking in ear.
Pains now in r., then in l. ear.
Burning in region of tympanum.
Heat in ears and both cheeks; in lobe of ear.

Digitized by Google

Cramp in external ear.
Behind ears a throbbing as from large artery.
Tearing pain in an abscess over r. mastoid process.
[7] **Smell and Nose.** Inner nose ulcerated.
[8] **Upper Face.** Tension in muscles of face.
Drawing in facial muscles.
Crawls over face after stool.
Heat of forehead, during night.
Sweat on forehead, in morning.
Heat in face with headache; heat in forehead at night.
Cold cheek while body is warm.
Feels heat in both cheeks and ears without external warmth.
The red cheeks turn cold.
Acute pains in both cheeks, occasionally darting through eyeballs and temples, < stooping, stepping, or by mental excitement; debility, depression of spirits, frequent chilly sensations and occasional attacks of nausea and looseness of bowels.
[9] **Lower Face.** Exostosis of lower jaw.
Trismus neonatorum in cases where much mercury had been given.
Tensive pain in temporal muscles, when opening jaws.
Pain in masseter muscles as if one had fatigued them by chewing too much.
Cramplike pain near articulation of jaw, in masticator muscles, especially when at rest; pain > by opening or closing jaws.
Lips dry and warm.
[10] **Teeth and Gums.** Drawing in upper teeth palliated by a cold finger.
[11] **Taste and Tongue.** Stitches in tip of tongue, very painful even without moving tongue.
Burning like from pepper near l. edge of tongue.
Tongue white, feels rough.
Bitter taste after dinner, from smoking.
Foul or flat taste in mouth.
Dry tongue, at night.
[12] **Inner Mouth.** Dry, without thirst.
Tough, foul mucus in mouth during evening sleep; could not drink enough.
Saliva runs out of mouth.
Spits an acidulated saltish fluid.
[13] **Throat.** Roughness and dryness on palate and in fauces without thirst, < when swallowing.
[14] **Appetite, Thirst. Desires, Aversions.** Aversion to solid food, desires nothing but warm drink.
Thirst without desire to drink.

Digitized by Google

‖Irresistible desire to drink coffee. θCaries.
‖Aversion to meat, especially pork.
Thirst for cold water, could not drink enough during evening.
Wants now one thing, now another, which are refused when offered.
He cannot get satisfied, without having much appetite.

[15] **Eating and Drinking.** Crawls and uncomfortable feeling before a meal.
On commencing to eat, a cutting pain in stomach, like a sore, disappears while eating.
‖Cutting and stitches in belly after taking warm milk.
Nausea while eating.
After dinner: bitter taste and belching; cutting tearing in pit of stomach; < when moving trunk.
Heat in face after supper.

[16] **Hiccough, Belching, Nausea and Vomiting.** Empty or bitter belching.
Hiccough after cough.
Nausea in morning with gulping up of a watery fluid.
Nausea while walking out-doors, with faintness and great weakness; nausea seemed to rise up into head, and he got hungry.
Incomplete eructation with a full feeling in chest.

[17] **Scrobiculum and Stomach.** Painful tension in pit of stomach and abdomen.
A contraction from region of stomach up to r. shoulder.
After siesta, hollow and empty feeling in stomach, with rising of tasteless water.
Cutting pains on commencing to eat.
Spasmodic pinching below scrobiculum in evening while sitting.
‖Dyspepsia.
‖Gastric derangements, indicated by acidity, coated tongue, pappy, unpleasant taste and loss of appetite.

[18] **Hypochondria.** Sensation as if something was too short in r. hypochondrium, contracting pressure.
Cutting under short ribs in r. side when moving trunk.
Fleeting dull stitches in l. side, shaking him to and fro.
Sensation as if "asleep" in l. hypochondrium.

[19] **Abdomen.** Very loud rumbling; in abdominal complaints.
‖Distension of belly. θArthritis.
‖Cutting in abdomen; with diarrhœa; after warm milk.
‖Indescribable pain extending in a line from navel up to scrobiculum and into sternum. θAfter inflammation of bowels.
Dull stitches near navel.
Stitches followed by drawing.

Pressure and cutting from within outward.
‖Feeling as if diarrhœa would set in.
Throbbing over l. groin.
Right side of abdomen and lower limbs as if beaten, and in walking breaking down from rheumatic pains.
Cutting across os pubis, with a pressure towards rectum; cutting and rumbling after drinking warm milk.
Spasmodic pressure while sitting as if something was boring outward; periodic throbbing and contracting.
A drawing crampy sensation in pelvis when walking.
Cramplike pain on crest of ilium, towards spine.
Dull stitches at short intervals on l. os innominatum, behind hip joint, < with every motion.

[20] **Stool and Rectum.** ‖Diarrhœa, day and night.
‖Whitish discharges; very copious thin stools.
Shivering passing over face, with gooseflesh, after every stool.
‖Cured whole families of diarrhœa preceded by cutting in abdomen and nausea in morning. θSummer complaint.
‖Diarrhœa consisting of nothing but stools of slime.
‖Insufficient stool.
‖Offensive flatus.
‖Chronic diarrhœa, with debility and loss of flesh.
‖Costiveness.
Urging in rectum, with crawls over face.
Pressing, ‖contracting, tickling in rectum and anus.
With hard knotty stool, hemorrhoidal tumors come out with increased contracting pain, lessened by applications of wet cloths.

[21] **Urinary Organs.** Frequent scanty urinations.
Urine frequent, copious and clear; after it urging.
Urine becomes black.
While urinating pimples on vagina burn.

[22] **Male Sexual Organs.** Seminal emissions two nights in succession.
Voluptuous itching of tip of glans, which forces one to rub, when walking in open air.
Violent itching on male organs.
Drawing and jerking in l. testicle and cord, with a crawl in scrotum and thigh.
Itching on scrotum.
Stitches on foreskin.

[23] **Female Sexual Organs.** Pressure in r. ovary.
Occasional sensation as if uterus was swelling.
Sensation as if uterus was falling over.
Dull motions as if uterus was beating against r. ovary, and in r. hip.
A kind of emission in morning sleep; afterwards vexatious.

Digitized by Google

Burning in all sexual parts.
Periodic throbbing and contraction above mons veneris, with a transient irritation in parts and a contraction seemingly in ligaments.
Uterus came down vagina in morning after rising, with quickly following stitches, > by cold washing.
A milklike fluid passes from vagina.
Yellow discharge a day before catamenia.
Delayed catamenia.
Several nights before catamenia, very restless; one leg on which the other was resting fell asleep, and little finger was as if dead, waking her after midnight.
On morning of her catamenia all her former symptoms appeared; sacrum as if lame, could hardly move or stoop.
Unpleasant tickling in genitals, has to scratch; after some blood appears it passes over.
Instead of catamenia, itching pustules appear on l. outer labium, burning when urinating; on inner labium some larger pustules, itching when touched.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice louder and stronger.
Hoarseness from mucus in trachea.
A slight stitch in epiglottis.
Tickling irritation, first in upper part of larynx, makes him cough, later lower down.

[26] **Respiration.** Chest feels very light, as if expiring with more ease.
Difficulty of breathing, with headache.
Intermitting spasmodic breathing.
Heaving, breathing, groaning and closing eyes.
With every inhalation, a sharp cutting pressure.
Oppression when walking fast, followed by backache and uterine symptoms.
Hiccoughing, pressing, cutting or shooting in chest, < with inhalation.

[27] **Cough.** Dry cough, with scraping and rattling of mucus in chest.
Every afternoon, at three, loose cough; in a very old woman.
Whooping cough.
Cough with belching.
A dry, hacking cough from a scratching in throat or from an irritation in windpipe or behind sternum; later copious yellow expectoration.

[28] **Inner Chest and Lungs.** Cramp in chest as if one had suddenly taken a violent cold.
Cutting pressure in both sides of chest, first only during

inspiration; afterwards changed to cutting thrusts, which continue even on holding breath.
‖Pressure in upper part of chest, like after violent running.
‖Constriction of lungs.
Contracting pressure on chest, on ribs above hypochondria.
Pressure on chest when lying on belly.
Constriction of chest < by slightest motion, on going up-stairs, to a spasmodic asthma, with anxious palpitation.
Chest complaints with headache.
Irritation from behind sternum felt through to back, as if whole r. side of chest and belly were pressed together front and back, with a sharp cutting all along sternum, in spine, < from inhalation and moving body.

[29] **Heart, Pulse and Circulation.** Violent beating of heart, with oppression after going up-stairs.
Violent palpitation in evening when lying on l. side, in bed, > when sitting up.
Violent palpitation when sitting bent over, with a painful sensation as if heart was constricted.
‖Sudden attack as if heart was swollen, with great fear of dying, better lying on l. side. θDyspepsia.
A pushing pain like a concussion in region of heart.
Pulse accelerated, spasmodic, irregular at times, intermitting.

[30] **Outer Chest.** Painful spasm in pectoral muscles.
Painful sensitiveness of chest, even to slightest touch.
A spasmodic sensation like when chest is attacked after sudden exposure to extreme cold.
Burning pressure on sternum.
Cutting in sternum, stitches.
Pectoral muscles ache when she moves in bed, and when crossing arms.
Sharp stinging itching on last rib, r. side.
Pain in r. side of chest when lifting arm.

[31] **Neck and Back.** ‖Drawing in neck.
‖Sensation of tremulousness and uneasiness in muscles of neck.
Painful stiffness in neck, and between shoulder blades.
Twitching and jerking along back, like electric shocks.
Burning in neck.
Quivering in muscles of neck, l. side.
A tension in front of throat, r. side, with sharp stitches.
Dull stitches between l. acromion and between shoulder blades, near spine.
Right side of spine, a stitch going deep into chest.
Contracting pain under shoulder joint.
Cutting in spine, in vertebræ, as if beaten violently all along back.

Digitized by Google

Stiff pain like drawing between scapulæ and nape of neck, early in morning when in bed; when rising she was unable to move her arms on account of pain, nor was she able to turn her neck whole forenoon; several mornings in succession, lasting till noon, with weakness of whole body.

Pain in cervical vertebræ as if dislocated, when lifting arm.

Much pain in spine, at nape of neck and sacrum especially, < on pressure.

Pressure in sacrum all night, wakens her.

Small of back feels lame, cannot stoop.

Dull "guggling" in sacral bone.

As if beaten in small of back, laterally, while sitting.

[32] **Upper Limbs.** Pressing cutting in axilla.

Cramplike drawing down arm to fingers.

After great exertion in posing for an artist, in a difficult position with uplifted and stretched arms, a weakness in arms, disabling him for any work; complained of a stiffness in elbow joints and lamy heaviness of arms.

Cannot lift up arm on account of a tension in muscles, near axilla.

Sensation in bones of upper arm as if beaten; rending in bone.

Heaviness in arm; l. arm in walking presses on bend of elbow as if drawing down arm; when stretching arm, lameness, as after holding a heavy load.

Painless, quick throbbing and pricking or quivering in upper part of shoulder.

Stinging in r. shoulder joint, with swelling of r. side of throat, cannot turn head, followed by transient warmth through r. arm.

Stiffness in elbow joint, with weakness of lower arm; pain in elbow on moving arm; pain in elbow joint, as after a concussion, < when moving arms and when resting on it.

Cramplike drawing in forearm and hand.

Stitches from hand up to elbow.

Heaviness of hands.

Hands swollen, cannot close them.

Sore pain in first knuckles.

In r. wrist, sprained feeling and deep stitches.

In back of hand, rheumatic pressing and dull stitches.

Joint of thumb as if sprained, when bending it.

Pressing in ball of l. thumb.

Drawing tearing or numbness in fingers.

Fingers of r. hand cold.

[33] **Lower Limbs.** Sudden heaviness and weakness in lower limbs, cannot walk quickly, limbs feel stiff.

Digitized by Google

Pressing, tearing, stinging in lower limbs.
Tearing in thigh on bending knee.
Heaviness in feet.
Cramp in feet, < in rest.
Pain on inner side of ankle, when walking, causing limping.
Pressing pain in heels.
!Threatening paralysis of legs with trembling of feet.
θArthritis.
!!Pain in knees.
!Nodes on legs and feet.
!Spavin with horses.
Hip joint as if exarticulated, can hardly walk.
Frequently in hip a cramplike pain when moving, as if stiff or dislocated.
Constriction in r. hip.
In both hip joints, deep in tendons, a pressing drawing pain when rising from seat.
Boring laming pain along ischiatic nerve on posterior part of thigh.
!!Exceedingly painful stitches in thigh and crest of ilium, only when sitting.
Muscles of thigh as if lame; when moving, a painful tension.
Tearing as if in bones, < in rest.
When stretching, a pressing tension in anterior muscles of thigh.

[31] **Limbs in General.** Drawing in limbs, with soreness.
Gets stiff after sitting a while.
Cracking in all joints.

[35] **Rest. Position. Motion.** Nausea when walking, as if she would faint; she has to sit down.
!Great difficulty in walking, with threatening paralysis of legs.
!Very much disposed to stretch his limbs.
In rest: cramp in muscles of jaw, tearing in arms, pinching in loins, tearing in thighs, cramp in front part of foot; cramps in feet <; tearing in bones of legs <.
After lying down: cutting stitches in ribs.
Lying on side: painful; l. side falls asleep; prickling in calves.
Lying in bed: anxiety.
Lying on belly: contractive pressure in chest.
Lying on l. chest: palpitation <; swollen sensation of heart >.
Sitting bent over: violent palpitation.
Sitting: vertigo from occiput to forehead; heaviness in head; cramp below pit of stomach; pinching below

Google

scrobiculum; cutting across pubes; palpitation of heart >; stitches on breast bone, below and near sacrum; startling stitches in thighs and hip bone; pressing on shin; dull drawing in r. foot joint; burning heat on r. ankle; cramps in sole of foot; tearing in sole; stiffness; falling asleep.

Rising from seat: pain in hip joint.

Stooping: pain in face, temple and ankle <; soreness in forehead; palpitation; pressing in l. brain; lameness of small of back.

Stretching: tension in anterior muscles of thigh.

Moving trunk: tearing in pit of stomach; cutting under short ribs; pressure over whole side, chest and abdomen.

After rising: prolapsus uteri in morning.

Stepping: makes pain in face, temple and eyeball <; pain in sacrum and lower foot.

Walking fast: contraction in head and chest; backache; cramp; legs feel stiff; oppression.

While walking: head is drawn to r.; pains in bladder and pelvis; l. arm heavy; whole side rheumatic, thighs, knee, shin, foot; itching of glans penis; nausea, pains in ankle <; chills over back.

Walking over running water: vertigo.

When moving: stitch in back; hips as if out of joint; tension in front of r. thigh.

Bending thumb: pains in joint.

Motion: changes constriction in chest to spasmodic asthma; in bed, aching of pectoral muscles, < stitches behind hip joint; of arm < pain.

Ascending stairs: spasmodic asthma following constriction in chest; palpitation.

Cannot lift arm: tension in muscles near axilla.

Lifting arm: pain in r. side of chest; pain in cervical vertebræ.

Opening jaw: tensive pain in temporal muscles; pain in masticator muscles >.

[36] **Nerves.** ‖Cured tetanus in a horse; given because animal showed a spasmodic twitching.

‖Rheumatic and paralytic complaints. θParalysis.

‖Great irritability and morbid liveliness.

Great loss of power, as if marrow in bones was stiff.

‖‖Very much fatigued, most in thighs.

Weariness with stiffness between shoulders.

[37] **Sleep.** ‖‖Attacks of gaping with cramps in jaws, and apprehensive about it.

A backward drawing of head, > after gaping.

Sudden attacks of anxiety at night.

Heat, mostly in face at 3 A.M., disturbing sleep, followed by chilliness.

Digitized by Google

Falls asleep when reading.
While lying in bed, anxiety as if she never would get awake again.
Restless sleep, wakens often; many dreams.

[33] **Time.** At night: sudden attacks of anxiety; outward cutting in chest, < heat of forehead; pain between shoulder blades; sacrum as if beaten; heat, sweat and thirst.
All night: pressing in sacrum as if broken, awakens her, < at 4 A.M.; getting up lessens it.
After midnight: numbness of leg and finger awakens her.
Cannot sleep after 3 o'clock, heat prevents it.
In morning: in bed, heat on head; sweat on forehead; stiff between shoulders; crawling in feet; pressing in foot; ‖ chill; sweat; misty before eyes, tension in them; lids agglutinated, ‖ looseness after bellyache; chilliness without heat.
After rising: uncomfortable; thirsty; bellyache; stiff neck.
When getting up: uterus sinking down in vagina; unable to move her arms, pain.
Morning: nausea, gulping up watery fluid; cutting in abdomen.
Forenoon: stiff neck; backache; chill over back; chill.
Afternoon: a kind of waking dream; lively; excitement; burning in eyes; milky leucorrhœa; cough; at 3 o'clock, crawls followed by warmth.
Evening: vertigo; ‖ headache; heat in head; pain in eyes; toothache; pain in chest; very sleepy; ‖ hot; mouth foul, etc., with thirst; pinching below scrobiculum.
Evening in bed: itching.
‖ Palpitation in evening in bed.
Day and night: diarrhœa.

[35] **Temperature and Weather.** Cold finger lessens toothache.
Cold applications lessen pain in hemorrhoids.
Cold water: thirst for.
Cold washing relieves stitches in uterus.
Covering neck, it is too warm; uncovering, too cool.
Warm drink desired.
Heat in evening after entering a room.
In open air: vertigo, headache and heat.
Better in open air: forehead as if beaten inwardly; muscles of neck as if beaten; crawls and gooseflesh.
In open air: great serenity; nausea and fainting; pain in side of abdomen; voluptuous itching on point of glans; rattling in chest; pain in elbow joint; stitches in patella, in ligaments of knee; pressing pain in foot; great gaping and tiredness; nausea while walking.
In bed: anxiety <.

Digitized by Google

Must uncover arms when skin is irritable.
Traveling through swamps in a hot climate: intermittent.

40 **Fever.** Repeated chilliness over affected part.
Early in morning in bed, chilliness without subsequent heat.
Chill in morning and forenoon, preceded by thirst.
Violent chill every afternoon at 3 o'clock.
Chills over back when walking up and down room.
Coldness, followed by heat same day; recurring now in evening, then at noon, then in morning, with thirst in beginning of fever and vomiting of bile; after traveling through swamps in a hot climate. θIntermittent.
Cold hands and chilliness in back.
Flushes of heat, with sweat and anxiety.
Sweat only in morning; on forehead.
Crawls up back, with restlessness extending to inner parts, causing trembling, with dry warm lips without thirst, later some heat.

41 **Attacks, Periodicity.** Periodical vertigo; throbbing and contracting in abdomen.
After every stool: shivering over face, with gooseflesh.
Every afternoon at 3 o'clock: loose cough; violent chill.
Several mornings in succession: pain between scapulæ and nape of neck.
Two nights in succession: seminal emissions.
A day before catamenia: yellow discharge.

42 **Locality and Direction.** Right: abscess over mastoid process; drawing in side of face; contracted feeling in hypochondrium; cutting in side; contraction from region of stomach up to shoulder; side of abdomen and leg feel as if beaten; pressure in ovary; beating of uterus against ovary and hip; constriction of hip; side of chest feels pressed together; sharp stinging in side of chest, in arm; swelling of throat; wrist feels sprained; transient warmth through arm; fingers cold.
Left: burning on edge of tongue; flying stitches here and there in side; as if asleep in hypochondrium; throbbing over groin; crampy pain in os innominatum; drawing and jerking in spermatic cord; pustules on labium of vulva; thumb feels sprained; caries of ankle.
From r. to l.: head is drawn; earache.
To r. shoulder from stomach: contraction.
Within outward: pressing in abdomen and cutting in chest, with anxiety.
Without inward: crawlings with trembling.
Below upward: crawlings in back.
Nausea rises up in head. See 16.
Vertigo from occiput to front.

45 **Sensations.** Weakness of whole body, as if marrow of bones was stiff; vertigo, as if he was turned backward and around; as if about to faint; as if something was sticking in ear; as if one had fatigued masseter muscles by chewing; as if something was too short in r. hypochondrium; as if "asleep" in l. hypochondrium; as if diarrhœa would set in; side of abdomen and lower limbs as if beaten; as if something was boring outward in abdomen; as if uterus was swelling; as if uterus was falling over; as if all tendons were stretched; as if uterus was beating against r. ovary and in r. hip; little finger as if dead; sacrum as if lame; chest light as if expiring with more ease; cramp in chest as if from sudden violent cold; as if whole r. side of chest and belly was pressed together, front and back; as if heart was constricted; as if heart was swollen; as if beaten violently all along back; cervical vertebræ as if dislocated; small of back, laterally, as if beaten; bones of upper arm as if beaten; joint of thumb as if sprained; hip joint as if exarticulated; hip as if stiff or dislocated; muscles of thigh as if lame; tearing as if in bones; as if marrow of bones was stiff; anxiety as if she would never get awake again; forehead as if beaten inwardly; muscles of neck as if beaten.

A kind of motion through whole body, now a prickling now a stinging.

Hollow and empty feeling: in stomach.

A pushing pain like a concussion in region of heart.

Stitches: in tip of tongue; in belly; fleeting and dull in l. side; dull near navel; in abdomen; dull on l. os innominatum; in foreskin; in prolapsed uterus; a single stitch in epiglottis; below and near sacrum; in front of throat, r. side; dull near spine between scapula, l. side; in sternum; a stitch r. side of spine, penetrating chest; from hand to elbow; in r. wrist; dull in back of hand; in thigh and crest of ilium.

Cutting: in stomach; in belly; in pit of stomach; under short ribs, r. side; in abdomen; in os pubis; in abdomen before stool; with irritation; in both sides of chest; along sternum; in sternum; in spine; in vertebræ; in axilla; thrusts in chest.

Darting: through eyeballs and temples; through chest.

Shooting: in chest.

Stinging: in r. shoulder joint; on last rib, r. side; in lower limbs.

Boring: along ischiatic nerve.

Tearing: in abscess over r. mastoid; in pit of stomach; in fingers; in lower limbs; in bones of lower limbs; in thigh.

Digitized by Google

Spasmodic pinching: below scrobiculum.
Burning: in region of tympanum; as from pepper on edge of tongue; in pimples on vagina; in female sexual parts; pressure on sternum; on neck.
Drawing: in facial muscles; in upper teeth; in abdomen; in pelvis; and jerking in l. testicle and cord; in neck; between scapulæ; cramplike down arms to fingers; in limbs, with soreness.
Stiff pain like drawing between scapulæ and nape of neck.
Contractive pain: under shoulder joint.
Tensive pain: in temporal muscles; in pit of stomach and abdomen; in anterior muscles of thigh.
Pressing pains: in heels.
Pressure: in temples; in forehead; in r. hypochondrium; and cutting in abdomen from interior outward; towards rectum; spasmodic in abdomen; in rectum; in anus; in r. ovary; in chest; in upper part of chest; on chest; in sternum; in sacrum; in axilla; rheumatic in back of hand; in ball of l. thumb; in lower limbs; in heels; and drawing in hip joints.
Constriction: in chest; of lungs; in heart; in r. hip.
Contraction: from region of stomach to r. shoulder; in rectum; above mons veneris; of chest; under point of shoulder.
Contracting pressure: in hypochondrium; on chest; on ribs.
Cramplike drawing: down arm to fingers.
Cramp: in external ear; cramplike pain in masticator muscles; on crest of ilium towards spine; in chest; in hip; in feet.
Aching: over eyes; in pectoral muscles.
Pains: in bones of head; now in r. now in l. ear; acute in both cheeks; in masseter muscles; running from abdomen to sternum; in r. side of chest when lifting arm; in spine, cervical portion and sacrum; in elbow; sore in knuckles; in knees; on inner side of ankle.
Indescribable pain: from navel to scrobiculum into sternum.
Pricking: in top of shoulder.
Throbbing: in temples; behind ears; over l. groin; periodic in abdomen; above mons veneris; in upper part of shoulder.
Swelling: in uterus; in heart.
Tension: in muscles of face; as if something was too short in r. hypochondrium; in front of throat, r. side; in muscles, near axilla; in thigh..
Painful spasm: in pectoral muscles.
Painful sensitiveness of chest.

Digitized by Google

Spasmodic sensation: in chest.
Quivering: between brows; in cervical muscles; in top of shoulder.
Twitching: and jerking along back, like electric shocks.
Sprained feeling: in r. wrist; in joint of thumb.
Weakness: of lower arm.
Lameness: in sacrum; in small of back; of arms after exertion; in anterior muscles of thigh.
Lightness: in chest.
Heaviness: in head; in legs; of arms and hands; in feet.
Stiffness: painful in neck; between shoulders and drawing between scapulæ and in nape; in elbow joints; from sitting awhile.
Tremulousness: and uneasiness in cervical muscles; of feet.
Dryness: of lips; of tongue; of mouth; on palate.
Roughness: on tongue; on palate.
Numbness: in fingers.
"Gone-to-sleep" feeling: in l. hypochondrium; in leg on which she is resting; little finger as if dead.
Heat: in ears and cheeks; of forehead; in face.
Coldness: of cheek; of fingers.
Crawls: over face; before a meal; over face, with urging in rectum; in scrotum and thigh; up back.
Tickling: in rectum and anus; in genitals; irritation in larynx.
Itching: tip of glans; on male organs; on scrotum; pustules on labiæ; on last rib, r. side.

"**Tissues.** Spinal marrow and extensor muscles are principally affected.
Constricting sensation in varices.
Cracking in all joints.
‖Caries, ulcers very painful; penetrate to marrow.
‖Caries and very painful ulcers, which affect bones and pierce them to marrow.
‖Caries of tubular bones, particularly if patient has longing for coffee and has a very touchy, sensitive mind.
‖Caries, with crumbling off of pieces of bone.
‖Rheumatic and paralytic complaints.

"**Touch. Passive Motion. Injuries.** ‖Great exertion of arms brought on a lameness.
‖Traumatic tetanus: the lady ran a pin into her foot; two weeks after she was taken with tetanic pains, striking from the point injured back to the heel, then up the limb and up her back; she had also darting spasmodic pains in her neck, and darting shooting pains from the nape of the neck to the jaws, both sides; jaws

Digitized by Google

stiff, not closed. *Angust.*^{30}, every thirty minutes. In an hour the pains abated, and she gradually recovered.
Rubbing: lessens itching on limbs.
Touch: causes itching on inner labia; chest sensitive.
Pressure of arms crossed causes aching in pectoral muscles.
Pressure: < pain in spine.
Riding causes dull aching over eyes.
Scratching: relieves itching of female genitals after bleeding some.

[46] **Skin.** Skin irritable, burns, has to uncover arms.
Itching, evening in bed, after rubbing painful ulcerations.
Itching of tip of glans penis; so intense must rub it.
Pruritus, impetigo.
Flat ulcers eating into bones; appear after friction.

[47] **Stages of Life, Constitution.** Old woman: loose cough every afternoon at 3 o'clock.
A young girl: caries of l. ankle.

[48] **Relations.** Symptoms caused by *Angust.*: bellyache after warm milk; relieved by *Bryon.*
Angust. was curative after *Pulsat.* helped inflammation of bowels. See 19.
Antidote: *Coffea*, not *Camphor.*
Belongs to family of Rutaceæ, which are general antidotes to mercury.
Has been given where *Cinchon.* failed to cure fever.
Hahnemann noticed the similarity of effect between *Angust. vera* and *falsa*, or *spuria*; a very surprising observation, but confirmed by facts, even cures of tetanus.
Similar to *Bellad.* (aggravation in afternoon, 3 P.M.: easily startled, heat in female genitals); *Bryon.* and *Rhus tox.* (in rheumatism); *Bryon.*, *Cepa*, *Chamom.* and *Coffea* (in toothache relieved by cold); *Bellad.*, *Cicut.*, *Ignat.* and *Nux vom.* (in trismus); *Mercur.*, *Phosphor.*, and *Silic.* (in caries of lower jaw); *Aescul.* and *Aloes* (piles, backache). *Ant. crud.*, *Ant. tart.*, *Lilium*, *Natr. mur.*, *Pulsat.* and *Sepia* (in eruptions); *Hyper.* and *Ledum* (punctured wounds); *Ran. bulb.* (in pains in pectoral muscles).

ANISUM STELLATUM. (See Illicium.)

ANTHRACINUM.

The alcoholic extract of the anthrax poison prepared from the spleen of cattle befallen with the disease. A nosode rejected by the Old School, and by a majority of the New, in spite of its being a remedy which bears out our theory, and one which has proved of the utmost use in practice. It has not yet been proved, but the frequent use made of it by some of our best practitioners justifies its reception. The first preparation was made according to C. Hg's propositions (laid down in Stapf's Archives, 1830), by Dr. G. A. Weber, and applied with the most astonishing success in the cattle plague. He cured every case with it, and also men poisoned by the contagium. His report, a small treatise of 114 pages, was published in 1836, by Reclam, Leipzig. No notice was taken of it. Only the talented Dr. P. Dufresne, the founder of the Bibliothéque Homœopathique, of Geneva (see eulogium by Griesselich, in Hygea, VI., p. 351, 352), used it, and prevented the further murderous spread of the disease, in a flock of sheep (among which it is always more fatal than among other domestic animals), and cured the shepherds as well (Biblioth. Homœop. de Geneve, Jan. and Feb., 1837).

The discovery of the bacteria and their incredibly rapid propagation seemed to be of much more importance than the cure of cattle, and the loss of millions of dollars by this disease. In 1842 France sustained a loss of over seven millions of francs, and every year a small district of Germany has a loss of sixty thousand thalers from the cattle plague; in Siberia, in 1785, 100,000 horses died with it; in 1800 one small district lost 27,000 horses. Radiate heat, proposed scores of years ago, for other zymotic diseases, by C. Hg., was discovered, in a very ingenious way, by Pasteur, to prevent the increase of bacteria. Now the heat (as it has done in hypdrophobia), and the nosode may suffice to cure every case.

Dr. Küsemann had moral courage enough to introduce *Anthracine* in gangrene and sphacelus, in 1853, and Doctor Raue has given it in carbuncles since 1858. See his Pathology and Diagnosis, and in gangrenic whitlow, see Journal of Clinics, 4, 142.

The symptoms of a case of glander poisoning, prominent among them blue boils, in a Veterinary, cured with *Anthracinum*^{30} (Tafel's preparation), by Knerr, are added.

All symptoms produced by the poison on men are inserted, because the symptoms from the snake-bite and from the bee-sting have been proved to be useful in numerous cases; they are marked ||.

[1] **Mind.** ||Anxiety, particularly in præcordia.
||Delirium and excitement. θWith the fever.

Digitized by Google

‖Loss of consciousness.
‖Depression, with debility and chill.
‖Thinks she feels death approaching.
Animals howl, bite, run about, become greatly excited; followed by paralytic symptoms.
|Disinclined to work. θCynanche cellularis.

[2] **Sensorium.** Dulness in head as from narcotics.
‖Confusion. θWith the fever.
|Dizziness.
‖Dizziness with pain in head.
Loss of consciousness.

[3] **Inner Head.** ‖Headache, as if a smoke with a heating pain was passing through head (fumée de douleur chaude); two shepherds who caught it from their flock. θAnthrax carbuncle.
|Head is affected in an indescribable manner. θPoisoning by a foul breath.
‖Uncomfortable feeling in head, slight chills, mild fever.
‖If fully conscious they complain of great pain in head.
‖Pain in head, dizziness; inner anthrax.
‖Here and there in all parts of brain small and large hemorrhages of embolic origin; after death from anthrax.
‖Membranes of brain exhibit circumscribed or symmetrically extended bloody infiltrations.
‖Headache with chill.
Cerebral symptoms with carbuncle.

[4] **Outer Head.** Flying gangrene.
Small swellings on temples and cheeks, extending through orbital sutures and foramina to dura and pia mater.
Carbuncles mostly on head, near ears or temples.
|Flying gangrene, head swollen (in swine).
|Swelling of head (sheep).

[5] **Sight and Eyes.** ‖Great dilatation of pupils; inner anthrax.
‖A pale yellowish or greenish swelling, if in eyelids, of a half-translucent aspect.
|A pale redness above brows along forehead.

[6] **Hearing and Ears.** ‖Ringing in ears; inner anthrax.
: Parotitis gangrenosa, after scarlatina.
|Swelling extending backward over angle of r. lower jaw, which could not be felt, and up to near ear. θCynanche cellularis.

[7] **Smell and Nose.** Nose swollen and red, fetid smell from it.
‖Bloody suffusions on mucous membrane of nose.
|Intense, redness of r. half of nose, extending to cheek. θPoisoning from foul breath.

[8] **Upper Face.** |Erysipelatous, dark brown redness and

Digitized by Google

swelling over whole r. side of face, nose and part of l. cheek; swelling very hard, redness does not disappear under pressure of finger. θPoisoning by foul breath.

‖Extending to cheek, redness from nose.

[9] **Lower Face.** ‖Could not move lower jaw as usual. θCynanche cellularis.

‖Could open mouth only far enough to put point of tongue out. θCynanche cellularis.

‖Impossible to open jaws. θCynanche cellularis.

‖Tearing in r. lower jaw.

‖Beginning of swelling was the region of r. submaxillary gland. θCynanche cellularis.

‖A stony swelling around r. lower maxilla, inner space of mandibula filling up to half, reaches to nearly half the cheek, and disfiguring face, extending backward over angle of lower jaw, very little pain, not red, but sharply defined edges. θCynanche cellularis.

‖Swelling extending from inner edge of l. lower jaw across whole throat, in front and over edge of r. lower jaw, and *au niveau* with upper surface of r. lower molars. Cynanche cellularis.

‖A large, stony hard, pale swelling around r. lower jaw, nearly painless, disfiguring face. θCynanche cellularis.

‖Gland under chin painfully swollen. θPoisoning by a foul breath.

[10] **Teeth and Gums.** ‖On making an incision near second molar a mass of stinking, brown ichor is discharged. θCynanche cellularis.

[11] **Taste and Tongue.** ‖Flabby taste. θPoisoning by foul breath.

‖‖Tongue often furred with a thick brown coat; dry.

[12] **Inner Mouth.** ‖Offensive odor from mouth. θCynanche cellularis.

‖Mouth could not be opened. θCynanche cellularis.

‖Saliva increased. θCynanche cellularis.

‖‖Continued bleeding from mouth; blood shows a lack of power to coagulate; with inner anthrax.

‖‖Dark red, bloody ecchymoses in mouth.

‖‖Bloody suffusions and hemorrhagic collections on mucous membranes of canthi of mouth and nose; inner anthrax.

‖Fundus of mouth is elevated by the swelling, as hard as a callus, extending back to parotis, and reaching up to external surface of lower jaw. θCynanche cellularis.

‖‖Superficially eschared pustules in mouth after death.

[13] **Throat.** ‖‖The submucous tissue, especially in fauces and around larynx, is thickened and œdematous.

‖Region of throat above larynx to mouth swollen. θCynanche cellularis.

Digitized by Google

Submaxillary, laryngeal and retro-pharyngeal glands are infiltrated, hyperæmic, filled with hemorrhagic foci, colored of a greyish or dark blackish red, and considerably enlarged.

‖Right tonsil hurts. θCarbuncle. θErysipelas.

‖Anthrax quinsy.

‖Cynanche cellularis; a sharply marked margin about swellings.

‖Slight difficulty in swallowing; inner anthrax.

‖Swallowing exceedingly difficult. θCynanche cellularis.

‖Could not swallow, with great thirst.

[11] **Appetite, Thirst. Desires, Aversions.** Diminished appetite, with heat.

‖Loss of appetite, with chills.

‖Loss of appetite and gastralgia; inner anthrax.

‖‖Loss of appetite. θCynanche cellularis.

Thirst with heat.

‖Excessive thirst, but can hardly swallow. θCynanche cellularis.

[15] **Eating and Drinking.** ‖Symptoms from putrid water.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Belching, nausea and inclination to vomit.

‖Nausea and vomiting with chill.

Vomiting of bilious and slimy masses.

‖Vomiting followed by diarrhœa.

Nausea and vomiting following great pain in abdomen.

[17] **Scrobiculum and Stomach.** ‖Pressure and burning in region of stomach.

‖Gastralgia.

‖Walls of stomach and intestine œdematous, discolored, a cloudy red.

‖Mucous membrane of stomach and intestines reddish, swollen, with isolated or numerous œdematous, hemorrhagic prominent infiltrations, from size of a lentil to that of a coffee bean, showing a greyish or greenish yellow discolored surface, with a positively sloughing centre.

‖Numerous peculiar hemorrhagic and superficially eschared infiltrations of stomach and intestines; intestinal anthrax.

[18] **Hypochondria.** ‖Sensation as if diaphragm was pushed forward. θPoisoning by foul breath. θErysipelas.

‖Sensation of anxiety and constriction, most in præcordia, liver engorged, slight hemorrhage here and there, spleen moderately enlarged, soft, full of blood, dark color.

‖Enlargement of spleen.

The spleen, the main seat of the anthrax in animals, is rarely cured in men (Old School).

Digitized by Google

‖‖Epidemic spleen disease of cattle or horses.
: In alternation with *Arsen.*
‖‖The same disease in sheep. *Anthracinum suum* is better than *Anthracinum ovium* in the acute form, but in the chronic form *Anthracinum ovium* is better.

[19] **Abdomen.** Sudden prostration with great abdominal soreness, mostly in epigastrium with vomiting, cold limbs, dull head.
‖Bellyache with chill.
‖Colicky pains; inner anthrax.
‖A horse fell down with colic, no motion except now and then bending head towards abdomen.
‖Mycosis intestinalis; intestinal anthrax.
‖In intestines a thinly fluid material, slightly colored with blood.
‖The retro-peritoneal and mesenteric connective tissue infiltrated, jellylike, and of a yellowish-reddish color.
‖Moderate serous or sero-hemorrhagic effusion and subperitoneal suggilations.
‖Simple hemorrhages, infarctions and foci on different parts of intestines.
‖Serous and sero-hemorrhagic infiltrations of peritoneal and mesenteric connective tissue, walls of stomach and intestine, and of mucous membranes.
‖Mesenteric and retro-peritoneal glands enlarged to size of a walnut; from blackish red masses, held together by a jellylike congestive tissue, infiltrated with scrum.
Dark red carbuncle in omentum.
‖Peculiar pustular and carbuncular foci in intestinal tract.
Swelling of abdomen; inner anthrax.

[20] **Stool and Rectum.** Vomiting, followed by a painless, often bloody diarrhœa.
Diarrhœa with bellyache.
‖Diarrhœa. θWith the fever.
‖Vomiting followed by a painless, moderate, more or less intense, often bloody diarrhœa; inner anthrax.
‖With the diarrhœa sometimes a choleralike collapse; inner anthrax.
Retarded stool.

[21] **Urinary Organs.** Kidneys swollen, with œdema, sprinkled with small hemorrhages, engorged; suggilations in mucous membranes of pelvis.
πHad to get up five or six times through the night and passed a chamberful of clear urine. θBlue boils after glander poisoning.

[26] **Respiration.** ‖Breathing frequent, laborious; quick, spasmodic; inner anthrax.

Digitized by Google

[28] **Inner Chest and Lungs.** Pulmonary hyperæmia, ecchymoses.

||Slight serous effusions into pleural cavities.

||Subpleural ecchymoses with vascular engorgement, and a dark coloring of parenchyma.

||Œdema of mediastinal lymphatic glands.

[29] **Heart, Pulse and Circulation.** Heartbeat frequent but weak.

|Her heart beats altogether different. θPoison by a foul breath.

||The beating of the heart stronger, more decided and more perceptible.

|Pulse frequent, small, with violent action of heart; soft; |small and feverish. θCynanche cellularis.

|Soft, scarcely frequent pulse. θPoisoning by a foul breath.

||Discolored lines over veins, or red lines and stripes in course of lymphatics.

||Cyanosis; inner anthrax.

||Blood of a dark cherry red, generally fluid or with some loose clots.

||Blood not coagulating.

[31] **Neck and Back.** Axillary glands swollen and painful. θErysipelas.

|Swelling in neck size of hazelnut, burning and fiery red; is pointed and hard. θCarbuncle on neck.

||Carbuncle on back, nine inches in length and five inches in its greatest width; with sloughing, abundant discharge of ichorous, terrible smelling pus, and blood-poisoning by absorption of pus. θPyæmia.

:Hydrorhachitis (Grubbe, Kreuzdrehe), a disease of sheep.

[32] **Upper Limbs.** ||Tetanic spasms of upper limbs, inner anthrax.

|Arms and hands covered with a crusty eruption, full of cracks, discharging pus and an acrid fluid, with painful, unbearable itching; checked for a while by the Old School, it had burst out again with terrible fury. After *Anthracine*, the crusts peeled off and were flying about like snow.

|The whole l. hand (not the fingers) swollen, highly reddened, very painful; redness extended over whole hand and even wrist, and a red streak ran up forearm. θInflammation of hand.

|On middle of palm of hand a large blister, which, when opened, discharged a yellow watery fluid.

||Felon, the worst cases, with sloughing.

|Whitlow.

|Acute pain in bones of hand and burning to finger tips. θBlue boils after glanders poisoning.

Digitized by Google

[35] **Lower Limbs.** ‖Thighs livid to nates, hard and painful; lower legs dark blue, feet œdematous; when blisters break they discharge an offensive ichor. θTraumatic gangrene.
‖The whole thigh was swollen, most above knee, and also foot. θAfter a fracture of tibia.
‖Livid redness on lower part of whole thigh, up to buttocks, hard and painful. θAfter a fracture of tibia.
‖Above knee, redness, swelling and pain, and later a large black blister on inside of thigh, extending four inches upward and inward; after being lanced bloody water ran out. θFracture of tibia.
‖On outside of knee a large fluctuating swelling, by pressure discharging a horribly smelling gangrenous ichor. θAfter fracture of tibia.
‖From openings on lower leg, caused by fracture, a copious stinking pus (like from carious bones). θTraumatic gangrene.
‖Bluish-brown spots, which break open.
‖The whole lower limb blackish-blue; region of blister (foolishly lanced) mortified, discharging much stinking ichor. θAfter a fracture of tibia.
‖Ulcers size of hand on lower limbs; no antipsoric had relieved. *Anthrac.*[30] helped very soon.
Carious ulcers.
‖Foot œdematous. θFracture of tibia.

[31] **Limbs in General.** Discolored lines trace out veins over œdematous part.
‖‖Severe pains in limbs and joints with fever; intestinal anthrax.
‖ Pains in knees and arms. θBlue boils after glanders poisoning.
Limbs as if beaten.
Limbs weak.

[36] **Nerves.** ‖‖Great restlessness.
Paroxysms of trembling.
Single muscles start or tremble.
‖‖Epileptiform convulsions; inner anthrax.
‖‖Clonic spasms, trismus or opisthotonos; sometimes in serious cases.
Clonic spasms.
‖‖Tetanic spasms in upper limbs.
‖‖Opisthotonos; inner anthrax.
Debility and depression, with pain in limbs.
‖‖Debility with chill.
‖‖Great weakness, with fever.
‖‖Debility and depression, with pains in limbs and general sense of malaise, followed by disturbance of intestinal canal; inner anthrax.

Digitized by Google

‖Debility and sweat all over. θCarbuncle.
‖Completely exhausted, she thinks she feels death. θPoisoning by foul breath. θCarbuncle.
‖Choleralike collapse after diarrhœa.
Collapse, with difficulty of breathing; loss of consciousness; death.
‖Sudden fatal issue, preceded by extreme collapse.
‖With cyanosis, asphyxia and the most extreme collapse, followed by death in all cases of bleeding.
‖Marked rigor mortis after death.

[37] **Sleep.** ‖Somnolence; inner anthrax.
‖Could not sleep for pain. θInflammation of hand.
‖Sleeplessness. θCynanche cellularis.
‖Restless sleep, twitches and violent jerks in sleep. θBlue boils after glanders poisoning.
‖Sleep short, unrefreshing. θErysipelas.
Delirium, sopor, then death.
‖Sleep short, not refreshing, more like a stupor. θPoisoning by foul breath.
‖Restless, irritated at night.
‖Restless sleep; with chill.

[39] **Temperature and Weather.** July, August and September furnish the greatest contingent.

[40] **Fever.** ‖Chilly, with debility, headache, followed by a general malaise, loss of appetite, restless sleep, great debility and depression, and in eight or ten days carbuncles, most on arm, forearm, head. θAnthrax from eating meat of diseased animals.
‖Decided chill, followed by bellyache, nausea, vomiting and in two or three days with supervention of collapse and cyanosis; death. θAnthrax after eating diseased meat.
‖Slight chills with fever and strange sensation in head.
With great prostration, chilliness, pains in limbs, increase of fever and weakness, anxiety, restlessness, vertigo, delirium, dull head; stool retarded, urine scanty; skin dry, later covered with cold sweat.
‖Temperature very slightly elevated; inner anthrax.
‖Febrile movement, slight in beginning, is often followed apace by high fever; great weakness, delirium, excitement, confusion.
‖Moderate heat, little thirst, general sweat. θPoisoning by foul breath.
‖Very much fever. θCynanche cellularis.
‖Heat, thirst, less appetite, suffering and fatigued. θInflammation of hand.
‖Fever with diarrhœa.
Fever attended by sweating.

Digitized by Google

‖Sweat all over with debility.
‖Disposed to sweat; rather sticky. θCynanche cellularis.
‖Copious sweat. θCynanche cellularis. θCarbuncle.
‖Cold sweats, in serious cases.
Typhoid type, with rapidly sinking pulse, loss of strength, fainting, delirium.

41 **Attacks, Periodicity.** Attacks: of trembling; of headache with chills and coldness of head.
Course in one case irregularly intermittent; inner anthrax.
Paralytic symptoms intermit.

42 **Location and Direction.** ‖Right: side of nose redness; lower jaw, softness, fluctuating; tonsil hurts.
‖Left hand swollen and red.
From r. to l.: dark brown redness in face.
‖Sensation as if back part of diaphragm was pushed forward. θErysipelas.

43 **Sensations.** ‖Pricking pain like that of a bite of a fly.
‖Swelling sometimes very painful, as if skin was touched by nettles, more in daytime. θCarbuncle on neck.
As if a smoke, with a heating pain, was passing through neck; as if diaphragm was pushed forward; as if skin was touched by nettles; limbs as if beaten.
‖Slight burning and itching, as from bite of an insect, on spot having come in contact.
‖‖Terrible burning. θParonychia. θCarbuncle.
Pain: in head; in limbs.
Tearing: in r. lower jaw.
Pressure: in region of stomach.
Burning: in region of stomach.
Colicky pains: inner anthrax.
Dulness: in head.

44 **Tissues.** Blood black, thick, like tar, decomposing rapidly.
Injection and ecchymosis, on motor organs of deglutition.
Hemorrhagic exudations.
Blood oozes from mouth, nose, anus or sexual parts.
‖Hemorrhages in different parts of body.
‖Diffuse phlegmon; inner anthrax.
Surrounding tissue infiltrated with cloudy serum and small hemorrhages.
‖Red lines, streaks and stripes mark out course of lymphatics.
‖Glands in throat and under maxilla indurated.
‖Gland painfully swollen under chin.
‖Hemorrhagic infiltration of mesenteric and other lymphatic glands.
Lymphatic glands hard, swollen, dark red, infiltrated with a bloody serum.

Digitized by Google

The lymphatic vessels and glands swell, get hardened and if cut across, are very red, harder or softer, always infiltrated with a hemorrhagic or bloody serous matter.

Lymphatic glands swollen, dark red, brittle or softened as if filled with extravasations.

Corresponding lymphatic glands swell.

Mediastinal lymphatic glands œdematous.

Most mucous membranes are injected and reddened.

Induration of cellular tissue.

Œdema and infiltration of cellular tissue spread rapidly; skin on parts hard and doughy, sometimes also œdematous, reddened, cool or hot.

The tissues near the pustule become indurated very quickly, and this œdematous swelling rapidly spreads over a considerable area, the entire arm, half the neck, occasioning lively pain and a feeling of heaviness in affected limbs.

Œdema of affected parts, more or less reddened, sometimes cool, sometimes hot.

Œdema of affected parts; with anthrax of gangrene; collapse.

Œdematous and phlegmonous swellings show changes of cloudy œdema, often striped and flecked with blood.

Œdema with a superadded gangrenous process, spreads rapidly over whole limb, collapse quickly comes on with difficulty in breathing, loss of consciousness and death. θAfter eating diseased meat.

Erysipeloid anthrax œdema.

Transudations into serous cavities.

Contents of a regular pustule are neutral or alkaline, sometimes blackening metals.

Abundant discharge of ichorous, terribly smelling pus. θCarbuncle.

Gangrenous ichor of horrible smell.

Stinking pus from wound on leg.

Penetrating, stinking, thin ichor from a lanced swelling.

Gangrene, with inner anthrax.

In some cases the gangrene is extending, and violent febrile symptoms may follow.

From the tough infiltration, which is hemorrhagic and often sloughed in the centre, blackish-red hemorrhagic bands go off into underlying adipose tissue, and they send into it numerous branches.

The knot gets sphacelous while it is drying up on surface, the decomposition is quicker, deeper in and becomes an emphysematous gangrene.

Gangrenous destruction.

Sloughing on carbuncles; on paronychia.

Digitized by Google

‖‖Gangrene and sphacelus. θAfter a fracture of tibia.
‖Gangrenous ulcers (sheep).
‖Absorption of pus into blood. θPyæmia. θGangrenous carbuncles.
Septic infection from absorption of deleterious substances.
‖‖Septicæmia with gangrene and with sloughing.

[45] **Touch. Passive Motion. Injuries.** ‖Dark brown redness in face, does not disappear under pressure.
‖From two small wounds, much pus of a bad odor on twelfth day. θAfter a fracture of tibia.
‖Reddish ichor discharges from small wounds. θAfter a fracture of tibia.
‖After suspicious stings, if swelling changes color.
‖Cuts show outwardly a dark hemorrhagic mass, deeper in bright red, and at bottom a yellowish mass.
‖Gangrene from inoculating sheep.
‖After dissection wounds become gangrenous.

[46] **Skin.** ‖Dark red spots (sheep).
‖‖Ecchymoses.
Cyanosis.
Skin of affected part either hard or doughy.
‖Skin dry, itching violently and burning.
‖Unbearable itching on arms and hands.
‖Itching with dry skin; violent as if mad (horses).
‖Crusty oozing eruption, with most violent itching.
‖Crusty eruption discharging acrid fluid.
A small red spot, sometimes with a blackish point in middle, gradually becoming more sensitive, has to scratch, it reddens more and more, swells and forms a small pustule or blotch.
‖‖A little red speck, like a flea-bite, with a central black point, swells gradually and changes into an itching papule, capped with a small, clear, reddish or bluish vesicle, gradually enlarging.
‖‖The excoriated spot dries up, becomes brown and livid and a local eschar forms.
‖‖By inflammatory swelling of surrounding skin a red or violet raised border is formed, around it a bluish or pale yellow ring, upon which little vesicles, size of a hemp-seed, appear surrounding central eschar.
‖‖With an increase of round, thick eschar, one-fourth to three-fourths of an inch, the raised border also extends.
Excoriated surface dries and mummifies, but new blisters form all around.
‖‖Small and large epidermal vesicles filled with serum.
‖Blister on palm of hand.
‖‖The secondary vesicles contain a yellowish, reddish and blackish fluid.

Digitized by Google

||Over pustule a blister, size of a lentil, with a clear, bright-yellowish, later a reddish or bluish fluid.

|Black or blue blisters. θPustula maligna.

||Black blisters, fatal in twenty-four to forty-eight hours.

|Large black blister on inside of thigh.

||In case of more than one detritus, the whole is swollen like erysipelas, and when cut it looks like the *Vespajas* of the Italian dermatologists.

|Erysipelatous inflammation about carbuncle.

|Erysipelas gangrenosa.

|Erysipelatous form of chronic anthrax.

|Smallpox of sheep.

Umbilicated pustules, yellow or bluish around, with depression of a dark red hue, and hemorragic foundation. θPustula depressa.

If scraped off soon the excoriated spot dries, turns brown and livid and leaves a scar.

||The dense or doughy soft papules or pustules, around and beneath eschar, vary in size from a pea to a nut.

|Bluish boils on both legs and on abdomen, discharging a little matter and black blood. θInoculated by glanders.

||The papule promptly bursts and discloses a dark red base.

Sometimes blisters looking more like furuncles; a puslike collection under epidermis, which loosens and discloses decomposed matter.

||Papules and pustules, with extensive œdematous and phlegmonous infiltration of neighboring skin and subcutaneous cellular tissue.

||The anthrax pustule penetrates deeply into subcutaneous cellular tissue.

||Anthrax pustules most on face, forearms, hands, fingers, neck, less often ear, still less frequent covered parts.

Anthrax carbuncles, with typhoid symptoms.

||Little carbuncles; inner anthrax.

|Carbuncle.*

||Carbuncle darkish red, greasy, is often more eroded than ulcerated.

Circumscribed carbuncle, hard large knots.

Diffuse, erysipelatous carbuncle.

||Carbuncle on arm, forearm, head.

||Carbuncle with horrible burning pains; or discharge of ichorous offensive pus.

---

* To call a carbuncle a surgical case is the greatest absurdity. An incision is always injurious and often the cause of death. Never a case has been lost under the right kind of treatment, and carbuncle should always be treated by internal medicine only.

Digitized by Google

‖‖Anthrax carbuncles cured by *Anthracine*[15], once a day, also externally, in four days.

Anthrax contagiosus.

‖Seventh day after remedy several larger and smaller openings, discharging watery, sometimes bloody matter, very little pus; swelling less hard around base. θCarbuncle.

‖All openings run into one, discharge much pus. θCarbuncle.

‖After having taken homœopathic medicine for malignant ulcers, suddenly the greatest malaise, and a black blister formed below knee with swelling all around, and feverish shaking chill through whole body.

‖Ulcus excedens (sheep).

‖Most malignant gangenous ulcers (sheep).

‖Chronic forms of anthrax with indurations like knots under skin.

‖‖Large cutaneous eschars.

[47] **Stages of Life, Constitution.** Girl, æt. 1¾. θCarbuncle.

A girl not quite 2 years old. θInflammation of hand.

Woman, æt. 35, subject to blood spitting, tuberculous. *Anthrac.*[9] three doses daily. θCynanche cellularis.

A robust country girl, æt. 21, had suffered up to her seventh year with tetters, has had for two years a crusty eruption.

A strong man, æt. 22, fell from a wagon and a very heavy stone fell on his leg, causing a compound fracture with two small open wounds.

Man, æt. 35, liver complaint, after drawing, tearing pains in decayed teeth, *Staphis.* θCynanche cellularis.

A weakly, hysteric woman, æt. 43, after great fatigue and mental suffering, bedridden since years, after losing two children with putrid diseases. θPoisoning by foul breath.

A man, æt. 43, strong, corpulent, phlegmatic temperament. θCarbuncle.

A strong, well-developed man, æt. 43, of a phlegmatic temperament. θCarbuncle on neck.

A strong man, æt. 60, had from his youth brownish-blue spots on lower limbs, which now broke open and formed ulcers.

[48] **Relations.** Antidotes: in poisoning from anthrax of animals, *Camphor; Arsen.; Cinchon.; Rhus tox.; Silic.; Laches.; Carb. veg.; Pulsat.; Kreosot.; Carbolic. ac.; Salycil. ac.; Apis.*

‖‖Give *Anthrac.* after *Arsen.* fails to relieve the burning and ulceration.

Useful where *Arsen.* had no beneficial effect in carbuncles and other complaints with burning and sloughing.

Digitized by Google

Often useful when *Arsen.* seems indicated and fails to relieve.

Two days after *Acon*[30] for the fever: *Anthrac.*[30] for the itch-crusty eruption.

After *Phosph. ac.* in a poisoning by inhaling the foul breath of a child dying with putrid fever.

Anthrac. 0,8, three gtt. in 12 teaspoonsful of water at first in alternation with *Phosph. ac.* 0,3, two gtt. in 12 teaspoonfuls of water. θPoisoning by foul breath.

Silic. followed well after *Anthrac.* θFracture of tibia.

After *Anthrac.: Aur. mur. natr.* (for are maining periosteal swelling on the lower jaw); *Silic.* (cellulitis).

Anthrac. bovum; from gangrenous spleen of cattle.

Anthrac. suum; from the bloody saliva of raving swine.

ANTHROKOKALI.

A very absurd combination; anthracite coal of a certain kind, dissolved in boiling caustic potash, invented by Joseph Polya, in Pesth, in 1835; proved on many people, but in a very superficial way. Applied according to Old School notions, but seldom alone.

Polya was followed by several others, and in 1839 a thesis by one C. F. Klinger; in 1840, an extract by our Dr. G. Piper, in the A. H. Z., Vol. XVIII., p. 235 and 253. It was mentioned as a "renal" remedy by Reil, the forerunner of Sharp, of organopathic notoriety, and in 1849 Chapman mentions it as having been "useful," but says nothing but "herpes."

It has never been much regarded and was of very little use. The Old School made one of their experiments in 1841, and gave it to eight hundred patients with "tetter," in the Vienna hospital, without success.

[7] **Smell and Nose.** Chronic cracks and ulcerations of nostrils.

[11] **Taste and Tongue.** Taste: unpleasant, nauseous, disgusting.

Dirty tongue, no appetite, nausea.

Dirty tongue, with retching and colic.

[12] **Inner Mouth.** Dry mouth and pharynx.

[13] **Throat.** Warmth and hot feeling in pharynx, going down into stomach.

Burning in pharynx: followed by anorexia; with dysphagia.

Pain in pharynx with a dirty tongue.

Dysphagia with dry throat.

Sensation of gnawing and scraping in œsophagus, soon disappearing and going down to stomach.

[11] **Appetite, Thirst. Desires, Aversions.** Anorexia, nausea, vomituritio.
Increased appetite.
Burning thirst; before sweat.
Insatiable thirst.
At first no appetite, but soon after it grew sharper.
[15] **Eating and Drinking.** After eating, nausea.
After an error in diet, a gastro-bilious fever, with erysipelas.
[16] **Hiccough, Belching, Nausea and Vomiting.** Anorexia, nausea, vomiting, colic and flatulence.
Nausea and vomituritio.
Vomiting and bilious stools.
Bilious vomiting, with black phlegm, followed by too fluid stools.
[17] **Scrobiculum and Stomach.** Cramplike pain in stomach.
Warm sensation in stomach.
[19] **Abdomen.** Colic with flatulence.
Violent colic at night > by a warm poultice.
Violent burning deep in abdomen, in evening.
Griping bellyache without diarrhœa.
Tympanitic distension.
[20] **Stool and Rectum.** After colic and rumbling several mushy stools.
Copious diarrhœa with colic and rumbling.
Diarrhœa for several days with increased secretion of urine.
Three times during the day a brown stool with increased quantity of pale urine.
: Cholera.
[21] **Urinary Organs.** Tickling and burning in urethra and at orifice, while water passes.
Ischuria, urine pale.
Some diuresis.
Copious evacuations of pale, clear urine, without a sediment.
Urine pale, acrid, increased.
Urine pale, honey-colored, of unpleasant odor, strongly alkaline reaction, rarely saturated and sharp, very seldom with a nubecula, never a sediment.
When urinating orifice of urethra itches.
[22] **Male Sexual Organs.** Very often long lasting painful erections.
Frequent erections.
: Sycosis.
[23] **Female Sexual Organs.** Catamenia appeared before the time.
[29] **Heart, Pulse and Circulation.** Orgasm with heat of skin.
Slight vascular irritation.

Digitized by Google

Pulse excited.
In evening increased heat with frequent, full pulse.
Pulse and temperature feverish.
The beating of heart sometimes stronger, with oppression, pressing headache nightly, restlessness and no sleep.
Pulse quicker, frequent and more full.

[32] **Upper Limbs.** Eruption on hands.

[36] **Nerves.** Debility of whole body, with restlessness and heavy head.
Complete malaise.

[38] **Time.** Eruptions decrease with full of moon.
Evening: increased, heat with frequent full pulse; night sweats begin.
At night: colic; copious warm sweat; skin itches.

[39] **Temperature and Weather.** Colic at night relieved by warm poultices.
After baring skin night sweat.

[40] **Fever.** Horripilation alternating with heat, followed by slight sweat and frequent pulse.
Heat and pressure in stomach.
Febris evanida, with disturbed digestion.
After baring of skin, night sweats, continuing for several days.
Skin moist for two successive days.
Evening copious sweat lasting till morning.
General night sweat, returning every night.
Local cold or warm sweat on parts affected by an eruption.
After a viscous night sweat remission of fever.
Sweat viscous, skin remains shining, glistening.
After heat and itching skin moist.
Often a general sweat commencing at night and continuing till morning hours.
Copious warm night sweat with dizzy head.
Night sweat copious with sleeplessness and greatest restlessness, but less pain in bowels.
With sweat restlessness, headache, debility and frequent pulse.
Moderate night sweats beginning in evening with sleeplessness and excited pulse.

[41] **Attacks, Periodicity.** Sweats: return every night; pressing headache.
Three times a day: brown stool.
Sweats continue for several days.
A reaction takes place always before the eighteenth day.
Pain: in pharynx.
Hot feeling: in pharynx, going down into stomach.
Burning: in pharynx.

Digitized by Google

Cramplike pain: in stomach.
Violent colic.
Violent burning: deep in abdomen.
Pressure: in stomach.

" **Tissues.** ¦Chronic rheumatism, gout, caries, scrofulosis.

" **Skin.** Itching at night.
Eruptions increase with general sweat, get more red and ooze out more.
Urticaria or erysipelas.
¦Scabies: with ecthyma; with prurigo.
¦Scabies.
¦Prurigo.
Eczema impetiginoides.
Impetigo scabida.
¦Lichens.
¦Useful in cases of chronic herpes.
Herpes circumscriptus.

" **Relations.** Compare with the carbons.
Similar to: *Acon.* (diarrhœa with copious flow of urine); *Antim. crud.* and *Arsen.* (thirst, burning and nausea, skin); *Bryon.*, *Carbo an.*, *Carbo veg.* and *Kali carb* (in flatulency, etc.); *Rhus tox.* (in skin symptoms); *Veratr.* (in nausea, vomiting, colic and diarrhœa).
Given in connection with *Dulcam.* in sycosis, scabies, prurigo, and impetigo; with *Ferrum jod.* in eczema, impetigonoides.
Tapeworm has been removed by pulverized anthracite coal.

ANTIMONIUM ARSENITUM.

Arsenite of Antimony. $(Sb_2O_3)\ As\ O_5 + 3\ p.c.$

Prepared first by Papilland and Mousnier and introduced in the Old School practice under the name of antimonial granulations.
Proved by Isnard and used by Payr in emphysema.

[3] **Inner Heat.** Rush of blood to head.
Pain in forehead.
Pressure in temples.
[5] **Sight and Eyes.** Pain in orbits.
‖ Inflammation of eyes.
[8] **Upper Face.** Œdema of face.
[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite.
[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea.
[20] **Stool and Rectum.** Slight diarrhœa, without pain in abdomen.
[26] **Respiration.** ⁝ Excessive dyspnœa. θ Emphysema.
[29] **Heart, Pulse and Circulation.** Pulse 90.
[33] **Lower Limbs.** Wandering pains along sciatic nerves.
[36] **Nerves.** General sick feeling.
Sense of weakness.
[48] **Relations.** Similar to: other antimony salts; *Ammon. carb.; Arsen.; Aurum.; Laches.; Merc. sulph.; Phosphor.; Pulsat.* (ischias, wandering pains); *Sulphur.*

ANTIMONIUM CHLORIDUM.

Antimonious Chloride. $Sb\ Cl_3$.

The old and famous butter of antimony. Not proved. Poisoning symptoms collected by Cattell. Given in cancer. See 9.

[1] **Mind.** Stupor, but from which he could be aroused by questions.
Stupor and cold feet. See 8.
[3] **Sensorium.** Insensibility.

Digitized by Google

[5] **Sight and Eyes.** ||Pupils dilated and inactive.
||Eyes sunken, lustreless.
[8] **Upper Face.** ||Features set, pale and collapsed.
Stupor, face pale, collapsed.
[9] **Lower Face.** ‖Cancer of lower lip.
[11] **Taste and Tongue.** Unable to speak for some minutes.
Tongue dry in centre.
[12] **Inner Mouth.** Mouth full of thick, tenacious, transparent mucus.
[13] **Throat.** Great pain in his throat.
||Severe pain in throat and fauces.
Sense of burning in throat.
Fauces inflamed.
Heat and uneasiness in mouth and throat, with pain on swallowing.
Severe burning pain in throat, increased by deglutition.
Bright scarlet patches in throat, with difficulty in swallowing.
Numerous abrasions on mucous membranes of mouth and fauces, with slight fever.
[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea and vomiting.
Incessant vomiting.
Vomiting for two hours, followed by prostration.
[17] **Scrobiculum and Stomach.** Burning pain in epigastrium, and tumefaction of abdomen.
Severe burning pain in stomach.
[19] **Abdomen.** Tenderness of abdomen to touch, with sensation of burning.
Excruciating griping pains in abdomen.
[20] **Stool and Rectum.** Frequent abortive efforts to defecate, with cold skin.
[26] **Respiration.** Seems choked.
Respiration very slightly apparent; heavy.
[29] **Heat, Pulse and Circulation.** Pulse 80, small.
Pulse small, accelerated, very feeble or hard.
Pulse rises to 120, with sleepiness.
[36] **Nerves.** Great or complete prostration of strength.
Restlessness.
Faintness, general weakness.
[40] **Fever.** ||Cold skin. See abdomen.
||Surface of body cold and clammy.
Slight feverishness.
Excruciating griping pains: in abdomen.
Great pain: in his throat.
Burning: in throat; in epigastrium; in stomach.
[41] **Tissues.** From mouth to jejunum, black.
Mucous membranes destroyed, and submucous tissue and

Digitized by Google

peritoneum covered with flocculent matter easily scraped off; they are soft and readily torn.

[46] **Skin.** Skin cold and mouth full of mucus.

Skin cold and clammy.

[48] **Relations.** Similar to other salts of antimony, and to the acids (typhus), also to *Arsen.*, and *Carbo veg.* (in prostration, stomach and abdominal symptoms); *Conium* (cancer on lower lip and ineffectual urging for stool).

ANTIMONIUM CRUDUM.

Native Sulphide of Antimony. $Sb S_3$.

The sulphuret of antimony, a mineral, native in France and Germany, found also in the United States, see Stibnite of Dana, p. 29. What is to be had in the shops is obtained by simple fusion of the ore. Used by the ancients for dyeing hair and eyebrows. First known as a sulphuret by Hohenheim Paracelsus (not the imaginary person called Basil Valentin), in 1430. Since then given by the Anti-Galenists in numerous preparations and forbidden by the Académie Française, 1566 until 1666, and in later times considered inert because not soluble.

Proved by Caspari, in 1826, edited and published by Hartlaub, in 1828. Classed among his antipsorics by Hahnemann, with many additions, in 1835.

[1] **Mind.** Insensible; bed-sores formed, yet he complained of no pain.

Imbecility more frequent than insanity.

Delirum.

Child delirious, drowsy with nausea, hot and red face; pulse irregular; feverish heat; cries when washed in cold water; > washed in warm water.

Loathing of life.

Inclined to suicide by shooting; at night he is obliged to get out of bed, because he cannot free himself of the idea.

Anxious, lachrymose mood, the slightest thing affects her. θIntermittent.

Ill humor; irritability. θHeadache.

Sulky, does not wish to speak with any one.

Child is fretful and peevish, turns itself away, and cries when touched. θDiarrhœa. θColic.

Indisposition to work, dull mood. θColic.

Dejection.

Digitized by Google

Aversion to work and pain in stomach, with gulping up.
Cheerfulness and activity of mind and body.
Sorrowful, irritable humor; the sound of a bell, as well as the sight of those around him, excites him to tears; he breathes wearily and short.
‖The greatest sadness and woful mood. θIntermittent fever.
‖Sadness, with weeping and impressibility.
Anxiety in relation to his present and future condition.
Feeling of grief.
Is driven to despair, resolved to drown himself.
Amativeness.
‖‖Sentimental mood in the moonlight, particularly ecstatic love.
Ecstasy and exalted love, with great anxiety about his fate, and inclination to shoot himself; < when walking in moonlight, and then his conduct is like that of an insane person.
‖Sentimental or distrustful mood. θDiarrhœa.
‖‖Peevishness. θChlorosis.
‖Irresistible desire to talk in rhymes or verses. θIntermittent.
Restless, inclined to be excited by least disturbance.
Consequences of disappointed love.
Anxiety produces sweat, with headache.

[2] **Sensorium.** ‖Rush of blood to head.
‖Vertigo, nausea, nosebleed.
Weakness of head.
‖Heaviness in forehead.
‖Vertigo with nausea and confused feeling, as if drunk. θHeadache.
‖Vertigo, from deranged stomach.

[3] **Inner Head.** ‖Headache, mostly in forehead, l. side.
‖Slight, dull headache in forehead, and vertigo; increased by ascending stairs.
Stupefying, dull headache in forehead, so violent that sweat broke out from anxiety; > when walking in open air.
‖Stupefying headache with nausea in throat, < evening, < from smoking, > walking in open air. θHeadache.
In l. temporal region: pressure inward; drawing; slow pulsation, with fine pricking.
‖Violent headache after bathing in river, with weakness of limbs and aversion to food.
Splitting sensation in forehead.
Lacerating pain in whole head.
‖Headache over one eye in a spot; < at noon, > at night; not > by vomiting.

Digitized by Google

‖Aching in forehead. θIntermittent.
‖Congestion to head, followed by nosebleed.
Momentary drawing and boring in temples.
Dull, frontal headache on awaking.
Into head: toothache penetrates.
After headache with giddiness, nosebleed.
‖Aching headache, as if forehead would burst, from catarrh of frontal sinus, with stoppage of nose.
Tearing in forehead, temples and vertex.
‖‖Headache: after bathing in river, from deranging stomach, drinking alcoholic drinks, after a chill, after suppressed eruption, from taking cold; with aversion to food, nausea, loathing, inclination to vomit, aching in limbs, weakness.
‖Gastric headache from fruit, acids or fat.

⁴ **Outer Head.** ‖Gnawing pain on top of head, as if in periosteum.
Soreness of periosteum on vertex with swelling; a sensation as if bones were swollen, < from warmth, > in open, cool air.
Soreness in a small spot on l. parietal bone, as if periosteum was swollen; painful to touch.
Lentil-sized, flat tubercles here and there on scalp, painful to pressure, crawling sensation around them.
‖Formicating itching on scalp; losing hair.
‖Disposition to take cold about head after getting wet, or bathing in cold water; < evenings and on getting warm; > in open air and when at rest.
Head, sensitive to cold, getting wet or cold bathing, < evening and overheating himself, > in rest and cool air.
‖Troublesome itching on head, with falling out of hair.

⁵ **Sight and Eyes.** Aversion to light.
Looking into fire increases cough.
‖Eyes red, inflamed, with itching and nightly agglutination and morning photophobia.
Eyes < from glare of snow.
Redness of l. eye, with aversion to light.
Soreness in canthi.
‖‖Soreness of outer canthi.
‖‖Redness and inflammation of eyelids.
‖Small humid spots in external canthus, very painful if sweat touches them.
Mucus in canthi mornings, with dry crusts on lids.
Lids red, with fine stitches in ball.
Itching in canthi.
‖Chronic inflammation of eyes.
‖‖Chronic blepharophthalmia of children.
‖Ophthalmo-blennorrhœa.

▮Inflammation of lachrymal gland and ducts.
⁝Metastatic ophthalmia.
▮▮Pain on a small place above either eyebrow. θMegrim.

[6] **Hearing and Ears.** Slight noises startle.
Ringing before ears, roaring in ears.
A kind of deafness of r. ear, as if a leaflet was lying before the tympanum; boring with finger does not relieve it.
Drawing pain through r. ear and into the eustachian tube, after dinner.
Redness, burning and swelling of l. ear.
▮Otorrhœa.
▮▮Pains in ears. θMeasles.
Drawing through r. ear and eustachian tube.
▮On external ear and behind ears moist eruption. θScrofulous otorrhœa.

[7] **Smell and Nose.** Nosebleed with vertigo.
▮Stoppage in nose.
Nosebleed: evenings; ▮after headache, with giddiness; ▮following rush of blood to head.
Coryza: fluent or dry.
Nose painful when breathing, as from inhalation of cold air or of acrid vapors.
▮▮Sore, cracked and crusty nostrils.
Coldness in nose when breathing air.

[8] **Upper Face.** Sad expression.
Face red and hot, a child.
Twitches in facial muscles.
Heat and itching on cheeks.
▮Pimples, pustules and boils on face.
▮Eruption like nettlerash.
▮Yellow crusted eruption on l. cheek, painful to touch and easily detached.
▮▮Suppurating and long-lasting eruption on cheeks.
Freckles on face.

[9] **Lower Face.** Dryness of lips.
▮▮Cracks in corners of mouth.
Burning, stinging on chin, as from a hot spark.
▮Small, honey-colored granules on chin, with sore feeling when touched.

[10] **Teeth and Gums.** ▮Toothache from hollow or decayed teeth; < from warmth of bed, cold drinks, cold air, evenings and in bed; > out of doors.
▮▮Toothache in hollow teeth, pain sometimes penetrates into head; < at night after eating and from cold water; touching tooth with tongue causes pain, as if nerve was torn; > walking in open air.
Stitches in tooth when drawing air into mouth.
▮Jerking pain in hollow teeth.

Digitized by Google

Gums detach from teeth and bleed easily.
Gnawing pain in carious teeth; after every meal.
Toothache after eating; before menses.

11 **Taste and Tongue.** Taste lessened.
Bitter taste in mouth. θIntermittent.
Tongue coated: thick and white; milky white; yellow. θApyrexia.
Much saltish saliva in mouth.
Sore feeling and redness on border of tongue, bitter mouth. θApyrexia.
White tongue. θGastric catarrh.

12 **Inner Mouth.** Dryness of mouth.
Ptyalism, with saltish tasting saliva. θDiarrhœa.

13 **Throat.** Rawness of palate, with expectoration of much mucus when clearing throat.
Must draw quantities of thick yellowish mucus from posterior nares into throat, and spit it out.
Sensation as if a foreign body had lodged in throat, which gives rise to a constant desire to swallow. θChronic angina.

14 **Appetite, Thirst. Desires Aversions.** Great desire to eat, but gets no strength. θScrofulous children.
Good appetite, with burning at pit of stomach.
Diminished appetite in summer owing to heat, loathing of food, with a bitter taste.
Long-lasting loss of appetite, with disgust for all food. θGastric catarrh. θHeadache. θColic.
Hunger early on waking, without appetite; eating does not > it; at the same time sense of emptiness in pit of stomach, and want of animal heat.
Intense thirst, with dryness of lips; more at night. θHeadache.
Thirstless. θCholera infantum. θRheumatism. θOvaritis. θIntermittent fever. θGastric complaints (nausea, vomiting, etc).
Desire for acids, for sour pickles. θDiarrhœa.
Desire for beer, with chill.
Complete loss of appetite, with costiveness and dull head.
Total want of appetite, heaviness and fulness in stomach, costiveness. θGastric fevers.

15 **Eating and Drinking.** Bread and pastry particularly occasion nausea and cutting colic.
Directly after meals much flatulency, wind does not pass.
Laziness, with desire to lie down, after eating; lassitude.
Fulness and tension, after eating, alternately with lightness, cheerfulness and activity of mind and body.
After bad, sour wine, vomiting. θGastric catarrh.
After nursing, diarrhœa.

Digitized by Google

Nursing children throw up a little sour milk, as soon as they take the breast or bottle.

Worse from pork; from acids; especially vinegar. θDiarrhœa. θWhooping cough.

Worse from alcoholic drinks; after a glass of wine, nausea.

After vinegar, or acid wine, loose stool.

Aggravation of gastric symptoms by wine even when diluted with water.

After eating: drawing through r. ear into eustachian tube; toothache; sensation of emptiness in intestines goes off; deep sighing respiration; fulness of chest.

Gastric catarrh from overeating; eating does not relieve hunger.

Gastro-intestinal affections during pregnancy.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough after smoking tobacco.

Constant discharge of wind up and down, immediately reproduced, for years.

Belching, with taste of what has been eaten. θColic. θTertian fever. θHeadache.

Burning at pit of stomach like heartburn, with good appetite.

Nausea: after drinking a glass of wine; with vertigo, from overloading stomach.

Loathing, nausea and desire to vomit.

In apyrexia, nausea, vomiting, aching in stomach, desire for sour drinks, bitter taste, belching and loss of appetite. θTertian.

Gastric symptoms predominant; disgust for drink and food, bitter mouth and vomit. θApyrexia.

Nausea and vomiting. θGastric catarrh. θHeadache.

They throw up a little sour milk. θNursing children.

Vomiting: of mucus and bile; of drink only; in whooping cough; renewed by food or drink; persistent, tongue white, no thirst (marasmus of children); gastric catarrh; convulsions.

Violent vomiting and diarrhœa.

Nausea ceases, vomiting continues.

Not relieved by vomiting. θHeadache.

Gastric complaints, with eructations, nausea and vomiting. θIntermittent.

Vomiting renewed on taking food or drink. θDiarrhœa.

Nausea and vomiting after getting overheated, after deranging stomach, with vertigo.

Gastric sordes. θToothache.

Gastric derangement, after a cold.

[17] **Scrobiculum and Stomach.** Deranged stomach from eating together what does not agree, particularly if

tongue is very much coated, with belching, tasting of food, and aversion to any kind of food; after acid wine; after fresh beer; with fever.

Derangement of stomach, producing eructations, tasting of ingesta, and especially nausea and inclination to vomit.

Emptiness in pit of stomach.

Chronic weakness of stomach, much belching, frequent vomiting, acids disagree, with vertigo and dulness in head.

‖Habitual sensation in stomach as if overloaded.

Painful sense of fulness of stomach, which is sore to pressure.

‖Pain at stomach, (headache); as after eating too much, with distended but not hard abdomen. θColic.

‖Cramplike pains at stomach.

Burning, spasmodic pain at pit of stomach, driving to despair, resolved to drown himself.

‖‖Stomach weak, easily disturbed digestion.

‖‖Gastric catarrh: white tongue, nausea and vomiting; cough; bowels loose or stools in lumps. Caused by overeating, sour wine, hot weather, bathing; during measles; metastasis of gout or rheumatism.

Dysepsia with acrid secretions; rheumatic or gouty pains in feet.

Gouty metastasis to stomach and bowels.

‖Relapses from deranging stomach. θIntermittent.

[18] **Hypochondria.** Slight tension in hypochondria.

[19] **Abdomen.** Full feeling and distension, as after overeating.

Abdomen very much distended; after eating much.

‖‖Incarcerated flatus; costive.

‖‖Rumbling in abdomen.

‖‖Pinching and sensation as if diarrhœa would come on.

Sensation of emptiness in intestines, going off after a meal.

‖Colic, with loss of appetite, ‖‖hard stool, red urine; child will not be looked at.

‖‖Violent cutting in abdomen, feeling of oppression coming from stomach, indisposition to work, dull mood and pain at stomach with eructations.

Hard gland in l. groin, painful to pressure.

Cutting in bowels, with watery diarrhœa.

As if arising from abdomen: cough.

[20] **Stool and Rectum.** ‖Summer complaint, or diarrhœa and vomiting of children; hot dry skin; vomiting, expelling drink; yellowish, very bad smelling stools.

Stinking flatus.

‖Bowels loose. θGastric catarrh.

‖Diarrhœa after nursing.

Digitized by Google

Diarrhœa watery, with deranged stomach, white or yellow coated tongue, belching with taste of food, cutting in abdomen.

Acrid diarrhœa.

Stools: watery, with vomiting; watery, profuse; watery; with little hard lumps, or containing undigested food; liquid, containing portions of solid matter; mucous mornings.

Cutting pain before loose stools.

Diarrhœa, < from vinegar and other acids: sour wine; overheating; after cold bathing; at night and early mornings.

Diarrhœa of old people.

Alternate diarrhœa and constipation, with old people.

Hard stools with colic.

Difficult, hard stool; feces too large; costive with incarcerated flatus.

Stools white, dry, irregular.

Hard lumps of curd. θNursing children.

Sensation of copious stool, but only flatus escapes, with finally very hard stool; stools in lumps. θGastric catarrh.

Pain in rectum during stool; feeling of soreness as if an ulcer had been torn open.

Copious hemorrhage from bowels, with solid feces. θHemorrhoids.

Mucous piles, prickling, burning; continuous mucous discharge, staining yellow; sometimes ichor oozes out.

Pain in rectum during loose stool.

Protrusion of rectum with loose stools.

Hemorrhoids; a good deal of mucus is continually discharged from anus.

Constant secretion of a yellowish-white mucus at anus.

Hemorrhoids. θDuring pregnancy.

Costiveness: in heat of summer; in childbed.

Diarrhœa after nursing.

Constipation and diarrhœa. θIntermittent.

Useful after abuse of laxatives.

Diarrhœa: after deranging stomach; after acids; after a debauch; of old people; changing with constipation; watery; with nausea and vomiting; with colic; with much belching.

[21] **Urinary Organs.** Frequent and profuse emission of urine, with loose bowels.

Tenesmus of bladder rouses him from sleep at night.

Frequent urination, with much mucus, intense burning in urethra and backache during emission.

Cutting in urethra while urinating.

Digitized by Google

Urine: gold yellow, with scarcely perceptible cloud; ‖brown red; ‖with small red corpuscles after standing twenty-four hours; red, with colic.
Involuntary urination.
Involuntary escape of copious urine with cough.
‖Chronic catarrh of bladder.

[22] **Male Sexual Organs.** Sexual desire and wakefulness.
‖Excited sexual desire, with uneasiness of whole body, which prevents him from sitting long.
Impotence.
Nightly pollutions, with or without voluptuous dreams.
Itching: of penis; of tip of glans.
Biting, itching, as from salt on l. side of scrotum.
: Gonorrhœa.

[21] **Female Sexual Organs.** Nymphomania from checking catamenia.
‖Tenderness over ovarian region, after catamenia has been checked by taking a bath. θNymphomania.
‖Pressure in womb, as if something would come out.
Menses commence at an early period, are profuse, then cease; subsequently chlorosis.
‖Menstrual molimina.
‖Before menses, toothache, with boring into temples.
‖Discharge of acrid water from vagina, which caused a smarting down thighs.
‖Leucorrhœa watery and containing lumps.

[21] **Pregnancy. Parturition. Lactation.** ‖Nausea, vomiting and diarrhœa during pregnancy.
‖‖During pregnancy gastro-intestinal and hemorrhoidal affections; feels full and distended as after overeating. θDiarrhœa.
Skin diseases during pregnancy.

[23] **Voice and Larynx. Trachea and Bronchia.** ‖Voice gone, scarcely able to utter a single word. θLaryngitis of singers.
‖Aphonia from getting overheated, either from weather or in a warm room; > after rest.
‖Feebleness of voice.
‖Violent spasms in larynx and pharynx, as if throat was filled with a plug, which becomes alternately thicker and thinner, accompanied by a feeling of soreness.
: Bronchial catarrh.
Phthisis laryngea with dry cough.

[26] **Respiration.** Short, heavy breathing; dyspnœa.
Deep, sighing breathing, as from fulness of chest, afternoon and after eating.
Oppression coming from stomach.
Constriction almost to suffocation.

Google

When exhaling, sharp stitches in chest.
Deep sighing respiration after eating.
Spells of sighing.
‖Hot breath. θWhooping cough.

[27] **Cough.** Frequent dry cough.
‖Cough shaking whole body, with involuntary escape of copious urine.
‖Cough: after rising in morning, in attacks; ‖as if arising from abdomen; ‖‖first attack is always most severe, subsequent ones weaker and weaker, until the last resembles only a hacking. θWhooping cough. θGastric cough.
Cough: in hot sun; on coming into a warm room from cold air.
Looking into fire increases cough. See 5, 27.
‖Whooping cough as a sequel to measles.
‖Whooping cough < from becoming overheated in a warm atmosphere, in burning sun, and from radiation of a fire.
Cough with burning in chest.
‖Cough with oppression on chest.

[28] **Inner Chest and Lungs.** Oppression and pressive pains in chest, more the right.
Stitches in chest.
‖‖Pain in chest with heat. θIntermittent fever.
Burning and sticking in chest; with cough.
‖‖Blennorrhœa pulmonum or phthisis mucosa.

[29] **Heart, Pulse and Circulation.** Violent palpitation of heart.
Pulse extremely irregular; now accelerated and again slow, changing every few beats; with a child. See 40.
Slow pulsation with fine pricking headache.

[30] **Outer Chest.** Severe itching upon chest continuing all day.
Thorax elevated, with dyspnœa.

[31] **Neck and Back.** ‖Rheumatic pains in nape of neck and loins.
Swelling of cervical glands.
Spasmodic drawing pain in muscles of nape of neck, reaching to scapulæ, evening after lying down and morning; < by stooping, exerting arms and turning head to left.
Itching of neck and back.
Spasmodic stitches in r. scapula, when sitting.
Violent pain in small of back when rising from sitting; disappeared when walking.
‖‖Backache. θVariola.
At coccyx a heavy weight.

Digitized by Google

‖Drawing in sacrum. θIntermittent.

[32] **Upper Limbs.** Shoulders raised with difficult breathing.
Cracking in elbow joint, when moving it.
Drawing pain: in arms; in fingers and their joints.
Must let arms sink down.
‖Painful inflammation of ligaments of elbow, with intense redness and contraction of arm.
Paralytic trembling of hands with every motion and when writing.
Trembling of hands with vomiting.
‖‖Arthritic pains in fingers.
‖Finger nails do not grow as rapidly as formerly, and skin beneath nails painfully sensitive.
‖‖Crushed finger nails grow in splits, like warts, with horny spots.
‖A horny growth under nail.
Horny warts on hands.

[33] **Lower Limbs.** Pustules on thighs.
‖Legs fall asleep while sitting quietly.
Painful drawing in hip joints.
Painful stiffness of knee; knees pain.
Pain just below knee, as if it had been tied too tightly.
‖Drawing pain: in knees; in lower part of l. tibia; in l. heel; and tearing through r. great toe. θGout.
Violent pains in lower limbs.
Smarting down thighs from acrid water out of vagina.
‖Pulling pain in lower limbs.
Numbness of legs during rest and while sitting.
‖Tumor of knee; white swelling.
Ankles pain.
Heel inflamed and red.
‖‖Large horny places on soles, close to toes.
‖Corns on soles and toes.
‖Inflamed corns.
‖‖Great sensitiveness of soles when walking.

[34] **Limbs in General.** Convulsions and trembling of limbs.
Lassitude, tremulous fatigue and heaviness of all limbs, as if coming out of abdomen; trembling of hands when writing, subsequent discharge of much stinking flatus; abdomen distended, after dinner.
‖Rheumatic or gouty pains, generally with gastric symptoms.
Heaviness in limbs.
‖Weakness of limbs. θHeadache.
Aching of limbs.

[35] **Rest. Position. Motion.** Can scarcely keep still during pregnancy, on account of hemorrhoids.
Rest: outer head >; cold in head >; loss of voice >.

Digitized by Google

Desire to lie down: after eating.
Lying down: drawing in muscles of neck.
‖Must lie down for hours. θChlorosis.
Sitting: stitches in r. scapula, legs fall asleep.
Rising: < cough in morning; < pains in small of back; > after rising from bed.
Stooping: aggravates drawing in muscles of neck.
‖Ascending stairs: < headache and vertigo.
Turning head to l.: aggravates drawing in muscles of neck.
Exertion of arms: aggravates drawing in muscles of neck.
Motion of elbow: cracking in joint.
Writing: hand trembles.
Walking: soles sensitive; pain in small of back >.
Walking in open air: headache <; toothache >.
Motion: increases heat, especially exercise in sun; chilliness with cough; cold, clammy sweat.

[36] **Nerves.** Excessive depression and exhaustion.
Uneasiness of whole body.
Restlessness with cough.
Trembling and shaking with chill.
‖Great jactitation of muscles. θPuerperal convulsions.
‖Convulsions with vomiting; with rattling of mucus.
Disposition to start, even at slight noises.
Twitching of muscles, of many parts of body.
Great lassitude.
Uncomfortable feeling after eating.
Exhaustion and debility ‖after severe illness, if appetite does not return.
Faintness with nausea.
Great prostration after vomiting.
‖Useful after night debauches; ‖after getting drunk.
Collapse with diarrhœa.
‖As if paralyzed. θPneumonia.

[37] **Sleep.** Gaping after coughing; dozing of children, with cough.
Drowsiness: with trembling of head; with shortness of breath; with cough.
‖‖Drowsiness. θRemittent fever.
Somnolence: in daytime; with heat; with numbness of head; with chill.
Sleepy after eating, after vomiting, with bellyache.
During sleep unequal breathing.
Sleep restless, with sensation in stomach.
‖‖Great sleepiness during day; mostly forenoon.
At 7 P.M. feels overwhelmed with sleep.
‖Coma. ‖‖Deep, unrefreshing sleep. θChlorosis.
Slight raving during sleep.

Digitized by Google

‖Restless sleep. θAnosmia.
Wakefulness, with shivering over l. side, on which he does not lie; or with sexual desire and erections when getting warm.
Sleepless, more after 12 P.M.
Frequent waking, as from fright; from anxious dreams of being wounded.
Dreams: of quarrelling; ‖voluptuous; horrible, about mutilation of men.
Restless sleep, frequently awakened by itching here and there.
Ailments from night debauches.
Rouses from sleep at night: tenesmus of bladder.
On awaking: dull frontal headache; sweat.

[38] **Time.** Night: < suicidal mood; headache; toothache <; dry lips and thirst <; loose stools; tenesmus of bladder; pollutions; heat in bed; before midnight heat.
After midnight: sleeplessness <.
Morning: agglutination of eyelids; photophobia; mucus in canthi; toothache; coryza; hunger; mucous diarrhœa; loose cough after rising; drawing in nape of neck; sweat; stools; lassitude on awaking.
Forenoon: ‖sleepiness.
Toward noon: chills.
Noon: < headache.
‖‖Ecstasy during day, beginning in morning. θMegrim.
All day: toothache >; itching on chest; sleepiness; chill predominates.
Afternoon: buzzing in ear, deep sighing breathing; fullness in chest.
7 P.M.: overwhelmed with sleep.
Evening: out of humor; outer head aches; cold in head <; nosebleed; drawing in muscles of neck; thirst; after lying down pain in nape of neck.

[39] **Temperature and Weather.** In moonlight, mental symptoms worse.
Warmth of bed: < itching of pimples.
Worse on getting warm: headache.
Warmth: aggravates cold in head; causes sexual desire and erections.
‖Warm weather: < ‖‖exhausted; night sweats; sleepy; nausea; vomiting.
Hot weather: caused gastric catarrh.
‖Overheated in a warm atmosphere. θPertussis.
Warm room: cough is produced when coming into it from cold air; chills.
Ailments from burning of sun.
Heat of sun: cough <; whooping cough; increased heat; ‖‖cannot bear heat of sun; < from exertion in sun.

Digitized by Google

When becoming hot from getting overheated: loss of voice.
| Heat of summer insupportable.
|| Worse overheating near fire, from radiation of fire. θ Whooping cough.
|| After overheating: diarrhœa.
Child is > after warm washing.
Open air: headache > or <; outer head >; cold in head >; toothache > when walking; | inclination for open air.
|| Sensitive to cold: inhaling cold air; stitches in teeth from drawing air into mouth; || after taking cold.
Aversion to uncover with chill or sweat.
Cold water: increases toothache; diarrhœa.
|| Cold washing: < pertussis.
|| Cold bathing: causes violent headache; outer headache; cold in head therefrom; caused gastric catarrh; causes diarrhœa; suppressed menses.
Child cries when washed or bathed with cold water.
After getting wet: head aches.
Fainting from heat of summer, or in hot, crowded rooms.
| Injury by sun, warm weather, after overheating at fire.
|| From exposure to excessive heat. θ Headache. θ Loose stools.
| Cannot bear heat in sunshine. θ Ecstasies. θ Headache.
| Sensitiveness to cold.
Bad effects from: getting cold; from washing; after bathing.
| Colds after bathing in a river.
| Worse from cold water or cold food. θ Loose stools.

40 **Fever.** Cold to touch: limbs.
Coldness: with cholera; in bloodvessels.
Want of animal heat.
|| Skin pale and cold. θ Convulsions.
Chilliness at every motion, with cough.
Chilliness after vomiting.
Chill predominating during day, even in warm room.
Violent, shaking chill toward noon, with thirst (for beer).
Shivering over back; feet cold as ice, sweat on rest of body.
After shaking chills: cough.
Cold creeps: before menses; and pain in groins.
Cold shivers and bellyache.
Shivering over l. side.
Feverish heat with chill.
Hot body, but cold limbs, with cough.
|| Heat attended by sweat. θ Intermittent.
Fever, with desire to sleep and want of thirst.
Heat, with pain in chest.

Digitized by Google

‖Sweat breaks out during heat, but soon disappears, and is followed by dry heat.
Heat at night, mostly before 12 P.M., with cold feet.
‖Great heat from least exercise, particularly in sun.
Sweat in morning when awaking, which causes a shrivelling of tips of fingers.
Sweat, which returns at precisely same hour, usually every other (third) morning.
‖‖Sweat during heat. θIntermittent.
Cold, clammy sweat from motion.
Cold sweat on hands with cough.
After copious sweating, cough.
Sweat: with rheumatic pains; with headache; on awaking; making canthi painful to touch.
The child is delirious, drowsy, with nausea; red, hot face, irregular pulse and feverish heat, cries when washed or bathed in cold water.
‖Violent chill without thirst; ‖‖heat with thirst followed by sweat.
‖‖After the sweat is over, heat and thirst return.
Quotidian or tertian intermittent with ‖loathing, nausea, vomiting, cutting in bowels and looseness.
‖No gastric symptoms. θIntermittent.
‖‖Gastric fevers.

41 **Attacks, Periodicity.** Sweat at same hour, every other day.
Symptoms repeat every five, six, or twelve weeks.
‖Returning periodically; coma, earache.
Increasing and decreasing headache.
Remitting types. See 40.
Cough in attacks, first severe, following weaker and weaker.
In paroxysms: leucorrhœa.
Attacks of fainting.

42 **Locality and Direction.** On a small place above eyebrow, r. or l.: pain.
Through thighs down to knees: laborlike pains.
Right: deafness; drawing through ear; oppression and pressive pains in side of chest; stitches in scapula; tearing through great toe; back; arm.
Left: pains in temporal region; soreness on parietal bone; redness of eye; swollen red ear; crusty eruption on cheek; hypochondria; hard gland in groin; l. abdominal ring; itching on side of scrotum; drawing in tibia and heel; shivering over side; cannot lie on it.
Left side predom., particularly lower l. and upper r. side.
Symptoms go from one side of body to the other.
Without in: pain in l. temple.

43 **Sensations.** Head as if drunk; as if forehead would burst;

Digitized by Google

gnawing as if in periosteum; as if bones of vertex were swollen; as if a leaflet was lying before the tympanum; stinging on chin as from a hot spark; as if nerve of tooth was torn; as if foreign body had lodged in throat; stomach as if overloaded; as if diarrhœa would come on; cough as if arising from abdomen; as if an ulcer had been torn open in rectum; biting as from salt on l. side of scrotum; as if something would press out of womb; as if throat was filled with a plug; pain in knee as if ligated; as if heaviness of limbs came out of abdomen; as if paralyzed.

Pain: over eyebrow; in stomach, with aversion to work; dull, in head; dull, in forehead; in ears; in nose, when breathing; from teeth, penetrates to head; at stomach, as after eating too much; in rectum, during stool; in chest; in small of back; below knee; in ankles; in groins.

Tremulous fatigue and heaviness of limbs.

Violent pain: in head; in small of back; in lower limbs.

Stitches: in eyeball; in tooth; in chest when exhaling; in r. scapula.

Cutting: in abdomen; before loose stools; in urethra.

Lacerating in head.

Tearing in forehead, temples, and vertex; in r. great toe.

Jerking: in hollow teeth.

Boring: into temples.

Splitting sensation: in forehead.

Gnawing: on top of head; in carious teeth.

Pinching: in abdomen.

Sticking: in chest.

Pricking: fine, in l. temple.

Burning: and stinging on chin; at pit of stomach; spasmodic pain at pit of stomach; in urethra; in chest.

Smarting; down thighs, from acrid vaginal discharge.

Rawness: of palate.

Soreness: of periosteum on vertex; in a small spot on l. parietal bone; in canthi; of nostrils and corners of mouth; of eruption on face and chin; on border of tongue; in stomach; to pressure; of soles, when walking; of skin when scratched.

Aching: in forehead, as if it would burst; in limbs, with headache; in limbs.

Pressive pain: in chest.

Arthritic pain: in fingers.

Drawing: in l. temple; and boring in temples; through r. ear and eustachian tube; in cervical muscles; in arms and fingers; in hip joints; in knees; in lower part of l. tibia; in l. heel; and tearing through r. great toe; in sacrum.

Digitized by Google

Pressure: inward, in l. temporal region; in womb; in chest.
Spasmodic pain: at pit of stomach; drawing in cervical muscles.
Cramplike pain: at stomach.
Rheumatic or gouty pain: in feet with dyspepsia; in nape of neck and loins; with gastric complaints.
Pulling pains: in lower limbs.
Twitching: in facial muscles; in muscles of many parts.
Crawling: around tubercles on scalp.
Pulsation: slow in l. temple.
Numbness: of legs; of head.
Fulness: after eating, with tension; of chest; of stomach.
Heaviness: in forehead and fulness in stomach; in limbs.
Emptiness: in pit of stomach.
Oppression: from stomach; in chest.
Stiffness: of knee, painful.
Tension: after eating; in hypochondria.
Dryness: of lips; of mouth.
Heat: in face, and redness; in cheeks.
Coldness: in nose when inhaling; of feet like ice.
Shivering: over l. side; over back.
Itching: on scalp, with formication; in eyes; on cheeks; of penis; of tip of glans; biting on l. side of scrotum; on chest; of neck and back; of skin; rash.
Pain on a small spot above either eyebrow.

[41] **Tissues.** Exceedingly exsanguineous condition of body.
⋮Rheumatism and gout if parts are inflamed or swollen.
⋮Acute gout having left deposits, with gastric symptoms.
⋮Inveterate (chronic) gout without fever.
Hemorrhages dark.
⋮Dropsical swellings of whole body.
⋮⋮Mucous membranes generally affected.
⋮⋮Swelling pain and redness of glands.
External parts turn black; dry gangrene.
⋮Obesity of young people.
⋮Marasmus of children.
⋮Glandular obstructions.
⋮Scrofula.
⋮Fungus articularis.
⋮Metastasis of gout and rheumatism causing gastric catarrh.
Dry gangrene.
⋮Emaciation.
⋮Anasarca.
⋮Useful after suppressed discharges.

[45] **Touch. Passive Motion. Injuries.** ⋮⋮Child cannot bear to be touched or looked at.

Touch: child cannot bear it; increases pain on parietal bone; causes eruption on face and chin to pain; increases toothache.
Sore to touch: region of liver.
Painful to touch: larynx.
Pressure: pain in tubercules on scalp <; causes sore feeling in stomach, vomiting; lessens pain in hard gland in groin; headache.
Scratching: causes soreness of skin.

[46] **Skin.** Before eruption breaks out, backache. See 31.
‖ Eruptions repelled or not appearing. θ Convulsions.
| Eruptions like boils and blisters.
| Pustules like varicella.
| Itching of skin, feels sore when scratched.
| Pimples and vesicles as from stings of insects, especially on face and joints of limbs.
Eruptions like bites of insects.
Pustules spread over body and limbs; spreading from fauces.
Red, itching rash on body.
Ugly bluish red scars.
| Acne; with people of a nervous constitution.
So-called liver spots; brownish spots.
| Tetters in scrofulous people.
| Deep, spongy ulcers; especially with gastric symptoms.
Fistulous ulcers.
| Eruption with thick, hard scabs; often honey-yellow; here and there a crack oozing a green, sanious fluid; he suffered as if immersed in burning embers; much prostration.
‖ Horny excrescences.
| Smooth warts, which are often soft.
Ulcers breaking out around a wart.
| Chronic skin (and other) affections traceable to suppressed eruptions or ulcers.
| Urticaria, white lumps with red areolæ which itch; comes and goes; < after meat; make him irritable, very hot and thirsty.
Bed-sores.
‖ Measlelike eruptions; delayed, vomiting sets in during measles.
| During measles. θ Gastric catarrh.
| Measles and sequelæ to whooping cough.
Before smallpox appears, great oppression.
Smallpox and other eruptions with diarrhœa.
: Chronic skin affections, favus, lichen, scald head, ulcers in face.

[47] **Stages of Life, Constitution.** Hydrogenoid constitution.

Digitized by Google

Nursing infants: stool in hard lumps; coughing and gaping.

Children: rash and remitting fevers.

Young people grow fat.

Old people: alternate diarrhœa and constipation; pulse hard and quick.

Elderly persons with diarrhœa all at once get costive.

Drunkards: diarrhœa; pneumonia; trembling; scrofulous photophobia.

[48] **Relations.** Similar to *Apis* (skin); *Arsen.* (gastric catarrh, burning eruption, dropsy); *Amm. mur.* (mucous flux); *Bryon.* (rheumatism, gastric symptoms, effects of heat, etc.): *Chamom.; Hepar; Ipec.;* (gastric ailments); *Mercur.; Nux vom.; Pulsat.* (gastric symptoms, relief in the air, mind, chills and fever, etc.); *Ran. bulb.* (horny exanthemata); *Rhus tox.; Sulphur; Scilla.*

Related to: *Ipec.*, still more to *Lycop.* (Teste).

Similar in gastric vertigo to *Pulsat.;* gastric headache from sour things, to *Pulsat.* or *Arsen.;* inflamed eyes, to *Acon., Euphras.*; in toothache in hollow teeth, to *Pulsat.;* in lessened appetite from summer heat, *Bryon., Carb. veg.;* cramp in stomach, *Pulsat. or Ipec.; watery* diarrhœa, *Ferrum;* after getting overheated, gastric symptoms, *Bryon.*

Useful after *Ipec.* or *Pulsat.;* in intermittent.

Polypi with *Pulsat.* and *Mercur.*

After *Ant. crud.* follow well: *Pulsat., Mercur., Sulphur.*

Antidotes to *Ant. crud.: Calcar., Hepar., Mercur.*

Ant. crud. antidotes: stings of insects.

Complementary: *Squilla.*

ANTIMONIUM SULPH. AURATUM.

Golden Sulphuret of Antimony. Sb_2S_5.

Introduced by Glauber, 1654, and abused as a purgative and an emetic.
Proved by Mayrhoffer, in 1845; published by Buchner, in 1874.

[1] **Mind.** Apprehensiveness with heaviness in præcordium.
[5] **Inner Head.** Pressive headache.
‖Burning in head. θEye complaints.
[4] **Outer Head.** Reddish swelling behind r. ear, leaving a redness and scurfiness.
[5] **Sight and Eyes.** ‖Amaurosis, in beginning.
‖Spots on cornea.
‖Iris protruding through cornea.
[7] **Smell and Nose.** ‖‖Bleeding from nose on washing.
Increased mucus from nose and throat.
[12] **Inner Mouth.** Pasty mouth and taste in morning.
[13] **Throat.** Burning and heat in fauces.
Mucus from throat becomes offensive to smell.
Pressure in throat as if a plug stuck in it.
Scratching, rough feeling in throat in morning.
[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite; almost a loathing of food.
[17] **Scrobiculum and Stomach.** Pressure and fulness in stomach.
[19] **Abdomen.** Pressure, tension and fulness in abdomen; umbilical region sensitive.
[20] **Stool and Rectum.** Passage of much flatus with sudden urging, followed by a stool solid at first, then bright yellow and pasty; afterwards violent colic and rumbling around navel.
Constipation; feces hard and passed with difficulty.
[21] **Urinary Organs.** Urine increased, dark red.
[22] **Male Sexual Organs.** Pustular eruption on scrotum after much itching.
[25] **Voice and Larynx. Trachea and Bronchia.** Accumulation of tough mucus in bronchi and larynx.
‖‖Increased mucous secretion with fulness in bronchi, and full, hard breathing.
[26] **Respiration.** ‖Respiration difficult.
[27] **Cough.** ‖Dry, hard cough, no expectoration.
Increased mucous sputum, mixed with blood, of a sweetish taste.

Digitized by Google

[28] **Inner Chest and Lungs.** ‖Passive congestion of upper . lobe of l. lung, with dry, hard cough.

[29] **Heart, Pulse and Circulation.** Heaviness in præcordium and apprehensiveness.

[32] **Upper Limbs.** Arms heavy in morning.
Boring and tearing in arms and hand joints.
Swelling of fingers.

[34] **Limbs in General.** ‖Itching on hands and feet.

[36] **Nerves.** ‖Malaise, fatigue and lassitude with nausea.

[37] **Sleep.** Deep sleep.
Sleep dreamy; wakes after midnight with dull headache; with restlessness and sexual desire.
Awoke suddenly with heavy, confused head, pressure in stomach, difficult breathing, fulness of bronchi, restless tossing; skin active, with slight warmth and even sweat.
Sleep dreamy with sudden waking after midnight, gouty and rheumatic pains increased.

[38] **Time.** Morning: pasty taste in mouth; scratching in throat; arms feel heavy.
After midnight: awakens with dull headache; restless; sexual desire increased; gouty and rheumatic pains <.

[39] **Temperature and Weather.** Washing causes nosebleed.

[42] **Location and Direction.** Right: swelling behind ear.
Left: upper lobe of lung congested.

[43] **Sensations.** As if a plug stuck in throat.
Boring: in arms and hand joints.
Tearing: in arms and hand joints.
Violent colic.
Pressive pain: in head.
Burning: in head; in fauces.
Pressure: in stomach; in abdomen.
Fulness: in stomach; in abdomen; in bronchi.
Heaviness in præcordium.
Itching: on scrotum; on hands and feet.

[46] **Skin.** Dry, elevated pustules on inner surface of thighs.

[48] **Relations.** Similar to: Antimonies (family relation); *Aurum* (chest); *Arsen.*; *Ferrum*; *Merc. sulph.*; *Sulphur*; *Amm. carb.* (nosebleed after washing).

ANTIMONIUM TARTARICUM.

Tartar Emetic. $2[K(SbO)C_4H_4O_6]H_2O.$

An invention of the alchemists, very popular with them, forbidden by the French Academy, finally introduced and much used and abused by the Old School.

Proved by Hahnemann and some of his students. Published by Stapf, in 1844, and proved since by many others. We have made use of the masterly monograph of Dr. R. Hencke, of 1874, who collected all poisonings, provings and cures.

[1] **Mind.** Unconsciousness, but rarely.
Stupefaction, with numbness of head.
||Stupid and sleepy; stupefying meningitis.
Confusion of head; with feeling as if he ought to sleep.
Dulness of mind; imbecility.
Apathy and indifference to everything, even death would have been welcome.
||Delirium, with pleasant expression. θBronchial catarrh.
Contradiction between mind and will.
The child must be carried, it cries if touched.
Anxious face.
Moaning and groaning, with oppression on chest.
Crying with cough.
|Pitiful whining before and during attacks. θInfantile catarrh.
|Continual crying and whining of a child for three days, gets only little sleeps of fifteen or thirty minutes. θSummer complaint.
Child cries on attempting to take breast.
Child clings to those around, calls for help in a hoarse voice, with cough.
The child will not allow itself to be touched without whining and crying.
Fear and dread of being alone.
Uneasiness of mind, indisposed to work, apparently proceeding from abdomen.
||Bad humor. θBronchial catarrh.
Dejection.
Despondent and apprehensive that he would not recover; t.
Hopelessness, ||despondency.
||Hopeless mood. θColic.
||Hopeless and despairing when awake. θIntermittent.

Digitized by Google

‖Despondent, hypochondriacal; inclined to violence.
‖Melancholic. θChronic metritis.
‖Complains about his numerous symptoms. θPneumonia.
‖Despairs of his recovery. θPneumonia.
Depression of mind and fear that he will never get well.
Apprehensive and restless.
Great concern about future with beating in stomach.
Anxiety and restlessness.
‖Anxiety during paroxysm, often lasting two to three hours. θPregnancy.
Anxiety with nausea.
‖Indescribable anxiety and oppression of chest. θCholera.
‖Anxiety. θIntermittent.
Despair and hopelessness, with lethargy, with cold sweat.
‖After attacks, in good humor, playing. θCatarrhal croup.
Merry all day, in evening anxious and full of fear.
Gayety, wild mirthfulness, with subsequent ill humor and anxiety for future.
Boldness.
Desire to bite.
‖Excessively peevish and quarrelsome (a boy æt. 3).
‖Peevishness. θLaryngo-tracheitis.
‖The children get angry, weep and cry. θWhooping cough.
Mental excitement.
Frightened at every trifle.
Highest degree of mental restlessness.
Consequences of anger or vexation.
‖Worse after getting angry. θCough.
‖Stong emotion followed by amblyopia. θDuring pregnancy.

[2] **Sensorium.** Heaviness of head.
Stupefying dulness with unconquerable drowsiness.
Felt giddy and sick; immediately.
Dizziness, with cough.
Vertigo with alternate drowsiness.
Vertigo: on closing eyes; on walking; when lifting head, must lie down, with nausea.
‖Pressing pain in forehead with vertigo, stupor and dulness of head, slightly delirious, drowsiness, but cannot sleep. θInfluenza.
‖Vertigo with flickering before eyes. θRheumatism.
‖Vertigo with dimness of vision and a pressing headache. θPneumonia.
Vertigo and violent chills running through body with a sudden shock.
Fainting, with sweat on forehead.
‖Child gets insensible, limbs cold, pulse weak, almost imperceptible; recovery after brandy and water.

Digitized by Google

Fainting after a cold feeling in scrobiculum, followed by sleep.
Asphyxia; t.
After vomiting once, a heavy asphyxia, and when coming to herself again, violent colic.
Asphyxia from drowning.

[3] **Inner Head.** ‖Cerebral congestion.
Arachnoid membrane too opaque; t.
θDull head, like a strong pressure, more in r. forehead, with boring, sharp shooting tearing deep in brain. ‖Rheumatism.
Violent pain in forehead and giddines.
‖Headache, as from a band compressing forehead.
Tensive pain in forehead and one side of head, as if brain was in one lump, with drowsiness, < evening, after eating and sitting bent; > sitting up, lying high with head and in the cold.
Pressing headache, as if brain was put together in lumps.
‖Feels as if brain was pressed together; stupid and sleepy; more when resting; in evenings and at night; > when moving about, or after washing head.
‖Heavy pain in forehead like waves increasing and decreasing.
Reverberation of pulse in head.
Very sensible pressure on vertex, with violent pulsation in the temples.
‖Throbbing in r. forehead, < evenings, sitting bent, from warmth and > sitting up and in cold.
Pressive pains in forehead; stitching extending downward into l. eye.
Painful drawing in r. temple, extending down to zygoma and upper jaw.
Tearing pains in head.
Stitches in l. parietal bone, on stooping, extend forward.
Headache and feeling as if paralyzed. θPneumonia.
‖Stupefying headache. θMeningitis.
Occiput heavy, requires support.
On stooping, feeling in occiput as if something fell forward.
Headache with vomiting.
‖Headache. θVariola.
Headache with sensitiveness of region of stomach.
‖Violent headache during heat. θTertian.
‖Headache also in apyrexia. θIntermittent.
‖Inflammation of brain.
‖Apoplexia nervosa and serosa.
Headache: < evening; lying down; getting warm in bed; after eating; sitting bent; in rest; > sitting upright; in the cold; lying high with head; moving about; after washing head.

Digitized by Google

[4] **Outer Head.** ‖Head very hot. θRheumatism.
Head dull, forehead warm, less strength, and displeased with everything.
Forehead covered with sweat; head is cold.
Sweat on forehead and on neck.
‖Tinea.
‖Plica polonica.
Scalp very sensitive, with heaviness of head.
Chronic trembling of head, most after coughing, with sense of inner trembling, chattering of teeth and great desire to sleep; < evening and from warmth.
Chronic trembling of head and hands, with great debility.
Numbness of head, with stupefaction and somnolence.
Cold sweat on head, with cough.
‖Head hot and sweaty. θAtelectasis pulmonum. θDuring efforts at vomiting. θPertussis.
Lifting head.

[5] **Sight and Eyes.** Flickering before eyes.
Sees only as through a thick veil.
Vanishing of sight.
It gets dark before eyes and his senses leave him.
Amblyopia after strong emotion, and colic during pregnancy.
‖‖Amblyopia. θMeningitis.
‖‖Oversensitive retina.
‖‖Photophobia. θIn scrofulous persons.
Weak eyes, next day headache, most in forehead.
Strabismus.
‖‖Cataract. θOf cattle.
Tearing pains in eyes.
Eyeballs pain, as if bruised, especially on touching them.
Burning and smarting in eyes and canthi with redness of conjunctiva, evenings.
Eyes open; pupils closely contracted.
‖‖Eyes turned upward, with difficult breathing. θCatarrhal croup.
‖‖Dim, swimming eyes. θDiarrhœa.
‖Eyes prominent, glaring. θPneumonia.
Jerking, shooting in inner canthi and pressure in eyes.
Eyes fill with tears when gaping.
Eyes feel tired, as if lids would close.
Inclination to press lids tightly together.
On closing eyes, vertigo.
Inclination to shut eyes, without shunning light.
‖‖Eyes sunken.
‖Eyes sunken and surrounded by dark circles. θCholera.
‖Edges of lids covered with mucus. θPneumonia.
Lids and external canthi granulated.

Digitized by Google

Injected eyes.
‖Eyes slightly inflamed, staring, dull, unsteady, half open or one closed. θPneumonia.
Inflammation of conjunctiva with much lachrymation.
Red, inflamed eyes, engorged ciliary vessels.
‖Eyes somewhat reddened, aching with suppuration of lids. θRheumatism.
‖Gonorrhœal ophthalmia.
‖‖Ophthalmia rheumatica or arthritica.

[6] **Hearing and Ears.** Roaring in ears.
Fluttering before l. ear, as from a large bird; at same time, warmth of ear.
Twitching, tearing in r. concha; evening on lying down; disappears in bed.

[7] **Smell and Nose.** ‖Uncontrollable epistaxis with spongy gums, as in scurvy.
‖Nose dry. θRheumatism.
Sneezing, fluent coryza and chilliness, with loss of taste and smell, and a feeble voice.
Stoppage of nose, alternating with fluent coryza.
Nosebleed, followed by fluent coryza, with sneezing.
Stupefying tension over root of nose, as from a band.
‖Well-marked motion of alæ nasi with a child. θPertussis.
Nostrils widely dilated.
‖Nose pointed.
Nostrils dark, sooty and dilated.
‖Nostrils black, smoky, inflated and moving rapidly, like wings. θPneumonia.

[8] **Upper Face.** Face animated, tongue red, moderate thirst, region of stomach sore, headache.
‖Face expresses greatest anxiety. θAcute œdema of lungs.
‖Anxious look. θBronchial croup.
‖Despairing anxiety depicted on face. θPneumonia.
‖Suffering face, livid red. θPneumonia.
‖Remarkable distortion of countenance with spasms.
‖Convulsive twitches in almost every muscle of face. θWith cough.
‖‖Tearing pain in whole side of face, even head and neck of that side. θRheumatic toothache.
Burning heat of face.
‖Face very much flushed. θCatarrhal croup.
Congested face, with difficult breathing.
Face dark red or purple. θPuerperal convulsions.
‖Face red, puffed. θBronchial croup.
‖Face red, bloated, anxious. θPneumonia.
Despairing, anxious look, face cool, pale and earthy; nostrils dark, sooty and dilated. θPneumonia.

Digitized by Google

Face pale, bluish; anxious.
‖‖Pallor. θBronchial catarrh.
‖‖Pale, sunken face. θDiarrhœa. θCholera.
‖Face pale, circumscribed redness on cheeks. θCatarrh.
‖Face cool, pale earthy, bluish around nose. θPneumonia.
‖Face as pale as a corpse, with bluish spots, distorted and cold. θCholera.
‖Face pale, nose pointed, eyes sunken with blue margins; lips livid. θAsphyxia. θChild after birth.
‖Cold and livid countenance, bathed in cold sweat.
Sweat on forehead: with nausea; with cough; with heat.
Maculæ in face.
‖Pustules on face; sometimes they leave ugly blue-red scars.
‖If ulcers last awhile on limbs, ulcers also appear on face. θLeprosy.

[9] **Lower Face.** Mouth closed spasmodically.
‖‖When gaping he cannot open the mouth fully. θIntermittent.
‖Mouth remained open after gaping, he could not shut it for a while. θIntermittent.
‖Mouth open, parched, upper lip drawn up. θPneumonia.
Lips: dry, scurfy; chapped, nights; pale, livid; blue; swell much and quickly, and have excoriations on many places; erythematous eruption; covered with little blisters; (θafter intermittent); itching vesicles.
‖Eruption around mouth, of rheumatic origin. θTertian.
‖Aphthæ around mouth. θInfluenza.
Burning, as from hot coal, on r. side of chin.

[10] **Teeth and Gums.** Teeth chatter with inward trembling.
Tearing in roots of teeth after eating (l. side posteriorly).
Violent toothache in morning.
‖‖Rheumatic toothache of intermitting type.
Gums: bleed as if scorbutic; red; spongy, with nosebleed; scurvy.
Teeth covered with mucus.
‖‖During dentition catarrhal hyperæmia.

[11] **Taste and Tongue.** Taste: flat; salty; sour; bitter; as from rotten eggs.
Food seems tasteless; tobacco has no taste.
Sour taste of sputa.
A very unpleasant taste in mouth.
‖Mouth slightly bitter. θPregnancy.
‖Flat or bitter taste. θInfluenza.
Taste bitter, with a slimy, furred tongue.
‖Bitter taste in mouth, especially all night. θDyspepsia.
Speechlessness; speech difficult, tongue swollen.
Difficult, even painful, to move tongue.

Digitized by Google

Tongue: very thinly white, with reddened papillæ, red edges; very red, dry in middle; red, in streaks; dry and red; cold, pale, covered with a thin, white, slimy fur (θcholera); coated, bitter taste and nausea; slimy, furred; covered with a thick, white, pasty coat; furred, yellowish-brown, dry; covered with a flocculent, tough coat; covered with a false membrane.

‖Tongue has a thick white fur. θRheumatism.

‖Thick, white or bilious fur on tongue, with retching of phlegm, nausea and vomiting. θInfluenza.

‖Tongue, brown, dry. θPneumonia.

Imprints of teeth on border of tongue.

Small round ulcers with lardlike borders, on tongue.

[12] **Inner Mouth.** Much heat in mouth with eruption; t.

Mucous membrane of cavity of mouth and pharynx covered with a soft, grey, false membrane not continuous.

Tongue moist and yellow in middle.

Mouth so sore can scarcely swallow, morning after rising.

‖Small, circular patches, like smallpox pustules, in and upon mouth and tongue. θDiphtheria.

Blisters and pustular eruptions on mucous membrane of whole cavity of mouth.

‖Salivation. θDuring pregnancy.

Mouth and lips swollen and excoriated as from salivation with mercury.

Ptyalism with buccal eruptions; t.

Copious salivation with nausea.

Copious salivation, spits all the time.

Spits much after recovering from his faint; t.

[13] **Throat.** A membranous exudation peels off in pieces.

Sensation of soreness of posterior part of palate when not swallowing.

Soft palate and upper part of pharynx very red and full of little blisters, and so much swollen that he could not swallow anything, even some fluid; it interferes with breathing.

Soft palate and throat deep red, covered with small vesicles; surrounding parts swollen and coated with mucus.

Lips, tongue, hard and soft palate covered with a score of vesicles or pustules, of a yellowish white color, flattened, depressed in the centre, and filled with a purulent liquid, of a milk white color; t.

Back of pharynx covered with mucus.

Mouth, tongue and pharynx covered with a soft, pale, disconnected false membrane; mucous membrane beneath reddened, or covered with grey, sometimes transparent, flakes.

Fauces covered with pustules, which spread over body and limbs on two days following.

Digitized by Google

Burning in fauces.
Rapid swelling of tonsils and cervical glands.
: Acute angina.
Saltish rising in throat.
‖‖Much mucus in throat with short breathing.
Roughness in throat, with sensation as if a small leaf obstructed windpipe on hawking.
‖‖Throat full of phlegm, with cough.
Heat and constriction in throat.
In throat, mouth and tongue a sensation of tension, with some pain and a well-marked metallic taste.
Œsophagus dry.
Erythematous sore throat; t.
Mucous membrane of digestive tube, from mouth to cardia, shows traces of pustular or pseudo-membranous inflammation; t.
Phlegmasia of a portion of intestinal canal with false membrane, completely tubular, obstructing œsophagus; t.
Intercurrent pseudo-membranous sore throat.
All along mucous membrane of alimentary canal innumerable small conical pustules filled with serum; membrane pale; t.
Difficulty in swallowing.
Violent irritation in throat with difficult swallowing.
Swelling of tonsils and highly reddened pharynx.
Throat so swollen and mucus coated, he was unable to swallow even liquids, and his breathing was obstructed.
‖‖Dysphagia. θMeningitis.

14 **Appetite, Thirst. Desires, Aversions.** Good appetite with flat taste, and somewhat dry mouth.
Canine hunger on walking in open air.
Appetite diminished.
‖Less appetite in apyrexia. θTertian intermittent.
Loss of appetite, anorexia.
‖Loss of appetite, without much thirst. θInfluenza.
‖Weariness, with no appetite; in apyrexia. θTertian.
Disgust for food during pregnancy.
‖‖Disgust for food, frequent nausea and relief by vomiting. θGastric derangement.
No appetite at noon.
‖Little thirst, no appetite. θRheumatism.
‖Not much appetite, no thirst. θPregnancy.
‖No appetite, great thirst. θRheumatism. θPneumonia.
‖Very little thirst. θAcute catarrh.
‖Thirstlessness. θDiarrhœa. θBronchial catarrh.
‖‖Great thirst.
Eager desire for water with vomiting smallest quantity.
‖Greedy desire for water. θSummer complaint.

Digitized by Google

Irresistible thirst for cold water. θCatarrhal diarrhœa.
Much thirst; drinks little and often.
Thirst with burning sensation in fauces, stomach and abdomen.
Thirst after stool.
Desire for acids, for fruits, or for any cold drink. θDiarrhœa.
Extraordinary appetite for apples, and thirst for cold water.
Aversion to milk. θDiarrhœa.
Aversion and disgust for milk and every other kind of nourishment; child æt. 3 months. θSummer complaint.
Great disgust for whiskey.
No desire for tobacco.

15 **Eating and Drinking.** Food relieves somewhat pressure in abdomen.
After eating: cough with vomiting of food and of mucus; sleeps; uncomfortable feeling; toothache; squeamishness; pressure in stomach; backache.
Relishes food, but often attacked with loathing after eating.
Worse after warm drinks, especially milk. θWhooping cough.
After drinking: cough.
All food is immediately vomited up.
After eating he vomits ingesta, but without relief. θPertussis.
Eating sour food or drinking tart wine brings on attack. θAsthma.
After every drink, nausea and pressure in pit of stomach. θPneumonia.
Febrile motion after every meal, with pungent heat in face. θPregnancy.

16 **Hiccough, Belching, Nausea and Vomiting.** Violent hiccough without vomiting.
Frequent retching with eructations tasting of food, bitter or acid.
Belching, which relieves. θDuring pregnancy.
Eructations tasting like rotten eggs, with sensation as if stomach had been overloaded, at night.
Foul eructations. θPneumonia.
Rising of saltish water in throat.
Loathing: with desire for cooling things; after eating.
Qualmishness in stomach after dinner.
Nausea with anxiety.
Nausea causes great anxiety. θDiarrhœa.
Continuous anxious nausea, straining to vomit, with sweat on forehead. θDiarrhœa.

Digitized by Google

Nausea with restlessness and great anxiety. θRheumatism.
Nausea with faintness. θPregnancy.
Nausea with bitter taste.
After nausea, stomach feels empty.
Nausea, often disgust, with an apparent full stomach, with vertigo and dull head.
Nausea during loose stools.
Nausea, sweat, weariness and apathy continue till late in night.
Long-continued tormenting nausea. θYellow fever.
Nausea and incessant vomiting all night.
Nausea, vomiting and want of appetite. θIntermittent.
In morning, nausea and vomiting of slime, followed by sweat.
Nausea with frequent vomiting of bitter-sour substances. θDyspepsia.
Violent retching, nausea and vanishing of senses.
Cold and hot flushes, finally vomiting of slime, followed by a mushy substance and bilious fluid, with very great exertion of chest and abdomen, and breaking out of anxious sweat.
Nausea and vomiting of phlegm, with increase of pulse from 62 to 75 beats, which frequently continues into night.
Nausea and vomiting with constipation. θPneumonia of drunkards. θRemittent fever.
After nursing at breast, nausea and vomiting lumps of milk.
Copious vomiting. θCholera.
Vomits at every motion.
Vomits even smallest quantity of drink, with eager desire for water. θSummer complaint.
Vomiting immediately after taking a cup of broth.
Vomits food and drink, even before attack. θPertussis.
All food immediately ejected from stomach.
Violent retching and vomiting food with cough.
Vomits with great effort. θDiarrhœa.
Vomiting slime with great exertion.
Vomits mucus; with mucous diarrhœa.
Vomituritio with diarrhœa, great masses of phlegm brought up. θPertussis.
Vomiting of large quantities of mucus. θPregnancy.
Vomits tenacious mucus. θDiphtheria.
Vomiting of slime and bile; of tough, watery mucus, then pasty food, then fluid, mixed with bile; of bilious masses with great violence; of bitter, mushy and fluid matter of a bad odor, and acid reaction; matter tinged with blood; bloody foaming fluid.

Digitized by Google

Gastric and bilious vomiting with bitter taste in mouth, vomiting bitter-sour.

Violent painful vomiting of much mucus and bile, with some blood next day.

Vomiting bloody mucus. θPneumonia in children.

Hæmoptysis. θDelirium tremens.

Vomiting in any position, except lying on r. side; with headache and trembling of hands.

During efforts of vomiting, head hot and sweaty. θPertussis.

Vomiting until he faints away.

Vomiting and fainting. θMeningitis.

Pressure on stomach causes vomiting.

Vomiting with pain in belly and purging.

Vomiting and diarrhœa in August, with a child, æt. three months.

Vomiting is followed by great languor, drowsiness, loathing, desire for cooling things. θDiarrhœa.

In morning vomiting and cramps in arms and legs, after diarrhœa all night. θCholera.

Retching, then vomiting, followed by great prostration, chilliness and sleepiness.

Vomiting returning after sleep.

[17] **Scrobiculum and Stomach.** Pressure in pit of stomach, dulness of head, and anxious difficult breathing.

Tingling and pinching in pit of stomach, with violent, sudden beats of heart. θPleurisy.

Violent tickling in pit of stomach (and trachea), irritating to cough.

Beating and throbbing, particularly in pit of stomach or abdomen, with great concern about future.

Pit of stomach sensitive, with meteorism, nausea and vomiting. θPneumonia of drunkards.

Coldness in pit of stomach with fainting.

No pain in pit of stomach or abdomen. θCholera.

Sensation of emptiness in stomach. θInfluenza.

Stomach feels empty after nausea.

Pressing in stomach with belching; diminished appetite.

Pressure in stomach after eating.

Violent pains in region of stomach, constantly increasing until they cause fainting.

Cramps in stomach.

Unpleasant feeling of warmth in region of stomach, followed by violent pain in forehead and in back part of throat; t.

Unpleasant feeling of warmth in region of stomach, gradually increasing until it is a painful burning, and causes great restlessness.

Digitized by Google

Burning heat in region of stomach.
Stomach very sensitive, no appetite.
Irritation in stomach with nausea.
Sensation as if stomach had been overloaded; eructations frequent, like foul eggs; sleep restless.

[18] **Hypochondria.** Violent pains at the epigastrium, which was tense; t.
Burning heat and pain in epigastric region.
Burning under sternum.
Retraction of epigastrium with cough.
‖Great præcordial anxiety with vomiting of mucus and bile.
‖Pressure in hypochondria with distension, most in region of liver. θInfluenza.
Region of liver sensitive to touch.
‖Gastric and hypochondriac regions sensitive and distended. θPneumonia.
‖Icterus with pneumonia, especially of r. lung.
: Diaphragmitis.

[19] **Abdomen.** Upper part of abdomen tense and painful.
Shocks and jerks proceeding from abdomen when asleep.
Violent colic as if bowels would be cut to pieces; < sitting bent forward.
Violent bellyache after vomiting.
‖Sharp cutting colic before stool. θDiarrhœa.
Violent pain in abdomen with vomiting and purging.
‖Colic, during loose stools.
Colic around umbilicus, > after stool.
With colic: pain going down thighs.
Cutting in bowels with purging.
Abdominal pains increasing and very frequent discharges from bowels of watery matter.
‖Most violent pain in abdomen, sacral and coccygeal region and in loins. θChronic metritis.
Burning in abdomen.
Beating and pulsation in abdomen.
: Engorgement of abdominal viscera.
Abdomen feels as if stuffed full of stones, though he has eaten nothing, and it does not feel hard.
Shifting of flatulence, with rumbling in bowels and diarrhœa.
Rumbling in bowels, painless.
After much rumbling in intestines a second discharge from bowels.
Meteorism and diarrhœa.
‖Abdomen tympanitic and very sensitive to pressure. θAcute catarrh.
Pressure and aching in hypogastrium, with cold shivers.

Digitized by Google

Much enlargement at sides near hips.
Painful sensation in hypogastrium, causing highest degree of mental restlessness and aversion to all work; towards evening hopeless mood, with chilliness and great sleepiness.
Violent burning soreness in r. groin.
Violent cutting and laborlike tearing from above downward across groins, through thighs down to knees.
Pain in groins and cold creeps before menses. θDysmenorrhœa.
Violent pain at epigastrium and through whole abdomen, with constant spasmodic contractions of abdominal muscles.
Abdominal breathing.
Sensitiveness of external abdomen, with pinching and tension inwardly.
Sensitive abdomen with mushy stools.
Ascites.

20 **Stool and Rectum.** Stitches in rectum.
Sudden violent stitch from hypogastrium down through rectum.
Burning at anus, after loose stool.
Desire for stool ineffectual, though bowels seem full and pressing.
Tension in perineum. See 21.
Unsuccessful urging to stool with apparent full abdomen.
Tenesmus during and after loose stools.
Stool, after much rumbling in intestines.
Violent shifting of flatulence without distension of abdomen, before stool. θDiarrhœa.
At first cutting pains in limbs, then purging.
Relief of pains after loose stools.
Copious alvine evacuations.
Soft, semi-fluid stool, with much discharge of urine, forenoon and evening.
Frequent, profuse, loose stools.
Mucous diarrhœa with colic and restlessness.
Small, slimy, diarrhœic stools. θPneumonia.
At times pituitous, not copious diarrhœa. θInfluenza.
Diarrhœa slimy and of appearance of yeast, with a marked cadaverous smell.
Watery, mucous, bloody diarrhœa.
Watery, slimy stools, with noise in bowels and urging, and now and then some nausea.
Watery, sometimes slimy and greenish diarrhœa, increased each time after taking breast.
Stools as green as grass, slimy. θSummer complaint.
Diarrhœa with grass-green, slimy stools and collapse.

Digitized by Google

Evening, a few watery stools, thirty or forty during night. θCholera.
Vomiting with rice-water discharges. θCholera.
Violent vomiting and purging.
Cholera when vomiting is copious and there is coldness, and threadlike or trembling pulse.
Constant involuntary stools; profuse, copious diarrhœa.
Involuntary discharge, with much phlegm and dead ascarides.
Involuntary stools. θMeningitis.
Stools: yellowish-brown; thin, bilious, mucous; liquid greenish, with heat at anus; slimy, appearing like yeast and of cadaverous smell; light brownish-yellow, fecal.
Diarrhœa with flatulency.
Colliquative diarrhœa, with meteorism.
Purging with colic.
Thin fluid stools, with very acute drawing pain in bowels, constant sickness and nausea, uncomfortable feeling, now chill, now heat, and after frequent drinking of sugar water frequent emission of pale urine.
Diarrhœa in pneumonia, smallpox and other eruptive diseases, especially if eruption is suppressed.
Diarrhœa of drunkards.
Stool seldom, somewhat hard, with tenesmus. θRheumatism.
Costiveness for several days. θAcute catarrh.
Constipation with nausea and vomiting. θPregnancy.
No stool. θPneumonia.
After stool: tenesmus, thirst; burning at anus; colic less.

21 **Urinary Organs.** Sharp stitches in region of kidneys on moving arms.
Stricture of urethra.
Burning from rectum through urethra.
Spasm of bladder, urine scanty and red. θPneumonia.
Painful urging, with scanty, dark red, frequently at last bloody urine; violent pains in bladder.
More frequent urination.
Urine albuminous.
Urine dark brownish-red, turbid, of strong odor; or becomes cloudy and deposits a violet colored earthy sediment.
Urine acid.
Urine profuse; also at night.
Urine deposits bloody, red filaments on standing.
Highly reddened urine. θPneumonia.
Urine at first clear, then it deposits a flourlike sediment.
Urine scanty, dark, with a brickdust sediment. θRheumatism.

Child grasps at its larynx with cough.
‖Painfulness of larynx to touch; sawing respiration. θCroup.
‖‖Rattling of mucus when coughing or breathing.
‖‖Rattling originates in upper bronchi and can be heard at a great distance. θBronchial catarrh.
‖Great rattling in larynx extending down to trachea, neither cough nor vomiting brought up phlegm.
‖‖Tracheal stertor, bronchial rhonci.
‖:Much rattling of mucus in trachea; cannot get it up.
Sensation as of a leaf obstructing windpipe.
Chronic bronchial catarrh.
‖‖Bronchioectasis and senile catarrh.
:Croup with inability to swallow.
‖Catarrhal (not membranaceous) croup; ‖croup of adults.
Obviates paralysis in croup.

[26] **Respiration.** Breathing short; t.
‖‖Quick breathing.
‖Breathing quick, short, trembling, as it were. θPneumonia.
‖Breathing frequent. θBronchial croup.
‖Breathing short, frequent. θAcute catarrh. θPertussis.
‖Children breathe more quickly when lying down than when carried about in an upright position.
Much phlegm in throat and short breathing.
‖‖Breathing short and difficult. θPuerperal convulsions.
‖‖Shortness of breath from suppressed expectoration, especially if drowsy.
‖‖Slow respiration. θMeningitis.
Respiration short and labored without stertor.
Breathing carried on only by aid of abdominal muscles.
Attacks of unequal breathing.
‖During sleep, frequent attacks of unequal, intermittent breathing.
‖‖The unequal breathing, now shorter, then longer, is much more frequent in lying down, > when child is carried upright. θBronchial catarrh.
‖Breath panting, more depending on abdominal muscles than on chest; r. half of chest immovable. θPneumonia.
Fulness and oppression in bronchia.
Difficult, anxious breathing.
Inspirations gasping; expirations long and slow.
‖Gasping inhalation. θAsthma.
‖Gasps for air at beginning of every coughing spell.
‖‖Gasping. θChild after birth.
‖Breathing with a moaning sound, and raising shoulders. θCatarrhal croup.
‖Child expels air with a kind of bellowing. θPneumonia.
Air expelled with a crowing, almost barking sound.

He has been asthmatic ever since the proving.
Anxious asthma and feeling of fulness and contraction of chest.
⋮Asthma.
▮Every night suffocating attacks. θAsthma.
▮If the attack of difficult breathing is very violent at night, all next day breathing is impeded. θAsthma.
▮Must be supported in a sitting posture in bed. θOrthopnœa.
▮Dyspnœa: in croup; nostrils widely dilated, thorax elevated, much rattling; with heat in chest; when awakening.
▮▮Not much pain in chest, but much dyspnœa. θPneumonia.
▮Extreme want of breath. θPneumonia.
▮Danger of suffocation with rattling of phlegm, always comes on suddenly. θAsthma.
▮Great orthopnœa. θAcute œdema of lungs. θDilatation of heart.
▮▮Suffocated and oppressed about 3 A.M., must sit up to get air; after cough and expectoration she became >.
Suffocation with cough.
▮Suffocative attacks with heat about heart.
▮Spells of suffocation. θPneumonia. θPuerperal convulsions.
▮Spells of choking, in evening, in bed; with constriction. θPneumonia.

‖‖Child is breathless after birth.

‖Asphyxia: from mechanical causes, as apparent death from drowning; from pneumonia, capillary bronchitis, atelectasis; from accumulation of mucus which cannot be expectorated; neonatorum; from emphysema, acute œdema pulmonum with hydrothorax; with impending paralysis of lungs; accompanied by ‖‖drowsiness or coma; pale or dark red face; blue lips; delirium, muscular twitchings; threadlike pulse.

‖Relieves the "death-rattle."

℥ **Cough.** ‖Frequent little cough, without expectoration. θPneumonia.

‖Cough day and night, returning at short intervals, no sputa. θAcute catarrh.

: Whooping cough.

‖Whooping cough: preceded by the child crying, after eating or drinking, or when getting warm in bed; after attack, somnolency.

‖Cough with the peculiar sound of whooping cough.

‖Cough in attacks, with a hissing hoarseness, raises hand to larynx, which is sensitive to touch. θCatarrhal croup.

‖‖Short cough with a shrill sound. θBronchial catarrh.

‖Tormented from time to time by painful coughs of a shrieking sound. θCatarrh of a child.

‖‖Cough compels patient to sit up, is moist and rattling, but without expectoration. θBronchial catarrh.

‖‖When child coughs there appears to be a large collection of mucus in bronchial tubes, and it seems as if much would be expectorated, but nothing comes up.

‖‖Rattling cough, sounding as if it were moist, without really being so.

‖Great rattling, but little expectoration. θPertussis.

‖Loose rattling cough, no sputa. θPuerperal convulsions.

‖Cough, with dentition of children, in which the râles are so loud that they can be heard at a distance; disappearing as soon as children finish their bout of coughing.

‖Between the coughs faint or loud cries for help. θCatarrhal croup.

‖Cough, accompanied by crying out; dizziness; trembling of head; drowsiness; cold sweat on head and hands.

‖Pale face; retraction of epigastrium; retching and vomiting of food.

‖Violent cough after each meal, ending with vomiting of food. θBronchial catarrh.

‖Cough hollow, excites vomiting, accompanied by great pain. θPneumonia.

‖Tickling cough, with violent eructations and retching,

Digitized by Google

even vomiting of watery, tough slime; with it a running coryza.
‖Uninterrupted cough, with frequent vomiting of bloody, frothy, thin fluid masses. θAcute œdema of lungs.
Great hoarseness, even when cough is slight.
Gasping for breath at commencement of cough.
‖Cough with suffocating attacks.
‖Distracting cough day and night, with short breath and rattling in chest. θCatarrh of a child.
Child springs up, clings to those around; calls for help in a hoarse voice, or bends backward and grasps at its larynx.
Cough with rattling of large bubbles and purring in chest.
‖Every cough causes unbearable pains in sides of chest or in abdomen. θPneumonia.
‖Every attempt to cough increases the torture. θPneumonia.
‖Pain in chest when coughing. θIntermittent.
Cough with weak, quick, trembling pulse; restlessness; hot body, but cold limbs.
‖Cough in variola.
‖‖Coughing and gaping consecutively, particularly children; with crying or dozing, and twitching in face.
‖Much fatiguing cough, most nights, shaking whole chest and causing headache most in forehead. θInfluenza.
‖Cough dry, breathing sawing, face red, puffed up, look anxious, could not talk. θCroup.
‖Rattling or hollow cough, < at night, with suffocation, throat full of phlegm, sweat on forehead, vomiting food.
The sputum caused by the proving was always white and frothy; expectoration at times abundant.
‖Constant irritation to cough, with brown expectoration of sero-albuminous kind. θInfluenza.
‖‖Profuse mucus with feeble expulsive power. θBronchitis of infants and old people.
‖‖Profuse mucous sputa, easily expectorated.
Nightly cough, with expectoration of mucus.
Expectoration not constant; in morning and during day.
‖Difficult expectoration, continual shooting pain in l. side of chest. θPleuritis rheumatica.
Expectoration: thick; bloody sputa; of tough mucus.
‖Sputa thick and yellow. θBronchial catarrh.
‖Expectoration tough, foamy, mixed with blood. θPneumonia.
‖Frequent cough, with frothy, sanguineous sputa.
‖Blood spitting when after attack there remains for a long time a bloody, slimy expectoration.
Scraping cough, with a great deal of puslike expectoration;

Digitized by Google

after shaking chills, copious sweating, with chilliness at every motion.
Expectoration of a sour or salty taste.
Cough excited by creeping in larynx or trachea.
Gasps for air in beginning of a coughing spell.
Irritation to cough with tenacious phlegm from bronchia.
!After cough lasts a while, it gets loose and relieves contraction of chest. θAsthma.
!After suffocative fits at night cough with increase of asthma.
!!Cough grows less frequent, patient shows signs of "carbonized blood."
Cough >: sitting upright; carrying child in an upright position; from expectoration.
Cough <: after midnight; after eating; after getting angry; sleeping in damp cellars; getting warm in bed.
!At 11 P.M. sudden violent cough. θAcute œdema of lungs.
!Cough < every morning. θBronchial catarrh.

[28] **Inner Chest and Lungs.** !Full feeling of chest.
!Crushing weight on chest. θVariola.
Constriction of chest.
Oppression > after cough.
!Great oppression on chest. θPuerperal convulsions.
!Oppression before before eruption appears. θSmallpox.
!Velvety feeling in chest. θHeart disease.
!Anxious, with oppression of chest and warm rising from heart.
!Heat in chest with dyspnœa.
!Pain dull, pressing and burning extending to sternum. θPneumonia.
!Burning in chest extending towards throat.
Stitches in l. chest, oppressed breathing in evening.
!Shooting in chest. θInfluenza.
!Violent pains from chest to shoulder, lancinating and tearing. θPleuritis rheumatica.
!During five hours had at least six pounds of fluid evacuated, and still both lungs seemed filled with a fluid secretion. θAcute pulmonary œdema.
!Motion of chest very quick but heavy, like under a heavy load, with suffocative anxiety and stertorous rattling of phlegm. θPneumonia.
!Slight motion of chest; principally abdominal breathing. θPneumonia.
Rattling in chest.
!Mucous and subcrepitant râles and dull percussion over summit of r. lung.
!Rattling of large bubbles with purring in chest. θWith cough.

Digitized by Google

Constant rattling, can be heard at a distance, mostly on r. side. θAcute catarrh.

Rattling of phlegm in bronchia very audible, with increased irritation to cough. θBronchial catarrh.

Rattling of phlegm on chest, > when carried in an upright position, < lying down; with oppression. θBronchial catarrh. θCroup.

After pneumonia rattling continuing, with much cough and copious, white, frothy expectoration. θPneumonia.

Râles heard over hepatized parts; too weak to expectorate.

On upper r. side and whole l. side, numerous fine râles. θPneumonia. θŒdema of lungs.

Inflammation of respiratory mucous membrane.

Grippe; acute pneumonia; broncho-pneumonia; pleuro-pneumonia.

Sputa blood-streaked, rust-colored, adhering like glue to vessel. θPleuro-pneumonia.

Gastric or bilious pneumonia.

Rheumatic affections of pleura or peritoneum. θPneumonia.

Strong bronchial breathing in front, r. side, above and behind; crepitation in l. lung; expiratory murmur. θPneumonia.

Coarse and fine râles; very weak vesicular breathing. θŒdema of lungs.

Complete hepatization. θPneumonia.

In front, r. side, a dull, empty percussion sound. θPneumonia.

Percussion sound tympanitic. θŒdema of lungs.

Percussion behind and below, r. side, up to third rib, empty tympanitic. θPneumonia.

Atelectasis, with symptoms of asphyxia belonging to remedy; with œdema of unhepatized portions of lungs; breathing labored, orthopnœa; mucous râles. θPneumonia.

Œdema of lungs.

Frequent vomiting of a bloody, foamy fluid.

Emphysema.

Hydrothorax. See 26.

Tuberculosis (palliative).

Impending paralysis of lungs. θTyphus pneumonia.

29 **Heart, Pulse and Circulation.** Heat about heart and warmth rising up from it.

So warm about heart that she must let arms sink down, with great general weakness. θDilatation of heart.

More frequent and shorter beat of heart and general increase of bodily temperature.

Violent sudden beats of heart. θPleurisy.

Digitized by Google

Beat of heart is felt in head.
Palpitation of heart, without anxiety.
❙Palpitation of heart with loose stools.
❙Pericarditis with pleuro-pneumonia.
❙Dilatation of heart from rheumatism, with feeling as if heart was strained; velvety feeling in chest; warmth about heart; orthopnœa; cyanosis.
Oppression of heart and small unequal pulsations.
Heart's action feeble and intermittent.
Heart's impulse scarcely perceptible.
❙Cyanosis. θDilatation of heart.
Sensation of coldness in bloodvessels.
❙Pulse frequent. θSummer complaint.
❙Pulse increases from 62 to 75 beats, and remains frequent until night. θRheumatism.
Frequent and full pulse with quicker breathing.
❙Pulse frequent, but not quick. θBronchial croup.
❙Pulse frequent and strong.
❙Pulse very frequent and unequal. θCatarrh of a child.
Somewhat irritated pulse with slight sensation of chills.
❙Pulse 132, small, hard. θPneumonia.
Pulse free and hard, skin warmer.
❙Pulse hard and quick, in old people.
❙Pulse 112. θPneumonia.
❙Pulse 120 with a child. θPneumonia.
❙❙Pulse hard, full and strong; sometimes trembling; very much accelerated by every motion; when fever abates it is often slow and imperceptible.
Pulse is sometimes accelerated, sometimes retarded, in same person.
❙Pulse almost ceases or is violent, reverberating in head. θDilatation of heart.
❙❙Pulse small and contracted; t.
❙Pulse small. θInfluenza.
❙Pulse quick and small. θDiarrhœa of a child.
❙Pulse small, hard, very quick, intermitting. θPneumonia.
❙❙Pulse weak, quick and trembling. θBronchial catarrh.
❙Threadlike or trembling pulse. θCholera.
❙Small threadlike pulse. θMeningitis.
❙Pulse small, threadlike, 120, with very little increased temperature; girl, æt. 11. θAcute catarrh.
❙Pulse confused, cannot be counted or estimated. θPneumonia.
Pulse difficult to be felt, now quick, then slow; t.
Beats of pulse much retarded, with indifference.
❙No pulse could be felt on radial arteries, and on carotids only a slight vibration, a man, æt. 30. θCholera.

[30] **Outer Chest.** Crawling as of insects above l. mamma.

[31] **Neck and Back.** Does not like anything to touch him; inclination to unbutton collar of his shirt.
Cramp in muscles of neck.
Pain in back as from fatigue, especially after eating and while sitting.
‖Stiff neck. θInfluenza.
‖Neck stretched out, head bent back. θCatarrhal croup.
‖Backache with chill. θIntermittent.
‖Drawing down back, heaviness in limbs; before a leprous eruption broke out.
Burning in back.
Sharp stitches in region of kidneys, on moving arms.
‖‖Violent pain in sacro-lumbar region; slightest effort to move causes retching and cold clammy sweat. θLumbago.
‖Pain in sacrum with sensation of lameness. θPneumonia.
‖Sensation as if a heavy load was hanging on end of coccyx, dragging downward all the time. θChronic metritis.

[32] **Upper Limbs.** Tearing and stitching pains.
Pain, as from dislocation, in r. shoulder.
‖Most violent pain, like dislocation in l. arm, as if flesh were torn from bones, from axilla down to tips of fingers. θRheumatism.
‖Could not move arm unless assisted by the other. θRheumatism.
Right arm and hand are cold to touch.
‖Twitching of muscles.
On moving arms sharp stitches in region of kidneys.
Rheumatic pain in l. elbow.
‖Pain in wrists, knees and ankles.
Tremor of hands and picking of bedclothes or anything within reach.
Hands sweat and are cold.
‖‖Trembling of hands.
‖Hands cold and moist; or, hot and moist.
‖Dampness in palms of hands. θPregnancy.
Tips of fingers appear dead, dry and hard; without sensation.
Brown spots on fingers.
Fingers firmly contracted and muscles quite rigid.
‖Fingers are contracted, flexors bent inward. θLeprosy.
Itchlike eruption on wrist, which itches violently; itching disappears after scratching.

[33] **Lower Limbs.** Rheumatic pains about hips, thighs and calves.
Drawing tensive pains in lower limbs.

Digitized by Google

Tearing and drawing in lower limbs.
Violent cutting, tearing across groins and down thighs; with colic.
Fatigued in lower limbs.
Numbness and coldness in legs.
Tension in hamstrings on walking; also on instep.
Spasmodic starting of muscles of legs.
Painful cramps in legs.
Cramps in legs; with lumbago.
Trembling of knees.
‖Painful cramps in calves.
‖Dropsy of l. knee joint.
‖Pains in foot extending to other articulations.
Weariness in feet.
Feet feel as if beaten.
Feet go "to sleep" immediately after sitting down.
Numbness and coldness of feet.
‖Cold feet.
‖Veins of feet distended.
Some swelling in knuckles of r. foot and stiffness of foot.
The big toes of both feet feel cold when touched.

[34] **Limbs in General.** ‖‖Heaviness in limbs followed by a leprous eruption.
Soreness in calves of legs and shoulder blades.
‖Limbs overfatigued; a sensation coming from back. θInfluenza.
Weakness, insensibility and coldness of limbs.
Rheumatic and bruised sensation in limbs, on and shortly before rising.
Rheumatic pains with sweat, which does not relieve; pains are tearing, beating, stinging.
Right arm and hand and great toes of each foot were cold to touch.
‖Jerking up of limbs during sleep, with loose stools.
‖Tonic spasms in arms and legs, most in forearms and calves. θCholera.
‖On tips of fingers and toes small ulcers, not very deep, little discharge and not much pain, they spread and destroy one joint after another, and one phalanx after another falls off, finally hands and feet are separated in their joints; a slight livid redness around ulcers. θLeprosy of the Society Isles.

[35] **Rest. Position. Motion.** Worse resting: headache; stupor and drowsiness <.
Sitting bent forward: colic <.
Child bends backward: with cough.
After sitting down: feet go to sleep.
While sitting: pain in back; leucorrhœa <.

Digitized by Google

Sitting erect: headache >; cough >.
‖Can only breathe when sitting up. θPleurisy.
‖Has to sit up, and supported he moves continually to and fro. θAcute œdema of lungs.
‖Had to sit on a chair and lay head on table to be relieved. θAsthma.
Sitting posture in bed. See 26.
Lying down: earache <.
Lying on r. side: vomiting >.
‖Could lie on his r. side only; any change from his position was sure to induce vomiting; t.
Lying down: quick breathing.
‖Cannot lie on side affected. θPneumonia.
‖Child lies with head bent back. θPneumonia.
‖Lies on her back, somewhat to l., doubled up. θAcute catarrh.
On walking: vertigo.
Worse on walking: tension in perineum; in hamstrings.
‖Walking, sitting and lying are equally unbearable. θChronic metritis.
Constant inclination to stretch.
On rising: bruised sensation. See 34.
Stooping: headache <; pain in occiput, as though something fell forward in occiput.
Moving about: headache >.
Moving tongue: is painful.
Moving arms: stitches in region of kidneys.
Slightest effort to move: causes retching and vomiting; trembling of hands; aggravates heat.
‖Pain worse from motion. θPneumonia; stupor and drowsiness >.
Moving limbs: tonic spasms.
Every motion accelerates pulse; chilliness.
‖Carried about in upright position: children >. θCroup. θCough.
Before rising: bruised sensation.

[56] **Nerves.** Alternations of unsteadiness and syncope.
Extreme restlessness and anxiety.
‖Tossing about with great restlessness. θMeningitis.
‖Child tosses about with anxiety. θPneumonia.
‖‖Great restlessness. θBronchial catarrh.
‖Child throws its arms about all the time. θPneumonia.
Unusual volubility and activity.
‖Jactitation of muscles.
‖Trembling: of whole body; internal; of head and paralytic trembling of hands on every motion; of drunkards.
‖Chorea.
Convulsions with loss of consciousness.

Digitized by Google

‖Clonic spasms. θMeningitis.
‖Convulsions partial or general. θMeningitis.
Violent convulsions and spasms. See 8.
Convulsions from repelled or nonappearing eruptions; skin pale, cold, great difficulty in breathing.
Constant spasmodic contraction of muscles, particularly of upper limbs.
|Tonic spasm when moving limbs. θIntermittent.
|Tetanic rigidity and spasms of jaws. θTetanus.
‖Great weakness and lassitude. θIntermittent.
|Enormous weakness. θCholera. Pneumonia.
|Great loss of strength, slipping down in bed. θPneumonia. θAcute catarrh.
‖Great prostration and sluggishness of body with bad humor.
Complete prostration from frequent vomiting.
‖Prostration and collapse. θSummer complaint.
|Great apathy, alternating with restlessness in night. θInfluenza.
|Lies comatose with half-closed eyes, when spoken to he is fully conscious. θCholera.
|Very much weakened and exhausted, falls in a kind of coma and can hardly be awakened, only a new coughing attack interrupts it. θPertussis.
|Attacks of fainting, with coldness in pit of stomach.
Insensibility; he lies motionless; paralysis; t.

87 **Sleep.** |Frequent incomplete gaping. θBronchial croup.
|Drowsiness, with loose stools. θDiarrhœa of a child.
Unconquerable sleepiness.
|Yawning.
‖Great sleepiness; irresistible inclination to sleep, with nearly all affections.
Somnolency after cough.
|Sleepiness with sweat. θIntermittent.
‖Sopor, especially from imperfectly oxygenized blood.
|Sopor, with starting. θPneumonia. θHydrothorax.
|Coma with pale, puffed face. θBronchitis.
Stupor with coma.
|With muttering delirium she fell into a stupid sleep. θPneumonia.
‖Deep sopor. θMeningitis.
|Even in a sopor appears as if suffocating. θBronchial catarrh.
‖Coma. θBronchial catarrh.
|Child lies in a stupid sleep, starting sometimes. θPneumonia.
Stupor and drowsiness, evening and night, < in rest, > from motion and washing head.

Google

Had scarcely fallen asleep when he was seized with shocks and jerks, all of which came from abdomen.
During sleep jerks through body.
‖‖Sleep at night full of dreams, in morning dull head.
‖Very little sleep on account of pain. θChronic metritis.
‖Sleeplessness. θPneumonia.
‖Nightly sleeplessness on account of violent pains in head and arm. θRheumatism.
‖‖Cannot sleep till towards morning, a few hours. θRheumatic toothache.
Restless all night with anxious tossing about; in morning pressure in forehead and occiput.
Morning awakening with a dizzy head, heaviness and feeling very uncomfortable.
‖Awakens with dyspnœa.
‖‖Vomiting returns after sleep.
After sleep very great weariness, but otherwise better.
‖When awake, hopeless, despairing. θChill and fever.
In morning when awaking sweat all over and clear remembrance of heavy, anxious dreams.

[38] **Time.** ‖Most attacks at night, with vomiting of slime and food. θCatarrhal pertussis.
11 P.M.: sudden violent cough.
‖Worse night, loose stools.
‖During night much <. θCatarrhal diarrhœa.
‖‖Worse at night and sleepless. θBronchial catarrh.
At night: lips chapped; belching like rotten eggs; bitter taste, nausea and vomiting; profuse urine; cough <; profuse sweat; sleep full of dreams.
3 A.M.: oppression.
After midnight: cough <.
Morning: head dizzy and dull; toothache; mouth sore; hoarseness; expectoration; pressure in forehead and occiput.
During day: expectoration; hilarity.
Towards evening: bellyache; wild gayety.
Evening: headache; earache; voice weak; choking; drowsiness; anxious, timid; oppressed breathing; biting itching over whole body.
Morning 9 o'clock: heavy rigor with shaking. θIntermittent.
‖‖Considerable aggravation towards evening, continuing all night. θRheumatic toothache.

[39] **Temperature and Weather.** From heat: headache <.
In warm place: drowsiness.
In bed: earache; cough <.
‖Worse from lying in bed, especially on becoming warm there. θWhooping cough.

Digitized by Google

‖Warm drinks < cough. θPertussis.
Desires cool things.
Cold air: headache >.
Walking in open air: hunger.
Longs for open air.
Even when riding in open air he could scarcely keep awake.
Worse in damp, cold weather: whooping cough.
‖Worse from remaining in vaulted chambers, churches, cellars. θWhooping cough.
After washing head: headache>; stupor and drowiness>.
‖Keeping warm lessens pain. θRheumatism.
‖‖Warmth aggravates, even getting warm in bed. θRheumatic toothache.
‖After taking cold: rheumatism of joints.
‖After taking cold in Summer: diarrhœa.
‖After getting cold feet: asthma.
‖High degree of sensitiveness to every change of weather. θRheumatism.
‖‖In Spring and Fall when damp weather commences: rheumatic toothache.
‖‖Cold water lessens: rheumatic toothache.
‖After a change in temperature during Fall: coughs with children get <.

40 **Fever.** ‖Sudden fall of temperature. θMeningitis.
Slight chilly feeling.
Chill predominating.
Chill spreading from within and from vertebræ over abdomen and limbs, with retching, belching and a drawing tensive pain in lower limbs.
Great debility of limbs, feeling of fulness in chest, tearing in joints, with chilly feeling.
Chill and sensation of heaviness in limbs and some trembling, cannot get warm.
‖Chill, with external coldness, coming on at all times of day, with somnolency; mostly with trembling and shaking; frequently as if cold water was poured over one.
Rigor with shuddering and cold skin all over, remaining longest on hands, with it headache, small contracted pulse, thirst, restless, excited mood and drowsiness.
Cold skin.
‖The whole body very cold. θCholera.
Insensibility and coldness of limbs, with a weak, scarcely perceptible pulse; without vomiting (child).
‖Skin of whole body, in spite of many covers, icy cold, covered with colliquative sweat, great thirst, pulse frequent (cannot be counted), like a thread.

Digitized by Google

Violent palpitation and great anxiety. θŒdema of lungs.
Cold, pulseless, speechless and apparently insensible.
Shivering over whole body, nausea, retching and cold sweat.
Violent crawls fly through body, with vertigo; t.
Crawls over whole body, cold sweat.
Nausea, retching and inclination to vomit.
Skin chilly, with very copious sweats, which do not relieve. θInfluenza.
Chill and heat alternating during day.
Chilliness as if water was poured over him, with gooseflesh, gaping, want of thirst; drowsiness, following heat with dulness in head. θIntermittent.
Chill lasting 45 minutes followed by vomiting, headache, heat and thirst; after drinking, retching. θIntermittent.
Violent but not long-lasting heat succeeding a long chill, aggravated by every motion.
Long-lasting heat, after a short chill, with somnolency and sweat on forehead.
Temperature increased. θPneumonia. θRheumatism.
General warmth over whole body.
Heat about heart.
Skin dry and warm.
Violent fever in delirium.
Sudden flushes over face.
Heat, does not want to nurse, and is costive. θCatarrh of a child.
Feverish heat, body hot and dry. θRheumatism.
Thirst not constant during hot stage, but marked between heat and sweat.
Skin burning hot, only somewhat moist in scrobiculum and upon chest. θPneumonia.
Heat long and great, with much sweat, intense thirst and delirium. θTertian intermittent.
Hot and sweaty head.
Copious sweat.
Profuse sweat all over, also at night. θIntermittent.
Profuse night sweats.
Pains and night sweat make restless and sleepless. θRheumatism.
The sweat follows long after, in afternoon during sleep. θIntermittent.
The affected parts sweat most profusely.
Skin covered with a running, sticky sweat. θBronchial catarrh.
Worse while sweating; but rather better after sweat.
Fever, copious sweats, which do not relieve pains. θRheumatism.

Digitized by Google

‖Sweat is frequently cold and clammy.
Skin on head and limbs cold and viscous; t.
Forehead covered with sweat, hands sweat and are cold; t.
Cold sweat and retarded pulse; t.
‖Gastric rheumatic character of intermittent.
‖Bilious fever and profuse hæmoptysis.
Remitting type of fever; nausea and vomiting, drowsiness; red, itching rash over body; mostly with children.
Soporous intermittent.

41 **Attacks, Periodicity.** Wavelike increase and decrease of pain in forehead.
Paroxysms return at regular intervals, and there is comparative freedom between attacks.
At short intervals: cough.
Every morning: cough <.
Every night: suffocating attacks.
‖Attacks antepone several hours. θTertian.
Two days only: menses.
‖Every two months an attack lasting two weeks. θBronchial catarrh.
‖Every afternoon some chills followed by great heat, with thirst and sweat, heat lasted all night. θIntermittent.

42 **Locality and Direction.** Rheumatic pains first in r. hand, then through both legs from above downward, especially in knees.
Right: temple, headache; tearing in ear; burning of chin; lying on r. side, vomiting >; soreness in groin; rattling in lung <; upper side fine râles; lung inflamed; shoulder as if dislocated; arm and hand and great toe cold; half of chest immovable; swelling of knuckles of foot.
Left: parietal bone, headache; fluttering before ear; toothache; mamma, crawling; pain in elbow; pain in side of chest; stitches in chest; whole side fine râles; dropsy of knee joint.
Down into l. eye: headache.
Extending down to zygoma and upper jaw: headache.
From above downward: bellyache.
Downward: to rectum. See 20.
From chest towards throat: burning.
Extending forward: headache.

43 **Sensations.** Insensibility, sensation of numbness (not want of irritability).
As if brain was in one lump; as if brain was pressed together; as of band compressing forehead; as if something fell forward in occiput when stooping; as if abdomen was stuffed full of stones; as if bowels would be cut to pieces; as if a small leaf obstructed windpipe; as of

weight tugging at coccyx; as if flesh was torn from bones of l. arm; feet as if beaten; as if he ought to sleep, as if head was paralyzed; eyeballs as if bruised, as if lids would close; fluttering before ear as from a large bird; burning as from hot coal on r. side of chin; gums bleed as if scorbutic; taste as from rotten eggs; as if stomach had been overloaded; cough sounds as if it was moist; crawling as if insects above l. mamma; in a sopor, appears as if suffocating; as if water was poured over him.

Pain in forehead like waves increasing and decreasing.

Pain: violent, in forehead; in teeth; in stomach; at epigastrium; in abdomen; in groins; in bladder; in testicles; in back, as from fatigue; in sacro-lumbar region; in wrists, knees and ankles; in foot; in joints.

Violent pain: in forehead; in stomach; in epigastrium; in abdomen; sacral and coccygeal region; in loins; in epigastrium; in sacro-lumbar region; in head and arms.

Stitches: in l. parietal bone; from forehead into l. eye; in l. chest; in rectum; in region of kidneys; in upper limbs.

Pinching: in pit of stomach.

Lancinating: from chest to shoulder.

Shooting: in chest; in brain; in inner canthi.

Stitching pain: in upper limbs.

Cutting: in bowels; through groins and thigh to knee; in limbs.

Boring: in brain.

Tearing pain: deep in brain; in head; in eyes; in r. concha; in side of face, head and neck; in roots of teeth; in all limbs; in belly.

Beating: in stomach; through whole body; belly and pit of stomach.

Burning: in eyes and canthi; heat of face; as from hot coal on r. side of chin; in fauces; in chest, to throat; in stomach; under sternum; in abdomen; at anus; from rectum through urethra; in back.

Smarting: in eyes and canthi.

Violent burning soreness: in r. groin.

Violent cutting and laborlike tearing from above downward, across groins through thighs down to knees.

Soreness: on posterior palate; in calves and shoulder blades.

Painful drawing: in r. temple to zygoma and upper jaw.

Bearing down: in vagina.

Pressing pain: in forehead; in vertex; in stomach; in hypochondria; in hypogastrium.

Google

Heavy pain: in forehead.
Drawing: in r. temple to zygoma; in bowels; in back; in lower limbs; in belly.
Constriction: in throat; of chest.
Cramp: in stomach; in muscles of neck; in legs; in arms; in calves.
Aching: in lids; in hypogastrium.
Spasmodic contraction of abdominal muscles.
Pain as from dislocation: in r. shoulder; in l. arm.
Tingling and pinching: in pit of stomach.
Rheumatic pains: in teeth; in chest; in l. elbow; about hips, thighs and calves.
Rheumatic sensation: in limbs.
Bruised sensation: in limbs.
Tensive pain: in forehead and one side of head; stupefying over root of nose: in throat and mouth; in perineum; in lower limbs; in hamstrings.
Tension: in throat; of abdomen; in hamstrings; in instep.
Pressure: in stomach in hypochondria and liver; in hypochondrium.
Heaviness: of head; in forehead; in occiput; in limbs.
Numbness: of head; in legs; of feet; of external parts.
Throbbing: in r. forehead; in pit of stomach; in abdomen.
Twitching: muscles of face; of muscles.
Roughness: in throat.
Tickling: in pit of stomach excites cough.
Sense of inner trembling: with trembling of head.
Tired feeling: in eyes.
Fluttering: before l. ear.
Creeping: in larynx.
Heat: in mouth; in throat; in stomach; spreading from heart.
Unpleasant warmth: in region of stomach.
Coldness: in pit of stomach; in legs; of feet; in scrobiculum; in veins.
Itching: on whole body, in evening; of rash and pustules; eruption on wrist; of pudenda; in vulva; vesicles on lips.

" **Tissues.** Hemorrhages bright red.
Oligæmia; anæmia; chlorosis; t.
Varices with stitching pains.
Phlebitis.
Signs of poisoning of blood with carbonic acid.
Where gastric membrane was most inflamed there were two or three white spots, size of a split pea, appearing under glass as spots of commencing ulceration; t.
Inflammation of mucous membranes of stomach and intestinal canal.

Digitized by Google

Jejunum studded with a considerable number of pale, hypertrophied follicles; t.
Muscular relaxation.
‖Acute arthrodynia.
‖Dropsy of synovial membranes.
‖‖Collection of synovia in joint. θHydrarthrosis.
‖Pain in joints, going from one joint to another.
‖Joints somewhat swollen, reddened, hot; very painful at every attempt to move them. θRheumatism.
⁝Shifting rheumatism.
‖Acute articular rheumatism.
‖‖Mucous membranes: catarrhal inflammation; conjunctivitis; gastritis, enteritis; laryngitis, trachitis, bronchitis, extending even into air-cells; cystitis.
‖‖Pustular eruption: on conjunctiva; face; mouth and fauces; œsophagus, stomach, jejunum; genitals.
‖Emaciation. θAcute catarrh.
⁝Granular vegetations.
‖Emaciation of scrofulous children.
Dropsical effusion after checked transpiration.
Nausea with coldness followed by sweat.
Skin on face and limbs cold and pale; t.

45 **Touch. Passive Motion. Injuries.** ‖‖The child wants to be carried, cries if any one touches it; will not let you feel the pulse.
Touch: larynx painful.
‖Pains increased by every touch. θRheumatism. θPneumonia.
‖Asphyxia from drowning.

46 **Skin.** Skin pale.
‖Skin slightly icteric. θPneumonia.
‖Skin shrivelled, dry. θAcute catarrh.
Skin dry, wilted; cool.
Skin as if dead.
‖Skin dry, on chest and hands burning hot, on feet cool. θPneumonia.
‖Skin hot and dry. θBronchial croup.
Biting itching on whole body in evening.
Itching in skin.
Ecthyma on face and hands, and after a scratch on hand a large flat ulcer on side of it; > after *Rhus;* rash increased.
‖Red itching rash over body; with fever.
Rash mixed with phlyctenæ and furunculi; after vaccination.
Erythema infantum.
‖Itching pustules, which soon dry up.
Blisters filled with serum and erysipelatous tension of skin.

Digitized by Google

‖Vesicular eruption over body.

Morphæa; crusta lactea; vitiligo; prurigo; scabies; obstinate pustules; pustular impetigo; desquamation of cuticle.

‖‖Variola: backache, headache; cough and crushing weight on chest before or at beginning of eruptive stage; diarrhœa, etc.; also when eruption fails.

The breast and anterior surface of upper arms, wrists, hypogastrium and inner surface of thighs were thickly covered with an eruption of bright red, small, conical, hard pimples, having an inflamed base resembling lichen, itching intolerably. This eruption began to show itself after the fifth day of taking four grains daily, and abated about third day after its discontinuance; t.

Skin gets hot, bright red; small, isolated nodules are developed, have a red halo, between them skin somewhat swollen, soon they get larger and fill with lymph, etc., very similar to smallpox.

Vesicles over whole body, filling quickly with pus, very painful, soon drying up and forming crusts.

Pustules and vesicles first on face and forearms, next on back, fill up with pus in a few days and form crusts.

Eruption of small papulæ and vesicles which rapidly enlarge and fill with pus, and of a dark red color at base, so as to resemble mature variolous pustules, and were very painful; in a few days they were dry and crusted over. Eruption appeared first on inner side of forearm, then over whole back, where pustules were partly solitary, partly grouped.

If the use of *Ant. tart.* was continued after it had produced an eruption like smallpox, the pustules got large, full of pus, deepened in centre and became confluent; with great pain, crusts were formed, leaving deep scars.

‖Pustular eruptions all over; pustules size of peas, some covered with brown crusts.

‖‖Pustular eruption leaves bluish-red marks on face; also similar eruption on genitals, thighs etc.; painful.

‖‖Eruption fails to appear and convulsions set in; varicella, etc.

‖‖Thick eruption like pocks, often pustular, as large as a pea.

[47] **Stages of Life, Constitution.** Hydrogenoid constitutions.

Torpid, phlegmatic constitutions.

Women: suppressed lochia; chlorosis, hysteria, etc.

Woman in fifth month of pregnancy, good constitution.

θFebrile motions.

When the newborn child is pale and breathless, although the cord may still pulsate.

Google

Infancy and childhood: hydrocephalus; asthma Millari; whooping cough; capillary bronchitis, broncho-pneumonia; croup;* spasms; cyanosis; asphyxia, etc.

Teething children with rattling cough.

A sickly lean child, looking pale and bluish. θDiarrhœa.

Constitutions worn out by vomiting, in metastasis of hydrocephalus.

A girl, æt. 6 months. θCatarrhal cough.

A weakly girl, æt. 1, after fever and cough, catarrh in larynx; next day in bronchia.

Child, æt. 18 months, after febrile catarrh and spasms. θPneumonia.

A boy, æt. 2, short build, large head, blonde, subject to catarrh. θCatarrhal croup.

A boy, æt. 2 years. θBronchial inflammation.

Boy, æt. 3 years. θWhooping cough.

Boy, æt. 10. θBronchial croup.

Girl, æt. 11 years. θAcute catarrh.

Girl, æt. 18, fever, oppression on chest and prostration, three days. θInflammation of lungs.

A man, æt. 27, of a weakly constitution. θAsthma.

A man, æt. 27, weakly; œdema pulmonum. 2 grs. every hour, cured in one day.

Woman, æt. 40, weak and nervous. θPneumonia.

Man, æt. 52. θPeriodically returning asthma.

Often suitable for spasmodic whooping cough of adults.

Old age: orthopnœa; bronchitis; trembling; paralysis.

Man, æt. 30, habitual alcohol drinker, got 4 grains of *Tart. emet.* daily in his liquor; in 15 days he was poisoned.

For drunkards. θDiarrhœa.

[48] **Relations.** Similar to: *Acon.* (croup, spasm of larynx); *Arsen.* (asthma; heart symptoms; gastric catarrh, etc.); *Baryt. carb.*; *Bromine* (croup); *Camphor*; *Hepar*; *Iodium*; *Kali hydr.* (œdema pul., pneumonia); *Laches.* (dyspnœa on awaking, sensitive larynx, asthma, asphyxia, etc.); *Lycop.* (catarrh on chest; but spasmodic motion of alæ is replaced by dilated nostrils in *Ant. tart.*); *Veratr.* (both have colic, vomiting, coldness and craving for acids); *Ant. tart.* has more jerks, drowsiness and urging to urinate; *Veratr.* more cold sweat and fainting.

Similar to *Ipec.* (but has more drowsiness from defective respiration). It must supplant *Ipec.* when lungs seem to fail, patient becomes sleepy and cough ceases or becomes less frequent.

---

* Many cases were treated by the lower and soon got well, but what the reporters never mentioned, the children remain liable to returns, which is not apt to be the case after cures with the higher doses of *Hepar*, *Spongia*, *Phosphor.* or *Arsen.*

Digitized by Google

Effects of vaccination when *Thuja* fails, and *Silic.* is not indicated.

With *Phosphor.*, hydrocephaloid in worn-out constitutions; also similar in laryngitis, pneumonia, etc.

Follow with *Silic.* for dyspnœa from foreign substances in windpipe.

Pulsat. in gonorrhœal suppression.

Tereb. in symptoms from damp cellars.

Conium cures pustules on genitals caused by *Ant. tart.*

Camphor., *Ipec.*, *Pulsat.*, *Sepia*, *Sulphur* follow *Ant. tart.* well.

Ant. tart. follows well after *Baryt. carb.*, *Pulsat.*, *Camphor* and *Caustic.*

Antidotes to *Ant. tart.*: *Asaf*, *Cinhon.*, *Coccul.*, *Ipec.*, *Lauroc.*, *Opium*, *Pulsat.* and *Sepia.*

Ant. tart. antidotes: *Sepia.*

Opium in large doses is the best antidote in poisoning.

Kali sulph. increased the symptoms.

Mercur. and *Ant. tart.* always differ by *Mercur.* acting only indirectly on mouth, while *Ant. tart.* exercises a purely local action, similar to its action on skin.

In diarrhœa similar to *Veratr.*

Useful after *Bryon.* and *Caustic.* in dyspepsia.

After *Pulsat.* did not relieve. θRheumatic toothache.

The 25th part of a grain, every half hour, in all half a grain. θCholera.

First trituration, as much as lies on the point of a knife, in two tablespoonfuls of water, a teaspoonful every hour. θSummer complaint.

APHIS CHENOPODII GLAUCI.

Animals have mostly proved valuable additions to our Materia Medica. Animalized plants may be of the same importance. A remedy prepared from a caterpillar existing on belladonna plant acted when the berries and leaves of that plant appeared to be insufficient. The Doryphora decemlineata containing solanine promises much according to the proving.

Aphis may also become an important animalized plant medicine, and is given a place here to enable practitioners to try it. It was proved and introduced by Dr. Meyer, and printed in Stapf's Archives, in 1835. One cure in a very painful case of toothache was made by Dr. Raue.

We quote the words of the great entomologists, Kirby and Spence, from their famous Introduction to Entomology, Vol. I., 1815. In the chapter on the direct benefits derived from insects, they mention how far medical science is indebted to insects; and after enumerating how many, according to Lesser, had been used in olden time, and before mentioning the very few "the sons of Hippocrates and Galen now have recourse to," the following very wise words are inserted: "I "cannot help observing that their proscription of the remainder may have been too "indiscriminate. Mankind are apt to run from one extreme to the other. From "having ascribed too much efficacy to in-ect-remedies, we may now ascribe too "little. Many insects emit very powerful odors (as the acanthia suaveolens), and "some produce extraordinary effects on the human frame; and it is an idea not "altogether to be rejected *that they may concentrate into a smaller compass the prop-*"*erties and virtues of the plants upon which they feed, and thus afford medicines more* "*powerful in operation than the plants themselves.* It is at least worth while to in-"stitute a set of experiments with this view."

The Old School did not regard this advice, but the New School has done it, and has found, if not more power, more intensity of action in them.

[2] **Sensorium.** Dulness in head as from coryza, with flushes of heat in face.

[3] **Inner Head.** ||Violent pressure in forehead and occiput, aggravated by motion, with sensation as if brain was balancing to and fro.

[4] **Outer Head.** Drawing tearing in scalp; first days and second week.

[5] **Sight and Eyes.** ||Burning of eyelids; several evenings.

[6] **Hearing and Ears.** Transient tearing in ears, now in one, then in other.

[7] **Smell and Nose.** Sensation of soreness of nostrils; continues second week.

||Violent sneezing, with soreness of larynx.

||Coryza, with burning and ||biting on margins of nostrils, particularly of septum.

Digitized by Google

Fluent coryza, with secretion of thin mucus and burning of nostrils; with accelerated pulse; coldness of feet up to knees, and a chill over back.

All day running coryza, burning pimples on r. nostril and l. upper lip.

In evening, running coryza with pulse of 85 beats.

Fluent coryza; continues second week.

[8] **Upper Face.** Pale or yellowish color of face; all day.

Flushes of heat in face, with dulness of head, like beginning of a coryza (evening).

Great inclination to sweat in face; from early in morning.

[9] **Lower Face.** ‖Dryness of lips, ‖especially in morning.

Dry lips and warmer breath; his pulse ran up to 68.

Burning pimples on l. upper lip.

[10] **Teeth and Gums.** Towards noon tearing drawing pain in a decayed molar, gradually increasing and extending into other teeth r. side, into ear, temples and malar bone; increasing in bed, > after several hours by a general warm sweat; during the second week of proving.

‖Increase of most violent toothache in bed, only relieved if after awhile a general warm sweat breaks out; all other remedies of no avail.

[11] **Taste and Tongue.** Painful vesicle on tip of tongue; second week.

[12] **Inner Mouth.** More saliva in mouth and more phlegm in throat; second week.

Dryness of mouth and throat, sometimes with increased secretion of mucus.

All day much mucus in mouth and throat, tasting unpleasantly flat, with continual disposition to hawk or spit.

Secretion of frothy mucus from mouth and throat.

[13] **Throat.** Scratching on palate.

A cutting burning sensation in throat, most in palate, when inhaling.

Scraping and burning in throat.

Disposed to hawk up phlegm.

The palate is inflamed.

Biting burning in soft palate during afternoon.

Dryness, scraping and burning like from something acrid in throat, and increased phlegm; second week.

[14] **Appetite, Thirst. Desires, Aversions.** No appetite for meat and wheaten bread, with chilliness.

Increased thirst, from sensation of dryness in throat.

Much thirst in evening; second week.

[16] **Hiccough, Belching, Nausea and Vomiting.** Frequent belching with taste of food.

[19] **Abdomen.** Frequent cutting pain in abdomen, especially at night or during day, with urging to stool, emission of large quantities of flatus.

Digitized by Google

Frequent rumbling of flatus in bowels and passing of wind.

Congestion of blood to all organs in pelvis.

¦ The plant is a popular medicine in colic.

[20] **Stool and Rectum.** ||Ineffectual urging to stool, with pressure on bladder and rectum.

Evacuations liquid, papescent, with burning in anus and renewed urging, or with pinching in abdomen before and after stool.

In morning soon after rising, urging to stool, followed by a few, ||thin, mushlike evacuations, repeated several times during day, with increased pinching, ||burning in anus and urging.

||Thin, fluid stools early in morning, several days in succession, mostly thin slime, ||mixed with spots of dark blood, repeated five or six times during forenoon, with pinching and urging in rectum.

Every hour a stool, with pinching in entrails, painful pressure on rectum, bladder and urethra.

After stools are more consistent, there is then a painful urging in rectum.

Stools towards morning, with pinching and urging in rectum, after sleepless nights.

[21] **Urinary Organs.** ||Pressure on bladder, with ineffectual desire to stool.

Irritation in urethra, as from acridity, compelling him to urinate frequently; urine saturated, yellow, foaming.

During micturition, ||burning in mouth of urethra.

Frequent and copious emission of saturated, yellow, foaming urine, without burning in urethra; another day with an acrid sensation in urethra.

||Urine brownish red, depositing a thick, yellowish sediment, foaming during night.

Passing urine burns in urethra during chill and coryza.

[22] **Male Sexual Organs.** At night voluptuous dreams and two seminal emissions, which had not occurred for a long time.

Voluptuous irritation on glans penis.

[23] **Voice and Larynx. Trachea and Bronchia.** Frequent roughness and huskiness of voice; > by hawking.

Burning scraping in larynx, as from acridity; titillating burning or stinging, particularly in open air during wet and cold weather, with constant irritation in larynx, obliging him to cough or to hawk, and constant expectoration of mucus.

Painful sensitiveness on r. side of larynx.

Tickling burning in larynx.

Irritation from very acrid mucus in larynx, or like a

Digitized by Google

burning acridity, sometimes forcing him to cough, oftener to hawk.

Soreness of larynx, with violent sneezing.

[26] **Respiration.** Warmer breath with mucus in mouth.

[27] **Cough.** Now and then irritation to cough in region of larynx.

Dry cough from irritation in throat.

[29] **Heart, Pulse and Circulation.** Pulse 80, continuing all day; with thirst; dry mouth and throat, and frequent hawking; limbs as if beaten.

Pulse accelerated, with burning in palms of hands in forenoon and dry lips during day; in evening pulse 85.

[31] **Neck and Back.** Pain below l. shoulder blade.

Frequent chilliness running up and down back.

[32] **Upper Limbs.** Rheumatic pains in shoulders and upper arms; arms as if bruised.

[33] **Lower Limbs.** Rheumatic pains on tibia and soles of feet.

Sensation of weariness in legs, most in knees.

Tearing drawing above knee, often mornings or during day.

Cold feet up to knees.

Stinging burning pain in corns or little toes, alternately, r. and left.

[34] **Limbs in General.** All the limbs feel bruised.

Frequent drawing rending pains from above knees down to feet, < on shin bones and tops of feet.

[35] **Rest. Position. Motion.** Motion: pressure in forehead <.

[36] **Nerves.** Tired feeling.

[37] **Sleep.** Sleepless night, without much pain, but towards morning twice a thin stool, with pinching and urging in rectum.

[38] **Time.** From 4 to 6 P.M.: more irritation to cough in larynx.

Afternoon: biting and burning in soft palate.

Evening: burning of eyelids; fluent coryza; flushes of face; thirst; pulse accelerated; tired and weak.

Morning: dry lips, more warmth in mouth and breath warmer, pulse accelerated; face inclined to sweat; after rising, urging to stool, thin mushlike passages with wind; tearing above knee; transpiration all over skin.

Forenoon: burning of palms of hands.

Towards noon: toothache.

All day: much mucus in mouth and throat; dry lips; pale yellowish color of face; cutting in abdomen and urging to stool; pulse increased to 80; tearing above knee.

Night: cutting in abdomen, urging to stool; seminal emissions; sleepless; urging, pinching and stool towards morning.

Digitized by Google

[39] **Temperature and Weather.** In bed: increase of toothache.
In open air, when weather is damp and cold: constant irritation in larynx, hawking and expectoration of mucus.

[40] **Fever.** Chills, especially over back.
Burning in palms of hands, with inclination to sweat, in forenoon.
Feet and legs cold up to knees, shudders run down back, fluent coryza continuing.
In morning transpiration all over skin; later in morning before getting up, a warm sweat.
Sweat relieves toothache.

[41] **Attacks, Periodicity.** Every evening: very tired and weak.
Several times a day: thin evacuations.
Several days in succession: thin stools.

[42] **Locality and Direction.** Right: pimples on nostril; side of larynx painful.
Left: burning pimples on upper lip; pain below scapula.
Right or l.: transient tearing in ears.

[43] **Sensations.** As if brain was balancing to and fro; as if limbs were beaten; arms as if bruised.
Pain: below left shoulder blade.
Drawing rending: in temples, ears, decayed teeth, shoulders, upper arms, soles of feet, above knees, on tibia.
Drawing tearing: in scalp; in a decayed molar; above knee; in limbs.
Tearing: in ears.
Pinching: in abdomen; in anus; in rectum; in entrails.
Cutting: in abdomen.
Cutting burning: in throat and palate.
Burning: of eyelids; pimples on r. nostril and l. upper lip; in anus; in urethra; in larynx; in palms of hands.
Burning and biting: on margins of nostrils and of septum.
Stinging burning: in corns or little toes.
Scraping and burning: in throat; in larynx.
Biting burning: in soft palate.
Acrid sensation: in urethra.
Titillating burning or stinging: in larynx.
Scratching: on palate.
Soreness: of nostrils; of larynx.
Pressure: in forehead and occiput; on rectum and bladder.
Dulness in head.
Rheumatic pains: in shoulders and upper arms; in tibia and soles of feet.
Weariness: in legs, most in knees.

Digitized by Google

Dryness: of lips; of mouth; in throat.
Heat: in face.
Coldness: of feet to knees; running up and down back.

[48] **Relations.** Relatives: the Polygonaceæ, *Rumex* and *Rheum.* Similar to: *Pulsat.*, *Chamom.*, *Mercur.*, *Antim.*, etc. (toothache < in bed; no other remedy has relief of toothache from sweat, though *Chamom.* has general relief from sweat); *Æthusa* (stool after rising, pinching, cutting before, urging after); *Natr. sul.* (stool after rising, with discharge of wind, etc.); *Nux vom.* (frequent urging in rectum and bladder); *Apis*, *Argent. nitr.*, *Dulcam.*, *Phosph.*, etc., (in laryngeal affections); *Gelsem.* (chills up and down back, cold feet, etc).

APIS.

Poison of the Honey Bee. *Apium Virus.*

Among all our drugs this is the one of which we have the most different preparations. There is but one right kind. It is the pure poison, which is obtained by grasping the bee with a small forceps, and catching the minute drop of virus suspended from the point of the sting, in a vial or watch crystal. After collecting a sufficient quantity it may be potentized in alcohol, distilled water, or prepared in oil or pure glycerine, for external use.

It is absurd to dispute the solubility of the poison in alcohol, and foolish to take the whole bee with all the foreign matter and impurities, which color the tincture.

In 1835 a clergyman in Thuringia, the Rev. Brauns, the publisher of the first popular homœopathic paper, mentioned cures he had made with the pure poison of the honey bee, which he called Apisin. The same year he commenced a work, an attempt at treating homœopathically domestic animals: Part I, horses, 1835; Part II, cattle, 1836; and Part III, sheep, 1843. A second edition of Part I was printed in 1837. He reported numerous cures with Apis, particularly of most obstinate diseases of horses.

The great problem to be solved with regard to the snake poison (and of course also the nosodes) was: can we use the symptoms from inoculation, as well as the symptoms obtained by proving the alcoholic tinctures. It was thought that the proving of the bee-poison would solve the problem.

In 1850 dried and powdered bees were introduced by E. E. Marcy, in his Theory and Practice. In January, 1852, we received a pamphlet containing real provings, by the New York Central Hom. Society, reprinted in the N. A. Quarterly, same year, p. 184–203, and Aug. 10, 1852.

This was translated into German, and numerous provings with the pure poison added; also all notices of *effects of the sting* that could be found, these being con-

Digitized by Google

sidered most important. The whole was printed in the form of a monography, in the Amerikanische Arzneiprüfungen (American Provings), Vol. I, p. 171–422, and forms the most complete collection of the effects of any animal poison in medical literature.

In 1858, Dr. C. W. Wolf published a book on bee-poison, declaring it a polychrest, but he also used the tincture from the whole bee. It happened at the time to correspond to the genius epidemicus in Berlin, but Wolf recommended it in all intermittent fevers. His little book was translated in the same year and printed in New York; the author, however, was not allowed to add his notes, or he would have given the first provers in this country credit for what they had done.

The greater number of confirmed symptoms were observed from the pure virus.

[1] **Mind.** Loss of consciousness.

Lost all consciousness of things around him, and sank into a state of insensibility.

‖Loss of consciousness in eruptive disease.

‖Loss of consciousness and delirium. θMeningitis infantum. θScarlatina.

‖Unconsciousness, stupor, with muttering delirium. θTyphus.

‖Pains in head, through eyes, above and around eyes.
▮Dull, heavy headache; slight erysipelatous inflammation about l. orbit and down l. side of nose.
▮Frontal headache. θTonsillitis.
▮Pressing, sometimes stinging pain in forehead. θTyphus.
▮Sense of weight and fulness in forepart of head.
Dull aching in forehead.
Violent pressive pain in forehead and temples.
▮Violent headache, stitching in temples, throbbing in forehead. θTyphus.
‖Sharp shooting pain in temples.
▮Violent pain in temples. θTonsillitis.
▮Severe attack of neuralgia in and about l. temple, with pain as if a bee had stung her, with frequent vomiting. θDuring pregnancy.
Violent drawing from back of neck, extending behind l. ear, spreading over l. half of head.
▮Headache mostly on r. side. θOvarian tumor.
Heaviness and fulness in vertex.
Pressure, fulness and heaviness in occiput.
▮Great pain in occiput. θCerebro-spinal meningitis.
▮Burning and throbbing in head, < by motion and stooping, temporarily > by pressing head firmly with hands; occasional sweat.
‖Heaviness, aching and pressure in head, especially on

rising from sitting or lying posture, increased in warm room, relieved by compression with hands.

Headaches are > by exercise out of doors; by looking up and bending head backward; pressing head between hands; < when reading, in a warm room, from motion, stooping.

‖Dull pain over whole head is relieved by pressure.

‖Forehead aches from exertion of coughing (oil). θCatarrh.

Dull pain in occiput < from shaking head.

‖‖Child lies in torpor; delirium, sudden shrilling cries, squinting, grinding teeth, boring head in pillow; one side twitching, the other paralyzed; head wet from sweating; urine scanty, milky; big toe turns up; nausea while lying; breath offensive; tongue sore. θAcute hydrocephalus. θAfter erysipelatous eruptions.

‖‖Pain in occiput, with occasional sharp shrieks. θHydrocephalus.

‖Violent headache and rush of blood to head with delirium. θAmenorrhœa.

‖‖Headache with vertigo.

Particularly disagreeable pain in forehead, with dulness and confusion.

‖Chronic headache, violent pain in forehead and temples, at times involving eyes, attended by vertigo, nausea and vomiting, must hold head and eyes down.

‖Nervous headaches with indigestion.

Chronic sick headache.

‖Severe attacks of neuralgia in and about l. temple, with pain as if a bee had stung her; with frequent vomiting. θDuring pregnancy.

‖‖Pain over l. eye, over whole l. side of head, with nausea and vomiting. θHemicrania.

Her whole brain feels as if tired, gone to sleep and crawling; she feels it at the same time in both arms, especially in l., and from l. knee down to foot.

‖Threatening cerebral symptoms after scarlatina; if it was fairly out and recedes. θArachnitis. θMeningitis.

‖Cerebro-spinal meningitis in earlier stages.

‖Meningitis; after fully developed effusion.

‖‖Chronic meningitis with considerable cephalic disturbance and spmptoms indicating threatening if not actual effusion of serum into cavity of arachnoid.

‖Apoplexia sanguinea and serosa.

‖Apoplexy in old persons.

‖Hydrocephalus; child screams out very sharply in its sleep.

‖Hydrocephaloid symptoms. θScarlatina.

❙❙Hydrocephalus of children; meningitis infantum.
❙Hydrocephalus occurring suddenly after erysipelatous eruptions; prostration; unconscious; one side lame or jerking; big toe turning up; squinting; nausea while lying; breath offensive; tongue sore.
❙❙Hydrocephalus acutus; before stage of exudation.
Hydrocephalic condition following summer complaint of children.
❙❙Hydrocephaloid; stupor; eyes red, head hot, shrill shrieks; tongue dry, skin dry, hands cold and blue; urine suppressed; abdomen tender; diarrhœa mucous, offensive, involuntary, containing flakes of pus.
❙Inflammation of brain; they run head furiously against wall (horses).
❙Horses kick, and show inclination to run off.

[4] **Outer Head.** Hydrocephalic enlargement of head.
❙Large head and large prominent eyes. θIncipient hydrocephalus.
❙Fontanelles reopen at from six to ten months, with great restlessness and putting hand to head.
❙❙Bores head into pillow. θIncipient hydrocephalus. θEclampsia. θMeningitis infantum.
❙Bending back and rolling of head. θHydrocephalus.
❙Inability to hold head erect. θMeningitis infantum.
❙Scalp very sensitive. θErysipelas traumatica.
❙❙Drawing and tension in scalp.
❙❙Acute burning shooting in scalp.
❙Burning in back of head and neck, once or twice a week with nausea.
❙Head and whole surface of body hot and dry. θTyphus.
❙Copious sweat of head, of musklike odor. θHydrocephalus.
❙❙Itching prickling in scalp.
❙Itching on scalp (oil). θCatarrh.
❙Whitish violently itching swelling on head, sometimes on neck. θParalysis.
Sensation as if head was too large.
❙❙Head feels swollen; integuments feel swollen and stiff.
❙❙Puffiness of scalp, forehead, and around eyes.
❙Innumerable spots on his head. θParalysis.
❙Erysipelas of scalp spreading to face; sphacelous spots.
❙Erysipelas in head followed by staphyloma.
❙❙Hair falls out; ❙bald places.
Hair had to be cut short as pediculi increased too much (oil). θSpinal disease.

[5] **Sight and Eyes.** ❙Photophobia. θOphthalmia. θKeratitis. θOphthalmia arthritica. θCatarrh of chest.
Sensitiveness to light, with headache and redness of eyes.

‖Light gives pain during headache.
‖Shunning light, constant winking. θOphthalmia.
‖Keeps his eyes closed, light intolerable. θOphthalmia.
Severe pain in eyeballs, increased by exposure to light.
‖Could see better at night than in daytime (oil). θPannus.
Objects appear too large.
‖Diplopia. θAfter meningitis.
‖Whirling before eyes.
‖Indistinct vision. θOphthalmia.
‖Vision very indistinct, as if a skin was drawn over eye.
‖Obscuration of sight. θCerebro-spinal meningitis.
‖She could only observe light coming in at window when she turned herself towards it. θOphthalmia.
‖Did not see finger thrust towards eye. θHydrocephalus.
‖Whitish grey mist before eyes. θStaphyloma.
‖Blindness from obscuration of cornea.
Cataract.
‖Eyes much inflamed; after maltreatment stone blind.
‖Dilated pupils. θMeningitis infantum.
‖Pupil in l. eye somewhat drawn towards outer side.
‖Pupil not discoverable through opaque cornea. θOphthalmia.
‖Pupil cannot be distinctly seen, but appears to be drawn laterally into an oblong shape.
Weakness of eyes, with dread of straining sight.
Weakness of sight, with feeling of fulness in eyes.
‖Eyes weak, not inclined to exert them; they tire easily; sensitive to light.
Eyes painful, feel sore or irritated when using them.
‖After reading for an hour or two by lamplight, eyes became irritated with a pricking feeling; they filled with water; conjunctival vessels slightly injected, and sight correspondingly indistinct.
Worse when looking fixedly at any object.
‖‖Asthenopic troubles, especially affections from using eyes at night, causing redness of eyes, with lachrymation and stinging pains.
Worse when looking at something white.
‖Heaviness of eyes, fulness and pressure.
Feeling of heaviness in eyelids and eyes.
Aching, sore pressing, tensive, shooting, boring, stinging, burning pains in and around eyes and in forehead.
‖In eyes from time to time, stitches and pressing (oil). θPannus.
Aching pressure in l. eyeball, mostly in lower part, for several hours; repeated twice.
Eyes feel as if they had sand in them.
‖Pain in eyeballs and across forehead; < r. side. θDiarrhœa.

Digitized by Google

Acute pain in eyeballs.
Rheumatic affections of eye.
Violent stitches in eye and around it; < at night. θArthritic ophthalmia.
Dreadful darting pain through eyes. θOphthalmia.
Severe darting, lancinating pain in eyes.
Burning, stinging, shooting pains. θKeratitis.
Violent shooting pains through eyeball; tearing, shooting.
Violent shooting over r. eye, extending down to eyeball.
Piercing in eyes; was obliged to remove spectacles while reading and writing (nearsighted woman).
Burning and stinging in eyes. θBlepharitis.
Smarting and burning sensation in eyeballs and lids. θOphthalmia.
Pains throbbing and burning.
Smarting and sensation of burning in eyes, with bright redness of conjunctiva; very sensitive to light.
Pains aggravated by moving eyes.
Squinting of one or both eyes. θHydrocephalus. θMeningitis infantum. θScarlatina.
Trembling of eyeball, < at night.
Twitching of l. eyeball, or of both.
Quivering and twitching of l. eyeball < at night.
Twitching and jerking of eyelids. θScrofulous ophthalmia.
Rolling of eyeballs, in sleep without waking. θHydrocephalus.
Conjunctiva reddened, full of dark bloodvessels, which gradually lose themselves in cornea. θOphthalmia.
Puffy chemosed congested condition of conjunctiva and bright red appearance. θKeratitis. θOphthalmia scrofulosa.
Keratitis and blepharitis, with tumefaction of lids.
Scrofulous keratitis (parenchymatous), with dim vascular cornea, hot lachrymation, contracted pupils, etc.
Pustular keratitis, with dark red chemosed conjunctiva and swollen lids.
Keratitis, with dreadful pains shooting through eye, with swollen lids and conjunctiva; with hot lachrymation gushing out on opening eyes; with photophobia.
Cornea thick, having dark, smoky spots; greyish, smoky, opaque. θKeratitis.
Leukoma.
Each cornea full of nebulous spots. θScrofulous ophthalmia.
Entire cornea scattered over with dark, smoky clouds; thickened and covered with a film. θOphthalmia.

Digitized by Google

‖Smoky opacity of cornea. θCerebro-spinal meningitis.
‖Pupil could not be seen through smoky discolored cornea. θOphthalmia.
‖Opacity of upper half of cornea; opaque and white.
‖The disease went from left to right. θOphthalmia.
‖Opacity of almost whole cornea; only inferiorly and towards r. about a sixth part is free.
‖Ugly looking conical tumor, occupying place of former pupil, preventing use of a glass eye.
‖Staphylomatous projection in r. eye, with inflammation of both eyes.
‖‖Staphyloma corneæ.
‖On edge of r. cornea, ulcer size of a lentil, with dirty fundus. θScrofulous ophthalmia.
‖Ulceration of cornea, vascular, with photophobia, lachrymation and burning pain; lids everted and often ulcerated on margins.
‖Ulcers and maculæ on cornea. θOphthalmia.
‖Cicatrices of cornea.
‖Eyes brilliant. θThrombosis.
‖Iritis.
‖Pressing pain in lower part of eyeball. θHydrops retinæ.
Stinging in ball and pain across forehead; aching pressing in lower part of l. ball; fulness inside ball, with flushed head and face.
Stinging, itching in l. eye; in lids and around eye.
Smarting and sensation of burning in eyes, with bright redness of conjunctiva; very sensitive to light.
‖‖Cutting, burning, with redness of eyes.
‖Congestion to eyes: bloodvessels injected.
Eyes red and itching.
‖Sclerotic vessels injected; from inner corner many vessels and loose fibres running towards cornea, as if a pterygium would be formed. θScrofulous ophthalmia.
‖The whole conjunctiva of sclerotica, as well as cornea, thickened, full of new bloodvessels; cannot perceive slightest light; could not point where windows were; pupils could not be detected (oil). θPannus.
‖Sudden and violent inflammation of r. eye. θOphthalmia.
‖Greatly inflamed eyes. ‖Measles.
‖Inflamed eyes, with eruptive diseases.
‖Left eye inflamed; pustule on cornea, and general diffuse inflammation over whole eye; lid swollen and red.
Inflammation; photophobia, but cannot bear eyes covered.
‖Often remedy for acute catarrhal conjunctivitis, in which there are bright redness and chemosis of conjunctiva, with stinging pains.
Inflammation of eyes, intense photophobia, increased secretions.

Digitized by Google

Ophthalmia, rheumatic, arthritic, catarrhal, strumous, erysipelatous, or œdematous, no matter what part of eye may be the seat of the disease.
Inflammations, with severe shooting pains, heat of head, red face, cold feet, etc.
First stage of catarrhal ophthalmia, especially in scrofulous children.
It is especially applicable to inflammations, with burning biting pains; inflammations following eruptive diseases.
Violent cases of Egyptian ophthalmia and ophthalmia neonatorum, with great swelling of lids and adjacent cellular tissue.
Ophthalmia; photophobia, but can bear no covering on account of soreness.
Left eye swollen, wholly shut, and mouth so swollen that he can scarcely open lips.
Erysipelatous inflammations of lids, with adjacent smooth swelling of face, especially with chemosed conjunctiva, etc.
Œdema of eyeball.
Puffy, chemosed congested condition of conjunctiva. θKeratitis.
Chemosis of conjunctiva, with light discharge.
Hypopion.
Copious mucous secretion and lachrymation. θPannus.
Flow of tears, with headache.
Profuse lachrymation. θOphthalmia.
Flow of tears, with sensitiveness to light. θCatarrh of chest.
Eyes water and are painful when she looks at anything light.
Flow of tears, with redness and burning of eyes.
Hot tears gushed from eyes. θOphthalmia.
Scalding tears; profuse lachrymation, with burning, great sensitiveness to light. θOphthalmia.
Burning stinging in r. eye, beginning with a dull heaviness, and causing flow of water.
Lachrymation, with burning in eyes and with photophobia; with pains in eyes on sewing evenings, with pain on looking at bright objects; with severe burning and sensation of a foreign body in eyes.
Slight inflammation of lachrymal sac.
Fistula lachrymalis.
Eyes wide open. θHydrocephalus.
Eyelids half open, pupils turned up. θIncipient hydrocephalus.
Everted lids. θOphthalmia scrofulosa.

Digitized by Google

Heaviness of lids.
Right eye closed with paralysis of r. side.
Headache on r. side, extending into eye, must keep it closed. θHemicrania.
Shooting, itching in eyes and lids.
Redness and smarting of lids.
Blepharitis.
Inflammation of eyes and eyelids, with pressing, itching, burning pains, with redness of lids.
Conjunctiva of lids, thickened and ragged (oil). θPannus.
Erysipelatous inflammation of lids.
Chronic blepharitis, with thickening of conjunctival layer, so that the lower lid is everted. θChronic catarrh.
Various forms of blepharitis, with thickening or swelling, such as incipient phlegmon, with great puffiness and stinging pains.
Pseudo-ophthalmia of old people. Witches' sore eyes.
Lids dark red, everted and swollen, with inflamed conjunctiva. θBlepharitis.
Lids dark bluish-red, and so swollen as to close the eye, following severe pains; the swelling extends around eyes and down over cheek; conjunctiva becomes congested, puffy, chemosed, full of dark red vessels.
Swelling of upper lids. θSequel to scarlatina.
Eyelids swollen, inflamed. θOphthalmia scrofulosa.
Swelling of eyelids in eruptive stage. θVariola.
Both eyes closed with a purplish-white swelling, marked by intense pain in r. eye.
Lids and skin over orbits swollen, with redness, heat and great sensitiveness of outer surface; cold water applied gives relief.
Inflammation of lids; lids much swollen, red and blue, cannot open them; lachrymation, much pain, restlessness at night; cold water gives great relief.
Lower lids very much swollen, edges red, full of little knots, as if several styes would form, but had been checked. θScrofulous ophthalmia.
Lids œdematous; baglike swelling under eyes; lids feel stiff.
Upper lids hang like little sacs on face.
Lids much swollen, red and œdematous; often everted; upper lid hangs like a sac over eye. θErysipelas of lids.
Lids swollen; lower lids forming little sacs; edges red and puffy (oil). θPannus.
Soreness of canthi.
Smarting on margin of lids and in canthi.
Excoriation of canthi and edges of lids.
Stinging itching in inner angle of l. eye.

Digitized by Google

Stinging itching in internal canthi, or smarting of edges of lids.

Itching in and around eyes, on lids, and in canthi; with soreness.

Redness of eyelids.

Both lids of l. eye inflamed, red and thickened; lining membrane same, eye suffused with tears; conjunctiva pale red; photophobia, margin of lids sore and scabby, some pimples on upper part of cheek.

Burning in margin of lids, causing lachrymation.

Soreness of lids and canthi, with agglutination.

Secretion of mucus during night agglutinating lids, causing much pain when attempting to open them. θOphthalmia.

Sticking together of lids. θOphthalmia.

Granulations on edges of lids. θBlepharitis.

Hordeola, or styes. See 43.

Ulceration of margin of lids and canthi, with stinging pains.

Lupus of lower lid, which had gone on to ulceration.

Syndesmitis.

Lashes pressed inward by excessive swelling. θOphthalmia.

Ciliæ very long, sticking together in little bundles. θScrofulous ophthalmia.

Falling out of eyelashes. θBlepharitis.

Eyelids swollen, dark red, everted, destitute of lashes, granulations along their borders. θOphthalmia.

Pain over and in l. eye, and over whole l. side of head, with nausea and vomiting. θHemicrania.

Violent shooting pains over r. eye, extending down to ball.

Burning, stinging and sensation of swelling around l. eye and in superciliary ridge.

Shooting, itching, round about eye.

Swelling and redness about eyes. θOphthalmia.

Watery, erysipelatous swelling around eyes.

Puffy swellings of lids and eyes, with a feeling of burning and tightness of skin.

Puffiness around eyes. θDiphtheria.

Piercing itching around eyes, in brows, lids, and eyes themselves, more in l., especially in inner canthi, with a desire to rub eyes, while pressing them hard; with this, soreness and smarting on margins of lids, in canthi, and in eye itself; quivering of eyeball, and a feeling in eyes all day as if there was mucus in them, especially in l.

Swelling under eyes, just as after a bee-sting. θErysipelas.

Digitized by Google

‖‖Baglike swelling under eyes. θErysipelas. θUterine diseases.

6 **Hearing and Ears.** ‖Sensitiveness to noise.
Noise frightens from sleep.
‖Hardness of hearing. θTyphus.
Deafness.
Violent pain in l. ear when chewing.
‖Shooting, burning of ears. θErysipelas.
‖Otitis after scarlatina; desquamation had completely ceased; traces of albumen in urine.
‖‖Redness and swelling of both ears. θErysipelas.
‖Tension about ears.
‖Raises hand to back of ears with each scream. θIncipient hydrocephalus.

7 **Smell and Nose.** ‖Copious nosebleeding towards morning. θTyphus.
‖Creeping, then pressure in sinciput and vertigo.
Acrid discharge from nostrils.
‖Fluent corya. θAlbuminuria.
‖Thick, white, fetid mucous discharge, mixed with blood. θScarlatina.
Coryza, dry in morning, fluent in evening.
‖Coryza, with feeling of swelling in nose; dryness, burning of lips.
Sudden coryza, 4 P.M., with dryness of nose, then burning of lips and sensation as if they would chap.
‖Chronic nasal catarrh.
‖Chronic coryza with increased discharge and crusty nostrils. θScrofulous ophthalmia.
‖Dry nose. θScarlatina.
‖A fleshy mass more than an inch in length and half an inch in breadth, a real nasal polypus, was discharged from nostril and a week after another smaller one.
Tip of nose cold, with chilliness in evening.
Redness and burning in nostrils.
‖Itching, soreness, redness and swelling of nose.
‖‖Nose swollen, red and œdematous. θErysipelas.
Burning itching and stinging eruption upon nose.

8 **Upper Face.** ‖Peculiar, happy, pleasant expression. θTyphus.
‖Expression of terror; or, of apathy. θTyphus.
‖Expression of face pitiful. θTyphus.
‖Anxious expression. θAscites. θOvarian dropsy.
Appears as if in an apoplectic fit; features distorted, face dark and much swollen.
‖Pale face. θIncipient hydrocephalus. θSopor. θAcute Bright's disease.
‖Countenance pale, sunken, sickly. θAscites.

Digitized by Google

Face pale or yellowish. θAscites. θAlbuminuria.
Face pale, waxen. θŒdema.
Paleness of face and very suspicious puffiness of eyelids with swelling of face, limbs and abdomen, external swelling œdematous, with water in abdomen. θPost scarlatinal complaints.
Sallow countenance. θBilious diarrhœa.
Face and lips livid. θDropsy after scarlatina.
Livid, bluish-red colored face.
Countenance red, with increasing livid hue. θBronchitis.
Flushed face and head. θHydrops retinæ.
Pale redness of face. θErysipelas.
Redness and puffiness of l. cheek. θHemicrania.
Peculiar burning, leaving a livid, bluish-red color of face.
Face swollen, red and hot, with burning and piercing, more r. side.
Burning stinging heat in face which is purple.
Burning cheeks, with cold feet.
Face glowing, hot and red. θThrombosis.
Desire for washing face with cold water.
Stinging pain, pricking in face; puffiness below eyes. θErysipelas.
Burning, shooting, with fulness, heat and redness in face.
Stinging pain in l. malar bone.
Prosopalgia with or followed by impaired memory.
Œdematous swelling of face. θAlbuminuria. θMeningitis. θDiphtheria.
Œdema of face; eyelids puffed; sometimes feel stiff.
Œdema of face and hands. θAfter scarlatina.
Lying on his back with puffed face, slightly flushed face and ears; breathing with some difficulty. See 26.
Face puffy with a feeling of stiffness.
Puffiness of forehead of eyes. θAlbuminuria during pregnancy.
Face puffed and dark red. θTyphus.
Face full and puffed, most about eyes, had an anxious expression. θDropsy after scarlatina.
Whole face swollen, dark red; tensive pain; delirium in sleep. θErysipelas.
Face swollen; skin waxy pale, translucent. θCholerine. θDropsy.
Hard purplish spots on face, forehead, neck and lower limbs; remaining hard and painful ten or twelve days.
Some red, inflamed, sore patches of inflammation on forehead like erysipelas; with general cold, shivering, headache, etc.
Eyelids and bridge of nose puffy.

Digitized by Google

Itching smarting blotches of urticaria coming and going upon face.
‖‖Hives with burning, stinging and itching; particularly in Fall.
‖‖Erysipelas of face.
‖Erysipelas of one side of face and nose, with swelling under eye resembling that from a bee-sting.
‖Erysipelas of face, most the pale, livid kind, only on half of face, of chin, lower jaw and cervical region.
‖Phlegmonous erysipelas, r. cheek, creeping across nose and attacking l. cheek.
‖‖Erysipelas: usually begins at one eye, goes r. to l.; face intensely hot and red, or only pink; puffy, shining; rarely pale, livid; either severe soreness to touch, or burning, stinging pains; dry, coated tongue, thirst; fulness of head; delirium in sleep, with nervous, fidgety restlessness.
‖Phlegmonous, facial erysipelas.
‖‖Erysipelas faciei; pinkish, sometimes livid; sphacelous spots; comes periodically; r. side mostly; delirious in sleep.
‖Chronic erysipelas, recurring periodically.
‖Face and limbs cold. θDropsy after scarlatina.
‖Phagedenic ulcerative eruption on face, spreading over l. half of face and head; when it has healed white scars remain; eruption spreads only by one edge; the skin in front of it becomes red, swelled and painful, then small pustules appear, which spread rapidly and ulcerate into one another, the pus in meantime accumulating and forming a thick yellowish brown scab; had gonorrhœa twelve years ago.
‖‖Formication and prickling in face.
Running as of an insect over cheek.
Desquamation of skin on face.

Lower Face. ‖‖Spasmodic snapping of lower jaw.
‖‖Raging, violent pains in lips, extending to gums and head, finally to whole body.
‖Neuralgia of lips.
Lips livid and cold.
‖Lips dry, covered with a brown crust. θTyphus.
Lips dry, with a black streak in red portion.
Burning in lips.
‖Lips œdematous; upper lip and nose swollen, hot and red.
‖‖Lips swollen; stiff and slightly tender; everted, hanging.
‖‖Prickling in lips; they feel as if they had received a contusion.
Roughness and tension in lips, especially upper.
‖Lower lip chapped. θGastric catarrh.

‖Sudden involuntary biting teeth together.

‖Grinding or gritting teeth. θHydrocephalus. θMeningitis infantum.

Jumping pain in l. upper molars.

Jerks and throbbing in molars.

‖‖Jerking, twitching in l. upper molars.

‖‖Toothache extending into head.

‖Teeth covered with yellow mucus. θTyphus.

‖Teeth covered with brown sordes. θTyphus.

Throbbing pain in a tooth, with numb sensation in gums.

Sore pain in several teeth, with swelling and redness of gums and cheeks.

‖Neuralgia of gums.

‖Swelling and redness of gums and cheek, with sore pain and stinging in teeth.

Gums bleed easily.

‖‖Gums sacculated, look watery, child wakens with violent screams; red spots here and there on skin. θDentition.

During dentition frequent waking at night with violent screams; red spots here and there.

[11] **Taste and Tongue.** ‖Bitter taste. θBilious diarrhœa.

‖Cannot taste anything; indistinct speech. θTyphus.

‖Inability to talk or put tongue out; it trembles, catches in teeth. θTyphus.

‖Protrusion of tongue. θMeningitis infantum.

‖Neuralgia of tongue.

‖Tongue feels as if wooden. θTyphus.

‖‖Tongue red at tip. θAlbuminuria.

‖Tongue red. θAbscess after vaccination.

‖Red, hot, burning tongue. θScarlatina.

‖Dryness of tongue; fiery redness of buccal cavity, with painful tenderness.

‖‖Dryness, fiery redness, burning, shooting and swelling of tongue.

‖Tongue dry. θThrombosis.

‖Tongue dry and trembling. θTyphus.

‖Tongue dry, with a brown streak down middle, sides moist. θTyphus.

‖Tongue dry and white. θChronic diarrhœa.

Dry tongue, with prickling sensation in tongue and fauces.

Dry tongue. θCatarrh of stomach.

‖Dry, shining, yellow, swollen tongue.

Digitized by Google

Tongue swollen, looks dry and glossy.
Dry, swollen, inflamed tongue, with inability to swallow.
‖Tongue red, swollen, even to suffocation. θGlossitis.
‖‖Inflammation of tongue. θAfter a sting in temple. θEnteritis. θAngina.
‖Tongue clean (oil). ‖Catarrh.
‖Taste normal, tongue clean. θAcute Bright's disease.
‖Tongue looks as if varnished. θCatarrh of stomach.
‖Tongue white. θCatarrh of chest.
‖Tongue thickly covered with white phlegm. θTyphus.
‖Tongue first covered thickly white, later covered with a brown crust. θTyphus.
‖Foul tongue. θGastro-enteritis.
‖The whole margin of tongue feels as if scalded, as if quite raw; little papular elevations appear along edge of tongue.
‖On tip of tongue, somewhat to left, a row of small vesicles painfully sore and raw.
‖‖Tongue deep red, and covered with vesicles, which burn and sting. θScarlatina.
‖Tongue cracked, sore, ulcerated or covered with vesicles. θTyphus. θScarlatina.
‖Cancer of tongue.

[12] **Inner Mouth.** ‖Salivation.
‖Viscid, tough, frothy saliva.
‖Dryness of mouth, fauces and throat. θTonsillitis.
‖Scalded feeling in mouth and throat.
Inflammation of mouth.
‖Buccal cavity painfully sensitive.
‖Fetor of breath. θAlbuminuria. θHeadache. θGastro-enteritis. θDiphtheria.

[13] **Throat.** ‖Diphtheritis; characterized by great debility from beginning.
‖Diphtheria coming on quite unperceived, and progressing so insidiously as to offer but little hope of relief. θDiphtheria.
‖‖Mouth, throat, pharynx bright red, glossy as if varnished; in places coated white, like scales; mucous membrane covered sometimes with dirty greyish tough membrane; not much pain, except in ears when swallowing. θDiphtheria.
‖Puffy, glossy varnished appearance of highly inflamed parts. θDiphtheria.
‖Diphtheritis, accompanying scarlatina.
‖Morning and evening secretion of tenacious mucus from throat. θChronic catarrh.
‖Tenacious mucus in throat; very troublesome. θTyphus.
Hawking and clearing throat every morning.

Inflammation of palate, mouth, fauces and throat.
Very long palate; looked as if filled with water. θDiphtheria.
Slight redness of velum palati; fauces rosy red; small blisters filled with clear lymph in clusters on back part of throat. θStomatitis. θAscites.
Fauces bright red. θDiphtheria.
Posteriorly and superiorly in fauces and throat; pressive pain, as from a hard body.
Soreness of throat and fauces; constant soreness. θOrganic disease of heart.
Fauces violet red; both tonsils enlarged, dark, with a throbbing pain. θAngina tonsillaris.
Tonsils red, swelled, painfully smarting.
Red, highly inflamed tonsils.
Tonsillitis, with cutaneous eruptions.
Left tonsil much inflamed. θScarlatina.
Tonsils and fauces erysipelatous.
Redness and swelling of tonsils, uvula and fauces. θAngina. θTonsillitis.
Very greatly enlarged tonsils, with redness and swelling.
Tonsils swollen, bright red, stinging when swallowing.
Tonsils swollen, hard; swallowing difficult. θScarlatina.
The r. hypertrophic tonsil swollen since two years, is two-thirds lessened within four weeks. θScrofulous ophthalmia.
Dry ulcers on tonsils and palate; sloughing abrasions on tonsils. θScarlatina.
Deep ulcers on tonsils or palate; erysipelatous and œdematous appearance around ulcers.
Effusion of fluid into tonsils. θScarlatina.
Dryness in throat without thirst.
Dryness in throat. θCatarrh. θScarlatina.
Dryness and heat in throat.
Dryness, with burning stinging in throat. θChronic catarrh.
Stinging burning pain in throat. θVariola.
Stinging itching, deep in throat, at lower part of neck, accompanied by a sensation of constriction.
Violent stitches and throbbing in throat. θChronic inflammation.
Stinging pain in throat. θScarlatina.
Smarting pain in throat. θAngina. θTonsillitis.
Heat and smarting in throat, with occasional hacking cough.
Sensation as if raw in throat, with tough saliva and hawking.

Digitized by Google

Roughness and sensitiveness of pharynx.
Hot and inflamed throat, much phlegmonous inflammation diffused over fauces and velum.
Inflammation of throat.
Swelling of submucous tissue in throat.
Diphtheritic angina.
Vivid redness in throat, without much swelling, and a very clean tongue.
Throat painful, pharynx and whole mouth bright red, in some places as if covered with wine-dregs, in others three large whitish patches formed by lumps of matter, forming a kind of soft scab, seeming to incline to invade whole back of throat; after 3, in water every two hours, the throat was stripped of all clogged matter. θScarlatina, fifth day.
Catarrhal or habitual angina (with abdominal complaints) with tendency to ulceration.
Ulcers in throat; in scarlatina, when eruption does not come out.
Eruption of scarlatina just subsiding, throat intensely red, dry and glazed looking; numerous small grey ulcers on columns of arch of palate; feverish, headache, weak, exhausted, skin dry, pulse quick.
Erysipelatous and œdematous appearance around ulcers.
Ulcers in throat, erysipelatous or urticarious.
Deep ulcers on tonsils, palate, etc.
Three open ulcers, with callous edges in throat, discharging an ichorous fluid (oil). θSpinal disease.
Swelling in œsophagus.
Between intervals of swallowing, often a stinging pain in throat.
Swelling and sensation of narrowing in throat.
Throat felt constricted, and as if a foreign body was lodged in it; deglutition was painful.
Sensation of constriction and erosion in throat, in mornings; increases to such a degree in eight hours that swallowing becomes difficult.
Throat sore, swallowing painful, especially solids and sour or hot substances, r. side worse; would wake at night with a strangling sensation; stringy phlegm in throat.
Stinging pains on attempting to swallow. θQuinsy.
Talking painful, and a feeling when swallowing as if a large fish-bone was in throat.
Stinging, burning, smarting, shooting, especially on swallowing.
Pain in ears when swallowing. θDiphtheria.
Unable to swallow except with extreme pain. θScarlatina.

Google

‖Throat swollen, inside and outside; hoarse; breathing and swallowing difficult.

‖Shooting, itching, and contraction in throat, rendering deglutition difficult.

Often inclined to swallow, but there being no power in the muscles it is difficult.

❙Difficult swallowing, from absence of power in muscles. θScarlatina. θTyphus. θAfter diphtheria.

❙Difficulty in swallowing. θTyphus. θAngina.

❙From north wind took cold; shivered, throat inflamed, uvula, arch of pharynx and tonsils being very red and swollen; constant pricking pain, shooting up both sides towards ears; almost entire loss of voice and difficulty in swallowing; feverish, and has a quick pulse.

❙Can swallow only a single drop, with swollen tongue.

❙Could not swallow solid food. θAngina tonsillaris.

❙Shivering fit, ushering in an attack of cynanche tonsillaris; throat intensely red and swollen, l. side worse; cannot swallow a drop of liquid; much fever, headache, pain in limbs.

❙Can swallow nothing; fauces and r. tonsil red and swollen, and affected with sharp, pricking pain; has headache, is thirsty, pain in limbs and back.

❙No effort to swallow water which is put into his mouth. θTyphus. θHydrocephalus.

" **Appetite, Thirst. Desires, Aversions.** ❙Appetite good. θAmenorrhœa.

❙Appetite and thirst normal (oil). θSpinal disease.

‖Anorexia.

❙No appetite or desire for food. θTonsillitis. θAngina. θDiarrhœa. θInfantile marasmus. θAscites. θAcute Bright's disease. θMenstrual derangements. θTyphus.

❙Appetite previously voracious, now deficient. θAlbuminuria.

❙Appetite lessened, thirst not increased (oil). θCatarrh.

❙Neither eats nor drinks. θTyphus.

❙Four weeks without eating and without sleep. θMania.

❙No appetite, but much thirst. θTyphus.

❙Thirst. θBilious diarrhœa. θScarlatina.

❙Constant thirst; before *Arsen.* θHydrothorax.

❙Drinks often, but little at a time. θCatarrh of chest. θDiarrhœa. θDiphtheria. θCancer of breast.

❙❙Insatiable thirst. θAbscess after vaccination.

❙So violent thirst that she would like to drink all the time. θTyphus.

❙Disturbed by great thirst. θThrombosis.

‖Desire for a draught of water, with sinking of forces.

❙Thirst in some cases, in others none. θDiphtheria.

Digitized by Google

‖‖Thirstless. θCerebro-spinal meningitis. θOvarian and other dropsies. θAscites. θPregnancy. θHydrothorax. θKeratitis.
‖No thirst, with dryness of throat and heat.
‖Absence of thirst and scanty urination. θDropsy.
‖Thirstlessness in dropsical disease, and many other complaints.
‖‖No thirst with the heat; mouth dry.
No thirst during sweat.
Craves milk, which relieves.
‖Child nurses by day, refuses at night. θAbscess after vaccination.
Appetite for sour things.
‖Pure water does not taste good, wants vinegar mixed with it. θTyphus.

[15] **Eating and Drinking.** Continued swallowing relieves soreness and cough.
‖Heaviness at stomach after meals. θAscites.
‖Discharges renewed by food or drink. θDiarrhœa.
‖After eating or drinking, distress in stomach. θChronic gastritis.
Strong craving for food or drink, but nausea, belching, heat and burning therefrom.
‖Vomits food as soon as taken, followed by retching. θIncipient hydrocephalus.
After meals, sleepy.
‖After warm sugar-water, retching and vomiting and bursting of tonsillar abscess. θAngina tonsillaris.
Worse swallowing drink or food; also sour or hot substances.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Water-brash. θGastric catarrh.
Heartburn, five or ten minutes after the sting.
‖Heartburn extending up into throat. θPregnancy.
‖‖Eructations, with taste of ingesta; increased after drinking water.
‖Bitter or acrid belching. θChronic gastritis.
‖‖Eructations, with flow of water into mouth.
Nausea, with inclination to vomit.
‖‖Disgust, nausea, with vertigo, faintness, sinking of strength till it comes to vomiting, with headache; swelling of head, pains in stomach and diarrhœa.
With nausea and vertigo, general distress and prostration, with mental anxiety.
‖Nausea, retching and vomiting. θMeningitis infantum.
‖Chronic gastritis.
Sickness at stomach, and pain over whole body so severe as to occasion crying.

Digitized by Google

Desire to vomit. θMeningitis infantum. θCatarrh of chest.
Vomiting.
Vomiting of ingesta and mucus. θAcute Bright's disease.
Vomiting of frothy mucus during day; after sudden nausea felt in throat. θOvarian tumor.
Vomiting of mucus, with red specks. θAlbuminuria.
Vomiting of slime and ingesta without loss of appetite. θAcute Bright's disease.
Bitter vomit.
Nausea and vomiting of bile. θOrganic disease of heart.
Vomiting of bile; of ingesta and slime. θGastric catarrh. θMorbus Brightii.
Vomiting of bile. θCatarrh of stomach.
Vomiting, with inflammation of stomach.
Vomiting in beginning of gastro-enteritis.
Vomiting, extreme pain and tenderness in region of stomach and upper abdomen. θGastro-enteritis.
Vomiting, with diarrhœa.

17 **Scrobiculum and Stomach.** Pit of stomach sensitive; burning as from acidity; irritability of stomach; fulness; pressure aggravates pains. θGastric catarrh.
Sensitiveness of pit of stomach to touch. θGastritis. θGastralgia.
Great soreness when touched in pit of stomach, under ribs, in abdomen.
Pit of stomach sensitive to pressure, and burning therein. θPregnancy.
Burning in pit of stomach. θGastritis.
Pressure in pit of stomach.
Pain and tenderness in epigastrium. θErysipelas.
Sensation of burning in epigastrium like from acidity in stomach. θErysipelas.
Excessive pain and tenderness of stomachic region and epigastrium. θGastro-enteritis.
Weak, faint sensation in epigastrium, with loss of appetite. θOvarian tumor.
Pain in cardiac region, shooting, obstructing breath.
Sensitiveness, fulness and burning in stomach, with catarrh of throat.
Irritability of stomach. θChronic catarrh of stomach.
Sensation of soreness in stomach and abdomen.
Sensitiveness and burning of bowels; < on pressure. θChronic gastritis.
Burning in stomach after erysipelas.
Burning heat in stomach.
Violent pain and sensitiveness in region of stomach.

Digitized by Google

Extreme pain and tenderness in region of stomach and upper abdomen, with vomiting. θGastro-enteritis.
Sharp, crampy pains in stomach and abdomen, followed by vomiting and diarrhœa at intervals, lasts two hours.
Gastralgia. θBilious diarrhœa.
Irritation of digestive organs, with hot or burning sensations. θDyspepsia.
Aching and pressure in stomach; pricking, sore feeling, burning and great tenderness.
Distension of stomach, with burning in epigastrium.
Erysipelas of stomach and bowels.
Contusions of stomach and bowels.

[18] **Hypochondria.** Pressure against diaphragm renders respiration laborious. θAscites.
Soreness at insertion of diaphragm and in back. θCholerine.
Inflammation of diaphragm.
Under r. ribs, sensation as if "gone to sleep."
Hyperæmic state of liver. θOrganic disease of heart.
Inflammation of spleen.
Considerable swelling of spleen, abdomen sunken in. θTyphus.
Pain l. side, under short ribs and in mediastinum. θChest complaint.
Pain under short ribs; < l. side. θIntermittent, apyrexia.
Soreness and bruised feeling, as after a contusion, most about last ribs, l. side.
Severe burning pain under short ribs, on both sides; most severe on l., continuing there for weeks, depriving her of sleep.
Pains from below ribs, spreading upward.
Obliged to bend forward from a painful contractive feeling in hypochondria.
Tension over hypochondria, with pricking sensation.
Clothes could no longer be made to meet around his waist. θAscites.
Sensation of soreness or burning under ribs.

[19] **Abdomen.** Abdomen contracted.
Heavy painful pressure, violent contraction, compression and urging in belly.
Collapse of abdominal walls. θMeningitis infantum.
Heaviness in abdomen. θMenorrhagia. θMetrorrhagia.
Bearing down pain, with tenderness of ovarian region. θProlapsus uteri.
Numbness in r. side of abdomen.
Sick feeling in abdomen, inclining to sit quiet.
Burning, stinging in abdomen; sore to touch. θPeritonitis.

Digitized by Google

Soreness of bowels felt when sneezing or pressing on them.
Feeling as if intestines were bruised. θDysentery. θAscites.
Feeling in belly as if something tight would break if too much effort were made at stool. θPregnancy.
Erysipelas from contusions in stomach and bowels.
Sore pains in bowels. θEnteritis.
Soreness and burning pain in abdomen. θBilious diarrhœa.
Great pain in abdomen. θAcute Bright's disease.
Aching at umbilicus, < in morning. θAlbuminuria.
Violent cutting pains in abdomen. θMorbus Brightii.
Severe griping pains in bowels.
Violent pains in belly when lying; > sitting up.
Pains in abdomen when walking.
Bellyache with call to stool in morning.
Inflammation of bowels. θAscites.
Peritonitis with exudation; often with metritis; urine scanty, dark.
Soreness of bowels, felt when pressing upon them, or sneezing. θAscites.
General soreness of abdomen. θChronic dysentery.
Abdomen sore to touch. θEruptive disease. θScarlatina.
Burning in abdomen and tenderness to least pressure.
Fulness and tenderness of abdomen. θAscites.
Abdomen very tender to touch, even to pressure of bedclothes. θAscites.
Tenderness of entire peritoneum on pressure or on turning in bed.
When pressed on r. side of abdomen she makes a wry face. θTyphus.
Tenderness of abdomen on pressure. θEnteritis. θDiarrhœa. θDysentery. θTyphus.
Burning, internal soreness, with external tenderness, even to pressure of bedclothes.
Great soreness of abdominal walls. θAscites.
Cutting pain in abdominal walls.
On pressing on ileo-cæcal region a gurgling like from a fluid is heard. θTyphus.
Rolling and rumbling of wind in bowels, with diarrhœa. θTyphus.
Rumbling in abdomen. θFlatulency. θTyphus. θEnteritis. θChronic dysentery.
Great soreness and bloatedness in abdomen, as if she was inflated.
Meteoritic distension. θTyphus.
Fulness and enlargement of abdomen. θAscites.
Sensation of fulness in abdomen, with dull pains, < on motion and from pressure.

Digitized by Google

Sense of fulness in bowels. θBilious diarrhœa.
Abdomen full, swollen and tender, with swollen feet and scanty secretion of urine.
Sense of fulness and tightness of bowels. θEnteritis.
Belly feels full and hard. θDropsy after scarlatina.
Swelling of abdomen without thirst. θAscites.
Swelling of abdomen and limbs. θOrganic disease of heart.
Abdomen very much distended by fluid. θAscites. θAlbuminuria. θDropsy after scarlatina.
Circumference of abdomen increased in one day by three-fourths of an inch. θAscites.
Abdomen begins to swell, with much difficulty of breathing, especially after going up-stairs quickly. θAmenorrhœa.
Walls of abdomen tense. θTyphus.
Ascites and anasarca.
Enlargement of abdomen. θIntermittent, apyrexia.
Ascites with vomiting and diarrhœa; can't get breath except when sitting; even leaning backward causes suffocation; urine scant, dark, like coffee-grounds.
Ascites: from albuminuria; post-scarlatinal or with uterine tumors; after peritonitis.
Pain extending into thigh or upward to ribs. θOvaritis.
Aching, pressive pain in hypogastrium, with bearing down in uterus.
Slow throbbing boring pain over l. iliac crest, relieved by eructations.
Sensitiveness of ileo-cæcal region. θTyphus.
Severe aching in loins. θOvarian tumor.
Neuralgia in groins.
Swelling in r. groin oblong, hard, large as a cucumber.
Hard swelling in r. groin.
A large swelling in l. inguinal region. θSyphilis.
Long-standing inguinal hernia.

[20] **Stool and Rectum.** Throbbing in rectum.
Electric shock in rectum before urging to stool.
Tenesmus. θDiphtheria. θAscites.
Feeling of approaching diarrhœa, urging pressing and tenesmus in bowels.
Tenesmus, bowels feel bruised. θDysentery. θProlapsus ani.
Repeated inclination to have a discharge from bowels. θOrganic disease of heart.
Passage of flatus before stool.
Distended and sore bowels with much flatulence and small alvine discharges affording no relief.
Tendency to diarrhœa. θEnteritis.

Digitized by Google

Painless morning diarrhœa.
Diarrhœa (with the exception of dysentery) predominantly painless.
‖A painless diarrhœa appears before relief of chest complaint.
Painless diarrhœa, greenish-yellow.
‖Painless yellow diarrhœa. θGastritis.
Looseness of bowels in morning, thin, watery, yellowish discharges, generally painless, only at times griping.
‖Yellowish motions with a tinge of green with scarcely any pain. θErysipelas in stomach.
‖Painless diarrhœa, yellowish, sometimes greenish and slimy. θBronchitis.
‖Greenish, yellow, watery, mucous diarrhœa, without pain, especially in morning.
‖Frequent painless bloody stools. θDysentery of infants.
‖‖Watery diarrhœa. θCatarrh of stomach.
‖Watery, frequent, copious, almost black motions.
Watery diarrhœa, with smarting at anus.
‖Stools: watery; yellow, watery, with griping; watery and foul smelling; watery, copious, black; thin yellow with extreme weakness; greenish-yellowish mucus; < mornings, slimy, mucus and blood; frequent, bloody, painless, olive green, slimy, profuse; full of bright red lumps.
‖Stools yellowish, greenish, with some bellyache. θDiarrhœa. θCatarrh of stomach.
Yellow brown stools, with frequent painful urination.
‖Several thin, yellow stools with extreme weakness and prostration; stools occur with every motion of body, as if anus was constantly open.
‖Evacuation of mucus with pain, as if bowels were squeezed to pieces.
‖Excessive mucous secretions. θEnteritis.
‖Slimy stools. θCatarrh of stomach.
‖Olive green, slimy, profuse stools, full of bright red lumps like chopped beets, with colic and tenesmus. θIncipient hydrocephalus.
Copious evacuations of blackish-brown, green and whitish excrements.
‖Stools soft and pappy, mixed with serum, as if soft feces had been beaten in water, but not dissolved, orange-colored.
‖Frequent discharge of gelatinous mucus with slight tenesmus. θChronic dysentery.
‖Brownish, watery or bloody discharges. θTyphus.
Loose stools containing some mucus and considerable blood.

Digitized by Google

▮Frequent, bloody, painless; infantile dysentery; sometimes only tenesmus with bruised feeling in bowels.
▮Small dark stools smelling brassy. θIncipient hydrocephalus.
▮▮Fetid diarrhœa, then tenesmus, with passages of blood.
Stools watery, foul smelling.
▮Stools smelling very offensive. θTyphus.
▮Every day six or eight diarrhœic discharges of a smell like carrion. θTyphus.
▮Frequent, loose, painful, putrid, bloody involuntary discharges. θTyphus.
▮▮Diarrhœa in morning or forenoon, returning at same hour.
▮Diarrhœa in morning for three or four weeks; thin, watery, yellowish, only sometimes with griping.
▮▮Soft stool, every morning, light-colored.
▮Diarrhœa in morning; hands blue, cold; faint; vomiting. θCholera infantum. θHydrocephaloid.
▮Diarrhœa at night and following day, stool like oat grits. θTyphus.

‖‖Retention of urine; bladder but slightly distended. θCystitis. θHydrocephalus. θTyphus, etc., etc.

‖Retention of urine in nursing infants.

‖Suppression of urine.

‖Urine suppressed, with diarrhœa. θTyphus.

Digitized by Google

Almost entire suppression of urine. θAscites.
Urine scanty, or quite profuse. θHydrocephalus. θDentition.
Repeated urination every few minutes, all day.
Increased micturition day and night.
Urine sometimes too profuse. θProlapsus uteri.
Great secretion of urine, of pale or straw color, depositing a reddish or brickdust sediment.
Frequent urging to urinate, with copious discharges of straw-colored urine.
Frequent and excessively profuse discharge of normal urine.
Copious, straw-colored urine. θDiarrhœa. θTyphus.
Passed great quantities of urine frequently in night. θDropsy.
Enormous secretion of urine (four to six pounds daily), greatest when at some out-door exercise, with flatulence and some looseness of bowels (bee-bread).
Discharges of clear, colorless urine during dentition. θDiarrhœa.
Very scanty, high-colored and often scalding urine. θAmenorrhœa.
Urine: scanty, high-colored; red, bloody, hot and scanty; scanty and fetid; scanty, reddish-brown; after standing, turbid; scanty, milky, albuminous; dark, with sediment like coffee-grounds; containing uriniferous tubules and epithelium.
Urine violet color. θAfter albuminuria.
Urine of a greenish hue. θHydrothorax.
Urine scanty, of a dirty red color. θScarlatina.
Urine scanty, reddish-brown; after standing, turbid. θAscites.
Reddish, has a brown-colored sediment. θDropsy after scarlatina.
Urine scanty, flows thick from catheter. θAngina pectoris.
Urine scanty and dark, often burns or smarts. θProlapsus uteri.
Urine dark, like coffee. θHydrothorax.
Urine of a peculiar dark color, resembling an infusion of black tea or water with dark molasses. θDropsy after scarlatina.
Urine scanty, dark, sediment like coffee-grounds. θAscites.
Red urine. θBilious diarrhœa.
Frequent urging to urinate, passed small piece of black blood with urine, which was very scanty. θSequel of scarlatina.

Digitized by Google

‖Urine bloody; blood corpuscles in rings. θAscites.
‖Frequent but scanty emission of a milky urine. θHydrocephalus. θMeningitis infantum.
‖Clouded appearance of urine. θDropsy after scarlatina.
‖Urine scanty, dark colored and frothy. θPost-scarlatinal dropsy.
‖Urine scanty and fetid. θAlbuminuria.
A peculiar light red sediment or color of urine, not so much in urine as separating from it and adhering to sides as well as to bottom of vessel; color approaching more that of arterial blood than anything else.
‖Half the bulk of urine is albumen; girl, æt. 5. θAlbuminuria.
Discharge of mucus after urination.
‖Urine contains largely albumen and blood corpuscles. θAcute Bright's disease.
‖Urine contains uriniferous tubes and epithelium. θMorbus Brightii.

Male Sexual Organs. Sexual desire increased or diminished.
Frequent and long-lasting erections.
Uneasiness in spermatic cords.
‖Sympathetic pains down cords and up through ureters to kidneys. θIschuria.
Swelling of testicles; more the right; it had hardly room in scrotum.
Testicles pain when touched.
Affections of prostate gland.
Discharge of prostatic fluid.
Gonorrhœa; sycotic constitution.
‖Balanitis and condylomata.
‖Sycosis, with a copious secretion of a thin, ichorous discharge; with burning, stinging pain.
‖Inflammation of glans and prepuce. θSyphilis.
‖A well-developed chancre on glans penis; given according to kind of pain.
‖Burning stinging pain in ulcer and inflamed surface. θSyphilis.
Violent itching and redness of scrotum, sore to touch.
‖‖Dropsy of scrotum.
‖Hydrocele.
‖Hydrocele in multilocular cysts.
‖‖Erysipelatous inflammation and swelling of scrotum, followed bee-stings on face and neck, with a boy, æt. 5.
Large boils on pubes.

‖Stinging, burning in one or other ovarian region more and more frequently, until labor pains set in. θAbortion.
‖Burning, stinging pain in r. ovary for several months; 2ᵉ relieved in twenty-four hours. θOvaritis.
‖Pain in each ovary, sharp, stinging, periodic. θDuring miscarriage.
‖Sharp, cutting, lancinating pains in ovarian region, extending down thigh; < r. side; numbness in side and limb. θOvaritis. θOvarian tumor.
‖‖Cutting in l. then in r. ovary; drawing, shooting, with bearing down.
Sharp cutting pains in l. ovary, worse at intervals, extending down thigh.
Drawing in r. ovarian region.
‖Tightness in ovarian region, worse on raising arms.
‖‖Constant feeling of weight and heaviness in ovarian region, l. side. θOvarian dropsy.
‖Feeling of weight, heaviness, in ovarian region. θCancer of mammæ.
‖Irritability and pain mostly stinging in ovaries. θAmenorrhœa.
‖Steady ovarian pains, with bearing down in ovaries and uterus.
‖Painful bearing down in r. ovary. θOvaritis.
‖Tenderness of ovaries on pressure.
‖Painful soreness of l. ovary, < walking. θOvaritis.
‖Right ovarian region very sensitive during period.
‖Pain in r. ovary before or during menses. θProlapsus uteri.
‖Irritation of ovaries, tenderness of ovarian region, with severe pain on deep pressure. θDysmenorrhœa.
‖After metritis very severe pain in ovaries. θOvaritis.
‖Soreness of r. ovary. θOvaritis.
‖‖Pains in ovarian regions as if sprained; tender.
Pain in r. ovary every fifteen or twenty minutes; each paroxysm lasting from one to three minutes.

Digitized by Google

Strained pain in l. ovarian region, < when walking, evenings, followed after several hours by bearing down pain on r. side, and lame feeling in shoulder blades; is compelled to bend forward when walking.

When stretching in bed, fine cutting pain in l. ovarian region, going across to the right; first very faint, then stronger and stronger, increased after every repeated stretching, four or five times the same, then ceasing.

‖Pain in ovaries, least felt when lying on r. side.

‖While lying on r. side, a pulsation and movement.

‖Chiefly in r., rarely in l. ovary. θSwelling of ovaries.

Numbness and dulness, beginning in r. ovarian region, extending to hip and ribs and down over whole thigh; better when lying upon it.

‖Inflammation, induration, enlargement, swelling and dropsy of ovaries, principally right.

Inflammation of ovaries with amenorrhœa.

‖Left ovary as large as a regulation baseball and a good deal heavier.

‖Chronic enlargement and induration of ovaries, especially when they have been accompanied by occasional paroxysms of severe pains.

‖‖Enlargement of r. ovary, with pain in l. pectoral region, and cough.

‖Swelling and induration of ovaries: commencing on r. side; with pains on stooping and on beginning to walk.

‖‖Dropsy of r. ovary: with hardness and burning, stinging, bruised sore pain; with so great an accumulation of fluid that she was unable to move without great inconvenience.

‖‖Ovarian dropsy; burning, stinging, sometimes lancinating pain, thirstlessness, scanty urine; skin white, transparent; costive, large, hard, difficult stools.

‖A lump in l. ovarian region.

Soft encysted tumors of ovaries.

‖Cystovarium size of a head, since six years.

Dropsical tumors with burning, stinging and bruised sore pains.

‖‖Ovarian tumors: patient passes more urine than is normal; stinging burning; pains on stooping or beginning to walk; menses irregular, lasting a day or two.

‖Ovarian tumor, with stinging, cutting and throbbing pains, < from standing, walking, and palpitation; pains often extending into r. breast; tumor hard and on r. side.

‖Firm swelling lying towards l. side of navel.

‖Ovarian tumor, after tapping off eight quarts of a straw-

colored fluid, and after *Apis* no return for two years; tapping again, six quarts; *Apis* again, remained well.

Stinging pains in region of uterus.

Stinging thrusting pains in region of uterus. θMetritis.

Metritis with peritonitis.

Sharp, plunging, stabbing pains in uterus, sometimes followed by convulsions. θDysmenorrhœa.

Severe paroxysms of contractive, spasmodic, pressing pains at os uteri.

A sensation of weight and heaviness with downward pressing and stinging pains in uterus. θHypertrophy of uterus.

Aching and pressive pain in hypogastrium, with bearing down in uterus, as if catamenia would appear.

Great tenderness over uterine region, with bearing down pain, leucorrhœa and painful urination.

Bearing down pain, with tenderness over uterine region. θProlapsus uteri.

Violent laborlike, bearing down pains, followed by discharge of scanty, dark, bloody mucus. θDysmenorrhœa.

Heat and fulness of uterine region.

Ulceration and engorgement of os uteri.

Uterine dropsy; tumors with ascites.

Hypertrophy of uterus.

Six days previous to monthlies, sickness, sensation of weight and heaviness in ovaries.

Menses premature, copious, or scanty.

Before menses: eruption, laborlike pains in abdomen.

Pain in r. ovary, before and during menses. θProlapsus uteri.

Catamenia too profuse or too scanty. θProlapsus.

Menorrhagia, with heaviness in abdomen, faintness, uneasiness, restlessness, yawning; red spots on body, stinging like bee-stings.

Menorrhagia resulting from acute congestion of ovaries. θProlapsus uteri.

Metrorrhagia with red spots stinging like a bee-sting.

Metrorrhagia in second month of pregnancy, with profuse flow of blood, heaviness of abdomen, great uneasiness, restlessness and yawning.

Mucous menses. θProlapsus uteri.

Catamenia stops a few days and then returns, several times in alternation.

Menses at intervals of one day. θProlapsus uteri.

Interrupted catamenia.

Menses irregular. θProlapus uteri.

Menses irregular, lasting but a day or two, accompanied by weakness. θOvarian tumor.

Digitized by Google

‖Violent, cramplike, bearing down pains, like from labor, followed by scanty flow of dark, bloody mucus, lasting twenty hours.

‖The catamenia more copious but lumpy, and with great pain in spleen, continuing after it and molesting with every walk, even when talking or coughing.

With much pain catamenia appeared in a copious discharge of clotted black blood, in appearance like masses of putrid calf's liver.

‖Dysmenorrhœa: with ovarian neuralgia: congestive type; with scanty discharge of slimy blood.

‖Dysmenorrhœa from congestion of ovaries. θProlapsus uteri.

‖During menses: eruption; laborlike pains in abdomen, particularly in r. ovarian region; constipation; heat of head; stinging in abdomen; great sensitiveness of r. ovarian region; deep-seated tenderness, stinging and frequent micturition; pain in r. ovarian region; bearing down pain in r. ovarian region; swelling of ovarian region.

‖Sharp, cutting, stinging pain in swollen ovary; < during menstruation.

‖Stinging in abdomen during catamenia. θOvaritis.

‖Catamenia delayed. θOphthalmia.

‖Menses scanty. θProlapsus uteri.

‖Suppression of menses: congestion to head; congested or inflamed ovaries.

‖Amenorrhœa or dysmenorrhœa with scanty discharge of slimy blood; œdema of labia, ovarian pains.

‖Stinging pain or irritability with amenorrhœa.

‖Amenorrhœa with pain in r. hypogastric region. θProlapsus uteri.

‖Uterine catarrh with eruptive diseases.

‖Leucorrhœa: urethritic; acrid, profuse, green or yellowish; with frequent and painful irritation.

Neuralgia of labia; inflammation of labia.

‖Swelling of r. labium pudendi, with violent inflammation and great pain. A child.

‖Extremely large and painful swelling of labia, attended with violent heat and stinging pains.

‖Œdema of labia.

‖Chronic diarrhœa, passages of blood and mucus. θClimaxis.

Pregnancy. Parturition. Lactation. ‖Threatened miscarriage.

‖‖Abortion during early months; stinging pains in ovarian region until labor pains ensue; scanty urine; no thirst; profuse flow.

Digitized by Google

‖‖Miscarriage in fourth month, with profuse flooding.
‖‖Stinging pains occur in one or other ovarian region, more and more frequently till labor pains are produced; sometimes flowing, and finally abortion.
‖Menorrhagia, with miscarriage.
‖During pregnancy: stools seldom and very difficult, with stinging pains and sensation in abdomen of something tight, which would break if too much effort were made.
‖Constipation or diarrhœa. θPregnancy.
‖Dropsy in latter period of pregnancy, followed by puerperal convulsions.
Hydrops amnii.
Puerperal convulsions.
‖Ovarian affections, inflammatory. θChildbed.
Milk diminished with nursing women.
‖Mammæ: burning, stinging, swelling, hardness, even suppuration.
‖‖Erysipelatous inflammation of mammæ.
‖Mammæ suppurated, opened twice; r. breast hard, swollen and tender; used externally and internally.
‖Considerable swelling and hardness of mammæ. θMastitis.
‖‖Stinging, burning in scirrhous tumors of mammæ, or in open cancer.
‖Scirrhus of mammæ.
‖Cancer of mammæ; open cancer, with stinging, burning.
‖Ovarian affections, with inverted nipples.
Ulceration of umbilicus with newborn.
Difficult urination with children.
‖Urine scanty or very profuse. θDentition. θHydrocephalus.

25 **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness mornings, throat dry, but no thirst; soreness in suprasternal fossa and above clavicles; feeling as of cords from fossa pulling downward and sideways; stitches through lungs, hips and sides of chest, with aching all over, but < in l. breast.
‖Hoarseness, with dryness and burning of larynx. θChronic laryngitis.
‖Hoarseness and scraping of larynx and trachea. θErysipelas.
‖‖Hoarseness, with tender larynx, rough throat and dryness.
Hoarseness in morning.
Hoarseness and dry cough.
‖Hoarseness. θAlbuminuria.
‖Voice hoarse, rough (oil). θCatarrh.
‖Speaks in a thick voice, as in quinsy. θScarlatina.

Digitized by Google

Speaking is painful; feels as if it wearied pharynx, in which there is drawing pain.
Acting on lining membrane of larynx controls a state of inflammation greater than that for *Bellad.*, even after submucous infiltration has taken place.
‖Sensation of weakness in larynx. θDiphtheria.
Difficulty of swallowing not caused by swelling in throat, but by irritation of epiglottis; every drop of liquid put upon tongue nearly suffocates him.
‖‖Œdema glottidis.
‖Chronic laryngitis.
‖Subacute and chronic laryngo-tracheal irritation.
Dryness of throat in morning, croupy cough and hoarseness.
Hoarse voice and hoarse cough from irritation of trachea.
‖Croup in extremis, preparing for tracheotomy.
‖Œdema of larynx.
Trachea, as if stopped up.
‖Rattling in bronchiæ, with inhaling and coughing (oil). θCatarrh.

[26] **Respiration.** ‖Fetor of breath. θAlbuminuria. θGastro-enteritis.
‖A deep inhalation excites cough (oil). θCatarrh.
‖Breathing very frequent. θThrombosis.
Respiration prevalently quick.
Breathing hurried and difficult, with fever and headache.
‖‖Breathing accelerated, especially on moving, going upstairs or walking.
Rapid, painful, spasmodic respiration; < lying down, > in fresh air, and in an upright position.
‖Breathing, gasping and excessively rapid. θDropsy after scarlatina.
Shortness of breath, particularly on exercising.
‖Shortness of breath, oppression of chest on taking an inspiration. θAsthma.
‖Shortness of breath. θHydrothorax. θIntermittent.
‖Breathing feeble, interrupted; pale; lies stretched on a mattress. θAfter a sting.
Arthritic symptoms, cough, choking pain in chest, < in cold weather.
‖Asthma after hives.
‖Oppression of chest, shortness of breath, especially when ascending; inability to remain in a warm room. θAscites.
‖Attacks of oppressed breathing, worse at night in bed, or in warm room. θChronic laryngitis.
Oppression over chest and epigastrium.
‖Breathing oppressive, can scarcely walk. θDropsy.

Digitized by Google

Respiration oppressed. θHydrothorax.
Respiration torpid, oppressed. θScarlatina.
Breathing accelerated and labored. θScarlatina. θCatarrh.
Breathing labored; must forcibly exert abdominal muscles.
Labored breathing, as in croup. θBronchitis.
Respiration exceedingly laborious and difficult. θAscites.
Breathing slow, difficult with contraction in throat.
Difficult and anxious respiration.
Breathing heavily and with difficulty, and gasping. θIncipient hydrocephalus.
Coughed and breathed with great difficulty, as if he had croup, with muttering, delirium, etc. θChronic diarrhœa.
Difficult, heavy breathing, gasping. θIncipient hydrocephalus. θHydrothorax. θAscites, etc.
After sleep, difficulty in breathing.
Difficult breathing, < bending forward or backward; cannot breathe except when sitting. θAscites.
Breathing difficult when lying on l. side. θAscites.
Awakens at night with a strangling sensation.
Sense of fulness, constriction, or suffocation in thorax.
Dyspnœa, with eruptive diseases.
Dyspnœa; it seemed impossible to breathe; had to fan him to keep him alive.
Feels as if breathing would stop.
Great feeling of suffocation; it seems as if she could not long survive for want of air.
Feels as if each breath would be the last; great distress, anguish and restlessness. θPregnancy. θHydrothorax. θHeart disease. θPericarditis. θCerebro-spinal meningitis. θHepatic peritonitis. θDropsy after scarlatina.
Great feeling of suffocation; cannot bear anything about throat.
Intense sensation of suffocation; threw collar wide open; could bear nothing about throat; with dusky hue of face and bluish lips; he could hardly breathe, and said, "I am suffocating."
Can't get breath, except when sitting. θAscites.
Stupefaction and stertorous breathing, with an occasional start as from sharp pain. θCerebro-spinal meningitis.

Cough. Cough, with that threatening resonance which denotes implication of upper parts of windpipe or bronchia. θBronchitis.
Cough: croupy; with ringing sound; dry, with gagging; with soreness of upper part of chest; with painful concussion of head; with labored breathing, as in croup.

Digitized by Google

‖Croupy cough. θMeasles.
‖Violent cough, like whooping cough. θMeasles.
‖Cough very dry, spasmodic, morning and evening, but most at night (oil). θCatarrh.
‖Dry cough. θTyphus.
‖Frequent fits of coughing, readily produced by slightest pressure on larynx. θHorses.
‖Irritation to cough, in suprasternal fossa.
‖Short irritating cough. θChronic laryngitis.
‖‖Cough and tickling behind pit of throat; in morning; before midnight; after lying and sleeping; with painful concussions in head; ceases when least quantity is detached.
‖Cough dry, with gagging, < lying on l. side. θTyphus.
‖Cough which loosens with difficulty, rouses from sleep before midnight, and ceases as soon as least particle is loosened, which is swallowed; expectoration seldom.
‖Obstinate night cough, incessant from 9 P.M. to 4 A.M.; woman, æt. 72, after acute bronchitis.
‖Cough, which ceases when least quantity is detached. θAlbuminuria.
‖Cough pains chest and shakes head. θAscites.
‖With violent attack of cough, blue in face, and puffed (oil). θCatarrh.
‖Coughing until it seemed as if she would vomit.
‖Cough pains in abdomen. θAscites.
‖Cough, with soreness in upper part of l. chest. θOvaritis.
‖Cough, with soreness of chest. θCatarrh.
‖Heat, with cough. θAlbuminuria.
Expectoration seldom.
Expectoration sweetish or tasteless. θAscites.
‖Expectoration of a great quantity of transparent, somewhat frothy, bloody mucus.
‖Can raise sputa only to tongue, whence it has to be removed by wiping. θTyphus.
‖Cough in morning; expectoration sweetish and tasteless. θAlbuminuria.
‖Short, dry cough, with expectoration in morning. θOvarian tumor.
‖Laryngo-pharyngeal cough of horses.
‖Cough suffocative, painful, not so hard as *Bellad.* cough, but with more dyspnœa, leading to diagnose a thickening of membrane, probably from effusion. θWith horses.
‖Painful hoarse cough, with a clear, ropy discharge from mouth, similar to *Mercur.* θWith horses.

[28] **Inner Chest and Lungs.** ‖Sometimes dull, sometimes sharp pains in chest. θHydrothorax.

Digitized by Google

‖Sharp pains in chest.
‖Chest oppressed. θMeningitis.
‖Pressure on chest, most on upper part.
Sense of fulness, constriction or suffocation in thorax.
‖Sensation of fulness in chest. θHydrothorax.
‖Dull aching pain in l. side of chest, near middle of sternum, with sensation of fulness in chest and short breath.
‖‖Fulness in chest, he must sit up. θHydrothorax.
‖Stitches most in l. side of chest.
‖Stinging pains in l. side of chest. θOvarian dropsy.
Slight pleuritic stitches in sides of chest.
‖Pleuritis.
‖‖Burning, stinging pains throughout entire front of chest.
‖After a walk, seized with a sticking pain in r. side of chest, region of fifth rib; < moving arm and body, extending to upper part of ensiform cartilage, somewhat impeding respiration. θRheumatism.
Pressure and burning in chest, with feeling as if raw or inflamed from inhaling frosty air.
Darting pains in chest.
‖Soreness under upper part of sternum (oil). θCatarrh.
‖‖Hydrothorax. θAfter pleurisy.
‖‖Hydrothorax, fulness in chest, dull or sharp pains; chest feels bruised.
‖Coldness or heat in chest.
Coldness in middle of sternum.
‖Sensation of heat in chest. θAsthma.
‖If there is evidently a mutual sympathy between ovaries and lungs. θOvaritis.
‖Hyperæmic state of lungs. θOrganic disease of heart.
‖Dull percussion sound below l. collar bone (oil). θCatarrh.

[20] **Heart, Pulse and Circulation.** Great anguish; restlessness; feels as if each breath would be the last.
‖Cardiac distress. θAmenorrhœa.
Sudden attack of acute pain just below heart, soon extending diagonally up toward r. chest.
‖Feeling about heart as if something was breaking away. θHydrothorax.
‖Heart beat violently, could be distinctly heard all over chest. θAfter scarlatina.
‖Every contraction of heart shook whole body. θOrganic disease of heart.
‖Heartbeat intermitting. θThrombosis.
Rapid, feeble beats of heart.
‖Swelling in region of heart, sensitive to slight pressure. θHydrothorax.

Digitized by Google

Inflammation of pericardium.
Effusion into pericardium following inflammation.
Hydropericardium.
Blowing sound with diastole; restless, but relief in no position.
Much pain about region of heart, with a sense of fluctuation when turning on her side. θHydrothorax.
Insufficiency of mitral valves, sutural valves diseased, eccentric hypertrophy of heart.
Rasping sounds of systole and diastole unmistakably audible.
Systolic sound of heart not well defined; tumultuous sound; diastolic sound of pulmonary artery increased. θOrganic disease of heart.
The circuit through collateral veins unusually developed. θThrombosis.
The blood globule appeared diminished in size and irregular. θAscites.
Pulse not febrile, but temperature of skin had increased, and on fourth day a profuse sweat occurred with improvement. θChronic rheumatism.
Pulse frequent. θAlbuminuria.
Pulse 100, weak. θTyphus.
Pulse 112, full and soft. θTyphus. θAlbuminuria.
Pulse 120; æt. 11. θCatarrh of chest.
Pulse 120, dicrotic. θTyphus.
Pulse 130, hard. θThrombosis.
Pulse very quick, at least 140. θDiphtheria.
Pulse 160. θAbscess after vaccination. θAfter scarlatina.
Pulse: frequent, full, strong; accelerated and predominantly large; quick and full, not hard.
Pulse frequent and wiry. θGastro-enteritis.
Pulse quick, somewhat wiry. θAscites.
Pulse quick and very hard. θInflammation of labia.
Pulse hard, small and quick.
Pulse quick, strong, hard. θTyphus.
Pulse feels under fingers like shot gliding along. θBronchitis.
Radial pulse not synchronous with heart's systole. θOrganic disease of heart.
Accelerated pulse, which soon becomes irregular, intermittent and hard. θMeningitis infantum.
Small and rapid pulse θAscites.
Pulse small and trembling.
Pulse changes frequently in character. θScarlatina.
Irregular, slow pulse. θHydrocephalus.
Pulse unsteady, irregular, intermitting every third or fourth beat. θOrganic disease of heart.

Digitized by Google

‖Frequently changing, weak and intermitting pulse. ‖Typhus.
‖Pulse variable and intermitting. θMeningitis.
Pulse at times intermittent and imperceptible.
‖Pulse scarcely perceptible, surface of body cold. θAfter stings.
‖Pulse indistinct. θDropsy after scarlatina.
‖Anæmic aspect. θAcute Bright's disease.

[30] **Outer Chest.** ‖Sticking in r. side of chest at fifth rib, < moving arm or body, extending to upper part of xyphoid, somewhat impeding respiration. θRheumatism.
Stitches in l. side of chest.
Sudden attacks of acute pain just below heart, soon extending diagonally towards r. chest.
‖Dull aching pain in l. side of chest, near middle of sternum, several times during day, with sensation of fulness in chest and short breath.
‖‖Chest feels as if beaten or bruised.
Sensation of soreness; lame, bruised feeling, as if from recent injury, from being jammed, bruised or beaten.

[31] **Neck and Back.** Rheumatic stitches in r. side of neck.
Tensive pain from l. shoulder to back of neck.
‖‖Throbbing pain in nape to l. of shoulder, extending up over head; shoots to r. with motion of head towards same side.
‖Sense of stiffness in neck and back. θCerebro-spinal meningitis.
‖Pain with stiffness from neck down to between shoulders (oil). θCatarrh.
Stiffness in back of neck.
‖Subcutaneous swelling of neck. θDiphtheria.
‖Vascular goitre.
‖Glands of neck swollen. θErysipelas traumatica.
‖Several glands on neck swollen size of walnuts and stone hard (oil). θSpinal disease.
‖Broad belt of erysipelatous inflammation extending across back, from point of r. shoulder to upper part of l. arm.
Spinal meningitis attended with a sense of suffocation, as if they could never breathe again.
‖‖Pain in back, under scapulæ, < on moving.
Burning and heat, like prickly heat, on back.
‖Stiffness in back. θChronic rheumatism.
‖‖Exhausted, as after hard work, expecially in back.
Peculiar and great weakness of whole back on both sides of spinal column; she could not lie on back.
‖‖Weakness, especially in back, by fits, with vertigo.

Digitized by Google

‖On stroking with both thumbs down along each side of vertebræ, the most pain is felt in lumbar region (oil). θSpinal disease.

‖Lower posterior dorsal region, especially left, feels as if bruised.

‖Bearing down in small of back, as if menses would come on. θOvarian dropsy.

‖Could not sit on account of most violent pains in sacrum (oil). θSpinal disease.

‖Stiffness in small of back and sacral region.

‖Burning pressing in coccygeal region, < from any attempt to sit down; evening. θChronic rheumatism.

[32] **Upper Limbs.** ‖Violent rheumatism in r., later in l. shoulder.

Tensive pain in l. shoulder extends to nape.

Pain in r. shoulder and forearm with pressure upon chest.

‖Pain of a sticking character fixed itself in r. deltoid muscle, radiating to scapula and elbow joint by lifting and by motion. θChronic rheumatism.

Lame feeling in scapulæ.

Pressure under scapulæ, painful when moving.

‖Arm and shoulder swollen and sensitive to touch. θAbscess after vaccination.

‖Several very red spots with painful red streaks to axillary glands. θAbscess after vaccination.

‖Drawing pain in arms, beginning in shoulders and extending to ends of fingers.

‖Pain in arm increasing, darting, no longer able to raise r. arm to head. θChronic rheumatism.

‖Left arm as if gone to sleep.

Numbness and tingling in both arms; < in left.

‖Perfectly powerless, she could not take hold of anything, had to be fed and nursed (oil). θSpinal disease.

Right arm much swollen.

Red and white spots on arms.

‖Right arm red, hot, swollen, erysipelatous, with stinging burning pain. θRight mammary cancer.

‖Right arm swollen and bent in elbow joint, cannot be stretched, as tendons are shortened (oil). θSpinal disease.

‖Sticking pains in r. forearm, with a paralyzed feeling. θChronic rheumatism.

‖Wrist and finger joints swollen, stiff in r. hand, contracted to a fist, extension impossible; in l. hand other persons could stretch fingers, but they bent again immediately if let loose (oil). θSpinal disease.

‖On inner side of r. wrist a circular tetter, size of a dollar (oil). θCatarrh.

Google

Both hands turned inward (in pronation), thumbs flexed on palms; both hands cold (oil). θSpinal disease.
Arm paralyzed; arm and hand swollen, white as putty.
Pricking and smarting sensation in hands and arms, afterwards affecting entire body slightly.
Itching, burning and chapping of hands.
Burning and shooting in hands.
Bluish and cold hands. θDiarrhœa.
Hands and arms blue. θCholera infantum.
Hand swollen, slightly bluish-red; pressure makes white spots, which disappear slowly, and leave no indentation.
Redness, heat and swelling of hands.
Œdema of hands.
Marked redness of hands and wrists, also feet and ankles.
Sore and red spots in palms.
Sensation of numbness in fingers, especially tips, about roots of nails, which latter feel as if loose.
Vesicles between fingers, itching after much scratching, inclined to ulcerate. θPrairie itch.
A good deal of tumefaction on r. forefinger. θPanaritium.
Inflammation of fingers.
Throbbing pain occasionally extending from finger up to arm. θPanaritium.
Panaritium, with burning, stinging and throbbing; very sensitive to touch; especially in run-arounds, after abuse of *Sulphur*.
Pain violently stinging, burning; whole finger much swollen, red as fire; after a few hours pain became tensive, tearing, while swelling continually increased and extended to forearm; finger very tense, burning hot, very red and numb; gradually pain duller, with feeling in neighboring fingers as of foreign bodies covered with velvet; in first moments after sting and swelling of place, a feeling of prickling heat spread over whole arm up to armpit, gradually changed into a painful itching and biting, especially along course of vessels.
Dissecting wound on hand.

[33] **Lower Limbs.** Sore pain about l. hip joint; later weakness, unsteadiness, trembling in joint.
Feeling of numbness and obtusion in r. iliac fossa, extending to hip, almost to short ribs, down whole r. thigh, > by lying upon it. θOvaritis.
Relaxation in hip joints.
Inflammation of hip joint.
At first only dull, gradually shooting and boring pain from middle of Poupart's ligament, extending along inner side of thigh down to lower leg and into toes.
Thrombosis.

Digitized by Google

Complaints predominate on inner side of thigh.
‖Drawing through thighs to end of toes.
▮Burning pains in both lower limbs, from thigh to ankles, could not move feet. θChronic rheumatism.
▮Pain in l. lower limbs all the time increasing, most stitching, burning, shooting. θThrombosis.
▮Burning pains in both lower limbs, from thighs to ankles, could not move feet. θRheumatism.
‖Bruised feeling in flesh of lower limbs.
▮Limb immovable, covered with reddish and bluish streaks and spots; hard, elastic, hot, exceedingly painful, especially along crural vessels and nerves. θThrombosis.
▮Left lower limb, in evening, after unusual muscular exertion, as heavy as lead. θThrombosis.
▮Both lower limbs emaciated, most r.; could not be moved, had to remain where they had been laid, for several days; both very cold to touch (oil). θSpinal disease.
▮The whole l. lower extremity numb and heavy as lead. θThrombosis.
‖In morning feet heavy, stiff, full so that it pains, swollen.
Cold legs.
Coldness and deadness of extremities, < in cold weather.
▮Feet and legs up to middle of thighs always cold as ice, without sweat; even when he walked in Summer he did not perspire. θStaphyloma.
▮Whitish clear appearance of broken limb. θPhlegmone.
▮▮Legs and feet waxy, pale and œdematous. θDropsy.
▮Swelling of limb of a whitish, transparent look. θPhlegmon.
▮Œdematous swelling of feet, ankles and legs. θAscites. θAmenorrhœa.
▮Legs œdematous. θAlbuminuria. θDuring pregnancy. θAmenorrhœa. θPuerperal convulsions. θInfantile marasmus. θScirrhus mammæ.
▮Dropsy of limbs. θAngina pectoris.
▮Left lower limb monstrously swollen; stretched out.
▮Œdema of feet and legs in a man affected with chronic rheumatism and partial paralysis so that he could not move about.
▮Violent pain in l. knee, more outside and to the front. θSynovitis.
‖Pains about knee, swelling, burning and shooting.
Complaints predominant in hollow of knee.
▮Swelling from metatarsus up to knee, very painful. θAfter hemorrhage from uterus.

Digitized by Google

Joints of knee, feet and big toes swollen, painful when pressed or lifted (oil). θSpinal disease.
Left knee badly sprained by being thrown from a horse.
Acute synovitis of knee.
Swelling of knee.
Swelling of l. leg from metatarsus to knee and accompanied by great tenderness; some of lymphatics near hip also affected, feeling like hard cords under skin and being extremely tender. θFibrous tumor of uterus, repeated and violent hemorrhages.
Numbness of limbs.
Numbness of lower limb same side on which ovary is affected. θOvarian dropsy.
Lower limbs feel paralyzed.
On both lower limbs dirty blue spots, remnants from suppurations caused by blisters (oil). θSpinal disease.
Tetterlike eruption on both legs; terrible itching as soon as crusts have formed; eruption oozes a sickly moisture.
Eczema of legs.
Eruption came out plentifully on calves. θParalysis.
Phlegmasia alba dolens.
Shooting in l. outer ankle.
Ankles and feet very œdematous and clumsy. θAscites.
Boring from thighs to ankles; could not move feet. θRheumatism.
Pain in feet. θAcute Bright's disease.
Podagra.
Burning of feet and toes.
Suppressed foot sweat.
Foot sweat checked by cold. θStaphyloma.
Swelling of feet and ankles of transparent whiteness.
Swelling of feet and ankles. θHydrothorax.
Swelling of l. foot over instep to such a degree that he could not put on his boot.
At night, on removing boots, feet swollen, heavy and stiff.
Large painful swelling of foot.
Swollen feet. θAscites.
Swollen feet and scanty urine during apyrexia. θIntermittent.
Painful turning up of big toe. θTubercular meningitis.
Painful turning inward of big toes, extorting cries from child. θMeningitis infantum.
Shooting in toes.
Burning in toes, with redness; feet cold. θErysipelas.
Sensation in toes and feet, as if too large, swollen and stiff; also at night on removing boots.

Digitized by Google

Drawing through thighs to tip of toes; the latter feel numb.
‖Nails as if loose.
▮Pain in limbs, with fever. θCatarrh of chest.
‖Burning of hands and feet.
▮Heavy in all limbs, every motion causes pain. θTyphus.
▮Great soreness of all limbs and joints. θIntermittent, apyrexia.
Trembling of hands and feet.
▮Trembling of limbs. θMeningitis infantum. θScarlatina.
▮Occasional twitching of limbs on one side of body, and apparent paralysis of that of the other side. θMeningitis infantum.
Limbs cold, numb and bluish.
▮Limbs numb and cold. θDiphtheria.
▮Rheumatic lameness of limbs, and effusion in joints, with affections of spinal marrow (oil). θSpinal disease.
▮Numbness of feet and hands, even paralysis. θDiphtheria.
General paralytic feeling, especially in limbs.
Cold limbs; blood settled under finger and toe nails.
Phlegmasia alba dolens.
‖Bright red swelling, with red stripes along limbs.
▮Œdema of limbs. θAlbuminuria.
▮Dropsy of limbs. θOrganic disease of heart.

[36] **Rest. Position. Motion.** Motion: headaches <; pain in eyes <; in diarrhœa, followed by stool; pain under scapulæ; dull pain in abdomen <; causes stool.
Exertion increases vertigo and prostration; shortness of breath.
▮Dull pains in region of tumors, most on commencing to walk and on stooping. θSwollen ovaries.
Stooping: increases headache; renal pains; pains in ovarian tumors.
Rising after sitting: pain in head <; bruised pain in back and limbs <.
Bending backward or forward: suffocation in ascites <.
▮Obliged to bend forward in contractive pain in hypochondria. θOvaritis.
Bending head backward relieves headaches.
Bores head back into pillow in hydrocephalus.
Must hold head and eyes down in chronic headaches.
Ascending increases oppressed breathing in ascites.
Raising arms increases tightness in ovarian region.
Moves r. arm now and then in tubercular meningitis.
On removing boots, feet feel swollen and stiff.
Lying: vertigo, extreme; nausea in hydrocephalus; pain violent in belly; breathing <; cough <.

Digitized by Google

Lying on back: puffed, flushed face, difficult breathing.
‖Lying on l. side: difficult breathing in ascites; cough worse.
‖Recumbent posture aggravates many of the sufferings, which are > when sitting.
Lying: on r. side; pain in ovaries <.
Must lie down from weakness.
Sitting: vertigo <; shortness of breath in ascites >.
▮Sitting in bed, head on hands, elbows on knee, cannot lie down, cough forces him up (oil). θCatarrh.
▮Obliged to remain in his chair nearly all night. θAscites.
Attempting to sit down: pain in coccygeal region <.
Inclined to sit quiet with sickly feeling in abdomen.
Standing: causes more pain in ovarian tumor; vertigo.
Relief in no position in heart disease
▮Least movement, even that of hands, < pains in lower limbs. θChronic rheumatism.
Chewing: pains in ears.
Moving head to r. side: rheumatic stitches in neck <.
‖Walking and movement in general ameliorate many of the worst sufferings and attacks.
▮Walks with inconvenience. θAscites.
Going up and down-stairs quickly: difficulty of breathing with swelling of abdomen.
▮After unusual walking and climbing up-stairs. θThrombosis.
Walking: soreness of l. ovary <; pains in abdomen.
▮Dyspnœa, especially after exercise. θChest complaint.
▮After overexertions dropsical symptoms returned.
▮After carrying a child during sleepless nights. θRheumatism of arm.
▮Very stiff, could with difficulty stoop and rise up again on account of great hardness and swelling of legs. θDropsy.
▮Lies like a skeleton in bed, and on back (oil). θSpinal disease.
▮Lies all the time on her back. θTyphus.
‖He must lie down flat on ground.
▮Unable to lie down without panting. θDropsy.
▮Inability to lie in a horizontal position. θHydrothorax.
▮Unable to lie down. θOrganic disease of heart.
▮She could not lie down. θDropsy after scarlatina.
▮Had not been able to lie down for months for fear of suffocating. θAnasarca.

[36] **Nerves.** ▮Nervous irritability; restless, agitated. θHydrocephalus. θDiphtheria. θScarlatina.
‖Irritability and uneasiness.
Nervous excitability. θApyrexia in intermittent.

Digitized by Google

‖Hysteria.
Nervous erethism.
Nervous restlessness at night, cannot remain in one place.
Restless, with cutaneous diseases.
‖Great restlessness and uneasiness. θScarlatina.
‖Great uneasiness and yawning. θIntermittent.
‖Trembling and jerking of limbs. θHydrocephalus. θTyphus.
‖Trembling, with lassitude.
‖Weakness, with trembling.
A single involuntary jerk frequently repeated.
‖Sudden jerks through joints and other parts.
‖One-half of body twitching, the other lame. θTubercular meningitis. θHydrocephalus.
‖Sudden convulsions, followed by general fever. θMeningitis infantum.
‖Convulsions. θHydrocephalus. θScarlatina. θTubercular meningitis.
Eclampsia, with inflammatory affection of brain.
‖Hysteric convulsions.
‖Faint, pale and cold, with vomiting and diarrhœa.
‖Faint, uneasy, restless, yawning. θUterine hemorrhage.
Sudden weakness, compelling him to lie down; he loses all recollection.
Frequent loss of all strength, with a trembling sensation.
‖Very weak, must lie down.
‖Great weakness of all limbs. θTrichinosa.
‖So weak that she could only with difficulty stand on her feet. θOvarian dropsy.
‖Greatest weakness on sliding down in bed. θTyphus.
‖Weak and pale. θScarlatina. θAscites.
‖Amazing weariness.
Tired, as if bruised in every limb.
Weariness, with debility in Spring, after least effort, with paroxysm of vertigo, paleness and chilliness.
Great debility as if he had worked hard; he is obliged to lie down.
‖Great debility from the beginning. θDiphtheria.
‖Great debility. θChronic dysentery. θIntermittent, apyrexia. θAscites.
General feeling of lassitude and depression.
‖Lassitude; indisposition to mental or physical exertion. θBilious diarrhœa.
‖Languid, listless, unaccountable feeling. θDiarrhœa.
‖General feeling of lassitude, with trembling.
‖Greatest lassitude and languor. θIncipient hydrocephalus.
‖Great prostration. θPeritonitis. Eruptive diseases.

Digitized by Google

Prostration: peculiar; as from within; great, for several days; general, particularly in cold weather; sudden, with coldness.

‖Tendency to chilliness, and a quite peculiar prostration of vital force of nerve centres. θChest complaints.

‖Prostration and lassitude. θDropsy.

Great exhaustion, after all symptoms pass away.

Fell down and declared he was dying. θAfter stings.

‖Anticipation of sudden death. θPeritonitis.

Paralysis generally one-sided, often painful.

After excessive grief the whole r. side paralyzed.

‖White puffy swelling of paralyzed arm and hand.

‖Whole nervous system under a paralyzing influence. θScarlatina.

Sudden, right-sided paralysis.

‖Partial paralysis of r. side, with numbness. θCancer of breast.

‖Left side motionless; now and then moves r. arm and leg. θTubercular meningitis. θHydrocephalus.

℣ **Sleep.** ‖Yawning.

‖Yawning and great uneasiness. θUterine hemorrhage.

‖Yawning and great desire to sleep.

‖Sleepiness more after meals.

Great inclination to sleep; still he walks a tenth of a German mile.

‖Inclined to sleep. θAcute Bright's disease. θIncipient hydrocephalus. θKeratitis. θIntermittent, etc.

‖‖Great inclination to sleep, but inability to do so from great nervous restlessness.

‖In daytime always sleepy, in a dull, stupid state; at night talking in her sleep, which was full of dreams; towards morning sleep so profound that she had to be shaken to awake her. θSopor.

‖Great desire to sleep, he felt extremely drowsy.

‖Very sleepy early in evening.

Sleepiness, prostration and vomiting of bile.

‖Continuous deep sleep. θHot stage of intermittent fever.

Somnolence.

Sopor, with eruptive diseases.

‖Stupor; when shaken, looking about strangely. θTyphus.

‖Lies flat down in a stupor; even shaking does not bring him to consciousness. θTyphus.

Sleepless, mostly latter part of night.

‖Restless sleep; child restless, fretful, sleepless, hot. θAbscess after vaccination.

‖Cough prevents sleep. θTyphus.

‖Restless nights. θHydrocephalus. θBilious diarrhœa.

Digitized by Google

Restless, sleepless. θErysipelas. θOvarian tumor.
Tension in face, shooting in skin, burning pain under l. ribs, or other ailments prevent sleep.
Frequent waking.
Disturbed sleep. θScarlatina.
Wakefulness. θHydrocephalus. θIntermittent.
Sleeplessness, with eruptive diseases.
No sleep for days.
Restless sleep and incessant dreaming.
Night sleep full of dreams; mostly of traveling.
Sleep restless, frequent waking, incoherent dreaming.
Anxious dreams.
Sleep disturbed by oppressed respiration and disagreeable dreams.
Disturbed sleep at night; dreams. θGastro-enteritis.
Dreams: of journeying; of flying; walking on a hot floor; of assembled people; full of care and trouble.
Sleep disturbed by oppression of breathing; by incoherent muttering.
Sleep disturbed at night by muttering and dreams. θGastro-enteritis.
Disturbed sleep, with muttering and incoherent talking. θBronchitis.
Nights restless, without sleep, constantly delirious. θTyphus.
At night talking in sleep, dreamy state. θIncipient hydrocephalus.
Starting out of sleep.
Anxious starting in sleep. θWith cough.
Suddenly starts from sleep with great anxiety and agitation.
All night delirious, furibund. θTyphus.
Trembling, convulsive starting during sleep, as if in affright.
Frequent waking at night with violent screams.
Awakens from sleep with a shrill shriek. θMeningitis infantum.
Screaming in sleep; "cri encephalique."
Sopor while lying in bed interrupted by sudden cries. θMeningitis infantum.
The child is restless, screams out in sleep. θConstipation of sucklings.
Agitation latter part of night. θIncipient hydrocephalus.
Short sleep.
Long morning sleep.
Sleep in morning profound, cannot be waked without being taken out of bed, shaken and forced about for a time; girl, æt. 8. θIncipient hydrocephalus.

Digitized by Google

‖ Wakes from sleep in morning weary and unrefreshed.

[86] **Time.** Night: nursing child refuses milk, not so in daytime; squinting, trembling of eyeball; stitches in and around eye; difficult breathing in laryngitis; cough; strangling; feet swollen and stiff; restless, dreaming; sleepless in erysipelas, can see better than in daytime; irritation of urinary organs <; frequent urination.

‖ Nocturnal sufferings, besides those dependent on sleep, are most in eye and chest.

9 P.M. to 4 A.M.: incessant cough.

Latter part of night: sleepless.

Towards night: increase of weariness, copious nosebleed, rigor, headache, mucus in mouth, bellyache, urging to stool and heartburn.

‖ Always < towards morning. θ Dropsy.

5 A.M.: heat and fever followed by shaking chill.

Morning: aching at umbilicus; diarrhœa <; hoarseness; sleeps till late; dry coryza, bellyache with call to stool.

‖ In morning less disturbed; weakened consciousness. θ Typhus.

Day: stupid state in tubercular meningitis; vomiting.

Day and night: must urinate every half hour.

3 to 4 P.M.: chill.

4 P.M.: sudden coryza.

‖‖ Afternoon: fever, intermittent.

Evening: tip of nose cold, with chilliness; pain in coccygeal region <; chill <; fluent coryza; very sleepy.

‖ Evening; suffering and vertigo, headache, pain in eyes, toothache, bellyache; hoarseness, but most cough, shivering and heat.

Before midnight: cough awakens.

‖ Before going to bed in evening a hard shivering fit θ Chronic rheumatism.

Spring: spells of vertigo.

Fall: hives <.

[89] **Temperature and Weather.** Heat of stove increases chill.

Warm room: headaches <; breathing in laryngitis and ascites <; chill <.

‖ Heated room intolerable.

Warmth of bed: rash with itching <; breathing in laryngitis <.

In-doors: sweat is increased.

Open air, out-of-doors: relieves headache; difficult respiration; rash with itching.

Inclination for open air.

‖ Shunning cold air.

Uncovering relieves heat.

Digitized by Google

Cold water relieves eyelids (applied locally).
Worse getting wet through, but better from washing or moistening part in cold water.
‖Cold water relieves pains, swelling and burning.
Cold water, desire for washing face.
Cold weather: increases asthma; cough; pain in chest; rash with itching; prostration.
Changing weather increases rash with itching.
Spring: spells of vertigo; prostration.
North wind: takes cold.

[40] **Fever.** Disposed to chilliness.
▮Chilliness. θAcute Bright's disease.
Felt very cold, but was not cold to touch.
Chill on suffering part.
Chill increased by motion.
▮Chill, 3 to 4 P.M., < in warm room or near stove; begins in front of chest; thirst during chill, burning and oppression of chest as if he would smother. θIntermittent.
Chill, mostly towards evening, 3 to 4 P.M.
Chill increased in warm room.
▮Evening before going to bed a hard shivering fit. θRheumatism.
Always thirst during chill.
‖Shivering on slightest movement when sitting in evening, with headache, heat of face, hot hands.
Chilly every P.M. at 3 o'clock; she shudders, < in warmth; chills run down back; hands feel as if dead; feverishly hot after about an hour, with a hoarse cough; heat of cheeks and hands, without thirst; ceases gradually, but she feels heavy and prostrate.
▮Shivering followed by heat. θTonsillitis.
Slight rigors followed by flushes of heat over entire body, with headache, weariness in back and legs.
Severe chill, evening, following an operation lasting three hours; followed by high fever with great vascular excitement; the wound erysipelatous. θErysipelas traumatica.
▮A shaking chill followed by great heat, during which whole lower limb swelled more and more, and pains in it became insupportable. θThrombosis.
Pungent heat of body while feet and hands are cold.
▮Hot head, cold feet. θOphthalmia.
‖After heat, rigor with an eruption of nettlerash.
▮With general heat, feeling of chilliness in feet and legs up to knee. θTyphus.
Increasing heat and fever for thirty-six hours, followed by severe shaking chill, 5 A.M.

Digitized by Google

‖Skin burning hot all over, or gradually grows cool in some places, hot in others.
Heat in some parts, coldness in others.
‖Febrile excitement. θHeart disease.
Flushes of heat over whole surface of body.
‖Great fever heat. θHydrocephalus.
‖High fever. θPhlegmasia.
‖Fever rises continually. θScarlatina.
‖Burning heat of skin with a stinging sensation. θOvarian dropsy.
‖Dry burning skin. θTyphus.
‖Little febrile excitement or other constitutional symptoms, only in a few instances considerable. θErysipelas.
Burning heat all over.
‖Dry skin, no sweat. θMania.
Dry heat towards evening, with sleepiness.
‖Feverish heat during night, other times pale. θChronic diarrhœa.
‖Heat most about chest, belly and hands. θIntermittent.
‖Heat most in chest, pit of stomach, bowels, female organs and hands, with muttering and unconsciousness. θIntermittent.
‖‖Hot feeling all over body, especially on chest and in region of stomach.
‖During heat: delirium, muttering unconsciousness; diarrhœa; short-breathed; drowsy or sleepless.
‖‖During hot stage more or less violent headache, generally a continuous deep sleep. θIntermittent.
‖‖Got hot all over, red in face as if he had scarlet fever, with an eruption like measles (after overdoses). θChronic diarrhœa.
‖Most violent fever, with a puffed, darkened face, eyes shooting, shining, with a wild, obstinate expression and unbearable headache. θTyphus.
Thirst wanting during sweat; may or may not be present during heat.
Fever without thirst.
Heat, with (or without) thirst and inclination to uncover.
‖Fever constantly rising; dry hot skin. θScarlatina.
‖Violent fever, with dry skin, full pulse. θBronchitis.
‖High fever, full pulse. θIncipient hydrocephalus.
Fever, with rapid, hard pulse; exacerbation during evening.
‖Heat, inclined to uncover, which is agreeable; rapid, hard pulse; after fever spell, sleep.
Heavy and prostrate in fever.
‖Whole surface glowing, hot, skin dry, brittle. θTyphus.
‖Heat, redness and extreme soreness. θErysipelas.

Digitized by Google

‖‖Heat, with redness of skin; in evening and night; with excitement, headache, accompanying diarrhœa, swellings, coughs.

Dry hot skin, or alternate dry and moist skin.

‖Skin hot, moist. θDiphtheria. θCatarrh of chest.

‖High fever, moist skin. θDiphtheria.

‖‖Sweat alternating with dryness of skin.

‖Alternate moisture and dryness of skin. θIntermittent.

‖Dryness of skin, very little sweat. θIntermittent.

‖‖Sweating stage either absent or of a very light grade. θIntermittent.

‖Sweats easily.

‖Cold sweat. θDropsy after scarlatina.

‖General warm sweat during recovery from effects of an indescribably bad odor, causing physician a dull ache in forehead lasting several hours, until *Apis*[6] removed it. θTyphus.

‖Partial clammy sweats. θTyphus.

Profuse sweat relieves rheumatism.

Thirst wanting during sweat; may or may not be present during heat; always thirst during chill.

‖Sweat after trembling and fainting, then nettlerash.

Better after sweating; sweat increased in-doors.

‖Headache and sleeplessness; skin warm; profuse sweat on the fourth day and relief. θRheumatism.

‖Chills and fever in seasons when flies sting with unusual vigor.

‖Low, muttering delirium; sometimes a happy expression; apathy; stupor; cannot put tongue out; tongue trembles, catches in teeth, or is cracked, sore and covered with blisters; abdomen sore, bloated, stool frequent, painful, foul, bloody, often involuntary. θTyphus.

‖‖Typhoid forms of fever, especially enteric, cerebral, exanthematic forms; febris nervosa putrida.

Typhoid character of fever in scarlatina.

‖‖Intermittent. A very important antipyretic (in one of the most malarial countries) given according to Wolf in the third centesimal, but for two years the one hundredth centesimal potency; they have seen results, such as they had not for many years witnessed from any other homœopathic remedy against intermittent fever, at least as regards the rapidity of the result. (Drs. Stern and Miskolez.)

‖Tertian intermittent.

‖‖Since a year, sixty-five intermittent cases of various age and sex; nineteen among these had been suppressed by large doses of quinine, etc. No relapse.

‖Apyrexia: pain under short ribs, left side; feet swollen; urine scanty; limbs and joints sore; restless; urticaria.

Digitized by Google

41 **Attacks, Periodicity.** Periodically: sick headache; erysipelas; pains in ovary; pains in diphtheria.
Suddenly: hydrocephalus after erysipelatous eruptions; coryza; pain along ureters.
!Sharp sudden paroxysms of pain in belly. θPeritonitis.
Gradually: cold and hot places on skin.
Increasing more and more: stinging, burning in ovary.
Increasing for thirty-six hours: heat and fever.
Every half hour: must urinate.
For several hours: aching in l. eyeball.
Every few minutes: repeated urination.
Every 3 P.M.: chill.
Every morning: hawking.
Every day: six or eight diarrhœic discharges.
At same hour morning or forenoon: diarrhœa.
For three or four weeks: diarrhœa in morning.
In eight or ten days: one stool.
!Every evening: erysipelas in face.
Every fifteen or twenty minutes: pain in r. ovary; swelling of labium pudendi.
Lasts a day or two: catamenia, with ovarian tumor.
Alternately: dry and moist skin.
!Pains suddenly migrate from one part and extend to another.
!Distress in paroxysms lasting half an hour or more, generally taking place in morning. θOrganic disease of heart.
Once or twice a week: burning in head and neck.

42 **Location and Direction.** Right side: headache <; pain in eyeball; shooting over and down into eyeball; eye closed in paralysis; staphylomatous projection of eye; ulcer on edge of cornea; sudden inflammation of eye; sensation in ribs as if "gone to sleep;" pain in side of abdomen; hard swelling in groin; swelled testicle; ovarian tumor; dropsy of ovary; rheumatic stitches in neck; arm erysipelatous; paralysis.
!The right eye from the beginning more affected (oil). θPannus.
Left side: neuralgia in head; drawing over half of head; pain in eyeball; swelling around eye; pupil drawn to outer side; inflammation of eye; both lids inflamed; itching in inner angle of eye; pain in ear; redness and puffiness of cheek; pain in malar bone and upper molar teeth; sore throat; pain in hypochondrium; swelling about kidney; pain over iliac crest; pain in pectoral region, with enlargement of r. ovary; aching stitches in chest; tension in shoulder; bruised sensation in dorsal region; swelling of leg; hip joint inflamed; knee, synovitis; side motionless; pain under short ribs.

Digitized by Google

‖The l. eye being the last attacked improved first (oil). θPannus.

Both sides: burning under short ribs; weakness along spine; tetter on legs; one half twitching, the other half lame.

Right to l.: erysipelas of face; erysipelas across back; rheumatism in shoulders.

Left to r.: ophthalmia; pain in ovarian region.

Descending: pains in ovary; drawing through thighs to toes; chill down back.

Descending, then ascending: pains in male sexual organs.

Descending and sideways: sensation as of cords pulling from suprasternal fossa.

Ascending: pains in l. hypochondrium.

Diagonally: sudden acute pain from below heart to r. chest.

45 **Sensations.** Sensation as if head was too large; as of a small foreign body in eye; as if eyes had sand in them; running as of an insect over cheek; wooden feeling in tongue; as of a fish bone in throat; as if something tight would break in abdomen when making an effort at stool; as if bowels were squeezed to pieces; as of cords pulling from suprasternal fossa downward and sideways; as if something was breaking away about heart; trachea as if stopped up; nails feel loose; chest as if raw; as if each breath was the last; l. arm as if gone to sleep; screams as from stabbing pains; as if he should not be able to breathe again; vertigo as if she should fall; as if brain had gone to sleep; as if a bee had stung her temple; as if a skin had been drawn over eyes; as if several styes would form; as if there was mucus in eyes; as if lips would chap; as if in an apoplectic fit; as if lips had a contusion; tongue as if varnished; tongue as if scalded; palate as if filled with water; throat as if raw; throat as if covered with wine-dregs; as if throat was narrowing; under ribs as if gone to sleep; as if intestines were bruised; as if she was inflated; as if anus was constantly open; anus as if stuffed full; urethra as if scalded; ovarian region as if sprained; feeling in neighboring fingers as of foreign bodies covered with velvet; toes and feet as if too large; tired as if bruised in every limb; oppression of chest as if he would smother; hands as if dead; as if his vitals were melting; itching as if from gnats.

Pain: from gums into head; in head and eyeballs; through orbits; around eyes; in forehead; in temples; in occiput; in lips, to gums and head; in ears; in

Digitized by Google

stomach and abdomen; in l. hypochonder to chest; in kidneys; along ureters; in bladder; in testicles; in ovaries; in spleen during catamenia; in chest and head from cough; just below heart; under scapulæ; in sacrum; in l. knee; in feet; in limbs, with fever; in shoulder or forearm.

Acute pain: in eyeballs; below heart.

Sharp pains: in chest.

Violent pain: in temples; in forehead; in r. eye; in l. ear; in lips; in region of stomach and abdomen; in vesical region; in sacrum; in l. knee.

Great pain: in occiput.

Cutting: burning in eyes; in abdomen; along ureters; in ovaries; in abdominal walls.

Lancinating: through eyes; in ovaries.

Darting: through eyes; in chest.

Thrusting pains: in region of uterus.

Plunging stabbing: in uterus.

Stabbing: in head; in uterus.

Stitches: in temples; across forehead; in eyes; in throat; through lungs and sides of chest; in urethra; through hips; rheumatic stitches in r. side of neck; in lower limbs.

Stitching: in temples; in urethra.

Sticking pain: in r. side of chest; in r. deltoid muscle; in r. forearm.

Pricking: in scalp; in eyes; in face; in lips; in tongue; in fauces; in throat; in stomach; in arms and hands.

Stinging: in forehead; in l. temple; in eyes; in eyeball; in l. eye; in lids; eruption on nose; in ears; in face; in l. malar bone; in teeth; in lips; in tongue; in tonsils; in throat; in abdomen; in rectum; in anus; in hemorrhoids; in testicles; in urethra; in chancre; in ovaries; in uterus; in mammæ; in chest; in panaritium; of hives; in fingers; of skin.

Shooting: in temples; in scalp; in eyes; over r. eye into ball; of ears; in face; in tongue; from throat to ears; in ovaries; in hands; from Poupart's ligament down leg; in lower limbs; in knee; in l. outer ankle; along ureters to kidneys; in toes; in skin.

Boring: in eyes; from thighs to ankles; over l. iliac crest; from Poupart's ligament down leg.

Piercing pain: in eyes; in lids; in face.

Griping: in bowels.

Burning: in head; in scalp; in back of head and neck; in eyes; in lids; of ears; of lips; in nostrils; eruption on nose; of face; of cheeks; of chin; in tongue; in throat; in epigastrium; in pit of stomach; under ribs;

in abdomen; in anus and rectum; in testicles; in urethra; in chancre; in ovaries; in mammæ; in larynx; in chest; on back; in coccygeal region; in hands; in panaritium; in lower limbs; in knee; of feet and toes; in mucous membranes; in skin; of hives; in stomach.

Scalded feeling; on tongue; in mouth and throat; in urethra.

Smarting: in eyeballs; of lids; in tonsils; in throat; at anus; in arms and hands; in urethra.

Sore pain: in several teeth; about l. hip joint.

Soreness: of canthi; of eyes; of nose; in teeth; in throat and fauces; in pit of stomach; under ribs; in stomach; in abdomen; in ovarian region; in suprasternal fossa and above clavicles; of chest with cough; under upper part of sternum; about l. hip joint; of bowels; of limbs and joints.

Bruised feeling: under ribs; in intestines; in lower part of back; in limbs.

Drawing: from neck over l. half of head; in scalp; in ovaries; in pharynx; in arms, from shoulders to fingers; through thigh to toes.

Tensive pain: over and in eyes; in scalp; in face; from l. shoulder to back of neck; in l. shoulder.

Sharp, crampy pain: in stomach and abdomen.

Stretching pain: in nape of neck to shoulder and head.

Tearing pain: in eyes.

Pressing: in head; in forehead and temples; in occiput; in eyes; in lower part of eyeball; in sinciput; in fauces and throat; in pit of stomach; in stomach; in abdomen; in hypogastrium, with bearing down; at os uteri; in chest; in coccygeal region; upon chest; under scapulæ.

Aching: through head; in forehead; in eyes; pressure in l. eyeball; in stomach; at umbilicus; in hypogastrium; in loins; in l. breast; dull aching in chest.

Disagreeable pain: in forehead.

Strained pain: in l. ovarian region.

Bearing down: in uterus; in bladder; in small of back; in ovarian region; in region of sphincter.

Scraping: in larynx and trachea.

Rawness: in throat; in anus.

Throbbing: in forehead; in head; in eyes; in molars; in tonsils; in throat; over l. iliac crest; in rectum; from finger to arm; in panaritium; in nape to l. shoulder.

Twitching: in molars; of l. eyeball; of eyelid.

Jerking: headache; of eyelids; in molars.

Digitized by Google

Jumping pain; in l. upper molars.
Neuralgic pain: in l. temple; in lips; in gums; in tongue; in stomach; in groins.
Rheumatic pain: in eyes.
Constriction: in throat; in thorax; of urethra.
Contractive feeling: in hypochondria; in abdomen.
Roughness: of lips; in pharynx.
Anxious feeling: in head.
Uneasiness: in spermatic cords.
Quivering: of l. eyeball.
Twitching: of eyeballs; of lids.
Trembling: of eyeball; in l. hip joint; of hands and feet.
Sensitiveness: of scalp; of pharynx; of pit of stomach.
Fulness: in head; in forehead; in vertex; in occiput; in eyes; in anus; in thorax; in face; in abdomen; in chest.
Heaviness: over eyes; in vertex; in occiput; of eyes and lids; in abdomen; in ovarian region; in uterine region; in l. leg, like lead; in feet.
Weight: in forepart of head; in ovarian region; in uterine region.
Pressure: in occiput in eyes.
Tension: about ears; in lips; over hypochondria; in face.
Tightness: in ovarian region.
Stiff feeling: in eyelids; in face, with puffiness; in lips; in neck and back; between shoulders; in sacrum; in feet; in muscles.
Lame feeling: in scapulæ; paralyzed feeling in r. forearm.
Formication: in face.
Prickling: in scalp; in face; in lips; in tongue; on back; palms; forehead.
Tingling: in brain; in arms.
"Gone to sleep" feeling: in brain; in l. arm; under r. ribs.
Dryness: of tongue; in throat.
Numbness: in gums; in r. side of abdomen; in side and limb; in arms; of fingers; in r. iliac fossa, extending up and down; of l. leg; of lower limbs; of r. side of abdomen.
Electric shock: in rectum.
Tickling: in throat pit.
Itching: in scalp; in swellings on head and neck; in eyes; around eyes; in lids; of nose; eruption on nose; in throat; in anus; of scrotum; of hands; of vesicles between fingers; of tetter on legs; of hives; in urethra; all over body.
Stinging itching: in internal canthi.
Piercing itching: around eyes; in brows and lids.

Digitized by Google

Weakness: in larynx; in back; in hip joint; of all limbs; must lie down.

Heat: in head; in face; in throat; in chest; on back; pit of stomach; bowels; female organs; in hands.

Coldness: tip of nose; of face; in chest; in middle of sternum; of hands; of legs and feet.

"**Tissues.** Affections of circulatory apparatus and fluid, dropsies, phlebitis, varicose veins, ecchymosed spots, gangrene, unhealthy suppuration.

‖Hemorrhages dark; blood incoagulable or coagulates slowly.

Blood taken from veins is black, viscous, does not coagulate.

‖Phlebitis.

‖Varicose veins; burning, stinging.

‖Hyperæmic condition of liver, lungs and kidneys. θOrganic disease of heart.

‖Ecchymosed spots. θFevers.

‖Skin dry, with a general anæmic appearance.

‖A thick, very sensitive string from middle of bend of thighs all along inner side of thighs. θThrombosis.

Bodies of the poisoned decompose rapidly.

‖Blood poisoning by virus of scarlatina.

Glands enlarged, inflamed.

Painful swelling of glands.

‖Lymphatic vessels affected, felt like hard cords under skin, and were very painful. θAfter hemorrhage from uterus.

‖‖Serous membranes inflamed; effusions in serous membranes; synovitis.

Acts specifically upon serous membranes.

Serous membranes inflamed, painful, hot, burning, sore.

Serous membranes, muscular tissues, especially in region of diaphragm, a peculiar sensation of heat and like after a violent run when sitting down, "as if his vitals were melting."

‖Tumors.

‖Indurations; scirrhus, or open cancers, with stinging, burning pains.

‖Unhealthy suppuration of ligatures. θTraumatic erysipelas.

Suppuration rare; parenchyma seldom involved; sometimes dark, thick, fetid pus from ulcers.

‖Centre of erysipelas burst, discharging a great deal of pus. θAbscess after vaccination.

Gangrene.

‖Mortified cellular tissue in opening of vaccinal scab, easily extracted at each daily dressing. θAbscess after vaccination.

Digitized by Google

Mucous membranes inflamed and catarrhal.
‖‖Irritation of mucous membranes.
Mucous membranes red, with burning, fulness, dryness; erysipelas (as in throat, etc.).
‖Periosteum inflamed; red about joints. θSynovitis.
‖Pains felt mostly in joints and ligamentous tissue or in attachment of muscles.
Hydrops articuli.
Muscles stiff, tender on pressure, somewhat swollen; rigid; rheumatic inflammation.
‖Rheumatism and gout.
‖Gout; ‖‖gouty nodes.
Skin and muscles rigid.
‖‖Redness and swelling, with stinging and burning pain in eyes, eyelids, face, lips, tongue, throat, anus, ears.
‖Redness of dermoid tissue, with pains of a burning or stinging character.
‖‖Burning and shooting in flat swellings, with redness or whiteness, or both.
Œdematous and erysipelatous swellings.
‖Sharp pain and an erysipelatous swelling very hard and white in middle.
‖Diffuse inflammation of cellular tissues, ending in their destruction.
Furuncular diathesis.
‖Carbuncles.
‖Rapid considerable swelling.
‖Swelling over entire side, closing r. eye. θParalysis.
Swelling of diseased parts.
‖Hands, arms and face swollen. θDropsy.
‖‖Watery swelling in body, in limbs, hands and feet.
‖Swollen throughout body, from face to feet; urine highly charged with albumen. θScarlatina.
‖Swelling of whole body.
‖‖Œdematous swellings.
‖Œdema of lips and upper eyelids.
‖Œdema of face or larynx, with bloody urine, without increased thirst.
‖Œdematous swelling of face and hands. θSequelæ of scarlatina.
‖Œdema of different parts of body. θProlapsus uteri.
Œdematous swelling of skin.
‖Œdematous form of erysipelas.
‖General œdema. θAcute Bright's disease.
‖‖Œdema, or dropsy without thirst.
‖Anasarca: swelled from crown of head to soles of feet; several fissures on legs.
‖Whole body anasarcous. θAfter scarlatina.

Digitized by Google

❙Renal anasarca following scarlatina; albumen in urine; waxy appearance of skin. θOvarian dropsy.
❙General anasarca. θAmenorrhœa. θAscites.
❙❙Dropsical effusions.
❙Dropsical swelling of chest, abdomen, legs and feet, unable to lie down without panting. θAscites.
❙❙Dropsical affections, especially œdema and ascites, with albuminuria.
❙Dropsical swelling of chest, abdomen, feet and legs. θAfter influenza.
❙❙Dropsy with œdematous lips and upper eyelids; albuminous, white, scanty urine; generally no thirst; skin pale, transparent, waxy.
❙General dropsy, skin burst on legs in several places, could not lie down, could hardly breathe.
❙Dropsical symptoms during desquamation. θScarlatina.
❙❙Dropsy without thirst.
❙Dropsy with scanty urine; sleepless and thirstless.
❙Acute febrile dropsy following a chill.
Dropsy after scarlet fever; scanty urine, waxy paleness of feet and legs, which are much swollen.
❙❙Hydrops after scarlatina, even with uræmic symptoms.
❙After three weeks he weighed twenty-one pounds lighter. θDropsy.
❙Emaciation. θMania. θAscites. θChronic diarrhœa. θDysentery. θInfantile masasmus. θHydrothorax. θDropsy. θMenstrual derangement.

" **Touch. Passive Motion. Injuries.** ❙❙Pressure: relieves headache; pain about eyes; aggravates soreness of eyes, pains in stomach, soreness of bowels, renal pains, tenderness of stiff muscles; pit of stomach sensitive; against diaphragm in ascites increases difficult breathing; in swelling in cardiac region increases sensitiveness; makes white spots appear on swollen surfaces; produces cough.
❙❙Excessive sensitiveness to touch and to external pressure, most in abdomen.
Touch increases soreness of erysipelas, pains in stomach and abdomen, soreness of scrotum, sensitiveness of panaritium, sensitiveness of skin.
❙❙Whole surface of body becomes exceedingly sensitive to touch; every hair is painful when touched.
❙❙Skin extremely sensitive to contact; painful to slightest touch; could not bear sheet upon him.
❙Children stiffen when touched or moved. θInflammation of brain.
Very sensitive to touch or pressure, with debility, exhaustion.

Scratching causes itching of vesicles between fingers.
‖Pains in ovaries from sexual intercourse.
‖Dissecting wound on hand.
Wounds and injuries, especially caused by stabbing instruments.
‖After tapping, ascites continually returned.
‖‖Erysipelas after wounds or operations.
‖Wound much tumefied with blush of erysipelas extending for two inches around it. θErysipelas traumaticum.
‖Sting of bees, wasps, and perhaps stings of other insects.
‖‖Punctured and other wounds.
‖Heat, redness and form of swellings, as well as peculiar character of pain with it, resembling bee-stings. θErysipelas.
‖Ophthalmia from unslaked lime.

"**Skin.** Hyperæsthesia of skin.
‖‖Eruptions sting and burn like bee-stings.
‖‖Stinging, burning, prickling, smarting, or itching of skin; sensitiveness to slightest touch.
Prickling over whole body, most on back, palms of hands, face, forehead and under eyes, chiefly in circumscribed points.
‖When child screams out suddenly, as if from stinging pains; sleepless nights; eruption inclines to spread all over child, or to become gangrenous. θErysipelas.
‖‖Sensation of burning heat and stinging in various portions of surface of body, at same time.
‖‖Burning, shooting, irritating, intolerable itching.
Intense burning itching all over his body, so severe that he retired to his room, and rubbed himself vigorously with his flesh brush.
Itching and burning eruption upon back, arms and legs.
‖‖Eruption itches and stings. θDiphtheria.
‖Troublesome itching or stinging on face, ears, lips, nose, under eyes, brows, throat, hands, feet, wrists and ankles.
‖‖Violent itching, like needle pricks, recurring after motion, as if from gnats.
Itching, relieved by scratching.
‖‖Itching, on small, circumscribed spots, preventing sleep at night.
‖‖Itching pricking in skin in different parts of body, more on lower extremities and continued through day.
In evening an intolerable itching attended with a burning fiery sensation, commencing in arms and finally spreading over whole surface of body, reaching to feet.
‖Skin either hot or cold, has a bloated, swollen appearance. θScarlatina
‖‖Feels burning heat with actual heat of skin, followed by a livid purplish hue.

Google

Skin very hot, red and irritated. θScarlatina.
Skin harsh and dry. θDropsy after scarlatina.
Dryness of skin.
Skin all the time dirty in spite of frequent washing (oil). θSpinal disease.
Skin of whole body dry, dirty, withered; pulse 66 (oil). θSpinal disease.
Skin and muscles rigid.
Pale skin. θHydrops ovarii.
Waxy paleness of skin. θProlapsus uteri. θDropsies.
Skin wax-colored. θMenstrual derangement.
White, waxlike skin. θInfantile marasmus.
Skin unusually white, almost transparent. θOvarian dropsy.
Skin pale, waxy, almost transparent or dark blue, almost black.
Patch of skin on arm remaining white amidst surrounding redness. θScarlatina.
Skin turning a dark blue, almost black; sphacelus. θErysipelas.
Skin very hot and red.
Eruption over whole body of red spots, which on close inspection revealed numerous small vesicles, which at times exuded a moisture, forming thin or yellowish scales and crusts; this eruption was attended with intolerable stinging, burning and itching, so severe as to cause patient to scratch her skin till it bled; eruption < by slightest breath of air, but was equally sensitive to warmth of room and bed. θOvarian tumor.
An eruption appears upon skin, which itches and stings. θDiphtheria.
Elevations on skin, as after bite of insects, painfully sore, sensitive to touch.
Red spots like bee-stings upon skin and sensation as if stung by bees, in abdomen and different parts of body.
Red spots like bee-stings. θUterine hemorrhage.
Red blotches on chest and limbs, which itch violently on exposure to air or by scratching them.
Red spots scatter here and there over skin, often causing itching and restlessness, < at night. θTeething children. θRemittent fever.
Numerous spots or little elevations all over body, red or purplish. θCerebro-spinal meningitis.
Intensely deep red rash. θScarlatina.
Bright red pimples on skin. θConstipation of sucklings.
Covered with a dry, red, raised eruption, uncomfortably itching. θPrairie-itch.

Digitized by Google

||Bluish-red, painful, hard spots.
Hard, purplish spots on face, forehead, neck and lower limbs, lasting twelve days, hard and painful.
Eruptions, with painless yellow stools.
Eruption general, with exception of feet.
Receding eruptions.
||Pale blotches.
|White miliary eruption on chest and abdomen. θTyphus.
Sudamina, miliary eruption.
Body covered with large, white wheals, deep scarlet interspaces.
|Hives; red and inflamed patches.
Itching and burning eruption upon lips, skin, nose, and under eyebrows; spots like hives upon chin and cheeks.
|Hives and their sequelæ, especially if it be asthma.
|Rash, with violent itching; < from warmth of bed, and in cold or changing weather; > in open air.
||Red, inflamed, raised patches, with burning stinging pains. θUrticaria.
||Urticaria, like bee-stings, or stings from other insects, with intolerable itching at night.
|Urticaria; isolated elevations painful and tender to touch, assuming a purplish or livid hue.
||Nettlerash, red spots, small white spots, with red areolas, itching violently.
Urticaria, with heat of skin, slight fever.
Itching and appearance of blotches like nettlerash, after scratching.
||Red and white blotches over body, like nettlerash.
||Nettlerash after fever.
Nettlerash about a week after wheals.
|Urticaria. θApyrexia of intermittent.
|Faintly visible spots of urticaria upon neck and forehead. θIncipient hydrocephalus.
|Spots of nettlerash tender to touch, with a purplish livid hue on the neck and forehead. θSopor.
|Receding urticaria.
||Swelling of skin, pale red, as if puffed, extending gradually further on the surface.
|Acute subcutaneous œdema. θErysipelas.
Swelling (œdematous, erysipelatous) with red stripes.
||Erysipelas: redness, with bruised sore feeling, frequently only a pale pink; later purplish, threatening gangrene; œdematous swellings, especially under eyes, about glottis, scrotum, etc.; sleepless nights, suddenly screaming out with shrill shrieks.
||Erysipelas at times appearing upon lower limbs and

Digitized by Google

other parts of body, dark purplish and painful tumefaction.

‖‖Erysipelas, with burning, stinging pains.

‖Erysipelas, with bruised sore pain and much swelling.

‖Erysipelatous redness: of variola eruption; of wounds; of ulcers; after vaccination.

‖In from two to six days spots become livid, and swelling, heat and pain subside, but new ones continue to appear. θErysipelas.

‖Metastasis of erysipelas from lower limbs. θGastralgia.

‖Erysipelatous redness and swelling, with stinging, burning pains. θVariola.

‖Erysipelatous inflammation, extending from boil further and further. θCarbuncle.

‖Smooth erysipelas; similar to that of *Belladonna*.

General heat and redness of skin, with eruption like measles.

‖Measles confluent, œdematous, with much prostration; or, imperfectly developing, with weakness and drowsiness.

‖Measles did not come out properly, had fever and cough, and emaciating diarrhœa.

‖Measles, with diphtheritis.

‖Roseola exanthem. θTyphus.

‖Sequelæ of measles. θChronic diarrhœa.

‖‖Scarlatina, skin intensely hot, rash very red; or, skin hot and cold in places; rash tardy, typhoid symptoms; throat erysipelatous, tonsils large; stinging when swallowing; eyes sensitive; or, ulcers in throat, with repelled or delayed eruption; stinging itching of skin, with fidgetiness.

‖‖Scarlet fever, with sore throat, tonsils enlarged, very red, with stinging pains when swallowing; stinging itching of skin, causing restlessness, with weeping and lamenting, scanty secretion of urine, or complete suppression. Eyes somewhat sensitive to bright light, but not so marked as with *Bellad.*; Apis 40ᵐ in water, in repeated doses, the intervals being lengthened as the patient improved.

‖Rash in red spots and points diffused over body. θScarlatina.

‖‖During eruptive stage of scarlatina; not when glands began to swell or larynx was much affected.

‖Œdematous swelling of skin during desquamation.

‖Rash disappears suddenly, leaving scattered red spots or points. θScarlatina.

‖Scarlet fever, with ascites.

‖Bad effects from scarlet fever, and suppressed scarlet eruptions.

Digitized by Google

‖‖Consequences of acute exanthemata that have been repercussed, suppressed, or never properly developed, such as nettlerash, scarlatina, measles, urticaria, etc.
‖‖After suppressed eruptions: inflammation of brain; ‖‖hydrocephalus; sleepless, restless; scanty urine; great thirst, or none at all; ‖short of breath; erysipelas leaves legs, and gastralgia develops; ‖‖dropsy.
‖Eruption receding, short of breath, sleepless, restless, scanty urine, great thirst, or none at all. θConfluent variola.
‖Herpes.
‖Eruption upon inner thighs, below knees, upon hands, face, back of neck, still more on central portions of body; small pustules, with burning, smarting, stinging, forming dry scabs of laminated form, scaly, brownish, sometimes light straw color.
‖Small pustules arose under skin, with burning, smarting and stinging; when ripe, small scales on them, dry, brownish, or straw-colored; on inside of thighs, under knees, or hands, in face or neck, most towards middle of body; tincture in water.
‖‖Pustules on a bluish-red, hard, hot base.
‖‖Itching pimples on joints.
‖Hard, red, somewhat conical swellings, occurring usually on lower limbs, below knees, sometimes on arms, rarely on other parts of body, varying in number and size, from a half dime to an inch or two in diameter. θErysipelas.
‖‖Body covered with large wheals, size of a silver half dollar, slightly elevated and white.
‖‖Large boils, burning and stinging.
Ulcers.
‖Furunculi and carbuncles; to lessen pain.
Furunculi, with manifold scores of dead connective tissue.
‖Chronic furunculi, could not sit or lie.
‖Carbuncles, burning, stinging, or erysipelas far around; bluish-black.
Syphilitic-mercurial-scrofulous dyscrasia.

47 **Stages of Life, Constitution.** ‖Newborn children; ulceration of navel.
‖Old people. θApoplexy. θPseudo-ophthalmia. θAsthma.
‖‖Apoplexies in old persons.
‖Hydrogenoid constitution. θDiphtheria. θMade < by vaccination.
Sycosis.
‖Strumous diathesis. θDropsy.
‖Sanguine bilious temperament. θInjured knee.

Dark complexion, bilious temperament. θOphthalmia.
Light complexion, spare and thin. θChronic diarrhœa.
Light complexion, lymphatic temperament. θAscites.
Fair complexion, lymphatic temperament. θOphthalmia.
Sanguine nervous temperament. θSwollen eyes.
Sanguine nervous bilious temperament. θParalysis.
Bilious nervous temperament. θHydrothorax.
Irritable people disatisfied with everything. θDiarrhœa.
Nervous lymphatic temperament. θDropsy.
Lymphatic temperament, light skin, blue eyes, feeble constitution. θAscites.
Weak children of a rambling disposition; diarrhœa.
Children; difficult dentition, infantile marasmus, diarrhœa, hydrocephalus, etc.
Child, æt. 5 months; diarrhœa.
Male infant, æt. 7 months; incipient hydrocephalus.
Nervous temperament, child, æt. 7; swollen anus.
A girl, æt. 2, treated for three days with *Acon.*, *Bryon.* and *Hepar* without any improvement; cured in three days by *Apis*[3]; bronchitis.
Girl, æt 3; inflammation of sexual parts.
Girls who, though generally careful, become awkward, and let things fall while handling them.
Boy, æt. 3½; ascites.
Girl, æt. 4½; acute Bright's disease.
Boy, æt. 8; gastro-enteritis.
Girl, æt. 8; since a fortnight, stupid sleep; mother subject to urticaria.
Girl, æt. 9; dropsy after scarlet fever.
Boy, æt. 12, face livid; epidemic typhus.
A boy, æt. 12; ascites after dysentery.
Girl, æt. 15, weakly, decidedly scrofulous; r. tonsil hypertrophic since quinsy; scrofulous ophthalmia of one years' standing.
Girl, æt. 18, fair complexion, lymphatic temperament; ophthalmia.
A girl, æt. 20, after vaccination and a fall, inflammation in r. ankle, horribly maltreated, getting sick again and again; lying in hospital, for eight weeks, finally given up (oil); spinal disease.
Woman, æt. 20; dropsical for some years.
Woman, æt. 24, unmarried, ovarian dropsy since eighteen months.
Woman æt. 26, subject to quinsy.
Woman, æt. 27, nervous temperament, irascible, but easily soothed, no catamenia for five or six years.

Digitized by Google

Woman, æt. 28, subject to sore throat.
Woman, æt. 30, married ten years, no children; ovaritis.
Woman, æt. 30, sanguine, nervous temperament; swelling of tongue.
Woman, æt. 32, bilious temperament; menstrual derangements.
A woman, æt. 40, with habitual dyspnœa and weak, irregular heartbeats; venous thrombosis with a fatty heart.
Woman, æt. 40; liable to erysipelatous attacks now and then in stomach.
Women, at climacteric period.
A woman, æt. 50, always of a weak mind, with some sinking of uterus; pale, lax muscles; nymphomania from scarlatina.
Woman of apoplectic habit; erysipelas.
Woman, æt. 50, dark complexion, bilious temperament; since three years ophthalmia.
Old woman, light complexion, lymphatic temperament, with dropsical swellings.
Woman, æt. 58, for years anasarca, lately hydrothorax.
A woman, æt. 80, sanguine nervous bilious temperament, had a paralyzed arm.
Women and children.
Infants and women (widows or not); erysipelas.
Cured chronic diarrhœa, with passages of blood and mucus, with woman at climacteric period.
A man, æt. 20, chancre; *Apis*[3] every three hours; later at longer intervals.
Man, æt. 23, light complexion, thin, emaciated, without much muscular power, much addicted to tobacco; diarrhœa.
Man, æt. 28, sanguine nervous bilious temperament.
A man, æt. 30, after chancre was destroyed by cauterizing a year ago; see balanitis.
Man, æt. 32, weakly constitution, choleric temperament (oil); catarrh.
A man, æt. 35, strong, athletic; dropsy.
Man, æt. 38, athletic constitution, choleric temperament, frequent ophthalmia, badly treated (oil); pannus.
A man, æt. 70, feeble constitution, lymphatic temperament, light skin, blue eyes; dropsy.
Man, æt. 76, nervous bilious temperament; since sixteen years attacks of palpitation, treated by alternation and getting $<$; tincture was given in water, first every hour, later less often; solution was reduced for a week, finally the 2[e], once a day, alternating with *Cinchon.*[3]. Rapidly convalescing; organic disease of heart.

Digitized by Google

[48] **Relations.** Antidotes to massive doses and in poisonings: *Natr. mur.*, the substance, the solution, the potencies; sweet oil, as it contains table salt; onions; bleeding is decidedly a bad palliative and in most cases injurious.

Antidotes to potencies: after overdosing, *Ipec.*, low, relieved much; to drink coffee, seems indifferent; some have given *Apis*, high, *Laches.* and *Lact. ac.*

(Has been given in ailments from stings, from anthrax infection).

It is an antidote to *Canthar.* (ischuria, inflammation of bladder, acute Bright's disease); abuse of *Iodium*, *Cinchon.*, *Digit.*

It follows well after vaccination (erysipelas, painless diarrhœa); after *Sulphur*, in panaritium.

After it follows well: *Graphit.* (tetter on ear lobe); *Arsen.* (hydrothorax); *Phosphor.* (absorption of false membrane in diphtheria); *Stramon.* after *Apis* had removed jealousy in mania; *Lycop.* (in staphyloma); *Sulphur* (in hydrothorax, pleuritic effusion, hydrocephalus); *Iodium* (in puffy, swollen knee).

Complementary: *Natr. mur.*

Has been given in alternation in cases when change of symptoms indicated it with: *Iodium* in swelling of knee; *Sulphur* in swollen eyes; *Hepar* in urticaria; *Mercur.* in ascites with peritonitis; *Lycop.* in staphyloma.

It often disagrees after *Rhus tox.* in eruptive diseases; and *Rhus tox.* given after *Apis* has often disagreed.

Collateral relation (belonging to same family); *Bombus*, *Crabo*, *Vespa*.

It has cured where *Bellad.* failed in cough of horses; where *Bryon.*, *Canthar.*, *Digit.*, *Helleb.*, etc., had failed in albuminuria after scarlatina; cases in which *Pulsat.* seemingly indicated, failed, especially uterine complaints; when *Thuya*, *Phosphor.*, *Canthar.*, etc., had failed in affections of the prostate gland.

Concordances: *Acet. ac.* (dropsy); *Acon.*; *Anac.* (urticaria); *Apocyn. cannab.* (dropsy); *Arnic.* (bruised, sore); *Arsen.* (typhoid forms; gangrene; dropsies; scarlatina; urticaria; chills); *Bellad.* (meningites, especially of cerebral meninges; faucitis; erysipelas; scarlatina; glandular organs, etc.); *Bromin.* (swelling of ovary during menses); *Bryon.*; *Cantharides* (erysipelas; urinary symptoms); *Cinchona*; *Colchic.* (rheumatism, etc.); *Crot. tig.* (urticaria); *Euphras.* (conjunctiva); *Ferrum*; *Graphit.*; *Hepar*; *Iodium* (swollen knee); *Laches.* (typhoid states; gangrene; *Lycop.*; *Mercur.*; *Natr. ars.*; *Natr. mur.* (chills; urticaria; tension in ovarian region, etc.); *Pulsat.*; *Rhus tox.* (eyes, but *Apis* has less suppuration; vesicular erysipelas, but

Digitized by Google

darker than in *Apis*, and spreading l. to r.; typhoid states; restlessness, but in *Apis* more fidgetiness, etc.); *Rum. crisp.* (painless, greenish-yellow diarrhœa); *Sabin.* (ovarian and uterine symptoms); *Sepia; Silic.* (ovary and inverted nipple); *Sulphur* (tubercular meningitis; checked eruptions, especially urticaria; asthma; hydrothorax); *Tereb.* (urinary symptoms); *Therid.* (vertigo); *Thuya* (sycosis, evils of vaccination); *Urt. ur.; Zincum.*

APOCYNUM CANNABINUM.

Indian Hemp. *Apocynaceæ.*

In the summer of 1833, during a walk in the suburbs of New York, attention was called to this plant as being one of the most promising, by Dr. John F. Gray. In Allentown it was proved, especially by Dr. Freitag; in 1856 another attempt by John C. Peters, with large doses of the tincture. Afterwards, at the suggestion of Dr. Gray, it was given for dropsies. Dr. Marcy proved the 3d. The best reports of cures in hemorrhages from uterus are from Dr. Marsden of York Spring, Pa.

[1] **Mind.** Bewildered.
Feels as if she could do nothing but cry; don't want to speak, very low spirited.
‖Low-spirited and nervous. θAscites and chronic diarrhœa.
‖Stupor. θHydrocephalus.
[2] **Sensorium.** Dizzy in head.
[3] **Inner Head.** ‖Pain in forehead in morning. θOphthalmia.
Frontal headache, sick at stomach, restless at night.
Heaviness of head, evenings; aching in small of back and limbs.
‖Hydrocephalus; stupor, sight of one eye totally lost, the other slightly sensible; constant involuntary motion of one arm and leg; forehead projecting; sutures open. θStage of exudation.
‖Hydrocephalus acutus.
Dizzy headache.
[4] **Outer Head.** ‖Forehead projecting, sutures open. θHydrocephalus.
[5] **Sight and Eyes.** ‖Sight of one eye totally lost, the other slightly sensible. θHydrocephalus.
Heat, redness of eye, feeling as of sand in eye; early in morning.

Digitized by Google

Eyes inflamed; worse morning and evening.
Pressure in r. eye as if pressed outward.
Fine stitches in r. eye.

[7] **Smell and Nose.** Violent irritation of Schneiderian membrane, resembling a severe attack of coryza.
Cold in head.
Nostrils and throat filled with thick, yellow mucus, on waking in morning.
Nose stopped up.

[8] **Upper Face.** Face expressive of much anguish. #Dropsy.
Face bloated after lying down; passes off after sitting up.
Face bloated; of a bluish lead color, also lips. #Heart disease.
Face much swollen. #Hydrothorax.

[9] **Lower Face.** Dry lips; if taken in evening this is the first symptom the next morning.

[11] **Taste and Tongue.** Taste bitter, subacrid, in fauces.
Tongue greatly coated, brownish-white.
Tongue dry, immoderate thirst. #Hydrothorax.

[12] **Inner Mouth.** Dryness of mouth on awaking; thirst.
Constantly spitting; increased secretion of mucus and saliva in mouth and fauces.

[13] **Throat.** Thick yellow mucus in throat in morning; unpleasant degree of heat.
Pressure on r. side of throat.

[14] **Appetite, Thirst. Desires, Aversions.** Great thirst. #Hydrothorax.
Great thirst, but water disagrees, causing pain, or is immediately thrown off. #Dropsy.
Thirst on waking.

[15] **Eating and Drinking.** Distension about stomach and hypochondria after a moderate meal.
Feels as if she was hungry, and when she tries to eat, it settles in epigastrium, turns sour and hurts her.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea after sleep.
Violent vomiting, with prostration and drowsiness, cold skin.
Distressing vomiting at intervals. #Menorrhagia.
Patient becomes very drowsy and vomits very often; pulse slow.
Considerable gastric disturbance. #After scarlet fever.

[17] **Scrobiculum and Stomach.** Sense of oppression about epigastrium and chest, so that there was the greatest difficulty in getting breath enough to smoke a cigar, or to speak with any comfort, and this happened after lighter meals than ordinary.
Sinking at stomach on awaking.

Digitized by Google

‖‖Stomach so irritable, not even a draught of water can be retained. θDropsy.

‖Great irritability of stomach and vomiting. θMenorrhagia.

‖Congestion of liver, of portal system; followed by ascites.

[19] **Abdomen.** ‖Abdomen very much distended and painful. θAscites.

‖Bloated abdomen and limbs. θAmenorrhœa.

‖‖Ascites.

‖Ascites with chronic diarrhœa.

Decided distension of abdomen, especially after a moderate dinner; all the sense of fulness seemed about stomach, liver and spleen, while lower bowels did not appear more flatulent than common.

[20] **Stool and Rectum.** ‖Evacuations very scanty.

‖Bilious stools; loose, but not very copious.

Bowels sluggish, but feces not hard or costive.

[21] **Urinary Organs.** Dull aching pain in kidneys, with increased secretion of straw-colored urine, sinking at stomach, dry mouth, sighing.

Very peculiar torpid action of kidneys.

Decided scantiness of urine.

‖Scanty urine. θHydrothorax.

‖Urinary difficulties. θDysuria. θStrangury.

‖Urine diminishsd to one-third of usual quantity.

Retention of urine, with paralysis of lower extremities.

Urine light, or sherry-colored, no sediment on cooling.

‖Very profuse light-colored urine, several gallons a day.

‖Urine high-colored and very scanty. θAfter scarlet fever.

‖Urine high-colored, diminished in quanity, and voided with difficulty. θAscites.

‖Urine diminished to one-third the usual amount, without pain or uneasiness about kidneys or bladder; on contrary, chest organs seemed remarkably comfortable; they seemed simply torpid.

The little water that was passed flowed as easily as if it were oil.

‖Urine suppressed. θMeningitis infantum.

‖A most inveterate case of wetting the bed at night, in a girl.

[22] **Male Sexual Organs.** ‖Penis and scrotum swollen. θHeart disease.

[23] **Female Sexual Organs.** ⁞Ovarian tumors.

‖Very profuse flow of blood, preceded for a day or two by a moderate discharge. θMenorrhagia.

‖Discharge fluid and abundant. θMenorrhagia.

‖‖Hemorrhage ceasing at intervals, always recurred when vital powers rallied. θMenorrhagia.

Digitized by Google

‖Most exhausting menorrhagia for about six weeks.
‖Blood expelled in large clots, sometimes in fluid state. θMenorrhagia.
‖The moderate flow of catamenia for a day or two suddenly sets in with such violence that she cannot be out of bed. θMenorrhagia.
‖Shreds or pieces of membrane, with fluid blood. θMenorrhagia.
Amenorrhœa in young girls; abdomen and legs bloated.
‖Metrorrhagia continual or paroxysmal; fluid or clotted; nausea, vomiting, palpitation; pulse quick, feeble, when moved; fainting, when raising head from pillow.

[24] **Pregnancy. Parturition. Lactation.** ‖Cough during pregnancy, sometimes short and dry, sometimes deep and loose; if very deep, it pains in stomach.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Could not utter a syllable, although perfectly conscious; answering by signs. θHydrothorax.
Unpleasant heat of larynx and fauces.
Hoarseness.

[26] **Respiration.** Sighing.
Short respiration.
‖Could scarcely speak for want of breath θHeart disease.
‖Could only breathe in a sitting posture, with head thrown forward. θHydrothorax.
‖Panting for breath. θHeart disease.
‖‖Oppression of chest on awaking.
‖Oppression about epigastrium and chest, difficulty in getting breath enough to speak; after a light meal. θHydrothorax.
Irresistible disposition to sigh.
‖Agonizing difficulty of breathing. θDropsy.
‖Short and unsatisfactory respiration.
‖Gasping for breath. θHydrothorax.
‖Difficult breathing, entirely unable to remain in a recumbent position. ‖Dropsy.
‖Great dyspnœa, wheezing breathing and cough; could walk with great difficulty. θDropsy of pericardium.

[27] **Cough.** Dry cough, with scanty expectoration.
Short, dry cough.
‖Cough dry, hacking, suffocative, and incessant. θHydrothorax.
Cough < at night.
‖Violent attack of a hoarse cough at night, with vomiting.
‖Short cough, alternating with a deep cough.
‖Loose rattling, with oppression of chest.
‖Scanty expectoration of white mucus.
‖Hemorrhage from lungs.

Digitized by Google

[28] **Inner Chest and Lungs.** Oppression on l. chest.
Stitches in r. chest.
‖‖Hydrothorax. θAfter scarlet fever.
‖Hydrothorax and anasarca depending on organic disease of heart.

[29] **Heart, Pulse and Circulation.** ‖Palpitation very troublesome whenever she attempted to move about house. θMenorrhagia.
‖Dropsy of pericardium; heart's action scarcely perceptible; face bloated and anxious looking.
‖Very feeble, with a quick pulse.
‖Small weak pulse. θHydrothorax.
‖Pulse 45 between attacks of vomiting; feeble. θMenorrhagia.
‖Pulse small and irregular. θAscites.
Pulse weak and irregular. θAfter scarlet fever.
‖Almost pulseless and disposed to faint whenever she attempted to raise her head from pillow. θMenorrhagia.

[31] **Neck and Back.** Slight soreness in region of kidneys when bringing muscles into action.

[32] **Upper Limbs.** ‖Finger nails of bluish lead color. θHeart disease.

[33] **Lower Limbs.** ‖Stiff knees.
Hard aching in both knees; fears inflammatory rheumatism.
‖Œdema of feet and ankles, general dropsy; also after typhus.
‖Lower extremities, penis, scrotum and abdomen swollen. θHeart disease.
The whole left leg is contracted.
Pain in ball of r. big toe.

[34] **Limbs in General.** ‖Constant involuntary motion of one leg and one arm. θHydrocephalus.
General stiffness of legs and body, can scarcely bend.
‖Weakness of limbs.
Itching on limbs.
Pains in arms and legs.

[35] **Rest, Position, Motion.** ‖Had to be supported in sitting posture in bed. θDropsy.
‖Could not lie down. θDropsy of pericardium.
Region of kidneys sore on using muscles.
Raising head: fainting.
Lying: face bloated; > sitting up; cannot lie, dropsy.
Moving about house: palpitation <.
‖Walks with great difficulty. θDropsy of pericardium.

[36] **Nerves.** General restlessness.
‖Involuntary motions of one arm and leg. θHydrocephalus.

Digitized by Google

‖Greatly debilitated, pulse feeble and quick. θMenorrhagia.
‖Disposition to faint; vital powers much depressed. θMenorrhagia.

[37] **Sleep.** Drowsy in afternoon, restless in night.
On going to bed desire for sleep; with inability to sleep.
‖Drowsiness; vomiting, weak.
‖Stupor.
Restlessness; little sleep.
After sleep: nausea; thirst; dry mouth and lips; sinking at stomach; oppression of chest.

[38] **Time.** Morning: pains in forehead; heat, redness, feeling of sand in eye; yellow mucus in nostrils and throat; dry lips and mouth.
Evening: heaviness of head; aching in back and limbs; eyes more inflamed; going to bed, skin hot.
Night: restless; wetting the bed; violent attack of cough.

[39] **Temperature and Weather.** ‖From a cold, during a sleigh-ride, after flow of catamenia had set in, menorrhagia lasting four and a half weeks.

[40] **Fever.** Heat of skin on going to bed.
Sweat; when skin moistens, dropsy improves.
‖Clammy sweat. θHydrothorax.
‖Body covered with large drops of cold sweat. θHeart disease.

[41] **Attacks, Periodicity.** Paroxysmal menorrhagia.

[42] **Locality and Direction.** Right: outward pressure in eye; fine stitches in eye; pressure in throat; stitches in chest; pain in ball of big toe.
Left: oppression on chest; contraction of leg.

[43] **Sensations.** Feels as if she could do nothing but cry; as if r. eye was pressed outward; feeling as of sand in eye.
Stitches: fine, in r. eye; in r. chest.
Aching: in small of back and limbs; in kidneys; in both knees.
Soreness: in region of kidneys.
Pressure: as if r. eye was pressed outward; on r. side of throat.
Undefined pain: in forehead; caused by drinking water; in distended abdomen; in stomach, from deep cough; in ball of r. big toe; in arms and legs.
Fulness: about stomach.
Heaviness: in head.
Oppression: about epigastrium and chest.
Dryness: of lips: of mouth; of skin.
Heat: of l. eye; in fauces and larynx; of skin.
Itching: on limbs.

Digitized by Google

Weakness: of limbs.

" **Tissues.** ‖‖Excretions diminished, especially urine and sweat.

‖Dropsy of serous membranes.

‖‖Acute inflammatory dropsy.

‖‖Dropsy: with great thirst, but water causes pain or is vomited; after typhus, scarlatina, cirrhosis; mostly uncomplicated with organic disease.

‖General dropsy after scarlet fever.

‖Rheumatic stiffness.

" **Skin.** ‖‖Skin dry and harsh. θAscites.

Skin cold, with vomiting.

Skin hot, evening going to bed.

" **Stages of Life, Constitution.** ‖Woman, æt. 24, mother of three children, black hair and eyes, fair complexion, disposed to uterine hemorrhage.

‖Woman, æt. 40, mother of several children, a hard worker, dark complexion, dark eyes and black hair; menorrhagia.

Women with amenorrhœa.

‖A girl; θenuresis.

" **Relations.** Concordances: *Acet. ac.;* ‖*Apis* (which has no thirst in dropsies); ‖*Arsen.; Bellad.; Bryon.; Cinchon.; Colchic.; Digit.* (dropsy; slow pulse); *Elat.;* ‖*Helleb.* (hydrocephalus, ascites, etc.); *Kali carb.; Lycop.; Mercur.; Merc. sulph.; Scilla; Sulphur; Veratr. alb.*

‖Dropsy after abuse of quinine.

Digitized by Google

ARGENTUM METALLICUM.

Pure Metallic Silver.

Hahnemann published in 1813, in the fourth volume of his Materia Medica pura, the first proving made by him and his class, with the *Argentum foliatum*, or the silver leaf of the gold beaters, after having collected a few symptoms from the nitrate. But like he had experienced with the gold, and preferring always to prove the chemical elements, unaltered by their combination with acids, he triturated the leaves from the shops, and proved the trituration on himself (40 symptoms) and his class, W. Gross, C. Franz, Fr. Meyer, W. E. Wislicenus, Ch. Fr. Langhammer, and E. Th. Hermann (144 symptoms). In 1825 appeared a second edition of the Materia Medica, when his own had increased only to 56 symptoms, and the others of his class by the valuable proving of F. A. Haynel with 24 symptoms, one symptom of W. Gross having been stricken out. In 1846 appeared another and a masterly proving of Wm. Huber, made with a trituration of the precipitated metal, what the chemists had learned since 1820, when Stapf prepared *Platina* in this way.

Several other provings, most with the higher, have been added and used, especially from one of our best men, who does not wish to be known except by the letter B, and have been very useful as corroborations.

Some symptoms of the oxide and some of the arseniate have been kept back.

The symptoms marked 9 in Allen are all from cures.

[1] **Mind.** All the time as if drunken.

Without anxiety, again and again the idea comes as if he might have an apoplectic stroke, and could not finish this proving; with spasmodic contraction of heart.

Cannot occupy his mind regularly, as imagination reproduces former exciting events; all afternoon.

Imagines things about the military which he never liked; long-forgotten old songs come into his mind.

Mania.

Delirious rage, after epileptic attacks.

Great inclination to talk; his mind is very clear, and he argues with great facility.

Inclined to laughter and joking.

Inclined to play tenpins, which he never liked.

In society indisposed to talk; he complains of rush of blood to head and cheeks, singing in ears; itching in reddened eyes.

Increased cheerfulness and disposition to talk.

When contented, very merry; but any trifle sets her to cry a long while.

Digitized by Google

Great serenity, a heavenly sensation of peace.
He feels unpleasant and is lazy.
Depresed and very sleepy.
❙Anxious about her health; full of care. θLaryngitis.
In forenoon inclined to melancholy, in afternoon to great merriment.
Anxious, as if his clothing got too tight, with feverish heat and languor, when walking out doors.
Fear of concussion, as if he might run against something, with pain in testicles.
❙❙Displeased, aversion to talk. θExostosis of skull.
❙Mental agitation induces headache and indigestion.

[2] **Sensorium.** ❙❙Dizziness on entering a room after a walk; before midnight, while slumbering in bed, it seemed as if head was falling out of bed; followed by a violent convulsive starting of body.
❙Felt suddenly giddy, and as if a mist was before eyes.
❙Attacks of vertigo; he cannot think rightly.
❙When looking at running water, giddy.
❙❙A crawling and whirling in head, as if drunken.
Vertigo when reading.
❙❙Complete dizziness on entering room after a walk.

[3] **Inner Head.** ❙Frontal headache of business men.
Congestion to head, followed by redness of cheeks.
Cutting stitches from l. ear into brain.
❙Pressing pain, with dulness in forehead, and drawing pressure in occiput.
Dull pain in r. temple and r. side of head, lasting one hour.
❙Painful sensation of emptiness in head, feeling as if it was hollow, with aching of whole brain. θExostosis of skull.
❙Left-sided headache, as if in brain substance; at first only slight drawing, but gradually becoming more violent; at its culmination raging as though a nerve was being torn, ceasing suddenly.
❙❙Dull, pressive, persistent headache, encircles the calvarium like a wreath.
❙Bad effects of sunstroke.
❙Headache and dyspepsias induced by mental agitation, nursing sick, etc.

[4] **Outer Head.** Tenderness on top of head, painful to touch.
❙Pressing, tearing pain in skull, principally in temporal bones, renewed every day at noon, < by pressure and touch, > in open air.
Aching of external parts of head.
Pityriasis.

[5] **Sight and Eyes.** ❙Sight very weak.
Sight vanishes.

Digitized by Google

Amaurosis of l. eye, contracted pupil, insensible to light.
Itching in outer canthi.
Violent itching of lids and corners of eyes. θBlepharitis.
Lids greatly swollen and thickened; margins thick and red.
Pustules along edges of lids after measles. θBlepharitis.
Any effort to separate lids causes their edges to be drawn in; lids raw, sore, red, slightly everted, without smarting or pain. θBlepharitis.
Abundant purulent discharge.
Stricture of lachrymal duct.
Infant, æt. 4 weeks; since third and fourth day, abundant purulent discharge, pus oozing in jets, lids could not be separated; alarmingly swollen and thickened; after *Sulphur* and *Calc. carb.*, *Arg. met.*[2o] every four hours; next day to the mother at lengthening intervals.
Affections of tarsal cartilages.
Inflammation of l. eye with lachrymation, great intolerance of daylight and running at nose; after many medicines attacking r. eye, pain was shooting, itching, aching; sometimes very violent, also without corresponding amount of redness. θAfter measles.

[6] **Hearing and Ears.** Buzzings in ears, with ebullitions and heat. θPalpitation of heart.
Corrosive itching; scratching until bleeding ensues.
Itching, warmth and formication of concha.
From fossa under r. ear-lobe, drawing pain at short intervals, as if in periosteum, to cheek and lower maxilla; when chewing, a cutting sensation into eustachian tube towards parotid, as from a sharp acid.

[7] **Smell and Nose.** Tickling, crawling sensation in nose, followed by nosebleed.
When blowing nose, violent bleeding.
Nosebleed, with tickling, crawling sensation in nose.
Violent fluent coryza, with frequent sneezing.
Most exhausting fluent coryza, with sneezing. θExostosis on skull.
Throbbing in l. nostril, tension in external skin, as if nasal bones were compressed, with tickling, prickling in l. nostril, causing violent sneezing.
Affections of nasal cartilages.

[8] **Upper Face.** Face red.
Great redness of face. θExostosis on skull.
Pale and earthy face. θDiabetes mellitus.
Face straw-colored, down to lips inclusive. θScirrhus of os uteri.
Pressing and tearing of facial bones; drawing, tearing in r. zygoma.

Perceptible throbbing over whole l. cheek, as if muscles would be raised from mucous membrane, with a feeling as if cheek was larger; cheeks both red; chilly burning in skin.

❙Sudden heat in face. θPalpitation of heart.

❙Burning itching of face.

[9] **Lower Face.** Swelling of upper lip, close under nose.

A violent horrible pain in bone of r. lower jaw.

[10] **Teeth and Gums.** Severe aching in decayed last molar, l. side.

Upper and lower teeth adhere together like from glue.

[11] **Taste and Tongue.** Speech impeded by much viscid saliva in mouth.

Sore burning blisters on tongue; tongue dry.

Red streaks in middle of tongue.

Dryness in middle of tongue.

Tongue has a silvery coating, more dense than the transparent white of *Arsen.*

[12] **Inner Mouth.** Dryness in mouth.

❙Fetid breath. θScirrhous uteri.

Saliva sticky.

[13] **Throat.** ❙❙Sore throat as from swelling of pharynx. θExostosis on skull.

❙Region of submaxillary glands swollen; neck stiff; swallowing difficult, as from internal swelling; has to force every mouthful down œsophagus.

❙Scratching sensation in soft palate, as from something rough sticking there; felt most during empty swallowing, forcing him to swallow saliva.

❙Painful tension in fauces, as from swelling, when yawning.

❙❙Throat feels raw and sore during expiration, or when swallowing or coughing.

❙❙Viscid, grey, jellylike mucus in pharynx, easily hawked up; early morning.

❙❙Anæsthesia of fauces. θDiphtheria.

❙❙Throat aches more with coughing than with swallowing, notwithstanding that food goes down with difficulty. θExostosis on skull.

Itching crawling in pharyngeal orifice of eustachian tube, extending to tympanum.

❙A thick, viscous saliva sticks to hard palate, causes a scratching.

❙Mercurial angina.

❙❙Tension in fauces on r. side, felt only when gaping. θAphonia.

[14] **Appetite, Thirst. Desires, Aversions.** Appetite very much increased; hungry after eating a full meal.

❙❙Great hunger. θExostosis on skull.

Digitized by Google

‖Hungry in morning, giving her nausea. θPalpitation.
‖Appetite pretty good. θScirrhous uteri.
‖At times loss of appetite, with aversion to smoking, for a long time.
‖Aversion to all food, even when thinking of it.
‖Want of thirst, even during hot stage of fever.
Desire for wine.

[15] **Eating and Drinking.** During and after meals, sweating; skin near sacrum feels cold.
After dinner: nosebleed; ‖dry stool.

[16] **Hiccough, Belching, Nausea and Vomiting.** Squeamish nausea in region of sternum, with vertigo and burning in scrobiculum.
Nauseous sensations with hunger; nausea in his dreams.
Vomiting, with stool in afternoon.
Bitter, acrid fluid rises up in throat; heartburn.

[17] **Scrobiculum and Stomach.** ‖Digestion took place without pain in stomach. θScirrhous uteri.
‖Oppression in scrobiculum. θDiabetes mellitus.
Anxiety and pressure in pit of stomach.
Burning in stomach, ascending to chest.

[18] **Hypochondria.** Cutting stitches under last l. ribs.

[19] **Abdomen.** Tympanitic puffing of r. side of abdomen.
Abdomen sore to hard pressure; slowly lessened after wind passes.
‖Expansion and sensation of fulness in epigastrium, with hunger.
Loud croaking in abdomen, with hunger.
‖Wind colic.
‖Every moment lancinating pain in hypogastrium, like pin-pricks. θScirrhous uteri.
‖Distension of hypogastrium; which was exceedingly sensitive to contact. θScirrhous uteri.
Contraction and tension of abdominal muscles; has to walk bent forward.
‖Bruised pain over l. hip, and on whole l. side of pelvis, with uterine weakness.
‖Painful soreness in whole abdomen, < when riding in a carriage. θWith uterine complaints.
‖Tendency to crampy pains in groins. Scirrhus uteri.
‖Sweat only on abdomen and on chest.
‖Sweat on abdomen. θExostosis on skull.

[20] **Stool and Rectum.** ‖Soft, but scanty stool. θExostosis on skull.
Diarrhœa, with constant pain in l. side of stomach, all morning, afternoon and evening, and next day.
Painless stools of undigested food.
‖Frequent urging in lower part of rectum, with discharge of small quantities of soft stool.

Digitized by Google

Dry stool, like sand, after dinner.
Alvine evacuation irregular, often lienteric diarrhœa. θScirrhous uteri.
Diarrhœa with constant pain in l. side of stomach.
Sore between nates, around anus, and in groin, on moderate walking.

[21] **Urinary Organs.** Passed five or six pints of urine in one night. θDiabetes mellitus.
Urine turbid, sweetish, profuse at night. θDiabetes.
Profuse urine.
Urination copious. θDiphtheria; scirrhous uteri, etc.
Polyuria.
Urine like whey, slightly turbid, of a sweet taste. θDiabetes mellitus.
Urine pale, fetid, profuse, especially at night. θScirrhous uteri.
Enuresis nocturna, spasmodic form.
Albuminuria.

[22] **Male Sexual Organs.** θSeminal emissions almost every night, without erection, with atrophy of penis; after onanism.
Yellowish-greenish gonorrhœa, of an indolent character from beginning; of eight months' standing.
Very profuse gonorrhœal discharge, with contusive pain in testicle.
Greyish ulcers, with shaggy borders, on prepuce; at same time in throat.
Crushed pain in testicles; clothing increases pain on walking; also evening in bed.
Scrotum and feet œdematous. θDiabetes mellitus.
Pruritus scroti.

[23] **Female Sexual Organs.** Prolapsus, with pain in l. ovary.
Pain in l. ovary and back, extending to front and downward. θProlapsus.
Pains in l. ovary and loins.
Purulent, ichorous, sometimes bloody matter flows from uterine ulcers, filling room with unbearable stench. θScirrhus.
Neck of uterus looks spongy, deeply corroded; face straw-colored; bruised, tense feeling in groin; urine copious; cramps in thighs.
Metrorrhagia, large lumps with violent pains, < with every motion.
Hemorrhages at approach of climacteric period.
Prolapsus uteri; pain in l. ovary; pain in small of back, extending to front and downward.
Sore feeling, as if ulcerated, in whole abdomen, < when riding in a carriage. θUterine diseases.

❙A roughness and soreness in larynx when coughing, not when swallowing. θLaryngitis.
❙A soreness "at bottom of windpipe."
❙Phthisis laryngea; clergymen, singers, public speakers, etc.

[26] **Respiration.** ❙Foul breath. θScirrhus of os uteri.
❙When reading aloud in evening, he has to hem and hawk.
❙Stitches between sixth and seventh rib, < when inhaling.
With a deep inhalation, pressing-out pain below second and third rib.
With every deep breath cutting on both sides on last ribs.
Violent stitches in chest impede both in and exhalation.
❙Want of breath. ❙Diabetes.
❙❙Deep sighing inhalations relieve the palpitation.
❙❙Laughing causes cough; mucus in larynx. θLaryngitis.
Voice fails in singing.

[27] **Cough.** ❙❙Attacks of cough from laughing.
❙Complains about a constant tickling in throat setting her to coughing. θLaryngitis.
❙Dull cutting, becoming a shooting, rising up in trachea and forcing him to single coughs.
Cough dry, caused by irritation in bronchia, with a sore pain; drawing stitches in lowest rib, near spine.
❙Cough in attacks, rattling by day and in room, not at night nor in open air.
❙❙Cough with easy expectoration, white, thickish, looking like boiled starch.
❙❙Expectoration almost constant, day and evening.
❙When coughing, a raw sore feeling in throat, not in windpipe, also not when swallowing.
❙Dry cough and easy expectoration.
❙Sputa like gelatine and grey.
❙Much grey, gelatinous phlegm in trachea, easily expectorated. θExostosis on skull.
❙Sputa easy, white, thick, like boiled starch. θLaryngitis.
❙❙The cough is accompanied with an easy expectoration of white, thick, starchlike mucus, without taste or smell.

[28] **Inner Chest and Lungs.** ❙Stitches in r. chest from within outward; he can neither inhale nor exhale.
❙Violent pain in chest and shoulders pressing inward, returning every Winter.
❙❙Great weakness of chest, < l. side; as a concomitant to other symptoms.

[29] **Heart, Pulse and Circulation.** ❙Sensation as if heart suddenly was standing still, followed by a trembling at heart, gradually passing into an irregular throbbing, disappearing after a few minutes. θDuring pregnancy.

Digitized by Google

‖Frequent palpitation with or without anxiety.
‖During pregnancy, increasing palpitation.
Palpitation at night.
‖During day or night frequent attacks of violent palpitation of heart, with or without feeling of anxiety. θThird month of pregnancy.
Oppressive burning in region of heart.
‖Trembling and palpitation of heart.
‖Heartbeats sometimes omit.
‖Full feeling in region of heart.
‖Frequent, spasmodic, though painless twitchings of whole cardiac muscle, especially on lying on back; fears apoplexy.
Pulse: often unchanged; more frequent in evening in bed; slow in morning.
‖Pulse intermitting and very irregular during attacks of palpitation.
Periodic jerking; disorderly, irregular pulse; very annoying action of heart with an intermittent, irregular pulse, most when lying on back.

[30] **Outer Chest.** Cutting, l. side, in cartilages of false ribs.
‖Chest feels sore to touch.
‖‖Boil near last rib.
‖‖Sweat on chest. θExostosis on skull.
Affections of cartilages of ribs.

[31] **Neck and Back.** The sterno-cleido-mastoid muscles hurt when stretched by turning of head.
Itching between shoulder blades.
On right of pelvis, near sacrum, skin feels cold, as if touched with ice; returns after eating.
Dull stitches in second lumbar vertebra.
Feels as if small of back had been knocked away.
Bruised pain in small of back, loins and neck, < from motion; mornings on awaking.
Violent pain as if sprained deep in l. lumbro-sacral region; unendurable on adduction of l. thigh, compelling to limp.
‖Chill spreads from back.

[32] **Upper Limbs.** Upper arms feel powerless, as after severe labor.
Tension and tearing of arms, especially in bones of hands and fingers.
A short paralytic drawing on outside of l. upper arm; on pressure it pains as if beaten; same in l. wrist joint.
‖‖Inflammation of arms.
Burning of hands, itching.

[33] **Lower Limbs.** Stitches in hip when walking.
‖‖Crampy pains in thighs from time to time. θScirrhus of os uteri.

Digitized by Google

Inside of thighs pain as if ulcerated.
Weariness after rising, mostly in region of great trochanters, ligaments and muscles feel as if they had given way, with painful tension in muscles about trochanters and buttocks, as if sprained; < walking; on hard pressure after using, feel bruised.
‖From time to time crampy pains in thighs. θScirrhous os uteri.
Stiffness in hips in morning.
Knee pains as if bruised, while sitting.
Knees knock together when walking.
‖Calves feel as if too short on going down-stairs.
‖When stepping, feet feel sore, as if ulcerated.
‖Feet œdematous, swollen. θDiabetes mellitus.
‖Tearing in feet, at times in soles, dorsum, heels or toes, in tarsal or metatarsal bones.
Numbness in heels.
‖Lower limbs sometimes, especially in morning after rising, become so weak and trembling that knees knock together. θPalpitation.
‖In l. knee, when moving it, a pain as if beaten and as if out of joint, like after much walking. θPalpitation.
‖Left lower limb gets stiff and immovable, as if asleep. θPalpitation

[34] **Limbs in General.** ‖‖Numbness in limbs, as if asleep.
All limbs feel stiff.
‖‖Loss of power; after walking unusual fatigue; heaviness.
‖Joints of hands and feel sore; drawing in joints.
Rheumatic pains in extremities.
‖Burning, lancinating pain, like sting of a wasp at knee and elbow, < at the latter.

[35] **Rest, Position, Motion.** At rest: pain in limbs of all sorts, <; pressing, squeezing, below r. axilla.
Forced to lie down from weariness.
Lying low with head.
‖Worse lying on her back. θPalpitation.
‖Lying: on back brings on attack of palpitation or increases it, also twitching of cardiac muscles.
Sitting: ‖‖pains in back and limbs increase; pains in knees.
Standing: pain in knee; cutting in leg; crawlings over body.
Motion: paralytic weakness; ‖‖much inclined to move, feels as if she had more power; pains in menorrhagia; bruised pain in back, loins and neck <.
Rising from sitting: pressure in abdomen >; weariness.
Walking: after moderate walking, sore; has to walk bent forward; dizzy coming in warm room after a walk;

Digitized by Google

stitches in hip; muscles over trochanter sprained; thighs give out; knees knock; sore nates.
‖Stooping: mucus in air passages; stitches in l. ribs.
Ascending stairs: mucus in larynx.
Descending: joints weak, sore.
Sudden exertion: palpitation; knees pain.

[36] **Nerves.** ‖After dinner, during siesta, a violent electric shock, first proceeds from l. afterwards from r. hip joint, disturbing sleep; having fallen asleep again (ten minutes), with hands above head, another shock, much more violent in l. arm, proceeds from arm joint.
Painless twitching: around r. shoulder and r. thigh; of r. thumb, abducting it while writing.
Spasmodic, painful twitching of muscles on temple, forehead, and throat, near thyroid cartilage.
‖Convulsive shocks of whole body; after previous vertigo; mostly when dropping off to sleep, preventing sleep.
‖Epileptic attacks, followed by delirious rage, jumping about, striking those near.
Weary, forced to lie down and sleep.
‖Paralytic weakness on motion; bruised feeling.
‖Paralytic weakness, with all pains.
‖Legs weak and trembling, mostly in morning after rising; knees give way. θPalpitation of heart.
‖Sudden weakness, as if he should break down. θPalpitation of heart.
‖Very much prostrated. θDiabetes mellitus.

[37] **Sleep.** ‖In bed, while slumbering, seized with a dizziness, as if head fell out of bed; followed by a violent, convulsive starting of body; vertigo and desire to sleep had disappeared.
‖Cannot fall asleep easily, and her sleep is very restless; as soon as she sinks into a doze, an electric shock of whole body or single limbs occurs and interrupts sleep. θPalpitation.
Gaping, drowsy, depressed in mind.
‖Restless sleep; anxious, frightful dreams, on awaking believes them true; also in cases of palpitation of heart.
‖Nausea in dreams; ‖seminal emissions.
On awaking: ‖fatigue; ‖upper arm weak; ‖legs powerless.
‖Many anxious dreams with screaming. θPalpitation.
‖No rest at night, has to urinate so often. θDiabetes mellitus.

[38] **Time.** Many complaints < at noon.
Chill at 12, noon.
Day: cough rattling.
In morning: weary in all limbs; sneezing; ‖mucus in throat; pulse slower; hips stiff; nausea.

Digitized by Google

In forenoon: out of humor; heat.
1 P.M.: pain from larynx through head.
Afternoon: nosebleed; gastric symptoms; vomiting with stool; pains in joints; chill.
Evening: mind depressed, sad; pains in limbs; ▮crushed pain in testes; two tones in larynx while inspiring; hoarse reading; pulse increased.
Night; profuse urine; palpitation.
Day and evening: expectoration.
Before midnight: vertigo, seems as if head was falling out of bed; chill.
After midnight: sweat.
▮Remission of complaints evening and night.
Night half and day half like 3 to 4.
Evening half and morning half like 5 to 3.

[39] **Temperature and Weather.** Averse to uncovering.
Open air: tearing in skull >; cough >.
▮After effects of sunstroke.
Entering a room after a walk: dizzy.
In room: cough rattling.

[40] **Fever.** ▮Chill before midnight, every time bedclothes are raised.
Coldness on small spots.
Chill: in afternoon and evening, until sleep; before midnight.
Chilly, stupid; chill spreads from back.
Heat in forenoon without thirst.
Heat all over, but less on head.
▮Heat of body, except head, with thirst. θExostoses on skull.
▮Heat in forenoon, over whole body, but less on head.
▮▮Hectic, 11 A.M. to 12, or 1 P.M. θIn laryngeal and bronchial troubles.
▮▮Sweats easily; during and after eating; upper part of body, or only front of body.
Sweat after midnight.
▮▮Sweat on abdomen, chest.
▮Oily sweat on abdomen or chest.

[41] **Attacks, Periodicity.** ▮▮Paroxysms of burning in corns.
Pains increase gradually, disappear suddenly.
Sudden, momentary pains; belly, back, r. shoulder, etc.
Cough in attacks.
▮Symptoms reappear at noon.
▮Attacks brought on by lying on back. θPalpitation.
Every day at noon: pains in skull renewed; chill.
Every Winter: pain in chest and shoulders.

[42] **Locality and Direction.** Right: dull pain in temple and side of head; fossa under ear-lobe painful; pain in

Digitized by Google

jaw; tension in fauces; tight feeling in ear; stitches in chest, under axilla; pelvis as if touched with ice; side of abdomen tympanitic; twitching in shoulder, thigh and thumb.

Left: cutting into brain from ear; temple; ▮headache; amaurosis; nostril throbs; cheek throbs; molar aches; cutting under ribs; arm as if beaten; over pelvis, bruised; ▮▮ovary, cartilages, false ribs; shocks in arm; paralytic drawing in upper arm, wrist; ▮patella.

Right to l.: ear-lobes; eustachian tube.

Left to r.: hips, knees.

Within outward: stitches in chest; dull pains.

Pressing inward: pain in chest and shoulders.

Tearing upward: pains in legs.

[43] **Sensations.** As if clothing were too tight; painful emptiness, or hollow feeling in head; as if l. cheek was larger; sensation of something rough sticking in soft palate; feeling in larynx as if filled up with a foreign body; as if small of back had been knocked away; as if heart suddenly stood still, followed by trembling at heart; as if drunken; as if he ran against something: as if head was falling out of bed; as if mist was before eyes; as if nasal bones were compressed; as if muscles would be raised from mucous membrane; abdomen as if ulcerated; as if sprained in lumbo-sacral region; l. arm pains as if beaten; knees as if bruised; as if she should break down; joints as if beaten; itching as if from fleas; l. knee as if beaten and out of joint.

Pain as if ulcerated: inside of thighs; in feet, when stepping.

Raging pain: as if a nerve were being torn in l. side of brain.

Violent horrible pain: in bone of r. lower jaw.

Violent pain: in chest and shoulders; in l. lumbo-sacral region.

Lancinating: in hypogastrium like pin-pricks; and burning, like sting of a wasp, knee and elbow.

Stitches: from l. ear into brain; under last l. rib; in air passages; between sixth and seventh rib; in chest; drawing on lowest rib, near spine; in r. chest, from within outward; dull in second lumbar vertebra; in hip.

Cutting: in eustachian tube toward parotid; on last ribs; rises in trachea, becomes a shooting; l. side in cartilages of false ribs.

Tearing pain: in skull; in facial bones; in arms, bones of hands and fingers; in feet; in long bones.

Drawing: in l. side of brain; from fossa under r. ear to

Digitized by Google

cheek and lower maxilla; and tearing in r. zygoma; paralytic on outside of l. upper arm and in l. wrist joint; in maxillary and parotid gland; in bones.
Pressing pains: in forehead; and drawing in occiput; and tearing in skull; in facial bones; inward, in chest and shoulders; in bones.
Dull pressive pain: encircles calvarium.
Pressing out pain: below second and third rib.
Pressure: in pit of stomach.
Aching: of whole brain; of external head; of eyes; in l. molar.
Scratching: in soft palate.
Rawness: in throat; in larynx; above bifurcation of trachea.
Burning: and itching in face; blisters on tongue; in scrobiculum; in stomach, to chest; itching of hands; lancing, knee and elbows; in corns; in region of heart.
Painful soreness: in abdomen.
Soreness: in joints of hands and feet; of the eruptions; in throat; at bottom of windpipe; between nates; around anus; in groin.
Rheumatic pain: in extremities.
Dull pain: in r. temple and r. side of head.
Undefined pain: in forehead; in r. lower jaw, very violent; in l. side of stomach, with diarrhœa; in l. ovary and back, with prolapsus; in loins; in cricoid cartilage; in testicle.
Sudden transient pain: in larynx; through back of head into vertex and r. ear.
Contusive or crushed pains: in testicles.
Bruised pain: over l. hip; l. side of pelvis; in buttocks; in knee; in small of back, loins and neck; in cricoid cartilage; in groin.
Sprained feeling: in lumbo-sacral region; see 31; in buttocks.
Crampy pains: in groins; in thighs.
Contraction: of abdominal muscles.
Constriction: in larynx.
Oppression: in scrobiculum.
Tension: in skin of nose; in fauces; of abdominal muscles; in arms; in muscles about trochanters.
Calves feel too short on going down-stairs.
Ligaments and muscles in region of great trochanter feel as if they had given way.
Fulness: in epigastrium, with hunger; in region of heart.
Throbbing: in l. nostril; over l. cheek; at heart.
Stiffness: of neck; in l. leg; in all limbs.
Numbness: in heels; in l. leg; in limbs.

Digitized by Google

Crawling and whirling: in head.
Electric shock: from l. then r. hip joint, then in l. arm, disturbing siesta; of whole body.
Spasmodic painless twitchings: of cardiac muscle; around r. rhoulder and thigh; of r. thumb; of muscles on temple, forehead and throat, near thyroid cartilage.
Dryness: in mouth; on tongue.
Heat: in face; of body except head.
Chilly, burning: in skin.
Cold spot: in larynx; on r. of pelvis near sacrum; in hips.
Tickling: in throat.
Tickling and crawling: in nose.
Tickling and prickling: in l. nostril.
Itching: in canthi; of lids; of corners of eyes; of eyes; of ears; and crawling in pharyngeal orifice of eustachian tube; of scrotum; between shoulder blades; burning of hands; and crawling on head and body; in pharyngeal orifice of eustachian tube; here and there as from fleas.
Formication and itching in concha.
Weakness: upper arms; in legs, in knees; general; in joints.

[44] **Tissues.** Drawing pains in maxillary and parotid glands.
‖‖Acts on all cartilages.
‖Joints feel weak, sore; especially on descending.
‖Joints feel as if beaten. θExostosis on skull.
‖Emaciation. θDiabetes mellitus.
‖‖Drawing pressure or tearing in bones, especially long bones.
‖Articular rheumatism without swelling.
‖Caries.
‖‖Tearing pain in bones. θExostosis on skull.
‖‖Tenderness, tearing pressure and pain in bones.
‖‖Copious discharge of mucus; ‖‖ of pus; ‖‖of urine.

[45] **Touch. Passive Motion. Injuries.** Touch: head painful.
Pressure: pain in skull increased.
Clothing increases pain in testicles.
‖Worse riding in carriage: painful soreness of whole abdomen, also uterine complaints.
‖‖Worse when touched: pain in muscles of upper arm; bones of thumb and last phalanges of both big toes.
‖‖When pressed upon, parts feel sore as if bruised.
‖‖Every step hurts in hip joint.

[46] **Skin.** Intolerable itching, like from crawling on head and body.
A sore burning itching here and there as from fleas.
Itching, unchanged by scratching.

Digitized by Google

Sore exanthemata, cannot bear to have them touched, even motion of skin is almost unbearable.
A pimple on l. temple sore to touch.
‖ Eruptions feel sore as if excoriated.
Greyish ulcers with shaggy borders; on prepuce and in throat.
‖ Purulent, ichorous, sometimes bloody matter flowing from ulcers, constantly filled the vagina, from which proceeded a horrible stench, driving all from room. θ Scirrhus of os tincæ.

47 **Stages of Life, Constitution.** Man, æt. 26, robust, active, intelligent; red hair, white skin, marked rheumatic diathesis.
‖ Woman, æt. 28, choleric, black eyes and hair; pregnant in fourth month. θ Palpitation.
‖ Affections from onanism.
Girl, æt. 1, after measles, inflammation of l. eye.
‖ Woman, æt. 50, tall, thin, emaciated, very irritable temperament. θ Scirrhus of neck of uterus.

48 **Relations.** To be compared with *Zincum* in itching in outer canthi. (*Zincum* more the inner, and acts more on the muscular system and on the skin).
Cured gonorrhœa, after *Cannab.*, *Copaiva* and *Mercur.* failed.
Cured scirrhus of os tincæ, after *Conium*, *Cicuta*, *Sepia* and *Lycop.* failed.
Uterine and ovarian symptoms, similar to *Pallad.*, latter on r. side; *Argent. met.* on left.
‖ Ailments from abuse of mercury.
Antidotes to *Argent. met.*: *Mercur.*, *Pulsat.*
After *Argent. met.* follow well: *Calc. ostr.*, *Pulsat.*, *Sepia.*
Argent. met. follows well after *Alum* and *Platin.*
A return of trembling palpitation four months after delivery, after being cured in third month of pregnancy by *Argent. met.*, was relieved by *Rhus tox.*
Compare *Stannum* in cough excited by laughing.

ARGENTUM NITRICUM.

Nitrate of Silver. AgO, NO_5.

First prepared by the Arabians. Introduced into practice by Paracelsus. In olden times called Hell-stone, a prophetic name, indicating the horrible abuse of it in our age. See Skinner's pamphlet on Diseases of Women.

After the short proving of the 15th centesimal by Hahnemann (see his Materia Medica, 1813), it was not proved until Dr. J. O. Müller proved it and published one of the most learned treatises in medical literature, in 1845, in the Austrian Journal, under Watzke's editorship. See Vol. 2, 1846, page 1 to 112.

The late Grauvogl, who made it a kind of polychrest, supposed that the silver united with the chlorine always contained in water. Vol. II., § 315.

This could only be ascertained by a proving of *Argent mur.*, like that commenced by Dr. Lembke, *Neue Zeitschrift für Klinik*, Vol. II., contained in Allen's Encyclopedia, Vol. I., page 452, but not sufficient for comparison.

[1] **Mind.** ❙Loss of consciousness; faint feeling.

❙❙Loss of memory. θHeadache from dancing.

❙Loss of memory; lies with closed eyes, shunning light and conversation. θMelancholia.

❙Weakness of memory, which frequently did not allow him to find the right word, hence falters in speech. θMelancholia.

❙In conversation, forgetting what he wanted to say, he looked around as if expecting some one to help him out. θHypochondriasis.

Time seems to pass very slowly.

Dulness of head, mental confusion; dizziness; tendency to fall sideways.

❙To fix his thoughts on anything, or to give his business any consideration, was impossible for him; on attempting it, it immediately got dark before his eyes and headache increased. θMalarial ataxy.

❙Great weakness of mind. θHeadache.

❙General appearance imbecile; talk very childish; does not work because he thinks it will do him harm, or that he is not able to stand it. θHypochondriasis.

Awful faces appear on shutting eyes.

❙❙The sight of high houses always made him dizzy and caused him to stagger; it seemed as if houses on both sides would approach and crush him.

❙Frequently settled upon time he should die. θHypochondriasis.

Google

Thinks he has softening of brain, or some other incurable affection, which almost drives him to despair. θHypochondriasis.

When walking gets nervous, thinks he will have a fit or die suddenly, which makes him walk faster, but soon has to stop, because he gets tired. θHypochondriasis.

Possessed of distressing idea that all his undertakings will and must fail. θMelancholia.

Refused food, saying one who does not work should not eat; but driven by hunger he tried to secretly procure it. θMelancholia.

Feels as if everything at home had changed and that his mind is weak. θHypochondriasis.

He wept and assured every one that he was lost beyond hope for this world; that no one could delude him in that respect, and no one could reason him out of it. θMelancholia.

Thoughts about suicide.

Thinks about killing himself. θCholera.

On crossing a bridge, almost irresistible desire to jump into river; meeting some one prevented it. θHypochondriasis.

Often awakes his wife or child to have some one to talk to. θHypochondriasis.

Constantly talking about his sufferings. θHypochondriasis.

Impulsive, must walk very fast; frequent turns of anxiety.

Always hurried. θProlapsus uteri.

If a time is set, becomes uneasy the day before; is worried and ready long before the time. θChronic diarrhœa. θEpilepsy.

Reserved, sad, taciturn, with dulness of head and throbbing in whole body.

Frequently remains in bed on slightest pretext of being "indisposed." θHypochondriasis.

No real inclination to work. θAsthma.

Does not work, thinking it will do him harm or that he is not able to stand it. θHypochondriasis.

Easily wearied. θHeadache from dancing.

Great weariness and depression. θMelancholia.

Gloomy, dull; wishes to do nothing.

Sad; fear of apoplexy (no apoplexy).

Sad and taciturn, with dulness of head and throbbing in whole body.

Weeping mood.

Melancholic, constantly complains of vertigo.

Great melancholy and weakness of mind with congestion to head.

Google

Melancholy since an undeserved slight; fixed idea that he was neglected and despised by his family; his calling became indifferent to him.

Despaired of help from himself or others. θMelancholia.

Fits of despondency and all kinds of fanciful notions; for example, that whilst walking along street he could not pass a given point without falling; frequently settled on the time he was to die. θHypochondriasis.

Alarmed by vertigo and weakness of l. side.

Apprehension of some serious disease. θHypochondriasis.

Apprehension when ready to go to church or to opera; diarrhœa sets in.

Easily frightened; fears disease may result seriously; weeping mood.

Fear or thinking brings on diarrhœa.

Great nervousness and prostration; fears to be alone, because he thinks he will die; is apprehensive of some serious disease, which almost drives him to despair. θHypochondriasis.

Fears if passing a certain corner or building that he will drop down and create a sensation; is relieved by going in another direction. θHypochondriasis.

Incessant mental distress, respiration 28, pulsations 88. θMelancholia.

Tormented with anxiety. θAsthma.

Frequent attacks of anxiety with weakness in legs, coming on about 11 A.M.; > after drinking a little whiskey. θHypochondriasis.

When walking, becomes faint with anxiety, which makes him walk faster. θHypochondriasis.

Became insensible to all social pleasures and lost all desire for labor. θMelancholia.

Apathy.

Was utterly bereft of all power of will. θMelancholia.

Very irritable when nervous.

So much unstrung and irritated that, without the knowledge of his physician, he sprang up to get into the open air. θMalarial ataxy.

Against whatever was proposed he had the queerest objections. θMelancholia.

She became angry very easily, whereupon she always had to endure for many days stitching pains in chest and cough.

At night very much excited and murmured constantly. θTyphus.

Sometimes nerves got so unstrung that he was in a frenzy of excitement; when seized with these attacks

did not desire to move or talk, but always sought a chair and stubbornly stuck to it.

Thinking intently increases headache and causes dimness of vision.

[3] **Sensorium.** ❙Dulness of head, mental confusion, dizziness, with tendency to fall sideways.

❙Confusion of head during indigestion. θGastralgia.

❙Confusion of head and constipation.

❙Perversion of senses. θIritis.

❙Vertigo, with cerebral congestion.

❙The sight of high houses makes him dizzy, he feels as if they would fall on him.

❙Vertigo when walking with eyes closed, which alarms him; staggers when walking in dark, has to seize hold of things.

❙On stooping while walking he staggers.

❙❙Buzzing in ears; general debility of limbs and trembling.

❙Vertigo in morning, as if turning in a circle, has to sit or would fall. θWith headache.

Vertigo, dim sight, ringing in ears; stomach feels relaxed; > after dinner and from wine; < from coffee.

❙Vertigo in morning with headache. θProlapsus uteri.

❙Once during attack of vertigo, l. arm became paralyzed, remaining so for several days. θHypochondriasis.

❙Alarmed by vertigo and weakness of whole left side. θAsthma.

❙In morning, pain in l. side of head, followed by vertigo and on several occasions by momentary blindness. θHypochondriasis.

❙Cerebral complication. θIritis.

❙Loss of consciousness, faint feeling.

❙Heaviness, especially in occiput. θAsthma.

Giddiness as if drunk, with lassitude and weakness of lower limbs.

[4] **Inner Head.** ❙Painful fulness and heaviness in head, with inability to recollect, glowing red cheeks.

❙Excessive congestion of blood to head, with throbbing of carotids, obliging him to loosen his cravat; heaviness, stupefying dulness of head, great melancholy and weakness of mind.

❙Spells of rush of blood to head, since which objects are misty or seem double.

❙Pulsations in l. side of forehead.

Congestion to head and face, head feels much enlarged.

❙Pain in head, it seems enlarged.

❙Woke up with dull headache over eyes. θHypochondriasis.

Digitized by Google

Boring in l. frontal eminence, < at night in warm bed.
Constant clawing digging in l. frontal eminence, with drawing tearing along l. arm.
Frontal headache during indigestion. θGastralgia.
Complains of a constrictive pain in forehead, as if a small spot, size of a dime, was daily contracting and getting smaller, and thinks as soon as it is drawn together he will be crazy. θHypochondriasis.
At 12 o'clock, violent boring in l. temple.
Has left-sided headache in morning for several hours. θHypochondriasis.
Constantly complains of headache, chiefly confined to r. side, although it is l. eye that is most dim; girl, æt. 10. θMyopia.
Digging pains in r. hemisphere of brain.
Digging, cutting motion through l. hemisphere, from occiput to frontal protuberance, recurs frequently, increases and decreases rapidly.
Dull, pressive, persistent headache encircles calvarium like a wreath.
Stitches from r. to l. ear, as from a knife.
Constant pains in all parts of head, especially in occiput, which deprived him of sleep. θMalarial ataxy.
Pressing pains in whole head, from mental exertion or from dancing; better from firm pressure.
Tendency to headache, especially bad whenever she rose early in morning. θMyopia.
Headache < in open air, in warmth, at night, from light, mental labor, and > from bandaging head tightly.
Congestive hysterical headache.
Headaches of hysterical young women.
Headaches, particularly habitual gastric headaches, to which delicate or literary men are subject.
Head symptoms are concomitants of all other diseases.
Violent pressure in forehead commencing over eyes, spreading upward to coronal suture; in morning; reeling.
In morning pain in l. side of head, followed by vertigo, on several occasions by momentary blindness. θHypochondriasis.
Headache from dancing, with attacks of vertigo.
Pains in head, finally extended to eyes and lower jaw.
Hemicrania; pressive, screwing, throbbing pain in one frontal protuberance, temple or into bones of face; at its height, trembling of whole body, intense nausea, which ends in watery, bilious vomit; lies senseless, eyes closed, shuns light and conversation. θJaundice before attack.

Digitized by Google

Sick headache followed by debility; profuse menses.
Headache, with chilliness and trembling of body.
Awakes with headache, pressure deep in brain, with chilliness whole forenoon.
Headache mostly with chilliness, sometimes with increased temperature.
‖Cerebral dyspepsia.

[4] **Outer Head.** ‖‖Head feels much enlarged, or eye on affected side.
Feels as if bones of skull separated, with increase of temperature.
‖Almost constant boring cutting in bones of forehead, vertex, temples and face.
‖Pressing pains sometimes on vertex, sometimes l. frontal bone, > by pressure or tight bandaging; < from any exhaustive mental labor; letters then run together.
‖Frequent sensation of constriction of scalp, as if something were tightly drawn down over skull. θHypochondriasis.
Itching, creeping, crawling, as from vermin; roots of hairs feel as if pulled upward; she had to scratch all the time.
‖Herpetic eruption on occiput.
‖Burning in scalp, which feels as if drawn tight; cold feeling in eyes.

[5] **Sight and Eyes.** ‖‖Intolerance of light. θWant of accommodation.
‖Photophobia, eyes filled with mucus. θTyphus.
‖Sight worse by candlelight than by daylight. θMyopia.
‖Cannot walk in dark without reeling. θLocomotor ataxia.
‖If objects come closer than 12 or 14, they are indistinct. θWant of accommodation.
‖Far-sighted; has to push book away to see letters.
‖Unable to see to thread a needle, unless she holds it up within an inch or two of her eye. θMyopia.
‖A cloud continually over l. eye in twilight and cloudy weather.
‖Grey spots and serpent-like bodies moved before him.
‖Dull expression of eyes; black motes before eyes, especially before right one. θHypochondriasis.
‖Sight failed for near objects, everything appeared blurred or indistinct. θParalysis of accommodation.
‖Letters become blurred.
‖Photophobia and weak sight, preventing his writing.
‖Right pupil dilated, both acting feebly; sight of left eye diminished. θLocomotor ataxy.
‖Vanishing of sight, he must constantly wipe away the mucus.

Google

An attempt to use eyes, even on coarse work, produced pain in eyes and head. θWant of accommodation.

Such as have been constantly engaged in near work, and obliged to increase power of their glasses from to time to overcome symptoms of asthenopia. θHypermetropia.

Eyes red, shuns light, after straining them while sewing; < in warm room, > in open air.

Pain from brain to eyes. θIritis.

Shooting, itching, biting pain in r. eye, sometimes very violent; excessive, photophobia > towards night.

Sensation of fulness, dryness and heat, especially on moving eyeball. θIritis.

(Case of paralysis of accommodation is reported in which *Arg. nit.*[6], four times daily, worked a brilliant cure; also a case of retino-choroiditis successfully treated by this remedy.)

Dilated pupils. θWant of accommodation.

Right pupil somewhat contracted, both sensitive to light. θLocomotor ataxy.

Dull expression of eyes. θHypochondriasis.

Coldness in eye, with boring pain in head, scalp as if drawn tightly.

Heat and pain in ball on motion and touch.

Eyeball sensitive to touch. θIritis.

Fundus of eye injected, large bloodvessels indistinct.

Ophthalmia, often with intense pain, abating in cool and open air, but intolerable in a warm room.

Purulent ophthalmia.

Syphilitic form of iritis.

Chemosis with strangulated vessels, most profuse purulent discharge, even cornea beginning to get hazy and looking as though it would slough.

Cornea opaque; ulceration of cornea in newborn infants; profuse purulent discharge from lids.

Destruction of tissue, as ulcer of cornea, in one case with pains like darts through eye mornings, > evenings; kerato-iritis with violent congestion of conjunctiva; a vascular eroded cornea, with terrific pains from vertex into eye and with burning heat in eyes.

From local application of drug, most violent inflammation of conjunctiva of lids and ball ensues, with profuse muco-purulent discharge which is not excoriating to lids.

Acute granular conjunctivitis, conjunctiva intensely pink or scarlet, discharge profuse, inclined to be muco-purulent.

Conjunctiva both ocular and palpebral, becomes congested, swollen and infiltrated, with scarlet redness.

Violent itching of nose, must rub it constantly.
Nasal bones painful as if bruised.
Nasal catarrh, constantly hawking thick tenacious mucus.
Nasal discharge like boiled starch.
Acute coryza.

[8] **Upper Face.** Stupid weary look. θHypochondriasis.
Complexion sallow. θHypochondriasis.
Face blue, heavy breathing, pulseless.
Looks prematurely old; also in cholera infantum.
Face: sunken, pale bluish; leaden colored, with nausea; yellow, dirty looking.
Circumscribed red cheeks.
Left side swollen, with great heat and burning; lips much swollen and burning.
Prosopalgia.
Neuralgia of head and face, which almost takes away her eyesight. θDyspepsia.
During attack of prosopalgia, sour taste.
Infraorbital neuralgia, l. side.
Sweat stood in drops on his face. θTyphus.
Lupus.

[9] **Lower Face.** Hard, pale blotches in vermilion border of upper lip, sore to touch.
Tetter on chin.
Could not separate his jaws, can only swallow liquids.
Food escapes from mouth during chewing.
Lips: trembled when he spoke; and finger nails blue. θTyphus.
Lips dry and viscid, without thirst.

[10] **Teeth and Gums.** θOdontalgia.
Teeth pain, especially when chewing, eating sour things or putting anything cold into mouth; grumbling, digging pains as if becoming carious.
Teeth sensitve to cold water.
Teeth black. θTyphus.
Gums tender and bleed easily; but neither painful nor swollen.
Gums inflamed and stand off from teeth in shape of indentations.
Chronic irritation of gums.

[11] **Taste and Tongue.** Taste: sweetish bitter; sour; metallic, astringent; inky; lost.
Speech stammering. θTyphus.
Cannot talk; spasms of muscles of tongue and throat.
Tongue coated white; yellow white.
Red, painful tip of tongue, papillæ erect, prominent.
Tongue dry, hard as a chip, and black like teeth. θTyphus.

Digitized by Google

Red streak down middle of tongue.
Tongue dry, with thirst.
Glossitis.
Tongue white and moist (*Pulsat.* after *Arg. nitr.*).
Tongue furred, with clean edges. θDyspepsia.

12 **Inner Mouth.** Fetor from mouth; morning.
Ptyalism.
Inner mouth covered with a whitish-grey coat.
Tough phlegm in mouth.

13 **Throat.** Chronic angina.
Uvula and fauces dark red.
Chronic induration of tonsils.
Thick tenacious mucus in throat, obliging him to hawk; causing slight hoarseness.
Rawness, soreness; scraping in throat, causes hawking and cough.
Sensation as if a splinter was lodged in throat, when swallowing, eructating, breathing, stretching or moving neck.
Wartlike excrescences feel like pointed bodies when swallowing.
Felt as if he had a stick in throat when swallowing.
Sense as if throat was contracted, swallows with pain. θDyspepsia.
Swallowing difficult. θTyphus.
Food feels as if lodged in throat. θDyspepsia.
Burning and dryness in fauces and pharynx.
Paroxysms of cramp in œsophagus.

14 **Appetite, Thirst. Desires, Aversions.** Appetite fair. θHypochondriasis.
Appetite sometimes fair enough, is generally very bad. θMyopia.
Appetite good, but nearly all kinds of food distressed, whether abstemious or eating heartily. θHypochondriasis.
Appetite dulled by pain. θGastric ulcer.
Loss of appetite; much thirst, or no thirst.
Refuses drink unless it is sweetened, yet thirsty.
Diminished appetite, frequent eructations, nausea with humming in ears. θLocomotor ataxia.
Want of appetite. θMelancholia.
Most fond of plum sauce, though swallowing was difficult. θTyphus.
Irresistible desire for sugar.
Desire for strong cheese.

15 **Eating and Drinking.** Eating relieves squeamishness, but increases gastric pains.
Warm fluids relieve, cold aggravate, pains in stomach.

Digitized by Google

‖Eating, or a swallow of wine, relieves head; ‖coffee aggravates.
Sour things lessen nausea.
‖Pain immediately after eating. θDyspepsia.
‖Ten minutes after eating, flatulence. θDyspepsia.
Nausea after each meal, mostly after dinner.
‖Soon after taking food pain in stomach begins and continues so long as food remains down; vomiting results about an hour after. θGastric ulcer.
‖Pains come on soon after eating, sometimes immediately on swallowing, as if œsophagus was irritated as much as stomach. θGastralgia.
‖Pain after every meal, half an hour after eating, epigastric, extending to l. side. θDyspepsia.
‖Pain after eating, sometimes directly, sometimes an hour or more, with much belching and rumbling in bowels. θDyspepsia.
‖Pain after eating extends from pit of sternum to round along under heart, corresponding to situation of stomach. θGastric ulcer.
‖After a hearty meal, melancholia, especially after liquid food. θHypochondriasis.
‖By a very heavy meal, epileptiform convulsions are brought on.
‖After drinking, dyspnœa; drinks suffocate. θCholera.
‖‖Fluids go "right through him." θCholera infantum, etc.

16 **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough. θCholera.
Heartburn.
Wind presses upward, but œsophagus seems spasmodically closed, ineffectual effort to eructate.
‖‖Most gastric ailments are accompanied by belching.
‖‖Belching after every meal; stomach as if it would burst with wind; belching difficult, finally air rushes out with great violence.
Tasteless, ‖or sour eructations, with constriction of bowels.
‖‖Eructation relieves.
‖‖Flatulence passes upward in quantities, ‖inducing faintness. θDyspepsia.
‖Suffers much from flatulency by mouth. θDyspnœa.
‖Frequent eructations and flatulency.
‖Great accumulation of gas in stomach, tasteless; when gas was forming he was greatly distressed, melancholic, nervous; relieved by belching. θHypochondriasis.
‖Loathing of food. θDyspepsia.
Deathly nausea with headache, not abating after vomiting.
‖Nausea after each meal, most after dinner.
‖Nausea with constant and troublesome efforts to vomit.

Digitized by Google

‖Awakens at midnight, with oppression at stomach as from a heavy lump, inducing vomiting; in morning throws up glairy mucus which can be drawn into strings; during afternoon desire to vomit, tremulous weakness.

‖Vomit streaked brown, flocculent, like coffee-grounds. θYellow fever.

‖The vomited substances tinge the bedding black.

‖Incessant vomiting of food, with a smooth, dry tongue, apparently destitute of papillæ.

Vomiting and diarrhœa, with violent colicky pains; with anxiety in præcordia.

[17] **Scrobiculum and Stomach.** ‖Flatulent indigestion. θAfter diphtheria.

‖Flatulent indigestion; loud rumbling. θDyspepsia.

‖‖Flatulent dyspepsia.

‖Irritative flatulent gastralgia.

Sensation as if stomach and œsophagus were filled with food; food oppresses, lies like a weight.

‖Pain under manubrium sterni. θPharyngitis.

‖Fulness of stomach; painful swelling at pit, with great anxiety.

‖During pain in stomach it becomes swollen.

‖Periodic constrictive sensation in stomach.

Gnawing at stomach; a sort of hunger with nausea.

‖Gnawing pain like something pulling and as a weight. θDyspepsia.

‖Constant drawing and gnawing, increasing daily to violent attacks, ending in vomiting of clear, saltish water.

‖‖Gastrodynia. ‖Gastralgia.

Throbbing and trembling; weakness at pit of stomach, relaxed feeling.

⁝Gastritis with acid vomiting.

‖Inflammation of stomach.

‖Ulcerative pain in stomach after dinner.

‖Perforating ulcer of stomach.

‖Small spot between xiphoid and navel, sensitive to slightest pressure; pain radiates in all directions; increases and decreases gradually.

Stomach feels relaxed; < in wet weather, after warm drinks, sour things, or smoking; > from alcohol; at its height, nausea, < smelling coffee. Sometimes a forerunner of gout.

‖Terrific spasms across lower part of chest and in stomach (due to ulceration in mucous membrane of stomach and duodenum) coming on at about 9 o'clock P.M., lasting all through night.

‖‖Pain in l. side of stomach, below short ribs, more

Digitized by Google

intense during inspiration and on touching parts. θDyspepsia.

Stitches in scrobiculum and short breathing. θCholera.

Stinging, ulcerative pain in l. side of stomach, < from touch and deep inspiration.

Regularly towards midnight, attacks of pain preceded by vomiting of slimy and bilious fluid.

Gastralgia in women with irregular menses, too early and copious; vomiting a sour, bitter, yellow, green, tough fluid.

Gastralgia, with pains through to sacrum, anxiety, cold sweat.

Gastric derangements are accompanied by belching.

Pain in stomach here and there, frequently for weeks at a time, with nausea and vomiting.

After ice-cream, gastralgia, pain radiating in all directions; < after food.

[18] **Hypochondria.** Well marked spasm of diaphragm. θCholera asiatica.

Cutting like knives in hypochondria, chiefly in l. and at epigastrium. θGastralgia.

Great pain in epigastrium, extending around to cardiac region and l. shoulder blade. θDyspepsia.

Pain at epigastrium and under l. ribs immediately after eating, with flatulence, loud rumbling. θDyspepsia.

Region of liver sensitive to pressure; periodical attacks of pain about liver and navel, with nausea, retching and vomiting of tough phlegm.

Tension as from a band around hypochondria. θAsthma.

[19] **Abdomen.** Griping in bowels. θCholera.

Shooting pains through abdomen and stomach. θProlapsus uteri.

Pain in l. side of abdomen. θDyspepsia.

Abdomen swollen and distended.

Fulness and heaviness of abdomen, with anxiety, impeding respiration; after supper.

Rumbling, gurgling; wind cannot pass.

Tension of abdomen, cannot bear to be touched.

Constriction in bowels, as if tightly tied with a band.

Stitches dart through abdomen like electric shocks, especially when suddenly changing from rest to motion; l. side.

Bearing down in hypogastrium.

Hemorrhoidal colic, mornings, during cold, misty weather; > after stool.

Periodical abdominal pains. θAsthma.

Loud rumbling with cutting pain. θDyspepsia.

Flatulence. θDyspepsia.

greenish, bloody, with tenesmus; green, watery, sour taste in mouth.
‖‖Green stools; sopor, large pupils.
‖Green, watery, sour stools. θCholerine.
‖Stools like spinach flakes; passed forcibly, with much flatus; belching and stool relieve pain.
Painless lienteric stools.
‖Stool copious, fluid, followed by vomiting.
‖Tænia or thread-worms; the latter, especially with much itching at anus; pieces of tænia with stool.
‖Hemorrhoids with burning and tenesmus. θAsthma.
‖Hemorrhoids; blind, very annoying. θMelancholia.
‖Bleeding from anus. θTyphus abdominalis.

[21] **Urinary Organs.** Touching region of kidneys increases pain to highest degree.
‖Paralytic debility of lumbar region and kidneys.
Acute pain about kidneys, extending down ureters to bladder; < from slightest touch or motion, even deep inspiration.
Ulcerative pain in middle of urethra, as from a splinter.
⁞Chronic induration of urethra.
‖No triple phosphates but epithelium in urine. θAlbuminuria.
‖Urine highly colored and scanty, passes gravel. θSubacute pleuritis.
‖Urine dark red, without albumen; deposits red crystals of uric acid.
‖‖Urine passed unconsciously and uninterruptedly.
‖‖Incontinence of urine at night, also by day.
‖‖Urging to urinate; urine passes less easily and freely.
‖Urine burns while passing, urethra feels as if swollen, with feeling as if last drops remained behind.
Stream of urine spreads asunder.
‖Bleeding of urethra; painful erections. θGonorrhœa.
‖Urging to urinate, < from obstruction of bowels. θAsthma.
‖Scanty and rare emission of a dark yellow urine.
When going to have a stool, urine passes first, then feces involuntarily.
‖Retention of urine; bladder distended; dribbling of urine. θLocomotor ataxia.
‖Discharge of urine in drops. θProlapsus uteri.
‖Urine contained blood, was passed often and little at a time, in drops. θNephritic colic.
‖Quick urging to urinate; flow copious and clear.
‖Sensitiveness near orifice of urethra.

[22] **Male Sexual Organs.** ‖Impotence; erections, but they fail when coition is attempted.

Google

Want of desire, organs shrivelled.
In connection with spermatorrhœa. θWant of action of ciliary muscles.
Priapism; dysuria; bloody urine.
Coition painful; urethra as if put on stretch, or sensitive at its orifice.
Ulcers on prepuce small, covered with pus; later spreading, bowl-shaped, with a tallowlike coating.
Contusive pain, with enlargement and hardness of r. testicle.
Orchitis.
Chancre in urethra.
Urethra swollen, hard, knotty and painful.

[23] **Female Sexual Organs.** Cutting pain in r. ovarian region and back.
Pain in ovarian region radiating to sacrum and thighs. θMetrorrhagia.
Coition painful, followed by bleeding from vagina.
Pains like sticks or slivers in and about womb, excited whilst walking or riding and by evacuation of bowels. θProlapsus uteri.
Uterus softened; metrorrhagia with horrible pains in abdomen and hips.
Granulations on cervix uteri.
Prolapsus with ulceration of os or cervix.
Ulcers of uterus, bleeding; hemorrhage of short duration; shooting pains through abdomen and stomach. θProlapsus uteri.
Uterine hemorrhage with much trouble in head.
Metrorrhagia returns in short attacks; region of ovaries painful, with pains radiating to sacrum and thighs.
Metrorrhagia in young widows. θProlapsus uteri.
Metrorrhagia in sterility and in those who have borne no children. θProlapsus uteri.
Metrorrhagia with nervous erethism at change of life.
Climaxis: flushes; congestive headache; nosebleed; congestion to the chest; melancholy; nervous erethism; itching of skin.
Always coughs before periods. θDyspepsia.
Monthly period is regular, but attended with a great deal of pain, coming on a day before each period, makes her feel horribly faint. θGastric ulcer.
Menses: too early, profuse, long lasting; with headache; cutting in small of back and groin; at night tormenting pressure in præcordia; internal trembling in epigastrium.
Menses irregular, too soon or too late, too copious or too scanty but always with thick coagulated blood.

Digitized by Google

Menses clotted. θProlapsus uteri.
Menses too early, too profuse and too long. θProlapsus uteri.
Menses now too soon and at other times too late; irregular. θProlapsus uteri.
Menses scanty. θAsthma. θProlapsus uteri.
Her monthly period lasts one day only, pain ceasing with a free discharge. θGastric ulcer.
Leucorrhœa mucous, bloody, corroding, yellow and profuse. θProlapsus uteri.

[24] **Pregnancy. Parturition. Lactation.** Disposed to abortion.
During pregnancy stomach feels as if it would burst with wind; head feels expanded.
Puerperal convulsions; spasms preceded by a sensation of general expansion, mostly of face and head.
Sometimes just after an attack she lies quiet, but before another she becomes very restless; has a presentiment of an approaching attack.
Scirrhous mammæ.
Nipples sore from nursing.
Suckling infants die early; have marasmus.
From weaning, diarrhœa.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarse voice.
Chronic aphonia.
Internal soreness of larynx and pit of throat; < in morning.
Phlegm in larynx causing a rattling, whistling breathing, until removed in small lumps by cough.
Rawness, soreness high up in trachea, when coughing.
Chronic laryngitis of singers; raising voice causes cough.
Chronic catarrhs and laryngitis.
Small, round, greasy lumps of mucus in larynx, relieved by a slight cough.
When in bed, rattling in larynx or trachea synchronous with pulse. θAphonia.
Tickling, itchiness and sometimes burning in larynx. θAphonia.

[26] **Respiration.** Breath very offensive. θMyopia.
Many people in room seem to take away his breath.
Motion, going up-stairs or bodily exertion cause asthmatic attacks; face congested; palpitation. θChronic asthma.
Short breathed, with deep sighs; much oppression; violent attacks of dry, spasmodic asthma, forcing him to rise and walk about.
Respiratio abdominalis.

Digitized by Google

‖Upper abdominal walls are drawn in during inspiration; expand during expiration; effort to breathe deeply takes away breath at once. θParalysis of diaphragm.
‖Spasms of respiratory muscles; great constriction and stitches in epigastrium; cannot talk; drinking suffocates; even a handkerchief before nose impedes breathing; agony, thinks of killing himself. θCholera.
‖Respiration short. θTyphus.
‖Respiration oppressed, sometimes interrupted by cough. θTyphus.
‖Awakes with attacks of suffocation. θAsthma.
‖Can breathe deeply, but cannot retain breath long. θHeadache from dancing.
Panting, quick, sibilant breathing.
‖The effort to breathe deeply at once took away his breath. θLocomotor ataxia.

27 **Cough.** ‖Very much cough for two months, with pain and sense of soreness in l. side, preventing lying on it, thus interfering with sleep. θSubacute pleuritis.
‖Evening cough, tobacco smoke becomes intolerable.
Irritating, tormenting cough, evening and night.
Suffocative cough at noon.
Paroxysms of cough are brought on by: phlegm in larynx; irritation under sternum; a fit of passion; laughing; stooping; smoking; ascending stairs; when lying down, and on awaking.
; Acute period of whooping cough, during convulsive stage.
‖Whooping cough.
Gets out of breath with cough.
‖Bloody sputa. θTyphus.
‖Expectoration purulent, mixed with light blood.
‖Suddenly coughed up blood. θDuring catamenia.
Catarrh at first dry, later loose, with rattling cough, profuse sweat, sickly look, hollow eyes, restless sleep; expectoration yellow.
Belching, or straining to vomit, during attack of cough.
‖Often during nights, fits of coughing with gagging and vomiting. θAphonia.
‖Nocturnal aggravation, with a dry cough and flow of saliva, with some expectoration of mucus striped with blood. θAphonia.
‖Cough with occasional bloody sputa. θDyspepsia.
‖Occasionally spat blood; sputa are always more or less streaked with it. θSubacute pleuritis.

28 **Inner Chest and Lungs.** Sensation of warmth between scapulæ and sternum, gradually changing into a pressure in epigastric region.

Digitized by Google

Pain in chest and between shoulders, half an hour after eating, lasting two to three hours. θDyspepsia.

Heavy feeling on chest, with belching.

Feels in morning as if ligated with cords around chest or waist. θDyspepsia.

Feels like a bar of iron around her chest. θDyspepsia.

Aching, tensive pain in chest, in various places, of size of a half dollar.

Dead pain in lower part of chest, l. side, coming on after eating. θGastric ulcer.

Severe cramps or spasms of chest, once or twice a week, coming with a sudden, violent piercing in chest, pulse stopped, hands and face icy cold; in a few moments pulse began to rise, face became red, she cried out violently several times, and had such a working and rumbling in her chest as if something must give way; at same time whole body shook and trembled as in fever and ague; tumult gradually subsided, a profuse, warm sweat set in, she fell asleep, and nothing remained but great exhaustion.

Deep pains in chest not increased by coughing. θPneumonia.

Violent pain in l. side. θDyspepsia.

Bursting pain after going up-stairs; has to press with both hands.

Stitching pains in region of fifth rib, left side, with frequent blood-spitting.

Coarse, crepitant râles limited to a spot behind l. fifth rib.

No cough; respiratory murmur scarcely audible in several places; only in upper part of lungs it was dry, vesicular and more acute. θAsthma.

Lung capacity much diminished; can attempt a deep breath without pain, but thorax is but slightly elevated thereby.

Subacute pleuritis on l. side, indicated by feebleness of breathing opposite seat of pain, with catching breathing in other parts of lung.

Subacute pleuritis in phthisical subjects.

Chronic pleurodynia.

[29] **Heart, Pulse and Circulation.** Constant anxious feeling in region of heart; burning feeling.

Fearful pains about heart; they thought she would die; breathing almost impossible, choking.

Anxiety, with palpitation and throbbing through whole body, especially head and abdomen; when sitting quietly he frequently thinks his heart stops beating; suddenly he will feel two strong beats apparently arising from stomach and passing into head. θHypochondriasis.

Digitized by Google

‖Violent palpitation from slightest mental emotion or sudden muscular exertion; in a horizontal position evenings, in bed, chest worse.

Palpitation: with faintish nausea; with dyspepsia; at night.

‖Attack of palpitation, with anxiety and trembling while riding, compelling him to get out of wagon and walk, ‖and that really fast, too. θHypochondriasis.

‖Palpitation obliges her to press her hand hard against her side for relief. θGastric ulcer.

Heart beats like a sudden falling from above towards middle, with a bursting feeling in upper chest.

‖Heart's stroke somewhat more frequent and rather weak. θIncontinence of urine.

‖Heart's action irregular, intermittent, with an unpleasant sensation of fulness; exertion causes strong beating, < when noticing it; > when moving about.

‖Heart's stroke feeble. θTyphus.

‖Pulse when sitting quiet for a short time is 70, full and soft. θHypochondriasis.

‖Pulse dicrotic, finally small, could not be counted. θTyphus.

Sudden violent piercing in chest, pulse stopped, hands and face icy cold; then pulse rises, face reddens; violent crying, whole body trembled, warm sweat broke out, and sleep ended paroxysm.

[30] **Outer Chest.** Violent pain in muscles of chest.

Chest hurts when lying on it.

[31] **Neck and Back.** ‖Indurated glands on neck, with suspicion of former syphilis.

Acute pains in dorsal region after a fall.

‖Suffers much from pains across loins. θSubacute pleuritis.

‖Lower lumbar region is slightly sensitive to pressure. θHypochondriasis.

‖Complains very much of pain in lower back, coming on after breakfast, sometimes remaining all day, sometimes going away soon after breakfast, but generally much increased during monthly. θGastric ulcer.

‖Frequently pains in back and lower limbs of a cramping character, especially in l. leg. θHypochondriasis.

‖Backache, especially at night, with great weakness of legs. θProlapsus uteri.

Tensive, squeezing pains in back.

Nightly pains in back.

‖Pains in back, cannot walk with eyes closed or in dark. θLocomotor ataxia.

‖Lower lumbar region slightly sensitive to pressure.

Digitized by Google

‖Cutting in small of back and groin. θMenorrhagia.
‖Pain in small of back, relieved when standing or walking; but severe when rising from a seat.
Pain in back and lower ribs during pregnancy.
Weakness in sacro-iliac symphysis, as if bones were loose.
Sense of weight in lower part of sacrum and os coccygis, > standing; < sitting and with stool.
Small of back feels weary; heaviness and drawing in loins, with debility and trembling of legs.
‖Crampy pains in back and legs. θHypochondriasis.
Stiffness, heaviness, paralytic pain from sacrum down along pelvis and hips.

[32] **Upper Limbs.** ‖Drawing in shoulders. θMelancholia.
‖Pain in l. shoulder and arm. θDyspepsia.
Paralytic drawing pain in r. arm.
Nightly boring pain in ulna.
Left arm heavy.
Pimple on hand near wrist, feels as if a splinter was in it.
Spasmodic contraction of adductors of fingers, can hardly separate them; fingers half clenched.
‖Hands tremble. θTyphus. θAsthma.
‖Pain extending down into middle finger of l. hand. θDyspepsia.
Left ring and little fingers insensible; hand trembles.
Numbness of finger tips.
‖Nails blue. θTyphus.

[33] **Lower Limbs.** ‖Sciatica.
‖Lassitude of lower limbs, with dizziness as from intoxication.
‖Paralytic heaviness and weakness of legs, she does not know where to put them.
Staggering gait.
‖Debility and weakness of lower limbs the whole afternoon; with sick feeling, dread of work, drowsiness, chilliness and sickly appearance.
‖Limbs, especially his knees, start up at night awaking him.
Legs, especially l., often stiff and rigid, as if "gone to sleep."
‖Legs feel as if made of wood, or padded, with insensibility to touch, diminished warmth, jerks in toes, tottering, irresolute gait; cannot walk with eyes shut. θLocomotor ataxia.
‖Calves weary, as after a long journey.
Pains in calves torment him all night.
Emaciation, particularly of legs; also with paralytic weakness.
Itching pustules on l. shin bone, one of which developed into an ulcer.

Digitized by Google

‖Œdema of feet. θPneumonia.

[34] **Limbs in General.** ‖‖Lassitude, weariness of forearms and legs.

‖‖Trembling.

‖Paralysis of extremities.

‖Rheumatic tendency in r. arm and thigh. θAsthma.

‖During day, tormented with formication of arms and legs.

‖Chorealike convulsive motion of limbs; legs drawn up; arms jerked outward and upward.

‖Says his legs are "shaky" and his hands tremble. θHypochondriasis.

[35] **Rest. Position. Motion.** Rest: headache.

‖She felt much < in rest, than when walking in open air.

‖Is obliged to lean forward in order to get breath. θAsthma.

‖Unable to walk or even stand. θAfter a fall.

She was lying motionless on her back, since every motion of her body caused her inexpressible pain; touching region of kidneys increased these pains at once to highest degree.

‖Unable to sleep on her r. side from its bringing on palpitation of heart. θGastric ulcer.

Must lie down: coryza with frontal headache.

Lying down after dinner: noise in larynx.

‖Lying on abdomen: stitches in back.

‖Lying on r. side: pain in stomach; palpitation.

‖Uncomfortable lying on l. side.

When sitting: heaviness in sacrum; pain in small of back; gets very sleepy.

Cannot sit on account of pain in sacrum.

While standing: drawing in side of abdomen; pain in small of back better.

Stooping: causes pain; cough; digging in sacrum.

Chewing: < toothache.

Moving neck: < sore throat.

Lifting arms high: < stomachache.

Worse from opening or spreading out hands.

Rising from seat: backache.

Bending arms: chest muscles pain.

Putting boots on: < pain in chest.

Worse when moving part and lifting diseased limb.

Quick turning of upper part of body: hurts in mammæ.

Changing quickly from rest to motion: stitches through abdomen.

Inclination for motion.

Worse from moving: headache; eyeball, heat, fulness; sensation of splinter in throat when moving neck;

Digitized by Google

pain about kidneys; sudden muscular exertion causes palpitation; confusion, dulness and pain, with hemorrhage.

The slightest motion after having been in rest increases headache.

Curious feeling makes him walk very quickly.

During walking: stitches from liver into chest; pain in small of back; tottering; afraid to walk, giddy.

Must rise and walk about: short-breathed with deep sighs.

After a long walk: ebullitions at night.

After a short walk: dyspnœa.

Walking or standing: relieves pain in small of back.

‖Worse from walking fast θAsthma.

Goes to l. side instead of straight forward.

Going up-stairs: dyspnœa; cough; bursting pain in chest; palpitation; pain in calves.

Ascending: < heart symptoms.

‖On exposure to any exhausting labor, he always had a pain which affected whole head, and which made the letters when reading run into one another.

Bodily exertion: dyspnœa; strong beating of heart.

After bodily exertion during day, attacks of suffocation at night.

[36] **Nerves.** ‖Walks and stands unsteadily, after hard mental labor, especially when he thinks himself unobserved.

‖Restless, in continual motion. θHeadache.

‖Very restless. θDyspepsia.

‖Great nervousness and prostration. θHypochondriasis.

‖Nightly nervousness with heat and fulness in head.

‖Nerves so unstrung that he got into a frenzy of excitement. θHypochondriasis.

‖Hysteria.

‖Nervous, faintish, tremulous sensation, as if a severe disease was going to attack him.

‖Tremulous weakness, accompanied with general debility, as after great physical exertions and apathy.

‖Trembling and tremulous sensation.

‖Trembling of whole body, with headache. θEye diseases.

‖‖Periodical trembling of body.

‖Chorea, with tearing in legs.

‖Creeping and jerking in various parts, more in paralyzed parts.

‖Every succeeding spasm is announced by a very marked degree of restlessness. θMeningitis. θHydrocephalus.

‖‖Convulsions preceded by great restlessness.

‖Convulsions with great restlessness and tossing about, preceding each convulsion. θScarlatina.

Digitized by Google

Epileptiform convulsions. θMeningitis.
Epilepsy from fright, during menstruation; at night; pupils always dilated for a day or two before.
Very weak and feeble. θProlapsus uteri.
So weak, must lie down; then becomes apathetic, with yawning; cold shuddering.
She feels so debilitated she is scarcely able to walk across room, complaining a good deal about rigidity in calves.
Debility for several days after sick headache.
Prostrated state in yellow fever.
Paralysis generally one-sided.
After a severe illness, most after diphtheria. θWant of accommodation of ciliary muscles.
Incipient paralysis.
Any voluntary motion of body was for a long time impossible for him. θTyphus.
Voluntary motion impossible; l. side indescribably weak.
Paraplegia from debilitating causes.
Paralysis after diphtheria.
Completely apathetic. θHeadache.

37 **Sleep.** Such a weakness in all her limbs that she was obliged to go to bed, where she frequently fell into a soporous condition with yawning, and a cold shudder over whole body, and lost all her appetite.
Sleepless at night, during day drowsy. θHypochondriasis.
Is prevented from falling asleep by fancies and images before his imagination.
After long wearisome fatiguing night watching.
Much excited at night; murmured constantly; nothing but shaking would arouse him; his eyes are scarcely open before he closes them again. θTyphus.
Ebullitions at night after a long walk.
At night troubled with throbbing in head, must get out of bed; when he does sleep he is annoyed with horrid dreams. θHypochondriasis.
Drowsy by day, sleepless all night.
Sleep is short; awakened often by attacks of suffocation; must rise and open window.
Restless sleep, awakes almost every hour, disturbed with many dreams.
Sleep much broken, especially forepart of night, with horrible dreams. θHypochondriasis.
Sees departed friends, the dead, ghosts at night; dreams of putrid water, of serpents, which fill him with horror.
In the morning, dreams he is hungry; this awakens him, and he finds he has a violent spasm of stomach, with hunger, nausea and flatulence.
Not refreshed by a night's rest. θSubacute pleuritis.

Digitized by Google

❙On awaking: headache in morning, limbs feel bruised, aching in side of chest; ❙from a good sleep, dull headache over eyes; spasms return.
❙Cannot sleep at night because he is "so nervous." θHypochondriasis.
❙Palpitation at night in bed; must get up and go out of house to get relief. θHypochondriasis.

[38] **Time.** ❙❙Worse at night: heat in head, headache; nose stopped up; throat dry; gastralgia; ❙colic; diarrhœa; ❙much urine; cough; hoarseness; beating of heart; epileptic attacks; pains in chest, oppression; ❙spasms; nervous; itching of skin.
After midnight: chorea >, stools <.
❙❙Waking at 2½ A.M. several mornings. θDiarrhœa.
Morning: vertigo.
❙Worse in morning: eyes; fetor from mouth; gastralgia; hunger; colic; nervousness; sweat; soreness in larynx.
❙Very languid, < early part of day. θMyopia.
Forenoon: chill and fever.
❙Nervous attacks about 11 o'clock A.M., relieved by stimulating drinks. θHypochondriasis.
Noon: tickling, suffocative cough.
Afternoon: headache >; stitches in l. forehead; exhausted, faint.
❙Feels faint towards evening. θGastric ulcer.
Evening: cough.
❙The day half is to the night half as 3: 2.
❙❙Day half, more cough; night, diarrhœa.

[39] **Temperature and Weather.** Worse from cold diet, > from warm.
Worse from warmth of bed: pains; sweat.
Warmth: headache <.
Warm drinks: stomach <.
❙Worse working over a fire: blepharitis.
Aggravation in a warm room: eyes.
Worse in Summer: asthma.
Chill from being uncovered; wrapping up causes a smothered feeling.
❙Always kept himself covered, because he was easily chilled.
Heat, with aversion to uncover.
❙❙Utter insensibility of body, except a sensitiveness of lowered temperature, even from removing clothes when dressing bed-sores. θTyphus.
Worse from cold: ❙asthma in cold weather, from taking cold; ❙chill when uncovered, yet feels smothered if wrapped up; after thorough exposure to cold, bones of skull pain; teeth sensitive to cold water.

Digitized by Google

After eating ice-cream: pain in stomach.
Worse in wet weather: stomach.
Open air: vertigo and headache <; eyes >.
❙Indifference to moist and damp weather, longing for fresh air. θPneumonia.
❙Irresistible inclination to leave bed and sit by open window; every time he sat by window he felt much refreshed. θPneumonia.
❙❙Asthma drives him to open window; if windows are closed, he becomes restless; at night he wakes up as if suffocating, runs to window to breathe.
❙❙They had to leave a window open, day and night, in March, for when it was shut patient became restless. θTyphus.
Generally > in open air, < in-doors.
❙Amelioration in cool, open air.
Generally feeling > in open air, particularly catarrhs (eyes, stomach).
❙❙Ophthalmia less; stomach relieved in open air.
In rest he feels much more unwell than when walking in open air.
Better from washing or bathing with cold water.

40 **Fever.** ❙Chilliness, with nausea.
❙Chilly: with many complaints; with cold hands and feet.
❙Constant chilliness up back and over shoulders; < after meals; < coming into room from open air.
General chill followed after a short interval by general heat; the former lasting longer, and returning quickly on uncovering, even during heat; the latter with perceptible pulsation of l. temporal artery; both stages without thirst.
❙Night sweats.
Morning sweat.
❙Evening chill followed by sweat. θTyphus.
❙Skin dry, but not very hot.
Temperature sunken.
Intermittent fever, with pulmonary hemorrhage; generally no thirst.
❙Malarial fever in a lady, æt. 75; constant retching, most intensely bitter taste, with a desire for fresh air (followed by *Rhus tox.*).
Profuse sweat: it stands out on face in beads; stitches in side, cough during attack.
Sweat and chilliness, as soon as he gets warm in bed.
❙Gastric intermittent.
: Typhus abdominalis.

41 **Attacks, Periodicity.** ❙Attacks increasing and decreasing quickly, or gradually increasing and decreasing.

Periodical pains in abdomen.

‖Pains in skull sometimes remit, and are followed by more violent hemicrania.

‖Asthmatic attacks at night, with rapid pulse.

‖Moral and nervous disturbances come on in quite regular paroxysms. θProlapsus uteri.

[42] **Locality and Direction.** Right: headache; digging in hemisphere of brain; pupil dilated; shooting itching biting pains in eye; pupil contracted; contusive pain in testicle; cutting in ovarian region; paralytic pain in arm.

Left: headache; arm paralyzed; weakness of whole side; pains side of head; throbbing in forehead; boring clawing digging in frontal eminence; drawing tearing along arm; boring in temple; dimness of eye; digging and cutting through hemisphere of brain; sight of eye diminished; boring above eye; upper lid fallen; deafness; face swollen; neuralgia under eye; pain in epigastrium extending to side; cutting in hypochonder; pains from epigastrium round to shoulder blade; pains in abdomen; constriction in abdomen; soreness in side; in lower part of chest; dead pain; violent pain in chest; stitching pain in region of fifth rib, and crepitant râles; subacute pleuritis; crampy pain in leg; pain in shoulder and arm; in middle finger; ring and little fingers insensible; stiffness of leg; on shin bone, itching pustules.

In various places, of the size of half a dollar, aching, tensive pains in chest.

From r. to l. ear: stitches.

From occiput to frontal protuberance: digging cutting.

Spreading upward: pressure in forehead, to coronal suture.

Encircling calvarium: dull pressive pain.

Radiating: to sacrum and thighs, pain in ovarian region; in all directions, pain in stomach.

Through to sacrum: gastralgia.

Bearing down: in hypogastrium.

Following ureters: acute pain in kidneys.

[43] **Sensations.** Head feels enlarged with congestion; eye feels enlarged; as if bones of skull separated; as if a splinter was lodged in throat, or as if he had a stick in it; or as if food had lodged there; like sticks or slivers in and about womb; as of a splinter in pimple near wrist; as if houses on both sides would approach and crush him; as if everything at home had changed; as if turning in circle; as if drunk; as if a small spot in forehead was contracting and getting smaller, thinks as soon as it has drawn together he will be crazy; as if something was

Google

tightly drawn over skull; itching as from vermin on head; roots of hair as if pulled upward; nasal bones as if bruised; as if teeth were becoming carious; stomach as if it would burst with wind; oppression as from a heavy lump in stomach; as if stomach and œsophagus were filled with food; as of a band around hypochondria; pain in urethra as from a splinter; urethra as if swollen; as if last drops remained in urethra; urethra as if put on stretch; as if ligated with cords around chest; as if sacral bones were loose; legs as if made of wood.

Stitches: in chest, after anger; from r. to l. ear like a knife; in scrobiculum and stomach; like electric shocks through abdomen; in epigastrium; in region of fifth rib, l. side.

Darting pains: in eyes.

Piercing pains: in chest with cramp.

Cutting: like knives in hypochondria and epigastrium; in abdomen; in r. ovarian region and back; in small of back and groin.

Stinging: in l. side of stomach.

Shooting, itching, biting in r. eye; through abdomen and stomach.

Boring: in l. frontal eminence; in l. temple; and cutting in bones of forehead, vertex, temples and face; above l. eye; in ulna at night.

Digging: in r. hemisphere of brain; and cutting through l. hemisphere of brain; in teeth.

Clawing digging: in l. frontal eminence.

Grumbling digging: in teeth.

Griping: in bowels.

Gnawing: at stomach.

Bursting pain: in abdomen and chest.

Burning: in scalp; heat in eyes; in l. side of face and lips; in l. side of abdomen; in urethra; in larynx; in region of heart.

Rawness, soreness and scraping: in throat; in trachea.

Soreness: of larynx and pit of throat; in trachea; in l. side.

Tearing pains: in ears; in legs.

Drawing tearing: along l. arm.

Neuralgic pains: in head and face; in stomach, gastralgia.

Spasms: in lower part of chest and in stomach.

Crampy pain: in back and lower limbs.

Cramp: in œsophagus.

Constriction: in bowels as if ligated; in epigastrium; around chest or waist.

Constrictive pains: in forehead; in scalp; in throat; in stomach.

Digitized by Google

Feels like a bar of iron around her chest.
Squeezing pains: in back.
Bruised pain: in nasal bones; in r. testicle; in limbs; on awaking.
Paralytic pain: from sacrum down along pelvis and hips; in r. arm.
Drawing: in shoulders; in r. arm.
Pressing, screwing throbbing pain in frontal protuberance, temple, or into bones of face.
Pressure: in forehead; pressive headache encircling calvarium; pressing pains in whole head; deep in brain; in outer head; in præcordia; in epigastric region.
Bearing down: in hypogastrium.
Ulcerative pain: in stomach; in middle of urethra.
Dead pain: in lower l. chest.
Undefined pain: in l. side of head; in head, which seems enlarged; in all parts of head, especially in occiput, preventing sleep; in head, extends to eyes and lower jaw; in eyes and head from using eyes; from brain to eyes; terrific, from vertex into eye; in nose; in stomach; under manubrium sterni; about liver; in abdomen; in region of kidneys; horrible in abdomen and hips, with metrorrhagia; in ovarian region, into sacrum and hips; in chest and between shoulders; fearful pains about heart; violent in muscles of chest; in l. shoulder and arm; in calves; middle finger of l. hand.
Throbbing: in whole body; of carotids; in l. side of forehead; in head, at night.
Heat in head: and dryness of eyeballs and lids; in l. side of face and lips; warmth, between scapulæ and sternum; in eyeball.
Dulness: of head, forehead and root of nose.
Warmth: between scapulæ and sternum.
Heaviness: in occiput; in head; in abdomen; on chest; and drawing in loins; from sacrum down along pelvis and hips; of l. arm; of legs, paralytic.
Fulness: in head; in eyeball; in lids; in ears; in abdomen.
Sense of weight in lower part of sacrum and os coccygis.
Faintness when walking.
Weakness: in legs, with anxiety; at pit of stomach; in legs, with backache; of legs, paralytic.
Tension: around hypochondria; of abdomen; tensive pains in back.
Jerks: in toes.
Chilliness: and trembling with headache; with pressure in brain; up the back and over shoulders.
Cold feeling: in eyes.

Digitized by Google

Tickling: in larynx.
Formication: of arms and legs.
Numbness: of finger tips; of legs.
Itching: creeping, crawling on scalp; in eyes; of nose; of skin during climaxis; in larynx; pustules on l. shin bone; of thighs and axillæ.

" **Tissues.** ❙Melæna.
Acts on red corpuscles, causing their coloring matter to escape into plasma, causing ecchymosis and effusions, and later interference with oxidation and ultimate chlorosis.
❙Withered, dried up, look old. · θChildren, etc.
❙Emaciation, most marked in legs; progressive from year to year.
❙Œdema of legs; ascites. θAffection of liver.
Muscles rigid.
❙Septic forms of scarlet fever.
⁝Impetigo (as a caustic).
❙Excrescence on skin. θIritis.
❙Prevents excessive granulations in ulcers.
❙Chronic syphilis, with papulæ and osteocopic pains.
❙❙Bone affections.
❙Getting gradually thinner for twelve months. θSubacute pleuritis.
Infant loses flesh, gets marasmus; looks as if it would die early.
⁝Dropsies.

" **Touch. Passive Motion. Injuries.** Must press chest with hands.
Rubs nose until raw.
Touching region of kidneys, increased pain.
Worse from touch: globe of eye sensitive; hard blotches on upper lip; gums sore; small spot below xiphoid, region of liver sensitive; stinging l. side of stomach; abdomen tense, cannot bear touch; sternal region sensitive; pains about kidneys.
Itching, < by scratching.
Complaints from pressure of clothing; headache, however, is better from bandaging.
❙❙Erysipelatous bed-sore upon l. shoulder, sacrum and both hip joints; those on sacrum became black and hard. θTyphus.
❙Cannot walk or stand erect. θAfter a fall.
❙While riding: attack of palpitation, with anxiety and trembling, compelling him to get out of wagon and walk, and that "real fast, too."
After scalding with sulphuric acid, a solution applied on burnt place healed it, and even new hairs were formed.

Digitized by Google

[46] **Skin.** ‖Cyanosis. θCholera.
‖Skin from a blue grey, violet or bronze color, to real black.
Skin brown, tense, hard.
Itching, smarting, mostly of thighs and axillæ, when warm at night.
‖‖Bluish-black eruption. θIn scarlet fever.
‖Erysipelatous bed-sores, centre covered with dry, bloody incrustations; black, hard, on sacrum.
Pustulous ecthyma.
‖Syphilitic papulæ. θIritis.
Wart-shaped excrescences.
⁞Impetigo.
⁞Zona.
⁞Smallpox.

[47] **Stages of Life, Constitution.** Most suitable to hysteric or nervous persons, and for headaches from mental causes, characterized by dulness of head.
Women with menstrual disturbances.
Cachectic states, with loss of strength.
‖Scrawny, feeble, dried-up looking women. θProlapsus uteri.
A stout, light-haired boy with enuresis.
Boys' complaints from using tobacco.
Girl, æt. 10, myopia, after taking drugs for goitre.
A youth, æt. 18, growing up rapidly, masturbating, imbecile. θHypochondriasis.
Man, æt. 27, intemperate for years, now abstaining. θHypochondriasis.
Girl, aged 28, inclined to anæmia. θGastric ulcer.
Man, æt. 35, of intemperate habits, also given to venery. θHypochondriasis.
Woman, æt. 43, after a great deal of trial and anxiety, sight failed. θParalysis of accommodation.
Man, æt. 49, red face, nervous, depressed, anxious, ill for three years. θDyspepsia.
Woman, æt. 82; low, after aggravation, cured.
In low doses it corresponds to the carbo-nitrogenoids, like *Sulphur* and *Cuprum;* in the higher it corresponds to the hydrogenoid constitutions (Grauvogl).

[48] **Relations.** Antidotes to *Arg. nit.:* ‖‖*Natr. mur.* (chemical and dynamic), *Arsen.* and milk.
Arg. nit. antidotes: *Amm. caust.*
Boys' complaints after tobacco.
According to Bœnninghausen, as antidotes to *Arg. nit.*, and also *Nitr. ac.*, are prominent *Pulsat., Calcar., Sepia,* and next to these three, *Lycop., Mercur., Silic., Rhus tox., Phosphor.* and *Sulphur.*

Digitized by Google

▮*Coffea cruda* increases nervous headache.
After *Arg. nitr.* had failed in flatulent indigestion, *Lycop.* cured.
It has been given with success: after *Bryon.* and *Spigel.*, in dyspepsia; after *Spongia* was given for goitre, and myopia followed; after *Veratr.* for wind passing upward in great quantities, inducing faintness.
Similar to: *Aurum; Cuprum; Kali bichr.; Laches.; Mercur.; Merc. corr.; Merc. iod.; Natr. mur. Nitr. ac.*
The main difference between the metal and the nitrate is, that the latter acts more on mucous membrane, the skin, and especially on bones and periosteum, and must be beneficial to herpetic patients, and the former acts especially on cartilages.
Complaints from pressure of clothes; also in *Calcar., Bryon., Caustic., Lycop., Sarsap.*, and *Stannum.*

ARMORACEA SATIVA. (Cochlearia).

Horseradish. *Brassicaceæ or Cruciferæ.*

The common horseradish, a popular rubefacient, which has sometimes accidentally proved of great use, of course only when the symptoms corresponded. Proved by Dr. Franz, who introduced *Asafœtida* and *Valeriana* into our Materia Medica; printed in Stapf's Archives, Vol. 17, No. 3, p. 176; later in the Gallican Journal, No. 3, p. 7. In this country applied and somewhat proved by Dr. Cate, Amer. Jour. Hom., Vol. I., p. 336, 1851. In 1868 we got another more complete proving from one of our students, J. C. D., too modest to write his name on his treatise.

Tincture prepared from the root.

[1] **Mind.** ▮Difficult thinking in evening.
▮Melancholy is changed into merry mood.
▮Anxiety. θHydrothorax.
▮Driven to despair. θCramp in stomach.
Great irresoluteness, stupid feeling and inability to collect one's thoughts.
▮Worse from nervous excitement; from vexation.
[2] **Sensorium.** Dulness of head, is unable to collect his thoughts quick enough.
Buzzing in head, with weakness, < forenoon and when walking.

Digitized by Google

‖Syncope.

[3] **Inner Head.** Dull pain in frontal sinus.
Sore, uneasy feeling in frontal sinus.
Dull, heavy headache.
Pressing, boring pain in head, as if frontal bone would fall out.
Pressure deep in brain, < by opening eyes (wide), but not by reading or motion.
Headache, now in one, then in another side of head; < when opening eyes widely.
Headache, with nausea; < when sitting up.
‖Violent headache, with vomiting.
‖Acute pain in head.

[4] **Outer Head.** Fulness of frontal sinus and antrum highmorii.

[5] **Sight and Eyes.** Obscuration of sight for some minutes.
Lachrymation.
Spots on cornea.
Swelling of eyes.
Inflammation of Meibomean glands.
Sore and scrofulous eyes.
‖Rheumatic ophthalmia.
‖Traumatic inflammation of eyes; bleariedness and cataract.

[6] **Hearing and Ears.** Pain in l. ear, deep in.

[7] **Smell and Nose.** Sneezing.
Chronic catarrh.
‖Inflammation of nose. θWith eye complaints.

[8] **Upper Face.** Pale face.

[9] **Lower Face.** Twitching of l. corner of mouth, 4 A.M.
Soreness of upper lip.

[10] **Teeth and Gums.** ‖Toothache, especially of a rheumatic character.
Dull sensation in teeth, as if they were soft and became bent on chewing.
‖Scorbutis.
Scurvy of salt eaters.
‖Toothache in carious teeth. θScurvy.
Dental fistula.

[11] **Taste and Tongue.** Slight metallic taste in mouth.
‖Glossoplegia.
Dull pain in l. sublingual gland for a few moments, followed by a flow of saliva.
Burning biting sensation on tongue.
‖Tongue furred whitish. θCramp in stomach.

[12] **Inner Mouth.** Very offensive odor from mouth and lungs.
‖Clotted blood filled up the open mouth. θApparent death.

Digitized by Google

[13] **Throat.** ‖Dryness of pharynx, larynx and posterior nares.
Scraping in throat, with nausea.
Hawking up thick, viscid mucus, consisting of mucous corpuscles and plasma, with little granular matter.
Inflammation of tonsils, with difficulty in swallowing.
‖Warm water put in mouth seemed to go no further than throat. θApparent death.

[14] **Appetite, Thirst. Desires, Aversions.** Little appetite for breakfast.
Fearful hungry feeling, unnatural craving for food, with profuse painless diarrhœa.

[15] **Eating and Drinking.** Dyspepsia.

[16] **Hiccough, Belching, Nausea and Vomiting.** Troublesome belching of a sulphurous odor similar to garlic.
Scraping in throat, with nausea.
Slight nausea, with irritation of pharynx.
Retching and vomiting of bilious fluid.

[17] **Scrobiculum and Stomach.** Highly stimulant, exciting stomach and promoting secretions, especially of stomach.
Crampy, tensive pain above epigastrium, apparently in diaphragm; > by bending forward.
‖From region of stomach pain draws through both sides towards back. θCramp in stomach.
Dull pain or soreness at scrobiculum cordis.
‖Violent cramp in stomach beginning towards morning, continually increasing, driving to despair; goes from region of stomach through both sides around to back. A slight pressure on last dorsal vertebra increases pain very much.
‖Cramp in stomach after taking cold.

[18] **Hypochondria.** Griping pain in bowels (epigastric region) for a few moments upon lying down upon back.
Colicky pains in l. side below short ribs, similar to that which she has with her monthly, on r. side.

[19] **Abdomen.** ‖Spasmodic affection in abdomen.
Griping pain around umbilicus.
‖Tearing pain from belly through to back, down back and settling in sacrum.
Borborygmi in morning.
‖Loins ache.

[20] **Stool and Rectum.** Stools increased in frequency.
Profuse painless diarrhœa, not sick with it, but craving food.
Twenty movements of her bowels in one day.
In afternoon two stools, first profuse and thick, later less, not thin; four or five times during evening, with a great deal of straining; very weakening.

Digitized by Google

After great nervous excitement, looseness, six or seven times during afternoon, with much pain; took gin to check it; fever followed.
Tenesmus all night until morning, sometimes discharging a little blood.
‖Mucous stools.
‖Intestinal catarrh.
Involuntary passage of mucus from anus.
Straining at anus, with burning and stinging.
‖Itching and burning at anus.

[21] **Urinary Organs.** Uneasiness in region of kidneys, as if congested.
Increased inclination to urinate.
‖Increased secretion of urine.
Urination eight or ten times daily, instead of four.
Urine pale and limpid.
Strangury very severe; frequent and scanty urination; water thick, like jelly on standing, yellowish color, although neither yellow nor white.
Ischuria and bloody urine.
Dysuria.
|Gravel.
:Calculi.
Albuminuria.
‖Nephritis albuminosa, with great paleness, and atony of kidneys.
Frequent desire to urinate; the urine is discharged with difficulty, causing burning, tenderness and inflammation of the urethra, as in the first (inflammatory) stages of gonorrhœa.

[22] **Male Sexual Organs.** ‖Impotence, torpidity.
Burning or cutting at glans during micturition, felt also before or after.
‖‖Inflammatory stage of gonorrhœa.
‖Gonorrhœa, with violent smarting and burning, difficult micturition, and a rather scanty discharge from urethra.
‖‖Gonorrhœa, after cutting and burning pains during micturition had been nearly removed by 1st or 2d dilution, the 6th acted with good effect.
‖Chronic and neglected gonorrhœa.

[23] **Female Sexual Organs.** During night pieces of coagulated blood pass from vagina.
When urinating stringy black blood from vagina.
Menses every ten or fifteen days.
Suppressed menses and chlorosis.
‖Leucorrhœa and menostasis.
‖Since climaxis, cramp in stomach.

Digitized by Google

[21] **Pregnancy. Parturition. Lactation.** Milk tastes and smells like horseradish.
After vexation of mother nursing child vomits milk.
[25] **Voice and Larynx. Trachea and Bronchia.** Loss of voice; whispering.
Aphonia, with blood-spitting.
Hoarseness and roughness in throat.
Dryness of larynx.
Used by singers to clear the throat.
[26] **Respiration.** Oppression of breathing, with hoarseness: scorbutus.
Pituitous asthma.
Increases activity of respiratory organs.
[27] **Cough.** Hard or loose cough, < from supper-time until going to bed.
Hawking up of thick, viscid mucus, consisting of mucous corpuscles, plasma, and but little granular matter.
Pituitous consumption.
It relieves cough and promotes expectoration.
[28] **Inner Chest and Lungs.** Inflammation of lungs.
Pleuritis, with painfulness in scapular region, < afternoon and leaning back.
After violent cough, hemorrhage and apparent death.
Œdema of lungs.
Mucous asthma.
During convalescence from pneumonia.
Relieved pressing, stitching in chest, bloody sputum, anxiety and oppression (external application).
[29] **Heart, Pulse and Circulation.** No pulsation of heart; apparent death.
Pulse small. θCramp in stomach.
Accelerates pulse.
[30] **Outer Chest.** Grasping pain in l. side and both shoulders. Chest painful to touch.
[31] **Neck and Back.** Pain in back as from incarcerated flatulence.
A slight pressure on last dorsal vertebra increases pain exceedingly. θCramp in stomach.
Pain from abdomen through to back and down into sacrum.
[32] **Upper Limbs.** Painful twitchings in third l. phalanx.
[33] **Lower Limbs.** Pain in adductors of both thighs, upper part; it almost drags her to pieces.
Twitching in leg (r.), outside of tibia, middle third.
Pain in l. gastrocnemius.
Twitching in r. foot, third metatarsal tendon.
Suppressed foot sweats.
[34] **Limbs in General.** Towards morning pains in all joints

when lying still; < lying on side, passing off on motion and when getting up.

[35] **Rest. Position. Motion.** Towards morning pain in all limbs when lying still, < when lying on side, passing off on motion and when getting up.

Bending forward: > cramp.

Lying on side: pains in joints <.

Lying on back: pain in bowels.

Sitting: headache and nausea <.

Motion: pains in every joint >.

On widely opening eyes: headache <.

Rest: pains in every joint <.

[36] **Nerves.** General prostration. θWith backache.

: Palsy.

ǁApparent apoplectic death after a hemorrhage from lungs and nose, with a child suffering from whooping cough.

It raises vital forces when sunken to lowest degree.

ǁǁAsphyxia.

[37] **Sleep.** Sleep very refreshing.

Heavy sleep.

Awoke with a clearer mind than usual.

Sleepless nights, with bearing down in abdomen.

[38] **Time.** Night: tenesmus; coagulated blood from vagina.

Morning: borborygmi; pains in joints: ǁcramp in stomach worse.

Afternoon: 4 P.M. twitching of corner of mouth; stools.

Evening: difficult thinking; stools; cough.

[39] **Temperature and Weather.** ǁAfter a cold: cramp in stomach.

[40] **Fever.** : Increases warmth, local and general exhalation.

Causes perspiration.

: Intermittent fever.

[42] **Locality and Direction.** Right: twitching in leg; in foot.

Left: pain deep in ear; corner of mouth twitches; dull pain in sublingual gland; grasping pain in side and shoulders; third phalanx, painful twitches; pain in gastrocnemius.

Pain draws from stomach through sides to back.

[43] **Sensations.** Bloated sensation as if everything was distended without being actually larger; as if frontal bone would fall out; as if teeth were soft and would bend.

Externally applied, causes violent pains.

Violent pain: in head.

Stitches: in chest.

Cutting: and burning during micturition.

Burning: and biting on tongue; and stinging at anus; and itching at anus; in urethra; and cutting in glans.

Digitized by Google

Pressing: and boring in head; deep in brain; in chest.
Tearing pains: from belly through back into sacrum.
Grasping pain: in l. side and both shoulders; in r. foot.
Griping: in bowels; around umbilicus.
Cramp: in stomach; crampy, tensive pain above epigastrium.
Soreness: of upper lip; at scrobiculum cordis.
Sore, uneasy feeling: in frontal sinus.
Scraping: in throat.
Smarting: and burning, gonorrhœa.
Aching: in loins; in all joints towards morning.
Rheumatic toothache.
Tensive pain: above epigastrium.
Dull pain: in frontal sinus; in teeth, as if soft; in l. sublingual gland; at scrobiculum cordis.
Undefined pain: in head; in l. ear; with looseness of bowels; in scapular region; in back; in abductors of thighs; in l. gastrocnemius; in joints.
Dulness: of head.
Uneasiness: in region of kidneys; in frontal sinus.
Fulness: frontal sinus and antrum.
Buzzing: in head.
Twitching: l. corner of mouth; in third l. phalanx, painful; in r. leg.
Dryness: pharynx, larynx and nares.
Itching: at anus.

[44] **Tissues.** Pains in all the joints.
‖Rheumatism, wandering, chronic.
Gout; also in suppression, followed by colic and retention of urine (used in footh bath).
‖Antiscorbutic.
"Mucous" diseases.
Torpid, chronic catarrhs.
Anasarca after intermittents.
‖Dropsy, with albuminuria.
‖After pneumonia, during reconvalescence.
‖Beginning enteritis.
Beginning pleuritis.
Chronic catarrhs.

[45] **Touch. Passive Motion. Injuries.** Touching abdomen and small of back gives pain, which extends into r. leg.
Chest painful to touch.
Traumatic inflammation of eyes.
Slight pressure on back: < cramp.

[46] **Skin.** The rubefacient effect is shorter than that of mustard.
The skin is reddened and irritated, sometimes blisters are formed.
: Erysipelatous affections (the leaves).

Digitized by Google

: Eruptions of skin.
: Freckles and liver spots.
: Scorbutic ulcers.

47 **Stages of Life, Constitution.** A stout woman, æt. 40, subject to cramps in stomach; violent attack with headache.
A woman suffering from violent headache, with vomiting, since climaxis. θCramp in stomach.

48 **Relations.** Useful in scurvy of salt eaters.
Contains an etheric oil, very similar, if not identical with *Sinapis.*
Comparable with: *Canthar.*, *Capsic.*, *Rhus tox.* and *Sinap.*
Juniper berries antidote bladder and urinary complaints.
Took gin for colic, and for fever following it, *Bellad.*
Eating horseradish, after *Merc. sol.* had been given, was followed by an aggravation of pain in hips, which was followed by a lasting improvement.
Similar to tea, see 43, first symptom.

GUIDING SYMPTOMS

OF OUR

MATERIA MEDICA.

ARNICA MONTANA (RADIX).

Leopard's Bane. *Compositæ.*

A widely spread plant growing on the high mountain plains of Germany. One of the oldest popular drugs, called in the German *Wohlverleih*, which means bestowing well-being, having nothing to do with wolves, as our learned French colleague supposed; it is also called *Fallkraut*, meaning the herb useful after a fall. Two hundred years ago Fehr called it *panacea lapsorum*.

One of the first provings of Hahnemann was made with the Arnica root. (*Fragmenta de viribus medicamentorum positivis sine in sano corpore humano observatis*, 1805, pp. 17–24) containing 117 symptoms of Hahnemann's own observation; quotations, 33; one of the most wonderful results of his exploration, and all from the root.

In the first volume of his Materia Medica Pura, 1811, pp. 236–248, his own symptoms increased to 175; quotations from old books, never considered of any importance to real homœopathic practitioners, to 55.

In the second edition, 1822, pp. 471–503, Hahnemann's symptoms had increased to 278, all from the root, and he was able to add provings by his students. He examined each prover with the utmost care and scrupulousness, and the symptoms had increased to 314.

In the third edition, 1830, soon after, there were in all 638, only 46 additions.

A great many reports of so-called poisonings have been given in the journals. It is very probable that all these were the result of tincture made from the flowers, containing the arnica fly. Before the bud opens, an insect, Atherix maculatus Meignen, lays its eggs into the torus, or receptacle. The worms coming therefrom live on the seed, which does not prevent the development of the flower, but the

Digitized by Google

ripening of seed. Nearly all flowers in the shops contain eggs, worms, or the excrements and other remains of the worms, or the pupas; and all this acts similarly to Cantharides.

Following the example of Hahnemann, we ought to use nothing but the root.

It would be of great importance to have this insect or its eggs or pupas proved, to enable us to separate the symptoms of the flower from those of the insect. All tinctures made from the flowers are very uncertain preparations and not to be trusted.

[1] **Mind.** Stupefaction, loss of sight and hearing. θConcussion of brain.

‖Comatose, soporous, stupid states. θTyphus.

‖Lies as if dead. θConcussion of brain; apoplexy, etc.

‖Coma, insensibility. θCongestive chills, meningitis, etc.

‖‖Stupor, with involuntary discharge of feces. θTyphus.

‖‖Loss of consciousness. θAngina pectoris.

Unconscious; when spoken to answers correctly, but unconsciousness and delirium at once return.

‖Could be aroused and answer intelligently, but relapsed immediately into stupor.

‖‖Forgetful; what he reads quickly escapes his memory, even the word he is about to speak. θTyphus.

‖Absent-minded, thoughts wander from their object and dwell on images and fancies.

Mind clear like that of a clairvoyant; quiet countenance, pale as chalk, thinks her death unavoidable.

‖Thinks rightly, but uses the wrong word for a correct idea. θTyphus.

Confusion of the head, changing to pressive right-sided headache.

‖Sits as if in thought, yet thinks of nothing; a sort of waking dream. θTyphus.

Does not think; confused heaviness in forehead.

‖Thinking tardy. θApoplexy.

Slowness of thinking.

‖‖Says there is nothing the matter with him. θPutrid fever.

‖Muttering delirium. θTyphus.

‖Delirium, low murmuring.

‖‖Delirium tremens.

‖Raving madness, in which patient is conscious of his condition.

Excessive inclination to hard and long literary labors.

Indisposed to think; after a walk in open air.

‖She does not speak a word; declines answering questions, dislikes sympathy. θTyphus.

‖Sheds tears and makes exclamations. θAfter rage.

Prays quietly for her soul.

Google

Picks the bedclothes.
Thoughtless gayety; great frivolity and mischievousness.
Depression of spirits.
‖‖Hopelessness; indifference. θAfter concussion.
‖Despondency and conviction of approaching death. θNeuralgia.
‖Hypochondriacal anxiety, peevishness.
‖‖Fears being struck by those coming towards him; fears even the possibility of being touched. θGout.
‖‖Violent attacks of anguish. θAngina pectoris.
‖Horror of instant death. θWith cardiac distress in night.
‖Indifference to everything, morose.
‖Naturally cheerful, kindly and genial, he became downcast, waspish and peevish.
‖Excitable and timid. θParalysis.
She is extremely morose and irritable; ‖she does not speak a word.
‖Oversensitive mood, peevish, quarrelsome.
‖Excessive sensitiveness of mind. θProlapsus uteri.
πNaturally very sensitive, his keen sensitiveness of mind became greatly exaggerated.
‖‖Excessively sensitive mind; disposition to agreeable as well as disagreeable emotions, without weakness or excessive sensitiveness of body; sometimes occurring alternately or simultaneously.
‖Susceptibility to every shock, movement or exertion, and to reading and reflection. θMegrim.
‖Sensation of being good for nothing.
‖All occupation had to be relinquished for the time, so intense were the sufferings. θAttacks of headache.
‖Languid. θMyalgia.
Inability to perform continued active work.
‖Easily frightened; unexpected trifles cause him to start.
‖State of mind most pitiable. θProlapsus ani.
‖Mental emotions exerted an influence in bringing on chronic attacks of headache.
‖Every excitement of mind, which is very irritable, aggravates all symptoms of headache. θProlapsus ani.
Ailments from fright or anger.
‖Suddenly aroused by his nightbell, and turning out of bed, brought on headache next day. θChronic cephalalgia.

Sensorium. ‖Confusion of head, with decided pressure in r. half of head, especially over r. brow.
‖Dizzy with sickness at stomach, < on rising or moving; > when lying still.
‖Giddiness and incapacity for all exertion, with headache. θProlapsus ani.

Google

‖‖Vertigo when shutting eyes.
‖Vertigo in forehead when walking, or raising and moving head. θAngina pectoris.
Vertigo from a too copious meal, nausea, obscuration of sight.
‖Vertigo when assuming an erect position. θApoplexy.
‖Vertigo, it is almost imperceptible when sitting and bending head, but when righting or moving head she feels as if everything turned with her.
‖Vertigo. θParalysis.
Heaviness and confusion of head.
‖Vertigo with nausea when moving and rising; > lying.

[5] **Inner Head.** Aching, darting and pressing most in forehead; < from motion.
Aching in forehead commencing in morning, gradually extends through temples to occiput; < in afternoon.
‖Dull pain in forehead; pain in back and limbs. θDysentery.
Pressive pain in forehead when walking, ascending stairs, reflecting or reading.
Pains over one eye, with compression in forehead and greenish vomiting.
Pressive pain in forehead < near warm stove, as if brain was rolled up in a lump.
Rapid stitches in l. frontal eminence accompanied by sensation as if an extravasation of blood had taken place.
Stitches in forehead.
Coldness in forehead changing to a heat or sometimes a darting pain; < from shocks, motion, etc.
Pressure over eyes extending to temples.
‖The fulness was followed in about an hour by a slight pain in forehead, gradually increasing, extending to temples and occiput, reaching its height towards evening. θChronic cephalalgia.
Pressure over eyes extending towards temples, with sensation as if integuments of forehead were spasmodically contracted.
‖Sticking pain in temples and forehead.
Headache in l. temple returning from time to time; fine pricking and tearing.
‖Headache as from a nail thrust into temple, with general sweat about 12 P.M., followed by faintness.
Pressing shooting in both temples, from without inward.
‖Occasional attacks of very painful headaches, which are either beating or pressing, and in one or the other temple. θProlapsus ani.
‖‖Pressive headache as if head was being distended from

Google

within outward; pain seems to arise from something soft in vertex, with drawing in vertex and occiput, and tearing towards temples.

Heaviness in middle of brain.

Pressure and confusion of head.

Feels like a heavy weight in head.

❙Feeling of weight in head and on making any exertion, sensation as if a liquid was fluctuating in brain on day following an attack. θChronic cephalalgia.

❙Feeling at upper part of head as though brain was sore and tender.

❙Oversensitiveness of whole brain, or in different parts of it. θMegrim.

❙Burning in brain, with natural heat of body, night and morning; < from motion, > at rest.

Congestive and gastric headaches.

Bad effects from falls or blows on head.

❙❙Mechanical injuries; especially with stupor from concussion; fractures of skull, or even compression (apply externally warm cloths saturated with dilute tincture from the root; give also internally).

❙Headache > from motion on pillow. θPneumonia.

❙Early in morning he durst not set about reading, nor working on first getting out of bed without incurring an attack. θMegrim.

Headache: violent on waking; in morning, stupefying; from 3 to 8 P.M., pressive; on walking in open air, pressing; with cough, stitch in forehead; on moving head, stitches in head; on rising or sitting up in bed; on reading or reflecting, pressure in forehead; on stooping; on walking, pressure in forehead; on walking upstairs, pressing in forehead.

Headache with vertigo.

❙Pain as if a knife was drawn through head transversely from l. side; this is immediately followed by internal coldness of head, which causes hair to stand on end.

❙Brain affected. θDiarrhœa and dysentery.

Violent headache on waking in morning, which reached such a point at 8 A.M. that while walking in open air he fell from dizziness; disappeared at 10 A.M.

❙❙Meningitis after mechanical or traumatic injuries, such as concussions, bruises, falling, concussion of brain, etc., when suspecting exudation of blood, fibrine or pus. In such cases we find great sopor and partial paralysis of tongue, oculomotors, iris or limbs.

❙❙Meningitis after lesion or concussion, provided there is no complete want of reaction.

❙Meningitis granulosa with characteristic inclination to vomit.

Google

Serous or bloody exudation. θMeningitis infantum.
Apoplexy, loss of consciousness, with involuntary evacuations from bowels and bladder, paralysis (left-sided); pulse full, strong; stertor; sighing, muttering.
Apoplexia sanguinea.
No headache. θApoplexia sanguinea.

Outer Head. Head feels too large.
Cold sensation in a small spot on forehead as if some one touched him with a cold thumb.
Unbearable feeling as from ice on top of head; after breakfast.
Burning or hot spots on top of head. θProlapsus ani.
Head hot, rest of body cool. θIritis. θProlapsus uteri.
Pain in occiput as if hair was pulled out or as from severe electric shocks.
A pressure in forehead as if these parts were crushed by a violent concussion; this feeling extends over face into both cheek bones.
Better by lying low with head. θIritis.
Boring head deep in pillows. θMeningitis infantum.
Pressive headache over eyes extending towards temples, with sensation as if integuments of forehead were spasmodically contracted.
Carries head forward or to right. θAfter injury to l. eye.
Recurring boils on scalp.

Sight and Eyes. Photophobia. θApoplexy.
Early in morning fulness of head, soon followed by flickering before eyes, which was increased by reading or writing. θHeadache occurring once or twice a week for twelve years.
Diplopia after injuring eye.
If she attempts to read eyes pain and print seems to dance in a fog and vanish, so she must rub eyes.
Muscæ volitantes.
Cork from a bottle struck r. eye seventeen days before, eye swollen for four days; sees through a mist, pupil moderately dilated and immovable without a trace of exudation.
All turns black before eyes. θMeningitis infantum.
Loss of sight after a violent blow.
Darkness before eye and loss of vision with headache. θProlapsus ani.
Feeling of great weight and heaviness in eyes, with intense headache.
Pressive pinching pain in inner half of r. eyeball, gradually ceasing on motion in open air.
Drawing pain in r. eye.
Stitches in eyes.

Google

Shooting tearing pains in both eyes and surrounding parts: < in bed and by warmth. θOphthalmia.
Burning in eyes.
Insufficiency of superior oblique muscle of l. eye.
Traumatic muscular paralysis in a robust man 25 years old.
Double vision and vertigo on looking downward, carries his head somewhat forward and turned to right. θTraumatic muscular paralysis.
All high objects appear to lean forward and about to fall upon him. θTraumatic muscular paralysis.
Pupils first contracted, twenty-four hours later dilated.
Contraction of pupils with cloudiness of head.
Dilated pupils, with sensitiveness to light.
Right eye projects from head and looks larger than left.
Eyes protrude, staring, denoting anguish.
Eyes sunken.
Eyes dull, expression stupid. θTyphus.
Congestion to eyes; balls bloodshot.
Eyes very red. θPneumonia.
Eyeball resembled a piece of raw flesh.
Conjunctiva much reddened; photobia. θRheumatic fever.
Inflammation of eyes, with suggillations after mechanical injuries.
Subconjunctival ecchymosis, resulting from whooping cough or from injuries.
Rheumatic iritis, marked by much lachrymation, photophobia and redness, with shooting and tearing pains in and around eye; < at night and by warmth.
Retinal hemorrhage; expedites absorption of clots.
Amblyopia after a blow on head.
Relaxed condition of bloodvessels and too fluid condition of blood predisposing to hemorrhages. θWhooping cough.
Traumatic ulceration, with much hemorrhage into anterior chamber.
Lachrymation, shooting and tearing pains in both eyes and in surrounding parts; < in bed and by warmth.
Considerable lachrymation. θOphthalmia.
Sharp fine stitches in inner canthi.
Itching in canthi.
Severe ciliary neuralgia; head hot, body cool. θIritis.
Sensation of oppression and drooping in eyelids as if they could not be raised.
Difficult and painful motion of eyelids, they are swollen, and balls feel as if excoriated; eyes and lids red; < closing, > opening the eyes.

Digitized by Google

ǁŒdema of dry, hot, inflamed lids, with much subconjunctival suggillation. θIritis.
Margin of upper lids painful when lids are moved, as if they were dry and slightly sore.
ǁǁA variety of eye troubles resulting from blows and various injuries; sometimes applied locally (tincture diluted with water) and sometimes given internally.
ǁBruised iris after cataract operations.
ǁTraumatic mydriasis.
Traumatic ulceration, with much hemorrhage into anterior chamber.
ǁDull pain over eyes, even when not using them. θAsthenopia.
ǁǁOn l. orbital ridge very painful, intermitting, dull pressure.
ǁǁCramplike pressive pricking under l. eye on nasal bone, extending over eyeball.

[6] **Hearing and Ears.** Great sensitiveness to loud sounds, with pain in ears.
ǁNoises in ear caused by rush of blood to head; with great sensitiveness to sound.
ǁBuzzing and humming before ears with difficult hearing. θMeningitis infantum; sequel.
ǁǁHard hearing from concussions.
ǁDeafness after typhus.
Rushing in ears with deafness of r. and stitches through l. ear.
Pain internally in cartilage of l. ear, as if parts had been bruised or contused.
ǁBruised pain in ears, stitches in and behind ears; ears very dry.
Feeling of heat externally in l. ear and cheek.
ǁSuppurating otitis with stupor.
ǁAfter suppuration of internal ears. θTyphus.
Discharge of blood from ear.
ǁSwelling of parotid gland. θMeasles.

[7] **Smell and Nose.** ǁSwelling of nose.
ǁSneezes twenty or thirty times with a violent slinging motion of the head, until sinking on the bed exhausted; hardly having recovered his breath another attack follows.
ǁǁNose pains from above down as after a violent fall on it.
ǁǁEpistaxis.
ǁǁNosebleed: preceded by tingling; ǁcopious after every exertion; ǁǁfrom mechanical causes; ǁafter washing face; ǁǁwhooping cough; ǁǁtyphus; ǁblowing nose.
ǁUlcerated nostrils.
Nose cold, but internally hot; or with dry heat of face.

Google

‖End of nose cold. θPneumonia.
Pain in glabella over root of nose.
‖Discharge of several drops of thin blood from nose on first blowing it in morning.
‖Frequent blowing of nose with traces of blood.

[8] **Upper Face.** ‖Right cheek hanging, mouth drawn to l. side. θApoplexy.
‖When breathing, cheek blown up, expanded. θApoplexy.
Countenance much sunken.
‖Face rather pale and a sense of chilliness rather than of heat. θChronic headache.
‖Pale, sunken; sallow. θCholera infantum.
‖Complexion earthy, looks unhealthy. θDiarrhœa.
Dry heat in face towards evening, extending as far as behind ears, without any thirst, nose being quite cold.
‖Redness and burning in one cheek, otherwise cool or, at any rate, not hot.
‖Face deep red, almost as red as mahogany. θTyphus.
‖Face hot and red, with cold legs. θMeningitis infantum.
‖Face and forehead hot. θApoplexy.
‖The puffed cheeks are highly reddened. θApoplexy.
Swollen cheeks, with throbbing and stinging pain.
Red swelling of r. cheek, with throbbing and pinching pain; swollen lips and great heat in head, with cold body.

[9] **Lower Face.** Lips burn; are swollen and cracked.
‖Lower lip trembles. θTyphus.
Bruised pain (right) articulation of jaw, from motion; early in morning.
Lower jaw hanging.
‖‖Burning heat in lips, with moderate warmth of body.
Pimples on upper lip.
Chapped lips.
Swollen lips with heat in head.

[10] **Teeth and Gums.** ‖‖Toothache after operation, plugging, etc.
Excruciating pains, cutting, tearing in all teeth of r. upper jaw, radiating to ear; < from external warmth or from inhaling fresh air.
Tooth feels as if forced out of its socket; throbbing toothache.
‖Gums sore, swollen. θTeething children.
‖Beating and tingling in gums. θToothache.
Toothache as if teeth had been bitten out, sprained, were wabbling, throbbing; teeth feel as if they were pressed out by blood rushing towards them; they are then more painful when touched.
Toothache and swelling of gums on l. upper jaw.

[11] **Taste and Tongue.** Taste: putrid; of rotten eggs; bitter.

Digitized by Google

‖Dry tongue and disinclination to talk. θTyphus.
‖Dry almost black tongue. θTyphus.
‖Tongue coated yellow with bitter taste.
‖In morning taste of rotten eggs.
Biting sensation on tongue, with soreness, burning, and stinging in back part of throat.
Violent burning from fauces through œsophagus to stomach.
‖Tongue: coated white; ‖dry, with a brown streak down middle. θTyphus.
Tongue dry or yellow coated. θDyspepsia.
‖Tongue coated white, with a good appetite and good taste.

[12] **Inner Mouth.** ‖‖Putrid smell from mouth. θTyphus.
‖‖Saliva diminised.
‖Spits sometimes a little blood. θTyphus.
‖Mouth dry, with much thirst.
‖‖Burning scraping in mouth and œsophagus; increased saliva.

[13] **Throat.** Stinging in back of throat between acts of deglutition.
‖Chronic pains in fauces and larynx, < for a long time after an animated talk.
Burning in throat when swallowing.
Pain in fauces as if something hard or rough was lodged there; afternoon, lying down.
‖‖Scraping burning from throat to stomach, which became a troublesome pressure in stomach.
Swallowing almost always improves.
‖‖Swallowing is prevented by a sort of nausea as if food would not go down.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Appetite disturbed, eating increases pain. θChronic attacks of headache.
‖Appetite lessened. θDiarrhœa. θMyalgia.
Loss of appetite and sourness of stomach of brandy drinkers, and creates a disgust for brandy.
‖Total want of appetite for ten days, loathing very sight of food.
‖Aversion: to meat; broth; milk; smoking tobacco; brandy.
‖‖Thirst for cold water, without fever.
Thirst without any external heat, pupils being little capable of dilatation.
‖Constant desire for drinks, but knows not for what, as all drinks are offensive. θDiarrhœa.
Longing for vinegar or sour things; for alcoholic drinks.

[15] **Eating and Drinking.** ‖After eating, distress in epigastrium.
‖Vomiting of food, obstinate constipation and restless, sleepless nights. θConcussion.

Google

During dinner, one cheek hot.
After eating: feels <; distress in epigastrium (after a blow); repletion, and coliclike pressure in several places in abdomen and sides; fulness in pit of stomach; pressure on a little spot; megrim; toothache; indolent feeling in legs.
After too copious a meal vertigo with nausea, obscuration of sight.
After drinking: chill increased; ‖vomits; drinks much, and then vomits.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough. θMeningitis.
‖‖Eructations: frequent; empty; bitter.
‖Putrid eructations. θUterine prolapsus. θDiarrhœa.
Eructations like rotten eggs in morning.
‖Belches after coughing.
Extreme nausea.
‖Nausea in epigastrium. θUterine prolapsus.
‖‖Nausea, burning scratching in throat; general relaxation during forenoon.
‖Empty retching, ineffectual efforts to vomit.
Retching at night; vomiting however does not come on; in pit of stomach there is a weight as of a lump.
Vomits: least food taken; bitter, yellow bile; coagulated blood.
‖‖Vomiting of dark red coagula, mouth bitter; general soreness. θAfter injuries.

[17] **Scrobiculum and Stomach.** ‖Stomach distended with wind; pressure on præcordia, oppression of chest.
Pain in stomach as if its coats were spasmodically drawn together; > by eating.
Spasmodic contraction of stomach causes a general pain, but mostly in posterior wall, with a sensation as if wall of stomach would be forcibly pressed towards spine, and as if spine would be made painful from that place downward.
Pinching and pressure in stomach, extended through bowels as a constriction, with much movement.
‖Pinching, spasmodic griping in stomach.
Heaviness and pressure in stomach.
‖Pressive cutting pains in epigastrium, with nausea and retching. θAfter blows on stomach.
Soreness in stomach with putrid eructations, like rotten eggs.
‖Feeling of repletion in stomach with loathing. θAngina pectoris.
Sensation of hunger in stomach.
‖‖Aching or burning distress in pit of stomach, epigastrium distended; feels < from pressure; ‖‖foul belching.

Google

| | Easy and rapid transfer of cerebral irritation to stomach, ending in nausea, retching and vomiting. θMegrim.
| | Much mucus in throat and stomach.
|| Dyspepsia. θProlapsus ani.

[18] **Hypochondria.** Severe pressure at epigastrium.
Pressive cutting pains in epigastrium, with nausea and retching.
| Sensible to pressure in region of liver. θStupor.
| Stitches in region of liver; painful when turning in bed.
Pressure: in region of liver; like a stone, both during inspiration and expiration; felt lying on l. side.
Pressing in region of l. ribs below heart, day and night.
| Pain and fulness in r. hypochondrium from a blow.
| Stitches in splenic region, with soreness on pressure. θSplenitis, in intermittent fevers.
| | Stitches under false ribs, l. side, interrupting breathing when standing.

[19] **Abdomen.** Sharp thrusts through abdomen from one side to the other.
Pain around navel when moving.
| Dull, heavy pain in l. hypogastrium, followed in a few hours by a copious discharge. θDysentery.
| Seized in middle of night with violent cutting and burning pains in hypogastrium, mostly l.; pains intermitting, ceasing after fifteen to twenty minutes. θDysentery.
Colic resembling dysentery, a kind of grinding deep in hypogastrium, within hips on both sides, accompanied by nausea and slumber.
Intermittent tearing in l. half of pubic eminence.
Colic with strangury.
Swashing in abdomen as of water.
| | Pains in abdomen and headache. θAngina pectoris.
Right side of abdomen hard, swollen, with pain as if cutting into a wound when touched.
| Abdomen bloated. θDiarrhœa.
| Hard swelling of r. side of abdomen, with severe pain when touched; > by escape of flatus.
| Tympanitic distension of abdomen, frequent urging to stool.

[20] **Stool and Rectum.** | | Constricting cramps in rectum while standing.
| | Painful pressure in rectum.
| Ineffectual urging to stool.
| Frequent urging to stool, with severe pressure at anus. θDysentery.
| Tenesmus with severe pains. θDysentery.
| Inclination to evacuate bowels recurring every four or five hours, tenesmus being severe during stool. θDysentery.

Google

Sensation of rumbling in rectum for three days, not attended by stools.
‖‖Offensive flatus; smelling like rotten eggs.
‖Frequent small stools. θDysentery.
Frequent stool; after every stool is obliged to lie down.
Nightly diarrhœa, with pressive colic, as if from flatulence.
Diarrhœic stool with some cutting in intestines.
Frequent small stools consisting only of mucus.
Diarrhœic stools yellowish or sometimes bloody.
‖Diarrhœa, stools resembling brown yeast.
‖‖Painless stools of undigested food.
‖Involuntary discharge of feces during stupor. θTyphus. θMeningitis infantum (in later stages).
‖‖Stool involuntary during sleep (also urine). θFevers. θApoplexy, etc.
‖Stools: of undigested food; bloody; purulent; bloody, slimy, mucous, with urging and violent bellyache; dark, bloody, mucous, with sore, bruised feeling in abdomen; brown, fermented (like yeast); averse to food; fetid breath; very offensive, papescent, at times involuntary; involuntary during sleep; frequent, small, mucous; fluid, foamy, terribly offensive, acrid.
Tenesmus followed by a copious thin or paplike sourish-smelling stool, giving great relief.
‖‖Urging to stool every half hour, nothing but slime being passed.
‖Frequent, fluid, frothy, acrid, very fetid stools, with much flatulence; girl, æt. 2½.
‖Scanty, slimy, dark colored, bloody stools. θDysentery.
‖Dark, bloody, mucous stools, with sore, bruised feeling in abdomen. θDysentery.
‖Excessive pain and discharges of pure blood and mucus. θDysentery.
‖Copious discharge of dark, venous blood, amounting in quantity at a time to about a quart, came on at intervals of about four hours, greatly relieving pain in abdomen for an hour or two. θDysentery.
‖‖Dysentery with ischuria, or tenesmus of neck of bladder with fruitless urging.
‖‖Most marked indication is long intervals between stools, namely from four to six hours. θDysentery.
‖Stool tardy. θApoplexy.
‖Obstinate constipation after a blow on epigastrium.
‖Constipation. θPneumonia. θParalysis.
Before stool: abdomen distended.
During stool: rumbling and pressure in abdomen; ‖urging, tenesmus, passing only slime and mucus.
With slimy stools: bruised pain in back.

Google

After stool: I must lie down.
I Pain in anus as if it was bruised. θDysentery.
I Pressive pains in anus and rectum, mostly in anus. θDysentery.
I After suffering much from hemorrhoids a very troublesome and painful prolapsus of anus lasting four months.
I After walking five or ten minutes prolapsus protrudes and hinders him from going any further, forces him to return without delay.
I During headaches rectum does not fall down and vice versa. θProlapsus ani.
I A man after suffering from hemorrhoids in a weakened and relaxed state. θProlapsus ani.

21 **Urinary Organs.** I Chill followed by nephritic pains, nausea and vomiting, without relief; vomiting produces excruciating pain in epigastrium, extending to r. hypochondrium and down to groin. θNephritis.
I Piercing pains as from knives plunged into kidneys; chilly, inclined to vomit.
I Agonizing pains in back and hips as from passing calculi. θRenal colic.
I Traumatic inflammation of bladder.
II Bladder affections after mechanical injuries.
Bladder feels overfilled, ineffectual urging.
Tenesmus of bladder; urine drops involuntary.
II Tenesmus from spasms of neck of bladder.
Infants scream from pain in bladder.
II Constant urging while urine passes involuntary in drops.
II Frequent attempts to urinate.
II Has to wait a long time for urine to pass.
II Retention of urine from exertion.
II Ischuria with dysentery.
Spasmodic ischuria with hot hoofs, excrement in small balls (horses).
II Involuntary urination at night during sleep. θApoplexy. θTyphus, etc.
I Involuntary urination when running.
II Involuntary urination at night with a red sediment. θParalysis.
Increases watery constituents of urine.
Frequent pale urine.
Extensive diuresis. θMeningitis.
I Urine in small quantity, staining napkin yellow brown. θCholera infantum.
I Urine of a very dark brown color.
II Urine brown with lateritious sediment.
I Brown clear urine which immediately becomes whitish and turbid.

Google

‖Urine dark brown, scanty; brickdust sediment.
‖Urine red. θLiver complaint.
‖Brickdust sediment in urine. θProlapsus uteri.
‖Scanty red urine very offensive.
Urine scanty, infrequent; sometimes frequent urging.
‖Urine difficult, scanty, dark, with thick brown sediment. θNephritis.
‖Bloody urine.
‖‖Hæmaturia from mechanical causes.
‖‖Urine thick, with much pus and some blood globules, but no tubes. θNephritis.
‖‖Urine very acid, with increase of specific gravity.
Before urination; agonizing pains in back and hips; pressure in bladder.
‖During urination: burning pain along perineum and discharge of pus from urethra. θAfter a fall on perineum.
At end of urination: cutting in orifice of urethra.
After urination: stitches.

[22] **Male Sexual Organs.** Violent sexual desire, continued erections (weak old man).
Violent continued erections often waking.
Feeling of weakness, relaxed testicles, as after an emission; early in bed.
‖Emission of semen (day or night) during an affectionate caress.
Testes indurated, swollen and tender.
Spermatic cords painfully swollen, stitches in abdomen.
‖Hydrocele caused by a bruise.
‖‖Penis and testicles swollen purple red; after injuries.
Erysipelas of scrotum extending to anus.
‖‖Phymosis from friction; parts bruised and much swollen.

[23] **Female Sexual Organs.** ‖Pains like from spraining in ovarian region (groin), obliging her to walk bent. θOvarian diseases.
‖Metrorrhagia after coition. θProlapsus uteri.
‖Bruised sore feeling remains after a hurt in abdomen, cannot walk erect. θProlapsus uteri.
‖‖Prolapsus uteri caused by a concussion leaving a sore, bruised feeling in uterine region, which prevents her from walking erect.
‖Ulcers of uterus with a tendency to bleed.
Menses generally too soon; nausea in epigastrium.
‖Menses too frequent and profuse. θProlapsus uteri.
‖Bloody discharge between menstrual periods. θProlapsus uteri.
‖Blood bright red with mixed clots. θProlapsus uteri.

Google

‖Uterine hemorrhage.
Labia painfully swollen.

[21] **Pregnancy. Parturition. Lactation.** ‖Pain between crest of r. ilium and sacrum during pregnancy.
‖It feels as if fœtus was lying crosswise.
‖‖Threatened abortion from falls, shocks, etc.; nervous, excited; feels bruised.
Labor pains: violent, yet they do but little good; weak, or ceasing, wants to change position often; feels bruised.
‖Metrorrhagia after coition. θDuring pregnancy.
‖Constant dribbling of urine after labor.
‖‖Soreness of parts after labor; prevents hemorrhage.
‖Hemorrhages bright red or mixed with clots; head hot, body cool.
‖After pains violent; return while suckling.
Ruptured perineum (applied externally).
Prophylactic against pyæmia in childbed fever.
‖Swelling of mammæ from contusions.
Mastitis from bruises; erysipelatous inflammation.
‖After an abscess in l. mamma, the r. became hard and tender, the l. being opened instead of cured by inward medicine; the r. became swollen and red, pitted on pressure, the horrible cut with the knife brought no matter; three days later the lancet was plunged in again, pus and blood came, but not freely; towards night breast got painful, middle of night tremendously swollen. Finally the cut closed, but left an angry bright redness of surrounding skin, which changed to a malignant purple hue, the woman became greatly exhausted and shivered. *Arnica* lotion relieved at once, and very soon there followed a healthy discharge from the abscess.
‖‖Sore nipples.
‖Child is breathless, bruised; or the mother has had a long, painful labor. θAsphyxia neonatorum.
Nipples of child swollen and tender, *Chamom.*; after pinching by nurses, *Arnica.*

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Voice deep, or low, muttering.
Hoarseness from overusing voice; also early in morning.
Raw, scraped sensation along trachea and bronchi.
‖Tickling sensation in trachea.
When lying down, crackling sensation in trachea; evening.
‖Hoarseness of preachers and military officers, from long preaching and commanding, also of conductors from calling out the railway stations.
‖In throat, sound of a subdued whistle.

Google

‖Cough is difficult, most in lying position. θApoplexy.

[26] **Respiration.** ‖Breath fetid, short, panting.
Worse on inspiration; > expiration.
‖Inspiration quick, expiration slow.
‖Quick inspirations and expirations.
‖‖Short, panting breathing. θAngina pectoris.
Oppression of chest, with anguish and heat in head.
‖Anxiousness and dyspnœa; when getting awake.
Dyspnœa, head hot, face red, body cool.
‖Dyspnœa from a blow on epigastrium.
Asthma, with inclination to move about; sleepless, before midnight; looks as if dying.
‖‖Asthma from fatty degeneration of heart.
Suffocative oppression of chest.
Children when angry lose their breath.

[27] **Cough.** Dry, short, hacking cough.
‖Cough produced by itching irritation in upper part of larynx, during siesta.
‖Constant insupportable tickling in larynx and trachea, causing cough day and night. θPneumonia.
Tickling in lower part of trachea, and dry, hacking cough, most at night.
Dry cough, with tickling in chest.
‖Constant dry cough, which shakes whole frame.
‖Child weak, fretful, has a frequent short cough. θDiarrhœa.
Cough after screaming or crying.
‖Cough excited by cries in children when accompanied by anger and tossing about.
After gaping he coughs.
‖Cough after measles.
Cough at night during sleep.
‖Paroxysms of cough at night during sleep, not awaking. θHeart disease.
‖‖Whooping cough: child cries before paroxysm as though in fear of soreness it will cause; cough causes blood-shot eyes, nosebleed; expectoration of foaming blood, or clots of blood.
‖Sputa loosened with difficulty.
‖Spitting of frothy phlegm with water. θPneumonia.
‖Expectoration: offensive, green, purulent, blood-streaked; ‖when loosened must be swallowed; day and evening scanty, difficult expectoration of transparent, glairy slime, mixed with black dots, or bloody. θBronchitis.
‖Sputa mixed with blood.
‖Severe hæmoptysis in a phthisical patient; blood darkish, semifluid, and expelled after a hacking cough.
‖‖Hemorrhage after mechanical injuries; slight spitting

Google

of black, thick, viscid blood, or bright red, frothy blood, mixed with mucus and coagula.

‖‖Hæmoptysis.

‖During cough: scratching in throat, tickling in trachea; ‖rawness, stitches in chest; ‖asthma; catching of breath; congestions and heat; bruised feeling in ribs; ‖vomiting; ‖pressure and stinging in head; prickling on head.

Cough, with stitching in sides of chest.

Cough, producing a feeling in ribs as if all of them were bruised.

Inner Chest and Lungs. Great tightness of chest, with difficult breathing.

Pressive pain in (r.) chest, at a small spot, not increased by motion, touch or inspiration.

‖Oppression of chest, with anguish. θAngina pectoris.

‖Sensation of an oppressive weight at upper part of chest, with a feeling of constriction in throat.

‖Pains in r. side of chest, dependent on overexertion of r. arm. θMyalgia.

‖Aching pains in chest.

‖Dull aching pain in l. chest. θPneumonia.

Chest sore when coughing, sputa blood-streaked; cannot raise the loosened mucus.

‖Burning or rawness in chest.

His chest feels affected, raw; his sputa is sometimes tinged with blood, especially when walking.

‖Stitches in chest (l.), worse from a dry cough; < from motion; > from external pressure.

‖Violent stitches in middle of l. chest.

‖Stitches in l. chest near sternum, during a deep inhalation. θAngina pectoris.

‖Stitching in one side of chest, with a short cough, which creates pain.

‖‖Pleurisy after mechanical injuries; must continually change position, bed feels so hard.

‖‖Pneumothorax from external injuries.

‖Pneumonia after whooping cough, especially where there is much soreness on coughing.

‖Chest sore when coughing, sputa blood-streaked; cannot raise the loosened mucus. θPneumonia. θPertussis.

‖All joints of bones and cartilages of chest feel painful, as if they were sprained, bruised; during motion and breathing.

Heart, Pulse and Circulation. ‖Pain from liver up through l. chest and down l. arm; veins on hand swollen, purplish; sudden pain, as if heart was squeezed, or as if it got a shock. θAngina pectoris.

‖Region of base of heart feels as if bruised.

Google

‖‖"Strain of the heart," from violent running.
‖Irritable cardiac action. θMyalgia.
‖‖Fatty degeneration of heart.
|Great cardiac distress.
‖Stitches in cardiac region.
‖Painful pricking in region of heart.
‖Stitches in heart from l. to r., with fainting fits. θAngina pectoris.
Heavy breathing; stitches, burning; palpitation.
Congestion to head and chest, with sensation of heat in these parts, and coldness of the rest of body.
‖Palpitation after almost any exertion; goes off by rest.
‖Beating of heart, more like a quivering. θAngina pectoris.
‖Pulse not full nor rapid, temperature not increased. θChronic attacks of headache.
‖Pulse 72, less frequent and weaker than usual. θApoplexy.
‖Full, hard, slow pulse. θTyphus.
Pulse: accelerated, full, hard; sometimes quicker than beat of heart; intermittent, feeble, hurried, irregular; fluttering.
‖‖Pulse, in rest, below 60, after moving, above 120. θNephritis.
When the pulse grows slow it is weak.
θVery low, weak, rapid pulse. θTyphus.
|Faintness, feeble, hurried, variable pulse and irregular rhythm of heart, horror of instant death. θWith cardiac distress in night.

[30] **Outer Chest.** ‖‖Articulations and cartilaginous connections of chest feel as if beaten, when moving, breathing, or coughing.
‖Violent stitches in middle of l. chest.
|Pain through thorax, stitches with cough, which increased the pain.
‖|Pressive pain in r. chest, at a small spot which remains unaltered either by motion, contact, or breathing.
Pains in intercostal muscles.
‖Pains in left side of chest, at insertion of greater and lesser pectorals; had to lift heavy weights with l. hand. θMyalgia.
‖Severe pain in l. side of chest and abdomen; pain was not only along insertion of pectorals, especially their lower portion, but also along digitations of external oblique abdominis and serratus magnus, from working in a constrained position.
Red sweat on chest.

[31] **Neck and Back.** Weakness of cervical muscles: they do not support the head steadily.

Google

‖Violent spinal pain, as from sudden rising after long stooping.

Her head feels so heavy, and is so movable from weak, cervical muscles, that it inclines easily to all sides.

‖Great sensibility of cervical vertebræ to pressure. θCongestive chills.

Great soreness of back.

‖Fulness and pressure in lumbar region.

‖Sensation of a great weight across lower part of loins, and feeling of being drawn in, as if a cord was tightly drawn across.

Tingling in back.

Spine pains, as if not capable of carrying body.

‖Pain in region of lumbar vertebræ. θNephritis.

Small of back pains; stitches when coughing, breathing deeply, or walking.

‖Right scapula and small of back painful, as if beaten.

A peculiar painful sensation extending down back, as comes sometimes from continued stooping in hard work, in rising from bed in morning.

Pressive pain between scapulæ, which seemed to extend from posterior wall of stomach.

Pain in right scapula towards back, as after a violent blow or fall.

The small of the back is painful, as if it had been beaten.

Bruised feeling in whole body, especially in region of dorsal and cervical vertebræ, and great weakness of muscles of neck, pain as of a bruise, and compression of chest.

Upper Limbs. ‖Violent twitching pain from shoulder joint to middle finger.

Anterior surface of arms feels bruised.

‖Arms feel weary, as if bruised by blows; he was unable to bend his fingers inward.

‖Cannot lift r. arm. θApoplexy.

‖Sensation as if joints of arms and wrists were sprained.

‖Pains in arms and hands, as if knocked against something hard.

Forearm and hand much swollen and red, surface covered with vesicles.

‖Slight cracking and sensation of dislocation in r. wrist when moving hand.

Left wrist powerless; feels as if he could not use arm.

Tearing, twitching, drawing pain during rest on ulnar side of dorsum of r. hand.

‖Veins of hand distended, with full, strong pulse.

Erysipelatous inflammation, l. hand dark blue, and covered with large and small vesicles, which gave skin the appearance of a rhinoceros hide.

Google

Drawing in r. thumb.
Acute bruised pain in balls of thumbs.
‖Cramps in fingers of l. hand. θAngina pectoris.
‖Ends of fingers cold. θPneumonia.
Violent twitching pain, extending to middle finger.
Pressive pain in joints of r. ring and little fingers.
Tearing in tips of l. ring and little finger.
Drawing pain in skin of dorsum of l. little finger.
Itching pimple between thumb and index finger; when touched, a fine stinging pain, as if a splinter were in it.

31 **Lower Limbs.** Abscess of psoas muscle.
‖Drawing pressing pains in l. hip joint, thigh being extended, when sitting.
‖Hips pain as if sprained.
‖Boring, tearing pains shifting from r. hip joint to various parts; < at night, cannot find an easy position; bearable during day, and during motion. θAfter a sprain.
‖Formication; lame feeling; must often change position, bed or chair seems so hard. θAfter exertion, long marches, etc. θSciatica.
Pain in thighs when walking, as from a blow, or contusion.
Thighs livid, with blue yellow marks, as if black and blue.
‖Blue spots appeared on thighs, which felt as if bruised when touched; these spots were more numerous after mental emotion or exertion.
‖Carbuncle on thigh.
Large open, inflamed carbuncle, red; on inner side of l. thigh.
‖Knee joints suddenly bend when standing, feet numb, insensible.
Prick in knee when touched.
‖Complains of a feeling as if knee was dislocated, and of a paralytic weakness of whole limb. θAfter an injury.
‖‖Hygroma patellæ
White swelling of knee.
Intense burning at a small spot on outside of l. tibia.
‖Pain in calf of r. leg, as from a blow, with lassitude of legs.
‖The r. lower limb cannot be used as usual. θApoplexy.
Tingling in legs.
‖Arthritic pains in foot, < towards evening; fears passers-by may strike it; big toe joint red, feels sprained.
‖Arthritic pain in foot, with a little fever towards evening.
Tearing pain in r. external malleolus, and on dorsum of foot.
Drawing in outer half of back of l. foot.
Want of power in ankles and feeling of a heavy weight in each instep.

Google

Tarsal joint pains as if sprained.
Violent burning in feet.
‖Feet feel tired or inflamed after a walk.
‖Hot erysipelatous inflammation and painfulness of foot.
‖‖A splinter ran deep into sole months ago, producing a great deal of proud flesh, came out after inner and outer use.
When walking, on raising l. foot, and bending l. ankle, crawling in outer half of l. sole, as if nerve was pulled.
Tearing in l. little toe.
‖Corns (pare them and apply externally).
‖Young lady subject to headache and neuralgia; when headache got >, the same pain would come on in some small spot on lower extremities.

[34] **Limbs in General.** Heaviness in limbs.
‖‖Paralytic pain in all joints during motion, as if bruised.
‖Limbs as if bruised at rest or in motion; painful concussion from jolting of carriage or stepping firmly.
‖Soreness in limbs. θMeningitis.
‖Limbs ache as if beaten. θIntermittents.
‖Tearing, with soreness, numbness, swelling, or tingling.

[35] **Rest. Position. Motion.** Motion: dizziness and sick stomach <; stitches in head; aching and pains in forehead <; vertigo <; burning in brain <; pinching in eyeball >; pains in chest <; pulse 120; paralytic pains in all joints <; bruised feeling of limbs; chills <.
‖In walking, feeble, as if suddenly blighted with old age.
Walking: in open air relieves pinching in r. eyeball; pressure in forehead; when running, urine involuntary; small of back pains; thighs pain as from a blow; crawling in outer half l. sole; vertigo; prolapsus ani; cannot think after walk in open air.
Walks bent: prolapsus uteri.
Stooping: headache.
Running: involuntary urination.
Rising: dizziness and sick stomach <; headache.
Sitting: pain in l. hip joint; headache.
‖Undisturbed horizontal posture alleviated some, and a few hours of sleep made it to disappear. θChronic attacks of headache.
Ascending: pressive pain in forehead.
Standing: cramps in rectum.
Must lie down: after stools; from weakness.
Lying: dizziness and sick stomach >; on l. side, pain in region of liver; stinging in skin; feels hot, etc.; must lie stretched out on back; must lie down after stool; pain in fauces as from something rough; relieves vertigo; must lie stretched out on back, megrim; with head low, iritis is better.

Google

Better when lying on side or on back.
At rest: burning in brain >; pain in eyes <; pulse 60; limbs feel bruised.
Turning in bed: liver painful.
‖Complaints from exertion: hoarse, overusing voice; palpitation; formication, lame; paralysis; bruised feeling; sciatica; weary, faint; retained urine; nosebleed.
‖Every exertion: walking, stooping, talking, increases pain to an almost insufferable extent. θChronic attacks of headache.
Inclination for motion: asthma, etc., boring pains, better.
‖Better with head low or in a horizontal position; < rising from a seat or assuming an erect position.
Complaints when overhurried: urine involuntary when running, etc.

[36] **Nerves.** Twitching of muscles.
‖Head feels hot to him, body feels chilly and cold, between frequent attacks of violent convulsions. θAfter *Acon.*
‖Tired feeling, as after hard work or as if beaten. θIntermittent.
General weakness.
‖Great weakness. θApoplexy.
‖Great weakness followed by fearful exhaustion and shivering, after repeated useless lancing of abscesses of mammæ.
‖Weary, bruised, sore, great weakness, must lie down, yet bed feels too hard.
‖Weakness, weariness, sensation as of being bruised; these symptoms oblige him to lie down.
‖Much reduced by long continuance of intermittent.
General relaxation during forenoon, with nausea.
General fatigue, lassitude and sleepiness.
‖Went to bed languid and exhausted.
Lassitude and sluggishness of whole body; scarcely able to stand.
‖Loss of strength and of all sense of health.
Great sinking of strength.
‖Great prostration. θTyphus.
‖‖General sinking of strength; he can scarcely move a limb. θTyphus.
‖Paralysis depending on extravasation of blood in brain.
Paralysis: generally painful; left-sided (after apoplexy); partial, from concussion of spine or brain.

[37] **Sleep.** ‖‖Frequent yawning in evening, without sleepiness.
‖Sleepiness; too sleepy early in evening.
‖Languor, drowsiness. θCholera infantum.
‖Drowsy state. θMeningitis infantum.

Google

‖‖While answering, falls into a deep sleep before finishing. θTyphus.
‖Somnolence.
Is often kept ~~awake until~~ 2 to 3 A.M. from heat, restlessness and constant desire to change position; or from prickling stinging biting, now here, now there, on body.
Sleep restless, frequently wakened by dreams.
‖Restless sleep. θApoplexy.
‖Sleep at night restless and interrupted. θDiarrhœa.
Unrefreshing sleep, loud blowing breathing.
Lies preferably with head low or horizontally.
‖Sleepless all night, has to lay limb now here and now there, but no relief. θCaries.
‖Passes many nights sleepless. θProlapsus ani.
‖Cannot fall asleep, fantastical visions while lying awake.
During sleep ‖loud talking, whimpering, loud blowing in and expirations; feces and urine pass involuntarily; head jerked backward.
‖Loud crying out in sleep. θMeningitis infantum.
Involuntary expulsion of feces while asleep.
‖Sleep was much disturbed.
On falling asleep: starts as in fright; is aroused by heat.
‖Frequent starting in sleep. θMeningitis infantum.
‖Falling asleep, lying on one side, he has pleasant dreams, but awakes with a violent pain in shoulder joint and arms; hands fall asleep.
‖Falling asleep while lying on back; awful dreams of robbers and murderers, and of being buried alive, suffocation, etc.
‖Dreams: vivid; frightful, of graves, black dogs, struck by lightning, etc.; unrefreshing, anxious, with talking. θTyphus.
‖Many vivid dreams. θMeningitis infantum.
‖‖Dreams repeat; had the very same often before.
‖Awoke six or seven times, each time from dreaming that he was dying, his bed surrounded by friends, to take their last leave.
‖When getting awake, they stare and look about anxiously, with small pupils. θMeningitis infantum.
‖On waking in morning, paralyzed on r. side.
‖Worse after a long sleep, or on awaking.
‖Early after getting up, he dare not at once read or work mentally, without getting a spell. θMegrim.

[55] **Time.** Night: retching; urine, stool involuntary; coughs in sleep; boring, tearing, r. hip joint.
Night: violent, cutting pains in hypogastrium; involuntary urination; cough, with heart disease.

Google

12 P.M.: sweat, with headache.
Early morning: fulness in head; great thirst; dry heat.
Morning: nose bleeds on blowing; taste of rotten eggs.
Forenoon: ‖nausea; chilly.
Noon: one cheek warm during dinner.
Afternoon: aching in forehead <; pain in fauces as of something hard, rough.
Day and evening: expectoration scanty.
Towards evening: headache <; arthritic pains <.
Evening: dry heat of face; crackling in trachea; sleepy too early.
Evening until midnight: cough.
Night and morning: burning in brain.
Day and night: cough.

[39] **Temperature and Weather.** Inclination for open air; > in open air.
Warmth: pain in eyes; teeth <.
Near warm stove: pressive pain in forehead <.
‖Sudden cooling after overheating, followed by a consumptive cough.
Wants his cold feet covered.
‖Worse in damp, cold weather. θParalysis.
‖Temperature changeable, one time cold, and another warm. θDiarrhœa.
‖Longing to be in the free open country air.
‖All Summer and Autumn. θDysentery.
‖Washing whole body with cold water is the only thing that gives relief for the time. θProlapsus ani.
Chilly when uncovering.

[40] **Fever.** ‖‖Frequent violent attacks of chills. θNephritis.
‖Chilly morning or forenoon; before chill, yawning, thirst for large quantities of water; drawing in periosteum.
Chill: most in evening, with much thirst already before chill; after every sleep; felt in pit of stomach; one-sided; on side lain on.
During chill, thirst, head and face hot.
‖Violent chill, lasting six hours, succeeded by fever for eight hours, both returning every day towards evening. θDysentery.
‖Shivering over whole body and head, at same time heat in head, and redness and heat in face, accompanied by a coolness of hands and a feeling as of hips, back and anterior surface of arms being bruised.
‖Chilly internally, with external heat.
‖‖Chilly, with heat and redness of one cheek.
‖‖Head feels hot to him, body chilly and cold; < between frequent attacks of convulsions.
‖Upper part of body warm, lower part cold. θParalysis.

Google

‖Head and breast warm, abdomen and limbs cold. θCholera infantum.
Heat of upper part of body, coldness of lower.
‖Head alone, or face alone hot, body cold.
‖Great internal heat; hands and feet being cold.
‖Dry, general heat after waking; early morning, violent thirst; uncovering makes him chilly; chilly even when moving in bed.
‖Dry heat over whole body after waking early in morning.
‖Heat, with indifference, stupor; drinks less. θTyphus.
‖Flushes of heat with thirst. θTyphus.
Continuous heat, with such weakness that when attempting to sit up he faints.
Sweat: sour or offensive; sometimes cold.
‖Offensive odor of moist skin; breath putrid. θTyphus.
Worse when sweating; sweat partial on front of body; aversion to uncover.
‖General sweat about midnight, followed by faintness. θWith headache.
‖The exhalations smell sour; nightly sour sweat.
‖All three stages, rigor, heat and sweat well marked.
‖Thirst great before and during chill, less during heat and with sweat almost gone. θIntermittent after quinine.
‖‖Malaria intermittens.
‖During apyrexia in intermittent fever, headache, yellow face, bitter taste, aversion to meat.
‖‖Traumatic fevers.
‖Hectic fever, emaciation. θAfter a blow on stomach.
‖Typhus or dysentery with little pain in abdomen.
‖‖Typhoid conditions.
‖‖Putrid fevers.

41 **Attacks, Periodicity.** Worse during increase of moon.
‖Periodical attacks of megrim.
‖Spasms of cough.
‖‖Heat in oft-repeated short attacks.
Periodically repeated rheumatic pleurisy.
Every day: violent chill; nightly diarrhœa.

42 **Locality and Direction.** ‖‖Unilateral commencement of pains. θMegrim.
Right: pressure in half of head, especially over brow; headache; carries head to r. after injury to left eye; drawing pain in eye; eye projects from head; pressive pain inner half r. eyeball; rushing in ears, deaf in r.; cheek red, swollen; jaw pains; cutting in teeth r. upper jaw; pain and fulness in hypochondrium; r. side of abdomen hard, swollen; pains in side of chest from excessive use of r. arm; scapula painful; sharp drawing

Google

back of hand; wrist as if dislocated; pressive pain joints of ring and little fingers; pains shift from hip; calf pains as from a blow; malleolus pains.

Left: pain in head; stitches in frontal eminence; pain as if knife was drawn through head transversely; pricking under eye; stitches in ear; cartilage as if bruised; ear and cheek hot; pressure in liver, lying on l. side; pressure in ribs below heart; stitches under ribs; dull heavy pain in hypogastrium; pain from liver to l. chest and down l. arm; aching in side of chest; stitches middle l. chest; l. scapula to middle finger; pain in abdomen; drawing pressive pain in hip joint; hand dark blue; wrist powerless; paralysis; cramps in fingers; drawing in skin of little finger; hip; tibia burns; foot; little toe; crawling in sole; epigastrium to r. hypochondrium.

Left to right: abscess of mammæ; stitches in cardiac region; pain as if a knife was drawn through head.

Within outward: pressive headache.

[1] **Sensations.** As if brain was rolled up in a lump; as if head was being distended, or feels too large; as if an extravasation of blood had taken place in forehead; as if integuments of forehead were spasmodically contracted; as from a nail thrust into temple; as of a heavy weight in head; as if a liquid was fluctuating in brain; as if brain was sore and tender; as if some one touched forehead with cold thumb; as of ice on top of head; as if eyes could not be raised; eyeballs as if excoriated; as if lids were dry and slightly sore; as if parts of ear had been bruised; as if a knife was drawn through head transversely from l. side; as if forehead and cheekbones were crushed; as if hair was pulled out in occiput; as if teeth were forced or pressed out; as if something hard or rough was lodged in fauces; as of a lump in pit of stomach; as if wall of stomach was forcibly pressed towards spine and as if spine would be made painful from that place downward; as of water in abdomen; as if cutting into a wound in abdomen when touched; colic as if from flatulence; back pains as if beaten; as if knee was dislocated; as if coats of stomach were spasmodically drawn together; as if squeezed together, cardiac pain; as if a cord was tightly drawn across lower part of loins; as if fœtus was lying crosswise.

Excruciating pain: in teeth of upper jaw; in epigastrium; in back and hips.

Stitches: rapid, in l. frontal eminence; in forehead; in eyes; in inner canthi; through l. ear; in region of

Google

liver; in splenic region; under false ribs; through abdomen; in urethra; in abdomen; in chest; in cardiac region; in small of back.
Cutting: in teeth; in epigastrium; in hypogastrium; in intestines; like knives through kidneys; in orifice of urethra.
Shooting: in and around eyes.
Sharp thrusts: through abdomen.
Sticking pain: in temples and forehead.
Stinging: in throat.
Pricking: and tearing in forehead; in knee.
Darting: in forehead.
Splinter pain: in pimple between thumb and index finger.
Tearing: towards temples; in and around eyes; in teeth; in l. half of pubic eminence; in r. hand; in r. hip joint; in r. foot; in l. little toe; in finger tips; in limbs.
Drawing: in vertex and occiput; in r. eye; in r. hand; in l. hip joint; in l. foot; in r. thumb; on back of l. little finger; in periosteum.
Biting sensation: on tongue.
Stinging: in back part of throat; in head.
Burning: in brain; in eyes; in cheek; in lips; in throat; from fauces to stomach; in stomach; in hypogastrium; along perineum; in chest; in cardiac region; on outside of l. tibia; in feet; in calf of r. leg.
Scraping burning: in mouth and œsophagus.
Raw scraped sensation: in trachea and bronchi.
Soreness: in upper part of head and brain; in back part of throat; in stomach; of parts after labor; of chest; of back; in limbs.
Aching: in forehead; through temples to occiput; in stomach; of chest; in limbs.
Pressure: in r. half of head over brow; in forehead; in eyeball; in stomach; on præcordia; at epigastrium; in region of liver; in anus and rectum; in bladder; in r. chest, at a small spot; in lumbar region; between scapulæ; in l. hip joint; in finger joints.
Pressing shooting in temples.
Pinching: in eyeball; in stomach.
Grinding: deep in hypogastrium.
Griping: in stomach.
Boring: from r. hip joint to various parts.
Arthritic pains: in foot.
Sprained sensation in teeth; in groin; in joints of bones and cartilages of chest; in joints of arms; in hips; in big toe; in tarsal joints.
Sensation of dislocation; in r. wrist; in knee.

Google

Bruised feeling: in and behind ears; in nose; in articulation of r. jaw; in abdomen; in anus; in back; in ribs; in joints of chest; base of heart; in r. scapula and small of back; in whole back; in thighs, in arms; in balls of thumbs; in lower limbs.
Twitching pain: from shoulder joint to middle finger; in dorsum of r. hand; in middle finger.
Cramps: in fingers of l. hand.
Cramplike, pressive pricking in l. eye and nasal bone.
Dull pain: in forehead; back and limbs; over eyes; in l. hypogastrium.
Undefined pain: over one eye; in ears; over root of nose; around navel; in abdomen; in bladder; between crest of r. ileum and sacrum; in r. side of chest; intercostal muscles; in lumbar vertebræ; in calf of r. leg.
Throbbing: stinging or pinching in swollen cheek; toothache.
Fluctuating sensation: in brain; in abdomen.
Constricting cramp: in rectum.
Tightness: of chest.
Constriction in throat; constricting cramps in rectum.
Electric shocks: in occiput.
Fulness: in pit of stomach; in r. hypochondrium; in lumbar region.
Heaviness: of the head; in middle of brain; in eyes; in stomach like a weight at upper chest; in insteps; in limbs.
Heat: in forehead; of head; in l. ear and cheek.
Coldness: in forehead; in head, after knifelike pain; as if touched with a cold thumb on forehead; like ice on top of head; of nose; of body.
Crackling sensation: in trachea.
Crawling, as if nerve was pulled, in sole of l. foot.
Tingling: in nose; in gums; in back; in lower limbs.
Scratching: in throat; crackling sensation in trachea.
Prickling: in head.
Tickling in trachea.
Itching in canthi; all over.

" **Tissues.** ‖Concussions and contusions.
‖Bleeding of internal and external parts.
‖Venous enlargements, varicose tumors on lower limbs.
*θ*Dysentery.
‖‖Burrowing pus, not painful.
‖‖Prevents suppuration.
Prevents formation of pus by withdrawing water from serum; the watery contents of urine increase without increased drinking. Grauvogl.
Exudations in brain and spine.

Google

Dropsy of internal parts.
‖‖Hyperinosis is rather a contra-indication for *Arnica*.
Muscles rigid.
‖‖Septicæmia; tendency to typhoid forms.
‖‖Myalgia; particularly after overexertion.
‖‖Jactitation of tendons.
Painful sensitiveness of all joints and of skin, on making slightest motion.
‖‖Gout and rheumatism.
‖Bones (periosteum) ache. θIntermittent.
‖Paralysis of sphincters. θTyphus.
‖‖Inflammation of skin and cellular tissue; tender on pressure.
‖Emaciation. θHectic fever. θSubacute pneumonia.

45 **Touch. Passive Motion. Injuries.** ‖Better from gentle pressure. θIritis.
Stitches in chest >.
Painfulness of limbs to touch.
‖‖Everything on which he lies seems too hard.
‖Bed-sores; especially sacral region and hips. θTyphus.
‖Worse after riding; sick stomach from car or carriage riding.
After overlifting, attacks of violent sneezing.
‖‖Sprains, with much swelling, bluish redness, intense soreness.
‖‖After bruises with blunt instruments. θIritis.
‖‖Concussions; falls; mechanical injuries.
‖‖Contusions without laceration.
Friction: phymosis.
‖‖Stings of bees or wasps; splinters.
‖‖Compound fractures, and their profuse suppuration.
Pressure: aching in epigastrium <; liver sensitive; spleen sore; stitches in chest >.
‖‖Mechanical injuries: concussion of brain while there are unconsciousness, pallor or drowsiness; weak, intermitting pulse; cold surface, and other indications of depressed vitality from shock; threatened abortion; ovarian troubles; orchitis; mastitis, etc., etc.

46 **Skin.** Intense pricking or itching on entire body.
‖Skin hot and dry. θPneumonia.
‖Hot, red, œdematous skin.
Petechiæ, ecchymoses.
‖Hot, hard, shining swelling, from insect-sting.
‖Red spots first on limbs, then upon trunk.
‖Bed-sores; especially sacral region and hips.
‖Erythema nodosum.
‖Phlegmonous erysipelas.
‖Erysipelatous inflammation, l. hand dark blue.

Digitized by Google

Eruption like pin-heads, with redness of skin.
Irritable and slightly vesicular eruption.
Numerous small semitransparent vesicles with red bases, on some parts confluent, great and excessive irritation from itching. The course of the eruption was: first heat and great itching of skin, then redness, then vesicles, increasing in size, with intolerable itching; slight desquamation, followed with some redness of skin; where irritation had been worst the skin remained for some time hard, leathery.
‖‖Many small boils painful, one after another; extremely sore.
‖Carbuncle.
‖Varicose ulcers: torpid; dirty, bluish bottom; no pus, but watery, fetid secretion, half-transparent crusts, like thick glue, fetid; painful ulcers.

[47] **Stages of Life, Constitution.** Dark hair, rigid muscle.
Hydrogenoid constitution of Grauvogl.
‖‖Light complexion, sandy hair, sanguine. θWhooping cough.
‖Nervous, cannot stand pain. θProlapsus uteri.
‖Especially suitable to those who remain long impressed by even slight mechanical injuries.
‖Nervous women, sanguine plethoric persons, with red face. θProlapsus uteri.
‖In cases of sanguine plethoric people with lively expression, very red face, disposed to cerebral congestion. θProlapsus uteri.
Full-blooded, strong, old people.
Strong man, much dosed with quinia.
A lymphatic man leading a sedentary life, made a kind of opodeldoc of arnica and soon got many and alarming symptoms, lasting fully a month.
Girl, æt. 2½, cured by the tincture, of diarrhœa of several weeks' standing.
Man, æt. 25, bilious temperament.
A woman, æt. 35, nervous temperament, dysentery.
Man, æt. 57, short, thick, apoplectic habit, dark red face, accustomed to spirituous drinks θParalysis of r. side.
A robust man, æt. 50, inflammation of eye after a cold.
Man, æt. 67, acute stitches in ears followed by stupor, after an unusually cold bath.

[48] **Relations.** Antidotes to massive doses: *Camphor, Ipec.*
‖After *Cinchon.* low, given for the chills. θNephritis.
Antidotes to potencies: *Acon., Arsen., Cinchon., Ignat., Ipec.*
Arnica antidotes: *Amm. carb., Cinchon., Cicut., Ferrum, Ignat., Ipec., Senega.*

Google

It follows well after: ‖*Acon., Ipec., Veratr.;* after *Apis* in hydrocephalus.

After it follow well: *Acon., Arsen., Bryon., Ipec., Rhus tox., Sulph. ac.*

‖Headache is most quickly and certainly removed by a cup of coffee. θProlapsus ani.

Arnica is indicated in ailments from spirituous liquors or from charcoal vapors.

Arsen. aided *Arnica* in dysentery with varicose veins.

‖Complementary to *Acon.*

Alternated successfully in cases where the change of symptoms indicate it, with *Acon.* and *Rhus tox.*

Injurious after the bite of a dog or any rabid or angry animal.

Wine increases the unpleasant effects of *Arnic.*

Hyper. is preferable in spinal concussions.

Cognates: *Acon.; Amm. carb.; Croton* (swashing in abdomen); *Arsen.; Baptis.; Bellad.; Bryon.; Chamom.; China; Euphras.* (injuries to eye); *Calend.; Ferrum; Hepar; Hyper.; Hamam.; Ipec.; Mercur.; Pulsat.; Ran. scel.* (pains in intercostal muscles); *Rhus tox.; Ruta; Staphis.; Silic.; Symphyt.; Sulphur* (traumatic pleurisy); *Sulph. ac.; Veratr.*

ARSENICUM ALBUM.

The White Oxide of Metallic Arsenic. $As_2 O_3$.

One of the oldest of Hahnemann's provings, but not published in the Fragmenta, nor in the first volume of his Materia Medica. The reasons for this omission he gives in 1816, in the second volume. The ignorant, maltreated, easily frightened people, seeing the great effects of small doses, cried him out a "poison doctor." The first edition of *Arsenicum* contained 294 of his own, and 368 from other sources; some from his disciples, Stapf and Hornburg; the rest quotations from various authors, on which, however, he never placed much value.

In 1824, in the second edition of his Materia Medica, his own symptoms had increased to 431, and the symptoms of others to 516; Stapf, 23; Hornburg, 15; Langhammer (one of the best provings we have of this remedy), 58; Frederic Hahnemann, 13; Baehr, 11; Meyer, 6; the rest are quotations from the Old School; total, 947.

In 1833, in the third edition of his Materia Medica, we have a much improved edition, although containing some symptoms from Fowler's solution, in all, comprising 1068 symptoms.

In 1839, as an appendix to the second edition of his Chronic Diseases, Hahnemann gives us a fourth and last revision, with many more internal improvements and abridgements, including a proving by Nenning; in all, 1231 symptoms. The

Google

administration of *Arsenicum* is more often disappointing than that of any other drug, the cause of which lies in the too numerous collections of poisonings, and the lack of symptoms produced by higher potencies. This view is corroborated by the collection of the *Sulphur* symptoms where the relation is the reverse.

[1] **Mind.** ‖Loss of consciousness. θVertigo. θTyphus. θHeart disease. θYellow fever.

Loss of consciousness, and falling before epileptic attack.

She lay upon bed in a state of unconsciousness, muttering, eyes fixed, cold sweat on forehead, trembling all over, pulse small, hard, and very rapid.

‖Stupor, broken by anxious moaning. θChild with gastritis mucosa.

‖Loss of memory. θYellow fever.

Thoughts crowd upon him; he is too weak to keep them off or to hold on to one idea.

When alone, he falls to thinking about disease and other things, which he can scarcely keep out of his mind.

Gloomy forebodings while lying in bed, in evening, fears something may have happened to his relatives.

‖Thoughts of death and the incurability of his complaint. θCancerous inoculation.

Fixed idea that he and his family will die of starvation.

Dulness and weakness in head, cannot think, and is irritable; as if he had a bad cold, or had lost sleep.

‖Mental derangements with satiety of life in drunkards.

Imbecility.

Stupidity, with loss of hearing, and almost total blindness.

‖Thinks he must die. θMegrim.

‖Tormenting hallucination, as if there was one by his side who did all that he was doing, eating, washing, etc. θDiabetes mellitus.

He sees all kinds of vermin on his bed, throws handfuls of them away, and tries to escape from them.

He imagines that he sees burglars in his room, and listens under the bed; he is bathed in cold sweat.

Periodically returning fancies.

Talks wildly, with open eyes, and is not conscious of being flighty.

‖Delirium. θYellow fever. θTyphus.

‖In her delirium she thinks she is well; girl, æt. 7.

‖Delirium, with great prostration.

‖Delirium during heat, unconsciousness, mania, wants to be held; with a tearing headache. θIntermittent.

Mania; headache; terrible anxiety, noise in his ears as of many bells; sees a man who has hanged himself beckoning him to cut him loose, on failing to accomplish this, he attempts to hang himself; being prevented he falls

Google

into despair, and becomes so restless he can scarcely be kept in bed, loses speech, with full consciousness, tries to write, but can make only unintelligible characters; he trembles, weeps, his forehead is covered with anxious sweat, finally kneels down and lifts his hands in supplication.

Rage; had to be chained.

Her desires are greater than her need; she eats and drinks more than is good for her, and walks farther than she ought to do.

‖Suicidal mania.

A barber felt an inclination to cut his customers' throats.

Talking and quarrelling in sleep.

Great loquacity while awake and asleep.

πIf people came to see him, he did all the talking. θCancerous inoculation.

He wept and whined, but spoke little.

Hysterical crying, instead of fear.

‖Whimpering and gnashing teeth.

‖Loud moaning, groaning, and weeping. θDuring catamenia.

Pitiful complaining, great anxiety and restlessness, with disagreeable sensation in abdomen, and dyspnœa.

Piercing, pitiful moaning, interrupted by fainting spells.

‖Lamentations, despair of life. θColic.

‖Screaming with pains. θHeadache.

Loud screaming; says it is something within him that screams.

‖Picking of bedclothes. θTyphus.

Fear drives him out of bed; he hides in a closet.

Runs about house at night looking for thieves.

‖Hasty in all its motions; grasps tumbler or anything it wants eagerly. θEclampsia.

Says little, but complains of fear.

Aversion to all occupation.

Placid mood; remained the same no matter what happened.

Averse to meeting acquaintances, because he imagines he has formerly offended them, though knows not how.

‖Tranquillity of soul. θIn a man afflicted with melancholy.

At first great tranquillity and cheerfulness, followed in half an hour by terrible restlessness and anxiety; t.

Inclined to cheerfulness and activity.

Feels uncomfortable and takes pleasure in nothing.

Hypersensitive, delicate mood; sad and given to weeping; the least thing troubles her.

‖Her mind is depressed, sad. θRelapse of intermittent.

Google

Sad and gloomy, with restless tossing.
‖Melancholy, sadness after dinner. θHeadache.
‖Melancholy after mental overexertion.
Melancholy; after financial losses; cannot be consoled; thinks he will have to die, with his family, from starvation; sleepless nights; walks about wringing his hands, with moaning and groaning.
‖Deep-seated melancholic affection; ceased after tetterlike ulcers appeared on lower limbs.
‖Periodical attacks of melancholy only at twilight; sometimes at night; woman æt. 65.
Religious melancholy; hopelessness, despair.
‖Fear of being left alone. θAfter vexation. θDysmenorrhœa.
‖‖Dread of death when alone, or on going to bed.
‖‖Fear of death. θAfter vexation. θCholera Asiatica.
‖‖Anxiety and restlessness, < after midnight.
Hypochondriacal anxiety, which seems to originate in upper part of chest; restlessness, no palpitation.
Anxiety and impatience.
‖‖Excessive anxiety. θHeadache. θHæmatemesis. θColic. θIntussusception. θŒdema pulmonum. θHydrothorax. θMeasles, etc.
‖‖Attacks of anxiety at night driving out of bed. θMania.
‖Great anxiety, must jump out of bed. θAscites.
‖Frequent attacks of anxiety, < at night; fears death. θInfluenza. θDiarrhœa.
‖‖Anxiety and restlessness. θChill of intermittent. θHepatitis.
‖‖Anxiety and restlessness with pains; fainting from pain. θGastralgia.
‖Great anguish, tossing about. θColic. θPneumonia. θEmphysema. θIntermittent.
Præcordial anxiety, feels constricted.
‖Anxiety like that of one who has committed murder; driven from place to place; avoids meeting persons, thinking that he has offended them. θMania.
‖Terrible anxiety, flushing up; restless glance, no rest by day or night; inclination to commit suicide. θMania.
‖‖Great fear, restlessness, trembling, cold sweat, prostration.
‖‖Great anxiety, with constriction of chest and dyspnœa.
‖‖Great anguish and restlessness. θStricture of œsophagus. θGastralgia. θHæmatemesis. θColicodynia.
‖Indescribable anguish, restlessness. θMetritis. θPericarditis. θCholera Asiatica.
‖Anxiety, with nausea and gnawing in scrobiculum. θChill.

Google

‖Great despondency. θScurvy.
‖The pains seem intolerable, drive one to despair and frenzy. θHeadache.
‖Great indifference. θYellow fever. θTyphus.
‖Apathy; if roused by loud calling, they open eyes with difficulty and stare at you. θTyphus.
Cheerfulness, alternating with ill humor.
Indecision; the merest trifle alters his resolve.
‖Irritable, despondent and anxious; cardiac anxiety, with insupportable pain. θIntermittent.
‖Irritable mood, alternating with despondency. θIcterus.
Touchiness.
Disposed to discuss the faults of others.
‖Disposed to quarrel. θHemorrhoids.
‖Very cross and despondent. θChronic intestinal catarrh.
Dissatisfied and angry with himself all day; thinks he has not accomplished enough, and reproaches himself bitterly.
The child is irritable, whining and restless; wants to be carried.
Irritability, with dull, confused feeling in head.
Irritability, with flushes of heat and chilliness when talking or moving.
‖Irritable, discouraged, restless; vexed about trifles.
Vexed and dissatisfied with everything; the least noise or light annoys her, she is so sensitive to external impressions.
The least thing offends him, and moves him to anger.
‖‖Vexation, with anxiety, restlessness and chilliness.
She became furious when something to eat was offered her while complaining of loss of appetite.
Obstinacy, avarice, inclined to malice and satire.
‖‖Restlessness, cannot rest anywhere, moves from place to place; wants to go from one bed to another.
Inward restlessness, with dulness in head and stupor; with aphasia; with backache.
Restlessness and moaning, with sleeplessness; anxious restlessness, with weak, irregular pulse, limbs cold on surface; inward heat.
Great restlessness, alternating with drowsines.
‖Anxious restlessness and nausea.
‖After a fit of passion. θNosebleed, asthma, cough.
‖After great care and grief. θColic in pregnancy.
The pains are aggravated by other peoples' talking.
‖As a consequence of fright, inclination to commit suicide.

[2] **Sensorium.** Great weight in head, most in forehead.
‖Heaviness in head, with humming in ears; goes off in open air, but returns on entering room.

Google

‖Whirling vertigo, heaviness of head. θDropsy.
‖Vertigo and buzzing before ears. θBright's disease.
‖Vertigo: when shutting eyes, as if he would fall; when walking over an open space; preceding an attack of epilepsy; before chill in intermittent.
‖Vertigo, reels when walking. θHeadache.
Sensation as if brain moved and beat against skull, during motion.
‖Roaring in head. θHæmatemesis.
‖Head feels confused whenever it is moved. θParaplegia.
‖Confused and stunned, after epileptic attack.
‖Great confusion of head.
Weakness of head, also from pain, with qualmishness and weak feeling in pit of stomach.
Sense of unusual lightness.

[3] **Inner Head.** ‖Heaviness in forehead.
‖Severe exhausting pain over left eye; > from warm applications, or wrapping head up warm.
‖Intense frontal headache, with vertigo.
‖Drawing pressive pain in r. side of forehead.
‖Throbbing frontal headache over root of nose. θOzæna.
‖Pain as if bruised or sore, over nose and in forehead, rubbing relieves temporarily.
Throbbing in forehead, with nausea.
‖Intermitting, tearing, burning, boring pain in right supraorbital region, extending over eye and into upper teeth, not allowing a moment's rest; > by walking about.
‖Periodical headache, above left eyebrow and temple, lasting twelve hours, followed by vomiting of a yellow, bitter or tenacious mass.
‖Tensive, pressing pain spreading from forehead and temples to occiput and nape of neck; comes in violent attacks, as if head would burst.
‖Violent periodical headache, boring in a small spot in temple.
‖Hemicrania: reels like a hot wire thrust through ramifications of fifth pair of nerves; must move head and feet; alternating with colic or liver complaint.
‖Periodical semilateral throbbing, with nausea, buzzing in ears and vomiting; < after eating, morning, evening, or nights in bed, with weeping and moaning; sometimes it becomes maddening.
‖Beating or pressing as from a load on brain; < rising up in bed, from motion; > temporarily by cold washing; improved by walking in open air.
Dizzy headache on top of head.

Google

The pain in head and face is especially severe on l. side; cannot lean or rest on that side; vomits bile; stomach remains irritable.

Headache in occiput.

Pressive pain in occiput, between epileptic attacks.

Violent pressing headache; stretching; cold sensation in back; great weariness, after an hour's heat, with restlessness and anxiousness. θIntermittent.

Pressure in forehead during chill. θIntermittent.

Occipital headache, of a pricking character. θRetinitis albuminurica.

Dull, heavy, or throbbing pain in head. θYellow fever.

Tearing in brain, as if torn to pieces.

Neuralgia in brain, as if cats were tearing it to pieces. θCancerous inoculation.

Sensation of wabbling or swashing in brain.

Internal headache; < from light and noise.

Neuralgic headache, with restlessness; has to move head, even feet up or down to get relief.

Periodical headache, cannot move or fix his attention.

Stunning headache, periodical, because incapable of all movement or attention to any subject; could only rest his head on a table, and bear it the best he could.

Constant severe headache, with vomiting, when raising head.

When moving head while walking, brain seems to strike skull.

Heat or stitches in head when coughing.

Heaviness of head is relieved by going into open air.

Megrim, with deep-seated biliary derangements; vertigo, nausea, retching, and vomiting of bile.

Headache, with irritation of ovaries and uterus.

Paroxysm of excessively painful hemicrania, with great weakness and ice-cold feeling in scalp, followed by itching.

Periodical headache, begins at 7 A.M., reaches its climax at 11, and begins to decrease at 2 P.M., followed by extreme prostration.

Headache before chill. θIntermittent.

Towards end of chill, stinging, pressing and drawing in forehead, extending to eyes; < by opening eyes and motion. θIntermittent.

Headache during heat, burning, pressing outward tearing, throbbing, stinging in forehead. θIntermittent.

Headache after fever, pain in sacrum during.

Rarely apoplexy; sometimes apoplexia serosa.

Chronic hydrocephalus, with great emaciation, shrivelled skin; nightly restlessness and dyspepsia.

Google

Outer Head. ‖He walked with head thrown back. θSuppressed catarrh.
‖Great sensitiveness of head to open air; wraps head up warmly.
‖Can scarcely bear hair to be touched, scalp so sensitive.
‖‖Hot head, sensitive hair, cannot bear having it touched. θHeadache. θSuppressed catarrh. θHorizontal half-sight.
‖Head and face swollen like whole body. θAnasarca.
‖Œdema of head, face, eyes, neck and chest, having a natural color.
Hard swelling on frontal eminence, resembling a nut; worse in evening.
‖Erysipelatous burning and swelling of head, with great weakness and coldness; < at night.
‖Head sensitive to air. θHemicrania.
Worse from uncovering head; > from wrapping it up warmly.
Burning itching on head, in evening, when undressing and growing cold.
Chronic eczema of face and scalp, spreading from ear, with a fine vesicle drying down into branlike scales.
‖Scalp covered with dry scales, scabs, or crusts; sometimes extending down to forehead, ears or neck.
‖Head sore, with an itching, moist eruption, which forms a dry scurf. θScrofulous ophthalmia.
‖‖Scabs on hairy scalp.
‖‖Chronic eruptions, with pustules and vesicles filled with pus. θTinea.
‖Burning, biting boils or pustules on scalp, sensitive to touch and cold.
‖‖Losing hair on front part of head.
‖Falling out of hair; also in circular patches, which become rough and dirty.
‖Eruptions destroy roots of hair. θTinea.

Sight and Eyes. ‖Sensitive to light; especially to sunlight.
‖‖Snow dazzles eyes and makes them water.
‖‖Photophobia. θOphthalmia, or scrofulous catarrhal ophthalmia.
‖Shuts her eyes, as if she could not keep them open.
‖Flickering before eyes.
‖‖Everything appears green. Compare *Phosphor.*
‖Horizontal half-sight; only objects in lowest part of field of vision could be seen. θSuppressed catarrh.
When closing eyes, oftener < than >.
Worse when looking up or straining eyes.
‖Weakness of sight; dim sight.
‖Vision reduced in l. eye to counting fingers at two feet, r. vision $\frac{20}{70}$. θRetinitis albuminurica.

Google

Sees as through a white gauze.
Has to lift head somewhat, if she wants to look at anything, because she can only see things below axis of eye, and that not very clear; anything above axis she cannot see at all; it is like a grey board. θScotodia.
Dim vision, with headache. θSuppressed catarrh.
Sight is cloudy. θAlbuminuria.
Constant lateral motion of balls. θAmaurosis, after suppressed eruption.
Pupils contracted or dilated.
Wild staring look.
Eyes staring, glistening. θTyphus.
Eyes sunken or protruding.
Twitching in eyes, as if they were drawing into head, with burning heat, hot lachrymation and photophobia. θScrofulous ophthalmia.
A bluish circle around cornea.
Yellowness of sclerotica. θYellow fever.
The eyes feel as if they had no room in the orbit. θScrofulous ophthalmia.
Pulsative throbbing in eyes, at every pulsation a stitch; after midnight.
Pressing and beating like a small pulse is felt in and around eyeball as frequent as one hundred in a minute; a tormenting sensation. θOphthalmia.
Painful throbbing and beating in middle of l. supra-orbital region in a small spot.
Throbbing, pulsating in eyeball and around orbit, with general restlessness and prostration. θScrofulous ophthalmia.
Suborbital pain on l. side, with prickings, as with needles, sometimes quite severe.
Stinging pain when trying to open lids. θOphthalmia scrofulosa.
Violent pain in eyes; reaches its height in night. θOphthalmia.
Paroxysms of most intense pains in eyes. θHorizontal half-sight.
Various neuralgic pains in eyes. θScrofulous ophthalmia.
Heat in eyes, and burning in chest, with dyspnœa. θChoroiditis, alternating with bronchial catarrh.
Burning pains over orbit, < at night, with profuse acrid lachrymation. θKeratoiritis.
Violent burning in eyes. θOphthalmia scrofulosa. θConjunctivitis.
Burning and swelling of eyes.
Burning pain in eye, < at night, after midnight. θIritis rheumatica.

Google

Burning, watering and sticking together of lids at night; dimness of vision. θDropsy.

Burning pains in eye and upper part of orbit, < at night, and accompanied by copious secretion of tears. θKeratitis punctata.

Severe burning in eyes; burning tears, corroding as they flow. θOphthalmia scrofulosa.

Pain in r. eyeball, particularly during motion.

Pain deep in eye, with violent pain when moving; profuse fluent coryza, with stoppage of nose; ulceration high up in nose, with discharge of fetid, bitter tasting ichor; ulcers all over face, with blue and green spots and streaks; bluish sickly color of face and dissatisfied expression.

Opens eye well in cool open air, but cannot in house, even in a dark room. θScrofulous ophthalmia.

Arsenic cases are generally relieved by warm applications; they are very frequently periodic in their occurrence, commencing every Fall, and often changing from one eye to the other.

Iris discolored, reacting sluggishly. θKeratitis punctata.

Progressive choroiditis disseminata, which alternated with bronchial catarrh; when the eyes were >, the chest was <, and vice versa.

Syphilitic iritis.

Parenchymatous keratitis, with excessive photophobia; lies in bed with face buried in pillows, hot, scalding lachrymation causes an eczematous eruption; paroxysmal pains; child fretful and obstinate (compare *Rhus*).

Keratoiritis, with burning pains in and over eyes, profuse, acrid lachrymation.

Sclerotica deep red, with great photophobia. θOphthalmia.

Vascular elevations on cornea, resulting from ulceration, aggravated by opening and closing eyes, with violent burning pains every afternoon.

Ulceration of cornea recurring first in one eye, then in other. θScrofulous ophthalmia.

Ophthalmia, with ulcers on cornea before and during catamenia.

Ulcer on outer side of cornea, with elevated edges, pain like pricking of needles, excoriation of external canthus, burning and sticking pains.

Violent inflammation of eyes and ulcers on corneæ. θInfluenza.

Ulcers of cornea, with chronic trachoma and blepharitis, after suppression of itching on scalp.

Cornea had become dim and dotted with small white scars from old ulcers. θScrofulous ophthalmia.

Google

Cornea degenerated. θOphthalmia scrofulosa.
Inflammation of eyes and lids.
Ophthalmia of children, when skin is rough, dry and dirty looking; intense pain from least ray of light, with profuse lachrymation.
When eyes are >, feet are swollen. θScrofulous ophthalmia.
Ophthalmia beginning at 5 A.M., increasing until noon, decreasing until 10 P.M.
Conjunctiva looks like a piece of a raw beef.
Bluish-red inflamed conjunctiva and swollen lids. θOphthalmia.
Conjunctiva injected, capillaries congested, forming an elevation around cornea; red, granulated, in some places bluish-red. θOphthalmia scrofulosa.
Conjunctivitis, appearing periodically every afternoon, towards 4 o'clock.
Conjunctiva not hyperæmic, but with œdematous swelling of its outer segment. θKeratitis punctata.
Lachrymation.
Acrid tears gush from eyes. θScrofulous ophthalmia.
Pterygium, with dryness of lids.
Posterior synechiæ, some exudation into pupil, white punctate spots on membrane of Descemet. θKeratitis punctata.
Trembling of upper eyelid, with lachrymation. θConjunctivitis.
Lids spasmodically closed. θOphthalmia scrofulosa.
Eyelids œdematous and spasmodically closed.
Soreness of internal surface of lids, which are swollen externally and spasmodically closed, so that opening eyes causes intense burning sticking pain.
Edges of lids painful during motion, as if dry and rubbing on ball.
Pain in margin of eyelids, on moving them, as if they were dry and rubbed against balls, both in open air and in room.
Burning in margins of lids; in evening a feeling as of sand in eyes, obliging him to rub them.
Lids were very sore on inner margins. θScrofulous ophthalmia.
Brilliant, red inner margin of lids, dryness of their inner surface. θTrachoma.
Lids inflamed only on internal surface; they are painful, dry and rub against ball; they burn and can scarcely be opened. θChronic granulated lids.
Extreme redness of inner surface of eyelids, with an uneasy sensation rather than pain, often obliging one to rub the eyes.

Google

Ulcerations on inner surface of eyelids. θOphthalmia scrofulosa.

Œdema of eyelids. θBright's disease.

Eyelids swollen and œdematous, first upper then lower (this swelling is mostly non-inflammatory and painless); the œdematous lids are firmly and spasmodically closed, and look as if distended with air.*

Agglutination of lids. θTyphus.

Eyes sunken in their sockets, closed eyelids gummed. θFebris nervosa putrida.

She had no lashes left. θScrofulous ophthalmia.

Lids hanging down. θTyphoid.

Complaints predominate on lower eyelids.

Tearing pains around eyes on looking at light. θScrofulous ophthalmia.

Eruption around eyes.

Red cricles around eyes and at root of nose. θParaplegia.

Bluish around eyes and mouth. θSummer complaint.

Puffed around eyes. θNeuralgia of trigeminus.

Œdema around eyes, with heat and paleness. θBright's disease.

Swelling under eyes.

Eyes sunken. θCholera Asiatica. θYellow fever.

Eyes sunken in their sockets; half-closed in slumber; fixed, dull and blue rings around them. Gastritis mucosa in a child.

Eyes dull, sunken, blue circles around them; face earthy pale.

Eyes dull and sunken, with dark rings around them θYellow fever.

Eyes dull, sunken and watery. θTyphus.

[6] **Hearing and Ears.** Complaints of inner ear predominate.

Unusual sensitiveness to sound.

Ringing in ears.

Roaring in ears, with each paroxysm of pain.

With attacks and during apyrexia, buzzing and singing in ears. θIntermittent.

Humming in ears > in open air, < in warm room.

Humming in ears, with hard hearing, as if ears were stopped.

Hardness of hearing, cannot hear human voice. (Compare *Phosph.*)

Hard hearing. θTyphus.

Stitching tearing from l. meatus auditorius outward, more in evening.

---

* "The œdema of the lids, especially the lower one, is not at all like the puffiness of *Apis* or *Rhus*, nor is it dependent upon infiltration of the connective tissue as it may be in *Rhus*, but is associated with the general cachectic *Arsenic* conditions."

Google

Her l. ear runs matter.
Profuse, ichorous, cadaverous smelling discharge from ear. θOtorrhœa.
Yellow discharge from r. ear, with dryness of nose; hearing not weakened.
Rash and heat about ears.
Malignant swelling of parotid glands in scarlet fever, when remissions occur in which patient is better, but soon spell of great prostration returns.
Parotitis, with intense headache or remitting pains; suppurating. θScarlatina.
Mumps, especially with metastasis to testicles.

7 **Smell and Nose.** Cannot bear smell or sight of food.
Stuffed cold, with loss of smell. θDropsy.
Offensive smell before nose.
Smells of pitch and sulphur alternately before nose.
Dryness of nasal cavity.
Nosebleed after a fit of passion.
Nosebleed, with coryza, after vomiting.
Distressing stoppage at bridge of nose.
Stoppage of nose, alternating with fluent coryza.
Nose seems to be stopped up and still it runs. θCoryza.
Cold in head, catarrh; from being chilled while overheated and perspiring.
Fluent coryza, with frequent sneezing; with hoarseness and sleeplessness; with swollen nose.
Watery discharge causes burning and smarting at nostrils, as if sore.
Discharge of burning mucus from r. nostril.
Thick, yellow, nasal discharge, with burning and throbbing.
Burning in nose. θCoryza.
Burning, excoriating, watery discharge, with a feeling of nose being stopped up. θCoryza.
Profuse, burning, corroding discharge, with great lassitude. θInfluenza.
Acrid running from nose, corroding upper lip, causing a scurf. θCoryza.
Scabs in nostrils, which, when torn away, leave nostrils raw and bloody until other scabs are formed; < in cold, > in moderate weather; cannot breathe through nostrils when asleep.
Mortification of mucous membrane of nasal cavities. θSequel of measles.
Nose pointed. θCholera Asiatica. θYellow fever.
Nose cold and pointed; nostrils red and open. θGastritis mucosa, in child.
From each corner of nose, a deep wrinkle down side of

Google

mouth towards chin. θChild with gastritis mucosa. θTyphus abdominalis.

❙Nostrils dry. θPyæmia.

Nose swollen, burns; coppery red, desire for liquors.

❙❙Knotty swelling of nose.

❙Cancer of nose.

❙Nostrils, corners of mouth and anus red and excoriated. θScrofula.

❙Ulcer on r. ala nasi, burning, stinging, painful, forming a thick, hard crust, which came off and left a bleeding mattery surface, soon followed by another crust. θCancer.

[8] **Upper Face.** ❙Face animated and congested. θParaplegia.

❙❙Drawing and stinging in face, here and there.

Changed expression of face.

❙Anxious expression of face. θEclampsia.

❙Anxiety and great suffering depicted on face. θTyphus.

❙Appearance in face of great dejection. θBright's disease.

❙Expression anxious, but not wild; distressed; of suffering; of mental agony; surly; wild; hippocratic; sunken.

❙Appearance: very pale; yellow, waxy; grey; earthy; livid; bluish; flushed; red and swollen; distorted features.

❙The face expresses deep inward suffering.

❙Eyes deep sunk in, blue circles around them. θScrofula, with a child æt. 1½.

❙Face distorted, pale, livid, old. θGastritis mucosa.

❙Stupid expression of countenance. θYellow fever.

❙Face distorted, sunken, anxious, hippocratic. θTyphus.

❙❙Peculiarly distorted face. θTyphus.

❙Face pale and distorted. θNeuralgia of trigeminus.

❙Face pale, cold, distorted. θCholera Asiatica.

❙Face pale, sallow, distorted, anxious. θColic in pregnancy.

❙She lies in bed after vomiting blood, face distorted, pale, cold extremities, threadlike pulse. θHæmatemesis.

❙Painfully distorted features, bluish lips. θPainful diarrhœa.

❙Face cadaverous and distorted. θColic. θIntussusception.

❙Hollow, pale, cadaverous face, with distorted features. θAcute rheumatism of joints.

❙Pale, sunken, earthy, ashen, sallow, bloated countenance. θIntermittent.

❙Deathly pale, collapsed face. θHæmatemesis.

❙❙Cachectic appearance. θIntermittent.

❙Face pale, earthy, sallow, sunken, bloated during apyrexia. θIntermittent.

Google

Hippocratic face. θHeart disease. θTyphus.
Sunken old face, blue rings around eyes. θScrofula.
Face sunken, expressing great anguish. θDysentery.
Old look in face. θChronic intestinal catarrh.
Young children have faces like old men. θAfter abuse of opium.
Face cold. θCystitis.
Face and body covered with cold, viscous sweat. θHeart disease.
Coldness, with pale, miserable, earthy face, blue lips. θIntermittent.
Pale, cold face, covered with cold sweat. θAsthma.
Cold sweat on forehead. θHæmatemesis.
Face covered with cold sweat. θEmphysema.
Face œdematous in afternoon. θBright's disease.
Bloated face. θMeasles.
Bloated face covered with cold sweat, after hives.
Œdematous swelling of face. θIntermittent.
Pale face. θPneumonia. θSummer complaint.
Pale, waxy face, intense thirst during and after chill, satisfied by a swallow of cold water, which was vomited as soon as swallowed. θIntermittent.
Cold, distressing yellowish face. θHæmatemesis.
Pale, yellowish face. θOvaritis.
Face yellowish and livid. θYellow fever.
Greenish, yellow color of face.
Grey, yellowish color of face. θUlcer in stomach.
Complexion greenish. θAscites.
Face cyanotic. θEmphysema.
Face pale, earthy. θGastralgia. θMeasles.
Complexion pale, earthy. θAscites.
Face greyish yellow, somewhat puffed.
Miserable appearance, puffed-up face, grey-yellowish. θRelapse of intermittent, after quinia.
Greyish-yellow face, weariness, weakness, relaxed muscles, pulse soft, small, frequent, no appetite, yellowish furred tongue, bitter mouth, frequent drinking, sometimes colic; stools diarrhœic. θIntermittent.
Unusual redness of face.
Flushed face. θPericarditis.
Cheeks burning hot, with circumscribed redness. θTyphus.
Cheeks red, circumscribed. θBright's disease.
Fine eruption on face. θOphthalmia scrofulosa.
On forehead a thick black crust, beneath it an ulcer with bluish dirty base, and upturned edges, exuding dirty, offensive, corroding ichor.
Wartlike ulcer on cheek.

Google

Itching of face so violent that he would like to scratch the parts sore; phagedenic ulcer on lip; swelling of upper lip, sometimes preceded by burning and stinging, itching, as from red-hot needles.

‖Cancerous ulcers on face; scabbing; burning pain.

‖Twitching of facial muscles.

‖Tearing in l. half of face.

‖Burning, stinging pains, as from red-hot needles.

‖Pimples and vesicles, with acrid discharge itching, burning; < at night, in cold air, > from warmth.

‖Black dots (acne punctata) in face or on forehead, skin dry and dirty looking.

‖Swelling of face, especially below eyelids.

‖Crusta lactea, dry and scaly, with diarrhœa of light-colored stools.

‖Nostrils and corners of mouth red and excoriated.

Lower Face. ‖Severe pains along r. inferior maxillary nerve.

‖Mouth drawn downward, bluish upper lip drawn up. θChild, gastritis mucosa.

2Eruption about mouth. θHerpes labialis.

‖Slight eruption around mouth; fever blisters (hydroa); corners of mouth filled with tough mucus. θIntermittent.

‖Swelling of glands of lower jaw, with pain, as from contusion.

‖Submaxillary glands swollen and sensitive. θNoma. θDiphtheria.

Complaints predominate on upper lip.

Contracting quivering or jerking on one side of upper lip, especially when falling asleep; mouth drawn down, upper lip drawn up.

‖Brown streak through vermilion border of lower lip as if burnt.

‖Bluish, blackish, or dry lips.

‖Lips cyanotic. θScrofula.

‖Lips covered with brown slime. θTyphus.

‖Lips brown or black. θYellow fever.

‖Lips dry. θPyæmia.

‖Lips parched and dry.

‖Constantly licking dry, cracked lips, with great burning heat of whole body.

‖Lips dry and cracked. θTyphus.

‖Constant licking of dry, cracked lips. θEclampsia.

‖Lips are pale, cracked, swollen and crusty during apyrexia. θIntermittent.

‖Sore lips and ulcers in mouth.

‖Eruptions on lips.

Google

▮▮Cancer of lips.
▮On l. under lip, a place, size of a bean, which is swollen, inflamed, dark red, with raised papillæ, bleeding from slightest cause, with burning, stinging and drawing pain. θCancer.
▮Painful nodules externally on upper lip; on inner side a discolored ulcer size of a bean, with raised edges.
▮Cancerous sore on l. upper lip, destruction of tissues as far up as zygomatic bone.

10 **Teeth and Gums.** ▮Painless throbbing in roots of teeth. Numb sensation of teeth.
▮Teeth seem longer, become loose, and are sensitive to pressure and to cold water.
▮Pain in some of teeth, as if loose and would fall out, pain not increased by chewing.
▮Bites tumbler when drinking.
▮Grinding of teeth while asleep.
▮Grinding of teeth. θTyphus.
▮Toothache. θDysmenorrhœa.
Teeth are loose and elongated.
Toothache so severe as to drive to madness; he becomes enraged.
▮Aching in first lower bicuspid, excited by cold weather, > by pressing teeth together; pain causes irritability of temper, and aversion to sound of others talking, which makes it <; nerve of tooth is exposed.
▮Jerking toothache, extending to temple, relieved or removed by sitting up in bed; >, striking his head.
▮▮Toothache relieved by heat of stove.
Teeth become rapidly carious, with unbearable pain.
▮When teeth are drawn, dark, blackish blood squirts out.
Jerking and burning tearing in gums.
▮Gums and teeth covered with brown or black slime. θTyphus.
▮▮Swollen, bleeding gums, painful to touch. θScurvy.
▮▮Nightly restlessness, diarrhœa, with undigested food and emaciation. θDentition.

11 **Taste and Tongue.** Taste: ▮▮woody, dry; ▮▮unpleasant; ▮sweetish in throat; ▮sour; ▮metallic; ▮▮bitter; ▮▮putrid early in morning.
▮Sweet taste in morning. θInterval of attacks of epilepsy.
▮Bitter taste in mouth. θBright's disease.
▮Foul taste, offensive breath. θIntermittent.
▮Food tastes too salty; ▮not salty enough; ▮insipid; sour; ▮beer tastes flat; ▮food leaves a bitter taste.
▮Water tastes badly; bitter. θRelapse of intermittent.
▮Loss of taste. θApyrexia of intermittent.
▮Dry tongue, and dislike to talk.

Google

Trembling tongue; difficult articulation, tongue heavy, as if paralyzed. θTyphus.
Trembling, dry, bright red tongue. θDropsy.
Speech unintelligible; lisping, stammering, as though tongue was too heavy. θTyphus.
Tongue stiff, like a piece of wood. θTyphus.
Loss of power of speech.
Tongue pale, mouth cool, much thirst. θAnasarca.
Tongue icy cold; dry mouth and tongue, frequently with violent thirst.
Tongue insensible as if burnt.
Tongue large, dry, yellowish. θRetinitis albuminurica.
Violent burning on tongue.
Swelling about root of tongue, externally and internally.
Tongue and lips parched and cracked, with black and sticky coating. θTyphus.
Dry tongue, lips and nostrils. θDiabetes.
Lips, tongue and nostrils dry, with vomiting. θPyæmia.
Tongue dry. θAscites.
Dry tongue, and morbidly red, with papillæ considerably raised at tip.
Tongue red, dry, and cracked. θTyphus.
Tongue like a piece of red leather, so thick that it is bent when protruded; great thirst.
Edge of tongue red and takes imprint of teeth.
Tongue as white as chalk; as if painted white.
Tongue white and dry; tongue furred, whitish; somewhat moist. θRelapse of intermittent.
Tongue white, or brown and bluish. θDysentery.
Tongue furred yellowish, taste bitter. θIntermittent.
Lead-colored tongue.
Furred tongue, bitter taste. θDropsy.
Tongue somewhat dry, furred thickly white. θBright's disease.
Coating: sides furred, with red streak down middle and redness of tip; thickly furred, edges red; whitish; yellowish-white; brown.
Tongue white and dry, or coated yellowish, during apyrexia. θIntermittent.
Tongue brown or black. θYellow fever.
Tongue dry, brown or black. θCholera Asiatica.
Tongue black, smooth as if varnished; dry, hard, blistered, blackish brown. θTyphus.
Bluish ulcers on tongue.
Gangrene of tongue; spots on tongue, burning like fire.

[12] **Inner Mouth.** Bad odor from mouth. θScurvy. θTyphus.
Burning in mouth, pharynx and œsophagus.
Dryness of mouth, with violent thirst.

Google

Desire for cold water, but fears to take it. θColicodynia.
Dryness of mouth and tongue. θWith headache.
Much saliva; must spit often.
Saliva abundant, tough, fetid, bloody.
Saliva decreased.
Aphthæ in mouth; they become livid or bluish; with profound weakness.
Thrush in mouth and fauces. θMeasles. θTuberculosis.
Painful blisters in mouth and on tongue.
Malignant ulceration of mouth.
Thrush in adults with burning, prostration, and very great restlessness. θDiphtheria.
The cavity of his mouth was as dry as the outer skin, and to such a degree that, in spite of all his efforts, he could not moisten the least bit of bread. θDiabetes mellitus.
Ulcer on inner cheek, irregular, jagged edges, and spongy base.
Ulcers extending from throat to roof of mouth; tongue white; nose watering; cervical glands swollen. θDiphtheria.
Stomacace.
Gangrenous sore mouth with children, mucous membrane discolored, some places blue, others pale, covered with tough mucus which lies in brown crusts on lips, confluent, discolored, very painful ulcers are formed. θStomacace.

13 **Throat.** Places the size of a penny, nearly oblong, in fauces, red as if mucous membrane had become denuded; vesicles size of a pin's head, filled with clear fluid, which disappeared next day, leaving dirty red spots; next to affected places new eruption appears. θAngina herpetica.
Dryness, soreness, scraping and burning in fauces and throat.
Tonsils inflamed, swollen and burning like fire. θAngina.
Sensation as if a hair had lodged in throat. θDiphtheria.
Sensation as if a ball of mucus had lodged in throat, with taste of blood.
Accumulation of greyish or greenish mucus.
Nausea in throat.
Stinging in œsophagus, as from a splinter, soon violent tearing (schründen) merging into heat and burning. θAngina herpetica.
Throat very sore and painful.
Œsophagitis.
Fauces and tongue very much swollen.
Pain in swallowing, great thirst, anxiety and restlessness. θAngina herpetica.

Google

Sore throat, when swallowing, as from an internal swelling; burning pain.

Sensation of constriction of throat.

Burning when swallowing; food goes down to region of larynx, when it is ejected. θŒsophagitis.

Everything swallowed seems to lodge in œsophagus.

Swallowing very difficult and painful.

Exacerbation in evening, violent constriction of œsophagus. θAngina herpetica.

Spasmodic constriction of œsophagus, as if a ball came up in throat. θHæmatemesis.

Burning pain in throat, difficult swallowing. θBright's disease.

Paralytic condition of pharynx and œsophagus; drinks roll audibly into stomach. θTyphus.

Malignant sore throat. θScarlatina.

Diphtheritic membrane is dry looking and wrinkled; adynamic fever, restlessness, prostration, burning thirst; fetid breath; even gangrene; somnolence; occasionally starts out of bed. θDiphtheria.

Gangrenous sore throat.

Appetite, Thirst. Desires, Aversions. Feeling of hunger and emptiness, she has to eat a few pieces of bread while feeling cold. θIntermittent.

Appetite increased, but most frequently loss of appetite.

Very little appetite. θIntermittent.

Thirst, but afraid to drink. θColic.

Irresistible longing for water frequently disturbing sleep at night, undiminished next morning.

No thirst or appetite; or, loss of appetite, with increased thirst.

No thirst during chilliness, during heat frequent, but does not drink much. θIntermittent.

Burning thirst, without especial desire to drink.

Thirst without inclination to drink. θColic in pregnancy.

Dryness and thirst. θStricture of œsophagus.

Great thirst. θChronic intestinal catarrh. θHæmatemesis. θHepatitis. θIntestinal catarrh. θSmallpox.

Thirst and dryness of mouth with peculiar thick white saliva.

He complains of thirst in a hoarse voice. θHeart disease.

Thirst, unquenchable by drinking.

Excessive thirst for cold water; small quantities even are immediately thrown up. θCholera Asiatica.

The most thirst during sweat. θIntermittent.

Unusual thirst; heat in mouth rose to such a degree that he had to drink water the whole evening uninterruptedly, without being able in least to allay thirst.

Google

Tortured by a terrible thirst, with a high degree of emaciation and loss of strength. θDiabetes mellitus.

Frequent unquenchable thirst. θCholera. θMarasmus. θTyphus. θDiabetes, etc.

Excessive thirst, drinking does not refresh.

Great thirst, but water molests stomach. θDropsy, etc.

Drinks often, but little at a time. θHeadache. θScurvy. θRetinitis albuminurica. θDiphtheria. θGastritis. θPeritonitis. θAscites. θDysentery. θOvaritis. θOvarian dropsy. θMetritis. θPneumonia. θHydrothorax. θCoxalgia. θTyphus. θEclampsia. θMeasles. θCarbuncle.

Wants very cold water, which she drinks in small quantities, all other drinks she swallows in masses. θSummer complaint.

Appetite for bread, particularly rye bread.

Thirst for acid drinks; desire for sour things. θIntermittent.

Desire for something refreshing, strengthening, stimulating, after attack, as wine, coffee, etc. θIntermittent.

Desire: for warm food; for beer; for brandy; for coffee; milk; lard; fruits and vegetables.

Aversion: to sweets; farinaceous food; gruel; meat; fatty things; butter; meats; food, loathes even thought of it.

[15] **Eating and Drinking.** Better on an empty stomach; < after breakfast.

Eating without appetite, causes an unpleasant sensation of discomfort. θDuring apyrexia of intermittent.

Appetite variable. θRetinitis albuminurica.

Satisfying appetite, causes heat and nausea. θDuring apyrexia of intermittent.

Worse from eating. θGastralgia.

After eating, bitter taste. θApyrexia of intermittent.

Sense of fulness immediately after a reasonable quantity of food.

Pain in stomach or abdomen while eating or immediately after; can take no more food at time.

After every meal, pressing in stomach, gagging and vomiting. θScirrhous uteri.

After eating heavy food, burning in stomach and bowels. θIntervals of epileptic attacks.

Nausea, gagging, vomiting, mostly two hours after meal, even lightest kind of food.

After taking nourishment, rumbling in abdomen, soon followed by painless stools, smelling like carrion. θScrofula.

After eating, a stool.

Bitter taste in mouth after eating and drinking.

Google

❙Worse after eating. θColic. θUlcer in stomach.
Better from warm diet.
❙Coldness of stomach from eating fruit.
❙❙Eating but little increases chill. θIntermittent.
❙Violent rigor, after eating something when cold. θIntermittent.
❙Hasty drinking.
❙Better from swallowing some hot water. θDiphtheria. θCholera Asiatica.
❙Violent retching and vomiting of small quantities of mucus. θGastromalacia.
❙❙Every drink, be it ever so small, is followed by an evacuation.
❙After drinking, if done without thirst, cough.
❙❙Chilliness and shivering, after drinking. (See *Veratr.*)
❙❙Desire for cold water, but afraid to drink, because it makes the pain <. θColicodynia.
❙❙Cannot drink cold water, though he desires it; it causes pain, or lies in stomach as a cold mass or foreign substance for a long time, and is very distressing.
Worse from cold drink; from cold diet in general; > from warm.
❙❙After ice-water or ice-cream. θGastralgia. θGastritis.
❙After chilling stomach by taking cold substances. θIntestinal catarrh.
❙Gastro-intestinal symptoms <: after ice; ice-cream; ice-water; vinegar; sour beer; tobacco (chewing); alcoholic drinks; bad sausages; cheese; fruits.
Pain in stomach > by sweet milk.
Worse from milk.
❙❙Fat food disagrees, and so does wine; the smallest quantity increases pain in stomach.
❙After alcoholic drinks. θGastritis.
❙❙Bad effects from inordinate use of spirituous liquors. θDelirium tremens. θVomiting. θDiarrhœa. θHemorrhages.
Better from drinking coffee.
❙After rotten cheese, or mouldy English cheese. θColic.
❙After spoiled sausages. θColic.

[16] **Hiccough, Belching, Nausea and Vomiting.** ❙❙Hiccough at hour when fever ought to have come.
❙Abortive eructations.
❙Waterbrash.
❙Belching. θIntermittent.
❙Belching of fetid gases.
❙Constant nausea. θHæmatemesis.
❙Frequent nausea, with sweetish taste in mouth.
❙Nausea and complete loss of appetite.

Google

Excessive nausea and vomiting on rising in bed. θGastritis.
Nausea, with heat and ebullitions. θHæmatemesis.
Nausea, must lie down.
Long-lasting nausea, with faintness, tremor; heat all over and shuddering.
Nausea and vomiting. θDysentery. θIn pregnancy, etc.
Nausea and sometimes vomiting, at 11 A.M. and 3 P.M.
Nausea, retching and vomiting of bile, with headache.
Fruitless retching.
Retching. θHæmatemesis.
Vomiting and retching. θTyphus.
Vomiting. θColic θMeasles. θPeritonitis.
Improved quite as often as aggravated by vomiting; likewise after passing urine.
Vomiting immediately after eating. θGastralgia.
Vomiting immediately after eating or drinking.
Sometimes < after drinking. θYellow fever.
Vomiting after every swallow of water. θDropsy after scarlatina.
Vomiting of all he takes. θCancer of stomach.
Vomit: bitter, green yellow liquid; ingesta; brown, turbid matter; streaked with blood; of blood; black, serous liquid.
Violent vomiting of food and gastric fluids.
Sour acrid vomiting. θGastralgia.
Vomiting of clear water at all times of day. θColic.
Vomiting of mucus and bile. θColic.
Vomiting of blood, with fainting before and after. θHæmatemesis.
Vomiting of brownish matter, with violent colic.
Vomits a tarlike substance, then clots of blood. θHæmatemesis.
Black vomit. θYellow fever. θScirrhus or ulcus ventriculi. θHepatitis.
Cannot retain food, vomiting of blackish masses, with sudden prostration.
Vomiting every night of what has been eaten during day.
Frequent vomiting, with apprehension of death.
After vomiting, nosebleed.
Violent burning in stomach and bowels; < after throwing up. θCholera Asiatica.
Vomiting of slime or bile, with violent gagging; burning in throat when swallowing, like fire. θColic.
Vomit and stool at same time.
Slimy, watery vomiting, with diarrhœa; child. θGastritis mucosa.

[17] **Scrobiculum and Stomach.** Anxious feeling in præcordia. Better from loosening clothes.

Google

Pain in epigastrium and stomach, principally burning, violent, like red-hot coals, also violent and pressing hard; spasmodic contraction and constriction; stitches or fine stinging in stomach and epigastrium. θGastralgia. θGastritis.

Epigastrium is sensitive to slightest touch. θGastralgia. θGastritis.

Epigastric and umbilical regions sensitive to touch.

Epigastrium distended and hard.

Great anxiety about epigastric region.

Crawling sensation in stomach. θHæmatemesis.

Cramp in stomach at 2A.M.

Weight in stomach as of a stone.

Violent contraction of stomach.

Bloating of pit of stomach. θChill of intermittent.

Pressure in stomach.

Pressure as of a weight and trembling in pit of stomach. θDropsy.

Great pressure in pit of stomach. θYellow fever.

Fulness in pit of stomach with heat. θIntermittent.

Pain in pit of stomach arresting breathing.

Fulness in pit of stomach. θRelapse of intermittent.

Pain in pit of stomach. θChill of intermittent.

Stomach tender to pressure.

Pit of stomach sensitive to slightest touch. θGastralgia.

In evening while sitting, drawing pain from pit of stomach around lower border of l. ribs, as if something was torn loose.

Each time he yawns presses his hand on pit of stomach, because it then feels as if being torn out. θParaplegia.

Terrible sensation of sickness, weakness and anxiety in region of stomach. θHæmatemesis.

Gnawing in pit of stomach.

Violent tearing, boring pain and cramp, in stomach and intestines.

Lancinating in stomach, sometimes into chest, or only at night.

Heartburn; severe aching in stomach and epigastrium extending to middle of chest; burning, as if stomach and œsophagus were being made raw by an acrid corroding substance; several attacks a day, with indescribable nausea and weakness, to fainting. θGastric complaints.

Constant painful burning in region of stomach. θIntermittent.

Burning in stomach like glowing coals. θGastralgia.

Burning pain in stomach. θCancer of stomach. θUlcers in stomach. θHæmatemesis. θIntermittent.

Google

❙Burning in stomach; sensitive to pressure. θTyphus.
❙Burning in stomach with constriction in abdomen. θMelancholy.
❙❙Burning in region of pylorus. θScirrhus.
❙❙Intense heat and burning in stomach and pit of stomach. A cold and heavy feeling in stomach, chilliness and a hot fever at same time.
❙❙Subacute gastritis; least food distresses or is at once vomited.
❙❙Acute gastritis, painful vomiting of grass green solids or fluids, or after drinking,
❙❙Hæmatemesis; often with black stools; stitches in spleen, cold sweat on forehead; burning in stomach, thready pulse, moaning, etc.
❙❙Induration in stomach. θScirrhus.

[18] **Hypochondria.** ❙Pain begins with stitches in r. side under ribs, or spreads from l. hypochondriac region over whole abdomen, up into œsophagus and to back and to shoulder blade. θGastralgia. θGastritis.
❙Sensitiveness of distended epigastrium and lower abdomen, which is tense, drawn in, painful, and twitches when pressed over cæcal region; meteorism. θTyphus.
❙Tension in r. hypochondriac region, with pressing pain in liver, which is perceptibly enlarged. θHepatitis.
❙Pressure and tension in r. hypochondrium. θRelapse of intermittent.
❙Burning or stitching pain in epigastrium and region of liver. θYellow fever.
❙❙Painful bloatedness in r. hypochondrium, with burning pain. θHepatitis.
❙Pain in region of liver, increased on pressure.
❙Stitches in r. hypochondrium, extending to region of stomach; ending as violent pressure over whole abdomen.
❙Painful bloatedness in r. hypochondrium with violent burning pain. θHepatitis.
❙❙Induration of liver.
❙Liver could be felt, and hurts when touched. θRelapse of intermittent.
❙Gall-stones with choleralike symptoms. (*Cinchona.*)
❙Jaundice: after intermittent fevers, especially abuse of quinine; after mercury.
❙Tension and pressure in l. hypochondrium. θHeat of intermittent.
❙Hypochondriac region swollen; < left. θApyrexia of intermittent.
❙Both hypochondria sore to touch. θBright's disease.
❙Tensive, pressive pain in spleen.

Google

Drawing, stitching pain under l. hypochondrium; burning in stomach followed by vomiting of blood.
Stitches in spleen precede vomiting of blood, which is partly coagulated, partly fluid, and dark. θHæmatemesis.
Induration and enlargement of spleen.
Liver and spleen swollen. θDropsy. θIntermittent.
Soreness to touch in region of spleen. θQuotidian.
Tension and pressing pains in spleen with heat. θIntermittent.
Dull pain in l. hypochondrium. θIntermittent.
The spleen expanded, tumefied. θIntermittent.

[19] **Abdomen.** Coldness and chilliness in abdomen.
Tension in abdomen.
Crampy pains in bowels. θYellow fever.
Writhing or twisting sensation in abdomen.
Pains about navel, aggravated by lying on back.
Violent bellyache day and night with but short remissions; constipation. θColic.
Cutting pains in abdomen. θBefore intermittent.
Terrible cutting bellyache with frequent thin evacuations, fainting and cold sweat. θDiarrhœa.
Violent pains in abdomen, with great anguish, has no rest anywhere, rolls about on floor and despairs of life.
Periodical colic.
After a chill for half an hour violent squeezing and constricting pain in umbilical region, twists and squirms in bed. θColic.
Wind colic, > when lying down, and growing warm in bed.
Verminous colic; upper lip is drawn up. θHorses.
Tearing in abdomen with icy coldness of hands and feet, and cold sweat on face.
Violent tearing and cutting in upper part of abdomen, lower part distended, soft, but painful to touch. θDiarrhœa.
Deep heavy pain in abdomen, felt as if his intestines were tied up, with burning. θColicodynia.
Burning in intestines.
Burning pain in abdomen. θChronic intestinal catarrh. θPeritonitis.
Burning lancinations in abdomen, with great restlessness, tossing and turning. θPeritonitis.
Violent burning, pinching, constricting pain in stomach and both sides of abdomen drawing to navel, with oppression of chest, in repeated attacks, every half hour. θColic in pregnancy.
Violent burning in abdomen and scrobiculum. θDysentery.

Google

❙Burning in bowels; sensitive to pressure. θTyphus.

❙Abdomen much distended, sore aching pain on touching it. θAlbuminuria.
❙Abdomen sensitive and tympanitic. θDysentery.
❙Abdomen distended, particularly l. hypochondrium, which is hard and painful to touch. θIntermittent.
❙Abdomen hard and distended; palpitation reveals indurated mesenteric glands. θScrofula.
❙Sensation as if abdomen would burst, before stool.
❙Meteorism of abdomen without pain, everywhere tympanitic sound. θGastric complaints. θGastromalacia.
❙Meteoristic distension of abdomen. θTyphus.
❙❙Ascites: from heart, hepatic or spleen diseases, also post-scarlatinal; from Morbus Brightii; faint from least motion; suffocative spells at night; anguish, thirst, etc.
Pain in right side of abdomen, near lumbar region, spreading through abdomen to r. groin and same side of scrotum.
❙❙Ulcer above navel.
❙❙Painful swelling of inguinal glands.
❙Groins: contractive pain in left; as if sprained in right, when stooping; digging, burning like a boil; stitches.
❙Chafed about groins, extending to genitals.
Stitches from abdomen down into vagina.

[20] **Stool and Rectum.** ❙Painful spasmodic protrusion of rectum.
Rectum remains protruded after hemorrhages from rectum.
Rough pricking sensation in rectum, as if she was passing sand.
Evacuation of a lump resembling tallow, with tendinous substances.
Fetid flatus.
❙Constipation with pain in bowels.
❙❙Constipation of bowels. θColic. θTyphus.
❙Diarrhœa alternating with scybalous stools of a whitish-clay color. θBright's disease.
❙❙Bilious dysentery with great exhaustion after every

Google

exertion; great distress and restlessness, worse after midnight.

Black stools. θHæmatemesis. θHepatitis.

Stool soft, insufficient. θRelapse of intermittent.

Fluid feces mixed with blood, chocolate color, more about midnight. θDysentery.

Evacuation of dark blood preceded by violent screaming. θDysentery.

Watery, stinking stools, mixed with bloody mucus or undigested food.

Stools containing more or less pus, sometimes fluid fecal matter, nearly always fluid or coagulated blood; penetrating, rotten, sweetish smell.

Offensive diarrhœa. θScurvy.

Diarrhœa copious, smell of rotten eggs. θChild's gastritis mucosa.

Brownish, slimy, cadaverous-smelling stools. θGastromalacia.

Discharge from bowels of a fetid foul smell. θIntestinal catarrh. θDysentery.

Evacuations have a rotten smell, are involuntary with great prostration. θDysentery.

Stools frequent watery, blackish-brown; ichorous; clay-like, tinged with blood; offensive; puslike mucus; penetrating odor. θTyphus.

Thin, rotten-smelling or bloody stools and involuntary passages. θTyphus.

Small, diarrhœic, offensive stools. θIntermittent.

Diarrhœa. θColic. θTyphus. θMeasles.

Diarrhœa painful or painless. θIntestinal catarrh.

Diarrhœa painless, involuntary θYellow fever. θTyphus.

Diarrhœa very prostrating, often involuntary. θInfluenza.

Diarrhoea < in middle of night. θCoxalgia.

Diarrhœa < after midnight and after eating, with great prostration.

Stools slimy, papescent, brownish. < in night and towards morning. θDiarrhœa.

Diarrhœa with cutting pain, violent thirst, coldness of body and cold sweat on face, attacks are < from motion.

Violent burning in umbilical region, before and during loose stools, which consist of mucus; great thirst for cold water, profuse sweat, anxiety, tossing about. θFall diarrhœa.

Emaciation, old face, profuse greenish muddy evacuations, with swollen feet. θDiarrhœa of children.

Stools brown and watery; yellow skin; wasted to a

Google

skeleton; abdomen tympanitic, old face. θDiarrhœa during dentition.

▮Slimy undigested passages. θScrofula.

▮Diarrhœa: ▮▮slimy, green mucus; of pieces of mucus, with tenesmus, and cutting pain in anus; stools small with tenesmus; first dark green feces, afterwards dark green mucus; ▮black mucus, with persistent vomiting; ▮black, acrid and putrid; ▮yellow, with tenesmus and burning pain; ▮like dirty water; ▮of blood and water; with emaciation and loss of strength; almost constant, with much intestinal rumbling; < after midnight, also in morning after rising; after eating; violent, with frequent discharges; with straining; with colic; with vomiting, or with great weakness; more frequent than constipation; most frequently painless.

▮▮Involuntary stools and urine.

▮▮Diarrhœa after chilling stomach by taking cold substances, particularly ice-cream.

▮▮Cholera infantum: simultaneous vomiting and purging, great exhaustion; vomiting and purging aggravated by food and water.

▮▮Purging, with extreme coldness of extremities.

▮▮Burning evacuations from bowels with violent colic.

Sensation before stool as if the abdomen would burst.

Twisting in the abdomen before every stool.

Diarrhœa following burns. Comp. 45.

▮Before stool, torturing sensation as though the abdomen was being constricted. θDysentery.

▮Before stool: chilliness, anxiety, fainting, cutting in abdomen; vomiting; thirst; coldness in back before every evacuation.

▮During stool: chilliness, nausea, vomiting, backache, straining and burning in anus and rectum.

▮Diarrhœa with tenesmus. θYellow fever.

▮Tenesmus with burning in anus and rectum. θDysentery.

▮Stool irregular, mostly diarrhœic, with burning in anus. θIntervals of epileptic attacks.

▮A feeling of contraction in rectum during stool. θDysentery.

▮Tenesmus and burning of anus and rectum during stool; also burning after, with trembling.

▮Discharges burning. θIntestinal catarrh.

▮Burning in anus with small evacuations of mucus and continual eructation. θDiarrhœa.

▮After stool: cessation of acute abdominal pains; distension, straining about navel; burning in rectum; oppression, eructations, weakness with trembling and faintness, with desire to lie down; palpitation, perspiration.

Google

Unbearable tenesmus with burning pains. θHemorrhoids of bladder.
Thin, lumpy stools, of all colors, excoriating anus. θChronic intestinal catarrh.
Fissures of anus. θHemorrhoids.
Burning and stinging tumors in anus, size of a walnut, preventing sitting down.
Anus red and sore; evacuations excoriate.
Burning in anus like fire.
Hemorrhoids: with stitching pain when walking or sitting, not when at stool; with burning pain, relieved by heat; with bleeding and protrusion; painful, swollen, with tenesmus, burning, particularly at night, preventing sleep.
Hemorrhages from bowels dark, offensive. θTyphus abdominalis.

[21] **Urinary Organs.** Stitches in renal region when breathing or sneezing. θMorbus Brightii.
Abscesses in kidneys.
Scarlatina begins with uræmic symptoms.
Uræmia, anguish, with thoughts of murder, especially in drunkards.
Uræmia, with vomiting, colic, spells of suffocation. θEmphysema. θHeart disease.
Acute cystitis, with high fever and restlessness; face and limbs become cold; violent burning in bladder; great thirst.
Chronic cystitis, with retained urine; what passes is turbid and purulent.
Paralysis of bladder.
Symptoms of paralysis of bladder. θHæmaturia.
Bladder greatly distended and paralyzed. θChronic cystitis.
Atony of bladder in old persons.
Tearing deep in urethra.
Atony of bladder, no desire to urinate, and no power to do so; seems to have lost all control over power to emit; especially after parturition.
Suppression of urine. θCholera Asiatica.
Difficult urination.
Retention of urine. θTyphus. θAfter parturition.
Inability to void urine. θChronic cystitis.
Great desire, but passes no urine.
Involuntary micturition. θTyphus.
Urine scanty, passed with difficulty, burning during discharge. θStrangury.
Wetting bed.
Involuntary dribbling of urine, day and night.

Google

Urine scanty, with diarrhœa, or hot stage of fever, or frequent and copious during chill.
‖Scanty secretion of urine. θHæmaturia.
‖Urine scanty, turbid. θApyrexia of intermittent.
‖Urine thick and scanty. θAlbuminuria.
‖Scanty urine, with brickdust deposit. θHydrothorax acutus.
‖‖Urination after sweat, brown, soon turbid, but without sediment. θIntermittent.
‖Urine very scanty; very much sediment. θAnasarca.
‖Fetid urine. θDysentery.
‖Urine like thick beer; rotten smell. θTyphus.
‖Urine dark, like dung water; nitric acid precipitates albumen. θDropsy after scarlatina.
‖Urine turbid, mixed with pus and blood. θCystitis.
‖Bloody urine. θHæmaturia. θHemorrhoids of bladder.
‖Urine cloudy, high colored, scanty, pale, albuminous. θPneumonia.
‖‖Albumen in urine. θBright's disease. θScarlet fever.
‖‖Well-marked albuminuria; epithelium, fatty degeneration or atrophy of Bellinian tubes, tufts and capsule of Müller. θMorbus Brightii.
‖‖Sugar in urine.
‖Urine profuse, pale and clear as water. θIntermittent. θRheumatism.
‖‖Urination frequent during cold stage. θIntermittent.
‖Frequent urging, with profuse discharge.
‖Urine: ‖dark brown; dark yellow; ‖turbid; ‖sediment of red sand; ‖‖mixed with pus and blood; greenish.
‖Burning pain in urinary organs. θHæmaturia.
‖Burning pain, especially at commencement of urinating. θCystitis.
During urination, burning in urethra; constriction in l. groin.
After urination, feeling of weakness in upper part of abdomen.

♂ **Male Sexual Organs.** Sexual desire increased.
Involuntary seminal emissions.
Sexual power lost.
Emission during diarrhœic stool.
Prickling in side of glans.
‖Burning in glans penis during micturition. θIntervals of attacks of epilepsy.
‖Glans blue red, swollen and cracked.
Excessively painful inflammation and swelling of genitals, increasing almost to gangrene.
Erysipelatous inflammation of scrotum.
‖‖Scrotum œdematous.

Digitized by Google

‖Rawness of scrotum, with a bluish look. θLittle children.
‖Hydrocele (scrofulous infants).
‖Inflammation and swelling of genital organs, threatening gangrene.
‖Serpiginous ulcers on genitals.
‖Chancres (after mercury), with too florid granulations, margins of ulcers hard and bleeding at least touch, with a thin, offensive discharge.
‖‖Phagedenic chancres, livid hue, with intense burning; even sloughing.
‖Constitutional syphilis, with indescribable feeling of weakness, or with dropsy and malignant ulcerations.
‖Bubo, when assuming a gangrenous aspect.
‖‖Cramplike cutting colic, darting through abdominal ring and perineum; testes swollen; epididymitis.
Inguinal glands painful, swollen and indurated.
‖Intertrigo of children, particularly in groins and extending to scrotum.

[23] **Female Sexual Organs.** Increased sexual desire, with involuntary discharge of mucus.
‖‖Burning or tensive pain in ovary.
‖‖Pressive stitching pains in region of r. ovary.
‖‖Drawing, stitching pain from region of ovary into thigh, which feels numb and lame; < from motion, bending, or sitting bent.
‖Burning in region of right ovary, circumscribed swelling, feverishness, sallow complexion, emaciation; instead of menses, a thin, whitish, offensive discharge. θOvaritis caused by a kick.
‖Burning pain in region of ovaries. θOvarian dropsy.
Intense burning or tensive pain in ovary, with great restlessness, some relief being afforded by constantly moving feet.
Tumors painful (burning, lancinating), or painless.
‖Ovarian tumor, with pain in leg, cannot keep foot still.
‖Ovarian tumor on right side, filling entire abdominal cavity, could not stoop to dress her feet.
‖‖Burning throbbing, lancinating pain in uterine region. θScirrhus.
θBurning pain in uterine region. θMetritis. θUterine cancers.
‖Violent burning pain in genitals, with hard, nodulous swelling of uterus, os uteri swollen like a pad, hard, extremely sensitive; shooting stinging pains to upper part of abdomen; burning thirst and dryness of mouth and throat; < from every motion. θScirrhus uteri.
‖Polypus on cervix uteri.

Google

Catamenia too profuse and of long duration.
‖‖Catamenia too early and too profuse.
‖Menses too often and venous. θRetinitis albuminurica.
Exhausting menorrhagia.
‖‖Menorrhagia in feeble females, cachectic, affected with rheumatism, disorganization of uterus or ovaries, in eruptive fevers, and, when aphthæ break out, indicating a low state of the system.
‖‖Hemorrhage, with lancinating burning pains.
‖Sudden profuse discharge of dark blood.
‖Painful menstruation; external warmth relieves.
‖During menstruation, stitches in rectum, extending into anus and vulva; stinging cutting pain extending from epigastrium into hypogastrium, sides of abdomen and back; toothache.
After menstruation: discharge of bloody slime, or stinking watery discharge from vagina and anus.
‖Suppressed menstruation. θHæmoptysis. θIntermittent.
‖Absence of menses for a long time, in women of pale, waxlike complexion, who are greatly debilitated; least exertion causes great fatigue; restless sleep, with fatiguing dreams.
‖‖Thin, whitish, offensive discharge instead of menses. θOvaritis.
‖‖Leucorrhœa acrid, corroding, thick and yellow, dropping out while standing and emitting flatus.
‖Acrid, corroding, burning discharges; watery; light or dark-colored, often very offensive. θUterine cancer.
‖Stitches from abdomen down into vagina.
‖‖Dryness of vagina. θScirrhus uteri.
‖Lancinations from rectum to anus and pudenda. θDysmenorrhœa.
‖‖Inflammation and swelling of genitals.
Itching of genital organs.

[24] **Pregnancy. Parturition. Lactation.** ‖Morning sickness during pregnancy, with spells of faintness; retching, with empty stomach, preceded by burning in stomach and œsophagus.
‖Violent motion of child and colic. θPregnancy.
‖‖Metritis in childbed, with signs of dissolution of blood.
‖Ascites in consequence of puerperal peritonitis.
‖Promotes expulsion of moles.
‖After parturition, atony of bladder.
‖Burning pains in mammæ; relief from motion.
‖‖Cancer of breast, burning pain; external warmth relieves.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Voice hoarse. θCholera Asiatica. θTyphus. θHeart disease.

Google

Voice weak, scarcely audible. θColic in pregnancy.
Aphonia.
Voice low, trembling, rough, hoarse, coarse, crowing or squeaking. θTyphus.
Voice: trembling; weak; unequal, now strong and again weak; hoarse; rough; hollow; loss of voice.
Spasm of glottis.
Larynx constricted during cough.
Feeling of dryness, with burning in larynx and trachea. θLaryngeal phthisis.
Sensation as if one were inhaling dust.
Bronchitis, with difficult secretion of mucus.
Larynx sensitive to pressure; hoarse by day; suffocative spells at night. θCroup.
Influenza in children; sudden onset, much prostration, child looks as though it had been sick a week; violent sneezing, with blood-tinged discharge.
Sudden catarrh, threatening suffocation at night.
Croupous inflammation of larynx, which is sensitive to pressure; hoarseness by day, dyspnœa and suffocative attacks at night. θCroup.
Croup, with coryza; stoppage, cannot breathe through nose; worse at night, with restlessness.
Simulating membranous croup; caused by checked or non-appearing eruption, especially hives or urticaria.
Gangrenous croup.

Respiration. Frequent inclination to sigh with a childish crying mood.
Putrid exhalations.
Noiseless, hardly audible breathing. θHeart disease.
Whistling expiration.
Wheezing respiration, with cough and frothy expectoration.
Rattling breathing. θTyphus.
Deep, quick inspiration, difficult, interrupted expiration.
Breathing quick, short, loud rattling. θBright's disease.
Breathing short and anxious. θTyphus.
Oppression and short breathing. θDuring heat after intermittent.
Panting breathing.
Groans and moans in breathing. θHæmatemesis.
The breathing becomes more and more weak, until finally she is only able to breathe and talk very low by inclining chest forward.
Sensation as if inhaling dust.
Talking aggravates symptoms. θIntermittent.
Laughing causes difficulty in breathing.

Google

Every little excitement gives her a hysterical asthma.
❙Want of breath; he complains in a hoarse voice. θHeart disease.
❙❙Loss of breath immediately on lying down, in evening, with whistling and constriction in trachea.
❙After going to bed, tightness on chest, whistling expiration. θAsthma.
❙Turning in bed, takes away his breath. θHydrothorax.
❙Breath oppressed and pulse irregular. θRetinitis albuminurica.
❙When walking in open air, suffocative sensation forcing him to cough.
Arrest of breathing with cough.
❙Difficult inhalation with constant anxiousness and short crowing cough. θAnasarca.
❙Breathing anxious, hurried, labored, snoring, rattling. θTyphus. θYellow fever.
❙Respiration oppressed, anxious, short.
Burning or feeling as if excoriated and raw in chest.
❙Constriction of chest, with anguish; worse when moving.
❙❙Air passages seem constricted, cannot breathe fully.
In cold air, want of breath.
Windy weather increases dyspnœa even when well-protected and while in a warm room.
❙❙Oppression increased: by stormy weather and heavy air; walking quickly; ascending; warm and tight clothing; especially from changes of warmth to cold.
❙After suppressed coryza: panting breathing, gasping for air; sensation as if there was dust in air, worse about midnight and from motion, with groaning and restless tossing. θAsthma.
Gasping for breath, feels as if she would smother.
❙On lying down at night, feels an oppression of chest, breathing became short, is obliged to sit up in bed; < after midnight; drinking coffee or sugar with water relieves somewhat; symptoms worse on going up-stairs, gets out of breath. θAsthma.
❙❙Breathing asthmatic; must incline chest forward; must spring out of bed at night, especially about 12 P.M.
❙Cramp in chest (asthma) as soon as he lies down to sleep, as if too narrow, expiration whistling; throat and chest as if bound together, so that he had to sit up, bending forward, from which he got some relief; gradually breathing became more and more difficult and expiration difficult and fine in tone, like highest falsetto; feels anxious to despair and anxious sweat all over; this degree of violence lasted three or four hours and only abated after midnight.

Google

❙Patient unable to lie down; on attempting to do so, such difficulty of breathing that she nearly died of strangulation. θDropsy.

Asthma when fatigued, as from anguish.

❙Violent attack of asthma in consequence of a cold in mid-Summer.

❙Asthma from suppressed itch.

❙❙In asthma of old people, who have occasional attacks of morning diarrhœa, rheumatism, scanty secretion of urine, and too violent impulse of heart sound.

❙❙Asthma about 2 A.M.

Great dyspnœa and pain in lower chest, on full inspiration.

Dyspnœa when vexed.

❙❙Dyspnœa increased after coughing, with sensation of contraction of chest or stomach. θAsthma.

❙Considerable dyspnœa. θBronchitis. θTuberculosis. θHydrothorax. θScarlatina. θPost-scarlatinal dropsy. θParaplegia.

❙Dyspnœa < from motion, cannot lie on back or sides, has to sit bent forward, lower extremities are cold and œdematous. θDropsy after scarlatina.

❙❙Great dyspnœa; face cyanotic and covered with cold sweat; great anxiety. θEmphysema.

Arrest of breathing and suffocative apprehension, sometimes with weakness and excessive debility, or at night.

❙Suffocative spells in evening, after lying down. θAsthma.

❙When lying down at night, however carefully, sense of suffocation. θHydrothorax.

❙Suffocating spells, most at night. θAscites.

Suffocating oppression at night in bed; with weakness.

❙Has to sit up; when lying on back, suffocative attacks. θAsthma.

When coughing or immediately after, feels contracted and as if suffocating, labors with great difficulty to re-establish free respiration.

❙Paroxysms of suffocation. θWhooping cough.

Suffocative attacks, with palpitation, in night.

27 **Cough.** ❙Oppression and spasms in chest, with hacking cough. θChill in intermittent.

❙Deep, dry, unceasing cough.

❙Severe, spasmodic cough. θDropsy after scarlatina.

❙Dry cough. θTyphus.

❙Dry cough, short and hacking, with sense of excoriation in chest, or soreness from pit of stomach upward, with short, difficult breathing.

❙Cough after every mental emotion; coughing spells are preceded by great anxiety and restlessness; vomiting of food and drink as soon as taken, vomiting brings on cough. θWhooping cough.

Google

‖‖Cough excited by smoky sensation, or as of vapors of sulphur in larynx, or by constant titillation in larynx.
Cough, without expectoration, especially after drinking or eating; when lying down; during a walk in cold air.
Cough after drinking, from continuous irritation or tickling in bronchi.
Cough during motion, with want of breath.
‖Cough when going into cold, open air.
‖Night cough; must sit up as soon as cough commences.
‖Crouplike cough, with suffocating spells, < after midnight. θAfter suppressed hives.
Cough in morning.
‖Clear-ringing, crowing, or whistling whooping cough, excited by a burning tickling in trachea and in throat-pit, as if from vapor of sulphur, at night without expectoration, in daytime with expectoration of mucus, scanty and generally frothy, or in lumps, of various taste and color (bitter, putrid, purulent, saltish, offensive, grey yellow), sometimes mixed with florid blood; returning periodically with increasing violence.
‖‖Whooping cough, with cholera infantum.
‖‖Whooping cough, with arrest of breathing, tough mucus in chest; sputa of frothy mucus in lumps; asthmatic symptoms; debility; cold surface.
‖‖During whooping cough, palpitation of heart; cough returns periodically with increasing violence; child whines and cries.
‖Cough preceded by jerking in hips, which seemed to excite the cough.
‖Cough awakens him; as if he would be suffocated; throat swelled.
‖When coughing, soreness in chest and pain as if something was digging into throat from before backward.
‖During cough: catching of breath; soreness in chest, stitches in sides or in epigastrium; heat of head; collection of water in mouth.
‖Cough: with arrest of breathing; with tough mucus in chest; with expectoration of frothy mucus in lumps, or tasting salty, in daytime; without expectoration at night.
‖A heavy feeling and aching in chest, after coughing. θBright's disease.
Cough most frequently with expectoration, which generally appears only during day.
‖Cough < at night, and whenever he lies on his back expectoration is profuse, white, frothy, sometimes thick and yellow; attack of coughing followed by sweat and great weakness. θBronchitis.

Google

‖Expectoration: difficult; scanty and frothy; consisting of tenacious mucus, which is lodged in chest; ‖‖frothy saliva; ‖thick yellow; ‖grey, green, bitter; ‖salty; ‖‖mucus, streaked with blood.

‖Tenacious mucus, hard to get up, rattling in chest, old people. θPulmonary catarrh.

‖Frequently recurring cough, with expectoration of blood-streaked mucus; retching and vomiting of food and drink; this cough frequently interrupts few moments of sleep she can get by laying her head on a table before her. θDropsy.

‖‖Cough, with bloody sputa.

‖Hacking cough every morning, with expectoration of bright red fluid blood, with burning in l. chest. θHæmoptysis.

‖Hæmoptysis at night, with burning heat over whole body.

‖Foaming bright red blood bursts forth in a stream, with slight hawking; ebullition and burning and fulness in chest. θHæmoptysis.

‖‖Hæmoptysis after loss of blood; burning heat all over, especially with pain between scapulæ; in drunkards, or from suppressed menses.

Inner Chest and Lungs. ‖Feels as if she had a load in upper part of both lungs.

‖Tightness of chest, as if bound with a hoop.

‖Constriction of chest, with great anxiety and restlessness, evenings; burning, or feeling as if excoriated and raw.

‖Constriction of chest, with anguish and oppressive anxiety at pit of stomach.

‖‖Constriction of chest, when going up hill.

‖Great oppression and constriction of chest. θCholera Asiatica.

‖Constriction of chest. θChill of intermittent.

‖Burning and heat in chest. θPneumonia.

‖‖Burning in chest and stomach. θHæmoptysis.

‖Pain in chest, with cough and restless sleep. θBright's disease.

‖Chilliness in chest, evenings.

‖Great heat in chest, extending below diaphragm.

‖‖Catarrh on chest, great suffocation; child, tosses about in agony.

Wheezing at chest, with bruised pain between shoulders.

‖Loud sibilant râles over every part of chest. θBronchitis.

‖Stitches: in upper r. chest; ‖in l. chest only during inspiration; ‖in sternum, from below up, when coughing.

‖‖Acute, sharp, fixed or darting pain in apex and through upper third of r. lung.

Google

‖Pleuritic effusion, great dyspnœa from slightest motion; can lie only on affected side; tongue thickly coated dirty yellow; feet swollen. θAscites.
‖Chronic pleurisy; dark and offensive expectoration; great weakness on attempting to move or sit up.
‖‖Pneumonia from taking cold during a fatiguing journey.
‖Pneumonia, with dark, offensive sputa; great weakness, not felt until attempts are made to move or sit up.
‖Burning and heat in chest; pale face; cold extremities; anxious tossing. θPneumonia.
‖Posterior lobes of both lungs affected. θPneumonia.
‖Chronic pneumonia, with purulent sputa; asthma.
‖Asthmatic attacks accompanying emphysema.
‖‖Hydrothorax.
‖‖Gangrene of lungs, with green, ichorous sputa.
‖Impending paralysis of lungs; rattling in windpipe.

Heart, Pulse and Circulation. Cramp in heart.
‖‖Heartbeats are irritable.
Sounds of heart, especially the "choc" rather violent; not agreeing with pulse.
‖Palpitation as from a distance. θAnasarca.
‖Trembling, irregular motion of heart. θHeart disease.
‖Intermitting beats of heart; somewhat irregular and intermitting pulse, accompanied by a whistling sound. θHeart disease.
Palpitation of heart, violent, excessive, with great anguish, especially at night.
‖‖Palpitation of heart, with anguish; cannot lie on back; < by going up-stairs.
Violent palpitation, most in night, visible and audible.
‖‖Palpitation of heart and tremulous weakness after stool; must lie down.
‖Severe paroxysms of palpitation or attacks of syncope during endocarditis.
‖Tumultuous action of heart, alternating with feeble, irregular beating. θHydropericardium.
‖Palpitation. θParaplegia. θDysentery. θHydrothorax. θHeat of intermittent. θMeasles.
‖Heart disease with emaciation.
‖Palpitation after suppressed herpes or foot sweat.
‖‖Angina pectoris; sudden tightness above heart; agonizing præcordial pain; pains into neck and occiput; anxiety, oppression; breathing difficult, fainting spells; least motion makes him lose his breath; sits bent forward or with head thrown back; < at night, especially from 1 to 5 A.M.
‖‖Rheumatism affecting the heart, with great prostration,

Google

cold, sticky sweat; great anxiety and oppression; burning about heart; pulse small, rapid and feeble.

Valvular disease with intermittent pulse, dyspnœa, anasarca, complains more towards evening, or at night, on going up-stairs, after deep inspirations, or getting angry.

‖Right ventricle hypertrophied. θRetinitis albuminurica.

‖Fatty degeneration of heart.

‖‖Hydropericardium with great irritability, anguish and restlessness; especially in urœmia, etc.

‖‖Idiopathic heart disease.

‖Pulse very frequent in morning but slower at night. θIntermittent.

‖120–130 beats of pulse in the minute. θHæmatemesis.

‖Pulsation through whole body. θHeat of intermittent.

‖Quite small pulse. θScarlatina.

‖Very quick pulse. θHepatitis.

‖Frequent, quick, small pulse. θMeasles.

‖Frequent, weak pulse. θDysentery.

‖Pulse: accelerated; quick and small; quick and weak; small and weak; irregular; trembling; imperceptible.

‖Small, rapid pulse. θDropsy.

Pulse very much accelerated, small and weak; sometimes intermitting.

‖Pulse small, soft, frequent. θRelapse of intermittent.

‖Pulse frequent, small, trembling. θTyphus.

‖Pulse too small and frequent, with œdematous limbs. θDysentery.

‖Quick, trembling, threadlike pulse. θHæmatemesis.

‖Pulse small and undulating. θAnasarca.

‖Pulse hardly to be felt, so frequent. θDysentery.

‖‖Pulse scarcely perceptible, and quick, trembling. θGastritis mucosa.

Pulse sometimes imperceptible; ‖threadlike.

‖Pulse hardly to be felt, with cold limbs. θColic.

‖Nothing to be felt but a trembling motion of the pulse. θDropsy.

‖Pulse irregular, frequent, small, trembling. θYellow fever.

Pulse sometimes suppressed, with strong beat of the heart.

[30] **Outer Chest.** ‖‖Stitches and pressing in sternum.

‖Distension of chest. θWhooping cough.

Burning and itching in chest.

Sore raw feeling of chest, from stomach upward.

Chilliness or coldness in chest.

Heat, burning, itching in chest.

Yellow spots on chest.

Google

[51] **Neck and Back.** Stiffness of neck.
- ‖Nape stiff, as if bruised or sprained.
- Neuralgic pains on l. side of neck.
- Blueness of external throat from distension of veins.
- Colorless, smarting eruptions on neck, shoulders and sides.
- Cervical glands enlarged, felt like a series of hard nodules under the skin.
- ‖The pressing pain becomes burning and shooting; pain in sacrum as if broken, anxiety, restlessness, rush of blood, most to the head. θMetritis.
- Drawing pains: ‖between scapulæ, necessitating lying down; ‖from small of back to shoulders.
- ‖Backache after hard work. θRheumatism.
- ‖Insupportable backache towards evening and on rising from a seat. θRheumatism.
- ‖Cold creeps on back, evening and night.
- ‖A sense of warm air streaming up spine into head. θPrecedes epileptic attacks.
- ‖Burning in spine. θIn epileptic attacks.
- ‖‖Burning in back.
- ‖Burning pain in back while lying quietly upon it. θOvaritis.
- ‖Greatly exhausted from sexual excesses; pulling and tearing in back and legs; formication along the spine; flesh pale, soft, bloated.
- ‖Paralysis of lower third of spinal cord.
- ‖Spinal affection with gressus gallinaceus. θParalysis.
- ‖Small of back as if broken. θHemorrhoids.
- ‖Bruised pain in small of back, with sensation of weakness.
- ‖‖Loss of strength in small of back.
- ‖Stiffness in spinal column, beginning in region of os coccygis.
- ‖Ulceration of sacrum after typhoid.

[52] **Upper Limbs.** Violent tearing and jerking pains in right shoulder joint and shoulder, extending to arm, elbow joint, and forearm. θRheumatism.
- Soreness in the axilla.
- Rheumatic pains from elbow up to shoulder, > at night.
- Pain in the arm of the side on which one rests, at night.
- Drawing and lacerating in the arms, particularly at night.
- Complaints predominant on upper arm.
- Peculiar neuralgia in l. arm suddenly after meals.
- Violent neuralgia of l. arm followed by lame feeling.
- Upper limbs weak; flexors of fingers retracted.
- ‖Paralytic feeling in upper limbs. θPericarditis.
- Painful tubercles on the arm.
- ‖Swelling of the arm, with putrid smelling, black blisters.

Google

‖Drawing and tearing from elbow up into axilla, at night.

Violent rheumatic pains in r. elbow.

Small reddish spot on l. elbow joint, soon forming a blister, becoming in a few hours as large as a hazel-nut and turning black; similar blisters appear on r. elbow and next day on l. leg.

‖Hands and lower half of forearm dark and livid, as in malignant cholera.

‖Swelling on the forearm, size of a goose egg, after becoming inflamed all around, dropped off. θCancerous inoculation.

‖Trembling of hands.

Sensation of swelling and fulness in palms of hands at night.

‖Fistulous opening in palm of hand discharging ichorous pus, pain and sensitiveness great. θFrom a felon.

‖Tingling in fingers. θPericarditis.

‖Hands can be extended, but not the fingers.

‖Burning and shooting in a finger connected with case produced by a wart having been pulled out.

‖Soreness between the fingers.

‖Drawing, jerking and tearing from tips of fingers into shoulder.

‖Vesicles filled with blood on tips of fingers; ulcers and scabs under nails.

‖Burning ulcers on tips of fingers.

‖Indurations in the soft parts between metacarpus of thumb and index finger, and some along forearm between radialis and supinator longus, size of a common bean. θCancerous inoculation.

‖Spongeous excrescence on thumb, size of a raspberry, very painful, slightest touch increases pain very much. θCancerous inoculation.

‖Under nail of thumb a very sensitive, radiating pain, a few days after operating on a cancerous mamma, the thumb-nail being cut too close.

Nails discolored; at first red, then black; later replaced by new nails, thin and transparent.

‖Blue nails. θChill of intermittent.

[33] **Lower Limbs.** ‖Drawing, stitching pain. from region of ovary into thigh, which feels numb and lame; < from motion. θOvaritis.

Horses hip-shot from inflammation of kidneys, standing crooked, legs drawn together.

‖Pain back of great trochanter, extending down thigh, posteriorly, then towards knee; anteriorly, embracing patella, down tibia to ankle; pain relieved somewhat by flexion of knee.

Google

Deep drawing boiling sensation; hopeless, pale, emaciated; dyspnœa or fainting spells from slightest exertion. θSciatica.

Neuralgia in hip, with severe burning, tearing and drawing pain, not allowing affected part a moment's rest. θSciatica.

Sciatica brought on by staying in damp, cold cellar.

Tearing and shooting in hip, thigh and groin.

Twitching in hips. θWhooping cough.

Violent drawing, tearing pain in hips and l. foot.

Cramp in thighs, calves and toes in evening, in bed; followed by lassitude.

Complaints predominate on inner side of thigh.

Intolerable itching of thighs.

Buttocks sore to touch.

Spells of violent pain on posterior surface of thigh, calves and heels; < from every attempt to walk, relief from bending knee and hip joints (flexing, etc., in abdomen). θRheumatism.

Gressus gallinaceus.

Pain in knee joint, as if beaten.

Swelling and pain of knees.

Cracking of knees when walking.

Stiffness and immobility of knees and feet. θScirrhus.

The knees feel as if bandaged.

Periodical elastic swelling of knee, can bear moderate pressure without increasing the pain; pain in knee very severe, extending to hip and ankle joint, as of scraping over long bones. θRheumatism.

Stiffness of knees and feet, alternating with tearing pains.

Itching herpes in bends of knees. θScabies.

Itching tetters in hollow of knee.

Coldness, especially of knees and feet.

Knees cold, head and ears hot.

Tearing in tibia.

Cramp in calves.

Cramp and drawing in muscles of calves. θColic.

Frequent cramp in calves. θIntervals of epileptic attacks.

Uneasiness in lower limbs, cannot lie still at night, has to change position of feet constantly or walk about to get relief.

Sensation as if lower limbs would break down, on going up-stairs.

Weariness in feet.

Weakness of feet, numbness.

Numbness, stiffness and insensibility of feet, with occasional swelling and great pain.

Google

Drawing pain in legs when resting feet upon floor, while sitting.

Dull aching pain in r. leg below knee, somewhat increased by walking, but especially < at night after becoming warm in bed; oval prominence on tibia about four inches below knee, hard and immovable and very sensitive to touch, with slight redness; later, similar pain and tenderness on outer surface of r. ulna.

Pain in lower limbs. θIntermittent.

White swelling of limb, with intermittent fever and weakening diarrhœa. θPhlegmasia alba dolens.

Swelling of lower limbs, with violent pain.

Œdematous swelling of l. leg.

Œdema of legs. θGonarthrocace.

Swelling of feet. θBright's disease.

Feet œdematous, swollen, ice cold and numb. θHeart disease.

Feet œdematous. θApyrexia of intermittent.

Extremities œdematous. θAlbuminuria.

Instep œdematous, leg and thighs very much swollen, the skin erysipelatous. θPyæmia.

Swelling of feet, œdematous; great exhaustion.

Hard blue red swelling of feet.

Swelling of feet, hard, burning, shining, with red spots or blue black blisters.

Hot and shining swelling of feet.

Horses: swelling of forefeet; ailments of hoof or cleft of hoof.

Distension of veins of feet. θVarices.

Right limb swollen and full of suppurating pimples, with an unbearable itching.

After suppressed foot sweat. θPalpitation of heart.

Intolerable itching of feet.

Itching swelling of feet.

Old ulcers on lower limbs, with burning and lancinating pains.

Old ulcers on legs, with burning and stinging.

Pain in an ulcerated leg so violent that it waked her up at 4 A.M., and prevented her from sleeping.

Ulcer on foot surrounded by a gangrenous crust.

After opening an abscess on l. heel, edges of wound mortified. θPeritonitis of os calcis.

Tearing in heels.

Loss of power of toes; walking is performed with soles.

Stitches which cause her to shudder, from little l. toe to great toe.

Violent tearing, drawing pain from ankle bones down

Google

over heel to sole of foot, only ameliorated when leg is flexed on abdomen. θRheumatism.
Cold feeling in soles of feet.
Soles of feet as if made of wood and do not feel the ground.
‖Festering sores or ulcers on soles of feet and toes.
Blisters on bottom of feet, at night discharging a light yellow fetid water.
‖Rending pain in soles.
‖‖Spreading blisters form ulcers on soles and toes.
‖‖Sore pain on balls of toes, while walking, as if chafed.
‖Toes drawn downward.
Crumbling, misshapen toe nails.

[34] **Limbs in General.** ‖‖Heaviness of limbs. θIntermittent.
‖Neuralgia of extremities.
‖Painful feeling of fatigue, penetrating to marrow in bones of limbs. θRheumatism.
‖Gouty and rheumatic pains, drawing and lacerating, particularly in limbs, with inability to lie on affected part, and diminution of pains when moving it.
‖Aching in all the limbs. θBright's disease.
Neuralgic pains in forearms and legs, increase and decrease gradually; < from cold air or cold water.
Pain in limbs, jumping from place to place.
‖‖Restlessness of limbs during whooping cough.
‖‖A general lack of will-power in upper and lower limbs; numbness, or sensation of heaviness.
‖‖Trembling of limbs. θIn drunkards.
‖Twitching; trembling; violent starting while falling asleep.
‖‖Excessive weakness and exhaustion of limbs oblige him to lie down.
Contraction of limbs from paralysis of extensors.
Hands and feet as if mummified; skin hangs in folds.
‖Stiff, lame limbs. θYellow fever.
Hands and feet swollen, burning pain, but feel cold to touch.
‖Limbs cold. θCystitis. θPneumonia.
‖Cold hands and feet, with occasionally cold feeling all over. θColicodynia.

[35] **Rest. Position. Motion.** ‖‖From climbing mountains or other muscular exertions: want of breath, prostration, sleeplessness and other ailments.
Cannot remain in same position.
Lying in bed: gloomy forebodings; asthma.
Lying on back: pains about navel <; burning pain in back.
Lying down: must, on account of weakness; pains worse.

Google

Sitting up in bed: toothache better.
Must sit up in bed: asthma.
Sitting: stitching in hemorrhoids.
Sitting bent: ovarian pains worse.
Half-sitting posture: sleeps in that way.
Motion: flushes and chilliness with irritability; sensation of brain beating against skull; head confused in paraplegia; headache <; eyes more painful; ovarian pains <; constriction of chest <; > gouty and rheumatic pains in limbs; causes fainting; < heat.
Walking: reels with headache; relieves pain in supra-orbital region and teeth; headache <; stitches in hemorrhoids; cough in open air; causes fainting; in open air, shuddering
Ascending: asthma <; constriction of chest; aggravates valvular troubles.
Must move: head and feet in hemicrania; cannot lie still.
Bending over: ovarian pains worse.
Rising up in bed: beating in head <; excessive nausea and vomiting.
Turning in bed: breathless.

[36] **Nerves.** ‖Cannot rest in any place; changing his position continually; wants to go from one to another, and lies now here and now there.
‖Restless, constantly moving head and limbs.
‖It was impossible for her to remain in same position, and with the slightest change of position of the affected limb, she had to scream. θAcute rheumatism.
‖During spells, restless; moves head and limbs to and fro, and imagines that he gets some relief from so doing. θMegrim.
‖Tossing about from side to side. θSummer complaint.
‖Great restlessness, cannot remain seated, runs around, creeps on hands and feet. θCystitis.
‖‖Great restlessness with fear and anxiety.
‖Restless, fretful, dread of death. θHeadache.
‖Great restlessness and anxiety, constant moving of head and limbs, whilst the trunk lies still on account of too great weaknes. θTyphus.
‖Anxious restlessness. θGastritis. θPeritonitis. θOvarian dropsy. θUterine cancer. θPanaritium. θScarlatina.
‖Great restlessness with much thirst. θIritis rheumatica.
‖Great restlessness and exhaustion. θProsopalgia.
‖Great restlessness after suppressed hives.
‖Great restlessness. θNeuralgia of trigeminus. θScurvy. θCancer of stomach. θDysentery. θCystitis. θOvari-

Google

tis. θDysmenorrhœa. θŒdema pulmonum. θAsthma. θChronic intestinal catarrh. θCoxalgia. θEclampsia. θMeasles. θSmallpox. θCarbuncle. θHerpes.

‖Restlessness and anxiety. θDuring heat of intermittent.

‖General discomfort. θBefore intermittent.

‖Trembling. θHæmatemesis. θChlorosis.

‖Trembling of limbs. θDysentery. θTyphus. θIn drunkards. θWith cough.

‖Subsultus tendinum.

‖Jerks in body when falling asleep, like electric shocks.

‖After grief, clonic spasms; face and limbs were convulsed, he uttered a roar involuntarily while conscious; a man, æt. 65.

‖Clonic or tonic spasms in different places. θCholera Asiatica.

‖Spasms preceded by burning heat of whole body. θEclampsia.

Hysterical spasms, followed by exhaustion.

‖Before spasm, drawing in limbs, longing to lie down; when they come on, sudden jerk through body or icy coldness from head down back; loss of consciousness, stretches and writhes, and then draws limbs together; abdomen rises and falls rapidly with rumbling; at times distortion of facial muscles. θTetanus.

‖Epileptic convulsions preceded by a sensation of warm air streaming up spine into head, vertigo, loss of consciousness and falling down.

‖Convulsions with opisthotonos; foam at mouth.

‖Convulsions. θWith whooping cough.

‖Epileptic attacks (oftener *Calcarea arsenica*).

‖Tetanus.

Stiffness and immobility of all joints.

‖Inability to make any movement. θTyphus.

Feels extremely tired all over.

‖Thinks himself strong until he attempts to rise. θTyphoid.

‖Weary, averse to all bodily effort; weariness increases so that he cannot sleep.

‖‖Exhaustion from slightest exertion, must lie down.

‖Great exhaustion. θDysentery. θUterine cancer. θTuberculosis. θGonarthrocace. θAscites. θScirrhus mammæ. θHæmatemesis.

The child is very weak; the slightest effort seems to exhaust it, such as vomiting, etc.

‖Weakness, obliging him to lie down, he feels stronger when doing so.

‖Great weakness and restlessness. θHemorrhoids. θHæmoptysis.

Google

Great weariness and weakness. θIntermittent.
Pains very debilitating θToothache.
Excessive debility. θScurvy. θCarbuncle. θChlorosis.
Great debility and fainting. θRheumatism. θCarbuncle.
Debility from overworking.
Rapid and complete prostration.
Prostration, vertigo, singing in ears, deafness. θTyphus.
Extreme prostration. θMegrim θCancer of stomach. θChronic intestinal catarrh. θAsthma. θPneumonia. θTuberculosis. θParalysis. θTyphus. θScarlatina.
Extreme prostration and rapid emaciation. θTyphus. θIntermittent.
Aphasia; l. arm and foot paralyzed. θAfter apoplectic condition with great prostration.
Great prostration, with waxy paleness and coldness of skin.
Relaxation of muscles.
Prostration in his feet.
Soon prostrated by illness. θGastritis.
Sudden prostration. θIntestinal catarrh. θCholera Asiatica.
Excessive prostration; general rapid sinking of strength.
Great sinking of strength. θApyrexia of intermittent. θMeasles. θSmallpox.
Sudden sinking of strength. θLatter stage of peritonitis. θMetritis.
Very rapid sinking of strength. θIntermittent. θYellow fever.
Sudden sinking of strength; cold sweat, fear of death.
Sliding down in bed. θTyphus.
Frequent fainting.
Violent deep fainting fits.
Faint, anxious and weak, early in morning.
Fainting with vertigo and swelling of face.
Fainting. θHæmatemesis. θGastralgia. θIntermittent. θDysentery. θChlorosis.
Sometimes shortly after paroxysm fainting spells, especially if she has an urging for stool. θRelapsed intermittent.
Fainting from motion, from walking about, from coughing or speaking. θHæmatemesis.
Slight attacks of fainting-like weakness with constriction of chest. θAcute rheumatism of joints.
Fainting attacks with exhaustion. θTyphus.
Fainting from weakness, with scarcely perceptible pulse.
Electro-muscular contractility diminished.
Want of bodily irritability.
Paraplegia.

Google

Complete paraplegia, skin of legs cold, soft, flaccid; slightest spontaneous motion impossible.
Cannot talk, left arm and foot lame after an apoplectic condition with great prostration.
Paraplegia; skin of legs cold, flaccid; great prostration.
Paralysis: with gressus gallinaceus, also from lead poisoning; after neuralgia; of limbs which were œdematous before; particularly of extensors; with atrophy of muscles; generally of both sides; especially of lower extremities; more frequent than apoplexy.

[37] **Sleep.** Yawning and stretching.
Frequent spasmodic yawning. θParaplegia.
Every two or three seconds she has to gap; girl, æt. 7. θSummer complaint.
Inability to go to bed.
Jerking of limbs when falling asleep; sometimes excited by pains felt in distant parts.
Frequent attacks of somnolence in daytime while sitting.
Half slumber broken by moaning and grating teeth. θTyphus.
Drowsiness interrupted by uneasy dreams and great anxiety.
Slumber and slight delirium.
From midnight till morning light slumber, disturbed by frequent waking with a burning or sore pain in chest. θAsthma.
When chill lessens falls into a deep sleep; gets awake after heat has lasted a while. θIntermittent.
Sopor from which she often awakes, but only for a short time. θTyphus.
Sopor in evening.
Sleep full of tiresome dreams; unrefreshing.
Dreams: full of care, sorrow and fear; about thunderstorms; of fire; of black water and darkness; of death and dead persons; misfortunes; embarrassments and vexations.
Talks in his sleep, divulged a secret which otherwise would not have passed his lips. θCancerous inoculation.
Trembling in sleep; grasping at head. θTyphus.
Grasping at flocks.
At night sleep, alternating with raving and different visions.
Only half asleep, constantly disturbed with moaning and grating of teeth.
Frequent startings in and from sleep.
Jumps out of bed.
Worse during sleep.
Pains are felt most at night, during sleep or after lying down.

Google

Fatigue seemingly increased by sleep.
Restless, anxious, < at night. θRheumatism.
Sleep restless, disturbed by frightful dreams. θIntermittent.
Restless nights, weak, fatigued, greyish-yellow complexion; no appetite. θIntermittent.
Worse at night. θColic. θPericarditis. θCarbuncle, etc.
Pains < at night. θScirrhus uteri.
Complains of pains and restlessness at night. θScrofulous ophthalmia.
Itching and burning < at night. θCrusta lactea.
Nightly burning pain like fire with great restlessness. θScirrhus mammæ.
Nightly burning or a terrible itching. θEczema.
Severe burning pain < at night. θHerpes.
Burning as if hot water was flowing through blood-vessels, with anxious heat and restlessness, and with desire to uncover.
Sleep anxious, unquiet.
Sleep in a half-sitting posture.
If getting awake at night, difficulty to fall asleep again.
Sometimes awakened with horrible anxiety, palpitation and restlessness, fear of death.
Awakens from restless sleep with anxiety and palpitation, after improvement has commenced. θIntermittent.
Wakens from sleep after heat with singing and buzzing in ears, and very little sweat. θIntermittent.
Awakened by pains; especially about midnight.
Worse about midnight. θDiphtheria. θPeritonitis. θIntestinal catarrh. θChronic catarh of bowels. θMetritis. θDysmenorrhœa. θUterine cancer. θPanaritium. θSciatica. θMeasles. θŒdema pulmonalis. θTyphus. θGastralgia.
Sleep disturbed after 3 A.M.; she gets up in a fright.
The evening aggravation continues until after midnight. θAcute rheumatism.
Awoke about 3 A.M., feeling burning hot internally though cool externally to touch; then came a heavy lumbar headache, with heaviness and distress in stomach. θOphthalmia.
Sleepless until 3 A.M.
Great restlessness during sleep; constant tossing and turning; everything seems to worry.
Sleeplessness, with restlessness and moaning.
Nightly restlessness, with great anguish about heart.
Sleepless from anguish, restless, tossing about, < after midnight.
Sleepless, pulse 100, delirious at night, unquenchable thirst and loss of appetite. θPyæmia.

Google

Sleepless nights with coryza.
‖Sleeplessness. θGonarthrocace.
‖Sleepless, and towards morning a slumber with frightful dreams. θBright's disease.
‖Sleeplessness < night before an attack. θApyrexia in intermittent.
‖Sleeplessness. θUlcer on heel; periostitis of os calcis.
‖‖From climbing mountains or other muscular exertions: want of breath, prostration, cannot sleep, and other ailments.
Nightly sweats.
‖After sleep and end of heat, great desire for something refreshing; she wants wine with water, coffee, etc. θRelapsed intermittent.
‖After sleep, great weariness. θIntermittent.
‖After sleep, feels as if he had not slept enough; eyes are weary; cannot get out of bed.

[38] **Time.** Evening: periodical throbbing in head; swollen frontal eminences <; otalgia <; loss of breath; constriction of chest and anxiety; chilliness in chest; cramp in legs; sopor; crawling.
2 P.M.: headache begins to lessen.
3 P.M.: chill.
10 P.M.: ophthalmia decreased.
12 P.M.: springs out of bed with asthma.
After midnight: restlessness and anxiety <; ophthalmia <; diarrhœa <; asthma >; coldness of extremities <; ‖heat with anxiety.
Night: periodical throbbing in head: pains of erysipelas <; pulsating stitches in eyes; pains in and over eyes reach their acme; diarrhœa <; hemorrhoids more painful; croup <; cough <; no expectoration; hæmoptysis; palpitation <; valvular troubles are aggravated; rheumatic pains in arm <; cannot lie still; pains <; restlessness <; itching and burning <; chilliness; heat.
Day and night: colic.
Midnight till morning: restless slumber.
2 A.M.: cramp in stomach; asthma; fever and sweat.
1 to 5 A.M.: angina pectoris.
Until 3 A.M.: sleepless.
About 3 A.M.: awaked by fever and backache.
After 3 A.M.: sleep disturbed.
After 4 A.M.: no sleep from pain in ulcerated leg.
Morning: periodical throbbing in head; putrid sweet taste; diarrhœa; hacking cough; faint, anxious, weak, sweat; rigor with cramp in chest.
5 A.M.: ophthalmia begins.

Google

7 A.M.: headache begins.
10 to 11 A.M.: chill.
11 A.M.: headache reaches climax.
Forenoon: coldness; fever attacks mostly begin.
Noon: ophthalmia at acme; paroxysm of fever.
Afternoon chill towards 4 o'clock: conjunctivitis periodical.
Daytime: expectoration; chill, sweat at night.

[39] **Temperature and Weather.** Changes of warmth and cold: oppressed breathing.
Cold washing: beating in head >.
Cold damp cellars: induce attacks of sciatica and asthma.
Cold weather: sore nose <; excites toothache.
Stormy weather: oppressed breathing.
Cold water: makes teeth sensitive.
Sea bathing: induces many complaints.
Open air: headache <; heaviness of head >; head sensitive to; ophthalmia >; humming in ears >; suffocative cough when walking.
Uncovering; head <.
Warm wraps: head >.
Warm applications: generally > ophthalmia.
Warm clothing: oppressed breathing <.
Warm room: humming in ears <.
Heat: hemorrhoids >.
Hot stove: toothache >.

[40] **Fever.** ‖The paroxysm begins with stretching, gaping, unpleasant feeling, greater weariness and slight crawls over the back after drinking. θIntermittent.
‖Gaping, stretching, awkward feeling and great weariness, has to lie down, before the paroxysm. θRelapse of intermittent.
‖Every morning stretching of limbs, gaping, emptiness in head, thirst, and after drinking immediately chilliness and crawling. θQuotidian intermittent.
‖Before chill, fainting, cutting in abdomen like knives, empty eructations with pain in stomach, begins with anxiety; frequent vomiting of yellowish-bitter water; vomiting of food with constant nausea; vomiting of bile and mucus with great straining; when chill passes off they fall into a deep sleep. θIntermittent.
‖Coldness, gaping, headache, and greater weakness; soon after rigor with headache. θIntermittent.
‖Attacks begin with vertigo, great prostration, gradually increasing heat, ending in long-lasting sweat. θIntermittent.
Nursing children have no distinct chill; must be covered; very thirsty.
Internal coldness, skin not feeling cold.

Google

Skin cool. θAscites.
Cold dry skin. θDysentery.
Coldness over entire body. θHæmatemesis.
Coldness of body with much thirst. θTyphus.
Coldness of body. θYellow fever.
While sitting, or in bed, feet are cold. θIntermittent.
Coldness of extremities; < after midnight.
Sensation of coldness in ulcers.
Coldness of whole body, pale, sunken face, very sickly appearance, lips pale, rigor, pains in limbs, contraction of chest, breathing impeded, restless, trembling. θQuotidian.
Coldness at night, stretching, headache, and pain in r. eyeball, troublesome when moving eye. θIntermittent.
Concomitants of cold state: colic and loose stool, nausea, head benumbed, unconsciousness, tearing in lower limbs, drawing in all limbs, as if beaten in thighs, cramps in chest, difficult breathing, stretching of limbs, desire to urinate and frequent urination, hunger. θIntermittent.
With shivering and coldness appear pains or other complaints. θIntermittent.
Crawling in evening with stretching of limbs and anxious restlessness.
Shuddering: particularly after drinking, with chilliness; after dinner; when walking in open air; at beginning of fever before chill.
Feels chilly and hovers near stove. θMegrim.
Congestive chills.
Chill gradually increasing to shaking rigor.
Violent chill with shaking; every afternoon at 3 o'clock, or in evening.
Chill without thirst at 10 or 11 A.M., shaking chill felt as though running down his back, blue surface, shrunken skin. θIntermittent.
Night chilliness, only on face and feet.
Chill as from cold water trickling down back.
Chill on lower part of body.
Coldnesss and chill renewed after drinking and after eating. θIntermittent.
Drinking increases chill and causes vomiting. θIntermittent.
Chill: > after eating; more hunger than thirst; > after rising from bed; < out-doors.
Clonic spasms during chill.
Blue nails and lips during chill.
Amelioration of pains after chill. θIntermittent.
During chill and heat many of concomitant symptoms become aggravated.

Google

Chill and no thirst, 10 A.M.; skin shrunken; lips and nails blue.

During chills generally no thirst. θIntermittent.

Soon after prodromic coldness of body, blue nails, chill in back, rigor, inner trembling, with violent pains in back and sacrum, contraction of chest, difficult breathing and emptiness in head. θRelapse of intermittent.

Forenoon coldness, morbid appearance, blue lips, violent headache, rigor, shaking of teeth, contraction of chest. θIntermittent.

As soon as rigor is abating, she gets an irresistible hunger, she has to eat something, notwithstanding that she knows it renews the chill. θRelapse of intermittent.

Often rigor with gooseflesh. θDropsy.

Cold as ice.

Undefined development of chill and heat; either simultaneously, or in alternation.

Chilly and feverish, mostly towards sundown.

Heat mixed up with chill. θIntermittent.

Frequent chilliness alternates with heat. θRheumatism.

Internal chill, with external heat and red cheeks.

Burning heat internally, with a cold external surface. θScarlatina.

Cold inside and burning hot outside. θIntermittent.

Chill without thirst followed by heat with much thirst and no sweat; or sweat comes hours afterwards, whereupon ailments all increase; liver and spleen are swollen. θDropsy.

One hour after chill heat all over, burning, dry, very frequent drinking. θIntermittent.

Intermittent begins with chill or thirst, followed by heat sooner or later, with much thirst and no sweat, or sweat at a later hour, whereupon all earlier ailments are increased.

After coldness at night for two hours, dry heat, mouth dry, thirst; restless, anxious, throbbing and beating through whole body; sleepless. θIntermittent.

Chill without thirst followed by heat with much thirst and no sweat, or sweat at a later hour, whereupon all earlier ailments increase; liver and spleen are swollen, even dropsical symptoms present themselves. θIntermittent.

Intermitting chills, fever and sweat. θTuberculosis.

Heat following chill is dry, unbearable, lasts three or four hours, with painful tension and pressure in both hypochondria; fulness in epigastrium; pressing pain in forehead; restlessness, anxiety and thirst. θRelapse of intermittent.

Google

After coldness, heat, with burning in whole body, it runs hot through all veins; anxiety, restlessness, great weariness; thirst, and desire for acids; pain in l. hypochondrium. θQuotidian intermittent.

With chill, forehead hot, heat in face and cold hands. θIntermittent.

Cold feet and hot hands.

Coldness of knees, with heat of head and ears.

External coldness, with cold, clammy sweat. θWhooping cough.

General coldness, with parchment-like dryness of skin, or with profuse, cold, clammy perspiration.

During day chill, at night sweat.

Cold or sweat on diseased parts.

Cold, dry skin, alternating with cold sweat. θDysentery.

Dry, burning heat.

Persistent burning heat of skin. θMeasles. θHepatitis.

Great burning. θCarbuncle.

Heat predominates, lasts from two to four hours, violent burning, almost unbearable, glowing heat all over. θIntermittent.

Internal burning heat.

Complains of violent internal heat and thirst while vomiting.

Heat at night, as if hot water was poured over one.

Sensation as if blood in arteries was boiling hot.

Internal burning, dry heat; inclination to uncover.

In fevers, patient desires to be kept covered; drinks little and often; cold water disagrees, produces chilliness, pain, instant vomiting.

☞ Burning heat, with unquenchable thirst.

Burning fever, great thirst, drinking little but often; marked prostration; dry, parched tongue. θIntermittent.

Thirst only during hot stage, drinks often a little.

Dry heat evening and night, with thirst and frequent drinking of but a small quantity at a time.

Heat, with desire for drink, but no thirst.

Heat intense, burning, delirium and unconsciousness.

Feeling of heat, with anxiety after 12 P.M.

Internal heat, burning dry, with anxiousness at night.

Heat and restless anxiety. θIcterus.

Heat increases gradually, with restlessness, anxiety and tension, with pressure in spleen. θIntermittent.

Great heat and restlessness, with nosebleed.

Heat at night without thirst and without sweat.

Heat increased by motion, talking, coughing, when walking; lessened by coffee.

Google

Internal heat, with burning in veins. θWhooping cough.
Heat increasing gradually, with restlessness, anxiety, pain in spleen; fulness in pit of stomach; thirst for sour drinks. θIntermittent.
Heat, with abatement of headache; restless; thirsty; great weariness and sleep. θIntermittent.
After heat commences, pains and other complaints having commenced with cold state lessen, or are replaced by new symptoms. θIntermittent.
During heat: anxiety, restlessness; burning intolerable; thirst, especially for warm drinks; tension about spleen; nosebleed.
Concomitants of heat: restlessness, anxiousness; coming from scrobiculum; throbbing and pulsating in whole body; delirious; painful tension in hypochondriac regions, most in l.; gnawing and burning in region of stomach; pain in bones, small of back, forehead; nausea, difficulty of breathing; skin dry and burning; thirst, dry mouth, with frequent drinking, but not much, sometimes a great desire for acids and acidulated drinks. θIntermittent.
At end of heat, often nausea, vomiting, especially after drinking; weariness and sleep. θIntermittent.
After heat lessened, great drowsiness and sweat in sleep. θQuotidian intermittent.
She feels very much exhausted after heat, and finally falls asleep. θRelapse of intermittent.
After fever, attack of headache.
Fever and sweat every afternoon.
Heat at night, with sweat of face and feet.
Fever at 2 A.M.; sweat in face and on feet, and tension in hypochondria and epigastrium, producing anxiety and colicky pains.
First heat, then sweat.
Sweat at end of fever, with cessation of all previous symptoms.
Sweat comes some time after heat, or not at all. θIntermittent.
Sweat staining brownish, yellow.
Sweat cold, clammy, smelling sour, or offensive; with exhaustion.
Cold, clammy sweat. θPeritonitis. θTyphus. θYellow fever. θCholera Asiatica.
Cold sweat. θCystitis. θSummer complaint. θDysentery. θPericarditis. θApyrexia intermittent. θScarlatina.
Sweat, with aversion to uncover.
Sweating on going to sleep; goes off after sleeping a little.

Google

Nightly sweats.
Sweat in morning, after nightly heat.
Profuse morning sweat, which does not relieve. θRheumatism of knee.
Sweat abating after sleep.
Sweat periodical.
Sweats too easily, or while sitting, while eating, and after eating or drinking.
Sweat lessened by motion.
Sweat not appearing at all. θIntermittent.
Sweat not before night, and scanty, often only in face and on chest, of short duration. θRelapsed intermittent.
Sweat on back parts, occiput, neck, etc.
Profuse sweat about knees, at night.
Sweat on lower part of body.
All symptoms of first stages > during sweat. θIntermittent.
Only free from pain during sweat. θRheumtism.
Sweat does not appear during heat, but later, combined with thirst, often buzzing of ears, heaviness of head; vertigo and trembling. θIntermittent.
Concomitants of the sweat: anxiety; talkativeness; face pale or red; nausea, bitter vomit; unquenchable thirst; nose running; fingers like dead; swelling of feet.
Sleep after sweat.
Cold perspiration, with great prostration.
Cough ends with sweat. θWhooping cough.
Cold and clammy sweat, with great exhaustion from least effort.
Sweat weakening, even to fainting.
Paroxysms irregular, most daily, in morning, sometimes omitting a day or two.
Attacks begin mostly in forenoon. θIntermittent.
In morning, rigor, with cramp in chest; later, dry, burning hot skin; pulse small, weak, frequent; complains of headache; dry mouth and lips; incessant drinking, but little at time; great desire for sour things; restless and moaning; heat lasted three hours: evening after fever; great weakness and soreness in limbs; no sweat, but frequent drinking. θIntermittent.
The third day, in forenoon, coldness, pale face, rigor, trembling, restlessness and crying, followed by heat, with sleep and moaning; finally a little sweat and frequent drinking. θA boy with intermittent.
Paroxysm coming on about 12 noon, or 1 o'clock P.M. θIntermittent.
With various stages of fever always appear other symptoms. θIntermittent.

Google

After paroxysm: weakness, fulness in upper abdomen; less appetite; desire for something refreshing, or wine or coffee; slow, insufficient stool. θIntermittent.

Evening after paroxysm, indisposed, cross; several diarrhœic stools. θA boy with intermittent.

After paroxysm, great weariness and weakness, no appetite; constant desire for acids or something refreshing. θQuotidian.

Icterus after intermittent.

Never clear of symptoms during apyrexia. θIntermittent.

Quotidian and other intermittent fevers.

Chill in afternoon, followed by dry evening heat, and later sweat.

Quotidian, tertian and quartan fevers, with indistinct chilliness and heat, with great restlessness and thirst, or else without thirst during chilliness and heat.

Intermittens incompleta; chill intermixed with heat, or heat and chilliness follow each other in rapid succession.

Absence of either chill or heat or sweat. θIntermittent.

Intermittent relapsing after quinine.

Fevers which are intermittent and tend towards a typhoid state.

Typhoid fever: slow, protracted cases, with mild delirium; loss of consciousness; great anxiety; erethism, even with the greatest prostration; hippocratic face; cheeks burning hot, circumscribed red; face distorted; eyes glistening, staring or sunken, or closed with sticky matter; lips dry, cracked, even black; mouth lined with a brown or black slime; great thirst, but drinking little at a time; fluids roll audibly into stomach; stools watery, foul, often involuntary; oppression; dry cough, fetid breath; white, miliary eruption; petechiæ; blood oozes from dry lips and from anus; skin hot, dry, parchment-like; or covered with cold, clammy sweat; cadaverous odor from body; weakness so great he slides down in bed; lower jaw drops.

Putrid fever.

Yellow fever; black vomit; indifference, stupid expression; delirium, etc.

Irritative fever; hectic; marked emaciation; hot, dry skin by day, sweating at night; exceedingly irritable both in mind and body.

Hectic fever. θGonarthrocace.

Typhoid symptoms. θScarlatina.

Asthenic cases of smallpox.

41 **Attacks, Periodicity.** Typus tertianus anteponens.

Google

Periodical complaints; return of complaints when year comes round.

Every morning: stretching of limbs, gaping; emptiness in head.

Every afternoon: burning pains in eyes; violent chill with shaking; fever and sweat.

Locality and Direction. Right: pain in eyeball; otorrhœa; burning mucus from nostril; pain in hypochondrium; pain in abdomen and groin; pains in ovary; stitches in upper chest; ventricle hypertrophied; tearing and jerking in shoulder; rheumatic pains in elbow; leg swollen and covered with suppurating pimples.

Left: pain in head and face; pains in supra and infra-orbital regions; otorrhœa; cancerous sore on upper lip; drawing around lower border of ribs; drawing, stitching under hypochondrium; contractive pain in groin; burning in chest; stitches in chest during inspiration; neuralgia in l. arm; reddish spot on elbow joint; blisters on leg; paralysis of arm and foot; joints of hand deformed; abscess in heel.

From below up: stitches in sternum; warm air streaming up spine.

Sensations. As if there was some by his side who did all that he was doing; as if brain moved and beat against skull; like a hot wire thrust through ramifications of fifth pair of nerves; as of sand in eyes; as if bruised over nose and in forehead, as if head would burst; brain as if torn to pieces; as if cats were tearing brain to pieces; as if eyes were drawing into head; as if eyes had no room in orbit; as if lids were dry and rubbing on ball; lower lip as if burnt; as from red-hot needles in swollen upper lip; as if teeth were elongated and loose; tongue as if paralyzed; as though tongue was too heavy; tongue as if burnt; as if stomach and œsophagus were being made raw by an acid corroding substance; r. groin as if sprained; as if she was passing sand through rectum; chest as if excoriated; as if chest was bound with a hoop; nape as if bruised; as if hot water was flowing through bloodvessels; as if had not slept enough; as if cold water was trickling down back; as if something were torn loose in l. hypochondrium, also in pit of stomach, when yawning; as if intestines were tied up (colic); as if abdomen would burst before stool; as if inhaling dust; as if something was digging into throat from before backward; as if she had a load in upper part of both lungs; as if lower limbs would break down on going up-stairs; a sense of warm air streaming up spine; as if broken, small of back; as if

Digitized by Google

bandaged, knees; as of scraping over long bones in leg; as if made of wood, soles of feet.
Painful feeling of fatigue penetrating to marrow, in limbs.
Like cold water running down back
It runs hot through all the veins. θHeat of intermittent.
Undefined pain: in eyes; in eyelids; in epigastrium, stomach and abdomen; about navel; in r. side of abdomen spreading to r. groin and scrotum; between scapulæ; in arm lain on; in sacrum; in liver; in knees; in lower limbs; in spleen; in gangrenous ulcers.
Agonizing pain: from præcordial region into neck and occiput.
Lancinating: in stomach; in chest; and burning in abdomen; in uterine region, from rectum to anus and pudenda; in old ulcers on legs; in inflammatory swellings; in scirrhus.
Cutting: like knives, in abdomen, darting through abdominal ring.
Lacerating: in arms; in lower limbs.
Darting: through upper r. lung.
Piercing pain: in muscles.
Boring: in r. supraorbital region, over eye into teeth; in a small spot in temple; in stomach and intestines.
Stitches: in head; from l. meatus auditorius outward; in epigastrium and stomach; in spleen; in r. hypochonder; in region of liver; in l. hypochonder; from abdomen into vagina; in groins; in hemorrhoids; in renal region; in rectum; in sides; in upper r. chest; in l. chest; in sternum; stitches from ovary into thigh.
Sticking: in ulcer on cornea; in lids.
Stinging: in forehead to eyes; in eyelids; in ulcer on r. ala nasi; in face; in upper lip; in œsophagus; in stomach and epigastrium; in abdomen; in hemorrhoids; in old ulcers on legs.
Pricking: occipital headache; suborbital l. side; in ulcer on cornea; in rectum; in glans penis; in orbit.
Shooting: in finger, after removal of wart; in hip.
Tearing pain: in r. supraorbital region; over eye into teeth; in brain; around eyes; from l. meatus auditorius outward; in l. half of face; in stomach and intestines; in abdomen; in urethra; in back and legs; in r. shoulder and joint and down arm; from elbow into axilla; from tips of fingers into shoulder; in hip; in l. foot; in knees and feet; in tibia; in heels; in joints.
Rending: in soles of feet; in muscles.
Drawing: in face; from pit of stomach around lower border of l. ribs; under l. hypochondrium; in legs; between scapulæ; from small of back to shoulders; in

Google

arms; from elbow into axilla; from tips of fingers into shoulder; from ovary into thigh; sciatica; in hip; in legs; in l. foot; in limbs; in joints.

Drawing stitching: from region of r. ovary into thigh.

Drawing pressing: in r. side of forehead; from forehead to eyes.

Burning: in r. supraorbital region; over eye into teeth; in forehead; erysipelatous in head; on head; in eyes; over orbit; in ulcer on cornea; on eyelids; at nostrils; in nose; in ulcer in r. ala nasi; of cheeks; in upper lip; in cancerous ulcers on face; pimples and vesicles on face; in gums; on tongue; in mouth; in throat; in epigastrium; in stomach; in bowels; in region of pylorus; in region of liver; in r. hypochondrium; in umbilical region, in anus and rectum; in intestines; in hemorrhoids; in bladder; in urethra; in glans penis; in ovaries; uterine region; in genitals; in mammæ; in cancer of breast; in larynx and trachea; in chest; in l. chest; about heart; in spine; in back; in finger; in ulcers on finger tips; in hip; in old ulcers on legs; in veins; in skin; in joints; in inflammatory swellings; in ulcers; in scirrhus; anthrax.

Smarting: at nostrils, eruptions on neck, shoulders and sides.

Soreness: of eyelids; in chest; in axilla; between fingers; in balls of toes.

Raw feeling: in chest.

Beating: in eyes.

Pressing: as from a load on brain; in forehead; in occiput; in forehead to eyes; in epigastrium and stomach; in both hypochonders; in sternum.

Tensive pressing pain: from forehead and temples to occiput and nape of neck; in spleen.

Pressive stitching in r. ovarian region.

Jerking: toothache; in gums; from tips of fingers into shoulder; through entire body; of limbs on falling asleep.

Pinching: in stomach and abdomen.

Digging: in groins.

Gnawing: in pit of stomach.

Corroding: in stomach and intestines.

Boiling: in leg (sciatica).

Writhing or twisting: in abdomen.

Cramp: in stomach; in intestines; in bowels; in chest; in heart; in thighs, calves and toes.

Constriction: of throat; of œsophagus; of stomach; in abdomen; in umbilical region; in l. groin; of chest.

Neuralgic pain: in brain; in eyes; on l. side of neck; in l. arm; in hip; in forearms and legs.

Digitized by Google

Rheumatic pains: from elbow up to shoulder; in r. elbow; in limbs.
Gouty pains: in limbs.
Sprained feeling: in neck.
Bruised feeling: over nose and in forehead; in swollen submaxillary glands; in small of back; between shoulders; in neck; in knee joint and thighs as if beaten.
Aching: in first lower bicuspid; in stomach and epigastrium, extending into chest; in chest after coughing; dull, in r. leg below knee; in all limbs.
Dull pain: in l. hypochondrium.
Tension: in both hypochonders; in abdomen; in ovary; about spleen; in epigastrium.
Tightness: of chest; above heart.
Fulness: in pit of stomach; after eating; in chest; in palms; in upper abdomen.
Heaviness: in head; in stomach; in chest; of limbs.
Weight: in head, forehead; as of stone in stomach.
Throbbing: in eyes over root of nose; in forehead; pain in head; in eyeball and around orbit; in roots of teeth; in uterine region; in whole body (heat of intermittent).
Twitching: in eyes; of facial muscles; in hips.
Trembling: in pit of stomach.
Wabbling or swashing in brain.
Crawling: in stomach; in limbs.
Tingling: in fingers.
Formication: along spine.
Stiffness: of neck; of knees and feet.
Numbness: of teeth; of feet; of thigh.
Weakness: in head; in pit of stomach; in back; in feet.
Weariness: in feet.
Exhausting pain: over l. eye.
Uneasiness: in lower limbs.
Paralytic feeling: in upper limbs.
Stunning sensation: headache.
Heat: in head; in eyes; in œsophagus; in stomach and epigastrium; over whole body; in chest.
Coldness: ice cold feeling in scalp; in stomach; in abdomen; in chest; in soles of feet; internally; in ulcers; in back; of body; of limbs.
Itching: in scalp; on head; of face; in upper lip; pimples and vesicles on face; of genitals; in chest; of thighs; of feet; of skin.

" **Tissues.** Hemorrhages bright red or black, fluid; blood coagulates slowly or not at all.

▮After great losses of blood from uterus. θMetritis.
▮After venesection or loss of blood otherwise. θHæmoptysis.

Google

Anæmia.
Chlorosis with trembling, frequent fainting, extreme debility.
Pyæmia.
‖Septic changes in blood, exanthemata, ecchymoses, petechiæ, decubitus. θTyphus.
‖Inflammation all around indurations on forearms, and spongeous excrescence on tip of thumb. θCancerous inoculation.
‖Burning in skin and veins. θHemorrhoids.
‖Burning in veins. θMetritis.
‖Phlebitis with typhoid symptoms.
Inflammatory swellings with burning pains.
Distended veins of feet.
‖‖Varices burn like fire, particularly at night.
‖Thrombosis.
‖Violent pains in region of groins, thrombosis of great veins of that region. θPyæmia.
‖‖Chronic inflammation of serous membranes, with copious, serous effusion.
Cold swelling of glands.
Scrofulous affections; indurated glands, etc.
Scrofulous inflammation.
‖‖Diseases of mucous membranes.
Acrid secretions.
‖Inflammation of periosteum; tearing in bones; diseases of bones.
‖Tearing, burning pain in limbs, particularly in joints, with pale swelling of affected parts, preventing sleep. θRheumatism.
‖Tearing, drawing pains in all joints of l. side, with swelling; joints of fingers and l. hand deformed, contracted, immovable. θRheumatism.
Rending, piercing pain in muscles.
Muscles and skin rigid.
‖Muscles relaxed. θRelapse of intermittent.
Elastic swellings.
‖‖Inflammatory swellings, with burning, lancinating pains.
‖Face, abdomen, and all limbs, especially legs, are dropsically swelled.
‖‖Ascites.
‖Dropsy in various parts, albumen in urine. θBright's disease.
‖Dropsy with unquenchable thirst.
‖Post-scarlatinal dropsy. θAscites.
Dropsy with turbid urine.
‖Dropsical swelling all over. θOvarian dropsy.

Google

Dropsical affections. θScarlatina.
General anasarca, ascites and hydrothorax, with albuminuria.
General anasarca, with waxlike skin and great debility.
General anasarca; skin pale, waxy or earth-colored; great thirst. θAlbuminuria.
Anasarca, followed by oily, sweetish-smelling sweat.
Rapid emaciation, great loss of flesh, with cold sweat; debility.
Emaciation and withering of affected parts.
Great emaciation, clay-colored face, blue margins around eyes, great weakness of all limbs, want of disposition to do anything and constant inclination to rest; diarrhœa; sometimes dry, hacking cough and night sweats. θAtrophy of children.
Rapid emaciation; atrophy of feet and finger tips.
Emaciation in children, with indigestion and diarrhœa, < in forenoon and after midnight; small, yellow, watery, offensive stools, with thirst for small quantities of water; afterwards dry, hacking cough and night sweats setting in.
Emaciation. θCancer of stomach. θChronic intestinal catarrh. θOvaritis. θScirrhus mammæ. θCoxalgia. θGonarthrocace. θTyphus.
Emaciation, with want of appetite, or rather aversion to food. θHorses.
Atrophy of children; marasmus; consumption.
A spongy excrescence on thumb, gets larger and larger, and pain more violent, so that it finally radiates to head. θCancerous inoculation.
Ulceration constantly extending in breadth.
Superficial ulcer, penetrating daily deeper, increasing in circumference, edges more and more everted.
Acrid, burning, corroding discharges, often extremely offensive.
Ulcers burn like fire; pain even during sleep; copious bloody pus or ichor; bases blue, black, or lardaceous; proud flesh; > from heat.
Ulcers spread in circumference rather than in depth.
Ulcers with deficient pus; with thin scurf and slight bleeding when bandaged.
Modifies the lancinating, burning pains; or, in ulceration, the offensive excoriating discharges. θScirrhus.
Retards decomposition (in those fatally poisoned).
Anthrax, burning like fire; cold, blue skin, dry as parchment, peeling off in large scales.
Sphacelus: parts look black, and burn like fire; fetid smell.

Google

‖‖Gangrena senilis sicca, with coldness, desire for more covering; > from warmth.
‖Gangrene: > from heat; (< from heat, *Secale*).
‖Gangrenous ulcers half an inch broad, causing insufferable pains, surrounded and partially covered with a gangrenous crust. θPeriostitis of os calcis.

45 **Touch. Passive Motion. Injuries.** Touch: scalp sensitive; gums sensitive; stomach sensitive; splenic region sore; abdomen painful.
Cannot lie on affected part: gout and rheumatism.
Rubbing: > sore pain in forehead.
Striking head: > toothache.
Desires to be covered: during fever.
Desires to be uncovered: during sweat.
Child > when carried about quickly.
‖‖Poisoning from decayed morbid or animal matter, by inoculation, inhalation, or swallowing.
‖‖Dissecting wounds.
‖After opening an abscess on heel, edges of wound mortified. θPeriostitis of os calcis.
‖After a bite into arm by a furious cat, pain ran up to shoulder; delirium; dry burning fever heat; inclination to vomit.
‖After a violent kick from a cow against r. ovary, aching shooting down into thigh; limb feels numb and lame; > in rest and at night; < from motion; < sitting bent or stooping; burning pain, fever, waxy face; emaciation; in place of catamenia, thin offensive ichor.

46 **Skin.** Oversensitiveness of skin.
‖Burning and itching. θScabies.
‖Burning itching, parts painful after scratching.
Itching aggravated by scratching.
‖Itching of skin, if scratched a sore, burning sensation is left. θEczema.
‖Itching of skin after suppressed eruption. θAmaurosis.
‖Skin pungent, hot and dry. θTyphus.
In sickness without fever, dryness of skin.
‖‖Parchment-like dryness of skin.
Skin dry, shrivelled, wrinkled.
Skin rough, dry and dirty looking.
Coldness and blueness of skin.
‖Child emaciated to a skeleton; skin white, dry, and like parchment. θScrofula.
‖‖Skin dry and scaly.
‖Disease began as a red spot, spread somewhat like a ringworm; covered with silvery scales; scalp covered with a thick crust. θA sort of lepra.
‖Branlike, dry, scaly eruptions, with itching and burning; the latter increased by scratching, followed by bleeding.

Google

Eruption like fish scales.
Skin peels off in large scales.
Scales continually falling off, destroying hair.
Dry, scaly eruption, sometimes with a fetid, purulent secretion. θEczema.
Skin pale. θApyrexia of intermittent.
Waxlike, dirty white skin. θIntermittent.
Skin very white and pasty-looking, later yellow, scaly.
Yellow skin. θTyphus.
Dark brown color of whole body.
Brownish-white spots on skin.
It suits patients with liver spots, whose skins have a brown, muddy, unwashed appearance on parts covered by clothes.
Blue spots, particularly on abdomen, genitals and whites of eyes.
Skin wrinkled, dry, cold, blue. θCholera Asiatica.
Dark blisters on fingers or toes, burning like fire; spreading, having dark edges.
Very painful black eruption.
Black vesicles causing burning pain.
Red scorbutic-looking eruption.
Eruption resembling red petechia, from the size of a flea-bite to that of a lentil.
On many places blood-filled blisters. θHemorrhoids.
Petechiæ, miliary eruption, or nettlerash. θDysentery.
Petechia, intermixed with scarlatina.
Black ecchymoses under skin in various places; swollen gums. θMorbus maculosus.
Petechiæ. θTyphus.
White, miliary eruption. θTyphus.
White rash. θFebris puerperalis.
Eczema; sore burning. θAfter scarlatina.
Roseola spots on chest and abdomen. θTyphus.
Acne simplex.
Furuncles.
Eruptions most frequently dry.
Fine itching eruption, like sand.
Eruption caused by unsuitable food, salt fish, salt meat.
Measles, persistent burning skin; rash too soon, or leaves suddenly; face pale, earthy, or bloated; thrush in mouth; black measles, with sudden sinking of strength and nervous restlessness.
Attacks like croup appearing instead of usual eruption of hives or nettlerash.
Urticaria, with much burning and restlessness; also after its recession. See croup.
Erysipelas; also about joints.

Google

‖‖Scarlatina, eruption delays, or suddenly pales, becomes livid, or intermixed with petechiæ; malignant sore throat; dropsy; or eruption well out, but with disproportionate weakness, mild delirium, vomiting, etc.
‖‖Post-scarlatinal dropsy; waxy skin; morbus Brightii.
Vesicular eruptions; itchlike pimples.
‖Inveterate cases of scabies.
Vesicles filled with blood on tips of fingers; ulcers, with crusts under nails.
‖On trunk and limbs blisters filled with extravasated blood. θHemorrhoids.
‖Pimples and vesicles. θCrusta lactea.
Large pale-red pustules, most painful at night.
‖‖Pimples burning violently, causing almost unendurable anguish.
Acuminated, whitish pimples, filled with watery fluid, commencing with itching and burning, especially on abdomen and hands, and between fingers.
‖Pustular eruptions. θScabies.
Small pustules, itchlike elevations break and exude a corroding fluid, which forms eating ulcers.
Red pustules, changing to ichorous, crusty, burning and spreading ulcers.
‖‖Variola, asthenic cases; pustules sink, areolæ grow livid, also in hemorrhagic and septic forms.
‖Psoriasis guttata.
‖Tettery, crustaceous eruption.
‖‖Herpetic eruption, itching and burning.
‖Herpes, with vesicles, and violent burning, especially at night; coverings like fish scales. θIchthyosis.
Suppurating herpes, with burning pains.
‖Delaying eruption. θScarlatina.
‖When scarlet rash leaves surface and goes to lungs and heart, ominous palpitation with stitches in epigastrium.
‖Eruption suddenly growing pale, livid. θScarlatina.
‖Too early and sudden disappearance of rash. θMeasles.
‖Pustules sink in and their areolæ grow livid. θSmallpox.
Acute eruptions disappear suddenly with rapid prostration.
‖After suppressed measles or scarlatina. θPericarditis.
‖After suppressed herpes circinatus. θPalpitation of heart.
Eruption on all parts of body except face and hands; began as a small rose-colored spot, spread rapidly, somewhat after fashion of a ringworm, and was soon covered with silvery scales which would sometimes rub off and be replaced; scalp covered with a thick crust;

Google

no sensation except when an oily substance was applied, when there was a slight itching; there were an hundred or more of these patches ranging from size of a pea to that of a silver dollar. θLepra; child æt. 7.

Burning ulcers.

Burning in ulcer compels scratching and rubbing, which make it worse.

Surface of whole ulcer burns and is very sensitive. θCancerous ulcer.

Painful sensitiveness of old ulcers.

Ulcers: cancerlike, particularly painful in morning, with burning in and at margin; with elevated edges; with thin, bloody pus; with fetid ichor and proud flesh; flat with a bluish-white base; even with surface, with copious discharge of a carrionlike odor; flat with copious discharge; on legs; old, with burning and stitching; with raised callous edges; with red, shining halo; with fetid, watery discharge or proud flesh; hard on edges, stinging, burning, spongy; with proud flesh; turning black; pus thin, ichorous (cancers); discharge black, coagulated blood; with thin scurf on surface and easily bleeding when dressed; with fetid ichor and proud flesh which soon become putrid, blue and green; small, ichorous over whole body, painfully sensitive; discharging thick, greenish, offensive ichor, violent itching and burning, < at night, > from warmth, < from cold air; phagedenic, constantly extending in breadth.

Ulcer on leg covered with grey crust and surrounded by an inflamed border.

Surface of ulcers unclean, blackish, stinking, exuding acrid ichor; thick edges covered with pustules, hard, border inflamed. θUlcers on legs.

Discharge of fetid pus. θGonarthrocace.

Cadaverous smell scents room. θTyphus.

Gangrene; sphacelus; cancerous ulcers; carbuncle.

Anthrax burning like fire.

Reddish bluish spots becoming gangrenous. θCarbuncle.

Gangrenous vesicles on serous swelling.

Gangrenous aspect of sores.

Panaritium assuming a gangrenous aspect.

Serpiginous ulcers.

Gangrenous condition of mucous membrane of nasal cavities. θSequel of measles.

Gangrenous sores; affected part hot, violent pain, inflammation around sore; around vesicles part is painful, stinging, tearing; a vesicle size of a filbert turned black.

Google

Painful gangrenous sores after an abscess on l. heel was opened.

Old scars burn.

Warts.

47 **Stages of Life, Constitution.** Hydrogenoid constitution.

Young, anæmic people. θScrofulous constitution.

Tubercular syphilitic skin diseases.

Woman, æt. 35, some years dating from suppression of an eruption on scalp, scaly and very itchy. θTrachoma with blepharitis.

Malarious air. θIntermittent.

A boy, æt. 3, after being out of humor for several days, inclined to sleep, loss of appetite and loose stools. θIntermittent.

Girl, æt. 15, exceedingly weak and exhausted from first, has to lie down all the time. θIntermittent.

Girl, æt. 18, strongly built. θTertian intermittent.

A young woman of sanguine temperament suffered with a tertian intermittent, had to swallow quinine and still the fever returned.

A multipara; nervous constitution, melancholic temperament, after maltreatment by Chin. sulph.; relapses from Fall, 1851, to March 17, 1852.

Man, æt. 40, lean, cachectic; drinking spirituous liquors. θQuotidian for a week.

Man, æt. 40, strong, large. θAfter catarrh, intermittent.

48 **Relations.** Antidotes to poisonous doses: milk, albumen, etc., should be given at first to envelop poison until antidote or emetic can be obtained. Induce vomiting by emetics of mustard, sulphate of zinc, or sulphate of copper, etc., but avoid tartar emetic, and other substances which strongly irritate mucous membrane of stomach. Lime-water is useful by diminishing solubility of arsenious acid. Demulcent drinks in large quantities are useful. To counteract that portion of arsenic not expelled from stomach, freshly prepared *ferric hydrate* or *magnesia* should be given in large quantities. Castor oil is best purgative to expel arsenous acid from intestines.

Chemical antidotes, such as: *animal charcoal, hydrated peroxide of iron, magnesia,* and *lime-water* may prove useful.

Opium is of service as a *dynamical* antidote. If stomach rejects it, administer in form of clysters. *Hepar* is a useful antidote.

Use brandy and stimulants when there is much depression and collapse.

If urine is suppressed give large quantities of water containing sweet spirits of nitre.

Google

Antidotes to potencies of arsenic: *Camphor.*, *Cinchon.*, *Chin. sulph.*, *Ferrum*, *Graphit.*, *Hepar*, *Iodine*, *Ipec.*, *Nux vom.*, *Sambuc.*, *Tabac.*, *Veratr.*

Arsenic antidotes: *Carb. veg.*, *Cinchon.*, *Ferrum*, *Graphit.*, *Hepar*, *Iodum*, *Ipec.*, *Laches.*, *Mercur.*, *Nux vom.*, *Sambuc.*, *Tabac.*, *Veratr.*

Arsenic has been found useful in ailments from: chewing tobacco, alcoholism, sea-bathing, sausage poisoning, dissection wounds, anthrax poison, *Strychnia*, *Phosphor.*, *Digit.*, *Plumbum*, *Iodine*, *Cinchon.*, *Ipec.*, *Carb. veg.*, *Graphit.*, *Laches.* and *Veratr.*

Arsenic has cured after failure of: *Agar.* (oscillation of eyeballs); after *Bellad.*, *Chamom*, *Cicut.* and *Calomel* (in inoculation during operation for scirrhus of mamma).

Arsenic has proved of use after: *Morphia* in scirrhus uteri.

Arsenic is suitable after: *Acon.*, *Arnic.*, *Bellad.*, *Cinchon.*, *China*, *Ipec.*, *Laches.*, *Veratr.*

Remedies useful after *Arsenic:* *Aran. diad.*, *Nux vom.*, *Iodum*, *Sulphur* (retinitis albuminurica, scrofulous ophthalmia, amaurosis, etc.).

Complements: *All. sat.*, *Carb. veg.*, *Phosphor.*

Arsen. alb. is most similar to *Arsen. met.*

Compare with: *Acon.* (arterial excitement, angina pectoris, etc.); *Apoc.* (dropsy from heart disease); *Arg. nitr.* (diarrhœa, dysentery); *Bellad.*, *Bismuth.* (hasty drinking, vomiting); *Calc. carb.* (delirium tremens); *Cann. ind.* (delirium); *Carb. veg.* (asthma, collapse); *Cinchon.*, (debility, sallow face, etc.); *Ferrum* (dropsy after abuse of quinine, but mucous membrane is pale); *Hyosc.* (suppression of urine); *Ipec.* (sick stomach, vomiting, asthma, etc.); *Kreosot.* (vomiting); *Laches.* (gangrene, erysipelas, etc.); *Lycop.* (cough, etc.); *Nux vom.* (alcoholism); *Phosphor.* (fatty degeneration, debility, etc.); *Pulsat.* (gastralgia, etc., from ice-cream, cake, etc.); *Rhus tox.* (typhoid); *Silic.* (suppressed foot sweat); *Tabac.* (deathly nausea, cold sweat); *Veratr.* (œsophagitis).

ARSENICUM HYDROGENISATUM.

Arsenetted Hydrogen. AsH_3.

We had no provings of this very important combination until 1847, when C.Hg. prepared and proved it. What is given in Allen's Encyclopedia are accidental poisonings, which mostly prove fatal. The only clinical experiments have been made by Dr. Drysdale, in 1849, in the treatment of Asiatic cholera. Laboring under the mistake that *Arsenicum* was a specific in cholera Asiatica, and supposing to get something more powerful in the arsenetted hydrogen, he altogether overlooked that, notwithstanding its sudden action, it would not correspond to subacute ailments, on account of the very slow development of its symptoms. Nearly all persons poisoned even by small doses died in the second week. The only one that recovered suffered for seven weeks. The only real cure on record is the one published by F. W. Payne, in the New England Medical Gazette.

The similarity of some cases of Asiatic cholera with the symptoms of the common arsenic is, according to Hahnemann's advice to Stapf, in 1813, regarding *Nux vom.* and *Ignat.*, too great. They are no antidotes.

The authorities quoted in Allen's Encyclopedia are: 1. Gehlen, Buchner, Tox., 1827; 2, R. Schindler, Græfe and Walther Journal, vol. xxvi, No. 4, p. 626; 3, Eisenmenger, Zeit. für Hom. Kl., No. 1, p. 103; 4, O'Reilly, Dublin Journal, 1842; 5, Ollivier, Gaz. d. Hop., 1863, to which we add the case of J. E. Bullock, died on 12th day, at Dr. Beard's (Gmelin, Chemie II. p. 690), and the reports of Dr. Richardson, in Calcutta, and some remarks of Berzelius, Bennecke and others.

Provers are marked, C.Hg., Hm., NN., F.K., Rh., Ea. In this instance we depart from our usual rule of omitting the names of the provers from the arrangement of symptoms (which would swell the book to too large a size) on account of the provings of *Arsenicum hydrogenisatum* not having been published.

The — signifies that the symptom is mentioned in another part of our arrangement.

' **Mind.** Almost unconscious.—R.Sch.
He lost his memory on evening of 6th day.—Br.
He afterwards can hardly remember transient pains; first day.—C.Hg.
His mental powers are unimpaired from the first.—Br.
Great exaltation of mind; it made him talk incessantly.—R.Sch.
Excited; wants to talk constantly. θYellow fever.
Loud complaining about unbearable pains in spine.—
Impeded in talking, he answers very slow.—
Disinclined to work.—Eisenmenger.
His occupation is disgusting to him.—F.K.
Lazy and shirks his work.—C.Hg.

Google

Full of care and fear about his complaint when he gets awake at night.—F.K.

Afraid of being alone, he thinks he will die.—F.K.

The fear of dying is gone on 3d day, notwithstanding all around him have doubts of his recovery.—R.Sch.

Anxiety, he believes his death is near, and despairs of being better (during vomiting), more courage afterwards, till next vomiting turn (six hours).—R.Sch.

Anxiety, with constriction of chest.—Chemists.

Anxiety, restlessness and great prostration of strength.—Robeson.

Anxious feeling before chill.—

Indifferent on hearing most important news; discouraged, changeable, his mental activity much impaired all week.—C.Hg.

Soporous and apathic; conjunctiva injected; urine red and scanty; 3d.—O'Reilly.

He is vexed, impatient, anxious about his complaint and full of fears.—F.K.

When thinking about his headache he feels it least; first day.—C.Hg.

Thinking of water irritates him, as if he would have to vomit; it nauseates him.—

ensorium. Vertigo, with oppression of chest.—Gmelin.

Vertigo, violent, on going up-stairs, so that he staggered against sides of stairs; was not noticed on going down-stairs, or on a level floor; three hours.—R.Sch.

Vertigo and general weakness.—O'Reilly.

Immediately after second inhalation, vertigo with faintness, followed by shuddering and a passage from bowels and a painless discharge of two ounces of blood from urethra.—Br.

Vertigo with nausea and vomiting.—

A swimming sensation in head and whole body.—F.K.

Vertigo with headache.—

A giddy oscillation with pressure in frontal sinuses.—

Head dull and benumbed, with pressure in forehead.—

Heaviness of head.—F.K.

During night a pressing, stupefying sensation in head, like from a load, with a tearing sensation; sleeplessness all night; applied cold bandages without effect; pain lessened towards morning.—R.Sch.

Stupefying feeling in head, as of a load there.—F. W. Payne.

Above forehead to r., a giddy sensation, with an inner twitching, like a painful quivering of muscles; soon after, same feeling in upper and lower jaw, going down in a straight line; later, same in r. shoulder.—C.Hg.

Google

[3] **Inner Head.** Pressure in r. frontal sinus, like with point of a little finger; later, same on left.

Pressure above eyebrows, with numbness, in afternoon.—F.K.

Violent pressive frontal headache, < at night, and with such excessive weakness, that he was obliged to lie in bed for several hours after eating; first and second days.—Eisenmenger.

Violent headache in forehead.—Ollivier.

Pressure in r. temple, with flabbiness in stomach; after two or three minutes same sensation in l. temple.—

Now and then a headache in two streaks, from behind to front, would be unbearable if continuing; > when thinking about it.—C.Hg.

Transient pains in head.—

Head and toothache, < in warmth.—C.Hg.

Pain in r. forehead and head.—C.Hg.

Pain in occiput, < on r. and when coughing.—

Headache in upper and back part of head when coughing.—

Towards evening headache on r. side, extending into throat near larynx.—F.K.

Pain in forehead with chill.—

Headache increased during chill.—Eisenmenger.

Violent pain in forehead and in sacrum.—Ollivier.

Pain in head and epigastrium, followed by vomiting of food.—Ollivier.

After 10 P.M. headache increasing, face more red; conjunctiva injected; pulse strong; speech impeded, answers slow.—Ollivier.

Dura mater unchanged, arachnoidea a little injected, and below it air bubbles; in substance of brain bloodless spots; no water in cavities.—Br.

[4] **Outer Head.** All hair on "deadened" parts become snowy white, and white brows formed a strange contrast to dark brown face.—R.Sch.

[5] **Sight and Eyes.** When falling asleep and again when waking up at night, a blue light before r. eye.—F.K.

Like a thread floating down before r. eye; later, a dimness.—F.K.

Eyes yellow, deeply sunken, with broad blue circles.—Sch.

Eyes sunken, lustreless; conjunctiva bulbi red.—Eisenmenger.

Conjunctiva reddened: with chill; in evening; again on third day.—

Heaviness of lids, have to be lifted up with fingers.—Rh.

A deadened feeling in region of eyebrows, brows turn snow white, forming a strange contrast with dark-colored face.—R.Sch.

Google

[7] **Smell and Nose.** Tickling up in nose, r. side, causes sneezing. See 15.
Indescribable sensation up in nose.—N.N.
Unpleasant crawling in nose causes sneezing.—R.Sch.
Violent sneezing, and such coldness of nose that it must be wrapped up in warm cloths.—R.Sch.
Nose as if deadened.—R.Sch.
Nose feels as if dried up.—F.K.
Bloody mucus comes from nose.—F.K.
Nose somewhat sore, with chill.—
Nose and lips somewhat excoriated.—Eisenmenger.

[8] **Upper Face.** Yellow eyes deep sunken, with broad blue circles.
Painfully distorted features.—Sch.
The face, which changed within a few hours to dark brown, was on fifth day still dark yellow, and features distorted as if from great inward suffering.—
The face copper-colored, or dark red, body greenish-yellow.—Br.
Yellowish face at beginning of chill.—
Face pale, lips discolored, can hardly walk; in three hours.—Ollivier.
Face earthy, dull, stupid features; skin dry; pulse 107; violent thirst, with a dry tongue; second day.—Ollivier.
Changed, sick face, sunken, cheeks yellowish; 5th day to 7th day.—F.K.
Looks disturbed and pale.—C.Hg.
The face looks old, and bears an expression of pain.—F. W. Payne.
In face chilly feeling, followed by a glow.—
Heat in face.—Bennecke.
Face red in evening.—
Sweat in large drops on face and whole head.—
Face œdematous; fifth till seventh day; < in evening.—Br.
Face greatly changed. θYellow fever.
Countenance wears an expression of extreme anxiety. θCollapse of cholera.

[9] **Lower Face.** In upper and lower jaw a very painful twitching; pain going from above downward in a straight line.—C.Hg.
Pain in maxillary joints, when first opening mouth, when pressed with finger, when putting tongue out.—F.K.
Lips colorless.—Ollivier.
Upper lip sore, with chill.—
Lips and tongue fuliginous, furred; 5th day.—Ollivier.

[11] **Teeth and Gums.** Toothache < in warmth.—
Sore bleeding gums around remaining root of r. upper incisor.—C.Hg.

Google

[11] **Taste and Tongue.** Taste bitter.—Eisenmenger and O'Reilly.

Bitter taste in mouth after four hours vomiting, with great prostration.—Br.

All sweet things taste too sweet.—F.K.

A peculiar indescribable taste in mouth.—C.Hg.

Very unpleasant sticky aftertaste, lasting for hours after eating, whole week.—C.Hg.

A contracting sensation of numbness, like a cold feeling, in half the tongue in front, r. side, with running together of saliva in mouth; weakness in abdomen and pinching; first day.—C.Hg.

Pricking on tip of tongue and tickling in nose, upper part, r. side, inducing sneezing; first day, evening.—C.Hg.

Tongue slimy, evenings.—

Tongue yellow.—Eisenmenger.

Yellowish, furred tongue, with chill.—

Tongue: bluish-white, thinly covered; slimy taste, no appetite; later, greyish-white, < on back part of tongue; still later, tongue white and soft.—F.K.

Tongue fuliginous, furred. See 9.

Tongue somewhat enlarged, on r. a deep irregular ulcer; next day a second nodular swelling of a darker color coming to a point.—Br.

Tongue dry, with violent thirst.

[12] **Inner Mouth.** Mouth hot and dry, with very little thirst; during heat.

Running together of saliva in mouth. See 11.

[13] **Throat.** Burning and constriction in throat, followed by irritability of stomach.—Robertson.

[14] **Appetite, Thirst. Desires, Aversions.** Less appetite on account of slimy taste in mouth; eats without relish.—F.K.

No appetite in evening, tongue slimy.—

Very little appetite whole second week.—

Appetite very poor.—Eisenmenger.

Loss of appetite.—F.W.Payne.

Hunger the first evening.—C.Hg.

Violent thirst in three hours.—Ollivier.

Violent thirst and a dry tongue.—

Much thirst second day, drank oatmeal gruel, milk and slimy drinks in large quantities.—Sch.

Great thirst fifth day, less next following night.—Br.

Thirst with afternoon fever.

Very little thirst with fever heat.

More sensitive to tobacco; 1st day.—C.Hg.

Smoking without relish; 8th day.—F.K.

Google

[15] **Eating and Drinking.** After eating, frontal headache.—
A few hours after dinner he had to lie down in bed on account of headache and weakness.—
Constant retching and vomiting after taking the least thing to eat or drink. θYellow fever.

[16] **Hiccough, Belching, Nausea and Vomiting.** Belching, with taste of food eaten; a slimy tongue and no appetite evenings; smoking tasteless.—F. K.
Eruptions.—Eisenmenger.
Spasmodic eructations of enormous quantities of tasteless gas from stomach, without relief of pain in abdomen, that causes him to moan for six hours.—Sch.
Uninterrupted belching up, spasmodically, of a large quantity of tasteless air, with great pain in abdomen. θYellow fever.
During spasmodic eructations without any interruption, an incredible large quantity of tasteless air is expelled from stomach without relieving pain in abomen.—R. Sch.
Hiccough following eructations; 3d day.—R. Sch.
Annoying hiccough first night, returning 3d day.—Br.
Tormenting hiccough, with an oversensitive epigastrium.—Br.
Very troublesome and annoying hiccough. θYellow fever.
Nausea.—Berzelius.
Nausea and vomiting, with vertigo and constriction of chest.—
Nausea. θYellow fever.
Complains about nausea and fulness in epigastrium; 6th day.—Br.
Incessant retching and vomiting.—Gehlen.
Retching and vomiting even after a single swallow, even a little water is followed by a return of most painful retching and vomiting.—Gehlen.
Vomits everything taken into stomach.—Gehlen.
Violent vomiting, could not retain slightest thing.—O'Reilly. Ollivier.
Vomiting of green, bitter mucus with the colic.—Sch.
Vomiting of mucous, yellow, green and bitter fluid. θYellow fever.
Copious green vomiting, commencing in evening of first day and lasting all night; every hour between time a soporous state; on second day greenish vomiting every two hours, lessening on 3d and 4th day.—Br.
Vomits large masses.—Br.
Before midnight twice vomiting, with bellyache and greatest anxiety.—R. Sch.

Digitized by Google

Vomiting with pain in loins.—Br.

[17] **Scrobiculum and Stomach.** Irritability of stomach, vomiting liquid, first bilious and afterwards coffee-colored, with a burning pain.—Robertson.

With pressure in stomach: very little appetite; bitter taste; belching; nausea and obstinate constipation.—Eisenmenger.

With dead feeling in limbs five hours after inhalation, violent cutting pain in region of stomach and below it, it compels him to moan constantly.—R.Sch.

A weary feeling in stomach, with pressure in temples.—

Stomach empty, two inflamed spots in large curvature, where mucous membrane could very easily be peeled off. Post-mortem.—Br.

Pain in epigastrium and vomiting of food.—

Very sensititive epigastrium and tormenting hiccough; 2d day.—Br.

Pressure in epigastric region during chill.—Eisenmenger.

Pressure of hand causes dull pain in epigastrium.—O'Reilly.

Pains in epigastrium.—Ollivier.

[18] **Hypochondria.** Liver painful to pressure; after three or four hours.—Ollivier.

Liver was congested, without alteration of cells.—Ollivier.

Liver deep indigo blue, not enlarged, gall bladder full to bursting.—Br.

Softening of spleen.—Ollivier.

[19] **Abdomen.** A slight pressure in abdomen; 5th day.—R.Sch.

Pressing pain below diaphragm, on l. side of abdomen; first day.—C.Hg.

Violent cutting in region of navel, at intervals.—R. Sch.

Colic with vomiting, before midnight.

Pains in various parts of abdomen, < l. side, followed by great weaknesss, most in lower limbs; 1st day.—C.Hg.

Sensation of weakness in abdomen and pinching stitches.

An undecided but exceedingly unpleasant sensation, as from a stone lying in abdomen, as if all had changed into a stone; he begged for a laxative, but neither injections nor repeated stools (after *Magn. sulph.*) made any change, belching did not relieve.—Sch.

Glowing heat in abdomen, with cold limbs.—Sch.

Burning pain through whole alimentary canal.—Robertson.

Abdomen burning, outside; cold feet. θYellow fever.

A gurgling noise in l. side of abdomen from incarcerated flatus, causing colicky pain, threatening to become severe; he has to lie on belly, or bent together, and wants to be well covered; very sensitive to cold; morning, 3 A.M.; 2d day.—C.Hg.

Digitized by Google

Distension of abdomen during chills.—Eisenmenger.
Gaseous distension of abdomen. Post-mortem.—Br.
Integuments of abdomen look greenish, most on sides.—Br.
Violent itching below last rib on extreme l.; 3d day.—C.Hg.

[20] **Stool and Rectum.** Weak sensation, as if relaxed, and as if diarrhœa followed, the whole would fall out, evening; 1st day.—C.Hg.
Urging as to diarrhœa; noon, 2d day.—C.Hg.
Less wind passed after urination in morning; 2d day.—C.Hg.
Copious passage of wind and looseness; after *Magn. sulph.* did not relieve.—Sch.
Several openings the 4th day.—Sch.
Soft stool at 4 P.M.; 2d day.—C.Hg.
Frequent bilious stools.—Br.
The usual morning stool is omitted and appears in afternoon; the same 6th, 7th and 8th days.—F.K.
Two copious, offensive stools, 5 P.M., followed by a painless evacuation of half a pound of red urine, containg real blood-corpuscles; 1st day.—Ollivier.
The first morning stool on 10th day, full of holes like lava.—F.K.
*Obstinate constipation.—Eisenmenger.
‖Constipation, with a feeling of heaviness and stiffness, like a weight in abdomen.—F.W.Payne.
Constipation with fever.—Robertson.
Stool, with vertigo, weakness and crawling.—Br.
Thumping, knocking pains in region of perineum, near anus; forenoon, 2d day.—C.Hg.
Frequent flying pains in perineum, to anus, or, upward in anterior wall of rectum; first week.—C.Hg.

[21] **Urinary Organs.** Unpleasant sensation of pressure in region of kidneys, rapidly increasing, extending over back to between shoulders, not violent until night; it continued without interruption, and increasing, with urging to urinate; urine dark red, and a thick coagulum of pure blood is formed; next day color the same, but no coagulum, pain in kidneys equally violent; 3d day pain less violent; color more bright, still bloody; the same the 4th day; on 6th day without bloody color.—R.Sch.
‖Pressure in kidneys, extending to shoulder blades, with pain in region of kidneys during desire to urinate. θYellow fever.

---

* Called "obstinate" by the Old School, which is transferring a quality of their own mind to the colon.

Google

Kidneys enlarged, with very marked injection, most in tubular substance; cells of both substances granulated. —Ollivier.

Kidneys deep indigo blue through whole substance, left enlarged similar to spleen, right smaller.—Br.

Scanty, foaming urine in morning, depositing a sediment; 2d day.—C.Hg.

From 1st to 8th day less urine; on 9th more, but brown, brown, with a suspended cloud.—F.K.

No urination 2d day.—Ollivier.

The urine is suppressed; from 4 P.M. no urine till next morning; 1st day.—C.Hg.

No urine 1st night; very little next night; 3d to 6th day. —Br.

Very small quantities of urine, deposits some blood; 6th day.

Bladder empty, no change.—Br.

Urine very dark, orange-colored; 5th day.—F.K.

Inky urine; on boiling and adding nitric acid a reddish brown coagulum resembling that which we obtain from boiling blood is deposited.—J.Vogel.

Urine not so frequent, but more profuse evening; 6th day.—F.K.

During night no urine; in morning dark, reddish brown, with red gelatinous and bluish-red sediment; 8th day. —F.K.

Afternoon, dark urine, with a rose-colored deposit on walls of utensil; 9th day.—F.K.

Urine like porter, with a cloudy deposit; 10th day.—F.K.

Urine darker on 13th day.—F.K.

Urine red, scanty; 3d day.

Urine dark, reddish-black; formed a thick clot of blood in vessel.—Sch.

Soon a painless discharge of two ounces of blood through urethra; repeated with shuddering.—Br.

Hæmaturia; passed two ounces of blood through urethra. O'Reilly.

Four tablespoonfuls of blood from urethra; 2d day.—Br.

Four pints of bloody urine, containing arsenic.—Robertson.

Discharge of inky urine.—Bennecke.

Urine dark, blackish-red, with pure blood. *0*Yellow fever.

Discharge at times of large quantities of pale urine.— F.W.Payne.

[22] **Male Sexual Organs.** Sexual irritation on glans penis, almost irresistible with morning erection; second day; it continues after rising and passing water; all first week.—C.Hg.

Google

Deep in pelvis when crouching down, an unbearable sensation of numbness, with a waving as if it would break, then a horrible feeling, but of short duration; forenoon, 11th day.—C.Hg.

A pain in symphysis pubis, no redness there, but it is exceedingly sensitive to touch, also when coughing or bending forward; sixteenth day.—F.K.

Violent pricking pain on a small spot over r. groin, often repeated, like a throbbing; first day.—C.Hg.

Unbearable pain in both groins, exactly where spermatic cords emerge, as if everything would fall or slip out there; exceedingly sensitive in standing; > when sitting; still more when pressing on it with both hands; afternoon 10th day; same feeling returns on 12th day at 2 P.M.—C.Hg.

Pain in left side of penis; 1st day.—C.Hg.

In third week whole foreskin and glans are covered with little blisters containing pus; they burst and form very small round flat ulcers; alone on outer surface of foreskin he counted sixty-five, they healed after ten to twelve days.—R.Sch.*

[25] **Voice and Larynx. Trachea and Bronchia.** Squeaking voice; immediately after inhalation.—Br.

Whispering voice.—O'Reilly.

The voice remains whispering and gets very weak in evening.—Br.

Voice has lost its timbre, sounds as if broken, but not hoarse; 5th day.—F.K.

Pain near larynx when speaking, right side; 8th day.—F.K.

A drawing sensation from head towards larynx, right side.

With a slight hemming or hawking he raises with great ease a soft, round and smooth lump of phlegm size of a filbert, when awaking at 3 A.M.; 2d day.—C.Hg.

His customary hawking up of phlegm ceases; 6th day.—F.K.

[26] **Respiration.** Ammoniacal odor of breath; 5th to 7th day.—Br.

Rapid breathing.

Constriction of chest: with nausea; with chill.

Want of breath; gasping for air.

Breathing relieved after *Sinapism* and *Amm. acet.*; after three or four hours.—Ollivier.

Oppression of chest during chill.—Eisenmenger.

[27] **Cough.** In forenoon frequent coughing, with a pain in perineum; 3d day.—F.K.

---

* Was the young man syphilitic? *Ars. met.* brings out dormant syphilis.—C.Hg.

Google

When he coughs in evening headache in upper and back part of head; 6th day.—F.K.

A little cough very often, without inner irritation, as from a pressure over chest; after eating ice-cream, at first better (also whole chest), but afterwards worse; 6th day.—F.K.

Cough increases from 9 to 10 A.M., most while conversing in room; 7th day.—F.K.

In evening cough comes now from depths of chest, is looser; sputa relieved; 7th day.—F.K.

Cough comes from front upper part of chest; 9th day.—F.K.

Sweats when coughing; 11th day.—F.K.

A sensation as if whole thorax was laced tightly, with rapid breathing, without cough or rattling of phlegm; after three hours.—Ollivier.

[24] **Inner Chest and Lungs.** Pressure in region above breast-bone, all across, on 4th day; worse on 5th.—F.K.

A painful pressure in upper part of chest, where it commences to become sore to pressure, disappears when perspiring; 7th day.—F.K.

Pressure over whole chest, with great anxiety; 7th day; pressure is lessened by gaping; 9th day.—F.K.

Pain in chest is gone in morning, returns towards 11 A.M.; 11th day.—F.K.

Pressure over chest produces a slight cough.—

Pain across chest, like a beating in r. side, near middle, drawing towards left.—R.H.

A glowing sensation in chest after chilly feeling.—

Back part of lungs are congested; 2d day.—Ollivier.

Lungs collapsed, containing very little air, otherwise normal.—Br.

In cavities of pleura two pints of reddish-brown, odorless fluid.—Br.

[25] **Heart, Pulse and Circulation.** A cutting pain near last left ribs.

A knocking, thumping pain in heart, deep in chest, extends towards r. side; forenoon, 2d day.—C.Hg.

Palpitation; 7th day.—Br.

Heart pale, relaxed, empty of blood; only a little fluid in pericardium.—Br.

Pulse small and rapid.—Eisenmenger.

Pulse 90, weak.—O'Reilly.

Fever with a full, hard, frequent pulse.—Robertson.

Pulse strong and frequent.—

Pulse 107; 2d day.—

‖Pulse frequent. θYellow fever.

Pulse 90 in morning, 128 at 10 o'clock, very small and soft; 7th day.—F.K.

After meals pulse is more full and more frequent; 7th day.—F.K.

Pulse intermits when awaking in night, with anxiety and thoughts of death; 7th day.—F.K.

Pulse 60 in morning, and irregular; in forenoon 52; 8th day.—F.K.

In evening pulse 56, the same after eating; later 60, and tensive, as if turned or twisted; some beats retarded for more than a second, followed by a few quicker beats; 8th day.—F.K.

Pulse 64, every other beat stronger, like pendulum of a clock placed obliquely; 8th day.—F. K.

Pulse 64, limping in morning of 9th day; at noon, 112, limping till 1 P.M., and softer; 3 P.M., limping again and intermitting; changing from quicker to slower.—F.K.

Pulse 76 in morning; at 11 A.M., 84 to 88; 11th day.—F.K.

Pulse more frequent after meal at noon; 14th day.—F.K.

Pulse very frequent and small with chill.—

Pulse 110 after Sinapism and *Ammon. acet.*—Ollivier.

Pulse 90, but weak, after four hours; small, 92, lessened temperature of skin next day; 80, strong, with sensitive epigastrium, 2d day; 76, and painless epigastrium; later, same day; 76, 3d day; 80, 5th day; same, 6th day; 102 in morning, 7th day; 76 at noon; later, 80; death next morning.—Br.

The breathing very frequent, and pulse imperceptible before death.—

Pulse imperceptible after increased respiration; becoming unconscious; evening 5th day, death.—Ollivier.

Complete cessation of pulse.—R.Sch.

‖Pulse quite imperceptible. θCollapse in cholera.

[50] **Outer Chest.** Rheumatic pains over breast bone lessen when perspiring; 2d day.—F.K.

Pain in middle of sternum; < when he walks about; 10th day.—F.K.

Pain in chest, in bones and intercostal muscles; at same time pain in arm.

Want of breath, and gasping for air.—Ea.

In l. side of chest, near nipple, as if raw and sore, with pressive pain; 4th day.—F.K.

The pain in chest is concentrated in l. side, above nipple; 9th day.—F.K.

A pressure over chest, a few inches below upper end of breast bone, with a pressure on breast bone; 6th day.—F.K.

Sore, raw feeling over whole chest; 8th day.—F.K.

Google

Chest hurts when coughing, breathing, and when pressed; 8th day.—F.K.

A crawling, as if warm drops were running over chest, stopped by pressing with finger; 11th day.—F.K.

[31] **Neck and Back.** Tearing pain in neck during chill.—Eisenmenger.

Feverish in neck, forenoon; 13th day.—F.K.

Stiffness in neck and between shoulders, begins in morning; > when going out or moving about; 7th and 8th day.—C.Hg.

Pain as if something was sticking below r. shoulder blade; increased at first, and disappeared after three hours' sleep.—C.Hg.

Backache like on first days, returned towards evening on 7th day, not so violent, but much harder to bear; increased next evening and in night, causing loud lamentations; sitting relieves it a little, but he is too weak to sit long; relieved towards evening of 9th day by application of cloths dipped in warm milk.—R.Sch.

Crawling over shoulders and back.—

A glow in back after chilliness.—

Shuddering over single parts of back.—

Pain in region of kidneys became exceedingly severe, with urging to urinate.—Sch.

An unpleasant, pressive feeling in region of kidney, which rapidly increased and spread up back to between shoulders; after four hours.—Sch.

Pressure between shoulders.—R.Sch.

Very violent pain in lumbar region.—Ollivier.

Slight pain in lumbar region.—O'Reilly.

Some pains in loins when "falling asleep" of limbs passed away.—Br.

Pain in loins with vomiting.—Br.

Behind and above r. hip, on a small spot near spine, a very great pain; < in walking; has to sit down.—C.Hg.

Backache in small of back, as after having taken cold; evening, 2d day.—F.K.

Violent pains in sacrum, after three hours.

A dull pain on upper part of sacrum, on a place size of a hand, interferes for one or two minutes with his breathing; it swells and feels as if something was filled up; with increased pain; 8th day.—F.K.

[32] **Upper Limbs.** Sore aching spot on r. acromion; 8th day.—F.K.

Pain from tip of shoulder down towards point of elbow; 9th day.—F.K.

Painful twitching in shoulders.

Google

A warm, almost burning cut, like with a small knife, in r. upper arm, from near shoulder down towards elbow; soon after inhalation.—F.K.
Flying stitches in arms.—R.Sch.
Tearing pain and stitches in upper limbs, during chill.—Eisenmenger.
In elbows and upper arms same pain as in knee.—R.Sch.
Laming pain in both elbows, more in r.; 9th day.—F.K.
Pains in elbows and upper arms; in five hours.—Sch.
Feeling of deadness of hands extending to middle of forearms.—R.Sch.
Arms and hands very tired, as if burning.
Flying pains in r. hand and fingers; 2d day.—C.Hg.
Swollen veins on hands; 7th day.—F.K.
Middle finger, l. and inner side and second joint red and swollen; 14th day; gone 15th day.—F.K.
Itching on first joint of l. middle finger, inner side, on a small spot, where a very small blister is; after 1st week.—C.Hg.

[33] **Lower Limbs.** Slight thumping pain on a small spot behind r. hip bone.—C.Hg.
Pimple on nates, impedes walking; 15th day.—F.K.
Quivering in l. thigh, inner side, towards front, in a short line, evening, till night; 9th day; again on 10th day, in afternoon.—F.K.
Pain on inner side of both thighs, most r. side, whence it extends to near anus; 12th day.—F.K.
Pain on inner side of both thighs, mostly towards os pelvis; 15th day.—F.K.
Violent itching on l. thigh, on inner side, a few inches above knee; 7th day.—C.Hg.
After getting up, when placing his legs higher than body, a violent pain above l. knee; soreness in muscles or tendons, under skin; > when moving about; evening, 1st day; next day it still pains, but more below knee, with a lame feeling when kneeling; his limbs give way going up-stairs; noon, 2d day.—C.Hg.
Above r. patella a pain on pressure, also in bend of knee; increases after lying still a good while; evening, 16th day.—F.K.
On getting up and beginning to move, after lying especially in a somewhat fatiguing position, a pain in l. knee, as if it was inwardly crushed, but not in bones; it increases to a kind of burning, and only disappears after continuing to move; 8th to 10th day.—C.Hg.
Rheumatic, gouty, tearing pain in knee joints.—R. Sch.
Pains in knees during chill.—R.Sch.
Pain in hollow of l. knee, when rising from a seat, and in beginning of walking; 3d day.—F.K.

Google

Sensation in bend of l. knee as if beaten; a cold and burning pain; < on beginning to move, especially after lying; whole 1st week.—C.Hg.
In bones of leg below r. knee, a throbbing pain, drawing downward.—
Pains in lower limbs, especially r. side, lasting two hours.—Br.
Flying stitches in lower limbs.—R.Sch.
Pain in lower limbs, more in r.—O'Reilly.
Flying, cutting pains in l. leg, from shin to ankle; at same time on last l. ribs; 2d day.—C.Hg.
Pain in l. leg, after sitting; < going down-stairs, with giving way of knees; 2d day.—C.Hg.
Lower limbs become rigid later than arms.—Br.
Feet get numb, as if dead, up to knees.—R.Sch.
Weakness, most in lower limbs.—Z.
Left foot hurts again when rising, most towards external margin; 12th day.—F.K.
Feet, usually colder than rest of body, are now warmer; 3d day.—F.K.
Sweat all over, but not on r. foot.—F.K.
Pain in r. heel.—
Flying pains in feet.
Pain in l. foot joint when walking; 3d day.—F.K.
The l. foot joint he cannot move, even when lying in bed; 8th day.—F.K.
Cannot move foot, and is unable to get up; 9th day.—F.K.
Great pain in l. foot, from one ankle bone to the other, passing across above joint, < on a small spot of dorsum of foot; a red yellow streak on top of foot, near toes; from fourth to second toe; pain is awful, turns him pale; most painful in moving of foot joint; 1st day.—F.K.
A red streak on ankle joint, where pain was day before; 11th day.—F.K.
In l. foot, most on sole, pains prevent stepping on it; < in motion, > in bed; pains in middle, as if contracted lengthways; when stepping on it a painful stretch; 3d day; much < the 4th.—F.K.
Pain in l. sole prevents walking in forenoon; less in afternoon; < in evening, especially after rising from a seat; all pains in sole, heel and whole foot, extend upward; 6th day.—F.K.
Pains in l. sole, foot and knee, < in evening; 6th day.—F.K.
Pain from sole towards middle toe; very much < when first toe joints are bent; 8th day.—F.K.
Tickling in hollow of l. foot; 10th day.—F.K.
Pain on pressure of balls of toes, sore and thrilling, most

Google

in ball of middle toe; pain extends along all toes; 8th day.—F.K.

With every attempt to step on feet all toes hurt, as if in tendons up to foot joint; 8th day.—F.K.

The once chilblained ball of r. big toe gets more painful; 16th day.—F.K.

Thumping pain in r. big toe increasing in warmth.—C.Hg.

Left middle toe exceedingly painful when touched, most underneath, on ball and in first joint, and from there to big toe and inside ankle; 8th day.—F.K.

Sensation as if a splinter lodged under nail of l. middle toe; 9th to 10th day.—F.K.

[31] **Limbs in General.** Soon after inhalation pain in lower limbs, most r. side, with a numbness, first in upper limbs, then in lower, followed by a crawling sensation, for two hours.—Br.

Very sensitive, gouty, tearing pains in upper arms, elbows and knee joints.—Br.

Throbbing pains in bones of l. upper arm, extending downward, three and five times every hour; same in bones of r. lower limb below knee; also extending downward.—Br. C.Hg.

Stitches in arms and feet.—R.Sch.

Weakness in limbs.—Bennecke.

Arms get cold and stiff first, then lower limbs.—Br.

Coldness of limbs.—R.Sch. Ollivier.

Coldness of limbs.—F. W. Payne.

Unpleasant crawling in hands and feet, and flying stitches in upper and lower limbs; 7th day.—R.Sch.

[33] **Rest, Position, Motion.** Tired in hands and arms, after moderate exertion (carrying a child), they burn from weakness; 1st day.—C.Hg.

Very little inclined to do any work—Eisenmenger.

Difficult walking; l. foot painful.

Walking up-stairs, vertigo.

Motion difficult.—Ollivier; l. foot <;

While walking, chilly.

All pains increase during motion; in rest they also first increase, but get better afterwards.—F.K.

Weak even when sitting.—C.Hg.

Such a weakness that he cannot sit; on 3d day able to do a few steps; still very weak 7th day; somewhat better 10th day and following.—R.Sch.

Getting up he feels so weak and chilly that he is obliged to lie down again; evening, 8th day.—F.K.

Such a sensation of weakness with headache and vertigo, that he has to lie down; 3d day.—

Colic better lying on belly, or better from bending together.—

Google

[36] **Nerves.** Restlessness and anxiety.—Robertson.
The greatest bodily restlessness; 5th day.—Br.
Prostration with anxiety; vertigo, nausea and troublesome costiveness.—Berzelius.
Suddenly after inhalation he feels himself poisoned; an indescribable exhaustion and nausea overwhelm him; hardly able to take few steps to reach next room; incessant retching and vomiting followed; he could not take any medicine, gruel or soup, nor a swallow of water without a painful return of retching and vomiting; even thinking of water excited vomiting; death on 9th day.—Gehlen.
Sensation of deadness from hands upward to middle of forearm, and feet to knees, then nose and region of eyebrows, with cessation of pulse; every sign of life ceased in these parts, but the ability to move them remained; after five hours.—R.Sch.
Heat in face; weakness in all limbs; disposed to faint and tremble, soon passing off, but leaving a sensation of weakness and exhaustion; immediately after inhalation.—Vogel.
The whole nervous system was immediately affected, and ultimately his lungs; died in ten days.—Bullock; by Beard.
Disposed to fainting.—Bennecke.
Faintness with vertigo, followed by shuddering.—Br.
Great fatigue and weakness.—Eisenmenger.
Sudden indescribable weakness and nausea.—Gehlen.
Very great weakness, and bitter taste in mouth.—Br.
Complained about his great weakness, and ascribed it to continual vomiting.—Br.
Great weakness, most in lower limbs.—
Unusual weakness in evening, as weak as a rag, ready to drop; 1st day.—C.Hg.
Weakness and crawls.—Br.
Weariness and exhaustion with chill.—
Arms become torpid and stiff first, afterwards lower limbs, with crawling sensation, lasting two hours, soon after inhalation.—Br.
Now and then a very peculiar weakness, and during it all pains cease; 1st and following days.—C.Hg.
Weakness without any pain; 2d day.—Br.
After dinner weakness and no pains all afternoon and evening; 2d day.—C.Hg.
He feels as if he was recovering from a very long illness, a pleasant sensation; 11th day.—F.K.
Great prostration and general malaise.—F.W.Payne.

[37] **Sleep.** Gaping and unpleasant feeling with chilliness.—

Google

So drowsy that he can hardly open his eyes.—Rh.
Drowsiness from 5th to 7th day.—
Sopor between attacks of vomiting.—Br.
Very pleasant, poetical dreams.—C.Hg.
Dreams as if he was praying in a public meeting, with great applause; 7th day.—F.K.
Dreams towards morning from people going and arriving; 7th day.—F.K.
Moaning in sleep; 16th day.—F.K.
Sleep interrupted by headache.—R.Sch.
Slightest noise interrupts his sleep.—R.Sch.
Disturbed by wind colic towards morning.—
Suddenly awakened by two strong concussive shocks after midnight; 7th day.—F.K.
Frequent starting while falling asleep.—
As soon as he falls asleep he perspires; 15th day.—F.K.
Restless night, from 5th to 6th day.—Br.
Restless sleep, till after midnight.—
Wakens every hour, always before clock strikes; from 9th to 10th day.—F.K.
For a long while he cannot get to sleep; he feels as if he had to move about; 6th day.—F.K.
Sleeplessness.—Sch. R.Sch.
‖Total sleeplessness. #Yellow fever.
‖Sleeplessness.—F.W.Payne. (A chronic case. See 47.)

[38] **Time.** Worse at night: frontal headache; pain in lower limbs.—
After midnight: sleep easy.—
Getting awake in morning, weak and depressed.—
On awaking: weak, etc.—
Weak and prostrated on waking.—Eisenmenger.
Tired and depressed when waking in morning.—
Very exhausted: morning in bed; 8th day.—F.K.
At noon and midnight he always feels the worst; 10th day.—F.K.
Noon: as if diarrhœa would come on.
Afternoon, 3 o'clock: headaches increase chills and fever every day; chill; pain in l. foot >.—
His feeling unwell increases steadily in afternoon; 4th day.—F.K.
Dying commences: 4 o'clock P.M., six times 24 hours after inhalation.—Br.
Evening, 5 o'clock: offensive stools.—
Evening: headache; vomiting; less warmth of skin; weakness of rectum; pain in l. foot <; all pain is gone out of r. foot; 8th day.—F.K.

[39] **Temperature and Weather.** After drinking cold water; later, after warm drinks, he could bring on a copious sweat.—R.Sch.

Google

Warmth lessens, cold increases symptoms.—F.K.
Warmth: toothache <; pain in big toe <.
If not covered in evening he feels chilly; 8th day.—F.K.
Undressing, 10 P.M., chill violent.—
Coming in a cool room he feels very chilly; 3d day.—F.K.
Very sensitive to cold.
After moving in open air always <.—
After walking in open air, very unwell.—Eisenmenger.
During a walk in open air, chilly.—Eisenmenger.
Before a thunderstorm, many old pains appear again.—F.K.
Sensitive to cold weather.—
Damp air increases his malaise very much.—Eisenmenger.
Damp air always aggravates.—
General chilliness on slight exposure, or change of temperature.—F.W.Paine.

[40] **Fever.** Temperature diminished.—O'Reilly. Chill.—O'Reilly.
After faintiness, giddiness and shuddering.—Br.
Chilliness over whole body; after four hours.—Sch.
Chilliness became very violent on undressing, at 10 P.M.; after five hours.—Sch.
Cold limbs with heat in abdomen.—R.Sch.
Nose cold, had to wrap in hot cloths.—R.Sch.
Chilly while walking.—Eisenmenger.
With attempt at rising he feels chilly, from weakness; 8th day.—F.K.
Attacks of shuddering or creeps in evening, short, violent, and only on parts of back; 1st day.—C.Hg.
Evening frequent creeps, with coldness running down body; glowing heat about chest, back and face: later, general sweat, only not on r. foot, continues all night, large drops run over his face and down head; with it pulse limping; 8th day.—F.K.
During chill: headache; pressure in epigastric region; distension of abdomen; oppression of chest; tearing in neck; tearing in upper limbs.—
With pressing pain from region of kidneys up to region between shoulders, a chill over whole body, with gouty tearing pains in knee joints and cold limbs; four hours after inhalation; half an hour later, when undressing, chill more violent than any he ever had; pains in knees, upper arms and elbows, increasing to great violence after chill; five hours after inhalation.—R.Sch.
Severe chill on 3d day, 3 P.M., time when headache was usually <, beginning with yawning, discomfort, anxiety and chilliness, accompanied by oppression of chest,

Google

pain in neck, drawing in upper limbs; increased frontal headache; after a two hours' chill moderate heat, lasting till 8 P.M., with a hot, dry mouth, but little thirst; after heat very slight sweat, during which he falls asleep; at first frequent startings, during unrefreshing sleep; after midnight quiet.—Eisenmenger.

In afternoon, 3 o'clock, when headache had been worst, on 1st and 2d day, on 3d day he has gaping, malaise, anxiety and chilliness, gradually growing into strong chill with constriction of chest, pain in neck, drawing in upper limbs, and pain in forehead; after chill had lasted two hours a moderate heat followed, lasting until 8 P.M.; mouth hot and dry; moderate thirst; after heat some sweat; he falls asleep, but starts often; after midnight quiet sleep, but on waking, weary, and as if beaten; 3d day.—Eisenmenger.

After great chill and fever on 3d day, only chilly on 4th, and on 5th strong again, till on 3d and henceforth, every afternoon at 3 o'clock.

With beginning of chill at 3 P.M. sallow, yellowish face; eyes sunken, listless, conjunctiva reddened; nose and upper lip excoriated; tongue furred, yellow; pulse frequent and small, at same time increased headache; constriction of chest; tearing pain in nape of neck and upper limbs; pressure in region of tonsils; distension of abdomen: great weariness and weakness.—

Evening, 5 o'clock: fever heat; half-past 7 o'clock; sweat, followed by sleep; 7th day.—Eisenmenger.

A slight fever paroxysm on 2d day.—Eisenmenger.

A paroxysm of fever on 5th day more severe than on 3d, after which it returned every day. Cured by *Nux vom.*; renewed on a subsequent occasion on inhaling same gas.—Eisenmenger.

Fever commenced at 12 noon; pulse up to 90; did not affect head; thirst in afternoon; sensitive to cold weather; after supper pulse rose from 90 to 120; 6th day.—F.K.

After writing awhile flying heat up towards head: pulse about 120; every 50 to 60 beats one omits, gradually oftener, in evening every 5th to 6th beat, sometimes every 3d; 7th day.—F.K.

In morning when attempting to step down, heat; in evening cold feeling; 10th day.—F.K.

Slight fever, with great weakness; 5th day.—Br.

Glowing heat in abdomen and cold limbs all night, with pain in kidneys and urinating blood.—R.Sch.

Much heat and burning in different parts of body, particularly over renal region.—F.W.Payne.

Google

General warm sweat after midnight, with a soft pulse, 80 to the minute, omitting 3, 4 times; 7th day.—F.K.
Attacks of night sweat; from 7th to 8th day; continually in morning hours.—F.K.
Night sweats; 13th day.—F.K.
Night sweat in short attack; 5th day.—F.K.
General warm sweat in night, in large drops.—
Sweat relieves deadness in limbs.—
‖Surface of body bedewed with moisture, with unnatural warm feel of such cases. θCollapse of cholera.

41 **Attacks, Periodicity.** In attacks, as if beaten all over.; 7th day.—F.K.
On 7th and 8th day a renewed appearance of many former symptoms and new symptoms, and a higher development of the morbid medical affection.—
Pains return; typical headache; after a slight improvement on 4th day, < on 5th, when urination completely ceased.—Ollivier.
‖Typhus tertianus postponens.—
Death on 9th day.—Gehlen. Bullock.

42 **Locality and Direction.** Right: pain in heel; thumping pain in big toe.
Left: flying, cutting pains in leg; foot hurts on rising; pain in foot joint; cannot move foot; great pain in foot; as if foot was contracted lengthways; tickling in hollow of foot; as if a splinter was under nail of middle toe.

43 **Sensations.** As of a load in head; nose as if deadened; nose as if dried up; as of a stone lying in abdomen; rectum as if relaxed, as if diarrhœa would follow, the whole would fall out; as if everything would fall out of groin; as if thorax was tightly laced; as if drops were running over chest; as if something was filled up in sacrum; arms and hands as if burning; feet as if dead; pain in middle of l. foot as if contracted; as if recovering from a long illness; as if all had changed to stone in abdomen; as if something would break in pelvis; as if something was sticking below r. shoulder blade; as if beaten, in bend of l. knee; as if a splinter had lodged under toe nail.
Pain: in back, as after having taken cold.
Unbearable pain: in both groins.
A pain in l. knee, as if inwardly crushed.
Cutting: in region of stomach and below it; in region of navel; near last l. ribs; burning in r. upper arm; in l. leg.
Stitches: in arms and feet.
Stitches: flying through limbs.
Pricking: on top of tongue; in r. groin.

Google

Burning: in throat; in stomach; through whole alimentary canal; outside of abdomen; in l. knee; in bend of l. knee.
Pinching: in abdomen.
Colicky pain: in l. side of abdomen.
Tearing: in head; in neck; in upper limbs; in knee joints; in upper arms.
Drawing: from head towards larynx, r. side.
Aching: spot on r. acromion.
Rawness: in l. chest; over whole chest.
Pressure: in frontal sinuses; in forehead; above eyebrows; in temples; in stomach; in epigastric region; in abdomen; below diaphragm; on l. side of abdomen; in region of kidneys; between shoulders; above breast bone; in upper chest; over whole chest; in l. chest.
Beating: in r. chest; in region of tonsils.
Thumping: in perineum; pain in heart; on a small spot behind r. hip bone; in r. big toe.
Throbbing pain: below r. knee; in bones of l. upper arm.
Thrilling sore pain in balls of toes when pressed.
Flying pains: in head; in perineum; upward, in rectum; in arms, hands and fingers; in feet; in l. leg.
Rheumatic pain: over breast bone; in knee joints.
Laming pain: in elbows.
Cold pain: in bend of l. knee.
Undefined pain: in head; in right forehead and head; in occiput; in upper and back part of head, when coughing; in maxillary joints; in loins; in epigastrium; in various parts of abdomen; in symphysis pubis; in groins; in l. side of penis; in region of kidneys; near larynx, when speaking; in perineum, when coughing; in middle of sternum; in intercostal muscles and bones of chest; in lumbar region; in loins; behind and above r. hip; in sacrum, from top of shoulder to point of elbow; in elbows and arms; on inner side of thighs; in knees; in hollow of l. knee; in lower limbs; in r. heel; in l. foot joint; in sole of l. foot.
Heaviness: of head; of eyelids; in abdomen, like a weight.
Flabbiness: in stomach.
Quivering: in l. thigh.
Twitching, or painful quivering: in r. side of head, above forehead; also in upper and lower jaw and r. shoulder; in shoulders, painful.
Contracting sensation: in tongue; in sole of foot, painful.
Constriction: of throat; of chest.
Irritation: on glans penis.
Tickling: in nose, r. side; in hollow of l. foot.
Crawling: in nose; as if warm drops were running over

Google

chest; over shoulders and back; in limbs; in hands and feet.
Itching: below last rib on extreme l.; on first joint of l. middle finger, around a blister; on l. thigh.
Swimming sensation: in head and body.
Indescribable sensation: up into nose.
Dead feeling: in limbs; in hands; in nose and region of eyebrows.
Heat: in face; in mouth; in abdomen; in chest; in back; over renal region.
Shuddering: over parts of back.
Glowing sensation: in chest.
Chilly feeling: in face.
Coldness: in tongue; of limbs.
Feeling of deadness: in nose; region of eyebrows; in limbs; in feet.
Weariness: in stomach.
Weakness: in body; in abdomen; in rectum, as if relaxed; in limbs.
Stiffness: in neck; between shoulders.
Numbness: in head; above eyebrows; half the tongue, in front, r. side; deep in pelvis; in limbs.

[44] **Tissues.** Cracking of joints when moving, even knees and elbows; 16th day.—F.K.
The habitus increases markedly within a few hours.—
Œdema increases at noon; 7th day.—Br.
General anasarca. Post mortem.—Br.
‖Collapse in cholera Asiatica.

[45] **Touch. Passive Motion. Injuries.** Pressure: < dull pain in epigastrium.—
External pressure hurts in region of liver; 32d day; balls of toes sore.—

[46] **Skin.** Skin dry; pulse 107.—
Yellow skin.—Br.
Skin bronze-colored; 5th day.—Ollivier.
Skin became dark brown.—Sch.
‖Dark brown skin all over. θYellow fever.
‖Dark brown, sallow look of skin.—F.W.Payne.
Itching: on last ribs, l. side; on middle finger; on l. thigh above knee.—
A vesicator put on pit of stomach made a blister filled with dark red blood; 5th day.—R. Sch.
All hair over "deadened" parts became snowy white, brows formed a strange contrast to dark brown face.—Sch.

[47] **Stages of Life, Constitution.** Mrs. A., æt. 67, well and hearty before, suffered whole Fall and Winter; well in seven days.—F.W.Payne.

[48] **Relations.** Sinapism relieves breathing.

Google

Amm. acet.: breathing relieved.
Antidotes: *Nux vom.* (fever).
Compare: *Carb. veg.* (yellow fever and cholera).
Caustic. was given to F.K.
Drinks containing sulphuretted hydrogen appear to relieve most.—Berzelius.
Turpentine should be tried.

ARSENICUM IODATUM.

Iodide of Arsenic. AsI_3.

In 1872, H. Nankinwell, residing at the seashore where patients came to be improved by the air, gave the report of cures of phthisical cases. In most all cases cod-liver oil was given daily.

Introduced by friends of the lower, it has been given most in the third decimal and always repeated.

[1] **Mind.** Studying occasions headache.
[2] **Sensorium.** Dulness of head, with dull pain in l. malar bone and occasional slight frontal headache, the entire morning.
[3] **Inner Head.** Severe frontal headache, with dulness of entire head during forenoon, with stiffness and soreness of l. side of neck, worse when moving head.
Pain in r. temple, several times.
Headache all over head, 11.30 A.M.
Unpleasant feeling in head, like a bad cold; third day.—B.
Woke in morning with a bad headache, lasting all day; dull, heavy, with pressing from within outward, worse on motion, stooping or studying; 24th day.—B.
[4] **Outer Head.** Head seemed enormously large and heavy, with pain.—B.
‖Head covered with an inflammatory scaly eruption. θPsoriasis of child.
[5] **Sight and Eyes.** Weakness of eyes, with burning pain; a feeling as if lachrymation would set in; in two hours.—B.
‖Smarting about eyes; secretion of meibomian glands. θCoryza.
[6] **Hearing and Ears.** An exceedingly sharp pain in forehead and in both ears, especially the left, when riding in a sharp cold wind, at 1 P.M.; after three hours.

Google

[7] **Smell and Nose.** Nose quite dry; 4th day.—B.
‖Frequent sneezing. #Phthisis.
‖Severe coryza with catarrhal tendency; pungent irritation about nose and eyes, and an irritating, watery secretion.
‖‖Chronic nasal catarrh.

[8] **Upper Face.** ‖Complexion sallow. #Phthisis.
‖Peaked cadaverous face, with a purple, livid hue of skin. #Cholera infantum.

[10] **Teeth and Gums.** Intermittent pain in first right upper molar tooth.—Bl.

[11] **Taste and Tongue.** Tongue slightly furred. #Phthisis.

[13] **Throat.** ‖Enlargement and inflammation of tonsils and posterior part of uvula. #Coryza.
Has been of use in diphtheria.

[14] **Appetite, Thirst. Desires, Aversions.** No appetite, ate nothing all day; 3d day.—B.
‖Great thirst.
‖Intense thirst, with uncontrollable desire for cold water, which is almost immediately ejected. #Cholera infantum.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Distressing nausea and vomiting. #Cholera infantum.

[17] **Scrobiculum and Stomach.** Considerable pain in stomach, afternoons, with rising of wind and a greasy fluid similar to that after eating pork; 3d day.—B.
Pain and pyrosis became unbearable.—B.
Pains in stomach < on rising after sitting; 3d day.—B.
‖Subacute gastritis.

[18] **Hypochondria.** ‖Spleen enlarged, fills about one-fourth of abdominal cavity; for two years, after intermittent and quinine.—Kitchen.

[19] **Abdomen.** Severe cutting pains in abdomen as if he would have a stool; he had no stool, but large quantities of wind escaped; these pains are partially relieved by an escape of flatus and by application of warmth to abdomen; after 8½ hours.
Sharp, cutting pain in abdomen which warned him to go to stool; the pains became excruciating, embracing entire abdomen and obliging him to bend almost double; after a great deal of straining he passed a large, soft stool which afforded some relief, at 9 P.M.; after eleven hours.
‖‖The abdomen is hard and distended with flatus, which is constantly discharged.
‖Tabes mesenterica.

[20] **Stool and Rectum.** Escape of flatus relieves; pains in abdomen.
Bellyache better after stools.

Google

Stool in evening soft and mushy, with considerable straining, very dark, almost black; 2d day.—B.

On rising in morning great urging to stool, but stool was scanty, small in size, as though anus was contracted; stool mushy, occasional scybala, small-sized, peculiar black, attended with straining as in dysentery; 3d day.—B.

Diarrhœa not at all at night, but urging commenced on beginning to move about in morning.

‖Diarrhœa in dysentery.

‖Almost constant watery discharges, distressing nausea and vomiting.

‖Almost constant copious watery diarrhœa. θCholera infantum.

‖Cholera infantum, even in articulo mortis.

Continual aching in anus, with a seeming inability to keep the sphincter closed; amounts to real dysenteric straining at stool; 3d day.—B.

[21] **Urinary Organs.** ‖Diseases of urino-genital organs, especially in female, with scrofulous taint.

[22] **Male Sexual Organs.** ‖Secondary syphilis.

[23] **Female Sexual Organs.** ‖Catamenia regular. θPhthisis.

[24] **Pregnancy. Parturition. Lactation.** ‖Lump in mamma, with retracted nipples, tumor sensitive to touch and painful.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖General wheezing on first lying down. θPhthisis.

After moving about a short time in morning he hawked up quantities of thick mucus mixed with clotted blood, seemed to come from head, relieved the pain very much; 4th day.—B.

[26] **Respiration.** ‖Breathing too rapid, even when at rest, increasing in rapidity on exertion, soon becoming an audible wheezing. θPhthisis.

‖General feeble respiration. θHæmorrhagic phthisis.

‖Occasional asthmatic attacks. θPhthisis.

‖Asthmatic sensations at night, must sit up to breathe. θPhthisis.

‖Forced inspiration induced crepitation, posteriorly, right lung. θPhthisis.

[27] **Cough.** ‖Frequent, short, suppressed cough, often loose, with muco-purulent expectoration. θPhthisis.

‖Slight hacking cough with stoppage of nostrils.—B.

‖Frequent cough, with muco-purulent and occasionally stringy expectoration; < on exertion and at night. θPhthisis.

‖A violent cough for years, with inability to bring up sputum, it excites vomiting.—Pehrson.

Google

‖Expectoration heavy during night and morning.
‖Cough and expectoration. θHæmorrhagic phthisis.
‖Respiration harsh and jerky in l. apex. θPhthisis.
‖Râles and crepitation before and after catamenia. θPhthisis.

[28] **Inner Chest and Lungs.** ‖Lungs pale, rather flabby. θHæmorrhagic phthisis.
‖Feeble respiration, with plenty of dry râles over anterior surface of r. lung and upper part of its posterior surface. θPhthisis.
‖Dull spot beneath l. clavicle and coarse crepitation. θHæmorrhagic phthisis.
‖Flattening and decreased mobility beneath l. clavicle, with dulness on percussion; coarse crepitation on same spot, while dry ronchi and prolonged expiration were obtained elsewhere. θPhthisis.
‖Left half of chest flattened and motionless, and percussion as dull as a board from apex to below axillary border of pectoralis major in front and to middle of scapula behind. θPhthisis.
‖Below border of pectoralis major and around posteriorly to back of lung, dulness and coarse crepitation. θHæmorrhagic phthisis.
‖Crepitation and bronchial noise in the r. suprascapular region; after *Sulphur* for weeks increase of dulness in infraclavicular region; more intense and extending. θPhthisis.
‖Immobility of r. chest, with dulness in front and behind upper portion of lung, increasing to absolute dulness posteriorly beneath scapula. θPhthisis.
‖Coarse crepitations, posteriorly about centre of lung; at base bronchial respiration. θPhthisis.
‖Marked dulness on r. base posteriorly, shading off into normal resonance about middle of scapula; coarse crepitation audible over all the duller portion of lung. θPhthisis.

[29] **Heart, Pulse and Circulation.** ‖Pulse weak, 84 to 92. θPhthisis.
‖Pulse hard, fallen from about 80 to 64, woman æt. 40. θPhthisis.
‖Pulse very frequent. θMammary tumor.

[31] **Neck and Back.** Soreness of back, especially of back of neck, as if he had been beaten.
Burning heat in lumbar region, as if clothes were on fire. —Blakely.

[32] **Upper Limbs.** Itching of back of l. hand, followed by stinging itching of back of r. hand; after 2¼ hours.

[33] **Lower Limbs.** Peculiar chilliness of l. thigh beginning

Google

chiefly on posterior surface, followed by formication and weight in l. foot, the latter extending later up l. leg, afterwards to r. foot, partially > by walking; clothes when touching limb felt cold; chilliness disappeared on application of warmth.—Bl.

‖Cold limbs.

Dull, heavy soreness of calf of l. leg, 11 A.M.; after one hour.

Tired, weary feeling in calves of both legs while kneeling. —Bl.

A very severe, laming pain in calf of l. leg, afterwards embracing entire leg, disappearing during active motion, returning when at rest.

Formicating pricking on extreme l. ankle, followed by same on inner side of r. ankle.—Bl.

Unpleasant, slightly painful formication on external border of l. foot, followed by a burning pain on l. instep.—Bl.

[34] **Limbs in General.** Sharp pain in upper third of r. humerus, while writing, lasting ten minutes, suddenly shifting to metacarpal bones remaining some time, then felt in l. femur; rheumatic, as if in shaft of bone.—B.

Heaviness of limbs with weariness of whole body.

‖Cold limbs.

[35] **Rest. Position. Motion.** Rest: pain in leg <.

Lying down; wheezing.

Motion: headache <; pain in leg >; hawking of thick mucus.

Exertion: cough <; dyspnœa.

Walking: soon causes fatigue.

Stooping: headache <.

Kneeling: tired feeling in calves.

Rising after sitting: pains in stomach.

Ascending: dyspnœa.

Must bend double: with pain in abdomen.

Must sit up: difficult breathing in phthisis pulmonalis.

[36] **Nerves.** ‖Great vital prostration.

‖Paralysis.

[37] **Sleep.** Constant yawning; he gets sleepy much earlier than usual.

Pain in head preventing sleep; 4th day.—B.

‖Night restless, slept little; 3d day.—B.

[38] **Time.** Morning: dulness and pain in head; stool on rising; expectoration heavy; felt as after taking cold.

11 A.M.: soreness of l. leg.

1 P.M.: pains in forehead and ears.

Afternoons: pain in stomach.

Evening: soft, mushy stool.

Google

9 P.M.: stool with relief.
Night; asthmatic; cough <; expectoration heavy; restless; sweat.

[39] **Temperature and Weather.** Warmth: applied to abdomen > pains; chillines of l. thigh >.
Sharp, cold wind: pains in forehead and ears.
‖Unable to take exercise in any weather. #Hæmorrhagic phthisis.
Desire for cold water.

[40] **Fever.** Some fever, pulse 80, strong; 3d day.—B.
‖Slight night sweats. #Phthisis.

[42] **Locality and Direction.** Right: pain in temple; pain in ear; pain in upper molar tooth; dry râles over lung; pain in humerus.
Left: dull pain in malar bone; side of neck sore; pain in ear; apex of lung affected; posterior part of thigh chilly; weight in foot; calf of leg sore.
Left to r.: itching on hands; formication and pains in legs.
Upper r. lower l.: pain in limbs.
Within outward: pressing in head.

[43] **Sensations.** As if head was enormously large; as if lachrymation would set in; as if he would have a stool; burning in back as if clothes were on fire; as though he had taken cold.
Cutting: in abdomen.
Sharp pain: in forehead; in both ears; in upper r. humerus; in metacarpal bones; in l. femur.
Burning: of eyes; in lumbar region.
Smarting: about eyes.
Soreness: l. side of neck.
Soreness: of back and neck; as if beaten; of calf of l. leg.
Aching: in anus.
Dull pain: in l. malar.
Rheumatic pain: in humerus and l. femur.
Laming pain: in calf of l. leg.
Intermittent pain: in first r. upper molar.
Undefined pain: in r. temple; in stomach; in head, preventing sleep; in abdomen.
Formicating, pricking: on l. ankle, and inner side of r. ankle.
Formication: on l. foot and instep.
Irritation: about nose and eyes.
Itching: of back of l. hand, and stinging of back of r.; on various parts of body, most on back.
Heaviness: of limbs.
Tired, weary feeling: in calves of legs.
Stiffness: l. side of neck.

[44] **Tissues.** ‖Morbid cellular irritation in lungs.

Google

‖Rapid emaciation.
‖Great emaciation and prostration. θCholera infantum.
‖Considerable emaciation and wasted mammæ. θTumor in mammæ.
Touch: tumor in mammæ painful.

[45] **Touch. Passive Motion. Injuries.** Riding: pains in forehead and ears.

[46] **Skin.** Persistent itching on various parts of body, most of back.—Bl.
‖Chronic skin affections.
‖Psoriasis, the inflamed and scaly eruption almost covered the child.

[47] **Stages of Life, Constitution.** ‖Well-fleshed man, æt. 25, after hæmoptysis. θPhthisis.
‖‖Strumous or psoric diathesis in conjunction with arsenic symptoms.
‖Psoriasis of a child, æt. 4 months.
‖Woman, æt. 40; pulse fell from about 80 to 64. θPhthisis.

[48] **Relations.** *Bryon.* > pain and pyrosis.
Useful after *Sulphur* in phthisis pulmonalis.
Useful after *Conium* in sensitive lump in mamma.

ARSENICUM METALLICUM.

Metallic Arsenic. *As.*

The pure metal was prepared by Dr. Buchheim, now Professor in Giessen, in 1845, in the laboratory of Professor Lehmann. It retained all its metallic lustre when it was triturated, in 1847, in a new, well cleaned, dry mortar, during dry weather. The same triturations came into the hands of Bœricke & Tafel. To give to our School a vote in the dispute, if metallic arsenic had any action or none, it was introduced by C.Hg, proved under the care of A. Lippe, and published in the Journal of Homœopathy, in 1851. The provers were: Doctors Duffield, Stevenson and Coxe, jun., besides many more, among whom should be mentioned, in particular, Tetherbridge.

[1] **Mind.** Weakness of memory, especially in retaining what he has read.
He has to read everything two or three times before he comprehends it.
Dulness, too much exertion to think.
Fearful visions of spectres in bright daylight; she sees threatening people after her, and screams horribly; is

Google

in greatest distress even when her mother is with her; after 30°. Girl, æt. 12. θDuring recovery from typhus.
Feels as if she had to run away, far away, and as if she would hardly touch ground.
She would very much like to die, or fall asleep, never to awaken.
So lazy that she would rather sit up than have trouble of going to bed.
Sad, with tearful eyes, but she cannot weep; even during most painful events.
Depression with exhaustion, feels much depressed and vexed, wants to be alone; followed by pain in heart.
Moody, does not wish to see anybody.
Afraid she will be poisoned.
She feels a glow over l. brow, as often as she thinks about it, most forenoon, less afternoon.

[2] **Sensorium.** As if whisky fumes had gone to head.
Heavy, dull feeling in forehead, above frontal sinuses, in morning.
Fulness: when awaking at night; with coryza.
As if brain were too large and it would burst.

[3] **Inner Head.** Pain in l. side, extending to ear and eye, with nausea.
Headache < when laughing.
Headache from 9 A.M. to 2 P.M., with diminished pulse.
Pain in l. half of head, extending to eyes, nose and ears, with nausea and throbbing in whole body.
Headache over eyes, with chilliness extending to occiput, neck and into chest.
As if water was gushing forward, when stooping.
Headache < when writing and thinking.

[4] **Outer Head.** Itching only allayed by pinching skin, in forehead.
Scalp feels sore even when pulling a single hair.
Falling off of hair. θTertiary syphilis.—Lippe.
As if head was swollen on waking in night or morning, as if he could not get his hat on head.
Numbness on r. occiput, later on l. vertex; evening.
Numbness from nose to forehead, and in a streak along vertex backward, more to left.

[5] **Sight and Eyes.** Heaviness in eyes.
Eyes pain, cannot read much.
Upper lid sore and feels swollen.
Lids slightly inflamed and swollen, more with coryza.
Eyes reddened with coryza.
In region of brows numbness, extending to nose.
Glowing sensation on a small spot over l. brow.
Sight weak, gaslight troubles him, cannot look into bright light.

Digitized by Google

Eyes hurt, cannot read in morning.
Eyes hurt in afternoon and evening; < after sewing.
Her weak eyes improve two weeks after, so that she can use them, and even bear exertion she could not bear last four years.
Eyes pain from walking in wind.
Headache extends to eye; pains from facial bones, or go from eye to back part of ear.
Lids cannot be opened as wide as usual.
Eyes much swollen, or slightly reddened for two days; running of tears, sometimes hot and corroding; dark circles under eyes; coryza.
Pterygium, with enlarged bloodvessel, r. eye; after *Nux* and *Spigel.* had failed.

6 **Hearing and Ears.** Pain into ears from side of head and facial bones; numbness below ears.

7 **Smell and Nose.** Coryza and hoarseness returned in two weeks with heat in face, lasting three days, and ending in angina of fauces; *Bellad.*[40] helped.
On rising in morning he feels as if he would get a violent coryza; nose stopped up; eyes burn; hoarse; gone in evening.
Coryza with hot face, itching and hoarseness; returns 21st day.
Coryza; burning hot water runs from nose, excoriating edges of nostrils; greatest prostration.
Violent coryza; reddened eyes; running of tears, and of water from nose, excoriating, 11 A.M.; after four hours nose stopped; eyes inflamed without discharging tears; head very full and as if tied up; 8 P.M. nose begins to run again, with violent sneezing, throat aches, breathing difficult, till 11 P.M.; at 4 A.M. wakens with same coryza, still worse, sensation as if head and face were swollen, some sore throat.
Coryza lessened after eyes were inflamed; nose swollen for several hours, lessened suddenly, but feels as if beaten all over.
Coryza with running of tears; sneezing and difficult breathing, increases 2d day; discharge thick yellow; eyes swollen and puffed; feels as if head had suddenly become too large, lasts for days, then ceasing slowly; watery discharge hot or warm several times a day, causes biting and stinging; suddenly a burning as if scalded.
Pain in nose from headache; pains in l. side in evening; pains from cheek bones, with it a fine streaming like warm air on l. side.
Violent itching in tip of nose, 1 P.M.; evening, more to the left.

Google

[8] **Upper Face.** Face bloated, red and hot, with coryza.
Itching burning, with swelling, skin feels tense, > by bathing with cold water; later, followed by peeling off in small scales.
Œdematous swelling on forehead and face, with itching.
Itching burning, stinging, with swelling on face, most on r. forehead, < at night, > by cold washing.
Sensation as if skin was immovable, tense and stretched tightly over bones.
The itching not relieved by scratching, only by pressing and squeezing.
A few pimples in face, gradually more, until within three months he has more than a dozen, with it he feels better than before in every way.
Pain in cheek bones, when touched it shoots into r. eye, into nose and below ear.
Swelling of cheeks.
Itching and burning of lower half of face about lower jaws, as if an eruption would break out.

[9] **Lower Face.** Pain in lower jaw on r. side down into throat and neck.
Stiffness in lower jaws when biting.
Twitching in l. lower jaw.
Painless swelling of lips and r. cheek, very disfiguring, lasting 36 hours, followed by a much lowered pulse.
Lips dry and hot.

[10] **Teeth and Gums.** Gums swollen and sore.
Gums swollen and feel as if scalded, with water running together in mouth.
Gums swollen, pain when touched, as if sore, with outer lips dry and hot, first day r. then l. side.

[11] **Taste and Tongue.** ‖Coating on tongue white, mucous.
‖Tongue bears imprint of teeth.

[12] **Inner Mouth.** Dry mouth, with white slimy, furred tongue.
‖Mouth sore.
Accumulation of water in mouth.
A small white ulcer, size of point of finger inside of l. lower lip, with a pale halo, very painful.
On r. and l. under lip a sore inside, hurts when touched with tongue, also whole inner edge of lower lip hurts, next day same on l. lip.

[13] **Throat.** Throat sore, more frequently with coryza.
Violently inflamed throat, with pain when swallowing, < r. side; after a coryza. Cured by *Bellad.*
Ulcer deep in throat, r. side, painful in swallowing, increases for several days, is < in forenoon; 2d to 9th day.
‖Angina, with much heat in throat, and several little ulcers, several weeks after ulcer of gland had been healed by *Natr. carb.*; after *Jod* [40] it healed.

Google

[11] **Appetite, Thirst. Desires, Aversions.** Diminished appetite; 3d day.

No appetite for weeks, not until after 3d or 4th month his actual appetite and strength returned.

Great desire for brandy or alcoholic drinks, most in forenoon, with a lady who never used them.

Aversion to wines and alcoholic drinks for several months, with a man who had not objected to them.

Aggravation after drinking a small quantity of brandy, for which he had not the slightest desire.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hot eructations as of bile, with throbbing through whole body, at noon.

Nausea towards morning.

Nausea with headache, in morning,

[17] **Scrobiculum and Stomach.** Pressure in region of stomach, first mucus, then bile; later empty retching and cutting in belly; 3d night.

[18] **Hypochondria.** Sore pain in region of liver, goes through all the way to shoulder and spine.

Stitch from region of liver towards breast bone.

Itching on a small spot, size of point of finger, one inch above navel, as if in liver.

Pain in region of spleen down to groin, evening.

Pain in breast extends to region of spleen.

[19] **Abdomen** Bloated abdomen.

When getting awake bellyache, tormenting, cutting, shooting, following by a burning, watery stool and cessation of pain.

Tension and sensation of swelling, with heaviness in head and threatened vertigo.

Pulsation: in navel; in abdomen extending to l. groin and down to knee.

Colic with retching after vomiting at night.

Red rash on abdomen in night, following night red smooth spots.

Pain in groins, in morning the right, evening the left.

Pain in l. groin when awaking, extending to thigh.

Pain from region of spleen to groin.

Pulsation in groin.

Itching in groin and down to knee.

Painful swelling in r. groin, pain extending to hip; < when stretching leg, > walking; < in sitting; leg falls asleep; had a bubo on same spot.

A numbness extends from hip joint to pubic region.

[20] **Stool and Rectum.** After awaking at 6 A.M., distressing, lancinating, griping pains in bowels, followed by an acrid, burning, watery stool, and relief of pain, but

Google

leaving much debility; falls asleep sitting; no appetite; pulse 60, much fuller than usual.

Constipated after two weeks.

Some of patients who received it had some exceedingly painful piles two weeks after.

Varices bleed a little.

Varices r. side of anus painful after stool, not bleeding, a few days later only sore; disappear 4th day, after some bleeding.*

Itching in anus, gets sore after rubbing, intolerable during afternoon, extending to perineum and scrotum, obliged to scratch violently; sore feeling > by very hot water, not by cold washing.

Intense itching at anus, followed by crawling on end of back, mornings.

[21] **Urinary Organs.** Urine hot in evening.

Red, sandy sediment in urine.

[22] **Male Sexual Organs.** Itching on glans; prepuce swollen.

Swelling of prepuce, with slight burning, lasting half a day and extending to a circumference three times greater; 3d week.

Sore place on corona glandis, r. side, from where a chancre had been driven 20 years ago, by mercurial ointment; now thin, watery fluid is discharged, causing most violent itching, increasing sore place; 2d week; in 3d week a similar excoriation on l. side of corona glandis, with swelling of prepuce and itching on edges; three weeks after its appearance, *Mercur.*[2c], without effecting a change; in four weeks, *Natr. carb.*[2c], followed by improvement; nearly well in five days; persuaded among friends to take a little brandy and water, it got < and remained so for three days; after *Natr. carb.*[2c] it disappeared.

‖Chancres with ‖burning pain.—Lippe.

Offensive sweat on genitals for some weeks.

Itching on scrotum lasting for weeks.

[23] **Female Sexual Organs.** With appearance of monthly the pulse usually became less frequent.

Heat in uterus and vagina; burning when touched.

‖Monthly before time, lasting longer than usual.

Catamenia appeared at 7 A.M., darker, more fluid and more copious.

On sixth day passed large lumps of blood-colored mucus.

‖Catamenia too early and too scanty.—Lippe.

‖Pain in uterus and vagina during catamenia.

‖Able to sew during her monthly, which she never could do before.

---

* If piles disappear after bleeding, it is a pathological symptom; if they bleed after disappearance, it is therapeutical.

Digitized by Google

[24] **Pregnancy. Parturition. Lactation.** Slight stitches in r. mamma, under shoulder blade; later, in left.
Pain in l. mamma, behind nipple; later, stitch about an inch behind nipple, thence extending down to region of hip.
Itching on mammæ.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness, with coryza.

[26] **Respiration.** Hot breath.
Violent difficulties in breathing, with sneezing; coryza; running of tears; he had to lie higher with head; increasing from 3 P.M. till in night.
Breathing became painful and asthmatic, and lasted three days and then somewhat less four more; very bad before breakfast; > after 8th day.
As if a heavy load was lying on chest all night; dreams of danger on the water.*

[27] **Inner Chest and Lungs.** Pain in r. side of chest near nipple, extending downward and upward; after 30 minutes in l. side, and going to neck; later, again, r. side.
At 10 A.M. pain in chest near nipple, shooting about and down into region of spleen; when at worst it is near apex of heart, with frequent pulse.
Chilliness extending into chest.
Chilliness in head, with headache.

[29] **Heart, Pulse and Circulation.** Slight pains in region of heart.
After mental disturbances, pain in region of heart.
A stitch in heart.
A single cutting pain through heart, at 4 P.M.
Pulsation under sternum.
‖Could lie only on l. side. θDisease of heart.
Pulse 64 in morning; 4th day.
Pulse continues to rise in mornings, and to fall in evenings, for 30 days longer, without taking any more.
‖‖Pulse accelerated in morning (similar to *Sulphur*).
Pulse 116 in morning, and unequal.

[30] **Outer Chest.** Pain in muscles of l. chest.
On l. side of chest small blisters filled with blood, which can be pressed out without pain.
Dull pain in l. pectoralis extending to muscles of shoulder and to point of shoulder blade, and through lower inner part of arm down to elbow; > by striking on it, throwing arm back and lifting shoulder.

[31] **Neck and Back.** Numbness and sensation of lameness in r. lumbar region, from vertebræ to crest of ilium and inner side of thigh down to knee.

---

* Such dreams indicate lung or heart symptoms.

Google

Lumbago; feels walking might increase it, but ceases when walking.
Pain from chest extending into neck.
Pain from region of liver to back and shoulder.
Pain back of r. shoulder, morning.
Pain in spine between shoulders, sore to touch and burning.
Stitch behind shoulder blades.
| |Chilliness in neck, |with headache.
Sensation when lifting head as if it was drawn down into cushion, morning.
Weakness of neck.
Itching in front of throat.
| |Itching in neck, |with coryza.
Crawling on back.
Feels as if a furuncle would form; 9th day.

[32] **Upper Limbs.** Pain in shoulders and arms.
Pain in r. arm above elbow, mornings; later, stitches on outside of l. arm above elbow.
After carrying a child, sharp pain in r. arm below elbow, as if wrenched; after resting, as if beaten; for days.
Arms and hands feel heavy, as if it required more exertion to lift them.
Sore feeling in l. arm below elbow, goes through hand to thumb.
Pain in r. forearm below elbow, goes through hand into little ring finger and is < in middle joint of middle finger.
Cracking of all finger joints, more when closing hands.
Cold hands during day, at other times inwardly hot, or cold hands with hot body.
Dry heat in palms of hands.
| |Insensibility in forearm and hands.
Hands and fingers feel swollen, cannot close hands.
Hands feel stiff, as if they could not be closed.
Itching on olecranon.
|A scab on first joint of l. third finger, when torn off leaving a liver-colored spot, a new scab soon forming; of 20 years' standing.

[33] **Lower Limbs.** Sensation of lameness in r. hip joint.
| |Pulsation in r. hip joint < morning, > evening.
Pulsation from heel up to hips.
Sensation of lameness and numbness in r. hip joint, deep in, extending to symphysis pubis and on inner side of thigh down to knee.
Pulsation in r. anterior tibial artery, at superior end of its inferior third.
Sensation of dryness in r. knee joint.

Google

Feet burning hot, feel as if bloated, next day same, without least moisture.
Feet, usually ice cold, have become warm, and sweat much.
Feet burning, more at night, has to hold them out of bed, cannot bear least cover on them; recurs two weeks after.
From lying on r. side, r. hip painfully fatigued, as if he had been lying on a board.
Lameness in r. hip joint and down thigh, < after rising from a seat; > while continuing to walk.
When bathing, pain in l. hip so bad that she cannot lift limb; pains from hip to heel.

[34] **Limbs in General.** Feet, hands and fingers feel as if swollen and stiff.

[35] **Rest. Position. Motion.** Sitting: pain in groin <; falls asleep.
Lying head high: coryza >.
Lying l. side: heart disease >.
Stretching leg: pain in groin <.
Walking: pain in groin >; lumbago >; hip >.
Striking: pain left pectoralis better.
Stooping: sensation of water gushing forward in head.
Carrying a child: pain in r. arm as if wrenched.
Rising from seat: hip joint worse.

[36] **Nerves.** Debility, weariness, general prostration of strength.

[37] **Sleep.** After an unusually sound sleep at night, irresistible inclination to sleep in daytime and early in evening.
Great drowsiness in morning, after rising, having had a sound sleep.
Feels as if he should fall asleep while walking in street; sleepy from 11 A.M. till evening.
On sitting down he falls asleep; after diarrhœa.
Stupor in morning, notwithstanding a good sleep all night; more sleepy in afternoon and evening.
Very sleepy, but cannot fall asleep.
During sleep a sensation as if he would have a headache when awaking in morning.
Dreams of danger, especially of danger on water, with burning of hands and feet.
On awaking in morning, sensation as if head was swollen.

[38] **Time.** Morning: dulness in forehead; nose stopped up; nausea; pain in r. groin; pulse rises; pain in arm; throbbing through body; hip joint <; pain back of shoulder.
4 A.M.: coryza loose.
6 A.M.: pains in bowels and diarrhœa.
7 A.M.: catamenia appeared.
9 A.M. to 2 P.M.: headache.

Google

11 A.M.: excoriating coryza.
Forenoon: glow over brow <; desire for alcoholic drinks; sore throat worse; cold hands and hot body.
Noon: hot eructations.
1 P.M.: violent itching tip of nose.
Afternoon: glow over brow better; sleepy.
4 P.M.: cutting pain in cardiac region.
8 P.M.: violent sneezing, with running of nose.
Evening: coryza gone; urine hot; pain in l. groin; pain in head.
8 to 11 P.M.: pulse falls; breathing difficult.
Night: fulness, with coryza; red rash on abdomen; itching of feet worse.

[39] **Temperature and Weather.** Hot washing: itching in anus better.
Burning feet: holding out of bed >; < from least cover.
Cold bathing: relieves itching in face; pain in l. hip <.

[40] **Fever.** Chilliness on occiput, neck and chest.
Cold hands and hot body, forenoon.
Burning on hands and feet during sleep at night.
Throbbing through whole body, mornings, most in hip joint, under breast bone and in navel.

[41] **Attacks, Periodicity.** Symptoms recur every two weeks.
Coryza returns twenty-first day.
Attacks come suddenly and end slowly, or *vice versa*.
Coryza.

[42] **Locality and Direction.** Right: pterygium; pain in lower jaw; throat <; liver sore; painful varices side of anus; painful swelling in groin; corona glandis sore; stitches in mamma; numbness and lameness in lumbar region; pain back of shoulder; pain in arm; hip joint lame; pulsation in hip joint.
Right to left: swollen gums; soreness of under lip.
Left: glow over brow; pain in inner head; pulsation in abdomen; stitch in mamma; pain in region of heart; twitching in lower jaw; ulcer on lower lip.
Above downward: pain in head; splenic pain; pain in mamma; pain in hip.
Below upward: pulsation in heel.
Diagonally: stitch pain from liver.

[43] **Sensations.** As if brain was too large and would burst; as if water was gushing forward in head; head, eyelid, hands and fingers as if swollen; as if she had to run far away; as if she would hardly touch ground; as if whisky fumes had gone to head; as if head was swollen; as if he could not get his hat on; head as if tied up; as if beaten all over; gums as if scalded; as if a heavy load was lying on the chest; when lifting head

Google

as if it was drawn into cushion; as if furuncle would form; arm as if beaten; hands stiff as if they could not be closed; feet as if bloated; as if he had been lying on a board; as if head was swollen; right arm as if wrenched; as if skin was immovably tense.

Cutting: in abdomen; through heart.

Lancinating: in bowels.

Shooting: in abdomen; about region of spleen.

Stitches: from liver to sternum; in r. mamma; under shoulder blade; in l. mamma about an inch behind nipple; in heart; behind shoulder blade; in l. arm.

Stinging: in face.

Burning: in face; in abdomen; in rectum; of prepuce; in chancres; in uterus and vagina; of feet.

Scalded feeling: of gums.

Sore pain: in region of liver.

Soreness: of scalp; of upper lid; in l. arm.

Pressure: in region of stomach.

Throbbing: in body, with headache; in groin; under sternum; in r. hip joint: from heel up to hips.

Twitching: in l. lower jaw.

Undefined pain: in l. side of head, to ear and eye; in eyes; in facial bones; in ears; in r. lower jaw down into throat and neck; in region of spleen to groin; in breast to spleen; in swelling in groin; in groins; in l. mamma; in uterus and vagina; in r. side of chest near nipple; from chest into neck; from region of liver to back and shoulder; in region of heart; in muscles of l. chest; in spine between shoulders; in shoulders; in r. arm above elbow; in l. hip.

Heaviness: in head, in eyes; in arms and hands.

Aching: of throat.

Pulsations: in groin; in r. hip joint; from heel to hip.

Stiffness: in lower jaw.

Lameness: in r. hip joint.

Numbness: on r. occiput; on l. vertex; from nose to forehead, and over vertex; in region of eyebrows; below ears; from hip joint to pubic region; in r. lumbar region.

Crawling: on end of back.

Glowing: on a small spot over l. brow.

Dryness: in r. knee joint.

Itching; on forehead; on tip of nose; in face; an inch above navel; in anus, perineum and scrotum; in groin and down to knee; on glans penis; on mammæ; in front of throat; in neck; in olecranon.

" **Tissues.** Emaciation: for weeks.

In two weeks lost half a pound; another in the same time one pound.

Google

Lost within a week three to four pounds, a girl æt. 10.

[45] **Touch. Passive Motion. Injuries.** Touch: heat in uterus and vagina <; pain from cheek bones into r. eye.
Pinching: itching allayed. See 4.
Pulling hair: scalp sore.
Rubbing: itching in anus <.
Pressing or squeezing: itching >.
Scratching: itching <.
Striking chest: > pain.

[46] **Skin.** Itching: now here, then there, has to pinch spot.
Itching: with swelling in face, on head, neck and mamma; on forearm; later, on ankles of both feet.
Skin peels off in small scales.
Bluish-red eruption on abdomen; rash, and red smooth spots.
Red spots over whole body. Cured by *Natr. carb.*
Small furuncles in face for three months.
Small red pimples over whole body, without much itching, appear after three to four months, and last several weeks; secondary syphilis.

[48] **Relations.** Most similar to its near relative: *Arsen. alb.* Useful in pterygium after failure of *Nux vom.* and *Spigel.* *Bellad.* > angina faucium.
Compare *Iodium*, *Mercur.*, and *Natr. carb.* in syphilis; *Nux vom.* (drowsy after sound sleep); *Rhus tox.* (pain in back, hips, etc.); *Sulphur* (pulse).

Google

ARSENICUM SULPHURATUM FLAVUM.

Orpiment. $As\ S_3$.

Hahnemann published in his Materia Medica a single short proving, by Langhammer, one of the most trustworthy provers. Some reports of effects by the Old School physicians are given in Allen's Encyclopedia, I, 556; also a symptom observed by Hencke.

[1] **Mind.** Intense and torturing anxiety and apprehension greatest apprehension after a swoon.
Mind clearer than previously.

[2] **Sensorium.** When walking he felt as if dancing up and down, as if he must fly.
Great weakness in head.
Vanishing of thought.

[3] **Inner Head.** Throbbing stitches in r. frontal region.
Headache in middle of forehead, drawing and stinging.
Pain deep in, in l. forehead, situated back of inner corner of eye and higher than eyebrow; it extends towards l. and deeper in, like a curve or drawn bowstring.
After drinking beer, pain above occiput in both sides; violent pressure in two places, r. and l. side symmetrical.
Nausea, with neuralgic pains about head, when rising; > while lying down.
Headache, nausea and vomiting of a whitish fluid; extremities covered with cold sweat.
Serous apoplexy.

[4] **Outer Head.** External needlelike stitches in r. frontal region.
Tearing pain from parietal to frontal region.
On stroking hair on occiput, a tensive feeling behind r. ear, as if something stuck there and pressed it forward.

[5] **Sight and Eyes.** Gum in canthi.

[6] **Hearing and Ears.** Tensive feeling behind r. ear on stroking hair.

[8] **Upper Face.** Forehead cold.

[10] **Teeth and Gums.** Teeth pain as if loose, when chewing food.

[11] **Taste and Tongue.** Taste bitter.
Tongue: furred, yellow white; stiff, immovable; swollen later dry, with disgust for all nourishment.

[12] **Inner Mouth.** Mouth and throat dry.
Pustules or herpetic ulcers, of a phagadenic character.

Google

[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea at noon after a meal; and vomiting, with pain in stomach and abdomen; diarrhœa and thirst.

Violent, persistent vomiting.

After vomiting offensive bile, was relieved.

[17] **Scrobiculum and Stomach.** ‖Cramp in stomach, with fainting, colic, vomiting, diarrhœa. θGangrene of bowels.

Burning and gnawing in stomach, with vomiting and diarrhœa.

Indigestion.

[19] **Abdomen.** Violent griping, with convulsions.

Violent colic, as from a cold, morning on awaking.

Abdomen puffed; blue spots in fundus of stomach; reddish-brown erosions.

End of ileum more inflamed than duodenum.

Sensation as if diarrhœa would set in.

[20] **Stool and Rectum.** Stools like water, green and slimy, and terribly offensive.

Diarrhœa daily at 8 A.M. and several times during day, but not at night.

Diarrhœa with colic and backache and tenesmus.

[22] **Male Sexual Organs.** Gonorrhœa, with terrible pains; discharge copious, yellow, constant; burning day and night, along entire urethra, with restlessness.

Seminal emissions. See 37.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Laryngeal phthisis. θIn a drunkard.

[26] **Respiration.** Respiration difficult.

‖Indescribably unpleasant feeling, with oppression; everything feels too tight, < about hypochondria; ending in sweat.

[27] **Cough.** Cough from tickling in throat; with pain in l. side; soreness on chest; with heat in l. chest and face, circumscribed red cheeks.

Cough with soreness in chest and between shoulders.

Catarrhal cough with pains in chest and rattling.

[28] **Inner Chest and Lungs.** Lungs overfilled with blood.

Needlelike stitches from within out in r. side of chest.

[29] **Heart, Pulse and Circulation.** Yellow serum in pericardium.

Pulse: frequent, hard, then small and thready; slow, suppressed, quick, and scarcely perceptible.

[31] **Neck and Back.** Backache confining him to bed (with caries of sternum and cough. *Sulphur* partly cured caries, *Psorin.* cough, and *Arsen. sulph.* backache and remaining caries).

Google

Pain in lumbar vertebræ when moving.

[32] **Upper Limbs.** Eruption on outer side of l. wrist; also on inner side, after *Sulphur*. (*Sulphur* did not cure, *Arsen. sulph.* did).

[33] **Lower Limbs.** Pain in l. knee, with chronic asthma.
Knees pain and totter.
Pain above l. ankle bone.
Feet burn.

[34] **Limbs in General.** Severe pain, now in toes, now in shoulders; now here, now there, ending with sweat.

[35] **Rest. Position. Motion.** Children are slow in learning to walk.
Worse when rising: neuralgic pains about head.
Better lying down: neuralgia in head.
When moving: pain in lumbar vertebræ.

[36] **Nerves.** General debility.
Nerves severely affected.
Annoying twitching of thirty years' duration.
Spasms, colic, vomiting, diarrhœa, heat and thirst next day.
Faints after a convulsion.
General feeling of lameness, staggering, trembling; all strength is gone.
Limbs paralyzed; has itch and dropsy.

[37] **Sleep.** Starting in sleep, also in falling asleep; as if he would fall out of bed.
Restless at night, excited; dreams with seminal emissions.

[38] **Time.** At 8 A.M.: daily diarrhœa.
At noon: nausea after a meal, etc. See 16.
Night: restless; terrible heat.

[39] **Temperature and Weather.** Relieved by steam or hot water.

[40] **Fever.** Chronic intermittent fever, < every afternoon and evening; terrible heat at night.
Hectic without thirst.

[42] **Location and Direction.** Left: pain in forehead.
Right: tensive feeling behind ear.

[43] **Sensations.** Pain in teeth as if loose; when walking felt as if dancing up and down; as if he must fly; as if something stuck behind r. ear and pressed it forward; as if he would fall out of bed.
Severe pain: now here, now there.
Needlelike stitches: in r. frontal region.
Throbbing stitches: in r. frontal region.
Terrible pains: with gonorrhœa.
Tearing pain: from parietal to frontal region.
Drawing: and stinging in middle of forehead.
Griping: in abdomen.

Google

Burning: in stomach; along entire urethra; in feet.
Neuralgic pain: about head.
Soreness: on chest; between shoulders.
Pressure: above occiput, r. and l. side.
Gnawing: in stomach.
Cramp: in stomach.
Tensive feeling: behind r. ear.
Undefined pain: deep in l. forehead; in stomach and abdomen; in l. side with cough; in shoulders; in l. knee; above l. ankle-bone; in toes; in joints.
Tickling: in throat, causing cough.
Heat: in l. chest and face.

[44] **Tissues.** ‖Pain in joints. θRheumatism.

[45] **Touch. Passive Motion. Injuries.** Everything feels too tight about hypochondria.
Emaciated children.

[46] **Skin.** Icterus.
Chafing about genitals and behind ears, in children.
Skin scaly, blackish.
Skin itching, dry, cracked; rhagades; itch.

[47] **Stages of Life, Constitution.** ‖Case of caries of sternum with cough and backache of 15 years' standing. See 31.
‖A drunkard with phthisis laryngea.

[48] **Relations.** Similar to *Calc. Carb.* (children are slow in learning to walk). See 31 and 32.

Google

ARSENICUM SULPHURATUM RUBRUM.

Realgar. As_2S_2.

Introduced and proved by Dr. Neidhard and his class in 1852; also proved by Patrick McNamara, Raymond, Howard, Preston and others.

[1] **Mind.** Had an effect on his mind in making him crosser, and also to act with more energy; 4th day.

[2] **Sensorium.** Increased heat of head and face, with a feeling of fulness, and heavy, dull sensation in head.

Falls in a deep swoon, with swelling of face; from inhalation.

[3] **Inner Head.** Waking often with a dull pain in forehead over eyes, extending over top of head nearly to organ of self-esteem.

Heavy pain in forehead.

After three hours a general malaise, pain across forehead, and chilly pain, lasted till he went to bed; left him in night during sleep.

Severe continued pain extending deep into brain in r. frontal region, also to r. ear; very much < by stooping and exercise; > by application of cold; 5 P.M.

Dull pain in r. frontal region, which increased in severity and became a sharp throbbing and shooting pain, extending to occiput on r. side; < by motion and stooping; 4 P.M.

Headache similar to that of 2d day, with addition that pains were in whole frontal region, but most severe in right.

Pain commencing in back of head below philoprogenitiveness, and extending thence around sides of head; sometimes dull and sometimes sharp; 7 till 11 A.M.

[4] **Outer Head.** Heat of head and face.

[5] **Hearing and Ears.** Sensation of fulness and pressing outward in r. ear.

Snapping sound in ear corresponding to pulsation of temporal artery.

Scarlet redness and burning of upper half of l. ear, with tingling similar to that produced by a frost-bite.

The ear feels hot to touch to himself and others.

A very unpleasant, quick beating, extending deep into l. ear, with pain and scarlet redness and heat of upper half of ear; ear feels full, with pressing outward.

Google

[7] **Smell and Nose.** Sneezing occasionally, with a thin white discharge from both nostrils.

Sensation as if coryza was about to set in; sneezed several times during day, with tingling in r. nostril.

Free discharge from nostrils, thin and white.

[8] **Upper Face.** Has a better expressson of countenance than before; used to look dull, but now looks brighter.

Sensible pulsation of arteries of r. side of face and head.

[11] **Taste and Tongue.** Bitter taste in mouth on waking.

[12] **Inner Mouth.** Mucous membrane of mouth and throat much inflamed; also lips and l. side of tongue; l. eye (conjunctiva) much inflamed and puffed out.

[13] **Throat.** Inflammation of throat with deep redness, occasional pains and a raw feeling.

Enlargement of r. tonsil.

At times intolerable itching in throat, inducing a short, dry, expulsive cough.

[14] **Appetite, Thirst. Desires, Aversions.** No inclination for supper.

Excessive thirst, continued for three days.

During this day and next had very little appetite, at times rather an aversion to food, otherwise well.

[15] **Eating and Drinking.** An hour after breakfast, fulness and weight at pit of stomach, low spirited, no disposition to talk all day.

Ate but little at dinner-time; disagreeable feeling in stomach till 8 P.M., when a burning sensation set in, which increased rapidly, and from 10 o'clock till 9 in morning was so intense as to almost deprive him of his breath; $>$ in no position; feet and hands cold; trembling of whole body; twitching and jerking of lower extremities; anxiety, fear of death; stomach felt as if he had coals of fire in it; pain extended from cardiac extremity to l. hypochondriac region; cold drinks increased burning in stomach; pulse depressed and threadlike; face pale and lived; could not bear least pressure on region of stomach.

Sharp cutting pains in l. abdominal region after each meal; $<$ when walking, $>$ by firm pressure with hand upon affected part.

After meals indisposed for mental or physical exertion.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea in afternoon.

[17] **Scrobiculum and Stomach.** Heavy sensation and gnawing in region of stomach.

Dull, heavy pain, extending from pit of stomach to back, with a sensation of a weight in stomach.

Very weak, much soreness over whole extent of stomach.

Google

In evening, on returning home, felt symptoms of derangement of stomach; great weakness and trembling all over; had walked rather more than usual during day.

[18] **Hypochondria.** Large bluish spots over epigastric region, abdomen and thighs.

[19] **Abdomen.** During afternoon dull pains in bowels, with feeling of fulness extending across into hypogastric region.

Most violent colic with terrible vomiting.

In smaller intestines round ulcers with blackish fundus.

[20] **Stool and Rectum.** A loose, small evacuation during day at an unusual hour; another one in evening.

Discharge from rectum of pure bile; urine saffron color.

Diarrhœa of two months' standing; yellow, mushy stools in morning early, after getting up, and in evening before going to bed; a kind of tenesmus in anus is constant.

[22] **Male Sexual Organs.** Slight drawing pain for a short time in l. spermatic cord.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness, with accumulation of tough, tenacious mucus in throat.

[26] **Inner Chest and Lungs.** Awakes at 5 A.M. with a sharp cutting pain, commencing between cartilages of fifth and sixth ribs, extending inward and upward deep into chest; pain was so sharp that it did not admit of slightest motion; was obliged to suspend respiration as much as possible.

[29] **Heart, Pulse and Circulation.** Occasional sharp pains, which appear to affect base of heart, impeding respiration.

[31] **Neck and Back.** After rising in morning, a heavy pressing pain, extending from point of os coccygis to anus; soreness of os coccygis; pain in anus < by efforts to evacuate bowels and when passing water; bearing down would produce a heavy, sickening sensation.

[32] **Upper Limbs.** Rheumatism from r. shoulder down arm, as if in bone; paralysis for three days.

Pain in bones of l. upper arm, more towards morning, when he wakes up.

Coldness of hands.

Slight numbness of forearms and hands, with heaviness; dropped things.

[33] **Lower Limbs.** Considerable pain in r. hip, with lameness in leg.

Severe pain affecting inferior third of tibia of l. leg; commences at lower point of malleolus internus, extends upward in shaft of bone; momentarily > by changing position of foot and by friction with hand.

Numbness and prickling affecting inner side of calf of r. leg, heel, outer side of foot and little toe.

Google

Violent itching of third toe of l. foot, producing occasional spasms of muscles of foot and leg.

About 1 P.M. thighs and legs itched; < after scratching; seemed to leave in about two hours, and about 5 o'clock anterior muscles of thighs felt sore in descending stairs; about 9 o'clock legs and thighs commenced to itch again.

[33] **Rest. Position. Motion.** Rest: pain in chest >.

Walking: pain in abdomen <.

Motion: pain in chest <.

Motion and friction: pain in tibia >.

Stooping and exercise: pain in frontal region <.

[36] **Nerves.** Convulsions, with abdomen puffed up; offensive, bilious diarrhœa, slimy vomit; death in four to six days; a child.

General heaviness of whole body, sleeps longer, and is more difficult to rouse.

[37] **Sleep.** Did not sleep so sound as usual, very restless, with many dreams.

Was very sleepy before taking medicine, but afterwards felt no desire to sleep, very restless through night, waking up often with a dull pain in head.

All symptoms develop more in night; very vivid dreams all night.

[38] **Time.** Morning: diarrhœa; bone pains in arm.

5 A.M.: pain between fifth and sixth ribs.

7 to 11 A.M.: pain in head.

Afternoon: pain in bowels; nausea.

1 P.M.: thighs and legs itched.

4 P.M.: headache <.

5 P.M.: pain in frontal region; thighs sore.

Evening: stomach weak; unusual stool.

8 P.M.: disagreeable feeling in stomach.

9 P.M.: thighs itch.

10 P.M. to 9 A.M.: stomach burning intensely.

Night: pain in head; dreams; all symptoms.

[32] **Temperature and Weather.** Cold: pain in frontal region >.

[40] **Fever.** Towards night felt very cold and chilly, even before hot stove, lasted for three or four hours.

Heat and thirst; loss of appetite; frequent vomiting; a child.

[42] **Locality and Direction.** Right: pain in frontal region; fulness in ear; tingling in ear and in nostril; pulsation in arteries; tonsil enlarged; rheumatism in shoulder; pain in hip; numbness in leg; throbbing and shooting in head.

Left: ear painful; eye inflamed; pain in spermatic cord; bone pains in arms; pain in tibia; third toe itches; tongue and eye inflamed.

Google

Above downward: rheumatism in shoulder.
Below upward: pain in chest; pain in tibia.

[43] **Sensations.** As if he had coals of fire in stomach; as if coryza would set in.
Cutting: in l. abdominal region; between cartilages of fifth and sixth ribs.
Shooting: in r. side of head.
Sharp pain: at base of heart.
Pressing pain: from point of os coccygis to anus.
Drawing: in l. spermatic cord.
Gnawing: in region of stomach.
Throbbing: in r. side of head.
Burning: of ear; in stomach.
Soreness: of os coccygis; of anterior muscles of thighs.
Raw feeling: in throat.
Rheumatic pain: in r. arm.
Heavy pain: in forehead; in stomach; from point of os coccygis to anus.
Dull pain: in forehead, over eyes, to top of head; in r. frontal region; from pit of stomach to back; in bowels.
Undefined pain: across forehead; deep into brain; in back of head; in bones of l. arm; inferior third of l. tibia; from cardiac extremity to hypochondriac region; in r. hip.
Fulness in head; in r. ear; at pit of stomach.
Heaviness: in stomach.
Tingling: in ear; in r. nostril.
Numbness: of forearms and hands; in r. calf; in foot.
Heat: of head; in face; in ear.
Itching: in throat; of third toe of l. foot; of thighs and legs.

[44] **Tissues.** All joints remain immovable after recovery from poison.
Rheumatic symptoms first twenty-four hours after taking medicine in morning.

[45] **Touch. Passive Motion. Injuries.** Touch: ear feels hot.
Pressure: stomach <.
Firm pressure: pains in abdomen >.
Scratching: itching thigh <.

[47] **Stages of Life, Constitution.** Young man, æt. 18; headache in forehead and back of head, with vertigo and empty feeling in region of heart.

ARTEMISIA VULGARIS.

Wormwood. *Compositæ.*

A popular drug known to the Greeks and Romans, in later times much given in epilepsy and spasms of children. The late Dr. Metcalf published, in 1853, in the North American Journal of Homœopathy, vol. iii, p. 74, a very valuable collection of cases cured by the Old School, defending at the same time the use of drugs (pro tem.) before proving. It was also recommended and given in our School, before provings had been made, by Frederick Miller, now in Montreal, and his cures were subsequently corroborated. Only the corroborated symptoms are marked ‖.

What Noak had collected and Allen translated are observations of Allopathists on the sick only, but as they are very useful they have been added, and marked π.

Tincture of the fibrillæ of the root has been used.

Mind. Complete unconsciousness. θHydrocephalus.
Insensible for two hours. θEpilepsy.
‖Stupor following convulsions; child, æt. 4.
‖Mental powers become gradually extinct. θEpilepsy.
Delirium. θHydrocephalus.
Hallucinations during lucid intervals; manifests fear and horror.
‖Gets up every night and does her daily work as a house servant, with closed eyes, lies down again and cannot remember anything next morning. θSomnambulism.
‖Inclination to steal. θBoy with epilepsy.
Sudden whining. θBefore eclampsia.
‖Piercing shriek, turns eyes, with violent clonic spasms of all limbs. θChild with eclampsia.
‖Picking of bedcovers, making a fold of skin on back of her mother's hand, saying that it will not come off, wants a knife to cut it off. θHydrocephalus.
‖Peevish and inclined to weep. θChorea.
Very much vexed, irritable, depressed during day before an attack at night. θEpilepsy.
‖Moroseness. θEpilepsy.
‖Morose and tearful. θChorea.
Excitability all day before an attack at night. θEpilepsy.
After a sudden fright. θEpilepsy.
‖Fright and other emotions are followed by epilepsy.
Weak-minded with epileptic fits.
‖Attacks brought on particularly by bodily exertion or by alluding to disease. θCatalepsy.

Google

[2] **Sensorium.** Great heaviness in head on moving it.
Stupor; after convulsions. θHydrocephalus. See 3.
Insensibility after fit. θEpilepsy.
Vertigo caused by colored window glass, but not by white light.
Epileptic vertigo.

[3] **Inner Head.** Sharp, shooting pain through head. θHydrocephalus.
Great heaviness and pressure. θHydrocephalus.
Great heaviness in head, morning. θNocturnal epilepsy.
‖Hydrocephalus acutus; second stage.
Great congestion of cerebro-spinal vessels of meninges.
Extreme hyperæmia of medulla, spine and meninges.

[4] **Outer Head.** Heaviness of head. θHydrocephalus.
Cannot hold head up after spasms.
Head drawn backward by spasmodic twitchings.
‖Head bent backward and sideward. θHydrocephalic spasms.
Very copious sweat on occiput during recovery. θHydrocephalus.

[5] **Sight and Eyes.** ‖Colored light, as light falling through stained glass windows, makes head dizzy; white light does not.
‖Letters run together while studying or reading.
Sees double; eyes fatigue from study, sight dims.
Staring at ceiling. θHydrocephalus.
‖Staring straight forward with immovable eyes. θCatalepsy.
Staring eyes with dilated pupils. θHydrocephalus.
‖Left pupil dilated more than right. θEpilepsy.
‖Eyes turned upward, half open. θHydrocephalus.
‖Turning up his eyes, only a trace of cornea to be seen; before spasms. θA child.
Turning eyes; iris out of sight. θEclampsia.
‖Tears run from eyes during attack. θCatalepsy.
‖Eyes streamed water. θCatalepsy.

[8] **Upper Face.** ‖Twitchings in face, the only neuralgic movements. θCatalepsy.
‖Mouth drawn to l. side. θEpilepsy.
Face pale, looks oldish. θHydrocephalus.

[9] **Lower Face.** ‖Lower jaw pressed forward. θHydrocephalus.
Mouth cannot be opened except with great difficulty. θHydrocephalus.
Chewing motion of gums; grinding teeth. θHydrocephalus.

[10] **Teeth and Gums.** ‖Grinding of teeth, froth at mouth, thumbs drawn into fist, eyes half open, drawn upward. θHydrocephalic spasms.

Google

[11] **Taste and Tongue.** Tongue bitten in morning. θEpilepsy.
Tongue dry. θHydrocephalus.
‖Bites tongue in spasms.
‖Considerable laceration of tongue. θEpilepsy.
Speech unintelligible—can utter but single words, and these only with great exertion. θChorea.

[12] **Inner Mouth.** ‖Froth at mouth. θSpasm. θChorea. θHydrocephalus.

[13] **Throat.** Hunger, but cannot get food down.
Swallowing difficult. θChorea. θCynanche cellularis.
‖Swallowing difficult; food escapes from mouth. θChorea.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea and vomiting.

[17] **Scrobiculum and Stomach.** Cramp in stomach.

[19] **Abdomen.** ‖Occasionally slight colicky pains. θChorea.
‖‖Violent cramps in abdomen; irregular, insufficient catamenia. θEpilepsy.
Abdomen sunk in. θHydrocephalus.
Abdomen swollen. θHydrocephalus.
⁞Worms.

[20] **Stool and Rectum.** Greenish diarrhœa. θHydrocephalus.
Passes feces and urine with spasm.

[21] **Urinary Organs.** πOn morning after second dose increased urination of yellow unsedimentary urine. θEpilepsy.
‖Urine increased, yellowish. θEpilepsy.
Since midnight, several times, a thick, turbid urine; dark red, yellow. θHydrocephalus.
‖Obstinate strangury of a child.

[22] **Male Sexual Organs.** ‖Nightly pollutions. θYouth, æt. 16.
Seminal ejaculations with spasms.

[23] **Female Sexual Organs.** πProlapsus uteri.
πViolent contractions of uterus; labor pains.
πRupture of uterus.
πMetrorrhagia.
⁞Spasmodic affection during catamenia.
⁞Suppressed menstruation.
‖Irregular or deficient menstruation with epileptic convulsions.
Suppressed menses or amenorrhœa. θEpilepsy.
‖Nervous chlorosis with a very dry skin.

[24] **Pregnancy. Parturition. Lactation.** πMiscarriage.
Violent contractions of pregnant uterus.
‖Retained afterbirth.
Spasms in childbed from fright.
πIncrease of lochial discharge.
⁞Lochial discharge interrupted.
‖Eclampsia of sucklings.

[26] **Respiration.** ‖Rattling breathing with spasms.

Digitized by Google

‖Breathing checked; suddenly a deep inhalation ends the attack. θCatalepsy.

[27] **Cough.** A half dry, painless cough, disturbing sleep. θAfter recovery from hydrocephalus.

[28] **Inner Chest and Lungs.** Audible rattling in chest. θEclampsia.

[29] **Heart, Pulse and Circulation.** ‖Palpitation. θHysteria.
Small ecchymoses on endocardium and pericardium.

[32] **Upper Limbs.** Trembling hands, spasmodically affected, are lifted and put near head. θHydrocephalus.
Hydrocephalic spasms.
Clenched thumbs.

[33] **Lower Limbs.** ‖‖Overfatigue and weakness of feet after long walks, or after long illness.

[34] **Limbs in General.** Spasms of hands and feet.
Tormenting stretching of limbs.

[35] **Rest. Position. Motion.** ‖Has to sit but cannot without support, or she would be thrown from chair. θChorea.
Exertion: attacks <; overfatigue.
Motion: heaviness in head.

[36] **Nerves.** πSensation of nervous system.
‖In a very nervous state; constantly picking with fingers. θEpilepsy.
‖Very much exhausted, obliged to sit down after attack. θCatalepsy.
Dogs for a while motionless, remain standing half unconscious, head and tail lowered.
‖Paroxysms followed by a perfect though short soporous state.
π Spasmodic twitchings, most in cervical muscles, drawing head upward and backward, later extending also to shoulders and back.
‖‖Chorea.
‖‖Spasms and convulsions.
‖Spasms lasting ten minutes or longer, ending in perfect relaxation resembling paralysis, followed by a sound sleep of half an hour or more.
‖Hysterical fits.
Convulsions, preventing falling asleep, more r. side. θHydrocephalus.
‖Right side convulsed, left paralyzed. θHydrocephalus.
Urine and feces pass involuntarily during spasms.
Tetanus in periodical attacks, with pain in whole chest and increased trismus.
Falling to ground with trismus, tonic spasms of one side of body, followed by clonic spasms.
‖Remaining in same position, she stares straight before her with fixed eyes. θCatalepsy.

Digitized by Google

Catalepsy since a great fright with anxiety and fear, in a man, æt. 25; attacks return after each vexation.

‖All the limbs in a violent clonic spasm, lasting about ten minutes, leaving a paralytic relaxation. θEclampsia.

Exhaustion and sleep after eclampsia.

‖Clonic spasms of hands and feet. θEclampsia.

‖‖Eclampsia of sucklings or teething children.

‖Epileptic spasms of children.

πIncrease of epileptic paroxysms.

‖Epilepsy; often repeated attacks; day before attacks excitable, irritable; deep sleep after it; later, offensive sweat. θEpilepsy.

‖Suddenly seized with an electric shock, making him insensible two hours; foaming at mouth, which was drawn to l. side; has considerable laceration of tongue after fit, and l. side numb for two days. θEpilepsy.

‖Epileptic convulsions mostly in morning, at intervals of 2 or 4 months. Child, æt. 4 years.

‖Nocturnal epilepsy with a man, æt. 42.

‖Frequent nocturnal epileptic paroxysms after suffering great grief.

‖Epileptic attacks in childbed after a fright.

‖‖Epileptic spasms after cooling off while overheated from dancing.

Epileptic attacks consequent upon a drunken tumble into water.

‖‖Epilepsy with menstrual disturbances.

‖Convulsions in daytime, consequent upon fever and diarrhœa.

‖‖Epileptic attacks, several every day.

‖‖Epileptic attacks follow each other so soon that the sick do not come to a full and clear consciousness.

⁝Epilepsy with imbecility.

Epileptic vertigo.

⁝Epilepsy with congestion to head.

‖Convulsions every 10 or 15 minutes, bending head backward and sideward. θHydrocephalus.

Nocturnal epilepsy with violent trismus, injuring teeth.

During epileptic attacks violent sweat of an offensive odor.

[37] **Sleep.** Long and deep sleep after the attack. θEpilepsy. θEclampsia.

‖Sopor. θHydrocephalus.

Dreams of snow and strange people in room. θHydrocephalus.

‖No muscular motions at night. θChorea.

Somnambulism, gets up at night and resumes her daily work.

[38] **Time.** Morning: heaviness in head; tongue bitter; increased urination; epilepsy.

Google

Towards noon: epilepsy recurs.
During day: irritable; excitable; convulsions.
Towards evening: fainting fit.
Night: pollutions; epilepsy; walks in sleep.
After midnight: turbid urine.

[39] **Temperature and Weather.** After a fall in water, while drunk. θEpilepsy.

[40] **Fever.** Chilly; generally unwell and drawing in limbs before an attack. θConvulsions.
Body cold. θHydrocephalus.
Warm sweat all over, most on occiput; after remedy.
‖Febris nervosa stupida. θHydrocephalus.
Sweat is a sign of relief. θEpilepsy.
πStrong sweat, with a specific bad odor, cadaverous or garlicky. θAgue.

[41] **Attacks, Periodicity.** ‖Fits every five weeks, menses regular. θEpilepsy.
‖‖Often repeated attacks. θEpilepsy.
‖Attacks of three to five minutes duration, twice within half an hour. θCatalepsy.
Attacks recur: at night; every five weeks; every 2 to 4 months.

[42] **Locality and Direction.** ‖Right side convulsed, l. paralyzed. θHydrocephalus.
Right side somewhat lame since birth, still convulsions on both sides with a boy, æt. 18 months.
Left: pupil dilated; mouth drawn; side numb.
Forward: lower jaw protrudes.
Upward: eyes turn.
Backward and sideways: head bends.

[43] **Sensations.** Shooting: through head.
Drawing: in limbs.
Cramps: in stomach.
Electric shock: in epilepsy.
Heaviness: in head.

[44] **Tissues.** Extreme hyperæmia of medulla oblongata.
‖Congestion of brain and spine. See Convulsions.
Small ecchymoses found on pericardium and endocardium.

[45] **Touch. Passive Motion. Injuries.** ‖Epilepsy from a blow on head, commencing three years after.

[46] **Skin.** πLarge scrofulous blotch after recovery of hydrocephalic spasms.

[47] **Stages of Life, Constitution.** Strong, full-blooded, well fed children, during dentition; eclampsia.
Boy, æt. 14 weeks, 15 attacks in 24 hours; eclampsia.
A child, æt. 6 months; after mother had suffered much from grief during pregnancy; from 4 to 6 paroxysms a day for 2 months; eclampsia.

Google

Boy, æt. 18 months; skull injured during birth; frightened by a bite of a dog; croup and convulsions.

A weakly, miserable boy, æt. 2, emaciated after typhus with diarrhœa, loss of consciousness and constant boring with occiput in cushions; hydrocephalic spasms.

Girl, æt. 10, delicate, irritable; chorea; scrofula.

Boy, æt. 12, after ascarides had been removed; chorea.

A stout, active, healthy boy, æt. 13, suffering for three years from epilepsy, after a box on ear, having for six months from 6 to 18 paroxysms a day, besides 3 to 5 at night.

Robust girl, æt. 10, has not menstruated; suffered since 18 months with somnambulism.

Girl, æt. 16; attacked during her development; occurred every 48 hours; cured by a single dose; epilepsy.

Girl, æt. 16, 3 or 4 epileptic attacks within a week, with irregular catamenia or after the menses.

Girl, æt. 17, for 4 months 3 to 4 fits every day; epilepsy.

A girl, æt. 17, since 5 years affected with epileptic attacks.

Girl, æt. 18, strong, well developed, plethoric; epilepsy.

Man, æt. 20, since 2 years; epilepsy.

Man, æt. 20, after fright an epileptic paroxysm, later from taking cold, recurring every 3, 4 weeks, towards noon, finally every other day, between 9 and 10 A.M.

Girl, æt. 27, fits since 12 years without an aura; menses regular; epilepsy.

Weakly, hysteric women; menorrhagia.

Woman, æt. 28, slender, weakly constitution, dry skin, after hearing frightful news, had two attacks of from 3 to 5 minutes duration in half an hour; catalepsy.

Man, æt. 29, periodically epileptic for four years.

Man, æt. 32, strong, powerful, fresh appearance and choleric temperament, epileptic attacks when he got angry.

A somewhat imbecile man, æt. 36, attacked from childhood twice a week, sometimes oftener; first reduced to one a month, and by a stronger dose entirely removed; epilepsy.

Woman, æt. 41, after changing an active for a sedentary life, attended by grief and menstrual irregularities, first hysterical difficulties, succeeded by convulsions passing into true epilepsy.

Man, æt. 42, for a year and a half nocturnal epilepsy, recurring at intervals from 2 to 3 months.

Man, æt. 45, lank, choleric, frequent attacks of catalepsy, six or more a day, aggravated by passion.

A healthy man, æt. 60, suffering for years great care and grief, was attacked by fainting fit generally towards evening and finally decided epilepsy since 18 months.

Google

[48] **Relations.** Acts better given with wine than with water.
Nearest relation: *Absinth., Abrot.*
More distant: *Cina, Tanac., Chamom., Arnic., Millef.*
Compare with: *Caustic., Pulsat., Ruta, Secale, Stramon.*
In alternation: *Stramon., Pulsat., Aurum.*
After *Acon., Bellad., Bryon., Helleb., Cina;* on 5th day. θHydrocephalus acutus.
After *Iodium*, acted well. θEpilepsy.
Caustic. in epilepsy after *Artemisia.*
Similar to: *Absinth.* (family relation); *Cicut.* (staring, jerking head, etc.); *Cina* (eyes); *Apis* (hydrocephalus); *Helleb.* (hydrocephalus); *Bufo* (irritable before epileptic attack); *Caustic., Chamom.*

ARUM DRACONTIUM.

Green Dragon. *Araceæ.*

Proved by Dr. C. P. Hart, of Wyoming, Ohio. Published in the Am. Hom. Observer, 1875; afterwards by E. M. Hale, in United States Medical Investigator, vol. ix, No. 3, p. 103. Also by Dr. M. McFarlan. The remarkable cure of Asthma Millari was communicated by Dr. F. F. Frantz, of Lancaster.

[1] **Mind.** Great languor and depression of spirits, with asthma at night.

[3] **Inner Head.** Head feels heavy and aches slightly in occipital and r. parietal regions; next morning dull, heavy aching in head and chest, with asthma at night.
Had one of the characteristic pains in l. side of head; began in l. occipital region, gradually subsided, reappeared successively in l. temporal and l. frontal regions.

[5] **Sight and Eyes.** Aching pain over l. eye, pain transient; conjunctiva highly injected.
Eyelids dry, stiff, and slightly agglutinated at their edges, which burn and smart.
Heat, dryness and smarting of lids; 3 P.M.

[6] **Hearing and Ears.** Shooting pains in r. ear at 8 A.M., half an hour after breakfast, transient, but frequent, leaving a ||feeling of fulness and slight aching in middle ear; next day changed to l. ear.
Feeling of warmth and fulness in ears, one or other side, seldom in both at once; swallowing renews it temporarily.

Google

Aching pain behind r. ear.
‖Shooting pains in r. ear, sometimes very severe; deep shooting frequently, and for ten, fifteen minutes, only occasionally in left.
Mucus in l. eustachian tube. See 13.
A pressure below ears, behind lower jaws.

[7] **Smell and Nose.** ‖Sneezing. θAsthma Millari.
Eruption of pimples; lichen.

[8] **Upper Face.** Slight aching in r. malar region; next morning, 9 A.M. See 38.
Flushing of hands and face.

[11] **Taste and Tongue.** Aphthous ulcer on tongue; next day mouth and throat became very sore.
Bad taste in mouth in morning.
Tongue and mouth coated with a foul, slimy mucus, having a putrid taste.

[12] **Inner Mouth.** ‖Peculiar acrid sensation in mouth and throat.
Bad taste in mouth.

[13] **Throat.** Swallowing develops a slight soreness in muscles of throat and renews temporarily feeling of warmth and fulness in ears, sometimes in one sometimes in another.
Disposition to swallow, arising from an excess of mucus; without unpleasant, acrid sensation as expected.
A slight uneasiness in throat, and disposition to cough.
Accumulation of mucus in throat.
Dry soreness, most when swallowing.
‖Dryness and smarting in throat, rawness and fulness, not painful, but annoying, attracting constant attention.
‖Hawking.
‖Continual disposition to clear throat by swallowing and coughing.
‖Throat raw and tender.
‖Constant rawness of throat; constant coughing, with mucus in morning.
Rawness of throat and purulent sputa.
Throat feels somewhat raw, and there is a rattling of mucus.
Rawness in throat present on retiring, but disappeared when asthmatic attacks began.
Soreness of throat, with loose cough; closely simulating a mild attack of catarrhal angina, soreness most when swallowing.
‖A feeling of dryness and smarting, kind of rawness with a sense of fulness, not really painful, but sufficiently annoying, it attracts constant attention, and produces a continual disposition to clear throat by swallowing, coughing or hawking.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructation of flatus tasting of drug.

Google

[17] **Scrobiculum and Stomach.** Sinking feeling in pit of stomach.

[19] **Abdomen.** Pain in bowels from incarceration of flatus.
Rumbling in abdomen.

[20] **Stool and Rectum.** Escape of flatus from stomach and bowels.
Copious, semiliquid stool, with much flatus.
Bilious passages, attended with aching in abdomen and burning in rectum; borborygmus and escape of much flatus from bowels.

[21] **Urinary Organs.** Irresistible desire to pass urine, which is diminished in quantity, very highly colored, and has a burning or smarting effect on urethra.
Frequent, copious emissions of limpid urine; 2d day.
Inclination to urinate every hour or so during day.
Urine increased to four or five times normal amount.
Tenderness and slight smarting or burning of orifice of urethra, especially during micturition.

[22] **Male Sexual Organs.** Great diminution, mostly an entire absence of sexual desire.
‖Penis flaccid and relaxed.
Fine shooting pains in course of l. spermatic cord.
‖Chronic pruritus scroti of twelve years' standing.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness on awaking in morning.
‖Hoarseness; expectorates thick mucus.
Rattling of mucus in larynx at every full expiration, which disappears in moving.
Excess of mucus in larynx (see 13); increased ‖soreness of larynx and great disposition to cough.
Rattling of mucus in larynx during expectoration, ceasing on rising, except expirations are prolonged by voluntary effort.
Very much annoyed by gravity and persistence of laryngeal symptoms; its influence is deep-seated and permanent on larynx.
‖As if larynx were partly obstructed. θAsthma Millari.

[26] **Respiration.** About midnight great oppression of breathing, soon passing off, leaving considerable rattling of mucus in larynx and upper part of trachea.
‖Awakes about midnight with great oppression of breathing, a kind of asthmatic attack, soon passing off.
‖Paroxysms of dyspnœa occurring sometimes, with much aching in chest, and always with considerable secretion of mucus in larynx and trachea.
Violent asthmatic attack at night; after a full dose on 19th day, lighter each preceding night for a week.
‖Asthmatic attacks at night, from a cold, which had resisted *Colchic.* and *Ant. tart.*

Google

Oppressed asthmatic breathing, as if larynx was partly obstructed. θAsthma Millari.

At midnight suddenly seized with labored breathing, followed in 15 or 20 minutes by crouplike cough; coughs until exhausted (about 3 minutes), then violent inspirations and no expirations until lungs are expanded to their fullest extent, when breathing ceases, feces would be expelled, cold sweat breaks out all over body; this breathless condition lasts from 1 to 12 minutes, and is followed by an interval of from half to three quarters of an hour, in which there is considerable rattling of mucus in larynx and some in lungs; three or four attacks up to 2 or 3 A.M. θAsthma Millari.

[27] **Cough.** Disposition to cough. See 13.

Loose cough, with dry soreness of throat, like catarrh; for a week troubled with an annoying cough and rattling of mucus; < at night lying down.

Expectoration thick, heavy, yellowish-white, with continuation of a violent cough.

Annoying cough, with rattling in larynx.

Cough from laryngeal irritation, < at night and when lying down.

Croupy cough, with hoarseness and rawness of throat, during an epidemic influenza.

Hoarse, croupy cough, with sore throat, rattling laryngeal respiration, and considerable swelling of air passages, threatening suffocation; child, æt 3.

[29] **Heart, Pulse and Circulation.** Pulse 80, full, hard, somewhat jerking, which soon becomes small and irregular.

Artery seems to roll under finger, requiring considerable pressure in order to be correctly counted.

Pulse becomes feeble after a large dose; 3d day, 84, small, somewhat irregular.

Heart beats so violently as to shake walls of chest (after 5 minutes).

With increased heart's action aching in præcordial region and down l. arm; flushing of hands and face.

Slight aching pain in præcordial region and down l. arm.

[31] **Neck and Back.** Shooting pains in l. anterior and inferior triangle of neck, near clavicle.

Aching along spine, most between shoulder blades and in lumbar region.

Great weakness across loins; feeling of extreme prostration continuing to increase, had to retire early.

[32] **Upper Limbs.** Tingling, or slight stinging sensation in fingers, as when circulation is impeded.

Fine tingling sensation all over r. hand, which is warmer and redder than l., and appears somewhat swollen.

Google

Aching pain in l. forearm, l. hand, and r. humerus; r. hand remains red and swollen.
Shooting and aching pains in l. brachial plexus of nerves.
Sharp, shooting pains at styloid process of r. ulna.

[33] **Lower Limbs.** Tingling, or slight stinging sensation in toes, as when circulation is impeded.
Shooting pain down r. thigh.
Burning of soles of feet; 3 P.M., 2d day.

[34] **Limbs in General.** Fine picking or tingling sensation in feet and hands, beginning in r. foot, afterwards attacking in regular succession r. hand, l. foot and l. hand.
Aching pain along outer aspect of l. foot, immediately followed by a similar pain in corresponding part of l. hand.

[35] **Rest. Position. Motion.** Lying down: cough <.
Swallowing: fulness in ears; soreness in throat <.
Motion: rattling mucus in larynx disappears.

[36] **Nerves.** Feeling of extreme prostration.

[37] **Sleep.** Awakes about midnight with asthma.

[38] **Time.** Morning: dull headache; bad taste; coughing; hoarseness; rattling of mucus >.
8 A.M.: pains in ears.
9 A.M.: face and hands flush.
3 P.M.: eyelids smart; feet burn.
Night: asthma; cough <.
Midnight: breathing oppressed; asthma.

[40] **Fever.** Heat in palms of hands.
Burning of soles of feet.

[41] **Attacks, Periodicity.** Attacks at intervals of a week or ten days, as many as three or four between 12 and 2 A.M.; at one time attacks every night for six weeks. θAsthma Millari.

[42] **Locality and Direction.** Right: parietal headache; pain in ear; ache in malar region; tingling in hand; hand swollen and red; pain in thigh.
Left: pain in head; pain in ear; pain over eye; mucus in eustachian tube; pain in spermatic cord; aching in arms; pains in neck; tingling in hand; aching in foot and hand.

[43] **Sensations.** As if larynx was partly obstructed.
Shooting: in r. ear; in spermatic cord; in neck; near clavicle; down r. thigh; in l. anterior triangle of neck; down r. thigh.
Burning: of eyelids; in rectum; in urethra; of soles of feet.
Stinging: in fingers and toes.
Smarting: of lids; in throat; of orifice of urethra.
Acrid sensation: in mouth and throat.

Google

Rawness: in throat.
Heavy aching: in head and chest.
Aching: over l. eye; in middle ear; behind r. ear; in r. malar region; in abdomen; in chest; along spine; in foot and head; in præcordial region; down l. arm.
Dull pain: in head and chest.
Pressure: below ears.
Fulness: in middle ear; in ears; in throat.
Undefined pain: across forehead; in bowels.
Sinking: in pit of stomach.
Pricking: in feet and hands.
Tingling: in fingers; in feet and hands.
Dryness: in throat; of lids.

[46] **Skin.** Urticaria and other eruptions, probably neurotic. Compare *Calad.*

[47] **Stages of Life, Constitution.** ‖Boy, æt. 4 years and 9 months. θAsthma Millari.

[48] **Relations.** ‖Aqua chlor. relieved spasms of glottis, but prolonged the attacks. θAsthma Millari.
Useful after *Colchic.* and *Ant. tart.* in asthma.
Compare: *Calad.* in skin affections.

ARUM MACULATUM.

Cuckoopint. *Araceæ.*

A small proving of this first of the family of Araceæ was made by C.Hg., in 1822, on three provers, very good observers. It was printed in 1833, in the Archives 13, 1, p. 169, and reprinted with some toxicological symptoms by Noak, in 1843. The latter are given nearly complete in Allen's Encyclopedia. Some noteworthy reports of the Old School are here added, because they fully agree with the observations of our School.

[1] **Mind.** Anxiety and fear.
Melancholy, depressed, hypochondriacal, taciturn.

[2] **Sensorium.** Vertigo.

[3] **Inner Head.** Slight pressure in l. temple.
Megrim.
Pain in l. temple and forehead to occiput, with stiffness of hands.
Headache with dyspepsia.

[5] **Sight and Eyes.** Aching in l. eye, which is inflamed.

[6] **Hearing and Ears.** Pressure below ears back of lower jaw.

Google

[7] **Smell and Nose.** Violent irritation of nose and eyes.
Pain in l. side of nose.
; Nasal polypus.
[10] **Teeth and Gums.** Gums bleed readily; scorbutis.
[11] **Taste and Tongue.** Tongue swollen and its papillæ injected and raised.
Swollen tongue fills up buccal cavity and makes deglutition impossible.
‖ Stitching and burning on tongue several hours.
Sensation as of a slight excoriation of tongue.
Intense pricking, stinging pain upon tongue and mucous membrane of lips and throat, with a flow of saliva, which seemed to relieve pain a little; pain as if a hundred little needles had been run into tongue and lips.
Pains on tongue and lips were increased by pressure with teeth.
Stinging and burning on surface of tongue, lasting several hours.
Lancinations in tongue as from pin-pricks.
Aphasia.
Swelling of tongue and throat in scarlatina.
[12] **Inner Mouth.** Burning pains in mouth and lips.
Mucous membrane of lips and throat inflamed.
Caustic effect all over lips and mouth.
‖ Stinging in mouth as with a hundred needles.
Salivation. See 11.
[13] **Throat.** Stinging pain in tongue, throat and œsophagus.
Tickling in throat becomes a violent burning.
Pressure in throat, which provokes swallowing, it seems too narrow; swallowing is difficult, as if there was a swelling on l. side above larynx.
Swallowing difficult, as if "palate was down."
Throat so swollen that a probe could not be introduced into œsophagus.
Pain on pressing with finger on l. side of throat, near trachea, below larynx, from that it rose into throat, first like a pressure from without inward, in back part of palate above larynx, provokes swallowing, which is difficult, afterwards it feels too narrow.
Burning, constricting pain in throat.
[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite.
Considerable thirst.
[15] **Eating and Drinking.** After eating: taciturn, sleepy, eyes close readily; emptiness.
[16] **Hiccough, Belching, Nausea and Vomiting.** Vomiting for several hours.
‖ Vomiting of blood.

Google

[17] **Scrobiculum and Stomach.** Cardialgia; gastralgia.
Pain in stomach on pressing it.
Burning, constricting pain in stomach.
⁞ Dyspepsia.

[19] **Abdomen.** Emptiness in abdomen, as after vomiting, mornings after eating.
Oppression in abdomen as in great anxiety and fear, without palpitation, afterwards ascending to chest.
Painful pressure on a spot in abdomen, between navel and groin, especially when standing or lying on side or back, most when expanding chest or stretching abdominal muscles; painful to external pressure.
Intense colic, with anxiety, felt in abdomen. Compare *Arsen.*

[20] **Stool and Rectum.** Diarrhœa.
⁞ Ascarides.
⁞ Prolapsus ani.

[21] **Urinary Organs.** Emission of blood from urethra.
Increased secretion of urine.
Urine watery, light-colored, smelling almost like burnt horn, with a cloud in middle after standing.

[23] **Female Sexual Organs.** Profuse menstrual flow.

[25] **Voice and Larynx. Trachea and Bronchia.** Constriction and burning in larynx.
▮ Hoarseness.
‖ Blood-spitting.
Tickling in throat becoming a most violent burning.
Pressure on throat, l. side, under larynx, near trachea, is painful.

[26] **Respiration.** Hot breath and oppression of chest.
⁞ Asthma.

[27] **Cough.** After a long paroxysm of cough, he raises mucus traversed with yellow threads.
⁞ Chronic catarrh.

[24] **Inner Chest and Lungs.** From abdomen ascending to chest felt an oppression over whole chest, with hot breath, then rose into throat. See 13.
⁞ Catarrh; phthisis; asthma.

[31] **Neck and Back.** ⁞ Struma; goitre.

[35] **Rest. Position. Motion.** Standing or lying: expanding chest or stretching abdominal muscles; pain in abdomen worse.

[36] **Nerves.** Horrible convulsions, with swelling of tongue until it fills mouth, death in 12 to 16 hours (children chewing leaves).
Great general lassitude.
Prostrate, unable to speak, raises hands to its mouth, uttering at intervals a sharp cry, and starting up as if suffocating.

Google

Profound torpor followed by febrile reaction.

[37] **Sleep.** Sleepiness almost uncontrollable, especially an hour after dinner.

‖ During sleep face red.

[38] **Time.** Morning: emptiness in stomach.

[40] **Fever.** Generally causes slight warmth, first above stomach, afterwards in remote parts.

Excites sweat, even in the aged.

[41] **Attacks, Periodicity.** Attacks of pain irregular and intermitting.

[42] **Locality and Direction.** Without inward: pressure in throat.

Below upward: oppression in abdomen.

Left: pain in temple and forehead; aching in eye; pain side of nose; pain side of throat.

[43] **Sensations.** As if a hundred little needles had been run into tongue and lips.

Lancinations: in tongue.

Stitching: in tongue.

Stinging: on tongue; in lips; in throat; in mouth, as of needles; in œsophagus.

Pricking: in tongue; lips and throat.

Aching: in l. eye.

Burning: on tongue; in mouth and lips; in throat; in stomach: in larynx.

Pressure: in l. temple; below ears; in throat; in abdomen between navel and groin.

Constriction: in throat; in stomach; in lungs.

Emptiness: in stomach.

Undefined pain: in l. temple and forehead to occiput; in l. side of nose; in l. side of throat; in stomach.

Excoriated feeling: of tongue.

Tickling: in throat.

[44] **Tissues.** Inflammation and ulceration of mucous membranes.

[45] **Touch. Passive Motion. Injuries.** Pressing: pain in stomach <; pain in abdomen <; pain in throat.

[46] **Skin.** Redness and erosions of skin, also blisters.

‖ Eczema solare.

[48] **Relations.** Antidotes: sweet oil; milk; butter. Gums relieve pungent effect in mouth.

Google

ARUM TRIPHYLLUM.

Indian Turnip. *Araceæ.*

Introduced by C.Hg., in 1856 (News, No. 9, page 66), after it had been applied, according to the reports of a lay-practitioner, John Minz, Canton, Ohio (published by Daniel Shiel, see News), in desperate cases of scarlatina. It was characterized in a masterly way by Lippe, in 1852, in Am. Review, vol. iii, page 28. All his characteristics have been corroborated in many cases ever since, now twenty-seven years.

It had been proved by Dr. Jeanes, in 1844, long before it came into use, and in 1867 one of the best theses was handed to the Homœopathic College of Pennsylvania, by G. E. Gramm, which was partly printed in the Hahnemann Monthly.

For two years Dr. Gramm had made provings on himself and a woman; besides confirming the formerly known effects of the drug, he very much widened its range of usefulness.

The chemical caution regarding the volatility of a so-called acrid principle is useless to us.

The first time the Arum triphyllum was given by an old woman, in a valley of Pennsylvania, when it cured one of the worst forms of scarlet fever, it was given in the form of powder from the dried bulb. Dr. C.Hg. applied, in his first cases of malignant scarlatina, in a damp cellar, in Cherry Street, the alcoholic tincture made from the dried bulb, and Dr. Lippe, who has given us all the characteristics used only potencies in alcohol, mostly the higher.

[1] **Mind.** ‖Unconscious of what he is doing or what is said to him.
Forgetful.
Absence of mind; giddy.
‖‖Great delirium. θScarlatina. θTyphus.
‖During delirium, boring in nose; picking at one spot, or at dry lips. θTyphoid.
Wakeful, restless, screaming; delirium part of the time.
‖Mania.
Apathy. See 40.
Irritable disposition.

[2] **Sensorium.** ‖Complains of dizziness on being raised. θScarlatina.
‖‖Giddiness.
‖Dizziness and fulness, with absence of mind.
Light-headed, sleepy.
‖‖Dull, heavy head, morning.

[3] **Inner Head.** ‖Violent headache.
‖‖Dull headache, upper part feels cold as if open and without covering.

Google

Headache, ||pressing on r. or both sides; < from hot coffee; > after dinner and after breakfast.
Tearing in r. forehead, ||temple and ear, down to maxillary bone.
Stitches over l. eye.
Sudden shooting over l. eye and occiput; repeating.
Tearing, darting, or stitches in temples.
Boring in r. side, morning on getting awake.

4 **Outer Head.** Twitching on middle of forehead.
Twitching and fluttering of muscular fibres.
Pain and soreness of scalp to touch on crown of head.
|Head burning hot. θScarlatina.
|Tinea capitis.

5 **Sight and Eyes.** |Aversion to light.
Dimness of sight, as if a veil were drawn before eyes, without pain or giddiness, spectacles do not assist vision.
Upper eyelids heavy, with headache.
Eyes feel as after shedding many tears.
||Eyes heavy; sleepy.
||Smarting of eyes.
Tension in lower lids as if swollen.
||Quivering of l. upper lid.
Water in eyes all day, most at outer canthi, edges of lids swollen.
|Catarrh of lachrymal sac, with desire to bore into side of nose.
Stitches over l. eye.
On turning eyes upward, shooting in occiput, mornings.

6 **Hearing and Ears.** Burning and tearing in l. ear.
|Left parotid gland sore to touch. θScarlatina.

7 **Smell and Nose.** ||Nose stopped up, < l. side, must breathe through mouth, < mornings.
||Sneezing; < at night.
|Nose moist, but obstructed.
Discharge in morning streaked with blood; during day yellow thick mucus.
||Fluent coryza, acrid.
|Corrosive yellow nasal discharge, nostrils raw. θDiphtheria.
||Acrid ichorous discharge, excoriating inside of nose, the alæ and upper lips. θScarlatina.
||Drink passes up through nose.
||Nose feels stopped up in spite of watery discharge. θScarlatina.
||He can only breathe with mouth open. θScarlatina.
||Nose stopped, with or without profuse yellow discharge.
|Sneezing as from taking cold, with repeated chills over whole body, beginning in vertex; afternoon.

Google

‖‖Nostrils sore, < l.; nose, lips and face chapped, as from a cold wind.
‖‖Constant picking at nose until it bleeds.
‖Desire to bore into side of nose. θCatarrh of lachrymal sac.
Much sneezing at night with constriction of throat.
Great heat in face and head afternoons, with fluent coryza.
Discharge tough, yellowish, with swelling of soft palate and pressure.
‖Could hardly talk on account of phlegm in back part of nose; hawking difficult.

[8] **Upper Face.** Face swollen and red.
‖‖Heat in face, afternoons; with coryza.
‖‖Swollen, bloated face. θScarlatina.
‖Left face feels chapped, as if he had walked in cold wind.

[9] **Lower Face.** ‖Pain in joint of l. inferior maxilla, as if sprained, when swallowing.
‖‖Lips as if scalded, mornings.
‖Lips chapped, as after exposure to cold wind.
‖‖Lips burning, swollen, cracked and bleeding.
‖‖Picks lips until they bleed, corners of mouth sore, cracked and bleeding. θScarlatina.
‖‖Children will often pick and bore into raw surfaces, though doing so gives great pain, and they scream with it, but keep up boring. θScarlatina.
‖Lips very sore and swollen, skin peeling off. θDiphtheria.
‖‖Appearance of raw, bloody surfaces, on lips, buccal cavity, nose, etc., with great itching. θScarlatina.
‖‖Swelling of submaxillary and parotid glands, l. <. θScarlatina.

[10] **Teeth and Gums.** Toothache in hollow teeth; l. side, lower jaw; towards evening.

[11] **Taste and Tongue.** ‖Tongue sore, red, papillæ swollen and elevated. θScarlatina.
‖Tongue cracked, burning, painful.
‖Pain on l. margin of tongue.
‖‖Root of tongue and palate feel raw.
Round spots on tongue as if scalded.
Tip of tongue sore, with round sore spots.
Smarting on tongue and fauces.
‖‖Tongue cracked and bleeding.
Dryness and stiffness across tongue immediately anterior to and on a line with anterior arch of palate, with astringent feeling as strong as after eating persimmons.
Tongue red, papillæ rough, dry in centre.
‖Strawberry tongue.

[12] **Inner Mouth.** ‖Putrid odor from mouth. θDiphtheritis.
‖Mouth felt so sore inside that he was unwilling to drink. θScarlatina.

Google

Excessive salivation; saliva acrid. θScarlatina.
The mouth burns and is sore that they refuse to drink, and cry when anything is offered. θScarlatina. θDiphtheria.
Buccal cavity raw and bleeding.
Scanty but constant discharge of tough mucus from mouth with burning in throat.
Mouth very dry, lips chapped.
Mouth dry, feels as if it would crack, has to get up at night to drink.
Mouth, lips and soft palate sore and burning, in morning.
Great sore feeling in mouth. θScarlatina.
Cavity of mouth covered with diphtheritic deposit and ulcers. θDiphtheritis.

[15] **Throat.** Sensation of swelling on soft palate, when swallowing; with discharge of nasal mucus, in morning.
Soreness, burning, and pains in palate; < when eating or drinking.
Tonsils much swollen.
Sore throat with much phlegm from nose through choanæ.
Swelling in throat extends towards nose.
Fauces and nares ulcerated with a corroding acrid secretion.
As if tied together in throat, as if too narrow.
Constriction in throat (with sneezing).
Cannot chew nor swallow.
Refuses food and drink on account of soreness of throat. θScarlatina.
The sore throat (after 7th day) returns; 12th day a stiff neck.
Constant scratching and burning in throat, with desire to swallow.
Desire to swallow with stitching in throat, which is painful to pressure.
Difficult deglutition.
Stinging burning sensation in throat.
Great burning and rawness in throat.
Burning in pharynx and glottis with soreness in chest.
A sensation of something hot in throat, more particularly during inspiration.
Burning pain in throat and in root of tongue, with dryness.
Burning in throat, in morning while in bed, > after rising.
Burning and dryness in throat, before midnight; after midnight and towards morning, much mucus in throat, which goes deeper and deeper down by swallowing, and is perceived no more in morning after rising.

Google

||Tenacious mucus, with tickling cough.
||Putrid sore throat.
||Throat and tongue very sore, burning pains, putrid ulcers in throat. θScarlatina.
|Throat livid, studded with deep angry looking ulcers having a fetid discharge. θScarlatina.
Aphthous sore throat.
||Swelling of glands on throat and neck.
|Sore throat goes from r. to l.; neck stiff; l. parotid sore.
||Considerable swelling of submaxillary glands l. side.

[14] **Appetite, Thirst. Desires, Aversions.** ||Children lose their appetite, don't want to play, lose flesh, have headache and scanty urine.
No appetite.
Desire to drink a little at a time.

[15] **Eating and Drinking.** Palate sore. See 13.
Worse drinking coffee, headache. See 3.
Worse drinking or eating. See 13.
Headache > after breakfast or dinner.
Eructations of ingesta after dinner.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea; qualmish; giddy.

[17] **Scrobiculum and Stomach.** Cramps in stomach.

[18] **Hypochondria.** Pain in region of liver, first anteriorly, then posteriorly.
Pain under l. short ribs.

[19] **Abdomen.** Rolling in abdomen with frequent painful urging to stool, mornings.
Rumbling in bowels; flatulency.
Slight cutting pains, < about noon.
|Between abdomen and legs sore moist places; same on os coccygis. θScarlatina.

[20] **Stool and Rectum.** Painful urging, with rumbling, compelling to rise from bed; tenesmus towards evening.
Stool: ||watery, dark brown, with eructation of food; soft and painless, thin, yellow, in morning; soft, with tenesmus; at night, during sleep; each succeeding discharge more watery.
||Diarrhœa till noon, like mustard.
|Diarrhœa dark yellow fluid. θTyphoid fever.
Watery brown stool at noon.
From 3 to 8 A.M., watery brown discharge, often with tenesmus, sometimes with belching of food.
|Burning in anus.
||Great soreness between abdomen, genitals and thighs, on and below os coccygis.
|Between abdomen and legs sore moist places

[21] **Urinary Organs.** ||Frequent discharge of pale urine.

Google

‖Urine very abundant and pale. θScarlatina.
‖Urine scanty or suppressed.
‖Very scanty secretion of urine, sometimes passing none for a whole day.* θScarlatina.
Itching at mouth of urethra.

[22] **Male Sexual Organs.** Tearing pain in r. testicle, sometimes extending to abdomen, from noon till evening, repeatedly; comes suddenly and disappears suddenly.
Smarting at end of penis.

[21] **Female Sexual Organs.** ‖Cutting pain in either ovary.
Menstrual blood darker.
Menses checked for two months, returned.

[24] **Pregnancy. Parturition. Lactation.** Soreness and pain as if bruised in l. mamma.
Lumps deep in l. mamma, with aching pains.
Convulsions during dentition; r. side lame; quivering of l. upper eyelid.

[25] **Voice and Larynx. Bronchia and Trachea.** ‖Voice hoarse. θScarlatina.
‖Great hoarseness. θScarlatina.
To talk is an exertion.
‖‖Voice hoarse; also from overexertion of voice in speaking or singing.
‖‖Voice uncertain, uncontrollable, changing continually; now deep, hollow, then scarcely audible, and again high, shrieking.
‖‖Clergyman's sore throat; hoarseness, < from talking.
Voice hoarse, deep, or weak.
‖Loss of voice after exposure to N. W. wind.
‖Burning of glottis, or pharynx.
Must hawk in morning; hoarseness more before talking, > afterwards.
‖Constant pain in larynx. θScarlatina.
‖In region of larynx considerable internal swelling of throat.
Internal swelling of trachea, first r. and then l. side.
‖‖Accumulation of mucus in trachea.
Mucus in trachea when coughing.
πHawked up a good deal of mucus. θScarlatina.
⁞Croup.

[26] **Respiration.** ⁞Asthma.
Asthmatic breathing, with chronic catarrh.

[27] **Cough.** Head and breast feel obstructed, full of mucus, without spitting.
Frequent coughing, with much mucus and much spitting.

---

* As soon as urine increases after it is given in scarlatina, the patient gets better.—Dr. L.

Google

Burning pain in lungs when coughing.
Tickling cough from mucus in trachea; at night after lying down, with inability to sleep and hoarseness.
‖Distressing, hacking cough, after getting awake.
‖Expectoration of much mucus.
: Whooping cough.

[28] **Inner Chest and Lungs.** ‖Burning in lungs when coughing, extending to pit of stomach.
Raw feeling in chest.
‖Lungs feel sore.
Soreness in l. lung and upper arm, with pressing in forehead.
Stitches in r. lung and under r. shoulder blade.
Head and breast feel obstructed by mucus.
Sensation of fulness in thorax and soreness in l. lung and upper arm.
Pain in r. side of chest near axilla, below and anteriorly.
‖Pain through l. lung, about base of heart.
: Consumption.

[29] **Heart, Pulse and Circulation.** Pulse more frequent.
Pulse 140, hard and full. ∥Scarlatina.

[30] **Outer Chest.** Pain in l. side of chest below l. nipple.

[31] **Neck and Back.** ‖Stiff neck; with intolerable pressing headache.
Pain in region of atlas and dentoid vertebra, extending to r. side.
Sore, moist places on os coccygis.
Glands of neck and throat swollen. ∥Scarlatina.

[32] **Upper Limbs.** Pressing in r. shoulder and between blades.
Hands stiff and swollen.

[33] **Lower Limbs.** Pain in r. hip under trochanter.
Heaviness mostly in lower limbs; pain over hips.
Cramps in r. leg on getting awake mornings.
Stinging, pricking or bruised pain in soles.
Pain in middle of l. tibia (where there has been a discolored spot on skin for years).
In l. foot painful sensation of dislocation, can hardly walk, most under ball of big toe; later same pain above knee; in front of thigh.
Tickling itching in centre of r. sole.
Feet hurt her so that she cannot stand: pain even when drawing on stockings; hurts her so that it makes her sick at stomach.

[34] **Limbs in General.** Heaviness in all limbs, most in lower.

[35] **Rest. Position. Motion.** On falling asleep: starts smothering.
Standing: feet <.
Lying down: cough <.

Google

On being raised: dizziness.
After rising from bed: burning in throat >.

[36] **Nerves.** ‖Very great restlessness, child crying and throwing itself into all sorts of positions. θDiphtheritis.
Lassitude and low spirits.
Right side lame during dentition.
Very nervous.
‖Greatest weakness or exhaustion. θTyphus.
‖Spasms of arms and hands; thumbs drawn in.

[37] **Sleep.** Drowsiness immediately after sundown.
‖Child drowsy and stupid; dark, livid eruption. θScarlatina.
‖‖Yawning in afternoon, ‖with stretching and sleepiness.
Sleepy, yawning and sneezing at 11 A.M.; headache <, eyes heavy.
Fell asleep sitting in a chair soon after supper.
‖‖Sleeplessness from soreness of mouth and throat, or from itching of skin.
Nervous at night, cannot sleep.
Restless at night, with heavy head, lassitude; low spirits.
Nightmare.
‖On falling asleep feels as if she would smother, starts as if frightened.
‖Bad night; very delirious 5th day of scarlet fever.
‖Restless tossing about in bed, desire to escape.
Before midnight burning in throat; after midnight mucus in throat and loose bowels.
At night: head <; sneezing; pain in throat; cold running over back; flushes of heat.
When getting awake: burning on r. side of head; < coughing.

[38] **Time.** Morning: 3 to 8 A.M., diarrhœa; head dull; boring in head; nose stopped; discharge from nose; lips feel scalded; mouth sore and burning; mucus from posterior nares; throat >; urging to stool; hawking; cramp in leg; burning side of head.
11 A.M.: sleepiness; sneezing; headache <; eyes heavy.
Noon: cutting pains <; watery stool.
During day: eyes water; thick mucus from nose.
Afternoon: sneezing and chills; heat in face and head; coryza; pain in testicle; sleepiness.
4 to 9 A.M.: flashes of heat; burning face.
Towards evening: toothache; tenesmus.
After sundown: drowsiness.
Night: sneezing; throat constricted; thirst; tenesmus; cough <; nervous; restless; head <; coldness; flashes of heat.
Before midnight: dry throat burns.

Google

After midnight: mucus in throat; loose bowels.

[39] **Temperature and Weather.** Hot coffee: headache <.

[40] **Fever.** Repeated chills, spreading from vertex, with sneezing as after taking cold, afternoons.

Chills running over body after much yawning, same hour on two days.

Cold running over body at night.

Dry, feverish heat of skin.

Flushes of heat, with burning face, 4 to 9 P.M.

Flushes at night.

‖Fever heat very intense. θScarlatina.

‖‖Typhoid forms of fever; ‖picking ends of fingers and dry lips till they bleed; ‖‖boring nose; ‖restless tossing about bed, wants to escape; ‖‖unconscious of what he is doing or of what is said to him; ‖‖urine suppressed; ‖‖great weakness (last stages probably with uræmia).

‖Child falls into a typhoid condition, with apathy. θScarlatina.

[41] **Attacks, Periodicity.** Pains come and go suddenly.

Much yawning, and cold running over body, at same hour as day before.

[42] **Locality and Direction.** Right: headache; tearing in forehead; pain in testicle; side lame; stitches in lung; pain side of chest; pressing in shoulder; pain in hip; cramps in leg; itching on sole.

Right to left: sore throat; swelling of trachea.

Left: stitches over eye; quivering of eyelid; burning in ear; parotid sore; nostril stopped and sore; pain in inferior maxillary joint; swollen submaxillary glands; toothache; pain in margin of tongue; pain under short ribs; soreness and lumps in mamma; pain and soreness in lung and arm; pain above knee, in tibia and in foot.

Above downward: tearing in forehead.

Below upward: swelling in throat.

Before backward: pain in liver.

[43] **Sensations.** Upper part of head feels cold, as if open; eyelids as if swollen; face feels as if he had walked in a cold wind; lips as if scalded; mamma as if bruised; as if he would smother; as if soft palate was swelling; as if tied together in throat; as if dislocated in l. foot and above knee.

Cutting: in abdomen; in ovaries.

Boring: in r. side of head.

Stitches: over l. eye; in temples; in throat, in r. lung; under r. shoulder blade.

Stinging: in throat; in soles.

Shooting: over l. eye and in occiput.

Google

Pricking: in soles.
Scalded feeling: in spots on tongue.
Burning: in ear; in lips; of tongue; in palate; in throat; in pharynx; in glottis; on root of tongue; in anus; in lungs; in upper arm.
Smarting: of eyes; on tongue; in fauces; at end of penis.
Soreness: of scalp; of tongue; of mouth; in palate; in chest; of l. parotid; in l. mamma; of lungs.
Rawness: in throat; in chest.
Scratching: in throat.
Tearing: in r. forehead, temple and ear, to maxillary bone; in temples; in r. testicle.
Aching: in l. mamma.
Pressing: on sides of head; in forehead; in r. shoulder and between blades.
Bruised pain: in l. mamma; in soles.
Sprained feeling: in l. maxillary joint.
Cramp: in stomach; in r. leg.
Constriction: of throat.
Tension: in eyelids.
Undefined pain: in palate; on l. margin of tongue; in region of liver; under ribs; in larynx; in r. side of chest; through l. lung; at base of heart; below l. nipple; in region of atlas and dentoid vertebra; in r. hip; over hips; in l. tibia; in feet; in joint of l. inferior maxilla.
Quivering: of l. upper lid.
Fulness: in thorax.
Heaviness in all limbs.
Heat: in face and head; in throat.
Dryness: in throat; of tongue.
Itching: at mouth of urethra; in centre of r. sole; eruptions.

[45] **Touch. Passive Motion. Injuries.** Touch: scalp sore; parotid sore.
Pressure: throat painful.
Picking: nose, lips and fingers bleed.
Swallowing: pain in inferior maxilla <; sensation of swelling: on soft palate.
Drinking: mouth burns <; pains in palate <.
Eating: pains in palate <.
Overexertion of voice: hoarseness.
Talking: hoarseness <; hoarseness >.
Coughing: burning in lungs; burning in head.
Drawing on stockings: feet pain.

[46] **Skin.** ‖Itching with desquamation, following a scarlet rash. ‖Eruption all over body, with much itching and restlessness. θScarlatina.

Google

‖Exanthema like scarlet rash; skin peels off afterwards.
‖‖Desquamation a second or third time, in large flakes, in scarlatina.
‖‖Little round, red, hard pimples all over body, legs, arms and face.
‖Eruption more in patches than uniform. θScarlatina.
‖‖Scarlatina, when characteristic symptoms of nose, mouth and throat (see 7, 12, 13) are present; fever very intense; ‖in one case rawness down inner side of thighs.
‖Appearance of petechiæ. θScarlatina.

[47] **Stages of Life, Constitution.** ‖‖Clergymen, orators', singers', actors', auctioneers' sore throat; even the highest potencies, one drop, have restored the voice in a few hours.

Boy, æt. 6. θScarlatina; after *Bellad.*, *Ant. tart.*, *Sulphur* and *Lycop.* were of little use.

[48] **Relations.** This remedy should not be given low or repeated often, as bad effects often follow.—L.

Antidotes: buttermilk; *Lac. ac.*; *Acet. ac.*; *Pulsat.*

Family relations: *Arum dracon.*; *Arum mac.*; *Calad.*

Compare: *Ailant.* (in scarlatina, depressing, stupid, drowsy sleep; *Amm. carb.* (acrid discharge from nose, in scarlatina, but r. parotid more decidedly affected, and drowsiness is marked); *Amm. mur.* (in scarlatina, discharge from nose thicker, making nose sore inside, nose being stuffed up only at night or only on one side); *Argent. nitr.* (tongue in scarlatina has erect, prominent papillæ; feels sore, tip red and very painful; painful and red blotches on l. side of tongue); *Arsen.* (excoriating discharge from nose, blueness of rash, restless after midnight); *Canthar.*; *Capsic.* (throat); *Castor.* (discharge from nose in scarlatina is watery and acrid, but associated with a violent, tearing pain at root of nose); *Caustic.* (hoarseness); *Cepa* (nasal discharge); *Crocus* (elevated papillæ, but tongue white); *Hepar* (hoarseness); *Hydr. ac.*; *Iodium*; *Kali hydr.* (discharge from nose in scarlatina very similar, but soreness of mouth differs in that tongue and mouth are ulcerated, with soreness but no salivation; food and drink are refused on account of great pain caused by ulcerated condition; after abuse of *Mercur.*, frequently recurring attacks of fluent coryza, with burning in nose and sensation of a ligature, preventing passage of air); *Laches.*; *Lycop.* (similar discharge from nose in scarlatina; concomitant symptoms are headache, with much thirst at night, burning blisters on tip of tongue, breathing injured by stuffed nose discharging burning ichor, child cross on awaking); *Mercur.* (excessive salivation); *Mezer.* (dis-

Google

charge from nose in scarlatina, slightly streaked or tinged with blood); *Mur. ac.*, *Nitr. ac.* (similar discharge from nose in scarlatina; stinging, pricking ulcers in throat, almost always accompanied by cough, with hoarseness); *Phytol.*, *Sanguin.*, *Silic.* (discharge from nose in scarlatina similar, but nose bleeds readily from soreness); *Sulphur.*

Useful after; *Hepar* and *Nitr. ac.* in hoarse, dry, croupy cough, and in scarlatina, etc.; after *Caustic.* and *Hepar* in hoarseness in morning, and deafness; after *Seneg.* in soreness and redness of throat.

Incompatible: *Calad.*, which is too similar.

ARUNDO MAURITANICA.

An Italian Grass. *Tincture of the Root Sprouts.*

Proved and introduced by Doctor F. Patti, Chagon a Duc de Sorentino; published in J. de la S. Gall., vol. vii, p. 345, in 1856. Clinical observations from B. Dades, Compendio Materia Medica Pura, vol. i, p. 282, 1874.

[1] **Mind.** Lascivious ideas.
Laughs easily, a stupid hilarity.
Anxiety diminished in open air.
Anxiety from accumulation of mucus in bronchi.
Dulness of mind and indifference to painful sensations.
Absence of ideas.

[2] **Sensorium.** Vertigo on getting out of bed.

[3] **Inner Head.** Deep-seated pain towards frontal lobes and sides.
Painful undulation in frontal region.
Burning pain in interior head; pain and heat in forehead.
Pain in r. temple to top of head, makes sleepy.
Sudden formicating pains through temples.
Formication and stupefying pain on top of head, going down to neck.
Deep-seated pains in sides of head.
Pain towards and in occiput.
‡Cephalalgia; hysterical.

[4] **Outer Head.** Formication and pricking in forehead; itching on different parts.
Pustules with red areola, suppurate and form crusts, with children.

Google

Pricking in l temple and on top of head.
Roots of hair painful.
‖Hair falls off entirely in children.
Scurf on head.

[5] **Sight and Eyes.** ‖Inflammation of eyes, in children.
Blepharitis.
Light intolerable, at noon and evenings.
Luminous objects flutter.
Undulating, luminous openings appear wherever he looks.
Dim vision, things veiled.
Cannot look upward.
When looking steadily, pricking in orbit.
Pupils dilated.
Pricking pain in vault of orbit; gets heavy and sleepy.
Pricking, itching and burning in eyes, the l. worse.
Itching of conjunctiva; burning pain in sclerotica.
Excrescence on sclerotica.
Lids jactitate, are heavy, red, burning, itching, swollen.
Lachrymation.
Intolerable itching in brow and l. eye.
Sudden burning in orbit.
Burning, pricking (l.), formication.
‖Catarrhal, rheumatic, or scrofulous ophthalmia.

[6] **Hearing and Ears.** Noise in ears, sound as of little bells.
Pain at base of outer ear (l.).
Formication in l. external ear.
While children complain they keep fingers in ears.
Pain burning, and intolerable itching in canals.
Burning, itching in auditory canals coincide with pain in sublingual glands.
‖The inflammation of ears commences with shooting pains, begins in concha, extends to external meatus; finally, with itching a discharge of blood.
Hemorrhage of bright red blood (l.).
‖Purulent discharge from ears.

[7] **Smell and Nose.** Loss of smell.
Pain at root of nose.
Itching, burning, dryness of Schneiderian membrane.
Burning in inner walls of nose.
Itching in nose; sneezing.
When sneezing, stitches in loins.
‖Coryza, with snuffling.
‖In beginning water runs from nose, later green mucus and thick, white, slimy masses; with sneezing, pieces of indurated greenish mucus.
Putrid nasal mucus.
Ulcer beneath reddened nose.

[8] **Upper Face.** Pallor.

Google

Weight on l. side of face.
Pain in masseter muscles.
Itching, pricking all over; formication; pain in l. half of face.
Pain and burning in r. cheek.
Erysipelas on r. cheek.

[9] **Lower Face.** Pricking on point of chin.

[10] **Teeth and Gums.** Gums red, sensitive, swollen, bleeding.

[11] **Taste and Tongue.** Food insipid.
Sweetish taste in mouth.
Water has a bad taste.
Bitter mouth on waking mornings.
Pain in sublingual glands. See 6.

[12] **Inner Mouth.** Mouth excoriated in children.
Stomacace.
Salivation.

[13] **Throat.** Burning, itching and irritation of palate.
Eruption of red points on palate in children.
Burning and redness in œsophagus.
Globus hystericus.
Stoppage of air (from stomach?) in œsophagus.
Obstruction prevents swallowing.
Burning and pain on swallowing.

[14] **Appetite, Thirst. Desires, Aversions.** Longing for acids, and acid food.
Want of appetite.
Constant thirst | in children; | after waking in morning.

[16] **Hiccough, Belching, Nausea and Vomiting.** Desire to belch, but cannot.
Empty belching.
Hiccough.
Attacks of very painful nausea.
Nausea on getting up in morning.
Vomiting of frothy, viscid matter after cough. See 27.

[17] **Scrobiculum and Stomach.** Coldness in stomach.
Acute pain in pit of stomach; pain on pressure.
Pain all around epigastrium, pricking through it.
Gastralgia.

[18] **Hypochondria.** Pain in liver.
Pricking in spleen.

[19] **Abdomen.** Acute pain at umbilicus.
Pain in colon, r. and l.; pricking in it.
Wandering pains through bowels.
Movements in bowels as if caused by a living thing; as of a worm crawling on r. side.
Noise in bowels; borborygmus.
Abundant flatus.
Bowels painful when pressed by hand.

Google

Pain throughout hypogastrium; burning and pricking after coughing.
Pain at pubic region.
Stitches in groin.
Pricking and burning heat.
Pain, burning and formication in loins.
Stitches in loins; stitches when sneezing.
Pricking pains in loins, corresponds to like pains in pit of stomach.

[20] **Stool and Rectum.** ‖Intestinal catarrh.
‖‖The stools at first hard, soon become loose.
‖Constant diarrhœa of nursing children.
‖‖Serious diarrhœa with teething children.
Liquid diarrhœa in children, with red blood.
Blood streaked loose stools.
Diarrhœa with bearing down.
Greenish diarrhœa.
Hard, greenish stools.
Constipation.
Descent of hemorrhoids before stool.
Stools followed by burning at anus.
Burning piles.
Pricking in anus.
Hemorrhoids, with prolapsus recti.

[21] **Urinary Organs.** Nephritic pains.
Pricking in bladder.
Red urine with sandy sediment.
Urine deposits a great deal of red sand. Compare: *Lycop.*
After urinating, weight; burning, itching in urethra.

[22] **Male Sexual Organs.** Sexual desire; lascivious ideas; frequent erections.
Pain in spermatic cords after coition.
Difficult breathing during coition.

[23] **Female Sexual Organs.** ‖Uterine catarrh.
Violent desire for coition, or aversion to it.
Pricking pain in uterus.
Pain in uterus with meteorism before catamenia.
Menses too early and very profuse.
Long-lasting menses.
Hemorrhage of black, clotted blood.
Leucorrhœa.
Pricking pains in vulva.
Heat, with formication beginning at loins, rising to shoulders, and extending to hands.
Pain starting from l. side of jaw, running along l. eyebrow, thence extending to shoulders and loins, finally settling on pubis, burning there like fire.
Pain in loins: with cough; before first menstruation.
Painful constriction of pubis and loins, prevents walking

Digitized by Google

Pain beginning in kidneys, passing on to lumbar region and extending to pubis.
Burning pain from kidneys passing through l. ileum to pubis.

[24] **Pregnancy. Parturition. Lactation.** Excessive secretion of milk, causes pain in l. breast.
Burning and pain in nipples.
Prickings under l. breast.
‖Teething children. See 20.

[25] **Voice and Larynx. Trachea and Bronchia.** Larynx obstructed after coughing. See 27.
Morning hoarseness.
Loss of voice in an instant.
Bronchial catarrh.

[26] **Respiration.** Whistling, etc., in bronchi when breathing.
Short, difficult breathing; also during coition, or on walking, going up-stairs.
Suffocative paroxysm.
Attacks of dyspnœa, with diffuse sweat.

[27] **Cough.** ‖Catarrhal cough.
Sputa in beginning bluish, then white, and so alternately.
After expectorating, bruised feeling in pit of throat.
Rattling during cough.
After cough, burning in hypogastrium.
After coughing, larynx obstructed, prevents wind and sputa from coming up, causing afterwards vomiting of frothy, viscid matter.
Cough at noon, midday and evenings.
Dry cough evenings, with pains in pit of stomach, with viscid vomiting; followed by burning at pit of throat.
Expectoration difficult, early mornings.
Sputa whitish; round, ash-colored clots.

[28] **Inner Chest and Lungs.** Accumulation of mucus in bronchi causes anxiety.
Pain in chest; pricking in chest; under clavicles.
Formication in chest.
Pain in r. chest, towards midnight.

[29] **Heart, Pulse and Circulation.** ‖Pulse rises to 90, later lessening.
Abnormal movements of heart; oppression of it.
Pricking in arteries.

[31] **Neck and Back.** Startings in neck; formicating pain on l. side of it.
Feeling as of a worm crawling on neck.
Acute pain under l. scapula.
Lumbago.

[32] **Upper Limbs.** Pain in scapulæ.
Pricking in axilla.
Weakness of arms, acute pain; formication.

Google

Coldness in shoulders, in both arms; heat and heaviness in l. arm.
Burning pain passing from arm to wrist, from there to forefinger, and then to thumb.
Burning pain in elbows.
Pain beginning in elbow, ending in ring finger.
Pain in r. wrist, and burning heat in one or the other.
Burning, jerking pain in r. wrist.
Formicative pain, with heaviness in l. wrist.
Stiffness of hands.
Œdema of hands, especially in children.
Burning pain in both hands, as if plunged in boiling water.
Formication in hands.
Pain in fingers; in metacarpal joints and first phalanges.
Burning pain in r. thumb.
Pricking in finger tips.

[33] **Lower Limbs.** Towards midday attack of pain extends to loins, knee and foot.
‖Œdema of lower limbs.
General redness of legs owing to an eruption of very small points, with violent itching.
Burning pain from hip to heel, like sciatica.
Weakness of thighs and legs.
Burning stitches in thigh.
Swelling of knees.
Weakness of knees.
Pain in knees afternoons.
Burning pain in knees.
Cramps in knees, often with a sensation of heat.
Stitches in knees.
Pain in l. calf, most when standing up or when walking.
Cramps in legs.
Burning pain in heels; pricking in heels.
Œdema of feet in children.
Œdema of feet and ankles, < on movement.
Copious and offensive sweat of feet.
Burning and swelling of soles, as after a long journey.
Beating and burning heat in soles.
Burning stitches in toes.

[34] **Limbs in General.** ‖Œdema of limbs.
Pain in limbs as if tightly bandaged.
Formicating pains rising from loins to shoulders and settling on l. clavicle.

[35] **Rest. Position. Motion.** When walking and going upstairs, difficult breathing.
When standing, pain in l. calf.

[36] **Nerves.** Twitchings and inclination to yawn.
Hysteria.

[37] **Sleep.** Sleepiness in daytime.

Google

Sleeps by day; sleepless at night.
Sleepiness, with burning in eyes.
Sleeplessness and weeping at night, in children; excessive heat.
On waking, bitter mouth; after waking, thirst.
Getting up in morning, vertigo.
On waking, nausea, hoarseness.

[38] **Time.** Towards noon: attack of pain.
At noon: shunning of light; cough.
Most effects from noon till evening.
Afternoon: pain in knees.
Evening: shunning light; cough; dry cough, etc.
Morning: easy expectoration.
Before midnight, quotidian; towards midnight, pain in r. side of chest.

[39] **Temperature and Weather.** Desire for open air with cough.

[40] **Fever.** Quotidian fever before midnight.
Fever preceded by coldness, with thirst.
Feverish paroxysm, with burning pain and formication all over body.
Febrile paroxysm, with nausea, coldness, thirst, pain in bowels and salivation.
Excessive heat at night; nightly fever.
A sensation of burning heat, together with numerous prickings, rises from loins, passes over shoulders and then invades middle of head and face, preceded by perspiration, in women.
Constant sensation of heat; is burnt in sun and frozen in shade.
Alternate heat and coldness on different parts of body.
Fever always with thirst.
Tendency to sweat; motion causes profuse sweat.
Fever ends with sweat, most on shoulders and chest, sometimes with vertigo.

[41] **Locality and Direction.** Acts most on l. side.

[42] **Sensations.** As of an insect crawling over body.
As of a worm crawling: in abdomen; on neck.
Pain in limbs as if bandaged tightly.
Hands as if plunged in boiling water.
Acute pain: in pit of stomach; at umbilicus; in anus.
Stitches: in loins; in thigh; in knees; in toes.
Shooting: in ears.
Burning: in head; in eyes; in sclerotica; of lids; in orbit; in auditory canals; in nose; in r. cheek; of palate; in œsophagus; in hypogastrium; piles; in urethra; from kidneys through to pubis; in nipples; in arms and hands; in elbows; in r. wrist; in r. thumb; from hip to heel; in thigh; in knees; in heels; of soles; in toes.
Pricking: in l. temple; in vertex; in forehead; in orbit; in

Google

eyes; in face; on point of chin; through epigastrium; in spleen; in colon; in hypogastrium; in loins; in anus; in bladder; in uterus; in vulva; under l. breast; in chest; in arteries; in finger tips; in axilla; in heel.
Wandering pain: through bowels.
Painful undulation: in frontal region.
Constriction: of pubis and loins.
Cramp: in knees; in legs.
Formicating: through temples; on top of head; in forehead; in l. eye; in l. ear; from loins to shoulders; in chest; in arms; in hands; on l. clavicle; of l. wrist.
Heaviness: of l. wrist.
Undefined pain: frontal lobes and sides of brain; in forehead; in r. temple to top of head; in occiput; at base of ear; at root of nose; in masseter muscles; in sublingual glands; in l. half of face; around epigastrium; in liver; in colon; in hypogastrium; at pubic region; in kidneys; in spermatic cords; in loins; in nipples; in chest; in arms and hands; in knees; in l. calf; in uterus; from l. jaw along eyebrow thence shoulder, loins, settling in pubis; in r. wrist; in fingers.
Coldness: in stomach.
Itching: on head; in eyes; of lids; in brow; in auditory; in nose; in face; of palate; in urethra; eruptions.

[44] **Tissues.** Mucous membranes of eyes, ears, nose, palate, etc. ‖Acute and chronic catarrhs.
Pains and prickings in glands.

[46] **Skin.** Feeling as of an insect crawling over loins, shoulders, and sometimes entire surface of body.
Redness of skin, like a birth-mark.
Skin in children turns blue at height of fever.
Eruptions resembling itch on breast, in children, and also behind ears.
Itching papular eruption in children.
Erysipelas on various parts of body.
Itching miliary eruption on loins.
Pustules like of scabies, with intolerable itching, discharge when opened by friction a watery fluid.
Suppurating pimples on chest and arms.

[47] **Stages of Life, Constitution.** ‖Diseases of women and children.

[48] **Relations.** No gramineæ are known by their morbid influence, except some poisoning symptoms of *Lolium*.
Ananth. has been proved by Houat. *Sacch. off.* is well known by provings and cures, but has no similarity with any tincture of roots.
The disjunctive similars are principally *Sulphur*, *Calc. ost.*, and *Lycop.*, one of the principal family in our armamentarium.

Google

ASAFŒTIDA.

Assafetida. *Umbelliferæ.*

Introduced and proved by Franz, in 1822. See Stapf's Archives, vol. i, No. 3, p. 187; 326 symptoms from Hahnemann, Stapf, Gross and Gutmann. In 1829, Jörg's were added by Hartlaub (1833). In 1839 one symptom of Jahn, not of Trinks, who never has proved. In 1868, a full proving of Lembke, with the substance. Translated by Lilienthal, and published in the New York Quarterly, page 475, 1869, with remarks. The last proving of E. W. Berridge, Organon, vol. ii, is of great importance.

[1] **Mind.** ‖Consciousness unaffected. θChorea.
‖Fits of joy with bursts of laughter. θHysteria.
Excitement of mind. See 29.
Unsteady and fickle, cannot persevere in anything; wants now one thing, then another; walks hither and thither.
Anxious sadness and apprehensions of dying.
Apprehension seemingly arising from abdomen.
Apprehension. See 29.
With heart symptoms, fear of death.
Fears paralysis or softening of brain.
Dislike for solitude.
Constant change of mind; fits of grief, of joy; laughter or anxious sadness.
Depression.
Fits of low spirits with heart symptoms; low-spirited between heart attacks.
Ill humor, irritable mood, and yet indifferent to everything.
‖Ill humor, irritable mood, dislike to work. θCaries.
Hypochondriac and hysteric restlessness and anxiety.
If he thinks of having taken drug, it brings on faintness.

[2] **Sensorium.** ‖Very sensitive and excitable; all perception of senses lessened, but not consciousness.
Oversensitiveness, either physical or mental.
Fainting during height of paroxysm of colic.
Stupefying tension in head, mostly l. side; < afternoon or evening, sitting bent forward, after going to bed; > sitting up.
Vertigo with violent pressing in head, vanishing of sight in evening and afterwards cold sweat on forehead and limbs; colic; flatulence; portal congestion.

Google

Unconsciousness; with bellyache. See 19.

³ **Inner Head.** Pain in l. side of head extending to eyes, changing into intermitting, severe pain and slight fulness of brain.

▮A sudden pain in l. temple, like an inward-pressing pointed plug.

Inner semilateral headache, oftener on l. side.

▮Pressive pain in forehead and l. side of head from within outward.

Dull pain and fulness in l. side of head, with bleeding from l. nostril, heart beating slowly.

Fulness and throbbing in head, heart beats feebly, with apprehension.

Fulness of head when riding in a carriage.

Pressure in sides of head or temples, like from a dull stick, better from touch.

Fulness of head, changing gradually into aching and pressing pain, as if whole brain was compressed; with dizziness, increased heat of skin and some quickness of pulse.

Awoke with fulness of head, which gradually changed to periodically recurring pains, lasting, more or less, into next night.

Drawing, wavelike pressure through l. half of forehead, ending in dull pressure on frontal eminence.

Flying stitch from within outward, in forehead, temples and sides of head.

Jerking through head.

▮Single, sudden, and deep penetrating stitches under l. frontal eminence, like shocks followed by some sensitiveness.

Pain as if a nail or plug was driven into brain.

Crampy pain in forehead above eyebrows.

The brain seems tense.

▮▮Rush of blood to head, and warmth of face.

▮▮Congestive headache.

Sensation of swashing in head as of water, and gurgling behind upper part of frontal bone.

▮▮All headaches < towards evening, in room, while at rest, sitting or lying; > when rising or moving about in open air.

Reading and writing make her worse.

The pains in the head cease, or change from touch.

▮▮Nervous headache of hysterical or scrofulous people.

Cold sensation in head.

⁴ **Outer Head.** ▮Pain in r. parietal, as from a deeply penetrating plug.

The pains in head cease or are changed from external touch.

Google

Cold sweat on forehead.

[5] **Sight and Eyes.** Dimness of sight; letters become darker on writing; disappear after blinking.

▮Mist before eyes.

Muscæ volitantes.

Sight worn from reading or writing.

▮Boring pain above eyebrows; burning, especially at night. θIritis, kerato-iritis, retinitis, of syphilitic origin.

Dull pressure at external border of l. orbit.

Troublesome dryness of eyes.

Burning in eyes; stitches; dryness.

Periodic burning in eyes and pressing together of lids as if overcome with sleep.

▮Burning in eyeballs; in l. as from within outward.

▮Sharp pain extending through eye into head, upon touching.

▮▮Nocturnal, throbbing pains in and around eye and head. θSyphilitic iritis, abuse of mercury.

▮Deep-seated inflammation of eyeball, attended by ciliary pains. θIritis, kerato-iritis, irido-choroiditis and retinitis, especially if of syphilitic origin.

▮▮Extensive superficial ulceration of cornea, with burning, sticking or pressing pains, from within outward; rest and pressure relieve; also > in open air; numbness around eye.

Itching in right eye.

▮Periodic burning in eyes and pressing together of lids, as if overcome with sleep.

[6] **Hearing and Ears.** The faintness is brought on by noise, or being in crowded streets.

Hardness of hearing, with discharge of pus from ears.

▮▮Hardness of hearing, with thin, purulent discharge of an extremely offensive odor. θAfter scarlatina, or abuse of mercury.

▮Otorrhœa with offensive discharge and diseased bones.

[7] **Smell and Nose.** ▮▮Offensive discharge from nose; stench from nose. θAfter mercury or in scrofula.

Unpainful tension over bones of nose, with feeling of numbness.

Swelling and inflammation affecting bones, with a feeling as if nose would burst.

Pressure in nose, especially r. wing, as if it would burst.

Feeling as if nose stopped up high up, so that he cannot breathe through it, with fulness of head, when riding in a carriage.

Fluent coryza.

Google

‖‖Discharge of very offensive matter from nose; with caries of bones. θOzæna.
A little pimple on tip of nose.

[8] **Upper Face.** Flushes and heat of face, of one cheek after eating.
Small tubercules in cheeks.
‖Numbness of bones of face; painless tension in various places.

[9] **Lower Face.** Drawing pains in caries of lower maxilla, with salivation; after abuse of mercury.
‖‖Swelling of lower lip.
Lips puffed up, lower lip and l. corner of mouth most.
Numb pressure on chin.

[10] **Teeth and Gums.** ‖Grinding of teeth; starting at night; transient griping pains in region of navel. θChorea.
Bluntness of teeth.
Severe drawing in lower incisors.
Soreness of gums.

[11] **Taste and Tongue.** Greasy, rancid taste in mouth and of phlegm hawked up.
‖Speech unintelligible; tongue white, swollen. θChorea.

[12] **Inner Mouth.** Sensation of dryness in mouth and throat, even when moist, without thirst.
Saliva predominantly decreased, except in mercurial caries, when acrid salivation exists.
Burning in mouth.
‖Constantly chewing and working frothy slime out of mouth, with swollen tongue. θChorea.

[13] **Throat.** ‖Sensation as if peristaltic motion was reversed and œsophagus being drawn from stomach up towards throat.
Sensation of pressure, as if a body or lump was ascending in throat, has to swallow frequently.
‖Burning, followed by soreness, in fauces and pharynx.
Darting stitches, from chest upward towards œsophagus.
Tender feeling in throat, < when swallowing.
‖‖Sensation of a ball rising in throat, causes difficulty in breathing. θHysteria.
Hysterical spasms affecting œsophagus.
‖In evening a hysterical rising in throat, as if a ball or large body ascended from stomach to œsophagus, or even pharynx, obliging him repeatedly to attempt to swallow it. θGlobus hystericus.
‖Dryness and burning in œsophagus.

[14] **Appetite, Thirst. Desires, Aversions.** Ravenous hunger, with pain in upper abdomen, as from a cold, and as if diarrhœa would set in.
Hunger with desire for strong, cooling food.

Google

Desire for wine.
‖Great disgust for all food. θChorea.
Beer tastes slimy, aversion to it.

[15] **Eating and Drinking.** ‖Great dejection, with epigastric pressure after eating; hypochondriacal.
‖After eating: heat in face, with anguish; pressure in stomach; stitches about lower ribs; tension in abdomen; winding and twisting in bowels; great difficulty in breathing; febrile state.
‖After drinking: diarrhœa; heaviness and cold feeling in intestines.
After meals flatulent distension of abdomen.
‖After eating anything sour griping pains in region of navel. θChorea.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖‖Eructations: smelling like garlic; tasting rancid, sharp, or putrid; smelling like feces; tasting like carrion.
‖‖Flatus passing upward, none down.
‖Hiccoughlike contractions of diaphragm. θChorea.

[17] **Scrobiculum and Stomach.** ‖Pressing, cutting, stitching pains in spells, not regular; full of wind; pressing upward (never down); gulping up rancid fluid; constipation. θGastralgia.
‖Dyspepsia, with much pulsation in pit of stomach.
‖Pulsation in pit of stomach, perceptible to sight and touch.
Sensation of fulness in stomach.
‖"Gone," empty feeling in pit of stomach, not a pain, but "it hurts there;" pulsations after eating; < about 11 o'clock A.M.; faint feeling. θHysteria.
Cardialgia.
‖Meteorism of stomach when feeling of tension is great and eructating is difficult.
Increased warmth and aching in stomach, towards l. side, not all on r., but more up into œsophagus, like globus hystericus.

[18] **Hypochondria.** In morning sensation in epigastric region and in whole abdomen, as if it were beaten, with sense of fulness in former, and eructations.
Stitches in r. hypochondrium, towards diaphragm.
Pressure from interior of liver, to chest, after dinner, with labored breathing and violent pulsations.
Violent pressure in scrobiculum, towards liver, while sitting.
Stitches as if in diaphragm, r. side.
‖‖Heat in spleen and abdomen.

[19] **Abdomen.** ‖Gastric and abdominal sufferings, accompanied by pulsations in epigastrium.

Google

Heat in abdomen.
Pressure in abdomen.
Griping (into a ball) pain below navel when standing.
Intermittent griping in upper abdomen.
Pain in upper abdomen, as from taking cold, and as if diarrhœa would ensue, with a kind of ravenous hunger.
Bellyache, as if intestines were torn or cut; places in side sore, as if raw, with it feeling as of something rising from chest to throat; pressure relieves.
Gripings, with flatulence.
‖Wind colic, with abdominal pulsations; very painful distension of abdomen, rumbling; relieved by passing wind.
Pinching colic and escape of wind.
Flatulent colic and diarrhœa; distension of abdomen.
Colic, with distension and a "rising up feeling," as if peristaltic action was reversed; > from external pressure; causes fainting. See 13.
‖Abdomen soft, distended. θChorea.
In flanks a pressive pain or drawing in abdominal muscles.
Sensation in epigastric region and abdomen in morning, as if beaten.

[20] **Stool and Rectum.** Painful diarrhœa.
‖‖Watery, liquid stools of most disgusting smell; pains in abdomen and discharge of fetid flatus.
‖‖Watery stools of disgusting odor; discharge profuse and greenish.
‖Blackish-brown, papescent, offensive stools, which relieve.
Stool profuse, thick, papescent, brown, and very offensive.
Only slime passes, no feces.
Obstinate constipation, with abdominal and hemorrhoidal cramps, tenesmus and distended abdomen.
‖Pain in perineum, as from something dull pressing out.

[21] **Urinary Organs.** Soreness in kidneys.
‖‖Urine warm and of a pungent, ammoniacal smell.
Spasm in bladder during and after urination.

[22] **Male Sexual Organs.** Genitals irritated.
Faintness is < after seminal emissions.
Urging towards genitals; aching of testicles, < from touch and after motion.
Needlelike stitches in penis.
Drawing in glans, more during afternoon.
Outward pressure in perineum.

[23] **Female Sexual Organs.** ‖Excited sexual desire. θNymphomania in a plethoric woman.
‖Bearing down in genitals, < when riding in a carriage.
‖Uterine ulcer, sensitive and painful, with offensive discharge.

Google

‖Menses too early, too scanty, and last but a short time.
‖Laborlike pains in uterine region, with cutting and bearing down.
‖Leucorrhœa profuse, greenish, thin and offensive.
‖Swelling and inflammation of genitals.

[24] **Pregnancy. Parturition. Lactation.** Miscarriages.
Is said to kill fœtus and dries up milk.
‖Mammæ turgid with milk, like in ninth month; without being pregnant.
‖Deficient of milk, with oversensitiveness.
πLaborlike pains; cutting, bearing down, intermitting.
Milk increased or diminished.
Restores wasted and drying up "breast of milk."
‖Ten days after delivery milk diminished; 14th day only a few drops could be squeezed out with difficulty; after 5 drops of tincture, copious milk, but offensive to child; 3d centesimal answered as well.
‖Milk had disappeared within three weeks of her delivery; six confinements.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice weaker, hoarse, changed, sometimes cough.
‖Spasm of glottis, alternating with contraction of fingers and toes. θHysteria.

[26] **Respiration.** Difficult breathing. See 13.
Difficult breathing, from abdominal disease.
Feeling of suffocation in throat on taking a full inspiration.
Constriction of chest, extending to throat, with hurried breathing.
Asthmatic complaints of scrofulous persons.
‖‖Asthmatic feeling in trachea, dry cough; spasmodic dyspnœa as if lungs could not be sufficiently expanded.
‖Oppression of chest increasing to agony, cannot breathe, restless moving about.
‖Oppression of chest, with hurried breathing; contracted, small pulse, or, frequent pulse; asthma after too hearty a meal; too great exertion.
Oppression of breathing; pain temporarily relieved by eructations.
When faint, if he breathes deeper, heart beats fuller, and faintness decreases; if he holds breath heart becomes very feeble.
‖Asthmatic attacks at least one a day all her life, brought on by every bodily exertion, coition, especially by every satisfying meal.
Frequent breathing, rattling; restless tossing before attack, anxious with it.
Sitting up relieves suffocative feeling.

[27] **Cough.** ‖Obstinate titillating cough, < at night, with grown persons.

Google

Cough predominantly dry; expectoration infrequent, during day.
Irritation to dry cough; attacks at night.
Cough on gaping.
‖Whooping cough, even of sucklings, sounding like croup; rattling breathing, anxious and restless, chest and abdomen hot, urine pale.
‖Hoarse ringing short cough, excited by tickling in trachea, with asthmatic feeling therein; spasmodic contraction of thorax and accumulation of stringy mucus.
Cough in afternoon.
‖Cough, with cessation of sputa.
Sputa have a greasy taste.
Cough, with accumulation of stringy mucus in trachea.

[28] **Inner Chest and Lungs.** Pressure on sternum, when stooping, writing; going off by deep breathing.
‖Pressure and burning under sternum; frequent disposition to cough.
‖Compression of chest, as from a heavy weight. See 26.
Pressing stitches in chest.
Pressure on chest, with a constriction in throat.
‖Oppressive aching feeling in chest; > from expectorating mucus.
‖Pressive pain in r. side of chest, from within outward.
‖Pressure in l. intercostal muscles, from within outward, < during inspiration and expectoration.
‖Stitches in chest from within outward. θWhooping cough.
‖Burning in chest, runs through both arms and through lower limbs down into toes.
‖Single violent stitches from within outward, at short intervals; renewed when chest is touched. θPleuropneumonia.
Shooting from just below l. nipple through to back on walking.
Spasmodic constriction of thorax with cough.
Spasmodic constriction, as if lungs could not properly expand, respiration normal.
Spasmodic contractions of chest, with slow, small, contracted, irregular pulse.
Throbbing in chest.
‖Dropsy of chest; relieved the oppression in 6, 12, or 36 hours; 3d every 2 or 4 hours.
Discomfort of thorax from want of distension of lungs.

[29] **Heart, Pulse and Circulation.** Increased action of heart on slightest excitement.
‖Palpitation, with faintness, rush of blood to head, flushing of face, anxiety and slow breathing, from excitement. θIrritable heart.

Google

Violent palpitation of heart and excitement of mind.
‖Acute rheumatic heart disease, with tightness across chest. θHydrothorax.
Continual pain about region of heart.
At times heart feels bound together tightly, as if it could not beat; afterwards only on exertion or walking.
Congestion towards heart; feeling of fulness; small pulse; followed by loose stool.
‖Slight palpitation of heart, more like a tremor, several times when sitting.
‖‖Nervous palpitation, with small pulse; from overexertion or suppression of discharges (in women).
‖Pressure in region of heart, as if heart was too full and expanded; pulse small.
Feeling as if heart would burst; quick breathing and apprehension; has to walk in open air.
Feeling as if heart was swollen, preventing a deep inspiration.
Palpitation like a tremor while sitting.
Beating of heart small, quick, irregular.
Heart sometimes beats very feebly.
Sometimes heart beats short and quick, at other times he feels as if there was no action of it.
Heart's action is quickened by a deep inspiration.
At night, when lying on back, palpitation and suffocative feeling, as if heart would burst, he must sit up, which relieves him.
Heart symptoms and faintness < after seminal emission.
‖Pulse small, spasmodically contracted, rather quick. θChorea.
‖‖Small, infrequent pulse, with violent action of heart and no disturbance of respiration indicating nervous weakness of organ.
‖Pulse small, rapid, irregular. See 28.
‖Pulse accelerated, but unequal, small. θAsthma, congestion to heart, etc.

[30] **Outer Chest.** Sensation as if one pressed very sharply with point of finger on xiphoid cartilage; also when swallowing.

[31] **Neck and Back.** ‖Fine, burning stitches in and behind r. scapula, extending towards ribs.
Drawing downward, in l. side of neck, on motion.
Stitches in muscles of back.
Dull pains, or drawing and cutting below scapulæ.
Burning along vertebræ, to left.
Aching inwardly, along last dorsal and first lumbar vertebræ.
Boring sticking in l. loin, from within outward, going off during an inspiration.

Google

Lancinations from r. loin towards ribs.
Sticking, with pressure in region of r. ribs towards spine.
‖Cannot work on account of backache.
Stitches along sacrum down to anus.
Pain in sacrum while sitting.
Crawls run over back, in afternoon.

[31] **Upper Limbs.** Twitching in l. upper arm joint, extending inward.
Fine stitch in elbows.
Quivering in shoulder joint; in deltoid muscle.
Stitches and jerking in upper arm.
Drawing pain along upper arm down to elbow, a fine stich in elbow.
‖Child always missed laying hold of anything she wished. θChorea.
Frequent muscular jactitation in arms and hands.
Tearing in forearm down to tips of fingers.
When moving fingers, pain in forearm.
Tearing stitches followed by burning in r. forearm.
Scraping sensation on styloid process of ulna.
Cramplike, sensitive twitching in metacarpal bone of l. thumb.
‖Whitlow, violent nightly pains, threatened necrosis.
Pain as if beaten in bones of wrist.
‖Aching, drawing in wrist joints. θSyphilis.

[32] **Lower Limbs.** ‖Carious ulcer on tibia, extremely sore around, discharge offensive; skin adheres to bone.
Muscular twitching in legs and feet.
‖Child, æt. 9, could not walk. θChorea.
Caries of tibia.
The apparently healthy portion of tibia lying beneath peculiar carious ulcer became again sensitive and painful to slightest touch, or even approach of finger, so also to removal of charpie, and at night almost unendurable.
‖Swelling around ankle joint, cannot use foot.
Burning in roots of toe nails, prevents sleep.
‖Psoitis if suppuration seems impending; also if pelvic bones are involved.
Lassitude of lower limbs.
Quivering of portions of muscles on thighs.
Occasional tingling in legs after much walking.
Twitching on inner side of r. knee joint.
Swelling and caries of bones of feet.
Sticking sensation on ball of great toe when putting foot to ground.
‖Pain as if a splinter of bone was sticking in r. fibula, just above outer malleolus. θAfter a sprain.
‖Cold swelling around ankles.

Google

▮A sensitive throbbing in l. great toe from time to time.
Stitches and pulsation in big toe.
▮Painful throbbing in tip of great toe.
Heat in toes.

[34] **Limbs in General.** ▮Constant convulsive tremor of limbs, could be > by hands of another person. θChorea.
▮Twitching of muscles of arms and legs.
▮Pains mostly on flexor sides of limbs.
Pains in inside of joints and limbs.

[35] **Rest. Position. Motion.** Rest: headache <; eyes >; < in bed.
Sitting up: headache <; tension in head >; pressure in scrobiculum <; suffocative feeling >; palpitation <; pains in sacrum <.
Standing: griping below navel; weakness.
Stooping: pressure on sternum.
Lying: weakness; headache <.
Putting foot to ground: sticking in great toe.
Moving fingers: pain in forearm <.
Motion: headache >; asthma <.
Overexertion: palpitation <.
Swallowing: tenderness in throat <.
After motion: aching in testicles.
Gaping; cough <.
Deep breathing: pressure in sternum >.
Inspiration: pain in intercostal muscles <.
Walking: shooting from nipple to back.
Excitement: palpitation <.

[36] **Nerves.** Nervousness.
Hypersensitiveness; when nervous system predominates over the arterial.
▮▮Hysteria, with much trouble about throat or œsophagus; well-marked globus hystericus; spasms of lungs, etc.
Hysteria, hysteralgia; hypersensitiveness; every excitement that brings on an attack causes globus hystericus.
▮Twitching and jerking of muscles.
▮▮Nervous affections after suppressed discharges.
▮Epileptiform convulsions caused by worms.
▮Chorea.
Fainting with colic.
▮▮Clumsiness of body; feeling of rigor.
Feeling of general heaviness; weak when standing or lying; dry mouth.
At times slight inclination to faint, accompanied by great apprehension.
Faintness, with quick pulse.
Attacks of faintness, followed by fluttering of heart.
Attacks of faintness, with anxiety, as if he would die, and with one attack desire for suicide.

Google

With one attack of faintness there was shaking of limbs and as if bowels shook.
With faintness, shivering and very feeble action of heart.
Faintness on beginning to eat, especially at dinner, with full and frequent beating of heart.
With faintness, alternate heat and chill; sweat on small of back and trembling.
Faintness worse day after a seminal emission.

[37] **Sleep.** Inclined to sleep, much against his habit.
Drowsy with sweat.
Sleepy in evening; weariness.
Sleeplessness after midnight. (*Conium* before midnight).
About midnight violent pains through l. half of body, from top to toe.
Pain in ulcer at night, almost unendurable.
Woke in night with distension of stomach, pain across chest and feeble heart.
Worse in bed and after sleep; > after getting out of bed.

[38] **Time.** Morning: abdomen feels beaten; fulness and eructations; tearings in joints; chest oppressed.
8.30 to 9 A.M.: chills, with heat of face.
11 A.M.: faint feeling <; goneness in stomach.
During day: expectoration worse.
Afternoon: tension in head <; drawing in glans penis; cough; shivering over back; heat in toes.
Between 3 and 4 P.M: coldness and trembling, with stitches in head.
Evening: vanishing of sight; headache <; hysteria; pains often better; sleepy.
Evening till 2 A.M.: neuralgia.
Night: pain in eyes <; cough <; palpitation; ulcer <; pain across chest; bone pains; pain in ulcer unbearable.
Midnight: pain l. half of body.
After midnight: sleeplessness.

[39] **Temperature and Weather.** In room: all headaches worse.
Open air: headache >; eye >; heart >; desires to be in open air.
Could not remain in-doors, must walk about in open air.
In warm feather beds: lower limbs ache more.

[40] **Fever.** Chills run over body from time to time.
Sense of rigor.
Crawls run over back, in afternoon.
Chill, coldness and dryness of skin.
Every day, between 3 and 4 P.M., coldness and trembling, with unbearable stitches in head.
One-sided heat.
Heat in toes; afternoon.

Google

With heat of face; cold hands and feet, and chills of back from 8.30 to 9 A.M.
With faintness sweat on small of back, hot and cold alternately and trembling.
Want of thirst, particularly heat without thirst.
Heat in face, after dinner, with anxiety and sleepiness; without thirst.
Sweat wanting; only occasionally cold, moist skin; cold sweat on limbs; vertigo.
Sweat with drowsiness.
Shiverings, most over back, afternoon; heat in face, with anxiety and sleepiness, but without thirst.

41 **Attacks, Periodicity.** Pains intermit at regular intervals.
Intermitting pinching pains in ulcers.
‖Crushing pain regularly < from evening till 2 A.M.
θNeuralgia after amputation.
Every day between 3 and 4 P.M.: coldness and trembling, with unbearable stitches in head.

42 **Locality and Direction.** Right: pain in parietal; itching in eye; pressure in wing of nose; stitches in hypochondrium; stitches in diaphragm; pain side of chest; stitches behind scapula; pain in fibula.
Left: pain and tension in head; sudden pain in temple; bleeding from nostril; pressure in orbit; corner of mouth puffed; pressure in intercostal muscles; shooting below nipple; drawing side of neck; burning along vertebræ; twitching upper arm joint; cramplike twitching in thumb; throbbing in great toe; pain in half of body.
Above downward: burning in chest; tearing in forearm.
Within outward: burning in eyeballs; pain in chest; pressure in intercostal muscles.
Below upward: œsophagus seeming drawn upward; darting stitches in chest; globus hystericus; flatus passes; pressure in liver.
Before backward: shooting from nipple.
Reverse action of involuntary muscles; a sort of antiperistaltic motion.

43 **Sensations.** As if a nail or plug were driven into brain; as if nose would burst; as if a ball or lump were ascending in throat; as if beaten in epigastric region and abdomen; as if whole brain was compressed; as if intestines were torn out; as if lungs could not be expanded; heart feels bound tightly together as if it could not beat; as if heart was swollen; as if one pressed very sharply with point of finger on xiphoid cartilage; as if splinter of bone was sticking in the r. fibula; as if peristaltic motion were reversed; as if heart would burst.

Google

Like from a dull stick, pressure in temples.
Sharp pain through eye into head.
Sudden pain, inward pressing, like pointed plug in l. temple.
Sudden deep penetrating stitches like shocks under l. frontal eminence.
Drawing wavelike pressure through l. forehead.
Gurgling sensation in head.
Sensation of water swashing in head.
Tender feeling in throat.
"Gone feeling" in epigastrium.
Pain as from a cold in upper abdomen.
Lancinating: from r. loin towards ribs.
Winding and twisting in bowels.
Griping: in region of navel.
Laborlike pain: in uterus.
Flying stitches: in forehead, temples and sides of head.
Stitches: under l. frontal eminence; in eyes; darting from chest to œsophagus; about lower ribs; in stomach; in r. hypochondrium; in diaphragm; on penis; in chest; in big toe; in and behind r. scapula; in muscles of back; along sacrum down to anus; in elbow; in upper arm.
Tearing stitches: in r. forearm.
Tearing: in forearm down to tips of fingers.
Cutting: in stomach; in uterus; below scapula.
Jerking: through head; in upper arm.
Boring: above eyebrows; l. loin.
Shooting: below l. nipple through to back; around arm.
Sticking; in eyes; in l. loin; from r. ribs to spine; on ball of great toe.
Burning: above eyebrows; in eyes; in mouth; in fauces and pharynx; in œsophagus; under sternum; in chest; along vertebræ; in roots of toe nails: of skin.
Drawing: in caries of lower maxilla; in lower incisors; in abdominal muscles; in glans penis; below scapula; along upper arm to elbow; in wrist joints.
Pressing: in head; in forehead and l. head; in temples; on frontal eminence; external border of l. orbit; in eyes; in nose; on chin; in epigastrium; in stomach; from liver to chest; in abdomen; in perineum; in sternum; in region of heart.
Pressing together of lids as if overcome with sleep.
Bearing down: in genitals.
Constriction: of chest; of throat; about heart.
Cramp: in forehead.
Cramplike sensitive twitching: metacarpal bone of l. thumb.

Google

Scraping sensation: on styloid process of ulna.
Soreness: in kidneys; of gums.
Aching: of testicles; along vertebræ; in wrist joints.
Dull pain: in l. side of head.
Undefined pain: in l. side of head to eyes; about heart; in joints and limbs; in ulcers; in perineum; in sacrum; in forearm.
Tension: in head; of brain; over nasal bones; in various places in face; in abdomen.
Throbbing: in head; in and around eye; in pit of stomach; in chest; in big toe.
Fulness: in head; in stomach; about heart.
Heaviness: in intestines.
Numbness: over nasal bones; of bones of face; on chin.
Heat: of face; increased warmth in stomach; in spleen; in abdomen; in toes.
Dryness: of eyes; in mouth and throat; in œsophagus.
Coldness: in head; in intestines (see 15); crawls over back; of skin.
Tickling: in trachea.
Itching: in r. eye; of skin.

" **Tissues.** Dark red, hot swellings.
Arthritic and cold swellings.
‖Venous pulsations; congestion of portal vein; congestive fulness about heart and chest, with asthma; heat of face and ears, after eating; pressure on chest, etc.; copious discharges; all signs of fulness of venous system.
‖Dropsy, ascites, from abdominal venous stasis.
‖Obesity; seldom of use in bone diseases unless body is heavy, bloated.
‖Scraping sensation on bones; whole body puffed.
‖Caries in scrofulous, and after abuse of mercury.
‖Glands hard, swollen, hot and throbbing, with shooting, jerking pains; scrofulous complaints.
Neuralgia of stump after amputation of thigh.
‖Osteitis, caries, bluish redness and swelling of parts.
Ulcers, with bluish edges, hard, painful to slightest touch; thin, very offensive pus.
Interstitial distension of bones.
‖Soft enlargement of bones, also curvature.
Softening of bones.
‖Nightly bone pains in syphilis.
Painful osteitis.
‖Bones threatened by syphilis. θIritis.
‖Caries of bones; adhesion of skin in caries.
‖Scrofulous caries of bones, even necrosis.
‖Ulcers with fetid, ichorous, bloody, serous pus; with bluish, partly raised edges, painful to slightest touch.

Digitized by Google

‖Ulcers deep, flat, fistulous, affecting bone.

45 **Touch. Passive Motion. Injuries.** Touch: pain in head >; pains extend through eye into head; aching of testicle; ulcers extremely sensitive; pains cease or change place.

Pressure: eye >; colic improved.

Most extreme sensitiveness in vicinity of carious ulcer of tibia, of superficial skin-sores, and also of ulcer itself; patient cries out if finger touched a place distant from ulcer; removal of charpie causes most severe pain.

Better from rubbing.

Scratching: itching better.

Riding in carriage: fulness in head <; drawing side of neck <; bearing down in genitals <.

Injuries suppurate.

Cold gangrene.

Wounds appear bright red, raw, covered with crust of tenacious lymph.

After amputation: neuralgia of stump.

Ulceration from burns or scalds or other causes, with great sensitiveness to suffering; child screams on seeing dressings prepared, dreads and shrinks from the approach of any one likely to touch sore.

46 **Skin.** Dark red, hot swellings.

Itching, pricking, burning of skin; itching > by scratching.

Skin puffed up, inflamed.

‖Sphacelus.

Flat eruptions, painful.

‖Ulcers with extreme sensitiveness; patient flinches from even the softest dressing; or from near approach of any one.

‖Ulcers with high, hard, bluish edges, sensitive to touch, easily bleeding; pus profuse, greenish, thin, offensive, even ichorous. See 44.

‖Shooting pain around ulcer.

‖Ulcers grow black.

‖‖Old scars break open and turn black.

Ulcers penetrating to bones, discharging thin, fetid ichor.

Ulcers or sores looking raw, bloody or dark; or discharge copiously.

Quivering in skin.

47 **Stages of Life, Constitution.** Nervous women, subject to hysteria.

‖Phlegmatic temperament.

‖‖Scrofulous, bloated, clumsy children.

‖Venous, hemorrhoidal constitutions.

‖‖Nervous people.

Google

Very weak or delicate persons suffering from very great sensitiveness.
‖Syphilitic patients who have taken much mercury.
‖Girl, æt. 9, chorea.
‖Woman, æt. 21, in sixth week after first confinement not milk enough, after third could nurse full nine months.
‖A multipara, æt. 34; milk had disappeared tenth day in seven confinements.

[48] **Relations.** Antidotes to *Asaf:* ‖*Pulsat.*, ‖*Caustic.*, ‖*Camphor.*, ‖*Cinchon.*, ‖*Mercur.*, ‖*Valer.*
Useful in ailments from ‖*Pulsat.*, or from abuse of ‖*Mercur.* in syphilis, and from effects of alcoholism.
Similar to: *Arg. nitr.* (better open air); *Aurum met.* (bone diseases, iritis, etc.); *Castor.*, *Cinchon.*, *Caustic.*, *Crot. tig.* (pertussis); *Hepar* (sensitiveness around ulcers; faints from pains); *Ignat.* (hysteria); *Mercur.* (syphilis); *Mosch.* (hysteria, spasms of lungs, fainting, etc.); *Phosphor.* (pertussis); *Pulsat.*, *Thuya*, *Valer.*
Family relations: *Ammon.*, *Cicut.*, *Conium*, etc.
Frequently indicated after *Pulsat.* and *Thuya.*

ASARUM EUROPÆUM.

Haselwurtz. *Aristolochiaceæ.*

Introduced and proved in 1817 by Hahnemann (14) and his pupils (254). The second edition appeared in 1825 (16 and 254). It was physiologically arranged by A. G. Schneider in 1853. The root alone is better than the whole plant.

[1] **Mind.** Gradual vanishing of thought, as when falling asleep.
Stupid feeling in head, has no desire to do anything.
‖Imagines he is hovering in air like a spirit, when walking in open air.
Great merriment, alternating with occasional momentary quiet or gloominess.
Tearful sadness and anxiety.
Melancholic irritability.
Nervous irritability and exaltation. See 24.
‖Cold "shivers" from any emotion.

[2] **Sensorium.** Confusion of head less perceptible when walking than when sitting, with pressure in eyes as with a dull point from within outward, especially below r. eyelid.

Google

During retching all symptoms increase, only stupid feeling in head decreases.
Sensation of lightness in limbs; when she walks she thinks she is gliding through air.
‖Vertigo, with anxiety. θCholerine.
Early in morning, when rising, dizziness and drowsiness of head, with headache in l. side of forehead.
Stupid feeling in head, has no desire to do anything.

[3] **Inner Head.** Aching pain in forehead, with muddled state of mind.
Aching in temples, especially left.
Violent pressure in forehead, downward upon eyes.
Frontal headache, with nausea.
Tearing, pressive pain in l. temple.
Pain, as from contraction in forehead, temples, and behind ears, with watering and burning of eyes, < in afternoon (5 P. M.), > when sitting, and by washing, but not by wiping.
Dull headache in l. temple, afterwards below parietal bones, lastly in occiput.
Pressive headache: above root of nose; in temples, particularly left.
Pressure over greater part of brain, from without inward.
Drawing headache, as if temple would be drawn in (at noon); ameliorated in open air and when lying down.
‖Intense, compressive headache in l. temple, and behind ears; more violent when walking or shaking head; > when sitting.
Tearing, pulsating pain in forehead, excited by stooping.
Throbbing headache in morning, early, when rising.
‖Headache, with pain in both eyes, and nausea.

[4] **Outer Head.** ‖Pain externally on sides of head. θHeadache.
Itching, beginning with fine stitches, below l. temple.
Sensation of coldness at a small spot on l. side of head, above ear.
Tension of whole scalp, making hair feel painful.
‖Hair does not bear combing.

[5] **Sight and Eyes.** Obscuration of sight.
When reading, sensation in eyes as if they would be pressed asunder.
‖Cannot read with l. eye, aggravated by bright light.
Asthenopia, accompanied by congestive headaches; eyes < morning and evening, when out-doors in heat and sunlight; > in middle of day and by bathing them in cold water.
The cold air is pleasant to eyes; sunshine, light and wind are intolerable.
‖Jerking pains in eyes, with vomiting and hysteria. θAfter operation on eye.

Google

Pressure in l. eye. See 2.
Staring eyes.
Painful feeling of dryness in eye.
Thickening of cornea.
Sharp pain over l. eye, with running of tears and sensitiveness of sight.
Injected conjunctivæ, with stinging in canthi.
Left upper eyelid is somewhat swollen; eye cannot endure much reading.
Inflamed eyes, bleareyedness.
Watering and burning of eyes.

[6] **Hearing and Ears.** Oversensitiveness of nerves, scratching of linen or silk is insupportable.
Dull roaring in l. ear like a distant tornado; in r. distinct singing.
Diminished hearing of l. ear.
Sensation as if a skin was stretched over r. external ear, with tensive pressure within; ≺ in cold.
Sensation as if ears were closed or plugged up with some foreign substance.
Deafness in one or both ears. θCatarrh.
Pressure and tension in region of orifice of meatus externus with many symptoms.
Right auricle hard to touch.

[7] **Smell and Nose.** Sharp aching above roots of nose.
Some coryza and sneezing, with sensation as if ears were closed or plugged up with some foreign substance, with deafness.
Discharge of bloody mucus from nose; streak of pure blood.
Dry coryza; l. nostril stopped up.
Tickling in nose, causing, after unsuccessful efforts, a sneeze, and discharge of clear fluid.
Violent sneezing.

[8] **Upper Face.** Warmth of cheeks.
Fine stinging on r. cheek; burning stinging pain in left.

[9] **Lower Face.** Dryness of inner side of lower lip.
Cutting pain, with cramp at articulation of lower jaw.

[10] **Teeth and Gums.** Teeth of l. side feel as if hollow.
Cold feeling in upper incisors as from a cold breath.
Smarting sensation in gums.

[11] **Taste and Tongue.** Most disgusting taste in mouth, at first sour, later bitter. θCholerine.
Bread tastes bitter.
Tobacco tastes bitter when smoking.
Burning sensation across tongue.
Biting on tongue.
Tongue clean, with choleralike symptoms.

Google

‖Tongue somewhat whitish and thickly furred. θCholerine.

[12] **Inner Mouth.** Mucus in mouth, of a sweetish, insipid taste.
Accumulation of much water in mouth, with nausea.
Cold, watery saliva accumulates in mouth.
‖Stomacace.

[13] **Throat.** Dryness in throat, with stitches.
Scraping in throat.
Tough mucus in throat; is unable to raise it, or hawk it loose.
Swallowing difficult, as from swelling of glands of throat.
Accumulation of tough phlegm in throat.

[14] **Appetite, Thirst. Desires, Aversions.** Early morning hunger.
‖‖Want of appetite, even nauseated by food. θCholerine.
Loathing of food without any gastric derangement.
‖‖Unconquerable longing for alcohol.

[15] **Eating and Drinking.** After dinner: great lassitude.
When drinking: chilliness.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.
Imperfect eructations reaching only to upper part of chest.
‖‖Frequent empty eructations. θCholerine.
Putrid eructations.
Heartburn, with sour belching, setting teeth on edge.
Nausea with shuddering.
Nausea, with disinclination to attend to business; laziness and sensation as if without a head.
‖‖Attacks of nausea; < after eating; tongue clean. θCholerine.
‖‖Nausea and vomituritio. θCholerine.
Violent, empty, retching, which increases all symptoms, only relieving head.
Vomiting: of only a small quantity of greenish, somewhat sour fluid; with great straining, and sensation about ears as if head would split; of bile and mucus streaked with blood; with diarrhœa and violent colic.
‖Vomiting of whitish or greenish phlegm. θCholerine.
‖Vomiting, with great anguish, under violent exertion, with chilliness.
After vomiting, relief of head symptoms.

[17] **Scrobiculum and Stomach.** ‖‖Pressing, digging and feeling of discomfort in pit of stomach. θCholerine.
Pressure in stomach, scrobiculum and abdomen.
Sensation of constriction in region of diaphragm.
‖‖Horrible sensation at epigastrium when getting awake in morning. θWith drunkards.

[18] **Hypochondria.** Aching in spleen.

[19] **Abdomen.** ‖Oppression around navel, three or four hours after each meal, lasting one hour.

Google

Cutting bellyache, with vomiting.
Pinching pain in l. side of abdomen extending to back.
‖Pain in region of descending colon with discharges of stringy mucus.
Cutting pain in upper abdomen, > by passing flatus.
Violent colic and vomiting.
Rumbling and gurgling in abdomen.
‖Worms.

[20] **Stool and Rectum.** Stools whitish-grey, or ash-colored, on the top like bloody mucus.
‖‖A long yellow twisted string of inodorous mucus in three or four stools, with pain in abdomen.
‖Diarrhœa, passes shaggy masses of mucus, inodorous and full of ascarides.
Diarrhœa of tenacious mucus.
An hour and a half after stool he has another pressing desire, with cutting in abdomen and rectum before and during stool, which is softer than the former.
‖Yellowish brownish diarrhœa. θCholerine.
‖Lientery; watery stools after a meal, very weakening.
‖Scanty, yellow, mucous stool.
‖Diarrhœa: in chilly, nervous persons; from debility; during hectic or slow fever.
‖Before stool, cutting in abdomen and sharp stitches in rectum, from above downward.
‖During stool: discharge of thick, black blood; prolapsus ani.
‖After stool: pressing and straining, and discharge of white, viscid, bloody mucus.
‖Costiveness. θHeadache.
Passes thick, black blood, with stool.

[21] **Urinary Organs.** Constant desire to urinate.
Pressure on bladder during and after emission of urine.

[22] **Male Sexual Organs.** ⁝Impotence.
Violent pain in l. groin, darting through urethra to glans, in which a violent smarting, contracted pain remains for a long time.

[23] **Female Sexual Organs.** Menstrual colic.
Catamenia too early and long lasting, blood black.
‖Headache often appears before and after catamenia.
‖At appearance of menses violent pain in small of back, which scarcely permits her to breathe.
‖Tenacious yellow leucorrhœa.
‖Vaginal fistula.

[24] **Pregnancy. Parturition. Lactation.** Excessive sickness during first months of pregnancy, stomach rejecting everything.
‖‖Nausea and vomiting during pregnancy.

Google

Threatened abortion from excessive sensibility of nerves; even imagining something unpleasant causes thrills to pass through her, momentarily arresting thought.

‖ Long yellow twisted string of inodorous mucus (see 20), with pain in belly occurring from two to four months after confinement.

[25] **Voice and Larynx. Trachea and Bronchia.** Stitches and constriction in larynx.

[26] **Respiration.** Breath very short (night).

Whistling breathing at beginning of coughing.

Short, jerking breathing on account of stitches and constriction of larynx.

Dull stitches in both lungs during inspiration.

[27] **Cough.** Frequent cough on account of mucus in chest; mucus rises into throat, causing difficult breathing, and finally cough, with expectoration.

Inhalation causes irritation to cough, in throat.

‖ Constant short, hacking cough of consumptives.

Cough relieves constriction of larynx.

[28] **Inner Chest and Lungs.** Stitches in r. or both lungs during inhalation.

Sharp pressure in region of last ribs, as with back of a knife.

Pain around both lungs, as if they were constricted by a thin wire.

Pain in sides.

[29] **Heart, Pulse and Circulation.** Pulse: quick and strong; full and accelerated.

The arterial beat is felt through whole body.

[30] **Outer Chest.** Burning sensation, r. chest, more external than internal.

[31] **Neck and Back.** Stiff neck, with thirst, early in morning.

Dull stitches under scapulæ.

Laming pain as if bruised in one of cervical muscles, when moving head.

Sensation in muscles of neck as from a tight cravat, or as if pressed upon by a dull edge.

Sore pain along inner border of r. scapula.

Burning pain, with stitches in small of back, while sitting.

Tearing pain from crest of one ilium to the other.

Bruised pain in back.

‖ Violent pain in small of back, she can hardly breathe; beginning of menses.

[32] **Upper Limbs.** Sweat in axillæ smelling sour.

Violent stitch in both shoulders during motion or rest.

Contractive tensive pain in deltoid muscle, when laying hand on table, and while it lies there.

Drawing laming pain in l. wrist.

Google

Sudden drawing burning pain from wrist through thumb and index finger.

[33] **Lower Limbs.** ⁝Chronic sciatica.

Dull pressure in r. hip.

Drawing tensive pain in head of l. femur.

Severe pain in hip joint and middle of thigh when stepping; the foot feels as if paralyzed, he cannot step properly thereon.

Severe rheumatic tearing stitches in knees, during motion and at rest.

Lassitude in knees.

Drawing in hamstrings when lying in bed; in knee.

Gurgling sensation in patella.

Bruised feeling in l. tibia.

Stitches in ankles and soles.

The little toes pain as if frozen.

[34] **Limbs in General.** ❙Lightness of all limbs; he does not perceive that he has a body.

Occasional darting and tearing pains in upper and lower limbs.

Rheumatism < in dry, cold weather.

[35] **Rest. Position. Motion.** Sitting: confusion of head <; pain in head >; pain in small of back; headache; nausea and weakness <.

Lying: headache >; drawing in knees and hamstrings; weakness and nausea >; heat of face and palms.

Rest: stitch in shoulders; stitches in knees.

Motion: stitch in shoulders; stitches in knees.

Walking: confusion of head >; headache <.

Shaking head; headache <.

Moving head: pain in cervical muscles.

Stooping: pain in forehead.

[36] **Nerves.** Excessive sensibility of all nerves. See 24.

Great nervous irritation.

❙Hysteria.

❙❙Excessive sensibility of all the nerves when merely thinking (and this he must continually) that some one might with the finger tip or nail scratch even lightly on linen or similar material; a most disagreeable sensation thrills through him, arresting momentarily all his thoughts and actions.

Great lassitude.

Great faintness and constant yawning.

General weary feeling.

So weak and nauseated towards evening, that when he rises to sitting posture he feels as if he would instantly sink down and die; he must lie in bed.

So weak he staggers, unless his mind is on his walking.

Google

[37] **Sleep.** Evening in bed, agitation in blood, prevents sleep for two hours.
After lying down in evening, sweat.
Condition of mind as if just falling asleep; gradual vanishing of ideas.
Frequent yawning.
Great drowsiness by day.
Restless sleep.
Short breath at night.
Nightly vexatious dreams about humiliations.

[38] **Time.** Morning: dizziness and drowsiness; headache on rising; eyes <; hunger; horrible sensation in epigastrium on awaking; stiff neck.
Forenoon: chilly, cold feeling <.
Midday: eyes >.
During day: drowsiness.
5 P.M.: pain in head <.
Towards evening: weakness and nausea <.
Evening: eyes <; heat of face and palms; cutaneous diseases <; sweat.
Night: shortness of breathing.

[39] **Temperature and Weather.** Dry, cold weather: rheumatism <.
Open air: headache >; chilly, cold feeling worse.
In heat, sunlight and wind: eyes worse.
Cold water: eyes better.
Cold air: eyes >; ears worse.
Hottest weather: cold hands, feet, abdomen or knees, not better.
Covering, or warm room: cold feeling no better.
Washing: pain in head better.
Damp weather: symptoms improve.

[40] **Fever.** Chills during day, without thirst.
‖Nervous chilliness, single parts icy cold. θCholera season.
‖Cold hands, feet, knees or abdomen; even hottest weather does not relieve; timid, nervous persons.
Chill and cold feeling in forenoon, after eating or drinking, and in open air, generally with heat of head.
‖Great want of vital heat; feels cold continually.
‖Cold feeling, not relieved by covering, or warmth of room.
Heat in evening, after lying down, particularly in face and palms of hands.
Alternate flushes of burning heat and coldness.
Sweat increased at night, of sour smell; most profuse in axillæ.
Sweats easily, particularly on upper part of body.
‖Slow fevers, no reaction from spinal enervation.

Google

Typhus.

42 **Locality and Direction.** Right: pressure below eyelid; singing in ear; sensation of skin stretched over external ear; pressure within ear; stinging in cheek; stitches in lungs; burning in chest; pain border of scapula; pressure in hip.

Left: side of forehead and temple ache; coldness side of head; pressure in eye; upper eyelid swollen; roaring in ear; ear deaf; nostril stopped; stinging pain in cheek; teeth feel hollow; pain side of abdomen; pain in groin; pain head of femur; bruised feeling in tibia.

Above downward: pressure in forehead; cutting in abdomen.

Within outward: pressure in eyes.

Without inward: pressure over brain.

Before backward: pain in abdomen.

43 **Sensations.** As if temple would be drawn in; teeth as if loose; as if without a head; foot feels as if paralyzed; as if he would sink down and die; lightness in limbs, as if gliding through air; as if a skin was stretched over r. ear; as if ears were plugged; as if pressed asunder in eyes; as if constricted by a thin wire both lungs; as from a tight cravat in muscles of neck; as if frozen in little toe; horrible sensation at epigastrium.

Cutting: articulation of lower jaw; bellyache; in upper abdomen; in rectum.

Violent pain: in l. groin darting through urethra to glans; in small of back.

Tearing pulsating pain in forehead.

Tearing: in l. temple; from crest of one ilium to the other; in knees; through limbs.

Darting: through urethra; through limbs.

Dull stitches: in lungs; under scapulæ.

Fine stitches: below l. temple.

Stitches: in throat; in rectum; in larynx; in small of back; in shoulders; in knees; in ankles; in soles.

Stinging: in canthi; on r. cheek; and burning in l. cheek.

Burning: of eyes; across tongue; in r. chest; in small of back.

Biting: on tongue.

Smarting: in gums; in glans penis.

Pinching: in l. side of abdomen to back.

Compressive pain: in l. temple; behind ears.

Drawing: in temple; in l. wrist; through thumb to index finger; in head of l. femur; in hamstrings.

Sore pain: along inner border of r. scapula.

Scraping: in throat.

Google

Aching: in forehead; in temples; above root of nose; in spleen.
Rheumatic pain: in knees.
Bruised pain: in cervical muscles; in back; in l. tibia.
Sharp pain: over l. eye.
Laming pain: in cervical muscles.
Pressure: in l. eye; in eyes as with a dull point from within outward; in forehead upon the eyes; above root of nose; over brain; in pit of stomach and abdomen; in rectum; on bladder; in region of last ribs; in r. hip.
Throbbing: headache.
Jerking: in eyes.
Cramp: at articulation of lower jaw.
Contractive pain: in forehead, temples, and behind ears; in glans penis; in deltoid muscle.
Constriction: in region of diaphragm; in larynx.
Tension: of scalp; in orifice of meatus.
Tensive pressure: in ear.
Undefined pain: in eyes; on sides of head; in region of descending colon; in small of back; in sides; in abdomen.
Gurgling: in patella.
Paralyzed feeling: in foot.
Oppression: around navel.
Coldness: above l. ear; in upper incisors.
Itching: below l. temple.
Tickling: in nose.
Dryness: in eye; in throat; inner side of lower lip.

[44] **Tissues.** Irritability of the nerves.

[45] **Touch. Passive Motion. Injuries.** Touch: auricle hot.
‖After operation on the eye: jerking pain.

[46] **Skin.** Discharge of bloody and slimy matter from ulcers.
: Jaundice.

[47] **Stages of Life, Constitution.** ‖Plethoric young woman suffered for years from headaches.
Nervous temperament, excitable or melancholic mood.
‖Nervous, anxious people. θDuring cholera season.
‖‖Drunkards; popular in Russia.

[48] **Relations.** Antidotes to *Asar.*: *Camphor*, vinegar, vegetable acids.
Followed by: *Bismuth.*
Compare: *Acon.*, *Aloes* (stringy stools); *Camphor* (cholerine); *Cuprum*, *Hepar*, *Ipec.* (cholerine); *Mercur.* (stringy stools); *Nux vom.*, *Phosphor.*, *Podoph.* (stringy stools); *Pulsat.* (stringy stools); *Sepia*, *Stramon.*, *Sulph. ac.* (stringy stools); *Tabac.* (cholerine); *Veratr.* (cholerine).

Google

ASCLEPIAS SYRIACA.

Milk or Silkweed. *Asclepiadaceæ.*

The oldest and best proving was made by Jeanes; later proved by Clerborne and Pattee.

Preparation: tincture of root.

[2] **Sensorium.** Vertigo, dulness and stupidity, with headache.
Dulness with pain in l. side of head.

[3] **Inner Head.** Violent headache between eyes; a sense of constriction across forehead.
A feeling as if some sharp instrument was thrust through from one temple to other, with feeble pulse and cool skin; also vomiting.
‖Nervous headaches, which are attended by dry skin and scanty urine, cool skin and feeble pulse, and followed by sweating or profuse urination.
Congestive headache, from suppression of sweat or urine, and fever.
When the drug did not cause sweating or profuse urination, it caused violent headache, with vertigo, quick, full pulse, and nausea.
⁞Rheumatic headaches.
Disordered feeling, with slight pain in l. side of head.
At times severe pain, for several hours, in whole of l. head.

[6] **Hearing and Ears.** Shooting pain in l. ear.

[8] **Upper Face.** Appeared dull and stupid.

[10] **Teeth and Gums.** Pain in carious teeth.

[11] **Taste and Tongue.** Tongue coated with a white fur.

[13] **Throat.** Burning and tickling in fauces with nausea and headache.

[14] **Appetite, Thirst. Desires, Aversions.** Great appetite even a few hours after a meal.
Increased appetite, notwithstanding vomiting and headache, with constipation.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Excessive nausea, with violent headache.
A striking, well-marked belching of food with its proper taste (similar to *Ant. crud.*).
Severe and long-continued vomiting, leaving behind a sensation of rawness in stomach and a slight pain.
After vomiting: headache; relaxed feeling; frequent, feeble pulse.

Google

[17] **Scrobiculum and Stomach.** Uneasiness and slight pain in stomach with diuresis and inclination to stool.
Rawness in stomach after vomiting.
Heat of stomach and abdomen.
⁞Indigestion.

[18] **Hypochondria.** Increased secretion of bile.
⁞Hepatic derangements.

[19] **Abdomen.** Rumbling in bowels, apparently in superior flexure of colon, as if diarrhœa would set in.
Pain and soreness in abdomen, with or without distension.
Stitching and aching pain in l. lumbar region of abdomen.
Considerable rumbling in all parts of abdomen, as before diarrhœa.
⁞Peritonitis.
⁞Flatulence and flatulent colic.

[20] **Stool and Rectum.** ‖Inclination to evacuate bowels, with nausea and diuresis.
⁞Diarrhœa.
⁞Dysentery, during febrile stage.
Diarrhœa with persistent nausea and vomiting.
Copious evacuation, in evening, soft, brown, with slight colic.
Soft yellow stool at noon, with increase of appetite.
Diarrhœa with excoriation of anus.
▮Constipation; pain in r. side, lower limbs, and loss of appetite.

[21] **Urinary Organs.** Enormous increase of urine.
Pale-colored urine with light specific gravity.
‖Increase of solid matter in urine.
Scanty urine with headache.
Profuse urine after headache.
Burning in urethra when urinating.

[22] **Male Sexual Organs.** Tickling sensation at end of penis.
Pressing and pain in groins and at abdominal ring, more in l. side.

[23] **Female Sexual Organs.** Dysmenorrhœa with diuresis.
▮Suppression of menses during dropsy.
πIntermitting, bearing down, laborlike pains. θDropsy.
Severe bronchial irritation with burning and tickling in fauces.
▮Influenza; catarrhal fevers; bronchitis.
▮Hay sickness.

[26] **Respiration.** ⁞Asthma.

[27] **Cough.** ⁞Whooping cough.

[28] **Inner Chest and Lungs.** Pain in l. side of chest on deep inspiration.
⁞Catarrh. ▮Pleurisy. ⁞Pneumonia. ⁞Consumption.

[29] **Heart, Pulse and Circulation.** Action of heart increased.

Google

Pulse lowered from 98 to 67, first day; 63, third day; 60, fourth, fifth and sixth days.
Pulse feeble after vomiting.

[31] **Neck and Back.** ‖Pain about lowest dorsal vertebra, cutting and aching.
Chilliness in back, when pain there began to abate.

[32] **Upper Limbs.** Pains with feeling of heaviness in upper limbs.

[33] **Lower Limbs.** Boring pain in l. tibia.

[34] **Limbs in General.** ‖Pains in limbs.

[36] **Nerves.** ⁝Hysteria.

[37] **Sleep.** Drowsiness; slept rather hard during night.

[38] **Time.** Morning: headache on awaking.
Noon: soft yellow stool.

[40] **Fever.** Coldness of skin on surface, with feeble pulse, and peculiar headache; after vomiting.
Skin moist.
Profuse sweat.
⁝Fevers of different types.

[42] **Locality and Direction.** Right: pain in side.
Left: pain in side of head; shooting in ear; pain in lumbar region; pain in groin; pain in side of chest; boring in tibia.

[43] **Sensations.** As if a sharp instrument was thrust from temple to temple.
Violent pain: between eyes.
Boring: in l. tibia.
Cutting: about lowest dorsal vertebræ.
Stitching: in l. lumbar region of abdomen.
Shooting: in l. ear.
Laborlike pain: in sexual organs.
Burning: in fauces; in urethra.
Rawness: in stomach.
Soreness: in abdomen.
Aching: in l. lumbar region of abdomen; about lowest dorsal vertebræ.
Pressing: in groins and abdominal ring.
Heaviness: in upper limbs.
Tickling: at end of penis.
Constriction: across forehead.
Undefined pain: in l. side of head; in carious teeth; in stomach; in abdomen; in l. chest; in r. side; in limbs.

[44] **Tissues.** ‖Has especial influence on nervous tissues.
‖Dropsy after scarlatina with nephritis.
‖Headache from checked sweat, or retention of effete matters; dropsy from same causes or diseases of kidneys.
‖Uræmia: urine after profuse discharges is scanty or suppressed.

Google

‖Acute rheumatism, confined to large joints, with much pain and swelling.
‖Chronic rheumatism.

[46] **Skin.** ‖Eruptions.

[48] **Relations.** Cognates: *Act. rac., Bryon., Colchic.*
Side relations: *Asclep. tuber.* and *Asclep. vincet.* (particularly useful in diabetes mellitus).

ASCLEPIAS TUBEROSA.

Pleurisy Root. *Asclepiadaceæ.*

An old and popular drug, proved by M. A. Savory, and published in the French journals, 1858; from them, 1860, into German; from there translated by M. J. Rhees, in the June and July numbers of the Am. Hom. Review; same year, 1859, translated by Marcy; altogether condemned by Hale. Later proved by Th. Nicol; see Hale, N. R., 2d ed., p. 121. The symptoms taken from him are marked N.

[1] **Mind.** Excessive dejection.
Weakness of memory.
Difficulty in thinking collectedly.
Towards evening unusual elevation of spirits. N.
At 9 P.M. the cheerful mood changed, and without any cause he became fretful and peevish. N.
Languid and dull all day both in body and mind. N.

[2] **Sensorium.** Feeling of drunkenness with weakness of sight, after smoking a very little.
Swimming of head, with dulness behind forehead. N.
Head feels dull and gloomy, 9 A.M. N.

[3] **Inner Head.** Pain in forehead with a feeling of heaviness in side, continuing all day.
Headache is present almost daily, generally most severe early in morning.
Headache in morning while rising, with weakness, so that he must lie down again, continued all day and night, relieved somewhat by a warm foot bath.
‖Arthritic cephalalgia.
‖Gastric cephalalgia.
Dull aching headache in forehead and vertex, < by motion, > lying down. N.
Headache presses deep on base of skull. N.
‖Pain in forehead from coughing.

Google

[4] **Outer Head.** Pricking as if with nails in head and at same time in other parts.
Pain in scalp, l. side of occiput, like touching a pustule, continuing one day.
Falling out of hair.
[5] **Sight and Eyes.** Transitory pain behind l. eyeball.
Broad, dark spots before eyes, with very slow pulse, 55.
Itching in canthi and lids of r. eye.
Inflammation of conjunctiva; for many days.
Pain in eyes by gaslight.
Eyes look languid and fatigued.
Feeling as if sand was in eyes.
Lower lids painful as if ulcerated.
[7] **Smell and Nose.** Itching in nose and face.
Pustules on nostrils.
Stinging in nose as from a flea.
At first dry, then fluent coryza during first few days, with much sneezing subsequently.
‖Snuffles of children.
‖Fluent coryza with much sneezing.
Blowing of blood from one nostril.
[8] **Upper Face.** Yellowness of face.
Hippocratic face after a violent diarrhœa, on 15th day.
[9] **Lower Face.** Many vesicles on lips.
Itching of lips.
Lips inflamed and covered with herpetic vesicles.
[10] **Teeth and Gums.** Yellow coating on teeth.
Pain in r. inferior molars.
Gums very pale and almost yellow; bleed easily and repeatedly.
[11] **Taste and Tongue.** Putrid taste.
Yellow tough coating on tongue.
[12] **Inner Mouth.** Taste of blood in mouth.
[13] **Throat.** Transitory constriction and stinging in throat, extending to larynx.
Pain and soreness in throat.
[14] **Appetite, Thirst. Desires, Aversions.** Deficient appetite, especially in morning.
Insatiable hunger.
‖Sensitive to tobacco.
[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: frequently after taking drug, continuing all day; with odor of drug.
Nausea in morning, when rising.
Nausea and efforts to vomit.
Vomiting, purging and great prostration.
Nausea with constipation; bilious vomiting.
‖Bilious vomiting, with or without diarrhœa; but with pains in limbs, cramp in feet, etc.

Google

[17] **Scrobiculum and Stomach.** Burning in stomach; after twenty-five minutes.

Pain in stomach; nervous, even amounting to violent gastralgia; also cramplike.

Sensation as if stomach would burst, while laughing; pains in stomach continue forty-two days.

Pressing pain in stomach with rumbling in bowels, 5 P.M. N.

Thoracic pains, easier; still felt in region of diaphragm and on motion. N.

Disagreeable feeling of weight at stomach, appetite deficient. N.

Flying pains in stomach.

[18] **Hypochondria.** Burning in r. hypochondriac region and stomach, with pain in intestines.

Throbbing in l. hypochondriac region.

Violent pain in hypogastrium, as if ulcerated, with tenderness to pressure.

Fulness and pains in r. side, with flying pain in stomach and feeling as if something would pass bowels, with slight nausea.

[19] **Abdomen.** Soft, fetid stool, preceded by rumbling, followed by urging to stool.

Stool like white of eggs.

Pain in intestines, after twenty minutes.

Much flatulence, smelling like drug, with coliclike pains.

Flatulence with a sensation when walking as if belly would drop.

Colic: while going up-stairs; while walking; after eating; most violent at night after 1 o'clock, and also in morning during each stool.

Subacute mucous enteritis.

Acute soreness with sharp griping pains in lower abdomen after *Sulphur*.

Soreness and pain in peritoneal lining of lower abdomen over bladder, not in it, nor urethra, nor rectum (after *Sulphur*).

Rumbling and uneasiness in bowels, with feeling of heat in umbilical region. N.

Pressing pain in bowels and emission of fetid wind, 4 P.M. N.

Awoke 3 A.M. by rumbling in bowels, with sharp cutting pains; felt tranquil and calm, though pain was very severe. N.

On awaking 6 A.M. rumbling in bowels with soreness of peritoneum; a dull pain on pressure. N.

[20] **Stool and Rectum.** Soft and fetid stool 11 A.M.; 5 P.M. another, very unusual. N.

Google

‖Dysentery; chiefly catarrhal and autumnal.
11 P.M. urging to stool.
Fluid, painful stool of very strong smell.
Stool of green color and smelling like spoiled eggs, followed by pain in anus.
Painful, copious stool with violent colic and a sensation as if bowels would come out; half an hour afterwards a very small but excessively painful stool; at night, 1 o'clock; at 2 o'clock the same but with increased pain.
In the morning, 11 o'clock, another stool, almost black, with many ascarides and yellow spots like fat, with a feeling as if a stream of fire passed through abdomen.
Constipation after diarrhœa.
In afternoon a stool of intense yellow color, with green and yellow flakes.
In evening a stool exactly like white of an egg.
Feces enveloped in froth.
‖Tenesmus.
‖Bowels so irritable that he had five or six stools a day (after *Sulphar*).
‖Flatulence with pains in abdomen and frequent stools.
‖Pain came on with great violence about 2 or 3 A.M., with sudden discharge from bowels, followed by five or six during day (after *Sulphur*).
; Winter diarrhœa.
‖Bilious and painful diarrhœa.
‖Catarrhal diarrhœa in children or in warm weather when nights are cold and damp.

[21] **Urinary Organs.** Urine red to saturation (first twelve days).
Urine looks as if mixed with blood; 17th day.
After standing a short time small, dark red, almost black points size of pin's head rise to surface, and much mucus is deposited on bottom of vessel.
Urine remains more red than normal during whole of proving.
Painful stitches in urethra, repeatedly.
Frequent passing of clear urine.
‖Urine rather scanty and high-colored. θSubacute pericarditis.

[22] **Male Sexual Organs.** Ulcerous excoriations on glans, resembling chancre with a puslike secretion, disappearing in a few days; from washing with urine.
Copious sweat of genitals.
Erections without lust, particularly mornings.
Painful stitches in penis.
‖Syphilis; constitutional syphilis.

Google

[23] **Female Sexual Organs.** ⁝Menorrhagia. N.
Profuse menstruation, with violent pressing down pain.
[25] **Voice and Larynx. Trachea and Bronchia.** Pain in larynx.
Sensation of constriction of larynx.
❙Capillary bronchitis in children.
❙❙Bronchitis acute and chronic.
[26] **Respiration.** Respiratory murmur and distress in r. lung.
⁝Relieves breathing of pleuritic patients. N.
The breath smells like pepper.
Necessity to inspire hurriedly; followed by a sensation of oppression.
Want of breath, like asthma, often very great, particularly after eating and after smoking a little.
❙Humid asthma; dyspnœa in bronchial affections.
Singing or loud speaking aggravates thoracic pain. N.
Respiration painful, especially at base of l. lung.
[27] **Cough.** Dry hard cough, < at night and morning.
Cough dry and hacking, though a little mucus is raised with great effort.
Sputa frothy or yellow.
⁝It promotes expectoration when suppressed. N.
❙Hoarse, croupy cough, tightness of breathing and fever with hot but moist skin.
Dry cough with constriction of throat. N.
Cough continues dry and harsh, and coughing causes pain in forehead and abdomen.
❙Catarrhal cough, hard, spasmodic, from irritation of larynx or bronchia.
[28] **Inner Chest and Lungs.** Warm feeling in chest.
Soreness in lower part of chest.
Pain in r. lung.
Pleurisy (similar to *Bryon*).
❙Pleurisy, child, æt. 12, with much cutting pain in l. side during inspiration; some dyspnœa, fever and hacking cough.
Feeling of warmth in chest, with dull pain at base of both lungs, with feeling of tightness. N.
❙❙Sharp pains shooting from l. nipple downward, with stiffness of l. side of neck. N.
⁝It relieves dyspnœa and pain in chest. N.
Pains in chest kept increasing, during evening, making respiration painful, especially at base of l. lung, which is dull on percussion, while cough is dry and spasmodic; pain increased and cough < when awake, at 4 A.M. N.
❙Pain moved up from bowels to behind sternum, becoming more sharp and cutting, < drawing a long breath and from motion of hands, as in triturating, 4 P.M. N.

Google

Pain in lungs relieved by bending forward. N.
A feeling of weariness had been less during pain in lungs. N.
Pain returns on coughing or drawing a deep breath, very acute on r. side.
Stitches in l. side, shooting over to r. and up to l. shoulder.
Acute pleuritic pain in r. side, with dry, hacking cough, and scanty mucous expectoration.
Subacute pneumonia of a catarrhal origin.
Influenza, with pleuritic or neuralgic pains.
Pleuritic pain and colic.
Chest feels weak and sore, without cough, though no pain is felt on drawing a long breath. N.

[29] **Heart, Pulse and Circulation.** Pain like pricking of a needle in region of heart.
Contracting pain in heart.
Pain beneath l. nipple with palpitation of heart; pulse rising.
Acute rheumatic pericarditis.
Hard, heavy, forcible beating of heart, with dyspnœa.
Pulse at first 55, afterwards 70; on 8th day, 92.
Pulse thready at 65, during diarrhœa.
Pulse from 64 to 88, and small (after 1 hour). N.
Pain beneath l. nipple returned with palpitation of heart. N.
The pain, which is quick, darting, and more acute than at first, shoots over to r. side; at noon shooting up to l. shoulder, which was painful in motion. N.
Subacute pericarditis; slight dyspnœa aside from painful respiration; acute pain in chest felt on inspiration, movement of arms, stooping forward or lying on l. side; pain was located at point where apex of heart strikes parietes of chest, but it would occasionally shoot back under scapula; an indescribable uneasiness in shoulder and arm; pressure on intercostal spaces caused some pain, especially over region of heart.

[30] **Outer Chest.** Tenderness on pressure over region of heart.
The spaces between the ribs close to sternum are tender on pressure, and the pain, which is quick, darting, and more acute than at first, shoots over to r. side.
Sharp pains shooting from l. nipple downward, with stiffness of l. side of neck.

[31] **Neck and Back.** Stinging, transitory stitches between shoulder blades.
Itching and red blotches on back.

Digitized by Google

Pain in loins like lumbago.

[32] **Upper Limbs.** Pock-like pustules on arms.
Pain in l. shoulder and soon afterwards in right, like rheumatism.
Pains shooting from l. chest into l. shoulder.
Pain in bones of l. arm.
Rheumatic pains in forearm down to fingers.
Numbness of r. hand.
Violent itching in hand and fingers.
Sharp shooting pains in r. shoulder, 9 A.M. N.

[33] **Lower Limbs.** Pain in hips like coxalgia.
Rending pains in knees and up to hips, especially while walking, and also in morning when rising.
Ankle feels as if sprained.
Drawing pains in thighs.
Pains in bones of l. ankle.
Drawing in soles and toes.
Pain as from corns, bedcover seems too heavy.
Violent itching on legs, particularly knees.
‖Itching of thighs and nates, but no eruption. N.
A red inflamed spot on upper part of r. thigh, size of a dollar, painful and itching, leaving after several days a dark stain.
Aching pains in knees and drawing pains in thighs, and more languid than on preceding day. N.

[35] **Rest. Position. Motion.** Lying: headache >; pain in chest <; weakness in bed.
Bending forward: pain in lungs >; pain in chest >.
Motion: headache <; thoracic pains <.
Motion of hands: pain behind sternum <.
Walking: pain in thighs and legs <; sensation as if he was bent forward and towards l. side; ‖soreness of abdomen prevents; as if belly would drop; colic.

[36] **Nerves.** ‖Hysteria. N.
Excessive weakness, morning in bed.
Walking seems impossible.
Quivering and twitching of muscles in different parts.
Sensation of weakness after smoking a little while, walking in morning, before and after rising, particularly in legs.
‖Unfit for business from pain in bowels, and frequent stools (after *Sulphur*).
Languor and disinclination for work. N.
Felt precisely as if recovering from a long and severe sickness. N.

[37] **Sleep.** Difficult and late sleep at night, with great sleepiness in morning and during day, > in open air.
Restless and sleepless at night.

Google

Confused and anxious dreams.
Uneasy sleep during first part of night, with frightful dreams, awaking him at 3 A.M.
Slept all night, but gloomy, frightful dreams. N.
Slept all night till 5 A.M., awaking by frightful dreams which had haunted him all night. N.

[38] **Time.** 1 A.M., 2 A.M.: painful stool.
3 A.M.: violent pain; awakened by dreams.
4 A.M.: cough worse.
5 A.M.: awakened by dreams.
Morning: headache <; deficient appetite; nausea on rising; erections; cough; pains in thighs on rising; weakness.
9 A.M.: head feels dull and gloomy; pains in r. shoulder.
11 A.M.: soft fetid stools.
All day: languid and dull; pain in forehead.
Afternoon: fever.
4 P.M.: pain behind sternum worse.
5 P.M.: pain in stomach; rumbling in bowels; diarrhœic stools.
Evening: stool like white of egg.
Towards evening: unusual elevation of spirits.
9 P.M.: became fretful and peevish.
11 P.M.: urging to stool.
Night: cough <; sweats; restlessness and sleeplessness.

[39] **Temperature and Weather.** Open air: sleepiness better.
In winter: diarrhœa worse.
Cool, damp nights of warm weather: diarrhœa worse.
‖Catarrhal complaints from cold and damp weather.

[40] **Fever.** Chill towards noon.
Chilly with cold feet, though room was warm. N.
Fever in afternoon.
Feverish; first day.
Warmth of skin. N.
Hot, moist skin.
‖High fever with hot sweat.
‖Night sweats and emaciation. θScrofulosis.
‖Rheumatic and catarrhal fever.
‖Bilious marsh fever on rice plantations.

[42] **Locality and Direction.** Right: itching eyelids and canthi; pain in inferior molars; burning in hypochondrium; pain in lungs; pain shoots to side; pain in shoulder; numbness of hand; inflamed spot on thigh.
Left: pain in scalp; pain behind eyeball; throbbing in hypochondrium; pain in base of lungs; pain in nipple; side of neck stiff; stitches in side and shoulder; bone pains in arm; pain in ankle bones.
Above downward: pain in nipple; pain in forearm.

Digitized by Google

Pains almost constantly occur in one arm, and at same time in opposite leg (similar to *Agar.*, in Apelt's proving).

" **Sensations.** As if sand were in eyes; lids as if ulcerated; as if a stream of fire passed through abdomen; as if bowels would protrude; ankles as if sprained; pain like touching a pustule in scalp; as if ulcerated; in hypogastrium; as if stomach would burst; as if belly would drop.

Disagreeable feeling of weight: at stomach.

Violent pain: in hypogastrium.

Sharp pain: shooting from l. nipple downward.

Pleuritic pain: in chest.

Stitches: in urethra; in penis; in l. side, shooting to r. and to l. shoulder; between scapulæ, with muscular and articular rheumatism.

Pricking: as if with nails in head and other parts; like a needle in cardiac region.

Stinging: in nose as from a flea; in throat.

Cutting: in l. side (pleurisy); behind sternum; in bowels.

Griping pain: in lower abdomen.

Darting pain: in chest.

Rending pain: in knees and hips.

Shooting: in chest; in shoulders.

Flying pains: in stomach.

Burning: in stomach; in r. hypochondriac region and stomach.

Soreness: in throat; in lower part of chest; in peritoneal lining of lower abdomen.

Aching pains: in knees; in bones.

Dull aching: in forehead and vertex.

Dull pain: at base of lungs; in bowels.

Pressing: in stomach; in bowels.

Pressing down pain: during catamenia.

Drawing pain: in thighs; in soles and toes.

Throbbing: in l. hypochondriac region.

Contracting pain: in heart.

Constriction: in throat; of larynx.

Cramp: in stomach; in feet.

Tightness: in chest.

Rheumatic pains: in shoulders; in forearm to fingers; in joints; in limbs.

Sprained feeling: in ankle.

Undefined pain: in forehead; in eyes; in molars; in throat; in stomach; in chest; in diaphragm; in intestines; in anus; in larynx; in r. lung; under l. nipple; in loins; in bones of l. arm; in bones of l. ankle; in limbs; in hips.

Google

Transitory pain: behind l. eyeball; stitches between scapulæ.
Fulness: in r. side.
Dulness: behind forehead.
Stiffness: l. side of neck.
Numbness: of r. hand.
Warm feeling: in chest.
Heat: in umbilical region.
Itching: in canthi and base of r. eye; in nose; in face; of lips; on back; in hand and fingers; on legs and knees; on thighs and nates.
Weakness: particularly in legs.

[44] **Tissues.** Scrofulosis.
Rheumatic pains in joints.
Aching in bones and rheumatic pains in limbs, most in joints; almost always upper l. and lower r. or opposite.
Great emaciation.
Muscular and articulate rheumatism, with stitching pains, dark red urine and hot perspiring skin.

[45] **Touch. Passive Motion. Injuries.** Pressure: pain in hypogastrium <; pain in intercostal spaces near sternum.
Riding in carriage impossible on account of pain in abdomen.

[46] **Skin.** Pimples, vesicles or pustules began to appear 15th day, and spread all over, most on arms, legs and face, are very painful and itch excessively, continuing more than 8 days.

[47] **Stages of Life, Constitution.** French prover, æt. 32, nervous temperament, took two drops of tincture.
Man, æt. 34, strong and muscular, sanguine temperament, fair hair, grey eyes; his provings marked N.

[48] **Relations.** Side relations: *Asclep. syriac.* and *Asclep. vincet.*
Veratr. relieved pains with stool at night.
Very sensitive to tobacco.
The tincture (5 drops) relieved when *Sulphur*[30] had aggravated, in a case of chronic intestinal disease.
Duration of action 42 days, some symptoms appeared as late as the 60th day.
Compare: *Agar. musc.* (pains appear in r. arm and l. leg, or l. arm and r. leg, see 42); *Bryon.* (pleurisy, pneumonia).

Google

ASIMINA TRILOBA.

Paw Paw, or Custard Apple. *Anonaceæ.*

A valuable proving of the late Dr. George Bute on himself, his daughter, and his 15-year-old grandson, from 1864 to 1868; afterwards also proved by E. H. Eisenbrey in 1869–70, in the 1st, 2d and 4th centesimal potencies. Bute used alcoholic extracts from all parts of the plant, ripe and unripe fruit, the green leaves, the bark, and the root. The tree grew in his garden. Dr. Eisenbrey proved the same preparation.

H. W. Taylor communicated in Cincinnati Medical Advance, 1878, a kind of poisoning of five children after eating freely of the fruit. The symptoms are marked t.

[1] **Mind.** Did not care to hold conversation with any one, even his best friends; with aching in lung.

Could not dismiss from his mind what occurred through the day previous; at night. See 37.

[3] **Inner Head.** Frontal headache, with pain in chest.

Frontal headache, with nausea; t.

Did not rest well the night previous, arose with an unusual headache in l. temporal region, involving eye, with an occasional sharp pain over it, increased by a single cough.

On morning of 4th day headache increased; felt uncomfortable all day; stomach felt increased in size; insufficiency of stool; inactivity of bowels and rectum.

Headache, with chill, nausea and belching.

[7] **Smell and Nose.** Discharge from nose altered in character from yellow, thick, and at times, especially in morning, hard, flakey, dark grey consistency, at times offensive, to a natural mucous secretion.

[8] **Upper Face.** Face turns blue, with spasmodic interruption of breathing. See 26.

[12] **Inner Mouth.** Corroding sensation in mouth.

Aphthæ of children.

[13] **Throat.** Soreness of throat; t.

Fauces red, swollen; tonsils and submaxillary glands enlarged next day; t.

[14] **Appetite, Thirst. Desires, Aversions.** Thirst, with heat; drinks much; desire for ice cold things.

[15] **Eating and Drinking.** Soon after eating, a loose stool.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea and belching.

Google

Constant belching.
Vomiting.

[17] **Scrobiculum and Stomach.** Stomach felt increased in size, with headache.
Soreness on pressure in region of stomach.

[18] **Hypochondria.** Exercised a good deal through day; experienced a pain in l. hypochondrium, and a soreness in region of stomach on pressure.

[19] **Abdomen.** Soreness in abdomen on pressure; slight pain resembling colic.
Sensation of distension by wind; colic.
Rumbling and pain.

[20] **Stool and Rectum.** Insufficiency of stool; inactivity of bowels and rectum. See 3.
Diarrhœa after eating.
Rumbling pain in abdomen, with desire for stool, which resulted in passage of a soft, pappy, insufficient stool; in evening.
Soreness of anus when wiping it.
Sudden urging to stool, with a sensation as if a stick, thickness of a thumb, passed down rectum; followed by a sudden diarrhœical stool, repeating every ten to fifteen minutes, with chilliness, drowsiness and a weak voice.
Diarrhœa of yellowish discharges next day; t.
Diarrhœa lasting more than four weeks; t.
All children had diarrhœa a long time after other symptoms had disappeared; t.

[21] **Urinary Organs.** Urine clear as water.
; Diuretic.
Urging to urinate, and burning when urinating.

[25] **Voice and Larynx. Trachea and Bronchia.** Weak voice. See 20.
Quite hoarse in morning.
‖ Hoarseness, requiring much effort to talk, and seeming as though mucous membrane was thickened and organs slow to respond to effort of speech.
Throat not very sore, not so much so as hoarseness seemed to indicate; slight cough, which is dry.

[26] **Respiration.** Talking difficult.
‖ Cramp in chest, lasting three hours, with blueness of face.

[27] **Cough.** A single cough increased pain over eye.
A slight, dry cough.

[28] **Inner Chest and Lungs.** Dull, aching pain in upper l. lung; headache continuing.

[30] **Outer Chest.** Lower end of sternum sore on pressure.

[31] **Neck and Back.** Chill over whole back.
All children had scarlet eruption on neck and upper limbs; t.

Google

[32] **Upper Limbs.** Pain in l. shoulder, seeming to involve pectoral muscles.

[33] **Lower Limbs.** Sharp pain in l. hip joint, lasting about half an hour, 11½ A.M., returned half-past 1 P.M.; in evening other pains in joint more mild than former, lasting but a short time.

Eruption in front, below knee, like nettles; itching when uncovering.

Carbuncle on anterior aspect of l. thigh; suppuration lasting two weeks; t.

[37] **Sleep.** Fever, heat with sleepiness. See 40.

Did not rest well night previous, kept turning and moving all night; could not dismiss from his mind what had occurred through day.

Got up feeling unrefreshed; headache no >; quite hoarse; pain in l. shoulder. See 32.

Drowsiness and sleeplessness alternating.

[38] **Time.** Morning: headache <; hard discharge from nose; hoarseness; languid and pale.

11.30 A.M. and 1.30 P.M.: pain in l. hip joint.

Evening: diarrhœic stool; pain in l. hip joint slight.

[39] **Temperature and Weather.** Uncovering knee: itching <.

Open air: exercise in open air is followed by relief of headache.

[40] **Fever.** Chill. See 3 and 31.

Chilliness. See 20.

Heat with thirst.

Fever heat: with desire for something icy cold; with drowsiness; with much thirst.

Chill over back.

[42] **Locality and Direction.** Aching in chest more on l. than on r. side.

Left: headache temporal region; pain in hypochondrium; pain in upper lung; pain in shoulder; pain in hip joint; carbuncle on thigh.

Left to r.: eruptions in provers.

[43] **Sensations.** As of a stick in rectum.

Sharp pain: over l. eye; in l. hip joint.

Corroding: in mouth.

Soreness: in throat; in stomach; in abdomen; of anus.

Dull aching: in upper l. lung.

Cramp: in chest.

Undefined pain: over eye; in chest; in l. hypochondrium; in l. shoulder.

[44] **Touch. Passive Motion. Injuries.** Pressure: soreness in epigastrium and abdomen; lower end of sternum sore.

Wiping: anus sore.

Google

[40] **Skin.** Itching red pimples.
Pustules like smallpox, with a red halo, itching, and after scratching forming thick crusts, lasting from six to eight weeks; t.
Itching when undressing in the evening.
Abscesses ripening.
Eruption first on l. then on r. side.
Nettlerash.
10 P.M.: violent fever; had vomited, and was covered with a bright scarlet eruption; pulse 130, full and steady; temperature 105; t.
General desquamation followed; t.

[45] **Relations.** Collateral relations: the Anonaceæ, of which the *Asim. tr.* is the only one proved, although a very important family.
Compare: *Illic. anis.* (colic); *Liriodendron.*
Skin of fruit and seeds are fetid, somewhat similar to *Stramon.*

ASPARAGUS OFFICINALIS.

Asparagus. *Liliaceæ.*

Introduced and proved in 1840 by Buchner, who proved sprouts; later others made provings. Jeanes proved the root. The strongest effect must be obtained from the berries, and still more from the seed. Many symptoms may be added by practitioners if they meet with cases in which asparagus disagrees.

[1] **Mind.** Cheerfulness; serenity of mind; the 5th day.
A peculiar anxiety, with palpitation and ill humor.
Fretful and peevish, disturbed by trifles; constant anxiety and apprehension.

[2] **Sensorium.** Vertigo: slight in afternoon; in forehead; with staggering.
Confusion of head.
Dulness of head.

[3] **Inner Head.** Dizziness in forehead, afterwards aching in temples, especially left.
Aching in forehead, with confusion.
Pressing pain in both temples, worse from pressure.
Heaviness, pressure in forehead, pain presses towards eyes.

[5] **Sight and Eyes.** Increased acuteness of vision.
Stitches and tickling in eyes.

Google

Aching of brain near eyes.
Pains in eyeballs.
Drawing pain over eyebrows all across.

[7] **Smell and Nose.** ‖Frequent sneezing; after smelling tincture.
Coryza, with slight dryness and swelling inside, then impeded entrance of air; gets violent, with frequent discharge of a thin white fluid from l. nostril; irritation to sneeze, and frequent sneezing.
Later with catarrh a pressing pain from root of nose to forehead; next day, at 9 A.M., dry coryza; later running; want of smell; violent sneezing; 3d day discharge of mucus from r. nostril.

[8] **Upper Face.** Increased heat of face.
Burning of cheeks.
‖Countenance pale, waxlike and bloated.
‖General expression of anxiety and distress. See 29.

[10] **Teeth and Gums.** Painless cavity; exfoliation of a carious molar.
‖Relieved toothache.

[11] **Taste and Tongue.** Taste: sweetish, insipid; coppery; bitter-sweetish on tongue.
Smarting feeling on tongue.

[12] **Inner Mouth.** Saliva increased; sweetish, as if mixed with blood; diminished; later more copious.

[13] **Throat.** Almost constant hawking, with a rough feeling in throat.
Copious discharge of tenacious mucus from throat.
‖Deglutition difficult. θHydrophobia.
‖Burning in throat.

[14] **Appetite, Thirst. Desires, Aversions.** Increased thirst.
Feeble appetite.

[15] **Eating and Drinking.** After breakfast: cough remitted; pain in chest.
After eating: palpitation. See 29.
Fulness and oppression after eating or drinking.

[16] **Hiccough, Belching, Nausea and Vomiting.** Belching of wind.
Nausea 5 A.M., on awaking; vomited food taken evening before, with bile and much mucus, followed by a bilious diarrhœa; after 15 minutes another attack of difficult vomiting.
Retching bringing tears into the eyes, when attempting to cough.
Nausea after each exertion.

[17] **Scrobiculum and Stomach.** Pain in region of cardiac end of stomach, extending thence to left shoulder.

[19] **Abdomen.** Sense of fulness in abdomen.

Google

Griping in region of navel, which is painful when touched.
Drawing pains in both groins.

[20] **Stool and Rectum.** Discharge of much wind.
Insufficient stool in afternoon, notwithstanding a regular stool in morning.
Feces bilious after vomiting. See 16.
Bilious diarrhœa, with colic.
A peculiar urging, with difficult, hard fecal discharge; hemorrhoids bleed much more.
Burning and soreness at anus.

[21] **Urinary Organs.** ⁝Nephritis.
Nephritic colic.
Urging to urinate.
Frequent scanty discharge preceded by a sensation as if something was sticking in urethra, with slight burning.
‖Frequent urination, with fine stinging in meatus, followed by stitches out of urethra.
❙Urine scanty, straw-colored and offensive.
Cutting and burning in urethra.
Strangury.
Burning in urethra 6 A.M.; eighth day.
After urination burning in urethra, with sensation as if some was still passing.
❙Increased urine beer-brown, without sediment.
⁝Diabetes.
❙When urinating, particularly when voiding last drops, rheumatic, constricting pain in cardiac region, forcing him to cry out; turns blue in face. θDropsy of chest.
Urine: bloody; straw-colored, becoming turbid and full of motes, which settle as a white flocculent sediment; of a peculiar odor; of unplesant odor; strong smelling; smells like cats' urine; deposits a greasy sediment on sides of vessel; reddish deposit on sides of vessel.
❙Lithiasis.
❙Gravel passing in small quantities with urination.

[22] **Male Sexual Organs.** Sexual excitement.
Stitching on r. side of glans penis.
Swelling of penis, with erection and urging to urinate.

[23] **Female Sexual Organs.** Promotes flow of menses.
The flow continued a day longer than usual.
❙Relieved prurigo pudendi in woman, æt. 40.

[24] **Voice and Larynx. Trachea and Bronchia.** Continual hawking and hemming, with sensation of roughness in throat.
Talks in a nasal voice during coryza.

[25] **Respiration.** Difficulty of breathing when moving or going up-stairs.
At night he was obliged to sit up in bed to relieve his breathing.

Google

▮Great oppression; breathing rapid, difficult, increased after being in bed some time.
Breathing: ▮rapid, labored, sighing; ▮▮difficult when moving or ascending; difficult at night; must sit up in bed.

[37] **Cough.** Hawking and inclination to cough; mucus not readily loosened, paroxysms of cough, which brought it up.
Tickling and inclination to cough, but expectoration was difficult.
Cough, with inclination to vomit.
Cough distressing, with fulness of chest and copious mucous sputum.
Cough in paroxysms from mucus, which is not easily detached.
Cough remitted one hour after breakfast.
Less inclined to hawk and cough; fifth day; < rising from deep in throat.
Spitting blood.

[38] **Inner Chest and Lungs.** Stitches, especially about l. scapula, when inspiring.
Pains relieved by throwing chest forward and head backward.
▮Hydrothorax; often with heart disease or gouty diathesis of old people.
▮Unusual fulness of chest.
Constriction of chest; tension, increased by a deep breath.
Chest feels as if hollow, with external heaviness.
Sudden darting through r. side of chest.
Stitching pains in region of chest.

[39] **Heart, Pulse and Circulation.** Slight sensation of stitching in region of heart after eating.
▮Heart's throb visible, especially at night; ▮very strong and extended over an unnaturally large area; throbbing carotids; murmurs.
Palpitation; ▮▮while siting, leaves of book in his hand tremble; ▮▮with anxious restlessness, increased by motion or ascending; ▮with oppression of chest.
▮Heart's action weak; pulse feeble. See 32.
▮▮Heart's stroke twofold, irregular, quickened.
Pulse accelerated when sitting; ▮slow, weak; ▮irregular and feeble.

[51] **Neck and Back.** Rheumatic pains between scapulæ.
Fifth and sixth vertebræ pain.
Pains in loins at beginning of false vertebræ; 4 P.M., fifth day.
Pain at acromion process of l. scapula, also under clavicle and down arm, with exceeding feebleness of pulse.

Google

Sensation when sitting as if something was darting through small of back towards sacral vertebræ.

[32] **Upper Limbs.** Rheumatic pains in region of r. axilla.
Pain in region of shoulder on touching it.
Pains on tip of l. shoulder.
Pain at acromion process of l. scapula, under clavicle and down l. arm; pulse feeble.

[33] **Lower Limbs.** The r. leg and foot are the weakest.
On awaking and stretching cramps in l. calf, > from rubbing.
While walking, pain as from dislocation in neck of r. thigh bone.
Muscles in middle of thigh feel bruised, < ascending, sore pain on touching it.
Drawing in l. toe, which had been cut with an axe years ago.

[35] **Rest. Position. Motion.** Sitting: breathing >; pulse accelerated.
Throwing chest forward and head backward: pains better.
Coughing: retching and lachrymation.
Exertion: nausea worse.
When urinating: pain in cardiac region.
Moving or ascending: difficult respiration; palpitation increased; pain in thigh muscles.
Inspiration: stitches about l. scapula.
Stretching: cramp in calf.
Walking: pain in neck of r. femur.
Motion aggravates most pains.
Compelled to throw chest forward and head backward to find relief of pains in loins and elsewhere.

[36] **Nerves.** Great languor and disinclination to physical or mental exertion.
Very much prostrated, pulse irregular.

[37] **Sleep.** Sleepiness and yawning.
Sleep uneasy and disturbed by oppressed breathing.

[38] **Time.** 5 A.M.: nausea on awaking.
6 A.M.: burning in urethra.
9 A.M.: dry coryza.
Afternoon: slight vertigo; insufficient stool.
3 P.M.: some fever; weak and drowsy.
4 P.M.: pains in loins.
Evening: urging to urinate.
Night: orthopnœa; heart beats visibly.

[40] **Fever.** Slight chilliness with some sleepiness.
Slight fever; weak; drowsy.
Increased warmth.
Suppression of sweat.

[42] **Locality and Direction.** Right: mucus from nostril;

Google

stitching side of glans penis; darting through side of chest; pains in axilla; leg and foot weak; pain in neck of femur.

Left: ache in temple; thin discharge from nostril; pain cardiac end of stomach; pain in shoulder; stitches about scapula; pain tip of shoulder (acromion process), under clavicle, and down arm; cramp in calf; drawing in toe.

Symptoms go from r. to left.

Below upward: pain from root of nose; pain cardiac end of stomach.

Above downward: pain in l. shoulder.

" **Sensations.** As if something was sticking in urethra; as if urine was still passing after urination; as if something was darting through small of back towards sacral vertebræ; chest as if hollow.

Cutting: in urethra.

Darting: through r. side of chest; through small of back towards sacrum.

Stitches: in eyes; out of urethra; in glans penis; about l. scapula; through chest; in cardiac region.

Stinging: in meatus.

Griping: in region of navel.

Burning: of cheeks; in throat; at anus; in urethra.

Smarting: on tongue.

Soreness: at anus.

Aching: in temples; in forehead; of brain.

Pressure: in temples; in forehead; towards eyes from forehead; from root of nose to forehead.

Drawing pain: over eyebrows; in groins; in l. toe.

Rheumatic pain: in cardiac region when urinating; between scapulæ; in r. axilla.

Dislocating pain: in neck of r. femur.

Bruised feeling: in muscles of thigh.

Constricting pain: in cardiac region.

Constriction: of chest.

Cramps: in l. calf.

Undefined pain: in eyeballs; in chest; in cardiac end of stomach to l. shoulder; at acromion process of l. scapula; under clavicle and down arm; in loins.

Roughness: in throat.

Fulness: in abdomen; of chest.

Heaviness: in forehead.

Heat: of face.

Tickling: in eyes.

" **Tissues.** : Gout.

: Dropsies. See Hydrothorax, 28.

: Anasarca.

Google

[45] **Touch. Passive Motion. Injuries.** Touch: umbilical region painful; pain in shoulder; pain in thigh muscles.
Pressure: pain in temples worse.
Rubbing: cramp in calf better.
Soothes the pain occurring in a dislocated limb.
Numbness of the bitten part, extending over the whole arm. θHydrophobia.
Constant desire to be carried about in the arms.

[47] **Stages of Life, Constitution.** Man, æt. 74, after *Digit.* θDropsy of chest.

[48] **Relations.** Antidote: *Acon.* (prostration, feeble pulse, pain in shoulder); *Apis.*
Is antidotal to *Coffea.*
Side relations: *Convallaria maj., Medeola virg., Trillium cer., Sarsap.*
Compare: *Arnic., Aurum mur., Cannab., Digit.* (dropsy); *Spigel.*

ASTACUS FLUVIATILIS.

Crawfish. *Crustaceæ.*

Frequently made use of in olden times.
Tincture from the whole fish, prepared by C. Hg. in 1825, still had a fish smell in 1867, and produced symptoms.
Fully proved and introduced by Buchner, in 1842.

[1] **Mind.** Melancholic mood.
Apprehensiveness with anxiety in chest.
Slight delirium, with nettlerash.

[2] **Sensorium.** Giddiness.
Dulness in head.

[3] **Inner Head.** Pressing and throbbing on small spots, particularly in r. temple.
Pressing dulness in frontal region.
Headache with pressure towards eyes.
Stinging pain in temples.
Pressing stinging pain extends towards occiput, but mo in r. temple and about ear.
Excessive pain caused by violent spasmodic sneezing.

[4] **Outer Head.** On head, neck and chest inflammation, with red spots filled with serum, gone after a sweat.
A thick, crusty eruption on scalp, with enlarged lymphatic glands.

Google

[5] **Sight and Eyes.** He sees colored spots when reading.
Dimness of vision.
Dilated pupils.
Motion of eyes is painful.
It pains him to turn his eyes; giddy; nervous; crawls all over his body.
Lachrymation.
Pressure in upper part of right eye.
Conjunctival vessels injected.
Yellow conjunctiva.

[6] **Hearing and Ears.** Sensation as if a foreign body obstructed passage of r. ear, causing slight deafness.
Heat and redness of ears.
Outward pressing and stinging, particularly in r. ear.

[7] **Smell and Nose.** Sneezing, with yawning and belching.
Nosebleed relieving attacks.
Slight coryza.

[8] **Upper Face.** At intervals darting like lightning from temple to cheek.
Burning heat in face.
‖Face glowing and red with fever.
|Erysipelas with nettlerash.

[10] **Teeth and Gums.** Dull, drawing toothache, returning at intervals.
At intervals pain as if tooth was being torn out.
Toothache in whole r. lower jaw, with cold feeling in an eyetooth.

[11] **Taste and Tongue.** Pressing pain in tongue and pharynx.
Sweetish pappy taste after cough.

[12] **Inner Mouth.** ‖Canker spots; scorbutus.

[13] **Throat.** A fishy taste in roof of mouth, later farther back and lower down; after smelling tincture.

[15] **Eating and Drinking.** After eating: colicky pain below navel, he has to bend double.

[16] **Hiccough, Belching, Nausea and Vomiting.** Fishy taste, followed by nausea, spreading through chest.
Nausea with vomiting.
Empty eructations.

[17] **Scrobiculum and Stomach.** ‖Fulness and pressure in stomach; burning in epigastrium. θGastric and bilious troubles.

[18] **Hypochondria.** Very severe pain in region of duodenum.
Inflammation of liver followed by jaundice; hepatic region painful on pressure.
Pressure in region of spleen.

[19] **Abdomen.** Colicky pain with tenesmus and prostration; relieved by sitting, < when walking.
Colicky pain around umbilicus with distension.

Google

[20] **Stool and Rectum.** ‖Stools color of pipeclay; pain in liver.
‖Diarrhœa with vomiting and colicky pain.
Soft mucous stool with scraping in rectum.
[21] **Urinary Organs.** ‖Pain in kidneys; stinging in night; < when inhaling.
Fishy smelling urine.
Tearing stitching pain in region of r. kidney; drawing in ureter.
Pressing in bladder and heavy feeling.
Urging, scanty discharge, burning during and after urination; reddish sediment.
Pale urine with acid reaction, containing a large quantity of albumen.
[22] **Male Sexual Organs.** Restless sleep from strong sexual excitement.
Averse to coition; diminished sexual power; scrotum relaxed.
[24] **Pregnancy. Parturition. Lactation.** ‖Jaundice of little children.
[25] **Voice and Larynx. Trachea and Bronchia.** Tickling in chink of glottis or deeper, exciting cough; tenacious mucus in larynx and trachea.
Roughness and scraping in throat, necessitating hawking.
[26] **Respiration.** Dyspnœa with anxiety and rattling of mucus.
Pressure and oppressed breathing in bronchia.
[27] **Cough.** Cough from tickling in larynx, < during day.
Sweetish expectoration.
Cough did not molest him while walking, in evening, but returned as soon as he sat down.
Frequent coughing without expectoration in the forenoon.
Cough < in afternoon; chest painful; expectoration of salivary and white mucus.
Light yellow expectoration.
[28] **Inner Chest and Lungs.** Congestion of lungs with dyspnœa and blood-spitting.
Pricking under l. nipple.
[29] **Heart, Pulse and Circulation.** Pulse 50 in morning, later 80.
[30] **Outer Chest.** Pressure on whole sternum.
[31] **Neck and Back.** Pain below r. shoulder in front.
Itching in nape of neck with flushed face.
‖‖Swelling of cervical glands with children and old people.
Jerking under l. kidney.
[32] **Upper Limbs.** Pressure and tension in axillæ and deltoid muscles.

Google

Trembling in arms when leaning on them.
Rheumatic pain in l. arm.
Lassitude in arms, they pain when touched.
Pressure and heaviness in bends of elbows.
Jerking and drawing in l. forearm.
Chilliness and trembling of arms.
Transitory tearing and stinging pain in l. thumb, in morning.

[33] **Lower Limbs.** Burning on anterior surface of l. thigh.
Slight tension from knee down to foot.

[35] **Rest. Position. Motion.** Sitting: colic >; cough <.
Walking: colic <; cough better.
Motion: eyes painful.

[36] **Nerves.** Lassitude and weariness, trembling and fatigue.
: Paralysis.

[37] **Sleep.** Restless sleep, anxious or lewd dreams, skin hot, wakes in perspiration, particularly on lower part of body.

[38] **Time.** Morning: pain in thumb.
Forenoon: cough dry.
During day: cough <.
Afternoon: cough <.
Evening: chill over body.
Night: stinging in kidney.

[39] **Temperature and Weather.** Temperature increased in evening.
Sensitive to air, no matter how great the feeling of heat.
‖Inward chilliness, and sensitiveness to air; worse from uncovering.

ever. Nervous crawls all over body.
Chills, confusion of head, face red, swollen; eyelids tumefied; great prostration and slight delirium.
‖Violent fever with headache, glowing red face, inward chilliness and sensitiveness to air.
Chill over whole body, particularly sensible in arm pits; in evening.
‖Increase of temperature in evening and slight excitement of sensorium. θSopor.
‖After overheating from exertion and taking cold, first stage of typhoid fever treated with *Rhus* and *Bryon.*, got much <, with nausealike fainting, fever heat, glowing face, inner chilliness and sensitiveness to air; after uncovering, greater, long-lasting chill.

[42] **Locality and Direction.** Right: pain in temple; pressure in eye; obstruction and stinging in ear; toothache lower jaw; pain below shoulder.
Left: pricking under nipple; jerking under kidney; pain in arm; in thumb; burning in thigh.

Google

[45] **Sensations.** As of a foreign body in ear; as if teeth were being torn out.
Darting: like lightning from temple to cheek.
Jerking: under l. kidney; in l. forearm.
Stitching and tearing: in r. kidney.
Stinging: in temples; in ears; in kidneys; in l. thumb.
Pricking: under l. nipple.
Burning: during urination; on thigh; in epigastrium.
Scraping: in rectum; in throat.
Pressing: on small spots in head; dulness in frontal region; towards eyes; stinging towards occiput, in r. temple and about ear; in upper part of r. eye; outward, in ears; in tongue and pharynx; in stomach; in spleen; in bladder; in bronchia; on sternum; in axillæ and deltoid muscles; in bends of elbows.
Drawing: in ureter; in l. forearm.
Dull drawing: in teeth.
Rheumatic pain: in l. arm.
Colicky pain: around umbilicus.
Undefined pain: in head from sneezing; in r. duodenum; in kidneys; in chest; below r. shoulder.
Throbbing: in head.
Fulness: in stomach.
Heaviness: in bladder; in bends of elbows.
Tension: from knee to foot.
Crawls: over body.
Itching: in nape of neck: on various parts.
Tickling: in larynx.
Heat: of ears; in face.
Coldness: in eyetooth.

[44] **Tissues.** ‖Tumors, if not too old.
‖Gout of drinking people.

[45] **Touch. Passive Motion. Injuries.** Presure: hepatic region painful; pain in region of duodenum.
Passive motion: eyes painful.

[46] **Skin.** A violent attack of an eruption like nettlerash.
Itching on various parts of body.
‖Nettlerash over whole body.
‖‖Nettlerash with liver complaint.
‖Erysipelas, with fever, headache and increased sweat.
Crusta lactea. See 4.
Jaundice of children.

[48] **Relations.** Antidote: *Acon.*
Compare: *Apis* (urinary symptoms, stinging pains, etc.); *Rhus tox.* (urticaria).

Google

ASTERIAS RUBENS.

Star-fish. *Radiata.*

Used by Hippocrates, and others, in uterine diseases. See Aldrovandi, Frankf. edition, 1623, p. 298.

Brauns had given it homœopathically since 1835. Petroz proved and introduced it, by publishing his provings on seven persons and cured cases in the Journ. de la Soc. Gallicane, in 1850–51. It was translated into English in 1852, by Metcalf, and into German by Brückner. A valuable proving was made in 1853, by Dr. Günther, of a tincture of the sea-star, caught in Newport, and prepared by the late Dr. Geist, of Boston; other provings we have by Berridge, in London, and Macfarlan, in Philadelphia. Douglas has given characteristics. It has not been used often, but in cases of the highest importance.

[1] **Mind.** ‖Loss of consciousness. θEpilepsy.

‖Does not lose consciousness but has hallucinations—as if away from home in midst of strangers; hears voices to which he replies. θEpilepsy.

‖‖Unwilling to work, to think; is indifferent; dull headache; insensible, does not know if he has taken his dinner; returns in morning on getting up, 9th day.

Unusual gayety in evening.

Sadness, desire to weep.

Melancholy alternating with cerebral excitement, inclined to give herself up to mental or bodily work.

Fear of apoplexy, followed by fever.

‖Feeling of extreme anxiety from noon to 3 P.M.

‖‖It seems as if some misfortune was impending, as if bad news was about to arrive—tears afford relief. θHysteria.

‖Became very impatient. θPrecursor of apoplexy.

Ill-humored and disposed to weep.

‖Paroxysms easily excited by any emotion, especially by contradiction. θEpilepsy.

Irritability, anger, necessity of quarreling with somebody —from noon to 2 P.M.

Irritable, slightest cause moves her to tears.

With mental exertions, a restless, tired sensation in upper brain, like that in limbs after muscular exertion.

Fear of fainting, with sensation of fulness in chest.

After mental exertions, brain agitated.

Nervous agitation, with erotic thoughts and sexual desire.

[2] **Sensorium.** Confusion. See 37.

Head heavy, with throbbing.

Google

‖Vertigo: transitory; when walking, with insensibility of lower limbs.

‖Sudden attacks of vertigo like shocks in head. θPrecursor of apoplexy.

Throbbing in head; when ascending or walking.

Determination of blood to head; sensation of fulness, heat; it feels as if it would split.

Feels a tumult in brain, restless, distressed.

Heaviness of head, heat, throbbings, redness of face.

‖‖Wakes at night with sensation as if brain was shaken by electric shocks; head seems empty, almost deprived of consciousness; thinks he is attacked by apoplexy, lasts several minutes; when he recovers his consciousness, pulse hard.

‖Since two years he lost consciousness with the attacks. θEpilepsy.

[3] **Inner Head.** ‖Heat of head, as if surrounded by hot air.

‖‖Sanguineous congestion to brain. θPrecursor of apoplexy.

‖‖Awakes at night in distress as from electric shocks in brain; head feels as if bursting; apprehended apoplexy; when he came to himself pulse was hard, very quick, and r. carotid throbbing violently.

‖Cerebral congestions, accompanied by obstinate constipation.

The headache disappears suddenly towards noon, then the ideas are clear.

‖A violent pressure upon anterior lobes of brain, extending even beneath eyes; one day so severe that while seated at table she fell forward, and remained unconscious for some minutes. θEpilepsy.

Pressive pain in r. side of occiput, making it difficult to walk.

Boring pain above l. eye, coming and going suddenly, and producing contraction of eyebrows; while this pain lasts she seems to look through a mist.

Acute transitory lancinations in forehead and temples, also in occiput.

Sudden pain on r. side of head.

Pain in vertex as if skull would break.

‖Dull occipital headache for a half hour, came suddenly one and a half hours after breakfast, and went suddenly.

Dull occipital headache one hour after breakfast, lasting all day.

[4] **Outer Head.** ‖Head burning. θPrecursor of apoplexy.

During severe pains whole scalp feels sore.

Pains in bones of sinciput.

πA pimple upon sinciput, spreading and changing into

Google

an ulcer, having all characteristics of sycotic ulcer of Celsus; a second behind the r. ear. See 6.

[6] **Sight and Eyes.** Light fatigues the eyes.
Cannot bear the light.
Heat and redness of eyes, tired in looking upward.
Pain in eyes from within outward.
Eyes as if drawn back or sunken in.
‖Violent pressure upon anterior lobes of brain, extending beneath eyes. θEpilepsy.
Frequent blinking or twitching of lids, edges of lids are reddened.

[8] **Hearing and Ears.** Violent reports in ears.
Dulness of hearing more marked on r. side; noise of rushing water in ears.
Lancinating pain in meatus, perceived for some seconds, is concentrated in occiput and ceases.
πAfter sycotic ulcer on forehead, a second formed behind r. ear, and a group of pimples on lower lip.

[7] **Smell and Nose.** Twitches in brain when blowing nose; during first half of night.
Nosebleed mornings on getting awake.
Sneezing and coryza on awaking in morning.
Pimples on side of nose and chin.

[8] **Upper Face.** Face flushed and swollen.
‖Face red, pulse hard, compressed, frequent. θPrecursor of apoplexy.
‖Redness of face. θThreatened apoplexy.
Alternate crawling and flushes in face with colic.
‖Pallor of face. θEpilepsy.
‖Earthy appearance of face. θCancer mammæ.
Sudden fall with a livid color of face.
Pimples side of chin.
Upon sinciput a pimple spreading and changing into an ulcer, like a sycotic.
Stupid look, also stupid expression in attitude.
‖Her face was pale and her jaws set while unconscious. θEpilepsy.

[9] **Lower Face.** Neuralgia opposite l. molar teeth, lower jaw; sharp piercing pain, like a needle.
Pimples on side of nose and chin.
πA group of pimples formed on lower lip, remained dry and hard, but exceedingly painful, like the ulcers.

[11] **Taste and Tongue.** Loss of taste.
Embarrassment of tongue, dislike to speak.
Talking difficult; very much saliva in mouth.
Swelling of tongue and shooting pains in it, drawing or stretching.

Google

[13] **Inner Mouth.** Saliva more abundant.

[13] **Throat.** Heat and dryness in throat.
Dull pain extending whole length of œsophagus.
Throat sore with constriction in morning on awaking.

[14] **Appetite, Thirst. Desires, Aversions.** Capricious appetite, desires highly seasoned dishes, strong cheese, liquors, coffee, tea, etc.
‖Want of appetite, no taste. θScirrhus.
Aversion to meat.
Desire for cold drinks.

[15] **Eating and Drinking.** ‖The paroxysms occur at commencement of last meal of day. θEpilepsy.
Dull headache in occiput after breakfast; came and went suddenly.
After eating: general malaise <; flatulence.

[16] **Hiccough, Belching, Nausea and Vomiting.** Frequent forcible eructations in morning.
Nausea.

[17] **Scrobiculum and Stomach.** Pain below breast bone.
Dull or contracting pain in scrobiculum.
Constriction in præcordial region.
Dull pain in muscles of præcordial region.

[18] **Hypochondria.** ‖Great debility with distress in epigastrium. θEpilepsy.

[19] **Abdomen.** Dull pain, in paroxysms, in r. side of abdomen near navel.
Violent colic, with shivering, alternating with flushes of heat in face.
Flatulence after every meal, wind cannot be expelled either upward or downward.
Alternate swelling and decrease of abdomen during twenty-four hours.
Stagnated wind.
Sensation of tearing and drawing (zerren) in abdominal walls.
‖Sensation of pressure on lower abdominal organs impeding locomotion. θUterine displacement.

[20] **Stool and Rectum.** Several soft stools during day.
Stool liquid, brown, gushing out in a violent jet.
Colic followed by diarrhœa.
Ineffectual urging.
Difficult, consistent stool.
Constipation, fruitless desire to go to stool.
Heat in rectum.
‖Obstinate constipation; twelve to fifteen days elapsed without an evacuation, which consisted, when it occurred, of very hard, round substances about the size of an olive. θPrecursor of apoplexy.

Google

Hemorrhoidal flux.

[21] **Urinary Organs.** Heat in urethra, while urinating.
Copious, clear urine, and frequent urination.
Thick, viscid urine.

[22] **Male Sexual Organs.** Frequent erections during sleep and in morning.

[23] **Female Sexual Organs.** Excitement of venereal appetite in morning in bed, and towards 4 P.M.; not removed by coitus, annoys, makes her ill-humored and disposed to weep.
Sexual desire increased, < mornings in bed.
Venereal desires, erotic thoughts, nervous agitation and distress produced by importunate venereal craving resembling an irresistible power, giving rise to ideas of violence, despair, etc.
Menses delayed eight days; colic and other sufferings cease with the flow, which is more abundant than usual.
Menses are apt to delay. θHysteralgia.
Moisture in vagina, unusual but pleasant.
General feeling of distress in womb as though something was passing out. θHysteralgia. θDisplaced uterus.
Jerking in uterus. θHysteralgia.
Sensation of pressure in lower organs of abdomen, walking is troublesome.
Severe general pain over womb as if something protruded behind it.
Sensation in womb, as if something was pushing.

[24] **Pregnancy. Parturition. Lactation.** Dull aching neuralgic pain in mammæ.
Lancinating or acute smarting pains in mammary tumor entirely deprived her of rest, especially at night. θScirrhus.
Drawing pain in breast. θCancer.
Left breast feels drawn in. θCancer.
Around nipple, which was sunk into a cavity, skin smooth and adherent; upon one point of this surface a violet spot, indicating fungus hæmatodes. θCancer of mammæ.
Ulceration and swelling in l. breast; sharp stitching pain going through to back.
Breasts swollen, distended as before menses. θCancer.
Induration of l. mamma, size of head of infant; almost insensible, very hard and angular. θCancer mammæ.
A scirrhous tumor forms in r. mamma, adhering by its entire base to thoracic walls. θScirrhus.
A livid red spot appeared upon one point of tumor, broke and gave exit to a discharge of blood; gradually in-

Google

vaded whole breast, eight inches in circumference, discharging very fetid ichor; edges sensitive, pale, elevated, mamillary, hard, everted; bottom covered with reddish granulations. θScirrhus.

[25] **Voice and Larynx. Trachea and Bronchia.** A rough sensation in larynx exciting cough.

[26] **Respiration.** Short breath with pain in chest when inhaling; feeling in all limbs as if beaten, most in arms, 4 P.M., when walking out-doors.

Constriction in r. side of chest.

[27] **Cough.** Cough with expectoration, morning in bed.

Easy hawking of greyish-black phlegm during forenoon.

[28] **Inner Chest and Lungs.** ‖Drawing pain towards internal part of chest from before backward, extending under l. nipple into whole internal part of arm to extremity of little finger.

The entire left chest painful, motion aggravates pain.

Lancinating pain in anterior inferior portion of chest to r. and l. of sternum, diminished by carrying upper part of body and shoulders backward.

Feeling of fulness in chest with a fear of fainting.

Undulating throbbings in chest at night, causing anxiety.

Stretching upper part straight as drawing shoulders back lessens stitches in chest.

[29] **Heart, Pulse and Circulation.** Palpitation strong and frequent; leaping.

Heartbeats dull, prolonged; seems as if heart had ceased to beat.

Anxiety in heart, night and morning.

Palpitation extending to epigastrium, with sensation of constriction.

‖Pulse hard, compressed and frequent. θApoplexy.

On recovering consciousness, pulse is hard and much accelerated. See 7.

Small frequent pulse.

Pulse 75, next day weak and only 68.

‖Hard, frequent and contracted pulse.

Violent beating of r. carotid artery; cerebral symptoms come on in morning, go off during day and come on again at evening; he wakes at night in great confusion, as if brain were shaken with electric shocks; violent reports in ears; dull pain, apparently along œsophagus.

[30] **Outer Chest.** Violent itching spot upon chest.

‖Whole l. side of chest is painful; motion < the pain.

Pain in upper chest, > throwing chest back.

‖Drawing pain towards internal part of chest, from before backward, extending under l. nipple into whole internal part of arm to extremity of little finger.

Slight eruption between breasts.

Google

A rash and furfuraceous eruption on chest between mammæ.

‖Sternal integument swollen and painful. θScirrhus.

[31] **Neck and Back.** Drawing pain in back; in sacrum.

‖Scrofulous ulcer on l. side of neck, about two inches broad, extending from border of hair to clavicle, edges hard and elevated.

[32] **Upper Limbs.** ‖Axillary glands swollen, hard and knobbed; knotted cords from r. mamma to spine. θScirrhous mammæ.

Itching in r. axilla.

Feeling as if beaten in arms. See 26.

Pain in r. shoulder.

‖Painful drawing in muscles of r. upper arm.

Red circular spot, size of a franc, on l. olecranon, becomes covered with a dry, furfuraceous, friable coat, which falls off in two days; a similar but smaller spot on anterior surface of same arm.

Coldness in l. arm, as if cold wind was blowing on it.

Stinging pain in l. elbow.

Restlessness in limbs, especially in bends of arms; it is scarcely endurable to have arm covered.

Numbness and stiffness of hands, with cold arms.

Numbness of l. hand extending into arm; coldness of arm.

Pain extending from thumb joint to shoulder.

Pain in flexor tendons of l. thumb.

Severe itching around l. thumb nail.

‖Drawing pain towards inner portion of chest from before backward; under l. breast this pain extends under whole inner portion of arm to end of little finger.

Pricking in muscle of l. upper arm.

Drawing pain: in l. arm near elbow; in bone of r. upper arm down to elbow joint, most violent in lowest part; in r. wrist, afternoon.

Drawing and strumming in arms.

[33] **Lower Limbs.** Pain in l. knee.

Crampy pain above l. knee.

Drawing: in r. knee and below l.; in outer muscles of l. calf; in bone of l. tibia, scraping on bone.

Cracking in l. knee joint.

Itching below l. knee, evening in bed.

Itching on r. tibia.

Pain in bone, above l. ankle.

Violent shooting on a small spot on lower leg, sore from scratching a few days after.

Drawing pain in outer side of left thigh.

Sensation of drawing in r. hip, as if leg was too long and drawn downward.

Google

Burning lancinations in great trochanter and l. coxo-femoral joint, extending like lightning into outer side of bend of knee and into buttocks.
Dull pain in left coxo-femoral joint in morning.
Deep lancination in anterior part of thigh.
Pain in l. hip in evening.
Violent pain in l. thigh a few inches above knee.
Extremely unpleasant itching on upper and lower leg; < at 6 P.M. and in open air.
Tormenting itching on thighs and legs, increases at 6 P.M. in open air.
Insensibility of lower limbs with vertigo.
Painfully tired feeling in lower limbs.
During day annoyed by permanent contractions of muscles of lower limbs; during night great agitation and little sleep. θPrecursor of apoplexy.
Pain in ankles.
Pain like podagra in metatarsal joint of l. big toe, with redness and heat.
Lessened sensibility in limbs, mostly in lower.
Restlessness in lower limbs.
Weakness in standing.
Crawling like ants on lower limbs.
Pains in l. great toe and joints of feet.
Lancinating pain in toes, especially l. great toe, with redness of skin, great heat and sensibility; cannot endure ordinary covering; increased after sunset and in warm room; cold air and cold water assuage pain, heat of bed renews it, although it ceases before midnight.
Pain in l. foot concentrated at ball of great toe, < by motion.
Ankles pain, most in left, later in r., in walking.
Painful drawing in muscles of l. ankle.
Cracking in l. ankle.
In metatarsal joint of l. big toe gouty pain all day, red and hot; cannot walk at all.
Shooting pain in instep of r. foot.
Painful stretching in soles.
Drawing in soles and toes.
Sensitiveness of l. sole and toes.
Burning heat in feet.
Tickling on l. foot near the roots of toes, 8 A.M.
Shooting in l. big toe and all other toes, with great heat and sensitiveness; cannot bear usual covering; < after sunset, in-doors, skin reddened in warmth of bed, cold and cold water relieve; several evenings, ceasing at night.
Violent pain in l. toes and roots of toes.

Google

Violent cramp in l. toes, later in right.
Violent pain in corn of l. toe.

[34] **Limbs in General.** ‖With attacks convulsive motions of limbs. θEpilepsy.
Uneasiness in limbs; < covered or in warm room.
‖Pains in limbs.
‖Laming pains in whole r. side at night.
Feeling in limbs as if beaten, most in arms, with short breath and pains when breathing.
Pains in l. arm and l. knee, in evening in bed.
Drawing pains in r. arm or hand and on dorsum of l. foot.
Stitches in l. wrist and at same time in l. calf.
With pain in r. hip, pain of whole l. side up to shoulder blade.
‖‖Starting in upper and lower limbs, continuing several days.

[35] **Rest. Position. Motion.** Standing: weakness worse.
Throwing chest backward: pain in upper chest better.
Motion: pain in l. chest <; pain in ball of toe worse.
Walking: vertigo with insensibility of lower limbs; r. ankle pains; pressure in uterus.
Walking or ascending: throbbing in head worse.
‖Gait unsteady; muscles refuse to obey efforts of will.

[36] **Nerves.** Startings in upper and lower limbs for days, with hot skin, < after supper.
‖‖General malaise; lassitude; feels better after eating.
‖Convulsive motions of limbs during unconsciousness.
‖Twitching over whole body four or five days before attack. θEpilepsy.
‖Weak and pale. θEpilepsy.
‖Sudden falling; livid face, convulsive motion of jaws, froth at mouth, convulsive shocks in limbs, loss of consciousness. θEpilepsy.
‖Convulsive movements of jaws, froth at mouth. θEpilepsy.
‖After attacks great debility with a sense of distress in epigastrium. θEpilepsy.
‖Convulsive attacks, after pressing pain in forepart of head and over eyes, with falling forward, loss of consciousness, trismus, pale face, convulsive motions of limbs.
After attacks prostration and anxiety in upper part of abdomen.
‖Epilepsy.
‖Lameness of limbs.

[37] **Sleep.** Disposition to sleep after reading a moment.
Is late falling asleep and late getting up.
Agitated sleep, tossing about.

Google

Many dreams about persons and events; images vivid and lifelike.

‖Awakes in night with great distress and confusion; it seems to him as if brain were shaken by electric shocks.

‖Nocturnal lancinating pain in tumor. θCancer mammæ.

‖During night great agitation and little sleep. θPrecursor of apoplexy.

Anxiousness at night from a waving throbbing in chest.

Sleep quiet but not refreshing.

Very vivid dreams of people whom she sees and hears, as if she was awake; not unpleasant.

‖Cannot sleep from pain in mammary cancer.

[36] **Time.** 8 A.M.: tickling in foot.

Morning: headache on rising; epistaxis on getting awake; coryza and sneezing; sore throat on awaking; eructations; pain in side of abdomen; erections; sexual desire increased in female; cough; anxiety in heart; cerebral symptoms occur; pain in l. coxo-femoral joint.

Forenoon: hawking greyish-black phlegm.

Towards noon: headache suddenly disappears.

Noon to 2 P.M.: anger.

Noon to 3 P.M.: anxiety.

All day: dull occipital headache.

During day: several soft stools; cerebral symptoms disappear; annoyed by permanent contractions of muscles of lower limbs.

Afternoon: pain in wrist.

4 P.M.: excitement of female venereal appetite; limbs feel as if beaten.

6 P.M.: stitching in leg worse.

Towards evening: fever, hot skin, followed by chilliness.

Evening: unusual gayety; cerebral symptoms recur, itching below l. knee in bed; pain in l. hip.

Before midnight: pain in toes ceases.

Night: sensation as if brain was shaken by electric shock; pains deprive her of rest; throbbing in chest; anxiety in heart; great agitation and little sleep; pain in whole r. side; awakens in distress and confusion; lancinating in tumor; fear of apoplexy.

[39] **Temperature and Weather.** Heat of head as if surrounded by hot air.

Coldness l. arm as if cold wind were blowing on it.

Cold air and washing: pain in toes >.

Open air: itching on leg <; pressure on vertex >.

Covering, heat of bed, in room: pain in toes <; uneasiness in limbs worse.

Great desire to wash in cold water.

‖Complaints < in cold, damp weather.

Digitized by Google

[40] **Fever.** Great coldness after supper.
Shivering with somnolence, followed by hot skin and restless night.
Chill and a heat in face in alternation with colic.
Heat followed by coldness.
Violent heat in head, then over whole body.
‖Increased general heat.
After nightly fear of apoplexy, recovers consciousness.
Hard pulse (see 29); febrile state continues to end of next day.
Increased warmth of body during whole proving.
Towards evening fever with hot skin, followed by chilliness.
Shivering, and heat and cold in alternation.

[41] **Attacks, Periodicity.** Dull occipital headache half hour; came on suddenly one and a half hours after breakfast; went off suddenly.
‖Attacks gradually lessened to shorter intervals. θEpilepsy.

[42] **Locality and Direction.** Right: pain in side of head; pimple behind ear; dulness of hearing; parotid throbbing violently; scirrhus of mamma; constriction side of chest; violent beating carotid artery; itching in axilla; pain in shoulder; drawing in muscles of upper arm; pain in bones of arm; pain in wrist; drawing in knee; itching on tibia; drawing in hip; pain on instep of foot; pain in whole side.
Left: boring pain above eye; neuralgia opposite molar teeth; breast feels drawn in; ulceration, swelling and induration of mamma; chest painful; ulcer side of neck; spot on olecranon; coldness in arm; stinging in elbow; numbness in hand; pain in flexor tendons of thumb; itching around thumb nail; pain in arm; pain in knee; cramp above knee; drawing in outer muscle of calf; drawing in tibia; cracking in knee joint; itching below knee; pain in bone above ankle; drawing outer side of thigh; pain in hip; pain in thigh; pain in ball of great toe; pain in ankle; sensitiveness of sole and toes; tickling in foot; pain in corn of toe.
Above downward: pain in arm; violent heat in head.
Below upward: pain in thumb joint; pain in whole left side.
Within outward: pain in eyes.
Before backward: stitch-pain in l. breast.

[43] **Sensations.** As if brain was shaken by electric shocks; as if head was surrounded by hot air; as if something protruded behind womb; as if heart had ceased to beat; as if wind was blowing on l. arm; as if head

Google

would split; as if skull would break, pain in vertex; empty feeling in head; eyes as if drawn back; as if leg was too long and drawn downward.
Feeling in limbs as if beaten.
Lancinating: in forehead, temples and occiput; in auditory meatus; in mammary tumor; in chest; deep, in anterior part of thigh; in toes.
Burning lancinations: in great trochanter and l. coxo-femoral joint.
Stitches in tongue; through breast to back; in l. wrist and calf.
Pricking: in upper arm.
Stinging: in l. elbow.
Piercing pain: like needles in lower jaw.
Jerking: in uterus.
Shooting: in tongue; on small spot on lower leg; r. instep; in l. big toe and other toes.
Tearing: in abdominal walls; in r. side.
Drawing: in tongue; in abdominal walls; in breast; in chest; in back; in muscles of upper arm; in r. wrist; in r. knee and below l.; in outer muscle of l. calf; in outer side of l. thigh; in r. hip; in l. ankle; in soles and toes.
Pressure: upon anterior lobes of brain; in r. side of occiput; on lower abdominal organs.
Boring: above l. eye.
Burning: in head; in feet.
Smarting: in scirrhus of breast.
Soreness: of scalp.
Crampy pain: above l. knee; in l. toes.
Constriction: in throat; in præcordial region; in r. side of chest; in epigastrium.
Contracting pain: in scrobiculum.
Painful stretching: in soles.
Scraping: on l. tibia.
Neuralgic pain: in mammæ; opposite l. molar teeth.
Gouty pain: in big toe.
Laming pain: in whole r. side.
Sudden pain: r. side of head.
Dull pain: in occiput; in œsophagus; in scrobiculum; in muscles of præcordial region; in r. side of abdomen; in mammæ; in l. coxo-femoral joint.
Undefined pain: in bones of sinciput; in eyes; below breast bone; in chest; in r. shoulder; in thumb; in l. hip; in l. thigh; in l. knee; above l. ankle; in l. great toe and joints of feet; in root of toes; in corn of l. toe; in limbs.
Heaviness: of head.

Google

Dulness: in head; in chest.
Throbbing: in head; in chest; in r. parotid.
Twitches: in brain.
Roughness: in larynx.
Crawling: in face; on lower limbs.
Strumming: in arms.
Tickling: on l. foot near toes.
Numbness: of hands.
Itching: upon chest; in r. axilla; around thumb nail; below l. knee; on r. tibia; on thighs and legs.
Dryness: in throat.
Heat: in head; in eyes; in throat; in rectum; in urethra; in feet.
Coldness: in l. arm.

[46] **Skin.** Itching spots.
Furfuraceous eruption between mammæ and on l. olecranon.
Chronic cutaneous affections and old ulcers with stinking ichor.
Eruption on thighs and insteps of small itching vesicles which tear easily and form superficial ulcers.
‖Scrofulous ulcer l. side of throat.
‖Itch.
‖Tetters.
‖Sensitive edges, fetid discharge. θCancer mammæ.
‖Dry, harsh skin, earthy appearance. θCancer mammæ.
Eruption of small blisters on thighs and legs, itching on ankles, changing to small burning ulcers, spreading but remaining superficial.
‖Skin destitute of pliability and elasticity. θUlcer on neck.

[47] **Stages of Life, Constitution.** ‖Sycosis.
Flabby, lymphatic constitution.
‖Girl, æt. 22, delicate, lymphatic and very irritable temperament; epilepsy.
‖Woman, æt. 48, flabby, lymphatic constitution, for several years a scrofulous ulcer.
‖Man, æt. 56, plethoric constitution, sedentary since eight years; epilepsy.
‖A woman, æt. 56, dry constitution; scirrhus in breast.
‖Woman, æt. 60, strong constitution; induration of l. mamma.
‖A man, æt. 74, nervous, sanguine, suffering hardships of war as an officer, particularly during campaign in Egypt; threatened apoplexy.

[48] **Relations.** Antidotes to *Ast. rub.*: *Plumbum* and *Zincum.*
Side relations: *Murex.*, *Sepia.*
Compare: *Crot. tig.*, *Grat.*, *Gummi gut.*, *Jatrop.*, *Thuya* (all

Google

similar in diarrhœa); *Bellad.* (pains come and go suddenly); *Lilium tig.* (sexual desire increased in women).
Useful after: *Bellad.*, *Carbo an.*, *Conium* and *Silic.* (in scirrhus of mamma); *Sulphur*, *Bellad.*, *Calc. carb.* (in epilepsy).
Incompatibles: coffee and *Nux vom.*
Ipecac. relieved after *Nux vom.* aggravated.

ATROPINUM.

Atropine. $C_{17}H_{23}NO_3$.

Discovered in 1833 as being the alkaloid in the berries, leaves and root of Atropa Belladonna; it was at first used in the Homœopathic School by such as wanted something stronger, and proved years after. As it is, we have to regard all the symptoms, provings, poisonings and cures, as very uncertain. See Fehling's Dictionary, vol. i, 1871, p. 902. The only trustworthy preparation is the *Atropinum sulphuricum*. This may have been the drug used in many cases in which it was not considered worth while to add the name of the mineral acid.

[3] **Sensorium.** Vertigo on rising in morning.
Furious delirium at night.
[3] **Inner Head.** Fine drawing, very sensitive stitches across forehead and temples, recurring every few minutes, lasting some seconds.
Dull pain in temples, at intervals, and transitory.
Very sensible sticking in l. temporal region on waking in morning, extending into ear and eye; > moving in open air.
Sensation as if head was screwed up; < walking; < towards 11 A.M.; > towards evening.
Sticking pains in back of skull and over eyes, < from every motion and on stepping.
Severe headache, beginning in occiput, passing over r. side, locating over eyes and in balls, followed by an epileptic attack, with unconsciousness.
Headache, with flushing of face and head, with rush of blood to head.
Periodical headache, coming on suddenly, increasing rapidly, until intensely severe, making blind and delirious.
Headache of epileptics.
Sudden pain soon making her blind and delirious, lasting

Google

three hours; no nausea and vomiting; no flushing of face; pain deep in brain; dreads attacks.

Slender married woman, æt. 32, nervous temperament; headache once a month, not with catamenia.

[5] **Sight and Eyes.** ‖Sharp neuralgic pains in and about eyes.

Eyelids felt heavy and difficult to keep open.

Sharp pain under r. eye, with slight pain in temples.

Neuralgic pains, commencing under l. orbit, and running back to ear, lasting perhaps ten minutes at a time, and then disappearing for fifteen or twenty.

‖Opaqueness; violent pain; dacryorrhœa; photophobia; swelling of lids. θKeratitis.

Dimness of vision, with dilated pupils.

‖A bad incised wound of cornea, with protruding iris. (*Atrop.* externally and *Arnic.* internally; cured in seven days.)

‖Blepharospasmus and irritability of eye; ‖‖with corneal ulcers.

‖Conjunctivitis, with lachrymation.

Erysipelatous inflammation of conjunctiva and lids.

Amblyopia; diplopia and chromopsia.

Iritis, if exudation has taken place, and inflammation is violent, to prevent adhesion.

Used for purpose of lessening intraocular blood pressure in inflammatory diseases of internal structures of eyeball, and also in inflammations of cornea and even conjunctiva.

[12] **Inner Mouth.** Mouth and throat dry.

[13] **Throat.** Dark, red, dusky hue of throat.

Difficult swallowing from great dryness.

[17] **Scrobiculum and Stomach.** In affections of diaphragm *Atrop.* stands between *Bellad.* and *Stramon.*

[19] **Abdomen.** ‖Frenzy, with distressing abdominal pain, occasionally leaves her; pulse quick; tongue dry; skin hot, but sweating. θPeritonitis.

[20] **Stool and Rectum.** ‖Catarrhal dysentery.

[21] **Urinary Organs.** Congestive states of kidneys and liver, with disturbance of r. heart; neuralgia of head; nausea and vomiting; soporous condition. θBright's disease.

[23] **Female Sexual Organs.** Ovarian neuralgia, with headache, or epilepsy.

[24] **Pregnancy. Parturition. Lactation.** ‖Puerperal convulsions. θAlbuminuria.

[31] **Neck and Back.** ‖Locomotor ataxia.

[34] **Limbs in General.** ‖From sleeping in a damp bed, acute rheumatism; pain in all his limbs, which are swollen and red; no sleep; general feverish and profuse sweat.

Google

[35] **Rest. Position. Motion.** Moving: sticking in l. temple better.
Stepping: sticking in back of skull worse.
Walking: sensation as if head were screwed up worse.
[36] **Nerves.** Muscular spasms in different parts of body.
Tetanus.
[38] **Time.** Morning: vertigo on rising; sticking in l. temple on awaking.
11 A.M.: sensation as if head were screwed up, $<$; $>$ towards evening.
Night: furious delirium.
[39] **Temperature and Weather.** Open air: sticking in temple better.
Sleeping in damp bed: acute rheumatism.
[42] **Locality and Direction.** Right: occipital headache passes side; pain under eye; disturbance of r. heart.
Left: sticking in temple; neuralgic pains commence under orbit and extend to ear.
[43] **Sensations.** As if head was screwed up.
Pain: in all his limbs.
Stitches: across forehead and temples.
Sticking pain: in l. temporal region; in back of skull; over eyes.
Sharp pain: under r. eye.
Distressing abdominal pains.
Neuralgic pains: in and about eyes; under l. orbit to ear; in head.
Dull pain: in temples.
Heaviness: of eyelids.
[44] **Tissues.** Influences cerebro-spinal centres, involving head, throat and eyes.
Vessels increase in volume, not in tone.
[47] **Stages of Life, Constitution.** Nervous, but not hysterical temperaments.
[48] **Relations.** Very similar to *Bellad.*
When *Bellad.* fails give *Atrop.*, both affect principally r. side.
Antidotes: *Opium, Physostigma.*
In *Opium* poisoning, has been found useful when applied hypodermically.

Google

ATROPINUM SULPHURICUM.

Alkaloid from Atropa Belladonna. $C_{17}H_{23}NO_3$.

Is most commonly used or abused by ophthalmologists to dilate the pupil. See Sickel, British Quarterly, 1868, vol. xxvi, p. 672, and Norton, in New York J. M., vol. i, p. 365, 1873. Hence seventy symptoms are marked π, such being observed on patients. A good proving by Kafka may be found in the British Quarterly, vol. xv, page 238.

[1] **Mind.** ‖Unconsciousness. θPuerperal eclampsia. θEpilepsy.
πAppears profoundly intoxicated.
πComplete unconsciousness of all preceding events.
πMind confused, commenced a sentence and forgot what she wished to say.
πIncoherent in observations, while thoroughly wakeful.
πShe insisted repeatedly that her blood did not circulate, and that her feet must be put into warm water or she should die.
Slight delirium; picking and other motions of hands and fingers in air, as if they came in contact with real objects.
πAll day wakeful and partially delirious.
πDelirium alternating with stupor.
‖Spectral illusions.
πHallucinations of hearing and vision.
πFrenzied with excitement and frantic in her appeals.
πLaughed in an idiotic manner.
Muttering and smiling.
‖Rambling speech.
‖Mirthful humor.
‖Sad and morose, prefering solitude and a dark room to society of friends. θEpilepsy.
‖Great fear and anxiety. θDiseased pancreas.
πBegan to quarrel incoherently with his supporters.
Exaltation of brain and spine, followed by prostration.
Violent stitches in base of brain, above eyes and in temples.
Languor of body and mind, rendering incapable of active bodily or mental exertion.

[2] **Sensorium.** Giddiness, heaviness and drowsiness, or actual somnolency.

Google

πSense of giddiness, figures on carpet would at times appear double.
πHead dull and confused.

[3] **Inner Head.** Aching pain in forehead for two hours.
A slight feeling of pressure under parietal bones.
‖Headache and great weakness. θDiseased pancreas.
‖Head attacked after puerperal epilepsy.
‖Meningitis, cerebritis of tuberculous cases; diseases of cerebral membranes and hydrocephalus acutus.

[4] **Sight and Eyes.** πEverything appears large and with a red halo.
πDuring evening eyes of an attending lady seemed to her very large, and she could not avoid looking at them.
Motes before eyes.
πThrough night several times a vision of great numbers of white flies on door, which was white; she requested that they would be brushed off; the flies were not moving and rather smaller than the common house fly; continued on closing eyes until noon of the following day.
πAnnoyed by appearance of a large black bug, with veritable legs, a few inches below a black door-knob.
πThe next following morning, imagining she saw a worm, a "thousand-legged worm" on her carpet, she sprang out of bed, and was found trying to find it; failing in this she would look in another place and see it again; this illusion kept her busy before fully satisfied of the fallacy; the color of worm was brown, same as predominant color in carpet.
π The large figures on the carpet appeared to her constantly and successively rising up to her face.
πPerpendicular diplopia, the apparent object below the real one.
Dimness of vision remains, unable to thread a needle or even to read.
πVision was much impaired.
πShe could scarcely see at all with l. eye, very little with the r., which was intolerant of light, and seemed to throw out streams of light.
Pupils unchanged for two weeks.
πRight pupil contracted, l. five times increased in size (after dropping it in this eye); only a slight trace of iris visible.
πPupils on side of injection greatly enlarged.
Increasing dilatation of pupils; pupils after two hours reach the maximum of dilatation.
πPupils enormously dilated, irides hardly visible, very refractory when any attempt was made to examine them closely.

Google

Dilatation of pupil from paralysis of oculomotor nerve, or from any other cause, is often aggravated by it.

Pupils not unusually dilated, but perfectly immovable.

The usual very large doses are dangerous when there are any suspicions of glaucoma, such as dilated pupil, severe pain, sudden increase of presbyopia, etc.

‖Iritis, except with too great intensity of inflammation, after nitrate of silver or cold applied to eye; as soon as there is any sign of exudation, or if pain becomes very severe, and has not been controlled by remedies, commence it immediatly and increase dose until it dilates pupil sufficiently.

‖Prolapsus of iris after hurts of cornea; if horizontal position, shutting lids and sudden opening in bright light is not sufficient.

Left to himself he did not drop into coma, as those who have taken opium, but would occasionally open his eyes with a vacant, amaurotic expression, and turn his head from side to side.

‖Deep ulcers in centre of cornea, which may perforate; to prevent iris from being drawn into opening.

‖Evil results of conjunctivitis, keratitis, chromopsia, amaurosis.

πLooking into a mirror she observed a strange appearance of her eyes, as though they projected from their sockets.

‖Rolling eyes. θPuerperal eclampsia.

πEyelids felt heavy and difficult to keep open, and yet no inclination to sleep.

‖Pain in and over eyes. θBefore epilepsy.

‖Supraorbital and orbital neuralgia.

[6] **Hearing and Ears.** Ringing in ears.

πMorbidly sensitive to sounds and objects; ‖with symptoms akin to early stages of meningitis.

[7] **Smell and Nose.** Occasional dryness of Schneiderean and conjunctival mucous membranes.

[8] **Upper Face.** Sensitiveness of side usually affected, with some swelling; some stages painful two days after.

πFace hot and very red.

‖Deep red distorted face. θPuerperal eclampsia.

‖Suffering appearance, without great paleness. θDiseased pancreas.

Paleness of face.

‖Deathly pallor. θGastric disturbance.

[9] **Lower Face.** Parched lips.

πShort but intense pains in one or the other lower jaws, and return of the usual prosopalgia; after three days.

‖Bloody foam at the mouth. θPuerperal eclampsia.

[10] **Teeth and Gums.** ‖Gnashing of teeth. θPuerperal eclampsia.

Google

πTeeth ceased to ache in two hours.

[11] **Taste and Tongue.** πPappy taste.

ıTaste bad, without any peculiar character. θPancreatic disease.

πDifficult articulation.

πThe tongue seems partially paralyzed, articulation indistinct, rapid and chattering.

Could not speak a word for dryness in mouth; tongue nearly adherent to roof of mouth.

Complete dryness of tongue, roof of mouth and soft palate, extending more or less down pharynx and larynx.

ıTongue hard, parched and cracked. θTyphus.

Tongue becomes covered with white fur; after two hours.

πFurred tongue; 3d day.

ıHis tongue was thickly coated.

ıTongue a little loaded. θPancreatic disease.

[12] **Inner Mouth.** πGreat dryness of mouth.

Dryness of mouth after two hours suddenly gives way to a viscid, acrid secretion of a peculiar and very highly offensive odor.

Mouth becomes foul and clammy; after two hours.

A gradually increasing feeling of dryness of mouth and throat, inceasing during one hour so that he could not speak a word; after two hours.

[13] **Throat.** πFeeling in mouth and throat was such she thought she "could not swallow," and when impressed with the necessity of so doing she drank with avidity the warm water offered, though at first it seemed quite difficult.

πRefuses obstinately to swallow anything or to answer questions in any way than by a grunt.

Swallowing appeared to give pain, manifested by grimaces and increased spasms of facial muscles.

Difficulty of deglutition from dryness extending down pharynx.

πTook fluid food well next morning.

πCould swallow soup, but no solids; thickened gruel would not go down.

ıThroat dark red. θEpilepsy.

[14] **Appetite, Thirst. Desires, Aversions.** ıAppetite often considerable, sometimes absent, with vomiting of ingesta.

πDevouring ravenously a large slice of dry bread; at 5 A.M.

ıAppetite very small, although now and then hunger is felt. θDiseased pancreas.

ıThirst after vomiting.

[15] **Eating and Drinking.** Compelled to take a glass of water; dryness and general feeling of illness left.

Google

‖Appetite is good, but as soon as she has eaten, nausea supervenes, with pressure at stomach, constant retching and empty eructations, followed by an emptying of contents of stomach.

‖Whenever he took breakfast he was seized with vomiting in the afternoon. θDiseased pancreas.

‖Immediately after eating he was usually seized with weight and pain at epigastrium, with frequent sour eructations, retching, followed soon by vomiting of ingesta, which, without admixture of blood, or any other foreign material, was so acid as to set his teeth on edge.

‖After each meal pressure and pinching in stomach, retching, soon followed by vomiting of food taken; if stomach has emptied itself, mostly free from pain.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea and retching with uneasiness of stomach, which increased to a pressing, sticking, contractive pain and continual belching.

‖Throws up all she takes. θGastric disorder.

‖Vomited all he took, whether solids or fluids, sweet or salt, little or much.

‖The matter vomited is not acrid, but is merely the food she has just taken.

πRelieved of her distress after vomiting, produced by copious draughts of warm water.

‖The vomiting was seldom attended with nausea, it came after a short exacerbation of pain quite suddenly, often extremely violent, never followed by retching; pain lessened afterwards. θDiseased pancreas.

‖Vomiting, appears sometimes in evening between 6 and 7; then in night between 11 and 1 o'clock; regularly five, six hours after a full meal. θDiseased pancreas.

‖Eating no dinner he remained without vomiting until evening. θDiseased pancreas.

‖Vomiting consisted of a red liquid, like washings of meat, in which food appeared when a meal had been taken five hours before. θDiseased pancreas.

‖Once the substance vomited was mixed with blood. θDiseased pancreas.

[17] **Scrobiculum and Stomach.** Fluttering sensation in cardiac region.

Uneasy sensation in stomach, with frequent empty eructations, affording no relief.

‖Region of stomach very sensitive to pressure; no organic change discoverable.

‖In region immediately below stomach, to l., pains not so violent as unendurable, could not describe them. θDiseased pancreas.

Google

‖Deep pressure on region below stomach, to l., is very painful, but no swelling to be felt. θDiseased pancreas.

‖In region of pylorus, close to umbilicus, towards r. side, a tumor nearly size of a fist, yielding some resistance, very sensitive to touch, movable, easily pushed aside, and yielding a dull sound on percussion. θGastric disorder.

[18] **Hypochondria.** πGreat distress in epigastrium, seemed indescribable.

[19] **Abdomen.** Abdomen swollen, tense, tympanitic, upon firm pressure signs of suffering.

‖Neuralgia of peritoneum, of long standing; as an ointment.

[20] **Rectum and Stool.** πSlight action of bowels next day.

πBowels worse on second day in evening; stool pappy, painless, usual color.

‖Diarrhœa, alternating with confined bowels. θDiseased pancreas.

‖Bowels relieved once in two, three days. θGastric disorder.

πDuring stool, felt badly, weak, terribly nervous, with general sweat.

[21] **Urinary Organs.** πCompelled to urinate every ten, fifteen minutes, without pain, at night between 10 and 1 o'clock; quantity profuse and almost colorless.

Involuntary, but scanty discharge of urine.

‖Urine normal, with gastric disorder.

πPassed very little urine, next day.

Inability to pass his water; a day after in drops and with difficulty; 2 weeks.

πPartial paralysis of bladder, requiring use of catheter.

No water passed since evening preceding; bladder not distended.

‖‖Chronic albuminuria.

[22] **Female Sexual Organs.** ‖Ovarian neuralgia.

‖Pains in ovary extort screams. θEpilepsy.

‖Severe cutting or drawing pains in l. ovary, screams, has to bend. θPuerperal epilepsy.

‖Pain in l. ovary, which was swollen and tender during menses. θEpilepsy.

‖Menses light in color and scanty. θEpilepsy.

‖Severe headache previous to menses, beginning in occiput, passing over r. side of head, locating in or over eyes, increases until an attack of epilepsy sets in.

[24] **Pregnancy. Parturition. Lactation.** ‖Mother of seven children, in each pregnancy about 3d month: severe cutting or drawing pain in l. ovary, extorting screams, caused to bend to that side; afterwards head attacked

Google

and epileptic convulsions follow; these attacks are more frequent and severe until a day or two before labor, almost continuous. θEpilepsy.

ıAfter-pains after normal birth of a primipara; violent convulsions; unconsciousness; deep red distorted face; rolling eyes; gnashing of teeth; bloody foam before mouth; bending in of thumbs; throwing about limbs; on remission stretching of body and deep sopor.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice husky from dryness, extending to larynx.

Dryness of larynx often induces dry cough and difficult deglutition.

[26] **Respiration.** Breathing remains tranquil.

No stertorous breathing.

Occasionally heaving a deep sigh.

πSensation of choking.

[27] **Cough.** ıCough following epilepsy, occurring at catamenia.

[29] **Heart, Pulse and Circulation.** ıFailure of heart's action from chloroform or other cardiac paralyzers.

A slight throbbing or heaving sensation in carotids.

Acceleration of pulse from 20 to 70, with a slight increase in its volume, and a considerable increase in force of cardiac and arterial contraction.

ıPulse 80 to 88, with gastric disorder.

πPulse 108 morning after second night, while perfectly rational.

πPulse very quick, but of good volume.

πPulse accelerated to 120, with increased tone but diminished volume.

ıPulse 60, irregular, intermittent, weak.

ıVery weak pulse.

Pulse is observed to fall before moisture returns to mouth, resuming its ordinary rate.

ıPulse small, constricted, 120. θPeritonitis.

[31] **Neck and Back.** ıConstant burning pains in back, under sternum and in region of stomach. θGastric disorder.

ıA large portion of spine so sensitive that she cried out on pressure, turned pale, and was seized with nausea, belching and retching.

ıPainful affections from spinal irritation.

[32] **Upper Limbs.** Could not hold a vessel of fluid in his hands nor carry it to his mouth; two weeks after.

ıGouty affection of r. wrist, with stiffness and want of feeling of fingers.

πHands cold; after two hours.

ıBending in of thumbs. θPuerperal eclampsia.

[33] **Lower Limbs.** πContinual dragging of legs when assisted, or rather held up, in walking.

Google

πSays her "limbs feel like sticks," and thought she could not use them to walk across room to sofa, but with aid she did so with considerable difficulty.
ıŒdema of legs. θAlbuminuria.

[34] **Limbs in General.** ıHands and feet cold and covered with cold sweat. θPeritonitis.
ıUpper and lower limbs always cold. θGastric disorder.
πNumbness and heaviness in her limbs so great that she feared the results of going to sleep lest she should never awaken.

[35] **Rest. Position. Motion.** Bending: pain in l. ovary better.
πEven when supported, could not move a step, feet being too heavy, and feeling no bottom.

[36] **Nerves.** πInvoluntary movements of hands towards head.
πConvulsive trembling of muscles of upper limbs.
ıThrowing about limbs. θPuerperal eclampsia.
Different parts affected with spasms.
πSubsultus tendinum.
Spasms increased when disturbed; left to himself they came every two, three minutes.
ıConvulsions after meningitis spinalis cured by *Bellad.*; remaining stiffness of lower limbs cured by *Nux vom.*
ıEpilepsy from ovarian irritation.
ıSome forms of epilepsy and chorea.
πMalaise and staggers, lasting more than eight hours.
Staggering, or complete inability to walk.
πGreat helplessness, amounting to partial paralysis of arms and legs.
πCould not rise, felt no bottom under his feet, staggered against the mirror.
ıSyncope from asthma or shock.

[37] **Sleep.** Frequently a prolonged yawn when sitting still in a dull apathetic, or drowsy condition.
πRestless night, with little sleep.
πBroken sleep.
ıNights restless, only sleep towards morning. θDiseased pancreas.
ıSleep was much disturbed on account of frequent gastric pains, which often occurred with great violence each night, especially when turning in bed.
πAt times during night, when nearly lost in sleep, she would suddenly start as if frightened.
Slept pretty well.
Could not be aroused at 6 A.M.
Drowsiness, or somnolency, with tendency to quiet dreams and delirium.
πSomnolency with nervous startings.

Google

Comatose, with clonic spasms of biceps flexor cubiti, and muscles of jaw; limbs cold.

‖Deep sopor after puerperal eclampsia.

After vigorous efforts to arouse him, signs of consciousness.

[38] **Time.** Towards morning: sleep.

6 A.M.: could not be aroused.

Morning: illusion of thousand-legged worm on her carpet; pulse 108.

During day: slight action of bowels.

All day: wakeful and delirious; passed but little urine.

Between 6 and 7 P.M.: vomiting.

Evening: the eyes of another lady seem to her very large, and she could not avoid looking at them; diarrhœic stool.

Night: saw numberless white flies on a white door; thick stool; restlessness; gastric pains; sudden starting when falling asleep.

Between 10 P.M. and 1 A.M.: profuse, frequent urination.

Between 11 P.M. and 1 A.M.: vomiting.

[39] **Temperature and Weather.** πFeels faint and greatly in need of fresh air.

[40] **Fever.** Slight elevation of temperature of surface, rarely exceeding one degree, still slighter of internal body.

A general diffusion of warmth throughout cutaneous surface.

πDry, hot skin; 3d day.

Slight sweat.

‖Typhoid and septic fevers.

[42] **Locality and Direction.** Right: eye intolerant of light; pupil contracted; tumor in side pyloric region; ache side of head; gouty affection of wrist.

Left: impaired vision of eye; pupil increased five times in size: unendurable pains in region below stomach to side; pain in ovary.

[43] **Sensations.** Violent stitches in base of brain, above eyes and in temples.

Pinching: in stomach.

Burning: in back; under sternum; in region of stomach.

Aching: in forehead.

Neuralgia: in ovary.

Sticking, contractive pain: in stomach.

Pressure: under parietal bones; at stomach.

Fluttering: in cardiac region.

Numbness: in limbs.

Dryness: of mouth; of tongue; into pharynx.

Uneasiness: in stomach.

Undefined pain: in and over eyes; in jaws; at epigastrium; in ovary.

Google

[44] **Tissues.** ‖Hyperæsthesia of some nervous branch of ophthalmic, auditory, olfactory, vagus and plexus solaris, of uterus and sphincter of bladder.

‖Rheumatic fever.

‖During last weeks, remarkable wasting. θDiseased pancreas.

‖Much emaciated, from a gastric disorder.

‖Collapse of cholera.

[45] **Touch. Passive Motion. Injuries.** Deep pressure: pain below stomach <; abdomen worse.

Touch: tumor in pyloric region sensitive.

[47] **Stages of Life, Constitution.** Miss, æt. 24, since 5 years, headache before menses ending with epilepsy.

‖Blonde, slightly built woman, æt., 25, had three children; since 5 years; gastric disorder.

Unmarried woman, æt. 30.

Intelligent married woman, æt. 40, medium size, nervo-sanguine temperament, good health; poisoned from using locally for toothache; marked π.

Unmarried woman, æt. 40, for six years vomiting after eating.

[48] **Relations.** Antidote to Muscarine, or poisoning by mushrooms, especially dyspnœa.

Antidote to meconate of morphia, or any other salt of opium, especially where the heart's action is greatly diminished.

Atrop. sulph. is to be preferred in cases in which *Bellad.* does not act effectually and permanently.

πFor hours he was kept constantly on the move, and strong galvanic currents passed along nape of neck every fifteen minutes, irritating him in a great degree.

Google

AURANTIUM.

Citrus Vulgaris; Lemon. *Aurantiaceæ.*

[1] **Mind.** Great excitement; motions quick, brusque, and performed with uncontrollable zeal.
[2] **Sensorium.** Feels drunken and giddy.
[3] **Inner Head.** ‖Hemicrania; r. side.
Pressing headache, now over whole head, now on one part, and forehead.
[4] **Outer Head.** Promotes growth of hair.
[5] **Sight and Eyes.** Weakness of sight.
[6] **Hearing and Ears.** Noises in ears as from bells ringing.
[8] **Upper Face.** Aggravated periodical erysipelas.
Faceache sometimes changes into transient but frequently repeated epileptic-like convulsions of face.
Neuralgia in face, shooting, gnawing pains, most in temples, especially r. side.
[10] **Teeth and Gums.** ‖Constant toothache.
Teeth become carious.
Teeth wear off.
[11] **Taste and Tongue.** Tongue furred thickly, brown.
[13] **Throat.** Something seems to rise in throat and choke her.
[14] **Appetite, Thirst. Desires, Aversions.** No appetite.
Great thirst, drinking little at a time.
[16] **Hiccough, Belching. Nausea and Vomiting.** Nausea and vomiting.
Smell of oranges always makes her sick.
[17] **Scrobiculum and Stomach.** Aching and heaviness in region of stomach; with belching and thirst.
[18] **Hypochondria.** Left side distended.
[20] **Stool and Rectum.** Constipation.
[21] **Urinary Organs.** ‖Pains in kidneys and bladder.
[23] **Female Sexual Organs.** ‖Too copious menses.
‖‖Painful menstruation (tincture of seed of lemons).
[26] **Respiration.** Oppression of chest.
Sensation in upper part of breast bone as if suffocating.
Constriction in throat.
‖Pleurodynia.
[29] **Heart, Pulse and Circulation.** ‖Palpitation.
[32] **Upper Limbs.** Pressure upon shoulders.
Small blister over whole arms, especially on hands and between fingers.

Google

General itching but much oftener only on upper limbs with redness and swelling of hands.
Spasmodic pains in hands.

[33] **Lower Limbs.** ‖Sciatica.

[34] **Limbs in General.** ‖Painful joints.
‖Trembling of limbs.
‖Cold limbs when traveling.
Stretching and drawing in limbs; has to strech and rub hands.

[36] **Nerves.** Trembling all over.
‖Lameness.
Restlessness, fidgety.
‖‖Half-sided epileptiform convulsions, especially of face and shoulders.
The whole muscular system is in a state of irritation, cannot keep in an erect position.

[37] **Sleep.** Constant irresistible gaping.
Sleep very restless, full of dreams.
Sudden starting, burning heat, tossing about in bed and sleeplessness.

[40] **Fever.** Oranges are said to render gastric fevers milder, even when of a typhoid form.

[42] **Locality and Direction.** Right: hemicrania; neuralgia in temple.
Left: hypochondrium distended.

[43] **Sensations.** As if something rose in throat.
Shooting: in face and temples.
Gnawing: faceache.
Drawing: in limbs.
Aching: in region of stomach.
Pressing: headache; upon shoulders.
Suffocating sensation: in upper part of breast bone.
Constriction: in throat.
Spasmodic pains: in hands.
Undefined pain: in kidneys and bladder; in joints.
Heaviness: in region of stomach.
Itching: on upper limbs.

[46] **Skin.** Dusky dry skin.
Red spots appear on different parts of body.
Children eating plenty of oranges peeled by themselves, get an eruption and other symptoms very similar to scarlatina.

[47] **Stages of Life, Constitution.** ‖Diseases of old men, especially with coldness and chilliness.

[48] **Relations.** An orange eaten before breakfast is said to destroy desire for alcoholic drinks in drunkards.

Google

AURUM METALLICUM.

Gold. *Au., the element.*

Gold, the common metal, proved and introduced by Hahnemann in 1818, in Materia Medica, vol. iv (95 and 138); 2d ed., 1825 (151 and 201); in Chronic Diseases, 2d edition, 1835, 404 symptoms. The last proving was made by J. C. Burnett, in 1879. No preparation ought to be used except such as has been made from the precipitate.

[1] **Mind.** Active memory.

- Weak memory. θPuerperal mania. θNeuralgia of face.

Loss of memory.

- Absence of mind, forgetfulness. θOzæna.

Mental dulness; feels stupid. See 35.

Inability to reflect.

- She thinks she feels depression of spirits in chest. θInduration of uterus.
- Looks on dark side, weeps, prays, thinks she is not fit for this world, longs for death, strong inclination to commit suicide; desperate, desires to jump from a height. θProlapsus or induration of uterus. θPregnancy.

Imagines he is neglectful and deserves reproach in consequence.

Imagines he cannot succeed in anything, and he does everything wrong; he is in disunion with himself.

Imagines to see obstacles in his way everywhere, occasioned partly by contrary fate, partly by himself; makes him feel desponding.

Thinking of death gives him intense joy.

- He imagines he has lost the affection of his friends; this makes him sad even to tears.
- Inclined to be delirious. θHeadache.
- Violent, gay, loquacious delirium, with exaltation of strength. θTyphus.

Insanity more frequent than imbecility.

- Suicidal mania or melancholia, tedium vitæ, with genital symptoms.
- Religious mania; prays all the time.

Desire to be active, to move about.

Longing for death.

- Mind constantly turns towards suicide. θProlapsus uteri. θChildbed. θAmenorrhœa.

Google

Disposition to commit suicide. θChronic hepatitis. θHeadache.
Hysterical mood, laughing one minute and crying next.
Constant complaining. θAdiposis.
Inclined to weep.
Weeping and praying. θMelancholy.
She howls and screams and imagines herself irretrievably lost.
Sudden screaming from earache. θOzæna.
Uneasy, hurried, desire for mental and bodily activity; cannot do things fast enough.
Taciturnity.
Desire for solitude.
Mood changing, cheerful or despondent; irritable; no unconsciousness.
Remarkable changeability of mind, now impulsive, rash, now very merry, now sad, anxious longing to die, soon after laughing aloud. θHysteria.
Lachrymose mood. θHeart disease.
Very sad, could cry all the time. θHemiopia.
Melancholy, disposed to weep; imagines he is unfit for this world, that he never can succeed.
Melancholy, feels hateful and quarrelsome; anxious palpitation and desire to commit suicide.
Great depression of spirits, accompanied by sterility.
Great depression of spirits. θOld age.
Melancholic mood, disposed to shun people; if meeting some one it gives him a nervous trembling and has to weep.
All the time a dark, hopeless mood, frequently anxiety and despair; life is a burden to him.
Terrible melancholy after abuse of mercury; patient pining away on account of bodily and mental anxiety.
Is very unhappy; continued thought of suicide. θPuerperal mania.
Hopelessness.
Hopeless and despondent. θHeadache.
Hypochondriasis, with longing for death.
A kind of hypochondriacal drunkenness; the head feels full of compressed air, especially towards nape of neck.
Apprehensiveness, full of fear; a mere noise at door makes him anxious.
Fearfulness, a longing for death. θHyperæmia of brain.
Dread of men.
Anxiety and dread. θValvular heart disease.
Anguish of mind and great grief. θHeadache.
Great anguish increasing unto self-destruction, with spasmodic contraction of abdomen.

Google

Frequent attacks of anguish about heart, with trembling fearfulness.
Excessive anguish with palpitation of heart, weariness in all limbs and sleepiness.
‖Great anguish coming from præcordial region, and driving him from place to place, so that he can remain nowhere.
‖Despondency.
Despair of self and others.
‖‖Weary of life; especially in evening, with longing for death.
‖Disappointed love, with weeping and inclination to commit suicide.
‖Has no confidence in herself, thinks others have none; this makes her unhappy.
Extreme disposition to be offended; he was extremely affected and provoked by least circumstances which had the appearance of hurting his feelings.
Choleric and quarrelsome.
‖Disposed to grumble and quarrel. θHeadache.
‖Quarrelsome disposition when displeased. θProlapsus uteri. θAmenorrhœa.
‖Alternately peevish and cheerful.
‖Whining mood. θObesity.
‖Peevish and vehement, least contradiction excites his wrath; he trembles when he cannot satisfy his anger.
‖Suffers constant vexation and torment. θJaundice.
Becomes angry at absent persons while thinking of them.
Chagrin, violent anger and vehemence.
‖Vehement and disposed to fly into a passion θHeadache.
Contradiction excites wrath; distrust.
‖Very sensitive, easily frightened, especially when falling asleep. θHysteria.
Prostration of soul and body.
Worse from mental exertion; better from entertainment.
‖‖Mental labor fatigues; headache from least mental exertion.
Feels weary and exhausted from performing mental labor.
‖Worse after emotion. θPalpitation.
‖‖Ailments from grief, disappointed love.
‖Ailments from fright, anger, contradiction, mortification, or vexation with dread, fear, reserved displeasure, or vehemence.
‖Pain makes her desperate so that she would like to jump out of window, or dash herself down. θParturition.

Sensorium. ‖‖Vertigo. θSyphilis.
‖Head giddy, full, hot. θMelancholy.

Google

Vertigo: ‖when stooping, as if turning in a circle; goes off on rising; ‖as if drunk, when walking in open air; feels as if he would fall to l. side; must lie down, even then for some time it returns on slightest motion.
‖Feels stupid, a dazed feeling in head. θChronic hepatitis.

[3] **Inner Head.** ‖Congestion of blood to head.
‖Rushes of blood to head with violent palpitation, great anxiety and fainting.
Uncomfortable feeling in forehead.
‖Violent pain in l. forehead and eye. θMelancholy.
Pressure in l. temple, < on being touched.
‖Severe frontal headache. θCoryza.
Heat of head with cold hands and feet.
Rush of blood to head with tumult and waving of head.
‖‖Tearing headache deep in brain, in forehead, temples and vertex, abating in open air.
‖Rush of blood to head; sparks before eyes, and glossy, bloated face; < from mental exertion.
‖Bruised pain, especially early in morning or during mental labor, ideas become confused; roaring in head.
Megrim, stitching burning pains, beating in one side of forehead; nausea, even bilious vomiting.
‖Fine tearing from r. side of occiput through brain to forehead; < during motion.
One-sided boring, severe throbbing; begins on awaking mornings.
‖‖Tearing in head, teeth and ears; < l. side. θHeart disease.
Headache as from incipient cold.
Sensation as if a current of air was rushing through head, if not kept warm.

[4] **Outer Head.** Pricking as from pins in forehead externally.
Boring in l. side of frontal bone.
Pressive pains in l. temple externally.
Pains in bones of head on lying down, affecting vital energy.
Pains in bones of skull, morning in bed.
‖Syphilitic exostoses on skull.
‖Skull bones painful, as if broken; < lying down.
Severe, constant burning heat on top of head.
‖Exostoses on skull; boring pains; < from touch.
Caries of mastoid process.
‖Tinea capitis.
Eruption of small white pimples all over hairy scalp, with heat and itching.
‖Portions of frontal bone had exfoliated. θSyphilis with mercurialization.
‖‖Falling out of hair, especially in syphilis.

Google

Sight and Eyes. Photophobia, profuse scalding tears on opening eyes; eyes very sensitive to touch.

Photophobia; lids cannot be even forcibly opened.

Weak sight and eyes.

Vision $\frac{5}{100}$, after *Aurum*[2x] $\frac{5}{80}$, and in eight weeks more, $\frac{5}{80}$. θTumor in eye.

By gaslight, a number of bright, floating specks and dots are seen.

Eyes > by moonlight, and after active muscular exercise.

Objects seem smaller and more distant. θHemiopia.

Sees a little better on looking intensely and steadily on an object, though he sees no trace of upper half of it.

Large letters cannot be distinguished, seem only something black upon a white ground.

Yellow, crescent-shaped bodies floating obliquely upward in field of vision.

Fiery sparks before eyes; optical illusions in bright colors.

Everything looks blue.

Color of optic nerve-entrances of a greenish hue, except round periphery, which was yellowish-white, with a slight trace of pigmentary deposit on lower outer edge of optic disc in l. eye.

Fog or smoke before his eyes, to this, at a later period, black spots were added, and for the last few weeks he can only see upper half of objects, their lower half seems to be covered by a black veil. θHemiopia.

Black spots floating before eyes. θHemiopia.

Tension in eyes; sees things double or mixed up.

Objects as if divided horizontally; sees only half of an object, other half as if covered with a dark body.

In upper dark section of field of vision occasional showers of bright, starlike bodies, lower half looks lighter, and he can distinguish color, light or dark.

Hemiopia of l. eye.

Could not see upper half of a room or any large object, though lower half was clear, with l. eye.

Hemiopia from straining eyes.

Strong pressure from within outward and from above downward in both eyeballs, accompanied by dull, heavy aching deep in both globes.

Pressing in eyes as from acrid dust. θHysteria.

Cutting pain through eyes.

Pains in eyes > by blowing nose.

On using eyes, sensation of violent heat in them.

Central portion of retinal vessels strongly pulsating.

Chorio-retinitis chronica, with an accumulation of fluid beneath retina, which settled to lower portion of l. eye, causing a large detachment of retina. θHemiopia.

Google

▮Large black subchoroidal tumor behind lens in fundus, growing from inner side.

Iris blackish-brown mixed with blood red, in place of pupil and encroaching upon iris a nodular new growth of a mixed black and red color, filling whole anterior chamber, without, however, displacing cornea, on which formed a vesicle discharging fluid; sclerotica sprinkled with blackish spots; conjunctiva pale red and swollen; slight lachrymation; pressing and slight burning in and about eye; later drawing in surrounding bones. θMelanotic tumor.

▮Vitreous hazy from infiltration. θHemiopia.

▮Anterior chamber contracted.

▮Protruding eyes. θHeadache.

▮Staring, dreary look. θMelancholy.

▮On pressure eyeball more tense and firm than usual.

Interstitial keratitis and kerato-iritis, even in atonic cases, with infiltrated cornea and fine interstitial vascularity.

▮▮Cornea opaque; leukoma; gray or yellow spots, always marked by a surrounding network of enlarged blood-vessels; after keratitis, syphilitic or scrofulous cases.

▮Iritis marked by much pain around eye, which seems to be deep in bone, extends from without inward, and is aggravated by touch. θMercurio-syphilis.

Pupils generally contracted.

Amaurosis.

▮Pupils irregularly dilated; cornea dull, with loss of usual lustre.

▮Macula corneæ.

▮Red sclerotica; burning, stitching, drawing and itching at inner canthus.

▮▮Scrofulous ophthalmia, with great photophobia.

▮Twitching in upper lid. θHemiopia.

▮Pains of a burning or dull character, compelling one to close lids; < in morning and > by application of cold water. θTrachoma.

▮▮Eyelids red, suppurating; stinging, pricking, itching; agglutination in morning; cilia fall out. θMercurio-syphilis.

▮Pannus, with ulceration of cornea; pains from without in; < from pressure.

▮Large bony tumor on l. eye, with boring, aching pains, < at night.

Little blisters turning into crusts on edges of lids, with some trichiasis.

▮Bones around eye feel bruised.

▮Styes on eyelids.

⁶ **Hearing and Ears.** ▮Humming, buzzing and rushing in ears. θ Hysteria.

Google

Roaring in ears. θ Cerebral hyperæmia.
Oversensitive to noises; but music relieves.
Annoying dryness in ears and nose, with difficult hearing.
Caries of mastoid process; obstinate otorrhœa; burning, pricking, itching; boring pain behind l. ear.
Congestion to ears.
Fetid otorrhœa; especially with caries of ossicula. θ After scarlatina.
Parotids swollen, painful to touch, as if pressed or contused.

Smell and Nose. Nosebleed.
Excessively fetid discharge from nose. θ Ozæna.
Scrofulous and syphilitic affections of bones of nose and face.
Caries of bones of nose and palate.
Complaints caused by strong odors.
Sensitive smell; everything smells too strong.
Putrid smell when blowing the nose.
Want of smell.
Pain in nasal bones.
Boring pain in nasal bones. θ Ozæna.
Nasal catarrh, with melancholy, or even suicidal mood.
Ulcerated, agglutinated, painful nostrils, cannot breathe through nose.
Crusts in nose. θ Ozæna.
Nose feels obstructed, as in dry coryza, yet air passes through freely.
Ozæna, excessively fetid discharge; severe frontal headache. θ Scrofula. θ Mercurio-syphilis.
Coryza, thick discharge, like white of egg; frequent sneezing.
Caries of nasal bones; r. nasal bone and adjoining parts of upper jaw painful to touch.
Nose sunken in. θ Caries of nose.
Boring in l. side of nasal bone, towards maxilla.
Burning, itching, stitching, smarting; feeling of soreness in nose, especially when touched.
Mucous discharge from posterior nares in morning.
Brown red spots on nose; nostrils chapped.
Yellow, thick discharge from nose, or dry, firm pieces are blown out, always of an offensive odor.
Tip of nose "knobby," red.
Nose red, swollen. θ Scrofula. θ Abuse of mercury.
Swelling of nose, like erysipelas.
Swelling of nose in room, after walking in open air.
Eruptions on nose.
Cancer of nose.

Google

[8] **Upper Face.** ‖Puffy under eyes. θ Endocarditis.
In groove between nose and cheek a cutaneous lump of size of a split pea, which irritates, gets picked, scabs over, and persists.
‖Anxious expression of face. θ Endocarditis.
Feels ill, and looks pale.
Heat only in face.
‖Face pale. θ Valvular disease of heart.
‖Blue about nose and lips. θ Typhus.
‖Face cyanotic. θ Asthma.
‖Face glowing red. θ Headache.
‖Face bloated, glossy; worse from mental exertion.
‖Swelling of one cheek, with drawing and tearing in upper and lower jaws; teeth feel too long; swelling of both cheeks.
‖Erysipelas of face.
‖Acute cutting, stinging and tearing, now in nerves of l. side of head, now of teeth, coming and going, preventing sleep.
‖‖Inflammation of bones of face; caries, with tearing, boring and burning stitches.
‖Violent boring in r. zygomatic process when walking.
‖Fine pimples on face. θ Prolapsus uteri.
‖Lichens on face.
‖Red eruption on forehead and nose, often peeling.
Fine pimples on face, their tips are filled with pus.
‖Corona veneris. θ Syphilis with mercurialization.

[9] **Lower Face.** Tensive pain in lower jaw.
‖Dull, pressive pain, either with or without swallowing, in a gland below angle of lower jaw.
‖Painful swelling of submaxillary glands.
‖Trismus. θ Typhus.
‖Lips bluish. θ Endocarditis.

[10] **Teeth and Gums.** ‖Toothache caused by drawing air into mouth; when chewing, suddenly a painful dulness in one of upper molar teeth.
‖Toothache from congestion to head.
‖Carious teeth. θ Faceache.
‖‖Toothache at night. θ Heart disease.
‖‖Violent tearing toothache, affects the heart.
‖‖Gums swollen, darker red, sore when touched or when eating; gums bleed easily.

[11] **Taste and Tongue.** Metallic taste in mouth; tongue slightly coated with brownish fur.
Milky taste.
‖Loss of taste. θ Melancholy.
‖Flabby taste with clear tongue. θ Hysteria.
‖Bitter taste in mouth, with sensation of dryness.

Google

‖Foul taste of even water.
‖Putrid taste in mouth, as of spoiled game, between meals.
‖Loss of taste; tongue hard as leather and immovable.
Tongue swollen with scirrhus-like hardness; after biting tongue in sleep.
‖Tongue trembling and dry. θTyphus.
‖Tongue dry and coated. θEndocarditis.
‖Tongue coated at back. θPining boys.
Ulcers on tongue.

[12] **Inner Mouth.** ‖‖Foul breath. θGirls at puberty.
Fetor of breath like old cheese.
‖In morning offensive breath, reddish tongue and copious salivation. θMelancholy.
Saliva copious, sweetish.
Aphthæ on tongue and in mouth.

[13] **Throat.** ‖Caries of palate. θAfter abuse of mercury. θSyphilis.
‖Red, swollen and ulcerated tonsils; difficult deglutition.
‖Boring in hard palate; caries of roof, palate and nose. θAbuse of mercury. θSyphilis.
‖Stinging soreness in throat only during deglutition.
Difficult rising of phlegm.
‖Dull, pressive pain, with or without swallowing, in a gland below angle of jaw.
‖‖Syphilitic ulcers in palate and throat.

[14] **Appetite, Thirst. Desires, Aversions.** Violent hunger and thirst.
‖Hunger, immoderate; relishes his meal, but hunger not appeased.
Immoderate appetite and thirst, with qualmishness in stomach.
Desire for milk and coffee.
‖Desire for alcoholic drinks, which are easily borne. θTyphus.
Loss of appetite.
‖Want of appetite. θJaundice.
Aversion to food, especially meat.
‖Appetite poor. θHemiopia.
‖No appetite for plain food. θPining boys.

[15] **Eating and Drinking.** After dinner: discomfort in abdomen; sleep.
After eating: colic; inclined to vomit; pressure in hypochondria; sense of suffocation.
Worse after drinking; after wine.
Worse when hungry; pain at stomach, etc.
Colic even after simplest food.
Drowsy after dinner.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Sour belching.

Google

Eructations of gas relieve attacks of palpitation.
Nausea from mental labor.

[17] **Scrobiculum and Stomach.** Burning sensation at stomach, with hot risings.
❙Pressure in region of stomach at noon.
❙Pressure to l. of scrobiculum, below cartilages of upper false ribs; < during expiration.
Swelling of pit of stomach and hypochondrium, with stinging pain when touching parts.

[18] **Hypochondria.** Swelling of liver consecutive to cardiac hypertrophy.
❙Burning heat and cutting in r. hypochondrium.
Jaundice, with pain in liver and pit of stomach; greenish-brown urine; bad breath and putrid taste.
❙Chronic hepatitis, with aversion to life; suicidal mood; averse to exercise, feels stupid.
❙Painful accumulation of gas below l. ribs, causing stitching pains.
Pressure in hypochondria, as from flatulence; < after food or drink, and motion.

[19] **Abdomen.** Distended abdomen.
Nightly flatulent colic.
❙Ascites: from disturbances of abdominal organs; with albuminuria; with melancholy.
❙Abdomen puffed up. θHysteria.
Colic, frequent discharge of wind.
❙Tabes mesenterica.
Spasmodic contraction of abdomen, with great anguish; inclined to suicide. See 29.
❙❙Inguinal hernia; also with children.
Heaviness in abdomen, with icy cold hands and feet.
Intolerable itching in r. groin in its inner third, could not resist scratching; later inspection showed a wheal, tender from violent rubbing; even after wheal is gone, part remains tender.

[20] **Stool and Rectum.** ❙❙Proctostasis.
Copious stool.
❙Passes fetid flatus.
❙Stools: offensive, painful; greyish, ashy; offensive in pregnancy.
❙Nightly diarrhœa, with burning in rectum.
❙Hard, knotty or large stools; constipation, < during menses, with prolapsus uteri.
Piles with rectal catarrh; costive; external piles bleed during stool.
Constipation; stool very large in size and very hard or knotty.
❙Obstinate constipation. θJaundice.

Google

‖Looseness and costiveness in alternation. θMelancholy.

[21] **Urinary Organs.** For many days great morbid activity of uropoetic system.

‖Urination frequent with painful retention. θProlapsus uteri.

‖Albuminuria consecutive to heart disease.

‖Kidneys hyperæmic, with pressure around waist and increase of urine; consecutive to cardiac hypertrophy.

Passes more urine than corresponds to quantity of water drunk.

Constant urging to urinate.

‖Urine scanty, greenish-brown. θJaundice.

‖Urine clear, gold-colored. θDropsy.

‖Turbid, like buttermilk; much mucous sediment.

‖Urine ammoniacal, decomposes rapidly, smells like the otorrhœa.

‖Ischuria and constipation, worse during menses. θProlapsus uteri.

Suppression of urine.

Painful retention of urine with pressure in bladder.

‖Frequent painful retention of urine.

‖Urethritis.

Renal secretion much less in quantity.

‖Hæmaturia.

[22] **Male Sexual Organs.** ‖Testes mere pendent shreds. θPining boys.

‖Chronic induration of testicles.

‖Testes indurated; also after abuse of mercury.

Testes a little swelled and hard.

‖Frequent nightly emissions. θMelancholy. θNeuralgia of face.

‖Onanism. θFaceache. θMelancholy.

‖Nightly erections without emission; or nightly erections and pollutions, without subsequent weakness.

‖Discharge of prostatic fluid from a relaxed penis; settled melancholy, with suicidal mania.

Sensation as if a knife was drawn through swollen testicle.

‖Right testicle swollen; pressive pains when touched or rubbed; pressure and tension as from a bruise.

Itching of scrotum.

‖Ulcers on scrotum, after gonorrhœa.

‖Cutting and stinging in perineum.

‖Inguinal glands suppurate. θMercurio-syphilis.

‖Hydrocele. θChild, æt. 6 months.

‖Chancres.

‖Hunterian chancres.

‖‖Secondary syphilis; also infantile; especially after abuse of mercury (and probably of potash).

Google

Affections of prepuce.
‖Balanitis.
Condylomata around anus; around corona glandis.
‖Sarcocele; ‖epididymitis; ‖orchitis.
‖Syphilis.

[23] **Female Sexual Organs.** ‖‖Sterility after depression of spirits.
‖Ovarian affections connected with syphilis.
‖Induration of uterus. θProlapsus uteri.
‖Menses delayed, especially the first. θProlapsus uteri.
‖Menses too late and scanty. θProlapsus uteri.
‖‖Amenorrhœa with great melancholy; her mind constantly inclines to suicide. θProlapsus uteri.
‖Bruised, shooting or drawing pain in uterus. θProlapsus.
‖Drawing pain at pubes. θProlapsus uteri.
Right inguinal region sore to touch; uterus affected.
‖Os uteri swollen, hardened.
‖Prolapsus and induration of uterus.
‖‖Uterus prolapsed and indurated; bruised pain, with shooting or drawing; heaviness in abdomen; after lifting a heavy load; worse at menstrual period.
‖‖Menses regular, but with headache and burning on vertex; uterus indurated.
Menses too late, scanty; preceded by swelling of axillary glands; accompanied by colic, prolapse of rectum.
Constant oozing from vulva.
Thick white leucorrhœa; burning smarting of vulva; labia majora red, swollen
‖Leucorrhœa profuse and corroding, yellow. θProlapsus uteri.
‖Leucorrhœa thick white. θProlapsus uteri.
‖Prolapsus: with backache, < during menses; with heat of vagina; ‖from reaching high; ‖from straining; ‖‖with induration of uterus and bruised, shooting or drawing pains.

[24] **Pregnancy. Parturition. Lactation.** During pregnancy: suicidal melancholia; jaundice.
Suppressed milk.
‖Palpitation following metrorrhagia after a mole or in childbed, after overexertion.
‖Labor pains make her desperate, she would like to jump from the window or dash herself down; often with congestion to head and chest and palpitation.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice: nasal; husky, as if he had a cold.
Phlegm deep in larynx, not easily hawked up.

[26] **Respiration.** ‖Morning asthma; face cyanotic; light-haired persons; < after mercury, in wet weather and in warm air.

Google

‖Marked dyspnœa, anxiety at heart; stenocardia.
‖Excessive dyspnœa, with difficult breathing at night.
‖Cardiac difficulty of breathing. θOld age.
‖Dyspnœa: with dull stitches in chest when inspiring; cannot be relieved in any position; takes deep breaths from besoin de respirer. θHeart disease.
‖Asthma from congestion to chest; great oppression at night and when walking in open air; suffocative fits, with spasmodic constriction of chest; face bluish-red; palpitation; falls down unconscious.
‖Want of breath. θValvular disease of heart.
‖Difficult breathing. θJaundice.
‖‖Loses her breath, > from belching or walking. θHysteria.
Suffocative fits and constriction of chest.
When laughing difficulty in breathing.
‖Propped up in bed and breathing very hurriedly. θEndocarditis.

[27] **Cough.** ‖Cough for want of breath at night.
Cough with tough yellow sputum on awaking in morning.
Dry, spasmodic, nervous cough, peculiar to females; periodically, every night from sunset to sunrise.
Expectoration infrequent, morning and evening.
‖Moist râles all over chest with cough. θEndocarditis.

[28] **Inner Chest and Lungs.** Great tightness of chest.
Violent rush of blood to chest.
‖Hyperæmia of lungs.
‖Shooting through back when breathing. θFacial neuralgia.
Shooting pains in chest after attacks of palpitation.
Dull stitches in both sides of chest, with heat in chest and dyspnœa; increased by inspiration.
Persistent dry catarrh on chest, early in morning, on waking; with great difficulty he raises a little phlegm, and this only after rising from bed.
Oppression of chest with faceache.
‖Extreme tightness of chest with difficult breathing.
‖‖Great weight on chest, especially a heavy weight on sternum. θAngina pectoris.

[29] **Heart, Pulse and Circulation.** Frequent attacks of anguish about heart, with tremulous fearfulness; great anguish increasing to self-destruction, with spasmodic contraction of abdomen; uneasiness and hurried desire for bodily and mental activity; he cannot do anything fast enough, and does not succeed in satisfying himself; is constantly impelled to be in motion, and is sorry for his inactivity; he imagines he is neglecting something and deserves reproaches in consequence.

Digitized by Google

‖Violent heart-stroke not synchronous with pulse.
Sensation as if heart was turning around.
Constriction of chest with a painful spasmodic sensation of heart; pulse remits.
‖Pains wander from joint to joint, and finally become fixed in heart; must sit upright; feels as though heart ceased and then suddenly gave one hard thump.
Pain in region of heart, extending down l. arm to fingers.
Pain in heart and palpitation; jumping feeling of heart and violent palpitation by motion.
‖Angina pectoris.
‖Action of heart floundering. θEndocarditis.
‖‖Violent palpitation, anxiety and congestion of blood to head and chest. θAfter uterine hemorrhage.
‖Palpitation, with great agony.
When riding or walking, palpitation compels him to stop.
‖‖Violent beating of heart after exertion.
Between attacks of palpitation, feeling as of a bladder hanging in l. chest; must often take a deep breath.
‖Attacks of oppression at heart at night, with palpitation and great debility. θOld age.
‖Loud endocardial bruits. θEndocarditis.
‖‖Fatty degeneration of heart.
‖Violent orgasm of blood as if it was boiling.
‖Congestions to head and chest, with anxious palpitation.
‖Visible beating of carotids and of temporal arteries. θHeart affections in old age.
Palpitation, with irregular, intermittent pulse; short breathing.
‖‖Pulse small, but accelerated; small, feeble, rapid; irregular.
‖‖Pulse quick, full, corresponding to beat of heart, and omitting before single strong beat. θHeart disease.
‖Pulse rapid, compressible and intermittent. θEndocarditis.
‖Weak pulse. θOld age.
‖Weak heart.
‖Sensation as if heart stood still.

[50] **Outer Chest.** A wart, size of a split horse-bean since proving *Cundurango*, several years since, is beginning to lap over and to catch things and seems flatter; in sixth week flatter and much smaller; on 80th day, nearly gone; in twelfth week increases again.

[51] **Neck and Back.** ‖Enormous goitre disappeared long after.
‖Swollen cervical glands. θScrofulous ophthalmia.
Tension in neck, as if muscles were too short, even at rest; mostly when stooping.
‖Spine disease, with gressus gallinaceus.

Google

Pain in small of back as from fatigue.
Tendons of muscles so painfully stiff that thigh cannot be raised; thigh feels paralyzed.
‖Stinging pains in small of back. θJaundice.
Pain at lower part of spine.

[32] **Upper Limbs.** ‖Arms start. θHysteria.
‖Boring in l. shoulder.
‖Inflammatory swelling of axillary glands.
Difficult movement of arms; they feel fatigued; forearms feel heavy.
‖Severe bone pains in r. elbow.
‖Boring in r. forearm.
Cramplike tearing in bones of both arms.
|Palms itch.
‖Herpes of palms.
‖Boring in finger joints.
‖Bones of hands swelled; almost immovable, and tender. θEndocarditis.
‖Large bursa-like swelling on wrist for a long time. θHemiopia.
‖Flesh of hands puffy. θEndocarditis.
Finger nails turning blue.

[33] **Lower Limbs.** ‖Coxalgia.
‖Retraction of lower limbs. θTyphus.
All the blood appeared to rush from her head into her lower limbs; they feel paralyzed; she has to sit down.
Tottering of knees; stiffness, paralytic feeling; they pain as if firmly bandaged, when sitting.
Right knee becomes weak from walking; drawing when walking or setting foot on floor.
‖Weakness in limbs, most in hollow of knees. θNeuralgia.
Small blotches on leg and below knee, when slightly rubbed they are changed to thick nodosities under skin.
‖Nodes on legs. θSyphilis with mercurialization.
Caries in bones of lower extremities.
Boring in tibiæ, ankles and dorsa of feet.
‖Swelling of legs and feet, when getting up in morning; > after walking.
‖Toes red.
Itching on soles.
‖Slight dropsy of feet. θEndocarditis.
‖Swollen feet. θValvular disease of heart.
Weary pains in r. tarsal bones, shooting up towards knee, early morning in bed.

[34] **Limbs in General.** ‖Limbs go to sleep; numb, insensible on awaking; more while lying than when moving.

Google

Paralytic drawing in limbs in morning, when awaking;
‖Has to seize hold of l. arm during attacks of palpitation.
‖Swelling of periosteum of forearm and thigh bones.
‖Pain as from bruises in head and limbs, early in bed; mostly at rest; passes off after rising.
Sensations in joints and muscles like after unwonted exercise.
‖Limbs swelled and painful, joints almost as firmly locked as if anchylosed, cannot move hand nor foot for pain, from this swelled and inflamed state of joints. θEndocarditis.

[35] **Rest. Position. Motion.** ‖‖Inclined to be active.
Lying down: bones of skull painful; limbs feel numb.
Must lie down: vertigo.
In dyspnœa no position relieves.
Sitting: knees pain as if firmly bandaged.
Must sit down: paralytic symptoms. See 33.
Must sit erect: heart disease.
Rising: vertigo goes off; raises only a little phlegm; pain in head and limbs goes off.
Stooping: vertigo, as if turning in a circle; tension in neck.
Walking: vertigo, as if drunk; headache <; boring in zygoma; asthma <; breathing in hysteria >; palpitation so bad must stop; r. knee weak; relieves swelling of feet.
Motion: vertigo; headache <; pressure in hypochondrium <; compelled to move; relieves numbness in limbs.
Exertion: beating of heart.
‖From overexertion during confinement. θPalpitation.
Wants to jump out of window: during labor.
πExercise, even fatigue, aids the action.

[36] **Nerves.** Increased bodily and mental activity, followed by prostration and melancholy.
‖Hysterical symptoms, cold hands and feet. θProlapsus uteri.
‖Increased bodily irritability.
‖‖Hypochondriasis and hysteria.
In morning completely exhausted, as if he had not slept.
‖Tremulous agitation, as in joyous hope.
‖Hysterical spasms; alternate laughter and crying.
When thinking of a motion, he makes small motions without knowing it; when speaking he smiles involuntarily.
Sensation of internal emptiness and weakness of whole body.

Google

▮Great nervous weakness.
▮Great debility. θHeart affection in old age.
▮Convulsive movements of face and limbs. θTyphus.
▮Alternate convulsions and stupor. θTyphus.
▮Wavering, uncertain walk. θMelancholy.

[37] **Sleep.** Feels fagged in evening, yet not able to sleep.
Looks and feels ill, and although weary, no inclination for either rest or sleep.
Very wakeful, well up to work; geat mental activity.
▮Continuing sleeplessness; if he falls asleep erotic dreams, erection and emission. θMelancholy.
Frightful dreams.
Narcosis with uræmia.
▮Sobs aloud during sleep; frightful dreams about thieves, with loud screams.
▮Awake all night, no pain; no lassitude or sleepiness in morning.
▮Sleep disturbed by sexual excitement. θHysteria.
▮▮Sleeplessness. θHeadache.
Sleepless after midnight.
▮▮Awakened by bone pains, suffering so great he despairs, does not want to live.
Bruised feeling; mornings in bed.
Sleep does not refresh.
Two successive nights dreamed a great deal of death.
Early in morning in bed weary pains in r. tarsal bones.
Bad nights, dreaming of dead and of corpses.
Dreams towards morning.
▮Sleep restless and full of anxious dreams. θHemiopia.

[38] **Time.** ▮Night: boring, aching in l. eye <; toothache; diarrhœa; difficult breathing; cough from want of breath; feeling of lump in throat; constantly awake; cold hands and feet; ▮▮bone pains; colic and passing wind.
▮Nocturnal bone pains.
After 3 A.M.: delirious talk.
Morning: headache; confusion of head early, on rising; eyes <; mucous discharge in posterior nares <; cheeks swell; eyelids adhere; asthma; cough on awaking; expectoration; catarrh on chest; swelling of legs and feet; paralytic drawing in limbs; exhausted, as if he had not slept; no lassitude, though he did not sleep through night; bruised feeling in bed; sweat.
Noon: pressure in epigastrium.
Remission during day and evening, until 12 P.M.
Evening: expectoration; satiety of life at 6 P.M.; testicle swells; chill.
Evening till midnight: violent itching.

Google

Evening and morning: expectoration.
‖Always < as day progresses, and > in morning. θHemiopia.
Sunset to sunrise: cough <.

[39] **Temperature and Weather.** In room: swelling of nose; stinging, burning pains >.
In bed: shivering; legs cold.
Warm air: asthma <.
Air: aggravates toothache.
‖Desire for open air. θAdiposis.
Open air: vertigo, as if drunk; swelling of nose; aggravates asthma, and stinging and burning pains; > headache.
Averse to uncover.
Getting cold: paralytic drawing in limbs.
Cold water: ameliorates pain in eyes.
Wet weather: aggravates asthma.
Very sensitive to cold: over whole body.
‖Generally > growing warm. θHeadache.
Many symptoms disappear after washing.

[40] **Fever.** Chill predominating.
Chill and coldness of hands and feet, also in bed, often lasting all night.
General shivering, evenings in bed.
Coldness of whole body with blue nails and nausea.
Cold hands and feet; sometimes lasting all night; want of thirst.
Chill lessened after getting out of bed; shivering in bed. legs cold as far as knees.
The severer the pains, the colder she becomes.
Heat only in face; aversion to uncovering; cold hands and feet.
Heat most in face, alternating with chill.
‖Sweat early in morning; mostly on and around genitals. θMelancholy.
‖Profuse perspiration. θEndocarditis.

[41] **Attacks, Periodicity.** ‖Every day several paroxysms. θPalpitation of heart.
Paroxysm of palpitation every 2, 3 weeks, coming on when sleeping, walking or riding, lasting half hour.
Pains come and go: neuralgia of head.
Every night from sunset to sunrise: dry, nervous cough.

[42] **Locality and Direction.** Right: pain in side of occiput; caries of nasal bones; upper jaw painful; boring in zygoma; cutting and heat in hypochondrium; testicle swollen; inguinal region sore; boring in forearm: bone pains in elbow;
Left: tearing in head, teeth and ears; boring in tumor on

Google

eye; hemiopia; boring behind ear; boring in nasal bone; neuralgia of head; pressure in scrobiculum; gas accumulates under ribs; sensation of a bladder hanging in chest; boring in shoulder; seizes arm during palpitation.

Without inward: pains in eyes.

Pains wander from joint to joint.

Rending pain upward.

Pain pressing inward.

Pain from within outward, in eye diseases.

Left side worse, with nasal catarrh.

[43] **Sensations.** Oversensitive to all pain.

Pains drive to despair, does not want to live.

Susceptible to all sorts of pains; on thinking of them, he imagines he already feels them.

As if a current of air was rushing through head; skull bones as if broken; as if a knife was drawn across testicle; as if blood was boiling; as if heart stood still; teeth feel too long; as if heart was turning round; as of a bladder hanging in l. chest; knees as if firmly bandaged.

Violent pain in l. forehead and eye.

Boring: hemicrania; behind l. ear; in nasal bones; in bones of face; in hard palate; in l. shoulder; in r. forearm; in finger joints; in tibiæ; ankles and dorsa of feet;

Cutting: through eyes neuralgia in face and head; in r. hypochonder; through swollen testicle; in perineum.

Stitching: megrim; in nose; below l. ribs.

Stitches: in chest; inner canthus.

Shooting: in uterus; through chest; towards knee from tarsal bones; through back.

Pricking: in forehead; in eyelids; in mastoid process.

Stinging: in eyelids; neuralgia in face and head; in throat; in swelling of epigastrium; in perineum; in small of back.

Smarting: in nose; of vulva.

Soreness: in nose; in throat.

Burning: megrim; in eyelids; in mastoid process; in nose; at stomach; in r. hypochonder; in rectum; on vertex; of vulva.

Drawing: around the eyes; inner canthus; in jaws; in uterus; at pubes; in r. knee; in limbs.

Tearing: from side of head through brain; deep in brain; in forehead, temples and vertex; in teeth and ears; in jaws; neuralgia in face and head; toothache.

Cramplike tearing: in bones of wrists.

Pressure: in l. temple; in eyeballs; in submaxillary glands; in region of stomach; to left of scrobiculum; in the hypochondria; in bladder; in r. testicle.

Google

Aching: dull, heavy, in eyeball.
Bruised pain: in head; in r. testicle; in uterus; in limbs.
Weary pains: in r. tarsal bones.
Undefined pain: in bones of head; in nasal bones; in liver and pit of stomach; in heart.
Undefined: at lower part of spine; in r. elbow; in lower part of back.
Beating: in forehead.
Uncomfortable feeling: in forehead.
Tension: in eyes; in lower jaw; in r. testicle; in neck.
Constriction: of chest.
Spasmodic sensation: about heart.
Twitching: in upper lid.
Jumping feeling: of the heart.
Paralytic feeling: in lower limbs; in knees.
Heaviness: in abdomen; in forearm.
Numbness: of limbs.
Dryness: in ears and nose; in mouth.
Heat: in eyes; in chest; of head.
Itching: in eyelids; in mastoid process; of inner canthus; in nose; in r. groin; of the scrotum; of palms; of soles;

"**Tissues.** Rheumatism appears on back, sacrum, hands and feet, after the heat is relieved.
Boring pains, mostly in the bones.
Crampy tearing pain in phalangeal bones and joints.
Arthritic deposits.
Bone pains at night.
Osteitis; caries.
Ulcers after abuse of mercury, which attack bones.
Erethism or vascular fulness characterizes nearly all complaints; thus ruddy with scrofula, vascular leukoma, congestive asthma, ebullitions, erections, congested kidneys and liver—all from hypertrophied heart.
Violent orgasm; plethora.
Cancerous ulcers.
External parts become black.
Dropsy; ascites; albuminuria and heart affections (urine is clear and gold-colored).
Exostoses of skull and other bones.
Boring in bones; caries especially after mercury; pains drive to despair.
Corpulency; fat about heart; especially if nervous irritability is present.
Glands painfully swollen; scrofula, ruddy complexion.
Adenitis.
Emaciation; secondary syphilis; also in melancholia.
Rheumatism, erratic; attacking the heart.
Indurations.

Google

Scrofula.
‖Arthrocace scrofulosis.

45 **Touch. Passive Motion. Injuries.** Has to seize and grasp l. arm tightly during attack of palpitation.
Touch: aggravates boring pains in skull, pains in eyes, pains in swollen parotids, soreness of nasal bones and upper jaw, soreness of gums, pains in testicles, soreness in inguinal region.
Rubbing: causes blotches on leg to feel like thick nodosities.
Pressure: aggravates eye symptoms.
Riding: produces palpitation.
Lifting: causes prolapse of uterus.
‖After a fall: swelling in groin.

46 **Skin.** ‖Jaundice with greenish-brown urine and costiveness for twelve days.
‖Skin dark yellow. #Jaundice.
‖Patches of a brown hue and some like albugo. #Old age.
=Violent itching, first in soles of feet and then over whole body, from evening till midnight.
Fine papular eruption on face.
‖Deep ulcers, affecting bones; after abuse of mercury.
Small and large blotches, stinging burning, feeling like hard knots, of a dirty yellow color; less in-doors than in open air.
Indurations under skin on leg, over heel and behind knee, itching violently.
‖Warts, scrofulous, syphilitic, mercurial.

47 **Stages of Life, Constitution.** Sanguine people, with black hair and dark eyes, lively, restlesss, anxious disposition; disposed to feel anxious about the future.
Headache of people with black hair, dark, olive brown complexion; disposed to constipation; sad, gloomy, taciturn.
‖‖Constitutions broken down by combined influence of syphilis and mercury.
‖Had syphilis ten years ago. #Hemiopia.
‖Low-spirited, lifeless pining boys, their memories bad, lacking altogether in boyish go. See 22.
Carbo-nitrogenoid constitution.
‖Females: nervous cough; hysteria.
‖Girls at puberty.
‖‖Often indicated with old people; weak vision; corpulency, etc.
‖Scrofula; light-haired; sanguine temperament; ruddy complexion.
‖‖Syphilitic and mercurial patients.
‖Man, æt. 34, troubled with headache and hemorrhoidal complaints, now tired of life.

Google

Man, æt. 35, sanguine, nervous, strong; after gonorrhœa. θMelancholy.

Man, æt. 85, oppression of heart.

Man, æt. 63, florid complexion, sanguine temperament. θMelanosis of eye.

[48] **Relations.** Similar to: *Amm. carb.* (chest, heart); *Arg. met.*, *Arg. nitr.*, *Arsen.*, *Asaf.* (pains about eyes; but *Asaf.* has relief from pressure; caries from mercury); *Bellad.*, *Capsic.* (caries of mastoid; corpulency); *Calc. ostr.* (leucophlegmatic, corpulent; gold has more oversensitiveness and erethism); *Calc. phosph.*, *Coccul.* (empty feeling); *Cinchon.*, *Coffea* (hyper-excitation); *Cuprum* (asthma; *Digit.* (heart; inclined to activity); *Ferrum* (hyperæmia); *Glonoine* (hyperæmia of lung from heart); *Hepar*, *Iodum*, *Kali bichr.* (deep ulcers, scrofulous ophthalmia, ozæna, secondary syphilis); *Kali carb.*, *Kali hydr.* (secondary syphilis; mercurial affections of bones and periosteum); *Kali brom.* (anguish at heart and desire to move about); *Laches.*, *Lycop.*, *Mercur.*, *Nitr. ac.*, *Nux vom.* (hernia, prolapsed uterus); *Pallad.* (uterine symptoms); *Platina* (uterine symptoms); *Pulsat.*, *Spigel.*, *Sol. nigr.*, *Silic.*, *Sepia*, *Sulphur*, *Tarantul.* (heart as if turned around; hysteria); *Thuya* (condylomata); *Ver. vir.* (heart).

After *Kali bichr.* had been given in vain, *Aur. fol.* cured ozæna, and caries of nasal bones.

Man, æt. 52, whisky drinker. θDecrease of vision.

In spite of daily use of whisky, and not abstaining from its use, got well. θHemiopia.

Antidotes to *Aurum*: *Bellad.*, *Cinchon.*, *Coccul.*, *Coffea*, *Cuprum*, *Mercur.*, *Pulsat.*, *Spigel.*, *Sol. nigr.*

Aurum antidotes: *Mercur.*, *Spigel.*

Aur. met., 2d trituration, from July 16th to 21st, twice a day, subsequently, once in four days for sixteen days, cured melanosis of eye, after *Thuya*, *Carb. an.*, *Conium*, *Bellad.* and *Arsen.* had failed.

Antidote to ill effects of mercury.

After having taken large quantities of iodide of potash. θHemiopia.

Google

AURUM MURIATICUM.

Auric Chloride. $AuCl_3$.

Hahnemann had, in his Materia Medica, 1818, published some symptoms obtained before the trituration was preferred. Dr. Molin published in the French journals, 1845, after a good proving of *Aurum met.*, the first useful proving; he was followed by Buchner and others, contained, with the exception of Prasoberera, in Allen, vol. ii, 1875.

[1] **Mind.** ‖Functions of mind in best order and clear in his views, except with regard to his health or disease; he imagines he has all possible diseases. θAngina pectoris.
‖If left alone he thinks about nothing but his ailments, and gets more and more out of humor; desires company. θAngina pectoris.
‖Inclined to suicide; frequent weeping; aversion to occupation.
‖Laziness. θAlbuminuria.
‖Great depression of mind. θDropsy.
Everything is disagreeable, dreary, even nature around.
‖Sadness, as when homesick; ‖sad, as though a great misfortune impended.
‖Melancholic mood. θOzæna syphilitica.
‖Profound melancholy. θDropsy.
Great anxiety, with palpitation.
Loss of energy; diminished virility; unrefreshing sleep.
‖Full of whims and notions.
Irritable without cause; tired of life.
‖Insurmountable mental or bodily restlessness; he has to spend hours in street and in open air. θAngina pectoris.
‖Thinking about his disease brings on palpitation. θAngina pectoris.
‖After fright or vexation, palpitation, which he can feel and hear. θAngina pectoris.
‖Ailments from violent chagrin.

[2] **Sensorium.** Vertigo, as if he was walking in air.
‖Dulness of head. θAlbuminuria.

[3] **Inner Head.** ‖Dull frontal headache.
Drawing headache in forehead.
‖Drawing in l. half of head.
‖Constant burning in whole head; < on l. side.

Google

Burning with stinging in occiput.
πSometimes a penetrating pain from forehead down to nose.
Throbbing, with heavy dreams; throbbing in l. temple after rising; > by application of cold water.
Congestion to head increasing to delirium.

4 **Outer Head.** Burning in forehead.
‖Head hot; limbs cool. θAlbuminuria.
Drawing, tearing in bones of skull from time to time; head feels insensible.
Pressure on brain, along sagittal suture.
Cool sensation on vertex.
Tickling itching on forehead.
πHair, eyebrows and beard fall out.

5 **Sight and Eyes.** Sudden blindness in childbed.
‖Amaurosis.
Cannot accommodate his eyes quickly for near or far objects.
Complete blindness, occurring suddenly after scarlet fever, with cold sweat; rapid, scarcely perceptible pulse; respiration rapid and unequal; abdomen burning hot; extremities cold and covered with sweat; pupils do not react to light.
Evening, candlelight, letters disappear; paper white, as if not printed upon.
Neuralgic pain in l. eye.
Feeling as if eyes were drawn deep into head.
‖Sclerotica red, with sensation of burning heat and prickling.
‖‖Keratitis parenchymatosa; cornea very opaque, traversed by a dense mass of bloodvessels in cornea, tending towards staphyloma; ciliary injection, some photophobia, no vision.
‖Acute ophthalmia. θCaries of nasal bones.
Burning, pricking, itching and tickling in eyes and lids.
Lachrymation.
Difficulty in keeping eyes shut.
Lids agglutinated in morning.
‖Chronic inflammation of edges of eyelids.
‖Fistula lachrymalis.

6 **Hearing and Ears.** ‖Buzzing in l. ear and sensitiveness.
Ringing and roaring in ears, followed by deafness, with sensation as if ears were wide and hollow inside, could not hear distinctly.
‖Music relieves.
‖Ears reddened. θAngina pectoris.
Scurf behind ears.
Burning and itching behind ears, particularly at night.

Google

[7] **Smell and Nose.** ‖Pressing pain in nose.
Burning and itching in nose.
‖Blows blood from nose.
Crawling in cavities, as if a coryza was breaking out; stinging itching on small places; r. to left.
‖Coryza.
‖Snuffles of a baby.
‖Bad smelling, watery discharge, irritating upper lip.
‖Discharge from nose containing some blood at times. θDropsy.
Yellow-greenish discharge, not offensive, after ten days.
‖‖Ozæna scrofulosa, with unbearable odor.
‖Sudden running of pus from nose. θOzæna syphilitica.
‖Nostrils stuffed up with hard crusts. θSyphilitic ozæna.
‖Red swelling of l. side of nose; nasal cavity ulcerated deep in, with dry, yellowish scurf and sense of obstruction, although enough air passes.
Nasal bones sensitive; also upper middle of sinciput.
Burning and itching pain in upper part of nose, externally.
Redness and swelling of nose.
‖Hardness around corners of nose and lips. θOzæna.
‖Deep cracks in alæ nasi; in old cases of ozæna.
‖Lupus attacking alæ nasi.
‖Infant's nose dented in.

[8] **Upper Face.** ‖Red face. θAngina pectoris.
‖Pale face with red spots.
‖Face pale; limbs cold; sudden blindness. θIn childbed.
‖‖Burning in face at times, mostly after shaving, with a dark redness of cheeks.
On different parts of face digging, gnawing, stitching pain.
Itching, as from tickling of a feather on various parts of face.
‖Acne rosacea.
Caries of upper jaw after typhoid fever; pain in bones and teeth.
‖Infant with ancient appearance.

[9] **Lower Face.** ‖Caries of lower jaw since scarlatina in second year of her age; æt. 18.
‖Exostosis of r. cheek bone disappeared in two months after treatment.
πTrembling of lower jaw and threatened with trismus.
Watery, offensive moisture inflaming upper lip.
Indurations in lips.
Burning like pepper on lips.
Pustule on lip.
‖Lips swollen, they burn and itch.

Google

‖Cancerous ulcers on lips.
‖Lips deep red. θAngina pectoris.
Painful swelling of submaxillary glands.

[10] **Teeth and Gums.** ‖Loose teeth.
Jerking pain in teeth.
Front teeth sensitive; metallic taste.
πGreat tenderness of gums and slight salivation.
Gums inflamed or white, blueish; painful in spots, even ulcerated.
‖Dental fistula.

[11] **Taste and Tongue.** Metallic taste.
Flat, bad taste in mouth.
‖Taste entirely lost. θCancer.
‖Tongue as hard as leather, hardly movable.
πTongue became stiff and prevented articulation of certain words. θCancer.
‖Induration remaining after glossitis.
Redness, dryness, and excoriation of tongue.
Yellow, furred tongue.
Warts on tongue.
πTongue ulcerated in various places.
‖Cancer on tongue.

[12] **Inner Mouth.** Dry mouth.
Inflammation of mouth.
Burning itching and biting in mouth.
Saliva increased, frequent desire to swallow; metallic taste.
πMouth filled with aphthæ.

[13] **Throat.** Fauces red, pain in throat.
‖Mucus in morning passes from head to throat. θOzæna.
‖Inflammation with hoarseness.
‖Suppurating ulcer on tonsils with loss of substance.
Scraping and pricking in throat.
Painful redness of fauces and pharynx.
Dryness in throat; difficult deglutition.
Frequent desire to swallow; feeling of a plug in throat; metallic taste; increased saliva.

[14] **Appetite, Thirst. Desires, Aversions.** Appetite increased or lost.
Thirst.
Sweetened coffee disgusts him.

[15] **Eating and Drinking.** After eating: nausea; distension and fulness of stomach; frequent yawning.
After breakfast: nausea leaves.
Slow digestion.
‖Diarrhœa after eating.
Worse from coffee, tea, wine.

[16] **Hiccough, Belching, Nausea and Vomiting.** Belching and nausea; risings have a putrid taste.

Google

Nausea fasting, better after breakfast.
‖Vomiting of a green fluid. θAlbuminuria.
Vomiting of some white frothy matter (dogs).

[17] **Scrobiculum and Stomach.** Pressure in scrobiculum.
Sensation of fulness in stomach.
‖Burning, cutting, stitching in stomach. θCardialgia.
Painful drawing in pit to middle of sternum; as if a hard body was pressed into cavity; worse stooping, eating, drinking; paroxysmal.
Slow digestion.
‖Cramps in stomach.
Increased warmth in stomach.
‖Inflammation of stomach.
Mucous membrane of stomach ulcerated; in dogs.

[18] **Hypochondria.** Burning in r. hypochondrium, with heat and pricking in abdomen.
Constant sensation of tension in r. hypochondrium.
‖Induration of liver with dropsy.
Pressure in hypochondria.
‖Burning in r. hypochondrium; constant disagreeable feeling; hepatic hyperæmia and swelling. θAscites.
‖Spleen enlarged. θAlbuminuria.
Stitches in l. hypochondrium, as after running.

[19] **Abdomen.** Abdomen distended; constrictive colic obliges her to double up; only goes off in bed.
Redness, heat, itching and biting at the umbilicus.
Dull bellyache.
‖Pain in bowels. θAlbuminuria.
Tympanitis.
‖Distension of single places in abdomen.
Drawing pain in abdomen.
Straining, tensive pain, as if laced.
‖Ascites. θLiver affections. θAlbuminuria.
Tension in the loins.
‖Stiffness in region of the groins.
Eruption of small red nodules above the pubes.
Abdomen sensitive to touch.
πConsiderable swelling of inguinal glands.

[20] **Stool and Rectum.** Frequent fluid stools.
Diarrhœa: < at night; after eating; with pain in bowels.
Stools: greyish-white, yellow, watery.
‖Diarrhœa. θAlbuminuria.
Obstinate costiveness.
‖Hemorrhoidal tumors; blood discharged during stool.
Condylomata at anus.
‖Excrescences near anus, with an abundant serous discharge.
‖Anal and intercrural excoriation in a baby.

Google

‖Numerous circumanal condylomata, in a scrofulous, syphilitic baby.
‖‖Fistula in ano of five months' standing, in a young man, æt. 21, bilious, sanguine temperament.

[21] **Urinary Organs.** ‖Scanty urine. θAnasarca.
Urine turbid, with a red lateritious sediment.
‖Frequent urging to urinate; < at night. θAlbuminuria.
‖Incontinence of urine; < at night. θOld man, after dropsy.
‖‖Burning on urinating; urine feels as if too hot; tenesmus vesicæ.
‖Urine turbid. θDropsy.
‖Increased discharge of urine; urine has a peculiar odor and sediment.
If the bladder is filled in morning, he has strong erections but no sexual desire.
‖Pressing around waist; increased urine; renal hyperæmia. θHeart disease. θMorbus Brightii.
‖Pains in region of kidneys; urine pale, clear. θAlbuminuria in pregnancy.
Heat, tickling and burning in urethra.
πSuppressed urethral discharges are re-established.
‖‖Syphilitic gonorrhœa.

[22] **Male Sexual Organs.** Diminished virility; melancholy.
Increased sexual desire.
Exhausting erections; hyperæmia.
Testicles swollen, tense; drawing along the cords.
Gleet; worse mornings.
Warts on prepuce.
‖Chancre-like ulcers.
Condylomata on prepuce, anus and tongue.
Flat ulcers on scrotum, secreting a fetid ichor.
πChancres secrete an abundance of laudable pus; buboes become vast hearths of suppuration.
‖‖Chancres on prepuce and scrotum.
‖‖Bubo in l. groin.
πExcrescences extending from glans to os sacrum.
‖Excrescences on scrotum. θFistula in ano.

[23] **Female Sexual Organs.** ⁝Sterility.
‖Painful induration of mouth of uterus.
‖Metritis.
Menses too early and profuse; blood acrid, makes her sore.
Before menses: leucorrhœa: red pustules on labia.
‖Catamenia suppressed. θDropsy.
πAmenorrhœa.
‖Leucorrhœa, light yellow, especially mornings; uterus prolapsed, indurated; chronic metritis, with malposition and discharge.

Digitized by Google

‖Pudenda oversensitive.
‖Burning, itching of vulva.
‖Heat and itching in vagina.
Vaginitis.
‖Gonorrhœal discharge and swelling of both groins.

[24] **Pregnancy. Parturition. Lactation.** During pregnancy and after childbed: dropsical symptoms.
Infiltration of cellular tissue of legs in childbed. See 33.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice rough or screeching.
Speaking is difficult.
‖‖Hoarseness, with violent fever and pleuritic symptoms.
‖Hoarseness, with inflammation of throat.
‖Chronic irritation of air passages.

[26] **Respiration.** Pressure on chest impedes breathing; < standing.
‖‖Anxious contraction of chest.
‖‖Long-lasting asthmatic symptoms.
Oppression as soon as clothes are fastened.
‖Anxious abdominal respiration; labored breathing. θAnasarca.
Difficult breathing from stagnation of blood; heartbeats increased, too strong.
Suffocation at night.
Oppression compelled deep breathing, which relieves.

[27] **Cough.** Short, dry cough in paroxysms, especially at night, followed by heat in throat.
Frequent hard cough, with white sputa mingled with threads of blood.
Frequent, loud sounding cough.
Frequent night cough.
Loose cough, with thick yellow expectoration.

[28] **Inner Chest and Lungs.** ‖Pressure under sternum; palpitation increases with every step, as if chest would burst. θHyperæmia from stenocardia.
‖Pulmonary catarrh.
‖‖Stitches under ribs and other signs of pleurisy.
Inflammatory symptoms of lungs.
‖Pains in l. side of chest, as in pleurisy; they change place and sometimes leave.

[29] **Heart, Pulse and Circulation.** Sore aching in cardiac region; burning, pricking.
Drawing and cutting in cardiac region.
Pressure in region of heart, with gnawing in abdomen.
Awakened by a sticking, boring at point where impulse of apex is felt; feels as if he could not have endured it longer; deep breathing does not alter it; hand pressed lightly does; immediately afterwards lancinating streaming pain, thence to l. hypochondrium.

Google

Stitches directly above heart.
Peculiar sensation of heaviness and rigidity in heart, with sudden arrest of breathing.
‖Cardiac anguish. θEndocarditis.
‖‖Angina pectoris (next to *Arnic.* indispensable).
‖Endocarditis rheumatica.
‖Heart disease accompanying carious affections of bones.
‖Beating of heart causes anxiety and sleeplessness, cannot rest until heart is quiet. θAngina pectoris.
Percussion all along heart dull. θStenocardia.
‖Heartbeats irregular, with severe constriction of chest. θRheumatism, after disappearance of swelling of joints.
Palpitation: with anxiety; < from every mental emotion.
Heart contracts more strongly; first sound increased.
‖Heartbeats sharp and metallic, but no other abnormal sound. θAngina pectoris.
‖Violent, irregular palpitation, with great oppression of heart. θEndocarditis.
Throbbing in carotid and temporal arteries.
‖Pulse large. θAngina pectoris.
‖Pulse small and frequent. θDropsy.
‖Heart's beat weak; apex felt indistinctly. θStenocardia.
‖Weak pulse and feeble heart. θDropsy.

[31] **Neck and Back.** ‖Hard swelling had twisted neck to r. shoulder. θAfter scarlatina; 2°.
Dull drawing in neck while sitting.
Tension in dorsal vertebræ.
Burning, pricking, cutting and stiffness in back.
Very severe backache.

[32] **Upper Limbs.** Drawing in shoulders; < in bed.
Disagreeable sensation in shoulders and arms.
‖‖Tearing in l. shoulder; in r. arm, from elbow to tip of little finger.
Burning, lancinating in arms and forearms.
Involuntary concussive shocks in arms.
Spasmodic motion of arms.
Swelling in wrist, no pain, if left alone; tensive only when bending hand back; stitches on seizing anything.
Trembling of hands in morning.
Stiffness of arms and finger joints.
Tearing pain in middle finger after a meal.
=Painful swelling of r. hand. θEndocarditis.
Burning and itching of hands.
The hands can be closed with less facility.

[33] **Lower Limbs.** Blood-boils on nates and thighs.
Stiffness in thighs and legs.
Heat, pricking and stinging in knees.
Knees painfully swollen; < stretching leg.

Google

▮Exostoses, with bone pain in both shin bones. θSecondary syphilis.
▮Right tibia, anterior aspect of bone denuded and black nearly its entire length, surrounding soft parts inflamed and swollen; with a boy, æt. 12, exfoliating and healing within six months. θNecrosis.
▮Legs swollen and very tender along inside of tibia.
▮Left leg œdematously swollen.
▮Infiltration of cellular tissue of legs; great tension, pain. θChildbed.
Deep-seated, tensive pain in dorsum of l. foot; < from motion, during evening and night, disturbing sleep; also from warmth.
A doughy, sharply defined, semicircular swelling on dorsum of l. foot, extremly sensitive to touch.
▮Deep-seated, troublesome pain in l. foot. θAfter typhus.
▮Periostitis of l. foot. θAfter typhus. θAfter mechanical injury.
Burning in feet.
Swelling of feet.
Cutting pain in toes when walking.
▮Redness and swelling of toes, with burning and stinging; cannot put feet down.

[34] **Limbs in General.** Drawing, tearing, especially in extremities.
▮Limbs cold, covered with sweat. θAfter scarlatina.

[35] **Rest. Position. Motion.** Lying: cannot lie on back. θAnasarca.
Must lie doubled up: in colic.
Sitting: drawing in neck.
Standing: pressure on chest impeding breathing.
Stooping: pains in sternum worse.
Stretching leg: swollen knee worse.
Rising: throbbing l. temple worse.
Motion: pain in l. foot <; impossible in dropsy.
Walking: pain in toes.
▮Ascending a hill or stairs causes palpitation and dyspnœa. θStenocardia.
▮Great restlessness; changes his position every moment; his friends call him "the quicksilver man." θNeurosis cordis.

[36] **Nerves.** πGreat nervous irritation.
Greatest exhaustion, mostly in limbs.
Frequent startings. θDropsy.
Restlessness with palpitation.
Weakness, fever and most violent symptoms, as if poisoned, after trituration in water, by teaspoonful, for syphilitic ulcers in throat.

Google

Nervous affections, with disgust of life; insomnia and melancholy.

[37] **Sleep.** Yawning after eating.
‖‖Sleepy by day even at work.
‖‖Comatose sleep. θAlbuminuria.
‖Sleepless: from excitement; from palpitation.
Wakes with a start.
Dreams: with sadness; tormenting.

[38] **Time.** Morning: eyelids agglutinated; mucus passed from head to throat; erection if bladder is full; gleet <; leucorrhœa <; trembling of hands.
Day: sleepiness even while at work.
Evening: pain in l. foot worse.
Night: burning and itching behind ears; diarrhœa; urging to urinate; incontinence of urine <; suffocation; dry cough <; pain in foot; swelling of tissue worse.

[39] **Temperature and Weather.** Cold washing: throbbing in l. temple better.
Wet cold winter: improves.
Warmth: pain in l. foot worse.
Cannot bear warmth of bedclothes, throws off covers.

[40] **Fever.** Slight chilliness over body.
‖‖Violent chill and fever.
‖Hectic fever: dropsy; after scarlatina; secondary syphilis.
Copious, offensive smelling sweat.
Sweat increased.
‖Copious cold sweat. θAfter scarlatina.
Promotes sweat in smallpox.

[41] **Attacks, Periodicity.** At times very much prostrated.
In paroxysms: drawing in stomach; short cough.

[42] **Locality and Direction.** Right: exostosis of cheek bone disappeared; tension and burning in hypochondrium; neck twisted to shoulder by hard swelling; tearing in arm; painful swelling of hand; tibia denuded and black.
Left: drawing in half of head; burning in side of head; throbbing in temple; neuralgia of eye; buzzing in ear; red swelling side of nose; stitches in hypochondrium; bubo in groin; pains side of chest; tearing in shoulder; pain dorsum of foot.
Right to l.: stinging itching on small places.
Above downward: pain in forehead; pain in elbow.
Diagonally: pain from apex of heart.

[43] **Sensations.** As if eyes were drawn deep into head; as if ears were wide and hollow inside; feeling of a plug in throat; as if a hard body was pressed into epigastrium; as if chest would burst; disagreeable sensation in shoulders and arms.
Boring: in cardiac region.

Google

Cutting: in cardiac region; in back; in toes; in stomach.
Lancinating: from cardiac region to l. hypochonder; in arms.
Stitching: in face; in stomach; in l. hypochonder; under ribs; above heart; in wrist.
Pleuritic pains: in chest.
Stinging: in occiput; in nose; in knees; in toes.
Pricking: in cardiac region; in back; in knees; in throat; in abdomen.
Prickling: in eyes; in throat.
Burning: in head; in occiput; in forehead; in eyes; behind ears; in nose; in face; on lips; in mouth; in stomach; in r. hypochonder; on urinating; in urethra; of vulva; in cardiac region; in back; in arms; in feet; in toes; of hands.
Biting: in mouth; at umbilicus.
Tearing: in bones of skull; in l. shoulder; in r. arm; from elbow to tip of little finger; in middle finger; in extremities.
Neuralgic pain: in l. eye.
Digging: in face.
Jerking pain: in teeth.
Gnawing: in face; in abdomen.
Scraping: in throat.
Drawing: in l. half of head; in bones of skull; epigastrium to sternum; in abdomen; along spermatic cords; in cardiac region; in neck; in shoulders; in extremities.
Pressure: on brain; in nose; in scrobiculum; around waist; on chest; under sternum; in cardiac region; in hypochondria; in region of kidneys.
Aching: in cardiac region.
Penetrating pain: from forehead to nose.
Undefined pain: in throat; in bowels; in kidneys; in l. foot; in chest.
Throbbing: in l. temple.
Concussive shocks: in arms.
Constrictive colic.
Cramps: in stomach.
Contraction: of chest.
Tension: in loins; in vertebræ; in legs; in r. hypochondrium; in foot.
Straining, tensive pain, as if laced: in abdomen.
Stiffness: in groins; in back; in arms and finger joints; in thighs and legs.
Rigidity: in cardiac region.
Crawling: in nasal cavities.
Tickling: itching on forehead; in eyes; on face; in urethra.
Itching: in eyes; behind ears; in nose; on face; of lips; in mouth; at umbilicus; of vulva; in vagina; of hands.

Google

Fulness: in stomach.
Heaviness: in cardiac region.
Heat: at umbilicus; in urethra; in vagina; in knees.
Coldness: on vertex.
Dryness: in throat.

[44] **Tissues.** ‖‖Hyperæmia from overaction of heart; consequent congestion of liver, kidneys, genitals.
‖Violent rheumatic fever, with painful swelling of joints; leaving joints and attacking heart.
‖‖Dropsies: from heart disease; from liver affections; with albuminuria; after scarlatina; with intermittent fever.
‖Swellings characterized by heat, hardness, tension, etc.; sensitiveness to touch; < at night, disturbing sleep.
Emaciation, especially in syphilis.
‖Indurations. See Nose, Lips, Teeth, Uterus, etc.
‖Cancerous glands.
‖‖Bones: periosteum affected; exostoses; caries, especially after abuse of mercury; syphilitic caries.
‖Caries of joints, with gnawing, boring deep in.
‖Ascites.
πMorbid secretions are at once re-established.

[45] **Touch. Passive Motion. Injuries.** Touch: abdomen sensitive; swellings sensitive.
Light pressure: pain at apex of heart better.
Tight clothing: oppression of breathing worse.
Stepping: palpitation worse.
Cannot put foot to ground: toes red, swollen.
After mechanical injury: periostitis of foot.
‖Cured ascites even after three successive tappings.

[46] **Skin.** ‖Eczema.
‖Skin dry and shrunken. θDropsy. θAlbuminuria.
Small red itching elevations, leaving spots after they disappear.
‖‖Whole body covered with ulcers and scurf, with hectic fever. θSecondary syphilis.
πEruptions of pimples; crops of pustules all over body.

[47] **Stages of Life, Constitution.** Lymphatic, scrofulous constitution, with dropsy after scarlatina and albuminuria.
‖Girl, æt. 12, with hypertrophy of heart, with dilatation and insufficiency of valves. θHydrops.
‖Woman, æt. 24, lymphatic constitution, scrofulous habit. θHydrops.
‖Man, æt. 32, sanguine, robust. θSecondary syphilis.
‖Woman, æt. 40, after rheumatism and endocarditis, fatty degeneration. θStenocardia.
‖A man, æt. 57, well-preserved, lively temperament, had gonorrhœa. θAngina pectoris.

Google

‖After syphilis, maltreated by mercury. θOsteocopus.
‖Mercurial affections.
πSymptoms whose suppression had caused serious mischief reappear.
‖A stout young man, subject to rheumatic attacks. θEndocarditis.

[48] **Relations.** Gold salts and mercury salts both loosen cohesion of organic tissue. Both stimulate the absorbent, secreting and excreting functions of skin, kidneys and salivary glands. Employed for a longer period they initiate a peculiar metamorphosis of plastic life. They differ from the mercurials in stimulating more the activity of heart and bloodvessels, but not fluidly organic tissue so powerfully as dry mercury.

Similar to: *Acon.*, *Amm. carb.* (hyperæmia of chest from heart disease); *Arg. met.*, *Arg. nitr.*, *Arsen.* (dropsy, albuminuria, heart); *Bellad.*, *Cinnab.* (syphilis); *Ferrum*, *Glonoine* (intermediate remedy in neurosis cordis); *Lycop.*, *Mercur.*, *Nitr. ac.*, *Phosphor.*, *Platin.*, *Silic.*, *Sulphur.*

Incompatible: sulphur springs.

Antidotes: *Bellad.*, *Cinnab.*, *Mercur.*

AURUM MURIATICUM NATRONATUM.

Chloro-aurate of Soda. $NaCl, AuCl_3, 2H_2O.$

A double salt like the alum and tart. emet. Not proved, but used at random; preferred by the Old School.

[1] **Mind.** πHis disposition is much brighter. θMercurio-syphilis.

Feeling of unrest and impatience.

‖After vexation. θJaundice.

[2] **Sensorium.** Continual humming in head, with beating of carotids (see 29), almost causing delirium.

[3] **Inner Head.** ‖Violent pains on whole l. side of head, mostly over eye. θMercurio-syphilitic affections.

‖Every morning pressure over eyes, pains in forehead, dulness in head, lasting until afternoon; > in evening; nasal discharge bloody, fetid, ichorous.

[4] **Outer Head.** ‖Hair falls out.

[5] **Sight and Eyes.** ‖Amaurosis.

‖Chronic ophthalmia; malignant, cancerous; at same time, nose scurfy.

Google

‖‖Scrofulous ophthalmia.
‖Yellow albuginea. θJaundice.
‖Swelling above l. eye. θMercurio-syphilis.

[7] **Smell and Nose.** ‖Destruction of nasal bones. θOzæna.
‖Nasal discharge bloody, ichorous, fetid.
‖‖Ulcers in nose.
‖Nose swollen, hard, shining (scrofula); if he takes cold, erysipelas sets in.
Scurfy, oozing tetter on nose.
‖Deep spreading syphilitic ulcer of skin. θAffection of nasal bones.

[8] **Upper Face.** ‖Ulcers in cavities of upper jaw.
‖Complexion pale; embonpoint nearly lost.

[9] **Lower Face.** Periosteal indurations; after a cellulitis on lower jaw.
Ulcer in r. corner of mouth.
‖Opening mouth difficult. θAfter cynanche cellularis.

[10] **Teeth and Gums.** ‖Teeth look dirty, get loose and gums recede; caries of jaw. θMercurio-syphilis.

[11] **Taste and Tongue.** Tongue furred; bitter taste.
‖Tongue white. θJaundice.
Warts on tongue.

[12] **Inner Mouth.** ‖Fetid odor from mouth. θMercurio-syphilis. θLeucorrhœa.

[13] **Throat.** Small blisters on fauces with swelling and inflammation of fauces.
‖Two small ulcers on r. tonsil. θMercurio-syphilis.

[14] **Appetite, Thirst. Desires, Aversions.** ‖No appetite. θJaundice.

[15] **Hypochondria.** ‖Pressure in r. hydrochondrium. θJaundice.

[19] **Abdomen.** ‖Dropsy without fever but threatening suffocation. θAscites.

[20] **Stool and Rectum.** ‖Feces like whitish clay. θJaundice.
‖‖Stools harder.

[21] **Urinary Organs.** ‖Diuresis. θDropsy.
πSuppression of urine.
‖Urine dark. θJaundice.
Urine gets turbid; more profuse than usual.
‖Morbus Brightii.

[22] **Male Sexual Organs.** ‖Chancre, on internal surface of prepuce.
‖Bubo in fold of groin.
‖Ulcers on foreskin; warts around them; ulcers on glans eating deeply.

[23] **Female Sexual Organs.** ‖Enormous distension of an ovary.

Google

Induration of one part and softening of another part of uterus.
‖Ulcers with induration of uterus.
Neoplasmata in abdomen.
‖Ovarian enlargement; even dropsy.
Leucorrhœa corroding parts.
‖Pustules on genitals. θLeucorrhœa.

[34] **Pregnancy. Parturition. Lactation.** ‖Abortion from uterine indurations.
Given to syphilitic mothers to prevent disease in offspring.
‖Scirrhus of uterus.
‖Carcinoma mammæ et uteri.

[29] **Heart, Pulse and Circulation.** πBeating of carotid and temporal arteries visible to eye; violence of this beating became extremely annoying, so violent nothing could calm it; the disquiet caused by it put the sufferer into constant terror, almost to delirium.

[31] **Neck and Back.** ‖Pustular eruption on back. θLeucorrhœa.

[34] **Limbs in General.** ‖‖Old cases of rheumatism or gouty pains.

[38] **Time.** Morning: pressure over eyes; pains in forehead; dulness in head.
Evening: headache better.

[39] **Temperature and Weather.** ‖From October until Spring: violent headache; four years in succession. θMercurio-syphilis.
πDry, warm weather favors its action.
Cold, wet weather causes inconvenience.

[40] **Fever.** πUnusual heat and malaise.
‖Violent fever, forcing him to keep his bed, urine copious. θAscites.
‖Sweats only on r. side, l. (affected) side of head remains dry. θMercurio-syphilitic affections.
‖‖Excessive perspiration.
πSuppression of perspiration.

[42] **Locality and Direction.** Right: ulcer on corner of mouth; ulcers on tonsil; pressure in hypochondrium; sweats only on side of head.
Left: pains in side of head; swelling above eye; affected side of head does not sweat.
Violent pains: on l. side of head.
Pressure: over eyes; in r. hypochondrium.
Itching: all over body.

[41] **Tissues.** ‖Dropsy from induration of abdominal organs.
‖Scrofula.
‖Chronic suppuration of glands and bones.
‖‖Indurations.

Google

‖Ascites.
‖‖Caries.

[46] **Skin.** πIntolerable itching all over body; soon followed by an eruption of tubercles (little lumps), several of which become covered with dark-looking scabs.
The little lumps increased and became as hard as horn; a beginning gutta serena was soon added.
‖Yellow skin. θJaundice.
‖Deep-spreading syphilitic ulcers of skin.

[47] **Stages of Life, Constitution.** Carbo-nitrogenoid constitutions.
‖‖Mercurio-syphilitic constitutions.
Irritable, sanguine, bilious persons are more obnoxious to its effects than phlegmatic.

[48] **Relations.** Similar to: *Aurum* and *Aur. mur.* (chemically); *Arg. nitr., Arsen., Badiag., Bryon.* (ascites); *Cist. can., Conium* (indurations); *Graphit., Hepar, Iodium, Kali bichr., Kali hydr.* (mercurio-syphilis); *Lycop.* (ascites); *Mercur. vivus et sulphur* (ascites); *Merc. jod.* (caries, syphilis, glandular enlargements, etc.); *Nitr. ac., Phosphor., Phosph. ac., Sulphur, Thuya* (warts).
Incompatible: coffee and alcohol.

BADIAGA.

Spongilla fluviatilis. *Fresh Water Sponge.*

Hahnemann, after having received this popular drug from Russia, used it and made some observations with it, but they have been withheld from our School by the widow. In 1834 it was triturated by Dr. C. Hg., after 1835 some mention made in our journals; in 1865, well proved by Dr. Lyman Bedford, and finally published by C. Hg., in the Hahnemannian Monthly, vol. ii, page 121, 1866.

[1] **Mind.** ‖After pleasurable emotions, palpitation of heart.
‖Mind generally clear, active in spite of headache.
Mistakes the days.

[2] **Sensorium.** Dull, dizzy feeling.

[3] **Inner Head.** ‖Headache from 2 P.M. until 7 P.M., with slight aching in posterior portion of both eyeballs and in temples; < on moving eyes. θWhooping cough.
Frontal headache; < in temples, extends to back of l. eyeball; < moving eyes.
Severe headache on top of head; < at night ‖‖after

sleeping and in morning; returning violently after breakfast.

‖‖Headache with inflamed eyes.

[4] **Outer Head.** ‖Excess of dandruff; scalp sore to touch; tetterlike eruption on forehead, and dizzy feeling during forenoon.

Itching on scalp, with much dandruff like tetter; dryness of hair.

[5] **Sight and Eyes.** ‖Headache with aching in posterior parts of eyeballs, < on turning eyes. θPertussis.

‖Eyeballs tender; felt even when closing lids firmly. θPertussis.

‖‖First r. eye, afterwards l. inflamed, during afternoon.

‖Scrofulous ophthalmia; hardening of meibomian glands. θHeadache.

‖‖Severe intermittent pain in posterior portion of r. eyeball; afternoon next day, left.

‖Margins of lids bluish-purple; blue under eyes. θPertussis.

‖Twitching of l. eyelid.

[6] **Hearing and Ears.** ‖Slight shocks in ears as of distant artillery; afternoon and evening. θPertussis.

[7] **Smell and Nose.** ‖‖Sneezing, fluent coryza, stoppage at times.

‖Sneezing with coryza, fluent, or thick and yellow; < l. nostril. θPertussis.

Coryza and cough.

Itching of l. wing of nose.

[8] **Upper Face.** ‖Redness of face. θCatarrh.

‖Face pale, ashy or leaden. θPertussis.

‖‖Left cheek and malar bone sore to touch.

Maxillary joint stiff.

[10] **Teeth and Gums.** Drawing in a decayed back tooth.

[11] **Taste and Tongue.** Bad taste in mouth, evening.

[12] **Inner Mouth.** ‖Mouth and breath hot, feverish, with thirst for large quantities of water at a time. θPertussis.

Mouth and tongue feel scalded.

[13] **Throat.** ‖‖Hawks up masses of gluey, bloody mucus from throat, which is inflamed and sore; < swallowing solids.

‖Tonsils red, inflamed; < swallowing solids.

[14] **Appetite, Thirst. Desires, Aversions.** Appetite good; thirst lessened; tongue as if scalded.

Appetite diminished; costive; urine high-colored.

Thirst for large quantities of water.

[15] **Eating and Drinking.** After breakfast: headache.

[17] **Scrobiculum and Stomach.** ‖Pressure in pit of stomach, nausea and rumbling. θForerunner of cholera Asiatica.

Severe lancinating in pit of stomach, 8 A.M.; extends to

Google

vertebræ, r. scapula, and at times to r. side, resulting there in a pleuritic pain.

[15] **Hypochondria.** Lancinating pain with a bounding movement in region of liver.

[19] **Abdomen.** ‖Indurated inguinal glands.

‖Syphilitic bubo.

[20] **Stool and Rectum.** ‖Catarrh of bowels.

Constipation.

‖Hemorrhoids.

[21] **Urinary Organs.** Sharp pain in r. kidney; afternoon.

Urine high-colored, reddish.

Severe, sharp, lancinating pain, in and near orifice of urethra.

[22] **Male Sexual Organs.** ‖Chancres suppressed by cautery or mercurial ointment, leaving elevated, discolored cicatrices; general cachectic appearance and rhagades here and there.

‖Syphilitic bubo, l. groin, hard, unequal like scirrhus; violent burning stitches during night.

‖Buboes from different causes; shooting pains, if suppuration has not begun, curable by tincture in three days; if fluctuation is detected, 6 drops daily in water will cause absorption.

‖Syphilis of infants, whole convolutes of hard glandular swellings, buboes.

[24] **Pregnancy. Parturition. Lactation.** ‖Carcinoma mammæ.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖‖Catarrhal affections of throat.

[26] **Respiration.** ‖With spasmodic cough, strangling, face turning dark. θCatarrh.

While lying in bed on r. side, just becoming unconscious by sleep, severe oppressive suffocative attacks from suspended respiration; quick effort to prevent suffocation by changing position.

Breath hot and feverish.

[27] **Cough.** ‖Occasional severe paroxysms of spasmodic cough, ejecting viscid mucus from bronchial tubes which at times comes flying forcibly out of mouth; more during afternoon and evening; caused by tickling in larynx as if sugar was dissolving; > in a warm room.

‖‖Cough causes sneezing; profuse coryza.

Whooping cough; all symptoms < afternoon and evening.

‖Catarrhal inflammation of air passages, with fever, thirst, red face, sneezing, lachrymation and spasmodic cough; during each paroxysm of coughing, crying, pressing hands to head, sometimes strangling, face turning dark and thick yellow mucus flying out of mouth and nostrils; cough loose A.M., tight P.M. and evening.

Google

[28] **Inner Chest and Lungs.** Pain in upper part of r. chest.
Severe, sharp, lancinating pain in r. supraclavicular region in or near subclavian artery.
‖Sharp, lancinating pains in chest, < from motion and deep inspiration, with soreness of chest; < afternoon and evening. θPertussis.
Severe stitches in sides, especially r., from 7th to 8th rib; < from least motion.
Lungs feel as if sinking down.
‖Pneumonia typhosa.

[29] **Heart, Pulse and Circulation.** ‖Tremulous, vibrating palpitation upon slightest emotion of mind. θPertussis. θHeart disease, etc.
Lying on r. side, heart is heard and felt to pulsate from chest up to neck.
At midnight, while in bed, vibrating palpitation of heart for a few minutes; after which, while lying on r. side, sensation as if lower lobe of l. lung was settling down 3 or 4 inches, or being collapsed; > by changing position.

[31] **Neck and Back.** Neck very stiff, < flexing head.
Soreness, lameness with stitches in nape; < bending head back and forward.
Severe lancinating and stitches below scapulæ, much < from throwing shoulders back and chest forward, or from any contortion of body.
‖Glandular swellings on l. side of face, throat and neck, nearly as large as a hen's egg; some hard, some suppurating.
Severe pain in or near head of r. scapula.
Painful drawing near spine to l., downward from shoulder blade.
Pain in front of upper part of r. shoulder, afterwards in l. shoulder and arms.
Severe lancinating pains and stitches in posterior r. side below scapula, much < from throwing shoulders back and chest forward, or any contortions of body; pain extorting at times a moan or shriek.
Pain in small of back, hips and lower limbs.

[32] **Upper Limbs.** Pain in front of upper part of r. shoulder, afterwards in l. shoulder and arm.
In scapula pain from pit of stomach.
Palms hot and dry.

[33] **Lower Limbs.** Pain in hips.
Intermitting pain in muscles of lower posterior third part of leg, with a sore, clumsy, contracted, bruised feeling of anterior muscles of lower third, < flexing foot and going up-stairs, when toes tend to drop down; must step higher with r. foot; > remaining quiet at home.

Google

Next day posterior parts not felt, but anterior of same leg worse; muscles sore as if beaten, and a contracted feeling, numb while sitting or lying.
‖Chilblains.
‖Lessened hard cellular swelling of both legs.
‖Hurts of horses' hoofs; bad ulcers on horses' feet.
Sharp stinging in posterior of r. heel; < from least pressure.
Checked foot sweat (externally).
‖Toes bend while walking as if extensors were paralyzed.

[35] **Rest. Position. Motion.** Rest: pain in muscles of leg better.
Lying in bed: palpitation; suffocation when lying on r. side.
Throwing shoulders back and chest forward: pains below scapulæ worse.
Sitting: palpitation; stitches in neck.
Sitting or lying: legs numb, soon feel sore, must change position.
Flexing head: stiff neck worse.
Changing position: suffocative attack >; palpitation better.
Motion: eyes and head <; pains in chest worse.
Walking: toes bend as if extensors were paralyzed.

[37] **Sleep.** Restless at night; ‖must frequently change position, body feels so sore.
Awoke with frightful dreams and severe crampy pains in metatarsal bones of both feet; 3 to 4 A.M.
After sleep, head better.

[38] **Time.** 3 to 4 A.M.: cramps in feet.
Morning: headache on vertex >; cough loose.
8 A.M.: pain in pit of stomach.
Forenoon: dizziness.
2 P.M. to 7 P.M.: headache.
Afternoon: eyes inflamed; shocks in ears as of distant artillery; pain in kidney; spasmodic cough <; cough tight; pains in chest worse.
Evening: shocks in ears; bad taste in mouth; spasmodic cough <; cough tight; pains in chest worse.
Night: headache on vertex >; restlessness.
Midnight: palpitation of heart.

[39] **Temperature and Weather.** Warm room: whooping cough better.
‖Sensitive to cold, especially cold air.
‖Worse in stormy weather.
‖Chilblains.

[40] **Fever.** Heat in forehead.
‖Fever and thirst. θCatarrh.

Google

Feverish, hot breath and mouth.
Hot stitches in bubo.
Palms dry, hot.
Foot sweat checked.

" **Locality and Direction.** Right: pain in eyeball; pleuritic pain in side; pain in kidney; suffocation while lying on side; pain in upper chest; pain in supraclavicular region; pain in head of scapula; stinging of heel.
Left: headache extends to back of eyeball; twitching of eyelid; coryza l. nostril <; itching wing of nose; cheek and malar bone sore; bubo in groin; glandular swellings on side of face and neck; pain in shoulder and arm.
R. to l.: eyes inflamed; pain in shoulder; pleuritic pains; pain in knees.
Above downward: drawing in spine.
Posterior muscles of r. leg one day, next day anterior.

" **Sensations.** Tongue as if scalded; lungs feel as if sinking down.
Sharp pain: in r. kidney; near orifice of urethra.
Lancinating: in pit of stomach; in region of liver; near orifice of urethra; in r. supraclavicular region; in chest; below scapulæ; below r. scapula.
Stitches: violent burning, in bubo; in sides; in nape; below scapulæ; below r. scapula.
Pleuritic pain: in r. side.
Shooting: in buboes.
Stinging: in r. heel.
Soreness: of chest; in nape; of thigh muscles.
Aching: in posterior portion of eyeballs and in temples.
Scalded feeling: of mouth and tongue.
Drawing: in decayed molar; near spine from l. shoulder blade.
Pressure: in pit of stomach.
Bruised feeling: of thigh muscles.
Crampy pains: in feet.
Lameness: in nape.
Undefined pain: in upper r. chest; in front of upper r. shoulder; in l. shoulder and arms; in small of back; in hips and lower limbs.
Tickling: in larynx.
Itching: of l. wing of nose; on scalp.

" **Tissues.** ‖Chronic rheumatism.
‖Catarrhal troubles.
‖Adenitis.
‖‖Scrofulosis.
‖‖Glands enlarged, indurated. θScrofula. θSyphilitic buboes.

Google

❙Induration of cellular tissues.

[45] **Touch. Passive Motion. Injuries.** Touch: scalp sore; malar bones sore; ❙skin sore.

Least pressure: stinging in heel <.

Swallowing solids: sore throat <; tonsils <.

❙❙Lesions, pains and suggillations after concussion or contusion.

[46] **Skin.** Itching on scalp.

Skin sore to touch.

❙Elevated and discolored cicatrices.

❙Rhagades here and there.

❙Brown and blue spots in skin after concussions.

Causes checked eruptions to reappear (externally applied).

[47] **Stages of Life, Constitution.** General cachectic appearance.

❙Scrofulous constitutions.

❙❙Fat children. θWhooping cough.

[48] **Relations.** Side relation: *Spongia.*

Cured a syphilitic bubo of l. groin after *Sulphur, Carb. an., Clemat., Silic., Iodium* and *Arsen.* had failed.

Compare: *Seneg.* (cough caused by sneezing, opposite of 13); *Spongia* (cough, with much sneezing).

Similar to: *Calc. sulph.* (indurations); *Carb. an.* (indurations, buboes); *Cist. can.* (scrofula); *Clemat., Hepar, Iodium, Kali hydr., Laches., Mercur., Merc. jod., Nitr. ac., Silic., Sulphur.*

Complementary to: *Sulphur, Iodium,* and *Mercur.*

Laches. follows well.

Google

BAPTISIA TINCTORIA.

Wild Indigo. *Leguminosæ.*

An old Indian drug, first used by the Eclectics until introduced into our School by N. L. Thompson, in 1857. The first useful proving was given by J. S. Douglas and others, followed by Hadley, Burt, Harpel and Schenck, in 1871; by Wallace, in 1873; C. Weselhœft, in 1875. The most important symptoms from practice have been given us by Dr. J. B. Bell.

[1] **Mind.** ❙Unconsciousness. θTyphus.
❙❙Stupor; falls asleep while being spoken to, or answering; heavy sleep until aroused; awakes only to again fall asleep in the midst of his answer, which he vainly endeavors to finish. θTyphus.
❙❙Confusion of ideas; confused as if drunk.
❙Cannot confine his mind; a sort of wild, wandering feeling.
❙❙Cannot go to sleep, because he cannot get himself together. θOrchitis. θTyphoid.
❙Sensation as if there was a second self outside of patient. θTyphus.
❙❙Feels scattered about, and tosses about to get the pieces together. θTyphus.
❙He thinks his legs are holding a conversation with each other; a man, æt. 60. θGout.
❙He thinks his gouty toe is holding a confab with his gouty thumb.
Mind wanders as soon as the eyes are closed.
❙❙Delirium, especially at night, or constant, low; stupor. θTyphus.
❙Delirium and incoherent talk. θTyphus.
❙Delirious stupor or fierce delirium. Typhus.
❙Low muttering. θTyphus.
❙❙Indisposed to think, want of power; mind seems weak.
❙❙Aversion to mental or bodily exertion, or to hear conversation about sickness or injuries; feeble mind; fretful. θSpasmodic stricture of œsophagus.
A sensation as if some person touched him gently while dozing. See 37.
Perfect indifference, does not care to do anything; inability to fix the mind on anything.
❙Hopeless of recovery, and certain of death. θTyphus.
❙Mentally restless, but too lifeless to move.

Google

‖Restless and delirious for three weeks. θTyphus.
‖Want of mental force. θTyphus.
Worse when thinking of pains in various parts of body.

[2] **Sensorium.** ‖Vertigo and weak feeling of entire system, especially of lower limbs and knees.
Dizzy when stooping.
Vertigo with paralysis of eyelids.
‖Giddiness and severe nausea. θTyphus.
Head feels heavy, as if he could not sit up.
‖Dull, heavy sensation in head with drowsiness; unfit for mental labor.
‖Frequent fainting; tongue dry, brown, in morning.

[3] **Inner Head.** ‖Peculiar feeling in head, which is never felt except during fever, excitement of brain, such as precedes delirium.
Head feels heavy as if he could not sit up, day and night, causing a wild feeling; < from noise.
Dull, stupefying headache with fulness; sensation as if a band were around forehead; confusion of ideas; stupor; dull, heavy looking eyes, besotted expression; feel as if had been drunk and was just recovering from its effects; general debility and nervous prostration.
‖Head feels large and heavy, with numb feeling of head and face; stitches or shocks in various parts of head.
Dull, heavy, pressive headache.
A dull, heavy feeling in head, especially forehead and malar bones; ears feel hot, yet cold to touch; head feels swollen; giddiness, as if he had taken liquor, < when walking.
Dull, heavy feeling in head with general languor; eyes pain while reading by gaslight; 2d day.
Dull, heavy, full feeling in forehead with slight frontal headache, with sensation as if temples were pressed by thumbs; 1st day.
Pain in forehead over l. eye in region of supraorbital foramen; darts of pain in different parts of body; 2d day.
Slight frontal headache after having been up awhile; forehead hot; 4th day.
‖Frontal headache, weighty. θTyphus.
Dull, heavy headache, > from pressure on nasal bones and < from mental labor.
Fulness of head, with fluctuation when walking.
Frontal headache: ‖with pressure at root of nose; with feeling of fulness and tightness of whole head.
Pressive pain in forehead as if it would be pressed in, with sharp pains in both temples; much < from motion.
‖Sharp darts of pain in supraorbital nerve at foramen.
Dull pain in anterior lobes of brain and r. frontal sinus; afternoon.

Google

Severe pain passing from insertion of r. sterno-mastoid muscle through head into orbit, causing a dull, heavy feeling in head, especially forehead, > by pressing below mastoid process.
Beating headache in forehead, with soreness in back of head, immediately below occipital protuberance, followed by hot stitches in temples.
Frequent pain in r. temple; sharp pain by spells in both.
Heavy pain at base of brain, with lameness and drawing in cervical muscles.
Fulness in head with pain behind r. ear; > having lain quiet for a short time.
Headache and pain behind r. ear, > after dinner.
Severe pain in occiput with dull, stupid feeling all over head; sharp pain over eyes.
Dull feeling in occiput, with pain and fulness of vessels.
Throbbing in head, over eyes, with weakness in limbs on going up-stairs.
❙Dull bruised ache in head. θTyphus.
❙❙Dull, bruised feeling in occiput. θDiphtheria.
Soreness as if in brain, frontal region, with pain, heat, vertigo; < on stooping.

⁴ **Outer Head.** Top of head feels as if it would fly off.
Great tightness of forehead.
Scalp feels sore.
Sensation as if head was swelling (slowly growing larger and larger), with pain at insertion of sterno-cleido-mastoid muscle accompanied by a sensation as if head was swollen behind ear, r. side.
❙Dull, bruised ache in head. θTyphus.
Several sharp thrusts of pain in head over r. eye.
Fulness of external vessels of head and face.
Neck feels so tired, she can't hold her head easy in any position.

⁵ **Sight and Eyes.** ❙❙Cannot bear light; eyes burn, but do not water. θChronic sore eyes.
Eyes weak.
❙Occasionally delirium with confusion of sight. θDiphtheria.
Feeling as if eyes would be pressed into head; ❙eyeballs feel sore with great confusion of sight; cannot place anything, until after looking at it a few seconds; everything appears to move.
Severe pain in eyes while reading, compelled to stop.
Severe pain in l. eye, < from pressing on crown of head, with dull headache.
❙Eyes dull. θTyphus.
Left eye for a moment feels very weak, followed by stitches in upper eyelid.

Digitized by Google

Stitches in r. eye; also in l. as from needles.
Sharp pain over r. eye, then over left.
‖Weight over eyes. θTyphus.
Bloated feeling of eyes, glistening; disposition to have them half closed.
Eyes feel swollen, slight lachrymation with burning.
‖‖Eyeballs feel sore; sore and lame on moving them.
Soreness in front of head when moving eyes or turning them upward.
Vessels congested, eyes look red, inflamed.
Eyes still injected with burning pain in them, causing running of r. nostril; < from reading and from light of candle.
Eyes in morning still injected and pain, and contain thick, yellow pus, which cause them to burn; < while reading.
‖Chronic sore eyes.
Partial paralysis of lids; difficulty in keeping them open.
Pain in region of supraorbital nerve, > from pressure.
Pain in orbital plate of superior maxillary bone (left eye), relieved by pressure.

[6] **Hearing and Ears.** ‖Dull hearing. θTyphus.
Roaring in ears with mental confusion.
‖‖Delirium with almost complete deafness. θDiphtheria.
Ears feel hot and burn, yet cold to touch.
Right ear sore and neck tired.
‖Soreness in r. ear, running down neck.
Pain below l. ear, midway between mastoid process and angle of lower jaw.
Slight pain in l. parotid gland.

[7] **Smell and Nose.** Soreness extends to posterior nares.
Severe drawing pains along nose.
Right nostril stopped up.
Nose stopped up as if had taken a bad cold; when sneezing and blowing nose, slight bleeding from l. nostril of bright red blood (thick); 2d day.
Thick mucus from nose.
‖Dull pain at root of nose. θCatarrh.
Sneezing and feeling as after taking cold.
Crampy sensation at root of nose.
Unpleasant sensation at root of nose (especially l.), as if water had passed through posterior nares while drinking.
‖Epistaxis and oozing of dark blood from nose for two or three days. θTyphus.
‖‖Sensation of great fulness, œdematous swelling of affected parts, especially in choanæ. θDiphtheria.

[8] **Upper Face.** ‖Looked ill for two weeks. θTyphus.

Google

Anxious, frightened look. θCough.
Yellowish cheeks; central deep flush. θTyphus.
Face: sallow; dark red, with besotted expression; flushed, dusky; hot and perceptibly flushed.
Burning, prickling of l. side of face and head.
Burning heat in face with flushed cheeks. θDiphtheria.
Cheeks burn.
Cheeks flushed, dark violet. θCough.
Heat all over, most in face. θTyphus.
Critical sweat on forehead and face. θTyphus.
Face and whole head feel numb.
Muscles of jaw rigid.

[9] **Lower Face.** Pain in articulation of lower jaw. θTyphus.
Jaw dropped. θTyphus.
Cracked lips, with bleeding and ulceration of bowels. θTyphus.
Pain in region of r. mastoid process.

[10] **Teeth and Gums.** Teeth and gums sore; by pressing with finger large quantities of blood ooze out.
Sordes on teeth and lips; tongue ulcerated. θTyphus.

[11] **Taste and Tongue.** Taste: flat, bitter, sometimes putrid.
Filthy taste with flow of saliva.
Foul or bitter nauseous taste in mouth. θTyphus.
Tongue swollen, thick, making talking difficult.
Slight heat or burning at root of tongue.
Tongue red and dry in middle. θTyphus.
Tongue feels dry on rubbing against roof of mouth; smarts, feels burned.
The roof of tongue is swollen and feels numb. θDiphtheria.
Tongue of a dark hue. θCough.
Dry, parched, thickly coated tongue. θTyphus.
Tongue dry, brown down centre. θTyphus.
Tongue covered with a thick, brown crust. θTyphus.
Tongue baked down centre. θTyphus.
Tongue at first white with red papillæ here and there, followed by a yellow-brown coating in centre, edges being red, shining.
Tongue coated white, yellow or yellowish-brown, and feels as if burned or scalded. θDiphtheria.
Tongue yellowish-white, deeply furred. θTyphus.
Tongue has a yellow centre, or yellowish-brown coating, dry. θTyphus.
Foul tongue. θTyphus.
Tongue feels as though it had been scraped, and sensation extending to fauces.
Tongue cracked down centre.
Cracked, sore, ulcerated tongue. θTyphus.

Google

[12] **Inner Mouth.** ❙Stomatitis materna; breath fetid; feeble state.
❙Fetid odor; also after mercury.
❙Mouth and tongue very dry. θIn fevers.
Filthy taste, with flow of saliva.
Saliva rather abundant, somewhat viscid, tasting flat.
Copious saliva: followed by sore throat, scraping, burning; slight pain in r. lung.
Copious flow of saliva; ulcers in mouth.
❙Cancrum oris, copious saliva; gums loose, flabby, dark red, or purple; fetid.
❙❙Aphthæ. θTyphus.
❙Sore mouth of sucklings and consumptives.
❙Canker sores in mouth.
❙Ulcerations extending from mouth, through alimentary canal, with watery discharges from bowels.
❙Putrid ulceration of buccal cavity, with salivation; well-developed ulcers, slight pain.

[13] **Throat.** ❙❙Pain and soreness of fauces. θDiphtheria.
Hot feeling in fauces, passing up into ears; sensation as if had eaten pepper.
❙❙Fauces dark red; dark, putrid ulcers; tonsils and parotids swollen; unusual absence of pain. θDiphtheria. θPutrid sore throat, etc. θTyphus. θVariola.
Scraping and burning, raw sensation in pharynx; much viscid mucus; copious flow of saliva; ulcers in mouth.
Dry scraping in throat when swallowing; tongue coated white, especially at root; fetid perspiration of body, and especially hands; eyes much injected; face and ears hot and very red; absence of thirst; heaviness in chest, with dull pain in region of spleen.
Burning and heat in fauces, as from heartburn, extending into ears; < from belching, which causes pain to extend into chest, and there producing a weak feeling.
❙Tonsils and soft palate swollen, with constant inclination to swallow, ❙❙not accompanied by pain. θDiphtheria.
Stitches in r. tonsil.
❙❙Tonsils and soft palate very red, but not painful.
Pricking in upper part of pharynx; raw sensation.
❙Tickling in throat provoking cough; uvula elongated.
❙Sore throat.
❙❙Throat sore; averse to open air.
Mucus abundant and viscid, can neither be swallowed nor expectorated.
❙Mucus rattles in throat. θTyphus.
❙❙Œsophagus feels as if constricted from above down to stomach; can only swallow water.
❙Constrictive feeling causing frequent efforts at deglutition; ❙throat sore, feels contracted.

Google

‖Throat feels swollen, full; tonsils and soft palate congested; frequent inclination to swallow, causing pain in root of tongue.
‖Spits out liquids put in mouth. θTyphus.
‖Can swallow liquids only; least solid food gags. θSpasmodic stricture of œsophagus. θDiarrhœa.
‖Children cannot swallow solid food; the smallest solid substance causes gagging, thus they cannot use anything but milk; sometimes thin, watery, offensive passages day and night. (Compare *Silicea*).
‖Unable to swallow. θTyphus.
‖Paralysis of organs of deglutition. θTyphus.

14 **Appetite, Thirst. Desires, Aversions.** ‖Loss of appetite. θTyphus.
‖Constant desire for water, with nausea and want of appetite. θTyphus.
Spitting out of liquids put into her mouth.
‖Great thirst. θTyphus.
‖A good deal of thirst. θTyphus.

15 **Eating and Drinking.** All symptoms < from beer.
After breakfast, dull feeling.

16 **Hiccough, Belching, Nausea and Vomiting.** Nausea, with inclination to vomit, relieved for a short time by eructations.
‖Feels as if she wants to raise a great deal.
Pressure at stomach, belching of large quantities of wind.
Nausea with eructations, followed by painful vomiting.
Feeling as if he would vomit, but no nausea, with severe shooting in l. kidney and to l. of umbilicus.
‖Retching and vomiting. θTyphoid fever.
Feeling as if it would be a relief to vomit.

17 **Scrobiculum and Stomach.** At night frequent pain in epigastric region; < from turning over, which he had to do all the time.
Full feeling in stomach.
Heavy gnawing in stomach; 3d day.
Burning heat in stomach rising up towards throat; 2d day.
‖Sinking, "gone" feeling at stomach, fainting; tongue brown in morning. θDyspepsia after typhus.
Constant burning distress in epigastrium, severe colicky pains in umbilical, and especially hypogastric region; rumbling in bowels; desire to vomit, but without nausea.
Cramp in stomach; evening.
Severe pain every few minutes in cardiac region of stomach.
Sinking feeling in stomach, with shoulder pains.
‖Sinking sensation in stomach. θTyphus.
Pains in stomach; feeling there as of a hard substance.

Google

[18] **Hypochondria.** Sensation of weight and oppression in præcordial region, with a feeling of unsatisfied breathing; afternoon.

Dull pain at pit of stomach, with constriction of diaphragm.

‖Constant pain in stomach and liver; < walking; hot sensation; heavy aching in stomach and liver.

Pain in region of liver on going up-stairs.

❙Pain in liver, from r. lateral ligament to gall-bladder; can scarcely walk, it so augments pain in gall-bladder.

❙Must stir about, yet motion is painful; pain over gall-bladder.

‖Constant aching distress in stomach and umbilical region, with a great deal of pain in region of gall-bladder; pain extends to spine.

Pain in region of spleen, with darts of pain in body, especially in carpus, metacarpus and phalanges; 2d day.

[19] **Abdomen.** Severe colicky pains in umbilical and hypochondriac regions, recurring every few seconds; rumbling desire for stool.

❙Pain in abdomen with diarrhœa. θTyphus.

Griping pain in bowels while at stool.

‖Distress, dull pain in umbilical region.

Distended abdomen; fulness; flatulence, rumbling, feels as if vomiting would relieve; mushy stools.

Sharp, shooting pains in bowels, with constant pain in hypochondriac region.

Dull aching, distress in bowels.

❙❙Right iliac region sensitive. θTyphus.

❙❙Abdominal muscles sore on pressure, with acute intermitting pain. θTyphus.

❙❙Abominal tenderness, with flatulency; 10th day. θTyphus.

Cutting in bowels, relieved for a short time by passage of flatus, which causes burning at anus.

Pain in abdomen on pressure, with dull aching in lumbar region on going to bed.

Sharp rheumatic stitches in r. groin, lasting but a little while, but after a short interval returning as before.

Severe pain in l. groin; < from walking, > from rest, but returning again on motion.

Glands of l. groin swollen; painful on walking.

[20] **Stool and Rectum.** ❙Diarrhœa, with pain and soreness in bowels. θTyphus.

❙Soft, papescent stool, with large quantities of mucus.

Stools of pure blood, or bloody mucus.

❙❙Fetid, exhausting diarrhœa, causing excoriation.

Thin, watery, offensive diarrhœa day and night; child

Google

can swallow nothing but milk; smallest quantity of solid food gags.
‖Aphthous diarrhœa.
‖Involuntary diarrhœa; 9th to 11th day. θTyphus.
‖Evacuation light yellow or brown, thin and watery. θTyphus.
Stools soft, papescent, with large quantities of mucus.
‖Dark brown mucous and bloody stools, with typhoid tendency; brown tongue, etc.
‖Stools: dark, thin, fecal, offensive.
‖Fetid stools. θTyphus.
‖Dysentery: rigors, pains in limbs and small of back; stools small, all blood, not very dark, but thick; great tenesmus; great prostration, brown tongue, low fever; in the Autumn, or in hot weather.
‖Colicky pains before stool. θDysentery in old people.
Stool very small and difficult to pass, it resembles sheep dung; pain in bowels after stool; 2d day.
Constipation; stool very small, passed only by very great straining and urging; 3d day.
Stool like sheep dung, dry and crumbling; pain before stool, weakness after stool.
‖Constipation and diarrhœa; stools dark and blood-streaked. θDiphtheria.
Before stool: severe colic, more in hypogastrium.
During stool: tenesmus; colic.
After stool: tenesmus; relief of colic.
Constipation; hemorrhoids in afternoon.
‖Stricture from piles.

[21] **Urinary Organs.** Stitches in region of r. kidney.
Shooting pains in region of l. kidney.
Urine scanty, dark red; light green.
Burning when urinating.
‖Urine very highly colored and scanty. θTyphus.
‖‖Urine alkaline, fetid. θTyphus.
Passes water often with a great deal of fiery pain, water is clear, scum on it in variegated colors; red sand is passed with urine, and is seen at once on bottom of vessel.
Increased secretion of urine at night.

[22] **Male Sexual Organs.** Dull drawing in r. groin and testicle, also in legs and knee joints.
‖Orchitis; cannot sleep because he feels as if his body was scattered about bed.
Pressing pain in l. testicle, as if it had been squeezed, lasting but a short time.
Cramps in testes, as if they had been squeezed.

[23] **Female Sexual Organs.** Menses too early and too profuse.

[24] **Pregnancy. Parturition. Lactation.** Excites abortion.

Google

‖Threatened abortion. θTyphus.
‖Lochia acrid, fetid; great prostration.
‖Puerperal fever, with typhoid symptoms.
‖Stomatitis materna.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness or aphonia.
‖Aphonia. θDiphtheria.
Larynx very sore to touch, painful swallowing or speaking.
Hoarseness, must use great effort to be understood.
Swelling of epiglottis, mornings.
Increased secretion from bronchial tubes and fauces, with expectoration of mucus.
As if she wanted to raise a great deal.

[26] **Respiration.** ‖Fetid breath. θTyphus.
Asthmatic oppression of chest, with frequent yawning; < from motion; > after rest.
Snoring respiration.
Oppressed breathing, 6 P. M., with cough; right lung sore; sneezing.
‖Awoke with great difficulty of breathing; lungs felt tight, compressed; ‖could not get a full breath; must open window and get his face to fresh air; burning heat of skin; dry tongue; accelerated pulse; peculiar feeling of brain..
‖On lying down difficult breathing, but no constriction of chest, must rise; afraid to go to sleep, fears nightmare and suffocation; arises from want of power in lungs, not constriction.
‖Dyspnœa, with a tight cough.
Stitches in sternum on inhalation.

[27] **Cough.** Tickling in throat provoking cough; uvula elongated.

[28] **Inner Chest and Lungs.** Tightness of chest; constriction.
Pain in r. lung; less pain in l., with soreness.
Pain through l. chest.
Sharp pains when taking a long breath.
Dull, oppressive pain in l. chest at origin of serratus magnus; < on inspiration and motion; pains in metacarpal bones.

[29] **Heart, Pulse and Circulation.** Throbbing of heart so as to be distinctly heard.
Compass and frequency of heart's pulsations seem increased; pulsations seem to fill chest.
Pulse at first accelerated, afterwards slow and faint.
Pulse 70; rises about 2 P. M. to 100.
‖Pulse 100–125, hard in evening. θTyphus.
Pulse slow, round, full.
‖Pulse 110, variable, weak, thready. θTyphus.

Google

Pulse slow and weak.
‖Pulse small and quickened. θTyphus.
‖Pulse 100 and feeble. θTyphus.
‖Pulse 120 and thready.
‖Pulse 120, small and weak. θCough.
‖‖Pulse accelerated or slower than in health. θDiphtheria.

[30] **Outer Chest.** Sharp pain in centre of sternum.
Dull stitches in left nipple.
Dull heavy pains in region of origin of pectoralis minor, lasting about ten minutes, followed by a bruised feeling.

[31] **Neck and Back.** ‖Neck so tired she cannot hold her head easy in any position; sore down neck.
Cervical muscles stiff, lame.
Pain under r. scapula; better on motion.
Back and hips very stiff, ache severely.
‖Catarrhal pneumonia; elevated temperature; pulse over a hundred, even with excessive cough and hemorrhages; cavities; night sweat and diarrhœa (relieves greatly).
‖‖Dull lumbar backache, worse walking.
Dull sacral pain, compounded of a feeling as from pressure and fatigue, from long stooping; soon extends around hips and down r. leg.
‖Feels as if lying on a board; changes position often, bed feels so hard; worst part in region of sacrum. θTyphus.
Rheumatic pains in muscles of back, followed by burning.
Pain in r. subscapular muscle; < on motion of arm; > from pressing part against something hard; 3d day.
Pain under r. scapula; > on motion.
‖Pain in sacrum. θTyphus.

[32] **Upper Limbs.** Severe pain in l. shoulder joint, causing a disagreeable, sickening feeling at stomach; also darts of pains in various parts of body; < during rest and when thinking of them.
Pain in l. shoulder, extending down arm.
Feels sore and stiff about shoulders and chest.
Pain in r. elbow, causing a weakness in arm and hand, scarcely able to hold pencil while noting this symptom.
Rheumatic thrusts in l. ulna (lower part), with pain in different parts of body; < at rest.
Severe rheumatic stitches in metacarpal bone of l. index finger, lasting several minutes.
Rheumatic stitches in l. radius, lasting but a little while.
Numbness of l. hand and forearm, with prickling; < from movement; sharp darting pains through fingers.
Hands feel large, tremulous.
Rheumatic pains in l. wrist and stitches in r. eye.
Tearing pains in carpal bones of r. hand, lasting but a short time, followed by several sharp pains in phalanges of l. hand.

Google

A sharp dart of pain in first phalanx while writing.
Pain running up and down bones of l. forearm; 3d day.
Tearing pain in palm of l. hand, and also darts in various parts of body; 2d day.
Terrible rheumatic pains in metacarpal bones of l. hand, lasting but a few moments, though very severe; also pain in l. knee and shoulder; 1st day.
Tearing pain in r. metacarpus; 2d day.
Rheumatic pain in metacarpal bone and phalanges of l. thumb (long, severe thrusts), lasting several minutes, every thrust causes a momentary sickness at pit of stomach; 1st day.
Sharp stitches under l. thumb nail, lasting but a few moments, but returning in a short time as before; 2d day.
Rheumatic pain in phalanges of middle finger r. hand, and also in r. shoulder joint; 1st day.
Pain in metacarpal bone of r. little finger; 1st day.

[35] **Lower Limbs.** Lower limbs feel weak and vacillating when walking.
Soreness in anterior of thighs; < after sitting awhile.
Drawing in hips and calves.
Several rheumatic stitches in outer hamstring.
Severe pain in l. knee (outer side), running down into fibula.
Rheumatic pain in l. knee joint.
Dull pain in r. patella and r. tarsal bones.
Cramp in calves whenever he moves them.
Pains in lower part of l. ulna and tarsus.
Left foot numb, prickling.
Burning of top of r. foot, from toes to back of foot.
Rheumatic pain on inner side of r. os calcis; 1st day.
Tearing pains in os calcis of r. foot, lasting about half a minute; 1st day.
Rheumatic pains in phalanges of r. great toe; 1st day.
Pain in first phalanx of r. great toe, as if hair on it was steadily and continually pulled; < at rest, > on motion; after moving a little while toe feels hot, and then pain leaves, but when at rest heat leaves, and pains return.

[36] **Limbs in General.** Rheumatic pain in r. (lower part) ulna, also in muscles on posterior part of r. thigh and metacarpal bones of r. index finger.
Rheumatic pain in r. shin bone, also in bones of l. wrist and hand; 1st day.
Aching in limbs.
Drawing in arms and legs.
Rheumatic pains in l. elbow and knee, and also r. ankle and heel; 1st day.

Google

Rheumatic stitches in r. subscapular muscle, with pains in different parts of body, especially in metacarpal bones and phalanges, lasting but a few moments; pains in hand seem to be deep in bones; 1st day.

Aches from his finger ends to his toes.

[35] **Rest. Position. Motion.** Lying quiet: pain behind ear better.

Rest: pain in l. groin >; asthma >; darts of pain through body <; pain in l. ulna <; pain in great toe worse.

After sitting: soreness in thighs.

Lying down: difficult breathing.

Motion: pain in forehead <; eyeballs sore; asthma <; pain in l. chest <; pain under r. scapula >; cramp in calves; pain in r. great toe better.

Ascending: limbs weak; pain in liver.

Descending: arms and calves feel sore.

On rising: faintness.

Turning over: pains in epigastrium worse.

Stooping: dizziness; soreness anterior brain worse.

Walking: fluctuation in head; pain in stomach and liver; pain in l. groin <; lumbar backache <; lower limbs weak.

[36] **Nerves.** ❙Restlessness. θTyphus.

❙Morbid irritability of nervous system, preventing sleep. θTyphus.

❙Restless, uneasy, could confine himself to nothing; wanted to be moving from place to place, evening. θTyphus.

Dull, heavy feeling in whole body, with indifference to everything.

❙General malaise for several days. θTyphus.

❙General weak feeling, but especially of lower limbs.

❙Feels weak, tremulous, as if recovering from sickness, and yet incapable of vigorous mental or physical exertion.

❙Entire system feels weak, especially lower limbs and knees; vertigo.

A weak, languid feeling in body (especially arms, extending into hands and fingers), scarcely able to hold pencil while writing, causing one to feel as limber as an old rag; perfect indifference; no desire to do anything.

Feel weak and languid, sore and bruised, especially arms and calves of legs feel sore on going down-stairs.

Feel weak and exhausted after a little labor, soon becoming tired.

Feels weak, tremulous, as after severe sickness.

Google

Faintness on rising. θTyphus.
Great languor; wants to lie down.
Lassitude and weakness of whole body, with indifference; 3d day.
Great prostration and restlessness. θCough.
Prostration and trembling. θTyphus.
Prostration. θDiphtheria.
Disagreeable prostration, with soreness of muscles. θTyphus.
Great prostration of strength, as during convalescence from some severe sickness, when treated by strong drugs and medicine; 1st day.
Indescribable sick feeling all over.
Slides down in bed; feels as if sinking away. θTyphus.
Lay in semiconscious condition when she appeared dying. θTyphus.
Paralysis of whole l. side; l. hand and arm are numb, powerless.

57 **Sleep.** Excessive drowsiness.
Feels very drowsy, can hardly keep awake; 3d day.
Drowsiness, can only keep awake by great effort; pains in body still continue; 1st day.
Drowsy, stupid, tired feeling; disposition to half close eyes.
Feels dull and sleepy; with slight headache; 3d day.
Feels sleepy and drowsy; lay down to doze, but soon lower limbs suddenly start as if had been frightened.
Feels drowsy; while sitting on a chair and lying with head on arms, and arms on table (dozing, yet conscious), had a sensation as if some person touched him very gently in both sides; followed by a want of power to sit up, made several efforts to do so, but was perfectly helpless; in a short time had a similar attack of about same duration, but more severe; felt weak for some time afterwards.
Delirious stupor; falls asleep while answering a question or while being talked to.
Lies semicomatose, looks as if dying. θTyphus.
Slept well until about 3 A.M., then restless until morning, tossing about.
Restless; does not sleep quietly.
Sleep restless, frequent wakings; 3d day.
Wants to get up and yet does not want to. θTyphus.
Sleepless, with wandering of mind. θTyphus.
Delirious disturbance at night, varying from a mere uneasiness and inability to sleep to delirium proper. θTyphus.
Cannot sleep; head or body feels scattered about bed;

Google

tosses about to get pieces together. θTyphus and other diseases.

‖Wants to get out of bed. θTyphus.

‖Restless, with frightful dreams. θTyphus.

Sleep restless and troubled with dreams, but inability to remember what had been dreamed, and weariness, as if had not slept enough; 2d day.

Sleep restless, troubled by vivid dreams, and also frequent wakings; 2d day.

Sleep last night restless, tossing about, troubled with continual dreams, they continuing up to moment of awaking, yet unable to tell, or even to remember what had been dreaming of; 3d day.

Sleep very restless, dreams; heavy gnawing at stomach; pains in hands; 4th day.

‖Nightmare.

‖Sleeplessness. θTyphus.

Worse on awaking: difficult breathing; parts rested on feel very painful; flashes of heat.

[39] **Time.** 3 A.M.: restless, tossing; flashes of heat.

Morning: tongue brown and dry; pain and injection of eye; swelling of epiglottis; chilly sitting by fire.

All day: chilliness.

Afternoon: pain in anterior brain; weight and oppression in præcordial region; hemorrhoids <; fever increases.

2 P.M.: pulse rises from 70 to 100.

6 P.M.: oppressed breathing.

Evening: cramp in stomach; pulse hard; chilly.

Night: delirium; increased secretion of urine; fever; heat, burning in legs prevents sleep.

[39] **Temperature and Weather.** Autumn or hot weather: dysentery worse.

‖‖Great aversion to open air. θSpasmodic stricture of œsophagus.

‖Chilled by standing in cold wind; fever returned, with rapid prostration. θTyphus.

[40] **Fever.** ‖Shivering. θTyphus.

‖Shivering preceded by a sense of weakness. θTyphus.

‖‖Chilly all day; whole body feels sore.

‖Chilly on going into open air; chills over back and lower limbs; evening.

Chilly over back while sitting by a fire; forenoon.

‖Chilliness alternated with heat. θTyphus.

‖Chilliness of lower limbs and back, with fever at night. θDiphtheria.

‖Chill followed by fever, with severe aching in muscular portion of body. θTyphus.

‖Whole surface hot and dry, with occasional chills, mostly up and down back.

Google

Extremities feel hot, except feet, which are cold.
Flashes of heat from small of back in all directions; dull, heavy aching, great prostration.
On awaking at 3 A.M., flashes of heat, feeling as if sweat would break out.
Gentle flashes of heat over whole body.
Fever set in with headache. θTyphus.
General fever and malaise.
Heat of face, flashes over face.
Burning, pungent heat over whole body, especially in face. θTyphus.
Heat at night; burning in legs preventing sleep.
Heat of skin. θTyphus.
Uncomfortable burning all over surface, especially face; had to move to a cool part of bed, and finally to rise and open a window and wash his face and hands.
Gentle flushes of heat over whole body, followed by a slight perspiration.
Frequent sweats. θTyphus.
Causes sweat to break out and relieves; critical sweat on forehead and face. θTyphus.
Fetid sweat.
Chills, fever and sweat every other afternoon.
Fever cases, with peculiar delirium; dulness of intellect and abdominal tenderness.
Sensation as if there was a second self outside of patient. θTyphus.
Fever, delirium, headache, pain in back and limbs; (compare *Rhus*). θTyphus.
General fever and malaise. θTyphus.
Aspect of low fever, θTyphus.
Determination of blood to surface and profuse sweating. θTyphus.
Early stages: white tongue, red edges; or brown, or yellow brown down centre; bitter or flat taste; cannot digest food; stools frequent, yellow; gurgling and slight sensitiveness of r. iliac region; pulse high; fever tends to increase; parts rested on are sore. θTyphus.
Typhus and typhoid fever, with a tendency to putrescence.
Fever originating from confinement on shipboard, without good care or food.
Beginning of typhus, when so-called nervous symptoms predominate.
Cerebral forms, especially with excessive drowsiness, delirium, confusion of ideas, stupefying headache; restless sleep, head feels scattered about; frightful dreams; great debility and nervous prostration, with erethism, etc.
Typhoid and cerebral forms of fever; delirium, drowsi-

Google

ness, confusion, gives slow answer or falls asleep attempting a reply; erethism; tries to escape from bed; sleepless because she cannot get herself together; head feels scattered, and she tosses about to get pieces together; sensation of a second self outside of patient; indifferent; low delirium, stupor; sordes on teeth; face dark, besotted looking; hearing dull; epistaxis; involuntary, scanty stool; difficult breathing; fever increases each afternoon.

" **Locality and Direction.** Right: pain in temple; pain behind ear; pain over ear; stitches in eye; running from nostril; ear sore; nostril stopped; pain in mastoid process; pain in lung; stitches in tonsil; iliac region sensitive; stitches in groin; stitches in kidney; pain under scapula; pain down leg; pain in elbow; pain in eye; pains in hand; pain in shoulder joint; pain in little finger; pain in patella; burning top of foot; pain in os calcis; pain in great toe.

Left: pain over eye; pain in eye; eye weak; stitches in eyes; pain in orbit; pain below ear; pain in parotid gland; bleeding from nostril; burning side of face and head; shooting in kidney; pain in groin; pain in testicle; pain through chest; stitches in nipple; pain in shoulder joint; pain in ulna; stitches in radius; numbness of hand and forearm; pain in waist; pain in bones of forearm; pains in hand; pain in knee and shoulder; pain in thumb; stitches under thumb nail; foot numb; paralysis of whole side.

Above downward: pain in shoulder.

Below upward: heat in stomach.

" **Sensations.** As if there was a second self; as if scattered about; as of a band around forehead; as if temples were pressed by thumbs; as if top of head would fly off; as if head was swelling; as if eyes were pressed into head; as if he had eaten pepper; as if water had passed through posterior nares; as of a hard substance in stomach; as if lying on a board; as if hair on first phalanx of r. great toe was pulled.

Peculiar feeling of brain.

Sharp pain: in temples; over eyes; in bowels; in l. groin; in chest; in sternum; in l. knee.

Sharp thrusts: over r. eye; in l. ulna; in l. thumb.

Darting: in body; in carpus, metacarpus and phalanges.

Cutting: in bowels.

Hot stitches: in temples.

Stitches: in head; in upper eyelid; in r. eye; in l. eye like needles; in r. tonsil; in r. groin; in r. kidney; in sternum; in l. nipple; in metacarpal bone of l. index

Google

finger; in l. radius; under l. thumb nail; in outer hamstring; in r. subscapularis muscle.
Shooting: in bowels; in l. kidney.
Pricking: in pharynx.
Prickling: of l. side of face and head; in l. hand and forearm; of l. foot.
Tearing: in r. metacarpus; in r. os calcis.
Drawing: in cervical muscles; along nose; in r. groin and testicle; in legs and knee joints; in hips and calves; in arms and legs.
Fiery pain: when urinating.
Burning: of eyes; of l. side of face and head; of cheeks; at root of tongue; in throat; in fauces; in stomach; at anus; when urinating; in muscles of back; dorsum of r. foot; in legs; all over skin.
Soreness: in back of head; as if in brain; of eyeballs; in front of head; of r. ear; from nose to nares; of teeth and gums; of fauces; of abdominal muscles; in bowels; of larynx; of r. lung; down neck; about shoulders and chest; in anterior of thighs.
Pressure: in forehead; at stomach; in l. testicle.
Aching: in stomach and liver; in bowels; in lumbar region; of back and hips; in limbs; from finger ends to toes.
Bruised ache: in head; in occiput; in pectoralis minor.
Squeezed pain: in l. testicle.
Rheumatic pain: in back; in l. wrist; in l. thumb; in r. middle finger and shoulder joint; in l. knee; on inner side of r. os calcis; in r. and l. ulna; in muscles of posterior part of r. thigh; in metacarpal bone of r. index finger; in r. shin bone; in bones of l. wrist and hand; in l. elbow; in r. ankle and heel.
Cramp: at root of nose; in stomach; in testes; in calves.
Colicky pains: in umbilical and hypogastric region.
Griping: in bowels.
Scraped feeling: on tongue; in throat.
Gnawing: in stomach.
Dull pain: in anterior lobes of brain and frontal sinus; at root of nose; in spleen; at pit of stomach; in umbilical region; in l. chest; in sacrum; in r. patella and tarsal bones.
Undefined pain: in r. temple; behind r. ear; in region of supraorbital nerve; in limbs and small of back; over l. eye; below l. ear; in l. parotid; in r. mastoid process; in articulation of jaw; in r. lung; in root of tongue; in epigastric region; in cardiac region of stomach; in liver; in gall-bladder; in spleen; in abdomen; in r. lung; through l. chest; under r. scapula; in sacrum; in

Google

l. shoulder; down arm; in r. elbow; in metacarpal bone of r. little finger; in lower part of l. ulna and tarsus.
Throbbing: in head; over eyes.
Beating: in forehead.
Fulness: of head; in stomach.
Heaviness: of head; over eyes; in chest; in whole body.
Weight: in præcordial region; over eyes.
Oppression: in præcordial region.
Tightness: of head.
Constricted feeling: in œsophagus; of diaphragm; of lungs.
Bloated feeling: of eyes.
Swollen feeling: of head; of tongue.
Large feeling: of head and hands.
Tired feeling: in neck.
Weak feeling: general; in chest.
Weakness: in arms and hands; of lower limbs; in knees; of body.
"Gone" feeling: at stomach.
Shocks: in head.
Numbness: of hand; of face; of tongue; of l. hand and forearm; of l. foot.
Tickling: in throat.
Heat: in ears; in forehead; in face; in fauces; in stomach; in liver; of the skin.
Dryness: of the skin.

[44] **Tissues.** ‖‖Prostration with disposition of fluids to decompose.
Stiffness of all joints, as though strained; rheumatic pains and soreness all over body.
‖‖Discharges and exhalations fetid; breath, stools, urine, sweat, ulcers.
‖‖Ulceration of mucous membranes, especially those of mouth; also with tendency to putrescence.
‖Enlarged glands.
‖Diseases of mucous membranes.
‖Derangements of mucous surfaces, generally with vomiting and purging.

[45] **Touch. Passive Motion. Injuries.** Touch: larynx sore.
Pressure: abdominal muscles sore; headache >; pain in mastoid region >; pain region of supraorbital nerve >; pain l. orbit >.
Pressing on crown of head: pain in l. eye <.

[46] **Skin.** Burning all over skin, < in face.
Livid spots over body and limbs, not elevated, of irregular shape, size of a pea up to bean, without any sensation.
‖Rose-colored spots on 9th day. *θ* Typhus.

Digitized by Google

Eruption like measles or urticaria.
‖Pimples thick on palatine arch, tonsils and uvula; breath fetid; salivation; prostration. θVariola.
‖Foul, gangrenous, phagedenic syphilitic sores.
‖Smallpox confluent, tardy eruption.
‖‖Gangrenous sores, aphthæ, sore nipples (locally).

[47] **Stages of Life, Constitution.** Lymphatic temperament.
Children: offensive diarrhœa.
Old people: dysentery.
Girl, æt. 7, after being physicked, etc., for a cough; great prostration, etc.
Old woman, æt. 79; œdema.

[48] **Relations.** Cognates: ‖*Arnic.*, ‖*Arsen.*, *Bryon.*, *Gelsem.*, (especially in the malaise, nervousness, flushed face or drowsiness, and muscular soreness in early stages); *Hyosc.*, *Kali chlor.*, *Laches.*, *Mur. ac.*, *Nitr. ac.* (in typhoids); *Nux vom.*, *Opium*, *Rhus tox.*
When. *Arsen.* has been given in typhus improperly.
Silic., like *Baptis.*, has ability to swallow only liquids, (like milk), but unlike the latter, it has also aversion to milk. See 13.
Terebinth. and *Nitr. ac.* acted well after *Baptis.* θTyphus.
Hamam. speedily checked copious, repeated epistaxis. θTyphus.

Google

BARYTA CARBONICA.

Barium Carbonate. *Ba Co* 3.

In 1824 Stapf published in his Archives, vol. iii, No. 3, p. 183, the *Baryta acetica*, proved by himself and his friends Gross, Hartman, Hartlaub, Sen., Adams, and Rückert, Sen. There were two hundred and fifty-four symptoms, and some additional observations and collections of Hahnemann on *Baryta muriatica*. Very few cures have since been published, notwithstanding the masterly analysis of Stapf in his preface.

In 1828, in the first edition of "Chronic Diseases," vol. ii, p. 32, appeared provings of *Baryta carbonica*, the symptoms numbering one hundred and eight, which were united with the former of *acetica*, making in all two hundred and eighty-six. In the second edition, in 1835, with the addition of a second proving of Hartlaub and the numerous provings made on a houseful of girls, by Nenning, and one proving of Rummel, the number of symptoms increased to six hundred and eighteen. Neither Gross nor Rückert made a proving of the *carbonica*, the symptoms got in by mistake of those who made the arrangement; also Dr. Neumann's valuable observations, which were made after prescribing large doses of *Baryta muriatica* for two schoolboys, and corroborated by repetition. They found their way even into Jahr's manuals, and all the repertories, from where they have to be stricken.

As we have to deal here principally with the cured symptoms, and only very few with *Baryta acetica* have been mentioned, Hahnemann's example is followed, and both *acetica* and *carbonica* united, the former marked —.

This united collection will show that great as the difference is from *muriatica* there is hardly any between the two others, and certainly none in the symptoms cured.

[1] **Mind.** ❙Want of clear consciousness. θOld age.

Feels stupefied; as if benumbed; brain seems to move to and fro as if loose, when moving body.

❙Weak memory.

❙Memory deficient; child cannot be taught, for it cannot remember; is inattentive.

Forgets what was just said, just done, or what he was going to do or get.

Forgetful; in middle of a speech the most familiar words fail him.

—❙As if absent; absentmindedness. θApoplexy.

—❙Has no clear perception. θApoplexy.

❙❙Great mental and bodily weakness; childishness. θOld people.

❙Idiocy.

Google

Imagines he walks on his knees.
Walking in street she imagines men are laughing at her, criticising to disadvantage; this makes her so timid that she dare not look up or at anybody, and she perspires over whole body.
Delirium, with frightful figures and images before eyes.
Talkative mania; < during catamenia; yellow complexion; white-coated tongue, with red edges, little ulcers on tongue; nausea without being able to vomit; fine skin becoming easily denuded. θYoung girls.
Mania; talks much and confusedly; wants to go out of house. θDuring pregnancy.
Inclined to make fruitless exertions of memory; tries to recollect past events.
Loquacity.
Groaning and murmuring. θOld age.
Childish and thoughtless behavior. θOld people. θApoplexy.
Averse to strangers and company.
Laziness, averse to bodily or mental labor.
Child does not want to play, but sits in corner doing nothing.
Weeping mood.
Sadness, dejection of spirits; grief over trifles.
Hopelessness; distrust.
Anxious about most trivial affairs.
She is suddenly overwhelmed with an evil apprehension; she imagines, for instance, that a beloved friend has suddenly fallen sick and is dying.
Solicitude: about his future; about domestic affairs.
A peculiar dread of men.
Fearful, easily startled.
Nervous anxiety, restlessness, desire to escape.
Irresolute, constantly changing his mind.
The highest degree of irresoluteness; she proposes a little journey, but as soon as she makes preparation she changes her mind; she wavers between opposite resolutions; all self-confidence has disappeared; great timidity and cowardice.
Loss of self-confidence; desponding: pusillanimous.
Whining mood.
Sudden ebullitions of anger, but coupled with cowardice.
Very easily frightened; a little noise in street seems to her like cries of fire; it frightened her so that all her limbs trembled.
Dull pain in bumps of firmness and concentrativeness, with corresponding symptoms of mind.
Thinking of one's complaints makes them worse.

Google

Worse in company; better when alone.

[2] **Sensorium.** Oversensitiveness of all the senses.

At night, in bed, everything rocks within him, as in a ship.

When she raises herself it seems as if her head would be turned inside out.

Sensation as if brain was loose; seems to move to and fro on motion of body; feels stupefied, as if benumbed.

—He has not his full consciousness; is childish and stupid. θApoplexy.

Vertigo: with nausea; from stooping; when lifting arms up; old people.

[3] **Inner Head.** Headache in evening; every noise, especially male voices affect brain painfully.

Headache just above eyes.

Pressure on forehead and over eyes; after *Bismuth* failed.

Pressure in brain under vertex, towards occiput, on waking, with stiffness of neck.

Pressive sticking in vertex, which extends through whole head, whenever he stands in sun.

Pricking headache near warm stove.

Headache, as if head were compressed in a vise.

Pressive pain, as if skull would split.

Headache oppressive, close above eyes and root of nose.

Distending pain in head and nose.

Pulsation in temples.

Headache < in open air.

Megrim.

Pain in head, with heat of skin. θQuinsy.

The pain from head extends to nape of neck.

Headache, tension in occiput, towards nape of neck.

Heaviness in occiput, with drowsiness and rheumatic pains.

Rush of blood to head; blood seems as if it could not circulate.

Apoplexy; with old people.

Headache of aged people, who are childish; sensorium not clear; loss of speech; trembling of limbs, of drunkards.

Apoplexia serosa.

Stitches in sides of head, after dinner; in head, in a warm room; pressure in vertex walking in sun.

Headache in persons who are mentally and physically dwarfish.

[4] **Outer Head.** Hairy scalp, and especially temples and forehead, feel as if something was very lightly drawn over parts, with a sensation of coldness in face.

Numbness in skin of forehead to root of nose.

Right side of head feels burning hot, but is really cold to touch.

Google

‖Head sensitive to cold; disposed to catch cold when washing head.
The scalp is very sensitive to touch, especially on side on which he lies, with sensation of suggillation, < from scratching.
Crawling over scalp, as from ants, in spots.
—Very disagreeable formication and pricking under skin of head and face.
‖Crusta lactea, dry scurf; ‖moist crusts; itching; burning; causes hair to fall out; cervical glands hard, swollen.
Dry or humid scurf on head.
—‖From whole head a copious discharge, with swelling of cervical glands; girl, æt. 11. θTinea capitis.
‖Dry tinea, after scarlatina.
‖Eruptions on head.
‖Impetigo larvalis.
‖Encysted tumors on scalp.
Sensation as if hair stood on end, with chilliness.
‖‖Falling off of hair; baldness, especially on crown.
‖Baldness with young people.

[5] **Sight and Eyes.** ‖‖Light dazzles and hurts eyes; fiery sparks before eyes in dark.
Better in the dark: sensitiveness of head.
Optical illusions, generally in bright colors.
Double vision.
Cannot bear to look at one object for any length of time.
Sees everything as in a fog when closing eyes and pressing balls.
Weakness of eyes; < evening in candlelight: during day a cloud before l. eye; by candlelight a glimmer.
Sensation of a gauze before eyes in morning after a meal.
‖Flying webs and black spots before eyes.
‖Dimsighted, cannot read.
‖Weakness of sight with old age.
‖Morbus Basedowii.
‖Cataract.
Burning and pressing in eyes, if he looks attentively at anything.
Pressure deep in eyes; < looking fixedly, or upward and sideways; > looking downward.
‖Quick succession of dilatation and contraction of pupils; ‖pupil irregular.
—‖Immovable pupils. θApoplexy. θOld age.
Opaque cornea; inflammation of eyes, with sensation of dryness; shuns light.
‖Pannus.
‖Ulceration of cornea. θScrofulous ophthalmia.

Google

Eyes look sleepy all day.
‖Eyes dull, somewhat reddened. θOld age. θApoplexy.
Redness in white of eye and a white pimple near cornea.
Inflammation of eyes, with sensation of dryness.
Redness of conjunctiva, with swollen lids.
Subacute ophthalmia, with feeling of sand in eyes.
‖‖Scrofulous inflammation, with phlyctenulæ and ulcers on cornea; ‖glands swollen.
‖Eyeballs and lids inflamed, with photophobia.
‖Lids agglutinated.
Itching in eyes.
Styes in inner corner of l. eye.
Tarsal tumors.
‖Weight over eyes. θTyphus.

Hearing and Ears. ‖Buzzing and ringing in ears.
‖Sounds in ear, echoes, cracklings, reports, reverberations.
‖Roaring in r. ear like the sea, at each inspiration.
‖Cracking in ear when sneezing, swallowing, or walking fast.
‖Difficult hearing.
‖Drawing pain in ears; a kind of twinging earache.
‖Violent throbbing in l. ear. θToothache.
‖Tearing, with boring and drawing in bones in front of r. ear.
‖Itching in ears.
‖‖Eruption on and behind ears.
‖Scrofulous ear diseases.
‖Knotty swellings behind ears.
Small flat tubercles behind ears.
‖Glandular swelling and eruption behind ears. θScrofulous ophthalmia.
‖Scabs behind ears.
Eruption on lobes.
‖‖Parotitis after scarlatina.

Smell and Nose. Smell extremely sensitive.
‖She smells pine smoke. θAfter pneumonia.
Frequent nosebleed, especially with scrofulous, florid people.
‖‖Nosebleed before catamenia.
Tormenting dryness in nose.
Sneezing causing concussive pain in brain.
‖Fluent coryza.
Secretion of thick, yellow mucus from nose.
Blood and mucus are blown from nose.
‖Coryza < mornings; nose and upper lip swollen, nostrils reddened, sore, crusty; secretion of an unpleasant odor; (like *Calcar.* and *Graphit.*).
‖‖Coryza: nose and upper lip swollen; children with large abdomen.

Google

Catarrh affecting posterior nares, especially if patient be troubled with frequent epistaxis.
▮Formation of scabs in posterior nares and behind base of uvula.
▮▮Complaints on external nose.
Inflammation of edges.
Tip and edges of nose are painful; pimples on alæ nasi.
▮Scurfs under nose.

[8] **Upper Face.** ▮Tension as from a cobweb over face, temples and scalp.
Sense of tension of whole face, as if white of egg had dried on it, with loathing and diarrhœa.
—Cadaverous pallor.
—Pale face; drawn features; eyebrows rather drooping.
▮▮Pale, puffy face.
Emaciation, with bloated face; swelled abdomen.
Sensation as if face were swollen.
▮▮Left cheek swollen, also behind ear, with pain in temple. θToothache.
▮Redness of face. θQuinsy.
Dark redness of face, with congestion.
—▮Circumscribed dark redness of cheeks. θApoplexy. θOld age.
Face red in evening.
Face very red; lips purple.
▮Inflammatory prosopalgia.
▮Rough, dry place on r. cheek.
▮Herpes faciei.
▮Eruptions on face.

[9] **Lower Face.** ▮After eating so tired she cannot raise the hands; too weak to masticate.
▮Pain in articulation when closing jaw. θSore throat.
▮Jaw could not be depressed sufficiently to examine throat. θQuinsy.
—▮Mouth drawn to one side. θApoplexy.
Tension in lower jaw extends as far as os hyoides.
Lips dark red.
▮▮Swelling of upper lip, with burning pain; coryza.
Lips and gums dry, not relieved by drinking.
▮▮Painful swelling of submaxillary glands, with induration. θAfter scarlatina.

[10] **Teeth and Gums.** Involuntary chattering of teeth.
Drawing, jerking, throbbing toothache; r. teeth feel tense.
▮Single jerks in teeth.
Crumbling in a decayed tooth during day.
▮Toothache: < thinking about it; disappearing when mind is diverted.
▮▮Burning stitches in a hollow tooth when touched by warm food; left side.

Google

Burning stitches in carious teeth if touched by something warm.
Toothache in decayed teeth before menses.
Toothache, with great disposition to take cold.
Pain in carious teeth always after taking cold, with a pale swelling of gums, swollen cheek, pain extending to nose, eyes and temple; violent throbbing in ears; < at night.
Gums swollen around a hollow tooth.
Gums bleed, are swollen, pale red, with a dark red border.
Gums hurt when touched.
Fistula dentalis; abscesses at the roots.

11 **Taste and Tongue.** Taste: delicate; bitter; detestable; styptic.
Utterance imperfect.
Paralysis of tongue. θOld people.
Speechless; tongue paralyzed. θApoplexy.
Tongue paralyzed, cannot talk, but seems to be conscious. θApoplexy.
Dryness of tongue early in morning, with sensation of swelling of throat.
—Cold tongue, somewhat black.
Tongue coated, as if fuzzy.
Hardness on middle of tongue, burning when touched; burning sense of excoriation at tip; fissure on l. border, feeling excoriated.
Acuminated vesicles on middle of tongue.
Tongue cracked, feels very sore.
Vesicles on middle, tip, or under tongue.
Burning blisters on tip of tongue of long duration.
Pain on side of tongue, as from blisters.

12 **Inner Mouth.** The buccal cavity feels numb.
Dryness of mouth early after rising.
Hawking mucus; water runs from mouth all day; sleeps but an hour, then lies awake until an hour before morning. θHypochondriasis.
Much troubled with tough phlegm; mouth becomes dry, with a kind of thirst.
Saliva runs out of mouth while asleep, at daybreak.
Profuse salivation. θQuinsy.
Salivation; inability to swallow; suffocation; throat suppurating; fever. θAngina tonsillaris.
Intolerable stench from mouth, unnoticed by himself.
Whole mouth filled with vesicles, especially inside of cheeks.

13 **Throat.** Scabs behind uvula and posterior nares.
Sensation in pharynx as if a fine leaf lay before posterior nares; morning, after waking.

Google

Morning: viscid phlegm in fauces. θTonsillitis.
Inflammation of cellular membranes of fauces and tonsils, with fever; difficult swallowing and speaking. θQuinsy.
Throat is pale instead of having bright redness of *Bellad.;* submaxillary parotid glands are swollen and tender; breath is putrid; child scrofulous and dwarfish. θScarlatina. θDiphtheritis.
Stitches in r. tonsil.
Inflamed and enlarged tonsils.
Tonsils inflamed, with smallpox or scarlatina, especially if *Mercur.* and *Bellad.* prove insufficient.
Acute tonsillitis.
Suppurating tonsils.
Sore throat and swollen tonsils, with ptyalism; gave speedy relief when symptoms went from r. to left.
Angina tonsillaris.
Swelling of parotids, tonsils and submaxillary glands, with much saliva. θDisease in throat. θSkin diseases.
Liability to tonsillitis; after every slight cold, or suppressed foot sweat.
Disposition to acute tonsillitis, with suppuration.
Chronic angina, with great disposition to return.
Chronic induration of tonsils; sensation as of a plug in throat; < after swallowing solids.
Tonsils tend to suppurate, especially r.; palate swollen; dark brown urine; sleeplessness.
Tonsils both hypertrophic and indurated, livid and full of varicose veins.
Angina after taking cold, even phlegmonous.
Worse when swallowing food or saliva.
On swallowing, sensation as if food had to force itself over a sore spot.
Sensation in œsophagus as if a morsel of food had lodged there.
Smarting in throat when swallowing; < from empty swallowing; throat sore to touch.
Stinging when swallowing saliva and during empty deglutition.
Pressing, stinging pain on swallowing; θSkin disease.
Attacks of choking in throat after dinner, when sitting and writing, with a sensation as if thyroid was pressed in; impeding breathing.
Unable to swallow; liquids taken in mouth were ejected through nostrils. θQuinsy.
Inability to swallow anything but liquids. θSpasmodic stricture of œsophagus.
Constant difficulty in swallowing; < after much talking. θTonsillitis.

Google

▮Œsophageal spasm, in old people; can only swallow liquids.

[14] **Appetite, Thirst. Desires, Aversions.** ▮Hungry, but cannot eat; or feels as though she needed food, but did not want it.
Generally loss of appetite.
Aversion to: fruit, especially plums; sweets.
▮Sudden disgust for food while at meals.
▮Constant thirst. θQuinsy.
Thirst, with dryness of mouth, not relieved by drink.
Thirst, particularly during chill.

[15] **Eating and Drinking.** Is hungry and cannot eat, is sleepy and cannot sleep.
Too weak to chew, too lazy to eat.
▮▮After eating so tired that she cannot raise hands; she is too weak to masticate.
While eating: sudden nausea; ▮▮painful writhing while food descends, as if it was passing sore places.
Sweat increased while eating.
▮Weakness in stomach disappears.
▮Pressure like a stone in stomach after eating bread; repletion after a little food.
Worse after meals, particularly after a satisfying meal.
▮▮Stomach aches also after eating.
Weakness of digestion after eating, pressing in stomach; and pain in hard, swollen abdomen.
▮After meals: indolence; heat and uneasiness; faintishness; ▮belching; urging to stool; pressure on bladder; anxiety in lumbar region; ▮▮pain in hard, swollen abdomen.
▮Cough from eating warm food.
Better from cold diet.

[16] **Hiccough, Belching, Nausea and Vomiting.** —Nausea.
Sudden nausea while at meals.
▮Long-lasting nausea.
Nausea, palpitation and anxiety in early morning.
Morning sickness and vomiting.
Eructations after meals.
Eructations: ▮as if air was forcing its way through stomach, causing a feeling of soreness.
▮Sour eructations.
Eructations; a lump moving up and down.
▮▮Waterbrash.
▮Water suddenly runs together in mouth.
—Retching.
—Nausea followed by sudden and very copious vomiting of bile and a brownish substance (consisting no doubt of chocolate taken that morning), after ten hours.

Google

—Vomiting almost regularly every hour for twenty-four hours.
—Severe attacks of very copious vomiting.
Vomiting fluid, water and chalk, followed by prostration.

[17] **Scrobiculum and Stomach.** ‖Sensitiveness of pit of stomach; on stepping hard, he feels every step painfully in it.
‖Stomach aches when touching epigastrium.
‖Sensation of soreness in stomach; even when at rest.
‖Stomach painful when fasting and after eating.
‖Pressing in stomach, also after eating.
‖Pressure as from a stone; better from eructations.
‖Cramp in stomach, spreading up into throat, followed by eructations which relieve. θCardialgia.
Sensation of soreness of stomach; while eating, it feels as if food had to force itself through.
‖Gastralgia.
Pain in stomach as if it were too full and tense.
Sense of tension and heaviness in pit of stomach; as from flatulence and palpitation.
‖Marked hardness in region of stomach.
It seems as if stomach were hanging relaxed.
Dyspepsia with soreness in stomach.
‖Softening of stomach in scrofulosis.

[18] **Hypochondria.** Aching at a small spot in r. hypochondria when drawing a deep breath, or from pressure.
—Sensation as of a ball in liver.
—Swollen feeling and coldness in region of liver.

[19] **Abdomen.** Feeling of soreness around belly, commencing in back.
Pains in abdomen, about and below navel, which extends downward into thigh, with violent pain on l. side, extending forward from point of hip; pain in region of r. groin; after three days.
‖On turning in bed, it seems as if intestines fell from one side to the other.
—Rumbling in bowels; borborygmus.
Throbbing here and there in abdomen.
‖‖Abdomen hard, tense. θScrofulous children.
‖Mesenteric glands could be felt swollen and hard, with a big belly; abdominal muscles sore to touch.
‖Tabes mesenterica.
‖‖Distension and fulness above pubes, as if parts would burst, when lying on back.
‖Abdomen sensitive to touch.
Pain in hard, swollen abdomen.
Weakness of digestion after eating; pressing in stomach.

Google

Tension and sensitiveness of abdominal walls.

[20] **Stool and Rectum.** Ineffectual urging to stool.

Sudden irresistible urging to stool, with painful soreness in lumbar region, followed by frequent diarrhœic stools.

Frequent small stools, with feeling of great relief.

—Diarrhœa.

Diarrhœa: with pains in small of back; at night, with hemorrhoidal pains; towards morning, preceded by pain in abdomen; later in day suddenly yellow stool, with mucus and blood.

—Involuntary stools.

—Semiliquid stool after two hours, followed by constipation.

Stool hard and insufficient.

Difficult, knotty stool.

Scanty, hard or lumpy stool, expelled with difficulty.

Constipation. θCardialgia. θOld age.

Frequent passage of blood, with distended abdomen.

Light-colored stools, sometimes mixed with blood.

Before stool: colic.

During stool: burning in anus and rectum.

After stool: burning in anus; moisture exuding from piles; eructations.

Passage of round worms.

Small pin-worms pass with the stool; in an adult.

Crawling in rectum. θAscarides.

Inflammation of subcutaneous cellular tissue on l. side of anus, extending 2, 3 inches over l. buttock and forward along perineum, having a softening, surrounded by a hard, burning, tender and painful area.

Burning and soreness around anus, as if excoriated.

Anus sore and humid.

Hemorrhoids protrude, not only with stools, but also with urination.

Hemorrhoidal affections.

[21] **Urinary Organs.** Irritation of bladder, greatest at night when in bed.

Great desire to urinate; cannot retain urine.

Constant urging, and frequent emissions of urine; every other day.

Urging to make water, and frequent urination.

Frequent micturition. θOld age.

Urine frequent and copious.

—Makes water frequently; no stool. θApoplexy.

—When appetite improved and thirst lessened, urinary secretions became very considerable.

Passes much urine at night.

Google

—Clear and abundant urine.
Urine clear on passing, soon becomes cloudy.
‖Dark brown urine. θTonsillitis.
On urinating, burning in urethra.
Before urination: urgent desire to urinate.
During urination: burning in urethra.
After urination: renewed straining, with dribbling of urine.
‖Urine scanty.
—Almost complete incontinence of urine and feces.

♂ **Male Sexual Organs.** ‖‖Diminished sexual desire and ability.
‖‖Impotence.
‖‖Relaxed penis and premature emission.
Emission in an old man, followed by feeling of dryness in whole body.
‖Excessive nightly emissions.
Emission in a man, æt. 30, who never had the like.
Insufficient discharge of semen.
‖Erections only in morning before rising,
‖Erections while riding. θImpotence.
‖‖Hypertrophied prostate.
‖Increased purulent gleet.
‖Gleet, yellowish before urination; pain in fossa navicularis when pressing it and when beginning to urinate.
‖Small retracted testicles, with pulsation between shoulders. θImpotence.
‖Chronic induration of testicles.
Jerking in glans.
Numbness of genitals for several minutes.
Soreness and moist excoriation between scrotum and thighs.
Sweat about the scrotum.

♀ **Female Sexual Organs.** Catamenia scanty and of long duration.
Menses scanty, last only one day.
Before menses: toothache; swelling of cheeks and gums; pain in abdomen and back; leucorrhœa; swelling of glands; heaviness of feet.
‖Toothache; swelling of limbs.
During menses: toothache; weight over pubes; bruised pain in small of back; colic in every position.
‖Amenorrhœa; menostasia and chlorosis, especially of scrofulous girls.
Tearing in vulva, or in affected parts, so violent at intervals that she would like to scream.
Bloody, mucous leucorrhœa, with anxious palpitation of heart, pain in back; uneasiness and weakness even unto fainting.

Google

❙Leucorrhœa immediately before menses.

[25] **Voice and Larynx. Trachea and Bronchia.** ❙❙Feeling in larynx as if inspiring smoke or pitch.

❙Hoarseness and loss of voice from tough mucus in larynx and trachea.

❙Voice imperfect, aphonia; from tough mucus in fauces and larynx. θOld people.

❙Voice husky, rough. θTonsillitis.

—Voice extinct.

❙Hoarseness, with night cough.

❙Catarrh of trachea.

Spasmodic cough (like whooping cough) from roughness and tickling in throat and pit of stomach.

[26] **Respiration.** ❙Putrid breath. θSkin disease.

Short breath from fulness in chest, when ascending a height; stitches in chest on inspiring.

—Respiration gradually more and more embarrassed.

—Respiration imperfect and very frequent; respiratory sound almost inaudible.

❙Sensation as if lungs were full of smoke. θAfter pneumonia.

Oppression: with anguish; in evening, must loosen her dress; with backache; with dry cough.

—Inability to cough, to expectorate, to articulate words of more than two syllables (owing to failure in expiration) or to lift head from pillow.

—Asthma.

❙Asthma senile (after *Ant. tart.*).

❙Suffocative breathing, especially on lying down. θChronic enlargement of tonsils; with a boy, æt. 6.

❙❙Suffocative catarrh of old people, with impending paralysis of lungs.

[27] **Cough.** Spasmodic cough, excited by tickling and roughness in throat and epigastrium; worse evening until midnight, lying on l. side, active motion, ascending, stooping, in cold air; ❙❙from thinking of it; eating, after getting feet cold.

Cough in presence of strangers.

❙❙Night-cough, with asthmatic breathing.

❙Cough excited by irritation, felt in cardiac region.

Cough, particularly in evening, till midnight.

Nightly cough, chest full of phlegm.

Cough and coryza.

Cough, with purulent expectoration.

Expectoration predominant, particularly in evening.

❙Chronic cough in scrofulous children, with swollen glands and ❙❙enlarged tonsils; < after slight cold.

❙❙Mucous catarrh.

Google

‖Cough and shortness of breath, with old, phlegmatic persons; feels a tightness in throat and on chest, phlegm loose and tight by turns; > in morning, when rising, but as soon as he comes into the room down-stairs he gets a severe attack, and has to go into open air; > after breakfast; cough and rattling < when lying, except when lying on belly, which relieves; has to sit up frequently in night; < in damp weather, and after drinking cold water.

[28] **Inner Chest and Lungs.** ‖Sensation as if lungs were full of smoke; she smells pine smoke. θAfter pneumonia.

Sensation of soreness in chest, when coughing.

Vomiting from coughing.

‖Chest full of phlegm.

‖Heaviness in chest; < when lying. θCardialgia.

Sensation, as if something had dropped down in chest.

‖Pneumonia, with most violent pains in chest, and flushed cheeks; in two cases, r. side, in one, left.

Suffocative catarrh and paralysis of lungs in old people.

[29] **Heart, Pulse and Circulation.** ‖‖Palpitation; feels heart beat.

—Dull, deep sounds of the heart.

Violent, long-lasting palpitation.

‖Palpitation when lying on l. side, with soreness in region of heart; great anxiety, renewed by thinking about it.

‖Orgasm of blood, with anxiety; congestion to face, with dark redness.

‖Palpitation felt in head, with throbbing pain in temples, when getting up and walking.

‖Palpitation of chlorotic or hysteric girls.

Pulse firm and hard.

‖Pulse generally accelerated, but weak. θApoplexy. θOld age.

—Pulse 125–130, very small and frequent.

‖Full, accelerated pulse, with heat of skin. θQuinsy.

—Pulse remained pretty regular, but notably slackened, 56 instead of 70; in similar cases has been observed to fall to 25.

—Marked, but very short-lasting, irregularity of pulse, on one occasion.

[30] **Outer Chest.** ‖Chest sensitive to pressure. θCardialgia.

Burning stinging and itching in moist, pustular eruption on chest.

‖Nodes in the breast, painful to pressure, sometimes stitches; with a fat old man.

—Eruption of acne pimples on chest, which disappear in a few days.

[31] **Neck and Back.** ‖Stinging pains in neck.

Google

—Fine stitches in neck, followed by suppurating pimples.
‖Tension in neck and scapulæ; pains in loins in cold air.
‖Cramp in neck and l. side of throat.
‖Stiffness in nape of neck.
Swelling on nape of neck, which, little by little, spreads over whole head; with redness and pain of skin, as from ulceration; accompanied by considerable swelling of glands in this region.
‖Swelling of cellular tissue of neck; glands swollen; much pain in ears and head. θScarlatina.
‖‖Swelling of glands in nape of neck and occiput.
‖Chronic inflammation of cervical glands, r. side; had been very obstinate and resisted other treatment.
‖Swelling and induration of glands, especially cervical, even after suppuration had commenced.
‖‖Fatty tumors, especially about neck.
‖Sarcoma in neck, with burning.
Throbbing in back, when at rest and from emotions.
Burning in back.
‖Rheumatic irritation of spine.
In morning on rising, pain between shoulders, so that he is quite stiff therefrom and cannot turn; afterwards they extend into nape of neck and l. shoulder, where they are very violent, thence into vertex and across pectoral muscles into l. nipple.
Beating and pulsation in back.
Want of mobility in dorsal spine; when sitting long it feels as if it would fall in.
‖Stiffness in back, can hardly rise from a chair. θChronic gout.
—Spine disease with tinea capitis.
‖Painful soreness in lumbar region, followed by frequent diarrhœic stools.
‖Pain in lumbar region of spine, followed by apoplexy and paralysis.
Pain in lower vertebræ, with pain in chest.
‖‖Pain in small of back. θDiarrhœa.
Painful drawing in small of back, as if a heavy body was moving downward.
Tensive pain in small of back; < in evening; he can neither rise nor bend backward.
Stiffness in small of back, in evening, especially while sitting, which allows neither to rise nor to bend backward.
‖Itching on small of back and between nates; must scratch it raw.

[32] **Upper Limbs.** ‖A large glandular swelling in r. axilla; lately very tender, painful, hard and red.

Google

Encysted tumor in arm pit.
Pains in arms, with hard, swollen axillary glands.
Pain in deltoid muscle when raising arm.
When lying on arm it goes to sleep.
Right arm cannot be moved. θApoplexy.
—Heaviness of l. arm, it is moved with difficulty, shoulder alone seems to act; hand and forearm are paralyzed; after seven hours.
Tension in small places of arms.
Bloodboils on upper arm.
Veins and hands distended.
Hot hands; frequently dips them into cold water.
Skin of hands dry and rough.
Cold hands with blue spots. θOld age.
Fingers numb, as if asleep.
Skin of tips of fingers chapped, peels off.
Panaritium, with nightly throbbing and ulceration, from a splinter.
Warts.

[33] **Lower Limbs.** From l. foot, internal stitches through whole thigh into testes, hinders walking.
Said she had pains in thigh during sleep.
Tearing from above downward in r. buttock, periodically increasing and decreasing.
Dragging thighs, particularly when going up-stairs, on account of paralyzed feeling in middle of thigh.
Excessive bruised feeling in thighs.
Severe itching on thighs.
Sudden attacks of momentary pain of r. knee, as if parts were being ripped with a knife, making leg feel lame.
Sudden sharp pains running through knee force them to sit down, laming knee; after hard work; most with girls.
In kneeling down, violent shooting in knee, and soon after a peculiar tension in r. patella, could not walk well.
Knees totter. θApoplexy.
Burning soreness in bend of knees.
Pain in knees and legs.
Cramps in calves.
Coldness of r. foot and tension in calf during a walk in open air.
Drawing and tearing pain in legs.
Drawing pain down entire l. leg.
Pains in legs at night, as after excessive walking or dancing.
Tension as if tendons were too short; > lying down; < when standing.

Google

‖Tremor of feet while standing, must hold on to something to steady himself. θApoplexy. θSclerotis.
—Giving way of r. leg, then of l.; after eight hours.
‖Paralysis of flexors of feet, with tension in tendons.
‖Lameness of spavined horses.
‖Ulcers on feet.
Pimples on feet, which spread.
Soles feel bruised, at night, keeping one awake; > after rising and walking.
Tearing and stitching in l. big toe, with vexation
‖Painful lymphatic swelling on ball of big toe.
Corns, burning and stinging.
‖‖Fetid foot sweat.
‖‖Foot sweat, toes and soles get sore; odor offensive; (after *Silic.*).
‖‖Checked foot sweat.
‖After suppression of a fetid foot sweat by a cold foot bath, angina tonsillaris; (after *Bellad.* and *Mercur.* had no effect).

[34] **Limbs in General.** Stitches in joints, they feel relaxed.
Tearing in limbs, with chilliness.

[35] **Rest. Position. Motion.** Rest: throbbing in back.
Sitting: pain in small of back.
Standing: cough <; tension, as if tendons were too short <; tremor of feet.
Lying: heaviness in chest <; tension, as if tendons were too short, better.
Lying on l. side: cough <; palpitation worse.
Lying on belly: cough better.
Stooping: cough <; vertigo.
Raising arm: pain in deltoid.
Moving body: brain seems to move to and fro.
Active motion; cough <; chill <.
Walking: palpitation felt in head.
Ascending: short breath.

[36] **Nerves.** Nervousness; excessive irritation of all nerves.
‖Twitches and jerks of body during day.
‖At 8 A.M. sudden attack, as if circulation had stopped, and tingling in whole body, extending to tongue and finger tips, with anxiety; lasted fifteen minutes, followed by prostration.
—Indescribable malaise; after 3, 4 hours.
‖‖Weary, with sleepy eyes during whole day.
‖Heaviness of whole body.
‖Upper half of body feels numb and stiff.
‖General weakness of nerves and body.
—Increased weakness, could scarcely put out his l. arm to ring bell.

Google

Loss of strength.
—Alarming debility; after 2 hours.
—General debility; after 3 or 4 hours.
—After first vomiting, muscular relaxation affected posterior muscles of trunk; too prostrated to remain in his arm-chair, had to go to bed.
—Muscular relaxation lasted 24 hours, then gradually but quite rapidly diminished, following same course as when it came on; in less than 20 hours after first slight movements of feet and hands, he was able to hold himself in a chair and sit up in bed, and could soon take a few steps on the floor of his room.
Constantly weak and weary, wishes to lean on something, to sit or lie down, and still feels weak and weary.
Too weak even to chew her food.
Great weakness, can hardly sit up in bed; if attempted, pulse immediately becomes quick and somewhat hard, after a while imperceptible.
Great weakness of mind and body of old men.
—The general system remained feeble for more than a month; the discoloration of tissues and emaciation lasted still longer, and sleep did not become sound and refreshing until eight or ten weeks had elapsed.
Lameness after rheumatism.
Lameness after suppressing foot sweat.
Prostration, cannot stand, knees give way.
—Lies on his back in bed; deprived of voluntary motion.
General paralysis of old people; loss of memory; childishness; trembling of limbs. θAfter apoplexy.
Paralysis and palsy of aged persons.
Paralysis after apoplexy.
—The paralysis extends rapidly from above downward.
Paralysis affecting first abdominal muscles, next those which have their insertions in chest, then those of neck, and lastly sphincters of bladder and rectum.
—Death in about twelve hours after taking poison, with undisturbed intellect and without having stirred from his supine posture.

37 **Sleep.** Great drowsiness during day.
Sleepiness day and night.
Sleepy and cannot sleep; hungry and cannot eat.
—Coma. θApoplexy.
Sopor. θOld age.
Sleeplessness. θTonsillitis. θOld people. θHypochondriasis.
Awakens often at night; feels too hot; soles feel bruised.
Sleep full of internal uneasiness.
—Wants to sleep all the time, but in his sleep an inward restlessness; moaning and muttering. θApoplexy.

Google

Talking in sleep; old men.
Delirious and flighty when asleep.
Ravings of fancy at night and stupefaction.
Faint feeling at night, she had to vomit.
Twitching of muscles of whole body during sleep.
Restless whole night on account of internal heat; a child.
Night sweat.
Complains of pain in thigh during sleep.
During sleep lies on side.
On awaking, pressure in limbs; tired, weary limbs.
Feels heavy, bruised, stupid after a siesta.

[38] **Time.** Daybreak: saliva runs out of mouth, while asleep.
Morning: erections before rising; coryza <; dryness of tongue; sensation in pharynx as if a fine leaf lay before posterior nares after waking; viscid phlegm in fauces; nausea, palpitation and anxiety <; sickness; cough< on arising; pain between scapulæ; cough >.
8 A.M.: sudden attack, as if circulation had stopped.
All day: eyes look sleepy; weariness; water runs from mouth.
During day: crumbling in decayed tooth; twitches and jerks of body; great drowsiness; sleepiness; flushes of heat.
Evening: headache; face red; oppression, must loosen dress; expectoration prominent; pain in small of back <; chill alternately with heat.
Evening until midnight: spasmodic cough.
Night: in bed everything rocks within him, as in a ship; toothache <; diarrhœa; irritation of bladder; passing much urine; seminal emissions; cough <; throbbing in panaritium; pain in legs; sleepiness; awakens often; fanciful ravings and stupefaction; faint feeling, she had to vomit; restlessness; sweats; chill alternating with heat; flushes of heat; intolerable tingling over body.

[39] **Temperature and Weather.** Cold air: cough <; pain in loins; head sensitive.
Cold food: generally better.
Cold water: cough <.
Cold washing: disposed to catch cold.
Open air: headache <; tension in calf.
Damp weather: cough worse.
In sun: pain on vertex.
Near warm stove: headache worse.
Warm food: cough worse.

[40] **Fever.** Chilliness.
Tearing in limbs, with chilliness.
Local chill on upper part of body.
Chill from face or pit of stomach down body; or beginning in feet.

Google

Often as if cold water was poured over one; > from external warmth; thirst during chill.
Chill generally one (left) sided.
Chilliness relieved by external heat.
Chill increased by exercise; > in warm room.
First chill, then heat.
Chill alternating with heat; evening and night.
Cold hands and feet, with hot cheeks.
Flushes of heat, more at night, with great restlessness.
Frequent flushes during day; nightly attacks, with great anxiety and restlessness.
Heat towards evening, with little thirst; violent pulsation externally into head; on rising, vertigo, even to falling; heat the whole night, with disturbed sleep; next day violent thirst; pours down whole glasses of water; has a very thick white coating on tongue.
Hot hands, often plunges them into cold water.
Sweat increased in presence of strangers.
Heat of single outer parts.
Anxious sweat.
Offensive sweat of one (mostly left) side.
Sweat increased by eating.
Sweat returned every other evening.
Consumptive fever.

[41] **Attacks, Periodicity.** Returning at 4 P.M.: pressure in bones of occiput.
Every other evening: sweat.
Increasing and decreasing periodically.

[42] **Locality and Direction.** Right: head hot; roaring in ear; rough, dry place on cheek; teeth feel tense; stitches in tonsil; tonsil tends to suppurate; pain in groin; pneumonia; chronic inflammation of cervical glands; glandular swelling in axilla; arm cannot be moved; tearing in buttock; pain in knee; tension in patella; coldness of foot; leg gives way.
Left: cloud before eye; styes on eyelid; throbbing in ear; inflammation of subcutaneous tissue over buttock; lying on side, cough <; pneumonia; cramp in side of throat; pain in shoulder; pain in nipple; heaviness of arm; stitches in foot; pain down leg; leg gives way; stitching in great toe; offensive sweat of side.
Right to l.: sore throat symptoms move.
Above downward: tearing in r. buttock; pain in leg.
Below upward: stitches in l. foot.

[43] **Sensations.** As if head would be turned inside out; as if brain was loose; as if head were compressed in a vise; as if skull would split; as if blood could not circulate; as if something was drawn over scalp lightly; as if hair

Google

stood on end; as if white of egg had dried on face; as if face were swollen; tongue as if fuzzy; as if throat were swelling; as from blisters on side of tongue; as if a fine leaf lay before posterior nares; as of a plug in throat; as if food had to force itself over sore spot in œsophagus; as of a stone in stomach; as if thyroid was pressed in; as if air was forcing through stomach; as if intestines fell from one side to other, in turning in bed; as if inspiring smoke or pitch; as if a heavy body was moving downward in back; as if lungs were full of smoke; as of a ball in liver; as if something had dropped down in chest; as if pubes would burst; as if spine would fall in; as if ripped with a knife, r. knee; as if cold water was poured over one.

Boring: in front of r. ear.

Stitches: in side of head; burning in hollow tooth; in r. tonsil; in nodes in breast; in neck; through thigh into testes; in l. big toe; in joints; in chest.

Stinging: in throat; eruption on chest; in neck; in corns.

Pricking: headache; head and face; in skin.

Pressive sticking: in vertex.

Shooting: in knee.

Jerking: toothache; in glans penis.

Tearing: in front of r. ear; in r. buttock; in legs; in l. big toe; in limbs; in long bones; in vulva.

Drawing: in ears, and twinging toothache; in small of back; in legs.

Burning: of r. side of head; in eyes; in upper lip; stitches in hollow teeth; of tongue and tip; in anus; in urethra; eruption on chest; in back; in bend of knees; in corns; in rectum.

Smarting: in throat.

Distending pain: in head and nose.

Crumbling: in decayed tooth.

Pressure: on forehead; over eyes; in brain; under vertex; in vertex; in eyes; in throat; in stomach; on bladder; in limbs.

Aching: in r. hypochondrium; in stomach.

Concussive pain: in brain.

Soreness: in stomach; around belly; in lumbar region; around anus; in chest; bend of knees; in region of heart.

Throbbing: toothache; in ears; in temples; in back; in panaritium; in abdomen.

Beating and pulsating: in back.

Bruised pain: in small of back; in thighs; in soles.

Dull pain: in bumps of firmness and concentrativeness.

Oppressive headache: above eyes and root of nose.

Google

Cramp: in stomach; in neck and throat; in calves.
Tension: in occiput; over face, temple and scalp; in lower jaw; in teeth; in stomach; of abdomen; in neck and scapula; in small of back; in small places in arms; in r. patella; in r. calf; in legs; in long bones; in skin.
Undefined pain: in head; in articulation; on tongue; in abdomen; in small of back; between shoulders; in lower vertebræ and chest; in arms; in deltoid muscle; in thigh; in knees and legs; in r. groin; in fossa navicularis; in loins.
Heaviness: in occiput; of feet; in chest; of l. arm; of whole body.
Weight: over eyes; over pubes.
Tingling: over whole body.
Crawling: over scalp; on face; in rectum.
Paralyzed feeling: in thigh.
Numbness: in skin of forehead to root of nose; of genitals; of fingers; of upper half of body.
Tickling: in throat.
Itching: in eyes; in ears; eruption on chest; on small of back; between nates; on thighs.
Dryness: of eyes; in nose; of lips and gums; of tongue; in whole body.
Coldness: in face; of tongue; of r. foot; in region of liver.

" **Tissues.** Dwarfish, defective mental and physical growth.
Many of symptoms suggest sclerosis of brain and spine, especially in children and the aged. Compare *Baryt. mur.*
Swelling on nape of neck, which, little by little, spreads over the whole, with redness and pain of skin, as from ulceration, accompanied with considerable swelling of glands in this region for several days.
Swelling and induration of glands.
Fistulous ulcers in glands; mostly glands of neck; feeling of tension.
Adenitis.
Incipient suppuration in glands (axillary), and in cellular tissues in any part of body.
Glandular sequelæ of scarlatina.
Scrofulosis.
Tension and shortening of muscles.
Tearing and tension in long bones; boring in bones.
—Tubular bones.
—Joints.
Dropsy after scarlatina.
Emaciation, with bloated face, swelled abdomen, and difficult comprehension in children.

Google

Great emaciation in scrofulosis and skin diseases.
Atrophy, great weakness; face red and abdomen bloated; glands swollen; difficulty in learning to walk.
Atrophia scrofulosis (next to *Calc. ostr.*).
Marasmus senilis.
Induration of tissues.
Steatoma.
Sarcoma, with burning.
Fatty tumors.
Encysted tumors.
Lupoid (tuberculoid) and cystic tumors.
Cystic growths, particularly on skull.

[46] **Touch. Passive Motion. Injuries.** Touch: scalp sensitive; gums hurt; tongue burns; throat sore; abdomen sore.
Touching epigastrium: stomach aches.
Pressure: chest sensitive; nodes in breast sensitive.
Small wounds ulcerate and get very sore.

[46] **Skin.** Skin diseases.
Tension in skin.
Skin hot and dry.
—Skin cool and rather moist; or covered with profuse sweat.
Itching, pricking, burning, here and there; not relieved by scratching or rubbing.
Scratching causes pricking; pimples.
Intolerable tingling over whole body, especially in back, hips, legs, malleoli, dorsa of feet and fingers, waking him at night, and forcing him to scratch continually.
Itching, aggravated by scratching.
Itching of skin, eruption invisible.
Dry exanthemata.
Scarlatina miliaris.
Ringworms.
Soreness and humid skin.
A small wound, as from a splinter, throbs and ulcerates.
Pimples on feet suppurate and spread like ulcers.
Red, excoriated, moist, burning places between scrotum and thigh.
Skin does not heal readily.
Ulcers, with scanty discharge.
Sorenesss and moistening between scrotum and thighs.
Panaritia.
Warts.

[47] **Stages of Life, Constitution.** Hysteric persons, and such as incline to taking cold.
Suitable for affections of first childhood, but more particularly for old age, with mental or physical weakness.

Google

‖‖Is especially suitable for dwarfish women.
‖‖Complaints of dwarfish children, those who do not grow.
‖Girl, æt. 7, after crusta lactea, scurfs on throat.
‖Girl, æt. 13, little developed, scrofulous, frequent tonsillitis, each time suppurating.
‖‖Scrofulous children; dwarfish; mind and body weak; scurfs on head, ears, nose; eyes inflamed, opaque cornea; colic; abdomen swollen; face puffed; general emaciation.
‖‖Persons subject to quinsy; especially those who suffer from inflammation of throat and swelling of tonsils after the least cold.
‖Women in climacteric years, menses always scanty. θCardialgia.
‖Especially adapted to diseases of old men.
‖Drunkards' complaint from taking cold after overheating, distorted mouth; tongue paralyzed; aphonia; clear consciousness; motion of arms impaired.
—‖An old drunkard, after a cold. θApoplectic.
‖Old people weakened from bleeding. ‖Apoplexy.
‖Man, æt. 84. θApoplexy.
‖Old people, after having been feeble and tottering for a long while. θApoplexy. θParalysis.
—‖‖Old cachectic people of scrofulous habit, especially when they suffer with gouty complaints.
‖‖Old people, especially when fat.

Relations. The symptoms marked — are from *Bar. ac.*

Antidotes: *Ant. tart.*, *Bellad.*, *Camphor.*, *Dulcam.*, *Mercur.*, *Zincum.*

Useful after: *Scilla* (pneumonia notha); after *Arsen.* (scrofula).

Frequently useful before or after *Sulphur.*

Incompatible: *Calc. ostr.* (scrofulosis).

Similar to: *Alum.*, *Ant. tart.* (paralysis of lungs); *Bellad.*, *Calc. ostr.* (scrofulosis, coryza, etc.); *Calc. jod.* (large tonsils); *Caustic.* (paretic symptoms); *Chamom.*, *Cinchon.*, *Conium*, (old people); *Dulcam.* (tendency to catch cold); *Fluor. ac.* (old people); *Iodium* (glands); *Laches.*, *Lycop.* (tonsils); *Magn. carb.*, *Mercur.* (colus, glands, diarrhœa); *Natr. carb.*, *Phosphor.*, *Pulsat.*, *Sepia* (ringworms); *Silic.* (glands, foot sweat, etc.); *Sulphur.*, *Tellur.*

Google

BARYTA MURIATICA.

Chloride of Barium. $BaClA_2 2H_2O$.

Proved by Hahnemann, and published by Stapf, in 1824, in the Archives with the symptoms of the *acetica*. In 1836, for the first time, separately published in the Allentown Correspondenz-Blatt, and in the English translation of Jahr, page 84, 1838; later by Jahr in his German Manuals, and by Noak, Handbuch, vol. i, page 202, 1843; last in Allen's Encyclopedia, vol. ii, page 65, 1875.

[1] **Mind.** The locality around him seems transformed.
Children are inattentive when studying, sit in corners and give confused answers.
‖Idiocy.
‖‖In every form of mania, as soon as the sexual desire is increased.
Children do not desire to play.
Dejection and dread of men.
Sense of oppressive anxiety, accompanied by the illusory notion that he is walking on his knees, without legs.
‖‖Great anxiety, with pressure in stomach, nausea and retching; has to bend double.
: Attacks of anxiety and want of breath, so that he rolls on the ground.
‖Appears like an epileptic, with full consciousness. θInduration of pancreas.
During an attack of fear, she says in a weak, husky voice, she must die; t.
Despondent and anxious.

[2] **Sensorium.** Is easily startled.
‖Vertigo; things turn around.
Head so heavy that he cannot keep up.

[3] **Inner Head.** Headache, with angina.
Headache with the vomiting.

[4] **Outer Head.** ‖‖Tinea capitis extending to sides and posterior portion of neck.
‖Tinea, with abundant discharge of pus.
Itchlike eruption on scalp and neck.
‖The whole scalp covered by a thick, offensive crust. θScrofulous ulcers.

[5] **Sight and Eyes.** ‖Shuns light, child lies all the time on its face. θScrofulous ulcers.
Pupils dilated and immovable.

Google

Albuginea injected.
‖‖Eyeballs much inflamed. θScrofulous ulcers.
Eyes stiff, cannot move them.
‖Lids on both eyes swollen and inflamed. θScrofulous ulcers.
‖‖Ophthalmia scrofulosis.
‖Staphyloma spurium with a boy, æt. 9, on inner edge of l. cornea.
‖Hernia tunicæ humoris aquei.

[6] **Hearing and Ears.** Deaf, with vomiting; headache; burning in stomach and convulsions.
‖Ears pain. θAngina.
Earache r. side; < lying on painful side; > sipping cold water.
‖Catarrh of ears.
‖Discharge from both ears of an odor like rotten cheese.
‖Otorrhœa after frequent otitis.
‖Postscarlatinal otorrhœa.
‖Profuse purulent otorrhœa of five years' standing,
‖Otorrhœa on both sides, offensive discharge. θGlandular swelling.
‖Abscess behind both ears, discharging offensive pus. θScrofulous ulcers.
‖Parotis on r. side swollen, with a swelling of submaxillary and cervical glands.
‖Both parotids, most r. side, swell after scarlatina.
‖Parotis swollen hard, not very painful, but extending to edge of lower maxilla.

[7] **Smell and Nose.** Sneezing in sleep, four, five times before midnight, not wakening; a boy.
‖Catarrh of nose.
Coryza, with fever heat.
Broad, red nodule on side of point of nose; biting, tickling soreness and with fine stitches in it when touched.

[8] **Upper Face.** Red face, with fever heat.
Tension in whole face, with nausea and diarrhœa.
Drawing and spasmodic contraction of facial muscles.

[9] **Lower Face.** ‖‖Enlarged, indurated and painful submaxillary glands. θOtorrhœa.

[10] **Teeth and Gums.** After fine stitching a pulselike jerking and throbbing toothache; < after midnight; < after sleep; is compelled to sit up in bed.
Looseness of teeth, with salivation.

[11] **Taste and Tongue.** Putrid taste in mouth, even food has a putrid taste; tongue and mouth dry.
‖Tongue furred. θGlandular swelling.
‖Tongue covered with mucus.

[12] **Inner Mouth.** Stench from mouth, like after mercury.

Google

‖Great salivation. θAngina.
Saliva runs out of mouth in large quantities, with every paroxysm. θInduration of pancreas.
πSalivation, with looseness of teeth, swelling of salivary glands and palate, odor like from mercurialism.
Swelling of salivary glands.

[13] **Throat.** Palate swollen. See 12.
‖‖Elongation of uvula, with hyperæmia and blennorrhœa. θAngina tonsillaris.
‖Inner throat hyperæmic and blennorrhœic.
‖Varicose veins in throat.
Pharynx and œsophagus inflamed; t.
Difficult swallowing.
‖Catarrh extends over tonsils, epiglottis, glottis, into tubes. θAngina tonsillaris.
‖‖Angina tonsillaris, with suppuration, after every cold, with variola or varioloid.
‖Severe pain in r. side of throat and ear; saliva ran from mouth in large quantities; fauces, especially on r. side, of a deep red color; tonsils but little swollen. θAngina.
‖In a girl, both tonsils enlarged; chills and heat alternately with general malaise, headache, thirst, etc.; pulse 120; deglutition painful on r. side, extending to ear; tonsil red. θChronic hypertrophy of tonsils.
‖‖Disposition to tonsillitis, with suppuration each time after taking cold.
‖Chronic scrofulous enlargement and induration of tonsils.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Increased appetite.
‖Appetite diminished. θGlandular swelling.
‖Desire for dry wheat bread. ‖Glandular swelling.
Much thirst, with a dry tongue.
‖Thirst; chill and fever alternately. θAngina.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea and sickness.
Retching.
‖Nausea, with vomiting and violent colic. θHydrops.
Nausea, retching; slimy, watery vomiting; t.
‖Nausea, vomiting, with worms and colic. θAfter scarlatina.
Hæmatemesis.
πVomiting every morning after taking it.
Violent vomiting and purging, with anxiety.
During six hours he vomits small quantities of a disgusting matter, looking and tasting bad.

[17] **Scrobiculum and Stomach.** Oversensitiveness of stomach.
Stomach feels heavy; a pressure in stomach, most after eating solid food.
Cramps in stomach.

Google

‖‖Great indigestion.
Warm sensation rises up to chest and head.
‖Inflammation of stomach.
The fundus inflamed and several ecchymoses; t.
The mucous membrane blue red, with red spots in muscular coat; t.
External coat of stomach dark brown and inflamed.
‖Below stomach to l. side a hardness, from which paroxysms of want of breath originate. θInduration of pancreas.
‖Considerable hardness in region of stomach.
Cardia, pylorus, duodenum inflamed, dark red, highly congested; t.

[18] **Hypochondria.** Liver and spleen full of thick black blood; gall-bladder filled with pale yellow, watery bile; t.
‖Tumefaction of liver.

[19] **Abdomen.** Colic; burning pains.
‖Pain in region of navel; < in morning; dry cough; great appetite; slime-covered tongue. θAscarides.
Borborygmus.
‖Distressing throbbing in a tumor inside of abdomen. θAbdominal aneurism.
‖Abdomen much swollen. θScrofulous ulcers.
‖Abdomen distended. θGlandular swelling.
Swelling and induration of abdominal glands.
‖Swelling of abdomen and lower limbs. θAfter scarlatina.
‖Abdomen distended and hard. θScrofulosis glandulosa.
Ecchymoses in colon; t.
Omenta reddened; t.
Inguinal glands swollen and painful.
Fetid, ichorous ulcers in inguinal region.
: Worm diseases.

[20] **Stool and Rectum.** ‖Obstinate constipation.
Stool covered with mucus.
‖Stools of a jellylike appearance, with blood, no pain at all, discharges every 15 or 20 minutes. θDysentery.
‖Bloody, mucous stools, without much pain, several times a day; child. θDysentery.
Chronic, painless diarrhœa, yellow, slimy stools; vomiting and exhaustion.
‖Colic and several stools; boy, æt. 9.
Stools green and chopped.
‖Thin, watery, very fetid stools. θScrofulous ulcers.
Bleeding from intestinal canal.
Paralysis of sphincter ani.
‖Stool only after injections, excrement white and hard as stones. θScrofulous glands.
=Passage of ascarides and slime.

Google

[21] **Urinary Organs.** ‖Cystitis.
Frequent urination.
πContinual violent urging to urinate; sometimes involuntary.
‖Urine yellowish, of a very offensive odor. θGlandular swelling.
πFrequent urination, whitish sediment.
‖Urine yellowish, of great stench. θScrofulous glands.

[22] **Male Sexual Organs.** ‖Sexual desire. See 1.
πNightly pollutions.
‖Gonorrhœa and gleet.
‖Hypertrophied testicle after suppressed gonorrhœa.
‖Testicles increased in size, hard and painful stitches; for nine years.
‖Swelling of testicles and scrotum, painless. θAfter a contusion while riding on horseback.
‖Buboes after suppressed gonorrhœa.

[23] **Female Sexual Organs.** ‖Sterility.
‖Leucorrhœa.
‖Induration, tumor, or atrophy of ovaries.
‖Nymphomania.
Squeezing pains in pelvis.

[25] **Voice and Larynx. Trachea and Bronchia.** Weak, husky voice.

[26] **Respiration.** ‖‖Attacks of anxious dyspnœa; rolls on floor, several attacks a day, also in night. θEpilepsy, with full consciousness.
Dyspnœa and oppression.
‖Has to sit up, head bent forward; slime and saliva runs from mouth, without cough. θInduration of pancreas.

[27] **Cough.** ‖Dry cough.
‖‖Chronic cough of scrofulous children.

[28] **Inner Chest and Lungs.** Inward heat in upper chest.
‖‖Blennorrhœa of lungs with scrofula.
‖Phthisis scrofulosa, with herpetic eruption and indurated testicle.

[29] **Heart, Pulse and Circulation.** Palpitation.
‖Pulse 120. θAngina.
‖Abdominal aneurism.

[31] **Neck and Back.** Myelitis.
‖Beginning struma; child, æt. 6 months, breathing with a rattle.
‖The whole neck and throat full of hard glandular swellings, size of eggs.
‖‖Enlargement and induration of cervical glands. θOtorrhœa.
‖Submaxillary and cervical glands swollen to size of pigeon eggs, two like hen's eggs, very hard, and painful on slight pressure. θSwelling of parotis.

Google

‖Two cervical glands swollen and fluctuating. θSwelling of parotids.
‖Vertebræ 7 and 8 are protruding, forming a hump. θGlandular swelling, scrofula.
‖Tinea from scalp to neck.

[32] **Upper Limbs.** Painless jerking in arms, principally at night.
Eruption like millet seed on hands.

[33] **Lower Limbs.** Tension in thighs.
Emaciation of thighs.
‖When kneeling, a violent stitch, followed by a peculiar tension in r. patella, making it difficult to walk. θHemorrhagic extravasation of knee.
‖Tension and increased warmth in knee. θSwelling of knee.
Fine stinging in and around swollen knee.
‖A globular swelling on tip of r. knee, increasing quickly but without much pain. θHemorrhagic swelling of knee.
‖A round, sharply defined swelling, size of a goose egg, of a dark color and clearly fluctuating, surrounded by bluish-red spots, not disappearing on pressure, with a greenish-yellow halo. θHemorrhagic extravasation.
‖Hemorrhagic extravasation in bursa patellæ.
‖After checking foot sweat. θTonsillitis.
‖Feet swollen. θGlandular swelling.
Cramps in toes.

[34] **Limbs in General.** Trembling of limbs.
Convulsive jerkings of hands and feet.
‖Paralysis of upper and lower limbs.
Swelling of hands and feet.

[35] **Rest. Position. Motion.** Lying on painful side: earache worse.
Has to sit up, head bent forward: breathing >. θInduration of pancreas.
When kneeling: violent stitch in r. patella.
‖Neither motion nor pressure is painful. θGonitis.

[36] **Nerves.** Convulsive tremor and twitches.
Convulsions, accompanied by shocks which shake whole body.
Periodical attacks of convulsions, with excessive jactitation of limbs.
Heaviness and prostration, must lie down.
Prostration, can scarcely move a limb.
Paralysis.
‖Paralysis of left side, with aphasia.
General muscular weakness.
‖General malaise. θAngina.
Faintings.

Google

[37] **Sleep.** Sneezing in sleep not wakening.
After sleep toothache worse.

[38] **Time.** Morning: pain in region of navel worse.
Day: attacks of dyspnœa; dry heat.
Evening: chill, with thirst.
Night: pollutions; dyspnœa; painless jerking in arms.
Before midnight: sneezing in sleep.
After midnight: toothache.

[39] **Temperature and Weather.** Sipping cold water: earache better.
‖Spring and Fall attacks of angina tonsillaris.

[40] **Fever.** Fever: thirst; loss of appetite; dry mouth and tongue; dysphagia; frequent, full pulse; flushed face; prostration generally lasting seven days, occasionally accompanied by catarrh of eye, ear or nose, or inflammatory action of skin.
Chill with thirst in evening; loss of appetite and vomiting.
Dry heat all day; pulse excitable; head affected.
During fever increased suppuration of ulcers with boys, and enlargement of swollen cervical glands with girls.
Heat, with coryza.
πAll day dry heat; pulse irritated; head affected.
Discoloring sweat.
Cold sweat.
‖Tertian intermittent.
‖Chills with heat, alternately with angina tonsillaris.

[42] **Locality and Direction.** Right: earache; parotids; pain side of throat and ear; fauces of side deep red color; deglutition painful on side; stitch in patella; globular swelling tip of knee.
Left: staphyloma on inner edge of cornea; below stomach to side a hardness from which paroxysms of want of breath originate; paralysis of side.
Below upward: burning.

[43] **Sensations.** Stitches: in nodule on nose; in teeth; in testicles; in r. patella.
Stinging: in and around knee.
Jerking: in teeth; in arms.
Drawing: in facial muscles.
Biting: in nodule on nose; in skin.
Burning: in stomach.
Pressure: in stomach.
Soreness: in nodule on nose.
Squeezing pains: in pelvis.
Cramps: in stomach; in toes.
Undefined pain: in ears; in r. side of throat and ear; in region of navel.
Throbbing: toothache; in tumor in abdomen.

Google

Tension: in face; in thigh; in r. patella: in knee.
Tickling: in nodule on nose.
Warmth: rises to chest and head.

41 **Tissues.** Increased irritability of nerves.
❙Varicose veins. θAngina tonsillaris.
❙❙Affection of lymphatic vessels and glands in scrofula.
❙Hydrops after scarlatina.
❙❙Painful glandular swellings and indurations of scrofulous people.
❙Adenitis.
❙Catarrhal affections.
❙Pale and emaciated. θDysentery.
❙Emaciation. θSwelling of cervical glands.

45 **Touch. Passive Motion. Injuries.** Pressure: submaxillary and cervical glands <; no effect on swollen knee.
❙Swelling of testicle and scrotum from bruising, caused by riding horseback.
Touch: stitches in nodule side of nose.

46 **Skin.** Biting sensation in skin.
Spasmodic contraction of skin.
❙Skin not reddened, not warmer than usual. θSwelling of parotis.
Inflammation of skin.
❙Itchlike pimples on head, nape of neck, abdomen and thighs.
❙Yellowish, scaly eruptions.
❙Herpes on various parts. θHypertrophy of testicle.
❙Herpes favinosus all over body, face excepted.
❙Tetters.
❙❙Scrofulous eruptions.
Fetid ichorous ulcers in inguinal region.
❙Whole body covered with ulcers. θScrofula.
❙Complaints after scarlet fever.

47 **Stages of Life, Constitution.** ❙❙Scrofulous children. See 13, 27, 31.
❙Child, æt. 18 months. θDysentery after humid tetter.
❙Girl, æt. 18 months. θScrofulous ulcers.
❙Boy, æt. 2, scrofulous, emaciated. θIndurated cervical glands.
❙Boy, æt. 4, three weeks after scarlatina. θSwelling of parotis.
❙Blonde, blue-eyed girl. θEarache.
❙Scrofulous child, æt. 10, since five years otorrhœa and glandular swellings, cured by one dose daily for two weeks.
❙Girl, æt. 39. θHemorrhagic extravasation of knee.
❙Man, æt. 50, strong constitution, inclined to catarrhal affections, and great disposition to angina tonsillaris.

Google

‖Woman, æt. 53, small, weakly, poorly fed. θParotid swelling.

‖Woman, æt. 65, after five months absolute rest and strict diet having been useless, ⅛ grain in distilled water, three times daily, for several weeks. θAbdominal aneurism.

" **Relations.** Absinthe antidotes the vomiting.
Useful after *Arnic.* in extravasations of blood.
Similar to *Conium* in indurations of abdominal glands.

BELLADONNA.

Deadly Nightshade. *Solanaceæ.*

One of the first of all medicines Hahnemann experimented with, and the one which led him in 1800 to the discovery, greater than any other ever made in the domain of science, that *the life-altering influence of drugs and poisons* is not like the chemical or physical, depending on the masses, but solely on the surface. This has now been mathematically proved, and we have a full right to laugh at the stupid stubborn who doubt it. In 1805, *Fragm. de vir. med. posit*, Hahnemann published of his own observations 103 numbers, of others 312; in 1811 Reine Arzneimittellehre, vol. i, as the first; of his own observations 176, of others 474; in 1829 R. Aml., vol. i, second edition, his own 380, of others and his disciples, Hornburg, E. Kummer, Herrmann, E. Stapf, W. Gross, F. Hartmann, C. F. Langhammer, Rückert, J. E. A. Baehr, H. Lehmann, A. F. Möchel, 1042 symptoms—in all, 1422 numbers; in 1830 the third and last edition, Hahnemann had three more provers, and in all 1440 numbers, many had been contracted and several numbers united into one; in 1875 Allen has included, besides the 85 authorities of Hahnemann, in all 241, and gives, without any concentration, 2544 symptoms without a cured one. By the aid of at least 1455 cured symptoms we have been enabled to shorten the whole catalogue to somewhat less than 4000. The next following theme will be the separation of the symptoms obtained from berries, leaves and root, as far as it can be done.

' **Mind.** The patient is conscious but tormented by terrible anxiety.

‖Loss of consciousness.

‖Stupefaction, with congestion to head, pupils enlarged; delirium.

‖Memory lively; remembers things long gone by.

‖Memory impaired; forgets in a moment what he was about to do.

‖Absent-minded and forgetful.

Likes to brood in silence, supreme indifference, nothing makes an impression.

Google

‖Paroxysm of cerebral exaltation with abundance of ideas and images, generally fantastic and incoherent.
Mental confusion.
Confusion of head, aggravated by movement.
‖Her mind was disordered so that speech did not correspond to thought, nor thought to sense, nor sense to objects present.
Merry craziness; while laughing or singing she constantly touches things around her.
‖Timorous insanity; he is afraid of an imaginary black dog; of the gallows, etc.
‖Insanity; they stripped themselves and clad only in their shirts ran out into streets in broad daylight, gesticulating, dancing, laughing and utterring and doing many absurd things.
πBecame crazy; got one leg over the window to kill himself, had to be tied down; died next day; within ten hours, two doses. θConsumption.
Imbecility.
Fantastic illusions (when closing eyes).
‖When closing eyes, though not asleep, patient sees fierce, wicked looking large animals with horns and bushy heads; room seemed to be full of strange men passing in and out, who would snatch at her as they passed, which frightened her very much, she thought the men wanted to take her away from home; she then saw children sitting on low benches in rows as in a school-room.
‖Hallucinations, and illusions of senses.
‖‖Imagines he sees ghosts, hideous faces and various insects.
‖‖Fear of imaginary things, wants to run away from them.
Frightful visions; she wishes to hide herself.
He is afraid of an extraordinary black dog, the gallows, etc.; he sees ghosts and insects; gets vexed easily, and then weeps; he tears things around him, bites and strikes, and when restrained, spits at those around him, strikes himself, curses and uses horrible words. (These symptoms of rage much resemble those of *Stramon.* and *Hyosc.*).
Fixed ideas, thinks he is riding on an ox, uses a stick for a gun, growling and barking like a dog.
‖‖Delirium.
‖Lethargy and delirium, with pain in head. θOn disappearance of tumor.
Delirious moaning, flushed face, hot head.
‖‖Delirium and heat.

Google

Rambling delirium.
Delirium: with frightful figures and images before eyes; is afraid of imaginary things; sees monsters; talks of dogs as if they swarmed about him; furious.
Violent delirium; broke into fits of laughter, then gnashed teeth; disposed to bite and strike those around.
Delirium; the boy jumped out of bed, talked a great deal, was lively and often laughed; consciousness was entirely gone; he did not recognize his parents.
In evening he was seized with such violent delirium that it required three men to confine him; his face was livid; his eyes injected and protruding, pupils strongly dilated; carotid arteries pulsating most violently; a full, hard pulse, with loss of power to swallow.
Delirium,, either continuous or recurring in paroxysms, mirthful at first, but subsequently changing to frenzy.
Excited and delirious, with violent motions of arms and legs, increasing to a raging delirium.
Furious delirium all night with pleasant hallucinations, followed by great prostration, and mental confusion.
Bites at his attendants and himself, screams furiously. θA boy, æt. 3.
Mania, with desire to bite, strike and run away.
Highest degree of mania, complete restlessness; he jumps on chairs, tables and stove.
The paroxysms of madness were occasionally interrupted by loud laughing and grinding of teeth; head was hot, face red, look wild and staring; pulse small and very frequent; pupils dilated; arteries of head and neck visibly palpitating, pulse hard and frequent.
Mania, at one time merry, again would spit and bite at those around.
Epilepsy and mania furibunda.
Rage, madness, disposition to bite, to spit, to strike and to tear things.
Fury, with grinding of teeth and convulsions.
Fury; they pulled at the hair of bystanders.
Such fury (with burning heat of body, and open, staring and immovable eyes) that she had to be held constantly, lest she should attack some one; and when thus held so that she could not move, she spat continuously at those around her.
Desire to escape or hide herself.
Jumping out of bed with fear, trying to run away and hide.
She rather desires death than fears it.
She sought continually to spring out of bed.

Google

‖‖Inclination to bite those around him and to tear everything about him in pieces.
She wishes to strike, bite and quarrel.
‖Weary of life, with desire to drown herself.
Desires light, but shuns company.
Loquacity.
‖Speech rapid and hasty; they often utter inarticulate, confused sounds.
Great loquacity, foolish talk, laughs without any cause.
Talkative, then again mute.
‖Delirious, obscene talking.
‖Garrulity; he constantly uses foolish and absurd language, at which he often laughs aloud; when addressed he turns towards speaker, but does not answer correspondingly.
‖She talks like a maniac, with staring, protruded eyes.
Loud laughter, wild abandon, singing, whistling, lascivious conversation.
‖Changes from quiet to gay and merry mood, in which trills and sings ditties; great thirst, violent motion of arms.
‖‖Moaning.
‖Much moaning, distress, a sudden crying out. θRetention of urine.
Weeping and screaming, made < by gentle comforting.
‖She was violently delirious, screamed and wept aloud, and was unmanageable, suffered greatest anxiety and despaired of recovery.
The child cries out suddenly, and after awhile it ceases crying as suddenly as it began, and appears as if nothing had been the matter.
Crying and howling of children, as from rage.
‖‖Instead of eating, bit wooden spoon in two, gnawed plate, and growled and barked like a dog.
‖The boy was quite beside himself, struck at his mother, bit her, made terrible grimaces and contortions of limbs, did not remain a moment in one place.
‖She attempted to bite and strike her attendants, broke into fits of laughter, and gnashed her teeth; head hot, face red, looks wild and fierce.
‖She tears her night dress and bedclothes.
Picking at bedclothes as if looking for something lost, with confused muttering.
In his delirium he picked at bedclothes, and threw them off, and sought continually to spring out of bed.
Foolish, ludicrous antics and gestures; they touch everything within their reach; foolish laughing, excessive sensibility.

Google

Became wantonly merry, ran from house, and exposed their nakedness.
They behaved like drunken people.
Both children played with each other at hide and seek, calling each other in their sleep.
The boy ran around room laughing immoderately, desired neither food nor drink; a piece of bread, which he took to be a stone, he threw far from him; his delirium was always merry, he became totally unconscious; pulse very slow, full; pupils widely dilated, not sensitive to light, abdomen somewhat distended.
Dancing, running and creeping about in shirt.
The child became flushed, wanted to escape, struck at people, became delirious and restless.
She turns about in her bed in a perfect rage.
In his delirium he threw himself down from a height.
Nearly all symptoms lead to violence of action; patient must do everything violently; she wishes those around her to kill her.
Sensation of floating or gliding along, as if in a boat; as if the body, or a part of it was greatly enlarged.
Aversion to noise and company.
Aversion to all mental occupation; indolence.
Hands constantly in motion, try to catch things in air.
She will sit and break pins into pieces, half a day at a time.
She feels of those around her; at times she seats herself; at times she acts as if she was washing, or as if she counted money, or as if she was drinking; she mutters as if asleep; she talks like a maniac, with staring, protruded eyes; talks about dogs that swarm around her; converses with a late sister in a churchyard; beautiful images present themselves to her as if by a charm.
Disinclination to talk, or very fast talking.
Very mirthful mood, singing and whistling; frequent laughter.
Depression, or too great hilarity.
Sadness and dejection; patients are indifferent to everything, seek solitude, and desire rest.
Melancholy; hypochondriasis; hopelessness.
She is very despondent.
Tremulous despondency.
Great distress, with inquietude.
Despair.
Hysteria, with melancholic mood.
Became fearful when persons approached him in street, and when they had passed, he insisted on it that he had stabbed them.

Google

Starts in affright at approach of others.
Fear of imaginary things, wants to run away from them.
Cardiac anxiety, with anguish and restlessness.
Anxiety and fear of imaginary objects and hallucinations, ghosts, soldiers which come to take them away, black animals, rats, dogs, wolves, etc.
Anxiety, restlessness, nausea and pain in back, with wind colic.
Anxiety, anguish, trembling, constant restlessness.
By day great anxiety; she has no peace anywhere; it seemed to her as if she must fly away.
Anxious and confused, fears she is about to die.
Tremulous, anxious, nervous.
Anxious and timorous.
Nervous anxiety, restlessness, desire to escape.
Anxiety, followed by sweat.
Intolerable anguish during time she is free from rage, with desire to die.
Loss of courage.
Very sensitive, irritable mood.
Very excitable mood, easily brought to tears.
Weeping, irritable mood.
Fretfulness; nothing seemed right to him; was vexed with himself.
Weeping and vexation about trifles, with headache and pressure in forehead, and great dryness of mouth.
Morose and serious.
Anger, proceeding even to paroxysms of convulsive rage.
Quarrelsome, during exuberant mirth.
Quarrelsomeness, cannot be quieted, with disposition to violent rage.
Great inquietude, goes from place to place.
Great restlessness and indescribable anxiety, cannot sit or lie long in any position; they seek to fly.
Mania: with intense craving for snuff; voracious appetite, they swallow everything in their reach; generally constipated; wild, unsteady look, eyes brilliant, face flushed, breathing anxious, irregular; sexual excitement, inclined to masturbate; sleepless and restless.
Stupefying headache.

[2] **Sensorium.** All senses more acute.
Great irritability and impressionableness of senses; he tastes and smells everything more acutely; sense of taste, of sight and of hearing is keener, and the mind is more easily moved, and thoughts more active.
Excessive nervous excitability, with exalted sensibility of all organs; least noise, least light is annoying.
His senses deceive him.

Google

Cloudiness or dulness as if drunken.
Feeling of drunkenness, with reeling.
Bewildered feeling in head.
Painful dulness of head.
Dulness and dazed feeling, < by moving head, still more by walking.
The whole head is muddled.
Weariness of head.
Heaviness of head, seems about to fall asleep.
Blood mounts to head, which becomes heavy as if giddy.
Weight in head as if he would fall.
Dizziness, with sensation as if a board was before her forehead, falling to l. or backward.
Vertigo, it appears to him as if objects around him swayed to and fro.
Vertigo, as if she was being rocked.
When in act of lying down, it seems as if bed was bouncing patient up and down.
Vertigo, as if everything turned around in a circle.
Vertigo increased on every movement of body.
Vertigo when stooping, or when rising after stooping.
Vertigo, mostly at night on turning over in bed, or when getting up in morning, also when walking, and on every change of position.
Giddiness, with falling and loss of consciousness.
Throbbing in head, buzzing in ears, dimness of vision, flushed face, anxiety and nausea, even vomiting.
Vertigo with rush of blood to head, roaring in ears, and slight mistiness of vision.
Vertigo with dimness of vision, vanishing of sight or flickering before eyes.
Vertigo with perceptible pulsations in head, dilated pupils, with nausea.
Vertigo with tired feeling before and after attack.
Vertigo, then headache, then falling.

[5] **Inner Head.** Frontal headache.

Pressive headache, especially in forehead.
Headache as if a stone was pressing forehead, > by laying head down, and stooping, with dilated pupils and whining ill humor after trifles.
Painful pressure in head, especially in lower part of forehead, directly above nose, intolerable on stooping or reading.
Sensation as if brain was pressed to forehead, which disappeared directly on bending head backward.
Pain in stooping forward, as if everything would issue at forehead.
Headache as if brain would be pressed out, in forehead,

Google

just above orbits, which prevents eyes being opened, and obliges him to lie down.

Tensive pressure in r. side of forehead.

Pressive frontal headache so severe, when walking, that eyes were drawn shut; > when sitting, ceases when lying down, < rising again or going into open air.

Severe shooting in r. frontal eminence, < from bending forward, > by pressure.

Pain ameliorated by strong pressure on forehead.

Boring pain under r. frontal eminence, early in morning soon after waking.

Aching in forehead, during motion it increases so much as to cause eyes to be closed.

Violent frontal headache, with heat and redness of face and throbbing carotids; occasionally nausea.

Soreness in sinciput, stiffness in occiput.

Headache above orbits, as if brain was compressed, so that he was obliged to close his eyes.

She is very much troubled with throbbing headache, particularly over eyes.

One-sided pressure, or tensive pain moving from temple or forehead to orbit, spreading from there to entire half of brain, < by motion of head and eyes from rays of light and from slightest noise.

Pain in head and eyeballs, eyes felt as if starting from their sockets.

Violent headache, chiefly in orbital region, with redness of eyes and face.

Headache < by moving eyes, by looking down and reading.

A drawing down in temples and in r. orbit.

Half-sided headache extending into orbits and bones of nose, with a pressing, bursting, wavelike sensation.

Fulness and pressure at temples and forehead, with pain, making him restless and uneasy.

Violent shooting pain in r. temple.

The pains are tearing, drawing, begin in r. temple, spread over orbit to r. cheek, and are < by slightest motion.

Pressive pain in r. temporal region, which on supporting head with hand increases to a sense of bursting and extends into r. frontal eminence.

Dull shooting in l. temple, from in out.

Stabbing, as with a knife, from one temple to the other.

Sharp cutting pain in r. side of head, from frontal to occipital region, becoming general, and at last settling in l. parietal bone.

Boring, tearing, cutting, shooting pains in various parts of head, generally < on r. side and in forehead, less in occiput.

Google

Dull pressive pain on one or other side of head.
Violent throbbing in brain, from behind forward and towards both sides; throbbing ends on surface in painful shootings.
Tensive pressure in l. vertex and in forehead.
Tearing pain in r. vertex.
!Three violent stabs through head from forehead to occiput, whereupon all previous headache suddenly disappears.
!Sensation of heaviness in head, with pressure in occiput, or pressing sensation in brain towards temples, with dimness of vision and dulness of hearing.
!Incessant, dull, pressive pain on one or other side of head.
!Pressure in head, now here, now there, which occupies each time larger areas.
!Violent pressing in whole head, from within outward, as if it would burst.
Continuous and forcible distension of whole brain; headache close above orbits, as though brain was pressed out; eyes remain forcibly closed, on account of pain, pupils being contracted to highest degree, and voice scarcely audible.
!Headache, as if sutures of skull were being torn open, and as if a lever was being applied, whereby head was forced asunder.
!Incessant drawing and expansive pain in head, as if something in it rocked and swayed in a jerking manner.
!Headache in vertex, a kind of twisting, sometimes also digging, sometimes tearing, becomes much more violent on external pressure; skull seemed to be quite thin, as if it could be pressed through.
Stitches and tearing in head.
Boring, tearing, cutting, shooting pains in various parts of head, generally < on r. side and in forehead, less in occiput.
!Stabbing through head, as if with a double-edged knife, in evening.
!Stabbings in r. side of head, as if with a two-edged knife, which next are felt in front of head, then in vertex, then in occiput, so that she cannot lie on either side.
Swashing in head as if full of water.
Sensation as if brain was shaken in skull.
!Feeling in brain like swashing of water.
!Gouty headache, most half-sided; flying stitches, felt very deep, sometimes commencing like a blow on a part of head, passing over into a long and very painful stitch, drawing through whole half of head and lasting some minutes, often with loss of consciousness.

Google

Pains come on suddenly, last indefinitely, but cease suddenly.
Hysterical headache.
Hemicrania; migraine.
Very intense headache.
Headache makes him first blind, then unconscious.
Headache increases at night, makes him crazy, he has to run up and down, and often falls.
Attacks of headache, accompanied by pain in small of back; cold feet; difficulty in swallowing; nausea and vomiting; frequent urination; oppression of chest; stiff neck; irritable mood, and tired feeling in limbs.
Headache with desire for lemonade.
Headache with sleepiness, but cannot sleep.
Pains in head < by noise, light, motion, when moving eyes, by shocks, contact, least jar, from least exertion, and in open air.
Headache from heat of sun.
Headache > during menses, from pressure, tight bandaging and wrapping up, but < from warmth.
In open air sensation of bursting in head is very violent, and he is afraid to cough on account of increase of pain.
Pressure deep in brain over whole head, during and after walking in open air.
Jerking headache, extremely violent on walking quickly, or ascending stairs rapidly; at every step a jolt as if a weight was in occiput.
He was frequently obliged to stand still in walking, from violence of pain in forehead; at every step it recurred, as though brain rose and fell in forehead; pain > by pressing strongly on part.
Head > from looking up and bending head back.
Pain decreased by strongly pressing parts.
Headache < when leaning forward, > when bending backward.
Headache with dizziness, aggravated by stooping.
Pressure deep in brain, over whole head, after stooping.
After waking, throbbing in head.
Headache generally comes in morning after a restless night.
Headache from abuse of coffee, from overheating and from cold.
Congestion to brain.
Fulness and heaviness of head.
There is a general tendency of blood to head, with redness of eyes and face, which is still more developed i spasmodic attacks.
Rush of blood to head; pulsation of cerebral arteries and a throbbing in interior of head.

Google

‖The feeling in head was that of violent congestion, a full, tense and throbbing state of cerebral vessels, incidentally same sensation as would be produced by a ligature thrown round neck and impeding return of venous circulation.

Congestion to head; dry heat; red face; sleeplessness, or soporous condition, with starting, or crying out.

‖‖Congestion to head, with delirium. #Typhus.

‖Strong rush of blood to head, with beating in temples and burning in eyes.

‖Congestion of blood to head, with danger of apoplexy.

Cold sensation in brain at middle of forehead.

‖Much heat in head.

Annoying pulsation of arteries of brain when lying.

‖Strong pulsation of bloodvessels of forehead, and pain as if bones were lifted up.

‖Pulsating headache, with pressure at vertex.

‖‖Inflammation of base of brain and medulla from exposure to sun after having hair cut.

‖‖Meningitis and encephalitis, first stage; throbbing carotids; hot head; flushed face; glistening eyes; nausea; thirst; scanty urine; no stool; sudden starting; dry heat; frequent full pulse; drowsiness; boring head into pillow, etc.

‖Encephalæmia; ‖hyperæmia from active congestion.

‖Hydrocephalus acutus, with boring head into pillows.

‖‖Apoplexy; flushed, hot, bloated face; dilated pupils; a fixed, threatening look; nausea; staggering; drowsiness; stertorous breathing during sleep; grinding teeth; on waking throbbing in head; prodroma are tired feeling in limbs, lethargy and aversion to occupation, weak memory, stiffness of tongue, etc.

Suitable for plethoric individuals disposed to phlegmonous inflammations; or for lymphatic, scrofulous persons, liable to glandular swellings.

Outer Head. Gnawing at frontal eminences.

Sensation as if skull was as thin as paper.

As if skull was transparent.

‖Drawing pains in frontal bone and in nape of neck, both when at rest and during motion.

‖Headache with not only visible but audible pulsation.

‖Head hot; feet cold; rolls head. #Cholera infantum.

‖Hot head, sensitive to touch.

Convulsive shaking and bending backward of head.

‖‖Boring of head into pillow.

Numbness in temples.

Contractive pain in scalp.

Painful swelling and redness of head.

Google

Crampy pain in frontal eminence, extending to zygoma and lower jaw.
‖Great swelling of head with redness over whole body.
‖Head swollen to double its size.
Sensation externally, as if muscles of forehead and eyes were contracted.
‖‖Takes cold in every draught of air, especially when uncovering head; complaints from cutting hair.
‖Head externally so sensitive, that least contact, even pressure of hair, gives pain.
‖Inclination to lean head against something cold and hard.
‖Headache > if hair hangs loosely, < if it is "put up."
The hair, which had been electric, ceased to be so.
Children tear their hair.

[5] **Sight and Eyes.** Flightiness as soon as eyes are closed.
‖Visions on closing eyes.
‖On closing eyes for sleep a sudden shock runs through body from below up.
‖Looking at shining or glistening objects aggravates.
‖Pressive pain deep in ball when she closes eyes; feeling as if eyes protruded.
‖Oversensitiveness of sight.
‖Sensitiveness of eyes, she cannot bear light.
‖‖Intolerance of light.
Convulsive movements of eyeball in light, with terrible pressive pain extending through whole head; > in a dark room.
Inclined to remain in a dark room.
‖‖Photophobia; < from artificial light.
Desire for light.
Halo around light, particolored, red predominating; at times light seems broken into rays.
‖Chromopsia.
Everything he looks at seems red.
‖‖Flickering before eyes; sparks, or dimness of vision.
‖Bright sparks before eyes.
‖‖Flashes of light before eyes.
Farsightedness.
Every object in room, both real and spectral, had a double or at least a dim outline, owing to extreme dilatation of pupils.
The page appears covered with letters in great confusion.
‖Objects appear: double, and seem to revolve and run backward; upside down or crooked.
‖Triplopia; sees a second dim representation of object on each side of it; from candle proceed rays of same color as flame, and outside rays there is a variegated halo, inner circle being green, middle red, and outer white; when

Google

walking he also sees a round black ball hovering, a little larger than a pea; all this he sees before his l. eye.

‖When reading lines appear crooked.

She sees things wrong side up (*Stramon.* produces an oblique appearance of all objects).

‖Cannot look upward.

Weakness of sight from doing fine work.

Vanishing of sight on sitting up in bed.

Partial blindness, cannot read anything printed.

Vision obscured as from a white vapor.

‖‖Dimness of vision, or actual blindness.

‖Amblyopia caused by stoppage of menses; veil before sight; diplopia; chromopsia; dilated pupils and stitching in r. eye.

Irides insensible to light.

‖Blindness following severe congestive headaches after scarlet fever.

Recognizes his friends through sense of hearing, not by sight.

‖While window-shutters are open he says they are closed, for he cannot see with open eyes. θHepatitis.

‖Amaurosis.

‖Complete amaurosis caused by a severe nervous fever, or from large amount of quinine given at that time; pupils widely dilated.

‖Amaurosis from a cold, with much vertigo; pressing pain and feeling of fulness in eyeballs; black spots before eyes; increased pain by candlelight, and much congestion of vessels.

‖Amaurosis of four years' duration, occurring after suppression of rash in scarlatina; only a perception of light remained; pupils dilated.

‖Apoplexy of retina, with suppression of menstruation, occurring in a girl, æt. 18; she was subject to cerebral congestions, sudden heat of head, vertigo, burning and throbbing frontal pain, noises in ears and illusions of vision, while rest of body was cold; headaches increased; pulsation of parotids became more severe; photopsia and then sudden blindness.

She has a wild look, a stunned appearance.

Restless, unsteady look, vacant gaze, at times eyes sparkle; face is flushed; anxious, irregular breathing.

The eyes are dim, faint, without lustre.

‖Had a staring, threatening, wild, wandering look.

Staring, glassy eyes.

‖Half-opened, protruded, staring eyes.

‖The lids wide open; eyes shining and protruding.

‖Eyes red, protruding, staring and brilliant.

Google

Eyes very animated, with fully dilated pupils.
Pain over eyes.
Pressive pain over r. eye.
Deep-seated, dull pain in back of eye.
Pain in head and eyeballs, which felt as if starting from their sockets.
Pain begins in orbit, alternately spreads to forehead and skin of face.
Pain in orbits; often feels as if eyes had been torn out, sometimes as if pressed into head.
Orbital neuralgias, especially of infraorbital nerve, with red face, hot hands.
Ciliary neuralgia appearing and disappearing suddenly; photophobia; congestion.
Violent pain deep in eyes aggravated by movement, but particularly by light.
Transient, fine, stinging pain in eyes.
Shooting in eyes, from within outward.
Violent aching pains in eyes, from without inward.
Pain and burning in eyes.
Feeling of heat in eyes; seems as if surrounded by a hot vapor.
Burning, itching and smarting in eyes.
Severe pains of glaucoma; (glaucomatous eyes are exceedingly sensitive to action of *Bellad.*).
Mydriasis, resulting from nervous headache.
Pupils dilated.
Pupils dilated and immovable; sclerotica bluish; livid, lead-colored spots on eyelids; deathly pallor of face.
Protruded eyes with dilated pupils.
Contracted pupils.
Choroiditis, especially the disseminate form.
In chronic keratitis, when suddenly eye becomes intensely congested, with heat, pains, photophobia; pains often sharp, shooting through ball to back of head.
Ulcers or maculæ on cornea; thickening of cornea.
Particularly useful in diseases of fundus; hyperæsthesia of retina.
Optic disc greatly deepened in tint, and retinal arteries and veins much enlarged, veins most markedly.
Optic neuritis, veins large, flashes of light before eye and pains in head.
In hyperæmia of optic nerve and retina, especially indicated, if dependent upon cerebral congestion and accompanied by aching pain in eye, aggravated by any light.
Inflammation of optic nerve and retina.
Retinitis in a young lady (subject to congestive headaches,

Google

always < in afternoon); retina very hazy and œdematous, appearing as if covered with a bluish-grey film, outlines of disk ill-defined, vessels large and tortuous.
Rheumatic iritis in early stages.
Eyes are congested, look very red; cannot bear light; opening only when in a dark place.
Catarrhal ophthalmia.
Ophthalmia suddenly appearing; < r. eye; intense photophobia.
Scrofulous ophthalmia: cannot bear artificial light; abundant flow of hot tears.
Inflammation of eyes; with redness and swelling of lids, also of newborn infants; of gouty or scrofulous persons after catching cold.
Given in cases of chronic ophthalmia caused eyes to burn, and a feeling in cheek bones as if scalded.
Conjunctivitis (especially catarrhal, in early stages) with dryness of eyes, thickened red lips, and burning pains in eye.
Conjunctiva covered with red vessels; shooting pains; eyes water.
In chronic forms of hyperæmia, if a red conjunctival line is very marked along line of fissure of lids.
Tunica conjunctivæ highly injected; whole eye prominent and preternaturally brilliant.
Strabismus, due to spasmodic action of muscles, or when resulting from brain affections.
Spasmodic motion of eyes.
Spasms of eyes distorting them.
Eyes are in constant motion, pupils extremely dilated.
The eyeballs turn convulsively in a circle.
The eyes became distorted, with redness and swelling of face.
Swelling and suppurative inflammation of l. caruncula lachrymalis.
Dryness of eyes.
Feeling of burning dryness in both eyes.
Feeling of sand in eyes.
Eye dry, motion attended with a sense of dryness and stiffness; surface of ball became quite dry, causing a very disagreeable sensation, not relieved by winking or continued closing of eyes.
Burning dryness of eyes; water flowing from eyes is hot, or smarting; double vision.
Lachrymation, with great photophobia.
Burning tears.
Lachrymation on side affected by headache.
Yellowness of sclerotica.

Google

Dull, heavy, aching pain in lids.
Heaviness of lids.
Eyes wide open.
Nictation of eyelids.
Trembling and quivering of r. upper eyelid.
Itching and burning of lids.
Bleeding from lids.
‖Lids swollen, red, like erysipelas.
Lids puffy, red and congested.
Lids feel sore, red, congested and swollen.
In blepharitis, if lids are painful and swollen like erysipelas.
Itching stitches in inner canthus only temporarily relieved by scratching.
Inflammatory swelling of lower lid near inner canthus, with throbbing pains.
‖In morning lids are completely agglutinated.
‖Scrofulous inflammation of lids.
Everted lids.
Acute aggravations of various chronic diseases, as in granular lids, when, after taking cold, eyes become sensitive to air and light, with dryness and a gritty feeling.

Hearing and Ears. ‖Extreme sensibility of hearing.
Very sensitive to noises; easily startled.
Earache worse from least noise.
Cannot bear noise or bright light.
‖Roaring, ringing, or noises in ears.
‖Roaring, tingling, humming and murmuring in ears.
Roaring in ears; vertigo and dull colic.
Fancied noise awakens; slight delirium on waking.
Deafness as if a skin were drawn over ears.
Hardness of hearing, owing to having taken cold.
‖‖They lose their hearing. θTyphus.
‖Tearing in internal and external ear, in a downward direction.
Stitches in ears.
Shooting in internal ear, with hardness of hearing on same side.
Pinching in ears, first r., then left.
Earache, with boring and screwing in ears.
‖Acute thrusts in internal ear, with pinching like earache.
‖Soreness extending from throat to ears.
Lacerating from above downward in external and internal ear.
‖Tearing in r. external ear and whole r. side of face, downward.
The violent, tearing pain spreads from external ear both backward and forward to whole side of face.

Google

Sharp pains in and about ears, sometimes excited by chewing.
‖‖Otalgia.
‖Acute inflammation of ears.
‖‖Otitis interna; child screams in sleep; delirium; rolling of head; threatens extension to meninges.
‖Otorrhœa.
‖Inflammatory swelling of ears, and also of parotids.
‖‖Swelling of r. parotid gland, with erysipelatous bright redness and violent shooting pains.
Inflammatory swelling of parotid gland.
Violent shootings in r. parotid, extending into external ear, where it becomes cramplike and then disappears; it returns again following day, also at same hour.
Inflammation of glands about ears, with tearing and stitches.

[7] **Smell and Nose.** Oversensitiveness to smell.
Extreme sensibility of smell; odor of tobacco and of soot is intolerable.
‖Smell now acute, at another time dull. θCoryza.
Loss of smell.
‖Smell in nose as from herring brine or sour beer. θCoryza.
Putrid smell from nose.
Cramp at root of nose.
‖Nosebleed: with congestion to head; in children at night.
‖Very frequent epistaxis, with pulsative pains in head, especially at night when in bed and on waking in morning.
Bleeding of nose; distended abdomen; throat frequently becomes sore; eyes are often inflamed; bloated face; no good sleep, hears all that is going on at night.
Discharge of mucus, mixed with blood, from nose.
‖Frequent sneezing.
‖Frequent dry sneezing, with tickling, especially in l. nostril.
Spasmodic sneezing, with cough of children.
‖Sensation of dryness of Schneiderian membrane.
Dryness of nose, with dull frontal headache.
Coryza; one side of nose stopped up.
‖Dryness of nose and lips, the latter very red.
Nasal voice; from stoppage.
‖‖Coryza, with offensive smell in nose, as of herring pickle, especially when blowing nose.
‖‖Suppressed catarrh, maddening headache.
Inflammatory swelling and redness of internal and external nose.
Pain as if bruised, when touching nose.
Sudden redness of tip of nose, with burning sensation.

Google

‖Tip of nose red, swollen and shining.
Tip of nose red and hot, particularly in warm weather.
Nostrils and corners of lips ulcerated, without pain or itching.
Pustules break out on cheek and nose, which rapidly fill with pus, become covered with a crust.

[8] **Upper Face.** ‖Cutting, tearing pain, mostly r. side, shooting from side of face up to temple, into ear, and down to nape of neck; < from touch and motion; hard pressure sometimes relieves.
‖Neuralgic pains commencing under l. orbit and running back to ear.
Violent shooting in r. maxillary joint, extending to ear; when chewing.
‖Prosopalgia; tic douloureux; Fothergill's faceache.
Extraordinary mobility of facial muscles, especially on l. side.
Twitching of facial muscles.
‖Convulsive movement of facial muscles, with distortion of mouth.
‖‖Spasm of facial muscles; risus sardonicus; continual winking and trembling of eyelids, alternating with cramps of hands and feet.
‖The muscles of his face, jaws and limbs were agitated by convulsive twitchings.
Convulsive play of facial muscles, with grinding of teeth.
Numbness of face.
Paleness and coldness of face, with shivering; fixed or convulsive eyes; foam at mouth; involuntary escape of feces and urine.
Great paleness of face; much moaning and grinding of teeth.
An extreme paleness of face is instantaneously changed to redness, with cold cheeks and hot forehead; sweat only in face.
Paleness of face, sometimes suddenly alternating with red.
Face pale and sunken; features express restlessness and anxiety, are often deeply furrowed by grief, or pale and dull.
‖‖Sensation of burning heat in whole face, without redness of cheeks; or marked thirst; body warm; feet cold.
‖‖Red face.
Face animated and flushed.
The face was very red, with a staring, anxious look.
Hot head; flushed face; wild staring look; frequent pulse; mucous membrane of mouth dry; tardy stool; suppressed urination.

Google

Pains that cause redness of face and eyes; throbbing of carotids and in head.
Glowing redness of face, with violent, inexpressible headache.
‖‖Violent neuralgia; sometimes originating in r. temple and spreading over orbit to r. cheek; < from slightest motion; sometimes pain radiates from orbit to forehead, and over skin of face; sometimes affecting ears and teeth. θProsopalgia.
Dark red face.
Scarlet spots in face.
‖Mottled redness of face.
Bluish-red, bloated face.
‖‖Red face, with burning heat.
Very red face, with general warmth and great restlessness.
‖Flushed face and injected eyeballs.
‖Very red and hot face, with dilated pupils and hot head; with throbbing of carotids and injection of scleroticæ.
Great thirst, without sweat.
‖Face red and hot, and face, neck and chest much swollen.
‖Tumefaction and redness of face and lips.
‖Swelling of cheeks with burning pains; also of one side of face.
‖‖Erysipelas of face, parts being red, hot and hard.
Scraping itching of forehead.

Lower Face. Tearing pain in jaws.
Stitching and tightness in maxillary articulations.
Sensation as if lower jaw was drawn backward.
‖Shooting and tension of lower jaw, in direction of ears.
‖Shootings from superior maxilla into internal ear.
‖Pressing below right zygoma.
‖Tearing and drawing behind r. zygoma.
Inflammation and swelling of submaxillary and cervical glands.
External throat below angle of lower jaw very painful to touch.
‖She clenched her teeth together so that great force could not open them, with startings in all limbs, and chilliness.
‖The lower jaw is pressed convulsively against upper, with a red face and a peculiar staring look.
‖Convulsive closing of jaws, and contraction of muscles of face and extremities; next day increase of convulsive movements, with redness of face and profuse perspiration; great rigidity down spine.
‖The jaws are closed convulsively, and very difficult to open. θTrismus.

Google

The mouth is half open or spasmodically closed in consequence of lockjaw.
Trembling of upper lip.
‖Thick, swollen upper lip. θScrofula.
Pustules, or abscess on upper lip.
Lips: especially upper one, crack in middle; dry and parched.
Lips dark red.
Swelling of lips.
Pustules at borders of lips, with smarting pains.
‖Dry, burning, swollen and hardened lips.
Raw feeling at corners of mouth.
Eruptions at corners of mouth painful when touched.

[10] **Teeth and Gums.** Sensation as if her teeth would be forced out of her head.
The teeth feel elongated.
Digging toothache.
Teeth feel "on edge."
Lacerating toothache; worse in evening.
Dull drawing in upper row, r. side, all night.
Painful jerkings in nerves of fangs of one or more teeth.
Sore pain in teeth from admission of open air.
‖Toothache some minutes after eating, not during; increases gradually to high degree and as gradually diminishes.
Toothache: tearing, drawing and stinging in spells; < evening till night; sometimes renewed in morning on awaking; < from touching teeth, chewing, and from cold air; > from pressure and pricking gums until blood comes.
Toothache, with red, hot face and throbbing in head.
Toothache with otalgia.
Rheumatic toothache, particularly in females, especially when pregnant.
‖Throbbing in teeth. θPregnancy.
The pain seems to start from teeth and returns to them.
Barking and growling, with gnashing of teeth.
‖‖Grinding of teeth.
Grinding of teeth, with moaning; great dryness of mouth relieved for a short time by rinsing with cold water.
‖Grinding of teeth, with foam at mouth.
Extremely troublesome itching of gums, with pain in throat.
Vesicle in gum below one of front teeth, with pain as if burnt.
Gums pain as if ulcerated.
Extremely painful swelling of gums on r. side.
‖Bleeding of gums.

Google

11 **Taste and Tongue.** Taste: salty; sour; bitter; pappy; offensive; putrid when eating or drinking.
Bread tastes sour.
Putrid taste rising out of throat; also when eating or drinking, although food and drink have proper taste.
Putrid, disagreeable taste in mouth, with a clean tongue.
Insipid taste; or loss of taste.
Hasty speech; often inarticulate, confused sounds.
‖Stammering speech.
Inarticulate speech from hindered mobility of tongue.
Tongue dry and dislike to talk.
‖‖Loss of speech. θTyphus.
‖‖Paralytic weakness of organs of speech.
Smacking with tongue.
‖Trembling of tongue when protruded.
Feeling of coldness and dryness of forepart of tongue.
‖Dryness of tongue and throat becoming so great as to interfere with speech.
Hot tongue.
‖Tongue dry, cracked and difficult to move.
‖Tongue parched; rattling in mouth like a chip.
Inflammatory swelling of tongue.
Tongue: inflamed and much swollen; papillæ of deep red color; tip and edges light red.
‖The papillæ on tongue are of a deep red color, inflamed and much swollen (*Tart. emet.* produces red tongue with raised papillæ).
‖‖The tongue hung dry out of child's mouth, and was swollen thick; it was scarcely possible to get some drops of milk into mouth.
The tongue is painful, especially to touch; it is red, hot and dry, with red edges and white in middle.
‖Red streak in middle of tongue, wide and broader towards point.
‖Tongue: white centre with red edges; or two white stripes; covered with white, clammy fur, which can be pulled off in strings; dry and furred; covered with much tenacious, yellowish-white mucus.
Feeling in tip of tongue as if a vesicle was on it, with burning pain when touched.
Cracked tongue, coated white, with salivation.

12 **Inner Mouth.** Foul odor from mouth.
Peculiar odor from mouth, with but slightly coated tongue.
Mouth feels hot.
‖Burning in mouth.
‖Dry, burning mouth, with great thirst.
Paralytic weakness of internal parts of mouth.

Google

Hemorrhage from mouth and nose.
The lips, mucous membrane of mouth, fauces and nose, very hot and dry.
Dry mouth and lips.
Dryness of mouth, with thirst.
Mouth feels scalded.
Dryness of whole inner lining of cheek, tongue, which looks as if burnt, roof of mouth and pharynx.
Red, inflammatory swelling of inner mouth and soft palate.
Lips, tongue and throat dry, with constricted feeling in mouth.
A good deal of tenacious mucus in mouth.
Slimy mouth in morning, when awaking, with pressing headache.
Thick, white mucus collects in mouth and throat, with constant inclination to hawk and swallow.
Saliva thickened, tenacious, brownish, white, clings to tongue like glue.
Salivation; < when lying down.
Salivation succeeding dryness of mouth.
Increased flow of saliva.

[13] **Throat.** Dryness of roof of mouth, fauces and throat.
Troublesome continued dryness of mouth, lips and throat with a violent longing for drink, but not satisfied by it.
Great dryness of mouth and throat; desires drink but cannot swallow.
Desire to swallow saliva, which is painful.
About fauces sensation of dryness most distressing; it induced a constant attempt at deglutition, and finally excited suffocative spasms of fauces and glottis; renewed at every attempt to swallow.
Dryness of fauces, causing excessive difficulty of swallowing; and alteration of voice.
Sensation of heat and dryness in mouth and pharynx, extending to stomach; epigastric region painful and swollen, with constant thirst.
Dryness, burning and scraping in mouth and throat.
Catarrhal inflammation of palate.
Rawness and soreness of palate.
Painful narrowing and contraction of gullet.
Dryness of mouth and pharynx, with sense of constriction of throat.
Tongue and palate dark red; she complains of dryness of throat and of difficult swallowing.
Inflammation of throat and fauces.
Redness and swelling of uvula and soft palate.
Burning sensation in fauces.

Google

Mucous membrane, from posterior third of palate, as far down as could be seen, was of a deep crimson color, and tonsils were much enlarged.

Angina faucium, catarrhalis, erysipelatosa, tonsillaris, etc

Amygdalitis.

Inflammation; also swelling and suppuration of tonsils.

Tonsillitis; < r. side; parts bright red; < swallowing liquids.

The fauces, uvula and tonsils are scarlet and shiny.

Fine tearing on inner surface of angle of l. lower jaw, in and behind l. tonsil, unaffected by contact; < when swallowing.

Sensation of foreign body in œsophagus.

Sensation as of a lump, which cannot be removed.

Fine tearing on inner surface of corner of l. lower jaw; in l. tonsil, and behind latter; unaffected by contact; tearing is more violent during deglutition.

Sensation of heat, burning and dryness in throat.

Violent burning in throat (the mouth at the same time being moist), which is not at all relieved by drinking, but is by a little sugar, though only for a moment.

Constant pressing and burning in throat. θQuinsy.

Felt great soreness in throat, which looked very red about tonsils and palate; soreness extended to ears.

Throat: feels raw and sore; looks very red and shining.

Inflammation of throat and back part of mouth.

Sensation as if a large tumor was growing in throat and stopped it up.

Sore throat: fauces and pharynx deep red; soft palate and tonsils swollen; swallowing painful, particularly fluids; speech thick; feels like a lump in throat, which induces hawking; throat swollen outside and sensitive to touch.

Lump in throat.

Violent, lancinating pain in throat when swallowing or breathing.

Sore throat; shooting in pharynx, and pain as from an internal swelling, only felt during deglutition, and upon turning head around; likewise when feeling side of neck, but not when at rest or in speaking.

Sore throat, which increases every hour; heat; scraping; narrowing, and feeling of soreness.

As soon as throat began to feel sore, there was great expectoration of light mucus.

Sore throat: fauces and pharynx deep red; soft palate and tonsils swollen; swallowing painful, particularly fluids; speech thick; feels like a lump in throat, which induces hawking; throat swollen outside and sensitive to touch.

Google

Painful contraction and narrowing of upper part of throat.
Constriction of throat, with choking sensation.
‖Contraction of œsophagus, lasting a short time, but frequently recurring; more during deglutition than between, and followed each time by a scraping sensation in region of epiglottis, as if latter was raw and sore.
‖‖Spasmodic constriction of throat.
‖‖Spasms in œsophagus. θTyphus.
‖Only with difficulty and by constantly taking liquids is he able to swallow solid food.
‖Constant urging and desire to swallow; seemed as if he would choke if he did not swallow.
‖During deglutition, feeling in throat as if it was too narrow, or drawn together, as if nothing would pass properly.
‖Difficulty in swallowing; severe coughing spells, causing much redness of face; moaning and drowsiness.
‖When swallowing, experiences a sensation in throat as though the parts were too narrow, contracted, as if nothing would go down.
‖On attempting to pour down liquid, tetanic closure of mouth, and regurgitation of liquid.
‖Impeded deglutition, or entire inability to swallow even liquids, which return by nose.
‖He swallows water with greatest difficulty, and can only get smallest quantity of it down.
‖‖Chokes easily; things go down wrong way.
‖Aversion to all fluids, so that she behaves frightfully at sight of them; forcible administration of fluid medicine makes her furious.
Constant desire for empty swallowing, which causes pain in larynx.
‖When swallowing, a pressing, urging pain. θAngina.
‖Swallowing saliva, or empty, is most painful. θAngina.
‖Has to swallow, which is very painful; he has to bend head forward and lift up knee. θAngina.
‖A violent shooting pain in throat on swallowing or breathing.
‖Rapidly forming aphthous ulcers on tonsils; intense congestion; throbbing of carotids.
‖Throat is painful to touch on r. side, especially towards ear, where it stings. θAngina.
‖‖Right hand clutches at throat. θEpilepsy.
Pressive pain externally when bending head backward and when touching parts.
‖‖Cervical glands inflame suddenly.

" **Appetite, Thirst. Desires, Aversions.** If children in hydrocephaloid cry until they get something to eat, *Bellad.* is well indicated.

Google

Complete loss of appetite.
Aversion to food, particularly meat.
‖Anxious seeking for drink.
Great thirst.
Violent thirst at noon.
‖Excessive thirst for cold water. θAngina.
‖‖Desire for lemons and lemonade, which prove beneficial.
Desire for warm drinks.
Great thirst in evening, with watery taste; all drinks are loathsome.
Absence of thirst.
Aversion to every kind of liquid; she demeans herself like a fury when seeing it.
Violent burning, suffocative, unquenchable thirst, with inability to swallow least drop, or with great aversion to drinks.
‖Thirst for water changed into thirst for beer.
Repugnance to beer, acids, coffee, camphor.
Desire for tobacco and indigestible things; swallows food greedily.

[15] **Eating and Drinking.** ‖Hasty drinking, with trembling.
After eating: putrid taste in mouth.
Pressure in stomach after eating.
Taking drink or nourishment excites vomiting.
‖At first he pushed away a glass of sugared water, when on being coaxed he attempted to drink it, only a few drops passed down, the rest was forced out of mouth by spasmodic contraction of muscles of deglutition.
After drinking beer, internal heat.
Wine aggravates dyspnœa.
Vomiting after eating or drinking.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Attacks of violent hiccough. θHepatitis.
Crying on account of pain from hiccough.
‖Hiccoughing eructations; spasm composed partly of eructation, partly of hiccough.
Half suppressed, incomplete eructations.
Bitter, frequent eructations, with want of appetite and giddiness.
Gulping of food, with pressing in stomach.
Nausea, with loathing of food.
Nausea in throat and stomach.
Nausea and bitter eructations.
Ineffectual efforts to vomit about midnight, with cold sweat.
Nausea, retching and vomiting.
Unsuccessful inclination to vomit; empty retching.
Sick and fainty; vomits everything.

Google

‖Can't keep any food on stomach; can't hold his head up; makes water freely; exceedingly cross, ill-tempered; drowsy, but can't get sound sleep; bowels constipated very much; stools dark and hard; tongue coated white; uneasy, restless; rouses up and screams; starts and screams as if frightened.

Can keep nothing down; pale; weak.

Frequent nausea; spasmodic vomiting.

Vomiting: of mucus; of bile and mucus, or undigested food; watery, sour, bloody mucus.

‖Vomits bloody phlegm and improves. θAngina.

‖Vomit watery, slimy, bilious fluid. θHepatic affections.

[17] **Scrobiculum and Stomach.** Painless throbbing and beating at pit of stomach.

Tensive pressing pain in pit of stomach, particularly after eating.

Painful pressure in pit of stomach only when walking; compels him to walk slowly.

‖Violent shooting, cutting pain in pit of stomach, forcing one to bend body backward and to hold one's breath.

‖At night periodical pains at pit of stomach, with tremor.

‖Burning in stomach.

‖Excruciating pains about pit of stomach.

Feeling of emptiness in stomach.

‖Spasm in stomach like cramp.

Chronic spasm of stomach, always occurring during a meal; colic, as if a spot in abdomen were seized with nails; a gripping, clutching, seizing with talons (see *Ipec.*).

‖Fulness and oppression in stomach; cannot lie still. θHepatitis.

‖Cardialgia; gastralgia.

‖Hard pressure in stomach after eating; violent stomach-ache, lasting a short time.

‖‖Pain in stomach extending through to spine, between shoulders.

Pains in stomach and abdomen < when walking, and from a jar; in stomach or abdomen as if clutched by a hand.

Gnawing, pressing, crampy, drawing and wrenching pain in stomach, compels patient to bend backward; < after drinking.

Shooting pains in stomach.

Cutting pain in stomach; < from motion or pressure.

‖Region of stomach sensitive to touch.

Hæmatemesis; ringing in ears; red cheeks; feeling of fulness and warmth in stomach.

‖‖Gastritis.

Distension of epigastrium, with tensive pain in stomach.

Google

[18] **Hypochondria.** Pain in liver.

‖Acute and chronic hepatitis.

‖Region of liver painful and sore to touch. θ Congestion of liver.

‖Acute pain in region of liver; < lying on r. side; pains go the shoulder and neck; can tolerate no pressure or jar; pit of stomach bloated.

‖Severe pressure in r. hypochonder on a small spot near and above umbilicus; < from motion, and very sensitive to touch. θHepatitis.

‖Pain in hepatic region gets rapidly worse; spreads to back and kidneys; causes retching and vomiting of bile; has to bend double. θHepatitis.

‖‖Colic from gall-stones; liver hard. θJaundice.

Pain as if hypochondria was being pressed out, when pressing on epigastrium.

[19] **Abdomen.** ‖During pain transverse colon protrudes like a pad, all the way across abdomen.

‖Colic; spasmodic tension from chest to deep in abdomen.

Colic, as if a spot in abdomen was seized with nails; a griping, clutching, clawing.

Sudden violent, stinging, cutting or pinching pain, proceeding from one place in abdomen and spreading over larger portion of it.

Loud rumbling and pinching in belly; wind-colic.

Violent cutting pressure in hypogastrium, now here, now there.

‖Pinching colic; flatulent colic > by stooping forward and by pressing on part.

‖Clawing around navel; > from pressure.

‖‖Infantile colic; patient bends backward, and pains appear and leave suddenly.

‖Pains in abdomen cause violent screaming. θ Children with dysentery.

‖‖Pains, particularly in abdomen and pelvis, come on suddenly, continue violently a longer or shorter time, and disappear as suddenly as they came.

‖‖Children relieve their bellyache by lying flat on their bellies across a chair.

Constriction of abdomen around navel, as if a ball or lump would form.

Contractive dragging in region of navel, especially about noon and in afternoon.

Constricting, pinching pains under navel, coming suddenly, patient has to bend double.

‖In hypogastrium, immediately below umbilicus, a feeling as though intestines pressed outward, chiefly in standing.

Google

‖Along with sensation of distension of abdomen, constrictive pain below umbilicus, which comes in jerks and forces one to lean forward bent double.
Cramplike, constrictive pain in lower intestines.
Pressure in abdomen as from a stone (in evening), with pains in loins.
In morning, immediately after getting out of bed, a violent, tensive, pressing pain in whole of hypogastrium, but especially in region of os pubis; it appears as if hypogastrium (rarely epigastrium) was spasmodically constricted, sometimes as if it was distended (although not really so); pains which gradually increase and gradually decrease.
‖Squeezing, constrictive pain in lowermost intestines, alternately with dull shoots or jerks in direction of perineum.
Burning, pressive and pinching pain in abdomen, obliging him to bend double.
‖Feeling of heat in abdomen, as from a hot iron.
Heat in belly (with anxiety), in chest, and in face, with obstruction of nose.
Pain in abdomen, as if raw and sore.
‖Long-lasting painfulness of whole abdomen, as if it was all sore and raw.
‖Peritonitis.
‖Tumefaction of abdomen, which was very tender to touch.
Painfulness of abdomen to contact.
Tenderness even to slight pressure, especially over ovarian region.
Sensitiveness of abdomen to slightest touch.
‖Tenderness of abdomen aggravated by least jar, even of bed or chair upon which she sits; she is obliged, in walking, to step with great care, for fear of a jar.
‖Great pain in r. ileo-cæcal region, cannot bear slightest touch, not even bedcover.
Abdomen tympanitic and extremely sensitive.
Abdomen contracted.
Distended, but neither hard nor painful abdomen.
‖Abdomen distended, hot. θCholera infantum.
‖Much bearing down pain; < in morning.
Feeling as if a hard body pressed from within outward, at r. inguinal ring; part not feeling hard to touch; while sitting with body bent forward.
Fine shooting in l. groin.
Violent twitching of abdominal muscles.
‖Incarcerated hernia.
Itching on abdomen.

Google

[30] **Stool and Rectum.** Contractive pain in rectum.
Straining and colic.
‖Frequent urging to stool without result, or with a very scanty and hard evacuation.
Urging to stool, which is thinner than usual, but passes in proper quantity.
‖From 10 P.M. till 2 A.M. violent tenesmus, with passage of blood and slime, the rest of the time thin but formed stools.
‖Frequent urging to stool, sometimes ineffectual and with tenesmus.
‖Straining to stool; the evacuation is undoubtedly diarrhœic, but very little is voided, and immediately after follows much straining
‖Urging to stool, which is more fluid than usual, but passed in proper quantity.
‖Frequent thin stools, with tenesmus.
‖Dysentery.
‖Slimy and bloody diarrhœic stools.
Papescent stool mixed with mucus.
‖Diarrhœa, with bearing down pain in uterus.
‖Diarrhœa < from motion (compare *Rheum* and *Crot. tigl.*).
Asiatic cholera.
Involuntary evacutions; temporary paralysis of sphincter.
Involuntary discharge of feces and urine; violent startings; flushed face.
Escape of feces when passing wind.
Stools: thin, green mucus; frequent, thin; bloody mucus with tenesmus; containing lumps like chalk; clay colored; chalky-white, with granular, slimy mucus; smell sour; with shuddering.
Retarded stool.
Digestion torpid; stools scanty.
Sense of constipation.
Obstinate constipation.
Constipation with weak pulse.
Before stool: constriction in rectum; sore aching in upper part of abdomen; perspiration; heat in abdomen; colic.
During stool: shuddering; nausea and pressing pain in stomach; pressure on genitals.
Diarrhœa, with pressure on bladder.
With stool passage of urine.
The diarrhœic stool is followed by frequent urging, no more stool being passed.
After stool: tenesmus.
‖A sort of tenesmus, a constant pressing and urging towards anus and genitals, alternating with painful contractions of anus.

Google

Pressing in rectum towards anus.
‖‖Spasmodic constriction of sphincter ani. θDysentery.
‖Bleeding piles; back pains as if breaking.
‖Mucous membrane of anus seems swollen and pressed out.
Prolapsus ani.
Voluptuous tickling in lower parts of rectum and anus.
Violent itching, at same time constrictive sensation in anus.

[21] **Urinary Organs.** Stinging, burning pain, from region of kidneys down into bladder.
‖Nephritis.
‖Spasmodic, crampy straining along ureter, during passage of calculus. θNephritic colic.
Sensation of turning and twisting in bladder, as from a large worm, without desire to micturate.
Tenesmus of bladder, without inflammation.
‖Dull pressing in vesical region during night.
Vesical region very sensitive to pressure or jar.
‖It is indicated in irritation (not inflammation) of bladder, with strangury and white epithelium in urine.
Shooting in bladder when moving.
‖Tenesmus of bladder.
‖Very frequent desire to urinate, even if only a few drops had accumulated.
‖Frequent desire to urinate, but urine voided in remarkably small quantities, although of a natural color.
‖Diminished urine.
‖When passing water feces escape (compare *Rhus*).
Frequent copious emission of urine.
Urine: either suppressed or profuse, light and clear; bright yellow and clear; frequent, copious, pale and watery; first clear, becomes turbid on standing; blood-red, dark and scanty, sometimes as yellow as gold; red and scanty; dark, even bloody; scanty, and passed with difficulty; deep red, with light sediment; dark and increased; turbid, like yeast, with a reddish sediment; scanty, brownish-red and cloudy; yellow, turbid.
When urine is heated, almost invariably deposits a cloud of phosphates.
‖Urine looks as if mixed with black dust, or streaks; strongly acid. θAfter scarlatina.
Suppression of stool and urine.
Retention of urine, which only passes drop by drop.
Much difficulty in passing a small quantity of urine, it flows in a very feeble stream or in drops.
‖Post-partum retention of urine.
‖Involuntary emission of urine when standing.
Constant dribbling of urine, clear as water and odorless.

Google

‖Urine escaped from him during a deep sleep in daytime.
‖‖Enuresis nocturna of children.
Enuresis, with profuse perspiration.
‖Wets bed; restless, starts in sleep. θScrofulous children. θChorea.
Between acts of urination, dull shooting in urethra, behind glans, especially during movement.
During urination: burning; drawing in spermatic cord; pain in l. groin.
After urination: itching; smarting pain in outer edge of prepuce worse.

Male Sexual Organs. Increased sexual desire, with great inclination to masturbation.
Sexual desire decreased.
Nocturnal emission of semen, during relaxation of penis.
Inflammation of prostate gland.
‖Inflammation of testicles.
Drawing pain in one of testicles and spermatic cord, as if testicle was drawing up into abdomen.
Violent stitches in testicles, which are drawn up.
Tearing upward in l. spermatic cord, evening in bed.
Soft, painless tumor on glans.
Violent pressing and urging towards genitals, as if everything would fall out there; < sitting bent, and in walking; > standing, and sitting erect.
Weakness and relaxation of genitals.
Sweating of genital ogans.

Female Sexual Organs. Nymphomania. See 24.
Ovarian neuralgia.
Lancinating pain in ovary.
‖Right ovary: much enlarged; stitching, throbbing pains in region of hard swollen ovary; pains come and go suddenly.
‖Burning in ovarian region.
‖Affections of r. ovary.
‖Pain in ovaries with appearance of menses.
‖‖Pains in pelvic region, which come on suddenly and cease as suddenly. θUterine displacement.
‖Drawing pains in pelvic region.
‖Uterine congestion.
Congestion of womb, and sensation as if it would fall out.
‖Acute metritis.
‖Burning, pressure, uneasiness and weight in uterine region.
‖Clutching or clawing pains, or transient stitches in uterine region; parts sensitive, cannot bear least jar.
‖Enlargement of uterus, and periodically spasmodic bearing down, coliclike pains in uterus, discharging black, pitchlike ichor.

Google

‖Fulness and bearing down in parts, cannot stand without complaining; sacrum very painfully affected at irregular times; a discharge of bloody ichor. θBeginning of uterine cancer.

Spasmodic contractions of neck of uterus, which is hot, dry and tender.

‖Prolapsus: with bearing down pains, as if everything would issue from vulva; relieved by standing; especially felt in morning; with indurations; in climacteric years; parts congested; burning, stinging, tension, fulness and bearing down; in loins and sacrum, drawing, cutting, pressing, cramplike pains; with nervous, irritable women.

‖Menses: too early and too profuse; of thick, decomposed, dark red blood; retarded and too pale; bright red, or black and clotted; hot; offensive.

‖Before menses: colic; cramp of stomach; loss of appetite, tiredness; clouded vision.

‖During menses: bearing down towards genitals; pain in back and limbs; heat of head, anxiety; disturbance of mind; chills, thirst; perspiration of chest at night.

‖After menses: cramps of stomach.

‖Dysmenorrhœa: with rush of blood to head; with spasmodic contraction of uterus and terrible bearing down pains; < in morning; with pains in limbs and back; in women of full habit.

Amenorrhœa, with congestion to head.

‖Flow of blood between periods.

‖Metrorrhagia.

‖Hemorrhage from womb, with contracting pain in lower part of abdomen; < from every motion.

‖Profuse discharge of hot, bright red blood; sometimes dark, clotted, and of bad smell.

‖More or less discharge of blood from vulva, sometimes feeling very hot.

‖Profuse discharge of bright red, hot blood, with pressing or forcing, as if all would escape vulva, or pain in back as if it would break; sometimes there is congestion to head, with throbbing of carotids.

‖Fluor albus of white mucus, with or without colic.

‖Leucorrhœa with colic; pains come suddenly and finally cease as suddenly as they came.

‖‖Bearing down pains with leucorrhœa.

‖Induration of uterus: with crampy pains and bearing down; with clawing and cutting pains.

‖‖Pressure downward, as if all contents of abdomen would issue through vulva: < mornings.

At every step violent shootings in genital region, as if in internal sexual organs.

Google

In morning a pressing, as if everything would be forced out, with distension of abdomen; after pressing, abdomen contracted, and that was followed by a discharge of white mucus from vagina.

‖Pressing and urging towards genitals, < by sitting bent and walking; > by standing and sitting erect.

‖Sense of heaviness, fulness, and bearing down in parts.

‖Throbbing about parts, and sense of weight.

‖Stitches in vagina, with sensation of great heat and dryness.

‖Female parts are sensitive, can bear neither touch nor least jar.

The parts have a scarlet red appearance.

Inflammation of external genitals.

[24] **Pregnancy. Parturition. Lactation.** ‖Suitable for women, particularly during pregnancy.

‖During pregnancy: mental derangement; toothache; spasms and convulsions; spasmodic hacking cough; fainting.

Laborlike pains deep in pelvis, radiating to back and loins.

‖Promotes expulsion of moles, etc.

‖Labor pains: deficient; cease, have only periodical slight pressure on sacrum; amniotic fluid gone, yet os still spasmodically contracted; ‖false spasmodic; labor slow and tedious.

‖Old maids married late, in first delivery muscles rigid.

‖The woman, in labor, lies quiet, without pains; has only an occasional pain in occiput.

‖The parturient woman makes wry faces, on account of a periodical pressure in sacrum.

Drawing pains from small of back to thighs.

‖If during powerful labor the os tincæ is not widened correspondingly, or seems to be spasmodically contracted.

‖‖Constriction of lower part of uterus.

‖After body was born, but head spasmodically held inside of uterus (five drops of tincture loosened the constriction in 20 minutes, and head was expelled; followed by a violent bleeding, cured by *Secale*).

‖Appears as if stunned; semiconscious with loss of speech; convulsive movements in limbs and muscles of face; paralysis of r. side of tongue, foam at mouth; renewal of fits at every pain. θPuerperal convulsions.

‖Cramps in legs during labor, necessitating instrumental delivery in nine confinements; she became enraged, wanted to tear everything within her reach, tried to escape; *Bellad.*[10] quieted her and produced natural delivery.

Google

After a mole birth: occasional chill; constant thirst; moaning; blowing respiration; wild look; rage; wild laughter; feels as if a rope was tied around hypochondria; sides painful to pressure; short stomach cough causing retching and raising of sour slime; pressure in forehead.

Lying-in women: milk fever; deficiency of milk, or too great a flow; puerperal fever, particularly after a violent emotion, or after suppression of milk.

Mania puerperalis.

Retained placenta, with profuse flow of hot blood, which speedily coagulates; placenta may be spasmodically retained.

Hemorrhage after confinement, or after miscarriage.

Puerperal peritonitis (at the onset), a hot steam seems to issue from body of patient.

Great sensitiveness of abdomen after delivery.

Very acute after-pains.

Prolapsus after parturition.

Lochia: too weak and insufficient; suppressed; offensive, feeling hot to parts.

Consequences of taking cold during confinement.

Phlegmasia alba dolens.

The breasts become filled with milk (in a female who is not pregnant), the milk running out.

Too copious flow of milk.

Inflammation of breasts, in streaks or rays, diverging from centre to circumference. θMoles, tubercles, wheals, warts, etc., with a like characteristic.

Swelling and induration of breasts.

Swollen, painful mammæ.

Nodular swelling of breasts; skin of breast hot and inflamed, pain stinging and throbbing.

Rose-colored, radiating inflammation and swelling of breasts, with stinging, tearing pains.

Erysipelatous swelling of breasts.

Erysipelatous inflammation of breasts, particularly from weaning.

Ophthalmia; spasms; sleeplessness and crying of newborn infants; troubles from teething.

Heat and redness of gums during dentition.

Difficult dentition; convulsions, etc.

Complaints during dentition and puberty.

[35] **Voice and Larynx. Trachea and Bronchia.** Hoarse outcries.

Hoarseness which is especially violent when crying.

Hoarse, rough voice, with dryness in throat, seat of which she accurately located in larynx; she had to

Google

cough frequently and swallow often; when swallowing she complained of a pain in larynx.

‖Voice hoarse and weak.

The voice is altered, hoarse, rough, weak and wheezing.

‖Sudden attacks of hoarseness; feeble voice; dry cough, often with spells of suffocation. θChronic laryngitis.

Speaking is very difficult to him; speaks in a piping tone.

‖Cannot speak but with great exertion, very gentle and low. θAngina.

‖Now and then while speaking, the voice, which had been weak, becomes suddenly loud and clear.

Voice weakened even to complete aphonia.

‖Aphonia, or confused sounds uttered with pain.

‖The dryness extends into larynx, rendering voice husky, and often inducing dry cough.

‖Painful dryness in larynx, yet with an unconquerable aversion to all drinks.

Great sensitiveness to slightest pressure in lower portion of larynx.

‖Sensation as if some one constricted his larynx.

‖Sensation as if larynx was inflamed and swollen, with snoring breathing and danger of suffocation.

Pain in larynx when talking.

Great painfulness of upper part of windpipe, with danger of suffocation when touching or turning throat; when coughing, talking, or taking breath.

Spasmodic constriction of throat.

‖‖Crouplike spasms in larynx, in attacks; fauces red.

‖‖Spasms of glottis.

‖‖All the symptoms of membranous croup, but the usual remedies are of no avail, and the case is characterized by single attacks; hollow cough, with strangulation and putting hands to larynx, evidently a spasmodic constriction.

‖Acute catarrhal laryngitis.

‖Chronic laryngitis, with spasmodic dry cough.

Noise and rattling in bronchial tubes.

[30] **Respiration.** Short breath.

‖Shortness of breath after drinking coffee in afternoon.

‖Respiration rapid and somewhat oppressed.

Short, hurried, anxious breathing.

Breathing heavy and stertorous.

Rattling breathing with cough.

‖Quick, short, irregular breathing, alternates with slow, gentle, at times almost imperceptible breathing; in a child.

‖Breath hot; respiration difficult.

Google

Asthmatic paroxysm in afternoon and evening, with sensation of dust in lungs.
‖Asthmatic complaints, with suffocative spells.
Attacks of dyspnœa at night.
‖Asthma in hot, damp weather; < after sleep.
‖Oppression of chest.
Dyspnœa after rising in morning; > in open air.
Danger of suffocation when swallowing; or when turning, or touching neck.

¶ **Cough.** Dry cough: from dryness of larynx; from tickling itching in back part of top of larynx, evening after lying down in bed; from sensation of a foreign body in larynx.
Dry cough day and night, with tickling in throat, or with headache and redness of face.
‖Very dry, tearing cough at night.
‖‖Cough accompanied by a red, injected throat.
‖Dry and short cough.
‖Violent scraping in larynx exciting a dry cough.
Violent dry cough, as if a foreign body had got inside throat.
Sensation as if something was in pit of stomach, which excites cough.
‖Dry spasmodic cough: with retching, especially after midnight; with dull pain in head.
‖Dry throat, whereby throat is scraped.
‖Tickling and burning in larynx, with violent paroxysms of cough.
‖The cough is spasmodic, rough, hollow, hacking, caused by a sensation of constriction of larynx; < from motion and talking, or when child cries; when awaking from sleep; concomitants; congestion to head; aversion to light; rattling in chest; skin dry; generally irritable in beginning.
‖Barking cough waking suddenly 11 P.M.; face fiery red; crying with cough. θCroup.
‖Short dry cough; spasmodic, or else hollow and hoarse cough.
‖Whooping cough: with sneezing; with injected capillaries; cough comes in short paroxysms; < evening and night, most violent just after midnight; < from every movement or touch, especially at larynx and throat; < from talking or crying; < from a deep inspiration, and when awaking; suitable at beginning, or when cerebral inflammation intervenes.
‖Cough produces such congestion as to cause sclerotic to appear as one gore of blood. θWhooping cough.

Google

Cough, with bloody mucous expectoration in morning; bloody taste in mouth.
Frequent attacks of cough about 11 P.M.
Night cough; wakes from sleep.
The slightest movement in bed at night renews cough.
Nocturnal cough, mostly dry, with tearing in chest, or with cold in head and stitches in breast bone.
Violent cough about noon, with expectoration of much tenacious mucus.
Attacks of cough < in afternoon and evening until midnight.
Cough commences in evening (about 10 o'clock), and occurs every quarter of an hour or oftener, in three or four fits at a time.
Attack of coughing, as if one had inhaled dust; wakens at night; mucous expectoration.
Cough caused by fine dust in air.
Catarrhal cough, with rattling in chest.
The mucous râles are large and crepitous; hoarse cough; much moaning; moaning at every breath.
Child begins to cry immediately before cough comes on. (Compare *Hepar* and *Bryon.*).
Cough causing congestion of face and great redness of eyes.
Attacks of cough ending with sneezing.
Violent cough during sleep, with grinding of teeth.
Cough, with a bloody taste in mouth.
Cough causes scraping in throat, or pain in stomach and inclination to vomit.
Cough causes pain in pit of stomach, "seems to strike there."
Pain in sternum from coughing.
Expectoration of bloody mucus.
Pain in nape of neck when coughing.
During cough: pain in sternum; constriction of throat; stitches in chest or uterine region; pains in head, abdomen, hips or legs; reversed action of stomach; vomiting of mucus; bloody taste in mouth; bleeding from ear or nose; heat of face; redness or blueness of face; pressure in epigastrium; stiffening of body; convulsions.
Catarrh or cough, with coryza.
Coughing fit, with subsequent heat; with asthma; from rush of blood to chest.

[28] **Inner Chest and Lungs.** Tightness, oppression, or constriction of chest.
Constriction across chest, as if pressed inward from both sides.
Exceeding weight and oppression of whole chest.

Google

‖Painful pressure in chest extending into back.
Pressive pain in chest, with shortness of breath, and at same time between shoulders, when walking or sitting.
Pressure in r. chest, causes anxiety.
Pressure in chest affecting heart.
Rush of blood to chest.
Stitches in apex of r. lung. (Compare *Arsen.*).
‖Burning in r. chest.
Stitches in chest; with desire to cough, or particularly when coughing or yawning.
‖In pneumonia: young persons, full habit; temperature and fever high; face flushed; eyes congested; great nervousness; sleeplessness; delirium, or threatened convulsions, with tickling, dry cough.

[29] **Heart, Pulse and Circulation.** Violent palpitation, reverberating in head.
Tremor of heart, with anguish and an aching pain.
Gurgling at heart, a kind of palpitation when going upstairs.
Pressure in cardiac region, which arrests breathing and causes a sense of anxiety.
‖‖Throbbing in carotid arteries.
‖A beating of arteries of head and all parts of body, in morning on waking.
‖‖Congestion of blood to various parts, to head, chest, uterus.
‖Vascular excitement: throbbing of carotids; flushed face; red eyes; and full, bounding pulse.
‖Plethora; hemorrhages.
‖Pulse: much increased in force and frequency; full, frequent; accelerated, frequently full, hard and tense; large, full and slow; at times small and soft; slow, thready, irregular.

[30] **Outer Chest.** Heat in sternum.
Corroding, gnawing pain beneath cartilages of last ribs, right side.
‖Heat, swelling and hardness of mammæ. θMastitis.
‖The eruption begins on throat and chest. θScarlatina.

[31] **Neck and Back.** Painful swelling and stiffness of neck and nape of neck.
Swelling of glands in nape of neck, with cloudiness of head.
‖Inflammation and swelling of glands of neck and of back part of throat.
‖In coughing, a violent pressing pain in nape of neck, as if it would break.
Pressive pain externally in neck, when bending head backward, and when touching part.

Google

‖Distension and perceptible throbbing of vessels of neck.
Sour-smelling sweat only on neck.
Drawing pressure between r. scapula and spinal column.
Pressive pain under l. scapula, more towards outer side.
Shooting and gnawing pain in spinal column.
‖‖Gnawing in spine, with cough.
Stabbing, as if with a knife, from without inward, in vertebræ.
Drawing, burning and throbbing pain in spine.
‖Myelitis.
Rheumatic pain in back.
‖‖Backache, as if back would break.
Feeling in back as if it would break, hindering motion.
Soreness of last dorsal and first lumbar vertebræ.
Cramplike sensation in l. lumbar region.
‖Curvature of lumbar vertebræ.
Bearing down on to sacrum.

[52] **Upper Limbs.** Swelling of axillary glands.
Shooting, or stitching pressure on top of l. shoulder.
Lacerating, with pressure in shoulder, darting suddenly along arm; particularly painful at night.
Twitching of arms.
Paralytic drawing pressure, with weakness in r. upper arm and forearm.
Paralytic tearing pressure in anterior surface of l. upper arm.
A sense of stretching and twisting in upper extremities.
Drawing pain on inner side of l. upper arm.
Laming, drawing pressure, tearing in arms, with weakness.
Paralytic pressure in l. upper arm, with paralytic feeling and weakness of whole l. arm.
Heaviness and paralytic feeling in upper limbs.
Violent stabbing, as with a blunt knife, below head of humerus, from within out.
Tearing pain in humerus.
Bruised pain in upper arm.
Sharp shooting externally in l. elbow joint.
Cutting pain in interior of l. elbow joint when walking.
Cutting tearing in lower muscles of both forearms.
Painful jerking; spasms and convulsions of arms and hands.
Swelling, also scarlet redness of arms and hands.
‖‖Peculiar cutting pains commencing in wrist, shooting to elbow and above, always from periphery to centre.
Not able to turn hand easily and freely on its axis (as when dropping from a glass), turns only by jerks, as from want of synovial fluid in wrist joint; painless.
Spasmodic closing of fingers.

Google

Numbness and prickling in hands.
Hands swollen and dry, drops things.
Paralytic tearing in middle joint of r. index finger.
Painful drawing in posterior joint of l. middle finger, as if in periosteum.

[33] **Lower Limbs.** Hip gout, with burning stinging, most violent at night and by contact.
!Hip-joint disease, first stage; sharp pains, < at night; screams out in sleep.
Stiffness of hip joint.
Cramp pain in gluteal muscles, with tension on bending body forward.
Cutting stitches in outer muscles of r. thigh, just above knee, only when sitting.
Pain in thighs and legs, as if beaten and as if carious; fine shooting and gnawing along bones, with violent tearing in joints; pain rises gradually from ankle to hips, necessitates, while sitting, constant motion and shifting of feet; is milder when walking.
Cramp pain in both knee joints, particularly about patellæ; she could not walk up-stairs.
Cramplike pain in r. knee near patella, towards outer side, when sitting.
Burning stinging in knee joint; worse at night.
Sensation in joints of lower limbs, particularly knees, as if they would give way, especially when walking, and more marked when going down hill.
Dull tearing in legs.
Heaviness and lameness of legs and feet.
Tearing pressure in middle of inside of leg, uninfluenced by motion or contact.
Tremulous heaviness of legs.
Lower extremities cold and semirigid.
Paralysis of lower extremities, together with neck of bladder and sphincter ani.
!Large bloodboil on thigh, discharging yellow, thick, bloody pus.
Pain as if bruised in heel, when treading thereon.
Pain in metatarsal bones, as if dislocated.
Tension in r. tarsal joint while walking in open air.
Cold feet.
Boring, digging, or shooting pains in soles.
Tension in sole of r. foot near heel, changing into a tensive pressure; pressing upon parts > for some time.

[34] **Limbs in General.** !He slowly moves extremities upward, trembling, then with greater force he throws them downward.
!Twitchings of limbs.

Google

‖Convulsive movements of limbs.
‖Convulsive twitching, twisting and turning of extremities.
Pressure, burning, stinging or tingling in limbs.
‖Heaviness of hands and feet.
Heaviness and tired feeling in limbs.
Hands and feet become very cold.
Lassitude of limbs.
Loss of co-ordination of muscles of both upper and lower limbs, very like heaviness and helplessness of movement observed in first stage of progressive paralysis of the insane.

Rest. Position. Motion. Rest: drawing pains in head and neck.
‖‖Disinclination and aversion to work or motion.
‖Restlessness; he was obliged constantly to move body to and fro, especially hands and feet.
‖Cannot stay long in any position, at one time lies, at another sits, again stands, in all of which he constantly changes his position.
Lying down: headache >, or ceases; salivation <; cough <.
Lying on r. side: pain in liver <.
Must lie down: with supraorbital headache.
Bending head back: pressure of brain forward >; headache >.
Sitting erect: pressing towards genitals >; pain in chest.
Sitting: headache >; cutting stitches in muscles of thigh.
Sitting bent forward: feeling as if a hard body pressed from r. inguinal ring; pressing towards genitals as if everything would fall out; cramp in r. knee.
Stooping forward: flatulent colic >.
Bending forward: pain in gluteal muscles.
Bending backward: colic of infants.
Bending head backward: superficial pain in neck.
Lying flat on belly across chair: colic of children >.
Standing: intestines seem to press outward below umbilicus; pressing towards genitals >.
Sitting up: can only sleep.
Slides down in bed: in typhoid.
‖Could only lie on painful side. θAngina.
Every jar, turning or movement of body increases pain, patient therefore lies immovably on his back.
Motion: confusion of head <; vertigo <; aching forehead <; drawing in nape of neck; pain side of face <; pressure in r. hypochondrium <; diarrhœa <; shooting in bladder; metrorrhagia <; cough <.
Act of lying down: bed seems to rock.

Google

When rising from a seat he staggers, cannot use the cars; in leaving he would fall against the wheels; headache <.

Walking: uncertain, hasty, precipitate; dulness and confusion of head <; vertigo <; frontal headache <; illusions of sight; pain in pit of stomach; pressing towards genitals as if everything would fall out <; pain in chest; pain in l. elbow joint; tension in tarsal joint; pain in ankles to hips <; sensation as if knees would give way.

Stooping: vertigo <; headache > or <; sensation as if brain would issue from forehead; shooting in head <.

Cannot bear stooping.

Ascending stairs: palpitation.

Turning in bed: vertigo <.

Must bend double: from pain in hepatic region.

Anxiety prevents remaining long in one position.

[36] **Nerves.** Spasms: from laughing or crying.

Hysteria: headache predominates; with spasmodic symptoms in chest, abdomen and limbs; predominating symptoms of genital organs.

Great restlessness, body is thrown to one side then to other; sometimes chest, at other times abdomen is elevated.

Great restlessness with sudden startings.

Great irritability and sleeplessness.

Bodily inquietude; he was constantly obliged to move whole body to and fro, and especially hands and feet; he cannot stay long in any position, now he lies, now he sits, now he stands, so that he is always changing his posture in one way or another.

He walked round and round in a circle.

Twitching of extremities.

Twitchings more in arms and face; difficult articulation; throws head back, rolling head. θChorea.

Subsultus tendinum.

Easily startled; sudden starting.

Starting on falling asleep; the feet are jerked upward and the head forward.

He starts as if in affright, and wakes when he is just falling asleep.

She started as in affright in otherwise quiet sleep, feeling as if she was falling deep down, which caused her to shudder violently.

On closing eyes a sudden inward shock passing upward and preventing sleep. θSunstroke, from exposure of nape of neck.

Spasmodic motion of body, generally backward. θChorea.

Throws body forward and backward, while lying, like

Google

constant change from emprosthotonos to opisthotonos. θChorea.
Fear of apparitions, with convulsive motion of limbs, or twitching of single muscles.
Muscles of face, jaws and limbs, agitated by convulsive twitchings.
‖Spasmodic diseases.
‖‖Eclampsia with children; convulsions.
‖Convulsions commence in arm. θEpilepsy.
‖Convulsive momentary extension of limbs on awaking.
Convulsions come suddenly.
‖Repeated convulsions and horrible spasms, especially of flexor muscles.
‖Violent convulsions; distortion of limbs and eyes.
Convulsions followed by sound sleep.
Renewal of fits at every pain; more or less tossing between spasms, or deep sleep, with grimaces or starts and cries, with fearful visions.
Spasms, startings and convulsions of limbs: after a fit of chagrin; renewed by least contact: with screams and loss of consciousness; with delirium; with extension of limbs, or violent distortion of muscles.
She has the appearance of being stunned; a semiconsciousness and loss of speech; convulsive movements in limbs and muscles of face; paralysis of r. side of tongue; difficult deglutition; dilated pupils; red or livid countenance.
Attacks similar to epilepsy.
‖Epileptic convulsions.
Epilepsy, with violent congestion to head, with attacks or at other times.
‖Epileptic convulsions, followed by an apoplectic condition.
Epilepsy: patient clutches wildly at throat; eyes roll back in their sockets, he froths at the mouth; brought on by fright.
Clonic and tonic spasms.
‖From her 3d to her 9th year, every three months a spasmodic attack; face red, with snapping jerks of lower jaw and biting her tongue; lying on her back.
Clenched teeth with such force that they could not be opened.
‖Tetanus and trismus.
‖Became unconscious while working in hot sun; jaws fixed; head hot; feet cold. θTetanus.
Contortions of extremities, with great prostration.
Paroxysms of stiffness, and immobility of all limbs, or of single limbs only.
Stiffness of whole body.

Digitized by Google

Great prostration.
‖After prostration by sunstroke. θEpilepsy.
Great general debility.
All her strength goes in an instant.
Limbs relaxed; red swollen face; dilated pupils; paralysis and puffiness of upper lids; stertorous breathing; weak but rapid heartbeat; difficult swallowing.
Trembling in all the limbs.
General tremor with anxiety.
Weakness and tottering gait.
Paralytic weakness of all the muscles, especially of feet.
‖Spasm of one and paralysis of other side.
Fainting fits, sometimes resembling lethargy.

[37] **Sleep.** Frequent yawning.
‖When yawning he has to cough. θHepatitis.
Towards evening drowsiness, with yawning.
Great drowsiness and somnolency.
The child is very drowsy, half sleeping and half waking.
Sleep prevented by anxiety.
He can only sleep sitting up.
‖Great inclination to sleep.
‖‖Sleepy, yet cannot sleep.
Quite profound somnolency, with subsultus tendinum; pale, cold hands, and hard, small, rapid pulse.
Soporous after the spasms.
Somnolence: stupor; lethargy; deep sleep with snoring.
‖Comatose condition, with rattling in throat; very red face.
She does not sleep well; she lies half sleeping and half waking.
Frequent waking in night, with great restlessness, anxiety and tossing about in bed.
Anxiety and apparitions prevent sleep; burning heat, thirst, with difficult deglutition; restless tossing about, even twitching.
‖Went to bed after 11 o'clock; sleepless from 2 to 5; laughed, and said she saw laughing masks.
‖During sleep: singing and loud talking; moaning; tossing about; screaming; starts.
‖Uneasy sleep before midnight; the child tosses about, kicks and quarrels in its sleep.
‖She wakes in night full of fright and fear; it appeared to her as if there was something under bed which made a noise; she felt dry heat on awaking.
‖At night boys became restless, spoke irrationally, and could with difficulty be kept in bed.
‖Great restlessness, boy wished to escape, and had to be kept on his couch by force, at same time he developed a vigor and strength beyond his age.

Google

‖Moaning and starting in sleep; head hot.
‖Awakes from sleep and looks frightened, with staring eyes.
‖Children sleep with half-open eyes.
He does not sleep well, and "hears all that is going on."
‖Restlessness at night; grinding of teeth, now and then convulsions.
Deep, sound sleep, full of dreams.
Vivid dreams, but could not remember them.
Sleep is broken by disagreeble dreams.
‖Restless sleep, with anxious and frightful dreams.
‖He is frequently awakened out of sleep by fearful dreams and convulsions.
Anxious dreams: about murder; street robbers; of danger from fire; of swimming.
‖Sleep restless, disturbed dreams; irrational talking.
Sleep much disturbed by frightful dreams; complains of intense pains in head, and says that it feels enormously large; great intolerance of light and noise; at noon very delirious, and would insist that there were horrid monsters all over room staring at her.
‖Very restless sleep.
‖Restless tossing about in bed.
‖‖Starts as in affright, during and from sleep.
‖As soon as he closes his eyes for sleep, shocks run from below and startle him; it torments him with each beat of pulse; great longing for sleep. θSunstroke from exposing nape of neck.
Stertorous breathing.
‖Feet icy cold; can scarcely be warmed.
‖Sleeplessness.
‖When awaking from sleep exceedingly irritable and inclined to weep.
In morning feels as if had not slept enough.
Sleeps much, yet not refreshed.

[38] **Time.** 2 to 5 A.M.: sleeplessness.
Morning: boring pain in r. frontal eminence; eyelids agglutinated; nosebleed; toothache renewed; mouth slimy; pain in hypogastrium <; bearing down pains <; dysmenorrhœa <; dyspnœa; general beating of arteries on awaking; fever with thirst.
10 A.M. to 2 P.M.: violent tenesmus; dysenteric stools.
Noon: violent thirst; contractive dragging in region of navel; violent cough; delirium; coldness; weakness; heat; sweat.
Day: dry cough; several attacks of fever; frequent chilliness; sweat during sleep.
Afternoon: contractive dragging in region of navel;

Google

shortness of breath after drinking coffee; asthma; attacks of cough <; fever; heat without thirst.
Usually < after 3 in afternoon, and again after midnight.
Towards evening: drowsiness, with yawning.
Evening: stabbing through head; toothache <; great thirst; pressure in abdomen as from a stone; tearing upward in l. spermatic cord; asthma; cough <; whooping cough <; chill; sweat; fever violently aggravated.
10 P.M.: cough commenced.
11 P.M.: barking cough awakens suddenly.
Night: headache <; nosebleed of children; hears all "that is going on;" toothache <; pains in stomach; enuresis; seminal emissions; dyspnœa; dry cough; darting pressure in shoulder <; pains in hip joint <; burning stinging in knee joint <; awakens full of fear and fright; restlessness; child vomits; typhoid fever <; fever.
Before midnight: uneasy sleep.
Midnight: ineffectual efforts to vomit, with cold sweat.
After midnight: dry cough, with retching; whooping cough most violent.

[39] **Temperature and Weather.** ‖Takes cold from having hair cut.
‖Worse in sudden changes, from warm to cold.
‖Better wrapped up warmly in room.
Spring: boils, etc.
‖Sunstroke.
‖‖Liability to take cold, with great sensitiveness to draughts of air, especially when uncovering head.
‖‖After riding in a cold wind swelling of tonsils, preventing deglutition.
Open air: frontal headache <; pressure deep in brain <; eyes sensitive; dyspnœa >; tension in tarsal joint.
Cold air: toothache worse.
Draught: takes cold easily.
Sun: headache; inflammation at base of brain, after hair cut; unconsciousness from working in hot sun.
Hot, damp weather: asthma worse.
Warm weather: nose red and hot.

[40] **Fever.** She is occasionally chilly.
Shivering running down back.
‖Feels very chilly, wants warmth of a stove. θAngina.
‖Cool hands and forehead, with much thirst, but no fever.
Shuddering, or violent chill in back, epigastrium, or arms.
Chill and heat alternating.
‖At noon: coldness, with marbled skin and blue lips; so weak that he falls; afterwards heat with glowing red

Google

face and burning ears; soon afterwards sweat on head in drops.

Chill in evening, mostly on arms, with heat of head.

Internal chill, with external burning heat.

‖Several attacks of fever in one day, during which hot stage followed cold within a few minutes to half an hour after, always without thirst in either stage, and mostly with confusion of head.

‖Heat of forehead, with cold cheeks.

Frequent chilliness during day, though well protected and even feverish; sight is dim from intensity of fever; surface of body imparts a burning sensation to hand of physician; pulse has a full double beat.

‖Milk fever, with coldness of nose, finger tips and feet; at night fever, restlessness, vomiting and frequent stools.

‖Violent chills; thirst; bitter vomiting; throbbing in forehead; weeping; stiff neck; pain in epigastrium; heat, thirst and sweat.

‖‖Coldness of limbs, with heat of head.

‖Temperature of head very much increased, of rest of body diminished.

Internal heat, with anxiety and restlessness.

‖Heat of head, with redness of face and delirium.

‖During hot stage: delirium; redness and puffiness of face, great thirst.

‖Heat: violent burning, internal or external; dry, principally of head and face.

‖Head hot; face red; eyes protruding, staring, pupils dilated.

‖Skin hot, dry, scarlet, especially intense on face and ears.

‖Child cries, refuses to eat, vomits at night; fever in morning, with thirst; red face; little blisters on inner lips; forehead burning hot and painful; pulse rapid and soft; when taking a deep inspiration or when retching, feels pain in middle of sternum; frequent clenching of fingers. θA child disposed to convulsions.

‖Excessive heat: distended veins; insatiable thirst, with anxiety and trembling.

Flying heat.

‖Great heat; distension of superficial veins of body and insatiable thirst.

‖Typhoid fever: nights are always worse; at first he lies quiet, but moans often; trembling, twitching of lips, of head and limbs; slides down in bed; gets restless now and then, or screams and says he cannot bear it; sometimes he complains, sometimes he refuses to answer; pulse very small, thready and irregular; a strong throbbing pulse in head; in attacks, heat in head, with thirst;

Google

ears cold and white; face pale; throat so dry that it hurts when he drinks; he has hands always on sexual parts; complains either of pain in urinating or that the urine passed too slowly.

‖Colic, with distension of abdomen; vomits breakfast, has not the least appetite, but great thirst; tongue whitish, furred; aversion to sweets; no stool; burning heat of body, with a very frequent pulse; face either very pale or very red; pupils dilated; prostrated and ill-humored. θWorm fever.

Dry heat and throbbing.

‖Violent heat.

‖Temperature of skin increased; face red; pulse accelerated, senseless talking, and tottering almost as if drunk.

‖‖Inflammatory, catarrhal, rheumatic, milk, puerperal and typhoid fevers, with furious delirium and loss of consciousness.

‖‖Bellyache, with vomiting of all food and some large worms; violent thirst; skin hot and dry; pulse quick; violent burning headache; restless and talking in night; great prostration; a boy. θWorm fever.

‖Heat predominating; ‖averse to uncovering.

‖Burning heat within and without; body burning hot like fire.

‖Burning heat over whole body; skin universally red; pulse full, quick, and extremely frequent.

‖Burning heat of body, with extreme distension of superficial bloodvessels, and furious delirium.

Fever in afternoon and night.

‖‖Temperature of skin very much raised; skin scarlet.

‖Child has fever, with transient perspiration; thirst; nausea; desire for this and that, things which it refuses when offered; says everything is bitter; complains of sore throat; has ineffectual urging to stool; is very sensitive, and cries at least provocation.

‖Continuous dry burning heat, with sweat only on head.

Pains in liver with violent vomiting; fever heat; sleep followed by thirst and sweat. θHepatitis.

‖In afternoon, heat without thirst; in evening, sweat; cough < during fever; hungry, but cannot eat; talks in sleep and grinds teeth. θBloodboil on thigh.

‖Sensation of heat with actual heat in whole body, but particularly in face, which was red and covered with sweat, with confusion of head.

‖‖Fever heat, now and then sweat, they often ask for drink, but do not take much; pulse full and frequent. θAfter abuse of *Sulphur* in itch.

‖Sweat: on covered parts; with or immediately after heat,

Google

mostly in face; staining clothing and of empyreumatic smell; during sleep, day or night; ascending from feet to head; copious; staining brownish-yellow.

Entire want of sweat.

‖General sweat suddenly occurring and quickly disappearing.

Cold sweat on extremities.

General sweat, excepting on head.

41 **Attacks, Periodicity.** Pains come on suddenly, and, after a shorter or longer duration, cease suddenly.

Sudden attacks of violent cramplike pain in one side of chest, or of abdomen, or loin, or one elbow, especially during sleep, causing one to bend painful part.

‖Most all pains in short attacks.

Periodical nervous headache.

42 **Locality and Direction.** Right: pressure in forehead; shooting in frontal eminence and temple; drawing pain in temple and orbit; stabbing side of head; quivering of upper eyelid; tearing in ear and side of face; swelling of parotid; shooting in maxillary joint; pressing below zygoma; toothache upper row; painful swelling of gums of side; tonsillitis; hand clutches throat in epilepsy; pain in liver, < lying on side; pain in hypochondrium; pain in ileo-cæcal region; feeling as if a hard body pressed from inguinal ring; ovary enlarged; paralysis side of tongue; stitches in apex of lung; burning in chest; drawing pressure between scapula and spine; paralytic weakness of arm and forearm; paralytic tearing in index finger; tension in tarsal joint; tension in sole of foot; cutting stitches in thigh when sitting; cramp in knee.

Right to l.: cutting from r. occipital bone to l. parietal bone; pinching in ears.

Side to side: stabbing in head.

Left: shooting in temple; triplopia; tickling in nostril; pains under orbit; mobility of facial muscles of side; tearing in tonsil; fine shooting in groin; tearing in spermatic cord in evening in bed; pressive pain under scapula; cramp in lumbar region; shooting or stitching top of shoulder; paralytic weakness of arm; pain inner side of upper arm; sharp shooting in elbow joint; painful drawing in middle finger.

Above downward: tearing in ear and r. side of face; tension in chest; pressing towards genitals as if everything would fall out.

Below upward: shock through body on closing eyes; tearing in l. spermatic cord: pains in ankles.

Without inward: stabbing as with a knife in vertebræ.

Google

Within outward: shooting in l. temple; pressure in head; shooting in eyes; feeling as if a hard body pressed from r. inguinal ring; stabbing below head of humerus.

Sensations. As if a board was before forehead; as if head was full of water; as if brain was shaken in skull; as if bones of forehead were lifted up; as if a skin was drawn over ears; as if lower jaw was drawn backward; as if objects around him swayed; as if she was being rocked; as if bed was bouncing patient up and down; as if everything turned in a circle; as if brain was pressed to forehead; as if everything would issue at forehead when stooping; as if brain rose and fell in forehead at every step; as if brain was compressed; headache above orbits; as if brain was shaken; as if eyes were starting from their sockets; as if sutures of skull were being torn open; as if a lever was being applied to force head asunder; as if something rocked and swayed in a jerking manner in head; as if skull was thin and could be pressed through; at every step a jolt, as if a weight was in occiput; as if skull was as thin as paper, as if it was transparent; as if muscles of forehead and eyes were contracted; a sudden shock running through body from below up; as if eyes had been torn out or pressed into head; as if eyes were surrounded by a hot vapor; feeling of sand in eyes; as if teeth would be forced out of head; teeth feel elongated and on edge; as of a vesicle on tip of tongue; as of a foreign body in œsophagus; as if a tumor stopped up throat; as if something was in pit of stomach, exciting cough; as if a spot in abdomen was seized with nails, griping, clutching; as if hypochondria were being pressed out; as if a ball or lump would form in abdomen; as though intestines pressed outward, below umbilicus; as if a hard body pressed from within outward at r. inguinal ring; as if mucous membrane of anus was swollen and pressed out; as from a large worm twisting in bladder; as if testicle was drawing up into abdomen; as if a rope was tied around hypochondria; as if womb would fall out; as if back would break; as if knees would give way; as of a foreign body in larynx; as if a mouse was creeping about in muscles.

Excruciating pains: about pit of stomach.

Lancinating: in throat; in ovary.

Thrusts: in internal ear.

Cutting: in r. side of head, from frontal to occipital region; in parietal bone; in various parts of head; in side of face to temple, ear and neck; in pit of stomach; in stomach; in abdomen; in uterus; in loins and

Google

sacrum; in l. elbow joint; tearing in lower muscles of both forearms; from wrist to elbow; stitches in outer muscles of r. thigh.

Stabbing: from temple to temple; from forehead to occiput; through head, as with a double-edged knife; in forehead, vertex and occiput; l. lower jaw; in vertebræ; below head of humerus.

Stitches: in head; flying through head; itching stitches in inner canthus; in ears; in maxillary articulations; in testicles; in ovary; in uterine region; in chest; in vagina; stitching pressure on top of l. shoulder; in apex of r. lung.

Shooting: in r. frontal eminence; in r. temple; dull in l. temple; in various parts of head; in eyes; in internal ear; in r. parotid; from side of face to temple, ear and neck; in r. maxillary joint; in lower jaw; from sup. maxilla into internal ear; in pharynx; in throat; in pit of stomach; in stomach; in l. groin; in bladder; in urethra; behind glans; in genital region; in spinal column; externally in l. elbow joint; in soles; along bones.

Stinging: in eyes; toothache; in abdomen; from kidneys to bladder; in uterine region; in nodules in breast; in hip; in knee joint.

Prickling: in hands.

Lacerating: in external and internal ears; toothache; in shoulder.

Tearing: from r. temple over orbit to r. cheek; in various parts of head; in r. vertex; in vertex; in head; in internal and external ears; in r. side of face; from side of face to temple, ear and neck; in jaws; behind r. zygoma; toothache; inner surface of angle; in l. spermatic cord; in inflamed breasts; in arms; in humerus; in joints; in legs; pressure in inside of middle of leg; cough at night.

Paralytic tearing: in middle joint of r. index finger.

Jerking: headache; in teeth; in abdomen; in direction of perineum from lower intestines; of arms and hands.

Beating: in temples.

Boring: under r. frontal eminence; in various parts of head; in ears; in soles.

Pinching: in ears; in abdomen; under navel.

Gnawing: at frontal eminences; in stomach; beneath cartilages of last ribs; in spinal column; along bones.

Clawing: around navel; in uterine region.

Screwing: in ears.

Stretching: in upper extremities.

Twisting: in vertex; in upper extremities.

Google

Turning and twisting: in bladder.
Digging: in vertex; toothache; in soles.
Drawing: down in temples and r. orbit; from r. temple over orbit to r. cheek; incessant, in head; in frontal bone; in nape of neck; behind r. zygoma; in upper teeth; toothache; in spermatic cord; in one of testicles and spermatic cord; in pelvic region; in loins and sacrum; pressure between r. scapula and spinal column; in spine; from small of back to thighs; inner l. upper arm; in joint of l. middle finger.
Burning: in eyes; of eyelids; in tip of nose; heat, in face; in swollen cheek; of lips; in mouth; in fauces; in stomach; in abdomen; in larynx; in r. chest; from kidneys into bladder; in spermatic cord; in ovarian region; in uterine region; in spine; in hip; in knee joint.
Smarting: in eyes; in pustules on upper lip; in prepuce.
Corroding: beneath cartilages of last r. ribs.
Scalded feeling: in cheek bones; in mouth.
Burnt feeling: in vesicle on gum.
Pressure: in forehead; as if a stone was pressing forehead; in lower part of forehead; above nose; hemicrania; in r. temporal region; in occiput; in brain towards temples, occupying large areas in head; at vertex; in eyeball; over r. eye; below r. zygoma; in throat; in chest; in stomach; painless; in r. hypochonder; in abdomen; in hypogastrium; in region of os pubis; towards anus and genitals; in vesical region; in uterine region; through vulva; in sacrum; in loins and groins; in cardiac region; in nape of neck; under l. scapula; in shoulder; in l. upper arm.
Bearing down: in abdomen; in uterus; on to sacrum; with leucorrhœa.
Laborlike pains: deep in pelvis, to back and loins.
Tensive pressure: in r. side of forehead; from temple to orbit; hemicrania; in l. vertex and forehead; in pit of stomach.
Aching: in forehead; in eyes; in lids; in upper part of abdomen.
Soreness about heart; in sinciput; of eyelids; from throat to ears; in teeth; of palate; in throat; in abdomen; of last dorsal and first lumbar vertebræ.
Raw feeling: of corners of mouth; of palate; in throat; in abdomen.
Scraping: in throat; in region of epiglottis; in larynx.
Scraping itching: of forehead.
Bruised pain: in nose; in upper arm; in heel.
Beaten feeling: in thighs and legs.

Google

Squeezing; in lowermost intestines.
Wavelike sensation: hemicrania.
Distension: of whole brain; of abdomen.
Bursting: hemicrania; in r. temporal region.
Expansive pain: in head.
Dislocated feeling: in metatarsal bones.
Constricted feeling: in mouth; of gullet; of throat; of abdomen, around navel; under navel; in lower intestines; in rectum; in larynx; in chest.
Contractive pain: in scalp; in lower abdomen; in rectum; of anus.
Contractive dragging: in region of navel.
Crampy pain: in frontal eminence to zygoma and lower jaw; in r. external ear; at root of nose; in stomach; in abdomen and lower intestines; in uterus; in loins and groins; in l. lumbar region; in gluteal muscles; in knee joints; in r. knee.
Cramps: of hands and feet; in stomach along ureter; in legs, during labor.
Twitching: of facial muscles; of arms; of abdominal muscles.
Quivering: of r. upper eyelid.
Trembling: of r. upper eyelid; of upper lip; of tongue.
Swashing: in head.
Gritty feeling: in eyelids.
Tension: in lower jaw; spasmodic, from chest into abdomen; in uterine region; in r. tarsal joint; in sole of r. foot; in gluteal muscles.
Tightness: in maxillary articulations.
Throbbing: in head; in forehead; violent in brain; in teeth; at pit of stomach; in ovary; in carotids; in spine; in nodules in breast.
Pulsating: pain in head.
Fulness: at temples and forehead; in stomach; in uterine region.
Empty feeling: in stomach.
Rheumatic: toothache; pain in back.
Neuralgic pain: in infraorbital nerve; beneath l. orbit to ear.
Ulcerated feeling: in gums.
Dull pain: in back of eye.
Lameness: of legs and feet.
Paralytic feeling: in upper arms.
Tired feeling: before and after vertigo.
Undefined pain: over eyes; in orbits; in stomach through to spine; in liver; in r. ileo-cæcal region; in sternum; in nape.
Weight: in head.

Google

Heaviness: in head; in uterine region; in upper limbs; of legs and feet; of lids; of hands.
Stiffness: in occiput; of neck; of hip joint; of body.
Weakness: of l. upper arm.
Numbness: in temples; of face; in hands.
Tickling: in l. nostril; voluptuous in lower parts of rectum and anus; in throat.
Itching: in eyes; of eyelids; itching stitches in inner canthus; of gums; on abdomen; in back part of top of larynx.
Heat: in head; in face; in throat; in abdomen; in chest; in sternum; of mammæ; in vagina; of body.
Coldness: in brain, at middle of forehead; of face; of forepart of tongue; in nose, finger tips and feet.
Dryness: burning in both eyes; of lids; of Schneiderian membrane; of tongue; in mouth; about fauces; in pharynx; in throat; in larynx; in vagina.

[44] **Tissues.** Suits persons with largely developed brains.
!Acts on circular fibres of bloodvessels; on sphincters, as in spasm of os uteri, etc.
Inflammation of serous and mucous membranes.
Pains along periosteum.
Red shining swelling of joints.
!Phlegmonous inflammation.
!!Engorgement of glands; acute swelling.
Inflammation of lymphatic vessels and glands in children.
Glandular swellings, painful or suppurating.
Swelling of salivary and cervical glands.
Inflammation of internal organs, with disposition to suppurate.
The inflammation is of an erysipelatous kind, it runs in radii as it extends to adjacent parts.
!Induration after inflammation.
!Scirrhous indurations.
!Varices.
!Scrofulous and rickety complaints.
!Rheumatic and gouty complaints, with inflammation and swelling.
!Atrophy and wasting of scrofulous subjects. θMarasmus of children.
!Gangrene.
!!Rachitis, mostly when abdomen is puffed up tense and hard; child shakes and withers; pale all over, with flushes; pupils not very sensitive.

[45] **Touch. Passive Motion. Injuries.** !!Tenderness of abdomen aggravated by least jar, even of bed or chair upon which she sits; she is obliged in walking to step with great care, for fear of a jar.

Google

Pressure: headache >; shooting pains in forehead >; vertex headache <; pain side of head >; toothache >; wants to lean head against something hard and cold; pressure on epigastrium causes pain as if hypochondria were being pressed out; flatulent colic >; clawing around navel >; ovarian region tender; vesical region sensitive; lower part of larynx sensitive; tension in sole of r. foot better.

Touch: outer head sensitive; nose feels bruised; pain r. side of face <; toothache <; throat sensitive; r. hypochondrium sensitive; abdomen tender; pain r. ileocæcal region <; danger of suffocation from touching larynx; pain in hip joint <; skin sensitive; pit of stomach sensitive.

Spasm renewed by least contact (especially in hydrophobia).

Painful sensitiveness of skin to all contact.

Skin. Painful sensitiveness of skin to contact.

Heat over whole body, with bluish redness of whole surface.

Skin imparts a burning sensation to examining hand.

Heat, redness and dryness of skin.

Red, hot swelling of affected parts.

Tense skin.

Skin alternately red and pale.

Great redness of parts, redness extending in radii.

Universal redness of skin, with or without rash.

Skin scarlet, smooth and shining.

Red, scaly eruption on lower part of body, as far as abdomen.

Inflamed red patches of skin, and irregularly shaped scarlet spots over body.

Redness of whole body, with quick pulse.

Erythema of skin.

Urticaria: during profuse menstruation; over whole body, most on inner side of limbs, none on face; sometimes resembling mosquito-bites; itches most mornings and evenings; scratching feels pleasant; at times glowing heat, with sweat, then again dulness and shivering over back; < after drinking cold water; sensation as if brain was shaken; when yawning, coughing or sneezing, pain runs from nose upward and inward, as if head would be torn off.

Erysipelatous inflammation with swelling.

Phlegmonous erysipelas; bright red and radiating.

Vesicular erysipelas (when fever is violent).

Intense erysipelatous fever, accompanied by inflamed swellings, passing even into gangrene.

Google

Measles.

‖Eruptions like roseola and scarlet fever, with fever, sore throat, cough, headache, etc.

Eruption resembling measles; scarlet spots, and scarlet redness on various parts, sometimes with hot swelling of parts.

‖Red spots with small vesicles becoming confluent, showing darker and redder spots, getting white from pressure with finger; fever heat with thirst; frequent, small pulse; quick, short breathing; sensation of weakness in chest, and a pain which does not permit lying down; bodily restlessness; trembling; sleeplessness; much saliva; crampy, shooting pain below pit of stomach; pit is very sensitive to touch; several days no stool.

‖The face, upper extremities and trunk, exhibited a diffuse scarlet efflorescence, studded with innumerable papillæ, very closely resembling rash of scarlet fever; eruption terminated abruptly at wrists and flexors of thighs, rest of body retaining natural color; skin hot and dry.

‖Uniform, smooth, shining, scarlet redness of skin, with dryness, heat, itching, burning, and bloatedness of parts, especially face, neck, chest, abdomen and hands.

‖A scarlet redness suddenly spread over body, especially face and limbs, with which appeared heat and exaltation of all faculties, without thirst.

‖Scarlet redness of skin, especially face, with great cerebral action; red, swollen face, with staring eyes; erysipelas of face (with *Graphit.*, *Laches.* and *Rhus tox.*).

‖Scarlet redness of skin of face and neck, followed second day by peeling off of cuticle.

‖Redness, like scarlatina, of entire surface of body, with a white circle around mouth and nose, and great dryness in throat.

‖Scarlet rash over whole body; eruption resembling measles; purple rash.

‖Smallpox when brain is affected.

‖‖In true Sydenham scarlet fever, where eruption is perfectly smooth and truly scarlet.

‖Bloodboils on various places.

‖An infant, after suppressed itch, nightly fever without thirst; pale lips and face; offensive smelling stools; restlessness.

‖‖Ulcer on l. cheek, with bloody ichor and a discolored fundus and raised edges.

‖‖Ulcers if suppuration is interrupted and pains follow.

Scrofulous and mercurial ulcers, also cancerous.

‖Bloodboils after abuse of *Sulphur*, with fever.

Google

‖Red streaks, like radii, extend from scirrhous induration or ulcer.

Pustules on nape of neck, arms and back.

‖‖Jaundice after abuse of Peruvian bark or mercury; in complication with stones in gall-bladder.

Vesicular eruptions with scurf, whitish border and swelling.

Crawling itching over whole body, fugitive, now here, now there.

‖Snake-bite, when given at once, before difficult breathing sets in.

47 **Stages of Life, Constitution.** ‖Bilious, lymphatic temperament.

‖Girl, æt. 10, light hair and complexion, blue eyes. θEpileptic convulsions.

‖A man, æt. 27, healthy, never had vertigo; after cutting hair and exposing nape of neck to a tropical sun, sunstroke.

48 **Relations.** Antidotes to *Bellad:* effects of large doses by vegetable acids; infusion of galls, or green tea; *Opium* (?), *Coffea, Hyosc.;* effects of small doses by *Camphor, Coffea, Hepar, Hyosc., Opium, Pulsat., Sabad.* (salivation), vinum. *Bellad.* antidotes: *Acon., Arum triph., Atrop., Cinchon., Cuprum, Ferrum, Hyosc., Jaborand., Mercur., Opium, Platin., Plumbum;* sausage poisoning; ‖‖oil of turpentine.

Frequently useful after: *Arsen., Chamom., Hepar, Laches., Mercur., Phosphor., Nitr. ac.*

Bellad. cured spasms of chest after *Cuprum.*

After *Bellad: Cinchon., Chamom., Conium, Dulcam., Hepar, Hyosc., Laches., Rhus, Seneg., Stramon., Valer., Veratr.,* are frequently indicated.

Has cured constipation after failure of *Opium, Nux vom., Bryon.* and *Alumina.*

After *Bellad.,* if there is a strong craving for lemon juice, it may be allowed to hasten convalescence.

Similar to: *Acon., Alcohol* (merry craziness); *Arsen.* (pains of cancer, etc.); *Bryon., Calc. ostr., Chamom., Cicut., Coffea, Cuprum, Eupat. purp.* (diuresis and vesical irritation, but *Eupat.* has more hyperæmia and vesical inflammation); *Gelsem., Hepar, Hyosc., Laches., Mercur., Nux vom., Opium, Pulsat., Rhus tox., Stramon.* (rage), *Tereb., Veratr.*

Complementary: *Calc. ost.*

Incompatible: vinegar (headache), *Dulcam.* (?).

Google

BENZOIC ACID.

Benzoic acid. C_6H_5, CO,OH.

Proved since 1838, and used in many cases by Dr. Jeanes; arranged and published by him, with the additional proving of Dr. Lingen (1844), in Transactions of American Institute, 1846, vol. i, page 13 to 25. Chapman published some cures in 1849 in the British Quarterly, vol. vii, page 390, without giving credit to Jeanes. C. Hering received a proving of Dr. Nusser in 1845, and published a translation of Jeanes' report in his *Amerikanische Arzneiprüfungen*, adding all the cures known at the time and the proving of Petroz from 1847. This received the honor of republication in the famous *Lehrbuch* of Grauvogl, who was in our medical School what Schopenhauer was in the philosophical school of Kant.

[1] **Mind.** Confused head.
Omits words while writing.
Cannot get rid of an idea.
Activity of mind while at work, followed by anxiety.
Inclined to dwell on unpleasant things; if he saw any one deformed it made him shudder.
Sadness.
Anxiety; while sweating.
Child cross, wants to be nursed in arms.
After mental emotions headache.

[2] **Sensorium.** Vertigo, fearful of falling sideways, usually in the afternoon.
Confusion of head.
Sensation as if there was air in head.
Tired feeling in head, as from night watching.

[3] **Inner Head.** While sitting, pressure on whole lower part of head and whole spine, as if they were pressed like an elastic body, so that he stretched himself involuntarily and bent forward; anxiety.
Pain and heat in region of organs of reverence and firmness.
Hammering pain in temples, has to lie down.
Pressure on vertex extending to spine, with anxiety.
Tearing pain in vertex.
Fearful pain in occiput or cerebellum, which had confined the young man to bed for three weeks.
Cold feeling in head.
Shaking in head.
Rheumatic pains in head.

Google

Head worse: from mental emotions; exposure to a draught of air; uncovering of head; in morning on awaking; in rest; periodically.
With head symptoms depression, lassitude and loss of appetite.

[4] **Outer Head.** Formication in forehead.
Rheumatic pain on outside of head.
Inner pain and bruised feeling inside of head.
Cold sweat on head.

[5] **Sight and Eyes.** Burning heat in eyes and lids.
Throbbing in eyeballs.
Worse reading by artificial light; walking in open air.
Distress in eyes, as from want of sleep.
Irritates conjunctiva, causes pressive feeling in bulbus.

[6] **Hearing and Ears.** Sensation in ears like a sound of confused voices, most when swallowing or walking in open air.
Throbbing and hissing in ears synchronous with beats of heart.
Swelling behind ears, which seems to reach to periosteum.

[7] **Smell and Nose.** Seems to smell dust, cabbage, or something stinking.
Sense of smell diminished.
Pain in nasal bones.
Pressure on root of nose.
Epistaxis.
Sneezing: with lightness of head, excitement; with hoarseness; morning.
A cold in head readily occurs from exposure to cold, and is renewed every day.
Sensitiveness of nose.
Redness in corners of nose.

[8] **Upper Face.** Sense of pressure, as if face had gone to sleep.
Tension in one side of face.
Numb feeling in face.
Burning heat of face; or of one side.
Symptoms > by external heat, by pressure, or friction.
Cold sweat on face.
Circumscribed redness on cheeks.
‖Copper-colored spots on face.
‖Face red, with little blisters.

[9] **Lower Face.** Trembling of lips.
Involuntarily biting lower lip at dinner.
Itching on chin.

[10] **Teeth and Gums.** ‖Toothache.

[11] **Taste and Tongue.** Taste: of blood; bitter; with eructations and pressure at stomach; on drinking coffee or

Google

milk; food salty; flat, soapy after drinking water; bread smoky; aftertaste of food.
Tongue of a slight bluish color.
Velvety coating on tongue, with high-colored, strong-smelling urine.
Tongue coated with white mucus; morning.
Soreness of back part of tongue, felt most while swallowing.
‖Glossitis.
Tongue is spongy on surface, with deep cracks, and with spreading ulcers.
‖Extensive ulcerations of tongue, with deeply chapped or fungoid surfaces.

[12] **Inner Mouth.** An ulcerated tumor on l. side of mouth, upon soft commissure of jaws, behind last molar.
Slightly acid mucus.
Heat around mouth.

[13] **Throat.** Swallowing difficult, incomplete; with noise in ears; with soreness on back of tongue.
Sensation of swelling, or of constriction of throat.
Mouth and throat symptoms relieved by eating.
Heat in œsophagus, as from acid eructations.
‖‖Angina faucium and tonsillaris with characteristic high-colored, strong urine.
Collection of mucus in throat.
Thyroid gland feels swollen.

[14] **Appetite, Thirst. Desires, Aversions.** Appetite in evening; lost in morning; nausea.
Thirst with sleepiness; evening.

[15] **Eating and Drinking.** The throat symptoms are relieved by eating.
Sweat while eating.

[16] **Hiccough, Belching, Nausea and Vomiting.** Loathing sickness at stomach, pain and discomfort; with gagging.
Vomiting of a salty or bitter substance.
Nausea: with gagging; with disturbance about head; with loathing; with constant malaise.
Vomiting: of a salty substance; bitter.

[17] **Scrobiculum and Stomach.** ‖Weak digestion.
Burning or warmth; pressure on stomach.
Gastric symptoms increased when walking, especially ascending.
Sensation, as of a lump in pit of throat, as if some food had lodged there.
Sensation of heat in stomach.

[18] **Hypochondria.** Sense of weakness in præcordia.
In region of liver constant fine stitching midway in upper portion thereof, not increased by pressure.

Google

‖Obstruction of liver.
Pain below l. short ribs.

[19] **Abdomen.** Heat through abdomen.
Cutting about navel; relieved by stool.
Pressure of clothing makes him feel wearied.
Tearing bellyache.
Tensive pains in loins and groins.

[20] **Stool and Rectum.** Stitching in rectum.
Urging to stool, with ineffectual straining.
Sensation of constriction at lower end of rectum.
Horripilations, or chilliness before stool.
‖Stools: copious, watery, greyish-white, like dirty soapsuds; excessively offensive, scenting whole house; of a strong, pungent smell, like that of urine; putrid, bloody; frothy; insufficient.
‖‖White, stinking, liquid stools. θDiarrhœa of children.
‖Watery, light-colored, very offensive stools (in children), with unusually strong-smelling urine.
‖Fetid, watery, white stools, very copious and exhausting, in infants, urine being of a deep red color.
‖‖Diarrhœa of children, discharge copious, watery, clear-colored, very fetid; profuse, watery, running through diaper; urine uncommonly deep red, and urinous odor very strong.
Formication at anus.
‖Slightly elevated, wartlike, round surfaces around anus, varying from a half to one-and-a-half inches in diameter; with smarting soreness; urine strong-scented and high-colored; after using copaiva for chancre.

[21] **Urinary Organs.** ‖Sore pain in back; burning in l. kidney, with drawing when stooping; dull pain in kidneys, loins stiff; r. knee swollen.
‖Kidney pains, which penetrate chest on taking a deep breath. θNephritis.
‖Nephritic colic; urine deep red, of a strong odor.
‖Irritability of bladder: muco-purulent discharges, enlarged prostate; concretions of urate of ammonia; calculus.
Pains in bladder.
‖Dysuria senilis, when the gravel is trifling and the irritable state of bladder and pains are induced by other causes.
‖Too frequent desire to evacuate bladder, urine normal.
Profuse urine, very debilitating.
Urine diminished; thick; bloody.
‖‖Urine dark, urinous odor highly intensified. θSore throats; diarrhœa; menstrual derangements; hypochondriasis; rheumatism; nephritic colic; after gonorrhœa; gleet, or syphilis; prolapsus uteri.

Google

Brown urine, smells sour, scalding in passing.
Renders urine acid; hippuric acid.
Urine of aromatic odor and saline taste, highly colored sometimes color of brandy; urinous odor exceedingly strong; urine greater, of a very deep red color, depositing no sediment.
White flocculent sediment immediately after voiding urine, composed of phosphate and carbonate of lime, without uric acid; pale, languid; weak loins.
A granular kind of mucus mixed with phosphate in sediment; urine dark, reddish-brown; acid reaction, or very offensive; fleeting pains in bladder, not when urinating, but at other times. θVesical catarrh, from suppressed gonorrhœa, calculi, or gout.
Morbid condition of urine, as in persons with calculous or gouty diathesis.
Urine contains mucus and pus. θEnlargement of prostate.
Enuresis nocturna of children.
Urine with concretions of urate of ammonia.
Enuresis from infancy, girl, æt. 15.
Sensibility of bladder with muco-purulent discharge. θEnlargement of prostate.
Urine highly colored, sometimes of color of French brandy, urinous odor exceedingly strong.
Urine of a greater specific gravity; if passed in same vessel it retains its place below healthy urine, without admixture, and, though of a very deep red color, deposits no sediment.
Hot, scalding urine, deep red, of strong odor, causing so much suffering in its passage that this was performed but once a day.
Dark, or highly colored, offensive urine, after suppressed syphilis or gonorrhœa.
Fetid urine, with prolapsus uteri.
Urine clearer after one dose and soon free from mucous deposits.
Excess of uric acid.
Enuresis nocturna of children where *Nitrum* failed.
Urine of a very repulsive odor, changeable color, brownish, cloudy, of an alkaline reaction; effervescing with hydrochloric acid; white, flocculent sediment soon after its passage; phosphate and carbonate of lime, without uric acid. θA pale; languid patient, with weakness in loins.
The urinary odor is very strongly ammoniacal.
Urine dark brown, of a putrid, cadaverous smell.

= **Male Sexual Organs.** Pain in genitals; pressure; raw pain; splitting pains.

Google

‖Gleet; urine offensive.
‖Gonorrhœa suppressed (by copaiva); with offensive urine.
Smarting of frænum præputii.
Itching in sulcus, behind corona glandis.
A thrilling, almost painful sensation l. side of glans, ending in a sensation of tickling and itching.

[33] **Female Sexual Organs.** Menstruation too early or retarded.
Weakness after menses.
‖Amenorrhœa.
‖‖Prolapsus uteri with fetid urine.

[34] **Pregnancy. Parturition. Lactation.** ‖Gastric derangements when ascending a height. θPregnant women.
Retention of urine with infants.
‖Lochia last too long.

[35] **Voice and Larynx. Trachea and Bronchia.** Slight hoarseness in morning; sneezing.

[36] **Respiration.** Difficulty of breathing on awaking.
‖Asthma with inflammatory rheumatic complaints.
‖Mucous oppression of lungs.

[37] **Cough.** Cough: after a slight cold; excited by inspiration; produced by something acrid or dry in chest.
‖Dry, constant, hacking cough. θAfter suppressed gonorrhœa.
Dry, tormenting cough; great weakness; sweat; comatose state.
‖‖Cough followed by expectoration of green mucus.
Copious secretion of mucus in bronchi.

[38] **Inner Chest and Lungs.** Painful trembling in chest.
Morbid agitation and restlessness in chest.
Pressure on ribs.
Sensation in chest of swelling; of roughness; painful starting; cutting.
Pains often change their place suddenly, causing a dry cough and asthma.
Stitching in r. side of chest.
Stitches in chest, especially on breathing deeply; evening.
Pain about third rib, r. side, midway between sternum and side, < by breathing.
Pain in l. side, about sixth rib, increased by deep inspiration and bending to either side.
‖Asthenic pneumonia of a young man; after strength had sunk daily; difficulty of breathing increased every hour to a fearful degree.
‖Pneumonia, asthenic form.
‖‖Great weakness; difficult breathing, increasing every hour.
‖Promotes expectoration.

Google

‖Mucous oppression of lungs.
‖Catarrhal diseases of lungs, coughs and asthmatic attacks.
Puerperal albuminuria, uræmia and convulsions.
‖In the last period of simple pneumonia, when great weakness prevails.
‖Typhoid pneumonia.

[29] **Heart, Pulse and Circulation.** ‖Pains change place incessantly, but are most constant about heart.
Pains in region of heart.
Undulating, or intermittent beats of heart.
Palpitation of heart, with trembling.
Palpitation while sitting; < after drinking; at night.
Awakens after midnight with violent palpitation and hard beating of temporal arteries.
Awakens with oppression of breathing; with palpitation of heart (after midnight); with heat and hard pulse.
‖Awakens after midnight with violent pulsations of heart and temporal arteries, 110 per minute; internal but no external heat; cannot go to sleep.
‖Palpitation < at night, lying; at times tearing rheumatic pains in extremities, relieving heart.
‖Gout, or rheumatism, affecting heart.
Pulse accelerated; full; slower and weaker; intermittent.
‖Hard, frequent pulse; fever heat; sweat.

[30] **Outer Chest.** Sternum sensitive to touch.
Pressure of clothing on chest is annoying.
Burning in nipples.
Sensation of swelling in mammary glands; also in thyroid gland.

[31] **Neck and Back.** Stiffness of neck only on one side.
Pressure in nape of neck.
Violent itching in nape of neck.
Deep penetrating pain in posterior part of l. side, at about sixth rib.
Pain r. side of back between tenth dorsal vertebra and side.
‖‖Dull pain in region of kidneys; stiffness in loins.
Trembling in lumbar region.
‖Myelitis.
Sense of coldness at sacrum.

[32] **Upper Limbs.** Sensation of swelling under axillæ.
‖‖Tearing pains, apparently in bones of upper limbs.
Cold hands, with head symptoms.
Paralytic pain of fingers.
‖‖Fingers swollen; tearing and fine stitching pains in various parts of limbs.
Eruption of red spots on fingers.
Gouty deposits in both wrists, between metacarpal bones; swelling of elbow joints.

Google

‖Itching in palm of r. hand; slight, but deep tearing in upper part of metacarpal joints of little and ring fingers. θGout.
‖Panaritium.

[33] **Lower Limbs.** Lassitude in lower limbs.
Sensation as if lower limbs were tightly bandaged.
Tearing pain in anterior surface of thigh.
Pain in l. hip, knee and toes; thence into muscles of calf, and then in knee; after it has left these parts it appears in r. thigh and ankle.
‖Swelling of r. knee; ulcerative pain in whole leg; with pains in kidneys.
Pain in r. knee; then in left.
Cracking, or sense of dryness in knee joints.
Drawing pain in knees after drinking wine.
Cold feet and cold foot sweat.
Pain in r., later in l. tendo-achillis.
Severe pain in l. tendo-achillis, close to os calcis, when supporting a slight part of weight of body while walking.
‖Tearing and stitches, especially in metatarsal joints of r. great toe. θGout.
‖‖During night gout commences in r. great toe; his gout going from left to right.
Stitch passing upward through r. great toe, followed by burning, which increases to a stitch; afterwards it appears in l. great toe, from which it vanishes with a thrill.
Numbness in toes.
‖Pain in large joints of big toe, with tumefaction and redness.

[34] **Limbs in General.** ‖‖Gouty concretions.
Nodes on joints of upper and lower limbs, cracking and knicking on motion.
Tearing, fine stitches in various parts of limbs.
‖Syphilitic rheumatism.
Pain from r. hand to l. arm down into elbow, and thence to region of heart; later in r. thigh and ankle.
‖In both wrists, between metarcarpal bones, abundant gouty deposits with swelling of elbow joints.

[35] **Rest. Position. Motion.** Rest: head symptoms worse.
Sitting: palpitation worse.
Bending to either side: pain in l. side about sixth rib worse.
Lying: palpitation <; toothache worse.
Turning in bed: symptoms worse.
Stooping: drawing l. kidney.
Walking: throbbing in eyeballs <; confused sound of

Google

voices in ear <; gastric symptoms <; pain in l. tendo-achillis; sweat.
Moving: cracking of joints.
Motion after long sitting: symptoms worse.
Ascending: gastric symptoms worse.

[36] **Nerves.** Trembling: with palpitation of heart; in loins.
‖Weariness, lassitude.
|Extreme weakness; sweat and comatose condition.
|Hysteria.

[37] **Sleep.** Sleepiness, with dulness of head.
|Awakens: with difficulty of breathing; with palpitation.
Starting up from sleep.
Pulsation of temporal arteries from falling asleep again.
He wakes every morning about two o'clock, from strong internal heat and a hard, bounding, but not quickened pulse.

[38] **Time.** 2 A.M.: awakened by strong internal heat.
Morning: head symptoms <; sneezing and hoarseness; white tongue; appetite lost; sweat in bed.
Afternoon: vertigo.
Evening: appetite >; thirst with sleepiness; stitches in chest.
Night: enuresis; palpitation; gout in r. great toe.
After midnight: awakens with palpitation; oppression of breathing.

[39] **Temperature and Weather.** Open air: throbbing in eyeballs <; sound of confused voices in ears worse.
Draught of air: head symptoms <, especially when uncovering head.
Exposure to cold: "cold" in head.
External heat: symptoms better.

[40] **Fever.** Cold hands, feet, back, knees, as from cold wind.
Coldness with feeling of heat.
Coldness, then heat and sweat.
Sense of heat in œsophagus; stomach; belly.
Heat: with sweat; with cold in head; with nightly palpitation.
Awakens every morning at 2 o'clock with violent internal heat, and hard, beating pulse, compelling him to lie on back, because beating of temporal arteries causes a humming in ears, and prevents him from going to sleep.
Sweat: while eating; while walking; morning in bed, especially in face; with anxiety.
Cold sweat: on head; on face; on feet.
Sweat with itching.
Sweat with aromatic odor.
Skin pale, cool, with sweat, weakness, coma.

Google

41 **Attacks, Periodicity.** Head symptoms return periodically.

42 **Locality and Direction.** Right: knee swollen; stitches side of chest; pain about third rib of side; pain side of back, between tenth dorsal vertebra and side; itching in palm of hand; pain in knee; tearing and stitches in great toe; gout in toe.

Right to left: pain in r., later in l. tendo-achillis; pain from r. hand to l. arm, later in r. thigh and ankles; pain in r. knee, then l. knee.

‖Left to r.: pain in l. hip, knee and toes, appears in r. thigh and ankle; gout.

Left: ulcerated tumor side of mouth; pain below short ribs; burning in kidney; thrilling pain side of glans; pain in side, about sixth rib; pain in hip, knee and toes; pain in tendo-achillis.

‖Symptoms in sick go from r. to l. mostly, and from below upward, especially in rheumatism and gout.

43 **Sensations.** As if there was air in head; as if spine and head were pressed like an electric body; as if face had gone to sleep; as from want of sleep in eyes; as of confused voices in ears; as of a lump in throat-pit; as if lower limbs were tightly bandaged.

Screwing pains.

Cutting: about navel; in chest.

Deep penetrating pain: in posterior part of l. side.

Stitching: in rectum; in r. side of chest; in r. great toe.

Fine stitching: in hepatic region; in various parts of limbs.

Tearing: in vertex; bellyache; in bones of upper limbs; in various parts of limbs; in upper part of metacarpal joint of little and ring fingers; in anterior surface of thigh; in r. great toe.

Drawing: in l. kidney; in knees.

Splitting: in male genitals.

Burning: in l. kidney; in nipples; in r. great toe.

Scalding: of urine in passing.

Smarting: of frænum præputii.

Soreness: of back part of tongue; in back.

Raw pain: in male genitals.

Pressure: on lower part of head; on spine; in eyeball; on root of nose; in stomach; in male genitals; on ribs; in nape of neck.

Bruised feeling: inside of head.

Rheumatic pain: in head; on outside of head; in extremities.

Ulcerative pain: in whole leg.

Paralytic pain: of fingers.

Google

Fearful pain: in occiput or cerebellum.
Fleeting pains: in bladder.
Painful trembling: in chest.
Thrilling: l. side of jaws; in great toes.
Dull pain: in kidneys.
Undefined pain: in region of reverence and firmness; in nasal bones; below l. short ribs; in bladder; in genitals; about third rib, r. side; about sixth rib, l. side; in cardiac region; in back; in l. hip, knee and toes; in r. thigh and ankle; in l. and r. tendo-achillis; in kidneys; in large joint of big toe.
Coldness: in head; at sacrum.
Throbbing: in eyeballs; in ears.
Hammering: in temples.
Swelling: in throat; in chest; in mammary glands; in thyroid gland; under axillæ.
Painful starting: in chest.
Shaking: in head.
Stiffness: one side of neck; in loins.
Tension: in one side of face; in loins and groins.
Constriction: or swelling of throat; at lower end of rectum.
Trembling: in lumbar region; in loins.
Tired feeling: in head.
Formication: in forehead; at anus.
Numbness: in face; in toes.
Roughness: in chest.
Weakness: in præcordia; after menses.
Heat: in region of reverence and firmness; around mouth; through abdomen; internal, on awaking; in œsophagus; in stomach; in belly.
Burning heat: in eyes and lids; of face; in stomach.
Itching: on chin; in sulcus, behind corona glandis; in l. side of glans penis; in nape of neck; in palm of r. hand; with sweat.
Tickling: in l. side of glans penis.
Dryness: in knee joints.

" **Tissues.** ‖Mucous states.
‖Gouty diathesis; arthritis vaga.
Affects all joints, particularly knee, swelling it.
‖Gout with arthritic nodosities.
‖Syphilitic rheumatism.
Emaciation.

" **Touch. Passive Motion. Injuries.** Touch: sternum sensitive.
Pressure: symptoms >; of clothing about chest and abdomen annoys.
Friction: symptoms better.

Google

[46] **Skin.** Itching on various parts, yielding a rather agreeable sensation on being scratched, but leaving a burning.
Sweat with itching.
‖Syphilitic spots and marks.
‖Ulcers.
‖Slightly elevated round surfaces of a wartlike appearance, and of circular form, varying in diameter from half an inch to 1½ inches; at places running into each other; nearly covered both sides and bottom of sulcus ani, and caused much smarting and soreness of part; with strong-scented and highly-colored urine; ‖after abuse of copaiva.

[47] **Stages of Life, Constitution.** Gouty diathesis.
‖Rheumatic diathesis in syphilitic or gonorrhœal patients.
‖Woman, æt. 38, considered herself in dissolution with uterine complaints.

[49] **Relations.** Useful in gout after *Colchic.* fails.
Useful after abuse of *Copaiva* in ‖‖suppression of gonorrhœa; or for warts around anus, appearing after *Copaiva* has been used for chancre.
‖Useful in enuresis after failure of *Nitrum.*
Has been used for dysuria senilis from enlarged prostate, in conjunction with *Copaiva.*
It has been reported of *Natr. benz.* as having cured many apparently hopeless cases of consumption in Vienna.
Similar to: *Copaiva, Ferrum, Zincum.*
Incompatible: wine, which aggravates pains in kidneys, drawing in knees, etc. (compare *Zincum*).

Google

BERBERIS.

Barberry. *Berberaceæ.*

Proved with great assiduity by Dr. Hesse, and published in the Journal for Materia Medica in 1834; translated and added in extracts to the Allentown editions of Jahr's Manual, hence frequently used in the United States. In 1843 Noak published a much better extract; no cures followed this. In 1854 Dr. J. H. Weber, in Allg. Hom. Zeitung, analyzed its symptoms. In 1879 H. V. Miller published cases in Lilienthal's Quarterly; these were translated into German and printed in the Allg. Hom. Zeitung, July, 1879.

[1] **Mind.** Defective recollection and weak memory.
Terrifying apparitions in twilight.
Mental labor, requiring close thinking, very difficult; the least interruption breaks the chain of thought.
Melancholy, inclination to weep.
Indifference, apathy.
Indifference and pensiveness, with disinclination to speak.
Anxious and fearful.
Anxiousness while sitting, standing, or moving.
Fretful humor, with weariness of life.

[2] **Sensorium.** Vertigo and dizziness in head.
Vertigo: with danger of falling; when stooping and when rising; struggling with arms when rising; with dizziness, faintness, pressure in forehead, succeeded by chills.
Dulness and heaviness in head.
Tensive pain, also with pressure in temples and forehead.
Feeling of drunkenness, dizziness, vacuity, confusion, heaviness in head, especially in front, with pressure in sinciput, attended with alternating chilliness and heat from morning till afternoon, succeeded by a nasal flux and sneezing, as if catarrh would arise, but which does not appear.

[3] **Inner Head.** Dulness of head like from coryza.
Heaviness in head, when stooping, as if brain would fall forward, with a sensation of bubbling, as if all would prolapse from forehead.
Pressure from within outward, particularly in forehead, but also in temples and occiput.
Tensive pain, also with pressure in temples and forehead, or with dulness of whole head.

Google

Pressing, straining, bursting headache, especially in sinciput, chiefly in morning, < by stooping, > in open air; with weariness and exhaustion.
Tearing in forehead and orbits.
Shooting, wringing, rending stitches above forehead and temples.
Rending in different parts, particularly in temples and occiput, arising from neck or extending to it; from edge of orbit towards nose or upward to forehead, or into orbits.
Tearing pain in whole head, now here, now there, in forehead and temples.
Stitches in forehead.
Sudden stitches from eyes to forehead.
Darting and shooting pains in head, often changing their locality.
A peculiar cold sensation in r. temple.
Heat in head after dinner, or in afternoon, and from exertion.
A puffy sensation in whole head.
A feeling in head as if it was becoming larger.
Fulness in head with sensation as if head was enlarged.
Headache aggravated by movement or stooping, > in open air.
Headache: accompanied by hepatic or rheumatic arthritic complaints; or with affections of urinary organs; or with menstrual derangements.

Outer Head. In skin of head and face a tension as if it was bloated, or covered with a cap, or benumbed, with difficulty to move it.
Tension of scalp and skin, as if swollen.
Itching, with burning and stitches on scalp and face, more on occiput, especially in evening, and changing its place after scratching.
Hot temples and cold cheeks.
Biting, gnawing on scalp and face.
Burning, pricking along edge of hair on head.
Single pimples on scalp and face, more on occiput, forehead and temples.

Sight and Eyes. Shuns the light.
Illusions; in twilight objects appear twice as large as natural.
Dim sight, all objects looking dark, as if through a veil, or running together, with itching around eyes and in face, preceded by incipient catarrh, succeeded by itching on legs.
Pressure in eyes.
Tearing in l. eye; also in lids.

Google

Tearing in forehead and orbits.
Tearing near orbits with lachrymation; eyes and nose moist.
Painfulness of eyes.
Sudden shooting; arising from forehead and temples, or extending to them.
‖Violent shooting pains through eyes into brain, or from temples to eyes; sometimes into arms, or from knee to eye. θAfter operation for strabismus.
Biting, burning, or itching sensation in eyes.
Dryness of eyes, with burning and redness of conjunctiva.
Irritation in eyes, as if from sand, heat and burning, with a cloudy appearance.
Conjunctivitis, with inflamed lachrymal caruncle.
Cold feeling in eye, like from a cool wind, with lachrymation when closing eyes.
Coldness of eyes.
Eye symptoms < out-doors, < moving eyes.
Quivering of eyelids when reading by candlelight.
Sensation of sand between lids; dryness of internal canthus and sensation as of a foreign body there.
Sticky feeling and white scum on dry eyelids, morning.
Itching, burning and smarting in lids, or in canthi, frequently only on small spots.
Red spot on l. eyelid, feels like a mosquito-bite, but swelling nearly closes eye; next day other spots on face, behind ear, and on neck; third day on chin and nose, with itching and burning; in evening covered with small vesicles, oozing watery fluid.
Itching in canthi, eyebrows and eyelids.
Inflammation of lachrymal caruncles.
Dryness in internal canthus.
Tearing, especially in lids.

δ **Hearing and Ears.** Beating, and fluttering noise in ear.
Stopped up feeling in ear, with pressure.
Throbbing and roaring in ears.
Drawing, pressure, urging with stitches in ears.
Stitches in ear.
Tearing and stitches in ears, through membrana tympani, as if a nail was thrust through, or like from sting of an insect.
‖Shooting behind r. ear in attacks, < every evening.
Outward piercing in ear, as if with a sharp-pointed instrument.
Tearing, alternately in ear and other parts of body.
Alternating heat and coldness on external ear.
Pimples in front of ear.
Pimples; nodosities, size of hemp seed, on auricle, painful to touch.

Google

Tumor behind ear, size of a hazel-nut.

[7] **Smell and Nose.** Crawling, smarting, or itching in nose.
Titillating irritation to sneeze.
From left nostril a few drops of clear blood.
‖Dryness of nose. θEpistaxis.
Dry nose, succeeded by a chronic catarrh with an offensive discharge.
‖The nose and eyes moist, with sneezing, as if catarrh was commencing.
Indication of catarrh, succeeded by violent ophthalmic complaints.
During flowing catarrh, oppression on chest, particularly at night.
Catarrh of nose, lasting for months, with catarrh of antra Highmori and frontal cavities, with moderate secretion of a yellowish or greenish mucus, more copious in morning, and having a pungent smell or taste.
‖Chronic coryza on left side, pains extending to Highmorian cavity.
‖Purulent yellow or greenish discharge. θCoryza.
‖Obstinate catarrh of l. nostril, with secretion, first of yellow water, later purulent white, yellow or green mucus; empyreumatic smell and taste, particularly in morning.
Pricking in point of nose.

[8] **Upper Face.** Tearing and stitches in cheek and jaw bones.
Squeezing, rending and stinging pain in facial bones and in upper and lower jaw, as if from a blow, extending to temples.
‖Pains extending into Highmorian cavity; l. side. θCoryza.
Dark red, painful spot on r. cheek.
Greenish face, with blue rings and pink eyes.
For a long time has a fatigued, worn-out expression of countenance.
‖‖Pale, earthy complexion, with sunken cheeks and hollow, blue encircled eyes. θFistula in ano.
Chilly feeling on cheek.
Sensation of chilliness, succeeded by deep red spots on cheek, attended with heat extending over face in afternoon.
Heat and redness in face.
Heat and burning of face, with red cheeks.
Dark red spot on cheek, after a chilly feeling, then spreading over whole face.
Burning and itching on cheeks.
Cold shivering sweats on face.
Sensation as if cold drops were spurted in face when going into open air.

Google

Tension of scalp and skin of face, as if swollen.
Bright red, inflamed pimples on cheeks and lips, ulcerated in centres.

[9] **Lower Face.** Dingy red, bluish spot on inner side of lower lip.
Lips bluish on inside.
Formication in upper lip, around mouth and chin.
Burning, itching, crawling and quivering in lips.
Lips dry, viscid, peeling off, with thin scabs.
Dryness of lips, with scaling and formation of thin brown scurf on edges.
Pea-shaped vesicles on lower lip.

[10] **Teeth and Gums.** Scraping, gnawing pain in teeth.
Teeth as if too long, sensitive to touch and to air.
Tearing in l. upper molar.
Piercing pain in hollow teeth of lower jaw.
Teeth as if too large. Compare *Niccol.*
Stitches in teeth; they feel too long or dull.
Pain as if gums were torn, or tooth pulled out.
Dingy red edge of gums; small white nodules on gums.
‖Gums bleed easily.
Ulcer at an upper molar or incisor.
Sore gums during dentition.
Suppurating ulcers above incisors and molars.

[11] **Taste and Tongue.** Taste: of blood; bitter; sour.
Tongue smarts when touched.
‖Slimy furred tongue. θHemorrhoids.
Painful white blisters on tip of tongue.

[12] **Inner Mouth.** Offensive metallic odor from mouth.
Mouth and fauces dry and viscid, especially in morning, with a white tongue and frothy saliva; > after eating.
‖Saliva sticky, like soapsuds.
‖Sticky, frothy saliva, like cotton.
Ugly bluish-red spots in mouth.
Under lip bluish-red on internal surface.
On internal surface of cheeks and lips, red, painful, deeply suppurating pimples and watery pustules of size of a pea.
‖Aphthæ.

[13] **Throat.** Increased redness of palate and tonsils; tonsils pain when speaking or swallowing; stitching like from an awn in throat.
Sensation of a plug in side of throat, with dryness, roughness and scraping; severe pain from empty deglutition.
Inflammation of tonsils and pharynx, with swelling and fiery redness, and a sensation as if a lump was lodged in side of throat; expectoration of a quantity of thick, yellow, jellylike mucus; white, sticky tongue; viscid saliva resembling soapsuds.

Google

Empty swallowing hurts in throat.
A sensation of stiffness in throat, in some cases only on one side as if there were varicose veins. Compare *Pulsat.*
Scratching in throat, which compels hawking, especially in morning.
Scratching and burning as if from sand in throat.
Pain in l. tonsil, as if a husk was sticking there, particularly when speaking and swallowing; interior of throat red, exterior very sensitive to touch and motion.
Sensation as of a lump in throat.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Great thirst, alternating with aversion to all kinds of drinks. θJaundice.
Thirst, with dryness of mouth.
Great thirst, alternating with aversion to drink.
Appetite either increased or decreased.
‖Want of appetite. θHemorrhoids.
Increased appetite.
‖Canine hunger, alternating with loathing of food. θJaundice.

[15] **Eating and Drinking.** Nausea before breakfast, gone after it.
Before dinner chilliness.
Heat in head, after dinner from exertion.
After eating solids, belching for hours, and soreness continuing whole night.
Worse after spirituous drinks.
Mouth and fauces dry and sticky, especially in morning; relieved after eating.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.
Frequent eructations, alternating with yawning.
Bitter eructations.
After eating solids, belching for hours, and soreness continuing all night.
Eructation and gaping, abating complaints and pains.
‖Eructations without bad taste, or smell.
‖Frequent belching. θHemorrhoids.
‖Bilious eructations.
‖Violent heartburn.
Nausea; before breakfast; after dinner.
Nausea in morning.
Vomiting of meals.

[17] **Scrobiculum and Stomach.** Very slow digestion.
‖Pressure in stomach. θHemorrhoids.
Pressure in stomach, as if it would burst, also stinging and burning.
Chilliness in region of stomach, ceasing after vomiting.

Google

‖Violent stinging, burning, peculiar pain in stomach, similar to heartburn, but much worse, also extending upward into œsophagus.

Pit of stomach puffed up.

[18] **Hypochondria.** ‖Diseases of liver.

Pressure, also stitching in region of liver.

‖In hypochondriac region, near border of false ribs, about three inches from linea alba, violent sticking pains for a quarter of an hour, increased by pressure, extending across into region of stomach.

‖Sticking, pressive pain in region of liver, increased by pressure, corresponding to region of gall-bladder, on a small spot, coming on spasmodically.

Shooting, pressing in region of gall-bladder after two hours; often later, even on forty-sixth day.

‖‖Colic from gall-stones.

‖Bilious colic, followed by jaundice.

‖At a point about midway between r. ant. sup. spinous process of ileum and umbilicus, a sudden, sharp, severe pain, often extending towards groin, sometimes extending upward to r. hypochondrium, exceedingly severe, lasting three to twelve seconds, coming frequently, induced by exercise, *e. g.*, walking, and more frequent and more severe the greater the amount of exercise; the day before the prescription was made, he had had thirty or forty attacks, having walked and stood a great deal.

‖Violent stabbing pain in region of liver took his breath, had to bend over.

‖Sharp, pinching pains in liver, which come suddenly and with great severity; at times caused him to hold his breath, to bend over and to get red in face; pink sediment in urine; feces black, or very dark, very adhesive to commode; frequent urging to urinate; feces scanty, requiring an effort to expel.

Drawing-tearing in l. hypochondrium, with sensation during inspiration as if something was torn loose.

‖Pressure in l. hypochondrium, backward, drawing downward.

‖Contracting, forcing sensation in l. abdomen, upper part, < in l. hypochondrium towards navel.

Tearing, drawing, stinging and jerking in l. hypochondrium.

πCramplike contraction in splenic region.

πViolent burning, like heartburn, in l. hypochondrium, extending upward into œsophagus.

[19] **Abdomen.** Rumbling in bowels.

‖Constant troublesome bloatedness of abdomen, with

Google

occasional forcible and noisy discharges of flatus. θJaundice.
Pain in colon descendens.
Coliclike pains, especially about navel.
ıPain in region about three inches to side of navel, corresponding to a place in front of kidneys, and rather to sides, mostly sticking, often extending to lumbar region or to groins, liver, spleen, or stomach.
Burning pain in or under skin of abdomen.
Shooting pains in epigastrium, particularly l. side, increased by inspiration, motion, or touching, attended with short breath and distension of abdomen.
Periodical pressure from inside outward, in l. side near navel.
Pain on a small spot in l. side.
Compression and contraction in sides of abdomen, particularly in l. one.
Biliary colic, followed by jaundice.
Whirling in stomach and abdomen.
Visceral motions, like efforts to stool.
Wandering, tearing, stinging pain in abdominal muscles.
Stitching tearing or burning in skin of abdomen, mostly about navel.
Turgid veins.
Old yellow spots around navel peeling off.
Pressure and tension in groins, as if a hernia would develop; especially when walking and standing.
Itching, or pressure in region of inguinal glands, with pain from touch as if they would swell.
In inguinal region a pressing, squeezing tension, stinging and cutting, extending towards thighs, or proceeding from hips to inguinal region and thighs.
ıBurning, smarting pain in r. inguinal fold, with tension on motion.
ıIn r. inguinal region near abdominal ring, some varicose veins.

[20] **Stool and Rectum.** Frequent ineffectual urging to stool.
ıConstant feeling as though she must go to stool.
ıLooseness, with viscous slime. θHemorrhoids.
Watery evacuations.
πPainful diarrhœa with rumbling; a sensation of burning and pain in descending colon; it burns down and out at anus; never at night.
Easy, soft, copious evacuation, like diarrhœa.
ıSeveral copious, thick mushy stools.
ıDiarrhœa; mushlike yellowish discharges, with rumbling and passing of wind; squeamishness, much thirst; heat in face, and dulness of head; afterwards in evening, increased appetite.

Google

Large, pappy, free stools, mostly with tenesmus before and after.
Scanty, thin-formed stool, hard or soft.
‖Clay-colored stools; occasional pain in big toe and leg, up to shoulder; sometimes pain in bladder; urine scalds.
‖Changing stool, irregular, costive or loose. θHemorrhoids.
Small, indurated, intermitting stool.
Hard stool, like sheep's dung, passed only after much straining.
‖Constipation.
‖Intense pain before and with stool, as from constriction in rectum, preventing passage of feces.
‖Burning, stitching pain during, before and after stool.
‖A long-continued sensation after stool, as if one had just been to stool, or as if one had just recovered from a pain in anus.
‖Painful pressure in perineum; stitches in perineum, extending deep into (l. side) pelvis. θFistula in ano.
‖Smarting pain in anus.
Soreness in anus, with burning; pain when touched, and great sensitiveness when sitting.
Burning, stinging pain in anus, before, during and after stool.
‖Tearing extending around anus.
Bearing down in anus and in sacrum.
In anus pressure, and tenderness after evacuation, fulness, rasping and stinging, burning, itching, crawling and throbbing.
‖Herpes around anus.
Copious discharge of black blood per anum after increased exercise.
Hemorrhoids, with itching or burning, particularly after stool, which frequently is hard and covered with blood.
Large hemorrhoidal tumors with itching and burning.
‖Fistula in ano, with itching there; short cough and chest complaints.
‖Fistula since two or three months, with a troublesome short cough and morbid appearance; after *Berb.* 18 cent., cough ceased in forty-eight hours, fistula improved for two weeks; then a biliary colic which he had not had for three years, but frequently before (*Coloc.*); fistula improving; furuncle appeared for several weeks; a kind of tetter on edge of anus remained.
‖‖Fisula recti when attended with bilious symptoms.
A crust formed about anus.

[21] **Urinary Organs.** In lumbar and renal region a pressing

straining, shooting or bruising pain, extending to thighs, with stiffness, numbness and sensation of warmth, which prevents raising body and rising up.

‖Pressive or tensive pain in region of loins and kidneys, sometimes on one side, sometimes on both or frequently across small of back, at times extending downward into posterior portion of pelvis, of thighs, and even to calves, with a feeling of stiffness and lameness, or swelling of back or lower extremities.

‖Sticking or sticking-pressing pain, at times slight, at times very sensitive, in one or other lumbar region, now in a small spot which is a simple sticking, now in a larger place, when it is chiefly pressing, either exactly in region of kidneys, or at times extending above or below, but especially outward, so that it extends around side of abdomen in front or to region of hips, sometimes also in spine and extending down to small of back, and region of bladder and groins, sometimes fine, sometimes dull; sticking sometimes extends from region of kidneys straight forward into abdomen, and at times with a numb, paralyzed, bruised sensation, frequently returning and lasting a long time.

Tearing pain in region of both kidneys, soon after rising in morning, which extends sideways and forward, both upward and downward, so that whole region of back between pelvis and thorax is affected.

Tearing, or tearing-sticking pain in region of loins and kidneys, usually < on one side, frequently at same time in small of back, as if region was crushed or bruised, with a feeling of stiffness, so that it was difficult for her to rise from sitting, hands must assist in rising; sometimes also involving hip, nates, upper and posterior portion of extremities; at times also with a sensation of numbness.

‖Pressive or tensive pains in region of loins and kidneys, with a feeling of stiffness and lameness, or swelling, in back and lower limbs (*Kali carb.*) without stiffness and lameness).

‖Tearing pulsating pain in r. kidney.

πSharp pain in r. kidney, near spine, from there downward into bladder.

Lancinating or tearing-pulsative pains in region of kidneys; < when stooping and rising again, sitting or lying; > when standing.

Cutting pain from l. kidney into bladder, urethra, and in penis.

Stitches from kidneys to bladder and urethra.

Stinging, burning, gnawing pain on a small spot near

Google

kidneys, increased by pressing hard upon, and moving frequently downward or forward.

Stitching or tearing in renal region and adjoining parts, with numbness and soreness, increased by hard external pressure.

A sticking-digging, or digging-tearing pain in one or other kidney region, as if it was suppurating; < by deep pressure.

Some stitches in one or other lumbar regions, especially in region of kidneys, at times fine, at times dull, at times as if a nail was sticking in, and so violent and sudden that it stops breath; from without in.

Burning and soreness in region of kidneys.

Burning stitches, single or several in succession, in region of loins and kidneys.

Much pain, soreness and tenderness in back, in region of kidneys. θRheumatism of knee.

Symptoms in region of kidneys < in stooping and getting up; more while sitting or lying than in standing.

Pain, weakness and trembling in region of kidneys after riding.

Sensitiveness in region of kidneys so great that any jarring motion, riding in a wagon, jumping from it, was intolerable. θRheumatism.

After kidney complaints a foul, bitter taste, rush of blood to throat; great appetite, hasty eating; urine has reddish sediment.

Frequently recurring, crampy, contractive pain, or aching pain, in bladder, when bladder is full or empty.

Great urging, with pain in neck of bladder, with burning, scanty urine.

Pressure and contraction in vesical region when pressed upon, with burning in urethra.

Cutting, constrictive pain in bladder.

Violent, cutting, tensive pain, deeply seated in l. side of bladder, at last becoming a sticking, obliquely in female urethra, as if in its orifice, lasting a few minutes.

Painful cuttings in l. side of region of bladder extend into urethra, coming from l. kidney along course of ureter.

Violent sticking pains in bladder, extending from kidneys into urethra, with urging to urinate.

Drawing sticking pain in one or other side of bladder, extending down into female urethra, often arising in lumbar region and extending along course of ureters.

Burning pain in bladder, sometimes when it is full, sometimes when empty, soon after urinating, several times; frequently also in morning before urinating for first time.

Google

Pain in bladder when moving.
Cutting or burning in urethra; < when not urinating; frequently more on one side.
A stitch from within outward in l. side of female urethra.
Stitches in urethra, extending into bladder.
Most violent burning and shooting in orifice of urethra, after climaxis; æt. 50.
Urine smells like coffee.
Urine increased and clear, with small slimy sediment, at beginning and during exacerbation of complaints.
Greenish turbid urine, depositing mucus.
Pale yellow urine, either with a slight transparent, gelatinous sediment, which is not deposited, or a turbid, flocculent, claylike, copious mucous sediment, mixed with a white or whitish-grey and later a reddish, mealy sediment.
Urine bright yellow, with profuse mucous sediment.
Urine dark, bright yellow, or red, with sediment.
Inflammatory red urine.
Blood red urine, which speedily becomes turbid and deposits a thick mucous and bright red, mealy sediment, slowly becoming clear, but always retaining its bright red color, with violent pains in kidneys.
Urine dark, turbid with copious sediment. θJaundice.
Urine contains a clear mucous sediment.
Much mucus, tough and in threads.
Urine lessened, and with copious, slimy sediment, when complaints abate.
Urine has a transparent, jellylike sediment.
Copious, slimy urine, with a white grey, reddish furfuraceous sediment, and yellowish-red crystals.
Passes small calculi.
Frequent urging to urinate.
In derangements of urinary or genital apparatus, with aggravation from slight fatigue, getting < as fatigue increases.
Movement brings on or increases urinary difficulties
Constant urging, with pain in neck of bladder, mostly burning and scanty discharge.
Urine very slow to flow, with much pain and pressure in region of bladder in front. θRheumatism in knee.
Urine warmer, and attended with pain in lumbar and renal region.
Urinary symptoms are improved by rest.
During urination, burning in urethra, with pressure on bladder.
Pain in hips while urinating.
After urinating, a sensation in bladder, as if one must go again soon, or as if some urine remained behind.

Google

After urination, burning in urethra or bladder; pressure in bladder; cutting, burning and stitches in urethra.
Violent urging after urinating, particularly in morning.
‖With symptoms in urinary organs, pain in loins and hips.

" **Male Sexual Organs.** Suppressed sexual desire.
Depressed sexual function, excitement too short, ejaculate too soon.
Straining during and after ejaculation of semen.
Great prostration in sexual parts after coition.
During coition, too weak and too short thrill; ejection too soon and imperfect.
Weakness and insensibility of male parts.
Sensation of weakness and unexcitability in parts, especially after urinating.
Stinging, crawling, itching and throbbing in genitals.
Pain in genitals, increased by motion.
‖Burning in urethra.
‖Smarting, burning pains in spermatic cord, with several stitches, now on one, now on other side.
Dragging or lancinating pains in spermatic cord, extending into testicles.
In spermatic cord straining, burning, with stitching, drawing and pressure, extending to testicles.
‖Soft, pulpy swelling of spermatic cord, especially in lower portions, several times when walking, with at times drawing, burning, smarting, or tearing pains; at times also when sitting, with pain extending down into testicles, especially epididymis.
‖Most ecruciating pain extends along urethra into bladder, into testicle, which is drawn up on affected side.
‖Drawing pain in spermatic cord of r., frequently of l. side, extending down into testicles, or up into abdominal ring.
‖Neuralgia and inflammation of spermatic cord, testicles and epididymis.
Drawing from right or left testicle to spermatic cord.
Constricting pain in testicles, with contraction and retraction of scrotum.
Testicles drawn up.
Sensation of coldness in testicles.
A cutting-stinging, straining, burning, crawling and pressing in testicles.
‖Penis hard and contracted all along upper part, bending it upward. θ With an old man.
A hard string along upper part of penis.
‖Burning at very point of penis within canal. θ Kidney disease.
Stinging in penis and glans.

Google

Rasping-burning, particularly on l. side, also on glans and prepuce.
Coldness and numb feeling in prepuce and glans.
Cold feeling in prepuce and scrotum.
Scrotum shrunken, cold, with pressure in testicles.
Itching on scrotum.
Soreness, especially on l. side of scrotum.

♂ **Female Sexual Organs.** Suppressed sexual desire with long-delayed thrill, and frequently cutting and stitching in parts during coition.
Complete want of pleasurable sensation during coition.
θ Ovarian disease.
Discharge too late and painful.
Coition is painful.
After coition, weakness of parts.
Menses: scanty, of black drops or filthy slime; too scanty and painful, with pain in small of back; consisting of grey mucus or brown blood; fetid lumps; too slight, of watery blood, or grey mucus; too short.
Catamenia every three weeks.
The menses at the proper time, but too small in quantity, too short, resembling somewhat the washings of flesh.
Suppressed menstruation.
Uterine symptoms are at first intensified, then relieved by exertion.
For some days previous to catamenia, violent tearing in limbs, with severe pain in back.
At beginning of menstruation, violent pain in kidneys.
The menstruation attended in first days with pressure towards parts, stitches, rasping in vagina, burning and soreness in anus.
The menses succeeded by excessive lassitude and vehement shooting headache.
Pain during catamenia is often in kidneys or down thighs and calves of legs, again in head and sometimes all over body.
Painful menstruation.
During menses: pain in back; pressure and tension in upper arm and shoulders, extending to neck; vehement tearing through whole body, particularly l. side; pain in kidneys; stitches in breast; vehement pressing headache; painful distended abdomen; exhaustion, faintness, shivering, very jaded countenance, irksomeness and weariness of life.
After menses: great lassitude with tearing and stitching in head; pain in small of back and loins; pressure in mammæ, especially at nipple, with sensation as if mamma was swollen; stitches in l. mamma.

Google

Acrid leucorrhœa, very prostrating.
‖Sticking pains in female urethra, beginning in bladder.
‖Burning pain in female urethra during and after urinating.
‖Burning in urethra, along whole length of it.
Pains in external genitals increased by motion.
‖Violent sticking in left side of abdomen, two fingers breadth from navel, extending in long stitches into l. side of vagina; smarting pain in vagina; burning, violent pain and soreness in anus.
Shooting-stinging from perineum deep into female parts.
‖Sensation of burning and soreness in vagina, frequently very sensitive, especially in anterior portion, even extending to labia.
Vagina painful to touch.
Vulva itching and burning; < walking or sitting, > lying.
Sudden lancinating in vagina, causing her to start, with soreness of wall of vagina to touch, < walking.
Stitches from inside outward, with tenderness of vagina.
‖Intensely painful vagina; burning, sore, as if excoriated.
Vagina reddened; uterus sunken.
During climaxis, burning in urethra.

[24] **Pregnancy. Parturition. Lactation.** Sore gums during dentition.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness, with pain or inflammation of tonsils.
Tearing in throat, upward, particularly l. side, with stiffness.

[26] **Respiration.** Oppression, with fluent coryza, mostly at night.
Stitches affecting respiration.
With inhalation, stitching between shoulders, from back through chest.
Shortness of breath when going up-stairs.
Obstruction of breath when raising arm.
Breathing increases colic.
Sensation during inspiration as if something was torn loose.

[27] **Cough.** Tormenting, dry, short cough, with stitches in chest.

[28] **Inner Chest and Lungs.** Stitches in and around clavicle, also pulsation and burning.
Pressure behind l. nipple.
Rawness and soreness in chest, like during catarrh.
Stitches in chest; increased by deep inspiration, with short, dry cough.
Cutting contraction in chest, to abdomen, compels to bend over.
Stitches in chest (l. side).
Stitches in anterior and middle of breast, particularly

Google

when inspiring deeply, attended with a dry, hacking cough.
Drawing-tearing occasioned by stretching arm.
Tearing in chest, particularly in l. side, towards shoulders and back.
Shooting pain deep in front of middle chest.
Sticking pain, or sticking pain with pressure in chest.
Violent, sudden, incisive, contractive pain, in front part of chest, extending down to abdomen, obliging him to bend double.
Lancinations from lower dorsal vertebræ through chest, arresting breathing.
Deep-seated, acute, lancinating pain in either iliac bone, extending obliquely inward and downward towards small of back, with bubbling stitches darting into part to a considerable depth.

[29] **Heart, Pulse and Circulation.** Painful dragging-sticking in region of heart, outward and downward.
Very painful contracting urging-shooting in region of heart, working from in out and up down; next day palpitation.
Squeezing and stinging about heart.
Stitches about heart.
Frequent palpitation.
Slow, weak pulse.
‖ Pulse slow and weak, or full, hard and rapid.

[30] **Outer Chest.** Stitching, pulsating, pressing, or tensive pains in muscles of chest.
Corrosive feeling in skin of chest.
Itching returns after scratching, with smarting stitches or burning.
Pimples on chest and scapulæ.
Stitches in gland pectoral and its vicinity.
Pressure behind left nipple.

[31] **Neck and Back.** Sudden stitch darting from side of neck into upper arm.
Tension in neck.
Tearing in throat upward, particularly in l. side, with stiffness.
Stiffness in neck half-sided, with a sensation of inward swelling.
Pain as if bruised or swollen, from r. scapula to shoulder joint.
Tearing in and between scapulæ.
Tearing between shoulders, extending to occiput; increased when lifting.
Tearing between shoulders; also between shoulders and spine, with oppression of chest; in point of shoulder blade, from shoulders to loins.

Google

Drawing in shoulders; stitches between shoulders, particularly when breathing, below l. shoulder; from back through breast, interrupting breathing.
Tearing in spine.
Stitches in spine.
Tearing, pressing; burning and tension in back.
Pressure in back, as if bones would be pressed asunder, with heaviness, numbness, vibration and warmth, disappearing after expulsion of wind.
Squeezing in back with efforts to stool.
Great soreness and pain through entire back from sacrum to shoulders, greatly increased whenever patient performed any labor. θFistula in ano.
In back as if beaten, disabled and stiff.
Backache, worse while sitting or lying, mostly in morning, when awaking.
Sticking pain, or sticking with pressure frequently recurring, and long continued in one or other lumbar region, at times in kidneys, at others a little above and below, extending outward and forward inside of abdomen, or region of hip, or dorsal spine, or small of back, into region of bladder or groin, or from kidneys straight into abdomen, with numbness and lameness, as if bruised.
Painful pressure and tension in lumbar and renal region, sometimes with sensation of numbness, puffiness, warmth, stiffness and lameness, extending at times into lower limbs.
Tearing pain in posterior portion of iliac crest, usually only to one side, extending downward into gluteal muscles, or into bones.
Deep-seated, sensitive sticking pain in ilium of one or other side, an inch to an inch and a half from spine, extending obliquely inward towards sacrum.
If she stooped, lower part of back felt stiff, it was with difficulty she could stand up; tearing when sitting, < when standing; > in afternoon.
A feeling of warmth in lower part of back, and in small of back, as if lumbar region was asleep, extending down into sacrum, hips, and posterior portion of thighs.
Pressive-tensive, or pressing sensation in sacrum; deep, internal when severe, with a feeling as if bones would be forced asunder; < when sitting and lying.
Violent pain in sacrum. θHemorrhoids.
Constant pulsating stitches in sacrum.
Bruised pain, with stiffness in small of back; rises from a seat with difficulty.
Numbness in small of back.
Pain in small of back; < when sitting and lying in morning, when awaking. θDuring menstruation.

Google

[32] **Upper Limbs.** Sudden stitch darting from side of neck into upper arm.
Tearing in shoulder.
Vehement, intense pains on point and outside of shoulder blade, towards shoulder joint, and extending to elbow; with a sensation as if beaten.
In shoulder joint pains as if from straining; in motion, increased by pressing upon.
Stretching, tearing, stinging, throbbing pains in shoulders.
Sensation of heaviness in axilla.
Itching, smarting and burning in axilla.
Gurgling feeling in shoulder, with sensation as of something alive in joint, especially about midnight.
A rheumatic, paralytic-like pain in r. shoulder, and some stitches over l. eye.
In upper arm drawing, stinging, tearing on an isolated spot.
Sudden stitches, jerking, tearing into bones of upper arm.
Violent pain in sinew of biceps, after lifting something, extended upward and downward, when moving arm.
Throbbing in arm.
Stitches in left upper arm.
Arms pain as if bruised; feel weak and lame.
Gurgling feeling in muscles of r. upper arm.
Heaviness and lameness of arms.
Pressure and heaviness in arm, which sinks down.
Numbness and disabledness on external side of arm; increased when arm hangs down.
Cold arms.
Soreness, with burning and painfulness to touch of skin about arms when sitting.
Blotches like nettlerash on upper arm, scaling off.
Lymphatic swelling in flexors of arm, with petechia-like spots, and burning.
Dingy red marbled spots on arms, with bruised pain.
Pimple on point of each elbow, much inflamed after rubbing.
In elbow joint drawing, tension, tearing, stinging or burning.
Tearing from elbow joint into ulna and hand, with heaviness and infirmity.
Petechiæ, small and red, with white spots on forearm and backs of hands.
Pressing pains in inner side of forearm.
Lymphatic swelling of flexors of l. forearm, with spots like petechiæ.
Tearing along radius.
Stitches along ulna.

Google

Pressure in wrist, as if after spraining or straining.
In back of hand a pressing shooting, with vibration and sensation of heaviness.
Burning pains in hands increased by friction.
Pain in wrist after exertion with hand.
Sensation as if drops of cold water were sprinkled on back of hand on going into open air.
Tearing along metacarpal bones.
Tearing, violent stitches towards metacarpus.
Tearing on back of fingers, chiefly in joints, frequently with stiffness, heaviness and swelling of joints; < by moving and touching.
Burning stitches in fingers.
Vibrating pain in fingers.
Stitches extending to points of fingers.
Tearing in points of fingers.
Redness of points and backs of fingers, with itching; after chilblains.
Pain under nails, with tenderness to touch.
Small warts on balls of hand and on middle finger.
Small, flat, semitransparent pimples, or rudimentary warts on fingers.

[53] **Lower Limbs.** ‖Pain in hips. θKidney disease.
Drawing-stretching pain in thigh, as if it was too short.
Tearing-shooting pains in thighs.
Throbbing in thigh.
Stitches from outside inward in thighs.
Stitches at intervals in sitting or while walking, either through, across thighs, or from hip down to foot.
A peculiar, spongy sensation, as if feeling was lost in l. thigh, from hip to knee; cupping brought no blood; has to limp in walking on account of pain in l. thigh.
Sensation of icy coldness on small spots on thigh.
Burning in thigh, mostly before catamenia.
Touch is painful even through her dress, with burning of thigh.
Pain in thighs, < from changes of weather, mostly before heavy wind.
Varices, from groins down thighs.
Spasm in knee, extending to calf and thigh, when firmly leaning upon.
Spasm, with vibration and heaviness in knee.
Burning, stinging, tearing, pressing, < by stretching leg.
Stinging in joint of knee, particularly on inner side, when walking.
Tension in bend of knee, as if tendons were too short.
Tired, bruised and lame feeling in knee.
‖Sensation in knees as if palsied, weary and beaten, after walking, and when arising from seat.

Google

Left knee twice size of the other, very stiff, sore and painful. θRheumatism.
Swollen veins in bend of knee.
Tearing, stinging, spasm and tension in calf of leg, during and after motion, attended with vibration, heaviness, stiffness and numbness.
Cramp in calf of leg.
Tearing pain in tibia.
Tearing and stinging in shin and tendo-achillis.
In shin bone straining pressure, with vibration.
Lower limbs pain as if beaten, with heaviness; can scarcely rise from seat.
Twitching, as from something alive in legs.
Wasting of lower limbs.
Sensation as if sprained in muscles and bones of lower limbs.
Itching and swelling of legs, preceded by chill and heat.
Great swelling, pain and stiffness, could not raise foot high enough to walk on rough ground, would catch his toe and fall. θRheumatism of knee.
Pain when raising foot, preventing flexion.
Above external ankle a violent pain in bones and sinews when touched.
In ankle joint tearing upward and downward.
Pressure in inner ankle and tearing towards heel.
Tearing in ankles, particularly the left.
Sensation of coldness on ankle joint.
Rending and pricking on forepart of ankle joint.
In external ankles tearing and shooting, extending to little toe and preventing motion.
Lymphatic swelling of tendo-achillis of l. leg, with an ugly red spot.
Lymphatic swelling of tendo-achillis and heels; often tension, drawing, rending, during or after standing or walking; stitches in walking or sitting, pain as if overstrained.
Swelling burns, itches, skin peels off; pain when lifting foot; heavy and sore when stretching.
In heels tearing and stinging, deep into bone, when walking and stepping.
Heels pain as if ulcerated, when standing.
Pain when stretching foot.
Tingling in foot, as if after freezing.
Sudden stitches in feet, causing hobbling.
Stitches from inside outward in feet, when traveling in a carriage.
Vehement stinging when stepping on foot, terminating in numbness.

Google

Violent stitches from outward, or from below upward in foot.
Piercing, burning, or pricking pain in foot.
Tearing, attended with stitches and burning in foot.
Rending upward and drawing forward in foot.
Stitches, burning, itching, smarting, pain and cold feeling in feet, like as if frozen.
Soreness, burning, pricking and itching on foot.
Itching and burning stitches in foot.
Pain, like a festering under skin of feet, after long standing.
Pains, with swelling of sinews in foot.
Rending, burning and itching on dorsum of l. foot; < by scratching.
Stitches between metatarsal bones, like from a nail, when standing.
Pain in metatarsus, as if sprained and swollen.
Sinews of sole of foot as if contracted.
Rending, crawling and sensation of warmth in sole of foot.
Tearing in balls of feet, with pain when stepping on them.
Stitches extending to big toe.
Stitches in ball of big toe; in joints of toes.
At every step stinging in big toe.
In tip of big toe a pain, as from a blow.
Single jerks in toes, particularly in joints.
