[1] **Mind.** Is awkward and stumbles against everything.
Wrapt in thought; taciturnity.
| | Full of inexpressible desires.
| Moaning and sighing with the fever. θIntermittent.
| Child cries and screams violently and incessantly; sticks fist into mouth; face pale, body cool.
| Every 6 or 8 weeks anorexia and hypochondria, with pressure and tension, and tympanitis of epigastrium; constipation, with disgust and impatience of labor; attacks preceded by nausea, and tendency to diarrhœa. θHypochondriasis.
| | Dejected mood, morose, enjoys nothing.
| Peevish; irritable; impatient; morose, scornful mood.
| Ill humor, despises everything.
| | Fretfulness. θIntermittent. θCholera infantum.
| | Extremely impatient.
| | Morose mood that scorns everything, and desires also that others shall not appreciate or value anything.
| | Ailments from vexation and reserved displeasure.

[2] **Sensorium.** | Apoplexia nervosa et serosa; vertigo; drooping of lips; impaired speech; dribbling of saliva from mouth; paralysis of extremities.
| Vertigo when walking and when turning.

Inner Head. ‖Lacerating pain in forehead, excited and aggravated by feeling the heart, or by stooping.
‖Aching in forehead; fine stinging pains in forehead.
‖Headache over l. eye.
Stitches in vertex, or forehead.
‖Lancinating in head.
‖‖Short paroxysms of fine and violently stinging pains in head, increasing to an aching.
‖Stinging headache, with heaviness of head, also with drowsiness.
‖‖Headache, as if bruised, all through bones of head and down into root of tongue; nausea, vomiting; > outdoors.
‖‖Headache as of a bruise of brain and skull, which pierces through all the cranial bones into roots of teeth, with nausea.
‖Headache as though brain were mashed, with nausea and vomiting; miliary eruptions on forehead and cheeks by spells; pale face, and pale mucous membranes; scanty and short menses; weak pulse, cold hands; morose, enjoys nothing. θChlorosis.
‖Lacerating headache, from morning till noon.
‖‖Dull drawing in head, to and fro.
‖Beating pain in head and pit of stomach after coughing.
‖Heat and throbbing in head, with red cheeks.
‖Semilateral headache, with nausea and vomiting.
‖‖Tensive headache in occiput and nape of neck, extending as far as shoulders.
‖Pain in occiput and nape of neck.
‖‖Gastric headaches, occurring in nervous, sensitive persons, commencing with nausea and vomiting.
‖Malarial headache; loss of appetite and vomiting.
‖Hydrocephaloid: fontanelles open; painful soreness of occiput and neck; blue rings under eyes; frequent nosebleeding; pale face; nausea and vomiting; green, putrid discharges from bowels.

Outer Head. ‖Cold sweat on forehead. θDiarrhœa.
‖Open fontanelles; occiput and neck sore. θHydrocephaloid.

Sight and Eyes. ‖Worse from light, especially of a candle.
‖Blue and red halo around light.
‖Optical illusions in bright colors.
‖Obscuration of sight; eyes inflamed.
‖‖Eyes sunken; blue margins around them. θCholera infantum.
‖‖Dilated pupils.
‖Severe shooting pains through eyeballs, profuse lachrymation on looking steadily; blue and red halo around flame, pupil normal and mobile, with no external inflammation or lesion, except slight palpebral conjunctivitis. θChoroiditis.

Digitized by Google

‖Phlyctenules and ulcers of cornea or conjunctiva, especially if there is much photophobia; cornea may be vascular; redness of conjunctiva, lachrymation and pain and nausea.

‖Pustular inflammation of cornea and conjunctiva.

‖Child after catching cold: lids red and swollen; photophobia, lids being kept tightly closed; copious, purulent discharge, < at night; conjunctiva injected and swollen, especially on r. side, where engorgement was so severe that pupil appeared buried in a circular depression; discharge from eyes so copious that it soiled hair and ears; continual copious, green, diarrhœic stools, with colic; great emaciation; sleepless day and night; edges of lid red, without œdema; r. imbedded cornea ulcerated, also l., but in a less degree.

‖Inflammation of eyes; on opening r. lids, which were swollen, copious gush of tears; conjunctiva of bulb injected and infiltrated, and on close examination number of small depressions were noticed; intense tearing or tensive pains in eyes; great photophobia.

‖Scrofulous ophthalmia when there is keratitis with ulceration or infiltration of cornea; redness of eye, extreme photophobia, pain in temples and forehead.

‖Catarrhal conjunctivitis with profuse yellow discharge and chemosis.

‖Scleroticæ yellow.

‖Hardened mucus in external canthi.

‖Twitching of eyelids.

[6] **Hearing and Ears.** ‖Cannot endure the least noise.

‖Ears cold during febrile heat.

[7] **Smell and Nose.** Coryza: dry; with stoppage of nose; loss of smell; nausea; epistaxis.

‖Stoppage of nose; loss of smell; heaviness of head; dry cough, particularly at night coming on in long lasting paroxysms, with painful shocks in head and stomach; nausea followed by vomiting, general sweat and great weakness. θChronic catarrh.

‖Nosebleed, blood bright red; face pale.

Nose itches; when nausea is over, violent hunger.

[8] **Upper Face.** ‖Face: pale and puffed; pale, and body cool; sunken; deathly pale, sunken eyes with blue margins; livid, yellowish.

‖Convulsive twitches in muscles of face and lips.

‖Rash.

[9] **Lower Face.** ‖Skin around the mouth red.

Smarting eruption and aphthæ on margin of lips.

‖Lips: blue, during chill; white, during hemorrhage.

[10] **Teeth and Gums.** ‖Child thrusts its fist into mouth; screams

violently; face pale; body cool; vomiting and watery stools; prostration; spasms. θDentition.

‖Pain in a hollow tooth when biting on it.

‖Pain in molars > while eating; < in afternoon and still more at night.

‖Teeth chatter, with chill. θIntermittent.

[11] **Taste and Tongue.** ‖Loss of taste.

Taste: bitter; sweetish, bloody; like rancid oil, when swallowing; earthy; flat, with white, thickly coated tongue.

‖Tongue: clean; yellow or white; pale.

‖Disinclined to talk; tongue dry.

[12] **Inner Mouth.** ‖Profuse accumulation of saliva; is constantly obliged to swallow it.

‖Smarting in mouth and on tongue.

[13] **Throat.** ‖Fauces dry, sore, rough, stinging.

‖Spasmodic contractive sensation in throat and chest; difficult deglutition.

‖Pressure in throat, with pains in diaphragm.

‖Deep red color of tonsils and pharynx.

‖Rapid congestion of mucous membrane of pharynx; secretion of a thick, plastic, whitish, nauseous humor, appearing at first under form of small white or grayish points, either on tonsils or velum palati or pharynx.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Thirst or thirstlessness.

‖Desire for dainties and sweets.

‖Averse to all food, no appetite; earthy taste; stomach feels relaxed; nausea.

‖Great disgust and loathing of any sort of food.

[15] **Eating and Drinking.** ‖Indisposition from indigestible substances, lemon peel, berries, raisins, sweets, cake, pastry and unripe fruit, salads, pork, fats, sour beer, etc.

After eating: nausea; vomiting; stool.

‖Colic, with nausea and vomiting, after cold drinks or ice cream.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough: with nausea; of children.

‖Eructations every eight to ten minutes; with rumbling in abdomen.

‖Waterbrash.

‖Nausea: distressing; constant, with almost all complaints; as if from stomach; with empty eructations; accumulation of much saliva; qualmishness, and efforts to vomit.

‖Nausea and retching from smoking; primary effects of tobacco.

‖Faintness, nausea, retching. θPost-partum hemorrhage.

‖Inclination to vomit without nausea.

Digitized by Google

Nausea, profuse saliva; vomiting of white, glairy mucus; < stooping.

Nausea, with distension of abdomen and dryness in throat; after vomiting inclined to sleep.

Constant but unavailing desire to vomit; or immediately after vomiting wishes to do so again.

Incessant retching with vomiting of watery fluids and cutting pain in belly.

Constant nausea and vomiting of yellowish mucus.

Vomiting: of ingesta; of bile; of grass green mucus; bilious, putrid; copiously of jellylike mucus; of blood, or of a pitchlike substance; of a dark colored liquid, with or without blood; of a sour fluid; of large quantities of mucus; always with nausea; during pregnancy; with thirst, sweat, bad breath; with diarrhœa, colic, distended abdomen; with clean tongue.

Vomiting causes great pain in loins and hips.

Nervous vomiting, frequent and with constant nausea.

Vomiting due to irritability or other abnormal condition of nerves of stomach, particularly when tongue is clean, and persons are weak and nervous, and of large build; constant nausea and retching of hysterical women; morning vomiting in weakly persons who are affected by worms; nausea in nervous fevers and that which remains after an attack of indigestion.

Vomiting of food soon after eating, tasting very sour and accompanied by much retching; tongue coated in middle, edges red; region of stomach and hypochondria sensitive to pressure; three or four stools daily; general weakness; menses irregular; urine dark, depositing urates.

Vomits everything taken; food causes pain during short time it remains in stomach; tongue brown and cleft; bowels regular; urine thick. θChronic vomiting.

Loss of appetite nine months ago, without assignable cause; then followed vomiting of all food, with great debility; bowels much relaxed; smarting of eyes; catamenia regular.

Vomiting almost constantly for days. θRemittent fever.

Emaciated, scrofulous child, suffering from disease of mesenteric glands, vomited everything taken and cried the whole day; the vomited matter and accompanying chopped stools smelt very sour.

Constant nausea often with vomiting large masses of mucus, generally green. θDiarrhœa of children.

Tormina and bilious vomiting, coming on at first every fourth day, but latterly every Saturday; nausea with extreme weakness and repeated fainting; frequent at-

tacks of violent, bilious vomiting, obliging her to keep in bed all day; on other days perfectly well.

| Vomiting of infants at the breast.

| Stooping causes vomiting.

17 **Scrobiculum and Stomach.** | | Uncomfortable feeling in epigastrium.

| Violent distress in pit of stomach; attacks of pain; beating.

| | Indescribable sick feeling in stomach.

| | Sensation as if stomach hung down relaxed.

| | Pressure in stomach; clutching pains; beating.

| Cardialgia; typical form.

| | Pain most severe in front of abdomen, extending to l. hypochondrium, to sides, to back, and base of chest, with swelling of stomach; great agitation; constant nausea proceeding from stomach, with empty eructations and accumulation of much saliva; easy vomiting; diarrhœa.

| Stomachal catarrh, with abhorrence of all food, and tobacco; with nausea, vomiting, colic and diarrhœa; tongue always clean.

| Gastric catarrh from indigestible food or ice cold things; pain and mucous vomiting.

| After eating fat pork, headache, loss of appetite, nausea, vomiting; prostration and debility; pain in forehead; pale, bloated face; photophobia without redness of eyes; flat taste, slimy coated tongue; great thirst; frequent vomiting preceded by pressure and pain in stomach; frequent, offensive, flocky stools; slight, dry cough; occasional twitchings of muscles of face, lips and eyelids; restless sleep with frequent startings.

| Indigestion, from overloading stomach.

| Dyspepsia every day, or every other day, at same hour.

| After slight digestive disturbance, sudden vomiting of blood, occurring three times within seven days; blood at first dark and coagulated, in subsequent attacks fluid and bright red, followed by bloody stools; great prostration; frequent fainting fits; dimness of sight; slightest motion or cough causes nausea; tongue brown, dry, like earth; unquenchable thirst; obstinate constipation.

| After chagrin, constant pressing pain in pit of stomach, loss of appetite, frequent nausea; eight days after this, in consequence of anger, sudden vomiting, first of clotted, then of fluid blood, amounting to about two pounds; deathly pale; almost pulseless; faintness.

| Acute distress in epigastric region; forcibly vomiting immense quantities of black, tarlike matter, gushing from nostrils as well as mouth; extremities cold; hippocratic countenance; pulse almost imperceptible; cold, clammy sweats; extreme prostration and exhaustion. θMelæna.

Digitized by Google

After long continued, pressing pain in stomach, which alternated with toothache, sudden vomiting of blood, with great faintness; blood dark, thin, about one pound in quantity; pulse full; a second attack with great faintness, anxiety, feeble pulse, pale, cold face and cold hands.

Pale, anæmic girl, subject to pains in stomach and irritable conditions of mind, was suddenly seized with vomiting of blood after indulging in strong coffee; blood at first brownish black, then black and half coagulated, escaping in great quantities; between each attack of vomiting, which occurs about every half hour, anxiety, pressure in stomach, fainting; pulse small and feeble; face and hands pale and cold; thirst and internal heat.

After exposure to cold and wet, rigors and dyspnœa, followed by copious spitting of blood; cannot speak; sits on a chair, gasping, and every few seconds brings up a large mouthful of bright colored, frothy blood; pulse small and frequent; respirations short and very frequent; face livid and expressive of anxiety. θHæmoptysis.

Sudden attack; blood dark, black, sour; paleness; coldness; pulse scarcely perceptible; fainting; anxiety; pressure in stomach; great thirst; oppression of breathing. θHæmatemesis.

Hæmatemesis of children.

18 **Hypochondria.** Pinching pain in both hypochondria and in region of pit of stomach.

Pain in l. hypochondrium.

Diaphragm feels as if pressed between two millstones, front to back.

19 **Abdomen.** Distressing feeling in abdomen, as though stomach were hanging down, relaxed.

Sore feeling in abdomen.

Griping, as from a hand, each finger sharply pressing into intestines; > during rest, much < by motion.

Clutching and squeezing in abdomen.

Flatulent colic about navel, as though bowels were grasped with hand. θDysenteric diarrhœa.

Cutting colic near umbilicus; sometimes shivering.

Tenderness and pain about umbilicus, towards uterus.

Stitches from navel to uterus.

Cutting pain almost constantly running from l. to r. with every movement.

Paroxysms of shooting across abdomen from l. to r., causing nausea and vomiting, vomits froth and bile with difficulty; when vomiting, coughs to bring it up; sweats; offensive black stools; vomiting causes great pain in loins and hips, as if all the bones in body were being torn to pieces.

Digitized by Google

Severe pains in abdomen, radiating to all sides.
Flatulent colic, with frequent loose stools.
Colic of children: with diarrhœa, uneasiness, screaming and tossing about; from indigestion; after acid or unripe fruit, beer, etc.
Inguinal hernia, readily reducible, or strangulated.

[20] **Stool and Rectum.** Stool: bloody; as if fermented; consistence and appearance of fermented yeast; spurting out with much flatus; very offensive; light yellow; lemon colored; green as grass; greenish mucus; lumpy, greenish watery; white mucous, bloody; yellow, liquid, covered with bloody mucus; pitchlike or like frothy molasses; slimy, bloody, offensive, followed by tenesmus; putrid smelling; containing blood and matter.

Diarrhœa of teething children, yellow, white or green discharges, no pain or emaciation, but serious because of its long continuance; particularly indicated at period of weaning when food disagrees.
Diarrhœa: with pain, causing unceasing screaming and tossing about, in children; from taking cold; from disordered stomach, after late suppers; of infants, with vomiting of green or whitish matter; due to chill or to mental emotions; after overloading stomach with sweets, or fat pastry; in the Autumn.
Summer complaint of children, with crying, tossing, large abdomen, frequent, small, yellow, fermented stools.
Colliquative diarrhœa of dark colored stools, or of greenish matter, with particles having appearance of coagula.
Chronic diarrhœa, of miasmatic origin; clean tongue and frequent nausea, constant pain at umbilicus.
Acute internal catarrh.
Epidemic dysentery, with nausea, vomiting, pain in epigastrium; pressive frontal headache, loaded tongue, tenesmus, mucous fetid diarrhœa, < at night.
Dysentery: stools frequent, slightly tinged with blood, and often entirely composed of blood and slime; in the Fall, with vomiting of bile, tenesmus after stool and simultaneous affection of cœliacus; stools almost black, and fermented like frothy molasses; of children; cold nights after hot days.
Cholera infantum: nausea, vomiting, colic, diarrhœa; especially in fat, pale children; nausea and vomiting of yellowish mucus; lumpy, greenish, watery stools; paleness of face; blue margins around eyes; wants to lie down, ill humor; copious, fermented, flatulent, lemon colored stools, with thirst, fever and fretfulness.
Stools light green or an arsenic green.
First symptoms of cholera Asiatica; the nausea and vomiting predominates, headache and tightness of chest.

Digitized by Google

‖Vomiting after all ingesta, and as often as every quarter of hour, without cause; vomiting copious, preceded by shivering all over; no coldness or cramps; pulse slow; tongue furred. θCholera.

Before stool: colic, nausea, vomiting.

During stool: colic, nausea, vomiting; violent tenesmus; lassitude, coldness, paleness of face.

After stool: lassitude; tenesmus; twitching of face.

‖Hemorrhoids bleeding very profusely.

‖Itching at anus.

[21] **Urinary Organs.** Urine: scanty, dark red; turbid, with red sediment.

‖Yellowish red sediment in urine. θQuotidian ague.

‖Unsuccessful urging to urinate.

‖Ischuria, with convulsions.

‖Hæmaturia: with cutting in abdomen and urethra; from suppressed itch; with vesical spasm.

‖After becoming chilled, felt ill all over; very weak; could hardly move about from vertigo; confused ideas; severe pain in kidneys, with heat in lower bowels as if hot water was poured into them; towards evening violent pain in abdominal region and bladder, with desire to urinate, with passage of scalding urine and blood, fluid and clotted; next day, too weak to stand; feet quite cold, and as if paralyzed; head stupefied, could not sit up; more blood, followed by swoon, with deadly pallor, hardly perceptible pulse, and cold extremities; could hardly speak; heaviness of head, uneasiness and inclination to vomit, pressure on pit of stomach, pain in lower bowels and kidneys, weight and coldness of feet; frequent micturition. θHæmaturia.

‖During urination: burning in urethra; pains in back and epigastrium.

[23] **Female Sexual Organs.** ‖Prolapsus and hemorrhage; profuse, clotted blood, with heavy, oppressed breathing; constant flow of bright red blood, with cutting about umbilicus; constant nausea and vomiting; feels cold and is very pale; dizziness and headache; chill and coldness of body while internal heat rises up into head, with a bearing down pressure to uterus and anus; fainting; blood spitting, hæmatemesis; faintness with convulsions.

‖Great debility and leucorrhœa during intervals of menses.

‖Continual discharge of bright red blood.

Profuse menstruation, with constant nausea, not a moment's relief, not even after vomiting; nausea proceeds from stomach, and the discharge of bright red blood is increased with every effort to vomit, and flows with a

Digitized by Google

gush; violent pressure over uterus and rectum, with shuddering and chilliness; heat about head and debility; gasping for breath, faintness; after childbirth, after removal of placenta or after miscarriage; < when getting out of bed. θUterine hemorrhage.

‖Menses appeared four times in seven weeks, and last time so seriously that blood passed in large clots, and such a quantity of black fluid that it brought on swooning, loss of consciousness; vomiting of mucus, with cold skin looking like wax, blue lips, small, scarcely perceptible pulse. θCongestive menorrhagia.

‖Menses: too early and too profuse; blood bright red; menses return every two weeks; great weakness after menses; peevish humor; aching in head; lancinating in forehead; pale face; blue rings around eyes; vomiting of ingesta; distress in umbilical region.

‖Profuse menstruation, with constant nausea; not a moment's relief, not even after vomiting.

‖Discharge of blood before the proper period.

‖Scanty or short menses.

Dysmenorrhœa.

‖Severe pain about umbilicus, extending towards uterus, most distress about navel, but it runs off into uterus

‖With every movement a cutting pain, almost constantly running from left to right.

‖Uterine pains running down.

‖Pain extending towards and passing off into uterus.

*** Pregnancy. Parturition. Lactation.** ‖‖Vomiting of pregnancy; in some cases more nausea than vomiting.

‖Vertigo in pregnancy, with pale, bluish, puffed face, blue lips and nails; undulation of jugular veins.

‖Threatened abortion, often with a sharp or pinching pain around umbilicus, which runs downward to uterus, with constant nausea and discharge of bright red blood; convulsions.

‖In sixth week of pregnancy seized suddenly with abdominal pains, heat in epigastrium and vertigo; flooding soon followed by shooting in kidneys, weakness and heaviness of thighs and general debility; flooding increased hourly, soon passing through mattrass, and flowing in abundance under bed; colic increased, face pale and eyes encircled with blue; miscarriage followed, accompanied by acute pain; hemorrhage became more serious; pains in heart followed by dryness of mouth and great thirst; great exhaustion, could hardly speak.

‖After abortion occasional slight loss of blood, for four months, when an alarming hemorrhage took place with the usual symptoms, besides vomiting after least drink.

Digitized by Google

‖Incessant flooding; complete prostration; breathing heavy; oppression; colorless face and lips; ringing in ears; faint on raising head from pillow; flow bright red; much persistent nausea; pain in umbilical region, running down to uterus.

‖During labor pains great hemorrhage, apparently from placenta.

‖Labor pains spasmodic; cutting across from l. to r.; nausea; clutching about navel.

‖‖Uterine pains accompanied by severe cutting pains in umbilical region, interfering with true pains; faintness and nausea.

‖Uterine pains running downward.

‖‖Stitches darting off from umbilicus towards uterus.

‖After removal of placenta, sudden and alarming distension of abdomen in region of atonic uterus; face and tongue pale; sighing respiration; faintness, nausea, retching; cutting pains about umbilicus. θPost-partum hemorrhage.

‖Arterial bleeding from partial separation of placenta.

‖Post-partum hemorrhage; placenta attached; hemorrhage frightful, very fluid and gushing.

‖Metrorrhagia, often after confinement, heralded by slow pulse, nausea, etc.; steady flow of bright, red blood.

‖Nausea and vomiting in nursing women.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Voice hollow.

‖Spasm of cords; constant, alternate contraction and relaxation of cords, following each other in rapid succession.

‖Contraction accompanied by a sensation of tickling at entrance of trachea.

‖Spasm of glottis; blueness of face and coldness of extremities.

‖Inflammation of fossa; very little œdema. θLaryngitis.

‖‖Rattling in bronchi, when drawing a long breath; large accumulation of mucus in bronchi, difficult to raise.

‖‖Rattling noises in air passages during respiration.

‖Suffocative attacks from foreign substances in windpipe.

‖Bronchitis, with loud mucous râles; difficult expectoration; cough with nausea, even vomiting, or oppression, > by abundant expectoration.

[26] **Respiration.** ‖Oppression of chest in forenoon, with shortness of breath, as from inhaling dust.

‖Breathing: anxious and hurried; short and hurried; short and panting; heavy.

‖Rattling noise in bronchi when drawing breath.

‖Breath fetid, with vomiting and sweat.

Digitized by Google

Difficulty of breathing from least exercise.
Pain in diaphragm takes away breath.
Violent degree of dyspnœa, with wheezing, and great weight and anxiety about præcordia.
Attacks of suffocation; > in open air; < from least motion; constriction in throat and chest.
Threatened suffocation from accumulation of mucus.
Cough impedes respiration, even to suffocation.
Loses breath with the cough, turns pale in face and stiffens. θWhooping cough.
Suffocative cough with dyspnœa, nausea vomituritio, at end of attack. θWhooping cough.
Urgent dyspnœa, with sense of constriction across chest, accompanied by violent and convulsive cough.
Dry, spasmodic, shattering cough; during attack arrest of breathing, patient falling senseless to floor; each attack threatens to end fatally, and can only be overcome by use of cold water.
Difficult expiration.
Severe and convulsive paroxysm of asthma.
Violent constriction of throat and chest, peculiar, panting sound; gasps for air at open window; face pale; scarcely perceptible pulse; < from least motion; threatened suffocation. θAsthma.
Spasmodic asthma: with great constriction in throat and chest; with peculiar wheezing noise; with danger of suffocation; with bronchial catarrh; of adults; in hysterical subjects; after suppressed miliary eruptions.
Asthma, cyanosis supervening during fit, with frequent dry cough, cold sweat on face and extremities, constitutional vomiturition, nausea or even vomiting after cough.
Nightly suffocative fits. θAsthma.
Asthma Millari, with tickling in larynx, retching and vomiting.
Asthma of emphysematous subjects, when auscultation detects considerable quantity of mucus accumulated in bronchi, which patient cannot by any effort throw up in sufficient quantity; coughing brings on nausea.

Cough. Dry cough, caused by tickling in upper part of larynx.
Cough caused by a constrictive tickling from upper portion of larynx to lowest extremity of bronchi.
Cough dry, spasmodic, capricious, provoked by tickling and irritation of larynx, after coryza, at first dry, then fluent.
Spasmodic or catarrhal titillating cough, or suffocating cough with dyspnœa, nausea, vomiturition, especially at end of paroxysm, or with expectoration of scanty,

Digitized by Google

albuminous, nauseous mucus; mucous râles and vomiting of food.

Violent spasmodic cough, cannot cough soon enough at first; covers mouth with hand, in order not to inhale too much air.

Frequent attacks of spasmodic cough, shaking, racking, hollow; quickly following coughs from tickling in upper part of larynx, as from vapor of sulphur; expectoration of blood and mucus in morning.

Spasmodic cough with tendency to vomit, or with vomiting of whitish mucus; mucosity is easily produced in chest, and cough produces sonorous and bubbling râles.

Dry, spasmodic cough without vascular excitement.

Dry, spasmodic cough of old persons, coming on in fits, particularly at night after going to bed, or after dinner; tends to emphysema.

Cough with pain in abdomen, especially about navel, or pressure on bladder, hindering passage of urine; beating in head, or in pit of stomach; sense of excoriation in chest; after paroxysm of coughing respiration continues short, and forehead streams with perspiration; < in open air.

Cough coming on after a meal, especially P.M.; cough excited by each inspiration; tickling and constriction of upper part of trachea, coming on in open air; sudden precipitate fit of coughing; failure of breath; danger of asphyxia from mucus; anguish from choking; eyes starting out of head; face bluish red; buccal and nasal hemorrhage; efforts at vomiting; fit ending with vomiting of food; swooning during fit. θInfluenza.

Suffocative, racking, very exhausting cough, lasting an hour, towards evening.

Suffocating cough, whereby child becomes quite stiff and blue in face.

Loses breath with cough, turns pale in face, and stiffens.

Suffocative evening cough; continuous cough, with sweat on forehead, shocks in head, retching and vomiting.

Strangling with cough till blue in face. θPertussis.

Incessant and most violent cough with every breath.

Cough causing inclination to vomit without nausea.

Cough, with retching, much mucous expectoration and considerable dyspnœa.

Cough causes gagging, vomiting is followed by relief.

Cough with expectoration of blood.

Convulsive evening cough, expectoration having a repulsive metallic taste.

Cough especially at night, with loathing and vomiting.

Croupy coughs occurring at night.

Digitized by Google

‖Cough: nervous, spasmodic; rough, shaking; dry, from titillation in upper part of larynx; with every breath; returning after exertion; < from cool air; with inclination to vomit; with spitting of blood from least effort; constant, no phlegm yields, though chest seems full; strangling, so much mucus seems accumulated in bronchia; croupy, at night; fat children; in hysterical women; in teething children.

During cough: headache; sore pain in chest; paroxysms of suffocation, with rigidity of body; painful concussions (shocks) in stomach and head; pains in epigastrium and umbilical region; bleeding from mouth and nose; nausea, retching, vomiting; perspiration of forehead; blueness of face; jarring of body; loss of consciousness and falling down.

‖Spasm of glottis before paroxysm; bleeding from nose and mouth during coughing fits; vomiting of mucus or food; convulsions and stiffening of body backwards; vomiting of food without coughing; rattling of mucus in bronchial tubes; rash, eruption. θWhooping cough.

‖Convulsion of glottis continuing so long that child remains for a time without respiring; cough dry, vomiting after the fit without expelling much mucus; dyspnœa; fine râles in back at lower part of thorax. θWhooping cough.

‖Violent, shattering, hollow coughs, following each other in quick succession, and do not admit recovery of breath; expectorates mornings some light red blood, mixed with mucus, of a putrid, sweetish taste. θTussis convulsiva.

‖‖Whooping cough: with nosebleed; bleeding from mouth; vomiting; loses breath, turns pale or blue, and becomes rigid.

‖Febrile cough (principally after *Pulsat.* and *Nux vom.*), in women and children; irregular periods of heat, during which the dry cough gets worse.

‖Tussis abdominalis, with vomiting which relieves.

‖‖Phlegm rattling on chest, sometimes vomited, with young children.

Expectoration of mucus with metallic taste.

‖‖Sputa scanty, albuminous.

‖Expectoration: mornings, of a light red blood, mixed with mucus, or of ropy mucus, often vomited; of blood from least effort.

Inner Chest and Lungs. ‖Spasmodic tightness of chest, with contraction of throat and panting breathing.

‖Great oppression of chest, can hardly breathe. θIntermittent fever.

Digitized by Google

Acute catarrh of children; suffocating cough, with congested and bluish face, and loss of breath, or when cough is accompanied by nausea and vomiting, or provoked by a tickling in larynx, with throbbing of head and heart and longing to pass water.

Rattling of large bubbles; fever, but face rather pale; cough and gagging.

Collection of mucus which is difficult to expectorate; expectoration gives but temporary relief.

Strangling as if from mucus in chest.

Bronchitis: of children; with accumulation of phlegm, which threatens to suffocate; spasmodic cough; rash on chest.

Fine, rattling noises in chest, spasmodic cough; nausea; œdema pulmonum.

Pulmonary congestion and simple pneumonia, consequent upon repercussion of scarlatinal eruption.

Infantile pneumonia; respiration rapid, difficult; surface blue; face pale.

Profuse hemorrhage, of a bright red color, provoked by a dry, tickling, racking cough, or even by a little hawking, < from least exertion; preceded by a sense of bubbling in chest and accompanied by nausea, chills, heavy breathing, oppression, livid face, small and frequent pulse, anxiety and debility; cannot utter a word; protracted taste of blood in mouth.

Hemorrhage from lungs after venesection, especially if bleeding is scanty, constituting an expectoration of blood streaked mucus; or a blood spitting, from least effort, without cough.

Blood frothy and bright colored; gasping for breath pulse small and frequent; face livid and anxious.

Hemorrhage from lungs: bright red; coming up with slight effort; < from least exertion; frequent hacking, with expectoration of blood streaked mucus; with or without cough; after disturbed catamenia; after mechanical injuries; after former bleedings have weakened lungs; with dry cough in phthisis.

Hæmoptysis; recent cases.

Vomiting and complication of asthma in emphysematous subjects. θInfluenza.

Cyanotic symptoms with spasms of chest and dyspnœa.

Spamodic affections of chest.

Shooting pain with remissions, not inflammatory, cannot breathe, puts both hands down, bends forward, opens windows, gasps for breath; attacks < at night.

Emphysema of old people

[29] **Heart, Pulse and Circulation.** Pulse: large and soft: accelerated but weak; sometimes imperceptible.

Digitized by Google

[31] **Neck and Back.** ‖Swelling and suppuration in throat pit.
‖Cramp between scapulæ during motion.
Much pain in back, at same time in limbs.
‖Shooting pains, from r. kidney down thigh to knee, like cramp.

[32] **Upper Limbs.** ‖Coldness of one hand, while the other is hot.
‖Cold hands.

[33] **Lower Limbs.** ‖Sensation in femur, as if dislocated, on sitting down.
‖Cramps in thighs, at night, with lumps in thighs.
‖Convulsive twitchings of legs and feet. θHemorrhage.
‖Itching of calves.
‖Ulcer with black base on foot.

[34] **Limbs in General.** Sensation as if joints had gone to sleep.
‖Pain in joints, as is usual when limb goes to sleep.
‖‖Pain, as if bruised, in all the bones.
‖Cold hands and feet.

[35] **Rest. Position. Motion.** Rest: griping in intestines >.
Restless, tosses about from side to side.
Hands clenched and arms thrown violently forward.
Puts both hands down, bends forward: on account of shooting pain in chest.
Sitting down: sensation in femur as if dislocated.
Sits on a chair gasping: after blood spitting.
Could not sit up: after pain in abdomen.
Falling down: during cough, with unconsciousness.
Wants to lie down: cholera infantum.
Lies upon back unconscious: during spasms.
Head thrown back: during spasms.
Body bent backwards: during hysterical spasm.
Body rigid, stretched out, jerking of arms.
Body violently bent backwards and drawn in same direction by spasmodic jerks.
Slightest motion causes: nausea, cutting pain in abdomen; attacks of suffocation; constriction of throat <; cutting pain from l. to r. through uterus.
Motion: griping in intestines <; sweat <; cramp between scapulæ; sweat <.
Least effort: difficulty of breathing; spitting of blood; profuse hemorrhage.
Exertion: cough returns.
On raising head from pillow: faintness.
Getting out of bed: vertigo and weakness of knees; menstruation <.
Tossing about: from diarrhœa.
Tossing up body: during spasm.

[36] **Nerves.** ‖Oversensitive to heat or cold.
‖Restlessness with the fever. θIntermittent.

Digitized by Google

Very weak, averse to all food; nausea; sudden prostration.
Extreme prostration and exhaustion; seemingly the last straits of vitality are reached. θMelæna.
Wants to lie down. θCholera infantum.
Awkward, stumbles against everything.
Fainting; convulsions; apoplectic sopor.
Hysterical spasms, coming on several times a day, and gradually growing more severe; body bent backwards; muscles of face distorted; groaning.
Hysteria; every fresh development of hysterical symptoms brings on a sensation of continual nausea.
Nervous attacks with feeling of suffocation.
Convulsive twitching in limbs, a painful tremor.
Spasms without loss of consciousness.
Tetanic rigidity of body with bluish redness of face.
Body rigid, stretched out, spasmodic jerking of arms.
Body violently bent backwards and drawn in same direction by spasmodic jerks. θTetanus.
Spasms after catching cold during purpura; lies upon back unconscious; face pale and swollen; eyes at one time closed, again open; horrible twitching of muscles of face, lips and eyelids; spasms of arms and legs often tossing up the body; attacks come on every five minutes, lasting ten to fifteen minutes, and are followed by great prostration; occasional retching.
Clonic or tonic spasms in children and hysterical women; head thrown back; loss of consciousness; outcries; pale, puffed face; distortion of muscles of face and of half closed eyes; convulsive twitchings of muscles of face, lips, eyelids and limbs; asthma; nausea; vomiting.
Awoke from sleep in evening with wide open, staring eyes; hands clenched and arms thrown violently forward; lies quiet several minutes, then gasps and groans; constant staring with spasmodic contraction of r. arm; eleven attacks in twenty-four hours.
Frightful spasms affecting whole of l. side, followed by paralysis; eyes fixed and turned to right; pupils dilated and insensible; frequent opening and shutting of lids; slight contractions of r. corner of mouth; at times regular movements of r. arm and hand; pulse frequent and feeble; tracheal râle, as in paralysis of lungs; discharge of brown mucus from mouth; respiration irregular; inspiration short, followed by slow, sighing expiration; skin hot, but r. ear cold. θEclampsia.
Eclampsia in pregnancy or childbed; violent cutting around navel; vomiting; pale face.
Fainting, summer heat or hot rooms, with nausea.
Convulsions: in whooping cough; from suppressed exanthema; from indigestible food, etc.

Digitized by Google

‖‖Tetanic spasms from swallowing tobacco.
‖‖Tetanic spasms in old lady, with starting, twitching; coughs up bloody phlegm.
‖Tetanus; trismus.
‖Opisthotonos and emprosthotonos.
‖Catalepsy.
‖Epileptiform spasms, with shrieks; opisthotonos; face pale, puffed; gastric derangement.
‖Epilepsy of children or secondary epilepsy, when its starting point is the pneumogastric nerve.

[27] **Sleep.** ‖Yawning and stretching.
‖Shocks on falling asleep.
‖Sleep, with half open eyes; moaning, groaning.
‖‖Starts up in sleep.
‖‖Sleepless.
‖When deprived of sleep: nausea and languor.

[28] **Time.** Morning: vomiting; expectoration of blood and mucus; expectorates light red blood with mucus; paroxysms of chill lasting half an hour, heat lasting two hours; bitter taste in mouth.
From morning till noon: lacerating headache.
9 A.M.: chill.
11 A.M.: chill.
Forenoon: oppression of chest.
Day: sleepless.
All day: cried continually; obliged to keep in bed on account of bilious vomiting.
Afternoon: pain in molars <; severe chill; yawning with chilliness.
Till 2 P.M.: nausea and vomiting.
3 P.M.: severe chill lasting one hour.
Towards evening: lasting one hour, suffocative, racking, very exhaustive cough; violent pain in abdominal region and bladder.
Evening: suffocative cough; anxious, dry heat; sensation of great weakness; awoke from sleep with wide open, staring eyes; general heat; dry heat very troublesome.
Lasts till 7 P.M.: fever.
Night: discharge from eyes <; sleepless; dry cough <; pain in molars <; dry, spasmodic cough; croupy cough; attacks of shooting in chest <; very profuse sour sweat; disagreeable heat; epidemic dysentery <; cramp in thighs; irritable, irascible; fever <.

[29] **Temperature and Weather.** ‖Oversensitive to heat and cold.
Worse in winter and in dry weather.
‖Worse in warm, moist wind, south winds; catarrhs; asthma, etc.

Digitized by Google

Warm room: chill <.
Summer heat or hot room: fainting.
External heat: < chill.
Oversensitiveness to heat or cold.
Out of doors: headache >; sweat <.
Open air: suffocation >; cough <; cough comes; chill <; chill >.
Covers mouth with hand not to inhale too much air.
Gasps for air at open window: constriction of throat.
Cool air: nervous cough <.
After exposure to cold and rain: hemorrhages <.
After exposure to cold and wet: rigors and dyspnœa, then spitting of blood.
After catching cold: lids red and swollen.
Drinking: chill >.
After cold drink or ice cream: colic.
Cold water: > spasmodic cough.

40 **Fever.** Paroxysm begins with an internal chill, made < by external heat.

Chilliness, cold hands and feet, which are moist or dripping with cold sweat.

Coldness of upper part of body.

Chill but slight with many gastric ailments.

Chill: preceded by violent retching; mostly with thirst but also without; with great oppression of chest; with nausea and vomiting; with diarrhœic stools; < in a warm room or from external heat; > by drinking, and in open air; at 9 A.M.; every other day at 11 A.M.; of short duration soon changing to heat; with great lassitude and weariness.

After a short chill, dry heat, with parchmentlike skin.

Severe chill in afternoon with nausea, followed by heat with sweat of several hours' duration, and ending with sour sweat; during apyrexia, coated tongue; pressure at stomach. θQuartan ague.

Great nausea before chill and during whole paroxysm, cannot stir eyes without nausea, but no vomiting; great thirst during chill, none during fever or sweat; very nervous, trembling, during chill shook inside; intense headache during paroxysm, and in a modified degree during apyrexia, extending down to root of nose and throat; sweat like rain; paroxysms irregular. θAgue.

Chill irregular, light and short; fever long, but not very violent; no thirst during chill, but much thirst all through heat; thick, white, pappy coating on tongue; complete loss of appetite; great weakness and prostration during apyrexia; constant nausea and occasional vomiting.

Digitized by Google

Chill from 9 A.M. to 3 P.M., with intense aching in back and bones; nausea and vomiting after chill; intense fever with thirst and throbbing frontal headache; becomes unconscious during fever, which lasts till 8 P.M., when sweat comes on for about one hour, together with great shaking all over, and great thirst; continued jumping headache, very thirsty all the time with anorexia. θAgue.

In afternoon yawning with chilliness, extending from back, soon followed by coldness of extremities, internal shaking, trembling and cramps in chest; in evening, general heat accompanied by great impatience and despondency; great heat, particularly in head and face, cheeks red, pulse soft, small, slightly increased; pain in limbs as if they were broken; heat followed by sweat; no thirst during fever; loss of appetite; escape of saliva from mouth during sleep; next day lassitude, headache, flat taste, several diarrhœic stools, with cutting pains in abdomen. θAgue.

Paroxysm at 10 A.M.

Aching in bones and pain through temples, with heaviness in forehead; chills up and down back, with great thirst, lasting fifteen minutes, was not a "regular shake," accompanied by great languor and weakness, so that "he fell down in a bunch," then came nausea and vomiting, followed by a burning fever, which lasted until 2 P.M.; thirst and throbbing headache during fever, followed by profuse sour sweat; paroxysms postponing. θAgue.

Chill at 9 A.M.; teeth chatter; nails and lips blue; no thirst; next fever, slight thirst, moaning, sighing; slight heat; restlessness; pulse large and soft; tongue coated white and thick; frontal headache; diarrhœa, stools yellow and painless; internal heat, with external coldness; drinks little; much nausea and vomiting; albuginese yellow; perspiration stains linen yellow.

External coldness with internal heat.

Sudden attacks of general heat, with cold hands and feet.

One hand cold, the other hot.

Hands and feet icy cold and bathed in cold sweat, with redness of one cheek and paleness of the other.

Heat all over, with alternate coldness and paleness of face; cold sweat on forehead.

Heat with nausea and vomiting; anxious, oppressed breathing; dry, hacking cough, often exciting nausea and vomiting.

Anxious dry heat in evening.

Heat, with or without thirst.

Digitized by Google

Sweat: hot, sudden attacks in room; partial, cold; on upper part of body; < by motion; pungent, sour smelling; stains yellow; < out of doors; cold, clammy.

Sour sweat with turbid urine.

Very profuse sour sweat, mostly during night.

Profuse sweat after abuse of quinine.

Paroxysm sets in with yawning, stretching, and a collection of saliva in mouth; chill generally of short duration, soon passing over into heat; internal chill, as if under skin, < by hot applications, > by drinking and in open air; no thirst or but little during chill; violent thirst for large quantities during heat. θIntermittent.

In evening sensation of great weakness; restless, tosses about from side to side; slowly opens eyes and then closes them again; speaks in a low voice of things which have occurred previous day; spasmodic stretching and yawning; cold feet; paroxysm lasts one to two hours followed by sleep, after which patient is not aware of having had attacks. θQuotidian ague.

Paroxysms occur in morning and consist of moderate chill lasting about half an hour, followed by scarcely perceptible dry heat, lasting about two hours, during which pulse is full, soft and moderately frequent; with chill severe raging headache, brings tears to patient's eyes; nausea, pain in stomach, and short dry cough; headache continues until evening; during apyrexia, vertigo, loss of appetite, pain in small of back and limbs. θQuotidian ague.

Shivering, with gooseflesh, followed by flying heat, both of short duration; loss of appetite; tongue white; stool scanty and hard; heat in stomach and sensation of hunger; bitter taste in mouth in morning; waterbrash and retching; red, itching spot on r. chest, burning after scratching. θQuotidian ague.

Severe chill 3 P.M. without thirst, lasting one hour, followed by heat with stupefying headache and great thirst; sweat long and profuse with thirst; during apyrexia great weakness and lassitude; on getting out of bed vertigo and weakness of knees; disagreeable heat at night; restless, unrefreshing sleep; anorexia; bitter taste; white tongue; thirstlessness. θQuotidian ague.

Tertian ague anteponing half hour; chill one and a half hours' duration; high fever with sweat, lasting rest of day; during whole attack great thirst, water taken being soon vomited; headache with the fever; during apyrexia, earthy taste, pressure in stomach, debility.

Chilliness with yawning and vomiting; after an hour heat in head and redness of face, hands and feet being

Digitized by Google

scarcely warm, followed by sweat on face; during apyrexia despondent, will not play, lies about a good deal, loss of appetite, grayish yellow diarrhœa, scanty red urine, restless sleep. θTertian ague.

‖Hard chill every other day, at 1 or 2 P.M.; continual nausea and vomiting of bitter, bilious matter, and of everything taken into stomach; chill very violent, with great thirst, and drinking only a little at a time; towards the last has chills and flushes of heat, then great heat and profuse sweat.

‖Chill every other day, at about 11 A.M.; shivers awhile, then shakes for twenty minutes; headache; hands first cold; nausea all the time; no thirst with the chill, but with the heat; chill followed by fever; sweat after fever. θIntermittent.

‖‖Backache, short chill, long fever; heat, usually with thirst, headache, nausea and cough.

‖‖Recent cases, occurring in young, previously healthy persons; paroxysms violent and regular, generally of tertian type. θAgue.

‖Predominance of gastric symptoms during paroxysm as well as during apyrexia. θIntermittent.

‖Relapses from improprieties in diet.

‖‖Paroxysms suppressed by quinine.

‖Intermittent fevers after abuse of quinine; also in beginning of irregular cases, especially if there is much nausea.

‖Worse during sweat; better after it.

Type: quotidian; tertian; quartan; apt to postpone and become irregular.

Prodroma: nausea; violent retching; yawning, stretching, backache, headache, and profuse flow of saliva.

Apyrexia: never clear; disturbed by gastric troubles; pale face; herpes labialis; anorexia; taste of insipid water, salivation; sense of emptiness and weakness of stomach, nausea; loose stools; bruised feeling of limbs; restless sleep; difficulty in collecting one's thoughts; sadness.

‖Infantile remittent fever.

‖Yellow coating on tongue, with dry mouth; loathing of food, with desire to vomit; fetid odor from mouth; bitter taste in mouth, and of food; nausea, with regurgitation of ingesta, and vomiting of undigested food; pressure and painful fulness in pit of stomach; colic; diarrhœic, yellowish stools, or fetid, putrid stools; pale, yellowish color of skin; headache, especially in forehead; febrile heat, with thirst or shivering. θBilious fever.

‖Yellow fever, in first stage; dizziness, chilliness, pain in back and limbs, uncomfortable feeling in epigastrium, with nausea, vomiting and great weakness.

Digitized by Google

Dry and extremely troublesome heat, especially in evening, with thirst; great restlessness, burning in palms of hands and night sweats; parchmentlike skin; desire for dainties only; very listless. θHectic fever.
Worm fever, with retching, blue rings around eyes, vomiting with a clean tongue.

41 **Attacks, Periodicity.** Attacks of illness, with loathing of food.
Paroxysms: of abdominal pains; of great weakness, last one to two hours; of suffocation; intermittent.
Fits: of dry, spasmodic coughing.
Following each other in quiet succession: violent shattering, hollow cough.
Sudden attacks: of general heat.
For a time: child remains without respiring; during whooping cough.
Every few seconds: brings up a mouthful of bright colored frothy blood.
Every five minutes: lasting ten to fifteen minutes; spasms.
Every eight to ten minutes: eructations.
Evening, 10, 15 minutes: attacks in pit of stomach.
Every quarter of an hour: vomiting.
Fifteen minutes: chill lasts.
Twenty minutes: shakes.
Half hour: tertian ague anteponing; attacks of vomiting of blood.
One hour: chill lasts; heat in head; sweat after chill.
Eleven attacks in twenty-four hours: of spasms.
After a meal, especially P.M.: cough.
After dinner: dry, spasmodic cough.
Three or four stools a day.
Chill irregular.
Several times a day: hysterical spasms.
Every day at same hour: dyspepsia.
Every night: suffocative fits.
Every other day at same hour: dyspepsia.
Every fourth day: tormina and bilious vomiting.
For days: constant vomiting.
Every Saturday: tormina and bilious vomiting.
Every two weeks: menses.
Every six or eight weeks: anorexia and hypochondria.
Sixth week of pregnancy: abdominal pains, heat in epigastrium and vertigo.
Four times in seven weeks: menses.
For four months: occasional slight loss of blood.
In Autumn: diarrhœa; dysentery.

42 **Locality and Direction.** Right: eye <; imbedded cornea, ulcerated; opening lid gush of tears; shooting

Digitized by Google

pain from kidney down thigh to knee; spasmodic contraction of arm; slight contraction of corner of mouth; regular movements of arm and hand; ear cold.

Left: headache over eye; cornea ulcerated; pain in hypochondrium; frightful spasms affecting side.

Downwards: pain from umbilicus to uterus.

From l. to r.: cutting pain in abdomen shooting across.

Turned to right: eyes.

From front to back: diaphragm feels as if pressed between two millstones.

Backwards: stiffening of body.

Down: uterine pains running.

[43] **Sensations.** Pricking burning pains.

Headache, as if bruised, through bones of head and down to root of tongue; as of a bruise of brain and skull; as though brain was mashed; as if stomach hung down relaxed; diaphragm feels as if pressed between two millstones; griping, as from a hand, each finger sharply pressed into intestines; as though bowels were grasped with hand; as if all the bones in body were being torn to pieces; strangling, as if from mucus in chest; oppression of chest as from inhaling dust; tickling in upper part of larynx, as from vapor of sulphur; as if hot water was poured into bowels; feet as if paralyzed; as if blood was vomited up; sensation in femur as if dislocated; as if joints had gone to sleep; pain in bones as if bruised; as if limbs were broken; as if chill was under skin; as if forehead was being crushed; as if all the bones were being torn to pieces.

Pain: over l. eye; in occiput and nape of neck; in temples and forehead; in hollow tooth; in molars; in diaphragm; in loins and hips; in stomach; most severe in front of abdomen, extending to l. hypochondrium to sides, to back and base of chest; in teeth; in l. hypochondrium; about umbilicus toward uterus; in abdomen; in heart; in uterus; in small of back; in limbs; at umbilicus; in epigastrium; in lower bowels and kidneys; in joints.

Violent pain: in abdominal region and bladder.

Intense tearing pains: in eyes.

Intense headache: extending to root of nose and throat.

Severe raging headache.

Acute pain: after miscarriage.

Violent distress: in pit of stomach.

Severe pains: radiating in abdomen; in kidneys; about umbilicus.

Cutting pain: in belly; near umbilicus; through abdomen from l. to r.; in abdomen and urethra.

Anxiety: about præcordia.

Digitized by Google

Piercing pain: through all cranial bones into roots of teeth.
Pinching pain: in both hypochondria and region of pit of stomach; around umbilicus downward to uterus.
Shooting pain: through eyeballs; from r. kidney down thigh to knee; across abdomen; in kidneys; in chest.
Stitches: in vertex or forehead; from navel to uterus.
Fine and violently stinging pains: in head.
Stinging pain: in head; in fauces.
Beating pain: in head; in pit of stomach; in stomach.
Throbbing: in head; of heart; frontal headache.
Jumping headache.
Painful concussions: in stomach and head.
Clutching pains: in stomach; in abdomen.
Cramp: between scapulæ; in thighs; in chest.
Griping: in intestines.
Squeezing: in abdomen.
Stupefying headache.
Pressing pain: in stomach.
Intense aching: in back and bones.
Aching: in forehead; in head; in bones.
Pressive frontal headache.
Constant pressing pain: in pit of stomach.
Bearing down pressure: to uterus and anus.
Tensive pain: in occiput and nape of neck, extending to shoulders; in eyes.
Sense of excoriation; in chest.
Painful soreness: of occiput and neck.
Burning: in urethra; in palms of hands.
Smarting: eruption on margin of lips; in mouth and on tongue; of eyes.
Sore pain: in chest.
Sore feeling: in abdomen.
Soreness: of fauces.
Bruised feeling: of limbs.
Tenderness: about umbilicus.
Painful fulness: in pit of stomach.
Violent pressure: over uterus and rectum.
Indescribable sick feeling: in stomach.
Heat: in head; in epigastrium; in stomach; dry and extremely uncomfortable.
Dull drawing: in head to and fro.
Dryness: of fauces; of mouth.
Distress: about navel.
Sense of emptiness: of stomach.
Pressure: in throat; in stomach; in bladder; in pit of stomach.
Uncomfortable feeling: in epigastrium.
Constriction: in throat and chest.

Digitized by Google

Oppression: of chest.
Heaviness: of head; of thighs; in forehead.
Strangling: with cough.
Spasmodic tightness: of chest.
Contractive feeling: in throat and chest.
Tickling: at entrance of trachea; from upper portion of larynx to lower extremity of bronchi.
Bubbling: in chest.
Weakness: of thighs.
Trembling: internal.
Coldness: of upper part of body; of feet; of extremities; of one hand.
Internal chill.
Itching: spot on r. chest; at anus; of calves.

" **Tissues.** ‖Muscular awkwardness.
‖‖Hemorrhages: bright red, from all the orifices of body; after mechanical injuries.
After exposure to cold and rain.
‖Plethora, fat children.
‖Skin and mucous membranes pale; pulse small, soft; chilliness; little appetite; constipation; marked anæmic murmurs; great debility and weakness; finally could hardly eat anything; nausea and vomiting following slightest amount of food; great emaciation; headache, as if forehead was being crushed, with nausea; eruption on forehead and cheek; scanty menses; querulous, not pleased with anything; hands cold; hysterical.
‖Cholerose gastric symptoms, nausea, vomiting, diarrhœa.
‖Dropsy in internal parts.
‖Skin and muscles lax.
‖Pain as if bruised in all the bones.
‖Pains as if all the bones were being torn to pieces; with vomiting and pains in bowels.
‖Icterus; rickets; atrophy.
‖Has an unmistakable relation to the voluntary muscles; in every kind of convulsions in children, in tonic, and especially in clonic convulsions, from the distortion of face, rolling of eyes and clenching of thumbs to the most severe epileptic spasms, particularly if there is nausea.

" **Touch. Passive Motion. Injuries.** Pressure: stomach and hypochondria sensitive.
When biting on hollow tooth: pain in it.
After mechanical injuries: hemorrhage from lungs.

" **Skin.** ‖‖Itching, unchanged by scratching.
‖Itching of skin, with nausea; has to scratch till he vomits.
‖Miliaria rubra, with dyspnœa, colic and nausea.
‖Miliary rash on forehead, temples and cheek.
‖Rash of the lying in.

Digitized by Google

Suppressed eruption with cool skin.
Eruptions suppressed, or tardily appearing, with oppression of chest; vomiting and tickling cough.
Herpetic eruption at wrist joint and anus, with red blotches after scratching.
Erysipelas, the redness leaves too soon, with renewed vomiting.
Reaction so weak that eruption developes tardily or does not appear at all; anxious oppression, or constriction of chest; irascible, irritable, particularly at night, preventing sleep, and causing great anxiety; severe tickling cough, with blueness of face and dyspnœa. θMeasles.
Fever, < towards night; sleeplessness; complete loss of appetite; nausea; despondent and lachrymose; groaning. θScarlet fever.
Vascular erethism with tardy development of eruption; anxious constriction of chest; restless tossing about. θScarlet fever.
Delayed eruption in scarlatina, with vomiting, diarrhœa, oppression and anxiety.

Stages of Life, Constitution. Women and children; emphysematous individuals.
Girl, æt. 6 weeks, eight days after birth caught cold; inflamed eyes.
Girl, æt. 3 months, after receiving eight drops of laudanum; opium poisoning.
Child, æt. 17 weeks, scrofulous; vomiting and diarrhœa.
Child, æt. 22 weeks; spasms.
Child, æt. 30 weeks, pale, fat; spasmodic cough.
Boy, æt. 3, after overloading stomach; diarrhœa.
Boy, æt. 4; ague.
Boy, æt. 4; eclampsia.
Boy, æt. 10, sanguine, scrofulous, after eating pork; diarrhœa.
Girl, æt. 11, black hair and eyes, subject to attacks of ague for which quinine was taken; intermittent.
Boy, æt. 14; chronic vomiting.
Girl, æt. 15; ague.
Girl, æt. 16; melæna.
Man, æt. 17, sanguine temperament, suffering from purpura, after catching cold; spasms.
Girl, æt. 18, graceful, menses profuse; ague.
Man, æt. 20, weak, brunette, melancholic; ague.
Woman, æt. 21; ague.
Woman, æt. 22; ague.
Woman, æt. 23, small, pale, irritable, brown hair, menses appeared at 17 but were very scanty; anæmia.
Woman, æt. 23, blonde; hæmatemesis.

Digitized by Google

Women, æt. 24, strong, good constitution, married three months, pregnant six weeks; uterine hemorrhage, with abortion.
Woman, primipara, after tedious labor, terminated by instrumental delivery; hemorrhage from uterus.
Woman, suffering four weeks; flooding.
Woman, æt. 24; hysterical spasms.
Girl, æt. 25, strong; hæmatemesis.
Man, æt. 25; chronic nasal catarrh.
Woman, æt. 26, large, robust, fair complexion, has suffered four years; tormina and bilious vomiting.
Swedish girl, æt. 26, ill for three years, has taken much quinine; intermittent fever.
Woodcutter, suffering for years, every spring and fall; ague.
Man, suffering some weeks; ague.
Girl, æt. 28, anæmic; hæmatemesis.
Man, æt. 28; cholera.
Woman, æt. 30, blonde, weak; ague.
Soldier, æt. 34; dysentery.
Negro, after piercing sole of foot by stepping upon a fish bone; tetanus.
Woman, æt. 35, ill two weeks; ague.
Woman, æt. 35; ague.
Woman, æt. 38; cough.
Woman, æt. 38, has taken quinine; intermittent fever.
Man, æt. 39, tuberculous, after exposure to wet and cold; hæmoptysis.
Woman, æt. 39, married; vomiting.
Woman, æt 40, four months after abortion; hemorrhage.
Woman, æt. 42, suffering 2½ years; vomiting.
Man, æt. 44, ague.
Man. æt. 45, suffering four weeks; constant vomiting.
Woman, æt. 47, suffering six weeks; choroiditis.
Man, æt. 54, suffering three months; chronic vomiting.
Woman, æt. 54, good constitution, menstruation ceased six months ago without inconvenience, after taking journey during which she became chilled; hæmaturia.
Widow, æt. 54, since attack of cholera four years ago, continual suffering in abdomen; dysentery.
Man, æt. 62; ague.
Woman, æt. 72, melancholic temperament, brunette, thin, tendency to hemorrhoids and abdominal affections; spasmodic cough.

IRIDIUM.

The metal. *Ir.*

One of the metals of the platinum group, among the heaviest of known substances and almost indestructible.

Introduced by Hering in 1853.

The precipitate made by Genth was triturated by Boericke; one ten thousandth part of it produced a vivid black.

Twenty grains of the 3d trituration were taken by A. J. Tafel when in a state of perfect health. It is the only proving of Iridium and not contained in Allen's Encyclopedia. All the symptoms were experienced within two hours.

[4] **Outer Head.** Pain in middle of occipital bone.

[5] **Sight and Eyes.** A feeling as if the eyes were being affected from below upward.

[6] **Hearing and Ears.** Feeling of numbness in ears and throughout the body, lasting but a short time.

[8] **Upper Face.** Pain in l. malar bone, a kind of stinging; from this place a kind of warmth spreads over the whole face; the pain is also felt in r. malar bone like a pressure.

Feeling as of a triangle in face, the base is formed by the two malar bones, the apex in the vertex.

[12] **Inner Mouth.** Increased saliva with sensation in malar bones which is more perceptible on l. side.

[32] **Upper Limbs.** A transient pain on inner side of wrists, particularly the left, also in bend of knee joint.

[33] **Lower Limbs.** Pressing in anterior portion of l. thigh in middle of upper half, followed by pressing in groin.

While walking, feeling of tension in both thighs, particularly in l.; then a dislocated feeling in l. hip joint, and a dull pain tending toward l. gluteal region.

Cramp-like contraction in r. calf and middle of sole of foot.

[35] **Rest. Position. Motion.** While walking: feeling of tension in both thighs.

[42] **Locality and Direction.** Right: pain in malar bone; cramp-like contraction in calf.

Left: pain in malar bone; sensation more perceptible in malar bone; transient pain in wrists, < l.; pressing in anterior portion of thigh; feeling of tension in thigh; dislocated feeling in hip joint; dull pain tending towards gluteal region.

From below upward: eyes affected.

[43] **Sensations.** As if the eyes were being affected from below

Digitized by Google

upwards; as of a triangle in face, the base formed by the two malar bones, the apex in the vertex.
Pain: in middle of occipital bones.
Stinging pain: in l. malar bone.
Cramp-like contraction: in r. calf and middle of sole of foot.
Pressure-like pain: in r. malar bone.
Dull pain: tending toward l. gluteal region.
Transient pain: on inner side of wrists; in knee joints.
Pressing: in anterior portion of l. thigh, in middle of upper half; in groin.
Dislocated feeling: in l. hip joint.
Feeling of tension: while walking, in both thighs.
Numbness: in ears and throughout whole body.

[1] **Mind.** Low spirited; discouraged.
Fears approaching illness.

Digitized by Google

Easily vexed.
Dulness of mental faculties; cannot fix mind on studies.
Muttering.
[2] **Sensorium.** Head full, heavy.
[3] **Inner Head.** Constriction around forehead.
Sensation as of a band around head.
Dull, heavy frontal headache with nausea.
Severe frontal headache, constant nausea and occasional vomiting; sleepless from pain; no appetite; great weakness.
Headache in forehead and eyes, < r. side; with distressing nausea and vomiting of intensely sour or bilious matter; < in rest.
Dull throbbing or shooting in r. side of forehead; nausea; < toward evening, from rest, from cold air, or coughing; > from moderate motion.
Habitual headache; violent throbbing on either side of frontal protuberance, < in evening or after exertion.
Chronic frontal headache; < sitting down, studying or sewing; > standing up or working; could not attend school.
Headache with violent pains over eye, in supraorbital region, on either side, but only on one side at a time.
Severe pain in head, through temples and over eyes, with vertigo, nausea and vomiting.
Shooting pains in temples, generally right, with constricted feeling in scalp.
Headache affecting r. side, < at rest, > by constant motion, accompanied by nausea, vomiting and low spirits.
Hemicrania of r. hemisphere.
Pain shoots like an electric shock from r. temple to l. side of occiput; depression of spirits, debility.
Slight dull pain at situation of posterior fontanelle.
Severe pain in occiput, < r. side.
Stitches in lower cerebellum, r. side.
Violent, stunning headache, with facial neuralgia, followed by copious, limpid urine and vomiting.
Sick headache, every eighth day.
Sick headache, of gastric or hepatic origin, always beginning with a blur before eyes.
Sick headache, seemingly the result of intense gastric and abdominal disturbance; dull, throbbing, or hammering, and also shooting or acute boring pains in one side of forehead, generally left, or passing from r. to l., with nausea; pain begins in morning and grows more violent towards afternoon and night; < from violent motion; > from moderate exercise in open air; sometimes paroxysmal, through day, or at intervals of many days,

Digitized by Google

so as to become periodical; < in cold air and from coughing.

‖Headache, vomits sweetish mucus, occasionally with a trace of bile.

‖Sick headache in bilious subjects, with gastric derangement and dyspepsia, tenderness in region of stomach and liver.

‖Headache reflex from acid stomach, or irritation of that organ from acid secretions.

‖Neuralgia, facial or cephalic, with nausea and vomiting.

‖Neuralgia of head, eyes and temples; pains cutting, of short duration, with acid vomiting; bilious vomiting, or vomiting of sweetish water; great despondency.

‖Tired headache, from mental exhaustion.

‖Chronic headaches with asthenopia and fulness in stomach.

‖‖Sharp, cutting pains of short duration, changing often.

[4] **Outer Head.** ‖Shooting in temples, mostly right, with constrictive feeling of scalp.

‖Pustular eruptions on scalp in children.

‖‖Twenty-six pustules on top of head, some as large as a three cent piece.

‖Whole top of head one complete scab, yellow matter oozing from under crust, which has matted hair together; l. ear covered with eruption, it also gathers every two weeks and discharges a yellow greenish pus; numerous yellow pustules scattered over scalp, each pustule containing a hair. θTinea capitis.

[5] **Sight and Eyes.** ‖Redness of conjunctiva, as from a cold; eyes feel dull, with neuralgia; burning in internal canthus, with effusion of tears.

‖Inflamed eyelids; simple palpebral inflammation, apparently arising from cold.

‖Chronic inflammation of eyelids.

[7] **Smell and Nose.** ‖‖Constant sneezing; sharp pains in centre of temples; tickling cough; light, mushy stools.

[8] **Upper Face.** ‖Sunken eyes with blue circles.

‖Neuralgia, involving supra and infraorbital, superior maxillary and inferior dental nerves; begins after breakfast every morning, with a stupid, stunning headache; copious urine; disposition to stool; burning at anus.

‖‖Neuralgia in head, temples and eyes, attended with most distressing vomiting of sweetish mucus, and occasionally, when much straining, with a trace of bile.

‖Waked with neuralgic pains in r. side of face; darting stitches in two carious teeth; infraorbital nerves especially affected.

[9] **Lower Face.** ‖‖Dry, cracked lips.

Digitized by Google

‖Pustular eruptions on face, around nose, lips and cheeks, secreting a sanious, irritating matter.

[10] **Teeth and Gums.** ‖‖Toothache in warm room; dental neuralgia.

[11] **Taste and Tongue.** Taste: lost; flat; bitter or putrid.

‖Tongue feels as if scalded; greasy feeling on arising in morning.

‖Tongue white.

[12] **Inner Mouth.** ‖Burning in mouth and fauces, as if on fire.

‖‖Mouth and tongue feel as though they had been scalded.

‖Salivation after diphtheria, with swelling of parotids.

‖‖Profuse flow of saliva.

‖Constant discharge of ropy saliva, dropped from mouth during conversation.

‖Salivation, first of tough mucus hawked from throat, which presented a dark appearance, and afterwards a profuse, watery discharge from whole buccal cavity; clammy, greasy sensation in mouth, with bilious coating on root of tongue; lethargy; hunger, with inability to eat; general "bilious" condition; constipation, succeeding a profuse, watery, offensive pancreatic diarrhœa.

‖Salivation with profuse flow; gums and tongue feel as though covered with a greasy substance.

‖Stomatitis, with painful burning in mouth and fauces.

‖Ulcers on mucous membrane of cheeks.

[13] **Throat.** Pain in tonsils, shooting into ears.

‖Smarting, burning sensation, with feeling of enlargement, like a burning cavern, while throat is dry injected, and of bright red color.

‖Peculiar irritability of throat, palate and pharynx, coming on without any appearance of inflammation, and sometimes attended with cough.

‖Spasms of pharynx while swallowing food.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Loss of taste and appetite, nausea and empty eructations.

[15] **Eating and Drinking.** ‖Headache after breakfast; aching in stomach before breakfast and after a cold drink.

‖Chronic indigestion of milk; it sours and is vomited.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: of tasteless gas; of wind from stomach with considerable force; tasteless; acid; of sour food.

‖Heartburn.

‖Nausea: from riding, from overexertion or from irregularities of diet; and retching.

‖‖Nausea and vomiting: of sour food, whole person smells sour; of thin, watery fluid of an exceedingly sour taste.

‖Vomiting: an extremely sour fluid which excoriates throat; with burning in mouth, fauces, œsophagus and

Digitized by Google

stomach; of sweetish water; of ingesta; of soured milk in children; of food an hour after eating; of bile, with great heat and sweat.

ǁBilious vomiting, with great heat of head and perspiration.

ǁViolent pain with every fit of vomiting.

ǁPeriodical vomiting spells, coming on once every month or six weeks, lasting two or three days.

ǁVomiting of ingesta, then sour fluid, and at last bile yellow and green, with great heat of head, some general fever, and great prostration; perspiration warm, caused by efforts of straining and vomiting.

[17] **Scrobiculum and Stomach.** ǁGreat burning distress in epigastrium; can hardly endure it.

ǁViolent pains in epigastric region, coming on at intervals.

ǁGastralgia.

ǁǁPain in stomach before breakfast, and from drinking water.

Beating, throbbing, in and about heart and sternum, then fearful cramps or spasms from middle of sternum to pit of stomach, with repeated vomitings.

Everything sours in stomach.

ǁDyspepsia; food vomited an hour or so after meals.

ǁGastric symptoms predominate with headache.

ǁBurning distress in stomach and pancreas, with watery diarrhœa and great prostration.

ǁBurning distress in pancreas, sweetish vomit.

ǁShocks of pain in umbilical region up to epigastrium; nausea, straining and belching of wind.

[18] **Hypochondria.** ǁCutting in region of liver.

ǁPain in r. hypochondriac region; < from motion.

ǁAcute and chronic disorders of liver.

ǁIncrease of bile, then deficiency of, with jaundice.

ǁAnxious look; vomits almost constantly a greenish yellow matter, very bitter; great tenderness in region of liver; urgent desire for stool; bowels torpid; pulse 130, temperature, 103.2; great pain in abdomen, < on pressure; tongue dry, coated on each side, red streak in centre; dull and stupid. θBilious colic.

ǁAcute affections of pancreas, inflammation or salivation.

ǁPains above crest of ilium, right side, then left.

[19] **Abdomen.** ǁColicky pains, intermittent about navel, before each spell of vomiting or purging.

ǁPains in umbilical region and loud rumbling in bowels.

ǁPain in region of umbilicus, < from motion; diarrhœa threatening or actually existing; general headache, < in anterior half, in individuals subject to headache; nausea and vomiting.

ǁSharp, griping pains in bowels.

Digitized by Google

Colicky pains, must bend forward for relief; > after discharges of flatus.

Great prostration; pulse frequent and feeble; expression of great anguish in face; much mental depression; frequent and violent efforts to vomit, resulting, however, in little more than an enormous discharge of air, which seemed to roll off her stomach with great force; intense pain in umbilical region, passing in successive shocks, like effects of a galvanic battery, upward to epigastric region, followed or accompanied by nausea, straining and belching of wind; great commotion and rumbling of bowels above seat of pain, little or none below; no desire for stool. θColic.

Abdomen very prominent; severe rumbling of gas; excessive watery discharges, preceded by soft and more substantial evacuations and intense aching, cramplike pains; excessive nausea and vomiting.

Rumbling and cutting pain in lower part of abdomen, > by pressing flatus.

Periodical night colic, > by two or three free discharges before morning.

Colic of infants with flatulency and constipation.

Abdominal complaints of children occurring in Spring and Autumn.

Syphilitic sinus in l. groin, result of a bubo, discharge ichorous.

[20] **Stool and Rectum.** Diarrhœa: with colic and rumbling in bowels; with pain in bowels, with or without vomiting; cramps in bowels; thin, watery; with frequent bilious stools; brown and very offensive, with cutting, colicky pains, nausea and vomiting.

Stool: thin, watery, tinged with bile, copious, in a continuous stream; green, undigested; mushy, pappy, with fetid flatus; bloody mucus, with great straining; black, with fever, hot sweat, white tongue, severe headache, despondency; yellow, watery, corrosive; copious, watery, with or without tenesmus; frequent, very green and watery; watery, mixed with mucus; thin, yellow, fecal; fetid or coppery smelling; containing undigested food.

Watery stool; anus feels on fire; disposition to strain and bear down; great burning in anus.

Watery diarrhœa and colic pains precede the bloody, mucous discharges.

Bloody, mucous discharges, with severe tenesmus and rectal prolapsus.

Very soft, yellow stools, with great rumbling in bowels.

Stool of scybalous matter, together with fluid mucoid feces of offensive, putrid and coppery odor.

Digitized by Google

Before stool: rumbling in abdomen; cutting in lower part of abdomen.

During stool: cutting; severe cramplike pains; tenesmus; burning at anus; fetid, coppery smelling flatus.

After stool: pricking as of points in anus; burning of anus, as though on fire; prolapsus of rectum.

‖Periodical spells of diarrhœa, always at night about two or three o'clock.

‖Burning from mouth to anus. θDiarrhœa.

‖‖Acute mucous enteritis.

‖Stools brown, slimy, or watery, frequent and generally very offensive; attacks sudden and characterized by uncommonly severe tenesmus, prolapsus of rectum, frequently piles, and very intense feeling of exhaustion from very commencement; appetite not much affected; generally no pain in bowels. θDiarrhœa.

‖Cholera infantum, with profuse, sour discharges from stomach and bowels, and pain in head.

‖Cholera morbus: occurring in hottest part of season; vomiting; grumbling pains in bowels, watery, green stools.

‖Severe pain in bowels, with much rumbling; constant nausea; vomiting and purging every few moments; limbs and body cold; occasional cramps in lower extremities; vomited matter was glairy mucus with some bile at times; stools thin and colorless. θCholera morbus.

‖‖Autumnal bilious diarrhœa.

‖Bilious dysentery; body cold; skin blue; vomiting with prostration.

‖Constipation: succeeded by thin, watery diarrhœa; with flatulent colic; migraine; nervousness; irregular menses; colic and sick headache; headache affecting forehead and eyes; hemorrhoids.

‖Prolapsus of rectum.

‖‖Anus feels sore, or as if sharp points were sticking in it.

‖Premonitory diarrhœa for two or three days, then purging suddenly became <, with vomiting, cramps in body and lower limbs; two hours later diarrhœa profuse and involuntary, evacuations being wholly of rice water character; vomiting frequent and severe, the matter ejected consisting principally of small white flocculent bodies, with bodies of undigested food; crampy pains in abdomen and lumbar region, also less severely in legs; intense and urgent thirst; difficulty and oppression of breathing; choleraic expression; face limbs and body cold; tongue slightly bluish, furred and icy cold to touch. θCholera.

‖Asiatic cholera, with rice water discharges, cramps, etc.

[21] **Urinary Organs.** Cutting and pricking in urethra while urinating.

Digitized by Google

Urine: scanty, red; burning length of urethra after passing it; clear, profuse; copious, watery in nervous headache; very high colored and scanty.

[22] **Male Sexual Organs.** ‖Nocturnal emissions, with amorous dreams.

‖Coldness and itching of parts.

‖Excitement of generative organs reflex from an excessively acid stomach.

‖Heavy, dragging gait and excitable sexual desire.

‖Coldness and relaxation of scrotum.

‖Spermatorrhœa, with pale face, sunken eyes; depression.

‖Secondary gonorrhœa or gleet; syphilis; mercurial syphilis.

[23] **Female Sexual Organs.** ‖Neuralgia and rheumatism of uterus.

‖Metrorrhagia.

‖Menses regular but excessive.

‖Uterine leucorrhœa.

[24] **Pregnancy. Parturition. Lactation.** ‖Morning sickness during pregnancy; vomit sour or bitter.

‖Protracted nausea and vomiting during pregnancy; profuse flow of saliva.

‖Inflammation and soreness of uterus, very sensitive to touch; pain across umbilicus, with severe griping at short intervals; nausea and vomiting of green or yellow bile, with eructations of a great deal of flatus during and between times of vomiting; diarrhœa of a yellow, bilious character. θMiscarriage.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Dry, tickling cough, with smarting burning in throat.

[27] **Cough.** ‖Short, dry cough, excited by excessive tickling in larynx, preceded or accompanied by dry, smarting, or burning sore throat.

[28] **Inner Chest and Lungs.** ‖Pain in l. side of chest, as if ribs were pressing against lungs.

[31] **Neck and Back.** Crampy pain in r. lumbar region.

[32] **Upper Limbs.** ‖Acute rheumatic pain r. shoulder < from motion, especially on raising arm.

‖Shooting burning pain in r. shoulder; gastralgia or enteralgia.

‖Pains shift rapidly in phalanges and metacarpal bones.

‖Fingers pain on writing.

[33] **Lower Limbs.** ‖Slight coxalgia in l. hip.

‖Sciatic pains, as if l. hip joint was wrenched.

‖Painful drawing and lameness behind l. trochanter, extending down to popliteal space.

‖Shooting, burning, laming pain, affecting posterior femoral muscles; shooting along l. sciatic nerve to foot, < by motion; moderate motion aggravates, violent motion

Digitized by Google

makes no difference; shooting, burning pains in r. shoulder.

‖Pain confined to l. leg, shooting, burning, laming, affecting posterior femoral muscles, and shooting along l. sciatic nerve to foot; < by motion. θSciatica.

[34] **Limbs in General.** ‖Shifting pains in r. hip, both knees, < r. and in r. foot, especially, and first joint of great toe.

‖‖Tearing, shooting and rapidly shifting pains in joints and extremities, especially smaller joints, but more particularly in r. shoulder.

[35] **Rest. Position. Motion.** Rest: headache <.

Sitting down: chronic frontal headache <.

Must bend forward for relief: from colicky pains.

Standing up: chronic headache >.

Raising arm: pain in shoulder <.

After exertion: headache <.

Overexertion: causes nausea.

Constant motion: headache >.

Motion: pain in r. hypochondriac region <; pain in region of umbilicus <; pain in shoulder <; pain along sciatic nerve <.

Moderate motion: headache >.

Violent motion: sick headache <; pains along sciatic nerve not affected.

[36] **Nerves.** ‖Great debility; faint, weak knees, trembling; sunken eyes; after protracted or severe serous or bilious stools, as in summer diarrhœa.

[37] **Sleep.** ‖‖Sleeplessness; starts in sleep.

[38] **Time.** Aggravation in evening and at night; from rest, also from motion; > from continued motion.

Morning: pain in head grows more violent towards afternoon and night; sickness.

Towards evening: headache and nausea <.

Evening: headache <; much itching of eruption.

Night: emissions; chilliness; great itching of eruption; great itching of eczema.

[39] **Temperature and Weather.** Warm room: toothache.

Open air: headache >.

After cold drink: aching in stomach.

Cold air: headache and nausea <.

[40] **Fever.** ‖‖Chilliness all night.

‖‖Chills, with sleepiness.

Head and face cold.

‖Heat followed by chill, with cold hands and feet.

‖Chills over whole body, even when well covered; fever with muttering delirium and bilious diarrhœa.

Skin hot; dry, black stool.

Digitized by Google

Sweat over whole body, particularly in groin.
Bilious fever after *Bryon.* or *Acon.*
Typhoid fever, with symptoms similar to *Baptis.*
Muttering delirium; yellow, watery, stinking diarrhœa; involuntary passage of urine and feces; coated tongue, dry, brown, crusty, edges red, sordes on gums and teeth, and foul breath. θTyphoid.
Fever; stupor; black, stinking, involuntary diarrhœa, tongue dry and brown; fetid breath. θTyphoid.
Fever, intense headache, pain in small of back, black dysenteric passages, nausea and efforts to vomit. θTyphoid.

41 **Attacks, Periodicity.** Paroxysmal: headache through day.
Every few moments: vomiting and purging.
At short intervals: severe griping in abdomen.
An hour after eating: vomiting of food.
After breakfast every morning: neuralgia of face; headache; pain in stomach.
Periodical nightly colic, diarrhœa 2 or 3 A.M.
Every eighth day: sick headache.
At intervals of many days, so as to become periodical: headache.
Every two weeks: ear gathers and discharges.
Once every month or six weeks: periodical vomiting spells, lasting two or three days.
Spring and Autumn: abdominal complaints.

42 **Locality and Direction.** Right: headache in forehead and eyes <; dull throbbing or shooting in side of forehead; shooting in temple; hemicrania; severe pain in occiput <; stitches in lower cerebellum; neuralgic pain side of face; pain in hypochondriac region; crampy pain in lumbar region; acute rheumatic pain in shoulder; shooting, burning pain in shoulder; shifting pains in hip, in foot; herpes zoster on side of body.
Left: acute, boring pains on side of forehead; ear covered with eruption; syphilitic sinus in groin; pain in side of chest; slight coxalgia in hip; sciatic pain in hip joint; painful drawing and lameness behind trochanter; pain along sciatic nerve to foot; in leg vesicular eruption on knee.
From r. to l: pain shoots like an electric shock from temple to occiput; acute, boring pains through forehead; pain above crest of ilium.

43 **Sensations.** As of a band around head; tongue feels as if scalded; as if mouth and fauces were on fire; mouth as if it was scalded; gums and tongue feel as though covered with a greasy substance; feeling of enlargement like a burning cavern in throat; pain like effects of a

Digitized by Google

galvanic battery upward to epigastric region; arms feel as if on fire; pricking as of points; as if ribs were pressing against lungs; as if l. hip joint was wrenched.
Pain: in head, in forehead and eyes; in tonsils; in stomach; in r. hypochondriac region; above crest of ilium, r. side, then l.; in umbilical region; in bowels; across umbilicus; in l. side of chest; shifts rapidly in phalanges and metacarpal bones; in fingers; in l. leg; in small of back.
Pain: like an electric shock from r. temple to l. side of occiput.
Intense pain: in umbilical region.
Violent pain: over eyes; in supraorbital region on either side, but only on one side at a time.
Violent pain: with every fit of vomiting; in epigastric region.
Great pain: in abdomen.
Severe pain: in head, through temples and over eyes; in occiput < r. side; in bowels.
Severe frontal headache.
Violent stunning headache with facial neuralgia.
Great burning distress: in stomach; in epigastrium; in pancreas.
Fearful cramps: from middle of sternum to pit of stomach; in bowels.
Sharp, cutting pains of short duration in head.
Cutting: in head; in region of liver; in lower part of abdomen; in urethra.
Tearing, shooting and rapidly shifting pains in joints and extremities, especially smaller joints, but more particularly in r. shoulder.
Shooting, burning pain: in r. shoulder; affecting posterior femoral muscles.
Shooting pains: in temples; into ears; in r. shoulder; along sciatic nerve to foot.
Acute, boring or shooting pains: in one side of forehead, generally left.
Sharp pains: in centre of temples.
Darting stitches: in two carious teeth.
Stitches: in lower cerebellum, r. side.
Violent throbbing: in either side of frontal protuberance.
Beating, throbbing: in and about heart and sternum.
Dull throbbing or shooting: in r. side of forehead.
Dull throbbing or hammering: in forehead.
Severe griping: in abdomen.
Sharp, griping pains: in bowels.
Intense aching, cramplike pains: in abdomen.
Colicky pains: about navel.

Digitized by Google

Neuralgic pains: in r. side of face.
Neuralgia: facial or cephalic; of head, eyes and temples; involving supra and infraorbital, superior maxillary and inferior dental nerves.
Acute rheumatic pain: in r. shoulder.
Sciatic pains: in l. hip joint.
Shifting pains: in r. hip, both knees, in r. foot and first joint of great toe.
Grumbling pains: in bowels.
Shocks of pain: in umbilical region, up to epigastrium.
Habitual headache.
Chronic headaches with asthenopia.
Chronic frontal headache.
Slight dull pain: at situation of posterior fontanelle.
Dull, heavy frontal headache.
Sick headache: of gastric or hepatic origin.
Cramps: in lower extremities; in body.
Crampy pains: in abdomen and lumbar region; in r. lumbar region.
Aching: in stomach.
Pricking: in urethra.
Smarting burning: in throat.
Burning: in internal canthus; at anus; in mouth and fauces; œsophagus and stomach; from mouth to anus; in urethra.
Soreness: of uterus.
Painful drawing and lameness behind l. trochanter, extending down to popliteal space.
Tenderness: in region of stomach and liver.
Tired headache.
Full, heavy feeling in head.
Fulness: of stomach.
Greasy feeling: in mouth.
Very intense feeling of exhaustion.
Constriction: around forehead.
Constricted feeling: in scalp.
Great heat: of head.
Tenderness: in region of liver.
Excessive tickling: in larynx.
Coldness: of male sexual organs.
Itching: of male sexual organs; of eruption.

" **Tissues.** Excites secretion of glands, salivary, pancreatic, intestinal, etc.
Acts powerfully on gastro-intestinal mucous membrane.
Ascites and anasarca of hepatic origin.
Scrofula; eruptions on skin; glandular swellings.
Will abort felon.

" **Touch. Passive Motion. Injuries.** Touch: uterus very sensitive.

Digitized by Google

Pressure: great pain in abdomen. <
Riding: causes nausea.

" **Skin.** Small bloodboils on face, hands and back.
‖Fine eruption, showing black points after scratching, great itching at night.
‖Herpes zoster on r. side of body.
|Vesicular eruption, becoming pustular, on arms, abdomen, back, nates and l. knee; much itching in evening.
|Vesicular eruption, becoming pustular.
|Pustular eruption on scalp, face, around mouth and other parts of body.
|Eczema, with great itching, especially at night; small, fine eruptions, which show black points after scratching.
|Irregular patches on knees, elbows and body, with shining scales, edges slightly raised. θPsoriasis.
|Psoriasis in relievo, skin fissured and irritable.
|Tinea capitis; crusta lactea; porrigo; eczema of face.
|Impetigo capitis, with gastric complaints, nausea and vomiting.
|Impetigo figurata, eruption dry, distinct and of dark hue.
|Obstinate lepra vulgaris on arms.

" **Stages of Life, Constitution.** Scrawny, scrofulous child, few weeks after birth; impetigo.
Baby, æt. 5 months; diarrhœa.
Baby, æt. 8 months, suffering for two months; diarrhœa.
Baby, frequently troubled with boils, mother had itch; tinea capitis.
Girl, æt. 11, suffering for three or four years; headache.
A boy, æt. 12; typhoid fever.
Man, æt. 20, has had syphilis and taken mercury, suffering three months; syphilitic sinus.
Woman, æt. 20; cholera morbus.
Woman, æt. 30; bilious colic.
Woman, æt. 30, nervo-sanguine, suffering from phlegmasia alba dolens succeeding an abortion; salivation.
Lady, æt. 31, debilitated by overlactation; cholera.
Man, health good, subject to sudden and often unaccountable attacks; diarrhœa.
Widow, æt. 42, tall, light complexion and hair, blue eyes, suffering three weeks; sciatica.
Woman, æt. 43, small in stature, black hair, blue eyes, active disposition, slight icteric taint, uses strong tea and coffee to excess; constipation.
Middle aged woman; typhoid.
Woman, æt 60; cholera morbus.
Woman, æt. 65, nervous bilious temperament, wife of farmer, works very hard; colic.
A woman, æt. 83: typhoid.

JABORANDI.

Jaborandi. *Rutaceæ.*

A tree attaining a height of more than twenty feet, native to Brazil. The blossoms, which appear in September, are large and violet colored; it is from them the alcoholic tincture is prepared. The Jaborandi "is used by South American Indians as antidote to the bite of serpents of the Trigonecephalus group."

The substance contains an alkaloid passing under the name of Jaborandine, or Pilocarpia, and is used by the old school as a diaphoretic.

Physiological effects from infusions, extracts and powdered leaves have been reported by Gubler, Coutinho, Robin, Ringer, Gould, Martindale, Smith, Green, Craig, Strumpf and Lewi.

Watkins and Thayer have made provings with the first to fifth dilutions, 5 to 100 drops. See Allen's Encyclopedia, vol. 5, p. 165.

CLINICAL AUTHORITIES.—*Hyperopia et spasmus musc. cil; Cataracta dura immat. et asthenopia; Torpor retinæ squint;* Deady, Buffum, Norton's Ophth. Therap., p. 98; *Night sweats,* Chase, N. E. M. G., vol. 11, p. 152.

[3] **Inner Head.** Headache.
[4] **Outer Head.** Alopecia.
[5] **Sight and Eyes.** Dim vision, twitching of lids and pain in eyeballs.
For many months could not read more than five minutes without the eyes tiring; nausea on looking at moving objects. θHyperopia cum asthenopia.
Hyperopia et spasmus musc. cil.; everything becomes black before eyes on stooping; aching of eyes on reading and spots before vision; V $\frac{20}{30}$; with concave 42, V $\frac{20}{20}$.
Hyperopia et spasmus musc. cil.; constant pain in eyes even upon using for distance.
Everything at a distance appeared hazy, and although he could read moderate sized type at one foot, at two feet it was indistinct.
Blue before eyes at times, especially on looking in the distance.

Digitized by Google

‖After constant and close application to fine work; retinal images retained for several minutes; vision impaired and finally unable to use eyes at all for work; R. V., $\frac{20}{30}$; L. V., fingers at eighteen feet; convex 42, R. V., $\frac{20}{20}$; insufficiency of each internal rectus; sharp pains in eye shooting back into head, with general dull ache of head; light is painful. θTorpor retinæ.

‖Eyes very weak, could not use them even a few minutes without smarting and pain in them, with nausea; pain and nausea also experienced when looking steadily at a distance; much vertigo, as if head was too light, especially on moving or looking at objects; constant dull pain in eyes, or occasional sharp pain. θCataracta dura immat. et asthenopia.

‖Serous choroiditis.

‖Tension of accommodative apparatus of eye, with approximation of nearest and farthest points of distinct vision.

‖State of vision constantly changing, becoming suddenly more or less dim, every few moments.

‖Spots before vision and aching of eyes upon using. θSpasmus musc. cil.

‖Spasm or irritability of ciliary muscles.

‖Contraction of pupil.

‖Heat and burning in eyes upon using.

‖Eyes tire easily and are irritable, especially on moving.

‖Headache upon using eyes; smarting and pain in globes.

‖Periodic convergent squint; strabismus of recent date not dependent upon weakness of opposing muscle; tendency to recurrence of squint after an operation.

[7] **Smell and Nose.** Coryza with feverishness; free flow of saliva; discharge from nostrils; eyes weeping; headache; soreness in nostrils and bones; profuse perspiration; dimness of sight; dulness alternating with hilarity without cause; diarrhœa or constipation.

[8] **Upper Face.** ‖Face flushed.

[12] **Inner Mouth.** ‖‖Profuse salivation. θDiphtheria.

⁞Mumps with metastatic orchitis; testicle swollen twice natural size and very painful.

[11] **Appetite, Thirst. Desires, Aversions.** ‖Loss of appetite, with bitter taste.

‖Intense thirst.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations. Great nausea and retching, often attended with hiccough, and sometimes terminating in vomiting.

[17] **Scrobiculum and Stomach.** Distress in stomach, >by eating.

[19] **Abdomen.** Empty, gone feeling in abdomen.

[20] **Stool and Rectum.** Thin, watery, copious diarrhœa, with slight nausea.

Digitized by Google

Yellow, watery, painless, gushing diarrhœa; goneness and emptiness from diarrhœa, but no pain; eructations and hiccough; nausea and sudden vomiting.

Thin, yellow, watery, undigested stools.

[21] **Urinary Organs.** ⁞Renal dropsy, after scarlatina, or Bright's disease.

⁞Diabetes insipidus.

⁞Urine dark, scanty; profuse.

[22] **Male Sexual Organs.** ⁞Orchitis: with incipient bronchial trouble (relieved pain and cough); metastasis of mumps.

[23] **Female Sexual Organs.** Flushings at climacteric period.

[24] **Pregnancy. Parturition. Lactation.** ⁞Œdema of pregnancy; swelling of face, labia, extremities.

⁞Puerperal convulsions; symptoms of suffocation, patient in her stupor, being unable to swallow the great secretion of saliva (three cases).

⁞Galactorrhœa.

⁞Deficient secretion of milk.

[27] **Cough.** ⁞Humid asthma with profuse expectoration; bronchitis with abundant non-purulent expectoration.

[28] **Inner Chest and Lungs.** Stitching pain in chest.

⁞Hydrothorax; pleuritic effusions.

[29] **Heart, Pulse and Circulation.** Heart's action irregular, intermittent and increased.

⁞Cardiac dropsy.

Rapid pulse, with visible throbbing of arteries.

[35] **Rest. Position. Motion.** Stooping: everything becomes black before eyes.

On moving: much vertigo; eyes tire easily.

[37] **Sleep.** ‖Profound, heavy sleep.

[38] **Time.** Night: sweats.

[40] **Fever.** ‖Profuse sweat.

‖Copious sweating and salivation; profuse secretion from most of glandular structures of body; perspiration starts on forehead and face and then spreads all over body, most profuse on trunk; profound prostration after sweating; unilateral l. sided sweat.

‖Excessive perspiration either during convalescence from diseases, or in course of chronic diseases, as in phthisis.

‖Colliquative sweating of phthisis, very profuse, causing great prostration.

‖Profuse night sweats.

[41] **Attacks, Periodicity.** Every few moments: state of vision changing.

For several minutes: retinal images retained.

For many months: could not read more than five minutes without the eyes tiring.

At climacteric period: flushings.

JACARANDA CAROBA.

Caroba. *Bignoniaceæ.*

A tree common to Brazil. The tincture is prepared from the flowers. Provings by Mure. See Allen's Encyclopedia, vol. 5, p. 176.

CLINICAL AUTHORITIES.—Schüssler, Gilchrist's Surg., p. 572.

[5] **Inner Head.** Fulness: in head; first in r., later in l. temple, going to nape of neck, where it disappears.
Pain, as if a plug was pressing on r. side of forehead.
Dull pain between forehead and r. temple, shifting to other side and then disappearing.

[6] **Hearing and Ears.** Flapping in ears, as of wings.
Stoppage and heat in l. ear, with burning, digging pain, extending to l. nostril.

[7] **Smell and Nose.** Sneezing and fluent coryza.
Coryza, with heaviness and weariness at vertex, forehead and eyes.

[11] **Taste and Tongue.** Food tastes flat or acid.
Raw pain at l. side of tongue.

[12] **Inner Mouth.** Dry mouth in morning in bed.
Mouth dry and clammy.

[13] **Throat.** Sore throat, with constriction of pharynx and difficult deglutition.
Constrictive sensation at throat.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea when eating.

[17] **Scrobiculum and Stomach.** Fulness at pit of stomach, with hurried breathing.
Pressure at pit of stomach.
Sensation as if heart beat in pit of stomach.

[19] **Abdomen.** Painful stitch: between pit of stomach and umbilicus; in l. side of navel.
Acute pain at hypogastrium when pressing upon it.
Swelling of r. groin painful to touch.

[20] **Stool and Rectum.** Constipation.
Acute pain, with lancination in anus.
Pricking around anus.
Excrescence at anus.
Itching at anus while sitting.

[21] **Urinary Organs.** ||Contact of urine with chancre causes tearing pains, which affect whole organism. θSyphilis.

Digitized by Google

[31] **Male Sexual Organs.** Heat and pain in penis.
Orifice of urethra looks like two inflamed lips, itching on being touched.
Discharge of yellowish white liquid from prepuce.
Prickling in prepuce.
Pain in prepuce, as if a small bundle of fibres was seized.
Phimosis.
Suppuration between glans and prepuce.
Itching and pricking at margin of prepuce.
Itching pimple at glans, suppurating like a chancre, and leaving a red point when dry.
Acute pain in l. testicle when walking.
Heat and swelling of scrotum.
Painful erections caused by swelling of prepuce.
‖Prepuce much swollen, could not be drawn over glans; on attempting to do so, copious discharge of yellowish green pus. θSecondary syphilis.
‖Chordee in gonorrhœa.

[32] **Inner Chest and Lungs.** ‖Dull pain under sternum on raising head and drawing breath.
Prickings under sternum.

[33] **Heart, Pulse and Circulation.** Lancinating pain in region of heart.
Painful stitch at heart, extending to r. side.
Stitch at heart, which seems to beat slowly.

[34] **Upper Limbs.** Rheumatic pains in l. arm in morning.
Pain from l. elbow through forearm.
Red spot with a yellowish pellicle on wrist.

[35] **Lower Limbs.** Ulcers on legs.
Rheumatic pain in r. knee, disappearing on motion.

[36] **Rest. Position. Motion.** Sitting: itching at anus.
Raising head: dull pain under sternum.
Motion: > rheumatic pains in r. knee.
Walking: acute pain in l. testicle.

[37] **Sleep.** Restless sleep with frightful dreams.

[38] **Time.** Morning: dry mouth; rheumatic pain in arm.

[40] **Fever.** Internal chill.
Dry, pricking heat all over.

[41] **Locality and Direction.** Right: fulness in temple; pain on side of forehead; swelling of groin; painful stitch from heart to side; rheumatic pain in knee.
Left: fulness of temple; stoppage and heat in ear; burning in nostril; raw pain on side of tongue; painful stitch on side of navel; acute pain in testicle; rheumatic pain in arm; pain from elbow through forearm.

[42] **Sensations.** As if a plug was pressing on r. side of forehead; flapping as of wings in ears; as if heart beat in pit of stomach; as if a small bundle of fibres was seized.

Digitized by Google

Pain: from l. elbow through forearm.
Acute pain: at hypogastrium; in anus; in l. testicle.
Tearing pains: when urine comes in contact with chancre.
Lancination: in anus; in region of heart.
Rheumatic pains: in l. arm; in r. knee.
Painful stitch: between pit of stomach and umbilicus; in l. side of navel; at heart, extending to r. side.
Raw pain: at l. side of tongue.
Pricking: around anus; under sternum.
Prickling: in prepuce.
Soreness: of throat.
Heat and pain: in penis.
Dry pricking heat: all over.
Dull pain: between forehead and r. temple, shifting to other side, then disappearing; under sternum.
Painful erection.
Constriction: of pharynx; at throat.
Stoppage and heat in l. ear, with burning, digging pain, extending to l. nostril.
Pressure: at pit of stomach.
Fulness: in head, first in r., later in l. temple, going to nape of neck; at pit of stomach.
Heaviness and weariness: at vertex; forehead and eyes.
Itching: at anus; at orifice of urethra; at margin of prepuce; pimple at glans.

[44] **Tissues.** Gonorrhœal rheumatism.
Syphilis; Hunterian chancre.

[45] **Touch. Passive Motion. Injuries.** Touch: groin painful; causes itching on urethra.

[48] **Relations.** Compare: *Coral. rub.* in red and sensitive chancres or chancroids; *Thuja* in gonorrhœal rheumatism.

JACEA. (Viola tricolor.)

Pansy; Heart's ease. *Violaceæ.*

The tincture is prepared from the fresh plants gathered when in flower.
Proved by Hahnemann and his provers. See Allen's Encyclopedia, vol. 10, p. 132.

CLINICAL AUTHORITIES.—*Eczema*, Bigler, Hahn. Mo., vol. 15, p. 36; *Crusta lactea*, Toothaker, Org., vol. 3, p. 372.

[1] **Mind.** Great dulness of intellect.
Low spirited about domestic affairs.
Great indifference.
Bad, morose humor, with disinclination to talk.
Very sensitive and inclined to scold.

[2] **Sensorium.** Vertigo when walking.
Heaviness of head when raising it, disappears by stooping.

[3] **Inner Head.** Pressing headache, chiefly in forehead and temples.

[4] **Outer Head.** Scurfs on head, unbearable burning, < at night.
Tinea capitis, with frequent involuntary urination.
Burning stitches in scalp, especially in forehead and temples.
Impetigo of hairy scalp and face.
Crusta lactea: with violent cough and excessive oppression; with children recently weaned; syphilitic.
Thick incrustations, pouring out a large quantity of thick, yellow fluid, which agglutinates hair.
Crusta lactea; hair falls off, scabs dry, of a light cream color, and without discharge.
Plica polonica.

[5] **Sight and Eyes.** Smarting in eyes.
Eyelids sink down as from sleepiness.
Contraction and closing of lids.
Scrofulous ophthalmia with crusta lactea; lids much swollen, and soft parts around so much inflamed that lids cannot be opened; face covered with a raw looking, excoriating eruption.

[6] **Upper Face.** Heat of side of face not lain on, evening in bed.
Induration of skin of face.
Milk crust, burning, itching, especially at night, with discharge of viscid yellow pus.
Impetiginous exanthem on forehead.
Tension in integuments of face and forehead.

Digitized by Google

[9] **Lower Face.** ‖Pustular eruption on whole upper lip and chin, a thick, yellow, friable, semi-transparent incrustation; acne rosacea on chin.

[11] **Taste and Tongue.** Taste bitter, tongue coated with white mucus.

[12] **Inner Mouth.** Sensation of dryness, yet with much saliva in mouth.

[13] **Throat.** ‖Much phlegm in throat, causes hawking, at 11 A.M.
‖Swallowing difficult and very painful. θSyphilis.
‖Very prominent yellow greenish ulcer with adherent pus, in l. side of throat, extending from velum palati over entire l. tonsil. θSyphilis.
‖Chancroid ulcer on posterior surface of fauces and soft palate. θSyphilis.

[15] **Eating and Drinking.** While eating, hot sweat.
Immediately after eating: dyspnœa; anxious heat.

[18] **Hypochondria.** Pressing stinging in diaphragm.
‖Pain in r. side of diaphragm.

[19] **Abdomen.** Cutting pains in abdomen, with urging to stool, crying and lamentations, followed by profuse discharge of flatus, with large lumps of mucus.

[20] **Stool and Rectum.** Diarrhœa with flatulency.
Stool: soft, as if minced; of mucus, with much flatus.

[21] **Urinary Organs.** Urging to urinate, with profuse discharge of urine.
Urine: offensive, smelling like cat's urine; very turbid.
Stitches in urethra.
Frequent and profuse emission of urine.

[22] **Male Sexual Organs.** ‖Involuntary seminal discharges, with lewd dreams.
‖Nocturnal emissions, accompanied by vivid dreams, not very exhausting, but causing weariness of mind; loss of seminal fluid at stool and in urine; trembling; feels dull, sleepless, poor appetite.
‖Suppression of gonorrhœa; induration of testicle.
‖Venereal ulcers.
‖Swelling of prepuce, with itching.
‖Stitches in penis or pressing in glans; burning of glans.
‖‖Itching stitches in scrotum.

[23] **Female Sexual Organs.** Leucorrhœa: with stitching pain in mons veneris; in children; in syphilis.
‖Painful pustules on labia. θSyphilis.

[24] **Pregnancy. Parturition. Lactation.** ‖‖Chancroid ulcers about breasts. θSyphilis.

Digitized by Google

[29] **Heart, Pulse and Circulation.** Oppression and stitches in heart, on bending forward when sitting.
Anxiety about heart while lying, with beating like waves.
Pulse accelerated.

[30] **Outer Chest.** Stitches in chest and ribs, sternum and intercostal muscles.
‖Syphilitic ulcers on clavicles.

[31] **Neck and Back.** Tension between shoulder blades, with cutting and tingling in skin.
Swelling and induration of cervical glands.

[32] **Upper Limbs.** Stitches in shoulder joints, elbows, forearms and fingers.
‖Painful pustles in axillæ. θSyphilis.

[33] **Lower Limbs.** Stitches in patella, tibia and feet.
Pustulous and ichorous exanthema on feet.

[35] **Rest. Position. Motion.** Lying: anxiety about heart.
Raising head: heaviness.
Stooping: > heaviness of head.
Bending forward when sitting: oppression and stitches in heart.
Walking: vertigo.

[36] **Nerves.** ‖Nervous paroxysms from suppression of milk crust.

[37] **Sleep.** ‖Yawning.
Sleepless; frequent waking.
Goes to sleep late on account of ideas crowding his mind.
The child twitches with his hand in his sleep, with clenched thumbs, general dry heat and red face.
Dreams pleasant, or amorous.

[38] **Time.** 11 A.M.: much phlegm in throat, causing hawking.
Forenoon: chilliness.
Evening in bed: heat of side of face not lain on.
Night: burning and itching of milk crust; dry heat; itching of eruption <.

[39] **Temperature and Weather.** Aversion to the open air.
Open air: chilliness.
Worse in winter, when walking out in cold air.

[40] **Fever.** Chill or chilliness in forenoon, and in open air.
Dry, anxious heat at night in bed, with red face.
Night sweats.

[42] **Locality and Direction.** Right: pain in side of diaphragm.
Left: yellow greenish ulcer in side of throat, extending over entire tonsil; stitches in side of chest.

[43] **Sensations.** Pain: in r. side of diaphragm.
Cutting pain: in abdomen; between shoulder blades.
Burning stitches: in scalp, forehead and temples.
Stitches: in urethra; in penis; in l. side of chest; in heart; in ribs; sternum; intercostal muscles; in shoulder joints, elbows, forearms and fingers; in patella; tibia; in feet.

Stitching pain: in mons veneris.
Pressing stinging: in diaphragm.
Pressing pain: in forehead and temples.
Anxiety: about head.
Unbearable burning: in scurfs on head.
Burning: of glans.
Smarting: in eyes.
Beating, like waves: about heart.
Painful pustules: on labia; in axillæ.
Heaviness: of head.
Dryness: of mouth.
Tingling: in skin.
Itching stitches: in scrotum.
Violent itching: of eruptions.
Itching: of milk crusts.

" **Tissues.** Swelling of glands; eruptions; syphilis.
Rheumatic affections of muscles.
Rheumatism or gout.
Articular rheumatism, with itchlike eruption around joints.
Impetiginous and eczematous diseases, especially crusta lactea.

" **Touch. Passive Motion. Injuries.** Worse from pressure on side opposite to painful side.
Worse lying on unpainful side.

" **Skin.** Cutting, or stinging in skin.
Stinging, biting rash.
Miliary eruption all over body.
Eruption: burning, dry, stinging; violent itching, < at night; crusty; scurfy.
‖Squamous spots on skin.
‖Dry scabs over body, exude yellow water when scratched.
‖Acute eruption, confined principally to face, though it may extend to scalp, tends rapidly to pustular form; yellowish brown crusts; much itching in all stages, temporarily > by rubbing; sometimes there is a rather thin white nasal discharge, or a loose catarrhal cough. θEczema of children (tea of dried herb).
‖Milk crust.
‖Impetigo, recent cases in adults.

JALAPA.

Jalap. *Convolvulaceæ.*

Native to Mexico, from whence the first roots were brought by Coxe, in 1827. The flowers are large and lilac purple, the roots tuberous. The tincture is prepared from the dried and finely pulverized root.

It has been much used by the Old School as an active cathartic, generally in connection with other drugs. Its action was found to be violent, and in overdoses dangerous.

The symptoms contained in Allen's Encyclopedia are from Noack and Trinks' Materia Medica, to which we add a small proving by Jeanes, made with the fourth dilution, in 1844.

[1] **Mind.** Great restlessness with anxiety.
[5] **Inner Head.** Violent headache.
Pain in head; smarting in skin of forehead.
[6] **Hearing and Ears.** Humming in ears.
[9] **Lower Face.** Dryness of lips.
[11] **Taste and Tongue.** Biting and smarting of tongue.
[12] **Inner Mouth.** Stinging on tongue and in fauces.
[16] **Hiccough, Belching, Nausea and Vomiting.** Flatulent and frothy eructation with abatement of pain.
Nausea and vomiting.
[18] **Hypochondria.** Pain in r. hypochondrium.
[19] **Abdomen.** Severe griping, cutting pain in bowels, < at night.
Pain in middle of abdomen and in region of l. superior flexure of colon.
Pain in cæcum.
Flatulent rumbling in bowels.
Colic; violent pains in small intestines, as if abdomen would be cut to pieces.
Inflammation of intestines.
[20] **Stool and Rectum.** Stools: violent, excessive; bloody;

Digitized by Google

watery, with weak pulse; sour smelling; with great restlessness and anxiety.
Before and during stool: cutting colic.
Pain in sigmoid flexure of colon.
Soreness of anus.
Diarrhœa in infants: child is quiet all day, but screams and tosses about all night.
Infantile diarrhœa, general coldness, blueness of face.

[31] **Urinary Organs.** Pain and pressure in region of bladder.

[32] **Male Sexual Organs.** Thrilling sensation in urethra whilst urinating.

[31] **Neck and Back.** Severe pain about superior margin of l. scapula.

[32] **Upper Limbs.** Pain in thighs.

[33] **Lower Limbs.** Smarting on inside edge and at root of l. great toenail, with heat, tearing and pulsation.
Pain in large joint of great toe.
Burning of soles of feet.

[34] **Limbs in General.** Aching in arms and legs, most r. side.

[35] **Nerves.** Fainting fits; weakness.
Excessive uneasiness and tossing about of limbs.

[36] **Time.** Night: severe cutting, griping pain in bowels <; child screams and tosses.

[40] **Fever.** Febrile attacks.
Great disposition to perspiration of head and superior parts of body.

[42] **Locality and Direction.** Right: pain in hypochondrium; aching in arm and leg.
Left: pain in superior flexure of colon; severe pain about superior margin of scapula; smarting on inside edge and at root of great toenail.

[43] **Sensations.** As if abdomen would be cut to pieces.
Pain: in head: in r. hypochondrium; in middle of abdomen: in region of l. superior flexure of colon; in region of bladder; in thigh; in large joint of great toe.
Violent pains: in head; in small intestines.
Severe pain: about superior margin of l. scapula.
Tearing: at root of great toenail.
Severe griping, cutting pain: in bowels.
Cutting colic.
Aching in arms and legs.
Stinging: on tongue and in fauces.
Biting: of tongue.
Smarting: in skin of forehead; of tongue; on inside edge and at root of l. great toenail.
Burning: of soles of feet.
Soreness: of anus.
Pressure: in region of bladder.

Digitized by Google

Pulsation: in great toe.
Thrilling sensation: in urethra.
Dryness: of lips.

[48] **Relations.** Compare: *Camphora* (diarrhœa with coldness), *Coloc.* (colic).

JAMBOS EUGENIA.

Malabar Plum tree; Rose apple. *Myrtaceæ.*

A tree native to the tropics, never without flowers or fruit. The tincture is prepared from the fresh seeds, which are considered poisonous.

Introduced and proved by C. Hering. See Allen's Encyclopedia, vol. 5, p. 231.

CLINICAL AUTHORITIES.—*Epidemic catarrhal affections of respiratory passages*, Hrg., Rück. Kl. Erf., vol. 3, p. 13; *Acne*, C. Hg. and others, MSS.

[1] **Mind.** Constantly desirous of sitting alone and reflecting.
Nothing seemed right, when sitting, he wanted to lie; when lying, he wanted to rise again.
Slight but long continued drunkenness, which made him very talkative, but indolent.
Sudden, great change in him after micturition, everything seems more beautiful and bright, sky and trees more joyous and clear; but after quarter of an hour everything became gloomy again.

[2] **Sensorium.** Whirling in head while sitting; houses at a distance seem to turn bottom upwards.
Vertigo after rising from lying down, caused by rush of blood to head.
Looking inattentively objects waver or tumble one over the other, on looking sharp all is right.
Confusion of head, and slight sticking in it.
Dulness and slight ticking in head.
Dizzy and nauseated, in evening.

[3] **Inner Head.** Pressive, pinching pain in small spot deep in forehead.
[4] Neuralgia in l. forehead over eye.
Headache on r. side, deep in, as if a heavy board was lying there.
Headache as from a sticking from all sides at once, or as if everything was drawn together from within, recurring like a slow pulsation.
Headache, as if something was rolling in head, with burning in it coming out at eyes, with lachrymation; no re-

Digitized by Google

lief from cold water; at last he became nauseated, was obliged to vomit, but headache was made < thereby; in evening lasting into night.

In evening, headache, nausea, vomiting, with subsequent bitterness of mouth, much thirst for cold water, and perspiration after drinking.

Whole night, headache, burning in eyes, great thirst, and much micturition.

Pressive pinching pain on vertex.

[5] **Sight and Eyes.** Darkness before eyes, everything seems double; on looking intently double vision disappears.

On looking intently at anything everything is in order, but if he only looks ahead of him, everything wavers before eyes and becomes confused.

Whirling before r. eye, as if it would become dark; eye becomes inflamed.

After micturition, suddenly bright before eyes.

Eyes look sleepy and drunken.

Red vessels from inner canthus to cornea.

It seems as though fire came out of eyes, and tears ran out of them in streams in evening and night.

Suddenly, biting in eyes, as from pepper.

Contractive, pinching pain in eyeball in small spot above r. inner canthus.

Right eye inflamed; needle-like stitches in inner canthus.

Unable to look at sun, eyes fill with water.

Unable to close eyes in evening on account of burning in them; this also prevents sleeping at night.

Violent internal itching in eyes and nose in evening.

[6] **Hearing and Ears.** ‖Catarrhal otitis.

[8] **Upper Face.** ‖Pimples on face, painful for some distance about them. θAcne rosaceæ.

[10] **Teeth and Gums.** Gums about hollow teeth inflamed and painful.

[11] **Taste and Tongue.** Pain on very small spot in region of l. corner of hyoid bone, also when swallowing.

[12] **Inner Mouth.** Frothy saliva in mouth when talking.

Mouth full of frothy, tenacious saliva; spits and hawks whole day.

Tenacious, yellowish, bloody mucus in mouth after midday nap.

[11] **Throat.** At night, burning in eyes, violent thirst from dryness, low down in throat, so that he did not feel the drink, which also did not > the dryness.

Pain in a very small place in region of l. corner of hyoid bone, also on swallowing.

‖Throat inflamed. θCatarrhal fever.

Cough felt in whole chest, but especially in pit of throat.

Mucus goes from nose into throat.

Digitized by Google

14 **Appetite, Thirst. Desires, Aversions.** Eats and drinks with a very good appetite, so that he takes too much; greater relish for tobacco.
Much thirst for cold water, with perspiration, in morning; on awaking.
Wants to do nothing but smoke all day.

16 **Hiccough, Belching, Nausea and Vomiting.** Hiccough when eating, more like eructations than loud hiccough.
Heartburn at night.
Nausea, going off by smoking.
‖Vomiting.

17 **Scrobiculum and Stomach.** Sticking in pit of stomach.
Pain in r. side near pit of stomach, under ribs as if it would be drawn inward.
Pressure and sticking in l. side under ribs, near pit of stomach.
Contractive, pinching sensation deep in stomach.
Sensation as of cramp in orifice of stomach, which results in nausea.
Nausea commences deep in stomach and rises up from end of œsophagus.

19 **Abdomen.** Flatulence, rumbling in bowels.
Drawing about navel as from a purge.
Confused feeling in upper abdomen like a coldness in it.
Burning in abdomen, as after drinking brandy, at first transversely across abdomen, then becoming general.
Colic, with laborlike pressing downward, much urging to stool and to urinate, with scanty discharge.
‖Colic.
‖Inguinal hernia from a fall.

20 **Stool and Rectum.** Urging to stool and colic; now and then a somewhat diarrhœic discharge is forced out as with a syringe.
Diarrhœa: with much pressure backward.
Diarrhœic discharge followed by vomiting.
Several stools a day with burning in abdomen and sputtering, fetid discharge.
‖Offensive, sputtering stool, without much urging.
Several small stools, with burning in abdomen.
Only wind is passed instead of stool.
‖Scanty, hard stool, after much pressing, with spasmodic closure of anus after evacuation.
Very scanty, pasty, gritty stool.
Pressure as in diarrhœa, at first a hard, then a pasty stool.
After stool, stitching in abdomen from above downward.
It seems as if a ten pound weight was hanging upon rectum, and as if everything below would fall out.
Cramp or pinching pains in rectum.
‖Tenesmus.

Digitized by Google

‖Bleeding hemorrhoids, copious for days, with great relief of mind and body.

[21] **Urinary Organs.** ‖Tenesmus in bladder, ischuria.
Burning during micturition.
‖Frequent urination during night.

[22] **Male Sexual Organs.** Violent erections with sexual desire, after midday nap.
Painful erections, with inward itching, without sexual desire.
Seminal discharge: too soon and almost without excitement in morning; retarded; the orgasm subsides several times before it leads to an ejaculation.
During coition no seminal discharge; penis relaxed.
No erections in morning.
‖Impotence.
Glans penis remains sensitive a long time after coition.
Much turning and twisting in scrotum.

[25] **Voice and Larynx. Trachea and Bronchia.** Sensation as if larynx was narrowed; it prompts to a deep inspiration, whereby tightness is still more felt, it makes him hoarse.
‖Inflammatory affection of trachea. θCatarrhal fever.

[27] **Cough.** Cough: from throat; in coughing, pain principally in throat pit; more frequent in evening and at night; not the least expectoration; causes dryness of throat.
‖Cough raises something from pit of throat, but it always gradually falls down again.
Loose, deep cough, without expectoration and without pain, especially in evening.
Loose cough at night.
‖Much hawking causing a short cough.
After coughing, is obliged to swallow, when irritation passes off; as soon as he swallows again is obliged to cough.
‖Epidemic cough among children, with coryza, inflammation of eyes and pain in ears.
‖Catarrh: with much phlegm and rheumatic pains; with rattling in chest.
Constantly obliged to expectorate.
When speaking, is obliged to spit out a frothy saliva.
Hawking; mucus yellowish and somewhat bloody.
Constant hawking, something is always loosening, but still something always remains adherent.

[31] **Neck and Back.** Pain deep in r. side of neck near œsophagus, a fine, sticking, cramplike, constant pain.
Pain in nape of neck which hinders turning.
Sticking pain in back as if something was sticking in spine, < by bending back.

Digitized by Google

Pain in back, which makes him bend back inward, with heat in evening, disappearing in morning.
Sticking, burning, itching in a small spot on back, < after scratching.
Pain in small of back and in calves.
Aching in sacrum and knees.

[32] **Upper Limbs.** Skin recedes from thumb nail and suppurates.

[33] **Lower Limbs.** Violent sticking, extending obliquely forward above l. crest of ilium, < when sitting erect, standing and bending toward l. side; > bending towards r.
Pain as if a band was drawn from crest of one ilium to other; hip bones painful to pressure.
Pain in thighs and calves, he could hardly stand.
Paralytic pains in l. tibia and feet.
Cramps in soles of feet when moving at night.
Skin cracks between and about toes.

[35] **Rest. Position. Motion.** Rising from lying down: vertigo.
Sitting: whirling in head; sticking above l. crest of ilium <; coldness as if he was naked.
Bending back: sticking pains <.
Bending inward: pain in back >.
Bending toward l. side: sticking above l. crest of ilium <.
Bending toward r. side: sticking above l. crest of ilium >.
Standing: sticking above l. crest of ilium <.
Could hardly stand: on account of pain in thighs and calves.
Moving: cramps in soles of feet.
Walking: much exhaustive yawning; perspiration.

[36] **Nerves.** Very much exhausted, but lively after drinking coffee.

[37] **Sleep.** Much exhaustive yawning when walking in open air.
Forgetting all his business he crept into a corner and said he must sleep; he could not sleep, however, but still remained lying down.
After a sound midday sleep difficult waking, with much thirst and bruised sensation.
Sound sleep undisturbed by any difficulties.
Stupid midday sleep with confused dream.

[38] **Time.** Morning: seminal discharge; no erections.
All day: spits and hawks.
After midday nap: yellowish, bloody mucus in mouth; violent erections.
Evening: dizzy and nauseated; headache lasts into night; nausea, headache, vomiting; tears run out of eyes in streams; unable to close eyes on account of burning; violent internal itching in eyes and nose; cough more frequent; heat in back.

Digitized by Google

Before midnight: heat.

Night: headache, burning in eyes, great thirst, much micturition; tears run out of eyes in streams; burning in eyes prevents sleep; violent thirst; heartburn; frequent urination; cough more frequent; cramps of soles of feet.

[39] **Temperature and Weather.** Open air: much exhaustive yawning while walking, mornings.

Cold water: does not > burning in eyes; much thirst for.

[40] **Fever.** Shiverings run over him after micturition.

Coldness, as if he was naked, while sitting.

Hot hands.

Fever; heat before midnight, with little thirst and much perspiration, thereupon falling asleep; during fever and for several hours in morning, pain in back, > bending inward.

Perspiration and thirst after unsatisfactory coition.

Perspiration when walking.

Catarrhal fever; thirst during chill; heat before midnight, with affection of trachea, throat, eyes; sweat when walking.

[41] **Attacks, Periodicity.** During menstrual period: skin disease <.

[42] **Locality and Direction.** Right: headache on side; whirling before eye; pain in eyeball above inner canthus; eye inflamed; pain in side near pit of stomach; pain deep in side of neck.

Left: neuralgia in forehead over eye; pain in corner of hyoid bone; pressure and sticking in side under ribs; violent sticking, extending obliquely forward above crest of ilium; paralytic pains in tibia.

Inward: as if stomach was drawn.

Backward: pressure in rectum.

Downward: labor like pressing in abdomen.

From above downward: stitching in abdomen.

[43] **Sensations.** Internal pinching pains here and there.

Crawling, titillating pains.

Headache as if heavy board was lying on r. side; as from a sticking from all sides at once; as if everything was drawn together from within head; as if something was rolling in head; as if vision of r. eye would become dark; as though fire came out of eyes; biting as from pepper in eyes; as if stomach would be drawn inwards; as of cramp in orifice of stomach; as if a ten pound weight was hanging upon rectum; as if everything below rectum would fall out.

As if larynx was narrowed; as if something was sticking spine; pain as if a band was drawn from crest of one ilium to other; coldness as if he was naked.

Digitized by Google

Pain: in face some distance about pimples; on very small spot in region of l. corner of hyoid bone; in r. side near pit of stomach; in throat pit; in ears; deep in r. side of neck near œsophagus; in nape of neck; in back; in small of back; in calves; in thighs.
Violent sticking: above l. crest of ilium.
Fine, sticking, cramplike, constant pain: in side of neck.
Sticking, burning, itching: in a small spot on back.
Sticking: in pit of stomach; in l. side; under ribs; in back.
Slight stitching: in head.
Stitching: in abdomen.
Pressive, pinching pain; in small spot deep in forehead; on vertex.
Contractive pinching pain: in eyeball; in small spot above r. inner canthus.
Contractive pinching sensation: deep in stomach.
Pinching pains: in rectum.
Cramps: in soles of feet.
Colic, with labor like pressing downward in abdomen.
Neuralgia: in l. forehead over eye.
Paralytic pain: in l. tibia and feet.
Aching: in sacrum and knees.
Drawing: about navel as from a purge.
Twisting: in scrotum.
Pressure: in l. side under ribs; backwards during diarrhœa.
Burning: in head coming out at eyes; in eyes; in abdomen.
Biting: in eyes.
Whirling: in head; before r. eye.
Dryness: low down in throat.
Confused feeling: in upper abdomen like a coldness in it.
Violent internal itching: in eyes and nose.
Inward itching: in male sexual organs.

" **Tissues.** An old wound from a thrust became painful again.
‖Rheumatic pain wanders from place to place, with catarrh.

" **Touch. Passive Motion. Injuries.** Pressure: hip bones painful to.
From a fall: inguinal hernia.

" **Skin.** ‖Comedones.
‖Acne, with pain extending for some distance around; the skin disease is < during menstrual period.
‖‖Pimples (sore acne) on face.

" **Relations.** Antidoted by *Coffea;* smoking tobacco antidotes nausea.
Compare: *Lavroc.* and drugs containing hydrocyanic acid; *Pulsat* (fugitive rheumatic pains).

[1] **Mind.** Apathy; indifference to pain.
Anxiety and anguish.
Anxiety, with burning in stomach and coldness of body.
[2] **Sensorium.** Giddiness, followed by unconsciousness and delirium.
Head hot, stupefaction, with yawning and nausea.
[3] **Inner Head.** Violent pressing pain in temples, > in open air, and reappearing when entering room.
Headache, with nausea and vomiturition, beginning in morning.
Heat and heaviness of head.
[4] **Outer Head.** Stiffness of muscles on forehead and neck.
[5] **Sight and Eyes.** Quivering in l. upper lid.
Itching and smarting of margins of lids.
[6] **Hearing and Ears.** Burning hot ears, with heat in back part of head.
[7] **Smell and Nose.** Itching of nose while eating.
Ulcers in nose and mouth.
[8] **Upper Face.** Pale face with blue margins around eyes.
[9] **Lower Face.** Painful cracked lips.
[11] **Taste and Tongue.** Metallic, bloody taste, with much spitting of saliva (in morning).
Long continued pain and burning of tongue.
Numbness of tongue, with heat and dryness of mouth.
[12] **Inner Mouth.** Increased accumulation of thin saliva.
Burning in mouth and throat, followed by dryness.
Dryness of mouth and tongue, without thirst (at night); mouth feels as if scalded.
Ulcers in nose and mouth.

[13] **Throat.** ‖Dryness in fauces and throat.
Spasmodic constriction in throat, ascending from stomach.
[14] **Appetite, Thirst. Desires, Aversions.** ‖Inextinguishable thirst, not satisfied by drinking cold water. θCholera.
[15] **Eating and Drinking.** ‖Dreads to drink on account of nausea.
[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations.
‖Hiccough, followed by copious vomiting of bile. θCholera.
‖Vomiting: of large masses of dark green bile and mucus; of large quantities of watery, albuminous substances; water is almost immediately vomited.
‖Very easy vomiting of a great quantity of watery, glairy fluid, accompanied by watery diarrhœa; spasmodically contracting pains in stomach, burning in stomach, cramps in calves and coldness of body. θCholera.
‖Uninterrupted vomiting. θCholera.
[17] **Scrobiculum and Stomach.** Sensation of sinking, with nausea in pit of stomach.
‖Crampy, constrictive pains in epigastrium.
‖Persistent dull pressure in stomach.
‖Heat and burning in stomach.
‖Spasmodically contracting pains in stomach.
[18] **Abdomen.** ‖Much noise in abdomen, as if a full bottle was emptied, followed later by thin stool.
‖Rumbling in abdomen, with colic; > when walking in open air.
‖Abdomen: distended and soft; very much inflated, distended, tympanitic; swollen and sore to touch; contracted. θCholera.
‖Pain in region of navel, deep.
‖Burning in abdomen; seeks to cool himself by throwing off covering and lying on ground.
‖‖Lancinating, stinging pain with colic.
[20] **Stool and Rectum.** ‖Sudden desire for stool, and constant noises as of liquids in abdomen, especially in l. side.
‖‖Thin stool, preceded and followed by much rumbling, and at times a noise as if a bottle was being emptied.
‖Colic followed by discharge of large, watery, odorless stool.
‖Continued discharge of water by stool.
‖Stools painless, thin, watery, with loud, fluid rumbling, and gushing out of stool; < mornings.
‖‖Watery diarrhœa, as if it spurted from him.
‖Diarrhœa profuse; gushing out like a torrent.
‖Severe diarrhœa occurring suddenly in Summer, in connection with a sharp attack of vomiting.
‖After taking cold, sleepless; slight pain in bowels; after

Digitized by Google

midnight profuse watery discharge; a few hours later, again and again, weakening patient greatly; stools profuse, watery, without smell. θDiarrhœa.

‖Easy vomiting of large quantities of watery substance like albumen; diarrhœa, contents of rectum gush out like a torrent; anxiety, with burning at stomach; anguish, with coldness of body; viscid sweat; violent cramps in lower limbs; calves look like flat splints; abdomen flattened after many stools. θCholerine.

‖Vomiting, with cramp in abdomen; frequent, profuse, pale, watery, urgent stools; loud rumbling, as of water pouring from a bottle; abdomen flat; face pale, shrivelled; great thirst for water or lemonade.

‖During menstruation, which had ceased for thirty hours, uninterrupted vomiting of scentless, white, gelatinous fluid; cramps in calves and brachial muscles; body blue, cold as marble, and covered with cold, clammy sweat; pulse imperceptible; abdomen contracted; unquenchable thirst; drinks much cold water; burning in abdomen, which she seeks to relieve by lying on ground; mind placid, rather ecstatic, taking little notice of her cramps and other affections. θCholera morbus.

‖Fearful vomiting, coming up at once in quantity, of watery or glairy fluid, with crampy, constrictive pains in gastric region, or burning in stomach; continued discharge of water per anum; cramps in calves; general coldness of body. θCholera.

‖Sudden, violent vomiting of watery fluids, with cramps in stomach; cool skin; weak, soft, slow pulse; great debility; anxiety and fear, as though cramps in calves would set in; stool diarrhœic yesterday; to-day neither stool nor urine. θCholera.

‖‖First stage of cholera, before period of collapse.

‖Constipation.

‖Very abundant alvine evacuations, mushy, with a large number of lumbrici and ascarides.

‖Griping, sticking pains in abdomen, continuing a long time, accompanied by sensation as if balls were rolling together in abdomen; constipation; pains occasionally so severe that he shrieked and writhed about in bed; after five drops a copious evacuation with a quantity of lumbrici and ascarides; the same with the following evacuations.

‖‖Stitches in anus and rectum.

[21] **Urinary Organs.** Frequent desire to urinate; urine pale yellow, frothy.

[24] **Pregnancy. Parturition. Lactation.** ‖Vomiting during pregnancy.

Digitized by Google

[30] **Heart, Pulse and Circulation.** ‖Pulse imperceptible. θCholera.
[32] **Upper Limbs.** ‖Cramps in brachial muscles. θCholera.
[33] **Lower Limbs.** ‖Slight cramplike jerkings in both calves, with painless diarrhœa.
‖Cramps in calves. θCholera.
‖Violent, cramplike pain in lower legs, and cramps in calves, which become knotted.
‖Violent cramps in legs and feet.
Tingling in toes.
Itching between toes at night.
The heels are very sensitive when walking on them.
[35] **Rest. Position. Motion.** Walking: in open air, rumbling in abdomen; on heels, sensitive.
Writhed about in bed with pain.
[36] **Time.** Morning: headache begins; metallic, bloody taste, with much spitting of saliva; stools <.
Night: dryness of mouth and tongue, without thirst; itching between toes.
After midnight: profuse watery discharge; a few hours later again and again.
[39] **Temperature and Weather.** Open air: pressing pain in temples > ; rumbling in abdomen.
Entering room: pressing pain in temples returns.
Seeks to cool himself by throwing off covering and lying on ground.
[40] **Fever.** Chilliness in back, with heat in face and head.
Chilliness with cold hands and blue nails.
‖Coldness of body.
‖Body cold as marble and mottled blue. θCholera.
‖Cold hands, with heat in mouth and throat.
Heat in head, face and ears.
‖General cold, clammy perspiration.
‖Cold, clammy sweat on skin. ‖Cholera.
[41] **Attacks, Periodicity.** Summer: severe diarrhœa occurring suddenly.
[42] **Locality and Direction.** Left: quivering in upper eyelid; noise as of liquids in abdomen on side.
[43] **Sensations.** Mouth feels as if scalded; as if balls were rolling together in abdomen; rumbling as if a bottle was being emptied.
Pain: in region of navel.
Severe pain: in abdomen.
Lancinating stinging pain: in abdomen.
Violent cramplike pain: in lower legs.
Stitches: in anus and rectum.
Griping, sticking pains: in abdomen.
Violent cramps: in lower limbs.

Digitized by Google

Cramps: in calves; in abdomen; in bronchial muscles.
Violent pressing pain: in temples.
Contracting pains: in stomach.
Constrictive pains: in epigastrum, in gastric region.
Slight cramplike jerkings: in both calves.
Spasmodic constriction: in throat.
Persistent dull pressure: in stomach.
Smarting: of margin of lids.
Burning: in stomach; of tongue; in mouth and throat; in abdomen.
Burning hot ears.
Heat: of head; in back part of head; of mouth; in face; in ears.
Dryness: of mouth; of tongue; in fauces; in throat.
Numbness: of tongue.
Stiffness: of muscles on forehead and neck.
Sinking: in pit of stomach.
Heaviness: of head.
Tingling: in toes.
Quivering: in l. upper eyelid.
Itching: of margins of lids; of nose; between toes at night.

[45] **Touch. Passive Motion. Injuries.** Touch: abdomen sore; heels sore when walking on them.

[47] **Stages of Life, Constitution.** Woman, æt. 22; cholera.
Woman, æt. 31; cholera.
Man, æt. 40; cholera.

[48] **Relations.** Effects cease by placing hands in cold water.
Compare: the Euphorbiaceæ, viz.: *Crot. tig.*, *Euphorb. coral.*, *Mancinella*; also *Veratr.* in cholera.

JUGLANS CINEREA.

Butternut. *Juglandaceæ.*

Tincture of the bark of the root.

Provings by Paine, Clark, Cressor and Hale. See Allen's Encyclopedia, vol. 5, p. 193.

CLINICAL AUTHORITIES.—*Retrosternal pain*, Burnett, Hom. Rev., vol. 32, p. 205; *Scarlatina* (20 cases reported cured), Horton, A. H. O., vol. 8, p. 174; *Erysipelas*, Horton, A. H. O., vol. 4, p. 162; *Eczema*, Horton, A. H. O., vol. 3, p. 551, and vol. 4, p. 161; *Herpes circinatus*, Horton, A. H. O., vol. 3, p. 551; *Impetiginous eruption*, Horton, A. H. O., vol. 3, p. 551; *Impetigo figurata*, Horton, A. H. O., vol. 3, p. 551; *Lichen lividus*, Horton, A. H. O., vol. 4, p. 162.

[1] **Mind.** Depression of spirits.
[2] **Sensorium.** Vertigo, with faintness.
[3] **Inner Head.** ‖Aching pain in r. temple.
Dull headache on rising, passing off on getting up.
Fulness of head at night.
‖Sharp, shooting pains in occiput, often associated with liver disturbance.
[4] **Outer Head.** ‖Eruptions on scalp.
[5] **Sight and Eyes.** Inflammation, with pustules on lids and around eyes.
[6] **Hearing and Ears.** Pain on swallowing, which is deep, drawing, tickling.
[7] **Smell and Nose.** Coryza from l. nostril.
Dryness of nose.
‖"Noli me tangere" on nose.
[8] **Upper Face.** Erythema of face.
‖Erysipelas of entire face, < r. side, extending around to r. ear, which was swollen twice its natural size; eyelids turgid and infiltrated, nearly obscuring sight, < r. side.
[9] **Lower Face.** Patch of herpes circinatus upon chin about size of dollar, steadily increasing in size.
[11] **Taste and Tongue.** Tip of tongue sore, dryness of fauces.
[12] **Inner Mouth.** ‖Swelling in submaxillary glands, < right.
[13] **Throat.** ‖Pain in r. side of fauces.
Sore throat, with dry lips and moist mouth.
‖Throat feels swollen, with pain on r. side.
‖Chronic inflammation of throat, with general debility.
[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite, with coppery taste.

Digitized by Google

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea in morning; vomiting, retching, with colic.

[17] **Scrobiculum and Stomach.** Pain in epigastrium and boring in stomach.
Sinking sensation at stomach.
‖Indigestion, with gastric irritability; flatulence.

[18] **Hypochondria.** ‖Pain in each hypochondriac region.
Stitching pains about liver and under r. scapula.

[19] **Abdomen.** Flatulence and aching in abdomen after dinner.
Deep seated pain on l. side near kidneys.
Heat and pain in hypogastrium.
Irritation and inflammation of mucous membrane of bowels, followed by dysentery.

[20] **Stool and Rectum.** Loose stool which smells like onions.
Tenesmus and burning after stool.
‖Bilious, yellowish green stools with burning and tenesmus.
‖Constipation preceded by diarrhœa.
‖Colic, very severe and prostrating, with purging.
‖Diarrhœa of soldiers in camps.

[21] **Urinary Organs.** ‖Diarrhœa with cutting in abdomen.

[25] **Voice and Larynx, Trachea and Bronchia.** Rattling in bronchia on coughing, without expectoration.

[27] **Cough.** Expectoration of very tenacious mucus and musty sputa.

[28] **Inner Chest and Lungs.** Great oppression in chest, with cutting pains in lungs.
‖Retrosternal pain, < or only felt when walking out of doors, after meals, or when hurried, or going up hill.
‖Suffocating pain in chest, especially when walking, so that he has to stand still. θAngina pectoris.
Pain in l. side, < on pressure.
Congestion of lungs.
‖Dropsy of chest of rheumatic origin, when there are bright red erythematous spots.
‖Scrofulous consumption, with great emaciation.

[31] **Neck and Back.** ‖Stitchlike pain under r. scapula, when stooping.
Aching pain in small of back on stooping.
Aching or shooting pain in lumbar region.

[32] **Upper Limbs.** ‖Aching in r., pain in l. shoulder.
Great pain in r. axilla, extending down arms along course of nerves.
Aching pains in arms and wrists, as if sprained.

[33] **Lower Limbs.** Heat on inner side of thigh, and in feet, with cramplike pain in l. hip at night.

[34] **Limbs in General.** ‖Rheumatic pain in r. shoulder, extending to pectoral muscles, producing inability to draw a deep inspiration; a single thickly set patch of impe-

Digitized by Google

tigo figurata upon inside of l. leg, between knee and in step which soon became crusted, discharging a purulent, ichorous secretion, irritating surrounding skin, producing a wide, inflammatory margin; painful and sore; difficulty in walking.

[35] **Rest. Position. Motion.** Rising: dull headache > when getting up.

Stooping: stitchlike pain under r. scapula; aching in small of back.

Could neither sit nor lie with any comfort on account of eruption.

Going up hill: retrosternal pain <.

Walking out of doors: retrosternal pain <; suffocating pain in chest so that he has to stand still; difficult on account of eruption on legs; pain from rectum to bladder >.

[38] **Time.** Morning: nausea.

Night: fulness of head; cramplike pain in l. hip.

Attacks come on first half of night: pain from rectum to bladder.

Latter half of night must walk his room.

[39] **Temperature and Weather.** When heated from overexertion: itching of whole body.

[40] **Fever.** Scarlatina; anginose symptoms pretty well developed; no sequela.

[41] **Attacks. Periodicity.** One attack hardly subsides before a fresh crop appears: eczema.

[42] **Locality and Direction.** Right: aching pain in temple; erysipelas of face <, extending to ear; eyelid turgid and infiltrated; swelling in submaxillary glands <; pain in side of fauces; stitchlike pain under scapula; aching in shoulder; pain in axilla; rheumatic pain in shoulder.

Left: coryza from nostril; deep seated pain on side near kidneys; pain in side; pain in shoulder; cramplike pain in hip; a single thickly set patch of impetigo figurata upon inside of leg.

[43] **Sensations.** Arms and wrists as if sprained.

Pain: in r. side of fauces; in epigastrium; in each hypochondriac region; hypogastrium; retrosternal; in l. side; in l. shoulder; in eczema of hands.

Great pain: in r. axilla, extending down arms along nerves.

Cutting: in abdomen; in lungs.

Sharp pain: in occiput.

Shooting pain: in lumbar region.

Stitchlike pain: under r. scapula; in occiput; about liver.

Suffocating pain: in chest.

Severe pressing pain: extending from rectum to neck of bladder.

Digitized by Google

Very severe and prostrating colic.
Cramplike pain in l. hip.
Boring: in stomach.
Deep seated pain: on l. side near kidneys.
Deep, drawing, tickling pain: in ears.
Aching: in r. temple; in abdomen; in small of back; in r. shoulder; in arms and wrists.
Rheumatic pain: in l. shoulder; extending to pectoral muscles.
Dull pain: in head.
Heat: in hypogastrium; on inner side of thigh; in feet.
Soreness: of tip of tongue.
Unbearable smarting pains: eczema of hands.
Dryness: of nose; of fauces; of lips.
Fulness: of head.
Oppression: in chest.
Sinking sensation: at stomach.
Tension: eczema of hands.
Painful itching: of eruption upon body, face and arms.
Intolerable itching and soreness of eczema of hands
Violent itching: over whole body in spots.

" **Tissues.** ‖Scrofulous swelling of glands.

" **Touch. Passive Motion. Injuries.** "Noli me tangere": on nose.
Pressure: pain in l. side <.

" **Skin.** ‖Redness of skin, resembling flush of scarlatina; violent itching over whole body, in spots, changing about, first one place then another; < when being heated from overexertion.
‖Erysipelatous inflammation of skin of body and extremities.
‖Numerous and extensive patches of eruption on body and extremities, varying in size from a dollar to a man's hand. θErythema nodosum.
‖Eruption upon body, face and arms; painful itching causing an irresistible inclination to tear off the crusts. θEcthyma.
‖Eruption resembling eczema simplex.
‖Eruption general and almost confluent; pustules large and thickly set; those upon face seemed to be drying, with steady increase and aggravation of those upon body and extremities; could neither sit nor lie with any comfort; worried; slept but little; appetite poor; diarrhœa. θEcthyma.
‖Impetiginous eruption upon chin, which had been torn and broken, producing hard crusts, which nearly covered entire surface; some scattering crusts of same upon hands and arms; several large aphthous sores upon in-

Digitized by Google

side of lips and upon tongue; constipation; child fretful and feverish; ichorous secretion of sores had inoculated mother's breast, producing similar sores around nipples.

Pemphigus.

Pustular eruptions.

Various forms of eruptions emanating from a psoric or sycotic taint.

Entire circumference of leg, from knee to ankle, covered with lichen lividus; the livid character of papulæ, and ecchymosed streaks running from pimple to pimple, appeared almost like a coarse purple net drawn around limb; severe pressing pain extending from rectum to neck of bladder, thence radiating up spermatic cords; attacks come on first half of night during sleep; > walking; must walk his room the entire latter half of night.

Chronic eczema of hands, one attack hardly subsiding before a fresh crop made its appearance, often passing from simple to impetiginous variety; the ichorous and semi-purulent secretion oozing upon exercising the hands, would crust over again, causing most intolerable itching and soreness; is awakened at times from sound sleep and finds himself scratching the skin off hands: dyspepsia, with bronchial irritation and cough.

Simple eczema of hands and wrists, assuming finally all characteristics of a fully developed impetigo figurata in its pustular stage; the patches had coalesced and eruption had become confluent generally; pustules were discharging and crusting over, and there was an unbearable degree of tension and pain about them.

Eczema of hands, disease having reached impetiginoid degree, extending over entire back of both hands, and around ball of thumbs nearly to middle of palms; upon removing bread poultices which patient had applied the softened crusts and intervening epidermis adhered to them, leaving a raw surface, and this was followed by a copious discharge of blood; unbearable smarting pains.

Stages of Life, Constitution. Girl, æt. 18 mos., impetiginous eruption.

Boy, æt. 2, suffering three months; ecthyma.

Girl, æt. 4; herpes circinatus.

Girl, æt. 8; ecthyma.

Boy, æt. 14; impetigo figurata.

Man, had ill health for some time; complained of languor; slight nausea at times, and occasional wandering pains about limbs; was seized quite suddenly during night

Digitized by Google

For one or two hours, repeated every five or ten minutes: sensation of ball rising from pit of stomach to larynx.
Every third day: mind symptoms <.

42 **Locality and Direction.** Left: headache in parietal bone.

43 **Sensations.** Head felt larger; as if l. parietal bone was sore and pressed upon by a hand; as if there was a wound on parietal bone which was being scratched; tongue felt too large; sensation in throat and larynx as if forced asunder; as if a ball was rising from pit of stomach to larynx.
Pain: in l. parietal bone.
Flying pain: in uterus.
Troublesome burning: in middle towards tip of tongue; of eruption on trunk, legs and forearms.
Anxious feeling: from pit of stomach to spine, accompanied by palpitation.
Constricted feeling: in head.
Pressure: below os pubis.
Lassitude: with febrile heat.
Numbness: of middle towards tip of tongue.
Intolerable itching, stinging: of eruption on trunk, legs and forehead.

44 **Tissues.** ‖Phagedenic ulcers, deep base and turned up edges.
Eruptions; lichen, psoriasis, ichthyosis.
⁞Rheumatic, gouty and syphilitic pains.
⁞Gouty nodosities.

45 **Touch. Passive Motion. Injuries.** Pressure: does not relieve constricted feeling in head.

46 **Skin.** ‖Dry, wilted skin; emaciated to a skeleton. θNeuropathia.
‖Acne, appearance like that in early stage of variola.
‖Eruption covering entire body except scalp, comes out in red papulæ, varying in diameter from size of pin's head to that of a three cent piece; vesicles form on summit, suppurate, crusts form and fall off, leaving a sore which heals; the places occupied by these sores are marked by a dark colored cicatrix, and the skin generally has a dusky look; intolerable itching, stinging and burning, especially on undressing at night; it is worst on trunk, legs and forearms; mind much depressed.
‖Lichen confluens over whole body, except face, palms and soles, and part of chest; the rest studded with papulæ, particularly distinct about outer sides of thighs, arms and back; they are covered with very minute, flimsy, whitish scabs, causing a powdery appearance of skin; head very scurfy; hair crisp and dry; often irritation in skin, which becomes reddened and cracked, particularly about bend of arms and knees.

Digitized by Google

‖ Dry chronic eczema; skin of arms thicker and rougher than natural, covered with flimsy exfoliations of epidermis; very irritable, itching and tingling when she gets warm; intensely fissured about bends of elbows and wrists; occasional exacerbation, with eruption of distinct vesicles; languor and lassitude; pale, sallow complexion; catamenia irregular.

‖ Patches of psoriasis on back, arms and spreading from elbows, and anteriorly on legs, size of a crown piece, and indolent.

‖ Lepra.

‖ Psoriasis: scaly itchings, causing him to scratch till an ichorous fluid discharges, forming a hard cake.

‖ Discoloration of skin after psoriasis and lepra.

‖ Psoriasis in numerous patches, with great itching; the patches becoming more active, scale off, and are replaced by smaller, they leave beneath them a red skin.

[45] **Relations.** Compare *Arsen.* which it greatly resembles; *Cinchon.* in periodicity; *Cicuta* in fixed eyeballs; *Iodum*, *Kali bich.*, *Merc. cor.*

KALI BICHROMICUM.

Potassium Bichromate. $K_2Cr_2O_7$.

Prepared from the metal Chromium discovered by Vauquelin in 1797 in a Siberian mineral, composed of chromate of lead.

Introduced by Drysdale, and extensively proved by himself, Dudgeon, Hamilton, Russell, Wright, Neidhard, Norton, Walker, Taylor, Turner, the Austrian provers, Berridge and others.

CLINICAL AUTHORITIES.—*Headache* (3 cases), Drysdale's Monog., p. 39; *Migraine*, Epps, Hom. Rev., vol. 20, p. 679; *Supraorbital neuralgia* (2 cases), Drysdale's Monog., p. 39; *Eruption on head*, Wright, Drysdale's Monog., p. 50; *Eczema of scalp*, Drysdale, B. J. H., vol. 15, p. 678; *Boils on head*, Drysdale's Monog., p. 50; *Trachoma with pannus*, Allen, Norton's Oph. [1] **Mind.** Great weakness of memory.
Misanthropy and ill humor, even to disgust of life.
Frequent vanishing of thoughts; senseless staring at an object.
Listlessness, languor; great disinclination for mental or bodily labor.
Indifferent or low spirited after least annoyance, with distress in stomach.
Ill humored; low spirited.
Aversion to motion; inclination to lie down.
Anxiety arising from chest.
Anthropophobia; taciturnity; misanthropy.

[2] **Sensorium.** Lightness in head, across forehead, on stooping; < mornings.
Sudden, transient attacks of vertigo, rising from a seat.
Vertigo, with nausea, inclination to vomit; pain in epigastrium.
Confusion and heaviness in head.

[3] **Inner Head.** Headache in forehead over one eye.
Soon after dinner a dull, heavy throbbing above eyes, as if head would burst; > by lying, or pressing head against anything, or in open air; < stooping or moving about.
Pain beginning in r. supraorbital ridge and spreading over one side of head, coming on early in day and last-

Digitized by Google

ing ten hours, leaving soreness of scalp. θSupraorbital neuralgia.

‖Pain in l. temple, stretching across forehead to r. temple, and round eye and malar bone of r. side; complete loss of sight in r. eye, and puffy swelling on malar bone during pain; attack begins 9 A.M. and goes off in afternoon. θSupraorbital neuralgia.

‖Shooting pains over eyebrow.

‖Acute throbbing pain in centre of r. eyebrow, commencing in morning, lasting all day, and accompanied by persistent retching and vomiting of food and bile, without relief. θMigraine.

‖Pain in l. side of head and over l. eye; < at night; pain in r. side of chest, from scapula round to anterior part; gnawing at epigastrium after meals; catamenia scanty; leucorrhœa. θHeadache.

‖Sudden violent pain in temples; a shooting outward, in temples and over eyes, continuing day and night, but less severe during night; < stooping, which also brings on vertigo; no coryza. θHeadache.

Stinging headache in one temple.

‖Blindness, followed by violent headache, must lie down; aversion to light and noise; sight returns with increasing headache.

Headache which involves optic nerve; comes in morning, sight is blurred; as pain increases, dimness of sight decreases; comes and goes with sun and is accompanied by nausea.

Burning headache with vertigo, during which all objects seemed to be enveloped in a yellow mist; > by warm soup.

‖Violent pain in l. side of head, at zygomatic process; < when lying on it; shooting inwards and towards throat; throat a little reddened but not swelled; gastric symptoms present. θHeadache.

Periodical attacks of semilateral headaches on small spots that could be covered with point of finger; nausea, eructation, vomiting.

‖Periodic headache with vertigo and nausea, morning awaking, also in evening; often > by pressure, in open air, or by eating.

‖Pain in head, at a point.

‖In morning, on awaking, pain in forehead and vertex; later extends to back of head.

‖Headache from suppression of discharge from nose.

Outer Head. ‖Violent shooting pains from root of nose along l. orbital arch to external angle of eye, with dim sight, like a scale on eye; begins in morning, increases till noon, and ceases towards evening.

Digitized by Google

‖ Frontal headache: usually over one eye; shooting at intervals in r. temple.

▮ Semilateral headache in small spots, or along course of a few nerves.

▮ Darting or aching pains on one side; flying pains.

‖ Pressure on vertex, as from a weight.

‖ Bones of head feel sore; sharp stitches in bones. θ Rheumatic headache.

▮ Eczema of scalp, which all over and down to eyebrows was red, raw and oozing a thin moisture, which dries into yellow scabs here and there; hair thin and scattered, and nearly all fallen off; much creeping, itching and smarting of affected parts.

▮ Circumscribed patches of eruption, varying greatly in size, commencing at supraorbital regions, and covering nearly entire scalp; eruption consists of a number of minute vesicles closely crowded together, and filled with a transparent, viscid fluid, which burst and form thick, laminated crusts, of a dirty grey color; no inflammation or swelling of skin between patches of eruption; much itching; agglutination of lids, and discharge of purulent matter from inner canthus; patches of eruption on face, and thick crusts around nostrils; external ears greatly swollen, red and glazed, behind ears excoriated with profuse discharge of serous fluid; patches of eruption about 1½ inches in length, deeply fissured, in folds of skin of neck, with sero-purulent discharge; fretful, rests badly; sucks with difficulty, from stuffing up of nostrils; emaciation; green, slimy diarrhœa.

▮ Eruption began on ear and spread over half the head; greenish crusts, with oozing of whitish, thick matter.

▮ Eruption of painful small boils on back of head.

⁵ **Sight and Eyes.** ▮ Photophobia only by daylight; when opening lids they twitch.

▮ Various colors and bright sparks before eyes.

‖ Burning headache with giddiness, during which objects seem to be covered with a yellow veil.

‖ Eyeball tender when rubbed, especially the left; sees point of pen double.

▮ Sight dim, confused: before headache; with vertigo; with yellow sight.

Indistinct outline; figures vanish on looking at them.

▮ Granular lids, complete pannus of r. eye so could barely count fingers, and partial pannus of l. eye; considerable discharge; everything appeared slightly red to him; > when lying on face. θ Trachoma with pannus.

▮ Rheumatic sclero-iritis, with excessive pain and photophobia. θ Syphilis.

Digitized by Google

Sequelæ of iritis; pains pricking, stinging, wandering; mostly l. eye; lymph and pigment deposited upon anterior capsule of lens, or posterior wall of cornea; photophobia not commensurate with degree of inflammation; œdema of lids; great desire to rub lids; conjunctival chemosis with small spots here and there like ecchymoses.

Indolent ulcers of cornea; pale ring around cornea.

Right eye inflamed; lids ulcerated; ulcer on cornea; slight blepharospasm.

Ulcers and pustules of cornea with no photophobia, no redness.

Ulcer with slight photophobia in morning and agglutination; smarting < after rubbing; stringy discharge from eye. θUlceration of cornea.

Corneal ulcers which have a tendency to bore in without spreading laterally.

Small, white, granular pustules on l. cornea, with pricking pain.

Cornea affected with a large opaque spot, to which large red vessels ran from injected conjunctiva across clear margin; a zone of fine injection of bulb round cornea. θCatarrho-strumous ophthalmia.

Much injection of conjunctiva, both of the bulb and eyelids of both eyes; very red at edges of cornea, and phlyctenulæ on edge; several deep ulcers on the cornea; great photophobia and flow of tears; no pain. θScrofulous ophthalmia

Long lasting dense opacities of cornea.

Pustule on l. cornea, with surrounding indolent inflammation.

Left eye greatly injected; cornea dim; much photophobia in both eyes; upon r. eye an old cicatrix; eczema squamosum over whole body. θConjunctivitis scrofulosa.

Mild cases of croupous conjunctivitis (a condition midway between purulent and genuine croupous inflammation), in which the false membrane is loosely adherent, easily detached, and has a tendency to roll up and separate in shreds, which come away in discharges, giving them a stringy appearance; conjunctiva very much inflamed, even chemosis; lids swollen and cornea may be hazy.

True descemititis; fine punctate opacities in membrane of Descemet, especially over pupil, with only moderate irritation of eye.

Iris muddy and sluggish; cornea looked projecting; fine sclerotic injection round it, and some conjunctival injection; sight very dim, like a gauze; lachrymation on exposure; stiffness at outer canthus; burning pain on upper eyelid on touching it. θRheumatic inflammation.

Digitized by Google

‖Small white pustules in conjunctiva.
‖On opening eyes, lachrymation and burning.
‖Itching and burning in both eyes, lachrymation and photophobia.
‖Burning in eyes.
‖Heat and pressure in eyes.
‖Heat and redness in eyes, with desire to rub them.
‖Conjunctiva red, traversed by large vessels; or chemosis, with small spots here and there, like ecchymoses.
‖Inflammation of eyes; conjunctiva reddened, injected and chemosed; much flow of tears; eyelids reddened and agglutinated, with thick matter at edges.
‖Conjunctivitis, congestion of lids and globe; no photophobia; soreness in eyes < by reading or using eyes, with smarting lachrymation upon using.
‖Catarrhal inflammation, stringy discharge, or scanty secretion, < morning on awaking.
‖Inflammation of eyes, with yellow discharge and agglutination, in morning.
‖White of eye dirty yellow, puffy, and covered with yellow brown points.
‖Lids agglutinated in morning; yellow matter in canthi.
‖Œdema of lids; great desire to rub them.
‖Heaviness of upper lids on waking; requires an effort to open them.
‖Lids red, itching, tender; tarsi seem rough, causing a sensation as from sand in eyes; granular lids.
‖Margin of lids very red.
‖Eyelids burning, inflamed, much swollen; granular.
‖Large acute granulations of lids
‖Large polypus springing from conjunctiva of upper lid.

Hearing and Ears. ‖Stitches in l. ear and l. parotid gland, with headache.
‖Violent stitches in l. ear, extending into roof of mouth, side of head and neck; glands swollen, neck painful to touch.
‖‖Stinging from external meatus into internal ear.
‖Pulsating pain at night, purulent otorrhœa; stitches extending into mouth, or down neck, enlarged parotid.
‖Pulsating pains in ears at night, also stinging; external meatus swollen and inflamed.
‖Thick, yellow, fetid discharge from both ears. θAfter scarlatina.
‖‖Chronic suppuration; membrana tympani perforated; cicatrization of edges of perforation complete; tissues appear as if changed to mucous membrane, and secretion is often more mucus than pus; discharge yellow, thick, tenacious, so that it may be drawn through per-

Digitized by Google

foration in strings; lancinations, sticking sensations that cannot be located with any degree of positiveness.
‖Ulcers upon tympanum, dry but not painful, excepting sharp stitches.
‖Violent tickling and itching in ears.
‖External meatus of l. ear swelled and inflamed.
‖Redness; heat and itching of external ears.
‖Eruption covering both ears, and considerable portion of surrounding skin; hot and itching, and constant oozing of watery discharge. θEczema.
‖Itching of r. ear lobe, waking him.
‖Mumps on r. side lip.

Smell and Nose. ‖Loss of smell.
‖‖Fetid smell from nose.
‖‖Dryness of nose.
‖‖Nose very dry, with feeling of pressure in nasal bones.
‖Nose painfully dry; air passes with great ease through it.
‖Dryness of nose; constant feeling of being stopped up; disagreeable feeling of burning and swelling, and at times actual swelling; tensive feeling as if it must burst; hot upper lip; eyes affected; < in warm, > in cool temperature. θChronic inflammation of mucous membrane of nose.
‖‖Dryness of nose with pressive sensation at root as in commencement of stopped catarrh; pressive pain extended to temples and affected head.
‖Disagreeable sensation in nose, as if it were swollen, mucous membrane dry; walls of nose feel stiff and velvety.
‖Sensation of a hard substance compelling one to blow nose, but there is no discharge.
‖Sensation as if nose was swollen and stiff; must blow out a thick substance, but no discharge; feels as if a heavy weight was hanging from it.
‖Sensation as if nostrils were made of parchment.
‖Burning and beating inside of root of nose; externally heat and distinct throbbing rhythmical with pulse; nose swollen at root and hot without being red; nose seemed thick and full, "spoke through it;" frequently inclined to blow nose on account of sensation of thick substance in it, but nothing was expelled; nose dry; sensation as of a heavy weight hanging from it.
‖Violent shooting pains from root of nose along l. orbital arch to external angle of eye, with dimness of sight like a scale on eye; beginning in morning, it increases till noon, and gives way towards evening θOzæna.
‖‖Pressure and pressive pain in root of nose.
‖Aching pain at root of nose, with acrid discharge.

Digitized by Google

Soreness in nose; yellow scab at lower (outer) surface of septum; dorsum of nose painful to touch.

On blowing nose violent stitches in r. side of nose, as though two loose bones were rubbed against each other.

The nose feels too heavy.

Expired air feels hot in nose.

Tickling, as from a hair, high up in l. nostril.

Frequent sneezing: in morning; on going into open air.

Constant snuffling in warm, damp weather.

Watery secretion, great soreness and tenderness of nose.

Burning, excoriating, watery discharge from r. nostril; whitish scabs in nostril; sensation of pressure at root of nose; eyes watery, < in wind; dizzy on stooping and on going up stairs; easily takes cold. θNasal catarrh.

Watery discharge with redness of nose and putrid smell.

Scanty, acrid, mucous discharge from nose, causing burning of septum.

Coryza fluent, excoriating nose and lip; nostrils sensitive, ulcerated; round ulcer or scabs on septum.

Small perforating ulcer on septum.

Distress and fulness from inflammation in frontal sinuses.

Coryza, with pressure and tightness at root of nose; < evenings and in open air; in morning obstruction and bleeding from r. nostril.

Troublesome coryza and loss of sense of smell and taste; after syphilis and large doses of mercury.

Constant running from eyes and nose, severe pain in frontal sinuses, some fever and great weakness; cough prevents sleeping; always < at night.

Sneezing, redness of Schneiderian membrane and alæ of nose, suffused eyes, lachrymation, rawness of throat and great languor. θHay fever.

Nose stuffed up; especially upper part, with a difficulty of detaching thick mucus which more readily passes by posterior nares.

Formation of plugs in nostrils.

Nose constantly full of thick mucus.

Clinkers in nose; if allowed to remain a few days can be easily detached; but if pulled away too soon, it causes soreness at root of nose, and intolerance to light.

Discharge of large masses of thick, clean mucus from nose; if that ceases he has violent headache; pain from occiput to forehead.

Pinching pain in bridge of nose, > by hard pressing; small, lumpy, nasal discharge; greater portion, which is tough and ropy, passes down from posterior nares into throat, and is hawked up with difficulty and disgust. θNasal catarrh.

Digitized by Google

Ropy, tough discharge, often from posterior nares; offensive or not.

Nasal catarrh, with acrid or thick yellow, ropy discharge from posterior nares.

Constant discharge of thick yellow matter from l. nostril, mostly early in morning, and fetid smell, after any fresh cold; severe pain up muscles of l. side of neck to one small spot in side of head, brought on and aggravated by blowing nose; in l. nostril, half way up, severe smarting pain, extending to malar bone below eye; constipation; tongue white. θChronic inflammation of Schneiderian membrane.

Discharge of tough, green masses, or hard plugs.

On blowing nose, violent sticking in r. side of nose, as though two loose bones rubbed against each other; frequent discharge of greenish colored masses of offensive odor, that, passing through posterior nares, have very disagreeable taste; r. nostril filled with hard masses; small ulcers on external borders of nostrils.

Mucus tough, ropy, green, bloody; in clear masses, and has violent pain from occiput to forehead if discharge ceases.

Nostrils filled with a dry, hard crust, bloody at edges when discharged; itching pains in ethmoid bone; crista nasalis, or septum narium, which irritation often affects periosteum of superior maxilla. θCatarrh.

Discharge of crusts slightly tinged with blood.

Internal ulceration, with thin, watery discharge or collection of elastic plugs, which cause great pain in removal, and leave nose very sore.

Membrane of septum dotted with minute ulcerations.

Ulceration of septum narium; purulent inflammation of whole nasal mucous membrane.

Entire cartilaginous septum destroyed, and whole nasal mucous membrane in a state of purulent inflammation; disease mistaken for syphilis.

Septum narium completely ulcerated away.

Swelling of a highly vascular spongy texture in r. nostril, distending it and apparently growing upwards, finally also traveling downward and protruding externally; l. nostril also became affected in same way; soft parts of alæ nasi involved, but bony structure unaffected; very slight and occasional muco-purulent discharge; fetor; occasionally, severe paroxysms of lancinating pain in affected parts, making him cry out; by the continued growth and pressure of the tumors neighboring soft parts were absorbed, causing much disfigurement; voice hoarse. θMalignant ulceration of nose.

Digitized by Google

‖Syphilitic caries of septum narium.
Small ulcers on edge of r. nostril, violent burning when touched.
‖Spot in r. lachrymal bone is swollen and throbbing; profuse secretion from nostril.
‖Ulceration of frontal sinuses, with violent headache at root of nose, and in frontal prominences, if discharge stops.
‖Nasal polypi, recent or of long standing.
‖Thick, dark red blood from nose; irregular, small, contracted pulse.
‖‖Nasal lupus.

[8] **Upper Face.** Face: pale, yellowish; red, in blotches; flushed; expression anxious.
‖Sensitiveness of bones of upper jaw, beneath orbit.
‖Shooting pain in l. upper maxillary bone, towards ear.
‖Shooting inward in l. malar bone, with pressure; also same across bridge of nose; hot and cold alternately; cough < in morning; sputa greenish yellow, bitter; inclined to cry; shooting sometimes in bone over the eye; cough hurts painful part of cheek.
‖Thick brown scabs, under which yellow matter formed; much itching; eruption extended from root of nose to upper lip. θSyphilitic eruption.
‖Twenty years previously small tubercle appeared on r. side of nose; this gradually melted away and formed an ulcer, which has ever since slowly traveled in furrows, healing behind; there is now present an irregular sulcus one inch and a half long; besides this there are scabs on nose, and scars indicating the sites of former sores; troublesome itching. θLupus.

[9] **Lower Face.** Twanging like wires in l. face and neck, followed by burning sensation, as if losing her reason.
‖Sore on l. cheek about size of large almond; base clear and raw; profuse discharge of clear, watery fluid, very hot and scalding. θHerpes exedens or lupus.
‖Pustules on cheeks, forehead and chin, becoming covered with brownish scab, without oozing of matter; itching after washing.
‖Impetiginous eruption on face; pustules form frequently, discharge a watery pus and leave a brownish scab, and are accompanied with much itching.
‖‖Perspiration on upper lip.
‖Lower lip swelled, chapped.
‖Ulcerations with indurated edges and smarting pain on mucous surface of both lips.
‖Digging in rami of lower jaw.
‖Mumps on right side.
‖Parotids swollen; pains from ears into glands.

Digitized by Google

[10] **Teeth and Gums.** ‖Gum of r. lower jaw very much swollen, of a dirty white color, and extremely tender to touch; teeth on that side quite loose, and will not bear slightest pressure; profuse ptyalism; gums of both sides of mouth unusually sensitive; cannot masticate any food; liquid food causes gums to feel very sore, and tongue rough; tongue furred, dirty brown at sides, in centre red and irritable looking; throat swollen and painful; sour taste in mouth; constant eructation for some time after taking food; after meals aching pain in forehead and occiput, and a feeling of giddiness and faintness; light pain across lower part of chest, extending to between scapulæ, particularly when eating; is very weak and has become thin. θStomacace.

[11] **Taste and Tongue.** Taste: coppery; sweetish; sour; bitter, in morning.

‖Tongue dry, smooth, red, cracked; dry and red.

‖Tongue broad and flat, with raised, almost scollop shaped edges, surface rough and yellowish, dry or moist, while underlying this yellow roughness tongue is very red, fur being thin, and lying on a red ground. θDyspepsia.

‖Tongue coated: yellowish white; thick yellow mucus, edges red and full of small painful ulcers.

‖Thick yellow fur toward base of tongue. θCatarrh of stomach.

‖Papillæ of tongue very long on dorsum; with a brown colored patch.

‖Tongue coated, thick brown, as with thick yellow felt, at the root; papillæ elevated.

‖Syphilitic ulcers on tongue; deep; stinging; yellow base.

‖Deep ulcer on edge of tongue.

‖Stinging and pricking pains in tongue.

‖Sensation of a hair on back part of tongue and velum; not > by eating or drinking.

[12] **Inner Mouth.** ‖‖Dryness in mouth.

‖Dryness of mouth and lips, > by drinking cold water.

‖Sticky saliva in mouth and upper part of throat about uvula.

Saliva: increased, bitter, viscid, frothy, tasting salt.

In forepart of palate single circumscribed spots, of size of barley corn, colored red, as if little ulcers were about to form.

‖Ulcer on roof of mouth, with sloughing. θSyphilis.

‖Ulcers with hard edges, smarting, at mucous surface of lips.

‖Aphthous ulcers, deeply corroding.

‖‖Syphilitic affections of mouth and fauces.

[13] **Throat.** ‖Soft palate slightly reddened; uvula relaxed, with sensation of a plug in throat, not > by swallowing.

Digitized by Google

Sensation as if an acid acrid fluid was running through posterior nares over palate, causing cough.
Œdematous uvula.
Deep, excavated sore, with a reddish areola, and containing a yellow, tenacious matter, at root of uvula; fauces and palate erythematous, bright or dark red, or coppery.
Uvula and tonsils red, swollen and painful, finally becoming ulcerated.
Swollen tonsils with deafness of children.
Tonsils swollen; neck thick outwardly below angle of jaw; Eustachian tubes seem blocked up; is very deaf; could not hear watch, except when very close to ear.
Sharp, shooting pains in l. tonsil, extending toward ear > by swallowing; suppuration of tonsils.
Indolent enlargement of tonsils, where there is little perceptible inflammation; patient flabby; leuco-phlegmatic habit of body; foul tongue; thickening of nasal mucous membrane, and disposition to scabby nostrils.
Subacute inflammation of tonsils, with little fever, but tendency to formation of small ulcers on tonsils and velum.
Swelling of amygdalæ with dirty redness, violent pain on swallowing; no suppuration; very little fever.
Ulcers on tonsils and throat, surface of which seemed covered with an ashy slough; surrounding mucous membrane dark, livid and swollen.
Congestion of all vessels, ulcers on tonsils, pimples on uvula, uvula swollen and red.
Sensation of hair in fauces.
Dryness in mouth and throat.
Dryness and burning in throat, morning; often coincident with inability to breathe through nose.
Throat pains more when putting tongue out.
Much tenacious mucus, sometimes thick, gelatinous, hawked in morning.
Mucus so viscid that it draws out like a long thread from gullet and throat; continually a troublesome retching and cough.
Very sore throat, pain much < by swallowing; throat full of tough mucus which she could neither swallow nor hawk up; pains < putting tongue out; pain in side of head; shooting pain in l. ear; l. side of neck painful to touch and much swollen; tonsils, especially l., much swollen and inflamed.
Burning in pharynx, extending to stomach; solids cause pain when swallowed, and leave a sensation as of something remaining there.
Posterior wall of pharynx dark red, glossy, puffed, show-

Digitized by Google

ing ramifications of pale red vessels; to l. of middle a small crack, exuding blood.

Two ulcers in back part of throat, over one half inch in diameter, deep, filled with cheesy looking matter, edges elevated, with well defined borders; also one ulcer which had eaten through velum palati, and from which continually oozed matter like that of the others; pale; emaciated; loss of appetite; very weak; "miserable all over." θUlcerated sore throat.

Follicular enlargement of mucous membrane of pharynx, with chronic coryza, that forms hardened yellow pieces of mucus.

Ulcers in fauces, also in pharynx, discharging cheesy lumps of offensive smell.

Deep-eating ulcers in fauces, often syphilitic.

Chronic ulcer of pharynx.

Tonsils red, ulcerated; uvula nearly destroyed, only a very small portion remaining; large ulcer on gums gradually increasing in size, with dirty edges and foul discharge; destruction of nasal septum, foul smelling ozæna, thick, puslike discharge from nose; upon drinking water it escapes through nose; glands of neck and lower jaw enlarged; severe pain on swallowing; voice hoarse, nasal; excruciating pains in small of back. θSyphilis.

Ulceration of fauces to a great extent, with much redness of tissue surrounding ulcerated parts; at one part ulcer has perforated velum palati, forming a clean oval hole; much pain on swallowing; cough and thick, blackish mucus in morning; frequent tickling cough; swelling and feeling of fulness in nose and sensation of a fetid smell. θSyphilis.

Syphilitic mercurial sore throat, full of pockets.

Increased redness of sound places of mucous membrane of mouth and fauces, with heightened sensitiveness. θDiphtheritis.

Pharynx red and swollen; thick, tenacious, ashy grey membrane, tough and glutinous, on tonsils and between them; thick, gurgling sound, with a flapping noise as of a piece of loose membrane, heard over larynx; face and especially forehead, of a bluish tinge; nose pinched; mouth drawn; low fever; unable to swallow. θDiphtheria.

Entire throat much swollen; thick, tenacious membrane covering both tonsils and extending down pharynx, and also to nostrils and eyes; fetid discharge from nose; shivering chills followed by dry heat; prostration extreme. θDiphtheria.

Digitized by Google

Diphtheria; pseudo-membranous deposit, firm, pearly, fibrinous, prone to extend downwards to larynx and trachea; bladder-like appearance of uvula, much swelling, but little redness.

Entire pharynx coated with tenacious, greyish, pseudo-membrane of offensive odor; harsh and stridulous breathing; voice partially suppressed; harsh cough. θDiphtheria.

During course of diphtheria, croupy cough; epiglottis covered on apex and sides with membrane; breathing labored; could not lie down; cough hard, expectoration consisting of long, tenacious mucus; paroxysms of suffocation at night; great drowsiness. θDiphtheritic croup.

Patch on r. tonsil, croupy cough, bad odor from mouth, no appetite; temperature 101°; pulse 100. θDiphtheritic croup. (*Kali bich.* during day and *Spongia* at night.)

Shrill, croupy cough, occasionally whistling and wheezing; rough, hoarse sound of voice with difficult breathing, as though lungs were stuffed with cotton; throat purple, with numerous isolated patches of greenish yellow exudation all over fauces; tongue, cheeks, gums smelling like decayed meat; pains extending to r. ear, when swallowing: expectoration frequently streaked with blood; exudation tough and firmly adhering, spreading upwards into nostrils and down into larynx; tendency to diphtheritic deposits upon remote mucous membranes; great weakness; cachectic look; swollen glands. θDiphtheria.

Almost unconscious condition; when aroused from it or when awaking from apparent sleep, complains most, or feels worse; awakes often with desire to cough, or to hawk up detached portions of diphtheritic deposit; while making this attempt throws off tough, ropy, yellow, discolored mucus; very great fetor; deposit covers throat, uvula, tonsils and even roof of mouth, and is of a yellow greyish color; becomes hoarse; tongue either quite red, or covered with a thick, yellow substance; the (r.) parotid gland is much smaller and, upon deglutition, pain shoots up to ear and down neck of affected side. θDiphtheria.

Diphtheria: pain in ear extending to swollen parotid glands and to head; tongue coated yellow, especially at root; pricking in tonsils and scraping with stitches in throat; burning in throat; after abuse of Iod. of Mercury.

Violent stitches in l. ear extending into roof of mouth, into corresponding side of head and same side of neck,

Digitized by Google

which was painful to touch and glands swollen. θDiphtheria.

‖Diphtheria on a wounded palate; much prostration; exudation looked like mould on bread; discharge from nostrils.

‖Extensive, well organized deposit, exciting much cough.

‖Corresponds to form of disease in which vegetable parasite found in diphtheritic deposit resembles the spirobacteria.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Appetite lost; thirst increased; foul tongue; languor.

‖Longing for beer; for acid drinks, which increases.

‖Dislike to meat.

[15] **Eating and Drinking.** ‖Food lies like a load; sensation after a full meal as if digestion was suspended. θDyspepsia.

‖Pressure and heaviness in stomach, immediately after eating. θDyspepsia.

‖After dinner external stitches in epigastrium and breast into nipple (male), and in r. hypochondrium.

‖Secondary bad effects from malt liquors; especially from lager beer.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Fetid eructations.

‖‖Eructations of air, relieving an uneasiness of stomach, like from pent up wind at great curvature.

‖Sudden nausea.

‖Nausea: feeling of heat over body, with giddiness, rush of blood to head; < on moving about, in morning, at sight of food, after meals, and after stool; excited by drinking and smoking; > by eating and in open air.

Nausea, with burning pain in anus, and erections lasting half an hour.

‖Giddiness, followed by vomiting of an acid, white, mucous fluid, with pressure and burning in stomach. θUlcer of stomach.

‖Almost immediately after eating, vomits all her food, sour; appetite good; tongue red in middle; bitter taste; constipation.

‖Vomiting: sour, undigested; of bile, bitter; pinkish, glairy fluid; of mucus and blood; of blood, with cold sweat on hands, face hot; of yellow, purulent mucus.

‖‖Nausea and vomiting of drunkards.

[17] **Scrobiculum and Stomach.** ‖Swelling of stomach (evening), with fulness and pressure; cannot bear tight clothing; tongue yellow.

‖Pressure and heaviness in stomach; immediately after eating.

‖Food lies on stomach like a load; digestion suspended.

Digitized by Google

Awakens with a start; heat in pit of stomach and spitting of blood; 2 A.M.

Awoke with uneasiness, soreness and tenderness, especially in a small spot towards l. of ensiform cartilage; headache in a small spot.

Feeling of coldness in stomach and bowels.

Pains and uneasiness in stomach, alternate with pains in limbs.

Gastric pains > after eating and rheumatic pains reappear; when gastric symptoms reach to any height rheumatic pains subside.

Organic cardialgia; eructations; nausea like sea sickness; sensation of fulness, heaviness; malaise after a meal; chilliness; inflation; gnawing, burning, constricting pain in stomach and hypochondria, < in morning and during motion, > by eating.

After food, choking, as if there was something hard all down œsophagus, then a hiccup, and a jumping and shaking as if stomach jerked up, not painful; then a curious feeling as of something eating in bowels; gulping up of food unchanged and not sour, with pain across middle of back; constipation. θGastric affections.

Constant nausea and at times vomiting; choking feeling, like a hair in back of throat, comes suddenly and causes sickness; constant tearing pain at epigastrium; smarting between scapulæ; bad taste; tongue white; vertigo on rising. θGastric disorder.

Want of appetite; fulness at chest, much flatulence; taste of rotten eggs coming into mouth, with constant nausea; great dislike to fat meat; tongue reddish and rough; sharp, shooting, stabbing pains all over head, < afternoon and evening; constipation; heat of whole body when walking; eyes weak; pain in eyeballs; drowsiness and languor in daytime, sleeplessness at night; frequently sharp, shooting, aching pains in sides and back.

Nausea on moving about or taking a short walk; frequent sensation of nausea rising from stomach to pit of throat; paleness of face; flow of water in mouth; coppery taste; faintness and general coldness, and desire to lie down; frequent pain at epigastrium, pricking through to back, lasting about half an hour; thirst; brown tongue in morning; bowels very constipated; abdomen distended; constant hunger and craving; milk disagrees; almost daily headache, shooting from back to front; pains in both hypochondria on walking; excessive languor and indisposition to bodily and mental exertion; sleep unrefreshing. θAffection of stomach.

Pain in r. hypochondriac region, towards epigastrium, <

Digitized by Google

by touch and walking; vomiting of greenish, watery mucus in morning; thick yellow fur on tongue; no appetite. θGastric derangement.

‖Appetite poor, but must eat often; as otherwise she felt faint; nausea, > after a meal; heartburn; not much flatulence; risings after food; metallic taste in mouth; pain or weight at stomach immediately after taking food, especially after meat; headache and giddiness; constipation; urine high colored; abdomen bloated; tongue too red and dry, but with a yellowish or brownish fur on it; arches of palate red; catamenia irregular and excessive; great weakness; rheumatism even when well. θDyspepsia.

‖Bad effects of overindulgence in beer or other malt liquors; great weight in pit of stomach; flatulency; loss of appetite; oppression of food immediately after eating; nausea, confused feeling, especially in morning, and vomiting of mucus; bad humor.

‖Dines at 6 P.M., and in about three hours has waterbrash, raises phlegm continually, vomits whatever food remains in stomach, and rarely sleeps before midnight, as phlegm chokes him; cough; constipation, stools hard and passed with some exertion. θAffection of stomach.

‖Vomiting of food, sour, with nausea, coming on an hour after eating; pain at pit of stomach, like a stone; tongue white and flabby; bowels costive; meat, tea or coffee vomited immediately. θDyspepsia.

‖Stomach complaint when there is pain in region of liver and sodden looking tongue, without much acidity or other symptoms, except general discomfort and sometimes white stools.

‖Gastric catarrh with acid vomiting; sudden dyspepsia while eating.

‖Dyspepsia and vomiting from chronic gastric catarrh; tongue coated thick, yellowish.

‖Chronic catarrh of stomach.

‖Ulceration of stomach and duodenum.

‖Round ulcer of stomach.

[18] **Hypochondria.** ‖Dull pain or stitches in r. hypochondrium, especially when limited to a small spot; clay colored stools; metallic taste; confusion in head.

‖In evening is seized with a violent aching continued pain, drawing her downwards, in r. hypochondrium, stretching from epigastrium round to shoulder; must undress immediately, though not perceptibly swelled; great oppression of breathing; pain lasts several hours and subsides gradually, without any evacuation or passing of wind; at times it is accompanied with

Digitized by Google

nausea and some little vomiting; tongue flat and furred; bowels regular; complexion not yellow.

‖Pain in a small spot in r. hypochondrium; pretty constant, but < to a sharp stitch on sudden motion after sitting; appetite good and health not much affected.

‖Pain in l. hypochondrium, under ribs, unaffected by eating or pressure, or respiration, < by a chill, or great bodily exertion.

‖Constant dull aching in r. hypochondriac region.

‖Spasmodic attacks resembling those accompanying gall stones.

‖Dull, heavy pressure or stitches in region of liver.

‖Stitches in region of spleen, extending into lumbar region, < from motion or pressure.

[19] **Abdomen.** ‖Tympanitis; abdomen feels bloated, followed by eructations.

‖‖Sensitiveness of abdomen to least pressure.

‖Stitches through abdomen, extending to spinal column.

‖Cutting, as from knives, soon after eating; colic, alternating with cutting at navel, during night.

‖Cutting pains in lower intestines, and rumbling of gas in upper.

‖‖Dull, colicky pain round navel, coming on after any exposure to cold wind.

‖Almost immediately after eating complains of coldness and nausea, looks pale, and has pain in abdomen; then vomiting of food, unchanged, sometimes sour or tinged with bile; vomiting gives relief; during rest of day languid, drowsy, and complains of cold, though body is hot; frequent colicky pains in abdomen; tongue white, furred; thirst; bowels moved several times a day; stools pale and liquid. θGastro-intestinal irritation.

‖Attacks of periodical spasmodic constriction of intestines, with nausea, followed by a papescent stool and burning in anus, with tenesmus.

‖Pain as in enteritis; vomits in rapid succession bilious, bloody matter; blood bright and clotted; listless, indifferent, languid mood. θIntussusception.

‖Gastro-intestinal inflammation, cramps here and there, < in calves and inner parts of thighs.

‖‖Chronic ulceration of mucous membrane attended with vomiting of ingesta, hectic and emaciation.

[20] **Stool and Rectum.** ‖Watery, gushing diarrhœa in morning; awakes from urgent desire; followed by violent tenesmus, which prevents her rising; later, burning in abdomen, nausea and violent straining to vomit.

‖‖Diarrhœic stool, of brown, frothy water, with excessively painful pressure, urging and tenesmus in anus.

Digitized by Google

Stools frequent, clay colored, thin, with lumps, blood streaks, much straining; little appetite, no thirst, no fever; insular large patches on tongue.

Clay colored stools. θChronic diarrhœa.

Chronic morning diarrhœa; cough; early in morning, pains darting through r. lung, from below mamma to back below r. scapula; very acute pains darting from behind l. hip down on outside of l. thigh, and sometimes to calf of leg; severe acute pains about l. eye and l. side of forehead.

Chronic whitish diarrhœa with hepatic derangement of children.

Diarrhœa < from lager beer.

Stools: blackish, watery; yellowish, watery; clay colored, watery and lumpy; jellylike; involuntary and often painless and odorless; bloody and extremely painful.

Dysentery: brownish, frothy, watery, or frequent bloody evacuations, gnawing about navel, tenesmus; tongue smooth, red, cracked; after a burn.

Diarrhœa, or dysentery after rheumatism.

Periodical dysentery every year; early part of Summer.

After *Canthar.* has removed stools like scrapings, jellylike stools will sometimes appear; *Kali bich.* will then complete cure. θDysentery.

Before stool: abdominal pains; erections.

During stool: painful urging; burning and straining in anus; succus prostaticus; gnawing about navel; pain in region of spleen; metallic taste in mouth; offensive breath; confusion in head.

After stool: remission of complaints; tenesmus; burning soreness or drawing in anus with nausea.

Papescent evacuations, with much rumbling in intestines.

Constipation, debility, coated tongue, headache, cold extremities; stools dry, knotty.

Great constipation; stools too large in size, and very painful to expel; insular large patches on tongue.

Stool in one mass, of excessive hardness.

Hard, dry, knotty, difficult stools.

Hard evacuation, followed by burning and pressure in anus.

Scanty, lumpy stool, followed by burning in anus.

Habitual constipation; stools scanty, knotty, followed by painful retraction of anus.

Stools dry, with burning at anus.

Tendency to constipation, especially when there exists an aggravation of general symptoms in consequence of its presence.

Periodic constipation every three or six months.

Digitized by Google

During an emission of wind per anum, sweat all over body, but especially on face, from which it runs in streams.

‖Falling of rectum.

Pressing and straining in anus, with tenesmus.

‖Burning in anus after dry and knotty stool.

‖Sensation of plug in anus, can scarcely sit down.

‖Soreness at anus, making it very painful to walk.

‖Fulness in hemorrhoidal vessels.

‖Painful dry piles, protruding after stool.

‖Hemorrhage from bowels; strength much impaired; lips completely blanched; palpitation on slightest exertion; tenderness over cæcum; stools sometimes natural, sometimes mucus streaked with blood, sometimes almost pure blood; somewhat distended abdomen; stools never caused pain when they were solid, but when there was mucus or blood there was some tenesmus.

[21] **Urinary Organs.** ‖Pain across back, with red urine.

‖Shooting in renal region, small pulse, prostration; suppressed urine.

Constant aching in region of kidneys, < in r. side, where pain was frequently shooting through to bowels; soreness at stomach and acidity; urine high colored and scanty.

‖Continuous desire to urinate during day.

‖Frequent discharge of watery urine, of strong smell, awaking him at night.

Suppression of urine, with much pain in renal region.

‖Suppression of urine following cholera.

‖‖Scanty, reddish urine.

‖Scanty, high colored urine, with copious, whitish sediment and pain in back.

‖Scanty urine, with a white film and whitish deposit; mucous sediment.

‖Urine alkaline and ropy.

‖Painful drawing from perineum into urethra.

‖Before urination: pain in coccyx, extending into urethra.

‖During urination: heat in urethra; burning in glandular part of urethra, continuing long after; burning in fossa navicularis or in bulbus of urethra; backache.

‖After urination: burning in back part of urethra, with sensation as if one drop had remained behind, with unsuccessful effort to void it; stitches in urethra.

[22] **Male Sexual Organs.** ‖‖Sexual desire absent, in fleshy people.

‖Constrictive pain at root of penis; morning on awaking.

‖Itching in hairy parts, skin inflames, small pustules form, of size of a pin's head.

Digitized by Google

‖Chancres ulcerating deeply.
‖Indurated chancre.
‖Pricking and itching at glans penis; ulcers.
‖Stitches in prostate when walking, must stand still; prostatic fluid escapes at stool. θChronic prostatitis.
‖Gleet, with stringy or jellylike, profuse discharge.

[23] **Female Sexual Organs.** ‖Prolapsus uteri, seemingly from hot weather.
‖Subinvolution of uterus.
‖Membranous dysmenorrhœa.
‖Menses: too soon, with vertigo, headache, nausea and feverishness; obstinate suppression of urine or red urine.
‖Soreness and rawness in vagina.
‖Swelling of genitals.
‖Itching, burning and excitement about vulva; genuine pruritus.
‖Leucorrhœa yellow, ropy; pain and weakness across small of back, and dull, heavy pains in hypogastrium.
‖Leucorrhœa that can be drawn out in long strings; yellow, ropy, stiffening the linen.
‖Accumulation of thick, tenacious mucus.
‖Flushes in face, during climacteric period.

[24] **Pregnancy. Parturition. Lactation.** Sudden nausea; yellow coated tongue; inward coldness and heat of face; constipation; violent abdominal pains; faintness. θVomiting of pregnancy.
‖Long and continued vomiting during pregnancy; can retain no food in stomach; great emaciation and debility.
‖Milk, as it flows from breast, has appearance of being composed of stringy masses and water.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Rough, hoarse or nasal voice.
‖Hoarseness and accumulation of mucus in larynx, in morning.
‖Hoarseness in evening.
‖Chronic hoarseness with laryngitis.
‖Throat dry and rough, with great hoarseness or aphonia.
‖Tickling in throat, causes cough.
‖Accumulation of tough mucus in larynx, causes hawking.
‖Hawks copious, thick blue mucus, in morning.
‖Sensation as from ulceration in larynx.
‖Frequent attacks of hoarseness, cough and difficulty of swallowing; sore throat and sensation of a lump, partially > by swallowing; hoarseness and loss of voice; cough with blackish sputa, most in morning, with pain at sternum "like pins and needles."
‖Pain in throat, and feeling of swelling in larynx; hoarse, husky voice; cough with sputa difficult to detach;

Digitized by Google

cough and dyspnœa in morning; pain across epigastrium and abdomen; constipation. θAffection of larynx.

After catching cold, sensation of dryness in throat sometimes becoming a burning, which extended to larynx; voice rough, hoarse; at times, short, dry cough; greyish white coating on posterior wall of pharynx; debility and lassitude. θLaryngitis.

Oppression of chest; without cough, expectoration of blood mixed with phlegm, brought on by any exertion, or by reading or talking loud or laughing; < morning; cannot bear clothes tight over chest or throat, otherwise a sensation of faintness comes on; sore, smarting feeling in l. side of throat, somewhat > by swallowing; feeling of throat as if lined with wash leather; > dry, warm air; < in damp weather, whether hot or cold. θAffection of fauces and larynx.

Catarrhal laryngitis and catarrhal aphonia; < in evening and when weather is going to change, and after long talking.

Attacks of dyspnœa, and more or less difficulty in taking an inspiration at all times; tough, offensive expectoration; constant hoarseness; appetite poor; emaciation. θChronic inflammation of larynx and trachea.

Pharynx bluish with varicose veins; vocal cords and posterior parts of larynx red and puffy and covered with greyish mucus; sensation of dryness; tickling in larynx when speaking; voice rough and hollow; cough with scanty, stringy expectoration, provoked by speaking and laughing; chronic laryngitis.

Chronic laryngitis, with congestion; swelling of tissues and increased secretion of a glutinous fluid; < towards morning, when tough mucus nearly strangles him. θFollicular laryngitis.

Gradual and insidious onset; at first only slight difficulty of breathing, when mouth is closed; as disease progresses there is fever, increased difficulty of breathing, hoarse voice, constant cough at intervals; cough hoarse, dry, barking, metallic; deglutition painful; tonsils and larnyx red, swollen, covered with false membrane, difficult to detach, with expectoration of tough, stringy mucus; finally breathing performed only by abdominal muscles, and those of neck and shoulders; head bent backwards, breath offensive; diminished temperature, prostration, stupor and death from asphyxia, if not relieved. θMembranous croup.

Croupy cough; labored and quick breathing; epiglottis slightly covered with a pale, pearly coating; cough dry and severe; pain and soreness in larynx; expectoration gelatinous. θMembranous croup.

Digitized by Google

Fever, fluent coryza, croupy cough, < in morning; membrane throughout fauces, tending to spread downwards to larynx; epiglottis faintly covered; coughed up tough, chunky mucus. θMembranous croup.

On fourth day of slight attack of diphtheria, sudden croupy cough; breathing labored; could not lie down; cough hard; expectoration of long, tenacious mucus; very drowsy; epiglottis covered on apex and sides with membrane. θDiphtheritic croup.

Croupy cough and difficult breathing, with wheezing; expectoration of yellow, somewhat stringy mucus, which had to be removed with finger; tonsils and fauces lined with a white, pearly coating, extending down to larynx; < on r. side. θMembranous croup.

After riding against a cold west wind, cold in head and throat, followed by croupy cough; increased dryness of throat at night, breathing could be heard distinctly through house; cough in paroxysms, fearfully increased after sleep. θCroup.

Membranous or diphtheritic croup invading larynx, trachea and even bronchi; voice hoarse, uncertain, cough hoarse, metallic; deglutition painful, tonsils red, swollen, or covered with false membrane difficult to detach, with expectoration of tough, stringy mucus; coughs up casts of elastic, fibrinous nature; loud mucous râles; wheezing rattling in sleep; insidious approach; fat, chubby, light haired children.

Early, formative stage of croup;< 2 to 3 A.M.; tough mucus strangles him.

Sensation of lump in upper part of trachea, and of hairs across base of tongue, which neither hawking, swallowing nor eating relieves.

Catarrh of fauces and trachea; great accumulation of ropy mucus; hoarseness; cough; suppressed voice; burning of mucous membrane, extending up into nostrils; tonsils enlarged, causing dulness of hearing; ulceration of pharynx and larynx; oppressed breathing.

Burning sensation in trachea and bronchi.

Sensation of dryness in bronchi in morning.

Violent ringing cough; difficult, yellowish white expectoration; burning, raw pain down throat and along sternum; dyspnœa and wheezing, must sit partially up in bed; pulse quick and small; no sleep throughout whole night. θAcute bronchial catarrh.

Constant cough, keeping him awake whole night, and causing much distress from pain in chest, which he described as a tearing and burning; constant running from nose; pain in frontal sinuses; general feeling of lassitude and languor. θCatarrh of chest.

Digitized by Google

Frequent severe paroxysms of cough, loose, wheezing sound, no sputa; perspiration < at night; loud wheezing and rattling; dyspnœa on lying down. θBronchial catarrh.

Violent paroxysms of cough, with little expectoration, and that of stringy mucus, leaving patient excessively exhausted, sometimes attended with dry retching. θBronchitis.

Acute capillary bronchitis.

Every two or three weeks, after any slight exposure, is seized with chilliness and languor, with flushed face, headache and hot hands for half a day; then heat of whole body; disturbed sleep and screaming at night, followed by paroxysms of coughing, with vomiting of tough mucus like white of egg and yellow, acid fluid; then for several days cough; want of appetite; foul tongue; constipation. θBronchial attacks after whooping cough.

Common bronchitis, vacillating between acute and torpid inveterate character of disease, and especially if attended by periosteal or rheumatic pains of chronic character.

Violent, tight, dry cough, < during day, and always excited by any exposure to smoke; wheezing at night in bed. θChronic bronchitis.

Rattling in chest, dyspnœa on lying down. θChronic bronchitis.

Chronic bronchitis for many months; cough slight, but much viscid expectoration, in grey lumps; slight sore throat; pain at epigastrium; flatulence.

After catching cold, one year ago, cough, with great oppression of chest and swelling of veins of neck; sputa in tough, black lumps; cough < after eating or drinking; dyspnœa on exertion. θChronic bronchitis.

Stringy expectoration; sensation of choking on lying down. θChronic bronchitis.

Chronic bronchitis caused by inhalation of vapor of arsenic.

Subacute and chronic inflammatory processes in larynx or bronchial tubes, with congestion and swelling of tubes and increased secretion of glutinous mucus, which veils and alters voice.

Bronchial dilatation with fetid breath and expectoration.

[28] **Respiration.** Oppressed breathing, awakens at 2 A.M.; palpitation; orthopnœa, sits bent forward; caused by mucus, croup, croupous diphtheria, chronic bronchitis, membranous bronchitis, or from disturbed circulation; cold sensation and tightness about heart, lower portions of lungs oppressed.

Digitized by Google

Pressure and heaviness on chest, as from a weight; wakens with this sensation at night and is relieved after rising.
Like a heavy load on chest when awaking from sleep.
‖Wheezing, panting on awaking; then cough which forces him to sit up, bent forward.
‖Wheezing at night after whooping cough.
‖Dyspnœa.
‖Slight dyspnœa, as if mucous membrane of bronchi was thickened, on rising in morning.
‖Tightness at bifurcation of bronchi.
‖Sensation of choking on lying down.

27 **Cough.** ‖Cough excited by: tickling in larynx, or at bronchial bifurcation; by oppression at epigastrium, or accumulation of mucus in larynx.
‖Dry, short, continual tickling cough and pain in larynx, as if from an ulcer.
‖Cough accompanied by inward soreness in chest, especially in one point, as if an ulcer was there.
‖‖Cough, with pain, from mid-sternum through to back; severe stitching, or weight and soreness in chest.
‖Dry cough, with stitches in chest, pain in loins, vertigo, dyspnœa, shootings in chest.
‖During cough: bloody taste in mouth; nausea; ulcerative pain in throat; pressure in sternum and larynx, extending into os hyoides; burning pain in sternum, extending into shoulders; heaviness, sensitiveness and pains in chest; palpitation with rattling in throat; pains in sides and loins > by pressure.
‖Loud, harsh cough, in single coughs, at different times, for an hour or two, and then not for some hours, most in morning on waking.
‖‖Cough in morning on awakening, with dyspnœa, > by lying down.
‖‖Cough, especially in morning, with expectoration of white mucus, "tough as pitch," can be drawn out into strings.
‖Constant hacking cough, sometimes with expectoration of blood; nocturnal perspiration; night disturbed by cough; tickling irritation in larynx; no appetite; pale; phthisical habitus.
‖Continuing cough, with expectoration of blood; irritation to cough coming from larynx; sweating in sleep nights.
Cough <: undressing; morning on awaking; after eating; deep inspiration; > after getting warm in bed.
‖Wheezing and panting, then violent cough, with retching and difficult expectoration of mucus, so viscid that it can be drawn in strings down to feet.
‖Cough caused by eating; dry cough after dinner.

Digitized by Google

‖Cough with smooth or follicular inflammatory redness of pharynx and fauces.

‖Dyspnœa and dry cough for six weeks, followed by expectoration of dark grey mucus of consistence of white of egg, with soreness and oppression of chest.

‖Cough resonant, whistling, with nausea and expectoration of thick mucus; whistling, loud rattling in chest.

‖Choking cough, with tough, stringy mucus, which sticks to throat, mouth and lips.

‖‖Cough hoarse, metallic, in croup (membranous or diphtheritic), with expectoration of tough mucus or fibro-elastic casts.

‖Stuffing cough with pain at chest, and expectoration of yellowish, heavy, tough matter.

‖Cough with expectoration of yellowish green tough matter.

‖Cough with thick, heavy expectoration, bluish lumps of mucus.

‖Cough with transparent, dirty, slate colored sputa.

‖After whooping cough, six months previously, cough still continued, loose and rattling and tickling in fits at night; wheezing during day without cough; occasional pituitous vomiting.

‖Whooping cough; mucus so viscid that it stretched in long strings from mouth to ground.

‖‖Expectoration is very glutinous and sticky; adhering to fauces, teeth, tongue and lips, finally leaving mouth in long, stringy and very tenacious mass.

‖Expectoration with traces of blood.

[28] **Inner Chest and Lungs.** ‖Pains from back to sternum; or, from mid-sternum darting to between shoulders.

‖Itching behind sternum, causing violent, racking, paroxysmal cough.

‖Face slightly flushed; nasal mucous membrane irritable, either dry or secretes copiously a yellow mucus; eyes now healthy, often catarrh in corners; teeth all destroyed (mercurial sequela); tongue clear at tip, which is covered with red points, root thickly coated yellow; great dryness of mouth, alternating with salivation; gums livid; fauces and pharynx covered with red granulations, interlaced with white streaks and reaching down to œsophagus; constant irritation, as from a foreign body in throat, sometimes severe burning and scratching; taste sour, often metallic; great thirst; stomach bloated, with sensitiveness, fulness and pressure; vomits sometimes; region of rectum sensitive to pressure; urine very acid; stool hard and defecation difficult; dysmenorrhœa; dull percussion sound over r. upper anterior and posterior part of chest; weak, rattling murmur in apex of

Digitized by Google

r. lung; same symptoms on l. side, only weaker; cough mostly dry, but troublesome, especially in morning after dressing and late in evening; thick, tough, white sputa; heat and titillation in larynx before coughing, causing restlessness and impatience. θConsumption.

❙Cough, with profuse, yellow, stringy expectoration, and much sweating; pain, as of ulceration of larynx, causing cough at almost every inspiration; feeling of stiffness in larynx. θPhthisis pulmonalis.

❙❙Scirrhous degeneration of both lungs, expectoration so viscid that it could be drawn a yard from mouth; cough very violent, preventing sleep and rest.

❙Hæmoptysis; pneumonia.

[29] **Heart, Pulse and Circulation.** ❙Cold sensation about heart; tightness of chest; dyspnœa.

❙Pressure on heart after eating.

❙Pricking pain in region of heart.

❙Palpitation, dyspnœa, accelerated pulse, heat; awakens suddenly with a start, 2 A.M.

❙Hypertrophy of heart; insufficiency of aortic valves.

❙Pulse: irregular, small, contracted, with nosebleed; accelerated, often soft, weak, even fluttering.

❙Pulsation felt in all the arteries.

[30] **Outer Chest.** Dull pain in r. side over a circumscribed spot, < on inspiration.

[31] **Neck and Back.** ❙Stiffness of nape of neck on bending head.

Brown spots on throat like freckles.

❙Stabbing from third cervical to fifth dorsal vertebra, striking forward through chest to sternum, < on motion; inability to straighten spine after stooping.

❙Pain in back striking through to sternum with cough and expectoration of tough, black mucus.

❙❙Pain in small of back.

❙Sharp, shooting pains, first l. then r. renal region, extending down thighs, < on motion.

❙❙Sharp, stinging pain in region of kidneys.

❙Aching in back and down l. side into hip.

❙❙Pain: as from a knife, through loins; cannot walk.

❙❙Pains across loins with coldness of extremities.

❙Rheumatic pains in back, while stooping felt as if something cracked across sacrum, cannot stoop or move for pain, which remains constant even while at rest, but < on least movement of trunk or legs.

❙A violent aching pain, "like a gathering," in a small spot in sacrum, a steady, throbbing pain, most felt at night and hinders sleep; > in day, when up and walking about, but unable to lift anything.

Digitized by Google

Pain in sacrum; cannot straighten himself.
Cutting pain in outer l. side of sacrum, shooting up and down.
Pains in os coccygis, < from walking, or touch, and after rising after long sitting.
Pain in coccyx, while sitting.

Upper Limbs. Rheumatic pains in both shoulders, < at night.
Stitches at lower angle of l. shoulder blade.
Stiffness of shoulder joint.
Painful stiffness of r. arm.
Sensation of lameness in r. arm, as if it had gone to sleep.
Burning pain in middle of forearm, extending to wrist.
Swelling of arm, followed by a boil-like elevation, which turned into a large ulcer with overhanging edges.
Pustules on arms size of split pea, with a hair in centre.
Itching of forearms and hands, then intolerable pain and formation of numerous ulcers, from which above a dozen nearly solid masses of matter fell on striking the arm firmly, leaving ulcers clean, dry cavities, which slowly filled up and healed.
Rheumatic pains in elbows and wrist joints; stinging in l. elbow.
Papular eruption on forearms, lasting a few days, and frequently recurring.
Redness, swelling and itching in a spot on wrist; then great pain; after some time matter formed and broke the skin, and continued to ooze out for two or three months, then healed, leaving a cicatrix depressed as if scooped out.
Great weakness of hands.
Spasmodic contraction of hands.
Psoriasis diffusa of hands, after some time degenerating into impetigo.
Hands completely covered with depressed cicatrices which look as if they had been punched out with a wadding cutter.
Hands become covered with deep, stinging cicatrices.
Bones of hands as if bruised, when pressed; ulcers on fingers, with caries.
Rheumatic pains in finger joints.
After redness and swelling of finger, with some throbbing pain, an ulcer formed over joint of forefinger, with white overhanging edges and dark, gangrenous central points, skin and cellular tissue movable as if separated from their attachments.
Small pustules on roots of nails, spreading over hands to wrists; arm became red and axillary glands suppurated;

Google

small pustules on hands secreted a watery fluid when broken; if not touched fluid became thickened to a yellow, tough mass.

Painful ulcer under thumb nail.

[35] **Lower Limbs.** ‖Rheumatic pains in hip joints and knees, on walking or moving, also with restlessness, in diphtheria.

‖Pain in course of l. sciatic nerve, from behind great trochanter to calf; > in motion.

Stitches in r. side of chest and in l. sciatic nerve.

Sciatica: in males; l. side, pain running from hip to knee; wandering, erratic pains, sharp pain in knee and hip joint, aching in leg, with trembling; pains come on quickly and subside soon; jerking aching pain in hip; pain > by walking and flexing leg; < in hot weather, by standing, sitting, or lying in bed; pressure causes pain to shoot along entire length of nerve. θSciatica.

‖Severe pains in hip and down outside of thigh; < in afternoon and evening, > in bed; < on any change in weather. θSciatica.

‖Pain aggravated by standing, sitting, or lying in bed; > by walking and flexing leg; pressure caused pain to shoot along entire length of nerve; l. leg affected. θSciatica.

‖Sciatica from getting her clothes damp; pain in l. hip, > from motion.

‖Pain in r. hip, extending to knee.

‖Heaviness of legs; aching and weakness in calves on walking or going up stairs.

Eruption on legs and thighs of reddish, hard knots, from size of a pin's head to that of a split pea, with a depressed, dark scurf in centre, with an inflamed base.

‖Violent pains in shin bones and burning, extending up legs; aching and shooting in front of thighs and knees; < at night, without swelling.

‖Pain in tendons of muscles of calf, as if stretched, causing lameness.

‖Tearing in r. tibia.

‖Tearing pains in tibia, from tertiary syphilis.

Pain in middle of tibia.

‖Periostitis from a blow on shin, leaving an ulcer on spot about size of a shilling, skin and cellular tissue around it much inflamed; great pain in leg when he stands; violent pain shooting up to knee; stiffness of flexor muscles of knee.

‖Red, painful, doughy swelling on r. shin; tender to touch and after standing, but especially painful at night, when gnawing and scraping pains keep her awake; leucorrhœa and itching of vulva. θSyphilitic periostitis.

Digitized by Google

‖A number of small, irregular ulcers on leg, which leave a depressed cicatrix on healing. θSyphilis.
Small pimples on legs, which spread into large scarlet blotches, discharging yellow matter.
Sensation of dislocation in l. ankle.
‖Violent burning heat around ankle and heel, deep seated, and hindering sleep; three small, irregular, shallow ulcers; costive bowels; fluttering at heart.
‖Soreness in heels when walking.
Blister, full of serum, on sole of r. foot.
‖Ulcers on previously inflamed feet.

[34] **Limbs in General.** ‖Shooting pricking pains, < in morning.
‖Frequent and severe pain in limbs, especially arms, attended with cramping of hands; when free from pain in limbs had pain and uneasiness in stomach and pain in malar bones.
‖Periodical, wandering pains, also along bones; generally without localized inflammatory processes.
‖Pain in limbs shifting from place to place.
Bones feel bruised; cracking in joints from motion.
‖Stiff all over, could hardly move in morning.
All the limbs stiff, with shooting pains, < in morning.
‖Rheumatism of limbs, especially in joints.
Rheumatic pains: in limbs; in hips and fingers, < during day.
Chronic rheumatism of a cold variety; bones feel sore and bruised.
Periosteal and syphilitic rheumatism.
Audible cracking in joints on slight motion of wrists, ankles and spine, < by motion.

[35] **Rest. Position. Motion.** Lying: throbbing over eyes >; on painful side <; dyspnœa; sensation of choking; cough >; sciatica <; pains from patella to foot <.
Lying on face: pannus of eyes >.
Bending head: stiffness of nape of neck.
Head bent backward: membranous croup.
Twisting head: during epileptic attack.
Must lie down: on account of violent headache.
Inclination to lie down.
Could not lie down: during diphtheria.
Stooping: lightness in head; throbbing over eyes <; shooting in temples and over eyes <; dizziness; felt as though something cracked across sacrum.
After stooping: cannot straighten spine.
Rising after sleep: sensation of weight on chest >.
Rising from a seat: vertigo.
Sitting: pain in coccyx; sciatica <; profuse sweat on back.
After rising after long sitting: pains in os coccygis <.

Digitized by Google

Could hardly sit down: sensation of plug in anus.
Must sit up partially in bed: on account of dyspnœa.
Sits bent forward: orthopnœa; on account of wheezing.
Standing: sciatica <; great pain in leg.
After standing: doughy swelling on r. shin.
Motion: aversion to; organic cardialgia <; sudden, after sitting, sharp stitch in r. hypochondrium; pain through chest to sternum <; shooting pain in renal region <; rheumatic pain < on movement of trunk and limbs; rheumatic pains in hip joints and knees; pain in course of sciatic nerve >; cracking of joints.
Slightest motion: pain in blood boil on r. side of spine.
Slightest exertion: causes palpitation; expectoration of blood mixed with phlegm; dyspnœa.
Moving about: throbbing over eyes <; nausea <.
Cannot stoop or move: with pain across sacrum which remains constant even while at rest.
Putting tongue out: pain in throat <.
Going up stairs: dizziness; aching in calves.
Flexing leg: > pain in hip.
Walking: heat of whole body; pains in both hypochondria; in r. hypochondriac region; painful on account of soreness at anus; stitches in prostate, must stand still; pain in sacrum >; pain in os coccygis <; rheumatic pains in hip joints and knees; jerking aching pain in hip >; aching in calves; soreness in heels.
Must walk up and down room whole night on account of burning itching of papular itching.
Cannot walk: on account of pain through loins.
Tossing arms: during sleep.

[36] **Nerves.** Great wearines, and general discomfort; debility, with desire to lie down.
Weariness in limbs as the pains subside.
Prostration; face pale, cold sweat on face and body.
Neuralgia every day at same hour.
Epileptic attacks; hands get lame; nausea followed by chill, gaping, fainty feeling and headache; loses consciousness with the headache; winking with eyelids during attack; twisting the head; loud screaming; face changing, now pale, now red; froth at mouth; tough, stringy fluid runs from mouth, could be drawn out in a thread six yards long.

[37] **Sleep.** Great inclination to yawn and stretch.
Drowsy in open air.
Unrefreshing sleep; feels debilitated, especially in extremities.
During sleep frequent starts, incoherent talk, tossing arms.

Digitized by Google

Awakened: with desire to urinate; by dyspnœa; palpitation; heat; headache.

Worse on awaking: head and chest symptoms especially.

Time. Most symptoms appear in morning, or are then most severe.

2 A.M.: heat in pit of stomach and spitting of blood; oppressed breathing awakens; awakens with a start.

2 to 3 A.M.: croup <.

Mornings: lightness in head <; pain in one side of head comes on; acute throbbing in eyebrows, lasting all day; sight is blurred; on awakening, headache; pain in forehead and vertex; slight photophobia; catarrhal inflammation < on awaking; inflammation of eyes with agglutination; frequent sneezing, obstruction and bleeding from r. nostril; thick, yellow discharge from l. nostril; cough <; taste coppery, sweetish, sour, bitter; dryness and burning of throat; much tenacious mucus hawked; black mucus from throat; nausea <; organic cardialgia <; brown tongue; confused feeling; watery, gushing diarrhœa; chronic diarrhœa; pains darting through r. lung; on awaking, constrictive pain at root of penis; hoarseness and accumulation of mucus in larynx; hawks copious, thick, blue mucus; cough with blackish sputa; cough and dyspnœa; expectoration of blood mixed with phlegm <; chronic laryngitis < towards morning, when tough mucus nearly strangles him; fever and croupy cough <; dryness of bronchi; when rising, slight dyspnœa; loud, harsh cough <; cough with dyspnœa; cough <; limbs stiff with shooting pains <; great thirst.

9 A.M.: attack of pain in head begins, goes off in afternoon.

Begins morning, increases till noon, ceases towards evening: violent shooting from root of nose to external angle of eye.

Day: shooting in temples and over eyes; drowsiness and languor; continuous desire to urinate: violent, tight cough <; wheezing without cough; aching in sacrum >; rheumatism of hips and fingers <.

Afternoon: sharp pains all over head; sciatica <.

Evening: headache; coryza <; swelling of stomach; sharp pains all over head; violent aching pains in r. hypochondrium; hoarseness; catarrhal laryngitis; catarrhal aphonia <; cough <; sciatica <.

Night: pain in l. side of head <; shooting in temples and over eyes; pulsating pain in ears; running from nose and eyes, always <; paroxysms of suffocation; sleeplessness; cutting at navel; frequent discharge of watery urine of strong smell awakening him; dryness of throat

Digitized by Google

<; no sleep on account of cough; perspiration <; disturbed sleep and screaming; wheezing in bed; sensation of weight on chest; sweats; cough; tickling cough; aching in small spot in sacrum <; rheumatic pain in shoulders; aching in front of thighs and knees <; doughy swelling on r. shin; heat and itching of skin; burning itching of papular eruption; throat sore on swallowing.

[39] **Temperature and Weather.** ‖Complaints in hot weather.
‖Liability to take cold in open air.
‖Eruptions begin in warm weather. (*Rhus* in cold.)
‖Moderately cold air is felt very unpleasantly.
‖General feeling better outdoors, particularly vertigo > while walking in open air; chilliness and complaints of stomach < in open air.
‖Uncovering <; wrapping up >.
Open air: throbbing over eyes >; headache >; frequent sneezing and coryza <; nausea >; drowsy.
In bed: sciatica >; pain from patella to foot <.
Seeks a warm place: on account of chilliness in back.
Dry, warm air: throat >.
Warm temperature: dryness of nose <; cough >; itching of skin.
Warm, damp weather: constant snuffling; throat <.
Warm soup: burning headache >.
Hot weather: prolapsus uteri, seemingly from; sciatica <; violent itching of eruption <; eruption begins.
Wind: watery discharge from r. nostril <.
Cool temperature: dryness of nose >.
Cold weather: itching of eruption >; ulcers painful.
Cold, west wind: riding against caused cold in head followed by croup.
Cold winds: cause dull, colicky pains around navel.
Cold, damp weather: throat <.
Drinking cold water: does not > dry mouth and lips.
Change of weather: sciatica <.
When weather is going to change: catarrhal laryngitis <.
Undressing: cough <.
After catching cold: cough.

[40] **Fever.** ‖Chilliness in back, sleepiness; seeks a warm place.
‖Chilliness alternating with flushes of heat.
‖Chilliness with giddiness and nausea, followed by heat, with sensation of coldness and trembling; periodical stinging pains in temples; without thirst.
‖Attacks of chilliness from feet upwards, and sensation as if skull at vertex became contracted, in frequently returning paroxysms.
‖Chill, followed in an hour by heat, with dryness of mouth

Digitized by Google

and lips, which have to be moistened all the time; followed in morning by great thirst but no sweat; ill humor.

‖Chilliness, especially on extremities, and flushes of heat alternating with general sweat.

‖Burning heat of upper part of body and face, with internal chilliness and violent thirst.

‖‖Giddiness; violent, painful vomiting followed by pain in forehead, burning of eyes, great burning heat of upper part of body and face, with internal chilliness and violent thirst.

‖Flushes of heat; in face. θClimaxis.

‖Heat of hands and feet; nausea; pain in upper part of abdomen; dryness of mouth; sleeplessness; followed by sweat of hands, feet and thighs.

‖‖Flushes of heat alternating with general sweat.

‖‖Hands cold and bathed in cold sweat.

‖‖Sweat on forehead; rest of face dry.

‖Sweat: on back, during effort at stool; profuse while sitting quietly; cold on forehead and hands; on hands, feet and thighs.

41 **Attacks, Periodicity.** Pains fly rapidly from one place to another, not continuing long at any place, and intermit.

‖Symptoms alternate.

‖Gastric symptoms supersede rheumatic.

‖‖Pains appear rapidly, disappear suddenly.

Frequently returning paroxysms: sensation as if skull or vertex became contracted.

Periodical attacks: of semilateral headaches; spasmodic constriction of intestines; of stinging pains in temples.

Periodic: headaches; constipation.

At intervals: shooting in r. temple.

An hour after eating: vomiting of food with nausea.

One hour after chill: heat.

Several times a day: bowels moved.

Comes and goes with sun: headache.

Every day at same hour: neuralgia.

Almost daily: headache.

On fourth day of diphtheria: sudden croupy cough.

For several days, after exposure: cough, want of appetite.

Every two or three weeks: after slight exposure is seized with chilliness and languor, flushed face, headache, hot hands for half a day.

For six weeks: dyspnœa and dry cough.

Every three or six months: constipation.

Fall and Spring: alternately gastric symptoms and rheumatism.

For many months: chronic bronchitis.

Digitized by Google

Every year: periodical dysentery.
One year ago: after catching cold, cough.
Dines at 6 P.M., and in about three hours has waterbrash.
Lasting half an hour: erections; pricking through back.
Lasts ten hours: pain in head.
Lasting a few days: papular eruptions on forearms.

[42] **Locality and Direction.** Right: pain beginning in supra-orbital ridge, spreading over one side of head; pain round eye and malar bone; loss of sight of eye; acute throbbing in centre of eyebrow; pain in side of chest; shooting in temple; complete pannus of eye; eye inflamed; an old cicatrix upon eye; itching of ear lobe; mumps on side of lip; on blowing nose violent stitches in side of nose; watery discharge from nostril; obstruction and bleeding from nostril; violent sticking in side of nose on blowing it; nostril filled with hard masses; swelling of a highly vascular, spongy texture in nostril; small ulcer on edge of nostril; spot in lachrymal bone swollen and throbbing; small tubercle on side of nose; mumps; gum of lower jaw very much swollen; patch on tonsil; pains extending to ear; stitches in hypochondrium; pain in hypochondriac region; aching in hypochondrium; pains in a small spot in hypochondrium; constant dull aching in hypochondriac region; pains dart through lung from below mamma to back below scapula; aching in region of kidney; dull percussion sound over upper anterior and posterior part of chest; weak, rattling murmur in apex of lung; dull pain in side over a circumscribed spot; painful stiffness of arm; stitches in side of chest; pain in hip to knee; tearing in tibia; red, painful, doughy swelling on shin; blister full of serum on sole of foot; blood boil on thigh; blood boil on side of spine; blisters full of serum on sole of foot.

Left: pain in temple stretching to r. temple; pain in side of head and over eye; violent pain in side of head, zygomatic process; shooting pain along orbital arch; eyeball tender when rubbed; partial pannus of eye; pricking, stinging pains in eye; small, white, granular pustules on cornea; eye greatly injected; shooting pains in ear; stitches in ear and parotid gland; violent stitches in ear extending to roof of mouth, side of head and neck; external meatus of ear swelled and inflamed; tickling high up in nostril; constant discharge of thick, yellow matter from nostril; severe pain up muscle of side of neck; half way up nostril severe smarting pain; spongy swelling in nostril; shooting pain in upper maxillary bone towards ear; shooting inward in malar bone;

Digitized by Google

twanging like wires in face and neck; sore on chest; shooting pain in tonsil; uneasiness, soreness and tenderness in a small spot towards l. of ensiform cartilage; pain in hypochondrium; acute pains darting from behind hip, down on outside of thigh; acute pains about eye and side of forehead; smarting feeling in side of throat; weak, rattling murmur in apex of lung; aching down side into hip; pain in outer side of sacrum; stitches at lower angle of shoulder blade; stinging at elbow; pain in course of sciatic nerve; stitches in sciatic nerve; pains running from hip to knee; sensation of dislocations in ankle.

First l. then r. renal region: sharp, shooting pains.

Outward: a shooting in temples and over eyes.

Sensations. ‖Pains in small spots, which can be covered with point of finger.

‖Pains attack first one part, then reappear in another.

‖Heavy feeling in many parts.

As if head would burst; pressure on vertex as from a weight; sensation as from sand in eyes; as if nose must burst; as if nose was swollen; a stiff sensation of a hard substance in nose; as if a heavy weight was hanging from nose; as if nostrils were made of parchment; as if two loose bones were rubbed against each other; nose feels too heavy; tickling as from a hair high up in l. nostril; as if losing her reason from burning sensation in face; sensation of a hair on back part of tongue; sensation of a plug in throat; as if acid fluid was running through posterior nares over palate; as if something remained in throat after swallowing; as though lungs were stuffed with cotton; as if digestion was suspended; as if there was something hard all down œsophagus; as if stomach jerked up; as if something was eating in bowels; sensation of plug in anus; as from ulceration in larynx; as from a lump in throat; feeling of swelling in larynx; throat as if lined with wash leather; cutting as from knives in abdomen; sensation as if one drop of urine had remained behind; pain at sternum "like pins and needles;" as if a lump was in upper part of trachea, and of hairs across base of tongue; like a heavy load on chest; as if mucous membrane of bronchi was thickened; pain in larynx as if from ulcer; as if an ulcer was in chest; irritation as from foreign body in throat; as from a knife through loins; as if something cracked across sacrum when stooping; as if r. arm had gone to sleep; cicatrices on hands look as if they had been punched out with a wadding cutter; bones of hands as

if bruised; as if tendons of muscles of calf were stretched; as if skull on vertex became contracted; stitches in bones as if from needles; pain as if in bone of foot.

Pain: in epigastrium; in forehead over one eye; beginning in r. supraorbital ridge, spreading over one side of head; in l. temple; across forehead; to l. temple; around eye and malar bone of r. side; in l. side of head and over l. eye; in r. side of chest; in head at a point; in forehead and vertex; from occiput to forehead; from ears into glands; in throat when putting tongue out; in side of head; extending from throat to ear; in ear extending to swelled parotid gland and to head; in stomach; in limbs; across middle of back; in eyeballs; in epigastrium; in both hypochondria; in r. hypochondriac region; at pit of stomach; in region of liver; in abdomen; as in enteritis; in region of spleen; across back; in coccyx into urethra; at sternum; in throat; across epigastrium; in larynx; in chest; in frontal sinuses; in larynx from mid sternum through to back; in loins; in sides; in sacrum; in small of back; across loins; in os coccygis; in coccyx; in course of l. sciatic nerve from behind great trochanter to calf; from hip to knee; in l. hip; in r. hip to knee; in tendons of muscles of calves; in middle of tibia; in forehead; in upper part of abdomen.

Excruciating pain: in small of back.

Intolerable pain: in forearms and hands.

Excessive pain: in eyes.

Violent pain: in temples; in head; in l. side of head at zygomatic process; from occiput to forehead; in throat; in abdomen; in shin bones; from patella to foot.

Severe pain: in frontal sinuses; up muscles of l. side of neck to small spot on side of head; on swallowing; about l. eye and l. side of forehead; in hip and down outside of thigh; in limbs; in arms.

Great pain: in nose on removal of elastic plugs; in a spot on wrist; in leg when he stands.

Acute throbbing pain: in centre of r. eyebrow.

Tearing pain: in chest; in r. tibia.

Constant tearing pain: in epigastrium.

Cutting: in abdomen; at navel; in lower extremities; in outer l. side of sacrum, shooting up and down.

Stabbing: from third cervical to fifth dorsal vertebra.

Lancinations: in ear; in nose.

Darting pains: in head; through lungs; from behind l. hip on outside of l. thigh.

Violent shooting pain: from root of nose along l. orbital arch to external angle of eye, up to knee.

Digitized by Google

Sharp, shooting, stabbing pains: all over head.
Sharp, shooting, aching pains: in sides and back, first l. then r. renal region, extending down thighs.
Shooting pain: over eyebrow; in temples; over eyes; inward towards throat; in l. upper maxillary bone; in l. malar bone; in bone over eye; in l. tonsil; in l. ear; from back to front; in renal region; from kidneys through to bowels.
Shootings: in chest; thighs and knees; in limbs.
Violent stitches: in l. ear, extending into roof of mouth, side of head and neck; in r. side of nose.
Sharp stitches: in bones of head; in ulcers on tympanum; in r. hypochondrium.
Stitches: in l. ear and l. parotid gland; in throat; in epigastrium and breast into nipple; in r. hypochondrium; in region of liver; in region of spleen; through abdomen; in urethra; in prostate; in chest; at lower angle of l. shoulder blade; in r. side of chest; in l. sciatic nerve.
Violent sticking: in r. side of nose.
Sharp pain: in knee and hip joint.
Pinching pain: in bridge of nose.
Digging: in rami of lower jaw.
Constricting pain: in stomach; in hypochondria; at root of penis.
Stinging pains: in eyes; in ulcers on tongue; in tongue; in l. elbow; in temples; in skin; in one temple; from external meatus into internal ear; in region of kidneys.
Severe smarting pain: extending to malar bone below eye.
Scraping pain: in r. shin.
Pricking pains: in eyes; in granular pustules on l. cornea; in tongue; in tonsils; through to back; in glans penis; in region of heart.
Burning pain: in head; on upper eyelid; in anus; down throat, and along sternum; in chest; in sternum; in middle of forearm.
Violent aching: in r. hypochondrium; in small spot in sacrum.
Steady throbbing pain: in sacrum.
Ulcerative pain: in throat.
Pulsating pains: in ears.
Jerking, aching pain: in l. hip.
Aching pain: on one side of head; at root of nose; in forehead; in sides and back; in region of kidneys; down l. side to hip; in legs; in hip; in calves; in front of thighs and knees.
Flying pains: in head; to all parts.
Wandering pain: in eyes; from hip to knee; along bones without localized inflammatory processes; to all parts.

Digitized by Google

Rheumatic pains: in stomach; in back; in both shoulders; in elbows and wrist joints; in finger joints; in hip joints and knees; in limbs.
Raw pain: down throat and along sternum.
Pressive pain: in root of nose.
Colicky pains: in abdomen.
Gnawing: at epigastrium; in stomach; in hypochondria; about navel; in r. chin.
Cramps: in hands; in calves and inner side of thigh.
Dull aching: in r. hypochondriac region.
Throbbing, dull, heavy: above eyes; distinct and rhythmical with pulse; in r. lachrymal bone.
Beating: inside of root of nose.
Light pain: across lower part of chest.
Semilateral headache: in small spots.
Gastric pains: in stomach.
Dull pain: in hypochondrium; around navel; in r. side.
Dull, heavy pain: in hypogastrium.
Painful pressure: in anus.
Drawing: in anus; painful, from perineum into urethra.
Twanging like wires: in l. face and neck.
Bruised feeling: in bones.
Scratching: in throat.
Smarting: of affected parts; between scapula; in l. side of throat; scabs of pustules on arms and legs; on mucous surface of lips.
Sticking sensations: in ear.
Soreness: of bones of head; in eyes; in nose; of gums; in small spot towards l. of ensiform; in anus; at stomach; in vagina; of throat; of larynx; of chest; in heels.
Rawness: in vagina.
Violent burning: in small ulcer on r. nostril; in throat; around ankle.
Great burning heat: of upper part of body.
Burning: in both eyes; in eyelids; of nose; inside of root of nose; of septum; in face; in throat; in pharynx; in stomach; in hypochondria; in anus; in abdomen; in glandular part of urethra; in fossa navicularis; in bulbous portion of urethra; about vulva; of mucous membrane extending up into nostrils; in trachea and bronchi; in shin bones and up legs; in skin.
Heat: in eyes; of external ears; in external nose; in pit of stomach; in urethra.
Painful stiffness: of r. arm.
Dull, heavy pressure: in region of liver.
Constriction: of intestines.
Tightness: about heart; at bifurcation of the bronchi; of chest.

Digitized by Google

Pressive sensation: at root of nose; in temples.
Stiffness: of larynx; of nape of neck; of shoulder joint.
Stiff sensation: in walls of nose.
Lameness: in r. arm; of hands.
Fulness: in stomach; at chest.
Great weight: in pit of stomach; in chest.
Pressure: on vertex; in eyes; at root of nose; in stomach; in anus; on chest; in sternum; on heart.
Heaviness: of head; of upper eyelids; in stomach; on chest; of legs.
Oppression: of chest.
Lightness: in head; across forehead.
Confusion: of head.
Sensation of choking: on lying down.
Dryness: of nose, of mouth and lips; in throat; in bronchi.
Velvety feeling: on walls of nose.
Gaping, fainty feeling: with headache.
Uneasiness: in stomach.
Sensation of dislocation: in l. ankle.
Tickling: high up in l. nostril; in throat; in larynx; in bronchial bifurcation.
Violent tickling and itching: in ears.
Intense burning itching like fire: of eruption over body.
Violent itching: over whole surface of body.
Itching pain: in ethmoid bone.
Itching: of affected parts; of eruptions on scalp; of lids; of external ears; of eruption on ears; of r. ear lobe; of scabs on face; of pustules on face; in hairy parts of male sexual organs; at glans penis; about vulva; behind sternum; of forearms and hands; in a spot over wrist; of chin.
Creeping: of affected parts.
Inward coldness and heat: of face.
Feeling of coldness: in stomach and bowels.
Cold sensation: about heart.

" **Tissues.** Emaciation; anæmia; general cachexia.
‖Diphtheritic formations in nose, mouth, fauces, pharynx, larynx, trachea, bronchi, and even uterus and vagina.
‖Plastic exudations.
‖‖Affections of any mucous membranes, with discharges of tough, stringy, adherent mucus, or can be drawn out into long strings.
‖Catarrh alternating with rheumatic pains.
‖Rheumatism alternating with gastric symptoms, one appearing in the Fall, the other in Spring.
‖Bones feel bruised; caries.
‖Cracking in all joints from least motion.
‖Rheumatic pains in nearly all joints.

Digitized by Google

‖Bone pains with stitches as if from sharp needles.
‖Syphilis.

"**Touch. Passive Motion. Injuries.** Touch: burning pain on upper eyelid; neck painful; dorsum of nose painful; violent burning in ulcer on nostril; gum on r. lower jaw tender; l. ear and neck painful; pain in hypochondriac region <; pain in os coccygis <; swelling like a knot painful.

Pressure: hard, > throbbing over eyes; headache >; pinching pain in bridge of nose >; teeth will not bear slightest pressure; stitches in region of spleen <; abdomen sensitive; pains in sides and loins >; region of rectum sensitive; causes pain to shoot along length of sciatic nerve.

Cannot bear clothes tight over chest or throat.

Must undress immediately on account of pain in r. hypochondrium.

Desire to rub eyes.

Rubbing: smarting of eyes <.

After an abrasion: swelling like a hurt.

From a blow on chin: periostitis.

"**Skin.** ‖Burning stinging in skin.

‖Skin hot, dry and red.

‖Whole of lower part of body, from a little below navel in front and from top of nates behind, down thighs and legs, covered with a smooth, shining, elevated, bright red eruption, giving those parts appearance of boiled lobster shell; skin has an appearance of thickening and induration; not much irritation or heat.

‖Heat and itching of skin at night, when warm in bed, followed by reddish, hard knots, from size of pin's head to that of a split pea; centre depressed, with a dark scurf, surrounded by an inflamed base.

‖Dry eruption like measles.

‖Upon development of eruption, hoarse, croupy, distressing cough; nose sore, small ulcers in nostrils, and discharge tough, thick, viscid, stiff; expectoration stringy and tough, and detached with great difficulty. θMeasles.

‖Papular eruption, began as a spot on calf of leg and spread all over body; large papular elevations, red and irregular, like measles, but more raised, with intense and excessive burning itching like fire, especially at night, compelling her to walk about room whole night; general debility; gnawing and pain at epigastrium, and sensation of internal itching there, > taking food; bowels open; urine hot and high colored, and at times scanty; catamenia regular.

Digitized by Google

‖Violent itching of whole surface; then small pustules form, mostly on arms and legs; scabs smart, pain and burn; < in hot, > in cold weather.

‖Small pustules over body like small pox; they disappear without bursting; mostly on face and arms.

Pustules over whole body, appearing on inflamed parts of skin, as large as a pea, with a small black scab in middle.

‖Eruption all over body, beginning as a small lump on skin, which inflames and gets red, and finally discharges a bloody fluid, and leaves a small, depressed, ulcerative surface with an inflamed base, which heals and breaks out again; wherever discharge touhes it causes a fresh spot; violent itching at night. θPustular eruption.

‖Small pustules on roots of nails, spreading over hands to wrists; arm red, axillary glands suppurate; small pustules on hands secrete a watery fluid when broken; if not touched, fluid thickens into a yellow, tough mass.

‖Boil-like elevation which turned into a large ulcer, with hard centre and overhanging edges.

‖Blood boil on r. thigh; r. side of spine, near last rib; painful on least motion.

Vesicular eruptions.

‖Blisters full of serum on sole of r. foot.

Herpes after taking cold, with fluent coryza and bronchial irritation.

‖Scabs on fingers, or corona glandis; deep, stinging cicatrices on hands.

‖Brown spots like freckles on throat.

‖Suppurating tetter (ecthyma.)

‖Pustular syphiloderma.

‖Impetigo, pustules.

‖Zona.

‖Lupus, chronic form, with burning and itching.

‖The eruption begins in hot weather.

After an abrasion, swelling like a knot, forming an irregular ulcer, covered with a dry scab and painful to touch; under skin, hard, movable knot, like a corn, with small, ulcerated spot in middle, where it touches the cuticle; the hard, knotty feel remains after the healed ulcer is covered with white skin.

‖‖Ulcers: deep yellow, dry, oval; edges overhanging, bright red areola; base hard, corroding; becoming deeper; blackish spot in centre; cicatrix remains depressed; deep as if cut out with a punch, edges regular.

‖Syphilitic ulcers, deep with hard edges, on genitals, in throat, uvula, septum of nose, etc.

‖‖Ulcers painful in cold weather.

Digitized by Google

‖Suppurating, solitary skin tubercles, forming deep holes.
‖Head and scalp covered with dry, red, scaly patches at roots of hair, and bringing out hair; much itching at night, but no moisture or pain; on face and body brown flat spots and papulæ; cervical glands behind ears swollen and painful; violent pains from patella to foot, of a "linking" character, and as if in the bone; pains < in bed and on lying down; at night must get up and walk about most of the time; at times much swelling along tibia; leg feels swelled and doughy along the bones; throat sore on swallowing, especially at night, and is red but not ulcerated; several flat, elevated ulcerations on tongue, and one large patch in centre; voice hoarse; constipation; nausea after meals; flushes of heat and perspiration; catamenia regular but painful. θEruption and periostitis, probably syphilitic.

" **Stages of Life, Constitution.** ‖Fat, light haired persons, who suffer from catarrhal, syphilitic, or scrofulous affections.
‖Fat, chubby, short necked children, disposed to croupous inflammations.
Persons of florid complexion, of a blotchy, red appearance and thick skin.
‖Dyspeptic beer drinkers.
‖Suited to persons subject to catarrhs of mucous surfaces.
Boy, æt. 5 months; constipation.
Child, æt. 5 months, strumous constitution, ailing three months; eruption on head.
Boy, æt. 10 months, bright, vivacious, light complexioned; membranous croup.
Child, æt. 11 months; diphtheria.
Girl, æt. 18 months; eruption on body.
Child, æt. 1½; six months ago had whooping cough, since then suffering; cough.
Boy, æt. 2; scrofulous conjunctivitis.
Boy, æt. 2½, suffering nine months; hoarseness.
Boy, æt. 3, good constitution; bronchitis.
Girl, æt. 3; membranous croup.
Child, æt. 3; diarrhœa.
Boy, æt. 4; scrofulous conjunctivitis.
Child, æt. 4; diphtheria.
Girl, æt. 4, fair complexion; diphtheritic croup.
Girl, æt. 4, light complexion, flaxen hair; membranous croup.
Boy, æt. 4, sanguine temperament; chronic diarrhœa.
Boy, æt. 5; diphtheritic croup.
Girl, æt. 5, fair haired, had whooping cough, after which she caught cold; gastro-intestinal irritation.

Girl, æt. 5; pustular eruption.
Boy, æt. 6, suffering two days; catarrhal ophthalmia.
Boy, æt. 6; scrofulous conjunctivitis.
Child, æt. 6; diphtheria.
Girl, æt. 7, affected most of her life; scrofulous ophthalmia.
Boy, æt. 7, lymphatic, pale complexion, sanguine temperament; eruption.
Girl, æt. 8, had whooping cough four years ago, since then ill; recurring bronchial attacks.
Boy, æt. 8, stout, large head, after a burn; dysentery.
Girl, æt. 8½; scrofulous conjunctivitis.
Boy, æt. 9; scrofulous conjunctivitis.
Child, æt. 10; diphtheria.
Girl, æt. 10, ill six weeks; eczema.
Girl, æt. 11, ill two months; vomiting.
Girl, æt. 12, had croup six years ago, since which she has been suffering; hoarseness; cough.
Girl, æt. 13, suffering a month; scrofulous ophthalmia and ulceration of cornea.
Girl, æt. 13; sore throat.
Girl, æt. 13; croup.
Girl, æt. 14, not yet menstruated; affection of stomach.
Boy, æt. 14, lymphatic, nervous temperament, fair hair, light eyes; pustular eruption.
Girl, æt. 15, suffering for a year; catarrh of nose.
Young lady, æt. 17, just returned from India; pain in r. hypochondrium.
Girl, æt. 17, caught cold one year ago, since which she has been suffering; bronchitis.
Young girl, suffering several months, operation unsuccessful; nasal polypus
Girl, sanguine, lymphatic temperament, for six years after diphtheritis; pains in limbs.
Lady, æt. 22; pain in hypochondriac region.
Man, æt. 22, had syphilis two years ago; ulcers on leg.
Woman, æt. 22; syphilis.
Man, æt. 24, has gastric and rheumatic troubles; pain in back.
Young man, blonde; gastric derangement.
Young tenor singer, after catching cold; laryngitis
Man, æt. 24, healthy, suddenly seized with violent pain in temples a month ago, since which he has suffered; headache.
Officer, æt. 24, strong, plethoric constitution, choleric temperament, 15 months ago had chancre; syphilis.
Young woman, mother of two children; ulcerated sore throat.
Woman delicate, married five years; eruption and periostitis.

Man, æt. 39, suffering 18 months; dyspepsia.
Woman, æt. 39, general health impaired, feeble frame; ulcer on leg.
Man, æt. 40; boils on head.
Man, æt. 40, in bad health for two years, has had rheumatic gout and rheumatic iritis; inflammation of eyes.
Lady, æt. 40, fat, fair, of florid complexion, uses beer at meals, and whiskey in evening, suffers from enlarged liver and jaundice; dyspepsia.
Middle aged woman, suffering for four years; gastric affection.
Man, tall, spare frame, suffering for eight years; sciatica.
Florid, red haired woman, husband had syphilis before marriage; five years ago, had sore throat and ulcer on lips, first two children premature and stillborn, remaining two delicate, now nursing for last six months; syphilitic periostitis.
Woman, æt. 44, suffering for a fortnight; supraorbital neuralgia.
Lady, æt. 44, stout, florid countenance, subject to chronic coughs; acute bronchial catarrh.
Man, æt. 45; laryngitis.
Mrs. ——, æt. 45, nervous temperament; chronic inflammation of larynx and trachea.
Man, æt. 45; chronic bronchitis.
Man, æt. 45; cough.
Woman, æt. 46, suffering one month; headache.
Man, æt. 46, suffering seven years; pustular eruptions.
Man, æt. 48; chronic bronchitis.
Man, æt. 48; pustular eruption.
Man, æt. 50, operated upon three times within last 23 years; nasal polypus.
Mrs. H., æt. 50, subject to colds in head, and determination of blood to head, catamenia ceased about two years ago, after influenza two years previously; chronic catarrh of nose.
Man, æt. 50, stout, red faced, suffering many months, had been treated with caustics and counter irritants; enlarged tonsils with deafness.
Woman, æt. 50, delicate; laryngitis.
Man, æt. 50, rheumatic; general pains.
Man, æt. 50, after a blow; periostitis.
Man, æt. 50; affection of kidneys.
Lady, æt. 52; polypus of conjunctiva
Man, æt. 55, major; chronic inflammation of larynx and trachea.
Man, æt. 55; chronic bronchitis.
Woman, æt. 60, weak, rheumatic, for several weeks has

Digitized by Google

been suffering from sudden and profuse discharges of clear, watery fluid from nose which suddenly ceased; affection of œsophagus.

Man, æt. 60, fell and hurt leg 16 years ago; periostitis.

Mrs. ——, æt. 60, subject to attacks of dyspepsia and sick headache; lupus.

Man, æt. 62; chronic rheumatism.

Man, æt. 64, had syphilis 40 years ago, but no symptoms of it during intermediate time, for last ten years; sore on cheek.

Woman, æt. 65; cough.

Man, æt. 67; bronchitis.

Man, æt. 69; chronic bronchitis.

Man, æt. 82, lived for thirty years in India, had fever, dysentery, bronchitis; bowels generally loose, habitual snuff taker; malignant ulceration of nose.

[45] **Relations.** Antidoted by: *Arsen.*, *Laches.* (croup, diphtheria, etc.), *Pulsat.* (wandering pains).

It antidotes: effects of beer; effects of arsenical vapors; *Mercur.*, *Merc. jod.*

Compatible: after *Canthar.* in dysentery; after *Iodum* in croup, when hoarse cough, with tough membrane, general weakness and coldness are present; *Ant. tart.* follows well in catarrhal affections and skin diseases.

Compare: *Bromium* in croup; *Cannab.* in orbital pains; *Hepar* in croup, ulcers, etc.; *Kali jod.* in syphilitic affections after mercury; *Mezer.* in bone diseases; *Nitr. ac.* in syphilis; *Phytol.* in syphilitic bone affections; *Spongia* in croup; *Silica* in bone affections.

KALI BROMATUM.

Potassium Bromide. *K. Br.*

For general effects and experiments with the crude drug, see Allen's Encyclopedia, vol. 5, p. 264.

We need provings, particularly with the higher potencies, to bring out the finer characteristics of the drug.

[1] **Mind.** Unconscious of what is occurring around them; cannot recognize, nor be comforted by their friends.

Loss of memory.

Memory absolutely destroyed; anæmia; emaciation.

Loss of memory, despondency, inability to concentrate mind on any object; constant worry, fears to see people or to be spoken to; vertigo, with falling, < from stooping; failure of mental and bodily strength; pricking sensation all over body, palpitation; constantly busy, tying his shoes, fumbling in his pockets, picking threads, etc. θMental derangement.

Loss of memory, forgets how to talk, absentmindedness.

Loss of memory; had to be told the word before he could speak it. θAmnesic aphasia.

Single words forgotten; syllables are dropped.

Inability to express oneself.

Mentally dull, torpid; perception slow, answers slowly.

Imagines he is singled out as an object of divine wrath; extreme drowsiness.

Imagines she is a devil; cannot sleep; fears to be alone.

Positive delusions of various kinds.

Delusions during and after delirium tremens.

Digitized by Google

In first stage with horrid illusions, flushed face, red eyes, and hard and quick pulse. θDelirium tremens.

Frightful imaginings at night (in pregnant women during latter months), they are under impression that they have committed, or about to commit, some great crime and cruelty, such as murdering their children or husbands.

Hallucinations of sight and sound, with or without mania, precede brain and paralytic symptoms.

Delirium, with delusions; thinks he is pursued; will be poisoned; is selected for divine vengeance; that her child is dead, etc.

Delirium tremens, in first or irritative stage; face flushed; eyes red; delirium active; horrid illusions; hard, quick pulse.

Puerperal mania.

Acute mania, with fulness of bloodvessels of brain.

Insanity; manner excited, rambling.

Feels as if he would go out of his mind.

She is very fretful, crying at trifles, constantly brooding over loss of a daughter; almost crazy; from fretting, loss of rest and want of nourishment, is seized with nervous dysentery.

Hands constantly busy; all sorts of fearful delusions; walks the room groaning, bemoaning his fate; full of fear; unsteady.

Fits of uncontrollable weeping and profound melancholic delusions.

Feeling of lightness and exhilaration in place of heaviness and depression.

Depressed; lowspirited; has nervous anxiety.

Remarkably depressed, well marked amnesic aphasia.

Deep depression, with painful delusions, with persistent sleeplessness, and dread of impending destruction of all near to her.

Great despondency; "feel as if they should go out of their minds."

Profound melancholic depression, with religious delusions and feeling of moral deficiency; frequent shedding of tears, lowspirited and childish, giving way to her feelings; profound indifference and almost disgust for life. θMelancholia.

Profound melancholy, from anæmia.

Great despondency, with insanity, a feeling of moral deficiency, or a religious delusion, from anæmia.

Melancholy, with delusions; often childish; fits of uncontrollable weeping.

Night terrors of children (not from indigestion), with

Digitized by Google

screaming, unconsciousness of what is occurring around them; cannot recognize, nor be comforted by their friends; sometimes followed by squinting.

‖Apathetic, indifferent.

‖Timid, suspicious, full of fear.

‖Much concerned about health; complains without cause; restless and trembling in evening; lowspirited, with great and uncontrollable sensation of fear and anxiety; thinks she is becoming deranged; change of life.

‖So sensitive and irritable of mind she cannot give her music lessons; very thought of piano breaks her down, makes her shake all over, and then cry with fear and apprehension that she is losing her mind; cries easily; so easily confused that she cannot say what she wishes to; least thing worries her; makes her utterly miserable to be looked at or spoken to; fears to see people; always depressed and lowspirited; memory weak and unreliable. θMelancholia.

‖Overtaxed brain.

Sensorium. ‖Congestive paralysis approaching apoplexy; lay unconscious for twenty-four hours; flushed face; feeble pulse, contracted and non-reacting pupils; followed by vertigo and mental weakness.

‖Heaviness, confusion; slow speech, staggers as if drunk.

‖Dizziness, noises in ear; nervous excitement; sleepless.

‖Vertigo: palpitation, nausea, even unconsciousness; memory growing weak; as if ground gave away; staggering gait; confusion and heat of head, drowsiness, stupor; fainting and nausea followed by sound sleep.

‖Confusion of head.

Inner Head. ‖Migraine, with flushed face, throbbing temples, injected conjunctiva, photophobia and much congestion of brain.

‖Constrictive sensation in brain as if too tight, with a feeling of anæsthesia of brain.

‖Headache in r. frontal protuberance; sleepy.

‖Severe, throbbing aching pains in occipital region, extending down as far as dorsal region; cannot sit up or walk, or shake head without feeling <; great weakness and depression of mind.

‖Violent headache, particularly in occiput.

‖Brain irritated, face flushed, pupils dilated, eyes sunken; rolls head; awakes now and then screaming; extremities cold. θCholera infantum.

‖Reflex cerebral irritation, with active congestion in children during teething, cholera infantum, or scarlet fever; first stage of hydrocephaloid from cholera infantum.

‖Flushed face, throbbing of carotids and temporals, suffusion of eyes; feeling of fulness of head.

Digitized by Google

‖Headache, with dizziness; staggering as if intoxicated; stupefaction; sopor; muscular weakness; anæsthesia of pharynx and velum palati and external skin; sight weakened and hearing impaired; gastralgia; vomiting; colic; constipation. θAlcoholism.

‖Active congestion, or first stage of inflammation, before effusion has occurred.

‖Acute congestions or inflammatory diseases of brain.

‖Incipient basilar meningitis; severe headache, nearly all the time, < at night; would play a few minutes, then lay head down on chair or other support and cry with headache; weak, emaciated, dull, heavy eyed; no appetite; sleep disturbed by groans, grinding of teeth, starting up frightened; terrible headache; tongue clean; pulse 90 to 100, quick and wiry; constipation; scanty urine; too much heat about head.

| |Anæmia of brain from loss of fluids; constant drowsiness; coma; pupils dilated, eyes sunken, eyeballs moving in every direction without taking any notice; feet and hands blue and cold; pulse imperceptible. θHydrocephalus.

| |Bad results from overtaxing brain; especially with grief or anxiety; nervousness.

| |Violent headache, from concussion of brain.

| |Mercurial headache.

4 **Outer Head.** Drooping of head; cannot hold it erect.

| |Scalp feels tight, brain numb, confused; difficult walking.

5 **Sight and Eyes.** ‖Vision dim, pupils dilated; with heavy lids and invincible drowsiness.

‖Eyes sunken, lustreless; gaze fixed.

| |Eyeballs moving in every direction.

| |Dilated pupils and sunken eyes. θCholera infantum.

| |Pupils dilated, contract sluggishly, vertigo and confusion of head; pupils contracted.

‖Vessels of fundus enlarged; conjunctivæ congested.

‖Eyes suffused.

‖Squinting; after night terrors of children.

6 **Hearing and Ears.** | |Ringing in ears.

‖Roaring in ears at night synchronous with pulse.

‖Sounds echo in ears; headache.

‖Hardness of hearing.

7 **Smell and Nose.** ‖Smell impaired.

‖Thick mucus and yellow scabs in nostrils.

| |Erythematous swelling of nose.

8 **Upper Face.** Expression: pale, but otherwise appeared as one drunk, with hallucinations, etc.; wearied, anxious; dull, stupefied; imbecile.

‖Expressionless face; incipient softening of brain.

Digitized by Google

|Complexion yellow, cachectic.
‖Face flushed.
‖Acne on face in young fleshy people of gross habits.
| |Papular rash.

[10] **Teeth and Gums.** | |Odontitis in children.
| |Difficult dentition of children.
‖Vomiting and diarrhœa of teething children.

[11] **Taste and Tongue.** Taste: foul; salty; lost.
‖Difficult speech; action of tongue disordered; slow and difficult after waking; stammering.
Tongue: red, dry, enlarged; red, later dry and brown; white, with languor and sleepiness; pale and cold.
| |White tongue. θDyspepsia.
| |Tongue red and tender; gums spongy. θDiabetes.

[12] **Inner Mouth.** ‖Fetid breath; a peculiar sickening odor; tongue white.
‖Saliva profuse, with fetid breath.
| |Suppressed salivation in teething children.

[13] **Throat.** ‖Anæsthesia of mouth, throat and pharynx; chronic alcoholism.
‖Dysphagia of liquids (in infants); can swallow only solids.
‖Uvula and fauces congested, then œdematous.
‖Dryness of throat.
‖Face very red, throat swollen; pulse 150; impossible to move head; submaxillary glands swollen and painful, especially on r. side; tonsils swollen and purple; very thick exudate, covering tonsils and uvula; distinct, crooked line of demarcation between healthy and affected part; mouth dry, hot; anxiety; excitement alternating with comatose somnolence. θDiphtheria.
‖Diphtheritis with quick pulse; fever; dry tongue; offensive breath; highly injected and dusky red fauces; patches of wash leather exudation on tonsils or pharynx.

[14] **Appetite, Thirst. Desires, Aversions.** |Loss of appetite; tongue white; languor.
‖Thirst intense with dry mouth.

[15] **Eating and Drinking.** | |Children, from time of birth, can swallow solids with ease, yet choke every time they try to drink.
| |Troublesome pressure at stomach after dinner; lassitude.

[16] **Hiccough, Belching, Nausea and Vomiting.** | |Repeated retching and emesis; sick and giddy.
‖Hysterical women who vomit their food after each meal, especially if subjected to exciting emotions.
‖Vomiting: with intense thirst; when ganglionic system is affected; of drunkards after a debauch; in whooping cough; of meconium.
‖Chronic morning vomiting of drunkards.

Digitized by Google

[17] **Scrobiculum and Stomach.** ||Weakness of stomach; dyspepsia.

|Anorexia, foul breath, white tongue, involving edges as well as dorsum, and not necessarily furred; great languor; violent headache; loathing; vomiturition or vomiting of mucus; saltish taste in mouth; vomiting of drunkards after debauch; troublesome pressure at stomach after dinner.

[18] **Hypochondria.** ||Enlargement of liver and spleen.

||Small tumor in region of spleen.

[19] **Abdomen.** |Sensation as if bowels were falling out.

|Internal coldness of abdomen.

||Abdomen sunken, almost stuck to vertebral column. θCholera infantum.

|Abdominal spasms, walls retracted, convulsive motions of eyes and limbs; frequent, green, watery stools. θSummer complaint.

||Colic in young children; walls of belly are retracted and hard, while intestines can be seen at one spot contracted into a hard lump, of size of a small orange, and contraction can be seen through abdominal wall to travel from one part of intestines to another; attacks frequent and excruciating, unconnected with diarrhœa or constipation, but often associated with an aphthous condition of mouth.

|Periodic colic in infants, occurring about 5 P.M.

|Flatulent colic in children and hysterical women.

||Ascites of hepatic or splenic origin.

[20] **Stool and Rectum.** ||Painless diarrhœa, with great chilliness, even in a hot room; fifteen or twenty passages in twenty-four hours; burning in chest; internal coldness of abdomen; pulse frequent and weak; urine scanty, dribbling of a few drops in beginning; at every stool, sensation as if bowels were falling out; restless and shaky as if from palsy.

|Stools: watery (like rice water); painless.

|Frequent, green, watery discharges, with violent abdominal spasms, during which abdomen gets hard; thrush in mouth; convulsive motions of eyes and limbs.

||Bloody muco-purulent diarrhœa, with intense thirst, vomiting, eyes sunken, pupils dilated, skin corrugated and spotted blue, body cold, tongue red and dry, pulse imperceptible, urine suppressed.

|Cerebral irritation during cholera infantum; pupils dilated, eyes sunken, eyeballs moving in every direction without taking any notice; feet and hands blue and cold; pulse imperceptible.

|Cholera infantum, with reflex cerebral irritation of brain, before effusion.

Digitized by Google

‖Cholera infantum, sudden in onset, attended by great prostration, cold hands and feet, hot head, dilated pupils, rolling of eyes and head, starts, jactitation, spasms, watery, very offensive stools, vomiting of all drinks and intense thirst; nervous and vascular excitement.

‖Great prostration, coldness of surface and symptoms of hydrocephaloid. θCholera infantum.

‖Asiatic cholera, first stage, vomiting, cramps, rice water discharges; restores secretion of urine.

‖Constipation; stools very dry, hard and infrequent.

‖Retention of meconium, with vomiting of all food and obstinate constipation.

‖During stool: sensation as if bowels were falling out; dribbling of urine.

‖Spasmodic stricture of sphincter ani.

‖Constant diarrhœa and more or less tenesmus, and passage of much blood; on making efforts to expel, protrusion of several elongated bodies, resembling earthworms in shape, but of much more brilliant red color; they presented a soft, vascular, shreddy appearance, bearing some resemblance to sarcomatous growths; with this expulsion there was always a yellow, very fetid discharge; feces flattened; flatulent distension of bowels; patient pale and sickly looking. θPolypus of rectum.

‖Blind, intensely painful varices with black stools.

‖Pain in hemorrhoids, fissure of rectum, and painful growths.

Urinary Organs. Pain in region of kidneys extending in direction of ascending colon; afterwards copious urine.

‖Spasmodic affection of neck of bladder.

‖Neuralgia of neck of bladder.

‖Abnormal irritability of urinary passages.

‖Diminution of sensibility of urethra.

‖Urine: profuse with thirst; with abundance of phosphates; copious, pale; scanty, even suppressed in collapse; scanty, dribbling a few drops at beginning of every stool.

‖Incontinence of urine.

‖Nocturnal involuntary emissions of urine.

‖Suppression of urine. θCholera infantum.

‖Emaciation; paleness; skin cold and dry; pulse rapid and feeble; tongue red and tender; gums spongy and bleeding; thirst excessive; appetite voracious; bowels constipated; urine pale, frequent, large quantity, of high density, and loaded with sugar; liver tumid and tender. θDiabetes mellitus.

Male Sexual Organs. ‖Sensual and lascivious fancies and dreams.

Digitized by Google

‖Excessive sexual desire, with constant erections at night.
‖Satyriasis.
‖Diminution of sexual desire; lessened even to impotence.
‖‖Erections at night; backache; uncontrollable fidgettiness.
‖‖Impotence with melancholy, loss of memory; nervous prostration; epilepsy.
‖Effects of sexual excesses, such as impotency, paralysis and spasms from exhaustion of spinal cord.
‖Frequent pollutions from ardent imagination.
‖‖Seminal emissions, with depressed spirits, dull thought, backache, staggering gait and great weakness.
‖Nocturnal emissions, with amorous dreams and erections.
‖Spermatorrhœa, before paralytic symptoms have set in; erections normal but teasing and persistent, with nocturnal emissions and nervous disturbances growing out of unsatisfied sexual desire.
‖Chordee, during gonorrhœa.

Female Sexual Organs. ‖Nymphomania.
‖Sterility from excessive sexual indulgence.
‖‖Abolition of all sexual feeling during coition.
‖Aversion to coition; menses scanty.
‖Enlargement of uterus after parturition, with abnormal discharges.
‖‖Subinvolution of uterus.
‖Induration of uterus; enlargement of uterus (after parturition), with abnormal discharges.
‖‖Uterine fibroids.
‖Ovarian neuralgia from ungratified sexual desire; nervous unrest.
‖Neuralgia of ovaries; pain, swelling, tenderness of l. ovary; diminution of sexual desire.
‖Epilepsy from ovarian irritation.
‖Large tumor, smooth and tense in hypogastric and r. iliac region; tumor slightly tender when pressed, and there is indistinct fluctuation; measurement of abdomen taken in a line with crests of ilium shows an increase in size of ten inches; urine scanty and frequent calls to pass it. θOvarian cystic tumor.
‖Abdomen large but not tense; on palpation, well defined, elastic tumor, yielding indistinct fluctuation, in l. iliac region, here also movements are felt as in quickening. θOvarian enlargement.
‖Ovarian cystic tumor, after tapping.
‖Metrorrhagia from reflex irritation, or of nervous origin.
‖Menorrhagia, metrorrhagia, nymphomania and menstrual epilepsy; nervous symptoms led to its use.
‖Menorrhagia from ovarian irritation caused by strong sexual desire.

fused and bloodshot eyes; after several hours he sleeps, breathing easily and naturally, but soon awakens in a paroxysm; hyperæsthesia of laryngeal nerves followed at later stage by natural reaction; loss of sensibility in larynx; exudation of whitish, firm texture, affecting trachea and bronchi; harsh, painful voice, with hoarseness; hacking cough with dulness and confusion of head; wakes suddenly from sound sleep with sensation of suffocation, with peculiar ringing, dry, brassy cough and hurried breathing. θCroup.

‖Membranous croup, with whitish exudation.

‖Torpid cases with copious purulent expectoration. θBronchitis.

‖Infantile capillary bronchitis with severe dyspnœa, throwing arms wildly about; spasmodic action of muscles, opisthotonos.

[26] **Respiration.** ‖Breath hot and hurried.

‖Breathlessness, nervous headache and want of sleep.

‖Asthma of nervous origin.

‖Spasmodic asthma, with dry, nervous, spasmodic cough, great tightness of breathing.

‖Spasmodic asthma of children; great dyspnœa, lividity of face; no sleep, urine suppressed, general œdema.

‖Severe dyspnœa, tossing arms about wildly; spasmodic action of muscles, throwing child into a state of opisthotonos. θCapillary bronchitis.

[27] **Cough.** ‖Paroxysmal, dry cough.

‖Dry, fatiguing cough at intervals of two or three hours, with difficult respiration, followed by vomiting of mucus and food, < at night and when lying down; tightness of chest when breathing.

‖Weak, nervous children, arouse with a dry, spasmodic cough, which greatly frightens them, causing them to cry out in terror.

‖Hacking cough with dulness and confusion of head.

‖Dry cough, due to reflex action from stomach, intestines, or uterus.

‖Nervous, dry, hysterical cough of women, especially if pregnant.

‖Whooping cough, with spasmodic, dry cough; spasm of glottis; with convulsions.

[28] **Inner Chest and Lungs.** ‖Burning in chest.

‖Pneumonia in drunkards.

[29] **Heart, Pulse and Circulation.** ‖Feeble, intermitting action of heart; so nervous she must be busy and walk; slow and small pulse; heart's beats wanting in energy, and its sounds distant and feeble; action of heart slow and fluttering.

Digitized by Google

‖Cardiac neuroses from spinal or uterine irritation.
Pulse: accelerated, later slower; slow, small, weak; rapid and weak; 100, weak; 50, small and feeble; 40, skin cold, clammy; imperceptible with coldness and collapse.
‖‖Vascular bruit de souffle.

31 **Neck and Back.** ‖Tabes dorsalis from sexual excesses.
‖Backache; tired lameness of legs. θSeminal emissions.

32 **Upper Limbs.** ‖Trembling of hands during voluntary motion; or, as in delirium tremens.
‖Hands and fingers in constant action; busy twitching of fingers.

33 **Lower Limbs.** ‖Cannot stand erect; legs weak.
‖Unsteady gait; frequently taken for a drunken man.
‖Gait staggering, uncertain; looks to see if legs are really moving; feels as if his legs were all over sidewalk. θLocomotor ataxia.
‖Loss of sensibility; pinching or burning causes no pain. θLocomotor ataxia.
‖‖Legs and feet cold and blue; on being touched leave white impress of fingers for more than twenty-five seconds. θCholera infantum.

35 **Rest. Position. Motion.** Difficulty of holding head erect.
Stooping: vertigo <.
Lying down: cough <.
Cannot sit, or walk, or shake head without feeling < of headache.
Cannot stand erect.
Straightening out in bed during spasm.
Restless, must be on the move.
Impossible to move head on account of swollen throat.
Difficult walking.

36 **Nerves.** ‖The thought of something to be done makes her shake all over.
‖‖Nervous, restless; cannot sit still, but must move about or otherwise occupy oneself; often suits nervous women.
‖Restlessness, fitfulness of motion, with giddiness.
‖Almost constant twitching of fingers and a busy occupation of them in matters of no importance.
‖Nervous irritability caused by severe illness or death of some dear friend, or loss of property or reputation; constant fretting; will not eat, cannot sleep, is very irritable; pulse quick, tongue coated; fetid breath.
‖Restlessness and sleeplessness due to worry and grief.
‖Nervous excitement, irritation and congestion of cerebral meninges, with mania.
‖Hysterical spinal irritation.
‖Reflex excitability.

Digitized by Google

Languor, disinclined to talk, or use mind or work, indifferent, sleepy; by strong effort of will can act as usual.

Trembling sensation through body.

Mercurial trembling.

Symptoms from affection of vasomotor nerves: occasional sudden paroxysmal feeling of numbness; pins and needles; deadness and weakness; indescribable feeling of something wrong; feeling of largeness, or as if limbs were swollen; aching, uneasiness or actual pain not very severe; feeling of coldness, occasionally obvious fact of coldness; sudden weakness; paralyzed feeling; unable to retain grasp of an object, hastily putting it down, or allowing it to fall; muscles do not respond readily to will; co-ordination of movement defective; writing or needlework have to be discontinued; rubs the limbs by, as it would seem, an almost instinctive impulse; sensations allied to cramp, or actual cramp, with varying amounts of pain.

General delirium, hallucinations, fancies about being persecuted; ataxia; as in general paralysis.

Gait: unsteady, reeling, as if drunk; staggering; false steps frequent; with rolling and staggering; as one walks with locomotor ataxia; looks too see if legs are really moving.

Weakness of extensors of legs and feet.

Weakness of muscles of arms.

Inco-ordination of muscles; nervous weakness, even paralysis of motion and numbness.

Great difficulty in getting and keeping right word, although right idea is present to mind. θAnæmia of frontal lobe of brain.

Amnesic aphasia.

Anæsthesia, particularly of gums, pharynx and genitalia.

Spasms: from fright, anger and other emotional causes, occurring in plethoric, nervous persons, or in women at time of menses; during parturition; from sexual excitement or excessive venery; too great reflex excitability, sleeplessness; during teething, whooping cough, or laryngismus stridulus; from Bright's disease.

Neuroses involving brain, accompanied by convulsions.

At intervals of seven, ten and fifteen days, is attacked, usually at 4 A.M., with spasms; straightens out in bed and makes the noise peculiar to this disease; face almost immediately becomes livid, and unless temples and face are rubbed during fit, dark purple spots remain for two or three days; livid ring about eyes; after from one to three minutes, muscles relax and she goes into a comatose sleep, in which she remains several hours; feels

Digitized by Google

languid on awaking; head aches, and has a severe pain always at pit of stomach, and sometimes nausea, eats nothing for twenty-four hours, and then feels nearly as well as usual. θEpilepsy.

‖Mental hebetude, slowness of expression, failure of memory; confusion and heat of head, great vertigo; dull, stupefied expression; languor in extremities, whole mind and body given up to lassitude. θEpilepsy.

‖At each menstrual period one severe convulsion; falling while at work; stupid and prostrated remainder of day.

‖Attacks at new moon, regularly at 2 A.M.; nausea, trembling in bowels; eyes staring and wide open; jerking of l. foot and then of arms; then deep sleep; complete unconsciousness, but no foaming at mouth; urine involuntary. θEpilepsy.

‖No foaming at mouth; headache after attacks; menses deficient, with prolapsus uteri; undoubted heredity. θEpilepsy.

‖Fits as often as once a fortnight, and at times twice a week. θEpilepsy.

‖Fit each month, usually a day or two before menses.

‖Frequent and violent convulsive seizures; epileptiform attacks, dependent on presence of a tumor or other coarse organic lesion of brain, are usually suspended; attacks especially occurring during daytime; grand mal rather than petit mal.

‖Epilepsy when attacks are attended or caused by unmistakable congestion of brain; epilepsy of recent character, and not dependent on constitutional causes; congenital and syphilitic epilepsy greatly modified.

‖Epilepsy from cerebral congestion, with vascular fulness of retina.

‖Epilepsy from tuberculosis.

‖Acts like a crazy person; enfeebling of mental power; trembling of hands; gait unsteady, irregular, staggering, as if drunk; eruption on lower extremities, generally on calves of legs, spotted yellow, indurated base, thick, yellow scabs. θChorea.

‖Tongue protruded with a jerk; muscles of face, r. arm and legs in constant jactitation, quite violent. θChorea.

‖Unable to dress herself or work, could hardly speak; face, arm and leg of r. side affected. θChorea.

‖Very violent chorea from fright.

‖Tetanus.

‖Paralysis agitans.

Sleep. ‖Sleepiness; deep sleep, often broken by a start, though waking is very difficult; confused dreams.

‖Sleepy; drops asleep in his chair; if aroused falls right asleep again; during day.

Digitized by Google

‖‖Sleepless; restless; can only calm herself by incessant occupation.
‖Sleeplessness: especially in anæmic patients, or nervous persons who are exhausted but irritated; from overfulness of cerebral bloodvessels; during convalescence from acute diseases; in case of mercurial poisoning; accompanying mental anxiety, hysteria, pregnancy and general nervous irritability.
‖Deep, profound and quiet slumber.
Profound and yet disturbed sleep, always awakens with a mental struggle, not knowing at first where he was or what had become of him.
‖Grinding of teeth during sleep, with moans and cries.
‖‖Night terrors of children; grinding teeth in sleep, moans, cries; horrible dreams.
‖‖Somnambulism in children.
‖Awakes from a profound sleep, not knowing where he is.
‖Waking with severe headache in a child.

[38] **Time.** During day: sleepy.
Evening: restless and trembling.
Night: frightful imaginings; headache <; roaring in ears; involuntary emission of urine; suddenly at night, spasmodic croup; child with croup is agitated; face flushed; cough <; itching.

[39] **Temperature and Weather.** Hot room: chilliness.
High temperature: itching.

[40] **Fever.** Body cold; skin corrugated and mottled.
‖Shivering with cold and cold skin, although child was covered with mustard plasters.
‖‖Chilliness and general feeling of coldness, more pronounced about extremities. θAgue.
‖‖Heat, like cold stage, not very strongly marked.
‖‖Heat in face and fugitive flushings here and there.
‖Head hot, feels as if in a furnace, with coldness and chills.
‖‖Sweat abundant and viscid, all over body; unusually long lasting and exhausting. θAgue.
‖Quotidian ague.

[41] **Attacks, Periodicity.** Symptoms recur paroxysmally.
5 P.M.: periodic colic in infants.
At intervals of two or three hours: dry, fatiguing cough.
For several hours: comatose sleep.
At every stool: sensation as if bowels would fall out.
In 24 hours, fifteen or twenty passages.
At times: fits twice a week.
At intervals of seven, ten and fifteen days, is attacked, usually at 4 A.M., with spasms.
Every fortnight: fits.
Attacks at new moon: regularly at 2 A.M.

Digitized by Google

Before menses: headache.
During menses: epileptic spasms.
After menses: headache; insomnia; heat in genitals.
At each menstrual attack: one severe convulsion.
In winter: slightly elevated, smooth, red patches like urticaria.

" **Locality and Direction.** Right: headache in frontal protuberance; submaxillary glands swollen and painful; large tumor in iliac region; muscles of arm in constant jactitation; chorea affecting arm and leg.
Left: tenderness of ovary; jerking in foot.

" **Sensations.** Paroxysms of numbness; feels as if needles were pricking him.
Parts feel as if growing large, swollen.
Loss of sensibility; body generally, also fauces, larynx, urethra, etc.
Feels as if he would go out of his mind; staggers as if drunk; as if ground gave way; brain, as if too tight; as if bowels were falling out; restless and shaky as if from palsy; feels as if legs were all over sidewalk; as if limbs were swollen; as if in a furnace.
Pain: in r. frontal protuberance; in hemorrhoids; in region of kidneys, extending in direction of descending colon; in l. ovary.
Excruciating colic.
Violent pain: in head, particularly in occiput.
Terrible headache.
Intensely painful varices with black stools.
Neuralgia: of neck of bladder.
Severe, throbbing, aching pains: in occipital region.
Throbbing: in temples; in carotids and temporals.
Colic: in children.
Pricking sensation: all over body.
Hoarseness: extremely painful.
Tingling: in external genital organs.
Burning: in chest; in vulva.
Heat: in genitals.
Confusion: of head.
Fulness: of head.
Pressure: at stomach.
Tight feeling: in scalp.
Tightness: of chest when breathing.
Constrictive sensation: in brain.
Sensation of suffocation.
Dryness: of throat.
Lameness: of legs.
Jerking: in l. foot and then of arms.
Trembling sensation: through body; in bowels.

Digitized by Google

Itching: in external genital organs.
Internal coldness: of abdomen.

" **Tissues.** Diminishes reflex excitability of nervous centres; the functions of organic life are not disturbed.
Great weakness of muscles.
‖Muscles irritated, rendered inco-ordinate and then paralyzed.
It is supposed to cause contraction of capillaries.
‖Sedative effect upon action of heart.
Septicæmia, lethargy, brain and spinal symptoms; multiple abscesses.
Swelling of lymphatic glands.
Sebaceous cysts.
‖Ascites.
Diseased organs are in hypertrophic condition.
⁝It removes pathological deposits of fatty matter only, while the iodide removes normal adipose matter.
Emaciation; decrease of temperature; pallor.
Lowers temperature, with coldness of extremities, hands and wrists icy cold and wet, cerebral irritation, in cholera infantum.

" **Touch. Passive Motion. Injuries.** Touch: leaves white impress of fingers.
Pressure: tumor slightly tender.
Pinching: causes no pain.

" **Skin.** ‖Skin cold, blue, spotted, corrugated. θCholera infantum.
‖Moist eczema of legs with pityriasis of scalp.
‖Moist eruptions.
‖Slightly elevated, smooth, red patches, like urticaria, but with hardened bases, like erythema nodosum; itching at night in bed and in a high temperature; appear in winter.
‖Acne simplex and indurata; bluish red, pustular, < on face and chest; especially in lymphatic constitutions.
‖Acne on face and shoulders; centre becomes depressed; leave scars.
‖Rose colored mammilated eruption on lower extremities; sometimes pustules in centre of patches that become umbilicated, exuding a creamy moisture and forming thick, yellow scabs.
‖Eruption of small boils in successive crops, mostly on face and trunk, with troublesome itching.
‖Large, indolent, painful pustules; boils.
‖Long lasting scrofulous ulcerations.
‖Syphilitic psoriasis.

" **Stages of Life, Constitution.** Acts more satisfactorily in children than in adults.

Digitized by Google

Especially adapted to large persons inclined to obesity.
Child, æt. 3; threatened inflammation of brain.
Girl, æt. 5, delicate, thin, complaining for several weeks; incipient basilar meningitis.
Child, æt. 8, lymphatic temperament, disposed to frequent sore throats; diphtheria.
Girl, æt. 16, menses appeared at 13 without any influence upon the disease, animal magnetism and electricity benefited for a short time; epilepsy.
Young lady, of robust habit and sanguine temperament, usually modest and retiring; nymphomania.
Young woman, single, seamstress; epilepsy.
Woman, æt. 19, stout, healthy looking, began to menstruate at 14 years of age; epilepsy.
Woman, æt. 20, dwarfish appearance, suffering eight years; polypus of rectum.
Woman, æt. 25, single, teacher of music; melancholia.
Woman, æt. 30; threatened inflammation of brain.
Lady, æt. 32, unmarried, dark hair, healthy appearance, subject to severe cutting pains in hypogastrium and headaches; ovarian cyst.
Woman, æt. 38, married; ovarian enlargement.
Woman, æt. 52, change of life; affection of mind.
Man, æt. 65, weekly attacks for ten years; epilepsy.

[48] **Relations.** Antidoted by vegetable acids, oleaginous remedies, *Camphora*, *Nux vom.*, *Zincum*. It antidotes lead poisoning.
Compatible: after *Acon.* and *Spongia;* after *Eugenia jambos* in acne.
Compare: *Ambra*, *Amm. brom.*, *Bellad.* (but this drug is sthenic), *Camphora* (cholera collapse), *Gelsem.*, *Hyosc.*, *Natr. mur.* (mind), *Stramon.*, *Zincum.*

[1] **Mind.** Sudden attack of unconsciousness.

Cannot express herself; seems at a loss to know how to begin to say or do what she wishes. θPuerperal mania.

Absentminded.

Dull, confused, stupid, as after intoxication.

Imagines seeing birds flying in room; he tries to catch them.

Great aversion to being alone.

Dread of labor.

Weeps much.

Alternating mood, at one time good and quiet, at another excited and angry at trifles; constantly in antagonism with herself; frequently hopeful, frequently despondent; frets about everything; peevish, impatient, contented with nothing. θMelancholia.

Timid and apprehensive of future and about her disease.

Fear of being alone; fears she will die.

Anxiety with fear.

Despondency in open air; disappears on entering house.

Peevish, irritable; noise is disagreeable; easily startled, especially if touched; intolerance of human voice.

Irascible and passionate.

Very easily frightened; shrieks about imaginary appearances; starts when touched.

Is frightened and cries out whenever he is touched lightly on his feet.

Delirium in the night. θPleurisy.

[2] **Sensorium.** Giddiness, nausea, pressure in stomach.

Vertigo: when rapidly turning head or body; evening and morning; on turning around; as if proceeding from stomach; loss of consciousness; frequent dulness of head as after intoxication, and as if ears were stopped up, with nausea almost unto vomiting; when walking; as if head was too light, must take hold on something; and vomiting; after eating, with heat in head, red face, darkness before eyes; sometimes one cheek hot the other cold; must lie down as soon as attack comes on, otherwise he is thrown down; before he falls he has stitching pain in forehead, root of nose and in eyes; attacks several times a day.

Digitized by Google

[3] **Inner Head.** ‖Pressure and drawing tearing in forehead, extending into eyes and root of nose.
‖Pressure in forehead, with photophobia.
‖Pressive headache in forehead, in afternoon, while walking, with peevishness.
πSensation in forehead as of a hot body having descended into it when stooping.
‖Drawing in forehead, in forenoon and at midnight.
‖Pressure and tension in forehead and eyes.
‖Pressing in front of head and temples, extending into eyes, with heat in face and head. θSick headache. θBlepharitis. θCatarrhal fever.
‖Stitches in forehead and temples, < stooping, moving head, eyes or jaw; > raising head and from heat.
‖Stitches into eyes and root of nose: with catarrh; before falling down with vertigo.
‖Pinching and tearing pain in l. temple at intervals.
‖One-sided headache, with nausea.
‖Tearing drawing in l. half of head.
‖Constant sensation of something loose in head, turning and twisting toward forehead.
‖Congestion to head, with throbbing and humming.
‖Congestion of blood to head, with intoxication arising from it.
‖Congestive and catarrhal headaches, with dry, hard cough.
‖Pressive headache.
‖Headache: from riding in a carriage; from coughing or sneezing; on awaking from sleep; from coryza; with nausea; with toothache; with backache; with intermittent; with great heaviness during menses.
‖Jerking in head from behind forward; dark before eyes, unconscious; > from drink of cold water; remains weak and nauseated.
‖Pressing pain in back of head.
‖Aching in occiput, toward nape of neck, > in open air.
‖Morning headache with vertigo, aching and stitches in occiput, felt only during motion; sharp, shooting pains from upper dorsal spine into occiput.
πViolent pressure over whole skull, down nape of neck, throbbing in head and whole body < by slightest contact, and increasing in paroxysms with violent nausea and vomiting of bile.

[4] **Outer Head.** ‖Liability of head to take cold from a draft, after being heated causing headache or toothache.
‖Painful tumors on scalp, like blood boils; < from pressure and motion, > from heat; itching as if in bones.
‖Wens on scalp.
‖Hair dry, brittle, falling off, mostly from temples, eye-

Digitized by Google

brows and beard; scalp itches and burns morning and evening; oozes if scratched. θBrain disease of children.
‖Great dryness of hair after nervous fevers.
‖Perspiration on forehead in morning.

[5] **Sight and Eyes.** ‖Bright sparks, blue or green spots before eyes.
‖While reading or looking at a bright light: muscæ volitantes; sharp stitches; fog before eyes.
‖Weakness of vision.
‖‖Eyes weak: after coition; after abortion; after measles.
‖‖Inclination to stare.
‖‖Painful sensitiveness of eyes to daylight; photophobia.
‖‖Lachrymation, shunning light; pain deep in eyes.
‖‖Small round ulcers on cornea with no photophobia.
‖‖Pannus, always < after a seminal emission.
‖‖Asthenopia with sticking and drawing together of lids upon looking steadily at any object; burning, pressing pain in eyes; borders of lids red and swollen; palpebral fissure narrowed and palpebral conjunctiva hyperæmic; constant photophobia, compelled to keep eyes closed most of the time; < after using; slight rheumatism.
‖Milky, whitish spot near middle of r. cornea; vessels of conjunctiva injected; sees with r. eye as if through fog or smoke; when looking toward light lachrymation; dizziness when stooping; cannot fix sight of any object steadily without water running from eyes and feeling of dizziness; artificial light appears to have rays all around it; eye symptoms < morning; bloating after meals; flatulency; obstinate constipation and stools too large in size; cracking now and then in r. ear; expectoration of phlegm in morning with a salty taste. θConjunctivitis and leucoma.
‖‖Redness of white of eyes, with many vessels in it.
‖Smarting, burning, biting, stitching pain in eye.
‖‖Sharp tearing in r. orbit and eye at night.
‖‖Stitches in middle of eye.
‖‖Pressure in and above eyes.
‖Eyes painful on reading, as if pressed inward.
‖Corners of eyes ulcerate.
‖Soreness of external canthus, with burning pain.
‖Eyelids swollen; edges and canthi red; caruncula red and swollen; lachrymation and pain from bright light; pressing pain in front of head and temples into eyes, with heat in face and head; loss of appetite; after eating pressure in stomach; belching; nausea and emptiness in stomach; gagging and vomiting up slime; pressure and anxious feeling in chest; chilliness; cold feet; evening fever, with thirst; weariness and heavi-

Digitized by Google

ness in limbs; face pale, dirty grey; restless sleep; great deal of yawning through day. θBlepharitis.
‖Lids swollen and inflamed; agglutinated, especially mornings.
‖Lids red, swollen; tarsi worse.
‖Eyelids swollen, also left cheek and upper lip.
‖Lids of r. eye inflamed, pain in eyes and inability to read.
‖‖Puffiness; swelling between eyebrows and lids, like a sac.
‖Enormous bag-like swellings under eyes. θErysipelas.
‖Œdema of lids, especially if accompanied by sticking pains and heart indications.
‖Eyes sunken.
‖Sensation of coldness in lids.

⁶ **Hearing and Ears.** ‖‖Ringing, roaring, whizzing, singing, cracking noises in ears.
‖Headache with noises in ear after a cold drink.
‖Hearing impaired, dull. θRheumatism.
‖‖Tearing in ears.
‖Stitches from within outward; also with drawing behind ears; otitis.
‖Face pale, sometimes flushed; head and r. ear hot; pain stitch-like, drawing, especially behind ear; cheek swollen; little appetite; mouth dry; high fever with dizziness; chilliness, shuddering, some thirst but little desire to drink; anxiety in chest; pulse accelerated, uneven; weary in all the limbs.
‖‖Violent itching or tickling in ears.
‖‖Redness and heat of outer ear.
‖Right ear hot, left pale and cold. θGastritis.
‖Discharge of yellow liquid cerumen or pus.
‖Parotids, especially right, inflamed, swollen, hard.

⁷ **Smell and Nose.** ‖Dull sense of smell, especially from catarrh.
‖Fluent coryza; excessive sneezing; pain in back, headache and lassitude.
‖‖Violent fluent coryza in evening, with frequent sneezing and headache, rough voice.
‖Dry coryza, with loss of voice or hoarseness; mucus in throat, or sensation of a lump.
‖Dryness or stoppage of nose.
‖Obstruction of nose, making breathing through nostrils impossible; > when walking in open air, returns in room; itching in nose; fetid, yellow green discharge from one nostril.
‖Coryza: thick yellowish discharge with great lassitude; purulent, fetid discharge from one nostril; yellow, green or bloody mucus; sore, crusty nostrils; complete closure of nostrils.

Digitized by Google

‖Burning in nose; ulcerated nostrils; bloody, red nostrils every morning; external nose red, swollen; stinging pains.
‖Sore nose; mucous membrane swollen, covered with pimples and brown crusts; tip and wings red, swollen, with sore, stinging pain; headache; pain in stomach; nausea; belching; pulsation in abdomen; pain in limbs.
‖Nose thick and red.
‖‖Nose swollen, hard, red from tip to root.
| |Alae nasi red, swollen, suppurating, covered with yellow and grey crusts; burning pain. θStricture of œsophagus.
‖Frequent bleeding of nose.
‖Nosebleed: when washing face; every morning at 9.
| |Itching in nose.

[8] **Upper Face.** | |Paleness of face after a meal.
Face: red and hot; one cheek hot, the other cold; purple, bloated; dark red during cough, otherwise pale; pale, with weakness; sickly; with pale lips; sallow; grey; yellow; bloated, in morning.
‖‖Swelling of face, especially over eyes.
‖Stinging in cheeks; tearing stitches from a molar into forehead, eyes and temples.
‖Drawing pain in face.
| |Pimples on face and eyebrows, with redness and swelling.
‖Freckles; light brown spots; old warts; papulous eruptions.

[9] **Lower Face.** ‖Upper lip swollen; bleeding rhagades.
| |Scurf upon upper lip.
| |Dry lips. θSick headache.
‖Lips: peel, chap, swell or ulcerate.
| |Itching on chin.
‖Hard swelling of submaxillary glands.
‖Swelling of lower jaw, with looseness of teeth and enlarged submaxillary glands.

[10] **Teeth and Gums.** ‖Toothache, tearing, lancinating, with pains in facial bones.
‖Stitch pain and tearing from new molar into temple, front of head and eye; dizzy heaviness of head; bad alkaline smell from mouth; constant chilliness; dry skin, can't perspire; < from chewing. θToothache.
‖Stitches in teeth, with swelling of cheeks.
‖Pressive toothache in root of last hollow back tooth in evening.
‖Drawing toothache as soon as she gets into bed in evening, not during day.
‖Boring, pressive toothache, always after dinner, as if something got into tooth.
‖Toothache only when eating; throbbing; < when touched by anything cold or warm.

Digitized by Google

‖Teeth are loose.
‖Bad smell from teeth.

[11] **Taste and Tongue.** ‖Taste bitter; flat.
‖Tongue: white, with bad taste; after cold drinks; pale, greyish, in dyspepsia; coated grey, with sick headache.
‖Tongue swollen, covered with vesicles, tip burns as if raw, frænum sore.
‖Burning on tip of tongue, as if it was raw or covered with blisters.
‖Soreness of tip of tongue.
‖Painful pimple on tip of tongue.

[12] **Inner Mouth.** ‖Bad alkaline smell from mouth (toothache); smell like old cheese (scarlatina).
‖Foul taste in mouth; very slimy mouth.
‖‖Much saliva constantly in mouth.
‖Mouth dry: with increased saliva, in otitis; with stricture of œsophagus; in gastritis.
‖Dryness in mouth, without thirst, in evening.
‖Vesicles, painful, burning, all over inner mouth.
‖‖Sticking and biting in posterior portion of palate.
‖Chronic catarrhal inflammation of mouth and fauces.

[13] **Throat.** ‖‖Sticking pain in pharynx, as if a fish bone was sticking in it, if he becomes cold.
‖Much mucus in fauces, which she is constantly obliged to remove by hawking; sharp stitches in eyes while reading and sewing.
‖Tenacious mucus in fauces and posterior of pharynx, mornings; difficult to hawk up; sensation as of a lump.
‖‖Scraping in throat, it feels dry, parched and rough.
‖‖Throat rough, with cough.
‖Crawling in throat, causing hemming and coughing, and a feeling of tightly adhering phlegm.
Throat feels as if squeezed, as if lungs came into throat.
‖Sensation as if a stick extended from throat to l. side of abdomen, as if stick had a ball on each end.
‖‖Difficult swallowing; food descends œsophagus slowly and small particles of food easily get into windpipe.
‖Stinging when swallowing; frequent desire to swallow saliva, but frequently cannot, causing a choking.
‖Pain in back when swallowing.
‖When swallowing, food remains half way, with gagging and vomiting. θStricture of œsophagus.
‖Pain in throat; dryness and sensation of something hard in swallowing; pain extended to stomach, burning, stitching, but only felt during deglutition; finally pain concentrated in centre of chest, where, in a small space, deglutition of food found an impediment, and remained fast, till it passed after a while with excruciating pain,

Digitized by Google

followed by rush of blood to head, vomituritio and nausea; when swallowing fluid, but especially solid food, pressing, tensive pain at a point of chest, with sensation of a hard body preventing food from reaching stomach; simultaneously, burning, stitching pain in back; three corresponding vertebræ always painful, and patient shrieks when even slightly touched there; cannot sleep on back during night; restless sleep, after midnight; dry lips; dry mouth and throat; tongue coated whitish grey; severe habitual headache; pressing as of a stone, in forehead and vertex, every morning, with vertigo.

Pointed, greyish yellow complexion; dull eyes, lids glued together in morning; swelling of nose, hard, red, from top to root, on tip, red, elevated; ulcerated nostrils, covered with yellowish brown crusts, with burning pains.

[14] **Appetite, Thirst. Desires, Aversions.** No appetite; disgust for food, or ravenous appetite.

Intense thirst.

Desire: for acids; for sugar and sweets.

Aversion to food, especially meat; it has a good taste when he eats, yet he does not eat much.

Aversion to rye bread.

[15] **Eating and Drinking.** When eating: particles of food easily get into windpipe; toothache.

Eating or drinking: < cough after measles.

During eating: sleepy.

After eating: burning from stomach to throat; colic renewed; abdomen distended; pressure and fulness in stomach; stomach replete, especially after soup or coffee; sour eructations; nausea, faintness, pressure in stomach and gagging, with palpitation.

Wants to eat frequently on account of gone feeling in stomach, but least food oppresses her. ♂Sick headache.

When hungry, feels anxious, nauseated, nervous, tingling; cough and palpitation > after breakfast.

Milk and warm food disagree.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations sour; frequent in morning.

Uprisings of food and acids, following great uneasiness starting from pit of stomach.

Uprising of water from stomach, much of which she expectorates.

Nausea: and loathing; from emotions; with anxiety and faintness; after a meal; on every inward emotion; during pregnancy.

Sick during a walk, no vomiting, feels as if she must lie down and die; pregnancy.

chondrium, sharp aching or shooting, or with sense of dragging or weight, < at night; dragging or creeping in r. side, extending to shoulder; after eating, distension of stomach and abdomen; often throws up thick acid mucus; < from animal, and almost all vegetable food, except bread stuffs; frequent stinging burning aphthæ upon tongue, cheeks and inside of lips; sluggish bowels; hemorrhoids, often bleeding, with burning and tenesmus, and sore, swollen abdomen; head heavy and confused; rheumatic gnawing pains about shoulders and joints at night, < in damp and windy weather; has been in habit of taking enormous doses of magnesia.

Bloatedness of stomach, headache, chilliness, heat, nausea, thirst, bitter taste, gagging, vomiting; pressure in front of head and eyes; grey yellowish tongue; thirst; after eating, pressure and fulness of stomach, and loathing; breathing heavy; anxious; face pale; heat in head; no sleep.

Pressure in region of stomach, < in r. hypochondrium; pain < after meals, > after eating a very small quantity of food; pains generally < in morning, not extending very far and rarely going to back, mostly spreading over half of sternum when there occurs also oppression of breathing; marked relief of pain when assuming a straight position or when bending backward; sensitive to pressure in r. hypochondrium over region of stomach; every three to four days scanty, hard, lumpy stool; menses have not appeared for several months, leucorrhœal discharge every four weeks; emaciation. θPerforating ulcer.

Dyspepsia of aged persons rather inclined to obesity, or after great loss of vitality; repugnance to all food; constant chilliness, cold hands and feet; no sweat however great the heat.

[18] **Hypochondria.** Feeling of heat, burning, pinching sticking in hepatic region.

Wrenching pain in liver on stooping.

Pains in liver through to back. θKeratitis.

Pressure extending towards liver, as if starting from r. breast, with throbbing in epigastric region, which is painful to touch.

Painful stitches in r. lumbar and region of liver, with tension across abdomen; stitches < on motion; must sit stooped forward, with elbows on knees, and face in palms of hands; when walking stooped forward with hands on knees. θHepatitis.

Stitch pain in r. side of chest through to shoulder; pressive, sprained pain in liver; can lie only on r. side; complete exhaustion; neither thirst nor appetite. θIcterus.

Digitized by Google

Pain in lower extremities; on lying down, cannot get her breath; stitching pain in r. side, commencing in back, and going through chest, < at night, whether lying down or rising; < in cold air; stitching pains in knee, which sometimes swell; stitching pain through r. shoulder and shoulder blade; appetite poor; stitching pains re-appear every year about time frost sets in; external warm applications cause the pains to move to other places. θDisease of liver with hydrothorax.

Painful stitches in r. lumbar region and region of liver, with tension across abdomen; stitches < on motion or deep inspiration, and particularly from any unguarded motion; > sitting stooped forward, elbows on knees and face resting on palms of hands; in moving about room stooped forward, steadying body by placing hands on knees to guard against any sudden motion. θAfter acute hepatitis.

Swelling of liver; abscess.

Icterus, biliary colic.

[19] **Abdomen.** Shooting and stitching pains in abdomen. θPhlegmasia dolens.

Epigastrium swollen, hard, sensitive; pulsations therein; pains in hepatic and umbilical region, also on both sides of inferior parts of stomach, down into bladder and testes.

Cutting, shooting, darting stitching all over abdomen.

Stitch pain in r. side of abdomen, < from motion.

Frequent, slight cutting about umbilicus.

Cutting pain in l. side of upper abdomen, extending from lower portion of l. chest, where there is a sticking at same time.

Cutting in abdomen, as if torn to pieces.

Cutting in intestines violent; must sit bent over, pressing with both hands, or lean far back for relief; cannot sit upright.

Cutting and drawing in abdomen, like false labor pains.

Frequent cutting in abdomen, as before diarrhœa.

Laborlike colic, with pain in back.

Colic, as if intestinal canal was full of water.

Throbbing in abdomen.

Heaviness and unrest in abdomen.

Feeling of coldness in abdomen, as if cold fluid passed through intestines, during menses.

Fulness, heat and great distension in abdomen, immediately after eating a little.

Tension across abdomen; heaviness, inactivity, coldness.

Hard distension of abdomen, with painfulness of umbilical region to touch.

Hemorrhoids; constipation due to inactivity of rectum; stool difficult, too large in size, accompanied by swelling and bleeding of hemorrhoids; discharge of blood from hemorrhoids during micturition.

Sensation as if anus was fissured; can scarcely convince patient to contrary: stinging, burning, tearing, screwing, itching, biting following even natural stool, setting patient almost crazy; walks floor back and forth for relief; cannot sleep at night on account of intolerable suffering; passage of feces difficult, owing to their great bulk. *θ* Hemorrhoids.

Feels as if red hot poker was being thrust up rectum; temporarily > by sitting in cold water, and by sitting on foot so as to press on anus; bowels loose; profuse discharge of blood. *θ* Hemorrhoids.

Burning and griping in rectum.

Large painful hemorrhoids; > after riding.

Large discharge of blood from swollen hemorrhoids, with natural stool.

Protrusion of hemorrhoids during diarrhœalike stool, with needlelike stitches and burning for many hours.

Sore pain in hemorrhoids.

Inflammation, soreness, stitches and tingling, as from ascarides, in the varices.

Pain in hemorrhoids during cough.

Proctitis, with violent stitching pain.

In anus: lancinations; stitches; sticking; tearing; cutting; stitches; soreness; itching; crawling; burning.

Violent itching in anus and scrotum.

Ulcerated pimples at anus.

Anal fistula.

Ascarides. *θ* Infantile catarrh.

[21] **Urinary Organs.** Stitches in region of the kidneys.

Tensive pain in l. kidney; swelling of inguinal glands; œdema of l. foot, extending gradually to r. and upwards over whole body; blackish urine, foams on shaking, on standing leaves a thick, reddish, slimy sediment; frequent soft, pale stools; after a blow on l. side, and remaining for hours in wet clothes. *θ* Nephritis.

Pressing; stitches, sometimes dull, at others acute; smarting in both renal regions; cutting tearing in neck and region of bladder; frequent urging to urinate, with slow discharge after long waiting and effort; frequent urination, urine at first increased, afterwards diminished; fiery, pale, greenish, dark yellow, muddy urine.

Violent cutting and tearing in bladder, neck of bladder and urethra.

Obliged to urinate frequently, but there is often pressure

Digitized by Google

on bladder a long while before urine comes; even at night is obliged to rise several times on account of it, though he drinks but little.

‖Frequent urination, especially at night, with much pressure and scanty emission.

‖Urine: hot, scanty, frequent, sediment red, slimy; blackish, foaming when shaken; turbid; greenish; fiery, diminished.

‖Burning in urethra during and after micturition.

‖Urine flows slowly, with soreness and burning.

‖Prostatic discharge after micturition.

♂ **Male Sexual Organs.** ‖Sexual desire excessive, with burning sensation, or deficient.

‖After coition, weak, especially the eyes.

‖Emissions, followed by great weakness.

‖Pollutions, with voluptuous dreams.

‖Copious, painful pollutions, with subsequent painful erections.

‖Swelling of testes and spermatic cords.

‖Scrotum feels as if bruised.

‖Dragging in l. testicle and penis.

‖Itching on scrotum.

♀ **Female Sexual Organs.** ‖Uterine tumor: with flatulency; stitching pains; spells of nausea; rising at night to urinate; dysuria; tendency to uterine hemorrhage

‖Pain in small of back as though it was pressed in from both sides, with laborlike colic and leucorrhœa; also during menses. θUterine displacement.

‖Uterine prolapsus and piles.

‖Stitching pains in and about uterus; laborlike colic, leucorrhœa; pain like a weight in small of back.

‖Stitching pains about tender uterus or all over abdomen at times. θHysteralgia.

‖Nausea, vomiting, stitches through abdomen; great weakness.

‖Chronic inflammatory states of womb, with nausea and vomiting.

‖Uterine spasms, especially with profuse menstruation and intermissions in wave of pulse.

‖Severe uterine spasms when menses should appear but do not; head heavy and dull; feels hot and restless; menses usually profuse.

‖Acrid, offensive smelling, vitiated menstrual discharge, with chilliness and cramping pains in abdomen.

‖Promotes expulsion of moles.

‖Feels very badly a week before catamenia; congestion to brain and chest, hot flashes, burning pain in region of hips, intermitting pulse, stitches in chest.

Digitized by Google

Menses too early, scanty, of a pungent odor, acrid, covering thighs with an itching eruption.

Menses too early, too profuse and long lasting.

Continual profuse menstrual hemorrhages.

Profuse and long continued menstration of bright red blood in females of sanguine temperament.

Menses suppressed, with anasarca or ascites.

After severe fright, three years previously, suppression of menses; frequent, severe pains in abdomen; tongue cherry red in color, sharp pains in l. hypochondrium, < walking, also prevents her sitting down; < in evening with difficult respiration; face now pale, again very red; frequent attacks of one-sided headache, particularly at times when menses should have appeared, with severe pains in l. side of forehead, which become throbbing in nature, particularly when working, and which cause tears to flow; headache in morning, > towards evening; pulse hard and full; frequent palpitation and epistaxis; lassitude and weakness in legs, < from slightest motion.

Amenorrhœic and menorrhagic symptoms due to organic affection of heart, deficiency of healthy blood; acrid discharges.

Menses entirely suppressed, or when menses do not appear at age of puberty; difficult first menses.

Before menses: swelling of cheeks and gums; sour eructations; shooting pains over abdomen; colicky pains; nettlerash; increased sexual desire, with sensation of thrill as during an embrace, especially on awaking in morning; sour eructations; shooting or crampy pains in abdomen; itching of vulva; nocturnal restlessness; chilliness.

Violent colicky pain in abdomen before menses appear, constipation during menses.

During menses: headache with heaviness; coryza; swelling of parotid glands; pains in back, loins and abdomen, head, ears and teeth; itching of skin, nettlerash; lassitude, sleepiness; restless, dreamful sleep; foul taste in mouth, eructation, nausea, vomiting, distension and rumbling in abdomen; excoriation between legs; heavy aching in small of back and down buttocks; cutting in abdomen; griping colic with pressure in abdomen and groins; painful weight in groins; severe backache when walking; pain in back as from a heavy weight; pudendum sore, burns and itches; pressure in small of back and forepart of lower abdomen, as if everything would push out at genitals.

Pain like a weight in small of back during menses.

Digitized by Google

Great soreness about genitals, before, during and after menstruation.

Sore pain in vagina during coition.

Tearing in l. labium, extending through abdomen to chest; pinching pain in labia; stitches through vulva; soreness, gnawing, burning, itching in vulva. θVulvitis.

Pimples on vulva.

Mucous leucorrhœa.

[24] **Pregnancy. Parturition. Lactation.** During pregnancy, sickness coming on only during a walk, without vomiting, and accompanied by a feeling, as if she could lie down and die.

Feels pulsation of all arteries, even down to tips of toes; feeling of emptiness in whole body, as if body was hollow; heavy and broken down feeling; it is only with greatest effort one can make any exertion.

Vomiting, with a swoonlike failing of strength; much colicky, stitching pain in abdomen. θPregnancy.

Back aches so badly while she is walking that she says "she feels as if she could lie down in the street" to obtain immediate rest and relief.

Severe pains in small of back during pregnancy, particularly forcing and pressing in character, as if a heavy weight came into pelvis low down, occasionally becoming very annoying; also stitching, pressing proctalgia.

Abortion: impending, with pains from back into buttocks and thighs; discharge of coagula; habitual; during second or third month.

After abortion, when there is great weakness of back and lower extremities, dry cough, long continued sweats, attacks of chilliness resembling ague, chronic inflammatory condition of uterus with nausea and vomiting.

Labor pains insufficient; violent backache, wants back pressed; bearing down from back into pelvis.

Sharp, cutting pains across lumbar region, or passing off down buttocks, thus hindering labor; pulse weak.

The pains are stitching and shooting, or they are in the back, shooting down into glutei muscles or buttocks; or pass off down thighs.

Easy confinement, but adherent placenta, which was removed eighteen hours after delivery of child; one week later a considerable metrorrhagia.

Sixty hours after delivery, two chills, pricking, nettle-like pains over whole back where it touched bed; frequent shocks of a few seconds duration.

Intense thirst, morning, noon and night continually; very rapid, small pulse; distressing cutting, shooting, darting and stitching pain all over abdomen, stitching

‖Cough < by day and accompanied by pains in both sides of abdomen like two knives going inward towards each other, doubling her up, > by pressing with hands; constant raw pains in pit of stomach, < on coughing; awakes between 5 and 6 A.M., with aggravation of cough and pain in stomach and abdomen; sputa, smoke colored round lumps, a little streaked with blood, and come flying out of mouth with force without effort; cough causes sweat and exhaustion.

‖After measles, short, teasing cough, two or three paroxysms in rapid succession, dry, as if a membrane prevented breathing in trachea, or as if some tough mucus was moved about by cough without being able to expectorate it; < eating or drinking; vomiting; pain in lower part of chest where percussion is dull, with normal sound in upper part; pressure in chest with fits of suffocation in morning; general malaise; heat; headache; no appetite; dry stool; pale face; small and irregular pulse; skin always dry.

‖After pneumonia: coughs up great masses of blood and pus; night sweat; sleepless.

‖Short, teasing cough.

During evening cough, after lying down, he can raise better if he turns from l. to r. side.

‖Dislodged mucus falls back into stomach.

‖Expectoration: tastes like old cheese; sourish; of small round lumps; of blood streaked mucus; of pus.

Inner Chest and Lungs. ‖Chest feels weak, faint from walking fast.

Digitized by Google

Spasms of chest.

Cutting pain in chest: in evening, after lying down; does not know how she shall lie; < lying on r. side; in morning; in lower part of chest, especially in l. side; moving into epigastrium and leaving a stinging sensation in l. half of chest.

Stitches in sides of chest, on inspiration.

Stitching pain in lower portion of r. lung. θPleurisy.

Stitches beneath l. mamma, at times extending upward from low down in chest.

Stitches under l. mamma, and sometimes descending deep into chest; also in evening.

Dull, painful stitches in chest, from without inward, under l. clavicle, going off for a short while by pressing on parts in evening.

Dull stitches deep in l. chest under short ribs.

Sticking pressure in l. side of chest, on deep breathing.

Sticking pressure in r. side of chest.

Pressure in middle of chest, with gulping of watery phlegm; stricture of œsophagus.

Pressure in whole l. side of chest.

Pressure, heaviness, anxious feeling in chest.

Throbbing in l. side, near pit of stomach.

Chest becomes very sore, especially on talking.

Sore pain in upper part of chest, on breathing, touching, or lifting anything heavy.

Pain through lower third of r. chest to back.

Pain as if lower lobe of r. lung was adhering to ribs.

Dry cough day and night, with vomiting of ingesta and some phlegm; < after eating and drinking and in forenoon; during cough face gets dark red, otherwise it is pale; eyelids red and swollen; breathing short and anxious; heat, thirst without desire to drink; during day chilliness; cold extremities; crying all day; restless sleep, interrupted with crying and coughing; much yawning and sneezing; watery diarrhœa; discharge of worms. θCatarrh of chest.

Dyspnœa, < in spells, caused by cough, motion and drinking; breathing wheezing, labored, whistling during inspiration; face purple, bloated; region of stomach distended; arms twitch and hands move convulsively.

Difficult breathing, cannot walk fast; r. lung hepatized; pulse 106, small and hard; cannot lie on r. side, feels best lying on l. side. θPneumonia.

Pneumonia, with stitches through r. chest, hepatic inflammation; r. lung hepatized; < lying on r. side.

Pneumonia after measles; dry, hacking cough; fever; headache; stitches and pressing in chest; short breath-

ing, wheezing, rattling; dry skin; great thirst; whitish grey tongue; loss of appetite; cough < towards morning, almost choking, < from eating or drinking, causing vomiting; pain in lower part of chest, with dull percussion sound; pulse small, and somewhat irregular; face pale; skin dry; stool dry.

▮Infantile pneumonia, much rattling during resolution.

▮During resolution; exudate considerable, and sometimes on both sides; great bubbling and rattling noise; great dyspnœa, preventing child from sleeping and drinking; puffiness, with cyanosis of hands and feet; tormenting cough, which, however, brings none of tough phlegm away; diarrhœa. θPneumonia.

▮Pleurisy: stitches in l. chest, with violent palpitation; dry cough, < 3 A.M.; stitches in lower r. lung; after *Acon.*, when severe stitching pains and difficult respiration continue or return; l. side particularly affected; palpitation of heart; dry, suppressed cough; exudation on r. side; during course of tuberculosis.

▮Predominant stitches; incipient pulmonary phthisis with exhausting, dry cough, short breathing; purulent expectoration, weakness and emaciation.

In beginning of phthisis, when there is occasional discharge of masses resembling pus; transient stitches through chest; dry, distressing cough; great debility and emaciation; during disorganizing stage of tubercles.

▮Profuse expectoration of whitish yellow pus with cough, 3–4 vessels being filled daily; < at night; pressure and heaviness in head; vertigo when moving; pinching and gripping in chest with pains about epigastrium and much cough; occasionally expectoration is difficult; whistling wheezing in chest; great dyspnœa; in afternoon much chilliness, in morning and at night fever with sweat; congestion; pains in limbs; tearing, stitching pains in eyes and ears, always on same side; obstinate constipation; prostration so great he must remain in bed; face earthy; pulse changeable; offensive smelling sweat; second stage. θPhthisis.

▮Stitching pain in temples, eyes, ears, teeth, chest and different parts of body; after dinner nausea, faintishness, sleep; about noon, chilliness; at night, heat; about 3 o'clock A.M., cough <; nursing mothers. θPhthisis.

▮After pneumonia, dry, spasmodic, distressing cough; great emaciation, eyes and cheeks sunken; great depression of mind and fear of death; painful oppression and scanty breath; cough, < after midnight, causing sleeplessness; cough short, hollow, painful, paroxysmal; expectoration of yellow pus, streaked with blood or

Digitized by Google

containing small lumps of blood; great difficulty in expectorating loosened discharge; profuse night sweats; digestive disturbances; painful diarrhœa alternating with constipation; pressure in occiput.

Cough < from any exertion and < when lying down; green scabs are sometimes coughed up, and frequently hard, round, white masses fly from mouth when coughing or hawking; burning in top of head and soles of feet; sweaty palms; circumscribed red spot on one cheek; has attacks of gastric disorder which begin with belching of putrid gas, tasting like rotten eggs and ending with watery diarrhœa, < in morning; gets hungry and faint about 10 A.M.; contraction of heel cords; eruption of minute vesicles upon soles of feet; canker sores in mouth; gums bleed easily; trembling sensation through entire body, < through pelvic region; menses scanty and late; weeps very easily while stating her symptoms. θPhthisis.

Acts on lower part of r. lung.

Far advanced phthisis; expectoration of pus and blood; diarrhœa; night sweats; loss of appetite; falling away of intercostal spaces; prostration.

Pleuritis of tuberculous patients; affects especially clavicular region.

Persons suffering from ulceration of lungs can scarcely get well without this antipsoric. Hahnemann.

Far advanced hydrothorax; patient draws breath with difficulty and anxiety; hippocratic countenance.

Heart, Pulse and Circulation. Stitches about heart and through to scapula.

Palpitation: in spells, taking his breath; frequent and violent; on least exertion; with ebullitions, on waking.

Pale greyish color of face; scanty menstruation; spell of palpitation of heart; pressure and heaviness in chest; evening chilliness; stitch pain and great anxiety in pit of stomach and through chest; throat as if squeezed together, as if lungs were in throat; good appetite, but after eating pressure in stomach and chest, and gagging; shudders frequently; has dizziness in walking; nausea; cold feet; pulse feeble, uneven.

Heart's action intermittent, irregular, tumultuous, weak.

Stitching pains in r. side, commencing in back and going through chest, < at night, when lying down or rising; dry, hard cough, especially < 3 A.M.; a blowing noise and a louder secondary tick of pulmonary artery; shortness of breath early in morning; dyspnœa during fast walking; great pain in chest, especially when talking; sharp aching behind sternum, when breathing; painful

Digitized by Google

throbbing in clavicle, shoulders, side of abdomen, etc.; frequent intermission of beats of heart; crampy pain in or about heart, as if it was hanging by bands firmly drawn around; pain < taking strong inspiration, or when coughing, not during exercise; burning in region of heart; both arms go to sleep even after violent exercise; pulsative pains in upper arms, at intervals; cold hands. θAngina pectoris.

After taking cold frequent desire to swallow saliva, but often cannot do it, it then causes a choking in throat; can swallow food and drink; heart beats quicker; he feels weak; lying on r. side, heart feels suspended to l. ribs and seems dragging them to r. side; pain as if lower lobe of r. lung was adhering to ribs; difficulty of breathing; has only been able to sleep sitting up, otherwise saliva would run down throat; heart's action irregular, tumultuous; systolic murmur loudest at apex.

Systolic murmur; stitch pains; second tick loud from pulmonary stagnation; endocarditis.

In place of first tick, a blowing noise and a louder second tick of pulmonary artery. θEndocarditis.

Insufficiency of mitral valves.

Pulse: rapid mornings, less so evenings; unequal, irregular; intermitting; slow and weak.

Ebullitions, with heat from abdomen to head; pulsations.

Tendency to fatty degeneration of heart.

30 **Outer Chest.** Falling away of intercostal spaces. θPulmonary tuberculosis.

Small pimples on chest and back.

31 **Neck and Back.** Stiffness in nape of neck, morning in bed.

Back of neck stiff; shooting pains through chest; uvula elongated.

Stiffness in l. nape and down l. inner scapula, < after waking up and after laughing.

Stiffness between shoulder blades.

Neck feels large, clothing tight; congestion.

Swelling of cervical glands.

Tickling in glandular swelling of neck > on pressing with cold hand.

Pimples on nape of neck.

Stitches in r. scapula on breathing.

Tearing in r. scapula, in morning.

Stinging pain as from blows and bruises, in r. scapula, when in motion; may be felt as far as chest.

Violent stinging pain as from a sprain in l. scapula, extending into chest.

Stitch from apex of scapula to pit of stomach, during fatiguing labor.

Digitized by Google

Burning tearing near r. side of spine, above small of back.
Drawing pain in small of back.
Pain in small of back < after standing or walking
Pain in small of back after a fall.
Feeling in morning as if small of back was pressed inward from both sides. θUterine displacement.
Hard pressure in small of back.
Sharp pains in small of back, with very acute laborlike pains running through to front at intervals of a few minutes, occasionally shooting down to glutei muscles.
Pressure or stitches in region of both kidneys.
Backache; while walking, she feels as if she must give up and lie down.
Bruised pain in back, during rest.
Occasional stitch from small of back, through l. side of abdomen, toward chest.
Sharp, stitching pains awaken him 3 A.M., he must get up and walk about; pains shoot from loins into nates; pulse weak, soft. θLumbago.
Stitching and shooting pains in back, shooting down into gluteal region or hips.
Back aches as if broken.
Tearing in lumbar muscles, impeding respiration.
Great weakness in small of back and lower limbs.
Stiffness and pain in small of back. θAmenorrhœa.
Pain across sacrum like labor pains; feeling of tightening of skin of lower abdomen; feeling of weight in abdomen on walking, and especially on standing.
Gnawing in os coccygis.

Upper Limbs. Tearing in l. shoulder joint.
Pain, as from blows, under r. shoulder, when moving or touching it.
Cracking in shoulder joint, when moving or raising arm.
Axillary glands swollen, painful.
Sweat in axillæ.
Weakness and loss of power in arms.
Weakness in arms, mornings; arms feel numb, cold, go to sleep when lain on.
Pulsating pain in l. upper arm by pauses.
Drawing and tearing in elbows; stiffness.
Weakness, with cramps in hand and fingers; paresis.
Hands fall asleep.
Hands tremble when writing, mornings.
Laming pain in wrists.
Hands and arms covered with purplish spots.
Skin on hands rough and chapped.
Palms itch; vesicles form.
Dull, pressive tearing in hands, between thumb and index finger.

Digitized by Google

‖Cramping of fingers while sewing.
❙Burning pain like glowing coals, two fingers of l. hand.
‖Stitching tearing extending into finger joints.
❙Finger tips go to sleep early in morning.
‖Spreading vesicles on l. index finger; discharge watery.

[33] **Lower Limbs.** ❙Crampy tearing in hip joint and knee; bruised pain when moving or sneezing. θCoxalgia.
❙Paralytic weakness in hip joint.
❙Pains in r. leg, which is a fingers' breadth longer than l.; gluteo femoral fold almost obliterated; very weak, cannot stand alone, has not taken a step for eight months; spine curved; every change of position causes a pitiable cry. θMorbus coxarius.
❙Left lower extremity elongated about two fingers' breadth; gluteo femoral crease obliterated; knees slightly flexed as if anchylosed, permitting neither flexion nor extension of leg; violent lancinating pains in thigh and knee. θMorbus coxarius.
❙For last ten days would not walk; considerable lengthening of r. lower extremity; folds of nates almost obliterated; touch not painful. θMorbus coxarius.
❙Sharp drawing pains in r. knee and thigh; affected leg about three fingers' breadth longer than sound one; nates flattened; movement of joint painful, although pressure caused no discomfort; pulse feverish; loss of appetite; tongue coated white; pains < at night; little sleep. θMorbus coxarius.
❙Pains and heaviness in l. thigh, < walking, and especially by forced marches; l. leg a finger's length longer than r., and head of femur partly forced out of acetabulum, threatening luxation. θMorbus coxarius.
‖Twitching of thigh muscles. θCoxalgia.
❙Lower extremities frequently fall asleep.
‖Feeling of numbness and great inclination of whole r. leg to fall asleep.
‖Paralytic drawing in whole thigh.
‖Jerkings in muscles of thighs.
❙Pains shoot down backs of thighs. θLumbago.
‖Cramp in r. thigh and calf woke him twice at night.
‖Swelling, heat and redness of thighs. θPleurisy.
❙Difficulty in knees on going down stairs, and still more on going up.
❙Dull pains in side of knee, walking or extending leg.
‖Frequent tearing in knees.
❙Nightly rheumatic pains in legs.
‖Restlessness of legs in evening.
‖Tearing in both tibiæ, with pain in periosteum when touched and a feeling of tension when walking.

Digitized by Google

‖Drawing and tearing in bones of legs.
❙Drawing pain in tibia with aching in joints; ulcerative pain on pressure.
❙Burning and stinging in legs and feet.
❙Creepy chilly sensation on shins.
‖Herpes on legs and thighs.
‖Vesicles on tibia, with inflamed areola.
‖Frequent tearing in ankles.
‖Tearing on inside of foot and on sole.
❙Feet heavy, stiff; fall asleep after dinner.
❙Swelling of legs or of feet to ankles.
❙Feet cold in evening in bed.
❙Œdema of l. foot, extending to r. and upwards, becoming general. θNephritis.
❙Profuse fetid foot sweat; suppressed foot sweat.
‖Tearing in toes; in first phalanx of great toe.
❙Stinging and burning in ball of great toe.
❙Violent itching on great toe, beneath nail, with pain when touched.

[34] **Limbs in General.** Pains mostly in upper arms and lower part of legs, < on going to sleep.
‖Uneasiness in limbs, in evening; is obliged to move them about.
❙Heaviness in limbs; she is scarcely able to lift feet.
❙❙Jerking of legs on falling asleep.
❙Drawing, tearing, stitching pains in limbs.
‖Limbs pain when resting them upon any object.
‖Limbs fall asleep while lying.
‖Pressive pain in joints.
‖Sticking in joints and tendons.
❙Cracking in joints on motion.
❙Extremities very tired, with nightly diarrhœa and asthmatic cough.
❙Limbs tired and cold.
❙Puffiness; hands and feet cyanotic.
‖Spasmodic contraction of fingers and toes.

[35] **Rest. Position. Motion.** Rest: bruised pain in back.
On lying down: cannot get her breath; cough <; stitching pains in r. side <; chill >.
After lying down: cutting pains in chest; does not know how she shall lie; during evening cough; can raise better if he turns from l. to r. side.
Cannot sleep on back in night.
Lying on r. side: pain in chest <; heart feels suspended to l. ribs.
Can lie only on r. side.
Cannot lie on r. side, feels best when lying on l. side.
When lying on arm: it feels numb, cold, goes to sleep.

Digitized by Google

Desire to lie down.
Must lie down: when vertigo comes on.
Could lie down in the street while walking, to obtain relief from backache.
If he does not at once lie down, he gets such a vertigo that everything seems to be whirling round, and even if he catches hold of something he falls to the ground, where he lies with staring eyes.
Cannot stand alone: r. leg longer than left.
Sitting: feeling of tension of lower abdomen; the only position in which patient could sleep; severe pain in l. hypochondrium.
Must sit stooped forward with elbows on knees, and face in palms of hands.
Must sit bent over pressing with both hands, or lean far back for relief, cannot sit upright, with backache.
Must lean forward: on account of severe pain in pit of stomach; asthma.
Stooping: stitches in forehead <; dizziness; pain at pit of stomach <; vertigo; wabbling in stomach; wrenching pain in liver; pressure in lower part of abdomen.
When assuming a straight position or when bending backward: marked relief of pain.
Raising head: stitches in forehead >.
Motion: headache with vertigo; < pain in tumors on scalp; severe pressure in stomach <; wabbling in stomach; stitches in lumbar region <; stitch pain in abdomen <; dyspnœa; stinging pain in r. scapula; of arm causes cracking in shoulder joint; causes bruised pain in legs; of joint of leg causes pain; cracking in joints; chilliness.
From slightest motion: lassitude and weakness in legs <.
Any exertion: asthma <; cough <; palpitation.
Rising: stitching pains in r. side <.
Moving head, eyes and jaw: stitches in forehead <.
Turning head or body: produces vertigo.
Raising arms: causes cracking of shoulder joints.
Scarcely able to lift foot: on account of heaviness of limbs.
Extending leg: causes dull pains in side of knee.
In moving about room: stooped forward steadying body by placing hands on knees to guard against any sudden motion.
Any unguarded motion: stitches <.
Walking: causes vertigo; obstruction in nose >; respiration oppressed; difficult, anxious breathing; sensation of unsteadiness of heart; feeling of tension of lower abdomen; pains in l. hypochondrium <; backache; brings on sickness during pregnancy; tension across chest, on expiration; respiration heavy, oppressed;

Digitized by Google

asthma <; dizziness; dyspnœa; pain in small of back <: feels as though she must lie down; feels a tightness of skin of abdomen; pain in thigh <; dull pain in knee; feeling of tension in both tibiæ; irksome, limbs heavy; walks floor back and forth for relief.

During a walk: sick, no vomiting.

Must get up and walk: on account of sharp, stitching pains in back.

Going up and down stairs difficult: on account of knee symptoms.

Rapid walking: weakness and weariness of chest.

During fatiguing labor: stitch from apex of scapula to pit of stomach.

Violent exercise does not prevent arms from going asleep.

[36] **Nerves.** ‖Sudden shrieking; redness of face and eyes; striking about with hands; grasping at head and chest, and incoherent talk; sees figures, old repulsive persons which fill her with fear; head hot, temperature of rest of body being normal; spasmodic flexion of fingers; after one to five minutes attack passes off, followed by headache, spasmodic constriction of chest and general sweat; attacks come on several times during night or in daytime; several days before attack, headache, loss of appetite and nausea; during intermediate time perfectly well. θHysteria.

‖‖Cannot bear to be touched; starts when touched ever so lightly, especially on feet.

‖Twitching here and there in muscles.

‖Spasms, with full consciousness; puerperal spasms seem to pass off with frequent eructations.

‖‖Frequent exhaustion, feels she must lie down or sit.

‖Whole body heavy or broken down; it is only with great effort she can make any exertion. θAfter labor.

‖Complete exhaustion. θIcterus. θTuberculosis.

‖‖Debility and desire to lie down.

‖Heaviness, especially of feet; walking becomes irksome.

‖Paresis; trembling.

‖Paralytic conditions which slowly and insidiously develop; attacks of vertigo in open air; finally paralysis of lower limbs, upper limbs also becoming involved.

[37] **Sleep.** ‖Yawns continually. θSick headache. θBlepharitis. θInfantile catarrh.

‖‖Great sleepiness: during day and early in evening; while eating; after eating, with chilliness and yawning.

‖‖Unable to fall asleep before 11 or 12 o'clock.

‖‖Wakes about 1 or 2 A.M., cannot sleep again.

‖‖Awakening between 2 and 4 A.M., with nearly all ailments, but especially those of throat and chest.

Digitized by Google

Aroused by asthma.
No sleep; gastric ailments.
Restless sleep.
During sleep: starting; limbs twitch; gnashing teeth; crying; talking.
Frequent awakening, with desire to urinate.
Anxious dreams.
Dreams: of water; thieves; ghosts; diseases; dead people; misfortunes; erotic, imaginative, fantastic, sentimental.

[36] **Time.** Morning: vertigo; headache with vertigo; scalp itches and burns; perspiration on forehead; eye symptoms <; expectoration of phlegm; eyelids agglutinated; face bloated; tenacious mucus in fauces; eructations; headache begins; cough <; dry cough, with burning; exhausted; pains in stomach generally <; headache on awaking; increased sexual desire, with sensation of thrill as during an embrace; intense thirst; choking and gagging unto vomiting; leucorrhœa <; shortness of breath; asthma <; dry cough with burning in chest; pressure in chest, with fits of suffocation; cough <; fever with sweat; gastric disorders; shortness of breath; pulse rapid; stiffness of neck; tearing in r. scapula; feeling as if small of back was pressed inward from both sides; weakness in arms; hands tremble when writing; finger tips go to sleep; chilliness; heat; sweat; headache rouses him.
2 A.M.: pressing tensive pain in stomach awakens; dry cough awakes him.
2 or 3 A.M.: awakened by tensive pain at pit of stomach; great dryness of throat; scarlet fever <.
Between 2 and 4 A.M. awakes with all ailments.
3 A.M.: terrible attacks of asthma; whooping cough <; dry cough <; stitching pain awakens him, must get up and walk; aggravation regularly.
At 3 or 4 A.M.: diarrhœa <.
5 A.M.: suffocating and choking cough.
Between 5 and 6 A.M. awakes with aggravation of cough.
9 A.M.: headache worst.
10 A.M.: gets hungry and faint.
Forenoon: dry cough <.
Noon: intense thirst; chilliness; headache >.
Early part of day: hawking of mucus.
During day: great deal of yawning; toothache >; chilliness; sleepy; burning at anus; diarrhœa <; cough <; dry cough; crying; sleepiness; frequent shudderings.
Day: severe cough.
Afternoon: drawing in forehead; much chilliness; nausea.
Evening: vertigo; scalp itches and burns; fever and thirst;

Digitized by Google

violent fluent coryza; pressive toothache; toothache in bed; dryness in mouth; takes a long while to fall asleep; cough <; dry cough with burning in chest; eruption on back and thighs itches greatly; chilliness; diarrhœa <; pains in l. hypochondrium <; headache >; offensive breath <; asthma; dry cough with burning in chest; fatiguing cough; violent cough after lying some time in bed; stitches beneath l. mamma; dull stitches in chest >; pulse less rapid; restlessness of legs; feet cold; uneasiness of limbs; sleepiness; chills begin; fever.

Night: delirium; sharp tearing in r. orbit and eye; cannot sleep on back; severe cutting, lancinating pain in pit of stomach <; mouth, throat and lips dry; sleepless, then headache; sometimes vertigo; frequent desire to pass urine; sharp aching in hypochondrium <; rheumatic gnawing pains about shoulders and joints; stitching pain in r. side <; diarrhœa; cannot sleep on account of intolerable suffering; obliged to urinate frequently; restlessness; chilliness; intense thirst; convulsive and tickling cough; severe cough; arrest of breathing awaking him; asthma; dry, hard cough somewhat troublesome, but much < at 4 A.M.; awakened by cough; sweats; dry cough; expectoration <; fever with sweat; heat; stitching pains in r. side <; pains in leg <; ulcers bleeding.

Midnight: drawing in forehead.

After midnight: severe cutting pains in pit of stomach <; cough <.

30 **Temperature and Weather.** ‖Very much inclined to take cold.

Heat: stitches in forehead and temples >; pain in tumors on scalp >.

Warm applications: cause pain to move to other places.

Warm drinks: < sweat.

Warm room: chill >.

In room: obstruction of nose returns.

Open air: despondent; aching in occiput >; obstruction in nose >; vertigo; chill <.

Change of air: sensitive to.

Anything cold or warm: < toothache.

Draft: easily gives cold, toothache and headache.

Windy weather: gnawing in shoulders and joints <.

Damp weather: pressure in stomach <; rheumatic gnawing about shoulders and joints <.

Washing face: causes nosebleed.

Washing in cold water: red spots on face.

Sitting in cold water: temporarily > feeling of red hot poker thrust up rectum.

Digitized by Google

Cold water: drinking > jerking in head; while overheated, difficult respiration, pyrosis.
Cold air: stitching pain in r. side <.
When cold and damp have induced vascular irritation; chronic bronchitis.

40 **Fever.** ‖Frequent shuddering during day.
‖Great chilliness.
‖Chilly in morning, also about noon.
‖Chill: < outdoors; begins toward evening, > near warm stove and after lying down.
‖Chilliness: after eating; on every motion, even in bed.
‖Chill after the pains. θLabor.
‖Cold hands and cold feet in bed.
‖Heat during morning hours, beginning in bed.
‖Heat with long yawning, stitching pain in head and chest, pulsations in abdomen.
‖Internal heat, external chilliness.
‖Chill and heat, with dyspnœa.
‖Evening fever; chilly with thirst, then heat without thirst; with violent, fluent coryza; later slight sweat, with sound sleep.
‖Constant chilliness, violent thirst from internal heat; hot hands; loathing of food.
‖Chill and fever, with oppression of breathing, constriction of chest, pain in region of liver, thirst < during chill.
‖Entire want of perspiration.
‖Sweat: on every mental exertion, reading, writing; mostly on upper parts; every night; all night without relief; in morning; after eating; < by warm drinks; easily excited by exercise; offensive or sour smelling; of axillæ and perineum.
‖Night sweats, with cough. θAfter pneumonia. θPhthisis.
Type: quotidian; same time every day.
‖Intermittent fevers with whooping cough.
‖After taking cold in a draft of air, and becoming heated, heaviness of limbs, tearing in whole body and head, roaring in ears, general coldness, during following night sour smelling perspiration.
‖Chill severe, shaking him dreadfully for two hours; after chill, nausea and vomiting of bile; during chill and fever breathes very quick, from oppression of chest, cannot well talk on account of oppression; is not restless, but suffers from anguish; lies quiet; much thirst; no sleep, perspires all night; no appetite; pain in liver, which seems to be smaller than usual. θAgue.
‖Fever, lasting from morning till noon, beginning with chilliness, heat in head, headache, thirst, swelling and redness of face, and lasting till noon, with loss of appe-

tite; afternoon free, with exception of debility and sensitiveness to change of air, ends at night with slight perspiration; during paroxysms, headache, stitches and pressure in forehead and eyes; pains deep in eyes, with photophobia and lachrymation; pain at first pressing, then stitching, bringing tears to eyes; sparks before eyes, and staring look; after half an hour, dimness and mist before eyes; upper eyelids swollen; face red, hot; headache rouses him out of sleep in morning, < in intensity up to 9 A.M.; thirst; roaring and swashing noises in ears; towards noon >, but again < by taking solids or fluids into stomach; for last two days it never ceased during day and rendered nights sleepless; coughing or sneezing renders headache nearly unbearable.

‖Chill every morning till noon; slight perspiration at night; headache; stitch pain and pressure in front of head down into eyes; pain deep in eyes, with photophobia and lachrymation; pain first pressing, then stitchlike, causes to cry; flashes like lightning and sparks in eyes; staring look; half an hour afterwards foggy and dark before eyes; upper lids swollen; face red and hot; headache awakens him in morning out of sleep, < coughing and sneezing; urine red yellow; stool dry.

‖Chilliness with headache; pressure and stitch pain in front of head, in temples, extending into eyes; can scarcely see; must shut eyes; vertigo; nausea; swelling of eyelids, of l. cheek and upper lip, with burning, thirst and heat. θCatarrhal fever.

‖After catching cold, vomiting; headache; nervousness and irritability; pale face; anorexia; pulse intermittent; disease finally becoming typhoid in character.

‖Intermitting pulse, vomiting, headache, nervousness, easily frightened, pale, sickly complexion. θTyphoid.

" **Attacks, Periodicity.** ‖Pains recur at 2 or 3 A.M., so that he is unable to remain lying, and are < than during day while moving about.

Two or three paroxysms of short, teasing cough in rapid succession.

At intervals: pinching, tearing pain in l. temple; pulsative pains in upper arms; sharp pains runing from back through to front of abdomen.

Every half hour after 3 A.M: cough.

Every two or three hours: asthma returns.

An hour or two before a passage: feels distressed.

Several times a day: vertigo.

Three times at night: urine passes.

Several times in one night or day: hysteria.

Twice in one night: awakened by cramps in r. thigh and calf

Digitized by Google

Every morning: bloody, red nostrils; at 9 A.M., nosebleed; pressing in forehead and vertex, vertigo; chill till noon.
Nightly: diarrhœa; rheumatic pains in legs; sweats.
Every three or four days: scanty, hard, lumpy stool.
Every eight or ten days: stools of large lumps.
One week before catamenia: feels very badly.
Every four weeks: leucorrhœal discharge.
Every year when frost sets in: stitching pain reappears.
For two hours: violent chill.
From morning till noon: fever.
For two days: headache did not cease.
For last ten days: would not walk.
For several weeks: nightly diarrhœa.
For eight months: has not taken a step.

[42] **Locality and Direction.** Right: milky whitish spot near middle of cornea; sees as if through fog or smoke; cracking in ear; sharp tearing in orbit and eye; lids of eye inflamed; ear hot; parotid swollen, inflamed, hard; dragging or creeping on side; pressure < in hypochondrium; pressure as if starting from breast; painful stitches in lumbar region; stitch pain in side of chest through to shoulder; can lie only on side; stitching pain in r. side; stitching pain through shoulder and shoulder blade; stitch pain in side of abdomen; œdema of foot; as of lump rising from side of abdomen to throat; lying on side pain in chest <; stitching pain in lower portion of lung; sticking pressure in side of chest; pain through lower third of chest to back; pain as if lower lobe of lung was adhering to ribs; lung hepatized; cannot lie on side; stitches through chest; exudation in tuberculosis; stitching pains in side from back through to chest; lying on side heart feels suspended to l. ribs; stitches in scapula; tearing in scapula; stinging pain in scapula; burning tearing near side of spine; pains as from blows under shoulder; pains in leg; sharp drawing pains in knee and thigh; leg inclined to go to sleep; cramps in thigh and calf; œdema; swelling of parotid gland; swelling of face beginning at eye.

Left: pinching, tearing pain in temple; tearing drawing in half of head; cheek swollen; ear pale and cold; sensation as if a stick extended from throat to side of abdomen; cutting in side of stomach and pressure spreads to ribs; cutting pain in side of upper abdomen, extending from lower portion of chest; tensive pain in kidney; œdema of foot; dragging in testicle; severe pains in hypochondrium; severe pain in side of forehead; tearing in labium; hard caked swelling of submaxillary gland; stitching pain in

side; cutting pains in chest; stinging sensation in half of chest; stitches beneath mamma; dull stitches under clavicle; dull stitches deep in chest under short ribs; sticking pressure in side of chest; pressure in whole side of chest; throbbing in side, near pit of stomach; feels best lying on l. side; stitches in chest; when lying on r. side heart feels suspended to ribs and seems dragging them to r. side; stiffness of nape and down inner scapula; violent stinging pain in scapula; stitch from small of back through side of abdomen; tearing in shoulder joint; burning pain in two fingers; spreading vesicles on index finger; leg little longer than r.; pains and heaviness of thigh; œdema of foot; erysipelatous inflammation on arm.

From r. to l. side: œdematous swelling under eyebrows.

From within outward: stitches in ear.

From without inward: stitches in chest.

From behind forward: jerking in head.

From upper to lower parts: rheumatism.

[43] **Sensations.** Feeling of emptiness in whole body as if it was hollow.

Stitches in stomach, abdomen and back.

Pains: stitching, darting, < during rest and lying on affected side.

☞ Sticking, stitching pains.

Pinching pain in internal parts.

Sensation of a lump rolling over and over on coughing, rising from r. abdomen up to throat then back again.

Feeling as if bed was sinking from under her.

Vertigo, as if proceeding from stomach; dulness as after intoxication and as if ears were stopped up; as if head was too light; as of a hot body having descended into it when stooping; as if something was loose in head; itching as if in bones; sees as if through a fog; eyes as if pressed inward; tip of tongue burns as if raw; as if a fish bone was sticking in throat; as of a lump in pharynx; throat feels as if squeezed; as if lungs came into throat; as if a stick with ball at each end extended from throat to abdomen; pressing of a stone in forehead and vertex; feels as if she must lie down; stomach feels as if it would burst; as if stomach was full of water; stomach feels as if it was cut to pieces; in middle of chest feeling as of a hard ball; pressure as if starting from r. breast; as if abdomen was torn to pieces; as if intestinal canal was full of water; as if cold fluid passed through intestines; as if rectum was too weak to expel stool; anus feels as if lacerated; as if anus was fissured; as if red hot poker was thrust up rectum;

Digitized by Google

scrotum feels as if bruised; small of back as though it was pressed in from both sides; like a weight in small of back; as if everything would push out at genitals; as if she would lie down and die; as if body was hollow; as if a heavy weight came down into pelvis low down; dry cough as if a membrane prevented breathing, in trachea, or as if some tough membrane was moved about by cough; as if there was no air in chest; pain like two knives going inward towards each other; as if lower lobe of r. lung was adhering to ribs; throat as if squeezed together; as if lungs were in throat; as if heart was held by bands firmly drawn round; neck as if large; tearing in r. scapula as from blows and bruises; stinging as from a sprain in l. scapula; back aches as if broken; liver as if smaller than usual.

Pain: in forehead; in ears; deep in eyes; in teeth; in back; from back into buttocks and thighs; in limbs; in facial bones; in throat extending to stomach; in centre of chest; in cul de sac radiating to chest; in stomach; in sacrum; in small of back; in pit of stomach; in l. hypochondrium; in liver; through to back; in lower extremities; in hepatic and umbilical region; on both sides of inferior parts of stomach down into bladder and testes; in hemorrhoids during cough; in loins; in abdomen; in head; moves over ribs to back; on both sides of abdomen; in lower part of chest where percussion is dull; through lower third of r. chest to back; in small of back; across sacrum; under r. shoulder; in r. leg; in l. thigh; in region of liver.

Excruciating pain: in throat when swallowing.

Violent pain: in back.

Severe pain: in abdomen; in l. side of forehead; in small of back.

Great pain: in chest.

Very acute laborlike pains: from back through to front.

Acute pain: in chest.

Sharp pains: in l. hypochondrium; in small of back.

Violent lancinating pain: in thigh and knee.

Lancinating: in teeth; in pit of stomach; in anus.

Sharp, cutting pain: across lumbar region or passing off down buttocks.

Cutting: in stomach; in l. side of stomach; all over abdomen; l. side of abdomen from lower portion of l. chest; in intestines; in anus; in neck and region of bladder; in urethra; in chest.

Slight cutting: about umbilicus.

Tearing pain: in l. temple; in ears; in limbs; in anus; neck and region of bladder; in urethra; in l. labium;

Digitized by Google

in r. scapula; in lumbar muscles; in l. shoulder joint; in elbows; in knees; in both tibiæ; in bones of legs; in ankle; in inside of foot and on soles; in toes; in first phalanx of great toe; in limbs; in whole body.
Tearing stitches: from a molar into forehead; in mammæ; in eyes; in ears; into finger joints.
Sharp tearing: in r. orbit.
Burning tearing: near r. side of spine.
Crampy tearing: in hip joint and knees.
Drawing tearing: in forehead; in eyes; in root of nose; in l. side of head; in bones of legs.
Dull, pressive tearing: in hands between thumb and index finger.
Shooting pain: in forehead; in root of nose and eyes; in epigastrium; in abdomen; over abdomen through chest; to glutei muscles; from loins into nates; down backs of thighs.
Sharp shooting pains: from upper dorsal spine into occiput.
Stitches: in forehead; in temples; in eyes; root of nose; in occiput; in eyes; in middle of eye; in ears; in teeth; in pit of stomach; in stomach; in back and chest; in r. lumbar and region of liver; in r. side; in lower abdomen; in groins; in the varices; in anus; in region of the kidneys; through abdomen; through vulva; in and about uterus; in rectum; in r. side of chest; beneath l. mamma, at times extending upwards from low down in chest; through r. chest; in l. chest; in lower lung; about heart through to scapula; in r. scapula; from apex of scapula to pit of stomach; in region of kidneys; from molar into temples; in r. side from back through to chest; in knees; in lower r. lung; in limbs; in abdomen.
Darting stitching: all over abdomen.
Transient stitches: through chest.
Occasional stitch: from small of back through l. side of abdomen, toward chest.
Dull stitches: in chest; deep in l. chest under short ribs.
Sticking: in posterior portion of palate; in pharynx; in hepatic region; in l. chest; in anus; in joints and tendons.
Sticking pressure: in l. side of chest; in r. side of chest.
Violent stinging pains: in l. scapula.
Stinging pains: in nose; in cheeks; when swallowing; in anus; in throat and chest; in r. scapula; in legs and feet; in ball of great toe; in joints and inner parts.
Stinging, burning aphthæ: upon tongue, cheeks and inside of lips.
Nettlelike pains: over whole back.
Pricking pains: over whole back.

Digitized by Google

Pricking: in hemorrhoids.
Beating: in epigastrium; in scrobiculus cordis.
Violent throbbing: in stomach.
Painful throbbing: in clavicle, shoulders, side of abdomen.
Throbbing: in head; whole body; in epigastric region; in pit of stomach; in præcordial region; in abdomen; in forehead; in l. side, near pit of stomach.
Pulsative pains: in upper arms.
Biting pain: in eyes; in posterior portion of palate; in anus.
Burning pain: in external canthus; in back; in region of hips; on two fingers of l. hand.
Pinching pain: in l. temple; in hepatic region; in abdomen; after stool; in labia; in chest.
Screwing: in anus.
Wrenching pain: in liver.
Griping: in abdomen.
Grasping: very painful, extending over chest.
Gripping: in chest.
Violent colicky pains: in abdomen.
Crampy pain: in or about heart; in abdomen.
Cramping: of hands while sewing.
Cramp: in r. thigh and calf.
Laborlike colic, with pain in back.
Gnawing: in vulva; in os coccygis.
Boring: in teeth.
Drawing: behind ears; in face; in teeth; in abdomen; in small of back; in elbows; in r. knee and thigh; in both legs; in tibiæ.
Dragging: in r. side, extending to shoulder; in l. testicle and penis.
Digging: in stomach.
Sore pain: in hemorrhoids; in vagina; upper chest.
Burning: in scalp; in eyes; in nose; on tip of tongue; all over inner mouth; from stomach to throat; in pit of stomach; in chest; of hemorrhoids; in hepatic region; at anus; in rectum; in urethra; in pudendum; in vulva; in top of head and soles of feet; in region of heart; in legs and feet; in ball of great toe; on skin; of herpes.
Soreness: in external canthus; of tip of tongue; in the varices; in anus; of pudendum; about genitals; in vulva; of chest.
Ulcerative pain: in legs.
Tensive pain: in pit of stomach; in l. kidney.
Bruised pain: in back; in hip joint and knee.
Pressing pain: in back of head; in eyes; in forepart of head into eyes; in chest.

Digitized by Google

Pressive pain: in forehead; in root of tooth; in teeth; in chest; in stomach and scrobiculus; in liver; in limbs.
Sprained pain: in liver.
Rheumatic gnawing pains about shoulders and joints; in legs.
Sharp aching: behind sternum.
Constant raw pain: in pit of stomach.
Laming pain: in wrists.
Rough pain: in larynx.
Dull pains: in side of knee.
Heavy aching: in small of back and down buttocks.
Aching: in occiput; in pit of stomach; in epigastrium; in back; in joints of legs.
Severe pressure: in stomach; over whole skull; in small of back.
Pressure: in occiput; in stomach; in forehead, temples and eyes; in and above eyes; in chest; in pit of stomach; over chest to pit of throat; over chest, extending to back; spreads to l. ribs, to liver and back; in r. hypochondrium; in lower part of abdomen; in middle of chest; in side of chest; in region of kidneys; in scars.
Paralytic drawing: in whole thigh.
Heavy beating: in pit of stomach.
Jerking: in head; in muscles of thigh; of legs.
Smarting: in eyes; in both renal regions.
Tingling: in the varices.
Scraping: in larynx.
Scratching: in throat and chest.
Parched feeling: in larynx.
Tickling: in ears; in throat; in glandular swelling of neck.
Cracking: in ear.
Dryness: of nose; in mouth; in throat; in larynx.
Humming: in head.
Dulness: of head.
Sensation of lump rolling over and over, on coughing, rising from r. abdomen to throat and back again.
Sensation of lump in throat.
Sensation of unsteadiness of heart.
Uneasiness: of heart; of limbs.
Weakness: in arms; in hands and fingers.
Gone feeling: in pit of stomach.
Emptiness: in pit of stomach.
Painful weight: in groins.
Painful bloatedness: in groins.
Fulness: in stomach; of abdomen; in scrobiculus cordis.
Swollen feeling: about whole epigastric region.
Great distension in abdomen.
Tension: in stomach; in pit of stomach; in legs; in scars.

Digitized by Google

Constriction: of chest.
Heaviness: of head; of limbs; in stomach; in abdomen; of chest; of l. thigh; of feet.
Feeling of weight: in abdomen.
Feeling of tightening: of skin of lower abdomen.
Stiffness: in nape of neck; in l. nape and down l. inner scapula, between shoulder blades; small of back; feet.
Numbness of arms; of whole r. leg.
Crawling: in throat; in anus.
Trembling sensation: through entire body; < through pelvic region.
Violent itching: in anus and scrotum.
Itching: in tumors on scalp; of scalp; in ears; in nose; on chin; about anus; in anus; on scrotum; of vulva; of skin; in pudendum; of herpes; of warts.
Creeping: in r. side, extending to shoulder.
Creepy, chilly sensation on shins.

" **Tissues.** ‖Paresis.
Twitching of muscles; muscles rigid; tremulous lassitude.
‖Atony of muscular tissue; disposition to easy overlifting.
‖‖Oppression of breathing accompanies most complaints.
‖‖Anæmia, with great debility, skin watery, milky white.
‖Easily takes cold.
‖Obesity.
‖Disposition to phlebitis.
‖Morbus coxarius.
‖Dropsical affections and paralysis of old persons.
‖Ascites in complication with liver and heart affections, especially of old people.
‖Body, legs and scrotum dropsically swollen.
‖Rheumatism, often attacking heart, generally going from upper to lower parts; painful swelling; gout.
‖Stinging pains in joints and inner parts.
‖Swelling and induration of glands.
‖Bleeding, boring, burning, corroding ulcers; disposition to phlebitis; pus copious, bloody, ichorous, thin, watery.
‖Ulcers, bleeding at night.
‖Chronic catarrh, ozæna, with rheumatism or gout.
‖Emaciation. θStricture of œsophagus.

" **Touch. Passive Motion. Injuries.** After a fall: first pain under l. shoulder, afterwards small of back, into thigh, bruised feeling between shoulder blades, sometimes in both arms.
Slightest contact: < violent pressure over whole skull.
Slightest touch, especially on feet: makes her start.
Cannot bear to be touched.
Touch: startles; causes pain which makes patient shriek; epigastric region painful; pit of stomach sensitive;

Digitized by Google

painfulness of umbilical region; abdominal muscles painful; causes sore pain in upper part of chest; of shoulder causes pain; causes tearing in both tibiæ; pain in great toe; parotid gland tender.

Pressure: < pain in tumors on scalp; stomach sore externally; gastric region sensitive; stomach bloated and painful; lump in pit of stomach sensitive; scrobiculus cordis painful; r. hypochondrium sensitive; of hands on abdomen > pain; dull stitches in chest >; tickling in glandular swelling of neck >; causes no discomfort in affected leg; ulcerative pain in tibia.

Can hardly bear pressure of clothing.

When resting limbs on any object, pains in them.

Driving: unsteadiness of heart.

Riding: < large painful hemorrhoids.

Riding in a carriage: causes headache.

After a blow on l. side: nephritis.

After a fall: pain in small of back.

[46] **Skin.** ‖Burning in various places on skin, even under axillæ, as from a mustard plaster.

‖Dryness of skin; deficient perspiration.

‖Skin dry, itches; > from scratching.

‖Herpetic spots on face; old warts.

‖Yellow, scaly spots over abdomen or around nipples.

‖Burning, itching herpes; moist after scratching.

Blotches after scratching; corrosive vesicles.

‖Persons inclined to pulmonary troubles; eruption dry at first, but when scratched exuding a moisture. θEczema.

‖Erysipelas.

‖From r. to l. side; œdematous swelling under eyebrows; insensible and delirious; external cuticle peeling off, but skin ‖left livid and purple; when touched ever so slightly on feet, he jerks them up, much frightened; talks of pigeons flying in room, which he tries to catch with his hands; gets regularly < about 3 A.M. θErysipelas bullosum capitis, suppressed by salve.

‖Swelling of parotid gland, r. side; restlessness; groaning; tossing about, < 2 or 3 A.M. θScarlet fever.

‖Scarlet fever with swelling of r. parotid, tender to touch, mouth sore, lips and tongue black, painful, fetid, during desquamative stage.

‖Secondary erysipelas in an old lady, with chronic ulcers on l. limb; swelling of face, beginning about r. eye, extending gradually downwards and also to l. eye and l. side of face; enormous bags under both eyes; also erysipelatous inflammation on l. arm after being scratched by a dog, whole lower arm and hand affected; headache; loss of appetite; fever.

Digitized by Google

Itching of warts.
Tension, pressure, rending in scars.

47 **Stages of Life, Constitution.** Suitable for the aged; rather obese; lax fibre.
Dark hair, lax fibre, inclined to obesity.
Adapted to fleshy, aged people, and to complaints following parturition; diseases characterized by stitching pains.
Adapted to diseases of old people, dropsies and paralysis.
After loss of fluids, or of vitality, especially in anæmia.
Child, æt. 5 days; suffocative catarrh.
Girl, æt. 20 months, lymphatic blonde, very delicate; morbus coxarius.
Child, æt. 2; catarrh on chest.
Child, æt. 3; morbus coxarius.
Girl, æt. 3½, suffering eight months; morbus coxarius.
Boy, æt. 5, lymphatic, badly nourished, limping for three months; morbus coxarius.
Girl, æt. 6, after measles; cough.
Girl, æt. 6, good constitution, after measles; cough.
Girl, æt. 7, suffering six months; cough.
Girl, æt. 9, blonde, of rapid growth, affected last winter with an offensive eruption on scalp which was allowed to heal without treatment, mother asthmatic, every week; spasmodic attacks.
Boy, æt. 11, four years ago had scarlet rash, which was followed by general anasarca; affection of liver.
Boy, æt. 11, malaria nine months ago; typhoid symptoms.
Boy, æt. 11; affection of stomach.
Boy, æt. 11, lymphatic, pale, slight figure, suffering three months; morbus coxarius.
Girl, æt. 12, good constitution, nervo-sanguine temperament; morbus coxarius.
Girl, æt. 13; pleurisy.
Boy, æt. 14, sanguine lymphatic, weakened by loss of semen; morbus coxarius.
Boy, æt. 15, suffering four days; toothache.
Boy, æt. 15, sound constitution; febrile attacks.
Boy, æt. 16; dropsy.
Strong healthy girl, menses inclined to be late; urticaria.
Girl, æt. 19; amenorrhœa.
Girl, æt. 20, after severe fright, three years previously; amenorrhœa.
Woman, æt. 20, delicate, suffering one year; asthma.
Servant girl, æt. 20, suffering one year; gastralgia.
Girl, æt. 20, blonde; affection of fauces.
Man, æt. 20, light hair, blue eyes, scrofulous; cough.
Man, æt. 20; erysipelas.

Digitized by Google

Girl, æt. 20, delicate constitution, one year ago had asthma and pain in joints, since then suffering; gastric disturbance.
Man, æt. 20, lymphatic, in bed six weeks; morbus coxarius.
Man, æt. 21, since tenth year suffering from cough with expectoration; phthisis.
Man, æt. 21; pneumonia.
Girl, æt. 21, blonde, weakly constitution; affection of throat.
Woman, æt. 23, blonde, mother of three children, tuberculous, one year ago had abdominal troubles, for which she took much quinine, since then ill; ulcer of stomach.
Woman, nervo-bilious temperament, seven years previously was in habit of taking enormous doses of magnesia to correct acidity of stomach during pregnancy, two years later confined again, and had prolapsus uteri and leucorrhœa; attacks of bilious colic for last three or four years; affection of stomach.
Woman, suffering six years; chronic catarrh.
Woman, after confinement, weakened by nursing, inclined to anæmia; metrorrhagia.
Woman, after great exertions from nursing sick children and taking cold; catarrhal fever.
Anæmic woman, after labor placenta retained by lower section of uterus, removed eighteen hours afterward by manipulation; uterine hemorrhage.
Woman, æt. 24, mother of three children, had inflammation of eye and ulcer on cornea, during lactation; conjunctivitis and leucoma.
Seamstress, æt. 24, atrabilious constitution, menses scanty; cardialgia and headache.
Man, æt. 28, robust, after pneumonia; cough.
Woman, æt. 29; gastricism.
Woman, æt. 30, suffering one week; cough.
Woman, æt 32; palpitation of heart.
Woman, æt. 35, suffering eight days; affection of stomach.
Man, æt. 36, married; constipation.
Farmer, æt. 40; rheumatism.
Woman, æt. 42, weakly constitution; affection of stomach.
Woman, æt. 45, hard of hearing, rheumatic; gastric disorder.
Mower, æt. 45, after drinking cold water while overheated; affection of stomach.
Woman, æt. 51, sallow, medium flesh, expression of intense suffering; hemorrhoids.
Man, æt, 60; ague.
Woman, æt. 60, seamstress, has frequently suffered with arthritic pains; blepharitis.
Woman, æt. 65; asthma.

Digitized by Google

Old woman; asthma.

Woman, æt. 67, for thirty years subject to arthritic attacks and severe paroxysms of pain in stomach, abdomen and limbs; cardialgia.

Woman, æt. 71, just recovering from acute hepatitis, complicated by passage of biliary calculi; stitches in liver and lumbar region.

[48] **Relations.** Antidoted by: *Camphora, Coffea, Spir. nitr. dulc.*

KALI CYANATUM.

Potassium Cyanide. *K. C. N.*

Proved by Lembke in 1st and 2d triturations. Toxicological reports; see Allen's Encyclopedia, vol. 5, p. 323.

CLINICAL AUTHORITIES.—*Neuralgic headaches*, Cattell, B. J. H., vol. 11, p. 348; *Affection of chest*, Cattell, B. J. H., vol. 11, p. 39.

[5] **Sight and Eyes.** ‖Double vision.

[6] **Upper Face.** ‖Agonizing attacks of neuralgic pains between temporal region and ciliary arch and maxilla, with screaming and apparent loss of sensibility, as if struck with apoplexy; pulse 84; face flushed.

‖Severe neuralgic pains in temporal region and l. upper jaw, daily at 4, increasing till 10, and ceasing at 4 P.M., in their interval anorexia, fever, headache.

‖Torturing neuralgic pains in orbital and supramaxillary region, recurring daily at same hour, with much flushing of that side of face.

[22] **Inner Chest and Lungs.** ‖Dulness on percussion; respiration feeble, mixed with crepitus and bronchial râles, on r. side below clavicle; troublesome cough, preventing sleep at night.

[34] **Limbs in General.** ‖Acute rheumatism in articulations.

[38] **Time.** Night: cough prevents sleep.

[41] **Attacks, Periodicity.** Daily at 4: severe neuralgic pains in l. upper jaw, increasing till 10, ceasing at 4 P.M.

Daily at same hour: torturing neuralgic pains in orbital and supramaxillary region.

[42] **Locality and Direction.** Right: bronchial râle.

Left: severe neuralgic pains in upper jaw.

[43] **Sensations.** As if struck with apoplexy.

Neuralgic pains: in orbital and supramaxillary region.

Agonizing attacks: of neuralgic pains between temporal region and ciliary arch and maxilla.

Severe neuralgic pains: in temporal region and l. upper jaw.

Acute rheumatism: in articulations.

[45] **Relations.** Compare: *Cedron*, ‖*Stannum*, and *Platina* in periodical neuralgia.

KALI FERROCYANATUM.

Potassium Ferrocyanide. $K_4FeCy_6.3H_2O = K_4FeC_6N_6.3H_2O$.

Proving by Bell. See Allen's Encyclopedia, vol. 5, p. 330.

CLINICAL AUTHORITIES.—*Menorrhagia; Debility;* Bell, Hahn. M., vol. 2, p. 44.

[1] **Mind.** Sad; inclination to weep.

[17] **Scrobiculum and Stomach.** ǀAcidity of stomach; sour eructations; much flatulence, sour or tasting of ingesta pressure at stomach after eating, accompanying symptoms of uterus.

[19] **Abdomen.** ǀFeeling of weakness and bearing down in bowels, particularly if bearing down extends to back.

[25] **Female Sexual Organs.** ǀMenses too frequent and too profuse, or late.

ǀMenorrhagia, three or four ounces a day, painless.

ǀǀPassive, painless flowing of blood of natural color, rather thin, and causing much debility.

ǀLeucorrhœa like pus, yellowish, creamlike, profuse, not irritating.

ǀǀLeucorrhœa only after menses, usually in daytime.

ǀPain in small of back, accompanying leucorrhœa.

[21] **Pregnancy. Parturition. Lactation.** ǀSensitiveness of lower part of abdomen to pressure, and womb very tender to touch of finger. θPregnancy.

[29] **Heart, Pulse and Circulation.** ǀǀFatty heart, with weak, irregular pulse.

ǀǀHypertrophy, with dilatation.

ǀFunctional disorders of heart, with anæmia.

[31] **Neck and Back.** ǀPain in small of back accompanying leucorrhœa.

[36] **Nerves.** Debility; paleness of lips, gums and whole skin; cold hands and feet; urine frequent, profuse, watery, and sometimes traces of coagulated blood; irregular, wandering, neuralgic pains; periodic neuralgia of head, following the sun.

[41] **Attacks, Periodicity.** Periodic neuralgia of head.

[43] **Sensations.** Pain: in small of back.

Irregular, wandering, neuralgic pains.

Periodic neuralgia: of head following the sun.

Pressure: at stomach after eating.

Digitized by Google

Weakness and bearing down: in bowels.

[44] **Tissues.** Chlorosis, with cardiac debility.

[45] **Touch. Passive Motion. Injuries.** Touch: of finger, womb very sensitive.

Pressure: lower part of abdomen sensitive.

[47] **Stages of Life, Constitution.** Woman, æt. 35, delicate, brown hair, after confinement, suffering five months; menorrhagia.

[48] **Relations.** Compare: *Collin., Digit., Ferrum, Hydr. ac., Kali carb., Stannum* (sun headaches).

KALI IODATUM (HYDRIODICUM.)

Potassium Iodide. *KI.*

Observations have been chiefly clinical, made on the sick with large doses of the crude drug. See Allen's Encyclopedia, vol. 5, p. 331. It needs proving.

CLINICAL AUTHORITIES.—*Hydrocephalus*, Cattell, B. J. H., vol. 11, p. 345; *Syphilitic choroiditis; Disseminate choroiditis*, Norton's Opth. Therap., p. 105; *Tumors of orbit*, Wanstall, Norton's Opth. Therap., p. 104; *Paralysis of nervus abducens*, Norton's Opth. [1] **Mind.** Talkative, disposed to jest.

Starts at every noise.

Excited as if intoxicated.

Frantic excitation; catarrhal or mercurial headache.

Inclined to be vexed, vehement, quarrelsome.

Very great irritability and unwonted harshness of demeanor; his children, to whom he is devotedly attached,

Digitized by Google

become burdensome to him; very passionate and spiteful temper; inclined to sadness and weeping, with constant apprehension of impending evil. θMelancholia.

‖Torturing feeling of anguish preventing sleep.

‖Whining; apprehensive as from threatened accident.

‖Sadness and anxiety.

‖Intellectual weakness and paroxysms of dementia, accompanied by headache.

[3] **Sensorium.** Vertigo: with reeling, after meals.

On awaking, giddy, fluttering; must get up or smother.

[3] **Inner Head.** ‖Hyperæmia in scrofula; also in weak or tubercular patients; hammering in forehead; head feels inflated; anxious, restless sleep.

‖Congestion of brain from suppression of long standing nasal discharge.

‖Heat in head, with burning and redness of face; beating in forehead and temples; > in open air.

‖Terrible hammering pains in forepart of head, with sensation as if brain was compressed from both sides, or as though head was enlarged to three times its size.

‖Violent pain in frontal region.

‖Feeling of heaviness in forehead.

‖Tearing or jerking stitches above l. eye, in frontal sinus.

‖‖Lancinating and darting over l. eye and in l. temple.

‖‖Pains in sides of head, as if screwed in; > in open air.

‖Irritating, offensive discharge, accompanied by boring, tearing pains in temporal bone; during day a dull, tense, numb feeling in affected side of head, during night becomes intolerable; sudden shocks of pain.

‖Pain in upper part of head, as if it would be forced asunder; that part of head hot to touch, though he is generally chilly, and > by external warmth.

‖Tensive, stinging, darting, lacerating pain in head.

‖‖Headache and heaviness in head, 5 A.M.; > after rising.

‖Severe headache, with lachrymation.

‖Catarrhal headaches with inflammation of mucous membranes of frontal sinuses, eyes, throat and chest.

‖‖Syphilitic or mercurial headaches.

‖Headache, especially in occiput; coryza; pains in upper maxilla and teeth.

‖Acute hydrocephalus, with strabismus, labored respiration, convulsions; or with paralysis of r. side; dilated immovable pupils; limbs of l. side in constant tremulous motion, hand being often drawn to head with an undulatory, automatic movement; occasional convulsions and almost entire insensibility.

‖Hydrocephalus; effusion; blindness; dilated pupils; eyes staring, watery; crying out; vomiting.

Digitized by Google

Outer Head. Violent headache, hard lumps on cranium; after abuse of mercury; syphilis.
Periosteal syphilitic headache.
Scalp feels hot to touch.
Coldness of painful parts of head > by external warmth.
Scalp painful on scratching, as if ulcerated.
Great disposition for hair to change color and fall out.

Sight and Eyes. Vision dim and foggy; sees objects indistinctly.
Mistiness before eyes; after scrofulous ophthalmia or abuse of mercury.
Complete blindness, from effusion of water on brain, with dilated pupils, staring, watery eyes; frequent crying out and vomiting.
Sunken eyes, surrounded by blue rings.
Incipient glaucoma in syphilitic subjects; dull, discolored state of iris; burning in eyes, lachrymation, dilated pupils, amaurotic symptoms.
Irido-choroiditis, especially if syphilitic.
Choroiditis disseminata, especially if of syphilitic origin.
Fundus of r. eye shows extensive white patches (atrophy of choroid) and deposits of pigment; optic nerve hyperæmic, slight haziness of vitreous; commencing atrophic spots in choroid of l. eye and hyperæmia of nerve; R. v. $\frac{20}{100}$, improved to $\frac{20}{30}$.
Syphilitic choroiditis; excessive and variable amount of haziness of vitreous.
Syphilitic iritis, especially if inflammation is very severe and unyielding to influences of atropine; inflammatory process in iris so high, that pupil tends to contract, notwithstanding frequent instillation of strongest solutions of atropine; iris much swollen and aqueous more or less cloudy; ciliary injection very marked and of a bright angry appearance; pain may be severe, but is < at night; photophobia and lachrymation are variable.
Iritis syphilitica after abuse of mercury; aqueous cloudy; ciliary injection bright, angry looking; pains < at night.
Pupils dilated; eyes in constant motion.
Pustules on cornea; no photophobia, pain or redness.
Photophobia; constantly shields his eyes, and yet light does not seem to affect them much.
Conjunctiva of one or both eyes often affected; attack commences by more or less general or more or less rapid vascular injection, to which is speedily added a tumefaction of mucous membrane, and an infiltration, generally well marked, of submucous cellular tissue; considerable chemosis of eye and œdema of lids.

Digitized by Google

Chemosis; purulent secretion; eyes burn and are red from lachrymation; scrofulous ophthalmia, especially after mercury.

Œdema of lids with lachrymation; lower lids twitch.

Injection of conjunctivæ.

Injection and tumefaction of conjunctiva.

Great redness of mucous membrane of eyes, nose, throat and palate, with profuse lachrymation. θAcute coryza.

Awoke in morning with dizziness, and afterwards had three similar attacks; had had a severe cold; for two days had noticed blurring of vision and diplopia which had been steadily increasing and was only noticed when looking to left; examination showed only slight action of l. external rectus; syphilitic history. θParalysis of l. nervus abducens.

Several tumors on entire upper border of l. orbit, firmly adherent to bone and appearing to extend into orbit; growths hard and encroached considerable upon upper lid, especially at inner corner; painless, no inflammation and softening; syphilitic history.

Periostitis of orbit, especially if syphilitic; more or less swelling extending even to temple, with œdema of lids; pain may be intense or entirely absent.

Syphilitic affections of eye.

[6] **Hearing and Ears.** Singing in ears.

Boring pain in ears; darting in ears (right).

Tearing in r. ear, which becomes sensitive; evening.

Otitis in rickety children with great tenderness of head.

After scarlet fever; r. and l. membranæ tympani depressed and adhesions firm; throat tissues thick; tonsils hypertrophied with excessive catarrh, tympanum dilatable.

[7] **Smell and Nose.** Sensation of a leaflet at root of nose, obstructing the smell.

Throbbing and burning pains in nasal and frontal bones, with swelling.

Sensation of fulness in nose; beating pains in nasal bones.

Gnawing sensation in nasal bones, with lancinating and boring pains, extending to forehead.

Acute coryza; great redness of mucous membrane of eyes, nose, throat and palate, with profuse lachrymation, violent sneezing, and running of water from nose; frequent irritation to cough and swelling of upper lids.

Repeated attacks of violent, acrid coryza from least cold; violent sneezing, eyelids bloated, profuse lachrymation, stinging in ears, nose very tender; face red, expressing anguish and uneasiness; tongue white; nasal voice; violent thirst; alternate heat and chill; urine dark, hot; hammering in frontal region; sides of head as if compressed, almost frantic; after much mercury.

Digitized by Google

Catarrhal inflammation of Schneiderian membrane in all its continuations, frontal sinuses, Highmorian cavities and fauces; red, swollen nose with continual secretion of a watery, colorless, acrid fluid and violent painful sneezing; swelling of eyelids; injected conjunctiva, lachrymation; sticking pain in ears; red face, with anxiety and restlessness; terrible, hammering pain in forepart of head, with a sensation as though brain was compressed from both sides, or as though head was enlarged to three times its size; throwing about in bed; frantic excitation; shaking for loathing; white coated tongue; talking through nose; great thirst with fever, which is marked by alternating hot and dry skin, and then again body is drenched with sweat; heat preponderates with intermitting shuddering and dark, hot urine.

Ozæna syphilitica.

Discharge of watery, corroding mucus.

Nose red, swollen; discharge acrid, watery; tightening root of nose. θSyphilis.

Accumulation of very tenacious mucus in nostrils.

Purulent nasal secretion.

Discharge from nose of greenish black, or yellow matter, of foul and sickening smell; decomposed greenish red blood

Chronic catarrh: chilliness and nightly rheumatic pains in limbs; of frontal sinuses; scrofulous or syphilitic.

Ulceration of septum. θOzæna.

Ulceration of internal nose, involving frontal sinuses and antrum Highmori.

Syphilitic ozæna after abuse of mercury with pain in shin bones, especially at night. θOzæna.

Violent epistaxis, after mercury.

[8] **Upper Face.** Anxious expression with restlessness.

Paleness of face; face colorless during spasmodic attacks.

Face red, burning. θCongestion to head. θPneumonia.

Stinging darting in left cheek with coryza; after abuse of mercury; antrum of Highmore affected.

Swelling of face and tongue, especially after mercury.

Eruption on face; subcutaneous cellular tissue swollen, forming small tumors like tubercles; violent pain in both orbital processes, and across forehead; l. nostril ulcerated within and excoriated without, with occasional troublesome yellow discharge which concretes upon it; pallid, leaden hue of face; slightly curved concavity down centre of nose, from ulceration of septum.

[9] **Lower Face.** Upper lip, nose, mouth and fauces hypersensitive.

Digitized by Google

‖Dry, chapped lips.
‖Lips covered with viscid mucus in morning.
‖Blotches: on cheeks, surrounded by swelling and redness; at corners of mouth.
‖Gnawing in both sides of lower jaw.
‖Small pustule on chin, discharging water.
|Chin drawn to r. side, a running sore under ramus of jaw, bleeding easily and profusely if scab is removed; dizziness, head feels full at times and then nose bleeds; eyes weak; stinging pain in r. ear and r. submaxillary gland; sharp pain in chest when moving about, > by sitting down; cramp pains in stomach; constipation; menses scanty, pale, regular; breath fetid; sweats much; restless at night; has been salivated. ϑDiseased submaxillary gland.
‖Enlargement and suppuration of submaxillary gland.

[10] **Teeth and Gums.** |Grumbling in teeth and face; copious saliva; thirst; violent darting in ears; abscess of antrum.
|Teeth feel elongated; painful in evening.
|Teeth decayed; gnawing pains; gums swollen; > from warmth; < from cold; evening, and 4 to 5 A.M.
|Gums ulcerated as after mercury; bloody saliva, smells like onions, with sensation as if a worm was crawling at root of tooth.
|Ulcerative pain and swelling of gums; decayed teeth; gumboils; gums recede from loose teeth.

[11] **Taste and Tongue.** ‖Food has no taste or tastes like straw.
|Rancid taste in mouth, after eating or drinking.
‖Bitter sweet taste; morning after waking.
|Bitterness in mouth and throat, going off after breakfast.
|Tongue white.
|Impression of teeth on swollen tongue; after mercury.
|Burning on tip of tongue; vesicles.
|Ulceration of tongue and mouth.
|Epithelioma of tongue.

[12] **Inner Mouth.** ‖Numbness of mouth; morning on waking.
|Dryness of mouth.
|Dryness and bitterness in pharynx and mouth.
|Heat in whole mouth, with swelling.
|Very offensive odor from mouth.
|Copious salivation.
|Violent ptyalism, with irregular, superficial ulceration of mucous lining of mouth; surface looks white, as if covered with milk.
|Viscid, saltish saliva during pregnancy.
|Bloody saliva, with sweetish taste in mouth.
‖Ulceration of mucous membrane of mouth.
‖Irregular ulcers, looking as if coated with milk; burning vesicles; on tongue, after mercury; stomacace.

Digitized by Google

[13] **Throat.** ‖Ulceration of velum palati; in scrofulous subjects.
‖‖Uvula swollen and elongated; mucous membrane as if œdematous.
‖Feeling of dryness and itching in throat with burning at epigastrium, copious salivation; running from nose; intense injection of conjunctivæ, and lachrymation.
‖‖Roughness and dryness of throat; cough.
‖‖Pain and dryness in throat and stomach.
‖Dryness of throat, enlarged tonsils and papulæ on face; copious salivation, especially if from mercury.
‖‖Stinging and a sort of painful pressure when swallowing or talking.
‖‖Increased mucus; choking sensation as if something had lodged in throat; going off after hawking up piece of thick mucus.
‖‖Terrible pain at root of tongue, night before going to sleep; pain extends to both sides of throat, with fear of death; sensation as if spasm would close pharynx.
‖Follicular inflammation; laryngeal irritation, dry cough; burning tickling in throat, secondary syphilis or tertiary, with deposits in throat.
‖Chronic pharyngitis.
‖Chills; fever; pain in throat; pulse, 135; skin hot; exudate on both tonsils. θDiphtheria.
‖On second day, headache; general indisposition; languor and fever; fauces very red; uvula swollen and elongated; tonsils covered with exudate. θDiphtheria.
‖Hard lump from right angle of lower jaw to larynx and trachea, intermittent beating of carotid; face pale, anxious; dyspnœa; mucous râles; submaxillary gland enlarged with purulent infiltration around.
‖Goitre (sensitive to contact).
‖Submaxillary glands swollen, suppurating.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Food has no taste; tastes like straw.
‖Loss of appetite; emaciation.
‖Anorexia.
‖Thirst; excessive day and night; with nausea, vomiting and bloated abdomen.

[15] **Eating and Drinking.** After eating: bitter taste > (after breakfast); emptiness and qualmish feeling not going off.
After food or drink: rancid taste.
‖Cold milk makes all symptoms worse.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough; evening.
‖Gulping up of large quantities of air.
‖‖Eructations momentarily > burning and pressure in stomach.

Digitized by Google

‖Heartburn with flatulence.
‖Nausea.
‖Violent vomiting, with accumulation of saliva.

[17] **Scrobiculum and Stomach.** ‖Burning in pit of stomach.
‖|Empty, cold feeling, not > by eating.
‖Throbbing, painful burning in stomach; cutting and burning around navel like a coal of fire; rumbling and shrill noises in stomach; belching. θGastritis.
‖Degeneration of mucous membrane of stomach, with vomiting, heartburn, emaciation and diarrhœa.
‖Phlegmasia of stomach and intestines.

[18] **Hypochondria.** ‖|Darting in r. hypochondrium, and a similar dart in side of abdomen, when talking.
‖Syphilitic affections of liver.
‖Swollen spleen after intermittent fever.

[19] **Abdomen.** ‖Sudden, painful bloating of abdomen or about navel, followed by diarrhœa.
‖Cutting and burning around umbilicus.
‖|Abdominal sufferings extend into groins and thighs.
‖Inguinal glands swollen; gonorrhœa or chancre.
‖After mercurial treatment; ulcerating bubo, with fistulous openings, and discharge of dark, thin, offensive, corroding ichor.

[20] **Stool and Rectum.** ‖Light green, yellow, watery stools.
‖Diarrhœa and tenesmus, with pain in small of back, as if in a vice; after mercury.
‖Chronic diarrhœa in syphilitic or mercurial subjects.
‖Obstinate constipation; stools hard and scanty.
‖Serous mucus from rectum.
‖Syphilitic affection, like cancer, of rectum.

[21] **Urinary Organs.** ‖Morbus Brightii, with gout or mercurio-syphilis; granulated kidney.
‖Urine dark, scanty; painful; sediment dirty yellow; heat in head; malaise; chilliness from small of back up over body; flushes; small of back feels bruised; darting pains in renal region. θNephritis.
‖Burning pain in kidneys, and bladder feels swollen.
‖Urine suppressed. θPneumonia.
‖|Retention of urine; prostate enlarged.
‖Painful urging to urinate; disappears when menses come.
Urine: increased, unquenchable thirst; copious, frequent, pale and watery; red as blood; streaked with blood.
‖Enuresis at night, in scrofulous and syphilitic children.

[22] **Male Sexual Organs.** ‖Sexual desire diminished; testes atrophied.
‖Penis swollen, inflamed; constant semi-erections and sexual desire.
‖Muco-purulent discharge from urethra, with burning in urethra, and sometimes discharge of blood.

Digitized by Google

‖Thick, green gonorrhœal discharge; no pain.
‖Chronic urethritis, with secretion.
‖Gangrenous chancre.
‖Extensive swelling of glans penis with paraphimosis.
‖Obstinate vegetation on glans penis.
‖Spermatic cords thickened; secondary syphilis.
‖Orchitis and syphilitic ulcers on scrotum.
‖‖Syphilis; especially with indolent, swollen glands; deep chancres, hard edges; buboes ulcerating with fistulous openings; thin, offensive, corrosive, ichorous discharge or suppuration slow, difficult, curdy, after abuse of mercury.

[23] **Female Sexual Organs.** ‖Severe burning, tearing and twitching pains in ovarian region, especially r. side; sensation of swelling and congestion of ovaries, with pain as from a corrosive tumor there.
‖Fibroid tumors, subinvolution, hypertrophy and enlargement of uterus, predisposing to hemorrhage; dysmenorrhœa, constant leucorrhœa; emaciation; prostration.
‖‖Before menses: frequent urging to urinate.
‖During menses: thighs feel as if squeezed; pains go into thighs; chilly, "goose flesh" all over with heat in head; bruised pains in groins and small of back, < sitting.
‖Dysmenorrhœa with great urging to urinate, disappearing with onset of flow; < from cold milk; pressing in groins obliging her to bend double.
‖Menses: too early; late and more profuse than usual; too scanty, in fleshy women; suppressed.
‖Ulcerated mucous tubercles, or thick, scabby eruption on labia; chancre.
‖Itching and burning of vulva and thighs.
‖Discharge of mucus from vagina.
‖Leucorrhœa: watery, acrid, corrosive, with biting in pudendum; milky white; like washings of meat; green or yellow; putrid.
‖Tumor of breast.
‖Atrophy of mammæ.

[24] **Pregnancy. Parturition. Lactation.** ‖Galactorrhœa.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Voice nasal. θCatarrh θBronchitis.
‖Loss of voice.
‖Hoarseness, pain in chest, oppressed breathing, pain in eyes with cough; coryza; pains in limbs; influenza after abuse of mercury.
‖Mucous membrane of rima glottidis and upper part of larynx, œdematous.
‖‖Raw pain in larynx, as if from granulations.

Digitized by Google

‖Arytænoids of purplish color, tumefied and granular; follicular ulceration; voice hoarse; sounds above middle key impossible; dry cough; sensation of dryness, burning and tickling in larynx.

‖Awakened, especially 5 A.M., with dry throat, oppression, loss of voice; glands swollen. θSpasmodic croup of scrofulous children.

‖‖Awakens with choking, can scarcely breathe; choking spells, œdema of larynx.

‖Rough feeling in trachea, compelling hawking.

‖Laryngophthisis.

Respiration. ‖No air enters lungs; epigastrium sunken; face livid; laryngeal obstruction.

Had to get up, thinking he would be smothered.

‖Oppression of breathing, awaking patient in morning hours, especially in œdema of lungs.

‖Asthma in young people that have not gotten their growth, with many rheumatic symptoms about chest, and sleeplessness.

Cough. ‖Cough from constant irritation in throat; suffocative; larynx swollen; short, dry, occasioned by roughness; dry, with feeling of soreness in larynx, evening or several successive mornings; with expectoration of mucus; syphilitic cases.

‖Cough dry, hacking; later copious, green sputum.

‖Deep, hollow cough, with whitish and greenish expectoration, and tearing out pain, starting from ensiform cartilage.

‖Hoarse cough, with pain through breast.

‖‖Expectoration greenish, copious; looks like soapsuds. θPneumonia. θŒdema pulmonum.

Inner Chest and Lungs. ‖Fine transient stitches deep in middle of chest.

‖Violent stitches in middle of sternum, extending to shoulders.

‖Stitches through sternum to back, or deep in chest, while walking.

‖Pleuritic stitches; effusion. θPneumonia. θBright's disease.

‖Pain as from soreness, with sticking deep in chest, in region of r. lower rib, in evening.

‖Sharp pain through r. lung from nipple.

‖Pains through lungs; tired and weak; fluttering at heart; nervous. θUlcer on leg.

‖Pains in chest as if cut to pieces.

‖After a cold; great difficulty of breathing, inability to lie down in comfort, and not at all on r. side; heart displaced, beats violently; l. side filled with fluid; complete dulness and great resistance on percussion; l.

Digitized by Google

chest enlarged and bulging; absence of respiratory sounds. θDropsy of chest.

‖Pleuritic effusion in l. chest, in front extending up to third rib, behind as far as spine of scapula; absolute dulness on percussion and entire absence of respiratory sounds; heart pressed to r. side; catarrhal inflammation in upper portion of r. chest; despite the great compression of l. lung dyspnœa is not very great when lying quietly; great weakness, cannot sit up without assistance, and must be held during examination; night sweats; loss of appetite; thirst; fever; pulse 108; great mental depression, anæmia and emaciation.

‖Subacute pleurisy and effusion into chest; l. side of chest nearly two-thirds filled with fluid.

‖Pneumonia, first stage; also later for congestion of brain; face bloated, bluish; lower jaw dropped; pulse irregular, intermittent; limbs as if paralyzed; urine suppressed; complete hepatization; awoke suddenly with great oppression; apoplectic congestion to head.

‖‖Hepatization of r. lung; bronchial respiration, bronchophony, dulness on percussion; abundant expectoration of white froth, resembling soapsuds. θPneumonia.

‖Upper part of l. lung infiltrated, spreading to r. lung; face collapsed; constant delirium. θPneumonia.

‖After great bodily exertion, shaking chill; deep sleep, out of which he could not be roused; lies upon back, snoring loudly, eyes closed, injected conjunctiva, hot head, dry tongue, bluish lips, sunken lower jaw; bluish finger nails; irregular, intermitting pulse; extremities, when raised, fell back as if paralyzed; dull percussion sound in both clavicular region, on r. down to third, on l. down to second rib; bronchial breathing, crepitation; no cough, but on putting ear to chest, loud snoring appeared to come out of these parts as if through a tube; urine suppressed. θBilateral croupous pneumonia.

‖Lobular pneumonia; fever, localized pain, painful breathing.

‖Ptyalism, ulcerated lips and tongue, sordes excessive; great prostration; short breathing: must lie on back; serous effusion in r. pleura; hepatization of lower two-thirds of r. lung. θPleuro-pneumonia.

‖‖Phthisis pituitosa, with purulent or green sputum; exhausting night sweats and loose stools.

‖‖Œdema pulmonum: with pneumonia; secondary to morbus Brightii; sputum like soapsuds, green.

[20] **Heart, Pulse and Circulation.** ‖Fluttering on awaking, giddy; must get up, fearing otherwise he will smother. Fluttering of heart and nervousness; feels very weak.

Digitized by Google

‖Palpitation, < while walking.
‖Darting pains in heart, when walking; after abuse of mercury; after repeated endocarditis.
‖Valvular defects after repeated endocarditis, especially affecting r. ventricle, which gradually becomes dilated; stupor, and loss of breath; greatly annoying palpitations; pulse quick, but varying every moment; tumultuous, violent, intermitting and irregular action of heart and pulse, with tensive pain across chest.
‖Pulse accelerated; frequent.
⁞Aneurism: of arch of aorta; of carotid; at point of origin of carotid and subclavian; of innominate artery.

[31] **Neck and Back.** ‖Glandular swellings on neck; rachitis.
‖Swelling of whole thyroid gland, increasing very rapidly, sensitive to touch and pressure.
⁞Bronchocele; when enlargement of thyroid is due to hypertrophy, not to cystic formation or other causes.
‖Submaxillary glands swollen, suppurating.
‖Small of back feels as if in a vice, very painful, not allowing to lie still at night or in daytime; has to sit in bent position.
‖Darts in small of back; meningitis; abuse of mercury.
‖Stitches in small of back when sitting.
‖Moving produces intense pain in small of back; chronic rheumatism of chest and back.
‖Bruised pain in lumbar region, < sitting bent; stitches.
‖Chills from sacrum up over back.
‖Pain in os coccygis, as from a fall.
‖Meningeal inflammation after abuse of mercury, or secondary syphilis.

[32] **Upper Limbs.** ‖Left shoulder feels bruised.
‖Pain in shoulder as if lame, only during motion.
‖Tendons of r. shoulder feel stretched, swollen, < during motion or from touch.
‖Tearing in shoulder and then in ear.
‖Tearing pain in elbows, shoulders, and r. wrist.
‖Tearing and contraction in inner surface of ring finger; it remains some time bent; also in thumb and index finger. θRheumatism. θGout.
‖Tip of thumb ulcerates and turns yellow.

[33] **Lower Limbs.** ‖Gnawing in hip bones; darting in l. hip at every step, forcing him to limp.
‖Gnawing, aching, tearing pains in r. thigh and leg; a darting from point where sciatic nerve leaves pelvis, to within ten inches of popliteal space, then interrupted to appear about middle and outer side of calf, continuing to external malleolus and heel; motion at first painful, is after a moment more bearable; she walked, leaning

Digitized by Google

toward affected side, as much as though femur had been dislocated above acetabulum, when standing an inch and a half from floor; < at night, not able to remain in bed; pain in thigh, leg and knee joint, excruciating when lying down, eliciting screams; gave up bed for several weeks, occupying a chair, in a semi-reclining position; emaciated and prostrated from want of rest and pain; pains bearable during day, < in evening, > in open air; violent jerking of limb and muscles of thigh; pain < in knee, tearing and lacerating.

‖Pain > by walking and flexing leg; < from standing, sitting or lying in bed. θSciatica.

‖Tearing and pain in left femur.

‖Tearing darting in thighs, joints, big toe; < at night and lying on r. or suffering side, or on back.

‖Tearing in r. thigh and knee, awakens him at night, < lying on affected side or back. θSciatica.

‖Tearing in l. knee, as if in periosteum; knee feels swollen during night.

‖Knee doughy, spongy, no fluctuation; skin red in spots and hot; gnawing, boring or tearing, < at night, must often change position; white swelling.

‖Violent gnawing pain in l. leg, as if in periosteum.

‖Cramps in calves; after mercury.

‖Acute gout in both feet.

‖Pain as if bruised in left instep.

‖Ulcerative pain in heels and toes.

84 **Limbs in General.** ‖Tearing, darting pains; periosteum attacked; from mercurialization or syphilis; rheumatism; gout.

‖Violent rheumatic pains in limbs every evening and night, with preceding chilliness.

‖Rheumatism < at night, and lying on suffering side or on back; jerking of tendons; contractions; restless sleep; loss of appetite; emaciation; tearing, darting pains.

‖Lies upon back with bent knees; arms drawn to thorax; immovable and stiff in all joints; joints of knees, feet, shoulders and elbows filled with solid exudate; tendons as hard as bone and stiff; fingers drawn tightly to palms of hands and joints all swollen; involuntary jerking of limbs, < night; completely helpless, must be fed like a child; emaciated to skin and bone; loss of appetite; could not sleep without opiates; pain in back and gouty pains in joints. θGout.

85 **Rest. Position. Motion.** Lying down: difficult breathing; excruciating pains in lower limbs.

Lies upon back, snoring loudly.

Digitized by Google

Must lie on back: short breathing.
Lies on back with bent knees; arms drawn to thorax; immovable in all joints.
Lying on r. side or on back: pains <.
Cannot lie still: on account of pain in small of back; pain in lower limbs.
Must get up or smother.
Sitting: pain in chest >; pain in back; stitching in small of back; pain in leg <.
Sits up in chair in semi-reclining position, on account of pains in lower limbs.
Cannot sit up without assistance; great weakness.
Siting bent: < bruised pain in lumbar region.
Obliged to bend double: on account of pain in groins.
Has to sit double: on account of pain in back.
Standing: pains in leg <.
Must change position: on account of tearing in knee.
After rising: heaviness and pain in head >.
Motion: at first painful in lower limbs after a moment is more bearable.
Moving: sharp pain in chest; intense pain in small of back; pain in shoulders; tendons of shoulders feel stretched.
Throwing about: in bed.
Restless: moving about.
Walking: stitches in back, sternum and chest; palpitation <; darting pains in heart; pain in leg >.
Great bodily exertion: shaking chill.

Nerves. Subsultus tendinum, or contractions of muscles and tendons.
Restless moving about.
Great general debility; exhaustion.
Chorea of rheumatic origin.
Paralysis of any of muscles dependent upon syphilitic periostitis.
Hemiplegia; paralysis; spinal meningitis.

Sleep. Frequent yawning without drowsiness.
Sleepy and drowsy.
Sleepless from anguish; restless; horrid dreams.
Loud weeping in sleep, but unconscious of it.
Awaking: suddenly, pneumonia, croup; as if smothering; heart fluttering; bitter taste.

Time. Morning: awoke with dizziness; lips covered with viscid mucus; bitter taste; numbness of mouth; awakening with dry throat, oppression, loss of voice; awakes with choking; soreness of larynx.
5 A.M.: heaviness of head.
Afternoon: chill, sweat.

Digitized by Google

During day: dull, tense, numb feeling in affected part of head; thirst; pains bearable.
4 to 7 P.M.: chilly with thirst.
6 to 8 P.M.: drowsy.
Evening: tearing in r. ear; teeth painful; hiccough; soreness of larynx; sticking in region of lower rib; pains in limbs <.
Night: pain becomes intolerable; pain in eye <; syphilitic ozæna with pain; restless; terrible pain at root of tongue; thirst; enuresis; sweats; pain in lower limbs <; pains <; knee feels swollen; tearing in knee; rheumatism; jerking of limbs; chilly; pains make him frantic.

[39] **Temperature and Weather.** Irresistible desire for the open air; walking in open air does not fatigue.
Warmth: external, >; general chilliness; teeth >; lumps on cranium >; coldness of scalp >.
Can get warm in bed, but not from heat of stove.
Open air: heat in head >; pains in head >; pains in limbs >; coryza <.
Cold: teeth <.

[40] **Fever.** Chilly, with thirst (4–7 P.M.), or all night, with shaking and frequent waking; can get warm in bed, but not from heat of stove.
From lower part of back upward and through whole body; 6–8 P.M.; drowsy.
Shaking chill at night, sleepy, with frequent waking; so chilly at night that she could not get warm.
Chilliness predominates, fever marked by hot flushes, but little perspiration, very much aggravated at night.
At times chilly, with dry skin; at others profuse sweat.
Flushes of heat, with dulness of head.
Heat then sweat; afternoon.
Sweat in afternoon; skin at times dry; at others profuse sweat; night sweats.
Intermittent fever; thirst with chill; chill not > by warmth; mouth dry; anasarca; scrofula.
Catarrhal fevers.

[41] **Attacks, Periodicity.** Every evening: violent rheumatic pains in limbs.
Every night: rheumatic pains in limbs.

[42] **Locality and Direction.** Right: paralysis of side; fundus of eye; tearing in ear; membrana tympani depressed; chin drawn to side; stinging pain in ear and submaxillary gland; darting in hypochondrium; pain in ovarian region; sharp pain through lung; cannot lie on side on account of difficulty of breathing; heart pressed to side; catarrhal inflammation in upper part of chest; lung infiltrated; serous effusion of pleura; hepatization

Digitized by Google

of lower two-thirds of lung; valvular defects; tendons of shoulder feel stretched; tearing in wrist; pain in thigh and leg; lying on side pains <; tearing in thigh and knee.

Left: stitches above eye; darting over eye; in temple; limbs of this side in constant tremulous motion; atrophic spots in choroid of eye; diplopia only noticed when looking to slight action of external rectus; paralysis of nervous abducens; several tumors on upper border of orbit; membrana tympani depressed; nostril ulcerated within, excoriated without; side of chest filled with fluid; chest enlarged; pleuritic effusion of chest; lung compressed; lung infiltrated; shoulder feels bruised; darting in hip; pain in femur; tearing in knee; knee feels swollen; violent pain in leg; pain in instep.

Sensations. Excited as if intoxicated; as if brain was compressed from both sides; as though head was enlarged to three times its size; head as if screwed in; as if head would be forced asunder; scalp as if ulcerated; as if a leaflet was at root of nose; as if a worm was crawling at root of tooth; surface of mouth as if covered with milk; as if something had lodged in throat; as if spasm would close pharynx; back as if in a vice; pain in ovaries as from a tumor; thighs feel as if squeezed; pain in larynx as if from granulations; pain as from soreness in chest; chest as if cut to pieces; limbs as if paralyzed; loud snoring appeared to come out of chest as if through a tube; shoulder as if lame; pain in os coccygis as from a fall; tearing in knee as if in periosteum; as if bruised in l. instep.

Pains: in sides of head; in upper part of head; in upper maxilla and teeth; in throat; in stomach; in small of back; in ovarian region; into thighs; in chest; in eyes; through breast; in region of lower ribs; through lungs; in shoulder; in os coccygis; in thigh, leg and knee joint; in l. femur; in back.

Terrible pain: at root of tongue.

Intense pain: in small of back.

Excruciating pain: in thigh, leg and knee joint.

Intolerable nocturnal bone pains.

Violent pain: in frontal region; in both orbital processes; across forehead.

Severe: headache with lachrymation; pain in eyes.

Sharp pain: in chest; through r. lung from nipple.

Tearing: above l. eye; in r. ear; in shoulder; in elbow; in r. wrist; in inner surface of ring finger; in thumb; in index finger; in r. thigh and leg; in knee; in l. femur; in thighs, joints, big toe; in l. knee.

Digitized by Google

Severe burning, tearing, twitching pain: in ovarian region.
Tearing out pain: starting from ensiform cartilage.
Boring, tearing pains: in temporal bone; in knee.
Boring pain: in ears; in nasal bones.
Ulcerative pain: in gums; in heels and toes.
Beating: in forehead; in temples; in nasal bones; of carotids.
Throbbing pain: in nasal and frontal bones; in stomach.
Hammering: in forehead.
Darting: above l. eye and in l. temple; in ears; in l. cheek; in r. hypochondrium; in side of abdomen; in renal region; in heart; in small of back; from where sciatic nerve leaves pelvis to within ten inches of popliteal space, then interrupted to appear about middle and outer calf, and to external malleolus and heel.
Lancinating: over l. eye and in l. temple; in nasal bones to forehead; in throat.
Lacerating pain: in knee.
Cutting: around navel.
Violent stitches: in middle of sternum.
Stitches: through sternum to back; deep in chest; in small of back.
Jerking stitches: above l. eye; in frontal sinus.
Fine transient stitches: deep in middle of chest.
Sticking pains: in ears; in larynx.
Jerking: violent, of limb and muscles of thigh.
Acute gout: in both feet.
Violent rheumatic pains: in limbs.
Sudden shocks of pain: in head.
Gnawing: in nasal bones; in both sides of lower jaw; in teeth; in r. thigh and leg; in knee; in l. leg.
Cramp pains: in stomach.
Cramps: in calves.
Rheumatic pains: in limbs; in chest and back.
Gouty pains: in joints.
Bruised pains: in groins and small of back; in lumbar region; in shoulder.
Tensive, stinging, darting, lacerating pain: in head.
Tensive pain: across chest.
Aching: in r. thigh and leg.
Grumbling: in teeth and face.
Stinging: in ears; in l. cheek; in r. submaxillary gland; in throat.
Painful burning: in stomach.
Burning tickling: in throat.
Burning: of face; in eyes; in nasal and frontal bones; on tip of tongue; at epigastrium; in stomach; in pit of

Digitized by Google

stomach; around navel; in kidneys; in urethra; in larynx.
Biting: in pudendum.
Soreness: of larynx.
Heat: in whole mouth; in head.
Painful bloating: around navel.
Pressing: in groins; in stomach.
Tightening: at root of nose.
Stretched feeling: in tendons of r. shoulder.
Painful: urging to urinate; syphilitic nodes; breathing.
Numbness of mouth.
Dull, tense, numb feeling: in affected part of head.
Rough feeling: in trachea.
Dryness: of mouth; of pharynx; of throat; in stomach; in larynx.
Fulness: of nose.
Heaviness: in forehead.
Itching of throat; of herpes on face.

"Tissues. ‖Emaciation and loss of appetite.
‖Purpura hemorrhagica.
‖Hemorrhage from nose, lungs, rectum.
‖Discharges from mucous surfaces thin, ichorous, corrosive, or green.
‖‖Chronic periosteal rheumatism of syphilitic or mercurial origin; intolerable nocturnal bone pains, driving patient to despair.
‖Chronic arthritis, with considerable spurious anchylosis.
‖‖Swelling of bones and periosteum, with nocturnal pains.
‖Diseases of periosteum and capsular ligaments of joints.
‖‖Bony tumors; interstitial distension of bones; pains < at night.
‖‖Caries and necrosis after syphilis and abuse of mercury.
‖Gout and rheumatism; synovitis.
‖Painful syphilitic nodes.
‖‖Glands: swollen; goitre; bronchial, submaxillary, ulcerating; atrophied; interstitial infiltration.
‖‖Glands suppurate; discharge thin, corrosive, or curdy; indolent, with hard edges.
‖‖Glands atrophy; especially testes and mammæ.
‖Dropsy from pressure from swollen glands.
‖Distends all tissues by interstitial infiltration; œdema; enlarged glands; tophi; exostoses; swelling of bones.
‖Ulcers: vegetations bleed easily and are unhealthy; canceroid; deep; involving bone structure.
‖Scrofula.
‖‖Rupia syphilitica.
‖Condylomata of long standing in cachectic subjects.
‖Condyloma accuminatum after chancre.

Digitized by Google

‖Bubo very hard with curdy, offensive discharge, if suppurating; thickening of spermatic cord; ulceration of nose, mouth and throat, with corroding, burning discharge; lancinating pains in throat; system depressed; effusion of serum into cellular tissue; induration of liver. θSyphilis.

‖After abuse of mercury: tuberculous pustules in face; roseola on chest and extremities; discolored, large ulcers on skin; bone swelling; nightly bone pain; bloody stools, with tenesmus; falling out of hair. θSyphilis.

‖Secondary syphilis, especially after abuse of mercury or combined with scrofula; buboes, chancres, with hard edges, thin, corrosive or curdy pus; deep eating ulcers.

‖Especially useful in tertiary syphilis.

" **Skin.** ‖Itching herpes on face.

‖Purpura hemorrhagica.

‖‖Roseola spots. θSyphilis.

A kind of *erythema nodosum*, in three cases, consisting of red, urticaria-like elevations, appearing on face, neck, arms and legs, and preceded by itching, leaving, after disappearing, infiltrated spots; they were observed only during the winter.

‖‖Papulous eruption; with dryness of throat.

‖Papulæ worse on face, shoulders and back; dry throat.

‖Tubercles on face.

‖Tubercular syphilitic skin eruption.

‖Itchlike pimples and vesicles.

‖Herpes, size of dime, on cheek.

‖‖Eczema cruris; pityriasis capitis.

‖‖Small boils on neck, face, scalp, back, chest, suppurating; often leaving scars.

‖Pustulous eruption often umbilicated and leaving scars.

‖Syphilitic eruptions, chiefly in cachectic persons, pustular or squamose.

‖Furuncular eruption, epidemic, of various sizes, from a small pustule to a large boil; often this latter becomes carbuncular and is generally surrounded by little pustules.

A kind of hard tumors, especially on legs, dark color, yellow pustules interwoven; basis hard and painful to pressure, only their navel-like centre is not painful; surrounded by a red halo; after discharging they gradually sank in space of a month or even a whole year, when they finally covered themselves with thick crusts which remained for a long time.

‖Rupia; impetiginous eruption; herpetic eruption; eruption simulating acne.

Digitized by Google

‖Ecthymatous eruption.

[47] **Stages of Life. Constitution.** ‖Scrofulous patients; especially if syphilis or mercurialization is superadded.
Girl, æt. 5; dropsy of chest.
Girl, æt. 10; diphtheria.
Boy, after scarlet fever; adhesions of middle ear.
Girl, æt. 15, rapid growth, small chested; pleuritic exudation.
Girl, æt. 18; disease of submaxillary gland.
Girl, æt. 20; sciatica.
Young lady, no history of syphilis; disseminate choroiditis.
Man, æt. 23; pleuritic exudation.
Woman, æt. 25, in good circumstances, in fifth month of pregnancy; pleurisy with exudation.
Man, æt. 32; pneumonia.
Man, æt. 36, thin and delicate; pleurisy.
Man, æt. 38; diphtheria.
Colored women, syphilitic history; tumors of orbit.
Man, æt. 40, had syphilis; paralysis of nervus abducens.
Woman, æt. 46, weak constitution; pleuritic exudation.
Man, æt. 50, suffering one week; pleuro-pneumonia.
Man, æt. 85; bilateral croupous pneumonia.

KALI MURIATICUM.

Potassium Chloride. *KCl.*

The clinical symptoms of Kali chloricum (potassium chlorate) of which we have provings by Martin and Tully (see Allen's Encyclopedia, vol. 5, p. 316), are deemed sufficiently similar to those of Schuessler's Tissue Remedies to be included herein.

CLINICAL AUTHORITIES.—*Insanity*, Kurtz, Rück. Kl. Erf., vol. 5, p. 272; *Loss of vision of r. eye*, Schuessler, p. 95; *Chorio-retinitis*, Woodyatt, Norton's Oph. Therap., p. 107; *Parenchymatous keratitis*, Norton's Oph. Therap., p. 106; *Faceache*, Herber, Frank, Meyer, Rück. Kl. Erf., vol. 1, p. 424; *Faceache*, Martin (2 cases), Rück. Kl. Erf., vol. 1, p. 424; *Paralysis of r. facial nerve*, Cramoisy, Org., vol. 3, p. 112; *Caries of teeth*, Neumann, A. H. O., vol. 10, p. 310; *Affection of mouth*, Liedbeck, Rück. Kl. Erf., vol. 1, p. 507; *Stomatitis, ulcers in mouth*, Henoch, Hirsch, Lauri, Rück. Kl. Erf., vol. 5, p. 219; *Stomatitis ulcerosa*, Windelband, B. J. H., vol. 36, p. 366; *Angina*, Goullon, Raue's Rec., 1870, p. 142; *Diphtheria*, Goullon, Œhme's Therap.; *Dysentery*, Bigler, Raue's Rec., 1875, p. 8; *Nephritis*, Windelband, B. J. H., vol. 36, p. 366; *Albuminuria*, Sanders, Trans. Am. Inst. Hom., 1883, p. 669; *Catarrh of bladder*, Edlefsen, N. A. J. H., vol. 26, p. 134; *Gonorrhœa*, Windelband, B. J. H., vol. 36, p. 366; *Suppurating buboes*, Windelband, B. J. H., vol. 36, p. 366; *Leucorrhœa*, Schuessler; Windelband, B. J. H., vol. 36, p. 366; *Croup*, Schuessler; *Whooping cough*, Ameke, B. J. H., vol. 36, p. 366; *Catarrhal pneumonia*, Breuer, Allg. Hom. Ztg., vol. 105, p. 171; *Catarrhal phthisis*, Morgan, Trans. Hom. Med. Soc. Pa., 1880, p. 231; *Facial paralysis*, Drysdale, Hughes; *Open carcinoma* (locally), Burow, A. H. O., vol. 10, p. 310; *Infantile syphilis*, Hughes; *Variola*, Burow, A. H. O., vol. 10, p. 310; Read, N. A. J. H., vol. 10, p. 176.

[1] **Mind.** Sad, apathetic, with chilliness in evening.
‖Alternate states of sadness and cheerfulness, associated with congestion, > from nosebleed.
‖Habitual loss of appetite; patient absolutely refuses to take food, or imagines he must starve. θInsanity.

[2] **Sensorium.** A glass of wine or beer intoxicates easily.
Confusion of head, also in occiput, with a peculiar sensation in cervical muscles.
Vertigo: after violent exercise, with congestion to head; with headache.

[3] **Inner Head.** Tightness in occiput, sneezing and coryza.
Aching in l. side of temple.
‖Headache: extending into jaws; in evening; in occiput; with vomiting, hawking up of milk white mucus.
‖Sick headache; white coated tongue, or vomiting of white phlegm.

Digitized by Google

⁴ **Outer Head.** Pains in head and face, with hawking up of white mucus.

Catarrh of frontal cavities; tumors.

πMarked increase of dandruff, falling in small white flakes over coat collar, accompanied by itching.

‖Crusta lactea, sore or scaldhead of children.

⁵ **Sight and Eyes.** ‖Luminous appearance before eyes when coughing or sneezing.

‖Congestion to eyes, they feel irritated; redness in evening with some pain.

‖Irritable retina.

‖While walking through fields covered with snow, sudden severe pain in r. eye, followed at once by blindness, saw nothing with r. eye, all seemed smoke and mist; l. eye became gradually weaker from month to month; but little of retina can be seen, there being a kind of mist over it, which seemed to spread from vitreous humor over background of eye; retina dim and misty, veins forming a dark network; in some places indistinctly defined spots, some larger than others, appearing like residue of extravasated blood; arteries scarcely visible, and seemed pale and contracted.

‖Dimness of r. eye, he could not read a newspaper; cornea, iris and pupil normal; no external redness; vitreous rather hazy, with some black shreds suspended in it, having very limited motion on rotating eye; optic nerve and bloodvessels normal; inside the disk, a large, irregular, atrophic spot, involving choroid and retina, surrounded by several small ones; edges irregular and pigmented; sclerotic seen white through their centres; choroid adjacent, congested and thickened; some vessels lost in infiltrated part to appear on other side; a dull pain, occasionally, in eye and over brow, with an ill defined feeling of contraction around eye; vision $\frac{20}{200}$; Snellen 11 slowly deciphered. At the end of a month vision rose to $\frac{20}{60}$ and Snellen 3 was read at five inches; a year afterwards the man could read Snellen $2\frac{1}{2}$, distant vision $\frac{20}{70}$, but under Kali mur. for a week it was again $\frac{20}{60}$. The patient's business engagements prevented longer treatment. (Improved.) θChorio-retinitis.

‖Parenchymatous keratitis; for three months there had been an infiltration into r. cornea, which commenced at outer side and extended over whole cornea; could only count fingers; occasional pain, moderate photophobia and redness; pupil dilated slowly and incompletely, though regularly, and contracted quickly.

‖Retinal exudation.

‖Conjunctivitis and keratitis, with formation of small

Digitized by Google

superficial blisters; small ulcers on cornea following a blister; feeling of sand in eye; white mucous secretion or yellowish green pus from eyes.

|| Opaque spots on eye; leucoma.

| On lower edge of l. cornea, a little blister from which a bundle of small veins run; feeling of sand in eye; edges of eyelids scabby.

|| Conjunctivitis and keratitis (scrofulous) with a formation of phlyctenulæ, but only superficial.

|| Suppurating points on edges of eyelids; edges scabby; yellow crusts of pus on edges of lids.

Secretion: yellowish green, purulent; white, mucous.

[6] **Hearing and Ears.** Deafness: from swelling of internal ear; from swelling of Eustachian tubes and tympanic cavity; with swelling of glands, or cracking noise on blowing nose, or white coated tongue.

|| Earache; with gray or white furred tongue; with swelling of glands; with swelling of throat, or cracking noise in ear when swallowing.

[7] **Smell and Nose.** Bleeding of nose: at night; from r. nostril.

Tension and tensive drawing in cheeks inducing desire to sneeze, with cramp in malar muscles.

|| Stopped or dry coryza.

| Violent coryza, sneezing and profuse secretion of mucus; twitching of masseter muscles; catarrh after mercury.

White mucous discharge in coryza, catarrh of frontal sinuses.

Cold: stuffy, in head, with whitish grey tongue; with white, non-transparent, or yellowish discharge.

| Hawking of mucus from posterior nares.

[8] **Upper Face.** | Suffering expression of face. θ Stomacace.

|| Bloated face; sickly expression.

|| Flushes of heat.

| Increased sensitiveness of whole face, with irritation in root of nose, twitchings in corners of eyes; after mercury.

| Lightning-like attacks of pain in face, gradually growing more frequent; l. side of face fiery red, with twitching and trembling in muscles of face, lachrymation, throbbing of temporal artery; < speaking, chewing, eating fruit or anything sour; excited by least touch.

|| Cramplike drawing in cheeks, extending to articulation of jaws; tearing in upper jaw; after abuse of mercury.

|| Faceache, with swelling of gums or cheek.

| Paralysis of r. facial nerve; difficulty of speaking, eating and whistling; could not puff out cheeks, because lips could not be held firm on r. side of face; mouth oblique in laughing or speaking; neither wrinkles nor contractions of muscles on paralyzed side.

Digitized by Google

Facial paralysis, beginning with faceache; tenderness on touch or pressure of affected side.
Pimple on forehead, face, and between lips and chin.
Spots in face.

[9] **Lower Face.** Tension and tensive drawing in cheeks, inducing a desire to sneeze; cramp in malar muscles.
Cramplike drawing in cheeks, extending to articulation of jaw, with stinging in jaw and teeth.
Mumps, without fever.
Twitching in muscles of lower jaw.
Swelling of lips; after mercury.
Pimples on lips; chapped lips from cold.
Barber's itch.

[10] **Teeth and Gums.** Dulness of teeth; toothache in upper jaw.
Toothache with swelling of gums and flow of saliva.
Painful caries of teeth.
Gums: inflamed, bright red; very sensitive; bleed easily.
Scorbutis, especially after mercury; offensive smell.
Ulceration of edges of gums.
Gumboil, before suppuration.

[11] **Taste and Tongue.** Taste: disagreeable; saltish; sour; bitter sour; stinging burning, sourish; brassy after mercury.
Bitter taste with feeling of coldness on tongue, removed after breakfast and dinner.
Tongue coated: thin, white, not mucous; dirty yellow in stomacace; white, or only in middle; after diarrhœa.
White fur on tongue of syphilitic origin.
Coldness on tongue and in pharynx.
Burning, stinging blisters on tongue and in buccal cavity.
Inflammation of tongue.
Cannot talk; epithelioma.

[12] **Inner Mouth.** Heat and dryness; peeling off of lips.
Breath excessively fetid, in ulceration and diphtheria.
Accumulation of mucus.
Saliva flows freely; profuse and acid; tasting brassy.
Stinging burning with sour taste in mouth.
Pain, with swelling of gums and cheeks.
Aphthæ and stomatitis, simple or ulcerative.
Sore mouth, with spongy, bleeding gums, patches in fauces and on pharynx, like diphtheria or follicular disease; fetor unbearable.
Most acute ulcerative and follicular stomatitis; whole mucous surface red and tumid, and in cheeks, lips, etc., were numerous grey based ulcers.
Follicular ulcers on inside of lips and dorsum of tongue; mouth full of saliva; glands enlarged and tender, in cachectic people.

Digitized by Google

‖Severe pain throughout whole body; dimness of vision, letters appear smaller when reading; sensitive, lachrymose; their gums become sensitive and foul smelling, bleeding easily and discharging pus; heat and dryness in mouth with salivation; earthy color of face; face bloated; lips hot, swollen, epithelium being thrown off in scabs; general lassitude; feels more tired in morning than evening; attacks periodical, lasting eight to nine days.

‖Stomatitis ulcerosa, mercurial or scrofulous; gums swollen, easily bleeding, and usually projecting from a set of bad teeth; fetor oris; salivation; aphthous ulcers on tongue and cheeks, particularly in children.

‖Aphthæ, thrush of little children or nursing mothers, without great flow of saliva.

‖Ulceration in mouth which had perforated cheeks.

‖Whitish exudation on mucous membrane of mouth.

‖‖Epithelial degeneration of mucous membrane of mouth; a forerunner of cancer.

‖Epithelioma; ulceration had reached face.

‖Tongue swollen filling cavity of mouth; bears impression of several parts of mouth; ulcerated places deep enough to admit end of little finger; discharge ichorous, terribly offensive; small, superficial ulcers, painful on sides; hard, somewhat elastic places on tongue; color deep violet. θEpithelioma and hypertrophy.

[13] **Throat.** ‖‖Roughness; dryness of fauces.

‖Dryness of throat and chest, with violent cough, as from vapor of sulphur.

‖‖Cynanche tonsillaris.

‖Tonsillitis, with much swelling.

‖A syphilitic fur in cavity of mouth and fauces.

‖Tonsils swollen, cover white or whitish grey.

‖Catarrh of mucous membrane of fauces, tonsils and pharynx, with white exudation.

Pharynx feels cold.

‖‖Hawks up cheesy lumps about size of a split pea, having a disgusting odor and taste. θFollicular pharyngitis.

‖Angina, beginning with white points on opening of ducts of glands, threatening diphtheritis.

‖Pain on swallowing; < on one side; considerable redness of fauces; frequently white, diphtheritic patches on tonsils; dirty coated tongue; fever; chilliness; suffering expression of face; fetor oris. θAngina.

‖‖Croupous, diphtheritic exudations.

‖‖Diphtheritis, if fauces are not swollen.

‖Diphtheria: with offensive effluvia; invading larynx.

‖‖Numerous grey ulcers in mouth and throat; excessive

Digitized by Google

secretion of tough, stringy saliva; epistaxis; ravenous hunger followed by total anorexia; dryness and pain in throat, with difficult swallowing (beginning paralysis of glosso-pharyngeal nerve); excessive micturition; hæmaturia; albuminuria; hoarse voice; incessant cough and difficult respiration; chest pressed together and watery froth exuding from mouth. θDiphtheria.

‖On fourth day, pulse 120, bad sleep, little appetite; entire fauces filled with exudate; violent pain in throat; strong fetor oris; in morning a fainting fit. θDiphtheritis.

‖Secondary syphilis affecting fauces.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Violent hunger between regular periods of eating.

‖Canine hunger in attacks, > after drinking water.

‖Want of appetite; increased thirst.

[15] **Eating and Drinking.** ‖Beer and wine intoxicate easily.

‖After eating breakfast and dinner, bitter taste renewed.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: empty; sourish; alternating with pains in chest and abdomen.

‖Gagging and gulping up white mucus.

‖Loathing with shivering; nausea with eructations.

‖Vomiting: of white slime; of blood.

[17] **Scrobiculum and Stomach.** ‖Cutting in stomach.

‖Pressure, with empty feeling in stomach; chilliness; listlessness.

‖White or greyish coated tongue, pain or heavy feeling on r. side over liver; fatty food disagrees; eyes look large and projecting. θDyspepsia.

‖Gastritis: from taking too hot drinks; second stage, white coated tongue.

‖Hemorrhage from stomach.

[18] **Hypochondria.** ‖Tensive pressure in region of liver, disappearing after emission of flatus.

‖Painful pressure in region of spleen.

‖Portal congestion and enlarged liver; emptiness in stomach; pain in r. side, light yellow color of evacuations, white or greyish furred tongue, constipation; hemorrhoidal complaints.

‖Liver disease with dropsy.

[19] **Abdomen.** ‖Colic in pelvic region; diarrhœa; shifting of flatulence.

‖Chill, resulting in catarrh of duodenum, white coated tongue; stools light colored. θJaundice.

‖Peritonitis.

‖Suppurating buboes.

[20] **Stool and Rectum.** ‖Diarrhœa: after fatty food, pastry, etc.; evacuations light colored, white or slimy; white

Digitized by Google

coated tongue; painful, passing nothing but mucus; in typhoid fever, stools like pale yellow ochre; bloody, or bloody mucus.

‖Hard, dry stool, latter part mixed with mucus.

▮Stool so dry it almost crumbles.

▮Constipation through want of bile from sluggish liver; light colored stools.

‖Constant pains in rectum.

‖▮Dysentery; much blood passing with the slime.

▮Pains in abdomen, cutting as if from knives; calls to stool every fifteen or twenty minutes, with tenesmus extorting cries; evacuations consist of only a tea or tablespoonful of blood. θDysentery.

▮Hemorrhoidal bleeding; dark, thick blood.

‖Syphilitic complaints about the anus.

‖Chafing or rawness of skin in children.

‖Ascarides, threadworms.

[21] **Urinary Organs.** ‖Inflammation of kidneys, catarrhal or croupy.

▮Nephritis parenchymatosa; much albumen in urine.

‖Kidney disease with dropsy.

‖Inflammation of bladder with violent fever.

▮Acute and chronic catarrh of bladder.

▮Cystitis, second stage, when swelling has set in; discharge of thick white mucus.

‖▮Chronic catarrh of bladder.

▮Turbid urine; dirty yellow sediment. θNephritis.

‖Itching in urethra.

▮Diabetes, excessive and sugary urine; stomach and liver deranged, grey or white coating on tongue; dry and light colored stools from want of bile; pain in kidneys.

[22] **Male Sexual Organs.** ▮Voluptuous dreams with violent emissions.

▮Violent erections with emissions and itching of scrotum.

▮Sexual desire diminished, with chilliness and apathy.

‖Itching in urethra.

▮Orchitis from suppressed gonorrhœa.

▮Post-gonorrhœal induration of left testicle, from abuse of injections of *Cuprum sulph.*

‖Hydrocele in little children.

‖▮Gonorrhœa of glans or urethra; second stage, with chordee.

▮Gleet combined with eczema (latent or visible), or a disposition to glandular swellings. θGonorrhœa.

▮Soft chancre.

▮After chancre, pointy condylomata on corona glandis.

▮Chronic syphilis.

‖Suppurative bubo.

Digitized by Google

[23] **Female Sexual Organs.** Menses: delayed too long or suppressed; too early or lasting too long; excessive, dark clotted, or tough, black, like tar; too frequent.
‖Hemorrhages from womb.
‖Leucorrhœa: mild and white; not transparent; obstinate and acrid.

[24] **Pregnancy. Parturition. Lactation.** ‖Morning sickness, with vomiting of white phlegm.
‖Albuminuria in gestation.
‖‖Threatened abortion.
‖First stage of puerperal fever.
‖Mastitis, weed, gathering breast, before formation of pus.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness.
‖‖Fever, loud barking cough, restlessness at night with much rough and hard coughing; dry heat and great oppression. θSpurious croup.
‖Croup, membranous exudation.
‖Bronchitis, second stage, when thick phlegm forms.

[26] **Respiration.** ‖‖Constriction of chest as from vapors of sulphur.
‖‖Oppressed breathing.
‖Bronchial asthma when secretion is white.
‖Asthma; mucus, white and hard to cough up, tongue whitish or furred greyish.

[27] **Cough.** ‖‖Violent cough with coryza.
‖‖Dryness of throat and chest with violent cough as from vapor of sulphur.
‖Acute, short, spasmodic cough.
‖Cough, stomachy, noisy, with protruded appearance of eyes, or itching at anus.
‖Croupy cough; hard, white coated tongue.
‖Whooping cough, much opaque, white mucus.
Cough: in consumption, with thick white sputa, white coated tongue; white or yellowish white phlegm.
‖‖Sputa white as milk.
‖Yellowish green mucous discharge from lungs.

[28] **Inner Chest and Lungs.** ‖‖Oppression of chest, with violent beating of heart, sometimes preceded by rush of blood to chest or attended by a sensation as if lungs were tied with a thread.
‖Constriction of chest with palpitation of heart.
‖Constriction in chest, as from vapor of sulphur.
‖Pleurisy, second stage; plastic exudation.
‖Cold in chest, with thick white or yellowish sputa.
‖Lung disease, expectoration whitish, thick, or yellowish white and slimy; tongue frequently coated with white fur at back.
‖Inflammation of lungs, second stage; tongue white coated.
‖‖Catarrhal pneumonia, r. side.

Digitized by Google

‖Croupy inflammation of lungs.
‖Catarrhal phthisis, affecting small space in upper r. lung, with crackling respiration (audible at night to herself), dulness on percussion; paleness; emaciation; fever slight; cough with greenish expectoration.
‖Hemorrhage from lungs.

[29] **Heart, Pulse and Circulation.** ‖Palpitation of heart, with constriction of chest.
‖Perceptible but not accelerated beating of heart, with coldness in cardiac region.
‖Violent but uniform beating of heart; oppression of chest, cold feet.
‖Palpitation of heart, with sensation of coldness in region of heart.
‖Palpitation from excessive flow of blood to heart; in hypertrophic conditions.
‖Pericarditis, second stage.
‖Heart disease causing dropsy.
‖Pulse accelerated, or soft and sluggish, not synchronous with beats of heart.
Right pulse full, soft, sluggish (68), intermitting every twenty-five or thirty beats, not synchronous with beats of heart (80), l. pulse being at same time small, soft, easily compressible.
‖Embolus; for that condition of blood which favors the formation of clots (fibrinous), which causes plugs.

[31] **Neck and Back.** ‖Glands of neck swollen.

[32] **Upper Limbs.** ‖Coldness in arm; internal coldness in r. arm.
Drawing, tearing in wrist joints or tearing ir r. wrist joint along ulna.
‖After dancing and cooling drafts from r. side, a stiff neck and pain in shoulder when moving r. arm; next night so bad that she had to cry out; three months later, cannot move arm, it causes pain in shoulder and shoulder blade; elbow and hand somewhat movable; fingers numb and powerless; pains are a continuous pressing; dry heat or letting sun shine on it, does good; cannot bear tight clothes or to lie on affected side.
‖Tenalgia crepitans.
‖Phlyctænoidal pimples on backs of hands.
‖Warts on hands.
‖Itching pimples with small vesicles on dorsa of hands.

[33] **Lower Limbs.** ‖Inflammation of hip joint.
‖Hip joint disease, second stage, when swelling commences or is present.
‖Drawing in thigh.
‖Violent darting in r. knee.

Digitized by Google

‖Swelling of leg below knee; cold and very hard, and looked as if ready to burst; almost twice its usual size.
‖Chronic persistent swelling of feet and lower limbs, swelling soft at first, afterwards hard to touch, without pain or redness; itchy; at one stage snowy white and shining; swelling less perceptible in morning than in evening; great tension, with a feeling as if it would burst.
‖Cramp in leg.
‖Ulcers on legs with callous edges.
‖Cold feet, with palpitation of heart.
‖Fresh chilblains; bunion.
‖Ingrown toenails.

[34] **Limbs in General.** Lameness: rheumatic; with shiny, red swellings; chronic, caused by rheumatism of joints.
‖Rheumatic pains.
‖Acute articular rheumatism.
‖All joints swollen, could not stay in bed a single night.
‖Chilblains on hands or feet or any part.

[35] **Rest. Position. Motion.** When moving r. arm: pain in shoulder.
Violent exercise: vertigo with congestion to head.

[36] **Nerves.** ‖Great weakness; with diarrhœa.
‖Twitchings of muscles, especially about face and head; < after abuse of mercury.
‖Convulsions followed by delirium.
‖Epilepsy, if occurring with, or after suppression of eczema.
‖Asthma; white mucus and hard to cough up.
‖Rheumatic paralysis.

[37] **Sleep.** ‖Somnolence.
‖Snoring and oppression of breathing; restless sleep with anxious dreams, towards morning.

[38] **Time.** Toward morning: restless sleep with anxious dreams.
Morning: feels more tired than evening; fainting fit; sickness; swelling in limbs >.
Evening: chilliness; headache; redness of eyes, with pain; swelling in limbs <.
Night: bleeding of nose; restlessness, with much rough and hard coughing; crackling respiration audible to herself; could not stay in bed a single night on account of swollen joints; delirium; itching.

[39] **Temperature and Weather.** In bed: itching of whole body.
Dry heat and letting sun shine on arm does good.
Cooling drafts, after dancing: stiff neck and pain in shoulder.
Cold: chaps hands and lips.

[40] **Fever.** ‖Shivering all over; or over back and neck, with warm feet.
‖Continual chilliness with rigidity of hands.

Digitized by Google

‖Chill with vomiting of white (not transparent) mucus.
‖Chilly in open air; in afternoon.
‖Febrile condition, violent beating of pulse and heart.
‖Intolerable heat in head.
‖Intermittent fever; fur at back of tongue greyish or white; vomiting of white (not transparent) mucus.
‖Inflammation of peritoneum, pleura, and serous membranes of brain and pericardium.
‖Childbed fever.
‖Grey or white deposit on tongue; diarrhœa, with light yellow ochre colored evacuations; abdominal tenderness and swelling. θTyphoid fever.

41 **Attacks, Periodicity.** Every fifteen or twenty minutes: calls to stool.
Periodical attacks lasting eight to nine days: severe pain throughout whole body.
Twenty-four hours: rash disappears.
For three months: infiltration into r. cornea.
Three months after taking cold: cannot move arm; it causes pain in shoulder and shoulder blade.

42 **Locality and Direction.** Right: dimness of eye; bleeding from nostril; paralysis of facial nerve; lips could not be held firm on side of face; heavy feeling on side over liver; pain in side; catarrhal pneumonia; catarrhal phthisis affecting small space in upper lung; pulse full, soft, sluggish; internal coldness in arm; tearing in wrist joint; stiff neck and pain in shoulder when moving arm; violent darting in knee; pimples in corner of mouth.
Left: aching in side of temple; eye became gradually weaker from month to month; blister on lower edge of cornea; side of face fiery red; pulse small, soft, easily compressible.

43 **Sensations.** As if sand was in eye; as if leg would burst; as if lungs were tied with a thread.
Pains: in head and face; on swallowing < on one side; in throat; in rectum; in abdomen; in kidneys; in shoulder when moving arm; in shoulder blade; of gums and cheeks; in chest; in abdomen; on r. side over liver; in r. side.
Violent pain: in throat.
Severe pain: throughout whole body.
Sudden severe pain: in r. eye.
Violent darting: in r. knee.
Lightning-like attacks of pain: in face.
Tearing: in upper jaw.
Cutting: in stomach; in abdomen.
Drawing tearing: in wrist joints; along ulna.

Digitized by Google

Cramplike drawing: in cheeks.
Throbbing: of temporal artery.
Colic: in pelvic region.
Tensive drawing: in cheeks.
Drawing: in thigh.
Rheumatism: of joints.
Aching: in l. side of temple; extending from head into jaws; in face; in teeth.
Stinging burning: taste; blisters on tongue.
Stinging: in jaw and teeth.
Twitching: in corners of eyes.
Irritation: in root of nose.
Dull pain: in eye and over brow.
Painful pressure: in region of spleen.
Tensive pressure: in region of liver.
Pressure, with empty feeling in stomach.
Constriction: of chest.
Heavy feeling: on r. side over liver.
Oppression: of chest.
Tightness: in occiput.
Peculiar sensation: in cervical muscles.
Dryness: in mouth; of fauces; of throat and chest.
Confusion: of head; in occiput.
Emptiness: in stomach.
Itching: in urethra; of scrotum; on tongue; at anus; of whole body.
Internal coldness: in r. arm.
Coldness: in cardiac region; in arms.

" **Tissues.** ‖ Disturbed action of vasomotor nerves, congestions, with tension, or coldness.
‖ Congestions; in second stage, interstitial exudation; causes swelling or enlargement of parts, white coated tongue or white sputa.
‖ Hemorrhage, blood clotted, black, thick, viscid.
‖ Inflammation of lymphatic vessels; acute glandular infiltration; hard swellings.
‖ Inflammation of serous membranes in second stage of peritonitis, pleuritis and pericarditis; acute articular rheumatism and inflammation of lungs.
‖ Discharges of thick, white or yellowish, slimy mucus, from nose, ear, eyes, or any passage lined with mucous membrane.
‖ Mucus white, like milk-glass.
‖ Fibrous exudation on mucous membranes.
‖ Exudations, fibrinous, in interstitial connective tissues, causing swelling and enlargement of these parts.
‖ Exudations, after inflammation, with effusion of lymph.
‖ Sticky exudations.

Digitized by Google

‖‖Fibrinous exudations, glandular infiltration, and inflammatory infiltration of skin, causing swelling of part, arising from a disturbed balance of organic (albuminoid) basis in cells and of molecules of potassium chloride, or muscle salt, which stands in biological relation to albuminoid substances—*i. e.*, fibrine.

‖Hard, scorbutic infiltration of subcutaneous tissue.

‖Croupous and diphtheritic exudations.

‖‖Diseases which arise from want of this salt are marked either by exudations (swellings), torpor of liver, or by casting off of effete albuminoid substance, as seen in white coating of tongue, or whitish secretions and expectorations.

Dysentery, diphtheria, laryngeal croup, croupous pneumonia, fibrous exudation in interstitial connective tissue (*e. g.*, mastitis), acute infiltrations of lymphatic glands, infiltrated inflammations of skin with or without vesiculation (erysipelas, etc.).

‖Adhesions, recent, consequent on inflammations; fibrinous exudations arising from excessive blood pressure on walls of bloodvessels.

‖If swelling remains on bruised parts.

‖Cuts, with swelling.

‖Proud flesh.

‖‖Causes diminution and shrinking of granulations, resorption of adjacent infiltrations, diminution of secretion and of sensitiveness, and revival of drooping spirits. θOpen carcinoma (locally).

‖Carbuncles, for swelling.

‖Abscess, second stage, or when swelling (interstitial exudation) takes place.

‖Acute or chronic articular rheumatism.

‖Rheumatic, gouty pains.

‖Dropsy: from obstruction of bile ducts and enlargement of liver; from weakness of heart; with palpitation.

Liquid drawn off whitish; white mucus in sediment of urine.

‖Ascites; anasarca; sequela of fever.

‖Many disorders, especially cutaneous eruptions, resulting from use of bad lymph in vaccination (*Silica*).

‖Condylomata; warty excrescences.

‖‖Scorbutic mouth; especially after mercury; chronic scorbutus; scurvy.

‖Infantile or chronic syphilis.

Touch. Passive Motion. Injuries. Touch: excites lightning-like attacks of pain in face.

Cannot bear tight clothes or lie on affected side.

Injuries, from falls, blows, etc., with swelling of parts; chilblains; burns; proud flesh after mechanical injuries.

Digitized by Google

Skin. ||Itching of whole body, in bed.
|Jaundice caused by gastro-duodenal catarrh.
|Erythema; swelling present; white coated tongue.
|Excoriation, chafing of skin, especially if inclined to scab, tongue whitish.
|Intertrigo of infants.
|Chapped hands or lips from cold.
||Papulæ, small, red; pimples on thigh and in r. corner of mouth; small vesicles on extremities filled with pus, red areolæ, not itching much.
||Rash, with single pimples.
|Pimples on face, neck, etc., caused by disturbed action of follicular glands.
|Eruption with white scales.
|Eruption of blisters. θIntermittent.
|Eruptions: pustules, pimples; discharging a whitish mattery substance; on skin (rash), if connected with stomach derangement; white coated tongue, accompanied by deranged menstrual period.
|Blisters arising from burns.
|Little blisters on skin, filled with lymph. θIntermittent.
|Vesicles, with seroso-fibrinous contents.
|Herpes Zoster.
|Eczema: arising after vaccination with bad vaccine lymph; from suppressed or deranged uterine functions; oozing from inflamed skin; of white secretions from skin.
|Mealy scurf.
|Greenish, brownish, yellow crusts.
|Milk crust.
|Inflammation of skin, with subcutaneous swelling.
|Festers, gatherings in any part; boils.
||Proud flesh in ulcers.
|Miliary and venereal symptoms.
|Barber's itch.
||Chilblains; recently contracted.
Inflamed flaws in nails.
Lupus.
||Erysipelas bullosa.
|Vesicular erysipelas and shingles.
||Chicken pox.
|Measles; hoarse cough, glandular swellings, furred tongue, white or grey deposit; after effects; diarrhœa, whitish, or light colored loose stools, white tongue, deafness from swellings, etc.
|Variola.
|Attack of slight scarlatina, rash disappearing after scarcely twenty-four hours; throat symptoms which threatened to be severe disappeared in three or four days;

Digitized by Google

on seventh day almost complete retention of urine set in, although child drank a good deal; urine albuminous; feet swollen; abdomen greatly distended; high fever; delirium at night.

" **Stages of Life, Constitution.** Mercurialized patients when a scorbutic state has been created.

Boy, æt. 1½; catarrhal pneumonia.

Girl, æt. 7; blisters on cornea, scabby eyelids.

Boy, æt. 7; croup.

Man, æt. 23, increased dandruff.

Woman, æt. 24, blonde, suffering five years; affection of mouth.

Woman, æt. 29, melancholic, suffering from mental disturbance, and chronic affection of liver; faceache.

Woman, æt. 33, married; catarrhal phthisis.

Man, æt. 35; parenchymatous keratitis.

Woman, æt. 36, suffering from chronic affection of liver, after mental disturbance; faceache.

Man, æt. 36, suffering for two years; chorio-retinitis.

Man, suffering three days; dysentery.

Woman, æt, 44, gouty; faceache.

Woman, æt. 56, always wore blue spectacles, three years ago, while walking through fields covered with snow, on which sun was shining brightly; sudden loss of vision of r. eye.

" **Relations.** Antidoted by: *Bellad.*, *Calc. sulph.*, *Hydrast.*, *Pulsat.*

It antidotes: *Mercur.*, especially when scorbutic state of blood exists.

Compatible: after *Ferr. phos.* in glossitis, bloody vomiting, cystitis, croup, tussis and pertussis, heart diseases, pleuritis, pneumonia, typhus, skin inflammations, rheumatism, and mechanical injuries; follows *Kali phos.* in ear diseases and suppressed menses; is followed by *Kali sulph.* in syphilis, cramp and inflammations; is followed by *Silica* in mastitis and syphilis.

Compare: *Apis*, *Arsen.*, *Bellad.*, *Bryon.*, *Cadmium.* (constricted chest), *Calc. phos.* (lupus), *Iodium*, *Iris*, *Mercur.*, *Merc. dulc.* (eustachian tube troubles), *Mur. ac.*, *Natr. mur.*, *Nitr. ac.*, *Pulsat.*, *Rhus tox.*, *Spongia*, *Sulphur*, *Thuja.*

KALI NITRICUM.

Nitre. KNO_3.

Proved by Hahnemann and his provers, also by Engler, Hecker, Heisterbergkh, Kneschke, Kummer, Richter, Siebenhaar, Jörg, Assman, Alexander, Rummell, Schroeder, Lier, Frinzelberger, Nicol, Traub, Frank, Muhlenbein, and others. See Allen's Encyclopedia, vol. 5, p. 355.

CLINICAL AUTHORITIES.—*Polypus of nose*, Kippal, Org., vol. 3, p. 96; *Use in dysentery*, Gauwerky, Rück. Kl. Erf., vol. 5, p. 446; *Pains in chest*, Gregg, p. 20; *Affections of chest*, Arnold, Rück. Kl. Erf., vol. 5, p. 823; *Pneumonia*, Hocking, Raue's Rec., 1874, p. 149; *Anthrodynia*, Cattell, B. J. H., vol. 11, p. 349; *Rheumatism*, Cattell, B. J. H., vol. 11, p. 349.

[1] **Mind.** Depression; anxiety; peevishness; delirium.

[2] **Sensorium.** ‖Fainting fits, with vertigo in morning when standing, > when sitting down; afterwards obscuration of sight, with great weakness and drowsiness; pain in small of back and constriction in abdomen; staggering gait, with vertigo. θVertigo.

[3] **Inner Head.** ‖Headache in vertex on rising.

[7] **Smell and Nose.** ‖Sore pain and swollen feeling in r. nostril, painful on pressure.

‖Mucous polyp of r. side, very large, and distending nose.

‖Polypus of r. nostril, growing more rapidly after each attack of headache, which was > by camphor.

[8] **Upper Face.** Small pustules on face.

[11] **Taste and Tongue.** Sour taste.

Tongue coated white.

[12] **Inner Mouth.** Fetid odor from mouth.

[14] **Appetite, Thirst. Desires, Aversions.** Little appetite, with much thirst.

‖Thirst, drinks a sip at a time for want of breath.

[17] **Scrobiculum and Stomach.** ‖Faintlike weakness about pit of stomach.

[19] **Abdomen.** Violent colic, more in r. side of abdomen, > by emission of flatus.

‖Stitching and sticking pain; abdomen swollen and very tender to touch; coldness of lower extremities; numb and stiff feeling of affected parts, as if they were made of wood. θPeritonitis.

[20] **Stool and Rectum.** ‖Diarrhœa after eating veal.

Stools: watery; thin, fecal; bloody; soft or diarrhœa-like; sluggish; hard, like sheep dung.

Digitized by Google

Before stool: violent colic; urging.
During stool: cutting colic in whole intestinal canal; tenesmus.
After stool; cutting colic: tenesmus; burning and stinging in anus.
Frequent pressing in rectum.
In dysentery, after *Acon.*, when latter fails to remove cutting pain, great thirst and icy coldness of feet; followed well by *Nux.*

[21] **Urinary Organs.** ‖Frequent urging to urinate, at first only a few drops, then usual stream.
‖Burning in urethra while urinating, and greatly diminished urine.
‖Profuse emission of urine, as clear as water. θDiabetes insipidus.

[25] **Female Sexual Organs.** ‖Suppression of menses.
‖Menstrual blood black as ink, with much suffering.
‖Thin, white, mucous leucorrhœa, with pain in small of back, as if bruised.

[28] **Inner Chest and Lungs.** Violent stitch in upper part of sternum, from without inward, on l. side.
Stitches in middle of chest, extending to both sides and toward axilla, when walking (during menses).
Stitches in l. side of chest, toward back, and below l. mamma.
Sticking below short ribs of r. side, toward back, apparently behind liver.
‖Stitching pains in chest greatly impeding respiration.
‖Congestion to lungs in tuberculosis.
‖Severe stitches in l. side of chest in evening, causing shortness of breath; severe cough, with expectoration of blood; synochal fever; full, hard and quick pulse; heaviness and dulness of head; delayed, hard stool; red or turbid urine; great and constant thirst. θLung affections.
‖Pneumonia, with excessive heat and thirst, > by copious perspiration and profuse hemorrhage.
‖Relapse induced by exposure; distressing dyspnœa; cannot lie with head low; wants to be fanned to keep from suffocating; thirst, drinks only sip at time for want of breath; pulse rapid; cough, with purulent expectoration. θPneumonia.
‖Severe, acute pains in chest, cutting like a knife, and shooting from centre of sternum to armpit and sides of chest below; cough and expectoration. θSuppressed syphilis.
‖Oppression of chest in phthisical subjects, when constant irritation to cough and expectoration, often bloody in

Digitized by Google

character, causes an evening fever with hot hands and cheeks.

‖Useful in all stages of phthisis, but particularly for acute exacerbations with much cough, dull headache and severe pain in chest; cough caused by tickling in middle of chest, very severe, taking away breath, with audible palpitation of heart, expectoration often mixed with coagulated blood.

[29] **Heart, Pulse and Circulation.** ‖Acute rheumatism, with endocarditis.

[33] **Upper Limbs.** Pimples on r. forearm, discharge water when scratched.

Boil at lower part of thumb.

[34] **Limbs in General.** ‖Anthrodynia in several joints.

Formication in hands and feet.

[35] **Rest. Position. Motion.** Cannot lie with head low, on account of dyspnœa.

Standing: vertigo.

Sitting down: vertigo >; debility <.

Rising: headache on vertex.

Walking: stitches in middle of chest.

Gentle motion: debility >.

[36] **Nerves.** Debility felt more when sitting than during gentle motion.

[37] **Sleep.** Sleep restless, with nightmare.

Insomnia after midnight; light morning sleep.

‖On awaking, pain in small of back.

[38] **Time.** Aggravation: 3 A.M.

Morning: vertigo; light sleep.

Evening: severe stitches in l. chest; fever with hot hands and cheeks.

After midnight: insomnia.

[42] **Locality and Direction.** Right: sore pain and swollen feeling in nostril; mucous polyp in side of nostril; violent colic more in side of abdomen; sticking below short ribs; pimples on forearm.

Left: violent stitches on side of sternum; or stitch in side of chest.

From without inward: violent stitch in sternum.

[43] **Sensations.** As if parts of whole body were made of wood.

Pain: in small of back; in vertex.

Severe pain: in chest.

Cutting: pains in chest; colic, in intestinal canal.

Shooting pains: from centre of sternum to armpit and sides of chest below.

Violent stitch: in upper part of sternum.

Stitches: in middle of chest; in l. side of chest and below mamma.

Digitized by Google

Stitching and sticking pains in abdomen.
Sticking: below short ribs of r. side.
Violent colic: in r. side of abdomen.
Burning and stinging: in anus.
Burning: in urethra.
Sore pain: in r. nostril.
Pressing: in rectum.
Constriction: in abdomen.
Swollen feeling: in r. nostril.
Heaviness and dulness: of head.
Faintlike weakness: about pit of stomach.
Numb and stiff feeling: of affected parts.
Tickling: in middle of chest.
Formication: in hands and feet.
Coldness: of lower extremities.

[44] **Tissues.** Acute rheumatism, with endocarditis.

[45] **Touch. Passive Motion. Injuries.** Touch: abdomen very tender.
Pressure: nostril painful.

[46] **Skin.** Vesicles full of thin yellow fluid.

[47] **Stages of Life, Constitution.** Asthmatic constitutions.
Girl; polypus.
Man, æt. 35, syphilitic subject; pains in chest.
Woman, æt. 72; pneumonia.

[48] **Relations.** Compare: *Lycop.* in lung affections; *Canthar.* and *Camphora* in renal diseases

KALI PERMANGANICUM.

Permanganate of Potash. $2\ KMnO_4$.

Proved by H. C. Allen. See Allen's Encyclopedia, vol. 5, p. 351.

CLINICAL AUTHORITIES.—*Ulcerated throat*, Woodgate, Hom. Rev., vol. 12, pp. 151, 152; *Diphtheria* (2 cases), Sprague, A. H. O., vol. 4, p. 360; Allen, A. H. O., vol. 3, p. 352; Nichol, Œhme's Therap., p. 45; B. J. H., vol. 34, p. 386.

[13] **Throat.** ‖Sanious discharge from nares.

‖Tonsils and soft palate swollen and inflamed; patches of whitish ulceration on tonsils; pain in swallowing; glands of neck tender. θUlcerated throat.

‖Tonsils swollen, and on each patches of ulceration of yellowish color; much pain internally and externally.

‖Diphtheria, with ulceration, and gangrenous suppuration with fetid odor.

‖Violent headache; throat swollen and painful, profuse salivation; cervical glands swollen and painful; fauces covered with peculiar wash leather, greyish membrane; breath offensive from beginning, and thin, watery, sanious fluid escaping from nares excoriating upper lip; dark colored offensive diarrhœa; vomiting; fluids taken by mouth return through nose; general prostration. θDiphtheria.

‖Comatose state; prostration extreme; nares completely plugged, fetor intolerable; pulse intermitting. θDiphtheria.

‖Pharynx swollen very much and covered with a yellowish membrane; high fever; unable to speak or swallow; pulse 135; furred tongue; fetid breath. θDiphtheria.

‖Pharynx covered with yellowish pseudo-membrane, not very firmly attached; extreme fetor of breath; inability to swallow; pulse 140 and feeble; great prostration. θDiphtheria.

‖Underneath a fetid, scablike membrane considerable erosion of mucous membrane. θDiphtheria.

‖Odor of breath unbearable; fluids taken by mouth returned by nose; general and excessive prostration; great dyspnœa; foul diphtheritic exudations all over fauces.

[27] **Cough.** ‖Expectoration very fetid.

[47] **Stages of Life, Constitution.** Girl, æt 3; diphtheria.

Girl, æt. 6, suffering one week; diphtheria.

Digitized by Google

Girl, æt. 7; diphtheria.
Girl, æt. 9, stout build; diphtheria.
Girl, æt. 16; ulcerated throat.
Woman, æt. 25, cook; ulcerated throat.

KALI PHOSPHORICUM.

Phosphate of Potash. K_2HPO_4.

One of the constituents of the human body, obtainable from calcined bones.
Also obtained by adding carbonate of potassium to dilute phosphoric acid.
One of the Twelve Tissue Remedies, introduced by Schuessler.
This valuable medicine needs proving on the healthy; so far we have but the suggestions of Schuessler, and results of limited clinical experience.

CLINICAL AUTHORITIES.—*Mental alienation*, Amberg, Schuessler's Tissue Remedies, p. 70; *Melancholia religiosa*, Amberg, Schuessler; *Headache*, Wesselhœft, Schuessler, p. 29; *Neuralgia of face*, Wesselhœft, Schuessler, p. 29; *Stomatitis*, Rapp, Schuessler, p. 43; *Cholerine*, Schuessler, p. 84; *Enuresis*, Crowell, Schuessler, p. 64; Amberg, Allg. Hom. Ztg., vol. 103, p. 84; *Asthma*, Rapp, Schuessler, p. 63.

[1] **Mind.** ▮Loss of memory, or weak memory.
▮▮Quiet delirium. θDysentery. θPneumonia.
▮▮Delirium tremens; horrors of drunkards; fear, sleeplessness, restlessness and suspicion; rambling talk; endeavors to grasp or avoid visionary images.
▮Says she is eternally and irretrievably damned; continually weeping and crying, wringing her hands, pulling to pieces and tearing her clothing, as well as bed covering; does not recognize her surroundings; no sleep; staring eyes; often must be held by two persons; food and medicine must be forcibly administered. θMelancholia religiosa.
▮▮Anxiety, nervous dread without special cause, gloomy moods, fancies, taking dark views of things, dark forebodings.
▮Melancholia and other similar ailments, which arise from deranged mental function, caused by overstrain of mind, or from exhausting drainings affecting nerve centres of spinal cord.
▮▮Sighing or moaning, also when occurring during sleep.
▮▮Whining and fretful disposition in children and adults.
▮Crying or screaming in children, from undue sensitiveness.
▮▮Hysterical fits of laughter and crying; yawning.

Digitized by Google

‖Shyness, excessive blushing, from undue sensitiveness.
‖Vexation, restlessness and irritability.
|Easily frightened, and inclined to fear.
|Depression of spirits and lassitude.
|Profound hypochondria and melancholia, weariness of life and fear of death, suspiciousness, weeping mood.
‖Dread of noise, oversensitiveness to noise and light.
‖Homesickness, morbid activity of memory, haunted by visions of past, and longing after them.

[2] **Sensorium.** |Concussion of brain.
‖Nervous vertigo; cerebral anæmia.

[3] **Inner Head.** |Excruciating nervous headache, with great sensitiveness to noise, during menses.
‖Pains and weight at back of head, with feeling of weariness and exhaustion.
|Headache of students; brain fag from overwork.
‖Headache > by motion.
‖Softening of brain; early stage; hydrocephalus.
‖Brain affections with diarrhœa smelling like carrion.

[5] **Sight and Eyes.** ‖Weak sight; from exhausted condition of optic nerve; strabismus; after diphtheria.
Excited, staring appearance of eyes.
Drooping of eyelids.

[6] **Hearing and Ears.** ‖Deafness, from want of nervous perception, weakness, or exhaustion of auditory nerve.
|Noises in ears from nervous exhaustion; nervous roaring.
‖Ulceration of membrana tympani and middle ear suppurations, with foul discharge.
‖Atrophic conditions of nerve.

[7] **Smell and Nose.** ‖Epistaxis; from predisposition or weakness; ozæna.
‖Hay fever with nervous irritability.

[8] **Upper Face.** ‖Face livid and sunken, with hollow eyes.
|Neuralgia in r. side of face, proceeding from hollow teeth, > by cold applications.
‖Facial neuralgia; great weakness after attack.
‖Loss of power in muscles of face, causing contortions, or an involuntary twist of mouth. θParalysis.

[10] **Teeth and Gums.** ‖Chattering of teeth, nervous.
‖Toothache of highly nervous, delicate, pale, irritable, sensitive persons.
‖Bright red border, easily bleeding gums; scorbutic.

[11] **Taste and Tongue.** ‖Tongue: coated, like stale, brownish, liquid mustard; offensive breath; excessively dry in morning, feeling as if it would cleave to roof of mouth.

[12] **Inner Mouth.** ‖Breath offensive, fetid; stomatitis.
‖Gums spongy and receding.
|Noma.

Digitized by Google

[13] **Throat.** ‖Diphtheria, with marked, putrid, gangrenous condition, and fearful stench from mouth; malignant.

[15] **Appetite, Thirst. Desires, Aversions.** ‖Excessive hungry feeling, soon after eating, caused by nervous depression or weakness.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Inordinate appetite; wants to eat almost every hour; very tired and enervated.

[17] **Scrobiculum and Stomach.** ‖Sweat during meals, with feeling of weakness at pit of stomach; "gone sensation."

‖Indigestion with great nervous depression; faint feeling.

‖Inflammation of stomach; failing strength, dryness of tongue.

[18] **Hypochondria.** ‖Affection of spleen; leucæmia lienalis.

[19] **Abdomen.** ‖Flatulence with distress about heart.

‖Inflammatory colic of horses with incipient gangrene.

‖Abdominal herniæ and prolapsus; in weak persons.

[20] **Stool and Rectum.** ‖Diarrhœa; painless, watery; with heavy odor; occasioned by fright and other causes depressing and exhausting nerves; putrid, carrionlike stools; great prostration.

‖Delirium, dryness of tongue, tympanites; carrionlike odor of discharges; dysentery; pure blood is discharged.

‖Stools: like rice water; offensive, ichorous; pure blood.

‖Vomiting and diarrhœa; painful cramps in calves; rice water stools. θCholera.

‖Cholera (second stage) caused by affection of nerves of intestinal canal.

‖Putrid and typhoid dysentery.

[21] **Urinary Organs.** ‖Bright's disease; depressed condition of nerves; sleeplessness, irritability, weary feeling.

‖Diabetes; nervous weakness; breath peculiar, with hay-like odor, thirst, emaciation, often voracious hunger, all consequent on liver derangement.

‖Inflammation of bladder; asthenic condition.

‖Catarrh of bladder; vomiting, paleness of face, loss of strength and dryness of tongue.

‖Paralysis of sphincter, inability to retain urine, generally of old people.

‖Incontinence of urine, from paralysis of sphincter.

‖Obstinate enuresis; general weakness.

[27] **Male Sexual Organs.** ‖Phagedenic chancre; balanitis.

[28] **Female Sexual Organs.** ‖Catamenia: premature and profuse in nervous subjects; too scanty; too profuse, with heavy odor, dark red, or blackish red, thin and not coagulating.

‖‖Amenorrhœa, retention or delay of monthly flow, with depression of spirits, lassitude, and general nervous debility.

Digitized by Google

[24] **Pregnancy. Parturition. Lactation.** Labor pains: feeble and ineffectual; spurious.
‖Mastitis, pus brownish, dirty looking, with heavy odor; adynamic condition; gangrenous, bad colored, bad smelling pus.
‖Childbed fever with absurd notions or mania.
‖Second stage of puerperal fever.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Speech slow, becoming inarticulate; creeping paralysis.
‖Recent paralysis of vocal cords.
‖Hoarseness from overexertion of voice.
‖‖Croup, last stage; extreme weakness, pale or livid countenance.

[26] **Respiration.** ‖Nervous asthma with depression; asthma after most moderate use of food; asthma with sallow features, sunken eyes, emaciation.
‖Shortness of breath; asthmatic when going up stairs.

[27] **Cough.** ‖Whooping cough in highly nervous patients, or great exhaustion.

[28] **Inner Chest and Lungs.** ‖Pain in lower part of l. thorax, < on coughing; slight catarrhal cough; tongue dry; pulse frequent, small and intermittent; no appetite; great weakness.
‖Œdema pulmonum; dyspnœa, spasmodic cough, with expectoration of frothy, serous masses; lassitude and prostration; livid countenance.

[29] **Heart, Pulse and Circulation.** ‖Palpitation: from nervous causes; on ascending, with shortness of breath; with nervousness, anxiety; with sleeplessness.
‖Intermittent action of heart: with morbid, nervous sensitiveness; from violent emotions, grief, care.
‖Fainting, from weak action of heart.
‖Pulse intermittent, irregular.
‖Sluggish circulation, in sensitive, nervous subjects; to strengthen heart's action.

[31] **Neck and Back.** ‖Spinal anæmia from exhausting diseases.
‖Softening of spinal cord, loss of power, stumbles and trips.
‖Paralytic or rheumatic lameness, stiffness after rest, > by gentle motion.

[33] **Lower Limbs.** ‖Rheumatic or neuralgic affections of sciatic nerve, > from motion.
‖For two days drawing, laming pain in sole of foot; affected place size of silver dollar, bluish.
‖Chilblains, if recent.

[34] **Limbs in General.** ‖Paralyzing pain in limbs, > by motion and external warmth.

[35] **Rest. Position. Motion.** During rest: tearing, paralytic pains <.
After rest: stiffness; severe rheumatism.

Digitized by Google

Rising: neuralgic pains <; paralytic pains <.
Beginning to move: paralytic pains <.
Motion: headache >; rheumatic affection >; paralytic pains >.
Gentle exercise: neuralgic pains >; stiffness >; rheumatism >.
Going up stairs: shortness of breath.

[32] **Nerves.** ‖Starting on being touched, or at sudden noises.
‖Undue irritability, after exhausting diarrhœa or long continued use of purgatives.
‖Disposition to feel bodily pains too acutely.
‖Nervous attacks, from sudden or intense emotion, or from smothering passion; in highly nervous and excitable persons; also feeling as of a ball rising in throat.
‖Fits, from fright, with pallid or livid countenance.
‖Spasmodic attacks; face pale and sunken, body and limbs cold, violent palpitation θEpilepsy.
‖Nervous affections, when occurring without reasonable causes, such as impatience, irritability, dwelling upon grievances, merriment becoming oppressive, shedding tears about trifles, making mountains out of mole hills.
‖Neuralgia, much reduced constitutions, paralyzing pains.
‖Neuralgic pains, > with gentle exercise, < on rising.
‖Sciatica.
‖Paroxysms of pain followed by great weakness.
‖Feeling of faintness; lassitude and palpitation.
‖General debility, with nervousness and irritability.
‖Adynamic typhoid condition.
‖Collapse, with livid countenance and low pulse.
‖Tearing, paralytic pains in nerves, most during rest, > from motion without exertion, especially felt after rising from sitting, or on beginning to move.
‖Lameness: recent, paralytic, from exhaustion of nerves, with stiffness after rest, yielding to gentle exercise; rheumatic; rigidity of muscles.
‖Creeping paralysis; course of disease slow; tendency to wasting, with loss of sense of touch.
‖Shock of paralysis, with morbid sensibility, or a bruised and painful feeling in part affected, or rigidity of paralyzed limbs.
‖Paralysis dependent on exhaustion of nerve power in recent cases, as after diphtheria.
‖Paralytic states, nasal voice, strabismus, etc., after diphtheria.
‖Atrophic paralysis.
‖Infantile paralysis recent, and if connected with teething.
‖Softening of spinal cord, idiopathic, with gradual deadening of nerves.

[33] **Sleep.** ‖Yawning: excessive, unnatural; hysterical.

Digitized by Google

‖‖Sleeplessness: after worry or excitement; from nervous causes; simple wakefulness.
‖‖Night terrors, in children awakening with fright and screaming; somnambulism.
‖‖Noises in head on falling asleep, feeling as if a rocket had passed through head.

[38] **Time.** Morning: tongue dry; rheumatism.

[39] **Temperature and Weather.** External warmth: > paralytic pain in limbs.
Cold applications: neuralgia >.

[40] **Fever.** ‖‖Typhus or typhoid fevers; haggard face, pulse whizzing or very small.
‖Ileo-typhus.
‖‖Intermittent fever; sweat profuse and exhausting, fetid.
‖‖In yellow fever; if *Carbo veg.* is not sufficient.
‖Excessive, exhausting, strong smelling sweats.

[41] **Attacks, Periodicity.** Almost every hour: wants to eat.
For two days: drawing, laming pain in sole of foot.

[42] **Locality and Direction.** Right: neuralgia of face.
Left: pain in lower part of thorax.

[43] **Sensations.** As if tongue would cleave to roof of mouth; as of a ball rising in throat; as if a rocket had passed through head.
Pains: at back of head; in lower part of l. thorax.
Lancinating nervous headache.
Tearing, paralytic pains: in nerves.
Paralyzing pain: in limbs.
Painful cramps: in calves.
Drawing, laming pains: in sole of foot.
Rheumatic or neuralgic affections: of sciatic nerve.
Neuralgia: in r. side of face.
Bruised and painful feeling: in part affected.
Dryness: of tongue.
Weight: at back of head.

[44] **Tissues.** ‖‖Function of brain cells depressed. θAfter concussion.
All ailments which arise from or denote a want of nerve power; hence nervous prostration, exhaustion, nervous rigors; also all affections in which brain, and consequently mind, shows want of vigor.
‖‖Insanity, mania or other mental derangement; from exhausted or depressed condition of brain or nerve cells, showing itself in perverted function.
‖‖Anæmia or leucæmia, caused by long lasting mental depression, poverty of blood from continuous influences depressing mind or nerves.
‖Too rapid decay of blood corpuscles.
‖Hemorrhages; blood not coagulating, thin, blackish or light red.

Digitized by Google

▮Septic hemorrhages; stench from mouth and stomach; discharges smelling like carrion; putrid gangrene; prostration.
▮Scorbutus, gangrene, noma or stomatitis, gangrenous angina, phagedenic chancre, offensive, carrionlike diarrhœa, adynamic or typhoid conditions.
▮Fatty metamorphosis in muscular fibres.
▮▮Atrophy, wasting disease, putrid smelling stools.
▮▮Rheumatism, acute and chronic, with pains disappearing on moving about, severe in morning after rest, and on first rising from sitting position.
▮Rachitis with atrophy; profuse, discolored, foul smelling diarrhœa; violent thirst; sometimes discolored vomiting; brown covering of teeth, etc.
▮▮Suppurations, dirty, foul, ichorous fetid matter.
▮▮Cancer, encephaloid, medullary, soft (brainlike convolutions), chiefly occurring in young.
▮Noma.
▮▮Chancre, phagedenic.
▮▮Purpura hemorrhagica.

[45] **Touch. Passive Motion. Injuries.** Touch: causes him to start.
Mechanical injuries: ichorous discharge, gangrene.

[46] **Skin.** ▮▮Urticaria.
▮▮Vesicles, with bloody ichorous contents.
▮▮Greasy, offensive smelling crusts or scales.
▮▮Skin diseases with bad smelling discharge.
▮Scarlet fever: putrid condition of throat; typhoidal.
▮▮Smallpox; adynamia and decomposition of blood.
▮Offensive ulcers; bad colored, ichorous, bad smelling.
▮▮Pemphigus malignus.

[47] **Stages of Life, Constitution.** Pale, sensitive, irritable persons.
Atrophic conditions in old people.
Girl, æt. 7; enuresis.
Woman, æt. 33, pale and thin; neuralgia of face.
Woman, æt. 44, formerly neither inclined to piety nor fanaticism; melancholia religiosa.
Man, æt. 60; enuresis.
Man, æt. 80; mental alienation.

[48] **Relations.** Compare: *Arsen.*, *Baptis.*, *Carbo veg.*, *China*, *Ignat.*, *Kreos.*, *Laches.*, *Mur. ac.*, *Phosphor.*, *Phytol.*, *Pulsat.*, *Rhus tox.*
Compatible: *Cyclam.*, disordered mental conditions; *Kali mur.*, in puerperal fever; *Magnes. phos.*, bladder troubles; *Zinc. phos.*, incipient paralysis of brain, with nephritic irritation; *Natr. mur.*, *Nitr. ac.*, hemorrhages.
After weakening diseases, mushrooms, by virtue of containing *Kali phos.*, rapidly restore muscle and nerve tissue.

KALI SULPHURICUM.

Sulphate of Potash. $K_2 SO_4$.

One of the Twelve Tissue Remedies introduced by Schuessler. Needs proving.

CLINICAL AUTHORITIES.— *Vertigo*, Schlegelmann, Schuessler's Biochem., p. 75; *Falling off of hair*, Wesselhœft, Schuessler's Tissue Remedies, p. 27; *Ear affection*, Wesselhœft, Schüssler's Tissue Remedies, p. 25; *Disease of antrum Highmori*, Wesselhœft, Schuessler's Tissue Remedies, p. 26; *Ozæna*, Wesselhœft, Schuessler's Tissue Remedies, p. 27; *Whooping cough*, Wesselhœft, Schuessler's Tissue Remedies, p. 25; *Whooping cough*, Knerr, Schuessler's Tissue Remedies, p. 26; *Chorea* (13 cases), Cattell, B. J. H., vol. 11, p. 343; *Articular rheumatism*, Schlegelmann, Schuessler's Biochem., p. 75; *Epithelioma* (2 cases), Orth, Schuessler's Biochem., p. 68; *Itch eruption in children*, Cattell, B. J. H., vol. 11, p. 352; *Ivy poisoning* (Rhus tox.), Wesselhœft, Schuessler's Tissue Remedies, p. 26.

[2] **Sensorium.** ▮Dreadful vertigo, especially on rising from lying, on standing from sitting, and when looking upwards; every moment in fear of falling and dare not leave her room.

[3] **Inner Head.** ▮▮Rheumatic headache, < in warm room and in evening, > in open air.

[4] **Outer Head.** ▮▮Great pain on moving head from side to side or backwards; can move it forward without pain.
▮Yellow scales (dandruff) on scalp.
▮Bald spot as large as a silver dollar on l. side of head; hair falls out easily when combing, all over head, also hair of beard. θAfter gonorrhœa.
▮Copious scaling of scalp, moist and sticky.
▮Yellow dandruff.

[5] **Sight and Eyes.** ▮▮Purulent or yellow mucus in eye diseases.
▮Catarrh of conjunctiva, with yellow secretion.
▮▮Ophthalmia neonatorum.
▮Eyelids, with thin, yellow crusts.
▮Discharge from eyes yellow, slimy, or sticky watery.
▮▮Cataract.

[6] **Hearing and Ears.** ▮Deafness caused by catarrh and swelling of Eustachian tube and middle ear.
▮Watery, mattery discharge from ear; yellow slimy tongue.
▮Secretion of thin, yellow, sticky fluid after inflammation.
▮Brown offensive secretion from r. ear; polypoid excrescence closes meatus near opening; entirely deaf in r. ear for eight weeks.

Digitized by Google

‖Stinking otorrhœa of four years' standing.

Smell and Nose. ‖Taste and smell lost. θOzæna.

‖Coryza, yellow mucous discharge.

‖Thick, yellow, offensive discharge, alternating with watery discharge for eighteen months; l. nostril <; catamenia every three weeks; takes cold easily. θOzæna.

‖About once a week a thick, dark brown, semi-fluid accumulation of pus formed in upper l. nostril, on being blown out emitted a terrible stench; about a month previous a piece of carious bone was taken from antrum Highmori, through an upper l. alveolus, from which a tooth had been drawn four years previous.

‖Old catarrh with yellowish viscous secretion.

[8] **Upper Face.** ‖Faceache, < in warm room and in evening; > in cool or open air.

| |Epithelioma on r. cheek, extending from lower eyelid to ala nasi; size of a silver dollar; ulcerating stage; indurated base and wall-like, hard, elevated edges (greatly improved).

‖Epithelioma, size of half dollar, situated on r. side of nose just under canthus of eye; eye sympathetically affected, either through extension of disease process, or through irritating discharge, entrance of which was facilitated by a slight destruction of edge of lower lid at canthus; conjunctivitis palpebrarum et bulbi, with haziness of cornea.

[9] **Lower Face.** | |Blistered lips and mouth. θWhooping cough.

| |Lower lip swollen. θEpithelioma.

[10] **Teeth and Gums.** ‖Toothache < in warm room and toward evening, > in cool open air.

[11] **Taste and Tongue.** | |Loss of taste. θOzæna.

| |Insipid, pappy taste.

‖Tongue: coated with yellow mucus; yellow, slimy, sometimes with whitish edge.

[17] **Scrobiculum and Stomach.** ‖Sensation of faintness at stomach, and befogged feeling in head, fearing to lose her reason.

| |Pressure and feeling of fulness in stomach with a yellow mucous coating on tongue.

| |Indigestion, with sensation of pressure as of a load, and fulness at pit of stomach. θDyspepia.

| |Chronic catarrh of stomach; yellow, slimy coated tongue.

‖Catarrh of stomach and duodenum, with a yellow coated tongue; jaundice from it.

[19] **Abdomen.** ‖Gastro-duodenal catarrh; jaundice.

‖Hard and tympanitic abdomen. θWhooping cough.

[20] **Stool and Rectum.** | |Diarrhœa: yellow, slimy or watery mattery stools.

Digitized by Google

‖Black, thin, offensive stools. θWhooping cough.
‖Habitual constipation with coated tongue.
‖Hemorrhoids with catarrh of stomach and yellow, mucus coated tongue.

[22] **Male Sexual Organs.** ‖Gonorrhœa of glans or urethra; discharge purulent, yellow mucous, or greenish.
‖Orchitis after suppression of gonorrhœa.
‖Gleet.

[23] **Female Sexual Organs.** ‖Menstruation, too late and too scanty, with a feeling of weight and fulness in abdomen.
| |Catamenia every three weeks. θOzæna.
| |Headache during catamenia.
| |Metrorrhagia.
‖Leucorrhœa yellowish, or watery mattery.

[25] **Voice and Larynx. Trachea and Bronchia.** | |Hoarseness after taking cold.
‖Bronchitis, if mucus is distinctly yellow and slimy, thin, or watery mattery and profuse.
‖Yellow mucus coughed up without great exertion. θBronchitic asthma.

[27] **Cough.** ‖Whooping cough, with retching, without vomiting; inflammatory catarrhal stage; decidedly yellow, slimy expectoration.
‖Last stage of whooping cough; blistered lips and mouth; black, thin, offensive stools five times a day, hard, tympanitic abdomen; wasted to a shadow, given up to die.
‖Coarse râles; cannot cough up large amount of mucus. θPneumonia.
‖Yellow mucous expectoration.

[30] **Inner Chest and Lungs.** ‖Inflammation of lungs, with wheezing; if yellow, loose rattling phlegm be coughed up with difficulty, or sputa consist of watery matter.
| |Pneumonia with coarse râles, cannot cough up mucus.

[31] **Neck and Back.** | |Pains in back, nape of neck, or in limbs; periodical < in evening, or in warm room; > in cool or open air.
‖Backache and pains in limbs; < in warm room and towards evening, > in cool open air.
| |Stiff neck, head inclined towards l.; shoulder raised.

[32] **Upper Limbs.** | |Eruption in l. axilla, about neck and on back of both hands (Rhus poisoning).
‖Scaly eruption mostly on arms, > from hot water.

[33] **Lower Limbs.** ‖Varicose ulcer on r. leg just above instep, after kick of a horse three years ago; eight inches in circumference, concave, dark blue, emitting a stinking odor.

[34] **Limbs in General.** Pain in limbs.
Acute and wandering rheumatism of joints.

Digitized by Google

‖After being chilled while overheated, frightful pains in r. shoulder and violent fever; pains leave shoulder and attack l. knee, then go from joint to joint, and again several joints affected at a time; maddening pains, unceasing, day and night. θArticular rheumatism.
‖Pains passing from joint to joint; serous exudations.

[35] **Rest. Position. Motion.** Rising from lying: dreadful vertigo.
Sitting: dreadful vertigo.
Standing: dreadful vertigo.
Moving head from side to side or backwards: great pain.

[36] **Nerves.** ‖Chorea.

[37] **Sleep.** ‖Very vivid dreams.

[38] **Time.** Evening: rheumatic headache <; faceache <; toothache <; pains in back and limbs <.

[39] **Temperature and Weather.** Pains grow < in warm room and in evening; > in open, cool air.
Hot water: scaly eruption on arms >.
Warm room: rheumatic headache <; faceache <; toothache <; pains in back, neck and limbs <.
After being chilled while overheated: frightful pains in r. shoulder.
Open air: rheumatic headache >; faceache >; toothache >; pains in back, neck and limbs >.
Cold water: eruption >.

[40] **Fever.** ‖Intermittent fever with yellow, slimy coated tongue.
‖Rheumatic fever; pains shifting, wandering.

[41] **Attacks, Periodicity.** Five times a day: black, thin, offensive stools.
Periodical pains: in back, neck and limbs < in evening.
About once a week: a thick, dark brown semi-fluid accumulation of pus formed in upper l. nostril.
Every three weeks: catamenia.
For eight weeks: entirely deaf in r. ear.
For eight months: effects of ivy poisoning.
For eighteen months: thick, yellow, offensive discharge from nose.
Four years' standing: stinking otorrhœa.

[42] **Locality and Direction.** Right: brown offensive secretion from ear; entirely deaf for eight weeks; epithelioma on cheek; epithelioma on side of nose; varicose ulcer on leg just above instep; frightful pains in shoulder.
Left: bald spot on side of head; a thick dark brown semi-fluid accumulation of pus formed in upper nostril; a piece of carious bone was taken from antrum Highmori through an upper alveolus; head inclined to shoulder; eruption in axilla; pains leave shoulder and attack knee.

[43] **Sensations.** Pressure as of a load: at pit of stomach.

Digitized by Google

Pains: in back; nape of neck; in limbs.
Maddening pains: in joints.
Frightful pains: in r. shoulder; in l. knee; from joint to joint.
Great pain: in head.
Acute and wandering rheumatism of joints.
Rheumatic headache.
Pressure: in stomach.
Feeling of fulness: in stomach; at pit of stomach; in abdomen.
Befogged feeling: in head.
Faintness: at stomach.
Burning, itching papular eruption.
Itching pimples arising singly on skin.

44 **Tissues.** ||Its sphere of action is in lymphatic vessels; when there is a lack of this substance, a yellow mucous catarrh arises or a yellow sticky discharge from isolated places on membranes.
Secretions from mucous membranes yellowish; green.
Catarrhs, colds, with yellow, slimy secretions or expectoration of watery matter.
Inflammations, with yellow, slimy or serous secretions.
In third stage of inflammation, resolution, when a yellow mucous discharge occurs.
Effusions, watery mattery; favors resorption.
Fungoid inflammation of joints; white swelling.
|Migratory rheumatism of joints.
||Wasted to a shadow. θWhooping cough.
Epithelioma; soft polypi.
Ailments accompanied by desquamation, peeling off skin, or with itching pimples arising singly on skin.

45 **Touch. Passive Motion. Injuries.** After kick of a horse three years ago: varicose ulcer on r. leg.

46 **Skin.** ||Jaundice caused by gastro-duodenal catarrh.
|Suppressed rash of measles or other eruptive diseases, with harsh and dry skin.
||Abundant scaling of epidermis.
||Promotes desquamation after erysipelas; accelerates removal of scabs in smallpox.
||Scarlet fever; stage of desquamation.
|Burning, itching, papular eruption exuding puslike moisture.
|Recurring eruption of fine red pimples running together, presenting a red, swollen appearance; a thoroughly alkaline fluid oozes out copiously; after subsiding cuticle comes off in fine scales; itches and stings intensely >; formerly by cold water, lately by hot.
|Scurfs, scaling, chapping.

Digitized by Google

Sores on skin, with yellow, sticky secretions on limited portions, or discharges of thin, watery matter, sometimes with peeling of surrounding skin.

‖ Epithelial cancer, discharge thin, yellow, serous.

‖ Eczema, or skin affections; discharge decidedly yellow, slimy, sometimes sticky or watery mattery; when suddenly suppressed.

‖ Effects of ivy poisoning (Rhus tox.) for eight months; repeatedly broke out with small, hard, herpetic vesicles, forming a thin scab, with itching and some moisture; eruption appears in l. axilla, about neck and on back of both hands; she has a sensation of faintness at stomach and befogged feeling in head, fearing to lose her reason; very vivid dreams.

‖ Nettlerash, with or without yellow, slimy tongue, generally caused by indigestion.

‖ Itch eruption in children.

‖ Chafing of children.

‖ Diseased condition of nails, shown in interrupted growth.

[47] **Stages of Life, Constitution.** Child, æt. 18 months; whooping cough.

Boy, æt. 10, small, dark, lean; whooping cough.

Girl, æt. 19, light complexion, scrofulous; ear affection.

Woman, æt. 25, single, dark complexion, suffering eight months; ivy poisoning (Rhus tox.).

Woman, æt. 25, married, dark complexion; ozæna.

Man, æt. 26, healthy, powerful; articular rheumatism.

Man, æt. 27, dark; falling off of hair, after gonorrhœa.

Man, æt. 30, light complexion; disease of antrum Highmori.

Man, æt. 33, light complexion; ozæna.

Woman, æt. 54; vertigo.

Man, æt. 55, factory operative, ulcer on side of nose for four years, at first there was a somewhat reddened spot which was moderately elevated, and which became afterward covered with a horny crust, which later, dropping off, left an ulcer which steadily increased in depth and breadth; epithelioma.

Widow, æt 70, suffering for years; epithelioma.

[48] **Relations.** Compare: *Kali mur.*, in deafness, hoarseness, pertussis; *Natr. mur.*, in deafness, pains in stomach, coarse râles, profuse exudations.

Compatible: *Acet. ac.*, in itching and redness of skin; *Arsen., Calc. ostr., Hepar, Pulsat., Rhus tox., Sepia, Silica, Sulphur.*

Digitized by Google

KAOLIN.

Porcelain or China Clay. *Alumina Silicata.*

CLINICAL AUTHORITIES.—*Croup*, Searle, Elliott, A. H. O., vol. 8, p. 128; Lilienthal, Raue's Rec., 1871, p. 80; Searle, Elliott, Parker, Raue's Rec., 1872, p. 106; Landesmann, Raue's Rec., 1870, p. 171; Boyce, Times Retros., vol. 3, p. 29.

[7] **Smell and Nose.** ‖Nostrils feel sore; scabs form in nose; scanty and blood streaked secretion.

[13] **Throat.** ‖Membrane covering both sides of throat. θDiphtheria.

‖Fever, headache in forehead, with flushed face and sore throat; r. tonsil and arch of velum covered with heavy, yellowish white membrane; breath fetid; great prostration. θDiphtheria. (In alternation with Bellad.)

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Husky voice, metallic, rasping breathing and suffocative cough.

‖Croupous inflammation in lower part of larynx or in upper part of trachea.

‖Awoke from sleep with croupy cough; voice husky, later sunk to whisper; sawing sound during both expiration and inspiration; high fever. θCroup.

‖Voice a little husky; during night very feverish; next day skin felt dry; wanted to be carried about; appetite diminished; very little cough; on auscultation, metallic, rasping sound increasing toward evening; suffocating spells. θCroup.

‖Croup, with labored, sawing respiration, after failure of Acon., Hepar, Spongia, Bromium, Phosphor. and Iodum.

‖Croup, after failure of Spongia.

[38] **Time.** Towards evening: metallic, rasping sound increased.
Night: very feverish.

[42] **Locality and Direction.** Right: tonsil and arch of velum covered with heavy, yellowish white membrane.

[43] **Sensations.** Pain: in forehead.
Soreness: of nostrils; of throat.
Dryness: of skin.

[47] **Stages of Life, Constitution.** Boy, æt. 16 months, strong and healthy parentage; croup.
Child, æt. 4; diphtheria.
Boy, æt. 4; croup.
Girl, æt. 5; croup.
Boy, æt. 5; croup.
Young woman, subject to repeated attacks; diphtheria.

KALMIA LATIFOLIA.

Mountain Laurel. *Ericaceæ.*

An evergreen shrub, found on rocky hills, flowering in May and June.

The tincture is prepared from the fresh leaves.

Introduced by Hering and proved by himself, Kummer, Behler, Bute, Clark, Haeseler, Williamson, Freitag, Reichelm and others. See Allen's Encyclopedia, vol. 5, p. 388.

CLINICAL AUTHORITIES.—*Sun headache*, Thayer, N. E. M. G., vol. 9, p. 149; *Retinitis albuminurica*, Allen, Norton's Oph. Therap., p. 107; *Sclero-choroiditis anterior*, Allen, Norton's Oph. Therap., p. 107; *Sclerotitis*, Boyle, Allg. Hom. Ztg., vol. 112, p. 77; *Neuralgia oculorum*, Johnson, A. H. O., vol. 1, p. 168; *Chronic sore throat*, Clifton, Times Retros., vol. 3, p. 29; *Pressure in epigastrium*, Hansen, Allg. Hom. Ztg., vol, 113, p. 62; *Gastralgia*, Clifton, Times Retros., vol. 3, p. 29; *Abdominal neuralgia* (5 cases), Cushing, Times Retros., vol. 2, p. 14; Ring, Raue's Rec., 1874, p. 260; *Bright's disease*, Macy, A. H., vol. 3, p. 92; *Neuralgia of spine*, Sonnenschmidt, MSS.; *Acute articular rheumatism*, Clifton, Times Retros., vol. 3, p. 29; *Rheumatism*, Pretsch, A. H. Rev., vol. 1, pp. 325–6; Boyce, Org., vol. 1, p. 323.

[1] **Mind.** ▮In a recumbent posture, mental faculties and memory perfect, but on attempting to move, vertigo.
▮Anxiety with palpitation.
Toward evening and next forenoon very cross.

[2] **Sensorium.** ▮Vertigo: with headache, blindness, pains in limbs and weariness; while stooping and looking down.
▮Vertigo: with aching in face. θNeuralgia.
▮Giddiness, with headache and nausea.

[3] **Inner Head.** ▮Pulsating headache in forehead.
Pain in forehead in morning when waking, < after rising.
▮Aching in forehead, followed by rending in bones of r. or l. side of face; shooting downward into eye teeth; moving backward down neck and outwardly on both sides; succeeded by pain in l. shoulder; rending in bones of legs to feet.
▮▮Pain over r. eye; giddiness; eyes weak and watery.
▮▮Pressing pain on a small spot on r. side of head.
▮Headache internally, with sensation, when turning, of something loose in head, diagonally across top.

Digitized by Google

‖A cracking in head frightens him, it ends in a sound in ears like blowing a horn.
‖A shuddering without coldness commences with cracking as if surcharged with electricity.
‖Severe pressing headache, < and > with sun.
‖Sensation of heat in head in morning.
‖Dulness in head; headache; backache.
‖Neuralgic paroxysmal pains.
‖Headache < in evening and in open air.

[4] **Outer Head.** ‖Pain from back of neck up over scalp to top of head and temples, also affecting face r. side; tender to touch; pain shooting twitching; sometimes in spots; > from cold, < from heat; every afternoon, last with great severity, through night. θNeuralgia.
‖Rheumatic pain in scalp.

[5] **Sight and Eyes.** ‖Glimmering before eyes.
‖Everything black before eye when he looks downward; nausea and eructations of wind (in morning).
‖Dull, weak eyes.
‖Retinitis albuminurica, occurring during pregnancy; pains in back.
‖Nephritic retinitis accompanied by much pain in back, as if it would break.
‖Sclera inflamed, vitreous perfectly filled with exudation, and glimmering before eye, especially on reading with the other. θSclero-choroiditis anterior.
‖Sclerotitis, particularly in rheumatic subjects; eyeball painful on motion.
‖Parenchymatous keratitis.
‖Severe pain in r. eye, extending to forehead; commences at sunrise, < until noon; then > and leaves at sunset. θNeuralgia oculorum. (After *Acon.* and *Bellad.* failed.)
‖Pressure in r. eye (evening); also above r. eye.
‖Stitches in eyes, ears, fingers and feet.
‖Itching in eyes; when rubbing them they sting.
‖‖Pain in eyes, which makes it painful to turn them.
‖‖Sensation of stiffness in muscles around eyes, and of eyelids.
‖‖Asthenopia; stiff, drawing sensation in muscles upon moving eyes.
‖Eye symptoms < evening and in open air.

[6] **Hearing and Ears.** ‖Stitches in and behind r. ear; in neck and thighs, at night.
‖Sound like blowing a horn, after cracking in head.
‖‖Meniére's disease.

[7] **Smell and Nose.** ‖Coryza: with increased sense of smell; with sneezing, dulness, headache and hoarseness.
‖Tearing in root of nose and nasal bones, with nausea.

Digitized by Google

[8] **Upper Face.** Face: red, with throbbing headache; pale.
- ‖Anxious expression of countenance. θRheumatism of heart.
- ‖Flushing of face, with vertigo. θNeuralgia.
- | |Pressing pains in r. side of face, especially between eye and nose.
- ‖Prosopalgia, right sided; pains rending; agonizing; stupefying or threatening delirium.
- ‖Fothergill's faceache.
- ‖Severe neuralgia in r. cheek, with alkaline taste in mouth.
- ‖Facial neuralgia, involving teeth of upper jaw, but not from caries.
- ‖After exposure to cold, pains in r. side of head, ear and face, and even going down to arm, sometimes attended with numbness, or succeeded by numbness in parts affected; pains sticking, teasing, pressing, or shooting in a downward direction; pains occur at irregular times, continue for no definite period, coming suddenly or gradually, and leaving as uncertainly; < by worry or mental exertion; > by food. θNeuralgia.
- ‖Facial neuralgia after zoster.
- | |Face itches at night.
- | |Roughness of cheeks (during every Summer).

[9] **Lower Face.** ‖Lips swollen, dry and stiff.
- | |Cracked lips with dry skin.
- | |Stinging in jawbones.
- | |Tired feeling in chewing muscles.
- ‖Stitches and tearing in lower jaw.

[10] **Teeth and Gums.** ‖Teeth tender, with neuralgia of face.
- ‖Pressing pain in molars, late in evening.

[11] **Taste and Tongue.** | |Bitter taste with nausea, > after eating.
- ‖Tongue: white, dry; sore l. side; hurts when talking.
- ‖Stitches in tongue.

[12] **Inner Mouth.** ‖Tingling in salivary glands, immediately after eating, with sense of fermentation in œsophagus and copious salivation.
- ‖Sublingual salivary gland inflamed.

[14] **Throat.** ‖Throat feels swollen; sensation as if a ball was rising.
- ‖Sensation of dryness in throat, difficult deglutition, thirst.
- ‖Pressure in throat; stitches in eyes and nausea.
- ‖Great dryness of throat, with aching pains, the dryness causing frequent cough. θChronic syphilitic sore throat.

[15] **Eating and Drinking.** ‖Pains > by food. θNeuralgia.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Eructations of wind. θAngina pectoris. θGastralgia.
- ‖Nausea, everything becomes black before eyes, pressure

Digitized by Google

in throat, incarcerated flatus, oppression of breathing, rheumatic pains in limbs.

‖ Wine relieves vomiting.

[17] **Scrobiculum and Stomach.** ‖Pressure in pit of stomach, like a marble; < sitting in a stooping position, > sitting erect; sensation as if something would be pressed off below pit of stomach.

‖Pit of stomach sore to touch.

‖Pains < sitting bent, yet a feeling as if to do so was necessary, > by sitting or standing upright; crampy pain, with eructations of wind, palpitation of heart. θGastralgia.

[18] **Hypochondria.** ‖Pains in region of liver.

[19] **Abdomen.** ‖Incarcerated flatus, with nausea.

‖Sensation of weakness in abdomen, extending to throat; > by eructation.

‖Sudden pains in paroxysms, across abdomen above umbilicus, from lower border of liver, downward toward left, then ceasing in r. side; < from motion and from lying on either side, obliged to lie on back; > when sitting up. θAbdominal neuralgia.

‖Neuralgia of bowels in married women.

[20] **Stool and Rectum.** ‖Stool like mush, easily discharged, as if glazed, followed by pressure on rectum.

‖Diarrhœa, with dulness, dizziness, weariness, nausea and bellyache.

[21] **Urinary Organs.** ‖Frequent micturition of large quantities of yellow urine.

‖Profuse micturition > headache.

‖Albuminuria; also with pains in lower limbs.

‖Abdomen greatly distended; extremities, especially lower ones, swollen; much difficulty in standing and walking; urine scanty, high colored, 5 per cent. albumen, fibrinous casts, large epithelial scales, one prismatic crystal of triple phosphate; vertigo; occasional pain in head; much pain in lower extremities; complexion sallow and skin unnaturally dry. θBright's disease.

[22] **Female Sexual Organs.** ‖Menses too soon; regular, but painful.

‖During menses, pain in limbs, loins, back and interior of thighs.

‖Suppressed menses, with severe neuralgic pains throughout whole body.

‖Leucorrhœa yellowish; one week after menses; symptoms < then.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Pressure as if some one squeezed throat with thumb and finger.

‖Noise as from spasm in glottis when breathing.

Digitized by Google

‖‖Hoarseness, with coryza.
‖Tickling in trachea.

[25] **Respiration.** ‖Difficult and oppressed breathing; throat feels swollen, nausea. θRheumatism.
‖Oppressed and short breathed, which obliges him to breathe quickly, involuntarily.
‖Oppressed breathing, with palpitation of heart, anxiety.
‖Dyspnœa and pain. θAngina pectoris.

[27] **Cough.** ‖Frequent cough, caused by dryness or scraping in throat.
‖Expectoration easy, smooth, grey; tasting putrid; saltish.

[28] **Inner Chest and Lungs.** ‖Feverish heat, with great pain in chest; < when breathing and from slightest motion.
‖Pain in chest as from a sprain.
‖Shooting through chest above heart into shoulder blade; pain in l. arm.
‖Stitches in lower part of chest.

[29] **Heart, Pulse and Circulation.** ‖Fluttering of heart.
‖Palpitation of heart, with anxiety and oppressed breathing; with faint feeling.
‖Palpitation up into throat, after going to bed; trembling all over; < lying on l. side; > lying on back; anxiety.
‖Palpitation, dyspnœa, pain in limbs, stitch in lower part of chest; right sided prosopalgia.
‖Heart's action very tumultuous, rapid and visible.
‖Attacks of angina pectoris. θFatty degeneration of heart.
‖Angina pectoris; slow, feeble pulse; eructations of wind, dyspnœa and pain.
‖Severe pain in cardiac region, with slow, small pulse. θHypertrophy with dilation and aortic obstruction.
‖‖Paroxysms of anguish about heart, dyspnœa, febrile excitement; rheumatic endocarditis, with consequent hypertrophy and valvular disease.
‖Pressure like a marble from epigastrium toward heart, with a strong, quick heart beat; every beat has a strumming as if it would burst, along sternum to throat; third or fourth beat harder, followed by an intermission.
‖Pressure behind middle of sternum, < morning and evening, and when stooping; palpitation of heart with anxiety; pulse regular; first sound of heart somewhat harsh; pressure behind sternum and in epigastrium, > sitting erect; as if something was being pressed away from under sternum.
‖Severe palpitation of heart, with constriction of throat, < from motion, deep inspiration, or holding breath; pressure and stitching in region of heart; severe one sided, tearing headache, < over eye and in bulbus oculi; during attack anxiety and shortness of breath; between

Digitized by Google

attacks, dry cough; first sound of heart strongly accentuated and often intermitting; (ictus cordis) impulse of heart plainly visible, lifting stethoscope; pulse intermittent; pressure in epigastrium, < in bent position, > sitting erect; pressing down sensation in epigastrium.

‖‖Wandering rheumatic pains in region of heart, extending down l. arm.

‖Shooting, stabbing pain from heart through to l. scapula, causing violent beating of heart. θRheumatism.

‖Pains suddenly leave extremities and go to heart; shooting, stabbing pain, through to l. scapula, causing violent beating of heart, with anxious expression of countenance, quick but weak pulse and difficult breathing. θRheumatism.

‖Articular rheumatism has been treated externally, and cardiac symptoms ensue.

‖‖Heart disease, after frequent attacks of rheumatism, or alternating with it.

‖‖Hypertrophy and valvular insufficiency, or thickening, after rheumatism, paroxysms of anguish about heart, with dyspnœa and febrile excitement.

‖Propped up in bed, with anxious expression of face, livid hue of countenance; visible, tumultuous and very rapid action of heart; after acute rheumatism. θEndocarditis.

‖Quickened but weak pulse. θRheumatism of heart.

‖Pulse: slow, weak; arms feel weak; scarcely perceptible, limbs cold; irregular.

‖Remarkable slowness of pulse, 48 in minute. θNeuralgia.

‖Slow, small pulse. θHypertrophy of heart.

‖Pulse slow and feeble. θAngina pectoris.

‖Pulse very slow. θDysmenorrhœa.

‖Very feeble pulse, 40 beats per minute.

Outer Chest. ‖‖Pleuritis falsa in winter season.

‖High fever; breathing oppressed, must lie quietly on back, every motion attended with violent pains in thorax, back and axillary joints. θRheumatism of muscles of thorax and back.

Neck and Back. ‖Muscles of neck sore to touch and on moving them.

‖Pains from neck down arm to little and fourth finger; neck tender to touch; pains paroxysmal, < in early part of night, and attended by stiffness; marked slowness of pulse, 48 beats per minute. θNeuralgia.

‖Violent pain in upper three dorsal vertebræ, extending through shoulder blades.

‖Sensation of lameness in back, evening in bed.

‖Constant pain in spine, sometimes < in lumbar region, with great heat and burning.

Digitized by Google

‖Feeling of paralysis in sacrum.
‖Aching across joints.

[32] **Upper Limbs.** ‖Pain in shoulders.
‖Deltoid rheumatism, especially on r. side.
‖Stitches in lower part of l. shoulder blade.
‖Paroxysmal pains in r. arm. θNeuralgia.
‖Pains in l. arm.
‖Rheumatic pains in arms.
‖Cracking in elbow joint.
‖Stitches in hands; hands feel as if they had been sprained.
‖Pain in l. wrist, causing hand to feel paralyzed.
‖‖Erysipelatous eruption on hands extending further.
‖Weakness in arms; pulse slow.

[33] **Lower Limbs.** ‖Tearing pain from hip down leg to feet.
‖Rheumatic pains in leg from hip down.
‖Pains in lower extremities.
‖Rheumatic pains in r. leg, extending as far as toes, in morning.
‖Stitches: externally on knee; in feet, soles, toes, big toe.
‖Sensation of weakness in calves.
‖Feet feel sprained.
‖Unable to walk; ankles swollen; pains, though mostly confined to ankles, shift about from joint to joint. θChronic rheumatism.

[34] **Limbs in General.** ‖Rheumatism often attacks heart, and generally goes from upper to lower parts; pains shift suddenly.
‖Rheumatic pains, mostly in upper arms and lower parts of legs; < when going to sleep.
‖Joints hot, red, swollen. θAcute rheumatism.
‖Acute articular rheumatism; pains shift about from point to point, especially when beginning in upper extremities and subsequently felt in lower; joints hot, red and swollen; pains < on least motion and during evening, or soon after going to bed; rheumatoid pains from sudden chill or exposure to cold wind.
‖Arms feel weak, limbs cold.

[35] **Rest. Position. Motion.** ‖Pains <: sitting bent, yet a feeling as if to do so was necessary, but > by sitting or standing upright. θGastralgia.
‖Pains < on least motion. θAcute rheumatism.
In a recumbent posture: mental faculties and memory perfect, but on attempting to move vertigo.
Lying on l. side, palpitation <.
Lying on back: palpitation >.
Must lie on back: on account of oppressed breathing; abdominal neuralgia.
Sitting in a stooping position: pressure in pit of stomach <; palpitation <.

Digitized by Google

Sitting erect: pressure in pit of stomach, pains across abdomen >; pressure behind sternum >; palpitation >.
Stooping: vertigo; pressure behind sternum <.
After rising: pain in forehead <.
Standing: difficult on account of swelling of lower extremities.
Stands up and walks in his sleep.
Motion: of eyeballs causes pain; pains across abdomen <; slightest, pain in chest <; palpitation <; attended with violent pains in thorax, back and axillary joints; of muscles of neck painful; pains <.
Turning head: sensation as of something loose in it.
Walking: difficult on account of swelling of lower extremities.
Shuns all exertion; weariness in all muscles.
Unable to walk: ankles swollen; can hardly go up stairs.

[36] **Nerves.** ‖Weariness in all muscles; shuns all exertion, can hardly go up stairs.
‖Weary and giddy, with diarrhœa.
‖‖Weakness the only general symptom with neuralgia.
‖Trembling, thrilling, strumming, with palpitation.
‖Weakness and paralytic condition of limbs.

[37] **Sleep.** ‖‖Restless sleep, turns often.
‖Periosteal pains prevent sleep.
While sleeping stands up and walks about; talks in sleep.
Dreams: racking his brains; fantastic; of murder.

[38] **Time.** ‖Pains < during early part of night, or soon after going to sleep. θNeuralgia. θAcute rheumatism.
Morning: pain in forehead; heat in head; nausea and eructations of wind; pressure behind sternum <; rheumatic pains in r. leg.
Towards evening and next forenoon: very cross.
Evening: headache <; pressure in r. eye; eye symptoms <; pressing pain in molars; pressure behind sternum; lameness of back; pains <.
Night: headache; stitches in neck and thighs; face itches; early part, pains from neck down arms.

[39] **Temperature and Weather.** Pains are felt from a sudden chill, or exposure to a sudden wind. θAcute rheumatism. θNeuralgia.
Heat: pain in head <.
With sun: headache < and >; pain in r. eye < and >.
Open air: headache <; eyes <.
Cold: pain in head >.
After exposure to cold: pain in r. side of head, ear and face; rheumatoid pains.

[40] **Fever.** ‖‖Chilliness, with coldness; shaking chill in cold air; chills run over back.

Digitized by Google

‖Febrile excitement. θEndocarditis.
‖General heat; with burning and pain in back and loins.
‖Cold sweat.

41 **Attacks, Periodicity.** ‖Pain occurring at irregular times, continuing for no definite period, coming suddenly or gradually, and leaving as uncertainly. θNeuralgia.
Paroxysmal pains: in head; across abdomen above umbilicus; from neck down arms; in arms.
Every afternoon: headache, lasts through night.
Every Summer: roughness of cheeks.
One week after menses: leucorrhœa.

42 **Locality and Direction.** Right: rending in bones of side of face; pain over eye; pressing pain on a small spot on side of head, severe pain in eye; pressure in eye, above eye; stitches in and behind ear; pressing pains in side of face; prosopalgia; severe neuralgia; pains in side of head, face and ear; deltoid rheumatism <; pains in arm; rheumatic pain in leg.
Left: rending in bones of side of face; pain in shoulder; tongue sore on side; pain in arm; lying on side palpitation <; wandering rheumatic pains down arm; shooting pains from heart through to scapula; stitches in lower part of shoulder blade; pains in arm; pain in wrist.
Downward: pain shooting into eye teeth; pain across abdomen from lower border of liver down to left, then ceasing in r. side.
Moving backward: pain down neck and outwardly on both sides.
‖Pains change places. θRheumatism.
Pains move downward: head; bones of face; from ear to arm; down spine; down leg; arm to fingers.
Pains move upward: neck over head; ball in throat; lower limbs, then upper.

43 **Sensations.** Sensation as if body was surcharged with electricity.
As of something loose in head diagonally across top; a shuddering without coldness commences with cracking, as if surcharged with electricity; as if back would break; as if a ball was rising in throat; as if something would be pressed off below pit of stomach; stool as if glazed; as if some one squeezed throat with thumb and finger; pain in chest as from a sprain; pressure like a marble from epigastrium towards heart; a cracking in head frightens him, it ends in a sound in ears like blowing a horn; every heart beat has a strumming as if it would burst, along sternum to throat; as if something was being pressed away from under sternum;

Digitized by Google

hands as if they had been sprained; feet as if sprained; as if furuncles would form here and there.
Pains: in limbs; in forehead; in l. shoulder; over r. eye; in head; in back; from back of neck up over scalp to top of head and temples; in eyeball; in eyes; in r. side of head, ear and face; in region of liver; in lower limbs; in loins; in interior of thighs; in chest; in l. arm; suddenly leave extremities and go to heart; from neck down arm to little and fourth finger; in spine; in l. wrist, causing hand to feel paralyzed.
Sudden pains in paroxysms: across abdomen, above umbilicus, from lower border of liver, downward toward left; in r. arm.
Anguish: about heart.
Violent pain: in upper three dorsal vertebræ.
Severe pain: in r. eye to forehead; in cardiac region.
Great pain: in chest.
Much pain: in lower extremities.
Tearing: in root of nose and nasal bones; in lower jaw; in one side of head from hip down leg to feet.
Rending: in bones of r. or l. side of face; in bones of legs to feet.
Shooting, stabbing pain: from heart through to l. scapula.
Shooting, twitching pain: over head.
Shooting: downward into eye teeth; through chest above heart into shoulder.
Stitches: in eyes, ears, fingers and feet; in and behind r. ear; in neck and thighs; in lower jaw; in tongue; in lower part of chest; in lower part of shoulder blade; in hands; externally on knee; in feet, soles, toes, big toe.
Stitching: in region of heart.
Stitching, tearing, pressing or shooting pains: in a downward direction in face.
Stinging: in jawbones.
Pricking sensation: in skin.
Rheumatic pain: in scalp; in heart; in limbs; in region of heart, extending down l. arm; in arms; in leg from hip down; in r. leg; shift from joint to joint; mostly in upper arms and lower parts of legs; all over body.
Severe neuralgia: in r. cheek; throughout whole body.
Neuralgic paroxysmal pains: in head.
Neuralgia: in bowels.
Throbbing headache.
Pulsating headache: in forehead.
Aching: in face; in forehead; in throat; across loins.
Severe pressing headache.
Pressing pain: on a small spot on r. side of head; in r. side of face; in molars.

Digitized by Google

Pressure: in r. eye; above r. eye; in throat; in pit of stomach; from epigastrium to heart; behind sternum; in region of heart.
Burning: in spine.
Great heat: in spine.
Heat: in head.
Soreness: of l. side of tongue.
Dryness: in throat.
Dulness: in head.
Swollen feeling: in throat.
Constriction: of throat.
Stiff, drawing sensation: in muscles on moving eyes.
Rigidity of skin.
Numbness: in affected parts after pain.
Feeling of paralysis: in sacrum.
Stiffness: of muscles around eyes and of eyelids.
Lameness: in back.
Weakness: in abdomen extending to throat; in calves.
Tired feeling: in chewing muscles.
Cracking: in elbow joints.
Tingling: in salivary glands.
Tickling: in trachea.
Itching: in eyes; in face.

" **Tissues.** ‖Acute rheumatism, going from joint to joint; violent fever; pains intense; ankles most painful and swollen; < from least movement.
‖Rheumatic pains all over body.
‖Pains shifting, pains suddenly changing position; tendency to metastasis to heart. θRheumatism.
‖Every joint and every muscle of body affected; high fever; every attempt to move attended with excruciating pains; afterwards paralysis of arms and legs. θRheumatism.
‖Dropsy from cold with rheumatic complaints.

" **Touch. Passive Motion. Injuries.** Touch: face tender; pit of stomach sore; muscles of neck sore.
Rubbing: eyes causes stinging.

" **Skin.** ‖Sensation of rigidity of skin.
‖Pricking sensation in skin, with moderate sweat.
‖Dry skin.
‖Erysipelatous, inflamed eruption on hand (similar to eruption caused by *Rhus tox.*), with oppressed breathing.
‖Eruption like itch.
‖Red, inflamed places here and there, exceedingly painful, as if furuncles would form.

" **Stages of Life, Constitution.** Girl, æt. 10, scrofulous diathesis, suffering three months; Bright's disease.
Girl, æt. 10, suffering ten days; endocarditis.

Digitized by Google

Boy, æt. 12; rheumatism.
Young German; chronic rheumatism.
Servant girl, suffering three months; sun headache.
Woman, suffering one week; neuralgia.
Man, æt. 27, fourth attack within ten years, each attack lasting from two to four months; neuralgia oculorum.
Man, æt. 33, formerly treated for ulcer of stomach; pressure in epigastrium.
Man, æt. 47, rheumatic; pressure in epigastrium.

[45] **Relations.** Antidoted by: *Acon., Bellad.*
Compare: *Bellad.* (throbbing head, erysipelas); *Benz. ac.* (gout, valvular disease); *Calc. ostr.* (cardiac hypertrophy); *Diosc.* (gastralgia); *Kali bich.* (catarrhs, rheumatism); *Lith. carb.* (valvular disease); *Lycop.* (rheumatic gout, urinary symptoms); *Natr. mur.* (hemiopia); *Pulsat.*, rheumatism, shifting pains); *Rhus tox.* (rheumatism); *Spigel.* (rheumatic endocarditis).

KOBALTUM.

Cobalt. *Co.*

A metal known to Hohenheim in the fourteenth century. Derives its name from the German word *Kobold*, signifying mischievous spirit, so named by the miners who considered it a profitless ore. It is found in conjunction with nickel from which it has to be separated, a process first taught in 1807 by a chemist named Lougier, improved by Liebig in 1848, and perfected by Genth, a Philadelphia chemist, who produced absolutely pure Kobalt in 1850.

From this chemically pure Kobalt Hering made his proving in July, 1850.

Further provings were made by Koller, Lippe, Jones and Sparhawk. See Allen's Encyclopedia, vol. 5, p. 361.

CLINICAL AUTHORITIES.—Hering, Lippe, Pehrson, MSS.

[1] **Mind.** Great exhilaration of spirits, vivacity and rapid flow of thoughts.
Desire for study.
Indisposed to mental and physical labor; low spirited; thinks too little of himself.
All mental excitement increases sufferings.

[3] **Sensorium.** Dizziness; dulness; feeling as if head grew large (during stool).

[5] **Inner Head.** Pain in forehead, with uneasiness in stomach.
Frontal or occipital pain, < from stooping.

Digitized by Google

Dull, pressive pain in temples.
At every jar, feels as if top of head would come off.
Frontal headache, with pain back of eyes.
Headache in morning, with beating and sore aching.
Headache when getting up from sitting.

[4] **Outer Head.** Great itching on hairy scalp, in beard and under chin, burning when scratching.
Sore pimples along edge of hair back of head.

[5] **Sight and Eyes.** Dim vision; darting pains in eyes when writing, feeling when opening lids, as if little strings were holding them together and snapping.
Flickering before eyes when reading; letters look blurred.
Darting, shooting pains in eyes, from bright light.
Eyes ache at night.
Lachrymation and pain from cold air; sensation as of sand under lids.
Smarting in lids when using eyes.

[6] **Hearing and Ears.** Aching, humming in l. ear.
Stinging through l. ear from roof of mouth.

[7] **Smell and Nose.** Putrid, sickish smell before nose.
Watery discharge, with sneezing.
Nose feels obstructed.
Left nostril feels dry; filled with scales; itching.

[8] **Upper Face.** Red hard lumps on r. cheek.

[9] **Lower Face.** Peeling of lips, with soreness and bleeding.
Disposition to keep jaws tightly closed.
Large boils, very painful, on chin and l. lower jaw.
A large furuncle in region of l. lower jaw.

[10] **Teeth and Gums.** Pain in hollow teeth, they feel too long; gums swollen, tender, as if ulcerated; < from cold air.

[11] **Taste and Tongue.** Flat taste; bad taste, with belching in morning.
Tongue coated white; cracks across middle.

[12] **Inner Mouth.** Pricking, stinging in roof of mouth, extending to l. ear.
Constant watery secretion, with frequent swallowing.

[13] **Throat.** Soreness, with rawness when hawking.
Dryness and soreness, mornings.
Hawking up thick, white mucus, which fills throat, in morning.
Feeling of fulness, from stomach to throat.

[14] **Appetite, Thirst. Desires, Aversions.** Diminished appetite, especially for supper.

[15] **Hiccough, Belching, Nausea and Vomiting.** Hiccough after eating, with soreness in pit of stomach.
Belching of wind, mornings and after stool.
Rising of sour or bitter water, with pain in stomach; afterward, dryness in throat.

Digitized by Google

‖Qualmishness, with fulness of stomach.
Nausea, with pain in forehead.

[17] **Scrobiculum and Stomach.** Pain in stomach and abdomen after eating, uneasiness; must move about.
Stomach feels as if it contained undigested food.
‖Fulness in stomach, extending to throat; qualmishness.
Soreness when inspiring deeply, or from hiccough.

[18] **Hypochondria.** Shooting, stitching from region of liver down into thigh.
‖Shooting pains in hepatic region and sharp pain in region of spleen, < on taking a deep inspiration; fulness in abdomen after a slight meal; constant dropping of blood with stool. θHepatic derangement.
Sharp pain in splenic region, < when inspiring deeply.

[19] **Abdomen.** Abdomen feels empty about umbilicus.
Cutting before stool.
Rumbling in abdomen.
Fulness in abdomen after a light meal.
Colic at 5 A.M., followed by large stool and tenesmus.

[20] **Stool and Rectum.** Urgent desire for stool while walking, < when standing; stool profuse, watery, spouting.
Stool large, soft, with tenesmus and aching in sphincter ani; severe colicky pain in lower part of abdomen; tenesmus after stool; during stool, dizziness.
‖Costiveness alternating with diarrhœa.
‖Feces like hazelnuts, with dulnesss in head.
Pressure in rectum.
‖Constant dropping of blood from anus (stools not bloody).

[21] **Urinary Organs.** ‖Scanty urine.
Albuminuria.
Frequent discharge of small quantities of urine.
Increased secretion of pale urine, frequent urination in morning, after drinking coffee.
Scanty urine, with greasy pellicle; yellow flocculent, or red sediment, and strong, pungent smell.
Smarting in end of urethra during micturition.
Burning in urethra.

[22] **Male Sexual Organs.** ‖Frequent nocturnal emissions, with lewd dreams; only partial or no erections; impotence.
‖Seminal emissions at night, with headache and backache.
‖Impotence and emissions without erections.
Severe pain in r. testicle, > after urinating.
‖Secondary gonorrhœa, with a greenish discharge.
Yellow brown spots on genitals (and abdomen).

[25] **Voice and Larynx. Trachea and Bronchia.** Stitches in anterior part of larynx.

[26] **Respiration.** Frequent sighing.
On taking a deep inspiration, stitches in chest, soreness in stomach and pain in spleen.

Digitized by Google

[27] **Cough.** Cough, with soreness in throat and rawness when hawking.
Short, hacking cough, with expectoration of bright red blood, which seemingly comes from larynx.
Expectoration of thick, tough mucus, mixed with blood, with fulness and pressive pain in larynx; scratching, rawness and burning in throat, and a disposition to keep jaws tightly closed; < from pressure, empty deglutition and cold water.
Copious expectoration of sweetish, frothy, white mucus, with lumps in it.

[28] **Inner Chest and Lungs.** Deep stitches in lower part of chest, mostly l. side, from deep inspiration.
‖Through chest fulness of stomach to throat.

[31] **Neck and Back.** Pain, between shoulders, in lumbar region and small of back.
‖Aching pain in small of back, or spine; < sitting, > rising, walking or lying down.
‖Backache, with seminal emissions.
πPain along spine, and from sacrum down through legs into feet, < while sitting.

[32] **Upper Limbs.** Aching in wrist joints, with occasional stitches.

[33] **Lower Limbs.** πPain in upper part of r. hip bone, < sitting.
Shooting into thigh from liver.
Excessive weakness of knees.
Foot sweat between toes, smelling sour or like soleleather.
Flushes of heat along legs.
Stitches in legs.
Jerks in limbs when falling asleep.
Trembling of limbs, especially legs, aching when sitting.
Pricking, as of needles, in feet.

[34] **Limbs in General.** Bruised pain in all limbs.
Stitches in arms and legs.

[35] **Rest. Position. Motion.** Lying down: backache >.
Sitting: aching in back <; pain along spine; pain in hip bone <.
Standing: desire for stool <.
Rising from sitting: headache, backache >.
Stooping: frontal and occipital pain <.
Walking: urgent desire for stool; backache >.
Must move about: pain in stomach with uneasiness.

[37] **Sleep.** ‖Distressing drowsiness, in evening, sleeps ten to eleven hours and still hardly able to get up in morning.
‖Disturbed, unrefreshing sleep.
Wakeful; can do with less sleep.
On rising, pain in head and small of back.
‖Lewd dreams, emissions; only partial or no erections.

Digitized by Google

[38] **Time.** Morning: headache with beating and sore aching; belching and bad taste; dryness and soreness of throat; hawking up thick white mucus; frequent urinating.
5 A.M.: colic.
Evening: distressing drowsiness.
Night: eyes ache; seminal emissions.

[39] **Temperature and Weather.** Getting warm in bed: itching all over.
Cold air: lachrymation and pain in eyes; pain in teeth <.

[40] **Fever.** Chilly from 11 to 12 A.M.; headache, with nausea and languor from noon to 2 P.M., then fever and sweat.
Chilliness, with yawning, from 4 to 5 P.M.; feels dull and weak, with aversion to mental exertion.
Flushes of heat: with sweat; along legs.

[41] **Attacks, Periodicity.** 11 to 12 A.M.: chilly.
From noon to 2 P.M.: nausea and languor.
From 4 to 5 P.M.: chilliness with yawning.

[42] **Locality and Direction.** Right: red, hard lumps on cheek; severe pain in testicle; pain in upper part of hip bone.
Left: aching, humming in ear; stinging through ear to roof of mouth; larger boils on lower jaw; large furuncle in region of lower jaw; stitches in side of chest.

[43] **Sensations.** As if head grew large; as if top of head would come off; as if little strings were holding eyelids together; as of sand under lids; teeth feel too long; gums as if ulcerated; stomach as if it contained undigested food: pricking as of needles in feet.
Pain: in forehead; in head; in occiput; back of eyes; in stomach; in forehead; in abdomen; in back; in spleen; between shoulders; in lumbar region; in small of back; along spine; from sacrum down through legs into feet; in upper part of r. hip bone.
Severe pain: in r. testicle.
Sharp pain: in region of spleen.
Shooting: in eyes; from region of liver down into thigh; in hepatic region; into thigh from liver.
Cutting: in abdomen.
Darting: in eyes.
Severe colicky pain: in lower part of abdomen.
Stitches: in anterior part of larynx; in chest; in wrist joints; in legs; in arms.
Stitching: from region of liver down into thigh.
Stinging: through l. ear from roof of mouth.
Burning: on hairy parts of head when scratched; in urethra; in throat.
Sore aching: in head.
Soreness: of lips; of throat; in pit of stomach; in stomach.
Smarting: in lids; in end of urethra.

Digitized by Google

Pressive pain: in larynx.
Bruised pain: in all limbs.
Aching: in eyes at night; in l. ear; in small of back; in wrist joints; in legs; in sphincter ani.
Beating: in head.
Pricking: in roof of mouth.
Dryness: of throat.
Pressure: in rectum.
Dull, pressive pain: in temples.
Fulness: from stomach to throat; in abdomen; in larynx.
Itching: on hairy scalp; in beard and under chin; in l. nostril; all over.

" **Touch. Passive Motion. Injuries.** Pressure: disposition to keep jaws tightly closed <.
At every jar: feels as if top of head would come off.

" **Skin.** Much itching all over, when getting warm in bed.
Pimples on shoulders, pit of stomach and buttocks; bleed easily when scratched.

" **Relations.** Compare *Agnus cast.*, impotency; *Zincum*, pain in back < while sitting.

[1] **Mind.** Stupid feeling in head; vacant gaze; neither seeing nor hearing.

Frequent vanishing or failure of thought.

‖Weakness of memory; forgetfulness. θAfter nosebleed.

‖Thinks herself well. θMetritis.

‖Sorrowful mood, inclined to weep, or longing for death; music and similar emotional causes impel him to weep.

Anxious, apprehensive mood.

Ill humor; moroseness; peevishness, ill temper, obstinacy.

‖Fretful, irritable, agitated, screams nights. θBronchitis during dentition.

Excited condition; ailments from emotions.

Digitized by Google

Confounding ideas; also in puerperal fever with putridity. Seeks for unpleasant things and broods over them.

[2] **Sensorium.** Stupefaction, dizziness and vacancy in head, with complete loss of thought, sight and hearing.

Painful dulness of head, as after a carouse.

Vertigo: mornings, in open air, with staggering like from drunkenness, must hold on to something; passes off in room; danger of falling on turning round quickly.

Roaring in head.

[3] **Inner Head.** Throbbing and beating in forehead from l. side of head.

Dull feeling in head as from a board across forehead.

Pulsation in forehead and vertex, when awaking in morning, with heat in face.

Chronic periodic headache in forehead, piercing pain; wheals or swellings on scalp.

Heaviness or pressure in various parts of head, with sensation as if brain would force through forehead.

Occipital headache; much pain and soreness.

Headache: after a carouse; with sleepiness; tearing, drawing and jerking pains; jerking, tearing, sticking, burning pains in anterior part of head; semilateral and extending to cheeks, jaws, teeth and neck; induced by talking, moving, sitting up or lying on side not affected, with great excitability and nervous irritability.

[4] **Outer Head.** Eruptions on forehead, as with drunkards.

Falling off of hair.

Sensibility of scalp to touch, and when hair is combed.

Scales in large, indurated masses fall off freely.

Scald head.

[5] **Sight and Eyes.** Dimsighted: as if looking through gauze; as if something was floating before eyes, obliging to wipe them constantly.

Staring, dull, lifeless and stupid look.

Itching and smarting sensation in eyes, on edges of lids; < rubbing.

Suggilation on conjunctiva of r. eye.

Burning and redness of conjunctiva.

Acute aggravations of chronic keratitis; hot, smarting lachrymation.

Blenorrhœa of conjunctiva, with moderately profuse discharge and much smarting in eyes.

Heat in eyes, with ulceration.

Burning heat in eyes, with tears, < by bright light.

Hot, acrid, smarting tears, like salt water; < in a bright light, on rubbing eyes and early morning.

Slight inflammation of Meibomian glands.

Eyes sunken, with blue rings around, or protruding.

Digitized by Google

‖‖Chronic swelling of eyelids and their margins; agglutination of lids.
‖‖Uncontrollable twitching of lids.

[6] **Hearing and Ears.** ‖Hardness of hearing with buzzing.
‖Roaring in head; also humming and difficulty of hearing before and during menses.
‖Girl, æt. 9, syphilitic deafness; teeth wedge shaped; old looking; had snuffles when a baby; attacks of vomiting.
‖Stitches in ears; otitis.
‖Heat, burning, swelling and redness of l. outer ear, proceeding from a pimple in concha, stiffness and pain in l. side of neck, shoulder and arm.
‖‖Itching in ears.
‖Humid tetter on ears, with swelling of cervical glands and livid grey complexion.
‖‖Affections of external ear.

[7] **Smell and Nose.** ‖‖Subjective putrid smell with loss of appetite; in morning, on awaking.
‖Nosebleed: with heaviness and throbbing in forehead, sleepiness; thin, bright red blood.
‖Frequent sneezing: especially in morning; with stoppage of nose; rough and scraping sensation in throat; with dry, nasal catarrh.
Nasal secretion thick.
‖‖Catarrh fluent or dry, with much sneezing.
‖Chronic catarrh with old people.
‖Epithelial cancer on right ala nasi.
‖‖Lupus on nose; l. side.

[8] **Upper Face.** ‖Sick, suffering expression; old looking children.
‖Complexion: wretched; earthy; livid; pale, green, with swelling of cervical glands; pale, bloated; coppery appearance.
‖Burning pains; < from talking or exertion, > lying on affected side; nervous, excitable.
‖Face cold, of pale, bluish tinge, especially on temples and around nose and mouth.
‖Flushes of heat, with circumscribed redness of cheeks.
‖Face hot, cheeks red, feet cold.
‖Great heat and brown redness of face (during siesta), with throbbing in cheeks and forehead, and frequent micturition.
‖‖Scaly herpes on eyelids, cheeks and around mouth.
‖Acne in face.

[9] **Lower Face.** ‖Dry lips, peeling off, easily cracked.
‖Wants to moisten lips frequently, without being thirsty.
‖‖Tumor, size of a pea, on lower lip, with acrid, watery ichor, making surrounding parts sore.

Digitized by Google

‖Eruption on under lip.
‖Pustulous pimples, with yellow scabs on chin and cheek.

[10] **Teeth and Gums.** ‖‖Bad odor from decayed teeth.
‖‖Toothache: extending to temples and to l. side of face; drawing, extending to inner ear and temples; caused by caries.
‖Teeth wedge shaped. θSyphilitic deafness.
‖Great restlessness, wants to be in motion all the time, and screams whole night. θDentition.
‖‖Teeth show dark specks and begin to decay as soon as they appear.
‖‖Gums: bluish red, soft, spongy, easily bleeding, inflamed, ulcerated, scorbutic.
‖Protruding gums infiltrated with dark watery fluid.
‖After extraction of tooth, persistent oozing of dark, slightly coagulated blood, finally checked by application of alum; hemorrhage reappeared at shorter or longer intervals, at first only from teeth, later entirely from nose, continuing one year, and causing great debility.
‖Absorption of gums and alveolar process.

[11] **Taste and Tongue.** ‖Bitter or flat taste.
‖Bitter taste, especially in throat
‖Everything eaten tastes bitter; bitter taste of food, not perceived until just as it is being swallowed.
‖Tongue dry; with mucous coating; coated white.

[12] **Inner Mouth.** ‖‖Putrid odor from mouth.

[13] **Throat.** ‖Pressure on r. side of throat when swallowing.
‖Scraping in throat, with roughness and dryness.
‖Small, round, bluish red spots (petechiæ) on throat.
‖Diphtheria; malignant form, when confined to fauces, with terrible fetor oris.
‖Fever, vomiting, loss of appetite, restless sleep, general languor, swelling of glands; three days later, suddenly, very much exudate in fauces; fetor oris. θDiphtheria.
‖Scrofulous and lymphatic patients, with black softening and decomposition of mucous membrane, with atony and extension of softening, especially towards œsophagus. θDiphtheria.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Greedy drinking followed by vomiting; great thirst.
‖Keen appetite, especially for meat; craves smoked meats.
‖Loss of appetite, aversion to meat, vomits after it.
‖Desire for spirituous drinks, weakening leucorrhœa.
‖Stomach aches, from acid food.

[15] **Eating and Drinking.** ‖‖Water, after it is swallowed, tastes bitter.
Worse from eating cold food; > from warm diet.
Dares not remain fasting.

Digitized by Google

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Belching and hiccough, especially when sitting up or being carried.
‖Belching: sour; empty; after dinner, with throwing off of frothy saliva, and with scraping roughness in throat.
‖Deep and lasting disgust for food in convalescents.
‖Nausea: during pregnancy; constant inclination to vomit without doing so; with chilliness morning and evening.
‖‖Vomiting: of sweetish water; of undigested food; in evening of all food eaten during day; of undigested food two or three hours after eating; with dimness of vision; of everything eaten; of large quantities of sour, acrid fluid, or of white, foamy mucus.
‖‖Continuous vomiting and straining to vomit.
‖Sympathetic vomiting, as of phthisis, of cancer of liver or uterus, of pregnancy, and of chronic kidney disease.
‖Seasickness.

[17] **Scrobiculum and Stomach.** ‖Cold feeling at epigastrium internally, as if cold water or ice was there.
‖Feeling of fulness, as after having eaten too much.
‖Tension over stomach and scrobiculum; tight clothing is intolerable.
‖‖Painful hard spot, at or to left of stomach.
‖Malignant induration, fungus and ulcers of stomach; painless gastromalacia; pressing, gnawing, ulcerative pain in stomach, with hæmatemesis.
‖Gastromalacia, preceded by great restlessness and sleeplessness, and accompanied by vomiting and diarrhœa.
‖Sudden vomiting of all food, soon followed by lienteric stools; slimy coating on tongue; rapid and extreme emaciation; constant whining; sleeplessness. θGastromalacia.
‖For several weeks diarrhœa, finally smelling cadaverous; vomiting; extreme blueness of face, as from nervous congestion. θGastromalacia.
‖Rapid emaciation in children, vomiting, intense thirst, bloating in region of stomach, greyish white or chopped offensive stools. θGastromalacia.
‖Very frequent and sudden vomiting of food; frequent hiccough, belching, especially when raised up; remarkably rapid emaciation of whole body, but particularly of neck and face; bluish pale appearance of face, especially about temples, nose and mouth; dull, staring, vacant look, eyes sunken, surrounded by blue rings; coldness of face and hands; drowsiness, with half open eyes; feeble whining; quick, scarcely perceptible pulse; red, slightly elevated eruption on l. forearm. θGastromalacia.

[18] **Hypochondria.** ‖Stitches in region of liver. θPregnancy.

Digitized by Google

‖Bruised pain in region of liver, with sensation of fulness.
‖Constriction of hypochondria, cannot tolerate tight clothing.
‖Pressure in region of spleen; spleen painful to pressure.

[19] **Abdomen.** ‖Ulcerative pain in abdomen.
‖Pain in region of umbilicus.
‖Sensation of contraction in abdomen, as if a hard twisted ball was lying in umbilical region.
‖Distension of abdomen, as after a copious meal.
‖Abdomen distended and tense, like a drum.
‖Burning in bowels.
‖Laborlike pains in abdomen, with drawing in upper abdomen, extending to small of back and pressing toward lumbar vertebræ, with flushes of heat in face, palpitation of heart, frequent pulse and ineffectual urging to urinate, finally small quantities of hot urine are passed; after paroxysm chill, and discharge of milky leucorrhœa.
‖Sore pain in abdomen during deep inhalation.
‖Shattering sensation in abdomen.
‖Painful sensation of coldness in abdomen; icy coldness in epigastrium. θDyspepsia.
‖Violent abdominal spasms, < in groins.
‖Colic, resembling pains of labor.
‖Tabes mesenterica, with hypertrophied glands in fleshy, flabby subjects.

[20] **Stool and Rectum.** Stools: watery; papescent; dark brown; watery, putrid, containing undigested food; greyish or white, chopped, very fetid; frequent, greenish, watery; cadaverous smelling.
‖Ineffectual painful urging to stool.
‖Constipation, stool hard, expelled after much pressing.
‖Cramplike pain in rectum during stool.
‖Children struggle and scream during act of defecation, and seem as if they would go into fits.
‖Diarrhœa in nursing infants during dentition.
‖Diarrhœa, with vomiting; continued vomiting, straining to vomit predominates; child resists tightening of anything around abdomen, which increases restlessness and pain; much thirst; gums hot; coldness of hands and feet.
‖Cholera infantum, second and third stages, with bloody, shreddy, mucous evacuations, with or without oppressiveness, gagging, dull, leaden countenance, somnolence; incipient hydrocephaloid.
‖Constant vomiting and greedy drinking; belching or hiccoughing when carried. θCholera infantum.
‖Much blood, often in clots, in diarrhœic, thin, fetid stools, which are always followed by great prostration. θTyphus.

Digitized by Google

‖Stitches in rectum, extending towards l. groin.
‖Constriction of rectum in case of uterine cancer.

31 **Urinary Organs.** ‖‖Frequent urgency to urinate, with copious, pale discharge; at night cannot get out of bed quick enough.
‖Diminished secretion, though drinking much.
‖Urine: chestnut brown; clouded; reddish, with red sediment; depositing white sediment; colorless; fetid; alkaline.
‖Wets bed at night, wakes with urging, but cannot retain urine, or dreams he is urinating in a decent manner.
‖Urine flows during deep, first sleep, from which child is roused with difficulty. θEnuresis nocturna.
‖Chronic enuresis; patient thin, emaciated.
‖‖Smarting and burning in pudenda during and after micturition.
‖Diabetes mellitus.

32 **Male Sexual Organs.** ‖Sexual desire too weak.
‖Burning in genitals, during coition, with swelling of penis next day.
‖Prepuce bluish black with hemorrhage and gangrene. θSyphilis.

33 **Female Sexual Organs.** ‖After chill menses suppressed for six months; unable to lie on either side; dull pain in region of ovaries, could not bear strong pressure; morning urine colorless; brownish yellow, acrid leucorrhœa; constipation. θChronic ovarian affection.
‖During coition, burning in parts, followed next day by discharge of dark blood.
‖Hard lump on neck of uterus; ulcerative pain during coition.
‖Ulcerative pain in cervix uteri.
‖Severe pain in small of back and uterine region, extending to thighs; deep in pelvis burning as of red hot coals; whimpering and whining; discharge of offensive blood in large clots; vagina swollen and burning hot, mucous membrane greatly puffed; uterus high up, neck hard and swollen; at orifice of uterus small, warty growths; parts extremely irritable and painful to touch; externally, fundus of uterus swollen, painful like a blood boil on slightest touch; pulse small and hard; great debility; sleeplessness.
‖Painful pressure towards genitals; stitches, from small of back through pelvis to external genitals; constant burning pain in small of back; bland leucorrhœa finally acrid, watery, occasionally ichorous, bloody, with pungent, offensive smell; severe pain during coition, with fear and trembling at thought of it; general aggrava-

Digitized by Google

tion during menstruation; sick, suffering appearance; prostration from least exertion; > during rest; dwindling and falling away of mammæ, with small, hard, painful lumps in them; cervix scirrhous, hard and very painful to touch; os open, almost everted, inner surface like cauliflower; pulse small, weak, 100; anxious, fearful.

Putrid state of womb after childbirth.

Inveterate ulcers on neck of uterus.

Uterine affections of middle aged women; long lasting leucorrhœa, or frequently recurring uterine hemorrhages, both accompanied by pressing sensations; finally discharges become offensive, bloody and watery, acrid, ichorous or clotted; burning, occasionally stitching in back and lower abdomen; on standing sensation as if a load was resting in pelvis; coition painful; general aggravation during menstruation; examination painful; vagina hot, mucous membrane puffed and follicles often hypertrophied; at mouth of uterus warty or cauliflower excrescences.

Cancer of uterus (much improved).

Menses: too early, too profuse and too protracted; succeeded by an acrid smelling, bloody ichor, with itching and biting in parts; more or less pain during flow, but much < after it; flow intermits, at times almost ceasing, then recommencing; in third month of pregnancy.

Menses very profuse; blood clotted; sometimes with uterine pain, and always a week too late, with severe headache before and during menses.

Menorrhagia, < lying, > getting up and walking about.

Before menses: hardness of hearing; foamy eructation or vomiting of mucus; bloatedness; griping about navel; burning in back; leucorrhœa; excitement and restlessness; looks swollen as if pregnant.

Buzzing in head, before, during and after menses.

Severe headache before and during menses.

Catamenia with uterine pain.

During menses: hardness of hearing; rushing sound in ears; humming and pressing outwards in head; stitches in side; cutting pain in abdomen; borborygmi; diarrhœa; chills; sweat on chest and back.

Painful urging toward genitals.

Bearing down and weight in pelvis; as if something was coming out of vagina; < by motion.

She thinks she is almost well when the discharge reappears. θMenses. θMetrorrhagia.

Her hemorrhage seems to pass into a corrosive, ichorous discharge, and then to freshen up again and go on.

After menses: laborlike abdominal cramps; uterus ten-

Digitized by Google

der; constricting pain in vagina, followed by fluor albus; prolapsus.

‖Metrorrhagia: blood dark and offensive; in large clots; fainting; pulseless.

‖Metrorrhagia continuing four weeks; fainting and pulseless; discharge dark and offensive.

‖Constant flow of thin, watery and offensive blood, < lying; emaciation; debility. θMenorrhagia.

‖‖Leucorrhœa: putrid, acrid, corrosive; stains clothing yellow, stiffens like starch; mild or acrid, causing much itching; milky, after coccyodynia; < between menses; or for a few days before menses; with great weakness; < standing or walking, not sitting; flowing like menses.

‖‖Discharge from vagina frequently looks quite white, and then had odor of green corn.

‖Bland, yellow leucorrhœa, preceding each urination, with frequent desire to micturate.

‖Drawing pains along coccyx down to rectum and vagina, where a spasmodic, contractive pain is felt; > when rising from sitting; subsequent milky leucorrhœa.

‖Sterile from leucorrhœa.

‖Electric-like stitches in vagina, seem to come from abdomen, always make her start.

‖Voluptuous itching deep in vagina.

‖‖Violent itching of vagina, so that she is obliged to rub it; posteriorly there is smarting; external genitals swollen, hot and hard; on urinating, vagina pains as if sore; in evening.

‖‖Corrosive itching in vulva; sore and burning after scratching.

‖‖Scirrhus of vagina, painful to slight touch.

‖Burning and swelling of labia.

‖Violent itching between labia and thighs.

‖Aphthous or inflammatory state of external parts, symptomatic of ovarian or uterine disease.

[21] **Pregnancy. Parturition. Lactation.** ‖‖During pregnancy: nausea and vomiting; ptyalism; vomiting of sweetish water before breakfast; vomiting after supper; metrorrhagia threatening abortion (third month); leucorrhœa; tightness across pit of stomach.

‖‖Lochia: blackish, lumpy, very offensive; excoriating; almost ceasing, freshen up again; persistent, brown and offensive.

‖Chill, then general heat, finally sweat; pulse soft and quick; trembling, anxiety, confusion of mind, weakness of memory, thinks herself well; lochia dark, lumpy and very offensive; vagina moist, not very hot; abdomen soft and sensitive; constipation. θPuerperal fever.

Digitized by Google

Mammæ: stitches; dwindling away; small, hard, painful lumps in them; hard, bluish red and covered with little scurfy protuberances, from which blood oozes whenever scurf is removed.

[25] **Voice and Larynx. Trachea and Bronchia.** Scraping and roughness in throat; hoarseness, ceasing in morning, after sneezing.

Perichondritis of larynx, septic form, with softening and degeneration affecting mucous membrane of larynx, and particularly that of œsophagus.

Heavy pressure on sternum. θBronchitis.

Bronchial irritation accompanying dentition; child extremely fretful, irritable, much agitated, and screaming in night.

Chronic bronchial and laryngeal catarrh, with hoarseness; hawking mucus from trachea and bronchi, sometimes bloody, especially that from trachea; heavy pressure on sternum when turning over in bed in morning; < on approach of warm weather; no cough.

[26] **Respiration.** Shortness of breath, heaviness, anxiety, frequent desire to take a deep breath; chest feels bruised, as if beaten; as if sternum was being crushed in. θNervous asthma.

[27] **Cough.** Cough: whistling; dry; tormenting; evening, in bed; caused by crawling below larynx, or, as if in upper bronchi; with dyspnœa; convulsive, with desire to vomit; dry, spasmodic, in morning, causing retching; concussion of abdomen and escape of urine; with easily detached white expectoration; scraping, with profuse, thick, yellow, or white mucous expectoration; dry, wheezing, hollow; during dentition; with pain in chest and sternum, compelling to press hand on it; stitches and soreness in chest.

Aggravation of cough: morning and evening; while exhaling; from motion; from music; when awaking, when lying on side or turning in bed.

During cough: scratching in throat; stitches and bruised pain in chest; asthma; jarring of abdomen; retching; discharge of urine; chills and heat; sleepiness.

After coughing spell, copious, purulent expectoration.

Periodical blood spitting, greenish yellow, puslike sputa.

Expectoration: white; thick yellow; black coagulated blood.

Frequent blood spitting, severe pains in chest, afternoon fever, and morning sweat.

Fatiguing cough with old people, copious sputa.

Violent winter cough of old people, with spasmodic turns at night, and very copious light colored mucous sputa; pain or pressure referable to sternum.

Digitized by Google

Whooping cough.

Cough for several weeks; vomiting of tough, white phlegm with the cough, sometimes of a yellowish color; cough < in evening and morning; after lying down and from exercise; crawling below larynx, which excites cough; perspires after coughing and feels weak; stomach swells in evening, has to unfasten clothes; sometimes sneezes when he coughs.

Inner Chest and Lungs. Dreadful burning in chest; constriction.

Stitches: in l. chest, just over heart; across chest, during morning till noon; first in l. then in r. chest; in r. chest, interrupting breathing; under scapula.

Acute stitches in middle of chest, < during inspiration, attended with feeling of lameness and extending to elbow joint across r. shoulder, where pains are most violent on lifting arms; chronic leucorrhœa.

Pains in chest, > from pressure.

Anxious feeling of heaviness and oppression in chest.

Breath quick and labored, puffing of cheeks and violent working of nostrils. θPneumonia.

Periodic attacks of blood spitting, with fever, and expectoration of greenish yellow pus; pains in chest; can lie only on one side. θPhthisis.

Suddenly seized with cough and expectoration of blood; lies in bed, greatly emaciated; is afraid to open mouth; heaviness and oppression of chest; constipation; during night coughed up much black blood; appetite lost; pulse weak, suppressed, intermittent; face greyish yellow.

Coughing spells every Autumn and Spring, with expectoration of yellowish green pus and blood, fever and inability to lie on one side. θPhthisis.

After whooping cough, accompanied by inflammatory affection of lungs and larynx, phthisis purulenta; with every paroxysm of cough, expectoration of a large mass of pus, followed by such great prostration that he can hardly speak; severe evening exacerbations; loss of appetite; emaciation; must stay in bed. θConsumption.

After neglected pulmonary catarrh, severe, persistent, spasmodic cough, often attended by vomiting; expectoration, profuse, slimy and purulent; must sit up nearly all night; constant stitches in l. chest; bitter taste in mouth; fetor oris; frequent greenish, watery diarrhœa; hectic fever. θConsumption.

Must stay in bed; face and body greatly emaciated; cough with profuse and frequent expectoration; frequent blood spitting; severe pains in chest; fever in afternoon; sweats in morning; consumption.

Digitized by Google

▮Emaciation; intense hectic fever; night sweats; shortness of breath; dry, teasing cough; great debility.
▮▮Gangrene of lungs.

[29] **Heart, Pulse and Circulation.** ▮Anxiety at heart; oppression of breathing.
▮▮Stitches: over heart; in heart.
▮Pulsation in all arteries, when at rest.
Pulse: small, weak and quick; soft, quick and trembling; small and hard; slow; rapid, scarcely perceptible; falls from eighty to sixty, even to forty-seven.
▮▮Pulse small and weak, with orgasm of blood.

[31] **Neck and Back.** ▮Glands of neck swollen.
▮▮Pain in back: at night; < when lying.
▮Pain as if small of back would break; < during rest, > from motion.
▮Pain in small of back and sacral region, like labor pains; urging to urinate and ineffectual desire for stool.
▮Spasmodic drawing from behind forward, into genitals, or down into thighs; stitches. θCancer uteri.
▮Drawing pain along coccyx to rectum and vagina, where a spasmodic, contractive pain is felt.
▮▮Continuous burning in small of back.

[32] **Upper Limbs.** ▮▮Pain in shoulders as if they had been uncovered all night.
▮Scapulæ as if bruised.
▮Stitches in arm, from shoulder joint through to fingers, which feel as if asleep, without power or feeling.
▮▮Pain as if bruised when touched inner side of upper arm.
▮▮Pain in elbow joint, as if tendons were too short.
Slightly elevated red blotches on l. forearm.
▮▮Pain in ulnar muscles, extending to little finger; cramp-like in l. arm; drawing, with lameness in right.
▮▮Fingers become white and insensible, especially in morning after rising.
▮▮Left thumb pains as if sprained and stiff.
▮▮Cracking of skin of hands.

[33] **Lower Limbs.** ▮▮Bruised pain on crest of ilium, as if from a heavy burden, or after running; stitches from same through abdomen; pain in same and in lumbar vertebræ, in morning, as if tired.
▮Pain in l. hip joint, as if luxated; as if leg was too long when standing.
▮Boring pain in r. hip, alternating with numbness and loss of sensation of whole thigh. θRheumatic gout.
▮▮Tingling or buzzing sensation in lower limbs.
▮Pain in whole leg, as from an ulcer.
▮▮Sensation as if knee joint would suddenly give way.
▮▮Alternate swelling of knee joints and wrists, with sensation of numbness and rigidity of limbs.

Digitized by Google

‖Swelling and stiffness of feet; white, cold swelling.
‖Stitches in r. ankle and l. heel.
‖Ulcerative pain in soles; burning itching in soles.

[34] **Limbs in General.** ‖Alternate swelling of knees and joints of hands, with disagreeable sensation of numbness and stiffness in limbs. θRheumatic gout.
‖Pain in all limbs, as if beaten, or as after a long walk; lassitude or heaviness with drowsiness.
‖Stitches in joints.
‖Red, scaly skin on bends of knees, like herpes.
‖Skin on extremities dry and rough.

[35] **Rest. Position. Motion.** Rest: symptoms of female organs >; pulsation in all arteries; pain in back <; restlessness <; chill <; seems to increase pains.
During repose: a sensation as if all parts of body were in motion.
Lying down: cough <; pain in back <.
Lying on side: cough <.
Lying on side not affected: causes pains in anterior part of head; burning pains in upper face.
Can lie only on one side: phthisis.
Unable to lie on either side.
Sitting: leucorrhœa >.
Must sit up nearly all night: cough.
Sitting up: causes pains in anterior part of head; belching and hiccough.
Standing: sensation as if a load was resting on pelvis; leucorrhœa <.
Rising from sitting up: contractive pain in vagina >.
Least exertion: causes great prostration; faintness.
Motion: causes pains in anterior part of head; bearing down and weight in pelvis <; cough <; pains in back >; restlessness >.
Wants to be in motion all the time.
She cannot keep quiet after getting up from sleep.
Turning over in bed: heavy pressure on sternum; cough <.
Turning around quickly: danger of falling.
Lifting arms: pains most violent.
Walking: leucorrhœa <.
Staggering, must hold on to something: vertigo.

[36] **Nerves.** ‖General weakness and prostration; great debility.
‖Faintness in morning, when rising earlier than usual.
‖Fatigue from least exertion.
‖Weariness, as if from too long a foot journey.
‖Prostration, with sleeplessness.
‖Great restlessness and excitation of whole body, < in repose than during motion.
Spasms during dentition; swelling over a tooth not quite through.

Digitized by Google

‖Child moans constantly, or dozes with half open eyes, or is cross and sleepless; during dentition.
‖Very severe, old, neuralgic affections, with tearing pain.
‖Perfect depression of trophic nervous system.

[37] **Sleep.** ‖Great drowsiness, with frequent yawning.
Sleeplessness, < before midnight.
‖‖Will only sleep when caressed and fondled.
‖Tosses about all night, without any apparent cause.
‖Starting, when scarcely fallen asleep.
‖‖Laughs aloud during sleep.
‖Dreams: of crying; of falling from a height; of being out in a snow storm; of being poisoned; of bright fire; of very dirty (clothes) wash; that he is urinating, and awakes to find the dream a reality.
‖Very difficult to waken child out of sleep. θEnuresis.
‖Generally better after sleep.

[38] **Time.** Morning: vertigo; pulsation of forehead and vertex; hot, acrid tears; loss of appetite; frequent sneezing; chilliness after sneezing; hoarseness >; turning over in bed pressure on sternum; dry, spasmodic cough; cough <; sweat; stitches across chest; fingers white and insensible; pain in lumbar vertebræ; faintness; sweat.
Afternoon: fever.
Evening: chilliness; vomiting; vagina as if sore; cough <; stomach swells; exacerbations; itching drives him almost wild; herpes on palms of hands, in ears, elbows, knuckles and malleoli <.
Before midnight: sleeplessness <.
Night: screaming; cannot get out of bed quick enough to urinate; wets bed; spasmodic cough; coughed up much black blood; sweats; pain in back; tosses about.

[39] **Temperature and Weather.** Warmth: herpes >.
On approach of warm weather: heavy pressure on sternum.
Open air: vertigo; herpes <.

[40] **Fever.** ‖‖Transient chill without thirst.
‖‖Chill, predominating when at rest.
‖‖Shaking chill, with severe flushes of heat in face, red face and icy cold feet; after the chill, thirst.
‖‖Chill: great bodily restlessness; alternating with heat.
‖Coldness of face and hands.
‖Heat mostly in face.
‖Flushes of heat, with circumscribed redness of face.
‖‖Sweat scant and only during morning, with heat and redness of cheeks.
‖Putrid fever.

[41] **Attacks, Periodicity.** Periodic: headache; blood spitting.
Two or three hours after eating: vomiting of food.

Digitized by Google

For several weeks: diarrhœa.
Before and during menses: humming and difficulty of hearing; headache; buzzing in head.
For six months: suppression of menses.
Every Autumn and Spring: coughing spell.
Winter: cough.
For one year: hemorrhage from teeth and nose.
Day after coition: swelling of penis; discharge of blood.

42 **Locality and Direction.** Right: suggilation on conjunctiva of eye; pressure on side of throat; stitches in chest; lameness in elbow joint and shoulder; drawing and lameness in arm; boring pain in hip; stitches in ankle.
Left: throbbing and beating in side of head; heat, burning, swelling and redness of outer ear; stiffness of neck; lupus on nose; toothache extending to side of face; slightly elevated eruption on forearm; stitches in groin; stitches in chest; red blotches on forearm; cramplike pain in arm; pain in hip joint; stitches in heel.
First l. then r.: stitches in chest; pain in wrists.
From behind forwards: drawing into genitals.
Stitching downward; pressing inward.

43 **Sensations.** As if a board was across forehead; as if brain would force through forehead; as if looking through gauze; as if something was floating before eyes; as if cold water or ice was in epigastrium; as if a hard twisted ball was lying in umbilical region; as if children would go into fits during defecation; burning as of red hot coals deep in pelvis; as if a load was resting on pelvis; as if something was coming out of vagina; vagina as if sore; chest as if beaten; as if sternum was being crushed in; as if small of back would break; as if shoulders had been uncovered all night; scapulæ as if bruised; fingers as if asleep; inner side of upper arm as if bruised; as if tendons of elbow joint were too short; l. thumb as if sprained; as of a heavy burden on crest of ilium; lumbar vertebræ as if tired; hip joint as if luxated; as if leg was too long when standing; pain in leg as if from an ulcer; as if knee joint would suddenly give way; limbs as if beaten, or as if after a long walk; weariness as if from too long a foot journey; sensation in skin as from ulceration.
Pain: in occiput; in l. side of neck, shoulder and arm; in teeth extending to temples and l. side of face; in region of umbilicus; in uterus; in vagina; in chest and sternum; in small of back and sacral region; in shoulders; in arm; in elbow joint; in ulnar muscles; in l. thumb; in abdomen and lumbar vertebræ; in l. hip joint; in whole leg; in all limbs.

Digitized by Google

Violent pain: elbow joint across r. shoulder.
Severe pain: in head; in small of back and uterine region, extending to thighs; during coition; in chest.
Violent spasms: in groins.
Cutting: in abdomen.
Tearing, drawing, jerking pains: in head.
Piercing: in head.
Stitches: in ear; in region of liver; in rectum; from small of back through pelvis to external genitals; in side; in chest; just over heart; across chest; in r. chest; under scapula; in middle of chest; in heart; from back into genitals; in arm from shoulder joint through to fingers; from crest of ilium through abdomen; in r. ankle and l. heel; in joints.
Electric-like stitches: in vagina.
Stitching: in back and lower abdomen; in chin and cheeks.
Ulcerative pain: in abdomen; during coition, in cervix uteri; in soles.
Pressing, gnawing, ulcerative pain: in stomach.
Drawing: in teeth, extending to temples and inner ear; in upper abdomen; along coccyx down to rectum and vagina; from behind forward into genitals or down into thighs; in r. arm.
Griping: about navel.
Cramplike pain: in rectum; in l. arm.
Laborlike pains: in abdomen.
Contractive pain: in vagina.
Colic: in abdomen.
Throbbing and beating: in forehead; in cheeks.
Burning pain: in r. hip.
Bruised pain: in region of liver; on crest of ilium.
Shattering sensation: in abdomen.
Rheumatic pains: in joints.
Pulsation: in forehead and vertex.
Burning pains: in face; in small of back.
Sore pain: in abdomen.
Burning: of conjunctiva; of outer ear; in bowels; in pudenda; in genitals; in female sexual organs; in back and lower abdomen; of vagina; of labia; in chest; in small of back.
Soreness: in head; in chest.
Smarting: in eyes; in pudenda; in vagina.
Biting: of female organs.
Heat: in face; in eyes.
Constriction: hypochondria; rectum; vagina; chest.
Painful dulness: of head.
Dull pain: in region of ovaries.
Painful pressure: towards genitals.

Digitized by Google

Painful hard spot: at l. of stomach; in mammæ.
Scratching: in throat.
Rough and scraping sensation: in throat.
Dull feeling: in head.
Fulness: in stomach; in region of liver.
Tightness: across pit of stomach.
Contraction: in abdomen.
Bearing down and weight: in pelvis.
Pressure: on sternum; in region of spleen.
Anxious heaviness and oppression: in chest; at heart.
Heaviness or pressure: in various parts of head; of forehead; on r. side of throat.
Stiffness: of l. side of neck, shoulder and arm; in limbs.
Stupid feeling: in head.
Numbness: of thigh.
Roaring: in head.
Buzzing: in head.
Tingling and buzzing: in lower limbs.
Crawling: below larynx.
Burning itching: in soles.
Voluptuous itching: deep in vagina.
Itching: in eyes; in ears; of female organs; from leucorrhœa; in vagina; between labia and thighs.
Painful sensation of coldness: in abdomen.

" **Tissues.** ‖Hemorrhages; small wounds bleed much.
‖Profuse, passive hemorrhages, epistaxis, hæmoptysis and hæmaturia.
‖Typhoid hemorrhages, with fetid stools, followed by great prostration.
‖Fetid evacuations and excoriation of mucous surfaces generally; skin wrinkled; restless and sleepless nights.
‖Profuse and offensive secretions of mucous membranes and ulcerations of same, with greatly depressed vitality.
‖Rheumatic pains in joints, also stitches, most of hip and knee; numbness of whole limb as if asleep.
‖Rapid emaciation.
‖Scrofulous and psoric affections.
‖Spongy, burning ulcers; pus acrid, ichorous, fetid, yellow.
‖Gangrenous, cancerous and putrefying ulcers.
‖Epithelioma; carcinoma ventriculi or uteri.
‖Carbuncle.
‖Tendency to decomposition; great irritability, < at rest.
θAnthrax.

" **Touch. Passive Motion. Injuries.** Touch: scalp sensitive; orifice of uterus painful; fundus of uterus painful like a blood boil; cervix scirrhus very painful; on inner side of upper arm, pain.
Pressure: region of spleen sensitive, in region of ovaries unbearable; of hand > pain in chest and sternum.

Digitized by Google

Rubbing: smarting in eyes <; hot, acrid tears.
Tight clothing is intolerable: constriction of hypochondria.

" **Skin.** ‖Itching; toward evening so violent as to drive one almost wild.
‖Wheals like urticaria.
‖Sensation in skin as from ulceration, especially on face and chin.
‖Eruption of nodosities and blisters like bug bites.
‖Eruption dry as well as moist, in almost all parts of body, especially on backs of hands and feet, in palms, in ears, in popliteal region, and on knuckles of hands, with much itching.
‖Large, greasy looking, pockshaped pustules, over whole body; skin tense, shining, deep red; greasy moisture.
‖Painless, pustular eruption all over body, especially on chin and cheeks; sticking pain.
‖Watery or sero-purulent herpes, on back of hands and fingers and joints, itching violently towards evening.
‖Herpes in palms of hands, in ears, elbows, knuckles and malleoli, < evenings and in open air, > from warmth.
‖Old ulcers, painful, putrid.
‖Skin remarkably pale.

" **Stages of Life, Constitution.** Dark complexion, slight, lean.
Complexion livid, disposition sad, irritable.
Often indicated for old women.
Torpid, leuco-phlegmatic temperament.
Old looking children, hard to awaken.
Child, æt. 6 weeks, bottle-fed; gastromalacia.
Girl, æt. 3 months; gastromalacia.
Boy, æt. 6 months, bottle-fed; gastromalacia.
Boy, æt. 2½, weak, delicate, irritable and wilful; suffering nine months; diarrhœa.
Girl, æt. 5, blonde, delicate; enuresis.
Child; daily attacks of vomiting.
Girl, æt. 8, two sisters sick with violent diphtheritis; diphtheria.
Girl, æt. 9, had snuffles when a baby, teeth wedge shaped, very old looking, syphilitic dyscrasia; deafness.
Boy, æt. 10, strong; hemorrhage after extraction of tooth.
Girl, æt. 13, tall for her age, fair, blonde, delicate; menstrual ailment.
Boy, æt. 18, dark complexioned, slight and lean, stature ill developed, suffering since childhood; enuresis.
Girl, æt. 18, suffering 3 months; consumption.
Man, æt. 18, weak, poor circumstances, suffering since childhood; incontinence of urine.
Girl, æt. 20; consumption.
Woman, æt. 25, brunette, with bright red complexion and not very mild disposition; chronic ovarian affection.

Digitized by Google

Woman, æt. 26, full blooded, after two abortions, a birth, then two more abortions; affection of uterus.
Young woman, after difficult labor, two years ago; attacks of vomiting.
Young woman, scrofulous; frequent attacks of pneumonia.
Woman, phlegmatic, mother of four children; puerperal metritis.
Man, æt. 30, tall, good constitution, cheerful disposition; hemorrhage from lungs.
Woman, æt. 32, married, suffering ten years; leucorrhœa.
Woman, æt. 33, small build, childless; uterine affection.
Woman, æt. 40, mother of three children; menorrhagia.
Woman, æt. 41; rheumatism.
Tailor, æt. 46, weak, drunkard; consumption.
Woman, æt. 50; painful, hard spot in stomach.

[48] **Relations.** Antidoted by: *Acon.* (vascular erethism); *Nux vom.* (violent pulsations in every part of body).
Compatible: before *Sulphur;* before *Arsen.*, in cancer; frequently followed well by *Bellad., Calc. ostr., Kali carb., Lycop., Nitr. ac., Rhus tox., Sepia.*
Incompatible: *Carbo veg.*
Compare: *Ant. tart., Carbo an., Graphit., Hepar, Iodum, Ipec., Laches., Mercur., Petrol., Phosphor.*

LAC CANINUM.

Dogs' Milk.

The use of dogs' milk in medicine is of ancient date. "Dioscorides, Rhasis, Pliny and Sextus recommend it for the removal of the dead fœtus. Sammonicus and Sextus praise it in photophobia and otitis. Pliny claims that it cures ulceration of the internal os. It was considered an antidote to deadly poisons."

The remedy was revived by Reisig, of New York, who used it successfully in the treatment of diphtheria. After Reisig the remedy was used by Bayard and by Swan, to whose indefatigable exertions we owe the present status of this valuable medicine. Swan's potencies were prepared from Reisig's 17th.

Provings (with potencies from the 30th upwards) by Laura Morgan, Hazlitt, Miss W., Mr. J. L. H., H. K., Mrs. Wheelwright, White, Grant, Swan, Taylor and family, and numerous others. See Swan's Materia Medica of Nosodes and Morbific Products, 1888, arranged by Berridge.

CLINICAL AUTHORITIES.—*Sensation of film before eyes*, Swan, Raue's Rec., 1875, p. 61; *Sore throat*, Fowler, Org., vol. 3, p. 102; Biegler, Hom. Phys., vol. 6, p. 410; Hills, Hah. Mon, vol. 10, p. 279; Gale, Hom. Phys., vol. 2, p. 69; *Diphtheritic sore throat*, Carr, Org., vol. 2, p. 204; Baillie, Raue's Rec., 1874, p. 112; *Diphtheria* (4 cases), Hiller, Org., vol. 3, p. 339; Swan, Times Retros., vol. 3, p. 29; Hills, Payne, Cin. Med. Adv., vol. 5, pp. 83, 84; Lippe, Org., vol. 1, p. 364; Finch, Wildes, Wesselhœft, Nichols, Cin. Med. Adv., vol. 5, pp. 178–182; *Croupal diphtheria*, Wesselhœft, Org., vol. 3, p. 362; *Affection of stomach*, Hiller, Org., vol. 2, p. 238; *Syphilitic ulceration of penis*, Lippe, Org., vol. 2, p. 342; *Injurious effects of weaning*, Gramm, T. H. M. S. Pa., 1884 p. 47; *Parenchymatous metritis*, Biegler, MSS.; *Sciatica and sore throat*, Swan, Hom. Phys., vol. 6, p. 411; *Rickets* (4 cases), Bernard, Times Retros., vol. 3, p. 29; *Sciatica and rheumatism*, Hiller, Org., vol. 3, p. 338; *Acute rheumatism*, Lippe, Org., vol. 2, p. 484; *Rheumatism*, Butler, Hom. Phys.; *Nervous affection*, Berridge, Hom. Phys., vol. 3, p. 217; *Acute neuralgia*, Hiller, Org., vol. 3, p. 338.

[1] **Mind.** Very forgetful; in writing, uses too many words or not the right ones; very nervous.

Omits final letter or letters of a word, when writing; in speaking substitutes name of object seen, instead of object thought of.

Very absentminded; makes purchases and walks off without them; goes to post a letter, brings it home in her hand.

Cannot collect her thoughts; confused feeling.

Very restless; cannot concentrate her thoughts or mind to read; wants to leave everything as soon as it is commenced.

Digitized by Google

Is impressed with idea that all she says is a lie.

Every time a symptom appears she feels very confident that it is not attributable to medicine, but that it is some settled disease.

Sensation as if she was going deranged, when sitting still and thinking; sometimes she has most horrible sights presented to her mental vision (not always snakes), feels horribly afraid that they will take objective form and show themselves to her natural eye.

Thinks she is looked down upon by everyone, that she is of no importance in life.

Imagines he wears some one else's nose. θDiphtheria.

Imagines to be dirty.

Imagines she sees spiders. θDiphtheria.

Woke at daylight feeling that she is a loathsome, horrible mass of disease (while the breasts were affected); could not bear to look at any portion of her body, not even hands, as it intensified feeling of disgust and horror; could not bear to have any one part of her body touch another, had to keep even fingers apart; felt that if she could not in some way get out of her body, she should soon become crazy.

After inhaling gas for extraction of teeth, very strange sensation in head (such as he felt when going off under gas); sometimes imagines heart or breathing are going to stop, or otherwise frightens himself, and this makes heart beat violently; occasionally very depressed, and fancies he is going out of his mind.

Sensation or delusion as if surrounded by myriads of snakes, some running like lightning up and down inside of skin; some that are inside feel long and thin; fears to put her feet on floor, lest she should tread on them and make them squirm and wind around her legs; is afraid to look behind her, for fear that she will see snakes there, does not dream of them and is seldom troubled with them after dark; on going to bed she was afraid to shut her eyes for fear that a large snake, the size of her arm, would hit her in the face.

Worries herself lest pimples which appear during menses will prove to be little snakes, and twine and twist around each other.

On lying down either by day or night begins to think how horrible it would be if a very sharp pain, like a knife, should go through her, and thought of it causes great mental distress.

Attacks of rage, cursing and swearing at slightest provocation.

Cannot bear to be left alone for an instant. θDiphtheria.

Digitized by Google

No desire to live.

Sits and looks under chairs, table, sofa and everything in room, expecting yet dreading to see some terrible monster creep forth and feeling all the time, that, if it does, it will drive her raving mad; she is not afraid in dark, it is only in light where she can imagine that she can see them.

Fits of weeping two or three times a day. θParenchymatous metritis.

Child cries and screams all the time, especially at night, and will not be pacified in any way.

When paroxysms of intense nervousness come on, feels like tearing off her clothes; takes off her rings; cannot bear anything to touch her, especially over l. ovarian region, from which she frequently lifts bed clothes.

Had to keep her fingers apart from each other.

Depression of spirits, doubts her ability and success, thinks she will have heart disease and die of it.

Chronic "blue" condition; everything seems so dark that it can grow no darker.

Gloomy feelings, < as headache gets worse. θParenchymatous metritis.

Fears she will become unable to perform her duties.

Fear of death, with anxious expression of countenance.

Very nervous; constant dread; a feeling as if she was going to become unconscious. θDiphtheria.

Wakes distressed, and obliged to rise and occupy herself in some manner; fears she will be crazy. θParenchymatous metritis.

Has great fear of falling down stairs at times.

Very cross and irritable only while headache lasts.

When awake, very irritable and cries constantly.

Feels insulted because she thinks she is looked down upon by everyone.

Intense ugliness and hatefulness; writes to her best friends all sorts of mean and contemptible things.

Easily excited. θParenchymatous metritis.

Too excited to allow examination of throat.

Feels weak, and nerves so thoroughly out of order, that she cannot bear one finger to touch another. θNervous throat affection.

Exceedingly nervous and irritable. θParenchymatous metritis.

Very easily startled. θParenchymatous metritis.

Sensorium. Dizzy sensation with slight nausea.

After inhaling diphtheritic breath, light headed, with tingling on vertex and slight sore throat.

Constant noise in head, very confusing; < at night and at menses. θParenchymatous metritis.

Digitized by Google

‖Wakes at night with sensation as if bed was in motion; noise in head bad beyond description; first thought on waking that headboard was swaying, and so occasioning distress, but found it arose from internal causes. θParenchymatous metritis.

[3] **Inner Head.** ▮Frontal headache.

▮On going into cold wind, terrible pain in forehead as if it would split open, > on going into warm room.

‖After midnight, very severe frontal headache, and a piercing pain on vertex. θTyphoid pneumonia.

‖Headache both frontal and occipital, < by turning eyeballs upwards.

‖Headache over eyes, < when sewing. θPharyngitis.

▮Headache: in afternoon, principally over l. eye; over l. eye on first awaking.

‖Pains and throbbing in temples. θDyspepsia.

‖Headaches, mostly through temples, darting, stabbing; sometimes begin on r. side, and sometimes on l.; always going from one side to other.

▮Pains in head during day, first on one side, then on other; seem perfectly unbearable; > on first going into air.

‖Headache from below eyes over whole head and top of shoulder. θParenchymatous metritis.

‖Severe pressure on brain. θParenchymatous metritis.

▮Arose in morning with heavy, dull, frontal headache, and at 9 A.M., severe sharp pain on top of head, coming from nape of neck, then stretching across head forward; pain so severe that he presses top of head with hands; neck stiffened; bending head forward, or lying down, causes congestion, increasing pain; again, pains subside for short time, and begin anew, either in front part of head, or in nape of neck, or all over head at once; when pain is frontal it causes lachrymation. θAcute neuralgia.

‖Frequently wakes with sick headache, which seems to commence at nape. θNervous throat affection.

‖Sick headaches, beginning in nape; pain settling gradually in r. or l. forehead.

‖Darting pains from occiput to forehead; beating. θParenchymatous metritis.

‖Headaches seem unbearable, and are attended by pain in lumbar region; all pains cease as soon as throat gets worse. θDiphtheria.

▮Headache < by noise or talking, > by keeping quiet; confused feeling in head.

[4] **Outer Head.** Head very sore and itches almost all the time. Sore pimples on scalp which discharge and form a scab; extremely painful when touched or on combing hair.

Digitized by Google

[5] **Sight and Eyes.** ||Eyes sensitive to light. θRheumatism.
||Must have light, yet is intolerant of sunlight. θDiphtheria.
|Tendency in retina to retain impression of objects, especially of colors; or somewhat of object last looked at is projected into next.
While looking at an object, appears to see just beyond or out of axis of vision, an object passing across field of sight; but on adjusting eye to see it, is gone; it always appears as a small object, ||like a rat or bird, sometimes on floor, at others in air.
||Sees faces before her eyes, < in dark; the face that haunts her most is one that she has really seen.
||Sees big eyes and creeping things. θDiphtheria.
||Difficulty in distinguishing objects; in reading, letters run together. θAfter diphtheria.
|When reading, page does not look clear, but seems covered with various pale spots of red, yellow, green and other colors.
||When looking in a mirror by gaslight, after exerting eyes, sees a green spot or a green band before her l. eye, the band slanting downward from l. eye to r. cheek. θGlaucoma.
||Square or round green spots or brown spots before l. eye, when sun is bright; sometimes bright spots before l. eye. θCataract.
||Frequent sensation of a film before eyes, with vertigo, and while thus suffering would see a small dark object, like a mouse or bird, coming up to her left.
||Film over eyes from reading or looking closely.
||Eyes blurred. θParenchymatous metritis.
||Heavy pain in eyeballs, with outward pressure.
||Burning in l. eye. θRheumatism.
||Eyes watery and discharging. θDiphtheria.
||Eyes dull and lustreless. θDiphtheria.
||Dark brown areolae under eyes. θRetarded menses.
||Non-œdematous swelling of upper and lower lids; pink color of lower lids, most noticeable on r. θDiphtheria.
||Heaviness of l. upper eyelid, with pain above l. eye.
|Upper eyelids very heavy, could scarcely keep eyes open.
||Agglutination of l. eyelids. θRheumatism.

[6] **Hearing and Ears.** ||Sounds seem very far off.
Pain in both ears; noises; as if ears were full.
||Deafness from hereditary syphilis.
||Green odorless discharge.

[7] **Smell and Nose.** ||Nose cold. θDiphtheria.
|Fluids escape through nose while drinking. θDiphtheria.
||Epistaxis: when speaking or swallowing; at 4 P.M., returning at intervals. θDiphtheria.

Digitized by Google

▮Considerable sneezing.
▮Head so stuffed she can hardly breathe.
▮Stuffed feeling in head, as of a severe cold in head.
▮▮One side of nose stuffed up, the other free and discharging thin mucus at times and thin blood; these conditions alternate, first one nostril stopped up and the other fluent, and vice versa. θDiphtheria.
▮Nasal discharge, excoriating nostrils and upper lip.
▮▮Coryza, with discharge of thick white mucus.
▮Fluent catarrh from both nostrils, with sensation of fulness of upper part of nose.
▮Coryza; constant watery discharge from nose, excoriating nostrils and upper lips.
▮▮Profuse nocturnal nasal discharge, like gonorrhœa, staining pillow greenish yellow.
▮▮Nose became so bad that there was fear of destruction of bones; bloody pus discharged several times daily; nasal bones sore on pressure.
▮Sore on r. side of septum of nose; next day nose sore, constant inclination to pick at it and get scab off.
▮▮Two very angry gatherings, one under l. side of nose, and one on upper l. nostril; both came to a head, and discharged matter and blood, and afterwards scabbed over; before discharge shooting pain. θSick headache.

[8] **Upper Face.** ▮▮Face indicates great anxiety. θDiphtheria.
▮▮Countenance pale and careworn. θDiphtheria.
▮▮Face very red, and then suddenly pale.
▮Face flushed; cheeks red. θDiphtheria.
▮▮Face flushed, swollen and hot; burns, feels dry.
▮Dark brown areolæ under eyes. θRetarded menses.
▮▮In morning, l. superior maxillary feels sore; most of time there is dull pain, < by exertion; sometimes throbbing pain, burning, throbbing, aching heat, sensation of fulness; cannot wear her false teeth from soreness and swelling of maxillary; an exacerbation of pain leaves face very sore; pains > by warm applications, but only cold applications > soreness.

[9] **Lower Face.** ▮▮Red circular spot below r. malar bone, burning to touch. θDyspepsia.
▮▮Flushes on l. cheek. θDyspepsia.
▮Lips dry and peeling off; dry and parched, but mouth constantly full of frothy saliva.
▮▮Seems to affect lower lip most, and blisters and fever sores on lips are amenable to its influence.
▮▮Jaw cracks while eating. θDyspepsia.
▮▮Submaxillary glands swollen. θDiphtheria.
▮▮Swelling of l. parotid, with sore throat and loss of appetite.
▮▮Parotid gland first attacked, and disease extends to other

Digitized by Google

glands of neck; throat and sides of neck not tender to external touch. θDiphtheria.

‖Swelling of parotid passes from r. to l., but more often from l. to r.

[10] **Teeth and Gums.** ‖Paroxysmal gnawing pain in l. upper canine, temporarily yields to any cold application. θSick headache.

‖Gums swollen, ulcerated, retracted, bleeding, teeth loose; caused by defective nutrition and exposure.

[11] **Taste and Tongue.** ‖Nothing tastes natural, except salt food. θEpulis.

|Putrid taste in mouth. θDiphtheria.

‖Tongue generally red and moist. θDiphtheria.

|Tongue coated whitish, except edges, which are red.

|Tongue coated, dirty looking, centre to root.

|Tongue furred whitish at edges, centre and root darker.

‖Tongue: heavily coated, and dry to the tip; dirty coated, yellowish white and slimy; dry; thickly coated, greyish white. θDiphtheria.

|Tongue coated whitish grey, having an underlying bluish look.

‖Slight yellow coating on tongue. θDiphtheria.

|Tongue coated brown.

‖Difficulty in articulating, owing to a semi-paretic state of tongue, causing stuttering if she talks fast; has to speak very slowly.

[12] **Inner Mouth.** ‖Peculiar rattle in mouth, right along tongue; on attempting to hawk her mouth clear, mucous rattled along tongue quickly and continually; utterance was so indistinct as to be unintelligible, and every word she tried to speak was accompanied by this quick and continuous rattle along tongue. θDiphtheria.

‖Breath offensive, putrid. θDiphtheria.

‖Mouth dry and parched; drinks little and often.

|Mouth very dry without thirst.

|Mucus in mouth, < after eating, and in open air.

|Mouth full of frothy mucus; inclination to swallow.

|Increase in quantity of saliva which is slightly viscid.

|Mouth constantly full of frothy saliva, lips dry, parched.

‖Constant spitting and drooling, very profuse, making chin and breast sore. θDiphtheria.

|During sleep, saliva runs from mouth, so as to wet pillow.

‖Stomatitis; stomacace; cancrum oris; nursing sore mouth.

[13] **Throat.** ‖Throat very sensitive to touch externally.

‖Sensation as if throat was closing and she would choke, sensation is between throat and nose; feels as if something in throat was either enlarged or relaxed; desires to keep mouth open lest she should choke; sometimes

Digitized by Google

cannot swallow, because there seems to be a kind of muscular contraction in throat.

‖ Paralytic symptoms strongly marked; as soon as he went to sleep, would stop breathing, and was only kept alive by keeping him awake; apparently respiration was kept up by voluntary effort. θDiphtheria.

‖ Talking is very difficult, and there is a disposition to talk through nose. θNervous throat affection.

‖ Swallowing very difficult, painful, almost impossible.

‖ Uvula elongated and very much swollen, diphtheritic coating on it; tonsils swollen and coated; back of throat patched, extending up to hard palate; odor offensive and diphtheritic.

‖ Constant inclination to swallow, causes pain extending to both ears.

‖ Pricking sensation in throat, as if full of sticks.

‖ Pricking and cutting pains through tonsils on swallowing, shooting up to ears. θDiphtheria.

‖ Pain in throat pushes toward l. ear.

‖ On swallowing, acute pain at one time on r. side of throat, and again on l. side. θDiphtheria.

‖ Throat > after drinking cold or warm; < by empty swallowing. θDiphtheria.

‖ Throat feels stiff as a board. θDiphtheria.

‖ Throat sensitive. θParenchymatous metritis.

‖ Tickling and sense of constriction in upper part of throat, causing constant dry, hacking cough.

‖ Feeling of lump in throat, which goes down when swallowing, but returns; throat < on r. side.

‖ Sensation of ball or round body in l. side of throat, and feeling that it could be removed with a knife.

‖ Marked sensation of lump in throat on l. side, when swallowing; pain extends to ear. θDiphtheria.

‖ Sensation of lump in r. side of throat, with a feeling that she could take hold of it with her fingers and pull it out; accompanied by a very annoying pricking, stitching feeling; constant inclination to swallow saliva, which causes soreness of throat.

‖ Lump on l. side of pharynx below tonsil, causing an enlargement that filled each arch of palate, nearly to r. side.

‖ Most pain when swallowing solids, no aversion to cold drink; when swallowing solid food, it seems to pass over a lump, with sore and aching pains extending to and into l. ear. θDiphtheria.

‖ Soreness of throat commences with a tickling.

‖ Throat feels raw.

‖ Sensation of rawness, commencing usually on l. side of throat. θDiphtheria.

Digitized by Google

Throat feels dry, husky, as if scalded by hot fluid.
Throat has a burnt and drawn feeling as from caustic.
Pain in r. side of throat in region of tonsil. θAcute rheumatism.
Wakes with throat and mouth painfully dry. θParenchymatous metritis.
Throat very dry and sore, much inflamed, < r. side; palate red, uvula elongated; very painful deglutition.
Throat sore, œdematous, puffed, tonsils badly swollen.
Especially shining, glazed and red appearance of throat. θSyphilis.
Sore throat, pains in whole body and limbs, severe headache. θDiphtheria.
Throat very sore on l. side; painful to external pressure both sides.
Sore throat on r. side, low down, and extending up to ear; pain when swallowing; sensitive to external pressure; slight coryza.
Throat sore, swollen, red and glistening. θDiphtheria.
Sore spot in l. side of throat, only at night, removed by 1 A.M.; next night same on r. side of throat; after 1 A.M. returned no more.
Crusts on skin, with greyish yellow matter under them; mucous follicles of throat raised and swollen, and covered with whitish, cream colored mucus; bloody pus discharged from nose several times a day; nasal bones sore to pressure. θSore throat.
Partial suppression of urine; throat sore and of an œdematous, puffy appearance; next morning, pulse 130; temperature 102; tonsils badly swollen; great indisposition to take food or drink. θSore throat.
Soreness of throat commences with a tickling sensation, which causes constant cough; then a sensation of a lump on one side, causing constant deglutition; this condition entirely ceases, only to commence on the opposite side, and often alternates, again returning to its first condition; these sore throats are very apt to begin and end with menses.
Sore throat just before menses for several years ever since diphtheria; small yellowish white patches of exudation on tonsil of affected side, with great difficulty of swallowing, and sharp pains moving up into ear; these patches are also present on back of throat and uvula; some are quite yellow and some are white; scraping them off makes them bleed.
Throat very sore, pain extending to chest; dry and sore; deep red color on either side of throat opposite tonsils.
Shortly before going to bed, throat began to feel raw and

Digitized by Google

sore; did not sleep well; next morning, throat felt full and sore, somewhat < on r. side; this condition continued two days, when it seemed to continue downward to chest.

▮On waking in morning, throat felt as if there were lumps in it like two eggs, and sore all the time, especially when swallowing; cold water seemed to > momentarily; in evening, examination revealed both tonsils much swollen and very red, l. most, and distinct patches on l. tonsil.

▮Right tonsil red and swollen; pain in tonsil of gnawing character; < at night; dreams of snake in bed.

▮▮Tonsils inflamed and very sore, red and shining, almost closing throat; dryness of fauces and throat; swelling of submaxillary glands. θTonsillitis.

▮Quinsy, just ready to discharge, disappeared without discharging, in an unusually short time; the trouble had been changing from one side to other and back again; has not returned.

▮Sore throat, rapidly growing <; fever; difficult swallowing; r. side <; r. tonsil intensely inflamed, bright red and greatly enlarged, and a yellowish grey spot on inner surface; whole pharynx, uvula and velum much inflamed; spot became larger, and others formed in pharynx; l. tonsil became nearly as large as r.; fetid breath; subsequently a bright scarlet eruption on face, neck, hands and chest, like scarlatina; almost total inability to swallow, especially fluids; aversion to liquids, particularly water.

▮▮Quinsy; suppuration ran from l. tonsil to r., then from r. to l., then back again to r., then both tonsils equally; and again one tonsil would > and the other grow <; whole posterior portion of throat was an œdematous swelling, rising up like an insurmountable barrier; thick tough pieces of diphtheritic membrane were coming away, and new membranes constantly reforming; swelling in throat so large and tense that mouth could not be closed.

▮▮Mucous follicles raised or swollen, and covered with a whitish, cream colored mucus.

▮▮Whole membrane of throat swollen, dark red, with grey patches and small, irregular shaped ulcers; membrane peeled off occasionally; articulation and deglutition intensely painful; < after sleep.

▮▮White ulcers on tonsils.

▮Sore throat, beginning at l. tonsil, swollen and ulcerated; throat feels swollen and raw, pricking and cutting pains shoot through tonsils when swallowing; submaxillary glands swollen, sore and aching pain in l. ear; most

Digitized by Google

pain when swallowing solids; food seems to pass over a lump, no aversion to cold drink; while drinking, fluid escaped through nose.

| | Sore throat commencing on l. tonsil, which was swollen and ulcerated, and presented a depression covered by a white patch; the disease later extended to palate and r. tonsil, the parts red and shining.

| | Throat highly inflamed, swollen, almost closed, grey diphtheric spots on l. side of throat.

| | Sore throat, ulcer on inner side of each tonsil, tonsils red and slightly enlarged, rest of throat dry. θDiphtheria.

| | Ulcers increase in size and number, but neighboring membrane looks clearer. θDiphtheria.

| | Small, round or irregular, grey white ulcers on tonsils and fauces, both sides. θDiphtheria.

| | Tonsils swollen as almost to close throat. θQuinsy.

| | Right tonsil covered with ash grey membrane extending along free palatine border to uvula, which it had already involved; room loaded with diphtheritic odor; next day membrane had passed centre, involving whole arch of palate, and reaching far down on l. tonsil.

| | Right tonsil raw, swollen; grey white membrane there and on fauces. θDiphtheria.

| | Whole of r. tonsil covered with diphtheritic patch.

| | Both tonsils swollen and covered with spots of exudation, like the mould on preserves.

| | Tongue, fauces, tonsils, all swollen and covered with a dirty coating. θDiphtheria.

| | On each tonsil a very thick exudation, covering nearly entire surface; while examining a large piece of membrane was accidentally detached from one tonsil, followed by considerable hemorrhage.

| | Throat very sore, tonsils enlarged, especially l., very large white patches; tonsils and pharynx deep purple red; putrid odor from throat; after patches were expectorated, they left throat very sore, raw and bloody.

| | Throat very sore, < l. side; large greenish ulcers on both tonsils, surrounded by grey white exudation, parts not covered are a deep purple red; swelling externally on both sides; after exudation on tonsils disappeared, a raw, bloody surface was left. θDiphtheria.

| | White patches, like eggs of flies, on both tonsils, extending thence to back of throat; tonsils enlarged and deep red; felt she would suffocate at night from full feeling in throat, which prevented sleep; swallowing toast gave some pain, but seemed to clear throat; drinking caused more pain in throat, and she had to gulp it down.

| | Gargling with warm water brought up a stringy mucus.

Digitized by Google

Whole membrane of throat highly inflamed, swollen, and glands enlarged on both sides. θDiphtheria.

False membrane in throat, thick, grey, or slightly yellow, or dark and almost black, or white and glistening, almost like mother of pearl, or fish scales.

Dark red, angry streaks of capillaries in fauces, giving place to shining, glistening deposit, or tough membrane; half arches filled with sticky, fetid saliva.

Diphtheritic membrane white like china; mucous membrane of throat glistening as if varnished; membranes leave one side and go to other repeatedly; desire for warm drinks, which may return through nose; post-diphtheritic paralysis.

Glossy, shining appearance; disposition on part of membrane to change its position in fauces. θCroupous diphtheria.

Ulcers on throat shine like silver gloss, symptoms went from side to side; croupy symptoms not well marked; after exudation was cleared off, a deep excavation was left. θDiphtheria.

Diphtheritic deposits look as if varnished; exudations migratory, now here, now there. θDiphtheritic croup.

Thick membranous mass lying on soft palate, l. side; diphtheritic masses covering uvula and posterior wall of throat; next day, membrane on soft palate thicker, dirty brown on uvula and posterior walls and pillars of throat, much more extensive and offensive; very difficult deglutition; a large membranous mass, which threatened suffocation, having been removed by forceps; on following morning a second membrane had taken place of first, and walls of throat were covered with a dirty grey exudation; uvula almost black, and coarse shreds of membrane hanging from it.

In morning throat very sore; r. tonsil covered with ulcers and patches, which extended over palate and covered l. tonsil; next day membrane extended across posterior wall of pharynx; uvula elongated, accompanied by chilliness, high fever, pains in head, back and limbs, great restlessness and extreme prostration.

Throat sore, but little swelling, tonsils very slightly enlarged; soreness of throat, first chiefly r., then l.; well marked diphtheritic membrane on both sides of throat situated on an inflamed red base, $\frac{3}{4}$ inch long, $\frac{1}{4}$ inch wide, $\frac{1}{2}$ inch thick, and the same length and width as at the base; anterior edge a dirty yellow; centre more organized, pearly, glistening, white like cartilage; membrane on r. side seems more firm and dense, and disappeared later.

Digitized by Google

Severe chills, headache, pain in back and limbs, restlessness and sore throat; three days later r. tonsil covered with ashy grey membrane, extending along free palatine border to uvula, which it had already involved; peculiar diphtheritic odor in room; pulse small; skin clammy; rapid vital exhaustion; next day membrane involved whole arch of palate and passed down to l. tonsil. θDiphtheria (after failure of *Phytol.* and *Lycop.*).

Roof of mouth and back wall of pharynx coated with a greyish yellow deposit, greater part of which soon disappeared, lasting only about an hour; throat very much > by noon, deposit had nearly disappeared, but < again by night.

Throat covered with diphtheritic membrane; uvula elongated, swollen and covered with black and white or grey diphtheritic deposit; back of throat, extending to hard palate, all covered; breath very offensive; l. side of neck swollen and almost even with jaw; great difficulty in swallowing; after throat began to improve, disease seemed to work through whole alimentary canal, for uvula and parts were very much swollen, and every little while there would be involuntary discharges of diphtheritic matter from uvula and rectum.

Patch of diphtheritic membrane appeared first on r. tonsil, then on l., and frequently alternated sides; swelling of neck (submaxillary and lymphatic glands) also alternated in like manner; < during and after a cold storm from northeast; tickling in throat when drinking; one side of nose stuffed up, the other free and discharging thin mucus at times and thin blood; this condition of nose also alternated; non-œdematous swelling of eyelids, pink color of under lid, particularly of r. eye; breathing hoarse and croupy, at times entire stoppage of breath; often snoring, and only possible through mouth; obstinate constipation, frequent desire, with darting pains in rectum, no power to expel; stool large in size, whitish, rough, scaly, hard; could not bear to be left alone an instant; saw big eyes and creeping things; must have light, yet is intolerant to light of sun; urine scanty, infrequent, no desire, coffee colored; 80 per cent. of albumen and much mucus; quantity less than a gill in twenty-four hours. θDiphtheria.

Fever; bathed in warm perspiration, especially about face, neck and hands; anxious expression; eyes watery and discharging; wants to sit up in mother's arms; cries and desists at every attempt to nurse; reaches for water, yet refuses to take it; respiration hoarse; crying whispered and broken, often no sound at all; pulse 170;

Digitized by Google

tongue, fauces and tonsils swollen and covered with dirty coating; drooling from mouth; throat tender to touch externally; thick, dirty grey diphtheritic membrane, covering free border of epiglottis, and extending off to each side; child refuses to swallow and sputters out the medicine, some returning through nose. θDiphtheria.

Soreness of throat, accompanied by intense heat; pulse scarcely to be counted; prostration so complete that patient refused even to make an effort to take medicine; temperature 102.6°; great sensitiveness of throat externally; symptoms < after sleep; very thick exudate, covering nearly entire surface of each tonsil, which, if forcibly removed, is followed by considerable hemorrhage. θDiphtheria (after failure of *Laches.*).

Throat highly inflamed, swollen, almost closed; grey, diphtheritic patches on l. side of throat; difficult breathing, at times suffocative spells; pulse 140; face flushed, swollen and hot; tongue dry and thickly coated, greyish white. θDiphtheria.

On third day r. tonsil swollen and on it a small diphtheritic patch, rest of throat inflamed; on fourth day both tonsils swollen and covered with diphtheritic patches, with difficult deglutition; high fever, restlessness, cried out and talked in sleep; complained of pains in head, back and limbs; bright scarlet redness on chest and around neck, which, on fifth day, extended all over body and legs; disease now at highest point; skin, in large patches, assumed a dark red color bordering on purple; whole body swollen; membrane, swelling and soreness < on r. side; deglutition impossible; refusing to drink while complaining of intense thirst; characteristic fetor in room; soreness on r. side decreased and commenced on l.; l. tonsil and posterior wall of pharynx covered with membrane; posterior nares invaded; marked sensation of lump in throat on l. side, when swallowing, with pain extending to l. ear; tongue coated dirty, yellow white and slimy; absence of prostration; improvement commenced on seventh day and remedy was discontinued. θDiphtheria.

Pains in limbs, small of back and head disappear, and throat becomes more painful, but looks better; often ulcers increase in size and number, but neighboring membrane looks clearer; < by empty deglutition; throat feels stiff; > after drinking, warm or cold, no thirst, but dry mouth; pain pushes toward l. ear; r. tonsil raw, swollen, grey white membrane there and on fauces; epistaxis when speaking or swallowing, in one

Digitized by Google

case; sweat all over; great exhaustion with poisoned feeling; frequent micturition, urine dark; restless, legs and whole body; face burns dry; constant spitting, drooling; ulcers small, round or irregular, grey white; voice hoarse, interrupted by weakness and hoarseness. θDiphtheria.

‖Throat filled with substance that looked like "smear kase;" throat, tongue, roof of mouth, gums and cheeks completely lined with this substance; mouth and throat filled with loose particles; horrible odor. θPost-scarlatinal diphtheria.

▮Heaviness, and stomach bloated and tender; enlargement of tonsils, l. tonsil <; feels weak; cannot eat or drink anything without pain in pit of stomach; shortness of breath and general languor. θAfter diphtheria.

‖Membrane would leave throat, and a very severe interstitial hemorrhage of bright red blood would ensue; hemorrhage would slowly improve, and membrane appear again in throat; these had continued to alternate for several days. θDiphtheria.

‖False membrane, thick grey, yellow or dark, surrounding mucous membrane dark or bright, may be < on either side, or inflammation shift from side to side, generally < on l.

‖False membrane, thick, yellowish grey, often greenish.

‖Pharyngeal inflammation, with wholesale destruction of epithelium, viscidity of saliva, heat of palms; absolute necessity for constant change of position.

‖Thick, dirty grey diphtheritic membrane covering free border of epiglottis, and extending off to each side.

‖Uvula pretty free from membrane, but intensely sore and bleeds θDiphtheria.

▮Uvula coated (in seven cases).

‖After membrane exfoliates, mucous membrane appears raw and bloody, with increased deglutition.

‖In most cases of diphtheria, the throat symptoms begin on r. side.

‖Inflammation, ulcers and swelling shift from side to side, generally < on l. θDiphtheria.

▮▮Diphtheria and diphtheritic croup; membranous croup.

14 **Appetite, Thirst. Desires, Aversions.** ▮No appetite. θDyspepsia. θAcute rheumatism. θDiphtheria.

‖Appetite and strength failing; dislike to food, especially fat or greasy. θParenchymatous metritis.

No appetite or thirst. θDiphtheria.

‖Thirst for little at a time, but often, as throat is so dry and hot. θDiphtheria.

‖Thirst. θAcute rheumatism.

Digitized by Google

‖Great thirst for large quantities, often.
▮Desire for highly seasoned dishes, which is very unusual; has used pepper, mustard and salt freely.
‖Desire for warmish water with a pinch of salt in.
‖Craves milk and drinks much of it. θDiphtheria.
‖Aversion to liquids, especially water. θDiphtheria.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Great faintness of stomach and nausea. θMetritis.
▮Nausea, with headache, on waking; all morning.
‖Nausea at beginning of diphtheria.
‖The almost constant diphtheritic discharges from mouth and nose nearly ceased, and she almost immediately had spells of sickness of stomach, and would occasionally vomit pieces of membrane. θDiphtheria.
‖Frequent attacks of severe vomiting, and when not so, always feeling of nausea, and fear to eat. θSick headache.

[17] **Scrobiculum and Stomach.** ▮Weak, sinking feeling in stomach pit, on waking in morning.
‖Gnawing, hungry feeling, not > by eating; everything she eats, except fish, makes her worse; the thought of milk makes her sick. θSick headache.
▮Dyspeptic pain, as from a stone, or undigested food, in stomach pit at 9.45 P.M.; followed by a stabbing pain in r. lung, just below nipple.
▮Burning in epigastric region; feeling of weight and pressure of stone in stomach; very thirsty; abdomen swollen and burning, with bearing down pains therein; mucous, yellow, liquid stools; pulse 100; pains and throbbing in temples; flushes on l. cheek; red, circular spot below r. malar bone, burning to touch; no appetite, cannot bear food; jaw cracks while eating. θAffection of stomach.
‖Stomach tender and bloated; cannot eat or drink anything without pain in stomach pit. θAfter diphtheria.
‖Beating in stomach and bowels.
‖Severe throbbing in region of solar plexus; when it becomes very severe, which it did daily for hours at a time, it would seem to extend or continue upwards to head, when dizziness and lightness of head would supervene, requiring her to lie down at once, otherwise she would fall violently to the floor.
‖Gastralgia or cardialgia, < at menses, so she would drop to the floor, comes and goes suddenly.

[18] **Hypochondria.** ‖Severe burning pain in r. hypochondriac and iliac region and corresponding part of back, extending across back to l. side of abdomen; < when on feet or when fatigued, > when lying down.

[19] **Abdomen.** ▮Abdomen very hard and swollen, in evening.

| | Abdomen swollen and burning, with bearing down pains therein.
| | Extreme heat in abdomen.
| Severe shooting pain in abdomen, passing in all directions.
| Pressure from within outwards, as if contents of abdomen would be forced outwards, just above pelvis.
| | Intense sharp pain in l. side of abdomen, with nausea while leaning forward.
| | Pain and burning in l. side of abdomen and pelvis, with weight and dragging on that side; clothes feel heavy.
| Pain in pelvis, principally in r. ovarian region.
| Headache over l. eye on first waking, and great pain in pelvis, most marked at r. ovary.
| Pains in abdomen intermittent.
| | Pain in abdomen, < leaning forward; > leaning back.
| | Smarting in r. groin; pains seem to be in pelvic bones, uterus and limbs. θParenchymatous metritis.
| Very acute pain in l. groin, extending up l. side to crest of ilium, > by stool; sometimes pain is in track of colon.
| | Feeling of tension in l. groin, do not want to walk or stand as it increases sensation, > by flexing leg on abdomen.

[20] **Stool and Rectum.** | | Mucous yellow liquid stools.
| Constipation. θAcute rheumatism.
| | Obstinate constipation; frequent desire with darting pains in rectum, no power to expel; stool large, whitish, rough, scaly, hard. θDiphtheria.

[21] **Urinary Organs.** | Constant desire to urinate, urine scanty.
| Constant desire to urinate, passing large quantities frequently; at night she dreams of urinating, and wakes to find an immediate necessity.
| | Constant desire to urinate, with intense pain. θUrethral chancre.
| Constant inclination to urinate, which was restrained as urination caused intense pain when coming in contact with vulva.
| Urine unusually frequent and dark.
| | Urine frequent: especially at night; scanty, high colored; red sediment.
| | Urine very scanty and dark. θAcute rheumatism.
| Urine dark, heavily loaded with thick reddish sediment that adhered in different colored circles to bottom and sides of vessel.
| | Great difficulty in urinating. θDiphtheria.
| | Urinating only once in twenty-four hours, and then copiously, but with some difficulty and slight irritation. θDiphtheria.
| | Urine scanty, infrequent, coffee colored, no desire to

urinate, quantity less than a gill in twenty-four hours-eighty per cent. albumen, with much mucus.

‖No urine for forty-seven and three-quarter hours, bladder pretty full, parts fearfully swollen, and irritation on urination very great. θDiphtheria.

‖Urine partially suppressed. θTonsillitis.

Male Sexual Organs. ‖Large chancre on dorsum of penis, with a fungoid bacteric mass covering whole of corona glandis, which was first of a glossy, shining, white appearance, and later covered with a fungus, looking like fully developed aphthæ; edges of swollen prepuce covered with nodosities and itching.

‖Penis enormously swollen, and a chancre on glans like a cauliflower excrescence, over half an inch in diameter; it was red, smooth and glistening; no pain; in a week there appeared two more small chancres, deep, sharp edges, clean, and with same shining appearance. θSyphilis.

‖Small sore at entrance of urethra; kept getting <; prepuce involved for about half inch, and parts of glans around urethra an open ulcer, exhaling most fetid smell, and with most excruciating pain; hemorrhage at 10 P.M. every evening, and during day when removing dressings; constant desire to urinate, with intense pain; no sleep for a fortnight, red, glistening appearance.

‖Prepuce involved for about an eighth of an inch, and parts of glans penis around urethra an open ulcer exhaling most fetid smell; pain excruciating; hemorrhages at ten every evening and during day when removing dressing; desire to urinate constant, and accompanied by intense pain; had not slept for a fortnight; red, glistening appearance of ulcer. θSyphilitic ulceration of penis.

‖Chancre on prepuce l. side of frænum, granulating rapidly from centre to circumference.

‖Buboes and chancres.

‖When gonorrhœa is >, catarrh sets in

‖Gonorrhœal pains, intermittent, in front, middle or posterior part of urethra.

Female Sexual Organs. Heat in ovarian and uterine region (with menses); inflammatory and congestive condition of ovaries before menses, especially of r. ovary, with extreme soreness and sensitiveness, which makes every motion and position, even breath, painful.

‖Pain in abdomen principally in r. ovarian region.

‖Sharp pain in r. ovary.

‖In afternoon, sharp pains in r. ovarian region, not constant but intermittent.

Digitized by Google

Severe pain in r. ovarian region, > by flow of bright red blood.

Pain in l. ovarian region; across lower part of abdomen.

Constant burning pain in l. ovarian region, extending from l. leg even to foot. θOvaralgia.

Sharp pains beginning in l. ovary, and darting like lightning either towards r. ovarian region, or else up l. side and down arm, or sometimes down both thighs; but most generally down l. leg to foot, which is numb; pains act something like labor pains, and are accompanied by great restlessness of legs and arms, and great aching in lumbar region; on fifth day after premature labor.

Inflammatory and congested condition of uterus, with extreme soreness and tenderness, that made every motion, position, and even breath, painful.

Parenchymatous metritis (two cases), in one, uterus three times as large as natural, round as a ball, and body very hard, cervix obliterated by altered form of body; uterus sensitive.

Much pain before and after menses, severe headache and entire prostration for first day or so. θMetritis.

Sharp, lancinating pains like knives cutting upwards from os uteri, and as these were being relieved, sensation as of needles darting upwards in uterus.

Pain in uterine region, passing down inside of thighs, half way to knees, and r. leg feels numb.

Pains in uterine region, all day, no particular direction except down inner side of thigh half way to knees.

Severe pain in entire uterine region, with profuse discharge of yellow, brown and bloody leucorrhœa, two weeks after menses; intense pain and enlargement of l. ovary, which could be seen protruding.

Blood bright red and stringy, hot as fire, coming in gushes and clotting easily; constant bearing down pain, as if everything would come out of vulva. θUterine hemorrhage.

Uterine hemorrhage for six weeks; ovarian pains alternated sides, as did the chronic headache.

Retroverted uterus.

Menses: fourteen days too soon, profuse; seven days too soon; flow came in gushes, scanty, intermittent, bright red and stringy, preceded by much flatulence from bowels; very stringy and sticky, cannot get rid of them.

Great engorgment of breasts, with sensitiveness to touch, precede menses.

Menses nearly ceased; at menses much pain in r. thigh and uterus, constant desire for stool, very low spirited. θParenchymatous metritis.

▮Dysmenorrhœa, abdomen sensitive even to weight of clothing; flatus from vagina.
▮Membranous dysmenorrhœa.
▮▮Sore throats are very apt to begin and end with menstruation.
▮Leucorrhœa, very profuse during day, none at night; discharge whitish and watery; pain in small of back; very irritable; < standing or walking.
▮▮Bearing down as though everything would fall out through vagina, with very frequent desire to urinate, and smarting in urethra.
▮Escape of flatus from vagina.
▮▮Great swelling of l. labia and terrible pain while urinating; from gonorrhœa.
▮Itching in l. side of labia, with rough eruptive condition on l. side of vagina, with acrid leucorrhœa; excoriating.
▮Raw and bad smelling sores between labia and thighs, in folds of skin; < when walking, would rather keep still all the time; sores are covered with disgusting white exudation.
▮▮Foul smell from genitals. θHerpes.
▮▮Pressure on labia causes a slight flow of blood; menstruation commenced entirely normal.
▮Intense painful soreness of vulva, extending to anus, coming on very suddenly about noon, and lasting for about two hours; came again during evening; could not walk, stand or sit; > by lying on back and separating knees as far as possible.
▮▮Great irritation about vulva and rectum. θDiphtheria.
▮Urination causes intense pain in vulva, when even least drop of urine comes in contact with it.
▮Itching of vulva.
▮▮Breasts very sore and painful, with sharp, darting pain in r. ovarian region extending downwards to knee, very painful and must keep leg flexed. θAfter miscarriage at sixth month.
▮Breasts very sore, sensitive to least pressure; dull, constant, aching pain in them all evening.
▮Breasts very painful, but no lumps; pains are caused by least jar; has to hold breasts firmly when going up or down stairs; breasts < towards evening, presssure of her arm, in natural position, caused considerable pain.
▮Breasts very painful and sore; feel as if full of hard lumps, very painful when going up or down stairs.
▮▮Soreness and enlargement of breasts.
▮Breasts seem very full.
▮Constant pain in nipples.

[34] **Pregnancy. Parturition. Lactation.** ▮▮Afterpains very severe, and shooting down into thighs.

||Knots and cakes in breast, after miscarriage.
||Galactorrhœa.
||Loss of milk while nursing, without known cause.
|||Serviceable in almost all cases where it is required to dry up milk.
||Given for an ulcerated throat to a nursing woman, it cured throat and nearly dried up milk.

[25] **Voice and Larynx. Trachea and Bronchia.** ||Loss of voice. θPharyngitis.
||Throat troubles her much if she reads aloud or talks more than usual; it seems almost as though it was stopping up, and she feels very hoarse, but has no soreness; there is a feeling of fulness and choking.
||Unable to speak loud; distressed feeling while speaking.
||Respiration hoarse, crying was whispered and broken, often no sound at all. θDiphtheria.
|Slight hoarseness, with now and then a change of voice, after walking, but soon passing away.
||Excessive hoarseness, and tickling, choking sensation, > moving about.
||Voice hoarse and husky; interrupted by weakness and hoarseness.
||Larynx sensitive to pressure. θDiphtheria.
||Constriction in lower part of larynx, like a finger across throat; feeling as of a bar across back of throat.

[26] **Respiration.** ||Difficult breathing; during evening had several suffocating spells. θDiphtheria.
||Terrible dyspnœa immediately after sleep, first on l. side of chest; dyspnœa compelled her to be lifted upright with violent exertion to get breath; sharp pain in region of heart with each attack. θAcute rheumatism.
||Breathing hoarse and croupy, and at times an entire stoppage of breath, when it would resume with a violent effort. θDiphtheria.
||Breathing often snoring and only possible through mouth. θDiphtheria.
||Short breath. θAfter diphtheria.
||Great difficulty in breathing, could not lie down flat.
||Breathing very labored.
||Loud snoring during sleep.
||Sensation as if breath would leave her when lying down and trying to sleep; has to jump up and stir around for an hour or so every night.

[27] **Cough.** |Tickling sensation in throat causing cough; in afternoon quite hoarse.
|Cough from tickling in upper anterior part of larynx, < talking and lying down.
||Cough caused by irritation in upper part of throat, <

lying down at night, also after eating and drinking and after talking; with soreness of l. side of throat and constant desire to urinate.

‖Cough on taking a long breath, not when swallowing.

‖Hard, metallic cough.

‖Croupy cough, a dry, hoarse bark, penetrating through closed doors all over house. θDiphtheria.

‖Cough and dyspnœa.

‖Constant cough, accompanying soreness. θDiphtheria.

‖Expectoration of profuse, sticky, tough, white mucus in masses, with coryza.

[28] **Inner Chest and Lungs.** ‖Sharp, incisive pain between scapulæ, passing through to sternum, with a sense of pressure or constriction of chest in afternoon.

‖Trembling, jerking and fluttering through lungs, with numb, prickling sensation all over body, legs and arms.

‖Pulse so rapid it could scarcely be counted. θDiphtheria.

‖Pulse 130. θTonsillitis.

‖Pulse quick, full and strong, with pain in chest and throat.

‖Pulse of little volume. θDiphtheria.

‖Pulse 130, wiry, weak.

‖Pulse: quick and feeble; 100; 120; 140; 170; 130–140; almost gone.

‖Pulse 117. θDiphtheria.

‖Pulse rapid, quick. θAcute rheumatism.

‖Heart beats rapidly from slight causes. θParenchymatous metritis.

[31] **Neck and Back.** ‖Neck stiff. θRheumatism. θNeuralgic headache. θDiphtheria.

‖Pain in back of neck. θDiphtheria.

‖Wandering pains in nape with stiffness. θRheumatism.

‖Neck aches, making her want to bend head forwards; entire spine sensitive. θParenchymatous metritis.

‖Spine aches from base of brain to coccyx. θPharyngitis.

‖Heat, pain and beating in small of back. θMetritis.

‖Pain in back. θDiphtheria.

Wakes with severe pain in lower part of back, it is often five minutes before she can straighten; pain leaves her when she has been about work a short time, not returning till morning. θNervous throat affection.

‖Intense, unbearable pain across supersacral region, extending to r. natis and down r. sciatic nerve; pain so severe as to prevent sleep or rest; at same time diphtheritic sore throat on r. side, with sensation of a lump, could not swallow solid food.

[32] **Upper Limbs.** ‖Fetid perspiration in axillæ, staining linen brown.

‖After exposure to draft in evening: sudden violent pains

Digitized by Google

in r. shoulder so severe that she was unable to raise the arm, as if disabled by dislocation. θAcute rheumatism.

‖Pain in l. shoulder extending across to r.; could scarcely move arm. θPharyngitis.

‖Neuralgic pains in shoulders, l. then r.; then vice versa.

‖Pain in one or other shoulder. θRheumatism.

‖Shoulders and arms ache. θParenchymatous metritis.

‖Partial paralysis of l. arm, unable to raise hand to head; on attempting to do so was seized with sharp pains in arm below shoulder.

‖Left hand bloats and is numb, with trembling, jerking and fluttering through lungs; numb, pricking sensation all over body, arms and legs.

‖Sharp pain in l. hand, l. arm as if asleep.

‖Trembling of l. hand, as in paralysis agitans.

‖Fingers extremely cold but not rest of hands.

‖Two warts on little finger.

[33] **Lower Limbs.** ‖Almost constant pain in r. hip. θMetritis.

‖Pain in r. hip and leg while walking, with a trembling of leg, and slight feeling of uncertainty, particularly on going down stairs. θParenchymatous metritis.

‖Articular rheumatism in r. hip and knee joints, especially former; she was seated in an arm chair, unable to move, complaining of bruised, smarting, lancinating pains in both joints and in lumbar region, with swelling of affected joints; pains < by slightest motion at night, by touch and by pressure of bed clothes; next day pains and swelling had gone to l. hip and knee joints, leaving r. almost free; the ensuing day they had almost entirely disappeared from l. hip and knee joints and had again attacked r. hip and knee; complaining, moaning and sighing on account of her sufferings and probable termination of her illness.

‖Rheumatic pains in l. hip and along sciatic nerve; wandering pains in nape of neck, with stiffness; pains in one or other shoulder; pain above l. eye and heaviness of eyelid; burning in eye; agglutination of eyelids; sensitiveness to light. θSciatica and rheumatism.

‖Intense, unbearable pain across supersacral region, extending to r. natis and down r. sciatic nerve; pain so severe as to prevent sleep or rest. θSciatica.

‖Partial paralysis of r. leg from miscarriage; has to use a cane; r. ovary sore by spells and pain darts down leg, sometimes to foot; leg feels numb and stiff, but cannot keep it still any length of time; feels better by flexing it on abdomen.

‖Can only walk with assistance of a cane. θHip disease.

‖Cannot walk any distance; trembling through r. thigh,

Digitized by Google

and feeling as though entire lower portion of body was giving way; felt as though something was strained across lower part of bowels. θParenchymatous metritis.

‖Sciatica.

‖Limbs cold to knees. θDiphtheria.

▮Bruised pain in soles of feet, stiffness of ankle, knee and hip joints, and occasionally intense pains which move upwards; pain in ankle joints as of a dull plug pushing; joints stiff and sore, tender to touch, < from heat and least motion; later knees and then hips became involved; at first the l. ankle was attacked, and then, after some hours suffering, the r., with relief to l., and so on with knees and hips; chest affected, terrible dyspnœa coming on immediately after sleep, first on l. side; compelled her to be lifted upright with violent exertion to get breath, sharp pain in cardiac region; urine scanty and dark; pain in r. side of throat; generally < at 5 P.M. θAcute rheumatism.

‖After exposure to cold night air when drunk, sharp, darting pains, < by any motion, with swelling in r. knee and r. ankle; next day joints of l. knee, l. ankle, l. hand, extremely painful, moderately swollen, slightly red; ensuing day, l. ankle and knee better, but r. shoulder and elbow similarly affected.

▮Numb pains chiefly in ankles, < while quiet, with swelling; veins of ankles distended; > while extreme heat is applied. θRheumatism.

‖Ecthyma: a sore breaks out on r. leg, excessive itching, inflammation, then swelling, blisters form and suppuration sets in; afterwards clear lymph, then discharge of matter; then scabs and scales, turning eventually into a branlike desquamation; scars have left discolored skin.

‖Restlessness in legs.

‖Cramps in feet.

Limbs in General. ‖Aching pains in limbs and back.

▮Pains in limbs as if beaten. θPharyngitis.

‖Bruised pains in soles making it difficult to walk; in twelve days pains suddenly left soles, and appeared in r. knee joint, being smarting, lancinating, with light swelling of joint; could not move affected limb, as least motion < pains, as did touch and pressure of bedclothes; on following day l. knee joint affected in same way, r. >; on ensuing day r. again affected, with relief to l.; afterwards hip joints attacked alternately with same symptoms, alternating like these in pains and swelling, l. joints one day with > of r., and vice versa; also lancinating pains in l. side of chest; after four days wrist joints affected, first r., with same symptoms as

Digitized by Google

those of lower extremities, symptoms of one side of body alternating with those of other; not able to move himself in bed, lancinating pains made him cry out; constipation, sleeplessness, no fever; pains and swelling < every evening, night, by movement, touch and pressure of bedclothes; numb pains chiefly in ankles <.

| | Burning of hands and feet at night. θOvaralgia.

[35] **Rest. Position. Motion.** Rest: headache >.

Lying on back: with hands over face, falls asleep; separating knees as far as possible > soreness of vulva.

Lying down: thinks how horrible it would be if a very sharp pain, like a knife, should go through her; causes congestion; cough <; does not seem to touch bed.

Could not lie flat: great difficulty in breathing.

Sitting: as if she was going deranged.

Bending head forward: causes congestion.

Leaning forward: nausea; pain in abdomen <.

Leaning back: pain in abdomen >.

Standing: leucorrhœa <.

Cannot find comfortable position in bed, there is no way she can put her hands that they do not bother her.

Motion: painful on account of soreness of ovarian region; > hoarseness; pains in hip and knee joints <; soreness of joints <; sharp, darting pains in knee and ankle <; pain in knee <.

Flexing leg on abdomen: tension in groin >.

Cannot straighten herself: pain in back.

Could not raise arm: pain in shoulder.

Exertion: dull pain in l. superior maxillary.

Must jump up and stir about to > feeling as if breath would leave her.

Walking: leucorrhœa <; sores between labia and thighs <; pain in r. leg; felt as if walking on air.

Does not want to walk or stand: sensation in groin <.

Going up or down stairs: causes pain in breasts.

Going down stairs: trembling of leg.

[36] **Nerves.** ‖ Restlessness. θDiphtheria.

‖ No inclination for least exertion, would like to do nothing but sleep; much lassitude.

| | Heaviness, weakness, general languor. θAfter diphtheria.

| | Profound depression of vitality. θDiphtheria.

‖ General weakness and prostration very marked.

| | Great exhaustion, with "poisoned" feeling. θDiphtheria.

| | Profound prostration, to extent of refusing to make effort to take a dose of medicine. θDiphtheria.

| | In morning so much prostrated that she could not turn in bed; so tired. θDiphtheria.

| | Very weak. θDiphtheria.

Digitized by Google

Sinking spells every morning, attended with great nervousness. θParenchymatous metritis.

Often feels as if she would lose use of limbs. θNervous throat affection.

Child partially paralyzed after diphtheria; could not walk; pain all over, cough, aphonia, loss of appetite, emaciation.

When walking seems to be walking on air; when lying does not seem to touch bed.

Suffering from very unpleasant nervous symptoms; not in low spirits, but weak, and nerves so thoroughly out of order that she cannot bear one finger to touch the other, and often feels as though she should lose use of her limbs; sensation as if throat was closing, sensation is between throat and nose; feels as if something in throat was either enlarged or relaxed, and has a desire to keep mouth open; talking difficult; disposition to talk through nose; sometimes cannot swallow, because there seems to be a kind of muscular contraction in throat; sleep restless, frequently wakes with sick headache, which seems to commence at nape; wakes with severe pain at lower part of back; pain leaves when about work a short time, does not return until next morning; nerves very much overwrought, afraid of being unable to perform duties. θNervous affection.

[37] **Sleep.** Great desire to sleep. θDiphtheria.

Cried out and talked in sleep. θDiphtheria.

Sleeplessness from emotional strain, with entire nervous debility.

Cannot find any comfortable position in bed; there is no way she can put her hands that they do not bother her; falls asleep at last on her face.

Very restless at night; very difficult to get into a comfortable position; generally goes to sleep lying on back with hands over head.

Sleep disturbed, very wakeful; limbs cold all night.

Sleep prevented by being very cold for one hour after retiring, with great nervousness.

Very restless all night; could not keep clothes over her.

Sleepless and crying continually.

Restless sleep at night, bad dreams. θMetritis.

Dreamed a large snake was in bed. θTonsillitis.

Got to sleep late; profuse sweat during sleep; felt feverish all night; in morning > in every way.

At night lies with l. leg flexed on thigh, and thigh on pelvis; restless; < after sleep. θOvaralgia.

Dreams frequently that she is urinating, and wakes to find herself on point of doing so, requiring immediate relief.

Digitized by Google

‖Dreams of going on a journey, and was separated from party, and had to walk a long distance, and arrived at station just in time to see train start off.
‖Aggravation of symptoms after sleep. θDiphtheria.

[38] **Time.** Morning: dull, frontal headache; l. superior maxillary feels sore; nausea, weak, sinking feeling in stomach pit; much prostration.
4 A.M.: copious epistaxis.
9 A.M: sharp pain on top of head.
Noon: throat >; soreness of vulva comes suddenly.
Day: pains in head.
Afternoon: headache; hoarseness; constriction of chest.
Evening: abdomen hard and swollen; intense soreness of vulva; aching in breasts.
9.45 P.M.: dyspeptic pain in stomach pit.
Night: constant noise in head <; sensation as if bed was in motion; sore spot in l. side of throat removed by 1 A.M.; next night same on r. side; pain in tonsil; gnawing <; felt she would suffocate; throat <; dreams of urinating; urine frequent; rheumatic pains <; burning of hands and feet; very restless; limbs cold.
After midnight: very severe frontal headache.

[39] **Temperature and Weather.** Heat: soreness of joints <; pains in ankles > while heat is applied.
Warm room: pain in forehead >.
Warm applications: pains in superior maxillary >.
Open air: headache >; mucus in mouth <.
Exposure to draft: severe pain in r. shoulder.
Cold night air: sharp, darting pains in knee and ankle.
During and after a cold northeast storm: throat <.
Cold winds: terrible pain in forehead.
Washing: causes pain in herpetic eruption.
Cold applications: soreness of superior maxillary >; pain in upper canines >.
Cold water: sore throat momentarily >.

[40] **Fever.** ‖Severe chills. θDiphtheria.
‖Fever and chills for a few days, and up and down every few hours.
‖Feels feverish.
‖Intense fever on waking in morning, with perspiration.
‖Fever, and bathed in warm perspiration, especially about face, neck and hands. θDiphtheria.
‖Intense heat. θDiphtheria.
‖Moderate fever. θDiphtheria.
‖Fever. θDiphtheria θAcute rheumatism.
‖High fever. θDiphtheria.
‖Dry, hot skin. θDiphtheria.
‖Fever returning every afternoon. θDiphtheria.

tents of abdomen would be forced outwards; as of needles darting upwards in uterus; as if everything would come out at vulva; breasts as if full of hard lumps; as if throat was stopped up; as if a finger was across throat; as of a bar across back of throat; as if breath would leave her when lying down; l. arm as if asleep; as of a dull plug pushing in ankle joint; pain in limbs as if they had been beaten; feels as if she would lose use of limbs; when walking, as if walking on air; when lying in bed, as if she did not touch it; as if throat was closing; as if an insect was crawling on shoulders, neck and hands.

Pain: over eyes; in temples; above l. eye; in both ears; in r. side of throat; in whole body and limbs; in chest; in tonsils; in head, back and limbs; in pit of stomach; in l. side of abdomen and pelvis; in ovaries; in abdomen; in track of colon; in uterine region and down thighs; in r. thigh and uterus; in small of back; in nipples; in chest and throat; in back of neck; from l. shoulder to r.; in r. hip and leg; in labia.

Excruciating pain: in prepuce.

Unbearable pain: in head; across supraorbital region.

Violent pain: in r. shoulder.

Terrible pain: in vertex; in l. labia while urinating.

Very severe pain: in forehead; in head; in r. ovarian region; in entire uterine region; in lower part of back.

Intense pain: in urethra; in l. ovary; in vulva.

Intense sharp pain: in l. side of abdomen.

Acute pain: on r. side of throat then in l.; in l. groin, extending to l. side to crest of ilium.

Sharp, incisive pain: between scapulæ, passing through to sternum.

Sharp pain: on top of head coming from nape of neck; in arm below shoulder; in l. hand; in cardiac region; in r. ovarian region; beginning in l. ovary and darting like lightning either towards r. ovarian region, or else up l. side and down arm, or sometimes down both thighs, generally down l. leg to foot; in region of heart.

Sharp pains like knives: cutting upwards from os uteri.

Lancinating: in chest.

Cutting: through tonsils.

Stabbing: in r. lung.

Darting stabbing: from one side of head to other.

Darting: from occiput to forehead; in rectum; in r. ovarian region; in knees and ankles.

Shooting: to ears; in abdomen; down into thighs.

Piercing: on vertex.

Beating: from occiput to forehead; in stomach and bowels; in small of back.

Throbbing: in temples; in region of solar plexus.
Bruised, smarting, lancinating pains: in both joints and in lumbar region; in l. hip.
Bruised pain: in soles of feet.
Pricking stitching: in throat.
Bearing down pains: in abdomen.
Neuralgic pains: in shoulders.
Burning: in r. hypochondriac region and corresponding part in back; in l. ovarian region.
Aching: in throat; in l. ear; in lumbar region; in breasts; in neck; in whole spine; in arms and shoulders; in limbs and back.
Rheumatic pain: in r. hip; knee joints; l. hip; along sciatic nerve.
Wandering pains: in nape with stiffness.
Gnawing pain: in l. upper canine; in tonsil.
Heavy dull pain: in forehead.
Heavy pain: in eyeballs.
Severe pressure: on brain.
Sick headache: beginning in nape gradually settling in r. or l. forehead.
Intense painful soreness: of vulva extending to anus.
Smarting: in r. groin; in urethra.
Intense heat: of throat; of palms; of abdomen.
Burning: in l. eye: in epigastric region; in abdomen; in hands and feet.
Soreness: of head; of pimples on scalp; on r. side of septum of nose; of l. superior maxillary; of throat; of uvula; of r. ovary; of uterus; of breasts.
Heat: in small of back.
Rawness: in throat.
Sensitiveness: of entire spine.
Trembling, jerking, fluttering: through lungs, with numb, prickling sensation all over body, legs and arms.
Burnt and drawn feeling: in throat.
Distressed feeling in throat: when speaking.
Poisoned feeling.
Pressure: from within outwards in abdomen.
Stuffed feeling: in head.
Feeling of fulness and choking: in throat.
Weight and dragging: in l. side of abdomen.
Constriction: in upper part of throat; of chest.
Tension: in groin.
Stiff feeling: in throat.
Stiffness: of ankle, knee and hip joints.
Numbness: of leg.
Pricking: in throat; through tonsils; all over body, arms and legs.

Digitized by Google

Tingling: on vertex.
Tickling: in throat; in upper anterior part of larynx.
Trembling: of l. hand; of leg; through r. thigh.
Weak, sinking feeling: at stomach pit.
Itching: of head; of prepuce; in l. side of labia; of sore on r. leg.

[44] **Tissues.** Enlarged glands after scarlatina; cold indurations, as found in scrofulous children.
Red, glistening appearance in ulcerations.
Neuralgia and acute pains; rheumatism; gout; syphilitic sciatica; sexual debility.
Rickets; scrofula; diphtheria.
Sequelæ of diphtheria and syphilis.

[46] **Skin.** Sensation as if an insect was crawling on shoulders and neck, occasionally on hands.
Herpetic eruption in both axillæ, with light brownish scab, extremely painful when washing; eruption most in r. axilla, and in both instances appeared day previous to pain in labiæ, which was followed by a discharge of blood from vagina.
On face, hands, neck and chest, bright scarlet eruption, exactly like scarlatina. θDiphtheria.
Throat full of large foul, grey yellow patches; deglutition especially painful after sleep and from swallowing fruits (acid); lumpy sensation felt in middle of throat; unrest, delirium with undefined fears; considerable bright red, fine eruption on face and chest; itching with dry skin. θScarlatina.
Bright scarlet redness on chest and around neck; next day all over body except legs, which were, however, covered that night; skin in large patches assumed dark red color bordering on purple, as seen in malignant cases, while whole body seemed swollen. θDiphtheria.
Diphtheria with or following scarlatina.
Ichthyosis, with branlike desquamation of skin.
Shining, glazed and red appearance of ulcers on shin and wrist. θSyphilis.
Very small blotches like fleabites. θDiphtheria.
Small blotches on chest, wrists and r. knee.
Several boils on l. side. θSick headaches.
Crusts on skin, under which greyish yellow matter formed and was squeezed out.

[47] **Stages of Life, Constitution.** From eight patients, seven were spare and dark, the eighth blonde.

Soreness and scabbing of nostrils (*Kali bich., Thuja*).
Lips dry and peeling off (*Natr. mur.*).
Gums ulcerated, bleeding; teeth loose (*Iodum, Kali carb, Lycop., Mercur., Natr. mur., Phosphor., Staphis., Zincum*).
Throat: sensitive to touch externally (*Laches.*); < by empty swallowing (*Ignat.*).
Breasts sensitive: to pressure (*Calc. ostr., Murex*); to deep pressure (*Mercur.*); as if full of very hard lumps, very painful when going up or down stairs (*Bellad., Calc. ostr., Carbo an., Lycop., Nitr. ac., Phosphor.*); soreness and enlargement (*Bellad., Bryon., Calc. ostr.*).
Sore throat commencing on l. tonsil (*Laches.*).
Small round or irregular, grey white ulcers on tonsils and fauces (*Merc. jod.*).
Coarse shreds of membrane in throat; diphtheria (*Kali bich.*); discharges of diphtheritic matter from vulva and rectum (*Apis*).
Empty, weak feeling in stomach pit (*Digit., Ignat., Petrol., Sepia*); pain as from a stone or undigested food in stomach pit (*Kali bich.*).
Pain in r. ovarian region (*Apis, Lycop., Pallad.*).
Sensation as if breath would leave her when lying down; has to jump up and stir around (*Grind. robusta*).
Cramps in feet (*Lycop., Petrol., Silicea, Sulphur*).
Sciatica (*Curare, Graphit., Gnaphal., Kali bich., Iris vers., Laches., Phytol., Tellur.*).
Intense fever in morning, with perspiration (*Eupat. perf.*).
When walking, seems to be walking on air; when lying, does not seem to touch bed (*Asar., China, Coffea, Natr. mur., Nux vom., Opium, Rhus tox., Spigel., Stramon., Thuja*).
Dreams of going on a journey (*Lac. deflor., Laches., Sanguin., Silica*).
Icthyosis, with branlike desquamation of skin (after *Sulphur.* and *Psorin.* had failed).

LAC VACCINUM DEFLORATUM.

Cow's milk skimmed.

The idea of potentizing skimmed milk originated with Swan upon reading Doukin's Skim Milk Treatment for Diabetes and Bright's Disease. The first proving was made by a lady in New York, in whose case the headache with nausea and constipation were strongly marked. A subsequent, more extensive proving was made under Swan by Dr. Laura Morgan. See Swan's Mat. Med. of Nosodes and Morbific Products, arranged by Berridge.

With but few exceptions the symptoms in the following arrangement have received clinical verification.

CLINICAL AUTHORITIES.—*Headache*, Farrington, Farrington's Clinical Mat. Med., p. 28; Laura Morgan, Boardman, Org., vol. 2, p. 257; Hahn. Mo., vol. 10, p. 220; *Periodical sick headache*, Morgan, T. H. M. Soc. Pa., 1881, p. 105; *Hemicrania*, Hahn. Mo., vol. 10, p. 220; *Chronic constipation* Schley, Swan, Hahn. Mo., vol. 10, p. 321; Knerr, MSS.; *Fainting spells*, Laura Morgan, Org., vol. 2, p. 256.

[1] **Mind.** Loss of memory; listlessness and disinclination for either bodily or mental exertion.

Depression of spirits; don't care to live; question as to quietest and most certain way of hastening one's death.

During conversation, headache and depression of spirits >.

Depression with crying and palpitation. θFainting spells.

Imagines that all her friends will die and that she must go to a convent. θFainting spells.

Does not want to see or talk to any one.

Can remember what has been read only by a strong effort of will.

Vacillation of mind.

Great despondency on account of the disease, is sure he is going to die in twenty-four hours.

Has no fear of death but is sure he is going to die.

[2] **Sensorium.** Head light, with throbbing in temples.

Vertigo: on moving head from pillow; < lying down and especially turning while lying, obliging to sit up.

Head feels heavy with marked tendency to fall to r. side.

Faintness and nausea when stepping upon floor in morning.

At first a sharp pain at apex of heart, as though a knife was cutting up and down; this lasts a few seconds and is followed by strange feeling in head; forehead feels extremely heavy, with dull sensation over eyes, and con-

Digitized by Google

siderable throbbing, most marked on each side of head; rest of head feels very light; dimness of vision; can only distinguish light, not objects; at same time great loss of strength; cannot stand, but falls backwards, and remains entirely unconscious for two or three minutes; weakness passes off gradually, and is followed by crying, palpitation of heart and great depression of spirits; imagines that all her friends will soon die, and that she must go to a convent; she can produce an attack at any time by extending arms high above head, or by pressure around waist; spells come on at 7.30 P.M. θFainting spells.

[3] **Inner Head.** ▮Pain first in forehead, then extending to occiput, very intense, distracting and unbearable; great photophobia, even to light of candle; deathly sickness all over, with nausea and vomiting, < by movement or sitting up; very chilly, and external heat does not >; frequent and profuse urination of very pale urine. θSick headache.

▮After light breakfast, pain in forehead, with nausea; very pale face, even lips looked white; vomiting of ingesta and afterwards of mucus and bitter water; deathly sick feeling in pit of stomach, < rising up in bed; profuse urination every half hour; urine colorless as water; great thirst; intense throbbing pain in vertex. θHeadache.

▮After injury subject to distress in head; severe pain in forehead just above eyes; breath offensive; appetite poor, nausea; at times sleeps for hours during attack; great distress across back; urine dark and thick.

▮Nausea, and sometimes vomiting, which >; pain in forehead as if head would burst, with blindness; pain is > by bandaging head tightly; < by light and noise; constipation, stools large; hands and feet cold. θHemicrania.

▮Periodical pain in forehead, as if head would burst, accompanied by violent efforts to vomit, and more rarely vomiting; hands and feet cold; diarrhœa alternating with constipation, the latter predominating; loss of appetite; smell or thought of food causes nausea; tongue moist, coated white; thirstlessness; always < at menstrual period; menses scanty and accompanied with colic. θHeadache.

▮Attacks come every eight days; during attack can neither eat nor drink, nor endure light or noise; does not even like to speak; great prostration, < during menstruation; when pains subside, inflammation of tonsils appears; tongue white and no relish for food. θHeadache.

Digitized by Google

Throbbing frontal headache, nausea, vomiting and obstinate constipation; especially in anæmic women.

Severe frontal headache; nausea and sometimes vomiting upon rising in morning, or from recumbent position at any time, or upon moving; great constipation; constant chilliness even when near fire; urine profuse and watery, or scanty and high colored; intense pain throughout whole spinal column; excessive thirst for large quantities; great depression of spirits; sudden prostration of strength at 5 P.M.; skin color of red rose, with swelling of face, neck, arms and body, generally in morning and during day and evening. θHeadache.

Severe pain over eyes, with intense throbbing in both temples; eyes feel as if full of little stones; eyeballs intensely painful, and on shutting eyes, pressure of lids increases pain; edges of lids feel contracted, and convey sensation as of a narrow band drawn tightly across eyeball; pain over l. hip; constipation and profuse urination during paroxysm. θHeadache.

Dimness of vision, as of cloud before eyes; profuse urination; full feeling in head; slight nausea at pit of stomach; face pale; feet cold; coldness in back.

Pain commencing in and above inner end of r. eyebrow; before rising in morning; soon after rising pain passed into eyeball; < until afternoon, at which time it became unbearable; < by walking and particularly by sitting down, though done carefully, also by heat radiated from fire or stooping, > on pressure; pressure on temples disclosed strong pulsation of artery; pain ceased entirely at sunset and did not return till next day.

Intense pain at point of exit of supraorbital nerve, diffused thence over forehead; attack commences with chill, quickened pulse, flushed face and discharges of wind from stomach.

Pains so severe that she would bury her eyes in her hands and press them into pillow. θSick headache.

Severe headache for years; severe pain over eyes; intense throbbing in temples.

General sore pain of head, produced by coughing.

Severe headache with a sensation as if top of her head was lifted off and was raised about five inches, and brains were coming out; head feels very hot and motion increases pain; face felt as if flesh was off bones and edges were separated and sticking out.

Pain first in forehead, extending through occiput, making her nearly frantic.

Intense headache in forehead and through head, < in vertex, afterward head felt bruised.

Digitized by Google

‖In morning nausea and sensation of a round ball full of pain in centre of forehead.
‖Throbbing in temples.
‖American sick headache, with gastric symptoms.

[4] **Outer Head.** ‖Head feels large as if growing externally. Head heavy, falling to r. side.
‖‖General sore pain of head produced by coughing.

[5] **Sight and Eyes.** ‖Dimness of vision; can only see lights, not objects; preceding headache.
‖Sensation as if eyes were full of little stones. θHeadache.
‖‖Great photophobia, even candle light unbearable.
Intense vertigo when opening eyes while lying, < when raising up; objects appeared to move swiftly from l. to r., at other times moving as if tossed up from below in every direction.
‖Great pain in eyes on first going into light, soon passed off; on closing eyes on account of light, pain was felt in eyeballs as if from pressure of lids.
‖Pain in and above eyes.
‖On closing eyelids painful pressure as if lids were short laterally, causing sensation of band pressing upon balls.
‖Upper eyelids feel very heavy; sleepy all day.
‖Pain in head, most marked over l. eye and in temple, extending into eyes, and causing profuse lachrymation.

[7] **Smell and Nose.** ‖Painful pressure or tightness at root of nose. θCatarrh.

[8] **Upper Face.** Deathly paleness of face.
‖Wasted, thin and excessively sallow, with dark stains beneath eyes.
‖Sallow complexion with eczematous eruption.
‖Flushes of heat in l. side of face.
‖Face, neck, arms and body generally flush color of a red rose, with swelling, but no itching or burning.
‖Sensation as if all flesh was off bones of face and edges were separated and sticking out.
‖‖Pimples on face and forehead. θIrregular menses.

[10] **Teeth and Gums.** ‖Grinding of teeth when asleep, with pain in stomach and head with vomiting.

[12] **Inner Mouth.** ‖‖Mouth very dry.
‖Breath very offensive.
‖Mouth clammy and frothy, especially during conversation.

[13] **Throat.** ‖Globus hystericus; sensation of a large ball rising from a point about lower end of sternum to upper end of œsophagus, causing distressing sense of suffocation.
‖Sore throat < when swallowing; slight, hacking cough.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Entire loss of appetite.
‖Great thirst for large quantities and often; intense thirst.

Digitized by Google

[15] **Eating and Drinking.** ‖Could not drink milk without its causing sick headache.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Sour eructation.

‖‖Nausea in morning.

Nausea from a recumbent position at any time during day or evening, or upon moving or rising in morning.

‖Deathly nausea, cannot vomit, with groans and cries and great distress, great restlessness with sensation of coldness; although skin was hot, pulse was normal.

‖Nausea and vomiting and a sensation of deathly sickness, < from movement or rising up in bed.

‖Vomiting first of undigested food, intensely acid, then of bitter water and lastly of a brownish clot, which in water separated and looked like coffee grounds; no smell; bitter taste.

‖Incessant vomiting, which had no relation to her meals.

[17] **Scrobiculum and Stomach.** ‖Violent pain in pit of stomach, seldom lower, brought on by fatigue.

‖A good deal of wind and acid stomach, no tenderness.

‖‖Dyspepsia.

‖Bloating in epigastric region, with attacks of asthma; he could scarcely breathe; hard pressive pain at about fourth cervical vertebra.

[18] **Hypochondria.** ‖Cramps in epigastric region.

[19] **Abdomen.** ‖‖Abdomen sore and sensitive to touch.

‖Severe pain across umbilicus with headache.

‖Great fatigue from walking, on account of heaviness as of a stone in abdomen.

‖Constant pain in frontal region; nausea in morning, deathly paleness of face on rising in morning; aching pains in wrists and ankles; puffy swelling under malleoli; drawing pains, with heat, across lower abdomen and bearing down; frequent, scanty, pale urine; pressive bearing down in both ovarian regions; cannot bear pressure of arm or hand on abdomen; slight yellowish leucorrhœa; great lassitude and disinclination to exertion; depression of spirits; does not care to live; questions as to quickest and most certain mode of hastening one's death; great fatigue from walking, on account of heaviness, as of a stone in abdomen.

‖‖Drawing pain across lower part of abdomen, with heat and pressing, bearing down in pelvic region, both sides; cannot bear pressure of hand or arm on abdomen.

‖Flatulence.

‖Chronic gastro-enteritis, symptoms of chronic diarrhœa and vomiting.

[20] **Stool and Rectum.** ‖Frontal headache; deathly sickness,

Digitized by Google

with or without vomiting; pale face in morning, also lips and tips of fingers white; coldness over whole body. θConstipation.

‖Is generally constipated, and when it is most persistent very chilly; cannot get warm.

‖Frequent but ineffectual urging to stool.

‖‖Constipation: with chronic headache; most powerful purgatives were of no avail; fæces dry and hard; diarrhœa; stool large and hard, passed with great straining, lacerating anus, extorting cries and passing considerable blood; chronic.

‖‖Continual persistent constipation, > only by cathartics and enemas, with violent attacks of sick headache, pain first in forehead then extending to occiput, very intense, distracting and unbearable; great photophobia, even to light of a candle; deathly sickness all over, with nausea and vomiting < by movement or sitting up; chilly, and external heat does not relieve her; frequent and profuse urination of very pale urine.

♃ **Urinary Organs.** ‖Frequent but scanty urination.

‖Profuse, pale urine.

‖‖Albuminuria.

‖Constant pain in region of kidneys, passing around each side above hips to region of bladder, also downward from sacral region to gluteal, and from thence down back of thighs; pain burning, not > in any position, < lying down.

‖Urine very dark and thick.

Urine very pale; cannot retain it.

‖‖Urine comes away drop by drop, or else gushes out with a sensation of very hot water passing over parts; wetting bed at night.

♃ **Female Sexual Organs.** ‖Pressive bearing down in ovarian region.

‖Drawing pain across uterine region, with heat and pressive bearing down in both ovarian regions; cannot bear pressure of hand or arm on abdomen, intense distress in lower part of abdomen during menstruation, not > by any position; violent inflammation in ileo-cæcal region, with intense pain, swelling, tenderness, fecal accumulation and violent vomiting.

‖Menses delayed a week with congestion of blood to head; coldness of hands, nausea and vertigo; flow commenced next morning after taking *Lac defl.*, scanty with pain in back; sensation of weight and dragging in l. ovarian region.

‖After putting hands in cold water sudden suppression of menses; pains all over, especially in head.

Digitized by Google

| | Irregular menstruation, sometimes very dark and scanty, sometimes colorless water.
| | Slight yellowish leucorrhœa.

[24] **Pregnancy. Parturition. Lactation.** | Morning sickness during pregnancy; deathly sickness at stomach on waking; vertigo and waterbrash on rising; constipation.
| | Decrease in size of breasts.
Has never failed to bring back the milk in from twelve to twenty-four hours.
| Diminished secretion of milk.

[26] **Respiration.** | Asthma so that he could scarcely breathe, accompanied by bloating in epigastric region.

[27] **Cough.** | | Short, dry cough, with difficult expectoration of a small lump of mucus, which > cough.

[28] **Inner Chest and Lungs.** | Soreness of chest with great pressure.
| Tuberculous deposit in apices of both lungs.

[29] **Heart, Pulse and Circulation.** | Pressure around heart (not like grasping of *Cactus*), with dyspnœa and a feeling of certainty that he is going to die in 24 hours.
| Sharp pain in apex of heart, as if a knife was cutting up and down; this preceded a heaviness of head, dulness over eyes, throbbing in temples and palpitation of heart.
| Palpitation of heart and flushes of heat, especially in l. side of face and neck.

[31] **Neck and Back.** | A symmetrical patch of herpetic eruption on each side of neck, itching and burning after scratching.
| Hard, pressive pain at fourth cervical vertebra; chills creeping along back between scapulæ.
| | Intense burning pain in small of back and sacrum, commencing in region of kidneys, passing around on both sides above hips into groins, also downward from renal region through gluteal region, down back part of thighs; pain, burning, and > by no position; lying down.
| Constant pain in small of back.

[32] **Upper Limbs.** | | Ends of fingers icy cold, rest of hand warm.

[33] **Lower Limbs.** | Numbness and loss of sensation over outer and anterior surfaces of thighs.
| Pains passing down under side of thighs to heels, and pains across top of feet as if bones were broken across instep; pains would come on as soon as she stepped upon floor in morning, upon which she would be faint and nauseated and would have to lie down.
| Weakness and aching in ankles, puffiness.
| Skin thickened at edges of feet.

[34] **Limbs in General.** | | Cold hands or feet during headache.
| | Aching pains in wrists and ankles.

[35] **Rest. Position. Motion.** No position >, burning pain in urinary region.

Lying down: vertigo <; severe frontal headache; burning pain in urinary region <.
Sitting up: sick headache <; deathly sick feeling in pit of stomach <; nausea and vomiting.
Obliged to sit up: vertigo.
Sitting down: pain in eyeball <.
Cannot stand: falls backwards unconscious.
Motion: sick headache <; headache; pain in head <.
Disinclination to exertion.
Moving head from pillow: vertigo.
Turning while lying: vertigo <.
Rising: in morning, deathly paleness.
Extending arms high above head: produces fainting spells.
Stepping upon floor: faintness and nausea.
Walking: pain in eyeball <; great fatigue.

[36] **Nerves.** ‖Great lassitude and disinclination to exertion.
‖Great restlessness and extreme and protracted suffering from loss of sleep at night.
‖Feels completely tired out and exhausted, whether she does anything or not; great fatigue from walking.
‖Great loss of strength, commencing with a sharp, cutting pain in apex of heart; forehead feels heavy, with a dull sensation over eyes and throbbing, principally in temples, rest of head feels light.

[37] **Sleep.** ‖Sleepy all day long.
Great restlessness, extreme and protracted suffering from loss of sleep at night.

[38] **Time.** Morning: when stepping upon floor, nausea and faintness; nausea and vomiting; headache; before rising pain in eyebrow; as of a round ball full of pain in centre of forehead; deathly paleness.
During day: headache.
Afternoon: pain in eyebrow and eyeball <.
5 P.M.: sudden prostration of strength.
7.30 P.M.: fainting spells.
9 P.M.: hot fever.
Evening: headache.
Night: sleepless.

[39] **Temperature and Weather.** ‖Sensation as if cold air was blowing on her, even while covered up warm.
External heat: does not > chilliness; pain in eyeball <.
Cold water: putting hands in, sudden suppression of menses.

[40] **Fever.** ‖Hot fever 9 P.M., continues until near morning, wakes in profuse sweat, which stains linen yellow difficult to wash out
‖Hectic fever; malignant typhoid.
‖Sensation as if the sheets were damp.

[41] **Attacks, Periodicity.** Periodical pain: in forehead.

Digitized by Google

Every half hour: profuse urination.
Sunset: pain in eyeball ceases.
Every eight days: attacks of sick headache.
Menstrual period: colic.

" **Locality and Direction.** Right: tendency to fall to side; pain in and above inner end of eyebrow; head heavy, falls to side.

Left: pain over hip; over eye; flashes of heat in side of face; sensation of weight and dragging in ovarian region.

From l. to r.: objects appear to move.

" **Sensations.** As though a knife was cutting up and down through heart; as if head would burst; eyes feel as if full of little stones; sensation in lids as of a narrow band drawn tightly across eyeball; as of a cloud before eyes; as if top of head was lifted off; as if flesh was off bones of face, and edges were separated and sticking out; as of a ball of pain in centre of forehead; head as if growing externally; objects appear as if tossed up from below in every direction; pain in eyes as if from pressure of lids; as if eyelids were short laterally, causing sensation as of a band pressing upon balls; as of a large ball rising from a point about lower end of sternum to upper end of œsophagus; as of a stone in abdomen; as if bones were broken across instep; as if sheets were damp; as if cold air was blowing on her.

Pain: first in forehead, then in occiput; over l. hip; above inner end of r. eyebrow; in eyeball; in stomach; in region of kidney passing around each side above hips to region of bladder, also downward from sacral region to guteal, and from thence down back of thighs; in back; all over; in small of back; down under side of thighs to heels; across top of feet.

Distracting, unbearable pain: in forehead and occiput.

Intense pain: throughout spinal column; in eyeballs; at point of exit of supraorbital nerve; in forehead and through head.

Violent pain: in pit of stomach.

Severe pain: in forehead just above eyes; in head; across umbilicus.

Sharp pain: at apex of heart.

Great pain: in eyes.

Intense distress: in lower part of abdomen.

Throbbing: in temples; in vertex.

Intense burning pain: in small of back and sacrum.

Burning pain: in urinary organs.

Cramps: in epigastric region.

Drawing pains with heat: across lower abdomen.

Aching pains: in wrists and ankles.

Digitized by Google

Sore pain: of head; in throat.
Hard, pressive pain: at about fourth cervical vertebra.
Painful pressure: at root of nose.
Constant pain: in frontal region.
Periodical pain: in forehead.
Soreness: of abdomen; of chest.
Pressive bearing down: in ovarian region; in pelvic region.
Pressure: around heart.
Heaviness: of head.
Heavy feeling: in forehead.
Dull sensation: over eyes.
Itching: of eruption on neck.

44 **Tissues.** Perverted and deficient nutrition.
Loss of weight.
Obesity.
Dropsy: from organic heart disease; from chronic liver complaint; far advanced Bright's disease; following intermittent fever.
Asthma; emphysema; pulmonary catarrh.
Obstinate neuralgia caused by derangement of abdominal organs, intestines and liver.
Fatty degeneration.
Diseases with faulty nutrition, in consequence of obscure subacute inflammation of stomach or intestines, followed by affections of the nervous centres.

45 **Touch. Passive Motion. Injuries.** Touch: abdomen sensitive.
Pressure: around waist, produces fainting spells; pain in eyeball >; presses eyes into pillow with severe pain; cannot bear it on abdomen.
Bandaging head tightly: < pain.
After injury: subject to distress in head.

46 **Skin.** A symmetrical patch of herpetic eruption on each side of neck, itching and burning after scratching.

47 **Stages of Life, Constitution.** Girl, æt. 13, dark hair, sick headache; sciatica.
Girl, æt. 17, light hair, blue eyes, one to three attacks every week, suffering three years; fainting spells.
Girl, æt. 18; irregular menstruation.
Woman, had been in habit of taking ten or twelve enemas every day, and often passed four or five weeks without action of bowels, suffering fifteen years; chronic constipation.
Woman, small, slender, nervo-bilious, mother of four children, attacks came at least once a month, and for last two years every Saturday, suffering sixteen years; hemicrania.
Man æt. 22, musician, strong, active; chronic constipation.

Digitized by Google

Woman, æt. 29, tall, thin, mother of two children, light hair and blue eyes, suffering from youth; headache.

Woman, æt. 30, nervo-sanguineous temperament, suffering two years; headache.

Woman, æt. 32, small sized, mother of four children, suffering seven years; headache.

Woman, æt. 40, attacks two or three times a week, lasting 12 to 24 hours, during which she is unable to do anything; headache.

Woman, æt. 40, has been for several years subject to continual, persistent constipation, > only by cathartics and enemas; violent sick headaches.

Man, æt. 49, at age of 21, fell from a roof and was carried home insensible, since then subject to spells, which, as he advanced in years, became more frequent, sometimes occurring every week; headache.

Woman, æt. 71, very stout, suffering for some years; headache.

LACHESIS.

The Surukuku Snake of South America. *Ophidia.*

The first trituration, and first dilution in alcohol, of the snake poison, Trigonocephalus Lachesis, was made by Hering, on July 28th, 1828.

The first cases were published in the Archives, in 1835. In 1837 this remedy was introduced into our Materia Medica. See Effects of Snake Poison, by C. Hering, Denkschriften der Nordamerikanischen Akademie der homöopathischen Heilkunst, Allentown, Pa.

Provings by Hering, and under his direction by Stapf, Bute, Bauer, Behlert, Detwiller, Gross, Kummer, Reichhelm, Roenig, Wesselhoeft, Kehr, Koth, Matlack, De Young, Helfrich, Schmoele, and Lingen. Later provings were made by Robinson, Fellows (Fincke, not contained in Encyclopedia), Bartlett, Metcalf and Berridge. See Allen's Encyclopedia, vol. 5, p. 432.

CLINICAL AUTHORITIES.—*Maniacal jealousy*, Woost, Rück. Kl. Erf., vol. 5, p. 6; *Delirium tremens*, Hering, Rück. Kl. Erf., vol. 1, p. 143; *Melancholy*, Guernsey, Raue's Rec., 1871, p. 49; *Melancholia after confinement*, MSS.; *Mental disorder*, Berridge, Raue's Rec., 1872, p. 51; Hom. ---

NOTE.—A circular letter issued by Dr. Hering, in 1878, soliciting contributions of clinical matter, provings, etc., for a full collection of reports wherewith to celebrate the Fiftieth Anniversary of the introduction of Lachesis, was freely and generously responded to by numerous members of the profession, whose names appear in the list of Clinical Authorities, followed by the abbreviation MSS. The author did not live to finish his intended Monograph, but all that is essential and of guiding value in Lachesis is embodied in our arrangement.—EDS.

or table; takes hold of some furniture, and with greatest difficulty pulls himself forward; afraid of everybody, thinks everybody conspires to kill him; afraid of medicine, won't take any; partial paralysis on r. side.

Headache in l. frontal eminence, deep internally.

Left sided orbital neuralgia; lachrymation; previous to paroxysm rising of heat to head; during intervals a weak, nauseous feeling in abdomen.

Semilateral headache on r. side, creeping gradually towards l., until it goes around head; twitching in eyes when they are fixed upon an object; menses irregular, one week ahead of time; tardy digestion; constipation; frequent nausea; pain deep in orbit and over eyes, which are red and injected. θCephalalgia.

Every three or four days intense headache; pain throbbing and oppressive, chiefly in r. half of head, extending down same side of neck, which generally feels stiff and sore; pain < at catamenial period, which is attended with much aching across loins; menses dark and profuse, lasting eight to nine days.

One sided tensive headache, drawing from neck over head to eyes; vomiting; stiffness of neck; tenderness of scalp.

Headache on r. side, extending to neck and shoulders, with tension in muscles.

Tearing pain in whole l. side of head, from temple to collar bone; tears flow continually; pain without intermission; some nightly aggravations; > from warm applications; paralytic state of tongue; it inclined to affected side; could hardly speak; painful weariness of face, head and neck; tongue feels as if bound or tied up. θNeuralgia.

Cutting headache as if a part of r. side of head was cut off, < after rising or ascending; > from heat and after belching.

Hemicrania with giddiness, paleness of face, general sensation of stiffness and pain in l. side of abdomen.

Tearing on top of head from within outward; dizzy, face pale; faint, numb; face sunken, or bloated and red.

Pressure on top of head with hot throbbing of temples; constipation; any excitement causes headache; no catamenia for two months. θClimaxis.

Boring pain on vertex, nausea and vomiting. θItch.

Beating headache with heat, < on vertex and r. side, or over eyes; preceding a cold in head, with stiff neck.

Headache which had lasted six weeks; pain at first began in vertex, then extended over r. side of head and over face, with pricking as from needles in limbs of same side; < in afternoon.

Digitized by Google

Violent pressing, burning pain in top of head, from within outwards.
Burning vertex headache during menopause.
Boring and sticking on vertex.
Dull aching in sinciput.
Beating throbbing in vertex; with every movement.
Weight and pressure on vertex.
Congestion to head with other complaints.
Throbbing in head from least movement; red face.
Headache, with rush of blood to head.
Pressive headache, with nausea.
Dizzy, pressive headache; < on stooping.
Violent headache, with flickering before eyes.
Headache in sun, glimmering sight.
Headache preceding coryza.
Headache: catarrhal; congestive; from sunstroke; hysterical; rheumatic; menstrual; epileptic.
Terrible headache; nightly pain in limbs. θSyphilis.
Pain as if swollen in angle in front of styloid process, < from pressure.
Heaviness like lead in occiput; can scarcely raise it from pillow, in morning after waking, with vertigo.
Boring pain behind l. ear, with nausea and vomiting.
Feeling in back of head as if pressed asunder.
Numbness in occiput, with pain in forehead; on touching throat, darting from throat to occiput; chest feels dry.
Headache from occiput to eyes.
Headache every eight or ten days; toward evening pain in back of head, at first dull and gradually concentrating, acute boring behind l. ear, apparently at juncture of temporal, parietal and occipital bones; when boring pain reaches its height, generally towards morning, vomiting of food and slime; stitches in chest.
Soreness at vertex, gradually spread over r. side of head and face; same sensation, with pricking pains like pins and needles, in upper and lower extremities of same side; mouth very sore; cannot masticate food without great pain; after desire to micturate cannot retain urine; coughing produces flow of urine; < in afternoon, when soreness frequently changes to a sudden, darting pain in arm; drops things; slight vertigo.
Inflammatory conditions of brain; great vascular and nervous erethism.

Outer Head. Numbness and crawling on l. side of head, as in whole l. side.
Painful sensitiveness in l. temple from vertex down, and in l. half of face, when touched, or on moving muscles; sensation as if skin had been burnt by heat of sun.

Stoppage or stricture of Eustachian tube.
In evening, pain deep in l. ear; < from motion of temporal or masseter muscles; left in a few minutes and appeared just above l. external malleolus; < on stepping.
In night earache in r. ear, > by external warmth and lying on r. side.
Annoying pulsations in ear. θCarotid aneurism.
Tearing extending from zygoma into ear.
Pains in ears with sore throat.
Earwax too hard, pale and insufficient; whitish, like chewed paper.
Polypus of ears.
Soreness and crusts around ears.
Threatened abscess of parotid gland. θTyphoid.
Ears excessively sensitive to wind.

[7] **Smell and Nose.** Nosebleed: dark; with amenorrhœa; before menses; typhus; blowing of blood, mostly in morning; trickling on blowing; from both nostrils; on swallowing, sensation as if tonsils were sore, like a wound, with stinging through ears.
Nasal, indistinct speech. θTyphoid.
Coryza preceded by headache; discharge watery, with red nostrils, herpes on lips.
Coryza preceded one or two days by a feeling of soreness, rawness and scraping in throat.
Scabs in nose; redness of point of nose.
Catarrh with sticking headache; stiffness of neck.
Swollen nasal mucous membrane; discharge of blood and pus. θCoryza.
Feeling of lump in throat; on swallowing, lump descends but immediately returns. θCoryza.
Mu ous membrane of nose thickened, much sneezing; dry, stuffed feeling through front of head; gradually passes to fauces and chest; constant cough short and dry, with wheezing, face red and puffed, while eyes seemed almost pressed out. θHay asthma.
Many symptoms end with nasal catarrh.
Obstruction of nose, with buzzing in ears; headache; ill humor and inability to drink.
Complaints after suppressed coryza.
Undeveloped coryza with headache and mental worry.
Thick, yellow discharge in morning, sometimes streaked with blood, offensive; hawking; falling of mucus from posterior nares; l. side only; discharge of hard plug of mucus. θChronic nasal catarrh.
Pus and blood from nose.
Discharges offensive, sanious, corroding nostrils and lips.
Sudden discharge of pus and blood from nose, as from a

bursting abscess, seems to come from frontal cavities. θOzæna syphilitica.

‖Soreness of nostrils and lips.

‖Internal soreness of nose, and nose filled with scabs. θMercurio-syphilitic cases. θDrunkards.

‖Inflammation of nose with pimples and blisters.

‖Nose pointed, reddish, as if sore, and always some fluent coryza. θAngina syphilitica.

‖Red nose of drunkards.

‖Vesicular eruption about nose.

[6] **Upper Face.** ‖Expression: of pain, with sopor; idiotic; epileptic; distorted; haggard.

‖Features distorted, face dark and much swollen, appeared almost in an apoplectic fit; had removed everything from his neck, saying he could bear nothing to touch it; could hardly breathe. θBee sting.

‖Haggard, face of unnatural color, cheeks yellow, with traces of red vessels visible and spots of circumscribed red; nose pointed and red, as if raw from a sore; nose always stuffed up.

‖Face pale: fainting; headache; before epileptic attack.

‖Blue circles around eyes.

‖Countenance deeply sallow. θScarlatina.

‖‖Yellow complexion, vermilion redness of cheeks, or small red bloodvessels shining through skin. θSyphilis.

‖Earthy, livid, cachectic complexion. θAbdominal troubles.

‖Bluish, purplish appearance of face, inability to bear anything around neck; cerebral symptoms. θScarlatina.

‖Face not red, but very livid and bluish. θPuerperal fever.

‖Blue face and lips. θEmphysema.

‖Livid face. θMetritis.

‖Face puffed. ‖Mania.

‖Red face, as in apoplexy; bloated, red, with headache, pains in limbs, stomach, etc.

‖‖Flushes of heat. θDrunkards. θClimacteric period. θConstipation. θSuppresed menstruation.

‖One cheek flushed, the other pale.

‖Severe pain commencing in r. inner canthus, and extending upwards and outwards in a semicircle, just above superciliary ridge; dull, heavy, and prevents him working; commences 9 A.M. and goes off in afternoon; skin extremely sensitive to touch. θNeuralgia.

‖Neuralgia, l. side, orbital; rising of heat to face before, and weak feeling in abdomen after attack.

‖Neuralgia of trigeminus; horrible; heat running up in head previous to attack; weak, nervous feeling in abdomen during intervals.

‖Tearing pain in whole l. side of head, from temple down

as far as collar bone, so severe as to cause tears to flow continually; < at night; articulation almost impossible; when tongue is put out it inclines to affected side; painful weariness of head, neck and face; tongue feels as if bound or tied up. θNeuralgia.

Sensation of warmth rising into head, followed by tearing pain beginning in forehead, but particularly affecting l. malar bone and parts under l. eye, and occasionally extending into eye, causing lachrymation; attack lasts several hours, then disappears for a day or two, and then returns without any cause; weak sensation in abdomen during free days.

Feeling of stiffness in malar bone from cervical glands.

Left side of face and lower jaw swollen, sensitive to touch.

Cheeks swollen, skin tense, hot and crisp, as if it would crack. θPeritonitis.

Enormously swollen upper lip and nose; surface not changed from natural color; appearance that of puffiness, but hard to feel, much like swelling from a bee sting, or from a blow; vermilion border of lip a trifle more blue than natural; no pain or heat; menstruating.

Erysipelatous eruption beneath l. eye, which first itches at night; she was awakened with fright about trifles; in morning skin began to redden and swell, and became < after midday nap; next morning very thick and red, with incessant itching scarcely to be endured; whole lower lid swollen, red and itching.

Erysipelatous swelling of face; r. eye almost closed.

Erysipelas began close to l. side of nose, in a red, sore spot, then it became redder and extended up and down l. side of face; extends up as far as l. eye and is dusky; she feels languid.

Facial erysipelas, in a child a year old; inflammation partly involving scalp; on second or third day threatened metastasis to meninges; convulsive stiffening of child's penis.

Face swollen, bluish red or leaden hue; tongue dry, glossy, tremulous; < from noon until midnight. θErysipelas from a dissecting wound.

Erysipelas of face, with burning and itching, < after siesta; hammering headache.

Eruption in face followed by bluish spots.

Burning, swelling, redness and violent itching in face at night; later tetterlike cracks with oozing.

Facial herpes.

Itching in face.

Lower Face. Drawing, tearing, throbbing, boring pain in jawbones.

Digitized by Google

‖On opening mouth, cracking in submaxillary joints and sensitive as if swollen.
‖Great difficulty in opening jaws. θAngina faucium.
‖Lower jaw hangs down. θComa. θTyphus.
‖Frothing at the mouth. θEpilepsy.
‖Lips dry, black, cracked, bleeding. θDiphtheria. θFevers.
‖Enormous swelling of lips.
‖Furuncular formation on lips, pain and erysipelatous areola; rapid and excessive loss of strength, patient being reduced from vigor to absolute prostration in twenty-four to thirty-six hours. θMalignant pustule.
‖Mumps, particularly on l. side; enormously swollen, sensitive to least touch; least possible pressure causing severe pain; shrinks away when approached; can scarcely swallow; excessively peevish; throat sore internally; face red and swollen; eyes glassy and wild.
‖Threatened abscess of submaxillary gland. θTyphoid.
‖‖Submaxillary and cervical glands swollen. θDiphtheria.
‖‖Red suppurating blotches under jaw.

10 **Teeth and Gums.** ‖Teeth feel too long when biting them.
‖‖Raging, jerking, tearing, dull sticking in roots of lower teeth, through upper jaw to ear, periodic, after waking from sleep; soon after eating; from warm and cold drinks.
‖Boring, jerking, twitching, drawing, tearing, cutting, piercing, beating, pulsating pains in teeth.
‖‖Toothache: from eating; biting; something warm; drinking warm things or cold; during menstruation; when awaking; from getting wet; in the Spring; in Summer; > from external warmth; from cleaning teeth; with chilliness, heat, thirst; in persons who have taken too much mercury; with headache; with swelling of cheek; teeth too long, blunt.
‖Hollow teeth feel too long.
‖Pain in all decayed teeth during rush of blood to head.
‖Crumbling of teeth.
‖‖Gums swollen and spongy; easily bleeding.
‖Protruding gums, dark purple. θDentition.
‖Gums bluish, swollen, bleeding; aching < from warm drinks. θYellow fever.
‖‖Hemorrhage from gums.

11 **Taste and Tongue.** ‖Sour taste; everything turns sour.
‖Slow, difficult speech, tongue heavy, cannot open mouth wide; cannot pronounce some words.
‖‖Worse from speaking.
‖Stammering; letters *s*, *b*, *t* and *w*.
‖Stammering in a child, æt. 4; in talking draws face awry; closes r. or both eyes, opens mouth wide or closes it.

Digitized by Google

Stammering comes with second or third word or not in a whole period; it seems *p*, *v* and *a* had the most influence.

Puts tongue out with difficulty; tongue trembles.

Difficulty of moving tongue, with impossibility of opening mouth wide.

Tongue: lolling about in mouth; swollen, coated white; papillæ enlarged; dry, red, cracked at tip; red tip and brown centre; mapped; sensation as if it was going to peel; dry, black and stiff; tip cracked and bleeding; a deep red color; a dry stripe in middle; anterior half red, smooth and shining; black and bloody; sore on l. side, with sticking here and there; tickling at root, exciting cough; blistered about tip.

Blisters on inflamed tongue, change into ulcers, threatening suffocation; gangrene of tongue, on both edges.

Canker sores on tip of tongue; aphthæ.

Glossitis with titillation inducing cough.

Cancer of tongue.

[12] **Inner Mouth.** Bad odor, stench, from mouth. θStomatitis.

Sensation on roof of mouth as if mucous membrane was peeling off.

A bagging just in front of uvula, very soft, as if containing pus. θAfter diphtheria.

Burning pain in mouth with swelling of lips and gums.

Dryness in mouth with thirst.

Dryness of mouth and throat, accompanied by continued sensation in velum palati as if desquamation was about to take place. θHysteria.

Much slime in mouth, with flakes of blood of disgusting taste and smell.

Saliva abundant and tenacious. θScarlatina.

Constant salivation, which often interferes with speaking; cough; expectoration; if the latter occurs after dinner she frequently vomits her food.

Salivation with hawking and coughing. θSyphilitic ulcers in throat.

Much slimy saliva, especially in back part of mouth.

Aphthous and denuded spots in skin and flesh of mouth, preceded by burning pain and rawness.

Mouth very sore, parched and dry, and tongue somewhat swollen and covered with blisters on each side.

Cannot swallow food after masticating it, because it rests on back part of tongue and produces a thrilling pain there. θCancrum oris.

Nursing sore mouth; swelling of tongue and lips, particularly lower lip; redness and burning sensation of tongue and lips; redness and swelling of gums; at times, dry, shining appearance of inflamed surface, at others

Digitized by Google

the parts were moist with increased secretion of saliva on lower lip, small white spots soon coalescing, and forming a continuous white patch; ulcers on sides of tongue; finally nausea and vomiting, followed by loose stools; loss of appetite; inability to take food from extreme sensitiveness of mouth and tongue, and distress at stomach after food had been taken; emaciation; debility; at times profuse perspiration; pale, sunken face.

‖‖Sore mouth in last stage of phthisis.

‖‖Syphilitic ulceration of mouth and throat.

[13] **Throat.** ‖‖Throat and neck sensitive to slightest touch or external pressure; everything about throat distresses, even the weight of the bedcovers.

‖‖If in evening on lying down anything touches throat or larynx, it seems as though he would suffocate and pain is much <.

‖‖Can endure nothing tight on throat; nausea is at times caused thereby.

‖Pain in throat on taking hold of it, extending even to nape of neck, with sticking always on swallowing, and scraping on swallowing bread, as if everything was raw; dryness of throat, without actual dryness of tongue.

‖‖Uvula elongated; fauces purplish, swollen, ulcerated.

‖Uvula elongated, constant inclination to hawk and scrape; hacking cough; purplish hue of fauces; tonsils but slightly enlarged; emaciation; face pale and haggard; sleep interrupted; appetite and strength impaired; feeling as if parts were swollen; some soreness on swallowing and a frequent sensation as if a small crumb was lodged in throat. θChronic irritability of fauces.

‖Soft palate, roof of mouth and tonsils much swollen and bright red. θAngina faucium.

‖Constant feeling as of something in throat to swallow.

‖‖Feeling of lump in throat; suffocative sensation; on swallowing, lump descends, but returns at once.

‖Sensation as of a lump in throat; awakes from sleep distressed and unhappy, as if from loss of breath. θHysteria.

‖Feeling of a ball in throat, or as if a button was stuck fast in pit of throat; not perceptible on swallowing food, but on attempting deglutition, and during this it seems to rise and sink, as if it was turned around; it always feels as if she could bring it up, but it will not come; must have whole neck bare.

‖‖Pain as if something lodged in r. side, stinging; lump moves towards stomach.

‖Spasmodic contraction of œsophagus.

‖Constant tickling in throat.

‖Something sticks in throat, causes a hemming, but will not loosen.

Digitized by Google

A great deal of phlegm in fauces, on opening mouth it forms big bubbles.
Much hawking up of mucus, which is excessively painful.
Fulness and soreness in throat. θTonsillitis.
Sensation of a painful contraction, as if tied, on attempting to eat. θAngina faucium.
Feeling as if a crumb of bread remained sticking in throat, obliging her to swallow, somewhat > by hawking.
Sensation in throat as if a morsel had remained sticking on swallowing.
Feeling of a ridge in both sides of throat; constant desire to swallow saliva; sides of throat externally tender.
Feeling like a snake in throat, soreness in l. side of throat, with choking like a ball; dryness < after eating; tickling and regurgitation of food; eructations of wind; stitch in r. side when walking; throat < by draught of air.
Spasmodic stricture on swallowing solids, causes a struggling—"goes the wrong way," gagging follows.
Throat feels ulcerated on swallowing.
Constant pain swallowing empty, not swallowing food.
Difficulty of swallowing saliva, not food.
Liquids cause more difficulty in swallowing than solids, they escape through nose.
Cannot swallow sweet or acrid things. θSyphilis.
Sensation of dryness in throat, with inclination to swallow.
Constant desire to swallow. θTonsillitis.
Much inclination to swallow, although it is very painful, with spasmodic contraction of throat; < on l. side and after sleep; cannot bear any pressure about neck.
Pain in throat, extending to ears; desire to swallow; < on deglutition; pharynx swollen, dark red.
Dryness in throat: without thirst, at night on waking; sticking as with a thousand needles that threatens to suffocate her; impedes swallowing.
Pain in small spot in throat at one side of larynx, somewhat posteriorly.
Throat and larynx painful on bending head backward.
On lying down, pain in top of throat.
Pain in l. side of throat, extending to tongue, jaw and into ear.
Pains in throat, in connection with those in ears.
Sensitiveness of throat as if sore, as after taking cold, with pain in l. side, < in evening.
Hawking of mucus, with rawness in throat, after a nap in daytime.
Much phlegm in fauces, with painful hawking.
Everything seems raw in throat.

Digitized by Google

Burning sensation of swelling; dryness in throat.

Constriction, dryness, stinging and great rawness of throat, especially of pharynx and larynx, with chills and rigors. θPharyngitis.

Mouth and throat get so dry that the act of trying to moisten them, after sleeping, will make patient scowl and cause tears to start. θTyphoid.

Sudden feeling as if a fishbone had stuck in throat, and some days after felt with increasing discomfort as if a sponge was hanging in throat; seemed to impede breathing, felt as if he could hawk it up, but attempt gave pain and did no good; felt as if there was a small, dry spot from which pain extended to ear; continual inclination to swallow, no pain on swallowing food but during empty deglutition and on applying external pressure; when he presses throat feels as if eyes would spring out of head, and externally as if he had got a blow on neck; between sternum and glottis a throbbing, choking sensation; throat > in morning, begins two or three hours after rising and continues till evening.

Feeling of obstruction in throat on swallowing, every other day, first on r. side; heat and smarting in l. throat, with hoarse voice, every day about 11 P.M.; < on waking in morning, goes off about 11 A.M.

Sore throat, with hoarseness, sensation like a lump in throat, inflammation very deep red; slight cough.

Right tonsil first affected, then left.

Pain, especially in r. side of throat, < by pressure, as if a thick substance was there, it feels very dry, no difficulty in swallowing solid food, but cannot easily swallow liquids, which get forced into nose on swallowing; pains < when she washes in morning and after sleeping in daytime; pain > in afternoon, at this time throat trouble becomes so prominent, without being painful, as to prevent speech.

Rawness and difficulty in swallowing, with sensation of spasmodic stricture about throat. θEpidemic pharyngitis and laryngitis.

Swallowing increases pain in ears or it sends pain into ears. θTonsillitis.

On attempting to swallow fluids pass through nose. θAngina faucium. θTonsillitis. θSyphilis.

Chills and nausea, followed by hot flushes and terrible choking, as though some one was pressing his windpipe between thumb and fingers. θPharyngitis.

Pain in head, < by light, noise and heat; eyes red and painful; great pain in back and limbs, did not permit her to lie, stand or sit quiet, must change position fre-

‖Phlegmonous inflammation of throat.

‖Angina crouposa or nervosa with children or climacteric women.

‖‖Chronic angina with periodic exacerbations.

‖Children spit much saliva with sore throat.

‖Empty swallowing is agonizing. θAngina.

‖Sore throat and mouth following scarlet fever; almost total inability to swallow; fluids swallowed easier than solids.

‖Feeling of large lump at back of throat; sometimes feels as if some one grasped him by throat, causing feeling of suffocation; nausea, retches as if to vomit up lump; slight soreness of back of throat on swallowing saliva; r. side of neck tender to touch; swallows saliva frequently, which makes lump seem to increase and rise higher; feeling of pressure in middle of throat; must clear throat before he can talk; all symptoms < on waking in morning. θAngina.

Inability to swallow, liquids being returned through nose; fauces bright red, tonsils much swollen; face pale; small, hard and very frequent pulse; complete aphonia, incessant effort to cry being heard only as a gasping sound; great exhaustion, head hanging loosely backward, could hardly move a limb; mucous membrane of throat extremely pale and covered with white shreds of exudation; dysphagia, apparently paralytic.

‖After catching cold, inflammation and swelling of tonsils; velum palati and root of tongue inflamed; salivation and fetor oris; swallowing almost impossible, everything escaping through nose; can hardly speak; sensation as if throat was filled with a lump threatening suffocation; recumbent posture impossible; no sleep.

‖Angina, sudden in onset, appearing every year, causing great pain and ending with suppuration of tonsils; velum palati, uvula and posterior wall of pharynx red, swollen and inflamed, protruding from both sides; constant desire to swallow, which is difficult.

Digitized by Google

Sensation of fulness and rawness in throat; frequent desire to swallow, which causes pain, extending deep into ear; fluids ejected through nose, with great fear of suffocation; gums, tonsils and uvula dark red and swollen, latter looking as if squeezed and crowded back; large collection of mucus in mouth, which forms large bubbles when mouth is opened. θTonsillitis.

Fauces inflamed; r. tonsil swollen; l. tonsil first attacked. θTonsillitis.

Tonsils swollen, l. < with a tendency to r.; inability to swallow, threatening suffocation; or, on swallowing, pain shoots into l. ear; cannot bear anything to touch neck.

Swollen, congested tonsils, with yellow, small patches on each; great difficulty to swallow, with pain on l. side, shifting to r. and upwards to ear; heat and chills, alternating; commencing to get < at 4 P.M. θTonsillitis.

Left side; choking when drinking, fluids are driven out through nose; < in P.M., after sleep, from slightest touch; cannot bear bedclothes near neck. θQuinsy.*

Chronic enlargement of tonsils.

Sloughing ulcer in fauces, from an abscess in l. tonsil.

Numerous white spots on pale red surface in l. throat; ulcers on mucous membranes; both parotids much swollen, without much pain; pulse frequent and hard.

Right tonsil swollen; uvula elongated and clinging to r. tonsil; between the two a yellowish white, part liquid exudation, with no especial tendency to formation of membrane; fauces red; headache; fever; thirst; painful deglutition; enlarged submaxillary glands; distressing thirst. θDiphtheritis.

Pale, distressed face, blue rings around eyes; extreme prostration; speech and deglutition difficult; fauces pale red; white shreds of exudation on fauces and roof of mouth; also ulcers with white edges distinct from exudation patches. θDiphtheritis.

Roof of mouth, tonsils and buccal cavity pale red; tough, yellow white membrane on l. tonsil.

Pain and soreness begin on l. side of throat. θTonsillitis. θDiphtheria.

Excessive tenderness of throat to external pressure. θTonsillitis. θDiphtheria.

Aggravation by hot drinks; liquids pain more than solids while swallowing. θTonsillitis. θDiphtheria.

Face sickly, pale; dark rings around eyes; swallowing exceedingly painful; speaking difficult; weakness extraordinary; fauces pale red; white exudate on tonsils and

excoriating fluid; fauces covered with diphtheritic membrane; pulse 110, small; extremities mottled and livid; swallowing almost impossible. θDiphtheria.

Purplish appearance of mucous membrane of lips, buccal cavity and throat; diphtheritic spot as large as a pin head on l. tonsil; tongue pointed and purplish; pulse weak, 132; skin hot; urine scanty, dirty colored and containing albumen; bowels constipated; four days later submaxillary glands on both sides much swollen; running of acrid secretion from nose and mouth; diphtheritic stench; throat and even lips covered with thick, grey membranes. θDiphtheria.

Diphtheria; membrane covering tonsils and posterior portion of throat; considerable pain on swallowing; pain < turning head, touching neck and on awaking from sleep; sleep disturbed by dryness of mouth and a feeling as if he would suffocate.

Tumefaction of throat slight and redness of mucous membrane hardly noticeable; diphtheritic deposits of two or three little patches hardly larger than a pin's head; prostration of strength quite alarming; pulse slow, feeble and compressed; a cold, clammy sweat frequently covered forehead and extremities: breath fetid; appetite gone; patient passed with alarming rapidity into a completely asthenic condition—sometimes prostration quite considerable before local evidence of disease could be detected. θEpidemic diphtheria.

Diphtheritic patches in throat, spreading from l. to r.; fetid breath; < after sleep; great debility, feeble pulse; clammy sweat; headache and faintness.

Purple livid color of affected parts, with dull, dry appearance and little swelling, also pain out of all proportion to amount of inflammation. θDiphtheria.

Throat rapidly sloughed and presented a bluish hue.

Girl, æt. 8, throat greatly swollen internally and externally; discharge from nose and mouth of an intensely fetid and excoriating fluid; fauces covered with diphtheritic membrane: pulse 110, very quick and small; extremities mottled and livid; swallowing nearly impossible; fetor almost overpowering. θDiphtheria.

On l. side of throat several white exudate spots; mucous membrane pale red; parotids swollen; pulse frequent, hard; great apathy; somnolency, drooping eyelids.

Very difficult swallowing; complete aphonia; wheezing, hissing sound, in place of natural crying; excessive weakness; lets head hang; scarcely lifts limbs; fauces pale, covered with white exudate. θDiphtheria.

Velum, tonsils and posterior wall of fauces pale red; on l. tonsil tough, yellowish white exudate. θDiphtheria.

Digitized by Google

Peculiar hard ache all over, in head, back and legs; could not lie still, but constantly changed position. θDiphtheria.

Membranous deposit in choanæ; discharge of a skinny substance from nose when sneezing. θDiphtheria.

A greyish ulcerative crust appeared first on tonsils, spread over arch of amygdeli into posterior nares, sometimes downward into larynx, causing strangulation. θDiphtheria.

Tonsils swollen so that they almost meet, and covered with a tough, cheesy looking substance; feverish and very low. θDiphtheria.

Left tonsil one complete black slough, disease passing to r. side. θDiphtheria.

Pulse 130; skin hot and dry; face very red; drowsy; muttering delirium; greyish membrane developed from l. to r. θDiphtheria.

Subjective symptoms much more prominent than objective; complaints, especially swallowing, much more violent than one would suppose from extent of disease; sensation as of foreign body in throat, with stinging extending into ear; urging to swallow and desire to hawk up something, with attacks of choking; voice weak and hoarse; cough, causing pain in throat, was restrained, therefore it sounded short and suppressed. θDiphtheria.

Constitutional symptoms out of all proportion to local manifestations, prostration considerable even before any local evidences of disease could be detected. θDiphtheria.

Diphtheritic inflammation of throat; ulcers on tongue; suppuration of glands of neck; pleuritic, pericarditic and general dropsy in delayed desquamation, with great oppression; urine almost black; stools badly smelling; fever < in afternoon. θScarlatina.

Sensibility of affected parts increased and their motility essentially diminished. θDiphtheria.

After diphtheria speech disturbed, some words she could not articulate, because after a few minutes conversation a curtain seemed to fall down in front of her pharynx; teeth feel as if wedged; tongue feels scalded, cannot yawn because of sharp pain about root of tongue; if eating fast food stays in her throat; pain over eyes and sore feeling in eyeballs.

Ulcers in throat: < in wet weather; after mercury; from syphilis; extend into posterior nares; throat dry, awakens choking; soft palate full of cicatrices, with greenish yellow ulcers between; pains shooting; fetid breath.

Mercurial syphilis, with ulcerated sore throat, causing

Digitized by Google

a constant provocation to cough, with retching; painful deglutition; regurgitation of drink through nose; earthy, yellowish appearance of face, with small red bloodvessels shining through skin; coryza, nose sore; terrible headache; nightly pains in limbs. θSyphilis.

‖Syphilitic phagedæna of soft palate and fauces.

‖‖Gangrenous sore throat.

‖Secondary ulceration of throat, extending into posterior nares; obstruction of nose; offensive smell from mouth; stinging and shooting pains in ulcers; excessive dryness of throat, in spots; throat feels entirely "parched up" on waking; touching throat produces sensation of suffocation; sensitive to slightest movement of neck; symptoms somewhat > after eating. θSyphilis.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Hunger, cannot wait for food.

‖At one time good appetite, at another none at all.

‖Constant thirst, with dry tongue and skin.

‖‖Great longing for drinks, but afraid to drink, as it brings on a discharge. θDiarrhœa.

‖Thirst insatiable, with disgust for drink.

‖At 10 o'clock every night, with urgent and unquenchable thirst, dryness in throat and mouth, can scarcely breathe for thirst, must continually moisten mouth; drinking does no good and she dreads it; fever begins with rigor on going to bed, and the heat continues till about 4 A.M., with intervals of shivering; sweat toward morning; tearing pain in temples during hot stage, with burning heat in epigastrium; very sleepy day and night, but cannot sleep, except a little towards morning.

‖Desire: for oysters; for wine and spirituous liquors; for coffee, which agrees (dysmenorrhœa).

[15] **Eating and Drinking.** Generally improved when eating.

‖After eating: gnawing in stomach >, but returns in a few hours. θCancer of stomach.

‖After eating: vertigo, languor, drowsiness; gagging and suffocating; dyspnœa; pressing, like a load in stomach; stomach puffed; eructations; diarrhœa; flashes of heat.

‖Craving hunger; > after eating; < after acid drinks; constipation; abdomen sensitive to weight of clothes; flushes of heat; flushes after eating, after mental or physical effort.

‖Better from eating fruit.

‖Fluids go down, but solids, even well chewed, cause a sensation of choking.

‖Complaints from wine or tobacco.

‖Worse from alcoholic drinks (except the snake bite).

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Eructa-

Digitized by Google

tions: affording relief; amounting to vomiting; before epilepsy; at every menstrual effort.

‖Everything sours; heartburn.

‖Always thirsty, but nausea after drinking. θItch.

‖Nausea after drinking.

‖Nausea: want of appetite in forenoon; in attacks, weakness, even to syncope; dyspnœa, palpitation, cold sweat; nosebleed (typhus); with great flow of saliva (cholera).

‖Sick stomach, with terrible retching, but no vomiting; great fulness in head, with a confused, half conscious feeling; flashing before eyes; numb feeling about head; thinks she is going to die.

‖Vomiting: of bile or mucus; of food; in organic affections, with hardening of abdominal viscera; of greenish matter; renewed by slightest motion (cholera); of blood and pus.

17 **Scrobiculum and Stomach.** ‖Pit of stomach sore to touch.

‖Pressure in pit of stomach causes dull, stinging pain.

‖Tickling in pit of stomach causes tormenting cough.

‖Bloatedness of stomach, with belching of masses of wind.

‖Stomach bloated; no appetite; costiveness.

‖Violent pressure in stomach after eating, with feeling of weakness in knees.

‖Stitching extending from stomach to chest.

‖Feeling as though something was gnawing in stomach, though without pain; followed by gnawing in both sides, extending across under ribs deep in abdomen.

‖Gnawing pressure > after eating, but returning as soon as stomach is empty. θCancer of stomach.

‖Cardialgia; body stiffened from pain, came on slowly and passed off slowly; brought on by overwork.

‖At every menstrual effort cardialgia.

‖Appetite at one time good, at another poor, sometimes such a gnawing that he can hardly wait for his meal; after eating, vertigo, heaviness, lassitude, shortness of breath and heaviness in stomach; smothered feeling in chest, stomach full of wind, must belch much, with relief; regurgitation of food; when he cannot belch becomes deathly sick; severe and annoying pressure in a small spot between epigastrium and navel, which takes away his breath, > by belching; during day several attacks of nausea with shortness of breath, weakness almost to loss of consciousness, palpitation of heart and cold sweat; at night when in bed if least thing touches mouth or nose respiration seems interfered with and suffocation threatening; sleep disturbed by dreams, frequent waking; in morning heaviness and dejection;

Digitized by Google

constipation; pale and emaciated; face grey, pale yellow; after sitting, pain in thighs and stiffness of knees. θDyspepsia.

‖‖Dyspepsia, < as soon as he eats; costive; after mercury.

‖Cancer of stomach: gnawing pressure > after eating, returns in a few hours; sensiveness to contact, especially of clothes, with drunkards.

[18] **Hypochondria.** ‖Acute pain in liver, extending towards stomach.

‖Inflammation and chronic obstruction of liver, sensitive to pressure or touch.

‖Catarrhal affection of liver.

‖Abscesses in liver; pain when coughing, as if ulcerated; excessively offensive stools, whether formed or not.

‖‖Liver complaints: at climaxis; after ague; pain as if something had lodged in r. side, with stinging.

‖Gallstones. (After *Calcar.*)

‖Nutmeg liver; cannot bear tight clothing, loosens jacket, arms molest; contractive tightness in region of liver.

‖‖Cannot bear any pressure about hypochondria.

‖Contractive feeling in region of liver.

‖‖Ulcerative pain about liver.

‖Pain as if from suppuration under ribs.

‖Fulness and heaviness in region of liver, and at same time pain in l. hypochondrium; coppery taste in mouth; hard morning cough.

‖Liver swollen and painful in anterior and superior aspect.

‖Sensation of coldness over whole body; fainting spells; pale, dirty yellow color of face; appearance of suffering; thick, yellow coating on tongue; dryness of mouth; great thirst; bitter taste; nausea; diarrhœa; great debility; nervous and despondent; great aversion to talking; climaxis. θBilious attacks.

‖Shooting pain in region of spleen, particularly on exercise by walking; skin brown near region of stomach; brown spots on hand; constipation.

[19] **Abdomen.** ‖‖Painful distension, flatulence; can bear no pressure, the surface nerves are sensitive.

‖Abdomen distended and hard.

‖‖Is obliged to wear clothes, especially about stomach, very loose, they cause uneasiness; even in bed obliged to loosen and pull up nightdress to avoid pressure; dare not lay arm across abdomen on account of pressure.

‖Great sensitiveness to contact, especially to that of clothes. θCancer of stomach. θTyphlitis. θMetritis.

‖Sensitive over lower abdomen, can scarcely allow her clothes to touch her. θMelancholy after confinement.

‖Distension of abdomen, with gurgling and rumbling in bowels before diarrhœa. θTyphoid fever.

Digitized by Google

Abdomen distended, much annoyance from flatulence.
Bloated abdomen. θMania. θMegrim. θEpilepsy. θFevers.
Sensation of incarcerated flatus.
Feeling of emptiness in abdomen.
Pain as if something was lodging in r. side; stinging sensation; sensation as if a ball was rolling from that side towards stomach.
Squeamishness in abdomen, alternating with facial neuralgia.
At a small spot between navel and epigastrium a sense of unpleasant pressure, taking away breath, > by eructations, an hour after a meal.
Three months after weaning a six months old child menses had not returned; severe aching in small of back; every two or three days acute colicky pains low in abdomen, resembling labor pains, coming at various times of day; hard aching pain in uterus; sinking, fluttering feeling in epigastrium; stools loose; great sleepiness, constant desire to lie down, sleep in daytime < abdominal pains; milk very thin before weaning.
Tearing pain in abdomen. θDysmenorrhœa.
Cutting pain in r. side of abdomen throwing her into fainting fits; painful distension of abdomen; urging to urinate, but inability to do so except at long intervals.
Cramplike pains in abdomen, which feels hot. θDysentery.
Spasmodic colic, > by bending forward.
At times pains as if knife was thrust through abdomen.
Colic: stomach distended; incarceration of wind, belching relieves; pains change locality; sensitive to light pressure; with restlessness and fever.
Excessive griping, as though about to have diarrhœa.
Burning like fire in hypogastric and lumbar regions.
Coldness; thirst; abdomen very hot. θDysentery.
Abdomen hot and sensitive to touch; painful stiffness from loins down into thighs; scanty, turbid urine with reddish sediment; strangury; constipation; must lie on back with drawn up knees; especially in complications with typhilitis. θPeritonitis.
Acute cutting, stinging pains, radiating from navel over upper portion of abdomen, excruciating from slightest touch as well as by motion, with tympanitic distension. θPeritonitis.
Lies on back with knees drawn up; tenderness, pain and swelling in region of cæcum; pain extending from r. lumbar region through sacrum, through inguinal region and forepart of thigh, more especially when swelling is examined; urine scanty, high colored; strangury: bowels costive. θInflammation of cæcum.

Digitized by Google

‖Strangulated umbilical hernia; sloughing.
‖‖Tenderness in l. iliac region, intolerance of pressure.
‖Ileo-cæcal region very sensitive to touch; after great straining discharges a mass of croupous exudation. θChronic intestinal catarrh.
‖Threatened gangrene in strangulated hernia; skin covering hernial tumor mottled and dark; pain across abdomen; contractive sensation in abdomen; cutting, lacerating, burning pains; hernia exceedingly sensitive, will not admit handling.
‖For years violent pains over r. groin, drawing from ovary to uterus; pus passing with stool.
‖Violent pain of long standing in r. groin, extending either towards genital organs or upwards towards liver or chest.
‖Extreme nervous debility; great fear of death; hopeless of recovery; despair of salvation; desire to pick her fingers raw, or arms, or face, or pick threads from shawl, clothing, etc.; menses delayed, with general aggravation of symptoms; always < every four weeks for four or five days; fibrous tumor, size of orange, in l. groin.
‖Contraction of psoas muscle, drawing knee towards abdomen; hectic fever. θBubo.
‖Large hard swelling, with fistulous openings in inguinal region, extending towards abdomen; hectic fever. θBubo.
‖‖Long lasting, suppurating buboes of mercurio-syphilitic origin.

[20] **Stool and Rectum.** ‖Tormenting urging, but not to stool.
‖Wants to pass stool, but pain is so increased thereby, he must desist.
‖‖Fetid flatus.
‖‖Very offensive stools, whether formed or not.
‖Sensation as if feces ascended to chest. θPuerperal fever.
‖Stools: fetid; cadaverous smelling; frequent; corrosive; purulent; thin; pasty; bloody, watery; watery, light yellow, fecal; dark, chocolate colored; of decomposed blood, looking like charred straw; mixed blood and slime; < at night, after acids; during warm weather; thin, offensive; thin, slippery lumps; involuntary.
‖Sudden diarrhœa, with great urging, about midnight, thin, pasty, excessively offensive, ammoniacal.
‖Diarrhœa every evening for a week, preceded by transient pain in rectum, followed by throbbing as with little hammers, in anus.
‖Watery stools, with burning in anus, in evening.
‖Painless, brownish yellow diarrhœa, smelling like carrion; fluid mixed with small fragments of feces, like millet seeds; diarrhœa brought on by least quantity of food; had eighteen to twenty stools during night; tongue

Digitized by Google

red and dry; longs for drinks, but is afraid of aggravation it causes of the diarrhœa; sleep restless and full of dreams; hands shriveled and cold; slight twitching of hands; despondent; speech affected (sermo abdominalis); great emaciation and prostration, cannot sit up in bed without assistance.

Great inclination for acids; discharges black and frothy; sometimes vomiting of bile in morning.

Chronic diarrhœa, with gnawing and pressure in pit of stomach. θSyphilis.

Diarrhœa: of mixed blood and slime in warm weather, < by acid fruits; < at night and after sleep; with frothy urine; a few days before or after catamenia, with colic; during climaxis; of drunkards, with languor and exhaustion, very excessive in hot weather and with large hemorrhoidal tumors, which protrude after each pappy, offensive stool, with constriction of sphincter and continued desire to evacuate.

Stool and urine involuntary. θFevers.

Hemorrhage from bowels; decomposed blood. θTyphus.

Flakes of decomposed blood, having form and appearance of perfectly charred wheat straw, in longer or shorter flat pieces, portions more or less ground up.

Discharges have a penetrating, fetid smell and assume a purulent character; great heat of abdomen. θSummer complaint.

Discharges chocolate colored, of a cadaverous smell; during evacuation burning in anus; cramplike pain in abdomen; coldness; thirst; abdomen very hot; tongue red and cracked at its point, or black and bloody. θDysentery.

Could not protrude tongue, which caught on teeth; during a nap, restlessness, dyspnœa, distress and then stinking stool. θDysentery.

Dysentery; shivering without coldness.

Vomiting renewed by slightest motion, and nausea attended by great flow of saliva. θCholera.

Painful straining, with discharge of croupous exudate.

Pressive pains in umbilical region; violent gripes, with contracted abdomen, or abdomen hard and tympanitic; fetid stools. θEnteritis.

Chronic intestinal catarrh.

Soft stools of bright yellow color.

Alternate diarrhœa and constipation.

Costive, ineffectual urging; anus feels closed; stools offensive.

Long lasting constipation with pressure in stomach and unsatisfactory belching.

Digitized by Google

Stools: scanty, greyish, like potter's clay; hard like sheep dung; hard and difficult; frequent and hard; hard, scanty and insufficient.
Constipation with black tongue and lips. θScarlatina.
Constipation without other symptoms.
Feeling of unhappiness on awaking; sensation of constriction of anus. θConstipation.
Absence of stool in persons suffering from hydrothorax.
Weight, fulness and pressure in bowels, with much flatulence. θChronic constipation.
Constipation, with ineffectual effort to evacuate.
Costiveness, with very hard stools, between catamenia; stool omitted twenty days. θAngina syphilitica.
Stools in pieces, frequent, yellow, orange, sometimes tinged with blood. θGastric nervous fever.
Long lasting costiveness, with pressure in stomach and unsuccessful eructations.
Chronic constipation in a young lady, of ten years' standing, was obliged daily to use warm injections; weight, fulness and pressure in bowels, accompanied with a good deal of flatulency.
Fecal obstructions; intususception threatening sloughing.
No stool nor urine. θMetritis. θPuerperal fever.
Before stool: rumbling; ineffectual urging; constant and very painful pressure in rectum, without stool; constriction in rectum or sensation of plug in anus.
During stool: cramplike pain in abdomen; burning in anus; tenesmus; pain as if sphincter was torn with effort; tearing pains in rectum from below upward and backward, to point of producing eructations; feces remain at anus; aggravation of pains, so that it is necessary to cease all efforts.
After stool: burning at anus; tenesmus; protrusion of large hemorrhoidal tumors, with constriction of anus and continued desire for stool.
Child always awakens in distress. θDiarrhœa.
Stool lies in rectum, without urging.
Full feeling in rectum, and a sensation of little hammers beating. θFistula in ano. θClimaxis.
Rectum prolapsed and tumefied.
Burning, cutting pains in rectum, < while standing morning till afternoon.
Constant and painful pressure in rectum, without stools.
Beating sensation in rectum; throbbing. θStricture of rectum.
Stitch in rectum or hemorrhoids when coughing or sneezing.
Uneven or tuberculated and indurated mass, surround-

Digitized by Google

ing and protruding from anus, through centre of this mass was an irregular, ragged and ulcerated fissure (the outlet from rectum), from which issued a sanious mucous discharge; stool almost impossible on account of obstruction and pain; soft and yielding tumors (hemorrhoidal) nearly filling rectum, as far as touch extended; constant throbbing with itching, shooting and burning in affected region; all symptoms < after sleep; had been diagnosticated as scirrhus of anus and rectum. θAffection of anus and rectum.

❙Piles for four years, came on first month of pregnancy; discharge of mucus, excoriating passage; sore, burning pain after every evacuation; very irritable nervous system; craving for pickles; acrid waterbrash.

❙❙Piles protruding or strangulated, or, with stitches upward at each cough or sneeze. θClimaxis. θDrunkards.

❙Hot, bleeding hemorrhoidal tumors.

❙Hemorrhoids: with scanty menses; in climacteric years.

❙Drawing pains from anus to umbilicus.

❙Spasmodic pains in anus internally, short time before and after stool.

❙Visible spasmodic tenesmus in paroxysms, from two to five minutes, extorting cries, passes blood and mucus.

❙Itching at anus, < after sleep.

❙Anus feels closed; sensation of a plug.

❙Painful constriction of anus, following prolapsus of rectum.

❙Fistulous abscess opened near anus. θScarlatina.

Urinary Organs. ❙Stitches in kidneys, extending downward and apparently through ureters. θCystitis.

❙❙Pressure upon bladder; dull pain.

❙❙Feeling as of a ball rolling about in bladder or abdomen, when turning over. θUterine displacement. θCystitis.

❙Discharge of offensive mucus during micturition. θCatarrh of bladder.

❙Ineffectual urging to urinate; burning when it does pass.

❙Urgent desire to urinate, with passage of much urine.

❙Frequent micturition, urine scanty, dark brown, turbid.

❙Violent burning when passing urine. θAngina syphilitica.

❙Painful pressing and burning when making water.

❙Dribbling after urinating.

❙❙Constant sticking and cutting in forepart of urethra.

❙Urine of strong ammoniacal odor, involuntary; lying on back. θGastric nervous fever.

❙High colored urine of strong smell. θDiphtheria. θScarlatina.

❙Urine dark, with a brown, gravelly sediment, passing with a sharp, cutting pain.

❙❙Urine: almost black; frequent, foamy, dark.

Digitized by Google

Urine like coffee grounds. θScarlatina.
Urine dark or scanty, as in typhus. θDiphtheria.
Black, scanty urine, with œdema, after scarlatina.
Urine red and hot. θAngina faucium.
Scanty urine with red sediment. θTyphlitis.
Urine heavily loaded with albumen.
Albuminuria with hydrothorax and dropsical enlargement of l. side and leg.
Strangury. θTyphlitis.
No urine, no stool.
Urine almost suppressed. θScarlatina.

[22] **Male Sexual Organs.** Great excitement of sexual desire.
Epilepsy after suffering by lewdness, or morbid excitement of sexual organs, onanism, frequent emissions of semen, or jealousy.
Impotence.
Nocturnal emissions, with thrill of delight.
Excessive sexual desire, constant erections at night; emissions, with profuse night sweats; cheerful disposition and feeling of ease on awaking, succeeded by increased mental concentration; semen has a pungent smell.
Sore pain in urethra, in forepart of penis.
Indurated foreskin, after chancres.
Mercurial syphilitic ulcers on penis.
Scrotum swollen to enormous size. θScarlatinal dropsy.
Sycotic ulcers, with bluish areolæ.
Paraphimosis when constriction causes gangrene, or threatened gangrene, eruption on glans and mons veneris.
Gangrene of glans.
Phagedenic chancres.
Buboes: with sore throat and headache; indurated or with fistulous openings and hectic; after mercury; suppurating a long time.

[23] **Female Sexual Organs.** Sexual desire excited to the highest pitch; perfectly insatiable; luxurious convulsive thrills run all through her.
Tickling and jerking extending from thighs to genital organs. θNymphomania.
Ovarian neuralgia, particularly l. side; tensive, pressing, burning or stitching pains.
Frequent, troublesome, drawing pain in r. ovarian region, from near hip bone down to os pubis, sometimes burning. θSwelling of r. ovary.
Pain in r. ovarian region increasing more and more until relieved by a discharge of blood. θClimaxis.
Terrible pain in r. ovarian region, with swelling.
Induration and suppuration of ovaries.

Digitized by Google

Right ovary size of a fist; 1½ inches thick, painful when pressed, attached to uterus by a string as thick as a finger.

Sharp, shooting pain in l. ovary; constipation; feels < in morning and after sleep. θOvaritis.

Tensive, pressing pains and stitches; inability to lie on r. side, on account of sensation as if something was rolling over to that side; swelling of ovary; suppuration; l. side. θOvaritis.

Painful, oblong swelling and induration in r. ovarian region, < by moral emotions, rapid movements, prolonged walks and overexertion. θUterine displacement.

Ovarian tumors; l. ovary first affected, tending to right.

Swelling, induration, tumors, neuralgia, suppuration, etc., of l. ovary.

Menses irregular, dark, dirty looking and offensive; looks like a pregnant woman at ninth month; abdomen hard, some parts more so than others; in l. ovarian region and directly under navel, extending up to stomach, very hard, as though fibrous, all other sections tense and more or less painful; at times dyspnœa and wheezing almost approaching suffocation; tongue red and glazed; appetite fickle; great thirst; scanty, high colored urine, with hæmatin and ten per cent. of albumen; constipation, with occasional discharge like horse dung in size, causing pain and weakness from which she would not recover for half a day or more; constant malaise. θSacculated ovarian disease.

Uterine and ovarian tumors, with profuse and prolonged menses; great sensitiveness of lower abdomen; severe, aching pain, anteriorly, in thighs, in branches of anterior crural nerve.

Uterine region feels swollen, will bear no contact, not even of clothing; bearing down pains.

Pains like a knife thrust into abdomen.

Uterus feels as if os was open.

Genital parts much distended, swollen and red, everything seemed to be rolled out and mouth of womb open; nymphomania.

Laborlike pains as if everything would issue from vulva, followed by a slight discharge of blood.

Menstrual colic beginning in l. ovary.

Sensation as if pains from uterus and abdomen ascended towards chest.

Pain in uterine region as if swollen; displacement.

Violent, laborlike pressing from loins downwards during menses, which are scanty. θDisplacement.

Pains in uterine region, increase at times more and more till relieved by a flow of blood from vagina; after a few hours or days the same again, and so on.

Digitized by Google

Uterus does not bear contact and has to be relieved of all pressure; frequently lifts clothes, they cause an uneasiness in abdomen, no tenderness.

Womb enlarged, retroverted, hot and sensitive to touch; os open and sensitive; menses irregular; fundus found to be larger posteriorly.

Chronic metritis: with hypertrophy; menses too scanty and difficult; soreness about pelvic region. (Complemented by *Nitr. ac.*)

Congestion of womb with prolapsus.

Displacement in connection with or in consequence of change of life.

Prolapsus during climaxis, with flashes of heat, hot vertex; metrorrhagia and fainting; pain in l. hypogastric and ovarian region.

Chronic uterine catarrh, staining linen, rendering it stiff, accompanied by a severe pain in lumbar region. θSterility.

Uterine cancer, developing at climaxis, or as a consequence of change of life; pains increase rapidly, until relieved by profuse discharge of blood; violent pains, as if a knife was thrust through abdomen, which has to be relieved of all pressure.

Uterine hemorrhages of the menopause.

Menses: suppressed at regular time, but too short and feeble; scanty, with laborlike pressure from loins downwards; irregular; scanty, blood black; late, scanty and difficult; every two or three months, then profuse; reappearing during climaxis; blood lumpy, black or acrid.

Tenacious and acrid menstrual flow, with laborlike pains. θCancer of uterus.

Menorrhagia with chills at night, flashes of heat by day.

Amenorrhœa: the smaller the discharge the greater the pain; with vertigo, headache and bleeding from nose; with pain in stomach, chest and eructations at every menstrual time; swelling in region of l. ovary.

Persistent congestions at menopause.

Nosebleed and cardialgia instead of menses.

Strangulation of prolapsed vagina, parts deep purple.

Erectile tumors; hemorrhage vicarious; pain < until > by flow of blood; if bleeding returns, pain returns.

Fistula vagina; gangrene.

Before menses: desire for open air; vertigo; nosebleed; laborlike pains, < in l. ovarian region; bruised feeling in hips; > when flow begins; sudden attacks of cardialgia; oppression or spasms of chest; eructations; diarrhœa, with violent straining; colic, with sense of malaise; nervous distress; mucous sediment in urine; leu-

Digitized by Google

corrhœa three days before, discharge copious, smarting and slimy, stiffening linen and leaving a greenish stain; pain in back, with abdominal cramps and throbbing headache.

The day before catamenia irresistible desire to go in open air and run about. θDysmenorrhœa.

Menstrual colic on first day of catamenia.

Laborlike pains with catamenia.

During menses beating in head and burning in vertex; laborlike pains, as if everything was being pressed out, followed by a slight show; uterus feels as if os was open; violent pains first day in small of back and abdomen; tearing pain in abdomen; bruised feeling in hips; > as flow becomes free; violent cramps in bowels as if cut with knives; pressing pains from loins to privates; uterine pains running up; colic beginning in l. ovary; toothache < in proportion to diminution of flow; fainting in nervous women; cardialgia, oppression of chest and eructations; ovarian pain; discharge of blood or mucus from anus; epilepsy <.

Jealous disposition; craves coffee and feels > after drinking it; ulcers on legs with a purplish circumference. θDysmenorrhœa.

With menses a throbbing in rectum and violent pains; greatly troubled with wind; slime passes, sometimes blood as from an ulcer; pressure; feels as if a stricture was there.

Catamenia flow but one hour every day, on stopping, violent pains follow in region of l. ovary, alternating with gagging and vomituritio. θDysmenorrhœa.

Dysmenorrhœa of eighteen years' standing.

After menses: diarrhœa; common, acrid leucorrhœa; palpitation, with pain, as if heart was hanging by a thread, and every beat would tear it off.

Leucorrhœa: from three to eight days before menses; green or thick yellow; copious, smarting, stiffening linen, staining it greenish, milky.

Redness and swelling of parts, with mucous discharge.

Fungus hæmatoides on right mamma as large as a peony; blood poured out all over it as from a sponge.

For last four years stitching and cutting pains in l. breast, more or less severe, but always < before, during and after menses; at first pain limited to affected part, but finally extended to l. axilla, and thence down arm to hand; peculiar painful sensation of weakness and lameness in l. shoulder and arm, < using arm; occasionally l. mamma and arm become so painful that use of latter becomes impossible, and she is compelled to lie down;

Digitized by Google

on examination no visible swelling, but upon pressure with finger a three-lobed tumor, each lobe about as large as a pigeon's egg, can be detected lying about two inches above and somewhat to l. side of nipple; tumor movable and painful to pressure; examination causes pain which extends to shoulder and down arm, lasting 5–6 hours; shoulder and arm sensitive to pressure, the pain extending back into mamma; pale and emaciated; menses regular, lasting 3–4 days, with much pain on first day and day previous to their appearance; chronic fluor albus.

‖Breast has a bluish or purplish appearace; chills at night and flushes of heat by day.

‖Cancer having bluish or dark base, interspersed with black streaks of coagulated or decomposed blood.

‖Cancer of breast, with lancinating pains.

‖Scarlet, shining, herpetic eruption, under mammæ, < from scratching; odor offensive.

‖‖At menopause: flashes, hot vertex; metrorrhagia; fainting; uterine displacement; cancer; capillary circulation affected.

‖‖Suitable at beginning and close of menstruation.

Pregnancy. Parturition. Lactation. ‖Persistent vomiting in pregnancy, occurring late in afternoon and evening.

‖Convulsions commenced on l. side, in face, and continued longer, and were more severe about neck and throat than elsewhere; sixty-five distinct convulsions. θPuerperal convulsions.

‖Violent convulsions in lower limbs, with coldness of feet, stretching backward of body, and screaming; puerperal.

‖From sunstroke two years previous to confinement had been ever since in bed; two hours after delivery convulsions; after twelve hours comatose, great heat in occipital and cervical regions; mouth dry; pulseless.

‖Face turgid; mouth filled with foam and blood; jaws convulsively set, tongue shockingly lacerated; pulse full and hard; respiration irregular; complete coma interrupted by frightful convulsions; sudden and forcible protrusion of tongue. θPuerperal convulsions.

‖Face livid, bluish; abdomen swollen; urinary and fecal evacuations suppressed; lochial discharge thin and fetid; unconsciousness with violent chills daily. θPuerperal peritonitis.

‖Lochial discharge thin, ichorous; tympanitis. θMetritis.

‖‖Phlegmasia alba dolens.

‖‖Pains in ovaries after confinement.

‖Sore mouth of nursing women, edges of tongue red and cracked, with smarting and aching pains.

❙Lancinating pains in mamma; pains down arm; breast bluish, with blackish streaks. θMastitis.
❙Breast has a bluish or purplish appearance; chills at night and flushes of heat by day.
❙Thin, blue milk discharging involuntarily; child does not want to nurse; after child has sucked awhile milk becomes natural in color.
❙Milk thin, blue; she awakens sad, despairing.
❙Mammæ swollen; nipples swollen, erect; painful to touch.
❙❙Extreme sensitiveness of nipples.

Voice and Larynx. Trachea and Bronchia. ❙❙Loss of voice caused by paralysis or œdema of vocal cords.
❙❙Paralysis of vocal cords, particularly the left.
❙Unable to utter a loud word for a week; a spot tender to touch on anterior portion of neck. θMenstrual irregularities.
❙Aphonia in phthisis; sputum tough and green.
❙Something hinders speech; hoarse; hawks constantly.
❙Hoarseness and cough; heart beat accelerated by quick motion or after drinking beer.
❙Hoarseness; rough, dry cough caused by scratching in larynx and trachea. θHeart disease.
❙Increased hoarseness while speaking; voice will not come because something in larynx prevents it, which cannot be hawked loose, though mucus is brought up.
❙❙Hoarseness, rawness, dryness; larynx sensitive to touch.
❙Sensation as from a skin in larynx.
❙Feeling as of talons sticking into larynx, < by coughing.
❙❙Larynx sensitive to least touch, which causes suffocation; feeling of a lump in throat.
❙Larynx and whole throat painful to touch.
❙Great sensitiveness of larynx; hoarseness; a thick lump is felt in throat, as from accumulated mucus. θChronic bronchitis.
❙❙Feeling of a small lump in pit of throat, like a button; feels as if it might loosen, but does not.
❙Larynx and throat painful on bending head backward.
❙Pain in pit of throat extending to root of tongue and to hyoid bone, and to l. tragus, behind which it shoots out; painful to touch.
❙❙Feeling as if something was swollen in pit of throat and would suffocate him; it cannot be swallowed; soreness in throat.
❙Constriction, dryness, stinging and great rawness of throat, especially of pharynx and larynx, with chills and rigors. θEpidemic pharyngitis.
❙Larynx swollen, sore, raw, scraping, somewhat also on pressing upon it; at same time is obliged to swallow.

Digitized by Google

‖Catarrh, with little secretion and much sensitiveness; dry cough, coming from sense of tickling in larynx, provoked by deep inspiration, speaking and pressure; sense of fulness in trachea and painful aching in os hyoides. θLaryngitis.

‖Chronic affections of larynx, where parts, without being actually inflamed, are very sensitive; hoarseness; sensation as if a large mass of mucus had accumulated in throat.

‖Impending croup during diphtheria; awakens suffocating, grasps throat; fears he is dying.

‖‖Croup < after sleep; seemingly sleeps into croupy spell.

‖Child seems as if it would choke while sleeping; breathes > after waking. θCroup.

‖Awakened from sleep, apparently in a dying condition. θMembranous croup.

‖Croup in children subject to inflammatory rheumatism.

‖Child arouses with a paroxysm of choking, almost loses its breath, and sometimes goes into convulsions. θCroup.

‖Membranous croup, last stage; membrane coughed up in pieces like a glove finger; very sore throat.

‖Membranous croup with diphtheritic sore throat, or malignant scarlet fever; breath very offensive; glands of neck swollen; soreness of neck to touch.

‖‖Suddenly something runs from neck to larynx, stopping breathing, it awakens him at night. θSpasmus glottidis.

‖Constriction of larynx, attended with dryness of whole throat and mouth, invariably after sleeping.

‖Nightly attacks of spasm of glottis after first sleep; suffocation and livid face; during day sensation of foreign body in throat, with difficulty in swallowing.

‖Paroxysms recur as often as child gets into a sound sleep. θLaryngismus stridulus.

πFrightful gasping or grasping at larynx, almost suffocated at night in an attack; she thought she was dying from inability to breathe; rolling from side to side in bed.

‖Sensation as if something was in trachea which might be raised, comes partly up and then goes back again.

‖After attack of influenza dry, harassing, concussive cough; < after sleep. θBronchial catarrh.

‖Mucous membrane of nose thickened; much sneezing; dry, stuffed feeling through whole front part of head; gradually passing to fauces and chest; constant dry, short cough, night and day, sitting, lying or walking; wheezing breathing; face red and puffed; eyes seem almost pressed out. θBronchial catarrh.

‖Cough excited by even light pressure on larynx, or as soon as he falls asleep, often with choking, as if suffoca-

Digitized by Google

tion was inevitable; after a long, dry and wheezing paroxysm of cough there is suddenly a profuse expectoration of frothy, tenacious mucus, which gives great relief. θChronic bronchitis.

❙Continued fever, < at night; pulse 150; respirations 70 per minute; red spot on one cheek, frequently changing sides; l. lung impervious to air; constant cough, < at night; later r. lung affected; uneasy and restless; throws itself in all positions in efforts to breathe; face dark; constant spasmodic cough with labored breathing; on falling asleep for a few moments throat became so dry that a condition like croup came on, and all suffering increased. θBronchial catarrh.

❙Can only breathe in upright position, and that with great labor; thickening of mucous membrane seems to fill lung completely; constant cough from titillations behind sternum, seemingly at bifurcation of trachea; no expectoration, yet chest seems full of fluid when coughing. θBronchial catarrh.

❙Dry cough, squeaking râle and aphonia; external throat sensitive to touch; soreness, tenderness, sensation of weight in l. ovarian region; < after sleep; pale, scanty menses, with loss of sexual instinct. θBronchitis.

❙Bronchial attacks in subjects of cyanosis and cardiac disease.

* **Respiration.** ❙❙Constantly obliged to take a deep breath.

❙❙Desperate fits of suffocation, must sit up in bed; cutting pain in abdomen.

❙Obliged to sit up and lean r. side against a pillowed rocking chair that pain in l. chest with dyspnœa, might be >; frequent small pulse; diminished strength of heart's action; could not bear neck and waistbands fastened.

❙Difficulty of breathing > when sitting bent forward; < when talking and after eating.

❙Oppression and want of breath: < when walking and after spiritous liquors; heart disease; at every menstrual effort.

❙Shortness of breath and suffocative attacks caused by touching larynx and < on moving arms.

❙❙The least thing coming near mouth or nose interferes with breathing; lying in bed at night slightest covering over mouth or nose produces suffocating dyspnœa.

❙In morning when sitting up quickly, breathing slow, difficult, whistling. θAsthma.

❙❙Oppression of chest during sleep.

❙Lays hand upon upper third of sternum and declares she cannot get her breath below there.

Digitized by Google

❙Chest stuffed as it were; cannot lie down from a sense of suffocation and must open doors and windows to obtain air; a suffocating short cough, with scanty and difficult expectoration; head must always be high, and she generally rests it on her hand.

❙Great dyspnœa, < in afternoon and after sleep; l. side; badly smelling stools even if formed. θPneumonia.

❙❙Chest feels constricted.

❙❙Suddenly something runs from neck to larynx and interrupts breathing completely; it wakens at night. θSpasmus glottidis.

❙Cannot sleep, as soon as he falls asleep breathing is immediately interrupted. θAcute rheumatism.

❙Suffocating fits, waking from sleep with throwing arms about; cyanotic symptoms; swelling of liver; black urine. θHydrothorax.

❙Awakes with fear of suffocation in middle of night.

❙❙During heat as of orgasm of blood he is obliged to loosen clothes about neck; sensation as though they hindered circulation of blood, with a kind of suffocative feeling.

❙❙Asthma: < from covering mouth or nose, touching throat, moving arms, on awaking, after eating or talking; > sitting bent forward.

❙Sharp pain through lungs, great dyspnœa; < sitting erect, or lying down, > bending forward and throwing head back; feeling of intense constriction in all parts of chest, as if lungs were being pressed up into throat, causing extreme agony, so that she despaired of life; feeling as though a cord was tightly tied around neck; must loosen clothes at neck and epigastrium; at times sensation as though heart turned over and ceased beating for a moment, then commenced again with increased force; lung seems full of mucus, yet none can be raised; face almost purple during paroxysms.

❙❙Œdema pulmonum; emphysema.

❙❙Threatening paralysis of lungs, greatest difficulty in breathing, with long lasting attacks of suffocation.

❙Hay asthma.

❙Itching disappears, she is very short of breath and full of anxiety. θItch.

[27] **Cough.** ❙Constant dry, hacking cough. θOvaritis.

❙❙Dry, hacking cough, caused by touching throat or in morning after sleep.

❙Every contact with open air causes a violent tickling cough, accompanied by expectoration of mucus.

❙Fluttering, nervous, slight cough, apparently excited by a tickling in larynx.

❙Cough caused by pressure on larynx or by any covering

on throat; by a tickling in pit of throat and sternum; when falling asleep; from ulcers in throat.

‖Cough, with rawness of chest, difficult expectoration and pains in throat, head and larynx.

‖Constant titillation in throat inducing cough; constant hawking going on to empty retching, without nausea; seldom any expectoration, but when there is it is brought up with extreme difficulty and at risk of suffocation.

‖Crawling in ulcers, irritation to cough. θAngina syphilitica.

‖Short, gagging, very fatiguing cough from tickling in pit of throat, cannot get anything loose.

‖Frequent attacks of short cough from tickling in pit of stomach, dry during night; difficult, sometimes watery, salty mucus, which has to be swallowed again.

‖Cough: < during day; after sleeping; changes in temperature; alcoholic drinks; acids and sour drinks.

‖Short, superficial, tickling cough, very exhausting, sometimes causing vomiting; difficult expectoration of thin, tough mucus, or thick, roundish lumps; often coughs, hawks, spits, without bringing up anything; coughs only during day; cough in open air and after speaking, which seems to make everything dry; in damp weather and after eating fish; cough seems to originate in epigastrium, where it produces a tickling sensation and severe pain.

πSuperficial, nervous cough from tickling in larynx, at 9 P.M. until going to bed.

‖Cough after rising from a lying position.

‖Cough during sleep, without being conscious of it.

‖Bronchial cough, < after sleeping.

‖‖Cough after sleep; breath fetid; complete loss of appetite.

‖Dry cough, squeaking râle and aphonia; throat sensitive to touch; soreness, tenderness, sensation of weight in l. ovarian region; < after sleep; pale, scanty menses, with loss of sexual instinct. θBronchitis.

‖After influenza, dry, harassing, concussive cough; < after sleeping, lasting all Winter and following Spring.

‖After occasional attacks of hæmoptysis, dry, sore cough, < at night and in early morning, and also by reclining. θPhthisis pulmonalis.

‖‖Cough as if some fluid had gone into wrong passage.

‖With every cough feeling as of an ulcer in stomach.

‖Gagging, persistent cough, from tickling in throat, under sternum, or in stomach; < on falling asleep or during day, from change of temperature and alcoholic drinks.

‖Hard, racking cough and profuse expectoration. θHepatitis.

‖Child coughs in evening on lying down, afterwards during sleep, sometimes awakened thereby; faint and weak.

Digitized by Google

‖‖Cough most during day.
‖Cough excited by increased secretion of fluid in larynx.
‖Feels pretty well when she gets up; thinks she will be able to do a good day's work, until 11 A.M., when she becomes weak and faint; tongue sore across middle from side to side, and beats; throat seems to swell and beat; fits of coughing, expectoration of tenacious mucus; > after two o'clock; perspires at night, starts up suddenly with choking; cannot bear bonnet strings tied tight; no appetite; flatulence; to be costive; > out of doors and when moving about.
‖Coughing or sneezing causes stitching pains in affected parts. θCancer of uterus.
‖‖Sympathetic cough of cardiac affections.
‖During cough: tension in head; pains in epigastrium, abdomen and anus; burning in chest; ulcerative pain above and along ribs; stitches in chest; running of water from the mouth; vomiting; discharge of urine; pain in hemorrhoidal tumors.
‖Constant provocation to cough, with retching and gagging.
‖‖With every single cough a stitch in hemorrhoidal tumor.
‖Pain in anus when coughing or sneezing.
‖Cough with hoarseness.
‖Paroxysms of suffocating, spasmodic cough, with tickling in larynx.
‖Dyspnœa and cough, with slimy, blood streaked, very copious sputa. θGastric nervous fever.
‖‖Sharp pain through lungs with great dyspnœa; < sitting erect or lying down; > bending body forward and throwing head back; feeling of intense constriction in all parts of chest, as if lungs were pressed up into throat; constriction in throat as if cord was tied around, necessitating loosening of covering; sensation as if heart turned over and ceased beating for a while, after which pulsations increased in force. θSpasmodic asthma.
‖‖Must cough hard and long before he can raise.
‖After a long, wheezing cough, suddenly spits up profuse, frothy, tenacious mucus.
‖Spitting large quantities of ropy mucus. θDiphtheria.
‖Expectoration: scanty, difficult, watery, saltish; must be swallowed again; straining and vomiting.

Inner Chest and Lungs. ‖Oppressive pain in chest, as if full of wind, > by eructation.
‖‖Full feeling of chest and a pushing pressing from within outward. θHeart disease.
‖Contraction of chest waking him after midnight, with slow, heavy, wheezing breathing, compelling him to sit up bent forward.

Digitized by Google

Pain in chest as from soreness; burning in chest.
Stitches in l. side of chest, with difficult breathing.
Stitching pain through r. side of chest. θHepatitis.
Chest feels as if stuffed; cannot lie down, from sense of suffocation; must open doors and windows to obtain air; suffocating, short cough, scanty and difficult expectoration; fever at 10 P.M., unquenchable thirst, dryness in throat and mouth, can scarcely breathe for thirst, must continually moisten mouth, drinking does no good, and she dreads it; fever begins with rigor on going to bed, heat continues till 4 A.M., with intervals of shivering; sweat towards morning; tearing pain in temples during hot stage, burning heat in epigastrium; sleepy, day and night, but cannot sleep, except a little towards morning; frequent micturition, urine scanty, dark brown and turbid; abdomen distended, flatulence; cannot bear anything upon abdomen; little appetite; frequent coryza; feeling of ball in throat, as if a button was fast stuck in pit of throat; not perceptible on swallowing food, but on attempting deglutition, and during this it seems to rise and sink, as if it was turned around, feels as if she could bring it up but it will not come; must have whole neck bare, cannot endure bedclothes, nor even tie cap strings. θChest affection.
Burning, stinging, like coals of fire from chest through to shoulders.
Hepatization, particularly of l. lung; great dyspnœa on awaking. θPneumonia.
Pulse very quick, wiry, excited and strong; frequent chills and fever; no appetite; constipation; sputa as if mixed with brickdust; discouraged, homesick and despairing; covers his head with bedclothes, and sighs and laughs by turns, and always thinks there is something wrong. θPneumonia.
Threatened paralysis of lungs with great dyspnœa and long lasting suffocative paroxysms. θPneumonia.
Dropsy of chest; awakens suffocating; liver swollen; scanty, dark urine; palpitation. θAfter scarlatina.
Sibilant râles.
Chronic pleuro pneumonia; hepatization; difficulty of breathing; dyspnœa particularly on r. side.
Measles, followed by whooping cough, inflammation of lungs, bloody expectoration, high fever and terrible coughing spells; intense capillary bronchitis; pulse 135; dry crepitation over both lungs, somewhat veiled by co-existing coarse bronchial râles; finally suppuration of both lungs supervened, with following symptoms; great emaciation, cadaverous appearance, eyes sunken

Digitized by Google

and glassy, rattling in bronchi, expectoration of cream colored pus, hectic flush, pulse rapid, cannot be counted correctly, picking and boring l. nostril, until it is raw and bleeding; lips parched and dry, tongue dry, dark brown coating at root, tip red; trembling of tongue when attempting to protrude it; cannot put out tongue, it sticks to front teeth; sordes on teeth; great prostration; can bear nothing about throat; plaintive moaning; after every coughing spell such exhaustion it seems she will die.

‖Useful when tubercles follow pneumonia.

‖Woman, æt. 26, tall and slender, tuberculous tendency of family; cough for more than two months; frequent, dry, short and sharp, or harsh sound; loss of appetite and strength; emaciation; prominent clavicles; no respiratory murmur in posterior superior half of l. lung.

‖Afternoon fever, chills and flushes alternating; pulse, 112; copious night sweat wakes him from first sleep; violent titillating cough, sensitiveness of larynx; difficult expectoration, in hard lumps, of offensive taste, sometimes salty; burning deep in chest, pleuritic pains, < from coughing; morning cough, vomiting; dulness in l. infraclavicular region, sensitiveness to touch; shortness of breathing, a sense of constriction of chest. *θ* Tuberculosis.

‖Difficult expectoration of offensive, purulent sputa, with straining even to vomiting. *θ* Tuberculosis.

Heart, Pulse and Circulation. ‖‖Heart feels as if too large for containing cavity.

‖Feeling of constriction about heart.

‖‖Cramplike pain in præcordial region, causing palpitation, with anxiety.

‖Great pain in heart.

‖Palpitation: with numbness of arm; choking from slightest exertion; > by sitting down or lying on r. side; with fainting and anxiety; chronic with young girls.

‖Irregularity of beats of heart.

‖She feels beating of heart, with weakness, to sinking.

‖Palpitation after exertion or sudden excitement > by lying down; feels sick and faint; his face becomes white, but on lying down symptoms pass off in two minutes; for some time has been unable to lie on l. side because it caused pain at heart or dull oppression; lying on r. side weight of l. arm is painful; fulness at heart, as if pressing against side or had not free play. *θ* Heart disease.

‖Wakes from a troubled sleep of a few moments with a violent shock in præcordia and a sensation of suffocative constriction of chest; extreme distress for breath; face livid and covered with warm sweat; visible palpitation of

Digitized by Google

heart; heart seems to stand still and then start with a tremendous bound, followed by rapid tremor; pulse irregular, intermissions growing more protracted. θFunctional disturbance of heart.

‖Restless, trembling; anxiety about heart; hasty speech; suffocation on lying down; weight on chest; heart feels constricted. θRheumatism of heart.

‖Restless and trembling; hasty talking; great oppression; anguish about heart in rheumatism; irregularity in beats of heart. θPericarditis.

‖Tremulous irritability of heart after scarlatina or fevers.

‖Constant dyspnœa; sense of suffocation in chest and cardiac region, uninfluenced by position, exercise, etc.; pulse 160, feeble, small and occasionally intermittent; heart's action ditto; a mouthful of food or drink causes distress, burning and pain till vomited; believes she will not recover, but without anxiety. θHeart affection.

‖Obliged to sit up and lean r. side against pillowed chair, that pain in l. chest, with dyspnœa, might be >; frequent small pulse; could not bear neck and waistbands fastened. θHeart disease.

‖Hypertrophy of l. ventricle, with sensation as if heart was too large for its containing space.

‖Suffocative attacks on touching larynx or moving chest; fainting and anxiety from slightest motion of child; purple color of skin; coldness of extremities. θCyanosis.

‖Pericarditis, or endocarditis, after scarlatina or diphtheria.

‖Favors resorption of exudate in pericarditis.

‖Weight in chest with anxiety; spasmodic pain in heart, palpitation, feels constricted; sensation as if heart intermitted a single beat, produces slight cough which seems to re-establish circulation; shortness of breath after every motion, especially of hands; great weariness; inability to lie down on account of a suffocating sense of fulness in chest, necessity of removing all pressure from neck and chest and gasping for breath, when > of this lies on l. side with head high; most adapted to cases where fibrin is deposited on surfaces of heart, valves or investing membrane. θRheumatism of heart.

‖Dilatation of r. ventricle.

‖‖Woman, æt. 50, fleshy; dilatation of l. ventricle, aorta and carotid; when quiet she could lie down and sleep for an hour or two; when excited must sit by open window; bronchiæ are readily affected by cold; lungs fill up; could only breathe in upright position with great labor; constant cough from titillation behind sternum, at bifurcation; no expectoration, yet chest seems full of fluid.

‖‖Ebullitions in chest.

Digitized by Google

‖‖Cyanosis neonatorum.
‖Surface of body mottled; every effort to lift or move babe would cause it to cry out with pain; child's breathing after a crying spell so labored as to almost amount to asphyxia; extremities and feet cold; face and limbs puffed. θCyanosis.
‖Pulse: small, weak and accelerated; unequal; intermittent; alternately full and small; weak, slow, small.
‖‖Pulse weak and empty. θInfiltration on back.
‖Induration of veins and surrounding cellular substance.
‖Atheromatous condition of arteries in old people.
‖Capillaries fill quite slowly after pressure on skin. θScarlatina.

30 **Outer Chest.** ‖Blueness of skin.
Sensation of heat like from a hot stove on outer chest.
‖‖Burning pain as if in flesh of chest, two or three inches below l. nipple.
‖Swelling from above clavicle down to below pectoralis major, smooth and elastic, not painful, not red.

31 **Neck and Back.** ‖Blueness of external throat from distension of veins.
‖‖Intolerance of tight neckbands.
‖Pain in nape of neck to distraction. θWerlhoff's disease.
‖‖Stiff neck, moves jaw with difficulty; tearing from nape of neck up either side, to top of head.
‖Nape of neck painful to touch, and stiff.
‖‖Stiffness of neck, on r. side, sore to touch, giddiness with choking in throat.
‖Nape of neck sensitive to external pressure.
‖Stiffness of nape of neck, with catarrh.
‖Swelling entirely on l. side; smooth, livid appearance; suffocative sensations produced by touching neck or swelling. θBronchocele.
‖Glands of throat and neck badly swollen. θScarlatina.
‖Swelling on l. side of neck from angle of jaw downward to near clavicle, suppurated and abscess was discharged with lancet; after this patient declined and became much exhausted in strength; face pale, of dirty, dingy hue, with puffy aspect; appetite nil; restlessness day and night; constant hot, dry skin; extremely peevish and whining; abscess formed a large cavity from which there was sloughing of cellular tissue; no sign of healthy granulations; discharge foul and copious; pulse 140 and small; could not eat solid food on account of soreness of neck; extremely sensitive to all motions of head; profuse hemorrhage from abscess, at least a pint of blood; great prostration, refused food, discharges more foul, pulse rapid and feeble; constant

Digitized by Google

leakage of dark colored blood from sore. θAfter scarlatina.

Abscess near l. clavicle, another on l. side of neck. θAfter scarlatina.

Stitches in upper part of back, or along spine from below upward, or in whole back and in nape of neck, with stinging in r. arm and sensation as if it had gone to sleep, with itching on arms, hips and lower limbs.

From cervical vertebræ down to lumbar, whole r. side of back, width of three or four inches, much swollen, elastic, painless to pressure; dull pains intolerable after exertion, has to lie down in a kind of tetanic state. θInfiltration of cellular tissue.

Myelitis.

Pain in back, with great restlessness, with yawning and stretching of arms and legs; weariness, as from too great exertion, with awkward, tottering gait, with jerks, taking away breath or going into abdomen; small, painful spot, low down in back.

Intolerable drawing in small of back and down into legs, especially noticed in ischia, frequently in evening; drawing extending from small of back up back; drawing extending from back to hips, with urging to urinate.

Pain in small of back: as if lame and weak; intermittent fever; palpitation; dyspnœa; constipation; dysmenorrhœa.

Aching pain in lumbar region. θFistula.

Stiffness in sacrum, bending or beginning motion, extending to hip joint and thigh as if sinews were too short.

Continual pain in sacrum and coccyx.

Pain in os coccygis, when sitting down, feeling as if sitting on something sharp.

Continual pain in os sacrum and coccyx; drawing pain, as if sprained, in small of back, preventing motion; agonizing pain when rising from a seat. θCoccygodynia.

Tenderness in whole spine, most in neck, below occiput; headache in occiput and forehead; on turning or moving head pain in spine of neck into brain; pressure of finger on spine of neck sends pain to brain; pressure on dorsal spine sends pain to stomach; cannot bear to be raised up, and cannot raise herself in bed because of severe pain; little sleep. θAffection of spine.

Girl, æt. 5 years, since two years of age affected with caries of dorsal vertebræ resulting in deformed chest, leaving child feeble; lost control of both legs; toes moved sometimes involuntarily; she coughs some during day, but particularly at night on going to bed; much thirst; pain in spine, lies only on back; much

Digitized by Google

wheezing and rattling of mucus; fever and thirst at night; respiration feeble and difficult, with blueness of face; each coughing fit produced sweating; expectoration impossible; sleep much interrupted.

‖Boils half an inch in diameter near spine, with violent burning, throbbing pain.

‖‖Carbuncle in back of neck, purple or gangrenous.

Upper Limbs. ‖Pain in r. shoulder joint with headache.

‖Lameness in l. shoulder.

‖Soreness of r. shoulder, < when lying on it. θHepatitis.

‖Left shoulder and arm weak and lame, < lying on arm.

‖Painful feeling of weakness and lameness in l. shoulder and arm, < by using arm; shoulder and arm sensitive to touch. θTumor in l. mamma.

‖‖Axillary glands swollen, painless, purplish.

‖Garlic-like smell of sweat in axillæ.

‖Left arm nearly double its size, from elastic cellular infiltration.

‖Arms so weak that she is unable to raise them.

‖Makes odd motions with r. arm as if reaching for some object. θDiphtheria.

‖Tetters on arms and hands.

‖Brown spots on elbow joint.

‖Wrists very painful and swollen; could not study by day or sleep at night, for burning pain. θAfter bee stings on both wrists.

‖Left hand and arm numb while pain and redness in foot disappeared; pain and redness returned to foot, and hand and arm were well. θRheumatism complicated with epilepsy.

‖Pain in wrist joints as if sprained.

‖Twitching of hands. θDiarrhœa.

‖Tingling and pricking in l. hand; hands go to sleep.

‖Trembling of hands. θDrunkards.

‖The hands are cold as if dead.

‖Swelling of hands.

‖Phlegmonous inflammation of hand with great swelling and tendency to extend up arm.

‖Dark blue, blackish, hard swelling of back of hand and fingers, icy cold with a burning feeling, sensitive to touch in attacks every day, come suddenly, disappear slowly; rubbing upwards hastens disappearance; after touching ice.

‖Livid swelling of back of r. hand and fingers; began with severe itching and "creeping;" hand becomes blue and gradually darker, mottled, very hard; cold, but seems to him burning hot; sensitive to pressure; burning and pricking in finger ends; heat of stove = pain, but <

Digitized by Google

creeping sensation; throbbing pain at outside of wrist; sharp pain extending to elbow; spasmodic pain in elbow, when carrying arm in a sling; pain in one small spot under shoulder, pricking and burning in hand as it slowly goes away.

A laborer had been working among lumber three days before and thought he must have been poisoned; hand commenced swelling two days ago until it was three times its size; very red, pits on pressure, between first and second knuckle, opening as large as a three cent piece, looking like dirty soft soap; around this and along first three knuckles skin bluish black and inflated by gas; skin under black skin looked rotten, separated on opening first and second fingers, showing same soapy appearance, hand burnt (deep in) terribly; pain in red streaks that ran up from wrist; constant thirst; pulse not rapid, but soft.

Thumbs bend inwards. θEpilepsy.

Rheumatic swelling of index finger and wrist.

Panaritium, bluish swelling; stinging, pricking pains intense; erysipelas; necrosis, with fistulous openings; assumes purplish hue, becomes gangrenous.

Finger much swollen, looks bluish, has fistulous openings from which bony splinters have been discharged, three months in this state, during which time woman twice suffered difficulty in swallowing. θSore finger from bite of a drunken man, cauterized.

Pricking in extremities of fingers. θPanaritium.

Whitlow with necrosis of tendon, and much discoloration.

Right index finger atrophied; fetid sanious discharge from beneath nail; integument about root of nail tawny brown, bordering upon purple in parts. θOnychia.

Warts and excrescences on hands and fingers.

Numbness of finger tips (morning).

Cold, sweaty hands.

Bluish, mottled appearance of hands.

Panaritium, pricking, tingling, more than stinging; blue far around.

Felons, with proud flesh.

[83] **Lower Limbs.** Painful stiffness from loins down to sacrum and thighs.

Contraction of psoas muscle, after abscess.

Coxalgia, < 3 P.M. and after sleep.

Bruised feeling in hips. θDysmenorrhœa.

Sciatica for five days, with intolerable shooting pains, extending from l. hip down to foot, followed by sensation of intense heat as from a hot iron in parts affected,

Digitized by Google

and afterwards by perspiration and general prostration; pains extorted cries, < after sleeping.

Feet and legs œdematous, r. leg <; pale face; tongue yellow; sclerotic yellow; r. sided sciatica at night, awaking him; pains come suddenly and disappear gradually.

Pain constantly changing locality, now in head, now in teeth, now in sciatic nerve, attended with nervousness, palpitation of heart; burning like fire in hypogastrium, lumbar region and behind sternum. θSciatica.

Pain in thighs, as if swollen, in back part.

Gressus gallinaceus.

Weakness, especially of legs.

Uneasiness in lower limbs.

Feeling of weakness in knees after eating, with pressure in stomach.

Feeling as from a sprain in r. knee.

Stinging tearing in knees, with swelling.

Aching in knees on waking in morning.

Sensation as if hot air was going through knee joints, which were shaky.

Left knee feels as if sprained.

Swelling of knees, tension in bend, difficulty in stretching.

Pain in legs and stiffness in knees after sitting.

Near l. knee joint a bunch of varicose veins size of a fist; veins as thick as a thumb and hard as a rope.

Contraction of hamstrings, after popliteal abscess.

Synovial fluid dried up; pain in knee day and night.

On external side of knee bluish redness. θErysipelas of leg.

Much pain of an aching kind, in shin bones only.

A half painful sensation of a sore place immediately below lower edge of patella of l. leg, this trifling thing almost driving him wild; great distress of mind, as if some terrible evil was impending, the evil dreaded being in some way connected with the pain, but how, he could not tell.

Pains as if burnt in different places on tibia, at first itching, but after rubbing there appeared rather sensitive spots as large as a quarter dollar, with dark blue red margins and dry scurf.

Caries of tibia.

Erysipelas with pustules; leg swollen bluish red, discharged matter from several holes, presenting appearance of a large carbuncle, with itching.

Erysipelas of leg; restless, could not sleep, least movement or touch on leg almost throwing child into convulsions; very angry appearance, dark blue spots on upper part just below knee, rest of limb of a dark, glossy redness.

Digitized by Google

Ulcer on r. leg, with varicose swelling, after a fall.

Leg below knee terribly swollen, black and spotted. θRattlesnake bite on toe.

Phlegmasia alba dolens.

Hard red patch, with scabs on calf of l. leg; tender; thin, yellow fluid discharge from under scabs; itching, especially in cold weather.

Legs, from knees to end of big toes, covered with scales, circular or elliptic, raised and free on circumference, attached in centre and of horny consistence, resting on a purple bluish colored base; < every Spring; itching and burning, especially during warm weather, and when heated, or when warm in bed. θEczema.

Flat ulcers: with thin, offensive discharge and bluish areolæ; become erysipelatous from motion.

Ulcers of legs; bottom of ulcers uneven and dirty; discharge thin, odor offensive.

After scratching legs at night until raw, rapid suppuration, followed by a large, dirty looking, painful ulcer.

After running nail into foot, for which a salve was given, small ulcer where nail had pierced, soon followed by others, until whole plantar surface was covered; very little moisture from ulcers, which soon began to dry up, forming a thick, dry scale which covered sole of foot, in some places being a half inch thick.

Had been using washes of sulphate of copper, sulphate of zinc, sugar of lead, etc., for a year; ulcer at last dried up and patient was discharged as cured; on taking cold, a few weeks after, her entire foot and ankle broke out into small ulcers, resembling original sore; great pain in ulcers, itching of feet and ankles, almost unbearable; leg < after sleep and > from warmth.

Chronic indolent ulcers of legs, flat with purple skin; many small sores around main ulcer, which has an uneven bottom, burning and bleeding, even when lightly touched; ichorous, offensive discharge.

Virulent phagedenic ulcers.

Black, gangrenous ulcers and wounds on legs.

Chronic ulcers of lower extremities (probably of syphilitic origin) in which discharge ceased; extremity œdematous and hard, slightly red, swelling extending up along course of principal veins; great and sudden prostration of strength; low, muttering delirium and general typhoid symptoms. θPhlebitis.

Lacerating, jerking, rheumatic pains in legs as soon as he falls asleep; irregular action of heart and valvular murmur from rheumatic metastasis; deadly pallor of face. θRheumatism.

Uneasiness in lower limbs.
Trembling of legs.
Convulsions particularly violent in lower limbs, coldness of feet, stretching backward of body and crying out.
Swelling of l. leg and foot.
Rose red swelling of ankles. θErysipelas.
Injured ankles; severe contusions and lacerations; gangrene; bluish purple vesicles covering a dirty looking ash grey ground.
Woman, æt. 40, who had not menstruated for one year, sprained her foot; after exercise ankle greatly swollen, erysipelatous to knee; sticking pain in ankle when walking; upper part of foot covered with dark lentil shaped pimples.
Pain in second toe of r. foot; by evening livid swelling to knee, more painful when he walked; pain in both knees; cannot stretch out foot; toe painful on pressure.
Foot like marble from varicose swellings.
Swelling of feet, < after walking. θDuring pregnancy.
Icy coldness of feet; cold before epileptic attack.
Tingling in toes.
Gangrenous ulcers on legs and toes; rhagades of toes.
Proud flesh about ingrown toenails or in old wounds; stinging; purplish appearance.
Inflammation and suppuration of old chilblains.
Rheumatic swelling of index finger and wrist joint; rheumatic pains in knees, stinging, tearing and sense of swelling; swelling of knees with tension in bends of knees, difficulty in stretching limb and pain of thigh (posteriorly) as if swollen; bluish red swellings; pains < after sleeping; after profuse sweats l. side most affected; or the affection commences on r. and goes over to l.; arthritic contractions of limbs after abuse of mercury and quinine. θRheumatism.

[34] **Limbs in General.** Erysipelas of legs or arms; surface bluish, swelling glossy, impending gangrene.
Rheumatism, with swelling of wrists and ankles.
Three years ago, after great mental emotion, sudden cessation of menstruation, since then, headache, toothache, pain in joints, sciatica; for last year erratic pains in joints, particularly in morning on awaking; nervous irritability, palpitation, burning as from fire in hypogastrium, loins and behind sternum; transient flushes of heat in face, without sweat; loss of appetite; white coated tongue; pressure in stomach; constipation; several dry, painless varices in anus.
Acute or chronic rheumatism, recurring every year.
Bluish swelling of joints, after sprains.

‖‖Dark bluish swelling of cellular tissue, on hands, arms, legs, very sensitive; impending gangrene.
‖Boils on thighs and fingers.
‖‖Nightly burning in palms and soles.
‖Limbs stiff, straight or curved, after abuse of mercury.
‖Arm and leg paretic; crawling as if asleep. θInfiltration on back.

» **Rest. Position. Motion.** Lying down: vertigo; pain in head >; pressing or bursting pains in temples; anything touches throat seems as if he would suffocate, pain much <; pain in top of throat; constant coughing; slightest covering over nose and mouth produce suffocating dyspnœa; pain in lungs <; stiffness in sacrum.
Lying on r. side: > earache in r. ear; palpitation >; weight of l. arm on l. side is painful; as if something was rolling to that side of abdomen.
Cannot lie on l. side: causes pain at heart.
When lying on r. shoulder: pain <.
Lying on l side, with head high: > suffocating.
Lying on l. arm: shoulder and arm weak and lame.
Lying on back: involuntary urine; pain in spine; mouth open; must lie on back with knees drawn up, peritonitis, typhlitis.
Constant desire to lie down: acute pain in abdomen.
Must lie down: pain in back intolerable.
Cannot stand, has to lie down: child loses consciousness.
Lying with body and limbs doubled up: during chill.
Recumbent position impossible: from sense of suffocation; inflammation and swelling of tonsils.
Cannot lie, stand or sit quiet: pain in back and limbs.
Rising from lying position: cough.
Must change position frequently on account of pain in back and limbs.
Head always must be high: generally resting on hand.
Sitting: causes pain in thighs and stiffness at knees; constant cough; difficult breathing; pain in lungs and dyspnœa <; palpitation >; pain in coccygis; pain in legs; stiffness in knees.
Assuming upright position: pains in head change to beating in vertex.
Can only breathe in upright position.
Could not sit up without assistance.
When sitting bent forward: difficulty of breathing >; contraction of chest >.
Bending forward: spasmodic colic >; stiffness in sacrum.
Bending head backward: throat and larynx painful.
Bending and throwing head back: pain in lungs >.
On reaching up: vertigo.

going to bed; thirst during meals, drinks much at a time; pain in spine, lies only on back at night; finally cough more severe and accompanied by fever and thirst; respiration feeble, difficult, with blueness of face; each coughing turn produced perspiration; expectoration impossible; sleep interrupted.

[37] **Sleep.** ‖Great drowsiness.

‖Sleepiness without being able to sleep.

‖‖As soon as he falls asleep the breathing stops.

| |When falling asleep is awakened by tickling cough.

‖Could not sleep on account of strangulation. θScarlatina.

| |Sleepy and weak after dinner.

‖Persistent sleeplessness.

‖‖In evening very wide awake and talkative; lively as soon as the gas is lit.

‖Sleepless: from anxiety; especially before midnight, with talkativeness; on account of internal restlessness; abdomen and chest seem swollen; restless and nervous, burning in soles of feet, stinging all over.

‖Afraid to go to sleep for fear he will die before he wakes.

‖Tossing about, moaning, during sleep; children.

‖Restless sleep, with dreams and frequent waking.

‖Awakens at night and cannot sleep again.

‖‖Troubles come on during sleep, and patient wakes in distress or pain; cough, asthma or spasm.

‖Awoke in a fright about something trifling.

‖‖On waking: vertigo; dry, hacking cough; all symptoms worse.

| |Not refreshed after a good sleep. θHeart disease.

‖Restless sleep, with many dreams and frequent waking.

‖Constant dreaming, frequent waking, and again dozing and dreams, in morning is heavy and out of sorts.

| |Amorous dreams.

[38] **Time.** Morning: unhappy and distressed in mind; great sadness; heaviness and dejection; vertigo; on rising, headache over eyes; heaviness in occiput; vomiting of food and slime; epistaxis; thick, yellow discharge from nose; on awakening eyes <; pains in eye and head <; as if she would die of exhaustion; blowing of blood; skin began to redden and swell; throat >; hard cough; vomiting of bile; pain in rectum < till afternoon; ovaritis <; difficult breathing; numbness of finger tips; aching in knees; feels bruised.

9 A.M.: neuralgia in face begins.

Forenoon: want of appetite.

Noon till midnight: visions and delirious talk<; swollen face; erysipelas <.

Day: sleeps a minute or two at a time; symptoms >; head

Digitized by Google

pains; short, dry cough; after a nap, hawking of mucus and rawness in throat; after sleeping, pains in throat <; very sleepy but cannot sleep; several attacks of nausea, with shortness of breath; sleep < pains in abdomen; flushes of heat; sensation of foreign body in throat; constant cough; cough <; restlessness; pain in knee; talks too much; itching in paroxysms.

Afternoon: attacks of delirium tremens; headache <; soreness of vertex changes to darting; facial neuralgia goes off; tonsillitis <; fever <; dyspnœa <; violent chill; intermittent fever, < 2 P.M.

3 P.M.: coxalgia >.

Evening: vertigo; pain in back of head; bluish grey ring before eyes; wide awake and talkative; feels nearly well; pain deep in l. ear; if anything touches throat, seems as though he would suffocate; pain much <; sensitiveness of throat <; watery stools with burning; cough on lying down; drawing in back and legs; trembling of limbs; violent chill; heat in hands and feet; burning in palms and soles.

9 P.M. until going to bed: nervous cough.

Night: loquacity; delirium; does not sleep; pain comes on and lasts till end of next day; short, dry cough; tearing pain in side of head <; orbital cellulitis <; earache in r. ear; eruption beneath eye itches; itching on face; dryness in throat; comatose; very sleepy, but cannot sleep till towards morning; least touch on mouth and nose causes threatened suffocation; stools bloody and slimy; eighteen or twenty stools; constant erections; menorrhagia with chills; something runs from neck to larynx, stops breathing and awakes him; almost suffocated; constant cough; fever <; awakens with fear of suffocation; dry cough; perspires very much; restlessness; fever and thirst; pain in wrists; sciatica in r. leg; pain in knee; constant dreaming; chills; burning in palms and soles; heat as from orgasm of blood; itching intense; burning in ulcers.

Before midnight: sleepless.

Midnight: became insensible; sudden diarrhœa; wakened by contraction of chest.

After midnight: no sleep.

[59] **Temperature and Weather.** Worse during Spring and Summer, or from extremes of temperature; < from the sun's rays.

Open air: vertigo, from walking; desire for, before menses; causes violent, tickling cough; symptoms >; after scarlet fever swelling of whole body; must open doors and windows; during suffocating attacks.

Digitized by Google

Draft of air: throat <.
Must sit by open window: heart disease.
In sun: headache.
Heat: headache; ulcers >.
Warm weather: diarrhœa <; legs burn and itch.
Warm room: chill abates.
Warmth of bed: itching of legs <; cannot keep limbs quiet.
External warmth: desire for; toothache >; pains in head >; earache >; wants head closely wrapped up.
Hot drinks: throat symptoms <; cause toothache; bleeding of gums <.
Heat of stove: pain in hands >; creeping sensation <.
Change of temperature: cough <.
Damp weather: cough <.
Wet weather: ulcers in throat <.
Getting wet: causes toothache.
Exposed all day to cold, wet weather, at night comatose.
Washing: pains in throat <.
Cold water: headache >; burning in ulcer >.
Cold or warm drinks: cause toothache.
Cold weather: itching of scabs on calves of legs.
Complaints in damp, warm Spring weather.

40 **Fever.** ‖Shivering without coldness. θDysentery.
‖Cold shudders ascending.
| |Single paroxysms of shivering.
| |Icy coldness of feet.
‖Cold feet, with oppression of chest.
‖Numbing coldness.
‖Violent chill in evening, chattering of teeth and feeling as in trismus.
| |Chill in afternoon, pains in limbs, pleuritic stitches, oppression of chest and convulsive movements.
Chill runs from hollow of back upwards over shoulders, nape of neck, back of head as far as vertex, with a sensation as if drawn at base, goose flesh on parts affected.
‖Chill: commencing in small of back; runs up back to head; beginning across back and shoulders; > in warm room; desires external warmth.
‖Shaking chills in several attacks daily, the almost unconscious woman is thrown about in bed. θPuerperal fever.
| |Shaking chill for two hours. θErysipelas of leg.
‖Unconscious; livid face; shaking chills; skin hot or cool. θMetritis.
‖Rigors, nausea, subsequent fever. θEpidemic laryngitis.
‖Wants to be near fire and lie down; heat makes him feel >, but chill continues.

Digitized by Google

Child must be held firmly to > pain in head and chest and prevent shaking; feels > if held or pressed down.
After icy cold calves, shaking chill with warm sweat; then strumming through limbs, intermingled with flushes of heat.
Chill and heat alternate and change place.
Chills at night, flushes of heat by day. θMenorrhagia.
Shivering during heat.
Heat, particularly on hands and feet, in evening.
Burning in palms and soles, evening and night.
Heat at night, as from orgasm of blood; throat sensitive.
Internal sensation of heat, with cold feet.
Dry, burning skin.
Heat: with violent headache; livid complexion; oppression of chest; deep breathing and sleep; great loquacity.
Great inclination to sweat.
Sweat: profuse, with most complaints; cold, stains yellow; brownish yellow; bloody, staining red; between paroxysms of fever; at night; affords relief.
Sweat about neck after first nap. θPhthisis.
Strong smelling perspiration in axilla, like garlic.
Intermittent fever; severe pain and soreness on pressure in region of spleen, shooting to breast or l. side of neck.
Intermittent fever recurs every Spring, or after suppression in previous Fall by quinine; < in afternoon, 2 P.M.; face red, headache, feet cold; talking during hot stage; excessive burning and rending pain during relapse into bilious intermittent after quinine.
Intermittent fever in Spring or begining of Summer.
Intermittent fever for eight years, suppressed by large doses of quinine in Summer, to return every Spring; complexion when fever was present a grey, ash color.
Chills for six months in Summer and Fall, suppressed with blue mass and quinine, returned following May; convulsions during chill.
Sinking chills annually, in August, for nine years, has always been dosed heavily with morphine, brandy and quinine to prevent "fatal third chill;" drenched in sweat for many days after each attack, takes months to recuperate; fever always tertian.
Restlessness; pain in lumbar region; constipation; tongue coated thick, brown, furrowed and tending to dryness; soreness across bowels; chill comes on at 2.30 P.M.; body drawn up in a heap; tip of nose and ears cold and icy; forehead cold; skin shriveled and livid; pulse filiform, dying away; rapid yawning, incessant sighing; dark areola around eyes, fast becoming darker as she sinks into stupor. θTertian ague.

Intermittent fifth day after confinement; chills daily, with great violence, for a week (sewer gas in house); inflammation of l. ovary; shuddering; prostration; at end of fourth week discharge of pus and blood through abdominal wall.

Typhus: delirium; tongue red or black, dry or in fissures, especially on tip; trembles when put out, or tip remains under lower teeth or lip.

Stools, with sediment of flakes of decomposed blood, having appearance and form of perfectly charred wheat straw, in longer or shorter flat pieces, together with portions more or less ground up; violent epistaxis in morning. θTyphoid.

After prolonged quiet; loquacious mood; talks day and night, if not to those in room, to imaginary persons; jumping from subject to subject; desire to lie in bed with clothing away from neck. θTyphoid.

Great prostration daily increasing, until twenty-three days had passed without any crisis; complete delirium with muttering, and complete prostration; the only position was upon back; if placed on side rolled at once upon back; tongue dry, black and cracked; patient evidently sinking. θTyphoid.

On ninth day, profuse, sour sweat without relief; delirium; headache; eyes strongly injected, gaze unsteady; loss of consciousness; constant unintelligible mumbling; pulse hard, small, 120–140; tongue dry, black, cracked and bleeding, can be protruded only with great difficulty, then trembles; lips cracked, black, bloody; unquenchable thirst; hardness of hearing; abdomen soft, but in all places painful; stools (lumpy) crumbling frequent, yellow, orange colored, or tinged with blood; urine suppressed; profuse sweats; finally, involuntary escape of stool and strongly smelling ammoniacal urine; will lie only upon back; dyspnœa and cough with copious expectoration of blood streaked mucus. θTyphoid.

Case had run into fifth week, became thoroughly dyscrasic, death seemed imminent from asthma. θTyphoid.

Typhoid fever, third week, with delirium; tongue dry, black, cracked; throat dry and cracked; unable to put tongue out.

Muttering delirium; yellowish red, dry, tremulous tongue; moderate thirst; pulse 70; rational for a little time when awake, then subsides into delirium; paralysis of motory nerves of limbs. θTyphoid.

Exposed all day to cold, wet weather; at night comatose; high fever; tongue dry, red at tip, soon becoming

Digitized by Google

brown in centre; pupils contracted, then dilated; vomiting of greenish water; restless from colic, requiring three attendants to keep him on bed; continually throws off bedcovers; unconscious of external impressions; pulse about 120, four beats to one respiration; involuntary stools and micturition.

‖Fever < in afternoon, sweat without alleviation; symptoms < after sleep; loss of consciousness; muttering; stupor; sunken countenance; dropping of lower jaw; dry, red or black tongue, cracked on tip and bleeding; in attempt to protrude it, it trembles, or tip remains under lower teeth and does not come out; dry lips, cracked and bleeding; stools very offensive, whether formed or loose; dyspnœa and cough, with slimy, bloody expectoration. θTyphus.

‖‖Yellow fever: delirium at night; loquacious, disposed to quarrel; slow, difficult speech; drowsy; rush of blood to head; red face; yellow conjunctiva; yellow or purplish tint of skin; blood dark, non-coaguable; small wounds bleed much; perspiration stains yellow; lips dry, cracked and bleeding; tongue heavy, trembling, dry and red, cracked at tip; tip red, centre brown; difficult speech; sour eructations; heartburn; nausea after drinking; vomiting, with palpitation; dyspnœa; anxiety about heart; cannot lie on l. side; irregular weak pulse; urine almost black; persistent sleeplessness; fainting; trembling all over; sudden flushes of heat; sensitiveness about neck and pit of stomach against any pressure; < when waking; > after nourishment.

‖Blood dark and does not coagulate. θYellow fever.

‖Cellulitis, particularly of rectum and anus, with burning and blue color of skin. θYellow fever.

“ **Attacks, Periodicity.** Periodic: raging through upper jaw to ear; exacerbations with chronic angina.

Attacks: of weakness, even to syncope; of sensitiveness to touch in hands; of itching.

After every evacuation: sore, burning pain.

Alternate: heat and chills; squeamishness and facial neuralgia; diarrhœa and constipation.

After few minutes conversation: a curtain seems to fall down in front of pharynx.

At long intervals: urination.

For one hour: violent laughing.

For one hour every day: catamenial flow.

For two hours: shaking chill.

A few hours after eating: gnawing in stomach.

Every few hours or days: flow of blood from vagina.

Digitized by Google

For several hours: tearing pain in head then disappears for a day or two.
For five or six hours: pain in arm and shoulder.
Several times a day: epistaxis of venous blood; most violent shaking chill.
4 A.M.: heat continues from bedtime.
10 A.M.: fever.
Until 11 A.M.: feels well, then faint and weak.
Afternoon: delirium tremens; vomiting; fever.
Evening: persistent vomiting.
2.30 P.M.: chill.
Nightly attacks: of anxiety; hallucinations; pain in limbs; at 10 o'clock dryness of throat and thirst; of spasm of glottis; burning in palms and soles; burning in ulcers.
Towards morning: sweat.
First day of menses and day previous to appearance: pain.
Every day at 11 A.M.: hunger; throat >; violent chills.
Every day at 11 P.M.: heat and smarting in l. throat.
Alternate nights: vomiting.
Every other day: feeling of obstruction in throat on swallowing; chill ascending back.
On second or third day: threatened metastasis to meninges.
Every two or three days: acute colicky pains.
For three nights: no sleep.
Three days before menses: leucorrhœa.
Every three or four days: intense headache.
From three to eight days before menses: green, thick yellow leucorrhœa.
For five days: sciatica.
On ninth day: profuse sour sweat without relief.
Every eight or ten days: headache.
For ten days after menstruation: leucorrhœa.
For twenty days: no stool.
Twenty-three days passed without crisis: typhoid.
For many days, after each attack of chill: sweat.
Third week: typhoid fever with delirium.
The day before catamenia: great desire to go in open air.
Every four weeks, for four or five days, nervous debility <.
For several weeks: partial deafness.
Every two or three months: menses late.
For three months: fistulous opening in fingers, during this time she suffered twice with difficulty in swallowing.
At every menstrual effort: eructations amounting to vomiting; cardialgia; oppression of chest.
For eight months: no menstruation.
Lasting all Winter and Spring: cough.
In the Spring: toothache; diarrhœa.

Digitized by Google

In the Summer: toothache.
Every Spring: lower extremities covered with scales <; intermittent fever, or after suppression in previous Fall, by quinine; eruption.
Every Fall: eruption.
Every year: angina; acute or chronic rheumatism; in August, for nine years, sinking chills.
For one year: no menstruation.
Sunstroke two years previous to confinement, in bed ever since; two hours after delivery convulsions.
After twelve hours comatose.
Three years ago: after great mental emotion, sudden cessation of menstruation; erratic pains in joints.
For four years: piles; stitching, cutting pains in l. breast.
For eight years: intermittent fever.
For ten years: constipation.
Eighteen years' standing: dysmenorrhœa.
For last twenty years: eruption on l. forearm and on l. lower abdomen.
For years: violent pains over l. groin; succession of carbuncles.

[42] **Locality and Direction.** Right: pain in side; oppressive pain < on side; partial paralysis; semi-lateral headache; as if part of side of head was cut off; soreness of vertex to side of head; pricking pain in limbs; severe pain commencing in inner canthus, extending to superciliary ridge; jerking in eye; sticking, drawing pain in eye; pain in ear > lying on side; pain as if something was lodged in side of throat; stitch in side; feeling of obstruction in throat; pain in side of throat; tonsil swollen; uvula clinging to tonsil; makes odd motions with arm; as if something was lodged in side; as of a ball rolling from side to stomach; tearing in abdomen; cutting in side of abdomen; pain from lumbar region through sacrum; violent pain over groin; swelling of ovary; pain in ovarian region; ovary size of a fist; induration in ovarian region; fungus hæmatoides on mamma; lung affected; must lean to side to > pain in chest; stitching pain through side of chest; dyspnœa <; lying on r. side weight of l. arm is painful; dilatation of ventricle; stiffness of neck on side; stinging in arm; side of back swollen; pain in shoulder joint; soreness of shoulder; makes odd motions with arm; livid swelling of back of hand and fingers; index finger atrophied; leg œdematous; sciatica in leg; knee as if sprained; ulcer on leg; pain in second toe of foot; stitching pain in side of chest; thick patches of exanthem on side from spine to sternum; immense carbuncle side of spine; rheumatism commences.

as if sprained; hands cold as if dead; as of a hot iron from hip to foot; thighs as if swollen; as of a sprain in r. knee; as if hot air was going through knee joints; l. knee as if sprained; as if burnt in different places on tibia; burning as from fire in hypogastrium, loins and sternum; crawling as if asleep in arm and leg; as if epithelium was peeling off gums; as of a plug in throat; teeth feel as if wedged; tongue feels as if scalded; head as if drawn at base; skin around carbuncle as if too short; as if flesh was being torn from bones.

Pain: in l. temple and occiput; in forehead; in back part of hip and l. side; region of spleen; over eyes; top of head; in l. ovarian region; from superciliary ridge to occipital protuberance; deep in orbit of eyes; in l. side of abdomen; in back of head; in eye; deep in l. ear; in ears; in limbs; in stomach; in throat to nape of neck; on swallowing; in small spot in throat at one side of larynx; in top of throat; in l. side of throat extending to tongue, jaw and ear; in epigastrium; as though something was gnawing in stomach; in liver; in l. hypochondrium; in abdomen; in region of cæcum; from r. lumbar region through sacrum and inguinal region and forepart of thigh; in rectum; in r. ovarian region; in uterine region; in hypogastric region; in stomach; from l. breast to axilla down arm to hand; down arms; in pit of throat to root of tongue and to hyoid bone and to l. tragus, behind which it shoots out; in l. chest; pain in hemorrhoidal tumors; in chest; in heart; in nape of neck to distraction; in small of back; in coccygis; in os sacrum; in spine; in r. shoulder joint; in wrists; in wrist joints; in one small spot under shoulder; in red streak that ran up from wrist; changing locality, now in head, now in teeth, now in sciatic nerve; in thighs; in legs; in knee; in a sore place below lower edge of patella; in second toe of r. foot; in joints.

Sensitiveness of internal and external parts.

Intolerable colic.

Tension: from neck to eyelids; and thread, along arms and legs; in external parts.

Ulcerative pain: in internal parts.

Burning as from fire: in hypogastric region; in loins; behind sternum.

Agonizing pain: in back when rising from seat.

Intense pain: in head; down neck; in l. eye; in thigh; in arm and hand.

Violent pain: in head; in throat; over r. groin, extending either to genital organs or to liver and chest.

Digitized by Google

Severe pain: all over head; in and above eyes; from inner canthus upward and outward in a semicircle just above superciliary ridge in forehead; in limbs; in lumbar region; in epigastrium.
Terrible pain: in head; over eyes; in r. ovarian region.
Acute pain: in liver and towards stomach.
Great pains: in back and limbs; in heart; in ulcers on foot.
Anguish: about heart.
Horrid pains: all over head.
Sharp pain: at root of tongue; through lungs; extending from wrist to elbow.
Raging: in roots of lower teeth.
Violent, darting, stabbing pains: from upper part of forehead down to centre of head.
Lancinating pains: in breasts.
Lacerating pain: in legs.
Cutting, lacerating, burning pains: in abdomen.
Acute cutting, stinging pains: radiating from navel over upper portion of abdomen.
Cutting: in head; in teeth; in r. side of abdomen; in rectum; in abdomen; in l. breast.
Sharp, cutting pains; when passing water.
Tearing pain: in temples; in whole l. side of head from temple to collar bone; in top of head; from zygoma into ear; in forehead and l. malar bone and under l. eye; in jawbones; in roots of lower teeth; in temples; in abdomen; in rectum; from nape of neck up either side to top of head; in knees.
Sharp, shooting pains: from eyes to temple; in l. ovary.
Shooting pain: into l. ear; in throat; in region of spleen; in rectum; from l. hip down to foot.
Piercing pains: in teeth.
Sticking cutting: in forepart of urethra.
Sticking: on vertex; in head; in ankle.
Stitching pain: in eyes; from stomach to chest; through r. side of chest; in back.
Stitches: in forehead; in chest; in eyes; in r. side; in rectum; in kidneys, downward and apparently through ureters; in ovary; in hemorrhoidal tumors, with cough; in l. side of chest; in upper part of back; in whole back.
Painful beating: in ears; in rectum.
Bursting pain: in temples.
Beating pain: in head; in vertex; in teeth.
Ulcerative pain: about liver; above and along ribs.
Boring: on vertex; behind l. ear; in jawbones; in teeth.
Pleuritic pains: in chest.
Throbbing pain: in temple; in vertex: in head; in jawbones; at outside of wrists.

Darting: from throat to occiput; in arm.
Hammering: in head.
Pulsating pains: in teeth.
Thrilling pain: at root of tongue.
Neuralgia: l. side orbital; horrible of trigeminus; in face; ovarian.
Rheumatic pains: in head; in legs; in knees.
Aching pain: in lumbar region; in forehead; in l. frontal eminence; r. side of head gradually going to l.; across loins; from occiput to eyes; in r. ear; in small of back; in thighs anteriorly; in branches of anterior crural nerve; in os hyoides; in knees; in shin bones.
Hard aching: all over; in head; back and legs; in uterus.
Dull aching: in sinciput.
Violent laborlike pressing from groins downward.
Acute colicky pains: low in abdomen.
Excessive griping: in abdomen.
Laborlike pains: in uterus.
Bearing down pains: in uterine region.
Gnawing: in stomach; in sides and deep into abdomen.
Cramps: in abdomen; in chest.
Cramplike pains: in abdomen; in præcordial region.
Menstrual colic: beginning in l. ovary.
Spasmodic colic.
Sensation of incarcerated flatus.
Sticking, drawing pain: in r. eye; in l. eye; in throat.
Dull sticking: in roots of lower teeth.
Stinging, burning pains: in panaritium.
Burning stinging: of skin.
Burning, throbbing pain: in boils on spine.
Burning pain: in top of head; in vertex; in eyes; in mouth; in rectum; in l. ovary; in wrists.
Burning heat: in epigastrium; in hypogastric and lumbar regions; from hip to foot; behind sternum.
Stinging: through ears; in throat; in r. side; in r. arm; in tips of fingers; in knees; all over.
Sore pain: in urethra; in forepart of penis.
Smarting: in l. throat.
Burning: in vertex; of eyes; of erysipelas in face; of face; of tongue and lips; of swelling of throat; in anus; in rectum; when urinating; in chest; in icy cold hands; in finger ends; in hands; terrible deep in hand; of eczema on legs; in palms and soles.
Pricking pain: in upper and lower extremities.
Dull, stinging pain: in stomach.
Heat: in forehead; in l. throat; in occipital and cervical regions.
Heavy pain: in forehead to back and all over head.

Dull pain: in forehead; in legs; over and in eyes; in bladder.
Pressing pains: in eyes; in umbilical region; in l. ovary; from loins to privates.
Tensive pain: from neck over head to eyes; in l. ovary.
Drawing pain: in l. temple; from eyes to occiput; in jawbones; in teeth; from anus to umbilicus; in ovarian region; intolerable in small of back and down into legs; up back; from back to hips.
Spasmodic pains: in anus internally; in heart; in elbow.
Throbbing: in anus; in rectum.
Soreness: of neck; at vertex; of mouth; in throat; of nostrils and lips; of internal nose; of internal throat; in l. side of throat; of external throat; about pelvic region; of larynx; of r. shoulder.
Soreness: in region of spleen; across bowels.
Sore feeling: in eyeballs.
Scraping: in throat.
Rawness: of throat.
Bruised feeling: in hips.
Painful pressure: in rectum; when making water.
Gnawing pressure: in stomach.
Laborlike pressure: from loins downwards.
Violent pressure: on top of head; in stomach.
Pressure: in orbits; in stomach; severe in a small spot between epigastrium and navel; in bowels; upon bladder.
Oppressive pain: in one or other temple; in chest.
Painful contraction: in throat.
Painful sensitiveness: in l. temple, from vertex down and in l. side of face.
Great sensitiveness: of lower abdomen.
Tenderness: of scalp; in l. iliac region; in epigastrium; in whole spine; of body.
Peculiar painful sensation of weakness and lameness: in l. shoulder and arm.
Distress: at stomach.
Painful weariness: of face, neck and head.
Extraordinary weakness: diphtheria.
Weak feeling: in abdomen; in knees; in l. shoulder and arm; in legs.
Sinking, fluttering feeling: in epigastrium.
Uneasiness: in lower limbs.
Contractive tightness: in region of liver; in abdomen.
Throbbing, choking sensation: in throat.
Choking sensation: in throat.
Suffocative sensation: in throat.
Dry, stuffed feeling: through whole front of head.
Stuffed feeling: in ears.

handle the child at all; the least touch seems to hurt it, and to leave a deeper blueness, like a bruise.

‖‖Hemorrhages, blood dark, incoagulable; typhoid.

‖‖Affections produced by blood poisoning; pyæmia.

‖Venous stasis with a direct paralytic-like affection of medulla spinalis combined with general anæmia.

‖‖Bluish color of affected parts; cyanosis.

‖Small wounds bleed much.

‖Purpura. θScorbutic purpura.

‖Inflammation of internal organs with suppuration.

‖Veins on whole l. thorax up to throat much dilated.

‖Menopausia troubles, especially when capillary circulation is affected.

‖‖Dropsy; from liver, spleen and heart disease; after scarlatina; urine black, legs œdematous, first l. then r.

‖‖Cellulitis, with burning and blue color of skin.

‖‖Ulcers sensitive to touch; ichorous, offensive discharge; many small pimples surround them; areolæ purple; > from warmth.

‖‖Gangrene, or carbuncles from blood poisoning.

‖Malignant local inflammations, with secondary blood infection and nervous prostration.

‖Circumscribed gangrene; idiopathic and traumatic; of tongue; of foot.

‖‖Suppuration, particularly in internal parts.

‖Traumatic gangrene, restores vitality to parts apparently dead and induces renewed circulation without sloughing.

‖‖Malignant pustule.

‖‖Sphacelus.

‖‖Gangrena senilis.

‖Melanosis, colloid and encephaloid cancer; violent burning, gangrenous spots.

‖Ulcers and wounds bleed readily and profusely.

“ **Touch. Passive Motion. Injuries.** Touch: cannot bear shirt or neckband on throat; can scarcely bear clothes to touch lower abdominal region; temple sore; on throat causes darting; face sensitive; lower jaw sensitive; throat swollen and sensitive; pit of stomach sore; liver sensitive; stomach sensitive; slightest, causes excruciating pain in abdomen; ileo-cæcal region sensitive; uterine region sensitive; womb sensitive; nipple sore; a spot on anterior portion of neck tender; larynx sensitive; pit of throat painful; neck sore; on larynx causes suffocative attacks; on throat causes cough; infraclavicular region sensitive; nape of neck painful; shoulder and arm sensitive; hands sensitive; ulcers on legs bleed and burn; ulcers sensitive; produces black and bluish spots.

Google

Taking hold of throat causes nausea.
Cannot bear bonnet strings tied tight.
Does not like hair touched.
Hernia will not admit handling.
Pressure: bursting pains in temples; pain in front of styloid process <; on throat causes sensation as if eyes were forced out; on throat causes severe pain; pain in r. ovary; tumor in breast painful; larynx sore; cough <; on larynx causes cough; capillaries fill quite slowly; nape of neck sensitive; of finger on spine of neck sends pain to brain; on dorsal spine sends pain to stomach; swelling on hand sensitive; toe painful.
Cannot bear pressure: about neck, hypochondria, abdomen, stomach and l. iliac region.
Abdomen sensitive to weight of clothes.
Uterus does not bear contact and has to be relieved of all pressure; frequently lifts clothes, they cause uneasiness.
Feels > if held firmly or pressed down.
After scratching at night on calf: an ulcer.
When effort is made to lift or move babe it cries out.
Shock from injuries.
After a fall: ulcer on r. leg, with varicose swelling.
After running nail into foot: small ulcer.
‖Gangrene of hand, ten days after a bullet wound in hand.
‖Wound in hand from explosion of a pistol; fifth day gangrene.
‖Hydrophobia.
‖From dissecting wound in finger that member very much swollen, hand and forearm much swollen and œdematous; a hard red line extended from wrist to axilla; axillary glands swollen; arm and hand intensely painful; whole l. side partially paralyzed; extreme prostration; low muttering delirium at night; marked aggravation on waking; abscesses formed under deep fibrous tissues of finger and hand.
‖Dog bite (seven cases); in two adult males who used alcoholic drinks there were shudderings and flushes of heat at intervals of a few weeks for two years.
‖After compound fracture of leg six or eight gangrenous spots, as large as a dime, and each point marked by a black blister which broke and revealed circular spots of gangrene; livid appearance of skin; delirium on closing eyes; < after sleep. θGangrene.
Compound comminuted leg fracture, terminating in gangrene and threatening speedy destruction of limb.
‖Gangrene of finger which had been mashed; on fourth day after injury shooting pains from finger to wrist and up arm; on fifth day fetid odor and some grey

Digitized by Google

blisters indicated gangrene; next day line of demarcation formed entirely around finger; patient restless, cheerful beyond reason; by twelfth day all traces of gangrene had disappeared; no tissue lost by sloughing.

A man a week ago was struck by corner of a heavy box on inner surface of leg and cutting down into calf; leg much inflamed; leeches were applied; severe chill; since chill nothing has remained on his stomach; severe pains set in, whole of wound and two leech bites gangrenous; very severe headache; breath very fetid: sleepless, his shining eyes constantly in motion; tongue trembling; pulse 110, small and irregular.

Elderly lady was bitten by a pet cat through ball of thumb; whole hand and arm swollen and painful; thumb suppurated and for months resisted all efforts to heal. θCarbuncle.

Bedsores in typhoid fever; ulcers red and inflamed, with black edges.

Small wounds bleed much.

Old chronic flat ulcers on lower limbs, with discolored areolæ.

Skin. Itching over whole body, burning; yellow or purplish blisters; scabies.

Itching intense, almost driving to distraction, mostly at night, but also by paroxysms in daytime; often changing to a severe, burning stinging sensation. θPustular eruption.

Skin dry and burning. θDiphtheritis. θScarlatina.

Jaundice. θHepatitis. θTyphoid.

Red lumps and tubercles.

Rash all over; small smooth spots size of a needle point.

Yellow, red and copper colored spots.

Ecchymosis; purple or black spots.

Purpura hæmorrhagia.

Bluish black swellings; dark blue blisters.

Body covered with bluish red eruption, round and elevated. θDiphtheria.

Child, æt. 1, had gums lanced, bled five days, finally flow arrested, but child became cachectic and dropsical; black and blue spots appeared all over him; least touch or pressure produced them; much < after sleeping; extreme deathly paleness.

Small reddish spots on face, neck and arms.

Miliary eruption; rash appears slowly or turns livid or black; comatose.

High fever; stitching pain on r. side of chest and back; thick patches of exanthema on r. side, from spine to sternum, and from fifth to ninth ribs; at first erup-

Digitized by Google

tion vesicular, then pustular; whole surface of skin occupied by eruption, very red and swollen, especially intense around margin of each patch; high fever, adynamic in character, slight morning remission; on fifth day pains in back unbearable; several groups of pustules near spine have a hemorrhagic appearance, gradually spread from one group to another until it reached axillary line; sufferings of patient almost unendurable; will take no food except a small quantity of soup and wine; great prostration from loss of sleep, from pain. θHerpes zoster after external application of *Rhus tox.*

For last twenty years, eruption on l. forearm and on l. lower abdomen; eruption begins as a small boil which disappears, leaving a dry, scaly, itching eruption; then other boils appear successively, all going through same process; this goes on until most space between elbow and wrist, and a space as large as palm of hand on lower abdomen is covered with itching dry eruption; > for a few weeks, when little boil reappears and same process is gone over.

Old reddish herpes, with thick scurf in region of whiskers; reappearance of suppressed herpes in face.

Pale, chlorotic, emaciated; blackish or bluish blisters with sanious, fetid contents. θHerpetic ulcers.

Vesicles large, usually of yellow color first, and then turning dark with much pain; vesicles break and leave an excoriated surface, which burns when touched; eruptions every Spring and Fall; < from acids. θHerpes.

Vesicular eruption, with a red crown.

Red spots, with vesicles on fingers and thighs.

Eruption of yellow or purplish blisters.

Bullæ dark from bloody serum within. θPemphigus.

Gangrenous blisters.

New pustules and at same time many of older ulcers and scabs surrounded by blue halo; veins of legs enlarged from pregnancy, unusually blue and knotty, almost appearance of incipient gangrene; itching, burning and stinging pains.

Pustules size of pea to five cent piece, on back, legs and particularly about ankles; isolated pustules, rapidly filled with sero-purulent matter and surrounded by an inflamed halo came in small crops; these pustules soon dried into hard, dry scabs easily knocked off, leaving red moist surfaces sensitive to contact with atmosphere or bedclothes.

Confluent smooth, round, white pustules of size of a mustard seed in palms of hands; they contained a white fluid and itched intolerably.

Digitized by Google

Index finger of l. hand quadrupled in size; hand and forearm much swollen and œdematous, a hard red line extending from wrist to axilla; axillary glands swollen; arm and hand intensely painful; whole l. side partially paralyzed; extreme prostration, causing disease to be at first mistaken for typhus, low muttering delirium at night; marked aggravation of suffering and prostration on awaking from sleep; abscesses forming under deep fibrous tissues of finger and hand. θSepticæmia, result of dissecting wound.

Swelling assumes a purplish hue, and patient commences to be delirious as soon as he closes his eyes; bloated red face, attended by heat; coldness of extremities; tendency to faint, with numbness; swelling of part is not great, but firm; suppuration occurs in spots, does not discharge, but dries up into cheesy mass, which is revealed by skin covering it drying up and peeling off; sometimes bullæ containing dark colored serum. θErysipelas.

Erysipelas contracted while dissecting; has been sick a week; face swollen, bluish red, or leaden hue; tongue dry, glossy, tremulous; < from weight of clothes, from noon until midnight.

Dark red, very large and thick swelling, soft as dough when touched.

Varicose veins ulcerate.

Bedsores in typhoid fever; ulcers red and inflamed, with black edges.

Furuncular formation, generally upon lower lip, attended with severe pain and frequently surrounded by erysipelatous areola; rapid and excessive loss of strength, reduced from vigor to absolute prostration within twenty-four hours. θEpidemic malignant pustule.

Bluish color of pustule, and red streaks along lymphatic vessels. θMalignant pustule.

Immense carbuncle, six inches in diameter, appeared in dorsal region to r. of spine, attended with rigors, nocturnal sweat, fever and prostration. θAfter bite of a cat.

Dark redness around sore, which discharges dark, bloody pus; tension of skin around carbuncle, as if too short; nightly burning in ulcer, obliging one to rise and wash it with cold water. θAnthrax.

Black and blue spots; ecchymoses all over body; least touch or pressure produces them; tenderness of body; deathly paleness of face; < after sleep. θAnasarca.

After scarlet fever, upon going out into air before desquamation had occurred, swelling up of whole body, scrotum as large as child's head, urine diminished, res-

Digitized by Google

piration oppressed; on l. side of throat glandular swelling, extending up behind ear.

Inflammation slow; skin over dead cellular tissue little disposed to ulcerate, and when finally perforated in three or four places, discharge scanty, thin, sometimes bloody; great prostration. θCarbuncle.

Man, had suffered for several years from a succession of carbuncles and indolent boils; lately four successive carbuncles, none of which ran a complete course; after each of these carbuncles patient's health deteriorated, until, after last, took to bed, with hectic fever; an abscess deep in adductor muscles of thigh being opened, discharged about a quart of pus; formation and discharge of pus continued profuse; patient rapidly growing feeble, with severe hectic; loss of appetite; great local suffering. θCarbuncle (seven weeks afterwards remnants of four carbuncles inflamed, abscesses formed and sloughs were discharged; abscesses occurring in inverse order of original appearance of carbuncle).

Purplish color of affected part; erysipelas spreads from l. to r. θErysipelas neonatorum.

Marked swelling and redness of throat, with difficulty of swallowing, elevated papillæ on tongue, severe pain in head, flushed and turgid appearance of face, great restlessness, eruption of miliary character, or when it fails to come to the surface. θScarlet fever.

Sore throat and great difficulty in swallowing; fever; pulse 120, quick and small; throat sore to touch externally; as yet no eruption. θScarlet fever.

Pleuritic, pericarditic and general dropsy in delayed desquamation, with great prostration. θScarlatina.

Scarlet fever and scarlet eruptions, with swelling of cervical glands, black lips and reddish tongue.

Throat symptoms assume a virulent character; signs of blood poisoning and prostration. θScarlatina.

Lies on back with open mouth; l. parotid enormously swollen; tongue dry and loaded with drying, offensive mucus, extending back upon pharynx, obstructing passage of throat; nose stopped with bloody mucus, having dried down, thoroughly impacting both nasal passages, high up; eyes turned back; could not be aroused in least from most profound stupor; pulse compressible and small. θMalignant scarlatina.

Cankerous ulcers spread from mouth to near chin, with sanious discharges from nostrils and throat; constantly recurring spasms of almost entire muscular system; vibratory movements in spasms, short and tremulous. θScarlatina.

‖‖Scarlatina maligna, advanced stages, typhoid states, threatening gangrene; destructive decomposition of both fluids and solids.

‖Boy, æt. 9, had scarlet fever under allopathic treatment, survived swelling on l. side of neck followed, which suppurated, abscess opened with lancet, afterwards boy declined in flesh, strength and appetite; much exhausted; face pale, dirty, dingy; puffy, no appetite; restless, hot, dry skin; peevish and whining; abscess discharging foul and copious pus; very sensitive to all motions of head; a large cavity, no appearance of healthy granulations; pulse 140 and small; motions of jaw in masticating solid food could not be borne.

‖Alternate delirium and stupor; irrational, slow muttering delirium; pulse soft, wavy, quick; calor mordax; respiration attended by moaning; rapid, whistling; occasional single cough; grasping at throat, as if to tear away clothing from it; pupils widely dilated; urine scanty, constipation; countenance cadaverous; breath putrescent. θRepercussion of measles.

‖Girl, æt. 9, had, during previous winter, scarlatina very severely; it left her delicate and deaf; was exposed to measles; six days after, rash appeared with a copious discharge from ears; two days later, discharge suddenly ceased and rash disappeared; immediately became feeble and prostrate; wild, muttering delirium; great thirst, drinking little at a time; singularly biting heat of skin next day; pulse soft, wavy; hardly to be counted; calor mordax; moaning respiration, rapid, whistling; occasionally a single cough with a moan after each cough, and a grasping at throat, as if to tear away clothing from it; pupils widely dilated; no stool for two days; urine scanty and seldom passed; countenance cadaverous; breath putrescent.

‖Livid eruption; countenance almost black; tongue coated dark brown, sordes on teeth, inability to protrude tongue. θMeasles.

‖‖Black measles.

‖Itching on whole body, hands and feet; after burning pains there appeared vesicles, with much itching, throbbing, heat, there formed a diffuse, red swelling, some vesicles as large as a nut, at first filled with water, but afterwards containing pus; a good deal of inflammation about parts; some pustules dark blue, with burning, throbbing pain in swelling, as if flesh was being torn from bones; pains attack head, teeth, breast, back; severe, burning pain in head, causing sense of sickness and nausea; throbbing in head at every movement; stu-

Digitized by Google

pefied sleep after attacks; pains < at night; constant thirst but drinking makes her sick; sometimes itching goes off, then she is short of breath and full of anxiety. θItch.

After scratching at night on calf, an ulcer size of a dollar, discolored, very painful.

Peculiar bluish red or livid appearance of ulcers.

Malignant ulcers; bleed readily; discharge bad smelling ichor; deep, filthy suppuration; gangrenous; indolent, with blue color.

Flat open ulcers on l. leg, with erysipelas.

Ulcers, surrounded by pimples, vesicles and smaller ulcers.

Areola of ulcer assumes a bluish color. θSycosis.

Ulcer dried up by washes; on taking cold a few weeks after her entire foot and ankle broke out into small ulcers, resembling original sore; great pain in ulcers; itching of feet and ankles, almost unbearable; leg < after sleep and > from warmth. θIndolent ulcer.

Chronic indolent ulcers of legs, flat, with purple skin; many small sores around main ulcer, which has an uneven bottom, burning and bleeding, even when lightly touched; ichorous, offensive discharge.

Ulcers small and scattered about upon neck and face.

Skin around ulcers and wounds is yellow, green, lead colored, bluish red or black.

Superficial ulcers, foul at bottom, with red crowns.

Brownish red areola about ulcer became blackish blue.

Flat ulcers with a bluish white base.

Spreading, superficial, shallow ulcer; paralysis of l. leg.

Burning in ulcers at night.

Chronic indolent ulcers, with an uneven bluish bottom and offensive odor.

Painful ulcers, sometimes with proud flesh.

Pain in old cicatrices of ulcers; old red scars reopen.

Spongeous ulcerations of syphilitic origin.

Cancerous ulceration, putrefaction, flesh falls off piecemeal.

Boy, æt. 10, large sore on centre of forehead, covered with a hard black scab, tissue around hard and inflamed; puffy swelling extended down on both sides of neck, which was much swollen, as were his lips; on taking a swallow of water grasped throat and evinced greatest pain; face very red but mottled white; ears burning hot to touch yet pulse but 85, irregular and softish; picked at hair continually; every few minutes twitching of arms; throat swollen and red; next morning tonsils covered with dirty white membrane; in evening abundant scarlet rash; bleeding of dark blood from nose and mouth.

Digitized by Google

Chronic ulcers of legs (probably of syphilitic origin); discharge ceased, extremity œdematous; a hard, slightly red swelling, extending up course of principal veins; great and sudden prostration; low muttering delirium, general typhoid symptoms. θSecondary phlebitis.

Carbuncles, with purple surroundings and many small boils around them; must rise at night and bathe to allay burning; also when suppuration is tardy and systemic weakness obtains; cannot bear bandages.

Malignant furuncles, very painful, turn blue and spread.

Sore spots become fungoid, dark red to brownish, with whitish spots; burning on wiping.

Fungus hæmatoides.

Spots yellow, green, red, lead and copper colored, pale, livid; hard and pale swelling; ulcers surrounded by nodes and vesicles; muscles fall off in shreds from bone; loss of sensation; toes fall off. θLeprosy.

Sensation absent in l. arm; toes fall off; l. side of pharynx sore, with suppurating ulcers; menstruation alternately profuse and absent. θLeprosy.

Bedsores, with black edges.

Scars redden, hurt, break open and bleed.

Warts.

Stages of Life, Constitution. Affections of meagre, weak, melancholy persons, or of those who are chlorotic, with sickly complexion; women at climacteric period, with frequent metrorrhagia and hot flushes, burning vertex, headaches, pain in back, or hot flushes by day and cold flashes by night, insomnia, < in afternoon, evening and after sleep; throat diseases commence on l. side—rheumatism on right.

Better adapted to thin and emaciated than to fat persons; or adapted to those who have been changed both mentally and physically by their illness.

Suits people with a vivid imagination.

Melancholic or choleric temperament, with phlegmatic constitution; with dark eyes and disposition to lowness of spirits and indolence.

Bilious temperament.

Women of choleric temperament, freckles and red hair.

Dark eyes, disposed to sluggishness and indolence.

Climacteric ailments; hemorrhoids, hemorrhages, hot flushes, burning vertex headaches; especially after cessation of flow.

Women who have not recovered from change of life, "have never felt well since that time."

Drunkards; headaches, hemorrhoids; prone to erysipelatoid inflammations.

charge from ears, now rash and discharge both disappear; repercussion of measles.
Girl, æt. 9, frightened when three years old by snake; affection of mind.
Boy, æt 9, fair skin, dark eyes, short stature, well developed, healthy; after scarlatina abscess on l. side of neck.
Boy, æt. 9, pale, weakly, subject to epileptiform spasms; diphtheritis.
Girl, æt. 9; diphtheria.
Girl, æt. 10; pharyngitis.
Boy, æt. 10, suffering from scarlatina, upon going out before desquamation; dropsy.
Boy, æt. 10; scarlatina.
Boy, æt. 10, highly nervous temperament, psoric taint; scarlet fever.
Girl, æt. 10; diphtheria.
Boy, æt. 12; affection of knee.
Girl, æt. 12, healthy looking, suffering eight days; affection of throat.
Girl, æt. 13; typhoid fever.
Boy, æt. 14; tonsillitis.
Boy, æt. 16, strong and active, red hair, dark eyes, freckled complexion; peritonitis.
Girl, æt. 16, light complexion; typhoid.
Girl, æt. 16; tonsillitis.
Boy, æt. 17, subject to inflammation of throat; angina.
Girl, æt. 18, governess, robust constitution, suffering a week without perceptible cause; neuralgia.
Girl, æt. 18; diphtheria.
Girl, æt. 20, blonde, slim, mild disposition; erysipelas.
Weakly girl, æt. 20; diarrhœa.
Girl, æt. 20, bilious temperament, full habit, from sitting on stool and practicing at piano, suffering four years; affection of spine.
Woman, æt. 20, after giving birth to child which died on fourth day of erysipelas; peritonitis.
Girl, æt. 20, blonde, thin, mild temperament; erysipelas on leg and foot.
Woman, æt. 20, strong; angina.
Young man, tall, active, dark hair and eyes; diphtheria.
Young man, scrofulous, weak, has had for several years eczema on arms and leg ulcers; tonsillitis.
Young lady, bilious lymphatic temperament, suffering ten years; constipation.
Young woman, delicate, nervous temperament; diphtheria.
Young woman, married, refined sensibilities; mental disturbance.
Young man; phthisical habit, had been coughing two months; pulmonary tuberculosis.

Google

Young man, weakened by disease and medicine and further by fracture of clavicle; affection of r. hand.
Strong young man; affection of second toe of r. foot.
Young man, after excessive study; glossomania.
Young man, phthisical habit, emaciated, six months ago had pneumonia; lung affection.
Young, robust sea captain, previously suffered from abscess of throat; affection of throat.
Girl, æt. 20, after taking purgative medicine for some digestive troubles; diarrhœa.
Man, æt. 21, scrofulous; angina.
Man, æt. 22; pharyngitis.
Man, æt. 22, physician, result of wound incurred during post mortem examination of a case of puerperal peritonitis; septicæmia.
Man, æt. 23; pneumonia.
Girl, æt. 23; epilepsy.
Woman, æt. 23, slender build, premature labor; puerperal convulsions.
Woman, æt. 24, multipara, small, fair, nervous, sanguine temperament; puerperal convulsions.
Man, æt. 24, wears glasses; asthenopia.
Woman, æt. 24, brunette; facial neuralgia.
Man, æt. 25, medium height, fair complexion, muscular, and accustomed to outdoor exercise; chronic irritability of fauces.
Girl, æt. 26; diphtheria.
Man, æt. 28, small, brown hair, during childhood frequent convulsions, after being cured of caries; epilepsy.
Woman, æt. 28, sunstroke two years previous to confinement, from which she had ever since been confined to bed; puerperal convulsions.
Woman, æt. 28, suffering several weeks; partial deafness.
Man, æt. 29, suffering since fourteenth year; epilepsy.
Woman, æt. 30, medium height, dark complexion, black hair, subject to swelling of glands and morbid discharges from mucous membranes, had three abortions, now in eighth month of pregnancy; pustular eruption.
Woman, æt. 30; chronic affection of larynx.
Woman, æt. 30, brunette, nursing 5 months; thin milk.
Woman, æt. 30, married, weak constitution, tuberculous tendency; tumor in breast.
Man, æt. 30, another 23; fever.
Man, æt. 30, laborer, after injury; gangrene of leg.
Woman, æt. 30, single; pharyngitis.
Married woman, æt. 30, tuberculous, weakly constitution, somewhat emaciated and pale, skin dry; since ten years no child; tumor in l. mamma.

GUIDING SYMPTOMS

OF OUR

MATERIA MEDICA.

LACHNANTHES TINCTORIA.

Red Root. *Hæmodoraceæ.*

An herb growing in sandy swamps near the coast; the root red, fibrous; the leaves sword-shaped; the stem hairy; flowers yellow, woolly. The first specimen was sent in 1852 by Dr. Byron, from Monticello, Florida, to Hering, under whose direction it was proved by Raue, Lippe and Fincke. See Am. Hom. Rev., vol. 4, p. 458.

CLINICAL AUTHORITIES.—*Headache*, Lilienthal, Hom. Clin., vol. 1, p. 26; *Dryness of throat*, Lippe, Am. Hom. Rev., vol. 5, p. 488; *Diphtheria*, Hosfield, Parker, Org., vol. 3, p. 369; *Stiff neck*, Berridge, Hom. Clin., vol. 4, p. 108; *Typhoid pneumonia*, Duffield, Am. Hom. Rev., vol. 4, p. 489.

[1] **Mind.** While dozing through day, sees images.
‖Loquacious delirium, brilliant eyes, circumscribed red cheeks, < from 1 to 2 A.M. θTyphoid pneumonia.
Loquacity, afterwards stupid and irritable.
Excited over a trifle.
Restless while perspiring; tosses about; whining.
Great hilarity in evening.
‖Despondency, bitter crying spells. θHeadache.

[2] **Sensorium.** Giddy: with sensation of heat in chest and around heart, boiling bubbling; with icy coldness of forehead.

[3] **Inner Head.** Tearing: in forehead from l. to r. side; in r. temple, extending to cheek; in temples.

Digitized by Google

Pain in forehead, with general heat, alternating with crampy pain in chest; at last tearing in nose and shoulders.

Head feels enlarged and as if split open with a wedge from outside to within; body icy cold, skin moist and sticky; cannot get warm even under a feather bed, face yellow; whines with pain; head burns like fire, much thirst.

Vertex feels enlarged and extended upward; tearing pain.

Headache: until 10 A.M.; pressing eyes outward; < toward noon, she becomes more giddy; in evening, pricking headache.

Continuous stitch in l. forehead from within to without, leaves after a few minutes a pressing pain, and extends over whole forehead, pressing from within outward.

Congestive and neuralgic headaches; eyes much affected.

‖Violent pain in r. side of head and temple; a splitting, bursting pain, occasionally extending down to jaw, < moving head or body; disposition to keep eyes closed; great despondency; bitter crying spells; disturbed by least noise; cannot bear even walking of persons over heavy carpet; head feels enlarged, as if split open with a wedge; tearing pains < from vomiting.

[4] **Outer Head.** Draws skin of forehead upward, < l. side.

Sensation as if hair was standing on end, < on occiput.

Scalp very painful, even to touch.

Red pimples on forehead, become larger and suppurate.

[5] **Sight and Eyes.** Looking intensely, sees grey rings.

If he looks at a spot for some time, it becomes quite dark, also if he reads any length of time.

When reading or writing, small grey spot, as large as lentil, runs before l. eye.

Moving head quickly, sight becomes obscure.

Obscuration of sight, as if a cloud were before eyes; could not see in evening; > walking about; < sitting down.

‖Eyes brilliant, face red, pupils large, delirium. θPneumonia.

Lachrymation and burning, with sensation of dryness.

Compression of l. eyeball, from below upward.

Pressing as from dust in eyes, discharge of white mucus.

Eyes feel heavy, as if they could not be kept open.

Eyes feel cold.

Eyebrows and lids drawn upward, looks with fixed eyes.

Twitching in upper eyelids, < when closing them.

[6] **Hearing and Ears.** ‖Almost complete deafness during acute diseases.

Singing in r. ear when walking in open air.

Tearing in ears.

Crawling in r. ear while eating; in l. ear, > boring with

finger, but immediately returning and feeling as if something had closed ear.
Itching in l. ear and sore feeling in right.
Sensation of coldness in external ear.

[7] **Smell and Nose.** Burning on r. side of root of nose.
Nose bleeds profusely, blood pale.

[8] **Upper Face.** ‖Circumscribed red face, 1 to 2 A.M., violent delirium, eyes brilliant. θTyphoid pneumonia.
Face swollen, with redness and blueness under eyes.
Pale, sickly, yellow countenance; face and lips bluish.
Tearing in temples down into cheeks.
Tearing pressing in l. cheek toward eyes.
Sensation as if something was crawling over face.

[9] **Lower Face.** Redness, swelling and tension of lips.

[10] **Teeth and Gums.** Upper incisors and eye teeth feel loose and sore, < touching with tongue and closing teeth.
Teeth feel loose and too long; < in bed.
Teeth ache after eating or drinking warm things.

[12] **Inner Mouth.** Sensation as if mouth was sore and thick.
Saliva of tough mucus.

[13] **Throat.** ‖Great dryness of throat, < on awaking during night, with much coughing.
Roughness of throat, with pricking when swallowing; continuously increasing dryness of throat, with sleeplessness, followed by hoarseness.
Sensation of swelling in l. side of throat; when he swallows he feels an itching in spot.
‖Sore throat, with short cough.
‖Diphtheria, stiffness of neck; head drawn to one side.

[14] **Appetite, Thirst. Desires, Aversions.** Much thirst.
Aversion to meat.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough in bed.
Rising of sweetish water, with nausea; qualmishness about navel when walking in open air.

[17] **Scrobiculum and Stomach.** Full feeling in stomach; rolling of wind.
Beating in pit of stomach, as from a pulse, as if a hammer was beating on an ulcerated spot.

[19] **Abdomen.** Cutting in upper part of abdomen from l. to right.
Twirling and twisting in upper part of abdomen, two inches above navel.
Fermentation and rumbling; rolling of wind in abdomen, l. side, hears it but does not feel it.
‖Much flatulency. θTyphoid pneumonia.
Sensation of heat through abdomen, feels as if bowels would be moved; evacuation, > head.

[20] **Stool and Rectum.** Frequent desire to evacuate, without result.

Google

Evacuation, with much flatulency and pressing.
Continuous stitch in anus, morning.

[21] **Urinary Organs.** Pressing on bladder when urinating.
During night, drops flow from urethra, coloring shirt red.

[22] **Male Sexual Organs.** Violent burning in l. half of scrotum, drawing toward r. side.
Tingling and itching of scrotum and surrounding parts.
Sweat and itching of scrotum and penis.

[23] **Female Sexual Organs.** Catamenia: too early, blood viscid, mixed with mucus; profuse, bright red.
During catamenia, sensation of distension of abdomen, it feels as if it were boiling.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness; dry cough from irritation of throat, < in bed.
Burning in r. side of larynx.

[27] **Cough.** ‖Dry cough as from larynx; sputa blood-streaked; severe pain in chest. θTyphoid pneumonia.
Cough < in bed, also from sleeping.

[28] **Inner Chest and Lungs.** Stitches: like knives, in quick succession, in r. side of chest below mamma, at rest and moving, in afternoon; in l. side of chest.
‖Severe pain in chest, with cough, circumscribed red cheeks, soreness over abdomen, with sensitiveness to touch; pulse 110, small and wiry; bowels costive; between 1 and 2 A.M. delirium, at times great, wanted to be dressed and go out; tongue coated yellowish brown and dry; deafness; bloody expectoration; much harassed with flatulency. θTyphoid pneumonia.

[29] **Heart, Pulse and Circulation.** Stitches in heart, with anxiety.
Sensation of heat, bubbling and boiling in chest and region of heart, rising to head; giddy; breaks out in perspiration.
Frequent violent pulsations of heart, each beat double, one hard and full, the other soft and small.
While lying, feels beating of heart in his head.
Trembling of heart, with great debility.
Pulse: slow, irregular; from 58 to 68; during coldness, 74, some beats fast, some slow; 110, small, thin, hard (pneumonia).

[31] **Neck and Back.** ‖‖Stiffness, wry neck.
Pain and stiffness in neck, going over whole head and down nose, then as if pinching nostrils together.
‖‖Torticollis; neck stiff, head drawn to one side; pain in nape as if dislocated, when turning neck or bending head backward. θDiphtheria, scarlet fever, etc.
‖Right side of neck stiff, head drawn to r. side.
Sensation as if a piece of ice was lying on back between shoulders, followed by a chill, with gooseflesh all over.

Google

Sensation between shoulder blades as if wet with cold perspiration, skin being dry and cool.

Burning: on r. shoulder blade; in region of l. kidney, deep, extending toward r. side; in spine, four inches above small of back; in os sacrum, 4 P.M.

[32] **Upper Limbs.** Tearing: from shoulder, extending to finger joints; in upper part of arm, beginning at elbow joint, where it pains most, extending into shoulder; in elbow joints, at times upward and then downward; in knuckles of middle fingers of r. hand.

Left index finger drawn crooked.

Thumb and index finger feels as if sprained.

[33] **Lower Limbs.** Tearing: in r. ischium; in l. knee, when walking; in r. tibia; in r. big toe, awakening from sleep.

Tingling: from knees to ankles; legs and feet, < in heat.

Cramps: in calves lying in bed; in feet during night.

Burning: in feet; under nail of l. toe.

[34] **Limbs in General.** Tearing pains in limbs.

Burning of palms of hands and soles of feet.

[35] **Rest. Position. Motion.** At rest: stitches in chest.

Lying: feels beating of heart in head; in bed cramps in calves.

Sitting down: obscuration of sight <.

Bending head backward: torticollis.

Morning: stitches in chest; attacks of coldness <.

Moving head quickly: sight becomes obscure.

Turning head: torticollis.

Moving head or body: pain <.

Walking: obscuration of sight >; singing in r. ear; tearing in l. knee.

Tosses about: while perspiring.

[36] **Nerves.** Sensation of great weakness, as from loss of fluids.

Very restless, throws herself about.

[37] **Sleep.** Somnolency during day, sees images.

Sleepiness, with yawning, eyes feel so heavy she cannot keep them open.

Sleepless: feverish, circumscribed red cheeks; with increasing dryness of throat; without feeling weak.

Restless sleep, followed by sweat.

Feverish, distressing dreams (following cramp in l. foot during night).

Awakens: 2 A.M., with cramp in her breast, extending from r. to l.; after awaking and stretching, a shock, followed by chilliness and gooseflesh all over.

[38] **Time.** Morning: dryness of eyes; stitch in anus; sweat.

From 1 to 2 A.M.: loquacious delirium <; circumscribed red face.

Google

Noon: headache <.
After 12 P.M.: sweat.
In afternoon: stitches in chest.
2 A.M.: awakens with cramp in breast.
During day: somnolency.
4 P.M.: burning in os sacrum.
Evening: pricking headache; could not see.
Night: dryness of throat; drops flow from urethra, coloring shirt red; cramps in feet; skin burns and itches.

[39] **Temperature and Weather.** Heat: tingling in legs and feet <.
Hot flat irons: > icy coldness of body.
In bed: teeth feel loose and too long; cough <; attacks of coldness.
Cannot get warm under a feather bed.
Eating or drinking warm things: toothache.
Open air: when walking, singing in r. ear; qualmishness about navel.

[40] **Fever.** Continuous chilliness.
Sensation as if piece of ice was lying on back, between shoulders, then a shock, followed by coldness over whole body with gooseflesh; these attacks recur on moving and pass off after going to bed.
Body icy cold, hot flat irons relieve.
Flushes alternately with chilliness.
Feels hot, but chills run all over her before heat can develop.
Evening fever, < 6 to 12 P.M.; face red, < upper part.
Dry heat, feet burn; restless tossing; rumbling in abdomen.
Burning heat, face red, < on r. side; followed by circumscribed redness of cheeks, also < r. side.
Feverish, with somnolency.
General heat, with sweat on forehead.
‖Fever with delirium, circumscribed redness of cheeks and brilliant eyes. θPneumonia.
Sweat: with dizziness, boiling and bubbling in chest and region of heart; after 12 P.M., after a restless sleep; in morning; icy cold, principally on forehead.
‖Skin cold, damp and clammy.

[41] **Attacks, Periodicity.** Alternately: flushes and chilliness.
6 to 12 P.M.: fever <.
For six weeks: dull toothache in second l. upper molar.

[42] **Locality and Direction.** Right: tearing in temple; violent pain in side of head and temple; singing in ear; crawling in ear; sore feeling in ear; burning in side of root of nose; stitches in side of chest; stiff neck; tearing in ischium; in tibia; in big toe; burning heat < side of face; circumscribed redness of cheek.

Digitized by Google

Left: continuous stitch in forehead; draws skin of forehead upward, < l. side; small spot before eye; compression of eyeball; singing in ear; itching in ear; tearing pressing in cheek towards eyes; sensation of swelling in side of throat; rolling of wind in abdomen on side; violent burning in half of scrotum; burning in region of kidney; tearing in knee; burning under big toe nail.

From r. to l.: cramp in breast.

From l. to r.: tearing in forehead; cutting in upper part of abdomen; burning in scrotum; in kidney.

From outside to within: head as if split.

From within to without: stitches in forehead, pressing.

From below upward: compression of l. eyeball.

[43] **Sensations.** Head as if enlarged; as if split open with a wedge; vertex as if enlarged; as if hair was standing on end; as if a cloud was before his eyes; pressing as from dust in eyes; as if eyes could not be kept open; as if something had closed ear; as if something was crawling over face; upper incisors and eye teeth as if loose and sore; teeth as if too long; as if mouth was sore and thick; as if a hammer was beating on an ulcerated spot in stomach; as if bowels would be moved; abdomen feels as if it was boiling; pain as if pinching nostrils together; nape as if dislocated; as if piece of ice was lying on back between shoulders; as if back between shoulder blades was wet with cold perspiration; thumb and index finger as if sprained; weakness as from loss of fluids; skin as if an eruption would appear.

Pain: in forehead; in neck; in nape.

Violent pain: in r. side of head and temple.

Severe pain in chest.

Tearing: in forehead from l. to r. side; in r. temple, extending to cheek; in temples; in nose and shoulders; in vertex; in ears; in temples down into cheeks; from shoulder extending to finger joints; in upper arm from elbow joint to shoulder; in elbow joints; in knuckles of middle fingers of r. hand; in r. ischium; in l. knee; in r. tibia; in r. big toe; in limbs.

Tearing pressing: in l. cheek towards eyes.

Cutting: in upper part of abdomen.

Beating: in pit of stomach.

Splitting, bursting pain: down jaw.

Stitches: in side of chest; in heart.

Continuous stitch: in l. forehead; in anus.

Neuralgia: in head.

Cramps: in calves; in feet; in l. foot.

Crampy pain: in chest.

Google

Violent burning: in l. half of scrotum.
Pricking pain: in head; in throat.
Pressing pain: in forehead.
Soreness: over abdomen.
Sore feeling: in r. ear; in throat.
Burning: in head; in r. side of root of nose; in r. side of larynx; in shoulder blade; in region of l. kidney; in spine; in os sacrum; in feet; under nail of l. toe; in palms and soles; in r. side of face.
Heat: in chest.
Tingling: of scrotum and surrounding parts; from knees to ankles; in legs and feet.
Pressing: on bladder when urinating.
Twirling and twisting: in upper part of abdomen.
Dull pains: in teeth.
Boiling bubbling: around heart.
Feels beating of heart in head.
Trembling: of heart.
Full feeling: in stomach.
Tension: of lips.
Stiffness: of neck.
Crawling: in ears.
Twitching: in upper eyelids.
Dryness: of throat.
Itching: in l. ear; in spot in throat; of scrotum; of penis; of skin.
Sensation of coldness: external ear.
Icy coldness: of forehead.

[44] **Tissues.** Hemorrhages; typhoid pneumonia.

[45] **Touch. Passive Motion. Injuries.** Touch: scalp very painful; with tongue or closing teeth, soreness of teeth <; soreness over abdomen.
Boring: with finger in ear, crawling >.
Scratching: burning and itching of skin <.

[46] **Skin.** Skin itches and burns all night, < after scratching.
Red pimples; pimples here and there containing a watery fluid.
Sensation in skin as if an eruption would appear.
Skin cold, damp and clammy.

[47] **Stages of Life, Constitution.** Woman; typhoid pneumonia.
Woman, æt. 37, married, nervo-sanguine; headache.

[48] **Relations.** Compare: *Act. rac., Æthusa, Agar., Bellad., Cann. ind., Cicuta, Crotal., Gelsem., Glonoine, Gymnocladus, Hyosc., Laches., Opium, Platina, Phosphor., Sanguin., Stramon.*

Google

LACTIC ACID.

Lactic Acid. $H_3 H_5 O_3$.

An acid, discovered by Scheele, in sour milk, the result of spontaneous fermentation of sugar of milk under the influence of casein. It is also met with in many vegetable products which have turned sour.

Introduced by Reisig, whose 15th dilution was first proved by Swan. Subsequent provings by Fincke (30th), Allen, (pure acid, 30th dil.), and Swan (200th). See N. Am. J. of Hom., 1871, and N. Y. J. of Hom., vol. 1, p. 337.

CLINICAL AUTHORITIES.—*Diabetes mellitus*, Kirkland, U. S. Med. Inv., Aug., 1875, p. 166; (2 cases) Kitchen, Raue's Rec., 1874, p. 213; Cantani, Primavera, Raue's Rec., 1874, p. 213; *Morning sickness during pregnancy*, Swan, Hah. M., vol. 6, p. 74; Williamson, Raue's Rec., 1872, p. 12; *Foot sweat*, Schmucker, Raue's Rec., 1874, p. 17; *Swelling of bone*, H. K., vol. 22, p. 10.

[1] **Mind.** ‖Great discouragement. θPregnancy.

Averse to business or what formerly was pleasant to do; lazy; dislikes to read or think; finds fault, is sarcastic, exacting.

‖Memory affected; cannot remember a thing an hour after it has happened.

[2] **Sensorium.** Vertigo: when turning head suddenly; on stooping.

Sensation as if blood was trickling down from front to back part of head, at 8 P.M.

Head feels very large, confused, as if tossed on a rough sea; nausea like seasickness.

Congestion, as if blood would burst out at forehead or eyes.

Tightness and fulness in head; on stooping it seemed as if blood would burst from nose.

[3] **Inner Head.** Dull pain in forehead, extending into eyes; desire to close eyes.

Sensation of fulness in forehead, as if brain was too large.

Dull aching pain over l. orbital region, < bending forward.

At 10 A.M. pain in forehead, over eyes, and fulness on top of head, as if it would burst, < afternoon, and extended into l. eye.

Pain in temples in afternoon and on awaking in morning, with depression of spirits.

Sharp, darting pain in l. side of head, from temporal to orbital region.

Google

‖Pain in head and back all night.
‖Severe pain in forehead and all through head, with chill.
Tightness and heat over head, particularly in forehead.
Congestion of head, painless, with strong pulsation of vessels of neck.

[4] **Outer Head.** Head sore to touch.
Fulness and tension over whole head, with sweat on scalp.
Fine miliary eruption on scalp.
Painful pimples on l. occipital protuberance.
Desire to have head lie high.

[5] **Sight and Eyes.** ‖Hyperæsthesia of retina, steady aching in and behind eyeball.
Dark clouds pass before eyes; cannot see letters on blackboard; smoky appearance of room.
‖Pupils dilated.
Fulness as if blood was forcing its way out of eyes; feel as if they would burst out of head, < turning head.
Could not bear to shut eyes, as if cornea was sore.
Pain through r. eye, with nausea.
Marked protrusion of eyes; pupils dilated; feels tired.
Sharp pain in l. eye, < while reading, with photophobia, direct light painful.
Severe pain in head above eyes, extending into eyes.
Tough mucus in inner canthus of each eye.
Peculiar twitching across r. upper lid and in eyeball.
Jerking of l. upper lid.

[6] **Hearing and Ears.** Disturbed and troubled by noise.
Roaring in l. ear on rising in afternoon; singing, snapping in l. ear.
Pain from parotids into ear; stiff feeling in parotids.

[7] **Smell and Nose.** ‖Great sensitiveness of smell.
Erysipelatous redness of l. cheek and l. side of nose, with small sore vesicles on nose, in morning.
πNasal catarrh, with copious thick, yellow, mucous discharge. θLeucorrhœa.
‖Epistaxis every morning; greenish yellow stools, with tenesmus.
Sensation as if a quantity of mucus lodged in posterior nares; discharge of clear viscid mucus after hawking, does not > entirely.
Severe coryza, stopped nose, sneezing, thick mucus from head to throat, yellow; dead sweet taste.
Feeling as if blood would spurt from nose; fulness in head.

[8] **Upper Face.** ‖Congestion of blood to face and head.
Erysipelatous redness on l. cheek and side of nose; small vesicles on nose in morning.

[11] **Taste and Tongue.** ‖Tongue dry, parched, sticky. θDiabetes mellitus.

Google

| | Thick white coating on tongue.
| | Yellow coating on tongue, with bad taste in morning.
Sores on tongue; tongue raw and red.
Taste: fetid; metallic; sour; acrid, with nausea; like copper; peculiar, on back part of tongue.

[12] **Inner Mouth.** ▮Very sore mouth; canker sores.
▮Child had been fretting forty days, cried on taking any food into its mouth, which was inflamed, and tongue and lips studded with little white blisters with a red base.
| | Mouth very dry; roof dry, feels burnt.
▮Copious salivation. θPregnancy.
| | Much saliva in mouth tasting salty.

[13] **Throat.** Elongation of uvula; rawness of pharynx from posterior nares, l. side, down to œsophagus, with sensation of a quantity of mucus lodged in nares and larynx, causing hawking, which does not relieve entirely.
Dryness of posterior fauces, with hawking of mucus.
▮Great dryness of throat, with hoarseness and dry cough.
Accumulation of mucus in throat, not loose, but as if filling up; rawness in upper pharynx.
Hawking of thick, yellow, tasteless mucus from upper part of pharynx; dead sweet taste.
Constriction and soreness in throat, with difficulty in swallowing solids.
▮Fulness in throat, which keeps him swallowing frothy mucus; lump or fulness feels like a small puff ball; not > by swallowing.
Fulness in fauces; burning in fauces, throat and œsophagus; can hardly force solids into œsophagus, fluids more easily.
▮Constricted feeling low down in throat, with slight nausea.
| | Sensation of plug in throat.
| | Sense of constriction in throat; rough and dry.

[14] **Appetite, Thirst. Desires, Aversions.** ▮Voracious appetite and great thirst. θDiabetes mellitus.
Apparent indifference to food, very little satisfies.

[15] **Eating and Drinking.** ▮Uneasiness in stomach after food and drink. θDiabetes mellitus.
Eating generally relieves symptoms.
▮Food sours; eructations; flatus; indifference to food.
▮After eating: nausea, retching, waterbrash, uneasy in stomach. θDiabetes.
Smoking aggravates all symptoms.
▮Sensation as if all food was lodged under upper end of sternum, which oppresses and distresses for hours.

[16] **Hiccough, Belching, Nausea and Vomiting.** Belching, with taste of ingesta.
▮Waterbrash, with continued profuse discharge of saliva.

Google

▮Eructations of hot, acrid fluid, which burns from stomach to throat.

▮Nausea: after getting up in morning; like seasickness, with headache; with pain through r. eye; with cough; followed by backache; after eating, copious saliva (pregnancy); < from any motion; constant.

▮Morning sickness, particularly in pale, anæmic women, who lose much blood during menses.

[17] **Scrobiculum and Stomach.** ▮Feeling of emptiness and sinking at stomach. θDiabetes mellitus.

Slight depression and constriction in cardiac region, > by bending chest forward.

Burning and weight in stomach < by smoking.

Faintness in stomach, passing off leaves nausea.

[18] **Hypochondria.** L. hypochondrium sensitive to touch, with pain as from soreness behind lower end of sternum.

[19] **Abdomen.** Pain across bowels and lower r. side, 11 A.M.

Sharp pain in lower part of l. side, lasting a short time.

Dull pain in l. groin over hip bone.

Bearing down pain in upper part of abdomen.

Pain across lower abdomen as with menstruation, which is not the case.

Jerking and sharp cutting in muscles, awakes with a scream at 12 P.M.

▮▮Pain over crest of l. ilium, extending forward.

[20] **Stool and Rectum.** ▮Bowels very costive, stool once a week, feces hard, black. θDiabetes mellitus.

▮Greenish yellow stools with tenesmus. θEpistaxis.

▮▮Soft, mushy stool.

Sharp pain across lower abdomen before stool; diarrhœa.

▮▮Aching pain in anus.

[21] **Urinary Organs.** Distress and pain in renal region; urine high colored, clear; frequent pain in region of kidneys.

▮▮Urine in large quantities, passed frequently. θDiabetes.

▮Urine deep brownish red, with much reddish sediment.

Urine so copious, seemed as if "turning into urine"; also with sore, stretched feeling in bladder.

▮Urinates frequently, day and night; attempt to retain it causes pain.

▮Voracious appetite; great thirst; frequent and profuse saccharine urine; skin harsh and dry, no sweat; bowels very costive, stool once a week, feces hard, black; tongue dry, parched, sticky; feeling of emptiness and sinking at stomach; debility; chilliness, especially extremities; weariness in extremities; aversion to exercise; uneasiness in stomach after food and drink. θDiabetes.

▮Man, æt. 62, phlegmatic, dark complexion, dark hair and eyes, had dropsy several times; great weakness, restless

Google

during night; severe aching pains in feet and legs, preventing sleep; frequent voiding of foamy, strong smelling, dark urine; quantity from eighteen to twenty pounds in twenty-four hours; in morning urine contained a large amount of salt, in evening a large excess of sugar; violent thirst day and night; unable to walk further than a few rods. θDiabetes mellitus.

[22] **Male Sexual Organs.** In the morning annoying erections, but loins ache too much to attempt coition.

Dreams of sexual intercourse, with erections, no emission.

Seminal emissions three successive nights.

[23] **Female Sexual Organs.** ‖Aching pain in region of r. ovary, < by rapid walking or exercise.

Great heaviness and dragging down in lower abdomen, as if womb was down.

Pain as if menstruating; sitting with feet high relieves uterine soreness.

Menses: seventeen days late; scanty; in morning, pain across small of back and in lower part of abdomen; flow commenced 11 P.M., with distress across lower part of abdomen; were scanty, pale; two days too early, more profuse than usual; great itching of vulva during flow.

‖Leucorrhœa: stains yellow as saffron; was stopped, nasal catarrh ensued.

[24] **Pregnancy. Parturition. Lactation.** ‖‖During pregnancy: morning sickness; salivation; nausea and vomiting.

‖Morning sickness in pale, anæmic women, who lose large quantities of blood during menses, which usually last from five to eight days.

‖Nausea and vomiting of sour substances; sour taste; no desire for breakfast, food seems to come almost up into mouth; faintness in stomach; diarrhœa. θPregnancy.

‖Waterbrash of hot sour fluid; hot, acrid eructations, which burn from stomach to mouth; mouth full of water; burning in stomach; nausea > by breakfast; gone sensation low down in stomach. θPregnancy.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarse, hard, dry cough, sensation of dryness of throat, with spasmodic, painful contractive sensation.

For an hour and a half after rising voice entirely without control, whispering and squeaking when expecting to speak loud; croaking and deep hoarse voice.

Dryness and burning of larynx.

‖Great dryness, with hoarseness and dry cough; dryness and rawness extending to larynx; rim of glottis particularly affected.

Google

Spasm of glottis, awaking from sleep and causing severe pain and suffocation.
Expectoration seemed to be secreted just inside of glottis.
‖Aphonia, with dryness of glottis.
‖Hoarse, hard, dry cough, sensation of dryness of epiglottis, with spasmodic contractive sensation.
‖Great dryness of throat, hoarseness and dry cough.
‖‖Dryness, scratching and burning in throat; tearing in larynx and trachea, with hoarseness; difficult expectoration of grey tasteless mucus, or so tough that air can hardly pass through it; horrible dreams of abysses, and restless sleep; croup sound not heard. θCroup.

[26] **Respiration.** Sawlike rasping sound of respiration.
Frequent deep sighing inspirations and expirations.

[27] **Cough.** Spasmodic ringing cough, from irritation in throat.
‖Hoarse, hard, dry cough; dry sensation of glottis, with spasmodic contractive sensation; hoarse, sensitive to cold air.
Cough, with nausea, constricted feeling in throat.
Spasmodic, ringing cough, from hot eructations, < smoking.
‖‖Constant cough, < in Spring and Fall, with foot sweats.
Secretes large quantities of saliva, which in morning contains greyish lumps; afterwards expectoration yellowish and salty.

[28] **Inner Chest and Lungs.** During afternoon sharp pain in back part of l. breast, at 6 P.M. a similar pain in r. breast, sore to touch.
Pain in back part of l. breast during day, at intervals.
At intervals, during morning, pain in back part of r. breast, till 11 A.M., when pain extended to axilla, which feels sore to touch.
Pain as of soreness behind lower end of sternum.
Severe cutting or sticking pain in upper third of r. side, < from motion, > with arms close to side.
Rheumatic pain in r. side of neck and r. breast, < stooping head.
Left side of chest sore and painful.
Left lung and back of breast sore all day.
Sharp pain darted through lower part of r. breast, 1 P.M., continuing at intervals through afternoon.

[29] **Heart, Pulse and Circulation.** Sharp pain around heart, causing palpitation.
Pulse: 90, feverish; 62, small, feeble.

[30] **Neck and Back.** Stiff neck, also down between scapulæ and across shoulders.
Pain in edge of trapezius, at occipital and clavicular insertions; flabby, weak feeling; hard to raise head, can do so, however, when erect.

Google

Pain in lower part of back and head all night; pain to shoulders, < right.
Backache length of spine.
‖Aching and sore pain across small of back.
Darting across r. side of small of back, < stooping, passing away gradually.

[32] **Upper Limbs.** Pain in shoulder on moving arm, with soreness in side.
Rheumatic pains in both shoulders, running up muscles of neck to mastoid and ears.
Slight rheumatic pains in wrist joint.
Right index finger swollen, bright red spots, one between first and second and other between second and third joints, latter itched and burned like a bee sting, on eleventh day looked like a blister.

[33] **Lower Limbs.** Sore to touch along r. sciatic nerve on getting out of bed; pulsating slightly, but constantly.
Rheumatic pains in knee joint on moving leg.
Pain in knee joints like neuralgia, at times extending to toes, with a thrill as if foot had been asleep.
Stinging in joints and weakness of knees.
Laming stitch in r. patella on going down stairs.
Knees weak on going down stairs, feels for another step at bottom, with vertigo.
Cramp in calf early in morning, after rising, part feels sore.
Pain in l. great toe, afterwards pain in l. thigh.
‖Profuse inoffensive sweating of feet.

[34] **Limbs in General.** Articular rheumatism.
‖Sweat acrid and profuse; urine clear or high colored and frequent, profuse or scanty; rheumatic soreness in muscles of chest, back and extremities; rheumatic inflammation of elbows, knees and small joints of upper and lower extremities, < at night and from motion; fever, with headache and flushes of heat.

[35] **Rest. Position. Motion.** Desire to have head lie high.
Stooping: vertigo; as if blood would burst from nose; pain in side of neck <; pain in r. side of small of back <.
Bending forward: pain over orbital region <; constriction in cardiac region >.
Sitting with feet high: uterine soreness >.
Arms close to side: cutting pain in side >.
Can stand only with difficulty: tired.
Hard to raise head: pain in edge of trapezius.
Getting out of bed: r. sciatic nerve sore.
After rising out of bed: knees feel sore.
Going to bed: itching.
Turning head suddenly: vertigo; as if eyes would burst out of head.

Google

Motion: nausea <; cutting pain in side <; of arm, pain in shoulder <; of leg, rheumatic pain in knee joint; inflammation of extremities <; during and after, very tired.
Exercise: aching in r. ovary <; aversion to.
Going down stairs: laming stitch in r. patella; knees weak.
Walking: rapidly, aching in r. ovary <; weakness and trembling of whole body; cannot walk farther than a few rods; great weakness.

[56] **Nerves.** Great weakness; trembling of whole body while walking.
Debility, weariness of limbs, aversion to exercise. θDiabetes mellitus.
Tired all over, can stand only with difficulty.
Very tired on waking, with aching of limbs as if he had not slept.
Spasms of different muscles; rigor of body.
Tired as if he had walked a great distance, during and after motion; eyes protrude.
Intermittent hysteria; nauseated in morning when swallowing, and gets < until 9 A.M., when she vomits large quantities of tough phlegm, sometimes had to remove it with finger, lasting till 9 P.M.

[57] **Sleep.** Stupid, drowsy all day, restless all night.
Restless all night, could neither sleep nor lie.
Sleepless: with vertigo; with backache.

[58] **Time.** Morning: pain in temples; redness of cheek and nose; yellow coating on tongue, with bad taste; after rising, nausea; urine contained a large amount of salt; annoying erections; pain across small of back and lower part of abdomen; saliva contains greyish lumps; cramp in calf; nauseated.
8 A.M.: spots on legs brightest.
10 A.M.: pain in forehead, over eyes; fulness on top of head.
11 A.M.: pain across bowels.
Noon: cold and chilly.
9 A.M. till 9 P.M.: nausea <, with vomiting of tough phlegm.
Day: l. lung and breast sore; stupid and drowsy.
Afternoon: fulness on top of head <; pain in temples; roaring in l. ear; sharp pain in back part of l. breast; sharp pain through lower part of breast, at intervals.
From 1 to 4 P.M.: fever, with severe headache.
Evening: urine contained large excess of sugar.
6 P.M.: pain in r. breast; slight fever.
8 P.M.: as if blood was trickling down from front to back part of head.
Night: pain in head and back; restless; inflammation of extremities <; cold.
12 P.M.: cutting in muscles, awakens with a scream.

Google

39 **Temperature and Weather.** Warmth: burning on legs <.
Going quickly from warm to cold, or vice versa: red, burning spots on legs <.
Cold: burning on legs <; itching and burning in l. half of body, leg, arm and hand.
Cold all night, even when well covered.
Cold air: sensitive to.
Bathing > headache.
Shuns damp weather.

40 **Fever.** Cold and chilly at noon, transient.
Chilly, mostly on limbs.
Chill: after pain in small of back and forehead, over eyes.
During chill: pain in head extended all through head and eyes; pain in back.
Flashes of heat.
Slight fever at 6 P.M.
Fever, with severe headache, from 1 to 4 P.M.
Sweat of feet and hands, from noon till evening, every day.

41 **Attacks, Periodicity.** At intervals: during day, pain in l. breast; during morning, pain in r. breast till 11 A.M., when pain extended to axilla.
Every morning: epistaxis.
Every day, from noon till evening: sweat of feet and hands.
Day and night: urinates frequently; violent thirst.
Three successive nights: seminal emissions.
Once a week: stool.
Spring and Fall: cough <.
For one hour and a half after rising: voice entirely without control.
For hours: distressed by sensation as if food was lodged under upper end of sternum.

42 **Locality and Direction.** Right: pain through eye; twitching across upper eyelid; pain across bowels and lower part of side; aching in region of ovary; pain in breast; cutting in side; rheumatic pain in side of neck and breast; sharp pain through lower part of breast; pain in shoulder; darting across side of small of back; index finger swollen; sore along sciatic nerve; laming stitch in patella.
Left: dull aching pain over orbital region; fulness from head into eye; sharp pain in side of head; painful pimples on occipital protuberance; sharp pain in eye; jerking of upper lid; roaring in ear; singing, snapping in ear; erysipelatous redness of cheek and side of nose; rawness of pharynx from side of posterior nares; hypochondrium sensitive to touch; sharp pain in lower part of side; dull pain in groin; pain over crest of ilium;

Google

pain in back part of breast; side of chest sore and painful; lung and back of breast sore; pain in great toe; pain in thigh; creeping and stinging in half of body.

" **Sensations.** As if blood was trickling down from front to back part of head; head as if too large; as if tossed on a rough sea; as if blood would burst out at forehead and eyes; as if blood would burst from nose; as if brain was too large; as if top of head would burst; as if blood was forcing its way out of eyes; as if eyes would burst out of head; as if cornea was sore; as if a quantity of mucus lodged in posterior nares; as if blood would spurt from nose; mouth as if burnt; lump in throat like a small puff ball; as of plug in throat; as if all food taken was lodged under upper end of sternum; as if turning into urine; as if womb was down; pain as if menstruating; pain as of soreness behind sternum; as if foot had been asleep; tired as if he had not slept or had walked a great distance; heat as if femur would explode.

Pain: in forehead over eyes; in temples; in head and back; through r. eye; from parotids into ear; behind lower end of sternum; across lower abdomen; over crest of l. ilium; in region of kidneys; across small of back; in lower part of abdomen; in back part of l. breast; back part of r. breast, extending to axilla; in edge of trapezius, at occipital and clavicular insertions to shoulders; in knee joints; in l. great toe; in thigh.

Severe pain: in forehead and through head; in head, above eyes, into eyes; in glottis.

Tearing: in larynx and trachea.

Sharp darting pain: in l. side of head, from temporal to orbital region.

Darting: across r. side of small of back.

Sharp cutting: in muscles; in upper third of r. side.

Sharp pain: in l. eye; in lower part of l. side across lower abdomen; in back part of l. breast; darted through lower part of r. breast; around heart.

Laming stitch: in r. patella.

Bearing down pain: in upper part of abdomen.

Cramp: in calf.

Rheumatic pain: in r. side of neck and r. breast; both shoulders, up muscles of neck; in wrist joints; in knee joints.

Rheumatic soreness: in muscles of chest, back and extremities.

Stinging: in joints.

Severe aching pain: in feet; in legs.

Aching pain: in anus; in loins; in region of r. ovary; length of spine; across small of back; in limbs.

Google

Steady aching: in and behind eyeball.
Dull aching pain: over l. orbital region.
Dull pain: in forehead into eyes; in l. groin; over hip bone.
Burning: in fauces; in stomach; of larynx; in throat; of spots on fingers.
Intense heat: in femur.
Heat: in head.
Soreness: of mouth; in throat; of l. side of chest; l. lung and back of breast sore all day; in side.
Sore, stretched feeling: of bladder.
Spasmodic, painful, contractive sensation: in throat.
Distress: across lower part of abdomen.
Uneasiness: in stomach.
Creeping and stinging: in l. half of body, arm, hand, leg.
Gone sensation: low down in stomach.
Sinking feeling: at stomach.
Weakness: of knees; of whole body.
Constriction: in throat; in cardiac region.
Heaviness and dragging down: in lower abdomen.
Weight: in stomach.
Fulness: in head; in forehead; in throat; in fauces.
Tightness: in head; in forehead.
Tension: over whole head.
Stiff feeling: in parotids.
Twitching: across r. upper lid and in eyeball.
Dryness: of tongue; of posterior fauces; of throat; of larynx; of glottis; of epiglottis.
Great itching: of vulva; of spots on fingers; in various parts.

" **Tissues.** ‖Swelling of bone.
‖Chronic osteitis; exostosis, especially of thighs; chicken breast.
‖Articular rheumatism; dissolves many tissues.
‖Kidney affections; croup; diphtheria; morning sickness of pregnancy; emaciation; rheumatism.

" **Touch. Passive Motion. Injuries.** Touch: head sore; hypochondrium sensitive; r. breast sore; axilla sore; along sciatic nerve sore.
Pressure: spots on legs brightest.

" **Skin.** ‖Skin hard and dry, no sweat. θDiabetes mellitus.
Itching: on various parts, and redness on covered parts; on going to bed.
Hivelike elevations on back; itching and redness on other parts.
Several blotches bright red on legs, slight burning, no itching, > warmth, < cold and going quickly from warm to cold, or vice versa; brightest 8 A.M. and on pressure; centre remains bright longest.

Google

Itching and burning on going into cold air, with creeping and stinging in l. half of body, arm, hand and leg.

Skin harsh, dry, no sweat. θDiabetes mellitus.

[47] **Stages of Life, Constitution.** Large doses disagreed with melancholic, choleric constitution, dark hair and eyes.

Anæmic, pale women.

A baby, dark eyes and hair; epistaxis every morning.

Boy, æt. 16, suffering six months; diabetes mellitus.

Young woman, healthy, brunette, two months pregnant with first child; morning sickness.

Man, æt. 62, phlegmatic, dark complexion, dark hair and eyes, has had dropsy several times; diabetes mellitus.

[48] **Relations.** Antidoted by: *Bryon.* (relieved sharp pain upper third r. side, but soreness remained).

Compatible: meat diet in diabetes mellitus.

Incompatible: coffee increases symptoms.

Compare: vegetable acids (all cause weakness and thinning of the blood); *Acon., Act. rac., Bellad., Cauloph., Ipec., Nux vom., Phos. ac.* (diabetes), *Pulsat., Rhus tox., Psorin.* (great discouragement).

Google

LACTUCA VIROSA.

Poisonous Lettuce. *Compositæ.*

A plant native to Europe; has a strong, disagreeable smell, like that of opium, and a bitterish, acrid taste.

Provings by German provers, collected by Seidel. See Jour. f. Hom. Arzneien, vol. 2.

CLINICAL AUTHORITIES.—*Cough*, Neidhard, Raue's Rec., 1870, p. 373; *Whooping cough*, A. R., Rück. Kl. Erf., vol. 5, p. 723; *Catarrh of chest*, Meyer, Rück. Kl. Erf., vol. 5, p. 686; *Hydrothorax*, Neidhard, Raue's Rec., 1870, p. 372.

[1] **Mind.** Anguish and internal uneasiness.
Sadness with exaggerated fancies.
Difficulty of thinking.

[2] **Sensorium.** Vertigo with heaviness of head and lower limbs, blackness before eyes and sensation as if head was too large and expanded.

[3] **Inner Head.** Aching, pressing pain in forehead; sensation as if brain was loose.
Painful spot near vertex, < on touching it.
Heaviness in occiput with pressure.
Dull pain in whole head, early in morning.
Trembling and pulsation in head during rest.
Head is very painfully shattered by slight cough, so that a whirring and pressing remain a long time afterward.
Headaches: with affections of respiratory organs; nervous.

[5] **Sight and Eyes.** Muscæ volitantes; dimsightedness, as through mist or gauze.
‖Pupils very much dilated.
Biting in eyes.
Lids covered with mucus.

[8] **Upper Face.** Heat of face, with trembling of lips, and sensation as if they were swollen.

[9] **Lower Face.** Twitching in lips.

[11] **Taste and Tongue.** ‖Tongue coated white; tip of tongue feels burnt.

[12] **Inner Mouth.** Increased flow of acrid saliva.

[13] **Throat.** Bitter taste in throat, as from bile.
Tenacious mucus in throat early in morning.

[17] **Scrobiculum and Stomach.** ‖Tightness in pit of stomach, followed by true præcordial anxiety.
‖Feeling of warmth in stomach, accompanied by nausea,

Google

rising into throat, and flat taste at root of tongue, changing to icy coldness of stomach and throat.

‖Pit of stomach retracted; pain in stomach, < from pressure, > by sitting, bending, or emitting fetid flatus.

Icy coldness in stomach and œsophagus.

Stitches in pylorus.

[18] **Hypochondria.** Swelling of liver with pressure, or with tightness when pressing on it.

[19] **Abdomen.** Pinching in umbilical region, < crossing legs.

‖Fulness in abdomen, especially r. side, impedes respiration; > by discharge of flatus.

‖Ascites, with induration of liver, and asthma.

[20] **Stool and Rectum.** Dry, hard, knotty, difficult stool, with burning at anus.

Hemorrhoidal tumors, with tenesmus of rectum.

[21] **Urinary Organs.** Dragging, pressing in region of bladder.

‖Frequent micturition and increased secretion of urine, urine clear as water.

Burning at orifice of urethra.

[22] **Male Sexual Organs.** Swelling of lymphatics on penis, painful erections during morning sleep.

[23] **Female Sexual Organs.** ‖Hypertrophy of ovaries in a woman, æt. 50, consequent upon an abortion twenty-five years previously; abdomen as large as that of a woman with twins at ninth month; could get no rest day or night, tumor causing pain by pressure in all positions; rectum contracted, evacuates feces with great pain.

‖Excessive swelling of abdomen, feet and eyelids. θDropsy of uterus.

‖Painful gonorrhœa in females.

[25] **Respiration.** Frequent desire for air and a deep breath; oppression of chest.

‖She feared to take a deep breath on account of tightness in lower part of chest; there was then felt a slight shock.

Difficult breathing, with stitches in l. lung.

‖Wakes suddenly and must bounce out of bed upon his feet. θSuffocation.

[27] **Cough.** ‖Cough from tickling in throat; tightness in chest.

‖Dry cough in short paroxysms, shaking chest and occiput.

Dry, suffocative cough, with coldness in stomach.

Spasmodic, dry, hollow, racking cough, as if chest would fly to pieces.

‖‖Incessant spasmodic cough, which threatens to burst chest; always caused by peculiar tickling in fauces, which, in turn, seems to be produced by sensation of suffocation in throat.

‖A woman past climacteric years, tickling cough, with

oppression of middle and r. side of chest, pain in posterior part of region of liver.

‖Whooping cough, paroxysms preceded by anxiety.

‖Dry, spasmodic cough, from tickling in larynx, with dyspnœa and oppression of chest, as if it would burst; < in morning, > sitting up; before attacks, great anxiety.

[28] **Inner Chest and Lungs.** ‖Pinching, dull, sticking pain, which becomes seated in upper part of l. side of chest, with tightness of whole chest.

Pleuritic stitches from middle of sternum toward r. side.

Dull sticking from l. chest to scapula.

Pain catches him in his lungs, back and front, and across top of sacrum.

‖Several sharp stitches beneath short ribs of l. side.

‖Cramping, pressive pains in various parts of chest.

Feeling of coldness in chest.

Fulness in chest, as of a heavy weight; loosens clothing.

Cannot bear anything to bear on chest, lest breathing should become oppressed.

Sensation as if lower part of chest was too tight.

‖Great oppression of chest at night, waking him from sleep and obliging him to sit up with anxious suddenness, feels as if he would suffocate, and suddenly he finds himself on his feet.

Congestion of blood to chest, with pressing, obliging one to breathe hurriedly.

‖Irritation to cough caused by constant tickling in throat, cough short, taking away breath, patient almost in despair. θCatarrh of chest.

‖‖Hydrothorax with anasarca; unable to lie down or sleep, could not express ideas for want of words, inclined to weep; fluids choke him; violent palpitation.

[29] **Heart, Pulse and Circulation.** ‖Tightness and oppression of chest on waking from sleep; feels as if suffocating, must get out of bed. θAngina pectoris.

Pulse slow, contracted and small.

[31] **Neck and Back.** ‖Pain as if in spinal marrow, extending through coccyx. θCoccygodinia.

[32] **Upper Limbs.** Painful twitching or trembling of hands.

[33] **Lower Limbs.** Sensation in legs as if circulation was suspended, particularly when sitting.

Cold feet.

[34] **Limbs in General.** Sharp, cramplike twitchings in neighborhood of joints.

[35] **Rest. Position. Motion.** Rest: trembling and pulsating in head.

Sitting: pains in stomach >; oppression of chest >; as if circulation in legs was suspended.

Google

Bending: pains in stomach >.
Crossing legs: pinching in umbilical region <.
Unable to lie down: hydrothorax with anasarca.
Must sit up in bed: oppression of chest.
In all positions: painfulness of tumor.

[37] **Sleep.** Irresistible drowsiness, in daytime.
| |Sleep restless or lethargic.

[38] **Time.** Morning: dull pain in whole head; tenacious mucus in throat; during sleep, painful erections; oppression of chest <.
Day: irresistible drowsiness.
Night: great oppression of chest.
Day or night: no rest, hypertrophy of ovaries.

[39] **Temperature and Weather.** Warm room: chilliness.

[40] **Fever.** | |Slight shivering.
Frequent coldness over back and head, with heat in face.
Chilliness in a warm room, with coldness of hands and feet.
Dry heat of upper part of body, with icy coldness of feet.
Profuse perspiration.

[42] **Locality and Direction.** Right: fulness in abdomen <; oppression of side of chest; stitches toward side from sternum.
Left: stitches in lung; pinching pain in upper part of side of chest; dull sticking from chest to scapula; sharp stitches beneath short ribs.

[43] **Sensations.** As if head was too large and expanded; as if brain was loose; as if looking through mist or gauze; as if lips were swollen; tip of tongue as if burnt; as if chest would fly to pieces; as of a heavy weight in chest; as if lower part of chest was too tight; as if he would suffocate; pain as if in spinal marrow, extending through coccyx; as if circulation in legs was suspended.
Pain: in stomach; in posterior part of region of liver; in lungs, back and front, and across top of sacrum.
Painful spot: near vertex.
Head is very painfully shattered by slight cough, so that a whirring and pressure remain a long time afterward.
Anxiety: in præcordial region.
Sharp stitches: beneath short ribs of l. side.
Stitches: in pylorus; in l. lung; from middle of sternum toward r. side.
Pinching: in umbilical region.
Sharp, cramplike twitching: in neighborhood of joints.
Cramping, pressive pains: in various parts of chest.
Dragging, pressing: in region of bladder.
Pinching, dull sticking pain: upper part of l. chest.
Dull sticking: from l. chest to scapula.
Aching pressing pain: in forehead.

Google

Dull pain: in whole head.
Painful twitching and trembling: of hands.
Biting: in eyes.
Burning: at anus; at orifice of urethra.
Heat: of face.
Dry heat: of upper part of body.
Warmth: in stomach.
Pressure: on occiput.
Heaviness: of head and lower limbs; of occiput.
Oppression: of chest.
Tightness: in pit of stomach; of liver; in lower chest.
Fulness: in abdomen; in chest.
Tickling: in throat; in fauces.
Trembling: of lips.
Trembling and pulsating: in head.
Twitching: of lips.
Coldness: of stomach and throat; in chest; of feet.

[44] **Tissues.** Dropsical swellings; hydrothorax; ascites, with induration of liver and asthma.

[45] **Touch. Passive Motion. Injuries.** Touch: < painful spot on vertex.
Cannot bear anything on chest: difficulty of breathing.
Pressure: pain in stomach; tightness of liver; pain in tumor >.

[47] **Stages of Life, Constitution.** Woman, past climaxis; cough.
A man, æt. 22; asthma with hydrothorax (relieved).
Man, æt. 26; phthisical, after intermittent, hydrothorax.
Man, had for years suffered from blood dyscrasia and affection of brain; hydrothorax.
Woman, æt. 30; hysterical, spasmodic cough.
Woman, æt. 50; hypertrophy of ovaries after miscarriage (improved).
Woman, æt. 59; hydrothorax (relieved).
A woman, æt. 60; hydrothorax.
A man, æt. 61; asthma with general œdema after taking cold.

[48] **Relations.** Compare: *Opium* (drowsiness), *Laches.*, *Kali carb.*, *Kali jod.* (heart symptoms).

Google

LAPIS ALBUS.

Silico Fluoride of Calcium.

The name Lapis Albus, or *white stone*, was given by Grauvogl to a species of gneiss which he found in the mineral springs of Gastein, which flow over formations of gneiss into the valley of the Achen, where goitre and cretinism abound.

CLINICAL AUTHORITIES – Goitre (ten cases), Bellows, Am. Hom. Obs., 1867, vol. 411 (Grauvogl's reports did not appear until 1874); *Carcinoma*, Grauvogl, Hah. Mo., vol. 10, p. 182.

[9] **Lower Face.** ❙Opening in cheek as large as a silver dollar. θCarcinoma.

[17] **Scrobiculum and Stomach.** ❙❙Burning, shooting, stinging pains in cardiac region and pylorus.

[23] **Female Sexual Organs.** ❙❙Burning, shooting, stinging pains in breasts and uterus.
❙Uterine carcinoma (5 cases).
❙Fluor albus.

[31] **Neck and Back.** ❙Goitre, cretinism and scrofulous diseases.

[45] **Sensations.** Burning, shooting, stinging pains: in cardia and pylorus; in breasts and uterus.

[44] **Tissues.** ❙Affections of glands and lymphatics.
❙Scrofulous affections, abscesses and sores; enlargement and induration of glands, especially cervical; glandular tumors, where no glands are usually found; goitre, cretinism.
❙❙Lipoma, sarcoma, glandular and fibrous tumors; carcinoma, as long as ulceration has not set in, based on scrofulosis.
❙Scirrhus.
❙Tuberculosis scrofulosa.

[47] **Stages of Life, Constitution.** Woman, æt. 50; carcinoma.

[48] **Relations.** Compare: *Arsen.*, *Arsen jod.*, *Badiaga*, *Calc. ost.*, *Calc. jod.*, *Conium*, *Condur.*, *Iodum*, *Kali carb.*, *Kali jod.*, *Silica*, *Spongia*.

Google

LAUROCERASUS.

Cherry Laurel. *Rosaceæ.*

An evergreen tree native to Persia; the fresh leaves are aromatic and taste like the bitter almond. The alcoholic tincture is prepared from the leaves.

Provings by Jörg, Hartlaub, Nenning, etc.

CLINICAL AUTHORITIES.—*Threatened apoplexy*, Elwert, Rück. Kl. Erf., vol. 1, p. 92; *Attacks of unconsciousness*, Billig, Rück. Kl. Erf., vol. 5, p. 33; *Cholera infantum*, Martin, Trans. Hom. Med. [1] **Mind.** Loss of consciousness, with loss of speech and motion.
Insensibility; complete loss of sensation.
Dulness of senses.
Weakness of mind and loss of memory.
Inability to collect one's ideas.
Fear and anxiety about imaginary evils; despondency.

[2] **Sensorium.** Vertigo: with stupefaction; with disposition to sleep; < in open air.
‖Sudden bloating of face, vertigo, distortion of mouth, twitching of muscles of face; loss of speech, with perfect consciousness. θThreatened apoplexy.
‖Coma, looks more like a deep, quiet sleep. θApoplexy.
‖Apoplexy, with paralysis.

[3] **Inner Head.** ‖Coolness on forehead as from a draft of air.
Periodical paroxysms of aching pain under frontal bone.
Boring headache, particularly above eyelids.
Oppression on top of head, as from a weight.
Beating in head, < stooping.
‖Stupefying pain in whole head.
‖Pulsation in head, with heat or coldness.
‖Stitches in head.

Google

Headache: > after eating; lacerating, in evening in bed; from nervous prostration, with dragging pain, accompanied by pain and swelling in hypochondrium and yellow spots on face.

Sensation of looseness of brain, as if it were falling into forehead when stooping, without pain.

The brain feels contracted and painful.

[4] **Outer Head.** Sensation of coldness in forehead and vertex, as if a cold wind was blowing on it, descending through neck to back; < in room, > in open air.

Itching of hairy scalp.

[5] **Sight and Eyes.** Obscuration of vision; sensation of a veil before eyes.

Objects appear larger.

Eyes: staring, wide open; lightly closed; distorted.

Pupils dilated, immovable.

[6] **Hearing and Ears.** Hardness of hearing.

Tingling in ears; itching.

[7] **Smell and Nose.** Nose feels stopped up; no air passes through.

[8] **Upper Face.** Face: yellow spots; sunken, with livid grey yellow complexion; blue, with gasping; bloated; idiotic.

Twitching and convulsions of facial muscles.

Titillation, as if flies and spiders were crawling over skin.

Eruption around mouth.

[9] **Lower Face.** Lockjaw.

[11] **Taste and Tongue.** Tongue: dry, rough; dry and white; cold or numb, as if burnt; l. side stiff and swollen, with loss of speech.

[12] **Inner Mouth.** Foam at mouth. θEpilepsy.

Dryness in mouth.

[13] **Throat.** Spasmodic deglutition. θChorea.

Spasmodic contraction in throat and œsophagus.

Drink rolls audibly through œsophagus and intestines.

[14] **Appetite, Thirst. Desires, Aversions.** Hunger after eating, with feeling of emptiness.

Loss of appetite, with clean tongue.

Disgust for food during pregnancy.

Violent thirst, with dry mouth.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.

Nausea: on approaching a stove; and vomiting of ingesta.

Eructations, tasting like bitter almonds. θPregnancy.

Vomiting of food with cough.

[17] **Scrobiculum and Stomach.** Violent pain in stomach, with loss of speech.

Burning or coldness in stomach and abdomen.

Contractive feeling in region of stomach, and cutting in abdomen.

Google

[18] **Hypochondria.** ‖Sticking pains in liver, with pressure.
‖Region of liver distended, pain as from subcutaneous ulceration, or as if abscess would burst.
‖‖Indurated liver; atrophic nutmeg liver.

[19] **Abdomen.** ‖Pinching about umbilicus.
‖‖Colicky pains in afternoon, and tearing pains in vertex at night.
‖Sensation like falling of a heavy lump from just above umbilicus to small of back, produced by talking or overexertion, also with spasmodic pains in cardiac region.
‖Coldness and audible rumbling in whole abdomen.

[20] **Stool and Rectum.** ‖Diarrhœic stools: with tenesmus; of green, liquid mucus, with suffocative spells about heart, forcing her to lie down; involuntary.
‖Constipation, stools hard, firm, passed with much straining; obstruction.
‖‖Ineffectual urging to stool, with emission of flatus only.
‖Green, watery stools; drinks roll audibly through œsophagus and intestines; suppression or retention of urine; dilated pupils; slow, feeble breathing; irregular, imperceptible pulse. θCholera infantum.
‖Frequent, greenish, mucous stools; entire loss of appetite, but thirsty; child would not take anything but water, which could be heard gurgling down œsophagus to stomach; respiration very slow and weak; pulse almost imperceptible; extremities cold as death, with coldness of entire body. θCholera infantum.
‖Absence of vomiting and stools; asphyxia; coldness of body, pulselessness; cloudiness of brain, fainting; tetanic spasms; suppression or retention of urine; sensation of constriction in throat when swallowing. θCholera.
‖Complete paralysis of sphincter ani.

[21] **Urinary Organs.** ‖Suppressed urine. θCholera.
‖Retention of urine from paralysis of bladder, or urine is voided slowly.
‖Involuntary urination.
Urine: pale yellow; thick, reddish or mahogany colored sediment, with floating jellylike flocks.
Pain in region of stomach when urinating.
Burning in urethra, and pressing after urinating.
Itching in forepart of urethra.
Acrid urine, corroding labia.
‖Urinary difficulties, with palpitation of heart and gasping for breath, coming on by spells.

[22] **Male Sexual Organs.** ‖Gangrene of penis.

[23] **Female Sexual Organs.** ‖Menses: too early and too profuse; blood thin; with nightly tearing in vertex.
‖Menorrhagia, blood dark, in large clots, during climaxis.

Digitized by Google

‖Severe pain in sacral region, extending to pubis; frontal headache, with dizziness and dimness of vision; coldness of extremities; icy coldness of tongue; great melancholy. θDysmenorrhœa.

‖Burning and stinging in and below mammæ.

[24] **Pregnancy. Parturition. Lactation.** ‖Attacks of suffocation, with palpitation and a sort of gasping for breath; must lie down sometimes to find relief. θPregnancy.

‖She is conscious of a shock passing through whole body before spasm. θPuerperal convulsions.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Scraping in larynx, with increased secretion of mucus; hoarseness.

‖Spasmodic constriction of trachea.

‖Laryngismus stridulus; heart affected.

[26] **Respiration.** Breathing: slow, feeble, moaning or rattling; almost imperceptible; panting; very difficult.

‖Dyspnœa, with sensation as if lungs would not be sufficiently expanded, or as if pressed against spine.

‖Spasmodic oppression of chest.

‖Gasping, suffocating spells; clutches at heart; palpitation.

[27] **Cough.** Cough: short, titillating, nervous, from heart disease; cannot lie down; whizzing, with sensation as if mucous membranes were too dry; < towards evening, from motion, stooping, eating and drinking, or warmth; with copious, jellylike sputa, dotted with bloody points.

‖Dry, almost constant, titillating cough; throat and mouth feel as if burnt.

‖Cough, with whistling sound.

‖Whooping cough, dry, whistling, no sputum; impending paralysis of lungs.

‖Cough, with evening aggravation, severe cramps in chest, and rapid sinking of vital forces. θWhooping cough.

‖Coughed continuously for several nights as soon as he laid down. θMitral stenosis.

[28] **Inner Chest and Lungs.** ‖Spasm of chest; veins of hands distended.

‖Threatening paralysis of lungs.

‖Pleurisy in drunkards and melancholic persons; at beginning of diseases, if small bronchi are irritated; suffocative cough, pain in pleura severe and localized, pulse soft, but quick.

‖Coughs and spits a great amount of phlegm, sprinkled over and through with distinct clots of blood. θTyphoid pneumonia. θPulmonary affections.

[29] **Heart, Pulse and Circulation.** ‖Heart's action irregular, pulse slow; palpitation.

‖Stitches in region of heart.

Google

‖Beating, fluttering sensation; gasps for breath; dry cough.
‖Sitting posture causes gasping for breath.
‖Pulse scarcely perceptible; cold, moist skin; convulsions of muscles of face.
‖Spasmodic pain in cardiac region, fears sudden death; sensation as if something heavy, like a lump of lead, had fallen from pit of stomach to back, whenever she attempted to rise from a recumbent posture.
‖Attacks of suffocation, with gasping for breath; stitches in præcordial region; excessive weakness. θAngina pectoris.
‖Continual cough at night, as soon as he lies down. θMitral stenosis.
‖Pulse extremely irregular; at times small and slow, often imperceptible, at others somewhat accelerated, seldom full and hard. θApoplexy.
‖‖Cyanosis neonatorum; face blue, with gasping.
‖A little exercise produces gasping for breath and increased blueness; ends of fingers and toes knobby, and larger than any portion of these extremities; > when lying still. θCyanosis.

30 **Outer Chest.** ‖Pains in external parts of thorax on moving.
‖Burning in chest on taking an inspiration.

31 **Neck and Back.** ‖Painful stiffness in l. side of neck, nape and small of back.
‖Pressure in nape of neck, particularly in open air, compelling him to bend head forward.
‖Severe pain in sacral region, extending to pubis.

32 **Upper Limbs.** ‖‖Pressure on r. shoulder or in shoulder joint.
‖‖Pains as from lameness, also stitches, in r. shoulder.
Pimples on r. upper arm.
‖‖Stitch in both elbows.
‖‖Pain, as if sprained, in r. wrist joint.
‖Distension of veins on hands. θHeart disease.
‖‖Rough, scaly skin between fingers, with burning when touched by water.

33 **Lower Limbs.** ‖‖Pain, as if sprained, in l. hip joint.
‖‖Sticking in l. knee.
‖‖The feet go to sleep when crossing legs or sitting.
‖‖Ulcerative pains in lower part of heels.
‖‖Stiffness of feet after rising from a seat.
‖Cold, clammy feet, up to knees. θChorea. θHeart disease.

34 **Limbs in General.** ‖Ends of fingers and toes enlarged, knoblike. θHeart disease.
‖Stinging and tearing in limbs.
‖Painless paralysis of limbs.

35 **Rest. Position. Motion.** When lying down: coughs continuously; ends of fingers and toes knobby.

Google

Must lie down: suffocating spell about heart.
Cannot lie down: heart disease.
When she attempts to rise from a recumbent posture, sensation as of a heavy lump falling from pit of stomach to back.
Stooping: beating in head <; cough <.
Compelled to bend head forward: pressure in nape of neck.
Sitting posture: gasps for breath; feet go to sleep.
After rising from seat: stiffness of feet.
Crossing legs: feet go to sleep.
Motion: cough <; causes pain in external thorax.
A little exercise produces gasping for breath.

[35] **Nerves.** ‖Want of energy of vital powers and want of reaction, especially in chest and heart affections.
‖Rapid sinking of forces: long lasting fainting spells.
‖Clonic spasms of limbs, with paralytic weakness; no loss of consciousness. θTyphoid.
‖Much gasping for breath before, during, or after spasm, with bluish tint of skin; after fright; emaciation. θConvulsions.
‖Emotional chorea, fearful contortions and jactitations when awake; restless sleep; gasping for breath.
‖Want of nervous reaction; the well chosen remedy does not act.
‖Chorea, with constant jerks, cannot keep still; speech indistinct, gets angry when not understood; gasping; emaciation; after fright.
‖On day of burial of mother, ten years ago, sudden loss of consciousness, from which he did not recover for a long time; since then, attacks more frequent and severe, finally, one or two a week, one lasting as long as nine hours; before attack, paleness of face; dropping of lower jaw; sinking of arms to side; wide open, staring eyes; loss of consciousness; respiration suspended; pulse weak, scarcely perceptible; face pale; limbs stiff; hands clenched, thumbs not drawn in; eyes closed; mouth slightly open, no foaming; in beginning of attack grinding teeth; after one half hour to nine hours changes position of limbs and stretches, then, between long intervals, takes deep breaths, opens eyes, trembles all over and complains of great lassitude and severe headache.
‖Epilepsy; tetanus.
‖Apoplexy, with paralysis.
‖After feeling ill eight days, during which time several attacks of vomiting of tasteless water occurred, paroxsym sets in; great anxiety, eyes turned up and fixed upon one spot, pupils dilated, vanishing of sight, roaring and ringing in ears, trembling and twitching

Google

of muscles of face, distortion of face, rush of blood to head, heat and redness of face, chattering teeth, first trembling of upper then of lower limbs, followed by shaking of body as in a severe chill, but with heat and sweat of body; twitching and spasmodic distortion of whole body and extremities; palpitation; moaning and groaning; partial loss of consciousness; paroxysms last several minutes; during interval, confusion of head, pain in epigastrium, great lassitude, debility, anxiety and restlessness; occasional short slumber disturbed by dreams of fire, startled awaking, or twitching of whole body; occasionally delirium, cries for help; no fever.

[37] **Sleep.** ‖Irresistible sleepiness, especially after dinner and in evening.

‖Soporous condition; deep, snoring sleep.

[38] **Time.** Afternoon: colicky pains; chill, coldness and shivering.

After dinner: irresistible sleepiness.

Evening: headache >; cough <; irresistible sleepiness; chill, coldness and shivering.

Night: tearing in vertex; when lying down, coughs continuously.

[39] **Temperature and Weather.** Open air: vertigo <; coldness in forehead and vertex >; pressure in nape of neck <.

In room: coldness in forehead and vertex <.

On approaching stove: nausea; cold.

External warmth: does not > coldness.

When touched by water: burning between fingers.

[40] **Fever.** ‖Chill and external coldness.

‖Cold, moist skin; apoplexy.

‖Chill, coldness and shivering in afternoon and evening, not > by external warmth.

‖Patient feels cold and gets sick on approaching warm stove.

‖Chill, alternating with heat; want of animal heat.

‖Heat after chill, from evening till midnight.

‖Heat descending back.

‖Sweat: after eating; during and after heat, till toward morning.

[41] **Attacks, Periodicity.** One or two a week: attacks of loss of consciousness.

From evening till midnight: heat after chill.

[42] **Locality and Direction.** Right: pressure of shoulder; in shoulder joint; pains as from lameness in shoulder; pimples on upper arm; pain as if sprained in wrist joint.

Left: painful stiffness of side of neck; pain as if sprained in hip joint; sticking in knee.

Google

[43] **Sensations.** Coolness of forehead as from a draft of air; as of a weight on top of head; as if brain was loose and falling into forehead when stooping; as of a veil before eyes; nose as if stopped up; as if flies and spiders were crawling over skin; tongue as if burnt; as if abscess in region of liver would burst; as of a heavy lump falling from just above umbilicus to small of back; as if lungs would not be sufficiently expanded; as if lungs pressed against spine; as if mucous membranes were too dry; throat and mouth as if burnt; pain as from lameness in r. shoulder; pain as if sprained in r. wrist joint.

Pain: in hypochondrium; as from subcutaneous ulceration in region of liver; in region of stomach when urinating; in external parts of thorax; as if sprained in wrist joint; as from lameness; in epigastrium.

Painfulness: of brain.

Violent pain: in stomach.

Severe pain: in head; in sacral region to pubis; in pleura.

Tearing pains: in vertex; in limbs.

Cutting: in abdomen.

Lacerating pain: in head.

Pinching: about umbilicus.

Stitches: in head; in region of heart; in præcordial region; in r. shoulder; in both elbows.

Sticking pains: in liver; in l. knee.

Stinging: in and below mammæ; in limbs.

Beating, fluttering sensation: about heart.

Beating: in head.

Boring pain: in head.

Stupefying pain: in whole head.

Ulcerative pain: in lower part of heels.

Dragging pain: in head.

Colicky pains: in abdomen.

Spasms: of chest.

Spasmodic pains: in cardiac region.

Aching pain: under frontal bone.

Burning: in stomach and abdomen; in urethra; in and below mammæ; in chest; between fingers.

Painful stiffness: in l. side of neck, nape and small of back.

Pulsation: in head, with heat or coldness.

Spasmodic constriction: of trachea.

Oppression: on top of head; of chest.

Pressure: in nape of neck; in r. shoulder

Constriction: of throat.

Contractive feeling: in region of stomach.

Stiffness: of feet.

Scraping: in larynx.

Tingling: in ears.

Google

Contraction: of brain.
Dryness: of mouth.
Coldness: in forehead and vertex; of extremities; of entire body; of tongue.
Itching: of hairy scalp; in ears; in forepart of urethra.

[47] **Stages of Life, Constitution.** Child, æt. 8 months, sick some time; cholera infantum.
Two boys, æt. between 10 and 12; clonic convulsions during typhoid.
Girl, æt. 12, very nervous, continually twitches muscles of face, after fright; chorea.
Boy, æt. 13, had rheumatism; disease of heart.
Three women, æt. 20; clonic convulsions during typhoid.
Woman, suffering five years; spasmodic pains about heart.
Man, æt. 36, medium height, suffering appearance, compelled to do hard work; attacks of loss of consciousness.
Man, psoric taint, suffering from cramps, after great fright; spasms.
Woman, æt. 50; palpitation of heart.
Woman, æt. 59, unmarried, one year ago had apoplexy cured by *Hyosc.* and *Bellad.*; threatened apoplexy.

[48] **Relations.** Antidoted by: *Camphor, Coffea, Ipec., Opium.*
Compatible: *Bellad., Phosphor., Pulsat., Veratr.*
Compare: *Bar. carb., Bellad., Bryon., Calcar., Hydr. ac., Ipec., Nux vom., Opium, Phosphor., Pulsat., Rhus tox., Sepia, Sulphur, Veratr.*

Google

LEDUM PALUSTRE.

Marsh Tea; Wild Rosemary. *Ericaceæ.*

A small evergreen shrub, growing in moist, swampy grounds in Europe and America.

Introduced and proved by Hahnemann and his provers, supplemented by new symptoms occurring after high potencies used clinically by Lippe and Berridge.

CLINICAL AUTHORITIES.—*Asthenopia; hemorrhage into interior chamber of eye; Ptosis after injury; Ecchymosis of conjunctiva*, Norton, Oph. Therap., p. 110; *Rheumatic ophthalmia*, Alb, Norton's Oph. Therap.; *Injuries to eye*, Norton's Oph. Therap., p. 109; *Metrorrhagia*, Claude, Trans. World's Hom. Conv., 1876, p. 955; *Whitlow*, Smith, Hom. [1] **Mind.** ‖Desire for solitude.
‖After nightmare, fears to go to sleep, lest she die.
‖Inclined to be out of humor and angry; vehement.
‖Discontented; morose; hates his fellow beings.

[2] **Sensorium.** ‖Vertigo: as from intoxication, especially when walking in open air; feels dull after eating; head inclined to fall backward.

[3] **Inner Head.** Headache: raging, pulsating; causing dulness, or stupefaction; pressing, with distress, when head is covered; as if something was gnawing in her temples, occiput and ears, with red, bloated looking face and eyes; dull, in morning, during sleep.
A misstep causes a sensation of concussion in brain.
‖Head affected after getting wet.

[4] **Outer Head.** ‖Least covering of head intolerable.
‖Pimples and boils on forehead. θDrunkards.

Google

‖Itching eruption scattered thickly over scalp; enlarged cervical glands.

[5] **Sight and Eyes.** ‖Pupils dilated.
‖Asthenopia, with dull pain behind eyeball, as if it would be forced out.
‖Hemorrhage into anterior chamber after iridectomy.
‖Left eye first affected; excessive photophobia, with severe pain upon attempting to open lids, pressing pain in head and eye, as if it at first was pressed asunder, then out of orbit, with great lachrymation and nocturnal aggravation; severe burning on border of lids and sticking in eyes, as from sand; tearing, drawing pains in neck to insertion of deltoid muscle; heat and chills. θRheumatic ophthalmia.
‖Complete ptosis, r. eye, from injury; ecchymosis of lids and conjunctiva.
‖Contusions or wounds of eye and lids, especially if accompanied by extravasation of blood.
‖Ecchymoses of conjunctiva, traumatic or spontaneous.
‖Profuse suppuration with discharge of fetid pus.
‖Nightly agglutination without inflammation or pain.
‖Burning on border of lids and feeling of sand in eyes.
‖Lachrymation: acrid, making lower lids and cheeks sore.

[6] **Hearing and Ears.** ‖Noises in ear as from ringing of a bell, or from a storm of wind; ringing and whizzing.
‖Hardness of hearing: (r. ear) as if ear was obstructed by cotton; after cutting hair; after chilling head; after suppression of coryza or otorrhœa.
‖Rheumatic otitis.

[7] **Smell and Nose.** Long lasting nosebleed; afterward sore in upper part of nose, with violent burning; blood pale.
‖Small pimples on root of nose.

[8] **Upper Face.** ‖Eruption of pimples on forehead, as in brandy drinkers, with biting itching on chest, as from lice; red blotches and nettlerash.
‖Red tubercles on forehead, stinging when touched; pimples and blood boils.
‖Face: alternately pale and red; bloated.
‖Scaly, dry herpes in face, burning in open air.
‖Large, rough exanthema on face.
‖Erysipelas of face and eyes from bites of insects.
‖Tetterlike, crusty eruption around nose and mouth, with itching, smarting and burning.
‖Red, pimply eruption on face. θDrunkards.

[9] **Lower Face.** ‖Glandular swelling under chin.

[11] **Taste and Tongue.** ‖Stinging on forepart of tongue.
‖Bitter taste in mouth.

[12] **Inner Mouth.** ‖Offensive breath.

Google

| | Sudden running of waterlike saliva from mouth, with colic; waterbrash.

[13] **Throat.** | Sore throat, with fine, stinging pain, < when not swallowing; sensation as from a lump in throat.
| | Malignant sore throat.
| | Great heat in throat when moving in open air.

[15] **Eating and Drinking.** After eating: hurriedly, contracting pain in breast bone; pressure in stomach after a small quantity of food; feels dull.
Bad effects from alcoholic drinks.

[16] **Hiccough, Belching, Nausea and Vomiting.** | Sudden running of water from mouth; waterbrash.
| | Nausea and qualmishness when spitting.

[19] **Abdomen.** | | Sensation of fulness in upper part of abdomen.
| | Colic every evening.
| | Pain as if diarrhœa would set in, from umbilicus to anus, with loss of appetite and cold feet.
| | Pain in loins after sitting.
| | Ascites.

[20] **Stool and Rectum.** | | Diarrhœa, stool mixed with mucus and blood; want of animal heat; constipation; stool mixed with blood.
| | Sore, itching, smarting humid spot, between anus and coccyx.

[21] **Urinary Organs.** | Urination frequent; quantity diminished or increased; stream often stops during flow.
| | Enuresis.
| Burning in urethra after urinating; itching, redness, discharge of pus.

[22] **Male Sexual Organs.** | Inflammatory swelling of penis; urethra is almost closed.
| | Increased sexual desire; nocturnal emission bloody.

[23] **Female Sexual Organs.** | Fibrous tumors, or polypi, with menorrhagia; constant draining away of blood.
Displacement of uterus.
| Menstruation too early and too profuse; blood bright red; absence of vital heat.
| Profuse leucorrhœa; pale face; copious urination, even at night.

[24] **Pregnancy. Parturition. Lactation.** | Milk leg.
| During last months of pregnancy, indescribable pain, like gnawing stiffness, in sacrum and hip bone, down over whole thigh, < standing.

[25] **Voice and Larynx. Trachea and Bronchia.** | Tickling in larynx, with hæmoptysis.
| | Tingling in trachea. θBronchitis.
| Mouldy taste in mouth every time she coughs, causing great nausea, loss of appetite, and occasionally watery vomiting. θBronchitis.

Google

[26] **Respiration.** ▮Spasmodic, double inspiration, with sobbing, as after hard crying.
▮▮Oppressed, rapid and painful breathing.
▮▮Suffocative arrest of breathing and opisthotonos previous to coughing.
▮▮Oppressive constriction of chest, < from motion and walking.

[27] **Cough.** ▮▮Hollow, racking, spasmodic cough, from tickling in larynx; loses breath before cough; after cough, dizziness, staggering.
▮▮Chronic cough characterized by cold and deficiency of animal heat.
▮Spasmodic cough, preceding for a few days eruption of eczema or an attack of gout.
▮Child gets stiff before paroxysm; bends himself backward, followed by expectoration of clear, frothy blood. θWhooping cough.
▮Before paroxysm, arrest of breathing; during it, epistaxis, shattered feeling in head and chest, rapid respiration; after it, staggering, spasmodic contraction of diaphragm, sobbing respiration. θPertussis.
▮Expectoration: after midnight and in morning; fetid, purulent; bright red, foaming blood.

[28] **Inner Chest and Lungs.** ▮▮Spasmodic constriction of chest when walking and ascending.
▮Burning soreness or stitches in chest; soreness under sternum.
▮Hæmoptysis: alternating with coxalgia or rheumatism; with congestion; with violent cough in paroxysms, caused by tickling in larynx and trachea; burning pain in some point of chest, from which blood seems to come; stagnation in liver and portal veins.
▮Bright red, profuse hæmoptysis, with severe cough and rattling and hissing in air passages; burning pain in fixed spot in chest.
▮Phthisical symptoms alternating with coxalgia or rheumatism.
▮Suppuration of lungs; purulent, greenish expectoration; after neglected pneumonia.

[29] **Heart, Pulse and Circulation.** ▮▮Pushing or pressure inward at l. edge of sternum; palpitation.
▮Pulse: full and rapid; strong and hard; can be felt on one arm only.

[30] **Outer Chest.** ▮▮Eruption, like varicella, on chest and upper arms, with desquamation.
▮▮Red spots and rash, with smarting itching on chest.
▮Pain and soreness on and in breast bone, or below it.
▮Chest hurts when touched.

Google

31 **Neck and Back.** ‖Painful stiffness of back and scapulæ.
‖Painful stiffness of loins when rising from a seat.
‖Sticking in shoulder when lifting arms.

32 **Upper Limbs.** ‖Severe stitch in shoulder when raising arm.
‖Painful throbbing in r. shoulder.
‖Painful pressure in l. or both shoulder joints, < from motion.
‖Rheumatic pain in joints of arms.
‖Tremor of hands when seizing anything and when moving hands, as from weakness of old age.
‖‖Itching rash on wrist joint; fine stinging in hands.
Hard tumor on dorsal side of wrist.
‖Gouty nodosities on hand and finger joints; drawing pain from hands upward.
‖Perspiration in palms of hands.
‖Boring pains in first joints of thumbs, with feeling of stiffness.
‖Periosteum of phalanges painful on pressure.
‖Consequences of injuries to nails, in first stages.
‖After tearing off hang nail, whitlow rapidly forming on palmar surface of r. index finger; intense throbbing, swelling, redness and acute darting pains.
‖‖Whitlows, the result of punctured wounds, needle pricks, splinters, etc.

33 **Lower Limbs.** ‖Pressure, laming, rheumatic pain in r. hip joint, < from motion.
‖Coxalgia or rheumatism alternating with hæmoptysis.
‖After being long on feet, sudden, violent pain in hip joint, with sensation as of boiling in joint; must sit down and rest before pains remit sufficiently to allow him to work on; no swelling, nor pain on pressure.
‖‖Pressure in l. thigh towards posterior portion; seems as though muscles were not in proper position, like pain from a strain; in every position, though especially when walking or touched.
‖Affected limb cooler than remainder of body. θSciatica.
‖Left side more affected with weakness and heaviness of parts; pains followed by swelling of feet and limbs. θSciatica.
‖‖Rheumatic pains going from below upward, joints pale, swollen, tense, hot; stinging, drawing pains; < from warmth of bed and bedcovering, motion, and in evening.
‖‖Rheumatism and rheumatic gout; begins in lower limbs and ascends; especially if brought to a low asthenic condition by abuse of Colchicum; joints become the seat of nodosities and "gout stones," which are painful.
‖Tremor of knees (and hands) when sitting or walking.
‖Great weakness in knee joints, obliging him to sit down.

Google

‖Tearing pressure in knee joints, and farther down, < on motion.
‖Cracking and creaking of knees.
‖Swelling and tensive and sticking pain in knee, when walking.
‖Stiffness of knees.
‖Itching rash on inside of knees.
‖Pain in knees, as if beaten or sore.
‖Tremor of limb when sitting or making an attempt to walk or stand; pains seem to extend from knee to hip joint; child wants knee rubbed upwards from knee, during which it lies quiet and satisfied; stiffness, swelling and flexion of joint. θStrumous synovitis.
‖Acute traumatic synovitis, with much effusion and feeling of coldness in part; swelling, with tension and stitches in knees, with rheumatic pains.
‖Pinching, grasping pain in l. hamstring, < at night, night sweat, frequent urination; drawing pain from upper part of calf to popliteal space, cannot lie on l. side.
‖Hot swelling of legs, with stinging, drawing pain.
‖Swelling of legs extending above calves, with tensive pain, especially in evening.
‖‖Swelling of feet and legs up to knees, purple and mottled, pitting on pressure, with rending pains in periosteum; comfortable only when holding feet in ice water.
‖Great swelling of knee with rheumatic pain; comfortable only when applying cold.
‖Pressure above l. internal malleolus, < from motion.
‖Pressure in bones of ankle and in lower portion of l. leg, in morning.
‖Great heaviness and weariness of feet.
‖Stiff and rigid in feet in morning.
‖‖Gout, < in feet; gouty nodosoties on joints; fine tearing in toes.
‖Swelling of feet: up to knees; about ankles, with intolerable pain in ankles on stepping.
‖‖Pain in ankles, as from a sprain or false step.
‖‖Intense itching on top of feet and ankles, < from scratching and warmth of bed.
‖Violent pain in joint of l. great toe, while walking in morning.
‖Boring in first joint of r. great toe.
‖‖Ball of great toe painful, swollen, painful on stepping, tendons stiff.
‖Pains of soles of feet and heels, as if bruised, when walking.
‖Pain running up to thigh since stepping on a nail, ten years ago.
‖Burning and smarting in lower extremities; bone pains.

Google

[34] **Limbs in General.** ▮▮Affects principally l. shoulder and r. hip joint.
▮▮Rheumatism begins in lower limbs and ascends.
▮Pressive pains in knees and wrists.
▮▮Limbs numb and fall asleep.
▮Drawing pains in various joints and parts of extremities, < after taking wine.
▮Paralytic pain in all joints, on moving body at night in bed.
▮Gouty, rheumatic pains in joints, < from motion, heat of bed and in evening.
▮Tense, hard swelling of affected joints; painful, hard nodes and calcareous concretions.
▮Stiffness of all the joints, could only move them after applying cold water.
▮Low, asthenic cases (maltreated by large doses of Colchicum); lancinating, tearing pains; < by motion and before midnight, when joints feel so hot he throws off all covering; œdematous swelling of joint which may feel cold to touch; affects chiefly l. shoulder and r. hip joint; habitual gout in articulations of hands and feet; ball of great toe sore and painful; soles very sensitive; tendons stiff; gouty nodosities in joints; fine tearing pains in toes. θArthritis.
▮Burning heat of hands and feet, evenings.
▮Long lasting warm sweat of hands and feet.
▮▮Eruption (eczema) in bends of extremities.

[35] **Rest. Position. Motion.** Head inclines to fall backward.
Cannot lie on l. side: pain in l. hamstring.
Lifting arms: sticking in shoulder.
Sitting: pains in loins; tremor of knees; tremor of limbs.
Standing: pain over whole thigh.
Bends himself backwards before paroxysm.
Must sit down and rest: on account of pains in hip joint; weakness of knee joints.
In every position: pain in thigh.
Motion: oppressive constriction of chest <; painful pressure in shoulders <; rheumatic pain in r. hip joint <; rheumatic pains <; tearing pressure in knee joints <; pressure above l. internal malleolus <; lancinating pains <; eruption on covered parts <.
From least exertion: sweat on forehead.
Moving body at night in bed: paralytic pain in all joints.
Moving hands: tremor.
When seizing anything: tremor of hands.
Raising arm: stitch in shoulder.
Rising from a seat: painful stiffness of back and loins.
Stepping: pain in ankles; ball of great toe painful.
Walking: vertigo; oppressive constriction of chest <;

Google

pain in thigh <; tremor of knees; swelling and tensive sticking pains in knee; pain in l. great toe; pain in heels and soles of feet.

When attempting to walk or stand: tremor of limb.

Ascending: spasmodic constriction of chest.

[36] **Nerves.** ‖Anxiousness and fainting spells.

‖Three months after wound on head by falling on scissors, gradual altering of health from day to day; sad, seeking solitude and eating little; gradual emaciation and weakness; towards evening restless and agitated; then epileptic attacks, lasting several minutes, repeated at intervals during night, which he passes absolutely without sleep; pale faced and thin, has an air of suffering terror; would not even answer a question addressed to him.

‖Tetanus; peripheral cases, traumatic, parts become cold as ice, and spasms begin in wound.

[37] **Sleep.** ‖Sleepiness, as from intoxication, during day.

‖Sleeplessness at night, with restlessness and fantastic illusions as soon as closing eyes; restless tossing about; talking in sleep; moaning and groaning.

‖Nightmare, throat feels swollen, sense of suffocation.

‖Uneasy dream; is now in one, now in another place, busy now with one, now with another subject.

[38] **Time.** Morning: dull; expectoration; pressure in bones of ankles and in lower portion of leg; stiff and rigid in feet; pain in l. great toe.

During day: sleepiness.

Evening: rheumatic pains <; swelling of legs <; gouty pains in joints <; burning heat of hands and feet; restless, agitated.

Night: eyes <; copious urination; pinching pain in l. hamstring <; paralytic pain in all joints; sleeplessness; eruption <.

Before midnight: lancinating pains <.

After midnight: expectoration.

[39] **Temperature and Weather.** Open air: vertigo; herpes on face burns; great heat in throat.

Heat: eruption on covered parts <.

Warmth of bed: rheumatic pains <; itching of feet and ankles <; gouty pains in joints <.

Cold applications of ice water: rheumatic swelling and pain in knee and legs <.

When covered: pressing in head with distress; rheumatic pains <.

Inclination to uncover: night sweats.

After getting wet: head affected.

[40] **Fever.** ‖Coldness, want of animal heat.

‖Chilliness, thirst, sensation as of cold water pouring over parts; chilliness morning and forenoon.

Google

Shivering over back, with heat of cheeks, without redness; no thirst; cold hands.
Chill with colic every evening.
Violent chills and horripilation, with cold limbs.
General coldness, with heat and redness of face.
Parts cold to touch, but not subjectively to patient.
Heat, no thirst; on awaking, sweat with general itching.
Heat in hands and feet in evening; veins of hands distended.
Warmth of bed intolerable, on account of heat and burning of limbs.
Heat and sweat in alternation.
Long continued warm sweat on hands and feet.
Night sweats putrid or sour, with inclination to uncover.
Sweat, mostly on forehead, from least exertion.
Intermittent fevers with rheumatism or gout.

41 **Attacks, Periodicity.** Every evening: colic; chill.
Every night: agglutination without pain.
During night at intervals lasting several minutes: epileptic attacks.

42 **Locality and Direction.** Right: complete ptosis; hardness of hearing; painful throbbing in shoulder; whitlow on index finger; pressive, laming, rheumatic pain in hip joint; boring in first joint of great toe.
Left: eye first affected; pressure inward at edge of sternum; painful pressure in shoulder; pressure in thigh; weakness and heaviness of parts <; pinching, grasping pain in hamstring; cannot lie on side; pressure above internal malleolus; pressure in bones of ankle and in lower portion of leg; violent pain in joint of great toe.
From below upwards: rheumatic pains.

43 **Sensations.** Limbs and whole body painful, as if bruised and beaten.
Pains sticking, tearing, throbbing.
Sensation of torpor of integuments, especially after suppressed discharge from ears, eyes and nose.
As if something was gnawing in her temples, occiput and ears; as if eyeball would be forced out; as if eye was pressed asunder, then out of orbit; as if sand was in eyes; noises in ear as from ringing of bell, or from a wind storm; as if ear was obstructed by cotton; itching as from lice on chest; as of a lump in throat; pain as if diarrhœa would set in; as of boiling in hip joint; as though muscles of thigh were not in right position; knees as if beaten or sore; pain in ankles as from a sprain; heels as if bruised; as of cold water pouring over parts; limbs as if beaten and bruised.
Pain: from umbilicus to anus; in loins; in knees; from

Google

knee to hip joints; in ankles; in ball of great toe; of soles of feet; of heels; running up to thigh; in bones; in abdomen.
Intolerable pain: in ankles.
Severe pain: when attempting to open eyelids.
Violent pain: in joint of l. great toe.
Sudden, violent pain: in hip joint.
Raging, pulsating pain: in head, causing dulness.
Tearing, drawing pains: in neck to insertion of deltoid muscle.
Acute darting pains: in r. index finger.
Lancinating, tearing pain: in joints.
Fine tearing: in toes.
Severe stitch: in shoulder.
Stitches: in chest; in knees.
Indescribable pain, like gnawing stiffness: in sacrum and hip bone.
Pinching, grasping pain: in l. hamstring.
Colic: in abdomen.
Boring pain: in first joints of thumbs; in first joint of r. great toe.
Drawing pain: from hands upwards; from upper part of calf to popliteal space; in legs; in various joints and parts of extremities.
Tensive pain: in legs above calves.
Rheumatic pain: in joints of arms; from below upwards; in knees.
Gouty, rheumatic pain: in joints.
Contracting pain: in breast bone.
Pressing pain: in head and eyes.
Pressive pain: in knees and wrists.
Sticking: in eyes; in shoulder; in knee.
Painful throbbing: in r. shoulder.
Intense throbbing: in r. index finger.
Dull pain: behind eyeball.
Pressure, laming rheumatic pain: in r. hip joint.
Paralytic pain: in all joints.
Painful pressure: in shoulder joints.
Pressing, with distress: in head.
Pressure: in stomach; in l. thigh; above l. internal malleolus; in bones of ankle; in lower portion of leg.
Pushing or pressing inward: at l. edge of sternum.
Painful stiffness: of back and scapulæ; of loins.
Violent burning: in nose.
Severe burning: on border of lids.
Burning pain: in fixed spot, chest.
Burning: on border of lids; in herpes on face; of eruption around nose and mouth; in urethra; in lower extremities; of limbs.

Google

Burning soreness: in chest.
Biting itching: on chest; of eruption around nose and mouth.
Sore, itching, smarting, humid spot: between anus and coccyx.
Stinging: on forepart of tongue; in throat; in hands; in legs.
Smarting: in lower extremities.
Soreness: under sternum.
Great heat: in throat.
Heat: of hands and feet; of face.
Prickling, dryness: of mouth.
Spasmodic constriction: of chest.
Oppressive constriction: of chest.
Fulness: in upper part of abdomen.
Clogging sensation: in mouth.
Stiffness: of thumbs; of knees; of feet; of tendons of great toe.
Sensation of torpor of integuments.
Sensation of concussion in brain, caused by a misstep.
Tickling: in larynx.
Tingling: in trachea.
Weakness and heaviness: of l. side; of knee joints; of feet.
Intense itching: on top of feet and ankles.
Itching: of urethra; of rash on wrist joints; of rash on inside of knees; of skin.
Coldness of knees.

" **Tissues.** ‖Emaciation of suffering parts.
Hot, tense, hard swellings.
Acts especially on parts of body where cellular tissue is wanting, hence affects small joints.
Subacute rheumatism.
Œdematous swelling of whole body.
Dropsy, with pain in limbs and dry skin; ascites.
‖Discoloration remaining in contused parts after pain and inflammation subside.

" **Touch. Passive Motion. Injuries.** ‖Splinters, external injuries cause panaritium.
‖A misstep causes sensation of concussion of brain.
‖‖Sprains of ankles and feet.
‖‖Punctured wounds, produced by sharp pointed instruments, as awls, ratbites, nails, etc.; particularly if wounded parts feel cold to touch and to patient.
Touch: painful on chest; pain in thigh <.
Least covering of head intolerable.
Wants knee rubbed upward.
Pressure: periosteum of phalanges painful; legs pit.
Rubbed: urticaria reddens.

Google

Scratching: itching <.
From injury: complete ptosis of r. eye.
Injury to nails: whitlow.
A misstep causes sensation of concussion in brain.
After sting of yellow jacket: urticaria.
Stepping on a nail, ten years ago: pains run up r. thigh.
Wounds, pricks, splinters: cause whitlows.
Three months after wound on head: gradual altering of health from day to day.

[46] **Skin.** ▮Itching of skin.
▮Dry skin, want of perspiration, itching after perspiration.
▮Purple spots over body, like petechiæ.
▮▮For several weeks gradual emaciation, pains in abdomen, diarrhœa, discharges of tough, black blood; bluish red spots on face and body; mouth and tongue covered with blisters as large as peas, discharging dark fluid blood; spots on body greatly varied in size, smooth, generally round and dark red; great lassitude, must stay in bed; pulse 66; no thirst; anorexia; chilliness; vertigo. θPurpura.
▮▮Erythema nodosum.
▮Scurfs on dry, small nodules, often renewed.
Small, round, red, insensible spots on inner side of arms, and on abdomen and feet.
▮Dry, violently itching herpes, burning in open air.
▮Bloodboils.
▮Urticaria white, but reddening when rubbed; intense itching, stinging, burning. θAfter sting of yellow jacket.
▮Prickly heat of newcomers in tropics; awakes with prickling, dryness of mouth, clogging sensation in throat, heavy breathing.
Eruption: only on covered parts; like rot in sheep, on chest and arms, with desquamation; after a debauch, sensation as if lice were crawling over surface; < from heat, motion and at night.
▮Eczema of drunkards.
▮▮Varicella on chest and upper arms.
▮▮Punctured wounds; stings of insects, especially of mosquitoes.

[47] **Stages of Life, Constitution.** Pale, delicate persons.
Complaints of persons who always feel cold and chilly.
▮▮Rheumatic, gouty diathesis; constitutions abused by alcohol.
Child, æt. 3, pale, waxen, strumous diathesis; synovitis.
Boy, æt. 8, after injury to head by falling on scissors; epilepsy.
Young man; hæmoptysis alternating with rheumatism.
Needlewoman, æt. 24, two years married, healthy and robust; rheumatism.

Google

Man, æt. 28, tall, lax fibred; purpura.
Man, æt. 49; rheumatic ophthalmia.
Farmer, æt. 50; rheumatism in hip.
Man, æt. 50, after contusion of leg; suggillations.
Woman, æt. 50, subject to bronchial attacks; bronchitis.
Woman, æt. 74, after injury to nose; discoloration of both cheeks from extravasated blood.

[48] **Relations.** Antidoted by: *Camphor.*
It antidotes: effects of alcohol; *Apis., Cinchon.*
Compatible: *Acon., Bellad., Bryon., Nux vom., Pulsat., Rhus tox., Sulphur.*
Compare: *Arnica, Crot. tig., Hamam.* (traumatic ecchymosis), *Ruta.*

LEPTANDRA.

Culver's Root. *Scrophulariaceæ.*

Introduced by Hale. Provings by Burt and a student in Hahnemann Med. College. See Hale's New Remedies. Both provers made use of Leptandrin.

CLINICAL AUTHORITIES.—*Sick headache*, Barlow, Times Retros., vol. 2, p. 14; *Bilious headache*, Hale's Therap., p. 387; *Hepatic disease*, Neidhard, Warren, Hale's Therap., p. 375; *Griping pain in intestines*, Williamson, Trans. Hom. Med. Soc. Pa., 1873, p. 97; *Diarrhœa*, Barnes, Hale's Therap., p. 386; *Chronic diarrhœa and dysentery*, Coe, Burt's Mat. Med., p. 568; *Dysentery*, Hughes, Pharmacody., p. 501; Fry, Hale's Therap., p. 385.

[1] **Mind.** ❙Gloomy; desponding; drowsy. θHepatic derangement.
[3] **Inner Head.** ❙Constant dull frontal headache; < in temples, with aching in umbilicus.
❙Sick headache with furred tongue, hepatic derangement.
❙Bilious headache; constipation, bitter taste, indigestion.
[5] **Sight and Eyes.** ❙Smarting and aching in eyes.
[11] **Taste and Tongue.** ❙Tongue yellow or black down centre.
[14] **Appetite, Thirst. Desires, Aversions.** ❙❙Canine hunger.
[16] **Hiccough, Belching, Nausea and Vomiting.** ❙Nausea, with deathly faintness on rising.
❙❙Vomiting of bile, yellow tongue; shooting pains about liver, black stools.
[17] **Scrobiculum and Stomach.** ❙Weak, sinking sensation at pit of stomach.

Digitized by Google

Great distress in stomach and small intestines, with immediate desire for stool.

Burning, aching in stomach and liver, < drinking water.

Dyspepsia from disordered liver and stomach.

" **Hypochondria.** Dull aching in liver, < near gall bladder.

Burning distress in back part of liver and in spine.

Periodical liver derangement, occurring every two or three months; yellow coated tongue; constant nausea, vomiting of bile; shooting or aching pains in region of liver; loss of appetite; urine brownish or very dark; pain in transverse colon; giddiness in head.

Deliriousness; complete prostration; heat and dryness of skin; coldness of extremities; fetid and tarry stools; tongue thickly coated, with a black streak down centre. θHepatic disease.

Jaundice, with clay colored stools.

[19] **Abdomen.** Constant dull aching distress in umbilical region.

Sharp, distressing pains between navel and epigastrium.

Rumbling and distress in whole bowels, especially in hypogastrium, with black stools.

Bilious colic, or a tendency to it.

Rumbling and distress in hypogastric region, profuse, black, fetid stools, pains in bowels.

[20] **Stool and Rectum.** Stools: black, tarry, bilious, undigested, followed by great distress in liver; mushy, with weak feeling in bowels; greenish, muddy, spouting out like water; profuse, black, fetid, running a stream; profuse, black, consistence of cream; black, papescent, tarlike, fetid, in afternoon and evening; first hard, black, lumpy, afterwards soft and mushy; watery, with large quantities of mucus; yellowish green; clay colored; < morning, as soon as he moves; from meat or vegetables.

Profuse, watery stools, followed by severe cutting pains in small intestines; after exposure to wet, damp weather.

Before stool: rumbling.

After stool: sharp, cutting pains and distress in umbilical region; faint, weak, hungry; griping, but no straining.

Profuse dark brown, almost black, mushy and highly offensive stools; difficulty in retaining stool, must go immediately; sharp pain preceding stool, > afterwards, but increasing weakness; usually went to sleep soon after stool; three to four stools daily. θDuring progress of post-scarlatinal follicular enterocolitis with dropsy.

For nearly three months, camp diarrhœa; hardly able to stand; emaciated; features haggard and jaundiced; stools, previously mixed with undigested food, now muco-purulent and bloody, quite frequent, with tenes-

Google

mus and cutting pains low down in bowels; sense of weight at stomach after cold water, cutting in bowels and disposition to stool.

‖The mucus discharged resembles false membrane.

‖Diarrhœa: dependent on hepatic derangement, or inflammation of mucous membrane; debility.

‖Chronic ulceration of intestines, with hepatic disorder.

‖Dysentery or typhoid with black, tarlike passages.

‖Dysentery of nearly a month's standing, brought on by sudden changes of climate; dizziness and headache; chills, followed by fever; pain and uneasiness in bowels; nausea and constant profuse flow of saliva during chill; thirst; unable to keep food or any drink on stomach; desire to urinate during chill; urine high colored and passed in small quantities; soreness of rectum; hemorrhoids; painful dragging and stinging pains in rectum; bowels bound and alternated every three or four days by diarrhœa, passages consisting of fecal matter resembling raw or boiled beef after having been pounded fine, with an admixture of mucus and an intolerable fetid smell; the desire to stool was in morning and continued about an hour, during which time there were four or five passages, followed by tenesmus of rectum and a feeling as if something was passing out.

‖Constipation; piles, depending upon hepatic derangement.

‖Frequently bleeding piles; constipation and distressing pain beneath sacrum.

[31] **Urinary Organs.** ‖Red or orange colored urine, with dull aching in lumbar region.

[33] **Female Sexual Organs.** ‖Menses suppressed or retarded; liver affected; prickly heat.

‖Leucorrhœa, with ulceration of os uteri; sometimes fetid, with shreds of mucous lining it; irritation of bladder and rectum; frequent pain at bottom of bowels; general languor and prostration; heat and dryness of skin.

[29] **Heart, Pulse and Circulation.** ‖Soreness in cardiac region.

‖Pulse slow and full.

[51] **Neck and Back.** Chilly sensation on shoulders and down back.

‖Sore, lame feeling in small of back.

[52] **Upper Limbs.** ‖Pain in r. shoulder and arm. θHepatic affections.

[35] **Rest. Position. Motion.** Rising: causes nausea, faintness. Hardly able to stand: from weakness.

[38] **Time.** Morning: clay colored stools; desire to stool.
Afternoon and evening: black fetid stools.

[39] **Temperature and Weather.** Exposure to wet, damp weather; profuse, watery stools, with cutting pains in small intestines.

Google

After cold water: sense of weight in stomach.
Sudden changes of climate: dysentery.

[40] **Fever.** ‖Chilly along spine and down r. arm.
‖Shivering, or dry, hot skin; stupor; limbs cold and numb; tongue black down centre. θBilious fever.
‖Bilious typhoid fevers.

[41] **Attacks, Periodicity.** In one hour: four or five stools.
Daily: three or four stools.
Every three or four days: bowels bound, or diarrhœa.
For nearly a month: dysentery.
Every two or three months: liver derangement.
For nearly three months: camp diarrhœa.

[42] **Locality and Direction.** Right: pain in shoulder and arm; chilly down arm.

[43] **Sensations.** Feeling as if something was passing out of rectum.
Pain: in transverse colon; in bowels; at bottom of bowels; in r. shoulder and arm.
Great distress: in stomach and small intestines; in hypogastric region; in liver.
Sharp distressing pains: between navel and epigastrium.
Distressing pain: beneath sacrum.
Sharp pain: in abdomen.
Shooting pains: about liver.
Cutting pains: in small intestines; in umbilical region; low down in bowels.
Painful dragging and stinging: in rectum.
Dull pain: in forehead; in temples.
Aching: in umbilicus; in eyes; in stomach; in liver; in lumbar region.
Dull aching distress: in umbilical region.
Griping: after stool; bilious colic.
Burning distress: in back part of liver and spine.
Burning: in stomach; in liver.
Soreness: of rectum; in cardiac region.
Smarting: in eyes.
Heat: of skin.
Sore lame feeling: in small of back.
Uneasiness: in bowels.
Weak sinking sensation: at pit of stomach.
Weight: at stomach.
Dryness: of skin.
Chilly sensation: on shoulders and down back.

[44] **Tissues.** ‖Chronic abdominal complaints caused by derangement of portal system.
‖Chronic congestion and other chronic disorders of liver.
‖Chronic dysentery and diarrhœa, and other diseases of bowels; when false membranous formations have

Google

occurred in small intestines, produced by gradual exudation of plastic lymph.

Ascites and anasarca from obstructed circulation in portal system.

[46] **Skin.** ‖Jaundice.

‖Hot and dry skin. θBilious attacks.

[47] **Stages of Life, Constitution.** Boy, æt. 6, during progress of post-scarlatinal follicular enterocolitis, associated with general anasarca; diarrhœa.

Woman, æt. 75; hepatic disease.

[48] **Relations.** Compare: *Bryon., Cinchon., Iris vers., Mercur., Podoph.*

LILIUM TIGRINUM.

Tiger Lily. *Liliaceæ.*

A native of China and Japan cultivated in our gardens; flowers in July and August.

Introduced and carefully proved by W. E. Payne, assisted by Dunham, Lilienthal, Gallupe and Savage.

Original day book of provings is published in Trans. Am. Inst. of Hom., 1871.

CLINICAL AUTHORITIES.—*Dementia*, Herbert, A. H. O., vol. 8, p. 397; *Uterine dementia*, Knerr, MSS.; *Headache*, Hawkes, Org., vol. 2, p. 114; *Eye affection*, Woodyatt, Org., vol. 3, p. 99; *Asthenopic symptoms* (2 cases), Woodyatt, Norton's Ophth. Therap., p. 110; *Kopyopia hysterica*, Buffum, Norton's Ophth. Therap., p. 111; *Diarrhœa*, N. E. M. G., 1873, p. 221; Raue's Rec., 1874, p. 179; *Dysentery*, Pease, Hom. Med., vol. 5, p. 147.

[1] **Mind.** Obtuseness of intellect with inability to find right words in expressing thoughts; forgets what he is about to say.

Ideas not clear, they become more so if he exerts his will; makes mistakes in writing and speaking; cannot apply mind steadily.

Google

Depression, dulness of intellect and thirst precede severe symptoms.

‖Believes her disease to be incurable; that she has some organic disease that nobody understands.

‖‖Tormented about her salvation. θUterine complaints.

‖Crazy feeling on top of head; wild feeling in head, with confusion of ideas.

‖Dementia produced by business discouragements and sexual excesses.

‖Disposition to weep, with pain in back; has to keep very busy to repress sexual desire.

‖Disposed to curse, to strike, to think of obscene things; as these mental states came, uterine irritation abated.

‖‖Aversion to being alone, and yet no dread felt.

‖Loss of appetite, headache, with distress of head and indisposition to labor; dread of business; indisposition to any exertion of mind or body.

‖Listless, inert, yet does not want to sit still; restless, yet does not want to walk; hurried manner, desire to do something, yet feels no ambition; feeling as of imperative duties and utter inability to perform them; sexual excitement.

‖‖Depression of spirits: profound; can hardly keep from crying; disposition to weep, with nausea and pain in back; aversion to food; weeps much and is very timid; indifferent about anything being done for her.

‖Anxiety; fearful that the symptoms indicate an internal organic disease; very marked in both male and female.

‖Apprehensive, as from impending disease or calamity; fears insanity; fears heart disease; fears she is incurable; often with moderate or subacute uterine or ovarian inflammation.

‖Doubts her salvation; thinks she is doomed to expiate her sins and those of her family; tears her hair; walks floor night and day; seeks to escape; consolation aggravates. θUterine dementia.

[2] **Sensorium.** Vertigo, especially when walking; feeling as if intoxicated; staggering forward; forgetful; head confused and heavy.

Faint feeling; fear of falling, < in close warm room, > in fresh air, though he is then chilly.

‖Faint in a warm room and when standing, with cold sweat on hands and feet. θProlapsus uteri.

[3] **Inner Head.** ‖Dull frontal headache; < over l. eye, or alternating from side to side.

‖Pain in forehead. θPhotophobia. θBlepharitis. θAstigmatism.

Blinding pain in forehead, < in evening; extending into

back of head and down neck, with strange muddled feeling in head, general weakness and desire to lie down; stinging burning pain in forehead, with sensation as of rubber band stretched over it, with confusion of mind; > by effort of will; pains in forehead and temples, with vertigo, depression of spirits, bearing down pain in region of womb and anus, strangury and ineffectual urging to stool; shooting in r. temple passing to l., with a dull heavy sensation in whole front of head; dim sight; pains in eyes extending to head; dull pressive aching from l. temple to occiput; paroxysmal.

Drawing hot pain through head and eyes, > by frequent sneezing.

Fulness of head, with pressure outward as if contents would be forced through every aperture; feeling as if blood would issue through nose when blowing it; > by supporting head with hands, and at sunset; < when walking in open air.

Heavy feeling in head, with morning diarrhœa.

Peculiar pressive headache with tremulousness and increased micturition.

Heavy feeling in head, at times slightly confused, then almost crazed feeling in head, rushing, like some fluid, through head, generally from r. to left.

‖Wild feeling in head as though she would be crazy, with pain in r. iliac region.

‖Terrible tearing, crazing headache; feels as if she would lose her reason; crazy feeling seems to run up back of head and feels as if whole head would be torn to pieces, with great fulness pressing out, with confused feeling; pain utterly unbearable, makes her wish for death; pain about heart, running through to l. scapula; pains and weakness in limbs; feels she has heart disease and cannot recover, or that she will lose her soul. θHeadache.

5 **Sight and Eyes.** ‖Blurred vision; with heat in eyelids and eyes; after seminal emissions; with prolapsus uteri; muscæ volitantes.

‖Hypermetropia; presbyopia.

‖Turns head towards l. side when reading, trying thereby to look with l. eye out of r. glass of spectacles, in order to see whole of letters like b, p, d, of which he otherwise could see only the straight part, but not the curve.

‖So-called asthenopic symptoms probably dependent upon spasm of accommodation.

‖Kopyopia hysterica; burning and smarting of lids, except in bright light; insufficiency of each internal rectus 2°; eyes always > in open air; lachrymation on looking down; crawling in vertex; stabbing in occiput.

Google

‖Eyes full of water; face flushed and hot, pricking in skin of forehead.
‖Eyes painful, sensitive to light.
‖Intense pain in eyes, extending back into head; dim sight.
‖Sharp pains over eyes.
‖Burning feeling in eyes after reading or writing; eyes feel very weak.
‖Any attempt to work near causes redness of tarsal edges and hot sandy feeling in conjunctiva.

[6] **Hearing and Ears.** Rushing sound in both ears.

[7] **Smell and Nose.** Frequent sneezing, relieving a severe burning headache and pain in eyes.
Constant desire to pick nose.

[8] **Upper Face.** Pain in r. side of face, r. nostril stopped.
Heat and bloated feeling of face and head.
Chilly feeling in face in forenoon; afternoon fever, congestion to chest; face and forehead flushed and hot; pricking in forehead.

[11] **Taste and Tongue.** ‖Taste of blood. θCongestion to chest.

[13] **Throat.** ‖Hawking of mucus, with constant nausea.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Loss of appetite.
Aversion: to bread; to coffee.
Craving for meat; voracious hunger, seemingly along spine and up to occiput, not appeased by eating.
Thirst: drinks much and often; recurring before severe symptoms.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea: constant, with sensation of a lump in stomach, moving at every deglutition; when thinking of coffee; with morning diarrhœa; with pressure in vagina and pain at top of sacrum; from uterine irritation; retching, but no vomiting; feels like vomiting when she touches her epigastrium.
‖Vomiting from malposition of uterus; frequent hawking of mucus from throat.

[17] **Scrobiculum and Stomach.** Fulness, disturbed feeling, upward pressure, after eating.
Stomach distended, with frequent eructations and escape of flatus per anum.
Hollow, empty sensation in stomach and bowels.

[19] **Abdomen.** ‖‖Dragging down of whole abdominal contents, extending even to organs of chest; must support abdomen; as if whole contents were pushing down into a funnel; is compelled to cross her legs for fear everything would be pressed out.
‖‖Bearing down sensation in pelvis as though everything was coming into world through vagina.
‖Bloated abdomen after a meal, continuing after a diarrhœa.

Google

Abdomen distended, with moving of flatus, > passing wind up or down.
‖Unusual distension of abdomen.
Abdomen sensitive to pressure or jarring.
Abdominal walls sore, previous to stool.
Sensation as if diarrhœa would come on, passing off by urinating.
Bloated feeling in region of uterus, extending to hips.
Abdomen distended and sore after menses cease.
Empty feeling of abdomen and stomach.
Weak, tremulous feeling, extending to anus.
Skin of abdomen feels stretched and stiff.
Tenderness in hypogastric region.

[20] **Stool and Rectum.** ‖Morning diarrhœa, stools loose, bilious; dark, offensive, very urgent, cannot wait a moment; stool preceded by griping pains or great urging, with pressure on rectum; followed by smarting, burning of anus.
‖Diarrhœa, directly after dinner, sudden and peremptory; discharges copious and bilious, burning of rectum and anus, severe tenesmus, followed by extreme exhaustion.
‖Stools frequent, bloody, mucous; always constant urging and much backache; after stool a feeling as if more would pass; wakens about 3 A.M.; mouth dry; constant thirst for large quantities of water; longs to keep quiet, slightest motion makes <; stools becoming more bloody and occurring every half hour; restless, hurried feeling, as if she must attend to some important duties, but which she is unable to perform; tenderness over region of l. ovary, with downward pressure, as if everything would come out of vulva, and feeling as if she must hold herself up in that region when at stool; frequent desire to urinate; uterus prolapsed. θDysentery.
‖Stools: dark brown, semi-liquid, fecal; copious bilious; very offensive.
‖Bowels constipated.
‖With every effort to evacuate bowels, urine only is discharged; sensation as if hard body was pressing backwards, downwards and against rectum and anus; < standing, increased desire to go to stool.
Before stool: peremptory urging; constant bearing down with pressing in rectum.
During stool: tenesmus of bladder and rectum.
After stool: acrid smarting and burning in rectum and anus; severe tenesmus; exhaustion.
‖‖Pressure in rectum, with almost constant desire to go to stool.
‖Escape of flatus, with great distension of stomach and frequent eructations.

Google

‖Hemorrhoids after delivery, sore to touch, itching; bearing down at stool as if all would protrude through vagina.

[21] **Urinary Organs.** ‖‖Continuous pressure in region of bladder, constant desire to urinate, with scanty discharge; smarting in urethra and tenesmus.

‖Frequent urging, with acrid smarting after every discharge; urging < toward morning.

‖‖Frequent urination through day; with dull headache moving from sinciput to occiput, finally settling in l. temple.

‖‖If desire is not attended to, feeling of congestion of chest.

‖Urine: milky, scanty; increased and dark; hot like boiling oil; high colored and scanty.

[22] **Male Sexual Organs.** Sexual desire increased.

‖Lascivious dreams and emissions, followed by irritability, difficulty in fixing one's mind, selecting wrong words.

[23] **Female Sexual Organs.** ‖Sexual desire increased; obscene.

‖‖Sharp pain in ovarian region; burning, stinging, cutting, grasping pain extends across hypogastrium to groin, down leg; bearing down when standing; sensitive to pressure; ovary swollen to nearly size of child's head.

‖Dull pain in r. and sometimes in l. ovary, with offensive leucorrhœa, and great weakness during menstruation.

‖Pains in l. ovary with anteversion; leucorrhœa like white of egg; drawing down sensation in l. side.

‖Swelling and pain, with sensation of heaviness, in l. ovary.

‖Bearing down in uterine region, < walking, > holding up abdomen with hands; tenderness of swollen l. ovary; stinging, burning pains from ovary up into abdomen and down thigh; shooting pains from l. ovary across pubes; urine causes smarting; prolapsed and sensitive uterus. θOvarian dropsy.

‖Bearing down in uterus, with pains in l. ovary and l. mamma.

‖‖Great distension of abdomen; looks as if about to be confined (since confinement); very distressing dull pains in l. ovary; constant aching in sacral region, extending into thighs; yellow, mouldy, blotchy look of skin, especially of face and upper chest; prolapsus and partial procidentia.

‖Pains in small of back, r. and l ovarian region, down outside of thighs; very severe when menstruation is at its height, obliging patient to keep her bed; flow bright and clotted, intermitting; between periods a sense of weakness and dragging, occasioning a movement as if uterus fell from r. to l.; mouth of uterus to l. and high up. θChronic metritis.

‖Unable to move, fearing her womb would drop from her;

Google

great pelvic distress on sitting up; uterus prolapsed, with swelling and tumefaction, os much indurated, hot, tender to touch; thinks her husband causes prolapsus by rough coition. θProlapsus.

▮Funnel shaped pressure, beginning in throat, and converging upon uterus; sick headache every few days, much < at menses; prolapsus uteri of second degree, with general laxity of ligaments.

▮Os wedged against sacrum, fundus tilted toward pubis; agonizing distress and pressure in rectum; constant desire to defecate and to urinate; urine at times scanty; feels afraid to move for fear everything will drop through; headache over eyes and vertex; menses irregular, scanty, exceedingly painful; thinks no one understands her complaint, that it is incurable. θProlapsus.

▮Fundus inclined to l. side of pelvis; hernial sac in l. inguinal region of size of walnut; great tenderness of os; uterus swollen and tumefied; difficult, painful urination and stools; aching, burning, pressing pains; bowels torpid; menses irregular, scanty, painful; constant leucorrhœa, mild, profuse, staining linen, greenish yellow; very stooping posture; had used supporters, etc. θAnteversion.

▮▮Severe neuralgic pains in uterus, could not bear touch, not even weight of bedclothes or slightest jar; anteversion.

▮Great bearing down and distress in pelvic region; pressure upon both rectum and bladder; wears a T bandage "to hold herself together;" "felt as though she would drop asunder;" pale, wretched looking countenance; menses almost wanting, except a mere show every two or three months; very painful; leucorrhœa, acrid, dirty yellowish brown color; headache; appetite poor; os pushed down on pubis; fundus against sacrum. θRetroversion.

▮▮Anteversion and retroversion of uterus; patients nearly all have constipation.

▮Bearing down pains: particularly in walking; as though menstruation would come on; as if to have passage from bowels; low spirited, weeping, apprehensive; irritable; opposite and contradictory mental states; anorexia; faint in close room and when standing; frequent, scanty, burning urine; pain in sacrum; bloated feeling in abdomen; limbs cold and clammy.

▮Sensation as if a hard body was pressing backwards and downwards upon rectum and ovaries; > walking in open air; heart symptoms.

▮Bloated feeling in region of uterus; pelvic organs feel swollen; aching apparently around, not in, uterus.

Google

Intermittent sharp pain across lower bowels.
Burning from groin to groin, with morning stool.
Aching over pubes, with pain in knees.
Intermittent, laborlike pains in lower part of back, with a thin, acrid excoriating leucorrhœa, leaving a brown stain; < afternoon until 12 P.M.
Menses: scanty, flow only when moving about; dark, thick, smelling like lochia; on second day after time to menstruate, cutting in bowels, limbs clammy, followed by profuse, bright yellow leucorrhœa, excoriating perineum; accelerated, sometimes recurring in two weeks, though flow is scanty; ceased to flow when she ceased to walk.
Dysmenorrhœa: from dislocations; sensation of constriction from back around hips, ending in pubes.
Amenorrhœa: with cardiac distress or burning stinging ovarian pains; complicated with prolapsus or anteversion.
Voluptuous itching in vagina, with feeling of fulness of parts; stinging in l. ovarian region.
Leucorrhœa: thin, acrid; leaving brown stain on linen; abundant, excoriating; < afternoon and evening.
Dry, mealy spots, about size of lentils, on mucous surface between labia majora and minora, causing intolerable itching; awakes at night to find herself scratching these spots, feels like tearing away flesh, itching seems to be so deep in, generally < before menses; at times watery discharge from l. nostril, coming away drop at a time and looking like clear water; spot on septum of l. nostril similar to eruption on vulva; partial prolapsus of uterus; seems as if everything would come out, great desire to place hand on vulva to keep parts up; > from pressure of hand. θPruritus vulvæ.
Rashlike eruption on genitals; swelling of parts.
Cutting in l. mamma through to scapula; sighing; short breath.
Cramplike pain in l. mamma, shoulder and fingers.

Pregnancy. Parturition. Lactation. Morning sickness, frequent copious urination; palpitation.
Slow recovery after confinement; lochia too long; must support vulva to prevent everything from escaping; < from motion; subinvolution; lochia profuse, excoriating; dragging pains; smarting in urethra after urination; fears an internal incurable disease.
Confined four weeks ago; has been always troubled with severe constipation; hemorrhoids first week after labor, painful, sore to touch and itching; profuse, irritating leucorrhœa or continued lochia, with pain in back and

Google

hips; pain and smarting in urethra after passing urine; bearing down when at stool, as if internal organs would pass out through vagina and had to be kept back by supporting vulva with hands; dreads insanity; fears incurable disease.

Respiration. Breathing oppressed, with oppression in lower part of chest, < 4 A.M.; sighing; frequent desire to take a long breath; feeling of compression and weight.

Chest feels as if too full of blood; slight relief from sighing; oppressive heat, must go into open air; < in close room; with taste of blood, faint feeling; weak heart-beat, blurred sight, fear of falling.

Inner Chest and Lungs. Constant feeling of load or weight in l. chest; smothering sensation.

Dragging, as if all internal organs hung suspended from chest.

Full feeling in chest, with distended abdomen.

Constricted sensation in l. side of chest, extending to r., with sharp pains running up to throat, clavicle, l. axilla and scapula; > from changing position.

Sharp and quick pain in l. side of chest, with fluttering of heart.

Heart, Pulse and Circulation. Sensation as if heart was grasped or squeezed in a vice; as if blood had all gone to heart, producing a feeling as if he must bend double; inability to walk straight.

Heart as if violently grasped, then suddenly released, alternately.

Constrictive pain about heart, through to scapula.

Sensation as if heart was overloaded with blood and it would afford relief to bring up some.

Frequent sensation as if heart stopped, followed by rush of blood to heart and palpitation.

Pain, dull pressure and fulness, with feeling of coldness about heart, no organic lesion.

Dull, pressing pain in region of heart, nearly constant, but < by eating, no matter how little; frequent palpitation; apprehension.

Heaviness in region of heart.

Cardiac irritability, nervous palpitation.

Palpitation, < from lying on either side.

Fluttering: general faint feeling, hurried and forced feeling about apex, > sitting still; awakens her at night; cold hands and feet, covered with cold sweat; sharp, quick pain in l. chest; with irregular pulse.

During attacks, which are brought on by excitement, heart feels as if squeezed, with dyspnœa, groaning from pain, cannot lie down; after attacks, weakness, numb-

Google

ness of r. leg from toes to above knee, cold shivering, with chattering of teeth, dryness of mouth and throat, and back feels drawn backwards; also trembling feeling about heart on talking; coldness from occiput down spine; feeling as if heart stopped, followed by rush of blood and violent palpitation; can lie best on l. side; lying on r. side brings on palpitation and weight in l.; fingers numb at times, especially r.; excitement brings on palpitation. †Functional disturbance of heart.

Conscious pulsations over whole body, and out pressing in hands and arms as if blood would burst through vessels.

31 **Neck and Back.** Dull pain in nape of neck, with feeling of constriction; glands on l. side of neck swollen and painful; pain in neck and l. scapula, seemingly from l. mamma.

‖Pain in dorsal vertebræ, as if back would break.

‖Dull, heavy pain and great weakness in small of back. †Uterine displacement.

Pain in back and hips; dreads insanity.

‖Dull pain across loins and sacrum; cold feeling and chills.

Sensation of pulling upward from tip of coccyx.

32 **Upper Limbs.** Dull pain in l. shoulder.

Drawing pain in l. shoulder and neck; stitching in l. mamma.

Right hand and arm stiff and painful during night, > after 8 A.M.

Arms and hands stiff and hot, as if parched.

Cold hands, cold perspiration on back of hands.

Stiffness of fingers almost like paralysis; difficult to guide pencil; pricking in fingers and hands; sensation of electric current, first in fingers of l. hand then of r. hand.

33 **Lower Limbs.** Stitching pains from ilium to ilium, or from pubes to sacrum.

Pain in r. hip extending down thigh.

Boring, soreness, stitching, or drawing pain in r. hip joint.

‖Sensation as though cool wind was blowing on lower extremities, with smarting of r. leg more particularly; loss of appetite, headache, dulness of head, indisposition to labor; grasping pain or heavy aching in knees.

Trembling of knees, abdomen, back and hands.

Dull, heavy pain, from knees to toes, moving suddenly from place to place.

Legs ache; cannot keep them still; < when giving up control of herself, as when trying to go to sleep.

Burning, beginning in soles and palms, thence over body; < in bed, constant desire to find a cool place.

Google

Pains severe, fleeting, quick, sharp, or circumscribed; coldness or cold perspiration; l. leg affected most.

[34] **Limbs in General.** Burning in palms and soles..
Limbs cold, clammy, more when excited or nervous.
Whole body feels bruised and sore, even pressure of clothing is painful; hands and feet as if pounded; soles sore, < when stooping.

[35] **Rest. Position. Motion.** Desire to lie down.
Can lie best on l. side.
Lying on either side: palpitation <.
Cannot lie down: pain at heart.
Sitting still: faint feeling about apex.
On sitting up: great pelvic distress.
Is compelled to cross her legs: for fear everything would be pressed out.
Standing: faint; as if hard body was pressing backwards and downwards; bearing down in ovaries; must support abdomen.
Supporting head with hands: pain >.
Supporting abdomen with hands: pain >.
Unable to move: fearing her womb would drop from her.
Morning: menses only flow; < feeling as if everything would escape through vulva.
Changing position: pains in shoulder >.
Inability: to walk straight from pain at heart.
Walking: vertigo; bearing down in uterine region <; flow ceased when she ceased walking.
When stepping: soles sore <.

[36] **Nerves.** Nervous system irritable; weak, trembling, nervous.
Aimless hurry and motion; walks to and fro; cannot be amused by thinking or reading.
Convulsive contractions of almost all muscles of body, and a feeling as if she would be crazy if she did not hold tightly upon herself.

[37] **Sleep.** Sleepy before bedtime.
Inability to sleep, < before midnight.
Restless sleep: wild feeling in head; frightful, laborious dreams; everything seems too hot; seminal emissions, dull headache, palpitation; mammary pain.

[38] **Time.** Morning: diarrhœa; heavy feeling in head; urging to urinate.
3 A.M.: awakes.
4 A.M.: breathing oppressed.
After 8 A.M.: r. hand and arm >.
Forenoon: chilly feeling in face.
Through day: frequent urination.
Afternoon: fever, congestion to chest, till 12 P.M.; labor-like pains in back <; leucorrhœa <; great heat and lassitude.

Google

At sunset: headache >.
Evening: blinding pain in forehead; leucorrhœa <.
Night: awakes, scratching spots on labia; arm and hand painful.
Before midnight: inability to sleep.

[39] **Temperature and Weather.** Open air: eyes always >; oppressed breathing >.
In fresh air: chilly, but vertigo >; when walking headache >.
In cool, open air: chilly, but >.
Constant desire to find a cool place.
In close room: vertigo <; oppressed breathing <.
In warm room: faint.

[40] **Fever.** Chills run downwards; violent beating of heart; congestion to chest and burning heat all over; constriction about heart.
Chills from face downwards; chilly when in cool, open air, yet otherwise >.
Great heat and lassitude in afternoon, throbbing all over.

[41] **Attacks, Periodicity.** Every half hour: stools.
On second day after time to menstruate, cutting in bowels.
Every few days: sick headache.
In two weeks: flow recurring.
Every two or three months: mere show of menstrual flow.

[42] **Locality and Direction.** Right: shooting in temple passing to l.; pain in iliac region; pain in side of face; nostril stopped up; dull pain in ovary; numbness of r. leg; fingers numb.
Left: frontal headache < over eye; shooting in temple; dull pain from temple to occiput; pain from heart to scapula; turns head to side when reading; tenderness over region of ovary; pain in temple; dull pain in ovary; drawing down sensation in side; sensation of heaviness in ovary; shooting pain from ovary across pubes; pain in mamma; mouth of uterus; fundus inclined to side of pelvis; hernial sac in inguinal region, size of walnut; stinging in ovarian region; watery discharge from nostril; spot on septum of nostril; cramp-like pain in mamma; feeling of load and weight in chest; constricted feeling in side of chest; pain in axilla; sharp quick pain in side of chest; glands of neck swollen and painful; dull pain in shoulder; stitching in mamma; leg cold.
From r. to l.: crazy feeling in head; as if uterus fell; hand and arm stiff and painful; pain in hip; soreness and drawing pain in hip joint; smarting of leg.
From l. to r. side of chest: like electric current in fingers.

[43] **Sensations.** As if intoxicated; as of rubber band stretched

Google

over forehead; as if contents of head would be forced through every aperture; as if blood would issue through nose when blowing it; as though she would be crazy with pain in head; as if whole head would be torn to pieces; as of hunger along spine and in occiput; as of a lump in stomach; as if contents of abdomen were pushing down into a funnel; as if everything was coming into world through vagina; as if diarrhœa would come on; after stool, feeling as if more would pass; as if everything would come out at vulva; as if she must hold herself up in region of vulva when at stool; as if hard body was pressing backwards and downwards against rectum and anus; as if all would protrude through vagina; as if uterus fell from r. to l.; felt as though she would drop asunder; as though menstruation would come on; as if to have a passage from bowels; as if internal organs would pass out through vagina; chest as if too full of blood; as if all internal organs hung suspended from chest; as if heart was grasped or squeezed in a vice; as if blood had all gone to heart; as if he must bend double; heart as if violently grasped and then suddenly released; as if heart was overloaded with blood; as if heart stopped; back as if drawn backwards; as if blood would burst through vessels of hands and arms; as if back would break; as of pulling upward from tip of coccyx; arms and hands as if parched; as of electric current in fingers and hand; as though cool wind was blowing on lower extremities; hands and feet as if pounded; as if she would be crazy if she did not hold tightly upon herself.

Pain: in back; in forehead; over eyes and vertex; in neck; in temples; in eyes; about heart; running through scapula; in limbs; in r. side of face; at top of sacrum; in l. ovary; in l. mamma; in small of back, r. and l. ovarian region, down outside of thighs; in sacrum; in knees; in urethra; about heart; in l. scapula; in dorsal vertebræ; in hip.

Unbearable pain: in head.

Intense pain: in eyes, extending back into head.

Terrible, tearing, crazy pain: in head.

Crazy feeling: on top of head; runs up back of head.

Wild feeling: in head.

Agonizing distress and pressure: in rectum.

Distress: in pelvic region.

Blinding pain: in forehead.

Sharp pain: over eyes; in ovarian region; running from chest to throat; in l. side of chest.

Stabbing: in occiput.

Google

Cutting: in bowels; in l. mamma, shoulder and fingers.
Stitching: in l. mamma; from ilium to ilium, or from pubes to sacrum.
Boring soreness, stitching, drawing pain: in r. hip joint.
Grasping pain: in knees.
Griping pain: in abdomen.
Shooting: in r. temple passing to l.; from l. ovary across pubes.
Severe neuralgic pains: in uterus.
Dragging pains: in female sexual organs.
Intermittent sharp pain: across lower bowels.
Intermittent laborlike pains: in lower part of back.
Drawing pain: in l. shoulder and neck.
Drawing, hot pain: through head and eyes.
Very distressing dull pains: in l. ovary.
Dull, pressing aching: from l. temple to occiput; in region of heart.
Constant aching: in sacral region into thighs.
Aching: apparently around uterus; over pubes.
Dull pain: in forehead; over l. eye; moving from sinciput to occiput; settling in l. temple; about heart; in nape of neck; across sacrum and loins; in l. shoulder.
Bearing down pains: in region of womb and anus; in pelvis; in uterine region; in uterus; in pelvic region.
Severe burning pain: in head.
Burning stinging, cutting, grasping pain: across hypogastrium, to groin, down leg.
Stinging, burning pain: in forehead; from ovary up into abdomen and down thigh.
Stinging: in l. ovarian region.
Burning, smarting: of lids; of anus.
Smarting: in urethra; of r. leg.
Burning: in eyes; of rectum; from groin to groin; beginning in soles and palms, thence over body.
Hot, sandy feeling: in conjunctiva.
Hot pricking: in skin of forehead.
Heat: in eyelids and eyes.
Dull, heavy sensation in whole front of head; in small of back; pain from knees to toes, moving suddenly from place to place.
Funnel shaped pressure: beginning at throat and converging upon uterus.
Drawing down: of whole abdominal contents; in l. side.
Pressure: in vagina; in rectum; in region of bladder.
Heavy feeling: in head; in l. ovary.
Heaviness: in region of heart.
Fulness: of head, with pressure outward of stomach; about heart.

Google

Bloated feeling: of face and head; in region of uterus to hips; in abdomen.
Stretched, stiff feeling: in skin of abdomen.
Tenesmus: in bladder and rectum.
Tenderness: in hypogastric region; over region of l. ovary.
Sensitiveness: of uterus.
Strange, muddled feeling: in head.
Smothered sensation: in chest.
Constrictive pain: about heart.
Constriction: from back around hips; in l. chest.
Full feeling: in chest; in heart.
Numbness: of r. leg.
Compression and weight: in chest.
Trembling: about heart; of knees, abdomen, back and hands.
Conscious pulsations: over whole body and out pressing in hands and arms.
Weak, tremulous feeling: extending to anus.
Fluttering: of heart.
Great weakness: in small of back.
Hollow, empty sensation: in bowels and stomach; of abdomen.
Stiffness: of r. hand and arm.
Crawling: in vertex.
Intolerable itching: on mucous surface between labia majora and minora; of hemorrhoids.
Chilly feeling: in face.
Coldness: from occiput down spine, across sacrum; cool wind blowing on legs.

[44] **Tissues.** Headaches depending on uterine troubles, menstrual irregularities and irritable condition of heart.
Subacute and chronic ovaritis and neuralgia of ovaries.
Prolapsus uteri, bearing down sensation, accompanied by palpitation of heart and ovaralgia, uterine inflammation, subacute endo-cervicitis.
Heart feels full to bursting, from congestion; much fluttering; reflex heart symptoms.

[45] **Touch. Passive Motion. Injuries.** Touch: on epigastrium, makes her feel like vomiting; hemorrhoids sore; uterus tender.
Weight of bedclothes: unbearable on sensitive uterus.
Pressure: abdomen sensitive; ovaries sensitive; > bearing down in uterus.
Jarring: abdomen sensitive.

[47] **Stages of Life, Constitution.** Girl, æt. 17; asthenopic symptoms.
Woman, æt. 30, single; chronic metritis.
Woman, æt. 30, has one child, has been much doctored; prolapsus uteri.

Google

Woman, æt. 31, one child by former husband, six years married, no children; anteversion of uterus.

Woman, æt. 31, married, light complexion, nervous, easily affected by potentized drugs, suffering twelve years; pruritus vulvæ.

Woman, æt. 35, ill for ten years; headache.

Woman, æt. 38, four children, suffering six years; retroversion.

Man, dentist, æt. 38, temperament nervous, sensation of cold wind blowing upon extremities.

Woman, æt. 40, light hair and eyes, restless, nervous temperament, doubts her salvation; uterine dementia.

Woman, æt. 45, married; kopyopia hysterica.

Man, æt. 45, asthenopic symptoms.

Woman, æt. 48; teacher, mother of three children, stout, nervous bilious temperament, suffering many years; palpitation of heart.

Woman, subject to attacks, first coming on after confinement thirteen years ago; functional disturbance of heart.

Woman, dysentery.

[48] **Relations.** Antidoted by: *Helon.* (anteversion); *Nux vom.* (colic); *Pulsat.*

Compare: *Act. rac., Agar., Bellad., Cactus, Canthar., Helon., Murex, Natr. phos., Nux vom., Platina, Podoph., Pulsat., Sepia, Spigel., Sulphur, Tarent.*

LITHIUM CARBONICUM.

Lithia. $Li_2\ CO_3$.

Introduced and proved by Hering, assisted by Neidhard and Geist. See Am. Hom. Rev., 1863, vol. 3, p. 485, 1863.

A proving of Gettysburg water, containing lithia, was made by Swan. See H. Mo., 1871, p. 389.

CLINICAL AUTHORITIES.— *Weakness of eyes*, A. R., Raue's Rec., 1870, p. 110; *Hemiopia*, Dunham, Norton's Ophth. Therap., p. 111; Hom. Clin., vol. 1, p. 25; *Ophthalmia*, Kenyon, Hale's Therap., p. 413; *Disease of r. kidney and bladder*, Fanning, Am. Hom. Rev., Jan., 1865; *Disease of heart*, Neidhard, Hale's Therap., p. 414; *Gout with puffing and swelling of body and limbs*, Org., vol. 2, p. 450; *Arthritis*, Falk, Raue's Rec., 1871, p. 174.

[1] **Mind.** Difficulty in remembering names.
Disposed to weep about his lonesome condition.
Anxiety, hopeless all night.

[3] **Inner Head.** Heaviness in sinciput, especially in frontal eminence.
Pain and heaviness over brows, < towards evening.
Headache like a stitch, superiorly on vertex.
Early on awaking, headache in vertex and temples, with nausea after sudden cessation of menses.
Pains in a small spot in r. temple; pain in l. temple.
Heavy weight upon vertex, with pressure upon l. temple.
Pressure in temples from without inward, with a pressing pain in middle of chest.
Tension as if bound in temples, with half vision.
Tearing, sticking headache on r. side, < on assuming erect position and on motion, > during repose.
Headache ceases while eating, but returns and remains until food is again taken.
Throbbing headache.
Pressure in r. side of forehead.
Headache: < when lying down; it pains everywhere; > when sitting; > by going out.
Looking at anything makes headache <; can hardly keep eyes open: pain as if sore from morning till noon.
Trembling and throbbing in head, pains in heart extend to head.
Head seems too large.
Confusion of head.

Google

[4] **Outer Head.** Head externally sensitive.
‖Milk crust.

[5] **Sight and Eyes.** ▮Asthenopia, with black motes before eyes and sensitiveness of eyes after using them by candlelight.
▮▮Entire vanishing of r. half of whatever she looked at; or if two short words occurred in succession, that on r. hand was invisible; second day of menses; pain over eyes.
▮After excessive use of eyes, with insufficient light, loss of use of l. eye; vision with r. eye incomplete; could only see l. half of an object until he looked a second time and more intently; a similar perversion had preceded loss of vision in l. eye.
▮Sunlight blinds him.
‖Eyes pain: during and after reading; as if dry; as if little grains were in them; as if sore.
‖Throbbing and drawing deep in r. eye and around it.
‖Stitches in r. eye.
▮Scrofulous inflammation of eyes with hardening of Meibomean glands.
▮Ophthalmia, with redness of sclerotica, muco-purulent discharge, sticking pains in eyes, photophobia and sensation as of a veil before them.

[6] **Hearing and Ears.** ‖Earache l. side, from throat, with prosopalgia.
‖Pain behind l. ear, in bone, extending toward neck.

[7] **Smell and Nose.** ▮Nose, especially on r. side, somewhat swollen, red, sore, internally, shining crusts form in it; dry as if inflamed; frequent urinating at night.
‖Nose obstructed above, < in morning and forenoon.
‖Blows nose very much in evening, much mucus remains behind in choanæ.
‖Dropping from nose, in open air.
▮Soreness of end of nose.

[8] **Upper Face.** ‖Pain r. side from root of tooth that has been sawn off, extending to temple; next day same on l. side from throat to ear. θProsopalgia.

[9] **Lower Face.** ▮Glandular swellings on l. side of face, throat and neck, nearly all size of a hen's egg, some hard, some suppurating.

[10] **Teeth and Gums.** ‖Teeth feel numb, dull and loose, cannot bite on them.

[13] **Throat.** ‖Sore throat in evening, r. side.
▮Sore throat, extending into ear.
‖Solid lumps from choanæ and fauces, < morning and forenoon.

[15] **Eating and Drinking.** After fruit: diarrhœa.

Digitized by Google

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Acidity of stomach.
‖Nausea, with gnawing in stomach, fulness in temples, headache.

[17] **Scrobiculum and Stomach.** ‖Gnawing in stomach, < before a meal, > while eating.

[18] **Hypochondria.** ‖Pressure in hepatic region.
‖Violent pain in hepatic region, between ilium and ribs. θGall stones.
‖Sticking pain in l. hypochondrium; pain in region of spleen.

[19] **Abdomen.** ‖Feels swollen, as if distended with wind.
‖Violent pain across upper part of abdomen.
‖Pain in l. abdominal ring, like a pressing from within outward.
‖Indurated inguinal glands.
‖Syphilitic bubo in l. groin, a longish swelling, as hard as a stone, uneven, rugged, like a scirrhus, at night violent lancinations, as if with red hot needles.
‖Buboes with decided fluctuation.

[20] **Stool and Rectum.** ‖Emission of much offensive flatus on awaking from sleep.
‖Stools: soft, light, yellow in morning; offensive at night; stinking flatus in evening; < after fruit or chocolate.
Violent, painful, dull stitch in perineum near anus, from above downward, from within outward.

[21] **Urinary Organs.** ‖Soreness of bladder, and sharp sticking pains in neck of bladder, on r. side, with soreness; frequent urination; pains in r. kidney.
‖Flashes of pain in region of bladder, more toward r., before passing water; pain extends into spermatic cord after urinating.
‖Tenesmus vesicæ with micturition; evening while walking.
‖On rising to urinate, pressing in cardiac region, not ceasing until after urinating; morning.
‖Urine: scanty, dark acrid; pain when passed, emission difficult; with dark, reddish brown deposit; turbid with mucous deposit; profuse, with uric acid deposit.
‖Burning in urethra.
‖Frequent copious urination; disturbing sleep.

[22] **Male Sexual Organs.** Erection after urination at night.
Greenish yellowish discharge from urethra, thick and profuse, alternating with hæmaturia.
‖Burning in urethra.
‖Pain in r. side, in urethra and spermatic cord, into testicle.
‖Pain in testes, and when sitting, stitches in penis.

[23] **Female Sexual Organs.** Menses: late, scanty; cease suddenly and headache comes on.

Digitized by Google

[25] **Respiration.** ‖On inspiring air feels cold, even into lungs. θHeart disease.

Constriction of chest when walking in open air after breakfast, hawking of much mucus, seemingly from middle of sternum.

[27] **Cough.** Violent cough, in quick shocks, evening while lying; must rise; no sputa; irritation to cough, starts at a small spot posteriorly and inferiorly in throat.

[28] **Inner Chest and Lungs.** ‖Pressure in middle of chest from within outward toward sides.

[29] **Heart, Pulse and Circulation.** ‖Pressing in region of heart, on rising to urinate, > after urinating.

‖Throbbing; dull stitch in cardiac region; sudden shocks.

‖‖Rheumatic soreness in cardiac region.

‖Violent pain in region of heart, as she bent over bed; morning after rising.

‖Pains in heart before and at time of urinating; also before and at time of menses.

‖Soreness about heart, < on stooping; pains in limbs; finger joints tender and painful; sleeplessness.

‖After mental agitation of a vexatious character, to which she is very subject, a trembling and fluttering of heart, distressingly painful in heart and as far as between shoulders; extends upwards into head where it is felt as painful throbbing; the air on inspiration seems so cold, that it is felt unpleasantly even in lungs. θValvular insufficiency.

‖Heart disease, with induration of aortic valves; "bruit de scie," followed by a bellows sound within a small space in region of aortic valves; sharp pains shooting through back, shoulder and arm; arm as if paralyzed.

[31] **Neck and Back.** Sore feeling r. side near spine, on a small spot; < from pressure; morning on rising.

‖Feeling of prostration in sacrum at night.

‖Stitch in sacrum; pain when standing, with confusion of head.

[32] **Upper Limbs.** Pain near point of r. pectoralis major on margin of r. shoulder.

Burning stitch in ball of l. thumb.

Itching, throbbing, sensitive pains in all fingers, < second and third of l. hand, as if in bones; extends from hands to finger ends, only during repose; > on pressure when grasping and during motion.

Left middle finger painful through and through.

Soreness at margin of nail, with redness and pain.

[33] **Lower Limbs.** Pain in r. hip, later in left.

Itching, burning pain in a small spot on r. hip, then on thigh, then on little toe; all on external aspect of limb; also internally on l. thigh and knee.

Google

‖Rheumatic pains in lower extremities.
Pains in and above knees, especially when going up stairs; knees weak.
‖Syphilitic, bluish, deep old ulcer on calf of leg.
‖Painfulness of feet, ankles, metatarsus and toes, especially at border of foot and soles as if gouty.
‖Ankle joints pain when walking, first r. more, then l; frequent urgent pains of moderate severity, of a striking character, from within outward, ending in a burning itching in a small spot.
Rheumatic pains in r. foot on awaking at night, pass off on rising.
Burning in great toe, especially around corns; soreness of corns; itching of sole of l. foot on inner margin.
Pain in little toes.

[34] **Limbs in General.** ‖Swelling, tenderness, sometimes redness, of last joint of fingers, with general puffiness of body and limbs; increase of bulk and weight; clumsiness in walking at night, and weariness in standing; sometimes intense itching of sides, feet and hands, at night, from no apparent cause, > by very hot water.
‖Arthritis.

[35] **Rest. Position. Motion.** Repose: headache >; itching, sensitive pain in all fingers.
Lying down: headache <; violent cough, must rise.
Sitting: headache >; stitching in penis.
Stooping: soreness about heart <.
Standing: pain in sacrum; weariness.
On assuming an erect position: headache <.
Motion: headache <; itching, sensitive pains in hands and fingers >.
On rising: pressing in region of heart; rheumatic pains in r. foot pass off.
After rising in morning: as she bent over bed violent pain in region of heart.
Going up stairs: pains in and above knees.
Walking: tenesmus vesicæ with micturition; in open air constriction of chest; ankle joints pain; clumsiness at night.

[36] **Nerves.** Prostration of whole body, especially knee joints and sacrum.
Paralytic stiffness in all limbs and in whole body.

[37] **Sleep.** ‖Whole night anxiety and feeling of helplessness; restless.
Sleep disturbed by: pains in sacrum and feet; urination; offensive diarrhœa; tenesmus vesicæ; erections, which subside on urinating; voluptuous dreams.

[38] **Time.** Morning: soft, light, yellow stools; on rising to

Google

urinate, pressing in cardiac region; violent pain in region of heart; on rising, sore feeling near spine, r. side.
From morning till noon: eyes pain; obstructed nose <; solid lumps from choanæ and fauces <.
Evening: pain and heaviness over brows <; blows nose very much; sore throat; flatus; tenesmus vesicæ; violent cough.
Night: anxiety, hopelessness; urinating; violent lancinations in bubo; offensive stools; erection after urinating; feeling of prostration in sacrum; rheumatic pain in r. foot; clumsiness in walking; itching of side of feet and hands.

[39] **Temperature and Weather.** Very hot water: itching of feet and hands >.
Going out: headache >.
Open air: dropping from nose; constriction of chest.
On inspiring air feels cold even into lungs.

[40] **Fever.** Shudder starting from thorax.
Cold feet, soles <; then sudden heat beginning in soles and extending over whole body.
General feeling of heat in body; sweat on back of hands.
Copious sweat.

[41] **Attacks, Periodicity.** Before and at time of menses: pain in heart.

[42] **Locality and Direction.** Right: pain in a small spot in temple; headache; pressure in side of forehead; entire vanishing of half of whatever she looked at; vision incomplete; throbbing and drawing deep in eye; stitches in eye; nose swollen, red, sore; pain from tooth to temple; sore throat; sharp sticking pains in neck of bladder; pains in kidney; pains in side of urethra; sore feeling on side near spine; pain near point of pectoralis major near margin of shoulder; pain in hip; itching, burning in a small spot on hip, then on thigh, then on little toe; rheumatic pain in foot.
Left: pain in temple; pressure upon temple; loss of use of eye; earache; pain behind ear; pain from throat to ear; glandular swelling on side of face, throat and neck; sticking pain in hypochondrium; pain in abdominal ring; syphilitic bubo in groin; burning stitch in ball of thumb; itching, sensitive pains < in second and third finger of hand; middle finger painful; pain in hip; pain internally on thigh and knee; itching of sole of foot.
From within outward: pressing in abdominal ring; stitch in perineum near anus; pressing in middle of chest; urgent pains in ankle joints.
From without inward: pressure in temples.
From above downward: stitch in perineum near anus.

Digitized by Google

43 **Sensations.** As if temples were bound; eyes as if sore; head as if too large; eyes as if dry; as if little grains were in them; as of a veil before eyes; nose as if inflamed; teeth as if numb, dull and loose; abdomen as if distended with wind; lancinations as if with red hot needles in bubo; arm as if paralyzed; pain as if in bones of hand; border of foot and soles as if gouty; whole body sore as if beaten.

Pain: over brows; in vertex and temples; in a small spot in r. temple; in l. temple; in heart to head; over eyes; in bones; behind l. ear; from tooth to temple, r. side; from throat to ear, l. side; in region of spleen; in hepatic region; in l. abdominal ring; in r. kidney; on r. side in urethra and spermatic cord into testicle; in testes; in heart; in limbs; in finger joints; in sacrum; near point of r. pectoralis major on margin of r. shoulder; through l. middle finger; at margin of finger nail; in hips; in and above knees; in feet, ankles, metatarsus and toes; in ankle joints; in little toes.

Violent pain: in hepatic region across upper part of abdomen; in region of heart.

Violent lancinations: in bubo.

Violent, painful, dull stitch: in perineum.

Distressingly painful trembling, fluttering: at heart as far as shoulders and head where it is painful throbbing.

Sharp shooting pains: through back, shoulder and arm.

Tearing sticking headache: on r. side.

Throbbing, dull stitch: in cardiac region.

Throbbing pain: in head; in r. eye.

Stitches: in r. eye; in penis; in sacrum.

Burning stitch: in ball of l. thumb.

Stitchlike pain: in vertex.

Sticking pains: in eyes; in l. hypochondrium; in neck of bladder.

Frequent urgent pains of moderate severity, of a striking character: in a small spot in ankle.

Gnawing: in stomach.

Drawing pain: deep in r. eye and around it.

Rheumatic pains: in lower extremities; in r. foot.

Pressing pain: in middle of chest.

Itching, burning pain: in a small spot in r. hip, then on thigh, then on little toe; internally on l. thigh and knee.

Burning: in urethra; in great toe; around corns.

Aching: in ear from throat.

Flashes of pain: in region of bladder, extending into spermatic cord.

Rheumatic soreness: in cardiac region.

Soreness: of end of nose; of throat; of bladder; about heart; at margin of finger nail; of corns.

Google

Sore feeling: r. side near spine.
Tenderness: of last joint of fingers.
Anxiety: all night.
Itching, throbbing, sensitive pain: in all fingers.
Heat: in body.
Pressing: as if with a dull point, here and there, internally, as if it were near bone, most in l. side.
Burning stitch: from within outward, ends in itching.
Pressure: upon l. temple; in temples; in r. side of forehead; in hepatic region; in middle of chest; in region of heart.
Heaviness: in sinciput; over brows.
Heavy weight: upon vertex.
Fulness: in temples.
Constriction: of chest.
Weariness: in standing.
Feeling of prostration: in sacrum at night; of whole body, especially knee joints.
Paralytic stiffness: in all limbs and in whole body.
Trembling: in head.
Confusion: of head.
Itching: of sole of foot; intense on sides of feet and hands.

[44] **Tissues.** ‖Scrofulous diseases, particularly swollen glands.
‖Bruised spots from falls or from being beaten.
‖Bones, joints, muscles, whole body sore as if beaten.
‖‖Heart affections; ossification.
‖‖Arthritis; gouty diathesis.
‖Obesity with gout; dyspnœa.

[45] **Touch. Passive Motion. Injuries.** Pressure: sore feeling near spine <; itching sensitive pains in hands and fingers >.
From falls or from being beaten: bruised spots.

[46] **Skin.** Itching and burning.
‖Skin rough as a grater, harsh, dry.
‖Barber's itch, ringworm, circular furfuraceous patches on skin.
‖Rough rash over body. θSecondary syphilis.
‖Skin of whole body rough and dry; both cheeks covered with a thick crust like milk crust.

[47] **Stages of Life, Constitution.** Man, æt. 20; from early youth glandular swellings of neck.
Girl, æt. 26, brown hair, excitable, thin; affection of r. kidney and bladder.
Man, æt. 35, sight failing for more than a year; hemiopia.
Bookkeeper, æt. 44; hemiopia.
Professional man; weakness of eyes.
Woman, æt. 52; gouty diathesis, puffing, swelling and itching of body and limbs.

Google

[48] **Relations.** Compare: *Amm. phos., Benz. ac., Berber., Calc. ostr.* and *Lycop.* in rheumatism or gout; *Alumina* in conjunctivitis; *Gettysburg Springs* in scrofulous joints; *Coral rub.* and *Kali bich.* in catarrh when inspired air feels cold; *Sepia* and *Teucrium* in post-nasal catarrh with chunky discharges; *Aurum, Conium, Kalmia, Ledum* and *Zincum* in heart disease.

LOBELIA CŒRULEA (Syphilitica).

Great Blue Lobelia. *Lobeliaceæ.*

The tincture is prepared from the fresh plant which grows in low grounds in the United States.

Introduced and proved by Jeanes, assisted by Neidhard and Williamson. See H. Mo., vol. 6, p. 520.

CLINICAL AUTHORITIES.—*Melancholia*, Jeanes, Hom. Clin., vol. 3, p. 356; *Cough*, Neidhard.

[1] **Mind.** Much depressed, tearful, unhappy.

Bad effects from grief.

Constant disposition to cry, with sadness and dejection; such weakness of brain that all excitement is forbidden; he could neither sit alone, nor could he talk when he had to exert his mind; seemed as if he would go wild.

Great depression of spirits; unhappy state of mind, always associated with pain about and under (not below) short ribs, in back, on l. side, extending outward nearly to l. side; posterior aspect of region of spleen.

[13] **Throat.** Catarrhal inflammation of posterior nares and fauces.

[16] **Hiccough, Belching, Nausea and Vomiting.** Acid eructations from 5 to 6 P.M.

[27] **Cough.** Dry, hacking cough of four weeks' duration, extremely troublesome day and night, and pain in r. side about junction of sixth rib with its cartilage, of a year's duration; dryness of back part of throat.

[28] **Inner Chest and Lungs.** Oppression in lower part of chest, as if breath did not reach there; distress in region of heart, and audible "knocking" respiration (like sound of axe, chopping wood); pain under short ribs, and dry cough.

Google

[31] **Neck and Back.** ‖Pain and aching in posterior aspect of region of spleen.
‖A pain commencing at r. side of small of back, then going down to os ischium, very sore to touch.
‖Great rigidity of spine; least motion exceedingly painful; pain goes from r. to l. side of back, and shoots down legs.
‖Pain in eighth dorsal vertebra and in back under short ribs; < by movement and deep inspiration.

[35] **Rest. Position. Motion.** Motions: painful in spine; pain in back and under short ribs.

[38] **Time.** From 5 to 6 P.M.: sour eructations.
Four weeks' duration: dry, hacking cough, day and night.
For a year: pain in r. side.

[42] **Locality and Direction.** Right: pain in side; commencing at side of small of back, going down to ischium.
Left: pain on side of back.
From r. to l.: pain in back.

[43] **Sensations.** As if he would go wild; as if breath did not reach lower part of chest.
Pain: about and under (not below) short ribs, in back, on l. side; in r. side, about junction of sixth rib with its cartilage; in posterior aspect of region of spleen; commencing at r. side of small of back, going down to os ischium; in eighth dorsal vertebra.
Shooting pain: down legs.
Distress: in region of heart.
Dryness: of back part of throat.
Oppression: in lower part of chest.
Rigidity: of spine.

[45] **Touch. Passive Motion. Injuries.** Touch: os ischium sore.

[47] **Stages of Life, Constitution.** An intelligent and educated man; melancholia.

[48] **Relations.** Compare: *Pulsat.* in mental depression and weeping; *Ranunc.* in l. scapular pains; *Ceanothus* in splenic pain.

Google

[1] **Mind.** Desponding; sobbing like a child.
‖Apprehension of death and difficulty of breathing.

[2] **Sensorium.** Vertigo: and deathly nausea; as if starting from l. eye, with pain in head and trembling agitation of body.

[3] **Inner Head.** ‖Headache with vertigo.
‖Dull, heavy pain passing around forehead, from temple to temple, just above eyebrows.
‖Pressing outward in both temples.
‖Pains through head in sudden shocks.
‖Dull, heavy pain in l. side of head.
‖Pressive headache at occiput, l. side; < at night and on motion.
‖Periodical headache in afternoon, increasing until midnight, every third attack alternately more or less violent.
‖Sick headache with vertigo; dull headache, violent nausea, vomiting and great prostration.
‖Pain over l. eye, extending over l. side of head and neck; coldness; > near fire: deathly sick feeling at stomach and all over; sudden pallor with profuse sweat; fainting when making an effort to move; cannot bear smell of tobacco; tobacco smoke brings on fainting; sour stomach; sleepiness; vomiting of bile (vomiting seldom). θGastric sick headaches; headaches following intoxication, with nervousness and trembling.

[5] **Sight and Eyes.** Hemiopia; pressure on upper half of eyeballs.

[6] **Hearing and Ears.** Sudden shutting up of r. ear, as if stopped by a plug, at 2 P.M., > boring with finger in ear.

[7] **Smell and Nose.** Nosebleed.

‖Tip of nose very cold.

[8] **Upper Face.** ‖Neuralgia of l. side of face and temples, with retarded menses.

Flushes of heat or heat of face.

‖Cold sweat on face with nausea.

Chilly feeling in l. cheek, near ear, extending to lower jaw.

‖Cyanosis. θEmphysema.

[10] **Teeth and Gums.** Dull, pressing pain in last l. molar and temples.

[11] **Taste and Tongue.** ‖Very sharp, disagreeable taste, especially at tip of tongue, and in back of throat.

[12] **Inner Mouth.** ‖Flow of profuse, clammy saliva, with nausea.

[13] **Throat.** Burning in throat, dryness of fauces, spitting at intervals.

Tough mucus in fauces, causing frequent hawking.

Dryness and pricking in throat, not > by drinking.

‖Sensation of a lump in pit of throat, impeding deglutition.

‖Sensation as if œsophagus contracted from below upward.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Loss of appetite, with acrid, burning taste in mouth.

‖Cannot bear smell of tobacco or tobacco smoke, although addicted to its use.

[15] **Eating and Drinking.** After breakfast: pressing outward, in both temples; itching in l. canthus.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough with profuse flow of saliva; in evening, followed by drowsiness.

‖Frequent empty eructations, flow of water into mouth.

‖Frequent gulping of a burning, sour fluid.

‖Acidity in stomach, with contractive feeling in pit of stomach; heartburn.

‖Incessant, violent nausea; profuse perspiration; copious vomiting.

‖Nausea: with vertigo; disappearing very suddenly; in last stages of phthisis; < at night and after sleep; > by a little food or drink.

‖Nausea with rather cold sweat on head, especially on face, with great but ineffectual efforts to vomit.

‖Vomiting, with cold perspiration of face.

‖Nausea and vomiting during pregnancy, profuse running of water from mouth; morning sickness.

‖‖Chronic vomiting in paroxysms, with nausea, profuse

Google

sweat, prostration of strength, good appetite; brickdust sediment in urine.

[17] **Scrobiculum and Stomach.** ‖Sensation in stomach: heat or burning; of weight; as of a lump; as from undigested food; of weakness, extending through whole chest and down to umbilicus.

‖‖Faintness or weakness at pit of stomach, from excessive use of green tea or tobacco.

‖‖Indescribable feeling about stomach, compounded of nausea, pain, heat, oppression and excessive uneasiness.

‖Deathly sick feeling all over, especially at stomach.

‖Bruised soreness from pit of stomach through to back, after cramp in stomach.

‖Sensation of oppression at epigastrium, as if stomach was too full; < on pressure.

‖Dyspepsia, heartburn and running of water from mouth.

‖Gastralgia biliosa; paroxysm of excruciating pain, and feeling as of a heavy load in stomach.

‖Weakness and oppression at epigastrium, extending into chest; burning in stomach, a burning lump in pit of throat impedes swallowing and respiration; in swallowing it seemed as if at this point something rose up to meet food and obstruct its descent; eructation of acid fluid with burning; vomiting of food after meals, especially after warm food; had heartburn continually; urine high colored, copious, red sediment; pain in l. lumbar region. θCardialgia.

‖Severe pressing feeling in epigastrium, excited by certain kinds of food, and mental emotion; < evening and night; after fright and vexation during menstrual period, suppression, alternating heat and cold, nausea, bitter taste, thirst, vomiting of bile, severe pressing in epigastrium after eating and whilst fasting, in evening; oppression and feeling of anxiety in breast, pain in sacral region; tongue yellow, pulse small, weak and slow. θCardialgia biliosa.

[18] **Hypochondria.** Fulness and pressure in hypochondria after eating.

Pinching in abdomen, near edge of liver.

[19] **Abdomen.** Pain in abdomen, < after eating.

Rumbling in bowels and passage of flatus downward.

Sudden, sharp pain in l. side of abdomen.

Abdomen distended, shortness of breath; tympanitis.

‖Intussusception of bowels; incarcerated hernia.

[20] **Stool and Rectum.** Stool: soft, but passed with great exertion; green, soft; frequent, loose during day, with great obtuseness of head.

‖‖Discharge of black blood after stool.

Google

‖Copious hemorrhoidal discharge, consequent debility, sensation of tightness in epigastrium; acidity of stomach; oppression of chest.

[21] **Urinary Organs.** Sticking pain in region of r. kidney.

Urine increased or diminished; brown sediment.

‖Urine of a deep red color, depositing copious red sediment.

[22] **Male Sexual Organs.** Smarting of prepuce; aching in urethra.

Sensation of weight in genitals.

[23] **Female Sexual Organs.** Menses too early, too profuse.

‖Suppressed menses: in consumptive persons; with pain in r. shoulder.

‖Violent pain in sacrum; sense of great weight in genitals.

[24] **Pregnancy. Parturition. Lactation.** ‖Morning sickness.

‖With every uterine contraction violent dyspnœa, which seems to neutralize labor pains; rigid os and perineum.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Oppression felt in throat pit; spasmodic asthma.

Sensation of fulness in trachea, as if from chest, causing a few short coughs, followed by warmth in forehead.

Peculiar sensation, between tickling and acrid feeling, in larynx; two short coughs; feeling of narrowness.

‖Feeling as of a lump or quantity of mucus, and pressure in larynx.

‖Spasmodic croup, with stridulous breathing, ringing cough, dyspnœa; constrictive sensation in larynx; constant cough and great anguish, with fear of suffocation.

‖Burning pricking in air passages.

‖Spasmodic contraction of diaphragm in emphysema, accompanied by pain in epigastrium, tympanitis, impossibility of deep inspiration, extreme dyspnœa and cyanosis. θBronchitis.

[26] **Respiration.** ‖Sensation of a foreign body in throat, impeding breathing and swallowing.

‖Dyspnœa and asthma, with sensation as of a lump in pit of throat, immediately above sternum.

‖Contraction of chest, with deep inhalations.

‖Want of breath, hysterical.

‖Impossibility of deep inspiration; extreme dyspnœa. θBronchitis.

Short inhalation and long, deep exhalation.

Inclination to sigh, or to get a very deep breath; deep inspiration, > pressive pain in epigastrium.

‖Extremely difficult breathing caused by a very strong constriction at middle of chest, which impedes respiratory movements.

‖Dyspnœa < by slightest exertion, or short exposure to cold, to an asthmatic paroxysm.

‖Deep inspiration relieves pressive pain in epigastrium.
‖Short and slow inspiration, with desire to cough.
‖Asthmatic constriction of air tubes.
‖Asthma: < from exertion, with a disordered stomach, especially a feeling of weakness in pit of stomach; often preceded by a prickling all over, even to fingers and toes; paroxysmal, with pain in chest; lump in throat pit; weakness and oppression at epigastrium; oppression at heart and chest.
‖Sudden and most urgent oppression, pants and endeavors to cough, but is unable to, and is threatened with suffocation every moment. θNervous asthma.
‖Every day at noon, for three months, asthmatic paroxysms of difficult breathing, terminating in cough without expectoration. θAsthma.
‖Spasmodic contraction of diaphragm in emphysema, accompanied by pain in epigastrium, tympanitis, impossibility of deep inspirations, extreme dyspnœa, and cyanosis.
‖Convulsive asthma from pulmonic irritation of effused serum.
‖Dyspnœa, < by exertion, going up or down stairs, exposure to cold, and eating very warm food; pain in l. lumbar region of abdomen; burning in stomach and throat, with dryness in latter; lump in pit of throat impeding respiration and deglutition; weakness and oppression in epigastrium; gastric derangement; urine of a deep red, depositing a copious red sediment.

[27] **Cough.** Cough: with vomituritio; with pain in stomach, short, dry; only a single one, from a feeling of narrowness in chest.
‖Whooping cough, violent racking; seemingly from deep in chest, in paroxysms of long continuance; followed by expectoration of ropy mucus, adhering to pharynx.
‖Spasmodic cough; dyspnœa so severe as to cause fear of death; sensation of fulness in chest, and burning, raw pain in epigastrium; < from motion; particularly useful in third stage, when expectoration ceases, or when relapses occur; also when an inflammatory condition of mucous membrane of larynx, trachea and bronchi accompany the disease. θWhooping cough.
‖Cough with sneezing, gaping and flatulent eructations. θBronchitis.

[28] **Inner Chest and Lungs.** Sensation of pressure on chest; l. chest above nipple.
‖Spasmodic contraction of diaphragm.
‖Pain in chest, with breathing, while sitting after dinner; > when moving about.

Google

‖Pain in lower chest, most l. side.
‖Burning feeling in chest, passing upward.
‖Pneumonia intermittens, particularly in individuals who live in malarial districts, accompanied by affections of bronchi or heart.
‖Emphysema with very dry tracheal and bronchial catarrh.
‖It palliated cough and brought back menses, which had ceased for six months. θConsumption, last stage.

[29] **Heart, Pulse and Circulation.** ‖Slight, deep seated pain in region of heart.
‖Sensation of weakness and pressure in epigastrium, rising to heart.
‖Sawing sound about heart, with violent pains, diarrhœa and vomiting.
‖‖Sensation as if heart would stand still, a pain deep in, above heart.
‖Sensation of excessive weakness at præcordium, extending upward into chest and downward as far as umbilicus.
‖Dyspnœa and suffocation from every rapid movement, attended with vertigo, threatened loss of consciousness and a peculiar confusion of head. θHeart disease.
‖Pulse: frequent, but small, weak in evening; slower than usual.

[30] **Outer Chest.** Repeated quivering in muscles of l. ribs towards spine.
Pressure on lower portion of sternum, l. side.
Tension in l. chest, from nipple to armpit.
‖Pain behind sternum.
‖Feeling as of a band about chest, with irresistible desire to cough.

[31] **Neck and Back.** Swelling and pain on l. side of neck.
Rheumatic pain between scapulæ.
Dull pressure between shoulder blades.
‖Violent pain in top of r. shoulder and shortly afterward in back, from about first to fourth dorsal vertebræ. θGastralgia biliosa.
Pain under r. shoulder blade, < when bending forward.
After noon a burning pain in back, as if in posterior wall of stomach.
‖Violent pain in sacrum, with fever. θSuppression of menses.
‖Extreme tenderness over sacrum; she cannot bear even pressure of a soft pillow; cries out if any attempt is made to touch part; sits up in bed, leaning forward to avoid contact with bedclothes; after each vomiting spell breaks out all over with sweat, followed by a sensation as if thousands of needles were piercing her skin from within outward.

Google

[32] **Upper Limbs.** Lame feeling in l. upper arm.
Rheumatic pain in r. shoulder joint, goes to l. upper arm and around elbow joint.
!Pain in shoulder of an elderly lady, who had not menstruated for two years; relieved pain and brought on menstruation.
Fine crawling stitches inside of r. deltoid.
Pain in r. deltoid, place size of palm of hand sore to touch.
A sharp shooting pain in an old scar of r. ring finger.
Sweat of palms of hands, back of hand dry and cool; tips of fingers cold.

[33] **Lower Limbs.** !Inflammatory rheumatism of r. knee, with tearing pains in fibula.
Painful stiffness in knees, as after a long march.

[34] **Limbs in General.** Shooting pain through whole body, into tips of fingers and toes.

[35] **Rest. Position. Motion.** Bending forward: pain under r. shoulder blade <.
Motion: headache <; pain in epigastrium <.
Slightest exertion: dyspnœa and asthma <.
Too weak to stretch out her hand to do anything.
Making an affort to move: causes fainting.
Going up or down stairs: dyspnœa <.
From every rapid movement: dyspnœa and suffocation.

[36] **Nerves.** Weakness; feels too weak to stretch out her hand to do anything; complete muscular relaxation.
!Faintness, with profuse sweat; fainting, great pallor.

[37] **Sleep.** Gaping, followed by crawling in nose and sneezing; then gaping and belching of wind.
Wakened early by very impressive dreams; arm amputated, wounded by a shot, etc.

[38] **Time.** Morning: sickness, of pregnancy.
Towards middle of day: shuddering chill followed by heat and sweat, lasting until next morning.
During day: looseness of bowels.
At 2 P.M.: sudden shutting up of ear.
Afternoon: a burning pain in back.
Evening: hiccough with profuse flow of saliva; severe pressing in epigastrium; pulse weak.
Night: pressive headache <; nausea <; pressing in epigastrium.

[39] **Temperature and Weather.** Near fire: coldness >.
After warm food: vomiting.
Exposure to cold: dyspnœa <.

[40] **Fever.** Shuddering towards middle of day.
!Coldness > near fire, or from heat.
!Chills down back, heat in stomach; general shivering.
Thirst before chill; shaking chill and coldness, < after drinking.

Digitized by Google

Heat with thirst and sweat, particularly in face.

Sweat: with heat, or after heat has lasted for some time; after heat with sleep; copious night sweat.

Intermittent fever (quotidian).

Fever and ague, with chill in middle of day, followed by heat and sweat, which lasts until next morning.

41 **Attacks, Periodicity.** Every day at noon, for three months: asthmatic paroxysms.

Periodical headache: in afternoon, increasing until midnight, every third attack alternating more or less violent.

Quotidian intermittent.

42 **Locality and Direction.** Right: sudden shutting up of ear; sticking pain in region of kidney; pain in shoulder; violent pain in top of shoulder; pain under shoulder blade; rheumatic pain in shoulder joint, goes to l. upper arm; fine crawling stitches inside of deltoid; pain in deltoid; sharp shooting pain in an old scar of ring finger; inflammatory rheumatism in knee.

Left: as if nausea started from eye; dull pain side of head; pressive pain side of occiput; pain over eye, over side of head and neck; neuralgia of side of face and temples; chilly feeling of cheek; dull, pressing pain in last molar; itching in canthus; pain in lumbar region; sudden sharp pain in side of abdomen; repeated quivering in muscles of ribs; pressure on side of lower portion of sternum; tension of chest; swelling and pain on side of neck; lame feeling in upper arm.

From within outward: as if needles were piercing her skin.

From below upward: œsophagus as if contracted.

43 **Sensations.** Vertigo, as if starting from l. eye; r. ear as if suddenly stopped by a plug; as of a lump in pit of throat; as if œsophagus contracted from below upward; as of a lump in stomach; as from undigested food in stomach; as if stomach was too full; as of a heavy load in stomach; as if lump rose up to meet food and obstruct its descent; fulness in trachea, as if from chest; as of a lump in larynx; as of a foreign body in throat; as if heart would stand still; as of a band about chest; as if thousands of needles were pricking her skin from within outward.

Pain: in head; through head in sudden shocks; over l. eye, extending over l. side of head and neck; in l. lumbar region; in sacral region; in abdomen; in r. shoulder; in epigastrium; in chest; in stomach; deep in above heart; behind sternum; on l. side of neck; under r. shoulder blade; in r. deltoid.

Excruciating pain: in stomach.

Violent pain: in sacrum; about heart; in top of r. shoulder; in back.

Google

Indescribable feeling: compounded of nausea, heat, pain, oppression and excessive uneasiness about stomach.
Sudden sharp pain: in l. side of abdomen.
Sharp shooting pain: in an old scar of r. ring finger.
Shooting pain: through whole body into tips of fingers and toes.
Tearing pains: in fibula.
Neuralgia: of l. side of face and temples.
Burning, raw pain: in epigastrium.
Pinching: in abdomen.
Inflammatory rheumatism: of r. knee.
Rheumatic pains: between scapulæ; in r. shoulder joint, to upper arm and around elbow joint.
Cramp: in stomach.
Sticking pain: in region of r. kidney.
Burning pain: in back.
Fine, crawling stitches: inside of r. deltoid.
Aching: in urethra.
Slight, deep seated pain: in region of heart.
Dull, heavy pain: passing around forehead, from temple to temple, just above eyebrows; on l. side of head.
Pressive pain: at occiput, l. side; in epigastrium.
Dull pressing pain: in last l. molar and temples.
Burning: in throat; in stomach.
Burning, pricking: in air passages.
A burning lump: in pit of throat.
Smarting: of prepuce.
Bruised soreness: from pit of stomach through to back.
Extreme tenderness: over sacrum.
Prickling: in throat; all over.
Prickling itching: of skin all over body.
Peculiar sensation between tickling and acrid feeling: in larynx.
Crawling: in nose.
Flushes of heat: in face.
Warmth: in forehead.
Severe pressing feeling: in epigastrium.
Dull pressure: between shoulder blades.
Pressure: on upper half of eyeballs; in hypochondria; in larynx; in epigastrium; on lower portion of sternum.
Painful stiffness: in knees.
Weight: in stomach; in genitals.
Oppression: at epigastrium; of chest; in throatpit; at heart.
Pressing outward: in both temples.
Tightness: in epigastrium.
Contractive feeling: in pit of stomach.
Tension: in chest from nipple to armpit.
Fulness: in hypochondria; in trachea; in chest.

Digitized by Google

Feeling of anxiety: in breast.
Constrictive feeling: in larynx; at middle of chest; of air tubes.
Feeling of narrowness: in throat; in chest.
Deadly sick feeling: at stomach and all over.
Dryness: of fauces; in throat.
Repeated quivering: in muscles of ribs toward spine.
Peculiar confusion: of head.
Weakness: extending through whole chest down to umbilicus; at pit of stomach; at epigastrium, extending into chest; at præcordium.
Lame feeling: in upper l. arm.
Itching: in l. canthus.
Chilly feeling: in l. cheek near ear, extending to lower jaw.
Coldness: of tip of nose; of tip of fingers.

[44] **Tissues.** ‖Headache accompanied by irritation of pneumogastric.
‖Gastric derangement, with extreme nausea and vomiting; morning sickness; spasmodic asthma; emphysema; whooping cough; cardiac disturbance; intermittent fever.

[45] **Touch. Passive Motion. Injuries.** Touch: r. deltoid sore.
Sits up in bed, leaning forward to avoid contact with bedclothes on sacrum.
Pressure: oppression at epigastrium.
Cannot bear even pressure of soft pillow over sacrum.
Boring with finger: > sudden shutting up of ear.

[46] **Skin.** Prickling itching of skin all over body.

[47] **Stages of Life, Constitution.** ‖Light hair, blue eyes, fair complexion; inclined to be fleshy.
Child, æt. 1½, suffering three months; asthma.
Servant girl, narrow and depressed thorax, suffering for years; spasmodic asthma.
Young woman, suffering many years; cardialgia simplex.
Servant maid, æt. 26, bilious habit, suffering a long time; cardialgia biliosa.
Physician, suffering for ten years; asthma.
Man, æt. 35; gastralgia biliosa.
Woman, æt. 38, mother of several children, suffering since childhood; spasmodic asthma.
Woman, æt. 38, suffering with chronic dyspepsia; cardialgia.
Man, æt. 45, fat and robust; hemorrhoidal discharge.
Man, æt. 49; ague.

[48] **Relations.** Antidoted by: *Ipec.*
Compare: *Arsen.* and *Rosa damas.* in hay fever or rose cold; *Digit., Tabac.* in heart affections; *Arsen., Verat. alb.* in gastric troubles; *Ipec.* in spasmodic asthma; *Ant. tart.* and *Ipec.* in morning sickness.
‖"*Lobelia* is to the bad effects from drunkenness in people

with light hair, blue or grey eyes, florid complexion, fat or corpulent, what *Nux vom.* is to people of opposite temperament."

LYCOPODIUM.

Club Moss. *Lycopodiaceæ.*

A low creeping perennial, found in dry woods in all parts of the world, but is most frequent in Northern countries. The medicinal part is the powder, which is collected in Germany and other places in Europe. It is a fine, very mobile, pale yellowish dust, free from odor and taste. Seen through the microscope it appears round on one side, while the other forms a short three sided pyramid. When thrown into a flame it burns suddenly and with a hissing noise. A trituration of the powder precedes the preparation of the alcoholic tincture.

Introduced by Hahnemann and proved by himself, Gersdorff, Goullon, Hartlaub, Rummel, Schreter, Wahle, Rückert (see Chronische Krankheiten), Schelling (Allg. Hom. Ztg, vol. 25, p. 357, vol. 82, p. 121), Seguin (Hygea, vol. 19, p. 11), Genzke (Hygea, vol. 22, p. 446), Martin (a collection of provings, Vierteljahrschrift, vol. 10, p. 52), Huber (a collection of provings, Zeit. d. Ver. Hom. Oestr., 1857, vol. 1, p. 333), smaller provings by Robinson and Epps; with higher potencies by Berridge (N. A. J. Hom., 1871 and 1873; also N. E. Med. Gaz., 1874).

[1] **Mind.** Unconsciousness.

Vanishing of thoughts.

Weak memory, old people are very forgetful.

Uses wrong words for correct ideas; uses wrong syllables; makes mistakes in writing; spells words wrong; mixes up letters and syllables, or omits parts of words.

She was quite unable to write; having written a letter, she could not read it.

Cannot remember meaning of single letters; imitates in writing without knowing signification.

Cannot read, because meaning of certain letters is not clear; makes mistakes in speaking, because he cannot get right words; when subject is very important, words are correctly chosen. Indigestion.

Thoughts confused, unable to fix them; difficult to find fitting words.

Absent minded; supposes to be in two places at a time.

Mental torpor and weakness; slow of comprehension; dulness to imbecility.

Fancies and delirium.

Child desires to be carried.

Taciturnity; desires to be alone.

Dread: of men; of solitude, irritability and melancholy.

Weeps all day, cannot calm herself, < from 4 to 8 P.M.

Sensitive; even cries when thanked.

Her answers are quick, anxious and tremulous; wandering; imperiousness; speaks with an air of command; manner stiff and pretentious; strikes her attendant and grows angry; scolds much and violently at imaginary persons, or laughs and cries alternately, or is exceedingly hilarious.

Catching at flocks.

Excessively merry and laughs at simplest things, again melancholy and low spirited.

Google

Melancholy: has doubts about her salvation; before catamenia; in mild characters.
Desponding, grieving mood.
Satiety of life, particularly mornings in bed.
Apprehensiveness, difficult breathing; fearfulness.
Easily frightened and starts up; feels frightened at everything, even ringing of door bell.
Anthropophobia (in children); fear of phantoms in evening, with anguish.
Anxious thoughts, as if about to die, for which she prepares farewell messages.
Indifferent, taciturn; insensibility to external impressions.
Amativeness or amorousness.
Want of selfconfidence; indecision; timidity; resignation.
Loss of confidence: in his own vigor; in physician and remedies.
Sensitive, irritable disposition; peevish and cross on getting awake; easily excited to anger; cannot endure slightest opposition, and is speedily beside herself.
Obstinate, defiant, arbitrary; seeks disputes.
Very ill humored and morose, just before menstruation.
Discontented and impatient.
Misanthropic; flies even from his own children.
Distrustful, suspicious and fault finding. θDyspepsia. θChronic hepatic congestion. θExcess of lithic gravel.
Haughty, reproachful and overbearing.
Parsimonious, greedy, avaricious, malicious and pusillanimous.
Ailments from fright, anger, mortification, or vexation, with reserved displeasure.
Nervous action weakened; threatened softening of brain from overwork, or metastasis of ulcers suddenly healed.
Oversensitiveness to pain; patient is beside himself.

Sensorium. Impending cerebral paralysis; somnolence; staring eyes; dropped jaw. θCerebro-spinal meningitis.
Stupor, r. pupil dilated; grunting expirations, occasional outcries; tympanitis; head bent back; urine dark; constipated; lower jaw sunken; sliding down in bed.
Stupefying headache; heat in temples and ears; mouth and lips dry; < from 4 to 8 P.M., rising up or lying down.
Vertigo: rising from seat; whilst drinking; in hot room; in morning, when and after rising from bed, he reels back and forth; in forenoon; nausea, seems as though everything were turning round; constantly dreads falling.
Congestion of blood to head, especially in morning when raising himself in bed.

Google

‖Gets hot, face reddens, eyes water and become dim. θVertigo.

[3] **Inner Head.** ‖Hammering pain in centre of forehead.

‖Tearing in forehead or r. side of head, extending down to neck, with tearing in face, eyes and teeth; < on rising, > lying down.

‖Burning, tearing pain in forehead, day and night.

| |Much dull frontal headache.

| |Headache above eyes: immediately after breakfast; accompanying severe colds.

‖‖Pain in temples, as if screwed together; < during menses.

‖‖Stitches in temples, mostly r., from within outward.

‖Semilateral headache; shattered or concussed feeling at every step.

‖‖Pressing headache on vertex; < from 4 to 8 P.M., from stooping, lying down and exerting mind; followed by great weakness.

| |Pain in upper part of occiput, followed by unconsciousness. θHydrocephalus.

‖Awakes with violent headache, throbbing on top of head.

‖‖Throbbing in brain, leaning head backward, during day.

‖Headache as if bones of skull were being driven asunder, or as if brain was vacillating to and fro, especially when walking, going up stairs, or rising from stooping.

‖Throbbing headache: from motion; after every paroxysm of coughing.

‖Congestive headache; head seems as if it would burst.

| |Shaking in head on stepping hard.

‖Headache with stupefaction.

‖Violent headache at night, as if caused by a wrong position.

‖If she does not eat during ravenous hunger, she is attacked with headache, which disappears after eating.

‖‖Headache < from warmth of bed, getting warm while walking, and from mental exertion, or chagrin; > lying down, in open, cold air, and uncovering head.

‖Drowsiness, loud screams during sleep; sleep with half open eyes, throwing head from side to side with moaning; bad humor after sleep; comatose; emaciation; pale face; flushes of heat in face; spasmodic twitching of face; stiff neck; constipation; complications with eruptive fevers and pneumonia. θTubercular meningitis.

‖Dread of solitude; active, irritable and melancholy mind; stupefying headache, pain extending down neck, with great weakness; acute hearing, with roaring in ears; acute smell; tongue swollen; bloating of abdomen, with tension as of a hoop, same in chest; much flatus; urine

Google

loaded with lithates; burning pain between shoulders; numbness and twitching through body and limbs. θCerebro-spinal meningitis.

In delicate anæmic children; heaviness and obtuseness of head; stupefaction; convulsive motions of head, face, and extremities; hemiopia or amblyopia; coldness of face or of whole body; indistinct speech and heaviness of tongue; sleepiness; screaming out in sleep, delirious words; frequently indicated after *Calcar.*, when erethic symptoms are followed by deep coma. θHydrocephalus acutus.

[4] **Outer Head.** Tearing, boring and scraping on external head during night.

Head drawn to r. side, or bent backward; spasmodic shaking of head.

Head easily becomes cold; cutting soreness of scalp.

Itching of scalp; dandruff, smelling badly.

Pityriasis in spots on scalp; fair haired, strumous girls.

Eruption, beginning on back of head; crusts thick, easily bleeding, oozing a fetid moisture or emitting a mousy smell; < at night, after scratching, and from warmth. θCrusta lactea.

Eruption on head with swollen cervical glands.

Circular patch on vertex denuded of hair; scalp puffed up by accumulation in subjacent cellular tissue of bloody, offensive pus, which discharges from time to time. θHerpes tonsurans.

Whole of occipital region and also other parts of head covered with a thick, loose and porous crust, bottom of which seemed full of vermin; severe itching, causing constant scratching and rubbing; discharge of bloody, watery, lymphlike pus, so profuse that it ran down neck and back, < at night; glands of throat and neck swollen; extremely offensive odor; face pale and covered with small red pimples, points of which contain pus; eruption behind ears; outer ear occasionally covered with thick crusts; discharge of pus from ear.

Plica polonica.

Hair falls off; after abdominal diseases; after parturition; burning, scalding, itching of scalp, especially on getting warm from exercise.

Hair becomes grey too early.

[5] **Sight and Eyes.** Photophobia; evening light blinds him; in artificial light all objects tremble.

Eyes dazed by light, and painful as if bruised.

Floating black spots before eyes; sparks in the dark; letters run together or become indistinct while reading or writing, must vary distance of page; as of a veil and flickering, after siesta; obscuration as from feathers.

Google

Hemiopia, sees only l. half of objects.
Vision weak, unable to distinguish small objects even at a short distance; seems as though one was looking through fine lattice.
Sees everything dimly, as through a fog; can only see rude outline of objects; in walking, needs assistance; slight haziness of lens, < in r. eye; menses absent. θAfter typhoid.
Night blindness, with black spots before eyes.
Hemeralopia; obliged to stop work at 4 P.M., because he cannot see after that hour; attacks come suddenly, with severe cutting pains.
Hypermetropic, double convergent strabismus; cannot see after 7.30 P.M., from February to July each year; a fog seems to shut him in; photophobia in daytime; keeps lids nearly closed; conjunctiva palpebrarum congested; congestion of optic nerve; pustules developed on margin of l. cornea (improved). θRetinitis hemarolopica.
Cataract: with suppressed menses; after typhus; with chronic dyspepsia.
Inflammation of cornea, with bulging.
Staphylomatous protrusion.
Eyes very much sunken, blue rings.
Eyes seem too large.
Eyes hot, dim, wide open, fixed and insensible to light.
Cold feeling in eyes.
Dryness of eyes; in evening and at night; obliged to close lids; difficult to open, smarting in morning.
Pressive pain in eyes, as if dust was in them.
Burning and itching in eyes.
Stitches and soreness in eyes, evenings, when looking at light.
Redness of eyes and pressure in them.
Much mucus in eyes, with smarting pain.
Inflammation of eyes, with itching in both canthi, redness and swelling of lids of r. eye; distressing pain, as if they were dry, with nightly agglutination.
Catarrhal or scrofulous ophthalmia; secretion thick, yellowish, green.
After catching cold during an attack of jaundice, severe inflammation of eyes; on fifth day copious discharge of pus from under puffed lids; lids opened with difficulty; conjunctivæ looked like raw meat; cornea dim.
Arthritic catarrh of conjunctiva, with accumulation of white matter in corners.
Ophthalmia neonatorum during suppurative stage.
Inflammatory affections of eyes, with nocturnal agglutination and lachrymation by day.

Google

‖Smarting and burning of lids.
‖‖Ulceration and redness of eyelids; water flows from eyes, smarts and bites cheeks.
‖‖Granular eyelids, dry, with smarting.
‖Itching in canthi.
‖‖Pustules and styes on lids, more toward inner canthi.
‖Polypus as large as a pea, pedunculated, growing from outer canthus of r. eye.
‖Lachrymal fistula.
‖Small red spots; bloody extravasations scattered here and there around eyes, in consequence of straining at vomiting. θVomiting during pregnancy.

[6] **Hearing and Ears.** ‖Oversensitivess of hearing; sensitive to musical sounds and noise.
‖‖Roaring, humming, whizzing, rushing in ears, or singing as from boiling water; hardness of hearing.
‖Sensation as if hot blood rushed into ears.
‖‖Impairment or loss of hearing, in connection with otorrhœa; integrity of organic part of middle ear unaffected; patient scrofulous, with swelling of glands of neck.
‖‖Loss of hearing after scarlet fever; offensive, bad looking discharge from ears; loss of speech, due to his not being able to hear words.
‖‖Otorrhœa: purulent, ichorous; after scarlatina; with impaired hearing; after severe otitis interna.
‖External meatus excoriated by offensive discharge; drumhead destroyed; cannot bear to be covered; after scarlet fever, with affections of parotid glands, eruptions and abdominal troubles. θOtitis media.
‖Small ulcers or polypi in ear.
‖‖Tearing in r. and l. meatus.
‖Itching in ear (in sleep).
‖‖Humid, suppurating scurfs in and behind ears.
‖‖Eczema of ears, with thick crusts and fissures in skin.

[7] **Smell and Nose.** ‖Oversensitiveness of smell.
‖Frequent epistaxis; principally in afternoon.
‖Dryness and stoppage of nose.
‖‖Stopped catarrh, cannot get breath at night.
‖Nose stopped up, especially at root; breathes with open mouth and protruding tongue. θDiphtheria.
‖Stoppage of nose, with dryness of posterior nares, fetid secretion, hoarseness, rawness, and soreness of chest; nightly tickling cough, with sensation as from sulphur-vapor in throat.
‖‖Snuffles, child starts out of sleep rubbing its nose.
‖Fluent coryza, with redness of eyes and lachrymation, frequent flushes of heat and yawning.
‖‖Violent coryza, nose swollen; discharge acrid; excoriating; posterior nares dry.

Google

‖Long lasting coryza, discharge purulent.
‖‖Violent catarrh, with swelling of nose.
‖Catarrh, with acrid discharge from nose, makes upper lip sore.
‖Ichorous discharge from nose, begins in r. nostril. θScarlatina. θDiphtheria.
‖‖Catarrh of nose and frontal sinuses; discharge yellow and thick; frontal headache; yellow complexion.
‖‖Thick yellow discharge, copious and fatty; constipation; prostration; impotence; palpitation. θNasal catarrh.
‖Scurf or crusts in nose; nightly closure of nasal openings in dry coryza.
‖Discharge of elastic plugs from nose. θCatarrh.
‖Very sensitive smell; violent coryza, acrid and making upper lip sore; posterior nares feel dry, and nostril is closed every morning with what looks like inspissated pus. θPolypus.
‖‖Fanlike motion of alæ nasi. θPneumonia.
‖Pimples sore and acrid on end of nose.
‖Child wakes at night and rubs nose so much and long that parents are frightened; it won't stop rubbing its nose. θCatarrh of breast.

[8] **Upper Face.** ‖Copper colored eruption on forehead.
‖Silly expression.
‖‖Face: pale, dirty, sickly; pale, with circumscribed red cheeks; earthy, yellow, with deep furrows; blue circles around eyes, blue lips; yellowish grey.
‖‖Flushes of heat in face; burning.
‖Heat in face after eating, particularly in l. cheek.
‖Glowing redness of face, with a fine network of capillaries.
‖Great heat in face without redness.
‖‖Spasmodic twitching of facial muscles.
‖‖Tearing pain in bones of cheeks.
‖‖Œdema of face; puffy and pale yellow.
‖‖Eruption on face, humid, suppurating.
‖‖Red, bloated face, full of dark red spots, covered with pustules.
‖Gnawing, biting pains in r. malar bone, extending into sound and affected teeth, with swelling of cheek and inability to chew; on disappearance of this pain has pain in r. side of face, r. temple and parietal bone; small ulcers in ear.
‖Eruption covering whole r. cheek; thick, dry and scaly, itching and troublesome; constant disposition to breaking out on l. cheek also. θBarber's itch.

[9] **Lower Face.** ‖Lower jaw drops: during sleep; with stupor, in exhausting fevers.
‖‖Drawing or lacerating in lower jaw.

Google

Eruption around mouth; corners of mouth sore.
Swelling of lower lip.
Large ulcer on vermilion border of lower lip. θCancer.
Itching, papular eruption about chin.
Small, white, pedunculated warts on chin, appearing over night.
Stitches in region of r. parotid.
Submaxillary glands swollen.

[10] **Teeth and Gums.** Teeth: become yellow; excessively painful to touch; front teeth loose or as if too long; painful on chewing.
Toothache: with swelling of cheek; > by heat of bed, warm drinks and warm applications; from slightest touch of teeth or from shock of coughing; only at night; when it ceases in morning, great excitement and uneasiness, which keep her awake.
Violent stitches follow each other in slow succession in hollow teeth, ceasing after getting warm in bed.
Odontalgia caused by carious teeth; dull pain < from eating; swelling and ulceration of gums.
Constant throbbing; teeth sensitive and elongated; salivation.
Swelling between upper gums and malar bone, with swelling of cheek; awoke with violent headache, throbbing on top of head.
Swelling of gum above front teeth, with swelling of upper lip.
Profuse bleeding of gums when touched or cleaning teeth.
Gumboils; fistula dentalis.

[11] **Taste and Tongue.** Taste: too acute; sour; bitter; fatty; mouldy; cheesy.
Bad taste in mouth: soon after eating; on awaking in morning; tongue thick and burning, as after much smoking.
Tongue: coated white; sour taste; heavy, trembling; stiff with indistinct speech and dryness, mornings; red, dry; becomes black and cracked; painful and swollen in places, hindering speech; tubercles; convulsions of tongue; gets involuntarily between upper teeth and lip, and then between under teeth and lip; darts out and oscillates to and fro.
Tongue distended, giving patient a silly expression. θAngina. θDiphtheria.
Numerous blisters on tongue; burning pain; vesicles on tip feeling scalded and raw.
Ulcers on and under tongue.

[12] **Inner Mouth.** Mouth and tongue dry, without thirst; dry and bitter in morning.

Digitized by Google

Saliva dries on palate and lips, becoming tough.
Increased secretion of saliva, tasting salty.
Accumulation of water in mouth; with nausea; with dyspepsia.
Sensitiveness of submaxillary glands; increased secretion of saliva.
Putrid smell from mouth, especially in morning when awaking.
Small tumors in mouth in various places.
Gums and velum palati covered with a lardaceous coating. θSyphilis.

13 **Throat.** Feeling of contraction in throat, nothing goes down; food and drink regurgitate through nose.
Feeling as if a ball rose up in throat from below.
Choking in throat provoking constant swallowing.
Accumulation of mucus in throat, with inclination to swallow.
Soreness of throat, with difficult swallowing.
Burning or pricking in throat and pharynx.
Pain in throat, with sensation of constriction in region of submaxillary glands.
Difficult swallowing of liquids; as if entrance to pharynx was constricted.
Ulceration of tonsils.
Swelling and suppuration of tonsils and glands.
Pain and soreness begins on r. side of throat. θAngina. θDiphtheria.
Inflammation of fauces, deep seated stitching pain, with swollen sensation, as if a hard body lodged in back part of throat; thick, yellow and greenish yellow expectoration, firm and almost hard in centre, in morning.
Swelling of r. cervical glands, which disappeared and was followed by swelling in l. throat, with difficult swallowing; whitish ulcer in l. tonsil, with soreness there; swelling of l. cervical glands; hot drinks make throat smart; < from 4 P.M. θUlcerated throat.
Sore throat for six days, commencing on r. side; tongue much swollen; cannot protrude it beyond teeth, hindering swallowing and speaking; pulse 120; skin hot; restless at night; increased saliva; breath offensive; l. side of face swollen.
Soreness of throat commenced on r. side, extending to l.; whitish ulcer on r. tonsil; sharp pain on swallowing, especially warm drinks; pains as if bruised all over limbs; frontal headache; brown tongue; pulse 120. θUlcerated throat.
Throat sore on r. side; sensation when swallowing as if head opened and pain shot down into abdomen; when sitting up, pain shoots through head.

Google

Swelling and suppuration of tonsils, going from r. to left.

Tonsils covered with lardaceous ulcers. θSyphilis.

Inflammation and enlargement of tonsil, over surface of which, at about equal distances, are found half a dozen or more minute drops of pus beneath epithelium. θTonsillitis.

Swollen, congested tonsils, with yellow, small patches on each; great difficulty to swallow, with pains on l. side, shifting to r. and upwards to ear; heat and chills alternating; commencing to get < at 4 P.M.; pemphigus on thumb of l. hand and on third finger, with terrible burning pain; blisters small, situated on a highly inflamed surface. θTonsillitis and pemphigus.

Chronic enlargement of tonsils.

Hawking of bloody mucus, or of hard greenish yellow phlegm; feeling as of a hard body in œsophagus.

Fauces brownish red; diphtheritic patches spreading from r. tonsil to l., or descending from nose; < from cold drinks and after sleep.

Diphtheria < on r. side; great restlessness (like *Rhus tox.* restlessness); membrane of pearly hue, sometimes yellow.

Membrane r. to l.; difficulty in breathing; fanlike motion of alæ nasi; speech indistinct; soporous condition and indifference to external surroundings; impatient on awaking. θDiphtheria.

Commenced in nose and extended to r. tonsil, thence to l.; r. tonsil enormously swollen, extending to cellular tissues, so that r. side of neck was swollen clear out beyond jaw and began to turn purple; unable to lie on back on account of inability to breathe; awakens from short, restless naps, "kicking and screaming and very cross;" breath horribly offensive. θDiphtheria.

Face flushed; pulse 154; skin hot and dry: restless; headache; great aching in back and limbs; pain in throat only on drinking cold liquids other than water; throat much congested, four or five greyish spots size of hemp seed on r. tonsil; next day spot size of ten cent piece, very angry looking, on l. tonsil; strong diphtheritic odor in room. θDiphtheria.

Inflammation of tonsils and fauces for four days; much swelling and pain, amounting to spasm on swallowing; white diphtheritic patches on tonsils; constant desire to swallow, accompanied by spasm and violent stinging pain; rigors; rapid pulse; swelling and pain most marked on r. side; fetor. θDiphtheria phlegmonosa.

After scarlatina: pulse too rapid to be counted; great aching of head, back and limbs; vomiting and flatus; throat pains on drinking cold milk, but not cold water;

Digitized by Google

> from warm drinks; deposit of greyish yellow covering on whole of r. tonsil; very dull and difficult to rouse. θDiphtheria.

▮At 9 A.M. began to feel chilly and weak; chilliness not > by heat of stove; at 4 P.M. great prostration, throat sore and several patches on r. tonsil; complained more of prostration and aching in bones; glands of neck swollen; tongue yellow, more at base; taste brassy, odor from mouth same; next day diphtheritic patches on r. tonsil had coalesced and several patches on l. tonsil; on third day prostration, loss of appetite, aching in back, and legs; pain in throat and ears much <, whole throat and fauces covered with thick, dirty yellow membrane, breath offensive; cannot swallow anything warm; but cold drinks > somewhat; passed a bad night because he could not breathe through nose; symptoms < after 4 P.M.; had had bright yellow, thick and very offensive discharge from r. ear, which caused soreness of meatus, since childhood. θDiphtheria and chronic otorrhœa.

▮Diminished secretion of urine; grinding of teeth during heavy stupor, as when fully awake. θDiphtheria.

[14] **Appetite, Thirst. Desires, Aversions.** ▮▮Excessive appetite, followed by distension; hunger remains though stomach and abdomen are full and tense.

▮▮Canine hunger; the more he eats the more he craves; head aches if he does not eat.

▮Greyish yellow color of face; frequent yawning; belching, flatulency; pain in small of back; dry stool; stitching in knees and ankles; dimness of vision; great urging to urinate, with profuse discharge of watery urine; fluor albus. θBulimia.

▮▮Hungry, but soon satisfied, soon filled up; constipation, vertigo, belching of tasteless wind.

▮Constant satiety, takes no food, says she wants nothing because she is full; the least morsel causes sensation of fulness up to throat.

▮Thirst: with dry lips and dry mouth; with disgust for drink; at night drinks little but often.

▮Want of thirst.

▮Desire for: sweets; oysters, which disagree.

▮Aversion to: coffee; tobacco smoke; boiled, warm food; bread (rye); meat.

[15] **Eating and Drinking.** ▮▮Loss of appetite at first mouthful; weight at stomach after eating.

▮▮After eating: sudden repletion; irresistible drowsiness followed by weariness; pressure in stomach; pressure and tension in liver, sensitive to pressure; bitter gulping up or spitting up of food; palpitation.

Google

After a meal: sensation in stomach as if fasting, but without hunger; feels more nervous and weary, with quickened pulse.

Aggravation by cold drinks (except water in some cases); > from warm. #Angina. #Diphtheria.

Bad effects: from onions, bread, particularly rye bread; from spirituous liquors; from smoking; from drinking wine.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.

Everything tastes sour; sour eructations; heartburn, waterbrash; acid gnaws stomach.

Belching: without relief; bitter, particularly in morning; during day, with burning.

Nausea: constant; in pharynx and stomach; mornings, fasting; in room, passing off in open air; when riding in a carriage; after a meal, with accumulation of water in mouth; after cold, not after warm drinks (in chills); qualmishness before breakfast; during menstruation.

Vomiting: food and bile; coagulated blood; sour substances; dark greenish masses, after eating or drinking.

Greatly weakened by frequent vomiting; feels especially weak in her knees and down legs to joints of feet; as soon as she eats, great burning in throat; one hour after eating, nausea, followed by vomiting with great straining, causing pain in head and back; in consequence of this straining, small, red spots, bloody extravasations, scattered here and there around eyes; after bitter vomiting, cramps in abdomen; wind in stomach and bowels, causing crampy sensation upward toward chest; brandy brings on belching and > cramps; thirsty, but drinking brings on vomiting; frequent spells of nausea, as if caused by wind in stomach, smothering her and making her feel weak; constipated; > in open air.

[17] **Scrobiculum and Stomach.** In epigastrium: anxiety; pressure; constrictive pains, > lying down; pain caused by coughing.

Epigastric region extremely sensitive to touch and tight clothing.

Hard swelling in epigastric region.

Sinking at stomach; sensation of fluttering at stomach, which goes all over body.

Discomfort, pressure and heaviness in stomach after eating a little.

Pressure in stomach: after eating; in evening in bed; with difficult breathing.

Feeling of tension beneath stomach, as if everything was too tight, with sore sensation in chest.

Compressive pain as if stomach was pressed together from both sides.

Google

Rumbling or sensation of churning in stomach.

Twisting, crawling and emptiness in stomach, with yawning.

Stomach sensitive to pressure.

Pain in stomach and region of duodenum, < by sitting bent over.

Constriction and cramp in stomach, which is much distended.

Gnawing, griping, cutting pain in region of stomach.

After eating and after slight cold, violent stomach pains, with chilliness, fingers become waxy white, as if dead.

Griping and clutching in epigastrium and stomach, extending beneath ribs and into back, constriction of œsophagus, with nausea, anxiety, oppression, flushes of heat and weakness almost to fainting, after least amount of food; pains so severe that he rolls about on floor; gives him shocks from stomach up to œsophagus and throat, accompanied by throwing back of head; bloating; palpitation; yawning; dry stool; great lassitude; little sleep.

Constant pressing, tearing, burning pains in stomach, with almost daily sour vomiting, or vomiting of slime or water; great debility; can hardly eat anything; constipation; white coated tongue with a dry line down centre.

For several years attacks of pain in stomach; burning in epigastrium, extending up into throat; when lying, burning sensation up whole spine; after eating, pressure in region of stomach and nausea, sensation as if everything eaten was rising up; gagging with mucous discharge; cannot bear tight clothing, nor anything tight about abdomen; frequent shuddering; biting, acrid leucorrhœa.

Attacks of severe pain in stomach once or twice daily, gradually becoming more frequent; pains constricting or boring, extend into back, at times burning, stitching, > by belching, disappear entirely after raising a quantity of thin, acrid fluid; < by lightest food; > at night; constant dull pain in epigastrium; hunger with faintness; no appetite; white tongue; constipation and flatulency; emaciation and general debility.

Gnawing, twisting griping in epigastrium, stomach and upper abdomen; stitching, tearing into stomach, extending through to back and to shoulders; pressure and bloating in abdomen, with oppression of breathing, fearfulness, sighing and anxiety in chest; hot flushes from abdomen up into chest and head, with red shining face and vertigo; flushes of heat; attacks begin with frequent yawning, stretching, belching and great anxiety, followed by severe pain in epigastrium and in chest, as

Google

if it would burst or as if œsophagus was being clutched and twisted; during one attack, vomiting of mucus and retraction of head; attacks brought on by physical exertion, mental emotion, cold, and particularly by eating; at one time loss of appetite, at another canine hunger; stool dry; cold hands and feet; frequent chilliness; restless sleep. θGastralgia.

Body emaciated; face bloated, pale yellow; isolated warts and pimples; gnawing, pressing and twisting in stomach; belching; nausea; retching; anxiety, with difficult respiration; occasionally vomiting of sour mucus; sensation as if steam was rising from stomach into head, with roaring in ears, vertigo and dulness of head, and redness of face; abdomen bloated, hard; stool dry, difficult; urging to urinate, with scanty, burning discharge; leucorrhœa; cough, with shortness of breath and stitches in sides under short ribs and in middle of chest; palpitation; skin rough, covered with pimples; in evening, chilliness, shivering, lassitude, thirst, followed by heat, with headache; sleep disturbed by dreams; easily tired; prostrated; body covered with nettlerash and boils.

Every five or six days violent spasms; pain like lightning strikes epigastrium, spreads like rays over abdomen, and shoots into all passages of body; after some hours of intense agony, pain goes off suddenly; violent pains in back, like gimlets, running into spine; pulse 120; tenderness along margin of liver and at epigastrium.

Cramps in stomach, of a contortional nature, > by bending; brought on by eating fruit; nausea and constant urging to swallow; flowing saliva and poor appetite; constipation, with drawing pain in abdomen; headache > when lying down; morose disposition.

Severe spasmodic pains at epigastrium, coming on at two or three every morning, waking her and giving intense agony; hot brandy and water >; distension when in pain as from incarcerated flatus; pulse very weak; tongue furred; tenderness along margin of liver; constipation; gouty diathesis. θFlatulent indigestion.

Pain under ribs and all around waist, with shooting pains up shoulder blades; pain across stomach and straight down on each side of it, sometimes very severe across bowels; nausea; food often vomited, with a sour and then bitter taste; waterbrash: obstinate constipation; painful hemorrhoids, with great loss of blood; coldness in extremities; cramp in legs and thighs; action of kidneys undue and disturbing at night; dislike to bread; sleepless on account of pain; face pale, ashy yellow. θDyspepsia.

Google

Dyspepsia, with accumulation of gases and great repletion after taking a slight quantity of food; anorexia; much thirst; burning in stomach; longing for cold articles of diet, like fruits and ice cream; rumbling of bowels at night, bloating and obstinate constipation; l. leg covered up to knee with ulcers of different sizes, discharging yellowish watery matter, with an eczematous eruption around them, and œdema of ankle; great itchiness and throbbing, < at night, by rest and hot applications; > walking about, cold water applications or bathing of parts. θChronic ulcers on leg and dyspepsia.

For two hours after eating, spits up food, not acid; a few mouthfuls of food seem to fill him to throat; stomach bloats a great deal with flatus, which gives him much distress; constipated; dull frontal headache. θDyspepsia.

Chronic dyspepsia in women with sallow face and constipation.

Flatulent indigestion; sleeplessness; wakes after half an hour with palpitation; no organic disease; fear of death.

Atonic dyspepsia in weakly subjects; digestion proceeds slowly, with flatulence and acidity.

Indigestion resulting from too free use of farinaceous, heavy and fermentable diet.

Gastralgia and chronic gastritis, occurring in peasants, who subsisted mostly upon heavy bread, sour small-beer and adulterated coffee.

Derangement of stomach from pastry.

Affection of liver and induration of pylorus, after suppression of herpetic eruption on anus or scrotum; on taking least food or drink, dark green bilious vomiting; obstinate constipation; thirst; cannot lie on r. side; pressing pain in region of liver; emaciation; hypochondriacal; dry heat of skin; frequent fainting.

Perforating ulcer; < sitting bent, > walking about and when warm in bed.

Cancer of stomach.

[18] **Hypochondria.** Tension as from a cord making diaphragmatic attachments; cannot stretch or stand upright.

Tension: in hypochondria, as from a hoop; in region of liver.

Tensive aching, < bending body or pressure of hand.

Pressure in hepatic region; pressive pain on breathing.

Cannot eat to satiety because it produces distressing feeling in hepatic region.

Pressive pain in r. hypochondrium, at times took away breath, became a sticking.

Sore, pressive pain as from a blow in r. hypochondriac region; < by touch.

Google

‖Region of liver sensitive to contact; sore aching as from a shock.
‖‖Pain in l. hypochondriac region in afternoon.
‖Acute griping pains in l. hypochondrium.
‖Pain in back and r. side, from congestion of liver.
‖‖Violent gall stone colic.
‖Sharp pain in dorsal hepatic region, in r. shoulder and arm; throbbing frontal headache; feet and hands burning at times and again feeling cold or numb; sleepy during day; sleep disturbed at night; craves sugar, starchy and sweet food; hemorrhoids; constipation; had taken calomel in her youth, till "she had to keep her mouth closed to prevent her teeth from falling out."
πCold and numb; no power to raise arms or move hands; respiration imperfectly accomplished with great effort; a peculiar chill throughout whole body, soon followed by sharp gnawing pain in region of liver, as if twenty dogs with sharp teeth were gnawing her; after a while pains left liver to migrate from place to place, until they had traveled throughout body; succeeded by numbness and sleep, from which she awoke, unable to move or speak.
‖Liver complaints after mortification.
‖Frequent recurring attacks of severe pressive and occasionally stitching pains in r. side, extending towards epigastrium, at times swelling; liver painful to pressure in spots; tongue coated; bitter taste; stool scanty; mind depressed; face and neck covered with brown spots.
‖Hepatitis: of children; chronic cases; with pneumonia; after allopathic treatment, particularly when mercury has been used.
‖Fatty degeneration of liver, with concomitant nervous hyperæmia.
‖Atrophic nutmeg liver; chronic form of hepatitis; abscesses.
‖‖Rumbling of wind in splenic flexure of colon.
‖Wind gurgles under apex of heart in l. hypochondrium; with oppressed breathing.
‖Icterus with flatulence; retarded stool; weariness and drowsiness.
‖‖Diaphragmitis.

49 **Abdomen.** ‖‖Sensation of something moving up and down in stomach and bowels.
‖Spasmodic contraction in abdomen.
‖When turning on r. side a hard body seems to roll from navel to that side. θAscites.
‖‖Sensation as if something heavy was lying on l. side of abdomen, not affecting breathing, but constantly felt when walking, sitting and lying.

Google

Hot pains flash across bowels.
Abdominal plethora, with constipation, in elderly people of higher classes; no desire for stool.
Pulsation in abdomen.
Abdomen sensitive to pressure; cannot bear weight of clothes.
Tympanitic distension: after eating; with cold feet.
Bloated feeling in abdomen, with actual distension in epigastrium, after a meal.
Flatulence: after eating; sour vomiting; diarrhœa; before and after stool.
Tension and drawing in all parts of abdomen; bloating of abdomen; pressure in præcordia; constipation; flatulence. θAffection of solar plexus.
While walking, rumbling and gurgling in abdomen so loud that it seemed as if those behind him would hear it.
Great fermentation in abdomen; rumbling, croaking, rattling; with colic and discharge of much flatus.
Accumulation of flatus, which becomes incarcerated; pressure upward, with full feeling, also downward on rectum and bladder.
Pressure, drawing, griping in abdomen.
Squeezing pressure in abdomen, so severe one cannot walk erect, but must go bent over or lie down; produces dyspnœa.
Tensive, tearing and cutting pains.
Cutting pains across abdomen from r. to left.
Colic, especially in region of transverse colon.
Colicky pains in r. side of abdomen, extending into bladder, with frequent urging to urinate.
Enteralgia and colic, accompanied by accumulation of gas in intestines; eructation and desire, but inability to go to stool.
Flatulent colic, bloating and constipation, following disappearance of eruption on skin.
Screaming spells every afternoon. θColic.
Flatulency, with protrusion of navel in infants.
Balloonlike distension of abdomen, making her ashamed to appear in public.
Heat and congestion of chest and head, with vertigo and roaring in ears; sensation as if heart hung by a thread, or as if stomach would fall down, also sensation as of drops of water falling down. θFlatulent colic.
Obstruction of bowels.
Enteritis developed in children by diet of milk and farinaceous substances.
A sudden mental impression, fearing she has broken her two year old boy's arm by lifting him, caused gastro-

Google

enteritis during pregnancy; intense pain, excessive flatulence, < after 4 P.M.; urine had a red granular deposit.

Pressure on hypochondrium causes pain in epigastrium and vice versa; chronic duodenitis.

Chill, vomiting, pains in abdomen; stitching in l. side of chest into abdomen and loins; stitching in shoulders, in l. axilla and in arms; abdomen painful even to touch; on lying on l. side, sensation as if a weight like a stone rolled over from navel to loin, causing this position to be unbearable; pressure in abdomen; painful urging to urinate; small, weak pulse; fever, thirst; prostration of limbs; sweat at night; stitching and tearing over epigastric region and into abdomen below navel; tearing pain about ribs and sides of abdomen into back; anxiety; burning in stomach and umbilical region; rumbling with increase of pain; abdomen sensitive to least touch, can bear no covering; fever, nausea; ineffectual efforts to yawn; hiccough; face sunken; depressed, complaining; small, weak pulse; sleeplessness. θPeritonitis.

Ascites, from liver affections, after abuse of alcohol.

Quiet and introspective; sad, sensitive; face earthy, bloated; loss of appetite; nothing is palatable; food causes fulness and bloating; thirst; constant nausea; profuse accumulation of saliva in mouth; occasionally sour vomiting; constant pressure in stomach and heartburn; abdomen large, feels full and heavy; hardness in epigastric region, extending on r. side toward back; region of spleen swollen and painful; abdomen tense, hard, but painless to touch, indistinct fluctuation; gurgling and rumbling in abdomen; stool hard and tardy; urine diminished; shortness of breath, < from motion, must sit up; upper extremities emaciated, lower swollen up to abdomen, and pit upon pressure: no sweat; sleep restless. θDropsy.

Brown spots on abdomen.

Skin of abdomen painfully sensitive.

Large swelling in psoas muscle.

Pain in groin when walking.

Swelling of inguinal glands, which pains as though suppurating.

Hernia (r. side); cural hernia, females; lacerating stitches.

Wakes at night cross and hungry. θInguinal hernia.

Pains in region af abdominal ring, outward pressing; old hernia protrudes.

[20] **Stool and Rectum.** Stools: pale, putrid; thin, brown; pale, fecal, mixed with hard lumps; thin, yellow, or

reddish yellow fluid; shaggy, reddish mucus (urethral tenesmus, dysentery); green, stringy, odorless mucus (cholera infantum).

Child sad and listless, or nervous, irritable and unmanageable. θDiarrhœa.

Diarrhœa: during pregnancy, with earthy color of face.

Daily, four to six painless, yellow, watery, undigested stools; fetid odor, much flatus; abdomen bloated; scalp sweat during sleep; cross and peevish; can scarcely wait for meal, but a few mouthfuls satisfy her; rumbling of flatus, colicky pains late in afternoon and early in evening. θDiarrhœa after suppression of skin eruptions.

Chronic diarrhœa of four years' standing, caused by drinking cold water; daily between 3 and 4 P.M., one or two thin, slightly bilious stools, preceded by severe abdominal pains; belching after eating; < from cold articles of diet, beer, milk, fruit and vegetables.

Ineffectual urging to stool; stool hard, difficult, small and incomplete.

Desire for stool followed by painful constriction of rectum and anus.

Stool very hard and dry, almost impossible to evacuate; spasmodic constriction of anus preventing stool.

Each evacuation produces most terrible pain in rectum and sometimes leaves him in a state of syncope for a quarter of an hour; even when paroxysms are lighter he remains several hours unable to make least movement on account of persistence of pains; mucous membrane of rectum very much injected, excoriated in some places, with considerable varicosity of veins; on carefully pushing finger into rectum, acute pains and spasmodic constriction of sphincter; loss of appetite and bad humor. θChronic constipation.

Narrowing of rectum, which causes a protrusion during stool, developing hemorrhoids; tearing pain in rectum, arresting breath; hemorrhoids surrounded by itching eruption, painful to touch; great fatigue after stool; varices most painful when sitting; obstinate constipation.

Constipation: of infants, restores contractility of intestines; in those who are tormented with night pollutions, or addicted to masturbation; after repeated affections of peritoneum, with urinary complications.

Before stool: strong desire or desire wanting; flatulent colic; pain at anus; straining efforts, often followed by tenesmus; chilliness in rectum; colic.

During stool: biting and burning at anus; chilliness;

Google

colic; distressing pressure in rectum; tenesmus; pain in rectum, with ringing in ears; burning and stinging in rectum; pain in back as if broken; bursting pain in abdomen; pain in stomach; headache; discharge of blood.

‖Stitching and burning at stool even when feces are not hard.

‖After stool: sense of insufficient evacuation (dysenteric stools), excessive and painful accumulation of flatus; contractive pain in perineum; uterine cramps, or lassitude; burning in rectum; tiredness, particularly in thighs; heat and pressure in thighs and head.

‖Rectum contracts and protrudes during hard stool, with stitches in rectum.

‖Tearing in rectum, so that it arrests breathing.

‖Cutting in rectum and stitches in bladder.

‖Twinging in rectum.

‖Continued burning pain in rectum.

‖Cramps in rectum and small of back, like labor pains.

‖Aching and pressure in rectum; < at night, with bleeding piles.

‖Piles which contain an immense amount of blood, more than size of vein would warrant; also piles which do not mature, but which, from partial absorption of contents, remain as hard, bluish lumps.

‖Hemorrhoids: with pain and itching at anus, and frequent, profuse discharge of blood; swell and protrude and bleed, even when there is no constipation.

‖Varices protrude; painful when sitting and to touch.

Itching and tension at anus in evening in bed.

‖‖Great tendency to excoriations about anus, which bleed easily; itching and moist, tender eruption.

[31] **Urinary Organs.** ‖‖Aching in kidney < before and > after urinating. θDiabetes mellitus.

‖Thirst, drinking daily about twenty-two tumblerfuls of water; flow of urine largely increased and of a pale, watery color. θDiabetes insipidus.

‖After catching cold, violent colic; sensation as if he was bound up and would burst; ineffectual belching and retching; pain concentrated on r. side near hip, not extending beyond median line; painful spot extremely sensitive to touch, rest of abdomen not painful to pressure; heavy sensation in bladder, burning on urination; gurgling in abdomen and noise as if small bladders of air were bursting, followed by much relief and finally copious, moderately thin stool; six days afterwards, discharge of a porous stone as large as half bean, with much sand and sediment. θRenal colic.

Google

Stiffness in renal regions, especially on r. side; worried by noise or interruption in business; brings up wind after eating, mentally depressed and physically weak till it comes up; passes small quantities of fine red sand. θGravel.

Periodical discharge of gravel and small calculi; pain in l. kidney and ureter.

Frequently compelled to rise at night to urinate; on urinating, cutting pains in glans penis and abdomen; urine turbid, loamy, depositing a thick, mucous sediment, occasionally bloody; when evacuating bowels, must press very hard although stool is not hard; burning in palms of hands and soles of feet. θGravel.

Renal colic, particularly in r. ureter to bladder; red sand in urine.

Vesical calculi, small, round and rough, with hæmaturia.

After taking cold, frequent desire to urinate; tenesmus of neck of bladder; dull pain in hypogastrium and loins; brick dust sediment in urine. θAcute cystitis.

Gums ulcerate, teeth feel loose and ache; pain in bowels after eating, moving about as from flatus; stool difficult to pass, with much flatus; urine very hot, formerly sediment, but since so hot, none; pain in small of back when standing. θCystitis.

Turbid, milky urine, with offensive purulent sediment; dull pressing in region of bladder and abdomen, disposition to calculi. θCystitis.

Bearing down over bladder, frequent desire to urinate; pains < lying down, especially at night; > from horseback riding.

Feeling of heaviness in bladder; burning during micturition.

Dull, pressing pain in region of bladder and abdomen.

Stitches: in bladder; in neck of bladder.

Frequent hæmaturia; daily deposit of large clots of blood in urine; obstinate constipation; almost total paralysis of feet.

Hæmaturia: l. kidney affected; pain in back before urinating; sediment of red sand; from gravel or chronic catarrh; discharge painless.

No urine secreted.

Retention of urine, violent pain in back, urine flowing in fits and starts.

Urine scanty, with red sediment.

Urging to urinate: must wait long before it will pass, or inability, with constant bearing down; supports abdomen with hands.

In children urging to pass water, with impossibility to

pass it; cry impatiently and grasp abdomen; red sand in diaper, or urine may be pale and clear.

‖Pressing in perineum near anus, during and after urinating. θEnlarged prostate.

‖Frequent desire to urinate, with discharge of large quantities of pale urine.

‖Frequent micturition during night, scanty and infrequent discharges through day.

‖Involuntary micturition.

‖Urine of strong, pungent odor, dribbling away from bladder continually during each afternoon and evening, commencing at 4 P.M. θIncontinence of urine.

‖Long lasting incontinence of urine resulting from fright during coition.

‖Strangury, urine scanty, dark red or albuminous.

‖Urine: pale, especially during night; red, burning; very hot; foamy; high colored, turbid; dark and turbid; with yellow or reddish deposit of sand; contains red crystals, as if mingled with brick dust; turbid, thick, milky, depositing a thick, purulent sediment of a most nauseating smell; greasy pellicle on surface.

‖‖Itching in urethra during and after micturition.

‖During urination: soreness or burning in urethra and glans; jammed feeling in perineum; cutting pain in abdomen.

‖After urination: crawling, burning in urethra and bladder; jerking, cutting in urethra.

Male Sexual Organs. ‖‖Sexual desire and power diminished.

‖‖Impotence: penis small, cold and relaxed; after onanism or sexual excesses; from poisoning with chlorine.

‖‖Erections feeble; falls asleep during an embrace.

‖Discharge of prostatic juice without an erection.

‖‖Weak and imperfect erections; excessive and exhausting pollutions; aversion to coition, or too easily excited; too early escape of semen.

‖Loss of sexual feeling: in old men, or strong desire without being able to have an erection; after abuse of copaiba in gonorrhœa.

‖Aching of inner surface of prepuce; yellowish humor behind corona glandis.

‖Four white, pedunculated, dry condylomata on mucous surface of prepuce, painless and not sensitive to touch; after use of mercury in gonorrhœa.

‖Chancre on inner surface of prepuce; phimosis; three or four condylomatous chancres around anus.

‖Moist condylomata on penis.

‖Enlargement of prostate gland; prostatitis.

Google

‖Chronic orchitis; pain in perineum when sitting; soreness between scrotum and thigh; dropsical swelling of genital organs.

‖Sticking itching, especially on scrotum.

‖‖Soreness between scrotum and thigh; intertrigo.

[23] **Female Sexual Organs.** ‖Nymphomania.

‖Cutting across hypogastrium, r. to left.

‖‖Ovaries diseased: inflammation; neuralgia; tumors; dropsy; burning or boring stitches, first r. then left.

‖‖Uterus diseased: inflammation; physometra, wind discharged from vagina; cancer; dropsy.

‖Menses: delay of first menses; profuse, protracted; flow partly black, clotted, partly bright red or partly serum; with laborlike pains followed by swooning; four days too early; inclined to be late, with sadness; reappearing every six or eight days; suppressed from fright.

‖Before menses: sad, chilly, abdomen bloated; melancholia; pain in abdomen; delirium, with weeping; dilated pupils; rigors with discomfort and uneasiness; coldness and heaviness of feet and legs; flatulent distension of abdomen; chill and heat at night; ill humor and disposition to weep; headache; severe backache; swelling of feet; nausea and faintness.

‖During menses: pain in abdomen and loins; itching of vulva; nausea; acid in mouth; headache; tiredness, faintness; swelling of feet.

‖After menses: leucorrhœa; stitches in head.

‖Dysmenorrhœa.

‖Menstrual irregularities connected with ovarian enlargement.

‖Leucorrhœa: in starts; milky; bloody; < before a full moon; corroding; sensation of pressure through vagina when stooping.

‖Dryness of vagina; burning in vagina during coition.

‖Metrorrhagia.

‖A rumbling begins in upper abdomen and descends to lower part, when a flow of blood follows, and so on successively. θUterine hemorrhage.

‖Increased discharge of blood from genitals during every passage of hard or soft stool.

‖Delay of first menses.

‖Chronic suppression of menses, from tuberculosis or cancer.

‖Menses absent a year; has aborted within this time; small ulcers on os uteri; leucorrhœa yellow and thin; constant regurgitation of food, sour and bitter; vomiting, with aching pain in epigastrium shortly after eating; uses pills for constipation; large goitre, r. side, painless; pains in lumbar region and nape of neck; all pains tend to r. side (goitre improved).

Google

‖Sensation of pressure through vagina when stooping.
‖Chronic dryness of vagina.
‖Burning of vagina during and after coition.
‖Neuralgia of vagina.
‖Serous cysts in vagina; indurations; fistulæ.
‖Itching, burning, gnawing in vagina.
‖‖Discharge of flatus from vagina. θPhysometra.
‖Occasional sharp pains running around labia.
‖Varices of genitals; erectile tumors; polypi.
‖Dry, pediculated, painless condylomata.
‖Inflammation of external genitals.
‖Nipples sore, fissured or covered with scurf; bleed easily; stitches and burning.
‖Hard, burning nodosities in mammæ; stitches.
‖‖Milk in breasts without being pregnant.

" **Pregnancy. Parturition. Lactation.** ‖During first month of pregnancy, great nausea; complete anorexia; swelling of veins of ankles, tearing pain on motion.
‖Third month of pregnancy: tendency to accumulation of acrid water in stomach, with cramps; constipation.
‖During fifth month of gestation: violent cramplike pains in bladder; inclination to pass water, but unable to do so; distension of abdomen from incarcerated flatus. θStrangury.
‖Fœtus seems to be turning somersaults within womb.
‖Varices of pregnant women.
‖Disposition to miscarriage; moles.
‖Long continued uterine hemorrhage, before or after abortion.
‖During labor pains must keep in constant motion; walks the room weeping; labor pains run upward; > by placing foot against a support and pressing and relaxing alternately, so as to agitate whole body.
‖‖When lying in bed feels as if she would die from weakness; lower jaw drops; breathing slow and through mouth; eyes half open; when walking is obliged to let her hands hang down; bones of lower extremities painful; sudden weakness coming on, even when sitting. θLabor.
‖Spasmodic contractions of cervix, pains unbearable, with jactitatory movements of body, " dancing up and down " during pains. θLabor pains.
‖Three days after fifth confinement, abdomen enormously distended; pulse small, not rapid; awoke about midnight from suffocation, with congestive headache; head seemed as if it would burst, nose bled a little; feet cold, lochia stopped; aphthæ after every confinement; rapid labors.

Google

▮Feels as though hot balls dropped from each breast through to back, rolling down back, along each leg and dropping off heels; this alternated with sensation as if balls of ice followed same course. θChildbed fever.

▮Swelling of foot and limb; saphena vein swollen very large and very tender, can be distinctly traced all the way up. θPhlegmasia dolens.

▮Child draws so much blood from nipples that when it vomits it seems to be vomiting blood.

▮Stitches and burning pains in nipples and discharge from them of blood and water.

Voice and Larynx. Trachea and Bronchia. ▮Hoarseness: feeble, husky voice; dryness in windpipe; remaining after croup; loose cough by day, suffocating spells at night.

▮▮In last stage of croup, loose cough in daytime and suffocative fits at night; in general, suffocative paroxysms alternating with free intervals. θCroup.

▮▮Formication in windpipe at night.

▮▮Every evening constant tickling in throat. θChronic bronchitis.

▮Bronchitis: with hepatic disturbances; accompanying influenza; febrile chill with wheezing, particularly on expiration; lemon colored expectoration; pressure in stomach and liver; continual pain under r. ribs and in epigastrium, with yellowish color of face; greyish yellow or dirty expectoration, with stertor and stitches in chest; respiration short before and during paroxysms of coughing; as soon as cough ceases respiration is more normal; in old people, with threatened paralysis of lungs.

Respiration. ▮▮Child wants to yawn, but cannot, this makes it cry.

▮▮Shortness of breath: during sleep (lung affections); from every exertion.

▮Oppression of breathing: < walking in open air, with weakness; < from deep breathing.

▮▮Difficult respiration: as if he had inhaled sulphur fumes; as if chest was constricted by cramps; < lying on back.

▮Whizzing breathing in daytime, with sensation of too much mucus in chest; loud rattling.

▮Likes to go about without any covering on head; desire for open air; anxiety during stormy weather; general aggravation at time of menses, which have been absent for six years; depression of spirits; when alone, fearful despondent, lachrymose. θDyspnœa.

Cough. ▮▮Irritation from deep breathing, from stretching out throat and empty swallowing.

Google

Cough: hard and dry, day and night, with painfulness of head and region of stomach; from irritation in trachea, as from fumes of sulphur; day and night, in feeble, emaciated boys; with difficult respiration; tight, affecting stomach and diaphragm, mostly before sunset; at night, with some expectoration; very overpowering in evening before going to sleep, as if larynx was tickled with a feather, with scanty expectoration; with thick expectoration; loose, rattling, expectoration not easy, remains in lungs tenaciously; sputa thick, yellowish, greenish.

Cough <: from 4 to 8 P.M.; on alternate days; from exertion; from stretching arms out; stooping or lying down; lying on (l.) side; from eating and drinking cold things; in wind or in warm room.

Cough >: lying on back or sitting up.

With cough, shattering as from a shock in temples, and at same time in chest.

Cough dry and hoarse, day and night; coughs also in his sleep, then violent dry cough in morning; great emaciation. θCough from bronchial irritation.

Cough almost continual, night and day, a deep short cough, with occasional expectoration during day of thick grey matter, in morning greenish and more profuse; hoarseness and dyspnœa, constant desire to clear trachea; cannot lie on sides, especially l.; dulness in upper part of l. lung and mucous rattling during respiration; upper part of lung impervious to air, except on full inspiration, when there is a prolonged paroxysm of coughing; irregular flushes of heat, with circumscribed redness of cheeks and a slight night sweat; weariness, limbs feel heavy; easily fatigued and out of breath; mind cheerful. θChronic cough.

After neglected pneumonia: cough, shortness of breath, profuse, thick greenish yellow, salty, very offensive expectoration and rattling chest.

Sputa: thick yellow, purulent; greyish yellow or dirty; fetid pus or mucus streaked with blood; green in morning; tasting salty; bloody; small greenish yellow masses of mucus; pieces of granular mucus; tastes like old cheese; large quantities of pus.

Inner Chest and Lungs. Oppression of chest: with shortness of breathing; < in open air and after eating; as if too full; with a feeling of internal rawness; tearing under clavicles, tension.

Sensation as if lungs were full of mucus; whistling sound in trachea on inspiration.

Aching with or without soreness, producing dyspnœa and much mental depression.

Google

Dull aching pain all over lungs, as if they had been overworked, with feeling of constriction of chest as from a tight waistcoat.

Stitches in l. side of chest, also during inspiration, and extending to back.

Cutting pains from l. scapula into chest, catching breath; feels very ill and exhausted, intolerable thirst at 4 P.M.

Feeling of continuous pressure in l. chest.

Tension as of a hoop on chest.

Bolstered up in bed; face bluish white; nose pinched; eyes staring; great dyspnœa; rattling and fine crepitation in both lungs; cough, which had been persistent, had ceased; mouth and throat filled with ropy mucus; loss of voice, tongue dark red, with an ulcer size of Lima bean, in centre; temperature 103.7; respiration 60; pulse 145; soreness all over; eleven very offensive and watery stools during last twelve hours; no appetite; little thirst. θBroncho-pneumonia.

Catarrh on chest of infants; rattling on chest, which seems full of mucus.

Persistent catarrh: with much general weakness, takes cold easily; cold air chills him through and through; copious expectoration.

Dilatation of air tubes; senile catarrh.

Pneumonia, r. side; extensive infiltration; respiration wanting.

Nervous irritability; no heat of head or redness of face; circumscribed redness of cheeks; great debility; sweat without relief; red, dry tongue; frequent irritation to cough, with scanty, difficult grey expectoration; rattling on chest; dyspnœa, with anxious expression. θPneumonia.

Lies on l. side, legs drawn up and abdominal muscles relaxed; countenance anxious; respirations 50 to 60 per minute; skin burning hot; tongue coated brown, red at tip and margins; nostrils in rapid fanlike motion; answers quick, anxious and tremulous; mind wandering; great sensitiveness to pressure over r. side of chest, particularly over liver, extending also over abdomen; pulse 120 to 130; great thirst; cough frequent and hacking, provoked by putting tongue far out; expectoration streaked with blood, rusty and tenacious; extensive bronchophony, extending to under r. shoulder blade; crepitation, absence of vesicular breathing. θPneumonia.

Slight fever, no pain; not much cough; expectoration scanty, grey; extreme dyspnœa on taking least exercise; l. lung hepatized from apex to base. θLatent pneumonia.

Google

‖Right side most affected, sounding as if entire parenchyma were softened; raises a whole mouthful of mucus at a time, of light rusty color, stringy and easily separated; fanlike motion of alae nasi. θPneumonia.

‖Cough < from 4 to 6 P.M.; pale face and deep wrinkles, but debility not so great as he fancies; when he gets up and stirs about it is not so bad as he thinks. θPneumonia.

‖Neglected pneumonia; especially with continuing hepatization and purulent sputum; typhoid pneumonia.

‖‖Pneumonia, with raising of mouthfuls of mucus at a time, of a light rust color, stringy and easily separated.

‖Much pain in lungs; severe hacking cough; eyes bright and glassy; sunken cheeks; fever fits, with bright red spots on cheeks; very restless at night; profuse night sweats; dull sound to percussion over apices of lungs; at 4 P.M. each day has a fever fit and is much worse. θPulmonary disease.

‖After pneumonia, threatened phthisis; great debility; voice weak, can utter only a few words at a time; cannot take a deep breath; severe cough day and night, with profuse expectoration; hectic fever with clammy night sweats.

‖After typhoid pneumonia, threatened phthisis; suspicious cough profuse with expectoration of pus; burning heat in palms of hands; circumscribed redness of cheeks.

‖Chronic inflammatory condition of anterior portion of l. lung; threatened tuberculosis.

‖Face pale, sunken; severe hiccough about every half hour; much sneezing; violent cough day and night, with copious greenish white expectoration, oppressed breathing, must rest in sitting posture; profuse night sweats over whole body, < at night, and somewhat offensive on chest and back. θPhthisis pituitosa.

‖‖Threatened paralysis of lungs.

‖‖Hydrothorax.

‖Chronic affection of diaphragm, probably due to inflammation.

‖Sense of constriction from r. side all around short ribs; cannot stretch himself, or lie on back, or stand upright. θDiaphragmitis.

[20] **Heart, Pulse and Circulation.** ‖Palpitation, evening, in bed; anxious at night on turning over in bed; < after eating, during digestion.

‖Heart's action muffled and indistinct. θAlbuminuria.

‖‖Hydropericardium.

‖Cramp and constriction in chest, cannot get breath; stitches beneath short ribs, extending to small of back

Google

and shoulders; sharp pains shooting into heart; sensation of stoppage of circulation at night, with fright and then sweat; pulse quick and unsteady. θAngina pectoris.

‖Dyspnœa and sudden cyanosis on sitting down; hasty eating and drinking; transient attacks of colic; two pappy stools in evening before going to bed; lies upon r. side, but always finds himself upon back when waking up. θHeart affection.

‖Rheumatic fever, with severe cardiac complications; intense dyspnœa; dilatation of alæ nasi; great flatulence; epigastric constriction; profuse sour sweats.

‖Typhoid symptoms; neck drawn towards r. side; trembling palpitation; pulsating tearing in region of heart; stitches in l. side of chest. θHeart disease.

‖Excitement of circulation, in evening, with restlessness and trembling.

| |Pulse unaltered; accelerated only after eating or in evening.

‖Sensation as if circulation stood still, or ebullitions of blood.

‖Acceleration of pulse, with coldness of face and feet. θPernicious intermittents and other diseases.

30 **Outer Chest.** ‖Brownish yellow spots on chest; liver spots.

| |Tearing and tension under clavicles, and stitch on deep inspiration.

‖Hard lump in l. breast and beneath arm, with burning pain (after *Laches.*). θCancer.

| |Itching on chest.

31 **Neck and Back.** ‖One side of neck stiff and swollen.

‖‖Stiffness of l. side of neck, head drawn to l. side. θTorticollis.

‖Tensive pain and stiffness in nape of neck and shoulders.

| |Pressure in a small spot in nape of neck.

| |Darting in r. cervical muscles from below upward.

| |Sensation in back of neck as if cords were breaking.

‖Carotid aneurism.

‖Bronchocele on r. side, tense, smooth, shining appearance, with feeling of constriction in tumor, as if held in some unyielding envelope, while not very large.

‖After catching cold, swelling on neck, followed by suppuration, thereupon formation of callous, fistulous openings, from which oozed a serous discharge.

‖Large clusters of red pimples around neck, with violent itching.

‖Swelling of cervical glands.

‖‖Burning as from hot coals between scapulæ, < in Summer.

Google

Rising of warmth along spine.
Drawing and aching between scapulæ.
Sticking pain in back, extending to r. scapula.
Drawing sticking pain in back.
Throbbing and pulsating in back; chilliness.
Severe backache > by passing urine.
Pain in back and r. side, from congestion of liver.
Violent pain in small of back in morning on rising from bed, so that she was unable to move, during menses.
Pain in small of back, while lying on back, with great weariness, going down to feet; violent while sitting, not allowing to straighten one's self.
Stitches in back towards small of back, when sitting.
Pain in small of back as if it would break; with hard stool and colic as if intestines would burst.
Pain in small of back and stitches in both hips and in l. chest at night.
Pain and stiffness in small of back (at night).
Stitches in small of back, especially when rising from stooping.
Pain in small of back, extending into thighs.
Pain in sacral region, < rising from a seat.
Sensation as if flesh was loose on lower part of back.
Tearing in sacrum, kidneys and back, especially near spine.
Lumbago if *Bryonia* has not sufficiently relieved and pain is < from slightest motion.

Upper Limbs. Axillary glands swollen; fetid sweat in axillæ.
Boils in and about axillæ; scurfy, itching, moist herpetic eruption; pus continues to discharge from boils for an unusually long time, they no sooner heal than fresh ones appear.
Rheumatic tension in r. shoulder joint.
Tearing pains: in shoulder and elbow joints during rest, not in motion; from neck to elbow, also in whole arm; in hands, only while in bed.
Pain as from bruises in scapulæ, shoulders and upper arms, < when at rest.
Twitching in arms and shoulders.
Arms and fingers go to sleep easily; numbness of hands.
Pain in bones of arms at night.
Weakness of arms when at work, and conversely they feel powerless, yet he can work.
Great dryness of hands, especially of palms.
Drawing pain in inner surface of upper arms; extending over elbows along forearms and wrists.
Pain as from a sprain in r. wrist joint.

Google

| | Inflammatory redness in all finger joints.
▮ Finger joints much distorted and filled with chalk deposits; profuse, icy cold sweat of affected hands and fingers to extent of several drops a minute, and this in hottest day of July. θChronic rheumatic gout.
| | Small boils on hands.
▮ Inflammation extending over whole hand; bluish red swelling; bluish blisters filled with red or yellow fluid. θPanaritium. θChilblains.
▮ Hands constantly hot, which is very troublesome to her.
▮ Hands feel numb, dull tingling as if they had been asleep; sensation of heaviness and feeling of enlargement of hands; almost everything, even hot things, feel cold to touch; when writing or driving, the pen or reins drop from hands unnoticed; no loss of motor power. θAnæsthesia of hands.
| | Warts on fingers, hands and arms.
▮ Great dryness of skin of hands.
| | Itching pimples on hands.
| | White scaly tetter on back of hand and fingers.
▮ Psoriasis palmaris.
▮ Stiffness of fingers from arthritic nodosities.
| | Itching pimples between fingers.
▮ Felons with many constitutional symptoms; panaritium, with gastric affections.
▮ Hands swollen and hard; fingers swollen stiff and extended; back of hand dark red and burning hot, palm of hand greyish yellow, irregularly swollen, hard and covered with small ulcers; large, painful, hard, hot swelling between index and middle fingers, stitches like a thorn on touch; face pale, greyish yellow; expression of eyes dull; somnolent; about 1 or 2 P.M., coldness of feet extending over ankles, as if standing in cold water, followed by chilliness up legs, extending into back; heaviness and confusion of head, with vertigo and pressing stitching pain in forehead, extending over whole head, particularly in vertex and occiput, with constant roaring in ears; in nape of neck and shoulders frequent tearing, pressing pains, with oppression and shortness of breath, particularly when lying; dry cough; in morning, yellow expectoration, in which there are often small particles like rice, or lumps as large as a pea, pearly in color. θRheumatism.

[53] **Lower Limbs.** ▮ Boils on nates.
▮ Suppurative stage, when wounds are very irritable; burning pains. θHip disease.
▮ Coxalgia, with violent jerks of limbs; child awakens cross, or with a scream.

Google

Pains in l. hip joint on motion.
Pains as from a sprain in hip.
Rheumatic tension in l. hip.
Frequent jerking of lower limbs, mostly with a groan, awake or slumbering.
Neuralgia of extremities.
Sciatica: chronic cases; burning and stinging pains, with complete intermissions; stiffness and weakness of affected limbs; < by rest and slightly > by motion; painful muscular twitchings.
Every four days: pain in leg from hip to foot, causing limping.
Limbs go to sleep easily.
Tearing in middle of r. thigh.
Feeling of soreness on inner surface of l. thigh, with some biting itching, extending to genitals.
Smarting pain, and a feeling as if rubbed sore, in skin of thigh, after walking.
Several brown spots on inner surface of thighs, close to scrotum, extending from inguinal canal to perineum; next day spots inflamed, fiery red, swollen, with violent burning pain, especially when touched and walking.
Tightness during night in old ulcers of lower parts of thighs.
Knee: swollen and stiff; swollen with sweating; white swelling; swelling with perspiration.
Stiffness in hollows of knees, as if from a long walk, in morning on rising.
On sitting down feels very stiff, particularly in knee joints; great tremor on standing a while; difficulty in passing water, has to wait a long time before urine flows; general symptoms < about 3 P.M. θChronic rheumatism.
Severe drawing pain in front of legs, from knee down to instep, attack coming on every night when she became warm in bed; sensation of great heat in affected parts; restlessness preventing sleep; similar pain in forehead and occiput; > during day; probably caused by living in a damp house. θIntermittent rheumatic pains.
Tearing pains; swelling and heat in knees and ankles, with swelling of feet and tearing pain in l. heel; stiffness in knees and weakness of affected limbs; < at night; chilliness alternating with heat; tongue furrowed; sweet taste; no thirst; high colored urine; stitching in r. hip; pains < from motion. θRheumatism.
Pain as from contraction in calves when walking (cramp), or at night; cramp in toes.
Oozing of water from sore places in œdematous legs.

Google

Old ulcers on legs, with nightly tearing, burning and itching.

Varicose veins on legs.

Herpes on tibia.

After injury to ankle, half year ago, slight wound of skin near inner malleolus, followed by ulceration, gradually extending in depth and circumference until whole ankle became affected; hard callous edges; offensive, impure, ichorous discharge; severe burning pains < at night in bed.

Feet feel as if dead or asleep.

One foot hot, the other cold, or cold sweaty feet.

Feet habitually cold; cold sweat makes them sore.

Profuse, fetid foot sweat; burning of soles; feet sore.

Œdema of feet; œdema rises until ascites forms.

Swelling of l. foot, with stitches in toes on stepping.

Capillary network on dorsum of foot.

Tearing pain through r. instep at 8 P.M., usually lasts till midnight.

Swelling of soles; they pain when walking.

Fissures on heels, with oozing of water from sore places.

Cramp in toes.

Stitches: in big toe of r. foot (in evening); in corns, with sore feeling.

Worse on beginning to walk (stiffness); > continuing to walk, child wants to be carried.

Since birth, soreness between thighs, so that he never yet has attempted to walk, although four years old; scrofulous in highest degree; never had least desire to drink; between 3 and 4 P.M., irritability of whole nervous system, with crying spells on account of pain in l. ankle, where bones were softened and discharging a saffron yellow water, with tendency to suppuration; face covered with freckles; everything tasted salty to him. θRachitis.

Tearing in l. foot, followed by swelling, pain then extending to thigh and finally into r. leg; sleep disturbed; later swelling of l. leg, then of r.; skin of legs feels hard, although swelling is elastic and does not pit upon pressure; no redness; gradually swelling extended up to knees; severe tensive pains in tendons on motion; severe biting pains in legs unless warmly covered; burning in glans penis on urination, lasting several days, then disappearing and reappearing regularly every month; peculiar sensation extending from r. shoulder down to elbow joint, as if arm was dead and without sensation. θRheumatism.

[84] **Limbs in General.** Numbness of limbs, sensation as if circulation ceased.

Google

‖Drawing, tearing in limbs at night, < during rest and on alternate days; muscles and joints rigid, painful with numbness; finger joints inflamed; also with arthritic nodes; swelling of dorsa of feet; rheumatism; < in wet weather; > in warmth.

‖Painful stiffness of muscles and numb sensation in joints.

‖Stiffness in all joints.

‖Cracking of joints when stretched.

‖Joint feels as if encircled by band, or ring.

‖Pain in r. inner ankle, which spreads over foot and up to knee and is felt in l. leg as in r.; ankles and knees stiff, twitching pain on motion; knees weak; pain in chest; thirst every half hour for cold water; skin hot; pulse 90; knees and inner ankles swollen and tender to touch; elbows and shoulders stiff; shooting downward in calves from knees to ankles, first r. then l. θRheumatism.

‖Pain in paroxysms, commencing in r. shoulder and arm, extending down r. side of trunk to hip, shoots across to l. hip and down leg; < on motion; hands and feet generally cold. θRheumatism.

‖Erysipelatous inflammation of a number of ulcers on l. leg; also on r. leg and forearm.

‖Flat, herpetic looking ulcers on foot; on making slightest misstep, severe pain in ankle; constant tensive pain in leg; leg bluish red, not hot to touch.

‖Fissures on hands; also on heels.

‖Alternation of heat and cold in rheumatism, or gouty pains in limbs.

[85] **Rest. Position. Motion.** Fatigue and weakness is felt more during rest than during motion, yet averse to exercise.

Rest: eruptions on legs <; tearing pains in shoulder and elbow joints; in scapulæ, shoulder and upper arms <; sciatica <.

Must rest in sitting posture on account of oppression of breathing.

At ease in no position.

While in bed: tearing pains in upper limbs.

Lying down: headache <; hammering in head >; headache >; pain in epigastrium >; burning sensation up spine; as if something heavy was lying in l. side of abdomen; pain in bladder <; cough <; tearing in head >; chilliness in evening <; in bed, feels as if she would die from weakness.

Lying on back: difficult respiration <; cough >; pain in small of back; most comfortable during fever attacks.

Cannot lie on back: on account of inability to breathe; sense of constriction.

Google

Lies upon r. side, but always finds himself upon back when waking up.
Cannot lie on r. side: pressing pain in region of liver.
Lying on l. side: unbearable from feeling of weight in abdomen; cough <; with legs drawn up.
Cannot lie on sides, especially l.: cough.
Head bent back.
Leaning head backward: throbbing in brain.
Throwing back of head: from shocks of head.
Sitting: as if something heavy was lying on l. side of abdomen; varices painful; pain in perineum; sudden weakness; cough >; dyspnœa and sudden cyanosis; violent pain in small of back; stitches in back; feels very stiff; for a long time, clots of leucorrhœa fall to floor.
Sitting bent over: pain in stomach and region of duodenum <; perforating ulcer (stomach) <; stitches in sides >.
Must sit up: shortness of breath.
Must bend and draw r. leg up with her hands: on account of severe pain in r. groin.
Bending: cramps in stomach >; tensive aching in hypochondria <.
Stooping: pressing pain in head <; pressure through vagina; cough <.
Raising himself in bed: congestion of blood to head.
Rising up: headache <; vertigo; violent pain in small of back in morning.
Rising from a seat: pain in sacral region <; impossible, severe pain in r. groin.
Rising from stooping: brain as if vacillating <.
Standing: causes tremor.
When tongue is put out it rolls from side to side.
Stretching of throat: causes irritation.
Cannot stretch or stand upright: tension in diaphragm.
Placing foot against support and pressing and relaxing alternately so as to agitate whole body: during labor pains.
Stretching arms out: cough <.
When stretched: joints crack.
On turning over in bed: palpitation.
Least exertion: sweat.
Motion: throbbing headache; shortness of breath <; tearing pains in ankles; pain in l. hip joint; sciatica slightly >; tearing pain <; twitching pain in lower limbs; of r. leg eases pain in r. groin.
Must keep in constant motion: during labor pains.
Unable to move: from violent pain in small of back.

Digitized by Google

When he gets up and stirs about: debility not so bad as he thinks.
Stepping: stitches in toes.
At every step: shattered and concussed feeling in head.
Stepping hard: shaking in head.
Walking: brain as if vacillating <; eruption on legs >; perforating ulcer (stomach) >; as if something heavy was lying on l. side of abdomen; rumbling and gurgling in abdomen; pain in groin; must let her hands hang down; oppression of breathing <; smarting pain and soreness in skin of thigh; spots on inner surface of thighs pain; pain in calves; soles pain; at first stiffness <, after continuing >; a few steps, pain in groin ceases.
Cannot walk erect, must go bent over or lie down: severe pressure in abdomen.
On making slightest misstep: severe pain in ankle.
Physical exertion: brings on attacks of pain in epigastrium; shortness of breath; cough <.
Going up stairs: brain as if vacillating <.
Rolls about on floor with pain.
When writing or driving: pen or reins drop from hands unnoticed.
Horseback riding: bearing down over bladder >.
Great aversion to exercise.
No power to raise arms and move hands.

[36] **Nerves.** Causes depression of nearly all functions.
Great tendency to start; feels frightened at everything, even ringing of door bell.
Involuntary alternate extension and contraction of muscles.
Debility, felt most while at rest; aversion to exercise.
Numbness and twitching through body and limbs.
Fruitless efforts to yawn.
Jerking and twitching of single limbs or whole body, sleeping or waking; subsultus tendinum.
Pains drawing, tearing < at night; muscles and joints rigid; sensation of torpor in affected part.
Spasms (epileptic) with screaming, foaming at mouth, unconsciousness, throwing arms about, cardiac anguish; imagines he will die.
Lassitude; unrefreshing sleep; falls asleep too late and awakens too early; sleep full of dreams which she cannot recollect; cold hands and feet; flushes of heat; thirst; profuse sour sweat in morning; fearful, depressed, despondent, indifferent, with satiety of life, particularly in company; activity of mind impaired; frequent stitching or tearing in forehead, vertex or sides of head, >

Google

lying down and by pressure; falling out of hair; eyes appear too large; vision dim, sees as through a veil; occasional roaring in ears and fluent coryza; sensation of dryness in nose, throat and mouth; tongue coated; appetite impaired; belching; stitches in sides, > bending double; stool hard every two or three days; menses regular, too profuse. θHysteria.

Seven months pregnant; carbuncle on chin very painful, causing trismus; pulse frequent; skin hot, moist; teeth shut tightly; head drawn to r. side.

Tetanus.

Great weakness with chronic catarrhs.

Nervous excitement; prostration of mind and body; nervous debility.

Great emaciation and internal debility.

Excessive and frequent secretion of pale urine, and profuse leucorrhœa, causing debility; discharge comes away in a gush, and when she sits for a long time, clots fall to floor; cannot rise from seat on account of severe pain in r. groin; must bend and draw up r. leg with her hands, and after moving it to and fro she can rise, after walking a few steps the pain ceases.

Paralysis.

Formication of affected limbs.

♂ **Sleep.** Much and frequent yawning; fruitless attempts.

Irresistible sleepiness after meals.

Sleepy during day, wakeful at night, mind too active.

Lies long in evening unable to go to sleep.

Child sleeps with half open eyes and throws head from side to side, with moaning.

Sopor in typhoid and exanthematous fevers; impending paralysis of brain.

Sleep restless; at ease in no position; cries out, starts; jerking of limbs; unrefreshing; full of phantasies; wakes very often; quite wide awake at 4 A.M.; child groans in sleep or springs up terrified and screaming, and is angry and cross, striking, kicking and scratching everyone who approaches; great excitement; starts up full of anxiety, wishes to cry out but cannot, as in nightmare; crying, with unintelligible words; frequently laughs aloud in sleep; moaning.

Dreams: confused; anxious; vivid, anxious; frightful, frequently awakening him; horrid; of sickness; moving, etc.; of trees growing on fences without ground under them; of people drowning, boats capsizing, etc.

On awaking: cross, kicks, scolds; or awakes terrified, as if dreaming; feels unrefreshed; hungry when awaking at night.

Google

Awakes as though frightened by a bad dream; apparently continues to dream after waking, cannot be pacified, and cannot bear to be left alone; frequent jerking of limbs, or even whole body, whether awake or sleeping.

Children sleep apparently soundly, but scream out suddenly in sleep, stare about and cannot easily be pacified.

Sleep at night very full of dreams, which are fatiguing, with perspiration on waking.

Baby cries all day and sleeps all night.

[88] **Time.** Morning: satiety of life <; congestion of blood to head; eyes smart; bad taste in mouth; dryness of tongue; putrid smell from mouth; thick, yellow and greenish expectoration; bitter taste; nausea; violent dry cough; expectoration greenish; violent pain in small of back; on rising, stiffness of knees; sour sweat; chilliness on awaking; early sweat; sweat over whole body.

In forenoon: vertigo.

Day: tearing pain in forehead; throbbing in brain; photophobia; agglutination and lachrymation; belching with burning; loose cough; whizzing breathing; dry, hard cough; occasional expectoration; much sneezing and violent cough; pain in front of legs >; sleepy; cries; skin itches and bites.

In afternoon: frequent epistaxis; pain in l. hypochondriac region; colicky pains; stitching headache.

At 3 P.M.: general symptoms <; chilly in back.

4 P.M.: cannot see after that time; ulcerated sore throat <; swollen, congested sore throat <; great prostration; symptoms of diphtheria <; excessive flatulence <; dribbling of urine from bladder; intolerable thirst; chill, lasting ten minutes; chill, lasting two hours; intense heat.

From 4 to 8 P.M.: weeping <; stupefying headache; pressing headache in vertex <; cough <; chill; fever <; general aggravation.

From 4.45 to 6.30 P.M.: quotidian ague.

At 5 P.M.: chilliness all over body; chill, lasting nearly all night.

At 6 P.M.: chilliness starting from back, with stupefying sleep; over whole body; tearing in limbs; no thirst; no sweat.

At 7 P.M.: hands and feet icy cold; one sided chill (left).

At 7.30 P.M.: cannot see after that time, from February to July each year.

At 8 P.M.: tearing pain in r. instep, usually lasts till midnight.

After 8 P.M.: feels > but weak.

At 9 A.M.: chilly and weak.

Google

Evening: fear of phantoms; dryness of eyes; stitches and soreness of eyes; pressure in stomach; chilliness, lassitude; early, colicky pains; itching and tension at anus; cough very overpowering; palpitation; two pappy stools; excitement of circulation, with restlessness and trembling; pulse accelerated; stitches in toes; lies long unable to go to sleep; chilliness <; chill.

Night: tearing pain in forehead; violent headache; eruption on scalp <; blindness; dryness of eyes; cannot get breath; rubs nose; toothache; restless; drinks little but often; pain in stomach >; action of kidneys disturbing at night; rumbling in bowels; itching of ulcers <; sleep disturbed; sweat; wakes cross and hungry; aching and pressure in rectum <; frequently compelled to rise to urinate; pain in bladder <; urine pale; chill and heat; suffocating spells; formication in windpipe; dry, hard cough; cough, with some expectoration; very restless; profuse sweats; much sneezing and violent cough; anxious palpitation, as if circulation stopped; stitches in l. chest; pain and stiffness in small of back; pain in bones of arms; tightness in old ulcers on thighs; stiffness in knees and weakness of affected limbs <; cramp in calves; wakeful; awakes hungry; sleep full of dreams; heat, with great thirst and restless sleep; clammy sweat; stitching headache.

About midnight: awoke from suffocation with congestive headache.

[39] **Temperature and Weather.** ‖Desire for open air.

In open air: nausea passes off; walking, oppression of breathing <.

In open, cold air and uncovering head: headache >; chilled through and through.

Inclination to uncover: likes to go without any covering on head.

Warmth: eruption on scalp <; toothache >; rheumatism >; makes skin itch and bite.

Warmth of bed: headache <; toothache >; perforating ulcer (stomach) >; pain on front of legs, at night; does not > for two hours.

Warm room: cough <; cannot tolerate, during febrile attack wishes windows and doors open day and night.

Getting warm from walking: headache <; itching of scalp <.

Warm food: aversion to.

From warm drinks: pain in throat >; relieve.

Heat: chilliness not >.

In hot room: vertigo.

Hot applications: eruption on legs <.

Google

Hot brandy and water: pains at epigastrium >.
Even hot things feel cold to touch.
Cold articles of diet: diarrhœa <; cough <; longing for.
From cold drinks: diphtheritic patches <; pain in throat; nausea <; cough <.
Cold water applications: eruption on legs >.
Drinking cold water: caused diarrhœa.
Wet weather: rheumatism <.
Stormy weather: anxiety.
Windy weather: cough <.
Living in damp house: intermittent, rheumatic pains.
Aggravation from moistening diseased parts.

[40] **Fever.** ▮Want of animal heat.

▮Chilliness: day before menstruation; on awaking in morning, followed by great heat; constantly increasing, without heat or sweat; all over, at 9 A.M., even heat from stove will not warm; in back at 3 P.M., still < in evening after lying down, lasting a quarter of an hour, with cold feet, without subsequent heat or sweat; over whole body at 5 P.M.; at 6 P.M., starting from back, with a feeling as if water was spurted upon back; at 6 P.M., with stupefying sleep, followed by uneasy sleep, interrupted by heavy dreams; at 6 P.M., over whole body, with stupefaction, sleepiness, tearing in limbs, no thirst, no sweat.

▮Chill: from 4 to 8 P.M., with numb hands and feet, icy cold at 7 P.M.; on awaking from a dreamy sleep, covered with sweat; afterwards violent thirst; one sided (l.) at 7 P.M., commencing in back, with numb, icy cold hands and feet, cannot get warm in bed for two hours, tearing in limbs, yawning, nausea and inclination to vomit; icy coldness as if lying on ice; creeping on back in evening; in evening, in bed, preventing sleep; followed by sweat without intervening heat; followed by bloated face and hands; alternating with heat.

▮▮Sour vomiting between chill and heat.

▮Heat: of head, also after eating, and red spot on l. cheek; frequent flushes in face; in face, eyes and palms of hands; with inclination to uncover; with redness of face; rising from abdomen to head, with burning in cheeks; flushes over whole body, mostly towards evening; with frequent drinking of small quantities at a time; with constipation and increased micturition; at night, with great thirst and restless sleep; with red cheeks, alternating with chilliness; hectic fever, with suppuration of lungs.

▮Sour vomiting in or during entire hot stage. θAgue.

▮▮Sweat: immediately after chill, without intervening heat;

Digitized by Google

from least exertion; most profuse on face; about scalp and temples; on chest and trunk; at night or early in morning; sourish, acrid; profuse, sour smelling, on body, not on legs; in morning over whole body, smelling of blood; cold, sour, offensive, bloody, or smelling like onions; clammy at night, with coldness of face; fetid, in axillæ and of feet, with burning of soles, in women suffering from chronic endo-metritis and disordered vaginal discharges.

‖Thirst after sweating stage.

‖Nausea and vomiting, then chill, followed by sweat, without intervening heat; or sour vomiting between chill and heat.

‖Febrile attack every afternoon at 4 o'clock; head hot; room is too warm, opens windows and doors; some thirst; loss of appetite; constipation; violent cough; since childbirth two weeks previously.

‖At 4 P.M. chill, lasting about ten minutes, followed by intense heat, with little sweat and severe headache and pulsating in temples; heat lasts until afternoon of next day, and reappears in afternoon of third day; during heat restless, wants all the windows and doors open; great thirst; tongue white, with red edges; at first constipated, later four to five thin stools every day; three days after parturition.

‖Since second day after parturition, which occurred eleven weeks ago, daily attacks of fever at 4 P.M.; occasional chilliness, generally dry heat, lasts several hours and is followed by sweat, which continues throughout whole night; on making any motion in bed, sweat disappears and is replaced by heat; in morning, cold and chilly; moderate thirst; during fever, slight pain in occiput; cold feet, shortness of breath, desire to lie uncovered upon back and with head elevated; stool regular; urine like turbid beer.

‖Chill, 5 P.M., lasting nearly all night; headache; dryness of mouth, without disposition to drink; very hot during fever; urine copious; no sweat; pain flying all through him; œdematous swelling < about face and hands.

‖Paroxysms commence between 4 and 8 P.M.; sometimes with chill, again without; thirsty or not; sleepy; fever lasts till midnight or 2 A.M., generally followed by sweat. θEpidemic intermittent.

‖Quotidian ague, from 4.45 to 6.30 P.M.; half an hour before chill, calves get cold; chill lasts nineteen minutes; headache, nausea, light sensation about heart, sore stomach, slight dyspnœa; sweat not prominent; thirsty; much belching; pain in l. hypochondrium on taking a long breath; urine very red.

Google

Chill on alternate days, about 4 P.M., lasting two hours, followed by more or less fever till bedtime; chill and fever severe; tossing, anxious, hot and restless; heavily loaded urine, pinkish, half floating sediment, and a substance like brick dust; severe pain in renal region, much < if urine is held after desire to urinate appears; > by urination; belches much wind; rumbling of wind causes pain; prostration. θIntermittent.

Circumscribed redness of cheeks; cough, with thick, yellow, salty expectoration. θIntermittent.

Sour eructations, sweet taste, vomiting. θAgue.

Face and hands bloated. θAgue.

Ague coming on every seven days.

Old broken down cases of malaria; chill; sweat greasy.

Sleepy by day, restless, delirious sleep at night, with terrible dreams; crying out and laughing in sleep; evening chill followed by heat, and often offensive, sticky night sweats; anxious, sad, lachrymose; afraid to be alone; tearing, stitching headache in afternoon and at night; beginning paralysis of brain; oversensitiveness of hearing; roaring in ears; grinding of teeth; dryness of mouth without thirst; foul taste in mouth; pressure in stomach in evening; swelling of epigastrium; bloating of abdomen; pulsating and pressing out sensation in abdominal ring; flatulency. θTyphoid.

Stupefaction, murmuring delirium, stammering speech; using wrong words; yellowish face; subsultus tendinum; grasping at flocks; squinting; trembling; meteorism; constipation; dirty, sticky tongue; loose, rattling cough and painful micturition; rash does not appear until fourteenth day, and patient sinks into an unconscious state, with muttering delirium, picking at bedclothes; distended abdomen with great rumbling of flatus; constipation; involuntary urination or retention of urine; if urine is passed in bed it leaves reddish, sandy deposit. θTyphoid.

Tongue seems swollen, cannot protrude it, or when it is put out, it rolls from side to side, like a pendulum; tongue dry and has blisters on it. θTyphoid.

Typhoid fever; awakes from sleep peevish; scolding, crying and bad behavior.

Impending paralysis of brain; lies in stupor; eyes do not react to light and have fishy look; lower jaw dropped; breathing, snoring and rattling, mucous rattle as air goes in and out of lungs; urine involuntary or suppressed; pulse intermittent and rapid. θTyphoid.

Cold hands and feet, and general want of bodily heat. θTyphoid.

Google

Fever accompanied by great reflex nervous irritability; alternating chill and heat; sensorial irritability without very hot head or symptoms of congestion; circumscribed red cheeks, red, dry tongue; constipation.

Fever during catarrhal croupous pneumonia; intense heat, 4 P.M.; great restlessness and sleeplessness.

Febrile attacks during tuberculosis; cannot tolerate a warm room, wishes windows and doors open day and night; fever < 4 to 8 P.M., restless until midnight; lies best when on back.

Attacks, Periodicity. Faintish at certain hours in day.

In slow succession: violent stitches in hollow teeth.

For quarter of an hour: syncope; chilliness.

Every half hour: severe hiccough; thirsty for cold water.

After half hour: wakes with palpitation.

One hour after eating: nausea and vomiting.

For two hours after eating: spits up food.

For several hours: cannot make least movement on account of persistence of pain in rectum.

Before sunset: tight respiration.

During last twelve hours: eleven stools.

Once or twice daily: attacks of severe pain in stomach.

Daily: four to six painless, yellow, watery, undigested stools; between 3 and 4 P.M., one or two thin stools; drinks twenty-two tumblerfuls of water; deposit of large clots of blood in urine; at 4 P.M. has a fever fit and is much <; four or five thin stools.

Every morning at 2 or 3: severe pains at epigastrium.

Every afternoon: screaming spells; dribbling of urine from bladder; at 4 o'clock, febrile attack; 4 to 8 P.M., general aggravation.

Every evening: dribbling of urine from bladder; constant tickling in throat.

Every night: agglutination of lids; tickling cough; closure of nasal openings; severe pain down front of legs.

On alternate days: cough <; chill about 4 P.M.

Since second day after parturition, eleven weeks ago: daily attacks of fever at 4 P.M.

At 4 P.M.: chill; heat lasts until afternoon of next day and reappears in afternoon of third day.

Every two or three days: stools hard.

Three days after fifth confinement: abdomen enormously distended.

Every four days: pain in leg from hip to foot.

For four days: inflammation of tonsil and fauces.

Every five or six days: violent spasms in abdomen.

Every six or eight days: menses reappear.

Every seven days: ague coming on.

Google

During menses: pain in temples; nausea.
Before full moon: leucorrhœa <.
Each year from February to July: hypermetropic.
In Summer: burning between scapulæ <.
For one year: menses absent.
For several years: attacks of pain in stomach.
Four years: chronic diarrhœa.
For six years: menses absent.

[42] **Locality and Direction.** Right: pupil dilated; hammering pain in side of head; stitches < in temple; head drawn to side; eye, dim sight <; redness and swelling of lids; polypus growing from outer canthus of eye; tearing in meatus; ichorous discharge begins in nostril; pain in malar bones; pain in side of face and temple; eruption on cheek; stitches in region of parotid; soreness begins on side of throat; swelling of cervical glands; diphtheria <; swelling of tonsil, also neck; greyish spots on tonsil; deposit covers whole tonsil; discharge from ear; cannot lie on side; pressive pain in hypochondrium; pain in side; pain in shoulder and arm; when turning on side a hard body seems to roll from navel to that side; colicky pains in side of abdomen; hardness on side; hernia; pain concentrated on side near hip; stiffness in renal region < on side; renal colic in ureter; large goitre on side; continued pain under ribs and in epigastrium; pneumonia; great sensitiveness to pressure over side of chest; bronchophony extending to under shoulder blade; sense of constriction from side all around short ribs; neck drawn to side; darting in cervical muscles; bronchocele on side; pain from back to scapula; rheumatic tension in shoulder joint; pain as from a sprain in wrist joint; tearing in middle of thigh; stitching in hip; tearing through instep; in inner ankle, extending over foot up knee; pain in paroxysms, first in shoulder and arm down side of trunk to hip, then across to l. hip; ulcers on leg and forearm; severe pain in groin; eczema on fingers of hand; moist, scald head, most on and behind ear.

Left: sees only l. half of object; pustules on margin of cornea; tearing in meatus; heat in cheek; constant disposition to breaking out on cheek; swelling of throat; swelling of cervical glands; side of face swollen; pains in throat; pemphigus on thumb and third finger; leg covered up to knee with ulcers; pain in hypochondriac region; acute griping in hypochondrium; wind gurgles in hypochondrium; as if something heavy was lying on side of abdomen; stitching in side of chest, in axilla; pain in kidney and ureter; kidney affected; cannot lie

Google

on side; dulness in upper part of lung; stitches on side of chest; cutting pains from scapula to chest; continuous pressure in chest; lung hepatized; chronic inflammatory condition of lung; hard lump in breast; stiffness of side of neck; head drawn to side; pain in hip joint; rheumatic tension in hip; soreness on inner surface of thigh; tearing in heel; swelling of foot, with stitches in toes; pain from r. ankle spreads to leg; ulcers on leg; chill on side; red spot on cheek.

From r. to l.: swelling and suppuration of tonsils; diphtheritic patches spread; cutting pains across abdomen; cutting across hypogastrium; burning or boring stitches in ovaries; shooting from knees to ankles; pain in hips.

From l. to r.: pains in throat.

From within outward: stitches in temples.

From below upward: darting in cervical muscles.

Upward: labor pains run.

[45] **Sensations.** Anxious, as if about to die; as if everything was turning around; as though everything was sinking down in bed; temples as if screwed together; as if bones of skull were being driven asunder, or as if brain was vacillating to and fro; head as if it would burst; pain in head as if caused by wrong position; eyes as if bruised; as of a veil before eyes; as if looking through fine lattice; as if looking through a fog; eyes as if too large; as if dust was in eyes; as if eyes were dry; singing in ears as from boiling water; as if hot blood rushed into ears; as if sulphur vapor was in throat; front teeth as if too long; vesicles on tip of tongue as if scalded and raw; as if a ball rose up in throat; as if entrance of pharynx was constricted; as if a hard body lodged in back part of throat; limbs as if bruised; as if head opened; sensation in stomach as if fasting; belching as if caused by wind in stomach; as if everything was too tight on stomach; as if stomach was pressed together from both sides; fingers as if dead; as if everything eaten was rising up; as if chest would burst; as if œsophagus was being clutched and twisted; as if steam was rising from stomach into head; as if gimlets were running into spine; tension as from a cord in diaphragm; tension as from a hoop in hypochondria; soreness as if from shock in region of liver; as if twenty dogs with sharp teeth were gnawing her; as if something was moving up and down in stomach and bowels; as if a hard body rolled from navel to r. side; as if something heavy was lying on l. side of abdomen; as if heart hung by a thread; as if stomach would fall down; as of drops of water falling down; pain as from a blow in r. hypochon-

driac region; sore aching in region of liver as from a shock; pain as if suppurating in swelling of inguinal gland; back as if broken; as if abdomen was bound up and would burst; noise in abdomen as if small bladders of air were bursting; teeth as if loose; urine as if mingled with brick dust; when lying in bed feels as if she would die from weakness; as if head would burst; as though hot balls dropped from each breast through to back, rolling down back, along each leg and dropping off heels, this alternates with sensation as if balls of ice followed same course; as if he had inhaled sulphur fumes; as if chest was constricted by cramps; as if there was too much mucus in chest; as if larynx was tickled with a feather; shattering as from a shock in temples and chest; chest as if too full; as if lungs had been overworked; constriction as from a tight waistcoat; tension as of a hoop on chest; as if entire parenchyma was softened; as if circulation stood still; as if cords of back of neck were breaking; as if tumor was held in some unyielding envelope; burning as from hot coals between scapulæ; as if small of back would break; colic as if intestines would burst; as if flesh was loose on lower part of back; pain as from bruises in shoulder, scapulæ and upper arms; pain as from a sprain in r. wrist joint; as if hands had been asleep; hands as if enlarged; pain as from a sprain in hip; as if skin of thigh was rubbed sore; feet as if dead or asleep; joints feel as if encircled by band or ring; awakes terrified as if dreaming; as if water was spurted upon back; as if lying on ice; flesh as if struck with a stick.

Pain: above eyes; in temples; in r. side of face, r. temple and parietal bone; in teeth; in throat; all over limbs; on l. side of throat, shifting to r. and up into ear; in tonsils; in small of back; in stomach and region of duodenum; under ribs and all around waist; across stomach and straight down both sides of it; in l. hypochondriac region as if weight like a stone rolled over; in groin; in region of abdominal ring; in anus; in rectum; in l. kidney and ureter; in bowels; in perineum; in abdomen; in loins; in lumbar region and nape of neck; under r. ribs and in epigastrium; in lungs; in small of back, extending into thighs; in sacral region; in bones of arms; in l. hip joint; in leg from hip to foot; in soles; in inner ankle over foot, up to knee and into leg; in chest; in r. shoulder and arm, down r. side of trunk to hip, shoots across to l. hip and down l. leg; flying all through him.

Unbearable pain: in labor.

Google

Intense pain: in abdomen.
Terrible pain: in rectum.
Violent pain: in head; in stomach; in back.
Severe pain: in stomach; in epigastrium; in chest; across bowels; in abdomen; in back; in ankle; in r. groin; in head; in renal region.
Acute pain: in rectum.
Severe spasmodic pains: at epigastrium.
Severe cutting pains: in eyes; across abdomen.
Acute griping pain: in l. hypochondrium.
Sharp pain: in throat; in dorsal hepatic region; in r. shoulder and arm; running around labia; shooting into heart.
Sharp gnawing pain: in region of liver.
Gnawing, griping, cutting pain: in region of stomach.
Tensive, tearing, cutting pains: in abdomen.
Pulsating tearing: in region of heart.
Tearing: in forehead; in r. side of head to neck; in face; in eyes and teeth; in r. and l. meatus; in bones of cheeks; in stomach; over epigastric region; about ribs and sides of abdomen into back; in rectum; in ankles; under clavicles; in sacrum, kidneys and back, especially near spine; in shoulder and elbow joints; from neck to elbow; in arm; in hands; in middle of r. thigh; in l. heel; in old ulcers on legs; through r. instep; in limbs.
Cutting: in rectum and bladder; in glans penis and abdomen; in abdomen; in urethra; across hypogastrium; from scapula into chest.
Lacerating: in lower jaw.
Shooting pain: through head; up shoulder blades; in calves from knees to ankles.
Stitching, tearing: into stomach to back and shoulders; in forehead, vertex or sides of head.
Lacerating stitches: in hernia.
Stitches: in temples; in head; in eyes; in region of r. parotid; over epigastric region and down into abdomen; in teeth; in r. side toward epigastrium; in l. side of chest, extending into abdomen and loins; under short ribs and in middle of chest; in rectum; in bladder; in neck of bladder and anus: in nipples; in chest; in l. side of chest; from under short ribs to small of back and shoulders; in back toward small of back; in shoulders; in l. axilla; in arms; in both hips; in knees and ankles; in toes; in big toe of r. foot; in corns.
Deep seated, stitching pain: in fauces.
Bursting pain: in abdomen.
Lightninglike pains: strike epigastrium, spread like rays over abdomen and shoot into all passages of body.

Google

Hot pains: flash across bowels.
Darting: in r. cervical muscles from below upward.
Twitching pain: in knees.
Pinching, pricking pains: on different parts of skin, sometimes apparently in veins.
Hammering pain: in centre of forehead.
Throbbing: on top of head; in brain; in teeth; in eruption around knees; in forehead; in back.
Stupefying pain: in head.
Cutting soreness: of scalp.
Burning or boring stitches: in ovaries.
Burning pain: between shoulders; in blisters on tongue; on thumb and third finger of l. hand; in stomach; in rectum; in lump in l. breast; in lower limbs; in wounds; in spots on inner surface of thighs; in ankle.
Smarting pain: in eyes; in skin of thigh.
Stinging pain: in throat; in rectum; in lower limbs.
Drawing sticking pain: in back.
Gnawing biting pain: in r. malar bone into sound and affected teeth.
Gnawing, twisting, griping: in epigastrium, stomach and upper abdomen.
Griping and clutching: in epigastrium; in stomach.
Laborlike pains: in abdomen.
Gouty pains: in limbs.
Tensive pain: in nape of neck and shoulders; in leg.
Constrictive pain: in epigastrium; in stomach; of rectum and anus.
Contractive pain: in perineum; in calves.
Compressive pain: in stomach.
Drawing pain: in forehead and occiput; in lower jaw; in abdomen; in all parts of abdomen; in inner surface of upper arms, extending over elbows along forearm and wrists; in front of legs, from knee to instep; in scapulæ; in limbs.
Tearing, boring and scraping: on external head.
Colic: in region of transverse colon; violent near r. hip; violent gall stone colic.
Colicky pains: in r. side of abdomen.
Bearing down; over bladder.
Neuralgia: of vagina; of extremities.
Gnawing: in vagina.
Cramplike pain: in bladder.
Cramps: in abdomen; in stomach; in legs and thighs; in uterus; in small of back; in chest; in toes.
Crampy sensation: upward towards chest.
Pressive pain: in eyes; in hepatic region; in r. hypochondrium; in r. side.

Google

Pressing pain: on vertex; in stomach; in region of liver.
Dull, aching pain: all over lungs.
Dull pain: in forehead; in teeth; in epigastrium; in hypogastrium and loins.
Aching: in back and limbs; of head; in bones; in legs; in rectum; in kidneys; in teeth; in epigastrium; between scapulæ.
Shattered or concussed feeling: in head.
Dull pressing: in region of bladder and abdomen.
Pressure, drawing, griping: in abdomen.
Squeezing pressure: in abdomen.
Pressure: in eyes; in stomach; in liver; in epigastrium; in abdomen; in hepatic region; in præcordia; distressing in rectum; in thighs and head; through vagina; in l. chest; in a small spot in nape of neck.
Rheumatic tension: in r. shoulder joint; in l. hip.
Twisting, crawling and emptiness: in stomach.
Burning: in forehead; in eyes; of eyelids; of face; in mouth; in throat and pharynx; in stomach; in epigastrium, extending into throat; up whole spine; in feet and hands; in umbilical region; at anus; in rectum; in bladder; in palms of hands and soles of feet; during micturition, in urethra; in vagina; in nipples; between scapulæ; in old ulcers on legs; in cheeks.
Burning heat: in palms of hands.
Burning, scalding, itching: of scalp.
Heat: in temples; in ears; in face; of hands; in front of legs; of head; in palms; of eyes.
Biting: at anus.
Smarting: of eyes; of lids.
Pricking: in throat and pharynx.
Sticking: on scrotum; in back, extending to scapulæ.
Twinging: in rectum.
Twitching: in arms and shoulders, in limbs and through body.
Sore aching: in region of liver.
Soreness: of eyes; of chest; of corners of mouth; of throat; of l. tonsil; of meatus; in urethra; between scrotum and thighs; of nipples; all over; of feet.
Painful sensitiveness: of skin; of abdomen.
Painfulness: of bones of lower extremities; of head and stomach; of carbuncle on chin; of liver spots on chest and arms.
Sore sensation: in chest; on inner surface of l. thigh; in corns.
Tenderness: along margin of liver and at epigastrium.
Sensitiveness: of submaxillary glands.
Pressing out sensation: in abdominal ring.

Google

Pressing: in perineum, near anus.
Constriction: in region of submaxillary glands; in stomach; of œsophagus; of anus; of sphincter; from r. side all around short ribs; in chest.
Contraction: in throat.
Spasmodic contraction: of abdomen.
Tension: of abdomen; in liver; beneath stomach; marking diaphragmatic attachments; in hypochondria; at anus; under clavicles.
Tightness: in old ulcers of lower part of thighs.
Fulness: of abdomen; up to throat.
Full feeling: in rectum and bladder.
Jammed feeling: in perineum.
Bloated feeling: in abdomen.
Heavy sensation: in bladder.
Heaviness: of head; of tongue; of stomach; of abdomen; in bladder; of limbs; of hands.
Weight: at stomach.
Oppression: of chest.
Shaking: in head.
Fluttering: at stomach, then all over body.
Pulsation: in abdomen; in back; in temples; in abdominal ring.
Jerking: in urethra; in lower limbs; of single limbs or whole body.
Sensation of churning: in stomach.
Light sensation: about heart.
Anxiety: in epigastrium; in chest.
Distressing feeling: in hepatic region.
Sinking: at stomach.
Rising of warmth: along spine.
Great weariness: in back, going down to feet.
Weakness: in knees, down legs to joints of feet; of arms; of affected lower limb; of knees.
Stiffness: in renal region; of l. side of neck; in nape of neck and shoulders; in small of back; in affected lower limbs; in knees; in hollow of knees; in knee joints; painful in muscles; in all joints; of elbows and shoulders.
Numbness: in feet and hands; of limbs; in joints; through body.
Dryness: of mouth; of lips; of eyes; of nose; of posterior nares; of tongue; of vagina; in windpipe; of hands, especially of palms; of skin of hands.
Tickling: in throat.
Dull tingling: in hands.
Formication: in windpipe; of affected limb.
Itching: of scalp; of crust on head; of eyes; of canthi; in ear; of eruption on cheek; of eruption on chin; eruption

Digitized by Google

around knees; of eruption around hemorrhoids; of anus; in urethra; of inner surface of prepuce; on scrotum; of vulva; on chest; of pimples on neck; of pimples on hands; of pimples between fingers; of old ulcers on legs; of liver spots on chest and arms.

Biting itching: from thighs to genitals; on head, back and limbs.

Chilliness: in rectum.

Cold feeling: in eyes; in extremities; in feet and hands; in face and feet.

Icy coldness: of hands and feet.

"**Tissues.** ‖Emaciation and debility from loss of fluids; upper parts wasted; lower limbs swollen. θAscites.

|Atrophy of infants.

|Soft parts feel painful to touch or pressure.

|Numbness of limbs; twitching through body.

|Hemorrhages, dark blood.

|Arthritic pain and stiffness of joints.

|The pains are drawing in character and seem to be "between the bones and skin;" pains < rainy or stormy weather and by cold; > by warmth and particularly by lying in bed; rheumatic tension and tearing in joints of upper and lower extremities, so that she cannot do anything, as if paralyzed; stiffness of limbs and coldness of feet. θChronic rheumatism.

|Sensation as if void of marrow.

|Osteitis, tophi, arthritic nodes with nocturnal pains.

‖Softening of bones; caries.

‖Gouty lithæmia.

|General dropsy, consequent upon disease of liver, enormous swelling of scrotum, redness and painful rawness between it and thigh; frequent painful urging to urinate.

‖Ascites: after scarlet fever; after venesections; after abuse of alcohol; from liver affections; upper part of body emaciated, lower enormously swollen; after intermittent fever.

||Hydrops siccus from hypertrophy of heart.

|Erectile tumors which have now an increase and then a decrease of amount of blood in them.

|Venous and arterial nævi materni.

||Warm poultices aggravate all pains; boils returning periodically; carbuncles with burning stitches all around, with alternate chilliness and heat of body. θAnthrax.

|Boils and furuncles returning periodically.

|Pus bloody, corroding and putrid; whitish, milky appearance. θSuppuration.

|Glandular swellings.

Google

Chilblains.
Scrofulosis and tuberculosis, cheesy degeneration and dropsical effusion.
Deep seated progressing chronic disease.

45 **Touch. Passive Motion. Injuries.** Touch: teeth excessively painful; causes bleeding of gums; epigastric region extremely sensitive; pain in r. hypochondriac region <; region of liver sensitive; eruption around hemorrhoids painful; varices painful; spot on abdomen sensitive; condylomata on mucous surface of prepuce not sensitive; on spots on inner surface of thigh causes pain; inner ankles tender; all soft parts painful.

Pressure: stomach sensitive; of hand, tensive aching in hypochondria <; abdomen sensitive; on hypchondrium causes pain in epigastrium and vice versa; emaciated lower extremities pit; great sensitiveness over r. side of chest; tearing in head >; all soft parts painful.

Tight clothing: epigastric region extremely sensitive; abdomen very sensitive.

Weight of clothes: abdomen sensitive.

When riding in carriage: nausea.

After injury to ankle, half a year ago, slight wound of skin, followed by ulceration until whole ankle was affected.

46 **Skin.** Unhealthiness of skin; dry, hot, burning, itching when warm; humid, suppurating or vesicular eruptions.
Skin dry and hot, especially that of hands.
Exhalations from body smell like onions.
Flesh in ridges, as if struck with a stick.
Biting and itching: on head, back and limbs, with chilliness; when becoming warm through day.
Pinching and pricking pains on different parts of skin; sometimes apparently in veins.
Eruption: first vesicular, then dry; humid, suppurating; full of deep rhagades; breeding lice; itching violently; intertrigo, raw places readily bleeding.
Eczema on face, genitals, legs, neck and fingers of r. hand; bleeds easily and is covered with thick crusts, with fetid secretion beneath.
Moist, scald head, most on and behind r. ear.
Intertrigo between thighs and labia forming flat, lard-like ulcers with inflamed edges.
Scaly furfuraceous herpes, yellow at base, and bleeding on face at corners of mouth.
Insensible yellow brown shrivelled herpes.
Herpes on nape of neck, in axillæ, on arms, thighs and calves of legs.

Google

Impetigo after abuse of mercury.
Psoriasis of hands and fingers; eruption has a furfuraceous look, sometimes fissured and bleeding.
Liver spots on chest and arms, painful or itching.
Red, itching or burning spots of eruption.
Large, red spots on legs and abdomen.
Dark, red blotches here and there.
Eruptions bleed easily.
Freckles.
Nævus maternus and vascular tumors.
Urticaria, chronic cases.
Large, jagged, often pedunculated warts exuding moisture and bleeding readily.
Bloodboils; boils do not mature, but remain blue.
Lupus; recent cases, shallow ulceration, in pale, sallow patients.
Ulcers: bleed and burn when dressed; tearing, shooting, itching at night, burning when touched; fistulous, with hard, red, shining everted edges and inflammatory swelling of affected parts; bleeding easily; mercurial; in gouty persons; phagedenic; much inflamed; swollen; superficial; edges high or callous; impure centre; black gangrenous; of offensive smell; thin ichor; on lower limbs; cancerous; flat with a bluish white base.
Child becomes drowsy and awakens from sleep frightened, clinging to crib, seems to know no one; soon drops to sleep again, only to reawaken with same symptoms; when rash suddenly pales and glands swell and face becomes bloated and paler than natural. θScarlatina.
Secondary eruption of dark blotches on hands, thighs, back, or face. θScarlatina.
Colic during desquamation. θScarlatina.
Scarlatina and measles, with stupefaction and sopor.
During desquamative stage of scarlet fever sudden rise of temperature, with small weak pulse; hot, dry skin; great thirst; wilfulness and ill behavior; paleness and œdema of face, generally only on l. side and in feet; scanty urine with strangury; burning in urethra; pain in region of kidneys; urine at first dark red or bloody, containing much albumen; ascites.
Weak, emaciated; staggering gait; body bent; face cachectic, sunken and covered with a coppery eruption; eyes dim, vacant; voice hoarse; fatty ulcers in mouth and throat; looseness of teeth and bleeding of gums; loss of appetite; sleeplessness; constant inclination to lie down, particularly about 3 or 4 P.M.; tearing in limbs, particularly in forearms and lower leg, < at night and in damp weather; depression of spirits, tired

Google

of life; hemorrhoids, pain in back, stitching and itching in anus; hard stool. θSyphilis.

‖Secondary, tettery eruptions; ulcers in throat, of dark yellowish grey color; cough and hoarseness from similar affection in larynx; coppery eruption on forehead, and cachectic appearance of face; dry, pediculated, painless condylomata on sexual organs; nightly pains in limbs during wet weather; low spirited; desponding; nervous weakness. θSyphilis.

‖Chancres with raised edges; indolent chancres with thick, rounded, prominent margins, granulation flabby or absent; eruptions on glans; condylomata; ulcers in mouth. θSyphilis.

‖Herpetic eruption in mouth, first affecting tonsils and then extending to sides and under tip of tongue; affected parts look wrinkled, like hands of a woman who had been washing; warm foods and tobacco cause burning; much hoarseness and irritation to cough, latter sounding like that of laryngeal phthisis. θSyphilis.

[47] **Stages of Life, Constitution.** Suitable for: old women and children; persons of keen intellect, but feeble muscular development; upper part of body wasted, lower part semidropsical; lean and predisposed to lung and hepatic affections; herpetic and scrofulous constitutions; hypochondriacs subject to skin diseases; lithic acid diathesis, much red sediment in urine, urine itself transparent; sallow people with cold extremities, haughty disposition, when sick, mistrustful, slow of comprehension, weak memory; weak children with well developed heads but puny, sickly bodies, irritable, nervous and unmanageable when sick, after sleep cross, pushing every one away angrily.

Boy, æt. 6 days, after catching cold during an attack of jaundice; conjunctivitis.

Girl, æt. 10 months; eczema capitas.

Child; chronic crying.

Boy, æt. 1; polypus of eye.

Girl, æt. $2\frac{1}{2}$, vaccinated with humanized virus when one year old, soon after, large sores all over body, which yielded to powerful ointments and astringents, suffering one year; diarrhœa.

Girl, æt. 3, since early infancy; constipation.

Girl, æt. 3 years and 5 mos., suffering two weeks; capillary bronchitis.

Boy, æt. 4, chancre; another, æt. 4; rachitis.

Girl, æt. 6, scrofulous; warts on chin.

Girl, æt. 7; eczema capitis.

Child, æt. 7, treated in vain with Chinoidine; intermittent fever.

Google

Boy, æt. 7, suffering since infancy; inguinal hernia; another, æt. 7; diphtheria; another, æt. 7, deaf-mute; otorrhœa.
Girl, æt. 8, amiable disposition, light hair, blue eyes, slender; ague.
Girl, æt. 8, fleshy and full faced, ruddy, dark complexioned; diphtheria.
Girl, æt. 9, just recovered from scarlatina; diphtheria.
Girl, ill one week; ulcerated throat.
Girl, æt. 10; diphtheria.
Boy, æt. 11, weak, suffering for one year from quartan ague; dropsy.
Girl, æt. 11, very thin, pale, strumous diathesis, nervous temperament; pneumonia.
Girl, æt. 11, very nervous temperament; diphtheria.
Boy, æt. 12; rheumatism.
Boy, æt. 13, after typhoid pneumonia; threatened phthisis.
Boy, æt. 14, remarkably feeble and lean and of weak muscular development, but of sensitive mind and excellent intellect, mother died of consumption; cough.
Girl, æt. 15, has always been delicate, pleurisy three years ago, spits blood, menses not appeared, father and sister died of phthisis; lung affection.
Boy, æt. 15, hypermetropic, and double convergent strabismus; hemeralopia.
Girl, æt. 17, poorly developed, pituitous constitution, menses irregular, suffering for last year from urticaria and boils; affection of stomach and abdomen.
Boy, æt. 18, robust; latent pneumonia.
Girl, æt. 18, fair blonde, temperament gentle, but vivacious; insanity.
Girl, æt. 18, tall, slight figure, narrow chest and stooping, family consumptive; chronic cough.
Girl, æt. 18, brunette, medium height; amenorrhœa.
Girl, æt. 19, phthisical family; threatened tuberculosis.
Man, æt. 19, worked in a brass foundry; hemeralopia.
Girl, æt. 20, teacher; diphtheritis.
Woman, æt. 23, several months pregnant, carbuncle on chin; trismus.
Girl, æt. 23, weak, neglected pneumonia; chest affection.
Man, æt. 23, had herpetic eruption over body, which disappeared of itself; ulcers on foot.
Woman, æt. 24, suffering four years; diarrhœa.
Man, æt. 24, attacks every six weeks; gravel.
Man, æt. 24, robust, at one time had itch, two years ago had fever with a vesicular eruption, since then in poor health; threatened tuberculosis.

LYCOPUS VIRGINICUS.

Bugle Weed. *Labiatæ.*

This plant, sometimes called Virginia Hoarhound, grows in shady and wet places throughout the United States. The tincture is prepared from the fresh plant in flower.

Provings by Chandler (Hale's New Rem.), tincture and first dilution, Morrison (Mon. Hom. Rev., vol. 16, p. 737), tincture and 200th dilution, three provings; produced considerable action upon the heart; took sphygmographic tracings (Mon. Hom. Rev., vol. 18, p. 620).

[1] **Mind.** Increased mental and physical activity in evening.
Stupid, with lack of expression during menstrual flow.
Mind wanders from one thing to another.
Genèral wakefulness and morbid vigilance.
Slight obtusion of intellect, with dull aching through sinciput; increased power of concentration.

[2] **Sensorium.** Vertigo; tends to stagger to right.

[3] **Inner Head.** Pressure in forehead, < in l. portion.
Dull aching in sinciput, slight obtusion of intellect.
Aching in frontal eminences, l. to r., < left.
Pain in forehead and temple, > by nausea.
Headaches: frontal then occipital; over eyes and frontal eminences: pains aching, pressive, pressing out, congestive; often succeeded by labored heart and cardiac depression; accompanied by intellectual obtuseness.

[5] **Sight and Eyes.** Eyes feel weak, as if system was overfatigued.
Eyes feel full and heavy; pressing outward, with pressure in front of head.
Dull pain in l. supraorbital region.
Neuralgic pain in r. supraorbital region and l. testicle.
Protrusion of eyes, with tumultuous action of heart; exophthalmic goitre. #Morbus Basedowii.

[10] **Teeth and Gums.** Toothache in r. lower molars, then sub-

acute pain, first in l. then in r. frontal eminence, in r. molar, then r. temple, then l. molar, then l. temple, again to r. molar, then to loins, with frontal oppression.

[13] **Throat.** Rawness at back of palate, r. side, extending to left.

Burning in spot in soft palate, following headache.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea from back of fauces, > by eructations that taste of tea and drug; succeeded by persistent giddiness while sitting, and staggering while walking.

Nausea and faintness.

[17] **Scrobiculum and Stomach.** ‖Circumscribed pain and compression in region of stomach.

‖Indigestion, with pain and distress in epigastric region.

‖Gastritis; enteritis; diarrhœa; dysentery.

[18] **Hypochondria.** Lugging pain in spleen.

Tenderness in l. hypochondrium.

[19] **Abdomen.** Flatulence and rumbling.

‖Aching in inguinal canal, < walking, > from upward pressure; with pain in testicles; bearing down as from hernia.

[20] **Stool and Rectum.** Severe colic, followed by profuse forcible diarrhœa; stools shining, dark brown, offensive; tenesmus with first part of semi solid movements.

Increased action of bowels, aggravated by diarrhœic symptoms; could have a passage at any time, but sphincter is under perfect control.

‖Diarrhœa in jaundice, from weakened heart.

‖Diarrhœa with griping and rumbling. θPhthisis.

‖Constipation lasting six or seven days, stools dry and cloglike.

[23] **Urinary Organs.** ‖Protrusion of eyeballs, cardiac depression and palpitations, < ascending, from excitement, deep inspiration, or thinking of them; irregular and intermittent pulse, not corresponding to beat of heart; frontal and fronto-occipital headache, > by strong pressure; sense of constriction in larynx; cough with slight, pale expectoration, wheezing and hot aching beneath r. scapula; oppressed respiration, with sighing; tremulous feeling in hands; erratic rheumatoid pains, < toward sunset and during evening. θMorbus Brightii.

‖Drinks large quantities of water; passes nine to eleven quarts of urine a day; fearful thirst, nothing but coldest water would satisfy; very irritable unless spoken to very softly; was not inclined to talk even to her own family. θDiabetes.

‖Diabetes mellitus; gallon or more daily of clear urine, of great density, containing sugar; great thirst and emaciation.

Google

Tenderness in bladder.
Bladder feels distended when empty; dull pain in l. lumbar region.
‖Profuse flow of limpid, watery urine, especially when heart is most irritable.
‖Urine scanty, thick, muddy, œdema of feet.
Urine: 1012 to 1021; cloudy; acid; contains mucus, epithelial cells and minute crystals, oxalate of lime, spermatozoa.

[24] **Male Sexual Organs.** Neuralgic pain in testicle, with supraorbital pain.
Acute aching in testicle while sitting, 1 P.M., or with occasional darting pains, changing to r. then to l., after rising.
Acute pain in testes, from r. to l., then both, recurring and lasting whole evening, with aching in inguinal canal.
‖Sharp darting through l. testicle.
‖Relieved pain in testicle, but had no influence on orchitis.

[25] **Female Sexual Organs.** ‖Menorrhagia and metrorrhagia.
‖Menses: intermit for ten or twelve days; last from half hour to six hours.
‖Vagina very hot, os uteri engorged and swollen.
‖Puffing of parts on and around pubes and vulva, dilated condition of vagina.
‖When heart's action was tumultuous, puffing (œdema) of pubis was gone.

[25] **Voice and Larynx. Trachea and Bronchia.** Constriction in larynx, 7 P.M.

[26] **Respiration.** Oppressed, with sighing breathing, 7 P.M.; wheezing; dyspnœa, as from bronchial cold, accelerated during exercise, especially when going up stairs.

[27] **Cough.** Cough, with hæmoptysis and feeble, weak heart action; deep, violent in evening and night, without waking; renewed by change to cold weather and by cold winds.
Expectoration pale, sweetish, unpleasant tasting, at times difficult, renewed same as cough.
‖Cough and irritation of lungs.

[28] **Inner Chest and Lungs.** Sense of constriction across lower half of thorax, impeding respiration, with subacute pain; < lying on r. side.
‖Cough, with hæmoptysis, feeble, quick, irregular action of heart. θPhthisis.
‖Febrile irritation; quick, weak pulse; occasional hæmoptysis; dyspepsia; weakness; deposit of tuberculous matter in apex of l. lung; irritable action of heart, palpitation occurring from least exercise. θIncipient phthisis.
‖Pulmonary disease, associated with looseness of bowels.

Google

» **Heart, Pulse and Circulation.** Constrictive sensation in cardiac region, tenderness; pulse weak and irregular in force.

Acute darting pains in heart, with intermissions of pulse and heartbeat.

Throbbing pain: in cardia; pressure in forehead and eyes.

Sensation of pressing outward in cardiac region.

Oppressed feeling in brain, followed by pain an inch below and to outer side of l. nipple.

Rheumatoid aching in præcordial region and at apex, followed by pains in l. wrist, inner side of r. calf, and in subclavicular region, and again in l. wrist and region of apex.

‖Cardiac irritability with depressed force; pulse very frequent, small, compressible, and often irregular and intermittent; heart's impulse feeble; patient generally nervous, irritable, and his extremities cold; slight hemorrhages from lungs; cannot go up stairs or walk fast without rapid or weak action of heart, or heavy oppressed action.

‖Cardiac erethism; debility of heart, marked by the influences of some smouldering inflammation, generally in lungs; heart's action quick; pulse quick, hard, wiry, not easily compressible and not generally irregular or intermittent; local congestion and irritation of lungs; cough; hæmoptysis.

‖Cardiac irritability, profuse flow of watery, limpid urine.

‖Palpitation in cardiac hypertrophy, with dilatation.

Palpitation and cardiac distress, < morning and evening, and when thinking of it.

‖Action of heart tumultuous and forcible, could be heard several feet from bed. θExophthalmus.

‖It renders beat of heart slower, fuller and more regular.

On lying down, cardiac depression with dull, heavy beating.

‖Palpitation from nervous irritation, with plethora.

‖Excessive flatulence, which aggravates the palpitations.

Labored action of heart; oppression.

Heartbeats more distinct on r. of sternum.

First sound replaced by a blowing sound of mitral regurgitation, heard upwards in clavicular region, and particularly between scapulæ; second sound pointed, short, sharp.

Heartbeat slow and weak; diminished blood pressure; pulse 48, 58, weak, compressible.

‖Can walk only a few steps without having to stop and rest, as he gets short of breath; l. arm, hand, leg and foot œdematous and painful; blowing sound over apex of heart; instead of natural systolic sound, very loud

Google

sound over base of heart during diastole; pulse quick, weak, frequent, about 90 per minute; feels as though lungs were filled up; panting respiration; urine scanty and high colored; constipation; little appetite, but quite thirsty for cold water; no sexual desire whatever; sleep restless, with frequent starting and jumping; sometimes can lie down, at other times must sit with head high; tongue flabby, no marked coating; occasionally a sharp shooting pain through from sternum to l. shoulder blade. *θ* Heart disease.

Menses appear within three or four hours of same time every month, with a deep seated pain, with heat in occiput; after a few hours, pain in forehead and temples. faintness and nausea in stomach, sensation of great weakness in lumbar region, general lassitude and debility, especially in limbs, followed by torpor and heaviness; when nausea set in occipital pain >; aversion to smell of food; protrusion of eyes, wild, strange expression; menses usually appear in morning and flow until noon, then suddenly cease, or they would last from half an hour to six hours, intermitting in this manner for ten or twelve days; during menses stupid, has lack of expression and a vacuity of ideas; tympanitis, puffing of parts on and around pubis and vulva, dilated condition of vagina and bearing down sensation in rectum; on examination vagina very hot, os uteri engorged and swollen; these conditions and puffiness > by local use of ice; constipation, stools every six or seven days, dry and claylike; when eyes seem protruded, heart seemed to act tumultuously and forcibly, and could be heard several feet from bed; at these times puffing of pubis <; when heart's action was feeble and quiet, with quiet pulse, puffing about genitals >; at times pulse small and quiet and could scarcely be counted; urine scanty, thick and muddy; œdema of feet; dyspepsia; all, or nearly all, above symptoms > after menses, or at expiration of ten or twelve days. *θ* Exophthalmus.

Aneurism of large vessels near heart.

Pulse: many symptoms increase and decrease, according to weakness or strength of heart's action.

Pulse 80 (while standing), with intermissions, cardiac oppression.

[81] **Neck and Back.** Acute pain at seventh cervical vertebra.

Slight rheumatoid pain in l. suprascapular muscles.

Congestive pain in nape, with severe continuous dorsal and lumbar pain, < lower l. side.

Rheumatoid pains: scapular muscles, lower dorsal region; from apex of heart by friction to l. subscapular region, then to middorsal and later to apex.

Digitized by Google

Severe continuous aching in lumbar region.
Sharp pains first in lumbar region, then in l. leg, extending up thigh, then in r.; feels weak as if overfatigued.
Severe aching down spine, < from friction, passing off after rising, morning.
Flying pains in muscles, with persistent aching in loins and occiput, < on movement.

[32] **Upper Limbs.** Rheumatoid pains, forearms and wrists, with trembling of hands.
Hands unsteady, making writing difficult.

[33] **Lower Limbs.** Rheumatoid pains knees, legs, thighs, wandering to back, slight lameness and unsteady gait.
Left leg feels shorter than r. and so sounds when walking.
Unsteady feeling when walking.

[34] **Limbs in General.** Muscular rheumatoid pains, affecting articulations and tendons, < by motion and cold air, not > by friction, or cold affusion, or direct warmth, but > in a warm room or in bed; rheumatic pains around heart; irregular and intermittent pulse; < towards sunset. θRheumatism.

[35] **Rest. Position. Motion.** Lying down: cardiac depression.
Lying on r. side: constriction of thorax <.
Sitting: giddiness; acute aching in testicle; head high, heart disease.
While standing: pulse 80.
Restless, change of position: in spite of weakness.
Motion: rheumatoid pains <.
Exercise: dyspnœa <; least, causes palpitation; aching in loins and occiput <.
Walking: staggering; aching in inguinal canal <; causes shortness of breath, is obliged to stop and rest; sounds as if l. leg was shorter than r.; unsteady feeling; slight nausea and faintness.
Cannot go up stairs or walk fast: without rapid or weak action of heart.

[36] **Nerves.** Weak, yet restless change of position.
Restless activity, notwithstanding nausea, giddiness, etc.
Vital depression, hence mental depression, tremulousness.
Faintness: slight nausea, walking in open air; with cardiac depression.

[37] **Sleep.** Sleep restless, full of troubled dreams.
Wakeful on retiring, though fatigued.

[38] **Time.** Morning: palpitation and cardiac distress <; menses appear and flow till noon, then suddenly cease; severe aching down spine, > after rising.
1 P.M.: acute aching in testicle.
Towards sunset: erratic rheumatoid pains <.
7 P.M.: constriction in larynx; oppressed, with sighing breathing.

Google

Evening: increased mental and physical activity; rheumatoid pains <; acute pain in testes; cough violent; palpitation and cardiac distress <.
Night: cough violent.

[39] **Temperature and Weather.** Warmth: direct, does not > muscular rheumatoid pains.
Warm room: > muscular rheumatoid pains.
In bed: muscular rheumatoid pains >.
Open air: faintness and slight nausea.
Change to cold weather: renewed cough.
Cold air: muscular rheumatoid pains <.
Cold winds: renew cough.
Coldest water: alone satisfies thirst.
Ice: local use of, > heat and puffiness of vagina.

[40] **Fever.** Stupid, will not answer questions; is waxy, cold; pulse very low, yet full and large, soft and compressible; hemorrhage from bowels; tawny, expressionless face; veins full and face bloated; eyes expressionless and seem to project from sockets; fever not high; chokes and swallows. ♂Typhoid malaria.

[41] **Attacks, Periodicity.** Daily: nine to eleven quarts of urine; a gallon or more of clear urine.
Every six or seven days: dry, claylike stools.
For ten or twelve days: menses intermit, last from half hour to six hours.
Every month: menses appear within three or four hours of same time.

[42] **Locality and Direction.** Right: tends to stagger to r.; neuralgic pain in supraorbital region; toothache in lower molars; pain in temple; rawness at back of palate; hot aching beneath scapula; pain inner side of calf; heartbeats more distinct on side of sternum; pain in leg; urticaria on leg.
Left: pressure in forehead <; aching in frontal eminence <; dull pain in supraorbital region; neuralgic pain in testicle; pain in molars and temple; tenderness in hypochondrium; dull pain in lumbar region; sharp darting through testicle; deposit of tuberculous matter in apex of lung; pain near nipple; pain in wrist; arm, hand, leg and foot œdematous and painful; pain from sternum to shoulder blade; rheumatoid pains in suprascapular muscles; pain < in side of back; sharp pain in leg; l. leg feels shorter than r.; urticaria on forearm.
Right to l.: rawness of palate; darting pains in testes.
Left to r.: aching in frontal eminence; pain in molars.
Pains pass from l. to r., usually, then they cease or return to left.

[43] **Sensations.** Eyes feel weak as if system was overfatigued;

Google

prickings, as if bitten by insects; as if lungs were filling up.
Pain: in forehead and temples; in epigastric region; in testicles; in supraorbital region; an inch below and to outer side of l. nipple; in l. wrist; inner side of r. calf and in subclavicular region.
Severe continuous pain: in dorsal and lumbar region.
Sharp pain: in lumbar region, then in l. leg, extending up to thigh, then in right.
Acute pain: in testes; at seventh cervical vertebra.
Subacute pain: across thorax.
Deep seated pain: in occiput.
Acute, darting pains: in heart.
Darting pain: in testicles.
Flying pains: in muscles.
Sharp, shooting pain: through from sternum to l. shoulder blade.
Throbbing pain: in cardia.
Neuralgic pain: in r. supraorbital region and l. testicle.
Severe colic: in abdomen.
Severe aching: down spine.
Acute aching: in testicle.
Rheumatoid aching: in praecordial region and at apex; in l. suprascapular muscles; lower dorsal region; from apex of heart to l. subscapular region, then to mid-dorsal; in forearm and wrists; knees, legs, thighs, then to back.
Hot aching: beneath r. scapula.
Aching: in frontal eminences; in r. lower molars, then temples and again molars; in inguinal canal; in loins and occiput.
Dull aching: through sinciput.
Rheumatic pains: around heart.
Circumscribed pain: in stomach.
Dull pain: in l. supraorbital region; in l. lumbar region.
Lugging pain: in spleen.
Congestive pain: in nape.
Bearing down: as from hernia; in rectum.
Burning: in spot in soft palate.
Heat: in vagina; in occiput.
Tenderness: in l. hypochondrium; in bladder; in cardiac region.
Constriction: in larynx; across lower half of thorax.
Constrictive sensation: in cardiac region.
Compression: in region of stomach.
Pressing outward: in eyes; in cardiac region.
Pressure: in forehead; in eyes.
Full, heavy feeling: in eyes.

Google

Oppressed feeling: in brain.
Distress: in epigastric region.
Trembling feeling: in hands.
Tumultuous action of heart.
Great weakness: in lumbar region.
Lassitude: in limbs.
Rawness: at back of palate.
Prickings: in skin.

[44] **Tissues.** Rheumatoid pains; erratic, but returning to original location; > from warmth; < from cold air and movement.
Flying pains in various parts.
Lowers temperature.
Lessens tonicity of bloodvessels, with consequent congestions; heart muscle weakened.

[45] **Touch. Passive Motion. Injuries.** Pressure: upward, aching in inguinal canal >; frontal headache >.
Friction: sends pain from apex of heart to l. subscapular region; severe aching down spine <; does not > muscular rheumatoid pain.

[46] **Skin.** Prickings as if bitten by insects.
Troublesome urticaria, especially on l. forearm and r. leg, before retiring.

[47] **Stages of Life, Constitution.** Woman, æt. 33, teacher, nervous temperament, cheerful, sprightly, talkative, inclined to hysteria, mother afflicted with cardiac trouble; exophthalmus.
Woman, mother of two children, suffering about a year; diabetes.
Man, æt. 43, half breed Indian and Hawaiian, cook on whaling vessel, suffering two or three years; heart disease.

[48] **Relations.** Compare: *Cactus, Digit., Hydr. ac., Iber., Lauroc., Prun. virg., Sanguin., Spigel.*

Google

LYSSIN (Hydrophobinum*).

The saliva of a mad dog. *A nosode.*

For historical review, see Hering's Monograph (North American Journal of Homœopathy, 1879).

The first saliva was obtained by Hering in August, 1833 (see North American Journal of Homœopathy, 1879), and proved by himself in the same year; by Schmid, an Allentown student, in 1835; by Behlert on a number of provers, from 1835 to 1838; by Redman Coxe on himself and family, in 1853; by Knerr, with the 300th and 600th of Jenichen, on a woman bitten by a dog, not rabid, in 1869.

Symptoms observed after bites, and those of persons afflicted with rabies, collected from reliable sources, are followed by a dash (—).

Clinical reports have as yet been meagre, owing to the comparatively recent publication of the provings.

CLINICAL AUTHORITIES.—*Lyssophobia*, Hering, 1843; C. Lippe, MSS.; *Chronic headache, cannot hear water run*, Hering, MSS.; *Dysentery, cannot hear water run*, Lippe, MSS.; *Chronic camp diarrhœa*, Hale, MSS.; *Convulsions in pregnancy from hearing water poured out*, Guernsey, MSS.; *Prolapsus uteri of long standing* (6 cases), Cox, MSS.; *Vaginismus with prolapsus*, Cate, MSS.; *Puerperal convulsions*, Guernsey, MSS.; *Leucorrhœa*, Cate, MSS.; *Periodical spasm of epiglottis*, Bicking, MSS.; *Dogbites*, Hering, Bute, Rück. Kl. Erf., vol. 4, p. 622; Raue, MSS.; Wells, MSS.; Knerr, MSS.; *Malignant ulcers after bite*, Hering, MSS.; *Red scar after bite*, Bute, MSS.

[1] **Mind.** Loses consciousness for a moment.

Loss of consciousness sometimes at an early stage, but not generally until a short time before death. —

Does not see nor hear persons around him. —

Memory for single words much improved.

Strange sensation in head, with loss of memory.

Does not converse as well as usual, but plays chess better; more inclined to reflect than talk; not at all lively.

Thoughts of something terrible going to happen come into his mind against his will; feels impelled to do reckless things, such as throwing child, which he carries in his arms, through the window, and the like.

Could not get rid of the indescribable tormenting feeling that something terrible was going to happen to him.

Fits of abstraction, takes hold of wrong things, often does

---

* "We follow the suggestion of Ziemsen, Encyclopedia, vol. 3, p. 472, and substitute Lyssin for Hydrophobinum, as the name hydrophobia, properly speaking, refers to an occasional symptom, and is not a characteristic of the disease of which the classical name is *Λυσσα*."—C. HERING.

Google

not know what he wants, says wrong words which have but a remote similarity of sound.

They appreciate the formidable character of the disease and speak frequently with a remarkable quick and sharp articulation of the impending fatal results. —

During the tranquil intervals, responded correctly to questions put to him, recognized those around him, and with a presentiment of impending death, begged them to pray for him and not to leave him alone. —

The majority of patients have no adequate conception of real origin of their malady, and affirm in decided terms that the scar is of no significance whatever and causes them no pain. —

Most commonly the mental faculties are in a superior state of excitement, shown by quick perception, amazing acuteness of understanding and rapidity with which they answer questions. —

Is astonished in his dream at the readiness with which he can express himself in elegant Latin.

It seems to her as if two entirely different trains of thought influenced her at the same time.

A certain confusion, unsteadiness, weakness of mind. —

It is very difficult for him to think, sometimes impossible.

Weary and incapable of mental exertion; school tasks which before had been a pleasure to her, had to be laid aside.

Range of ideas extremely limited, if left to himself is occupied continuously with the same thing, bringing frequently forward same ideas within a short space of time and always in same manner.

Dulness and stupidity; at night restlessness.

During convulsions, mental illusions and hallucinations; in intervals of consciousness mental faculties are retained. —

Believe that they are reduced to their present wretched condition by the instrumentality of those about them. —

Imagine that they are being abused, and energetically defend themselves against attacks and insults, which in reality are products of their own fancy. —

Fancies he is being blown at by several persons, some of whom are not present. —

Raved about the dog that had bitten her; imagined it to be near her and fought as if to drive it away. —

Thinks he is a dog or a bird, and runs up and down, chirping and twittering, until he falls down fainting. —

They fancy that they see objects, animals and men that are not present. —

Complains bitterly that a fire has been lighted and that

Google

the stove is smoking, although there is no fire; another continually directed a window to be closed, which was not opened. —

▮Strange notions and apprehensions during pregnancy.

Slight fits of delirium occur (in advanced state); patients frequently forget their friends and relatives; delirium attended with constant talking. —

Some delirium and illusions; fancied doctors were two young girls who had come in to see her. —

During night delirium <.

Makes speeches in his delirium; thinks he is a man of great authority. —

Insane ideas enter his head; for instance, to throw a glass of water, which he is carrying in his hand, into some one's face, or to stab his flesh with the knife he is holding, and the like.

His mania takes a gloomy character. —

▮Mania spermatica; stallions.

Inclined to use insulting language, scold his friends, beat and abuse those near him.

▮Inclination to be rude and abusive, to bite and strike. θDiarrhœa.

A kind of savageness in his temper.

A strong and uncontrollable impulse to do certain acts; to spring at and to bite any moving object that came within reach; dog. —

Is continually tempted to bite her pillow at night. —

Deny, with great obstinacy, that they have ever been bitten. —

Incessant talking during night. —

Speech labored, short and pathetic. —

Wrote to doctor: I am waiting with impatience that you give me and my young ones something to eat. —

After fainting spell he wrote on paper: I am forsaken by all; even the birds of heaven, they do not look at me, do not feed me if hungry; I hunger with the young ones and am thirsty with their she ones; my nest is made out of dirt, not gotten by my own exertions, but by driving them out of their nests and sitting there with the females and the young. —

Sang more than usual, but involuntarily; she did not feel at all happy or cheerful.

Goes about house all day singing, moves with greater alacrity and precision than ordinary.

Sighing: with oppressive breathing; with pain in heart.

Declares amid violent sobs that she is suffering the torments of hell. —

Lament with greatest anxiety their inability to relieve

Digitized by Google

thirst which afflicts them, and by various contrivances endeavor eagerly to drink. —
Had a good cry before going to bed.
Weeps bitterly on account of headache.
Before and after as well as during paroxysms, shrieks or inarticulate sounds expressive of utmost despair. —
During fits, snapping motions with jaws, of an involuntary and spasmodic character. —
Quiet patients spit into provided vessels, more excited ones discharge saliva upon all sides. —
Biting, snapping, with convulsions. —
Ordered her husband to go away, as she wanted to bite him, and joining act to threat, she bit herself in arm. —
Pieces of carpet put into kennel for dog to lie upon were torn up until they became heaps of loose wool. —
Desperate efforts were made to break chain; dog. —
Break out of their stables furiously and run or jump over ditches and fences. θLyssa of sheep.
He cautioned people around him not to inhale his exhaled air, it was spoiled, stinking like rotten eggs, worse than cholera, and could injure. —
Does not answer questions.
Disinclination to change position of head; two distinct trains of thought existing at one time in her mind, the idea that she is unable to move her head (when lying down), with the positive conviction that she has only to make up her mind that she will do it to achieve it.
Not afraid of dogs, but dislikes to see them because their sight renews her fear. θLyssophobia.
Cannot bear to hear others sing, or eat apples.
Exhilarated, felt as if he had received joyful intelligence.
Occasionally exhilarated, then again morose, both feelings going off very readily upon conversing.
Pain in head makes him very uneasy.
Feels depressed and very weak all day.
Depressed, as if something would happen.
An attack of mental depression and indifference quite strange to him; feels as if he could do nothing; if he forces himself he lacks mental power.
To such as had continual apprehension respecting their safety it appeared a shorter time since bite. —
Feels as if something disagreeable would happen; when thinking the matter over, the feeling passes off.
He feels as if he had heard unpleasant news, or would soon hear it; until 4 P.M.
Felt as if she was going to get a fit; at 11 P.M.
Lyssophobia; fear of becoming mad.
Feels he cannot physically endure his fears much longer,

Google

and shall be compelled to go into an insane asylum. θLyssophobia.

▮Mary M., æt. 17, had been bitten several years previously by a dog, and reading of several cases of hydrophobia as reported in papers, was found in following condition: crouched in corner of a sofa, dark red bloated face, expression of terror in face, eyes glistening, conjunctiva injected red; was brought into this condition by endeavoring to take a drink of water, and could not hear water mentioned without a shudder of fear, could not swallow, pulse very high, tongue dry and coated red; *Lyssin* 2c one dose; she was better next day, but had several slight attacks afterwards, always induced by running of water, but always yielding to remedy; has not had an attack in nearly a year.

Felt as if she was going to die; as if she was going to sink away.

She has been unable to sleep a wink for several nights; is driven from bed by indescribable anxiety; can but sit and walk, or find momentary peace in prayer. —

Anxiety of mind: restlessness, with great prostration; with pain in heart; with headache; fear of being alone.

▮A musician received a bite from a small pet dog in calf of l. leg while walking through a dark entry; the bite was very slight, scarcely wounding skin; the animal was in a healthy condition and remained so; a pain in bitten place kept returning from time to time independently of mind dwelling on it, until finally it grew to a burning which extended through entire body, causing an indescribably strange sensation; in night trembling, and a tormenting fear that he would have hydrophobia; was thirsty and drank water freely; it was two years after the bite when these and the following symptoms appeared: frequent spitting of saliva all through day, only ceasing awhile after taking strong tea in evening; disturbed dreams at night; finally could not partake of food or drink, and complained of pricking stitches under tongue; mental excitement now as all his life, affects him badly; hot vapor relieved burning pain in bite, and *Lyssin* 2c (Jenichen) improved all symptoms rapidly; in three weeks he considered himself cured, and started on a journey.

Indecision even in small matters.

▮Ill humor. θHeadache. θDiarrhœa.

Fretful, hypochondriac mood in evening.

Feels nervous and irritable.

Very cross, so much so that his children expressed great surprise; he took offence at veriest trifles, scolded his

Google

wife and children, felt wretched, could not concentrate his attention on anything; sullen, does not wish to see or speak to any one.

After attacks of fury, evinces great regret at his behavior, making earnest apologies, warning those about him not to allow him to bite them. —

Implacable hatred against owners of dog that bit her, with inclination to utter maledictions which, by reason of her careful bringing up and sobriety of her parents, shock her dreadfully. —

Hypersensitiveness of all the senses.

Exalted state of smell, taste and touch, with a feeling of anxiety and a fear of being alone.

Everything affects him more powerfully; also tobacco.

He knew exactly where his nurses, his doctors and acquaintances were, if at any distance from him.—

On a watch held to scrobiculum he sees the hour and minute hands. —

He says he can see hands on dial plate of church clock. —

He could hear what was spoken in next room, and counting coppers in a room below him. —

He knows every one, and answers questions, also is in mesmeric rapport with his physicians. —

Linen dipped in sugar water, put on pit of stomach, gives a sweet taste in mouth. —

Copper, if in his room, makes him restless and full of pains. —

Felt same rheumatic pain his brother complained of. θLyssophobia.

Before every spell of somnambulism he crowed like a cock.—

Very uneasy; mental disquietude, with headache.

Driven incessantly about without any definite aim. —

Restlessness, driving him hither and thither, although weak enough to lie down. —

Restlessness and anxiety at præcordia, frequent change of posture and sighing. —

Restless, constant bleating in a hoarse voice. θLyssa of sheep.

Sometimes he could control inclination to stool by a strong effort of will, but effort caused much nervous irritation. θChronic camp diarrhœa.

Showing him a bird, he got frightened and thought it was a mouse. —

Was much frightened during attack, and began to pray; her husband had to sit up with her and hold her hand; did not get entirely over attack until 3 A.M.

She feels as after night watching and great anxiety.

Unusually exhausted.

Google

While reading and thinking, headache.
Worse while reading or writing; headache; aching in lower jaw.
Severe headache and noseache upon going to bed, after writing all her symptoms.
Attacks of nervous headache become awful and insupportable if he hears water run out of a hydrant.
Pressing headache, < while reading and thinking.
When he hears water poured out, or if he hears it run, or if he sees it, he becomes very irritable, nervous; it causes desire for stool and other ailments.
The mere sight of a drinking vessel containing water is intolerable; they turn away their faces, shriek out loud, beckon anxiously with hands to have the water removed, for voice and breath fail. —
Mental emotion always makes him worse.
Mortifying news affects him very much.
A certain wildness of humor.
Disposed to get angry; flying into a passion.
Every offence she feels very much.
Excitability prevents sleep.
Frequent gaping without being sleepy, most when he has to listen to others.
Thinking of fluids of any kind, even of blood, brings on convulsions. —
The mere idea of drink, fluids, pouring out fluids, may cause a paroxysm. —
Hyperæsthesia, rerophobia, current of air, bright light, sight of any shining object, slightest touch, even conversation in vicinity of patient, may throw him into a most violent agitation and bring on severe convulsions. —
The mere thought of fluids, of drinking, of swallowing, or offer of anything to drink, is sufficient to bring on convulsions; the same effect is produced by other sources of irritation, such as a simple breath of air, the attempt to touch the sick, every hurried approach towards him, the light of shining objects. —
Even the sight of water, or other fluid, or of anything having the least resemblance to it, such as a looking glass or white substance, whereby an occasion will be given for renewal of idea of their former pain, occasion greatest distress and a return of convulsions. —
Such as were afflicted with grief from any cause were much sooner affected with the disease. —
A sudden fright starts convulsions. —
Nose pains from thinking.
Had no symptoms of disease for four months until after receiving very ill usage. —

Google

Dread and fear brought on symptoms. —
Outburst of passion or excesses of any kind hasten the outbreak. —
Any sudden movement near a rabid dog is a stimulus to inflict the fatal bite.

[2] **Sensorium.** ||Peculiar lightness in head; lightness after nausea.
Singular sensation in vertex, as if he momentarily lost consciousness, but only in that place; or as if a habitual feeling had disappeared from there; it is no fulness, no motion, but it causes a vacillating motion of head; in evening.
||Dizziness: as if something was drawing around in a circle, and as if she could not hold her head straight; after lying down, like a shock in upper part of brain; with inclination to fall to r. when stooping; towards evening in upper part of head, as if she would fall, while walking; frequent and transient; with dim sight while walking and sitting; and nausea; with cramps in abdomen; temporarily > by return of diarrhœa; < by teaching, spelling, or being obliged to notice letters; after lying down in bed, shock in upper part of brain; dimness of vision on rising from stooping; on rising from a chair, staggers; while sitting; on rising, cannot walk straight.
A slow vacillation or wavering of head, from something being loose in upper part of head.
Surging towards head is felt inwardly, deep in brain.
Dulness: of head; in forehead, more to r. side; in middle of brain, where it surges; and stupidity at night, with restlessness; amounting to pain in occiput.
Violent vertigo during morning, accompanied by a chill and an intolerable snappish headache.

[3] **Inner Head.** Headache: with dizziness, lasting all day; in morning, violent, with vertigo (> by *Tabac.*); over eyes; in temples; very severe in afternoon; < from writing; > by cold air; from noon until evening; from 3 to 9 P.M. < from writing; > by cold air; alternating with hot flushes in face; with shooting pain in upper face; towards noon, with increase of saliva; and sore throat all day; < on seeing water or hearing it run.
Sensation as if a small leaden ball was rolling about in brain.
‖Rush of blood to head: while lying down; from chest upward, with toothache; during pregnancy; when rising.
Throbbing headache in forehead, vertex and occiput, down to neck.
Burning, surging towards head.
Pain above l. eye, before going to bed.

Google

Pain in a small spot above r. eyebrow < while writing.
Pressing inward, throbbing or drawing above r. eye.
Sharp pain above eyebrows, followed by burning in lids.
Sharp pain above eyebrows and up nose five minutes after walking, with headache.
Severe shooting pains in head, above eyes and temples.
Headache extending into r. eye.
Aching in bones above eyes, particularly r.; < by stooping.
A sensation in forehead as of something moving.
Dull pain in forehead, with a stupid feeling afternoon and evening.
Pressing or burning pain in forehead.
Tearing from middle of forehead towards l. side.
2 P.M., intense pain in head, extending back of forehead to organ of firmness; soon after to whole top of head and to eyes, lasting all day.
Dull heavy pain in forehead and sharp pricking in l. temple, alternating at times with throbbing and jerking.
Pressing in vertex and in forehead, particularly when stooping or moving head; afternoon.
Slight frontal headache in morning on waking, < after rising.
Passes hand across forehead.
Maddening outward pressing pain in forehead; he presses his head against the wall.
Pressing pain in forehead and top of head, returns 4 P.M., seventh day, with uneasiness of mind when reading or thinking.
Continual dull pain in forehead, principally on l. side, with stupefaction, in afternoon and evening.
Throbbing pain in forehead, vertex and occiput, extending into nape of neck.
Pressing in forehead, with slight sensation of heat, 6 P.M.
Headache at times very severe in r. temple.
Severe headache in both temples and above eyes, beginning at 9 A.M., so unbearable that he cries bitterly; violent jerking in limbs.
Violent headache from temple to temple.
Tearing pain: in r. temple; from jaw to temple.
Occasional stitches in r. temple.
Sharp pricking pain in l. temple, alternated with throbbing and punching.
Boring in r. temple very short, 5 P.M.; repeats every other day; but on fourth day in l. temple, and in morning when getting awake.
Beating, throbbing headache: most severe in r. temple and above r. eye; each bone feels shattered and sore; from temple to temple.

Google

‖Violent headache, most in temples and forehead, < during day and from stooping and stirring about. θUterine disease.

Severe pressing pain in l. side of head, occasionally boring stitches from without in, later pressing extends to l. side of forehead and l. orbit; 10 P.M.

Dull weight, first on l. side of head, then on vertex.

Pressing weight on r. parietal bone.

Dull pricking pain in l. side, from head to waist.

Left side of head is now, and has always been, most severely affected.

Headache most severe one and a half inch above l. ear, in evening.

Piercing pain in r. side of head, with sensation of stiffness, or as if part would become insensible.

Woke in morning with a burning, aching headache in l. side of head and down neck.

In vertex: dulness and tensive sensation; stupefied feeling; vertiginous shocks; a peculiar sensation; pressing weight; pressing stinging, r. side; pressing shooting; pressing beating; pressing heaviness, r. side; strange pulsation; burning surging; throbbing.

Pressure in upper part of head and forehead: < stooping or moving head; at 4 P.M., while reading and reflecting, with mental restlessness.

‖Frequent pressure on vertex, as if a cast, which fitted top of head, was pressing it down.

Severe headache, extending from behind forehead to organ of firmness, soon after spreading over vertex and to eyes, at 2 P.M., lasting all day.

Pressing from forehead to vertex and jaws.

Pain on top of head and in teeth running into each other.

Painful pressure, most on upper part of head, < when moving head; later also in forehead, with considerable heat and prostration.

In occiput: painful dulness; pressure in l. side; tearing and stinging as if in bones, < after rising; aching; burning; pain in l. side, < during wet weather; dreadful pains running up neck and down spine, < when lying down.

Sharp pain across eyebrows and up nose, while walking out doors; exceedingly fatigued and weary after a short walk.

Intolerable headache extending to ends of nose and into teeth; some pressure on head, and for a moment a feeling as of an invisible hammer striking upon back of head (relieved by *Tabac.*).

Frequent attacks of headache, in which head, nose and teeth appeared to be soldered together.

Google

Feeling of tension in head; much pressing pain in head.
Head feels as if it would split with severe pressure on vertex.
‖Pain as if head would burst. θPregnancy.
At 3 P.M.: headache very severe; dull heavy pain in head.
‖Afternoon, pain in head; sick headache.
‖‖Headaches from bite of dogs, rabid or not.
In rare cases serous effusion in opaque subarachnoid tissue and lateral ventricle, and also increased adherence of membranes of brain to convolutions. —
All morning severe headache which makes him impatient.
‖At noon slight headache, lasting all day.
Dull heavy pain in afternoon in head.
Painful rush of blood to head after moving, turning around, or stooping.
Unbearable headache for three days makes her snappish, harsh and irritable; trifles annoy her; lower jaw feels stiff and aching, hands numb.
Crying bitterly during headache.
A peculiar sensation in head all day, as if something drew the head towards shoulders.
Headache with nausea and sore pain in heart, in afternoon; > in cold air.
Pain from mouth up through head and down back of neck.
‖Burning aching from l. side of occiput down neck.
‖Violent headache and backache.
Painful pressure on top on moving head, with fever and prostration.
Horrible headache, accompanied by general weariness.
Headache in bones of skull.
On top of head, pressing heaviness, same in r. parietal bone.
Tearing and stinging in occiput, as if in bones, < after rising.
Beating pain in forehead, parietal bone, occiput and nape of neck; > in neck when bending head backwards.

Outer Head. Irritable headache, touching head makes it ache; very sensitive scalp.
Right side of head feels stiff, as if it would become numb.
Numbness of l. side of head.
Very annoying headache, more outside, near vertex, > by gentle scratching, or by rubbing, but it must be done by hands of others, thus by a kind of mesmerizing.
A darting from within outward to scalp, on r. side of vertex, followed by itching.
Itching in locality of acquisitiveness.
Small pustule, painful when touched, on l. frontal eminence, later same on right.

Google

Hair which is usually dry has become very oily.
Scalp feels contracted and pinched.

[5] **Sight and Eyes.** Sensitive to light.
Left eye exceedingly sensitive to light and water.
Sight of water: agitation; renews idea of pain; causes convulsions (pregnancy).
Sparks before eyes.
Something moves to and fro before eyes while sewing, but always a little farther off the point at which she is looking.
False vision, dulness of sight, together with dilatation of pupils, sometimes actual blindness.
Great weakness in eyes, without pain.
Since five years could not read longer than a few minutes at a time, when she would see letters double and would read something else than the right words; had tried all sorts of spectacles without benefit, was often ashamed because she could not sign her name properly.
On looking up eyes are very weak.
Dimness of vision: with vertigo; dizziness when walking and sitting.
Vision much impaired or absent; lasts twelve hours.
Vanishing of sight.
Could not see or hear. θLyssa.
Drawing, beating pain over r. eye, extending into eyes.
Aching over eyes, as if in bone, < r. side and stooping.
Pain over r. eye, pressing inward.
Pressing sensation in upper part of r. orbit.
Drawing, beating pain over eyes and into balls.
Throbbing over r. eye.
At 9 P.M.: severe shooting pains in head, over eyes and in temples; also very violent aching pain inside of and all over chest.
Pain over l. eye previous to retiring.
Sharp pain across eyebrows, afterwards burning in eyelids.
Pain in small spot over r. eyebrow, < writing.
Soreness in eyes and above them, pain in forehead.
Pressing sensation in orbits.
Headache extends into r. eye.
At 9 P.M. felt a curious stinging pain in l. eye, extending to forehead, over r. eye, painful.
Eyes feel very bad, severe pain in them and in all his joints.
Eyes ached intensely; feeling of soreness.
Burning of eyeballs.
Eye draws heat from nape of neck.
Itching heat in eyes.
If mental anxiety is great, pupils are in some cases dilated, while face and conjunctivæ are injected.
During period of tranquillity, in last stage, pupils are contracted or of unequal size, eye fixed, strabismus. —

Google

Pupils were a little dilated and eye had a somewhat wild and restless appearance. —
Eyes are wild, rolling, staring and livid. —
Disturbed look, or eyes firm and penetrating. —
Lachrymal glands evince increased activity. —
Eyes red and cornea somewhat inflamed.
Eyes congested and painful.
Sore eyes and some fever after a bite in nose.
Dulness and inflammation of eyes; dogs.
Inflamed, dim, watery, staring eyes, with very much dilated pupils, upper lid drawn up, and diminished sight. θLyssa.
Eyes somewhat red and inflamed (cornea).
Eyes bloodshot and painful.
Eyes slightly red, and occasional stitches in r. temple.
Great inflammation in an eye from which gushes foamy pus; pustules around eye; in morning lid puffed up like an eggshell, small pustules on one finger. θDog-bite.
Eyelids fly open involuntarily.
Pressure in l. side, shooting to eyes in evening.
Burning in lids.
Eyelids feel paralyzed on awaking in morning, and appear to be more firmly closed, as if glued together.
Swelling of eyelids after bite of dogs. θIn sheep.
Extreme ulceration of eye, lids closed and puffed up by pus. θIn sheep.

[6] **Hearing and Ears.** Conversation in vicinity of patient may throw him into a most violent agitation. —
Ringing of church bells makes him anxious, and causes a sharp salty taste, with stitches in heart. —
Water poured into a basin, with splashing noise, caused paroxysm to be reproduced, with convulsion and agitation. —
Sudden noise causes involuntary startings.
Hearing water poured out in next room makes him very irritable and nervous.
On crossing ferry, soon after eating, noise which water made caused unspeakable torture in her back. —
Convulsions excited by barking of dog, from great sensibility; any other sudden noise, shutting a door or a blast of wind, produce the same. —
During his attacks of chronic headache, which come after mental emotion or excessive mental exertion and last a day or two, he cannot bear to hear running water; if hydrant is allowed to run in an adjoining room, or even if water is poured into a basin, his headache increases to an insupportable degree.

Google

After the pain following an evacuation had lessened, and he was sitting at open window, the large street waterplug was opened to cleanse the streets, and as soon as he noticed water running down gutter in front of his house, he was seized with violent pains and had to go at once to the watercloset. θDysentery.

If during night, or in morning before rising, he heard pouring out of water in next room, he was immediately obliged to rise and have an evacuation. θChronic camp diarrhœa.

Hearing water poured out brought on convulsions. θPregnancy.

Sensation as if blood rushed to r. ear, then a pressure as from a dull knife, interiorly and superiorly.

Sound as of rushing water in l. ear. —

Buzzing in r. ear.

Hears various noises in night.

Temporary stoppage of r. ear; about two hours afterward while thinking upon it, ear commenced aching; pain extends into teeth and through head.

Tearing pain from lower jaw into ear.

Rending pain in r. ear.

Shooting and stitches in r. ear, from without in.

In morning, pressing in forehead and drowsiness, with stitches passing inward in both ears.

Stinging pressure behind ears; afternoon.

Rush of blood to r. ear; after it a pressure like from a dull point.

Pressive burning in r. external ear.

Burning and heat in ear.

Earache extends into teeth.

Tearing pain a few inches from r. ear.

Pressing from nape of neck into ear.

Above l. ear, headache most severe.

Pressing burning in r. concha, in evening.

The ears feel stiff.

Ear tickles, after rubbing pain.

Itching in a small spot in upper part of both ears, disappears after scratching.

Smell and Nose. Strong odors may start spasms.

During three days her sense of smell, which is always extremely acute, became painfully so, particularly in reference to unpleasant effluvia; action of nostrils extremely painful.

The greatest sensibility to smell of tobacco; tastes snuff while box is one foot distant.

Frequent bleeding from nose; repeatedly some clotted blood in nose.

Google

Tickling in nasal cavity causes sneezing.
Itching in nose all day.
Repeated sneezing, which stops on being interrupted.
Frequent sneezing, mostly early in morning or late in evening, as if a coryza would begin; also when looking at something bright, and from every little dust.
Fluid discharge from nose.
Coryza, with tickling in roof of mouth and in front of nose (relieved by *Phosphor*).
Thick green mucus runs out of nose (horse).
Pain in nose.
Sensation of stiffness in nose, in r. side of neck, and principally in jaws.
Nose feels bruised.
Nose, r. neck and side feel very stiff, more about jaws.
Nose extremely sensitive to touch.
Headache extends into nose.
Nose itches all day.

[8] **Upper Face.** Jawbones feel quite sore.
Both jaws feel stiff; tingling in cheek bones.
Gnawing and crawling sensation in r. zygoma.
Transitory drawing in l. side of face, from cheek bone toward nose, as if in muscles, in evening.
Tearing in r. upper jaw extending into ear, same in temple.
Shooting pains in upper jaw and violent headache.
Darting pains in r. side of face.
Burning neuralgic pain down l. side of face.
A sensation moves about in r. side of face and goes across forehead.
Slight twitchings in face and hands.
Quivering in face.
Facial muscles become variously contorted, countenance changes its aspect frequently.
Spasmodic affections take place in muscles of face, occasioning violent contortions and most horrid assemblage of features; in muscles moving lower jaw, inducing involuntary gnashing and a grinding of teeth, which some have construed into a desire of biting; during convulsive attack expression of face indicates great anxiety and alarm. —
Disturbed look with dyspnœa. —
Expression of face quite variable; reddening countenance often exhibits reflections of utmost mental and physical misery, of most horrible agony. —
Face flushed; complained of his head, said they were running needles into his brain. —
Heat in r. side of face and r. ear, followed by headache in vertex and forehead; as soon as headache gets >, heat

Google

returns; heat comes from within, and spreads from back of neck to ear and into eye and face, accompanied by constant pain in nape of neck, which increases after heat and headache disappear.

A feeling of heat and soreness in middle of l. cheek.

Heat in face, with soreness of l. cheek, from thinking.

Heat in r. side of face, and particularly in eye, where it causes a tickling; returns after drinking coffee.

Face sweat: with sensation of heat; with flushes.

In morning (6 A M.), tickling in l. cheek.

Heat and redness of face.

First heat in r. side of face and in ear, then a quiet aching in front of upper part of head; this headache lessens, the heat increases.

Heat in face in morning, with redness; at times very deep.

Complexion pallid and cyanotic, and expression stupid.

Flushes and headache alternately.

Pale face with squeamishness and nausea.

Face pale and yellowish, almost brownish.

Appearance peculiar; skin sallow, pale or anæmic; bloated all over, but no "pitting." θChronic camp diarrhœa.

Sensation as if she had been bitten in l. side of face near mouth.

Tickling on l. cheek, at 6 A.M.

The scratches on cheek became red, thirty-three days after bite, and on following day looked quite fresh, as if they had been made only a few hours before, but were a little darker in color than newly made abrasions. —

Pimple on eminence of forehead, painful to touch; later one on right.

On l. cheek near nose, towards eye, a pain, <when touched; a pimple with soreness around.

Painless hard nodules on cheek, where a pimple seemed to have appeared; on ninth day a little scurf on it and redness; if picked or pricked, a very disagreeable kind of pain, but not violent, is felt in cheek even a distance from nodule, and here and there deep in upper part of jaw; gets bluish red and soft; discharges, after the scurf is scratched off, lymph and blood.

Slow maturing bluish pimples on face.

Pain in l. cheek near nose, from fifth to seventh day; followed by a hard, painless swelling of size of a pea, turned redder on thirtieth day, and became covered with a small scab; on thirty-second day it grew soft and turned bluish red, particularly around edges; on puncturing, a disagreeable yet not severe pain at some distance from swelling and more inside of cheek; a

Google

small quantity of blood and matter was discharged; on fortieth day the place ceased to discharge and healed.

[9] **Lower Face.** The jawbones feel sore; aching in lower jaw.
Violent jerking pains in lower jaw.
Tearing in r. lower and upper jaw up into ear.
When reading or writing, felt a pain in lower jaw; the longer she reads the < it got.
‖ Masseter muscles not affected by spasms.
During phrensical fits, snapping motions are made with jaw of an involuntary or spasmodic character, bearing some resemblance to motions of biting. —
Attempted to bite her fingers before death. —
Biting snapping with convulsions. —
Jaws feel stiff; crawling in zygomatic arch.
Lower jaw stiff and painful; with inclination to yawn; with headache; imagines he cannot open mouth.
Jaws feel sore and stiff; a great disposition to press hand against lower jaw.
Sensation as if she would have mumps.
A chilling, biting, burning sensation on inner side of r. upper lip, as if a corroding acid had touched spot; sensation passes up and back, in a lesser degree, to r. nasal cavity, where it produces tickling and sneezing; subsequently increase of saliva; after several hours.
Lips cracked on inside of middle line.
Spasms with froth before mouth. —
It seldom happens that froth is observed around outside of mouth. —

[10] **Teeth and Gums.** ‖ Grinding of teeth.
Painful sensation of coldness shoots into teeth, it passes from lower posterior part upward and into jaw.
Teeth hurt more on r. side, it is a kind of aching dulness.
Sensation in r. lower jaw, in bone as it were, it shoots into root of a decayed tooth.
Shooting pain in r. eye tooth, preceded by burning, passing down œsophagus.
Frequent shooting pain in teeth; all the teeth ache.
Aching in carious root of a molar.
‖ Toothache and other complaints during pregnancy, with internal ebullition of blood from chest to head; head feels as if filled with air to bursting.
Teeth very sensitive; feel as if on edge.
Headache and earache extend into teeth.
Chilling painfulness starts in teeth of r. side behind and below in bone of lower maxilla and passes upwards.
Neuralgic pain in gums, principally in front. —
‖ Aching in swollen gums on r. side.
Drawing in gums, most in front.

Google

[11] **Taste and Tongue.** Food does not have right taste.
Scrapy taste, with much saliva.
Bitter taste in morning, on awaking.
Salt victuals tasted too strongly of salt, other food seemed to lack salt.
Speech is labored, short and pathetic. —
Difficult, incorrect speech. θStricture of throat.
Impediment in his speech, would begin a sentence with difficulty after several fruitless attempts; some palatal vowels he could not pronounce, others but incorrectly. θSpasms of throat.
A cool feeling on tongue like after peppermint.
Pain in root of tongue and l. side of throat.
Peculiar pain at root of tongue as if it was swollen.
Tickling, queer feeling in throat and root of tongue.
Tongue usually moist and clean; frequently slightly coated, more seldom dry and thickly coated.
Tongue coated with thin layer of yellowish white fur.
Tongue coated with foam. —
Tongue dark red on sides, coated in centre.
Tongue large, pale and flabby. θChronic camp diarrhœa.
Pricking sensation under tongue. θLyssophobia.
Ranula returns periodically, with dryness of mouth, < in afternoon, soreness when chewing; with hemorrhoids and constipation.

[12] **Inner Mouth.** Feeling of coldness, like essence of peppermint.
Severe pain passing from mouth upward through head and down into neck.
Constant sensation of intense dryness of mouth and throat. θChronic camp diarrhœa.
Dryness in mouth: in afternoon; with thirst.
Sore mouth, feels as if there were lumps in it.
Much tenacious mucus in mouth and throat.
Tough, short frothy phlegm in mouth (horse).
Frothed at mouth, attempted to spit out with much difficulty (before death).
Saliva more viscid, constant spitting, feeling of general malaise.
Saliva runs together in mouth, without occasion; flows back and is swallowed.
Saliva in back part of mouth like after sugar, or when liquorice is swallowed.
Mouth full of saliva, total disinclination to drink.
Great flow of saliva and difficulty in swallowing liquids.
Accumulation of foaming saliva, with inflammation of throat.
Saliva more plentiful, but thin and of yellow color.

Google

Secretion of a thick and frothy saliva, but without any morbid repulsion towards drinks.
Ejected saliva is frothy, slimy and ropy.
Much tenacious saliva, with sore throat.
‖Large quantities of tough saliva in mouth, with constant spitting. θDiarrhœa.
Saliva is not ejected, but runs from open mouth. —
Quantities of saliva are collected in and about mouth; presents a frothy appearance; patient is constantly endeavoring to get rid of it by wiping it with a handkerchief, or spitting it out with great force. —
‖Spits all the time small quantities of a frothy saliva; with pain in limbs.
‖‖Frequent spitting. θLyssophobia.
‖At 10 A.M. began to spit a great deal, continuing all day till supper. θLyssophobia.
Dark, coffee colored fluid oozed from mouth (before death).
Much mucus in throat and nose; hanging in posterior nares.
Scraping sensation on palate where cool sensation had been, slight coughing does not reach spot, hemming and hawking does occasionally.
Fauces and pharynx pervaded by an equally diffused purplish scarlet blush, no pain in throat, except when patient attempts to swallow. —
Follicular enlargement is common, involves also pharyngeal follicles and lymphatic glands in neighborhood of jaw; similar swelling upon inner side of epiglottis, pretty firm and characterized by abundance of lymph corpuscles found in gland substance. —
Hyperplasia and recent swelling of tonsils and follicular glands of tongue; flat, roundish swellings at root of tongue, in middle of each one of which was seen dilated opening of a follicle. —
Sensation as if uvula was too long; it is slightly inflamed but not elongated.
Mucous membrane of pharynx and epiglottis of a deep red color and injected; soft palate frequently reddened and swollen.
Entire mucous membrance of mouth and pharynx was of an equally distributed pink without any swelling.

[13] **Throat.** ‖Slight redness of palate and throat, with spasm of œsophagus and difficult speech.
‖Sore throat, as after swallowing red pepper.
Quite a sore throat, constrictive sensation much < when attempting to swallow liquids, which he could not do without pain; solids not painful.
At 11 A.M.: soreness in throat till noon.

Sore throat: very severe; all day; in forenoon; > at 6 P.M.; after supper (7 P.M.); not able to swallow without great pain; as if swelled; as if raw; aches; on r. side; with headache; with soreness in eyes; with increased tenacious saliva.

Cooling sensation in œsophagus.

Throat quite sore, headache in both temples, numbness in both arms, slight pain in lumbar region all day.

Fauces and pharynx as far as one can see are slightly inflamed, there is inclination to swallow, and increase of saliva.

Painful sore throat, throat much inflamed, headache <, tenacious mucus in mouth and throat; great weakness with aversion to move.

Inflammation of throat with foamy saliva.

Violent spasm in throat as if he would suffocate, from 2 P.M. to 9.30 P.M.

Great heat in throat and about heart.

Sudden jerks going from œsophagus to heart.

‖‖Sore throat, constant desire to swallow; much saliva and feeling as if beaten.

‖Periodical spasm of œsophagus, continual painful inclination to swallow without being able to swallow anything; constriction is most severe when taking water into mouth, if he tried to swallow it forcibly, he had burning and stinging pain in throat, cough and retching which forced fluid from his mouth; difficult speech.

‖Difficulty in swallowing; particularly fluids.

Dryness in throat and difficult swallowing, with slight erysipelatous redness in pharynx.

Stinging sensation when swallowing.

Sore throat at 2 P.M., with difficulty in swallowing fluids; felt as if epiglottis was paralyzed.

Sore throat with great inflammation, could only swallow with difficulty, fluids returned through nose.

A peculiar sense of constriction in back of throat at 3 P.M., < at 4 P.M., could not swallow without pain; disappeared at 6 P.M., but returned at 7 and lasted until bedtime.

Sore throat with constriction, particularly when attempt- to swallow fluids, which is painful.

Terrible pain in throat, particularly when swallowing.

Constant inclination to swallow, or remove phlegm which seems to stick between nose and throat.

‖Constant desire to swallow, painful and ineffectual. θSpasm of throat. θStricture of throat.

Some will drink water without difficulty. —

Activity to drink is restored before sudden death. —

Warm drinks, milk, soups and wine are often more easily taken than water. —

Google

Imagines that he cannot swallow anything. —
Difficulty in swallowing can, at first, be overcome by firm resolution. —
Declared he could not swallow for something in throat that interrupted the passage.
Swallowing more difficult at 5 P.M. than in morning (after *Bellad.*).
Solid food sometimes consumed with great difficulty.
Absolute impossibility to swallow anything, whenever attempt is made, attacks of suffocation and spasms of respiratory muscles as well as of muscles of face, neck and rest of body, with great mental disturbance. —
After some days patient equally abhorred solids as well as fluids; when importuned to eat, he was thrown into convulsions. —
Any attempt to swallow bread occasioned greatest agony.
Often happens that they succeed in drinking after those who were around them have retired, or when attempt is made with closed eyes and with aid of a straw. —
No disgust for fluids until difficulty in swallowing came on; when fluid touched fauces it seemed at the peril of his life. —
At 3 P.M. felt a strange constrictive sensation in back part of throat, never experienced before, < at 4 P.M., could not swallow without great pain; went off at 6 P.M.; returned in an hour, lasting till 10 P.M.
When taking water into mouth, constriction was greatest. θSpasm of throat.
Periodical spasm of œsophagus. θStricture of throat.
Attempt to drink water starts convulsions. —
Had difficulty in speaking; a connected sentence could only be uttered after making several fruitless attempts; palatic letters could not be pronounced at all, or were pronounced wrong. θŒsophageal spasms.
At 10 A.M. felt a soreness and suffocation in back of throat.
Violent spasm of throat at 2 P.M., feeling as if he was about to be suffocated; went off at 9 P.M.
A ball, as it were, rises from stomach up to throat, seems to threaten suffocation.
Sensation of a lump in throat, with desire to swallow.
A terrible pain in throat all day, and great pain in swallowing.
Pain extended upwards from wounded arm towards throat.
Stitching sensation when swallowing.
Burning stinging in l. side of chest, with palpitation in afternoon.
Burning stinging in throat. θStricture of œsophagus.
Trying to swallow water forcibly, it caused burning and

Google

stinging in throat, besides cough and gagging, which forced out contents of mouth. θSpasm of throat.
Burning down œsophagus.
Great heat in throat and around heart.
A slight redness of affected parts. θSpasm of throat.
Intense and deep seated inflammation of mucous membrane of mouth, gums, throat and larynx, with smarting pains on swallowing.
Feels as if he had swallowed a small quantity of red pepper.

"**Appetite, Thirst. Desires, Aversions.** Appetite good, but digestion deficient; a portion of nearly everything he ate passing bowels in an undigested state. θChronic camp diarrhœa.
Voracious appetite; swallowed wheat without chewing.
Little appetite in morning; want of appetite, headache, depression.
Want of appetite. θHydrophobia of sheep.
Could take no nourishment (with spitting), could not remain at table. θLyssophobia.
Symptoms of digestive organs extremely variable; excessive thirst, vomiting, constipation.
Thirst and disinclination for food.
Felt very thirsty and had no aversion to drink, on contrary drank large quantities of water. θLyssophobia.
Thirst much increased, complains of burning pains in throat.
Thirst and desire to drink, but is prevented from doing so by spasmodic constriction of throat, attempts excite most disagreeable sensations, even spasms.
Had not been drinking any water for some time, only some hot tea. θDysentery.
Drank some strong tea at supper, after which salivation discontinued until 8 P.M., then commenced again. θLyssophobia.
No appetite, except for sour things.
Called for burnt brandy and drank it; next day a strong rising in his stomach and an impossibility to drink.
Excessive desire for salt.
First days, smoking unpleasant; after first week, a crazy, insatiable desire to smoke, he does not allow pipe to cool.
Picked up bits of cotton and shreds of cloth; bits of chip and coal were devoured whenever getting near; anything that was within reach and could be grasped by the jaws was gnawed away very quickly; a dog.
Urine and feces were frequently devoured as soon as they were voided; a dog.
Abnormal cravings during pregnancy.
Aversion to water; imagines he cannot swallow; says he is thirsty, but cannot look at water or hear it poured out.

Google

Aversion to water of place he arrived at. —
Aversion to drinking water, but can take small quantities of chocolate. θDiarrhœa.
Aversion to fluids; great sensitiveness to every breath of air and reflection of light.
Since bite she has a frightful aversion to water; at first she could wash herself by dint of great selfcontrol, but later not at all.
Wine tasted poorly and affected him more than usual.
Aversion to fat food and drink; there remains a long greasy aftertaste, < after mutton.

15 **Eating and Drinking.** Before dinner a very strange sensation, a strangeness of whole body.
Warm drinks, such as milk, soups and wine, are more easily taken than water.
Inability to take solid food, or else it is consumed with greatest difficulty.
At times ability to drink is restored before death.
After supper, 7 P.M., feels >, less sore throat, no difficulty in swallowing.
After eating: all cooling, burning, wavelike sensations disappear, also congestion; pressing inward in epigastrium; lasciviousness with sexual excitement; lewdness with a sensation of weakness in parts, but inclined to an emission of semen; increased lassitude and drowsiness, slept an hour without making it any better.
After meals very ill disposed, every noise irritates him; if others eat apples, or hawk, or blow their noses, it brings him beside himself; passes away after siesta and coffee.
After dinner and in evening: disinclined to think.
After supper: pressing in spleen.
Nausea after eating eggs or fat food.
After coffee: more frequent beating of pulse; heat in face.
Tobacco affected him more than usual.

16 **Hiccough, Belching, Nausea and Vomiting.** Squeamish sensation; a want of appetite in evening, followed by great lightness of head.
Nausea: with giddiness, headache and pale face; with pale face after diarrhœa; food does not taste right; and loss of appetite in evening; 10 to 11 P.M.
Hiccoughing.
Continual belching of wind; convulsive eructations.
Belching in forenoon; sour, in afternoon.
Gagging when he forcibly attempts to swallow water, forces it out of his mouth. θSpasm of throat.
Rising of bile into throat during day, at same time an unusual quantity of tenacious saliva in mouth and throat.
Nausea and vomiting, after diarrhœa.

Google

Vomiting: of food; of fluid while drinking, followed by faintness; of what was eaten at supper, at night in sleep.

Nausea and vomiting of a foamy, mucous, dark colored substance resembling coffee grounds.

[17] **Scrobiculum and Stomach.** Pressure in epigastrium after eating.

Suffocating pain at pit of stomach.

Distress in epigastrium and præcordial region with dyspnœa.

In epigastric region sensation half coldish, half burning.

Pain in epigastric region, deep in, as if in or behind duodenum.

Aching, with coldness in stomach.

A cooling pain in stomach, with here and there a sharp and pointed pressure.

A sense of motion in stomach.

Loud gurgling in l. side of stomach, becomes more continuous, like water from a bottle.

A loud cooing noise in stomach, to l., and after a while repeated as a quick croaking.

Great oppression in stomach, has to open her clothes.

A slightly hot, quiet, aching sensation below chest, sometimes lower down, often in entire abdomen, as if in intestines.

Stomach empty, or may contain a dark, opaque substance, frequently resembling coffee grounds; in mucous membrane of stomach and intestines, decided injection of bloodvessels; upon former frequently hemorrhagic erosions.

[18] **Hypochondria.** A pressing pain: in r. side, near last ribs, with breathing; in hypochondria, after quick walking.

Shooting in r. side of abdomen.

Pain in region of liver and r. kidney.

Pain from within outward in r. side.

Fatty degeneration of liver. —

In uper part of abdomen, l. side (region of stomach and spleen), a continual gnawing pressure in forenoon.

Aching from below waist to feet.

Pain in l. side, at 8 A.M.

Pressing pain in region of spleen when walking fast.

Painful throbbing as if an abscess was forming in region of spleen, but very deep in, exact locality is half way between median line and outline of l. side; it lasted eight days; with it departed remnant of a similar affection in this locality, against which eleven years of allopathic treatment had proved of no avail.

Under mamma a hot sensation, quietly aching, sometimes same lower down or in whole abdomen, as if in intestines.

Google

Tearing from l. hypochondriac region to right.

[19] **Abdomen.** A rending pain across abdomen from l. to r., in evening when in bed.

Pain in r. side of abdomen proceeding from uterus.

Pain down l. side of abdomen.

Pressing in abdomen.

A drawing in abdomen below navel.

Cramp in lower part of abdomen.

Painful sensation deep in upper portion of abdomen, as if behind duodenum; in forenoon.

Colicky pain in abdomen; when it subsides, stinging in small of back.

Severe bellyache, lasting an hour, awoke from sleep at 11.30.

Violent bellyache.

Sticking: in r. side of abdomen, when taking a breath; in abdomen above hip; with feeling of motion in lower part of abdomen.

Stitches: in r. side of abdomen; in belly, an inch from crista ilea.

Shooting in abdomen.

A sense of motion, with slight stinging in middle of abdomen.

A burning, waving and surging, proceeding from abdomen, spreads through entire chest to head.

After cooling sensation and scratching in œsophagus had subsided, there appeared a half cooling, half burning sensation in entire upper part of abdomen.

!General soreness in whole of lower abdomen.

Distension of abdomen; every evening.

Rigidity of muscles of abdomen.

From both loins a drawing downward, followed by cramps in lower abdomen.

Aching: in loins; into back; down to feet.

Dull pressing pain above r. inguinal region on a defined place.

Pain in r. groin, with some swelling.

Drawing, dragging pain in groins; heavy, bruised feeling in thighs.

Drawing from groins downward, then cramps in abdomen, accompanied by dizziness.

Aching from groins to feet, in evening.

Pain in both groins; in r., two small kernels under skin, very painful.

Inguinal glands very much swollen, they pain for two hours.

[20] **Stool and Rectum.** !Tenesmus during and after stool.

!!Dysenteric stools with tenesmus; renewed as soon as he hears or sees water run.

!When in morning some water was poured out from

pitcher into basin, pain and desire to stool returned. θDysentery.

‖When he sees or hears running water, violent pain and tenesmus return; in a case of dysentery in Summer, of six weeks' standing, in which stools were most frequent in night, consisted of bloody mucus and were followed by pains in rectum and small of back, which forced patient to walk about in spite of great weakness; could neither stand nor lie down; had drank no water whole time, only hot tea occasionally.

‖Stools watery and profuse, with severe pains in lower bowels; frequency of stools not uniform, some days five or six, others fifteen or twenty, usually more frequent in morning. θChronic camp diarrhœa.

Diarrhœa: with much pain, most during day, eighteen hours after dose, lasting twenty-four hours, with pain in lower part of bowels; < in morning; followed by nausea as if she would have to vomit; attended with violent pains early in morning; after stitches in side.

‖Chronic diarrhœa contracted in Southern camps.

Difficult passage of flatus as if anus resisted expulsion.

‖Stools of bloody mucus. θDiarrhœa.

Involuntary stools.

‖Straining to evacuate, causing a violent pain in small of back and in rectum, afterwards compelling him to walk about, although weak. θDysentery.

Bowels constipated; stool very dark in color.

Stool became dark and thickish in appearance, mingled with shreds of wool or cotton, bits of wood and coal that had been swallowed; a dog.

Passage of bright red blood from anus, with terrible burning and pricking in it as from thorns.

Difficult stool, piles protrude.

Hemorrhoidal troubles, passes blood from anus during catamenia.

Throbbing in anus externally.

Darting into anus causes contraction.

[21] **Urinary Organs.** Dull pressure in region of l. kidney.

Flying pains increase, seize urinary organs; create a difficulty and heat in discharging urine.

Some pain about neck of bladder in evening.

A cooling, burning, congested feeling in region of bladder, in evening.

Profuse watery urine, in evening.

In morning and evening urine is yellowish brown, turbid and diminished in quantity; reddish sediment.

Urine dark, brownish, with whitish sediment, visible when urinating upon snow.

Google

Brighter colored urine and in larger quantities, but not more frequent.
Urine scanty or muddy, often of a dull, greenish yellow color; dog.
A whitish yellow sediment in urine.
Urine scanty, no albumen; dark, cloudy, frequently contains sugar, evidently the result of lesions in medulla oblongata. —
‖Urine too scanty and high colored. θChronic camp diarrhœa.
Urging to urinate, after a slight accumulation.
‖Constant desire to urinate on seeing running water; urinates a little at a time.
Tickling burning in urethra near orifice after urinating.
After passing feces and urine there is an urging to urinate again, it moves slowly several times from above downward without succeeding in passing a drop.
Prostatic juice passes after urinating.
Since fourteenth day after bite says she has passed no water; passes daily from time to time a little dark blood from uterus, differing in quantity and quality from menstrual flow.
If he passes but a small quantity of urine his sense of weakness is increased; weakness after urinating as if he passed his strength away.

Male Sexual Organs. Inclined to lascivious ideas, although there is not much sexual desire.
Lasciviousness: after eating, with feeling of weakness in parts; with erections in afternoon.
Erections with but little desire.
‖Strong erections, without sexual excitement or thoughts, in evening while undressing in a cold room.
Sexual indifference with erections, even during act of coition, which is perfectly performed.
‖Increased sexual desire. θDropsy of spine with sheep. θHydrophobia of sheep.
Priapism, with frequent seminal emissions.
‖Satyriasis in a stallion; hot breath streamed from nostrils.
Insufficient seminal discharge.
‖Semen is discharged too late or not at all during coition.
During a very strong and warm embrace excitement diminished at its height, and there followed no emission.
No emission during coition, but afterwards semen escaped unconsciously in sleep.
A seminal emission with dreams, quite unusual.
Without being preceded by an erection there is a discharge of prostatic fluid, smelling salty and musty; the glans penis is dry.

Google

Feeling of weakness around and in sexual parts.
After coition, with difficult and tardy emission, there is a sensation of emptiness and discomfort in parts, lasting all of next day.
Painful urging in penis, as after excessive coition, accompanied by lasciviousness.
Itching and burning on corona glandis, with tickling and discharge of greenish pus, in afternoon.
Glans is dry and sticks to foreskin.
Burning and tenesmus as if in prostatic gland and in urethra; in afternoon.
Itching on os pubis, l. side, extending to root of penis.
Increased peristaltic motion of scrotum, all afternoon and evening; motion of testicles also increased.
Scrotum tightly drawn up for two or three weeks.
Hanging down of scrotum on eighth day, while before and after it was contracted.
Painful sensation in testicles.
Pain in testicles on day after an embrace, particularly felt towards noon and first afternoon hours.
‖Hydrocele.
‖Atrophy of testicles; testicles diminish in size, first l., then right.
‖‖Complaints resulting from abnormal sexual desire.

Female Sexual Organs. ‖Aphrodisiac sense deficient. θProlapsus uteri.
Pain extending from uterus into breast and r. side of abdomen.
‖Insatiable heat; with cows.
Pain in l. ovarian region, uneasiness there.
Bearing down in uterine region.
Sharp pain in uterus, shooting down to labia.
Occasional acute pain in and below uterus; at times a violent shooting pain in l. of vagina, extending upward, so severe as almost to cause her to scream.
πIncrease of uterine sensitiveness, conscious of having a womb.
‖With a painful sensitiveness of womb, slight degree of prolapsus, so that after any considerable physical effort there would be a strong conviction that it was prolapsed.
‖Considerable pain in lower part of back, with a soreness felt through pubic region, which was clearly proved to be in neck of womb by an increase of pain from pressing finger on neck; principally at point where finger came in contact with womb. θSubjective prolapsus.
‖Womb high up in abdomen, enlarged in top and fundus.
‖Abrasion about os tincæ (treated with caustic), some tumefaction of cervix and walls of vagina remained, showing a low degree of inflammation. θProlapsus.

Google

‖Speculum showed os tincæ of size of a small goose quill, smooth and normal, except that there was a string of bloody mucus of size of os hanging from it, so tough and viscid that it was difficult to wipe it away with a sponge. θSubjective prolapsus.

‖Swelling of womb in all its parts, extending somewhat into vagina. θProlapsus.

‖Bright redness of vaginal portion of womb. θProlapsus.

‖After menses found that prolapsed uterus, a case considered incurable, was in its proper position, and continued so after an interval of two months, though she has done much to test the cure, lifting a heavy child in and out of bed at night, when she was necessarily without her supporter.

‖Prolapsus uteri of seven years' standing.

‖Metritis, prolapsus or induration of uterus; in cows.

A girl, æt. 14, and another, æt. 21, took the 30th after their catamenia had ceased for three days, next day it reappeared.

Catamenia appeared (after a few globules of 30th) two weeks before time, and very copious.

‖Menstruation, with hemorrhoids, pulsations in anus and weakness of back.

‖Menses rather frequent, protracted, dark, and at times fetid. θProlapsus uteri.

‖During interval of menses "a show" that seemed quite obstinate. θProlapsus uteri.

‖Anæmia in consequence of disturbed sexual function.

Continual discharge of offensive mucus from uterus for several months.

White discharge like leucorrhœa, which weakened her; never had leucorrhœa.

Slimy leucorrhœa.

‖Severe leucorrhœa, with pains in back and lower part of bowels; sore vagina.

‖‖Sensitiveness of vagina rendering coition quite painful. θProlapsus uteri.

‖Menses too profuse, at times a little too frequent. θProlapsus.

Discharge of blood from rectum during menses.

‖Weakness in back, with copious catamenia.

‖Tearing, followed by pressing downward, could not make a hard step during catamenia.

[31] **Pregnancy. Parturition. Lactation.** ‖During pregnancy: strange notions, desires or cravings; rush of blood from chest upward; toothache, backache and other complaints; great sense of bearing down; intense pain from inflammation of os and cervix (formerly

Google

treated with Caustic.); great soreness in lower part of back and bowels.

‖All changes of position that tilt or rotate to a moderate extent the os uteri cause much pain. θDuring pregnancy.

‖Spasms excited whenever she attempts to drink water, or if she hears it poured from one vessel into another; sight or sound of water affects unpleasantly, even though desiring water. θPuerperal convulsions.

‖Since childbirth more pain with coition and a dislike to it. θSubjective prolapsus.

‖Since cessation of lochia a severe leucorrhœa; pain in back and lower part of bowels; soreness of vagina.

Both breasts swollen when waking in morning, she can hardly get up; three mornings in succession; same swelling of breasts at night when opening her dress.

Voice and Larynx. Trachea and Bronchia. Voice altered in tone; tones much suppressed; hoarse; rough; harsh and weak (last stage); shrill, inarticulate sounds; shrill sounds of utmost despair, or occasioned by violent expirations; very shrill and piercing bark, changing near its termination into a distressing, continuous howl (dogs).

Epiglottis crisp and dry. —

Inflammation or redness in superior part of trachea.

‖Pain next to larynx, on r. side, felt on turning neck and on pressure.

Respiration. The breath is hot; sulphurous. —

‖Hot breath streams from nostrils. θSatyriasis in a stallion.

On inspiring: a cooling sensation; stinging in l. side.

Can scarcely speak from weakness.

Weakness of chest; tired from talking or reading.

When breathing, stitches in r. side of abdomen.

Breathing accelerated or rattling in last stage. —

Asthmatic sensation, air going through larynx makes a kind of wheezing.

Sighing and groaning respiration, may be occasioned by violent expiration.

Frequent sighing and sobbing.

A general feeling of discomfort in chest forces him to deep breathing or to emit sighs, which alleviate.

‖‖Sighing, with pain in heart.

Now and then he has to take a deep breath, with coldish feeling far back and deep in throat, followed by great relief.

At 9 A.M. suffocating feeling in chest, had to sigh several times, lasting till 10½ P.M., when he fell asleep.

Breathing laborious and difficult, quickly repeated, and attended with a constant and peculiar kind of hawking,

Google

in order to expel breath, which has been taken for an imitation of bark of a dog.

‖Dyspnœa: with flatulency, cough and rattling in chest; with sighing, groaning respiration; from cardiac pain; < lying down.

Constriction about breast and difficulty in breathing become so extreme, that on a blast of air blowing on them they are seized with greatest distress, cover their mouths, seem ready to expire, as if struggling for breath.

On attempting, at request, to drink a little water; a violent spasm of muscles of neck and throat came on, preceded by a deep sigh or gasp, as if she might just have plunged into cold water.

Difficult breathing and spasmodic sensation in trachea.

Suffocative spasm in throat.

Convulsive breathing and spasm in muscles of throat, either come on together or breathing precedes throat spasms.

The convulsive breathings during paroxysms are very similar to those produced by a sudden cold water bath, and are always combined with spasms in throat muscles.

Oppression in breathing before a severe suffocative attack occurs, induced by spasmodic contractions of respiratory muscles, combined with spasmodic, alarming constriction of pharynx.

Breathing during paroxysm gasping, irregular and usually quite rapid, often with decided dyspnœa.

[27] **Cough.** Barking like a dog, with a sort of noisy cough; headache.

‖Coughing when attempting to swallow water forcibly, forces it out of mouth. θSpasm of throat.

‖Cough and gagging. θStricture of throat.

[28] **Inner Chest and Lungs.** Chest and abdomen feel expanded; expanding chest seems to invigorate him, though usually it fatigues.

Pressing in chest; between tenth and eleventh ribs, r. side.

Rheumatic pain across chest when drawing her breath.

Pain as if in nerves, from side of chest up to throat.

Cramplike pain and stitches in l. side, followed by diarrhœa and afterwards nausea and inclination to vomit.

Pinching pain: at fourth rib on r. side.

Stinging in lower part of chest.

Stitches under l. mamma, going towards left.

Shooting between l. mamma and last ribs.

Shooting, flying pains through l. chest.

Burning surging through chest.

Burning stinging in l. side of chest when taking a deep breath.

Google

Burning like heartburn in r. side of back, in region where ribs end.
Blood mounts from chest to head.
Extending to chest, pain in uterus.
Great weakness in chest, particularly when walking and reading aloud, chest feels fatigued; some deep pain in l. side.
Upon pleura is often seen a soaplike deposit, as in case of cholera.
‖Gangrene of lungs, caused by pneumonia and sexual excitement. θSatyriasis in a stallion.

[20] **Heart, Pulse and Circulation.** Pain in l. chest on a small spot in region of heart; more backwards and to l. in chest.
Dull pain in heart all day, with a pinching pain about fourth rib, r. side.
Constant pain in lower part of heart.
A very strange and unusual feeling in heart, something like bands compressing it, in middle of chest, and as if needles were sticking in it, a dull kind of stitching pain, very painful, alarming and disagreeable.
Pain in heart entirely gone, but every two or three hours has a twitch there.
Painful shock or jerk from lower and hind part of œsophagus towards heart and front of chest.
7 P.M., slight, dull shooting pain in heart, lasting till he went to sleep at 10½ P.M.
Considerable pain in heart, and a corresponding pain in r. side; a severe sticking and shooting pain, producing shortness of breath and sighing.
At 11 A.M. two or three stitches of a shooting kind in heart, lasting a few minutes.
Stitches in and around heart. —
Pricking sticking pain in heart. —
Stinging, sharp pain in heart. —
Sticking pains at intervals in heart.
Sharp, shooting pains in region of heart, lasting four hours.
At 9 P.M., violent pain of a sticking character in heart and to l. of it.
Stitches in heart from ringing of church bells.
‖Stitches in heart, more while walking; they would kill him if they continued.
‖Heart had for three months not been free from a sticking, drawing, squeezing pain, result of an attack of rheumatism and cold, together with a palpitation and difficulty of breathing.
Violent pain in heart, as if it would burst or had needles running into it.

Google

Heat and burning in heart.
Burning pain around heart and in forehead.
Pain in heart: with headache; with sore throat and heaviness in legs.
Sensation going from heart through to back, with sinking.
Pain in cardiac region, to which he is subject, is < half an hour after, but much > in several days.
While writing, a burning ebullition and gurgling from upper part of abdomen through chest and head, at first followed by a pain in ear; now a pressing stinging in inner upper vertex to r.; as if a hot, wavelike stream was moving on and spreading outward, but not extending to spine or limbs.
Heart palpitated violently and felt as if it was coming up into throat; drank several mouthfuls of water, which relieved.
Palpitation causes anxiety.
Feels beating of pulse through whole body, and from time to time like a slow rising wave through throat into head, followed by a sensation of a momentary rush of blood.
Pulse: steady, but rather full and hard, about ten beats above normal standard (80); slightly accelerated and hard, being more frequently small than full; quick and irritable; 160; becomes gradually weaker and quicker, especially after paroxysm, 120 to 180; frequently irregular, becoming variable in its rate, and this variation takes place with great rapidity; unequal, some beats stronger, some quickened; weak, quick, intermitting; very small, irregular and very rapid (last stage); weak, quick and intermittent (latter period); becomes constantly more rapid and smaller, until at length it is threadlike, and finally no longer can be felt. —

[30] **Outer Chest.** The clavicles feel as if they would slip from their sockets; has to place arms akimbo.
Quivering about sternum.
Spasmodic tearing pain under l. ribs; at same time it runs to anus, where it causes a constriction; also at same time a tearing between skin and flesh down thigh to knee.
Pressure: on sternum between mammæ; between last ribs on r. side.
Stinging in l. breast (between mamma and last ribs).
Chest as if beaten, in evening.
Soreness across chest, both breasts swollen; when waking in morning can hardly get up; three mornings in succession.

[31] **Neck and Back.** Constant pain in neck.
Going to neck: pain from head and from back.
Pressing in neck and up back of head.

Google

From neck heat passes to ear and face.
Pressure and drawing pain in neck.
A stitch in nape of neck.
Muscles of neck and breast, frequently entire muscular system, contract spasmodically.
With inward heat, pains in neck, < if headache is >, or heat in r. side of face.
Burning pain in neck.
Throbbing pain extending into neck.
Neck feels stiff; r. side of neck stiff; muscles felt stiff in morning.
Tearing, stinging and stiffness in neck.
Stiff neck with rending and shooting.
Pain in cicatrix and also some stiffness in muscles of neck and throat.
Pain in muscles of neck and along cervical portion of spinal column.
From nape of neck a heat draws over r. ear into r. eye and face, seems to pass from within outward.
Neck feels stiff, held himself more erect than usual.
All day difficulty in moving head.
Stiffness in joints of neck; if she allows her head to hang awhile, it is difficult to raise.
Neck feels more comfortable when, in sneezing, she throws head back.
Emphysematous swelling of subcutaneous cellular tissue of lower part of neck; may extend along upper portion of breast and into mediastinum.
Sterno-cleido mastoid muscle on each side stands out like a thick cord; a look of mingled anxiety and terror on countenance.
Head feels lopsided and as if something was drawing it towards shoulder.
At 2 P.M. laid down, found his head twisted to l. side; under ordinary circumstances would very soon have changed position, but to his surprise found it quite comfortable and fell asleep; woke at 4 P.M., felt a numbness in l. side of head, and flesh of lower part of body looked like gooseflesh.
As if head was being drawn to shoulders.
Cramplike pressure under r. shoulder blade.
Pressing pain under r. shoulder blade and between scapulæ.
In back, near r. shoulder blade, a pressing with heat, draws into nape of neck, thence into muscles of l. upper arm.
At 2 P.M., severe pain across back between shoulders and waist.
A pain or ache in and between both shoulders, as if a heavy weight was there, lasting two hours.

Google

Pressing, running from between shoulders to occiput and across r. ear, in morning.
Below r. shoulder blade a pressure; not pressing from out inward or > by bending backward.
Pressure in back, five inches below point of r. shoulder, one inch from spine; had same sensation during each of her pregnancies, always on r. side, inward from lowest rib to breast bone.
Stinging: below r. shoulder blade; in cervical vertebræ.
Severe backache all day, and numbness of hands.
Spine aches; r. side of throat sore.
‖Backache and headache.
Pain in back across hips, lasting all day.
Pain in back and both groins.
Burning in back near last ribs, r. side, like heartburn.
Pressing in region of kidneys; dull pressure in region of left.
At 4 P.M. violent pain in r. kidney, lasting an hour.
Pain from 4 A.M. till evening in both kidneys and across hips, severe and a little burning, > at 9 P.M.
Back extremely sore; as if beaten, in evening.
Pains with cutaneous hyperæsthesia along vertebral column.
Could not bear least touch along whole vertebræ; slightest touch produced an irritability akin to convulsions.
‖Sheep turn and wriggle their backs because they cannot bear heat of sun; increased sexual excitement; symptoms pointing to madness; scratching their backs appears to be agreeable to them, as they remain quiet and make a peculiar motion with their mouths, which does not express pain.
Going to back from heart, sensation with sinking.
Want of strength in back, must lean against back of chair in sitting.
Weakness in region of kidneys, loins and sacrum.
‖Great weakness in back, as if it would split and fall apart. *θ* Lyssophobia.
‖A sore lameness in back, with some degree of soreness in lower abdomen. *θ* Prolapsus uteri.
Pain in lower part of spine severe.
‖Considerable pain in lower part of back, with a soreness felt through to pubic region; pressing finger on neck increased it.
Pressing pain in sacrum, r. side; later it moves to middle of back (repeated eight times)
Shooting through small of back.
‖Disease peculiar to sheep, termed the "gid;" dropsy of spine.

[32] **Upper Limbs.** Pain on top of r. shoulder joint.

Pain in l. shoulder joint, as if beaten and paralyzed; lameness in l. axilla.
All day a tearing, then a stinging in l. shoulder joint, as if in middle of bone, down arm and into finger; and after getting up from bed, for one hour in r. arm, then all day in left.
1 P.M., slight pain in r. shoulder joint; also in head.
Has a lump in r. axilla.
Rheumatic pain, first in r. then in l. shoulder.
Feeling of great weight on shoulders all day.
Stinging tearing pain in shoulders, passing down through bones of arm to fingers.
Sudden sharp, darting pain, in bitten hand, extending up arm to shoulder and base of brain.
Pain down wounded l. arm; generally in afternoon and evening, < 10 o'clock.
Arm aches and is swollen.
Aching in r. arm (the l. is bitten); feeling as if weather was going to change.
Slight twitching in r. arm.
A sting in sore arm once in a while, which makes her start all over (dogbite).
Felt two shocks down wounded arm as from a galvanic battery, clear to finger ends.
Cramp in arms.
The pain up arm was followed by cramps and drawing in back and limbs of bitten side.
Numbness in r. arm at 4 P.M., lasting till bedtime.
At 10½ P.M., soon after taking last dose, numbness in r. arm.
Weakness in arms.
Right arm becomes so heavy and inactive that writing is too great an exertion, and he allows arm to drop.
After some pain in arm (finger had a small wound exposed during dissection of a mad dog, forty days ago), feeling of malaise and fatigue, followed by death.
In l. upper arm, about axilla, pain as if beaten and lame; the same near elbow, several minutes after in wrist; in evening.
Her arm has felt very sore, although wound is almost healed.
A cold flush goes down arm as if ice water was being poured upon it.
Feels a chill strike her r. arm when she goes into open air.
Burning pain down wounded arm.
Felt as if fleas were running over r. arm.
Arm itches all over; itching on arms appearing suddenly.
Pain in r. elbow as if paralyzed, at noon; same at 2 P.M. in l., > in a horizontal position and when allowing forearm to hang; soon after in l. knee.

Google

To right of r. elbow a black and blue spot.
Throbbing pain in r. forearm on flexor side.
Muscles of forearm, as far as hand, painful when pressed, or taking hold of anything.
Blueness in streaks down r. forearm.
Wrists have felt some time as if strained; < in morning.
Lame feeling in wrist.
At 10 P.M., straining pain in r. hand.
Soreness in r. hand.
Quivering in hands.
Hand trembles so much he can scarcely write.
Trembling of l. hand when taking hold of anything or pressing with it; muscles hurt most on upper side of forearm down to hand.
Trembling of l. hand.
Right hand numb for a long time, clumsy, stiff.
Hands numb, with headache.
Right hand swollen.
The ball of r. hand hard, cramped and swollen.
After counting copper coin, violent pain in r. hand, between third and fourth metacarpal phalanx, in some motions and on pressure.
Smarting in palm of r. hand.
Intense pain in forefinger of l. hand.
Pain in first joint of r. ring finger, as if it was going to gather.
Stiffness of fingers and hand.
Woke at 5 P.M. with stinging in forepart of r. index finger, nail turned quite blue.

[35] **Lower Limbs.** ‖A pressive pain in r. hip bone, goes from there to middle of sacral bone.
Left hip aches in bone.
Felt as if hip bones would slip out of their sockets; had to rest with hands on hips to > the feeling.
Something runs round and round several times in flesh, in region of hip, then down leg to knee.
Pain in thighs, particularly in anterior portion; as if fatigued, after going up stairs; < after sitting down.
Along l. sciatic nerve a dull pain, returning periodically; < when rising from sitting.
Pain in anterior part of r. thigh, as from a bruise.
Twitching in r. femur, as if some one was pulling from below; not painful, comes and goes.
Cramps in thighs.
Biting and itching on thighs.
Laming pain inside of l. thigh above knee joint, and extending into it.
Tearing pain from middle of anterior portion of r. thigh to knee.

Google

Tearing in l. thigh to knee.
Knees ache; tearing, drawing pain.
Stinging in r. knee.
Knees tremble at every step.
Laming pain in r. knee joint when getting awake in night; next morning same in l. knee.
Aching and heaviness in legs below knee.
All day a feeling of weight in legs below knee, seemed as if there were several pounds of lead in tibia of each leg.
Numbness in r. leg below knee.
Pain in all joints of feet, like pressure with a dull point, now here, now there.
Pain in legs very troublesome, not able to walk.
Legs feel as if he had rheumatism.
Pain going down l. leg.
Twitching in legs.
Legs tired and aching; feel as if beaten, in evening; feel sore and very heavy.
A pain in legs, as if thighs were too heavy, went off at night.
Right leg falls asleep; after seven hours.
After sitting awhile, lower limbs go to sleep; prickling sensation.
Weakness in legs when going up stairs.
‖Ulcers on legs, with emaciation and coldness, l. side; contraction of hamstrings and relaxation of ligaments of ankle joint and flexors of toes.
A curious feeling in legs, as if calf was heavier than usual.
Cramp in r. calf.
Cramp in calves of legs at night in bed; < from stretching out limbs.
Calf of l. leg ached as if it had been cramped, after waking.
‖The pain in calf came even when he was not thinking of bite at all; lately much < and quite severe. θLyssophobia.
Sharp, biting pain in l. ankle.
Painful lameness in l. ankle joint in night while lying in bed.
Heavy feeling in lower limbs, as if a weight was attached to ankles.
Pain from heel into thigh.
After going to bed, intense pain in back of r. heel.
Pain in r. heel and in toes of l. foot.
Balls of heels so sore that it is painful to walk.
‖Great swelling in heel of a cow from dogbite; very restless.
Pain in sole of r. foot extending to ankle. θLyssophobia.
Severe pain in r. instep; < after being in bed during catamenia; at times extremely painful to move foot; does not pain much when walking upon side of foot; l. slightly troubling at times.

Google

Extending to feet, pain from groins.
Pain extends from ankle bone to great toe.
Shooting from fourth toe to foot.
Some pain in toe next to little toe of l. foot; shooting into foot.
Tearing in first joint of l. little toe.
Toes of both feet troublesome, feel as if nails were too long and broken; pain in small of back and r. temple.
Each dose he has taken has made him feel as if he was getting corns on every toe, his real corns felt remarkably well and did not pain him at all.
Her corns have troubled her but on one occasion since the proving; where she felt as having corns, she had twinges.

[34] **Limbs in General.** Pain like rheumatism; shooting and stinging from knees down; stinging in palm of r. hand to finger ends, as though she had fallen on it.
Aching in knees and shoulders.
Shortly after pain in shoulder joint, afternoon third day; pain goes into knee joint of same side.
Feeling of pressure on shoulders and weight in legs.
Pains or aches in all his limbs; feeling of languor and extreme fatigue.
Weight and heaviness of legs and shoulders.
Heaviness of limbs.
A convulsive trembling of limbs during attacks.
When lying in bed, an unusual morbid contraction and tossing about of limbs.
Severe twitches in arms and legs, much resembling chorea.
Shaking or convulsive trembling of limbs.
He felt a severe, bruiselike pain in shoulders, chest, back, arms and legs.
All muscles feel bruised in morning, can neither sit nor lie down.
Loss of power in limbs; gait unsteady, at times some stiffness of hind legs; dog.

[35] **Rest. Position. Motion.** Moved quite briskly, though feeling fatigued.
After moving, turning, or stooping, feels as if head would burst.
Very little exertion wearies him, and he feels quite languid.
All day had a disposition to straighten herself up.
Had to rest with hands on hips to > feeling as if hip bones would slip out of their sockets.
Horizontal position: pain in elbows >, also when allowing forearm to hang.
Lying down: thinks she is unable to move head; like a shock in upper part of brain; rush of blood to head; pains up neck and down spine; impossible, pain in rectum and small of back; dyspnœa; impossible in dysentery; could not sleep.

Google

Lying in bed: contraction and tossing about of limbs.
Parts on which he lies: burning heat.
Does not wish to rise.
Can neither sit nor lie: all muscles feel bruised.
Sitting: dizziness; must lean back, want of strength in back; pain in thighs <.
After sitting awhile: lower limbs go to sleep.
On rising from a chair: staggers; cannot walk straight; dull pain along sciatic nerve.
When rising: rush of blood to head; tearing stinging in occiput <.
Stooping: inclination to fall to r.; aching in bones above eyes <; pressing in vertex and forehead; violent headache <; painful rush of blood to head; aching over eyes <; dizzy on r. side of head.
On rising from stooping: dizziness and dimness of vision.
Turning neck: pain in larynx.
Bending head backwards: pain in neck >.
If she allows her head to hang awhile it is difficult to raise.
Throws head back: when sneezing.
Bending backwards: does not > pressure below shoulder blade.
Standing: pain in rectum and small of back; impossible, dysentery.
Standing still: on waking, head fixed.
Change of position: disinclination to change position of head; continual change (dog); that would tilt or rotate os uteri would cause much pain.
Stretching limbs: cramps in calves.
Can hardly bend fingers: stiffness.
Turning around: painful rush of blood to head.
Taking hold of anything: muscles of forearm painful; trembling of l. hand.
Least motion: all joints cracked.
Moving: head < pressing in vertex and forehead.
Aversion to move: great weakness.
At every step: knees tremble.
Could not make a hard step: during catamenia.
Walking: as if she would fall; dizziness, with dim sight; five minutes after, sharp pain above eyebrows and up nose; quickly, causes pressing pain in hypochondria; pain in region of spleen; enforced by terrible pain in rectum and small of back; great weakness in chest; stitches in heart; impossible on account of pain in legs; painful on account of soreness of heel; on side of foot, instep not so painful.
Going up stairs: pain in thighs; weakness of legs; very weak.

Google

After a short walk: exceedingly fatigued and weary.
Stirring about: violent headache <; painful rush of blood to head.
Swallowing: difficult, particularly fluids; stinging sensation; causes constriction of throat; causes terrible pain; bread causes greatest agony; stitching sensation.

[36] **Nerves.** Until dinner time he felt so strangely in his whole body as never before, without being able to define the feeling.
In all motions of her body and in her looks is expressed a peculiar erethism.
All things affect him more, tobacco included.
Irritability; violent agitations.
‖He could neither lie down nor stand up for any length of time. θDysentery.
Great restlessness, anxiousness, distress; tossing about.
In afternoon whole body trembles, she can scarcely speak; stinging in one of cervical vertebræ; when stooping feels dizzy on r. side.
Afternoon tremulous in whole body and very weak, can hardly talk.
‖Continual trembling sensation through whole body. θLyssophobia.
‖The strange feeling changed during night into a trembling, and he is full of fear. θLyssophobia.
Twitchings of muscles throughout entire body (last stage). —
Twitching of tendons, with tendency to general convulsions. —
Severe nervous twitches in whole body all day.
Felt quivery all over.
If during great restlessness she attempts to sit down and work, she has alternately twitching in arms and legs.
Nervous twitching, with trembling of r. hand.
Starts now and then.
Muscular contractions appear with various degrees of intensity, from slightest convulsion to those of most severe and clonic form; frequently tetanic convulsions. —
Spasms of individual muscles, as well as of muscular system in general, clonic, rarely tetanic. —
The spasms have the character of reflexed spasms; their proximate causes are: attempts to swallow; speaking; a current of air; sight or idea of fluids; sight or sound of running water; coming in contact with another person; a bright light; sight of shining objects or of some strange person; a loud noise or strong odors. —
Sensations of convulsive actions in different parts; distress at epigastrium; heaviness of limbs and general prostration. —

Google

Exertion is frequently succeeded by convulsions. —
Attacks returned every few minutes, for five hours, until they were arrested; pain passing down spine to loins and hips, and from thence to knees.
Convulsions conjoined with an exalted state of sense of smell, taste and touch. —
Spasms of legs and arms, occasionally very severe. —
Clonic convulsions; decided tetanus or trismus not observed; opisthotonos in rare cases.
In quick succession violent epileptic attacks. —
Spasms so violent that four strong men could hardly hold him and prevent him from hurting himself. —
Every day at 9 P.M., convulsive startings. —
She struck, snapped and bit at everything and every person. —
Pain commencing in cicatrix of bitten thumb, producing slight spasm, and still greater disposition to snap and bite and to grind teeth, which were entirely beyond his control, causing him to fall on floor. —
Suddenly a severe pain in bitten thumb, after nine days, instantly passing up spine and thence into brain, producing a violent, nervous convulsion for a few moments, with a disposition to snap and bite; passed off in two or three minutes. —
Convulsions came on and lasted for a short time, then perfectly placid for some time before death. —
Convulsions daily; rolls head from side to side; winking and rolling eyes; attempts to bite others; pelvis and legs are turned to one side as far as possible. Child, æt. 2, after scarlatina.
Feels as she did when she got up from a nine days' illness; feels so heavy and sore.
Great debility and disinclination to move about, lasting till 2 P.M., gradually diminishing.
Feeling of malaise and debility at 3 P.M., great disinclination to move.
Does not wish to rise.
Very soon a sensation of weakness, a kind of flabby lassitude, like days after great exertion, or after a fever or other disease.
Great weakness and restlessness, does not know where to turn, would prefer to lie down, but it affects his breathing.
Such weakness that knees tremble at every step, and she feels as if she would fall.
Weakness: with sore throat; after urinating; of sexual organs.
During exhaustion more nimble and active.

Google

Fatigue and heaviness in legs.
Great physical relaxation; whole body feels fatigued; tired all over.
Felt irritable, tired and nervous.
With the numbness of paralytic symptoms the violence of all others increase.
‖At times a singular sensation, a kind of "die away" feeling, quite instantaneous, cannot describe it; seems to extend through heart to back, accompanied with quivering around breast bones and pain in nerves, from l. side of chest to throat and l. jaw; fluttering about heart.
Felt stiff and tired; required an effort to draw his breath.
After singing, suddenly falls down as if dead, with eyes shut, face red, quick breathing, pulse 100. —
A stage of general paralysis; an abatement of most distressing symptoms; a freer respiration; a diminution of reflex excitability; less impediment to deglutition; a rapidly increasing debility and prostration before death. —

37 **Sleep.** Inclination to yawn, with stiffness of lower jaw.
Felt inclination to gape and stretch.
Felt drowsy; in afternoon; irresistable drowsiness, 9 P.M.
Sleepy after a meal, slept one hour without relief.
‖Frequent yawning, without sleepiness, particularly when hearing others yawn.
Did not sleep more than thirty minutes until after 2 A.M.
Insomnia; sleepless in spite of narcotics. —
‖Passed most of his nights sleeplessly, walking up and down in despair. θLyssophobia.
Restless night, with stupefaction in head.
Sleep fitful, position continually changed; dog.
Excited, cannot sleep.
Felt as he did some years since, when sitting up with a sick relative three nights out of five, unable to sleep during day from nervous anxiety.
When lying down could not sleep, eyes open, unless he purposely closed them, when they reopened involuntarily.
Went to bed at 10½ P.M. (as usual), could not sleep (a very unusual circumstance); dozed and heard various noises till 3 A.M., which caused him to get out of bed to ascertain what they were; started frequently; slept soundly from 7 to 8½ A.M.
Went to bed at 10 P.M. in great pain all over; woke up at 11½ P.M. with very severe pain in stomach, lasting one hour.
After 10 P.M., while in bed, all symptoms more severe.
Had a restless night, woke repeatedly and felt tired.

Google

Woke several times in night with pain in wounded arm.
Starting in sleep, afternoon.
Has to scratch whole body, and has no sleep for it all night.
Became more restless night before death. —
Dreams: of influential persons to whom he occupies position of servant or subordinate; of a Latin debate with students of law, astonished at facility and fluency with which he spoke Latin, it being far greater than he was capable of in a waking state; of dogs all the time, but they are different dogs from the one that bit her; of fighting, of high places, of insane asylum, of churches; disagreeable, when she falls asleep, night or day; only in first half hour.
Jumped up in bed.
During night slept but little; was disturbed by disagreeable, disconnected dreams; felt strangely. θLyssophobia.
On waking stands perfectly still for a time; head fixed as if gazing at some distant object; a dog.
Sleepiness when unable to sleep, and sleeplessness when she might otherwise have slept; generally restless at night.
On waking is morose, inclined to be angry.
Late getting awake, and difficulty to recover from sleep.
Slept from 4 to 6 P.M., woke up and felt dreadfully nervous; had a great fear as if something was going to happen.
In morning, after exciting dreams, much fatigued, feels tired in sacrum and back.
If inclined to sleep, it is short, disturbed, with frightful dreams, and on awaking is apt to fall into slight convulsions.
On awaking from siesta, numbness in head.

[38] **Time.** 2 A.M.: did not sleep more than thirty minutes until after.
3 A.M: became cold in bed for one hour.
Morning: violent vertigo, with chill and headache; after rising, slight frontal headache <; when getting awake, boring in temples; woke with burning, aching headache; severe headache; lid puffed up like an eggshell; on awaking lids feel paralyzed before rising; on hearing water poured, obliged to have an evacuation; pressing in forehead early; frequent sneezing; (6 A.M.) tickling in l. cheek; heat in face; bitter taste; swallowing less difficult; little appetite; stools more frequent; diarrhœa, with violent pains; urine yellowish brown; both breasts swollen; muscles stiff: pressing across r. ear; wrists as if strained <; pain in l. knee; all muscles feel bruised; much fatigued.

Google

8 A.M.: pain in l. side.
9 A.M.: severe headache begins; suffocating feeling in chest lasting till 10½ P.M.
At 10 A.M.: began to spit a great deal; soreness and constriction in throat.
At 11 A.M.: soreness in throat till noon; stitches in heart for a few minutes.
In forenoon: sore throat; belching; gnawing pressure in l. side; painful sensation in upper part of abdomen.
Towards noon: headache with increase of saliva; pain in testicles <.
At noon: slight headache, lasting rest of day; pain in r. elbow.
Until dinner time: felt strangely in his whole body.
After dinner: disinclined to think; headache very severe; pressing in epigastrium; sexual excitement.
Afternoon: very severe headache; dull pain in forehead, with stupid feeling; pressing in vertex and forehead; dull pain in forehead; sick headache; dull heavy pain in head; headache, with nausea and sore pain around heart; stinging pressure behind ears; ranula, with dryness of mouth <; stinging in chest, with palpitation; sour belching; erections; itching and burning on corona glandis; burning and tenesmus as if in prostatic gland and in urethra; increased peristaltic motion of scrotum; first hours pain in testicles <; pain in wounded l. arm; pain in shoulder joint; whole body trembles; drowsy; starting in sleep; fever.
1 P.M.: slight pain in r. shoulder joint.
2 P.M.: intense pain in head; sore throat; violent spasm of throat; laid down and found head twisted to l. side, found it quite comfortable; felt numbness in l. side; severe pain across back; pain in l. elbow.
3 P.M.: headache very severe; peculiar constriction in back of throat; feeling of malaise and debility.
Until 4 P.M.: feels as if he had heard or would hear unpleasant news; pressure on upper part of head.
4 P.M.: constriction in throat <; violent pain in r. kidney lasting one hour.
5 P.M.: swallowing more difficult; woke with stinging in forepart of index finger.
During day: rising of bile into throat; diarrhœa, with pain <; unable to sleep from nervous anxiety; disagreeable dreams when falling asleep, only first half hour.
All day: felt depressed and weak; spitting of saliva; headache with dizziness; sore throat; intense pain in head; violent headache <; a peculiar sensation in head; itching in nose; spitting; very severe sore throat; slight

Google

pain in lumbar region; terrible pain in throat; sensation of emptiness and discomfort in sexual parts after coition; dull pain in heart; difficulty in moving head; severe backache and numbness of hands; pain in back across hips; a tearing and stinging in l. shoulder joint; weight on shoulders; feeling of weight in legs; severe nervous twitches in whole body; had to lie in bed, with severe pain in all bones.

Evening: fretful, hypochondriac mood; vacillating motion of head; dull pain in forehead; pain above l. ear; shooting to eyes; pressive burning in r. concha; late, frequent sneezing; drawing in side of face; disinclined to think; want of appetite, followed by great lightness of head; when in bed, rending across abdomen; aching from groins to feet; pain about neck of bladder; cooling, burning, congested feeling in region of bladder; profuse watery urine; urine yellowish brown; strong erections without sexual excitement or thoughts; increased peristaltic motion of scrotum; chest as if beaten; back extremely sore; pain in wounded l. arm; pain in l. arm and wrist; legs tired and aching; late, less inclined to chilliness.

After supper: pressing in spleen; lewdness, with weakness of parts, but inclined to an emission.

6 P.M.: sore throat >.

7 P.M.: sore throat; slight, dull shooting pain in heart till 10½ P.M.

8 P.M.: salivation recommended.

9 P.M.: severe shooting pain in head; curious stinging pain in l. eye; spasm of throat >; violent pain in heart; irresistable drowsiness; a dripping, warm perspiration from wrist to nails of r. hand.

10 P.M.: pressing pain in head; pain in wounded l. arm <; stinging pain in r. hand; pains severe until that time.

After 10 P.M.: while in bed all symptoms more severe.

10.30 P.M.: numbness in r. arm; went to bed, could not sleep; dozed and heard various noises till 3 A.M., started frequently.

11 P.M.: as if she was going to have a fit.

11.30 P.M.: awakes from sleep with severe bellyache.

After going to bed: intense pain in back of r. heel; pain in heel.

Night: delirium <; tempted to bite her pillow; incessant talking; disturbed dreams; stupidity with restlessness; on hearing water poured, obliged to have an evacuation; hears various noises; vomiting in sleep; stools most frequent; swelling of breasts; laming pain in r. knee joint when getting awake; pain in legs goes off; cramp

Google

in calves of legs; while lying in bed, laming pain in joint of l. foot; painful lameness in l. ankle joint; strange feeling changed into a trembling, generally sleepless; walking up and down in despair; stupefaction in head; woke several times with pain in wounded arm; sleepless on account of scratching of whole body; more restless; disagreeable dreams; itching quite severe; intolerable itching in lower part of body to feet; stitches in heart; pain in back; itching on lower half of abdomen.

39 **Temperature and Weather.** ‖Burning sensation in bitten place > by hot steam striking against it. θLyssophobia. ‖Unbearableness of heat of sun. θDropsy of spine with sheep. —

The damp, warm weather oppressed him.

Expressed a desire to go into bath; after a warm bath more irritable to external air, the most distressing symptom that occurs. —

Great sensitiveness to every breath of air. —

A very gentle stream of air projected from lips on to patient's forehead, and continued only for a few seconds, brought on a violent spasm. —

Asked her mother to beg him not to breathe upon her face again, as it distressed her so much (after *Bellad.*). —

Air, of agreeable temperature, feels cold and disagreeable.

Continually directs a window to be closed which is not open.

Draft of air, or opening or closing door, brings on spasms. —

Extreme sensibility to cold or least variation in temperature of air. —

Heat of sun: cannot bear it.

Warm drinks: more easily taken than water.

As soon as he gets warm in bed: itching in inner sides of thighs and knees; compelled to scratch.

Open air: headache >; feels a chill strike r. arm.

Breath of air: sensitive to.

Blast of air: causes greatest distress.

Wet weather: aching in l. side of head <.

In cold room, while undressing: strong erections.

Cold air: > headache; headache, with nausea and sore pain in heart >.

40 **Fever.** Paroxysms of intense coldness with pain in spine.

During paroxysm, limbs cool and livid.

Attacks of vertigo, chilliness, sometimes chills; at least one a day for several days, not always accompanied by vertigo, though always accompanying it.

Late in evening less inclined to chilliness.

Chilly feeling, more down r. (bitten) arm.

Felt chilly and cold all over; shaking.

Google

Became cold in bed at 3 A.M., although covered with four blankets; lasted about one hour.
Chills intermixed and followed by heat and cold sweat.
A fever, sometimes preceded by slight shiverings, generally very mild.
Face sweats, with flushes.
Temperature of body 100 to 104° Fahrenheit, seldom rises to 105 or 106. —
Cannot bear heat of sun.
Fever in afternoon.
Slight fever, with flushes of heat.
Fever every evening, commencing at dusk and lasting until bedtime (midnight).
Sensation of burning heat in parts on which he lies.
He feels the pulse's beat through body; from time to time there is a surging through throat into head, like a slow wave.
Great fever, no chill; pulse 160; no appetite; thirst, drinks cold water very often; stupid and sleepy.
Feverish heat, with headache.
Sensation as if a hot wave, fine, like vapor, surged through body, taking an outward course, yet not reaching surface or extending into limbs.
Heat, with pressure in forehead and back.
After drinking some coffee, a strong heat in r. side of face, followed by aching in front of upper part of head; after this again heat from nape of neck up head over ears and r. side of face; with heat in eye from within outward and tickling in ear.
Sensation of heat felt internally and externally through entire body, no external warmth, it forces perspiration out on face as from weakness, and is accompanied by lassitude and aching in legs.
At 9 P.M., a dripping, warm perspiration from whole r. hand, from wrist to nails; afterwards hands and fingers stiff, she can hardly bend them. —
Skin covered with a clammy sweat (last stage). —
Skin moist, even covered with sweat; during spells, limbs cold and livid.
Much better after perspiring.
Intermittent fever.

41 **Attacks, Periodicity.** "Other diseases, when poison is absorbed, have their periods; the canine poison depends on climate and constitution and different periods, from first day till nineteen months." —
Took several drops of 300, after having been bitten in nose; symptoms next day and the following, and well the third day, first symptoms returned on the twelfth day.

Google

‖First day >, next day <; on third day salivation returned. θLyssophobia.
Irregular fits of backache and chills, increasing steadily. —
Paroxysm, combined with a feeling of suffocation, almost produces strangulation.
Sudden convulsions of a paroxysmal character. —
‖Periodically since two weeks. θSpasm of throat.
Attacks every few minutes, for five hours: pain down spine to loins and knees.
Periodical: ranula; spasm of œsophagus; dull pain along l. sciatic nerve.
Alternating: of heat and headache; twitches in arms and legs.
Repeated eight times: pain from sacrum to middle of back.
For one hour: pain in r. arm.
For two hours: pain in and between both shoulders; pain in inguinal glands.
Every two or three hours: has a twitch in heart.
For four hours: sharp shooting pains in region of heart.
After seven hours: r. leg falls asleep.
From noon till evening: headache.
From 2 P.M. to 9.30 P.M.: violent spasm in throat.
From 3 to 9 P.M.: headache.
From 4 A.M. till evening: pain in kidneys and across hips.
From 4 P.M. till bedtime: feeling of numbness in r. arm.
Daily: passes from time to time a little dark blood from uterus.
Every evening: distension of abdomen; fever commencing at dusk and lasting until midnight.
Three successive mornings: soreness across chest, both breasts swollen.
First days: smoking unpleasant, after first week a crazy, insatiable desire to smoke.
Day after embrace: pain in testicles.
Every other day at 5 P.M.: boring in temples.
During three days: her sense of smell painfully acute.
Lasted eight days: painful throbbing in region of spleen.
After nine days: severe pain in bitten thumb, thence to brain, nervous convulsion for a few moments, passes off in two or three minutes.
Forty days ago: small wound exposed during dissection of mad dog, feeling of malaise and fatigue, followed by death.
Two weeks before time: catamenia.
For two or three weeks: scrotum tightly drawn up.
In Summer, of six weeks' standing: pain and tenesmus on hearing or seeing running water.
For several months: offensive mucus from uterus.

Google

For three months: sticking, drawing, squeezing pain in heart.

For seven years: prolapsus uteri.

Locality and Direction. Right then l. shoulder: rheumatism.

Right to l.: headache.

Right: inclination to fall to side; dulness on side of head, over eyebrow; drawing above eye; headache extending into eye; headache very severe in temple; tearing pain in temple; boring in temple; occasional stitches; pressing weight on parietal bone; piercing pain in side of head; pressing stinging on side of vertex; heaviness in vertex; stiff feeling of side of head; darting in vertex; drawing, beating pain over eye; aching over eye; pain over eye pressing inward; pressing sensation in upper part of r. orbit; throbbing over eye; curious, stinging pain over eye; occasional stitches in temple; as if blood rushed to ear; buzzing in ear; temporary stoppage of ear; rending pain in ear; shooting and stitches in ear; pressive burning in external ear; tearing pain a few inches from ear; stiffness in side of neck; gnawing and crawling sensation in zygoma; tearing in upper and lower jaw and ear; darting pains in side of face; a sensation moves about side of face and across forehead; heat in side of face and ear; chilling, biting, burning on inner side of upper lip to nasal cavity; teeth hurt more on side; sensation shoots into lower jaw; chilling painfulness in teeth; aching in gums on side; throat aches; pressing pain near last ribs; shooting in side of abdomen; pain in kidney; pain from within outward in side; pain in side of abdomen from uterus; sticking in side of abdomen; stitches in side of abdomen; above inguinal region pressing pain; pain in groin; in groin two small kernels under skin; pain in side of abdomen; pain in side of larynx; stitches in side of abdomen; pressing in chest; pinching pain in side; burning like heartburn in side of back; pressing stinging in upper vertex on side; pressure between last ribs on side; side of neck stiff; heat over ear into eyes; cramp-like pressure under shoulder blade; pressing pain under shoulder blade; pressing, with heat near shoulder blade; pressing across ear; pressure below point of shoulder; stinging below shoulder blade; side of throat sore; violent pain in kidney; pressing pain in side of sacrum; pain on top of shoulder joint; slight pain in shoulder joint; has a lump in axilla; rheumatic pain in shoulder; aching in arm; slight twitching in arm; numbness of arm; arm becomes heavy and inactive; feels a chill

Google

strike arm; as if fleas were running over arm; pain in elbow as if paralyzed; to r. of elbow, black and blue spot; throbbing pain in forearm; blueness in streaks down forearm; stinging pain in hand; soreness in hand; hand numb; hand swollen; ball of hand cramped and swollen; violent pain in hand; smarting in palm of hand; pain in first joint of ring finger; stinging in forepart of index finger, nail turned blue; pressive pain in hip bone; pain in anterior part of thigh; twitching in femur as if some one was pulling from below; tearing pain from middle of anterior portion of thigh to knee; stinging in knee; laming pain in knee joint; numbness in knee; leg falls asleep; cramp in calf; intense pain in back of heel; pain in heel; intense pain in heel; pain in sole, extending to ankle; severe pain in instep; tearing in first joint of little toe; pain in temple; dizzy on side; chilly feeling more down bitten arm; strong heat in side of face; itching in hand.

Left: bite in calf of leg; pain above eye; tearing from middle of forehead toward side; sharp pricking in temple; dull pain in forehead <; pressing pain in side of head, then to side of forehead and orbit; dull pressure on side of head; dull pricking pain in side from head to waist; side of head most severely affected; severe pain one and a half inches above ear; burning aching from side of occiput down neck; numbness of side of head; eye exceedingly sensitive to light and water; curious stinging pain in eye; sound as of rushing waters in ear; pain most severe above ear; transitory drawing in side of face; neuralgic pain down side of face; heat and soreness in middle of cheek; tickling in cheek; as if she had been bitten in cheek; pain on cheek near nose; pain in side of throat; burning stinging in side of chest; loud gurgling in side of stomach; loud cooing noise in stomach; in region of stomach and spleen, gnawing pressure; pain down side of abdomen; dull pressure in region of kidney; itching on side of os pubis; pain in ovarian region; pain in side of vagina; stinging in side; cramp-like pain and stitches in side; stitches under mamma; shooting between mamma and last ribs; shooting, flying pains through chest; burning stinging in side; pain deep in, in side, in chest; violent pain to side of heart; spasmodic pain under ribs; stinging in breast; head twisted to side; numbness in side of head; pressure, with heat into upper arm; dull pressure in region of kidney; pain in shoulder joint; lameness in axilla; tearing and stinging in shoulder joint; rheumatic pain in shoulder; pain down wounded arm; in upper arm pain as if beaten

and lame, then in wrist; pain in elbow as if paralyzed; trembling of hand; intense pain in forefinger; hip aches in bone; along sciatic nerve a dull pain; laming pain inside of thigh, above knee joint; tearing in thigh to knee; paralyzed pain in knee; laming pain in knee; pain going down leg; coldness on side of leg; calf of leg ached as if it had been cramped; sharp biting pain in ankle; laming pain in joint of foot; painful lameness in ankle joint; pain in toes; pain in instep; pain in nerves from side of chest to throat and jaw; itching in foot; herpes circinatus on leg below knee.

From without in: boring stitches in head; stitches in ear.

From within outward: darting to scalp; pain in r. side; heat from nape over ear; heat in eye.

From l. to r.: tearing in hypochondriac region; rending across abdomen; testicles diminish in size.

From above downward: urging to urinate.

Pain from wound goes upward.

Sensations. Most exquisite sensibility prevails over whole body, particularly in organs of sense. —

Local sensations of pain continue in an increased degree, but are now scarcely heeded. —

Feels a pressure like from a dull point.

A cramplike tearing in l. hypochondriac region, moving from there to end of rectum, causing there a cramplike contraction, and at same time a tearing between skin and muscles, down hip to knee.

Painful sensations here and there in body, in chest, abdomen, or in region of kidneys.

Sharp pains in place bitten; shooting in every direction to neighboring parts, frequently to stomach, throat and bowels. —

Stinging sensation all over her body, now here, now there.

A sensation of motion in forehead, also in middle of abdomen, with slight stinging in stomach, and more or less in all parts of body. —

Sensation as if she could feel her blood running all over.

Pricking inside of l. thigh; at lower part of heart; between shoulders, and r. shoulder.

Felt as if he had caught a severe cold, with rheumatic pains all over, very severe all day until 11 A.M., when it commenced to decline, and by 10 P.M. was scarcely perceptible.

As soon as he arose, felt as if he had been squeezed and stretched. —

Feels sore all over.

A sensation of burning heat in parts he lies on, it feels as if it was from a hot stove, most in region of kidneys, loins and sacral region.

Google

Numbness occasionally over whole body.

The local neuralgia generally has the peculiarity of shooting out from bitten part towards trunk. —

Burning pain in forehead and heart, and in back of head and neck, r. ear and l. arm and leg.

Nose feels stiff.

Throbbing most severe in r. temple.

All bones feel as if broken, has to remain in bed.

Bruised feeling, with sore throat.

Pressing here and there in chest, abdomen and region of kidneys.

Drawing from neck to forehead, immediately followed by sparks before eyes and vanishing of sight; red face; involuntary grinding of teeth; second attack; the first was felt in head after washing in morning; seven days after bite of mad dog (*Bellad.*,[30] three doses, *Hyosc.* interpolated once a day).

As if two entirely different trains of thought influenced her at the same time; felt as if he had received joyful intelligence; as if something unpleasant would happen; as if he could do nothing; as if she was going to have a fit; as if she was going to die; as if she was going to sink away; as if he momentarily lost consciousness; as if something was drawing around in a circle; as if she could not hold her head straight; as if she would fall; as if a small leaden ball was rolling about in brain; as if something was moving in forehead; tearing as if in bones of head; as of an invisible hammer striking upon back of head; as if head, nose and teeth were soldered together; as if head would split; as if head would burst; as if something drew head towards shoulders; as if r. side of head would become numb; bones of head as if shattered and sore; as if parts of head would become insensible; as if a cast was pressing down on vertex; aching as if in bones over eyes; eyes as if glued together; as if blood rushed to r. ear; pressure as from a dull knife in ear; pressure as if from a dull point in r. ear; sneezing as if a coryza would begin; drawing in face as if in muscles; as if needles were run into brain; as if she had been bitten in l. side of face; as if she would have mumps; as if corroding acid had touched lip; head feels as if filled with air to bursting; teeth as if on edge; as if root of tongue was swollen, as if there were lumps in it; as if uvula was too long; throat as if swelled or raw; as if he would suffocate with violent spasm in throat; feeling as if beaten; as if epiglottis was paralyzed; as if a ball rose from stomach into throat; as if he had swallowed red

Google

pepper; pain as if in or behind duodenum, aching as if in intestines; as if an abscess was forming in region of spleen; as if she would have to vomit; pricking as if from thorns in anus; as if he passed his strength away when urinating; burning and tenesmus as if in prostate gland; as if struggling for breath; as if she might just have plunged into cold water; pain as if in nerves of chest; as if needles were sticking in heart; as if heart would burst; as if a hot wavelike stream was moving through abdomen and chest; as if it was coming up into throat; as if a slow rising wave passed through throat into head; as if clavicles would slip from their sockets; chest as if beaten; as if heavy weight was in shoulders; back as if beaten; as if back would split and fall apart; as if shoulder joint was beaten and paralyzed; pain in shoulder joint as if in middle of bone down arm and into finger; feeling as if weather was going to change; pain as if beaten in l. upper arm; as if ice water was being poured upon arm; as if fleas were running over r. arm; elbows as if paralyzed; l. knee as if paralyzed; wrists as if strained; as if first joint of r. ring finger was going to gather; as if hip bones would slip out of their sockets; thighs as if fatigued; pain in thighs as from a bruise; as if there were several pounds of lead in tibia of each leg; as of pressure with a dull point in joints of feet; as if he had rheumatism in legs; as if thighs were too heavy; as if calf of leg was heavier than usual; as if calf of l. leg had been cramped; as if a weight was attached to ankles; as if nails of toes were too long and broken; as if he was getting corns on every toe; as if she had fallen on her hand; as if she would fall; falls down as if dead; head fixed as if gazing at some distant object; tearing as if in bone; as if every bone had been broken or violently beaten.

Pain: in head; in heart; in nose; in occiput; over eyes; in temples; above l. eye; in a small spot above r. eyebrow; from mouth up through head and down back of neck; in bones of skull; on top of head and in teeth, running into each other; in nape of neck; in l. cheek, near nose; in root of tongue and l. side of throat; in limbs; in throat when swallowing, particularly fluids; from wounded arm into throat; in epigastric region; in region of liver and r. kidney; from within outward in r. side; in l. side; in r. side of abdomen from uterus; down l. side of abdomen; in r. groin; in two small kernels under skin; in inguinal glands; about neck of bladder; in testicles; from uterus into breast and r. side

Digitized by Google

of abdomen; in l. ovarian region; in lower part of back; in back and lower part of bowels; next to larynx on r. side; in heart; in side of chest up to throat; in uterus; deep in, in l. side; in l. chest on small spot in region of heart; in ear; from head and back to neck; in cicatrix; in muscles of neck and along cervical portion of spinal column; in back across hips; in groins; with cutaneous hyperæsthesia along vertebral column; on top of r. shoulder joint; in l. shoulder joint; down wounded l. arm; in first joint of r. ring finger; in thighs; in anterior part of r. thigh; in all joints of feet; in legs; going down l. leg; from heel into thigh; in r. heel and toes of l. foot; in sole of r. foot to ankle; from groins to feet; from ankle bone to great toe; in toe next to little toe of l. foot; in small of back and r. temple; in shoulder joint; passing down spine to loins and hips, thence to knees; in cicatrix of bitten thumb; in nerves from l. side of chest to throat and jaw; in spine.

Unspeakable torture: in back.

Unbearable pain: in head.

Intolerable pain: in head to end of nose and into teeth.

Maddening, outward pressing pain: in forehead.

Intense pain: in head from forehead to organ of firmness, then to top of head and eyes; from inflammation of os and cervix; in forefinger of l. hand; in r. heel.

Terrible pain: in throat when swallowing; in rectum and small of back.

Dreadful pains: up neck and down spine.

Intolerable, snappish headache.

Violent pain: in head; in back; from temple to temple; in temples and forehead; in heart; in r. kidney; in r. hand.

Very severe pain: in head.

Severe pain: in temples and above eyes; in eyes and in all his joints; from mouth upward through head and down neck; in abdomen; in lower bowels; across back, between shoulders and waist; in back; in both kidneys and across hips; in r. instep; in bitten thumb; in stomach.

Acute pain: in and below uterus.

Horrible pain: in head.

Terrible burning and pricking: in anus.

Very violent aching pain: in side of and all over chest.

Violent shooting pain: in l. of vagina.

Severe shooting pains: in head, over eyes and in temples.

Violent sticking pain: in heart and to l. of it.

Severe bruiselike pain: in shoulders, chest, back, arms and legs; in all muscles.

Tearing: from middle of forehead towards l. side; in r.

Google

temple; from jaw to temple; a few inches from r. ear; in r. lower and upper jaw into ear; from l. hypochondriac region to r.; between skin and flesh down thigh to knee; in l. shoulder joint; from middle of anterior portion of r. thigh to knee; in l. thigh to knee; first joint of little toe.

Rending pain: in r. ear; across abdomen from l. to r.; in neck.

Tearing, drawing pain: in knees.

Tearing, stinging: in occiput.

Spasmodic tearing pain: under l. ribs to anus.

Shooting pain: in upper part of face; to eyes; in r. ear; in upper jaw; in r. eyetooth; in teeth; in r. side of abdomen; in abdomen; between l. mamma and last ribs; in r. side; in region of heart; in neck; through small of back; from fourth toe to foot.

Shooting, flying pains: through l. chest.

Flying pains: in urinary organs.

Pressing, shooting: in vertex.

Sharp darting pain: in bitten hand; up arm to shoulder and base of brain.

Darting: from within outward to scalp; on r. side of vertex; in side of face; into anus.

Sticking, drawing, squeezing pain: in heart.

Piercing pain: in r. side of head.

Boring: in temples.

Boring stitches: in head.

Stitches: in r. temple; in heart; in r. ear; in both ears; in r. side of abdomen; in belly; in l. side; under l. mamma; in nape of neck.

Occasional stitches: in r. temple.

Sharp pain: above eyebrows and up nose; in uterus shooting to labia.

Beating pain: in forehead, parietal bone, occiput and nape of neck; in r. temple and above r. eye.

Pressing beating: in vertex.

Throbbing pain: in head; in forehead; in vertex; in occiput; in l. temple; in nape of neck; over r. eye; in anus; in neck; in r. forearm on flexor side.

Painful throbbing: in region of spleen.

Pinching: in l. temple.

Pinching pain: at fourth rib, r. side.

Sharp, biting pain: in l. ankle.

Severe pressing pain: in l. side of head.

Neuralgic pains: in gums.

Constant pain: in lower part of heart; in neck.

Burning pain: in forehead; in l. side of head and down neck; in throat; around heart; in neck; down wounded arm.

Google

Burning, neuralgic pain: down l. side of face.
Stinging pain: in throat; in heart; in l. breast; in neck; below r. shoulder blade; in cervical vertebræ; in l. shoulder joint; in r. hand; in forepart of r. index finger; in r. knee; from knees down; in palm of r. hand to finger ends; in one of cervical vertebræ.
Suffocating pain: at pit of stomach.
Sting: in sore arm.
Pricking sticking pain: in heart.
Sticking: in r. side of abdomen; in r. side.
Stitching sensation: when swallowing.
Chilling, biting, burning sensation: on inner side of r. upper lip, passes up and back to r. nasal cavity.
Stinging pressure: behind ears.
Pressing, stinging: r. side of vertex.
Burning, stinging: in throat; l. side of chest.
Pressive burning: in r. external ear.
Stinging sensation: in throat; in small of back; in middle of abdomen; in l. side of chest.
Burning: in eyelids; in vertex; in ear; from eyetooth down œsophagus; in urethra; in r. side of back; in heart; in back near last ribs; in both kidneys and across hips.
Burning heat: in parts on which he lies.
Burning, surging: towards head from abdomen; through chest.
Tickling, burning: in urethra.
Great heat: in throat and about heart.
Inward heat: in neck.
Heat: in ear; in r. side of face and r. ear; from back of neck, also into eye; in middle of l. cheek; in face; in heart; from neck to ear and face; in forehead and back; internally and externally through entire body.
Itching, burning: on corona glandis.
Itching heat: in eyes.
Smarting pain: on swallowing; in palm of r. hand.
Sharp pricking: in forehead; in l. temple.
Biting: in various parts of body.
Sore pains: in heart.
Extreme soreness: of back.
Soreness: of throat; in eyes and above them; of jawbone; in middle of l. cheek; of mouth; in back of throat; in whole of lower abdomen; through pubic region; of vagina; in lower part of back; across chest; of r. side of throat; in arm; in r. hand; of balls of heels.
Drawing, beating pain: over eye.
Drawing, dragging pain: in groins.
Rheumatic pain: across chest; first in r., then in l. shoulder; from knees down.

Google

Cramplike pain: in l. side of chest.
Colicky pain: in abdomen.
Pressing pain: in head; in forehead; in r. side, near last ribs; in hypochondria; in region of spleen; under r. shoulder blade and between scapulæ; in sacrum, r. side; in r. hip bone, thence to sacral bone.
Cramps: in abdomen; in arms; in back and limbs of bitten side; in calves.
Dull stitching pain: in heart.
Dull shooting pain: in heart.
Dull pain: in forehead; in heart; along l. sciatic nerve.
Laming pain: on inner thigh, extending to knee; in r. knee joint, then in l. knee; in joint of l. foot.
Curious stinging pain: in l. eye to forehead, over r. eye.
Dull pricking pain: in l. side from head to waist.
Aching: in bones above eyes; in occiput; in jaw; over eyes; aching of r. ear; in ear, extends to teeth; in lower jaw; in all the teeth; in carious root of a molar; on r. side of throat; in stomach; from below waist to feet; in loins, into back down to feet; in and between both shoulders; in spine; in back and head; in arms; in l. hip bone; in knees; in legs below knee; in legs; in knees and shoulders; in all his limbs; in front of upper part of head.
Slightly hot, quiet aching sensation: below chest, often in entire abdomen.
Quiet aching: in front of upper part of head.
Aching dulness: in teeth.
Dull heavy pain: in forehead.
Cooling pain: in stomach.
Chilling painfulness: starts in teeth of r. side, behind and below in bone of lower maxilla and passes upward.
Painful coldness: shoots into teeth.
Painful sensation: deep in upper part of abdomen; in testicles.
Painful dulness: in occiput.
Painful desire to swallow.
Painful urging: in penis.
Peculiar pain: at root of tongue.
Disagreeable kind of pain: in cheek and deep in upper part of jaw.
Slight pain: in lumbar region; in r. shoulder joint; in head.
Painful pressure: on upper part of head.
Gnawing pressure: in region of stomach and spleen.
Cramplike pressure: under r. shoulder blade.
Pointed pressure: in stomach.
Dull pressure: on l. side of head and on vertex; above r. inguinal region; in region of l. kidney.

Digitized by Google

Pressing: in forehead; from nape of neck into ear; inward in epigastrium; in spleen; in abdomen; in chest; in neck and up back of head; with heat in back near r. shoulder blade into nape of neck, thence into muscles of l. upper arm; running from between shoulders to occiput and across r. ear; in region of kidneys.
Pressure: in l. side of occiput; in upper part of head and forehead; in upper part of r. orbit; in l. side; in r. ear; on sternum between mammæ; in neck; below r. shoulder blade; in back, five inches below point of r. shoulder, one inch from spine; on shoulders.
Pressing heaviness: on top of head; in r. parietal bone; in r. side of head.
Pressing inward, throbbing or drawing: above r. eye.
Heavy bruised sensation: in thighs.
Cooling, burning, congested feeling: in region of bladder.
Bruised feeling: in nose.
Scraping sensation: on palate.
Sensitiveness: of scalp; of teeth; of uterus; of vagina.
Drawing: in gums; in abdomen below navel; from groins downward; in neck; in back and limbs of bitten side.
Gnawing sensation: in r. zygoma.
Pinched feeling: of scalp.
Bearing down: in uterine region.
Peculiar sensation of constriction: in back of throat.
Peculiar sensation: in vertex.
Lameness with soreness: in back; in l. axilla; in l. upper arm and near elbow, then in wrist.
Lame feeling: in wrist.
Prickling sensation: in lower limbs.
Pricking sensation: under tongue.
Painful lameness: in l. ankle joint.
Transitory drawing: in l. side of face.
Strange sensation: in head; of whole body; in heart.
Curious feeling: in legs.
Discomfort: in chest.
Suffocative spasm: in throat.
Cramped feeling: in ball of r. hand.
Spasmodic sensation: in trachea.
Contraction: of hamstrings.
Contracted feeling: of scalp.
Constrictive sensation: in throat; about breast.
Suffocating feeling: in chest.
Surging: towards head, felt deep in brain; in vertex.
Expanded feeling: of chest and abdomen.
Sense of emptiness and discomfort: of parts after coition.
Lightness: in head.
"Die away" feeling: extends through heart to back.

Google

Great distress: in epigastrium and præcordial regions.
Paralyzed feeling: in eyes.
Stupid feeling: in forehead.
Sinking: at heart.
Great weakness: with aversion to move; in chest; in back.
Weakness: in sexual organs; of back; of chest; in region of kidneys, loins and small of back; in arms; in legs.
Dulness: of forehead; of head; of vertex.
Fatigued feeling: in chest; in wounded arm.
Tired feeling: in legs.
Tension: in head; in vertex.
Great oppression: in stomach.
Weight: on ankle bones; in legs.
Feeling of weight: in legs below knees.
Heaviness: in legs; in r. arm; of limbs.
Tingling: in cheek bones.
Tickling: of ear; in nasal cavity; in roof of mouth and in front of nose; in l. cheek; in throat and root of tongue; of corona glandis.
Uneasiness: in l. ovarian region.
Stiffness: of ears; of jaw; of r. side of head; in nose; in r. side of neck; of lower jaw; of neck; in muscles of neck and throat; of r. hand; of fingers and hands.
Numbness: of l. side of head; in both arms and hands; in r. arm; in r. leg below knee.
Dryness: of mouth; of throat; of glans.
Violent jerking: in limbs; in lower jaw.
Jerking: in l. temple; from œsophagus to heart.
Shocklike sensation: down wounded arm to finger ends.
Twitching: in r. femur; in legs; in arms and legs; of muscles through entire body; of tendons.
Slight twitchings: in face and hands; in r. arm.
Strange pulsating: in vertex.
Pulsations: in anus.
Vacillating: in head.
Wavering: of head.
Trembling: of l. hand; in knees; of limbs; through whole body.
Quivering: in face; about sternum; in hands; all over; around breast bone.
Fluttering: about heart.
Something runs round and round several times in flesh, in region of hip, then down leg to knee.
A sensation moves about r. side of face and goes across forehead; from heart to back.
A sense of motion: in stomach; in lower part of abdomen; in middle of abdomen.
Crawling sensation: in r. zygoma.

Google

A sensation half coldish, half burning: in whole epigastric region.
Chilly feeling: in limbs; down bitten arm; all over.
Coldish feeling: far back and deep in throat.
Cool feeling: on tongue; in œsophagus.
Coldness: in stomach; in l. side; in spine.
Intolerable itching: in lower part of body down to feet.
Itching: in locality of acquisitiveness; in a small spot in upper part of both ears; in nose; on os pubis, extending to root of penis; all over arms; in r. hand; in r. foot; in various parts of body.

" **Tissues.** Affects principally the nervous system. —
Great blueness of veins and redness of arteries on wounded arm.
Tearing and shooting as if in bone.
Supraorbital bones feel shattered.
Aching in bones; every bone seems bruised and sore; as if every bone had been broken or violently beaten; never had such pains, had to return to bed and lie there all day.
All his joints cracked on least motion, and pain was quite severe till 10 P.M.
Lost flesh, getting thinner all over.
Quick tendency of bodies to putrefaction. —
Chlorosis.

" **Touch. Passive Motion. Injuries.** He cannot bear to ride in a carriage, feels generally unwell during or after it.
When water (in bath) was least ruffled, so as to touch a fresh surface, convulsions were excited. —
Faceache after puncturing a pimple on cheek.
A lacerated wound on r. cheek, behind ramus of jaw, one and a half inch, and three lines of abrasion on front of same cheek. —
Local sensations of pain in wound or scar continue often after prodromic stage, in an increased degree in higher stage, but are in last scarcely heeded. —
Peculiar sensations are frequently experienced at seat of bite, or in adjacent parts; like a sensation of pricking, boring or burning, always proceeding from wound. —
Complained of a pain in r. arm (bitten part); no inflammation or enlargement of glands of axilla could be discovered. —
Tearing pains often proceed from wounded parts, frequently attributed by patients to effects of a cold and to rheumatism thereby induced. —
Shooting out from bitten part towards trunk, less frequently extending outward from sensorium, or in some locality other than part injured. —

Google

Wound in exceptional cases appears inflamed and swollen; of a reddish or bluish hue. —
Sensation of creeping and pain in scar. —
Next morning, wound red around edges. —
Great redness of small bloodvessels around wound. —
Soreness in muscles around wound, which is now almost healed. —
The wound healed without irritation kindly in course of twelve or fourteen days. —
Some are without pain in bitten part. —
No pain, swelling or inflammation in lymphatic glands, between bite and thorax. —
The wounds heal kindly and are characterized by a striking absence of inflammatory reaction. —
The subsequent inflammatory reaction (after caustics) is generally slight, while pain thereby produced is moderated. —
Even after application of strong caustics, wounds manifest a strong tendency to skin over without granulating. —
Never saw a wound more disposed to heal; he was abroad in five weeks, yet afterwards affected by hydrophobia. —
The ready healing of the wound made by the bite of a rabid animal is similar to the rapid healing of wounds in those affected with leprosy.
Touching scar is said to produce peculiar sensations, a shuddering, feeling of anxiety, and sighing. —
Sensation of creeping and pain in scar. —
A bite of an angry dog into r. thigh had not healed, turned into malignant ulcers; surrounding bluish red edges, raised and hard, bases badly suppurating and ichorous, with redness and hardness.
Scars from a bite in nose swollen and red for fifteen months.
Ulcers remaining after bite of evil disposed dogs.
Pain on spot bitten became burning, and extended over whole body, and he felt very strangely. θLyssophobia.
Felt a continued pain in spot on r. calf where he was bitten, but without a lesion. θLyssophobia.
Wounds from bite of dogs, in sheep.
A cow bitten by a dog in foot joint had a large swelling of part, and animal got very restless. —
Two puppies, bitten by their rabid mother, did not get mad after taking *Lyssin*.
It may be a prophylactic to hydrophobia, but never without at the same time applying radiate heat to the part bitten, and frequent sessions in hot room of Turkish bath; during the attack remedies are to be applied according to symptoms.

Google

Slightest touch: brings on convulsions; along whole vertebræ causes irritability akin to convulsions.
Touch: on head makes it ache; small pustules on frontal eminence; nose very sensitive; pimple on eminence of forehead painful; pain on cheek <.
Pressure: on neck of bladder; causes < pain in neck; causes pain in larynx; muscles of forearm painful; violent pain in r. hand.
Disposition to press hand against lower jaw.
Presses head against wall; headache.
Rubbing: headache >; causes ear to pain.
Gentle scratching: headache >.
Scratching: itching in both ears disappears; scurf off pimple, discharge of lymph and blood; sheep's back makes them quiet; < biting and itching in various parts of body; causes small red spots in a circle on inner side of thighs.

[46] **Skin.** Quick tendency of the wound to heal (the same in leprosy).
Many underwent smallpox subsequent to reception of bite, and after their recovery died with hydrophobia
Biting, itching in various parts of body, < by scratching.
Very slight headache and biting itching all over body and legs.
Itching quite severe during night.
Had to scratch frequently, or rather rub.
Through night intolerable itching in lower part of body down to feet.
Itching in r. hand, l. foot, and in various parts of body.
Bluish discoloration of bitten place (after *Laches.*).
Itching as soon as he begins to get warm in bed, particularly on inner sides of thighs and knees; after scratching there appeared small, red spots in a circle.
When in bed he is compelled to scratch; cannot sleep all night.
Pustules: on forehead; around inflamed eye; on finger (after bite).
Malignant ulcers from bite of a dog.
Red scar from bite of a dog.
Cancerous sores.
Herpes circinatus appeared on l. leg, below knee and livid yellow complexion gave way to a healthy color.

[47] **Stages of Life, Constitution.** Persons have undergone diseases (particularly smallpox) between time bitten and hydrophobia afterwards. —
Man, æt. 40, robust, otherwise good health; spasm of throat. —
Mary M., æt. 32, full habit, healthy, robust, bitten by a mad dog in r. hand; treated recklessly. —

Digitized by Google

Bitten by a mad dog in sixth year in several places; became somnambulistic ten years after.
A woman, æt. 36, white skin, blonde, blue eyes, small, quiet temper, not very sensitive to medicine. —
Girl, æt. 12, same way. —
Æt. 24, same constitution. —
A girl, æt. 11; symptoms after a bite.

[45] **Relations.** Antidotes: *Bellad., Hyosc, Stramon.*
Compatible: *Natr. mur.* follows well; after *Tabac.*, in headache; after *Arg. nit.*, in uterine disease; after *Stannum*, in neuralgia

Phys., vol. 3, p. 101; *Nervous affection*, Curtis, Hom. Phys, vol. 2, p. 402.

[1] **Mind.** Uneasiness, with trembling of hands and absence of mind.
Anxious and warm through whole body, especially in head, while eating warm food.
Anxious, with perspiration all day.
Trembling, anguish and fear, as if some accident would happen; all day, > after going to bed.
Sad mood, with indisposition to talk; sad and disconsolate.

Google

Much < from talking or mental exertion.
Changeable; gloomy, vexed, ill humored, then talkative.

[2] **Sensorium.** Vertigo: when kneeling; when standing, as if everything was turning around; in evening; as if about to faint; in morning after rising, with inclination to vomit and accumulation of water in mouth.
Frequent sudden falling, with consciousness, when standing or walking.
Heaviness and dizziness in head: early in morning, when rising, going off after a walk.

[3] **Inner Head.** Dulness of head from mental exertion.
Pressure and pulsating in forehead.
Congestion to head: with pressive frontal headache; especially when smoking.
Pressing headache from mental exertion and when among many people.
Violent, darting headache, after vexation (1 to 10 P.M.).
Lancinating headache, early in morning, after rising.
Sticking headache.
Heat in head and hands, with redness of face, alternating with paleness.

[4] **Outer Head.** Bruised sensation of vertex.
Pain on top of head, as if hair was pulled.
Dandruff on scalp, itching during wet and rainy weather.
Falling off of hair, tetter on scalp; itching violently in rainy weather.
Hard nodosity on r. temple.

[5] **Sight and Eyes.** Black spots or motes before eyes.
Burning of eyes and dimness of vision.
Lenticular cataract (occasionally received *Sulphur*).
Obscuration of cornea.
Swelling of eyeball.
Dryness of eyes, or profuse lachrymation.
Inflammation of eyes, with redness, burning, stinging and obscuration of sight, or dimsightedness.
Scrofulous ophthalmia, with opacities on cornea.
Agglutination of lids in morning, with pressure in eyes.

[6] **Hearing and Ears.** Great sensitiveness of ear to noise.
Whizzing, buzzing, fluttering in r. ear.
Hardness of hearing and ringing in ears.
Inflammation of ears, with external redness and sensation of great soreness.

[7] **Smell and Nose.** Bleeding from nose in morning, more from r. side.
Vesicular eruption in nose, with pressing pain.
Dry coryza or obstruction of nose, waking one at night.

[8] **Upper Face.** Face: dirty, dark yellow; frequent congestion to head; pale, earthy; alternately red and pale.

Google

‖Tension on face, as if white of egg had dried on it.

‖Nightly tearing, digging and boring in malar bone, insupportable during rest and driving one from place to place; swelling of malar bone, with pulsating pain.

‖Obliged to run from room to room all night on account of pain in face, to hold painful side and constantly wag head; as soon as she remained quiet pains returned.

‖Neuralgia facialis, l. side, shooting like lightning; < from touch, draft, change of temperature; cannot stay in bed, must walk floor.

‖Hard nodosities, bloatedness and swelling of face.

[9] **Lower Face.** ‖Herpetic eruption around lower part of mouth.

‖Hard little nodosities in corners of mouth.

[10] **Teeth and Gums.** ‖Beating and stinging in teeth after eating.

‖Toothache: while riding in a carriage, < in cold; at night, compelling one to rise and walk about, pain insupportable while at rest; during pregnancy; mostly burning, tearing, drawing, twitching, or great ulcerative pain, with twitching in fingers and feet; from teeth to temples, commencing only in evening in bed; with swelling of gums and inflamed mucous membrane.

‖Insupportable tearing pain generally from a hollow tooth, passing through face and into head and affecting eye; easily dazzled; slightest draft of air brings on pain; < from warmth of bed, must get up and walk about; > for a short time by a mouthful of cold water; ill humored, capricious.

‖Toothache: at one time in one, at another in several apparently sound teeth; severe boring in r. side of lower jaw, with tearing pain through r. side of face, extending to region of temple; stiffness of muscles of neck and throat; painful side swollen; pain slight during day, very severe at night; as soon as she gets into bed, must get up and walk about.

‖Pains tearing and extending into l. temple; teeth extremely sensitive to slightest touch of tongue, feel too long; increase of saliva; < at night. θOdontalgia rheumatica.

‖Awakens from sleep with intolerable pain; burning in all teeth of r. side; hot sensation in mouth; burning, throbbing pains, extending to malar bone and to ear; temple sensitive to slightest touch; drawing out sensation in ear; several hollow teeth on r. side; pains begin in afternoon, grow very severe in evening on getting warm in bed; menses regular.

‖Toothache of pregnant women; throbbing pain with

occasional stitches; ulcerative pain when teeth are touched.
‖Teeth feel too long.
‖Ailments from cutting wisdom teeth.
‖Looseness of teeth, with swelling of gums.
‖Slow eruption of teeth; emaciation.
Caries of lower teeth.
‖Burning vesicles on gums, on inside of cheeks, tongue, lips and palate, they bleed from least contact.

[11] **Taste and Tongue.** ‖Bitter or sour taste in mouth.
‖‖Bitter taste, tongue coated white; mouth and teeth full of tough, white mucus, going off after rinsing of mouth.
‖Frequent, sudden stammering speech.

[12] **Inner Mouth.** ‖Dryness of mouth, especially at night and in morning.
‖‖Bloody saliva.
‖‖Sour breath.
‖Aphthæ.

[13] **Throat.** ‖Stinging in throat when talking and swallowing; much mucus.
‖‖Burning in throat and palate, with dryness and roughness, as if scraped by an awn.
‖Frequent rising of mucus in throat (morning), with roughness and dryness of fauces.
‖Soft, fetid tubercles, of color of peas, are hawked up.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Inordinate appetite for meat in children of tuberculous parentage.
‖Violent thirst for water, especially in evening and at night.
‖Desire for: meat; bread; fruit; acid drinks.
‖Aversion: to green food; relishes meat.

[16] **Hiccough, Belching. Nausea and Vomiting.** ‖‖Heartburn; belching; eructations sour or greasy; sour taste and sour vomiting.
‖Much loathing, without desire to vomit.
‖Nausea: and vertigo while eating, followed by retching and vomiting of a bitter salt water; while riding in a carriage.
‖Sour vomiting with colic.

[17] **Scrobiculum and Stomach.** ‖Feeling of emptiness and qualmishness in stomach; > after dinner.
‖Great amount of wind, which is sour when eructated.
‖Aching and contractive pain, with sour eructations.
‖Constrictive pain in stomach.
‖Ulcerative pain in stomach, with great sensitiveness to pressure.
‖Meteorism of stomach when it is sensitive to touch; no eructation.

Google

‖Sour eructations and pyrosis after cabbage, potatoes, and other gross food.
‖Milk is refused, or if taken, causes pain in stomach.
‖‖From indigestion, disposition to furuncles and headache; tongue coated dirty yellow.

[18] **Hypochondria.** ‖Hardness with stitches in hepatic region.
‖Insupportable pain in l. hypochondriac region through to back; must support spot with hand and get up and walk about; < lying down and at night; sleepless for one week; toothache in r. upper and lower jaw, < from cold water.

[19] **Abdomen.** ‖‖Pain over umbilicus, when feeling that part.
‖Cutting about navel, > from emitting flatus.
‖Cutting and pinching in abdomen; griping before stool.
‖Pressing, spasmodic, contracting, colicky pains; > by green stools.
‖‖Colic, followed by leucorrhœa.
‖Great heaviness in bloated abdomen.
‖Pressing towards pelvis, as if menses would come on, with cutting in abdomen.
‖Abdomen excessively distended; profuse emission of flatus, with relief.
‖Violent audible rumbling, gurgling, and moving back and forth, with fine cutting in abdomen all day.
‖Affection of l. abdominal ring; inguinal hernia.

[20] **Stool and Rectum.** ‖Stools: green, like scum on a frog pond; sour, frothy; with white, floating lumps, like tallow; bloody, mucous; green, mucous; greenish yellow; brown, fluid; green and frothy; of a liver colored fluid; followed by tenesmus and burning; of greenish water, with great distension of abdomen.
‖The bloody mucus is found mixed with green, watery stool, sinking to bottom of vessel and adhering there; but the watery stool occurs alone. θDysentery. θInfantile diarrhœa.
‖Lienteria of sucklings; milk passes undigested.
‖Diarrhœa, with violent cutting colic and pressure, as many as seven or eight times a day, for eight days.
‖‖Griping and rumbling in whole abdomen, followed by diarrhœa, thin and green, without tenesmus.
‖‖Diarrhœa; preceded by cutting colic; much wind in bowels.
‖‖Green, watery diarrhœa regularly every three weeks.
‖Watery, yellowish brown diarrhœa, containing white particles, looking as if chopped up; vomiting of mucus; extreme and rapid emaciation.
‖Stools offensive and watery, containing floating masses of green scum; some straining, and during stool child did not wish to be touched. θInfantile diarrhœa.

Google

‖‖Sour eructations; whole child smells sour; great thirst, especially evenings. θCholera infantum.

‖Diarrhœa of young children; milk causes pain in stomach, is rejected, or passes bowels undigested; stools green, sour smelling; colicky pains.

‖‖Constant, sour, rather whitish, watery diarrhœa. θInfantile remittent fever.

‖‖Stool only every second day.

‖Costive; frequent, ineffectual urging, with small stools, or only flatus; stitches in anus; stool hard as a stone; frequent effort to pass a natural looking stool; stitches in anus and rectum.

‖Before stool: colic; cutting and pinching in abdomen; general heat; rumbling; emission of flatus.

‖During stool: colic; urging; tenesmus.

‖After stool: tenesmus; burning at anus.

‖Woke about 4 A.M. with intolerable pain in rectum, as if pierced with needles.

‖Ascarides and lumbrici.

‖‖Always < after walking some distance, sufferings being proportionate to extent of walk; prickings in rectum after walking. θAscarides.

[21] **Urinary Organs.** ‖Urine: increased, pale, watery or green; with white sediment.

‖Involuntary urination while walking or rising from a seat.

‖Burning, smarting during urination.

[22] **Male Sexual Organs.** ‖Sexual desire diminished; erections wanting.

‖Prostatic fluid so easily discharged that even emission of flatus causes it.

‖Inguinal and scrotal hernia.

[23] **Female Sexual Organs.** ‖Menses: late, scanty; stop in afternoon; flow acrid, dark, pitchlike; profuse and too early, flowing more at night and at first on rising, also between uterine pains; blood thick, dark, glutinous, like pitch, difficult to wash off.

‖Before menses: coryza and obstructed nostrils, sore throat, laborlike pains, cutting colic, backache, weakness, chilliness.

‖At commencement of menses, heavy headache, coryza, pale face, drawing pain in sides and great lassitude.

‖During menses: violent pains in abdomen; weakness, chilliness, headache, paleness of face, pain in small of back, or spasmodic, pressing pain in abdomen.

‖‖Menses flow more profusely during night, with dragging pains; > on pressing on abdomen and on stooping.

‖Menses lessen or cease to flow in afternoon.

‖Flow dark, very profuse, but much more profuse during

Google

night and at first rising than during day; on rising in morning, contractive pain in abdomen, and sharp upward stitches in rectum, followed by discharge of coagula from vagina.

‖Milk always causes distress in stomach and sour risings; subject to frequent diarrhœa. θMetrorrhagia.

‖Leucorrhœa: acrid, white, mucous, preceded by colic; watery after menses; thin, scanty, with pinching around navel; smarting in afternoon, when walking or sitting.

‖Frequent itching of pudendum.

[24] **Pregnancy. Parturition. Lactation.** ‖‖Toothache during pregnancy, more during night.

‖During pregnancy: constant nausea, no vomiting; sour taste and sour vomiting; appetite for certain kinds of food; earthy color of face; tendency to cry; stitches in l. side under short ribs; all symptoms < every third week; much roughness, or stinging, or burning in throat, with desire to vomit; eructations tasting of rotten eggs.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Sudden stammering; occasional aphasia.

[27] **Cough.** ‖Cough: spasmodic, at night; from tickling in larynx; sputum, mornings and during day, yellow, thin or tough mucus, or dark blood, tasting saltish; < in evening until after midnight.

‖Fits of spasmodic cough at night in persons much troubled with ascarides.

‖Expectoration of soft tubercles big as a pea and very offensive in smell.

[28] **Inner Chest and Lungs.** ‖Oppression of chest, with sensation of constriction.

‖Soreness in chest and region of heart; stitches.

‖‖Stitch from without inward in præcordial region.

[31] **Neck and Back.** ‖Stiffness in neck.

‖Pain in back and small of back at night, as if broken.

‖Sudden, violent, concussive, tearing, stitching pain in coccygeal region as if spine was bent back.

[32] **Upper Limbs.** ‖Much pain in head and r. shoulder; she can scarcely raise r. arm.

‖Pain as from dislocation of shoulder joint when moving it.

‖Rheumatic pain in shoulders (at night), with tingling down to fingers; pain prevents least movement.

‖Lameness of r. arm, with pain in shoulder, without swelling or soreness.

Tubercle on wrist pouring out clear water when pressed.

‖Chapping of skin of hands.

Spreading, corroding, stinging vesicles on hands and fingers.

Google

‖Red, inflammatory swelling of fingers.
‖‖Heat of fingers (in fever).

[33] **Lower Limbs.** ‖Restlessness in legs.
‖Drawing pains in legs and feet.
‖Itching of buttocks, with red spots after scratching.
‖Pains around l. knee, like something tight; l. calf hard; hard swelling in hollow of knee; cannot put l. foot to ground when walking, but only when standing. θAffection of knee.
‖Painful swelling in bend of knee.
‖Knees painful in walking, feet when lying in bed.
‖Cramp in calves (at night).
‖Burning spot on tibia.
‖‖Œdema of feet up to calves.
‖‖Bloodboils on lower legs.

[34] **Limbs in General.** ‖Rheumatic pains in limbs.
‖Restlessness in limbs, in evening after sitting long.

[35] **Rest. Position. Motion.** Rest: during, pain in malar bone insupportable; pains insupportable.
Lying down: pain in l. hypochondriac region <; external coldness.
Lying in bed: feet painful.
Must support back with hands and get up and walk about: pain in l. hypochondriac region.
Head thrown back, or leg drawn up, l. leg perfectly straight.
Sitting: smarting leucorrhœa; restlessness in limbs; sensation of being tired.
Kneeling: vertigo.
Standing: vertigo; frequent sudden falling, with consciousness; epileptic attacks.
Rising from seat: involuntary urination.
Can scarcely raise r. arm: pain in shoulder.
Least movement impossible: pain from shoulder to fingers.
Motion: of shoulder joint, pain as from dislocation.
After a walk: heaviness and dizziness of head >.
Walking: frequent sudden falling, with consciousness; pains <; prickings in rectum; involuntary urination; smarting leucorrhœa; cannot put l. foot to ground; knees painful; tires much.
Must walk floor: neuralgia facialis.
Driving from one place to another: tearing pain in malar bone.
Obliged to run from room to room and wag head all night on account of pain in face.

[36] **Nerves.** ‖‖Pains: neuralgic, lightninglike, < l. side; insupportable during repose, must get up and walk about.
‖Spasms.
‖Epileptic attacks; while standing or walking, he frequently falls down suddenly, with consciousness.

Google

‖Head thrown back, or leg drawn up, l. leg perfectly straight; seems sore and cries about being moved; lumbar vertebræ sensitive to touch; has no power over l. leg and but little strength in l. hand; will eat nothing but meat, nor drink anything but soup made of meat; stools large, crumbling, infrequent. θNervous affection.
‖‖Sensation of being tired, especially in feet and when sitting; aching, restless.
‖A short walk tires much.
‖Flaccidity, laxness of body.
‖‖Disposed to neuralgia.

[57] **Sleep.** ‖Sleepiness during day.
‖Sleeplessness, from nightly oppression in abdomen.
Restless sleep with frequent waking.
‖‖Unrefreshing sleep, more tired in morning than when lying down in evening.
‖‖Awakes about 2 to 3 A.M., and cannot fall asleep again.
‖Dreams: anxious, with starts and crying out in sleep; of dead persons; of fire; of thieves.

[58] **Time.** 2 to 3 A.M.: awakes and cannot fall asleep again.
4 A.M.: woke with intolerable pain in rectum.
Morning: after rising, vertigo; heaviness and dizziness in head; lancinating headache; agglutination of lids; bleeding from nose; dryness of mouth; frequent rising of mucus in throat.
Morning: on rising, contractive pain in abdomen; sputum yellow, thin, or tough mucus, or dark blood; more tired than in evening.
Day: menstrual flow less; sputum yellow, thin or tough mucus, or dark blood; sleepiness.
All day: anxious, with perspiration; trembling, anguish, fear; toothache slight; fine cutting in abdomen.
Afternoon: toothache begins; menses stop; smarting leucorrhœa; heat <.
Evening: vertigo, as if about to faint; toothache commences; thirst for water; cough < until after midnight; restlessness in limbs after sitting long; external coldness.
1 to 10 P.M.: violent, darting headache.
Night: wakened by obstruction of nose; toothache <; increase of saliva <; dryness of mouth; thirst for water; pain in l. hypochondriac region; menses flow more; spasmodic cough; pain in back and small of back; rheumatic pain in shoulders; cramps in calves.
12 P.M. till morning: sweat, with thirst.

[59] **Temperature and Weather.** Eating warm food: anxious and warm through whole body.
Warmth of bed: toothache <.
Going to bed: > anxiety.

Google

Great aversion to uncovering.
Wet and rainy weather: itching of scalp.
Change of temperature: neuralgia facialis <.
Draft: neuralgia facialis <.
Cold water: > toothache for a short time; toothache <.
Cold: toothache <.

[40] **Fever.** ‖Chill and chilliness: with external coldness in evening and after lying down, slowly going off, followed by heat; in bed as if dashed with cold water; great aversion to uncovering.
Chill: running down back; > by out door exercise.
‖‖Great internal heat, at night, restless, aversion to uncovering.
‖Heat: one (r.) sided; mostly in forenoon, often with sweat on head.
‖‖Redness, burning and thirst for half an hour, often with sweat on head.
‖Sweat: greasy, oily, stains yellow; difficult to wash off; sour, putrid smelling.
‖Sweat, with thirst, after 12 P.M. till morning.

[41] **Attacks, Periodicity.** Seven or eight times a day for eight days: diarrhœa and colic.
Nightly: tearing, digging and boring in malar bone; oppression in abdomen.
Every second day: stool.
For one week: sleeplessness.
Every three weeks: green watery diarrhœa; all symptoms <.
‖‖All the symptoms aggravated every third week.

[42] **Locality and Direction.** Right: hard nodosity on temple; bleeding from nose < r. side; whizzing, buzzing, fluttering in ear; severe boring in side of lower jaw; tearing pain in side of face; several hollow teeth on side; toothache in upper and lower jaw; much pain in shoulder; lameness of arm; heat on side.
Left: neuralgia facialis; pain from teeth to temple; insupportable pain in hypochondriac region; affection of abdominal ring; stitches in side under short ribs; pains around knee; calf hard; cannot put foot to ground; neuralgic pains < on side; has no power over leg and but little strength in hand.
From without inward: stitch in præcordial region.

[43] **Sensations.** As if everything was turning around; as if about to faint; as if hair was pulled; as if white of egg had dried on face; teeth as if too long; throat as if scraped by an awn; as if menses would come on; particles of diarrhœa look as if chopped up; as if rectum was pierced with needles; back as if broken; as if spine was bent back; shoulder as if dislocated; as of something tight around knee; as if dashed with cold water.

Google

Pain: on top of head; in face; over umbilicus; in back; in small of back; in shoulder joint; in shoulder; around l. knee.
Much pain: in head and r. shoulder.
Intolerable pain: in rectum.
Insupportable pain: in l. hypochondriac region, through to back.
Insupportable tearing pain: generally from a hollow tooth, through face into head and eye.
Violent pain: in abdomen.
Violent, darting pain: in head.
Lightninglike shooting: in l. side of face.
Lancinating: in head.
Cutting: about navel; in abdomen.
Pinching, griping: in abdomen.
Tearing, digging and boring: in malar bones.
Violent, concussive, tearing, stitching pain: in coccygeal region.
Burning, tearing, drawing, twitching or great ulcerative pain: in teeth.
Burning, throbbing pains: in malar bone and ear.
Beating: in teeth.
Pulsating pain: in malar bones.
Spasmodic pain: in abdomen.
Ulcerative pain: in stomach.
Stitches: in anus; in rectum; in l. side under short ribs; in chest and region of heart.
Stitch: in præcordial region.
Pressing, spasmodic, contractive, colicky pains: in abdomen.
Cramp: in calves.
Constrictive pain: in stomach.
Aching and contractive pain: in stomach.
Laborlike pains: before menses.
Dragging pain: in abdomen.
Drawing pain: in sides; in legs and feet.
Rheumatic pain: in shoulders; in limbs.
Pressive pain: in forehead; in nose.
Sticking: in head.
Burning: of eyes; in all teeth on r. side; in throat and palate; at anus; in spot on tibia.
Burning, smarting: during urination.
Stinging: of eyes; in teeth; in throat.
Great soreness: in ears.
Soreness: of throat; in chest and region of heart.
Bruised sensation: of vertex.
Heat: in head and hands.
Pulsating: in forehead.

Google

Throbbing with stitches: in teeth.
Twitching: in fingers.
Hardness with stitches: in hepatic region.
Drawing out sensation: in ear.
Pressure: in forehead; in eyes; towards pelvis.
Tension: on face.
Constriction: of chest.
Emptiness and qualmishness: in stomach.
Anxious feeling: in whole body, especially in head.
Dulness: of head.
Heaviness: in head; in abdomen.
Oppression: of chest.
Dizziness: in head.
Dryness: of eyes; of mouth; of throat; of fauces.
Hot sensation: in mouth.
Prickings: in rectum.
Stiffness: of muscles of neck and throat.
Ringing: in ears.
Whizzing, buzzing, fluttering: in ear.
Tired sensation: in feet.
Lameness: of r. arm.
Restlessness: in limbs.
Tickling: in larynx.
Tingling: down to fingers.
Violent itching: over whole body.
Itching: of scalp; of pudendum; of buttocks.

"**Tissues.** ‖Weakened condition of muscular structures; flaccidity; laxness; hernia.
‖Rheumatic affection of groups of muscles and of joints.
Engorged glands; scrofulosis.
‖Spasmodic affections of stomach and intestines, increased secretion from mucous membranes, and glands of stomach and intestines.
‖Defective digestion; emaciation, swelling of glands, abdomen heavy and bloated. θAtrophy of children.

"**Touch. Passive Motion. Injuries.** Touch: neuralgia facialis <; teeth extremely sensitive; temple sensitive; causes ulcerative pain in teeth; causes bleeding of vesicles on gums, cheeks, tongue, lips and palate; cannot bear it when at stool; lumbar vertebræ sensitive.
Hold painful side of face: obliged to.
Pressure: stomach very sensitive: over umbilicus causes pain; on abdomen menstrual flow >; on tubercle on wrist causes pouring out of water from it.
Scratching: causes red spots on buttocks; lessens itching of skin.
Riding in a carriage: toothache; nausea.

"**Skin.** ‖Sour smell of whole body.

Google

‖Violent itching over whole body.
‖Itching and dryness of skin; itching > by scratching.
‖Large stinging nodosities under skin.
‖Painful, small, red herpes, scaling off.
‖Spreading blisters.
‖Small bloodboils (lower legs) with headache and yellow tongue.

47 **Stages of Life, Constitution.** ‖Adapted to persons, especially children, of irritable disposition, nervous temperament; lax fibre; sour smell.
Child, æt. 16 mos., suffering three weeks; diarrhœa.
Boy, æt. 4; ascarides.
Boy, æt. 8, dark complexion, large head and very small limbs; nervous affection.
Girl, æt. 11; scrofulous inflammation of eyes.
Girl, æt. 22; toothache.
Woman, æt. 24, blonde, sanguine temperament, excitable; toothache.
Young woman, suffering four months; affection of knee.
Woman, æt. 27, fair and stout, married six years, but never pregnant, menstruation normal before marriage, irregular soon after, appearing at intervals of three or four months, and continuing for twelve to sixteen weeks; menorrhagia.
Man, æt. 32, good health, father had been operated for cataract on both eyes; lenticular cataract.

48 **Relations.** Antidoted by: *Arsen.*, *Chamom.* (neuralgia); *Merc. sol.*, *Nux vom.*, *Pulsat.*, *Rheum* (abdominal troubles).

[1] **Mind.** Disinclined to talk, prefers solitude.
Tearful, inclined to weep; sad and homesick.
Anxious in room, > in open air.
Worse from mental exertion.
Excited; unhappy; fitful; emotional.
While reading, felt as if some one was reading after her and she must read faster and faster.

[2] **Sensorium.** Sensation of numbness in forehead, head feels dull; < in morning when awaking and when lying; > from exercising in open air and wrapping up head.
Congestion of blood to head, with painful undulation and whizzing, as of boiling water on side upon which one rests.
Heaviness in head, reeling, as if one would fall.
Vertigo: in morning, on rising; during dinner; going off in open air.

Google

[3] **Inner Head.** ‖‖Every six weeks, pain in forehead and around eyes; feels as if head would burst; must lie down; < from motion and in fresh air; > from strong pressure and wrapping up head; anorexia; bitter taste; eructations; waterbrash; region of stomach and liver sensitive to pressure; liver hard and enlarged; cannot lie on r. side; has stool only after injections; passes small, yellowish grey balls; bilious look to urine, with much mucus; tongue thick coated, tip and edges clear; great thirst; no fever. θCephalalgia.

‖Compressive sensation in head, from both sides, with a hot feeling, and with beating in forehead when pressing upon it.

‖Tearing and stitches in temples, with great sensitiveness of vertex, as if hair was raised by pulling.

‖Griping, raging, in temples, with a feeling as if he would become dizzy and lose consciousness, > on pressing head, in evening after lying down.

‖Sharp sticking and tearing in r. side of head, extending to eye, which she was obliged to press together.

‖Headache, > from tying a bandage tight around head, or wrapping up head.

[4] **Outer Head.** ‖‖Tendency of head to sweat.

‖‖Nodosities on occiput, tearing, painful to touch.

[5] **Sight and Eyes.** ‖When looking into light, lachrymation and burning of eyes.

‖Yellow color of scleroticæ.

‖Eyes inflamed, violent burning and redness of scleroticæ.

‖‖Nightly agglutination of lids.

‖Tinea ciliaris, accompanied by a pimply eruption on face, comes and goes; < after supper and in a warm room, and on women before menses.

[6] **Hearing and Ears.** ‖Deafness, as if something was lying before ear.

‖Pulsation in ears.

‖Itching of old herpes behind ears.

[7] **Smell and Nose.** ‖Distressing dryness of nose.

‖‖Violent coryza, at one time stopped, at another fluent, dulness of head and complete loss of taste and smell.

‖Coryza; yellow, fetid mucus, or acrid, corrosive water; nose obstructed at night.

‖Ulceration of edges of nostrils; picks affected parts; sweat about head and feet. θOzæna.

‖Rawness of inner surface of alæ nasi and of septum narium; yellow scurfs in nose; watery, acrid, mucous discharge, corroding upper lip; obstruction of nose; sore pain and burning < from deep breathing, sneezing or touch; < in morning; face pale, yellowish.

‖Redness and swelling of nose or of alæ.

Google

[8] **Upper Face.** ‖Pale, yellowish, earthy complexion; suffering, sickly look.
‖Severe cramp pains in bones of face; prosopalgia.
‖Eruptions, pimples and blotches on face and forehead; < nights, in warm room, and before menses.

[9] **Lower Face.** ‖Chapped lips.
‖Large vesicles on margin of vermillion border of lower lip, itching, afterwards burning.

[10] **Teeth and Gums.** ‖Toothache almost insupportable when food touches teeth.
‖‖Upper incisors seem too long and very sensitive.
‖Painful swelling and easy bleeding of gums.
‖Slow dentition, with distended abdomen and constipation.

[11] **Taste and Tongue.** ‖Tongue feels burnt, mouth scalded.
‖Rhagades on tongue, with violent burning.
‖Tongue coated white early in morning; or tip and edges clean, large, flabby and yellow. θInduration of liver.

[12] **Inner Mouth.** ‖Whole inner mouth feels as if scalded.
‖Sensation of roughness on inner side of upper lip when touching it with tongue.
‖Dryness of mouth and tongue without thirst.
‖Accumulation of water in mouth.
‖Continual rising of white froth into mouth.

[13] **Throat.** ‖Dryness and roughness in throat, hoarse voice.
‖Rising of ball from stomach to throat, > by eructation.
‖Difficult hawking of thick, tough (blood mixed) mucus.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Hunger, but knows not for what; ravenous, followed by nausea; inclination to nibble; desire for sweets; for vegetables; < from salt things.
Loss of appetite.
Violent thirst (3 A.M.).

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough: during and after dinner, so severe as to cause vomiting; region of stomach painful, particularly to pressure.
‖Regurgitation while walking.
‖Eructations: tasting like onions; like rotten eggs; relieve faintness and nausea, at dinner.
‖Waterbrash; stomach and liver sensitive.
‖‖Water rises from stomach into mouth, with nausea.
‖Nausea: in morning, after rising; with accumulation of water in mouth; and faintness, succeeded by coldness and weakness in stomach.

[17] **Scrobiculum and Stomach.** ‖Weakness, as if emanating from stomach.
‖Oppression and throbbing in pit of stomach.
‖‖Children are unable to digest milk, it causes pain in stomach and passes undigested. θDentition.

Google

Eroding pain in stomach, going off after eating and coming on again at termination of digestion; tongue clean, too red. θCardialgia.

She is roused from sleep at one o'clock at night by a pain in stomach as if it was cut to pieces; rising into throat of a ball, with suffocating arrest of breathing, and tossing about in bed and on floor for two hours, at last > by eructation.

Severe cardialgia; attacks vary in duration; pains pressing, disappear while eating and reappear about an hour afterwards; palpitation, particularly when sitting, > by getting up and walking about; in sleeping must lie on l. side; on awaking and for about an hour after breakfast feels quite well, then cardialgia sets in and occurs several times during day; stool hard like sheep dung; leucorrhœa before menses; menses fourteen days late.

Severe itching and burning in nose, lower part of which is red and sensitive; daily attacks of headache, pain in forehead, > from motion, particularly in open air; horripilations; loss of appetite, constant satiety; fat food cannot be tolerated; tongue coated; constipation.

[18] **Hypochondria.** Pressing pain in liver, when walking and touching it, < lying on r. side, liver hard and enlarged.

Can lie only on back or affected side, in any other position pain in liver <; after eating, pain, flatulency, oppression of chest; dirty, yellow tongue; grey, hard, difficult stool, every three or four days; pulse small, weak, slow; debility; apprehensive, lachrymose. θAffection of liver.

Weight in hypochondriac region; cannot lie on l. side on account of sensation as of something dragging over to that side. θAffection of liver.

Hemorrhoids; much irritation about anus; stools knotty and slimy; enlargement and tenderness of r. ovary; dragging down pain from r. ovary to thigh. θAffection of liver.

Stools large and lumpy, covered with slimy mucus of various colors, from light yellow to green, and dark green or leaden; appetite irregular; pains in epigastric region about an hour before food; yellowish hue of face; abdomen large; bowels move once a week. θAffection of liver.

Chronic induration of liver, pressive pain extending to back and stomach; face dark yellow; tongue dirty, yellowish; bowels distended and hard, with pressure and heaviness; stool hard, grey; urine turbid; dyspnœa; palpitation; œdema of feet up to calves of legs; weak, emaciated; fearful, easily frightened. θAffection of liver.

Google

Attacks of gastralgia every evening; tenderness in hypogastric region; anteversion of uterus; enlargement of liver; stools very dark, occurring once in four days; heavy weight in r. hypochondrium, could not rest on r. side. θDerangement of liver.

Recurring attacks of indigestion, biliousness, constipation, with large, hard motions like balls and inability to lie on r. side; catamenia too profuse, often and long, with excessive uterine pains; disposed to eat frequently, on account of gnawing at pit of stomach, > by small quantity of food, but made < by more. θEnlargement and congestion (induration) of liver.

Dull, aching, tensive pain in hypochondriac region, going through to r. scapula; inability to lie on r. side, doing so causes more pain; dyspnœa; irregular action of heart, sometimes beating loudly; urine scanty and high colored, slightly albuminous; feet and legs œdematous; epigastric and r. hypochondriac region tender to touch; colicky pains and flatulency in abdomen; stools of bullet shaped masses every three or four days; area of liver dulness greatly increased laterally and downward; free edge of it felt extending two and a half inches below ribs and bulging outward, but feeling hard. θEnlargement and congestion of liver.

Hepatic affections with tendency to hemorrhages from various organs.

Marked enlargement of liver, accompanied by ascites.

19 **Abdomen.** Drawing pain in abdomen at night.

Tearing in abdomen; tearing stitches in loins.

Cramps in abdomen.

Colic in evening, extending to thighs, followed by fluor albus; hysteria.

Colic at 1 A.M., had to lie crooked; could not endure covering.

Chronic, painful hardness of r. side of abdomen.

Distended abdomen with constipation.

Abdomen tense, sore as if bruised, sensitive to touch.

Rumbling, cutting, pinching in abdomen.

Tingling, stinging in abdominal muscles.

Troubles from tapeworm.

20 **Stool and Rectum.** Diarrhœa: of mucus and blood; in evening and at night; pain in stomach; great chilliness after getting into bed; chronic looseness.

Since parturition, five weeks ago, diarrhœa, particularly in morning; chilliness during stool; loss of appetite; rumbling in abdomen.

Stools: covered with mucus and blood; greenish, papescent; in large, hard lumps; crumbling at verge of anus;

Google

abdomen distended; hard, knotty, like sheep dung; insufficient, delayed; crumbling at verge of anus and seem as if burnt.

‖‖She was obliged to hurry to stool, which was crumbly and as if burnt, with sticking pains in rectum, followed by burning in anus.

‖‖A child, æt. 2, for several months diarrhœa and cough, finally constipation, great effort and pain to bring forth a stool, which crumbles to pieces as soon as it escapes rectum.

‖‖Constipation since last confinement, two years ago; stools large and in hard lumps; bowels move about every eight days; every few days has much pain and distress in hypogastric region; pale and weak, otherwise well.

‖Poor, puny, rachitic children, with enlargement of abdomen; liver unduly large; appetite irregular, fond of sweets; stools small, hard, dry, passed with difficulty. θConstipation.

‖Constipation of infants during dentition.

‖‖Absence of desire for stool; atony as with the bladder.

‖Much pressure to stool; passage scanty or only flatus.

Before stool: painful urging.

During stool: painful urging and occasional discharge of mucus; pressure with scanty passage or only flatus; burning at anus and pain as if from excoriation.

After stool: burning at anus, shuddering for a short time.

[21] **Urinary Organs.** ‖Frequent desire to urinate day and night, with scanty discharge.

‖‖Urine can only be passed by bearing down with abdominal muscles; atony of bladder.

‖Urine passed only by drops, some always seem to remain.

‖Urine pale yellow, followed by burning in urethra.

‖Numbness of urethra.

[22] **Male Sexual Organs.** ‖Frequent erections; early in morning, with burning in penis.

‖After an embrace, burning pain in back.

‖Nocturnal involuntary emissions with or without dreams; scrotum relaxed and loose and often covered with perspiration; constipation; indigestion; biliousness; itching at anus.

‖Itching on genitals and scrotum, extending as far as anus.

‖Scrotum relaxed.

[23] **Female Sexual Organs.** ‖Bearing down in ovarian region.

‖‖Scirrhous indurations of os uteri.

‖Uterine diseases complicated with hysterical complaints.

‖Uterine spasms extend to thighs, followed by fluor albus.

‖Menses: with great excitement at every period; flow black, clotted; profuse and early or late, with violent

Google

pains, < in back when walking and in thighs when sitting, pale face, debility, nervous excitement; suppressed.

‖Metrorrhagia < at night in bed, causing hysteria.

‖Menstrual pains > by having back pressed.

‖Leucorrhœa: watery, thick, followed immediately by discharge of blood; after exercise; with every stool; following uterine spasm; followed by metrorrhagia; < in morning after urinating; two weeks after menstruation, lasting three or four days; profuse, continuing almost without intermission.

‖Metrorrhagia of old maids, blood clotted; after abuse of mercury.

[24] **Pregnancy. Parturition. Lactation.** ‖Nausea and vomiting during pregnancy; hepatic disorder previous to marriage, or uterine spasms with metrorrhagia.

‖Labor pain, interrupted by hysterical spasms.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness, with roughness and dryness of throat; in morning after rising.

‖Tingling in larynx.

[26] **Respiration.** ‖Oppressed breathing, greater after a meal.

‖Globus hystericus and oppression of breath.

[27] **Cough.** ‖Dry cough evening and night, with burning and soreness in chest.

‖Spasmodic cough at night, with tickling in throat.

‖Spasmodic cough caused by tickling in throat; no expectoration in evening or at night; during day, watery but at the same time tough, yellowish, occasionally purulent expectoration, of fatty taste and offensive odor and at times mixed with lumps of blood; < evening until midnight, rest, sitting, lying in bed, deep breathing, air of room, eating, ascending steps, speaking, fatty foods or fruit. θWhooping cough.

‖Bloody expectoration brought on by sea bathing.

[28] **Inner Chest and Lungs.** ‖Sudden heaviness of chest, with oppression of breathing, at dinner.

‖Tension and constriction of chest.

‖Constrictive pain in chest and scapulæ.

‖Congestion of blood to chest from bathing in sea; bloody expectoration; great weakness.

[29] **Heart, Pulse and Circulation.** ‖Stitches in heart, taking away breath.

‖Palpitation of heart and cardiac pain while sitting, going off on motion.

‖Pulse accelerated, with ebullitions while sitting.

[31] **Neck and Back.** ‖Swelling of cervical glands.

‖Pain as from bruises, above and in small of back and

both hips, with sensitiveness of parts to touch; also during menses.
‖Contractive, spasmodic pain in small of back.
‖Stitches, tearing and burning in small of back.

[32] **Upper Limbs.** ‖Rheumatic pain in shoulder joint, extending down arm to hands; < from motion.
‖Tearing pains in shoulders, arms, wrists and hands.
‖The arms "go to sleep" when awaking in morning.

[33] **Lower Limbs.** ‖Sensation of great fatigue in legs, even while sitting.
‖Heaviness in legs.
‖Twitching, tearing in hips.
‖Restlessness and tense feeling in thighs, must move legs for relief.
‖Pressing pain in knees.
‖Cramps in calves at night.
‖Burning in soles, evenings.
‖Foot sweat.

[34] **Limbs in General.** ‖Much weakness in limbs. θUterus displaced.
‖Paralytic drawing and tearing in limbs.

[35] **Rest. Position. Motion.** Rest: cough <.
Lying: dulness of head <; griping, raging in temples; cough <.
Must lie down: pain in forehead.
Must lie crooked: colic.
Cannot lie on r. side: liver sensitive.
Must lie on l. side: palpitation.
Cannot lie on l. side: something (liver) seems to drag to that side.
On side upon which one rests: sensation as of boiling water.
Can lie only on back or affected side: pain in liver.
Sitting: palpitation; pains in thighs; cough <; pulse accelerated, with ebullitions; great fatigue in legs.
Motion: headache <; pain in forehead >; palpitation >; rheumatic pain in shoulder, arm and hand <.
Must move legs: restlessness >.
Exercise in open air: > dulness of head; leucorrhœa.
Getting up and walking: palpitation >.
Walking: regurgitation; pressing pain in liver; pains in back.
Ascending steps: cough <.
Tossing about in bed and on floor for two hours: pain in stomach.

[36] **Nerves.** ‖‖General sensation of soreness, with great sensitiveness to noise.
‖‖Hysterical and spasmodic complaints; uterine troubles.
‖Many spasms day and night, sleeplessness; fainting fits

Google

at table, nausea, and trembling, > by eructations. θHysteria.

‖Weakness and chill, < during hysterical paroxysm.

‖Great weakness from a sea bath.

‖Weakness of body as if coming from stomach.

‖Fainting fits at dinner, nausea and trembling, > by eructations.

[37] **Sleep.** ‖Sleepiness during day, with yawning and sluggishness.

‖Goes to sleep late; sleeplessness on account of nightly heat, with thirst.

‖Restlessness of body as soon as she closes eyes; evening in bed.

‖Shocks through body at night, while waking.

‖Sleep unrefreshing; tired in morning.

‖Anxious, frightful dreams, with talking and crying out during sleep.

[38] **Time.** Morning: dulness in head <; on rising vertigo; burning in nose; tongue coated white; nausea; diarrhœa; frequent erections; leucorrhœa <; roughness and dryness of throat; arms "go to sleep;" is tired.

1 A.M.: pain in stomach; colic.

3 A.M.: violent thirst.

Day: frequent desire to urinate; expectoration watery but tough; many spasms; sleepiness.

At dinner: sudden heaviness of chest, with oppression of breathing; fainting fits.

From 4 to 8 P.M.: chill <.

After supper: tinea ciliaris <.

Evening: after lying down, pain in temples; colic in evening; diarrhœa; dry cough; cough < till midnight; burning in soles; in bed, restlessness of body; heat.

Evening till 12 P.M.: heat.

Night: obstruction of nose; eruption on face and forehead; drawing pain in abdomen; diarrhœa; frequent desire to urinate; metrorrhagia < in bed; dry cough; spasmodic cough; cramps in calves; many spasms; shocks through body.

From 12 P.M. till morning: sweat.

[39] **Temperature and Weather.** Sensitive to cold air.

Great disposition to take cold.

Warm wrapping up of head: > dulness of head; > pain in forehead.

Warm room: tinea ciliaris <; eruption on face and forehead <.

Near stove: chill.

In room: cough <.

After getting into bed: great chilliness; chill >.

Google

Open air: anxious feeling >; dulness >; vertigo >; headache <; pain in forehead >; chill >.
Sea bathing: bloody expectoration; great weakness.
Aversion to uncovering.

[40] **Fever.** Chill: even near stove; < from 4 to 8 P.M.; > in open air or in bed; chill followed by heat, evening, until 12 P.M.
Evening heat, thirst; averse to uncovering.
Sweat: on head or feet; with thirst, from 12 P.M. till morning.

[41] **Attacks, Periodicity.** One hour before food: pain in epigastric region.
For one hour after breakfast: feels quite well, then cardialgia.
Several times during day: cardialgia.
Daily: attacks of pain in head.
Every evening: gastralgia.
Nightly: agglutination of lids; heat, with thirst.
Every three or four days: difficult stools.
Once in four days: stool.
Once a week: bowels moved.
Every eight days: bowels move.
Fourteen days late: menses.
Two weeks after menstruation: leucorrhœa for three or four days.
Since parturition five weeks ago: diarrhœa.
Every six weeks: pain in forehead and around eyes.

[42] **Locality and Direction.** Right: tearing in side of head; tenderness of ovary; dragging pain from ovary; weight in hypochondrium; could not rest on side; pain in scapula; hypochondrium tender to touch; painful hardness of abdomen.
Left: must lie on side; cannot lie on side.

[43] **Sensations.** Boring and spasmodic, contractive pains.
General sensation of soreness, with great sensitiveness to noises.
Sensation as if some one was reading after her and she must read faster and faster; as if boiling water was on side of head; as if one would fall down; as if head would burst; as if hair was raised by pulling; as if he would become dizzy and lose consciousness; as if something was lying before ear; upper incisors as if too long; tongue as if burnt; inner mouth as if scalded; rising as of a ball from stomach to throat; as if stomach was cut to pieces; as of something dragging over to hypochondriac region; abdomen as if bruised; stools as if burnt; as if from excoriation; pain as if bruised in small of back and hips; weakness as if coming from stomach.

Google

Pain: in forehead and around eyes; in stomach; in liver; in epigastric region; in uterus; in hypogastric region; in small of back and both hips.
Insupportable pain: in teeth.
Violent pains: in back and thighs.
Severe cardialgia.
Severe cramp pains: in bones of face.
Tearing: in temple; in nodosities on occiput; in abdomen; in small of back; in shoulders, arms, wrists and hands; in hips.
Sharp sticking and tearing: in r. side of head to eye.
Tearing stitches: in loins.
Paralytic drawing and tearing: in limbs.
Griping, raging: in temples.
Contractive, spasmodic pain: in small of back.
Beating: in forehead.
Stitches: in temple; in heart; in small of back.
Eroding pain: in stomach.
Sore pain: in nose.
Cutting, pinching: in abdomen.
Gnawing: at pit of stomach.
Cramps: in abdomen; in calves.
Colicky pains: in abdomen.
Violent burning: of rhagades on tongue; of nose.
Burning pain: in back.
Drawing pain: in abdomen.
Dragging down pain: from r. ovary to thigh.
Bearing down: in ovarian region.
Dull, aching, tensive pain: in hypochondriac region, going through to r. scapula.
Stitching pains: in rectum.
Rheumatic pain: in shoulder joints to arm and hands.
Pressing pain: in stomach; in liver; to back and stomach; in knees.
Constrictive pain: in chest and scapulæ.
Throbbing: in pit of stomach.
Painful undulating and whizzing: in head.
Painful hardness: of r. side of abdomen.
Painful swelling: of gums.
Tingling, stinging: in abdominal muscles.
Soreness: of abdomen; in chest; all over.
Burning: of eyes; of nose; of vesicles on lip; in anus; in urethra; in penis; in chest; in small of back; in soles.
Hot feeling: in head.
Rawness: of inner surface of alæ nasi.
Irritation: about anus.
Tenderness: of r. ovary; in hypogastric region.
Roughness: on inner side of upper lip; of throat.

Google

Tickling: in throat.
Tingling: in larynx.
Dryness: of nose distressing; of mouth and tongue; of tongue.
Sensitiveness: of teeth; of stomach and liver; of lower part of nose.
Compressive sensation: in head.
Tension and constriction: of chest.
Oppression: in pit of stomach; in chest.
Great fatigue: in legs.
Much weakness: in limbs; from a sea bath.
Weakness: in stomach.
Pulsation: in ears.
Distress: in hypogastric region.
Restlessness and tense feeling: in thighs.
Restlessness: of body.
Dull feeling: in head.
Numbness: in forehead; of urethra.
Heaviness: in head; in bowels; on chest; in legs.
Twitching: in hips.
Formication: over whole body.
Itching: of old herpes behind ears; of vesicles on lip; in nose; at anus; on genitals; on scrotum.
Coldness: in stomach.

44 **Tissues.** Swelling of glands; engorged glands.

45 **Touch. Passive Motion. Injuries.** Touch: nodosities on occiput painful; burning in nose <; of food against teeth pain insupportable; of upper lip with tongue, sensation of roughness; pressing pain in liver; r. hypochondrium tender; abdomen sensitive; small of back and hips sensitive.
Cannot endure covering: colic.
Pressure: stomach and liver sensitive; causes beating in forehead; pain in eye >; griping, raging in temples; stomach painful; on back > menstrual pains.
Strong pressure: pain in forehead >.
Tying tight bandage around head: headache >.

46 **Skin.** ! Bloodboils; eruption of pustules or small red papillæ.
! Formication over whole body.

47 **Stages of Life, Constitution.** !! Especially suitable for diseases of women; spasmodic and hysterical complaints complicated with uterine diseases.
! Women after suffering months or years from attacks of indigestion or biliousness; enlargement and congestion of liver.
! Children, especially during dentition; puny, rachitic.
Boy, æt. 1; much straining at urination.
Child, æt. 2, for several months diarrhœa and cough; after diarrhœa stopped, constipation and cough.

Google

Girl, æt. 4, suffering two years; affection of liver.
Young woman, æt. 17; cardialgia.
Girl, æt. 18, after disappearance of an eruption which came every winter upon upper and lower lips; affection of nose.
Woman, æt. 19, small, blonde, sensitive, suffering four years; affection of liver.
Girl, æt. 20, suffering several years; affection of stomach.
Young woman, æt. 20, anæmic; chronic diarrhœa.
Woman, æt. 20, mother of one child; constipation.
Young woman, æt. 23, anæmic, a week previously vomited about a cupful of blood and suffered thereafter from pains in stomach and anorexia, removed by *Ipec.* and *Nux vom.;* diarrhœa.
Woman, æt. 24, tall, strong, dark hair, suffering five years; affection of liver.
Young man, stout, healthy looking; cardialgia.
Woman, æt. 26, pale, weak, confined two years ago; constipation.
Woman, suffering one month; affection of liver.
Woman, suffering two years; affection of liver.
Woman, æt. 35, previously strong, now somewhat anæmic, after parturition; diarrhœa.
Woman, æt. 36, mother of two children, during childhood had ague; periodical attacks of pain in stomach and enlargement of liver.
Man, æt. 40, Russian, strong, hardened by much travel, after inflammation of liver ten years ago; induration of liver.
Man. æt. 48, sallow, choleric, attacks return every six weeks, suffering several years; cephalalgia.
Woman, æt. 51, wife of gravedigger, five years ago suffered from leucorrhœa, cured by *Sepia;* gastric disturbances.
Woman, æt. 52, suffering two months; affection of liver.
Woman, æt. 58, had been subject to repeated attacks of biliousness and disturbance of functions of liver for several years, attended with dyspepsia and constipation; enlargement and congestion of liver.
Woman, æt. 60, dark hair, strong, suffering one and a half years; palpitation of heart.

MAGNESIA PHOSPHORICA.

Phosphate of Magnesia. $2Mg\ O.\ P.\ O_5.\ HO + 14\ H_2O.$

Magnesia Phosphorica is one of the most important of the Twelve Tissue Remedies introduced by Schuessler. It still awaits proving, but the symptoms obtained from clinical practice, vouched for by good authorities, are sufficiently numerous and important to warrant us in giving it a place in the present work. We print Hering's own arrangement, with additions from current literature to date, and hope the drug will soon receive the careful attention at the hands of provers it deserves. — EDS.

CLINICAL AUTHORITIES.—*Brain troubles in children with convulsive symptoms*, Morgan, Trans. Hom. Med. Soc. Pa., 1882, p. 172; *Neuralgic headache, particularly after childbirth*, Frantz, MSS.; *Facial neuralgia* (3 cases), Huff, Minn. Med. Mo., vol. 1, No. 9; Wesselhœft, Plate, Schuessler's Tissue Remedies, by C. Hg., p. 31; *Neuralgia of face and toothache*, Plate, Raue's Rec., 1875, p. 246; *Prosopalgia*, Allg. Hom. [1] **Mind.** ‖Laments all the time about pain, with hiccoughing.
‖Has to scream out, with cramps in abdomen.
‖Illusions of senses; sobbing.
❙Talking to herself constantly, or sitting still in moody silence, or carrying things from one place to another and then back again. θChorea.

[2] **Sensorium.** ❙Brain troubles in children, with unconsciousness and convulsive symptoms. θCholera infantum.

[3] **Inner Head.** ‖Neuralgic or rheumatic headaches: > from external application of warmth; very excruciating,

Digitized by Google

tendency to spasmodic symptoms; shooting, stinging, shifting, intermittent or paroxysmal pains; sparks before eyes; diplopia; more in young and strong persons.

Headache since two weeks at 10 P.M., lasts all night.

Attacks of severe headache, particularly after childbirth, at irregular intervals; sudden flashes of pain in back part of head and neck, spreading all over head, involving eyes, with sudden flashes of pain like lightning through head; > from hard pressure, rest and darkness; frequently nausea; crampy pains in abdomen and calves; occasionally flying pains in limbs; drawn feeling of eyelids; after attacks dulness of head and intellect, forgetfulness, irritability.

5 **Sight and Eyes.** Eyes sensitive to light, photophobia.

Chromatopsia, spasmodic vision of sparks or rainbow colors; diplopia.

Dulness of vision from weakness of optic nerve.

Pupils contracted.

Increased lachrymation.

Nystagmus; strabismus; spasmodic squinting; ptosis.

Twitching or spasms of eyelids.

Headache, vertigo, etc., from optical defects.

Pain in supraorbital nerve over r. eye, < at 11 A.M.; > by external warm applications. θNeuralgia.

6 **Hearing and Ears.** Otalgia, purely nervous.

Weakness of auditory nerve fibres causing deafness.

7 **Smell and Nose.** Loss or perversion of sense of smell.

8 **Upper Face.** Face distorted from pain and weakness. θColic.

Prosopalgia, supra and infraorbital nerves involved; pains shoot about like lightning along course of nerves, always > from warmth, < on r. side and when body gets cold; teeth sensitive.

Tic douloureux; pain, especially in supraorbital branch, extended sometimes to ramus mentalis of maxillaris inferior; a touch at latter caused pain in supraorbitalis; the slightest touch in any part of affected nerves renewed painful paroxysm.

Boring over r. eye, spreading after a few minutes over whole r. side of head to lower jaw, driving out of bed.

Right side of face and supraorbital region swollen; severe crampy, shooting, darting pains; much tenderness over affected side; pains intermittent in character, and seem to affect different parts of head and face on different days; much prostration.

Neuralgia on r. side of face and toothache, changing location frequently, returning every two or three hours, rushes about like lightning.

Google

|Neuralgia of face, commencing over r. eye and extending in a few minutes over whole r. side of face; must get out of bed; towards ten o'clock pain ceases.

|Neuralgia from exposure to a strong North wind; patient in bed, almost frantic with pain, flushed face, injected eyes and a high degree of photophobia; pain l. sided, involving supramaxillary portion of trigeminus, lancinating, crampy, darting and shooting, extorting cries.

|After catching cold severe trouble in ear, followed by prosopalgia, on l. side, affecting lower maxillary bone, also frontal, and involving whole of l. side of head, back to nape of neck; pain maddening; high fever and sleeplessness.

[9] **Lower Face.** |Convulsive twitching of corners of mouth.

||Yawning, with excessive spasmodic straining of lower jaw.

||Trismus; lockjaw.

[10] **Teeth and Gums.** |Toothache: rheumatic, neuralgic and shooting; changes place rapidly; teeth sensitive; < after going to bed; hot liquids ease pain.

|During dentition: spasms of children.

[11] **Taste and Tongue.** |Taste somewhat bitter, tongue slightly yellow. θColic.

|Spasmodic stammering.

|Clean tongue. θGastralgia.

[13] **Throat.** |Spasmodic constriction of throat on attempting to swallow liquids, sensation of choking.

[14] **Appetite, Thirst. Desires, Aversions.** ||Little or no appetite. θFaceache. θColic. θGressus gallinaceus.

[15] **Eating and Drinking.** ||Sweetened coffee lessens desire to stool, but has great aversion to coffee. θPain in stomach.

[16] **Hiccough, Belching, Nausea and Vomiting.** |Spasmodic hiccough of three days' duration (after failure of morphine, chloroform, etc.).

|Spasmodic hiccough day and night, with retching, what came up was coagulated milk, bile and slime, with great pain, she had to lament all the time. θColic.

|Obstinate singultus, causing long lasting soreness. θTyphoid fever.

|Eructation lessens colic.

|Immediately after eating, sometimes while at table, spits up what he has eaten; little or no nausea; craves sugar. θPersistent vomiting.

[17] **Scrobiculum and Stomach.** ||Pains at pit of stomach, nipping, griping, pinching, with short belching of wind giving no relief.

||Spasms or cramp in stomach, with clean tongue, pain as if a band was tightly laced or drawn around body.

|Neuralgia of stomach.

Google

[18] **Hypochondria.** ‖Left lobe of liver enlarged.

[19] **Abdomen.** ‖Cramps in abdomen; pains around navel and above it towards stomach, from there radiating to both sides towards back; violent cutting pains, so that she has to scream out, then shooting and violently contracting; > by bending double or by pressure with hand, external warmth and eructations; cannot lie on back stretched out.

‖Cramps and wind colic, often accompanied by watery diarrhœa.

‖Colic: forcing patient to bend double, pain > by friction, warmth, or eructations; remittent gripes, crampy pain.

‖‖Flatulent colic forcing patient to bend double, > from rubbing, warmth, accompanied by belching of gas, which gives no relief.

‖‖Flatulent colic of children and the new born, with drawing up of legs; remittent colic, crampy pain with acidity.

‖Daily attacks of colic in a child, generally at 3 or 4 P.M., lasting several hours.

‖Pains spasmodic in stomach or bowels, griping, cutting, drawing, so as to bend body double, < on slightest muscular movement; > from warmth.

‖Meteorism, in cows.

[20] **Stool and Rectum.** ‖Stools expelled with force.

‖‖Stools loose, watery, with urging. θPain in stomach.

‖Watery diarrhœa, with vomiting and cramps in calves; choleraic cramps.

πDiarrhœa, with pinching colicky pain from navel to back; stools every half hour; redness and itching on feet, cannot keep them still, in evening.

‖Dysentery: with crampy pain, > by bending double, warmth or friction; with spasmodic retention of urine.

‖Cholera caused by affection of nerves of intestinal canal.

‖Cutting, darting, lightninglike pains in hemorrhoids.

‖‖Stool torpid. θFaceache. θCrampy colic.

[21] **Urinary Organs.** ‖Every three or five minutes child passes a large quantity of urine; great appetite, empties six or eight bottles every day, restless sleep at night.

‖‖Gravel, windy pain.

‖Spasm of neck of bladder; spasmodic stricture.

‖‖Nocturnal enuresis from nervous irritation.

‖Vesical neuralgia after use of catheter, sensation as if muscles did not contract.

‖‖A bright, slimy discharge from urethra in an old man; when urinating, violent shooting and burning pains.

‖Urine clear like water. θColic.

‖Deficiency or excess of urinary phosphates.

Google

[23] **Female Sexual Organs.** ‖Ovarian neuralgia, pain shooting and darting like lightning; < on r. side.
‖Menstrual colic, pain during or preceding flow; vaginismus.

[24] **Pregnancy. Parturition. Lactation.** ‖Spasmodic labor pains; cramp in legs.
‖Puerperal convulsions.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Laryngismus stridulus or spasm of larynx; constriction of chest; stiffness of limbs.

[26] **Respiration.** ‖Spasmodic sobbing for three days.
‖Spasmodic, nervous asthma.

[27] **Cough.** ‖Spasmodic cough: at night, with difficulty in lying down; in paroxysms; without expectoration; ending in a whoop.
‖Violent spasmodic attacks of cough, recurring about ten times a day, during which face becomes blue and turgid. θWhooping cough.
‖Persistent semi-chronic cough of a pseudo-catarrhal, nervous character.

[28] **Inner Chest and Lungs.** ‖Constriction of chest and throat, with spasmodic, dry, tickling cough.

[29] **Heart, Pulse and Circulation.** ‖Angina pectoris; neuralgic spasms.
‖Nervous, spasmodic palpitation.

[30] **Outer Chest.** ‖Intercostal neuralgia, of a drawing, constrictive kind; spasms from cold.
‖An old lady had terrible pain from back under l. scapula around to front and down to groin, constricted chest and affected breathing; paroxysms brought on by lying down, had to sit upright. θIntercostal neuralgia.

[31] **Neck and Back.** ‖Pains in nape of neck very sharp, shooting, boring, shifting and remittent.
‖Shifting pains in back; intercostal neuralgia.
‖Acute, boring, darting, neuralgic pains in back.

[32] **Upper Limbs.** ‖Shaking of hands, trembling; alcoholism.

[33] **Lower Limbs.** ‖Deficiency in locomotive power, from nervous causes.
‖Sciatica, with excruciating spasmodic pains.
‖Pains settled in r. leg from hip to ankle, < in joints; pain shifts its place, is often lightninglike, shooting, intermits, renders necessary a change of position, and is > by warmth of bed; patient is in despair; thinks he has tetanus and that he must die; is unable to leave bed.
‖Every night neuralgia, now in lower limbs, in tibia or in thighs, now in l., now in r. side, mostly with spasmodic muscular contractions; during day perfectly well.
‖Cramps in calves. θIntermittent. θCholera.
‖Gressus gallinaceus.

Google

[34] **Limbs in General.** ‖Violent pains in acute rheumatism of joints.

‖Pains in limbs, neuralgic, rheumatic, very vivid, darting about, shifting and remittent.

‖Every night neuralgia, now in lower limbs, in tibia or in thighs, now in l., now in r. side, mostly with spasmodic muscular contractions; during day perfectly well.

[35] **Rest. Position. Motion.** Rest: lightninglike pains in head >.

Lying down: causes pain from back under scapula.

Difficulty in lying down: cough.

Cannot lie on back stretched out: pain in abdomen.

Thumbs drawn in, fingers clenched: convulsions.

Bending double: pain in abdomen >; crampy pain >.

Must sit upright: intercostal neuralgia.

Must change position: severe pain in limbs.

Motion: the least, brings on pain in tic douloureux; trembling of limbs <.

Slightest muscular movement: pain in abdomen <.

Changes place: neuralgic pain.

Cannot keep feet still: itching.

Driving out of bed: pain in face.

[36] **Nerves.** ‖Neuralgia appearing at intervals, > by warmth.

‖At times pains in head, teeth, face and limbs; again cramps in stomach, and flatulent colic; at other times tormenting, spasmodic cough, day and night, together with retention of urine, sleeplessness; different disorders every day; cannot leave bed. θNervous affection.

‖After catching cold, pain in back; dorsal vertebræ from third to fifth very sensitive to pressure; violent trembling of r. foot and especially of r. arm, < from motion. θNervous ailment.

‖For three days, spasmodic, convulsive sobbing in a man; lies in bed.

‖Spasms, with contraction of fingers, and staring, open eyes, lasting from a quarter to a half hour; during intervals spasmodic cough.

‖Convulsions, with stiffness of limbs or body, thumbs drawn in, fingers clenched.

‖After spasm, excessive sensitiveness to every impression of senses, even to touch, and especially to noise; look of suspicion and fear; easily agitated; spasm in early morning. θInfantile convulsions.

‖Convulsions and cramps during dentition, without fever; convulsive symptoms after failure of *Bellad.*

‖Writer's, piano or violin player's cramp.

‖Spasms from idiopathic affections of motory nerves.

‖Choleraic cramps.

Google

Spasmodic muscular contraction with neuralgia.
Tonic spasms, trismus; tetanus.
Twitching all over body during waking hours, > during sleep; walked fairly well and could feed herself; speech very defective, meaning of her utterances a matter of pure conjecture; heart's action accelerated, no abnormal sound, later a presystolic blowing sound, as if muscular fibres of heart participated in general spasms; pupils symmetrically dilated; scared expression. θChorea.
Face and upper part of body affected, lateral and downward jerking of mouth, snapping of eyelids, sudden forward motion of head, and other irregular movements; > during sleep; < at stool and by emotions. θChorea.
Chorea, involuntary movements and contortions of limbs, with mute, appealing look for sympathy.
Epileptic fits: spasm, stiffness of limbs, clenched fists or teeth; from local irritation of nerves, when an overexcited, not depressed condition of nerves exists; sometimes result of vicious habits; muscular contractions, twitchings and spasms.
Neuralgic pains in any part, darting or shooting along nerve.
Trembling, involuntary shaking of hands, limbs or head.
Palsy, paralysis agitans.

[37] **Sleep.** Spasmodic yawning.
Insomnia from exhaustion or lack of brain nutrition.

[38] **Time.** Morning: spasms, early.
10 A.M.: pain in face ceases.
11 A.M.: pain over eye <.
Day and night: spasmodic hiccough.
Evening: itching of feet; headache, 10 P.M., lasting all night.
Night: restless sleep; enuresis; spasmodic cough; neuralgia.

[39] **Temperature and Weather.** Warmth: neuralgia or rheumatism >; pain over eye >; prosopalgia >; pain in abdomen >; crampy pain >.
Hot liquids: ease toothache.
Exposure to North wind: neuralgia.
When body is cold: prosopalgia <.
After washing and standing in cold water, crampy colic.

[40] **Fever.** Intermittent fever with cramps in calves.

[41] **Attacks, Periodicity.** Pains at intervals, occurring in spells: colic; neuralgia.
Every three or four minutes: passes large quantity of urine.
Lasting from a quarter to a half hour: spasms.
Every half hour: stools.
Every two or three hours: faceache.
Ten times a day: spasmodic cough.

Google

Every day: attacks of colic from 3 to 4 P.M., lasting several hours; child takes six to eight bottles; different disorders.
Every evening: for two weeks, at 10 P.M., headache.
Every night: neuralgia in lower limbs.
For three days: spasmodic hiccough; spasmodic sobbing.
Every twenty-three days: spasms of fifteen to thirty minutes' duration.

42 **Locality and Direction.** Right: pain over eye; prosopalgia <; boring over eye, then to jaw; ovarian neuralgia; pains settled in leg, < in joints; trembling of foot and arm.
Left: neuralgia in face; prosopalgia on side of head to nape; lobe of liver enlarged; pain under scapula.
‖Changing place rapidly: toothache, neuralgia.
Now r., now l.: neuralgia.
‖‖Radiating pain: in abdomen.

43 **Sensations.** Quick, shooting, stitching pains which come at intervals and change place.
Neuralgic pains shooting like lightning or boring, often with a feeling as if laced or drawn together, changing place often, > by warmth or pressure.
As if choking; as if a band was tightly laced or drawn around body; as if muscles of urethra did not contract; as if muscular fibres of heart participated in general spasm.
Pain: in supraorbital nerve over r. eye; in stomach; around navel and above it towards stomach and to back; in r. leg from hip to ankle; in limbs; in head, teeth, face and limbs; in back.
Maddening pain: in whole l. side of head; back to nape of neck.
Excruciating pain: in headache; neuralgia; sciatica.
Terrible pain: from back, under l. scapula to front and down to groin.
Violent pains: in acute rheumatism of joints.
Great pain: with retching.
Violent cutting: in abdomen.
Shooting, stinging: in head.
Violent shooting burning: in urethra.
Vivid darting: in limbs.
Acute, boring, darting, neuralgic pains: in any part of back.
Severe crampy, shooting, darting pains: in face; in hemorrhoids; in r. ovary.
Sharp, shooting, boring: in nape of neck.
Violently contracting pains: in abdomen.
Griping, cutting, drawing pains: in bowels.
Lightninglike pains: along course of nerves; in face; in hemorrhoids.

Google

Flying pains: in limbs.
Shifting pain: in back.
Sudden flashes of pain: in back part of head and neck.
Lancinating pain: in face.
Shooting pains: in teeth; in abdomen.
Nipping, griping pain: at pit of stomach.
Boring: over r. eye to lower jaw.
Pinching: in stomach; from navel to back.
Neuralgia: in head; in r. side of face; on l. side of face; in teeth; of stomach; of r. ovary; intercostal.
Rheumatic pain: in head; in teeth.
Cramps: in abdomen; in stomach; in calves; in legs.
Spasmodic pains: in stomach and bowels; labor pains.
Soreness: caused by singultus.
Constriction: of chest.
Drawn feeling: of eyelids.
Dulness: of head.
Stiffness: of limbs; of body.
Spasmodic constriction: of throat.
Pricking: all over him, < about ankles, knees and elbows.
Itching: on feet.

" **Tissues.** Nutrition and function remedy for the nerve tissues.
Bad effects from injurious stimulants having acted on sound nerve tissue.
Nervous asthma from primary irritation of affected nerves; spasm of glottis; tetanus; lockjaw; cramps of calves; St. Vitus' dance; convulsions, etc.

" **Touch. Passive Motion. Injuries.** Touch: of maxillaris inferior caused pain in supraorbitalis; slightest, in any part of affected nerves < pains.
Pressure: with hand > pain in abdomen; back very sensitive.
Hard pressure: lightninglike pain >.
Friction: > pain in abdomen.
Scratching: causes rash to turn red.

" **Skin.** ℞Rash on arms, legs and face, like insect bites, running together in large patches; only red when scratched; feels a pricking all over him, < about knees, ankles and elbows.

" **Stages of Life, Constitution.** More suitable for young and very strong persons; teething children.
Baby, daily colic, generally 3 to 4 P.M.
Child, æt. 10 months; whooping cough.
Colored child, æt. 15 months, teething; convulsions.
Child, teething, mother died of diabetes; profuse and frequent urination.
Child, æt. 6, suffering eight months; chorea.
Boy, æt. 10; persistent vomiting.

Digitized by Google

Girl, æt. 13, since six years, every two or three days; spasms.
Girl, æt. 13, delicate, slender growth, attacks every twenty-three days, suffering six years; spasms.
Woman, at 20, weakly, suffered much from scrofula during childhood; nervous ailment.
Miss S., æt. 20, brunette, tall and slender, nervo-bilious temperament, typographer; facial neuralgia.
Miss B., æt. 22, dark complexion, nervous temperament, slight build, suffering three days, massive doses of Bromide of Potash and Chloral Hydrate, without relief; facial neuralgia.
Miss S., æt. 24, dark complexion, nervous temperament, clerk, suffering two weeks, morphia brought no relief; facial neuralgia.
Woman, æt. 26, nervous temperament; nervous affection.
Woman, æt. 28, nervo-bilious temperament, fleshy, healthy; neuralgic headache, particularly after childbirth.
Woman, æt. 30, hectic appearance; facial neuralgia.
Woman, æt. 31, suffering thirteen years; chorea.
Woman, æt. 36, healthy appearance, suffering several weeks; faceache.
Woman; tic douloureux.
Woman, æt. 40, single; facial neuralgia.
Woman, æt. 42, hectic appearance; catamenia scanty, often omitting; faceache.
Woman, æt. 60; colic after standing in cold water.
Woman, æt. 60; since six years, neuralgia.
An old lady; intercostal neuralgia.
Man, æt. 69, suffering some weeks; pains in limbs.
A little, lean man, æt. 70; since three years a discharge from urethra.

[48] **Relations.** Compare: *Arsen.* (nightly neuralgic pains, > from warmth; *Magn. phos.* sometimes acts better when given in hot water); *Zincum* (action on nervous system).

Google

MAGNESIA SULPHURICA.

Magnesium Sulphate; Epsom Salts. $MgSO_4\,7H_2O$.

Proved by Nenning (Hartlaub and Trinks' Annalen, vol. 4, p. 466) and Hencke (Neues Archiv., vol. 3, p. 185).

CLINICAL AUTHORITIES.—*Diabetes*, Raue's Rec., 1874, p. 211.

[1] **Mind.** Very lively, or greatly depressed.
Sad and weeping; foreboding anxiety, as if some accident would happen.
Ill humor, irritable.

[2] **Sensorium.** Vertigo, heaviness of head; spontaneous closing of eyes.

[3] **Inner Head.** Dulness in head, on rising in morning, disappearing after an hour.
Dull feeling of head, as if bandaged or screwed in.
Heaviness of head with vertigo.
Stitches, stabbings in head.
Boring in vertex.
Sensation in forehead on stooping as if something would fall forward.

[5] **Sight and Eyes.** Violent pains in eyes, especially r., as if it would start out of socket.
Stinging in both eyes.
Dimness of eyes with frequent drowsiness.
Burning of eyes, especially at candlelight.
Lachrymation, with photophobia.

[7] **Smell and Nose.** Bleeding of nose (at night) with diminution of headache.
Fluent coryza, with rough voice, pain in chest and frequent flow of water from nose.
Pain in posterior nares, as from air pressing through with violence, when talking or coughing.

[8] **Upper Face.** Tearing in r. facial bones or in l. malar bone.

[9] **Lower Face.** Burning of lips in evening, with dryness.

[10] **Teeth and Gums.** Toothache on entering room from cold air, < by contact of food, cold and warm things.

[12] **Inner Mouth.** Mouth and throat very dry, as if numb.

[13] **Throat.** Stinging in fauces, more between than during act of deglutition.
Frequent mucus in throat, which can neither be swallowed nor hawked up.

Google

[14] **Appetite, Thirst. Desires, Aversions.** Thirst early in morning on rising, going off after breakfast.
Thirst in evening, particularly during menses.
[16] **Hiccough, Belching, Nausea and Vomiting.** Rising of water from st mach, also with loathing and nausea.
Vomiting (in afternoon) first of ingesta, then of mucus.
Frequent eructations tasting like bad eggs.
[17] **Scrobiculum and Stomach.** Trembling of stomach, with subsequent gulping up of water, sometimes putrid taste.
Feeling of coldness in stomach, with inclination to vomit.
[18] **Hypochondria.** Sticking in l. hypochondriac region, particularly when sitting or in evening.
[19] **Abdomen.** Distension, fulness and hardness of abdomen, even after a moderate meal.
Rumbling in abdomen, with emission of flatus.
Itching of l. inguinal region, not removed by scratching.
[20] **Stool and Rectum.** Stools: alternate hard and soft; liquid, with tenesmus; soft, early after rising; diarrhœa, with discharge of ascarides; soft, with burning at anus or with subsequent tenesmus.
Diarrhœa preceded by rumbling in abdomen.
[21] **Urinary Organs.** Increased emission of clear, greenish urine.
Nocturnal micturition (involuntary).
Diabetes.
[22] **Male Sexual Organs.** Frequent stinging about penis when sitting or walking.
Erections without amorous fancies or sexual desire.
[23] **Female Sexual Organs.** Menses: too late; too short; too early; stop for two days, then flow again.
During menses: great heaviness in head; bruised pain in small of back; pain in groins.
Discharge of blood between menstrual periods.
Leucorrhœa: burning, particularly during motion; thick, with bruised pain in small of back and thighs; thick, profuse like menses.
[25] **Voice and Larynx. Trachea and Bronchia.** Deep, hollow bass voice (as in catarrh).
[27] **Cough.** Loose cough, with soreness in mouth and throat.
Dry cough: with burning from larynx to pit of stomach; in evening in bed, during which he falls asleep.
[28] **Inner Chest and Lungs.** Painful burning in chest when coughing, as if a piece of lung would come out.
Oppression of chest, with burning in chest when walking.
Burning in middle of chest; under upper part of sternum.
[31] **Neck and Back.** Tension in nape of neck and between shoulders, with stitches, particularly in morning on rising, with great sensitiveness to touch, > by walking.
Rheumatic pain between shoulders.

Google

Bruised pain in small of back, with pains in groins when sitting or standing, > when walking.
Nightly pain in small of back and thighs.

[32] **Upper Limbs.** Rheumatic pains in l. elbow and wrist joint.
Trembling of hands.
Tingling in fingers; going off by rubbing.

[33] **Lower Limbs.** Pain in thighs when walking.
Rheumatic pain in hip, in l. femur.
Cracking of tarsal joint at every step.

[34] **Limbs in General.** Rheumatic pains in limbs, particularly at night.

[35] **Rest. Position. Motion.** Cannot lie on back: pain in small of back.
Raising head in bed: vertigo.
Stooping: sensation in forehead as if something would fall forward.
Sitting: sticking in l. hypochondriac region; stinging about penis; pains in groins.
Standing: pains in groins.
Motion: burning leucorrhœa.
At every step: cracking of tarsal joint.
Walking: stinging about penis; burning and oppression of chest; tension in nape of neck >; pains in groins >; bruised pains in back >; pain in thighs.

[36] **Nerves.** Great languor, with staggering gait or trembling of body.

[37] **Sleep.** Sleeplessness from violent headache, colic, pain in small of back which does not allow him to lie on back.
Anxious dreams, with starting.

[38] **Time.** Morning, on rising: dulness in head; thirst; soft stools; stitches in nape of neck and between shoulders; chilliness, with thirst.
All day: cold feet.
Afternoon: vomiting; sweat.
Evening: burning of lips; thirst; sticking in l. hypochondriac region; in bed, dry cough; shuddering in back.
9 P.M.: chill, violent headache, going off in bed; till 10 A.M. chill.
Night: bleeding of nose; involuntary micturition; rheumatic pain in limbs.

[39] **Temperature and Weather.** From cold air into room: toothache.
Cold or warm food: toothache.

[40] **Fever.** Shuddering in back, in evening, from below upwards.
Chilliness: with thirst, early in morning after waking.
Shaking chill, with violent headache in evening, 9 P.M., going off in bed, succeeded by thirst.
Chill from 9 P.M. till 10 A.M., followed by sweat in afternoon.

Google

Alternation of heat and shuddering, with alternate redness and paleness of face.
Heat in one part of body and chill in another.
Heat and vertigo on raising head in bed, with sweat on forehead and redness in face.
Heat of head, with coldness of rest of body.
Cold feet all day, although otherwise hot.

41 **Attacks, Periodicity.** Nightly pain in small of back and thighs.
For two days: menses stop, then flow again.

42 **Locality and Direction.** Right: violent pains in eye; tearing in facial bone.
Left: tearing in malar bone; sticking in l. hypochondriac region; itching of inguinal canal; rheumatic pains in elbow and wrist joint; rheumatic pain in femur.
From below upwards: shuddering in back.

43 **Sensations.** As if some accident would happen; head as if bandaged or screwed in; as if something would fall forward; as if eye would start out of socket; as if air was pressing through posterior nares; mouth and throat as if numb; as if piece of lung would come out.
Pain: in chest; in posterior nares; in teeth; in groins; in small of back and thighs.
Violent pain: in head; in eyes.
Tearing: in r. facial bones or in l. malar bone.
Boring: in vertex.
Stitches, stabbing: in head.
Stitches: in nape of neck and between shoulders.
Stinging: in both eyes; in fauces; about penis.
Sticking: in l. hypochondriac region.
Painful burning: in chest.
Burning: of eyes; of lips; from larynx to pit of stomach; in middle of chest; under upper part of sternum; of blotches; at anus.
Heat: of head; in one part of body, chill in another.
Colic: in abdomen.
Soreness: in mouth and throat.
Bruised pain: in small of back; in thighs; in whole body.
Rheumatic pain: between shoulders; in l. elbow and l. wrist joint; in hip; in l. femur; in limbs.
Tingling: in fingers.
Tension: in nape of neck and between shoulders.
Oppression: of chest.
Heaviness: of head.
Fulness: of abdomen.
Dulness: in head.
Dull feeling: of head.
Trembling: of stomach; of hands.

Google

Dryness: of lips; of mouth and throat.
Itching: of l. inguinal canal; of blotches.
Shuddering: in back.
Violent itching: of tetter on arms.
Coldness: of stomach; of body; of feet.

" **Touch. Passive Motion. Injuries.** Touch; great sensitiveness of neck.
Rubbing: tingling in fingers going off.
Scratching: does not remove itching of inguinal canal; of blotches causes burning.

" **Skin.** Itching blotches, either hard or as from nettles, with burning after scratching.
Small red tetter on arms, with violent itching.

" **Relations.** Compare: *Act. rac.* and *Pulsat.* in sadness, weeping, foreboding anxiety; *Ignat.* in stinging in fauces between acts of deglutition; *Hepar* in eructations.

Google

MANCINELLA.

Hippomane Mancinella. *Euphorbiaceæ.*

A poisonous tree, a native of West Indies, bearing a poisonous fruit, somewhat resembling apples. The tincture is prepared from fresh leaves, bark and fruit.

Introduced and proved by Bute. See Hering's compilation, Allg. Hom. Zeit., 1850. Also proved by Mure and Ackermann. Toxicological reports are numerous.

CLINICAL AUTHORITIES.—*Affection of throat*, Bute, MSS.; *Post-diphtheritic affection*, Bute, Raue's Rec., 1870, p. 152; *Affection of stomach*, Bute, MSS.; *Pain in l. hypochondrium*, Bute, MSS.; *Rumbling in abdomen*, Bute, MSS.; *Colic*, Bute, MSS.; *Cholera infantum*, Howard, MSS.; *Asthma*, Howard, MSS.; *Nervous affection*, Bute, Hom. Clin., vol. 1, p. 283; vol. 4, p. 19; *Typhoid fever*, Bute, MSS.

[1] **Mind.** Sudden vanishing of thought, forgets from one moment to next what she wishes to do.
Everything becomes irksome.
Fear of getting crazy; of evil spirits; of being taken by the devil.
Averse to work and answering questions.
Melancholy, homesickness; about midnight attacks of fear and trembling; afraid of evil spirits, of being taken hold of by the devil; sleeplessness; pressing in cardiac region, hard beats of heart, followed by faintishness, with darkening before eyes; tetters. θMental derangement.
Bashful and taciturn; has a timid look.
Aggravation from anger and after eating.

[2] **Sensorium.** Vertigo: stupefying; with loss of consciousness; in morning on rising from bed.
Sensation of lightness in head while walking about room.

[3] **Inner Head.** Stitches: in temples; in head, with sleeplessness; over l. eye.
Headache: with impatience; caused by candlelight.
Pulsating pains in head and neck, preventing one from writing.
Whole head feels sore, as if bruised or as if it had been exposed to sun.
Heaviness in head.
Headache, < from warmth of stove.

[4] **Outer Head.** Itching of scalp; hair falls out after severe acute diseases.

[5] **Sight and Eyes.** Blue circles around eyes.

Google

Sensation of heaviness and dryness of eyes and lids.
Burning: in eyes, headache from candlelight; of eyelids, only when closing them.

[6] **Hearing and Ears.** Ears feel as if closed.
Redness and heat of ears.

[7] **Smell and Nose.** Pressure at root of nose.
Dryness of nose.

[8] **Upper Face.** Face: swollen; pale; pale, yellow, bloated.
Heat rising to face, and soon thereafter painful itching, stitching and burning, continuing all day, next morning face swollen; towards noon vesicles, size of small pinhead and filled with a yellow fluid, next day desquamation.

[9] **Lower Face.** Lips pale; pricking pains in lips.
Lower lip hangs down.
Large number of small vesicles on chin, which desquamate.

[11] **Taste and Tongue.** ❙Very bitter taste in mouth.
❙Tongue coated white, except on several sharply defined clean spots.
Burning on tongue; dry.
❙Tongue coated white as in aphthæ.
❙Taste: bloody; < after sleeping.

[12] **Inner Mouth.** ❙❙Unendurable burning and prickling in mouth, not > by cold water.
❙❙Whole mouth and tongue covered with small vesicles.
❙Increased flow of saliva; yellow saliva; fetid.
Burning at soft palate and roof of mouth.
Dryness of mouth.
❙Offensive breath, perceptible to herself.
Blister, size of hazelnut, on palate.
Inflammation in mouth; bleeds.

[13] **Throat.** ❙Great elongation of uvula.
Heat in pharynx and down œsophagus, without thirst.
❙Great dryness of throat; on waking.
❙Choking sensation rises in throat when speaking.
Stitches in throat.
Sensation of constriction in throat, ascending from stomach, caused by accumulation of air, with palpitation of heart and great sensation of weakness, impeding speech.
❙Thirst for cold water, with inability to swallow on account of a choking which rises up from stomach.
❙Angina following scarlet fever, or during epidemic of latter.
❙❙Periodical thrusts (as if electric) in upper part of throat, waking from sleep.
❙Yellowish white ulcers, with violent burning pain.
❙Great swelling and suppuration of tonsils, with danger of suffocation; whistling breathing.
❙Sore throat during scarlet fever.

Google

‖White yellowish burning ulcers on tonsils and in throat.
‖Diphtheria on l. side; ever since, pains all over her body, mostly in chest, with a dry cough.
‖‖Menses irregular, profuse; heat in head, with vertigo; > when at rest; edges of eyelids burn when closing eyes. θPost-diphtheritic affection.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Thirst for cold water, but is prevented from drinking by choking sensation rising from stomach; with burning heat.
Aversion to meat and bread.
Longing for water and aversion to wine and alcoholic drinks.

[15] **Eating and Drinking.** Can take none but liquid food on account of soreness of mouth.
‖Drinking water, bloatedness and painfulness of region of stomach <.
‖After drinking water: colic: pain in abdomen.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Ineffectual desire to eructate or gag with excessive nausea.
‖‖Continual choking sensation, rising from stomach like from pressure of wind, with weakness and palpitation of heart.
‖‖Repeated green vomit.
‖Sour, greasy vomit, with aversion to water; on vomit floats a white mass like coagulated fat.
‖‖Vomiting of food, followed by severe colic and profuse diarrhœa.
‖‖Vomiting relieves headache.

[17] **Scrobiculum and Stomach.** Burning: in stomach and throat, with nausea; in pit of stomach.
‖Pit of stomach swollen and sensitive to pressure.
‖Distension and pain in region of stomach.
‖Bloatedness and painfulness of region of stomach. θNervous fever.
‖Sensation as of flames rising from stomach.
‖Sensation as if stomach drew together in a lump and then suddenly opened.

[18] **Hypochondria.** ‖‖Rumbling in l. side when bending to right.
‖‖Sudden sticking in l. hypochondrium.
‖Pain in l. hypochondrium in a spot as large as a half dollar, compelling her to press there with hand; rumbling in l. side when lying on r. side, also with every respiration; no rumbling when lying on l. side.

[19] **Abdomen.** ‖Wandering pains in abdomen.
‖Pains in abdomen through bowels, after drinking water.
‖Loud rumbling in abdomen.
‖Rumbling in abdomen renewed by every motion and when taking a deep inspiration, with headache which is much < near warm stove.

Google

▮Colic: after drinking water; with diarrhœa (at midnight); with fainting, constipation, alternating with diarrhœa.
▮▮Distended abdomen.
▮▮Sensation of soreness, as if bruised, of abdominal walls.
▮▮Eruptions of rash on abdomen.

[20] **Stool and Rectum.** ▮▮Fulness in rectum, with a hollow feeling in stomach.
▮▮Profuse diarrhœa, with colic and vertigo.
▮▮Many bloody stools, with colic, inclination to sleep and vertigo.
▮▮Greenish stools, without blood.
▮Diarrhœa: with burning in abdomen and anus; in alternation with constipation; with cutting in abdomen; with much discharge of flatus.
Sudden desire to go to stool (in morning), after stool tenesmus.
▮Bloody evacuations, with colic, sleepiness and giddiness.
Stools: painful, black, fetid, bloody, with tenesmus.
▮During afternoon, more than twenty evacuations, with pain in intestines as if fire was there.
▮▮Sensation of fulness in rectum.
▮▮After stool: pulsation in anus; discharge of fetid blood from hemorrhoidal tumors.
▮Frequent thin, watery discharges; vomiting; emaciation; great prostration; loss of appetite; aversion to food. θCholera infantum.
▮Constipation.

[21] **Urinary Organs.** ▮▮Tired feeling in region of kidneys, with inclination to rub parts, and with frequent stretching back of body.
▮▮Sensation of weakness, as if bruised, in region of kidneys.
Stitches in bladder before and at beginning of micturition.
Burning in urethra.
▮Urine: brown; whitish, clouded on standing.

[23] **Male Sexual Organs.** ▮▮Increased sexual desire.
Itching on scrotum.

[25] **Female Sexual Organs.** ▮▮Pale menstrual flow; colic.
Before menstruation: congestion of head.

[25] **Voice and Larynx. Trachea and Bronchia.** ▮Nasal tone of voice.
▮Choking sensation rising up into throat, hindering speech.
In larynx: scraping; cutting as with a knife; tension.

[26] **Respiration.** ▮Whistling breathing.
▮During breathing: rattling in l. chest; loud rumbling in abdomen; severe pain in middle of sternum, < from pressure.
▮Asthma, chronic.

[27] **Cough.** ▮Frequent hawking, with nausea.

Google

‖Violent cough and painful stitches in trachea from slightest exertion.
‖Cough: < at night; after drinking.
‖Expectoration relieves oppression of chest.

[28] **Inner Chest and Lungs.** ‖Constriction of chest.
‖Oppression of chest; > after expectoration.
‖Rattling in l. chest.
Suffocative attacks, with pulsation in chest, while coughing, or as soon as he begins to talk.
Stitches in middle of sternum.
‖Pain in centre of sternum, < from pressure and from breathing.

[29] **Heart, Pulse and Circulation.** Stitches in heart as from needles.
‖Palpitation of heart: in evening, as from eating; weakness.
‖Pulse: weak and somewhat accelerated; 80.

[30] **Outer Chest.** ‖Stitches in middle of sternum; < from breathing.

[31] **Neck and Back.** ‖Painful stiffness of neck, especially after sleep, could scarcely move neck.
Stitches in l. shoulder blade and l. breast at intervals.
Backache with nausea and tenesmus.
Soreness in region of kidneys.
‖Painful stiffness of small of back.
‖Tired sensation in region of kidneys, desire to rub part; much stretching.
‖Painful stiffness of small of back and of finger joints which she could scarcely bend.

[32] **Upper Limbs.** Trembling and heaviness of arms.
When waking, hands feel as if asleep and numb.
Trembling of hands.
‖Painful stiffness of finger joints.
‖Hands as if too thick, "asleep," heavy and clumsy.
‖Hands icy cold.
‖Pain and stiffness of finger joints.
Blue finger nails.

[33] **Lower Limbs.** ‖Quivering and jerking in legs in attacks.
Trembling of legs.
Sudden, needlelike stitches in lower extremities.
Cramps in legs and feet.
Tingling in feet when sitting.
‖Stitches under heel, from without inward.
‖Burning in soles and dry feeling.
‖Desquamation of soles at end of fever.
‖Large vesicles, especially on soles.

[34] **Limbs in General.** ‖Icy coldness of hands and feet.

[35] **Rest. Position. Motion.** Rest: heat in head >.
Lying: head feels as if lying on something hard.

Google

Must lie down: pulse irregular, limbs cold, great anxiety; severe headache.
Sitting: tingling in feet.
Frequent stretching back: of body, tired feeling of region of kidneys.
Every motion: renews rumbling in abdomen.
Slightest exertion: violent cough and painful stitches in trachea.
Could scarcely move neck: stiffness.
Walking: about room; lightness in head.

[36] **Nerves.** Lassitude and indescribable uncomfortable feeling in limbs.
Much stretching, with tired feeling over region of kidneys.
Must lie down, pulse irregular, limbs cold, great anxiety.
Prostration and trembling in limbs.
Fainting with intestinal colic.
Convulsions.
About midnight, attacks of fear and trembling, followed by feverish heat; afraid of evil spirits; of being taken hold of by the devil; sleeplessness; only somewhat relieved towards morning; fears she is getting crazy; anxious expression in face; dark brownish circles around eyes; throbbing in pit of stomach; pressure in region of heart, hard beats of heart followed by fainty feelings, with darkening before eyes; pulse slow and soft; frequent headache; desire for saltish food; smell of onions before nose; menses one week too early, with pains in chest; feet puffed up every morning; on chin, old, dark tetter with red pimples.
After typhoid fever: frequent shooting pain like a streak down r. arm; constant soreness, extending from region of r. kidney into back and around to liver; sometimes extending down to legs like rheumatism; head feels heavy, often as if it had been squeezed flat, sometimes as if hollow; when lying, her head feels as if lying on something hard; pain over r. eye; feeling of weakness extending from forehead down into nose; appetite changeable, sometimes hungry without appetite; after eating, feeling as if hard pieces were lying in stomach, with some nausea; eating very little makes her immediately very full; constant desire for sour dishes, particularly for indigestible things (puddings, half baked bread, and the like); continual feeling of fulness in stomach, as if food would come up again; feeling in pit of stomach as of something alive; raw sensation extending down throat; speech often weak; palpitation on turning in bed; contracting sensation in different parts, mostly of abdomen; pain in region of bladder while

Google

urinating; menses a few days too late, sometimes very dark, sometimes bright, again greenish and offensive, with tearing pain in lower part of abdomen; much restlessness; crawling and digging on different parts of body; sometimes feels as light as though she could float or hover in the air; mind much depressed, weeps a great deal, particularly when alone; full of fear of getting crazy; > during evening. θNervous affection.

[37] **Sleep.** ‖Great sleepiness; ineffectual desire to yawn.
‖Wakes as from electric shocks on neck (above larynx).
‖When awaking hands "asleep" and heavy, and feel as if too thick.
After sleep: bitter mouth; dryness in throat; could scarcely move neck.

[38] **Time.** Morning: on rising, vertigo; sudden desire to go to stool; attacks of fear >.
Towards noon: vesicles, size of small pinhead, on face, next day desquamation.
All day: painful itching, stitching, burning in face.
Afternoon: more than twenty evacuations.
Evening: palpitation of heart; nervous affection >.
Night: cough <.
Midnight: attacks of fear, trembling, diarrhœa and colic.

[39] **Temperature and Weather.** Warmth of stove: headache <.
Inclination to uncover himself: burning heat.
Cold water: does not > prickling and burning in mouth.
Amelioration from heat and when lying down.

[40] **Fever.** ‖Chill; icy cold hands and feet.
‖Flushes of heat, with sensation as if flames rose out of region of stomach, on account of which threw off covering.
‖Burning heat, with inclination to cover himself in bed; with thirst.
Moderate fever, severe headache, must lie down.
Cold sweat.
Coldness of hands and feet.
Fever heat with tingling in skin and desire to uncover one's self, with loss of consciousness, painful deglutition, restlessness, profuse micturition.
‖Typhoid fever with tympanitis and sensitiveness of abdomen, < by drinking water.

[41] **Attacks, Periodicity.** Periodical: thrusts, as if electric, in upper part of throat.
Alternate: diarrhœa and constipation.
Every morning: feet puffed up.

[42] **Locality and Direction.** Right: frequent shooting pain down arm; soreness extending from kidney into back; pain over eye.
Left: stitches over eye; diphtheria on side; rumbling in

Google

side when bending to r.; sudden sticking in hypochondrium; pain in hypochondrium; lying on r. side, rumbling in other; lying on l. side no rumbling; rattling in chest; stitches in shoulder blade and breast.

From without inward: stitches under heel.

Sensations. As if head was bruised, or as if it had been exposed to sun; ears feel as if closed; thrusts, as if electric, in upper part of throat; as of flames rising from stomach; as if stomach drew together in a lump and then suddenly opened; abdominal walls as if bruised; as if fire was in intestines; region of kidneys as if bruised; stitches in heart as from needles; hands feel as if asleep and numb; hands as if too thick; head as if it had been squeezed flat; head as if hollow; head as if lying on something hard; after eating as if hard pieces were lying in stomach; as if food would come up again; in pit of stomach as of something alive.

Pain: in head; all over her body, < in chest; in abdomen; in region of stomach; in l. hypochondrium in a spot as large as a half dollar; in intestines; in centre of sternum; in chest; over r. eye; in region of bladder.

Severe pain: in middle of sternum.

Tearing pain: in lower part of abdomen.

Shooting pain: down r. arm.

Violent burning pain: in throat.

Cutting: in abdomen; in larynx.

Stitches: in temples; in head; over l. eye; in throat; in bladder; painful in trachea; in l. shoulder blade and l. breast; under heel.

Needlelike stitches: in lower extremities.

Sticking: in various parts of body.

Sudden sticking: in l. hypochondrium.

Pulsating pain: in head and neck.

Pricking pains: in lips.

Contractions: in opposite directions.

Short, sharp stitches: here and there.

Wandering pains: in abdomen.

Severe colic: in abdomen.

Cramps: in legs and feet.

Aching: in back.

Unendurable burning and prickling: in mouth.

Painful itching, stitching and burning: in face.

Burning: in eyes; of eyelids; on tongue; at soft palate and roof of mouth; in ulcers on tonsils and in throat; in stomach and throat; in pit of stomach; in abdomen and anus; in urethra; in soles.

Soreness: of throat; of mouth; of abdominal walls; in region of kidneys; from region of kidney into back and around to liver, sometimes down to legs.

Google

Heat: of ears; rising to face; in pharynx and down œsophagus; in head.
Sore feeling: in whole head.
Painfulness: of region of stomach.
Raw sensation: extending down throat.
Crawling and digging: on different parts of body.
Painful stiffness: of neck; of small of back; of finger joints.
Pressure: at root of nose; in region of heart.
Pressing: in cardiac region.
Heaviness: in head; of eyes and lids; of arms.
Fulness: in rectum; in stomach.
Oppression: of chest.
Tension: in larynx.
Contracting sensation: in different parts, mostly abdomen.
Constriction: in throat, ascending from stomach; of chest.
Choking sensation: rises in throat.
Indescribable, uncomfortable feeling: in limbs.
Light feeling as though she could float or hover in air.
Lightness: in head.
Hollow feeling: in stomach.
Tired feeling: in region of kidneys.
Weakness: of heart; in region of kidneys; from forehead into nose.
Dryness: of eyes and lids; of nose; of tongue; of mouth; of throat; of soles.
Tingling: in feet.
Trembling: of hands; of legs; of limbs.
Pulsation: in anus; in chest.
Throbbing: in pit of stomach.
Quivering and jerking: in legs.
Itching: of scalp; on scrotum.
Icy coldness: of hands; of feet.

[44] **Tissues.** Sequelæ of scarlatina, diphtheria, typhus, etc.

[45] **Touch. Passive Motion. Injuries.** Pressure: pit of stomach sensitive; with hand compelled by pain in l. hypochondrium; pain in middle of sternum <.
Inclination to rub region of kidneys: tired feeling.

[46] **Skin.** Redness of skin (hands).
‖Sequelæ of scarlet fever.
‖Small vesicles containing yellow serum desquamate following day.
‖Favors rapid healing of wounds.
‖Fungoid growths, particularly if syphilitic.

[47] **Stages of Life, Constitution.** Boy, æt. 12, two years previously had measles and scarlet fever in rapid succession, since then has been sick, and confined much to bed; affection of stomach.
Girl, æt. 13; rumbling in abdomen.

Google

Young woman, had diphtheria on l. side; post-diphtheritic affections.

Woman, æt. 24, unmarried, after typhoid fever; nervous affection.

Mrs. R., æt. 31, dark hair, liver spots in face, mild, somewhat melancholic temperament, disposed to homesickness, mother of six children; nervous affection.

Woman, æt. 40; pain in l. hypochondrium.

[48] **Relations.** Compare: *Canthar.* in erythema and vesiculation of skin, and scarlet fever; *Crot. tig.*, *Yucca filam.* and *Euphorb. off.* have similar skin symptoms.

MANGANUM.

Acetate or Carbonate of Manganese.

Discovered in 1774, in the year Priestley discovered Oxygen.

Introduced by Hahnemann and proved by himself and his provers (see Chronische Krankheiten); also proved by Nenning (Hartlaub and Trinks' Annalen, vol. 2, p. 201).

CLINICAL AUTHORITIES.—*Dyscœcia*, Times Retros., vol. 2, p. 63; *Otalgia*, Bowie, Trans. Hom. Med. Soc. Pa., 1874, p. 186; *Affection of ears*, Rück. Kl. [1] **Mind.** Constant whining, moaning and groaning.

Silent, reserved, peevish.

Ill humored, vexed over trifles; bitterness, rancor.

Low spirited, weeping, despondent; sudden palpitation.

Not pleased with joyous music, but immediately affected by the saddest.

Everything she even thinks of makes her fretful.

[2] **Sensorium.** All the senses less acute.

Head feels heavy, it seems larger.

Google

Vertigo when sitting or standing; he is near falling forward; painful concussion of brain from shaking head, from walking, with aching in head, and at same time in epigastrium; rush of blood from nape of neck over vertex towards forehead during motion, with stupefaction and confusion of senses while standing.

[3] **Inner Head.** ‖Head so heavy he can scarcely hold it up; fretful.

‖Contractive sticking pain here and there in whole forepart of head, especially in temples, mostly in open air.

Pressing, boring headache in temples, extending towards eyes and forehead, going off on bending forward, returning on sitting up, or on bending head backwards.

Stitches (like needles) and darts in l. side of forehead.

Jarring of brain, from motion of head.

Drawing, stinging or tensive headache in open air, > indoors.

Headaches arising in room, > in open air, or vice versa.

Burning, pressing headache, > in open air.

[4] **Outer Head.** Cold feeling at a small spot on vertex.

Drawing cramp in muscles, in region of l. mastoid process, must incline head to r. side.

[5] **Sight and Eyes.** Short sighted.

‖Asthenopia, with aching pains in eyes on looking at near objects, so must close them; < when looking at a near light.

‖Pupils very much contracted; dilated.

‖Burning in eyes and dimsightedness during day.

Pressure in eyes when reading by candlelight.

Burning heat and dryness of eyes.

Eyelids swollen and painful to touch.

‖Agglutination of eyes in morning.

Eyelids painful on slightest motion, and on looking at a bright light they become too dry, with a feeling as on waking from sleep.

[6] **Hearing and Ears.** Whizzing and rushing in ears.

Croaking sound in r. ear when walking.

‖Deafness as if ears were stopped.

‖Dull hearing: > by blowing nose; < during cold and rainy weather.

‖Fulness of ears, with difficult hearing and cracking when blowing nose or swallowing.

Sudden stitch pain in deaf ear.

Ulcerative pain in ears.

Pains extend to and concentrate in ear from other parts.

‖Stitches in ear when talking, swallowing, laughing and walking.

Google

Frequent otalgia, with tearing and stitching, extending to tympanum.

‖External ear painful to touch; pain in r. ear from teeth; burning of ears as if standing near stove; pain < in morning and in open air; ear so sore she cannot lie on that side. #Otalgia.

‖Catarrh of Eustachian tube, with stitching pains and whizzing noises in ears.

Drawing cramp in muscles in region of l. mastoid process, he had to incline his head to r. side.

[7] **Smell and Nose.** ‖Coryza dry, complete obstruction of nostrils; crampy pain at root of nose; < in wet, cold weather.

‖At times stoppage of nose; at times fluent coryza.

‖Dryness and stoppage of nose; raising easily yellowish or greenish lumps in morning from posterior nares.

‖Chronic nasal catarrh; nostrils much stuffed up; sore to touch, and < in evening; bloody discharges.

Painful, crampy tearing, between root of nose and eyebrow.

[8] **Upper Face.** ‖Face pale, sunken; expression of suffering.

Twitching stitches from lower jaw to temples when laughing.

[9] **Lower Face.** Cramp pain in upper and lower jaw after eating.

Eruptions and ulcers at corners of mouth.

Dry, parched lips, with shriveled skin, without thirst.

Clear vesicles on upper lip.

[10] **Teeth and Gums.** Smarting toothache, made insupportable when anything cold touches tooth.

Violent toothache suddenly going from one place to another, and up into ears.

[11] **Taste and Tongue.** Oily taste in mouth.

Burning vesicles on l. side of tongue.

Nodosities on tongue; warts.

‖After cicatrization of small superficial ulcer on l. side of tongue, to which lunar caustic had been applied, severe stitching, burning pains along side of l. tongue and in inner side of corresponding cheek; chewing impossible; burning pains, < in tongue, at night in room, > in open air.

[12] **Inner Mouth.** Smell from mouth as of clay or earth (early in morning after rising).

Dryness of palate and lips.

[13] **Throat.** Sore, as if excoriated, with cutting pains, independent of swallowing; palate and lips dry, < in open air; when swallowing, stitches in both ears; < when coughing, with husky voice; feet and ankles swollen.

Throat dry, scratching, feeling as if trachea was closed with a leaf.

Digitized by Google

Cutting soreness in throat between acts of deglutition.
Chronic sore throat.

[14] **Appetite, Thirst. Desires, Aversions.** Aversion to food from a feeling of satiety.
Thirstlessness.

[15] **Eating and Drinking.** While eating: pressing in stomach and abdomen, more from cold food, especially in weakly females.
After eating: cramp pain in jaws; pain in rectum (after dinner).

[16] **Hiccough, Belching, Nausea and Vomiting.** Rising from stomach, like heartburn.
Nausea and vomiting.

[17] **Scrobiculum and Stomach.** Burning in stomach, extending to chest; sometimes with great restlessness.
Pressing soreness in epigastrium.
‖Much pain in stomach after eating; weakly people.
Drawing in region of stomach, with sensation as if pit of stomach was enlarged, with nausea.
Gastrodynia and pyrosis.

[18] **Hypochondria.** Pressure in hypochondria.
‖Jaundice from inflammation of liver.
‖Biliary calculi.

[19] **Abdomen.** Warm contraction, extending from middle of abdomen to chest, with nausea.
‖Cutting in region of navel when taking a long inspiration.
Pressing soreness in upper abdomen and pit of stomach.
‖Intense pain as if bowels were drawn together, beginning in stomach, going downwards to abdomen, chiefly on l. side; begins one and a quarter hours after food, attains its height in two hours; > by bending double, especially sitting bent over a fire, also by food and eructations; < in a cold room or cold weather; pain concentrates itself around and above navel; lasted for more than three weeks.
When walking, sensation as if bowels were loose and shaking about.
Abdomen distended, bloated; profuse flatus.

[20] **Stool and Rectum.** ‖Passes much flatus.
Stools: loose and tenacious; pappy; yellow, granular, with tenesmus and constriction of anus; costive; seldom, dry, knotty, difficult.
‖Constrictive pain in anus while sitting.

[21] **Urinary Organs.** ‖Frequent urging to urinate.
Cutting in middle of urethra between micturition.
Urine profuse; sediment violet, earthy.
Darting in urethra when emitting flatus.

Google

; Ptyriasis nigra, or Addison's disease of suprarenal capsules.

Male Sexual Organs. Sexual weakness, with pain in spermatic cord, and urging to urinate.

Sensation of weakness in genitals, with burning and drawing in spermatic cords, extending to glans.

‖ At times burning dragging from vesiculæ seminales to glans penis.

Itching: on corona glandis; interior of scrotum, not > by pinching and rubbing.

Female Sexual Organs. ‖ Menses: too early and scanty in anæmic subjects; much bearing down pain; six days too early, scanty, lasting only two days.

Discharge of blood between periods, pressing in genitals.

‖ Sudden flushes of heat at climacteric.

Voice and Larynx. Trachea and Bronchia. ‖ Hoarseness: with coryza; with tickling cough; rough speech in early morning or in open evening air; accompanying or lasting a long while after an attack of coryza; of chronic laryngeal affections.

‖ Voice not clear, as from phlegm, rough in morning.

‖ Rawness in larynx; voice hoarse; breath hot, burning.

‖ Dull stitches on both sides of larynx, extending to ear when swallowing.

‖ Roughness and constriction of larynx.

‖ Laryngitis, pains moderate, much accumulation of mucus, and long continued hoarseness; in singers.

‖ Laryngeal catarrh in weak, anæmic persons, or in such as exhibit tubercular deposit in lungs; hoarse voice in morning, which becomes gradually clear, after expulsion of lumps of consistent mucus.

‖ Tuberculosis of larynx.

‖ Chronic disease of larynx, with Eustachian deafness.

‖ Rawness in throat, with a feeling as though trachea was closed by a film, on hawking.

‖ Chronic affection of larynx and trachea; rawness and hoarseness; dry cough, < after speaking; expectoration of greenish masses, or reddish mucus; great anæmia; patient tuberculous.

‖ Venous dilatation in throat and pharynx; partial injection of ventricular bands; hoarse voice in morning, > after clearing up lumpy mucus. θ Chronic catarrhal laryngitis.

Respiration. Breath hot and burning, with disagreeable heat in chest.

Pain in second l. rib, from talking.

Pains in head, ears, arms, stomach, < breathing, talking or laughing.

Google

[27] **Cough.** Cough: causes darting in parietal bones; dry, incessant, from irritation at midsternum; > lying down, dry cough from loud reading, with painful dryness, roughness and constriction of larynx; < from talking, laughing, walking and deep inspiration.

‖Expectoration scanty, lumpy, yellow, adhesive, causing long efforts of coughing for expulsion. θBronchitis.

‖Deep cough with expectoration, ceasing on lying down.

Cough about 5 P.M., continues almost incessant until lying down, which relieves; irritation about middle of sternum; difficult expectoration of lumps of tough mucus; in morning easy expectoration of yellowish greenish lumps, even without coughing.

‖Sputum: greenish or yellow lumps; difficult, of tough mucus; reddish phlegm; bloody.

[28] **Inner Chest and Lungs.** Disagreeable heat in chest, breath hot and burning.

Stitches in chest and sternum, running up and down.

Beating in chest.

Warm contraction extending from middle of abdomen to chest, with nausea.

Bruised pain in upper chest when stooping, > by raising head.

‖Pneumapostema, and cough.

‖Hæmoptysis; with stitching pains through r. lung and dry cough, always ceasing on lying down; with much anæmia and palpitation of heart.

[29] **Heart, Pulse and Circulation.** ‖Palpitation of heart, strong, irregular, trembling, without abnormal sounds.

Sudden shocks at heart and in l. side of chest from above downward.

Pulse: very uneven and irregular, scarcely perceptible, sometimes rapid, sometimes slow, but constantly soft and weak.

[31] **Neck and Back.** Red, swollen streak on l. side of neck.

Stiffness of nape of neck.

Tearing in whole spinal column, from above downward.

Pain in small of back on bending backward.

[33] **Upper Limbs.** Pain as from a sprain in shoulder joint.

Rheumatic pains extending from shoulders to fingers.

Gnawing and boring in humerus, as if in marrow of bone.

‖Itching on outer surface of r. upper arm, just above elbow, > scratching.

Tension in elbow joint as if too short.

Herpes on forearm.

‖Tensive pain in joints of arms and wrists.

Rhagades in bends of fingers.

Hands when closed and stretched feel swollen.

Google

‖Chronic swelling and suppuration of little finger.
Malignant ulcer with blue border, following a slight scratch of finger nail.
‖Malignant ulcer on finger, from a slight scratch.

[83] **Lower Limbs.** Pimples on thigh with scurf on tips.
Tensive, drawing stitches in thigh.
Twitching of muscles in legs from least exertion.
‖Jerking sticking pain above knee.
Trembling and unsteadiness of knees.
Tearing in knees.
‖Itching on knees and tibia.
Tension and stiffness in legs.
‖Voluptuous itching on lower portion of r. calf; after scratching, a number of deep seated pimples appear, which soon cease to itch after being scratched until they bleed; then the place continues to itch and burn for a long time.
‖Inflammation and swelling of both l. malleoli, with stitches in leg, extending up from external malleolus always on walking, and at times when not walking. θAffection of ankle.
‖Excruciating pains in greatly swollen big toe, l. side, radiating upwards; pains unbearable at night; < by slightest touch; must constantly change position; loss of appetite and sleep. θPodagra.
Rheumatism in feet; cannot bear weight on heel.
‖Burning of soles of feet.
Rawness between toes.

[84] **Limbs in General.** Drawing and tension in limbs as from shortening of tendons, especially on stretching.
Weakness and trembling, especially of joints.
‖Rheumatism shifts from joint to joint, generally crosswise; red, shining swellings; < from touch, or motion, or at night.
‖Arthritis vaga; burning spots about joints; causing one to moan and groan constantly.
‖Painful periostitis, and inflammation of articulating extremities of bones; boring or gnawing sensation in humerus, as if in marrow of bones; at night pains are insupportable; < on touching parts; > in open air.
‖Intolerable pains in skin of lower limbs and joints.
‖Limbs very tender and sensitive to touch; part affected, and to which lameness is ascribed, is sensitive to pressure. θLame pelvis.

[85] **Rest. Position. Motion.** Lying down: cough >; deep cough ceases; cannot lie on side of sore ear.
Bending head backwards: headache in temples returns.
Must incline head to r. side; cramp in region of mastoid process.

Google

Raising head: bruised pain in chest >.
Sitting: vertigo; headache in temples <; constrictive pain in anus.
Standing: vertigo; stupefaction and confusion of senses.
Stooping: bruised pain in upper chest.
Bending forward: headache in temples >.
Bending double: pain in abdomen >.
Bending backward: pain in small of back.
When fingers are closed and stretched, they feel swollen.
Must constantly change position: pain in big toe.
From least exertion: twitching in muscles of legs.
Motion: rush of blood to head; of head causing jarring of brain; slightest, eyelids painful; swellings on joints <.
Laughing: stitches in ear; twitching stitches from lower jaw to temples; pains in head, ears, arms, stomach <; cough <.
Talking: stitches in ear; pain in second l. rib; pains in ears, head, arms, stomach <; cough <.
Swallowing: stitches in ears; cutting soreness in throat between.
Chewing: impossible, pain in tongue.
Stretching: drawing and tension in limbs.
Walking: concussion of brain; croaking in r. ear; stitches in ear; sensation as if bowels were loose and shaking about; cough <; stitches in leg; children unable.

[36] **Nerves.** Weakness and trembling, especially of joints.
Paralysis from decay of anterior portion of spinal cord.

[37] **Sleep.** Much yawning.
Feels sleepy early in evening.
Many vivid dreams, which are well remembered.

[38] **Time.** Morning: agglutination of eyes: pain in ear <; raising yellowish greenish lumps from posterior nares; early after rising, smell from mouth as of clay or earth; rough speech; hoarse voice; easy expectoration.
During day: burning in eyes and dim sight.
After dinner: pain in rectum.
5 P.M.: cough.
Evening: chronic nasal catarrh <; early, feels sleepy; chill.
Night: burning pain in tongue <; pains in big toe unbearable; red, shining swellings on joints <; pains in bones insupportable; sweats; digging pains in joints; periosteal inflammation extremely painful; itching in papules on neck <.

[39] **Temperature and Weather.** Over fire: sitting bent, > pain in abdomen.
In doors: headache >; burning in tongue <.
Open air: contractive pain in head <; congestion of blood to head >; drawing, stinging, tensive headache;

Google

burning, pressing headache >; pain in ear; burning pains in tongue >; dryness of lips and palate <; evening, rough speech; pains in bones >.

Cold and rainy weather: dull hearing <; crampy pain at root of nose <.

Cold: touching teeth, pain insupportable; food, pressing in stomach and abdomen <; room, or weather, pain in abdomen <.

40 **Fever.** Chill generally in evening, shooting headache, icy cold hands and feet.

Shaking chill, with heat of head, stinging in forehead, continuing after chill.

Sudden flashes of heat in face, on chest and over back.

Frequent rising of heat into head, with thirst.

Sweat profuse, with short, anxious breathing.

Night sweats; itching often only on neck and lower legs.

Incomplete intermittent, consisting of only heat and sweat, with moderate thirst.

Typhus fever where parotid gland is swollen, and bones are very sensitive to touch.

41 **Attacks, Periodicity.** One hour and a quarter after eating: pain in abdomen begins and attains its height two hours after.

Six days too early: menses, lasted only two days.

More than three weeks: pain in abdomen.

Between menses: discharge of blood.

At climacteric: sudden flushes of heat.

Six weeks duration: lichen circumscriptus; four weeks later two circular groups of rose colored, slightly pointed papules.

42 **Locality and Direction.** Right: must incline head to that side, cramp in l. mastoid process; croaking sound in ear; pain in ear; stitching pain through lung; itching on outer surface of upper arm; voluptuous itching on lower portion of calf.

Left: stitches and darts in side of forehead; drawing cramp in muscles in region of mastoid process; burning vesicles on side of tongue; small superficial ulcer on side of tongue; burning pain on side of tongue and on inner side of cheek; intense pain, side of abdomen; pain in second rib; sudden shocks in side of chest; red swollen streak on side of neck; inflammation and swelling of both malleoli; excruciating pains in big toe; small tubercles on buttock; dark red, well defined spots covered with small, loosely adherent scales on shoulder.

From above downward: sudden shocks in heart and chest; tearing in whole spinal column.

Up and down: stitches in chest and sternum.

Digitized by Google

Upwards: pains radiate in l. big toe.
Downwards: intense pain from stomach to abdomen.

" **Sensations.** Head as if larger; feels as on waking from sleep; as if ears were stopped; throat as if excoriated; as if trachea was closed with a leaf or film; as if pit of stomach was enlarged; as if bowels were drawn together; as if bowels were loose and shaken about; voice not clear, as from phlegm; pain as from sprain in shoulder joint; boring as if in marrow of bone; elbow joint as if too short; as if tendons were shortened.

Pains: extend to and concentrate in ear from other parts; in r. ear from teeth; in rectum; in stomach; around and above navel; in spermatic cord; in larynx; in second l. rib; in head, ears, arms, stomach; in small of back; in shoulder joint.
Excruciating pains: in greatly swollen big toe, l. side.
Unbearable pain: in big toe.
Intolerable pains: in skin of lower limbs and joints.
Insupportable pain: in teeth; digging, in bones.
Intense pain: from stomach to abdomen, < l. side.
Violent pain: in teeth, going from one place to another and up into ears.
Extremely painful: periosteal inflammation.
Tearing: in whole spinal column; in knees.
Tearing and stitching: extending to tympanum.
Severe stitching, burning: along side of l. tongue and on inner side of cheek.
Stitching pain: in ears; through r. lung.
Sudden stitch pain: in ears.
Tension, drawing stitches: in thigh.
Cutting pains: in throat; in region of navel: in middle of urethra.
Cutting soreness: in throat.
Throbbing: in head.
Beating: in chest.
Ulcerative pain: in deaf ear.
Darts: in l. side of forehead; in urethra; in parietal bones.
Twitching stitches: from lower jaw to temples.
Needlelike stitches: in l. side of forehead.
Stitches: in ear; in chest and sternum; in leg.
Jerking sticking pain: above knee.
Dull stitches: on both sides of larynx to ear.
Painful, crampy, tearing: between root of nose and eyebrow.
Crampy pains: at root of nose; in upper and lower jaw.
Drawing cramp: in muscles in region of l. mastoid process
Gnawing and boring: in humerus.
Pressing, boring headache: in temples, to eyes and forehead.

Google

Contractive sticking pain: in forepart of head, < in temples.
Constrictive pain: in anus.
Aching: in head; in epigastrium; in eyes.
Rheumatic pains: from shoulders to fingers; in feet; shift from joint to joint.
Bearing down pain: with menses.
Drawing, stinging, or tensive pain: in head.
Painful concussion: of brain, when walking.
Smarting pain: in teeth.
Burning dragging: from vesiculæ seminales to glans penis.
Burning heat: in eyes.
Burning, pressing: headache.
Tensive pain: in joints of arms and wrists.
Pressing soreness: in epigastrium; in upper part of abdomen and in pit of stomach.
Bruised pain: in upper chest.
Sudden shocks: at heart and in l. side of chest.
Jarring: of brain.
Soreness: of throat.
Rawness: in larynx; in throat; between toes.
Burning: in eyes; of ears; in vesicles on tongue; pain in tongue; in stomach to chest; in spermatic cord; in lower portion of r. calf; of soles of feet; in spots about joints, chest, arms, hands and feet.
Heat: of head.
Pressing: in genitals; in stomach and abdomen.
Drawing: in region of stomach; in spermatic cord; in limbs.
Swollen feeling: in hands.
Irritation: in middle of sternum.
Pressure; in eyes; in hypochondria.
Heavy feeling: in head.
Fulness: of ears.
Constriction: of anus; of larynx.
Tension: in elbow joint; in legs; in limbs.
Twitching: of muscles of legs.
Disagreeable heat: in chest.
Warm contraction: from middle of abdomen to chest.
Stiffness: of nape of neck; in legs.
Trembling and uneasiness: of knees; of joints.
Weakness: in genitals; of joints.
Dryness: of eyes; of nose; painful in throat.
Voluptuous itching: on lower portion of r. calf.
Itching: on corona glandis; interior of scrotum; on outer surface of r. upper arm; on knees and tibia; on lower portion of r. calf; on neck and lower legs; in hollow of knee and on shin; on palms.
Cold feeling: at a small spot on vertex.

Google

" **Tissues.** ‖Anæmia; laryngeal phthisis; tuberculosis.
‖Chlorosis, if gastric symptoms and loss of appetite predominate.
Every part of body feels extremely sore when touched.
Inflammation of bones or joints, with nightly insupportable digging pains.
Inflammatory swellings and suppuration.
Bones are very sensitive; red spots on skin from inflammation of bones; ankles particularly affected; children are unable to walk.
Periostial inflammation extremely painful at night.
Malignant ulcers with blue border, following slight injury.
" **Touch. Passive Motion. Injuries.** Touch: eyelids painful; external ear painful; nostrils sore; pain in toe <; red, shining swellings on joints <; pains in bones <; limbs very tender and sensitive; bones sensitive; every part of body extremely sore.
Cannot bear weight on heel; rheumatism.
Pressure: limbs sensitive.
Scratching: itching on r. upper arm >; makes deep seated pimples appear on r. calf.
Pinching and rubbing: does not > itching on interior of scrotum.
Slight scratch: followed by malignant ulcer.
Slight injury: malignant ulcers with blue border follow.
" **Skin.** ‖Itching here and there, > from scratching.
Itching on hollow of knee and on shin, < sweating.
Itching on palms, with red spots; lips sore.
Burning in small red spots, on chest, arms, hands and feet, accompanying rheumatism.
Rhagades in bends of joints, with soreness.
Itching herpes.
Skin will not heal.
Small vesicles, or deep seated little blotches, after scratching.
Small tubercles on mammæ and on l. buttock.
Chronic suppurations of skin, especially about joints.
‖Pityriasis rubra in a man, æt. 22, of healthy appearance, temperate and never had syphilis; three weeks ago an eruption commenced of dark red, well defined spots, covered with small, loosely adherent scales, extending over thorax and l. shoulder; the scales of epidermis exfoliate in immense quantities, exposing a red, dry surface.
‖Lichen circumscriptus, of six weeks' duration, on neck of a strong woman, æt. 44; commenced with itching; four weeks later two circular groups of rose colored, slightly pointed papules, confluent at base and without any secretion; itching < by night than by day, and ceasing after scratching.

Google

‖Psoriasis inveterata in a man æt. 45, addicted to immoderate use of brandy; eight years ago was cured of amaurosis by electricity, and six months later cutaneous disease commenced; sickly appearance; muscular, but thin, complexion dark; had gonorrhœa, chancres and buboes, and was drunk at first consultation; eruption first appeared on elbows, then on knees and calves; at the diseased points skin first became thickened, then fissures appeared, and finally white, shiny, hard, adherent scales, which were continually reproduced; scarcely any itching and occasionally rheumatic pains.

‖Lepra vulgaris, psoriasis and pityriasis.

[47] **Stages of Life, Constitution.** Boy, æt. 8; dysecoia.

Girl, æt. 13, anæmic, tuberculous deposits in apex of both lungs; affection of larynx and trachea.

Man, æt. 22; pityriasis.

Woman, suffering for more than three weeks; pain in bowels.

Woman, suffering three weeks; colic.

Woman, æt. 44, healthy; lichen.

Man, æt. 45, drinker, had gonorrhœa, chancre and buboes; psoriasis.

Man, æt. 60, no history of syphilis, after application of lunar caustic to small ulcer on tongue from which he was suffering for three months previously; pains in tongue and cheek.

Old man; podagra.

[1] **Mind.** Great mental excitement and loquacity.
Irrisistible desire to sing.
Indolence, mental and physical.
Great sensitiveness and excitability.
Irritable mood at and after dinner, with pressure in forehead.

[2] **Sensorium.** Dulness and dizziness.

[3] **Inner Head.** ‖Pressing pain over eyes, < on stooping.
‖Very painful pressure in r. temple, frequently alternating with same sensation in r. frontal eminence and in l. temple.

[4] **Outer Head.** Skin of forehead sensitive to touch.

[5] **Sight and Eyes.** Look as after weeping; smarting in canthi and redness of conjunctivæ.
Profuse smarting tears in open air.
Upper lids red and puffy.
‖Fibrous tumor inside of lower eyelid, one-third of an inch in diameter, preventing closing of lids; blurred sight; no pain.

[6] **Hearing and Ears.** Hissing sound when passing hand over ear, when talking, or forcibly inspiring through nose.
Fine ringing in r. ear when blowing nose, squeaking as if air was forced through mucus.

Google

Otalgia, with lancinating pain.
Dry herpes, with white scales, on and behind ears.
Tetterlike roughness of ears; behind or below ears.

Smell and Nose. Crawling in nose.
Violent crawling in r. nostril, with lachrymation of r. eye.
Sensation in r. nostril as if it was partly stopped; is obliged to blow nose and sneeze, but could not thereby remove obstruction.
Both sides of nose very much obstructed on reading aloud, several times during day, and especially in evening.
Stinging, lancinating pain in upper part of nasal cavity.
Tingling in nose, frequent sneezing with or without coryza.
Coryza, with stoppage of nostrils.
Repeated attacks of pain in forehead, with stuffing up of nose, > by a thick, dirty yellow, offensive smelling discharge.
Large, irregular pieces, green scabs, clinkers, etc., discharged from nose, leaving it sore; foul breath. θOzæna.
Nasal catarrh of both nostrils, discharge in green masses.
Continued stoppage of nose after removal of polypi.
After erysipelas of face, which extended to inner surface of nose, mucous membrane remained swollen, completely occluding nostrils; after fever, headache, etc., had been removed by various remedies, there remained a painless, protruding swelling of mucous membrane of l. nostril.
Nasal polypus.
When blowing nose, squeaking as if air was forced through mucus. θNasal polypus.
Polypus, with stoppage of nose on side he lies; large red pimples under r. nostril, near septum, sore and smarting to touch.
Nasal polypus of one year's duration.
After repeated attacks of coryza, mucous polypus of nose, greenish white in color, not sensitive, attached to upper turbinated bone, and completely filling nasal cavity and causing occlusion.
Large polypus of nose after a severe, badly treated cold.
Mucous polypus of pale red color, on l. side and of large size; mostly in anterior nares and in plain sight.
Polypus occupying entire r. nostril, projecting slightly.
Painful formication and shooting at root of nose, in l. frontal sinus. θPolypus.
Mucus flowed copiously from l. nostril. θPolypus.
Could not blow her nose without acute pain and some bleeding. θPolypus.
Polypus enlarges in wet weather.
Loss of smell of twenty years' standing.
Both nares filled with polypi, apparently attached to

Google

spongy bones, of three years' standing; breathing difficult, cannot close his mouth during exercise; snores and chokes in sleep; attacks of nose bleed during past few years from slight causes; constant secretion of watery mucus from nose.

‖Fleshy polypi hanging from both nares, < during damp weather; entire obstruction of nose at times; much discharge of water and mucus from nose.

‖For thirty years, nasal polypi removed every two or three years by operative means: nasal bones on l. side pressed asunder; judging from sensations complained of by patient, polypus extended up to ethmoid bone, into choanæ and into antrum of Highmore; after two months' treatment could breathe freely through nose, and the sense of smell which had been impaired for last twenty years was restored, a small portion of polypus, however, remained high up in nasal cavity.

[8] **Upper Face.** Pale face.

‖Frequent sensation of flushes of heat, but with paleness.

Burning, itching rash on forehead and upper part of face, < in evening and from warmth.

[9] **Lower Face.** Deep furrow on either side of under lip, with elevated edges.

[10] **Teeth and Gums.** ‖Violent tearing in roots and gums of r. lower incisors.

[11] **Taste and Tongue.** ‖Biting as from pepper on l., afterwards on r. side of root of tongue.

[12] **Inner Mouth.** Much mucus and saliva.

After hawking up mucus, mouldy taste in mouth.

[13] **Throat.** ‖Tearing and scraping in fauces, < l. side.

Stinging or pressure, hindering swallowing.

[14] **Appetite, Thirst. Desires, Aversions.** ‖A feeling of hunger, prevents falling asleep.

[15] **Eating and Drinking.** After nursing, jerking hiccough and empty belching.

After drinking, cutting colic.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Frequent, very violent hiccough.

‖Little children, emaciated, jerking hiccough after nursing, and belching without bringing anything up.

Gulping of bitter tasting food.

Vomits dark green masses; hiccough, with a stitch through stomach to back.

[17] **Scrobiculum and Stomach.** Anxious oppression or empty feeling and rumbling in stomach.

[19] **Abdomen.** Colic, cutting pain, after drinking.

Dull pressing, as from incarcerated flatulence.

[20] **Stool and Rectum.** ‖Very frequent emission of noiseless, but very warm flatus, often of a "hepatic" odor.

Google

Diarrhœa, with crying and emaciation in children.
▮Crawling in rectum after stool.
▮Crawling and at times violent fine sticking in anus in evening in bed.
▮▮Swelling, itching and creeping at anus as from ascarides.
▮Ascarides, with creeping and itching and nightly restlessness; < from warmth of bed.
Irritation produced by thread worms comes on at regular periods every day, and is followed by nightly restlessness and sleeplessness.

[21] **Urinary Organs.** ▮▮Increased discharge of watery urine.

[22] **Male Sexual Organs.** Sexual desire decreased.
Pressing, drawing sensation from abdomen into cords and testicles.
▮▮After gonorrhœa eight years ago chronic inflammation of urethra; two years ago four small, fleshy excrescences of bright red color, and with a moderately broad base, showed themselves on inferior wall; with increase of granulations and continual narrowing of channel, urinary tenesmus, urine passed with difficulty, with a sensation of heat and pain, also after coitus; the largest was excised, the smaller ones twisted, producing some hemorrhage; injections with Teucrium, once a day for a week, reached those in urethra, after which every vestige of excrescence was gone.

[23] **Female Sexual Organs.** ▮Smooth, pedunculated, pear-shaped polypus of vagina, protruding three inches beyond hymen.

[25] **Voice and Larynx. Trachea and Bronchia.** Dryness, causing hawking; hissing sound when inhaling.
Dryness in trachea.

[26] **Respiration.** Stitches in r. chest when inhaling; catarrhal asthma, especially in the aged.
Sensation of oppression (without affecting breathing).

[27] **Cough.** Dry, short cough, from tickling in upper part of trachea.

[29] **Heart, Pulse and Circulation.** Pulse accelerated towards evening.

[32] **Upper Limbs.** ▮Rheumatic lameness of r. upper arm as far as elbow, it sinks down on lifting it; drawing and tearing pain in whole arm.
Rheumatic pain in arms, especially in bones and joints.
▮▮Sudden dull, cutting pain transversely through muscle of r. forearm, at a distance of a span from wrist.
Finger joints bend over easily.
▮▮Burning in finger tips; panaritium.
▮Eruption on index finger of r. hand, covering a surface about two inches long and one inch wide, hard, hyper-

Google

trophied and covered with thick, whitish scales. θPsoriasis dorsalis.

[33] **Lower Limbs.** ‖Pain as if nail had grown into flesh of r. great toe.

‖Ingrowing toe nails (r. great toe), with ulceration; > moving.

[34] **Limbs in General.** Rheumatic pains mostly in bones and joints, < evenings, > moving.

Limbs go to sleep, with tingling, when sitting.

[35] **Rest. Position. Motion.** On side he lies: stoppage of nose.

Sitting: limbs go to sleep, with tingling.

Stooping: pressing pain over eyes <.

Moving: rheumatic pain >.

Passing hand over ear: hissing sound.

Lifting arm: it sinks down.

Disinclined to physical exertion.

[36] **Nerves.** Nervous, irritable, trembling.

Great sensitiveness and excitability; pale face; frequent feeling of flushes of heat, without redness; nervous excitability; trembling sensation in whole body. θNervous affections.

‖Very indolent; inclined to neither physical nor mental exertion.

‖Slight nervous asthenia of skin and prima viæ.

[37] **Sleep.** Restless sleep; also from ascarides.

‖Restless at night on account of great excitement, with very vivid and in part anxious dreams, with starting up till after midnight.

‖Sleepless on account of intense itching at anus, causing one to toss and roll about all night.

‖Very vivid, mostly agreeable dreams.

[38] **Time.** Morning: not refreshed.

At midday: sensation of general debility.

Evening: nose obstructed; rash on forehead <; sticking in anus, in bed; towards, pulse accelerated; rheumatic pains <; increased heat and exaltation.

Night: restless, with starting up; till after midnight, tossing and rolling from intense itching at anus.

[39] **Temperature and Weather.** Desire to exercise in open air, which does not fatigue.

Warmth: burning rash on forehead <; ascarides <.

Open air: profuse smarting tears.

Wet weather: polypus enlarged; fleshy polypus <.

[40] **Fever.** Chill, after eating, which spreads as if from abdomen.

Chilliness from want of animal heat, after eating or talking about unpleasant things.

Increased heat and exaltation in evening with, great loquacity.

41 **Attacks. Periodicity.** Several times during day: both sides of nose very much obstructed.
Every day at regular periods: irritation produced by thread worms.
Nightly restlessness.
At and after dinner: irritable mood.
One year's duration: nasal polypus.
During past few years: attacks of nosebleed.
Three years' standing: nares filled with polypi.
Twenty years' standing: loss of smell.
For thirty years: nasal polypi removed every two or three years by operative means.

42 **Locality and Direction.** Right: very painful pressure in temple and frontal eminence; fine ringing in ear; violent crawling in nostril; lachrymation of eye; as if nostril was partly stopped; large red pimples under nostril; polypus occupying entire nostril; tearing in roots and gums of lower incisors; biting as from pepper on side of tongue; stitches in chest; rheumatic lameness; cutting pain through forearm; eruption on index finger; pain as if nail had grown into flesh of big toe.
Left: painful pressure in temple; painless, protruding swelling of mucous membrane of nostril; mucous polypus on side of nose; painful formication and shooting in frontal sinus; mucus flowed copiously from nostril; nasal bones pressed asunder; biting as from pepper on side of tongue; tearing and scraping on side of fauces <.

43 **Sensations.** As if air was forced through mucus in ear; as if r. nostril was partly stopped; as if nail had grown into flesh of r. great toe; chill as if from abdomen; sensation as from fleabites.
Pain: in forehead.
Acute pain: in nose.
Violent tearing: in roots and gums of r. lower incisors.
Stinging, lancinating: in upper part of nasal cavity.
Lancinating: in ears.
Tearing and scraping: in fauces.
Drawing and tearing: in whole arm; in bones.
Stitches: in r. chest; through stomach to back.
Cutting colic: after meals.
Violent fine sticking: in anus.
Stinging: in throat.
Biting: on tongue.
Smarting: in canthi.
Burning itching: rash on forehead and upper part of face.
Painful formication and shooting: at root of nose, in l. frontal sinus.
Tingling: in nose; in limbs.

Google

Sudden dull, cutting pain: transversely through muscle of r. forearm.
Very painful pressure: in r. temple; in r. frontal eminence and in l. temple.
Pressing pain: over eyes.
Rheumatic pain: in arms, especially in bones and joints.
Rheumatic lameness: of r. upper arm.
Sensation of heat and pain: after coitus.
Burning: in finger tips.
Flushes of heat: in face.
Tickling: in upper part of trachea.
Dryness: in larynx; in trachea.
Anxious oppression or empty feeling in stomach.
Oppression: in chest.
Pressing, drawing sensation: from abdomen into cords and testicles.
Dull pressing: in abdomen.
Pressure: in forehead; in throat.
Trembling sensation: in whole body.
Crawling: in nose; in r. nostril; in rectum; in anus.
Intense itching: at anus.
Itching and creeping: at anus.

" **Tissues.** ‖Polypi of all kinds, particularly nasal fibroids.
‖Polypi in ear and nose, especially among old and middle aged women.

" **Touch. Passive Motion. Injuries.** Touch: skin of forehead sensitive; pimples under nostril smarting.
‖Injuries to head, concussion of brain.
‖After lesions where tetanus might be expected.

" **Skin.** Sensation as from fleabites.
Rash, burning, itching.

" **Stages of Life, Constitution.** ‖Old persons and children.
‖Suitable when too much medicine has produced an oversensitive condition and remedies fail to act.
Boy, æt. 11, after erysipelas; nasal polypus.
Boy, æt. 11, for three years; nasal polypi.
Girl, æt. 14, nervous temperament, quickened growth, slender, pale face, light hair, blue eyes; tumor on l. lower lid.
Boy, æt. 15, nasal polypi.
Woman, æt. 19, mother of a scrofulous child; affection of nose.
Man, barber, thin, sandy complexion; rheumatism.
Man, æt. 30, strong constitution, gonorrhœa eight years ago; urethral polypi.
Woman, æt. 25; polypus of vagina.
Man, æt. 56, music teacher, suffering two years; psoriasis dorsalis.

Google

Man, æt. 59, for thirty-one years; polypus.
Man, æt. 60, strong, suffering thirty years; nasal polypus.

[46] **Relations.** Compatible: *Cinchon., Pulsat., Silica.*
Compare: *Cina* (ascarides); *Ignat.* (hiccough, ascarides); *Nux vom.* (nervous phenomena); *Kali bich.* (nasal catarrh); *Phosphor., Sanguin., Silica* (nasal polypi); *Valer.* (nervous phenomena).

MEDORRHINUM.

Gonorrhœal Virus. *A Nosode.*

Introduced by Swan.

All the provings and cures were made with high potencies.

The provers were Ren Dell, Finch, Swan, Farrington, Cleveland, Higgins and others.

Other authorities, for symptoms clinical and pathogenetic, mentioned in Berridge's MSS., prepared for Swan's Materia Medica, are Ren Dell, Finch, Swan, Norton, Frost, Farrington, Cleveland, Morgan, Berridge, Wildes, Higgins, Ostrom, Nichols, Pease, Sawyer, Carr, Biegler, etc.

CLINICAL AUTHORITIES.—*Neuralgic headache*, MSS.; *Ptosis of lids*, Swan, MSS.; *Abscess of liver*, MSS.; *Diarrhœa*, MSS.; *Cholera infantum* (2 cases), Swan, MSS.; *Nocturnal enuresis*, Sawyer, MSS.; *Impotence*, Cleveland, MSS.; *Gonorrhœa, with mental disturbance*, Pease, MSS.; *Ulceration of neck of womb*, Wildes, MSS.; *Chronic soreness of mammæ*, Higgins, MSS.; *Cough*, Berridge, Hom. Phys., vol. 5, p. 149; *Incipient consumption*, Farrington, MSS.; *Rheumatism*, Biegler, Org., vol. 3, p. 211; *Obstinate rheumatism*, Swan, MSS.; *Chronic rheumatism* (not sycotic), Wesselhœft, MSS.; *Gonorrhœal rheumatism*, Nichols, MSS.; *Sequelæ of rheumatism*, Biegler, MSS.; *Shoulder pains*, Higgins, MSS.; *Pain under l. scapula to end of little finger*, Ostrom, MSS.; *Itching and hivelike eruption*, Swan, MSS.

Symptoms not marked are pathogenetic; marked ❙ or ❙❙ pathogenetic verified; marked ❙❙ purely clinical.

[1] **Mind.** ❙Great weakness of memory.
❙❙Dulness of memory and desire to procrastinate, because business seemed so long lasting, or as if it never could be accomplished. θGonorrhœa.
❙Entirely forgot what she had read, even previous line.
❙Forgetfulness of names, later of words and initial letters.
❙Cannot remember names; has to ask name of her most intimate friend; forgets her own.
Cannot spell right; wonders how the word "how" is spelled.
Reads a letter and thinks the words look queer and are spelled wrong.

Digitized by Google

‖‖Time moves too slowly.
‖Dazed feeling; a far off sensation, as though things done to-day occurred a week ago.
Momentary loss of thought, caused by sensation of tightness in brain.
‖Loses constantly the thread of her talk.
‖‖In conversation he would occasionally stop, and on resuming make remark that he could not think what word he wanted to use. θGonorrhœa.
‖Seems to herself to make wrong statements, because she does not know what to say next, begins all right but does not know how to finish; weight on vertex, which seems to affect mind.
‖Great difficulty in stating her symptoms, loses herself and has to be asked over again.
Difficulty in concentrating his thoughts or mind on abstract subjects.
Could not read or use mind at all from pain in head.
Thinks some one is behind her, hears whispering; sees faces that peer at her from behind bed and furniture.
Persons come in, look at her, whisper, and say "come."
‖One night saw large people in room; large rats running; felt a delicate hand smoothing her head from front to back.
Is sure that she is worse, knows she is not going to live, cannot see any improvement, even when it is pointed out; has no fear of death, speaks calmly about it, and gives directions as to the disposition of her affairs.
‖Sensation as if all life was unreal, like a dream.
‖Wild and desperate feeling, as of incipient insanity.
‖Cannot speak without crying.
Tendency to suicide, gets up in night and takes his pistol, but his wife prevents him.
‖‖Is in a great hurry; when doing anything is in such a hurry that she gets fatigued.
Strange exhilaration of spirits.
Alternation of happiness and gloominess.
Spirits in the depths, weighed down with heavy, solid gloom, > by torrents of tears.
‖Is always anticipating; feels most matters sensitively before they occur and generally correctly.
‖Anticipates death.
‖Dread of saying the wrong thing when she has headache.
‖Everything startles her, news coming to her seems to touch her heart before she hears it.
‖Woke at an early hour with a frightened sensation, as if something dreadful had happened; heavy weight and great heat in head; could not rest in bed; felt as if she must do something to rid her mind of this torture.

Google

‖Fear of the dark.
Feeling as if he had committed the unpardonable sin and was going to hell.
A word or look of seeming harshness puts her in despondency for hours.
Feeling of desperation; did not care if he went to heaven or hell.
‖Cross through day, exhilarated at night, wants to play.
‖Irritated at little things.
Nerve trembling, with worry.
‖Very impatient.
Reading and writing make her nervous and enrage her.
Great selfishness.

[2] **Sensorium.** ‖Vertigo: when stooping; several times during day sudden attacks, seemingly in vertex, with danger of falling; things did not seem to go round, but there was a sensation and fear of falling, only slightly > lying down; < on movement; always woke with it; as if intoxicated; walks zigzag; in occiput, extending to vertex, with sensation of enlargement of occiput.
‖Head light, not exactly dizzy.
Sensation of tightening in head, causing intense vertigo.

[3] **Inner Head.** ‖Frontal headache: with nausea; feeling of a tight band across forehead, < leaning head forward; as if front half of brain would come through forehead; as if skin was drawn tight; with fluent coryza; with pressure back of eyes, as if they would be forced out; extending over brain to neck.
‖Brain seems weary; slightest sound annoys and fatigues her.
Neuralgia first in l. temple and parietal bone, then in r., next day in l. eye.
Wakes with headache over eyes and in temples; < from sunlight.
‖Headache in r. temple; a good deal of aching over l. eye.
θNocturnal enuresis.
‖Neuralgic headache in l. temple and around middle part of cranium, at times terribly severe, with sensation of great weight and pressure in vertex; has lasted twenty-four hours and is gradually increasing in violence.
Pain in centre of brain; in evening sharp pain through temples; pains commence and cease suddenly.
Heat and throbbing in temporal region both sides.
Brain exceedingly tender and all mental work irksome.
Pain in l. parietal bone when the wind blows on it.
Pain circling through head and around crown.
Terrible pains all through head in every direction, with continuous and violent vomiting, followed by aching in sacrum and down back of legs to feet.

Google

Constant headache, < while coughing; light (through the eyes) seems to hurt it.
Intense headache for three days, with inflammation of eye.
Headache and diarrhœa from motion of cars.
Headache with menses.
Dull headache in a broad ring around head.
Intense cerebral suffering, causing continual rubbing of head in pillow, rolling from side to side.
Dull pain in cerebellum.
Intense burning pain in head, < in cerebellum.
Tensive pain in l. side of head as far back as parietal eminence and to middle of crown.
Tensive pains in head as if she would go crazy; could not read or use mind.
Sensation as of three points of tension in head, in centre of each hemisphere and cerebellum; as if large cords were drawn to each from every part of lobes and cerebellum; extremely painful, caused a disposition to run wildly through streets tearing hair; seemed as if tensive pains would break, when suddenly they relaxed and a bubbling sensation passed from centres to circumferences; when reached, the tensive pains began again.
Sensation of tightness and contraction, extending from eyes and meeting in brain; extends down whole length of spine.
Aching in occiput and medulla; pain sharp on motion; drowsy.
Aching and exhausted feeling in cerebellum and medulla, with a subjective tenderness of spine from cerebellum to kidneys.
Aching pain in base of brain, with swelling of cords of neck.
Burning glow in cerebellum and down spine.
Head feels heavy and is drawn backwards.
Severe pain in back of head as though it had been struck; pain spread over to front, with severe neuralgic pain in l. eye; headache lasted all night; eye bloodshot.
Pain in back of head and in r. eye.
Simmering in head, does not know whether it is heard or felt.
Sensation as if occipital protuberances were enlarged.

Outer Head. Hair lustreless, dry and crispy.
Dryness and electrical condition of hair; it will not remain brushed.
Intense itching of scalp; quantities of dandruff.

Sight and Eyes. When eyes were shut, felt as if pulling out of head to one side or other; when open all things seemed to flicker.
A blur over things; numberless black, sometimes brown spots dancing over her book; sees objects double; things look very small; sees imaginary objects.

Google

‖Feeling as if she stared at everything, as if eyes protruded.
‖Aching in eyeballs, pressure and heat in vertex, a tendency to shut eyes.
‖Neuralgic pain in eyeballs: when pressing eyelids together; < when rolling them.
‖Continuous watering of eyes, great heat and sensation of sand under lids.
‖Feeling of pain and irritation, and sensation of sticks in eyes, lids and especially inner canthi, redness and dryness of lids, congestion of sclerotic and sensation of a cool wind blowing in eyes, especially inner canthi.
‖Ptosis of outer end of both upper lids, particularly l., requiring exertion to open them.
‖Swelling of upper lids; soreness and smarting of edges.
‖Decided tendency to irritation of edges of lids.
‖Pulling pain in l. lower lid from outer canthus; could see lid twitch between these points.
Hardness of upper lid as if it had a cartilage in it.
Eyebrows itch; brows and lashes fall off.
Swelling under eyes.

[6] **Hearing and Ears.** Nearly total deafness of both ears, with very little noise; had to use a trumpet.
‖Partial or transient deafness; pulsation in ears.
‖Child hard of hearing for six days.
Singular sensation of deafness from one ear to the other, as if a tube went through head, while yet there was an overacuteness of hearing.
Is sure he hears people in conversation, but on carefully watching, finds that sounds have reference to arterial pulsation, but where he cannot discover.
When whistling, the sound in ears is double, with peculiar vibration as when two persons whistle thirds.
Noises seemingly in mastoid cells, frying and hissing.
Pain passes up Eustachian tube and out of both ears with a tickling sensation.
After sleeping feels as though parchment was drawn over ear on which she was lying.
Sensation of a worm about an inch long crawling in r. ear, and as if it commenced boring in anterior wall of auditory canal.
Itching, aching, or boring pain in l. ear.
Aching in cartilage of ear when lying on it at night.
Soreness to touch of r. concha.
Quick, darting pains in r. ear, from without inward; pains followed each other in close succession.
Ringhole in l. ear sore and almost gathered.

[7] **Smell and Nose.** Intense itching in nose, internally near point, had to rub all the time.

Digitized by Google

Very great burning in both nostrils when breathing through them.
Coldness of end of nose.
Entire loss of smell for several days.
Soreness of outer wing (inside) of l. nostril.
Nose constantly running.
Nasal catarrh, with continual running down throat.
Sensation of action in bones of nose; obstruction at root of nose as if mucous membrane was hypertrophied.
Nose goes to sleep.
‖Epistaxis.
Nose inflamed, swollen.
Catarrh of posterior nares.
Posterior nares obstructed, > by hawking thick, greyish mucus, followed by bloody mucus.
Heavy fluent coryza, with hard headache all day in frontal region, < 10.30 A.M.
Soreness and crawling feeling as of a centipede in l. nostril in morning.

[8] **Upper Face.** ‖Great pallor; yellowness of face, particularly around eyes, as if occurring from a bruise (greenish yellow); yellow band across forehead close to hair.
Greenish, shining appearance of skin.
Blotches on face.
Flushes of heat in face and neck.
Fever blisters near corner of r. upper lip, small but very sore.
Enormous fever sore on lower lip near l. commissure.
Sweat of face; on upper lip.
‖Neuralgia of r. upper and lower jaws, extending to temple.
πSwelling in region of l. submaxillary gland, the size of a goose egg; whiskers over tumor came out; softened in centre; at times sharp, shooting pains; on being opened discharged a large quantity of thin, bloody pus; was opened several times, finally the aperture formed raised embankment-like edges; the pus burrowed until arrested by clavicle, where it formed an enormous swelling (> after *Thuja* 3m.); the tumors left fistulous openings which were a long time in healing. θRetronasal catarrh (benefited).
Face covered with acne; dry herpes; freckles.

[9] **Lower Face.** ‖Tendency to stiffness in jaws and tongue.
‖Rigidity of muscles of face, especially of lower lip, drawing it up tight to teeth; jaws stiff, unable to open them; deglutition nearly impossible; throat filled with saliva.
Swelling of submaxillary glands.

[10] **Teeth and Gums** ‖Teeth have serrated edges, or are chalky and easily decay.

Google

Sore teeth, particularly eyeteeth; feel sore and soft.
Yellowness of teeth.
‖Hard swelling on r. upper jaw, as if in socket of a tooth gone since four years; intense neuralgic pains extending to whole head, causing sleeplessness; severe pains all over head, with external heat.
‖Pale gums.

[11] **Taste and Tongue.** Taste: coppery on rising; disagreeable; bad in morning.
Tongue coated: brown and thick; thickly in morning, with bad taste; white at base, the rest red; white, with papillæ showing through.
Tongue blistered.
Small sores, pustules (canker sores) on edge, tip and under tongue, very painful; also inside lips and in throat.

[12] **Inner Mouth.** Foul breath in morning.
Dryness of mouth; feels burnt.
‖Very sore mouth, ulcers on tongue and in buccal cavity, like blisters.
‖Blisters on inner surface of lips and cheeks, skin peeling off in patches.
Excitement of submaxillary glands, pouring out saliva profusely.
Stringy mucus comes out of mouth during sleep.

[13] **Throat.** Irritation in throat as if scraped.
Pharynx inflamed and feels very stiff and sore.
Great dryness of throat, with swollen glands.
Back part of throat constantly filling with mucus from posterior nares.
Sore throat and cold in head > by salt water bathing.
Soreness of throat, hurts to swallow.

[14] **Appetite. Thirst. Desires. Aversions.** ‖Appetite increased; ravenous hunger immediately after eating.
Absolute loss of appetite; thirst.
Enormously thirsty; even dreams that she is drinking.
Insatiate craving for liquor, when before she hated it.
‖Great craving for salt. θAbscess of liver.
Craving: for sweets; hard, green fruit; ice; sour things; oranges; ale.

[16] **Belching, Hiccough, Nausea and Vomiting.** ‖Hiccough.
Nausea: with frontal headache; after drinking water; after dinner; always after eating; before eating.
Vomiting of thick mucus and bile, without nausea.
‖Violent retching and vomiting for forty-eight hours; first glairy mucus, then frothy and watery, and lastly coffee grounds; accompanied by intense headache, with great despondency and sensation of impending death; during paroxysm was continually praying.

Digitized by Google

Vomiting black bile without nausea, tasting bitter and sour, with considerable mucus.

17 **Scrobiculum and Stomach.** ‖Sensation in pit of stomach as of a paper of pins that seemed to force themselves through flesh, causing her to rise and double up and scream; pins seem to come from each side. θAbscess of liver.

A sick or gnawing feeling, not > by eating or drinking.

Trembling at pit of stomach.

Sometimes a burning (like a flame) in pit of stomach, as if heart palpitated there.

Dull pain in epigastric region, deep in.

Feeling of a lump in stomach after eating.

Throbbing in sides of stomach.

Clawing in stomach, < drawing up knees.

‖Cramps in stomach as from wind.

‖Intense pain in stomach and upper abdomen, with a sensation of tightness.

Sensation of sinking and agonizing sickness at stomach, with a desire to tear something away.

18 **Hypochondria.** Terrible pains in liver, thought she would die, they were so acute.

‖Bilious colic with frequent vomiting and nausea; diarrhœic stools, chilliness and perspiration on face and neck.

‖Congestion of liver.

‖Grasping pain in liver and spleen.

‖Burning heat around to back, like a coal of fire. θAbscess of liver.

‖Severe pain from abscess extending to r. shoulder and down elbow. θAbscess of liver.

‖Throbbing and thumping in region of suprarenal capsule, seeming to come from abscess or sore spot just below fifth rib, r. side; creeping chills in region of r. kidney, throbbing, contracting, drawing and relaxing as if caused by icy cold insects with claws. θAbscess of liver.

19 **Abdomen.** ‖Intense agonizing pain in solar plexus; surface cold; eructations tasting of sulphuretted hydrogen and, after eating, of ingesta; applied r. hand to pit of stomach and l. to lumbar region.

Pressure in lower abdomen as of a heavy weight.

A feeling as of a tumor in r. side of abdomen.

Tensive pain in r. side of abdomen, as of a hard, biconvex body; with heat and gnawing aching pain, continued a short time; it was between spine of ilium and recti muscles.

Darting pain from centre of r. ovarian region to lower edge of liver.

‖Ascites; abdomen greatly distended; palpation showed water; urine very scanty and high colored.

Google

Beating as of a pulse in abdomen vertically.
Left inguinal glands sensitive and slightly swollen.
Cutting in r. lower abdomen running into r. spermatic cord; r. testis very tender.

[20] **Stool and Rectum.** Bilious diarrhœa, verging on dysentery, with mucous stools.
Pains of most intense kind (threatening cramps) in upper abdomen (darting and tearing pains) coming on at stool; stool diarrhœic, thin and hot, but not copious; after stool, profound weakness and mild cramp in l. calf.
Profuse bloody discharges from rectum, sometimes in large clotted masses, followed by shivering.
Black stool.
White diarrhœa.
Stools tenacious, claylike, sluggish, cannot be forced, from a sensation of prolapsus of rectum.
Can only pass stool by leaning very far back; very painful, as if there was a lump on posterior surface of sphincter; so painful as to cause tears.
Constriction and inertia of bowels with balllike stools.
Child, æt. 15 months, brought on a pillow to clinic, apparently dead; eyes glassy, set; could not find pulse, but felt heart beat; running from anus greenish yellow, thin, horribly offensive stool.
Baby, æt. 7 months, after summer complaint, great emaciation, diarrhœa green, watery, slimy, yellow, curdled, like boiled potatoes chopped up with greens, thin, cream colored, watery, smelling like rotten eggs; stools pass involuntarily; apparently lifeless, except that it rotates head on pillow.
Cholera infantum with opisthotonos, vomiting and watery diarrhœa; profuse discharge of blood and pus.
Sharp, needlelike pains in rectum.
Painful attack of piles, not bleeding, hot swelling on l. side of anus; pin worms.
Oozing of moisture from anus, fetid like fish brine.

[21] **Urinary Organs.** Intense renal colic; severe pain in ureters, with sensation as of passage of calculus; during kidney attack, great craving for ice.
Dull pinching pain in region of suprarenal capsules at 11 A.M.; fingers cold at same time; great pressure in bladder, greater than amount of urine warrants; urine scanty and high colored.
Pain in renal region, profuse urination relieves.
Very distinct bubbling sensation in r. kidney; sensation of three bubbles in r. renal region, moving like bubbling in water, causing faintness; deathly feeling in kidneys, with great depression of spirits, similar to effect of cold

Digitized by Google

settling in renal region; prostration after urination, θAbscess of liver.

▮Urine high colored.

A child, severe attack of cystitis, with light colored urine filled with mucus; extreme pain in urethra on urinating; end of penis inflamed; analysis gave albumen, phosphates and triple phosphates.

Urine watery, colorless.

After urinating, great coldness and shivering.

Burning on urination, like incipient gonorrhœa.

▮Strong smelling urine.

▮▮Urine covered with a thick greasy pellicle.

▮▮Nocturnal urination entirely ceased, the chamber empty in morning, a thing unknown for years.

▮▮Painful tenesmus of bladder and bowels when urinating.

▮▮Passes an enormous quantity of high colored, strong smelling urine in bed every night; thinks it is in afterpart of night, as he is always wet in morning; overwork and too much heat, or being in cold, aggravates this condition.

Debility after prolonged or complete urination.

Syncope after urination.

Intensely yellow urine.

In urinating very slow stream, with sharp, cutting pains transversely across root of penis; once flow intermitted; no burning; pains come on just as last drops are voided.

▮▮Diabetic condition; profuse and frequent urination.

♂ **Male Sexual Organs.** Nocturnal emission, followed by great weakness and miserable feeling all day.

Emissions during sleep: watery, causing no stiffness of linen; transparent, consistence of gum arabic mucilage, too thick to pour, and voided with difficulty; thick, with threads of white, opaque substance.

▮▮Impotence.

▮▮Gonorrhœal flow thin, transparent, mixed with opaque, whitish mucus, stains linen yellow.

▮▮Intense and frequent erections day and night.

▮▮Pains along urethra while urinating, drawing burning.

θSuppressed gonorrhœa.

▮▮Gonorrhœa for ten months; during eight months mostly suppressed by drugs and injections; for past two months flow persists, watery, transparent, but acrid and abundant, mixed with creamy liquid, stains linen yellow brown; pain at end of penis during urination; since third month of infection had heavy, drawing, wandering pains in r. arm, r. hip and l. calf, < in damp weather.

▮▮Gleety, gonorrhœal discharge for twenty years; urine stains clothes a dirty brown, discharges extremely slow,

Google

sometimes it takes half an hour to empty bladder, leaving him in a weak condition; during urination, painful rectal tenesmus; chilliness when bladder is too full, > by urination; if he urinates after getting warm in bed, has to urinate every hour rest of night; faint, indefinite sense of chilliness, followed by frequent calls to urinate, urine being hot, copious and followed by spinal chill and incontinence of urine on getting cold.

‖Burning in meatus during urination, and a feeling of soreness through whole urethra; also after urinating, a feeling as if something more remained in urethra. θGonorrhœa.

‖Scanty, yellowish, gleety discharge, of many months' standing, showing most plainly in morning, gumming up orifice.

‖Profuse, yellow, purulent discharge from urethra, most copious in morning. θGonorrhœa.

‖Cannot retain urine more than an hour, after 5 or 6 P.M. θChronic gleet.

‖Cannot retain urine through night. θChronic stricture.

πChancrelike ulcer on prepuce (never had syphilis or gonorrhœa); six months later there came for several months successive crops of vesicles on prepuce, very sore to touch, which soon opened at the tip, and left a little ulcerlike sore lasting a few days; a round, clean-cut, sharp edged elevation with depression, however not filled with pus as in genuine chancre. θRetronasal catarrh (benefited).

Soreness, swelling and dragging of testes.

♀ **Female Sexual Organs.** ‖Great sexual desire after menses in a single woman.

A great deal of pain in l. ovary, with a sensation as if a sac was distended and if pressed would burst; sensation as if something was pulling it down, causing it to be sore; pain when walking passed to l. groin, as if leg pushed something, with a great amount of heat.

Left ovary seemed enlarged, with intense heat and severe aching pain; could not bear pressure, though it seemed as if she must press it; with a burning heat.

Tense pains passing diagonally in r. ovary, followed by a bubbling sensation.

Intense, excruciating, neuralgic pains in whole pelvic region, extending downwards through ovarian region to uterus; cutting like knives, forcing tears and groans.

‖Ulceration of neck of uterus, which looked ragged and torn, inflamed and covered with stringy pus; had gonorrhœa.

Distinct soreness and nervous pain in one spot in lower part of uterus on l. side, < walking or moving l. leg.

Digitized by Google

Pulling and pain in sacrum and pubic region, as if menses were coming on.

Profuse menses; dark clotted, also bright blood, with faintness and some pain.

‖ Menses very dark; stains difficult to wash out.

Intense menstrual colic, causing drawing up of knees, with terrible, bearing down, laborlike pains, with pressing of feet against support, as in labor.

A burning pain in lower part of back and hips during menses.

‖ After very profuse menses, neuralgia in paroxysms in head, with twitching and drawing in of limbs and cords of neck, which were like wires; pain in lower abdomen, with profuse, yellowish leucorrhœa.

Itching of vagina and labia, thinking of it makes it worse.

Small chancres on edge of r. labia (had no sexual intercourse for three years, never had venereal disease).

Short, shooting pains, passing outwards, chiefly in breasts.

Breasts cold as ice to touch, especially nipples (during menses), rest of body warm.

Large but not painful swelling of l. breast.

Nipples sore, sensitive and inflamed.

Breasts and nipples very tender to touch, also inflamed.

Soreness of nipples, a gummy secretion drying on orifice; when picked off nipple bleeds freely.

Soreness of breasts, very sensitive to touch, at nonmenstrual periods.

Peculiar tenderness of breasts.

Voice and Larynx. Trachea and Bronchia. Hoarseness, especially while reading, with occasional loss of voice.

Slight hoarseness with hawking up of mucus.

Choking caused by a weakness or spasm of epiglottis, could not tell which; larynx stopped so that no air could enter, only > by lying on face and protruding tongue.

At night dryness, soreness and choking very severe; thrusting tongue in cheek brought on coughing and choking as if epiglottis was closed; a tearing sensation as if lining of larynx and pharynx had been torn off.

‖ Dryness of glottis, very annoying, with pain during deglutition; great hoarseness.

During day hoarseness, soreness and elongation of palate.

Soreness in larynx as if ulcerated.

Larynx feels sore when coughing.

Tenacious mucus in larynx.

Sensation of a lump in larynx; severe pain on deglutition.

‖ Bronchial catarrh spreading into larynx, swelling of tonsils and glands of throat extended also into ears, causing transient deafness.

Google

[26] **Respiration.** Desire to breathe deep; wakes gasping for breath.

Difficulty in breathing, with momentary faintness; very marked stuffed feeling in chest made her gasp for breath.

Great oppression of breathing every afternoon about 5 P.M.; sense of constriction.

Has to fill lungs, but no power to eject air.

Faint suffocative sensation when sitting up in bed, as if thorax was full.

Spasm of glottis, with clucking in throat, air expelled with difficulty, but inhaled with ease.

Breath hot, feels so even when breathing through nose.

After a deep inspiration singular piping and croaking in bronchia.

[27] **Cough.** Cough from tickling under upper part of sternum.

Incessant dry cough, < at night; wakes just as she is falling asleep; < from sweet things.

Hacking cough, causing darting pains through scapulæ.

Dry, hacking cough, with a weak, sinking sensation under sternum.

Severe dry cough, < at night; sensation of a lump; dryness and excoriated sensation in glottis, with great hoarseness (relieved by *Ipec.*).

Terrible, painful cough, as if larynx would be torn to pieces, and as if mucous membrane was torn off, with profuse discharge of viscid, greyish mucus, mixed with blood.

Cough deep and hollow, like coughing in a barrel; bronchial tubes appear to be very much enlarged and cough spasm causes a flabby feeling, as if lining membrane was a loose fold of tissue.

Great rattling of mucus, which appears to be low down in chest, while cough does not seem to reach there, but only to throat pit, consequently hard cough does not reach phlegm unless he lies on his face, when cough brings up a greyish yellow, or a pale greenish yellow, gelatinous mucus without taste.

When lying on back or either side when coughing, rattling, wheezing or whistling.

Cough: with aching across kidneys; causes painful shock at base of each lung; with a peculiar shrill, barking sound, some expectoration; on entering a warm room; after eating.

Cough, < on lying down, > lying on stomach.

Cough, < at night, causing retching.

Hawking of tenacious mucus.

Expectoration: yellow white, albuminous, or little green, bitter balls; ropy, difficult to raise; as if flecked with infinitesimal dark spots.

Digitized by Google

Inner Chest and Lungs. Oppression of chest: < l. side; with difficult breathing and a tendency to take a long breath; wakes gasping for breath.

Hoarseness seems to be in chest; feels like an accumulation in chest; as if it was painfully contracted.

Sharp pain in bottom of l. lung.

Darting pain through lung, which makes her start.

Chest sore to touch, at times burning extends over chest; cold seems to increase it; a piece of ice cools it for an instant, then it is hotter; lung feels as if beaten or bruised.

Feels as if her breath was fanning a blistered sore in lung.

Singular sensation through chest, bounded by a line drawn across lower end of sternum and another about middle; as if there was a cavity extending from side to side, filled with burning air, which dilated in puffs in all directions and could be felt impinging on walls of cavity.

Heat like a furnace in chest, with itching of ears.

Pain in upper part of r. lung when moving arm.

Pain in r. shoulder as though it came from l., straight through.

Chest feels sore throughout.

Darting pain from centre of r. lung to lower edge of liver.

Cold pain in r. lung and liver while coughing.

Very sharp stitching pain in bottom of r. lung; also over surface of both lungs.

Aching in back part of l. lung.

An old sore spot in top of l. lung aroused.

Fatigue of l. lung after talking, as if collapsed or paralyzed.

Walking in sun, l. lung becomes excessively hot, r. lung cold.

Pain in l. upper chest through to shoulders; cough arising from chest; incessant, dry cough, < at night.

Aching in l. lung under scapula, indescribable aching as if it was drawn up in hand and then let loose, < after walking; at same time aching in base of brain.

Sharp pain along r. edge of sternum, changing to l. edge, and afterwards into l. lung.

Left lung very painful, feels drawn towards r. side; l. side of chest from top of lung to waist hot as fire; heart beat very fast and felt hot, too; heat spread over r. side, but was very mild, only a warm feeling, while l. side was consuming; face pale grey, nose pinched and deathlike.

Bottom of l. lung sore to pressure (slight urging to cough from lower bronchia); afterwards slight pain in bottom of r. lung.

Constricted sensation at bottom of both lungs; finally dull, heavy pain at top of l. lung.

Intense boring in chest, but most below l. scapula, a place,

the size of a dollar, on outer edge extremely sensitive to touch; pain from upper lung to this spot.
Coughing gives great pain in chest, as if it was painfully contracted.
Sore spot size of silver dollar begins at top of l. lung and like a red hot bolt extends through to lower part of back; chest sometimes feels as if something had grown to the sore spot in front and was drawing back the chest; she feels for a cavity.
Pain in heart and lungs, especially at night.
‖ Awful pains, in phthisis, in middle lobes.
‖‖ Incipient consumption.

[29] **Heart, Pulse and Circulation.** Difficulty of breathing through oppression of heart.
Fluttering about heart.
Palpitation after slight exertion.
Heavy heart throbbings.
With heat in chest, heart felt very hot, beat very fast and felt large, accompanied by a bursting sensation.
Soreness in heart in morning after having slept on l. side.
Feeling of a cavity where heart ought to be.
Pain in heart: acute, sharp, quick; dull, quick.
Sharp pains around heart, passing thence to head; preceded by nausea.
Sharp pain at apex of heart; < on movement.
Great pain in cardiac plexus, extending to l. arm and throat; pulse 64; next day no pain; pulse 100.
Intense pain in heart, seemed to radiate in different parts of l. side of chest; < from least movement.
Pain from sore spot below l. scapula to heart, with violent palpitation.
Dull pain in heart, with pain in l. arm and sensation as if hand was swollen.
Burning in heart, went through to back and down into l. arm.

[30] **Outer Chest.** Pain and soreness through chest and mammæ.
Sensation of an abscess on l. chest between pectoralis major and minor where they form anterior boundary of axillary space, hard and sensitive to touch, drawing pains in every direction, < motion of arm; great heat extending about three inches from spot and through to back of shoulder, no redness and very slight swelling.
Great soreness to pressure of muscles of lower l. chest front and back, soreness when moving of l. shoulder blade.

[31] **Neck and Back.** Drawing in cords of neck, causing desire to throw head back.
Swelling of cords of neck, with aching pain in base of brain.
Spasms of neck muscles, notably sterno-mastoid, drawing chin firmly down to breast.

Google

Sensation of an enlarged gland in r. side of neck under upper part of sterno-cleido-mastoid muscle, painful when moving head.

Pain in nape and between scapulæ, running to either side, shoulder and down to lumbar region.

Contractive pain from superior angles of scapulæ, passing to seventh dorsal vertebra and extending straight down spine to ninth vertebra, drawing shoulders back tight as if bones would be crushed; < moving shoulders, neck or arms.

Pain in back between scapulæ.

Intense burning heat, commencing in back of neck and extending gradually down spine, with a contractive stiffness extending into head and seeming to thicken the scalp.

Pain under r. scapula.

‖Pain straight through from l. to r. shoulder.

Burning glow in cerebellum and down spine.

Weak, stiff, aching back.

‖Heat in medulla and spine for a whole week.

Whole length of backbone sore to touch, also ribs of l. side.

Tenderness of spinal column when stretching.

Aching across and in kidneys.

Occasional creeping sensation in region of l. kidney.

When she stoops cannot rise again without violent pain in region of kidneys.

Pain in region of l. kidney, darting over l. hip, especially when spine is pressed upon.

‖Throbbing and thumping in region of r. suprarenal capsule seeming to come from abscess or sore spot just below fifth rib, r. side, under breast; creeping chills in region of r. kidney, throbbing, contracting, drawing and relaxing; as if caused by icy cold insects with claws. θAbscess of liver.

Lumbar vertebræ sensitive to touch.

‖Pains in lumbar portion of spine; myalgic; induration of testes.

Sensation of water dropping out of a bottle in lumbar region (opposite third lumbar vertebra), between posterior and superior spine of ilium and vertebra.

‖Lumbago caused by straining in lifting.

Pain in back of hips, running around and down limbs.

Pain in sacrum and coccyx.

Upper Limbs. ‖Rheumatic pain in top of l. shoulder, < from motion; occasional little darts of pain if kept still.

‖Rheumatic pain in r. shoulder and arm.

Rheumatic pains in shoulders, notably l., also in hands, with pains on closing them.

Brown, itching eruption on l. shoulder.

Google

‖Severe pain from abscess, extending to r. shoulder and down to elbow. θAbscess of liver.
‖Pain commencing under l. scapula, running down l. arm to little finger, which pricked as if asleep.
Cold numbness on outer side of arms, just below elbow.
Itching and irritation inside of elbow joints.
Sharp pain in elbow when moving it.
Cracking of joints, especially elbows.
Left forearm and hand numb, unable to hold anything with force; any attempt to raise arm caused a sense of discomfort and irritability.
Pain in l. arm and sensation in head as if swollen; connected with heart; numbness down l. arm.
Aching in bones of arm after headache.
Numb pain in l. arm; cannot even hold a paper any length of time; the veins become enlarged; it is very painful to raise arm.
Trembling of arms and hands.
Right arm cold.
Crampy pain in first and second fingers of r. hand.
In night, sensation of a boil coming on back of hand, just above metacarpal phalangeal joint of l. index finger; sore to touch, with drawing pains from every direction; expected to find a boil there in morning, but found only a red spot, not elevated.
Burning of hands, wants them fanned and uncovered; always cold hands.
Intense burning in palms; burning and itching of hands, first l. then right.
Itching of hands at roots of and between fingers, as in itch.
Palms and sometimes feet burning hot.
Right hand is cold, then left.
Cold hands, with coldness extending all over body.
Sharp rheumatic pains across middle knuckles of l. hand, also rheumatism of arms and legs.
Hot numbness of backs of hands.
Back of hands rough.
Small yellow spots on hands.
Middle finger of l. hand swollen and cannot be bent without pain; cannot touch palm with it; top of this finger painfully sensitive, numb and dead, she cannot grasp anything with it, can hardly touch anything.
Hardness at base of ball of little finger.
Transverse depression on nails as if they were bent.
‖Consumptive incurvation of nails.

[33] **Lower Limbs.** Woke with a sharp pain over l. hip, preventing stooping, makes walking difficult; it is like a stiff neck, but more aching.

Google

Slight aching pains to hip joints and knees.
Pains in both legs, at times from hips down to knees, at other times in l.; only when walking.
Sensation of heaviness, or want of power to move limbs, in walking.
Heaviness of legs, very difficult walking (especially going up or down stairs), legs are so heavy, feel like lead.
Trembling of limbs, legs give way.
Lower limbs ache all night, preventing sleep.
Legs do not go right in walking.
Little dropping of r. leg.
Very restless with the legs.
Numbness in l. leg from knee to hip, feeling as if paralyzed.
Longing to stretch legs.
The pain seems to tighten the whole body, especially the feet and thighs.
‖Rheumatic pains in muscles of legs.
Many years since had a leg amputated just above ankle; after healing it began to swell, end of stump turned black, severe pains in muscles and bones, and ultimately a pimple appeared on stump, which broke and discharged for some time; all this has been reproduced.
During a terrific thunderstorm, very sharp pains in knees shot upwards; pains < by stretching.
Aching pain in legs, with inability to keep them still in bed, < when giving up control of himself, as when trying to sleep (> after *Lil. tigr.*).
Weak kneed when getting up from a chair.
When walking, pain in l. knee, that caused it to give way, letting her down.
Trembling in legs from knees down, l. leg trembles most, burning in feet.
Legs dead and heavy, throbbing from knees down.
Coldness of legs up to knees, also of hands and forearms.
Short pulling pains in knees, toes, ankle joints and hands.
Drawing sensation under knees and in ankles.
Contraction of muscles under l. knee and in l. calf.
‖Cramps in soles and calves at night.
Cramp in l. calf, afterwards in r. leg between knee and thigh.
▯Kind of cramp in l. calf at night, muscles knotted, > stretching; not cramp, but knotting.
Ankles turn easily when walking.
‖Sudden intense pain in l. ankle, back of joint, on going to bed, could not move limb or body without screaming; could find no position of comfort.
▮Burning of feet, wants them uncovered and fanned.

Google

Both feet somewhat swollen; dropsy of feet.
Sore feeling under l. foot.
Œdema of feet followed and > by diarrhœa.
Cold feet with chills all over body.
Small sharp pain in soles when first stepping on them in morning, not felt any other time.
‖Swelling and itching in soles, itching between toes, and pulling pains extending up to knees; itching, painful, papulous eruption around waist, and hivelike eruption wherever flesh is pressed on.
‖Tenderness of soles so that he could not stand on them at all and had to walk on his knees. θSuppressed gonorrhœa.
‖Soreness in ball of foot under toes.
Great toe sore, r. one worst; pains shooting through toes when sitting still.
Pain, swelling and inflammation of r. great toe.
‖Cold and sweaty feet.
Great toe covered with scales like tetters.
‖Old foot sweats, < during winter, for seven years.
Corns very tender.

[34] **Limbs in General.** ‖Almost entire loss of nervous force in legs and arms; exhausted by slightest effort.
‖Pain like rheumatism along r. nape, whole r. side, r. hip, l. leg (upper r., lower l.); pains drawing, < in dampness; l. leg swollen near knee. θGonorrhœal rheumatism.
‖Stiffness throughout body and joints. θSuppressed gonorrhœa.
‖Deformity of finger joints, large, puffy knuckles, swelling, stiffness and pain of both ankles; great tenderness of heels and balls of feet; the swellings of all affected joints were puffy like wind galls; general condition < inland, > near shore.
Numb sensation in l. arm, hand and leg; l. leg goes to sleep.
Eruption under and on toes and on hands and feet.

[35] **Rest. Position. Motion.** Rest: little darting pains in l. shoulder.
Lying down: vertigo slightly >; on ear, aching in cartilage; cough <.
Lying on back or either side when coughing: rattling, wheezing or whistling.
Lying on stomach: cough >.
Lying on either side: contents of lower part of chest and abdomen seem to press upon each other.
Cannot lie on l. side for any considerable length of time.
Can only sleep on back, with hands over head.

Google

Sleeps on her knees, with face forced in pillow.
Must lie on face and protrude tongue; larynx stopped so that no air could enter.
Could find no position of comfort: intense pain in l. ankle, back of joint.
Sitting still: pains shooting through toes.
Sitting up in bed; faint suffocative sensation.
Stooping: vertigo; cannot rise again without violent pain in region of kidneys; impossible, pain in hip.
Leaning head forward: tight band across forehead <.
Desire to throw head back: drawing in cords of neck.
Head drawn backwards.
Leaning body very far back: can only pass stool.
Drawing up knees: clawing in stomach <; menstrual colic.
Must rise and double up: pain in pit of stomach.
Thrusting tongue in cheek: brought on coughing.
Applied r. hand to pit of stomach and l. to lumbar region: intense agonizing pain in solar plexus.
Cannot hold paper long: numb pain in l. arm.
When closing hands: pain in them.
Slight exertion: palpitation; exhaustion; heat; tendency to perspire.
Motion: vertigo <; of l. leg, pain in uterus <; of arm causes pain in upper r. lung; sharp pain at apex of heart <; least, pain in chest <; of arm, pains in chest <; soreness of l. shoulder blade; of head causes pain in neck; of shoulders, neck or arms, pain in shoulders <; of elbow, sharp pain.
Getting up from a chair: weak kneed.
Getting up: as if bones were out of joint; shakes herself to get them into place.
Cannot keep still: restlessness, > by clutching hands.
Inability to keep legs still in bed: aching pain.
Continual rubbing of head in pillow, and rolling from side to side: cerebral suffering.
Attempt to raise arm: discomfort and irritability.
When rolling eyes: neuralgic pains <.
Could not move limb or body without screaming: intense pain in l. ankle, back of joint.
Stretching: tenderness of spinal column; pains in knees <; cramp in calf <.
When first stepping on soles: small sharp pains.
Had to walk on his knees: tenderness of soles.
Walking: pain passed from l. ovary to groin; pain in uterus <; aching in l. lung; difficult, pain in hip; pains from hips down to knees; heaviness in limbs; legs do not go right; pain in l. knee; ankles turn.
Going up and down stairs: difficult, from heaviness of legs.

Google

[36] **Nerves.** Intense nervous sensibility, respecting touch of garment or a lock of hair by any one not en rapport.
Starts at slightest sound.
Unusually active, going as if on wings.
Restlessness, cannot keep still, but feels greatly relieved by clutching hands very tight.
‖Consumptive langour; great general depression of vitality.
‖Very tired.
Faintness early in morning with no appetite.
Sensation as if she would faint, followed by a great heat down spine and between shoulders.
Trembling all over, great nervousness and profound exhaustion.
Great general subjective trembling, even tongue felt trembling.
Sensation of creeping things throughout body continually.
Quivering sensation, with tingling and numbness.
Tonic spasms, rigid extension of arms and legs, the hands everted, palms outward, thumbs down, fingers clawlike.
Epileptiform spasms with foaming at mouth, rigidity of body and limbs; violent regurgitation at heart with absence of mitral cluck.
Opisthotonos.
State of collapse, nearly gone; wants to be fanned all the time, wants more air; cold and pulseless, with cold perspiration; throws off all covers.
Risus sardonicus.

[37] **Sleep.** Sleepy, yawning, chilly.
Spasmodic yawning, cannot surpress it; followed by spasm of glottis.
Asleep, but hears everything, answers questions as if she was awake. θNightmare.
Bites tip of tongue in sleep.
Feels as if she would have nightmare.
Sleeps at night on her knees, with face forced in pillow.
Can only sleep on back with hands over head; if she lies on either side, the contents of lower part of chest and abdomen seem to press upon each other and cause discomfort.
When asleep, day or night, no matter how short a time. profuse perspiration on face and neck.
Sleep with wearing dreams of walking; waking with impression that she had slept for hours, although it was only thirty minutes.
Such restless nights and terrible dreams of ghosts and dead people, she dreads night to come.
Dreams: horrid; painful; exhausting; that she is drinking.

Google

Woke at night and saw a woman of pleasant face, dressed in grey, standing by bedside, wiping a tumbler; she backed from me miles away, becoming very small.

Wakeful; slept towards morning.

Great restlessness at night, sleepy but could not sleep.

Becomes wide awake at 6 P.M. and continues so till 12, with entire passivity of brain and cessation of thought; slight restlessness.

Time. Aggravation from daylight to sunset; always brighter in evening.

Morning: soreness and crawling in l. nostril; bad taste; tongue thickly coated; foul breath; gleety discharge; soreness of heart; small sharp pains in soles when first attempting to step on them; early faintness.

10 A.M.: chill, chattering, shivering.

10.30 A.M.: headache <; fever with thirst.

11 A.M.: pain in region of suprarenal capsules.

From 10 to 11 A.M.: cold feet and legs.

From 10 to 12 A.M.: nervous during fever, moving fingers.

From 10 A.M. to 1 P.M: fever and malaise <.

From 10.30 A.M. to 12 30 P.M.: thirst during chill.

At 11 A.M.: chill, beginning with great coldness of fingers and toes; fever, preceded by cold feet.

At 2 P.M.: feet cold first, after chill excessive languor.

At 5 P.M.: chill, followed by fever and slight sweat; next day same, but slighter.

From midnight to 3 A.M.: fever, with nervous restlessness.

Day: frequent and intense erections.

Afternoon: fever.

After 5 or 6 P.M.: cannot retain urine more than an hour.

6 P.M.: became wide awake until 12 P.M.

Evening: sharp pain through temples; itching <.

Night: headache; aching in cartilage of ear; intense and frequent erections; cannot retain urine; dryness, soreness and choking very severe; incessant dry cough; cough <, causing retching; sensation of a boil coming on back of hand; aching in legs; cramp in soles and calves; restless sleep; rapid pulse; sweats.

Temperature and Weather. In sun, walking: l. lung becomes very hot.

Too much heat: < urination in bed at night.

After getting warm in bed: when urinating, must do so every hour rest of night.

Entering warm room: cough.

Wants hands fanned and uncovered.

Wants to be fanned all the time, wants more air, state of collapse; hands and feet must be fanned.

Sensitive to drafts of air, takes cold easily.

Google

When wind blows on parietal bone: pain.
Salt water bathing: sore throat and cold in head <.
After getting wet: chill, followed by fever and slight sweat.
Damp weather: pains in limbs >.
Getting cold: incontinence of urine.
Craving for ice: during kidney attack.
Piece of ice cools chest for an instant, then it is hotter.
Inland: chronic rheumatism in joints <, > near shore.

[10] **Fever.** Creeping chills running down back and all over body in a zigzag course.

Chills: up and down back; several times a day; 10 A.M., some chattering and shivering; at 10.30 A.M., fever with thirst, began in fingers and toes; from 10.30 to 12.30, thirst during chill, none during fever; from 10 to 11 A.M., cold feet and legs; from 10 to 12, nervous during fever, moving fingers; at 11 A.M., beginning with great coldness of fingers and toes; at 2 P.M., feet cold first, after chill excessive languor; at 5 P.M., followed by fever and slight sweat (after getting wet); repeated next day, but slighter.

Shivering chills, with boring pains in chest.
Cold hands, with coldness extending all over body.
Coldness of legs up to knee, also of hands and forearms.
Flashes of heat alternating with chills.
Coldness: r. hand, then l.; a slight flush of heat succeeded, then sensation of a foreign substance in r. eye, then in left.
Must be fanned all the time, throws clothes off, yet surface is cold; burning, mostly subjective, of hands and feet, wants them uncovered and fanned.
Great general internal heat after dinner, as if blood was boiling hot in veins, same after slight exertion.
Great burning heat all over body, with flashes of heat in face and neck.
Fever: with or without thirst; with gushes of perspiration on face, followed by languor; with nervous restlessness from midnight to 3 A.M.; at 11 A.M., preceded by cold feet; fell asleep during fever; after fever, sweat on palms, feet and legs; with rapid pulse at night; in afternoon; and malaise < from 10 to 1.
Hectic fever; every afternoon.
Great tendency to perspire on exertion; sensitive to cold.
Profuse sweat about neck.
Night sweats.
Chills for four months every day, commencing from 3 to 4 P.M.; chill with headache, thirst, nausea, sometimes vomiting; fever with headache, thirst, nausea, principally on head and neck; pains from waist downwards; frequent urination, dark color; frequent, tasteless eructations; constipation; bad taste in mouth in morning.

Digitized by Google

Chill came first at night, afterwards at various hours; for instance, on two consecutive days at 2 P.M., then two days at 3, 4, 5 and 6 each, then at 7 P.M., where it remained for two weeks; chill commenced in small of back, running up and down, lasted about an hour, and as it ceased, profuse and frequent urination appeared and continued during fever; congestion of chest simulating pneumonia during fever, causing great alarm; great renal distress during paroxysm; thirst during fever for hot drinks; fever continued for six or eight hours; profuse sweat after fever; great nervousness during paroxysm, was sure he would die; intolerance of noise; irritable.

" **Attacks, Periodicity.** In close succession: pains in ear.
Alternately: flashes of heat and chills.
Several times during day: sudden attacks of vertigo; chill up and down back.
Takes half hour to empty bladder.
Every day for four months: chills commencing from 3 to 4 P.M.
Every afternoon: hectic fever; about 5 P.M., oppression of breathing.
Nightly: passes enormous quantity of urine in bed.
Chill came first at night, afterwards at various hours; on two consecutive days at 2 P.M., then two days at 3, 4, 5, 6 each, then 7 P.M., where it remained for two weeks.
For six or eight hours: fever.
For forty-eight hours: violent retching and vomiting.
For three nights: cannot sleep, pain in carbuncular boils.
For several days; entire loss of smell.
For three days: intense headache, inflammation of eyes.
For six days: child hard of hearing.
For a whole week: heat in medulla and spine.
Six months after chancrelike ulcer on prepuce there came for several months successive crops of vesicles on prepuce.
For ten months: gonorrhœa.
For seven years: < during winter, old standing foot sweats.
For twenty years: gleety gonorrhœal discharge.

" **Locality and Direction.** Right: neuralgia in temple; in eye; headache in temple; as of a worm crawling in ear; soreness of concha; quick, darting pains in ear; fever blisters near corner of upper lip; neuralgia of upper and lower jaw; hard swelling in upper jaw; as of a tumor in side of abdomen; tensive pain in side of abdomen; darting pain from centre of ovarian region to lower edge of liver; cutting in lower abdomen, running into spermatic cord; testes very tender; distinct bubbling sensation in kidney; sensation of three bubbles in

Google

renal region; heavy, drawing, wandering pains in arm and hip; tense pain passing diagonally in ovary; small chancres on edges of labia; pain in upper part of lung; pain in r. shoulder as though it came from l.; darting pain from centre of lung to lower edge of liver; cold pain in lung; sharp stitching pain in bottom of lung; lung cold; sharp pain along edge of sternum; mild heat spreading over r. side; pain in bottom of lung; sensation of enlarged gland in side of neck; pain under scapula; throbbing and thumping in region of suprarenal capsule, seeming to come from just below fifth rib; creeping chills in region of kidney; rheumatic pain in shoulder and arm; severe pain from abscess of liver, extending to shoulder and down elbow; crampy pain in first and second fingers of hand; dropping of leg; cramp in leg, between knee and thigh; soreness of great toe; pain, swelling and inflammation of great toe; pain like rheumatism along nape, whole side, hip, upper leg.

Left: neuralgia in temple and eye; aching over eye; pain in parietal bone; tensive pains in side of head; ptosis of outer end of upper lid; pulling pain in lower lid; itching, aching or boring pain in ear; ringhole in ear sore; soreness of outer wing of nostril; crawling in nostril; fever sore on lower lip near commissure; swelling in region of submaxillary gland; mild cramp in calf; hot swelling on side of anus; heavy, drawing, wandering pains in calf; great deal of pain in ovary; ovary seemed enlarged; soreness and nervous pain in spot side of uterus; swelling of breast; oppression < on side; sharp pain in bottom of lung; aching in back of lung; an old sore spot in top of lung aroused; fatigue of lung; walking in sun, lung becomes excessively hot; pain in upper chest; aching in lung under scapula; sharp pain in edge of sternum and lung; lung very painful, feels drawn towards r. side; side of chest from top of lung to waist hot as fire; bottom of lung sore to pressure; dull, heavy pain at top of lung; intense boring below scapula; sore spot size of silver dollar begins at top of lung, extends through to lower part of back; after having slept on side, soreness of heart; great pain in cardiac plexus, extending to arm; intense pain in side of chest; pain from sore spot below scapula to heart; dull pain in heart, with pain in arm; burning in arm; sensation of an abscess in chest; great soreness of muscles of lower chest; ribs sore to touch; occasional creeping sensation in region of kidney; pain in region of kidney darting over hip; rheumatic pain in top of shoulder; brown, itching eruption on shoulder: pain commencing under scapula, run-

Google

ning down arm to little finger; forearm and hand numb; pain in arm and sensation in hand as if swollen; numbness down arm; numb pain in arm; sensation of a boil coming on back of hand; pains across middle knuckles of hand; middle finger swollen; sharp pain over hip; numbness of leg; pain in knee when walking; trembling in leg; contraction of muscles under knee and in calf; knotting of muscles in calf; sudden intense pain in ankle, back of joint; sore swelling under foot; pains like rheumatism in lower leg; leg swollen near knee; numb sensation in arm, hand and leg; leg goes to sleep; itching sometimes confined to side.

From without inward: pain in r. ear.

First r. hand cold, then left.

From l. to r.: pain in shoulders; burning and itching of hands.

[43] **Sensations.** Of falling; as if intoxicated; as if occiput was enlarged; head as if tightening; as of a tight band across forehead; as if front half of brain would come through forehead; as if skin was drawn tight; as if she would go crazy; as of three points of tension in head, as if large cords were drawn to each; as if tensive pains would break; as if head had been struck; as if occipital protuberances were enlarged; as if eyes were pulling out of head; as if she stared at everything; as if eyes protruded; as of sand under lids; as of sticks in eyes, lids and inner canthi; as of a cool wind blowing in eyes; as if upper lid had a cartilage in it; as if a tube went through head; as if parchment was drawn over ear; as of a worm crawling in r. ear, as if it commenced boring in anterior wall of auditory canal; as if mucous membrane of nose was hypertrophied; as of a centipede crawling in l. nostril; mouth as if burnt; throat as if scraped; as of a paper of pins in pit of stomach that seemed to force themselves through flesh; as if heart palpitated in pit of stomach; as of a lump in stomach; cramps in stomach as from wind; sensation in liver as if caused by icy cold insects with claws; as of a heavy weight in lower abdomen; as of a tumor in r. side of abdomen; pressure as of a hard, biconvex body in abdomen; beating as of a pulse in abdomen; as if there was a large lump on posterior surface of sphincter ani; as of passage of calculus in ureters; after urinating, a feeling as if something more remained in urethra; as if a sac was distended in l. ovary and if pressed would burst; pain in l. groin as if leg pushed something; l. ovary as if enlarged; as if she must press ovary; cutting as if with knives in pelvic region; pain as if menses were coming on; chok-

l. scapula, running down arm to little finger; in l. arm; when bending middle finger of l. hand; in both legs, from hips down to knees; in l. knee; of r. great toe; from waist downwards.
Intolerable pains: in carbuncular boils.
Intense, agonizing pain: in solar plexus.
Terrible pains: all through head; in liver.
Intense pain: in head, in cerebral region; in stomach and upper abdomen; in abdomen; in heart; in l. ankle, back of joint.
Awful pain: in middle lobes.
Violent pain: in region of kidneys.
Extreme pain: in urethra.
Intense, excruciating neuralgic pains: in pelvic region.
Intense neuralgic pains: from teeth to head.
Severe pain: in back of head; all over head; from abscess of liver to r. shoulder and elbow; in ureters; on deglutition; from abscess extending to r. shoulder and down to elbow; in muscles and bones of stump of amputated leg.
Sharp pain: through temples; in occiput; in bottom of l. lung; along r. edge of sternum, changing to l. edge and then into lung; around heart, thence to head; at apex of heart; in elbow; over l. hip; in knees.
Great pain: in chest; in cardiac plexus, extending to l. arm and throat.
Hard pain: in frontal region.
Tearing pains: in abdomen.
Sharp, cutting pain: across root of penis.
Sharp, shooting pains: in swelling in region of submaxillary glands.
Short, shooting pains: in breasts.
Acute, sharp quick, or dull quick pain in heart.
Quick, darting pain: in r. ear.
Darting pain: from centre of r. ovarian region to lower edge of liver; in abdomen; through scapulæ; through lung, which makes her start; from centre of r. lung to lower edge of liver; over l. hip.
Boring pain: in l. ear; intense, in chest and below l. scapula.
Shooting pains: through toes; about three inches long in various directions and all over body.
Cutting: in r. lower abdomen, running into spermatic cord; in pelvic region.
Neuralgia: in temples and parietal bone; in l. eye; around middle part of cranium; in eyeballs; of r. upper and lower jaws to temple; in head.
Sharp, stitching pain: in bottom of r. lung; over surface of both lungs.

Google

Sharp, needlelike pains in rectum.
Terrible, bearing down, laborlike pains: during menses.
Intense menstrual and renal colic.
Intense burning pain: in head.
Grasping pains: in liver and spleen.
Contracting pain: from superior angles of scapulæ, passing to seventh dorsal vertebra and down same to ninth.
Dull, pinching pain: in region of suprarenal capsules.
Cramping pain: in first and second fingers of r. hand.
Gnawing, aching pain: in abdomen.
Short, pulling pains: in knees, toes, ankle joints and hands.
Pulling pain: in l. lower lid from outer canthus; in sacrum and pubic region; extending up to knees.
Heavy, drawing, wandering pains: in r. arm, r. hip and l. calf.
Drawing pains: in every direction of chest; on back of hand, from every direction; in limbs.
Rheumatic pains: in top of l. shoulder; in r. shoulder and arm; in hands; across middle knuckles of l. hand; of legs; in muscles of legs; along r. nape, whole r. side, r. hip, l. leg.
Most distressing aching: in bones.
Severe aching pain: in l. ovary.
Dull, heavy pain: at top of l. lung.
Dull pain: in broad ring around head; in cerebellum; in epigastric region; in l. heart.
Small, sharp pain: in soles.
Little darts of pain: in l. shoulder.
Cramps: in stomach; in soles and calves; in r. leg between knee and thigh.
Mild cramp: in l. calf.
Clawing: in stomach; like cold insects in r. kidney.
Gnawing feeling: in stomach.
Painful shock: at base of each lung.
Tensive pain: in l. side of head as far back as parietal eminence and to middle of crown; in r. side of abdomen; all over body from head to foot.
Tense pains: diagonally in r. ovary.
Numb pain: in l. arm.
Cold pain: in r. lung and liver.
Weak, stiff aching: in back.
Heavy throbbings: at heart; all over body.
Painful tenesmus: of bladder and bowels.
Painful eruption: around waist.
Burning pain: in lower part of back; in hips.
Smarting: of eyelids.
Burning heat: from liver round to back; in l. ovary; in back of neck and down spine.

Google

Burning glow: in cerebellum and down spine.
Burning: in both nostrils; in pit of stomach; on urination; in meatus; over chest; in heart, through to back and down into l. arm; of hands; in palms of feet; in chest.
Heat: in temporal region; under lids; in abdomen; in l. ovary; in chest; in l. side of chest from top of lung to waist; of heart; from chest through to back of shoulder; in medulla and spine; down spine and between shoulders.
Flushes of heat: in face and neck.
Soreness: of edges of eyelids; of outer wing of l. nostril; in l. nostril; of teeth; of mouth; of pharynx; of throat; through urethra; of testes; in one spot in lower part of uterus; of nipples; of breasts; of larynx; in heart, chest and mammæ; in ball of foot under toes; of great toe; all over body.
Excoriated sensation: in glottis.
Sore feeling: throughout chest; under l. foot.
Sore spot: on top of l. lung, size of silver dollar, begins at top of l. lung and like a red hot bolt extends through to lower part of back.
Slight pain: in bottom of r. lung.
Pricking sensation: all over body.
Tingling: through body.
Tenderness: of brain; of spine, from cerebellum to kidneys; of testes; of breasts; of spinal column; of soles; of heels and balls of feet.
Hot numbness: of backs of hands.
Simmering: in head.
Dragging: of testes.
Constricted sensation: at bottom of both lungs.
Contracting, drawing and relaxing: in region of kidneys.
Contraction: extending from eyes and meeting in brain; down whole length of spine; of muscles under l. knee and in l. calf.
Contractive stiffness: extending from spine to head and seeming to thicken scalp.
Drawing: in cords of neck; under knees and in ankles.
Discomfort: in l. forearm and hand; in chest and abdomen from lying on side.
Distress: in renal region.
Bursting sensation: in heart.
Stiffness: in jaws and tongue; of pharynx; throughout body and joints of both ankles.
Stuffed feeling: in chest.
Suffocative sensation: in thorax.
Pressure: back of eyes; in vertex; in lower abdomen; in bladder.
Oppression: of chest; of heart.

Digitized by Google

Weight: in vertex.
Heavy feeling: in head; in limbs.
Tightness: extending from eyes and meeting in brain, extends down whole length of spine; in stomach.
Twitching and drawing in: of limbs and cords of neck.
Throbbing and thumping: in region of r. suprarenal capsule.
Throbbing: in temporal region; in sides of stomach; in region of liver; from knees down.
Pulsation: in ears.
Bubbling sensation: in r. kidney.
Fluttering: about heart.
Quivering: in body.
Trembling: at pit of stomach; of limbs; in legs from knees down; all over; of tongue.
Tickling: in ears; under upper part of sternum.
Singular sensation: through chest.
Sensation of action: in bones of nose.
Restlessness: at night.
Numbness: down l. arm; of l. middle finger; in l. leg from knee to hip; in l. arm, hand and leg; through body.
Lightness: of head.
Sinking and agonizing sickness: at stomach.
Deathly feeling: in kidneys.
Sinking sensation: under sternum.
Faintness: early in morning.
Weakness: after nocturnal emission.
Fatigue: of l. lung.
Dryness: of eyelids; of mouth; of throat; of larynx: of glottis.
Creeping sensation: in region of l. kidney.
Itching: of scalp; in nose; of eyebrows; over l. eye; of ears; in occiput; in cerebellum and medulla; in base of brain; in eyeballs; in l. ear; in cartilage of ear; across kidneys; in sacrum and down back of legs to feet; in back part of l. lung; in l. lung under scapula; in bones of arm; in hip joints and knees; in lower limbs; of vagina and labia; of eruption on l. shoulder; in side of elbow joints; of hands; at roots of and between fingers; in soles; between toes; of eruption around waist; all over body; of eruption on limbs; from knees up, on forearms and around waist.
Chilliness: when bladder is too full.
Cold numbness: on outer side of arms, just below elbow.
Coldness: of end of nose; of r. arm; extending all over body; of legs up to knees; of hands and forearms; of fingers and toes.

" **Tissues.** Great heat and soreness, with enlargement of lymphatic glands all over body.

Google

Sensation as if she had taken a severe cold, with most distressing aching in bones; throat very sore and swollen, deglutition of either liquids or solids impossible.

There is scarcely a spot on body from head to foot but what is full of pain, of tensive and letting go character, accompanied by heat; this heat is a sensation, burning hot, but not perceived on surface by touch.

Sore all over as if bruised.

The pains seem to tighten the whole body, especially feet and thighs.

Feeling as if all the bones were out of joint in getting up; shakes herself to get them into place.

Obstinate rheumatism.

Sequelæ of acute articular rheumatism; walks leaning on a cane, bent over; muffled in wraps to ears, looking like a broken down man apparently soon to fall into his grave.

Carbuncular boils that seem small, discharge slowly and show dark red streaks; pains are intolerable, could not sleep for three nights.

" **Touch. Passive Motion. Injuries.** Touch: soreness of r. concha; soreness of vesicles on prepuce; nipples and breasts very tender; chest sore; small spot below l. scapula very sensitive; chest sensitive; whole length of backbone, also ribs of l. side and lumbar vertebræ sensitive; of garment, or lock of hair, nervous sensibility.

Pressure: of eyelids together cause neuralgic pains in eyeballs; on l. ovary, could not bear; bottom of l. lung sore; on spine, pain in kidneys and hips <; on flesh causes hivelike eruptions.

Rubbing: intense itching in nose.

Scratching: red spots on limbs itch.

Motion of cars: headache and diarrhœa.

Straining when lifting causes lumbago.

" **Skin.** Great yellowness of skin.

Intense and incessant itching, fugitive, < towards night, sometimes confined to l. side.

Itching all over body, most on back, vagina and labia, and < thinking of it.

Intense itching all over body, would scratch till it bled, but no relief; no visible eruption.

Pricking sensation all over body.

Red spots itching when scratched and on undressing at night, on limbs, particularly from knees up, on forearms and around waist.

Copper colored spots (syphilitic) remaining after eruptions, turn yellow brown and detach in scales, leaving skin clear and free.

Small, pedunculated warts, with pin heads like small button mushrooms on various parts of body and thighs.

Google

[47] **Stages of Life, Constitution.** Stunted in growth.
Suitable for grey eyes.
Baby, æt. 7 months, after summer complaint; diarrhœa.
Child, æt. 15 months; diarrhœa.
Man, æt. 20, gonorrhœa nine months ago, used injections eight months; gonorrhœal rheumatism.
A maiden lady, no suspicion of sycotic poisoning, a long line of ancestors had rheumatism and gout; chronic rheumatism.
Man, æt. 60; sequelæ of rheumatism.
Man, æt. 60, suffering six months; rheumatism.
Woman, æt. 89; abscess of liver.

[48] **Relations.** Antidote: *Ipec.* for dry cough.
Compatible: *Sulphur*, especially when stool drives out of bed.
Compare: *Picric ac.*, inability to walk right; *Camphor* and *Secale*, collapse, skin cold, yet throws off all covers; *Veratr.*, collapse with cold sweat; *Syphilinum*, reverse aggravation, *i. e.*, from sunset to daylight.

MELILOTUS.

Sweet Clover. *Leguminosæ.*

Introduced and proved by Bowen in 1852. He used both the white and yellow species, and made a second proving fifteen years later (see Allen's Encyclopedia, vol. 6, p. 176). More recent provings of the white species were made by H. C. Allen, assisted by Kraft, Gee, Waddell, and two students (see Medical Advance, vol. 20, p. 322).

[1] **Mind.** Loss of memory.
Confusion of thought.

Digitized by Google

‖Inability to fix mind; stupid; indifferent; omits letters and words in writing.
‖Irascible; fairly furious.
‖Indolent; an overpowering stupor.
‖Total inability to study.
|Weeping.
|Religious melancholy of four months' standing; intensely red face.

[3] **Inner Head.** ‖Throbbing frontal headache, preceded by great prostration.
‖Intense frontal headache, preceded by hot, flushed face and feverish sensation.
|Distressing headache in l. temple, commencing at about 4 P.M., > by remaining out of school.
||Severe headache.
|Almost delirious with headache.
|A frightful, heavy, oppressive headache for three days.
‖Headache, < from 9 to 12 A.M.
Severe headache, followed by profuse epistaxis and afterwards by hæmoptysis of bright red blood in considerable quantity.
|Headache lasting four days, with oppression of chest, severe stitching or cutting pains in womb and through hernia; was confined to bed for four days and only > by profuse bleeding of nose.
||Sick headache; retching, vomiting, excessive pains in temples, sense of pressure over orbits, coldness of feet and hands, pallor, loss of sight, or appearance of black spots before eyes.
|Headache, with extreme nervousness; irritability; forgetfulness; confusion of thoughts; palpitation; relaxation of bowels; > from epistaxis.
||Violent congestion to head.
‖Headache so intense as to cause purple redness of face and bloodshot eyes, culminating in epistaxis, which affords relief.
|Young man, æt. 20, of lymphatic temperament, subject to congestive headaches for several years at intervals of one to three months; more frequent in hot weather; during attack face and head swell, become purple, with bloodshot eyes; had frequently fallen in streets, and would wander around unconsciously through streets by day or night, and was always left weak, trembling and nervous for two or three days after.

[5] **Sight and Eyes.** ‖Eyelids very heavy.

Smell and Nose. ‖Excessive dryness of nose.
||Profuse and frequent epistaxis, with general relief.
|Epistaxis during a fever; one attack followed another,

Google

once or twice in twenty-four hours, usually at night; loss of blood alarmingly great; every attack preceded by intense redness, flushing of face and throbbing of carotids.

[8] **Upper Face.** ‖Great redness of face and head, with throbbing of carotids.

‖Very red face precedes hemorrhage from nose, lungs and uterus.

[17] **Scrobiculum and Stomach.** ‖Cramps in stomach every time he gets his feet wet, or after any unusual exposure.

[19] **Abdomen.** ‖Bilious colic.

[20] **Stool and Rectum.** Looseness of bowels.

Shooting, cutting in rectum while walking, > sitting down.

Heavy throbbing and fulness in rectum from internal piles.

Constipation, difficult, painful stool, constriction in rectum, discharge of stringy, milky white mucus.

[23] **Female Sexual Organs.** ‖Menstruation painful and difficult, accompanied by nervous headache (prolapsus uteri and l. inguinal hernia).

‖‖Severe, sharp, shooting, sticking pains in external genitals (especially labia), lasting only a moment, but recurring frequently and very annoying; at times so sharp as to cause involuntary starts; with nausea and dull heavy pain in pelvis (at close of menses).

[26] **Respiration.** Difficult breathing from climbing or rapid walking.

Could not get air enough, felt as if smothering.

[27] **Cough.** Cough: dry, harsh, spasmodic, horribly distressing, causing great anxiety; > by epistaxis; > by slight expectoration.

[28] **Inner Chest and Lungs.** Hæmoptysis; blood bright red.

‖Both lungs greatly congested; face and eyes very red; nosebleed every few minutes; high fever; constant, severe, racking cough and very rapid respiration. θPneumonia.

Chest very sore and oppressed, as if garments were too tight.

[29] **Heart, Pulse and Circulation.** ‖Palpitation of heart.

[31] **Neck and Back.** A broken sensation in lumbar sacral region, < sitting, > walking or standing, alternate with headache.

[34] **Limbs in General.** Rheumatic pains in joints on approach of a rain storm, or in rainy, changeable weather.

[35] **Rest. Position. Motion.** Sitting: cutting in rectum >; broken sensation in lumbar sacral region <.

Standing: a broken sensation in lumbar sacral region >.

Walking: cutting in rectum; rapid, difficult breathing; broken sensation in lumbar sacral region >.

[36] **Nerves.** ‖Extreme nervousness.

‖Infantile spasms.

Google

‖Spasm during dentition, with great congestion of head.
‖Convulsion of nervous children during dentition.
‖Eclampsia.

[38] **Time.** 4 P.M.: distressing pain.
Day or night: wanders unconsciously through streets; epistaxis.

[39] **Temperature and Weather.** Approach of a rain storm or in rainy, changeable weather: rheumatic pains in joints.
After exposure or getting feet wet: cramps in stomach.
Hot weather: congestive headache more frequent.

[40] **Fever.** Febris nervosa stupida; deaf and dumb; involuntary stools, mixed with blood; epistaxis; unconsciousness; loss of memory; confusion of ideas.

[41] **Attacks, Periodicity.** Alternate: broken sensation, with headache.
Every few moments: nosebleed.
Lasting only one moment, but recurring frequently: sharp pains in external genitals.
From 9 to 12 A.M.: headache <.
Once or twice in twenty-four hours: epistaxis.
For two or three days after headache: nervous and trembling.
For three days: oppressive headache.
Lasting four days: headache.
For several years at intervals of one to three months: congestive headache.

[42] **Locality and Direction.** Left: distressing pain in temple; inguinal hernia.

[43] **Sensations.** As if smothering; as if garments were too tight across chest.
Intense frontal headache.
Excessive pains: in temples.
Severe pain: in head.
Distressing pain: in l. temple.
Stitching or cutting pains: in womb and through hernia.
Severe, sharp, shooting, sticking pains: in external genitals.
Sudden, sharp, shooting, stinging, burning, rheumatic pains: in joints.
Shooting, cutting: in rectum.
Frightful, heavy, oppressive pain: in head.
Throbbing pain: in frontal region.
Rheumatic pain: in joints.
Cramps: in stomach.
Bilious colic: in abdomen.
Dull, heavy pain: in pelvis.
Soreness: of chest.
Broken sensation: in lumbar sacral region.
Constriction: in rectum.

Google

Pressure: over orbits.
Heavy feeling: of eyelids.
Fulness: in rectum.
Oppression: of chest.
Throbbing: of carotids; in rectum.
Dryness: of nose.
Coldness: of feet and hands.

" **Tissues.** Congestion relieved by hemorrhage.
Congestive or nervous headaches; engorgements of blood-vessels in any part or organ; spasms, infantile, eclampsia and epilepsy; insanity, to relieve brain from pressure and irritation.

" **Stages of Life, Constitution.** Child, æt. 5, sick two days; pneumonia.
School-girl; headache.
Man, æt. 20, lymphatic temperament; congestive headaches.
Woman, æt. 30, nervo-bilious temperament, suffering for years; nervous headache and dysmenorrhœa.
Woman, subject since childhood to frequent attacks of nosebleed; epistaxis.
Man, æt. 64, energetic, suffering fifteen years; cramps in stomach, after exposure.

" **Relations.** Compare: *Amyl nitr.* on circulation; *Antim. crud.* in epistaxis after headache, but does not >; *Bellad.*, *Glonoin.* and *Sanguin.* in congestive headache, red face, hot head, etc.; *Stramon.* in mental conditions.

Google

MENYANTHES TRIFOLIATA.

Buck Bean; Bitterklee. *Gentianaceæ.*

A perennial which grows in boggy places, indigenous to America, Europe and Northern Asia. It blossoms in May and June; flowers rose colored or whitish. The tincture is made from the fresh plant just coming into bloom.

Introduced by Hahnemann and proved by himself and his provers (Materia Medica Pura, vol. 5, p. 15).

CLINICAL AUTHORITIES.—*Headache*, Dunham, Raue's Rec., 1870, p. 287; *Amaurosis*, Teste, Hughes' Pharmacod., p. 517; *Pain in chest with nausea*, Hering, MSS.; *Affection of chest*, Wells, Trans. World's Hom. Con., 1876, p. 554; *Jerking of legs*, Rück. Kl. Erf., vol. 4, p. 581; *Sciatica*, Lilienthal, Times Retros., vol. 1, p. 121; *Cramps in legs*, Org., vol. 3, p. 269; *Intermittent fever*, Chargé, Trans. World's Hom. Con., 1876, p. 418; Wells, Trans. World's Hom. Con, 1876, p. 554; Dunham, Raue's Rec. 1870, p. 314; *Quartan ague*, Fisher, Allen's Int. Fever, p. 171; *Ague*, Douglas, Allen's Int. Fever, p. 172.

[1] **Mind.** Taciturn, reflective; sad, weeping; likes to be alone.
Anxiety about heart, as if some evil was going to happen.
Indifference alternating with too great joy.
Ill humored, cross.

[3] **Inner Head.** ||Constant heaviness of head.
Painful dulness of head after eating.
||Pressure in head from above downward, > better during hard pressure with hand.
||Pressive, stupefying headache, mostly involving forehead, during rest and motion.
||Dull headache in room, with difficult flow of ideas; > in open air.
||Compressive headache in vertex from both sides, on ascending steps, sensation as if a weight pressed upon brain with every step.
||Stitches in l. side of brain extending toward vertex.
||Stitchlike tearing in r. side of forehead near temporal region.
Burning pain in forehead.
|Pain in forehead, more severe in l. side, eye and ear, extending through occiput; much > by pressure with hands.
|Headache < lying down, by sleep and application of cold water.
|Cold feeling of head, as if cold wind was blowing on it.

Google

[4] **Outer Head.** External gnawing on vertex.
[5] **Sight and Eyes.** When reading everything becomes black before eyes.
‖Amaurosis.
Pressing in eyes.
Eyelids feel stiff as from tonic spasms.
[6] **Hearing and Ears.** Stitches in ears.
Feeling of coldness in ears.
‖Cracking in ear when masticating.
‖Otorrhœa, especially after exanthemata.
[7] **Smell and Nose.** Tension in root of nose.
Subjective nauseating smell, as from rotten eggs.
[8] **Upper Face.** ‖Visible, though not painful twitching of facial muscles, especially of r. side, < during rest than when walking.
Heat and redness of face when sleeping.
Heat in face with cold feet.
Pain and cracking in articulation of jaw when masticating.
Pimples on face.
[11] **Taste and Tongue.** Taste in mouth, bitter sweet.
[12] **Inner Mouth.** Dryness of palate causing a stinging when swallowing.
[13] **Throat.** Great dryness of throat without thirst.
Paralytic feeling on l. side of throat when yawning and coughing.
Dryness and roughness in throat preventing deglutition.
‖Sensation of coldness extending up œsophagus, with great nausea, following pressure in stomach.
[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Empty eructations.
[17] **Scrobiculum and Stomach.** ‖Throbbing in epigastrium like a pulse.
Continuous rumbling in stomach as from emptiness.
Constriction in stomach.
‖Weak stomach, with pressing in head and hard stools.
[19] **Abdomen.** Sensation of coldness in abdomen, especially when pressing with hand on it, in morning when rising.
Sensation of soreness of abdominal walls.
‖Distension and fulness of abdomen, as if overloaded by food, all day, with undiminished appetite, together with a sensation as of incarcerated flatus and frequent ineffectual efforts to emit it; in evening fulness much < by smoking.
[20] **Stool and Rectum.** Constipation · hard stool, with pinching pain in abdomen.
Bleeding hemorrhoidal tumors.
[21] **Urinary Organs.** ‖Frequent desire to urinate, with scanty discharge.

Google

[27] **Male Sexual Organs.** Increased sexual desire, without amorous fancies or erections.
Both testicles are drawn up, r. more than left.
Spermatic cord painful to touch.

[28] **Voice and Larynx. Trachea and Bronchia.** Rough, hoarse voice, ears feel obstructed, as if something had been stretched across.
Stitch in anterior region of larynx, impeding deglutition.
Spasmodic contraction of larynx; effort to inspire causes cough.

[29] **Inner Chest and Lungs.** ‖Sharp pain through middle of upper r. chest to lower part of shoulder, causing nausea and faint feeling; can scarcely move.
‖Pressure on both sides of chest, with sharp stitches, < on inspiration.
Constriction and stitches on both sides of chest.
Stitches in (r. side) of chest < during motion and when breathing.
A man about fifty years of age consulted me for a trouble in his chest; great oppression of breathing, with violent and irregular action of heart, < from slight exertion; feet and legs below knees habitually cold, < about 8 A.M., for an hour or two, during which time chest symptoms <. θAffection of chest.

[30] **Heart, Pulse and Circulation.** ‖Anxiety about heart, as if some evil was going to happen.
Stitches in region of heart.
Pulse slow during chill, accelerated during heat.

[31] **Neck and Back.** Heaviness and stiffness in muscles of neck and throat.
Dull, boring stitch on l. shoulder blade.
‖Dull boring sticking in l. scapula, extending across spine.
‖Extremely painful tearing between scapulæ, extending downward, especially on deep breathing.
‖Bruised pain in small of back, < when stooping, also when walking.
Pain in back, when sitting still, disappearing on touching; pressure as from a thumb, and tingling in it, which increases pain, < on stooping, drawing upward.

[32] **Upper Limbs.** ‖Muscular twitches in r. upper arm.
‖Cramplike pain in muscles of l. forearm, extending to palm of hand, almost like paralysis.
πTingling from elbows into hands and fingers, at 11 A.M., on walking in open air.
Tension and paralytic tearing in arms, hands and fingers.
Spasmodic stiffness of arms, fingers involuntarily clenched.
Painful jactitation of muscles of r. upper arm and little finger.

Google

[33] **Lower Limbs.** ‖Stitching, contractive pain in region of hip joint; cramplike drawing in of anterior portion of thigh when sitting; when sitting, thighs and legs are spasmodically jerked upward; pain > by motion and pressure, < evening, during rest and when lying down; after abuse of quinine. θSciatica.

Bruised feeling of thighs.

‖Right thigh and leg are spasmodically jerked upward while sitting, not when standing.

‖Legs constantly jerked up with cramps, preventing sleep.

‖Cramplike pain in muscles of r. leg, extending from below upward, like a paralytic pain.

‖Painful spasmodic jerking of lower extremities in gouty persons, with calcareous deposits in joints.

[34] **Limbs in General.** Stinging, pinching pain in limbs. θArthritic affection.

[35] **Rest. Position. Motion.** Rest: pressive, stupefying headache; twitching of facial muscles <; pain in thigh <.

Lying down: headache <; pain in thighs <; sweat in bed.

Sitting still: pain in back; cramplike drawing in thigh; thigh and leg jerked upward.

Stooping: pain in small of back <.

Slight exertion: irregular action of heart <.

Swallowing: stinging in palate.

Masticating: cracking in ear; pain and cracking in articulation of jaw.

Motion: pressive, stupefying headache; almost impossible, sharp pains through chest; stitches in chest <; pain in thighs >.

Ascending steps: compressive headache.

Walking: twitching of facial muscles >; pain in small of back <; tingling from elbows into hands and fingers; great debility.

[36] **Nerves.** Great debility, especially when walking, often with chilliness.

Painless twitching of muscles in different parts (face and thigh), principally when at rest.

‖Injuries to nerves (teeth broken when pulled, etc.).

[37] **Sleep.** ‖Vivid unremembered dreams.

[38] **Time.** Morning when rising: coldness in abdomen.

8 A.M., for an hour or two: coldness of feet and legs <.

11 A.M.: tingling from elbows into hands and fingers.

All day: distension and fulness of abdomen.

Evening: fulness in abdomen < by smoking; pain in thighs <; general heat; sweat in bed.

All night: sweat lasting.

[39] **Temperature and Weather.** Warm stove: chill passes off.

Open air: dull headache >; tingling from elbows to fingers.

Google

In room: dull headache.
Cold water: headache <.

40 **Fever.** ‖Shivering on upper part of body, with yawning.
Shuddering without chill (like from hearing horrible tales), only on upper body.
‖‖Coldness of abdomen, especially on pressure with hand.
‖‖Chilly sensation in abdomen. θIntermittent.
‖Coldness of dorsal spine, with shaking.
General chill, which passes off near warm stove, remaining only on back.
‖Feet cold as far up as knees, as if they were in cold water.
‖‖Icy coldness of hands and feet, with warmth of rest of body.
‖Veins of lower arms and hands distended, while feet are icy cold.
‖Chilliness, especially of fingers and toes.
Heat without thirst.
Hot face, with cold hands and feet.
General heat in evening, most severe on head, attended with cold feet.
Sensation of heat, particularly in back, with intermingling coldness, particularly in abdomen.
Sweat in evening in bed immediately after lying down, frequently lasting whole night.
‖Intermittent fever, with chilliness in abdomen, lasting six days, when a disagreeable feeling of heat comes on, alternating or intermingling with chilliness, with cold feet and legs and slow pulse.
‖‖Paroxysm of fever daily at 9 A.M.; heat, thirst, restlessness and redness of face and eyes lasted till 3. P.M.
‖Irregular intermittent paroxysm consists chiefly of a cold stage which is incompletely developed, hands or ends of fingers, and toes or feet, and end of nose alone becoming very cold.

41 **Attacks, Periodicity.** Alternate: heat and chilliness.
Daily at 9 A.M.: fever.
Lasting from 9 to 3 P.M.: heat, thirst, restlessness and redness of face and eyes.
Lasting six days: intermittent fever, with chilliness.

42 **Locality and Direction.** Right: stitchlike tearing in side of forehead; twitching of facial muscles; testicle drawn up; sharp pain through upper side of chest; stitches in chest; muscular twitches in upper arm; thigh and leg jerked upward; cramplike pain in muscles of leg.
Left: stitches in side of brain; pain in side of forehead; paralytic feeling on side of throat; dull boring stitch in shoulder blade; dull boring sticking in scapula; cramplike pain in muscles of forearm.
From above downward: pressure in head.

Google

Sensations. As if some evil was going to happen; as if a weight pressed upon brain; as if cold wind was blowing on head; abdomen as if overloaded by food; as of incarcerated flatus; as if something had been stretched across ears; as if a thumb pressed on back; as if feet were in cold water.

Pain: in forehead; in articulation of jaw; in back.
Sharp pain: through middle of upper r. chest.
Jerking and pinching pain: in outer parts.
Stitchlike tearing: in r. side of forehead.
Paralytic tearing: in arms, hands and fingers.
External painful tearing: between scapulæ.
Stitching, contractive pain: in region of hip joint.
Stitches: in l. side of brain; in ears; in anterior region of larynx; in chest; in both sides; in region of heart.
Stinging, pinching pain: in limbs.
Stinging: in palate.
Burning pain: in forehead.
Pinching pain: in abdomen.
Cramplike pain: in muscles of l. forearm; in muscles of r. leg.
Cramplike drawing: in anterior portion of thigh.
Dull boring, sticking: in l. scapula.
Bruised pain: in small of back; in thighs.
External gnawing: on vertex.
Painful spasmodic jerking: of lower extremities.
Painful jactitation: of muscles of arm and little finger.
Muscular twitches: in r. upper arm.
Throbbing: in epigastrium.
Anxiety: about heart.
Compressive pain: in vertex.
Pressive, stupefying headache.
Dull pain: in head.
Tingling: in back; from elbows into hands and fingers.
Soreness: of abdominal walls.
Heat: of face; in head; in back.
Paralytic feeling: in l. side of throat.
Spasmodic stiffness: of arms; fingers.
Stiff feeling: in eyelids; in muscles of neck and throat.
Dryness: of palate; of throat.
Tension: in root of nose; in arms, hands and fingers.
Constriction: in stomach; in both sides of chest.
Pressure: in head; in eyes; in stomach; in both sides of chest; in back.
Heaviness: of head; in muscles of neck and throat.
Fulness: of abdomen.
Coldness: of abdomen; of dorsal spine; of hands and feet; of end of nose.

Google

Cold feeling: of head; in ears; extending up œsophagus; in abdomen; in feet and legs.
Chilly sensation: in abdomen; of fingers and toes.
Shivering: on upper part of body.

[45] **Touch. Passive Motion. Injuries.** Touch: spermatic cord painful; on back, makes pain disappear.
Pressure: pain in forehead >; coldness of abdomen >; pain in thighs >.
Hard pressure: > pressure in head.
| | Injuries to nerves.

[47] **Stages of Life, Constitution.** Child, æt. 22 months; intermittent fever.
Man, æt. 78; cramps in legs.
Man, æt. about 50; respiratory and heart trouble.

[48] **Relations.** Antidote: *Camphor.*
It antidotes chronic effects of *Cinchon.* and *Quinia.*
Compatible: *Capsic., Lycop., Pulsat., Rhus tox.*, which follow well.
Compare: *Mag. mur., Paris quad.* and *Pulsat.* in headaches; *Carbo veg.* and *Lycop.* in gastric symptoms; *Laches.* in chills and fever; *Calc. ostr.* and *Gelsem.* in icy cold feet and legs.

Google

MEPHITIS PUTORIUS.

Skunk. *Mustelidæ.*

The alcoholic dilution is prepared from the liquid contained in the glands of the animal.

Introduced by Hering; symptoms obtained from the 30th dilution, and from inhaling the substance while preparing the dilutions. Also proved, in 1853, by Cowley, through Neidhard, MSS. (not contained in Allen's Encyclopedia).

"If the facts collected since 1851, which are numerous, do not prove that Mephitis will supersede all other remedies in whooping cough, it certainly may be considered a valuable specific. In order to insure its full success, it should be exhibited in the lower dilutions, from one to three, at least in severe cases."—NEIDHARD.

CLINICAL AUTHORITIES.—*Spasm of glottis*, Searle, Raue's Path. and Therap., p. 338; *Asthma*, MSS.; *Cough*, Blake, Hahn. Mo., vol. 10, p. 375; *Pertussis*, Moore, N. E. M. G., vol. 4, p. 446; (23 cases), MSS., Neidhard, N. A. J. H., vol. 3, p. 504; Cushing (9 cases out of 10), MSS.; Knerr (numerous cases), MSS; *Sleeplessness*, Theobald, Org., vol. 1, p. 300.

[1] **Mind.** Fancies so vivid they unfit for labor.
Talkative, as if drunk; excited, with heat of head.
Angry about trifles or imaginary things.
‖ Disinclination to work, with inclination to stretch.

[2] **Sensorium.** Vertigo: sitting, stooping, turning in bed.
Numb and dull, with sensation as if head became enlarged, with ill humor and nausea.

[3] **Inner Head.** ‖ Pain above eyes; violent pain in head, as if a fulness was pressing upwards.
Fulness of forehead and front part of head.
Fulness in head, more on vertex, < from studying.
Headache while riding in a carriage.
Heaviness in back part of head, as if fingers were pressing on it.
Slight pain like pulsation or undulation in front part of head, l. side, > on stopping reading, < on writing steadily.
Strange feeling in r side of cerebellum.

[5] **Sight and Eyes.** Inability to read fine print.
‖ Letters become blurred, he is unable to discern them, they run together.
Weakness of sight, with headache and pain in eyes.
Pain in eyes: when turning them in certain directions; as from a foreign body; as from overexertion.

Google

Stitches in eyes as from needles.
Stinging and itching in eyes, evening and morning.
Inflammation of eyes and lids, especially r. side.
Redness of conjunctivæ.
Heat and burning of eyes.
Pressing on lids, with burning of margins as if a stye would form.

[6] **Hearing and Ears.** Fetid discharge from ears.
Erysipelas of ear, with itching, heat, redness and blisters.
Neuralgic pain in and about ears; deafness.

[7] **Smell and Nose.** Dry nose; bleeding from nose; swelling.
Fluent coryza, cough and soreness in chest.

[8] **Upper Face.** Bloated face.

[10] **Teeth and Gums.** Sudden jerks in roots of teeth; strumming toothache.
Pains in hollow back teeth.

[11] **Taste and Tongue.** Taste in mouth: coppery; as after eating onions.
Want of sensation in tongue.

[14] **Appetite, Thirst. Desires, Aversions.** Wants every dish very much salted.
No appetite in morning.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea, with emptiness in stomach and sensation as if head was distended.

[17] **Scrobiculum and Stomach.** Pressure in stomach, with colic.

[18] **Hypochondria.** Rheumatic pain in region of liver.
Pain under short ribs.

[19] **Abdomen.** Colic from cold, > near warm stove.

[20] **Stool and Rectum.** Stool infrequent but thin.

[21] **Urinary Organs.** Difficulty in urinating, all day; stream interrupted.
Frequent micturition: with clear urine; with rheumatic pain; with chill.
Urine turbid in morning, after evening fever.

[22] **Male Sexual Organs.** Dwindling of testicles from masturbation.
Heat of genitals at night.
Itching of scrotum.

[23] **Female Sexual Organs.** Burning leucorrhœa.
Soreness of genitals and swelling of labia and uterus.

[25] **Voice and Larynx. Trachea and Bronchia.** When drinking or talking, liability to have something get into larynx.

[26] **Respiration.** Asthma: as from inhaling vapor of sulphur; in sleep; of drunkards.

Inhalation difficult, exhalation almost impossible, or barking.

‖Suffocative feeling, with inability to exhale; bloated face and convulsions. θSpasm of glottis.

‖When drinking or talking, liability to get foreign substance into throat. θAsthma thymicum.

‖Asthmatic paroxysm at night on lying down, also sometimes waking him in morning; at 10 P.M. had to sit up in bed, got to sleep at 12 P.M., but was wakened by paroxysm exactly at daybreak; had to get up and walk about, whereby a slight cough was excited, the more he coughed the worse the breathing became, but each cough brought up a little transparent phlegm, like white of egg, with sourish taste; urine turbid on standing a few minutes, of fetid smell and depositing brickdust sediment; sensation during paroxysm as from inhaling fumes of sulphur, and a general oppression of front part of chest, especially behind upper part of sternum; < from ice water, wine, horseback riding. θAsthma.

[27] **Cough.** Cough: after drinking, talking or loud reading; with fluent coryza and soreness in chest; spasmodic, hollow or deep, with rawness, hoarseness and pain through chest; with suffocative feeling when inhaling; cannot exhale; vomits all food some hours after eating; bloated face; convulsions; < at night and after lying down; in morning it is loose, with some expectoration.

‖Whooping or any kind of cough which is very violent, coming on spasmodically, and seeming as though each spell would terminate life.

‖Spells day and night; child must be raised, gets blue in face and cannot exhale; convulsions; fetid diarrhœa.

‖‖Eight or more paroxysms of cough every night; rattling of phlegm during cough, with vomiting after eating.

‖‖After slight catarrh, whooping cough; during day cough slight, but in night paroxysm every ten minutes, with frequent vomiting and fever.

‖Spasmodic cough of phthisical girls (where *Dros.* failed).

[28] **Inner Chest and Lungs.** Pains in chest (last l. short rib) when touching it; when coughing and sneezing.

Strange feeling like that produced in throat when taking the preparation is felt in r. lung and hypochondrium.

[31] **Neck and Back.** Stitches in spinal column during motion.

Pain in back and all limbs, with lameness.

Tension and pain in r. side of neck.

[32] **Upper Limbs.** Sensation in r. arm, over deltoid muscles, similar to that produced by substance on throat.

Rheumatic pains in arms, > on motion.

Restlessness in l. arm, with sensibility.

Google

Trembling of arm when leaning on it.
Painful twitching of l. hand.
Feels impelled to stretch fingers and make them crack.

[33] **Lower Limbs.** ‖Rush of blood to legs on getting awake at night.
‖Rheumatic pains from hips to feet; arthritic pain in heel.
‖Legs restless as if becoming insensible; knees feel bruised.
Peculiar spasmodic pain in l. foot.
Stitches in feet.
Pain in big toe as if being pinched off.
‖Burning and pains in corns.

[34] **Limbs in General.** Rheumatic wandering pains in limbs, with much pressure to urinate and shocks.
Stretching of limbs.

[35] **Rest. Position. Motion.** Lying down: asthmatic paroxysm; cough <.
Had to sit up in bed: asthmatic paroxysm.
Child must be raised: whooping cough.
Sitting: vertigo.
Stooping: vertigo.
Leaning on arm: trembling in it.
Motion: stitches in spinal column; rheumatic pains in arms >.
Turning in bed: vertigo.
Stretching of limbs.
Had to get up and walk about: asthmatic paroxysm.
Disinclination to work, inclination to stretch.

[36] **Nerves.** ‖Very fine nervous vibrations, causing great uneasiness.
Convulsions.
Inclination to stretch one's self, with disinclination to do anything.
Restlessness.
‖Lameness, especially with the pains.

[37] **Sleep.** Frequent yawning; lachrymation.
‖Extremely sleepy in morning, during day, even in company.
Cannot sleep whole night.
‖Sleeplessness from "fidgets" in l. side, both legs and arms.
‖Nightmare.
‖Awakens in night with congestion to legs.
Night walking, open eyes, angry gestures; hair on head rises, cannot be made conscious.
Vivid dreams which he recollects.
Asthma during sleep; not waking; continues after he has waked up.

[38] **Time.** Morning: stinging and itching in eyes; no appetite;

Google

urine turbid; asthma waking him; cough loose; extremely sleepy; increased warmth.

Day: occasional spells of whooping cough; cough slight.

All day: difficulty in urinating; extremely sleepy.

Evening: stinging and itching in eyes; fever; chilliness.

Night: heat of genitals; asthmatic paroxysm; cough <; spells of whooping cough; on getting awake rush of blood to legs; cannot sleep.

10 P.M.: asthmatic paroxysm; got to sleep at 12 P.M., but was wakened by paroxysm exactly at daybreak.

[39] **Temperature and Weather.** Warm stove: colic from cold >.

Feels less chilly in cold weather; feels pleasant after ice cold washing.

Ice water: asthma <.

[40] **Fever.** Cold feeling predominates; evening chilliness, with desire to urinate; colic as if diarrhœa would set in.

| | Increased warmth, especially in morning.

[41] **Attacks, Periodicity.** Every ten minutes: paroxysms of cough at night.

Every night: eight or more paroxysms.

[42] **Locality, Direction.** Right: strange feeling in side of cerebellum; inflammation of eyes and lids <; strange feeling in lung; tension and pain in side of neck; sensation in arm over deltoid muscles, similar to that produced by substance on throat.

Left: undulation in side of front part of head; pains under short ribs; restlessness in arm; painful twitching of hand; peculiar spasmodic pain in foot; "fidgets" in side.

[43] **Sensations.** Strumming through body; anxiety.

Feels as if threads had been drawn through head and trunk.

Wandering pains with pressure to urinate.

Fine nervous vibrations in bones.

A kind of burning feeling as from raw onions, in stomach, nose, head, r. arm, r. lung and down œsophagus.

As if head became enlarged; as if a fulness was pressing upwards in head; as if fingers were pressing on back of head; pain as from a foreign body in eyes; as from overexertion; stitches in eyes as from needles; as if a stye would form; as if head was distended; as if inhaling vapor of sulphur; legs as if becoming insensible; as if big toe was being pinched off; as if diarrhœa would set in.

Pain: above eyes; in eyes; in hollow back teeth; under short ribs; through chest; in back and all limbs; in r. side of neck; in big toe; in corns.

Violent pain: in head.

Digitized by Google

Stitches: in eyes as from needles; in spinal column; in feet.
Neuralgic pains: in and about ears.
Rheumatic pain: in region of liver; when urinating; in arms; from hips to feet; wandering, in limbs.
Arthritic pain: in heel.
Spasmodic pain: in l. foot.
Slight painlike pulsation in front part of head.
Painful twitching: of l. hand.
Sudden jerks: in roots of teeth.
Stinging and itching: in eyes.
Soreness: in chest; of genitals.
Burning: of eyes; of margins of eyes; in corns.
Heat: of eyes; of ears; of genitals.
Pressure: in stomach.
Fulness: of forehead and front part of head; in head.
Heaviness: in back part of head.
Tension: in r. side of neck.
Pressing: on lids.
Lameness: in back and limbs.
Suffocative feeling: in larynx.
Strange feeling: in r. side of cerebellum; in lungs.
Restlessness: in l. arm.
Fidgets: in l. side, both legs and arms.
Trembling: of arm.
Itching: of ears; of scrotum.

[46] **Touch. Passive Motion. Injuries.** Touch: on last short ribs, pain.
Riding in a carriage: headache.
Horseback riding: asthma <.

[46] **Skin.** Pimples on thighs, forehead, face, neck and nates.

[47] **Stages of Life, Constitution.** Baby, æt. 20 mos.; pertussis.
Boy, æt. 1; pertussis.
Child, æt. 2; pertussis.
Boy, æt. 3; pertussis.
Boy, æt. 4; pertussis.
Girl, æt. 6; pertussis.
Boy, æt. 6; pertussis.
Boy, æt. 6; pertussis.
Two children, æt. 8½ and 5½; pertussis.
Girl, æt. 9; pertussis.
Man, æt. 26; bilious temperament, while in army two years previously had suffocative catarrh; asthma.

[48] **Relations.** Compare: in asthma, *Drosera*, *Rumex* and *Sticta*; in pertussis, *Coral. rubr.* and *Drosera*; in vertigo, *Carbo veg.*; in loquacity, *Amanita* (*Agaric.*) and *Laches.*; in effects on nervous system generally, *Castor.* and *Moschus*; in chorea, with fidgety feet and legs, *Act. rac.*, *Amm. carb.*, *Arsen.*, *Asaf.*, *Aurum*, *Sticta* and *Tarent.*

Google

MERCURIALIS PERENNIS.

Dog Mercury. *Euphorbiaceæ.*

A plant indigenous to Europe, where it grows in shaded, mountainous forests, on stony, moist ground.

The tincture is prepared from the fresh plant in flower.

Introduced and carefully proved, upon fifteen provers, by Hesse, published in Stapf's Archives, 1844, reprinted by Trinks in 1847, extracted by Possart in 1851. Suggestions were published by Russell and Duncan, but not a cure was heard of until 1860, when Coxe, Jr., reported a case of tumor, MSS. In 1875 Berridge reported cures of headaches corroborating symptoms of Hesse.

CLINICAL AUTHORITIES.—*Headache* (two cases), Berridge, Raue's Rec., 1872, pp. 214, 215; *Hyperæmia of conjunctiva; Conjunctivitis trachomatosa with pannus; Asthenopia*, Norton's Ophthal. Therap., p. 113; *Tumor in epigastrium*, Coxe, MSS.; *Intermittent fever*, Price, Med. Inv., vol. 2, p. 322.

[2] **Sensorium.** Head confused as if inflated.

Near fainting, with dysmenorrhœa; dulness and stupefying sensation.

Vertigo: on going down stairs; after walking some time; succeeding headache, as if intoxicated, and obliging her when stooping to hold on to something to prevent falling; towards l. when sitting, standing or even lying, feeling as if body would fall to that side.

[3] **Inner Head.** [1]Tension and heaviness of head, with sensation of heat.

Heaviness in head, as if pressed down by a weight.

Heat in heat: with dysmenorrhœa; with vertigo.

Tearing in l. temple.

[1]Shooting in l. forehead and temple, < on coming indoors; only by day, till last night, when it prevented sleep; vertigo on stooping, as if she did not know where she was; the shooting goes obliquely downwards and somewhat backwards; vomits food as soon as eaten. θHeadache.

[1]Aching in forehead, > by cold and pressure; aching in nape; numbness of occiput and vertex; weakness of arms and legs, as if she would fall to l., without vertigo; after a blow upon head. θHeadache.

Violent headache and fainting weakness, with dysmenorrhœa.

[4] **Outer Head.** Burning on vertex.

Google

‖Scalp feels tense and numb, is moved with difficulty.
‖Numbness of occiput and vertex after a blow on head.

[4] **Sight and Eyes.** ‖Dilated pupils with great sensitiveness of eyes to light.
‖Blinking of eyes, in open air and sunlight; snow makes her blind.
‖Pain in eyes reading and writing, letters run together.
‖Dryness of eyes.
‖Hyperæmia of conjunctiva after using eyes, with heaviness of lids.
‖Conjunctivitis trachomatosa with pannus; pannus slight; felt very sleepy; lachrymation and blurring of vision in morning.
‖Asthenopia; sensation of dryness in eyes and heaviness of lids; sensation as of a mist before eyes in morning; burning pain in l. eye, < in evening and after using.
‖Twitching of upper lids, especially of l. eye.
‖On waking at night unable to open lids immediately; they seemed paralyzed and could not be opened until she rubbed them.
‖Weakness of upper lids, so that at times she could not completely raise them.
‖Lids heavy and dry.
‖Watery eyes.

[6] **Hearing and Ears.** Ears as if stopped up.
Pressing and tearing in ears; earache.

[7] **Smell and Nose.** ‖Breath from nose first hot, then cold.
Crawling and burning of nose.

[8] **Upper Face.** Feeling of tension in face and head.
Face feels cold, later warm and puffed.
Dark red cheeks.

[9] **Lower Face.** Lips very dry and parched, with increased thirst.

[10] **Teeth and Gums.** ‖Tearing toothache.

[11] **Taste and Tongue.** Tongue: feels paralyzed, heavy and thick; numb, insensible, as if unable to taste.
‖Burning and smarting on tongue.
‖Sticking burning on tongue, as from a blister.
‖Tongue painful if it touches palate, as if there were blisters on it.

[12] **Inner Mouth.** Great dryness of mouth; want of saliva so great that a piece of sugar does not dissolve.
‖Burning in mouth and tongue.

[13] **Throat.** Burning dryness in throat.
‖Ulcers on palate, tonsils and back wall of pharynx.

[14] **Appetite, Thirst. Desires, Aversions.** Increased thirst, with dry lips and mouth.

[15] **Eating and Drinking.** While eating, great dryness in mouth.

Google

After eating: bread and butter, biting burning on tongue; increasing nausea; vomiting.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea and heartburn, with bitter taste.

Belching relieves complaints of stomach and abdomen.

‖Vomits food as soon as eaten. θHeadache.

[17] **Scrobiculum and Stomach.** Chilly feeling in stomach, followed by warmth and sweat.

‖Tumor inside of pit of stomach, size of hen's egg, sensitive to pressure, cannot bear clothing.

[19] **Abdomen.** Abdominal pulsation.

[20] **Stool and Rectum.** Urging or burning in anus, with aching in small of back

Crawling in anus and bearing down in sacrum.

[23] **Female Sexual Organs.** ‖Menses shorter, with abdominal cramps; too late.

‖Dysmenorrhœa.

[24] **Pregnancy. Parturition. Lactation.** Mammæ swollen and sore to touch, a few days before retarded catamenia.

[26] **Respiration.** Breathing: difficult, with dysmenorrhœa; with chilliness.

[28] **Inner Chest and Lungs.** Violent orgasm and heat in chest, with dysmenorrhœa.

[29] **Heart, Pulse and Circulation.** Confused undulating sensation in cardiac region, with fulness and feeling of anxiety in l. chest.

Oppressive contraction in cardiac region.

Peculiarly undulating and throbbing motion in cardiac region, in præcordia and upper part of abdomen.

Remarkable rolling and throbbing, with trembling and undulating in all bloodvessels, without heat.

Repeated palpitation of heart, with oppression after having stooped, or as if heart was tightly laced.

Orgasm in region of heart.

Pulse frequent and full.

[31] **Neck and Back.** ‖Aching in nape. θHeadache.

Flashes of heat in back.

[32] **Upper Limbs.** ‖Veins of hands distended. θAgue.

[33] **Lower Limbs.** Painful ache in knees.

[34] **Limbs in General.** Tearing pains in limbs, with weariness.

‖Weakness of arms and legs as if she would fall to l., without vertigo. θHeadache.

Heaviness in limbs, with dysmenorrhœa.

[35] **Rest. Position. Motion.** Lying, sitting or standing: vertigo towards left.

Stooping: must hold on to something to prevent falling; oppression of heart.

Walking: vertigo.

Google

Going down stairs: vertigo.

[36] **Nerves.** Trembling, with dysmenorrhœa.

As if she would fall, without vertigo.

[38] **Time.** ‖Only by day, for a week, then all night preventing sleep: headache.

More coldness and chilliness in evening; heat < at night and in morning.

In evening sight more affected, in morning eyes.

Morning: lachrymation and blurring of vision; as of a mist before eyes; perspiration.

Evening: burning pain in l. eye; on going to bed, chill.

9 P.M.: chill in stomach.

Night: headache; on waking, unable to open eyes; heat with thirst.

After midnight: offensive perspiration on both sides.

[39] **Temperature and Weather.** Indoors: shooting in forehead and temple.

In open air: blinking of eyes.

Cold: aching in forehead >.

[40] **Fever.** ‖Chill in stomach at 9 P.M., which extends to r. arm, r. side of chest, abdomen and r. hip, with difficulty of breathing.

Cold over whole body, emanating from r. side, particularly from r. arm; shuddering, great debility, sleepiness.

‖Gooseflesh on cold r. arm, extending over whole body; after midnight offensive perspiration on both sides, particularly on arms.

‖Cold over whole body, with hot flush in face; must be warmly covered, then sleeps and perspires.

On going to bed in evening, chill; during night and towards morning heat, with intense thirst; perspiration in morning.

‖Heat, with distended veins on hands.

Heat in whole body, anxious sweat breaks out from time to time, with dysmenorrhœa.

‖Perspiration over whole body, from 3 A.M. till towards morning, after good sleep.

‖Chill, beginning in r. arm and r. side of chest (had taken quantities of quinine). θIntermittent fever.

[41] **Attacks, Periodicity.** From 3 A.M. till towards morning: perspiration over whole body.

[43] **Locality and Direction.** Right: chill from stomach to side of chest and hip; coldness over whole body emanating from side, particularly arm; gooseflesh; chill beginning in arm and side of chest.

Left: vertigo towards that side; tearing in temple; shooting in forehead and temple; burning pain in eye; twitching of upper lid; anxiety in chest.

Digitized by Google

Obliquely downwards and upwards: shooting in head.

" **Sensations.** Head confused as if inflated; as if intoxicated; as if body would fall to l. side; as if head was pressed down by a weight; as if she did not know where she was; as of a mist before eyes; ears as if stopped up; burning as from a blister on tongue; as if heart was tightly laced.

Pain: in eyes; in ear.
Violent pain: in head.
Tearing: in l. temple; in ears; in teeth; in limbs.
Shooting: in l. forehead and temple.
Aching: in forehead; in nape; in small of back; in knees.
Cramps: in abdomen.
Bearing down: in sacrum.
Rheumatic pains: in head and limbs.
Burning pain: in l. eye.
Sticking burning: on tongue.
Biting burning: on tongue.
Smarting: on tongue.
Burning: on vertex; of nose; on tongue; in mouth; in anus.
Burning dryness: in throat.
Heat: in head; in chest; in hands; in whole body.
Flashes of heat: in back.
Painfulness: of tongue.
Pressing: in ears.
Oppressive contraction: in cardiac region.
Twitching: of upper lids.
Remarkable rolling and throbbing, with trembling and undulating: in all bloodvessels.
Confused, undulating sensation: in cardiac region.
Anxiety: in l. chest.
Tension: in head; in scalp; in face.
Heaviness: in head; of lids; of tongue; in limbs.
Fulness: in l. chest.
Dulness: in head.
Stupefying sensation: in head.
Numbness: of occiput and vertex; in scalp.
Weakness: of arms and legs; of upper lids.
Dryness: of eyes; of lips; of mouth.
Crawling: of nose; in anus.
Chilly feeling: in stomach.
Cold feeling: in face.

" **Tissues.** Rheumatic affections, acute, subacute or chronic, particularly when pericardium or heart are sympathetically affected; rheumatic affection of muscular coats of stomach, of intestinal canal and bladder; rheumatic pains in head and limbs, accompanied by disturbance

Google

of vision or with a melancholic or hypochondriacal mood.

" **Touch. Passive Motion. Injuries.** Forehead, temple and upper part of face and stomach sensitive to touch.

Touch: mammæ sore.

Pressure: aching in forehead >; tumor in pit of stomach sensitive.

Rubbing: made it possible to open eyes.

After a blow upon head: headache; numbness of occiput and vertex.

" **Relations.** Antidoted by: *Acon., Bellad.*

MERCURIUS.

Mercurius Solubilis et Vivus. The Black Oxide and the Element.

Mercurius solubilis was introduced by Hahnemann and proved upon himself, Gross, Gutmann, Fr. Hahnemann, Hartmann, Hornburg, Langhammer, Rummel and Stapf (Mat. Med. Pura), also in a fragmentary way by Knorre (Allg. Hom. Ztg., vol. 6, p. 35), Robinson (Br. Jour. of Hom., vol. 24, p. 516), Crocker, reported by Berridge (Med. Inv., N. S., vol. 1, p. 101).

The symptoms of the *solubilis*, obtained by regular proving, and the effects of the *vivus*, gathered from toxicological reports carefully sifted and clinically verified, are sufficiently simular to be placed under one arrangement. Virtually the action of the two remedies appears to be the same, and they have not always been distinguished in clinical reports, but in all known instances the symptoms of the two preparations are rendered distinguishable by the letters s. and v.

' **Mind.** | | Unconsciousness.
‖ Memory weak; forgets everything.
| | Loss of will power. v.
‖ Slow in answering questions. v.
| | Intellect very weak; shows every mark of imbecility. v.
| | Absentmindedness.
| Time seems to pass more slowly.
| | Embarassment.
| Obtuseness of mental operations, with great inclination to sleep; heaviness and muddledness of head. θ Typhoid.
| Imbecility; foolish, mischievous, disgusting actions.
| | Fancies; rarely delirium.
| Delirium and mental derangement of drunkards. v.
| Muttering delirium. v.
| Believes he is losing his reason, thinks he is dying, with illusions of fantasy; sees water running where there is none. s.
| | Mania, with liver complaint.
| | Great restlessness as if he had committed a great crime; has no desire for food, although he relishes it when commencing to eat; considers everybody his enemy; ideas constantly crowd upon his mind, one constantly chasing the other away; great inclination when walking to take people by the nose; weakness of memory and intellect;

Digitized by Google

dull and stupid feeling in head; complains that his head will burst. θMania.

‖‖Almost uncontrollable desire to travel far away.

‖‖Desire to flee, with nightly anxiety and apprehension.

‖‖Homesickness, or desire to travel; wants to go abroad; nightly anxiety and perspiration.

‖After suppression of foot sweat, whenever he sees an open window or a cutting instrument breaks into a sweat, with great heat of head, and is seized with an almost uncontrollable desire to commit suicide.

‖Desire to kill the person contradicting her.

‖Great desire to murder or commit suicide, particularly during menstrual period; despondency; involuntary crying; great indifference; is fearful that she may commit some wrong and kill herself; something urges her to kill her husband, of whom she is very fond, and she implores him to hide his razor.

Continuous moaning and groaning.

‖‖Hurried and rapid talking. s.

‖Excited, lively; everything is done hastily. v.

‖‖Taciturn and indifferent.

‖‖Fear of being alone.

‖Anxiety and restless change of place; ebullitions, sweat; apprehensive, imaginary fears; fears he will lose his mind; < evening and night.

‖Anxiety and apprehension; did not know what to do; it seemed as though he had committed a crime; without heat; also with a feeling that he had not control over his senses. s.

‖Anxiety driving her to suicide; thoughts of suicide; during menses great anxiety from which she cannot free herself; desire for death; great indifference even to those she formerly loved; crying almost involuntary, with relief; hysteria; hypochondriasis.

Disgust of life.

‖‖Much wretchedness and dejection of spirits, with diarrhœa. s.

‖Hysterical melancholia, with inclination to murder.

‖Inexpressible pain of soul and body, anxious restlessness, as if some evil impended, < at night, with præcordial anguish; sweat of hands and heat of face; disgusted with himself, has not courage to live; constant suspicion, considering everybody his enemy. θMelancholia.

‖Grief, with fear at night: disposition to quarrel; complaining of relations and surroundings.

‖‖Amativeness; amorousness.

‖Morose and mistrustful; treated his associates almost insultingly, looked upon every one as his worst enemy. s.

Google

Great restlessness, must constantly change her place; fear, with desire to escape, as if she had committed some crime. θHysteria.

A universal uneasiness of body, so that he could not remain one moment in the same posture. v.

Towards evening, an uneasiness that did not permit him to remain in any place; could not remain sitting two minutes; was forced to change. s.

No rest in any place, constantly anxious. s.

Extreme restlessness all night, beginning about 8 P.M., and lasting till morning. s.

Bad effects from fright, leaving one in a state of great anxiety, < at night.

Ailments from mortification; from insults; from egotism.

[2] **Sensorium.** Sopor; coma. v.

Fainting after sweetish rising in throat, followed by sleep.

Dull and stupid feeling, with dizziness.

Confusion of head, in morning on waking. s.

Weakness in head like a dulness, and as if there was a vibration in forehead and a turning about in a circle. s.

Constant rotary motion of head, even when lying on pillow. v.

Vertigo: as if in a swing; after stooping; lying on back; with headache and nausea; everything turns black; with nausea, distracted thoughts, momentary loss of vision; cannot stand erect, or even sit up in bed for fear of falling.

Prophylactic in apoplexy, in lymphatic, or leuco-phlegmatic, ill nourished subjects.

[3] **Inner Head.** Tension over forehead, as if bandaged o in a hoop; < at night in bed; > after rising or when laying hand on it.

Pressure in forehead and pain in bone beneath eyebrow, even to touch. s.

Pains in forehead, with disordered liver.

Pressive or tearing pain in l. temple. s.

Burning in head, especially in l. temple; < at night lying in bed, > sitting up.

Stitches through whole head.

Tearing, burning, stitching, boring or semilateral tearing down to teeth and neck, with stitches in ears.

Tearing, drawing pains in head having their seat in periosteum and in bones of face; rheumatic headaches.

Headache as if just beneath scalp, as if it were too heavy and tight in brain. s.

Catarrhal, rheumatic or syphilitic headaches.

Violent headache. θYellow fever.

Chronic cephalalgia. with suicidal tendency, caused by

suppression of foot sweat; pressing or stitching pains in head, < in forehead, only during day.

‖‖Congestion to head; head feels as if it would burst, with fulness of brain; as if constricted by a band.

‖‖Head feels as if in a vise, with nausea; < in open air, from sleeping, eating and drinking; > in room.

‖Head feels heavy and swollen; as if getting larger and larger.

‖Heaviness of head, vertigo when raising head, with nausea and vomiting; child wants to lie quietly in horizontal position; somnolence, indifference, with mournful expression of face; diminution of all intellectual faculties; amblyopia; weakness and paralysis of extremities; convulsions. θHydrocephaloid.

‖Inflammation of brain, with hooplike feeling; burning and pulsation in forehead; < at night, > after riding.

‖Lies in a dull, sleepy condition, from which he occasionally awakes without regaining complete consciousness; restless at night; anxious dreams; delirious talk; face pale, distorted; head hot; forehead moist; eyes dim, pupils contracted, conjunctivæ injected; speech unintelligible on account of dryness of tongue; lips dry; temperature of skin elevated; pulse 114; urine thick, ammoniacal; constipation. θInflammation of brain. v.

‖Drowsy, with restless throwing about and occasional waking with shrill cry, which is again followed by dozing off; sensitiveness of eyes to light is diminished; squinting. s. θMeningitis.

‖Acute hydrocephalus after severe attack of scarlet fever; every quarter or half hour; terrible continuous shrieking for one or two minutes; frequently moves r. hand towards head, or thrusts hand into wide opened mouth, l. arm remaining motionless; frequent chewing motion of mouth; strabismus; sopor; high fever, pulse cannot be counted; involuntary urination. v.

‖For two years indications of hydrocephalus; head large, hanging forward; anterior fontanelle open; forehead protruding; eyes sunken; pupils enlarged; face earthy, œdematous; constant flow of saliva; teeth small; impatient desire for food. (*Bellad.* and *Phos.* also used.)

‖Brain troubles of drunkards.

‖Apoplexy, from effusion or congestion.

Outer Head. ‖Sutures open, large head; precocious development; restless sleep; dirty color of face; sour night sweat; body bathed in sweat. θHydrocephalus.

‖All sutures pressed asunder, not a single border of a bone touches its neighbor; even eyes appear unusually protruded. θHydrocephalus.

‖‖Exostoses, with feeling of soreness when touched; pain at night in bed.

‖Lacerating, tearing and stinging in bones of skull.

‖‖Whole external head painful to touch. s.

‖Multiple abscesses of head; rachitic, anterior fontanelles open; large abdomen; fever, loss of appetite, diarrhœa; great weakness, cannot sit up despite pain caused by lying down. s.

‖Several days after birth, swelling over parietal bone near posterior fontanelle, resembling half a goose egg in form and size, fluctuating upon pressure and circumscribed by a ring of swollen bone. θCephalæmatoma.

‖‖Scalp: tense; contractive, tearing pain from forehead to neck, with chilliness; painful to touch, < when scratching, which causes bleeding; eruption itching, dry, humid, pustular, fetid, with yellow crusts; erysipelas < on forehead; hair falls out, mostly on sides and temples; sweaty.

‖Fetid, sour smelling, oily sweat on head; on forehead it is icy cold; burning on skin; < at night in bed and after rising.

‖Moist eruption on scalp that eats away hair, with sensitive pressure, especially in sore places. s.

‖Small elevated scabs between hairs on scalp. s.

‖On forehead, between eyebrows, small patches of pustular eruption, with greenish yellow scabs. θImpetigo.

‖Profuse falling out of hair, mostly on sides of head and temples. v.

Sight and Eyes. ‖‖Worse from heat and glare of fire; also from daylight. s.

Optical illusions: in dark colors; in green colors; black points; muscæ volitantes; mistiness; cloud; fiery sparks; letters seem to move.

‖Eyes dim, lustreless; bleareyed.

‖For one year, failing sight; frequent temporary loss of vision; even when not using eyes there are always dark spots or a kind of cloud before sight, constant lachrymation and aching pressing pain in eye; she cannot bear light of fire. θAmblyopia.

‖Scotoma of r. eye after a fall, with dimness of vision, constant flickering before eye and floating black specks.

‖‖If she attempts to look at anything cannot distinctly recognize it, and then eyes are almost always involuntarily drawn together; the more she tries to restrain the contraction, the less able she is to prevent it; is obliged to lie down and close eyes. s.

‖‖Eyes forcibly drawn together, as if long deprived of sleep. s.

Google

Fog before one or both eyes. s.
Dimness of vision; vision weak. v.
Heat in eyes and lachrymation. s.
Burning in eyes; itching. s.
Pressure in eyes. s.
Eyes hot, a kind of dry heat. s.
Heat, redness and pressure in both eyes. s.
Stitches in eyes.
Choroiditis.
Iritis; syphilitic; pains around eyes, on forehead and temples; < from touch; throbbing shooting pains in eye; hypopion; pains severe, tearing, boring, cutting, < at night and in damp weather; much heat around eye and soreness of corresponding side of head; great sensitiveness to heat, cold and light; acrid lachrymation; pupil contracted and covered by thin bluish film, with great tendency to formation of adhesions to lens; iris discolored, ciliary injection.
Tearing pains in forehead and vertex; shooting from deep within eye; < every evening and night; conjunctiva of r. eye greatly inflamed and swollen; phlegmonous inflammation and swelling of lids which are painful to slightest touch; great photophobia; flow of hot tears from eye; white ring around cornea; iris brown, greenish (blue in health); pupil fixed; iris inflamed and at later stage became shaped like that of ruminating animals; fever; sleepless at night on account of pain; profuse sweats without relief; every night at 12 o'clock, intolerable pains in eye almost exhausting him; offensive odor from mouth; much expectoration of mucus; pappy taste; tenesmus; patient gouty.
Episcleritis.
Sclerotic swollen and very red; cornea dim and showing indications of beginning formation of pus; vertigo; slimy mouth; white coated tongue, yellow towards base; loss of appetite; great thirst; chilliness, with heat and congestions to head; tendency to sweat; steaming or moist skin; transient stitches in body and limbs; restless and sleepless at night.
Cornea dim, red, surrounded by puffy swelling like raw meat; burning; light dazzles; it seems to him as if sparks of fire were being emitted from eyes; stitches deep in eyes and in temples; eyelids dry and swollen; l. eye <.
Ulcers of cornea vascular and surrounded by greyish opacity; pus between corneal layers; onyx.
Pustule on cornea, with photophobia and lachrymation;

Google

when eyes are well has noises in ears, and when eyes are sore top of head is so sore she cannot comb her hair; profuse watery coryza excoriating nose. s.

Keratitis pustulosa; pain in eye day and night, conjunctiva much congested, burning lachrymation; excessive photophobia, eruptions around eye; < at night; bad breath in morning; wants to sleep by day and cannot at night; pain in bones at night; sharp sticking pains, < at night after gaslight. s.

Vesicles on margin of cornea, eyes feel < at night, watery eruption on face, hair falls out, nose swollen internally, cracked and unhealthy. s.

Lachrymation profuse, burning and excoriating.

Muco-purulent discharges, thin and acrid.

Lids are spasmodically closed, thick, red, swollen, excoriated, very sensitive to heat, cold and contact.

Lachrymation and photophobia (noises in ear disappear when eyes become sore); top of head so sore she cannot comb her hair. θKeratitis pustulosa.

Keratitis parenchymatosa, due to hereditary syphilis.

Keratoiritis, with hypopion, pain very severe at night, eye feeling as if it was a ball of fire, lachrymation hot.

Inflammation of eyes; cornea covered with scars from old ulcerations; scleral vessels injected, especially between insertion of recti muscles, where sclera is slightly bulged and thinned, so that dark color of choroid shines through; steady aching, < at night. θEpiscleritis.

Syphilitic iritis; condylomata in iris; hypopion; contraction; discoloration and immobility; ciliary injection, haziness of aqueous; pains of a tearing, boring character, chiefly around eye, in forehead and temples, which are sore to touch; throbbing, shooting, sticking pains in eye; all < at night.

Retinitis and choroiditis, particularly if dependent upon syphilis; retina very sensitive in glare.

Diseases of optic nerve and retina, occurring in workers in foundries.

Great opaqueness, violent pain, dacryorrhœa, photophobia, swelling of lids. θKeratitis vasculosa. s.

Ophthalmia neonatorum; discharge acrid, usually thin, makes cheek sore; particularly if caused by syphilitic leucorrhœa.

Purulent ophthalmia, with copious discharge; lids much swollen, underneath much purulent matter which pours out in quantities on opening eyes. s.

Rheumatic, arthritic, syphilitic or gonorrhœal ophthalmia.

Lids swollen; sensation of a body causing dull pressive or cutting pains underneath lids, with difficulty in mov-

Google

ing them; daylight or candlelight insupportable and causes burning, gnawing pains in eyes which are moderately red, so that lids are closed convulsively, and can with difficulty be opened; lids agglutinated with raw pain at their edges.

▮Eyelids swollen; lids and cheeks covered with a pustular eruption; dried pus hangs upon eyelashes; greyish white spots upon corneæ; photophobia, lies upon face; nose and lips swollen; copious, thick, green, acrid discharge from nose, excoriating nose and upper lip, back of hand and forearm, upon which child wiped its nose, corroded; glands of ears swollen; irritable, impatient, disposed to cry. θScrofulous inflammation of eyes.

▮Chronic syphilitic ophthalmia; vessels of conjunctiva injected and distended; pupil linear and contracted, and anterior and posterior chambers of eyes appeared quite confused; objects appear quite small and indistinct; feathers appear to come from angles of eyes and hinder vision; myopia; frequent attacks of cramp in stomach in all phases of the moon, and on least atmospheric variation or immediately after some unusual pleasureable or painful impression; stiffness of maxillary joint, and pain in sole of foot, could with difficulty chew and could not bear to walk; can scarcely keep in erect position, bone pains at night preventing sleep; must be turned in bed by means of a sheet.

▮Eyes inflamed, with swollen inverted tarsi and very sensitive to light. v.

▮Pustules on conjunctiva.

▮▮Conjunctivitis pustulosa after measles; scrofula, with enlarged cervical glands.

▮Great swelling of lids, sensibility to touch, < before midnight, no > from sweat. θBlenorrhœa of conjunctiva.

▮Chronic conjunctivitis, with a fine, rosy red injection around cornea. v.

▮▮Pressure in eyes as from sand.

▮Burning pains, lachrymation acrid, photophobia, sensitiveness to extreme heat or cold very marked, especially heat of "glaring fire" and coldness of damp places θGranular conjunctivitis.

▮Pupils dilated. s.

▮Biting and burning in eyes, especially in open air.

▮▮Cutting, stinging or aching pains in eyes, especially when exerting them.

▮Great swelling, redness and constriction of lids; they are sensitive to touch; upper lid tight and red like a stye.

▮Inflammatory swelling in region of lachrymal bone.

▮Eyes close forcibly, whether sitting, standing or walking.

Google

Lids: spasmodically closed; erysipelatous; sensitive to cold, heat and to touch; raw excoriated; burning as from fiery points.

Blepharitis: lids red, thick and swollen, particularly upper; sensitive; lachrymation profuse, burning, acrid, making lids sore, red and painful; < in open air or by constant application of cold water.

Ciliary blepharitis caused from working over fires or forges.

Inflammation or blenorrhœa of lachrymal sac.

Cutting under lid, as from a sharp body.

Edges of lids covered with scurfs and ulcers.

Absence of ciliæ (nadarosis), nose sore and excoriated; Meibomian glands ulcerated, with scurf on margins of lids.

Entropium; ectropium; affections of Meibomian cysts.

Styes on upper lids.

Twitching of lids.

Violent contraction of eyelids, it is difficult to open them.

Hearing and Ears. Subjective sounds: various kinds of ringing; roaring; pulsative roaring; buzzing.

Deafness: sounds vibrate in ears; obstruction momentarily > after swallowing or blowing nose; external meatus moist; catarrhal after catching cold; after otitis.

Sensation of coldness in ears continually. θPregnancy.

Interstitial inflammation and swelling of periosteum.

Sensation as if r. ear was stuffed up; ringing in ear; enlarged tonsils, with occlusion of Eustachian tubes and impaired hearing.

Soreness and excoriation of inner ears.

Tearing or shooting pain in ears.

Sticking and burning deep in both ears, < in left. s.

Ears inflamed internally and externally, pain cramp-like, sticking and as if stopped by swelling. s.

Stinging, tearing pains; purulent discharge, green, offensive; glands swollen.

Inflammation of submucous and subcutaneous cellular tissue, extending to parotid gland, which becomes swollen and tender; throbbing pain, < at night on getting warm in bed. θOtitis.

Otitis after cold; intolerable pains in whole head, but particularly in ears; boring, tearing, stitching, with roaring and rumbling, particularly in l. ear, which is externally red, hot and swollen; pain so severe as to cause fainting; thirst; great restlessness; sleeplessness.

Hardness of hearing, roaring in ears, yellow discharge. θChronic otitis.

Watery discharge and hemorrhage from ears, first l., then r.; sides of neck red, swollen, tender; noises like

Google

bells ringing, whistling or running of trains, first l., then r.; shooting from l. ear through head to r. and from l. ear to l. temple; shooting > by cold, < by warmth; discharge < by warmth; noises and shooting < by lying on l. side; deaf; shooting makes her hold head and shudder; pulse 150, feeble; pricking in ears before discharge comes; aching in ears, first l., then r., 5.45 P.M. v.

‖Since an attack of measles, twenty-two years ago, has suffered from a profuse, offensive smelling discharge from r. ear, to which within the last few years were associated hardness of hearing and ringing in ears; watch could not be heard on r. side, upon l. side could be heard only at distance of one and a half inches; tuning fork could be heard only on r. side; r. auditory canal occluded by soft, easily bleeding polypi; mucous membrane red, puffed, raw and very sensitive; yellowish white, offensive, muco-purulent discharge; polypi dropped off in six days.

‖Inflammation of l. ear, with hardness of hearing; subjective symptoms, as though a melody was ground upon an organ in head and after a few turns was snapped off; sensation of fulness in ear and stopped up feeling, as though a wedge was driven in. s.

‖Pain beneath ear, extending down jaw. θOtitis.

‖Stitching, tearing, pressing, burning pains deep in ear, extending to cheek; ear burns externally, feels cold internally; pinching and pressing; ear moist.

‖Purulent offensive otorrhœa, with itching in ears; vesicular eruption in face, each vesicle surrounded by a red areola; itching nodular eruption on legs.

‖Enlarged cervical glands; frequent otalgia; chronic discharge of profuse, yellowish, very offensive pus from ear; < at night; pain in ears at night; eruption behind ears. v.

‖Offensive otorrhœa; itching in ears. θSyphilis.

‖Matter flows from both ears; in forepart of r. ear is a sac of matter which, when touched, discharged through ear; pains in whole r. half of head and face, she was unable to lie on that side. s.

‖‖Bloody and offensive matter flows from r. ear, with tearing pain. s.

‖Thin earwax runs from both ears. s.

‖‖Furuncles or boils in external meatus.

‖Fungous excrescences in ear. s.

‖Polypi in external meatus, which is inflamed. s.

‖Swelling of glands under ear; also inflammatory.

[7] **Smell and Nose.** ‖Swelling of nasal bones; painful when taken hold of. s.

‖Nosebleed: when coughing and during sleep; blood hangs in dark, coagulated string; with worm symptoms, bleeding occurs at night.

‖Coryza, with much sneezing. s.

‖‖Food and drink rise up into choanæ.

‖‖Coryza: with much sneezing; fluent, corrosive; nostrils bleeding, scurfy; nose red, swollen, shining; < from damp weather; at night; from either cold or warm air; not > by sweat: smell from nose as from an old cold; inflammatory redness inside of nose; with itching and formation of crusts and bleeding on cleansing nose; chilliness in daytime, obliged to lie down; copious sour smelling sweat at night; part of mucus trickles down through posterior nares into throat and causes hawking, with catarrhal inflammation of larynx, trachea, bronchi and eyes; hoarseness and roughness of voice; dry, rough cough from continual tickling in larynx, with or without fever; catarrhal affection of frontal sinuses and Highmorian cavities, pressive, tensive, tearing pains in forehead, cheeks, upper teeth and ears; inflammation of tonsils and fauces; rheumatic pains in limbs; feverish; does not like to be alone; thirsty; feels bad in a warm room and cannot bear cold either; with chilliness; epidemic.

‖‖Fulness and pulsation in head extending into nose; heat predominating over chilliness. θCatarrh.

‖‖Greenish, fetid pus from nose; nasal bones swollen.

‖‖Acrid matter flows from nose, having odor of old cheese. s.

‖The nostrils are red, raw and ulcerated. θCoryza.

Swelling of whole or only tip of nose, accompanied by pain and inflammation, followed by cancer; pus thin, ichorous and acrid. θCancer.

[8] **Upper Face.** ‖Face: pale, yellow, earthy; red and hot cheeks; pale and sunken; earthy colored, puffy; sallow; pale and bloated; sickly, pale; swollen; pale, cold; livid; jaundiced.

‖‖Swelling of cheeks with toothache.

‖‖Tearing, lacerating pains in face; salivation; from cold or caries of teeth.

‖Neuralgia of trigeminus from taking cold.

‖‖Swelling or breaking out of upper lip.

‖Yellow, dirty scurf, with fetid discharge, itching and bleeding when scratched.

‖‖Pimples on face with a bluish red halo, without itching.

‖‖Forehead red, presenting a number of small orifices, like "worm holes," exuding serous fluid; margins of holes, which communicated with frontal bone, some-

Google

what elevated; pain in forehead when in bed, and subject to severe headache up to time when forehead was affected. v.

Upon forehead between eyebrows, small patches of a pustular eruption, with greenish yellow scabs. θImpetigo calvities. s.

Syphilitic spots and pustules on face and forehead. s.

[9] **Lower Face.** Tension in articulation of jaw on opening mouth. s.

Tearing in lower jaw toward evening. s.

Almost complete inability to move lower jaw or chew. v.

Cannot separate jaws. s.

Lockjaw from glandular swellings, with stinging pains.

Periostitis of lower jaw; caries; looseness of teeth, which are painful when touched by tongue, they fall out; spongy, easily bleeding gums; stitches in teeth; toothache < from heat.

Soft, red swelling of upper lip.

Lips: painful when touched; dry, cracked, ulcerated; black; burning pimples with yellow crusts; greatly swollen, puffed out, fissured: thick brown crusts, extending to chin; cannot open lips or taste food.

Corners of mouth ulcerated and painfully sore. s.

Yellowish scabs, especially around mouth.

Mumps: on r. side; pale swelling; fever slight or absent; high degree of inflammation; trismus; in young scrofulous subjects; suppuration threatens.

Inflammation of submaxillary or sublingual glands.

[10] **Teeth and Gums.** Toothache: with swelling of gums and salivary glands; at night as it disappears great chilliness over whole body; jerking, especially at night; a pulselike jerking from teeth of lower jaw into ear, from upper jaw into head, with painfulness of gum from 9 P.M. on; from caries, or inflamed dentine; returns in damp weather or evening air; pains tearing, lacerating, shooting into face and ears; < from warmth of bed, from cold or warm things; > from rubbing cheek.

Toothache during day and ceasing at night, followed by perspiration and pains, return in morning in paroxysms, with longer or shorter intervals, alternating with giddiness or tearing in limbs.

Frequent crackling in head, as from metal plates; swelling of gums; sensation as if teeth were fixed in a mass of pap; burning and itching in gums; ptyalism; chilliness in evening; steaming skin and tendency to sweat.

During an epidemic of influenza, toothache accompanied by fever.

Stitching, tearing pains in hollow and carious teeth, < at

Google

night; hard painful swelling of cheek; profuse accumulation of saliva in mouth; offensive breath.

‖Toothache commencing in a molar tooth, commencing slowly, extending up to temple, getting gradually very violent, then ceasing suddenly, attacks repeated every few minutes.

‖Teeth sore and loose, some are too long. θPregnancy.

‖‖Feeling as if all the teeth were loose. s.

‖Teeth feel too long and are sensitive.

‖Teeth are loose; at last drop out. v.

‖‖Looseness of teeth, especially of molars; they become denuded of the gum and turn black, with nightly pains in teeth, jaws and head. v.

‖All teeth except incisors lost, at least crowns of teeth, leaving only roots, with very red and very soft gums. v.

‖‖Teeth: black, dirty grey, carious, become loose in succession.

‖Severe throbbing pain in l. upper jaw, < at night: face swollen; tongue whitish, moist and flabby; teeth felt too long. v.

‖Copious salivation, little blisters on tongue, gums and cheeks; large ulcers on protruding gums; salivation arrested from taking cold, and convulsions occur; diaper stained with yellowish, strong smelling urine; abdomen hard and distended; stools slimy, bloody, green and accompanied by tenesmus. θDentition. s.

‖‖Gums painful to touch, swollen, receding from teeth, whitish edges, bleeding, with a fetid odor from mouth.

‖Pulsating toothache < at night; gumboil.

‖Swelling of gums every night. s.

‖Gums red, swollen and covered with thin, white patches, easily removed from a nonulcerating surface. v.

‖‖Gum has a bright red margin. v.

‖Gums swollen and of a livid red color. v.

‖‖Gums spongy and bleeding, partly destroyed. v.

‖Gum atrophies, especially on roots of lower teeth, leaving necks of teeth bare. v.

‖ **Taste and Tongue.** ‖‖Taste: sweetish; illusive sensation as if body was made up of sweets; slimy; salty on tongue and lips; of bad eggs; bitter; putrid; metallic; flat; fecal, putrid.

‖‖Bread tastes sweet. s.

‖Loss of taste.

‖Speech: quick, stuttering; tremulous; impeded; difficult. v.

‖Complete loss of speech.

‖Difficulty in speaking and masticating. v.

‖‖Speech difficult: on account of trembling of mouth and tongue; masseter muscles contracted.

Google

Tongue: swollen, flabby; takes imprint of teeth; pale; white; tremulous; dry, hard; red and dry; red, with dark spots and burning; moist, with intense thirst.

Tongue coated: showing impress of teeth; thickly; as if covered with fur, especially in morning; black; moist, covered with mucus; dirty yellow, with foul breath; black, with red edge.

Tongue inflamed, indurated or suppurating, with pricking pains.

Tongue not swollen; grey patches on edges and a thin dirty yellow coat on upper surface. v.

Great swelling of tongue. s.

Tongue very much swollen, painful and covered with foul ulcers, with constant oozing of blood as from a spongy tissue; these ulcers made swallowing very difficult. v.

For several days constant crying; child desires nothing but drinks; tongue and gums very red, swollen and covered with white vesicles; fever; restlessness; sleeplessness.

Pricking pain in tongue, with swelling, pressure on tongue painful.

Tongue as white as chalk.

Intense redness of tongue; severe pain, especially on side from contact of teeth; profuse salivation and tendency to fissures or ulceration; < from least contact of food, drink or even cold air; cries and wrings hands in agony; offensive breath and saliva. θGlossitis.

Ranula.

[12] **Inner Mouth.** Dry mouth and throat.

Mouth and tongue moist, and plenty of saliva, yet great thirst for cold water.

Much slime collects in mouth.

Salivation: saliva fetid or tastes metallic, coppery; tenacious; soapy and stringy.

Bloody saliva. v.

Salivation arrested from taking cold, then convulsions.

Profuse flow of saliva, breath has a mercurial odor. θHysteria.

Ptyalism, with nausea waking her from sleep, particularly after midnight. θPregnancy.

Mouth sore and studded with small vesicles. θScarlatina.

Salivation and scorbutic gums. θCrusta lactea.

Odor from mouth: bad, fetid; disagreeable, sweetish; very offensive, more noticed by persons at distance than by patient himself.

Sickly smell from mouth. θChronic diarrhœa.

Mucous membrane of mouth pale, with numerous erosions. v.

Google

Bluish color of inner cheeks. Scurvy.
Internal swelling of upper lip. s.
Mouth inflamed, with burning aphthous ulcers; copious, fetid, ropy saliva; scorbutic gums; large blisters in mouth; whole mouth sore.
Aphthæ of children, stomacace.
Inflammation in whole buccal cavity. Thrush.
Confluent thrush, changing into cankers; ptyalism; bad smell from mouth; feverishness; green, slimy stools.
Thrush; constant crying; emaciation; tongue as if covered with thick, white fur; deglutition difficult; will not nurse; grass green passages from bowels; no discharge of urine for thirty-six hours; coldness.
Small ulcers, with lardaceous base and red inflamed edges on tongue and inside of lips and cheeks.
After catarrhal or gastric fever, small round vesicles upon reddened mucous membrane of mouth, which soon open and form flat ulcers with red edges and white or yellowish base.
Confluent ulcers in mouth, with ptyalism; offensive odor from mouth.
Oval ulcer on gum, nearly an inch in length, with irregular edges; ulcer also at corner of mouth; small ulcers on mucous membrane of cheek; ptyalism.
Scorbutic gums; saliva copious, offensive, bloody; ulcers with bases like lard; inflammation of whole buccal cavity and ulcers upon gums; glands swollen; diarrhœa, with tenesmus.
Diffuse redness of whole mucous membrane of mouth, with profuse flow of saliva. Stomatitis from use of chewing gum. s.
After typhoid fever, painful cracks on tongue and ulcers on inner surface of lips and cheeks; blandest food causes intolerable biting pains.
Ulcers: appear on gums, tongue, throat, inside of cheek, with salivation; irregular in shape; undefined edges; dirty, unhealthy look; lardaceous base, surrounded with a dark halo; apt to run together; the syphilitic ulcers are circular, attack posterior parts of mouth, have well-defined edges, surrounded with a coppery hue, they do not extend from their primary seat. v.
Syphilitic ulceration of mouth; ulcers rapidly affect surrounding parts, tonsils, larynx and pharynx becoming affected; ulcers extend in depth, begin to suppurate or emit an offensive odor; voice becomes hoarse, child becomes emaciated and death threatens from slow fever.
Orifice of excretory duct of salivary gland between last teeth, swollen, white, ulcerated and extremely painful. s.

Google

‖‖Pain, swelling and ulceration of salivary glands. s.
‖Right sublingual glands as large as hazel nuts, and very hard. v.
‖Ranula, r. side; had been opened several times and half a teacupful of fluid removed, but always returned five or six days afterwards.

[13] **Throat.** ‖Uvula elongated, enlarged, greatly swollen.
‖Redness and swelling of soft palate, tonsils and whole oral cavity.
‖Soft palate and especially uvula of a coppery red color; on l. side a long, superficial ulcer. v.
‖Dryness of palate, as if caused by heat; constantly obliged to swallow.
‖Difficult deglutition.
‖Fluids return through nose.
‖Sticking pains in tonsils when swallowing.
‖Pain when swallowing as if a foreign body was swallowed down.
‖Burning in throat as from hot vapor ascending from stomach.
‖Great heat rises to throat. s.
‖Painful dryness of throat, with mouth full of saliva; rawness, roughness and burning in throat.
‖‖Throat constantly dry; it hurt as if too tight posteriorly; a pressure in it if he swallowed, yet he was constantly obliged to swallow, because mouth was always full of water. s.
‖Pain in throat, as if an apple core was sticking in it. s.
‖Stitches posteriorly in throat, penetrating ear when swallowing. s.
‖Angina: great dryness in mouth and throat; expectoration of masses of mucus from pharynx and choanæ; ptyalism; face pale red; l. side swollen; dry heat, with confusion of head; burning skin; constant thirst; frequent, strong pulse; severe chill, with drawing in limbs and lassitude; nauseating belching; beating in l. præcordia; severe drawing pain in nape and down back; pain in parotid glands and muscles of neck, not < by motion; fever < in evening; thick, white coat on tongue; stitching pain in throat when moving jaw; pain extending to ears; vertigo when rising; stitches in occiput, with slight cough; severe headache, particularly in l. temple; severe dull pain in occiput; skin of head and face seems tense; fauces of a coppery red color; soft palate and tonsils greatly swollen, dark red and pressed forward; stinging pains from empty swallowing at night and in cold air; < Spring and Fall and in wet, cold weather; epidemic, young people especially affected; chronic or habitual.

Google

‖Inflammation of throat, extending upwards into posterior nares and downwards into larynx; increased secretion of acid saliva.

‖Sensation as if food had to pass over a foreign body; as if there was a burnt spot in pharynx; when not swallowing painful tension and pressure in region of pharynx, < from external pressure.

‖‖Suppuration of tonsils, with sharp, sticking pain in fauces when swallowing. s.

‖Tonsils much enlarged. v.

‖Tonsils dark red; studded with ulcers; stinging pains in fauces; quinsy only after pus has formed to hasten maturing.

‖Ulcer as large as point of knitting needle upon inflamed tonsils. θAngina.

‖Slimy saliva flowing in strings from mouth, of a greyish color; whitish, smeary concretions upon tonsils.

‖Mucous membrane of pharynx swollen in spots. v.

‖Trickling of mucus back into pharynx; swelling and excoriation; itching and bleeding of nose; bad looking pimple on nose; unpleasant odor. θPharyngeal catarrh.

‖Headache; fever; vomiting; convulsions; unconsciousness, with somnolency; swelling of r. tonsil, with some whitish grey, soft exudate. θDiphtheria. s.

‖Diphtheritic membrane commences in one of arches of pharynx or in uvula; mucous membrane of throat purplish; tongue dirty grey, flabby, and takes imprint of teeth; ptyalism, bleeding of gums; submaxillary glands and parotids swollen hard, trismus; profuse, clammy sweat at night; desire for milk. θDiphtheria. s.

‖Erysipelatous inflammation of throat.

‖Syphilitic ulcers in throat and mouth.

‖Syphilitic ulcers in throat after local treatment of chancre upon genitals.

‖Mucous patches in throat, swollen glands, r. side, fever.

‖Slight redness of throat; several flat ulcers; < in bad weather; tickling in throat, stitches when swallowing; two small, flat ulcers upon genitals. θSyphilis.

‖Angina faucium, with grey ulceration, hoarseness, fetor of breath. θSecondary syphilis.

‖Lymphatic glands of throat hard and large.

14 **Appetite, Thirst. Desires, Aversions.** ‖Canine hunger even after eating; relishes nothing; grows weaker and weaker. θWorms.

‖Complete loss of appetite. s.

‖Much thirst day and night. s.

‖Thirst violent, burning, especially for beer and cold drinks.

Google

‖Great thirst for ice water, though it makes cough worse. θBronchitis.

‖Desire: for milk; for sweets, but they disagree; for beer; for liquid food; for bread and butter. s.

Aversion: to meat; to wine and brandy; to coffee; to greasy food; to butter. s.

[15] **Eating and Drinking.** ‖Worse after drinking; from drinking wine; from spirituous liquors; from coffee; from cold drinks.

Better: from smoking.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Frequent hiccough. s.

‖Acrid, bitter, putrid or rancid eructations, < at night.

Constant risings of air.

‖Heartburn all night. θPregnancy.

‖Nausea; with vertigo, headache, obscured vision and flashes of heat; with sweet taste in throat; nausea in œsophagus or in stomach.

‖Inclination to vomit while coughing. s.

‖Regurgitation or vomiting of food; bitter vomit.

‖Much water collects in mouth at 1 A.M., together with nausea, that wakens her and obliges her to vomit. s.

‖Vomiting bile and fo d.

‖Violent convulsive vomiting of slime and bilious matter. θYellow fever.

[17] **Scrobiculum and Stomach.** The food weighs like a stone in pit of stomach; burning pain.

‖Pressure in stomach; it hangs down heavily, even after light, easily digestible food.

‖Burning pain and sensitiveness of stomach. θYellow fever.

‖Stomach: burns, is swollen and sensitive to touch; hard and tense; feels replete and constricted.

‖Peculiar deathly faintness caused by pressure in epigastrium. s.

‖Weak digestion, with continuous hunger.

[18] **Hypochondria.** ‖Pressing pain or stitches in liver; cannot lie upon r. side; bitter taste in mouth; thirst, with little appetite for food; constant chilliness; yellowness of skin and whites of eyes; liver tender to touch. θHepatitis.

‖Great distension of l. hypochondrium; pains not very severe, mostly stitching in character; pain in shoulders; light yellow color of skin; flabby constitutions. θHepatitis.

‖Inflammation of pleura and liver; severe vertigo; face yellow or dark red; great thirst; white coated tongue; debility; severe, obstinate, short cough, with tenacious, blood streaked or entirely bloody expectoration; stitch-

Google

ing tearing pains under false ribs and in hepatic region; loss of appetite; offensive, bitter taste in mouth; yellow, orange colored or red urine; frequent sweats; pains in limbs.

‖Face red, bloated; lips dry and hot; tongue white, moist; sour, bitter taste in mouth; great thirst; forcible eructations; frequent vomiting of bile and water; great tension of præcordium; severe stitching, burning pain in whole convex portion of liver, extending to spine; < from pressure, sneezing, coughing, or on taking deep inspiration; moans and throws herself about in bed; liver greatly swollen, hard, hot and projects from under ribs; constipation; urine frequent, burning; skin moderately warm; pulse small, hard, contracted. θInflammation of liver.

‖Region of liver: sensitive; cannot lie on r. side; swollen, hard, from induration; stinging, stitching or pressing pains; dull pain, with jaundice.

‖‖Jaundice: with violent rush of blood to head; bad taste; tongue moist and furred yellow; soreness in hepatic region; from gall stones; duodenal catarrh; in the new born.

‖Violent stitches in hepatic region, on account of which he could not breathe nor eructate. s.

‖Worse lying on r. side, particularly pain in region of liver, or bruised feeling of intestines.

‖Chronic atrophy of liver, with emaciation and dessication of body. v.

19 **Abdomen.** ‖Abdomen: greatly distended; tympanitic; painfully inflated; tense, hard, swollen and sensitive; fulness and tenderness across epigastrium and hypochondria; painful to contact; rumbling sensation; pressure as from a stone; pressure in r. side; sense of emptiness.

‖‖Shaking sensation of bowels when walking, they feel relaxed, as if they had to be held up.

‖Intestines feel bruised when he lies on r. side.

‖Sensation as if bowels fell to side on which one is lying.

‖Intestines sore as if pressed, cannot sleep on r. side. s.

‖‖Shooting, diarrhœic feeling in lower bowels.

‖Colic: > by a slimy, bloody stool, with straining; as from a cold; occasioned by cool evening air, with diarrhœa; from worms; lancinating, boring and pressing pains; stabbing in abdomen as from knives; passes off in a recumbent position; twisting, constricting pains.

‖‖Cutting stitch in lower abdomen, from r. to l., < by walking.

‖‖Stitching, pressive pains in lower region of abdomen, l. side.

Google

▮Child cries violently from severe pain, > by passing a green, slimy stool. θBilious colic. s.
▮Peritonitis, with purulent exudation, especially with typhlitis.
▮Painful, hard, hot and red swelling in ileo-cæcal region painful to touch. θTyphlitis.
▮Enteritis: lancinating pains; bloody, slimy stools; sweat without relief.
▮▮Sore pain deep in centre of pelvis, severe dragging in loins and lumbar region, bearing down pressure in lower abdomen; mental depression.
▮Cutting pain in intestines, < when feces or air passes through affected parts; slimy, watery stools, often mixed with blood. θInflammation of intestinal mucous membranes.
▮Painful, hard, hot, movable swelling, as hard as a hen's egg, near r. ilium, preventing extension of thigh; constipation; dark urine; miserable, pale appearance; loss of appetite; moderate thirst; fever. θPerityphlitis.
▮Hard, hot, red swelling, as large as a dollar and painful to touch, between umbilicus and anterior inferior spine of ilium; must lie upon back with thigh flexed; fever; flushed face; thirst; anorexia; red, dry tongue; constipation; red urine. θPerityphlitis.
▮Catarrh of pancreatic duct.
▮Stitches in last r. rib and in inguinal region, with tightness of breath on inspiration, while walking in open air. s.
▮▮Swelling of inguinal glands, with circumscribed redness, not very painful, except on pressure and long walking. s.
▮Swelling of inguinal glands (bubo), at first with circumscribed redness, painful on pressure and walking, then red, elevated and inflamed; could neither stand nor walk without great pain. s.
▮Inguinal gland swollen or suppurating.
▮Inguinal glands sympathize with cancerous affections.
▮Pressive boring pain in r. groin. s.
▮Zona on r. side and extending across abdomen; < at night from warmth of bed.
▮▮Abdomen externally cold to touch.

[20] **Stool and Rectum.** ▮▮Stools: dark green, bilious, frothy; like stirred eggs; brownish; greenish brown; watery and colorless; black; yellowish; yellow; color of sulphur; like chopped eggs; greyish; watery, with greenish scum floating on surface of water; whitish, watery, reddish, mucous; green mucous; bloody mucous; pea green; green slimy; acrid and excoriating; bloody;

blood streaked; slimy and fecal; purulent; undigested; frequent; scanty; corrosive; sour smelling; pitchlike; tenacious; dark green; clay colored and offensive; clotted blood mixed with feces; soft, brownish, floats on water; whitish grey.

Stools: tenacious, or crumbling; small, knotty masses; small like sheep dung; pale, white stools; small pieces, pale, with mucus, or streaked with blood; form of a narrow ribbon.

Before stool: frequent desire, < at night; ineffectual straining; protrusion of hemorrhoids, with straining which causes pain as of ulceration; violent and frequent urging; nausea; pinching and cutting in abdomen; anxiety, anguish, trembling and sweat, either warm or cold; chilliness; chilliness mingled with flashes of heat; trembling of whole body.

During stool: great straining, with scanty stool, with pinching in belly; severe pains in anus; evacuation after a great length of time; violent urging; nausea and vomiting; eructations; pinching and cutting colic, making one bend double; burning at anus; chilliness; hot sweat on forehead; tenesmus; screaming (children in dysentery); chilliness, ceasing after evacuation.

Chilliness between stools.

After stool: great relief; cutting and pinching colic; rawness, burning and itching of anus and adjacent parts; sensation of constriction in rectum, causing faintness; continued tenesmus and prolapsus ani; bleeding hemorrhoids; pains in rectum sometimes extend to back; violent tenesmus and continued urging; "never-get-done" feeling; prolapsus recti; rectum looking dark and bloody; warm sweat on forehead becomes cold; exhaustion; rigors; trembling.

Diarrhœa, with much wretchedness and dejection of spirits. s.

Evening air causes colic and diarrhœa. s.

Morning diarrhœa composed mostly of slime and fecal matter, with tenesmus before and during stool. s.

Purulent diarrhœa, with chill between and hot flashes during stool.

Frequent vomiting; nausea; diarrhœa; much crying; thirst, great heat; trembling of hands; inability to stand; loud screaming when touched; restless at night; convulsive motions; distortion of eyes; twitching of muscles of face, arms and legs; grinding of teeth; face red, hot; profuse sweat; diarrhœic discharges, every half hour, of yellow, green, frothy mucus.

Diarrhœa of children, about fourth month; stools green,

Google

often grass green; watery; slimy; frothy; like chopped eggs; mixed with bloody mucus; much screaming; cutting in abdomen; emaciation; also in older children when aphthæ are present.

▮Long continued diarrhœa, with a swelling size of fist in region of transverse colon.

▮Diarrhœa biliosa; passage of quantities of bile, yellow and painfully hot; face yellow; pain and tenderness over r. hypochondrium.

▮After cholera, when stools remain bloody and watery and are accompanied by tenesmus (also useful after *Ipec.*); when choleraic symptoms are > and partial reaction has set in, but tongue becomes thickly coated with mucus.

▮Painless congestions; spine drawn to one side, tossing about, grinding of teeth and trismus, as in epilepsy; thumbs not clenched; preceded by an attack of diarrhœa and vomiting; about every half hour return of consciousness, during which he desires water, then spasms recur.

▮Ineffectual pressure to stool, with protruding hemorrhoids, which are painfully sore. s.

▮Dysenteric diarrhœa in a nursing infant; passages often of pure bright blood, occasionally mixed with mucus or green choppedlike stuff; fever; refusal to take breast.

▮Green slimy discharges, with pinching and cutting; prolapsus of rectum.

▮Fever, with violent griping; scanty, bloody, mucous discharges, with much burning pain and tenesmus; dry, coated tongue; loss of appetite; tearing in limbs. θDysentery.

▮Frightful pain in bowels, as if they were cut in pieces, most violent when at stool; great pressure at stool, as if bowels would be forced out; discharge of a little bloody mucus after straining; increased desire to go to stool at night; during stool sweat on brow, at first warm, but soon becoming cold and clammy; sleeplessness; great prostration; evacuations corrode anus, and cause painful burning. θAutumnal dysentery.

▮Rectum prolapsed; looked dark and was very painful, especially to touch; spurting of blood from rectum; stools lumpy, accompanied by pressing and crying; loss of appetite; little sleep; irritable disposition.

▮Croupous inflammation of rectum after catching cold while bathing in open air; croupous stools occur principally at night and alternate with a pappy fecal stool; constant sensation of fulness and distension in rectum, with burning and pinching in lower part; every hour or so discharge of a round, shreddy mass, accompanied

Google

by a watery, fecal discharge, with chilliness and heat, extending towards head; abdomen not painful to pressure, except in a few places where large intestine is distended with gas; rumbling and slight pinching pains in abdomen; urine scanty; appetite impaired; thick, mucous coating on tongue; great prostration.

‖ Constipation, stool tenacious or crumbling, discharged only with violent straining; constant ineffectual urging, < at night; blood with stool. s.

‖ Constipation, or diarrhœa of slime, bile or blood. θ Yellow fever.

‖ Discharge of mucus from rectum.

‖ Paralysis of rectum. θ Meningitis.

‖ Burning pain in anus, with soft stools. s.

‖ Anus feels raw; chafed. s.

‖ Large bleeding varices, which suppurate; hemorrhage after micturition.

‖ Discharge of thread and round worms; seat worms; tape worm (in alternation with *Sulphur*).

‖ Continuous greediness for eating and still becomes steadily weaker; fetid breath; itching of anus; inflammation of vulva. θ Worm affections.

21 **Urinary Organs.** ‖ Great soreness in region of bladder when touching it; urine flows in a thin stream or only drop by drop; contains mucus, blood or pus. θ Gonorrhœa. θ Cystitis.

‖ Paralysis of bladder. θ Meningitis.

‖ Urine is passed involuntarily.

‖ Frequent urging to urinate, only a little passes; must hurry, otherwise he cannot retain it; scanty discharge in feeble stream; copious flow; was obliged to urinate at every hour, day and night, with violent burning in urethra on beginning to urinate; burning biting pain. s.

‖ Far more urine passes than water has been drunk. s.

‖ Urine: dark red, soon becoming turbid and fetid; smells sour and pungent; looks as if mixed with blood, with white flakes or as if containing pus; fleshlike lumps of mucus; thick, white sediment as if flour had been stirred in; yellowish, strong smelling, staining diaper; scanty, fiery red; very dark.

‖ Children perspire easily, urine hot, acrid, sour smelling. θ Enuresis nocturna.

‖ Hæmaturia: with violent and frequent urging to urinate; in typhus, etc.

‖ Urine reddish, becoming thick on standing, and causing cutting when passed. s.

‖ Intolerable burning; every few minutes urging to urinate, followed by discharge of a few drops of slimy, burning urine. θ Dysuria.

Google

Cutting and pinching in abdomen, with great urging to urinate; after much exertion and great pain passes a few drops of burning urine, accompanied by severe and constant tenesmus; bloated abdomen; belching; nausea; retching and vomiting; sleeplessness; < at night; in morning, vertigo, heaviness of head, thirst, tearing, constricting pinching pains in abdomen. θDysuria.

Diminished secretion of urine, with great desire to pass it; urine saturated dark brown, mixed with blood, with dirty white sediment. θNephritis.

Albuminuria

Hemorrhage from urethra, burning and stinging it.

Thick, greenish or yellow discharge from urethra, < at night. θGonorrhœa.

Painless discharge of blood.

Burning and scalding sensation of urine as from raw surfaces. s.

Intense itching, < by presence of urine remaining on parts after urinating; it has to be washed off.

Male Sexual Organs. Total loss of sexual power. v.

Lascivious excitement, with painful nightly erections.

Pollutions; sperm mixed with blood (gonorrhœa); chilliness; sallow face; constipation.

After emission burning pain in back and icy cold hands. θSpermatorrhœa.

Feeling of coldness in testicles, in afternoon and evening. s.

Testicles swollen, hard, shining.

Violent thirst; drawing with pressure in testicles; drawing in groin and spermatic cord. θOrchitis.

Inflammation of testicles, consequent upon an attack of gonorrhœa; induration of testicles.

Burning in urethra.

Gonorrhœa: burning pain; frequent painful erections; discharge purulent and green; < at night; greenish, painless; with phimosis or chancroids; complicated with chancre; gleet yellowish green and purulent.

Gonorrhœa of two weeks' standing, treated with injections of various kinds; pain in l. testicle and along cord; painful erections; not very profuse discharge, much nervousness and anxiety, < at night.

Right testicle swollen, hard, as large as a hen's egg; shocks of severe drawing pain, extending from testicles up into abdomen and down legs to feet; scrotum red, shining, < r. side; itching in scrotum; severe chill alternating with heat; pulse feverish; vertigo; general depression; tearing in head, < r. side. θGonorrhœa.

Urging to urinate; intolerable burning in forepart of urethra when passing last few drops; hot, swollen prepuce; green discharge. θGonorrhœa.

Google

Discharge greenish, offensive odor from mouth; ptyalism, gums swollen, easily bleeding, fever, heat alternating with horripilations, < at night, tearing pains in head; threatened bubo, with drawing pain in inguinal region; soft chancre. θGonorrhœa.

Gonorrhœa of a torpid character in course of syphilis, with suppurating bubo. s.

Severe burning on urination; prepuce and glans greatly swollen; discharge like thin milk, leaving a stain upon linen; has taken Copaiba and Cubebs four weeks. θGonorrhœa.

Swelling of prepuce and inflamed redness of its inner surface, with painful sensitiveness. s.

Great swelling of prepuce, as if it was distended with air or water to a blister. s.

Vesicles on forepart and sides of glans penis; they eat deeply in and spread; several small white blisters, which also ooze fluid, but soon disappear.

Swelling of forepart of urethra, with suppuration between glans and prepuce which is red, hot and painful to touch and on walking; raging pain in forehead; rough itchlike eruption on hands, especially in region of first joint of thumb, more on upper surface, itching at night. s.

Several small red vesicles on end of glans penis, under prepuce, after four days become ulcers and discharge yellow white matter of strong odor, staining shirt; afterwards large ulcers bleed when touched, pain affects whole body; they are round, the margins everted like raw meat, and their bases covered with a caseous coat. s.

Herpes præputialis.

Blisters on glans; burning of penis, eruption on prepuce, condylomata. s.

Pale red vesicles, form small ulcers after breaking, on glans and prepuce.

A number of small red vesicles behind glans, changing to ulcers, which burst and discharge a yellowish white, stringy, strong smelling matter. s.

Ulcers on glans, with cheesy base; chancroids.

Simple, recently acquired, soft chancres of a superficial and regular form and free secretion of thick pus.

Chancre; enlargement of glands; psoriasis on nape of neck; nodes on tibia, sensitive to pressure. θSecondary syphilis.

Swelling of lymphatic vessels along penis.

Chancre: primary; regular indurated Hunterian, with lardaceous base; small, with cheesy bottom and inverted red edges; painful, bleeding; yellowish fetid discharge,

Google

spreading and deeply penetrating on glans and prepuce; red on prepuce; with phimosis or paraphimosis; eating through frænum; round, deep, on glans.

‖Several small ulcers which bleed easily so soon as prepuce moves, or on handling parts; painful ulcers on glans and on both sides of frænum; pain in inguinal region on walking, no redness of skin; heavy pressure on inguinal glands causes pain. s. Chancre. s.

‖Foreskin sore; yellowish pus in drops.

‖Rubbing and scratching genitals at night when in bed.

‖Children scratch and pull at genitals.

‖Dry, fine vesicular eruption on genitals. s.

‖Sweat on genitals, soreness between scrotum and thighs.

[21] **Female Sexual Organs.** ‖Prolapsus uteri et vagina; feels > after coition.

‖Peculiar weak feeling in abdomen, as though she had to hold it up; close above genitals sensation as if something heavy was pulling downward; pulling pain in both thighs, as if muscles and tendons were too short. θDisplacement of womb.

‖Bleeding excrescences on os uteri. θSyphilis.

‖Copious discharge from vagina, of muco-purulent matter; < after catamenia, but constant; system greatly exhausted by flooding and repeated miscarriages; conceived readily enough, but was certain to lose ovum at the end of third month, if not before; deep ulcers on os and in cervix, with ragged edges which bleed freely when touched; vaginal walls ulcerated, prolapsus uteri and vagina; sore pain deep in centre of pelvis; severe dragging in loins and lumbar regions; bearing down pressure in lower abdomen; mental depression. θUlcerated cervix.

‖Stitching, aching or boring pains in uterus, with little heat, but frequent sweats and chills; moist tongue, with intense thirst; < at night. θMetritis.

‖Before menses: dry heat and rush of blood to head; dysmenorrhœa.

‖During menses: anxiety; red tongue, with dark spots; saltish taste, sickly color of gums, teeth on edge; breath of a mercurial odor and salivation; prolapsus of vagina; pain in mammæ, as if they would ulcerate; œdematous swelling of hands, feet and face.

‖Milk in breasts instead of menses.

‖Unnatural swelling of female mammæ, especially of nipples, which were harder than usual. s.

‖Pressure in genitals, obliging her to urinate often. s.

‖Menses: blood light red, serous; too profuse; too late and scanty; suppressed; of short duration.

Google

Sterility.

Menses irregular for two or three years, without any assignable cause; headache, impaired vision and memory; nervous trembling, hands shake; complexion muddy, sallow, greenish; countenance distrait; pulse feeble; increasing spinal curvature; menstrual function ceases for three or four months, then occurs sparingly; general anasarca; walking produces dyspnœa.

Amenorrhœa, with congestions and ebullitions.

Metrorrhagia; attacks of fainting following each other in rapid succession; face cold, covered with sweat; cold extremities; breathing imperceptible; attack preceded by heat, congestion, anxiety, dry mouth, belching, mucous collection in mouth and throat, pressure and cutting from stomach to genitals, dry cough, oppression in epigastrium; menses irregular or every two weeks.

Metrorrhagia in aged females; scorbutic gums; salivation.

Leucorrhœa: smarting, corroding, causing itching and biting in genitals; purulent; containing lumps; < at night; adhesive, sticky; green, bloody; obliging to scratch, violent burning after scratching; swelling of labia and vaginitis; flocks, pus and mucus as large as hazelnuts; syphilitic; sensitive itching of labia majora; swelling and sensitiveness of lymphatic vessels of nymphæ.

Burning, throbbing and itching of vagina and external genitals, < on l. side; numbness down l. leg; swelling in hypogastrium, abdomen swelled; feels hard internally; yellow discharge from vagina; on mucous surface of genitals, reaching as high up as she could see, and on external parts, especially near urethra, whitish patches like aphthæ; when removed, a red raw surface is left, uneven to touch, with little red elevations; throbbing > by lying still; burning < from cold and washing; cannot go to closet on account of draft of air causing pain; thinking about pains makes them < and makes her want to urinate; contact of urine makes parts burn; thrill in urethra when urine passes; menses delay. v. θVaginitis.

Itching of genitals, < from contact of urine, it must be washed off.

Phlegmonous swelling of labia. θAbortion threatened.

Pimples or tubercles on labia, more troublesome at night.

Indurations and inguinal growths.

Parts have strong tendency to excoriate, to swell and become inflamed; sensation of rawness in parts. s. θSpasm of vagina.

Pruritus vulvæ.

Google

‖Swollen labia, with soreness of groins.

[24] **Pregnancy. Parturition. Lactation.** ‖‖Morning sickness; profuse salivation, wets pillow in sleep.

‖Œdema or pruritis of vulva during pregnancy.

‖Threatened abortion; frequent attacks of pain in small of back; pressing pulsation in abdomen; pressure towards external genitals, which were so swollen that sitting posture became difficult; pressure at times accompanied by discharge of reddish mucus from genitals.

‖Repeated miscarriages at end of third month, or before. Expels moles.

‖‖Much salivation, constant drivelling from mouth; convulsions mostly in extremities. s. θPuerperal convulsions.

‖Lochial discharge, < at night, with swelling and inflammation of genitals; swollen and sore groins.

‖Milk scanty or spoiled, child refuses it; nipples raw and sore. θMastitis.

‖Pain in mammæ at every menstrual period, as if they would ulcerate.

‖Mammæ swollen, hard, with sore, maddening pains, ulcerated nipples; suppuration of mammæ, favors evacuation of pus.

‖‖Cancer mammæ, sore pain, a sort of raw feeling.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarse, rough voice; burning, rawness and tickling in larynx; fluent coryza and sore throat; < from least current of air; sweat without relief.

‖Lack of voice, not clear, or trembling.

‖Chronic hoarseness; tendency to sweat; profuse accumulation of saliva.

‖Aphonia, catarrhal or syphilitic, or occasioned by nervous paralysis.

‖Eyes full of tears; red about wings of nose; much sneezing; dulness of head. θHoarseness.

‖Intense catarrhal inflammation of throat, with mucous follicles swollen to size of hemp seed.

‖Complete aphonia from straining voice when just recovered from a former hoarseness; talked in whisper, every attempt to talk audibly sent blood to face and tears to eyes; slight burning in region of larynx.

‖Stiffness of neck, dry, racking cough and occasional expectoration of blood. θChronic laryngitis.

‖Laryngo tracheitis.

‖Roughness, burning, sensation of soreness in throat and under sternum, hoarseness and covered voice, cough dry, rough, concussive, exhausting, < at night; expectoration tough, watery, like saliva, foul, with streaks of

Google

blood; catarrhal headache; fluent coryza; diarrhœa; fever; sweating fails to relieve. θBronchitis.

♓ **Respiration.** ‖‖Fetid breath. v.

‖Shortness of breath: suffocation; on going up stairs or walking.

‖Anxious oppression and heavy breathing, with desire to take deep breath.

‖‖Asthma from fumes of arsenic; > from tobacco smoke and in cold air.

‖‖Dyspnœa; sensation of spasmodic contraction when coughing or sneezing.

♓ **Cough.** Cough: violent for several nights; dry, sounds and feels as if everything in chest was dry; with pain in chest and small of back; dry, with fluent coryza; short, dry, fatiguing, caused by tickling beneath upper portion of chest; dry, fatiguing, racking; in two paroxysms; particularly at night; inability to lie on r. side; tickling before falling asleep; with stitching pains in chest; in children; with nosebleed; with vomiting; as if head and chest would burst; with hoarseness; with diarrhœa; not allowing him to utter an audible word; spasmodic, with retching; during sleep; excited by a sensation of tickling or dryness in bronchia; with shortness of breath and ptyalism; from tickling in larynx and upper part of chest; only at night or only by day; with acrid or yellowish mucus, at times mixed with coagulated blood and tasting putrid or saltish.

‖‖Constant, short and choking cough. θDropsy of uterus.

‖During cough: stitches in occiput, chest, back and scapula; epistaxis; offensive breath; nausea, retching, vomiting; secessus.

‖Whooping cough: two paroxysms in rapid succession at night, followed by a long interval of rest; vomiting, with epistaxis, blood at once coagulating; profuse sweat at night; children who were previously troubled with worms (complementary *Carb. veg.*); involuntary grass-green diarrhœa during paroxysm, great prostration afterwards; sweat very much at night and bleed at nose and mouth with every coughing spell; either by day or by night only.

‖Catarrh: trachea; inflammation running from fauces through to finest bronchi; roughness, burning, feeling of soreness from fauces down; hoarseness; dry cough, raw, concussive, exhausting; sputum ropy, watery, spittlelike, offensive, bloody; headache; coryza; diarrhœa; fever; nonameliorating night sweats.

‖Cough < when lying on r. side. θBronchitis.

‖When coughing or sneezing a stitch runs directly through chest to back. θHepatitis.

Google

‖Cough < in night air, at night when lying on l. side.
‖Moist, barking cough, with some sound of moisture in air passages, but no expectoration; cough almost convulsive, cannot be controlled; occurring in frequent paroxysms, particularly from 9 A.M. until 5 or 6 P.M. θMeasles.
‖Sputa bloody, in consequence of destroyed lung parenchyma. θTuberculosis.

Inner Chest and Lungs. ‖Sensation of dryness in chest.
‖Rush of blood to chest; constriction; soreness, burning extending to throat.
‖Sharp stitches in chest. s.
‖‖Stitch in anterior and upper portion of chest, extending through to back, only on sneezing or coughing, not when breathing; it constricts chest. s.
‖Acute pain striking forward through chest from r. scapula. s.
‖Stitches in r. chest on sneezing and coughing. s.
‖Stabbing pain in l. side under short ribs during every inspiration. s.
‖Stitches in chest through from r. scapula. θPneumonia, with bilious symptoms.
‖For several days before attack, bloody diarrhœa; cough oppressive, constant; high fever; great prostration; respiration short, anxious, quick, with rattling on chest and great oppression and sobbing; restlessness; skin moist; sweat about head; sleeplessness; trembling of limbs; constant thirst and headache; quick pulse. θPneumonia.
‖Fever; full, frequent pulse; confusion of head and vertigo; pain around eyes; dryness of nose; eruption at corner of mouth; loss of taste; dry, short cough caused by scratching sensation under manubrium; much talking during sleep; sweat towards morning, particularly about head. θPneumonia.
‖Asthenic pneumonia, with feeling of weight in lungs, short cough and expectoration of bloody saliva.
‖Pneumonia and bronchitis, especially when there is a disposition to blenorrhœa, or there is present profuse expectoration of viscid bloody mucus.
‖Bilious pneumonia, with great tenderness over r. hypochondrium.
‖Infantile lobular pneumonia.
‖Emphysema of lungs. v.
‖‖Debilitating night and morning sweats. θTuberculosis.
‖Sputa bloody in consequence of destroyed lung parenchyma. s. θPhthisis.
‖Acts on lower part of r. lung; stitches through to back.

Google

‖Suppuration of lungs after hemorrhages of pneumonia.

[29] **Heart, Pulse and Circulation.** ‖Weakness at heart as if dying.

‖Awakens with trembling at heart and agitation as if frightened.

‖Aching pain at apex of heart extending upwards towards base; cardiac oppression.

‖Palpitation: with fear; < at night; on slightest exertion; with cough and bloody expectoration.

‖Orgasm, with trembling from slight exertion.

‖Pulse: full and accelerated, with erethism, frequent at night, slower by day; when slow it is weak and trembling; imperceptible, with warmth of body; irregular, generally full and fast, with violent beating in arteries, at times weak, slow, tremulous.

‖Pulse irregular, quick, strong and intermittent, or soft and trembling. θYellow fever.

[30] **Outer Chest.** Sweating on chest with old people, from opium.

[31] **Neck and Back.** ‖Rheumatic stiffness and swelling of neck.

‖Swollen glands on neck painful on swallowing. θRheumatism.

‖‖Glands inflamed, swollen, hard, with pressing pain and stitches. v.

Goitre becomes softened.

‖‖Bruised sensation of scapulæ, back and small of back.

‖‖Stinging pains in small of back, with sensation of weakness.

‖‖Sticking in small of back, on breathing. s.

‖Violent pain in spine, < from motion. θMeningitis.

‖‖Stitching pain in small of back and legs on being touched. s.

‖‖Stitching pain, with unsteadiness in back, knees and feet. s.

‖Erysipelatous inflammation extending from back like a girdle around abdomen. θZona.

‖‖Pricking itching in sacrum when walking.

‖Tearing pain in coccyx, > by pressing hands against abdomen; pain in sacrum as if one had been lying on too hard a couch; pricking itching in sacrum when walking. θCoccygodynia.

‖Acute inflammation of vertebræ.

‖Myelitis; paraplegia of extremities, of bladder and anus, with tendency to twitching and shocks; severe spinal pains < from pressure; restlessness and sleeplessness; anæsthesia of skin.

[32] **Upper Limbs.** ‖Rheumatism of shoulders and upper arms.

‖Rheumatic affection of capsular ligament of arm; arm as if too heavy, as if broken or beaten; < at night; cannot tolerate warmth of bed.

Google

‖Lacerating in shoulder joints, arms and wrists, especially at night and when moving part.
‖Red and hot (arthritic) swelling from elbow to wrist.
‖Burning, scaly herpes on forearms and hands.
‖Twitching of arms and fingers.
‖‖Tremor of hands, with great weakness. v.
‖Involuntary trembling of hands; could not carry a glass of water to mouth without spilling it; could take neither food nor drink, but had to be fed like a child. v.
‖Frequent involuntary jerking of hands and fingers; convulsions < by every exertion. v.
‖Eczema on l. hand gradually spreads to fingers and up to arm.
‖Eczema of hands; whole dorsal surface of both hands raw, denuded; commenced with cracks on joints; stinging, burning pain; surroundings inflame easily after scratching; every Winter for a number of years; moist surface becomes dry at times, forming in yellow crusts.
‖Eruption like moist itch on hands, with violent nightly itching; painful stiffness of r. wrist joint; contraction of fingers; painful and bleeding rhagades on hands; swelling of finger joints; exfoliation of finger nails.
‖Fingers of both hands flexed, especially thumb, so that it is completely drawn inward, as in epilepsy; without assistance is unable without great exertion to open fingers farther than about two-thirds; with trembling of hands. s.
‖Inflammation of cellular tissue beneath cutis, in sinews, their fasciæ and phalangeal joints; pains not violent, more throbbing and shooting; extremely sensitive to heat and cold. θPanaritium.

Lower Limbs. ‖Spontaneous luxation of r. hip joint; severe stitching pains, < from motion; r. thigh a finger's breadth longer than left.
‖Tearing in hip joint and knee, < at night or with pulsating pains; beginning suppuration.
‖Rheumatic pains in legs, with stinging, especially in hip joint, femur and knee, < at night; affected parts feel cold.
‖‖Dropsical swelling of legs; cold sweat on feet.
‖‖Painful swelling of metatarsal bones.
‖When first signs of disease manifest themselves; sharp stitches flashing periodically through joint; acute stitches in r. ilium at regular short intervals, and in anterior inferior spinous process of ilium; boring pain in r. glutei muscles; burning of nates; red pimple, with a white tip on nates, painful and stinging; tearing pain in hip joint, in knee and in femur, < during motion;

Google

tearing, drawing from heel to buttocks, < at night, with contraction and giving away of knees; limbs feel stiff when walking; stitches in thighs and legs during motion; involuntary twitching in limbs; trembling when walking, < about knees and in inguinal region; pain in r. thigh as if bruised, < after walking; during nightly slumber (without sleep) he feels a violent tensive pain in posterior part of l. thigh and in buttock, most violent between buttock and thigh, and extending as far as bend of knee; > in recumbent position, by supporting thigh; cannot sit on posterior part on account of pain, which is < periodically; single pointed stitches in region of external condyle of tibia, not in knee; spasmodic drawing up of legs; they remain contracted all night. θHip joint disease.

‖ Pain in sinews of l. thigh, which are sore to touch. s.

‖ Involuntary twitching and a kind of spasmodic adduction of legs and thighs.

‖ Soreness between thighs and genitals. s.

‖ Hard, glandular swelling in upper part of l. thigh, suppurated. s.

Tumor on upper part of l. thigh. s.

Small pimples on inner side of thighs. s.

Herpes on legs and thighs. s.

‖ Legs and thighs cold and clammy at night. θDysentery.

‖ Excessive weakness and giving away of knees and legs. s.

‖ Sensation as if knee was larger.

‖ Gonarthrocace after suppressed itch.

‖ Weariness and uneasiness in legs in evening. s.

‖ Could scarcely drag her limbs because they were so heavy. s.

‖ Tearing and stitching in lower limbs, at night and during motion, with sensation of coldness.

‖ Pressing pain in periosteum of r. tibia. s.

‖ Boring and drawing pain in tibia. s.

‖ Red, shining, hard swelling on r. tibia. s.

‖ High fever and swelling of leg. θPeriostitis of tibia.

‖ Ulcers on legs which bleed easily and become putrid, spongy and bluish.

‖ After abuse of mercury, two large ulcers on leg below knee; in paroxysms of perhaps a minute's duration, once in ten or fifteen minutes, lancinating darting pain, forcing screams; these sores were of two years' duration and were preceded by others, similar, two or three times healed by local treatment; commenced by a pimple, which being broken, formed into a deep foul ulcer, grey colored, slough thin, ichorous pus; inflamed, swollen, elevated edges, with a varicose condition of veins

Google

in vicinity; < by heat of bed, hot or cold applications, from pressure, motion, evening until midnight. s.

▮A woman, æt. 30, dark hair and complexion; about eight years ago had a fall, spraining l. ankle; soon after an ulcer which continued to spread; anterior and external surface of leg from ankle to middle third of thigh one mass of ulceration; spongy appearance, with elevations and depressions, constant ichorous discharge; constant pain, burning, stinging and gnawing, < from least touch; whole limb felt heavy and weary; gnawing, lacerating pain in knee joint; walking and standing painful; pains become unendurable from warmth of bed; enlarged and sensitive inguinal glands. s.

▮Tarsal bones of r. foot greatly swollen; acute pain; threatening suppuration.

▮▮Pain in r. tarsal joints, as if sprained. s.

▮After catching cold in a sudden shower, painful swelling of foot, followed by formation of abscess, from which was discharged a thin, watery secretion, swelling increased and eight fistulous openings formed, from which fragments of bone were discharged; miserable appearance; skin hot and burning; pulse feverish; loss of appetite; sleeplessness. θCaries of tarsal and metatarsal bones.

▮After wearing boots for several days, which he usually could not wear on account of swelling of tarsal bones of r. foot, violent pain in that part of foot, rapidly increasing; foot somewhat swollen and reddened, could not bear touch or motion; slight chill, with subsequent dry heat and full pulse.

▮Œdematous swelling of foot. θPeritonitis.

▮Swelling of backs of feet. s.

▮Cold sweat on feet.

▮▮Foot sweat scentless.

Limbs in General. ▮▮Trembling of extremities, especially hands.

▮Involuntary jerking in limbs; twitching of arms and legs.

▮▮Weakness and weariness in limbs; bruised sensation. s.

▮Arms and thighs sore to touch, can hardly move them.

▮Drawing and tearing in all the limbs. s.

▮Rigidity and immobility of limbs, though they can easily be moved by others. θParalysis.

▮Painful stiffness in limbs; use of all lost, except r. arm; face livid; no appetite; emaciated; in bed for a year; constipated; pain at night; < from changes of weather.

▮▮Convulsions mostly in extremities.

▮Syphilitis or strumous synovitis, chronic; tendency to complete destruction of joint; pains aching or stabbing, < at night and from external warmth.

Google

Abscess in joints.
Rheumatic and arthritic pains; tearing stinging, < at night in warm bed; with profuse sweat, no relief; œdema of affected parts, especially of feet and ankles; joints swollen, pale or slightly red.
Sudden pain and stiffness of nape of neck and of upper and lower limbs, probably brought on by exposure; lay motionless in bed, great weakness and lameness necessitating assistance when any change of position was desirable; could slightly raise r. arm; face sunken, earthy in color; emaciation of whole body; loss of appetite; sleep disturbed by nightly pains; pains < in change of weather; constipation, with pains in small of back.
Coldness of extremities, with cramps. θ Yellow fever.

35 **Rest. Position. Motion.** Lying; rotary motion of head; vertigo; burning in head <.
Lying still: throbbing in vagina >.
Recumbent position: colic passes off; tensive pain in thigh and buttock >.
Obliged to lie down: involuntary contraction of eyes; chilliness; prostration, with sick feeling of body and mind.
Must lie upon back with thigh flexed: on account of swelling between umbilicus and anterior inferior spine of ilium.
Lying on r. side: intestines feel bruised.
Unable to lie on r. side: on account of pain in head; stitches in liver; cough.
Lying on l. side: shooting in ears <.
Lay motionless in bed: from pain and stiffness of nape of neck and limbs.
Child wants to lie quietly in horizontal position.
Sitting: weariness <.
Sitting up: burning in head >; difficult, on account of swelling of external genitals.
Cannot sit up in bed for fear of falling: great weakness.
Cannot sit on posterior part of thigh: on account of pain.
Must bend double: colic.
By supporting thigh by laying something underneath: tensive pain in thigh and buttock >.
Cannot extend thigh: on account of swelling near r. ilium.
Standing: painful on account of ulcer on l. ankle.
Cannot stand erect: vertigo; pain in soles of feet.
Can neither stand nor walk: with great pain in inguinal glands.
Stooping: vertigo.
Motion: stitching pain in throat; violent pain in spine <; lacerating in shoulder joints, arms and wrists <; pain

Google

in hip joint <; tearing in hip joint, knee and femur <; stitches in thighs and legs; ulcers on leg <; of swollen r. foot unbearable.

Rising: tension over forehead >; burning in skin, with sweat <; vertigo.

Raising head: vertigo.

Moves r. hand towards head or thrusts hands into wide open mouth, l. arm remaining motionless.

Frequent chewing motion of mouth.

Could with difficulty chew: stiffness of maxillary joints.

Cannot separate jaw.

Eating causes sweat.

Can hardly move arms and thighs.

Slightest exertion: palpitation <; orgasm, with trembling; convulsions <; weakness, with ebullition and trembling; hot flashes; sweat.

Could not bear to walk: pain in soles of feet.

Walking: shaking sensation of bowels; cutting stitch in abdomen <; stitches in last r. rib; swelling of inguinal glands painful; swelling of urethra painful; pain in inguinal glands; shortness of breath; pricking itching in sacrum; limbs feel stiff; trembling in knees and inguinal region; bruised pain in r. thigh <; painful on account of ulcer on l. ankle; sweat.

Going up stairs: shortness of breath.

* **Nerves.** ‖Great irritability of all the organs. θYellow fever.

‖Involuntary motions, which can be momentarily suppressed by volition, or involuntary tremors. v.

‖Involuntary motions of head and hands. v.

‖Nervousness and trembling of hands.

‖Paroxysmal trembling.

‖General tremors, with stammering of speech. v.

‖Tremors always commencing in fingers. v.

‖‖Trembling of hands and tongue. v.

‖Tremor of hands so that he could not lift anything, eat or write; marked tremor of neck and lower extremities. v.

‖Jerkings. s.

‖Convulsions: with cries; rigidity, bloated abdomen, itching of nose and thirst; < at night; much salivation; child takes cold and salivation is arrested; mostly in extremities; epileptic, at night.

‖Great weakness, ebullitions and trembling from exertion.

‖Lassitude; weakness, approaching palsy. v.

‖Weary, especially while sitting, as if all his limbs would fall from him. s.

Weakness, with depression of spirits. s.

‖‖Very much exhausted after a stool. s.

▮Prostration, with an inexpressible sick feeling of body and mind, obliging him to lie down. s.
▮▮Frequent fainting. θMetrorrhagia.
▮Great debility. θRheumatism. θTyphoid.
▮Contraction of joints.
▮Rheumatic patients with night sweats, tearing, lancinating pains, sensation of cold in affected parts, < at night; great weakness; hot flashes from least exertion; pale face and evanescent redness on cheeks. θNeuralgia.
▮Paralysis agitans.
▮Paralysis of lower extremities. θSpinal meningitis.
▮Limbs stiff but can be moved by others. θParalysis.
▮▮Occasional jerks in paralyzed parts. θMeningitis.

[37] **Sleep.** ▮Great sleepiness: during day, not > by long sleep.
▮Sleepless at night: on account of anxiety, ebullitions and congestions; from itching; from seeing frightful faces; frequent waking.
▮▮Sweat during sleep.
▮▮Falls asleep late; wakeful until three in morning.
▮▮Excessive restlessness and malaise, with sleeplessness.
▮▮As soon as he went to bed in evening pains recommenced and banished sleep. s.
▮Just after falling asleep, pains become more violent. s.
▮Dreams: of water; thieves; animals; shooting; misfortunes.
▮Wakes with nervous trembling, thumping of heart and agitation, as if he had been frightened.

[38] **Time.** Towards morning: sweat; heat and violent thirst.
Morning: on waking, confusion in head; bad breath; toothache in paroxysms; tongue as if covered with fur; diarrhœa; vertigo; debilitating sweats; when rising, chill; vesicles in various parts of body.
At 1 A.M.: water collects in mouth.
Day: pressing or stitching pains in head; pain in eye; wants to sleep; chilliness; toothache; much thirst; cough; pulse slower, weak and trembling; sleepiness by day.
Afternoon: feeling of coldness in testicles.
5.45 P.M.: aching in ears.
Toward evening: tearing in lower jaw.
Evening: chilliness; fever <; feeling of coldness; general aggravation, with heat; weariness and uneasiness in legs; until midnight ulcers on leg <; as soon as he went to bed pains recommenced and banished sleep; after lying down, chill; in bed, sweat; chill; intolerable sticking itching here and there; tearing pains in elbows and joints.
From 9 P.M.: painfulness of gum.

Google

Day and night: sweat.

Night: tension over forehead <; pulsating in forehead <; restless; pain in exostoses; burning of skin, with sweat, < in bed; pain around eyes <; pain in eye; eruption around eye <; cannot sleep; keratitis pustulosa <; steady aching in eye <; boring pains preventing sleep; throbbing pain in parotid gland <; offensive discharge from ear <; pain in ears; bleeding from nose, with worm symptoms; coryza; copious, sour smelling sweat; throbbing in upper jaw <; pulsating toothache <; when toothache disappears, chilliness; jerking in teeth <; stinging pains in throat; profuse, clammy sweat; much thirst; eructations <; heartburn; zona <; frequent desire for stool <; restlessness; croupous stools; ineffectual urging to stool; sleeplessness <; thick discharge from urethra <; gonorrhœa <; much nervousness and anxiety; heat alternating with horripilations; moist tongue, with intense thirst; leucorrhœa <; tubercles on labia <; profuse salivation, wets pillow; lochial discharge <; exhausting cough <; cough in two paroxysms; profuse sweat; cough < lying on l. side; dyspnœa, with spasmodic cough; debilitating sweat; palpitation, with fear; pulse accelerated, with erethism; rheumatism of arm <; lacerating in shoulder joint, arms and wrists <; tearing in hip joint and knee <; rheumatic pains in lower limbs <; tearing from heel to buttocks <; pain in r. thigh; legs remain contracted; legs and thighs cold and clammy; stinging and gnawing in ulcers on l. ankle <; pain in all limbs; syphilitis or strumous synovitis, pains <; rheumatic and arthritic pains <; itching of nose and thirst <; epileptic convulsions; sleepless; chilliness, with frequent micturition; boring pains in exostoses; bone diseases painful; itching <.

Before midnight: great swelling of lids.

After midnight: ptyalism, with nausea <; heat, with violent thirst for cold drinks.

* **Temperature and Weather.** Open air: head as if in a vice, <; biting burning in eyes <; blepharitis <; stitches in last r. rib; bathing, causes croupous inflammation of rectum; chilliness.

In room: head feels as if in a vice, >.

Warmth: shooting in ear <; external pains <; syphilitic or strumous synovitis <.

Warmth of bed: tension over forehead <; pain in forehead <; throbbing pain in parotid gland <; shooting from teeth into face and ears <; zona <; cannot tolerate, rheumatic affection; ulcers on leg <; rheumatic and arthritic pains <; itching of whole body <.

Google

Warmth of stove: does not > chill.
Warm drink: causes sweat.
In hot Summer: wears a heavy overcoat.
Heat: eyes <; eyes very sensitive; toothache <; extremely sensitive.
Least atmospheric variation: attacks of cramps of stomach; painful stiffness of all limbs <.
Either cold or warm air: coryza.
Cold or warm things: toothache <.
Hot or cold applications: ulcers on leg <; cancerous ulcers pain.
Washing: throbbing in vagina <; violent burning of skin.
Cold water: blepharitis <.
Damp weather: pains in eyes <; coryza <; toothache returns.
Coldness of damp places: eyes very sensitive.
Wet, cold weather: stinging pains in throat.
Bad weather: ulcers in throat <.
Aversion to uncover: heat.
Cold: cannot bear it; eyes sensitive; shooting in ear >; throbbing in vagina <; extremely sensitive.
Cold air: tongue painful: stinging in throat; asthma >; when undressing, itching.
Draft of air: pain in vagina; hoarseness <.
Evening air: toothache; colic; diarrhœa.
Night air: cough <.
Cold drinks: great thirst, with heat.
After catching cold in a sudden shower: painful swelling of foot, followed by abscess.

Fever. Sensation of coldness, with tremors, though without diminished temperature. v.
Chilliness: on going into open air: as from cold water poured over one; in abdomen; while at stool; at night, with frequent micturition; between diarrhœic stools; internal, with heat of face; in daytime, obliging to lie down; wore a heavy overcoat in hot Summer.
Constant cold hands and feet. s.
Chill: in morning when rising, but more generally in evening after lying down, as from cold water poured over one; not > by warmth of stove; alternating with heat often only on single parts; internal, with heat of face.
Heat: in bed, chill when out of bed; after midnight, with violent thirst for cold drinks; anxious, with sensation of pressing together of chest, alternating with chill; with aversion to uncover.
Sweat: profuse, offensive; does not >, may even < suffering; on every motion, immediately on drinking

something warm; while walking; day and night, though more at night; in evening in bed; falls asleep while perspiring; profuse and very debilitating at night; in morning; towards morning, with thirst and palpitation or nausea; from least exertion, even when eating; clammy and cold, driving out of bed; peculiar, sour smelling, shrivelling fingers and bedewing feet; profuse, cold on face though rest of body is dry; offensive, cold, oily, clammy and burns skin; soaking through bedclothes; stains linen saffron yellow; cannot be removed by washing; profuse, fetid, tinging linen yellow and stiffening it.

- Complaints increase during sweat.
- Intermittent fever: evening chill; heat and violent thirst or thirst towards morning; during sweat, palpitation and nausea; sweat fetid or sour.
- Continued or remittent fevers, particularly when complicated with enlargement or subacute inflammation of liver.
- Worm fever, with intestinal inflammation and diarrhœa.
- Hectic fever, especially of children.
- Mucous fever, with prostration.
- Catarrhal, rheumatic fever, after catching cold.
- Typhoid fevers, with marked icteroid or scorbutic symptoms.
- Obtuseness of mental operations, with great inclination to sleep; heaviness and muddledness of head; thick and dirty coating of tongue; insipid, pappy, slimy, foul taste, with desire for refreshing things; thirst, painful sensitiveness of præcordial, hepatic, umbilical and ileo-cæcal region; bilious, slimy or watery diarrhœa, which, however, may be absent; prostration; sometimes copious, debilitating perspiration; pale; sunken face and eyes; dirty, yellowish color of face. *θ* Typhoid fever
- Yellow color of skin; red eyes; bloodvessels of sclerotic injected; eyes sensitive to light; paresis of one or more limbs; tongue moist, with thick, white coating or dry and covered with brown mucus; pulse irregular or quick, strong and intermittent, or soft and tremulous; great disposition to sleep, or sleepless from nervous irritation; feeling of weakness and prostration; rapid loss of strength; vertigo or severe headache; convulsive vomiting of slime and bilious matter; burning pain and sensitiveness of stomach; constipation or diarrhœa; evacuations slimy, bilious or bloody; coldness of arms and legs, with cramps, irritability and sensitiveness of all the organs; anxiety and restlessness; weak memory; timorous, depressed, complaining; delirium. *θ* Yellow fever.

Google

" **Attacks, Periodicity.** Alternates: toothache, with giddiness and tearing in limbs; croupous and pappy fecal stools; heat and horripilations.
Periodical: flashes of sharp stitches through hip joint; < pain in thigh and buttock; burning as of fire in eruption.
Two paroxysms of cough in rapid succession at night, followed by long interval of rest.
At regular short intervals: acute stitches in r. ilium.
Every few minutes: attacks of toothache; urging to urinate.
In paroxysms of perhaps a minute's duration, once in ten or fifteen minutes; lancinating, darting pain in large ulcers on leg.
Every quarter or half hour: terrible continuous shrieking for one or two minutes.
Every half hour: diarrhœic discharges.
Every hour: discharge of a round, shreddy mass from bowels; obliged to urinate.
Every night: pains deep in eye <; at 12 o'clock, intolerable pain in eye; swelling of gums; pains in teeth; painful erections; violent itching of eruption on hands.
From 9 A.M. until 5 or 6 P.M.: frequent paroxysms of cough.
For a week or ten days: redness of erythema.
Fourteen days after childbirth: eruption of vesicles on neck, shoulders, chest and abdomen.
Every two weeks: menses.
At every menstrual period: pain in mammæ.
In all phases of moon: frequent attacks of cramps in stomach.
At third month: repeated miscarriages.
Spring and Fall: stinging pains in throat.
Every Winter for a number of years: eczema of l. hand.
For one year: failing sight.
Two years' duration: sores.
For two years: indications of hydrocephalus.
For two or three years: menses irregular.
Fourteen years' duration: chronic otitis.

" **Locality and Direction.** Right: scotoma of eye; as if ear was stuffed up; offensive smelling discharge from ear; could not be heard on side; auditory canal occluded by polypi; in forepart of ear a sac of matter; pain in whole half of head and face; bloody and offensive matter flows from ear; mumps; ranula; swelling of tonsil; patches on throat; cannot lie on side; stitches in liver; great distension of hypochondrium; pressure in side; lying on side, intestines feel bruised; painful swelling near ilium; stitches in last rib; pressive boring pains in groin; zona on side; tenderness over hypochondrium; testicle swollen, hard, as large as hen's egg; scrotum red,

Google

shining; tearing in head; acute pain through chest to scapula; stitches in chest; acts on lower part of lung; tenderness over hypochondrium; painful stiffness of wrist; spontaneous luxation of hip; thigh finger's breadth longer than l.; stitches in ilium; boring in glutei muscles; thigh as if bruised; pressing in periosteum of tibia; swelling on tibia; tarsal bones swollen as if sprained; loss of use of arm; tetters on forearm.

Left: tearing or pressive pain in temple; burning in temple; dryness and swelling of eyelid; sticking and burning deep in ear; roaring and rumbling in ear; shooting from ear to temple; watch could be heard only at distance of one and a half inches; inflammation of ear with deafness; throbbing in upper jaw; throat swollen; beating in præcordia; headache in temple; stitching in side of abdomen; pain in testicle; burning and itching of vagina; numbness down leg; cough < lying on side; stabbing under short ribs; eczema of hand; pain in thigh and buttock; pain in sinews of thigh; glandular swelling in upper part of thigh; tumors on upper part of thigh; sprained ankle, then an ulcer appeared; tarsal bones of foot greatly swollen; eruption on arm; tettery spot on cheek bone.

First l., then r.: hemorrhage from ears; ringing, whistling in ears; shooting in ears; aching in ears.

From r. to l.: cutting stitch in lower abdomen.

" **Sensations.** As if there was a vibrating in forehead and a turning about in a circle; as if in a swing; forehead as if bandaged or in a hoop; pain as if just beneath scalp, as if it was too heavy and tight on brain; as if head would burst; head as if constricted by a band; head as if in a vice; head as if getting larger and larger; eyes as if long deprived of sleep; as if sparks of fire were being emitted from eyes; eye as if it was a ball of fire; as of a body underneath lids; as if feathers came from corners of eyes; as of sand in eyes; as of fiery points in eyes; as if r. ear was stuffed up; ears as if stopped by swelling; as though a wedge was driven in ear; crackling in head as from metal plates; as if teeth were fixed in a mass of pap; as if teeth were loose or too long; as if foreign body was swallowed down; as from hot vapor ascending from stomach; throat as if too tight posteriorly; as if an apple core was in throat; as if food had to pass over a foreign body; as if there was a burnt spot; pressure in abdomen as from a stone; as if bowels had to be held up; as if bowels fell to side on which he lies; intestines as if pressed; stabbing in abdomen as from knives; as if bowels were cut to pieces; as if bowels

Google

would be forced out; as of something heavy pulling downward close above genitals; as if muscles and tendons were too short; as if mammæ would ulcerate; as if everything in chest was dry; as if head and chest would burst; weakness at heart as if dying; agitation as if frightened; pain in sacrum as if one had been lying on too hard a couch; arm as if too heavy, as if broken or beaten; pain in r. thigh as if bruised; as if knee was larger; pain as if sprained in tarsal joints; as if all his limbs would fall from him; pain in bones as if broken: itching as from fleabites; burning as from fire in eruption.

Pain: in bone beneath eyebrow; in periosteum and bones of face; in forehead; around eyes, on forehead and temples; in sole of foot; around ear down jaw; in ears; in whole r. half of head and face; of salivary glands; in parotid glands and muscles of neck; from throat to ear; in shoulders; in limbs; in region of liver; in rectum, sometimes to back; over r. hypochondrium; in l. testicle and along cord; in inguinal region; in mammæ; in small of back: in chest; in sacrum; in r. thigh; in sinews of l. thigh; in r. tarsal joints; in bones; in bowels.

Frightful pain: in bowels.

Raging pain: in forehead.

Sore, maddening pain: in mammæ.

Intolerable pain: in eye; in whole head, < in ears.

Violent pain: in head; in eyes; in spine; in foot.

Acute pain: striking forward through chest to r. scapula; in tarsal bones of l. foot; in impetigo figurata.

Severe pain: in eyes; in tongue; in head; at anus; in spine; in ulcers in mouth.

Severe dull pain: in occiput.

Tearing pain: in forehead and vertex; in l. temple; from head to teeth and neck; in eyes; in ears; in lower jaw; in limbs; in head; in coccyx; in hip joint and knee; in femur; in lower limbs.

Tearing, lacerating, shooting: into face and ear.

Tearing, lacerating: in face.

Tearing, drawing: in head; from heel to buttocks.

Lacerating: in shoulder joints, arms and wrists.

Stabbing: in abdomen; in l. side under short ribs.

Lancinating, darting: in ulcers on leg; in cancerous ulcers.

Lancinating, boring, pressing: in abdomen.

Tearing, constricting, pinching: in abdomen.

Lacerating, tearing, stinging: in bones of skull.

Gnawing, lacerating: in knee joint.

Boring, tearing, stitching: in ears.

Pressive, tensive tearing: in forehead, cheeks, upper teeth and ears.

Google

Boring: from head to teeth and neck; in eyes; preventing sleep; in uterus; in r. glutei muscles; in tibia; in exostoses.
Cutting: in eyes; in intestines; in abdomen; from stomach to genitals; in abdomen.
Dull, cutting, pressive pain: underneath lids.
Burning, gnawing: in eyes.
Pinching: in ear; in abdomen.
Pressive boring: in r. groin.
Violent beating: in arteries; in l. præcordia.
Severe throbbing pain: in l. upper jaw; otitis; of vagina.
Throbbing, shooting: in eye.
Pulsating pains: in hip joint and knee.
Violent stitches: in hepatic region; in r. ilium.
Transient stitches: in body and limbs.
Stitching, tearing, pressing, burning: deep in ear to cheek.
Stitching, tearing: in hollow and carious teeth; under false ribs and in hepatic region.
Single pointed stitches: in region of external condyle of tibia.
Stitches: through whole head; in ears; in eyes; deep in eyes and temples; in teeth; posteriorly in throat; in occiput; in liver; in last r. rib and inguinal region; in back and scapula; through chest to back; in anterior and upper portion of chest; in r. chest; in glands; flashing periodically through hip joint; in thighs and legs; from head to teeth; in r. hypochondrium; in region of liver; in uterus; in small of back and legs; in hip joint, knees and feet; in lower limbs; in red spots on small of back.
Cutting stitch: in lower abdomen.
Severe shooting pain: from deep within eye; in ears; from l. ear to r.; from l. ear to l. temple.
Stinging, tearing: in ears.
Sharp sticking: in eyes; in fauces; deep in both ears; in tonsils; in small of back.
Severe stitching, burning: in whole convex portion of liver to spine.
Stinging: in jaw; in throat; in fauces; in region of liver; in urethra; in small of back; in hip joint, femur and knee; in pimple on nates.
Violent griping: in bowels.
Twisting, constricting pains: in abdomen.
Violent tensive pain: in posterior part of l. thigh and in buttock, extending as far as knee.
Cramps: in stomach.
Dragging: in loins and lumbar region.
Drawing pain: from testicles into abdomen, down legs to feet; in testicles, groin and spermatic cord; in inguinal region; in tibia; in nape and down back.

Google

Pulling pain: in both thighs.
Aching: in eye; in ears; in teeth; in uterus; at apex of heart.
Pressive pain: in l. temple; in head; in liver; in glands; in periosteum of r. tibia.
Dull pain: in region of liver.
Sudden pain: in nape of neck and upper and lower limbs.
Rheumatic pains: in head; in limbs; in legs; of shoulders and upper arms.
Aching, pressing pain: in eye.
Sore pain: deep in pelvis; in mammæ.
Pricking pain: in ulcers.
Extremely painful: orifice of excretory duct of salivary gland.
Raw pain: at edges of lids.
Intolerable biting pain: on tongue.
Burning: in urethra; in genitals; after scratching; from head to teeth and neck; in eyes; in ears; in stomach; in bowels; in back; in herpes zoster, like a girdle from back around abdomen; in head, < l. temple; in forehead; of skin of forehead; in eyes; in gums; in throat; in region of larynx; of skin; at anus; of penis; of vagina; from fauces down; in scaly herpes; of nates; of tetter in bend of elbows, inguinal region and hollow of knee.
Burning, biting: during micturition.
Stinging, burning: eczema of hands.
Biting: in eyes; in genitals.
Heat: in eyes; around eyes; rises in throat.
Burning rawness: in larynx.
Burning, stinging, gnawing: in ulcers on leg.
Pricking, stinging: in veins.
Pricking: in ears; in tongue.
Bruised feeling: in intestines; of scapulæ, back and small of back.
Soreness: of hemorrhoids; exostoses; on sides of head; of top of head; of lids; of nose; of inner ears; of teeth; of corners of mouth; of mouth; of hepatic region; of intestines; of hemorrhoids; in region of bladder; of foreskin; between scrotum and thighs; of groins; of nipples under sternum; from fauces down.
Painful pressure: in region of pharynx.
Painful dryness: in throat.
Painful stiffness: of r. wrist joint.
Painful tension: in knee and elbow joints; in wrists and ankles.
Sensitiveness: of lymphatic vessels of nymphæ.
Tenderness: across hypochondria and epigastrium; over r. hypochondrium.

Google

Rawness: in throat; of anus and adjacent parts; in genitals; of nipples.
Scratching sensation: under manubrium.
Pulselike jerking: from teeth to lower jaw into ear, from upper jaw into head.
Throbbing: in veins.
Pulsating: in forehead; in head; toothache; in abdomen.
Twitching: of lids; of arms and fingers; in limbs; of arms and legs.
Thrill: in urethra when urine passes.
Trembling: of whole body; of heart; of extremities; of hands and tongue.
Spasmodic contraction: when coughing or sneezing.
Pressure: in ear; in abdomen; in head; in forehead; in eyes; on tongue; in throat; in stomach; in epigastrium; in abdomen; in genitals; from stomach to genitals.
Tension: over forehead; in articulation of jaw; in region of pharynx; of præcordium.
Pressing together: of chest.
Constriction: of lids; of stomach; in rectum.
Bearing down pressure: in lower abdomen.
Drawing: in limbs; with pressure in testicles.
Rheumatic stiffness: of neck.
Fulness: in ear; in head; across epigastrium and hypochondria; in rectum.
Oppression: in epigastrium; of chest.
Uneasiness: in legs.
Heaviness: in head.
Weight: in lungs.
Weariness: in legs.
Confusion: in head.
Shaking sensation: of bowels.
Rumbling sensation: in abdomen.
Weakness: at heart.
Weakness like a dulness: in head.
Peculiar weak feeling: in abdomen.
Tickling: in larynx; in throat; beneath upper portion of chest; in bronchia.
Roughness: in throat; from fauces down.
Dryness: of tongue; of lips; of eyelids; of palate; in mouth; in throat; in bronchia; in chest.
Numbness: down l. leg.
Intolerable sticking, itching: here and there over body; prurigo.
Intense itching: by presence of urine on parts; in eruption on hands; on all parts of body.
Terrible itching and burning: on various places.
Voluptuous itching: of tetter on r. forearm.

Google

Biting, itching: over abdomen.
Itching, stitching: impetigo figurata.
Pricking, itching: in sacrum.
Sensitive itching: of labia majora.
Itching: in eyes; in ears; in nodular eruption on legs; in nose; in gums; of anus; in scrotum; of vagina; of genitals; over whole body; of herpes zoster.
Coldness: in ears; in testicles; in lower limbs; of arms and legs.

" **Tissues.** ‖Ascites from organic lesions of liver; anasarca after scarlatina.
‖Œdema of face, hands and feet, with anæmia.
‖Blood coagulates easily; throbbing or pricking stinging in veins.
‖Epistaxis; hemorrhages in old women after climacteric period; hæmaturia in typhoid fever; blonde hair, lax skin and muscles; tongue and mouth moist, with thirst; sweat of feet without odor; disposition earnest, anxious; blood light colored; scorbutic condition of gums. θHemorrhages.
‖‖Bone pains; < at night; boring pains in exostoses.
‖‖Glandular swellings, with or without suppuration, but especially if suppuration is profuse.
‖Exostoses; caries; pains in bones as if broken.
‖Abscesses in joints.
‖Rheumatic-catarrhal inflammations, with disposition to sweat.
‖Rheumatism, especially in cases of syphilitic origin or complication, affecting joints, bones, or periosteum; swelling of joints, pale or slightly red, puffy or œdematous; pains tearing, drawing, shooting, pressing; in bones as if broken; in joints as if sprained; < evenings and at night, and insupportable in heat of bed; accompanied by profuse sweat (often sour or offensive smelling) without > pains.
‖Gouty, shining red swellings.
‖Gouty and rheumatic pains, with sweats without relief.
‖Excessive emaciation. v.
‖Glandular swellings with or without suppuration.
‖Cold swellings; slowly suppurating abscesses.
‖Suppuration, especially if too profuse.
‖Ulcerations: very superficial and widespread; with whitish grey bases, bleeding easily and exuding thin matter; spreading, spongy, readily bleeding and extremely painful; unequal elevations and depressions in floor of ulcer; cancerous, with severe shooting, lancinating pain, not > by either hot or cold applications; fungous, chancrous, phagedenic, carious and syphilitic.

Google

‖‖Chancre; gonorrhœa; blenorrhagia uretheralis and vaginalis.
‖‖Erysipelatous inflammation, especially about joints.
‖Gangrene of lips, cheeks and gums; inflammation and swelling of glands of neck; pains < by hot or cold applications.
‖Breath and whole body smell foul. v.

" **Touch. Passive Motion. Injuries.** Touch: pain in bones; feeling of soreness of exostoses; external head painful; scalp painful; pain around eyes <; lids sensitive; gums painful; teeth painful to touch of tongue; lips painful; stomach sensitive; liver tender; swelling in ileo-cæcal region painful; rectum painful; soreness of region of bladder; swelling of urethra painful; causes bleeding of ulcers; cannot bear it on swollen r. foot; arms and thighs sore; herpes burning.
Laying hand on forehead; tension >.
When taken hold of: painfulness of nasal bones.
Contact: of teeth, severe pain in teeth; of food, tongue painful; abdomen painful; skin extremely sensitive to clothes; violent burning of skin.
Heavy pressure: in inguinal glands causes pain.
Pressure: swelling over parietal bone fluctuates; tongue painful; external, tension in pharynx <; pain in liver <; swelling of inguinal glands painful; nodes on tibia sensitive; pain in spine <; ulcers on leg <.
Pressing hand against abdomen: > pain in coccyx.
Rubbing: toothache >; of genitals at night in bed; violent burning of skin.
Wearing boot on swollen foot: caused violent pain.
Scratching: scalp causes bleeding; causes bleeding of yellow scurf on face; of genitals at night in bed; biting in genitals changes to violent burning; eczema on hand inflames surroundings; itching becomes pleasant; causes burning in eruption.
Riding: pulsating in forehead >.
After fall: scotoma of r. eye; sprained l. ankle, then an ulcer appeared.

" **Skin.** ‖‖Yellow skin. θYellow fever. θIcterus.
‖Jaundice, with biting itching over abdomen. s.
‖Skin chafed, sore.
‖Itching over whole body, especially at night in bed, when getting warm.
‖Itching that becomes pleasant on scratching. s.
‖Violent itching on all parts of body, is obliged to scratch a great deal at night. s.
‖Intolerable sticking itching, here and there over body, as from fleabites, in evening. s.

Google

Intolerable itching all over body, assuming appearance of nettlerash.

Nocturnal itching without eruption.

Insensibility of skin. θMeningitis.

After use of rosin plaster on pit of stomach, terrible itching and burning in various places, gradually spreading over body; < at night in bed. s. θPruritus cutaneus universalis.

Erythema, upon which vesicles form and pour out a thin, clear fluid; vesicles quickly broken, contents dessicate, redness remains for a week or ten days. v.

Round spots shining through skin, of a coppery red color.

Exanthemata spreading from pit of stomach over abdomen and chest. v.

Small, flat, light red blotches on sexual parts, abdomen, chest and inner side of thighs. v.

Red spots covered with small vesicles of size of millet seed, filled with purulent lymph. v.

Grey flat scurf on a swollen spot. s.

Scurfy eruption beginning on head and spreading over whole body.

Dry, rashlike, readily bleeding eruption. s.

Ulcerated, incrusted pimples. s.

Desquamation all over, especially from backs of hands and from feet. s.

Circular crop of miliary papulæ, raised and rough, bright scarlet, irritable, itching, scratching at night, rough spot on forehead at times; face pale and puffy, frequently changes color; after day or two spot became moist and much humor was exuded; tongue rough like a strawberry from papillary enlargement and covered with a white film; very susceptible to cold. θIntertrigo of arms.

Eruption commencing upon forearms and chest and gradually extending over whole body (except face and posterior surface of upper and lower extremities); it begins as small, scattered, red spots, as large as peas, gradually enlarging in a circular form, run together and become continuous; color at first light red, afterwards either scarlet or bluish red, darker on margin and lighter in centre; as spots enlarge skin in their centre becomes healthy; they are slightly elevated, rough and dry, and covered with small whitish scales, which are continually rubbed off by clothes and redevelop, so that in evening clothes look as if sprinkled with meal; tetter < in axillæ, bends of elbows, inguinal regions and hollows of knees burning and paining continually, when first making their appearance accom-

Google

panied by some fever; affected portions of skin swollen, red and extremely sensitive to contact of clothes; use of arms impeded; sleep wanting or very restless; itching on contact of cold air when undressing, disappearing in warmth of bed; violent burning after contact, rubbing, washing, or taking wine; axillary and inguinal glands swollen; in some places, as for example, in inguinal region, small, superficial, moist ulcers develop on tetter, which after some days become covered with yellow scabs and heal; tearing pains in joints, especially elbows and knees, in evening; on palms of hands, small transparent vesicles without sensation. s.

Eczema, yellow crusts and inflamed surroundings after scratching, on face, legs and bends of extremities. s.

Moist eczema on forearms and legs.

Whole body with exception of face covered with small, elevated, dark red spots, close to each other, resembling measles; on inner side of arms and legs, and on hands and feet, eruption presents an unbroken, dark red surface, in these parts skin is also swollen; on flexing arms and when walking, painful tension in knee and elbow joints; same pain in wrists and ankles; vesicles filled with yellow serum upon surface of eruption, near ankles; small, thin, white scurfs on surface of eruption; slight itching; painful burning < from touch, rubbing, in evening and during night. θEczema.

Rash on forearm, measle shaped, over whole body, but particularly on chest, thighs and lower part of back. s.

Herpes burning when touched, humid, with large scales on edges.

Moist vesicles surrounded by dry scales, easily bleeding.

Very small transparent vesicles, containing water, appear in various parts of body, in morning before daybreak. s.

Itching pimples and watery vesicles. s.

Herpetic spots and suppurating pustules sometimes running together, forming dry and scaly spots, or crusts and acrid discharges.

Herpes zoster, burning pains, with gastric disturbance; like a girdle from back around abdomen; much itching and tendency to suppurate.

Red spots in small of back with stitching pains; during course of several days more spots appeared, eruption extending towards navel and nearly encircling body; girdle of eruption about three fingers wide, watery discharge on scratching; periodical burning as of fire in eruption. θZona.

Fourteen days after childbirth, eruption of vesicles as

large as peas on neck, shoulders, chest and abdomen, down as far as umbilicus; lochia scanty; pain in small of back; vertigo; great redness of face; white coated tongue; offensive taste in mouth; thirst; sleeplessness; great restlessness; trembling of limbs; heat and chilliness. θVesicular eruption.

Excoriations of a tettery nature oozing constantly and bleeding easily when scratched.

Phagadenic blisters.

Impetiginous and furfuraceous herpes. s.

Itch: dry, rashlike, easily bleeding; fat, especially in bends of elbows, some of vesicles become pustular.

Itching eruptions, burning after scratching.

Skin dirty yellow, rough and dry; scaly, dry tetters; eruptions of not inflamed, little red elevations, points of which peel off, on l. arm; red, round, scaly spots, one inch in diameter, on forearm and wrist; rough, partly reddish, partly whitish, tettery spot on l. cheek bone; dry, elevated, burning itching tetters on whole body, especially on legs, arms, wrists and hands, even between fingers; tetter on r. forearm, which peels and causes a voluptuous itching; places which have remained free from impetigo mercurialis turn rough, dry, crack and peel off constantly in white, branlike scales, especially on scalp, whiskers and eyebrows, without attacking face; deep rhagades, like cuts, on hands and fingers, especially on their inside, their basis looks raw and bloody and they are very painful. θPsoriasis.

Itching so intolerable it almost sets him crazy if he gets a little warmer than usual when at work; when he first gets into bed, the cool sheets feel so nice he goes right to sleep, but after sleeping about half an hour, he is awakened by itching and has to get out of bed and walk floor until sheets get cool again; skin covered with crusts and papulæ. v. θPrurigo.

Stinging and burning; surroundings inflame after scratching. θImpetigo.

Impetigo figurata; considerable suppuration under crusts; itching, stitching and very acute pains; eruption has a tendency to spread.

Eruption of pustules varying in size from a millet seed to a large pea and filled with thick yellow matter, discharges after two or three days, making parts sore; commenced on one foot, extending to knee, and in running together made one continuous sore; then eruption appeared in like manner on abdomen and on back of head; scattering pustules on hands, arms and all over body; child thin and pale; very restless; difficult to

Google

lie in any position so that it could sleep, on account of having to lie on sores; all symptoms much < by warmth of bed at night. s.

▮Suppurating pustules which either run into one another, discharging an acrid humor, or remain sore, become hollow, afterwards raised and cicatrized; pustules bleed easily and are painful to touch. θEcthyma.

▮Diarrhœa with pain in bowels and tenesmus; moist, barking cough without expectoration; cough is almost convulsive and cannot be controlled, occurring in frequent paroxysms, particularly from 9 A.M. till 5 or 6 P.M. θMeasles.

▮Tardy development of eruption; fever; bronchitis. θMeasles.

▮During desquamation entire mucous membrane of mouth covered with flat, lentil sized ulcers with lardaceous base and causing severe pain while eating; edges of forepart of tongue and gums also covered with ulcers. θMeasles.

▮Burning heat; face very red and swollen; thirst; restlessness; fright and starting during sleep; delirium; sensorial depression and sopor; great oppression of chest; short, quick respiration; anxiety before appearance of eruption; eruption of slightly elevated papillary red spots, as large as a linseed, upon a reddish base, latter finally assuming a pale red appearance; skin at one time burning hot, at another moist; tongue dry, brown at tip, with elevated red papillæ; cutting in abdomen, diarrhœa. θScarlatina.

▮Anginose variety; dirty yellow coating on tongue, clean at tip; foul breath; itching and restlessness < by sweating; swelling of parotid, submaxillary and lymphatic glands; ptyalism, hawking and spitting. θScarlatina.

▮▮Varicella; water blotches turn yellow and maturate. s.

▮▮Variola: in stage of maturation; dysenteric symptoms.

▮▮Erysipelas: spreading from back around upon abdomen; of syphilitic origin; simple and phlegmonous.

▮Erysipelas of newborn children of syphilitic or scrofulous nature: a few days after birth red spots appear upon skin, especially about groins, on scrotum and thighs; spots at first pale, gradually assume a brighter red color, forming a sort of intertrigo, the discharge of which is of an offensive odor and has a tendency to become purulent; finally bright red spots appear upon lower abdomen and region of navel, gradually becoming erysipelatous in character, and as this progresses primary seat of eruption also assumes an erysipelatous character; diarrhœic, fermented stools and considerable fever.

Google

In dropsical patients rapid disappearance of swelling and appearance of offensive, rapidly decomposing ulcers on thighs. s.

Ulcers: large, bleeding, margins everted like raw meat, their bases covered with a caseous coat; superficial, flat, readily bleeding, base lardaceous, < from heat of bed and hot or cold applications; round, of an impure lardaceous surface, with inflamed, elevated, turned up edges and pricking pain; serpiginous.

Primary and secondary syphilis; round, coppery red spots shining through skin.

Boils after pus has formed.

Panaritium when inflammation extends to sheaths of tendons and ligaments of joints.

Carious ulcers.

Stages of Life, Constitution. Suitable for light-haired persons with lax skin and muscle.

Often indicated with women and children.

Boy, æt. 12 days; cerebral hernia; ophthalmia neonatorum and aphthae.

Child, æt. 14 days, suffering eight days; thrush.

Child, æt. 4 months; scurfy eruption.

Child, æt. 5 months, suffering two days; bilious colic. s.

Child, æt. 1, thin and pale; pustular eruption. s.

Two children, æt. 1; diarrhœa.

Girl, æt. 1¼, had itch; otorrhœa and eruption on face and legs.

Boy, æt. 2, robust; prolapsus of rectum.

Boy, æt. 2; pneumonia.

Girl, æt. 2, suffering three months; scrofulous inflammation of eyes.

Child, æt. 2, scrofulous, suffering for more than a year; inflammation of eyes.

Boy, æt. 3, suffering two years; hydrocephalus.

Child, æt. 3; glossitis.

Boy, æt. 3, suffering thirteen days; ulcers in mouth.

Girl, æt. 3; inflammation of parotid gland.

Boy, æt. 3½, suffering two weeks; ulcerated mouth.

Girl, æt. 4, often has rawness behind ears, glandular swellings and inflammation of eyes; eruption on lips.

Girl, æt. 4, suffering four weeks; diarrhœa.

Boy, æt. 4; intertrigo on arms.

Boy, æt. 4½, stout, but hydrocephalic head, broad nose, thick lips, had had tinea and swollen glands, and suffered frequently from eyes; keratoiritis.

Girl, æt. 5, scrofulous, after scarlet fever; acute hydrocephalus.

Child, æt. 5, sickly; periostitis of tibia. s.

Google

Girl, æt. 5, after being ill four days; typhoid fever.
Child, æt. 7; purpura hemorrhagica.
Girl, æt. 8, suffering eight days; inflammation of eye.
Girl, æt. 8, has suffered from repeated attacks; keratitis pustulosa.
Girl, æt. 8; scrofulous ophthalmia.
Boy, æt. 8; diphtheria. s.
Girl, after catching cold; sore throat. v.
Girl, æt. 10, suffering four weeks; luxation of hip joint.
Girl, æt. 12, strong; inflammation of submaxillary gland.
Boy, æt. 12; zona.
Girl, æt. 14, during an attack of influenza; typhoid fever.
Boy, æt. 14, strong; inflammation of brain.
Girl, æt. 15; inflammation of sublinguinal gland.
Boy, æt. 15, after disappearance of itch; affection of knee.
Boy, æt. 15; ulcers in mouth.
Boy, æt. 16, after fourteen days of previous illness; dysentery.
Girl, æt. 17, menses suppressed; vertigo.
Boy, æt. 17, caught after an attack of pain in joints, accompanied by a vesicular eruption on arms; otitis.
Man, æt. 18; chancre.
Girl, æt. 18, brunette; ranula.
Girl, æt. 19, strong, blonde, blue eyes, delicate skin; rheumatic ophthalmia.
Man, æt. 19, strong, florid complexion; stomatitis.
Girl, æt. 19, well nourished, plethoric; dysentery.
Man, æt. 19, weaver, phlegmatic, scrofulous, had suffered from glandular swellings in r. axilla; swelling of glands of neck.
Man, æt. 20; ulcers in mouth.
Man, æt. 20, strong; swelling of submaxillary gland.
Girl, æt. 20; syphilis.
Woman, æt. 24, lymphatic temperament, after catching cold in a shower; caries of bones of foot.
Soldier, æt. 24, choleric temperament; dysentery.
Man, æt. 24; chancre.
Woman, æt. 24, unmarried, gouty tendency; gout.
Mrs. S., æt. 25, blonde, tall and thin, mild disposition, has been confined to bed most of time with womb disease for three years; ulceration of cervix uteri.
Man, æt. 25; chancre.
Woman, æt. 26, unmarried, suffering from tuberculosis; morning sweats.
Man, æt. 27, four weeks ago had gonorrhœa, discharge after three weeks duration ceased of itself; swelling of testicle.
Man, æt. 27; chancre.

Google

Woman, æt. 27, unmarried, subject every Autumn to attacks of angina; rheumatic pains.
Woman, æt. 28, six months ago became mother of second child; peritonitis.
Man, æt. 28, weak, melancholy temperament; chancre.
Man, æt. 28, had measles when six years old, since which time has been suffering; otorrhœa and deafness.
Woman, æt. 29, scrofulous, suffered formerly from eruptions on head; cephalalgia and desire to commit suicide.
Woman, æt. 30, during childhood had an eruption on face and since womanhood is subject to profuse and too early menstrual discharge, suffering three months; toothache. s.
Man, æt. 30; chancre.
Man, æt. 30, sanguine nervous temperament, delicate complexion and body, has lived for some time in Brazil; syphilitic ophthalmia and rheumatism.
Woman, æt. 30; irregular menstruation.
Man, æt. 30, subject to rheumatism and gastric and intermittent fevers; typhoid fever.
Man, æt. 30; syphilis.
Man, æt. 30, suffering three weeks; hæmaturia.
Woman, æt. 30, childless; dysuria.
Woman, æt. 30, delicate constitution, gentle disposition, for one year has noticed a marked decrease of visual power, particularly of r. eye; amblyopia.
Woman, æt. 30, dark complexioned, eight years ago fell and sprained l. ankle; ulcer on leg. s.
Widow, æt. 32; diarrhœa.
Woman, æt. 33, syphilitic, menses regular; desire to murder or commit suicide.
Man, æt. 34, has had several attacks; gonorrhœa.
Man, æt. 35, porter; glossitis.
Man, æt. 35, robust, after catching cold; rheumatic fever.
Woman, æt. 36, suffering from affection of stomach; metrorrhagia.
Woman, æt, 36, after external application of mercury; stomatitis.
Woman, æt. 36, no children, two years ago had inflammatory affection of chest, after nursing a cachectic husband; phthisis.
Woman, æt. 36, unmarried, suffering three months from pain in stomach; rheumatism.
Man, æt. 37; chancre.
Woman, æt. 37, nervous, suffering eight days; diarrhœa.
Man, æt. 38; chancre.
Man, æt. 39, after suppression of foot sweat; desire to commit suicide.

[1] **Mind.** ‖Greatly depressed; very ill humored.
‖Stares at persons who talk to him and does not understand them.
‖‖Weakness of intellect.
‖Mind sluggish, with torpid digestion.
‖‖Anxiety preventing sleep.
‖Stupor and delirium.

[2] **Sensorium.** ‖Vertigo: with coldness, cold perspiration; with deafness, when stooping.
‖Head much affected, with coma.

[3] **Inner Head.** ‖Violent headache in forehead; stitches.
‖‖Violent rush of blood to head, with severe pain in forehead and temples; burning in cheeks.
‖Pain in head, like drawing in pericranium.
‖Tearing as if in bone above l. eye, near root of nose, and in other parts of bone.
‖‖Heaviness of head.
‖Syphilitic tumors in brain; vertigo.

[4] **Outer Head.** ‖‖Profuse perspiration on forehead.
‖‖Swelling of head and neck.
‖Falling out of hair.

[5] **Sight and Eyes.** ‖Excessive photophobia and acrid lachrymation.
‖Objects appear smaller; or double vision.
‖Pupils contracted and insensible.
‖Eyes painful.
‖Pain behind eyeballs, as if they would be forced out.
‖Retinitis hemorrhagica, or apoplexia retinæ.
‖Retinitis albuminurica; also with tearing at eyebrow, bones tender.
‖Nephritic retinitis during pregnancy; lids œdematous, edges swollen, burning, smarting; albumen in urine.
‖Cyclitis; choroiditis; iridocyclitis or iridochoroiditis.
‖Episcleritis, with much pain in and around eye at night.
‖‖Severe, burning, cramping pains. θSyphilitis iritis.
‖Iritis, especially if syphilitic; pains severe over eyes and through them, through head and in temples; < at night.
‖Keratoiritis; posterior synechia; causes them to soften.

Google

▮Hypopion occurring in abscess of cornea or iritis.
▮▮Small, unclean, red ulcer at edge of cornea, with much itching and burning.
▮Ulcers on cornea of scrofulous children; ulcer rapidly affects surrounding parts; ichorous discharge; intense pain and photophobia.
▮Phlyctenulæ, deep ulcers on cornea; discharge ichorous, acrid, making surrounding parts sore; pimples around eyes like small boils.
▮▮Cannot look up and resists any attempt to open eyes; eyelids externally tumid; photophobia intense, when eyelids are separated, profuse lachrymation; conjunctival membrane red and injected, small ulcers on cornea. θPhlyctenular ophthalmia
▮▮Photophobia and lachrymation; conjunctiva inflamed, bunches of vessels coming towards cornea and terminating in vesicles.
▮▮Photophobia, general injection of conjunctiva, pinkish zone around cornea, with small vesicles at its margin; child turns from light and keeps head down, resisting all attempts to examine.
▮▮Eye is very red, bunches of injected vessels terminating in vesicles; constant escape of scalding tears, intolerance of light, with spasmodic closure of orbicularis.
▮Chronic ulceration of cornea.
▮Pustular form of syndesmitis exanthematica.
▮Ophthalmia neonatorum, with acrid discharges; caused by syphilitic or gonorrhœal leucorrhœa.
▮Scrofulous inflammation of eyes, erysipelatous in character, with great œdema; discharges thin; skin of surrounding parts excoriated; intense pain; spasm of lids; < at night.
▮Numerous, bright red, rather fine, injected bloodvessels, proceeding from larger trunks in conjunctiva sclerotica, run from conjunctiva bulbi over edge of cornea, in a very slightly tortuous course, and there divide into numerous branches, without forming many anastomoses, their disposition is arborescent; the finer vessels, without communicating much with each other, gradually decrease in calibre and are lost imperceptibly almost in centre of cornea, or in vicinity of small ulcers that are generally seated about centre of cornea. θErithistic scrofulous ophthalmia.
▮Scrofulous inflammation of eyes, erethistic form; lids red, greatly swollen and spasmodically closed; great photophobia, child sits in a dark corner of room, or covers eyes tightly with hand or walks about with eyes closed and head sunk upon breast; on attempting to open

Google

eyes hot tears gush from them, causing redness, rawness and a pustular eruption on surrounding parts; intense redness of conjunctiva, palpebral and bulbar; on latter bundles of vessels run towards cornea and pass over edge which looks dim.

‖Burning in eyes.

‖Chronic catarrhal conjunctivitis, tending towards trachoma, with redness and excoriation of lids and a dull feeling, with itching in eyes in evening.

‖Blepharitis scrofulosa; margins of lids red and raw, with crusts and ulcers upon lids; tendency towards formation of ec- or entropium.

‖Indurated lids; secretion thin and excoriating; nocturnal aggravation.

‖Lids: œdematous or erysipelatous; red, excoriated; edges swollen, burning, smarting; edges covered with thick crusts or pustules; spasmodically closed.

‖Since childhood, twenty years ago, after abuse of calomel, highly inflamed lids, very much thickened and infiltrated; ciliæ matted in bunches along upper and lower margins; profuse lachrymation of a muco-purulent nature; surrounding integument excoriated, presenting appearance as if burned; intolerable burning, conjunctivæ, both palpebral and ocular portion, much injected, the former presenting a rough, granular appearance; vision more or less impaired, objects look dim, as if enveloped in a halo or mist, eyeballs feel tense, sensitive to both light and pressure; yearly attacks. θOphthalmia tarsi.

‖Tearing as if in bone above l. eye, near root of nose, and in other parts of bone.

[6] **Hearing and Ears.** ‖Violent pulsation in ears, especially in left.

‖Inflammation, with stitches in ear.

‖Discharge of fetid pus from ear.

[7] **Smell and Nose.** ‖Frequent nosebleed.

‖Swelling and redness of nose; frequently sore nostrils.

‖‖Excessive fluent coryza; loss of smell.

‖Nose feels stopped up, at same time runs; rawness, smarting in nostrils.

‖Nose sore and stuffed up with gluey secretion.

‖Ozæna, discharge from nose like glue, drying up in posterior nares; perforation of septum.

‖Scrofulous ozæna; poorly nourished subjects.

[8] **Upper Face.** ‖Yellow color of face; countenance denoting exhaustion; paleness of distorted face.

‖‖Face: flushed and puffy, or pale and anxious, with pinched features; much swollen; puffy and bright red.

Google

Swelling and turning up of upper lip; dark red.
Face and cheeks swollen, hard, red, bloated.
Œdematous swelling of face, paleness; albuminuria.
Pain in side of face, darting along upper jaw, gums and roots of teeth; so intense as to impair general health and to compel her to remain in bed; face somewhat swollen; considerable tenderness on pressure over superior maxilla. θProsapalgia.
Severe pain in l. side of face, darting along both jaws and upward to temple; pain remits during day, < about 9 P.M.
Severe pain in face and side of neck, commencing at 4 P.M. and continuing all night until daybreak; pain gradually < until intolerable, her night's rest is completely destroyed, has to get out of bed and walk about in agony; pain shoots over face, is intense below malar bone and zygomatic arch, darts along gums and down neck from ear; some swelling of face.
For three weeks almost constant pain in r. side of face, affecting chiefly upper and lower jaw, extending forward to middle line; pain abates, never entirely subsides, < from 4 till 10 P.M., after which it gradually >; pulse 80, weak; tongue coated with a creamy fur; breath very offensive.

[9] **Lower Face.** Stiffness of jaws, and soreness.
Lips: dry, cracked, black; swollen and incrusted with a dry secretion; excessively swollen and tender.
Lower lip considerably swollen and a small blister inside of it.
Submaxillary glands enlarged; tender.

[10] **Teeth and Gums.** Looseness of teeth; they pain and drop out.
Sleep at night disturbed by toothache with anxious sensation.
Toothache with swelling of gums.
Much sordes about teeth.
Gums red and tender, with some swelling of glands beneath jaw.
Gums: swollen, pale and spongy; ulcerated; bleed easily; covered with false membrane; gangrenous; purple; red and detached from teeth.

[11] **Taste and Tongue.** Taste: bitter; slimy; salty; putrid in morning; astringent metallic.
Tongue: could not be protruded; red, with blackish coat; coated, moist, edges red; posteriorly pale, dirty yellow, rather thick, coating extending forward along sides; covered with a greyish white crust; white and so much swollen that he could not protrude it; white

Google

in forepart, posteriorly yellow; swollen, pale yellow, protruding from lips, which are swollen; very much swollen and extremely inflamed; coated with thick white mucus, or dry and red; papillæ elevated, strawberrylike; stiff; and lips whitish, contracted.

[12] **Inner Mouth.** ‖Sensation as if mouth was scalded; burning extending to stomach.

‖Mouth dry, with unquenchable thirst.

‖Salivary glands very much swollen.

‖‖Ptyalism, with salty taste; saliva bloody, yellowish, tough, acrid.

‖Discharge of albuminous mucus from mouth.

‖Soreness of mouth and fauces.

‖Inflammation of mouth and gums, with constant discharge of clear water.

‖‖Buccal cavity and lips covered with aphthæ; on lips they are surrounded by vesicles which burn.

‖Mouth terribly swollen; lips swollen and everted; ptyalism. θAphthæ.

‖Ulcers (phagadenic) in mouth, throat or on gums, with fetid breath.

‖‖Exudations on mucous membranes, extending to tonsils.

[13] **Throat.** ‖‖Pillars of velum palati swollen and dark red.

‖Uvula swollen, elongated and dark red.

‖‖Inflammatory swelling of uvula to size of half a finger, lying upon tongue and making swallowing very painful and difficult.

‖‖In tonsillary folds, on edges of pillars, soft greyish excrescences like sloughs or false membranes.

‖Tonsils swollen and covered with ulcers.

‖Greyish yellow ulcers as large as a pea on l. tonsil, sensitive to touch.

‖Sense of dryness in fauces.

‖‖Inflammation of fauces from taking cold after a bath; uvula much enlarged; entire fauces dark red, < on r. side; no swelling of tonsils.

‖Swallowing attended with a violent spasm of glottis.

‖Act of swallowing even fluids produces great pain.

‖Retching and vomiting on attempting to swallow.

‖Throat intensely inflamed, preventing swallowing and causing suffocation.

‖‖Burning in fauces, throat and œsophagus.

‖Raw, stinging, smarting pain on swallowing even fluids, which return through nose; sense of smell and taste impaired; thick yellow discharge from nostrils; nasal voice; much saliva in mouth, sometimes running out at night; pains along tibia < at night; uvula and nearly all of soft palate eaten away; pharynx and fau-

Google

ces ulcerated, covered with dirty looking pus and emitting very disagreeable odor. θSore throat.

‖Constriction in throat.

‖Throat enormously swollen, threatening suffocation.

‖Pricking in throat as from needles.

‖Pain in throat on swallowing, and beneath larynx she experiences a quick pain from outward pressure.

‖Pharynx dark red, pressure externally excites pain.

‖Exudation covers entire fauces and extends into nose, from which profuse discharge; rapid destruction of parts. θDiphtheria.

‖Inflammation of throat; on second day diphtheritic exudation covered tonsils, uvula, velum palati and posterior wall of pharynx; high fever; delirium at night; burning thirst; deglutition almost impossible; can hardly open mouth; salivary glands swollen; lips dry, brown, cracked, bleeding; discharge of offensive smelling saliva from mouth, occasionally mixed with blood; very offensive smelling breath; offensive smelling acrid discharge from stuffed up nose; lachrymation. θDiphtheria.

[14] **Appetite. Thirst. Desires. Aversions.** ‖Attacks of violent hunger. θCancer of stomach.

‖No appetite.

‖Thirst: urgent; great; excessive; extreme; tense; violent; unquenchable; insatiable; burning; for cold water in large quantities.

‖Repugnance to hot food and great desire for cold food.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Spasmodic and very painful retching.

‖Vomiting: of green, bilious matter; incessant; streaks of blood in matter vomited; of albuminous matter; of tough or stringy mucus; of green, bitter substances; of bile; of blood; like coffee grounds with coagulated blood; of pus.

‖Drink regurgitates through nose.

[17] **Scrobiculum and Stomach.** ‖Distension and soreness of pit of stomach, not permitting least touch, even of clothing.

‖Burning gnawing, darting pains in stomach.

‖Cramp in stomach and vomiting, after eating rye bread.

‖Distension and soreness of epigastrium, cannot bear clothing tight or even close around waist, because it causes both oppression of breathing and pain; constipation; pain and distension in colon, especially transverse portion. θChronic dyspepsia.

[18] **Hypochondria.** ‖Pain in liver and r. shoulder, with frequent nausea and obstinate chronic constipation; jaundiced.

Google

‖Stitches: in hepatic region; as if in middle of liver.

[19] **Abdomen.** ‖Abdomen swollen, hard and sensitive to pressure, especially about umbilicus.

‖Cutting below navel.

‖Bloated abdomen, very painful to least touch.

‖‖Peculiar bruised sensation in abdomen, especially in cæcal region and following course of transverse colon; painful to moderate pressure, as though bruised.

‖Intolerable cutting pains in abdomen and constant urging to stool, followed by slight discharge of blood and mucus; despondent, walks up and down.

[20] **Stool and Rectum.** ‖‖Stools: hot, scanty, frequent; bloody; slimy; containing shreds of mucous membrane; offensive; yellow, green, bilious, followed by slime and blood; with tenesmus and insupportable cutting colicky pains; pasty, dark green, blackish, offensive; tenacious; < in Fall; < after midnight.

‖Frequent ineffectual urging to stool, violent pain.

‖‖Painful bloody discharges with vomiting.

‖During stool: burning in anus.

‖Before, during and after stool: urging and tenesmus; cutting colic.

‖‖Tenesmus, persistent, incessant.

‖After catching cold, lassitude in limbs, pains in abdomen in evening, continuing throughout night; thin, watery discharges of red color, as if purely of blood; stools especially copious at night and accompanied by pain, preventing sleep; very slight fever; no thirst; must lie in bed. θDiarrhœa.

‖Diarrhœa, with pain in abdomen and prolapsus ani; evacuations of mucus and undigested food; bleeding from prolapsed anus, blood escaping in drops; itching of skin with bleeding after scratching; eruption of vesicles and pustules.

‖Croupous enteritis; severe, burning, corrosive pain in circumscribed spots in abdomen; discharge of exudation and bloody mucus, accompanied by intolerable tenesmus.

‖After *Acon.* when urging and bloody discharges continue. θDysentery.

‖Very much pure blood is passed with stool; much tenesmus. θDysentery.

‖Stool yellow green; tenesmus; vomiting bile; cramps in calves; stitches in side; painful bloody stool with vomiting. θDysentery.

‖Severe dysentery brought on by a draught of foul, cold water, when much heated; straining almost continuous, pain in bowels severe, evacuations of mucus and blood

Google

every quarter of an hour; extreme prostration, with clean tongue and some appetite.

‖Very frequent, small, bloody, slimy discharges, great pain, constant crying and rolling in bed. θDysentery.

‖Constant heat of skin; quick, rather small pulse; tongue dry, with yellow coat; thirst not excessive; abdomen sore on pressure, somewhat distended; constant uninterrupted pressure to stool felt in sacral and hypogastric regions; this pressure though very distressing seems utterly ineffectual; stools of bloody slime in small masses; great tenesmus vesicæ; urine scanty, hot and bloody; disposition quiet, slightly despondent. θDysentery.

‖Cutting pains in rectum; twenty to thirty stools in twenty-four hours; greenish yellow masses mixed with bloody mucus; tenesmus, with constricting pain and prolapsus of rectum; tongue coated white; pulse weak, quick; great emaciation; dry, parchmentlike skin. θDysentery.

‖When discharges of cholera assume a dysenteric character and *Phosphor.* fails.

‖‖Constipation from pseudo-membranous inflammation of some portion of large intestines.

‖‖Hemorrhoidal colic with congestion of liver and abdominal venous stasis.

‖Violent burning in rectum.

‖Oozing of corrosive ichor from anus, excoriating external parts.

[21] **Urinary Organs.** ‖‖Tenesmus vesicæ with intense burning in urethra, a discharge of mucus and blood with urine or after it.

‖Tenesmus of bladder; urine suppressed.

‖Burning in orifice of urethra.

‖‖Micturition frequent; urine in drops with much pain.

‖‖Urine: scanty or increased; hot; burning; bloody; passed in drops with great pain; scanty, brown, with brick dust sediment; pale and copious; containing filaments, flocks or fleshlike pieces of mucus; albuminous, abundantly coagulated by heat as well as by nitric acid; under microscope presented granular fatty tubuli in large numbers showing on their surface epithelial cells of tubuli uriniferi, also in a state of granular fatty degeneration; no longer limpid, rather thick, but acid as before, sp. gr. 1016; containing fibrin or fat globules.

‖Albuminuria; after diphtheria or in Morbus Brightii; acute early stages, particularly if caused by abuse of alcohol, cold or portal stasis; bilious diarrhœa; collection of much mucus in mouth and throat.

‖Pinched and shrivelled appearance of face; weariness

Google

and melancholy; uneasiness in lumbar region; urine dark and scanty, looks as if mixed with blood, shows a thick cloud of albumen to test. θAlbuminuria.

[22] **Male Sexual Organs.** ‖Violent erections during sleep.
‖Fine, painful stinging in l. testicle.
▮Penis and testes swollen enormously.
▮Paraphimosis.
▮Chronic balanitis; greasy, fatty, offensive smelling discharge; several excoriated places on corona, repeatedly healing and then becoming sore again.
▮▮Gonorrhœa: greenish, < at night; burning, smarting on urination; at first thin, afterwards thick; biting pain on urinating; stitches extending back through urethra; suppuration between glans and prepuce; glans feels hot, painful when touched; burning, itching, stinging and throbbing in urethra; urine passes in feeble stream; discharge acrid, excoriating; mild ulceration about glans, prepuce or within meatus; throbbing in urethra.
▮Chancre: on inner surface of præputium or on corona glandis; margin of soft chancre dark red, painful and easily bleeding; neighboring parts œdematous, hot and painful; thin pus stains linen, like melted tallow; assumes a phagedenic appearance and secretes a thin ichorous pus; ichor adhering to bottom of ulcer; indurated Hunterian, with lardaceous bottom.

[23] **Female Sexual Organs.** ▮Fibroid tumors, with profuse, muco-purulent, excoriating leucorrhœa.
▮Aching pain, succeeding pressing or touching os uteri during an embrace.
▮Abrasion, ulceration arising from overstimulated, then broken down glandular structure. θDisease of uterus.
▮Menses too early and too profuse.
▮Leucorrhœa: pale, yellow; smelling sweetish; tinged with blood; mucous discharge as thin as water.
▮Burning heat and pain in genitals.
▮Intense inflammation of vulva.
▮Primary, phagedenic syphilitic ulcers, with profuse and bad suppuration.

[24] **Pregnancy. Parturition. Lactation.** ▮Nipples crack, bleed; severe pain when attempting to nurse.

[25] **Voice and Larynx. Trachea and Bronchia.** ▮Hoarseness quickly changing with normal voice.
▮Hoarseness or aphonia; burning and stinging in trachea; tightness across chest.
▮Larynx and epiglottis pain when swallowing food; pain < when depressing tongue; cutting in throat as from a knife.
‖Broad condylomata in larynx, nearly closing glottis; hoarseness and dyspnœa (assisted by *Nitr. ac.*). θSyphilis.

Google

[26] **Respiration.** ‖Respiration very difficult; slow; interrupted, sighing; palpitation.

[27] **Cough** ‖Emaciation with hectic fever, accompanied by a phthisical condition; severe, short cough, at times with expectoration and gagging; cough affects him very much and threatens to rob him of his remaining strength.

‖Coughs up considerable amount of mucus tinged with blood.

[28] **Inner Chest and Lungs.** ‖Shooting pains in chest.

‖‖Frequent stitches shoot through thorax.

‖Sticking in upper part of r. side of chest deep internally, scarcely < by deep inspiration.

‖Sticking pain in lower portion of r. side of chest.

‖Great oppression of chest; attacks of dyspnœa; difficult, sobbing, sighing respiration; hoarse voice; hollow; deep cough without expectoration, owing to weakness of lungs; cough asthmatic, < talking, with white, tough, occasionally greenish mucous expectoration, < at night; dryness in throat and trachea, causing constant desire to drink; transient stitches in various parts of chest; attacks of heat, with increased pulse, cold hands and feet and profuse sweat; great irritability of mind and frequent changing mood. θPhthisis florida.

‖Hæmoptysis.

[29] **Heart, Pulse and Circulation.** ‖Pain in præcordial region.

‖Heart sounds dull and intermittent; tremulous undulating motion of heart; præcordial anxiety.

‖Palpitation of heart in sleep.

‖Pulse: intermittent, 89; small, intermittent; irregular, intermittent; intermittent and uneven; small, weak, intermittent, sometimes trembling.

[30] **Outer Chest.** ‖‖Painful glandular swellings about nipple.

[31] **Neck and Back.** ‖Pains in head, back and limbs; kidneys affected.

‖Glands of neck hard and swollen.

‖Dorsal decubitus.

‖‖Lies on back with knees drawn up; Pott's disease.

[32] **Upper Limbs.** ‖Arm much swollen up to shoulder, red and covered with vesicles.

‖Rheumatic pains in l. shoulder and shoulder blade.

‖Deltoid muscle feels relaxed.

[33] **Lower Limbs.** ‖Lower extremities drawn up in bed.

‖Sticking pains in hip joints during rest, > in motion.

‖Stitches in r. hip joint.

‖Sensation as if legs had gone to sleep.

‖Muscles of thigh and calf feel relaxed.

‖Cramps in calves. θDysentery.

Google

‖Feet icy cold.

[34] **Limbs in General.** ‖Rheumatic pains after suppression of gonorrhœal discharge by large doses of Balsam Copaiba; pains wandering from joint to joint, compelling him to stay in bed.

‖Coldness in extremities, they look purple; small, spasmodic, frequent pulse.

‖Paralysis of upper and lower extremities.

[35] **Rest. Position. Motion.** Rest: sticking pains in hip joints.

Must lie in bed: diarrhœa; rheumatic pains in joints.

Could not lie comfortably on either side.

‖Child sits in dark corner of room or covers eyes tightly with hands or walks about with eyes closed and head sunk upon breast. θOphthalmia.

Lower extremities drawn up in bed. θPott's disease.

Stooping: vertigo, with deafness; heat.

Standing: lassitude in limbs and trembling.

Motion: pain in hip joints >; least, causes chilliness.

Swallowing: painful, swelling of uvula; causes retching and vomiting; raw, smarting, stinging pain.

Rising: coldness.

Must get out of bed and walk about: pain in face.

Walks up and down room: cutting pains in abdomen.

[36] **Nerves.** ‖Convulsive twitchings of muscles of face, arms and legs, and convulsions of limbs; convulsive contractions.

‖Trembling.

‖‖Great debility.

‖Lassitude in limbs and trembling when standing up and without moving.

‖Faintness, weakness and shuddering.

[37] **Sleep.** ‖Somnolence; frequent yawning and stretching.

‖‖Night sleepless; could not lie comfortably on either side.

‖Sleepless on account of vertigo or anxiety.

‖Starting up suddenly when trying to go to sleep.

‖During sleep, violent hiccough.

[38] **Time.** Toward morning: fetid sweat.

Morning: taste putrid.

During day: pain in face >.

4 P.M.: pain in face and neck commences, continues all night until daybreak.

Evening: itching in eyes; pain in abdomen; chilliness; stitches in forehead <.

9 P.M.: pain in face <.

Night: pain in and around eye; iritis <; inflammation of eyes; indurated lids <; sleep disturbed by toothache and anxious sensation; saliva running out; pains along

Google

tibiæ <; delirium; pains in abdomen; stools copious; gonorrhœa <; expectoration <; in bed chilliness; cannot rest in any place from heat and anxiety; profuse sweat.

After midnight: burning and tenesmus of rectum and bladder after stool <.

[39] **Temperature and Weather.** Open air: chilliness.

Hot food: repugnance.

Cold water: thirst, in large quantities; draught of foul, cold water, when much heated, caused dysentery.

Cold food: desire for.

Taking cold after a bath: inflammation of fauces.

[40] **Fever.** ‖Shivering during and after swallowing.

‖Chilliness: from least movement and in open air, generally with colic; in evening; especially on head, at night in bed.

‖Cold face and hands, with small, feeble pulse; extremities cold.

‖Cold skin, with very small, intermittent pulse.

‖Skin cold, pale, covered or dripping with sweat.

‖Great heat of skin.

‖Unable to rest in any place at night, on account of a feeling of heat and anxiety.

‖External heat, with yellow skin.

‖Burning, stinging heat in skin.

‖‖Heat when stooping and coldness when rising.

‖Extremities clammy and cold.

Sweat: profuse; at night or fetid toward morning; cold, often only on forehead, also general with anxiety.

[41] **Attacks, Periodicity.** Every quarter of an hour: stool of mucus and blood.

From 4 till 10 P.M.: pain in face <.

In 24 hours: twenty to thirty stools.

For three weeks: almost constant pain in r. side of face.

Fall: dysentery.

Yearly attacks: ophthalmia tarsi.

One year after appearance of chancre, which disappeared after local treatment: eruptions of red nodules over chest and upper abdomen.

[42] **Locality and Direction.** ‖Right: pain in side of face; fauces inflamed, < on side; pain in shoulder; sticking in upper and lower part of chest; sticking in hip joint.

Left: tearing above eye; violent pulsation in ear; severe pain in side of face; ulcers as large as a pea on tonsil; fine, painful, stinging in testicle; ulcer on inner surface of side of prepuce; rheumatic pains in shoulder and shoulder blade.

From within outward: stitches in forehead.

Google

Sensations. Tearing as if in bone above l. eye; as if eyes would be forced out; as if mouth was scalded; pricking as from needles in throat; pain as if in middle of liver; abdomen as though bruised; cutting as from a knife in throat; as if legs had gone to sleep; tibiæ as if broken.

Pain: in head; behind eyeballs; in and around eye; in side of face; in teeth; along tibia; in throat; in liver and r. shoulder; in abdomen; in genitals; in larynx and epiglottis; in praecordial region; in head, back and limbs; in tibiæ.

Intense pain: in ulcers on cornea; in eyes; below malar bone and zygomatic arch.

Violent pain in forehead: caused by ineffectual urging to stool.

Severe pain: in forehead and temples, over and through eyes, through head and temples; in face and side of neck; in bowels; in nipples.

Much pain: during micturition.

Constant pain: in r. side of face.

Tearing: above l. eye, near root of nose and in other parts of bone; at eyebrow.

Insupportable, cutting, colicky pains: with stool.

Cutting pain: in throat; in abdomen; below navel; in rectum.

Shooting pain: over face; in chest.

Darting: along upper jaw; gums and roots of teeth; down neck from ear.

Stitches: in forehead; in ear; in hepatic region; in side; extending back through urethra; shoot through thorax; in various parts of chest; in r. hip joint.

Sticking: in upper part of r. side of chest; in lower portion of r. side of chest; in hip joints.

Biting pain: on urinating.

Throbbing: in urethra.

Severe, burning, corrosive pain: in spots in abdomen.

Burning, gnawing, darting pains: in stomach.

Constricting pain: in rectum.

Aching pain: in womb during an embrace.

Drawing pain: in perineum.

Rheumatic pains: in l. shoulder and shoulder blade; from joint to joint.

Aching: in teeth.

Cramp: in stomach; in calves.

Raw, stinging, smarting pain: on swallowing.

Intolerable burning: of lids.

Fine, painful stinging: in l. testicle.

Burning: in cheeks; of eyelids; of ulcer at edge of cornea; in eyes; of mouth, extending to stomach; of ves-

Digitized by Google

icles on lips; in fauces; of rectum; in anus; in orifice of urethra; in genitals; in urethra.
Burning, itching, stinging and throbbing; in urethra.
Burning and stinging: in trachea; in skin.
Smarting: of eyelid; in nostrils.
Soreness: of nose; of jaws; of mouth and fauces; of pit of stomach; of epigastrium.
Pricking: in throat.
Painfulness: of eyes; of swallowing on account of swollen uvula.
Violent pulsation: in ears.
Dull feeling: in eyes.
Dryness: in fauces; in throat and trachea.
Great oppression: of chest.
Tightness: across chest.
Peculiar bruised sensation: in abdomen; in cæcal region and course of transverse colon.
Constriction: in throat.
Stiffness: of jaws; of tongue.
Heaviness: of head.
Itching: of ulcer on edge of cornea; in eyes; of skin.

Tissues. Swelling of glands; buboes.
Necrosis of upper jaw.
Exostoses on shin, sternum, ribs.
Drawing in periosteum, with heat in head; inflammation of periosteum; swelling and tenseness, rapid progress of disease. *θ* Isteo-myelitis.
Ulcers or chancres with thin pus, leaving stains upon linen, as from melted tallow.
Morbus Brightii; general anasarca; face red and swollen, or sallow and puffed.

Touch. Passive Motion. Injuries. Touch: soreness of pit of stomach not permitting least, even of clothing; abdomen very painful; glans painful; on os uteri causes pain; stitches in forehead <; ulcers on tonsil sensitive.
Pressure: eyeballs sensitive; tenderness over superior maxilla; quick pain beneath larynx; pain in pharynx; abdomen sensitive; painfulness of cæcal region and course of transverse colon; on os uteri causing pains.
Depressing tongue: pain in larynx <.
Cannot bear tight or even close clothing around waist: soreness of epigastrium.
Scratching: causes bleeding of skin.

Skin. Burning and redness of skin, with formation of small vesicles.
Grey color of nails.
Severe and stubborn eczema of sweating parts of body, exposed to fumes of poison.

Google

‖‖Condylomata.
‖Rash of secondary syphilis.
‖Ulcers which perforate or become phagedenic.
‖‖Blisters on arms and abdomen.
‖‖Scorbutic spots over whole body, mingled with itchlike eruptions, herpes and boils.
‖One year after appearance of chancre, which disappeared after local treatment, eruptions of red nodules as large as lentils, over chest and upper abdomen; stitches in forehead from within outward, < evening and on touching hair; vomiting after eating; swelling of tibiæ and pain in them as if broken, particularly at night. θSyphilis.
‖Smallpox, with intense inflammation of throat, which prevents swallowing and threatens suffocation ($\frac{1}{10}$ gramme to 120 grammes of water, used as a gargle).

" **Stages of Life, Constitution.** Child, æt. 18 months; phlyctenular ophthalmia.
Boy, æt. 2½; scrofulous ophthalmia.
Boy, æt. 3, had eruption on head, cough and expectoration; prolapsus ani.
Boy, æt. 3; phlyctenular ophthalmia.
Child, æt. 4, suffering three weeks; dysentery.
Boy, æt. 4, scrofulous, pale, thin, suffering from chronic nasal catarrh; diphtheria.
Girl, æt. 5, suffering twenty-two months; syndesmitis exanthematica.
Boy, æt. 9, had eczema and itch, suffering three days; dysentery.
Boy, æt. 9, after drinking cold, foul water while overheated; dysentery.
Boy, æt. 9; phlyctenular ophthalmia.
Girl; condylomata and syphilitic ulcers in throat.
Girl, æt. 14; phlyctenular ophthalmia.
Boy, pale and feeble, suffering three months; sore throat.
Servant girl, æt. 16, sanguine temperament, slight build, suffering six days; dysentery.
Young woman, æt. 20, nursing two months; cracked nipples.
Man, æt. 20, one year ago had chancre; syphilis.
Girl, æt. 20; subacute laryngitis.
Man, æt. 24, had been given calomel in large doses in early childhood for sore eyes, suffering eighteen years; ophthalmia tarsi.
Woman, æt. 25; dysentery.
Woman, æt. 26; phlyctenular ophthalmia.
Coachman, had syphilis a number of years ago; condylomata in larynx.
Man, suffering six weeks; dysentery.
Man, athletic build, five days after suppression of gonor-

H., vol. 34, p. 169; Hirsch, Œhme's Therap., p. 53; Richards, Œhme's Therap., p. 57; Villers, Œhme's Therap., p. 55; Ganz, Œhme's Therap., p. 57; (50 cases) Martin, Trans. Hom. Med. Soc. Pa., 1878, p. 320; Burt, Trans. Hom. Med. Soc. Pa., 1878, p. 321; Allen, Hom. Phys., vol. 5, p. 164; Billig, Allg. Hom. Ztg., vol. 110, pp. 34, 45; Hansen, Allg. Hom. Ztg., vol. 113, p. 37.

[1] **Mind.** ‖ Excessive ill humor, after eating a little too much.
[5] **Sight and Eyes.** ‖ Keratoiritis syphilitica; much inflammation and severe nocturnal pains.

Google

[10] **Teeth and Gums.** Gums swollen and covered with a white, adherent layer, under which is found a violet border.

[11] **Taste and Tongue.** Tongue pale, with a yellowish streak on base; swollen, with red edges.

[12] **Inner Mouth.** ‖Lips, tongue and inside of cheeks dotted with ulcerations and covered with a greyish white coating. Inflammation of whole buccal cavity; salivation, fetid breath, great pain on swallowing.

[13] **Throat.** ‖Great redness of fauces, with difficulty of swallowing.

‖Ulcerations of middle of palatine arch, with inverted edges, uneven and callous, whole palate, columns of velum and tonsils swollen and of a pale color; breath of a repulsive odor. θChronic laryngitis.

‖Suffering since morning with severe sore throat; feels very weak; pulse 120; skin hot and dry; deglutition painful; frequent pains darting from throat to ear and head; tonsils greatly inflamed and enlarged; next day much ulcerated; ulcers deep and many of them filled with greenish yellow pus.

‖Tonsils red and swollen; r. tonsil $<$; whitish spots on r. tonsil and one or two on l.; sick at stomach, eyes heavy, headache. θFollicular tonsillitis.

‖Left tonsil swollen, with a few whitish spots thereon; high fever; thirst; headache; later both tonsils swollen and of a dusky red color. θFollicular tonsillitis.

‖A white, opaline layer forms on columns of velum palati and tonsils; on inside of r. cheek a round ulcer with greyish base, borders as if cut out and surrounded by great redness.

‖Pseudo-membranous formation extends all over fauces and down throat.

‖Diphtheria maligna, with phagedenic ulceration.

‖Diphtheria; excessive deposit of a tough, whitish grey membrane, often extends over whole throat and even over roof of mouth; aphthæ on tongue and lips, with a thick, yellowish white scab, very painful, forming ulcers, salivation quite marked; almost total loss of speech; solids are swallowed better than liquids, which escape through nose; membrane often extends into nose.

‖Great chilliness, with dry heat of skin; severe cutting pains when attempting to swallow; heaviness in head; constricting pains between scapulæ; prostration; loss of appetite; thirst; restless sleep; anxiety on swallowing on account of pain; offensive odor from mouth; submaxillary gland swollen and sensitive; œdema of soft palate; white membrane on tonsils; tongue dry, white in centre; pulse 130, full; delirium at night. θDiphtheria.

Google

▮High fever, with pains in throat, particularly when swallowing; soft palate very red; r. tonsil swollen; small spot on r. tonsil as large as pea, covered with a coating looking like a small ulcer, giving tonsil an appearance as if about to suppurate as in an ordinary case of tonsillitis; next day, however, submaxillary glands became swollen and on third day false membrane appeared on posterior wall of pharynx, on r. side. θDiphtheria.

▮Exudate white, yellow, or any shade between; adynamic fever; collapse at commencement of disease. θDiphtheria.

▮Entire mucous membrane of mouth and fauces dark red and considerably swollen; on l. side of velum a deep, diphtheritic ulcer, with sharp cut edges, surrounded by ring of exudate; on mucous membrane many very small exudate patches; tip of tongue dark red; papillæ filiformes much swollen; middle and back part of tongue covered with dirty yellow coating; swallowing exceedingly difficult; face has an apathetic, anxious expression; on upper half of body a profuse, viscous perspiration, which is cold on forehead and cheek; radial pulse on r. arm scarcely perceptible, on l. threadlike, 140; extreme prostration; no appetite. θDiphtheria.

▮Boy, æt. 4, lives in a cellar tenement; one brother and sister have just died of diphtheritis; tonsil, velum palati and fauces much swollen, dark red and thickly covered with exudate; great difficulty in swallowing; hoarse voice; rough, dry cough, with anxiety; skin hot and dry; pulse 130, small; great weakness, apathy, emaciation. θDiphtheria.

▮A man in last stages of consumption; extreme emaciation and weakness, so that he can hardly speak; for last six days diphtheritis; skin like parchment, dry; extremities cool; liquid stools; entire mouth and fauces covered with one mass of soft, greyish green exudate, of which some portions can be easily removed, leaving an easily bleeding surface; after 24 hours swallowing >; feels better and looks better; mouth and fauces almost free from exudate; usual tuberculous expectoration, which had stopped for several days, commenced again; one day later mouth and fauces perfectly healthy; strength gaining; died of tuberculosis ten days later.

▮Girl, æt. 7, blonde, well built, never sick; had been coughing for a week; for four days had sore throat, expectorating, after violent efforts, glairy mucus; for three days suffocative paroxysms woke her during night, with barking cough; child sitting up; muscles of face contracted; face cyanosed; skin burning; eyes injected and

Google

staring; voice extinguished; laryngo-tracheal whistling; nasal cavities obstructed by false membranes; submaxillary glands engorged; saliva flows constantly from open mouth; tonsils, velum palati, etc., covered with false membranes, has refused all food for twenty-four hours. (Complementary *Hepar* and *Phosphor.*).

‖Child lay on its back, with hanging under jaw and half-closed eyes; sopor, but when spoken to easily roused; mouth and fauces completely covered with whitish grey exudate; dry lips bleed a little on opening mouth; nose stopped up; swallowing impossible; can utter only a few croaking sounds; emaciation and flabbiness of muscles; extreme weakness; skin hot and dry; pulse excessively weak and so fast that it cannot be counted; urine scant and dark, without sediment; no stool for two days. θDiphtheria.

‖Tongue dark red and almost black; very offensive breath; saliva thin and fetid; profuse epistaxis; glands swollen and cellular tissue of neck infiltrated; excessive weakness. θDiphtheria.

‖Swelling of parotid glands and tonsils; exudate has appearance of honey comb, dirty in color. θDiphtheria.*

15 **Eating and Drinking.** ‖After eating too much, ill humor.

20 **Stool and Rectum.** ‖Malignant or putrid dysentery.

21 **Urinary Organs.** ‖Bright's disease.

28 **Rest. Position. Motion.** Attempting to swallow: severe cutting pains.

Child lay on its back, with hanging under jaw and half closed eyes.

Cannot stand up from great weakness.

36 **Nerves.** ‖Great weakness, cannot stand up; prostration extreme.

38 **Time.** Since morning: suffering with severe sore throat.

Night: delirium; suffocative paroxysms woke her.

41 **Attacks, Periodicity.** Nightly: pains in eyes.

First day small spots on r. tonsil; second day submaxillary glands swollen, on third day false membrane appeared.

For two days: no stool.

For last six days diphtheritis; after twenty-four hours swallowing >, expectoration which had stopped commenced again; one day later mouth and fauces perfectly healthy.

---

* "If remedy is given in stage of invasion (of diphtheria), *i. e.*, before exudate is deposited, it will not appear at all; as a prophylactic it is equally effective; paralysis and other after diseases have not been observed after use of this drug. Several physicians have never seen any result from it, because they gave the 2d and 3d trit. or dil., which is much too strong, or rather, not sufficiently developed." —Allg. Hom. Ztg., vol. 88, p. 92.

Google

[42] **Locality and Direction.** Right: tonsil red and swollen; whitish spot on tonsil; inside of cheek round ulcer; false membrane on side; radial pulse scarcely perceptible.
Left: one or two spots on tonsil; tonsil swollen; on side of velum a deep diphtheritic ulcer; threadlike pulse.

[43] **Sensations.** Border of ulcer as if cut out; tonsil looks as if about to suppurate.
Pain: in head; in throat.
Severe pains: in eyes at night.
Great pain: on swallowing.
Cutting pains: when attempting to swallow.
Darting pains: from throat to ear and head.
Soreness: of throat.
Constricting pains: between scapulæ.
Heaviness: in head.

[46] **Skin.** Skin moist and cold.
Diphtheritic scarlatina; swelling of glands around throat; great redness of fauces, with difficulty of swallowing; complete suppression of urine; great sensation of coldness; extreme prostration and frequent fainting.

[47] **Stages of Life, Constitution.** Girl, æt 3, sickly, scrofulous, of a scrofulous mother and an old syphilitic father; diphtheria.
Boy, æt. 4, weak constitution, subject to catarrhal affections of chest; diphtheria.
Girl, æt. 4, fair, rosy complexion, blue eyes; diphtheria.
Girl, æt. 4; diphtheria.
Boy, æt. 4, lives in a bad cellar tenement, brother and sister died of diphtheritis; diphtheria.
Girl, æt. 7; diphtheria.
Girl, æt. 7, blonde, well built, never sick; diphtheria.
Boy, æt. 7; diphtheria.
Girl, æt. 9; follicular tonsillitis.
Boy, æt. 10, for several years enlargement of tonsils; diphtheria.
Boy, suffering several years; ulceration of tonsils.
Girl, æt. 11, had had several attacks of diphtheria (?); follicular tonsillitis.
Girl, æt. 12, large, strong, sanguine temperament, never had convulsions; diarrhœa.
Girl, æt. 15; diphtheria.
Woman, æt. 24; diphtheria.
Woman, married; ulceration of tonsils.
Man, in last stages of consumption; diphtheria (died of tuberculosis).

[48] **Relations.** Compare: *Arum triph., Caustic., Hepar, Kali bich., Kali caust., Phytol., Mur. ac., Laches.*

MERCURIUS DULCIS.

Calomel. *Hg Cl.*

Symptoms toxicological and clinical.

CLINICAL AUTHORITIES.—*Ulceration of cornea*, Norton, Oph. Therap.; *Phlyctenular conjunctivitis*, Newton, Raue's Rec., 1872, p. 68; *Otorrhœa*, Lobethal, Rück. Kl. Erf., vol. 1, p. 369; *Catarrhal inflammation of middle ear* (93 cases), Houghton, Times Retros., vol. 1, p. 24; *Angina tonsillaris*, Hendricks, Rück. Kl. Erf., vol. 5, p. 243; *Gastromalacia* (3 cases), Bicking, Rück. Kl. Erf., vol. 1, p. 607; *Diarrhœa*, Hofrichter, Rück. Kl. Erf., vol. 5, p. 421; Kafka, Rück. Kl. Erf., vol. 5, p. 422; *Constipation*, Gerson, Rück. Kl. Erf., vol. 5, p. 395; *Prostatitis*, Gerson, Rück. Kl. Erf., vol. 5, p. 545; *Condylomata, Syphilis*, Battman, Rück. Kl. Erf., vol. 5, p. 562.

[5] **Sight and Eyes.** ▮Girl, æt. 6, light complexion, pale skin, muscles soft and flabby, glands enlarged, general strumous diathesis; a very deep ulcer on l. cornea, so nearly perforated that membrane of Descemet has begun to bulge; small ulcers and pustules on border of cornea; pustules and maculæ on r. cornea; considerable redness and photophobia. θStrumous ophthalmia.

▮Irido-choroiditis, especially if dependent upon scrofulous diathesis and general cachexia.

▮Inflammations occurring in pale, flabby, scrofulous subjects.

▮Ciliary blepharitis associated with phlyctenular ophthalmia, and accompanied by eruption on face, soreness of nose and swelling of upper lip.

[6] **Hearing and Ears.** ▮▮Catarrhal inflammation of middle ear.

▮▮Eustachian tube and mucous membrane of pharynx affected. θOtitis media.

▮Closure of Eustachian tube; deafness of advancing years.

▮Catarrhal otorrhœa occurring in scrofulous children, or accompanying scrofulous inflammation of eyes, occasionally hearing is affected.

[8] **Upper Face.** ▮Pallid as a corpse.

[12] **Inner Mouth.** ▮Inflammation of lips and tongue.

▮Whole mouth filled with ulcers.

▮Salivation.

▮Whole inside of mouth, tongue and all had a very black appearance, emitting a constant flow of dark, putrid saliva, of intolerable fetor.

[13] **Throat.** ▮Angina tonsillaris.

Google

‖Excessive ulceration of throat.
‖Difficulty of swallowing.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Vomiting.

[17] **Scrobiculum and Stomach.** ‖Bloated, hot, painful abdomen, particularly in region of stomach; frequent vomiting, vomited matter smelling very sour; milk rejected almost immediately, accompanied by much slime; every day about twelve passages of greyish green, stringy, chopped masses; constant restlessness; crosses legs and draws them towards abdomen; peculiar whimpering; irregular febrile attacks; emaciation; greyish color of face, which appears long and has an old look; distortion of mouth; dulness of eyes. θGastromalacia.

[20] **Stool and Rectum.** ‖Stools: watery, greenish; black, with great epigastric oppression, sinking, etc.
‖Diarrhœa of children; stools grass green, coppery green, like chopped eggs, watery, very profuse, excoriating, causing soreness of anus; abdomen bloated; liver enlarged; skin pale; face bloated; mucous membrane of mouth pale; aphthæ; foul smell from mouth; ptyalism; glands of neck and submaxillary and inguinal glands swollen; fever and thirst.
‖Symptoms thoroughly dysenteric.
‖Constant disposition to stool; small discharges consisting of mucus and blood, colored with bile.
‖Obstinate constipation.
‖Burning pain in rectum.

[22] **Male Sexual Organs.** ‖Acute inflammation of prostate gland, particularly after maltreated gonorrheal stricture; both lobes enormously swollen, almost occluding rectum, with intolerably painful urinary symptoms; severe burning, pressing pains; scanty urine.

[23] **Female Sexual Organs.** ‖Broad, moist, burning condylomata around external genitals, perineum and anus, of extremely offensive smell.

[35] **Rest. Position. Motion.** Crosses legs and draws them towards abdomen: gastromalacia.

[40] **Fever.** ‖Ill defined gastric disturbances during second stage; painful sensibility of whole abdomen; watery stools, colorless, or as if mixed with flocculent matter, or like washings of flesh, occurring most often at night. θTyphoid fever.

[41] **Attacks, Periodicity.** Every day: about twelve passages of greyish green, stringy, chopped masses.

[42] **Locality and Direction.** Right: pustules and maculæ on cornea.
Left: a very deep ulcer on cornea.

[43] **Sensations.** Burning pain: in rectum.

Google

Burning and itching: in condylomata around anus.
Soreness: of nose; of anus.
Painfulness: of abdomen.

[46] **Skin.** Eruption over whole body of round copper colored spots, in centre of which are dry papules, around which, from centre to periphery, skin exfoliates; broad, moist condylomata around anus, with severe burning and itching. θSyphilis.

[47] **Stages of Life, Constitution.** Child, æt. 3 mos.; diarrhœa.
Three children æt. ½–1½ years; gastromalacia.
Girl, æt. 6, light complexion, pale skin, muscles soft and flabby, glands enlarged and general strumous diathesis; ulceration of cornea.
M., æt. 15; scrofulous diathesis, suffers frequently from sore eyes; phlyctenular conjunctivitis.
Girl, æt. 19, fat, strong; condylomata.

[48] **Relations.** Antidoted by: *Hepar.*
Compare: *Sulph. ac.* in stringy stools.

MERCURIUS IODATUS FLAVUS.

Protoiodide of Mercury. $Hg_2 I_2$ (*or* $Hg I$).

Provings by Lord (Am. Provers' Union Publ., 1856) and Blakely (New Provings, Tafel, 1866).

CLINICAL AUTHORITIES.—*Intraocular affection*, Woodyatt, Norton's Oph. Therap., p. 86; *Syndesmitis membranacea*, Payr, Raue's Rec., 1870, p. 104; *Syphilitic disease of eye*, Norton, Org., vol. 2, p. 382; *Blepharitis ciliaris*, Norton, N. A. J. [1] **Mind.** Symptoms disappear during care and anxiety; they also retard action of remedy.
Lively, talkative, good natured, whistles and sings soon after great depression.

Google

Disposition to destructiveness, can scarcely resist temptation to throw lamp through window.

‖Moodiness, depression of spirits.

While in bed imagined a man was in his room, who intended to perforate his throat with a gimlet.

[2] **Sensorium.** Dizzy: when reading; when rising from a chair.

[3] **Inner Head.** ‖Dull, pressing, boring pains over eyes. θLeucorrhœa.

‖Dull frontal headache, with pain at root of nose.

Throbbing pain in forehead and temples.

‖Throbbing, bursting sensation in temples. θLeucorrhœa.

Shooting pains in temple; sharp stitches.

Sharp pain in vertex.

Violent pain in r. side of head (over r. temple).

‖Headache on top of head, or on r. side.

Dull, heavy aching at base of brain.

Head feels dull and compressed, as if a heavy weight was pressing it down on pillow.

‖Dull headache on awaking in morning.

‖Headache felt more when at rest, > when mind or body is actively engaged.

[4] **Outer Head.** ‖Stiffness and soreness in occiput, also when touched, more to l. and down back, < when lying.

Sensation as if skull was cracking.

‖Itching of scalp.

[5] **Sight and Eyes.** ‖Excessive photophobia. θUlcers on cornea.

Black motes before eyes; opacities of vitreous.

Black clouds float before eyes when lying on l. side.

‖Miss L., æt. 26; eight years ago noticed a heaviness and drooping of eyelids; after two years sight of l. eye imperfect, and when this dimness appeared, drooping of both eyelids ceased; no redness, pain, or photophobia, but black spots and flashes of light; a year later r. eye was affected and rapidly grew < than l.; finally sight failed entirely; examination of r. eye: no external redness; anterior chamber shallow; iris discolored, crowded forward by a swollen opaque lens, to capsule of which it was attached all around margin of a contracted pupil, not even quantitative sight existed; left eye: anterior chamber shallow; iris dimmed and discolored; pupil moderately dilated and mobile; pigment spots on lens capsule; vitreous hazy throughout; lying in it near retina, three greenish blue spots, a little larger than optic nerve; probably hemorrhagic effusions undergoing degeneration; vision $\frac{20}{50}$; Snellen $1\frac{1}{2}$ read slowly at three inches; irregular dilatation of pupil under *Atropine*.

‖Impaired sight, with weakness of internal recti; aching

over eyes; fundus slightly hyperæmic; r. pupil slightly larger than l.; paralysis of all muscles of eye and lid supplied by third pair; diplopia on holding eyes to l. for some time, and distant objects look blurred a little. 0Syphilis.

‖Throbbing, aching, nightly pains.

Severe pain and soreness of r. orbit on rising in morning.

‖Syphilitic iritis.

‖Pannus, all stages, but especially in acute aggravations after first, or *Aconite* stage, has passed.

‖Trachoma with and without pannus.

‖Ulcers occurring in course of pannus and conjunctivitis granulosa.

‖Large excavating ulcer on upper part of cornea, with several small ulcers on lower portion; generally excessive photophobia; thick yellow coating at base of tongue.

‖Serpiginous ulceration, commencing at margin and extending over whole cornea, or a portion, especially upper part of it, involving only superficial layers.

‖Small pustule on l. eye, some pain in evening and at night, no photophobia nor lachrymation, tongue coated yellow at base.

‖Large pustules on conjunctiva, no pain during day and only a little at night, gums swollen and bleed easily, tongue coated yellow, bad taste in mouth.

‖Entire sclero-corneal margin occupied by a slightly elevated opacity of little width, and upon which was situated a chain of very minute vesicles; peri-corneal and subconjunctival tissue profusely injected with very fine vessels, through which was also distributed a large quantity of pigment, forming a zone as striking in appearance as the one occupying the limbus corneæ, into which it imperceptibly merged; opacity of cornea was sharply defined.

‖Large excavating ulcer on upper part of cornea, with several small ulcers on lower portion.

‖Syndesmitis membranacea.

‖Paralysis of oculo motor nerve, of syphilitic origin.

‖Complete paralysis of all fibres of third pair of nerves of r. eye, probably of syphilitic origin.

‖Uncomplicated granular lids.

‖Blepharitis ciliaris of syphilitic origin, abscesses of lashes, lids red and swollen, eruption on scalp itches, < at night; discharge from nose excoriating; upper lip swollen; tongue spongy, with a thick, yellow coating at base; breath offensive

[6] **Hearing and Ears.** Sudden sharp pains in ear.

‖Throbbing boring, from within outward, deep in l. ear.

[7] **Smell and Nose.** Pain at root of nose (shooting).

Google

Right side of septum and r. nostril very sore and much swollen.

A great deal of mucus in nose, descends through posterior nares into throat; hawking; spots in nose feel sore; constant inclination to swallow.

Discharges from nose and throat; scales of dried, offensive pus. θLeucorrhœa.

Dark redness of fauces; elongation of palate; enlargement of tonsils, sometimes covered with yellowish or whitish patches, small in size; collection of tough yellow mucus in posterior nares, which partially drops into throat, causing constant inclination to hawk and spit. θOzæna.

Thick plugs of nasal secretion, with severe frontal headache, some fever and prostration, especially in old people and children.

Chronic catarrh of posterior nares.

[8] **Upper Face.** Soreness of entire face, especially of bones of face, with dull frontal headache.

Dull bruised pain in r. malar bone, radiating into forehead and r. side of head, a small spot pulsates and burns like fire.

Sharp stitches through head and face.

Stinging in l. cheek.

[9] **Lower Face.** Sore on red part of lower lip as large as hickory nut; dry and covered with dry scab, hard as horn; it had been several months forming and was quite painful; submaxillary gland enlarged and hard; lymphatics on r. side of neck and tonsils enlarged; several large scales had been removed, and as soon as one separated a new one formed.

[10] **Teeth and Gums.** Teeth feel too long; cannot eat.

Molar teeth feel too long; < bringing them together.

Grinding and drawing pains in teeth; wants to press them together.

Stiffness of jaws.

Toothache after filling.

[11] **Taste and Tongue.** Bad taste in mouth. θPustules on eyes.

Thick yellow coating at base of tongue. θUlcer on cornea. θPustules on eyes.

Tongue coated bright yellow at back, tip and edges red.

Tongue coated yellowish brown. θVomiting during pregnancy.

[12] **Inner Mouth.** Mouth, lips and tongue dry and sticky.

Fine bright red eruption on roof of mouth.

[13] **Throat.** Burning in throat.

Throat dry, with frequent empty swallowing; burning when swallowing saliva.

Tonsils, uvula and pharynx red and congested.
Pain and swelling of r. tonsil.
Slight pain in r. tonsil and sensation as if it was swollen, with pain when swallowing.
Posterior wall of pharynx red, irritated and inflamed, dotted with patches of mucus and small spots which look ulcerated.
Constant secretion of mucus in throat, difficult to dislodge and causing retching.
Mucus in throat in morning.
Sensation of a lump in throat.
Easily detached patches on inflamed pharynx and fauces; < on r. tonsil; salivary glands swollen; fetid discharge.
Sore throat, several ulcerated spots; fauces and inside of throat "mapped," appearing like many islands.
Pain in r. side of throat, also in r. ear, extending into throat; difficult swallowing; soreness in r. side of face; tonsils swollen; pain in r. ear on swallowing. θSore throat.
Tonsils swollen, red and deeply ulcerated, tongue coated yellowish white; very fretful and restless as if from pain; refuses to eat or drink; cannot sleep. θTonsillitis.
Stiffness of jaws, with inability to open mouth; altered voice, speaks as if she had pebbles in mouth; r. side of throat and r. tonsil inflamed; soreness in r. ear and over r. side of head and face; enlargement of cervical glands; sensation of lump in r. side of throat; soreness in r. ear, extending into throat; pain when swallowing; burning; desire for sour things; hawking; tongue coated yellow at back part, clean at front; later soreness and swelling attacked l. ear and tonsil. θTonsillitis.
Great difficulty in swallowing, with great pain in throat; salivary glands very much swollen and painful; offensive smell from mouth and fetid discharge from fauces and nares; swelling of cervical glands. θDiphtheria.
Sore throat, < on r. side; swallowing difficult; warm drinks cause much pain; tongue coated thick at back part; looks as if a piece of chamois skin covered posterior part. θDiphtheria.
Diphtheritic deposits begin on arches of palate; glands of neck swell rapidly; general condition of œdema of throat and neck. θDiphtheria.
Aphonia; breathing very much impeded; nostrils dilated with every inspiration; very weak murmur of respiration heard all over chest, sometimes none at all; frequent violent spells of suffocation. θDiphtheria.
Membrane < on r. side; tenacious mucus in throat; sick, offensive odor; < from warm drinks; thick, dirty

Digitized by Google

yellow coating at base of tongue; glands swollen. θDiphtheria.

‖Diphtheritic membrane yellow, < on r. side; great thirst for cold water, can swallow only by little sips, as throat is so full; considerable salivation, which makes chin sore; nose obstructed with thick, yellow scabs and membranes, all < on r. side; tongue yellow, with tip and edges clean and red; coppery smell from mouth; must swallow from constant sensation of lump in throat; < from empty deglutition; salivary and cervical glands engorged; much painful hawking of stringy mucus; fetid discharge from fauces and nares; œdema of neck and throat; glandular derangements; great prostration; high fever; urine scanty and high colored. θDiphtheria.

[14] **Appetite, Thirst. Desires, Aversions.** Appetite variable, disgust at seeing food.

Excessive thirst; occasionally for acid drinks.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Nausea: faintness, with dizziness and suffocation about heart; sensation of disgust at sight of food.

[17] **Scrobiculum and Stomach.** Weak, empty feeling at stomach, nausea.

Cutting pains, with nausea and inclination to vomit.

Burning at stomach, with pain as from a blow.

[18] **Hypochondria.** Stitches in region of liver, > by pressing with hand.

Pain in l. hypochondrium, with dizziness on awaking in morning.

[19] **Abdomen.** Hardness of abdomen.

Burning at umbilicus as from a hot coal; < when inspiring.

‖Great thirst for water in evening; pain in liver, with dizziness and nausea; pain proceeds from r. to left.

‖Faint, sick feeling in hypogastrium before stool.

‖Severe cutting, cramplike pains in both hypochondria; much < in r., extending into back; excessive weariness in lower limbs, they scarcely support body; teeth feel elongated; tongue coated bright yellow in back part and clean in front; much thirst; entire want of appetite; pains disappear and reappear at short intervals.

‖Indolent buboes.

[20] **Stool and Rectum.** Cutting, colicky pains, followed by diarrhœa or discharge of fetid flatus; stools thin, light brown, frothy.

Frequent urging to stool.

‖Stools copious, soft and of a dark or light yellowish brown color.

‖Stools scanty, hard and black.

Google

‖Black discharges, with or without blood.
‖Stools tough like putty, with much straining.

[21] **Urinary Organs.** Urine: copious, dark red, scanty.

[22] **Male Sexual Organs.** Dreams that he must urinate, followed by seminal emission, of which he knew nothing.
Copious seminal emissions, preceded by lewd dreams.
Sharp shooting stitches in end of penis through glans.
‖Hard chancre.

[23] **Female Sexual Organs.** ‖Menses slight at onset, with pains. θLeucorrhœa.
‖Copious, muco-purulent discharge from vagina the entire month. θLeucorrhœa.
‖Yellow leucorrhœa, particularly of young girls or children.

[24] **Pregnancy. Parturition. Lactation.** ‖Morning sickness.
‖Confined to bed one week; vomits everything she takes, also vomits a greenish yellow, bitter liquid, with a burning, sinking sensation at stomach; tongue coated yellowish brown; bowels constipated; in a previous pregnancy was confined to her bed from same for seven months.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Loss of voice; hoarseness.
‖Swelling as large as hen's egg; rawness and soreness of throat; difficult breathing, with suffocation at night; mucus in throat difficult to dislodge; cough < at night, and arises from tickling in larynx and from laughing. θGoitre.

[27] **Cough.** Slight hacking cough when inspiring.
‖Loose rattling cough, bronchi loaded with mucus; sputum copious and yellow.

[28] **Inner Chest and Lungs.** Stitches through r. side of chest.
Sharp pain in chest behind sternum.
Sensation in l. breast above nipple as if wind was in cellular tissue; frequent palpitation, a single kick and jump (relieved by *Lycop.*).

[29] **Heart, Pulse and Circulation.** Sharp pain about heart, taking away breath.
Stitching pain in heart.
Sudden spasmodic action of heart, as if it had jumped out of its place.
Suffocation about heart, with nausea and giddiness.
Pulse weak, irregular and labored.

[31] **Neck and Back.** Neck stiff; soreness in occiput, < when lying.
Throbbing pain between shoulders.
Severe pain as if bruised over entire scapular region.
Throbbing pain on r. scapula.
Sharp pains in back.

Google

[32] **Upper Limbs.** Lameness and stiffness in r. shoulder.
Sharp pain in r. shoulder, obliging him to cease writing.
Soreness and lameness of l. shoulder and arm at night when lying on l. side.
Lame numbness of l. shoulder and arm.
Arms stiff and sore, < when moved.
Heavy feeling of r. arm.
Soreness and pain of r. arm; < from pressure, rubbing and passive motion.
Rheumatic, laming pain in r. arm, < from writing.
Numbness and wearied feeling in r. arm, < from writing.
πRheumatic pain in l. arm, it is stiff and sore, < when putting his coat on or moving arm; < in middle of day, > in evening, and at night could lie on that side.
Arms and hands numb.
Rheumatic pain in r. hand, at night, in bed.

[33] **Lower Limbs.** Weariness in legs, with dull pains and tingling.
Dull boring pains in legs, < at night.
Heavy laming pains in calves, with pain in knee joint.
‖Severe cramplike pains in lower limbs, < in r., especially in thigh, affecting also knees, feet and toes; pains come on only when at rest and are always > by active motion; passive motion makes <; pains appear every night while in bed, and in daytime when lying down.
Pain in sole of l. foot (causing faintness), with feeling of faintness through whole body.
Lame feeling in feet.

[34] **Limbs in General.** Heaviness of limbs, with laziness and drowsiness.
Excessive tired feeling of all limbs, especially when lying on l. side, > lying on r. side.
‖Soreness, with heaviness of all limbs, with dull frontal headache and soreness of bones of face; soreness, with lameness of hands and fingers; heaviness of whole body, with soreness as if one had been beaten.

[35] **Rest. Position. Motion.** Rest: headache felt more; pains in lower limbs; feels <.
Lying: stiffness and soreness in occiput <; in daytime, pains in lower limbs.
Lying on r. side: tired feeling in all limbs >.
Lying on l. side: black clouds before eyes; soreness and lameness of r. shoulder and arm; tired feeling in all limbs.
Desire to lie down, but feels < during rest.
Motion: of arm causes stiffness and soreness; of l. arm pain <; pains in lower limbs >.
When mind and body are actively engaged, headache >.

Google

Swallowing: pain in r. ear.
Inability to open mouth: stiffness of jaw.
Writing: rheumatic, laming pain in r. arm <; numbness and wearied feeling in r. arm <.
When rising from chair: dizzy.
Putting on his coat: pain in l. arm <.

[36] **Nerves.** Very tired feeling, especially of limbs.
Faint feeling, < at church.
Feels languid and sleepy.

[37] **Sleep.** Sleeplessness without restlessness; before 1 A.M.
Frightful dreams; nightmare.
Restless sleep from constant itching. θScabies sicca.
Many symptoms appear at night when in bed.

[38] **Time.** Before 1 A.M.: sleeplessness without restlessness.
Morning: on waking, dull headache; on rising, severe pain and soreness of r. orbit; mucus in throat; pain in l. hypochondrium, with dizziness.
Daytime: pains in lower limbs.
All day: pain in liver, with dizziness.
Middle of day: pain in l. arm <.
Evening: pain in l. eye; great thirst for water; pain in l. arm >.
Night: pain in l. eye; a little pain in pustules on conjunctiva; eruption on scalp, which itches and is <; difficult breathing, with suffocation; cough <; soreness and lameness of r. shoulder and arm; pain in l. arm >; in bed, rheumatic pains in r. hand; dull, boring pains in legs <.

[39] **Temperature and Weather.** Warm room: feels <.
Warm drinks: cause much pain.
Many symptoms appear when in bed; deep bone pains <; itching, pricking all over <; intolerable itching.
Cold water: thirst for.
Great susceptibility to cold and damp weather. θLeucorrhœa.
Worse in Spring.

[40] **Fever.** Chills, with trembling all over.

[41] **Attacks, Periodicity.** Short intervals: pains in liver come and go.
Nightly: pains in eyes; pains in lower limbs when in bed.
One week: confined to bed with vomiting of pregnancy.

[42] **Locality and Direction.** Right: violent pain in side of head over temple; headache on side of head; eye, external redness, anterior chamber shallow; iris discolored and crowded forward; severe pain and soreness of orbit; complete paralysis of all fibres of third pair of nerves of eye; side of septum and nostril sore and swollen; dull, bruised pain in malar bone and side of head; lymphat-

Google

ics on side of neck and tonsils enlarged; pain and swelling of tonsil; tonsillitis; patches on tonsil; pain in side of throat and ear; soreness of side of face; pain in ear on swallowing; soreness in ear and over side of head and face; membrane < on side of throat; nose obstructed, < on side; cramplike pain in hypochondrium; stitches through side of chest; throbbing pain on scapula; lameness and stiffness of shoulder; sharp pain in shoulder; heavy feeling of arm; soreness and pain of arm; rheumatic, laming pain in arm; numbness and wearied feeling in arm; rheumatic pain in hand; cramplike pain < in limb, especially thigh.

Left: stiffness and soreness in occiput; lying on side, black clouds float before eyes; eye, anterior chamber shallow; iris dimmed and discolored; pigment spots on lens capsule; vitreous, hazy; holding eyes to side, diplopia; small pustule on eye; boring in ear; stinging in cheek; soreness and swelling, ear and tonsil; pain in hypochondrium; sensation above nipple as if wind was in cellular tissue; lame numbness of shoulder and arm; rheumatic pain in arm, it is stiff and sore; pain in sole of foot; boring pains deep in ear.

Right eye a little larger than left.

From r. to l: pain in liver.

From within outward: deep in l. ear; throbbing, boring.

Sensations. As if heavy weight was pressing head down on pillow; as if skull was cracking; teeth as if too long; as if r. tonsil was swollen; as of a lump in throat; pain as from a blow in stomach; burning at umbilicus as from a hot coal; as if wind was in cellular tissue above l. nipple; as though heart had jumped out of its place; pain as if bruised over entire scapular region; soreness as if one had been beaten.

Pain: at root of nose; on top of head, or on r. side; in pustule on l. eye; in teeth after filling; of r. tonsil; in r. side of throat; in r. ear, extending into throat; in l. hypochondrium; of r. arm; in knee joint; in sole of l. foot.

Violent pain: in r. side of head.

Severe pain: of r. orbit; in forehead; over entire scapular region.

Sharp pain: in vertex; in chest behind sternum; about heart; in back; in r. shoulder.

Sudden sharp pains: in ear.

Severe, cutting, cramplike pains: in both hypochondria.

Cutting pains: in stomach.

Cutting, colicky pains: in abdomen.

Sharp, shooting stitches: in end of penis.

Shooting pains: in temples; at root of nose.

Google

Stitches: in temples; through head and face; in region of liver; through r. side of chest.
Sticking pains: r. temple; l. ear; r. side of chest: both scapulæ, along outer borders of hands and little fingers.
Stitching pains: about heart.
Throbbing, boring: deep in l. ear.
Throbbing, bursting sensation: in temples.
Throbbing pains: in forehead and temples; between shoulders; on r. scapula.
Throbbing, aching, nightly pains: in eyes.
Cramplike pains: in lower limbs, knees, feet and toes.
Grinding, drawing pains: in teeth.
Deep bone pains: < at night.
Rheumatic, laming pains: in r. arm.
Rheumatic pain: in l. arm, in r. arm.
Aching: over eyes.
Dull, pressing, boring pains: over eyes.
Dull, boring pains: in legs.
Dull, bruised pain: in r. malar bone, radiating into forehead and r. side of head.
Dull, heavy aching: at base of brain.
Dull pain: in head; in legs.
Heavy, laming pains: in calves.
Pulsating and burning: like fire in a small spot on face.
Stinging: in l. cheek.
Burning: in throat; when swallowing saliva; at stomach; at umbilicus.
Burning, sinking sensation: at stomach.
Tingling: in legs.
Tickling: in larynx.
Soreness: of occiput; of r. orbit; of r. side of septum and nostril; of entire face; of throat; in r. ear; over side of head and face; extending from ear into throat; of l. ear and l. tonsil; of l. shoulder and arm; of r. arm; of l. arm; of all limbs; of hands and fingers.
Stiffness: in occiput; of jaws; of neck; of r. shoulder; of l. arm.
Heavy feeling: of r. arm.
Heaviness: of eyelids; of limbs; of whole body.
Suffocation: about heart.
Weak, empty feeling: at stomach.
Numbness and wearied feeling: in r. arm; of arms and hands.
Faint, sick feeling: in hypogastrium.
Excessive tired feeling: in all limbs.
Lameness: of l. shoulder and arm; in feet.
Troublesome itching: all over body.
Itching: of scalp; of spots over whole body.

Google

" **Tissues.** Especially affects mucous membranes covered with squamous epithelium.

‖Deep bone pains, especially at night.

‖When primary sore begins to granulate, and hard, pea-like nodules, resembling enlarged glands, appear upon surrounding parts, or when primary sore and whole base upon which it rests remains hard. θChancre.

‖Hard cicatrix after Hunterian chancre has been healed.

‖Painless chancres, with great swelling of inguinal glands, without disposition to suppurate; swelling of tonsils; affection of testicles; also secondary eruptions. θSyphilis.

‖Glands swollen, indurated.

‖Scrofulous diseases of glandular and lymphatic system; diphtheritic affections and secondary syphilis.

" **Touch. Passive Motion. Injuries.** Touch: soreness of occiput <.

Pressure: with hand, stitches in region of liver >; soreness and pain of r. arm <.

Rubbing: soreness and pain of r. arm <.

Scratching: does not > itching.

Passive motion: soreness and pain of r. arm <; pains in lower limbs <.

" **Skin.** Troublesome itching all over body, not > by scratching.

Persistent itching spots over whole body, following each other in rapid succession.

Hard papulæ over body.

Itching, pricking all over, < at night.

Bright red, fine eruption on chest and abdomen.

‖Excessively intense angina; induration of parotid, cervical glands and tonsils; diphtheritic affections, with excessive muscular prostration; desire to lie down, but feels < during rest and in warm room; sharp throbbing, boring pains from within outward, deep in l. ear, urine dark and copious (after *Laches.*), when there is loss of voice and hoarseness. θScarlatina.

‖Intolerable itching at night. θCrusta lactea.

" **Stages of Life, Constitution.** Girl, æt. 9 months; crusta lactea.

Child, æt. 2 years; scabies sicca.

Girl, æt. 3½; diphtheria (after failure of *Arsen.*, *Calcar.*, *Iodum*, *Mercur.*, *Sulphur*).

Girl, æt. 17; goitre.

Girl, æt. 17; tonsillitis.

Woman, æt. 26, single: intraocular affection.

Man, æt. 35, attacks usually appear after exposure to drafts of air while perspiring, suffering many years; sore throat.

Google

Woman, æt. 38, tuberculous family history; affection of lower lip.
Woman, æt. 42, stout, fleshy, many children; leucorrhœa.
Woman, æt. 67, suffering a long time; pains in limbs.

[43] **Relations.** Antidoted by: *Hepar;* palpitation relieved by *Lycop.*
Compatible: after *Laches.*, in scarlatina.

MERCURIUS IODATUS RUBER.

Biniodide of Mercury. HgI_2.

Introduced and proved by the American Provers' Union in 1856, monograph revised by Hering. Provings were made with 1st to 30th.

[1] **Mind.** Low spirited; disposed to cry.
Ill humor and bad taste in morning on awaking.
Delirium: with increased fever; with ulcers in fauces and tonsils.

[2] **Sensorium.** ‖Vertigo: during grippe; things seem to reel around her.

[3] **Inner Head.** ‖Sensation as if bound by a tight cord, in frontal region.
Beating, throbbing from r. of sinciput to occiput.
‖Vertex very hot, with slight pulsation at 11 P.M.
Pressive pain in l. brain from 6 to 8 P.M.
Pressure over eyes.
‖Pain in head with heat.

Google

‖Dulness of head, and slight pressing pain in l. side, like during a coryza; > walking in open air.
‖Headache with grippe.
‖Every day some headache.
‖Headache < afternoon and evening; dull, stolid.
‖Syphilitic tumors in brain.

[4] **Outer Head.** ‖Pains in bones of head, chiefly occipital.
‖Small pustules on head.

[5] **Sight and Eyes.** ‖Psorophthalmia; trachoma; pannus.
‖Eyes inflamed, burn, water; catarrh; bright light irritates.
‖Eye got sore in a single night, on following day much swollen, lids could not be turned out without much pain, being very sensitive to touch; a stream of hot, acrid tears, mixed with yellowish flakes of fibrinous material gushed out; marked chemosis of a pale yellowish color, presenting a succulent appearance; marked infiltration throughout entire conjunctival surface, presenting a firm fibrinous nature; over both palpebral surfaces a thick, opaque membrane had formed, which could be detached in small patches and shreds; much extravasation of blood over entire ocular conjunctiva; cornea invaded by ulceration at three distinct points, larger and deeper of these being at centre, threatened to penetrate into anterior chamber. (*Arg. nit.* was used externally.) θDiphtheritic conjunctivitis.
‖Old cases of granular lids and pannus.

[6] **Hearing and Ears.** Hearing dull; > evenings; ears close for a few moments at a time; coryza
Earache in r. ear.
Earwax increased.
‖Itching in both ears, all night.
Swelling of parotid and neighboring glands.

[7] **Smell and Nose.** ‖Coryza: with headache; dull hearing > getting warm by walking; r. side of nose hot, swollen; much sneezing; with hoarseness.
‖Whitish yellow or bloody discharge; affection of posterior nares, with raw sensation; nasal bones diseased: turbinated bones swollen.
‖Hawks mucus from posterior nares.
‖Swelling; hot and inflamed state of r. side of nose, with coryza.
‖In l. nostril a yellowish white tumor, spongy, moist, extending into orbit behind eye, displacing it one half its diameter to l. external angular process of orbit, and protruding about one third of an inch further than normal. θNasal polypus.
‖Crusty eruption on wings of nose.

[8] **Upper Face.** Aching in l. cheek and eye.

Google

‖Scabs on face, r. side.

[9] **Lower Face.** ‖Lips slimy and sticky on waking.

‖Lips stick together; headache.

Pain in jaws and temples.

‖Swelling of parotid and neighboring glands.

‖Eczema rubrum on chin.

[10] **Teeth and Gums.** ‖Gums swollen; toothache; glands swollen; boil in mouth; sleepless; alternately melancholic and cheerful, in periodic spells.

[11] **Taste and Tongue.** Taste: slimy on waking; bitter, metallic.

‖Tongue: dry, wants to wet mouth; scalded feeling, small blister on point; furred, with grippe; aphthæ.

[12] **Inner Mouth.** ‖Profuse flow of saliva and aching pains in teeth of lower jaw.

Soreness of middle of inside of l. cheek.

‖Mucous membrane of mouth inflamed, with burning.

‖Mucous patches on lips and inner surface of cheeks; round spots, but slightly demarcated, bare of epithelium and covered with a creamy exudation; discharge varies in character; spots very sensitive, but do not bleed. θSecondary syphilis.

‖Small nodules on mucous membranes of mouth, pharynx and nose, which become round ulcers, with hard edges and lardaceous base; slight pain; soon disappear from original place and appear in another part; when appearing on tongue, lip or wing of nose a distinct deep induration can be felt surrounding them.

[13] **Throat.** ‖Much phlegm in throat and nose.

‖Disposition to hawk; sensation of a lump in throat; hawked up a hard, greenish lump.

‖Hawks much; spits a tough, white phlegm.

‖Sticking in throat.

‖On waking throat sore; feels scalded, < during empty swallowing.

‖Loose cough, back of throat and nose inflamed, glands of throat ulcerated; enlarged tonsils, breathes with mouth open and snores at night; expectoration yellowish greenish, viscid or purulent.

‖Pharynx more irritable than larynx, with affection of posterior nares; great sensitiveness to cold air. θSore throat.

‖Follicular catarrh of pharynx; engorged tonsils.

‖Painful swelling of tonsils and submaxillary glands.

‖Left tonsil swollen; fauces dark red; diphtheritic patches; submaxillary glands painfully engorged.

‖Slight superficial ulcers in throat in patches.

‖Difficult deglutition, with ulcers in throat.

Google

Tonsils suppurating.
Worse from empty swallowing. θDiphtheria.
Velum long, seemingly causing cough; l. tonsil inflamed.
Pains in throat, tonsils swollen and covered with a slimy, speckled coating; back part of throat red; slight pain on swallowing; prostration; two days later tonsils, uvula and back part of pharynx covered with a coating looking like dried starch.
After scarlatina ulcers on fauces and tonsils.
Fauces and tonsils covered with fetid ulcers.
Glandular swellings; exudation limited, transparent and easily detached; cases attending epidemic scarlet fever. θDiphtheria.
Throat sore, < on l. side; swallowing painful, both of solids and fluids; fauces deep red; tongue coated yellowish, thick; gums and tongue more or less swollen and sensitive. θDiphtheria.
Right side; < from empty swallowing; throat sensitive to touch; absence of coating on base of tongue. θDiphtheria.
Tubercular sore throat.

[14] **Appetite, Thirst. Desires, Aversions.** Desire to drink small quantities.
Inclination to have food more salted.

[15] **Eating and Drinking.** Heartburn after dinner.

[16] **Hiccough, Belching, Nausea and Vomiting.** Loud and bitter belching.
Nausea: sore throat; sinking at stomach and epigastrium, with general sick feeling; while passing diarrhœic stool.

[17] **Scrobiculum and Stomach.** Pain on pressure at epigastrium.

[18] **Hypochondria.** Aching and full feeling in r. hypochondrium.
Sudden cutting pain in region of liver.
Heavy, painful feeling in region of liver, pancreas and spleen.
Transient drawing pain, followed by lame sensation in l. hypochondrium; l. waist feels sore on bending.
Enlarged malarial spleens and livers.

[19] **Abdomen.** Distended abdomen about navel, with pain on pressure.
Colic, followed by stool.
Uneasy, sore feeling all over bowels.
Subacute gonorrhœal inflammation of inguinal glands; swelling pearshaped, not very hard nor painful, pain only present upon strong pressure.

[20] **Stool and Rectum.** Stool copious, yellow brown, some-

Google

what watery, and coated with mucus and slightly bloody, preceded by griping and colicky pains; urging and slight tenesmus remained afterwards.

‖‖Inveterate piles.

[21] **Urinary Organs.** ‖Bright's disease.

Ulcers in bladder.

‖Increased flow of urine.

Frequent desire to urinate, she cannot hold her urine for a moment.

Urine: increased flow; thick and dark when passing; red.

[22] **Male Sexual Organs.** Sexual desire, particularly on going to sleep; nocturnal emissions.

Sensitiveness of r. testicle and cord.

‖Left side of scrotum for many years slightly enlarged, accompanied by varicocele; sudden, rapid increase of size, finally presenting a hard, painless tumor 19 ctm. long and 9 ctm. in circumference; no hydrocele; no inflammatory symptoms. θSarcocele.

‖‖Sharp shooting stitches in end of penis through glans.

‖Threatened gangrene of glans in paraphimosis.

‖Hard, red swelling of front of prepuce, appearing as thick and hard as lead pencil, with hard chancre in centre, entirely painless.

‖‖Discharge free and mucoid; patches of induration along urethra. θGonorrhœa.

‖Bubo discharging for a year.

[23] **Female Sexual Organs.** ‖Leucorrhœa of yellowish color.

Stony hardness of fibroid tumor.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Complete loss of voice. θDiphtheria.

‖Hoarse and husky shortly after getting a little wet in an evening shower.

‖Patches of inflammation of a livid purplish hue, discharge thin and offensive. θLaryngitis.

‖Dark red inflammation and swelling of parts, with much hawking, coughing and purulent expectoration, < in morning. θPhthisis laryngis.

‖Swelling of bronchial glands; subacute processes arising from influences of cold or atmospheric changes.

‖Goitre (*Iodine* was used externally).

[27] **Cough.** Cough: from elongated uvula; with sore throat; with a little loose, whitish, slimy sputum.

‖Grippe, with fever, headache, giddiness, furred tongue; sweat in bed.

‖Profuse yellow sputum.

[28] **Inner Chest and Lungs.** Awoke from a transient feeling of soreness in whole breast.

‖‖Constriction across chest.

Google

‖Catching pain under r. breast oppressing breathing.

[29] **Heart, Pulse and Circulation.** Sharp cutting pain in chest.
‖Sticking pain in heart.

[30] **Outer Chest.** Sticking in muscles of ribs, l. side, after walking out during thawing weather.

[31] **Neck and Back.** ‖Swollen glands on neck, with toothache, scarlatina, etc.
‖Spine sore and painful.

[32] **Upper Limbs.** ‖Rheumatic pains in shoulder joint.
‖Axillary glands suppurate.
Dull, aching, strained sensation in middle of os humeri as if about to break.
Rheumatic pains, soreness, stiffness in l. arm < by motion.
‖Palm of l. hand cracked, horny, several oozing rhagades.

[33] **Lower Limbs.** ‖Aching pains from hips to ankles, as though she had walked many miles, felt more in bones.
Weakness of knee joints.
‖Pains from calves up to sacrum.
Insupportable pain and aching in legs towards evening, > on moving.
‖Pain of syphilitic ulceration in front of leg.
‖Rheumatic affection of feet after washing floor; violent tearing on soles and in foot joint; feet swollen, sore to touch, particularly around ankles; walking very difficult, sometimes impossible.

[34] **Limbs in General.** Rheumatic pains now here, now there, mostly muscular; alternately in arms and hands, legs and feet; violent pain like otalgia in l. ear.

[35] **Rest, Position, Motion.** Swallowing: empty, sore throat <; pain in throat.
Bending: l. waist feels sore.
Motion: rheumatic pains in l. arm <.
Walking: very difficult, sometimes impossible, soreness of ankles.

[36] **Nerves.** ‖Epileptic spasms increase two days and are gone the fourth.
Weary, with rheumatic pain in forearm; bruised feeling.

[37] **Sleep.** Toothache on going to sleep.
Insomnia, with ulcerated throat.
Restless from 12 P.M. till morning, with constriction in diaphragm.
Dreams: frightful; of swimming; gunning; traveling; lascivious.
On awaking: ill humor; dull head; slimy taste; throat sore; pain in chest.

[38] **Time.** Morning: on awaking; ill humor and bad taste; coughing and purulent expectoration <.
After dinner: heartburn.

Google

Afternoon: headache <.
Evening: cheerful; headache <; towards, insupportable pain in leg.
At bedtime: chilly.
11 P.M.: vertex very hot, with slight pulsation.
All night: itching in both ears.
At night: snoring; sweats.

[39] **Temperature and Weather.** Open air: dulness of head >.
Getting warm: by walking; dull hearing >.
After walking in thawing weather: sticking in muscles of ribs, l. side.
Getting wet: hoarse and husky.
After washing floor: rheumatic affection of feet.
Cold or atmospheric variations: swelling of glands, subacute processes.
Cold air: great sensitiveness of pharynx.

[40] **Fever.** Chilly at bedtime.
Intense shivering, followed by feverishness.
Chilly, followed by flush over face.
Fever, with grippe.
Flush of head and feeling of being tickled.
Sweats at night in bed; grippe.
Copious night sweats; hot sweat.

[41] **Attacks, Periodicity.** Alternately: melancholic and cheerful; rheumatic pains in arms and hands, legs and feet.
For a few moments at a time: ears close.
From 6 to 8 P.M.: pressive pain in l. brain.
From 12 P.M. till morning: restless.
Every day: some headache.
In one night: eyes get sore, next day much swollen.
Increasing two days, gone on fourth: epileptic spasms.
For a year: bubo discharging.
Of two years' duration: ulcers on legs.
For many years: l. side of scrotum enlarged.

[42] **Locality and Direction.** Right: beating, throbbing from sinciput to occiput; earache; side of nose hot, swollen, inflamed; scabs on side of face; side of throat < from swallowing; aching and full feeling in hypochondrium; sensitiveness of testicles; catching pain under breast.
Left: pressing pain on side of head; pressive pain in brain; tumor in nostril, aching in cheek and eye; soreness of middle of cheek; tonsil swollen and inflamed; sore throat <; drawing pain and lame sensation in hypochondrium; waist feels sore; side of scrotum enlarged; sticking in muscles of ribs; rheumatic pain, soreness, stiffness; palm of hand cracked, horny; pain like otalgia in ear.

[43] **Sensations.** As if bound by a tight cord in frontal region;

Google

as of a lump in throat; as if os humeri was about to break; as if she had walked many miles; aching in bones of leg; as if being tickled; mouth as if scalded.
Pain: in head; in bones of head; in r. ear; in jaws and temples; in nodules on mucous membrane of mouth; in throat; at epigastrium; about navel; in spine; from calves up to sacrum; of syphilitic ulceration in front of leg; in chest.
Insupportable pain: in legs.
Violent pain: in l. ear.
Sharp, shooting stitches: in end of penis through glans.
Violent tearing: in soles and foot joints.
Cutting: in chest; in region of liver.
Beating, throbbing: from r. of sinciput to occiput.
Sticking: in throat; in heart; in muscles of ribs; l. side.
Catching pain: under breast.
Rheumatic pain: in shoulder joint; in l. arm; now here, now there; in forearm.
Transient drawing: in l. hypochondrium.
Pressive pain: in l. brain.
Aching: in l. cheek and eye; in teeth of lower jaw; in r. hypochondrium; from hip to ankles; in legs.
Slight pressing pain: on l. side of head.
Heavy, painful feeling: in region of liver, pancreas and spleen.
Dull, aching, strained sensation: in middle of os humeri.
Burning: of mouth.
Soreness: of middle of l. cheek; of throat; of waist; all over bowels; in whole breast; of spine; of l. arm.
Raw sensation: of posterior nares.
Bruised feeling: in forearm.
Sensitiveness: of r. testicle and cord.
Pressure: over eyes.
Full feeling: at epigastrium.
Dulness: of head.
Slight pulsation: in vertex.
Constriction: across chest; in diaphragm.
Stiffness: of l arm.
Lame feeling: in l. hypochondrium.
Sinking: at stomach.
Itching: in both ears.

" **Tissues.** Indurated chancres; Hunterian chancre.
Chancre and bubo, particularly indolent.
Old cases of syphilis, particularly in persons of lax fibre, scrofulous, and in those who have taken much mercury.

" **Touch. Passive Motion. Injuries.** Touch: eyelids very sensitive; throat sensitive; pustules sore.

Pressure: pain at epigastrium; pain about navel; pain of inguinal glands.

[46] **Skin.** Small fissures and cracks.
Hard papules here and there.
Pustules, inflamed base, sore to touch, itching slightly; scab over, but pus oozes.
Syphilitic ulcers.
Freckles, liver spots.
Chilblains.
Old scrofulous or syphilitic ulcers, spreading.
Syphilitic eruption over whole body, with moist, offensive smelling ulcers on legs, of two years' duration.
Lupus; condylomata.
During course of malignant scarlatina swelling of parotid and neighboring glands; fauces and tonsils covered with large fetid ulcers, and fever increased, with delirium, insomnia and difficult deglutition.

[47] **Stages of Life, Constitution.** Girl, æt. 16, thin, weak; diphtheria.
A servant girl, after washing floor; rheumatic affection.
Man, æt. 29; suffering a year; bubo.
Irish-laborer, æt. 40; living in damp, ill ventilated house, of irregular habits, occasionally indulges in a drunk; diptheritic conjunctivitis.
Man. æt, 70; sarcocele.

[48] **Relations.** Antidoted by: *Hepar.*
Compatible: after *Bellad.*, in scarlatina.
Compare: *Badiaga, Carbo anim.* and *Nitr. ac.*, in syphilitic eruptions; *Merc. præc. rub.*, which is preferable for leaden heaviness in occiput with otorrhœa.

Google

MERCURIUS SULPHURICUS (Turpethum).

Sulphate of Mercury. Turpeth Mineral. $HgSO_4$.

Introduced by Hering, proved by himself, 3d trit. (MSS.), Neidhard (App. N. A. J. H., p. 281), Raymond, Dake (N. A. J. H., vol. 3, p. 180), Berridge, Croker (N. Hom. Rev., vol. 14, p. 108).

CLINICAL AUTHORITIES.—*Hydrothorax*, Lippe, Miller (Montreal).

[1] **Mind.** Low spirited, with chilliness and yawning.
Ill humor after eating.

[2] **Sensorium.** Giddiness while standing, after headache; confusion in head.
Fulness in head, with occasional stitches.

[3] **Inner Head.** Dull pain in forehead.
Pain in head under coronal suture, on waking in morning, during forenoon confined to r. frontal region; pains dull, extending deep into brain, < when exercising.
Sharp pain in r. parietal protuberance; darting pains in other parts of head.
Soreness all through head, after breakfast and on moving about.

[4] **Outer Head.** Violent itching of hairy scalp.

[5] **Sight and Eyes.** Oppression over eyes, continuing for several hours.
Eyes < from sunlight.

[7] **Smell and Nose.** Sneezing: in sunshine; with fluent coryza.
Swelling and soreness of tip of nose.
Itching of nose.

[8] **Upper Face.** Pale, anxious countenance.
Burning in ears and face, after a chill.

[9] **Lower Face.** Swelling of parotid gland.

[10] **Teeth and Gums.** Gums and palate dark bluish color; ulcerated margins.

[11] **Taste and Tongue.** Taste: pasty, insipid; bad after rising; brassy, metallic
Tongue: tinged down middle greenish yellow; furred, moist, swollen; covered with dry black fur; coated heavily white, yellowish at root; enlarged papillæ stand up like red points, with flat taste.
Burning, smarting, stinging on tip of tongue (l. side in evening).

Google

ℓSoreness on tip of tongue.
Dryness of tongue and throat.

[12] **Inner Mouth.** Mouth clammy and full of mucus in morning.
Dryness in mouth and fauces.
Burning sensation in mouth and throat.
Soreness in mouth and throat; salivation.
Tongue and inside of mouth red, inflamed, feeling raw.
Lips, gums, fauces, mouth and tongue swollen; look dry and black.

[15] **Throat.** In throat: pain; sense of heat and constriction; burning; scalding.

[16] **Hiccough, Belching, Nausea, Vomiting.** Constant sickness; vomiting of ingesta.
Violent yellow vomiting, every ten minutes.
Vomiting and diarrhœa.

[17] **Scrobiculum and Stomach.** Pain in epigastrium and abdomen; weight; stomach tender to pressure.
Stomach so irritable nothing remains on it an instant.
Digestion impeded; after supper, distressing feeling all night, that unless stomach was relieved a fit would ensue; vomiting with relief.
Acidity of stomach.

[19] **Abdomen.** Coldness or burning in abdomen.
Awoke at 1 A.M. with severe pains along duodenum and down into umbilical region.
Much griped.
After drinking coffee, pain in abdomen as if diarrhœa would set in.
Soreness in inguinal glands.

[20] **Stool and Rectum.** Brown loose stools.
ℓStools loose, watery, causing severe burning and soreness of anus.
ℓVery profuse watery evacuations (relieving dyspnœa). θHydrothorax.
Watery stools pouring from him and burning anus, like boiling water.
Diarrhœa early in morning; stools burst out in a hot stream of yellow water.
ℓViolent purging; rice water motions, some yellow.
After diarrhœic stools sensation of fulness as from congestion to legs, especially feet; they feel numb when standing.
Hard, scanty and delayed stools.

[21] **Urinary Organs.** Urine: increased in quantity; desire not as frequent as usual; great urging, with inability to void usual quantity, late in afternoon; scanty and scalding, but clear; dark, becoming turbid, with a scum on it.

Google

[31] **Male Sexual Organs.** Involuntary emissions and lascivious dreams.
‖Gonorrhœa or syphilis, with intense congestion to parts.
Swelling of testicles.

[32] **Voice and Larynx. Trachea and Bronchia.** Heat and roughness in larynx, hoarseness.
‖Increased expectoration of mucus from larynx and trachea.

[34] **Respiration.** Pain in chest prevents him from breathing.
‖Great dyspnœa; has to sit; cannot lie down; breathing quick and short. θHydrothorax.
Dyspnœa in children; hydrothorax.
Dyspnœa and chest symptoms, < in afternoon.
Mercurial fetor of breath.

[35] **Inner Chest and Lungs.** Pressure on chest.
‖Burning in chest.
Pain in r. side of chest, extending to scapula, can scarcely breathe, < from 4 to 5 P.M.
‖‖Hydrothorax; dyspnœa, breathing quick and short, has to sit, cannot lie down; swollen extremities; stools loose, watery, causing severe burning and soreness of anus; burning in chest.*
‖Dropsy of chest, especially if occurring from heart or liver disease.

[36] **Heart, Pulse and Circulation.** Pulse: 90, tremulous; 130, tremulous and irregular: slow and small; regular, but small and weak; reduced, with flat taste.

[37] **Upper Limbs.** Stiffness in arms.
Violent beating in l. arm, commencing above elbow in course of brachial nerve and extending along radial nerve to wrist, followed by pain similiar to that produced by a blow upon arm below insertion of deltoid muscle; pain affected principally radial side of forearm, thumb, index finger, at 8.30 A.M.
Numbness of forearm and hand, also of r. hand.
Shooting pains in wrists and along metacarpal bones.
Hands icy cold, with blue nails.

[38] **Lower Limbs.** Pain and lameness of knees, noticed particularly when walking.
‖Œdematous swelling of legs.
Ulcers on ankles.
Aching in calf of r. leg.
Numbness in hollow of r. foot.
Foot sweat, with soreness at ends of nails.
After four weeks, pains that remain are in limbs, espe-

---

* "When it acts well it produces a profuse, watery diarrhœa with great relief to patient. It is as important as *Arsen.* in hydrothorax."—LIPPE.

Google

cially legs, causing a weak, wearied feeling and pain and stiffness in r. knee, especially when stepping down a step; for a few days a bloated, hot feeling in feet, like rheumatic gout, and for two days a slight swelling and painfulness on inner side of l. ankle, as if a boil was likely to form there; a tendency for feet to become inflamed, as if likely to become blistered by boots, when walking, it seems at soles, especially outer toes; it is rather of a burning character; for two days the tarso-metatarsal joint of r. big toe seemed inclined to inflame, as if rheumatic gout would set in.

[31] **Limbs in General.** Tormented by pain and cramps in limbs at night.

[35] **Rest. Position. Motion.** Has to sit, cannot lie down: great dyspnœa.

Standing: giddiness; feet feel numb.

Stepping down a step: pain and stiffness in r. knee.

Moving about: soreness all through head.

Exercising: pains extending deep into brain.

Walking: pain and lameness of knees.

[36] **Nerves.** Debility, with sleepiness.

Sense of considerable weakness.

Uneasiness, late in afternoon.

Restlessness.

Pains all over, especially in lower part of back and limbs.

[37] **Sleep.** Frequent yawning.

Restless night, with dreams and delirium.

Wakefulness after midnight; dreams.

Dreams: of traveling amid perplexities; lascivious; vivid, of fires, exerting himself to extinguish them; viewing a person hung and another cut up, seeing blood and mangled remains.

Awakes with headache in morning.

[38] **Time.** Morning: pain in head on waking; mouth clammy and foul; diarrhœa early.

8.30 A.M.: violent pain in l. arm.

During forenoon: pain confined to r. frontal region.

1 A.M.: awoke with severe pain along duodenum and down into umbilical region.

Afternoon: great urging, with inability to void usual quantity of urine; dyspnœa and chest symptoms; uneasiness, chills.

Evening: pain on side of tip of tongue.

Night: distressing feeling in stomach; pain and cramps in limbs; restless, with dreams and delirium; excessive sweat.

After midnight: wakefulness; dreams.

[40] **Fever.** Creeping chills ascending back; when they reached neck a general shudder ensued.

Google

Chilliness running up back, with yawning and depression of spirits, followed by dull pain in forehead, burning in face and ears and slight fever.

Chilliness, restlessness and heaviness in upper part of abdomen, frequent yawning and diminished secretion of urine (in afternoon).

Chills: with nausea, from 10 A.M. to 2 P.M.; late in afternoon; from 12 M. to 1.30 P.M.; every other day.

Skin cold and clammy.

Whole body feels cold externally.

Icy coldness of hands and blueness of nails.

Burning heat of face and ears after a chill.

Painful burning over whole body, especially in face, but not on feet, with violent thirst.

Excessive sweat at night.

41 **Attacks, Periodicity.** Every ten minutes: violent yellow vomiting.

From 4 to 5 P.M.: burning in chest, extending to scapula.

From 12 M. to 1.30 P.M.: chills.

From 10 A.M. to 2 P.M.: chills, with nausea.

For several hours: oppression over eyes.

Every other day: chills.

For two days: a slight swelling and painfulness on inner side of l. ankle; tarso-metatarsal joint of big toe seemed inclined to inflame.

For a few days: a bloated, hot feeling in feet.

42 **Locality and Direction.** Right: pain in frontal region; sharp pain in parietal protuberance; numbness of hand; aching in calf of leg; numbness in hollow of foot; pain and stiffness in knee; big toe as if rheumatic gout would set in.

Left: side of tip of tongue pains; violent beating in arm; pain and swelling of inner side of ankle.

43 **Sensations.** Most pains feel as if a dull stick pressed on parts and was moving in diverse curved lines, feels as if this pain was in bones.

As if diarrhœa would set in; as if stools were boiling water; as if a boil was likely to form on ankle; as if feet were likely to become blistered by boots; as if rheumatic gout would set in in foot; all over, especially in lower part of back and limbs.

Pain: in head under coronal suture; in throat; in epigastrium and abdomen; in chest; in l. arm; in knees; in r. knee; on inner side of l. ankle; in limbs.

Severe pain: along duodenum and down into umbilical region.

Sharp pain: in r. parietal protuberance.

Violent beating: in l. arm.

Google

Darting pains: in parts of head.
Shooting pains: in wrists and metacarpal bones.
Occasional stitches: in head.
Aching: in calf of r. leg.
Cramps: in limbs.
Dull pain: in forehead.
Painful burning: over whole body.
Heat: in throat; in larynx.
Burning, smarting, stinging: on tip of tongue.
Burning: in ears and face; of mouth and throat; in abdomen; of anus; in chest; in feet.
Soreness: all through head; of tip of nose; on tip of tongue; in mouth and throat; in inguinal glands; of anus; at end of nails.
Raw feeling: of tongue and inside of mouth.
Distressing feeling: in stomach.
Constriction: in throat.
Oppression: over eyes.
Dryness: of tongue and throat; in mouth and fauces.
Confusion: in head.
Fulness: in head; in feet and legs.
Pressure: on chest.
Lameness: of knees.
Stiffness: in arms; in r. knee.
Numb feeling: in legs and feet; of forearm and hand; in hollow of r. foot.
Coldness: in abdomen.
Itching: of hairy scalp; of nose.

[44] **Tissues.** Induration of glands.
Rheumatic pains.

[45] **Touch. Passive Motion. Injuries.** Pressure: stomach tender.

[46] **Skin.** Psoriasis; lepra.

[48] **Relations.** Antidoted by *Hepar.*
Compare: *Sulphur*, with which *Merc. sulph.* has many symptoms in common, more even than with *Cinnab.*, *Arsen.* and *Digit.* in hydrothorax, especially occurring in heart or renal disease.

Google

MEZEREUM.

Daphne Mezereum; Spurge Olive. *Thymelaceæ.*

A hardy shrub, native of Great Britain and Northern countries; flowers early in Spring, sometimes in the snow. The fresh bark is gathered before the flowers appear, and from it is prepared the alcoholic tincture.

Introduced by Stapf and extensively proved by Hahnemann, Hering, Franz, Caspari, v. Gersdorff, Gross, Hartlaub, Rückert, etc., etc. (See Chronische Krankheiten.)

[1] **Mind.** ❙Weak memory and debility. θProsopalgia.

❙Unable to recollect what has very recently occurred; every intercurrent remark of others disturbs and confuses his ideas.

❙Mental dulness; weakness of reasoning powers.

❙Irresolute; mind easily confused, unable to recollect; thinking is difficult.

❙No rest when alone; wants to be in company; ideas vanish while talking; unable to repeat what has been learned by heart; looks through window for hours, without being conscious of objects around; knows not what she is about; forgets what she is about to utter; looks ill humored, pale, wretched, fallen away; apprehensiveness at pit of stomach, as when expecting some very unpleasant news.

Aversion to talk, it seems hard work to utter one word.

Hypochondriacal mood, with low spirits and weeping.

❙Despairs of eternal salvation.

❙Indifference to everything and everybody.

❙❙Hypochondriacal and despondent, takes no pleasure in anything; everything seems to him dead and nothing makes a vivid impression upon his mind.

❙Inclined to get angry with others about trifles; everything vexes him, he wants to say annoying and vexatious things; is soon sorry for it.

❙Thought is difficult; takes no interest while reading or listening; whatever happens affects him less than usual; mental dulness.

❙Very much distracted; is unable to dwell long upon any subject.

[2] **Sensorium.** ❙Head feels dull or as if drunk; > after meals and by work.

Giddiness, with contracted pupils; vertigo and flickering before eyes; is inclined to fall to l. side, with faintness.

Google

Blood seems to leave extremities and make her feel weak and giddy, with inability to speak.

[3] **Inner Head.** ‖Right sided megrim.

‖Pressive pain from within outward in l. temple.

‖Headache, extending from root of nose into forehead, as if everything would press asunder; pain in temples when touched; heat and perspiration on head, chilliness and coldness in rest of body, in morning.

‖Boring in bones of occiput.

‖Headache after moving about and talking much, especially in temples and side of vertex.

‖‖Very violent headache; head painful to slightest touch (after a slight vexation).

Headache: with chilliness; < in open air; > by stooping; of scrofulous or syphilitic origin; produced by suppression of eczema; accompanying exostoses, or nocturnal bone pains, or caries of jaw; with itching of whole body.

Sensation as if upper part of head was pithy.

Pressing pains as if skull would split.

‖Syphilitic affections of brain.

[4] **Outer Head.** ‖Numb feeling in top of head, or as if top of head was gone.

‖Pain in bones of skull, mostly < by touch.

‖Aching pain in vertex and occiput, < at night and > towards morning; while pain lasted she groaned, wept and sobbed; very sensitive and irritable; during violence of pain cold shudder down back, hands cool, feet as if bruised; simultaneously with head pains severe pains in bones of upper arm and shin bone; a distinct thickening of scalp could be felt in painful parts, which were sensitive to touch; pains < on entering room, on sudden changes of weather, from cold winds and cold, damp air; > when body began to perspire, but if she covered herself in order to get into a sweat, pains were < at once; when pains are < has a feeling of paralysis in limbs, cannot move them well, they feel very heavy; if she attempts motion pain is <. θCephalalgia periostitica.

‖‖Cranial bones pain, are swollen and sensitive to cold and contact; < from motion and in evening; caries; itching, burning of scalp.

‖Pains in bones of head, so severe as almost to cause fainting; skull bones in several places elevated and symptoms seem to indicate that brain was being pressed upon either by extravasation or an exostosis. θSyphilis.

‖Scalp numb, with drawing pain, generally only on one side.

Google

‖Scalp on both sides of vertex painful to touch.
‖Burning, biting, itching on scalp, < on vertex; scratching changes locality, but increases itching, sore boils follow, < at night and when lying down.
‖Dandruff, white, dry; dry scurf on scalp.
‖‖Head covered with a thick, leatherlike crust, under which thick, white pus collects here and there and hair is glued together. θTinea capitis.
‖Scabs on head look chalky, and extend to eyebrows and to nape of neck.
‖Elevated, white, chalklike scabs, with ichor beneath; breeding vermin.
‖Moist, itching eruption on head and behind ears.
‖Itching of scalp; pain in cranial bones, < at night, with itching and burning in skin, < by rubbing; burning in skin of vertex and temples; itching in eyebrows; burning, itching in nostrils and in side of ears; pimples on scalp. θPityriasis capitis.
‖Eruption on scalp, preceded by violent headache for six months; scalp covered with scurf, hair comes out in handfuls; hair of eyebrows and eyelashes drop out; scalp and face itch violently, especially when she gets warm, and if she attempts to wash anything steam from warm water causes her nose, eyes and face to itch; desquamation; she dare not approach fire from intense itching caused by doing so; scurf comes off scalp when scratched "like fish scales;" spots of a similar nature come out on thighs, back and chest; terrible irritation in vagina, which has continued for a year unaccompanied by any abnormal discharge. θPityriasis capitis.
‖A growth as large as a thaler on middle of forehead, projecting about four lines; came and went spontaneously and suddenly; scaly exfoliation of skin.
‖Dry eruption on head, with intolerable itching as if head was in an ant's nest. θFavus.

° **Sight and Eyes.** Staring at one spot; vacant look.
Inclination to wink or close eyes.
‖Dryness in eyes with pressure in them; they feel too large.
‖A feeling as if eyes were drawn backward into head.
‖Eyes feel strained.
‖Aching and tearing in and around eye, especially in orbits.
‖Aching, pressive pain about l. eye.
‖Lachrymation; smarting in eyes; must rub them.
‖Eyes hot, inflamed on rising in morning; conjunctiva of ball very much injected, dirty red, especially near external canthus: l. eye <; pressive pain and sensation of dryness.
‖Rheumatic ophthalmia, and ophthalmia consequent upon abuse of mercury.

Google

‖Annoying twitching of muscles of l. upper lid.
‖Itching biting on margin of lids and skin near nose.
‖Itching in l. upper eyelid, so violent at times that she had to cease her work; frequently after itching pressure appeared in outer angle of l. eye, but soon passed off; < in evening.
‖Blepharitis from birth, with tinea capitis, which itches intensely.
‖Eczema of lids and head; thick, hard scabs, from which pus exudes on pressure.
‖Ciliary neuralgia, especially after operations on eye.

[6] **Hearing and Ears.** ‖Ears feel as if too open, and as if air was pouring into them, or as if tympanum was exposed to cold air, with a desire to bore with finger into ear.
‖Sensation as if air was distending r. external meatus, and as though roaring in ears would occur; afterwards in l. meatus, with a stopped sensation in ear.
‖Boy, æt. 17, deaf from fourth year; when three years old had an eruption on head, which was removed by pitch plaster and touching sore with nitrate of silver; tympanum thickened, of an opaque whiteness, slightly convex only by inflation, it is impossible to recognize blood-vessels; Eustachian tube clear; former eruption consisted of whitish, hard, nearly horny incrustations and scales, fissured, and through these cracks oozing of thick, yellow, foul smelling pus, severely itching, especially at night, so that child scratched off the crusts.
‖‖Chronic diffuse otitis.
‖Itching behind ears, scratching causes small elevations, when scratched off spots feel sore.
‖Oozing eruption behind ears.

[7] **Smell and Nose.** ‖Sense of smell diminished, with dryness of nose.
‖Sneezing: ineffectual; coryza; sore pain in chest.
‖Discharge of yellow, thin, at times bloody, water from nose, causing soreness and burning.
‖Fluent coryza, soreness of and scabs in nose; soreness and burning of upper lip.
‖Constant excoriation of nose.
‖External margin of r. nostril inflamed, swollen and painful.
‖Twitching (visible) on root of nose.

[8] **Upper Face.** ‖Grey, earthy complexion.
‖‖Looks ill humored, pale, wretched, fallen away.
‖Facial muscles drawn tense.
‖Frequent, troublesome, muscular twitching of muscles of r. cheek.
‖Orbicularis palpebrarum spasmodically contracted; lachrymation; nasal voice; eruption on skin. θNeuralgia of r. supraorbital nerve.

Google

Sudden, very violent pain in face during sleep, similar to an old faceache, waking her up but soon disappearing, and not further disturbing sleep.

Constant violent tearing in face in morning.

Prosopalgia, r. side; teeth feel too long.

Constant, fine tearing in l. side of face, and in teeth after morning walk.

Neuralgic pains come quickly and leave parts numb, < from warmth.

Lightninglike pains coming from r. infraorbital foramen and extending to temples and corners of mouth; pains come suddenly while talking or eating; during intervals twitching of muscles and numb pain. θProsopalgia.

Prosopalgia, l. side, from arcus superciliaris into eye, cheek and teeth, down to neck and shoulder; increased lachrymal secretion; injected conjunctiva; great sensitiveness of parts to touch; dry feeling in throat; some difficulty in swallowing; constant chilliness even in bed; weak memory and debility; < in evening until midnight, with moaning; > from wrapping up head and from quiet in a dark room; appetite poor; stool costive; menses regular but scanty, followed by irritating leucorrhœa and pruritus vaginæ; hands and feet cold; nails blue; on a small place on top of head a sensation of heat.

Cramping, numbing pressure; beginning in l. zygoma and spreading towards eye, temple, ear and down neck to shoulder; at times pressive pain in occiput, sudden stitches in side and sensation as of ants running over chest; < entering warm room and after warm food; appeared first on r. side, later on left. θProsopalgia.

Boring in bones of upper jaw.

Intolerable, nightly, burning pains, in abscess of antrum of Highmore; periosteum more affected than bones; dull, crampy pain, referred to malar bone; anguish, pale face, chilliness or cold sweat.

Face swollen, burning pains, confluent vesicles; nares closed; erysipelas bullosum.

Child continually scratches face, which is covered with blood; face and forehead hot and red; restlessness; irritability; itching < at night; tears off scabs, leaving spots on which fat pustules form; ichor from scratched face excoriates.

Deep, inflammatory redness of face; eruption fat and moist. θImpetigo.

Boils on face.

Group of vesicles on dorsum of nose, itching excessively and discharging a pale, somewhat cloudy lymph, which

Google

formed a yellowish brown acuminated scab, easily separated but reappearing; scab attained size of small bean. θRupia prominens.

[9] **Lower Face.** ‖Luxatio spontanea of mandibula, with cracking in joint and movements of cond. max. inf.

‖Neuralgia of inframaxillaris.

‖Severe pain in lower jaw, in region of mental foramen, as if a hole was being bored, pain at one time on r. side, then on l. or both sides; pain irregular, coming day or night, lasting several minutes; runs along course of inframaxillary nerve; motion of jaw impeded; saliva runs from open mouth; a year ago contusion of l. zygoma; hard palate insensitive, as if made of wood; pharynx red; burning in throat; varicose veins on legs; frequent appearance of round, red spots on neck; drawing in limbs while in wind. θProsopalgia.

‖For many years considerable swelling of upper lip, with indurations on inside, and discoloration on skin (after scabies).

Lips: stick together; dry; scaly externally, painful in evening, sore, burning.

‖Ulcers on upper lip extending to nose.

‖Honeylike scabs about mouth.

‖Chin covered with elevated white scabs.

‖Red pustules on chin, painful when shaving; broke and formed a scab; hairy part of face covered with yellowish brown scab quarter of an inch thick, from cracks in which bloody lymph exuded, producing slight itching in edges; around edges a dark red, moist areola; lids inflamed, lower lids beset with crusts and somewhat everted. θMentagra.

A small pustule in beard, l. side of chin; also small pimples on chest at base of hairs.

[10] **Teeth and Gums.** ‖‖Teeth feel dull, blunt and elongated; painful on biting on them or from fresh air.

‖Toothache: in carious teeth; < at night; when touched with tongue; > with mouth open and drawing in air; boring and stinging, extends to malar bones and temples; chilliness.

‖Drawing pains in upper and lower jaw, l. side, alternating with boring in several teeth and stitches extending to zygoma; teeth feel dull, cold and too long; whole side of head as if cold, with sensitive drawing pains; < from motion or touch; chilliness in evening; despondent, morose. θToothache.

‖Twitching, grasping, stitching pains in hollow tooth, and sensation as if tooth was being lifted out of socket. θToothache.

Google

‖Pain in r. eyetooth, daily increasing; feels as if too long, < from pressure on crown and outside on root.

‖Woman approaching years of climaxis, suffering continually from extraordinary congestions to head, with burning redness of face, obstinate constipation; menses always very copious and too soon; was attacked with fearful pains in four hollow teeth, which deprived her of all rest.

‖‖Teeth decay suddenly, on side, above gums; crown remains intact; decaying roots.

‖Roughness from tartar on teeth.

[11] **Taste and Tongue.** ‖‖Thick, white coating on tongue; large, red, elevated papillæ; middle fissured.

‖Burning on tongue extending to stomach.

‖Swelling under r. side of tongue, which in the course of two years became as large as a pigeon's egg; swelling painless, red, bluish at apex as from enlarged blood-vessels; on talking or chewing ejects a watery fluid. θRanula.

[12] **Inner Mouth.** ‖Burning: in mouth, extending to stomach; in whole mouth, sometimes > by eating; of lips and tongue, as if quite sore.

‖Heat, scraping, burning, peppery sensation on palate and in fauces.

‖‖Saliva almost always increased.

‖‖Breath smells like rotten cheese.

‖‖Flat whitish ulcers on inner side of lips and corners of mouth.

‖Dark redness of fauces; burning dryness even into larynx; < every winter; syphilis.

[13] **Throat.** ‖‖Burning: in throat and pharynx; in throat, dryness in fauces, hacking cough; anxious oppression of breath, and loosening of scanty mucus on coughing.

‖Constriction in throat and stomach.

‖Scraping and burning in fauces and pharynx.

‖Rawness of fauces.

‖‖Swelling and sensation of narrowing in throat.

‖Constriction of pharynx, food presses during deglutition.

‖Dry feeling in throat; some difficulty in swallowing; constant chilliness, even in bed.

‖Burning in pharynx and œsophagus.

‖Sensation as if posterior part of throat was full of mucus, the same after hawking.

‖Severe burning sensation and raw pain extending from pharynx half way down œsophagus; deglutition even of fluids difficult and painful; on posterior pharyngeal wall slight redness and a considerable number of small ulcers. θSyphilis.

Google

‖Syphilitic sore throat, < by former mercurial treatment, he had to keep indoors during Fall and Winter; dark redness of faucial mucous membrane; dryness and burning of fauces, larynx and pharynx, extending into chest, somewhat > by eating; voice hoarse, not clear, failing during a continuous discourse; cold air causes pain in gums, but > burning; expectoration of much mucus; hemorrhoids with stitching pains; tendency to diarrhœa

[14] **Appetite, Thirst. Desires, Aversions.** ‖Canine hunger noon and evening.

‖Desire for ham fat, coffee, wine; beer tastes bitter and causes vomiting.

‖Loss of appetite.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Frequent, empty, tasteless eructations.

‖Nausea in throat and stomach; vomit bitter, sour; slimy; oily or greasy.

[17] **Scrobiculum and Stomach.** ‖Apprehensiveness at pit of stomach as when expecting unpleasant news.

‖Burning and uneasiness in stomach; > by eating; canine hunger at noon and evening. θGastrosis.

‖Burning in whole mouth, as from pepper, especially in afternoon after eating; in morning nausea and faintness; slight thirst; poor appetite; stool every third day; pressure in stomach and intestines; hot urine. θGastric catarrh.

‖Constant, severe pain and pressure in stomach even after light foods; constricting, pinching pain with much belching, lasting one to two hours after eating; pain culminates and ends with retching and vomiting of all food taken; circumscribed redness of face; skin cool; pulse small and frequent; chilliness alternating with flushes of heat. θUlcer of stomach.

‖Induration of stomach.

‖Burning, corroding pains, as if internal surface of gastric mucous membrane was raw, with sensation as if food remained for a long time undigested in stomach and caused pressure; bloody vomiting; great depression. θChronic gastritis.

‖Great emaciation; cachexia; loss of appetite; disgust for all animal food; daily vomiting of chocolate colored masses, with hot burning in throat: vomiturition, with excessive anguish and uninterrupted nausea from morning until night; all food is immediately thrown up; stool only every eight or ten days; constant sleeplessness; touch clearly reveals two tumors of size of an orange, one in r. hypochodrium, the other in scrobicu-

lum; the latter movable and sensitive to pressure (relieved). θCarcinoma ventriculi.

[18] **Hypochondria.** ‖Dull pain in region of spleen; hardness and swelling, with pressive pain.

[19] **Abdomen.** ‖Burning and sensation of heat in abdomen.

‖Stitches in l. side, in region of short ribs.

‖Loud flatulence in abdomen, and loud emissions of it.

‖‖Rumbling and noises in abdomen.

‖‖Flatus constantly passes, but in a short and interrupted manner.

‖Much short, very offensive flatus, especially before stools.

[20] **Stool and Rectum.** ‖Many discharges of fetid flatus, more before stool.

‖Stool: watery, soft; brown, sour, fermented; contains glistening bodies; undigested; offensive; < in evening from suppressed eruption.

‖Small, white, shining grains in brown feces.

‖Stools dark brown, hard balls, much but painless straining.

‖Before stool: colic; creeping chills, languor and great sensibility to cold air; copious discharge of fetid flatus.

‖During stool: prolapsus recti; painless straining; anus becomes painful and constricted about fallen rectum; difficult evacuations, of consistency of thick broth, with pressing desire.

‖After stool: chill; constriction with tenesmus; weakness; sensitiveness to cold, open air; painful tenesmus, extending to perineum and urethra (male); chill over whole body; pain in fissure of anus.

‖Summer diarrhœa of children (complementary *Bellad.*).

‖Chronic diarrhœa, with psoric anamnesis.

‖Two days after labor, when defecating, painful burning in rectum, passing over into a kind of sore; tenesmus after discharge of a small quantity of pultaceous feces; gradually these stools increased and weakened her greatly; four weeks after labor, paleness, general malaise and chilliness; abdomen tympanitic, sensitive to touch; over whole abdomen sensation of heat, with burning, cutting, gurgling and borborygmus, as when fluids pass from one part of intestines to another; constant severe tenesmus, and still she passes, notwithstanding the severity of the pains, only small quantities of fluid or pultaceous masses; after stool prolapsus recti, which is sore and burning until constriction has passed away; general chilliness before and after stool, with desire for acid drinks; no appetite; regurgitation of food; sleep only late at night; restless, throws herself about; morose and irritable.

Google

‖‖Constipation.

‖Stools hard as a stone and large; feel as if they would split anus; they come in sections; becomes very much exhausted and trembles with weakness; stool preceded by chills and followed by long stitches up rectum. θConstipation.

‖Biting sore pain in anus on walking, and a burning in rectum.

‖Much itching about anus, several times during day and also in evening before going to sleep.

[21] **Urinary Organs.** ‖Sticking in kidney and pain as if torn.

‖Frequent and copious discharge of pale urine in morning and forenoon.

‖Itching and sensation of soreness in urethra when urinating, aroused or < by pressure; intense painful tenesmus; tearing and drawing in anus and perineum, from which it extends through whole urethra.

‖Urine: diminished; becomes flaky and has red sediment; burning; hot, with reddish sediment.

‖After urinating a few drops of blood are passed.

‖Hæmaturia preceded by crampy pain in bladder.

[22] **Male Sexual Organs.** ‖Violent erections and increased sexual desire.

‖Swollen testicles after maltreated gonorrhœa.

‖‖Painless swelling of scrotum.

‖Heat and swelling of penis.

‖‖Fine prickling stitches in penis and at summit of glans.

‖Itching in glans penis.

‖Discharge of watery mucus; stinging and titillating through whole urethra and perineum; urethra sore to touch. θGonorrhœa. θGleet.

‖Gonorrhœa with hæmaturia.

‖Gleet; whitish, painless discharge, more towards morning; gouty pains through body.

[23] **Female Sexual Organs.** ‖Menses: too frequent; too soon, profuse and long lasting; scanty, with leucorrhœa and prosopalgia; suppressed.

‖Uterine ulcer, with smarting, burning or prickling sensation; discharge albuminous, sometimes tinged with blood.

‖Leucorrhœa: like white of egg; corroding; chronic malignant.

‖Mucous discharge from vagina and urethra. θGonorrhœa.

[24] **Pregnancy. Parturition. Lactation.** ‖During pregnancy, diarrhœa with prolapsus recti; anus after stool contracts around prolapsed rectum, which becomes constricted and sensitive to touch, painful like a sore.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness, with cough and rawness in chest.

Google

‖Voice failing or interrupted.
‖Burning and dryness in trachea, with hoarseness.

[26] **Respiration.** Dyspnœa as if from adhesions or contraction of lungs.
On stooping, chest feels too tight.
Desire to take a long breath; afraid of suffocating.
‖Snoring, in children.

[27] **Cough.** ‖Whooping cough; paroxysms < in evening and particularly severe at night.
Cough: spasmodic, caused by irritation from larynx to chest; sputa in morning of yellow, viscid mucus, tasting saltish or like an old catarrh. θWhooping cough.
‖Cough worse: evening until 12 P.M., or day and night, with tension over thorax; when eating or drinking anything hot must cough till food is vomited; from beer.
‖Violent inclination to cough, in evening in bed, and in morning lower in trachea than can be reached by cough.
‖Severe dry cough, < at night; burning in throat; oppression; stitching pains in chest and great anguish; paleness of face; constant chilliness even in bed; sometimes cold sweat, not followed by heat; thirst without drinking much at once; white coated tongue; loss of appetite; pale urine; frequent small pulse.
‖Yellow, salty expectoration during day; twitching of muscles of face.

[28] **Inner Chest and Lungs.** ‖Stitches in r. chest, < drawing a long breath.
Stitches in l. chest, beneath clavicle, going and coming with regularity of musical beats, extending deep into chest, shortly after only a simple aching, < by inspiration, and returning some days in succession.
Sticking pain from l. side to back through chest, during an inspiration.
Sudden sharp stitches in evening near spinal marrow, through chest, extending into cartilages of l. ribs.
‖Sore, bruised sensation in chest; traces of blood in loosening expectoration; oppression and anguish.
‖Cramplike contraction over both chest and back.
‖Constricting and contracting pains transversely across forepart of chest.

[29] **Heart, Pulse and Circulation.** ‖Pulse: full, hard, accelerated evenings; at times intermittent; frequent mornings, slow evenings.

[30] **Outer Chest.** ‖Sore burning on bone of sternum.
‖Severe, constant shaking chill, with anxiety and stitches in r. side, neuralgic in character; painful parts sensitive to pressure. θNeuralgia.
‖Intercostal neuralgia, following herpes zoster.

Digitized by Google

Red spots like fleabites on chest.

[31] **Neck and Back.** ‖Pain and stiffness of nape and external cervical muscles.

‖Stiff pain in r. side of nape of neck and throat, mostly on motion.

‖Violent itching rash on nape of neck.

‖Rheumatic pain in scapular muscles; they feel tense and swollen, motion difficult.

‖Rheumatic pain in r. scapula, in morning after rising.

Mercurial cases, limbs feel as if shortened; pains darting like shocks of electricity. θDisease of spine.

[32] **Upper Limbs.** ‖Pain in r. shoulder joint.

‖Pain in shoulder joint as if it would be torn asunder.

‖Sore feeling in r. axilla.

‖Dry tetter, scabby, scabs small, occurring especially in bend of elbows, with red spots size of a dollar.

‖Eruptions on back of hands and wrists half way up to elbow; itching < by scratching; small burning vesicles, drying down into crusts, itching and burning after scratching, and becoming moist; < from application of water. θEczema.

‖Right hand cold, l. warm; or both cold.

‖Trembling of r. hand.

‖Burning vesicles, surrounded by a red areola, on sides of fingers.

‖Paralysis of flexors of fingers; finger ends powerless, cannot hold anything.

‖Hands "go to sleep."

[33] **Lower Limbs.** ‖Twitching pain from hip joint to knee.

‖Right hip joint feels sprained on walking.

‖Pain in hip, leg is shortened.

‖Pain in bones of thigh and leg.

‖Drawing pains, sensation of internal heat of limb, surface being cool; > in open air.

‖Since confinement, fifteen years ago, ulcer on r. thigh, which only closed lately, leaving a small opening oozing a clear fluid; excruciating pains in tibia, < at night; skin at ulcerated part brown, dry, with bluish red spots around opening; slightest pressure of finger causes burning pain, and still she tried to alleviate the deep seated pains by constricting limb with a handkerchief; periosteum swollen; stepping on foot prevented by severity of pains; sleepless at night on account of pains and cramps in calves of legs. θPeriostitis.

‖Right femur from knee to middle greatly swollen; soft parts not affected; periphery of affected leg 2½″ larger, five inches above knee, than sound one; about middle of femur swelling ceased and formed a marked eleva-

Google

tion, where it met the unaffected part of bone; tendons in popliteal space shortened, so that leg was flexed and it became impossible to extend it; internal and external condyles swollen, patella not affected; extreme pain at night and on slightest touch; severe stitching pains in leg; loss of appetite; coated tongue; thirst; constipation; turbid urine; small, quick pulse; night sweats; sleeplessness; great emaciation; despondency.

After healing of axillary abscess, large, irregular, sometimes confluent, distinctly defined, copper colored spots on inner side of thighs extending to groin; not elevated, not disposed to suppurate, but seat of distressing burning itching, < at menstrual epoch, at which time the spots assume a darker color, especially at edges; occasional hemicrania, stitches in spleen, frequent chills, trembling of limbs and morbidly fretful. θPityriasis versicolor.

Cracking in r. knee when rising in morning.

Acute jerking in l. knee.

Pressive pain in r. tibia.

Violent pain in tibia, as if beaten, or as if periosteum was torn off, after midnight, disturbing sleep.

Pain in periosteum of long bones, especially tibia, < at night in bed, least touch is intolerable; < in damp weather. θSyphilis. θRheumatism.

Large syphilitic ulcer on l. leg; tibia thickened throughout whole length, and periosteum swollen around ulcer; in evening, when much fatigued, slight oozing of serum at edges of ulcer; when thick crust was removed from ulcer, latter appeared shallow and secreted a sanguinous discharge; burning pain, < from heat of bed.

Ulcer on r. tibia, three inches long, two wide, above internal malleolus; surrounding skin coppery red, covered with pustules.

Leg, from knee to instep, covered with thick, yellow scab from cracks of which thick, yellow matter oozes on pressure; scab falls off in pieces, leaving skin deep red, sore, itching violently and exuding a thin, clear fluid, forming a thin scab under which pus again collects; skin around scabs dark red, tense, hot, itching; foot swollen, with painful stitches on beginning to walk; at night intolerable itching and burning in eruption; foul odor. θHerpes crustaceus.

Legs and feet "go to sleep."

Violent nightly pains in bones of feet; rheumatism.

Stitches in toes of r. foot.

Violent tearing in ball of l. little toe.

[34] **Limbs in General.** Trembling of extremities.

‖Pains in periosteum of long bones, especially tibiæ, < at night in bed; least touch intolerable.

[35] **Rest. Position. Motion.** Lying down: itching of scalp <.
Cannot extend limb: swelling of femur and shortening of tendons.
Stooping: headache >; chest feels too tight.
Motion: cranial bones pain <; toothache <; pain in nape <; difficult, rheumatic pain in scapular muscles; paralyzed feeling in limbs <.
Stepping: prevented by severe pain in limb.
Walking: biting, sore pain in arms; r. hip joint feels sprained; stitches in foot.

[36] **Nerves.** ‖Feeling of great lightness of body.
‖General sick feeling.
‖Subsultus tendinum.

[37] **Sleep.** ‖Yawning, stretching; sleepiness during day.
‖Great inclination to sleep, from debility.
‖Inability to sleep.
‖Sleep disturbed by violent pain in face.
‖Awakens after midnight from vivid dreams and with nightmare; < on awaking.

[38] **Time.** Morning: chilliness and coldness in body; pain in vertex >; eyes inflamed; tearing in face; after walk, tearing in teeth; nausea and faintness; discharge of pale urine; gleet <; sputa <; inclination to cough; frequent pulse; after rising, pain in scapula; cracking in r. knee.
From morning until night: anguish and nausea.
Forenoon: discharge of pale urine.
Noon: canine hunger.
Afternoon: burning in mouth.
After meals: dulness of head.
During day: expectoration salty; yawning, stretching.
Evening: pain in cranial bones <; itching in eye <; prosopalgia < till midnight; lips painful; chilliness; canine hunger; diarrhœa <; itching about anus; whooping cough <; cough < till 12 P.M.; in bed inclination to cough; stitches near spinal marrow; accelerated or slow pulse; oozing from ulcer on leg.
Night: pain in vertex <; itching of scalp <; toothache <; sleep only late; whooping cough <; severe cough <; pain in tibia <; sleepless from pain in limb; pain in periosteum of long bones <; after midnight awakens from vivid dreams; rheumatism <; cystic osteoma <; exanthema burning; itching of eruption on finger joints <.

[39] **Temperature and Weather.** Appears to be frequently indicated in January and February.

Google

Heat of bed: burning pain in ulcer on leg; itching <.
Warmth: itching of scalp and feet <; neuralgia <; chills >.
Drinking anything hot: cough <.
Warm food: cramping pressure in head <.
Warm room: chilliness.
Entering room: pains in head <.
Wrapping up: head, pains >.
When covered: to perspire, pains in head <.
Open air: headache <; teeth painful; drawing pain of limbs >; chilliness <.
Sudden changes of weather: pains in head <.
Application of water: eruption on hands and wrists.
Cold: cranial bones sensitive; drawing pain in scalp <; causes pain in gums; great sensibility after stool.
Cold, damp air: headache <.
Damp weather: rheumatism <.
Cold winds: pains in head <.
While in wind: drawing in limbs.
Drawing in air: toothache >.

[40] **Fever.** ||Sensitiveness to cold air.
||Chill: from upper arms to back and legs; as if drenched with cold water; on single parts as if dashed with cold water.
||External coldness, great thirst, no desire for warmth, no dread of open air; no subsequent heat.
|Chill even in warm room, drowsy; lessened out doors; thirst; back of mouth dry, much saliva in forepart; cramp in chest, asthmatic constriction and oppression.
||Chill lessened by heat.
|Burning of internal parts, with external chilliness.
||Hands and feet cold, nails blue; hot sensation on small spot on top of head.
|Heat: in bed, mostly in head; one sided (l.); intense after chill, with sleep.
|Skin dripping with cold sweat.
|Apyrexia: headache; pale face; hardness and swelling of spleen, with pressive pain in l. hypochondrium; loss of appetite; sensitiveness to cold air.
|General weakness; great tendency to run into remittent or typhoid. θAgue.

[41] **Attacks, Periodicity.** Alternately: chilliness and flushes of heat.
From one to two hours: pinching pain and much belching.
Several times during day: much itching about anus.
Daily: vomiting of chocolate colored masses.
Nightly: bone pains; rheumatism.
Every third day: stool.

Google

Every eight or ten days: stool.
Menstrual epoch: burning itching inner side of thigh <.
Every Winter: dark redness of fauces, with burning dryness.

42 **Locality and Direction.** Right: megrim; as if air distended external meatus; nostril inflamed; twitching of muscles of cheek; neuralgia of supraorbital; prosopalgia; pains from infraorbital foramen; pain in eyetooth; swelling under side of tongue; tumor in hypochondrium; stitches in side of chest; stitches in side; stiff pain in side of nape of neck; rheumatic pains in scapula; pain in shoulder joint; sore feeling in axilla; hand cold; trembling of hand; hip joint feels sprained; ulcer on thigh; femur greatly swollen; cracking in knees; pressive pain in tibia; ulcer on tibia; stitches in toes.

Left: inclined to fall to side; pain in temple; aching pain about eye; conjunctiva injected; twitching of muscles of upper lid; itching in upper eyelid; pressure in outer angle of eye; as if air was distending internal meatus; tearing in side of face; prosopalgia; pressure beginning in zygoma; small pustule on chin; drawing pain in upper and lower jaw; stitches in chest; sticking pain from side to back; stitches into cartilages of ribs; hand warm; acute jerking in knee; large syphilitic ulcer on leg; tearing in ball of little toe; one sided heat; pressive pain in hypochondrium; herpetic eruption on foot.

From above downward: nightly bone pains.
From within outward: pain in l. temple.
First r. then l.: prosopalgia; severe pains in lower jaw.

43 **Sensations.** Head feels as if drunk; as if everything in head would press asunder; as if upper part of head was pithy; as if skull would split; as if top of head was gone; as if bruised; as if head was in an ant's nest; eyes as if too large; as if eyes were drawn backward into head; ears as if too open; as if air was pouring into ears; as if tympanum was exposed to cold air; as if air was distending r. external meatus; as though roaring in ears would occur; teeth as if too long; as if ants were running over chest; as if hole was being bored in mental foramen; hard palate as if made of wood; whole side of head as if cold; tongue and lips as if quite sore; throat as if narrowing; as if posterior part of throat was full of mucus; burning as from pepper in mouth; as if internal surface of gastric mucous membrane was raw; as if food remained a long time undigested in stomach; stools as if they would split anus; pain in kidney as if torn; dyspnœa, as if from

Google

adhesions; chest as if too tight; limbs as if shortened; as if shoulder joint would be torn to pieces; tibia as if beaten; as if periosteum was torn; chill, as if drenched with water; as if fire was darting through muscles; as if joints would give way; elevations like nettlerash burn as if bright coal lay upon them; sticking of rash as from needles; as if millions of insects were creeping on him.

Pain: extending from root of nose into forehead; in bones of skull; in gums; in anus; in fissure of anus; of nape; in r. shoulder joint; in hip; in bones of thigh and leg; in calves of legs; in periosteum of long bones.

Excruciating pain: in tibiæ.

Intolerable nightly burning pains: in abscess of antrum of Highmore.

Very violent pain: in head; in face; in tibiæ; in bones of feet.

Extreme pain: in r. femur.

Severe pains: in upper arm and shin bone; in bones of head; in lower jaw; in stomach; in face; in ball of l. little toe; in and around eye; in anus and perineum.

Tearing, pressing pain: in humeri and tibiæ.

Fine tearing: in l. side of face and in teeth.

Lightninglike pains: coming from r. arm to temples and corner of mouth.

Darting pains: like shocks of electricity through limbs.

Boring: in bones of occiput; in bones of upper jaw; extending to malar bones and temples; in several teeth.

Sharp stitches: near spinal marrow.

Stitches: in side; from teeth to zygoma; up rectum; in r. side of chest; in l. chest; in spleen; in toes of r. foot; in hemorrhoids; in chest; in bony tumors of frontal and malar bones; in skin of vertex and temples; in face; in ulcer on r. thigh; in seat of zona.

Severe stitching pain: in leg.

Flying stitching pains: along long bones.

Twitching, grasping, stitching pains: in hollow teeth.

Prickling stitches: in penis and summit of glans.

Drawing pain: in scalp; in upper and lower jaw; in side of head; in lower limbs.

Sticking: in kidney; from l. side to back through chest.

Constricting, pinching pain: in stomach.

Painful constriction, tearing and drawing: at anus; perineum and through urethra.

Crampy pain: in bladder.

Biting: on scalp.

Neuralgic pains: in face.

Acute jerking: in l. knee.

Digitized by Google

Twitching pain: from hip joint to knee.
Cramps: in calves of legs; in chest.
Constricting and contracting pains: across forepart of chest.
Rheumatic pains: in scapular muscles; in r. scapula.
Gouty pains: through body.
Aching pain: in vertex and occiput; in and around eye.
Aching, pressive pain: about l. eye.
Pressive pain: in l. temple; in occiput; in r. tibia; in l. hypochondrium.
Cramplike contraction: over both chest and back.
Biting sore pain: in anus.
Raw pain: from pharynx half way down œsophagus.
Sore pain: in chest.
Numb pain: in face.
Stiff pain: in r. side of nape of neck and throat.
Heat, scraping, burning, peppery sensation: on palate and fauces.
Painful burning: in rectum.
Sore burning: on sternum.
Hot burning: in throat.
Burning: in skin of vertex and temples; in face; in ulcer on r. thigh; in seat of zona; back of hands; of internal parts; in bones of thorax; of scalp; of skin of head; of throat; of lips; on tongue, extending to stomach; in mouth and throat; in pharynx; in fauces; in œsophagus; in stomach; in rectum; in trachea; in vesicles.
Burning darting sensation: in muscles, like fire darting through them.
Burning dryness: mouth and larynx.
Hot sensation: on small spot on top of head.
Soreness: of nose; of upper lip; of lips; in bones of thorax.
Sore feeling: in r. axilla.
Smarting, burning, prickling: in uterine ulcer.
Irritation: in vagina.
Smarting: in eyes.
Burning itching: in nostrils and inside ears.
Sore, bruised sensation: in chest.
Sprained feeling: in r. hip joint.
Rawness: of fauces; in chest.
Dryness: in eyes; of nose; in throat; in fauces; in trachea.
Constriction: in throat and stomach; of pharynx; about fallen rectum.
Strained feeling: in eyes.
Drawing: in limbs; in anus and perineum.
Cramping, numbing pressure: l. zygoma, towards eye, temple, ear and down neck to shoulder.
Pressure: in eyes; in stomach and intestines.
Tension: over thorax.

Google

Stiffness: of nape and external cervical muscles.
Numb feeling: in top of head.
Feeling of great lightness: of body.
Paralyzed feeling: in limbs.
Uneasiness: in stomach.
Apprehensiveness: at pit of stomach.
Violent itching: rash on nape; eruption on leg; pruritus senilis; eczema; pimples; vesicles around ulcers.
Distressing burning, itching: in spots on inner side of thighs.
Itching, biting: on margin of lids and skin near nose.
Itching: of whole body; of scalp; of face; of skin of head; of eyebrows; eyes; in l. upper eyelid; tinea capitis; eruption of head; behind ears; vesicles on dorsum of nose; about anus; in urethra; in glans penis; vesicles on back of hands, arms, legs, back; rash on arms, head and over whole body; ulcerative eruption on finger joints.

" **Tissues.** Emaciation of face; withering of diseased parts.
Scrofulosis, with excoriation in throat and at nose.
Soreness and burning in bones of thorax.
Bones feel distended.
Periosteal rheumatism; boring, pressing pains, coming like lightning, leaving parts numb.
Nervous rheumatism or rheumatic neuralgia, < at night, with flying, stitching pains along long bones.
Periostitis and swelling of bones, especially on tibia, with most violent nightly pains.
Swelling of bones; caries; nightly bone pains, going from above downwards; stitching pains in bony tumors of frontal and malar bones; bony tumors become cartilaginous and soften from inside out.
Exostoses; tophi.
Bones inflamed, swollen, especially shafts of cylindrical bones; after abuse of mercury and venereal disease.
Cystic osteoma, burning pains, swelling; < at night.
Joints feel bruised, weary, as if they would give way.
Engorged glands.
Abscesses of fibrous parts or of tendons.

45 **Touch. Passive Motion. Injuries.** Touch: on temples causes headache; slightest, causes pain in head; pain in bones of skull; scalp very sensitive; cranial bones sensitive; sensitiveness of eye, cheek, teeth; with tongue, toothache <; abdomen sensitive; urethra sore; anus sensitive; pain in limbs <; intolerable in rheumatic limb; itching <; crusty eruptions bleed.
Pressure: limbs sensitive; pus exudes from scabs on eye; pain in toothache; tumor sensitive; painful parts of

Google

chest sensitive; causes burning pain around ulcer; on scab on leg, matter oozes.

Rubbing: itching of scalp <.

Scratching: itching of eruption on hands and wrists <; burning and change of place of itching; nocturnal itching on arms, legs, back >; pruritus <.

46 **Skin.** Roughness and scaling here and there; skin of hands rough and dead.

Violent itching, < in bed, from touch; burning and change of place after scratching.

Dry, burning, itching herpetic eruption on both hands and l. foot; skin peeled off.

Scrofulous ulcer of leg, with thickening of periosteum and a similar swelling on bone of forearm.

Skin wrinkled and in folds; sleepless on account of itching; cannot refrain from scratching; feeling as though millions of insects were creeping on him, compelling him to rub successively his arms, legs, abdomen and throat; on parts scratched are innumerable, insular, white elevations on a red or reddish base, as in nettle-rash, which, when deeply scratched, display in centre a drop of blood, size of pin head, and burn as if a bright coal lay upon them; by day itching is intolerable and there is no visible trace of morbid alteration in skin; blood spots appear as small, brown points on surface of skin; during violent itching and burning complains of chilliness, feeling cold along spinal column and in extremities; where itching is most intense there is a sensible diminution of temperature. θPruritus senilis.

Nocturnal itching on arms, legs, back, > by scratching, but immediately returning on some other place.

The usual liver spots on chest and arms become very dark, with much desquamation.

Brownish miliary rash on chest, arms and thighs.

Red itching rash on arms, head and over whole body.

Violent itching rash on nape of neck, back and thighs, always < and gnawing after scratching and sticking as from needles.

Itchlike eruption, after vaccination, depriving child of sleep.

Scurf like fish scales on back, chest, thighs and scalp.

Scabs thick, lamellated, like rupia, bloody secretion beneath; < on parts devoid of fat.

Distressing exanthema, burning at night, compelling to scratch until epidermis is removed and denuded part is covered with a scab or there is repeated exfoliation.

Eczema itching intolerably, copious serous exudation.

Herpes zoster, with severe neuralgic pains, itching after

Google

scratching turns into burning, < in bed, from touch; vesicles form brownish scab.

‖After zona (cured by *Rhus*) there remained great coldness of body, with burning pain in seat of zona.

‖‖Neuralgia and burning after zona.

‖‖Vesicles appear around ulcers, itching violently and burning like fire; after eight days these vesicles dry up, leaving scabs, the tearing off of which causes great pain and retards healing.

‖Large, irregular, sometimes confluent, distinctly defined copper colored spots on inner side of thighs, extending to groin; distressing burning, itching, < at menstrual period, at which time spots assume a darker color, especially at edges; occasional hemicrania, stitches in spleen, frequent chills, trembling of limbs; morbidly fretful. θPityriasis versicolor.

‖Whole skin covered with elevated white scabs.

‖Ulcerative eruption on finger joints, itching most at night.

‖Moist, scabby eruption.

‖Crusty eruptions, white scabs, bleeding when touched.

‖‖Vesicular erysipelas.

‖Ulcers with areolæ, sensitive, easily bleeding, painful at night; pus under scabs; burning vesicles around ulcers.

‖‖Ulcers covered with thick, whitish yellow scabs, under which thick, yellow pus collects.

‖Cutaneous ulcers form over bony protuberances.

‖Linen or charpie sticks to ulcers, when it is torn away they bleed.

‖‖Vesicles appear around ulcers, itch violently, burn like fire; fiery red areola, shining like fire.

Stages of Life, Constitution. Phlegmatic temperament; light hair; irresolute.

Child, æt. 3, after vaccination; itchlike eruption.

Girl, æt 12; neuralgia in side.

Boy, æt. 15; scrofulous ulcer.

Boy, æt. 17, healthy, when three years old had an eruption which was suppressed; deafness.

Girl, æt. 18, blonde, of sanguine temperament, with scanty, intermitting menses, suffering two years; pityriasis versicolor.

Girl, æt. 20, previously in good health, after catching cold; swelling of femur.

Man, æt. 22, sanguine temperament, weak after catching cold; toothache.

Man, æt. 23, suffering for a whole year from maltreated gonorrhœa; swollen testicles.

Officer, æt. 25, robust, healthy; prosopalgia.

Man, æt. 30, strong, had chancre on penis three months ago; sore throat.

Google

Woman, æt. 32, after instrumental delivery four weeks ago; tenesmus and prolapsus recti.
Vigorous countryman, æt. 32; mentagra.
Man, æt. 34, sanguine choleric temperament, delicate, weak build; toothache.
Woman, æt. 35; supraorbital neuralgia.
Woman, æt. 36, suffering many years; herpes crustaceus.
Nursing woman; constipation.
Laboring man, æt. 40; herpetic eruption.
Man, æt. 40; gastric catarrh.
Woman, æt. 42, suffering twenty years; eczema.
Man, æt. 43, nervo-bilious constitution, cachectic habit, leaden colored face, had lived the life of a tramp and had been several times syphilitic; pain and swelling in tibiæ.
Woman, æt. 45, married, florid, has suffered with headache for three months; incipient pityriasis capitis.
Woman; prosopalgia.
Man, abdominal plethoric constitution, dark skin, had had several tumors on head removed several years ago, suffering one year; prosopalgia.
Woman, after a drive in an open carriage in which she had been exposed to a bitter cold wind; cephalalgia periostitica.
Woman, æt. 48, eruption preceded by violent headache for six months, suffering two years; pityriasis capitis.
Woman, æt. 50, delicate constitution, generous, good natured, subject to rapid changes of temperature, suffering two years; prosopalgia.
Widow, æt. 50, large, well developed, sanguine temperament, since her confinement fifteen years ago suffered from an ulcer; periostitis.
Woman, æt. 55; tinea capitis.
Woman, æt. 60; ulcer on tibia.
Woman, æt. 63, unmarried, delicate, with weak digestion, addicted to use of coarse snuff, after great fatigue; rupia prominens.
Old man; shingles.
Man, æt. 74, weak and dyspeptic, a subject of marasmus senilis; pruritus senilis.
Man, æt. 74, hale and hearty for his age; pruritus.

MILLEFOLIUM.

Yarrow. *Compositæ.*

A plant known to the ancients, mentioned by Homer in the Iliad, where Chiron instructs Achilles in the art of surgery; it was named by Linneus, Achillea Millefolium. The plant is common in old fields, along fences, on borders of woods and cultivated grounds, produces a dense corymb of whitish flowers of feeble aromatic odor, and the leaves have a bitterish, astringent taste. The tincture is prepared from the fresh plant.

Introduced by Hartlaub; provings by Nenning and Schreter (Hartlaub and Trinks' Annalen, vol. 4, p. 344); later provings by Hering and Raue (Amerikanische Arzneiprüfungen, Translation with additions, N. E. M. G., vol. 9, 1874).

[1] **Mind.** Anxious, with pain in heart.
Melancholy, sadness; weak memory.
Much excited, with pains in pit of stomach.
Irritable; violent; aversion to work.

[2] **Sensorium.** Stupefied, intoxicated.
Confused, dull, especially evenings, knows not what he is about, nor what he ought to do; seems constantly as if he had forgotten something.
Vertigo when moving slowly, walking, but not when taking violent exercise, with nausea when stooping.
Apoplexy; paralysis.

[3] **Inner Head.** Sensation as if all blood ascended to head.
Congestion to head: when stooping in evening; at night a stream from chest to head, like a gust of wind, with nosebleed; from coffee; from portal system.
Slight throbbing in arteries of head and face.
Fulness in head after siesta.
Dull pain in vertex.
Sensation in r. side of head as if screwed together.
Hemicrania.

Digitized by Google

‖Violent headache, he strikes head against bedpost or wall; twitching of eyelids and frontal muscles.
Occipital headache, dull towards evening.
Piercing or thrusts in head, vertex, over eye, occiput, side of head.
Headache <: stooping; on awaking.

[5] **Sight and Eyes.** Like a mist before eyes, not near, but at a distance.
‖Nebulous vision, weak sighted, with contortion of facial muscles.
Eyes brilliant.
Inward piercing, pressing in eyes to root of nose and sides of forehead.
Sensation of too much blood in eyes.
‖Fistula lachrymalis; lachrymation and discharge.
Agglutination of eyes in morning.

[6] **Hearing and Ears.** Noise in l. ear causes her to start with fright; later, when laughing, sensation as of cold air passing out.
Sensation as if ears were stopped up, after dinner.
Darting in l. ear.
‖Earache.

[7] **Smell and Nose.** ‖Nosebleed: congestion to chest and head; excessive.
‖Stuffed nose.
Piercing pain from eyes to root of nose.

[8] **Upper Face.** Redness of face without internal heat.
Sensation of heat as if blood was rising to head.
Tearing: in face to temples; from r. lower jaw to ear, then teeth.
‖Contortion of face.

[10] **Teeth and Gums.** ‖Toothache: from heating things; with pain in jaw; rheumatic, with diseased gums.
‖Gumboil.

[11] **Taste and Tongue.** Tongue swollen and coated.

[12] **Inner Mouth.** Thirst, mouth dry.
‖Stomacace, ulcerated gums; putrid, sore mouth.

[13] **Throat.** ‖Uvula relaxed, also tonsils; asthenic catarrh.
Rough feeling in throat.
Dull, piercing pains, r., then l. side.
‖Ulceration of throat; pain in l. side of throat when swallowing.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough; empty eructations.
Nausea, with vertigo.
‖Retching and vomiting.
Vomiting when coughing.

Google

[17] **Scrobiculum and Stomach.** Painful gnawing and digging in stomach as from hunger.
Pain in stomach as if empty, mornings after waking.
Burning in stomach; < when doubling body, in region of r. hypochondrium, where it became a drawing, burning pain.
Burning in stomach and abdomen; extending to chest.
‖Pains in stomach, in young, hysterical, irregularly menstruating girls.
‖Great pain in pit of stomach; excited, pulse accelerated and constricted, pustules collapsing. θSmallpox.
‖Pain in stomach after confluent smallpox.
‖Cardialgia.
Sensation of fulness in stomach; pressure, like a plug.
Cramp in stomach, with sensation as of a liquid moving from stomach to intestines, towards anus.

[18] **Hypochondria.** Pain in region of liver; piercing in r. lower ribs.
‖Congestion to portal system.
‖Stagnation in liver and system of vena portæ; sluggish digestion; want of appetite; flatus; distension of abdomen.

[19] **Abdomen.** ‖Bloatedness.
‖Pain in abdomen from flatus.
‖Griping and tearing in abdomen, caused by dysentery and lientery.
‖Wind colic in hysterical or hypochondriacal patients; colic during menstruation.
‖Hemorrhages from bowels in typhoid fever, with tympanitis.
‖Incarcerated hernia.
‖Ascites.

[20] **Stool and Rectum.** Frequent emission of fetid flatus.
‖Violent colic with bloody diarrhœa. θDuring sixth month of pregnancy, prevailing dysentery.
‖Mucous diarrhœa.
‖Chronic blenorrhœa from atony of mucous membranes; great pain.
‖Dysentery.
‖Bloody dysentery, tenesmus; during epidemics of dysentery.
‖Bloody flux after much exertion, lifting, or internal injuries.
‖Pains from blind hemorrhoids.
‖Hemorrhoidal hemorrhages.
‖Profuse flux from condylomata.
‖Ascarides.

[21] **Urinary Organs.** ‖Pain in region of l. kidney, followed

by profuse hæmaturia, lasting from five to eight days; chilliness, which obliges him to keep his bed.
|| Catarrh of bladder from atony.
|| Stone in bladder, with retention of urine; bloody urine.
|| Puslike discharge after lithotomy.
|| Urine bloody; blood forms a cake in vessel.
|| Incontinence of urine.
Constant desire to urinate.
|| Incontinentia urinæ.

[22] **Male Sexual Organs.** || Want of ejaculation when cohabiting.
|| Spermatorrhœa.
| Swollen penis; discharge of blood and watery slime.
θ Gonorrhœa.
|| Condylomata; gleet.
|| Swelling of penis and testicles.
| Wounds and injuries of penis.

[23] **Female Sexual Organs.** || Sterility, with too profuse menstruation.
|| Dysmenorrhœa in irregularly menstruating young girls, pain in stomach.
| Menses suppressed with pain in stomach, or epileptic attacks, or cough with bloody sputum.
|| Menses excessive, last too long, with colic.
|| Leucorrhœa of children from atony.
|| Uterine hemorrhages: after great exertion; miscarriage.
| Hemorrhage of bright red and fluid blood.
| Menorrhagia and metrorrhagia, with congestive headache.

[24] **Pregnancy. Parturition. Lactation.** || Sterility with too profuse menses or tendency to miscarry.
|| During pregnancy, cramplike affections.
| Painless or bleeding varices in pregnant women.
|| Colic or cramplike affections in confinement; severe after pains.
| Attacks following a hard delivery.
| Convulsive motions of all limbs, terrible pains and total suppression of lochia; third day after confinement.
| Lochia: too copious; suppressed; violent fever, no milk, convulsive twitchings; great pain.
| Painless drainings from uterus, nose or lungs, after labor, after abortion, or when an abortion threatens, if the blood be bright red and there are no pains in joints.
| Preventive in post-partum hemorrhage.
| Sore (cracked) nipples of nursing mothers.
| No milk with suppressed lochia and fever.

[25] **Voice and Larynx. Trachea and Bronchia.** Secretion of mucus in larynx; roughness.

Google

[26] **Respiration.** ||Shortness of breath.
||Very difficult breathing, with tetanic spasms.
||Asthmatic affections.

[27] **Cough.** |Cough: with frequent spitting of bright blood; oppression of chest with palpitation; in phthisis; in suppressed hemorrhoids; suppressed menses.
|Has fallen from a height and spits blood in consequence.
|Hemorrhages from lungs from a weak condition of vessels.
|In phthisic conditions with coughing of blood, or after frequent attacks of hemorrhage of lungs.
||Hæmoptysis: in incipient phthisis (after *Acon.* and *Arn.*); in hemorrhoidal patients; from a rupture of blood-vessel; after injury.
|Oppression of chest; excessive palpitation.
|Coughing blood, vigorous woman of 48; no menstruation for two years; ebullition in chest every evening, < when lying in bed, not at all during day; warm blood rises into her throat and flows out of her mouth; then cough with more light red, bloody expectoration, half a pound in all, accompanied by great prostration.
|Coughing blood every afternoon at 4 o'clock.
|Lung disease after coughing blood.
|Repeated bronchorrhagia, in phthisis, or after a fall.
||Blenorrhœa of lungs.
|Expectoration of florid blood, without much coughing, sometimes in consequence of violent exertions.

[28] **Inner Chest and Lungs.** Violent fine stitch in middle of l. scapula from without inward, during an inspiration.
|Violent congestion to chest; to head, with bleeding of nose and expectoration of bloody mucus.
|Inflammation of lungs.
|Oppression of chest, frequent blood spitting; piercing pains, stinging, bruised feeling; < under l. shoulder blade; bubbles up in chest as if warm blood was ascending, which is raised without cough. θPhthisis.
|Hæmoptysis, with profuse flow of bright red blood, without fever.
||Phthisis pituitosa.
||Ulcers in lungs; vomicæ.
|Injuries of lungs.

[29] **Heart, Pulse and Circulation.** |Violent palpitation and spitting of blood.
|Ebullitions with hæmoptysis.
Anxiousness with pain in heart.
||Inflammation with tearing and piercing.
||Pulse accelerated and contracted. θSmallpox.

[31] **Neck and Back.** ||Piercing, drawing pain close under l. shoulder blade, for a few moments while sitting.

Google

[32] **Upper Limbs.** Fine piercing pain in l. scapula, in breathing when standing.
Left arm feels as if going to sleep; pricking numbness.
Hot hands.

[33] **Lower Limbs.** ||Violent pains on a level with crest of l. ilium.
Right tendo-achillis pains as after a blow or sprain.
First l. then r. foot goes to sleep; disappearing on walking.
Hot feet.

[34] **Limbs in General.** Piercing, drawing, tearing pains in limbs.

[35] **Rest. Position. Motion.** Lying down: nausea >.
Lying in bed: coughing blood <.
Sitting: piercing pains under l. shoulder blade.
Stooping: nausea; congestion to head; headache <.
Doubling body: burning in stomach <.
Standing: fine piercing pain in l. scapula.
Moving slowly: vertigo.
Walking: vertigo; going to sleep of feet disappears.
After lifting: bloody flux.
Violent exercise: vertigo >.
After much exertion: bloody flux; uterine hemorrhages; expectoration of florid blood.

[36] **Nerves.** ‖Hysteria; hypochondriasis.
||Convulsions: during teething; after labor; hysterical.
‖Convulsion and swoon of newborn child; recovers after bath, but constantly wails and sighs.
||General convulsions, with tetanic rigidity of limbs and extremely difficult breathing, in a boy of 14, after a malignant fever; two hours after fourth dose countless vesicles of size of a pea, of a livid brown, rose all over his body; dark violet after seven hours, discharging an insupportably offensive syruplike secretion; dry after four days, leaving scar.
||Epileptic spasms after suppressed menstruation.
||Tetanus.
||Paralysis and contraction of limbs.

[37] **Sleep.** Yawning without weariness.
Congestion from chest to head, like a stream, while asleep.
Falls asleep late, unrefreshed in morning.

[40] **Fever.** ||Chilliness with pains in l. kidney.
||Intermittent fever: quartan; tertian; irregular.
||Fever from suppressed itch or suppressed lochia.
||Scarlet fever epidemic, with excessive angina and violent fever.
||Exanthema of difficult development and delirium.
Fever heat with thirst.
Heat in hands and feet.

Google

Hectic fever with hæmoptysis.
Malignant fever; with tetanus.
Colliquative sweats.

" **Attacks, Periodicity.** Two hours after fourth dose: countless vesicles appear over whole body, dark violet after seven hours; dry after four days.
Twenty-four hours after confinement: violent pain, fever, suppressed lochia, no milk.
Every afternoon at 4 o'clock: coughing blood.
Every evening: coughing blood.
Third day after confinement: terrible pains and total suppression of lochia.
During sixth month of pregnancy: violent colic, with bloody diarrhœa.
For a few years, every four or six weeks, lasting from five to eight days: chilliness, which obliges him to keep his bed.

" **Locality and Direction.** Right: sensation in side of head as if screwed together; tearing from lower jaw to ear; drawing, burning pain in hypochondrium.
Left: noise in ear; darting in ear; pain in side of throat when swallowing; pain in region of kidney; violent pains at top of os innominata; violent fine stitch in middle of scapula; pains under shoulder blade; piercing pain in scapula; arm as if going to sleep; pains on a level with crest of ilium.
First r., then l.: dull piercing pains in side of throat; foot goes to sleep.
From without inward: fine stitch in l. scapula.
