42 **Locality and Direction.** Right: cold sensation in temple; stitching behind ear; dark red, painful spot on cheek; pain at point between anterior superior spine of ileum and umbilicus to hypochondrium; pain and varicose veins in inguinal region; pain in kidney; pain from scapula to shoulder joint; paralytic pain in shoulder; gurgling feeling in muscles of upper arm.
Left: tearing in eye; red spot on eyelid; chronic catarrh

Google

of nostril; pains in Highmorian cavity of side; tearing in upper molar; pain in tonsil; pressure in hypochondrium; shooting in side of epigastrium; pain in perineum extends deep into side of pelvis; cutting pain in kidney; pain side of bladder; pressure behind nipple; stitch side of female urethra; swelling spermatic cord; rasping burning side of penis; soreness side of scrotum; tearing through whole side of body; violent sticking side of abdomen; pain in side of vagina; tearing in side of throat; pressure behind nipple; stitches in side of chest; paralytic pain in eye; stitches in upper arm; pain and spongy sensation as if feeling was lost in thigh; tearing in ankles; itching on dorsum of foot.

Above downward: pain in spermatic cord; pain in colon; pain in abdomen; pain in chest; pain in cardiac region; pain in shoulders; pain in elbows; stitches in hips.

Below upward: tearing in throat; tearing between shoulders; pain in sacrum; stitches in foot.

Behind forward: stitching between shoulders.

Within outward: pressure in forehead; stitch in l. side female urethra; stitches in vagina; pain in l. side near navel; pain in cardiac region.

Without inward: stitches in lumbar region; stitches in thighs; stitches in foot.

[43] **Sensations.** As if brain would fall forward; as if head was becoming larger; as if a cap covered head and face; as of sand in eyes; as of a foreign body in internal canthus; as if a nail was thrust through membrana tympani, or like sting of an insect; as if cold drops were spurted into face and on back of hand; as if teeth were too long or too large; as if gums were torn; as from an awn in throat (stitching); as of a plug inside of throat; as of sand in throat; as of a husk sticking in l. tonsil; as if something was torn loose in l. hypochondrium; as if one had just been to stool, in anus; as if a nail was sticking in lumbar region; as if lumbar region was asleep; as if bones of back would be pressed asunder; as of something alive in shoulder joint; in legs; as if thigh was too short; as if feeling was lost in thigh.

Lancinating: in region of kidneys; in vagina; from lower dorsal vertebra through chest.

Darting: in head.

Stabbing: in region of liver.

Stitches: above forehead and temples; in forehead; over l. eye; from eyes to forehead; in scalp and face; in cheek and jaw bones; in teeth; in region of liver;

Digitized by Google

in skin of abdomen; in rectum; in perineum; from kidneys to bladder and urethra; in urethra; in thighs; in spermatic cord; in female parts during coition; in vagina; between shoulders; through chest; in and around clavicle; about heart; in muscles of chest; from neck into arm; between shoulders; from back through breast; in spine; in sacrum; into bones of upper arm; in l. upper arm; along ulna; towards metacarpus; to points of fingers; in thighs; in tendo-achillis; in feet; between metatarsal bones; to big toe; in ball of big toe.

Burning stitches: in loins and kidneys; in foot; in fingers.

Piercing: in ear; in hollow tooth; in foot.

Sticking: in lumbar region; in female urethra; in l. side of abdomen; in chest; in back; in ilium.

Sticking-digging: in region of kidneys.

Sticking-pressing: in lumbar region.

Pricking: on edge of hair; in point of nose; on forepart of ankle joint; in toes; in foot.

Stinging: in facial bones; in stomach; in l. hypochondrium; in abdominal muscles; in inguinal region; in anus; in leg; in knee joint; in calf of leg; in shin and tendo-achillis; in testicles; in penis and glans; about heart; in shoulders; in upper arm; in elbow joint; in heels; in feet; in big toe.

Shooting: in head; in eyes; from knee to eye; through eyes into brain; from temples to eyes; behind r. ear; in region of gall-bladder; in epigastrium; in lumbar and renal region; in orifice of urethra; in thigh; in chest; in region of heart.

Shooting-stinging: from perineum into female parts.

Rending: on forepart of ankle joint; in tendo-achillis on dorsum of l. foot; in sole of foot; in temples and occiput; in orbits; in facial bones.

Cutting: in inguinal region; from l. kidney into bladder, urethra and penis; in bladder; in testicles; in female parts during coition; in chest.

Tearing: in forehead and orbits; in temples; in l. eye; in lids; in ears; in cheek and jaw bones; in l. upper molar; in l. hypochondrium; in abdominal muscles; in skin of abdomen; around anus; in region of kidneys; in r. kidney; in thigh; in leg; in calf of leg; in tibia; in tendo-achillis; in throat; in chest; in and between scapulæ; in spine; in back; in shoulders; in upper arm; in iliac crest; into bones of upper arm; in elbow joint; from elbow into ulna and hand; along radius; along metacarpal bones; on back of fingers; in

points of fingers; in ankle joint; in external ankles to little toe; in heels; in foot; in balls of feet.
Tearing-shooting: in thighs.
Tearing-pulsating: in region of kidneys.
Tearing-sticking: in loins and kidneys.
Pressure: in forehead; in temples; in sinciput; in eyes; in ears; in stomach; in region of liver; in region of gall-bladder; in l. hypochondrium; in groins; in perineum; in anus; in lumbar and renal region; in leg; in spermatic cord; in testicles; behind l. nipple; in muscles of chest; in back; in sacrum; in anus; in inner side of forearm; in wrist; in ankle.
Pressing-shooting: in back of hand.
Drawing: in ears; in l. hypochondrium; in spermatic cord; in shoulders; in upper arm; in elbow joint; in tendo-achillis.
Dragging-sticking: in cardiac region.
Drawing-sticking: in bladder.
Drawing-tearing: in l. hypochondrium.
Drawing-stretching: in thigh.
Jerking: in l. hypochondrium into bones of upper arm; in toes.
Gnawing: on scalp and face; in teeth.
Pinching: in liver.
Digging-tearing: in region of kidneys.
Biting: on scalp and face; in eyes.
Burning: on scalp and face; along edge of hair; in eyes; of conjunctiva; of lids; of face; on cheeks; in lips; in throat; in stomach; in l. hypochondrium; in skin of abdomen; in descending colon; in rectum; in anus; hemorrhoids; in region of kidneys; in urethra; in bladder; in orifice of urethra; in thigh; in leg; in spermatic cord; in testicles; of glans and prepuce; in female urethra; in vagina; in skin of chest; in back; in axilla; of skin about arms; in elbow joint; in hands; in foot; on dorsum of l. foot; in toes.
Smarting: on lids; in canthi; in nose; in anus; on chest; in axilla; in foot.
Corrosive feeling: in skin of chest.
Rawness: in chest.
Soreness: in anus; in region of kidneys; in l. side of scrotum; through entire back; about skin of arms; in toes; in foot.
Aching: in bladder.
Sharp pain: in r. kidney.
Gurgling: in shoulder; in muscles of r. upper arm.
Coliclike pains: about navel.
Bearing down: in anus and sacrum.

Google

Tensive pain: in temples and forehead; in region of loins and kidneys; in bladder; in muscles of chest.
Scraping: in teeth; in throat.
Scratching: in throat.
Rasping: in anus; in glans and prepuce; in vagina.
Contracted feeling: in sole of foot.
Contraction: in l. abdomen; in splenic region; in sides of abdomen; in region of bladder; of scrotum; in chest; in region of heart.
Constriction: in rectum; pain in bladder; in testicles.
Cramp: in calf of leg.
Crampy pain: in bladder.
Rheumatic pain: in r. shoulder.
Bursting: headache.
Stretching pain: in shoulders.
Straining: headache; in lumbar and renal region; in sexual organs during ejaculation; in spermatic cord; in testicles; shoulder joint pains as from straining.
Straining-pressure: in shin bone.
Sprained feeling: in wrist; in muscles and bones of lower limbs; in metatarsus.
Bruised feeling: in lumbar and renal region; in knee; from r. scapula to shoulder joint; in small of back; in arms.
Beaten feeling: in back; in shoulder blade, joint, and elbow; in lower limbs; in tip of big toe.
Crushed feeling: in region of loins and kidneys.
Squeezing: in facial bones; in inguinal region; about heart; in back.
Ulcerative pain: in heels; under skin of feet; in toes.
Heaviness: in head; in calf of leg; in back; in axilla; of arms; in back of hand; in lower limbs.
Fulness: in head; in anus.
Throbbing: in ears; in anus; in thigh; in muscles of chest; pains in shoulders; in arm.
Tension: in skin of head and face; in groins; in bend of knee; in calf of leg; in neck; in back; in elbow joint; in tendo-achillis.
Puffy sensation: in head.
Stiffness: in throat; in back; in calf of leg; in neck.
Tingling: in foot.
Whirling: in stomach and abdomen.
Crawling: in nose; in lips; in anus; in testicles; in sole of foot; in toes.
Formication: in upper lip; around mouth and chin.
Vibration: in calf of leg; in back; in back of hand; in fingers, painful; in toes.
Numbness: in lumbar region; in calf of leg; in prepuce

Google

and glans; in back; in sacrum, hips and thighs; on external side of arm; in feet.
Paralyzed feeling: in region of kidneys; in knees; painful in r. shoulder; in arms.
Heat: in head; of ears; in face; in back; in sole of foot; in toes.
Warmth: in back.
Lame feeling: all over.
Coldness: in r. temple; in eyes; of ears; in stomach; on small spots of thigh; in testicles; of prepuce and glans; of scrotum; on ankle joint; in feet.
Itching: on scalp and face; in eyes; of lids; in canthi; in eyebrows; in nose; on cheeks; in lips; in region of inguinal glands; in anus; hemorrhoids; on scrotum; in vagina; on chest; in axilla; of legs; in feet; on dorsum of l. foot; in toes; in fingers.
Dryness: of eyes; in internal canthus; of lips; in throat.

44 **Tissues.** In muscles: tension, shooting, tearing, pulsating, gurgling; sensation as of something alive.
Rheumatic and gouty complaints, with diseases of urinary organs.
Muscular rheumatism in chest, lumbar region, and upper and lower limbs.
Hepatic, arthritic, and rheumatic affections, particularly with urinary, hemorrhoidal or menstrual complaints.
Distension of joints.
Bone pains.
Scraping upon bones.
Cold feeling at bones.
Varicose veins on many places.
Swollen varices.
Lymphatic swellings.
Acts most on eyes, liver, anus, kidneys, uterus and skin.
Disorders of uropoetic viscera.

45 **Touch. Passive Motion. Injuries.** Touch: pimples painful; tongue smarts; teeth sensitive; pain in epigastrium <; pain in inguinal glands <; pain in anus; skin of arms painful; tearing in finger joints; nails sensitive; pains in thighs <; violent pain above external ankle.
Friction: burning pains in hands <; rasping and pricking in skin worse.
Pressure: pain in liver <; pain in renal region <; pain in vesical region; pain in shoulder joint.
Lifting: tearing between shoulders to occiput worse.
Jar of riding or jumping: pain in renal region worse.
Riding in carriage causes pain in foot.
After riding: faintness.

Google

Scratching: itching on dorsum of l. foot <; itching of scalp changes place.

Closing eyes: cold feeling as from cool wind, with lachrymation.

After riding much pain and great sense of weakness and trembling in region of kidneys, taking a long time to get over, sometimes days. θRheumatism of knees.

[46] **Skin.** Jaundice, with pale, tough feces; or with profuse, acrid, watery diarrhœa.

Old yellow spots around navel peeling off.

In skin much itching, biting, pricking and burning, with minute stitches, sometimes with increased sensation of warmth and with eruption.

Rasping and pricking in skin, increased by friction, and frequently succeeded by a red spot.

Burning, smarting, stitching or corrosive itching, which provokes scratching, though it soon returns at same or some other place.

Red spot on l. eyelid, feels like a mosquito-bite, but swelling nearly closes eye; next day other spots on face, behind ear, on neck; third day on chin and nose, with itching and burning: in evening covered with small vesicles, oozing watery fluid.

Red marbled spots; with corrosive or bruised pain; like petechia, with itching and burning.

Specks resembling nettlerash and patches on shoulders, arms and hands.

Efflorescence, especially on border of hairy part of head, on upper part of trunk and extremities.

Pimples, usually isolated, sometimes in groups.

Single, red pimples burning, itching, leaving brown liver spots.

Red pustules, with burning, itching and stitching; sensitive to pressure; changing into brown spots.

Furuncles. θFistula in ano.

Herpes around anus.

Itching or pressure in region of inguinal glands, with pain from touch as if they would swell.

Tumor behind ear, size of a hazelnut.

Clusters of red pimples, with red areola and small tips, containing pus; changing to brown spots.

[47] **Stages of Life, Constitution.** Especially suited where renal or vesical symptoms are prominent.

Bilious diathesis.

Male, æt. 34; for years indigestion from chronic gastritis, reduced in weight, pale, discouraged; after improvement by *Lycop.;* rheumatism of knee.

An old woman, æt. 70; heartburn of thirty years standing.

Google

[46] **Relations.** Antidotes to *Berberis: Camphor., Bellad.* (cerebral and febrile symptoms).
Berberis antidotes: *Acon.*
Compare: *Aloes, Ant. tart., Arsen., Calc. ostr., Calc. phosph., Carb. veg., Chamom., Cinchon., Lycop., Natr. mur., Nitr. ac., Nux vom., Pulsat., Rheum.*
Lycop., an occasional dose, aided *Berber.* in curing rheumatism of knee.
Useful after *Arnic., Bryon., Kali bichr., Rhus tox.* and *Sulphur* in rheumatism.

BISMUTHUM.

Hydrated oxide of Bismuth. $Bi_2O_3OH_2$.

Hahnemann proved with his students, and published the result in 1827, what he supposed to be pure wismuth oxide, but what now is known as the basic bismuthi subnitras, or magisterium bismuthi. The symptoms (4 and 97) reappeared in the second edition, in 1807 (11 and 97).

Allen's Encyclopedia, vol. ii, gives also the collection of Wibmer, partly of the acid bismuthum nitricum as magisterium. As here are principally to be given the cured symptoms, which are from Hahnemann's preparations, we omit the other. Women are often poisoned with the oxide, used as a cosmetic.

[1] **Mind.** Unconsciousness.
Stupefaction; dulness; mist before eyes.
Dulness; heaviness of head.
‖Delirium. θWith gangrene, or internal ulceration.
‖Delirium tremens.
Desire for company; child holds on to its mother's hand.
Solitude is unbearable.
‖‖Anguish; at times he sits, then walks, then lies down, never long in one place.
Apathy, with peevish dissatisfaction.
Unstable-minded; begins now this, again that, holds but short time to any one thing.
Ill humor; he is morose and discontented with his condition, and complains about it.
[2] **Sensorium.** Dulness; heaviness of head.
Confusion of head.
Vertigo; sensation as if anterior half of brain was turning in a circle.
Violent vertigo, with pressing pain in forehead; redness

Google

of conjunctivæ; dimness of vision; tinnitus; pressing pain in stomach and spasmodic pulse.
Dulness in head, heat, small, tense, accelerated pulse.
Dizziness in morning after a restless night.

[3] **Inner Head.** Pressing pain in forehead; vertigo from violent exercise.
Sensation of weight in forehead, temples and occiput.
Pressure and sensation of heaviness in forehead, at times also in occiput: pressure on eyeballs; < after lying down and during rest; from motion and touch.
Violent, pressive, heavy pain in forehead.
Continual pressure in forehead, over eyes.
Dull, pressive pain in head, now here, now there.
Pressure and sensation of heaviness in occiput, more violent on motion.
Dull cutting pain in brain, begins above right orbit and extends to occiput.
Headache extending into root of nose.
Alternate contraction and distension in forehead, eyes and nose.
Frequent inflammatory headache, with fever.
Headache returning in winter season.
Incipient hydrocephalus.
Boring headache, from within outward, in forehead, orbits and root of nose, extending down nose; < afternoon and after eating; > from motion, cold drinks and bathing.
Headache alternating with or attended by gastralgia
Concomitants of headache: apathetic, sullen, dissatisfied, complaining mood; earthy pale face; blue rings around eyes; great thirst for cold drinks in evening; nausea and pressure in stomach after eating; ineffectual urging to stool in evening; boring and burning in chest and back; great drowsiness in forenoon; flushes of heat over head and chest; prostration.

[5] **Sight and Eyes.** A fog before eyes, with stupefaction.
Pressure in r. eyeball, from before backward and from below upward.
Thickened mucus in both canthi.
Redness of conjunctiva, with dim vision, vertigo, and tinnitus.

[6] **Hearing and Ears.** Pressure and drawing in l. external meatus.

[7] **Smell and Nose.** Nosebleed, dark blood.
Pressive heaviness at root of nose.

[8] **Upper Face.** Pale, cold face; earthy complexion; blue borders around eyes; features changed, as if he had been very sick.

Google

‖Pressure in region of malar bones; better running about and holding cold water in mouth. θProsopalgia.
πTremor of muscles of face and limbs.

[10] **Teeth and Gums.** ‖Toothache relieved by taking cold water in mouth; < when water becomes warm.

[11] **Taste and Tongue.** Taste: sweetish, sour, or metallic on back part of tongue.
Red tongue.
‖In evening white-coated tongue, without heat or thirst.

[12] **Inner Mouth.** Inflammation of mouth, with whitish excoriations and fissures.
Slight salivation, with marked tumefaction of inner surface of cheek, l. gum and side of tongue.
Copious secretion of brown, thick, metallic-tasting saliva.
‖Pyrosis.

[13] **Throat.** Inflammation of pharyngeal cavity.
Burning in throat.
Difficult swallowing.
Inflammation of throat awaking at night and paining very much, with short cough and retching.
Phagedenic ulceration of uvula, with burning and tearing; difficult swallowing of fluids, which return through nose.

[14] **Appetite, Thirst. Desires, Aversions.** Desire for cold drinks in evening.
Intolerable thirst.

[15] **Eating and Drinking.** Nausea after eating and pressure in stomach.
‖‖Cold water relieves.
‖Water is vomited as soon as it reaches stomach. θSummer diarrhœa. θGastralgia.
‖Pressure like a load in stomach after eating. θGastralgia.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.
‖Violent eructations, sometimes fetid and cadaverous smelling. θGastralgia.
‖Nausea in stomach; he feels as if he would vomit, especially violent after eating.
Nausea, with gulping up of bile.
Violent retching, followed by fearful vomiting.
Nausea after every meal.
Vomiting (of bile), with oppressive anxiety; small pulse; vertigo and prostration.
Vomiting and diarrhœa.
‖Vomiting of all fluids as soon as taken. θDuring dentition. θSummer complaint.
Vomiting, with retching; disgusting taste in mouth; pain in throat when swallowing; inflammation of pharyngeal cavity; diarrhœa, with small pulse, cold extremities, and cramps in hands and feet.

Digitized by Google

❙Vomiting of bile without effort. θGastritis.
Vomits a brownish fluid.
❙❙Vomits: only at intervals of days when food has filled stomach; then vomits enormous quantities, lasting all day; vomits all fluids. θCancer of stomach.
❙❙Vomiting, convulsive gagging and inexpressible pain in stomach. θAfter operations on abdomen.
Vomiting and purging (or vomiting alone), with great prostration; warm surface; flatulency; white tongue; cadaverous-smelling stools; patient desires company.

[17] **Scrobiculum and Stomach.** Pressure in stomach, especially after a meal.
❙Distressing pressure and burning in region of stomach.
❙Pressure in region of stomach and empty eructations.
❙❙Pressure as from a load in one spot. θGastralgia.
❙Spells of cardialgia, with which abdominal muscles are spasmodically contracted; retching to vomit; dyspnœa; trembling of limbs and convulsions; pain is so violent as to induce fainting.
❙Burning, stinging, crampy pains; stomach hangs down to crest of ilium; hard lumps between navel and edges of lower ribs, r. side. θCancerous affections.
❙❙Crampy, spasmodic pains in stomach; burning, alternating with pressure; pressure in spine, must bend backward.
❙Gastralgia nervosa.
❙Burning in stomach. θInflammation of stomach.
❙Uncomfortable feeling in stomach.
❙Intense malaise in stomach, with burning; red or white tongue; restlessness; prostration. θAfter blood-letting.
❙❙Gastric irritation, with pyrosis.
❙Gastromalacia.

[19] **Abdomen.** Pain in umbilical region.
Pinching pressure, now here, now there, in lower abdomen, with rumbling and grumbling, and a sensation as if he must go to stool.
πColic.
Abdomen painful to touch.
❙Abdomen bloated in ridges; rumbling of wind along colon, passed rarely, but then relieves. θCancerous affections.
Fearfully distended abdomen.
Flatulence; frequent passing of wind.

[20] **Stool and Rectum.** Ineffectual urging to stool in evening; rumbling, pressure and pinching in abdomen.
Frequent passage of flatus.
Watery diarrhœa.
❙Stools: papescent, foul; watery, cadaverous-smelling.

Digitized by Google

ıSummer complaint of children when fluids are vomited as soon as they are taken.
ıCholera, when vomiting predominates.
Bilious evacuations, with colic.
πDiarrhœa or constipation.
ıPainless discharge of blood from rectum in large quantities.

[21] **Urinary Organs.** ıFrequent and copious micturition; urine watery.
Suppression or retention of urine.

[22] **Male Sexual Organs.** Seminal emissions, with lascivious dreams.
ıNightly pollutions without erections.
ıGonorrhœa.

[25] **Female Sexual Organs.** Menstrual blood dark, pitchy.

[26] **Respiration.** Dyspnœa.
πAnxiety and extraordinary oppression.

[27] **Cough.** Sputa dark, bloody, or blood-streaked.

[28] **Inner Chest and Lungs.** ıPain in chest and back, with burning and boring.
ıPinching-pressive pain in region of diaphragm, extending transversely through chest when walking.
ıBoring pain in r. chest anteriorly, near seventh rib.
θPregnancy.
Boring and burning in chest; backache.
Flushes of heat in chest and head.
πIntolerable heat on chest.

[29] **Heart, Pulse and Circulation.** ıViolent beating of heart.
θEndocarditis with gastritis.
Pulse: contracted, somewhat spasmodic, and at times small and intermittent; sinking.

[30] **Outer Chest.** Fine stitches in centre of sternum, not affected by breathing.

[31] **Neck and Back.** Tensive pressure on r. side of neck near cervical vertebræ, in motion and rest.
Pain in l. side of back, as after stooping too long.

[32] **Upper Limbs.** Paralytic weariness and weakness in r. arm.
Laming-tearing pressure of r. forearm; more towards outer side, at times more in upper part; passes off by motion and touch.
Tearing in metacarpal bones of r. fore and middle fingers.
Fine tearing in finger tips of r. hand, particularly under nails.
Arms bluish, lame, weak.
Tearing and pressure in r. shoulder.
Lameness and pressure of r. arm, especially in carpal bones.
Hands feel weak, as if he could not hold pen.

[33] **Lower Limbs.** Bluish thighs.

Digitized by Google

Tearing pain below external malleolus of r. foot, terminating at tendo-achillis.
Tearing: in toes; in heels, more left.
Corrosive itching near tibia and backs of both feet near joints, which become much < on scratching; is obliged to scratch himself till it bleeds.

[34] **Limbs in General.** Screwing, boring, tearing pressure in bones of hands and feet.
Hands and feet contracted spasmodically.
Blue color of forearm and thighs.
Marked dryness of palms of hands and soles of feet.

[35] **Rest. Position. Motion.** Sitting: pain l. side of back.
Lying down and during rest: headache worse.
Must bend backward from pressure in spine.
Running about: pain in molar teeth better.
Motion: headache >; lame forearm >; most symptoms disappear.
Violent exercise: vertigo.
Walking: pain in region of diaphragm extends transversely through chest.

[36] **Nerves.** Restless, moving about; anxiety.
All muscles of body, particularly those of legs, from toes to thighs, spasmodically contracted.
πConstant tremor.
Great debility; languor; prostration.

[37] **Sleep.** In morning, a few hours after rising, an excessive sleepiness; but after eating he was unable to take his accustomed nap for several days.
Drowsy while working.
Frequent waking at night: as from fright; as from tire.
Restless sleep; lascivious, vivid dreams, sometimes without, more frequently with seminal emission.
Starts in sleep; thinks that he is falling; awakes in a fright.
Sleep unrefreshing.

[38] **Time.** Morning: dizziness; great drowsiness; flushes of heat after rising.
Afternoon: headache worse.
Evening: great thirst for cold drinks; ineffectual urging to stool; white tongue without thirst.
Night: inflammation of throat awakens; pollutions without erections; awakens frequently.

[39] **Temperature and Weather.** Cold drinks and bathing: headache better.
Holding cold water in mouth: toothache better.
When water in mouth becomes warm: toothache worse.
Cold water: relieves faceache.
Summer complaints.

Google

Headaches return in winter.

[40] **Fever.** Chilliness.

Chilliness intermittent, periodical.

Chill, with deathly coldness of whole body.

Flushes of heat over whole body, mostly on head and chest, after rising in morning.

External dry, burning heat.

Heat in entire body, with accelerated, contracted pulse; temperature not increased; no perspiration; coated tongue; vertigo; pressure in forehead and reddened conjunctiva.

Disagreeable heat in chest; vertigo; drowsiness; vomiting; diarrhœa, or constipation.

[42] **Locality and Direction.** Right: headache above orbit; pressure in eyeball; hard lumps between navel and edges of lower ribs of side; pain in chest near 7th rib; pressure side of neck; weakness of arm; lameness of forearm; tearing in metacarpal bones of fore and middle fingers; fine tearing in finger tips; tearing pressure in shoulder; tearing in foot.

Left: pressure and drawing in meatus auditorius externus; tumefaction of gum and side of tongue; pain side of back; tearing in heel.

Within outward: frontal headache.

Before backward: pressure in r. eyeball.

Below upward: pressure in r. eyeball.

[43] **Sensations.** As if an anterior half of brain was turning in a circle.

Cutting: in brain.

Stitches: in sternum.

Stinging: in stomach.

Boring: in forehead, orbits and root of nose; in chest and back; in r. chest; in bones of hands and feet.

Screwing: in bones of hands and feet.

Pinching: in abdomen.

Drawing: in l. external meatus.

Tearing: in uvula; in metacarpal bones of r. fore and middle fingers; in finger tips; in r. shoulder; below external malleolus of r. foot; in toes; in heels.

Burning: in throat; in uvula; in stomach; in chest and back.

Pressing: in forehead; in stomach; in head, here and there; in r. eyeball; in l. external meatus; in malar bones; in spine; in abdomen; in r. shoulder; of r. arm.

Laming-tearing pressure: of r. forearm.

Tensive pressure: on r. side of neck.

Pinching pressure: in lower abdomen; in region of diaphragm.

Google

Crampy pains: in stomach; in hands and feet.
Undefined pains: in umbilical region; in chest and back; in stomach.
Heat: in chest.
Contraction: in forehead; eyes and nose.
Distension: in forehead, eyes and nose.
Heaviness: of head; weight in forehead, temple and occiput; at root of nose.
Itching: corrosive near tibia and bones of both feet near joints.
Paralytic sensation: in r. arm.

44 **Tissues.** Tearing and pressing in bones of hands and feet.
Gastric affections.
Has been given in cancer of stomach.
Anæmia.
Spasmodic affections of muscles of face and extremities.

45 **Touch. Passive Motion. Injuries.** Touch: headache >; abdomen painful; lameness r. forearm better.
Scratching: < itching on feet.

46 **Skin.** Itchlike eruption; anæmia.
Dry gangrene; delirium.
Ulcers gangrenous, bluish; or dried, parchment-like.
Corrosive itching on side of tibia. See 33.

48 **Relations.** Antidotes to *Bismuth: Calc. ostr., Capsic.*, Coffee, *Nux vom.*
Bismuth is isomorphic with *Ant. crud., Arsen., Phosphor.*
Compare: *Ant. crud.* (vomiting, white tongue, gastritis); ‖*Arsen.* (anxiety, gastritis, cancer, gangrene, vomiting, etc.); ‖‖*Bellad.* (gastralgia, cancer, flatus "in ridges," etc.); ‖‖*Bryon.* (toothache, gastritis); *Calc. ostr., Capsic., Cinchon., Ignat., Kali carb., Kreosot.* (cancer, vomiting, cholera infantum); *Laches.* (sore throat, sleep, ulcers); *Lycop., Mercur., Nux vom.* (gastralgia, urging to stool); *Phosphor.* (vomiting, gastralgia); *Plumbum* (abdomen in ridges, gastralgia, better bending backward, heart disease, etc.); *Pulsat., Rhus tox.* (effect of motion); *Sepia, Silic., Staphis.*
Useful after *Evonymus.* θHeadache.

Google

BORAX.

Sodium biborate. $2BO_2NaB_2O_310H_2O$.

The first proving was made by our very industrious Shreter, a master in observing, and published in Hartlaub's Annalen, 1832, vol. iii, p. 309; his 87 symptoms have been corroborated throughout.

In 1835 Hahnemann, in his Chronic Diseases, 2d edition, vol. ii, p. 280, added 342 to the above, 31 of his own.

In 1857 Bönninghausen called attention to the characteristics, and another proving was published in the Austrian Journal by Anton Fischer.

[1] **Mind.** Alternate laughing and weeping.

Idles through afternoon, does not really get at work; changes from one work to another, from one room to another; without keeping to any object.

The child becomes anxious when dancing; if one rocks it in arms it has an anxious expression of face during downward motion.

Very anxious on riding rapidly down hill, contrary to his custom he feels as though it would take away his breath.

Anxious feeling during downward motion or rocking. θDiarrhœa.

Dread of downward motion.

Great anxiety and sleepiness; anxiety increased until 11 P.M.

Fretful, ill-humored, indolent and discontented before easy stool, in afternoon; after it, lively, contented, and looking cheerfully into future.

Irritability and crying of children.

Easily startled by unusual sounds; at a distant shot, an anxious cry, hawking, sneezing, etc.

Fright; he starts in all his limbs on hearing an anxious cry.

Reading and writing aggravate headache.

When writing in morning, flickering before eyes.

While engaged in thinking at his work, strong nausea, with trembling of whole body and weakness in knees.

[2] **Sensorium.** First, heaviness of head; later, light, clear head.

Vertigo and fulness in head on descending a mountain or stairs.

Google

‖Vertigo: with tendency to fall to l. side; vertigo when driving down hill.
‖Giddy all the time.

³ **Inner Head.** Pain across his forehead for three days, with giddiness, then it passed to top of his head.
Pressive headache in forehead.
Headache in forehead with stinging in l. ear, changing at times to right.
Throbbing headache in both temples, or in occiput.
Twitching pain in forehead, with nausea and tearing in eyeballs.
Tearing; also stitches in vertex.
Aching in whole head, with nausea, inclination to vomit, and trembling in whole body, at 10 A.M.
Fleeting stitches in l. side of head, in vertex, and later in female sexual parts, followed by voluptuous, disgusting dreams.
Headache, with dulness of entire head; stinging in l. ear.
πFatal basilar meningitis, with constant sopor, from which child, æt. 11 months, could not be roused.

⁴ **Outer Head.** Tearing from parietal bone to forehead.
Headache in occiput throbbing as if something would suppurate; shuddering over whole body, lasting all night and following day.
Hot head of infants, with heat of head and palms.
‖Hot head and chilliness.
‖Hot head. θDiarrhœa.
Sensitiveness of external head to cold and changes of weather.
Hair becomes entangled at tips and sticks together, cannot be separated; if these bunches are cut off they form again; the hair may split.
‖The hair is rough and frowsy, can't be combed smooth; gets into all kinds of snarls.

⁵ **Sight and Eyes.** Worse from light, particularly candlelight.
Sensitiveness of eyes to candlelight, evenings.
Flickering before eyes in morning, when writing, so that he does not see distinctly; there seem to be bright moving waves, now from r. to l., again from above downward.
Obscuration of sight in l. eye.
Pain above eyes.
Tearing in eyeballs, with twitching pain in forehead and nausea.
Several stitches in succession, in l. eye.
Sensation of a foreign body in eye.
Burning of eyes and contraction as soon as spectacles are put on.

Google

‖Rheumatic ophthalmia.
Swelling of Meibomian glands.
Inflammation of eyes at canthi; with irregularity of lashes; nightly agglutination.
‖Lashes turn inward towards eye and inflame it, especially at outer canthus, where margins of lids are very sore.
‖Margin of lids affected; eyelashes loaded with a dry, gummy exudation, stick together in morning.
‖Lower lids entirely inverted.
‖Granulated lids.
‖Entropion.
‖Difficult opening of lids.

[6] **Hearing and Ears.** ‖Very sensitive to slightest noise, as rumpling of paper, fall of a door latch, etc. θDiarrhœa.
Dull drumming in l. ear, sounding as if over subterranean vault.
Ringing, piping, crackling, or roaring in ears, more in left.
Deafness, with tinnitus and discharge from ear.
Difficult hearing in l. ear.
Smacking, and sensation as if ear opened and closed, while it contained a thick paste.
Stinging in l. ear.
Inflamed and hot swelling of both ears.
Discharge of pus from both ears.
‖Left ear particularly affected.

[7] **Smell and Nose.** Bleeding from nose, morning.
Sneezing and fluent coryza.
‖Sneezing causes severe stitch in r. side of chest.
Fluent coryza, with much crawling in nose.
Discharge of much greenish, thick mucus from nose.
‖Dry crusts in nose, re-form if removed.
‖Nostrils inflamed and crusty, tip of nose shining red.
Red and shining swelling of nose, with throbbing and tensive sensation.
‖Red noses of young women.
‖Painful pressing from above downward, through r. nostril, as if brain would be forced out; < lying; sleepless night from suffocating dryness.
‖Stoppage of r. nostril, with constant inclination to blow nose.
In upper and forepart of l. nostril, towards tip of nose, a small boil, with sore pain and swelling of tip of nose.
‖Stoppage of nose, first r. then l., with lachrymation.

[5] **Upper Face.** Anxious face during downward motion.
Sensation on r. side of face, by mouth, as of cobwebs.
Sickly, pale, earthy color of face.
‖Face of infant looks pale, suffering, earthy.

Google

‖Pale, clay-colored face. θDiarrhœa.
Swelling, heat and redness of face, with tearing pain in malar bone.
One-sided hard swelling of face.
‖Erysipelas in face and on lower limbs. θDuring pregnancy. θWhile nursing.
‖Erysipelas in face, usually l. side, insupportably painful when moving muscles in laughing.

[9] **Lower Face.** Burning of upper lip beneath l. nostril, in morning.
Transient burning in nether lip, in evening.
Sensation as if a bug was crawling over under lip, at 4 A. M.
Red inflamed swelling, as large as a pea, on lower lip, with burning soreness when touched.
Crawling, like insects, on lips.
‖Children have small vesicles around mouth, on forehead, fingers and hands, which burst and spread.
‖Herpetic eruption about mouth.

[10] **Teeth and Gums.** Neuralgic toothache.
Dull griping in a hollow tooth in wet weather.
Fine stinging in all teeth, intermitting, mostly in l. lower decaying molar, with stinging in l. ear and frontal headache; in evening.
Inflamed large swelling on outer side of gum, which pains severely (gum-boil), with dull pain in a hollow tooth; swelling of cheek and whole l. side of face, as far as below eye, where there is formed a watery blister.
Dark redness in lower portion of gums beneath roots of teeth along lower jaw; and toothache as if teeth were too long.
‖Redness of gums above roots of teeth in front of upper jaw.

[11] **Taste and Tongue.** Taste: flat and insipid; bitter; food and even saliva taste bitter.
Food has no taste.
Cramp, numbness and stiffness in tongue, impeding respiration.
‖‖Aphthæ in mouth and on tongue.
‖Red blisters on tongue, as if surface was eroded; they pain from every motion of tongue, or if anything salt or spiced touches them.
‖‖Aphthæ on tongue and inside of cheek, bleeding when eating. θDiarrhœa.
‖‖Aphthæ are so tender that they prevent child from nursing.

[12] **Inner Mouth.** Mucous membrane of forepart of palate is shrivelled, as if burnt, pains especially when chewing.

Digitized by Google

‖Mouth very hot. θDiarrhœa.
‖Aphthæ, with dry heat in mouth, great thirst and vomiting after drinking.
‖Salivation with difficult dentition.
‖Rapidly forming ulcers in mouth; gangrenous.
‖Buccal mucous membrane highly reddened and covered with cheesy aphthæ.
‖‖Aphthæ with salivation.
‖‖Aphthæ: in mouth; on inner surface of cheek, bleeding easily; with great heat and dryness of mouth; with cracked tongue; with salivation.
‖Aphthæ of old people, after partaking of sour or salty food.

[13] **Throat.** Worse when swallowing.
Palate wrinkled; child cries frequently when nursing.
Roughness and burning in throat.
‖Tough, whitish mucus in throat, which is loosened only after great exertion.
‖Mucous membrane of palate in front seems burnt and shrivelled, and is especially painful when chewing.
Scratching in throat, with pressure in chest and cough.
‖Syphilitic ulcers in fauces.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Thirst; vomiting after drinking. θChild with aphthæ.
‖Desire for acids; for sour drinks. θDiarrhœa.
No desire for his smoking tobacco.
‖Loss of appetite. θDiarrhœa.

[15] **Eating and Drinking.** After eating apples with mutton, fulness in stomach, with peevishness and ill humor, also fulness in head.
‖After eating pears, especially morning or forenoon, pressure in pit of stomach, which disappears on walking. θDiarrhœa.
Worse from wine, particularly chest symptoms.
Wine increased pain in r. chest and inguinal region.
Renewal of symptoms on taking vinegar, particularly stitch in chest.
Hiccough: after eating; also of infants.
‖After every meal, flatulent distension. θDiarrhœa.
‖After eating, which he relishes, great distension, discomfort, sick feeling and ill humor.
After eating: desire for stool; diarrhœa.
After breakfast: diarrhœa.
After smoking tobacco, sensation as if diarrhœa would set in.
Smoking tobacco > toothache.

[16] **Hiccough, Belching, Nausea and Vomiting.** Pains are accompanied by violent and frequent eructations.

Google

Nausea: in morning; immediately after waking, with inclination to vomit; after drinking water, mucous and bitter vomit.
Vomiting food and mucus.
Constant vomiting.
‖Vomiting of sour slime after chocolate. θDiarrhœa.

[17] **Scrobiculum and Stomach.** Nausea proceeding from stomach with pain in sternum, from 3 P.M. until evening.
Constricting pain in region of stomach, beginning daily at 4 A.M. and lasting until noon.
‖Pain in region of stomach after lifting; pain extends to small of back and there becomes a stitching; so severe that during night she cannot turn without pain; > in morning.
‖Stomach cough, with pain extending into region of spleen; want of appetite with indigestion.

[18] **Hypochondria.** Pain in region of diaphragm after lifting a light weight; pain extended to spine, where it became stinging; patient could not turn all night without pain; > in morning.
Pressure in r. and l. hypochondrium.
Cutting in r. hypochondrium, extending downward across bowels, followed by diarrhœa; evacuation sudden.
‡Scirrhus of liver and spleen.
Cutting in l. hypochondrium on walking rapidly, as if a hard, sharp, movable piece was there, with sensation in abdomen as if hard pieces were in it, and these were in motion.

[19] **Abdomen.** Flatulent distension after every meal.
Pain in abdomen, as if diarrhœa would set in.
‖Pinching in abdomen. θDiarrhœa.
Stinging in abdomen, evening in bed.
Stitching and pressing pain in groin.
‡Mesenteric glands hardened and swollen.
Belly soft, flabby and sunken.

[20] **Stool and Rectum.** Much discharge of flatus.
Urging to stool in morning: passage at first formed, then loose, with burning in anus.
Painless diarrhœa, with constant vomiting.
Diarrhœa six times, from morning till 2 P.M., without pain.
Frequent, very easy stool every day.
Stools: frequent, soft, light yellow, slimy, with faintness and weariness; green or brown, diarrhœic; painless, at first frothy, thin and brown, later cadaverous smelling, containing bits of yellow feces; colorless or slimy; green, preceded by crying (infant).
Painless stools, containing undigested food.

Google

πObstinate green discoloration of stool.
‖Greenish stools, day and night, with pitiful crying. θChild with aphthæ.
‖Summer complaint of children mostly under a year old, twenty or thirty passages a day; occasionally vomiting; abdomen soft and wilted; stools brown, watery; containing small yellow lumps and smelling cadaverously; apathetic, refusing nourishment; emaciated to a skeleton; soporous sleep.
πAfter cholera infantum, thrush.
Constipation; stool like sheep-dung.
‖Stool, thickness of a quill, became easy and an inch in diameter. θStricture of rectum.
Before stool: mental indisposition; indolence; urging.
‖Burning in rectum during stool.
‖Cheerful, contented mood after stool.
Several successive stitches in rectum, evenings.
Itching in anus, evening.
‖Chronic mucous hemorrhoids.
‖Stool before making water.

[21] **Urinary Organs.** Violent, urgent desire to urinate, can scarcely hold urine.
At night must rise several times to urinate.
Desire to urinate, without being able to pass a drop.
‖Infant urinates nearly every ten or twelve minutes, and screams before urine passes.
Before urinating, burning.
‖‖Worse before urination.
‖Frequent urination, preceded by cries. θDiarrhœa.
Retention of urine in evening.
‖Hot urine in infant.
‖Orifice of urethra pains as if sore after urinating.
‖Pungent smell of urine.
Smarting in urethra after urinating.

[22] **Male Sexual Organs.** Indifference to coition.
Impotence.
‖Gonorrhœa.
‖Chancres studding prepuce.

[23] **Female Sexual Organs.** Sexual desire too weak.
πEngorgement of uterus, with bearing down pains.
Menses too early, too profuse, and attended with colic and nausea.
‖At time of menses, pain in groins like stitching and pressing.
Before menses: oppression; catching of breath; rushing sound in ears; stitch-pain in r. pectoral region; pain from pit of stomach to small of back.
Menses four days too soon and very profuse, with griping

Google

in abdomen; nausea and pain in stomach, extending into small of back.

Too profuse menses, and she is very nervous, starts at least noise, and dreads a downward motion, like going down-stairs, or downward motion of a swing or rocking-chair.

During menses: throbbing in head and rushing in ears; nausea; pinching and griping in abdomen; pain extending from stomach into back; bearing down and stinging in groin; lancinating pain in groin; tired; sweat after midnight.

After menses: pressing in region of liver, extending into r. shoulder blade; cramplike pain in stomach and back, and vomiting afterwards.

‖Leucorrhœa like white of egg, with sensation as if warm water was flowing down.

‖Leucorrhœa thick as paste and white for five days.

πProfuse, clear, glutinous, albuminous leucorrhœa, relieving all other genital symptoms.

‖‖White albuminous or starchy leucorrhœa.

‖‖Acrid leucorrhœa, appearing for two weeks, between catamenia, with swelling of labia and inflamed and discharging Duvernis glands.

‖Leucorrhœa white as mucus, without any other ailment, a fortnight after menses.

Stinging and distended feeling in clitoris.

πProlapsus by increased heat of vagina.

[24] **Pregnancy. Parturition. Lactation.** ‖Sterility.

During pregnancy, swelling, itching and burning of vagina, with a discharge like gonorrhœa.

False or spasmodic labor pains.

Labor pains accompanied by violent and frequent eructations.

‖Labor pains spasmodic, more in stomach than in uterus.

‖Labor pains dart upward, head of child goes back.

Griping and sometimes stitches in l. mamma, and when child has nursed she is obliged to compress breast with hand, because it aches on account of being empty.

‖Disagreeable sensation of emptiness in mammæ after suckling child.

‖Contractive pains in l. breast when child nurses right.

‖Aphthous nipples.

‖Galactorrhœa; milk coagulating.

Milk is too thick and tastes badly; often curdles soon after it has been drawn.

‖Milk too copious or too thick.

‖The infant's palate was wrinkled, and it cried frequently when nursing. θDiarrhœa.

Google

‖The child at breast sleeps more than usual, but wakes frequently.

‖Aphthæ so tender that they prevent child from nursing.

Colic in infants; they scream out if laid down, or show signs of vertigo when carried down-stairs.

‖Loathing of breasts in infants. θDiarrhœa.

Green stool in infant preceded by crying.

‖The infant becomes pale, nearly earth-colored; the previously firm flesh becomes soft and flabby; he cries a great deal; refuses the breast, and frequently screams out anxiously in his sleep.

‖Child throws up its hands when an attempt is made to put it down.

[25] **Voice and Larynx. Trachea and Bronchia.** Tearing in larynx extending to chest, exciting cough.

[26] **Respiration.** Anxious feeling in chest in evening in bed.

Shortness of breath after ascending steps, so that he cannot speak a word; later when he speaks he has a stitch in r. side of chest; also on running or on any exertion of body, which hurts him.

‖Tension in chest, with inclination to deep breathing; similar to *Calcar.*

‖Pressure in lower l. lateral region of chest, increased by exertion or a long breath.

‖Every three or five minutes he is obliged to take a quick, deep breath, which is each time followed by a stitch in r. side of chest, with a subdued, painful sigh, and slow expiration.

Respiration difficult.

‖Arrest of breath when lying in bed; he is obliged to jump and catch for breath every time he has a stitch in r. side of chest.

When taking a deep breath, sensation in hypochondrium as if something pulled from region of spleen into chest, which sinks back again during exhalation; sometimes pressure and burning in part.

When taking deep breath stinging pressure in sternum; drawing stitch in r. chest; stinging in chest; stitches into l. side of chest, as with a knife.

‖When yawning, coughing and breathing deeply, stitches in chest and pain in r. inguinal region.

When coughing or sneezing: roughness in throat pit and drawing-stinging.

[27] **Cough.** Dry cachectic cough, especially in morning when rising and evening when lying down; with stitching pain in r. chest and r. flank, > by pressure; washing chest with cold water affords most relief; after drinking wine, pains are aggravated.

Google

‖Violent cough, with pain through r. chest, has to press chest with both hands; cough is dry, occasionally raises small white or yellow lumps. θPhthisis.
‖With every paroxysm of cough sticking in r. side of chest, in region of nipple, in evening.
‖When coughing, is obliged to press r. side of chest and flank with hand, whereby pains are tolerable.
Cough with mucous expectoration during day; < in morning; pain in hepatic region.
‖Hacking and violent cough, with slight expectoration of a mouldy taste and of same smell, from chest, with every paroxysm of cough.
Musty expectoration, with pain through chest to back.
Cough, with expectoration of white mucus streaked with blood.
Cough after cold bathing.
Stinging in r. breast near nipple, with each cough.

[28] **Inner Chest and Lungs.** Tightness in chest.
Pressing in chest, with scratching in throat and cough.
Stitches in chest when yawning, coughing or breathing deeply.
Stitches in r. side of chest in region of nipple, with every paroxysm of cough.
Knifelike stitches in l. chest with every inhalation.
‖Pleurisy.
‖Stitches between ribs of r. side, so that he cannot lie on that side on account of pain, with sensitive drawing and obstruction of breathing, so that he has to catch for breath; if he lies upon painful side pains immediately awaken him from sleep.
‖‖Pleuritic pain in r. pectoral region; patient cannot move or breathe without a stitch.
During cough: stitches in chest and lumbar region, lessened by pressure; mouldy taste in throat.
Sudden stitching from within outward in r. side of chest, on raising arms.
Stitching pains in r. lung, but mostly drawing stitches.
‖Stitching or darting pain from without inward through upper r. lung, posterior to second rib.
Fine prickings, extending from back into chest, evenings.

[29] **Heart, Pulse and Circulation.** ‖Cyanosis of infants from birth.
Circulation irregular; face bluish, especially around mouth, nose and eyes, with blue look of finger ends and feet; with attacks, during which child became prostrate and as if suffocating.
Sensation as if heart was on r. side and being squeezed.
Pulse somewhat accelerated.

Google

[30] **Outer Chest.** Stitches between ribs of r. side; cannot lie upon that side on account of pain, with sensitive drawing and obstruction of breathing, has to catch for breath; if during sleep he lies on painful side, pains awake him immediately.

Aching in pectoralis major, as from lying on a hard mattress; painful to touch.

Soreness over front of chest and in middle of sternum to its end.

Little pricking pains all over chest, with difficulty of breathing and cough.

[31] **Neck and Back.** Rheumatic drawing pains in nape of neck, extending to l. shoulder and then into scapula; evening when walking in open air.

Soreness of both sides of neck.

Pain in back: when walking; like from pressure, when sitting or stooping.

Backache extending into feet.

[32] **Upper Limbs.** Pressure in shoulders.

Drawing and tearing pain in and between shoulders, so that he cannot stoop.

Burning pain on upper arm, a hand's breadth around whole arm.

Tearing and breaking sensation in r. wrist.

Stinging in palm of hand; whole hand numb to above wrist.

Branlike herpes on hands and arms.

Burning, heat and redness of fingers during slight cold, as if frost-bitten.

Throbbing pain in tip of thumb, day and night, frequently waking from sleep, at night.

Hot palms. θDiarrhœa.

[33] **Lower Limbs.** Burning pain on l. thigh, a hand's breadth around whole limb.

Transient tearing pain in middle of r. femur, extending up and down.

Weak feeling in feet when ascending steps.

Great prostration and lassitude, with weakness in lower limbs.

Pain in calves.

Erysipelatous inflammation and swelling of l. leg and foot, after violent dancing, with tearing, tension and burning in it; increased burning pain when touched; on pressure redness disappears for a moment.

Stitches in soles.

Burning, heat and redness of toes during slight cold, as if frost-bitten.

Pain in heel as if sore from walking.

Digitized by Google

‖Sensation as if warm water was running down thighs. θLeucorrhœa.

[34] **Limbs in General.** ‖Phagedenic ulcers on joints of fingers and toes. Compare *Sepia*.

[35] **Rest. Position. Motion.** Lying: pressure in nostril <; arrest of breath; cannot lie on r. side. See 28.
Downward motion: child anxious; women dread it during menses.
Dancing: anxious; inflamed l. leg.
Motion: stitches in chest worse.
Exertion: pressure in l. chest.
Restless, cannot sit or lie long in one place.

[36] **Nerves.** Twitching.
Trembling in whole body, especially in hands, with nausea and weakness of knees.
Weakness, especially in abdomen and limbs.
She is very nervous; she does not sleep well.
‖Debility. θDiarrhœa.

[37] **Sleep.** When yawning: stitches in chest.
Sleeps more than usual.
Lascivious dreams; she dreams of coition.
Disturbed, restless sleep, with ebullitions.
Sweat increased during sleep.
Child cries out during sleep, as if frightened.
‖A child, æt. 5, turns about, cries whole night, till 4 in morning, and in morning is in a whining mood; infant frequently cries out in its sleep, and anxiously grasps its mother, as if it had been frightened by a dream.
‖She wakes uncommonly early, at 3 o'clock, she cannot fall asleep for two hours on account of heat of whole body, especially in head, with sweat on thighs.
‖‖Children may be sleeping quietly, and awake suddenly, screaming and holding on to sides of cradle without any apparent cause for so doing.
‖Starting from sleep with anxious screams, throwing hands about, seizing things, or clinging to mother. θDiarrhœa.

[38] **Time.** Morning: pain in stomach >; child is in a whining mood.
3 A.M.: awakens with heat of whole body.
10 A.M.: trembling in whole body.
Afternoon: idles time away; fretful, discontented; stool; chill <.
4 P.M.: as if a bug was crawling over under lip.
Evening: stitches in chest; stool; chill <.
11 P.M.: anxiety increases till then.
Night: pain in stomach <; child cries out.
Day and night: greenish stools.

Google

[39] **Temperature and Weather.** Warm weather: symptoms worse.
Cold: head sensitive.
Damp cold weather: generally worse.
Change of weather: head sensitive.
Wet weather: toothache.
Open air: rheumatism in neck and shoulder.
Washing with cold water: cough better when chest is washed.
Inclination to uncover with the fever heat; sometimes shuns it.

[40] **Fever.** Chill and chilliness mostly during sleep.
Chill predominating, especially in afternoon and evening.
Chill and heat alternating.
Chill from uncovering.
Chill passing downward.
Thirst not constant; is generally wanting during chill.
Flushes of heat, morning and evening.
Hot head, mouth and palms, of infant.
Heat or sweat, with inclination to uncover.
Sweat during the morning sleep.

[42] **Locality and Direction.** Right: stitches side of chest when sneezing; pressure through nostril; stoppage of nostril; stitches in chest; pain in inguinal region when yawning, coughing, etc.
Right to left: stoppage of nostril.
Left: ear especially affected; erysipelas of side of face; contractive pain in breast when child nurses the right; pressure in chest.
Upper right, lower left.
Above downward: pressing through r. nostril.
Without inward: stitches in chest.

[43] **Sensations.** As of a foreign body in eye; as if ear opened and closed; as if all the brain would be forced out through r. nostril; as of cobwebs in r. side of face, on hands; as if hard pieces were in abdomen; as if a bug was crawling over under lip; as if teeth were too long; as if diarrhœa would set in; as if something pulled from spleen into chest; as if heart was on r. side and squeezed; as if warm water was running down thighs.
Cutting: in hypochondria.
Lancinating: in groin.
Darting pain: through lung.
Stitches: in vertex; fleeting in l. side of head; in female sexual parts; in l. eye; in r. side of chest; in small of back; in groin; in rectum; in l. mamma; in soles.
Drawing stitch: in r. chest.
Stinging; in l. ear; in teeth; in abdomen; in sternum;

Google

in chest; in r. breast, near nipple; in palm of hand; in groin; in clitoris.
Pricking: from back into chest; all over chest.
Tearing: in eyeballs; in vertex; from parietal bone to forehead; in molar; in larynx; between shoulders; in r. wrist; in middle of r. femur; in l. leg and foot.
Twitching: in forehead.
Pinching: in abdomen.
Griping: in a hollow tooth; in abdomen; in l. mamma.
Drawing: between shoulders.
Rheumatic drawing: in nape of neck; to l. shoulder, into scapulæ.
Pressing: in forehead; downward through r. nostril; in chest; in hypochondria; in groin; in l. chest; in sternum; in region of liver.
Breaking: in r. wrist; in shoulders.
Burning: of eyes; of upper lip; in nether lip; swelling on lower lip; in throat; in anus; in rectum; of vagina; of fingers; on l. thigh; in l. leg; of toes; of orifice of urethra; of upper arm.
Smarting: in urethra.
Soreness: of tip of nose; over front of chest; in middle of sternum; both sides of neck; in heel.
Aching: in whole head; in pectoralis major.
Contractive pains: in l. breast.
Constricting pain: in region of stomach.
Cramp: in tongue.
Cramplike pain: in stomach and back.
Dull pain: in hollow tooth.
Undefined pain: across forehead; above eyes; in swelling on gum; in r. chest; in inguinal region; in region of stomach; in spleen; in diaphragm; in calves.
Roughness: in throat; in throat pit.
Scratching: in throat.
Fulness: in head; in stomach.
Emptiness: in mammæ.
Throbbing: headache in temples; in occiput; in swelling of nose; in tip of thumb.
Tension: in chest; in l. leg.
Stiffness: in tongue.
Contraction: of eyes.
Numbness: in tongue; of hand.
Crawling: over under lip; on lips; in nose.
Heat: of mouth; palms of hands; of fingers: of palms; of toes; of vagina.
Shuddering: over whole body.
Weakness: in feet; in lower limbs.
Itching: in rectum; of vagina; on back of finger joints.

Google

Dryness: of mouth.

[44] **Tissues.** Sensorium affected by downward motion.
Aphthous affection of buccal mucous membrane.
Parts which are usually red turn white.
‖Emaciation; flabby muscles. θDiarrhœa.
The anxious feeling on downward motion is the chief distinction between *Borax* and *Bellad.*

[45] **Touch. Passive Motion. Injuries.** Riding down hill: anxious; vertigo.
Rocking: anxious.
Touch: swelling on lip burns and feels sore; burning in lower limbs worse.
Pressure: chest pains relieved.
Lifting: pain in stomach.

[46] **Skin.** Sensation as if a cobweb were lying upon skin of face or hands.
Severe itching on back of finger joints; must scratch them violently.
Red papulous eruption on cheeks and around chin.
Herpetic eruption on nates.
Furfuraceous peeling off of epidermis.
Skin getting callous.
‖Skin pale or livid. θDiarrhœa.
‖Wilted, wrinkled skin. θChildren with aphthæ.
Liver spots.
Unhealthiness of skin; slight injuries suppurate.
Old wounds and ulcers are inclined to reopen and suppurate.
Dingy, unhealthy skin, which ulcerates easily on being injured.
Ulcer in l. axilla.
Phagedenic ulcers and boils.
Ulcerated places on feet from rubbing of shoe or boot.

[47] **Stages of Life, Constitution.** Light hair; skin and muscles lax.
‖‖Period of dentition and infancy. θAphthæ. θDiarrhœa.

[48] **Relations.** Antidotes to *Borax: Chamom., Coffea.*
Compare; ‖‖*Calc. ostr., Nux vom.*, ‖*Bryon., Lycop., Mercur., Pulsat., Rhus tox., Sepia, Silicea, Sulphur*, ‖‖*Arsen., Bellad., Graphit., Ignat., Kali bichr.*, and *Phosphor.*
Similar to: *Amm. carb.* and *Magn. mur.* (stoppage of r. nostril); *Calc. ostr.* (inclination to breathe deeply).
Incompatibles: *Acet. ac.*, vinegar, wine.

Google

BOVISTA.

Puffball. *Fungi.*

Hartlaub, Sen., proved in 1828 the spores of this fungus, following the example of Hahnemann, with *Lycopodium*. He published it in 1831 as an antipsoric; 640 symptoms. It belongs to the most important remedies for the treatment of chronic diseases. Aegidi's case of urticaria, Knerr's translation of which was published in the May number of the North Amer. Journal, 1880, is a model cure, and the symptoms are decidedly corroborative, particularly those of the mind. The symptoms are included in our collection.

[1] **Mind.** ‖Absence of mind and difficulty in fixing his attention. θUrticaria.
Misapplies words in speaking or writing.
‖Awkwardness, which makes him drop things from his hands. θUrticaria.
‖Slowness of understanding and comprehension; does not hear well.
‖Vacant, thoughtless staring. θUrticaria.
‖Sad, depressed and desponding when alone.
Doleful; restless; distressed.
‖Sensitiveness; great irritability; takes everything amiss. θUrticaria.
‖Moroseness; ill humor; aversion to all things. θUrticaria.
‖Quarrelsome and contentious. θUrticaria.
‖Weak memory.

[2] **Sensorium.** Absence of mind, abstraction.
Mental dulness.
Stupefying giddiness, with vanishing of senses.
Stares vacantly into space.
Vertigo early in morning, falls over to one side, loses his senses for awhile.
‖Sudden attacks of vertigo and feeling of stupidity in head while standing; she loses consciousness for a moment; preceding and following a headache in morning.

[3] **Inner Head.** Great sensitiveness.
‖‖Sensation as if head was much enlarged; headache, deep in.
Head seems bruised inside.
Beating in head as if there was an abscess there, attended

Google

with a sensation of wild confusion; beating is excited by cold air, particularly early in morning, or only in r. side.
Stupefying pain, particularly in forehead and vertex.
Pressing pains in head.
Pressure from side to side.
Headache: r. side in morning, l. in evening; at night; at 3 A.M.; < on raising head, with increased secretion of urine; < from sitting up; < from pressure.
Pains in head pressing inward; pains from side to side pressing outward.
Dull headache with weariness.
Distensive pain in head.
Pain in occiput, as if a wedge would be pressed in.
Lacerating pain in sinciput and forehead.
On awaking, head aches, as from too much sleep.

[4] **Outer Head.** ‖Sensation as if head was enlarging.
Scalp tender to touch.
Sore spots on head.
Beating in a small spot on l. side; itching in hairy scalp, particularly on getting warm in bed, obliging one to scratch until parts bleed, but not > by scratching, particularly early in morning.
Itching over whole scalp, extending to neck, especially if he became warm, so that he was obliged to scratch forehead, which was not relieved by scratching.
Pimples or reddish vescicles on hairy scalp with itching; painful blister on temple; itching, suppurating blister on forehead; objects seem too near eye.
Falling off of hair.

[5] **Sight and Eyes.** ‖Blindness of r. eye from paralysis of optic nerve.
Objects appear too near.
‖Perpendicular half-sight.
Pressure in orbits, in bones.
Staring at one point.
Eyes dim, without lustre.
‖Inflammation of eyelids, with nightly agglutination.
θUrticaria.

[6] **Hearing and Ears.** Hearing indistinct, misunderstands much that is spoken.
Itching in ears relieved by boring with finger in ear.
Discharge of fetid pus from ears.
Boil in r. ear, with pain when swallowing.
Thick oozing scurfs on ears.

[7] **Smell and Nose.** Every time nose is blown, drops of blood issue from it.
‖A few drops of blood from nose every time on sneezing.

Google

‖Bleeding of nose in morning.
Nosebleed during morning sleep, with vertigo.
Watery coryza, with dizziness.
Stoppage of nose with fluent coryza.
Nose stopped up, cannot breathe.
Soreness and redness of septum narium; scurfs and crusts about nostrils; scurfy pustules under nose.

[8] **Upper Face.** ‖The face is very pale in morning on rising.
Marked alternation of color of face, now very red then pale.
Cheeks hot, feel as if they would burst.
‖Convulsive motions of facial muscles. θBefore asthma.
Pale swelling of cheek after toothache.
Eruption on face and cheeks.

[9] **Lower Face.** ‖Pale swelling of upper lip. θAfter toothache.
Stitching like from a needle or splinter in lips.
Chapped or blistered lips.
Corners of mouth sore, broken out.
‖Lips cracked, in some places crusty. θUrticaria.

[10] **Teeth and Gums.** Tearing in lower jaw anterior to ears; glands under jaw swollen and throbbing.
Violent drawing-aching in carious teeth; > in air and in warmth; < in evening.
After toothache, pale, swollen cheeks.
Violent drawing pain in hollow back teeth of lower jaw for two evenings in succession in bed.
‖Scorbutic gums; bleed easily. θUrticaria.

[11] **Taste and Tongue.** Taste: putrid; bitter.
Stammering, stuttering speech.
‖Cutting pain in tongue, like with a knife. θBefore asthma.
Sores or ulcers on edge of tongue.

[12] **Inner Mouth.** Sensation, as if inner mouth was numb (pithy) and crisp early in morning on waking, sometimes with dryness of mouth and bitter, slimy taste.
Putrid smell from mouth.
Increased flow of saliva.
Great dryness of mouth, as if sand was in it; burning in tip of tongue and numbness of posterior portion early in morning on waking; deep ulcers in r. border of tongue, painful like a sore; stuttering, especially when reading, with inability to pronounce several words rapidly.

[13] **Throat.** Burning in throat.
Sore throat, with scratching and burning in œsophagus.
Great dryness in throat; when awaking in morning, tongue feels almost like wood.

Google

‖Stitching in throat. θBefore asthma.

[14] **Appetite, Thirst. Desires, Aversions.** No appetite for breakfast, relish for other meals.
‖Little appetite. θUrticaria.
Hunger, even after meals.
Longing for cold drink.
No appetite for cooked food, desire for bread only.
Loss of thirst
Desire: for brandy; for wine; for milk.
Worse from: spirituous liquors, wine, cold food.
Better from hot victuals.

[15] **Eating and Drinking.** ‖Better after breakfast. θDiarrhœa.
Hiccough before and after eating.
While eating: stitches through chest; tired; sleepy; crawls or flushes.
After eating: stitches in chest; tired; sleepy; colic; amelioration of gagging; cutting in belly.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccoughing before and after dinner.
Frequent empty eructations.
Nausea, with shivering all forenoon.
‖Nausea in morning. θDiarrhœa.
‖Vomits a watery fluid; nausea > by eating breakfast. θMorning sickness.

[17] **Scrobiculum and Stomach.** Pressure and fulness in pit of stomach; tension in temples; mental anguish.
Cold feeling in stomach, as if a lump of ice was lodged there, with pain, mostly mornings.
‖‖Intolerance of tight clothing around waist.

[18] **Hypochondria.** Stitches in region of last rib, either side.

[19] **Abdomen.** Cutting pains around navel.
Griping; > when at rest.
Stitches in abdomen.
Cutting colic, with coldness, teeth chattering, limbs tremble; < after stool.
Colic, with bright red urine; relieved by eating.
Abdomen: bloated; puffed up at single spots.
Bloatedness of abdomen; with softness, flatulency, or rumbling; with constipation.
Abdomen tender, most in mornings.
Coldness moving about in abdomen.
‖Distension of abdomen, with rumbling, shifting of flatulence and emission of much flatus. θDiarrhœa.
‖Colic, which causes patient to double over; sometimes voiding red urine (not in *Coloc*), and relief by eating (not in *Coloc.*).

[20] **Stool and Rectum.** Stinking flatus.

Google

Disposition to diarrhœa, frequent attacks, each evacuation being followed by tenesmus. θUrticaria.
Diarrhœa before and during menses.
Fruitless urging to stool.
Diarrhœa with cutting pains.
Stools first hard and difficult; last thin, even watery. θAffections of prostate gland.
Stool at first hard, last part thin, with pain in abdomen.
After stool, tenesmus and burning at anus.
Itching in rectum, as from worms.
Darting from perineum to rectum and genitals.
Itching on tip of os coccygis, has to scratch the parts raw and sore.
Stools: liquid, yellow, fecal.
Morning diarrhœa, with urging pain.
Before stool: urging; colic. θDiarrhœa.
During stool: twisting pain in abdomen. θDiarrhœa.
After stool: languid; tenesmus; burning at anus; burning and itching in anus, as if worms were crawling.

[21] **Urinary Organs.** Frequent desire to urinate, even immediately after urination, with emission of a few drops.
Urine: bright red; yellow green; becomes turbid; bright yellow, with slowly forming cloud; turbid, like loam water, with violet sediment.
Diabetes mellitus.
Stinging-itching burning in urethra; orifice inflamed, feels glued up.
Hard node in urethra.
Gleet.

[22] **Male Sexual Organs.** Seminal emissions.
After coition, reeling and confusion in head.
Complaints from sexual excess.

[23] **Female Sexual Organs.** Voluptuous sensation in genitals.
Burning in genitals.
Menses: four days too soon and more profuse than usual; every two weeks much dark and clotted blood; too late and scanty; only at night, or only in morning; too late and scanty; only at night, or only in morning; during intervals occasional show of blood.
Ovarian cyst, tapped twice within a few months.
Every few days a show between the menses.
The menses flow most profusely in morning, but scanty during day and night.
After midnight painful urging towards genitals, with great heaviness in small of back, which was somewhat relieved next day with discharge of menstrual blood.
Diarrhœa frequently before and during menstruation.

Google

Before catamenia: spasm in chest; painful bearing down in genitals; diarrhœa.

Before, during and after menses: pain as if bruised, and weary in loins, belly and thighs, impeding going up-stairs.

‖‖Leucorrhœa a few days before or a few days after monthly; while walking like white of eggs; yellow green, ‖acrid, corrosive, leaving green spots in clothes; thick, slimy, tough.

Soreness between labia and thighs.

[24] **Pregnancy. Parturition. Lactation.** ‖Jaundice of new-born children.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness in morning.

Roughness in throat, mornings, with catarrhal speech.

Scratching sensation in larynx, with viscid phlegm.

[26] **Respiration.** Shortness of breath from every exertion with hands.

Oppression of chest, desires to loosen clothes.

Spasmodic laughing and crying, with asthma, face dark red.

[27] **Cough.** Evening, loose; morning, dry.

Dry cough from tickling in throat.

Cough from tickling in chest, mornings, after coming into room from cold air.

‖Cough with so viscid an expectoration that it can scarcely be discharged.

[28] **Inner Chest and Lungs.** Stitches in various localities of chest.

Stitches in l. side, extending through to back.

[29] **Heart, Pulse and Circulation.** Ebullitions, with much thirst.

Palpitation: with tremor of hands; restlessness; vertigo; chilliness; sick headache; profuse catamenia.

Visible palpitation, after going up-stairs; as if heart was working in water; after overexertion.

Pulse accelerated.

[30] **Outer Chest.** Burning in outer chest.

[31] **Neck and Back.** Stitches in neck.

Stiffness of neck in morning.

Backache, with stiffness after stooping.

Shooting and other pains between shoulders, along borders of scapulæ; has to "straighten up" to be relieved.

Intolerable itching at tip of os coccygis; must scratch until parts become raw and sore.

[32] **Upper Limbs.** Sweat in arm pits, smelling like onions.

Tension in shoulder joint, cannot write.

Google

Stitching, boring and tearing pains in upper limbs.
Joints of arms and hands feel disabled and wrenched.
Itching on arms.
‖Affections of wrist joints.
Sharp stitches in r. external malleolus.
Tremor of hands, with palpitation of heart and oppressive anxiety.
‖Great weariness in hands and feet the whole day.
‖She has no power in hands, especially in r., and almost allowed lightest objects to fall from weakness.
‖‖Hygroma on hand.
Moist tetter on back of hand.
The skin of fingers becomes unusually dented by the instruments with which she was working.
‖The hands are covered with small, dry, reddish pimples, which gradually disappear after a few days.
‖Runaround, or whitlow, on fingers.

[33] **Lower Limbs.** Sensation of soreness in hip joints.
Limbs "go to sleep," cannot stand on them.
Stitching pain in knees.
Muscles of calves feel too short; cramp in morning.
Œdematous swelling of (r.) foot even years after a sprain.
Violent stitching in outer malleolus of r. foot, with painfulness of inner.
‖Cramp in leg.
‖Eruption on both feet of small, red, rashlike pimples, with an itching burning pain, with which feet are covered, as far as half way up calves, lasting two days; scratching does not affect them.

[34] **Limbs in General.** Great weakness of joints.
Sensation: as if beaten; lame, aching; tearing; tension, stitches.
‖Rheumatic paresis and marked muscular atrophy of affected leg. θUrticaria.

[35] **Rest. Position. Motion.** Rest: griping worse.
Sitting up: headache worse.
Must straighten up to relieve pains between scapulæ.
Colic causes patient to double up.
While stooping: head dull and heavy; stitches in belly.
After stooping: backache and stiffness; vertigo worse.
Exertion with hands: shortness of breath.
Walking: leucorrhœa like white of eggs.

[36] **Nerves.** Rheumatic lameness.
General languor and enervation, particularly in joints.
Drops things from hands, as from weakness.
Hysteria, with abdominal symptoms.

[37] **Sleep.** Great sleepiness early in evening.
Spasmodic gaping before asthma; morning sweat in bed.

Google

Great drowsiness in afternoon and early in evening.
‖Night rest disturbed by burning and itching of nettle-rash.
Restless sleep, with many anxious, frightful dreams.
On awaking, head aches as from too much sleep; on rising, face pale.

[38] **Time.** 3 A.M.: headache.
5 to 6 A.M.: sweat.
Early morning: ‖stools.
Morning: vertigo; right-sided headache; itching of scalp <; nosebleed; face pale; sensation as if mouth was numb; tongue feels like wood; nausea; cold feeling in stomach; abdomen tender; menses most profuse; hoarseness; roughness in throat; dry cough; stiffness of neck; cramp in calves; sweat in bed.
Forenoon; nausea and shivering.
During day: menses scanty.
Whole day: weariness of hands and feet.
Afternoon: drowsiness; alternate shuddering and flying heat.
Evening: left-sided headache; toothache <; cough loose; great sleepiness; chilliness; ‖stools.
7 P.M.: chill with thirst.
Night: headache; menses scanty; rest disturbed by nettlerash; agglutination of eyes; ‖stools.

[39] **Temperature and Weather.** Cold air: beating in head worse.
Air: toothache better.
Warmth of bed: itching of scalp <; toothache better.
Hot weather: red, scabby eruption appears on thighs and bends of knees, and again with the full moon.
Hot food: symptoms better.
Cold food: symptoms worse.
Coming in room from cold air: cough worse.
Very sensitive to draughts.

[40] **Fever.** Chill predominating, even near a warm stove, morning and evening, and even at night; generally with thirst.
Chill with the pains.
Shivering in evening, spreading from back; drawing pains in bowels.
Chills: immediately after going to bed at night, commencing in back; every evening at 7 P.M. with thirst, followed by drawing pains in abdomen. θIntermittent.
Alternate shuddering and flying heat, most in afternoon, with burning thirst, more with shuddering.
Heat, with thirst, anxiety, restlessness; oppression of chest.

Google

Fever heat during sleep.
Sweat every morning, 5–6 A.M., most profuse on chest.
Sweat in axilla smells like onions.
Chilliness whole evening.

41 **Attacks, Periodicity.** Full moon: red, scabby eruption appears on thighs and bends of knees; also in hot weather.

42 **Locality and Direction.** Right: beating in head; morning headache; boil in ear; deep ulcers on border of tongue; stitches in external malleolus; no power in hand; œdematous swelling of foot.
Left: evening headache; beating in a small spot in side; pain in side; swelling in groin.
Right to left: headaches, right in A.M., left in P.M.

43 **Sensations.** As if head was enlarged; as if there was an abscess in head; as if sand was in mouth; as if a lump of ice was lodged in stomach; as if a wedge would be pressed in; as if heart was working in water.
Lacerating: in forehead; in sinciput.
Cutting: in tongue; around navel; in abdomen; with diarrhœa.
Darting: from perineum to rectum and genitals.
Stitching: in lips; in throat; through chest; in region of last ribs; in abdomen; in chest; in l. side through to back; in neck; in upper limbs; in r. external malleolus; in knees; in outer malleolus; in limbs.
Stitches: in chest; in neck.
Shooting: between shoulders.
Boring: in upper limbs.
Tearing: in lower jaw; in upper limbs; in limbs.
Beating: in head.
Twisting: in abdomen.
Griping: in abdomen.
Wrenched feeling: in joints of arms and hands.
Bruised feeling: in head; in loins, belly and thigh.
Beaten feeling: in limbs.
Pressing: in head; from temple to temple; in orbits; in pit of stomach.
Distensive pain: in head.
Wedge pain: in occiput.
Drawing: in lower molars; in bowels.
Drawing-aching: in carious teeth.
Burning: in tip of tongue; in throat; in œsophagus; at anus; in outer chest; nettlerash; in genitals.
Stinging-itching burning: in urethra.
Soreness: in hip joints; between labia and thighs; of nose.
Cramp: in calves; in leg.

Google

Scratching: in larynx; in œsophagus.
Roughness: in throat.
Throbbing: in head, as of an abscess; in submaxillary glands.
Fulness: in pit of stomach.
Heaviness: in arms and hands.
Tension: in temples; in shoulder joint; in muscles of calf; in limbs.
Stiffness: of neck; of back.
Crawling: in anus.
Tickling: in throat; in chest.
Numbness: in mouth; of posterior portion of tongue.
Weariness: in hands and feet.
Coldness: in stomach; moving about in abdomen.
Itching: over scalp; in ears; in rectum; on tip of os coccygis; in anus; on arms; nettlerash.
Dryness: in throat; of mouth.

" **Tissues.** The phlegm from nose, bronchia, vagina, is very tough, tenacious; also pus from ulcers.
Weakness of all joints.
As if muscles were too short in lower limbs.
Tettery constitutions, eruptions moist or dry.

" **Touch. Passive Motion. Injuries.** Touch: scalp tender.
Scratching: does not relieve itching of scalp; causes soreness of os coccygis; itching continues.
Pressure: headache worse.
Boring in the ear with finger: itching better.
Raising head: headache worse.
Exertions with hands: shortness of breath.
Overexertion: palpitation.
Unusually deep impression on finger from using blunt instruments (as scissors or knife).
Sensitiveness to touch, pressure with hand is painful.
Cannot bear clothing.
In bleeding gums after extraction of tooth, apply pieces of fungus to cavity; two or three applications will cure worst case of hemorrhage; for any other kind of wound, a piece large enough to cover wound, held firmly on, or bandaged on, will arrest flow of blood; in epistaxis, hold a good-sized piece of fungus close to nostrils, and direct patient to inhale with all possible force fumes arising from it under pressure of hand.

" **Skin.** Urticaria covering nearly whole body; some blotches nearly two inches in diameter, caused by tar.
Rash, pimples, with burning itching.
Warts and corns, with shooting pains.
Itching on getting warm, continues after scratching.

Google

Red scabby eruption on thighs and bends of knees, appears with hot weather and with full moon.

Moist or dry herpes.

Tetter on back of hand; after bright red pimples, rough, dark red, moist spots.

‖Urticaria, with rheumatic lameness; disposition to diarrhœa, each evacuation being followed by tenesmus; scorbutic gums; inflammation of eyes and nightly agglutination; morning sweat in bed, together with ill humor, moroseness, irritability, sensitiveness, great excitability; takes everything amiss; aversion to all things; quarrelsome and contentious; stares vacantly into space; awkwardness, which makes him drop things; absence of mind and difficulty in fixing his attention.

Intolerable itching at tip of os coccygis; he must scratch till the parts become raw and sore.

[47] **Stages of Life, Constitution.** Woman, æt. 36, married; after inflammation of bowels, a swelling in l. groin; tapped a pint of fluid from ovarian cyst; after some time again, five, six pints; after some time a third tapping was considered necessary, but *Bovista*[0] cured. †Unilocular ovarian cyst.

Old maids; palpitation.

Children: stammering.

[48] **Relations.** Antidote to *Bovista: Camphor.*

Bovista antidotes bad effects of tar, externally applied.

Useful when *Rhus tox.* fails in urticaria.

Alumina followed well in rheumatic pains after asthma.

Calc. ostr., Rhus tox. and *Sepia* follow *Bovista* with good effect.

Suffocation from carbon vapors.

The smoke from burning *Bovista* acts more on bees than other smoke. (How would smoke of *Rhus tox.* act on bees?)

Compare: ‖*Calc. ostr., Rhus tox., Sepia,* ‖*Phosphor., Pulsat., Staphis., Sulphur, Veratr.,* ‖*Bellad., Bryon., Carb. veg., Caustic., Kali carb., Lycop., Mercur., Natr. mur., Silica, Spigel., Strontian, Valer.*

Incompatible: coffee.

Google

BRACHYGLOTTIS REPENS.

Puka puka. *Eupatoriaceæ.*

A shrub growing in the northern Island of New Zealand, attaining even the size of a tree, to twenty feet in height, bearing large, broad, indented, glossy leaves, the under surface thickly covered with white, downy layers. The flower is large, hanging in clusters of very minute, sweet-scented blossoms. The Maories use the leaves externally over old sores and ulcers.

Horses, after eating the leaves of the young shrubs, seem to lose all power over the hind legs and spine, and appear to be paralyzed.

Tincture prepared from the green leaves and flowers.

Proving by Dr. L. C. Fischer.

[1] **Mind.** Irritable mood.

[2] **Sensorium.** Confusion in head and pain in forehead.
Giddiness and flushed face.

[3] **Inner Head.** Pain in forehead. See 2.
Pressure in forehead; 1st d.
Transitory, sudden throbs l. side of head after one hour; 2d d.
Pressive pain in l. side of forehead.
Throbbing in l. temple.
Headache, pressive and throbbing in forehead.
Headache concentrated about l. eye.
Pain over l. eye.
Pain over r. eye.
Feeling of tightness in forehead and temple.
Weight on top of head.
Headache extending from temple to temple.
Severe throbbing pain around r. ear, and passing from ear to eyes, and then to neck.
A violent headache lasting four hours and commencing again at night, preventing sleep, leaving in morning a bruised feeling.
Throbbing pain in head.
Bruised pain in l. temple.
Darting pain in r. side of head.
Heaviness over head.
Headache and faceache, become very severe and prevent sleep during night.

[4] **Outer Head.** A cold sensation and tightness about scalp.
Increasing desire to bend the head.

Google

Soreness all over head and stiffness in neck.

[5] **Sight and Eyes.** Dimness of sight and pressure on forehead.
Pain over left eye.
Soreness around eyes, as if bruised.

[6] **Hearing and Ears.** Tingling in ears.
Pain in ears.
Itching and pricking in ears.
Throbbing about r. ear, from ear to eyes and then to neck.

[7] **Smell and Nose.** Irritation in nostrils and repeated sneezing.
Irritation in l. nostril and feeling as if air is too sharp.
Itching in nose.
Itching and burning in nostrils.
Soreness of nostrils exteriorly.

[8] **Upper Face.** Faceache l. side, as if submaxillary glands were affected, extending to upper part of face.
Itching in face.
Soreness, zygomatic process r. side of face.
Headache and faceache become very intense, and prevent sleep during night.
Soreness in zygomatic process, l. side.
Sudden lancinating pain in r. side of face.
Chilliness and heat in face.
Slight twitches in l. side of face.
Appearance of general illness.
Flushed face. See 2.
Faceache with headache. See 3.
Severe pain and tightness of skin over forehead.
Twitching in l. side of face.

[9] **Lower Face.** Severe pain in l. submaxillary region.
Painless soreness in sterno-mastoid process.
Since about a week a soreness has been felt on corners of mouth, which now relieves itself by swelling of lips.

[10] **Teeth and Gums.** Toothache, r. side, extending to ears.

[11] **Taste and Tongue.** Soreness of tongue.
Pricking pain and numbness in tongue.

[12] **Inner Mouth.** Heat in mouth.

[13] **Throat.** Slight soreness in throat.
Scraping sensation in throat.
Soreness and rawness in throat.
Dryness and rawness in throat.
Pain in throat increased by swallowing.
Sharp, cutting pain in throat.
Dryness in throat with slight cutting pain.
Dryness of throat and lips.
The throat symptoms seem to be nervous, and not resulting from mucous membranes; the same may be said of nose and ear symptoms.

Google

[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite.
[16] **Hiccough, Belching, Nausea and Vomiting.** Evening, nausea and eructation of taste of ingesta.
Eructation; fluttering in stomach.
[17] **Scrobiculum and Stomach.** Soon after taking the dose, pain, soreness in stomach.
Fluttering in stomach.
Nauseating sensation in stomach.
Evening, after tea, soreness; throbbing in stomach and bowels, r. side.
Fulness and pain in stomach.
Pain in r. side of back and stomach while breathing.
[18] **Hypochondria.** Pain, r. side.
Isolated throbbing pains in r. side, back.
Acute throbbing in r. hypochondriac region.
[19] **Abdomen.** Isolated throbbing in l. groin.
Almost constant pain in groins and weariness in lower limbs.
Pain in l. groin.
Acute pain in groin.
Fluttering sensation in abdomen.
Severe pain across loins.
Pain in bowels.
Dull pain in bowels.
[20] **Stool and Rectum.** Evacuation of dry feces, with sore, constrictive pain in anus; evening.
Ineffectual urging for stool.
Action of bowels has become more and more constipated and painful; feces like balls and knotty.
Colic and desire for stool.
Diarrhœic stools in evening.
Tendency to diarrhœa.
[21] **Urinary Organs.** Pressure and soreness in neck of bladder.
By passing urine, pain in bladder and soreness in urethra; feeling as if urine could not be retained.
Urine abundant; specific gravity, 0.8; full of mucous filaments under microscope, consisting of mucous corpuscles and epithelium.
Inclination and urgent desire to pass urine; 12½ ounces; specific gravity .04; reaction acid.
Irritation in bladder.
Soreness in region of kidneys.
Passed a large quantity of pale-colored urine.
Urgency in passing urine; pain in neck of bladder; a large quantity of pale-colored urine voided; specific gravity, .0.8; boiling and nitric acid test prove albumen.
‖‖Bright's disease.
Since evacuation, pressure and acute pain in bladder and urethra, with stinging in penis.

Google

Pressure in neck of bladder by voiding urine in evening, as formerly; quantity much less and dark in color; specific gravity, 24; long threads again floating in it.
Stinging pain in urethra.
Passed a large quantity of dark-colored urine, containing long threads, which, when examined microscopically, proved less mucous but mere transparent waxy casts.
Urine voided was examined with microscope, and consists of a mass of epithelial cells, adhering to each other (phosphates, oxalate of lime); (quantity of urine voided in twenty-four hours 48 ounces; specific gravity, 24).
Passed soon a large quantity of urine, with constant desire and feeling as if bladder was not emptied.
Soon after taking dose, gnawing pain in region of kidneys.
Desire for micturition during day; urine dark; specific gravity, 23; acid reaction.
Urinary secretion painful in bladder and urethra, and distinct in penis.
Passed 43 ounces of urine in twenty-four hours, dark color; specific gravity, 34; mucous cells and triple phosphates.
Passed about 56 ounces of urine in twenty-four hours specific gravity, 20; full of white mucous sediment, more than any previously passed, containing epithelium, triple phosphates and mucous casts from kidneys.
Passing urine preceded by pain in bowels.
After passing of urine, pain in shoulder was much increased, and changed from a sharp cutting to a throbbing pain.
Pain in knee followed by passing a large quantity of urine.
By urinating, pain in bladder and soreness in urethra, feeling as if urine could be retained.

[31] **Male Sexual Organs.** Soreness in groins, as if in spermatic cords, and thrilling sensation through penis and testes.
Throbbing in penis and desire to pass urine; pressure in bladder.

[32] **Respiration.** Oppression of breathing, as if pectoral muscles were contracting, and a stretching would give relief; which sensation seems to be also in dorsal muscles and r. shoulder blade.
Oppressive breathing; sighing gives relief.

[33] **Inner Chest and Lungs.** Pressure in chest (œsophagus?).
Pain in r. side of chest, affected by breathing.
Pain flying about chest.

[34] **Heart, Pulse and Circulation.** Pain in l. side of chest, region of heart.
Shooting in pectoral muscles in region of heart.
Shooting pain in intercostal muscles, region of heart.

Google

[30] **Outer Chest.** Throbbing in sternum, and pain in pectoral muscles.

[31] **Neck and Back.** Pain in back.
Soreness in shoulders and neck.
Weariness and weakness in back, from coccyx upward, and dull pain in region of kidneys.
Pain in neck by moving head from one side to other; soreness in region of attachments of sterno-mastoid muscles.
Pain in back and weakness in extremities.
Soreness in lower part of spine, from which he was free, is returning with great violence and intensity; it is almost traceable to sciatic nerve.
Uneasiness in back, and prostration all day.
Stiffness in neck.
Aching in lumbar region.
Soreness in first dorsal vertebræ to touch.
Feeling as if whole back would contract backward, and muscles of neck were affected.
Sudden pain about fourth and fifth dorsal vertebræ, extending to r. side of chest and shoulders.
Pain in neck, prominently affecting upper part of trapeze muscle and extending to shoulders.
Pain in neck by pressing on forehead.
Cutting pain in neck.
Stiffness in neck and soreness all over head.
Coldness in back.
Cutting pain under l. shoulder.
Isolated throbbing r. side of back.

[32] **Upper Limbs.** Feebleness in arms.
Isolated sore throbs in r. arm and axilla.
Pain in l. elbow.
Painful throbbing about shoulder and collar bone.
Weariness in arms.
Soreness in fingers and thumb; weakness in hands in writing.
Soreness in r. wrist, extending upward to elbow, as if traceable in flexor carpi ulnaris muscle.
Throbbing and shooting pain in wrist.
Weakness and soreness in biceps.
Isolated throbbing or shooting in arms.
Cracking in joints of l. arm.
Prostration and weakness in r. arm by writing.
Throbbing as formerly in arms.
Weakness and prostration in arms and wrists.
Pain under r. axilla, extending to pectoral muscles.
Sensation of pain running along l. upper arm, becoming stationary.
Painful soreness under arms.

Google

Soreness and pain in l. wrist.
Cracking in l. shoulder; this has never been experienced before.
Great fatigue in arms.
Pain of great intensity in deltoid of l. arm.
Pain under r. axilla.
Severe cramp in thumb, bringing it down to palm of hand.
Cramp in fingers, thumb and wrist, by writing.
Severe cutting pain in l. shoulder.
Cramp and pain in little finger.
Bruised pain, commencing at shoulder and extending down to wrist; pain in wrist and arm is getting worse; pain in arm prevents sleep.
Feebleness in arms.
Prostration and weakness in r. arm by writing.

[33] **Lower Limbs.** Transitory, short, sudden pains in thighs.
Great weakness in legs and prostration.
Throbbing sore pain in legs.
Weakness in lower extremities by walking.
Great prostration in legs, and soreness in lower part of spine; weakness and pain are more perceptible in l. than in r. thigh.
Sharp throbbings or shooting in knees, and contractions, cramplike, in muscles of thighs.
Weakness in lower extremities increasing, extending from hip to knees.
Pain in knees; sore throbbings.
Pain in lower part of legs.
Cracking in joints of lower extremities by walking.
Painful itching-burning by walking, under big toes, and itching in sole of r. foot.
Soreness on soles of feet.
Rheumatic moving-aching in l. knee, very intense.
Cramp in both legs, extending from thighs to knees.
Contraction of r. leg.
Cramps in front of l. leg, above knee.
Isolated sudden throbbing in l. groin.
Pain in thighs by walking.
Transitory, short, sudden pain in thighs.
Almost constant pain in groins, with weariness in limbs.
Sharp throbbing and shooting in veins, immediately after taking dose.
Cramplike contractions in muscles of thigh.
Cold feet.

[34] **Limbs in General.** Weariness and weakness in limbs.

[35] **Rest. Position. Motion.** Walking: weariness of lower extremities; cracking in joints of lower extremities; painful itching-burning in thighs.

Google

[36] **Nerves.** Great lassitude and prostration.
Heaviness and sleepiness.

[37] **Sleep.** A very restless and sleepless night was passed.
Very sleepy during day, and constant yawning all day.
Great inclination to sleep.
Restless sleep during night.
After waking could not fall asleep again; confused dreams.
Full of dreams.
Talking in sleep.
Headache preventing sleep; with faceache.

[38] **Time.** Morning: bruised feeling in head; throbbing in l. groin.
During day: desire for micturition; prostration; sleepiness and yawning.
Evening: soreness of stomach and bowels; sore pain in anus; diarrhœic stools; pressure neck of bladder.
Night: headache prevents sleep; restless and sleepless.

[40] **Fever.** Cold and chilly.
Chilly; pulse 50.
Shivering and chilliness immediately after taking the dose.
Rigor and chills all over frame.
Hands and feet cold.
The rigors and chills are nervous.

[42] **Locality and Direction.** Right: pain over eye; pain around ear; pain side of head; soreness zygomatic process; lancinating pain in side of face; toothache of side; throbbing in stomach and bowels of side; pain side of stomach and back; pain in hypochondrium; contracting sensation in scapula; pain side of chest and shoulder; sore throbs in arm and axilla; soreness in wrist; weakness of arm; contracting pain in leg; itching on sole of foot.
Left: throbbing in temple; headache about eye; pain in temple; pain over eye; irritation in nostril; faceache of side; soreness in zygomatic process; twitches side of face; pain in submaxillary region; throbbing in groin; pain side of chest; cutting pain in shoulder; pain in elbow; cracking in joints of arm; pain along upper arm; sore pain in wrist; cracking in shoulder; pain in deltoid; weakness < in thigh; aching in knee; cramps in front of thigh.
Above downward: bruised pain in shoulder; weakness in hip; cramp in hip.
Below upward: weakness in coccyx; soreness in wrist.

[45] **Sensations.** As if back would contract backward.
Cutting: in throat; under l. shoulder; in l. shoulder; in neck.

Google

Darting: in r. side of head.
Sudden pains: in thighs.
Lancinating: in side of face.
Stinging: in penis; in urethra.
Pricking: in ears; in tongue.
Shooting: in pectoral muscles, region of heart; in intercostal muscles; in wrist; in arms; in knees.
Gnawing: in region of kidneys.
Scraping: in throat.
Pressing: in l. side of forehead; in forehead; in neck of bladder; in chest.
Bruised: headache; in l. temple; around eyes; from shoulder to wrist.
Soreness: over head; around eyes; in zygomatic process; of corners of mouth; of tongue; in throat; in stomach; in anus; in neck of bladder; in urethra; in region of kidneys; in groins; in shoulders and neck; in lower spine; in fingers; in wrists; in biceps; in soles of feet; in groins.
Burning: in nostrils.
Itching-burning: under big toes.
Aching: in lumbar region; in l. knee.
Rawness: in throat.
Cramp: in throat; in fingers; in wrist; in thigh muscles; in legs.
Constrictive pain: in anus; in pectoral muscles.
Undefined pain: in forehead; over l. eye; over r. eye; in ears; in l. submaxillary region; in tongue; in stomach; in back; in l. groin; across loins; in bowels; in neck of bladder; in side of chest; in neck; in l. elbow; in legs; under axilla; in wrist; along arm; in knee.
Thrilling: through penis and testes.
Fluttering: in stomach; in abdomen.
Throbbing: in l. side of head; in l. temple; around r. ear; in stomach; in r. side, back; in l. groin; in penis; in r. arm and in sternum; about shoulder and axilla; in collar bone; in wrist; in arms; in legs; in knees.
Fulness: in stomach.
Heaviness: over head.
Weight: on top of head.
Cracking: l. shoulder, arm and lower limbs.
Stiffness: in neck.
Tightness: in forehead and temple; about scalp.
Twitching: in l. side of face.
Weariness: in lower limbs; in back; in arms.
Numbness: of tongue.
Tingling: in ears.
Coldness: about scalp; in back.

Google

Heat: in mouth.
Itching: in ears; in nose; in nostrils; in face; in sole of r. foot; of skin.
Dryness: in throat; of lips.

[44] **Tissues.** Loss of flesh since commencement of proving.
While at first pains had a nervous character, they are now decidedly muscular and lasting longer.
Seems at first to attack the nervous system.
It appears as if whole nervous system was influenced; filaments and membranous nerves first perceptibly, but larger branches and roots were unmistakably affected—which is proved by intensity and constant pain in back, acting upon motor nerves as well as nerves of secretion, but medulla oblongata appears not to be so immediately acted upon, as there are no spasms and contractions, and no cerebral disturbances, and only later in provings muscular sensation of continuous contraction appears to take place.
The seventh pair, facial and auditory, seem to participate, extending in their ramification to inferior dental and auric branches, principally l. side.
The sciatic and crural nerves, as well as the saphenic, seem most and directly influenced, while in upper extremity ramification of brachial and radial nerves is more influenced.
The muscles seem to be affected secondarily after longer proving; power of contraction and action becomes more influenced after proving has been carried on some time, and which depends also on intensity of dose.

[45] **Touch. Passive Motion. Injuries.** Touch: soreness in first dorsal vertebra.
Pressure on forehead: pain in neck.
Moving head from one side to another: pain in neck.

[46] **Skin.** Itching of skin.

[48] **Relations.** Compare: *Arnic.*, *Calend.*, *Senecio.*, and other Eupatoriaceæ.
Similar to: *Apis* (soreness, stinging in urethra); *Arnic.* (bruised, sore feeling); *Bovist.* (albuminuria); *Helonias* (albuminuria); *Merc. cor.* (albuminuria, urging to urinate and defecate); *Nux vom.* (urging to urinate and defecate); *Opium* (feces like balls); *Plumbum* (feces like balls, painful micturition, albuminuria).

Google

BROMIUM.

Bromine. *The element.*

Proved by C.Hg., in 1838, and later; a carefully made collection, numbering five hundred and ten symptoms, obtained with the use of high and low doses from fourteen provers, four of them being females, and containing nearly all the characteristics which have hitherto led to innumerable cures, was published in the Archives in 1846. It was proved later by Lembke in lower and by Berridge in higher potencies, the result being confirmatory.

[1] **Mind.** Quick comprehension.
In evening, when alone, felt as if he would see something if he should turn around; as if some one was back of him.
Expects to see something jump around floor.
Desire for mental labor, preceded by aversion to his own profession.
Crying and lamentations, with hoarse voice.
❙Aversion to any kind of work, even reading; takes no interest in household duties.
Cheerful mood, no desire for mental labor.
❙❙She does not feel as she generally does, but can't tell why.
Depression and melancholy.
❙Great depression of spirits. θScirrhus mammæ.
❙Very much depressed and inconsolable. θCancer of mamma.
Low-spirited and out of humor.
❙Very low-spirited, with pain in left iliac region.
❙Sad, discouraged. θSwelling of testicle.
❙She is not like herself; despondent, sits alone in her room without doing anything; looks constantly in one direction without saying anything.
❙Violent coughing spells, with anxiety. θCroup.

[2] **Sensorium.** Sensation deep in brain, as if vertigo would come on, or as if he would lose his consciousness.
Vertigo: with tendency to fall backward; if he puts his foot on a bridge; from sight of running water; in damp weather; with nausea and nosebleed.

[3] **Inner Head.** Pain over l. eye.
Headache; heaviness in forehead in heat of sun, passes off when in shade.

Google

Pressure in left temple.
Left-sided headache.
Headache all week, hammering in temples and top of head.
‖Headache deep in crown of head, with palpitation.
Headache after drinking milk.

[4] **Outer Head.** Pains in bones of head, fore and back part; towards evening in damp weather.
‖Scalp tender; covered with an eruption, with dirty looking and offensive smelling discharge. θEczema.
Crawling beneath skin of occiput.
‖Malignant scald head.

[5] **Sight and Eyes.** Flashes of light.
Sensitiveness to bright light.
A grey point before r. eye, moving up and down with movement of eye.
Dilatation of pupils.
Darting through l. eye.
‖Throbbing stitches in l. upper lid, extending to brow, forehead and l. temple; < by external pressure, motion and stooping; > by rest; pain unfits him for work.
‖Lachrymation of r. eye, with swelling of lachrymal gland. θFistula lachrymalis.
Protruding eyes.

[6] **Hearing and Ears.** Noise in ears, like a distant rushing.
Ringing in right ear.
Stitches in ear.
Throbbing and burning in ears, may be succeeded by burning through whole body.
Discharge from ears.
‖‖Parotids, mostly left, affected. θAfter scarlatina.
‖‖Swelling and hardness of l. parotid gland, swelling feeling warm to touch. θSequel to scarlatina.
‖‖Suppuration of l. parotid, edges of opening smooth; discharge watery and excoriating; swelling remaining hard and unyielding. θAfter scarlatina. See 44.

[7] **Smell and Nose.** ‖Fanlike motion of nostrils.
Tickling smarting, as from cobwebs, especially on moving nose; this sensation is in face particularly below nose.
Nosebleed, with relief of chest and eye symptoms.
‖Bleeding of nose, relieving chest.
Frequent violent sneezing.
Inhalation causes sneezing.
‖Fluent coryza, with frequent violent sneezing; corrosive soreness under nose and on margins of nose.
Fluent coryza, with scabby nostrils.
Severe coryza, r. nostril stopped up and sore throughout; later left.

Google

‖Yearly cold, with sore nostril and difficult breathing.
‖Fluent coryza, in which r. nostril is more affected and more stopped.
‖Long-continued, obstinate coryza, with soreness beneath nose and on margin of nose; also catarrh in fauces.
Headache extends to r. nostril.
‖Whole nose sore, and wings of nose swollen; a scurf forms in it, with pain and bleeding on wiping it.

[8] **Upper Face.** ‖Cancerous ulcer between r. eye and ear, of size of palm of a child's hand.
Sensation as of spider web on face.
Face: pale, or red, or alternating.
‖Face of a bluish tinge, turning purplish at each effort to cough. θCroup.
‖‖Grey, earthy color of face; oldish appearance. θCancer of mamma.
‖Face ashy grey. θDiphtheria.
‖Cheeks sunken. θDiphtheria.
Heat in cheeks; first in right, later in left.
‖Heat of face and head. θSpasm of glottis.
‖Pale, collapsed face. θCroup.

[9] **Lower Face.** Shooting pain on vermilion border of upper lip; afterwards yellow spots, which open and discharge a yellow fluid.
Boring pain going to right, or on r. side of lower jaw.
‖‖Slight swelling of articulation of l. jaw, with cracking in it when chewing; swelling and hardness of l. parotid, which is warm to touch; rosy-red swelling of tonsils and difficult swallowing; tension and pressure when swallowing and when not; pain in throat is especially < when swallowing fluids; hawking up mucus.
‖Left submaxillary gland swollen to size of a small hen's egg, hard, not sore to pressure; neighboring glands more or less similarly affected.
‖‖Stony, hard swelling of glands, especially on lower jaw and throat.

[10] **Teeth and Gums.** Decayed teeth sensitive to cold water.
Gums pain in morning.
Swelling and induration of gums.

[11] **Taste and Tongue.** Taste: sweetish; salty; bitter; sour; acrid.
Water tastes salty in morning, fasting.
Dry sensation on tongue.
Burning on under surface of tongue.
Stinging in tip of tongue.

[12] **Inner Mouth.** ‖Fœtor oris. θDiphtheria.
‖Sensation of dryness and burning in mouth. θNasal catarrh.

Google

‖Mouth dry and parched. θEczema.
‖Salivation increases and exudation decreases. θDiphtheria.
Ptyalism; much frothy mucus in mouth.
Heat in mouth and œsophagus.
Burning sensation in mouth, œsophagus and stomach.
Aphthæ, with affection of eyes.

[13] **Throat.** ‖Dryness in throat. θCroup.
‖Scraping in throat, and a rough, deep voice, continued for an hour.
Burning from mouth to stomach.
Worse when swallowing drink; less frequently when swallowing food or saliva.
Swallowing especially painful to r. side of fauces, which is dark red and dry.
Elongation of uvula.
‖Swelling of mucous membrane of fauces and pharynx.
‖Small follicles in posterior fauces; inflammation extending to larynx, causing a titillating cough.
Unpleasant puckered sensation in fauces, followed by burning and soreness.
Lump in throat.
‖Tonsils swollen, inflamed; constant pain in throat, swallowing difficult, of fluids worse than solids. θAfter measles.
Inflammation of fauces, with reticulated redness and denuded patches.
Diphtheria, commencing apparently in pharynx and extending upward.
‖Malignant forms of diphtheria.
‖‖Diphtheritis of larynx, or croup.*
‖After all other symptoms have passed off, great weakness and lassitude. θDiphtheria.
‖In cases where membrane forms back almost over larynx, *Bromium* removed husky tone of voice in a few hours. θDiphtheria.
‖Preference for l. side of throat. θDiphtheritis.
‖Stiffness of neck with diphtheritis.

---

* With apparent great sagacity one of our best authors says: "*Bromine* could not be a remedy in diphtheria and also in croup, as diphtheritis and croup are two diseases entirely different in their nature and character; a chief croup remedy cannot at the same time be a great diphtheritis remedy, because a drug has not only to cover the symptoms, but must likewise correspond to the character of the disease."

He quotes *Belladonna:* "Do we give *Bellad.* for headache in the full-blooded and robust and also in the bloodless and feeble?" We answer, yes, we do frequently. Every fully proved drug has produced such "opposite" states and also cured them, if only the other symptoms, particularly the characteristics, correspond to the case. We have nothing to do with the disease, only with the sick and the characteristics of each case.—C.Hg.

Google

[14] **Appetite, Thirst. Desires, Aversions.** Thirst seems to be wanting.
- ‖Desire for acids. θDiarrhœa.

Desire for acids, which aggravate symptoms and cause diarrhœa.
- ‖Aversion to customary tobacco smoking; it causes nausea and vertigo. θDiarrhœa.

Aversion to drinking cold water.

[15] **Eating and Drinking.** ‖After eating, nausea and pains in stomach better. θDiarrhœa.
- ‖Contractive spasm of stomach passing off after eating. θDiarrhœa.
- ‖Gastric symptoms better from black coffee. θDiarrhœa.

Headache after drinking milk.
- ‖After a meal, diarrhœa.

Worse from cold diet.
- ‖After acids: diarrhœa; cough worse.
- ‖After eating oysters, diarrhœa.

Worse from tobacco smoke, cough.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough and nausea.

Eructations: empty; tasteless; tasting like foul eggs; with vomiting of mucus.

Nausea and retching, better after eating.
- ‖Nausea. θDiarrhœa.

Vomiting of bloody mucus.

[17] **Scrobiculum and Stomach.** ‖Emptiness of stomach. θDiarrhœa.
- ‖Feeling of emptiness in stomach; better after eating, for which, however, he had no longing.
- ‖Feeling of heaviness in stomach. θInflammation of stomach.

Contractive cramp in stomach at 11.30 A.M., ceases after eating.
- ‖Pressure in stomach, like from a stone. θEmphysema.

Pain in stomach increased by pressure.

[18] **Hypochondria.** Pain in region of liver.

Stitches in hypochondria; also from r. to left.

Stitches shooting from liver towards navel.

Sensation as of a ball in l. hypochondrium.
- ‖Enlargement and induration of spleen. θAfter maltreated gonorrhœa.

[19] **Abdomen.** Griping and colicky pains.
- ‖Off and on a very strong pain and sore feeling in lower l. part of abdomen. θMental derangement.
- ‖Periodically much pain in l. hypochondriac and iliac regions; pain is violent, as if there were sore spots inside. θMental derangement.

Google

Pains in abdomen and small of back; passage of much flatus.

Tympanitic distension of abdomen, and passage of much wind.

Flatulence. θ Eczema.

Painless swelling of r. inguinal glands.

Pain in l. inguinal canal, especially on walking, pressure and coughing.

Eruption on perineum.

[20] **Stool and Rectum.** Croup of colon.

Black, fecal stools.

Yellow, green or blackish diarrhœa.

Stools: bright yellow, preceded by cutting and rumbling in abdomen; light yellow, slimy mucus; painless, odorless, like scrapings from intestines.

Diarrhœa after every meal ceases, but returns after oysters.

Diarrhœa: after every meal; at night.

Constipation: stool hard, tough, brown and glistening; breaks to pieces like sheep-dung.

Before stool: rumbling and cutting pain in abdomen.

During stool: much flatus; painful hemorrhoids; pressing in stomach and abdomen.

Blind, painful hemorrhoids during and after stool; < from cold or warm water; > from wetting with saliva.

Blind, intensely painful varices, with black, diarrhœic stools.

Varices < from application of cold and warm water. θ Diarrhœa.

[21] **Urinary Organs.** Continued desire to urinate, with tickling sensation in tip of urethra.

Frequent urination.

High-colored urine. θ Eczema.

Urine: scanty and dark; turbid, and deposits a whitish sediment adhering to vessel; leaves a red coating on vessel; contains large flakes of white mucus, like jelly.

Dribbling of urine, with burning after urinating.

[22] **Male Sexual Organs.** Increased sexual desire.

Nightly emissions.

Coldness of left testicle.

Hard, painless swelling of left testicle, painful when driving.

Swelling of testicle, remaining after gonorrhœa three months ago, size of a hen's egg, oval round, somewhat hard, not very sensitive to pressure, smooth; pains most when driving; *Brom.*[3] in water, three times daily, helped in three weeks, while working as a coachman.

Google

Swelling and induration of left testicle, with sore pain, or sensation of coldness.
‖Swelling of scrotum. θChronic gonorrhœa.
Stitches in glans and sides of penis.

[23] **Female Sexual Organs.** ‖Continual dull pain in region of l. ovary; mild fluor albus; no thrill in coition; childless after eight years marriage; strong woman, æt. 30; conception in three months.
‖Considerable pain in back and ovarian region. θMental derangement.
‖Constant, dull, boring pain in ovary. θDropsy.
Hard swelling in ovarian region.
‖Swelling and hardness of l. ovary.
Swelling of ovarian region before and during menses.
‖Uterus descends about 2 inches. θMental derangement.
Menses too early and too profuse; bright red blood; passive flow with much exhaustion; ‖membranous shreds may pass.
Headache on appearance of menses.
‖Fulness in head and chest, with difficult respiration a few days before catamenia.
‖Indescribable, queer ill feeling all over, which makes her low-spirited, a few days before catamenia.
Violent contractive spasm before or during menses, lasting hours; leaving abdomen sore.
Before menses: stitches in abdomen; backache; feeling of weakness and want of appetite.
‖During menses: pain in abdomen and small of back; abdominal cramps, with subsequent soreness in abdomen; frontal pain, feeling as if eyes would drop out while stooping.
‖Suppression of menses. θScirrhus mammæ.
‖‖Loud emission of flatus from vagina. θDysmenorrhœa.
Vagina painful, as if sore.
‖Much itching in vagina. θMental derangement.

[24] **Pregnancy. Parturition. Lactation.** ‖Stitch pains from mammæ to axillæ, cannot bear pressure. θScirrhus.
‖Hard, uneven tumor in r. mamma, firmly adherent to its surroundings, with lancinating pains; < from least pressure and at night.
‖Cancer mammæ, open, with swelling of axillary glands; stitches and burning in indurated parts; in alternation with *Conium*.

[25] **Voice and Larynx. Trachea and Bronchia.** Wailing and crying in a hoarse tone.
‖Hoarseness.
‖‖Chronic hoarseness.
‖After overheating, hoarse for six weeks; morning,

Google

aphonic, until after long coughing, with a whistling sound, some phlegm comes up. θCold after overheating.

‖Husky tone of voice. θDiphtheria.

Voice: husky; hoarse, cannot speak clearly, loss of voice; weak and soft, with raw, scraped feeling in throat.

‖Hoarseness several days; rough, dry cough; pain in larynx; in sleep difficult (snoring) breathing; jumping up for want of breath while eating and drinking; inhalation with a rushing sound. θCroup.

‖Hoarseness; larynx painful; barking, dry cough; a long drawn out, buzzing inhalation; hot, moist skin. θCroup.

‖Hoarseness; aphonia; snoring inhalation; no cough; relapse, with barking cough; rattling; suffocation; cold sweat. θCroup.

‖Voice hardly audible. θCroup.

Hoarseness, aphonia; worse in evening.

‖Spasm in glottis.

‖Stenosis of glottis.

‖Laryngitis; tracheitis.

‖On swallowing saliva a stitch in posterior portion of larynx, with a feeling of contraction.

‖Tickling in larynx, with irritation to cough; constrictive sensation deep in throat and dry cough.

‖Constriction in larynx.

‖Sticking constriction in larynx.

Sensation of smoothness and emptiness, at a small spot in larynx.

‖Scraping and rawness in larynx, provoking cough.

‖Scraping in larynx provoking dry cough in evening.

‖Cold sensation in larynx, with cold feeling when inspiring, after breakfast; > after shaving.

‖‖Sensation of coldness in larynx.

Soreness in larynx and roughness in throat.

‖Constant sore pain in larynx. θCold after overheating.

Larynx painful to touch.

‖Beginning in larynx, coming upward, with hoarse and croupy cough; low pulse. θDiphtheria.

‖First bronchia, then larynx; slow cases of croup; large tubes have been coughed up. θCroup.

‖Sensation as if air tubes were full of smoke. θCatarrh.

Anxiety as from a foreign body in windpipe.

Contracted sensation internally, in trachea, or feeling as if pit of throat was pressed against trachea.

‖‖Rattling of mucus in larynx on coughing; cough having a croupy sound. θDiphtheria.

‖Rattling of mucus without choking. θEmphysema.

Tickling in trachea on inspiring, which causes cough.

Google

‖Bronchia much irritated. θCroup.
‖‖When disease commences in larynx and comes up into fauces, and in some cases in which it runs down into larynx, and produces a croupy cough, with much rattling of mucus. θDiphtheria.
‖‖No choking in cough as there is in *Hepar*. θCroup.
‖‖Much rattling in larynx during breathing, still more when coughing; danger of suffocation from too much phlegm in larynx (*Tart. em.* has rattling lower down in chest). θCroup.
‖Inspiration very difficult, larynx drawn down; thorax not moving; respiration frequent; rattling; sawing; voice not audible. θCroup.
‖Cough hoarse, crowing, suffocative; breathing sawing, whistling; face red, hot; large drops on forehead; < bending over; scrofulous girl, æt. 5. θCroup.
‖Croup: spasms of larynx; suffocative cough; hoarse, whistling, croupy sound, with great effort; rattling, wheezing; gasping, impeded respiration; heat of face; formation of a false membrane in larynx to trachea; much rattling in larynx when coughing.
‖Membranous formation in larynx and trachea. θCroup.
‖Membrane forming back almost over larynx. θDiphtheria.
‖‖Croupous inflammation formed by exuberent growth of fungi. θDiphtheria. See 13.

[2] **Respiration.** Sensation of constriction impedes respiration, with dry, tickling cough.
Oppression of chest, with palpitation.
‖Oppression of breath immediately after taking it, with deep inspiration, together with a sensation as if he did not get enough air into chest, on account of which he elevates thorax and inspires forcibly.
‖Breathing frequent, rattling, sawing. θCroup.
‖Deep, forcible inspiration is necessary, from time to time.
‖Inspiration very difficult; larynx is drawn down; thorax immovable. θCroup.
Worse from a deep inspiration: cough.
Difficult breathing; must sit up in bed at night.
‖Difficulty of breathing; cannot inspire deep enough.
‖Sensation as if air passages were full of smoke.
Gasping for breath, with wheezing and rattling in larynx, and spasmodic closure of glottis.
‖Gasping and snuffing for breath, with wheezing and rattling in larynx. θSpasm of glottis.
‖‖Constriction in chest, with some difficulty of breathing; no cough. θMental derangement.

Google

‖An asthma in a girl, æt. 16, had remained for ten years after measles, so that she was never able to walk rapidly nor ascend steps without being very much exhausted, disappeared after five doses of five globules of the 30th, which she took for proving.
‖Tightness of chest. θAsthma.
‖Asthma < at night.
‖‖Asthma of sailors, as soon as they "go ashore."
Respiration, with dry sound.
Attacks of suffocation as if from vapor of sulphur.
Great dyspnœa.

[27] **Cough.** ‖Rough, barking, crouplike cough, with suffocative feeling like sulphur smoke; breathing painful; gasping for air; convulsions; great weakness. θWhooping cough.
‖Whooping cough, with croupish hoarseness of cough.
‖‖Symptoms of croup during whooping cough.
‖Much fatiguing cough, with scanty, difficult loosened sputa of white, whitish-yellow or yellow phlegm; later also several times pure, dark, coagulated blood. θCold after overheating.
Barking cough; tickling in throat.
Cough night and day, sounds loose, but no expectoration; aggravation from exercise and on entering a warm room.
Dry, spasmodic, wheezing cough, with rattling breathing.
‖Difficult, whistling cough, with hoarseness. θCroup.
‖Cough gets much < from dust or cold air. θCold after overheating.
Cough excited by: tickling in larynx; scraping and rawness in larynx; ‖deep inspiration; violent motion.
‖Cough, with sudden paroxysms of suffocation on swallowing; respiration very short; obliged to catch for breath.
‖Cough, with excruciating pain and anxiety; purulent, sometimes bloody expectoration; pulse 120; respiration 30; temperature 100. θPhthisis.
‖‖Sputa not frequent.
During cough: feeling like sulphurous vapor in throat; whistling inspiration; sore pain in chest; dulness and pressing headache; watering and contraction of eyes.
Sweat after paroxysms of cough.
‖Catarrhal cough.

[28] **Inner Chest and Lungs.** Sensation of constriction impedes respiration, with dry, tickling cough.
Stitches in upper part of chest.
‖Stitches in chest; inflammation of lungs, r. side. θCroup. θDiphtheria.

Google

‖Affections begin with bronchi and ascend to larynx.
Sensation of weakness and exhaustion in chest.
Pressure in upper part of chest.
Sharp stitches in r. side of chest, especially when walking rapidly.
Sticking pain in l. side of chest towards arm.
‖Cutting pains running upward. θPhthisis.
Right lung most affected.
Paralytic drawing pain through l. chest, towards scapula and into l. arm.
‖Hepatization of lower lobes. θPneumonia.
‖After much cough with loose, bluish, granular expectoration, attacks of dyspnœa for several days, breathing difficult, laborious, short; cough becomes dry; in region of stomach, pressure and tension; breathing noisy; skin bluish, especially on hands; asthma forces her to sit up in night; sensation of being beaten all over. θEmphysema.

[29] **Heart, Pulse and Circulation.** ‖Anxious feeling about heart. θMental derangement.
Violent palpitation of heart; she cannot lie on r. side.
‖Unbearable, violent cutting, l. side under last ribs, from below upward, as if it would kill her; old woman. θOssification of valves.
‖Violent cardiac pain and palpitation, with headache deep in under crown of head; lameness of l. arm.
Violent palpitation of heart in evening, so that she cannot lie on l. side.
‖Cutting pains running upward. θHeart disease.
‖Pulse very soft. θDiphtheria.
Accelerated pulse.
‖Pulse small, weak, not countable. θCroup.

[30] **Outer Chest.** Tearing in l. clavicle.
Pressure below l. clavicle.
Pressure in sternum.

[31] **Neck and Back.** Forcing pain in temples and neck, obliged to press neck to obtain relief. θEczema.
Stiffness of neck; in morning.
The l. side of neck is stiff and painful.
‖A goitre, already increased to size of a hen's egg, with a girl, æt. 14, who had menstruated one year, blonde, lively temperament, delicate constitution, disappeared within 16 weeks; 30th in water, twice a day.
‖An obstinate goitre, not changed by *Iodum* in substance, disappeared after *Brom.* 30th, in water, twice daily for three months.
‖Glands of neck much swollen. θEczema.
‖Two encysted tumors on both sides of neck.

Google

Aching pain at inner border of l. scapula up to neck, on moving l. arm or sitting leaning to left.
Boring in spinous processes of different vertebræ.
Wandering, pressive pain in dorsal muscles below scapulæ.
Tearing in r. lumbar and dorsal muscles; < by moving these parts.
Sore pain in small of back, unchanged by motion.

[32] **Upper Limbs.** Severe, rheumatic, dull, constrictive pain in r. shoulder and thence into arm, while walking in open air.
Stitches in r. shoulder, axilla or elbow.
Great restlessness and jactitation of arms.
Left arm feels paralyzed.
Weakness of arms.
Tearing in arms, especially in hands and fingers.
Icy cold forearms or only cold hands.
❙Eruption on r. elbow. θEczema.
❙❙Icy cold forearms. θDiarrhœa.
❙Hands cold and moist.
❙Cold hands. θDiarrhœa.
Boils on arms.
πProfuse, moist eruption in armpits and perineum. θEczema.
❙❙Drawing pain through l. breast into l. arm.

[33] **Lower Limbs.** Pain in l. knee and hip.
Pressive bone pain in l. leg.
Weakness of l. leg.
Paralytic sensation in r. leg.
Pain in both knee joints.
Pressive pain in r. knee, like in bone.
Boring pains in one, or both tibæ.
When stepping, violent pain in middle of ball of l. foot, as if one had stepped on a hard body, with paralyzed sensation in knee joint, and somewhat in hip.
Pressure and pains in feet and toes.

[34] **Limbs in General.** Great stiffness in all the limbs at 11 A.M., better in afternoon.
Pains in limbs, alternating with chilliness and heat.
Lameness in all joints, l. side.

[35] **Rest. Position. Motion.** Rest: throbbing in head better.
Can lie on neither side: palpitation.
Sitting up: asthma better.
Sitting leaning towards l.: ache in scapula.
Bending over: breathing worse.
Stooping: throbbing in head worse.
Moving l. arm: ache in l. scapula.
Motion: throbbing in head <; tearing in r. lumbar and dorsal muscles worse.

Google

Walking: pain in l. inguinal region <: stitches in chest <; pain in shoulder.
Exercise: cough <; sweat.
Stepping: pain in ball of l. foot.

[36] **Nerves.** ‖Nervousness. θEczema.
Convulsions.
Great weakness.
Tremulousness all over; great languor and debility, worse after breakfast.
‖Great weakness and lassitude after all the symptoms have passed off. θDiphtheria.
‖Much prostration. θCroup.
‖Fainting. θDiphtheria.
‖Subject to hysterical attacks, with fits. θMental derangement.

[37] **Sleep.** Yawning and sleepiness.
‖Continued yawning with respiratory troubles; child yawns frequently and is drowsy. θCroup.
‖Very much inclined to sleep.
Irresistible drowsiness while reading.
Dreams: vivid; of ascending a height; climbing a steep; journeyings; quarrels; dying; coffins and funerals.
Jumping up, out of sleep, with whistling breathing.
Starts from sleep with cough; drink relieves it.
Awakes unrefreshed, seems impossible to rise.

[38] **Time.** Morning: pain in gums; water tastes salty; sweat in bed; stiffness of neck.
11 A.M.: great stiffness of all limbs.
11.30 A.M.: cramp in stomach.
Day: cough worse.
Afternoon: stiffness of limbs better.
Towards evening: pain in bones of head.
Evening: when alone, felt as if he would see something if he should turn around; hoarseness <; aphonia <; scraping in larynx causes dry cough; palpitation worse.
Night: agglutination of eyelids; diarrhœa; seminal emissions; mammary tumor <; must sit up in bed from difficult breathing; asthma <; cough; asthma forces her to sit up.
Day and night: cough.
Symptoms < first part of night, are > after midnight.

[39] **Temperature and Weather.** Heat of sun: heaviness in sinciput.
Open air: pain in r. shoulder.
Cold air: cough worse.
Cold water: decayed teeth sensitive.
Cold diet: symptoms worse.
Cold or warm washing: blind piles worse.

Google

Wetting with saliva: blind piles better.
Entering warm room: cough worse.
Damp weather: pain in bones of head.
‖Desire for open air.
On shore: sailors suffer with asthma.

[40] **Fever.** Chill on alternate days, with cold feet.
Chill every other day, shaking, yawning and stretching.
Hands cold and moist.
Chilliness with shuddering.
Violent shivering with yawning and stretching; head confused; drawing in l. tibia down to ankle, whereby foot becomes quite cold; this is repeated every other day, as a chilliness with cold feet.
‖Skin cool, covered with viscous sweat. θCroup.
Internal burning heat, like between skin and flesh.
Sweat on palms.
Sweat from least exertion or exercise.

[41] **Attacks, Periodicity.** ‖Periodical pains. θScirrhus of mammæ.

[42] **Locality and Direction.** Right: grey point before eye; lachrymation of eye; ringing in ear; nostril stopped up; headache extends to nostril; cancerous ulcer between eye and ear; heat of cheek first; boring pain going to or on side of lower jaw; swallowing painful side of fauces; swelling of inguinal glands; tumor in mamma; inflammation of lung; stitches in side of chest; cannot lie on side; tearing in lumbar and dorsal muscles; pain in shoulder; stitches in shoulder, axilla or elbow; eruption on elbow; paralytic sensation of leg; pain in knee.
Right to left: stitches in hypochondria.
Left: pain in iliac region; pain over eye; pressure in temple; headache of side; darting through eye; stitches in upper eyelid; swelling and suppuration of parotid; nostril stopped up; swelling articulation of jaw; swelling of submaxillary gland; diphtheria <; sensation of a ball in hypochondrium; pain in lower part of abdomen; pain in inguinal canal; coldness of testicle; swelling of testicle; pain and hard swelling of ovary; stitches in side of chest; paralytic drawing pain through chest towards scapula, and into arm; cannot lie on side from palpitation; lameness of arm; tearing of clavicle; side of neck stiff and painful; arm feels paralyzed; drawing pain through breast into arm; pain in knee and hip; pain and weakness in leg; pain in ball of foot; lameness of all joints of side; drawing in tibia.
Left to right: scirrhus of mammæ.

Google

Below upward: diphtheria extends from larynx.

Sensations. As from cobwebs on face; as if vertigo would come on, or as if she would lose consciousness; as if eyes would drop out when stooping; as if pit of throat was pressed against trachea; as of a ball in l. hypochondrium; as if air passages were full of smoke; as if he did not get air enough into chest.

Cutting: in chest; in cardiac region.

Darting: through l. eye.

Lancinating: in mammary tumor.

Stitches: in l. upper lid, throbbing, to forehead and l. temple; in ear; in hypochondria; from liver towards navel; in glans and side of penis; in abdomen; from mammæ to axillæ; in indurated parts; in larynx; in chest; in r. shoulder, axilla and elbow; in skin.

Shooting: in upper lip.

Sticking pain: in chest towards arm.

Prickling: in skin.

Stinging: in tip of tongue.

Boring: lower jaw; in ovary; in vertebræ; in tibia.

Tearing: in l. clavicle; in r. lumbar and dorsal muscles; in arms.

Drawing: through l. breast into arm.

Paralytic drawing: through l. chest to scapula and arm.

Forcing pain: in temples and neck.

Pressure: in forehead; in l. temple; in stomach; in upper chest; below l. clavicle; in sternum; in dorsal muscles; in bones of l. leg; in feet and toes.

Burning: in ears; through whole body; under tongue; in mouth, œsophagus and stomach; in fauces; in indurated parts.

Scraping: in throat; in larynx.

Soreness: about nose; in fauces; in lower abdomen; in testicle; in larynx; in small of back.

Rawness: in larynx.

Tickling-smarting: in face.

Puckered sensation: in fauces.

Contraction: in trachea.

Constriction: in larynx; in chest; in r. shoulder.

Griping: in abdomen.

Cramp: of colon; in abdomen; during menses; in stomach.

Rheumatic pain: in r. shoulder and arm.

Dull pain: in l. ovary.

Undefined pain: over l. eye; in bones of head; in gums; in region of liver; in abdomen and small of back; in l. inguinal canal; in l. knee and hip; in knee joints; in r. knee; in vagina.

Google

Throbbing: in ears.
Fulness: in head and chest.
Emptiness: in stomach: in larynx.
Heaviness: in occiput; in stomach.
Smoothness: in larynx.
Stiffness: of neck; in limbs.
Crawling: in occiput.
Tickling: in tip of urethra; in larynx; in trachea; in skin.
Paralyzed feeling: in l. arm; in r. leg.
Weakness: in chest.
Coldness: of l. testicle; in larynx.
Heat: in mouth and œsophagus; in cheeks, face and head.
Itching: in vagina; in skin.
Dryness: on tongue; in mouth; in throat.
Lameness: in all joints.

" **Tissues.** ‖Suppuration of l. parotid gland, edges of opening smooth, ulcer unhealthy, discharge watery and excoriating; swelling remaining hard and unyielding. θAfter scarlatina.
‖Tonsils swollen after measles.
‖Tuberculosis.
‖‖Scrofulous swelling of glands, several already in suppuration; in water twice daily.
‖Enlargement of thyroid, in children with light hair, blue eyes and fair skin.
‖‖Swelling and induration of glands (thyroid testes, submaxillary, parotid).
Affections of glands, principally without suppuration.
Swelling and hardness, even ulceration, of l. parotid gland.
‖Emaciation. θCancer of mammæ.

" **Touch. Passive Motion. Injuries.** Touch: larynx painful.
Pressure: throbbing in head <; pain in stomach <; pain l. inguinal canal <; mammary tumor <; pain in neck better.
Scratching: lessens itching.
Shaving: cold sensation in larynx better.
Driving in carriage: l. testicle painful.
Riding horseback gives general relief.

" **Skin.** Tickling, itching, prickling and stitches in skin, at various places.
Pimples and pustules.
Boils on arms and in face.
Eruption on perineum.

" **Stages of Life, Constitution.** ‖Blue eyes; light hair; fair skin. θStruma. θCroup.
One case of cough with black hair and eyes, dark complexion, small and spare.

Google

Acts better, though not exclusively, on persons with light hair and blue eyes.

Increased embonpoint.

‖Children with thin, white, delicate skins, and very light hair and eyebrows. θCroup. θDiphtheria.

‖‖Blonde, red-cheeked, scrofulous girls.

‖Scrofulous boy, æt. 10, given up; 5th day of croup.

‖Woman, æt. 25, scrofulous, not married, menstruated regularly. θMental derangement.

‖Woman, æt. 27, married four years and no children; dark complexion and very lively temperament. θMental derangement.

‖Woman, æt. 35, losing too much blood every month; had no children.

Relations. Antidoted by: *Camphor*, ‖*Amm. carb.*, *Magn. carb.*, *Opium*.

Compare: *Apis*, *Arg. nitr.*, *Arsen.*, *Bellad.*, *Borax* (sterility); *Caustic.*, ‖*Chlorum*, *Cinchon.*, *Conium*, *Coffea*, *Cina*, *Cuprum*, *Fluor. ac.*, ‖*Hepar*, ‖*Iodum*, *Laches.*, *Lycop.*, *Mercur.*, *Phosphor.*, *Rhus tox.*, *Sepia*, ‖*Spongia*, *Sulphur*, *Tart. em.*

The celebrated springs of KREUZNACH owe their anti-scrofulous action to *Bromium*, as well as the *Iodum* contained therein.

Bromium has been useful in croup after failure of *Iodum*, *Phosphor.*, *Spongia*, especially in relapses, after *Iodum*.

Cured goitre after failure of *Iodum*.

In all diseases the choice between *Bromium* and *Iodum* may be decided by the former curing in the blue-eyed, the latter in the black-eyed.

Compatibles: *Arg. nitr.* (generally after *Bromium*, not before it); *Kali carb.* (emphysema).

PREFACE.

We herewith present to the medical profession Vol. III of *The Guiding Symptoms*, the completion of which we have found a labor of love.

Actuated, as we have been, by the spirit of the departed author, it has been our aim to complete the volume just as it would have been had Hering lived. At the time of his death, the first forms, containing *Bryonia*, had left the press; *Bufones*, *Cactus*, etc., had been prepared by him for the printer, and a day before his sudden death he was collating the materials of *Calcarea ostrearum*. Here his work of over fifty years was turned into hands he had trained and trusted, for the purpose of completing what he felt he would never see finished in this life, and yet hoped to in the next; for in his homely and quaint way he said, a few weeks before his departure, "Perhaps, from my place in Heaven, I may peep through a little hole and see that my work is well done!"

As soon as preliminaries were arranged, and his MSS. placed in our hands, we worked assiduously until the completion of the present volume, which is the fruition of our labors. Its earlier appearance was prevented by other exacting literary work and professional duties that demanded close application.

Digitized by Google

In respect to the dedication, it will be of interest to note that Dr. Hering left the following writing, which is quoted *verbatim:*

"*This third volume is dedicated by the author to*

DR. P. P. WELLS,

one of his oldest and dearest friends.

Why was not the first volume dedicated? It had been intended, and was promised, to be dedicated to our gifted

CARROLL DUNHAM,

but he had been called away, and his place remained empty.

Why was the second volume not dedicated? At that time, after the unexpected demand for a second edition of the Condensed Materia Medica, it seemed very uncertain whether an exhaustive work would ever be wanted by the profession; but the demand for our third volume makes it no longer doubtful.

As this country never forgets pioneers, let our names go together in history, until the time comes when Hahnemann's will be the predominating medical school."

As a motto for himself, his co-workers and all others, when he began the third volume, the ceaseless worker wrote:

"Individualize! and study our most valuable medicines in their monographies, picking them out here and there for comparison, but not in alphabetical order. Go on in that way, not omitting a day, until *Zinc.* will roof the building."

Digitized by Google

To the marks used in the present volume, we have nothing to add to the explanation given in Volume I, except that the character π has been used instead of Π, to denote symptoms produced while the sick were under medicinal action.

For many words of encouragement from numerous friends we have felt grateful, and among others we desire to thank Dr. E. A. Farrington for useful suggestions, and Drs. C. B. Gilbert, A. C. Rembaugh, Levi J. Knerr and Edward M. Gramm for clerical assistance.

GUIDING SYMPTOMS

OF OUR

MATERIA MEDICA.

BRYONIA ALBA.

White Bryony. *Cucurbitaceæ.*

The juice of the fresh root before flowering. Proved by Hahnemann and published in 1816 in second part of his Materia Medica; 208 of his own symptoms, 102 from students, Mishler, Homburg, Rückert and Stapf and one of Nicolai. In 1824, second volume of second edition: 537 of his own and 242 symptoms from others; additional provers are Hermann and Fred. Hahnemann. In 1833, third edition, 781 symptoms of the former. An unnecessary reproving was made by thirty-one Austrian physicians, many taking (as they did with *Aconite*) another species, the dioica; further additions by O. Piper, Lemke, Stow and Price, and a proving of the Jenichen[tm] by Berridge and some poisonings appeared in the journals.

[1] **Mind.** ‖Partial loss of consciousness. θHydrocephalus.
‖Unconscious, could not speak. θCholera Asiatica.
Stupefaction; weak memory.
‖So weak in mind that his ideas vanish as if he would faint, together with heat in face, especially on standing.
Confusion in head, with drawing in occiput, extending into neck before going to sleep.
Head confused and aching, as after a night's dissipation; does not wish to rise, morning on awakening.
Difficult comprehension.
‖Sees visions and faces when closing eyes. θTyphus.
Fancies; mental excitability.
‖Nightly delirium; delirious talk, especially about business, < after 3 A. M.

Google

Delirious, at daybreak.
‖Talking of business of day in his delirium at night. θDiarrhœa. θTyphus.
‖The patient desires to go home. θTyphus.
‖Desire to get out of bed and go home. θDiarrhœa.
‖Desire for things that cannot be had, which are refused, or not wanted when offered.
‖Irrational talk or prattle of his business.
Taciturnity.
Weeping mood, with headache and other complaints.
Great depression and very morose mood without any cause, quite contrary to his habit.
Great sense of insecurity, with mental depression.
‖Apprehensiveness; fearfulness.
‖Apprehensive; uneasiness and dread of future.
Anxiety and restlessness.
‖He became very anxious in room, > in open air.
‖Anxiety in whole body compelled him to do something constantly, wherever he went he found no rest.
‖‖Anxiety about future, particularly in childbed or after.
‖‖She fears not to have wherewithal to live.
Anxiety, worse in room, better in open air.
‖‖Anxious, peevish and hasty disposition.
Fear of death, which he thinks is near.
‖Fear of death. θPertussis.
Anxious feeling referred to sternum or cardiac region; pressing or painful sensation.
Easily startled, with headache.
‖Despair of recovery. θPertussis.
‖Great despondency; disinclined to think; exhaustion of intellectual powers.
‖Both mental and bodily quietness is required.
‖Mood irritable, weeping and morose; wishes to be alone.
‖Very irritable; inclined to fright, fear and vexation.
‖‖Very irritable; inclined to be angry; after getting angry, chilly or a red face and heat in head.
‖Peevishness; ill humor. θDiarrhœa.
‖Peevishness, irritability and violence. θPertussis.
‖Morose; everything puts him out of humor.
Contradiction easily provoked anger during whole proving.
Obstinate and passionate.
‖Mental exhaustion.
‖Somnambulism.
Restlessness: wants change; with fear of future; fear of death, which he thinks is near; with nocturnal heat.
‖Bad effects from mortification, violence and anger.
‖Ailments arising from chagrin, and other conditions, when attended with chilliness and coldness of body.

Digitized by Google

After having been angry, he is chilly; has red face and heat in head.
As consequence of fright: painful rigidity of limbs.

[3] **Sensorium.** Sensorium blunted.
‖Distracted state of sensorium.
‖Stupefaction of head.
‖Great confusion in head: especially in frontal region; after rising from bed; with drawing in occiput, extending into neck before going to sleep.
‖In morning, on waking, head confused and aching as if he had been drunk the evening previous; does not wish to rise.
‖Dizzy in morning, and weak in limbs whole day.
‖Dizziness on turning head, or on stooping.
‖Giddiness, especially when rising from a seat, or from a recumbent position.
‖Giddiness, with sensation of looseness in brain when stooping, and when raising up head.
Swaying to and fro.
‖In morning, on rising from bed, dizzy and whirling, as if head was turning in a circle.
‖‖Sensation in bed as if she was sinking deep down.
‖Tendency to run backward.
‖Vertigo: as though all objects were reeling; as though brain was turning around; as if head was turning in a circle; on rising, or on raising head; with reeling backward.
‖Slight vertigo on raising head after inclining it forward.
‖Vertigo like whirling if he sits up in bed, with nausea in middle of chest, as if faintness would ensue.
‖Vertigo as if one was being turned around, or as if everything whirled about when standing.
‖‖Vertigo conjoined with headache in occiput; < from motion.

[3] **Inner Head.** ‖‖Vertigo and confusion of head on slightest motion.
‖Pressive frontal headache very much < by stooping.
‖‖Pressing outward in frontal region and l. eyeball, especially on stooping, from above downward in evening.
‖‖Fulness and heaviness in forehead: as if brain was pressed out; with bleeding of nose; red, bloated face; < when opening or moving eyes; when stooping; in evening; from motion; > from closing eyes; from external pressure.
‖A pressive pain in forehead, so that he can scarcely stoop.
‖Pressive pain in forehead and occiput; < by motion.
‖Headache, as if everything would press out at forehead.
Pressive pain above l. eye, followed by dull pressive pain

Digitized by Google

in occipital protuberances, thence spreading over whole body; on quick motion, and after eating, pain so severe that it seemed a distinct pulsation within head.

Great fulness and heaviness of head, with digging pressure in direction of forehead.

Tearing across forehead, then in cervical muscles, then in r. arm.

Burning in forehead.

Headache in forehead and temples, with pressure from within out, and sensation when stooping as if everything would fall out of skull.

Pain in r. temple; a tensive twisting in single muscle fibres.

Pain in both temples, pressing from within outward.

‖Slight drawing in temporal bones, from above downward towards zygoma, especially on l. side.

Drawing, tearing pain in r. temple, mostly extending to upper molars and muscles of neck.

‖Drawing and tensive headache in temporal region.

Tearing in one (r.) side of head, extending into cheek and jaw bones; < from motion, touch and heat; > in rest and from external pressure.

‖Continued stitch deep in brain, on l. side, when coughing.

Sensible beating in vertex, with same and fulness in cranium in region of cerebellum.

‖Sensation of weight pressing on vertex.

Throbbing headache on top of head, morning when waking.

πSticking, jerking, throbbing headache, from forehead to occiput.

Headache in occiput, extending to shoulders, while lying on back in bed, after waking in morning.

Pressive pain in occiput, drawing down into neck, relieved towards noon.

‖In morning in bed, after waking, while lying upon back, headache in occiput, which extends to shoulders, like a heaviness when pressed upon a sore spot.

‖Severe shooting pains, extending to vertex or occiput; < at night or from motion of eye.

Sharp pain in l. occipital protuberance, coming and going suddenly.

‖Violent headache, like a great weight in head, as if he would incline it to either side, with pressure in brain from within outward, and great desire to lie down.

‖Headache, as if something pressed skull asunder.

‖Pressure and burning pain in head. θPertussis.

Pressure in head, as if brain was too full and pressed outward, mostly when sitting.

Digitized by Google

Headache, as if head would burst, with dry and parched lips.
Jerking, throbbing headache.
‖‖Stitches in head from forehead to occiput; on stepping hard.
‖Stitches in head. θPertussis.
Splitting headache.
‖‖Great heaviness of head and pressure of brain forward.
‖Congestive headache, as if forehead would burst open, with epistaxis.
‖Heat in head.
‖‖Rush of blood to head.
‖‖Apoplexy.
‖Encephalitis. θMetastasis of miasmatic or exanthematous diseases.
‖Headache commences in morning, not on waking, but when first opening and moving eyes.
‖Headache as though head would burst, commencing in morning and gradually increasing till evening.
‖Headache, as after revelling at night.
‖Headache in morning, after rising; a twitching-drawing in malar and maxillary bones.
‖In morning, before breakfast, pain as if head was compressed, with heaviness in it, mingled with stitches; she could not raise eyes on account of pain, and if she stooped, she could not rise.
Headache after every meal.
‖‖Headache after washing himself with cold water when face was sweating; in such cases opening eyelids increases headache.
‖Always on coughing motion in head like pressure.
‖‖Headache when stooping, as though all contents of head would issue from forehead.
‖‖Headache from ironing.
‖The headache is expanding, < by slightest motion, as the simple effort of opening eyes, by stooping, after eating, and when coughing, and often accompanied by nosebleed; > by pressure and closing eyes.
‖‖Headache from constipation; dull pain in forehead, and peculiar pressing sensation in temples.
‖Headache > by tying up head.
‖Obstinate headache with constipation; headache almost every day, beginning immediately after rising and increasing during day; < from mental exertion and coffee; frequent vomiting of a little bilious fluid; stools dry, hard, as if burnt.
‖‖Gastric, rheumatic and congestive headache, characterized by vertigo, heaviness of head, pressure in head and rush of blood to head.

Digitized by Google

‖‖Rheumatic headache in cold, raw, wet seasons.
‖Hemicrania; hysterical headache.

Outer Head. A small painful spot on forehead.
Increase of pain under vertex, with soreness of scalp, just over same; painful soreness of vertex, it feels bruised.
‖Burning on vertex near forehead.
‖Heat of head: in morning; with dark red face; with coldness of rest of body; with much thirst and pain in limbs when moving them; < in evening.
‖Tension and tearing in external head, < from motion, touch, and in a warm room; > lying quiet and on painful side.
‖Scalp very tender to touch; child cannot bear even a soft brush. θDandruff.
‖Soreness in occiput and behind ears; < from touch and in dry weather; > lying on painful side and after sweat.
‖Oily, greasy, sour-smelling perspiration on head (and whole body) during sleep, especially towards morning.
‖Hair seems very greasy, with a cool head; hands become fatty while combing hair.
‖Dandruff; scalp rough and uneven.
Burning heat or cold sweat on head.
‖Coldness on vertex, with cold hands, chilliness, inner heat and disagreeable throbbing through whole body.

Sight and Eyes. ‖Dread of light. θIntermittent.
Aversion to light, particularly sunlight.
Optical illusions in bright or prismatic colors; appearance of all the colors of the rainbow; every object seemed covered with them.
Letters run together when reading.
Eyes sparkling; watering; dull or glassy.
Dim vision.
‖A bluish haze appeared before vision, (vision $\frac{20}{50}$) with severe pain over eye like a needle going through eyes and head (compelling her to go to bed), with heat through whole head, < by stooping. θHyperæmia of optic nerve and retina.
Very sensitive pressive pain (coming and going) in l. eyeball, especially violent on moving ball, with a feeling as if eye became smaller and was retracted.
‖Eyes very sore, feel as if pressed out of head.
‖Eyeballs excessively painful, cannot bear to have them touched.
‖‖Ciliary neuralgia; pains very sharp and severe, making patient scream out; pains < by opening eye and any motion of ball; eyes must be kept closed and at rest; pains usually sharp, passing through eye into head or

Digitized by Google

from eye downward into malar region and thence backward to occiput; seat of pain becomes sore as a boil, least exertion, talking, moving or using eyes, aggravates.
Stitches in eyes.
‖Soreness and aching of eyes when moving them.
‖Pressing, crushing pain in eyes, < on motion.
Burning in eyes and edges of lids.
‖Sensation as if there was sand in eyes; pressure.
Aching and pulsation in l. orbit.
Inflammation of eyes, aggravated by heat.
‖Inflammation of eyes and lids, especially in newborn infants and gouty subjects.
‖Inflammation of eye, redness, photophobia, at same time violent pains in teeth and face; < from warmth and > by cold.
‖Inflammation extends to choroid; opacities in vitreous; iris tremulous; great ciliary injection; pus in anterior chamber; eyeball sore on moving, darting pains from l. eye through head, with heaviness of head afternoons. θAcute irido-choroiditis.
‖Rheumatic iritis, caused by cold, with steady aching pain in back part of eye, extending through to occiput; < at night and on motion.
‖Choroiditis uncomplicated with iritis, especially in serous or exudative forms.
‖Eyeball feels full, as if pressed out, with sharp shooting pains in eye and head, < at night. θGlaucoma.
‖Periodical inflammation of eyes, with colic.
‖Burning redness of eyes. θRheumatic attack.
Painless twitching and drawing together of l. upper lid, with sensation of heaviness therein.
Puffiness of r. upper lid.
‖Swollen eyelids, especially the upper. θPertussis.
‖Lids swollen and puffed.
Burning in eyes and edges of eyelids.
‖Itching and burning of margin of lids.
‖Dry burning-itching tetters on lids.
‖Scalding in corners of eyes aggravated at night.
Frequent lachrymation.
Severe burning and lachrymation of r. eye.
Morning, agglutination and frequent lachrymation.
‖Discharge of mucus from eye, obstructing vision.
‖Rheumatic inflammation of eyes.

Hearing and Ears. Intolerance of noise.
Ringing; roaring; humming or chirping.
Roaring, humming in l. ear, resembling pouring of water over a dam.
Head feels light, with constant wabbling in both ears.

Digitized by Google

‖Discharge of blood from ears. θVicarious menstruation.
Feeling of stoppage in ears.
‖Obstruction in external meatus.
Swelling, redness, painful sensitiveness and heat of external r. ear; at times piercing stitches deep into ear; swelling and painfulness of r. parotid gland, especially sensitive to even slight touch of steel bows of spectacles.
‖Otorrhœa following inflammation.
Complaints predominating in external ears.
‖Boil in front of ear.
‖Threatening suppuration of parotid.

[7] **Smell and Nose.** Frequent sneezing.
When coughing, sneezing twice.
Sneezing between coughs.
Loss of smell.
‖Nosebleed in morning after rising; less frequently during day, but sometimes during sleep.
‖Bleeding of nose, especially in morning, with suppressed menstruation.
‖Nosebleed. θPertussis.
‖Nosebleed in morning awakening from sleep; blood florid. θVicarious menstruation. θScarlatina.
‖‖Epistaxis and checked menses, or in place of catamenia with other menstrual derangements.
Dry cold in head.
‖Dry nasal catarrh. θPertussis.
Fluid, thin, light-colored discharge from r. nostril.
Catarrh extending to frontal sinuses or into chest.
Fluent coryza, watery or greenish.
‖‖Fluent coryza, beginning with violent frequent sneezing; also stitching headache when stooping, with hoarseness.
Profuse coryza without cough.
Swollen nose with inflamed nostrils.
Swelling of nose, with very sore pain when touched.
‖Swollen nose, with nosebleed for several days.
Inflamed and ulcerated nostrils.
‖‖Nose much swollen, with sharp pain; sore to touch.
Swelling of tip of nose, with twitching pain in it, and on touch feeling as if it would ulcerate.

[8] **Upper Face.** There is a motion, more or less constant, of jaws, as if chewing.
Pinching pressure in articular cavity of r. jaw, more violent on motion.
Dull aching, in alveoli of upper jaw, r. side, now jumping, then mild.
Twitching, tearing in r. malar bone up to r. temple, externally sore to touch.
Painful pressure under r. cheek bone > by external pressure.

Digitized by Google

Bloatedness, or swelling of face.
‖Face swollen, even to closing eyes.
‖Red, burning, hot face.
‖Red spots on face and neck.
Red, round, hot spot on cheek, over malar bone.
Face bluish-red, with difficult inspiration.
Hot, bloated, red face.
‖Face red, hot, puffed. θPertussis.
Yellow paleness of face, or livid color.
Nodosities, indurations and boils on face.
‖Tetters in face; after washing, red and smooth.

[9] **Lower Face.** Complaints predominate on lower jaw and lip.
‖Drawing and tearing pain, from temple down to malar bone and lower jaw. Compare prosopalgia. θTrismus.
Twitching in both corners of mouth.
‖‖Constant motion of mouth, as if chewing. θBrain affections of children.
‖Upper lip and nose swollen, red, and hot.
Lower lip dry, black, thickly incrusted, everted and very sensitive.
Lips dry, swollen, cracked. θDiarrhœa. θTyphus.
‖Mouth and lips very dry.
‖‖Dryness of lips and tongue, with thirst, drinking much at a time, but not often.
‖Great dryness of lips, of tongue and of hard palate, while tip of tongue was moist.
‖‖Parched and dry lips, likes to moisten them often; mouth dry; very thirsty for cold water.
‖‖Lips parched, dry and cracked.
‖‖Children pick lips. Compare *Rhus tox.*
‖Lips cracked and bleeding. θPertussis.
‖‖Lips swollen, with a biting, burning eruption.
‖‖Scrofulous, swollen lips.
‖Ulcerated lips.

[10] **Teeth and Gums.** ‖Toothache about 3 A.M., as if an exposed nerve in a hollow tooth was paining from cold air, < lying on painless side, goes away if one lies on painful side.
‖In evening, in bed, jerking toothache, now in upper, now in lower back teeth; when pain is in upper teeth and they are pressed by tip of finger, pain suddenly ceases and changes to corresponding lower teeth.
‖Jerking toothache when smoking.
‖Drawing, at times jerking toothache in l. upper back teeth, only during and after eating, when teeth seem too long and wobble.
‖Pain as if a tooth was screwed in and then pulled out,

Digitized by Google

> by cold water, > on walking in open air, together with tearing in cheeks and pinching in ears, at night till 6 A.M.

‖ Drawing, jumping toothache when eating, just after eating, or evening in bed; < from warmth.

Darting, or flushing pain in teeth.

Toothache from an exposed nerve; sensitiveness of decayed teeth to contact of air.

‖ Teeth feel too long and loose.

‖ Tearing, stitching toothache while eating, extending to muscles of neck, < by warmth.

‖‖ Toothache shooting from one tooth to another, or into head and cheeks.

‖ Worse from brushing teeth. Compare *Staphis.*

‖ Toothache on introducing anything warm into mouth.

‖‖ Toothache > by cold water, or lying on painful side.

‖ Toothache < from smoking or chewing tobacco; from taking anything warm into mouth.

‖ Teeth and gums sore.

‖ Painful swelling of gums.

‖ Aching of gums with teething children. Similar to *Dolichos.*

Teeth are loose.

Toothache: shooting from one tooth to another, or into head and cheeks; from an exposed nerve (sensitiveness of decayed teeth to contact of air); pain < from smoking or chewing tobacco, from introducing anything warm into mouth; >, momentarily, by cold water, and when lying on painful side.

" **Taste and Tongue.** ‖ Loss of taste.

‖ Taste: flat, insipid, pasty, sweetish, putrid, sickly, disgusting, nauseous, ‖ bitter.

‖ She has almost no taste for food; when not eating, mouth is bitter.

‖ Bitter taste remains in posterior part of palate after dinner.

‖ Everything tastes bitter; cannot swallow food.

‖ Taste bitter or putrid, with offensive breath.

‖ Nauseous, bitter taste in mouth in morning.

‖‖ Dry tongue.

Trembling of tongue.

‖ Great dryness of tongue, mouth and lips. θ Constipation.

‖ Tongue dry, rough, cracked and dark brown.

Dryness of tongue, with sensation of prominent papillæ.

Dryness of lips, tongue and hard palate, while tip of tongue is moist.

‖ Small aphthæ on tip of tongue.

Fine pricking in anterior third of tongue.

Google

Tongue coated greyish, or thickly yellow, with lips dry and cracked.
Tongue thinly coated yellow, with sunken raphe, or longitudinal fissure.
White tongue with red edges.
Tongue dry and red, brown, white or yellow. θDiarrhœa.
Tongue thickly coated white. θDiphtherits.
Tongue coated white or yellow, especially in middle.
Very much furred tongue.
Dark brown colored tongue.
Tongue viscous, bilious.
Dry, white, filthy tongue. θRheumatic attack.

[13] **Inner Mouth.** Offensive smell from mouth, with hawking of offensive tough mucus, sometimes in round cheesy lumps, size of pea.
Bad odor from mouth, as of the monthly.
Accumulation of frothy, soaplike saliva in mouth and throat, which, at times, almost chokes patient. θTyphoid.
Accumulation of saliva in mouth. θPertussis.
Dryness in mouth, so that tongue sticks to palate.
Dryness in mouth, without thirst, or with thirst for large quantities of water.
Dry mouth during chills. θIntermittent.
Mouth and lips very dry; only momentarily relieved by drinking.
Dryness of mouth, tongue and throat.
Feeling of dryness in mouth. θDiphtheritis.
Aphthæ; with infantile diarrhœa; open fontanelles.

[14] **Throat.** A great deal of phlegm comes down from choanæ.
Scraping and roughness in back of throat.
Back of throat seems swollen; feels as if he had a severe coryza, which hinders him when reading.
Tough mucus in fauces, loosened by hawking.
Harassing, fatiguing hawking of mucus; fears he will suffocate; retching; cannot sleep; flighty; sees faces when closing eyes.
Sensation of pressure and fulness in throat.
Pressive pain in r. tonsil.
Slight pain in l. tonsil.
Stitches in throat when swallowing.
Sticking pain on swallowing, on feeling of throat, and on bending neck.
Itching needle-like stitches in throat (especially when walking rapidly), which irritate and cause scratching; disappear after scratching.
Stitches and scratching in throat. θPertussis.
Constant disposition to swallow, with sharp, stinging pain

Digitized by Google

in external parts (r. side), on a line with promontory of larynx.

‖Great dryness in fauces and throat, sometimes with burning.

Dryness of pharynx, with smarting just behind pomum adami.

|Feeling of numbness from stomach up through œsophagus, with diarrhœa and tenesmus.

Pain in throat; throat is dry and raw on empty swallowing; on drinking this sensation disappears for a short time, but soon returns; < in a warm room.

‖Crawling sensation in throat inducing a cough, followed by mucous sputa.

Sensation of swelling and constriction in œsophagus.

|Quickly prostrated; shuns all motion; complains on moving, or when being moved, of pain everywhere; white tongue; feeling of dryness in mouth without particular thirst or with desire for large quantities. θDiphtheria.

‖Aphthous patches on mucous membrane of mouth and fauces.

|Constitutional tendency to aphthous formations in throat.

14 **Appetite, Thirst. Desires, Aversions.** Too great appetite.

|Unnatural hunger for six days.

|Abnormal hunger; he must eat often.

Eats little and often.

Loss of appetite; thirst for cold water.

|Aversion to food.

‖Desires things, immediately, which when offered are refused.

|Desire for unusual things; acids, sweets, strong coffee, oysters, etc.

|Desire for acids.

|Hasty and eager drinking. θBrain diseases.

|Great thirst day and night.

|Great thirst (obliged to drink much cold water), internal heat without feeling hot externally.

‖Great thirst; desire for large quantities of cold water.

‖Thirst for large quantities at long intervals.

|Great thirst; she can and must drink a great deal at once; drink does not distress her.

Thirst during stool.

|Violent thirst for cold water; drinks a great deal at a time. θPertussis.

No appetite for milk; but if he takes it, the appetite therefor returns and he begins to relish it.

‖Desire for warm drink, and relieved by it.

Digitized by Google

‖Desire for cold and acid drinks. θDiarrhœa.
Aversion to greasy food.
‖‖Desire for things which are not to be had, or are refused when offered. θDiarrhœa.

[15] **Eating and Drinking.** Some complaints > on an empty stomach.
A great many symptoms directly after dinner and during first half of afternoon.
Almost always < after eating, particularly after a satisfying meal.
‖After eating, constricting pain in stomach, then cutting in epigastrium, followed by vomiting of food; < from motion.
‖After eating: sensation of weight in stomach, as of a heavy stone; eructations, flatulency. θGastric derangement.
Pressure in stomach after eating, especially after eating bread.
Snapping noises in l. side of stomach, as if victuals were pushed to l. side.
‖After eating oysters or chicken salad, tasteless eructations.
‖Sauerkraut, cabbage, potatoes and other vegetables, particularly nitrogenized foods, disagree.
‖Incarceration of hernia after eating cold fruit.
‖Nausea: on assuming an erect position; after eating; with waterbrash.
‖‖After eating: belching, tasting of food; diarrhœa.
‖Gastric derangement after old sausages, old cheese, cabbage, sauerkraut, fruit, turnips, salads, milk, etc.
‖Stomach distended with wind after eating, especially after oysters and chicken salad in evening.
Bitter vomiting when drinking immediately after a meal.
Distension of abdomen, especially after eating.
‖Worse after eating or drinking. θPertussis.
‖Spasmodic cough after drinking. θAphthæ.
‖Headache when drinking after being heated.
A glass of wine in evening caused heartburn.
Frequent drinking of cold water relieved bitter taste and inclination to vomit.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖‖Hiccough.
Hiccough after eating, on every shock caused by it pressure in forehead, as if brain shook from behind forward.
‖Frequent empty eructations, mostly bitter. θPertussis.
‖‖Bitter or sour belching with sour or tasteless waterbrash.
‖Eructations after eating, bitter, sour, or tasting of what has been eaten.

Digitized by Google

Shooting pain with belching.
‖Pressive pain, with continuous eructations and vomiting afterwards of greenish-yellow mucus; often by every step stomach is made very sensitive.
Heartburn from wine, evenings.
Profuse waterbrash and vomiting after eating.
Gulping up of food after every meal; sometimes sour.
‖Food is thrown up immediately after eating; constipation; lips dry and cracked.
‖Something bitter rises into mouth, without eructations, with nausea.
‖‖Nausea: in abdomen; in stomach and œsophagus; before stool; after meals eaten with relish; on waking in morning; increased or brought on by slightest motion, must lie quiet; desires to keep still, with splitting headache; with bitter eructations; when rising up and while sitting up in bed, has to lie down again; after eating, sometimes with vomiting of food, retained by keeping very quiet after meal; and vomiting in morning when waking.
‖Nausea. θPertussis.
‖Constant nausea and thirst. θConstipation.
‖‖Nausea and fainting on sitting up. θDiarrhœa.
After nausea: canine hunger.
‖‖Nausea and vomiting, morning and evening, chiefly water and mucus.
‖Nausea and vomiting during heat. θIntermittent.
Empty retching, with waterbrash.
Vomiting and belching.
‖Vomiting: of solid food, not of drink (pertussis); of food, immediately after eating; after eating bread; of food and a fluid consisting of mucus and bile, tasting very bitter; during stool; after drinking; bitter, when drinking immediately after meal; first of bile, then of food (pertussis); of food when coughing; sour with eructations; bitter, musty or putrid liquid, which leaves similar taste in mouth; of bitter substances, or of yellow green mucus (diarrhœa); of food, with hiccough and retching; of blood; during cholera season; of bile, with pain and heaviness in region of liver, radiating to r. shoulder.
‖Vomiting and rumbling after chills. θIntermittent.
After vomiting: sensation as if stomach was distended.
‖Gulping up of phlegm during night.
‖Severe stitches in l. side accompanying vomiting.

17 **Scrobiculum and Stomach.** Pain in pit of stomach.
Pressure in pit of stomach as if there was a stone in it; goes off with much eructation.
Pressure of fulness in pit of stomach; < by motion.

Digitized by Google

Pressure and stitches in pit of stomach and r. hypochonder. θIcterus.
Feeling as if pit of stomach was swollen.
Soreness in pit of stomach when coughing.
Sensitiveness of pit of stomach to touch and pressure.
Heat in pit of stomach; < during every inspiration.
Large abscess at pit of stomach after a blow.
Epigastric region painful to pressure.
Epigastric region painful to touch; cannot endure clothes.
Cutting as with knives in epigastric region.
Burning in stomach and pit of stomach, especially when moving.
Tension in pit of stomach, with feeling of heat.
Stitching pain in region of stomach; < from motion, especially from a misstep.
Stitches in stomach.
Stitching in stomach when lying on side; also in pit of stomach when making a false step.
Pains in stomach. θPertussis.
Gastric derangement from taking cold.
Stomachache with anxiety.
Burning in stomach and pit of stomach, especially when moving.
Stomach becomes extremely sensitive to touch or pressure.
Inflammation of stomach.
Swelling of stomach.
Stomach full and sensitive to pressure.
Sensation as though a stone lay in stomach; epigastric region painful to touch.
Gastralgia: with inclination to commit suicide; after a meal, or even while eating, patient complains of a pressure in pit of stomach as from a stone; > by eructation, < by motion and attended with constipation.
Pressure in stomach after eating, like from a stone; makes him fretful.
Pressure in stomach as soon as he has eaten, and even while eating.
Constrictive pain in region of stomach as if that part was rolled up into a ball; relief was obtained by drawing legs up against abdomen.
Distension of stomach and eructations of wind.
Feeling of emptiness of stomach, with distension of abdomen.
Numbness in stomach. See 13.
Painful tension of stomach, with soreness when touched. θRheumatic attack.
Burning in pit of stomach. θRheumatic attack.

Digitized by Google

| | Food oppressed stomach; felt like a wad at epigastrium: often food regurgitated.
| Pain excessive when in motion; perfect relief from quiet or from eructations of wind.
|| Gastric affections; dry mouth, tongue and throat, without thirst; tongue coated more in middle; giddy when stooping or rising; forehead heavy; face bloated or sallow, yellowish; taste bitter; food lies heavy, particularly bread; pit of stomach sore to touch, constipation, etc.
| Derangements of stomach, with gastric fever, chills and coldness.

All gastric symptoms easier when keeping quiet.

| Gastric affections in young girls.

[18] **Hypochondria.** | Burning pains along anterior connection of diaphragm with ribs.
|| Pressure in epigastrium; < after eating and when walking; sometimes extending to umbilical regions, even to bladder and perineum.
| Stitches and soreness in epigastrium and hypochondrium. θ Pertussis.

Tensive pain in region of liver.

|| Tensive, burning pain in hepatic region.

Tensive pain below false ribs in r. hypochondrium, especially sensitive on deep inspiration.

| Transient stitches in r. hypochondrium, with painful sensitiveness of this region to hard pressure or deep inspiration.
| Burning and stitching pain in hepatic region.
| Stitches in liver, when touching it, when coughing and breathing. θ Inflammation of liver.

Congestion of liver.

| Sticking pain in liver. θ Pertussis.

Pains in liver, mostly stinging or tensive and burning.

| Icterus.
|| Stitches most frequent in region of spleen.
| Stitching pain in spleen during chills. θ Intermittent.
| Hard swelling of spleen; crepitation on motion of legs; pain in l. heel; bronchial catarrh; in an old man.

[19] **Abdomen.** Tearing pain from hip through abdomen to epigastrium.

Nausea in abdomen.

Sudden painful cuttings in intestines, with a feeling as though one was digging him with fingers, compelling him to bend double, > by profuse pasty evacuations.

Dull griping and cutting in intestines, prior to passage of flatus; motion and standing increase pains.

Griping pains about navel.

|| Pains sticking and shooting in both sides of abdomen;

Digitized by Google

< from motion; changing into stitches from belly to stomach.
Stitches and other pains hinder respiration.
‖Stitches in abdomen. θPertussis.
Pains in abdomen flying upward.
‖Painless twitching in l. side of abdomen, between navel and l. flank, as of twitching in muscles of walls of abdomen, followed by sticking pains deep in l. side of back.
‖Pain on a limited spot in abdomen, dull, with a throbbing sensation. θEnteritis.
Slight, crampy, cutting pain, with heat in r. hypogastric region, < by every inspiration.
Slight colic at time of rising and through forenoon.
Colic < from motion.
‖Heat rising from abdomen into epigastrium and chest; with heartburn; < at night; with dry mouth and thirst.
Pain in abdomen, as if diarrhœa would ensue.
‖During colic, must keep very still; stools hard and dry, as if burnt.
All day long feeling in abdomen as though diarrhœa would set in; same sensation exists in anus.
Cutting pains before stool.
Colic before stool.
Movement of flatus produces pain.
Rumbling and gurgling in bowels.
‖Abdominal plethora.
‖Distension of abdomen and rumbling, especially after eating. θPertussis.
‖Sense of distension and actual swelling about umbilicus.
Great distension in abdomen towards evening.
Distended abdomen; continued motion in abdomen, colic, then constipation; feels as if something lay in abdomen.
Distension of abdomen > by passage of offensive flatus.
‖Bloated abdomen. θDropsy.
Great sensitiveness of abdomen.
‖Abdomen very sensitive, as if sore.
‖Tenderness of abdominal walls.
‖Peritonitis, with stinging, burning pains; abdomen very sore to touch, with constipation, especially if in a rheumatic subject.
‖‖Gastro-enteritis.
‖Hysterical spasms in abdomen.
‖Abdominal complaints from concussion or overlifting.
Pressing pain towards l. inguinal ring when sitting down.
‖Pain in inguinal ring tensive, going down thighs. θQuotidian fever.

Digitized by Google

Stool and Rectum. A sense of pressure, heat, weight and powerlessness of sphincter ani and rectum.

After attacks of colic, escape of wind.

Passage of offensive flatus.

All day long, discharge of flatus.

Constant, or rather frequent, short emissions of offensive flatus.

With passing of flatus, sensation as though a diarrhœic stool would come on.

Constant urging to stool, without succeeding. θEnteritis.

Urging to stool, followed by copious, pasty evacuations; with relief of symptoms, except that confusion of head remained.

Griping and pinching in abdomen and in region of navel, as after taking cold, for several days, and a profuse, thin evacuation follows.

Awaking in morning with colic and urging to stool; has to get up, stool follows. θIntermittent.

Fermentation in abdomen; almost impossible to retain stool. θDiarrhœa.

Involuntary stool while asleep.

Diarrhœa preceded by colic, at night or early morning, after rising and walking about; coming on so sudden, that escape is hard to prevent.

Slight pinching and moving in intestines, followed by watery stool; with passage of flatus; pinchings do not disappear, but are frequently repeated during afternoon: with a sensation of soreness in intestines, together with a dragging downward and outward; with two profuse watery evacuations in one hour; followed by a slight burning in anus.

Diarrhœa generally painful.

Colic with stool, like a constriction and griping with hand, which causes diarrhœa.

Bilious diarrhœa, with lancinating pain.

Loose stools, painless and undigested.

Frequent stools.

In morning a pasty, afterwards a liquid stool, of a strong odor; followed by burning and soreness in anus.

Very offensive, profuse stool.

Diarrhœa putrid, smelling like old cheese; worse (or only) in morning; during hot weather.

Very offensive, pasty evacuations.

Diarrhœa-like, bilious, acrid stools; soreness in anus, continuing eight days.

Bilious diarrhœa.

Stools like dirty water, with whitish granulated sediment of undigested food.

Digitized by Google

Brown, thin, fecal stools.
Thin, bloody stools.
Before stool: colic; nausea.
Vomiting and purging during cholera season.
Hard stool passed with great exertion, with confusion of head.
Much straining in order to get through defecation.
During stool: burning in anus; prolapse of rectum; motion like fermentation in abdomen; pain in stomach; vomiting; coldness and rigors; thirst; drowsiness.
During stool burning in anus. θDiarrhœa.
Diarrhœa-like stool followed by prickling and burning in anus.
Slight burning with evacuation of stool and urine.
A pasty evacuation with burning in anus, soon after waking; a second fluid stool in half an hour; urinated very often, much each time, when at stool.
After stool: burning in rectum; heat; sleepiness.
Urging followed by copious pasty evacuations, with relief of all symptoms excepting confusion of head.
Almost always better after stool.
With diarrhœa great weakness in morning and forenoon. θIntermittent.
Involuntary stools while asleep.
Diarrhœa especially at night and burning in anus with every passage.
Diarrhœa in morning, or worse in morning.
Diarrhœa in morning, after getting up, preceded by cutting pains in bowels.
Soft stool in morning.
Stools soft, getting thinner and thinner in morning after getting up till 10 A.M. θIntermittent.
Mush eaten at supper appears undigested in morning diarrhœa. θIntermittent.
Diarrhœa after eating fruit or sauerkraut.
Diarrhœa during a spell of hot weather.
Stool pasty with much flatus, followed by hard portions, and again by soft, so that he believed he would scarcely finish evacuation.
Stool very unsatisfactory, only after much straining, which caused a rush of blood to head, and a feeling of confusion in head.
Retention of stool, infrequent, large in form, solid; passing with difficulty, attended by prolapsus and burning.
Stools too large in size.
Hard, tough stool, with protrusion of rectum.
Obstinate constipation; stools very dry, large and hard, only passed after much straining.

Digitized by Google

Dry, parched stool passed with effort in morning.
Hard, black, dry and scanty stool.
Stools hard, dark and dry, as if burnt.
Chronic constipation, often causing severe headache; stools very hard and dry, often expelled with difficulty.
Constipation of sucklings and lying-in women.
In horses: dung in small balls (hard); alternate lameness and swelling of hock joints, especially if feet swell while at rest.
Constipation: tedious costiveness with difficult evacuation of small, hard stools, as if burnt. θRheumatic attack.
Two pasty offensive evacuations in afternoon, followed by burning in anus.
Sensation of plug in anus, at 6 A.M.
Burning pain in anus. θRheumatic attack.
Aching hemorrhoids.
Mucus and blood preceded by hard stool. θCholera infantum.
Burning at anus during stools.
Diarrhœa alternating with constipation.

Urinary Organs. Nephritis.
Pain in region of kidneys.
Urine: copious and pale; scanty and dark; white, turbid; brown, like beer; hot and red; deposits white sediment; hot, scanty and red.
While water passes, a cutting or a constriction in urethra.
Brickdust sediment in urine.
Great urgency, almost irresistible desire to urinate.
Frequent urination.
Urging to urinate from heavy lifting. θDyspnœa.
Pressure to urinate and involuntary discharge of urine.
Obliged to rise at night to urinate.
During exertion, urine passes involuntarily.
Urine frequent, but scanty, only exceptionally copious.
Between 6 and 7 P.M. urinated very often, much each time, when at stool.
Diminished secretion of urine; hot, red.
White, turbid urine.
Urine profuse. θIntermittent.
Small discharge of urine; hot, of dark color; when standing a short time becoming thick. θRheumatic attack.
Cutting in urethra; sensation of constriction while urinating.
Before urinating: burning and cutting.
During urinating: burning and constricted feeling in urethra; abdominal pains.

Digitized by Google

Burning, pressing, drawing and tearing in urethra.
‖Urine deposits a pinkish sediment, covering bottom of vessel.
‖During motion some drops of urine pass out of urethra without sensation.
‖Urine passed through night deposited a white sediment; its color was reddish-yellow.
‖Burning in urethra, when not urinating.

[22] **Male Sexual Organs.** Increased sexual desire.
Stitches in r. testicle and spermatic cord.
Stitches in testicles while sitting.
‖Gleet; burning; green discharge.
‖Red itching eruption on glans penis.

[23] **Female Sexual Organs.** ‖Severe pain in region of r. ovary, like from a sore spot, causing an irritation and dragging; pain extended down to thighs, while at rest; pain aggravated by touch.
‖Stitching pains in ovaries on taking a deep inspiration; can hardly bear least touch on affected parts; < on motion.
‖Pain in r. ovary; < when touched.
‖Ovaritis with rheumatic affections and in confinement.
‖Uterine sufferings are increased by least motion.
‖Prolapsus uteri.
‖Dropsy of uterus; swelling increases during day and diminishes at night.
‖Burning pain in fundus of uterus, r. side.
Pinching and uneasiness in abdomen, as if menses should appear.
‖Hastens coming on of menses and increases flow.
‖‖Menstruation too early and too profuse, with dark red blood; backache, splitting headache; < from motion.
Suppressed menses, with frequent bleeding of nose.
Catamenia too profuse and of long duration.
‖Amenorrhœa with abdominal and urinary symptoms.
‖Suppression of menses or lochia.
During menstruation: pain in back and loins; tearing in limbs; headache; nausea.
‖Membranous dysmenorrhœa.
‖When menses do not appear, bleeding from ear or nose.
‖Flooding of dark blood, with pain in small of back, and headache.
Swelling and inflammation of l. labia majora.
Hard, black pustule on a swollen portion of l. labia majora.

[24] **Pregnancy. Parturition. Lactation.** ‖Nausea and vomiting of pregnancy.
‖During pregnancy: pain in abdomen and burning in

Digitized by Google

uterus; constipation; spasmodic pains with chill, particularly after anger.
‖Threatened abortion.
‖Spasmodic labor pains.
‖Rheumatic pains in uterus.
‖After pains excited by least motion, even taking a deep inspiration.
‖Lochia too profuse, with burning pain in region of womb.
‖Lochial discharge often very offensive.
‖‖Suppression of lochia, with sensation as if head would burst.
‖Peritonitis puerperalis.
‖‖Milk fever, with rheumatic pains in breast.
‖‖Puerperal fever; particularly when breasts are distended with milk; deep inhalations are painful; stitches in abdomen; thirst for large quantities of water; she cannot lie upon either side; abdomen distended.
‖Suppression of sweat during confinement and ill effects therefrom.
‖‖Nursing women have taken cold; ache all over; head as if it would burst; lips dry; parched; breasts swollen, feel heavy; milk suppressed.
‖Rash, especially of lying-in women and their infants.
‖Drawing or lancinating pains from hip to foot; < from touch or motion. θPhlegmasia alba dolens.
Excessive flow of milk.
Oozing out of milk; secretion generally increased.
Scanty secretion of milk.
Tensive burning and tearing pain in mammæ.
‖Inflamed mammæ.
‖Stony heaviness of breasts.
‖Breasts feel heavy, are pale, but hard and painful.
‖Breasts have a stony hardness in them; they are hot and pain, but not very red.
‖Left mamma swollen; pains < when lifting arm.
‖Nipples very hard.
‖Infant screams after nursing; wind passes; slimy, green diarrhœa.
‖Inflammation of mammæ, with a sensation of heaviness: a sort of stony heaviness; mammæ hard and pale (red streaks indicate *Bellad.*); suffering < by motion (< from a jar or jolt indicates *Bellad.*).
‖Inflammation of breasts, with suppression of flow of milk.
‖During weaning, swelling of breasts and axillary glands, particularly left.
‖With cows: painful swelling of udder.
‖Infant, sore mouth; child does not like to take hold of

Digitized by Google

breast, but after mouth becomes moistened it nurses well.

‖Lumps, indurations and inflammation of mammæ, with diminished or retarded secretion of milk. θPuerperal fever.

‖Children ache from being lifted or pressed.

‖Costive infants.

‖Children do not want to be carried, but lie quiet.

‖‖First stage of mammary abscess.

‖Prevents gathered breasts in most cases during lactation and after weaning. *Phytol.* follows well.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Tickling in larynx. θAcute bronchitis.

Voice nasal or raised.

‖Hoarseness: with inclination to sweat; with singers.

‖Hoarseness. θPertussis. θAfter measles.

Sensation of apple-seed cell lodged in upper larynx, or rima glottidis.

‖Bronchial croup; hoarseness, with tendency to perspire; dry, hacking, painful cough, < in going from cold into warm air; gasping for breath before a fit of coughing; after measles; also in rheumatic diathesis.

‖Soreness in trachea. θPertussis.

Tough mucus in trachea, loosened only after frequent hawking.

When he goes into a warm room from open air, a sensation as if vapor was in trachea, which causes him to cough; he feels as though he cannot inspire enough air.

Irritation to cough as though some mucus was present; after he has coughed some time, a pain is felt there mingled with pressure and soreness; pain is < while talking or smoking.

[26] **Respiration.** Respiration with moist sound.

‖‖Breathing accelerated as though by a feeling of heat in epigastrium and chest.

‖Shortness of breath. θPertussis.

‖So weak she can scarcely speak, in morning. θIntermittent.

Respiration quick and deep, but without motion of ribs.

• Breathing > in cold air and from drinking cold water.

Amelioration, while making an expiration.

‖Worse from talking and laughing. θPertussis.

‖‖Breathing impeded by pressing pains, either just above epigastrium or over whole chest, or on sternum.

Cannot take a long breath on account of stitches in chest.

‖During inhalation, stitches through chest to scapulæ.

‖Stitches from l. to r. side of chest, during inspiration.

Breathing quick, difficult and anxious; caused by stitches, principally in chest, compelling patient to sit up.

Digitized by Google

‖‖Shortness of breathing aggravated by slightest motion.
‖Panting for breath. θPertussis.
‖‖Crowing or grating breathing. θHydrocephalus of a child.
Breathing quick, difficult and anxious; caused by stitches most in chest, compelling to sit up.
Deep, slow breathing.
‖Disposition to deep inspiration. θPertussis.
Inclined to draw a long breath; sighing; sobbing.
‖‖Constant disposition to sigh, and sigh deeply.
Tormented with a desire to take a long breath, which is hindered by a stitch in chest.
Frequent sighing-breathing.
Deep, slow breathing.
Difficult breathing, only possible with assistance of abdominal muscles.
‖Attacks of dyspnœa and suffocation. θPertussis.
‖A suffocating feeling as from tight neckwear.
‖‖Asthma, with a feeling as if something should expand, but would not.
Paroxysms of asthma, at night, with stitching pains in abdomen.
‖Asthma and cough, with pains in middle of chest, preventing sleep at night, cannot lie; tongue thick white, furred.

Cough. ‖Dry cough.
Hacking dry cough from upper part of trachea.
‖‖Hacking cough from a definite spot in trachea, becoming sensitive; < from talking and smoking.
‖‖A dry, hacking cough; single spasmodic forcible shocks towards upper part of trachea, which seems to be covered with dry, tough mucus, even tobacco smoking causes it.
‖Grippe with moist cough or rheumatic pains.
Dry, spasmodic cough, after eating and drinking, with vomiting of food, after a crawling and tickling in epigastrium.
‖Cough excited by tickling in throat and in epigastrium. θPertussis.
Cough excited: by nausea, by eating or drinking, by creeping or tickling in throat or stomach, on entering a warm room.
Nausea excites cough and coughing after vomiting.
Dry cough, excited by a creeping or tickling in throat or stomach.
‖Cough from tickling in throat and pit of stomach; in evening and at night without expectoration; during day expectoration is yellow, or consists of coagulated

Digitized by Google

brown blood, or of cold mucus of a disagreeable flat taste.

‖Cough from a sensation of vapor in trachea, preventing getting enough air.

‖Cough with sneezing.

‖Spasmodic cough, as from vapor of sulphur. θPertussis.

‖‖Dry, spasmodic cough, principally in night, and after drinking and eating, when entering a warm room, and after taking a deep inspiration.

Cough < after eating or drinking, with vomiting of what had been eaten.

‖It seems to be impossible to drink without coughing. θPertussis.

‖Cough on coming from open air into a warm room.

‖Cough with stitching pains in brain.

Cough and stitches in head and chest; or pain as if head and chest would burst.

‖‖Cough with stitches in sides of chest, or with headache as if head would fly to pieces.

‖Whooping cough with much sneezing.

‖Cough with vomiting and slimy mouth.

‖Cough with gagging, without nausea.

‖Dry cough, as if coming from stomach; together with a crawling and tickling in pit of stomach.

Cough, mostly dry, caused by titillation in throat; or spasmodic and suffocating, after eating and drinking, with vomiting of food.

During cough: scratching in throat; shortness of breath; catching of breath; thoracic pains, > by pressure; bruised feeling in hypochondriac regions, > by pressure; pressing in head; bursting pain in head and chest; stitches in head, throat and chest, sides and epigastrium, or hypochondria; pains in abdominal muscles; nausea and vomiting of food; sore pain in epigastrium; lachrymation; toothache.

Cough: with involuntary discharge of urine; hoarseness; red face; < by motion, talking, laughing, eating and thirst; sneezing; stitches in chest and small of back; drinking.

‖Cough with rawness in larynx.

‖Cough with stitches in intercostal spaces and in sternum.

‖‖While coughing, they press with hand upon sternum as though it needed support.

‖Cough with soreness in epigastrium and abdominal muscles.

‖‖Dry cough with pleuritic stitches; during heat. θIntermittent.

Digitized by Google

‖Cough compels to spring up in bed involuntarily. θTyphoid pneumonia, etc.

‖Painful cough and difficult breathing. θPneumonia of infants.

‖‖Cough shaking whole body; pain felt in head or in abdominal muscles.

Expectoration not constant; morning and evening, sometimes also during day.

‖Sputa at first difficult to dislodge.

‖Sputa tough and hard to separate, falling in a jelly-like lump, light in color, almost a yellow or soft brick shade. θPneumonia.

‖Cough from a constant crawling upward in throat, followed by expectoration of mucus.

Cough with yellowish expectoration, or mucus streaked with blood.

Dry cough with brickdust-colored expectoration.

‖‖Sputa not frequent, scanty, tough, sometimes bloody.

‖Cough evening and night, without expectoration; morning and daytime with it, of mucus yellow or mixed with coagulated brownish blood. θPertussis.

Expectoration brown, like liver.

Cough, with bloody, rusty, tenacious expectoration.

‖Sputa of an unpleasant flat taste. θPertussis.

‖Sputa often cold. θPertussis.

Inner Chest and Lungs. ‖Constriction of chest; she felt the need of breathing deeply (as if chest was stopped and she could get no air), and if she attempted to breathe deeply there was pain in chest, as if something was being distended which could not be completely distended.

Sensation of heaviness beneath sternum, extending towards shoulder, impeding respiration; deep inspiration was difficult; oppression of r. side of chest, with very fine, extremely severe stitches in r. axillary gland.

Sense of fulness; stuffed feeling throughout chest.

Stitch in upper part of chest, through shoulders, on inspiring.

‖‖Stitching, lancinating pains are most frequent in chest; on inspiration or on turning around in bed; situated in sides of chest or extend through from front to scapulæ.

‖Stitches in r. side of chest between third and fourth ribs, while sitting.

Stitches in chest and sides of chest, especially when coughing or drawing a long breath, obliging one to sit up, or lie on back; < by motion.

Sharp stitching pain in chest below r. nipple, extending outward, only on expiration.

‖Pricking pains below r. nipple from within outward, in cavity of chest; felt only during inspiration.

Digitized by Google

Chest very sensitive, with stitches in l. side of it on inspiration; whole forenoon.
Short but violent stitches in r. side of chest, must hold breath, could not cry out.
Tearing stitches in l. side of chest extend from behind forward, > during rest, < during motion and on deep inspiration.
Stitching pain in region of diaphragm, < from motion or coughing.
‖‖Stitches in chest, when breathing or coughing.
‖‖Stitch in side < by cough, breathing and motion.
‖Stitches, soreness and burning pains in chest. θPertussis.
Sharp pain in l. inframammary region; < during inspiration.
Complaints predominate in lower part of chest.
‖Rheumatic pleurodynic pains in chest and lungs.
Chill in left chest.
Burning in right half of chest.
‖Heat in chest. θPleurisy. θPneumonia.
Heat and burning pain in chest.
Inflammation of first and second divisions of bronchi, with an irritative, shaking, dry cough; heat; pain and soreness behind sternum; < daytime and by motion.
‖Inflammatory affections of chest supervening in course of pertussis.
‖Pleuritic pains in advanced stage of phthisis.
‖‖Pleurisy with fluid exudation.
‖‖Pleuritis; pneumonia.
‖‖Pleuro-pneumonia, with stabbing pains; frequent respiration; bloody expectoration; high fever; bursting headache; < on motion and deep inspiration.
‖In pneumonia with scanty expectoration, tough, falling in a round jelly-like lump, in color almost a yellow or soft brick shade.
‖Acute, inflammatory condition in catarrh of old people.
‖Hydrothorax.
‖Incipient phthisis.

Heart, Pulse and Circulation. ‖Irritable heart; beating 54 when sitting, but on rising ever so quietly, going up to 110 or 115 and gradually subsiding again.
‖Frequent sharp pain in cardiac region.
‖On going up-stairs a little rapidly, heart flutters and palpitates so much as to put him out of breath.
‖‖Stitching pains in sides of thorax make it almost impossible to expand chest.
‖‖Stitching pain in region of heart.
Cramp in region of heart, < by walking, raising one's self, or using slightest exertion, even raising arm.

Digitized by Google

Oppression in region of heart.
Heart beats violently and rapidly.
‖Palpitation of heart; frequently violent, and with oppression of chest. θCarditis.
‖Palpitation of heart. θPertussis.
‖Endocarditis.
Burning in veins.
Pulse: quick, full, hard, rapid and tense; at times intermittent, with strong orgasm of blood.
Pulse frequent at night, slower during day.
‖Pulselessness. θCholera Asiatica.

[30] **Outer Chest.** ‖Soreness of ribs, as if beaten.
Painful spot, as from a bruise, on second rib, r. side extending to sternum.
‖A painful spot on second rib of r. side, extending to sternum, as after a blow or bruise.
‖Pressive pain in præcordial region.
‖Rheumatism of muscles of chest.
‖Stitches in sternum on coughing; was obliged to hold chest with hand; even pressing upon it caused a sticking.
‖‖Seat of pain in chest is sensitive to pressure and when arms are moved.

[31] **Neck and Back.** Pain in nape of neck, as after taking cold.
‖Painful stiffness of muscles of r. side of neck, from touch and on moving head towards shoulders.
‖On r. side of nape of neck, towards shoulder, painful stiffness of muscles on moving head.
‖Drawing and stiffness of muscles of r. side of neck.
‖A pain in nape of neck near occiput, like a pain and weakness together, as if head was weak.
Rheumatic stiffness and tension in nape of neck and back.
‖Painful stiffness of neck.
Glands on neck sore to touch.
Sharp rheumatic pain in tendon of trapezius (l.) on turning head to left.
Dull stitches between scapulæ, extending from behind forward, in afternoon while lying.
‖Stitches under l. scapula through to heart.
Alternating dull, aching and sharp pain, beneath r. scapula, at its lower or inferior angle.
Rheumatic pain in back, between inferior angles of scapulæ.
‖‖In back, stitching and jerking pressing between scapulæ, extending through to epigastrium when sitting.
‖Shooting stitches in back through chest.
A drawing down back when sitting, disappearing on motion.

Digitized by Google

‖The pain extended through thorax to lower portion of sternum (pain in first dorsal vertebræ).
Stitches in back and small of back.
Creeping chilliness in back, from above downward.
‖Pain in back before paroxysm.
Eruption on back, aching like a sore.
Dull aching in lumbar muscles.
‖‖Stiffness, tearing and tenderness in joints and muscles of lumbar region, prevent motion and stooping; most when standing or sitting, > when lying.
‖‖In lumbar and sacral region, pain as if beaten.
‖Stitches in sacral region and back. θPertussis.
Pain in small of back, which makes walking or turning difficult; as if bruised, when lying on it.
Painful stiffness in small of back, compelling him to walk and sit crookedly.
Pain in small of back, like a painful stiffness, not allowing one to stand erect.
‖Pressive drawing pain in small of back and loins, which makes turning very difficult; it awoke him from sleep.
‖Pain in small of back; < by every motion. θRheumatic attacks.

" **Upper Limbs.** Left arm and hand in a weaving motion up and down; each time uttering a sigh.
Painful pressure on top of r. shoulder, < upon touch; on deep breathing it becomes a dull stitching, which extends downward and outward to shoulder joint.
Painful tension and pressure in r. shoulder, when at rest.
Tearing in shoulder joints and upper arms, with tension and stitching, and shining red swelling of parts.
Rheumatic swelling of r. shoulder and upper arm, with stitches.
Complaints predominant on upper arm.
Drawing and tearing pains in r. upper arm.
‖Rending in shoulder joints and upper arms, with tightness and piercing. θRheumatic attacks.
‖‖Arms incline to sink by one's side.
‖A feeling in r. elbow as if arm was broken, with a troublesome paralytic pain; it changed afterwards to a drawing pain; it extended to shoulder joint and lasted all day.
Swelling of elbow and hand joints, and upper parts of hands.
‖Swelling of elbow joint, and somewhat above and below it as far as middle of upper and forearm, and soles of feet.
‖Swelling about elbow joints; < in left. θRheumatic attacks.

Digitized by Google

‖Swelling of r. elbow joint, with stitches.
Swelling of arm around elbow.
Tearing pains on inner surface of forearm, in a line from elbow to wrist.
Fine stitches in wrists, if hands become warm, and during rest; they do not disappear on motion.
Pain in wrists, as if wrenched or sprained, on every motion.
Swollen hands.
Complaints predominate in palm of hand.
Stitching pain in fingers when writing.
On writing or taking hold of anything, a sensation as if finger joints were swollen and puffed; they are painful on much exertion and on touch.
Rather hot, pale swelling in last joint of little finger, with sticking in it on moving finger, or on pressing it.
‖Hot, pale swelling of finger joints and whole hand. θRheumatic attacks.

Lower Limbs. ‖Inflammation of psoas muscles.
Pains in r. trochanteric and gluteal region, of an aching, cramplike and bruised kind; < at every motion.
‖Pains in l. lumbar region extending to thigh; < in afternoon, when sitting up and by movement; walks with crutches. θSciatica.
Stabbing pain in hips.
‖Shooting pains extending towards hip.
Stitches in hip joint, extending to knee.
In morning, feels lame and bruised, particularly in r. hip.
Cracking and feeling of dislocation of hip joint, when walking.
‖Sciatica: pains < sitting up, by moving, and late in evening; lies best on painful side; often < by cold water.
‖A few large stitches, like knife stitches in hips.
Great painfulness of r. thigh; pain comes from head of femur, extends along anterior surface of thigh to knee.
‖Great weariness in thighs, he can scarcely go up steps; less when going down steps.
‖When walking bent, sticking pain from hip into knee.
Complaints predominate on front side of thigh, in patella, and in calf of leg.
‖Stitches in knee when walking.
Pain in r. knee, so that in evening he could scarcely walk, and was obliged to keep leg very quiet; inner side of knee very painful to touch; next morning, while in bed, there was no pain, but after being up a while pain returned.
Painful stiffness of knees, with stitches, especially when moving them.

Digitized by Google

Synovial inflammation of knee joints.
A feeling in r. knee cap as if he had been kneeling a long time.
Tearing pain in shins.
Tensive sensation in bend of knee, which afterwards changed to a drawing and wrenching along crest of fibula, lasting several minutes.
Knees totter and knock together when walking.
Swelling of knee, with tensive pain in ligaments.
Knee joints swollen, red, shining, motion impossible. θRheumatism.
Pinching-tearing in r. calf.
Tightness in calves.
Bruised pain on outer side of l. calf, on moving and turning foot, as also on touch; during rest a numb sensation in this place.
Tension in ankles on motion.
The ankle feels as if dislocated, especially when walking.
Tensive pain on back of feet, even when sitting.
Pain in feet as if sprained.
Hot swelling of instep, with bruised pain on stretching out foot; foot seems tense on stepping on it, and on touch it pains, as if suppurating, like an abscess.
Feet are tense and swollen in evening.
Hot, inflammatory swelling of feet, with redness.
Gouty swelling of feet, with redness, heat and tensive pain.
Sensation in tendo-achillis as if bruised. θRheumatic attack.
Horses: during distemper, hard swelling and coldness of feet, especially of hind feet.
Stitches in soles.
Prickling in soles of feet when walking.
Severe pain in sole of foot, with great lameness, could not walk; not much swelling.
Sudden pains in balls of great toes.
Stitches in big toe.
The legs are so weak that they will scarcely hold him, on commencing to walk, and even when standing.
Swelling of lower limbs.
Weariness and stiffness of lower limbs.
Swelling of legs, down to feet.
Putrid ulcers on lower limbs.
Gouty affections of lower extremities; pains < from motion.

Limbs in General. Tensive or stitching pains in limbs.
Pains in limbs and joints; > by warmth.
Violent pain in limbs during heat. θIntermittent.

Digitized by Google

‖Pain in limbs; < by motion and during heat. θIntermittent.
‖Rheumatic pains in tops of shoulders and in l. knee.
‖‖Rheumatic and gouty pains in limbs, with tension; < from motion and contact.
‖Acute articular rheumatism, swelling pale red, pain < on slightest motion, fever, pulse 130.
‖Limbs move, but sluggishly.
Laming and bruised feeling in extremities.
Weariness and stiffness of limbs, especially the lower.
Weakness of limbs obliges him to sit.
‖Weariness and heaviness in all limbs; feet can scarcely carry her on account of heaviness, when walking.
‖‖All limbs seem bruised and paralyzed, as if he had lain upon a hard bed.
‖Paralysis of limbs.
‖Limbs and joints swell, become red, and are very sensitive to touch or motion.
‖Heaviness in limbs, which seem like lead.
‖Horses: walk stiff from lameness of joints.
‖‖Constant threshing with l. arm and leg. θHydrocephalus.
‖Ulcers on fingers and toes.
‖Tearing, stinging pains, most in limbs, particularly when moving parts, with intolerance of touch. θRheumatic attack.

[25] **Rest. Position. Motion.** Rest: tearing in r. side of head >; pain in stomach >; all gastric symptoms >; feet swell; stitches in wrists; numb sensation on outer l. calf.

Lying: on back, headache in occiput in morning; headache with pressure in brain <; on painful side, tension and tearing in head >; on painful side, soreness in occiput and behind ears >; in bed, hazy vision and sticking pain over eye >; on painless side, toothache <; on painful side, toothache >; on side, stitching in stomach; asthma and cough <; stitching between scapulæ; stiffness; tearing and tenderness in lumbar region >; pain in small of back <; compelled to lie down.

Sitting: in bed, vertigo and faintness; pressive headache; in bed, nausea; pain towards inguinal ring; stitches in testicle; stitches in chest >; stitches between third and fourth ribs; stitching and jerking between scapulæ to epigastrium; stitching, tearing and tenderness in lumbar region <; pain in lumbar region <; sciatica <; tensive pain on back of feet; heat or chill worse.

Rising: reluctant to rise in morning: giddiness; vertigo

Digitized by Google

with reeling; to erect position after eating, nausea and waterbrash; heartbeat goes from 54 to 110; from bed, faintness.

Standing: weak mind, faintness; vertigo and whirling; griping and cutting in intestines <; stiffness, tearing and tenderness in lumbar region <; stands inerect from pain in back; weakness of legs.

Stooping: or turning head, dizziness; giddiness with looseness of brain; fractal headache <; pressing in frontal region and l. eyeball <; fulness in forehead <; sensation of falling in head; difficulty in resuming erect position; heat in head <; stitching headache; stiffness, tearing and tenderness in lumbar region <.

Bending: neck, sticking pain; drawing legs on abdomen; constriction in epigastrium >; turning head to l., pain in tendon of trapezius; cutting in intestine >; turning, pressive drawing in back and loins <; bending and stretching limb, swollen instep, bruised pain.

Walking: stitches from forehead to occiput, stepping hard; stomach sensitive; misstep, stitching in stomach <; pressure in epigastrium <; ascending stairs, palpitation and breathlessness, pain in small of back <; crooked, from stiffness in back; cracking and feeling of dislocation in hips; bent, sticking from hip to knee; stitches in knee; knees totter and knock together; feeling as of ankle dislocated; foot feels tense; prickling in sole of foot; pain in sole; weakness of legs; weariness and heaviness; weakness and weariness; < ascending stairs, > descending.

Motion: anxiety >; vertigo and headache <; fulness in forehead; < moving eyes; pressure in forehead and occiput <; severe pulsating pain in head; tearing in r. side of head <; of eyes, shooting pains in head <; of eyes, increases headache; expanding headache <; headache better closing eyes; limbs pain; tension and tearing in outer head <; of eyeball, sensitive pressure <; of eyes, ciliary neuralgia <; eyes sore and aching; of eyes, pressing crushing pain <; rheumatic iritis and aching in back of eye to occiput <; pinching pressure at articulation of r. jaw; complains of pain everywhere; constriction and cutting in stomach after eating, with vomiting <; on shock from hiccough, pressure in forehead as of brain shaking; nausea <; fulness and pressure at pit of stomach <; burning at stomach <; stitching in epigastrium <; pain in stomach excessive; moving legs, crepitation; griping and cutting in intestines <; sticking and shooting pain in abdomen <; colic <; urine passes involuntarily; dribbling of urine

Digitized by Google

without sensation; pain in ovaries <; uterine suffering <; backache and headache <; after pains brought on; lancinating pain from hip to foot <; inflammation of mammæ (suffering) <; short breath <; redness of face <; stitches in chest <; inflammation of bronchi <; pleuro-pneumonia <; cramp in heart <; drawing down in back disappears; stiffness, tearing and tenderness in lumbar region <; sprained pain in wrist; pain and swollen sensation in finger joints; sticking in little finger; aching in gluteal region <; pain in lumbar region <; sciatica <; pain in knee <; stiffness and stitches in knee <; knee swollen, cannot move; bruised pain in outer calf; tension in ankles; gouty pains <; pain in limbs <; rheumatic pains <; limbs and joints swollen and sensitive; tearing and stinging in limbs <; indisposed to exertion; weariness and sweat after exertion; aching of arms and feet; faintness; chills <; sweat easily excited; stitching about large joints; soreness in periosteum and ligaments; affected parts swollen, cannot move them; stitching pain in swollen joints; stinging in gouty swellings; of arms, pain in l. mamma and chest.

Nerves. Oversensitiveness of all the senses.

Increased bodily irritability.

Spasm developed through repercussion of measles.

Spasmodic complaints; starting, twitching of limbs.

Hysteric spasms.

Clonic spasms.

Is often indicated after spasms have been controlled, and there remain fulness of pulse, abdominal tenderness and perspiration.

Feels lazy, and indisposed to work.

Weaving motion of l. arm and leg, with sighing. See 32.

Is compelled to lie down.

Great weariness in morning and afternoon.

Loss of strength on slightest exertion.

Great weariness and sweat over whole body after a slight exertion.

She is weak, arms and feet ache if she does any work, arms sink down; if she goes up-stairs she can scarcely get along.

Great weakness and exhaustion; worse from walking.

The feeling of weakness becomes very great, especially great fatigue after a long walk.

On rising, great exhaustion and weakness, which increased during forenoon, while walking, so that he had to drag himself about; on going up-stairs there was excessive weakness in knees and legs.

Digitized by Google

‖‖Fainting in morning, getting up, or when rising up in bed.
Sudden prostration, shunning all motion.
‖Uncommonly wearied and prostrated.
‖Great prostration.
Very tired and prostrated; great weariness.
‖Weariness, prostration in whole body.
‖Great prostration and uneasiness.
‖Great prostration. θConstipation.
‖‖Faintness: when rising from bed; from slightest motion.
‖On rising from bed he was attacked with faintness, with cold sweat and rumbling in abdomen.
Great lameness, and desire to keep quiet.
‖Paralysis generally of both sides.

Sleep. ‖Very much inclined to yawn; frequent yawning the whole day.
‖Excessive gaping. θRheumatic attack.
Drowsiness; with half-closed eyes; during and after stool.
‖Much sleepiness during day when alone.
‖‖Great sleepiness by day, with yawning, lassitude, stretching, etc., yet at night no sleep on account of tumultuous course of blood, anxiety and heat.
‖In evening, before falling asleep, she starts up in fright.
‖He could not sleep well; a warmth and anxiety in blood prevented it until 12 o'clock.
‖Sleeplessness most before midnight. θRheumatic attack. θPertussis.
‖Sleeplessness on account of uneasiness in blood and anxiety; thoughts crowd upon one another.
‖‖A concourse of anxious thoughts keeps him awake till 3 or 4 A.M.
Sleeplessness before midnight, with thirst, heat and ebullitions.
Sleeplessness, especially before midnight, owing to heat and anxiety, especially on chest.
No sleep before midnight, on account of a frequent shivering sensation over one arm and foot, followed by sweat.
‖Sleepless night, with heat and restlessness, every other night sweat and better. θSpoiled intermittent.
‖‖Sleep full of dreams.
Night very restless, disturbed by frightful dreams; frequent waking.
‖He started from an anxious dream and screamed out.
‖Dreams: about household affairs; about business of day.
Dreams of dispute and vexation.
‖Night restless, he could scarcely sleep for half an hour, and during his slumbering was continually busy with what he had read evening previous.

Digitized by Google

Sleep walking; produced and cured.
Delirium at night of business of day.
Nightmare.
Delirium, as soon as he awakes.
Comatose sleep, broken by delirium.
Often a prattling and muttering delirium during sleep.
During night a bitter taste.
During sleep: masticating motions of lower jaw; feces pass off; starting and jumping motion evening during sleep, seems to aggravate sufferings.
Chilliness in evening in bed, after lying down.
Insists on leaving bed.
On wakening, pain in liver and kidneys.
After midday nap he was chilly; head confused.
Immediately after lying down in bed, in evening, sensation of heat, with external heat over him, without thirst through the whole night; he turned from one side to the other, did not dare to uncover any part, because it immediately caused violent pain in abdomen, a painful griping, sticking or sticking griping, as if flatus moved spasmodically here and there, with loss of sleep from a multitude of crowding thoughts; in morning this condition disappeared, without his noticing any flatulence.

[25] **Time.** Night: delirium, < after 3 A.M.; shooting pain in head <; towards morning, sour oily sweat on head (and body); rheumatic iritis and aching in back of eye to occiput <; fulness of eyeball, with shooting pain in eye and head <; scalding in corners of eyes <; toothache, with tearing in cheeks and pinching in ears, till 6 A.M.; gulping up of phlegm; heat in abdomen and heartburn <; diarrhœa preceded by colic; involuntary stools; urine reddish-yellow, white sediment; dropsy of uterus >; cough from tickling; dry spasmodic cough; pulse frequent; dry heat; sweat profuse, at 3 A.M.; copious sour sweat; 3 A.M. toothache.

Morning: head confused and aching; delirium; does not wish to rise; dizziness; head whirls and turns in circle; throbbing on top of head; on waking pain in occiput to shoulders; headache when first opening eyes; bursting headache before breakfast, compression and heaviness of head with stitches; head hot; agglutination and tears in eye; nosebleed on awakening; toothache, 3 A.M.; nauseous, bitter taste; nausea on waking; nausea and vomiting; colic and urging to stool; diarrhœa preceded by colic; pasty stool; fluid stool; stools get thinner and thinner; dry, parched stool; sensation of plug in anus; too weak to speak; expectoration; lame and bruised in r. hip; pain in knee returns; weakness and exhaustion

Digitized by Google

on rising; griping with loss of sleep >; heat in head; sweats profuse; weakness of limbs.

Noon: pressive pain in occiput to neck <.

During day: dropsy of uterus increased; inflammation of bronchi <; pulse slower; great weariness; sleepiness; skin dry; dropsical swellings <.

Afternoon: heaviness of head; forepart of, many symptoms; stitches between scapulæ; pain in lumbar region <; weakness of limbs.

Evening: fulness in forehead <; bursting headache <; heat of head, coldness of body and pain in limbs <; toothache in back teeth; drawing-jumping toothache in bed; heartburn from wine; nausea and vomiting; distension in abdomen; frequent urination, 6 to 7 P.M.; cough from tickling; expectoration; sciatica <; pain in knee <; feet tense and swollen; starts with fright on falling asleep; chilliness after lying down; coldness and chilliness; hot cheeks, chill all over, gooseflesh and thirst.

* **Temperature and Weather.** In-doors: very anxious; chilliness <.

Warmth: tearing in r. side of head <; tension and tearing in head <; inflammation of eyes, with pains in teeth and face <; drawing-jumping toothache <; tearing-stitching toothache <; in room, pain in throat <; warm drinks, >; weather, diarrhœa; air, dry, painful cough <; air, vapor in trachea causing cough; dry, spasmodic cough <; chills <; stitches in wrist when hands warm; pains in limbs and joints <.

Open air: anxiety >; pain as of tooth screwed in and pulled out >; decayed teeth sensitive.

Cold: headache on washing after sweating; raw and wet, rheumatic headache; inflammation of eyes, with pains in teeth and face >; face red and smooth after washing; toothache as of cold air; water, pain as of tooth screwed in and pulled out, > momentarily; water, internal heat >; fruit, incarceration of hernia after; water, bitter taste and nausea >; air, breathing >; water, sciatica <.

Dry air: soreness in occiput and behind ears <.

‖Cerebral disturbance from getting wet.

‖Diarrhœa after taking cold or getting hot in summer.

‖‖Complaints when warm weather sets in after cold days.

‖Complaints from cold drinks in hot weather.

‖‖Kicks covers off.

** **Fever.** ‖‖Chilliness.

More chilliness in room than in open air.

Digitized by Google

Chilliness and coldness of body, also in bed.
Coldness and chilliness, mostly in evening, and often only on one (r.) side.
Chilliness during stool.
‖Skin icy cold, shrivelled. θCholera Asiatica.
‖Coldness and shivering over whole body.
‖Before chill, vertigo and headache. θIntermittent.
Chill, with external coldness of body.
‖Chills begin on lips, and on tips of fingers and toes; great thirst during all stages. θIntermittent.
‖Right-sided chill. θIntermittent.
‖Chill with thirst.
Chill: > by drinking; after sleep; < by exercise; < in a warm room.
‖Chilly sensation about ulcers.
Chill or heat on diseased part.
‖‖Chilliness predominating, frequently with heat of head, red cheeks and thirst.
‖Chilliness with heat in head and red face. θRheumatic attack.
Chills with heat.
Shaking chill, frequently with heat in head, internal; generally with intense desire for cold drinks.
‖Chills with thirst; heat of face with flushed cheeks. θIntermittent.
‖In evening: hot and red cheeks with chill all over, with gooseflesh and thirst.
Heat or chill lessened while sitting.
‖‖Fever, with dry, burning heat, mostly internal; blood seems to burn in veins.
‖Heat in head: and face; in morning; in forenoon; feels as though it would come out at forehead.
‖Dry heat at night.
‖Heat with desire to uncover.
‖Feeling of heat in face, with redness and thirst.
Fever, with bitter taste and thirst.
‖Heat with thirst. θIntermittent.
‖‖Heat only internal or on single parts of body, with great thirst.
Great aggravation of sufferings during heat.
Heat after stool.
‖Sweat in morning.
Cold sweat on forehead and whole head.
Sweat in short spells and only on single parts.
‖Profuse night and morning sweat.
‖Profuse night sweat after 3 A.M.
‖Dry skin during day, copious sour sweat in night and towards morning.

Digitized by Google

‖Sour smelling profuse sweat during a good night's sleep.
‖Sweat profuse, sour or oily. θIntermittent.
‖Unctuous, oily sweat. θPertussis.
‖Sweat easily excited by exercise. θIntermittent.
‖‖Sweat on slight exertion; even when walking in cool air.
‖‖Sweat relieves.
‖Sweat over whole trunk and head, but not on parts affected. θRheumatic attack.
‖Thirst only during fever. θIntermittent.
‖Intermittent connected with incipient tuberculosis, with preponent and recedent type.
‖‖Nervous fever with pain in limbs.
‖Typhoid fevers; accumulation of frothy, soaplike saliva in mouth and throat, which at times seems to choke patient; diarrhœa; dry lips; great thirst.

41 **Attacks, Periodicity.** Appearing and vanishing quickly: sharp pain in l. occipital protuberance.

Alternately: restless every other night; periodical sweats on single parts; intermittent with proponent and recedent type.

42 **Locality and Direction.** Right: tearing from forehead to arm; drawing-tearing in temple; tearing in head; burning and lachrymation of eye; heat and swelling of r. ear; parotid swollen and sensitive; thin, light discharge from nostril; pinching pressure at articulation of jaw; dull aching in alveoli of upper jaw: twitching-tearing in malar bone to temple; painful pressing under r. cheek bone; stinging pain near larynx on swallowing; stitches in testicle and spermatic cord; pain in ovarian region; burning in fundus of uterus; oppression of chest, with stitches in axillary gland; stitches between third and fourth ribs; pricking pain below nipple; burning in chest; painful spot on second rib to sternum; aching and sharp pain beneath scapula; painful pressure on shoulder; rheumatic swelling of shoulder and upper arm, with stitches; aching pain in gluteal region; lame and bruised in hip; great pain in thigh; pain in knee; pain in knee-cap as of long kneeling; pinching-tearing in calf; coldness and chilliness of body.

Left: pressing out in eyeball; pressure above eye; drawing in temporal bone; stitch in l. side of brain when coughing; sharp pain in occipital protuberance; continued stitch deep in brain; sensitive pressure in eyeball; darting pains from eye through head; snapping in stomach as of food pushed to l. side; stitches in side on vomiting; pain in heel; twitching in abdomen;

Digitized by Google

sticking in back; heat in hypogastrium; pain towards inguinal ring; inflammation of labium major; mamma swollen; swelling of breast and axillary glands during weaning; stitches in chest; chill in chest; rheumatic pain in tendon of trapezius on turning head to left; stitches under scapula to heart; swelling in elbow joints; bruised pain on outer calf; rheumatic pains in knee; constant threshing with arm and leg; weaving motion in arm and leg.

Within out: headache in forehead and temples; pressive pain in temples; violent headache, with pressure in brain; continued stitch in brain; stitches in head and chest; pricking pain below r. nipple.

Above downward: drawing from occiput into neck; tearing in forehead, extending to r. arm; drawing in temporal bones; drawing-tearing in r. temple to neck; tearing in head extending into jaw bones; headache in occiput to shoulders; pressive pain in occiput into neck; drawing and tearing from temple to malar bone; pressure in epigastrium to umbilicus and bladder; pain in inguinal region; drawing in intestines; pain in ovarian region; lancinating from hip to foot; pain in thorax to lower part of sternum; creeping chilliness in back; dull stitching on shoulder; tearing from elbow to wrist; pain in lumbar region to thigh; stitching in hip to knee; pain along thigh to knee; swelling of legs to feet.

Below up: twitching-tearing in r. malar bone to temple; tearing in hip to epigastrium; pains in abdomen; heat from abdomen to chest; drawing in elbow to shoulder; shooting pain to hip; chills begin at fingers and toes.

Left to right: stitches in chest during inspiration.

Right to left: painful spot on second rib to sternum.

Before back: sticking, jerking, throbbing headache from forehead to occiput; sharp pains in eyeballs to occiput; darting pains from l. eye through head; aching from eye to occiput; stitches through chest to scapulæ; pain in lumbar region.

Behind forward: shaking of brain from hiccough; stitches in l. chest; stitches below scapulæ; stitches and pressing between scapulæ and epigastrium.

[13] **Sensations.** Oversensitiveness of senses to external impressions.

Every spot in body is painful to pressure; < mornings.

Drawing rheumatic pains in various parts of body.

Transient drawing and tension in almost all limbs and joints.

As if head was turning in a circle; as if she was sinking

Digitized by Google

deep down in bed; as if everything would press out at forehead; as though eye became smaller; as if eyes were pressed out of head; as if there was sand in eyes; as if a tooth was screwed in and then pulled out; as if brain shook from behind forward from hiccough; as if there was a stone in pit of stomach; as if pit of stomach was swollen; as if region of stomach was rolled up like a ball; as if something lay in abdomen; as if head would burst; as if vapor was in trachea; elbow feels as if arm was broken.

Rending: in shoulder joints and upper arms.

Splitting pain: in head.

Tearing: across forehead; in cervical muscles; in r. arm; in r. temple; in external head; in r. malar bone; in cheeks; in teeth; from hip to epigastrium; in urethra; in limbs during menstruation; in mammæ; in lumbar muscles; in shoulder joints and upper arms; in r. upper arm; on inner side of forearm; in shins.

Cutting: in epigastrium; in intestines; before stool; in urethra; during urinating.

Stabbing: in chest; in hips.

Lancinating: during diarrhœa; from hip to foot; in chest.

Beating: in vertex; in cranium, in cerebellum.

Darting: through head; in teeth.

Piercing: in shoulder joints and upper arms.

Stitching: deep in brain, l. side; in head; from forehead to occiput; in eyes; deep in ear; in teeth; in throat; in l. side; in stomach; in abdomen; in liver; in spleen; in r. testicle and cord; in ovaries on inspiration; in chest; in intercostal spaces and sternum; in r. axillary gland; in epigastrium and hypochondrium; in region of heart; between scapulæ; under l. scapula to heart; in sacral region; in shoulder joints and upper arms; in r. elbow joint; in wrist; in fingers when writing; in hip joint to knee; in knees when walking; in soles; in big toe; in all serous membranes; in hepatic region; in region of diaphragm.

Shooting: extending to vertex or occiput; in eye; in teeth; in stomach; in abdomen; in back through chest; towards hip.

Stinging: in throat; in liver; in abdomen.

Sticking: in head; in throat; in liver.

Neuralgic pains: in eyes and head.

Bursting pain: in head and chest.

Splitting pain: in head.

Pricking pains: below r. nipple.

A pricking sensation "like pins and needles" on soles or on other parts of body, or with an eruption.

Digitized by Google

Prickling: in anterior third of tongue; at anus; in soles when walking; in soles of feet; of skin (nettlerash).
Pinching: pressure in articulation of r. jaw; in ears; in abdomen; in r. calf.
Griping: in intestines; during stool.
Digging: in forehead; in teeth as from cold.
Rheumatic pain: in uterus; in chest and lungs; in tendon of trapezius; in back; in limbs; in shoulders.
Aching: of head in morning; headache, in occiput; tensive, in temporal region; in head when stooping; expansive headache; in eyes; in l. orbit; from eye to occiput; dull, in alveoli of upper jaw; of gums during teething; in back; beneath r. scapula; in lumbar muscles; and bruised feeling in r. gluteal region.
Pressure: in cardiac region; in frontal region; above l. eye; in occipital protuberance; outward in head; on vertex; in occiput; in temples; in l. eyeball; under r. cheek bone; in throat; in stomach; towards l. inguinal ring on sitting; in urethra; at larynx; over chest and sternum; in præcordial region; on top of r. shoulder; in r. hypochonder; in epigastrium; in sphincter ani and rectum.
Pressive pain: in l. tonsil.
Pressing, crushing pain: in eyes.
Burning: in forehead and temples; in eyes; in r. eye; in stomach; along diaphragm and ribs; in liver; in abdomen; at anus; with stool and urine; in rectum; in fundus of uterus; in mammæ; in chest; in veins; spots on skin; in hepatic region; in urethra.
Scalding: in eyes.
Smarting: behind pomum adami.
Drawing: in occiput; in temporal bones; tearing in r. temple; in l. upper lid; in back teeth; in urethra; from hip to foot; in muscles of neck, r. side; in r. upper arm; along crest of fibula; in urethra.
Constricting pain: in stomach.
Twisting: tensive in single muscle fibres.
Jerking: from forehead to occiput; toothache in evening; pressing between scapulæ.
Twitching: drawing in maxillary bones; of l. upper lid; in r. malar bone; in corners of mouth; in abdomen, l. side; in nose.
Soreness: of eyes; of nose; of r. malar bone; of teeth and gums; in epigastrium; of abdomen; in intestines; of larynx; behind sternum; of cervical glands; in pit of stomach; in anus; in trachea; in ribs.
Rawness: in throat; in larynx.
Tension: in temporal region; in external head; at

stomach; in region of liver; down thighs; at sphincter ani; in mammæ; in nape of neck; in r. shoulder; in knee; in ankles; on back of feet; in hepatic region.

Pain: in head; above l. eye; in occiput; in r. temple; in both temples; sharp, in l. occipital protuberance; pressive, in head; dull, in forehead; in small spot on forehead; in vertex; in limbs on motion; like of needle through eye and head; severe, in eye; violent, in teeth and face; in l. tonsil; in throat; in pit of stomach; constricting, in stomach; in region of liver; in abdomen; in kidneys; in r. ovarian region; in back and loins during menstruation; rheumatic, in uterus; in breasts; on inspiring; in abdominal muscles; in cardiac region; in inframammary region; rheumatic, in chest and lungs; in nape of neck; in lumbar and sacral region; in small of back; paralytic, in r. elbow; in wrist as if sprained; in l. lumbar region to thigh; in r. thigh to knee; in l. calf; in sole of foot; in ball of great toe; in liver and kidneys on awakening; in l. heel.

Sensitiveness: of external r. ear; of r. parotid; of lower lip; of teeth to air; at pit of stomach; of abdomen; in lumbar muscles.

Bruised feeling: in hypochondriac region; on outer side of r. calf.

Scraping: and roughness in throat.

Scratching: in throat.

Tickling: in epigastrium; in throat or stomach, exciting cough; in larynx.

Crawling: in throat; in epigastrium; in throat, exciting cough.

Crepitation: moving legs.

Cracking: of hip joint on walking.

Throbbing: on top of head; throughout body; in abdomen.

Pulsation: in l. orbit.

Beating: in vertex.

Looseness: of teeth.

Lightness: of head, with wabbling in ears.

Constriction: of chest.

Emptiness: of stomach.

Fulness: in forehead; in cranium; of eyeball; in throat; at stomach; at r. hypochondrium; throughout chest.

Tightness: in shoulder joints and upper arms; in calves.

Swollen: as if, at pit of stomach; finger joints as if swollen when writing.

Heaviness: in forehead; in head; of head, in afternoon; of l. upper lid; in stomach; in region of liver; at sphincter ani; of breasts; beneath sternum; in limbs.

Digitized by Google

Plug: ears feel stopped; at epigastrium.
Uncomfort: in abdomen as of menses.
Weakness: of thighs; of limbs; after slight exertion.
Weight: in stomach.
Faintness: mental weakness; in morning when rising; from slightest motion.
Trembling: of tongue.
Numbness: in stomach and œsophagus; in calf.
Coldness: after anger; on vertex; of hands, and chilliness; chill in l. chest; chilliness in back; chilliness in evening in bed; chilliness during stool; of skin; of whole body.
Itching: at margin of lids; in throat; on glans; eruption on skin; between fingers.
Dryness: of lips, tongue and hard palate; of throat.

" **Tissues.** Plethora.
Burning sensation in veins.
• ❙Inflammation of mucous and serous membranes. θAcute catarrh. θPleuritis. θPericarditis. θPeritonitis.
Stitches in all serous membranes.
❙❙Inflammations that have advanced to stage of serous effusion.
❙❙Rheumatic affection of joints. Compare *Merc. subl.*
❙❙Drawing and pain as if luxated in medium and smaller joints.
Stiffness and stitches in joints.
❙❙Stitching pains in region of large joints as in shoulder, over trochanter, and at knee; all aggravated by motion, touch, or any jar or shock.
❙Arthritic affections; nodosities.
❙Erysipelas of joints.
Rheumatism, with redness and swelling of joints; motion is intolerable.
❙Rheumatism, muscular and articular.
Soreness appears to be in sheath of tendon, but principally in periosteum and ligaments; there do not appear to be that swelling of joints, stiffness and dread of motion that usually characterize rheumatism; but motion always increases pain.
Swelling (pale or red) of affected parts, with inability to move them.
❙❙Joints red, swollen, shining, stiff, with stitching pain from slightest motion.
❙Fixed, acute rheumatism, aggravated by motion; travels slowly from joint to joint.
❙Violent pains in scrofulous swollen joints.
❙Gouty, red, shining swelling of single parts, with stinging when moving them.

Digitized by Google

Hardness in groups of muscles affected by neuralgia.
Involuntary muscles seem not to be greatly embarrassed; sphincters not relaxed.
Swelling and induration of glands and other parts, pale, tender.
Dropsical swellings increase during day and diminish during night.
Dropsy.
Emaciation predominates.
Suppuration of cellular tissue.
In acute abscess, promotes resorption of pus.

45 **Touch. Passive Motion. Injuries.** Pressure: fulness in forehead >; tearing in r. side of head >; headache >; pressing pain under r. cheek bone >; pain in upper teeth changes to lower; pit of stomach sensitive.
Touch: tearing in r. side of head <; tension and tearing in outer head <; scalp tender; soreness in occiput and behind ears <; eyeballs sensitive; eyes sore; r. parotid sensitive; nose sore and swollen; swelling and ulcerative pain in tip of nose; r. malar bone sore; lower lip sensitive; sticking pain on feeling of throat; pit of stomach sensitive; stitches in liver; abdomen sensitive; pain in ovarian region <; lancinating from hip to foot <; chest sensitive; soreness behind sternum; glands of neck sore; pressive pain on shoulder <; finger joints painful; bruised pain on outer calf; suppurative pain in foot; rheumatic pains <; sensitive; pain in limbs; small red spots on body, sensitive, some not sensitive; nettlerash, with prickling.
Children dislike to be carried, or to be raised.
Injuries: abscess at pit of stomach after blow.
It is found that *Bryon.* is rarely, if ever, indicated in diseases affecting external tissues of eye; its great sphere of usefulness being in diseases of uveal tract.

46 **Skin.** Yellow skin of whole body, even of face; jaundice.
A red, round, hot spot on cheek on malar bone.
Petechiæ.
Small, red spots on various parts of body; some with sensibility and not disappearing on pressure; some burning and disappearing on pressure.
Cutaneous eruptions generally dry.
Dry, itching eruption over whole body.
Burning-itching eruptions.
Eruption over whole body, especially on back as far as neck, which itched so violently that he was obliged to scratch it.
Red, elevated, rashlike eruption over whole body.
Nettlerash, with a great prickling, particularly when touched.

Digitized by Google

▮White miliary eruption.

BUFONES.

Toads. *Reptilia.*

Toads belong to the most poisonous reptiles. In olden times, being looked upon as horrible things, they were given in horrible diseases. During the rage of improvement the remedy was thrown overboard, and even the poisonous qualities doubted, until rare experiments, especially those by Vulpian, have settled the question. In 1832 Henke, our great prover, was the first in our school to call attention to it; his observations were published in Meyer's Monatsblatt, 1860; in 1834 the Homœopathic Society of Thüringen sent some symptoms to the Archives of Stapf (vol. xiv, No. 2, page 102). In 1849 Mure published a proving with his preparation, taken from the most common toad in Brazil, called by him Bufo satyhiensis. This was translated by Hempel and Allen. Houat published one of his provings in Nouvelles Donnees. This was translated three times—by Lippe, Lilienthal and Allen. In 1859, Destrone, in a French journal, collected notes from all old writers and also made some provings. His collection has been translated in Allen's Encyclopedia, including the very doubtful numbers 6, 7 and half of 8. The provers mentioned have used about half a dozen different species, and nearly every one proved a different preparation. The cures are of the greatest importance and cannot be doubted in the least, even not by such who make profession of so-called skepticism. But now for nearly ten years we have not been able to find a single case in our journals. The cures have been epilepsy, cancers, beginning of malacie of the brain and cutaneous diseases. Many of Houat's symptoms have been verified.

The best way of getting the poison was proposed in 1861 by Roth in Paris, Allg. H. Zeit., vol. vi, page 112, mentioned in Schwabe's Pharmacopœia, by faradization; but in 1862, in C. Müller's Quarterly, vol. xiii, the same author proposed a still better one. The toad was to be held with the left hand in a wooden forceps, the glands on the side of the head pressed with a wire forceps and the juice caught on a glass plate; it is soluble in alcohol.

‖ **Mind.** Desire for solitude, to practice masturbation.
Whimpered, then cried, until he fell into a state of coma.
Left his bed after apathy and ran like mad through the house, constantly howling; eyes injected; tongue dry; pulse regular; no febrile heat.
Stupor.
‖Weak memory; idiotic. θSpasms.

Digitized by Google

Delirium or apathy, with hot head.
‖Mind not affected. θEpilepsy.
Longs for solitude, yet dreads being alone. See 22.
Inclination to be angry, to bite.
Bites at surrounding objects.
‖Easily laughs or cries; cries much. θEpilepsy.
Fear of disease, of animals, of death.
‖Great anguish. θMeningitis.
Ill humor. See 23.
Becomes angry if misunderstood; before spasms.
Easily startled.

[3] **Sensorium.** Vertigo.
Vertigo, as if house was turned up side down.
Giddiness, with heaviness of head.
Vertigo, spasms, fainting followed by death.
‖Attacks were ushered in by numbness of brain. θEpilepsy.
Stupor and inability to speak.
Apathy following coma.

[3] **Inner Head.** Pressure like two iron hands holding temples.
Headache: after breakfast; aggravated by light and noise; accompanied by cold feet and palpitation of heart; one-sided (r. side), relieved by bleeding of nose.
‖Dull headache in l. side. θSoftening of brain.
‖Headache, with epilepsy.
‖Violent orgasm in head.
‖Congestive headache, with flushed face. θEpilepsy.

[4] **Outer Head.** Headache in forehead and on vertex; parts tender to touch, especially in evening.
‖Lancinations in occiput, inclining head to fall backward. θMeningitis.
Continued agitation of head and arms.
‖Head was at first drawn to one side, either r. or l., then backward, before an attack. θEpilepsy.
Profuse perspiration on head.
Hair falls out.

[5] **Sight and Eyes.** Cannot bear sight of brilliant objects.
Objects appear as if seen through a veil.
Amaurosis.
‖More acute vision, and eyes less sensitive to wind.
Itching in eyes, with dimness of sight.
‖Pupils largely dilated and unaffected by light before attack. θEpilepsy.
Ugly squinting look.
Eyes red, injected; itching, swollen, painful.
Spasmodic pain in eye, which appeared slightly injected.
Burning, itching and ulceration of lids, especially at canthi.

Digitized by Google

‖Eyes became highly injected; shrunken and lifeless in appearance, as the attacks multiplied. θEpilepsy.
‖Right eye open, l. nearly closed; eyeballs rolled upward and to l. before attack. θEpilepsy.
‖Left lid paralyzed, hangs down. θSoftening of brain.
‖Edges of eyelids red and some crusts in lashes. θEpilepsy.
A whitish crust over eyebrows.
‖Eyes sunken during spasm. θEpilepsy.
Incapable of opening lids, in coma.

[6] **Hearing and Ears.** Least noise is disagreeable; music is unbearable.
‖Beating in heart reverberates in ears. θMeningitis.
Hardness of hearing, especially for words.
Purulent otorrhœa; ulceration and bleeding of external ears; pains worse from cold washing. See 8 and 12.
Swelling of ears and parotids.

[7] **Smell and Nose.** Loss of smell.
Epistaxis almost producing faintness; relieves headache.
Sneezing in evening, when going to bed; coryza; pimples on upper lip.
Running of greenish-yellow, putrid mucus; < evening; cold air causes a feeling of corrosion.
Ulcerated, burning nostrils.
Mucus descends into posterior nares.

[8] **Upper Face.** Face much altered.
‖Distortion and turgescence of face; mouth and eyes convulsed; profuse sweat on face.
‖First muscles of face commenced to twitch, extending thence over whole body. θEpilepsy.
‖Face greyish; red, bloated during spasms.
Cold water causes a pricking of face. See 6, 12.
Momentary hot flushes of face.
‖‖Copious sweat running down face.
Burning and redness of swollen face.
Phlegmonous erysipelas, which leaves face deformed.
Erysipelas.
‖Face bathed in sweat during spasm. θEpilepsy.

[9] **Lower Face.** Pimples on upper lip, with coryza.

[10] **Teeth and Gums.** ‖Toothache.
Falling out of teeth.

[11] **Taste and Tongue.** Difficult mobility of tongue, it paralyzes rapidly; irritability of tongue and other muscles.
‖A kind of lapping motion of tongue, feeling of face and rubbing of nose before attacks. θEpilepsy.
‖Stuttering; ‖‖stammering; gets angry when incoherent speech is not understood. θChorea.
Stupor and inability to talk.

Digitized by Google

‖Bites the tongue.
Dry tongue.
‖Tongue cracked, bluish-black.
Lips and tongue black.

[12] **Inner Mouth.** Fetid odor from mouth.
‖Mouth wide open before an attack. θEpilepsy.
Mouth burning, as from acid; worse from cold water.
‖Sanguinolent salivation.
‖Bloody saliva. θSpasms.
‖During violent agitation of muscular system, ejection of frothy, bloody saliva from mouth. θEpilepsy.
Carried objects within his reach to his mouth to bite them.

[13] **Throat.** Mucus descends from nose into posterior nares.
Dryness in throat, impeding deglutition (morning).
Difficult swallowing, can hardly swallow saliva.
Convulsive and constrictive motion in throat, with a sensation like a stone there.
‖Fearful sore throat, could eat neither supper nor breakfast for it; verified at another time in same person.
‖Eruption in pharynx, like spots on skin. θEpilepsy.

[14] **Appetite, Thirst. Desires, Aversions.** Desire for sugar-water.
Desire for sweetened water and milk, yet they cause nausea and colic.
Longing for brandy; delights in getting drunk.
Aversion to food and drink.

[15] **Eating and Drinking.** Dizzy, drunken feeling after dinner.
Sleepiness after meals, especially after dinner. See 4.
After eating, irresistible sleepiness.
Colicky pain after drinking milk, and after smoking tobacco.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.
Eructations, as from rotten eggs.
Nausea and vomiting after the swelling.
‖Nausea in morning for a week.
Vomiting after drinking.
‖Yellow fluid in vomit, like that from eruption. θEpilepsy.
Vomiting of bile or of blood; burning, cramping in stomach.
Nervous excitement, with nausea or vomiting.

[17] **Scrobiculum and Stomach.** Sensation as if he would faint, from emptiness in stomach.
Weak, faint feeling in stomach. See 36.
Burning in stomach; lancinating pains radiating to liver and heart.

[18] **Hypochondria.** Rapid motion of diaphragm.

Digitized by Google

Pulsating, laming pain in liver, like an abscess; vomiting of bile.
Enlargement of liver.

[19] **Abdomen.** Colicky pains after milk, or from smoking tobacco.
Violent colic, with convulsive movements of jaws and limbs.
Spasms end by convulsive movements in abdomen.
‖The attack originates in abdomen. θEpilepsy.

[20] **Stool and Rectum.** ‖‖Dysentery, with delirium, headache and sleeplessness.
Bowels torpid.
Stools white.
Difficult, hard stool, with cold body and hot head.
Ascarides.
Hemorrhoidal tumors, with discharge of bright red blood.

[21] **Urinary Organs.** Burning pain in kidneys, with oppressed breathing and faintness.
‖Urine passes off involuntarily. θSoftening of brain.
Frequent discharge of pale urine.
‖During violent agitation of entire muscular system, discharge of urine. θEpilepsy.
Urine brown, of offensive odor.
Suppression of urine.

[22] **Male Sexual Organs.** Inclination to touch genitals.
Desire for solitude to practice onanism.
Involuntary seminal emission.
Impotence; semen is ejaculated too quickly, or fails entirely.
Semen is discharged too quickly, without pleasurable sensation, sometimes with cramps or painful heaviness in limbs.
‖Impotence of worst kind; produced in some and cured in others.
Spasms during coition.
‖‖Buboes.

[23] **Female Sexual Organs.** ‖‖Burning and swelling of ovaries.
‖Burning heat and stitches in ovaries.
‖Swelling and great sensitiveness of ovarian region.
‖Violent cramps in ovarian region, extending into groins.
‖Hydatids in ovaries.
Epileptic aura from uterus towards stomach.
‖Distending, burning pains or cramps in uterus; sharp, dagger-like pains; worse on walking or sitting too long. θCarcinoma uteri.
Ulceration of cervix uteri, with burning pains; offensive, purulent leucorrhœa.

Digitized by Google

‖Enormous blisters on tumefied uterus, discharging a thin, serous, yellow fluid. θEpilepsy.

Menstruation: suppressed (epilepsy); regular but rather scanty (epilepsy); too early, with headache; too early, preceded by headache, burning in uterus and vagina.

‖Spasms occur just before menses. θEpilepsy.

‖Attacks worse at time of menses, which return every three weeks. θEpilepsy.

During menses, contractive pain in liver, palpitation; shivering in legs.

After menses, ill-humored.

‖Yellow fluid in leucorrhœa, like from eruption. θEpilepsy.

[24] **Pregnancy. Parturition. Lactation.** ‖Hæmaturia in childbed.

Inflammation of mammæ; purulent sinuses; sensation as if breasts were torn towards belly.

;Puerperal convulsions if suppuration is suspected.

‖Cancer mammæ occultus.

‖Mammary cancer.

Milk mixed with blood.

‖Tumefaction like a cord from groin to knee. θMilk leg.

‖Child became epileptic in consequence of mother having a fright or fit of anger during nursing period.

[25] **Voice and Larynx. Trachea and Bronchia.** Burning, excoriation in larynx; bleeding fissures, causing quick, jerking cough.

[26] **Respiration.** ‖After convulsive movements became less rapid and violent, breathing became heavy and stertorous, with usual puffing of lips at every expiration, directly culminated in a deep-drawn sigh, and patient sank into coma, soon followed by the restlessness and convulsions as before. θEpilepsy.

Difficult breathing from compression of larynx, trachea and heaviness of chest; must sit up or bend forward. See 21.

Sensation as if chest and heart were constricted.

Breathing anxious, difficult, gets shorter and shorter, with fever.

Dyspnœa; pants like a dog.

[27] **Cough.** Cough from any emotion.

Cough from burning or stitches in larynx.

‖Cough nocturnal, provoked towards 3 or 4 A.M. by a tickling in larynx, which he feels only at this hour.

‖Cough in consequence of cold feet.

‖Violent cough, with vomiting.

‖Cough dry, with sharp pain or burning in chest.

‖Sputa mucous or sanguinolent, or formed of pure blood, raised most in morning and evening, with sensation of

Google

cold in chest; a sensation which is often succeeded by heat and congestion.

[28] **Inner Chest and Lungs.** Stitches in chest (r. side).
Burning like fire in lungs.
‖Laryngitis, hæmoptysis, phthisis pulmonalis.

[29] **Heart, Pulse and Circulation.** Palpitation; with headache; after a meal; with nausea; during menses; on awaking; evening.
Palpitation and oppression from walking fast.
Sticking pains about apex of heart.
Heart feels as if too large, as if drowned in a basin of water.
Sense of constriction about heart and chest. See 3.
Heaviness about heart.
Paralysis of heart.
‖Pulse became more and more rapid and threadlike as the paroxysms multiplied. θEpilepsy.

[31] **Neck and Back.** ‖Attacks ushered in by a jerk in nape of neck. θEpilepsy.
‖A swelling of bone size of fist. θCaries of dorsal vertebræ.

[32] **Upper Limbs.** Great desire to exercise arms. See 36.
Burning, lancinating in bones of arms. See 44.
‖Arms became stiffened before an attack. θEpilepsy.
Arms go to sleep easily.
‖Numbness of l. arm. θEpilepsy.
Swelling of wrists and finger joints, with burning and pulsating.
‖A blister in hand which recurred annually.
‖After a slight contusion of (little) finger, tearing pain, with redness along whole arm, following lymphatic vessels into armpit, causing there painful glandular swellings.
‖Contractions of fingers of r. hand, then left, followed the lapping motion of tongue, with thumbs drawn into palms; before an attack. θEpilepsy.
Panaritium, swelling blue black around nail (thumb), followed by suppuration.
‖Panaritium; pains run in streaks all the way up arm.

[33] **Lower Limbs.** ‖‖Ischias.
‖‖Lower limbs are more in motion than upper.
Cramps in legs, awaking him from his sleep.
Legs drawn backward until they touch glutei.
‖Lower limbs straight and stiff before attack. θEpilepsy.
‖Lower limbs get weak, has to take first one stick, then two to be able to walk. θSoftening of brain.
Great weakness of legs.
Shooting, boring in knees, ankles, feet; worse moving.

Digitized by Google

Swelling of knees, with pulsative and distending pains.
‖‖Podagra.

" **Limbs in General.** Limbs are very easily moved.
Contusive pains in arms, legs and loins, during movement.
Trembling of limbs; heaviness.
Cramps in limbs; worse in cold air.
Arthritic swellings.
‖Swelling of hands and arms; burning pains. θErysipelas.
Large yellow blisters in palms and soles, of three inches circumference; the fluid oozing out is yellowish and corroding; repeatedly on several places.

" **Rest. Position. Motion.** ‖Pain in limbs since months, he is bent and cannot walk without a stick. θCaries of dorsal vertebræ.
‖Each attack heralded by restless movements of limbs and body. θEpilepsy.
Sitting too long, uterine pains.
Must sit up: dyspnœa.
Inclined to lie on l. side.
Lying on back increases sufferings.
Walking: distending, burning pain or cramps in uterus; dagger-like pains <; fast, palpitation and apprehension.
Sitting: distensive, burning pain; cramps in uterus; dagger-like pains <; difficult breathing better.
Bending forward: difficult breathing better.
Motion: discharge of urine from violent agitation of muscular system; desire to exercise arms; lower limbs move more than upper; shooting, burning in knees, ankles and feet <; contusive pains in arms, legs and loins.

" **Nerves.** Great muscular strength; prefers jumping to walking.
Great mobility of limbs.
‖‖Repeated shocks through whole body.
‖Up to period of beginning, muscles were in a state of tonic contraction, but then jactitations or twitchings commenced. θEpilepsy.
Twitching of muscles.
‖Twitching over whole body increased rapidly in severity, till entire muscular system became violently agitated. θEpilepsy.
‖‖Tonic and clonic spasms.
Spasms begin in solar plexus.
‖‖Loss of consciousness and falling down.
‖Convulsions. θEpilepsy (after fright).
‖Epilepsy after onanism. Compare *Sulphur*.
‖‖Spasms caused by or associated with suppuration of internal parts.

Digitized by Google

‖Convulsion of limbs. θSoftening of brain.
‖Spasms: from fright; at new moon; after onanism; during coitus.
Before spasm: ‖angry for several days; ‖face greyish-yellow, eyes sunken; jerks in back of neck.
During attack: ‖face distorted, red, biting tongue; bloody saliva; violent movements of limbs; ‖profuse sweat.
After attack: spasmodic movements of intestines; ‖profound sleep.
Subsultus tendinum.
‖Falls to ground unconscious, with a blood-curdling, wild cry, followed by spasms in limbs; distorted facial muscles, grinding teeth and foaming mouth; ending in loud, snoring sleep. θEpilepsy.
‖‖Spasms very severe, followed by sleep. θEpilepsy pain.
‖Attacks come on in sleep, are followed by severe pain and pressure in top of head. θEpilepsy.
‖Dreadful paroxysm several times a week. θEpilepsy.
‖Fifty paroxysms occurred during fifteen hours, with complete unconsciousness. θEpilepsy.
Trembling, faint, with a sensation of emptiness in stomach; tottering gait. See 33.
Great weakness; fainting.
‖‖Paralysis.

Sleep. Sleepiness: after meals; when he smokes tobacco in forenoon.
Sleepy, stupid after eating, or after having been in open air.
Sleepy, as if drunken; congestion to head.
Drowsy, but cannot sleep, from agitation; constantly turning in bed.
‖After a deep-drawn sigh, patient sank away into a comatose condition, from which no effort could rouse him. θEpilepsy.
Continued yawning, could not keep lids open.
‖Very profound coma subsequent to attacks. θEpilepsy.
Child cries and complains, finally becomes comatose.
‖Stupid sleep after epileptic attack.
Starts in sleep, awakens as if frightened; palpitation.
‖At midnight seized with convulsions, recurring every twenty minutes till 4 P.M. of next day.
On awaking, aggravation of all sufferings; neck stiff; arthritic pains.

Time. Midnight: convulsions, returning every twenty minutes, till 4 P.M.
Morning: dryness in throat; nausea; mucous or sanguinolent sputa <; aggravation of all symptoms; neck stiff; arthritic pains; sweat towards morning.
Evening: headache in forehead and vertex; sneezing;

Digitized by Google

putrid, greenish-yellow mucus from nose <; mucous or sanguinolent sputa <; palpitation with headache; symptoms generally worse.

‖Attacks appear with change of moon. θEpilepsy.

[39] **Temperature and Weather.** The warm room is unpleasant.

‖Headache and flushed face much < in warm room or near stove; > from cold bathing or in cold air. θEpilepsy.

‖Putting feet in hot water and drinking something hot, sometimes breaks up the attack. θEpilepsy.

Great sensibility to open, cold air and wind. See 34, 37, 40.

Open air: coldness; moist skin; nervousness and trembling worse.

Cold: air causes corrosion of nostrils; water causes pricking of face; water, burning of mouth <; air, cramps in limbs.

Wind: eyes less sensitive to.

[40] **Fever.** Coldness and shivering, with moist skin, nervousness and trembling; < going into open air.

Heat, with apathy or delirium, and cold feet.

‖The limbs get cold, head and face increasingly hot, as paroxysms multiply. θEpilepsy.

Burning heat in various parts.

Limbs burning hot during fever.

‖Hot head, cold body; delirium or apathy; constipation.

Profuse, oily sweat on head and face.

‖‖Bathed in sweat. θEpilepsy.

‖‖Profuse sweat, weak; spasms.

Sweat during sleep, towards morning.

‖The body, and especially hands and arms, bathed in a clammy perspiration, as attacks multiplied. θEpilepsy.

‖Checked sweat, now very copious, most towards morning. θSoftening of brain.

‖Cold sweat.

‖‖Quartana.

⁝Plague.

[41] **Attacks, Periodicity.** ‖Every week, on one day, four attacks. θEpilepsy.

‖About once a week, always in night, followed by some hours of coma. θEpileptic spasms.

‖Has from ten to twelve attacks yearly. θEpilepsy.

‖Attacks since about five years. θEpilepsy.

[42] **Locality and Direction.** Right: eye open; stitches in chest.

Left: dull headache; eye nearly closed; lid paralyzed.

[43] **Sensations.** Vertigo as if house was turned upside down;

Digitized by Google

heart as if too large, as if drowned in a basin of water; as if breasts were torn towards belly.

‖If awake she has some warning, from a feeling of general numbness, immediately followed by a spasm. θEpilepsy.

Lancinating: in occiput; in stomach to liver and heart; in bones of arms.

Stitching: in ovaries; in larynx; in chest, r. side; about apex of heart; in skin.

Pricking: of face from cold water.

Shooting: in knees, ankles and feet.

Tearing: along arm.

Contusion: in arms, legs and loins during motion.

Pressure: like two iron bands holding temples; in top of head.

Aching: of head after meal; one-sided headache; of head with epilepsy; in forehead and vertex; of teeth; of head during menstruation.

Soreness: of throat.

Burning: of eyelids; of nostrils; of face; of mouth; in stomach; in kidneys; of ovaries; pain in uterus; in uterus and vagina; during menstruation; in larynx; in chest; like fire in lungs; in bones of arms; of wrists and finger joints; in knees, ankles and feet; in hands and arm; heat in various parts; of skin.

Pain: of eyes; spasmodic in eye; colic after drinking milk or smoking; dagger-like in uterus; in streaks up arm; arthritic pains on awakening.

Cramps: in ovarian region; in uterus; in legs.

Tenderness: of forehead and vertex; of ovarian region; of bones.

Twitching: of whole body.

Compression: of larynx, trachea.

Contraction: in liver; of chest and heart.

Constriction: about heart and chest.

Distension: in uterus; pain in knees.

Largeness: of heart.

Emptiness: in stomach.

Heaviness: in limbs, from coition; of chest; about heart; of limbs.

Stone: sensation of, in throat.

Pulsating: pain in liver, abscess-like; of wrists and finger joints; pain in knees, with swelling.

Beating: in ear.

Weakness: of legs; great weakness and fainting.

Faintness: from epistaxis; in stomach.

Heat: of head and face.

Shivering: in legs.

Digitized by Google

Coldness: of feet, with headache; of feet, causing cough; in chest; of limbs, with moist skin.
Numbness: of brain; of l. arm.
Tickling: in larynx.
Itching: in eyes, with dimness of sight; of eyelids; of lower limbs.
Dryness: of tongue; in throat.

" **Tissues.** Bleeding.
‖Redness and swelling along course of lymphatics, after wounds, etc. See 24, 32.
Subsultus tendinum and contraction of muscles.
Bones sensitive; bones of legs brittle; caries of spinal vertebræ; pains in joints as if crushed; arthritis; tophi on knees and feet.
Scrofulosis; fistula; carbuncles.
‖‖Open cancer.
Swelling of whole body, which turns a deep yellow.
Swelling of body like hydrops, with great oppression.

" **Touch. Passive Motion. Injuries.** Small wounds suppurate much.
‖Tendency of wounds to suppurate, with throbbing and lancinating pains.
Lymphatics swell after a wound.
‖Depression of skull from a horse's kick on occiput. θEpilepsy.
‖Convulsions after having teeth extracted. θEpilepsy.
‖When suppurations seem to be the cause of convulsions. θEpilepsy.
Touch: tenderness of forehead and vertex; ovarian region sensitive.

" **Skin.** ‖Stitches in skin prevent sleep at night. θSoftening of brain.
‖Red or purplish streaks in neck, back or other parts. θMeningitis.
Yellow color of skin.
Skin greenish, dirty, oily, or ‖greyish-yellow. See 36.
Erysipelatous eruptions.
Pustules, tetters and eruption of small nodules.
Large yellow blisters, like pemphigus, mostly on palms of hands and soles of feet; burning.
‖Pompholyx in hand returning every year.
‖Phlyctenoid eruption, discharging a thin, yellow fluid, similar to that appearing in vomit and leucorrhœa. θEpilepsy.
Moist tetters, with suppurating places resembling flat ulcers, in mane of horses.
‖Bluish-black swelling around (thumb) nail, followed by suppuration. θPanaritium.

Digitized by Google

‖Ulcers, with burning pains.
‖‖Malignant pustule.
‖Carbuncles; blue far around.
‖‖Carbunculus pestilentialis.
Chilblains.

" **Stages of Life, Constitution.** Boy, æt. 6, inclination to touch genitals.
‖Boy, æt. 11, good constitution; epileptic attack six months ago, without apparent cause.
‖Woman, æt. 30, wreck in mind and body from epilepsy.
‖Woman, æt. 40, suffered thirty years with epileptic spasms.
‖Woman, æt. 24, suffered for more than a year with epilepsy.
Child, æt. 6, had some poison spirted into his r. eye by a toad, during a dry, hot June day in Rome.

" **Relations.** Antidoted by: *Laches., Senega.*
Compare: In convulsions from low grades of suppuration, *Arsen., Canthar., Laches., Tarent.;* in epilepsy, aura starting in solar-plexus, *Artem., Calc. ost., Nux vom., Silica;* aura starting in arm, *Laches., Sulphur;* in chorea, patient cannot walk, must run or jump, *Kali brom., Natr. mur.;* in masturbation, impotence, etc., *Hyosc., Mercur.,* ‖‖*Sulphur;* in malignant pustule, *Antim. crud., Laches.;* in bullæ, panaritia, etc., *Hepar, Laches., Phosph. ac., Silica.*
Cubebæ is similar to *Bufo* (Lippe).
Complementary: *Salamandra* (epilepsy, cerebral softening).

Digitized by Google

CACTUS GRANDIFLORUS.

Nightblooming Cereus. *Cactaceæ.*

We are indebted for this very valuable medicine to the wife of Dr. Rubini in Naples. Admiring the great beauty and sweet odor of the flower, and knowing its short life, opening at evening, closing and dying before dawn of day, she induced her husband to make a preparation from the young flower, from which is their masterly proving, which will be a boon to suffering humanity to the end of time. In 1864 Rocco Rubini published his monograph, and in 1865 Dr. A. Lippe published the first correct and complete translation of it into English. All other translations into English and German are full of errors and omissions. Later provings have been made by Hencke, Lemke, especially by Barnes, Hom. Observer, vol. iii, p. 78, 1860. Same year some symptoms were observed by C.Hg. and G. Bute.

Mind. General stupidity.

Difficulty in finding right expression when writing the symptoms down.

Thinks she will not recover; weeps much; despondent. θCardiac rheumatism.

Feels she is dying and thinks she will not live till morning, but has no fear of death. θCardiac rheumatism.

Love of solitude.

Irresistible inclination to cry (an intelligent woman).

Cries, knows not why; consolation aggravates.

Screaming with pains, or complete loss of consciousness. θCardiac rheumatism.

Taciturn, unwilling to speak a word or to answer.

Cheerful and vivacious. θHeart disease.

Sadness, taciturnity, and irresistible inclination to weep.

Invincible sadness.

Hypochondriacal.

Fear of death; he believes his disease incurable.

Indescribable fear that something terrible is going to happen to him.

During and after attack, great anxiety, fearing some organic lesion of heart which will cause sudden death. θAnginn pectoris.

Anxiety returning in evening.

Easily frightened, often awakes in a fright. θEnlargement of heart.

Felt much alarmed on waking, but could not tell cause of alarm.

Digitized by Google

[3] **Sensorium.** ‖Vertigo from congestion; face red, bloated; pulsation in brain; madness, anxiety.

‖Vertigo; < from physical exertion, turning in bed, stooping, rising from a recumbent position, and deep inspiration.

[3] **Inner Head.** Heaviness of head.

A numb pain with a stupefied feeling, extending from above eyes across base of brain.

Pain in forehead and eyes, with ringing in ears.

Stinging pain in forehead over eyes.

Pulsation in temples as if skull would burst; intolerable at night.

‖Pain in r. temple by spells, brought on by a glass of wine, attending opera, or after getting dinner at too late an hour.

Congestion to brain, bloodshot eyes, coma, suffocation, flushes in face; fever, from exposure to sun's rays.

‖‖Heavy pain like a weight on vertex; > by pressure, but < from sounds, hearing talking, or strong light.

‖‖Right-sided headaches and neuralgias which are periodic, pulsating and throbbing, and of an extreme type.

‖Pulsating pain, with sensation of weight in r. side of head, continuing day and night, so severe as to make him cry out.

‖Heavy pulsating pain in head.

Troublesome pressure in r. parietal bone; later pain in l. parietal bone, early on rising.

‖Pain and pressure on vertex, with palpitation and sensation as if heart was grasped. θCoryza.

‖Tensive pain on vertex.

‖Feeling as if head was compressed in a vise and that it would burst open from severity of pain; after catching cold.

‖Something seems to be whirling up from chest to brain, and all arteries seem to throb; feels as if dying. θRheumatism of heart.

‖‖Headache from noise and light.

‖Headache commences in morning and grows, as day advances, to an unendurable height, with vomiting.

Excessive pain in head, so anxious he cannot remain in bed; prostrated, weak.

Headache in different parts of head; < from motion and deep inspiration.

‖Headache from sanguineous congestion or rheumatism.

‖‖Cerebral congestion.

‖‖Sanguineous apoplexy.

[4] **Outer Head.** ‖Pain in r. temple coming in spells; begins in morning, increases during day, with vomiting; nose

Digitized by Google

constantly dry; must lie perfectly quiet; < from keeping up, noise, light or exertion.
Pressive pain in l. parietal bone, rather external.
Painful drawing in aponeurotic covering of occiput; > bending head backward.
Cold, clammy sweat on forehead, upper and lower limbs. θCardiac rheumatism.

[5] **Sight and Eyes.** ❙Sensitive to light. θHeadache.
Dimness of sight from circles of red light before eyes.
At a short distance he cannot recognize a friend.
Dark spots before eyes, with pain in forehead and eyes.
❙Dimness of sight; cannot see at a distance; objects appear to be obscured.
Weakness of sight returning periodically.
Sight blurred.
❙Eyes bloodshot; cerebral congestion even to coma, when perspiration fails. θIntermittent.
❙Acute rheumatic ophthalmia.
Hyperæmia of eye, especially of fundus.
❙Exophthalmic goitre. θHeart disease.

[6] **Hearing and Ears.** Worse from sounds, even talking; heavy pain like a weight in vertex.
❙❙Singing or ringing in ears.
Hardness of hearing from congestion; pulsations in ears; noise like running water or buzzing.
Hearing diminished by buzzing in ears.
❙Pulsations and buzzing in ears. θOtitis.
❙Rheumatic otitis.
❙Otitis from checked perspiration.

[7] **Smell and Nose.** Fluent, acrid coryza; nostrils sore.
❙Dry or fluent coryza.
Dry and unpleasant coryza; must lie at night with mouth open.
❙Constant dry nose. θHeadache.
❙Profuse nosebleed, soon ceasing.

[8] **Upper Face.** ❙Prosopalgia, right-sided, chronic; < from slightest exertion, tolerable only when lying still in bed; brought on by wine, music, strong light, or missing dinner at usual hour.
❙Flushes of heat in face, with suffocation. θIntermittent.
❙Face bloated and red, with pulsation in head.
❙Paleness of face and emaciation.
Pale, deathlike countenance. θCardiac rheumatism.
Anxious look, pale face, purplish lips. θCardiac rheumatism.
❙Blue face, with chill. θIntermittent.
❙Face and head swollen and discolored. θHeart disease.

[11] **Taste and Tongue.** Taste acrid.

Digitized by Google

Loss of taste for food, with nausea.
Tongue purple, with thick, brown sordes on teeth. θLow fever.
Prickling in point of tongue.

[13] **Inner Mouth.** Fetid breath in morning.
Breath very offensive. θLow fever.

[13] **Throat.** Throat feels sore.
Feeling of warmth about throat and chest.
Constriction of œsophagus: prevents swallowing; must drink large quantities to force fluid into stomach.
Constriction of throat, exciting a constant desire to swallow.
Suffocative constriction at throat, with full throbbing carotids. θAngina pectoris.
Scraping sensation at soft palate, lasting about an hour.

[14] **Appetite, Thirst. Desires, Aversions.** Appetite good but digestion weak.
Loss of appetite and taste for food; nausea.
Loss of appetite. θCardiac rheumatism.
Complete loss of appetite; he cannot take least morsel.
No desire for meat, of which he had been very fond. θHeart disease.
No appetite; stomach rejecting anything she tried to take. θLow fever.

[15] **Eating and Drinking.** After eating: weight and distress in stomach.
After dinner: pulsation (in cœliac axis) behind stomach.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea in morning, continues all day.
Acrid, sour fluid, rising into throat and mouth, making food taste acid.
Vomiting of blood.
Violent vomiting when perspiration fails. θIntermittent.
Frequent vomiting. θLow fever.
Hæmatemesis.

[17] **Scrobiculum and Stomach.** Indigestion; sensation as if stomach was closed, with constipation; palpitation and sensation of constriction of heart; < ascending and walking.
Sensation of emptiness in stomach, with appetite undisturbed and stool as usual.
Acrid acid in stomach, which rises in throat and mouth.
Uncomfortable sensation at pit of stomach, as if falling. θAngina pectoris.
Constrictive feeling at scrobiculus cordis, extending to hypochondria, impeding breathing.
Sharp neuralgic pains in cardia, causing patient to weep and cry loudly.

Digitized by Google

Burning in pit of stomach.
‖Strong pulsation in scrobiculus.
‖Rumbling in stomach precedes aggravation of palpitation.
‖‖Sensation of weight with oppression in stomach.
Burning pulsation or heaviness in stomach.
‖Continuous and annoying pulsation and burning in stomach. θClimaxis.
‖A constant fluttering sensation in stomach, over location of cœliac axis, in a spot, size of about a dollar; a burning line extends down from it to lower ribs on either side; a hot flash shoots downward frequently. θLow fever.

[18] **Hypochondria.** Jerking pain on r. side below short ribs, extending backward.
‖Engorgement of liver; acute or chronic. θHeart disease.
Pain in epigastrium, somewhat to l., later lower down on r. side.
‖Sharp pains shooting through diaphragm and up into chest; jerking breathing. θRheumatism of diaphragm.
‖‖Feeling as of a cord tightly tied around lower part of chest; marking out attachment of diaphragm. θRheumatism of diaphragm.

[19] **Abdomen.** πDull pains in abdomen, then flushes of heat and tingling. θRheumatism, with palpitation.
Pain in middle of lower abdomen, somewhat to r., soon after going to bed.
Violent pains in bowels almost causing him to faint.
Wandering pains in umbilical region, which cease and recur periodically.
πCrampy pain about navel, with soreness as from a foreign body; < on motion.
πColic, > after loose stool. θRheumatism and palpitation.
‖Beating in abdomen. θPalpitation of heart.
Insupportable heat in abdomen, as though something burned him internally.
‖Pain in lower portion of abdomen and a bearing-down sensation, at times quite severe. θLow fever.
‖Peritonitis.
‖Enteritis.
‖‖Severe gastro-enteritis.
‖Gastric fever.

[20] **Stool and Rectum.** ‖Morning diarrhœa of very loose feces, preceded by great pain. θHeart affection.
Diarrhœa, watery mucus, bilious (in forenoon).
‖Stools scanty, resembling dirty water, averaging as often as every hour. θLow fever.
‖Diarrhœa; < in forenoon.
‖Diarrhœa, with heart affections.

Digitized by Google

‖Irregular stools. θPalpitation of heart.
Constipation; stool hard and black.
‖Constipation from hemorrhoidal congestion.
‖Sensation of weight in anus, and a strong desire to evacuate a great quantity; however, nothing passes. θHeart affections.
Peculiar sensation at anus, as though rectum was swollen, causing scraping and prickling sensation during stool.
Swollen, painful varices at anus.
Copious hemorrhage from anus.
‖‖Fluent hemorrhoids.
Pricking in anus, as from pins, ceasing on slight friction.
Itching in anus.
‖Fistula in ano, with violent palpitation and oppression of heart.

[21] **Urinary Organs.** ‖Paralysis of bladder.
Constriction of neck of bladder.
Frequent but ineffectual desire to urinate.
‖‖Desire to urinate; after attempting to do so for a long time, water passes abundantly.
‖Insupportable irritation in urethra, as if he would pass water constantly.
‖Frequent desire to urinate, with an abundant flow of urine, each time, during night.
Urine passes by drops, with much burning.
Urine seems diminished in quantity.
‖Strangury.
‖Suppression of urine and pains in bladder during febrile access, when perspiration fails: θIntermittent.
‖Urine scanty, not very frequent, but burning and scalding. θLow fever.
Profuse urine, of a straw color.
Urine, on cooling, deposits a red sand.
‖Urine reddish, turbid, very abundant.
‖‖Hæmaturia; urination prevented by clots.

[22] **Male Sexual Organs.** Prostatic affections: weight in anus; constriction of bladder; desire to pass water, unable to pass it for a time, but finally succeeded; irritation as if he should pass water constantly.

[23] **Female Sexual Organs.** ‖Painful constriction around pelvis, extending gradually towards stomach, causing a sensation as of a great blow in region of kidneys, making her cry out.
‖Pulsating pain in uterus and ovarian region; pains extend down thighs, returning periodically at same time each day.
‖Ovaritis.
Sensation of constriction in uterine region.

Digitized by Google

‖Spasmodic constriction in uterus and vagina, often from least touch, coming on suddenly and going off in a few minutes.

Hysteralgia: sadness; crying, but without reason; consolation agravates; love of solitude; fear of death; constriction of uterus; whole body feels as if caged in wires. See 43.

Pains in uterus and its ligaments, returning periodically each evening.

‖Metritis.

‖Menses too soon; black, pitchlike.

‖Very painful menstruation.

‖Menstruation, with most horrible pains, causing her to cry aloud and weep.

‖Sensation of contraction of uterus during profuse menses.

‖Menstruation, with constrictive spasm of uterus; pains agonizing, < evening; flow scanty, ceases when lying down.

‖Menses ceasing at night.

‖‖Constriction of vagina preventing coition. θVaginismus.

Pregnancy. Parturition. Lactation. Labor suppressed.

‖Inflamination of mammæ; sensation of fulness in chest; oversensitive to cold air.

Cyanosis in infants. Compare *Laches.*

Voice and Larynx. Trachea and Bronchia. ‖Voice low, hoarse, constriction of chest.

‖Bronchial symptoms arising from overaction of heart.

‖Acute bronchitis.

‖Bronchitis, with expectoration of mucus, day and night.

‖Chronic bronchitis, with rattling of mucus; becoming acute in consequence of a cold, causes great anxiety and suffocation.

‖Chronic bronchitis, of many years' standing, with rattling of mucus, continues day and night; oppression of breathing on going up-stairs, and inability to lie horizontally in bed.

‖Voice moderately full at times; then decreasing, with a peculiar whistling sound, almost to a whisper. θLow fever.

Respiration. ‖Inspiring fresh air is very reviving.

‖Jerking breathing. θRheumatism of diaphragm.

‖Breathing became more and more labored, so that she could not lie down. θCardiac dropsy.

‖Short breathing; oppression; anxiety and feeling of constriction as though a band encircled the chest. θPalpitation of heart.

‖‖Difficulty of breathing; continued oppression and un-

Digitized by Google

easiness, as if chest was constricted with an iron band, and could not dilate for normal respiration.
Shortness of breath while walking, especially on ascending stairs.
Slight dyspnœa during day while walking.
Oppression of breathing on going up-stairs. θBronchitis.
Oppression of chest, as from a great weight, difficult breathing; uneasiness, as if an iron band prevented normal motion of chest.
Chronic oppression of breathing.
Feeling of oppression during respiration. θPalpitation of heart.
Oppression on chest like a great weight, or as if chest was compressed, with fainting, cold sweat, loss of pulse.
Compression of chest. θFatty hypertrophy of heart.
Congestive asthma.
Suffocative attacks, with turbulent action of heart; < at 11 P.M. θEnlarged heart in a young woman.
Frequent attacks of asthma, with stricture around chest, like a band of iron.
Periodical attacks of suffocation, with fainting, cold perspiration on face, and loss of pulse.
Sense of constriction of chest, with suffocation. θRheumatism and pain in heart.
Suffocative dyspnœa, with chill, in child, æt. 6 months. θIntermittent.
Frequently, every year, a sensation of a hoop around throat, another around heart, and another around diaphragm. θAsthma.
Could only breathe with shoulders elevated and lying on back. θCardiac rheumatism.
When breath stops, there is violent gasping and palpitation. θCardiac rheumatism.
Sometimes breath stops altogether for half a minute, but without unconsciousness, skin gets colder; afterwards gasping. θCardiac rheumatism.

Cough. Dry cough from tickling in throat and from itching in larynx.
Spasmodic cough, with copious, mucous expectoration.
Cough, with thick yellow sputa, like boiled starch.
Catarrhal cough, with much viscid expectoration.
Catarrhal fevers.
Obstinate, stertorous cough; < at night.
Excessive secretion of mucus, with oppression, when attempting to lie down; face and limbs cold; heart felt as if clutched. θChronic bronchitis.
Sputa copious, yellow and jellylike. θLow fever.

Inner Chest and Lungs. Great fulness in chest, extending up to throat. θPalpitation of heart.

Google

‖Congestion of lungs. θCardiac dropsy.
‖‖Congestion to chest, which prevents lying down; palpitation; constriction of chest.
Feeling of constriction in chest, as if bound; hindering respiration.
Sensation of great constriction in middle of sternum, as if parts were compressed by iron pincers, which compression produces oppression of respiration.
‖Griping pain behind sternum.
‖Feeling of constriction in chest, impeding speech.
‖Painful sensation of constriction in lower part of chest, as if a cord was tightly bound around false ribs, with obstruction of breathing.
Dull pain in lungs.
‖Dull percussion sound in front to fourth r. rib. θPleuritis.
‖Pain from lower part of chest to shoulder blades. θPleuritis.
‖Pricking pains in chest, oppressed respiration, intense cough; bloody sputa; hard, quick, vibrating pulse; sharp, wandering pains in chest and scapular region. θPneumonia.
‖Abnormal respiratory murmur and bronchial respiration. θPleuritis.
‖Continual rattling of mucus; oppressed breathing; cannot lie in a horizontal position; attacks of anxiety and suffocation.
Pressive pain in upper part of l. chest, between second and third ribs, at 8 A.M., while sitting quietly; dyspnœa inducing deep breathing and lasting several minutes.
Pressive pain in upper part of r. chest; difficult breathing.
Pressive pain in chest causing dyspnœa and inducing deep breathing; < while walking.
‖Hepatization of lungs.
‖Pulmonary tuberculosis in first stage.
‖‖Bronchitis, with palpitation of heart and bronchial catarrh, from overaction of heart.
‖‖Hæmoptysis, with marked arterial excitement (but less fever and restlessness than *Acon.*); convulsive cough.
‖Pneumorrhagia, renewed every four, six, seven, or eight hours, accompanied each time with convulsive cough, and expectoration of two or three pounds of blood; is at once relieved, and ceases entirely in four days.

[29] **Heart, Pulse and Circulation.** Pain deep in heart, somewhat to the right and posteriorly, like a jerking body; often repeated during four or five hours; later, often but less violent, and a little higher up.
Whizzing to and fro sound; bruit de soufflet.

Google

When the breath stops there is violent palpitation, and something seemed to be whirling up from chest to brain, and all arteries seemed throbbing.

Sensation of an annoying movement from before backward in cardiac region as of a reptile; < by day than by night.

Sensation as if heart turned over.

Sensation in chest as if heart whirled round, first in one direction and then in another. θHeart affection.

At times felt as if some one was grasping heart firmly, with sensation as if it whirled around.

Contractive pain in region of heart going down to l. abdomen; it catches breath; cold feeling in chest at seat of pain; low spirited; weeping.

Sensation of constriction in heart, as if an iron hand prevented its normal movements.

Dull, heavy pain, < from pressure; suffocating respiration; face blue; œdema, especially of l. hand and of legs to knees; feet icy cold; pulse intermittent. θChronic carditis.

Great pressure at heart, going around under l. axilla to l. back, "like a belt of pain;" at midnight became very bad, like a hand grasping heart, with soreness and aching, and soreness to touch in all affected region; also, sore aching in l. arm down to elbow; the cardiac pain ultimately caused dyspnœa. θCardiac rheumatism.

Pain in cardiac region. θPalpitation of heart.

Acute pains and stitches in heart.

Pricking pains impeding breathing and movements of body; oppression; cannot lie on left side; blue face; pulse quick, throbbing, tense and hard. θCarditis. θCardiac rheumatism.

Very acute pain, and such painful stitches in heart as to cause him to weep and to cry out loudly, with distressing palpitation, faintness, dyspnœa.

Lancinating pain in heart when perspiration fails. θIntermittent.

Paroxysms of violent, stitching pain in heart, with icy coldness of limbs. θSequel to rheumatism.

Constant pain in region of heart, with sensation as if heart was "bound down," or "had not room enough to beat," or "as if bolts were holding it." θSequel to rheumatism.

Feeling as if heart was compressed or squeezed by a hand.

Cardiac rheumatism. Compare *Spigel.*

Heart seemed to be held by an iron hand for many hours. θAngina pectoris. θCardiac rheumatism. θFatty degeneration. θHypertrophy.

Google

Pains in apex of heart shooting down l. arm to ends of fingers; feeble pulse; dyspnœa.

‖Pain in heart worse on speaking or lying on l. side. θCardiac rheumatism.

‖Pain at heart paroxysmal. θCardiac rheumatism.

‖Acute carditis, with blueness of face; oppression of breathing; dry cough; pricking pain in heart; cannot lie on l. side; pulse quick, throbbing, tense and hard.

‖Acute inflammatory affection of heart; idiopathic or from rheumatism.

‖Rheumatic inflammation of heart, with severe pain in apex, and pain shooting down l. arm to end of fingers; dyspnœa; pulse feeble, 120.

‖Chronic carditis, with œdematous and cyanotic face; suffocating respiration; continued dull pain in heart; dropsical effusion throughout body; cannot drink or speak; hands and feet cold; pulse intermittent.

‖Functional disorder of heart, from mental emotions; < at menstrual period.

‖Fluttering sensation in heart like a bird's wing. θChronic palpitation.

‖Increased pulsation of heart, and while walking pulsation in chest with anxiety, lasting all morning, accompanied by pressure in l parietal bone.

Palpitation of heart on ascending stairs

‖Palpitation causing great restlessness and uneasiness.

‖Occasional attacks of palpitation after unusual physical or mental exertion. θAngina pectoris.

‖Palpitation of long standing, caused by an unfortunate love affair.

Palpitation with vertigo, loss of consciousness, dyspnœa; worse walking, at night; lying on l. side; at approach of menses; from any exertion.

‖‖Palpitation of heart, continued day and night; < when walking, and at night, when lying on l. side.

‖Violent palpitation with suffocative spells when lying down. θFatty hypertrophy of heart.

‖Palpitation with sensation of heaviness; stitching pains in heart; pulse small, weak and rapid. θHeart disease.

‖Irregular palpitation of heart at night; ‖when lying on l. side or turning in bed; > from an upright posture and ‖deep inspiration.

‖Palpitation < at night, most before midnight, and lying on l. side.

‖Violent palpitation with very distressing dyspnœa. θCardiac dropsy.

‖Slow, cutting pain, from above downward through centre of heart, making motion or breathing impossible.

Digitized by Google

‖Apex beat one inch without a line drawn vertically through nipple. θEnlargement of heart.
‖Palpitation of heart consists of small irregular beats, with necessity for deep inspiration; slight excitement or deep thought is sufficient to produce this condition.
‖Irregular and intermittent action of heart. θAfter delivery by forceps.
‖Rapid, short, irregular beats of heart, on rapid motion.
‖Several violent, irregular beats of heart, with sensation of pressure and heaviness in cardiac region.
‖Violent, turbulent action of heart, it beats violently for a short time, then ceases entirely. θCardiac rheumatism.
‖Organic and nervous palpitation of heart.
Great irregularity of heart's action, intermittent at times and of varying character; great frequency of action and alternating with slowness. θEnlargement of l. ventricle with great irritation of cardiac nerves.
‖Dulness in præcordia extensive; blowing with first sound of heart heard most distinctly at apex. θCardiac rheumatism.
‖Endocardial murmurs; excessive impulse; increased præcordial dulness. θEnlarged r. ventricle.
‖Mitral regurgitation. θCardiac dropsy.
‖Stenocardia.
‖‖Heart disease, with œdema of l. hand only.
‖Valvular diseases, second sound of heart being replaced by a harsh murmur.
‖Second sound of heart lost. θCardiac rheumatism.
‖Valvular derangement and dilatation of r. ventricle.
‖Insufficiency of aortic valve.
‖Mitral insufficiency, with eccentric hypertrophy of l. ventricle.
‖‖Aneurism of heart and large arteries.
‖‖Hypertrophy, with dilatation; patient pulseless, extremely exhausted, panting and sad, cannot lie down or speak; has scarcely slept for fifteen days; forgetful; feet œdematous.
In fifteen minutes, pulse 82; in thirty minutes, 88; after a strong dose, in fifteen minutes, 80; in thirty minutes, 72; two hours, 64.
‖Pulse 105. θCardiac rheumatism.
Pulse: 82; fell to 78; weak; in thirty minutes, 74.
‖Feeble pulse. θDyspnœa.
Later, pulse softer and more feeble, with a sense of weakness throughout whole body, most in back part of neck; it is troublesome to hold up head.
‖Pulse feeble, intermittent, or entirely gone. θRheumatism and pain in heart.

Digitized by Google

‖Deathlike feeling at heart and around to l. back. θCardiac rheumatism.
Powerful pulse beat and pulsation in upper part of chest, at night in bed.
Pulse at wrist beats hard and quick against finger without being frequent.
The heartbeat and pulsation in chest stronger to hearing and feeling while lying on back than on side, with anxiety and restlessness.
Pulse very irregular and soft, running from 60 to 68 for several hours.
‖Pulse small, quick and irregular, intermitting at intervals, especially when excited. θPalpitation of heart.
‖Irregular rhythm, and intermitting pulse. θHypertrophy of heart.
; Aneurism: by anastomosis; of aorta.

[30] **Outer Chest.** Sharp, wandering pains in chest.
Painful drawing in muscles of l. side of chest, extending to shoulder joint, impeding breathing and use of l. arm.
‖Sensation of constriction in middle of sternum, as if compressed by iron pincers, with difficult breathing; < from motion.
‖Rheumatism of muscles of chest. See 18.
Pain in l. chest, which is increased by touch; relieved by gently raising it.

[31] **Neck and Back.** ‖Rheumatic pain in region of heart and small of back.
‖Pain under l. shoulder blade. θPalpitation of heart.
‖Coldness in back and icy cold hands.
‖Lumbar muscles tender on pressure and stiff, especially on first moving after repose. θCardiac rheumatism.
‖Exophthalmic goitre, with characteristic heart symptoms.
Intolerable pain, commencing early, before rising, in lower part of muscles of back, on r. side, extending to gluteals, and lasting all day.
Pain in muscles of throat, at times during day.
‖Sharp pains shooting through body towards back, and upward into chest, with sensation of rush of blood to chest. θRheumatism of diaphragm.

[32] **Upper Limbs.** ‖Troublesome rheumatism of shoulder.
Sensation of constriction in shoulder, he cannot move.
‖Pain in shoulders and arms.
Fleeting, tearing pains in joints, shifting from shoulder to elbow and fingers, mostly on r. side.
‖Sore aching in l. arm down to elbow. θCardiac rheumatism.
Pain in muscles of r. upper arm, at times during day.
‖Pain in l. arm down to fingers. θDiseases of heart.

Digitized by Google

Aching in arms and hands, similar to pains in so-called "aching in bones."
Tearing in l. elbow joint.
‖Numbness of l. arm. θEnlargement of heart.
Numbness of l. arm, with troublesome pricking in little finger, lasting a short time.
‖Formication and weight in arms.
Painful lassitude and heaviness in arms.
Drawing-tearing pain in r. arm, early on waking, and lasting during morning, which after rising extends to r. wrist joint.
‖Œdema of hands, mostly left. θHeart disease.
Dry, scaly herpes on inside of r. elbow, no itching; later, same on outside of l. elbow.

[35] **Lower Limbs.** Restlessness of legs, cannot keep them still.
Numbness in legs and feet.
Severe rheumatic pain in l. ankle, with some swelling.
‖Œdema of legs, skin shining; dents remain a long time. θHeart disease.
‖Œdema of lower limbs. θRheumatism and pain in heart.
Dry, scaly herpes on l. internal malleolus; later, same on r. internal malleolus.
Great lassitude and heaviness in lower limbs and unusual drowsiness early on rising, after quiet sleep, and lasting two hours.
Pain in muscles of calves and soles of feet, at times during day.
Clinching pain in sole of r. foot, occurring several times during day, very annoying, but lasting only a short time.

[34] **Limbs in General.** ‖Rheumatic pains, in shoulders, upper and lower arms, in hips down to feet; < in rest and in motion, and in all positions.

[35] **Rest. Position. Motion.** ‖Constriction in region of heart and epigastrium much increased by muscular exertion, especially by reading aloud or by loud talking. θCardiac rheumatism.
‖Symptoms aggravated by exercise, stooping or fright, and at night. θPalpitation of heart.
‖After a misstep in crossing street, a jar of cars on crossing tracks at right angles, sitting down low in an unguarded manner, stretching arms above head, lifting books, etc. θAngina pectoris.
‖Better from continued but gentle motion. θRheumatism, with pain in heart.
‖Cannot lie horizontally in bed.
‖Lying on l. side at night excites attacks. θRheumatism and pain in heart.

Digitized by Google

▮A desire to lie perfectly quiet on back. θAngina pectoris.
▮Must lie perfectly quiet, with headache; any attempt to sit up, any noise, light or exertion, increases suffering terribly.
Lying: menstrual flow ceases; horizontal position, oppressed breathing <; on back, with shoulders elevated, difficult breathing >; congestion of chest <; pain in heart lying on l. side; on l. side, palpitation <; palpitation, with suffocative spells; on back, heartbeat and pulse in chest stronger.
Sitting: pressure between second and third ribs; palpitation >; supported by pillows, rest better.
Rising: vertigo worse.
Turning: in bed, vertigo <; in bed, weak, must have assistance.
Bending: of head back, drawing in coverings of occiput better.
Stooping: vertigo worse.
Walking: palpitation and constriction of heart <; shortness of breath; pressure in chest <; pulsation and anxiety in chest; palpitation worse.
Ascending: palpitation and constriction of heart <; shortness of breath; oppression of breathing; palpitation of heart.
Motion: vertigo <; headache <; pain in temple <; prosopalgia <; crampy pain at navel <; pricking pain <; palpitation from exertion; cutting pain through heart <; heartbeats short and irregular; pain in chest > raising it; after repose, lumbar muscles tender and stiff; restlessness of legs, rheumatic pains in shoulders, arms and hips to feet <; pain in r. knee worse.
All positions: rheumatic pains in shoulders, arms and hips to feet worse.

[36] **Nerves.** ≈Trembling all over, commencing in abdomen, with stiffness and numbness. θRheumatism and palpitation.
Excitement increases headache; pains so severe they provoke screaming.
Great weakness, prostration, great depression, sleepless.
General discomfort, drowsiness, as after severe sickness.
▮▮General weakness, with sadness and bad humor.
▮Feels very weary, so much so that she needs assistance to turn over in bed. θLow fever.
▮▮Great prostration of strength, so that he must remain in bed, not feeling able to use his legs.
▮Fainting. θRheumatism and pain in heart.
▮Child, æt. 6 months, must be lifted up and held up; it seemed as if it would die. θIntermittent.

Digitized by Google

‖Was thought dying. θCardiac rheumatism.

[37] **Sleep.** A stupid, drowsy feeling.

Sleeplessness in forepart of night from intrusion of various thoughts; later, restless sleep.

‖‖Sleeplessness.

‖Slept none for four days and nights. θLow fever.

‖‖Sleepless without pain; or from pulsations in pit of stomach or in ears.

‖‖Sleepless from arterial pulsations in scrobiculum and r. ear.

Delirium at night; on awaking it ceases, but returns in sleep.

‖‖Delirium at night on waking up.

‖Sleep greatly disturbed; very difficult to find a position in which she could obtain any rest, and only easy when bolstered up by several pillows. θPalpitation of heart.

Awakened at night by violent pain in r. knee, extending from patella to outer side of lower thigh; increased by slightest movement of limb.

Wakeful at night, with a tired feeling; rheumatic pain in whole r. leg, severe enough to prevent sleep.

‖Restless sleep. θRheumatism and pain in heart.

Frightful dreams for three nights, making him cry out.

‖Worst sleep towards day. θPalpitation of heart.

Sleep disturbed by lascivious dreams and painful erections.

Dreams he cannot remember.

[38] **Time.** Night: bursting-pulsating in temples; menses cease; obstinate cough <; palpitation <; irregular palpitation; in bed, powerful pulsation in upper chest; delirium; pain in r. knee; 1 P.M., slight chill, burning heat, pain in uterus; scorching heat, with headache.

Towards morning: disturbed sleep <.

Morning: alarm on awaking; on rising, pressure in parietal bones; headache, which grows constantly <; pain in temple begins; breath fetid; diarrhœa <; 8 A.M., pressure between second and third ribs; pulsation in chest, with anxiety; before rising, intolerable pain in lower back continues all day; on waking, drawing-tearing in arm and wrist; on rising, lassitude in lower limbs, with drowsiness; chilliness, 10 A.M.; quotidian, 11 A.M.; rheumatism of all joints < on rising.

During day: reptile-like movement in cardiac region <; pain in lower back; pain in muscles of throat; pain in muscles of arm; pain in calves and soles of feet; clinching pain in sole of foot; itching of skin.

Evening: anxiety; soon after retiring, pain in lower abmen; palpitation; cardiac rheumatism < 11 P.M.; suffocation and palpitation < 11 P.M; pain during

Digitized by Google

menstruation <; infant, 6 months, has chill 11 P.M.; rheumatism of all joints <; itching as of flea-bite on chest and abdomen; itching on abdomen and calves.

Midnight: great pressure at heart <; pain in head, coma, insensibility till midnight, then thirst and sweat; sharp chill, followed by headache, fever and thirst.

[39] **Temperature and Weather.** Heat: congestion to head and fever from sun's rays; of sun, vomiting.

Cold air: mammæ sensitive.

After water in the cellar. θRheumatism.

[40] **Fever.** Coldness in back and cold hands.

Skin gets colder. θCardiac rheumatism.

Slight chilliness towards 10 A.M.

Chilliness, with chattering of teeth.

General chilliness, so severe as to make teeth chatter, which lasts three hours and does not go off, although he lies down and covers himself over with many blankets.

Chill at 11 P.M., an infant, æt. 6 months. θIntermittent.

Fever, intermittent, with congestion to head; flushes in face; suppressed urine; pains in bladder; lancinating in heart; violent vomiting; sweat does not appear after exposure to sun.

Chill not relieved by covering; returns same hour each day; regular paroxysms at 11 A.M. and 11 P.M.

Fever brought on by exposure to sun's rays. θIntermittent.

At 1 P.M. slight chill, then burning heat, dyspnœa, pulsating pain in uterine region, ending in slight sweat.

Inflammatory fevers.

Simple rheumatic fevers.

Burning heat, with short breath.

Scorching heat at night, with headache, following a chill, and terminating in sweat.

Quotidian intermittent fever, at the same hour for many successive days.

Quotidian, 11 A.M.; great coldness for two hours, then burning heat, with great dyspnœa, violent pain in head coma, stupefaction, insensibility till midnight, then unquenchable thirst and sweat.

Sharp chill every midnight, followed by some headache, fever and thirst and considerable sweat. θIntermittent of a lying-in woman.

Intermittent fever, with derangement of stomach.

Heat after chill, with dyspnœa, headache and thirst; with insensibility till midnight, then shortness of breath and inability to remain lying; followed by profuse sweat, with great thirst.

Skin moist.

Digitized by Google

Sweat over whole body.

‖ Where perspiration fails to show itself. θIntermittent.

41 **Attacks, Periodicity.** Periodicity: pains down thighs return at same hour each day; pains in uterus return each evening; chill returns same hour each day; paroxysm at 11 A.M. and 11 P.M.; intermittent fever, recurring at same hour every day.

‖ Attacks brought on by any emotion, excitement, or upon attempting to exercise; occur several times daily. θRheumatism, with pain in heart.

‖ A dangerous paroxysm about 11 P.M.

‖ Attacks may come in sleep, connected with fright or anxiety in dreams. θAngina pectoris.

‖ Worse in spells. θDiaphragmitis.

42 **Locality and Direction.** Right: spells of pain in temple; headache and neuralgia; pulsating and sensation of weight in head; pain in parietal bone, later in l. side; prosopalgia; jerking pain below short ribs; pain in epigastrium; pain in lower abdomen; percussion dulness to fourth rib; pressive pain in chest; pain in heart; valvular derangement and dilatation of ventricle; pain in lower back to gluteals; pain in muscles of arm; drawing and tearing in arm to wrist; dry herpes on elbow; clinching pain in sole of foot; sleepless from palpitation in ear and scrobiculum; pain in r. knee at night; dry herpes on outer elbow and malleolus.

Left: pain in parietal bone; pressure in parietal bone; pain in epigastrium shifting to r. side; great pressure at heart to back; sore aching in arm; cannot lie on side; pains from heart down arm to fingers; pain in heart < lying on side; lying on side, palpitation <; œdema of hand in heart disease; eccentric hypertrophy of ventricle; deathlike feeling at heart to back; pain in chest; pain under shoulder blade; pain in arm; tearing in elbow joint; numbness of arm; pricking in little finger; rheumatic pain and swelling in ankle; dry herpes on internal malleolus; dry herpes on outer elbow.

Above downward: pain down thighs; sore aching in arm; pains from heart shooting down l. arm to fingers; cutting pain through heart; pain in lower back to gluteals; tearing in joints shifting from shoulder to elbow and fingers; pain in l. arm to fingers.

Below upward: whirling from chest to brain; sharp pains into chest; constriction in uterus and vagina; pain to shoulder blades; sharp pains to chest and back; pain from patella to lower thigh, outer side, at night.

Before backward: numbness and stupid feeling from eyes

Digitized by Google

to base of brain; jerking pain below short ribs, r. side; annoying movement in cardiac region, like reptile; great pressure at heart to left back.

[45] **Sensations.** Whole body feels as if caged, each wire being twisted tighter and tighter; sensation in heart like bird's wing; of movement from before backward, in cardiac region; as if stomach was closed.

Soreness, aching and soreness to touch in all the affected region (heart and under axilla to back). θRheumatism of heart.

Constriction of chest, heart, bladder, rectum, uterus, vagina, etc., is frequently brought on by slightest contact (showing that irritation of sensory roots is immediately followed by contraction of muscles supplied with motor nerves).

Pains everywhere: head, arms, legs, back, chest, heart; darting, springing like chain lightning, terminating with a sharp, viselike grip, only to commence again a moment afterwards, with restlessness, aching and groaning.

Sensitiveness: of eyes to light; of lumbar muscles.

Deathlike sensation at heart and around to l. back.

Lancinating: in heart.

Cutting: through centre of heart.

Stitching: in heart; very painful, at heart; violent, at heart, in paroxysms.

Stinging pain: in forehead over eyes.

Sharp, neuralgic pains: in cardia.

Tearing: in joints, mostly r. from shoulder to elbow and fingers; in l. elbow joint.

Shooting: through diaphragm into chest; down l. arm to fingers.

Pricking: in point of tongue; in arms; in chest; in heart, impeding breathing and movement; in little finger; in anus.

Jerking: on r. side below ribs.

Burning: in pit of stomach; in a line from cardiac axis to margin of lower ribs, hot flash shoots downward; while passing urine.

Aching: one-sided, in head; at heart; in l. arm to elbow; in arms.

Drawing: in coverings of occiput; in muscles of l. chest to shoulder; tearing in r. arm.

Tensive pain: on vertex.

Pressure: in r. parietal bone; on vertex; in l. parietal bone; in upper part of l. chest; excessive at heart and under axilla to back.

Soreness: and aching at heart; and aching in l. arm to elbow; of throat.

Digitized by Google

Scraping: at soft palate.
Pain: in head; in forehead and eyes; spells of pain in r. temple; in l. parietal bone; in head from slight noise; terrible in head, with vomiting; in different parts of head; in face, r. side; in cardia; in epigastrium; sharp, through diaphragm to chest; dull, in abdomen; in lower abdomen to r.; violent, in bowels; wandering, in umbilical region; cramplike, about navel; in bladder during febrile access; during menses; from lower chest to shoulder blades; sharp, wandering, in chest and scapular region; deep, in heart; dull, heavy, in heart; acute, in heart; constant, at heart; in apex of heart; in l. chest; rheumatic, in region of heart and small of back; under l. shoulder blade; severe, in lower back to gluteals; in shoulder and arms.
Rheumatic pain: in l. ankle; in hips to feet; in knee and lower thigh at night; in r. leg; in all joints.
Palpitation: with pressure on vertex, with fistula in ano; with stoppage of breath; distressing, with stitching, faintness and dyspnœa; on ascending stairs; after physical or mental exertion; from unfortunate love; with vertigo and unconsciousness; continued day and night; irregular, at night.
Beating: in epigastrium; in abdomen.
Throbbing: one-sided, in head; of carotids.
Fluttering: in stomach.
Pulsation: in temples; in head; one-sided; in r. side of head; in ears; in head; behind stomach (cœliac axis); after eating; in scrobiculus; in stomach; in ovarian region; in uterus and ovaries; in chest, while walking.
Suffocation: with heat in face; consequent to cold; periodical attacks, with fainting.
Numb pain: from eye across brain.
Constriction: of throat; of œsophagus; at scrobiculus cordis; of neck of bladder; around pelvis; in uterus and vagina; of uterus during menses; of vagina; of chest; in middle sternum; of chest as of cord; in cardiac region; in heart, as if an iron hand prevented movements; in shoulder; at scrobiculus cordis.
Cord: feeling of, around lower chest.
Band: as if, around chest.
Hoop: sensation of, around throat, around heart and diaphragm.
Bound down: as if, at heart.
Clutching: at heart.
Griping: behind sternum.
Grasping: at heart.
Compression: of head, as if in a vise; or squeezing, of heart, as if by hand.

Digitized by Google

Ringing and buzzing: in ears.
Whizzing: to and fro in chest.
Whirling: from chest to brain; in heart.
Turning: as of, in heart.
Tension: on vertex.
Bearing down: in lower abdomen.
Blow: as of, near kidneys.
Oppression: of chest and uneasiness; of chest, as of weight; on lying down; great, of breathing.
Heaviness: of head; on vertex; in stomach; in arms; in lower limbs.
Weight: in r. side of head; in stomach, after eating; in anus; in chest.
Fulness: in chest; in chest to throat.
Swollen: as if, in rectum.
Discomfort: at stomach.
Emptiness: in stomach.
Weakness: general, and prostration of strength.
Rumbling: in stomach before palpitation.
Irritation: great, in urethra.
Formication: and weight in anus; in arms.
Numbness: from eyes to base of brain; in l. arm; in legs and feet.
Tickling: in throat causes cough.
Itching: in anus; in larynx causes cough; in skin, as of flea-bite; on chest and abdomen in evening; on abdomen and calves in evening; during day.
Warmth: about throat and chest.
Heat: flushes of, in abdomen; in abdomen; burning, with short breath; scorching, at night, following chill.
Coldness: of skin from difficult breathing; of feet, with suffocative respiration; of limbs; in back.
Chilliness: with chattering of teeth.

[44] **Tissues.** ‖Affects the sensory nerves most.
‖‖Congestions.
‖Various kinds of inflammations.
‖Rheumatism of all joints of limbs, great deal of pain, stiffness and swelling; worse, in evening and again mornings on first rising. θPain in heart.
‖Rheumatic inflammation, with pain and swelling of parts.
‖‖Organic diseases of the heart.
‖Emaciation. θLow fever. θRheumatic heart disease.
Emaciated or bloated.
‖Dropsical affections. θHeart disease.
‖Hemorrhages: from nose, lungs, rectum and stomach.

[45] **Touch. Passive Motion. Injuries.** ‖‖Twitching of muscles and sensation of constriction produced by touching affected part.

Digitized by Google

Touch: spasmodic constriction in uterus and vagina; cardiac region sore and aching; pain in l. chest <.

Pressure: heavy pain on vertex >; dull pain at heart <; lumbar muscles tender.

Slight friction relieves pricking in anus.

Renewed pain in a thumb which had been dislocated a month before.

Traumatic fevers.

[46] **Skin.** Troublesome itching, as of flea-bite, on chest and abdomen, every evening, inducing rubbing; better on retiring to rest; not present during day; no eruption.

Itching on abdomen and calves in evening when undressing.

Itching present during day, but disappears by evening.

Dry, scaly herpes, without itching; appeared first on l. internal malleolus, next on outer side of r. elbow; then on r. internal malleolus; last on outer side of l. elbow.

[47] **Stages of Life, Constitution.** A man of irate temper. θDiaphragmitis.

Child, æt. 6 months. θIntermittent.

Woman, æt. 60, stout, robust, after exposure to water in cellar. θRheumatism.

Sanguineous congestions in persons of plethoric habit.

Woman, æt. 24, severe headache from taking cold. *Gelsem.*, *Bellad.* of no avail.

Man, æt. 28, during service in our war, articular rheumatism in back and limbs; mustered out as incurable. *Cactus* 1°. θCardiac rheumatism.

Woman, æt. 28, tall, dark hair and eyes. θRheumatic disease of heart. *Cactus*,[800] one dose followed by rapid improvement, without return of symptoms.

Woman, æt. 30, frequent attacks of angina pectoris.

Woman, æt. —, suffering for weeks. θNervous palpitation of heart.

A woman, æt. 40, four doses of 30th. θEnlargement of heart.

Colored woman, æt. 48, climaxis. *Cactus*,[100] one dose. θViolent palpitation.

Man, æt. 52. θHeart affection.

Miss, æt. 60. *Cactus*,[7c] three doses. θCardiac rheumatism.

Woman, æt. 60. θCardiac dropsy.

Bowels and kidneys utterly failed to respond to most powerful drastic cathartics and diuretics; her end seemed near. The 20th (after 3d dec. had failed) cured, and restored the healthy action of bowels. θCardiac dropsy.

A woman, attacked fourteen months ago with a low grade of fever, to which camp diarrhœa was soon added.

Digitized by Google

ⁱThirteen months treated by an army surgeon; hopeless. θLow fever.

[48] **Relations.** Antidotes: *Acon., Camphor, Cinchona.*

Compatible: *Digit.* (tumultuous action of heart; slow, irregular pulse; scanty urine; dropsy, etc.), *Eupat. perf., Laches, Nux vom., Sulphur* (pleuritis).

Useful after: *Acon., Arnic., Arsen., Bellad., Bryon., Chamom., Gelsem., Ipec., Kali brom.* (diaphragmitis), *Laches., Nux vom., Rhus tox.*

Compare: in mental symptoms, *Digit., Laches.;* in congestions to head, *Bellad., Glonoin;* in pain and pressure in head, *Arnic., Carb. veg., Coral rub., Iodum, Nux vom., Opium, Spigel.;* in weight on vertex, *Aloes, Alum.;* in heart affections, *Acon., Act. rac., Amyl. nitr., Arnic., Bellad., Bovist., Crotal., Digit., Eupat. perf., Justitia, Kalmia, Laches., Lilium, Naja, Pulsat., Spigel., Tarent., Zincum* (as if cap over heart); in bronchitis, etc., *Ant. tart., Ipec., Tabac.;* in constrictions (chest), *Alum., Bellad., Bovist., Cainca, Cadmium sulf., Kali chlor., Kali nitr., Laches., Stramon.* (uterus), *Murex* (vagina), *Kali carb.;* in menses ceasing at night, *Caustic.;* in leucorrhœa, *Amm. mur.;* in intermittents, *Arsen., Bryon., Calc. ostr., Eupat. perf., Natr. mur., Rhus tox., Sulphur;* in dropsies, *Digit., Kalmia;* in sleeplessness at night, *Sulphur.*

Google

CADMIUM SULFURATUM.

Sulphide of Cadmium. *Cd S.*

Discovered in 1817 by Stromeyer and Herrman as a constant associate of Zincum, especially in the Silesian ores. The best solvent is nitric acid.

Recommended in 1820 by Graefe in eye diseases in the place of Zincum; afterwards by Tott in 1833. Experiments by Schubarth on dogs were published in Hufeland's Journal about 1821.

H. J. Burdock made an insignificant proving on himself in 1827. The first real proving was made by Petroz in 1854 and published in the May number of Journal de la Soc. Gallicane, including cured symptoms; it appeared in the October number of the Allg. Hom. Zeitung, and in 1856 in Hirschel's Archiv, vol. ii. These were not followed by any other reports until 1878, when Dr. Hardenstein, of Vicksburg, used the remedy successfully in one of the most murderous epidemics of yellow fever, the application of the remedy proving him to be a master in prescribing. Cadmium is no doubt a so-called antipsoric of high rank.

[1] **Mind.** ‖Mostly unconscious. θCholera infantum.
Horror of solitude and of work.
Apprehension at approach of anybody.
Anxiety; also before going to stool.
Excessive irritability.
Vexation, or a fit of passion < symptoms in general.
[2] **Sensorium.** ‖Vertigo; room and bed seem to spin around.
θYellow fever.
[3] **Inner Head.** Pain in vertex.
Lancinations in head.
Tingling, digging and drawing in head.
Hammering in head.
Pulsations in temples.
Inflammation of brain.
Apoplexy.
[4] **Outer Head.** Herpes on temples.
[5] **Sight and Eyes.** Inability to read small type.
Hemeralopia.
Looking steadily, symptoms in general <.
Rending pains in eyes.
Lancinations in eyes from within outward.
Dilatation of one pupil and contraction of another.
‖Blennorrhœic affection of eyes.
‖Idiopathic chronic torpid conjunctivitis.
‖Swelling of conjunctiva remaining after blennorrhœa.
Scrofulous inflammation of eyes.

Digitized by Google

‖Macula corneæ (after removal of a fragment of iron which caused inflammation) covering half the pupil, bluish, much impeding sight. #Boy, æt. 10 years.
‖Macula corneæ covering pupil after a conjunctivitis and keratitis traumatica. #Girl, æt. 6 years.
‖‖Opacity of cornea connected with slow inflammation and blennorrhœa.
‖Cicatrix on cornea.
Burning lachrymation.
‖Inability to close eyes. #Paralysis of face.
Pressure above eyes.
Tension in eyebrows.
Hollow eyes.
Blue circle around eyes.

6 **Hearing and Ears.** Sounds echo in head.
Abnormal hearing, alternating with abnormal vision.
Clucking in ears.
Lancinations in ears.
Lacerating pain in ears.
Pressure behind ears.

7 **Smell and Nose.** Ulcerative or cancerous smell.
Tightness at root of nose, and tension in nose.
Lacerating pain in nose.
Epistaxis.
Obstruction of nose by swelling.
Numbness of nose.
Erysipelatous inflammation of nose.
Caries of nasal bones.
Boils on nose, and ulceration of nostrils.

8 **Upper Face.** ‖Pain with cold sweat in face. See 16. #Yellow fever.
‖Painful drawing in face. #Paralysis of face.
Crawling sensation in face.
Vexed look.
Gloomy countenance.
Greyish complexion.
Yellow spots on cheeks and nose.
Chronic eruption of forehead, on nose, and around mouth.

9 **Lower Face.** Trembling of jaw.
‖Distortion of mouth to side. #Paralysis of face.
Spasmodic motion of upper lip.
Swelling of lips.
Aphthæ on lips.

11 **Taste and Tongue.** ‖Pitchy taste. #Yellow fever.
Food tastes like salt.
Peculiar metallic taste after taking it.
‖Tongue shows traces of black vomit, dirty brown or black. #Yellow fever.

Digitized by Google

‖Difficulty in talking and swallowing. θParalysis of face.

[12] **Inner Mouth.** Symptoms of mouth are < during deglutition. //Salivation.

Frequent running together of saliva in mouth, has to spit it out often, and with much straining and retching brings up a tough phlegm.

[13] **Throat.** Constriction of œsophagus.

Deglutition aggravates symptoms in general.

[14] **Appetite, Thirst, Desires, Aversions.** Violent thirst.

In bed, at night, thirsty and hot.

[15] **Eating and Drinking.** After drinking: horripilation.

Getting drunk, symptoms < in general.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Salty, rancid belching. θYellow fever.

Rancid eructations, especially at noon.

‖Deadly nausea. θCholera infantum.

‖Intense retching and distressing nausea.

‖Nausea in mouth, chest and abdomen, often with pain and cold sweat in face. //Yellow fever.

Nausea in chest, mouth and abdomen, generally accompanied by red face and trismus.

Gagging and retching up of tough mucus, every few minutes.

‖Excessive vomiting of yellowish-greenish semifluid masses, almost gelatinous. θCholera infantum.

‖Vomiting of sour, yellow and black matter, with pain in abdomen. θYellow fever.

‖Excessive nausea, gagging, retching; so sensitive that least touch of lips will bring on vomiting. //Yellow fever.

‖Deadly nausea, must lie quiet, to ward off black vomit, which is already in stomach and can be smelt. //Yellow fever, early part of second stage.

‖‖Nausea; or black vomit, when other medicines fail. θYellow fever.

Vomiting brown fluid after drinking cold water: dog.

Vomiting of food, bile and mucus.

Vomiting of acid matter, of black or yellowish matter, accompanied by cold sweat in face, and griping.

Violent pains in stomach, in region of navel, and tenesmus with urging to stool; vomiting of all food taken and much phlegm and bile.

[17] **Scrobiculum and Stomach.** ‖Burning and cutting pains in stomach. θYellow fever.

‖Useful after cramps in stomach. //Yellow fever.

Gastric symptoms <: during pregnancy; in drunkards; after cramps in stomach; after drinking beer; in forenoon.

Digitized by Google

‖Intense burning in stomach; also burning from œsophagus to stomach. θYellow fever.
Coldness in stomach and hypochondria.
Violent pains in stomach and navel, and urging to stool.

[18] **Hypochondria.** ‖Lancinations in l. hypochondrium. θYellow fever.
Symptoms of stomach and hypochondria < by walking, or carrying burdens.

[19] **Abdomen.** ‖Pain in abdomen, with vomiting. θYellow fever.
‖Pain and pulsation in sides of abdomen. θYellow fever.
‖Cutting pain in bowels and kidneys. θYellow fever.
Pressure in sides of abdomen.
Compressed feeling in abdomen.
Stretching pain in abdomen.
Griping in lower bowels.
Lancinations, bruised pain, or pulsation in abdomen.
Feeling of inertia in abdomen.

[20] **Stool and Rectum.** ‖Alvine evacuations, almost gelatinous, of a yellowish-green semifluid character. θCholera infantum.

[21] **Urinary Organs.** Griping in region of kidneys.
‖Cutting pain in region of kidney and bowels. θYellow fever.

[24] **Pregnancy. Parturition. Lactation.** ‖Acts well during pregnancy. θYellow fever.
Gastric symptoms during pregnancy.
Erysipelas of mammæ.
Inflamed nipples.

[26] **Respiration.** Interrupted breathing during sleep.
On waking, want of air.

[27] **Cough.** Cough, with loss of consciousness, agitation, red face, pain in stomach, or vomiting of bile.

[28] **Inner Chest and Lungs.** Feeling of dilatation of chest.
Feeling as if lungs adhered to chest.
Contraction in chest.
Painful blows in chest.
Tingling in chest.
Weakness of chest.
Chest symptoms are considerably aggravated by a squatting posture.

[29] **Heart. Pulse and Circulation.** ‖Palpitation. θYellow fever.
Beating near heart.
‖‖Palpitation of heart, with constriction of chest.
Pulse 80 to 100; dogs.

[30] **Outer Chest.** Rheumatic pain in external chest.
Drawing in external chest.

Google

Swelling of external chest.
Brown spots on chest.

[31] **Neck and Back.** Pain in muscles of neck, as from efforts to vomit.

[32] **Upper Limbs.** Suppuration of axillary glands.
Stretching of arms.
Sensation of swelling of arms.
Swelling of arm bones.
Brown spots on elbow.
Tension in forearm.
Tearing pain in metacarpal joints.
Gnawing in hands.
Jerking of fingers.
Sweat in palms.

[33] **Lower Limbs.** Boils on buttocks.
Numbness of thighs.
While asleep, feet are agitated by shocks.
Rheumatism of lower limbs.
Digging and boring in lower limbs.
Pressure, pain as if sprained, trembling, or cramps in knee.
Tearing pain in legs.
Cramp of calf.
Heaviness of feet.
Lancination in joints of lower limbs, and in toes.

[34] **Limbs in General.** Red spots on extremities.

[35] **Rest. Position. Motion.** He lies with his head low and hands under it.
Squatting posture: chest symptoms worse.
Walking: symptoms of stomach and hypochondrium $<$; coldness.
Sitting; chest symptoms from squatting posture; drowsy.
Ascending stairs: symptoms $<$ in general.

[36] **Nerves.** Jactitations; starting of limbs.
Restlessness.
Very uneasy; changing his position often; dog.
Weakness of affected parts, with horripilation.
Weak and thirsty; dog.
Weakness after vomiting.
Great exhaustion after vomiting; next morning, pain in muscles of neck and throat from great exertion in vomiting.
‡Child can hardly move a limb. #Cholera infantum.

[37] **Sleep.** Drowsiness when sitting.
Sleepiness in forenoon.
Somnolence, with broken dreams.
He sleeps with his eyes open.
Moaning and smiling during sleep.

Digitized by Google

Nightmare.
After sleep: symptoms < in general; coldness.
Can hardly sleep; sleep, if at all, with open eyes. θCholera infantum.

[38] **Time.** Night: in bed, hot and thirsty; itching of skin.
Before midnight: fever.
Morning: gastric symptoms <; pain in throat and neck muscles from vomiting; sleepy; after sleep, symptoms in general <.
Forenoon: gastric symptoms; sleepiness.
Noon: rancid eructations.

[39] **Temperature and Weather.** Sunshine: symptoms < in general.
Air: sweat checked after exposure.
Useful if any of the grave symptoms appear after being exposed to a draught of air, or when sweat is checked. θYellow fever.
A man after riding in a sharp northeast wind (in France) had a half-sided rheumatic paralysis of face, apparently suddenly; treated by the old school four weeks without success, got well in eight days after two doses of 12th.
Cool air: symptoms < in general.
Cold: itching of skin.

[40] **Fever.** Horripilation: after drinking; with hot hands.
Icy coldness.
Coldness: even when near fire; after sleeping, and after walking; with heat in hands.
Fever, before midnight.
Sweat in axillæ.
When sweat is checked after exposure to a draught of air. θYellow fever.

[42] **Locality and Direction.** Within out: lancination in eyes.
Left: lancination in hypochondrium.

[43] **Sensations.** Sensation of inertia in abdomen; as if lungs adhered to chest; as of painful blows in chest.
Lancination: in head; in eyes; in ears; in l. hypochondrium; in abdomen; in joints of legs and toes.
Cutting: in stomach; in bowels and kidneys; in joints.
Rending: in eyes.
Tearing: in metacarpal joints; in legs.
Lacerating: in ears; in nose.
Boring: in lower limbs.
Digging: in head; in lower limbs.
Gnawing: in hands.
Drawing: in head; in face; in external chest.
Cramping: in stomach; in knee; in calf.

Digitized by Google

Griping: with vomiting and cold sweat in face; in lower bowels; in kidneys.
Beating: near heart.
Cramps: in stomach; in knee; of calf.
Pulsating: in temples; in sides of abdomen.
Hammering: in head.
Bruised: in abdomen.
Pressure: above eyes; behind ears; in sides of abdomen; in lower limbs; in knee.
Burning: lachrymation; in stomach.
Pain: in vertex; in face; in stomach and navel; in abdomen; rheumatic, in external chest; in neck; sprainlike, in knee; in muscles of neck and throat from vomiting.
Heaviness: of feet.
Tightness: at root of nose.
Tension: in eyebrows; in nose; in forearm.
Compression: in abdomen.
Constriction or contraction: of chest; of œsophagus.
Dilatation: in chest.
Stretching: in abdomen.
Swelling: of arms.
Crawling: in face.
Tingling: in head; in chest.
Numbness: of nose; of thighs.
Coldness: in stomach and hypochondria.
Itching: of skin, at night.

[44] **Tissues.** Cutting pains in joints.

[45] **Touch. Passive Motion. Injuries.** Touch: itching of skin.

[46] **Skin.** Itching: at night, in bed; when touched, and during cold; ameliorated by scratching, which excites a voluptuous feeling.
Blueness of skin.
Yellow eruption.
Scaly, cracking, damp, suppurating herpes.
Chilblains.

[47] **Stages of Life, Constitution.** ǀActs well with drunkards. θYellow fever.
ǀChild, æt. 15 months, teething. θCholera morbus.

[48] **Relations.** *Cadmium* has a strong resemblance to *Zincum*, the former acting more powerfully.
Compatible: *Bellad.* after *Cadmium* removed rolling of head with open eyes in cholera infantum; *Carb. veg.*;*

* I could give hundreds of cases of yellow fever where *Cadmium* relieved the most dangerous symptoms, but no case of that disease in its graver forms can be safely treated without *Carbo vegetabilis.*—HARDENSTEIN.

Digitized by Google

Lobel. infl. after failure of *Cadmium* in yellow fever; *Nitr. ac.*

Aletris relieved nausea of pregnancy after failure of *Cadmium*.

Cadmium,[30] hourly, for fourteen hours, helped where *Ipec.*, *Arsen.* and *Bellad.* failed. θCholera infantum.

Compare: in constriction across chest, with palpitation, *Kali chlor.;* in weakness, nausea, vomit and burning, *Arsen.;* in nausea and retching, *Asar.*, *Bryon.*, *Crot. tigl.*, *Cuprum*, *Nux vom.*, *Podoph.*, *Tart. emet.;* in deathly nausea, *Ipec.*, *Tabac.;* in greenish, gelatinous vomit, *Æthus.*, *Arsen.*, *Bryon.*, *Ipec.*, *Veratr.;* in gelatinous stools, *Aloes*, *Colchic.*, *Cubeb.*, *Helleb.*, *Kali bich.*, *Podoph.*, *Rhus tox.*, *Sepia* (green).

CAINCA.

Chiococca racemosa. *Rubiaceæ.*

Introduced in 1826 as a specific for dropsy by Martius and Langsdorf from Brazil; later found useless in hydrops, and injurious in post-scarlatinal dropsy.

In 1843 proved by Buchner and several others, who got the genuine root from Martius himself, and published the provings in the British Quarterly, then in Buchner's (Nusser's) A. Z. f. H. II, appendix, p. 141–144. Proved by Lippe, in Carlisle, in 1845; by Isaac Draper in Phila., in 1850.

The collection made by Roth was translated by J. W. Metcalf and published with additions in 1852 in the New York Quarterly.

[1] **Mind.** Want of disposition for intellectual labor.
Ennui, forgetful.
Violent and angry in evening.
Mental effort increases headache.
Weeping with cough.

[2] **Sensorium.** Vertigo: with desire to vomit; when going up-stairs.
Dulness, fulness and pressure in frontal region, and in sinciput.

[3] **Inner Head.** Sensations in head like those produced by ether.
Head dull and heavy.
Dulness, pressure, and afterwards weight in sinciput.
Pressure from above downward in sinciput.
Lancinating shocks in l. frontal eminence.

Digitized by Google

Tearing in middle of forehead.
Lancination in r. temple and r. side of chest.
One sudden and severe pain in l. side of head and forehead.
Pulsating pain in forehead over l. eye.
Pains in head; dull, heavy, dragging, steady pains from forehead to vertex, through central line.
Weight in temples and occiput.
Weight and pressure in occiput.
Very violent headache, especially in occiput; < in evening.

[5] **Sight and Eyes.** Appearance like clouds before eyes.
Goes to sleep at 3 P.M., in consequence of an inclination to do so; on waking an hour afterwards he could see nothing, even in open air, in consequence of a mist before his eyes.
Increased sensibility of eye.
Pressure in middle of globe of eye, first from above downward, and then in opposite direction, with a feeling as if pupil was turned up and light only came from above, impeding vision for five minutes; same symptom half an hour afterwards.
Pressive pain; shooting deep into l. eye.
Pupils very much dilated.
Burning in eyes.
Eyes appear and feel suffused.
Inflammation of eyes, with fluent coryza.
Œdematous swelling of r. inferior eyelid; a small purulent point was afterwards formed, but soon absorbed.
Œdema of l. upper eyelid for five days; it subsequently became uniformly red and puckered, with frequent itching.
Supraorbital pain manifests itself alternately on r. and l. side.
Pressure in orbital bones; soon afterwards, pressure from above downward in upper half of r. orbital margin; pressive drawing along course of supraorbital nerve, with vomiturition and uneasiness in abdomen; same symptoms subsequently appeared on l. side.

[6] **Hearing and Ears.** Roaring and tingling in ears.

[7] **Smell and Nose.** Violent catarrh of thin mucus, excoriating nose, especially in daytime.

[8] **Upper Face.** Heat in face.

[10] **Teeth and Gums.** Tearing in lower teeth, in evening.
Teeth set on edge.
Pasty mucus on teeth, in afternoon.

[11] **Taste and Tongue.** Taste in mouth, resembling that of wild plums, bitter.

Digitized by Google

Greasy, insipid taste in mouth.
πRed tongue, equally red all over, without any soreness in epigastric region.
Very dry tongue, covered with dirty white fur.
Tongue furred white.
White mucus covering tongue.

[13] **Inner Mouth.** Increased secretion of saliva and of urine.
Abundant, thick saliva.
Irritation of buccal membrane as far as larynx.

[13] **Throat.** Dryness of fauces.
Feeling of scraping in pharynx.
Scraping in uvula, pressure in stomach, which mounts into œsophagus, and is not relieved by eructations; accompanied by slight vomiturition, and a little while afterwards, borborygmi in abdomen, such as precede a diarrhœa.
Pressure with scraping in uvula not relieved by eructation.
Roughness in throat, almost peppery.
Sensation of scraping and roughness in throat, which subsequently becomes dry and obliges him to hawk.
Sensation of cold along course of œsophagus.
Sensation of burning in pharynx.
Dry, burning heat in œsophagus, with hoarseness.
Painful dryness in throat.
Difficulty of swallowing, which arises from upper part of pharynx.
Inflammation of throat, with foul-smelling salivary flow.
Angina scarlatinosa. Compare œdema and Bright's disease.
Ulcers in throat to Eustachian tube.

[14] **Appetite, Thirst. Desires, Aversions.** Unusual appetite for one day.
Absence of appetite and thirst, with continual desire to vomit.

[15] **Eating and Drinking.** After supper: pulsation in abdomen.
After having eaten: cuttings in abdomen.
Weakness after dinner, obliging him to lie down.
Weakness of feet after eating.
Tearing in feet after dinner.

[16] **Hiccough, Belching, Nausea and Vomiting.** Frequent tasteless eructations.
Continual eructations.
Nausea.
Desire to vomit: with vertigo; with absence of appetite and thirst.
Vomiturition augmented by spitting.
Vomiturition and slight chills.

Digitized by Google

Vomiturition; two hours afterwards, borborygmi, several liquid stools, copious urine, and continual desire to urinate.
Violent vomiting.
Copious vomiting, by which he discharges saliva, bile, chyme, and even fecal matter, followed by several stools of fecal matter enveloped in a viscous mucus.

[17] **Scrobiculum and Stomach.** Tension in præcordial region, notwithstanding his moving about.
Pressure in stomach, with vomiturition.
Sharp shooting pains in stomach, obliging him to leave dinner.
Sensation of cold in stomach, then violent cold on whole anterior part of chest for half an hour, forcing him to button up his coat; followed by pressure in stomach as if from a foreign body; similar pressure in throat; after continuing for an hour, it changes into slight burning.
Sensation of cold in epigastric region.
Heat in region of stomach.

[18] **Hypochondria.** Some pain in r. hypochondrium, at noon.
Pain in liver; he goes to bed because he is afraid of an attack of hepatitis.
Pressure between r. and l. lobes of liver, extending into r. inferior pulmonary lobe.
Pressive and lancinating pain in middle of ascending colon, resembling that he had experienced two days before under l. lobe of liver; not > by eructations.
Lancination in and across splenic region.

[19] **Abdomen.** Sensation of anxiety and strong heat in abdomen.
Sensitiveness of abdomen to touch, and when bending backward.
Borborygmi in abdomen.
Uneasiness and fulness of abdomen, with feeling of inflation, not relieved by eructations.
Fulness and inflation of abdomen.
Aching in abdomen and slight rumbling in intestines, followed by a liquid stool.
Cuttings in abdomen after having eaten.
Violent pains in whole abdomen, which shift their places, with borborygmi and continual eructations.
Transitory colicky pains followed by a diarrhœic stool; matters discharged are mixed with air-bubbles; stool occurs again in afternoon.
Inflation of abdomen continuing notwithstanding stools.
Peculiar indefinable sensation in epigastrium and umbilical region, continuing half an hour and ceasing after a pappy stool; accompanied by increase of urine.

Digitized by Google

Slight pains around navel, with borborygmi, and finally noisy eructations.
Dulness and uneasiness in abdomen, sensitiveness to touch, especially under navel; subsequently he discharges a great deal of gas from his stomach.
Pain below navel, with necessity to go to stool.
Slight pain in abdomen as low down as umbilicus; after a repeated dose increased and higher up; obliged to leave his dinner.
Pain, sharp lancinating, in stomach, causes paleness, obliging him to lie down; on waking from sleep, 6 P.M., still some pain and slight sensations of looseness.

[20] **Stool and Rectum.** Frequent necessity to go to stool, but with discharge of wind only.
Necessity to go to stool, with pressure on rectum.
At 5 in morning an urgent loose evacuation.
Soft or lienteric stools.
Two pappy stools before breakfast, then nausea and desire to vomit.
Stool copious; diarrhœic; free, loose, watery.
Several liquid stools, with copious urine.
Rheumatic diarrhœa.
Stools more frequent, two or three a day, almost liquid, yellowish; evacuations are always preceded by colic.
Soft stool in morning, after rising, followed by cuttings; a quarter of an hour afterwards, a pappy stool, with painful colic, which returns in paroxysms several times during day.
Diarrhœa of feculent matter, followed by slight vertigo and malaise at noon; before 2 P.M. another liquid evacuation, followed by borborygmi in abdomen; towards evening, he passes much wind without relief.
Colic continually recurs from time to time.
Vomiturition and pains in abdomen cease after stool.
On going to bed, in evening, violent tickling in rectum, which obliges him to turn in bed and scratch.
Burning at anus.
Itching at anus after a scanty stool.

[21] **Urinary Organs.** Pain in region of kidneys in morning; cannot change his position.
Continual and slight aching and drawing pain in urethra, causing desire to urinate, but not increased by passing water.
Difficult discharge of water, with subsequent burning in that part of urethra which traverses glans; with burning at external meatus and continued desire to make water, at noon.
Emission of urine, penis being erect, which causes a burn-

Digitized by Google

ing like fire, in passing through urethra, almost amounting to strangury.
Weak impulse to urinate.
Continual desire to urinate.
Copious urinations in morning, on three occasions, with continual urging, but without pain.
Urination more frequent, but urine not increased.
Frequent urination; urine more transparent than usual.
Very copious urine, although no great time had elapsed since he urinated.
He is obliged to urinate almost every hour, day as well as night, and always passes an abundant supply, which seems to him of a deeper color than usual.
Acrid, salt urine of an ammoniacal odor.
Copious urine, limpid as water.
‖Polyuria of some months' duration.
‖Copious urination after drinking coffee.

[22] **Male Sexual Organs.** Great increase of sexual impulse.
Emissions following voluptuous dreams.
After flatulency, in forenoon, sharp pains in r. testicle.

[23] **Female Sexual Organs.** : One of the best emmenagogues.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice hoarse and hollow, with dry and burning heat in pharynx.
Aphonia.
Roughness of throat; voice hoarse.
Hoarseness and roughness.
He is frequently obliged to hawk on account of irritation in upper part of larynx.
Accumulation of easily detached portions of mucus in trachea.
Frequent hawking.
Violent heat in trachea.

[26] **Respiration.** Dyspnœa.

[27] **Cough.** Irritation to cough.
Tickling cough, with tough greenish-grey expectoration, waking him at 3 A.M.
‖Attacks of rough coughing from 7 P.M. till 1 A.M., with rattling of phlegm and short breath; accumulation of wind in abdomen, which feels like a pair of bellows set in motion; feels it putting hands there.
‖Cough with weeping.

[28] **Inner Chest and Lungs.** Oppression of chest.
Uneasiness and pressure in chest.
Pressure on chest as though from a great weight.
Lancination in middle of r. side of chest.
In evening, lancination in middle of r. side of chest, returning after several days, with weight on chest, followed by oppression, which disappears in two hours.

Digitized by Google

Oppression in inferior third of chest, with embarrassment of respiration when going up-stairs.
Lancinations in inferior third of r. side of chest.
π Hydrothorax incipiens: continual want of breath increased by walking, particularly up-stairs; in evening, after lying down such a constriction of chest that she is obliged to sit up from fear of suffocating; sometimes also during day attacks of contraction of chest; legs œdematous, even above knees.

[29] **Heart, Pulse and Circulation.** Pulse 78; afterwards 54; it falls to 50 and becomes almost imperceptible, remaining, however, unchanged in frequency.
Pulse rather full than accelerated.
Pulse small and somewhat accelerated.
Pulse accelerated whole day, especially after siesta; his normal pulse is slow.
Very agitated pulse.
Perceptible pulsation in abdominal aorta during rest, after supper.
Carotids beat more violently.

[30] **Outer Chest.** Intercostal muscles pain.

[31] **Neck and Back.** Pain in back.
Isolated pains in trunk, lancinating and bruising.
Pains in small of back as though in kidneys; > by lying bent backward somewhat.

[32] **Upper Limbs.** ! Bruised feeling of l. upper arm.
Pain as if broken in l. arm.

[33] **Lower Limbs.** Extension and stretching of limbs, with sensation of cramps in lower extremities.
Heaviness in lower extremities.
Great depression in inferior extremities, drawing in muscles of calf, in knee joint; pain like rheumatism in muscles of shoulder and back on r. side, in l. intercostal muscles in second and third spaces, and in upper lumbar vertebræ; aching in second intercostal space extends to sternum and lasts until evening.
Breaking pain in knee joint, with feeling as if lower end of femur was about to escape from patella.
Œdematous swellings: hydrops of lower limbs without great prostration and without fever; after intermittent, violent cold, or checked catamenia.
Weakness in knee joints, with sensation as if patella would be dislocated.
! Crampy sensation in legs.
Continual pressure in anterior third of r. foot.
Tingling sensation in bottom of l. foot as if it had been asleep; later in both feet.
Acute lancination under nail of r. great toe.

Digitized by Google

[34] **Limbs in General.** Weariness of limbs.
πSweat on hands and feet.

[35] **Rest. Position. Motion.** During rest: after supper, pulsation in abdomen; skin moist.
Lying: weakness >; constriction of chest <; pains in small of back >.
Sitting: constriction of chest >.
Bending backward: abdomen sensitive.
Walking: want of breath; perspires over whole body in evening.
Ascending: vertigo; desire to vomit; respiration embarrassed.
Motion: pain in kidneys <.
Great precipitancy in all his actions.

[36] **Nerves.** Great fatigue after working two hours.
Very weak next morning from pain between 2 and 3 A.M.

[37] **Sleep.** Yawning.
All afternoon very somnolent, continuing during evening.
Feels stupid and sleepy; could easily go to sleep.
||Somnolence.
Sleeplessness all night.
Sleep troubled by frequent wakings and disturbing dreams, as, for instance, that he was about to fall.
He wakes, after having slept a quarter of an hour, with a start, and crying out in consequence of a painful dream.
Sleep very restless, with lascivious dreams.
Unquiet, restless dreams at night.

[38] **Time.** Night: attacks of coughing from 7 P.M. to 1 A.M.; sleeplessness; cough awakens at 3 A.M.
Morning: 5 A.M., loose evacuation; two pappy stools before breakfast, then nausea; pain in kidneys; copious urination with continued urging; 3 A.M., tickling cough with expectoration; very weak from pain between 2 and 3 A.M.
Forenoon: flatulency.
Noon: pain in r. hypochondrium; diarrhœa with vertigo and malaise; burning in urethra and desire to make water.
Afternoon: 3 P.M. goes to sleep, on waking in one hour could see nothing; pasty mucus on teeth; diarrhœic stool repeated; 6 P.M., on awakening, pain in stomach and looseness not quite gone; somnolence; pulse frequent after siesta.
During day: nasal catarrh of thin mucus; colic; pulse accelerated; symptoms < from 4 to 6 P.M.
Evening: violent and angry; headache in occiput <; tearing in lower teeth; passes wind without relief; going to bed, tickling in rectum; lancination in r.

Digitized by Google

chest; constriction of chest on lying down; somnolence; dry heat without thirst; perspiration over whole body.

[40] **Fever.** Slight chill and trembling, followed by weight in head, heat in face, roaring and tingling in ears.

Cold arising from stomach.

General heat.

Heat, dry, without thirst, especially towards evening.

He sweats more easily than usual.

He perspires over his whole body in evening, when taking a little walk, atmospheric temperature being low.

Skin moist, sweating, even when at rest.

[42] **Locality and Direction.** Right: lancinating in temple and side of chest; œdema of lower lid; pressure in orbital margin, afterwards on l. side; pain in hypochondrium, at noon; pressure between r. and l. lobes of liver to r. lower pulmonary lobe; after flatulence, pain in testicle; lancination in chest; rheumatic pain in back; continual pressure in anterior third of foot; lancination under great toe nail.

Left: lancinating in frontal eminence; one sudden pain in head; pulsating pain over eye; pressive pain in eye; œdema of upper lid; bruised feeling in upper arm; broken pain in arm; tingling in bottom of foot.

Left to right: feet asleep.

Right to left: headache.

Above down: pressure in sinciput; pressure in eye; pressure in r. orbital margin, afterwards also in left.

Below up: pressure in eye.

Before back: dragging pains from forehead to vertex.

The morbid phenomena shift their locality.

[43] **Sensations.** Feels all over as if under the influence of a slight galvanic shock.

Sensitiveness: of abdomen.

Sensation as if pupil was turned upward.

Peculiar indefinable sensation in epigastrium and umbilical region.

Sensations in head like those produced by ether.

Anxiety: in abdomen.

Lancinating: in l. frontal eminence; in r. temple and r. chest; in middle of ascending colon; in splenic region; in stomach; in r. chest; in trunk; under nail of r. great toe.

Cutting: in abdomen.

Shooting: in stomach.

Tearing: in middle of forehead; in feet; in lower teeth.

Dragging: from forehead to vertex.

Drawing: along supraorbital nerve; in urethra.

Burning: in eyes; in pharynx; in throat; in urethra; at meatus; at anus.

Digitized by Google

Bruised: in trunk; in l. upper arm.
Aching: in abdomen; in urethra.
Scraping: in pharynx; in uvula; in throat.
Pressure: in frontal region and sinciput; in occiput; in globe of eye; in l. eye; in orbital bones; in stomach to œsophagus; and scraping in uvula; in throat; between r. and l. lobes of liver to r. inferior pulmonary lobe; in middle of ascending colon; in rectum; in chest; in anterior of r. foot.
Cramping: in lower extremities; in legs.
Pain: sudden and severe in l. side of head; headache in occiput; supraorbital; in r. hypochondrium, at noon; in liver; in abdomen; colic-like, in abdomen; around navel; below navel; in kidneys; in r. testicle; in intercostal muscles; in back; in trunk.
Broken: in l. arm; breaking, in knee joint.
Pulsating: over l. eye; in abdomen.
Fulness: in frontal region and sinciput; in abdomen.
Uneasiness: in abdomen; in chest.
Oppression: of chest.
Depression: in lower extremities.
Dulness: in frontal region and sinciput; from forehead to vertex; in abdomen.
Heaviness: from forehead to vertex; in lower extremities.
Weight: in sinciput; in temple and occiput.
Tension: in præcordial region.
Constriction: of chest.
Roughness: in throat.
Weakness: after dinner; of feet; in knee joint; in morning.
Weariness: of limbs.
Fatigue: after working two hours.
Tingling: in ears; in bottom of r. foot.
Tickling: in rectum.
Itching: of l. upper lid; at anus.
Heat: in face; in abdomen; in region of stomach; in trachea.
Coldness: along œsophagus; in stomach and anterior chest; in epigastric region.
Dryness: in throat.

" **Touch. Passive Motion. Injuries.** Sensitiveness of abdomen to touch.
While traveling 18 miles in the cars, he had to urinate 18 times.
It removes the fatigue consequent upon too long a ride on horseback.

" **Skin.** ‖Dry skin with hydrops.

" **Stages of Life, Constitution.** †An aged female. θHydrothorax with œdema of feet.

Digitized by Google

[45] **Relations.** Antidotes: *Colchicum*, *Rhus tox.*, *Veratrum*.
Rhus tox. relieved the gastralgia.
‖ *Cainca*,[30] three doses taken at eight-day intervals after *Arsenic* had given some relief. θHydrothorax with œdema of feet.
Compare: *Bryonia*, and especially *Apocynum*, which is remarkably analogous.

CALABAR.

Physostigma venenosum. *Leguminosæ.*

Triturations of the whole bean. First mentioned by the missionaries to the western coast of Africa; in 1846 by Daniel; in 1855 investigated by Christison; in 1862 first observations by Frazer on the contraction of the pupil (also by Workman); used and abused since by many.

[1] **Mind.** Uncommon mental activity.
[2] **Sensorium.** Dizziness, with faintness and muscæ volitantes on moving, 1 P.M.
[3] **Inner Head.** Pain in middle of forehead in one spot above eyes, and over and in left eye a pain, with muscæ volitantes.
Pressure in temples.
Pain through temples, as from pressure of blood to head, with throbbing of arteries on side of neck.
Pain through temples and burning of eyes.
Intense painful pressure in vertex and both temples; has to lie down.
Pressure in vertex extending over to occiput.
Numbness and peculiar sensation in top of head, especially towards back of head.
Five minutes after taking dose, dull pain in l. occipital region.
A feeling of loss of power and sensation in back of head as if head would fall over forward, and the natural supports of head would no longer hold it back.
Congestive headache all forenoon.
Rush of blood to head, with heat and burning of nose, sneezing slight.
[4] **Outer Head.** Numbness of temples and crawling sensation over head.
Between 8 and 9 P.M., a creeping numbness over back of

Digitized by Google

head and all down spine, especially in part between hips.

[5] **Sight and Eyes.** Eyes feel weak.

Great pressure on eyes; with muscæ volitantes.

Sore pain in eyes, with flying specks.

The medicine affects the sight very much, producing these spectres constantly: flitting before sight, long snakes or worms, both dark and light; also waves before eyes, making objects have a tremulous motion, as if it gave same quality of involuntary motion to optic nerve that it does to motor nerves, and made the sight movable.

Objects appear larger and nearer.

Slight sensation of double sight, as if images of objects would be multiplied.

Felt film over eyes and blur; objects mixed, followed by dull pain over and between eyes.

Dimness of distant vision is followed shortly after by contraction of pupil.

Dimness of vision as a sequela to diphtheritis.

The internal rectus does not do its work rightly, and the axes of eyes do not correspond; eyes feel weak; lachrymation, especially of l. eye.

Feeling of straining in eyes shortly after effects are produced.

On attempting to look upward, not the least movement was perceptible, showing paralysis of superior rectus and inferior oblique muscles.

In looking downward, the superior oblique muscle, which is governed by the n. trochlearis, alone acted, making a slight rotation around the visual axis, rather than a downward movement.

Complete paralysis of accommodation.

Paralysis of ciliary muscles after long-continued debilitating disease.

Left pupil sluggish, not much dilated; myopia, and objects seem too large, with l. eye; after a blow on l. eyeball.

Pupil permanently dilated, with loss of accommodation, of eight years' standing, after traumatic injury to the cornea.

Pupil was dilated, cornea turned well outward, and on looking towards the r. side it could not be brought to centre of palpebral fissure (showing a paralysis of internal rectus muscle).

Occasions contraction of pupil and sympathetically dilatation of pupil of other eye.

In twenty minutes pupil contracted to size of pin's head, with a boy.

Digitized by Google

‖‖Shortsightedness.
‖Myopia.
The effects last longer on iris than on ciliary muscles.
⁞Where iris has a tendency to protrude through a corneal wound.
‖Drawing-twisting sensation in eyes.
Sharp, shooting and drawing sensation in r. eye.
Eyes are sore and give pain when moved from side to side.
‖Pain in eyeball.
Symptoms of eyes all morning, with much burning of balls.
Burning of eyeballs.
Burning of eyes and bloodshot appearance of them all forenoon.
‖Eyes smart; lids feel sore.
Heavy headache and pain in eyes, with much heat in head and face; muscæ volitantes both black and light.
⁞Ulceration of margin of cornea, leading to perforation, or even when prolapsus of iris has just occurred.
⁞In cases of retinitis, to diminish the access of light.
Beating, or throbbing and twitching between eyebrows.
Excites salivary and lachrymal secretion.
‖The whole affection came on suddenly; about a month before she went to bed well, and on rising next morning found it impossible to open eye. //Rheumatic attack of ocular muscles.
Endeavoring to open eye, a slight upward movement of lid remained, caused by the musculus orbicularis palpebrarum, governed by facial nerve, relaxing itself still more.
Upper lid of l. eye hanging down, outer caruncle lower; that of r. side, complete ptosis.
‖Considerable tenderness of skin around eye.
Mattery eyes.
‖Intolerable pain over both orbits.

[7] **Smell and Nose.** A sensation exactly as if nose was going to bleed, and the peculiar taste which goes with it; at 2 and 8 P.M.
Twitching in nose, and involuntary expansion of nostrils.
Numbness from between eyes down through nose.
Sneezing.
Burning heat in nose and sensation as if it would bleed; quivering sensation in teeth as if they were resting on a vibrating board; at 4 P.M.

[8] **Upper Face.** Stupid look and a drunken gait.
Involuntary twitching of mouth, also of eyebrows.
‖Sensation of contraction of whole l. side of face, with slight numbness.

Digitized by Google

[11] **Taste and Tongue.** ‖Smarting of end of tongue.
Tongue became very sore on l. side, quite back to root, and it was very hard to move it; felt as if it was stiff.
[13] **Throat.** ‖Feeling as if a ball was rising in throat.
[14] **Appetite, Thirst. Desires, Aversions.** Disgust of cold drinks.
[15] **Eating and Drinking.** ‖After eating: relief of pain in head.
[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Nausea and vomiting.
[17] **Scrobiculum and Stomach.** Trembling sensation in nerves all down through body, especially at pit of stomach, with motion going up and down in nerves like waves, accompanied by slight nausea and a sensation of faintness.
Nervousness at pit of stomach.
Great pain and soreness in and all around pit of stomach, and all around body in this part before and behind.
Sense of emptiness and weakness at stomach, without hunger; 3 P.M.
[18] **Hypochondria.** Soreness around body at waist; 6 P.M.
[19] **Abdomen.** Sore pain in bowels, with burning, loose discharge.
Bowels spasmodically contracted.
[23] **Female Sexual Organs.** Pains in womb, as if menses were coming on.
Leucorrhœa.
Leucorrhœa and much weakness at 4 P.M.
[26] **Respiration.** ‖Yawning and sighing respiration.
‖Laborious breathing.
Kills by paralyzing nerves, supplying breathing muscles.
[28] **Inner Chest and Lungs.** Severe pain in l. side and entirely unlike any pain in lungs that has ever had.
[29] **Heart, Pulse and Circulation.** Power of contraction of heart is increased.
Number of beats of heart sometimes increased, sometimes diminished.
Nervous symptoms, with palpitation of heart and much weakness at pit of stomach.
Heart's action feeble and irregular.
Violent palpitation of heart.
Death by paralysis of muscles of heart.
Blood very fluid.
Pulse frequent.
‖A weak pulse is considered a contraindication; hard and rapid, an indication.
[31] **Neck and Back.** Inclination to stretch out neck, "to run head out," from uneasy sensations in back of neck.

Digitized by Google

Pain at back of neck, with difficulty of turning head around.
In afternoon a peculiar pain across back of neck, at base of brain, as if it was cutting off body from head; it went right through neck, and seemed to go to back part of throat, which was sore and stiff.
Pains in back between shoulders and a little lower down.
Drawing in back, as if it was too short to allow stooping without pain, and yet difficulty in keeping upright.
Pain all down spine and close to it, on both sides of it.
Pains all down back of neck, especially in most prominent bone there, and on each side of it; drawing whenever head was turned.
Pain in back on each side of spine, from between shoulder blades to below waist; pain which made it hard to stoop.
Pain in back, also down arms, with weakness of same; 2 P.M.
Stiffness and pain going all down spine; with these pains in back there is an inclination to bend forward, as if hard to sit up straight; 1 P.M.
The nerves in back of body (the passive nerves or nerves of sensation) it seems to paralyze and numb; and during this numbing process it causes a good deal of pain, very similar to a pain in a tooth, when its nerve is dying or being killed.
Pain in lower part of back and spine, between hips.
Pain in back between hips and a slight feeling of numbness in region of womb; 6.30 P.M.

[32] **Upper Limbs.** Trembling of hands, could hardly sew; 10.30 A.M.
Tired feeling in arms and difficulty in lifting them.
Numbness of l. hand as if asleep.
Numbness in l. arm and down ring finger.
Chill and slight numbness in r. arm.

[33] **Lower Limbs.** Pain in lower limbs.
Pain in outside of knee; cramps in l. foot in evening while in a warm bath.
Pain in l. thigh and in both knees after walking only a few steps; about noon.
A sensation as of a drawing of cords behind leg, under knee, making it hard to walk, especially up-stairs.
Trembling of legs, as if one could not walk straight.
A feeling as if all power was going out of legs and they would give way; as if the cause of the weakness came from that one spot in back, between hips, and took away all power below that spot, from limbs.

[34] **Limbs in General.** Pain in limbs.

Google

Loss of power in limbs.
On walking, feeling of unsteadiness from knees downward, so that he had to tread carefully, especially when eyes are shut; feels as if he must look to see where he is going.

[35] **Rest. Position. Motion.** Constant desire to move head from side to side.
Disinclination to move.
Hinders voluntary motion as well as causes involuntary motion.
Motion: cannot move eye upward; difficulty in moving eye downward; soreness of eye; tongue stiff and sore.
Walking: pain in l. thigh and knees; and ascending, drawing as of cords under knee; unsteadiness from knees down.
Stretching: uneasiness in back of neck >.
Turning: pain at back of neck <.
Bending forward: stiffness and pain down spine >.
Lifting arms: tired feeling.

[36] **Nerves.** Shuddering and trembling running down through all nerves of body.
Violent tremblings all over, in the street; felt for an instant as if he should lose consciousness, and could hardly get home; riding in a car for twenty minutes did not relieve sensations.
Trembling.
Felt a sudden access of vigor and felt particularly strong; all the symptoms seemed to come like a reaction.
Loss of voluntary motion without loss of consciousness.
Complete relaxation of whole body, as if every nerve was unstrung, even to the eyes, which felt as if all power to see was going out of them.
Giddiness and faintness without uneasiness.
Paralyses motor nerves, but does not impair sensibility, intelligence and muscular irritability.
Cause of death, true suffocation, never causes paralysis of heart.

[37] **Sleep.** Intense sleepiness.
Intensely sleepy in morning; almost impossible to wake himself up; feels as if drugged.

[38] **Time.** Morning; congestive headache; eye symptoms; intensely sleepy.
Afternoon: 1 P.M., dizziness and faintness; stiffness and pain of arms; 8–9 P.M., creeping numbness over back of head and down spine; 2–8 P.M., nose feels like bleeding; 4 P.M., quivering in teeth; leucorrhœa and weakness; 6 P.M., soreness around waist; pain across back of

Digitized by Google

neck; 2 P.M., pain in back and down arms, weakness of same; 6.30 P.M., pain between hips, numbness in womb.

[39] **Temperature and Weather.** Both days he felt weakest, were particularly cool and bracing.

Felt a perfect horror of cold water.

[41] **Attacks, Periodicity.** The symptoms subside in the same order; first derangement of accommodation, then affection of pupil.

The trembling spells come on in fits, and at the least thing that startles.

[42] **Locality and Direction.** Right: shooting and drawing in eye; ptosis; chill and numbness in arm; pupil much dilated; sight of eye impaired; pupil small.

Left: pain in eye; dull pain in occipital region; lachrymation; pupil sluggish; upper lid paralyzed; contraction of face with numbness; soreness of tongue with difficult motion; severe pain in chest; numbness in arm and hand; pain in thigh.

Before back: pressure in vertex to occiput.

[43] **Sensations.** The nervous symptoms came first, being in centre of forehead, and very much at pit of stomach, and going downward; soreness around middle of body came next, and last of all the pains in back and spine; these lasted the longest and seemed the most characteristic of all the symptoms; as if pain was cutting head from body.

Nervous motions through body and arms.

A kind of pain like that caused by stooping over work for a long time, or by long pressure of back against a chair; as if the nerves were compressed; as if head would fall forward; as if nose was going to bleed; as if a ball would rise in throat.

Shooting: in r. eye.

Burning: of eyes; of nose; of eyeballs; in nose; in bowels.

Drawing: in eyes; in back; drawing down back of neck when turning head; as of cords under knee.

Smarting: of eyes; of end of tongue.

Straining: in eyes.

Twisting: in eyes.

Cramping: in l. foot.

Pressure: in temple; in vertex; in vertex to occiput; on eyes.

Soreness: in eyes; of lids; of l. side of tongue; around pit of stomach; around waist; in bowels; and stiffness of throat.

Pain: in middle of forehead; above eyes; through temples; dull, in l. occipital region; headache, in morning; in eyeball; around pit of stomach; in womb; in l.

Digitized by Google

chest; at back of neck; in back; down spine; down back of neck; down arms; between hips; in lower limbs; in knee; in l. thigh and both knees.
Beating: between eyebrows.
Throbbing: on side of neck; between eyebrows.
Twitching: between eyebrows; in nose; of mouth and of eyebrows.
Quivering: in teeth.
Trembling: all through body; of legs.
Discomfort: at back of neck.
Heaviness: in head.
Tenderness: around eye.
Stiffness: of l. side of tongue.
Contraction: of l. side of face.
Tired: in arms.
Faintness: in street and while in car.
Weakness: of eyes; at pit of stomach.
Powerlessness: at back of head; of legs.
Creeping: back of head and down spine.
Crawling: over head.
Unsteadiness: from knees down.
Numbness: in top of head; of temples; back of head and down spine; between eyes down through nose; of l. side of face; region of womb; of l. arm and hand; in r. arm.
Shuddering: through whole body.

[46] **Touch. Passive Motion. Injuries.** Touch: soreness around pit of stomach; soreness around waist, 6 P.M.

[47] **Stages of Life, Constitution.** Girl, æt. 9, pupil of r. eye very much dilated; a small scar on outer edge of cornea.
Woman, æt. 24, sight of r. eye impaired, could only distinguish light from darkness.
A woman, æt. 21, paralysis of oculo-motor nerve.
Woman, æt. 57, r. pupil only half as large.
Man, æt. 53, paraplegia, pupil contracts to pin's head in size.

[48] **Relations.** Antidotes: *Atropia* and *Hydrate of Chloral. Camphor* suspends the symptoms temporarily.
Compatible: *Amyl nitr., Conium, Gelsem.*
Compare: in eye diseases: *Agaricus* (*Amanita*), *Caustic., Chamom., Conium, Curare;* in tetanus, *Nux vom.*

Digitized by Google

CALADIUM.

Caladium seguinum. *Araceæ.*

Proved in Surinam, where it is a common poison, in 1830, and published in Stapf's Archives, in 1832. Another proving by Schreter, one of our best men, followed in 1842. The last and best proving of all is by E. W. Berridge.

[1] **Mind.** ‖Unconsciousness or coma. θTyphus.
Stupefying pressure in r. temple, in eyes, and in forehead.
‖Opens her eyes and asks, Where am I? what do you all want around me? A few moments after *Calad.*[30] θTyphus.
Very forgetful; he cannot remember if what he ought to have done and written during the day is really accomplished until he convinces himself of it.
Absent-minded.
‖Delirious, unintelligible murmuring. θTyphus.
Loud cries about an illness, like a child, with senseless prattling.
‖So averse to the medicine, that it required a desperate effort to overcome it.
In the forenoon restless and disinclined to work, afterwards very busy, but forgetful.
‖Mind depressed. θImpotence.
Apprehensiveness, before going to sleep.
‖Very careful about his health; apprehensive.
Fear of catching scarlet fever when attending a case; a fear he never had before.
Fear of cutting himself while shaving.
‖Lascivious ideas. θGleet. θImpotence.
Boldness.
Fretful and sleepy in morning.
Becomes easily angry at everything.
Nervousness.
Restless, cannot control himself after smoking.
Extreme excitement.
Faintness on rising, or after mental exertion.

[2] **Sensorium.** Dulness in head, drowsiness after breakfast.
Head feels confused like from a heavy load. See 18.
Benumbed feeling.
Confusion and whirlings in head, with nausea.
Somewhat dizzy after walking.

Digitized by Google

‖A rocky, dizzy sensation after lying down and closing eyes, preventing sleep.
‖Vertigo and nausea, in morning, with stitches in pit of stomach.
Crampy feeling between shoulders and in brain while walking, as if he would fall.

[3] **Inner Head.** Headache, l. side, most in forehead and occiput.
Forehead: pressure after smoking; bursting pain; boring.
Sticking in r. temple, especially in r. eye.
Boring and sticking in l. temple, relieved by pressure.
Stinging in r. temple and eye.
Pressing in l. side on which he had lain; disappears on sitting.
Tensive pain in temples, with drowsiness.
Drawing in occiput; drawing tearing, up into head.
Headache as from a heavy load. See 2 and 18.
Headache, with pain in shoulder.
Heavy pressing headache after siesta.
On waking, stupefying pressure in r. temple.
Heat ascends from below into head and becomes an internal glowing heat.
Occasional heat in head.

[4] **Outer Head.** Left half of head feels as if asleep.
Stitches as if with pins in skin of forepart of head.
Pimples on scalp behind ear, sensitive to touch.

[5] **Sight and Eyes.** Burning in eyes.
Stitches in eyes.
‖Stitches in r. eye and throbbing in l. knee.
‖Stitches in l. eye and in a corn.
Sensitive, stupefying pressure in eyes and forehead, with heat in face, and restlessness he can hardly control, while smoking; followed by much hawking of mucus and slimy vomiting, with urging to stool.
Pressure in eyeballs, with painful sensitiveness when touched.
Eyes feel too large and are inflamed.
‖Eyes close, even while walking in open air, with drowsiness before dinner, and tension in temples.
On closing eyes: vertigo.

[6] **Hearing and Ears.** Sensitive to noise.
‖Extremely sensitive to noise, especially if he wishes to sleep.
‖When going to sleep he is awakened by folding of paper; he is sensitive to it.
‖Slightest noise startles her from sleep. //Typhus.
Twittering in ears.
Roaring in ears, frequently during day.

Digitized by Google

[Something seems to be put before ears, even before deaf one, so that he cannot hear for a while.
Violent earache during fever.
Stitches in l. ear, with boring toothache.
Throbbing in r. ear, and a sensation around it as if warm water was flowing about it in a circle.
Throbbing with a feeling around r. ear as if it was asleep.
Throbbing and formication around r. ear.
Burning on external upper margin of ears, without redness or heat.
Tickling and itching in r. ear, evenings.
Pimples on and behind l. ear.

[7] **Smell and Nose.** [Discharge of blood and mucus when blowing nose.
Sudden burning in upper part of nose, then a long continued irritation to sneeze as from pepper; and at last violent, short sneezing, followed by fluent coryza.
Corrosive burning in nose.
Painful pimples on r. side of septum.

[8] **Upper Face.** Stitches in skin of forehead as if with needles.
[Heat in face; flushed face.
Sensation as if spider webs were sticking here and ere, or as if a fly was crawling on face.
[Flies alight more frequently on his face and head. See 40.

[9] **Lower Face.** [Lying with mouth half open in coma. θTyphus.
Dry lips, with thirst, waken at night.
Mouth, lips and tongue swollen.
Glands on lower maxilla swollen, after fever.

[10] **Teeth and Gums.** After corroding, sour vomit, teeth feel too long.
Drawing in l. molars from above downward; from r. ear to teeth.
Boring toothache, with stitches in ear.
Toothache, mornings and evenings.
Toothache in evening, that wakes him from sleep again in morning.

[11] **Taste and Tongue.** Insipid taste on tongue, herbaceous, with a scratchy sensation in throat, as of something sharp.
Milk tasted sour and was repugnant.
Tongue swollen, filling whole cavity of mouth; cannot talk; quantities of albuminous saliva.

[12] **Inner Mouth.** Diminished saliva.
Saliva like white of eggs, running out in large quantities; t.

Digitized by Google

Mouth is sticky and herby.
Sensation in mouth as if burnt with kreosote.
Burning in mouth and fauces.
‖Mucous membrane of mouth uniformly very red; curtains of palate exceedingly red, but not swollen; uvula slightly swollen.

[13] **Throat.** Curtains of palate exceedingly red, not swollen.
Uvula slightly swollen.
Fauces and pharynx dry, not mouth.
‖Scratchy sensation in throat as of something sharp, or with a dry sensation and much hawking.
‖Hawking phlegm and vomiting after smoking.
Dryness in fauces and pharynx, not in mouth, without thirst, and with aversion to cold water.
‖Complained of dryness and burning in throat. θTyphoid.
Tickling in throat, with cough (after one hour), often renewed during the day.

[14] **Appetite, Thirst. Desires, Aversions.** Sensation of hunger, soon after taking.
Evenings, after theatre, he is hungry, contrary to custom, but eats nothing; nausea, in morning, while half asleep, with a sensation of faintness, as if he had overeaten and must vomit; when fully awake this sensation ceased.
After vomit from smoking, eats bread and butter with relish.
Eats only because stomach feels hollow, but very hastily, and is soon satisfied.
‖Eats, but without hunger. θImpotence.
Thirst with dry lips wakes him at night.
‖Wakens, wants drink and swallows it with greatest haste. θTyphus.
‖Desire to drink without thirst.
‖Thirst and want of appetite before coma. θTyphus.
After eating he drinks, but only because there is something very dry lying in stomach.
‖Thirstless with fever.
‖Does not drink at all for many days; he wants beer, but is not thirsty; he could not have taken a drop.
Does not drink the whole day.
Dry fauces and pharynx without thirst and with aversion to cold water.
‖Thirstless, even aversion to cold water; he drinks only warm drinks. θImpotence.
Milk tasted sour and was repugnant.
Longing for beer, without decided thirst; he was not able to drink water throughout proving.

Digitized by Google

Desire to smoke, which disagrees.

[15] **Eating and Drinking.** Before dinner: sleepy.

Hasty eating.

Takes his breakfast with hunger and relish, but is hardly satisfied when he becomes ill-humored and uncomfortable; head exceedingly confused, and he grows sleepy.

After eating: oppression of chest; sensation as if food lay dry in stomach; wants to drink.

After pickled fish, in evening, uncomfortable; abdomen distended; > when walking; < riding.

From smoking: headache; pressure in eyes; nausea; vomiting of slime; urging to stool; cramp in soles; when lying down, itching of fingers.

Vinegar and all acids disagree.

[16] **Hiccough, Belching, Nausea and Vomiting.** Long-continuing hiccough.

Incomplete eructations, because they are hindered by burning pressure in abdomen.

Frequent eructations of very little wind, as if stomach was full of dry food. θAsthma.

Nausea: with confusion in head; with vertigo; with stitches in pit of stomach; with hollowness in stomach; with fainting feeling during morning slumber.

After and while smoking his accustomed tobacco, nausea and inclination to vomit.

While smoking a cigar: sudden inclination to vomit; he must stop smoking; at same time urgency to stool, so that he thought he could scarcely retain it, yet is obliged to strain hard to get rid of pappy, yellow stool.

Corroding sour vomit with phlegm, after smoking.

Acrid sour vomit, makes teeth feel too long.

[17] **Scrobiculum and Stomach.** Pressure in pit of stomach impedes respiration and causes cough.

Stitches in pit of stomach, which is drawn inward with every stitch; < when sitting; it makes him weak and nauseated.

Stitches, as with needles, deep in pit of stomach.

Cutting through epigastrium and l. flank, as with glass, after midnight, and preventing sleep.

Cutting in umbilical region.

Throbbing in pit of stomach, after walking; it makes him very tired.

Pain deep, internally, when pressing on pit of stomach.

Constant sensation as if a bird was fluttering in stomach and trying to escape, causing nausea in stomach, but without retching, from morning till afternoon.

Pressure, extending upward; at last it is like a gnawing in orifice of stomach, preventing deep inhalation and belching.

Google

Burning in stomach, which is not relieved by drinking; it continues whole evening, after drinking tea and chocolate.

Dull internal burning in stomach and upper part of abdomen; at last it becomes a very severe pressure, extending upward under breast, and then a gnawing in orifice of stomach, which prevents deep breathing and eructations.

Empty hollow feeling in stomach.

[18] **Hypochondria.** Stitches, jerkings, and pressure in region of spleen.

[19] **Abdomen.** Felt, three or four times, a sensation as if a long worm was writhing in region of transverse colon or duodenum.

Spasmodic cutting in abdomen, at navel; must bend himself double.

Sudden twisting pain in abdomen, in evening.

Violent throbbing, mostly above, to r. of navel; throbbing with inner heat, much prostrating heaviness in epigastrium.

Violent pulsating or burning in upper part of abdomen.

Strong pulsation in epigastrium; each throb gives him a jerk.

Burning-pressing in abdomen.

Burning in abdomen leaves a dull ache.

Coldness from abdomen to feet.

Warmth in abdomen; heat at night.

Burning. θTyphlitis.

Burning in hypogastric region. θCystitis.

Pain deep in abdomen when exerting pressure in epigastrium.

Abdomen is painful to touch, especially region of bladder.

Abdomen sore to touch, as if beaten, after cough.

Abdomen very hard, distended, painful to pressure.

If pain extends into abdomen it leaves behind a dull pressure.

Speechless; he touches his belly as seat of pain; t.

[20] **Stool and Rectum.** Escape of small quantities of flatus.

Evacuations of consistence of pap and in small quantity.

Stool omits first day, with a feeling of diarrhœa, in evening.

Urgency to stool; passage of noisy flatus at first; is compelled to strain hard to eject soft, pappy stool.

Noisy flatus before soft stool, with much effort.

After breakfast a second stool; after much urging a little lump of phlegm, covered with blood, passes.

Frequent urging for a soft, pasty, yellow stool.

Stools at first watery, afterwards thicker.

Digitized by Google

||Very scanty, pasty stool.
Soft stool, yellow, pasty; he was scarcely dressed after movement before he was obliged to go again.
||Stools soft, afterwards passage of thin, red blood.
Soft stool, after one hour, followed by passage of blood; later, moving about, and burrowing in abdomen; hemorrhoidal symptoms, an hour after a second stool, with passage of blood after evacuation.
After stool thin, red blood passes in considerable quantities.
Mucus passes after stool, and later, a thin fluid flows from anus.
Obstruction of bowels, with fever heat.
|Stool omitted before and with coma. θTyphus.
||Stool has been retained since beginning of disease, which began with chill. θTyphoid.
Stitches as of knives in rectum.
Stitches in rectum soon after stool.
Boring, digging in anus and sacrum.

21 **Urinary Organs.** |Sensation of fulness in bladder; region of bladder sore to pressure. θCystitis.
Spasmodic drawing sidewise, from bladder towards penis, or deep behind and near bladder.
||Stinging deep in hypogastrium, behind and above bladder.
Pain in region of bladder; sensation of fulness without urging to urinate, followed by a moderate discharge of of water.
|Violent pain during urination.
Stinging and drawing in l. ureter.
|Stitches in urethra, evenings.
Burning in urethra, if pressing to increase flow it burns like hot water.
Burning in urethra, with and without urinating.
Burning or offensive urine.
|Urine offensive, with sediment. θImpotence. θGleet.
|Scanty, putrid smelling urine, in evening. θImpotence.

22 **Male Sexual Organs.** ||Sexual desire with relaxed penis, or painful erections without desire.
||Impotence with mental depression.
|Impotency; penis remains relaxed during excitement and sexual desire.
Erections when half asleep, mornings, that ceased when fully awake.
An erection in morning and cohabits, but suddenly his desire ceased, and he did not know if there was an emission or not.
No erection, even after amorous caresses.

Digitized by Google

Painful erections, without sexual desire; it alternates one morning with desire, with relaxed penis.
Incomplete erection; it seems as though it was broken; semen emits too soon.
Erection morning, without any desire.
During an embrace, no emission and no orgasm.
After coition: prepuce remains retracted, with pain and swelling; sore corrosive pain; this returns after coition for months.
Pimples on mons veneris.
Drawing from bladder to penis.
Stitches in penis.
Dull burrowing in penis.
Gonorrhœa of glans.
Glans very red, covered with fine, red points, very dry, which cause a desire to rub it; prepuce is very much swollen along its margin, sore and very painful.
‖Glans dry and red. θImpotence.
Sore corrosive pain on prepuce.
‖Prepuce very much swollen along its margin, sore and very painful, biting on urinating.
After coition painful erection.
Sexual organs seem larger, as if puffed, relaxed and sweating; skin of scrotum seems thicker than usual.
‖Excessive perspiration on scrotum.
‖Violent itching eruption on scrotum; < at night, dry and scaly.

[25] **Female Sexual Organs.** Pain in abdomen, with pressure on uterus.
‖Itching followed three months later by a mucous discharge and a very troublesome eruption of pimples around genitals.
‖Frequently returning itching over genitals, finally with voluptuousness.
‖Violent itching on external genitals compelled her to scratch in spite of punishment; reduced her in body and mind.
‖‖Pruritus vaginæ: induces onanism; during pregnancy.
Onanism, with mucous discharge, and pimples around parts.

[31] **Pregnancy. Parturition. Lactation.** ‖Pruritus vaginæ.

[26] **Voice and Larynx. Trachea and Bronchia.** Hoarseness; want of timbre in voice.
Larynx and trachea seem to be constricted; deep breathing impeded.
Unable to speak a word on account of vocal cords being swollen, and from continual cough.
Epiglottis and adjacent parts decidedly swollen, and exceedingly painful to pressure.

Digitized by Google

When asked where he suffers, he points to his larynx, then to his mouth, and lastly to his stomach.

Cough, on attempting to speak.

‖Wheezing when taking a deep breath, and irritation to cough felt above larynx.

‖Tickling in throat with cough, often repeated during day; < at night.

* **Respiration.** Dyspnœa produced by pressure on scrobiculum.

Oppression of chest, with burning in stomach; oppression continues afterwards.

Larynx feels constricted with wheezing respiration.

Panting breathing at night, with fever. See 40.

Fever with chilliness and thirst; wheezing in chest; coryza; throbbing in chest.

‖Breathes in sighing jerks, during unconsciousness and great heat. #Typhus.

Respiration very incomplete, inspiration catching; sinking in pit of stomach was very noticeable. Compare 17.

Deep inhalation prevented by burning in stomach.

Respiration difficult and oppressed; he grasped his throat with his hand every moment.

Asthma: great oppression, could scarcely get his breath; feels as if mucus would cause suffocation, but without anxiety; attacks after eating, or after siesta; when rash on forearm disappears; in alternation with rash on chest.

‖Asthmatic complaints.

π **Cough.** Sudden and involuntary cough, caused by an irritation high up in throat; it is a half cough, half moan.

Pressure in pit of stomach causes cough; later heaviness there prevents his cough.

Cough not spasmodic, without expectoration; < if he attempts to speak a word.

Incessant cough of a hoarse sound.

Cough, no sputa, but wheezing.

He desires to cough, but heaviness in pit of stomach will not permit it.

Weak, toneless cough prevents sleep at night, continues next morning.

Weak but continuous cough; raises little hard lumps; chest then feels hollow or empty.

Cough in slight, weak, sensitive paroxysms, with expectoration of small lumps of mucus.

Cough, lasting from 10 P.M. to 1 A.M.

Cough at first prevents sleep at night, later also in morning; weeks after seldom, but more violent; throbbing in chest and coryza after fever.

Digitized by Google

[28] **Inner Chest and Lungs.** Stitches in chest, in evening.
Dull sticking in r. side of chest, with oppression; < on l., > when lying on r. side, evenings, in bed.
Stitches as with needles on a small spot between l. nipple and axilla, very deep inside, neither breathing nor moving influences it.
Pressive sticking in l. side of chest, near sternum.
Throbbing in chest, with night fever.
Hollowness and emptiness in chest after expectoration.

[29] **Heart, Pulse and Circulation.** Pulse: hard and bounding in intermittents; very frequent, hardly to be felt in typhus.
Peculiar throbbing below heart, not palpitation, only perceptible on applying hand. See 31.
Pulse small and frequent; t.
Pulse hard and bounding. #Intermittent.
Hard, full, jerking pulse.
Small pulse with cold sweat.
Pulse rapid, but scarcely perceptible. #Typhoid.

[30] **Outer Chest.** Fluttering sensation below cardiac region.
On straightening up, cracking below last ribs, as if one rib had been dislocated and snapped back again.
Ribs and small of back feel as if beaten when rising in morning.
Itching, burning rash on forearm and chest, alternating with asthma.

[31] **Neck and Back.** Between shoulders, rheumatic pain; can hardly turn in bed; feels beating of a pulse when lying down.
Between shoulders a spasmodic sensation in walking as if he would fall headlong.
Stitches in back, as if from incarcerated flatus.
Backache. See gleet, 22.
Boring and burrowing in sacrum and anus.
Sacral region and back feel bruised; in morning, on rising.
Pains in sacrum, mornings, a kind of weakness, as if he had not sufficient strength in sacrum; stitches during certain movements, especially when walking.

[32] **Upper Limbs.** Pain in shoulder, with headache.
Drawing squeezing pains in arms.
Arms "asleep" on waking in morning; can hardly move them.
Pain between bones of forearm. See 34.
Rash on forearm; in bend of elbow and on wrist.
Eruption on inner forearm of very red pimples; itching and burning disappear, and are followed by asthma.
After writing; faintness.
Feeling in palms like pins and needles, similar to what is

Digitized by Google

felt when ulnar nerve is struck, or, by some people, when looking down from a height; felt towards evening and lasted till sleep, causing her to rub them hard.
Left thumb numb as if asleep; also little finger, with crawls.
All fingers felt very large, like sausages; she could not use them well; they felt as if they were going to be paralyzed; this lasted till middle of next day.
Itching of fingers, especially evening, when lying down.

[55] **Lower Limbs.** Furuncle on buttock, painful when sitting.
When standing, his knees feel weak and tremble; is obliged to sit down.
Left knee: throbbing pain when lying, evenings; as if being forced asunder; cracks on stepping and impedes walking.
Feet icy cold, with hot fever and hot hands.
Feet hot, with cold body.
Pains behind tendo-achillis.
Cramp in soles, at night.
Corroding burning on toes.
Sticking in a corn.
Stitches in a corn in l. little toe.

[54] **Limbs in General.** Drawing pinching pains between bones of forearm, and behind tendo-achillis.
As if beaten in all joints; heaviness in limbs, in morning, ‖ Limbs weak; cannot get out of bed; all forenoon weary, fatigued and ill-humored.

[55] **Rest. Position. Motion.** Lying: desire to lie down; rocking dizziness; pressing in side; stitches in r. chest, > when on r. side, < on l. side; throbbing in l. knee; nervous symptoms >; debility >; faintness.
‖ Lying in bed with mouth partly open; 4th day. # Typhus.
Sitting: headache disappears; pressing in side >; stitches at pit of stomach <; furuncle on buttocks painful.
Rising: faintness.
Standing: knees weak, trembling and painful.
Turning: rheumatic pain between shoulders <.
Bending: cutting in abdomen >.
Straightening up: cracking below last rib.
Walking: dizziness; cramping between shoulders and in brain; discomfort after pickled fish in evening >; throbbing in umbilical region; spasm between shoulders; stitches in sacrum; cracking in knees and aching; tires; has to take hold of something to prevent falling.
Motion: faintness after writing.
‖ Aversion to motion; dreads it; ‖ wants to lie down all the time, but, making an effort, he is strong enough.

[56] **Nerves.** Frequent startings during sleep.

Digitized by Google

Lies entirely unconscious; single shocks convulsed her body from time to time; 9 P.M. 7th day. θTyphus.
Tremors and fear of having an attack. θEpileptic patient.
Heaviness in morning and all forenoon.
Weakening stitches.
Prostrated by throbbing in abdomen.
Must lie down and close eyes, when it seems as if he was rocked.
Debility obliging him to lie down.
Faintness after writing, when reflecting, lying, and on rising up, or with nausea.

[37] **Sleep.** Grows sleepy and fretful again at 7 in morning, and would like to return to bed.
Sleepy in morning, after rising; his eyes close while walking in open air, with nausea and qualmishness in stomach, where a sensation of emptiness is felt, with weakness and prostration in knees.
Sleepy before dinner, must close his eyes; sleepy in early evening, cannot keep awake.
Sank back upon her pillow again (after drinking) and immediately fell asleep, with sighing respiration. θTyphoid.
Before going to sleep, apprehensive.
He is obliged to lie down during day, but is unable to sleep; shivers, and is dizzy.
Everything disturbs him in sleep, [illegible] most noises, even rattling of paper; cough; cannot get asleep till 1 oclock at night.
Starting in sleep, moaning and groaning.
A sort of slumber (light sleep); nausea; faintness; heat, in morning; erections.
During a confused slumber, everything comes to his mind, which he had forgotten while awake.
Coma after the crawls. θTyphus.
Unconsciousness and coma. θTyphus.
Excessive erections, at 4 A.M., without desire; deep sleep towards 6 A.M., so that he can scarcely rouse himself, with vivid dreams of persons whom he has not seen for years.
Restless night, with heat; is obliged to uncover, with light slumber.
During sleep: internal fever disappears.
He groans and moans anxiously in sleep, so that he wakes neighbors several times in night, and for several nights.
Everything troubles him in sleep.
Sleep at night restless, with confused dreams.
Restless, anxious dreams.

Digitized by Google

Very clear, vivid dreams.

Dreams of dead persons, and events of past years, so vivid that when he awakes he falls asleep again directly, and continues to dream of them.

Started from her slumber at slightest noise. θ Typhus.

It seemed uncertain whether she was always aroused by a noise, or whether she was not often aroused by thirst; each time she was aroused she asked for water. θ Typhus.

A nap during day lessens all symptoms.

After siesta: headache; oppression of chest.

On awaking: headache, also after siesta; still sleepy, fretful; thirst, with dry lips; arms asleep.

[33] **Time.** Night: awakened by dry lips and thirst; heat in abdomen; itching of scrotum <; tickling cough <; panting breath; toneless weak cough; cough from 10 P.M. to 1 A.M.; cramp in soles; restless and hot; corrosive burning of skin on cheek, nose, toes.

Midnight: cutting in pit of stomach.

After midnight: stitches through epigastrium and l. flank; chill; abdomen cold, feet hot.

Morning: vertigo, nausea, with stitches at pit of stomach; on waking, stupefying pressure in r. temple; toothache; nausea while half asleep; during slumber, faintness; nauseating fluttering in stomach; after breakfast, second stool; erections when half asleep; has erection and cohabits, desire suddenly ceases; erection without desire; cough continues; ribs and small of back as if beaten; sacral region and back feel bruised; pain in sacrum; arms asleep, can hardly move them; heaviness of limbs; limbs weak, fatigued; 7 A.M., sleepy and fretful; emptiness at stomach; weakness of kness; excessive erections, 4 A.M.; deep sleep at 6 A.M.; 9 A.M., burning sensation.

Afternoon: heaviness.

During day: roaring in ears; tickling cough; does not drink; must lie down.

Evening: tickling and itching in r. ear; toothache; burning in stomach; twisting in abdomen; urine scanty and putrid; feeling of diarrhœa; stitches in urethra; dull stitches in r. chest; itching of fingers; throbbing in l. knee; convulsed by shocks; sleepy; cold until midnight; chilly; cold from abdomen to feet; heat and thirst till midnight; burning sensation, 7 P.M.; hands, face and abdomen hot, feet cold till midnight; 9 P.M., sweet odor of sweat; sweat with prostration; itching of skin.

[39] **Temperature and Weather.** Worse from warmth, warm

Digitized by Google

air, warm bed; most complaints during the heat of day (tropics).
Has to uncover during fever heat.
Better in-doors.
Open air: sweat followed by chill.
Cold water lessens the burning.
‖Result of catching cold. θTyphoid.
Cold: aversion to cold water; water, corrosive itching of skin >.

40 **Fever.** ‖Coldness of single parts, sometimes with crawling.
Cold, in evening till midnight, with thirst, panting, beating in chest; coryza.
Chilliness over back and whole body, with drawing pains in l. little finger that feels as if full and gone to sleep, besides a pulled, stretched sensation in whole body.
Chilly, in evening, without thirst; coldness extends from abdomen to feet; they are icy cold, as also are fingers.
‖Began with a chill, thirst and loss of appetite. θTyphoid.
Heat before midnight, during sleep, passing off quickly on awaking.
Fever after seven days; heat with thirst; violent pain in ear; swollen submaxillary glands, and constipation.
Fever ninth day; heat with thirst, in evening, till midnight; it again wakes him, when it disappears.
Fever on twelfth and thirteenth days; in evening, till midnight, coldness with thirst, catching in chest, therewith he feels sleepy; it wakes him again about midnight, and then disappears, together with throbbing in chest and coryza.
‖In morning at 9 and in evening at 7 o'clock a burning sensation, during which patient often started up and mumbled unintelligible words. θTyphoid.
Heat only internal, with throbbing in body.
Heat rises up in head.
Internal feverish heat, exhausting sweat, as from oppressive heat.
Heat with drowsiness.
Internal fever disappears during sleep.
‖‖Falls asleep during evening fever, and wakes when it stops.
Heat after midday sleep, then sweat, then chill in open air.
Heat before midnight, chill after.
Heat of hands, face and abdomen, with cold feet before midnight; after midnight, abdomen is cold, feet hot, without thirst.
‖Sweat attracts flies, which bother him very much.

Digitized by Google

‖She perspired at times, and her sweat had quite a sweetish odor. θTyphus.

‖Sweet odor of sweat, especially when she appeared to be dying, at 9 P.M., 7th day.

Sweats easily.

Scanty sweat.

Gentle sweat with internal heat and prostration.

Cold sweat all over.

Sweat with earache; with drowsiness.

Sweat towards evening, with prostration, yawning, and sleepiness.

Sweat relieved all symptoms.

After siesta: heat, then sweat, followed by chill in open air.

Catarrhal fever with chilliness, thirst, and throbbing in chest.

[42] **Locality and Direction.** Right: sticking in temple and eye; stinging in temple and eye; stupefying pressure in temple on waking; stitches in eye; throbbing in ear and feeling of warm water around it; throbbing, formication and feeling as if ear asleep; tickling and itching in ear; pimples on septum of nose; drawing from ear to teeth; beside navel, throbbing; dull stitches in chest.

Left: boring and sticking in temple; pressing in side from lying; side of head as if asleep; throbbing in knee; stitches in eye; stitches in ear; pimples on and behind ear; drawing in molars; stitches through flank as with glass; stinging and drawing in ureter; stitches between nipple and axilla; sticking near sternum; throbbing in knee; stitches in a corn on little toe.

Left to right: headache; pressure in temples; boring stitches in temples.

Above down: drawing in l. molars.

Below up: heat ascends into head; burning in abdomen to breast.

Behind forward: drawing from bladder to penis.

[43] **Sensations.** Sensations in l. half of head and fingers as if asleep; as of something before ear preventing hearing; as if r. ear asleep; as of something dry lying in stomach; as if spider-webs were sticking here and there; as if a fly was crawling on face; as of a bird fluttering in stomach; as if a long worm was writhing in region of transverse colon; as of diarrhœa, in evening; in palms like pins and needles.

Sensitiveness: of pimples behind ear; of eyeballs; of abdomen to touch and pressure; of bladder to touch and pressure; to pressure of epiglottis and adjacent parts.

Cutting: through epigastrium and l. flank; in umbilical region.

Google

Stitches, like with needles, in various parts of body.
Stitching: in pit of stomach; in skin of forepart of head; in eyes; in r. eye; in l. eye; in l. ear; in ear; on cheek; in splenic region; knife-like, in rectum; in urethra; in penis; in chest; between l. nipple and axilla; in back; in sacrum when walking.
Sticking: in r. temple and eye; in l. temple; in chest near sternum, l. side; in corn of l. little toe; in fresh wounds.
Stinging: in r. temple and eye; deep in hypogastrium; in l. ureter.
Boring: in forehead; in l. temple; in teeth; in anus and sacrum.
Gnawing: at orifice of stomach.
Digging: in anus and sacrum.
Burrowing: in abdomen; dull, in penis; in sacrum and anus.
Bursting: pain in forehead.
Twisting: pain in abdomen.
Drawing: in occiput; in l. molars; from r. ear to teeth; from bladder towards penis; in l. ureter; in arms; in l. little finger.
Cramping: between shoulders and in brain, walking; in soles.
Scratching: in throat.
Stretching: of whole body; with the crawls.
Writhing: as of a long worm in colon.
Jerking: in splenic region.
Burning: in eyes; on upper margin of ears; in upper part of nose; stitches, on cheek; in mouth and fauces; in throat; in abdomen; in stomach; in hypogastrium; in urethra; an itching rash on forearm and chest; corroding, on toes; of surface, in morning; in fresh wounds.
Burnt: as if with kreosote, in mouth.
Biting: on cheek; of prepuce, on urination.
Bruised: ribs and small of back, as if beaten; in all joints, as if beaten.
Aching: of ear, during fever; in teeth, morning and evening.
Soreness: of abdomen to touch; of prepuce.
Pressure: in forehead, after smoking; in l. side, from lying; stupefying, in r. temple; in eyes; in abdomen; in pit of stomach; in splenic region; on uterus.
Pain: headache in forehead and occiput; headache as from a load; pressing headache; in pimples on r. side of nasal septum; headache from smoking; at pit of stomach; deep in abdomen; in region of bladder;

Digitized by Google

during urination; sore and corrosive pain of prepuce after coition; rheumatic, between shoulders; backache; in sacrum; in shoulders; between bones of forearm.
Discomfort: in evening, after pickled fish.
Largeness: of eyes; of fingers; of sexual organs.
Beating: in chest.
Fluttering: in stomach; below cardiac region.
Throbbing: in l. knee; in r. ear; in pit of stomach; to right of navel; in chest; below heart; of body with internal heat.
Pulsating: in upper abdomen; in epigastrium.
Tension: in temples.
Contraction: of larynx and trachea.
Twittering: in ears.
Dulness: in head.
Oppression: of chest.
Heaviness: in epigastrium; in pit of stomach prevents cough; in nervous system.
Fulness: in bladder; in little finger.
Hollowness: in stomach; in chest.
Faintness: in morning; in morning during slumber; after writing.
Weakness: in sacrum; of knees when standing; of limbs.
Heat: in head; in face; in feet.
Warmth: as of water around r. ear; in abdomen.
Coldness: from abdomen to feet.
Spasm: sensation like, between shoulders.
Numbness: in head; in l. thumb and little finger.
Formication: around r. ear.
Itching: in r. ear; of fingers when lying; eruption on scrotum; of female genitals; and burning eruption on inner forearm and chest.
Tickling: in r. ear; in throat causes cough.
Crawling: as of a fly over face, or spider-webs sticking here and there.
Cracking: below last ribs on straightening body; in l. knee when stepping.
Dryness: in pharynx; of lips.

" **Tissues.** Loss of fluids.
Dryness: inflammation of mucous membranes.
Mucous membranes: dry; dry feeling; inflamed.
Soft parts retracted.
Glands swollen.
Joints crack; pain like dislocation.
Bruised feeling in joints.
Phthisis; typhus; prurigo.
Dropsical swellings.

" **Touch. Passive Motion. Injuries.** Touch: pimples be-

Digitized by Google

hind ear sensitive; sensitiveness of eyeballs; abdomen painful, especially near bladder; must touch the part.
Pricking in palms, like from pins and needles, has to rub them hard, towards evening, lasting till sleep.
Pressure: boring and sticking in temple >; abdomen painful; soreness near bladder.
Riding: discomfort in evening, after pickled fish.
‖Mosquito-bites burn, itch intensely.

" **Skin.** Frequent attacks of violent and corrosive burning in small places of skin on cheek, nose, toes and other places, at night, obliging him to rub.
Crawling.
On skin, especially in face, frequent sensation, as if a fly was crawling there.
Stitching like needles.
Itching, evening, after going to bed; has to scratch.
Violent corrosive itching, burning; must touch parts, but cannot scratch there; feeling as from splinters of glass; no swelling, but much heat; bright red spots on face, eyes, throat, arms; > from cold water.
Fly-bites itch and burn severely.
Rash, with white vesicles, on wrist, forearm and elbow; it itches from heat at night, burns internally after scratching.
Nettlerash on inner side of forearm, consisting of very red pimples, which itch and burn very much, after three to four days, when it disappears; immediately great oppression of chest, so that he could scarcely get breath, as if mucus would suffocate him, without anxiety; especially after eating, and after midday nap.
White, suppurating pimples, with red areolæ, appear here and there on body, with an itching sensation, sore to touch.
Pimples: scalp; ear; nose; mons veneris.
Painful pimples on septum of nose, r. side.
A furuncle had formed on buttock, that pained him severely when sitting.

" **Stages of Life, Constitution.** Lax phlegmatic temperament.
‖Girl, æt. 4; irresistible itching on genitals. 6 drops of tincture in 3 ounces of water, every 3 hours.
‖Girl, æt. 20; suddenly attacked with genital itching after 3 months. 8 drops of tincture in 6 ounces of water, every 3 hours a tablespoonful.
‖A widow, upward of 40, mother of a large family. θTyphus.

" **Relations.** Family relations: *Arum dracon.*, *Arum mac.*, *Arum triph.*

Digitized by Google

Antidotes: *Camphor.* (?), ‖‖*Capsic.* The juice of the sugar cane is said to be antidotal, and the negroes say the juice of the root will annul effects produced by the juice of the leaves. ‖*Ignat.* relieved the stitches in pit of stomach, and the fever; *Carb. veg.* removed the rash, *Hyosc.* lessened the night cough, *Zingiber* the asthma. *Mercur.* relieved the preputial symptoms.

Caladium antidotes: *Mercur.*

Compatible: *Acon. Canthar., Pulsat., Sepia.*

Incompatible: *Arum triph.*, and doubtless the other *Araceæ.*

After failure of *Opium, Stramon., Bryon., Acon., Natr. mur.* and *Ipec.* in typhoid, *Calad.* cured completely.

Complementary: *Nitr. ac.*

Compare: the *Araceæ* generally; ‖‖*Acon.*, ‖*Bryon.*, ‖‖*Caustic.*, *Carb. veg.*, *Canthar.*, ‖‖*Capsic.*, *Hyosc.*, ‖*Ignat.*, ‖*Lycop.*, ‖*Mercur.*, ‖*Nitr. ac.*, ‖‖*Nux vom.*, ‖*Phosphor.*, ‖‖*Pulsat.*, ‖*Sepia*, ‖*Sulphur*, *Zingib.*

CALCAREA ARSENICA.

Arseniate of Lime. 3 *Ca O, As* O_5.

Prepared and proved by C. Hg., in 1848, in the 4th centesimal trituration, and by five other well experienced provers, who did not know of each other until 1851. Some cures were published to induce more provings. The few given here contain elements of great promise. We want more cures, even reports of failures, but, above all, good provings of the higher potencies.

[1] **Mind.** Mind seems dull and unable to digest any subject. Unable to attend to any business, on account of headache.

‖Delirium evenings in dark. θTyphoid with albuminuria.

‖‖Great depression of mind.

‖Mind much depressed with great anxiety, about still greater evils in future. θAlbuminuria.

With exertion of mind headache lessens but is much < afterwards.

The slightest emotion causes palpitation of heart. Comp. *Lith.*

[2] **Sensorium.** Vertigo when moving head. See 11.

In sudden attacks he feels as if he was flying or swimming in the air, as if his feet did not touch the ground;

Digitized by Google

feels indescribably well, as if in heaven, the most wonderful visions pass before his eyes, it seems to be a great many different things but lasts only a second, it passes like lightning, but is infinitely much.

A pressing heaviness first on top of head, then in occiput.

Head seems to get heavier and heavier.

‖Congestion to head before an epileptic attack.

³**Inner Head.** Dull stupefying headache in different parts of head, but principally above and behind ears.

Head gets heavier and heavier; and quick movement makes him giddy.

‖Rush of blood to head before an epileptic attack.

≈Violent pains over r. eye.

The headache was worst in front and above l. ear, most on a place where he had a headache before.

Between ear and r. forehead a burning, lasting some months.

Boring-jerking in front over r. ear and on lower border of acquisitiveness and in occiput in region of sociableness, with a chill, has to go to bed; after getting cold out-doors in winter.

Stitches in l. side of head, above neck towards region of temples and across forehead from r. to left.

Pressing heaviness; first in vertex, afterwards in occiput.

‖‖Mornings, going out-doors, very peculiar headache; boring-shooting in occiput in regular measure, and simultaneously a sensation as if one was drawing on a thread in larynx from front backward, and repeated once soon afterwards.

Violent headache beginning at noon, < towards evening, < after supper; a digging, pressing beating through l. half of head, ‖from front backward; lying on forehead it is < in occiput over nape of neck; lying on back it is < in forepart of head, same lying on either side, always < opposite side. It causes a feeling of lameness in whole body; it was followed by a tearing pain in upper and lower jaw, as if jerking down from head; relieved by *Pulsat.*

Headache commencing very slightly, but gradully increasing to such violence that he is unable to do any business; it is most in forehead, as if it would split the head and tear it to pieces. The beating of pulse gradually has increased from 80 to 100; each beat of heart he felt in head as if every beat was striking against a wedge. Stooping and going out-doors <. He had to go home again, on the 7th day, could do nothing and felt exceedingly weak. From the 4th day of the proving it had increased gradually up till noon of 7th day.

Digitized by Google

Burning in head, first l. then right.
Headache: > with mental exertion, but < after; < after slightest error in diet; and palpitation of heart < and > together; with stiffness of neck, wakens him towards 4 A.M.; he had no sleep after it and could not lie; weekly, stitches in r. forehead.
Beating in head and back drive him out of bed.

4 **Outer Head.** ‖Temples œdematous. θAlbuminuria.
‖Head is hot. θAlbuminuria.

5 **Sight and Eyes.** Letters seem to run together.
‖Delirium in the dark.
‖Eyes have little brilliancy. θAlbuminuria.
Violent pain in r. eye and above it.
Headache over l. eye.
‖Blue rings under eyes.

6 **Hearing and Ears.** Headache and toothache extend into ears.
Benumbing headache is most above and behind ears.

7 **Smell and Nose.** Sneezing with fluent coryza in morning.
Sneezing with a jerking-shooting pain near l. side of breast bone, region of 4th and 5th ribs.
Before breakfast, catarrh in head, spitting of mucus, which falls down from choanæ.
3 A.M., wakefulness, restlessness, sweat and running catarrh, next morning frequent sneezing.
No phlegm through nose, only from choanæ.
Crusts are formed in choanæ. See 25.

8 **Upper Face.** Tearing pain in upper and lower jaw; jerking down from head; after *Glonoine* taken for headache, *Pulsat.* relieved.
Heat in face with palpitation.
‖Pale face and blue rings under eyes with palpitation.
‖Looks pale and suffering. θAlbuminuria.
‖Face swollen, especially about eyes. θAlbuminuria.

9 **Lower Face.** Tearing pain in upper and lower jaw from head down.
Itching on upper lip.
‖Lips dry. θAlbuminuria.

10 **Teeth and Gums.** Toothache in decayed molars, extending into ears, recurring weekly.

11 **Taste and Tongue.** Flat unpleasant taste, sometimes metallic, sometimes alkaline.
Sour taste with sore throat.
Taste like garlic during swallowing.
‖Tongue dry. θAlbuminuria.
Burning on tip of tongue.

12 **Inner Mouth.** Saliva runs together in mouth like water, with a tasteless belching.

Digitized by Google

Sour taste. See 13.

[13] **Throat.** Choanæ. See 7.

Tickling in back of throat. See 25.

After belching a burning in œsophagus as from pepper, with garlicky taste when swallowing.

A roughness and scratching in throat as if he had eaten nuts.

A sensation as if a scab was in upper part of throat and occasioned tickling and cough, which shakes whole chest and feels as if bruised.

Copious hawking of tough white phlegm.

Dryness in pit of throat and roughness of voice.

Pressing pain in throat, in clavicular region, with sour taste and waterbrash.

[14] **Appetite, Thirst. Desires, Aversions.** No craving for food for body or mind.

No appetite during evening after fever, with thirst in afternoon. See 40.

No appetite, with pain in loins and groins. See 19.

Thirst for cold water.

No appetite, can enjoy only soup, eating which often causes eructations and vomiting.

Great thirst, but when she drinks too much, pain in belly and diarrhœa supervene. Albuminuria.

Desire for wine or other spirituous drinks.

[15] **Eating and Drinking.** Can bear turnips now and corn-meal, even when costive; had given him headache since 20 years and pain in sternum; after sweet potatoes, diarrhœa in night.

After drinking wine, pain in groins or in spermatic cords.

After least error in diet headache increases.

Torpid condition of body and mind; the food he eats seems to lie in stomach without digesting.

[16] **Hiccough, Belching, Nausea and Vomiting.** Pressing as if to belch, ending with a sudden beat of heart. See 20.

Belching, followed by burning in pharynx; with a running together of saliva.

Nausea when sitting down.

Waterbrash with sour taste.

[17] **Scrobiculum and Stomach.** Acidity of stomach.

Burning heat in stomach.

Anxiety in pit of stomach.

Dull pressing stitches below stomach, with cutting across abdomen.

Digging in pit of stomach.

Painful stitches in pit of stomach, started by some movements of arm; pain is followed by a cutting in r. side.

Google

Sensation as if stomach was expanded.
‖Region of stomach distended. θAlbuminuria.
‖Gastric ulcer, in a girl with scanty menstruation.
May be indicated in pancreatic diseases with albuminuria.
Cancer of pancreas, when there is burning pain.

[18] **Hypochondria.** ‖Cirrhosis of liver in typhus with albuminuria.
Sensation of fulness below short ribs, at 1 P.M.; feels weary and drowsy.

[19] **Abdomen.** Sensation as if diarrhœa would appear; soon after colicky pain around navel with pressure downward.
Colic and looseness of bowels.
Sensation in both groins and loins as if a hernia would be forced out, with loss of appetite after drinking some wine; lasting ten weeks.
‖Bowels very tense. θAlbuminuria.
‖Swelling of inguinal glands, with tearing pain in legs.
Very painful shooting, cutting jerk across abdomen going from right to left.
Sensation as if abdomen was expanded, with fever. See 40.

[20] **Stool and Rectum.** Faintness; cold hands followed by a stool without relief.
Urging to stool with palpitation and oppression of chest.
Burning with the passage.
Stool with ascarides, and itching at anus from evening until midnight.
Diarrhœa at midnight after sweet potatoes.
‖‖Looseness and colic; also during pregnancy.
Infantile diarrhœa.
Stool tardy, but not hard.
‖‖Hard and difficult stool for months.

[21] **Urinary Organs.** ‖Great sensitiveness to pressure in region of kidneys. θAlbuminuria.
‖Must pass urine every hour; urine containing very much albumen. θAlbuminuria.
Burning with scanty urine.
‖‖Albuminuria.

[22] **Male Sexual Organs.** Pain in spermatic cords after great exertion and drinking some wine; has to go home; hands turn cold; faintness and stool without relief.

[23] **Female Sexual Organs.** ‖Scanty menses. θGastric ulcer.
Bearing down and prolapsus. See 24.

[24] **Pregnancy. Parturition. Lactation.** During pregnancy bearing down, prolapsus vaginæ and other complaints. See 30 and 31.
Albuminuria during pregnancy.

[25] **Voice and Larynx. Trachea and Bronchia.** Drawing as with a thread from larynx backward, with headache.

Digitized by Google

Dryness in pit of throat and roughness of voice, followed by a feeling as if a crust was in upper part of throat, which caused a tickling and a cough, shaking the whole chest; feeling all over chest as if beaten.

‖Loses voice and afterwards consciousness; before an epileptic attack.

[26] **Respiration.** ‖Kind of asthma, awakens soon after midnight with difficulty in breathing as from fulness in chest; gets uneasy, turns all night in bed from side to side, falls asleep and gets awake again; has such an attack every night, but each night somewhat later until it reaches the morning, after he rises; breathing not free all day, but without palpitation.

‖Feeling as if he would suffocate, with palpitation.

[27] **Cough.** Cough shaking whole chest, caused by a tickling from a crust in upper part of throat; chest feels as if beaten.

[28] **Inner Chest and Lungs.** In clavicular region pain in throat.

Dull pressure on chest, with roughness of throat.

Fulness in chest. See asthma, 26.

Chill extends from back towards chest. See 40.

Burning and heat in chest. See 29.

‖Precursory symptoms, with violent pains on l. side. θEpilepsy.

[29] **Heart, Pulse and Circulation.** Immediately oppression and increased soreness of heart, with palpitation.

Rush of blood towards l. chest.

Jerking shooting pain about 4th and 5th ribs, l. side, near breast bone. See sneezing, 7.

The prover never took a medicine which acted so strongly on the vascular system; two nights in succession, throbbing in head and back drove him out of bed.

‖Pains in region of heart and fearful palpitation, with burning and heat in chest, followed by shooting in back, extending to feet and arms.

‖Attacks of pains in heart, with violent attacks of palpitation and fear of suffocating; face pale, deep rings below eyes. θAfter suppression of intermittent by opium.

‖Pains in heart; before epileptic attack. See 36.

‖Constriction of heart. θBefore an epileptic attack.

Constriction of heart like from a rush of blood to l. chest, with palpitation and urging to stool.

πHis habitual palpitation, not caused by an organic disease, increases very much.

‖Beat of heart very strong. θAlbuminuria.

Frequent attacks of palpitation, with heat of face, lasting

Digitized by Google

several days, after each, even slight emotion of mind; before such an attack always heat of hands and tremulousness.

Violent palpitation, with an urging to belch and unable to get wind up, as if something in heart prevented it; suddenly follows a violent beat, like an explosion, commencing in pit of stomach and extending up into head, after which he feels every beat of pulse. *Carb. veg.* antidoted.

‖Palpitation and headache increase and decrease together.

❚Palpitation, with oppression of chest, disturbing sleep. See 37. θBefore epilepsy.

❚Every fourth beat of pulse omits with great regularity. See 36.

Pulse increased in number continually from 80 to 100, is quicker and harder; he feels with it all beats of heart during 3 to 4 days; somewhat > on 5th day.

❚Pulse 120, easily compressed. θAlbuminuria.

[30] **Outer Chest.** Dull pressure on chest.

[31] **Neck and Back.** Pain very near nape of neck.

‖Stiffness of neck with headache, on waking in morning.

Shuddering over back extending into feet and arms.

Throbbing in back, drives out of bed at night.

❚Violent backache between shoulders and sacrum.

❚Could not straighten back. θAlbuminuria.

Frequent shooting in small of back, after diarrhœa with colic; in 6th month of pregnancy after 30 cent.

[32] **Upper Limbs.** Lame pain as if beaten, in l. shoulder and arm, morning in bed; > after lying on it.

Lame feeling of l. arm, with a painful drawing about 3 inches above wrist to upper arm and into shoulder; later same feeling in r. arm, but less marked.

Backache extends into arm.

❚Pains in l. hand and arm before epileptic attack.

Cold hands and fainting after pain in spermatic cords.

Chill from back to arms.

Heat of hands before palpitation.

❚Back of hands œdematous. θAlbuminuria.

[33] **Lower Limbs.** ‖Pain in his l. knee of a neuralgic character.

Backache extends into lower limbs.

Tearing pain in legs, with swelling in groin.

❚Lower extremities œdematous. θAlbuminuria.

Weariness in lower limbs, most in knees.

‖Weariness amounting to lameness of lower limbs.

Feet heavy.

[35] **Rest. Position. Motion.** Stooping causes headache, like pulse beating against a hedge.

Digitized by Google

Sitting down: nausea.
Lying down: throbbing in head and back; sleeplessness; causes headache on opposite side lain on; on l. arm >; pain as if beaten; epileptic attack ceased.
Motion: of head causes vertigo; giddy, from quick motion; of arm causes stitch in pit of stomach and cutting in r. side.
After great exertion: fainting; pain in spermatic cord.

[36] **Nerves.** Weary, with fulness under ribs.
Lame sensation in whole body, with headache.
Great weariness and drowsiness.
Bodily and mental relaxation.
Collapse, in heart and kidney affections.
Very weak, with headache.
Restless in morning, with difficult breathing.
Tremulousness before palpitation.
Lightness of whole body, as if swimming or flying in air.
Fainting, after great exertions.
‖Epileptic attacks since 10 years, begin with a pain in l. arm, appear only at daytime.
‖Epileptic attacks, commence with a pain in heart or a constriction; without any organic disease of heart.
‖Epileptic attacks, most at night, appeared first after total abstinence, in a drunkard, commenced with strong palpitation, rush of blood to head, loss of speech and consciousness; every fourth beat of pulse omits regularly.
‖Epileptic attacks appeared earlier, more violent and at shorter intervals, and then ceased on lying down.
‖Strength pretty well gone. θAlbuminuria.
‖‖Epilepsies proceeding from valvular diseases of heart.

[37] **Sleep.** Drowsy and weary, with a sensation of fulness under short ribs.
Desire to sleep in middle of day, with heavy legs.
Sleep at night very restless, disturbed by headache and palpitation; he turns from one side to another.
Rolls about all night, sleeps and wakes, with asthma.
After 3 A.M., sleepless, restless and perspiring; followed next morning by a running coryza and frequent sneezing.
For weeks nearly without sleep; he could not bear to lie down.
Every night an attack of difficult breathing; each night later.
Dreams of people he had not seen for twenty years and had not in his mind the day before; often repeated.
Throbbing in head and back drives him out of bed for two nights.

[38] **Time.** Evening: delirium; headache < after supper; no appetite after fever; until midnight itching at anus.

Google

Morning: headache; headache wakens him 4 A.M.; sneezing, fluent coryza; catarrh in head and choanæ; 3 A.M., wakefulness, restlessness, sweat, catarrh; pain in shoulder and arm in bed; restless, difficult breathing.

Noon: headache towards evening; chill, < towards evening and after supper.

1 P.M.: weary and drowsy; fulness below short ribs.

Afternoon: thirst; fever and distended abdomen.

Midnight: diarrhœa; asthma, after, later each night; throbbing in back.

All day: breathing not free.

[39] **Temperature and Weather.** Winter: chill after getting cold out-doors.

Out of doors: headache.

[40] **Fever.** Chilly crawl over back towards arm and chest; it originates always inwardly with a sensation as if skin and adjoining parts were hot.

Chill with headache from getting cold. See 30.

‖She feels a shuddering or shivering running over back; sometimes has gooseflesh, especially at night, and is sleepless. θAlbuminuria.

Fever in afternoon, with sensation as if abdomen was puffed up; much thirst for cold water and afterwards loss of appetite in evening.

Heat in chest, with palpitation. See 29.

Night sweat after 3 A.M. See 37.

[41] **Attacks, Periodicity.** Every hour: must pass urine.

Commencing slightly, increasing to violent splitting headache.

Weekly: headache; toothache.

[42] **Locality and Direction.** Left side is generally most affected.

From r. to l.: stitches in forehead; cutting jerks in abdomen.

First l. then r.: burning in head; drawing in upper arms.

From front to back: headache.

Right: pain over eye; burning between ear and forehead; boring jerking front of ear; stitches in forehead; arm and shoulder, lame pain.

Left: above ear, headache; stitches in side of head; digging, pressing beating through half of head; violent pain in chest before epilepsy; shoulder and arm, lame pain; hand and knee pain; neuralgia.

[43] **Sensations.** As if flying or swimming in air; as if feet did not touch ground; as if a scab was in upper part of throat; as if stomach was expanded; as if diarrhœa would appear; as if a hernia would be forced out in groins and loins; as if one was drawing on a thread in

Digitized by Google

larynx, from front backward; as if beaten in l. shoulder and arm; as if skin and adjoining parts of back were hot.
Boring jerking: over r. ear and in occiput.
Boring shooting: in occiput.
Jerking shooting: over l. side of breast bone.
Jerking: from head to jaw.
Tearing: in upper and lower jaw; in head; in legs.
Digging: through l. half of head; in pit of stomach.
Cutting: across abdomen.
Stitches: in l. side of head; across forehead; in r. forehead; in pit of stomach.
Shooting: across abdomen; in small of back; in occiput.
Colicky pain: around navel.
Splitting: in head.
Dull pressing stitches: below stomach.
Neuralgia: in l. knee.
Drawing: of arms.
Soreness: of heart.
Burning: between ear and r. forehead; in head, first l. then r.; on tip of tongue; in œsophagus; in pharynx; in stomach; in cancer of pancreas; with passage; with scanty urine; in chest.
Bruised: in chest.
Pressing: through l. half of head; in throat; in clavicular region; on chest.
Bearing down: with prolapsus and during pregnancy.
Undefined pain: over r. eye; in r. eye; over l. eye; in groins or spermatic cords; in l. chest before epilepsy; in region of heart; in heart; near nape of neck; l. hand and arm.
Stupefying: different parts of head; behind ears.
Beating: through l. half of head; in head; in back.
Throbbing: in head and back.
Pressing heaviness: on top of head, then in occiput.
Heaviness: of head: feet.
Fulness: below short ribs; in chest.
Scratching: in throat.
Roughness: in throat.
Weariness: in lower limbs.
Constriction: of head; of heart.
Tickling: in back of throat.
Stiffness: of neck.
Benumbing: headache above and behind ears.
Lameness: in whole body; of l. arm.
Itching: on upper lip; at anus.
Heat: in face; in stomach; in chest; in hands.
Shuddering: in back; to feet and arms.

Digitized by Google

Chilly crawl: over back towards arms and chest.
Dryness: in pit of throat.

[46] **Tissues.** Emboli in albuminuria.
Obesity; fatty degeneration.
Heart and kidney diseases.

[47] **Stages of Life, Constitution.** Infantile diarrhœa.
Scrofulous, tuberculous diseases with albuminuria.
Complaints of drunkards after abstaining.
Complaints of fat women when approaching the climaxis.
In lymphatic, scrofulous and tuberculous persons after *Conium*.

[48] **Relations.** Antidotes: *Carb. veg.* (palpitation), *Glonoin* (headache), *Pulsat.* (headache, tearing pains in face).
Compatible: *Conium, Glonoin, Opium, Pulsat.*
Compare: in mental symptoms, palpitation, *Lith. carb.;* in headache, *Glonoin, Pulsat, Sepia, Sulphur;* in bad effects from drinking, *Arsen.;* in desire for wine and alcoholic drinks, *Nux vom.;* in gastric ulcer, *Arsen., Kali jod., Phosphor.;* in asthma, *Arsen., Ipec.;* in heart, beat intermittent, constriction, palpitation, spasms, *Arsen., Carb. veg., Digit., Glonoin, Lith. carb.*

CALCAREA FLUORICA.

Calcium fluoride. *The bone salt.*

Proved by J. B. Bell on himself and others; N. E. M. G., 1874, p. 300.

The provings of J. B. Bell, including those of J. U. W. and J. S. H. (made and led by a master observer), are confirmed:

"1. By internal evidence; the symptoms were mostly new to the provers and arose without any apparent cause.

2. By repetition of the same symptoms in the same provers.

3. By striking likeness of some of those symptoms to the symptoms of *Calcarea ostrearum*, particularly those of the mind and larynx.

4. By equally marked similarity of symptoms to those of *Fluoric acid* (vivid dreams of new scenes, death of relatives, and of the cadaver).

Thus also incidentally and inferentially the provings of *Calc. ostr.* and *Fluor. ac.* are confirmed; and all by the 15th potency of an inert substance.—J. B. Bell."

The same could be shown throughout the whole of our Mat. Med.—C. Hg.

All contained in Shuessler's latest edition is added. The cures are principally from Schuessler and his followers.

[1] **Mind.** All day an unusual tendency to look on the dark side of things; with much depression of spirits.

Digitized by Google

Depression of spirits and disposition to set a higher value on money than natural to him (avarice?).

Feeling of anxiety about money matters; thought he would come to want or would soon be "running astern" financially (entirely without occasion).

Indecision.

[3] **Inner Head.** Dull headache over whole head, with a faintish nausea at stomach, all afternoon, > in evenings.

[4] **Outer Head.** ‖On l. side of head (corresponding to os temporale) a flat swelling about a quarter of an inch high and one and a half inches in diameter; skin of unaltered color; no pain in it; by gently pressing, a fluid could be felt; pressing hard, a rough, jagged, hard mass, growing on bone.

‖Enlargement or swelling on parietal bones of newborn children, with an apparent osseous wall.

‖‖Cephalæmatoma.

[5] **Sight and Eyes.** ‖Flickering and sparks before eyes, mostly left.

After writing some time was no longer able to see distinctly, because of a blur or mist before eyes, with some aching in eyeball; > when closing eyes and pressing tightly upon them.

‖Spots on cornea; opacities.

‖Conjunctivitis.

[6] **Hearing and Ears.** ‖Calcareous deposits on the tympani.

[7] **Smell and Nose.** Blowing of much mucus from nose, with ineffectual desire to sneeze.

‖Ozæna.

‖Copious, offensive, thick, greenish-yellow nasal catarrh.

θOsseous growths.

[9] **Lower Face.** ‖A hard swelling on jaw bone.

‖Swelling of size of a pigeon egg under lower jaw, very hard and jagged.

A "cold sore" commences at l. corner of mouth; after two days it is quite extensive, but no cold with it; never had a cold sore before.

‖Cold sores rather small; hard herpetic sores on lips, from colds, not diffused like *Natr. mur.*

[10] **Teeth and Gums.** ‖Deficient enamel of teeth.

[13] **Throat.** Desire to swallow from a tickling in larynx as from a small foreign body, but without relief.

Hawking of mucus. See 16.

Prickling, burning, suffocative sensation in throat; < at night and from cold drinks, > from warm drinks.

[15] **Eating and Drinking.** Soon after dinner hacking cough.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hawking

Digitized by Google

of mucus in morning caused an attack of hiccough, which was long and weakening, and recurred frequently during day.

Faintish nausea at stomach, with headache. See 3.

[18] **Hypochondria.** About midnight, or soon after, was awakened by a sharp lancinating pain in r. hypochondrium under eleventh rib, occurring in paroxysms; < when lying on painful side; so much so as to cause a feeling of bursting outward; > when lying on painless side and when doubling up; accompanied by restlessness.

At 8 A.M., frequent attacks of lancinating pains in hepatic region; < when sitting, > when walking about.

[19] **Abdomen.** For some days much wind in lower part of abdomen; < when riding and towards evening; > after lying down at night.

[20] **Stool and Rectum.** Slight diarrhœa, with painful urging before stool; first part of stool natural, last part loose.

Constipation with dizziness and dull headache.

During night awakened by itching at anus from pin worms, not felt to that degree since childhood and rarely felt at all.

‖Bleeding piles. θOsseous tumors.

[21] **Urinary Organs.** Profuse emission of pale watery urine, from 8 A.M. to 3 P.M.

Arose twice during night to pass urine profusely, which he never did before.

Increased secretion of pale urine; 3d day.

Urine scanty, high colored and turbid; 5th day.

Urine emits a pungent odor.

Urine causes smarting along urethra, particularly at its external orifice.

[22] **Male Sexual Organs.** ‖Induration of testicles.

[24] **Pregnancy. Parturition. Lactation.** ‖Hard knots in breasts.

[25] **Voice and Larynx. Trachea and Bronchia.** Some tickling in larynx and occasional hawking, with desire to clear larynx.

Occasional attacks of tickling-itching in larynx, inducing a hacking cough; < from 3 to 4 P.M.

Slight feeling of oppression, with tickling in larynx.

Soon after itching at anus, itching-tickling in larynx, forcing a spasmodic cough, which was relieved after a few hours by hawking a little mucus from larynx.

Dryness in larynx.

The tickling extends from larynx 3 inches down trachea.

Towards night, dryness in larynx, with desire to clear it, and some hoarseness, but no cough.

Digitized by Google

Hoarseness after laughing or reading aloud.

[26] **Respiration.** Oppression of breath, as from taking cold.
Difficulty of breathing; as if epiglottis was nearly closed.

[27] **Cough.** Hacking cough. See 25.
Soon after dinner a hacking cough occurring in one or two paroxysms at a time, caused by a tickling in larynx, as from a small foreign body; not relieved by coughing.
Spasmodic cough from itching in larynx. See 25.

[30] **Outer Chest.** ‖Osseous growth at angle of eighth r. rib, size of a man's fist. θExostosis.

[31] **Neck and Back.** ‖Small goitres improved.
‖Indurated cervical glands of stony hardness.
Tired aching of small of back, as after long ride, but did not ride far; can sit in no position to relieve back.
During afternoon much pain and tired aching in lower part of back with bodily restlessness; must walk about.
‖Lumbago, from strains; pains < after rest, > after moving a little, and from warmth (when *Rhus tox.* did no good).

[32] **Upper Limbs.** ‖Osseous tumor on spine of scapula.
‖Swelling of elbow joint; after maltreatment improved by *Ferr. phosph.*, until jerks and starting led to an examination of joint and discovery of crepitation, showing a want of synovial fluid; one grain each morning and evening improved it so much that the opening closed and some motion became possible.
‖The left thumb, after being wounded and badly treated, had fistulous ulcers and a crepitation of joint of first phalanx; after *Silic.* had been given.
‖Exostoses on fingers. See 47.

[33] **Lower Limbs.** ‖Swelling on lower limb of a young lady (formerly treated for periostitis of humerus); a rough, hard, bony swelling, covering whole width of shin bone, several inches long, had lasted 6 weeks; 3d cured in 3 weeks.
‖Spavin of horses.
‖Patellæ surrounded by supernumerary bones, irregular in shape, varying from size of millet-seeds to marbles; also abounding at various depths in tendons under knees and in tarsal and carpal articulations. θOsseous growths.

[35] **Rest. Position. Motion.** After rest: lumbago worse.
Sitting: < pain in hepatic region.
Can sit in no position to > back.
Lying: on painful side < pain in hepatic region; on painless side > pain in hepatic region; > wind in abdomen.
Doubling up: > pain in hepatic region.

Digitized by Google

Motion: pain in back better.
Writing: eyes blurred and misty after.
Walking about: > pain in hepatic region and back.
Riding: < wind in lower abdomen.

[36] **Nerves.** Restlessness, with pain in liver; tired backache.
Feeling of fatigue all day.

[37] **Sleep.** Sleep unrefreshing on account of indistinct dreams of unsuccessful efforts to do various things, leaving an unpleasant impression on waking.
Dreams in siesta, vivid and distinct, of new scenes, places, books, etc.
Vivid and distinct dreams of wholly new scenes and places, not unpleasant, but with a sense of impending danger.
Vivid and distinct dreams, also natural and connected; of death of a relative, causing much grief and weeping.
Vivid dreams and dreams with weeping about such as had died seven years before.
Dreamed of cutting up a woman in pieces as an animal for salting; the details very distinct and the dream seemed to continue a long time.
Last night jumped from bed in a dream and tried to get out at window, which woke him.
During night awakened by itching in anus from pin worms.

[38] **Time.** All day: depressed spirits.
3 to 4 P.M.: larynx tickling-itching; cough.
Afternoon: headache with nausea; backache.
Towards night: larynx, dryness and hoarseness.
Evening: dull headache, with faintish nausea, better.
At night: throat feels <; itching at anus; rises to pass urine; jumps from bed.
Midnight: sharp pain, r. hypochondrium; itching of anus.
8 A.M.: pains in hepatic region; profuse emission of urine.
8 A.M to 3 P.M.: profuse emission of urine.

[39] **Temperature and Weather.** Warmth: lumbago > from; warm drink, > throat.
Cold drinks: throat < from.
Worse in damp weather, but > by fomentation. θOsseous growth.

[40] **Fever.** Attacks of fever, lasting a week or more, with thirst; dry, brown tongue; sleepless unrest. θOsseous growths.

[41] **Attacks, Periodicity.** Attacks of tickling-itching in larynx; hiccough < from 3 to 4 P.M., and all day.
Fever: lasting a week or more, with thirst, brown tongue, sleepless and weak.
Hiccough: from hawking mucus.
Lancinating pains: in hepatic region.

Digitized by Google

[42] **Locality and Direction.** Right: sharp pain in hypochondrium; osseous growth at angle of eighth rib.
Left: swelling on side of head; cold sore on corner of mouth; thumb, fistulous ulcers.

[43] **Sensations.** ‖Piercing, darting, grinding pains in all joints; crampy knotting of leg muscles. #Osseous growth.
Lancinating: in hepatic region.
Burning: in throat.
Prickling: in throat.
Smarting: along urethra.
Dull pain: in head.
Aching: in eyeball.
Tired aching: small of back.
Bursting outward: in hepatic region.
Suffocative: in throat.
Oppression: of breath.
Tickling: in larynx; in trachea.
Itching: at anus; in larynx.
Dryness: in larynx.

[44] **Tissues.** Corresponds to solidified infiltrations.
‖Indurated enlargements in fascia and capsular ligaments of joints.
‖Exudation from surface of bones which quickly harden and assume a nodular or jagged form.
‖Nodes and hard bone swellings.
‖Suppuration of bones; similar to *Silic.* and *Calc. phosph.*
‖Osseous growths in tarsal and carpal articulations.
Supernumerary bones (rice bodies?).
‖Indurated glands, of stony hardness.

[45] **Touch. Passive Motion. Injuries.** Better from slight pressure: eyes.
‖Following an injury: osseous growth.
‖Relieved by rubbing: osseous growth.

[46] **Skin.** ‖Occasional erysipelas. #Osseous growths.
‖A warty growth the size of a pea in bend of r. elbow, of 30 years' standing, disappeared while taking *Calc. fluor.*[12] for indurated testicle.

[47] **Stages of Life, Constitution.** J. B. B., æt. 29, sanguine mental bilious temperament, dark brown fine hair and beard, blue eyes; proved the 15th and 30th.
J. U. W., æt. 23, sanguine temperament, light hair, bald in front, blue eyes, reddish beard; proved 15th.
J. S. H., æt. 22, bilious sanguine temperament, black rather dark beard, dark hazel eyes; proved 15th.
‖A man, æt. 30, pale and lean. #Osseous tumor.
‖Strong healthy girl, æt. 3. #Cephalæmatoma. After *Calc. fluor.*[3] in a few weeks it had entirely disappeared.
‖A negro, æt. 28, after an injury received 12 years ago, a

Digitized by Google

bunch on angle of 8th r. rib, increasing rapidly, within 3 months as large as a man's fist. *Calc. fluor.*[12] every 12 hours for 3 days, then omitting 3 days; in 2 weeks diminished two-thirds; 3 months afterwards an inconsiderable roughness only left. θExostosis.

▮A man, æt. 50, blonde, lymphatic; for 10 years rheumatic arthritis; articular exostoses on fingers, feet and knees; after partial relief by *Bryon.* and *Calc. ostr.*, *Calc. fluor.*[12], the supernumerary bones disappeared. θOsseous growths.

[48] **Relations.** Compatibles: *Calc. phosph.*; *Natr. mur.*, which has similar cold sores; *Silica*, in affection of thumb, 32.

Useful: after failure of *Rhus tox.* in lumbago; after *Ferr. phosph.* in synovitis; after *Silica* in suppuration; after *Bryon.* and *Calc. ostr.* in arthritis.

Compare: in ozæna, *Calc. phosph.*; in cold sores, *Natr. mur.*; in swelling on skulls of infants, *Silica*; in suppuration of bones, *Calc. phosph.*, *Silica*; in spavin of horses, *Phosph. ac.*, *Silica*.

CALCAREA OSTREARUM (Carbonica).

Trituration of the middle layer of oyster-shells.

Hahnemann proved first the *Calc. acetica*, and his provings were printed in his Materia Medica; but after he had commenced to triturate insoluble substances with milk-sugar, he preferred to use in the preparation of *Calcarea* the whitest pieces from the middle of large broken oyster-shells. This had been a favorite medicine with him for sick children, in former times, when the chemists considered it a pure carbonate of lime.

When his grand master-proving was published, he added the symptoms of the acetate, because very similar, but distinguished them by a line ——.

Accurate analysis has shown that some portion of the phosphate is contained even in the whitest pieces taken from the oyster-shells; and the long-lasting famous lawsuit of the East-India Company about the James powders has shown that there is an essential difference in the effect on sick persons between chemical preparations apparently alike, if the same substance has been taken from the mineral or animal kingdom. Hence it has been preferred to name it as above.

[1] **Mind.** ▮Enfeebled memory. θEpilepsy.

▮Forgetfulness; vanishing of thoughts.

▮Misplaces words, tendency to express himself wrongly.

▮When roused opens eyes with absence of mind and alarm, murmuring, frightened. θIntermittent.

Digitized by Google

Buried in deep thought; anxiety about present and future.
Rush of thoughts prevents sleep.
Cannot get rid of one and the same thought at night, even during light slumbers. θTyphoid.
Mind full of concern about imaginary things that might happen to her. θChlorosis.
Mind is confused, so that what is read or heard is not understood or comprehended.
Intellect dull; unable to progress in her studies. θEpilepsy.
Thinking is difficult.
Absent-minded, after nausea in afternoon.
Stupid, peevish, in the intervals. θEpilepsy.
Appears to be lapsing into complete imbecility. θEpilepsy.
Imagines some one is walking beside her; that something hanging over back of chair is a person sitting there, etc.
Feels as if she would lose her senses. θMegrim.
Visions of faces and persons, when eyes are closed. θTyphus.
Mental aberration with horrid visions before eyes and cardiac anxiety; he despairs of his salvation and wants to stab himself.
Delirium. θSecond week of typhus.
Sees and plays with cats and other animals in delirium. θNervous fever.
Mania-a-potu, with delirious talk about fire, rats, mice and murder.
Mania; sees many curs crowding around him, fights them off. θFrom chilling feet and legs in potter's clay.
Desire to go home. θInsanity.
Desire for company.
Steady inclination to work, with mental anxiety.
Inclination to weep, with mental depression; weeps when admonished.
Feels as if she would like to run up and down and scream.
She thinks and talks of nothing but murder, fire, rats, etc.
Violent screaming spell every day at 5 P.M., so hard as to cause a scrotal hernia; infant, æt. 5 weeks.
Changeable mood; easily laughing or crying. θNeurosis cordis.
Disinclined to talk, and very irritable.
Taciturn, with a dry tongue.
Disinclination for every kind of work. θCoryza. θAddison's disease.
Does not care to get well, or to do anything to assist recovery.

Digitized by Google

Weeping mood. θMuscular atrophy.
Weeping and anxious.
Whimpering. θCatarrh.
Low-spirited and melancholy, with weeping and despair of life.
Low-spirited and depressed. θDiarrhœa. θMuscular atrophy. θPhthisis pulmonalis. θChorea.
Despondent and melancholy, in highest degree, with a kind of anguish.
Children sad and unhappy.
Weary of life. θCatarrh.
Hopelessness; despair.
Hypochondriacal mood. θCoryza.
Restless anxiety.
Anxious and irritable by spells.
Anxiety: with nausea; during sweat; during typhus.
Anxious about getting well, during the intervals. θEpilepsy.
Apprehension about present and future.
Apprehensive mood: as if some misfortune was about to happen; about his health; that he might have an organic disease of the heart.
Fear, that something sad or terrible will happen.
Fears she will lose her reason, or that people will observe her confusion of mind.
Fear: of death; of consumption; of misfortune; of being alone.
Child is afraid of everything it sees. θInflammation of brain.
Concern about spiritual welfare.
Feels awe-stricken at night. θDiarrhœa.
Anxiety, shuddering and dread as soon as evening comes on, with fear of death; torments those around him day and night.
Great anxiety: with spasm in rectum; with dull shocks from posterior wall of chest up to between shoulders.
Great anxiety and oppression. θScarlatina.
Great anxiety, restlessness and palpitation.
Anguish, with palpitation of heart.
Fear excited by reports of cruelties.
Great anxiety, in evening, for which no reason could be assigned. θUterine tumor.
Easily startled.
Despairing; hopeless of ever getting well; with fear of death, tormenting all around day and night.
Indifference; does not care to get well; reticence and inertness.
Apathy and depression of mind. θAddison's disease.

Digitized by Google

Quiet, mild disposition. θStrabismus.
Active, full of fun. θBoy with chronic diarrhœa.
Excessive mischievousness, with obstinacy.
Voluptuous, lascivious fancies.
Ill-humored, with white blood-streaked stool.
Dissatisfied and easily angered.
Aversion to everything as soon as he sits idle.
Obstinacy and irritability.
Children self-willed, inclined to grow fat.
Hateful, vindictive.
Irritable without cause; cries about trifles; borrows trouble.
Irritable mood. θLeucorrhœa.
Child cross, fretful and restless. θScarlatina.
Children very fretful and stubborn. θRachitis.
Irritability, with pressing frontal headache.
Peevish without cause.
Peevishness, much nervous excitement and irritability.
Very peevish and easily vexed. θChorea.
Easily offended; takes everything amiss.
Violence and anger.
Restless mood, with gloominess and anxiety.
Child restless and cross during day. θKeratitis.
Easily frightened; tendency to start.
Mental occupation > headache; better from engaging his attention. θChorea.
Nervousness < by mental exertion, > from closing eyes.
After exerting mind: hyperæmia of head; chorea; trembling spells.
Aggravation from mental emotions. θNeuralgia cordis.
Headaches of school-children.
The slight effort of talking gave him sensation as if brain would be paralyzed, mostly in occiput.
From thinking: drawing pain in r. side of forehead.
Affections from egotism.
Excitement brings on dysmennorrhœa; least excitement endangers return of catamenia, or causes metrorrhagia.
Great anxiety and worriment of mind. θAt onset of typhoid.
Mental anxiety, producing palpitation, sweat, nausea and tremor.
Excited by chagrin or fear. θEpilepsy.
Vexation causes vertigo.
Fright followed by trembling motions of upper and lower limbs in repeated paroxysms. θChorea.

[3] **Sensorium.** Want of memory and confusion in head, with benumbing pressing pain in forehead.
Sensation as if he would drop unconscious.

Digitized by Google

Feels as if she would fall when walking.
Surging humming in head, with dulness.
Feeling of emptiness in head.
Dulness of head: as if too full; with buzzing in head; with sensation of a board before head; with stinging in neck; from pressure in lower part of abdomen; with vertigo, backache and chilliness.
Constant fulness in head.
Dulness of head, particularly in morning. θChronic coryza.
Rush of blood to head: with heat, redness and puffiness of face; < from alcoholic drink; < in morning when awaking; < after mental exertion.
Heaviness in forehead; < when reading or writing.
Heaviness and stupefaction, with nervous erethism, remaining for a few days. θMegrim.
Dizziness and trembling in morning until he has his breakfast.
Dizzy: after scratching head; after attack of epilepsy.
Dizziness on going up-stairs. θTuberculosis. θHemorrhoids.
Reeling vertigo, with nausea and vomiting.
Giddiness when walking or hurried, or after arriving at top of stairs; inclined to fall to left. θSore throat.
Vertigo: in morning, in bed; when rising or shortly after; < stooping, with darkness before eyes; after walking; when standing and looking about; as if things were turning with her; < looking upward; on going up-stairs, especially when running; when turning head quickly; in morning, with nausea and vomiting.
Vertigo: when climbing into high places; on going up-stairs, or up a hill; on suddenly raising or turning head, even when at rest; on walking in open air, as if he would tumble, especially on suddenly turning head; with stupefaction and a sensation of falling (neurosis cordis); with inclination to fall backward or sideways; with headache; nausea and vomiting, incarcerated flatulence; accompanied by nausea and a feeling as though one would fall unconscious; with unsteadiness in thighs when walking rapidly; in Addison's disease; during intervals of epileptic spasms.

[3] **Inner Head.** Pressure in forehead, with nausea and belching.
Headache centres with such violence on top of head that she thinks brain is dissolving and she will go crazy. θMegrim.
Severe, particularly frontal, headache; < in forenoon and from mental exertion; pallor; indigestion; lassitude,

Digitized by Google

principally in morning. #Chronic headache after suppression of itch.

Stupefying pressing ache in forehead, during rest and motion. #Chronic coryza.

Stupefying pressive pain in forehead, with confusion of senses and dulness of whole head, while reading; he was obliged to stop and did not know where he was.

Heavy pressing frontal headache, with belching and nausea; must close eyes; < from mental exertion, stooping and walking in open air; from rising up, in warmth and lying on back.

Pressing as if forehead would burst. #Catarrh in sinus frontalis.

Pressive drawing headache through day, concentrates about r. eye in evening.

Heaviness in forehead; < by reading and writing.

Boring in forehead and l. temple, in or out morning and evening; < in open air, from pressure and stooping; > from touch.

Cutting pain in forehead.

Painful pressure in forehead, extending down into nose.

Pressive pain in forepart of head above root of nose, in morning. #Coryza.

Tearing headache above eyes down to nose, with nausea.

Spasmodic pain, drawing from forehead to vertex, after taking cold.

In temples: pressure outward and inward; drawing pain; throbbing; burning; violent jerks.

Shooting from l. temple to r.; < from stooping; > from pressure.

Shooting pains in both sides of head, with nausea.

Stitches in temples, with heat in ears.

Stitching headache over l. temple.

Hemicrania l. side; stitches in temple and downward into teeth; < on awaking, from motion, noise and talking; > in evening. #Chlorosis.

Pricking in l. side of head, with vertigo.

Tensive headache, mostly in r. side of head and temple.

Headache from r. temple to vertex; drawing in root of nose and closing eyes.

Frequent one-sided headache, always with much empty eructation or inclination to vomit.

Headache. #Addison's disease.

Sick headache on l. side, with scanty menses; on r. side with profuse menses.

Throbbing headache: in middle of brain every morning, continuing all day; through forehead and base of brain.

Digitized by Google

Hammering in head.
Headache; pain being seated in crown of head. #Reconvalescence from yellow fever.
Violent pressive pain in vertex.
Weight on top of head.
Pressure in vertex and forehead, with irresistible sleepiness after dinner, and cold feet.
Violent throbbing on vertex; has to lie perfectly quiet.
A surging humming in top of head.
He is roused from sleep every morning at 5 o'clock by a violent aching pain in vertex, which goes off after one hour.
Burning sensation on vertex.
Cutting in vertex and occiput, with distended veins on temples; sore scalp.
Cutting thrusts from within out, with throbbing in vertex.
Headache extending from back to crown of head. #Reconvalescence from yellow fever.
Headache begins in occiput and spreads to top of head, so severe that she thinks head will burst, and that she will go crazy. #Megrim.
Pulsation in occiput.
Dull tearing pain through brain.
Brain as if squeezed and relaxed alternately.
Pressing pain from within outward, occupying only a part of head at a time.
Stupefying headache: from 3 A.M. till afternoon; < on rising, stooping, or exerting mind; > closing eyes.
Fulness and heaviness in head. #Megrim. #Congestion. #Hemorrhoids.
Tightness of r. side of temple.
Throbbing and hammering of head, in morning; < from stooping, mental exertion, spirituous liquors, and after walking in open air; > from closing eyes and lying down.
Concussive throbs in head, abdomen and chest.
Concussive, stitching, pulsating pains in head, as if it would split, with cough. #Bronchial catarrh.
Stitches in head.
Empty feeling in head, with shooting pains.
Pressing pain, with sensation of fulness, heaviness and pulsation, in head. #Hereditary headache.
Pains half-sided, tearing, shooting, throbbing. #Rheumatic headache with children.
Wandering pains in head.
Strange feeling of icy coldness in some parts of head or in whole head. #Megrim.

Glittering or bright luminous appearance before eyes, with severe vertigo.

Sees a bright star to r. side, which she is constantly induced to follow with her eyes, which, however, recedes as fast as she turns her eyes. θChorea.

Optical illusions in dark colors; she saw black spots during physical exertion.

Mist before eyes when looking keenly at anything or when reading. θPregnancy.

Blackness before eyes, with nausea at pit of stomach, in morning before meal.

Dim vision after fine work; objects run together; desire to close eyes.

Dimness of vision: with feathery appearance before eyes; as if looking through gauze; after getting head cold; after meals.

Dimsightedness. θMuscular atrophy. θNervous headache. θUterine ailments. θPulmonary derangements. θAddison's disease. θAfter suppression of acute cutaneous diseases. θChorea.

She sees only half of object to r. of that particularly looked at, though it would naturally fall within field of vision. θChorea.

Cataract.

Like a shadow before eyes, obscuring one side of object; pupils much dilated.

Sudden blindness after dinner; anxious sweat, nausea, and an appearance of bright shiny light before eyes.

Horrid visions when eyes are closed. θTyphus.

Asthenopia in pale flabby subjects inclined to grow fat; < in damp weather, from warmth, and after using eyes.

Veils, feathers, shadows or black spots appear before eyes, making vision indistinct; it is also indistinct from straining of body or mind, from reading, and after dinner.

At 3 to 4 inches distance objects appear blended or flowing into one another. θStrabismus.

Short-sighted, to read, nose has to touch paper. θStrabismus.

Severe pain over whole head after straining or overexerting eyes. θStrabismus.

Slightest attempt to use eyes causes frightful pain in them.

While reading: pressive, stupefying pain in forehead; darkening of eyes; must wink; tension in ocular muscles; by candlelight, burning and cutting in eyes and lids; stitching in eyes with flow of tears in sun.

Digitized by Google

Worse from reading, writing or looking up. θNervous sensations in head.
On looking around, vertigo.
Closing eyes: > headache; horrid visions appear; feels need of closing eyes.
Pressure, itching, coldness or burning and stinging in eyes.
Tearing in eyes and on head.
Dilated pupils; often indicated after *Sulphur*.
Pupils sometimes dilated and sometimes contracted.
Redness of eyes.
Oozing of blood from eyes.
Fungus hæmatodes with opacity of cornea.
Fungus medullaris.
Excrescence on inner corner of eye; eye inflamed.
Pterygium proceeding from external canthus towards cornea.
Corneal affections of children.
Bluish cornea or bluish spots on it. θHorses.
Dimness of cornea; opacity; maculæ.
Pustules on cornea, with a tendency to spread and ulcerate; a white centre with red margin. θOphthalmia scrofulosa.
A pustule above centre of cornea with bloodvessels running to it from above.
Pustules on cornea, much lachrymation and excessive photophobia; < by gaslight, or in morning, and in changes of weather.
Vascular ulcer on cornea.
Ulceration of cornea in child with light hair, blue eyes and distended abdomen. (Resulting cicatrix, *Graphit.*) θOphthalmia scrofulosa.
Corneitis and conjunctivitis.
Ophthalmia: from taking cold; entrance of foreign body; in the newborn; scrofulous; arthritic.
Traumatic iritis.
Retinitis.
Foreign bodies in eye.
Inflammation of eyes, with vesicles containing a clear fluid.
Ophthalmia scrofulosa: lids closed, red, swollen, painful, itching, glued together in morning; conjunctiva inflamed and red; vesicles filled with pus on cornea; acrid flow of tears; great photophobia; stitching pain in eyes.
Conjunctivitis trachomatosa with pannus; from working in the wet.
Sore eyes and rough cough; sheep.

Digitized by Google

Sensation in eyes as if she should press them in.
Stitching pains through eyeballs at external canthus. θKeratitis.
Stinging pain in eyes. θOphthalmia scrofulosa.
Stinging, tearing, burning, pressing, itching in eyes.
Dreams of violent stitches in eye.
Inflammation of eyes, with stitches as of needles, burning, flow of tears, and difficulty in opening, at night.
Smarting, burning and cutting in eyes and lids, especially when reading by candlelight.
Pain in eyeball < in evening and by gaslight. θKeratitis.
Extending to eyes: pressure in vertex; stitching headache on r. side; to r. eye, pressing pain in forehead; to eye and ear, boring and stitching toothache.
Stitching in head, out at eyes.
Tearing pain in bones of orbit.
Feels as if she squinted. θNervous sensation in head.
Strabismus; after cutting eye-teeth.
Left eye turns in. θStrabismus.
On turning eyes tension in ocular muscles.
Sensation as if eye moved involuntarily.
A slight dull or blurred appearance of eye. θStrabismus.
Anxious look of eyes. θChronic diarrhœa.
Lachrymation of reddened eyes; he can scarcely open them.
Much lachrymation and photophobia. θKeratitis.
Lachrymation: in open air, or in morning; while writing; with considerable pain.
Fistula lachrymalis; thick yellow pus in canthus; itching, humid eruptions.
Excessive secretion of mucus in eyes.
Burning in canthi. θOphthalmia.
Stitches in inner canthi, with alternating stitches and throbbing in eyes, and after the pain disappeared, frequent blowing of nose.
Itching in canthi.
Severe pressure, day and night, as if a grain of sand was under upper lid.
Swelling and redness of lids, with nightly agglutination; during day they are full of gum, with a hot sensation and smarting pain and lachrymation.
Lids closed, red, swollen, with painful itching in them, agglutination mornings. θKeratitis.
Lids feel sticky when moving them.
Agglutination and suppuration of lids.
Eyes full of gum in daytime.
Lids are agglutinated with gum in morning; eyes look watery, and pain if she looks at light.

Digitized by Google

Eyelids inverted and swollen; they looked like raw beef; were stuck together with yellow gum. θTinea.
Entropium.
If closed lids are opened by force, a stream of acrid, hot tears gushes out.
Twitching in upper lids, with a sensation as if eye was moving of itself.
A painful sensation as if a small foreign body was in eyes.
Quivering in upper eyelid.
Nictitation in upper and lower lid.
Clonic spasms of eyelids.
Spasmodic closure of lids and photophobia. θOphthalmia scrofulosa.
Itching margins of lids.
Heat and heaviness in upper lids.
Burning and cutting in eyelids.
Lids hard and swollen; throbbing pains.
Blepharophthalmia, which destroyed eyelashes and partly lids.
Dry scurf on cilia during day; lids agglutinated in morning.
Indurations after styes.
Sensation of swelling below eye.
Fine crawling under eye.
Encysted swelling over l. eye, congenital.
Dermoid swelling of eye.
Dark rings around eyes. θWorms.
Obstruction of lachrymal duct; fistula lachrymalis.

Hearing and Ears. Brain sensitive to loud or shrill sounds. θMegrim. θToothache.
Many perversions of hearing; noises; deafness, with feeling as if something lay in front of the membrana tympani; noise or sputtering in ear when using a handkerchief or swallowing.
Ringing in ears.
Cracking in ears when chewing or swallowing.
Roaring in ears; with nausea; with inclination to fall.
Ringing, buzzing, singing and hissing or thundering in ears.
Hardness of hearing, especially after suppression of intermittent by quinine; also from eustachian catarrh.
Deafness. θOphthalmia scrofulosa. θEpilepsy. θIntermittent fever. θOtorrhœa.
Diminished sense of hearing, with stinging and ringing in ear, alternating with musical sounds; of twenty-six years standing.
Deafness: right-sided; in the scrofulous; < in open air; > from sweating.

Digitized by Google

Deafness of l. ear, and on shaking head singing and roaring.
Heat within ears, like hot blood.
Throbbing in ears.
Tingling in ears.
Pain in internal ears, first r. then l.; < extreme heat or cold, blowing nose or coughing; internally tender. θAfter variola.
Pain in ear beating, with knocking, buzzing and roaring; detonations; meatus externus filled with whitish, pappy, fetid pus or viscid discharge; membrana tympani perforated. θScrofulous subjects.
Pain shoots into ear and head. θToothache.
Pulsation, stitching and heat in ears.
Right ear much swollen, with sudden jerking pain, causing whole body to start; same in eyelids and face.
Stitches in ears and eyes, from within outward.
Earache: < by blowing nose; with cough.
Dryness of ears, with deafness, or copious secretion of cerumen.
Inflammation and swelling of outer and inner ear.
A little water trickles from ear, with which he hears well; difficult to hear with other ear, which has normal wax.
Discharge from ear muco-purulent. θSuppuration of middle ear.
Otorrhœa muco-purulent, affecting principally r. ear; enlarged glands. θEczema. θScrofula. θGoitre.
Offensive discharge from ears. θPruritus vulvæ.
Chronic catarrh of middle ear. θAfter suppressed itch.
Ulceration, then granulation, then polypus; great stench.
Tickling at times in r. eustachian tube. θSore throat.
Stitches or pain in throat extending to ears.
Deafness from eustachian catarrh.
Swellings in ears.
Small ulcers at outer meatus.
Dampness, moist eruption, behind ears.
Eruption and itching of ears.
Retro-aural abscess after incision.
Parotitis, particularly on r. side.
Painful inflammatory swelling of parotids.
Swelling in front of l. ear, painful to touch, like a boil.
Parotitis in scarlatina; discharge ichorus, malignant.
Suppuration of parotid; neighboring glands indurated.
Corrosive nasal discharge and glandular swellings of ears.
Steatoma over r. parotid gland.
Fistulous ulcers towards neck discharging pus in front of ears.

Digitized by Google

Smell and Nose. Smell sensitive.

Impaired smell. θChronic coryza.

Very offensive smell in nose; stench as of manure, gunpowder or putrid eggs. θChronic coryza. θNasal catarrh.

Epistaxis frequent and profuse, almost to faintness.

Bleeding of nose in morning. θNasal catarrh.

Hemorrhage from nose; < from r. nostril. θTuberculosis.

Nosebleed in the scrofulous, subject to cold in head (morning).

Annoying dryness of nose. θNasal catarrh.

Dry nose at night; moist during day.

Mucous membrane of nose swollen. θChronic catarrh.

Loud breathing through nose. θTuberculosis.

Frequent sneezing without coryza, or with dry coryza.

Frequent sneezing from prickling or itching in nose. θCoryza.

Sneezing with a foul smell from throat. θBronchial catarrh.

After frequent vain attempts at sneezing, severe fluent coryza.

Drawing pain in occiput, disappears on sneezing.

Nose sometimes very dry and then again plugged with yellow, offensive pus.

Profuse fluent coryza.

Coryza with profuse secretion, clear like water, of a salty taste.

Colds come on suddenly with a discharge, dropping in spells like clear water from nose. θCoryza.

Discharge from nose ceases in morning and causes headache. θChronic catarrh. θOzæna.

Severe fluent coryza, followed by colic. θNasal catarrh. θIn children.

Coryza with oppression of chest. θBronchial catarrh.

Fluent coryza soon becomes purulent, whitish-yellow. θTuberculosis.

Constant catarrh in nose, with thick mucous discharge. θBronchial asthma.

Nasal discharge yellow and thick. θAfter variola.

Blowing thick slime from nose, mixed with blood. θChronic catarrh.

Purulent thick or yellow red discharge making lip sore; red, itching pustules on upper lip and cheeks; nose swollen externally and internally.

πPlugs of mucus in nose.

At first stoppage of nose, then fluent coryza, with cough.

Digitized by Google

Stoppage of nose. θOphthalmia scrofulosa.
Stoppage of nose, can hardly breathe, especially at night; on boring into nose with finger, sensation as if something was pushed up, and blood appears; nose externally swollen and sore.
Stoppage of nose, sneezing; < morning on awaking. θChronic colds.
Nose stopped up with yellow, foul smelling pus.
Stoppage of nose, with oppression and sense of anxiety in chest.
Purulent, sometimes bloody profuse discharge from nose. θChronic catarrh. θOzæna.
Acrid discharge from nose. θKeratitis.
Cold in head with sores inside nose. θPruritus vulvæ.
Sore, ulcerated nostrils.
Nostrils ulcerated and scabby; lips sore.
On nostrils ulcerated spots, covered with crusts and very sensitive to touch. θChronic catarrh.
Scurfs in nose.
Ulceration of inner nose, with at times yellow, and at times black crusts.
Foul stench from nose.
Ozæna after suppressed itch.
Nasal polypi, with loss of smell.
Great liability to catarrhs. θCoryza.
Discharge changeable in color and consistency, dropping from posterior nares.
Blowing nose yields thick slime, mixed with dark blood. θChronic coryza.
When blowing nose, darting to ear.
Effort of blowing nose caused sensation as if ear was closed.
Nose inflamed, red and swollen. θNasal catarrh.
Painful sensitiveness of nose, with coryza.
Stitches towards nasal bone.
A pain rises from nose up to forehead, as if a board was laid against it.
Fine crawling on side of nose.
Sensation of swelling around nose.
Sore, painful, swollen, and erysipelatous looking nose; it is quite hard to touch, and attended with much frontal headache.
On left ala nasi (externally) a red swollen spot tender to touch and on moving muscles of nose.
Cartilage at bridge of nose painful, especially on pressure.
Swelling of nose, especially at root, frequently appearing and disappearing; bluish-red; nasal passage stopped up.
Swelling of nose and upper lip, in children.

‖Pale earthy countenance. θKeratitis.
‖Face sallow. θBronchial asthma. θAddison's disease.
‖When emaciation occurs, face is pale or sallow.
‖Face waxy pale. θPalpitation.

Google

Pale, lean face with deep-set eyes, surrounded by dark rings. θWorms.
Paleness of face with frequent flushes. θTuberculosis.
Yellow color of face.
Face red. θHeadache. θTinea. θTyphus.
Flushed face, lying on l. side. θIntermittent.
Glowing redness of face, with a fine network of capillaries, like veined marble.
Coppery appearance of face.
Sweat on forehead. θOphthalmia scrofulosa.
Large drops of sweat in face, with fainting spell.
Face puffed up, in children.
Puffiness of face. θHyperæmia of head.
Swelling of cheeks after faceache.
πStriped swelling on cheeks, next to these light spaces.
Swelling of r. side of face and ear; covered with pimples.
πNodular swellings in face.
Baggy swellings in face, which are in constant state of inflammation and frequently suppurate; also polypi in ear.
Itching and eruption in face and in whiskers.
Red itching pustules on upper lip and cheeks. θChronic coryza.
Moist itching scurfy eruption on cheeks and forehead, with burning pain.
Eruptions of painful papules or an eczema.
Forehead and face were covered with yellow scabs, especially about mouth. θTinea.
Pityriasis in spots on face.
Light spaces in face, with dark surroundings.
Light brown spots or freckles on face.
"Seed wart" on l. cheek.
Tensive pain when chewing, with boil under ear-lobe.
Cracking in ear when chewing.

Lower Face. Crawling on lower part of face.
Drawing pain in jaw.
Lower jaw, gum and cheek swollen. θToothache.
Swelling of r. lower jaw bone.
Swelling of upper lip, in morning. θCatarrh. θScrofula. θKeratitis. θEpilepsy. θOphthalmia scrofulosa.
πLumps in upper lip.
Swelling of lower lip.
Ulcers inside of lower lip, which interfere with speaking; light yellow, surrounded by redness, painful on contact with tongue and every motion.
Scurfy pimples on border of red portion of lower lip.
Very small warts in bunches on lower lip; horses.
Lips dry. θChronic diarrhœa.

Digitized by Google

‖‖Lips chapped and cracked; corners of mouth ulcerated.

|Moderate toothache; with very severe swelling of cheek; with stitching.
‖Throbbing, boring and swelling of gums and cheeks.
|Tearing pains, extending up into head, as if roots were being torn out.
‖Pain in hollow teeth, especially around loose stumps.
|‖Gnawing toothache; < in evening.
‖Pain in upper and lower teeth, l. side, extends to maxillary bones.
|Toothache extending to ear.
|Pressure in head, spreads to teeth.
πToothache on r. side, which cannot be located in any special tooth; afterwards nausea and coldness in abdomen; patient never had toothache before.
|‖Immediately after menstruation, toothache, drawing and sticking, day and night; < if she inclined head to right, or to left, or backward.
‖Toothache during pregnancy, with determination of blood to head, from taking cold; worse at night; < from noise and warmth or cold.

Digitized by Google

Toothache, with inflammation of bones.
Teeth cannot endure air or any coldness.
Teeth are raised, and pain when biting on them.
Toothache: after drinking cold liquids, or excited by draught, or cold; drawing, shooting or boring; during and after menstruation; during pregnancy; worse from warm or cold drinks; from getting wet and working in damp places; < from noise and trying to use eyes.
Toothache in all teeth; < from entrance of cold air; wakes him at night.
Teeth are particularly sensitive to cold air.
Offensive smell from teeth.
Difficult dentition. θRachitis. θEclampsia. θCholera infantum. θHydrocephalus. θCrusta lactea. θInfantile catarrh. θLaryngo-tracheitis. θBronchitis. θBronchial catarrh. θMarasmus. θUrticaria. θChorea.
During teething sore mouth.
Pulsating in gums. (Compare *Pulsat.*)
Stitching in gums.
Gums painfully tender; swelling, bleeding, even at night.
Toothache, with red swollen and inflamed gums, followed by pain in jaw, went from upper to lower teeth and from r. to l.; > from external warmth.
Toothache and bleeding of gums, with foul odor from mouth.
Bleeding of gums after suppressed menses.
Gums eaten away; exposed bones become covered with callous membrane.
Fistula dentalis. (Compare *Flour. ac.*)
Epulis, soft and painless.

Taste and Tongue. Loss of taste; with impaired smell.
Food tastes "too fresh" or unsalted.
Taste: sour; salty; like ink; of iron; bitter, back in throat; metallic or leaden; foul; like dung, in mouth and pharynx; like smell of strong urine; pappy, in headache; acid, in gout; unpleasant, with cough.
Sour taste in mouth or of food.
Cold water is the only thing which has a good taste. θHereditary headache.
Speech is difficult and clumsy.
Tongue dry, does not like to talk. (Compare *Phosph. ac.* and *Bellad.*)
Dryness of tongue, at night, and morning on awaking.
Great dryness of mouth and tongue, with a sense of roughness.
Dryness, alternating with excess of saliva. θRanula.
Rough streaks in middle of a dry tongue. θTyphus.

Google

| Dry, slimy tongue, with dull pain in forehead.
| Rough bristling sensation, with great dryness of mouth and tongue.
| Pain on side and lower surface of tongue on spitting.
| Soreness of tongue, either on tip, sides, or dorsum; can scarcely talk or eat.
‖ Burning pain at tip of tongue, as from soreness; < from warm food or drink.
‖ Burning pain; burning vesicles, which become ulcers.
‖ Tongue pains as if ulcerated. θGlossalgia.
| Painful blisters on tongue and palate.
‖ Tongue clean, red, pointed. θIntermittent.
‖ Tongue red, raw. θGastromalacia.
| Cracked and fissured tongue.
‖ Glossitis after abuse of mercury.
‖ Tongue generally white coated. θHeadache.
| | Tongue dirty, with nasty taste. θPneumonia.
| Tongue, lips and hands became white and cold.
‖ Pain beneath tongue, when swallowing, on l. side, behind hyoid bone.
‖ Swelling of sublingual glands. θRanula.
‖ Tongue pushed upward and to l. by a globular, semi-transparent, fluctuating tumor, size of pigeon egg. θRanula.
Cancer or syphilitic tubercle of tongue.
Abscess, cracks or fissures of tongue.

[12] **Inner Mouth.** ‖ Heat in mouth, with hot breath.
‖ Dryness of mouth, at night.
‖ Dryness of mouth, alternating with salivation. θAphthæ.
‖ Great dryness in mouth. θCoryza.
| Collection of water in mouth, with disposition to gag, in œsophagus.
| Frequent spitting; after vexation; with pressure in stomach.
| Flow of sour, watery fluid from mouth, with nausea.
| Copious viscid saliva, with sour taste in mouth.
| | Accumulation of much mucus in mouth, though it does not cause spitting.
| Foul odor from mouth.
‖ Catarrhal inflammation of mouth and fauces, when salivation alternates with dryness of mouth and lips. θStomatitis.
‖ Sore mouth of children; canker sores, especially during teething.
‖ Mouth slimy; blisters on inner surface of cheek and tongue.
Ulcers in mouth.
‖ Ulcers inside of lower lip, light yellow surrounded by

Digitized by Google

redness; pain on contact of tongue and every motion; interferes with eating and speaking.

‖Recent spongy painless tumor, size of marble, on inner side of r. under lip; near corner of mouth; fair and fat: leuco-phlegmatic young lady.

[13] **Throat.** Chronic swelling or hardening of palate.

Blisters on roof of mouth and uvula, which is dark red.

Stitches in palate, after expectoration of blood, from coughing.

‖Inflammatory swelling of palate and uvula or tonsils, with sensation as if throat was contracted when swallowing.

‖Sensation of stinging and pricking roughness of back part of palate, exciting cough. θCoryza.

Uvula feels elongated.

‖Swollen or ulcerated tonsils.

‖Greatly inflamed throat, with aphthæ on tonsils and roof of mouth. θScarlatina.

‖Fauces feel unpleasantly rough. θCoryza.

‖Smarting aching in back of throat about ten minutes after eating. θSore throat.

‖Pharynx spasmodically contracted.

‖A feeling in pharynx, in afternoon, as if food remained sticking in it and could not get into stomach, with a kind of nausea.

‖Pain in throat extending to ears.

‖Feeling of swelling in throat; < l. side, extending up into ears.

‖Feeling of a lump in throat.

‖Tickling as from a feather in throat; swallowing difficult.

Scratching in throat; stitching and pressure on swallowing; constriction.

Stitches in chest extending towards throat.

πRelaxed throat, with roughness and hoarseness, and soreness of eyes.

Bitter taste in throat, or mucus tasting of iron.

‖Throat very painful; swallowing difficult. θScarlatina.

‖Throat feels narrowed, so that she must frequently swallow. θSore throat.

‖For a week feeling a lump in l. side of throat, which makes her feel sick and compels her to swallow saliva often, and on doing so, lump seems to descend.

‖On swallowing: cracking noise in ear; pain on side and lower surface of tongue to l. behind hyoid bone; pressure in pharynx; sensation as if fauces were filled with mucus; sensation of much mucus in pharynx; narrowness in œsophagus; stinging and stitches; is not able to swallow bread; pain as of a plug in throat.

Digitized by Google

I She cannot eat enough; it will not go down.
I Swallows wrong way; afterwards cough with expectoration of blood.
Hawking of phlegm, particularly in morning, with nausea; causes odor in mouth when hawking.
I Hawks saltish mucus from throat. θChorea.
I Throat is rough. θBronchial catarrh.
I Sensation of rawness and soreness of entire œsophagus.
I Violent stitching in upper part of œsophagus when not swallowing.
I Sensation as if food had lodged in œsophagus; taste of iron and of ink.
I Heavy load rising from abdomen up into throat. θGastralgia.
I Spasmodic contraction or narrowness of œsophagus.
I Organic stricture of œsophagus.
I Throat inflamed, with aphthæ on tonsils and roof of mouth. θScarlatina.
I Sore throat when weather changes. θCatarrh.
I I Sore throat marked; cellular tissue around cervical glands swollen; nose sore, obstructed. θScarlatina.
I Calcareous deposits in pharynx.

14 **Appetite, Thirst. Desires, Aversions.** I Appetite increased spasmodically, alternating with loss of appetite.
I Appetite prodigious; thirst very great. θMesenteric disease.
I I Ravenous hunger, with weak stomach.
I Ravenous hunger in morning.
I Canine hunger. θEpilepsy.
I Eats a great deal and yet loses flesh. θMarasmus. θEpilepsy.
I Voracity; everything she eats seems to go into an empty stomach.
Hunger, soon after eating.
I I Appetite poor, with an aversion to meat and a craving for boiled eggs. θPalpitation.
I Loss of appetite; but when he began to eat he relished it.
I I Complete loss of appetite. θCoryza. θKeratitis. θIndigestion. θNeurosis cordis. θGout. θGonagra. θMuscular atrophy. θHereditary headache.
I Anorexia. θPneumonia.
I Anorexia and bulimia. θAddison's disease.
I No appetite, but constant burning thirst. θCough.
I Increased thirst, especially for cold drinks, and particularly at night.
I Thirsty; craving cold drinks. θCholera infantum.
I Coustant thirst, even after drinking. θLymphatic enlargements.

Digitized by Google

Much thirst for acidulated water.
Great thirst: with complete loss of appetite; with stomach pains; with chilliness.
Great thirst. θWorms. θGonagra. θGout. θEpilepsy.
No thirst. θHereditary headache. θCoryza.
Desire for sweets. θUterine displacement.
Appetite for sweets and pastry. θEpilepsy.
Great desire for eggs, wine, sour, salt or sweet things; sugar, disagrees.
Longing for eggs, particularly with children, in sickness or during reconvalescence, even before they are able to swallow.
Longing for boiled eggs. θOphthalmia scrofulosa. θUterine displacement. θCoxalgia. θScarlatina.
Craves indigestible things, chalk, coal, etc.
Unnatural craving for ice-cream and lemonade, which agree with her.
Irresistible desire to eat raw potatoes and handfuls of flour, in alternation.
Great aversion to eating.
Aversion to meat and warm food.
Aversion to meat. θChlorosis. θGoitre.
Aversion to milk, which tastes sour.
Aversion to smoking tobacco.

[15] **Eating and Drinking.** Before breakfast: headache; faintness, weakness; drowsiness and trembling.
Headache before breakfast. θEpilepsy.
Brought on by eating: toothache; cough.
After dinner: sudden blindness; heat of face; distension of abdomen.
After evening meal: pressure in stomach; pinching and forcing immediately under navel; severe chill, followed by pain in abdomen throughout night.
After eating: first stitches then boring in last molar tooth; heat or flatulency, with nausea; pain in stomach and abdomen; bloatedness; eructations with burning; pressure in stomach; aching or crampy pains; cramp-like pain around navel, causing nausea, with cold sweat, relieved by eructation; burning in throat; swelling of stomach (chlorosis); cough (bronchial catarrh); palpitation of heart (chlorosis); fulness in abdomen; diarrhœa; straining, almost cutting, forcing down, in colon; headache, palpitation, rush of blood to head and sleepiness; immediately hungry.
Burning extending up into throat, after every meal, especially after use of hard, dry food.
Worse after eating smoked meats.
Sour taste after eating sugar or cake.

Digitized by Google

Worse from salad; from leguminous food.
Better from eating: first stitches then boring in last molar tooth; cutting in abdomen.
Worse from drinking: diarrhœa; cough and spitting blood.
Worse from drinking cold water. θEpilepsy.
After milk: nausea and sour eructations; waterbrash.
Worse from spirituous drinks. θThrobbing headache.
After wine, especially champagne, often is relieved. θHereditary headache.
Sweat after eating or drinking. θCrusta lactea.
Nausea from smoking tobacco.

16 **Hiccough, Belching, Nausea and Vomiting.** Frequent hiccough.
Eructations: tasting of food eaten; bitter; sour; offensive; of tasteless fluid; of brownish sour fluid; with taste like gall; rancid, leaving scratching sensation.
Frequent eructations, generally sour, with burning from epigastrium upward.
Much empty eructation: with headache in temples; with hemicrania; with uneasiness in legs.
Sour eructations. θDiarrhœa. θGastralgia.
Uneasy movements over entire body, from suppressing eructations.
Heartburn: extending to throat; with continued loud belching after eating; with cough and nausea; with itching and stitching burning at nape of neck.
Rising of tasteless water in mouth. θSore throat.
Nausea and waterbrash after milk.
Gulping up of food, with foul taste.
Qualmishness while riding.
Nausea: mornings, with qualmishness and shuddering; towards evening, during dentition; with roaring before ears; with sensation in pharynx as if food had stuck there; with flow of sour water from mouth; with pressing pain in lower abdomen; with trembling; with cold sweat; after drinking milk; after colic; in pit of stomach, in morning, fasting, with blackness before eyes, so that he was obliged to sit down; in forenoon, followed by anxiety in afternoon.
Accumulation of water in mouth with vertigo in morning; also at other times, with waterbrash; sometimes early vomiting.
When he had eaten almost enough, he became nausated, this ceased if he stopped eating.
Nausea with heat in top of head. θMegrim.
Nausea and headache: after severe vertigo; from customary smoking.

iety and constriction in chest; palpitation of heart, costiveness and blind piles; in the scrofulous.

Cardialgia, afternoon to evening.

❙❙Pit of stomach swollen like a saucer turned bottom up; painful to pressure. θIcterus. θHepatic affections. θHemorrhoids. θNeuralgia cordis. θDyspepsia. θDiarrhœa. θIn children.

❙Hard bloated stomach. θIntermittent.

❙❙Bloating in region of stomach, compelling him to undo his clothing. θPalpitation.

❙Distress in epigastric region, much greater just before a stool, compelling to press hands upon that region and bend forward; relieved to some extent by movement of bowels. θMesenteric disease.

❙Indigestion. θIcterus. θChronic diarrhœa.

❙Weak digestion from a blow or strain; scarcely any food agrees; sleepy all day.

❙Weak stomach with great voracity.

❙Gastromalacia: tongue red as if raw; total loss of appetite; great thirst; vomiting of all he eats; stool often green, many small lumps surrounded by green matter; emaciation of neck; peculiar crying.

❙Cannot bear tight clothing over pit of stomach.

❙After gastric disturbances. θChronic headache.

[18] **Hypochondria.** ❙Pressure in hepatic region, with every step, when walking.

❙Stitches in hepatic region during or after stooping. θIcterus.

❙Darting pain, r. to l. side, with profuse sweat; had to bend double, clench her hands, writhe with agony. θIcterus from calculus.

❙Enlargement of liver. θIcterus.

❙Induration of liver.

❙Sore pain in region of liver and spleen.

❙Enlarged spleen. θIntermittent. θGout and rheumatism.

❙Tightness in both hypochondria.

❙Feeling as if laced below hypochondria, with trembling and throbbing in epigastric region.

❙❙Tight clothes about hypochondria are unbearable. θIcterus. θDysmenorrhœa.

❙Bloated, must loosen garments. θHeart disease.

❙❙Swelling of epigastric region, towards l. side.

❙Stitches in l. side on bending towards same.

❙❙Pains more on l. side, especially under l. hypochondrium; tearing stitching pains in l. chest to hypochondrium.

[19] **Abdomen.** ❙Sensitive to pressure in epigastrium and abdomen. θAddison's disease.

Digitized by Google

Uneasiness in abdomen.
General soreness in whole lower abdomen. θProlapsus uteri.
Cutting in upper part of abdomen.
Cutting and grasping in abdomen, in afternoon, with vomiting of food taken at dinner.
Pressive sticking pain in abdomen, with diarrhœa.
Digging pain in abdomen during vomiting.
Jerking in abdomen towards glans penis.
Pressing, pinching pain in abdomen, with or without diarrhœa.
Pressure in lower abdomen, on physical exertion.
Pressure in abdomen, from pit of stomach downward.
Heavy load rising from abdomen into throat. θGastralgia.
Sensation like crawling of worms in abdomen, causing nausea.
Beating in abdomen.
Hot burning in abdomen.
Feeling of coldness in abdomen. θColic.
Sense of coldness with swelling of lower abdomen. θUterine tumor.
Frequent pain in upper part of abdomen; a "grumbling pain" or a "very sharp squeeze." θMesenteric disease.
Severe spasms in intestines. θColic.
Frequent severe cramp in intestinal canal, especially in evening and night, with coldness of thighs.
Colic of horses; after *Cinchona*, or abuse of it.
Colic: with waterbrash; following coryza and diarrhœa; followed by intermitting diarrhœa.
Colicky pains about umbilicus towards uterus.
Abdominal pains are brought on or aggravated by inspiration.
Contractive drawing aching in epigastrium and across upper abdomen, compelling to walk bent forward, and aggravated by deep inspiration.
Nausea with pain in lower abdomen, beginning in morning, reaches its height in evening.
Pain in abdomen all night.
Pain in abdomen relieved by warmth. θMesenteric disease.
Pains relieved by cold water applications; wants them frequently renewed. θPeritonitis.
Incarcerated flatus, with distension. θMegrim.
Constant rumbling in bowels.
Flatulency with gurgling in right side of abdomen.
Tension in abdomen, with distension, all afternoon, without sensation of flatus, which disappears after passing wind.

Digitized by Google

❙Abdomen large. θChronic diarrhœa. θLumbrici.
❙Abdomen protuberant. θHydrocephalus.
❙❙Abdomen much distended; hard. θKeratitis. θOphthalmia scrofulosa. θColic. θDentition. θWorms. θCholera infantum. θMarasmus. θOvarian dropsy. θFibroid uterine tumor. θUterine displacement. θCoxalgia. θGonarthrocace. θEpilepsy. θEclampsia. θIntermittent. θOsteitis. θRachitis. θAddison's disease.
❙❙Mesenteric glands hard and swollen, in children; abdomen feels as if filled with stones or ovoid bodies.
❙Enlargement and induration of mesenteric glands, with claylike evacuations; dry and flabby skin and muscles; hair dry and looking like tow.
❙❙Mesenteric atrophy.
❙Ascites; abdomen painful to touch.
❙Ulcers in bowels.
❙❙Emaciated everywhere, except abdomen.
❙Worm symptoms. θChorea.
❙Tænia.
❙❙Soreness of navel; a moist excrescence like proud flesh from navel of infants. (*Kali carb., Natr. mur.*)
❙Inguinal and umbilical hernia; walls of abdomen so thin that a truss could not be worn.
❙Pressing and pain in l. groin.
❙Umbilical hernia.
❙Pain as if swollen, with hardness in inguinal region; upon touch or pressure.

[20] **Stool and Rectum.** ❙Tension in abdomen, disappears after passage of flatus.
❙Looseness of bowels. θProsopalgia. θEclampsia. θTuberculosis. θGonarthrocace.
❙Tendency to looseness of bowels, with prolapse of rectum. θPhthisis pulmonalis.
❙Inclined to diarrhœa, especially towards evening. θCoxalgia.
❙Looseness of bowels, however induced, makes her feel weak for a long time; bowels worse in evening.
❙Diarrhœa. θHydrocephalus. θWorms. θCholera infantum. θEpilepsy. θTyphus. θOsteitis. θGoitre.
❙Diarrhœa: of varying character, undigested, offensive, like spoiled eggs, mixed, soft and lumpy; undigested, whitish; a stool which is first hard, then pappy, then soft; scanty, mixed with blood; the stool does not weaken the patient, in chronic diarrhœa.
❙❙Diarrhœa of sour smell. θCholera infantum. θDuring dentition. θScrofula.
❙Diarrhœic, claylike stools, smelling sour or fetid.
❙Stools white, undigested. θIntermittent.

Profuse diarrhœa, watery, slimy, with bits of coagulated milk of sour smell; painless. θRachitis.
Chronic diarrhœa; also after burns.
Asiatic cholera.
Diarrhœa: with pain in abdomen; after eating; after walking and motion.
Watery, pale yellow, or whitish soft stools. θIntestinal catarrh.
Greyish-whitish feces. θIcterus.
Stools whitish, watery, most frequent in after-part of day. θCholera infantum.
Stool whitish-grey, often streaked with blood. θChronic diarrhœa.
Whitish frothy diarrhœa. θRachitis.
Perfectly milk-white stools. θDiarrhœa.
Whitish stools, with emaciation. θChronic prurigo.
White stools, streaked with blood, with despondency and pain in liver when drawing a breath; burning in rectum after stool.
Stools copious, pappy, of a dark greenish-brown color, quite offensive. θMesenteric disease.
Stools watery, smelling badly. θCholera infantum.
Stools: frequent, first hard, then pasty, then liquid; thin, offensive, like bad eggs; yellowish, grey, or clay-like, fecal; whitish, watery, worse in after-part of day, often of sour smell; undigested, hard or thin.
Involuntary stool, as if fermented.
Watery stools. θDuring teething.
Passage of bloody slime with stool.
Stool scant, hard and black.
Hard, undigested stool of a light color or chalky appearance.
Stool large, hard, dry, knotty, and difficult of passage.
Feels best when constipated.
Stool hard, egg-shaped and white, passed with great straining. θLiver complaint, with dropsy.
Hard, thick, scanty, and evacuated with difficulty, or complete constipation.
Must extract excrements with fingers.
Constipation of bowels with unsuccessful urging. θCoryza.
Constipation. θMegrim. θPhthisis pulmonalis. θNeurosis cordis. θGonagra. θGout. θMuscular atrophy. θAddison's disease. θIcterus.
Stool regular, with prominent abdomen and milky urine.
Stool after eating.
Stools chiefly during 4 A.M. to noon, seldom after noon or before midnight. θMesenteric disease.
Bowels moved more frequently towards evening. θBronchitis.

Digitized by Google

Ineffectual urging, with nausea.
Before stool: irascible, irritable.
During stool: burning, tearing, and tenesmus in rectum; prolapse of rectum; piles; succus prostaticus; rolling in abdomen; twitching in muscles of abdomen; pallor.
After stool: pressure in rectum; erections; lassitude; oppression of breath with anxiety; in epigastrium stitches during pressure.
Tapeworm and ascarides with stool.
Pressure or straining in rectum; constant desire for stool. θOvarian dropsy. θChronic dysentery.
Constriction of rectum.
Tensive, jerking or aching pain in rectum.
Sensation of heat at lower end of colon, with drawing and cutting therein.
Cramp in rectum, whole forenoon; a griping and stitching, with great anxiety; was not able to sit, had to walk about.
Feeling of heaviness in lower portion of rectum.
Burning: in rectum; in anus.
Pain in rectum, as if it was torn open, during a soft evacuation; grape-like protrusion around anus, inflamed, burning and painful.
Oozing of fluid from rectum, smelling like herring-brine.
Discharge of blood or bloody mucus from rectum.
Hemorrhoidal flow, with violent itching over whole body.
Flow of blood from rectum, coincident with severe nasal catarrh.
Suppressed hemorrhoidal flow, with vertigo; pressive, dull, thick sensation in head as of drunkenness; severe, pressive, stupefying headache; weakness of memory; stool seldom, costive; foul-smelling and copious sweat of feet, with soreness of soles.
First itching in rectum, then cramps in abdomen and inflation, then stomach pains in paroxysms.
Crawling in rectum, as from worms.
Ascarides, with hard stool.
Tapeworm; after *Graphit.*
Involuntary passage of foamy stool.
Rectum with its hemorrhoids protrudes during stool.
Hemorrhoidal tumors appear, which pain both during motion and repose, and especially at stool, and bleed freely.
Varices, swollen, protruding, burning.
Anus powerless. θMuscular atrophy.
Hemorrhoidal affections with hæmatemesis.
Mucous hemorrhoids.
When bleeding is checked, head is affected. θHemorrhoids. θHæmatemesis.

|Crampy, jerking pain from small of back to anus.
|Burning, stitching and itching at anus and on scrotum, which had been seat of herpetic eruption.
|Itching of anus.
|Itching, as from thread or pin worms, and a burning, inflamed eruption around anus.
|Anal abscess.
|Large, bleeding, burning ulcers in anus and rectum.
|Burning in anus, during stool.
|Flow of blood from anus, with determination of blood to head.
|Prolapsus ani; burning with stool. θCholera infantum.
|Soreness between legs and at anus.

♃ **Urinary Organs.** Symptoms worse at night.

|Pressing pain in kidneys and loins. θAddison's disease.
|Aching in kidneys and lumbar region when riding.
||Polypi and varices of bladder. θHæmaturia.
|Fungoid of trigone vesicale.
|Inflammation of bladder.
|Spasm of bladder, hysteric and hypochondriacal.
|Cutting stitches in urethra, with ineffectual desire to urinate.
||Stitches through female urethra.
|Burning at meatus, at night, when urinating, or after coition.
Pain in urinary passage after feet became wet.
|Bleeding from urethra.
|When busily occupied, she has to run and pass a few drops of urine.
|Frequent urination; also at night.
|Frequent and profuse urination. θCoryza.
|During pain she is obliged to urinate about every 10 minutes. θProsopalgia.
|Child desires to urinate, none flows; at another time could not retain it.
|Involuntary emission of urine when walking. θTumor of vulva.
|Wetting bed; fat children, red face; sweat easily and catch cold.
πPressing on bladder with frequent urging, passing very little. θMegrim.
|Chronic strangury, from standing on cold pavement.
|Before urinating: burning.
During urinating: cutting, burning, sore pain; burning pain of inflamed foreskin; passage of blood and mucus.
|Polypous masses pass with urine.
After urinating: renewed desire with burning; itching in glans.

rhagia. θPhthisis pulmonalis. θHemorrhoids. θSterility. θOvarian dropsy. θMetritis. θUterine displacement. θUterine tumor. θLeucorrhœa. θEndocarditis. θGonarthrocace. θEpilepsy. θIntermittent. θChlorosis.

Profuse menstruation; too frequent menstruation; consequent anæmia. θFibroid tumor of uterus.

Too profuse catamenia. θGastralgia. θUterine cancer. θMegrim. θProsopalgia.

Menses profuse, membranous, dark colored, tardy or premature. θTumor of vulva.

Monthly periods regular, copious and dark. θNeurosis cordis.

Frequent menses, with weakness in legs.

Menses lasting two weeks, with interval of two weeks.

Menses irregular, every five months. θEpilepsy.

Menses eight days late, very scanty, last five days; with swelling of abdomen.

The least excitement brings on a return of profuse catamenia.

Very often useful in scanty menstruation.

Suppression of menses in women of full habit, leucophlegmatic temperament, or with anasarca from working in water.

Absence of menses after fright.

Amenorrhœa with dropsy of uterus and adjacent parts.

Membranous dysmenorrhœa.

Before menstruation: indisposition; disposed to frights; amorous dreams; headache; heat of head; chills and nocturnal colicky pains; aching of back and hips; pain in armpits; pain and swelling of breasts; leucorrhœa.

At beginning of menstruation: cramps.

During menstruation: labor-like pains in abdomen and back; pain in hip bones or in arms; heat of head; headache and toothache; headache and pain in nape of neck; hardness of hearing; painful deglutition; nausea and ineffectual straining at stool; difficulty of breathing; anxiety and restlessness, followed by faintness; nocturnal agglutination of eyelids; lachrymation, in morning; swelling of feet; orgasm of blood, at night, with restless sleep; cutting in abdomen or uterus, and griping in back.

After menstruation: leucorrhœa; toothache; inflammation of eyes; ulcer on cornea.

A few days before or after catamenia: megrim.

Metrorrhagia.

Discharge of bloody water from uterus, in an old woman, with pain in back as though menses were coming on.

Google

Flow of blood between monthly periods. θCancer of womb.
Hemorrhage profuse, bright red. θFibroid of uterus.
Uterine hemorrhages; tendency to miscarry.
Metrorrhagia, with leucorrhœa, during climacteric period.
Leucorrhœa: like milk, with itching and burning; before or after menses; during micturition; profuse at times; in fits and starts; worse after exercise; with great debility; with stinging in os and aching in vagina; with burning in cervical canal; with accumulation of mucus between labia and thighs; with chlorosis; in scrofulous women.
Milklike leucorrhœa. θUterine displacement.
Leucorrhœa with pruritus; white, milky, but not thick; heat of parts.
Acrid leucorrhœa, corroding genitals. θOphthalmia.
Leucorrhœa thick, yellow; < by day, when urinating. θVulvar tumor.
Frequent leucorrhœa between menses, which are too early and profuse. θIncipient phthisis.
Chlorosis.
Aching in vagina. θUterine displacement. θUterine cancer.
Itching or pressing in vagina.
Vaginal polypi and fistula.
Stinging, burning tubercles on margin of labia.
Painful tumor on r. labium, size of a thumb; tender on pressure; could hardly sit down. θVulvar tumor.
Varices of labia.
Much moisture between labia and thighs, with biting pain.
Voluptuous sensation in genital parts, in afternoon.
Violent itching and soreness of vulva. θPruritus.
Burning soreness in genitals.
Itching and stitches either in internal or external vulva.
Terrible itching of parts towards evening, or after going to bed.
Inflammation and swelling of genitals, with purulent discharge.

Pregnancy. Parturition. Lactation. : Causes conception to take place readily.
In first month of pregnancy menses still flow, accompanied by much pain.
Vomiting of pregnancy, and toothache.
Clumsy, awkward, easily falls; tired from short walk, from a general feeling of lameness in pelvis. θPregnancy.

Digitized by Google

Cramps in toes or soles of feet, during pregnancy.
Threatened miscarriage in those who generally have profuse menses or are subject to hemorrhages.
Promotes expulsion of moles, etc.; darting shooting pains.
False labor-pains, running upward.
After-pains or milk fever after confinement.
Puerperal fever; constant aching in vagina; cold, damp feet; head perspiring freely; stitches in neck of uterus.
Red rash on seventh day after confinement; after restlessness, anxiety and increased fever.
Phlegmasia alba dolens.
Lochia last too long, or have a milky appearance.
Coxarthrocace; after childbed.
Profuse menstruation during lactation. Compare *Silica*.
Secretion of milk too abundant; galactorrhœa.
Profuse secretion of watery milk, which the child refuses to take.
Excessive lactation; also hectic and sweat; debility as a consequence.
Breasts distended, milk scanty; she is cold, feels cold air very readily; there is a want of vital activity to secrete milk.
Deficient milk; mammæ not swollen.
Absence of milk, in cows, after severe sickness.
Sweet vomiting, without suppression of milk, in a nursing woman.
Hardening of nipples.
Ulcer on nipple.
Hot swelling of mammæ.
Breasts hard, but not red.
Mammary glands pain as if they were suppurating, especially on touch.
Glandular hypertrophy and induration of breast.
Malignant ulceration of mammæ.
Induration of mammæ; scirrhus.
When nursing child, severe internal stitching, as if arrows were forced through breasts.
Milk disagrees with infant.
Milk has a disagreeable, nauseating taste; child will not nurse, and cries much.
Child will not take breast, cries itself hoarse, has swollen gums and swollen, sore tongue; slimy stool; at times thin, sour fluid from breast, child takes it, but draws too lightly, then cries and makes body stiff, has large blood-boils and lumps; often has pains in lungs and chest, groaning in sleep; severe cutting in abdomen, with urging to stool without passing anything.

Difficult breathing, awaking with anxiety.
Asthma: early in morning; muscles not rigid; sensation of dust in throat and lungs. θScrofula.
Constriction of chest alternating with pain in abdomen, or accompanied by pressure, or digging around navel; nausea, with other spasmodic ailments.
Dyspnœa: with tightness of chest; with stitches in chest; anguish and tight feeling.
Spasmodic contraction in præcordial region, checking breath, followed by violent shocks, stitches in heart, leaving an aching pain.
Dyspnœa, occasioned by cough. θBronchial catarrh.
With every breath he takes, he utters a loud noise.
On inspiration: tearing or stitching as of needles in abdominal muscles below ribs; stitching across abdomen; sharp stitches in l. side; stitches deep in r. chest; cutting in chest; entire chest painfully sensitive; pressure on chest; sore pain in chest; irritation to cough; cutting pain at last ribs from within out; single, severe stitches in upper part of back; constricting pain in upper abdomen; gnawing pain on l. side of chest.
Inspiration difficult, with anxious tightness of chest.
On expiration: loud rattling in trachea; itching stitches on chest.
Mucus rattles in chest on expiration; < when lying and in evening. θBronchial catarrh.
During breathing: pain in abdomen above hips; rumbling in abdomen; stitches in chest most severe; pain in liver; pressive pain in spine; painful shocks in r. side of back.
With every breath she makes a sound as though respiration would fail her.
Catching of breath; from stitching in abdomen to back, and from stitches in heart; on bending.

Cough. Tickling cough, as from a feather in throat, or as of dust in larynx. θBronchial catarrh.
Tickling in larynx causes cough. θCatarrh.
Constant tickling under middle of sternum causing a hacking cough; < from talking and moving. θOnset of typhus.
Cough from constriction of throat.
Irritation to cough, in chest.
During entire day, a constant hacking cough, seems to be involuntary from habit, in children.
From tickling, a dry cough; < towards morning, with a hoarse voice.
Tickling cough and periodical hoarseness prevent preaching. θBronchial catarrh.

Digitized by Google

Tickling and very troublesome cough at night, at different hours; immediately after waking up raises whitish mucus. θBronchial catarrh.

Cough: dry, especially at night; violent, first dry, afterwards with profuse salty expectoration, with pain, as if something had been torn loose from larynx; with rattling in chest and bronchia; in morning, with yellowish expectoration; from inspiration; from playing on piano.

Short hacking cough. θSecond week of typhus.

Dry hacking cough all night. θPhthisis pulmonalis.

Short concussive cough, especially at night, with itching in larynx.

Dry tormenting cough, chiefly at night, raising only after long and great efforts scanty white, frothy, gluey or dirty-looking putrid sputa.

Loose cough. θBronchitis. θPneumonia. θTuberculosis.

Cough caused by sensation of plug, which moved up and down in throat.

Cough during or after eating. θBronchial catarrh.

Coughing up blood after drinking.

Cough hardly permits talking. θBronchial catarrh.

Cough induced by playing on piano; every note she struck seemed to vibrate in her larynx.

Cough < on walking.

Loose cough in morning. θBronchial catarrh.

Cough dry at night, loose by day.

Cough in afternoon.

Cough < in evening. θBronchial catarrh.

Cough dry before midnight, loose after; hurts chest; < walking; sputa yellow and thick. θAfter variola.

Dry hacking cough in evening, especially in bed.

Dry cough at night, after midnight, so that heart and arteries throb.

Night cough. θPhthisis.

In night on waking, a long scraping, dry, spasmodic cough. θBronchial catarrh.

Cough dry at night and in evening, with shocks in head and sometimes vomiting; in morning it is loose, sputa being yellow and sometimes bloody; often in morning before coughing large mucous râles are heard in trachea on expiration.

Cough < in morning on rising and in early evening.

Whooping cough, attacks < mornings.

Cough in morning; yellow puslike, bad-smelling sputa.

Cough; sees frightful objects at night.

Cough producing frontal headache. θPhthisis pulmonalis.

Cough causes stitching headache. θBronchial catarrh.

Digitized by Google

During coughing painful shocks in head. θTyphus.
Cough with coryza.
Cough with nasal catarrh, first dry, later fluent. θBronchial catarrh.
Cough with nausea and a kind of heartburn.
Cough with rattling in chest. θTuberculosis.
During cough: rawness in chest; pain as if tearing something loose; sweetish vomit; headache; pressure in stomach and chest; pain in inguinal hernia; pain in chest; palpitation and throbbing of arteries; sweat; convulsions; earache; gagging with evening and night cough; catching of breath; inclination to vomit and vomiting of sweetish matter; headache.
Cough after measles and variola.
Whooping cough in teething children.
Hæmoptysis.
Raises white phlegm. θCough.
Cough with greyish expectoration, especially in morning; very dispirited; pains in both sides of chest.
Cough with copious sputa, sweetish or sour, lumpy mucus. θBronchial catarrh.
Expectoration: of mucus, with sweetish taste; of blood, when coughing and hawking, with rough and sore sensation in chest; of thick mucus; salty; putrid; yellow, stinking; grey-yellow, of putrid smell; bloody, purulent; tasting sour; during day, but none during night.
Expectoration of bloody mucus, with emaciation. θGleet.
Fetid sputa. θBronchial catarrh.
Sputa greyish and fetid, or yellow and not fetid. θPneumonia.
Viscous sputa loosened with difficulty, of sweetish or flat taste. θCatarrh of lungs.
Cough almost always with profuse sputa, whitish-yellow, purulent in morning. θTuberculosis.
Copious mucous secretion, weakening and emaciating. θBronchial catarrh.
Mucus rattling in lungs. θBronchial catarrh.
Mucus in chest without cough.

[28] **Inner Chest and Lungs.** Acts upon upper and middle portion of r. lung. θPulmonary consumption.
Left lung affected. θPneumonia.
Pain in r. side. θCough.
Anxiety and sense of constriction in chest.
Oppression of chest, as if too full of blood, often accompanied by palpitation.
At night, oppression of chest, with heat, restlessness and thirst.
Oppression of chest: with coryza; with pain in back.

Digitized by Google

‖Tightness on chest accompanying manual labor. Compare *Amm. mur.*

‖Oppression or constriction of chest; > by drawing shoulders backward. θTuberculosis.

‖Constriction of abdomen, upward to chest.

‖Weakness in chest interferes with speaking. θLeucorrhœa.

Pressure on chest.

‖Sensitiveness and sensation of soreness in chest, when drawing a deep breath and when touching it.

Soreness of chest, especially under clavicles, during deep inspiration and especially to touch.

‖‖Sore pains in chest, as if beaten; < during inspiration.

‖Chest feels sore and raw. θBronchial catarrh.

‖Stitches in chest: with urging in abdomen; with difficult breathing; and sides, when moving; from deep inspiration, and when lying on affected side; in l. side, on inspiration; > from rubbing.

‖Stitching in l. chest to throat pit, with loose night cough.

‖Concussive stitch in chest, from hepatic region.

‖Cutting in chest, on inspiration.

‖Lancinating pains from sore spot in l. chest, upper third, extending transversely across sternum to a corresponding point in r. side of chest, thence turning a little downward. θRheumatism.

‖Burning in chest.

‖Coincident with heartbeat, dull shocks from posterior wall of chest, upward to between shoulder blades.

‖Pinching, nipping sensation in entire hypochondrium, extending to under surface of sternum.

‖Gnawing griping in abdomen and stomach starting from chest.

‖Pains in chest, occasion dyspnœa and a sense of constriction in thoracic parietes. θRheumatism.

‖Congestion to chest. θMenorrhagia.

‖Suppuration of lungs; in horses.

‖‖Tuberculous consumption.

‖Abscess in lungs of children, particularly in l. lung.

‖Consumption in scrofulous persons, with morning cough, purulent expectoration, hypertrophic mucous membrane, bleeding easily.

‖Pleuro-pneumonia in tuberculous individuals.

‖Threatened paralysis of lungs in scarlatina; loud rattling in windpipe, breath hot; præcordial anguish; no cough; rattling mostly during expiration.

‖Much mucus in chest.

[29]Heart, Pulse and Circulation. ‖Anxious sensation about heart.

‖Compressive pain in heart.

‖Cold feeling in gluteal region. θRheumatism.
‖Itching vesicular eruption over whole body, especially over hips.
‖Sensation as if r. hip and thigh were brittle, as well as short and small.
‖Stitching in thigh, on stepping.

Digitized by Google

Weariness and a feeling of stiffness in anterior muscles of thigh, in morning, on beginning to walk.
Painful weariness of lower limbs, especially of thighs and feet.
Lifeless, "gone asleep" sensation in muscles of thighs.
Coldness of thighs. θColic.
Glands on thighs swollen.
Bloody boils on thigh, instead of asthma during new moon.
Old sore on thigh begins to smell like rotten eggs.
Varicose veins on thighs.
Fistulous openings in thigh.
Emaciation of thighs and paralysis of extensor muscles.
Itching of thighs.
Weakness and trembling in legs, especially above and below knees, after coition.
Sciatic pains caused by working in water.
Pain extends down into limbs and keeps them in constant uneasiness. θIschias.
Stitching and tearing in knee.
Tearing and stinging in knee.
Creaking sound in r. knee while walking, obliging her to stand still.
Cartilage inflamed, mostly about knee.
Red, burning swelling of knee, comes over night.
Both knees hot, pale, swollen, very sensitive to touch; < at night. θGout. θGonagra.
Knee swollen, hot and red, pain on motion extending to sacrum and toes, abscess discharging yellowish, creamy substance; menses absent since trouble in knee (eight years). θChronic arthritis in woman, æt. 43.
Swelling of knees.
Drawing or stinging pain in knee while sitting or walking.
Weakness of knee as if sprained, gives way under him, has to straighten it before walking.
Weakness in knees. θLeucorrhœa.
Lameness in l. knee. θRheumatism.
Ulcer-like sores on r. knee, discharge of pus in morning on pressure.
Spongy swelling of knee joint.
Red stripes on tibia, consisting of nettlerash elevations, with severe itching and burning after rubbing.
Shins ulcerated and puffed up, with affection of bone.
Denuded spots on shins that water for a long time.
Pain in calf, on walking and stepping, or on touch and on bending foot.
Legs go "to sleep" in evening when sitting.
Left calf swollen, with internal lumps; much pain in foot. θCramps of legs. θMuscular atrophy.

[35] **Rest. Position. Motion.** Rest: stupefying headache; sweat >.

Lying: crepitation in back part of head >; constant inclination to lie, in chlorosis; on affected side, stitches; > throbbing headache; coldness of head <; cannot lie, in pneumonia; < on side, tuberculosis; > on back; assumes the prone position; pain in stomach >.

Letting legs swing: < epilepsy.

Sitting: causes backache and headache, chlorosis; drawing or stinging pain in knee; legs go to sleep.

Rising from seat: < rheumatism; is difficult after sitting awhile.

Bending: feels numb.

Stooping: produces a bewildered sensation; arrest of breath; < headache.

Elevated: when keeping limbs, ulcers >.

Stretching: inclination to, in morning; of limbs, before epileptic attacks; of horse's limb, in exostosis.

Straightening: < rheumatism.

Exercise, slightest: anxious palpitation.

Exertion, least: perspiration, even in open air.

Chewing or swallowing: cracking in ears.

Straining or overlifting: stiff neck; backache; headache; sore throat; rheumatism; uterine displacement.

Motion: pain on, in knee; headache; pain in r. wing of nose; pain in stomach <.

Moving: stitches; want of breath; < headache; symptoms of chest and heart; > gastralgia.

Beginning to walk: weariness and a feeling of stiffness in anterior muscles of thigh.

Walking: cough < on; against the wind, want of breath; tension or stitches in hip joint; drawing or stinging pain in knee; pain in calf; creaking sound in r. knee; great toe very sensitive; great fatigue, in chlorosis and tuberculosis; children show no disposition to walk, or stumble and fall easily; sweat on head; pressure in hepatic region; involuntary emission of urine.

Stepping: pain in calf; < pain, in rheumatism.

Playing on piano: cough.

Ascending: vertigo; headache in vertex; want of breath; palpitation; pain, as if beaten, in upper arm and middle of thigh; dizzy and entirely exhausted.

Turning: in bed, pain in neck; feels as if the back "cricked;" < turning from back to sides, tuberculosis.

Throwing shoulders back: > oppressive breathing.

Overdriven horses refuse to eat.

[36] **Nerves.** ‖So-called nervous irritability and nervous excitement. θMegrim. θMuscular atrophy.

Digitized by Google

Nervous erethism. θHerpes.
Sensation of power with lack of will force.
Peculiar fear of shadows thrown by candlelight; a child.
Restless and irritable.
Uneasiness even to fainting.
Sudden starting of body, with jerking and roaring in ears.
Subsultus tendinum.
A kind of voluptuous trembling, with sadness.
Attacks as of fear, passing from feet over body; trembling; grinding of teeth, doubling of fists, as if in furious anger; wishes to destroy himself, yet retains consciousness; afterwards a shivering over back.
Anxious trembling, with drowsiness.
Uneasiness and trembling fear, with internal chill.
Trembling in limbs and continuous lassitude.
Hysterical fits of laughing.
Hysteric spasms.
Muscular twitching; clonic spasms and epileptic paroxysms. θAddison's disease.
Throws herself forcibly about, rolls on ground, tries to catch hold of bystanders' clothing, which she puts into her mouth, bites and spits, makes a loud barking noise, all with open, dull eyes.
Chorea: sometimes only one-sided; involuntary motions; sometimes falling down; violent motions of hands and feet; from fright, onanism or worms; in second dentition.
Chill with red face, gazes fixedly before him, fingers jerk spasmodically, while both arms lie stretched at length; then wild laughter with fixed, staring gaze and hard, bounding pulse.
Convulsions in a little boy, with chalky stools and distended abdomen. θCroup.
Spasms. θWhooping cough. θDentition.
Tonic spasms, with scrofulous people.
Frequent severe spasms, especially in evening and at night, with coldness of thighs.
Epilepsy: before the attack sense of something running in arms, or from pit of stomach down through abdomen into feet; sudden attacks of vertigo; loss of consciousness without convulsions; pharyngeal spasms, followed by desire to swallow. Causes: vexation; fright; onanism; protracted intermittent; suppression of chronic eruption. Worse at night, during solstice and full moon; with hallooing and shouting.
Epileptic attack; while standing at his work he fell suddenly to ground sideways, without consciousness,

Digitized by Google

and on returning to consciousness found himself lying with outstretched arms; this was followed by heat and some sweat.

Epilepsy of three years' standing; eight or ten fits daily; < from 4 A.M. to 4 P.M.

Easily tired by bodily exertion. θUterine displacement.

Nervous debility. θDysmenorrhœa.

Protracted convalescence. θCerebro-spinal meningitis.

Muscular debility, uneasiness and lassitude. θAddison's disease.

Paralysis of voluntary muscles. θCerebro-spinal meningitis.

Exhaustion in morning. θPhthisis pulmonalis.

Great weakness. θChronic diarrhœa. θBronchial catarrh.

From walking up-stairs, dizzy and entirely exhausted. θUterine displacement.

Weak, no animation. θCough.

General malaise. θLeucorrhœa.

Easy relapses, one does not continue to convalesce.

Disinclination for every kind of labor.

Feels very tired. θConsumption.

Very weary and sleepy the whole day.

Such great weariness that he is not able to walk.

Great loss of power on walking, especially in limbs, with exhausting sweat.

She was unable to go up-stairs, and became very much exhausted from it.

Great exhaustion on waking in morning from deep sleep, so that the confused and sleepy condition continued even after rising from bed.

Child languid, yellow and pale; whining; stool scanty.

Lassitude in limbs; general sense of weakness after every walk, such as one feels after a fever; it even goes so far as to amount to attacks of faintness with chill; indistinct vision and nausea.

Great lassitude: with sickly complexion; with intense appetite; with vertigo and tendency to falling.

Very great weakness and debility: from a short walk; from talking.

Very weak and sick for several days after coition.

Great prostration: with fluent coryza; with nausea and vomiting of food taken.

Want of strength, especially in morning; arising from loss of animal fluids.

Fainting: after loss of sight, with coldness; after stool; in Addison's disease.

Spells of fainting in street; come on with sensation of

Digitized by Google

something rising from stomach to head; feels as if he would die; followed by bewilderment of mind. θTumor of eye.

‖Sensation as if about to faint, with headache.

‖After going out in evening, yawning and fainting.

‖Attacks like fainting after writing and thinking, when lying down, or when rising.

‖Great desire to be mesmerized.

‖Paralyzed in all limbs, even scalp feels lax.

‖Great heaviness of body.

‖Paralysis: of upper extremities; of fingers; of legs; after onanism or sexual excesses.

‖Paralysis of voluntary muscles. θCerebro-spinal meningitis.

‖Locomotor ataxia; after exposure to wet and cold; after sexual excesses.

‖Idiopathic neuroma.

Sleep. ‖Considerable day sleepiness. θChronic diarrhœa. θNeurosis cordis.

‖After siesta great dulness of head.

‖Weary sleepiness in all limbs in evening, with chilliness.

‖Great inclination to sleep after supper.

‖Sleepiness and continuous yawning.

‖Yawning: with cramps in stomach; with fatigue; with chilliness over entire body.

‖Late falling asleep in evening.

‖Sleeplessness: from many thoughts crowding his mind; from mind turning on same thought; from mortification at trifles; until 2 or 3 A.M.

‖Restless, sleepless nights. θMegrim. θGonagra.

‖Light slumber, or utter sleeplessness, from overactivity of mind. θOnset of typhus. θChronic headache.

‖‖The same disagreeable idea always rouses the sick as often as they fall into a light slumber.

‖Horrible phantasies in bed, at night, before going to sleep.

‖‖When closing eyes, horrid visions. θTyphus. θLying-in.

‖Raves in sleep. θKeratitis.

‖Before going to sleep: severe sweating of face; pressure in stomach; burning itching as from nettles.

‖Very sensitive to noise, on going to sleep.

‖Starting in sleep, or just when going to sleep.

‖‖Child chews and swallows in sleep.

‖Heat and nausea, with very uneasy sleep.

‖Nightmare; cramp in calves; much palpitation and tumult of blood at night.

‖During sleep: short, almost sobbing breathing; cough at night; palpitation of heart.

‖Flighty and wandering at night.

Google

Throws himself about in bed, all night. θTinea.
Continually throws himself about, with snoring groaning, the entire night.
Restless at night, with dry heat. θCoryza.
Restless at night, with sweats on head. θDentition.
Disagreeable twitching in penis, in bed.
Visible jerking in l. great toe, in bed.
Cold feet at night in bed.
Night sweats; also after 3 A.M.; sticky, only on legs.
Often obliged to get up in night, two or three times, to dry her head with a towel. θSoftening of brain.
Severe itching on various parts of body, in bed.
Awakens early in night.
Cannot sleep after 3 o'clock in morning.
Frequent awaking at night.
On awaking: is roused with difficulty; pain in head, with vertigo; heaviness of head; dull pain in forehead; at first dull, then pressive pain in temple; flickering appearance, like sparks of fire before eyes; eyelids stick together; taste in mouth like ink; dryness of tongue; drawing and cutting in abdomen; at midnight, cough with nausea; painful stiffness in spine; painfulness of finger joints as if swollen.
After rising from bed, stupefying pressing pain in head.
Dozing even after getting up on her feet. θPhthisis pulmonalis.
Inclination to stretch, mornings.
Uneasiness from dreams and heat.
Much orgasm of blood, at night, with many dreams.
Frightful dreams all night, and at last a sensual dream with an emission.
Voluptuous dreams.
Anxious and frightful dreams, from which he was unable to free himself on waking.
Fearful of fantastic dreams during sleep.
Horrible, frightful dreams of sickness, death and corpses.

Time. Night: congestion to head; vomiting of some water; pain in abdomen; cough dry; cramp in hands; both knees hot, pale, swollen, very sensitive to touch; coldness and deadness of feet; burning of soles of feet; great toe very sensitive on walking; horrible phantasies; nightmare; cramp in calves; much palpitation and tumult of blood; flighty wandering; throws himself about in bed; restless; awakens early in; much orgasm of blood; frightful dreams; internal heat, especially in feet and hands; skin hot; dry nose; stoppage of nose; toothache.

Midnight: before, night sweats.

Digitized by Google

2 to 3 A.M.: sleeplessness; chill commencing in pit of stomach.

3 A.M.: often night sweats; cannot sleep after; till afternoon, headache.

Morning: cough with yellowish expectoration; loose cough; greyish expectoration, purulent; coryza with stiffness and rigidity of nape of neck; hands feel cramped; fingers stiff; uneasiness and a feeling of stiffness in anterior muscles on beginning to walk; ulcer-like sores on r. knee, discharge pus on pressure; exhaustion; inclination to stretch; dry tongue without thirst; coldness of head; photophobia <; nosebleed; nausea; pain in abdomen; roughness of larynx; lassitude.

Morning, towards: in bed, itching worse.

11 A.M.: fever without chill.

Forenoon: chill with shivering; headache <; fever.

Noon: unusual uneasiness in lower extremities, especially in ankles.

4 A.M.: stool

4 A.M. to 4 P.M.: epilepsy worse.

Day, during: expectoration; tremulous pulsation of heart, < after eating; burning pain at nape of neck to occiput; very weary and sleepy; headache; eyes full of gum.

Afternoon: cough; cardialgia.

5 P.M.: screaming spells.

6 to 7 P.M.: fever without chill.

Evening: itching on scalp <; sweat of neck and head; photophobia <; pain in eyes <; cramps in intestinal canal; cough <; pain in finger joints; insensibility of feet; feet sweat; chill with shivering; fever for ten days; first heat of face, then chill; and night skin hot; stinging in vertex; diarrhœa.

» **Temperature and Weather.** Cannot bear sun; vertigo while walking in it; headache <.

Inclination to uncover during heat. Comp. *Sulphur.*

Inspiration of fresh air was beneficial and strengthening.

Aversion to open air; the least cold air goes right through.

Great sensitiveness to damp cold air.

Walking in open air: vertigo; pressive headache; tightness of chest; crampy pains in arms; pain in patella; pressive pain in l. tibia; trembling of entire body; lachrymation; deafness <.

Warmth: headache >; toothache >; itching on scalp >; pain in abdomen >.

After going from open air into room: great peevishness; throbbing headache <; pressing outward in forehead worse.

Digitized by Google

In a draught: headache <.
The pain is aggravated by the slightest change, as from a current of air, cold or warm; coldness of head <.
Taking cold: headache <.
Ailments resulting from draught, washing or working in water, and dread of water and bathing.
Immersion in cold water: > paroxysm of cutting in abdomen.
Getting wet: headache <.
Damp cold air: swelling in bones of skull <; asthenopia worse.
Cold applications: headache <.
Washing: stitches in vertex <.
After wetting feet: pain in ureters; swelling of submaxillary gland.
Cold: toothache >; teeth very sensitive.
Dry weather: ulcers.
Wet weather: stitches in vertex <.

40 **Fever.** ‖Coldness: of face, hands and feet; of body, and cold sweat; and indistinct vision, with attack of faintness.
‖She feels a sort of inward coldness.
‖Icy coldness in and on head.
‖Chilliness: with vertigo and headache; with headache, after taking cold; with stitches through head; with pale, sickly complexion; with grasping in hypochondrium; with thirst, after motion of feet; with erysipelatous inflammation of lower leg; when rising in morning; mostly in evening; and cold creeping over body; though limbs feel warm.
Chill begins in scrobiculus cordis with spasms, or cold agonizing weight, increasing with chill and disappearing with it.
‖Shivering over entire body, with sudden pain in parietal bone, as if it had been forcibly broken.
Fever without chill at 11 A.M. and from 6 to 7 P.M.
‖Chills, commencing at 2 P.M., in pit of stomach.
Chill at 11 A.M. one day, at 4 P.M. next.
‖Chill with shivering, mostly in evening, yet sometimes in forenoon.
‖Paroxysms occurred every other day at 11 A.M.; chills began in feet and extended towards head. θIntermittent.
‖Chill and headache; drowsy fatigue in all limbs.
‖Thirst during chill. θIntermittent.
Before chill: drawing in all joints, and great heaviness of head and body.

Digitized by Google

Dry heat with uneasiness and drowsiness.
Frequent attack of sudden universal heat, as if she had been drenched with hot water, with despair of life.
Heat with or without thirst, followed by chilliness and cold hands.
External heat, with internal chilliness, in evening in bed.
Inward chilliness alternating with flushes of heat. θCoryza.
Paroxysm of fever in forenoon; chill and heat alternating.
Hectic fever: with alternate chills and heat; frequent attacks of flushes of heat, with anguish and palpitation of heart, or constant shuddering in evening, with red cheeks; skin dry, withered; sweats easily; great debility; after prolonged or profuse lactation, loss of fluids, tuberculosis, etc., etc.
Morning fever.
Flushes of heat and trembling.
Heat and ebullition of blood to head.
Frequent flushes of heat, with anxiety and palpitation of heart.
Evening fever for three days, first heat of face, then chill.
Evening fever, with burning heat in belly and thirst for water the whole night. θChronic diarrhœa.
Fever in evening, with hard, quick pulse.
Nightly internal heat, especially in feet and hands, morning dry tongue, without thirst; external heat of head.
Skin hot, especially evenings and nights, when it is covered with sweat, which threatens to exhaust child more and more.
Considerable fever with thirst, hot, dry skin, after getting wet.
Little fever. θGonagra. θGout.
Heat with inclination to uncover.
Skin hot, then cold clammy sweat. θCholera infantum.
Hot sweat. θIntermittent.
Sweat over whole body, with severe cramp in stomach.
Great sweat on moderate motion.
Perspiration from least exertion, even in open, cold air.
Easily sweating. θTuberculosis. θWorms.
Perpires easily. θDuring intervals of epilepsy. θRheumatism. θBronchial asthma.
Sweats easily, when exerting himself, in preaching. θBronchial catarrh.
Heat and sweat after epileptic attack.
Sweat: of palms; of feet; most profuse on head and chest; with uneasy sleep; during first sleep.

Digitized by Google

‖‖Morning sweat.
‖Night sweat: especially on head, neck and chest; before midnight, with cold limbs.
‖Clammy night sweat, only on legs.
‖Cold sweat and coldness of body.
‖Cold sticky sweat on feet.
‖Body always bathed in sweat, especially head, while feet are very cold. θPalpitation.
‖‖Partial sweats: ‖‖‖head, scalp wet, cold, wets pillow far around; ‖male organs; ‖‖nape of neck; ‖‖chest; ‖axillæ; ‖‖hands; ‖knees (cholera infantum); ‖‖‖feet.
‖Complaints after suppressed sweat.
‖‖Intermittent fever after abuse of quinine; chronic forms with scrofula; chill commences in stomach, agonizing weight, increasing with chill and disappearing with it; with people who work much in cold water; cachectic constitutions; suppressed eruptions; desire for eggs.
‖Attacks of intermittent with spasmodic symptoms.
‖Tertian evening fever; first heat in face, then chilliness.
‖‖Typhoid fever, during aggravation which precedes rash (14th day); palpitation, tremulous pulse, anxiety, red face, delirium, jerks; short, hacking cough; excessive diarrhœa.
‖Sequelæ of putrid fever; horses.
‖Useful in convalescence from yellow fever.

[11] **Attacks, Periodicity.** Returning at intervals: aching in throat.
Every morning: pain in brain; violent headache.
‖Attacks several months apart. θEpilepsy.
‖Lasting from 3 days to 6 months. θHereditary headache.
‖Worse towards new moon. θGangræna oris.
‖Worse during solstice. θEpilepsy.
πWorse about new moon. θCrusta lactea.
‖‖Worse during full moon. θEpilepsy.
Some symptoms < every other day.

[12] **Locality and Direction.** Left: boring in temple; hemicrania; pricking on side of head; swelling in front of ear; pain in temple; seed wart on cheek; as of a lump in side of throat; pain in side; pain in groin; lung affected, stitches on inspiration, to throat pit; abscess; lancinating pain from sore spot in chest to r. side; pain in arm, with palpitation; soreness in pectoral muscles; shooting pain in shoulder down along arm and towards heart; arm, weakness and a kind of paralysis; shoulder, shooting; convulsive trembling of index finger; middle phalanx of middle finger painful; piercing darting pains in ring finger; foot dragged in walking; lameness in knee.

Digitized by Google

Right: pain about eye; drawing in temporal muscle; ear and face swollen; tickling in eustachian tube; parotitis; steatoma over parotid gland; painfulness of wing of nose; pain in ovarian region; side, pain in; external heat and swelling; between ribs small lump, with difficult breathing; shoulder, arthritic pain; arm, internal drawing corrosive pains; arm, pressing pain; wrist, pain as from a sprain; ganglion in wrist size of a bean; atrophy of hip; sensation as if hip was brittle, as well as short and small; creaking in knee when walking; ulcer-like sores on knee; small, deep, painless ulcer on external malleolus; fingers, hand, arm and leg cold and damp; knee, blood-boils.

From l. to r.: shooting in temples; lancinating in side.

First r. then l.: pain in ear; darting pain in side.

From within outward: cutting thrusts in vertex; stitches in ears and eyes.

[41] **Sensations.** As of a board before head; as if everything was turning with her; as if he would drop unconscious; brain as if squeezed; as if a piece of ice was lying on side of head; as if r. hip and thigh were brittle; as if scalp was loosened from head back to nape of neck; as if she should press eyes in; as if eye moved involuntarily; as if a grain of sand was under eyelid; as if roots of teeth were being torn out; as of a lump in throat; as of a plug which moved up and down in throat; as if a load or stone was in stomach; as if laced below hypochondria; as of worms crawling in abdomen; as if rectum was torn open; as if something was being torn loose in larynx when coughing; as of dust in throat and lungs; pain in sacral region, back and neck, after overlifting, as if wrenched, as if they were swollen; as if r. hip and thigh were brittle, as well as short and small; as if lower limbs had gone to sleep; as if she had on cold damp stockings.

Cutting: in chest, on inspiration; in forehead; in vertex and occiput; in eyes and lids; in abdomen; in epigastrium; in upper part of abdomen; in colon.

Lancinating: from sore spot in l. chest; nightly in arms.

Stitching: in head out of eyes; in gums; headache from cough; in eyes; in teeth; in throat; in hepatic region; in l. chest to hypochondrium; in rectum; at anus and in scrotum; through female urethra; in l. chest to throat pit; in region of heart; pain in neck; various parts of back; between scapulæ; in thigh, on stepping; in knee.

Cutting stitches: in urethra.

Cutting rending: from inguinal region to testicles.

Digitized by Google

Stitch: upward in chest muscles; in l. shoulder joint; in temples; in ears and eyes; towards nasal bones; in stomach; in cervix.
Concussive stitch: in chest.
Stinging: in lump between ribs, r. side, extending to shoulder blades; in knee; in bones; in neck; in eyes; in palate; in os uteri.
Needle-like stitches in buttock.
Prickling: stitches in muscles of chest; on neck and face; in l. side of head; in teeth.
Smarting: across gluteal region; in eyes; in throat.
Corrosive: pains in r. arm.
Rawness: in chest, from dry cough.
Burning: in temples; vertex; in scalp; in eyes: in canthi; of tongue; in eyelids; in throat; from epigastrium up; at nape of neck; in stomach; in abdomen; in rectum and anus; at meatus; of urethra; of genitals; in chest; pain at nape of neck; pain extending downward, with inclination to move; in back of hands; on tibia; on soles of feet at night; pain in corns; in hands; in veins.
Biting: eruption on feet; on scalp.
Gnawing: in abdomen and stomach; in teeth.
Boring: rheumatism of lumbar vertebræ; in bones; in forehead and temples; in teeth.
Jerking: in ears; in teeth; in stomach; in abdomen to glans penis; in rectum; from small of back to anus.
Jerking stiching: in leg above ankle joint.
Tearing: pain as if, in chest; rheumatism of lumbar vertebræ; in eyes and head; in coccyx; pain on outer side of forearm; in knee; in limbs; in legs; ulcers; above eyes down to nose; through brain; in bones of head; in scalp; in cheeks; in teeth.
Shooting: pains under l. shoulder; through limbs, both upper and lower; in temples; in hip.
Darting: to ears; in side.
Drawing: in temples; pain between shoulder blades; in hepatic region; in coccyx; pains in r. arm; in middle fingers; in knee; from forehead to vertex; in temporal muscles; in occiput; in teeth; in colon; in hip; from r. hypochondrium towards symphysis pubis.
Nipping: in entire hypochondrium.
Pinching: in entire hypochondrium; in coccyx; under navel; in stomach; in abdomen.
Piercing: darting pain in l. ring finger.
Rooting: in teeth.
Digging: at pit of stomach; in abdomen.
Griping: in abdomen and stomach; in rectum; in back

Digitized by Google

Sore pain: in region of liver and spleen.
Bruised: arms feel, on moving them.
Soreness: in chest; around tip of nose; of tongue; of œsophagus; in abdomen; of navel; of soles; between legs and at anus.
Aching: swelling of glands of neck and back; of shoulder-muscles and arms; smarting across gluteal region; in rectum; in kidneys and lumbar region; of testicles; of vagina; of back and hips.
Bearing-down pain: in pelvis.
Pressure: in stomach and chest; on chest; between and under shoulder blades; in eyes; on upper row of teeth; in throat; in hepatic region; in abdomen; in l. groin; in rectum.
Pressive sticking pain: in abdomen.
Pressing pain: in r. arm; in forehead; in vertex; in stomach; in kidneys and loins.
Rheumatic pain: in upper cervical vertebræ.
Dull pain: day and night.
Dulness: of head.
Undefined pain: in inguinal hernia; in both sides of chest; in back, with oppression of chest; in neck, on turning head; in l. arm; between shoulders and in lower part of back; in shoulders, with fever; in r. wrist joint, as from a sprain; in hands; in tendo-achillis; as if beaten in upper arms and middle of thighs; at roots of hair; shoots into ears and head; in upper jaw; in l. temple; on side and lower surface of tongue; in throat; in abdomen; in epigastrium; in l. groin; in rectum; in uterus or r. ovarian region; in armpits; in breasts; in hip bones or in arms; in larynx; in calf.
Painful: stiffness in back.
Colicky pains: about umbilicus.
Urging: in back.
Tensive pain: in maxillary joint; in swollen gland under jaw; in head.
Severe spasms: in intestines.
Stupefying pain: in head.
Concussive throbs: in head, abdomen and chest.
Emptiness: in head.
Pulsating: in gums.
Beating: in stomach; in abdomen.
Throbbing: ulcers; in temples; in middle of brain; in vertex; in eyelids; in ears; in teeth; of gums; in epigastric region.
Tightness: on chest; of r. temple; in both hypochondria.
Tightening: pain in legs during pressive cramps in stomach.

Digitized by Google

Compressive pain: in heart.
Tension: in abdomen.
Hammering: in head.
Contractive drawing aching: in epigastrium and across abdomen.
Constriction: in chest, with anxiety; of abdomen upward; in stomach; in rectum; in throat.
Cramped: hands and forearms; in feet and legs.
Cramps: in stomach; in intestinal canal; in rectum; in abdomen; in toes and soles; in arms.
Twitching: in penis.
Shocks: in head at night, from dry cough; dull, from posterior wall of chest upward.
Heaviness: and painful weight in limbs, and great fatigue on walking; of the body; in forehead; in upper lids; of rectum; of feet; of legs.
Weight: sensation of, in different parts.
Weariness: of lower limbs.
Weak: feeling in back; in l. arm; in chest.
Scratching: in throat.
Uneasiness: in legs; in abdomen.
Numbness: of single parts; in side of back, on which he has been lying; in hands; in great toe on walking.
Dead: fingers and feet feel as if.
Paralytic bruised pain in long bones and in joints of limbs; also in small of back, on motion.
Warmth: ascending nape of neck.
Heat: and swelling of r. chest; around coccyx; in head; in ears; in upper lids; of face; in top of head; in rectum.
Cold: feeling in gluteal region; feet; icy feeling in and on head; like cold air passing over the part; on thighs; top of head; in eyes; in abdomen.
Itching: in chest; burning on neck; on inner part of forearm; of thighs; on tibia; on lower leg and foot; eruption on feet; crawling, on scalp; burning on head and neck; in eyes; in canthi; in ears; in nose; of eruption of face; at nape of neck; in rectum; of anus; on scrotum; of sexual organs, male and female; in larynx; of thighs.
Dryness: of ears; of nose; of tongue; of mouth; of larynx.
Crawling: on side of nose; on lower part of face; in rectum.

feeble granulations; without much pain, or, tearing and throbbing in ulcers; pus scanty, albuminous.

‖Subcutaneous tubercle.

‖A red excrescence, size of bean, every four weeks; inflames, breaks open, becomes hollow, discharges pus, and then heals.

‖Round swellings, which appear in different places, on joints of upper limb, breasts, lower legs and feet, with needle-like stitches, especially at joint; also pain in ear, with fever heat and thirst.

‖Encysted tumors; naked tumors. θHorses.

‖Cystic swellings, discharging pus.

‖Bloody tumors; nævus; cholesteatoma; enchondroma.

‖Spongy tumor.

‖Recurring fibroid tumors.

Malignant tumors on head, eyes, nose, mouth, neck and female genitals.

‖Lipoma, from abuse of liquors, or from scrofula.

‖Many very small warts appear here and there.

‖Warts: round, soft at base, almost of color of skin, upper surface hard, rough, whitish and horny.

‖Wart appears, itches, bleeds and disappears.

‖Warts: inflamed, stinging; suppurating, and forming ulcers; thickly studding mouths of sheep.

‖Variola during teething; sequelæ of variola.

‖Sequelæ of measles; eye disease, etc.

‖After suppressed eruptions. θEpilepsy. θMegrim. θNervous palpitation of heart.

‖After suppressed pimples on face. θNervous palpitation of heart.

" **Stages of Life, Constitution.** ‖Pale, leuco-phlegmatic, weakly timid persons.

‖Scrofulous constitutions, with pale face, rather fair complexion and disposition to corpulence.

‖More frequently indicated with the young; cannot be often repeated with the old, unless higher potencies are used.

‖‖Diseases of children, especially during dentition.

‖Children and sucklings become thick and gross, as if fat, but are pale and unhealthy.

‖‖Leuco-phlegmatic temperament in childhood. θDentition.

‖Fair, plump children. θCrusta lactea. θUrticaria, etc.

‖‖Children: self-willed; fair, plump; fat, flabby, with red face, sweat easily, and readily take cold; large heads and abdomens, open fontanelles and sutures, and crooked legs.

‖Fat child, æt. 18 months, light hair, blue eyes. θTinea capitis.

Digitized by Google

Child, æt. 2, blue eyes, blonde hair and fair skin. θHives.
Boy, æt 2, strumous, head sweats much at night.
Child, æt. 3, blue eyes, blonde hair, plump fat habitus. θStrabismus.
Boy, æt. 10; since his fourth year. θMesenteric diarrhœa.
Miss, æt. 14, light complexion. θEpilepsy.
Puberty: girls who begin with menses too early and too profuse; fat, yet chlorotic; plethoric girls, amenorrhœa, etc.
Girl, æt. 16, fair complexion, strumous family, easily excited to tears. θHerpes circinatus.
Girl, æt. 20, small, plethoric and blonde. θChlorosis with hermicrania.
Light-haired youth, growing rapidly. θTuberculosis.
Young who grow too fat and heavy. θOzæna scrofulosa.
A young man, after he had worked with his bare feet in cold clay.
A widow, æt. 40, large figure, round form, brown hair, blue eyes, white and delicate skin, constantly red cheeks, irritable. θGout.
Plethoric woman. θVulvar tumor.
Climacteric years; hysteric women who have not been married; who have had profuse catamenia; metrorrhagia.
A woman, æt. 60, night sweats of head since 37th year.
Man, æt. 60, dark haired, muscular, thin and tall. θPolypus.
Fat, unhealthy children. θUlcer of cornea.
Flat, flabby children, with red face, who sweat and catch cold easily. θEnuresis nocturna.
During dentition. θEclampsia.
Nervous, hemorrhoidal, plethoric and lymphatic constitutions; disposed to grow fat.
Chronic headaches of torpid constitutions.
Gouty people.
Herpes in the scrofulous, with enlarged glands.
Tuberculous diathesis.
Scrofulous diathesis. θRachitis. θHydrocephalus. θCrusta lactea. θKeratitis. θCataract. θStrabismus. θHerpes. θPolypus auris. θCancrum oris. θIntestinal catarrh. θWorms. θAmenorrhœa. θMenorrhagia. θUterine displacement. θUterine cancer. θPruritus vulvæ. θDysmenorrhœa. θGonarthrocace. θBronchial catarrh. θAsthma. θRheumatism. θEclampsia. Intermittent. θChorea. θScarlatina. θCoryza. θNasal catarrh. θHerpetic affections.
Leuco-phlegmatic, light complexion, blue eyes, blonde hair, fair skin.

Digitized by Google

‖Fair, light complexion, grows too rapidly. θTuberculosis.
‖Full habit and ebullitions.
‖Sanguine temperament, muscles soft, flabby. θGoitre.
‖Darkish yellow complexion, spare habit. θIcterus calculosus.
‖Nervous temperament, delicate constitution. θMegrim.
‖Black hair, dark complexion, blue eyes. θRheumatism.
‖Nervous temperament, dark hair and grey eyes. θProsopalgia.
‖Nervo-bilious temperament, black hair, dark complexion. θMuscular atrophy.
‖Fat persons. θProsopalgia.
‖Persons inclined to grow fat. θAt onset of typhus.
‖Leuco-phlegmatic temperament. θCholera infantum. θLaryngo-tracheitis. θBronchitis. θHæmaturia. θGleet. θMenorrhagia.
‖Persons subject to nightly emissions. θBronchial catarrh.
‖For drunkards.

48 **Relations.** Antidotes: *Camphor, Ipec., Nitr. ac., Nitr. spir. dulc., Nux vom., Sulphur.*

Calc. ostr. antidotes: *Bismuth, Cinchon., Chin. sulph., Digit., Mezer.* (headache), *Nitr. ac., Phosphor.*

Compatible: before ‖*Lycop., Nux vom., Phosphor., Platin., Silica;* after *Chamom.*, ‖*Cinchon., Conium*, ‖*Cuprum*, ‖*Nitr. ac., Nux vom., Pulsat.*, ‖*Sulphur* (especially if pupils dilate).

Incompatible: before ‖*Nitr. ac.* and ‖*Sulphur*, according to Hahnemann.

Complementary to *Bellad.*

Compare: *Alum., Amm. mur.* (tightness of chest); *Arnica, Arsen.* (swollen mesenteric glands); ‖*Bryon.* (child chews and swallows in sleep); *Baryt.*, ‖*Bellad.* (eclampsia, scarlatina, headache, crusta lactea, etc.); *Calc. phosph.* (cold damp feet, uterine trouble); *Chamom., Cina* (worms); ‖*Cinchon.* (deafness, etc.); *Coccul.* (weak from talking); *Conium*, ‖*Cuprum* (epilepsy); *Fil. mas.* (tapeworm); *Fluor. ac.* (nævus); *Jodum, Ignat.* (childs chews and swallows in sleep); ‖*Ipec.* (diarrhœa, cholera infantum); *Kali carb.*, ‖*Lycop.* (typhus, intertrigo, gout, ophthalmia, gonitis, epilepsy, etc.); *Magnes.*, ‖*Mercur.* (canker sores, quinsy, heart, stool, sweat particularly on chest, with old people, etc.); *Mezer., Nitr. ac.*, ‖*Nux vom.* (headache, spasm of eyelid); ‖*Phosphor.* (burning in vertex); *Pulsat.* (sleepless, restless after scarlatina); *Rhus tox.* (rheumatism, ophthalmia); *Sacch. alb.* (swollen mesenteric glands); *Secale* (menses); *Scpia* (convalescence from yellow fever); ‖*Silica* (desire to be mesmerized, nævus, swollen mesenteric glands); ‖*Sulphur* (epilepsy, intertrigo, gleet, etc.);

Digitized by Google

Teucrium (polypus); *Veratr.* (weak from talking); *Zincum* (scarlatina).

General remarks: acts a long time; with children, when indicated, may be often repeated; with aged people, however, it should not be repeated, for if given to them a second time, especially if the first dose benefited, it will usually do harm; when the remedy does not otherwise act, put it in child's milk, if bottle-fed.

CALCAREA PHOSPHORICA.

The Phosphate of Calcium.

This salt of lime was prepared and proved as follows:

1. Pyrophosphoric acid in the vitreous state dissolved in distilled water by drops in lime water until the water acted neutral, the gelatinous deposit dried with filtering paper. Proved in 3d and 30th. Contains several combinations of *Phosph. ac.* and *Calcarea.*

2. Freitag: Calcined bones powdered in diluted sulphuric acid dissolved till saturated, filtered, precipitated by carbonate of ammonia, washed with water. Proved by the Allentown Academy in 3d and 30th. Contains a potency of sulphate of ammonia.

3. Lappe: Pure phosphoric acid prepared from bones, saturated with ammonia till it commences to act on reddened litmus. Standing for several days, it forms a sediment of alumina, ferrum, calcarea, or all that may be contained in it; it is then filtered, diluted and a solution of calc. mur. added, which is discontinued before it ceases to precipitate; it is then washed, filtered, and after drying slightly heated in a platina crucible to drive off the last remains of amm. mur.

This was potentized by Lappe and Jenichen, and proved by Schreter.

4. Beneke: Phosphate of soda and muriate of lime; the precipitate washed. Contains potencies of natr. mur.

5. Gruner separated a neutral combination by adding to one part calc. acetica one and a half of natr. phosph., washing it well. This never will remove all the acetate of sodium.

6. Cate: Five parts of calcined ox bones, finely powdered, well mixed with six parts of oxalic acid and twenty to thirty of distilled water. After standing, filtered to separate the oxalate of lime. The phosphoric acid decanted and bicarbonate of soda added till acid reaction ceased. Evaporated till phosphate of soda crystallized; a clear solution of pulverized oyster shells in boiling acetic acid till neutral, evaporated and crystallized. Each of the two separately dissolved and solutions mixed, washed or dried. Some acetate of sodium will remain. The same as Gruner's.

In 1833 Calcarea phosphorica mixta cured the broken femur of an old man.

Digitized by Google

In 1834 provings of this preparation by Gideon Humphreys, Green, Bute and others, published in Correspondenzblatt, Jahr, etc.

In 1835 provings in Allentown of Freitag's preparation.

In 1846 Schreter's provings of Jenichen [2c] published in Archiv, 23.

In 1850 Beneke's experiments. See British Quarterly, xvii, 41, 637.

In 1858 Cate in Transactions of the American Institute, 15th meeting, in Brooklyn.

[1] **Mind.** ‖A lack of definiteness or total loss of memory.
‖Forgetfulness, forgets what he has done a short while ago.
‖Writes wrong words, or same words twice.
‖Dulness: with every headache; < from bodily exertion; > from cold washing; from mental occupation.
Obtuse intellect; difficulty in performing intellectual operations; cannot clearly distinguish.
Stupidity; indifference; cretinism.
‖Likes to be alone.
‖‖She wishes to be at home, and, when at home, to go out; goes from place to place.
Involuntary sighing.
‖Often screaming and grasping with hands; cold sweat in face, body cold; children with open fontanelles.
Does not want to do what he has to do.
Feels as if she had been frightened.
Anxiousness with other complaints.
‖Anxiety of children: in pit of stomach; with bellyache; with chest complaints; with palpitation.
‖Peevish and fretful children. θCholera infantum.
‖Inclined to indignation and anger.
‖Feel complaints more when thinking about them.
Unpleasant news brings him beside himself; sweat breaks out.
‖Ailments from grief, disappointed love.
After vexation depressed; cannot work, walks as if lame; looseness of bowels.

[2] **Sensorium.** Feeling of fulness and confusion, or a dulness accompanying headache.
‖Vertigo: on motion; when getting up, or rising from sitting; when walking in open air; < in windy weather; with costiveness of old people; dull headache, nausea, complaints of eyes, neck, aching limbs; with whites before catamenia.
‖Old people stagger when getting up from sitting.

[3] **Inner Head.** ‖Fulness and pressure in head, < from pressure of hat.
‖Pressure above eyes and towards them.
‖Headache over forehead, with tearing pains in arms and hands, most in wrists and r. middle finger.

Digitized by Google

Headache on vertex and behind ears, with a drawing in muscles of neck, to nape and occiput.
Heat in head; burning on top, running down to toes.
Headache, throbbing through both sides, most after quick motion.
Aching, drawing pains around lateral protuberances of occiput.
Dulness with every headache; > from cold washing and mental occupation; < from bodily exertion.
Headache: with gastric symptoms, with uterine complaints, or following other sensations; in peevish and fretful children; < from change of weather, extending from forehead to nose, or from temples to jaw, with some rheumatic feelings from clavicles to wrists; < when thinking about it, and in morning; > from cold washing and mental occupation.
Headache of schoolgirls, with diarrhœa.
Rheumatic headache; < at night.
Hyperæmia of brain.
Acute and chronic hydrocephalus and hydrocephaloid. θCholera infantum.
Hydrocephalus congenitus.
Sensation as if brain was pressed against skull. θFungus of cranium.
Meningitis involving bony structure of spine.
Idiopathic fungus of dura mater.
Stupid look, taking no interest in anything, keeps eyes shut, always < in wane of day, great inclination for salt meat or potatoes; fontanelles too much open. θIncipient hydrocephalus.
Chronic hydrocephalus.
Brain fag.

Outer Head. Headache; head feels and is cold to touch.
Sore pain, drawing, rending, tearing in bones of skull, most along sutures of skull, particularly between frontal and parietal bones, or around temporal bones.
Crawls run over top of head; as if ice was lying on upper occiput.
Head is hot, with smarting of roots of hair.
Affections of bony structure of skull.
Skull very soft and thin, crackling like paper when pressed upon. θCholera infantum.
☞ Fontanelles remain open too long, or close and reopen.
Nonunion of bones in fracture of skull, particularly in the aged.
Depression on occipital bone. θSanguineous occipital tumor.

Digitized by Google

: Cranio tabes.
‖ Encephalocele.
‖ Cannot hold head up; moves it from place to place; head totters.
‖ Tied feeling or tension in scalp of forehead.
‖ Itching black scurfs; poor crop of hair, or losing hair.
‖ Scalp sore, hurts; creeping, numbness, or cold crawls, coldness on occiput.
‖ Impetigo on scalp.
‖ Scrofulous ulcers on top of head.

Sight and Eyes. ‖ Light, particularly candle or gaslight, hurts eyes.
‖ Letters change into little black points, or small round grey spots, or as if a little bird was flying from l. to right.
‖ Shimmering, glittering, fiery circles; dreams of fire.
‖ Veil over eyes; eyes misty. θ Amaurosis and cataract.
‖ Eyeballs hurt; aching as if beaten.
‖ Cool feeling towards or back of eyes.
‖ Sensation in eye, as if something was in it; renewed if others talk about it.
Squinting distortion of eyeballs, as if it was from pressure; eyeballs seem distended, they protrude somewhat.
Eyes red, capillary vessels visible in streaks from corners to cornea.
‖ Conjunctivitis. θ Dentition.
‖ Ulcers and spots on cornea.
‖ Left eye much inflamed, cornea hazy, particularly upper portion, and traversed by red vessels; photophobia. θ Keratitis after variola.
Eyes water, most with gaping.
Furuncle between r. eyebrow and upper lid, eye inflamed, lids falling or closed, most in morning.
Hot feeling in lids.
Sweat of brows and lids.
: Spasm of eyelids.

Hearing and Ears. Singing and other noises, most in r. ear.
‖ Difficult hearing.
Earache, tearing, shooting, jerking pain; alternating or associated with rheumatic complaints.
‖ Excoriating discharge from ears.
Heat of inner and outer ear.
Burning itching of outer ear in warm room.
‖ Outer ears cold; cold and aching, or hot and aching.
‖ Cold feeling or coldness of ears, followed by throbbing, heat and hard hearing.
‖ Ears cold; point of nose cold.
‖ Pimples on ears.

Digitized by Google

Soreness in and around ears.
Inner and outer ear swollen, red, sore, itching and hot.
Aching, pressing, tearing, rending in and around ears; most behind or below.
Burning pain on a small spot over r. ear, highly sensitive to slightest touch.
‖All bones around ears ache and hurt; shooting outward.
‖Pain in processus zygomaticus.
Aching, sore pain in region of parotid glands.
Large ulcers above or around ears and in region of parotid glands.

[7] **Smell and Nose.** Tickling in nose and sneezing.
‖Streaks of blood; nose bleeding in afternoon.
Biting stinging in front corner of l. nostril, later r. nostril; sneezing and running of tears.
‖Sneezing and soreness on edges of alæ, fluent coryza, in forenoon.
‖Coryza: fluent in a cold room; stopped in warm air and out-doors.
‖Chronic catarrh, with scrofulous children.
: Ozæna scrofulosa.
‖Large pedunculated nasal polypi.
‖Swollen nose with sore nostrils, small abscesses, ulcers, in scrofulous children.
‖Point of nose: icy cold; itching.

[8] **Upper Face.** ‖Faceache (neuralgic rheumatic) < at night.
‖Pain in face, particularly in upper jaw bone, from right to left; extends from other parts to face, or from face to other parts.
‖Face: pale; sallow; yellowish; earthy; full of pimples.
‖Complexion dirty white or brownish. θCholera infantum.
‖Heat in face: in evening; with chill or other complaints.
‖Cold sweat on face; body cold.
‖Coppery face, full of pimples.
πWarts on mouth.

[9] **Lower Face.** ‖Swollen upper lip; painful, hard and burning.
πSwelling of submaxillary glands with soreness.

[10] **Teeth and Gums.** ‖Teeth sensitive to chewing.
‖Pain in eye and stomach teeth.
Shooting in molars; all hollow teeth cannot bear air.
Toothache, with tearing, boring pain at night; < from warm and cold things.
‖Too rapid decay of teeth.
‖‖Slowness in teething; also in closing of fontanelles; complaints during teething.
‖Slow dentition, with cold tumors and emaciation.
: Convulsions without fever during dentition.

Digitized by Google

[11] **Taste and Tongue.** Foul taste and smell.
Flabby sweetish taste.
‖Disgusting taste when getting awake; < when hawking.
‖Bitter taste: in morning, with headache; particularly of wheat bread; at setting in of catamenia.
‖Tip of tongue sore, burning, little blisters on it.
‖Tongue swollen, numb, stiff; with pimples.
‖Tongue white furred at root, most in morning.

[12] **Inner Mouth.** ‖A sore spot inside of r. cheek.
Dryness of mouth and tongue, into choanæ; with or without thirst.
‖Running of saliva with fluent coryza.

[13] **Throat.** ‖Sensation of weakness or emptiness in fauces and throat.
‖Fauces and uvula red and swollen; warm drink does not hurt.
‖Sore aching in throat; < when swallowing.
It hurts to swallow saliva, not food.
‖When swallowing, pain in tongue, fauces, pharynx, chest and pit of stomach.
Dryness in throat at night.
‖Sore throat: with tickling cough in evening; < after going to bed; with fluent coryza.
Pains and burning from other parts towards throat.
Hawking up phlegm late in evening, at night and in morning, with gagging.
‖Diphtheria; first to reduce fever and limit inflammation of throat.
‖Chronic swelling of tonsils.
‖Chronic enlargement of tonsils in strumous subjects.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Unusual hunger at 4 P.M.
No appetite from noon to noon, but thinking about it, she wants to eat.
Complete want of appetite before or during catamenia.
Much thirst, with dry mouth and tongue, during after-part of day.
‖Infants want to nurse all the time.

[15] **Eating and Drinking.** ‖Eating ice-cream in evening gives him colic, and he has to vomit next morning.
Juicy fruit or cider causes diarrhœa.
‖‖At every attempt to eat, bellyache.
After breakfast belching, hawking, gagging, nausea.
With his dinner vertigo and loss of memory.
‖After meals, more after dinner, headache or drowsiness, weariness, itching, dull pain in stomach, with soreness when pressing on it; heartburn and other gastric symptoms.

Digitized by Google

After supper pressure in rectum with a stool, first part hard, the last thin.
!After drinking cold water, cutting in belly.

[16] **Hiccough, Belching, Nausea and Vomiting.** !Sour belching and gulping up.
Belching all forenoon, with qualmishness.
!After belching, burning in epigastrium.
Heartburn one to two hours after dinner.
!Nausea from smoking, or after drinking coffee.
!Nausea, rising from pit of stomach when moving, > during rest, followed by headache and lassitude.
!Vomiturition from hawking phlegm.
!Vomiting, with trembling of hands.
!Children vomit often and easily.

[17] **Scrobiculum and Stomach.** !Empty sinking sensation at epigastrium.
!Indescribable uneasiness in region of stomach.
!Stomach feels expanded.
!Flabbiness or a kind of relaxation of stomach. Compare 13.
!Pressure in stomach; > when she rests.
!Burning at stomach, and rising of water into mouth.
!Sharp cutting or cramplike pain in stomach, with headache.
!Violent pain in stomach, with great debility, headache and diarrhœa; pain is excited by introducing least morsel of food into stomach.

[18] **Hypochondria.** !Hardness, soreness and pressure in r. side.
!Throbbing in r. hypochondrium; > after belching or passing wind.
!Stitches shooting in region of liver when taking a deep breath.
!Pressure and soreness in l. side.
!After liver complaints, dropsy.
Sharp pain in region of spleen.

[19] **Abdomen.** !Empty sinking sensation around navel, or in whole belly.
!Burning in epigastrium, in region of navel, in whole abdomen, rising up into chest and throat.
!Aching soreness and pain around navel; > after fetid wind passes off.
!Oozing of a bloody fluid from navel of infants.
Severe pain in region of transverse colon at 3 P.M.
Pinching, shooting, stitches, running, kicking, moving in l. side of belly.
!Cutting, pinching, sharp colic, followed by diarrhœa.
!Bellyache > after passing wind, after stool or after leucorrhœa.

Digitized by Google

Abdominal pains, with headache, earache, hot face; pain in groins, looseness of bowels, weary legs, crawls; or in alternation with headache, burning in throat, uterine pains, lassitude.
Motion in belly as of something alive.
Incipient mesenteric tabes, with much diarrhœa, fetid, sometimes lienteric stools.
Abdominal wall: tingling, numb; quivering, or aching.
Aching soreness, cutting, drawing in l. groin, later in right.
Warm feeling in groins, burning, aching pain.
: Abdominal herniæ, in anæmic patients.

[20] **Stool and Rectum.** Offensive flatus.
Juicy fruit or cider causes diarrhœa.
Diarrhœa after vexation, with headache of schoolgirls; with flatulence; offensive pus with stools.
Diarrhœa, with much flatulence, during dentition. θCholera infantum.
Daily watery, very hot stools.
Stools: green and loose, sometimes slimy, with children; soft, passed with difficulty; hot and watery; white and mushy.
Stools, in which there were many small white points or flakes, like pus, scarcely perceptible.
Mornings copious soft stool; renewed urgency directly on wiping, after which a little more was evacuated.
Very offensive diarrhœa.
Hard stool, with depression of mind; with old people, causing vertigo and headache.
Hard stools with much blood.
After stool buzzing in ears; weak feeling in male sexual parts.
Bleeding after stool, or with a soft stool followed by slime; protrusion of piles.
Watery looseness day and night, with an urging for stool every 15 minutes.
Heaviness and urging with costiveness or after looseness.
: Removes the disposition to intestinal worms in anæmic or weakly patients.
Protruding piles aching, itching and sore; oozing of a yellow fluid, and bleeding.
Single stitches in rectum towards anus, or shooting in anus.
Warmth, burning, pulsating in anus; bearing down towards anus.
Sore feeling in anus when getting up in morning.
Itching in anus, most in evening.
Small furuncle near anus to r. with much pain; cannot

Digitized by Google

sit; has to stand or lie on l. side; discharges bloody pus and there remains a painless fistula. (Two provers.)
‖Fistula ani alternating with chest symptoms.
Fistula ani, in persons who have pains in joints with every spell of cold, stormy weather.
Fissures of anus, in tall slim, light complexioned children who form bone and teeth slowly.

[21] **Urinary Organs.** ⁝Dropsy, after kidney disease.
‖Violent pain in region of kidneys, when lifting, or when blowing nose.
‖A painful sensation in neck of bladder, like that when having the stream suddenly stopped.
Sore aching in bladder; < after making water.
Pressing pain most on r. side of bladder.
‖Shooting in mouth of bladder.
‖Violent pain in bladder and all neighboring parts (prostata) with a weak stream of water.
‖Cutting pains in urethra.
‖Frequent urging to urinate.
‖Frequent quantities of urine, with a sensation of weakness.
Before urinating: cutting in bladder; pressing down; cutting in urethra.
While urinating: drawing in female bladder upward; burning and hardness in male urethra.
After urinating: cutting and burning in male urethra; pressing and cutting in female bladder, deep into l.; relaxation and weakness of male organs.
‖In diabetes mellitus where lungs were implicated; of very great service not only to lungs but also in diminishing quantity of urine and lowering its specific gravity.
A pressure in abdomen, with difficulty in preventing escape of urine.
⁝Wetting bed, with general debility.
‖Dark urine; warmer than usual and of a penetrating odor.
Diaper reddish-yellow.
Increase of urine, with flocculent sediment.
⁝Bright's disease of kidneys, if indicated by concomitant symptoms.

[22] **Male Sexual Organs.** Sexual desire increased with some; with others decreased.
Erection painful, with burning in urethra, and a tension in penis, in evening.
‖Erection while riding in a carriage, without desire.
π One or two emissions three nights in succession put him completely out of humor and prostrated him.
Shooting in root of penis and bladder.

Digitized by Google

‖Shooting through perineum and into penis.
‖Itching of scrotum; sweating; soreness; pimples.
‖Scrotum sore, oozing of a fluid.
‖Swelling of testicles.
; Hydrocele.
‖‖Chronic gonorrhœa, in anæmic subjects.

[21] **Female Sexual Organs.** Nymphomania; all organs in erection, with insatiable desire, particularly before catamenia.
‖Voluptuous feeling as if all female parts were filling up with blood; she feels pulse in all parts, with increased sexual desire.
Clitoris erect after urination, with sexual desire.
‖Aching in uterus, in morning.
Pressing in uterus, increased sexual desire, aching in neck of bladder, prostration.
‖Weakness and distress in region of uterus; < during passage of stool and urine.
Cutting pain in uterus through to sacrum.
‖Prolapsus < during stool, micturition or menses.
; Prolapsus in debilitated persons.
‖Uterine displacement combined with rheumatic pains.
‖Cervix and os swollen, red and painful; (even after maltreatment with "caustic"), shotlike bunches to digital touch; visible under mucous surface as bright red spots. θUterine disease.
‖Uterine polypus.
Pressing, drawing and sore feeling as if catamenia should appear; soreness, aching, pressure in uterus and vagina; in loins, flushes of heat; fatigued from going up-stairs; pain from r. groin into l. hip.
Less catamenia, more whites like white of eggs, day and night, < in morning, after rising, of a sweetish odor; increased with stool, white and of a bad odor.
‖Menses: too early, blood bright, with girls; too late, blood dark, or first bright, then dark with women.
‖‖Catamenial blood dark, especially with rheumatic patients.
Menses every two weeks, black and clotted.
‖Labor-like pains before and during catamenia.
Before catamenia: great sexual desire, followed by a copious flow; headache three to seven days before; griping and rumbling in bowels; stitching pain in l. side of head; whites with sleepiness during day.
During catamenia: vertigo and throbbing in forehead; blood rushes to head; throbbing headache increasing after; over os pubis pressure; want of appetite, belly-ache and diarrhœa, backache, shooting, lower limbs

Digitized by Google

heavy, weary, overfatigued, going up-stairs feels stiff all over.

After catamenia: throbbing headache increases; want of appetite; backache and aching in lower limbs; whites.

Menorrhagia: menses every two weeks, black and clotted; before their appearance griping rumbling in bowels and leucorrhœa; stitching pain in l. side of head; sleepiness during day.

Leucorrhœa like white of egg, day and night.

Creamlike whites pass from her in afternoon, unconsciously.

Whites for two weeks after catamenia, or from one term to another.

Leucorrhœa: increases in ratio that menses decrease; pain and pressure in genitals; every cold causes rheumatic pains; acne, full of yellow pus; dirty complexion; mental anxiety; fault finding; flatulency; hemorrhoids oozing a watery fluid; fistula in ano; burning in epigastrium; weak, sinking feeling in abdomen; useful for young ladies who have been crossed in love.

Tearing from r. side of navel, more upward than downward, with anxiety of mind; was gone as soon as leucorrhœa appeared.

Burning in vagina, with pain on both sides of bladder or uterus; burning like fire up into chest.

Pains from navel and other parts drawing to vagina.

Sore aching, warm feeling between external labia, stitching pain in inner labia.

Pain in vagina, with flushes and faintness.

Aching in vagina after nosebleeding.

Swelling of external parts and vagina, when awaking.

Throbbing, stinging, tickling, sore aching or pressing in genitals, drawing upward in symphysis, downward in thighs.

Drawing pain from r. to l. over pubes, with discharge of some blood; followed by earache, first left then right.

Over mons veneris a pressure upward, throbbing or other sensations.

" **Pregnancy. Parturition. Lactation.** Complained as in first period of pregnancy, a drawing aching in region of navel, extending to sacral region, < in forenoon; heartburn up into throat, soreness in r. groin, and a kicking quivering over os pubis.

Weariness in all limbs during pregnancy.

Milk changeable, from alkaline to neutral, or to acid; watery and thin.

Mammæ sore to touch, feel as if larger, as during last half of pregnancy.

Digitized by Google

Pains and burning in mammæ.
Nipples aching; sore.
Child refuses breast, milk has a saltish taste; trying it, taste remains long in mouth.
During pregnancy: to prevent recurrence of hydrocephalus in future children.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness and cough, day and night.
Hoarse, sore throat and hacking cough, in morning.
Chronic catarrh, with anæmia.
Catarrhs in scrofulous or gouty constitutions.
Burning in larynx after same feeling on back part of tongue.
Must hawk or hem to clear voice; when they talk they constantly hem or hawk.

[26] **Respiration.** Breathing more frequent, short and difficult.
With inhalation: shooting in l. breast and r. temple; sudden jerking pain in back.
Short breath and cough.
Involuntary sighing.
Desire to take a deep breath, to sigh; with it a pain in chest, shooting in liver.
Contraction of chest and difficult breathing; evening till 10 P.M., > on lying down, < getting up.
Suffocating attacks of a male child of 6 months, after nursing, more often after crying and after being taken out of cradle; breathing ceases, head turns backward, face blue, fighting with hands and feet; after attacks greatly relaxed; some days none, some days several attacks.

[27] **Cough.** Pain on a small spot, from coughing, with short breath.
Dry cough with hoarseness, soreness and dryness in throat.
Cough: with yellow expectoration, more in morning; with fever, dryness and thirst; from 6 A.M. to 6 P.M.; during difficult dentition.
With cough, stitches in chest, heat on lower part of chest and upper arm.
Cough with soreness and dryness in throat in the tuberculous.
Chronic cough of consumptives, who suffer with cold extremities.
Whooping cough, in obstinate cases.

[28] **Inner Chest and Lungs.** Burning sensation in chest, from below up into throat; sometimes downward.
Pressing ache in chest, most below and extending upward.
Sharp pain in region of sixth rib, first on r. side, later on

Digitized by Google

l. fourth and fifth ribs, coming and going, takes breath away, most with a deep breath; during day.
Shooting pain in l. chest; going through to shoulder.
Stitch in l. side while breathing.
Beating in a small spot on l. side.
‖A most obstinate pain in lower part of l. lung and in l. hypochondrium. θUterine disease.
‖Sharp pain like an instrument passing through end of breast bone; during day.
‖Contraction of chest and difficult breathing, evening till 10 P.M.; > lying down, < when getting up.
‖Dull aching in chest, with soreness to touch.
‖Phlegm rattling on chest, also during difficult teething.
‖Incipient phthisis in anæmic patients.
‖Profuse sweat in phthisis; cold extremities.

[29] **Heart, Pulse and Circulation.** ‖Sharp cutting, shooting in region of heart, interrupts breathing.
‖Palpitation with anxiety, followed by a trembling weakness, particularly of calves.
: After heart disease, dropsy.
‖Feels beating of pulse, not frequent but quick; while sitting, feels it in nape of neck and l. chest.

[30] **Outer Chest.** Burning in pit of throat.
‖Clavicles sore, first left, then right.
‖Tearing, pressing and shooting in sternum.
‖Sore pain on sternum.
‖Ulcer over sternum or clavicle.
Pains where cartilages and ribs meet.
Painless gnawing with quivering, jerking and heat; is full of fear.
A tumor like a walnut in l. male mamma, hurts when pressed.

[31] **Neck and Back.** Over clavicle soreness and cutting; pains in neck, soreness; glands hurt.
‖Rheumatic pain and stiffness of neck, with dulness of head; from slight draught of air.
Pain on sides of throat, aching on pressure, up to ear, or from ear to shoulder; < when turning neck, also when swallowing.
Muscles of neck hurt up to occiput, first r. then left.
‖Cramplike pain in neck, first one side, then the other.
Malignant tumors on neck.
Drawing in back and limbs, with gaping, stretching, bending backward; < evening and morning, on getting awake and on moving about.
Pains and aches in and near, between and mostly below shoulder blades; throbbing, pulsating, jerking.
‖Pain in back. θUterine disease.

Google

Violent pain in small of back, when making least bodily effort; sometimes obliging him to scream.
In region of kidneys violent pain, when lifting or when blowing nose; pain in back, jerking, rending, cutting, shooting.
Abscess near lumbar vertebræ.
Numbness and lameness in sacrum.
Sharp sacral pains.
Violent stitch on a small spot between l. ilium and sacrum, with slightest motion; has to lie on same spot without moving.
Soreness in sacro-iliac symphysis, as if separated.
Pain and aching, soreness, pressure, tearing and shooting in os coccygis.
Crick in back, and lumbago.
Curvature of spine to l. (scoliosis sinistra), lumbar vertebræ bend forward.
Spina bifida.

Upper Limbs. Pain and aching in shoulders and shoulder-blades.
Sore aching, bruised pains in shoulder or down arm.
Shooting and tearing from shoulder joint along whole arm.
Soreness, burning and itching under arms.
Hard bluish lumps under arm; oozing and scabbing after checked itch; much relieved; *Sulphur* finished cure.
Rheumatic pain in upper arm near shoulder joint; cannot lift arm.
Lameness of arms, they "fall asleep."
Trembling in arms and hands.
Dull pain in arms, first l., then r.; from shoulder to fingers; from clavicle down to wrist; < from change of weather
Sensation in elbows as if joint had been struck.
Through elbows shooting, usually first l., then right.
Cramplike pain in forearm, sore, bruised feeling; tearing.
Pimples on inner side of forearm.
Pain in r. wrist, with lameness as if beaten; cramplike and other pain, when moving or using it.
Hands "asleep," or numb.
Pimples on back of hand and on wrist.
All bones of arms ache, particularly thumb.
In r. thumb, joints as if luxated or sprained.
Pain in single fingers.
Tips of thumb and fingers sore.
Ulcerative pain in roots of finger nails of r. hand, especially in middle finger.
Gouty nodosities on condyles.

Lower Limbs. Tearing, shooting, drawing in hip bone.

Digitized by Google

Sacro-iliac symphysis as if separated, in walking.
Coxarthrocace, third stage; puts an end to further destruction of bone, suppuration ceases, new bone is formed.
Shooting and stitches from hip bone up or down, most from ischium down, jerking, drawing, with a warm feeling.
Buttocks and back "asleep," with a sensation of uneasiness.
In nates a lameness as if beaten; after a storm all kinds of pain with soreness, most from r. to l., but alternating, most on r. side.
On buttocks stinging in little spots, itching, burning; sore spots oozing, scurfy.
Sharp pain in tendons on inside of thighs, more when walking.
Shooting through l. thigh to knee, or down to ankle bones; toes too thick; heavy load in nape of neck.
Aching and soreness of thighs as if beaten, with aching in sacral bones.
Pains above knee.
Pains in knees < when walking, first l., then right.
Boring in r. knee, < from stretching, most at night.
Knees pain as if sprained, sore, when walking.
Tendons in hollow of knee as if too short.
Chronic swelling of knee.
Hygroma patellæ (housemaid's knee); in anæmic subjects.
Lower limbs, abdomen and sacrum "asleep;" cannot get up from seat.
Legs tired, weak, restless, crawling, tingling.
Lame feeling of lower limbs, tired, heavy.
Lower limbs "fall asleep," with a restless, anxious feeling; has to move them, to jump out of carriage; also at night.
Tearing in l. lower leg from knee down to foot; dry, crusty eruption covers leg.
Pain in bones, particularly shin bones.
Drawing pain in shin bones.
A pain in head of l. tibia, caused by a kick, returned; the spot got so sore that he could not bear it to be touched; it disturbed sleep, coming on every night; gradually an exostosis was formed and remained.
Violent pain below hollow of knee; < when taking off boots.
Cramp in calves; on a small spot inside, when walking.
Crampy pain in calves; drawing, rending, shooting, warm feeling.
Rending, tearing, shooting in ankle joint.
Ulcers on malleolus dexter, edges callous, ichor putrid.

Digitized by Google

‖Fistulous ulcers on ankle joint.
Cramplike pains in feet, most in ankle joint.
‖Ankle joint feels as if dislocated.
Sore pain and aching in heel.
‖Caries of heel.
Stinging in middle of soles; shooting in soles and in balls of toes.
Pains in big toe, like a cramp, or aching in region of root of nail, first r. then left.
‖Gouty pain in big toe.
Jerking twitching of r. big toe towards left.
Stinging and shooting in toes.

[34] **Limbs in General.** ‖Extensors more affected than flexors.
‖Feeling of lameness of flexors and sudden aching of extensors.
‖Pain in all joints, most l. side.
‖Aching in limbs, with weariness.
‖Rheumatic pains flying about.
‖Every cold causes rheumatic pains in joints and in various parts of body. θUterine displacement.
‖Inflammatory rheumatism.
‖Pains flying about in all parts of rump and limbs after getting wet in rain.
‖‖Rheumatism, pertaining particularly to cold weather, getting well in Spring and returning next Autumn.

[35] **Rest. Position. Motion.** Rest: nausea >; pressure in stomach >.
Lying: on back, restless; > on side; > headache, pain in stomach, belly and breathing.
Sitting: stagger on getting up; feels beating of pulse in nape of neck and l. chest.
Stooping: vertigo; rush of blood to head; dull pain in head.
On motion: vertigo; aching in back and lower limbs >.
Moving: < nausea.
Quick motion: throbbing headache.
Painful symptoms brought on by moderate motions of single limbs, > after lying down.
Exertion: < headache.
Pains after great exertion; < when lying down.
Walking: vertigo; running coryza; cramp in calves; sharp pains in tendons on inside of thighs; pain in knees, first l. then right.
Going up-stairs: weariness.
Rising: vertigo.

[36] **Nerves.** After unpleasant news, numbness.
Stiff in bed in morning; can hardly turn.
‖Disposition to stretch.

Digitized by Google

‖Weariness, < going up-stairs; wants to sit down, shuns getting up.
‖Indisposition to work, mental or physical.
‖Weakness, with other symptoms.
‖Lower limbs, abdomen and sacrum "asleep;" cannot get up from seat.
‖Languor with diarrhœa, leucorrhœa, catamenia and during pregnancy.
‖Child will not stand any more, and loses flesh.
‖Children do not learn to walk, or lose the ability.
‖Trembling of hands, with headache, pain in chest, belly-ache.
‖Trembling of arms and hands, with other complaints, particularly uterine.
Trembling feeling; with toothache and uterine pains.
‖Hands tremble; she is sick, heart palpitates, fears bad news, afterwards weak.
Thumbs moved spasmodically.
Big toes twitching, little toes drawn inward.
Starting in sleep.
Restlessness; spasmodic motion of limbs; < when lying on back; > lying on side.
‖Child: convulsive starts, lies on its back.
Stepping motion of lower limbs.
πViolent screaming, grasping with hands in great agony towards its mother, cold sweat most in face, whole body cold.
‖Attacks of spasms going through body like an electric shock, so that she falls down; they last about a minute and, except being a little weak, she felt well; has about thirty attacks daily.
‖A girl, æt. 18; suppressed menses from bathing, followed by epileptic spasms with opisthotonos and unconsciousness.
‖Epileptic attacks in a young lady of 18, which had existed since she was a child six months old; attacks occurred every three months; spasms all clonic and on l. side, with diarrhœa and loss of consciousness; she falls forward on the face and sleeps afterwards; sometimes she has a second attack the same day; they frequently occur after eating.
⁞Epilepsy; suitable for young persons whose bodies are in progress of development, and for scrofulous subjects.
⁞Rheumatic paralysis.
⁞Great debility with enuresis.
‖Useful after weakening acute diseases (*Psorin.* if there are copious sweats).

[37] **Sleep.** ‖Constant stretching and yawning.

Digitized by Google

Gaping with tears in eyes.
‖Gaping and irresistible drowsiness all forenoon, before and at dinner.
‖Drowsy all day and evening.
With drowsiness gloomy mood, inability to think, headache, singing in ears, sweat in face, prostration of limbs.
‖Sleep disturbed, most before midnight.
‖Dreams: very vivid, most of late events or last readings; of traveling.
In sleep, starting as from fright.
In bed, pains in bones or joints, etc.
Sweat on parts wakens in night.
‖‖Cannot get awake in early morning.
Complaints in morning: pain in head, heart, back; bad taste, as if she had been sick.
‖Children cry out in sleep.

[35] **Time.** Night: headache <; faceache <; hawking of phlegm; boring in knee.
Midnight: before, sleep disturbed.
Morning: headache <; eyelids falling or closed; bitter taste; tongue white furred on root; hawking of phlegm; copious soft stool; sore feeling in anus; aching in uterus; catamenia >; hoarse, sore throat and hacking cough; yellow expectoration; drawing in back and limbs; stiff in bed; cannot awake early; complaints, head, heart, back; chill after dressing; copious night sweats, towards morning.
Forenoon: coryza; drawing aching in region of navel; gaping, irresistible drowsiness.
Day and evening: drowsy.
6 A.M. to 6 P.M.: dryness and thirst during difficult dentition.
3 P.M.: severe pain in region of transverse colon.
4 P.M.: unusual hunger.
Afternoon: nose bleeding; creamlike whites pass unconsciously.
Evening: heat in face; sore throat, with tickling; hawking of phlegm; colic; < drawing in back and limbs: dry heat.
Wane of day: worse; much thirst, dry mouth and tongue.

[36] **Temperature and Weather.** Warm room: burning itching; fluent coryza; warm things < toothache.
Open air: walking in, headache, vertigo, fluent coryza; hoarseness; cough; on watery days nose stopped; carious teeth <; chill.
‖A slight draught is followed by rheumatic pain in neck, stiffness and dulness in head.

Digitized by Google

Cold room: fluent coryza.
Cold liquids: toothache.
‖Every cold causes pains in joints and sutures.
From cold washing: headache >.
After a cold footbath gets red, with pricking like nettles.
Change of weather: headache; tearing in forehead to nose and temples, from occiput to vertex, with earache; dull pains in arms, from clavicles down to wrist.
Worse in changeable weather, particularly when snow melts and in East winds.
Windy weather: vertigo <.
Day after a snowstorm, buttocks as if beaten, with lameness.
In damp, rainy, cold weather dull pain in lower limbs.

[40] **Fever.** ‖Shaking chill, out-doors.
‖Frequent creeping shiverings, with motion of scrotum, not like that after urinating.
Frequent crawls all over; crawls on head.
Chill: in morning after dressing; with cough; with coryza; with uterine pains.
Shivering with a hot face, with bellyache.
‖Cold in lower part of body, face hot.
Feels beating of pulse, not frequent but quick; while sitting he feels it in nape of neck and l. chest.
‖Heat runs from head down to toes.
‖Dry heat in evening, hot breath, beating of heart, mouth and tongue dry without thirst, gaping, stretching, etc.
‖Copious night sweats; on single parts; towards and during morning.
‖Sweat on parts, wakens in night.
‖Profuse sweat in phthisis.
: Chronic intermittent fever, in scrofulous children.

[41] **Attacks, Periodicity.** Every two weeks: catamenia.

[42] **Locality and Direction.** Right: middle finger, tearing pains; eyebrow, furuncle; ear, singing; ear, burning; cheek, sore spot; side, hardness, soreness and pressure; hypochonder, throbbing; pressing pain in bladder; to l. groin, pressing drawing and sore feeling, as if catamenia should appear; tearing in navel; soreness in groin; temple, shooting; sharp pain in region of sixth rib; pain in r. wrist; in thumb as if luxated; ulcerative pain in roots of finger nails; boring in knee.
Left: nostril, biting stinging; side, pressure and soreness; side of belly, pinching, shooting, stitches; running, kicking, moving and stitching pain in head; shooting in breast; shooting in chest; stitches in side while breathing; obstinate pain of lung and hypochondrium; sharp pain in region of fourth and fifth ribs; shooting

Digitized by Google

through thigh to knee or down to ankle bones; tearing in lower leg, from knee down to foot.

Left to right: earache; clavicles sore; dull pain in arms; shooting through elbows; pain in knees.

From right to left: faceache.

First one side, then the other: cramplike pain in neck.

[43] **Sensations.** As if brain was pressed against skull; as if something was in eye; as if joint of elbow had been struck; as if dislocated; as if ice was lying on upper occiput; as if female organs were filling up with blood.

Jerking: earache; pain in back; outer chest; in back; in hip bone; in r. big toe; around shoulder blades.

Beating: in small spot on l. side.

Tearing: pains in hands and arms; in bones of skull; earache; in and around ears; toothache; from r. side of navel; in sternum; in os coccygis; in hip bone; in l. lower leg; ankle joint; < at night and in bad weather; in teeth.

Rending: in bones of skull; in and around ears; pain from knee to foot; in back; in ankle joint; in calves.

Sharp: cutting in stomach; pain in region of spleen; colic; pain through end of breast bone; sacral pains; in region of sixth rib; in tendons of thighs.

Cutting: colic; l. groin; pains in urethra; in bladder; pain in uterus; region of heart; over clavicle; in back; in belly.

Stitches: l. side of head; region of liver; l. side of belly; in anus; pain in inner labia; in chest, l. side; on a small spot between l. ilium and sacrum; in hip bone; in rectum.

Shooting: through l. thigh to knee; ankle joint; in soles and balls of toes; in toes; in sternum; in os coccygis; along whole arm; through elbows; in hip bone; earache; around bones of ears; in molars; region of liver; l. hypochondrium; l. side of belly; in anus; in mouth of bladder; in root of penis and bladder; perineum; l. breast and r. temple; in liver; pain in l. chest; in region of heart; in molars; in calves.

Stinging: in nostrils; in genitals; on buttocks; in middle of soles; in toes.

Boring: toothache; in r. knee; < at night and in bad weather.

Ulcerative pain: in roots of finger nails.

Drawing: pains around lateral protuberances of occiput; in bones of skull; in l. groin; in muscles of neck; in female bladder upward; pain from r. to l. over pubes; in region of navel; in back and limbs; in hip bone; pain in shin bones; upward in symphysis, downward in thighs; in calves.

Digitized by Google

Burning: on top of head; itching of outer ear; pain on a small spot over r. ear; upper lip; tip of tongue; in epigastrium; at stomach; in anus; in male urethra; in vagina; in mammæ; in larynx; in chest; pit of stomach; under arms; on buttocks; in skin; in throat.
Biting: in nostrils; in skin.
Smarting: of roots of hair.
Sore pain: in bones of skull; piles; aching in bladder; aching between external labia; aching in genitals; clavicles; pain in sternum; in heel.
Soreness: of thighs as if beaten; in and around ears; tip of tongue; r. hypochondrium; around navel; of scrotum; in uterus and vagina; in r. groin; over clavicle; in os coccygis; under arms; in sacro-iliac symphysis; of tips of fingers; in knees.
Gouty pain: in big toe.
Aching: in throat; in heel; big toe; of extensors; in limbs; pains around lateral protuberances of occiput; of eyeballs; in and around ears; all bones around ears; region of parotid glands; in throat; around navel; abdominal wall; soreness, l. groin; piles; in uterus; in neck of bladder; in vagina; nipples; in os coccygis; shoulders and shoulder blades; down arms; of thighs as if beaten; in genitals; over mons veneris; near root of big toe nail.
Dull aching: in chest.
Pressure: above eyes and towards them; in and around ears; in rectum; in stomach; r. hypochondrium; l. hypochondrium; pain r. side of bladder; in abdomen; in uterus; in vagina; in genitals; aching, in chest; in sternum; in os coccygis; from shoulder joint along whole arm.
Bruised: pains in shoulder or down arms.
Gnawing: outer chest.
Pinching: l. side of belly; colon.
Griping: in bowels.
Cramplike pains: in neck: in stomach; in forearm; in feet; in ankle joint; in big toe; in wrist; in calves.
Rheumatic pain: in upper arm, near shoulder joint; in head; in face; of neck.
Undefined pain: in processus zygomaticus; in face; around navel; transverse colon; in region of kidneys; neck of bladder, violent, in bladder; in vagina; in mammæ; and aches, in neck, between and mostly below shoulder blades; in l. lung and l. hypochondrium; in back; small of back; in os coccygis; in shoulders and shoulder blades; in r. wrist; above knee; in bones; in shin bones; big toe; in joints; in eye and

stomach teeth; in tongue, fauces, pharynx, chest and pit of stomach; in stomach; in arms.
Anxious feeling: down limbs.
Restless: lower limbs.
Uneasiness: in region of stomach, buttocks and back.
Throbbing: headache; r. hypochondrium; in genitals; between and mostly below shoulder blades; over mons veneris.
Pulsating: in anus; between and mostly below shoulder blades.
Kicking: l. side of belly; over pubis.
Quivering: abdominal wall; over pubis; outer chest.
Twitching: in big toe.
Pressing down: in bladder.
Bearing down: towards anus.
Tension: in scalp of forehead; in penis.
Weakness: in fauces and throat; in bladder; of male organs; in region of uterus.
Sinking: at epigastrium; around navel; in abdomen.
Emptiness: in fauces and throat.
Tickling: in nose, and sneezing; in genitals.
Running: l. side of belly.
Crawling: in legs; with pains, < at night and in bed; over top of head.
Creeping: in occiput.
Tingling: abdominal wall; in legs.
Numbness: on occiput; of hands; of abdominal walls.
Asleep: buttocks and back; lower limbs.
Lameness: of arms, as if beaten.
Shocks like electric sparks.
Warmth: in anus; between external labia; in ischium; in calves.
Heat: in head; in face; on lower part of chest; upper arm.
Hot feeling: in eyelids.
Coldness: on occiput; of ears; in abdomen, with nausea; towards or back of eyes.
Itching: inner and outer ears; point of nose; piles; in anus; of scrotum; under arms; on buttocks; in skin.
Dryness: in throat at night; of mouth and tongue.

" **Tissues.** ‖ Bones affected along sutures or at symphyses.
‖ Non-union of fractured bones.
‖ Curvature of spine to l.; lumbar vertebræ bend forward.
‖ Condyles swollen on forearms and lower limbs.
‖ Abscess near lumbar vertebræ.
‖ Spina bifida.
‖ Large pedunculated nasal polypi; polypi of rectum and uterus.
‖ Incipient mesenteric tabes, with much diarrhœa, fetid, sometimes lienteric.

Digitized by Google

‖‖Rachitis; fontanelles wide open; diarrhœa, emaciation.
‖Rheumatic pains in joints and various parts of body.
‖Soreness of tendons when flexing or extending.
‖‖Flabby, shrunken, emaciated children.
‖‖Anæmia; true bloodlessness.
‖‖Phosphatic diathesis.
‖Tendency of bones to bend or curve.
; Cancer in scrofulous constitutions.
‖Caries of hip joint and heel, with stinking pus.
‖Most pains in joints, afterwards in bones.
Sharp pain in tendons.
; A constituent of teeth, bones, connective tissue and blood corpuscles, and to be given in corresponding disturbances; in true chlorosis from anæmia; chronic swelling of glands; chronic articular rheumatism; gout; exostoses, osteophytes and similar new growths on bone; scrofulosis; suppuration of bones and joints; dropsy from loss of blood or of other fluids, or depending on diseases of heart, liver and kidneys.
Malnutrition and defective cell growth.
Anæmia: from growing fast, rapid childbearing, prolonged suckling, or excessive menstruation.
Brain fag and other bad effects of town life.

[45] **Touch. Passive Motion. Injuries.** Riding in a carriage: ears itch; he has a second stool; his foot falls asleep; crawling in sole; erections; buttocks asleep; restlessness in lower legs.
Lifting: child from cradle causes suffocative attacks.
Touch: burning pain on a small spot over r. ear painful to touch; a pain in head of l. tibia so sore, he could not bear it touched.
Pressure: < head, chest, belly and limb symptoms.
Every step is felt in head, or in sacrum.
In fractures to promote formation of callus.
The place of old injury becomes the seat of new affections.

[46] **Skin.** ‖Dry skin, most on hands.
‖Skin dark, brown or yellow.
‖Itching and burning as from nettles.
Itching, biting, most on places years before affected.
‖Tetters on lower legs, peeling off, scaling.
‖Pimples in region of joints.
; Eczema with anæmia; dry crusty affections.
‖Furuncles form ulcers.
‖Fistulous or scrofulous ulcers; slow to heal.
‖Ulceration, after a mustard poultice is allowed to remain too long.*

---

* *Sapo sodæ* relieves the burning.

CALCAREA SULPHURICA.

Calcium sulphate. $Ca\ SO_4$.

1847. Extracts from provings of C. Hg., Withy, and that of a young lady.
1873. Extracts from provings with the 30th and 200th by C. M. Conant (Trans. Am. Inst. of Hom.).
Cured symptoms by C. Hg., Koeck and Knerr.
Symptoms from Schuessler and Old School authorities are marked with ⁝ .
t. stands for toxicological symptoms.

[1] **Mind.** Loss of consciousness; t.
Loses memory and power of thought suddenly, after lunch.
Sometimes a desire to walk, to attend to something; as soon as she sets out to do it the desire is gone.
Awoke screaming.
Great depression at times.
Liveliness and good spirits change to grief and melancholy, afternoon and evening.

[2] **Sensorium.** While walking, dizzy in head and weakness and oppression from head and across stomach.
Vertigo with deathly nausea.

[3] **Inner Head.** Pain in l. forehead and head.
Severe frontal headache, < after dinner and in evening.
Ache across forehead and in vertex.
Pain around head, several times before going to bed.
Tearing around whole head, with nausea, when rising from lying, > while lying.
Headache: from concussion; with feeling as if eyes were sunken; during catamenia; with pain in chest.

[4] **Outer Head.** Sensation around head as if he had his hat on, 4 P.M.
On region of anterior fontanelle two red pimples, and a burning sore feeling on a place as large as a dollar.
Painful pimples on scalp leave a yellow scab.
Hard tender swellings in scalp in edge of hair, bleeding when scratched.
⁝ Crusta lactea or "scald head" of children.
⁝ Cranio tabes.

[5] **Sight and Eyes.** Sees only half an object.
Looking at a piece of paper pains r. eye.
Occasional blindness, with twitching of eyelids.
⁝ Deep ulcers on cornea.
⁝ Ophthalmia, pus thick and yellow.

[5] Cornea smoky, pus in anterior chamber, sensation as from a foreign body; has to tie up eye; after injury to eye from a splinter.
Continued dull pain over r. eye; evening.
Twitching of muscles on supraorbital foramen, near outer corner of l. eye.
Pressing pains in l. eyeball; cutting in l. eye with soreness in evening, as if eyes were sunken in head, with headache.
Protrusion of eyes; t.
Inflammation of eyes, evening and night, with slow fever; sensation of heat, eyes red.
Conjunctiva yellow.
: Eyes bleared, red; with colic.
Tears from l. eye, with left-sided coryza.
Twitching of eyelids.
Smarting in inner canthi.
Severe inflammation in canthi.
Boil over l. eye.

[6] **Hearing and Ears.** Singing in her ears.
Otitis after a slap on ear.
Dark brown earwax from r. ear; A.M.
Pimple on top of r. ear.
Soreness of r. parotid gland; > walking in open air.

[7] **Smell and Nose.** A quivering on root of nose, extending to cheek.
: Nosebleed.
: Coryza, with thick, yellow, lumpy, mattery discharge.
Yellowish mucus from l. nostril and tears from l. eye.
During day r. nostril discharges watery mucus, l. dry; at night vice versa.
Yellowish-green phlegm from posterior nares.
Scanty phlegm, mostly from posterior nares, morning and evening.
Posterior nares closed, watery coryza from anterior.
Influenza and sneezing, > in open air; coryza on r. side after a bath, > out-doors.
Bloodstreaked mucus from l. nostril after a bath.
Excoriating watery coryza in open air, > in-doors and after washing with cold water.
Edges of nostrils slightly sore, excoriated.

[8] **Upper Face.** : Swollen cheek with toothache; if suppuration threatens.
A small swelling on l. inferior maxilla, about lower and middle part of buccinator.
Swollen hard pimple on l. cheek.
Darting pains in r. side of face.
Pain in r. upper jaw.
Flushes of heat.

Digitized by Google

Exceedingly pale, sickly appearance (workers in plaster).
‖Herpetic eruptions on face.
‖Pimples and pustules on face.

[9] **Lower Face.** Blister-like sores on r. lower lip, ulcerate, ooze bloody matter, and extend to r. corner of chin.
Many tender pimples under beard discharge blood or oily transparent matter.
On outer lower lip a raw sore, forming a scab.

[10] **Teeth and Gums.** ⁝Rheumatic toothache.
Pain in r. upper jaw, with swollen and tender gums about a decayed molar.
Toothache: ⁝with swollen cheek; after dark, and in sleep; first < by cold water, soon >.
Right lower molar decayed; is tender and sensitive to cold air, water, etc.
⁝Inside of gums swollen and sore.
Gums bleed while brushing his teeth.

[11] **Taste and Tongue.** Taste: ⁝flabby; soapy; sour acrid; bitter.
At base of tongue slightly puckered sensation.
Tongue coated yellow at base; ⁝resembling a layer of half-dried clay.
Tongue seamed with a deep red line.
Glossitis; ⁝when suppuration begins.

[12] **Inner Mouth.** Inside of upper lip sore.
Dryness of mouth; t.

[13] **Throat.** Soreness, l. side of roof as if burned, while eating.
Pharynx red and sore, tonsils affected.
⁝Diphtheritis of soft palate; fauces are much swollen; also in scarlatina.
⁝Tonsillitis if a discharge of pus is anticipated.

[14] **Appetite, Thirst. Desires, Aversions.** Excessive appetite and thirst.
No appetite for meat.
Great desire for tea, claret, green sour vegetables and fruit.

[15] **Eating and Drinking.** While eating: roof of mouth sore.
After maple sugar, diarrhœa.
After eating: better; lunch, loses memory; dinner, headache.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea: with vertigo; with headache; with pain in pelvis.

[17] **Scrobiculum and Stomach.** ⁝Pain in stomach; motions and burnings; pain extends into liver.

[18] **Hypochondria.** Severe pain in region of liver.

[19] **Abdomen.** Sensation of weakness across stomach, as if from head.
Colic: with rumbling; with diarrhœa; with bleared eyes.
A feeling in lower part of abdomen as if skin was too tight, with pain.

Digitized by Google

Pain in r. side of pelvis, followed by weakness, nausea and pain at stomach.
: Intestinal ulcers, with typhus.
: Buboes: to prevent suppuration.

[20] **Stool and Rectum.** Diarrhœa, with pain in abdomen, from change of weather or after eating maple sugar.
: Diarrhœa: with discharge of pus, or bloody pus; with typhus.
: Dysentery, if passages consist of puslike slime.
! Painful abscesses about anus in cases of fistula.
: Prolapsus ani.
: Costiveness; with hectic fever; with difficult breathing.

[21] **Urinary Organs.** Chronic nephritis.
: Bright's disease, if symptoms correspond.
: Red urine, with hectic fever.

[22] **Male Sexual Organs.** : Spermatorrhœa with impotency.
: Gonorrhœa; in suppurative stage.
: Chronic syphilis.

[23] **Female Sexual Organs.** Menses came later and continued longer; usual symptoms, headache, twitchings, great weakness, etc., were aggravated.

[24] **Pregnancy. Parturition. Lactation.** : Mastitis, when pus begins to form or to prevent suppuration.

[25] **Voice and Larynx. Trachea and Bronchia.** : Croup.
Catarrh, with thick, lumpy, white yellow or puslike secretion.

[26] **Respiration.** Short-breathed, costive and cachectic (workers in plaster of paris).
: Asthma, with hectic fever.
After great dryness of mouth, suffocative attacks with protrusion of eyes, loss of consciousness, and death; t.

[27] **Cough.** : Cough, with hectic fever.
Chronic cough of the tuberculous.

[28] **Inner Chest and Lungs.** Pain in sternum became so much <, she was obliged to double up.
At times a pain across chest.
: Pain in chest, and headache.
: Pneumonia, third stage.
: Empyema; after thoracocentesis.

[29] **Heart, Pulse and Circulation.** Pain from anterior of heart down to lower part of thigh.

[31] **Neck and Back.** Pain across back of her neck.
Pain in lower part of back.
Chronic pain in os coccygis was greatly aggravated.

[32] **Upper Limbs.** ! The third phalanx of index finger had been bruised; had a misformed surface, suppurating, full of granulations, bone was bare, pains very violent.
Fingers are stiff in a dream; stiff and painfully rigid, puffy and stiff, mainly on r. hand, A.M.

Google

Swelling of phalanges of fingers.
Inflammation and swelling of little finger.
; Whitlow, when suppuration begins.

[33] **Lower Limbs.** ; Inflammation of hip joint; in suppurative stage of hip disease.
; Ischias and podagra.
Pain from heart to lower thigh.
Painful rigidity of legs, A.M., especially r.; later, upper part < P.M.; the worst in early evening.
A weakness in her legs.
Weariness in knees after walking.
; Pain in knees from a blow.
; Stitches in knee.
Lameness in inner part of l. knee when in bath, A.M., when stooping or walking fast, later in posterior part.
Legs tender to touch; feet slightly swollen and tender.
A great burning and itching of soles of her feet.
; Burning on soles, with hectic fever.
The basis of fourth l. toe suddenly tender while walking.

[34] **Limbs in General.** ; Pain in joints.

[35] **Rest. Position. Motion.** Better while lying: headache.
Stooping: < lameness in eye.
Obliged to double up to > pain in stomach.
When rising from lying down: headache.
Better walking in open air; improves soreness in parotid gland; desire to walk.
While walking: dizzy; toe tender.
After walking: weariness in knees; walking fast, lameness in knees.

[36] **Nerves.** Twitchings during catamenia.
Great disposition to lie down and stretch out.
Weakness and oppression from head down to stomach.
Weakness during catamenia.
Much exhausted after a dream.
Great lassitude, 2 P.M. till evening.
Weak, languid, no pluck; intolerable lassitude after siesta.
Weariness after pain in pelvis.

[37] **Sleep.** ; Sleepy during day, wakeful at night.
Before going to bed, pain in head.
She dreamed she had a convulsion from fright, awoke screaming and much exhausted.
Internal lassitude after siesta.

[38] **Time.** In morning: lameness of knee, in bath.
2 P.M. till evening: lassitude.
Afternoon and evening: liveliness alternates with melancholy.
4 P.M.: external headache.
Evening: toothache; pain in legs.
Late P.M.: half-sightedness.

Digitized by Google

About 10 P.M.: pain in eye.
Before going to bed: headache.
At night: toothache.

[39] **Temperature and Weather.** : Burns and scalds; when suppuration begins.
: Suppurating chilblains.
Open air: > walking in it; desire to be in it.
Suffered unusually from cold, while taking his usual bath, A.M.
Knee pains in bath.
Sensitive to water, first < then >, toothache.
From change of weather: diarrhœa.
After washing with cold water: coryza.

[40] **Fever.** : Quotidian or tertian fever.
: Intermittent fever; back of tongue has a coating, resembling dry clay.
: Typhus: when diarrhœa sets in; intestinal ulcers.
: Hectic fever: with costiveness and red urine; with asthma, cough and burning in soles of feet.

[42] **Locality and Direction.** Right: over eye dull pain; in eye, pain; soreness of parotid gland; earwax dark; pimple on top of ear; watery mucus from nostril; pain in upper jaw; sores on lip; toothache; pain in pelvis; fingers stiff; rigid legs.
Left: pain in forehead; twitching of muscles about eye; pressing pain in eyeball; cutting in eye; tears from eye; boil over eye; coryza from nostril; swelling on infra maxilla; pimple on cheek; soreness roof of mouth; knee lame; toe tender.
Direction of pain across: in head, stomach, liver, chest and neck.
Above downward: heart to leg.

[43] **Sensations.** As if he had his hat on; as if eyes were sunken: as of a foreign body in eye; as if skin was too tight in lower abdomen.
Cutting: in eye
Darting: in r. side of face.
Stitches: in knee.
Burning: sore feeling on anterior fontanelle; in stomach; of soles of feet.
Rheumatic pain: in teeth.
Pressing pain: in l. eyeball.
Tearing: around head.
Smarting: in inner canthi.
Soreness: of r. parotid; roof of mouth; inside of upper lip.
Aching: across forehead; in vertex.
Dull pain: over r. eye.
Undefined pain: in l. forehead and head; in r. upper jaw;

Digitized by Google

in stomach; in region of liver; in lower abdomen; in r. side of pelvis; in anal abscess; across chest; in chest; from heart to thigh; across back of neck; in lower part of back; in joints; in sternum.
Puckered sensation: at base of tongue.
Weakness: across stomach.
Lameness: in knee.
Itching: of soles of feet.
Dryness: of mouth.

[44] **Tissues.** ; Its sphere of action is in the connective tissue; inflammation with suppuration.
; Arrests hemorrhage and blennorrhœa.
; Abscesses which have their seat in the connectivetissue, if they are the result of stasis in the connective tissue tubuli.
; Serous swellings, post-scarlatinal dropsy, in rare cases.
; Hard or suppurating glands.
; In third stage of inflammation; lumpy or bloody discharge.
; Acute and chronic rheumatism.
; Discharge in cough, leucorrhœa, gonorrhœa, etc., yellow, thick and lumpy, sometimes bloody.
After mechanical injuries, when in neglected cases suppuration has set in.
; Greenish, brownish, yellow crusts.
; Cystic tumors; fibroma; fibrous polypi.

[45] **Touch. Passive Motion. Injuries.** Legs tender to touch; toe tender while walking.
From a blow or concussion: headache; pain in knee.
After a slap on ear: otitis.
After a bruise: suppuration of finger.
After a hurt by a splinter: sore eye.
Cuts and wounds, to control suppuration; thick yellow matter.
Burns and scalds, if suppurating.

[46] **Skin.** Itching on soles.
; Scarlet rash; scarlatina, with excessive swelling of soft palate.
; Suppurating pustules and nodules.
; Skin affections, with greenish, brownish or yellowish scabs.
Yellow scab follows pimples on scalp.
; Boils and furuncles.
; Abscesses and carbuncles, to control the formation of pus.*
; Tetters.
Many little matterless pimples under hair, bleeding when scratched.

---

* *Anthracine* is much better. C. Hg.

Digitized by Google

: Ulcers discharging thick yellow matter.
Greyish, lead-colored skin (workers in gypsum).
: Chilblains, when suppurating.

[45] **Relations.** Compatible: after *Kali mur.*, *Natr. sulph.*, *Silica.* Compare: *Calend.*, in suppurations; *Hepar*, in suppurative processes, but has wider sphere and acts with more intensity; *Kali mur.* in milk crust and other skin affections, swollen cheek, croup, dysentery; *Natr. sulph.*, in post-scarlatinal dropsy; *Silica*, in hard or suppurating glands, ulcers of cornea, tonsillitis, mastitis, frostbites.

CALENDULA.

Marigold. *Compositæ.*

Native of Southern Europe; cultivated in our gardens; not to be confounded with Tagetes.

[1] **Mind.** ‖Consciousness returned after 24 hours, but great drowsiness remained. θBurns.
‖Delirious and wild. θBurns.
Anxious, morose, solicitous, during chill.
Fretful, sleepy, dreamy.
Great irritability; he is easily frightened; hearing is acute.

[2] **Sensorium.** Dull head, as after a debauch.
Head heavy in morning, as after a long illness.
Feels as if he would faint, with movements in stomach and abdomen.

[3] **Inner Head.** Cephalalgia after mechanical injuries.
Headache in forehead, after eating, with sensation of heat in it.
Pressive headache, now in forehead, now in temple; only when lying down.
Dull, pressive sensation in occiput.
Concussion of brain.
Punctured or lacerated wounds of brain.

[4] **Outer Head.** Heat of head towards evening.
‖A deep hole in skin of forehead from a fall.
‖In lacerated wounds of scalp; to prevent suppuration.
‖Fractures of skull, particularly if compound.
Fungus of cranium; symptoms of compression with no fracture.

Digitized by Google

Hernia cerebri, after fractured skull.

[5] **Sight and Eyes.** After operations upon eye or lids where undue inflammation or suppuration is to be avoided.

‖Blennorrhœa of lachrymal sac.

‖Traumatic conjunctivitis, keratitis and iritis.

‖Sclerotica wounded with knife; choroidea and corpus vitreum protruded; eye retained form and sight for large objects; remedy used internally and externally.

‡Staphyloma corneæ, externally applied.

White of eye inflamed, with pressive headache, now in forehead, now in temples, when lying down, not when sitting and standing; pupils dilated.

Dryness and biting in margin of lid, as from smoke.

Pupils dilated, lid very much swollen.

‖Eyelids stretched to fullest extent of orbits. θBurns.

‖Lacerated and incised wounds of eyes.

‖Eyes black and blue from extravasated blood. θLacerated wounds.

‖In wounds of lids and brows which have been badly treated by plasters and suppuration has taken place.

[6] **Hearing and Ears.** Hearing too acute; starts with a fright.

[7] **Smell and Nose.** ‖Laceration of dorsum and tip of nose, from a fall.

[8] **Upper Face.** Swollen sensation in lips, spreading to sides of nose, increasing rapidly in intensity, and spreading to eyes and forehead, with burning and stinging.

Face puffy, much swollen under his eyes.

Heat in face, after dinner.

Lacerated wounds of face; to prevent suppuration.

[9] **Lower Face.** ‖Right side of under lip lacerated from a kick of a newly shod horse; healed without noticeable scar.

Eruption of small vesicles in l. corner of lips and on r. side of mouth.

Submaxillary glands pain on touch, as if swollen and about to suppurate, and at times cause a tensive pain, which, especially on swallowing, causes a pressure in throat.

Drawing tensive pain in glands behind l. ramus of lower jaw, on moving head.

[10] **Teeth and Gums.** ‖After extraction of teeth, or dental operations resulting in laceration of gums.

[11] **Taste and Tongue.** Before meal, bitter taste of phlegm in throat.

‖Tongue dry, red and cracked. θBurn.

[13] **Throat.** Pressure in throat when swallowing.

Wounds of œsophagus, to prevent œsophagitis.

Digitized by Google

Foreign bodies in œsophagus having produced laceration.
Scalds of throat, with loss of substance.

[15] **Eating and Drinking.** Diminished appetite for dinner, though he relishes food when he eats.
Drinks much: at night; with heat.
Aversion to drink, with crawls.
After eating: forehead aches, with a feeling of heat in it.
Before dinner: bitter taste of phlegm in throat.
After dinner: heat in face, hands and feet.
From smoking: hiccough.
When he drinks, it gives him each time a shiver and shaking chill.
Cold drinks cause a crawl.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough after smoking.
Intimation of nausea, at times, in forenoon.
Vomiting of food, and diarrhœa, with cardialgia.
Vomiting, with pain in uterine region, after taking cold.

[17] **Scrobiculum and Stomach.** ‖Induration in stomach and uterus.
Movement in stomach causes faint feeling.

[18] **Hypochondria.** Pressure on last rib, l. side, with movements in abdomen and crawls on back.

[19] **Abdomen.** Anxiety and griping in belly, with a stool.
‖Constant soreness of abdomen and tenderness in l. iliac region, with frequent almost entirely mucous stools. θEnteritis from foreign body.
Dull, coarse stitches in middle of r. side of abdomen, on moving; they disappear during rest.
A boring digging pain, deep in region of navel, when walking.
Movements in abdomen cause faint feeling.
‖Stretching and dragging in groin. θHypertrophy of uterus.
‖After Cæsarian section for lacerated womb.

[20] **Stool and Rectum.** ‖Frequent mucous stools with pain in abdomen. θEnteritis from foreign body.
A stool in morning, preceded by griping and anxiety in abdomen, and accompanied by a chill.
Diarrhœa, with vomiting of food, after cardialgia.
‖Constipation from occasional retroversion. θHypertrophy of uterus.
Perineal abscess; to close the wound after operation.
‖Ruptures of perineum.

[21] **Urinary Organs.** Urine suppressed; l. ear ached fearfully, ran matter, splitting headache, eyes pained him from headache.
Frequent micturition; urine colorless as water, is very hot and burning.

Digitized by Google

Has to urinate often in night.
Tearings, at times, in urethra, during a chill.

[22] **Male Sexual Organs.** ‖Mechanical excoriation of mucous surface of prepuce after coitus.

[23] **Female Sexual Organs.** ‖Profuse, offensive watery discharge from vagina, with great exhaustion.
Pain in uterine region, with vomiting, after taking cold.
Cancer of womb with flooding and loss of substance.
‖‖Inflammation, with lacerated hymen, from coitus or otherwise.
‖Sense of weight and fulness in pelvis; menorrhagia. θHypertrophy of uterus.
⁞Complaints during menstruation.
‖‖Ulcerations of os uteri.
‖Induration of uterus.
⁞Uterine cancer.

[24] **Pregnancy. Parturition. Lactation.** ‖Ruptures of cervix and perineum during childbirth.
‖Profuse, offensive, watery discharge from vagina, with great exhaustion, second and third day after instrumental delivery. θGangrene of uterus.
‖Excoriated and cracked nipples.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice stronger and deeper as soon as fever heat abates, in evening.
Injuries to air passages, of a suicidal or other nature, in form of cuts or lacerations.
Foreign bodies in air passages.

[26] **Respiration.** Great efforts made to inflate lower lobes of lungs, which were only successful when sitting up.
During inhalation: pressure in l. side of chest.
Breathing easier after heat abates.

[28] **Inner Chest and Lungs.** Pressure and oppression in l. side of chest, in evening, when lying in bed.
Drawing pressure in l. side of chest, when standing, during inspiration.
Pressive drawing pain in l. side of chest and on breast bone, with stitches in r. side of chest.
Feels squeamish in chest.

[29] **Heart, Pulse and Circulation.** Pulse irregular and diminishing rapidly.
‖Pulse 160, fell in twelve hours to 120, in twelve more to 110. θBurn.

[30] **Outer Chest.** Pressive drawing sensation on breast bone.
Ribs ache as if pressed together.
Axillary glands sore to touch.

[31] **Neck and Back.** Rheumatic drawing in r. side of neck,

Digitized by Google

which is < on bending neck to r. side, and on raising r. arm; it extends to shoulder, in morning.

Pressive pain beneath r. lower point of shoulder blade, with a sensation as if everything was suppurating and bruised, in afternoon.

Pressive drawing pain between shoulder blades.

[32] **Upper Limbs.** Axillæ very hot; glands sore to touch.

Cold hands feel hot.

‖Compound fracture of l. upper arm; bone splinters protruding; healed the stump after amputation.

πCrushed index finger of r. hand.

‖First phalanx of l. index finger, both phalanges of ring finger completely torn away, likewise the flesh from tip of middle finger.

‖Tip of index finger cut away.

‖Middle finger sawed through near first joint, leaving tip hanging by skin.

‖Third finger cut to near centre.

[33] **Lower Limbs.** Tired weary feeling pervading lower limbs.

Pains in knees, while sitting; in outer side, as if bruised.

Burning tearing in upper part of calf, while sitting.

Drawing, cramplike pain on inner border of sole, while sitting.

‖Varicose swellings and ulcers.

Foot crushed, erysipelas and gangrene.

Ulcers from ingrowing toe nail.

‖Ulcers on r. leg and foot ragged, deep, with a frequently occurring dreadful pain, profuse suppuration, discharge of a horrid stench. θUlcer on leg.

‖Frightful lacerated wounds by mangling muscles of thighs, patella displaced laterally.

‖Outer part of r. thigh, skin and muscle torn off by machinery down to bone. θLacerated wounds.

‖A compound fracture of leg with a wound 9 inches long, exposing tibia; *Arnica* was first employed on account of great bruising and extravasation of blood in leg; thereafter dressed with water; *Calendula* cured rapidly without much suppuration.

[34] **Limbs in General.** Hands and feet cold.

Drawing pressive tension in wrists and ankles during rest.

‖Wounds about joints; after surgical operations; to prevent caries or necrosis.

[35] **Rest. Position. Motion.** Restless at night, can rest in no position.

Lying down: pressive headache; pressure and oppression l. side of chest.

Feels best when walking about, or when lying perfectly still.

Digitized by Google

The rheumatic drawing pains appear only during motion, and are very slight.

‖Moving causes pain, even after the wound is dressed: rheumatism < from motion.

Walking: boring digging pain deep in region of navel.

[36] **Nerves.** Tired, weary feeling.

Great irritability, easily frightened.

Traumatic and idiopathic neuroma.

‖Neuritis, resulting from lacerated wounds.

‖General pallor and insensibility. θFlesh wounds.

‖Exhausted from loss of blood and excessive pain. θLacerated wounds.

[37] **Sleep.** Sleepy, dreamy and fretful.

Feels as if he would fall from a height, when dropping asleep; urine suppressed; she passes less than half her usual quantity of urine.

Very restless at night; he gets rest in no position; he continually wakes; is obliged to urinate frequently and drinks very much.

[38] **Time.** Night: drinks much; very restless; has to urinate often.

Morning: head heavy after long illness; stool with chill, preceded by griping and anxiety.

Forenoon: intimation of nausea; chilliness of hands and feet; great heat.

Afternoon: heat, creeping chills; frequent thirst.

5 P.M.: heat, thirst, chill abates.

Evening: heat of head; pressure and oppression l. side of chest; in bed, great heat, smarting, feet burn very much and are inclined to sweat; towards, a feeling of heat in otherwise cold hands.

[40] **Fever.** ‖Chill, fever and headache from mechanical injuries.

Crawls on back.

Violent chill after traumatism.

Nearly all symptoms appear with a chill.

Chilly whole morning, and very sensitive to air.

Chilliness in hands and feet, whole forenoon, without thirst, together with drawing, pressive, rheumatic pains through whole body; ribs ache as if squeezed together and bruised, after sitting awhile, in morning.

He feels shivery and has a kind of gooseflesh, while skin seems warm to touch.

Shivering in back, with pressure on last rib on l. side, with movements in region of stomach and abdomen, as if he would faint.

Sensation of heat in face, of hands and feet, after eating, and an hour afterwards thirst.

Great heat, whole forenoon, with much sweat; he feels qualmish in chest, and shoulders are very hot.

Digitized by Google

Heat in afternoon, with creeping chills and frequent thirst; drinking, however, causes each time shivering and a shaking chill.

The heat continues unabated after 5 P.M., but cold drinks cause shivering.

The heat abates after 5 P.M., without shivering, even in open air, head feels freer, breathing easier, and voice stronger and deeper.

Towards evening, a feeling of heat in otherwise cold hands and whole body, with creeping chills, without thirst and almost aversion to drinking, while sitting.

Great heat in evening, in bed; he begins to sweat; especially feet burn very much, and are inclined to sweat.

[42] **Locality and Direction.** Left side: pressure on last rib; ear ached fearfully; chest, pressure; ribs, pressure.

Right: iliac, constant pain; side of abdomen, dull, coarse stitches; of neck, rheumatic drawing; shoulder blade, pressive pain beneath; leg and foot, ragged and deep ulcers.

[43] **Sensations.** As if everything about r. shoulder blade was suppurating and bruised; as if tired and weary; lower limbs as if bruised; as if she would fall from a height.

Anxiety and griping: in belly.

Drawing: cramplike pain on inner border of sole; on breast bone; in r. side of neck.

Drawing tensive pain: of glands of l. ramus of lower jaw.

Pressing: headache; in throat; on last rib, l. side; beneath shoulder blade.

Burning and stinging: in face.

Tearing: in urethra; in upper part of calf.

Splitting pain: in head.

Stitches: in r. side of chest.

Dull, coarse stitches: in middle of r. side of abdomen.

Boring-digging pain: deep in region of navel.

Stretching and dragging: in groin.

Aching: in ear; of ribs.

Drawing pressing tension: in wrists and ankles.

Burning: in upper part of calf.

Stinging: in wounds.

Soreness: of abdomen.

Tenderness: in r. iliac region.

Pain: in abdomen; in uterine region; in knees.

Tired, weary feeling: in lower limbs.

Swollen sensation: in lips.

Crawls: on back.

Heat: and headache in forehead; in face.

Dryness: and biting in margin of lid.

[44] **Tissues.** Stimulates proliferation of white globules, aug-

Digitized by Google

ments quantity of fibrine and its transformation into connective tissue.
Secures healing by first intention.
Suggillations; bloody and serous infiltrations of cellular tissue in open wounds and ulcers.
Inflammations resulting from cutting or tearing parts.
Promotes granulations and prevents disfiguring scars.
Promotes favorable cicatrization with the least possible amount of suppuration.
Sloughing and suppuration from mechanical injuries; prevents or arrests gangrene.
Loss of skin, cell and muscle substance.
Valuable in healing or reproducing bone.
: Scrofula.
: Cutaneous cancers.

[45] **Touch. Passive Motion. Injuries.** Most violent pains after bandages are put on.
Sore to touch: glands.
After surgical operations, to promote healthy granulations, and to prevent or arrest gangrene.
After removing tumors, to prevent suppuration.
! Profuse, bad colored, stinking suppuration, hectic fever, both bone and muscle wounded by a ball; caries.
!! External wounds and lacerations, with (or without) loss of substance; articular wounds and clean, surgical cuts.
!! In all cases with loss of soft parts, when no union can be effected by means of adhesive plaster.
!! Lacerated, torn and jagged looking flesh wounds.
! Skin or flesh has come off in pieces.
Penetrating wounds in articulations with abundant flow of synovia.
Rupture of muscles or tendons.
Dislocations with injury to soft parts.
Chills, fever and headaches from mechanical injuries.

[46] **Skin.** : Jaundice.
: Soft warts.
Stinging pain in wound during fever heat; surroundings look very red.
A wound is painful, in morning, as if bruised and smarting, with picking in it and threatening to suppurate.
Wound raw and inflamed; painful, as if beaten; parts around wound become red, with stinging in wound during febrile heat; constitutional tendency to erysipelas.
In charring of skin, after separation of slough.
! Old, neglected wounds, maggoty and offensive.
Ulcers: weak, indolent, irritable inflamed, sloughing, varicose, or hemorrhagic; excessive secretion of pus;

Digitized by Google

painful, as if beaten; surrounding parts are red; stinging during fever; < at night.

Abscesses; when induration occurs after surgical operations, followed by suppuration; wound becomes raw and inflamed, is painful in morning as if beaten, with stinging, followed by throbbing, as if it would suppurate.

Hinders or prevents gangrene.

47 **Stages of Life, Constitution.** ❙Girl, æt. 22, dreadfully mangled lower limbs by wheels of car. θFlesh wounds.

❙Girl, æt. 22, robust, remarkably healthy, suffering from burn by camphene, maltreated by allopathy for six weeks, until pronounced past recovery.

❙A man, æt. 42, for five years an ulcer on leg of a mercurio-syphilitic origin.

48 **Relations.** Contains a great deal of nitrogen and more phosphoric acid.

Antidotes: *Arnica* (pain in lacerated hand).

Compatible: *Arnica, Arsen., Bryon., Nitr. ac., Phosphor., Rhus tox.*, administered internally as indicated; before *Arnica, Hepar;* after *Arsen.*

Complementary: *Hepar* (pyæmia).

Compare: ❙*Arnica, Arsen., Bryon., Calc. sulph., Camphor, Carb. an., Carb. veg.*, ❙*Hyper.*, in painful wounds, *Ledum, Nitr. ac., Phosphor., Rhus tox., Ruta,* ❙❙*Salic. ac.*, in putrid, gangrenous wounds, *Sulph. ac., Symphyt.*

General remarks: *Calendula,* like *Salic. ac.*, is useful in preventing excessive suppuration, and in preventing putridity, both keeping from wounds and sores septic germs. The odor of the flowers is disliked by mosquitoes; and the smoke of the burning plant will drive mice and lizards from houses.

CAMPHORA.

Camphor. *Lauraceæ.*

All our progress as a school depends on the right view of the symptoms obtained by proving with camphor or with opium.—C. Hg.

[1] **Mind.** Unconsciousness.

Grew dizzy while studying in school. 12.30 P.M., book seemed to go round, could hardly keep his seat; felt as if falling towards r. side and as if going into a state of sleep or unconsciousness; > in open air; a boy, æt. 13; t.

Vomiting and convulsions, with loss of consciousness and frequent desire to make water.

Loss of consciousness, during which he was attacked with violent convulsive fits and maniacal frenzy.

Falls down, without consciousness, with howling cries.

Stupefaction of senses, like fainting.

Half stupid and senseless, moaning and groaning.

Want of memory.

Complete loss of memory, after an attack of catalepsy, with loss of consciousness, followed by vomiting.

Memory lost, after mental or sensorial disturbances.

Though he could remember the name of everything, when he looked at it, yet it was not without investigating its nature that he could discover its use.

Awkwardness.

Unusually clear-headed; also intellectual dulness.

Uneasiness of body and confusion of mind, impossible to describe.

Ideas were confused, delirium.

Monomania, with horrible visions and torturing ideas about religion, which he cannot shake off, although he is conscious that they are morbid; is < at night.

A tumult of crude ideas floated through his mind, with a noise in his ears, followed by insensibility.

He lay with closed eyes, seemingly asleep, answering no questions; when the distant town clock struck he lifted his arm at every stroke; one evening he went to the piano with closed eyes and played with great precision what at other times he could not have done without his notes; several times he wrote letters in an acquired

Digitized by Google

language more correctly than in a waking state; once he occupied himself for several hours with the number 6; at times he had violent spasms and priapism.

It was to him as if he moved in his own little world, in which all things were clear and defined; outside of which uncertain and undefined; t.

‖Thought he would die. θGastralgia.

Very nervous; imagined various things; that he would get yellow fever, etc.; boy, æt. 13; t.

Confused fancies, and delirium.

‖Delirious, somnolent, with slow fever, at night.

Stupefaction, coma and delirium.

Delirium with heat in throat and thirst.

Delirium, with pain in stomach.

Most furious delirium, being with difficulty restrained in bed by two men.

‖Rage, with foaming at mouth.

‖Violent rage; scratches, spits and bites; tears her clothes and foams at mouth. θPuerperal mania.

‖Mania, with melancholy.

Disposition to cry out frequently, he knew not what for, but would frequently find himself crying out when at work or when walking about.

Desire to be diverted from thoughts of himself; t.

Desire to dispute; self-willed.

‖Wants to get out of bed.

Often felt as if he ought to kill people, when in street; never felt a disposition to kill any of his own family, but thought he ought to kill somebody.

‖Impulse to jump out of window.

He talks irrationally, and proposes absurd things.

Talked wildly, constantly repeating the same sentence.

Gestures and conversation very wild and strange.

‖Greatly excited, talks incessantly. θPuerperal mania.

πMind wandering; talking, shouting, crying and laughing by turns; t. θSpasms.

Was found much excited, screaming loudly, "I shall not faint! I shan't faint, for if I do, I will have fits and never come out of them!"

Uttered a strange scream, a sort of howl, leaped from bed, apparently in great agony, and bent on something desperate.

‖Screamed, raved and scolded in most indecent language; 4th day. θPuerperal mania.

‖Cries for help, takes hold of others, will not be left alone.

‖Weeping or crying, does not know why.

Sighing and muttering in sleep.

‖Tosses anxiously in bed, weeps incessantly; full irritable pulse, violent headache. θHysteria.

Digitized by Google

Restless tossing about; heart palpitates.
Children throw things in air with crazy laughter.
Strips himself, and tries to jump out of window.
He beats himself on chest, and falls into a faint.
Child creeps into a corner, howls and cries; everything that is said is taken as if one was ordering him, and he was considered naughty and would be punished.
‖Violent outbursts of rage and vituperation; abuses her child. θPuerperal mania.
‖Hasty in action and speech. θPuerperal mania.
Does not speak unless questioned.
Aversion to all kinds of work.
Greatly exhilarated, lively mood.
Depressed, sad and irritable, despondent.
‖Indescribable wretchedness.
Felt a vague sense of impending danger to life, > moving about, rushed out of house and walked violently until he perspired, which relieved; t.
Dread of being alone in dark.
Afraid of mirrors in room, lest he should see himself in them; so excessive was this fear at times in night that he would have got up and broken mirrors, only that he was still more afraid to get up alone in the dark.
Indescribable dread of being drawn upward.
‖Very great anxiety.
|Præcordial anxiety, with weeping.
πAnxiety, restless tossing in bed. θCancer labii.
‖Anxiety, almost loses consciousness. θPuerperal mania.
An indifference whether the world uses one well or ill, everything is repulsive.
Very irritable and fretful; every word irritates and excites him.
Fretful, anxious, at night, with frightful visions.
Palpitation; vexed by want of sympathy, afraid to be alone a moment, fears death; boy, æt. 13; t.
Dogmatical, easily offended.
Voluptuous ideas.
Great excitement, almost amounting to frenzy.
Excitement, as of intoxication.
Easily startled.
Want of irritability; general apathy.
‖Lethargy; cannot be roused. θTyphus.
‖‖Better when thinking of the existing complaint.
Thinks he is going to die; < when he thinks about it; boy, æt. 13; t.
‖Mania after mental overexertion, in a boy, æt. 14; talks disconnectedly, refuses to answer; wants to lie on bare floor, and wallows in his own filth.

Digitized by Google

[1] **Sensorium.** πSevere dizziness, flushing of face, followed by extreme pallor; t. θSpasms.
Sensation as if all objects were too bright and glittering.
On looking through window everything in street appears in utmost tumult and confusion.
‖Vertigo: in frequent short attacks; after nausea and retching, giddy, sparks before eyes, dim sight, singing in ears, heat and tremor; vomiturition; with tendency to fall forward, 10 A.M., while walking; so severe that knees knock together and he nearly falls; on stooping; when sitting.
‖Staggers, or totters in walking; feels drunken.
‖Feels as if lighter, not touching the ground; as if he could fly.
Uncertain in his gait; in looking down it seems as if all objects were commingled; t.
‖Lightness or dizzy heaviness of head.
‖Loss of consciousness, fainting, delicate people suddenly sink down, turn pale, shut eyes; breathing and pulse very weak; after recovering, one sided lameness or blindness.
‖All senses vanish, even the touch; cannot distinguish cold or hot.
‖Stupor; fainting; apoplexy.
Vertigo without nausea, uncertainty of motion, and a fainting fit, in which he remained unconscious for four or five minutes; t.

[5] **Inner Head.** Head confused, stupefied, burning hot, congested, generally clear consciousness, sometimes unconscious.
‖Frontal headache; pressing outward; also left-sided.
Throbbing headache in forehead, over root of nose, with heat.
Fine tearing in head, especially in l. side of forehead and occiput.
‖Throbbing stinging in forehead, all night, with a dry, thirstless heat.
Tearing sticking in forehead, and pressure on upper part of frontal bone.
Pressure: in forehead, in middle, on r. side, on l. side; over l. eye, in evening.
Heaviness and heat in forehead, < when walking.
Slight headache in forehead, which gradually became more violent, and accompanied by stitches, apparently starting in temporal bones, and returning every five minutes.
Dull headache above frontal bone, with nausea.
Pressive headache, alternating in forehead and at sides.

Digitized by Google

Headache, beginning in frontal region and extending to occiput.

‖Boring in temples, shooting towards eyes or teeth in short attacks, early in morning.

Single violent stitches in r. half of brain.

Fine tearing in r. temple and forehead.

Tearing pressure in r. temple.

Throbbing pressure in temples.

Headache with drawings in r. side.

Pressure by jerks, in head, over l. ear.

‖Throbbing of temporal arteries, and distended jugular veins.

‖Aching in middle of head, from forehead backward, lasted through evening and next day.

Cutting jerks or shocks from forehead and temples towards middle of brain, in short intervals, soon after lying down.

Heat and heaviness of head, especially vertex.

Severe pressure on r. side of vertex.

Dull pressure in region of vertex.

‖‖Throbbing, like beats with a hammer, in cerebellum, isochronous with pulse; head hot, face red, limbs cool, > in standing; mostly with such as were deprived of sexual intercourse.

Pressure in occiput.

Cutting pressure from l. side of occiput towards forehead.

A contractive pain at base of brain, especially in occiput, and above root of nose, which continues without cessation, whereby head is leaned to one or other side; a pain which is very much < by stooping low, lying down, or by external pressure; with coldness of hands and feet, hot forehead, and coma vigil.

Uneasy feeling at back of head.

Sensation of cold in cerebellum.

‖‖Contraction as if laced together in cerebellum and glabella, with coldness all over. θCerebro-spinal meningitis.

Heat in head, and tearing headache, soon passing off and disappearing on pressure.

Transient headache, as if brain was compressed from all sides, only felt during half-consciousness, when he was not paying attention to his body; if he became conscious of his pain and thought of it, it immediately disappeared.

Drawing sensation all around head, as if nerves of head were all drawn up; drawings for some minutes, then remissions, then drawings again.

Headache, as if bruised, or as if brain was sore.

Digitized by Google

Head heavy, with anxiety, brilliant eyes, red face and great agitation.
‖Dizzy heaviness of head; head sank backward.
‖Rush of blood to head, with heaviness of head; > from external pressure; heat in head, as if sweat would follow, while crawlings run over limbs and belly.
Throbbing headache; alternate pallor and flushes.
Intense headache and giddiness.
πHeadache, with burning in stomach and præcordial anxiety. θCancer labii.
Headache, with burning pain in stomach, eructations, great thirst, and a sense of formication in extremities.
‖Pains run from head to tips of fingers, with trembling and uneasiness.
Headache, in morning, after rising, for several days in succession.
Pressive headache from within outward, immediately.
‖Hydrocephalus: great coldness of skin, yet child cannot bear to be covered.
‖Inflammation of brain after sunstroke.

‘ **Outer Head.** ‖Cold sweat on forehead. θCholera infantum.
Hot sweat on forehead and in palms.
Scalp intensely hot.
Heat of head, hands and feet, yet thirstless.
Drawing around head, as if it was drawn upward, in short attacks, with crawls.
‖Spasmodic motions of head.
Head is thrown back.
Head drawn to r. shoulder; rest of body relaxed; unconscious.
Spasmodic drawing of head, laterally or backward, with deathly coldness.
Premature grey hairs.
‖Anterior fontanelle much depressed. θCholera infantum.

⁵ **Sight and Eyes.** Sensation of increased and dazzling light.
‖Objects appear too bright or glittering, at same time black spots are seen.
Flickering before eyes.
Objects quivered before his eyes.
‖Cannot read, letters run together; dim and dark.
Strange visions before his eyes; hallucinations; wonderful forms float before eyes.
‖Sees bright colors, sparks and fiery wheels, alternating with mistiness.
‖After using eye for awhile objects become indistinct, as if seen through a fog, often they appear double; the upper portion of large objects is not visible.
‖Objects, upon which she fixes her gaze, appear to move to one side, with a jerk.

Digitized by Google

Sees objects plainly at arm's length, things farther off appear dim and undefined; t.
Eyes sensitive to light; photophobia.
Darkness before eyes, as if objects were encircled in a cloud; sight obscured or dim.
‖Dimness of vision diminishes as attacks of vertigo increase.
‖Sees better after breakfast, not at all in evening.
‖Pupils contracted and immovable or dilated.
‖Eyes worse in sunlight.
Conjunctiva injected, pupils dilated.
‖Chronic inflammation of eyes.
Red spots on white of eye.
π Heat, redness and burning in eye, with lachrymation.
Eyes brilliant and glittering.
He looks at one staring and wondering, without consciousness.
‖Disturbed wild and roving glances, disheveled hair. θ Puerperal mania.
‖Eyes staring, sparkling, a little convergent; 3d day. θ Puerperal mania.
‖Eyes fixed, staring, turned upward or outward.
‖Eyes protrude, with monomania, despair of salvation, wants to cry, but his eyes are dry.
π Eyes turned to right, upward and backward, head the same; t. θ Spasms.
‖Eyes deeply sunken; blue rings; pale face.
Soreness or tense, stiff feeling in eyes and eyelids all day.
Sensation in eyeballs as from pressure and pushing upon them from behind.
Lachrymation in open air; lids feel stiff, sore or tense.
Twitching or biting in external canthus.
Smarting, biting-itching, sticking, or burning in eyelids.
Burning or biting in edges of lids.
Twitching of lids; quivering in upper lid; constant agitation.
Eyelids are covered with many red spots.
‖When closing eyes in slumber, things appear to grow thicker or thinner, as the pulse beats.
Pressure above r. eye.

[6] **Hearing and Ears.** ‖Singing, ringing, buzzing, or roaring in ears.
Burning, stitches, or tearing in ears.
‖Stitches from a draught of air.
Tearing behind and above ears.
‖Pain in l. ear from a dark red pimple, which suppurated in thirty-six hours.
‖Yellow blisters around ear, with erysipelas of face.

Digitized by Google

‖Ear-lobe hot and red.
‖Congestion to ears.

[7] **Smell and Nose.** Sudden, momentary boring in r. side of nose.
Drawing in l. side of nose.
In anterior corner of nostrils, stinging as if sore and would ulcerate.
Itching in nose, and l. nostril.
Air of room, breathed through nose, seems cooler, when walking.
Violent stitching, or crawling, from root of nose almost to tip.
‖‖Nose cold and pointed. θSummer complaint. θCholera.
‖Sneezing, beginning coryza.
‖Coryza fluent or dry.
Nose stopped on r. side, afterwards running.
‖Catarrhal affections, with headache, from sudden change of weather.
‖Nosebleed.

[8] **Upper Face.** ‖Features changed, distorted, relaxed and expressionless.
Face: scarlet red and puffy; flushed with wild expression; bluish and pinched; pale, anxious and haggard; distorted and sunken; livid, cold and deathly.
Spasmodic distortion of facial muscles, with froth from mouth.
‖Red and glowing face. θPuerperal mania.
‖Redness of cheeks and lobules of ears.
‖Red face, with warmth of body.
‖Pale face, with crawling.
‖Looks pinched and blue. θCholera Asiatica.
‖Erysipelatous red cheeks and ear-lobes.
‖Face now pale, then livid, expressing despair; incessant spasmodic movements, grimaces.
Very pale face, with at first closed, afterwards open staring eyes, with eyeballs turned outward.
Excessive paleness of face, with a fixed and stupid look.
‖Flushed and bloated face, brilliant eyes, full rapid pulse and hot skin; cannot bear heat. θCancer labii.
‖Pale face, dry skin, not hot, cool forehead; third day. θPuerperal mania.
Black in face.
‖Face hippocratic. θScarlet fever. θCholera.
‖Distorted features. θPuerperal mania.
‖‖Cold sweat, with vomiting. θCholera.
‖Cold sweat stood in drops on his face, nose icy cold and pinched, upper lip everted; could not see. θGastralgia.
‖Flushes and grows pale by turns. θPuerperal mania.

Digitized by Google

In morning, disturbed countenance, blue rings around eyes.
Heat in face and cold hands.
Stitching in l. cheek.
Drawing in l. zygoma; boring in right.
Burning in face.
Slight twitchings of face.
‖Buries face deep in pillow to shut out hideous sights. θDelirium.

[9] **Lower Face.** ‖Froth or foam at mouth.
‖Upper lip drawn up, exposing teeth.
Lips everted as in bleating, head hot, feet cold; t.
‖Blue lips. θCholera infantum.
πCancer of under lip.
‖Lockjaw, with coldness (and brownish look of eruption, during partial repercussion, in scarlatina).
Drawing in angle of r. lower jaw.
Tensive pain in masticators.
Stitching in chin.
Glands near lower jaw are swollen; seem to cause a toothache.

[10] **Teeth and Gums.** A little froth about teeth, which were firmly clenched.
Flying toothache, gnawing-boring in molars, mostly in hollow ones; much < if even a soft little crust of bread touches the suffering tooth; < from drinking coffee or spirituous liquors; > after drinking beer or cold water, but < from water kept in mouth; relieved by coition.
Drawing in upper incisors, and in hollow lower molars.
Tansient, cutting shootings through gum to roots of incisor and canine teeth.
Transient toothache, now in one, now in another tooth.
‖Cutting toothache, which seems to originate from swelling of a submaxillary gland.
Painful looseness of teeth; teeth seem too long.
During coition toothache ceases, immediately after which he sleeps quietly for the first time.
When walking, drawing in decayed upper incisors.
On going into cold or windy air with toothache, a stitch shoots from tooth into eye.
Gums loosened, of a livid color.
‖Constant pressure, makes him mad, with great itching of swollen gums, teeth too long.

[11] **Taste and Tongue.** ‖Taste: acute; beef broth tastes too strong; food tastes bitter, meat more so than bread; tobacco has an offensive, bitter taste.
‖Bad taste, with nausea and vomiting, in morning.
Great difficulty of speech and thought.

Digitized by Google

‖Speech uncertain, impeded; when roused he had scarcely any power to articulate.
‖Speech feeble, broken, hoarse.
Could not speak from words seeming to choke him in larynx.
‖Red tongue. θPolydipsia.
Tongue: felt swollen and numb; dry, or covered with aphthæ.
‖Sensation of dryness on back part of tongue, like a scraping, with much saliva.
‖Tongue thick, spongy, fissured, covered with much yellowish mucus.
Burning on edge of tongue and hard palate.
‖Burning sensation on end of tongue, as from pepper.
‖‖Tongue cold, flabby, trembling.
‖Tongue and teeth dirty and dry. θTyphus. θSuppression of urine.

[12] **Inner Mouth.** ‖‖Mouth open.
Foaming at mouth.
‖Saliva: running together, watery; at times slimy and tenacious; children "slobber."
Mouth dry and parched, red tongue, no thirst; t.
‖Whole mouth interiorly, with tongue, gums and palate, feels as if swollen.
‖Sensation in mouth, as after eating peppermint lozenges, and same in stomach.
‖Dryness, after it aphthous sponginess of mucous membrane.
Continued dryness of mouth, with increased thirst.
‖Unpleasant heat in mouth and stomach.
‖Coldness in mouth.
A cold sensation rises into mouth and to palate.
Sense of coldness changed to that of sharpness and burning.
‖Offensive odor from mouth, in morning, which he himself noticed.
‖Boiling hot tea seems cold to him.

[13] **Throat.** ‖Heat: on hard palate; in throat; in œsophagus.
‖A dry scraping sensation on palate.
‖Single coarse stitches in palate.
‖Burning from palate down œsophagus; it makes him drink, but this does not lessen it.
‖Repeated short stitches at back and towards l. side of pharynx.
‖Sore throat when swallowing, and even more when not swallowing, as if throat was sore and torn up, with a sensation as if she had eaten rancid substances.
Scraping in throat.
‖A hot vapor seems to rise up throat and out of mouth. θScarlet fever.

Digitized by Google

Slight warmth in œsophagus and stomach, extending over whole body.
‖A cooling sensation rising up throat to roof of mouth.
‖Rattling in throat. θScarlet fever.
‖Swallowing is impossible. θTyphus.

11 **Appetite, Thirst. Desires, Aversions.** ‖Neither appetite nor thirst.
‖Aversion to accustomed tobacco smoking without its tasting badly; he soon becomes averse to it to a degree of vomiting.
‖Desire to drink without feeling thirsty.
‖Continued thirst, with frequent drinking.
‖Insatiable burning thirst, not quenched by incredible quantities of cold water. θPolydipsia.
Desire for beer, which > the toothache.

15 **Eating and Drinking.** Could neither taste bread nor meat on account of nausea.
‖Eats voraciously and has frequent thirst. θPuerperal mania.
‖After meals: he feels heart beating against ribs; a drawing through whole body, with coldness, cold arms, hands and feet; constant belching.
Drinking difficult.
Better from drinking cold water.

16 **Hiccough, Belching, Nausea and Vomiting.** ‖Belching and gulping up contents of stomach.
‖Empty eructations frequently after eating, and almost continuous.
‖Nausea: with vertigo, twitching in face, salivation, retching and vomiting; with accumulation of saliva; and prostration, 10 to 11 A.M.
Nausea and inclination to vomit, which disappeared each time after an eructation.
Retching.
Nausea and vomiting, especially mornings.
She drank some coffee, which excited vomiting.
‖Constant vomiting. θViper bite.
‖Vomit: bilious; of some blood; mostly sour.
‖Watery, slimy vomit. θSummer complaint.
Vomited black streaked fluid smelling of camphor.
‖Chronic vomiting, in morning, of sour mucus.
‖Vomiting, with cold sweat in face.
‖Coldness after vomiting.
‖Sometimes nausea and vomiting, with cold sweat. θCholera.
‖Absence of nausea and vomit, icy cold. θCholera.

17 **Scrobiculum and Stomach.** Pain in epigastric region.

Digitized by Google

!Terrible anguish and burning at pit of stomach driving to despair. θCholera Asiatica.
Pain, as if beaten, or distended, in pit of stomach, with fulness of abdomen; sensitive to touch.
Sensation in region of pit of stomach as if distended at this point, and diaphragm thereby pressed upward; oppression of breathing.
Pain, at first moderate, but afterwards very intense, in epigastrium, radiating all over belly and into limbs, accompanied by uterine tenesmus.
Gradually increasing pain in epigastrium, loins and bowels, with strangury and vomiting.
Pressive pain in pit of stomach, or in anterior part of liver.
An oppressive sensation, with a feeling of warmth, in pit of stomach.
!Unpleasant feeling in gastric region, with transient vertigo.
Digestion impaired, < after taking cold, with pressure or burning above navel, great thirst, præcordial anxiety, heat, burning and dryness of skin, limbs heavy as lead.
Stitches and burning in stomach.
!Sensation of heat in stomach, with chilliness in loins and small of back.
!Coldness in stomach.
Feeling like hunger in stomach.
!Awoke in night, with cramp in stomach so violent he thought he would die. θGastralgia.

18 **Hypochondria.** !Constrictive pain below short ribs, extending to lumbar vertebræ.
!Aching pressure in both hypochondria.
!Aching in anterior part of liver.
In r. hypochondrium a stitch from front to back, < when running.
Pressive pain in hypochondria.
Under short ribs a painful contraction, through to lumbar vertebræ.
!Stitches in spleen, from front backward, < after quick walking.

19 **Abdomen.** !Cutting colic, at night.
Slight cuttings in region of navel, followed by passage of flatus, inclination to stool, and urging to urinate.
Movements in intestines, and in afternoon, frequent passage of offensive flatus; during next night, from 1 to 2 o'clock, violent pressive pain, located in cœliac ganglia, so severe that he feared inflammation would ensue, which caused great anxiety and sweating.
!In r. side a stinging drawing heaviness, more perceptible when pressed; a drawing soreness, more inward than

Digitized by Google

outward, extending to region of liver and chest, < when inhaling.

Drawing bruised pain, more internally than externally, especially on inspiration, in whole r. side of abdomen, extending into region of liver, and into chest.

Drawing in l. side of lower abdomen, with a tensive bruised sensation.

‖Pinching in region of navel.

‖Bellyache, as if diarrhœa would follow.

At first, passage of much flatus, and after several hours, in morning, pressure in abdomen as of distension from flatulence.

‖Hard pressure in l. side of lower abdomen.

Pressure and burning about navel.

‖Violent burning heat in upper and lower abdomen.

‖Burning in bowels. θCholera Asiatica.

‖Heat in abdomen.

Sensation of hardness and heaviness in abdomen, above navel.

‖Coldness in upper and lower abdomen, followed by burning heat therein.

‖Cold feeling in abdomen spreading over chest.

‖An aching in abdomen seems to cause a suffocating contraction of chest.

Burning sticking in a surface as large as hand, below anterior crest of ilium, extending to groin.

Itching crawling in r. groin, > on rubbing.

Abdomen retracted.

‖Transient ascites, or dropsy with ischuria after abuse of cantharides.

[20] **Stool and Rectum.** Flatulency; wind passes without relief.

‖Rice water stools; difficult passage of feces preceded by passage of much wind, but with the same difficulty. θSummer complaint.

Involuntary stools, thin and blackish.

‖Cholera infantum: vomiting and diarrhœa suddenly cease; coldness of body, blueness of nails and lips, cold sweat on forehead and upper part of chest, with icy cold feet; hoarseness; cold spell coming on at night, with desire to be uncovered.

‖Diarrhœa with colicky pain, particularly when caused by cold.

‖‖Anxiety and restlessness, absence of evacuations, frequently chilly or feeling as if cold air was blowing on covered parts; great sinking and collapse. θCholera Asiatica.

‖Diarrhœa: attack very sudden; sudden and great sink-

Digitized by Google

ing of strength; cold sweat on face; eyes sunken and fixed; icy coldness of whole body; face pale, livid, purple, icy cold, distorted; upper lip drawn up, exposing teeth; foam at mouth. θCholera morbus. θCholera Asiatica.

‖After taking cold, cutting with involuntary loose discharge of dark brown feces, like coffee-grounds.

‖Stool: generally painless; dark brown, thin and scanty; blackish, like coffee-grounds; sour; involuntary; sluggish and incomplete.

Urging to stool; stool of usual hardness, but only a little passes, followed again by very violent urging, and again by a scanty discharge.

‖Urging to stool and insufficient discharge, cramp in sphincter ani.

‖Feces passed with difficulty, not without exertion of abdominal muscles, as if peristaltic motion of intestines was diminished, and at same time rectum was contracted.

‖Constipation from inactivity of bowels.

‖Rectum seems contracted, swollen, and painful, on passing flatus.

‖Chapped sensation in rectum, drops of blood from anus.

Smarting in rectum.

Aggravation: during epidemic cholera; from hot sun.

[21] **Urinary Organs.** Pain in bladder after acrid drugs.

‖Painful urination; sticking burning.

‖‖Burning during urination. θPregnancy.

‖Strangury from stricture following gonorrhœa.

‖A biting in back part of urethra; during and after urination pressure in bladder.

‖Frequent urination, passes more than he drinks; loses strength; emaciates.

Frequent desire to make water, with some pain in course of spermatic vessels.

‖Frequent and difficult urination; contraction of bladder less powerful, urine passes slowly and by drops.

Diminished power of bladder; urine passes very slowly, without any mechanical hindrance.

‖Urine passes in a very thin stream, passes almost involuntarily, and after it a painful contraction going from front backward.

‖Involuntary escape of urine; urine dribbles.

‖Difficult urination. θImpotentia virilis.

‖Urine scanty, in drops, or suppressed.

Urine increased, of a dark brown color.

Urine contains sugar, is pale, odorless; contains mucus, without sediment.

Digitized by Google

Yellowish-green, turbid urine, of a musty odor.
‖Urine red, bloody; after irritating drugs, or in exanthematic fevers.
Urine with white or red sediment.
Urine profuse, colorless, frequent, almost every five minutes.
Urine quite clear, but having, like the perspiration, a very strong odor of camphor.
‖‖Urine burns, passing in drops; painful urination; hot burning in urethra as after cantharides.
‖Retention of urine; a pressure on bladder; desire to urinate. θPregnancy. θIschuria of infants. θMeasles.
‖Tenesmus of neck of bladder. θStrangury.
‖Hemorrhage from urinary organs after irritating drugs, especially cantharides, and during exanthematic fevers.

[22] **Male Sexual Organs.** Increased sexual desire.
‖Nervous erethism of sexual organs following frequent excitement, without satisfaction of desire.
‖Increased sexual desire; unusual sexual ardor, with continued delusions respecting the object of embrace.
‖Attacks of violent priapism, during dreams.
‖Want of sexual desire, with weakness of parts, want of erections; testicles relaxed. θImpotence.
‖Stultified by sudden laxness of penis; at night the fancy becomes excited in dreams, and a discharge is the result.
‖Nightly emissions; sometimes occurring without a dream.
Involuntary masturbation.
Contractive sensation in testicles.
Stinging itching on inner surface of prepuce.
‖On l. side of root of penis, while standing a pressure outward, as if a hernia would protrude.
‖Gonorrhœa, with constant sticking together of meatus.
‖Chordee.
‖After gonorrhœa: suppression of urine, with restlessness, pain in hypogastric region, weak but rapid pulse, and delirium; strangury from stricture.

[23] **Female Sexual Organs.** Sexual organs.
‖‖Erethism of sexual system. θPuerperal mania.
Os uteri enlarged and hot.
‖Dropsy of uterus; red, sometimes greenish urine, deposits a thick sediment; urine passed slowly, bladder being nearly paralyzed, body cold.
Severe laborlike pains, as in parturition.
Slight discharge of blood from vagina.
‖Menstruation too profuse, or cessation of menses.

[24] **Pregnancy. Parturition. Lactation.** Abortion, particularly during epidemic influenza.

Digitized by Google

‖Labor pains: weak or ceasing; will not be covered, restless, skin cold.
‖Cramps during pregnancy; cannot remain covered.
‖Puerperal mania: staring eyes, sparkling, somewhat convergent; pale face, dry skin, not hot; cool forehead; sits up in bed held by three women whom she scolds in the most indecent and abusive terms; constantly bares her breast.
‖Lochia suppressed. θPuerperal mania.
‖Fine stinging in nipples.
‖Suppuration of mammæ.
‖‖Newborn children: asphyxia; hard places in skin on abdomen and thighs, quickly increasing and getting harder, sometimes with a deep redness spreading nearly over whole abdomen and thighs; violent fever, with startings and tetanic spasms, with bending backward; make no water.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Voice husky and deep. θCholera Asiatica.
‖Talked in a husky voice. θGastralgia.
‖Voice: weak; uncertain; bleating; whispering; murmuring; hollow.
‖‖Influenza.
‖Mucus in air passages; it makes voice husky and is not removed by hacking, or clearing throat.
Pain in air passages and bronchial tubes, mostly in coughing, and even when hacking and clearing throat.
Contractive sensation in larynx, as from sulphur fumes.
‖Constriction of larynx, or feeling as if throat was tied.
‖Cutting cold feeling deep in windpipe; causes a slight cough.
‖Dry feeling in bifurcation of trachea.

[26] **Respiration.** ‖Breathing: anxious; oppressed; sighing; quiet; deep and slow; heavy, difficult and slow; short and snoring; irregular and hurried; hurried and labored; almost completely arrested, neither audible nor visible.
‖Suffocative oppression.
Choking sensation; it threatens to suffocate him and constrict larynx.
πGasping for breath, chest feels dry, could scarcely speak.
‖Asthma, worse from bodily exertion.
‖‖Inhalation shorter than exhalation, in sleep.
‖‖Snoring in sleep, with inhalation and exhalation.
‖Asphyxia, or apparent death of newborn children.
‖Suspended respiration; heart ceases to beat, life seems gone. Follows well after *Tart. emet.*
‖Hot breath, with acute eruptive diseases.

Digitized by Google

‖‖Cool breath, as from the grave, playing upon hand held before mouth. θCholera Asiatica.
‖A cold feeling in chest, followed by cold breath. θEmphysema.
Spasms of chest.

[27] **Cough.** Hacking, dry cough.
Short cough, from scraping in throat.
‖Very fatiguing cough without bringing up anything.
‖Violent dry cough, with hoarseness. θSequel to measles.
‖Cough, with pain in throat, chest, stomach and abdomen.
‖Dry cough every forenoon for two weeks.
‖Every inhalation starts the cough.

[28] **Inner Chest and Lungs.** Stitches in chest, and hacking cough, as if caused by cutting cold sensation deep in air passages.
Stitches through to spine, mostly through l. lung.
‖Stitches: from shoulders into chest; in l. side of chest when walking; through chest to spine.
Soft pressure internally in chest, below sternum, with difficult inhalation, and a cold sensation rising up into mouth.
Pressure in upper part of sternum, as from a load.
‖Trembling in l. side of chest and arm, when lying on l. side; it ceases on turning to r. side.
‖Contraction of chest, and oppression.
‖Mucus in air passages.
‖‖Congestion to chest.
‖Pneumonia notha of old people, with sinking of forces, dry burning heat and dyspnœa; slight moisture on face; rattling breathing indicating threatening paralysis of lungs.
‖In later stages of pneumonia, short, anxious, oppressed breathing, with chill and heat alternating.
‖Hepatization of r. lung; of lower lobe of left.
‖Hepatization of l. lung, and some pleuritic exudation. θPleuro-pneumonia.
‖Emphysema pulmonum.
‖Sensation of coldness, extends from pit of stomach over whole sternum, and exhaled as a cold breath. θAsthma emphysematicum.

[29] **Heart, Pulse and Circulation.** Great anxiety in præcordial region.
‖Præcordial distress, when spoken to, with sensation of severe coldness and irresistible sleepiness.
Spasmodic stitches in region of heart, with oppression of chest, when lying on l. side; on turning to r. side it ceases.
‖He felt and heard throbbing of heart against ribs, after eating.

Digitized by Google

Heartbeat: very slow, and intermitting; impulse hard, but regular.

Palpitation, as if heart turned forward and over; stoppage of breath and gasping; has to walk about the room; boy, æt. 13; t.

‖Palpitation: after eating; ‖‖trembling with anxiety; with regular slow beats; after awaking, with twitches; with cold face, limbs and body; with pale face and coldness of surface; with sudden oppression of breathing.

Often easily startled when awake, and then feels throbbings or palpitations.

Pulse: full; ‖‖weak; ‖‖not perceptible; frequent and scarcely perceptible; accelerated without fever; very much accelerated, but undulating, and without strength; very rapid; full and rapid; full and irritable; irritable in evening; hard or soft; ‖frequent and small (hepatized l. lung); ‖‖extremely small; small and slow, sixty beats to minute; small and hard, becoming slower and slower; small, weak and quite frequent; could not be counted; ‖extremely rapid and weak (typhus); audible and full; weak and thready.

‖Diminished flow of blood to those parts remote from heart.

30 **Outer Chest.** ‖On upper part of sternum, pressure like a heavy load, while standing.

‖Tearing pain from his r. nipple to chest.

Fine tearing pain near r. nipple, extending down into pelvis.

Fine stitches in nipples.

‖Small rash on outer throat and chest.

‖Cold sweat on upper part of chest. θCholera infantum.

31 **Neck and Back.** Painful drawing or tearing along medulla spinalis.

‖Painful drawing and stiffness on side of neck, when walking in open air.

Stiffness in nape of neck.

Drawing on l. side of nape of neck towards shoulder.

Stitches in neck, near r. shoulder, on motion.

Tensive pain in muscles of nape of neck and lower portion of neck; < on every motion and on turning neck.

Tearing pain in nape of neck, on bending head forward.

Creeping sensation in l. side of neck, above clavicle.

‖Pain in fifth, sixth and seventh cervical vertebræ; < from moving head; > from pressing hand thereon.

Swelling of cervical glands.

‖Jugular veins distended.

‖Heat with an inward vibration spreads from neck and from between shoulders into limbs.

Digitized by Google

‖Rheumatic pain between shoulders.
‖Drawing stitches through and between shoulder blades, extending into chest when moving arms.
‖Stitches near r. shoulder, tearing when moving, from neck up into head, tensive pain with motion and turning.
Sensation of sticking coldness in sacral region, which passed with lightning-like velocity along side of vertebræ to nape of neck and over whole body, alternating with a feeling of transient heat.
Tired feeling in small of back, when walking.
‖Pressure in small of back, with leaden-like heaviness of lower limbs.
Violent pain in back all day.
‖Constricting pain from short ribs to lumbar vertebræ.
Pain runs through back into limbs repeatedly.
‖Coldness in small of back and loins.
‖Inner coldness in loins and small of back; < by walking but a few steps.
‖Sensation as if cool air was blowing on back.
‖Cold feeling on back.
‖Chilliness in back, and as if sweat would break out.

[32] **Upper Limbs.** Drawing, painful stitches through shoulder blades and between them, extending into chest on moving arm, for two days.
Tearing pressure on edges of shoulder blades impeding motion of arm.
Pressure on top of shoulder, particularly r.; drawing pain in left.
Bruised pain in both shoulders.
Tearing pressure in middle of posterior portion of r. upper arm.
Drawing in muscles of l. upper arm, when walking.
Tearing on inside of l. arm, passing at times into thumb and index finger.
Tired feeling in l. arm, commencing at l. shoulder, extending into wrist; > by motion of arm.
Jerking, fine tearing from middle of inner surface of l. upper arm to middle of forearm.
‖Painful pressure in r. elbow joint, < leaning upon it, when it extends into hand.
Bruised pain in r. elbow, wrist and fingers.
Tired feeling from l. elbow into hand.
Sensation of fatigue and heaviness in l. arm.
Pressure and drawing on inner side of both arms, during rest of parts, ceasing when moving them.
πRight arm extended above head, as if catching something; t. θSpasms.

Digitized by Google

‖Convulsive rotation of arms.
‖Rotary movement of r. arm and a little of l.; r. thumb clenched. θCholera infantum.
Arms move involuntarily from time to time; eyes are turned up; girl, æt. 5.
Arm more convulsed than lower limbs.
Arms: stiff; powerless.
Hands: tremble; cold; bluish.
‖His hands do not feel anything he touches.
‖Fingers stiff, open, distorted; thumb drawn back at nearly right angles with its metacarpal.
‖Sensation in joint of thumb as if sprained.
‖Skin of fingers shriveled. θCholera Asiatica.
‖Itching on back of hands, in palms and on knuckles.

[33] **Lower Limbs.** ‖Drawing in nates, as if it would paralyze the thigh.
‖Soreness as if beaten in thighs, after walking.
‖Drawing, bruised pain in r. thigh, and on inner side near and below patella; he fears that the leg will bend forward suddenly.
‖Tearing in anterior muscles of r. thigh.
‖Cracking and creaking in hip, knee, and ankle joints.
Pressing in l. knee and leg, and above r. knee.
‖Stitches on patella.
‖Knees give way; tremble; tottering gait.
‖Heaviness in knees.
‖Legs heavy like a weight, hanging from knee down.
‖Subsultus tendinum of r. lower limb.
‖Cramps in calves. θCholera Asiatica.
Drawing pinching pain on backs of feet, especially on moving them.
‖Joints of feet ache as if sprained, when walking.
‖Tearing, crampy pain on backs of feet, extending up outer side of calves to thighs.
‖Toes drawn up or spread.
‖Tearing in tips of toes, and under nails, when walking.
‖Soreness in toe joints and in corns.
‖Œdema of feet. θPolydipsia.
‖Icy cold feet. θCholera infantum.
‖Lower extremities paralyzed. θTyphus. θSuppression of urine.

[34] **Limbs in General.** Cracking and creaking in hip, knee, and ankle joints.
‖Drawing in fingers, then in toes.
‖Blueness of nails. θCholera infantum.
Limbs as heavy as lead.
‖Limbs are difficult to move.
Stretching, trembling, and general painful sensitiveness of limbs.

Digitized by Google

‖Hands and feet tremble, if he attempts to move them. θShock from injury.
Convulsive agitation in limbs, after tetanic stiffness.
‖Rheumatism returns repeatedly, attacking part after part, even internal organs.
Violent cramps in extremities.
‖‖Coldness of limbs.
πExtremities and limbs cold and cramped; t. θSpasms.
‖Cold extremities, clammy sweat, great prostration. θCholera Asiatica.

[35] **Rest. Position. Motion.** πBetter in sitting posture on sofa and bed; t. θSpasms.
‖Tosses in agony. θCholera Asiatica.
While sitting: cold feeling in r. leg.
Lying down: cutting in head; < contractive pain base of brain; spasmodic stitches in region of heart, with oppression of chest, when on l. side, or turning to r. side.
Standing: > throbbing like beats with a hammer, in cerebellum.
Stooping: < contractive pain base of brain.
Moving: drawing, pinching pain on backs of feet; pain in fifth, sixth and seventh cervical vertebræ from moving head; arms, drawing stitches through and between shoulder blades; nausea, chronic vomiting.
Walking: vertigo; < heaviness and heat in forehead; drawing in decayed upper incisors; < stitches in spleen from front backward; painful drawing and stiffness on side of neck when in open air; a few steps, inner coldness in loins and small of back; drawing in muscles of l. arm; soreness as if beaten; pains in joints of feet; heaviness in legs.
Running: < stitch from front to back in r. hypochonder.
Exertion: bodily < asthma.

[36] **Nerves.** Increase of muscular power.
‖Subsultus tendinum.
‖Great nervous excitability, jerking, twitching and trembling.
‖Trembling of inner parts.
‖Easily startled when awake, and then feels throbbing or palpitation.
Starting with tremor of limbs; t.
Convulsive circular motion.
‖‖Clonic and tonic spasms and convulsions; falls down unconscious.
‖Spasms of children, with sopor; from suppressed eruptions; from suppressed catarrh of head or chest.
‖Spasms, bending body backward and twisting extremities. θCholera.

Digitized by Google

‖Trismus, especially of newborn children; tetanus.
‖Tetanic spasms of arms, hands, feet and lower jaw; body stiff, with slight opisthotonos, from suppressed scarlatina.
‖Eclampsia, with anæmia; coldness.
‖Epilepsy; throws himself back with dreadful shrieks; endeavors to tear everything within his reach.
‖Violent epileptic spasms after vexation; girl, æt. 17.
‖Shock from injury: cold extremities, trembling of tongue, hands and feet.
Excessive weakness, prostration and exhaustion.
Discomfort of whole body.
‖Attacks of malaise.
‖Loses strength suddenly. θCholera Asiatica.
‖Fainting spells follow each other in rapid succession. θViper bite.
‖Want of bodily irritability; insensibility to touch.
‖His whole body is insensible to touch and cold as marble.
‖Feels no inward warmth.
‖A tremor seized on every part of his body; quieted by bathing his hands and face in cold water.
‖Lassitude and depression of spirits, with frequent yawning and stretching.

[37] **Sleep.** ‖Yawning and sleepiness during day; falls asleep in evening.
‖Sleep: profound; deep; unrefreshing; coma.
‖Sleepless and restless.
‖Sleeplessness, alternating with coma.
‖Afraid to go to bed; suddenly all sleep is gone; eyes open against will, and awful sensations disturb him.
‖Snoring during inhalation and exhalation; moaning; sighing.
‖Much sweat during sleep.
‖Talking all night in a gentle voice.
‖Twitchings, also on awaking, followed by palpitation.
‖Gets awake with a nightmare, or cannot get fully awake.
‖Dreams: anxious; fearful; visions of spirits; about what is intended, or what had happened in morning hours.

[38] **Time.** ‖All complaints < as soon as it gets dark.
Night and solitude frighten him.
Night: monomania; delirium; low fever; burning in œsophagus; seminal emissions.
All night: throbbing, stinging in forehead.
Morning: shooting in temples; bad taste; offensive odor from mouth; headache after rising; early attacks of boring in temples, shooting towards eyes or teeth; bad taste, with nausea and vomiting.
10 to 11 A.M.: nausea, vertigo, vomiting, prostration.
Forenoon: cough.

Digitized by Google

1 to 2 P.M.: colic.
Afternoon: movements in intestines, frequent passage of offensive flatus.
Evening: fever.
8 P.M.: drawing in fingers and toes.
All day: soreness or tense, stiff feeling in eyes and eyelids; pain in back.

[39] **Temperature and Weather.** Effects of sunstroke.
He is excessively sensitive to cold air.
The surface cold to touch, yet they throw off all covering, will not remain covered.
After change of weather, catarrh with headache, or diarrhœa with colic.
Sunstroke; sunburns on face and hands; restless and depressed.
Is improved by warm water.
‖Takes cold easily; after it, toothache; weak digestion; fevers, rigors or diarrhœa.
‖‖Very sensitive to cold air.
Better from drinking cold water.
Open air: painful drawing and stiffness on side of neck when walking in open air.

[40] **Fever.** ‖Chill, chilliness and sensitiveness to cold air; crawlings with gooseflesh.
‖General coldness; clammy sweat; circumscribed redness of cheeks; quiet delirium; sinking pulse. θNervous fever.
‖‖Icy coldness all over, with deathlike paleness of face; diminished circulation to parts most distant from heart.
‖Great coldness of surface, with a desire to uncover.
‖Skin becomes very cold. θCholera Asiatica.
‖Rigor, with chattering teeth, thirst, followed by sleep.
‖Chill: with anxiety; with unconsciousness; with pale face; with clonic spasm; congestive chill.
‖Chilly all over, followed by heat and warm sweat on forehead, with nausea.
Increased warmth of body, with redness of face.
‖Heat all over, getting much < while walking.
‖Heat, with distension of veins, increased by every motion.
‖Heat or sweat, with aversion to uncover; he cannot get warm.
‖Sweat profuse, warm and improving.
‖‖Cold, clammy, weakening sweat.
‖Typhus: greatest weakness; cold sweat all over; quickly decreasing temperature, especially of extremities; small, very frequent, scarcely perceptible pulse; great nervous restlessness of body and limbs; collapse in face; cold, pointed nose; automatic motions of muscles; delirium;

Digitized by Google

syncope; snatches of sleep; great thirst, with red, dry tongue; frequent involuntary stools, after much rolling and rumbling in bowels.

Severe and long chill at beginning of yellow fever, with trembling of internal parts and coldness of limbs.

41 **Attacks, Periodicity.** Rheumatic attacks remit, go to one part after another.

Attacks come suddenly.

Every five minutes stitches in temporal bones.

Remissions: in drawing sensation all around head.

42 **Locality and Direction.** Within outward: pressing headache; pressing on eyeballs.

Backward: stitches in spleen.

Left: of neck, creeping; shoulder, tired; lung, stitches through; chest and arm, trembling, it ceases turning to r. side; lung hepatized; cutting l. side of occiput; ear pain; side of nose, drawing; nostril, itching; sided headache; fine tearing in head; drawing in lower abdomen; hard pressure in lower abdomen; root of penis, while standing pressure outward, as if a hernia would protrude; spasmodic stitches in region of heart when lying on l. side; drawing in l. side of nape of neck towards shoulder; ear, pressure by jerks; stitches in l. cheek; zygoma drawing; pharynx, stitches; side, drawings.

Right: itching, crawling in r. groin, < on rubbing; spasmodic stitches in region of heart, ceases on turning to r. side; thigh, drawing bruised pain in; head drawn to r. shoulder; eye, pressure; side of nose, boring; nose stopped; lower jaw, drawing; hypochonder, a stitch; lower abdomen, sticking, drawing; itching, crawling in groin; lung, hepatized; shoulder, pressure; arm, rotary movement; thigh, tearing; lower limb, subsultus tendinum.

43 **Sensations.** As if bruised, headache; mouth as after eating peppermint lozenges; as if throat was sore and torn; as if she had eaten rancid substances; pain in stomach as if distended; as if cool air was blowing on back; thumb as if sprained; as if he could fly; as if brain was compressed on all sides; as if nerves of head were all drawn up; as if brain was sore; mouth as if swollen; as if cold air was blowing on covered parts.

Boring: in temples; r. side of nose; in r. zygoma.

Jerking: fine tearing from middle of inner surface of l. upper arm.

Tearing: fine, in head; sticking in forehead; in r. temple and forehead; in ears, behind and above; pain from r. nipple to chest; along medulla spinalis; pain in nape

Digitized by Google

of neck; r. shoulder; r. upper arm; r. thigh; pain in backs of feet; in tips of toes; here and there in joints; on inside of l. arm.

Cutting: jerks or shocks from forehead and temples towards middle of brain; shooting through gum to roots of incisor and canine teeth; colic at night; region of navel; deep in windpipe.

Stitches: starting in temporal bone; r. half of brain; in ears; from a draught of air; violent in root of nose; l. cheek; in chin; shoot from tooth into eye; in palate; in stomach; r. hypochonder; in spleen; cœliac ganglia; in chest; through to spine; in region of heart; in nipples; in neck near r. shoulder; on patella.

Shooting: towards eyes or teeth; here and there in joints; from temples; through gum to roots of incisor and canine teeth.

Sticking: drawing heaviness below crest of ilium; burning before urination; coldness in sacral region.

Stinging: anterior corner of nostrils; r. side of lower abdomen; on inner surface of prepuce; in nipples.

Biting: in external canthus; itching in eyelids; edges of lids; in back part of urethra.

Burning: in edges of lids; in ears; in face; on edge of tongue; end of tongue; from palate down œsophagus; anguish at pit of stomach; above navel and about navel; below anterior crest of ilium; before and during urination; dryness of skin; in abdomen; in bowels.

Smarting: in eyelids; in rectum.

Chapped feeling in rectum.

Scraping: back part of tongue; in throat.

Gnawing boring: in molars.

Aching: in middle of head; in both hypochondria; anterior part of liver; in abdomen; joints of feet.

Drawing: pain in r. thigh; pain in back part of feet; through shoulder blades; pain in l. shoulder; l. upper arm; inner side both arms; r. side of head; all around head; l. side of nose; l. zygoma; in angle of r. lower jaw; r. side; l. side; along medulla spinalis and stiffness on l. side of neck; stitches through between shoulder blades; in nates; in upper incisors; r. side of abdomen; in fingers and toes.

Pressure: headache; r. temple; by jerks over l. ear; on eyeballs, from behind; pain pit of stomach; pain in both hypochondria; l. side lower abdomen; about navel; in small of back; with leaden-like heaviness of lower limbs.

Pressing: outward, frontal headache; on upper part of frontal bone; r. side of vertex; in occiput; above r. eye;

Digitized by Google

above navel; pain in cœliac ganglia; in bladder; in chest; upper part of sternum; on chest like a heavy load; on top of r. shoulder; painful, in elbow joint; on inner side of both arms; l. knee and leg.

Pinching: region of navel; pain on backs of feet.

Soreness: as if brain was sore; eyes and eyelids; in thighs; in toe joints and in corns.

Bruised: r. side; l. side; pain in both shoulders, as if beaten; pain in r. elbow; wrist and fingers; pain in r. thigh.

Rheumatic pain between shoulders.

Pain: in l. ear from a dark red pimple; in epigastric region; as if distended; in periosteum of toes; in bladder; in vetebræ.

Violent pain: in back.

Throbbing: headache in forehead; stinging in forehead; in temples; of temporal arteries; like beats with a hammer in cerebellum.

Tense: feeling in eyes and eyelids; pain in masticators; pain in muscles of nape of neck.

Swollen: tongue; mouth and gums.

Stiff: feeling in eyes and eyelids.

Numb: tongue.

Uneasy: feeling in back of head.

Contraction: as if bound together, in cerebellum and glabella; pain base of brain; painful under short ribs through lumbar vertebræ; in testicles; in larynx; of chest.

Constriction: pain below short ribs; in larynx; pain from short ribs to lumbar vertebræ.

Cramp: in stomach; on backs of feet; all over body; in sphincter ani; in extremities.

Heaviness: in forehead; in vertex; r. side; in abdomen; in knees; of limbs; in l. arm.

Tired: feeling in small of back when walking; feeling in l. arm; feeling from l. elbow into hand.

Fatigue: and heaviness in l. arm.

Creeping: l. side of neck.

Crawlings: run over limbs and belly; about head; r. groin.

Warmth: in œsophagus.

Heat: in forehead; in vertex; in face; in mouth and stomach; violent in upper and lower abdomen.

Cooling sensation rising up throat to roof of mouth; in chest.

Cold: in cerebellum; hands; mouth; in stomach; feeling deep in windpipe; in small of back and loins.

Itching: l. nostril; swelling on gums; on inner surface of

Digitized by Google

prepuce; in groin; in eyelids; on back of hands; in palms and on knuckles.

Dryness; all over body; on back part of tongue; in bifurcation of trachea.

" **Tissues.** ‖Soft parts drawn in.

‖Cyanosis; external parts turn black.

‖Internal congestions.

‖Cramps in inner and outer parts.

‖Cracking of joints.

‖Stenosis after inflammations.

‖Dropsy of external parts; less often of internal.

‖Glands inflamed.

‖Flow of black coagulated blood. θViper bite.

‖Pains in periosteum of all bones.

‖Tearing shooting here and there in joints.

‖Greatest emaciation.

‖Rheumatic fevers; pains changing place, persistently return.

‖Anthrax: *Camphor.* relieved pain and swelling; prevented formation of new pustules; gangrenous aspect of wound changed for the better; man, æt. 65.

" **Touch. Passive Motion. Injuries.** ‖‖Skin of whole body painfully sensitive, slightest touch hurts.

External pressure: < contractive pain in base of brain; > rush of blood to head.

Disappearing on pressure: heat in head.

Sensitive to touch: distended stomach.

From pressing hand thereon: improved pain in upper vertebræ.

Painful pressure in r. elbow joint: < leaning upon it.

‖‖Effects of shock from injury: surface of body cold, face pale and bluish, lips livid; diarrhœa; pulse feeble; nervous anxiety and stupefaction; sighing respiration; great exhaustion.

" **Skin.** Skin: ‖‖flabby; relaxed; leather-like; loose; sensitive; burning; itching.

‖Skin dry, even in bed; not a trace of sweat; dry with heat.

‖Skin tense, hot, dry, like parchment.

‖Skin cold and bluish on face and hands, looks shriveled.

‖Skin cold as marble, frightfully cold to touch, still patient would not be covered; very great excitability and fear of being left alone.

‖Petechiæ over entire body, which is cold. θViper bite.

‖Erysipelatous inflammation, with coldness, paleness and sinking, and aversion to being covered.

‖Measles: pale face, cold skin, bluish; tetanic rigidity; dysuria; eruption does not appear.

Digitized by Google

‖All sequelæ of measles.
‖Scarlatina: with cold, blue, hippocratic face; rattling in throat; with hot breath, hot sweat on forehead; child will not be covered.
‖Sudden sinking away of variola pustules.
‖Bedsores.
‖Blood blisters; erysipelas; gangrene; hard spots.

47 **Stages of Life, Constitution.** Irritable, weakly blondes most affected. Scrofulous children most sensitive to *Camphor.*

Boy, æt. 13; vertigo and palpitation; t.
‖Girl, æt. 17; epilepsy.
‖A man, æt. 65; anthrax.

48 **Relations.** Antidotes: *Opium, Sp. nitr. dulc., Dulcam., Phosphor.*

Camphor antidotes: *Canthar., Cuprum, Lycop., Squilla,* and the effects of so-called worm medicines, tobacco, bitter almonds, and other fruits containing prussic acid; likewise for the secondary affections remaining after poisoning with acids, salts, metals, poisonous mushrooms, etc.

In most other cases the smelling of *Camphor* is not antidotal, but palliative, by producing the symptom "pain better while thinking of it."

Vaccine virus failed to take effect when kept in proximity to *Camphor.*

Incompatible: after *Nitrum.* Tea, coffee and lemonade, as a rule, do not interfere, but in some cases coffee aggravated and was followed by vomiting.

Compare: *Carbo veg.* in coldness from undeveloped exanthems, in collapse, and in continuous epistaxis; *Canthar.; Cuprum; Dulcam.; Lycop.; Nitrum; Opium* in narcotism, heart affections; *Phosphor.* in anguish and burning in cholera; *Sp. nitr. dulc.; Squilla; Verat. alb.*

CANNABIS INDICA.

East Indian Hemp. *Cannabineæ.*

[1] **Mind.** ‖Head feels very heavy, loses consciousness and falls.

‖Every few moments he would lose himself, and wake up, as it were, to those around him.

‖‖He forgot his last words and ideas, and spoke in a low tone with a thick voice, as if tired.

‖‖He begins a sentence, but cannot finish it, because he forgets what he intends to write or speak.

‖‖Inability to recall any thought or event, on account of different thoughts crowding on his brain.

‖‖He could not read, partly on account of dreamy spells, and partly because he had not full power of vision.

‖Very absent-minded.

‖‖Constantly theorizing.

His mind is filled with ridiculous speculative ideas.

‖Exaltation of spirits, with excessive loquacity.

‖Great exaltation of mind; at times with enthusiastic language.

‖‖Exaltation of spirits, with great gayety and disposition to laugh at the merest trifle.

‖He could not fix his thoughts upon one subject.

‖Sudden transition from one fantasia, when completed, to another; the general character may remain unchanged; after visions of great sublimity usually follow visions of a quiet, relaxing and recreating nature.

‖Hallucinations and imaginations innumerable; that he is gradually swelling, his body becoming larger and larger; that some one calls him; that he hears numberless bells ringing most sweetly; imagines he hears music; shuts his eyes, and is lost for some time in the most delicious thoughts and dreams.

‖‖Exaggeration of duration of time and extent of space; a few seconds seem ages; a few rods an immense distance. θDelirium tremens.

‖It appeared to him that an occurrence which happened quite recently, had taken place long ago, and again that something that had to happen soon, seemed exceedingly tardy in coming.

A sense of having two existences; double consciousness.

Digitized by Google

‖‖Fixed ideas.
‖Incoherent talking.
‖‖Laughs indiscriminately at every word said to him.
‖Uncontrollable laughter, till the face becomes purple, and back and loins ache.
‖‖Full of fun and mischief, and laughs immoderately.
‖‖Moaning and crying.
‖‖Great apprehension of approaching death.
‖He was in constant fear he would become insane.
‖‖Horror of darkness.
‖Anguish, accompanied by great oppression; > in open air.
‖Great mental agitation, anxiety, irritability, nervousness. θMenorrhagia.
‖Nervous; she trembles at least source of agitation. θHeadache.

[1] **Sensorium.** Vertigo on rising, with stunning pain in back part of head, and he falls.
Heavy pressure on brain, forcing him to stoop.
Dulness of head.

[2] **Inner Head.** Assists brain to labor after a debauch.
Violent shocks pass through brain, on regaining consciousness.
Heavy insurmountable pressure on brain, forcing him to stoop.
Dull drawing pain in forehead, especially over eyes.
Throbbing aching pain in forehead.
Jerking in r. side of forehead, towards interior and back part of head.
Severe stitch in r. temple, gradually changing to pressive pain.
Dull stitching in r. temple.
Pain in whole r. side of head.
Aching in both temples, most severe in right.
A sensation as of brain boiling over and lifting cranial arch like lid of a teakettle.
‖‖Feels as if top of head was opening and shutting, and as if calvarium was being lifted.
Dull, heavy, throbbing pain through head, with a sensation like a heavy blow on back of head and neck.
‖Heavy weight at back of head, from which pains shoot up sides of head to temples and vertex; pain at midday forces her to cry.
Frequent involuntary shaking of his head.
‖Headache, accompanied by flatulence, continuing until he can pass wind upward or downward; throbbing of occiput.
‖Megrim, or sick headache.

Digitized by Google

[4] **Outer Head.** Scalp and skin of forehead felt as though tightly stretched over skull.
Crawling in scalp, on top of head.
Soreness of scalp to touch.
[5] **Sight and Eyes.** Dimness of vision.
Visual clairvoyance.
Sensitiveness of r. eye to light.
Letters run together while reading.
Twinkling, trembling and glimmering before eyes.
Eyes are bright and shiny.
Injection of vessels of conjunctiva of both eyes.
Jerking in external corner of eye and eyelid.
[6] **Hearing and Ears.** Hearing very acute.
Noise in ears, like water boiling.
Periodical singing in ears during his dreamy spells, ceasing when he came to himself.
Ringing and buzzing in ears.
Throbbing and fulness in both ears.
Aching in both ears.
[8] **Upper Face.** ‖Countenance dejected and careworn. θHeadache.
Wearied, exhausted appearance.
Drowsy and stupid look.
Pale face.
Tense feeling in facial muscles.
Skin of face, especially of forehead and chin, feels as if drawn tight.
[9] **Lower Face.** Dryness of mouth and lips.
Lips feel as if glued together.
[10] **Teeth and Gums.** Gritting and grinding of teeth while sleeping.
[11] **Taste and Tongue.** Every article of food is extremely palatable.
Metallic taste.
Stammering and stuttering.
[12] **Inner Mouth.** Dryness of mouth, without thirst.
White, thick, frothy, and sticky saliva.
[13] **Throat.** Throat is parched, accompanied by intense thirst for cold water.
[14] **Appetite, Thirst. Desires, Aversions.** Ravenous hunger, not appeased by food.
Desire for and dread of water.
[15] **Eating and Drinking.** While eating, his stomach felt swollen and his chest oppressed, as if he would suffocate; was forced to loosen his clothes.
[17] **Scrobiculum and Stomach.** Pain in cardiac orifice, > by pressure.
πSensation of warmth in stomach. θGonorrhœa.

Digitized by Google

[19] **Abdomen.** ‖Flatulence on rising in morning. θHeadache.
Flatulent rumbling in bowels, at night.
Abdomen feels swollen; > by belching.

[20] **Stool and Rectum.** Sensation in anus, as if he was sitting on a ball; as if anus and a part of urethra were filled up by a hard, round body.
Painless yellow diarrhœa.

[21] **Urinary Organs.** ‖Constant dull pain in region of r. kidney, and in glans penis.
Pain in kidneys when laughing.
Sharp stitches in both kidneys.
Aching in kidneys, keeping him awake at night.
Burning in kidneys.
Urine: loaded with slimy mucus, after exposure to damp cold; pain in bladder and urethra; profuse, colorless.
Urinates frequently, but in small quantity.
Frequent micturition, with burning pain, in evening.
Has to wait some time before urine flows.
Has to force out last few drops with hand.
Urine dribbles out after stream ceases.
Urging to urinate, with much straining, but cannot pass a drop.
Burning and scalding, or stinging pain in urethra, before, during and after urination.

[22] **Male Sexual Organs.** Sexual desire excessively increased; satyriasis; priapism.
Erections: while riding, walking, and also while sitting still; not caused by amorous thoughts; violent; painful.
Penis relaxed and shrunken.
Uneasiness, with burning sensation in penis and urethra, accompanied by frequent calls to urinate.
Sharp prickings, like needles, in urethra, so severe as to send a thrill to cheeks and hands.
Gonorrhœa: unaccompanied by pain; lightheadedness; slight tingling, with inflammation around meatus; slight burning during micturition; discharge yellowish-white and very profuse.
Feeling in urethra as if there was a gonorrhœal discharge.
On squeezing glans penis, a white glairy mucus oozes out.
Chordee.
Itching of glans penis.

[23] **Female Sexual Organs.** Sexual desire increased.
Very profuse menstruation.
‖Menses very profuse and painful, dark, but without clots; lasting eighteen days. θMenorrhagia.
‖Violent uterine colic, with cramps in extremities. θPost-partum hemorrhage.
‖Spasmodic uterine colic; pains returning like labor-pains; great agitation and sleeplessness. θMenorrhagia.

Digitized by Google

[24] **Pregnancy. Parturition. Lactation.** ‖Threatened miscarriage, with discharge of blood from vagina, in eighth month of pregnancy; burning in making water, with purulent discharge. θGonorrhœa.

[25] **Voice and Larynx. Trachea and Bronchia.** Inability to measure compass and volume of voice when speaking.

[26] **Respiration.** It requires great effort to take a deep inspiration.

Oppression of chest, with deep, labored breathing, < when ascending.

Feels as if suffocating, and has to be fanned.

[27] **Cough.** Rough cough, with scraping immediately under sternum.

Hard, dry cough.

[28] **Inner Chest and Lungs.** Stitches extending from both nipples through chest.

[29] **Heart, Pulse and Circulation.** Palpitation of heart, which awakens from sleep.

Pressing pain in heart, with dyspnœa, whole night.

Painful sticking as with prongs of a fork in heart.

Stitches in heart, accompanied by great oppression; the latter > by deep breathing.

Pulse slow (as low as 46); rapid (as high as 160).

[31] **Neck and Back.** ‖Chin suddenly drawn down to sternum, lasting three or four days, when it relaxed.

Pain across shoulders and spine; must stoop, cannot walk erect.

Pain, with drawing through lumbar vertebræ, on standing.

πWarmth in spine extending to head.

‖Backache, < catamenial periods, which occur every two weeks, and are scanty.

[32] **Upper Limbs.** Agreeable thrilling through arms and hands.

Coldness of r. hand, with stiffness and numbness of r. thumb.

[33] **Lower Limbs.** Right limb feels paralyzed when walking.

Weariness in both limbs, almost amounting to paralysis; < in left.

Agreeable thrilling in both limbs, from knees down, with a sensation as if a bird's claws were clasping knees.

Is unable to walk up-stairs on account of an almost entire paralysis of limbs, with stiffness and tired aching in both knees.

On attempting to walk, he experienced intensely violent pains, as if he trod on a number of spikes, which penetrated soles and ran upward through limbs to hips; < in r. limb and accompanied by drawing pains in both calves.

Shooting pains in joints of toes of l. foot, < in great toe.

Digitized by Google

Aching and stitching pain in ball of l. great toe.
Numb feeling of sole of l. foot, then whole foot, increasing to a numbness of whole limb.
Pricking in feet.

[34] **Limbs in General.** Heaviness of arms and legs.
Paralysis of lower limbs and r. arm.

[35] **Rest. Position. Motion.** Rest gives general relief; great desire to lie down in daytime.
Standing: pain, with drawing through lumbar vertebræ.
Walking: cannot walk erect, pain across shoulders; r. limb feels paralyzed; is unable to walk up-stairs, or, attempting to walk, violent pains through lower extremities.

[36] **Nerves.** Trembling with mental weakness.
Thoroughly exhausted after a short walk.
Felt so weak that he could scarcely speak, and soon fell into a deep sleep.
Catalepsy.
‖Exaltation of all powers of mind and body before fit.
θEpilepsy.

[37] **Sleep.** Desire to sleep, but inability to do so.
Excessive sleepiness; great desire to lie down in daytime.
Felt so weak that he could scarcely speak, and soon fell into a deep sleep.
Starting of limbs while sleeping, which awoke him, when he feared he would have a fit.
Talking during sleep.
Voluptuous dreams, with erections and profuse seminal emissions.
Dreams: of danger, and of perils encountered; of dead bodies; prophetic; vexatious; melancholy.
In daytime, dreams, returning periodically, or dreamy attacks.
Nightmare every night, as soon as he falls asleep.

[38] **Time.** Daytime: dreams.
Midday: heavy weight at back of head.
Evening: burning pain; frequent micturition.

[39] **Temperature and Weather.** Is not so sensitive to cold as usual.
Damp, cold weather: urine loaded with slimy mucus.

[40] **Fever.** Loss of animal heat.
General chilliness.
Coldness of face, nose and hands, after dinner.
Increased heat of body.
Profuse sticky sweat standing out in drops on his forehead.

[41] **Attacks, Periodicity.** Every two weeks: backache, < catamenial periods.

[42] **Locality and Direction.** Right: jerking in forehead

Digitized by Google

severe stitch in temple; pain in head; aching in temple; eye, sensitive to light; limb feels paralyzed; on attempting to walk, violent pains in legs.

Left: weariness and paralysis of legs; numb feeling in foot.

45 **Sensations.** An indescribably "queer" feeling pervades whole body.

Feeling of lightness or buoyancy; as if he was raised from ground and could fly away.

Sensation as if single parts became larger and thicker.

As if brain boiled over; as if top of head was opening and shutting; as if calvarium was being lifted up; as of a heavy blow on back of head and neck; as if he was sitting on a ball; as if suffocated; as if a bird's claws were clasping knees; as if he had on a number of spikes; scalp and skin of forehead felt as though tightly drawn over skull; lips as if glued together; as if anus and part of urethra were filled up by a hard sound body.

Stitch: r. temple; sharp, in both kidneys; extending from both nipples through chest; in heart; in ball of l. great toe.

Sticking: as with prongs of a fork in heart.

Stinging: pain in urethra.

Pricking: in feet; over whole body; sharp like needles in urethra.

Shooting: pains in joints of toes of l. foot.

Burning: in kidneys; frequent micturition with burning; and scalding in urethra; in penis; of skin.

Jerking: in r. side of forehead; in external corner of eye and eyelid.

Drawing: pain in forehead; through lumbar vertebræ; pain in both calves.

Pressive: pain in r. temple; pain in heart.

Pressure: on brain; on skin excites burning.

Stunning: pain in back part of head.

Aching: pain in ball of l. great toe; in both temples; in both ears; in kidneys; tired in both knees.

Soreness: of scalp to touch.

Dull: pain through head; in region of r. kidney and in glans penis.

Pain: in whole side of head; in bladder and urethra across shoulders; in cardiac orifice; in kidneys.

Throbbing: aching pain in forehead; pain through head; in both ears.

Thrilling: agreeable, through arms and hands; in both limbs.

Numbness: of r. thumb; of sole of l. toe; over whole body; of l. foot

Digitized by Google

Formication: or itching on various parts.
Crawling: in scalp; on top of head.
Paralyzed sensation: r. limb; r. arm.
Tense: feeling in facial muscles; skin of face feels as if drawn tight; skin of head.
Heavy: pain through head; arms and legs.
Weight: at back of head.
Warmth: in stomach; in spine, extending to head.
Coldness: of r. hand.
Itching: of glans penis.
Dryness: of mouth and lips.

" **Tissues.** Loss of muscular sense; anæsthesia.

" **Touch. Passive Motion. Injuries.** Pressure: on skin excites burning.

" **Skin.** Pricking over whole body with numbness, often pleasurable.
Formication or itching on various parts.
Tension in skin of head and face.
‖Is very anæmic. θMenorrhagia.
Pressure on skin excites burning.
Anæsthesia; while standing is not conscious of touching ground.

" **Stages of Life, Constitution.** Affects persons of nervous and sanguine temperament most; the bilious nearly as much; the lymphatic but slightly, as with vertigo, nausea, coma, or muscular rigidity.
‖A woman, æt. 30. θMenorrhagia.
‖Mother of three children. θMenorrhagia.

" **Relations.** Compare *Cann. sat.*, especially Chapter 48, for drug relations, as the comparisons doubtless apply to *Cann. ind.*

CANNABIS SATIVA.

American or European Hemp. *Cannabineæ.*

[1] **Mind.** ‖Seems to be in a dream, as if things were not real; feels as if she did not know where she was; objects seem strange; feels at times as if she was somebody else; memory bad; forgets when speaking what she is going to say, or what she is going to do, unless she makes a note of it; cannot follow what persons say to her; when writing repeats or omits words. θPost-partum hemorrhage.

‖Makes mistakes in writing.

‖Says one thing for another when speaking.

‖Time seems prolonged. θPost-partum hemorrhage.

‖Voices, including her own, seem to come from a distance; her own voice seems strange, as if it was somebody else speaking. θPost-partum hemorrhage.

‖Thoughts seem to stand still.

‖Feeling as if she would lose her senses. θPost-partum hemorrhage.

Hasty manner, with chill.

‖Sadness and melancholy.

‖Despondent in forenoon, lively in afternoon.

Lectrophobia.

‖Anxious and apprehensive feeling at pit of stomach, with oppression of breath and palpitation; rising of something warm into throat, with arrest of breathing; soon something became lodged in trachea, with flushes of heat.

[2] **Sensorium.** Vertigo: when standing, with swimming of head; when walking, with tendency to fall sideways.

‖Giddiness, when walking, with fear of falling. θPost-partum hemorrhage.

‖Head feels as if it would fall in all directions. θPost-partum hemorrhage.

[3] **Inner Head.** Rush of blood to head, causing heat and flushes.

Violent throbbing, with heat of head, and fever.

Forehead feels compressed, from margins of orbits to temples; not relieved by bending forward.

Pressure below frontal eminences, extending deep through brain to occiput.

Pressure in temples.

Digitized by Google

‖Pain in r. temple and vertex, as if opening and shutting; begins on waking, lasts all day; < from noise. θPost-partum hemorrhage.

[4] **Outer Head.** Sensation as if drops of cold water were falling on head.
Crawling in scalp.

[5] **Sight and Eyes.** ‖After looking long, mistiness before eyes. θPost-partum hemorrhage.
Weakness of eyes and diminished vision.
Alternating dilatation and contraction of pupils in same light.
Sensation of spasmodic drawing in eyes.
Pressure from back of eyes forward.
Sensation as if sand was in eyes.
Keratitis parenchymatosa (not pannus), in which whole thickness of cornea is red and vascular.
Cornea becomes obscured (film before eyes).
Leukoma.
Cornea becomes opaque and a pellicle appears on it.
‖Opacity of cornea after a bee-sting.
‖Maculæ and ulcers on cornea.
‖‖Scrofulous eye troubles.
‖Cataract.

[6] **Hearing and Ears.** Ringing in ears, and throbbing.

[7] **Smell and Nose.** Dryness in nose, and sensation of stoppage.
Stupefying pressure, like from a blunt point, on root of nose.
Bleeding of nose, sometimes to fainting.
Large pimples on nose, surrounded by red swelling.
Sensation as if nose was enlarging and obstructing vision.
Swelling and copper redness of nose.

[8] **Upper Face.** Face pale.
Left cheek red, not hot; right one pale; pain in r. tooth.
Slight pulsations in various portions of face, particularly in l. buccinator.

[9] **Lower Face.** Eruption on vermilion border of lips.
Numbing compressing pain in l. side of chin, affects teeth of same side.

[10] **Teeth and Gums.** Pain in hollow teeth.

[11] **Taste and Tongue.** ‖Nasty taste in mouth, on waking, returns after meals. θPost-partum hemorrhage.
Loss of taste.
Difficult speech, at times stuttering.

[12] **Inner Mouth.** Dryness of mouth, throat and lips.

[13] **Throat.** Burning dryness of palate, mornings.
Dryness of throat.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Does not like

Google

meat, of which she used to be fond. θPost-partum hemorrhage.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations of air; of bitter, acrid fluid.

[17] **Scrobiculum and Stomach.** Cramp in stomach.

Uninterrupted dull stitches near pit of stomach, just below ribs, momentarily > by bending trunk backward and forward.

[18] **Hypochondria.** Dull stitching in l. side, just below ribs, when breathing and when not.

[19] **Abdomen.** Intestines feel bruised.

Painful jerks in abdomen, moving from place to place, as if something living was in it, accompanied by drawing from l. hip bone across to r., and thence to knee; still, however, the pain remained in hip, where it seemed like a tearing, pushing pain.

Pain and pressing outward in abdominal ring, as if parts would suppurate.

Feeling as if intestines would drop.

Outward pressure in abdominal ring.

‖Ascites after abuse of quinine.

[20] **Stool and Rectum.** During and after stool burning in anus.

Pressure in rectum and sacral region, as if intestines were sinking down and would be pressed out, while sitting.

Constrictive pain in anus, together with a sensation as if thighs were drawn together, so that she was obliged to close them.

Sensation like trickling of cold water in anus.

Constriction of anus.

‖Constipation. θUrinary troubles. θPhimosis.

[21] **Urinary Organs.** Ulcerative pain in region of kidneys.

Nephritic colic of horses.

Sensation of soreness, and inflammation of kidneys and bladder.

‖Penis swollen; thick purulent discharge; difficulty in making water, not from burning, but from stoppage at intervals, as if from spasm; child, æt. 6. θUrethritis.

Drawing pain from region of kidneys to inguinal glands, with anxious, nauseous sensation in pit of stomach.

Burning smarting in urethra, from meatus backward; posteriorly stitching while urinating.

Urethra feels inflamed and sore to touch, along its whole length; during erections tensive pain; feels drawn up into knots.

Burning while urinating, but especially just after.

Burning along urethra, at commencement and end of urinating.

Digitized by Google

When not urinating, burning pain in forepart of urethra, with pressure to urinate almost constantly.
Stitches along urethra, when not urinating.
Jerking stitches in posterior portion of urethra, when standing.
Long standing dysuria.
‖Pain extending from orifice of urethra backward, burning-biting, posteriorly more sticking, while urinating.
‖Tearing as if in fibres of urethra, in form of zigzag.
‖Urging to urinate, with pressive pain.
Stream of urine forked.
Urine: white, turbid, or red and turbid; full of fibres.
Enuresis; paralysis of bladder, particularly in old people.
‖Pain in neck of bladder and both kidneys; urging to urinate every fifteen or twenty minutes; urine yellowish-white and the last mixed with blood, scalding when passed, but < after; at close of urination very painful spasmodic closing of sphincter and, at same time, very severe stricture and drawing up of anus; constant urging to stool, with inability.

[32] **Male Sexual Organs.** ‖Priapism, with free mucoid discharge. θGonorrhœa.
Increased sexual desire.
πNocturnal emission mixed with blood.
Frequent erections, followed by stitches in urethra.
Prepuce dark red, greatly swollen, sensitive to touch.
Penis swollen, without marked erections.
Penis painful, as if sore or burnt, when walking.
Pressive dragging sensation in testicles, when standing.
Great swelling of prepuce, approaching to phimosis.
Dark redness of glans and prepuce.
Light red, lentil-sized spots on glans.
‖Phimosis, accompanied by constipation.
‖‖Inflammatory stage of gonorrhœa. See 21.
Discharge of watery mucus from urethra; painless discharge of a clear transparent mucus from urethra, without erection; closing of orifice by mucus.
Swelling of glans penis; a sort of erection without sensation; coldness of genital organs, with warmth of rest of body; prepuce dark red, hot and inflamed (see *Sulphur*).
Smarting, as from excoriation of margin and inner side of prepuce; continual burning of prepuce and glans for four days; bathing it in cold water brought on a pain as from excoriation; skin of prepuce is covered with bright red spots size of a pea; when walking, penis feels sore and burnt.

[33] **Female Sexual Organs.** Increased sexual desire; nymphomania; sterility.

Digitized by Google

Too profuse menses, with dysuria.
‖Infantile leucorrhœa.
Gonorrhœa: cutting between labia during micturition, swelling of vagina, orifice of urethra closed with mucopus, urine voided in a spray.

[24] **Pregnancy. Parturition. Lactation.** Threatened abortion in gonorrhœic patients.
‖Post-partum hemorrhage.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice weak, often inaudible.
In morning, tough mucus in lower portion of trachea, cannot be dislodged by coughing and hawking; after hawking and coughing, trachea feels raw and sore; finally mucus loosens of itself, and he must hawk it up frequently.
Things go down "the wrong way" in swallowing.

[26] **Respiration.** Oppression of breathing, from tensive, pressive pains in middle of sternum, which is also sore to touch; sleepiness.
Obliged to breathe deeply; chest oppressed; sensation of apprehension in throat.
‖Dyspnœa and extreme agitation; must sit most of the time. θHumid asthma.
‖Wheezing and mucous râles. θBronchitis.
‖Has to stand by open window, leaning forward. θAsthma.

[27] **Cough.** Hacking cough, arises from pit of throat, with a cool, salty fluid deep in throat, posteriorly.
Cough, with a green, viscid expectoration.
Cough, with burning in chest.
‖Cough, with blood-spitting and stitches in r. side. θPleurisy.

[28] **Inner Chest and Lungs.** Sore feeling under upper part of sternum.
‖A digging beneath upper part of sternum, without oppression of breath.
‖Stitches in r. side. θPleurisy.
‖Spasmodic affections of chest and abdomen, accompanied by urinary troubles.

[29] **Heart, Pulse and Circulation.** Throbbing in scrobiculum.
‖Visible palpitation. θPneumonia of horses.
Violent beating of heart, on moving body and on stooping, with warm sensation about heart.
Pulse very weak, slow, frequently almost imperceptible.

[31] **Neck and Back.** Drawing in neck, extending upward.
Pain in small of back.
Pain in middle of back, as if some one was pinching it with pincers; pain extending gradually towards abdomen.

Digitized by Google

‖Pressure as if with a sharp point in coccyx.

[32] **Upper Limbs.** Rending pressure on shoulder, in attacks.
Coldness and cold feeling of hands.
Formication and numb feeling in tips of fingers.
Sudden lameness of hand; trembling of hand, when attempting to clasp anything.
Palms of hands hot and dry, with kidney trouble.
‖Contraction of fingers after a sprain.

[33] **Lower Limbs.** Cramplike, jerking, digging pain in r. hip.
Drawing pains in feet.
‖Violent pain with contraction in tendo-achillis and l. foot.

[34] **Limbs in General.** Weariness of limbs.
Neuralgic pains in limbs.
Rheumatic drawing in periosteum of long bones, as if they had been bruised by blows; during motion.
Arthritic rheumatism, with dyspnœa.

[35] **Rest. Position. Motion.** Sitting: pressure in rectum and sacral region.
Standing: swimming of head; pressive, dragging sensation in testicles.
Bending forward: forehead feels compressed, not relieved.
Motion: rheumatic drawing in long bones.
Walking: fear of falling; giddiness; penis feels sore and burnt.

[36] **Nerves.** Tetanic spasms of upper limbs and trunk.
Hysteria.
‖Faint feeling, sometimes faints right off. θPost-partum hemorrhage.

[37] **Sleep.** Sleepiness, but fear of bed.
Uneasy sleep at night.
Dreams disagreeable and frightful; disappointed in everything and is filled with anxiety.
Awoke at night from slumber, with frightful dreams, not knowing where he was.
Vivid, lascivious dreams after midnight.

[38] **Time.** Night: sweat wanting, or, only on forehead; burning heat.
Morning: dryness of mouth.
Day: pain in r. temple and vertex.

[39] **Temperature and Weather.** Uncovering: > unendurable, fine stitching over whole body, like from a thousand needle-points, at night, when sweating from warm covering.

[40] **Fever.** Chill, with thirst and shaking.
Shivering over whole body.
External coldness of whole body, with exception of face.
Heat only in face, and slight.
Nightly burning heat.

Google

Sweat wanting, or, only on forehead and neck, at night.

[42] **Locality and Direction.** Right: temple and vertex pain; side of chest, stitches; digging pain in hip.

Left: side of chin, numbing compressing pain; dull stitching just below ribs; drawing from hip bone across to right.

[43] **Sensations.** Feels as if hot water was poured over him.

Sensation as if drops of cold water were falling: on head; from anus; from heart.

As if opening and shutting, temples and vertex; as if sand was in eyes; as if nose was enlarging and obstructing vision; as if something living was in abdomen; as if intestines would drop; as if thighs were drawn together; as if cold water trickled in anus; urethra feels as if drawn up into knots; penis as if sore or burnt, as if excoriated; long bones, as if bruised; as if some one was pinching middle of back with pincers; as if parts had enlarged.

Unendurable fine stitching over whole body, like from a thousand needle-points, at night, when sweating from warm covering, > when uncovering.

Violent pain: in tendo-achillis and l. foot.

Jerks: painful, in abdomen; in urethra; lower limbs.

Stitches: near pit of stomach; while urinating; along urethra; in r. side of chest; fine, unendurable over whole body.

Sticking: in urethra while urinating.

Cutting: between labia.

Tearing: pain in hip; as if in fibres of urethra.

Rending: pressure on shoulder.

Neuralgic pain: in limbs.

Digging: of back; pain in r. hip; beneath upper part of sternum.

Drawing: in eyes; pain from region of kidneys to inguinal glands; up of anus; in neck; pains in feet; rheumatic, in periosteum of long bones; from l. hip-bone to r. and thence to knee.

Spasmodic: drawing in eyes.

Dragging: in testicles.

Pushing: pain in hip.

Burning: dryness of palate; in anus; smarting in urethra; while urinating; along urethra; of prepuce; in chest; heat at night.

Smarting: of prepuce; in urethra.

Pressure: below frontal eminences; in temples; from back of eyes forward; in abdominal ring; as if to urinate; as if with a sharp point in coccyx; on root of nose; in rectum and sacral region.

Digitized by Google

Pressive dragging: in testicles.
Soreness: in kidneys and bladder; under upper sternum; of penis.
Bruised: intestines feel.
Ulcerative pain: in region of kidneys.
Pain: in hollow tooth; in abdominal ring; in small of back.
Beating: of heart violent.
Throbbing: violent, with heat of head and fever; and ringing in ears; in scrobiculum.
Compressed: forehead; pain in chin.
Cramp: in stomach.
Cramplike: jerking in lower limbs.
Constrictive: pain in anus.
Contraction: of fingers after a sprain; in tendo-achillis; in l. foot.
Formication: and numb feeling in tips of fingers.
Numbing: pain in chin.
Crawling: in scalp.
Warm sensation: about heart.
Dryness: of mouth, throat and lips; of nose.

" **Touch. Passive Motion. Injuries.** Touch: sensitiveness to, prepuce; middle of sternum sore to touch.

" **Skin.** Unendurable fine stitching over whole body, like from a thousand needle-points, at night, when sweating from warm covering; > when uncovering.
Itching pimples.
Vesicles on head and chest, filled with serum and surrounded by red areola; burn when touched.

" **Stages of Life, Constitution.** ‖Child, æt. 6. θUrethritis.

" **Relations.** Antidotes: of large doses, lemon juice, *Strychnia*, and faradization of respiratory muscles to maintain respiration; of small doses, *Camphor.*, *Mercur.*

CANTHARIDES.

Spanish Flies. *Cantharideæ.*

[1] **Mind.** ‖Unconsciousness, lies with outstretched arms; sudden starting up, screaming, throwing arms about. θMetritis.
‖Sudden loss of consciousness with red face. θDentition.
‖Lies in a stupor with cold surface and occasional jerks.
Uræmic coma, delirium and convulsions.
‖Forgetfulness.
Strange ideas crowd on him against his will.
‖Confusion; distraction of mind; inability to concentrate thought.
‖Confusion of head and pulsation in forehead, in morning.
Hallucinations, especially at night; deliria of people long dead.
‖Furious delirium, with crying, barking and biting; confusion of head, anxious restlessness; cold sweat, especially on hands and feet.
‖Almost frenzied delirium.
‖Paroxysms of rage, renewed by sight of dazzling, bright objects, or touching larynx when trying to drink water.
‖Whining and complaining, with anxious restlessness, < from motion, > lying quiet.
Constantly attempting to do something, but accomplishing nothing.
‖Despondent and low-spirited, says she must die.
‖Fear, confusion of ideas, she could not think clearly. θVesical hemorrhoids.
‖‖Great amativeness; amorous frenzy.
‖Unbounded frantic sexual desire. θMania.
‖Exceedingly sensitive to all impressions; irritable and blaspheming. θTraumatic neuralgia.
‖Insolent and contradictory mood, in afternoon.
Uneasiness day and night, with hot head.
‖Anxious restlessness, ending in rage.
Great restlessness, obliging him to move constantly; great activity of mind.

[2] **Sensorium.** Vertigo: and staggering; and fainting; while walking in open air, with transient attacks of unconsciousness; appearance of fog before eyes.
‖Heaviness of head.

[3] **Inner Head.** Soreness and burning in brain.
Dull heavy pain in forehead.

Digitized by Google

Confusion of head in morning with pulsations in forehead.
‖Burning in sides of head, ascending from neck, with soreness and giddiness; < morning and afternoon; when standing or sitting; > while walking or lying down.
Stitches in side of head and occiput.
‖Painful tearing on vertex, with sensation as if some one was pulling a lock of hair upward.
‖Violent lancinating pains deep in brain, especially in occiput. θCerebro-spinal meningitis.
‖Heaviness in occiput, with drowsiness and incapacity to think.
Heat and throbbing in head.
Sensation of fulness, with heat rising up into head, with anxiousness.
‖Headache from washing or bathing.
Cerebro-spinal meningitis: paroxysms of rage and fury; pain deep in brain, with an expression of great suffering; base of brain is chief seat of pain; urine dribbles or passes with burning-cutting pain.

⁴ **Outer Head.** ‖Hair falls out when combing. θDuring confinement or lactation.
‖Scales on scalp; enormous dandruff.

⁵ **Sight and Eyes.** ‖Objects look yellow.
‖Eyes look yellow.
‖Burning in eyes and glowing heat, as from coals.
‖Biting sensation, as of salt in eyes.
‖Smarting in eyes.
‖Lachrymation in open air; must close eyes; on opening lids, margins pain as if sore, like raw flesh.
‖‖Inflammation of eyes, particularly when caused by a burn.
‖Eyes protruding; fiery, sparkling, staring look.
Involuntary spasmodic movement of eyes.
‖Eyes sunken, surrounded by blue rings.
‖Eyes restlessly in motion, at times staring, always, however, with a frightful look; pupils contracted. θAcute mania.
Right eye looks bleared, congested, inflamed; pain < night, cannot read then; sight quite good; commenced with feeling as of lashes in eye; urine scalds.

⁶ **Hearing and Ears.** ‖Ringing, humming, or roaring in ears.
‖Tearing in r. ear and r. mastoid process, as if bone would be torn out.
‖A hot exhalation passes, at intervals, and frequently, out from ears.

⁷ **Smell and Nose.** Coryza with pains in limbs; also chronic coryza.

Digitized by Google

‖Erysipelatous inflammation of dorsum of nose, spreading to both cheeks, but more to r.; followed by desquamation.

‖Secretion of much tenacious mucus from nose, without sneezing; hoarseness and painful hawking of tough mucus from chest; nightly dry cutting stitches along trachea, externally.

[8] **Upper Face.** ‖Expression of extreme suffering, terror or despair.

Sunken, hippocratic countenance.

‖Deathlike look during and after the pains.

‖Face: hot, red and swollen; swollen and puffy; flushed when stooping; yellow, or very pale.

‖Face fallen in; cheeks bluish. θAcute mania.

‖Erysipelas beginning on dorsum of nose and spreading to cheeks, more to right.

[9] **Lower Face.** ‖Dry lips without thirst.

‖The jaws tightly closed, almost approaching trismus, especially when they wished to give her water or medicine, which she prevented by angrily tossing about. θAcute mania.

[10] **Teeth and Gums.** ‖Grinding teeth. θMeningitis. θTyphus.

Painful red spot, size of a pin's head, over carious root of an upper incisor; discharges pus from a small opening in centre, when pressed.

‖Gums spongy and swollen. θSuppurative metritis.

Scurvy; coagulated blood in mouth in morning on waking; bloody urine.

[11] **Taste and Tongue.** ‖Taste: bitter; lost; gold tooth-plate tastes coppery.

‖Speech weak and timorous.

‖Trembling of tongue.

‖Tongue fiery red. θFacial erysipelas.

‖Tongue: thickly furred, red at edges; swollen and thickly coated; and back of mouth, in part excoriated, in part covered with blisters.

‖Inflammation of tongue with vesicles.

‖Sublingual glands swollen and red.

[12] **Inner Mouth.** ‖Mucous membrane red and covered with small blisters.

‖Loss of epithelium on lips, tongue and palate. θDysentery.

‖Burning pain in mouth, throat and stomach.

Dryness in mouth.

‖Vesicles and cankers in mouth and throat. θDysentery.

‖Lining of mouth and throat covered with white blisters from size of pin's head to that of a bean.

‖Salivation: copious; tasteless; disgustingly sweet.

[13] **Throat.** Expectoration of frothy saliva streaked with blood.

Digitized by Google

‖Mucus in posterior nares must be hawked into mouth to be discharged.
‖‖Burning sensation in throat, which feels as if on fire.
‖Burning in throat, with scraped sensation and spitting of blood.
‖Spasmodic constriction and intense pain at back of throat.
‖Throat inflamed and covered with plastic lymph.
‖Aphthous ulcer at back part of fauces, covered with a whitish adherent crust; a similar one on r. tonsil.
Throat swollen.
‖Swallowing very difficult. θTonsillitis.
‖Difficult deglutition with nocturnal regurgitation.
‖Water drunk regurgitates through nose. θSequel of burn.
Inflammation and suppuration of tonsils.
Diphtheria: dysuria; urine contains shreds or coats of uriniferous tubuli; extreme prostration, sinking, death-like turns; irritable looking rash upon skin or shining through epidermis.
Throat: < in afternoon and at night; < while drinking and from wet poultices; > while lying down.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Diminished appetite.
Canine hunger, particularly for meat.
‖Great thirst, with burning pain in throat and stomach.
‖Thirst, with aversion to all fluids.
‖Disgust for everything; drink, food and tobacco.
Coffee disagrees.

[15] **Eating and Drinking.** ‖After drinking coffee, sensation of fulness.
‖Drinking even small quantities of water, increases pain in bladder.
Great thirst, but drinking, or even sight of water, increases pain.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Empty eructations; ‖eructations of sour, frothy mucus, tinged bright red.
‖Nausea and vomiting.
‖Vomiting: of water drunk, also of blood; greenish, offensive; of bile and ingesta; of frothy mucus, tinged bright red.
‖Vomiting, with violent retching and severe colic. θPregnancy.
‖Vomiting of bile. θPhrenitis.

[17] **Scrobiculum and Stomach.** ‖Acute pain in region of stomach and bladder, with such exquisite sensibility that slightest pressure produces convulsions.

Digitized by Google

‖‖Violent burning pain in stomach.
‖Burning in region of pylorus.
‖Pressure in scrobiculum after eating.
‖Sensation of fulness, extending to chest and abdomen, after taking coffee.
‖Nightly regurgitation of food.
‖Chronic gastritis with dysuria.

[18] **Hypochondria.** ‖Incarceration of flatus under short ribs. Inflammation of liver and diaphragm.
‖‖Right side of liver painful and sensitive. θYellow fever.
‖Splenic troubles.

[19] **Abdomen.** ‖Abdomen swollen and tympanitic above; yields a dull sound below. θPuerperal fever.
‖Great distension and tenderness in belly.
‖Abdomen sensitive, and burning pain about umbilicus. θCholera.
‖Violent burning pain and heat through whole intestinal tract, with painful sensitiveness to touch.
‖Cutting in abdomen.
‖Sensation of great fulness in lower part of abdomen.
‖Cutting, stitching, or burning in groins.
‖Peritonitis, with burning pains in abdomen and urinary tenesmus.
‖Ascites.

[20] **Stool and Rectum.** ‖No stool or urine for 48 hours. θAcute mania.
‖‖Copious stools.
Frequent small, corrosive stools, with colic and pinching.
Stools: yellow, brown, watery; white, with tenesmus.
‖Diarrhœa of blood and mucus.
‖Feces red, slimy or green.
‖‖Passage of white or pale red tough mucus with stool, like scrapings from intestines, with streaks of blood.
‖Passage of pure blood from anus and urethra.
‖Before stool: straining; urging; colic.
‖During stool: cutting, colicky pains; burning in anus; prolapse of rectum; pressing and urging, extorting cries.
‖Stool daily but insufficient, with painful straining on bladder. θCatarrh of bladder.
‖After stool: colic relieved; burning, biting and stinging in anus; straining; faintness; shuddering.
Chilliness as though water was poured over one, with internal warmth.
‖Desire for stool while urinating.
‖Pain in perineum, seemingly arising from neck of bladder.

[21] **Urinary Organs.** ‖Dull pressing pains in both kidneys.

Digitized by Google

❙Pain in region of kidneys and urging to urinate, steadily increasing in severity.

❙Constant, dull painful sensation in region of kidneys, late in evenings.

❙❙Paroxysmal cutting and burning pains in both kidneys, the region very sensitive to slightest touch, alternating with pain in tip of penis; urging to urinate; painful evacuation, by drops, of bloody urine and, at times, of pure blood.

Inflammation of kidneys; excessively violent pains of bladder; gangrene of mucous coat of bladder; paralysis of neck of bladder; desire to urinate, frequent and violent, with scanty discharge with great pain, and often bloody.

❙Dull, heavy distensive pain in region of kidney, either side, no relief in any position; continued rolling and twisting of body, with groans and cries, resulting in nausea, retching and vomiting, unless the stomach is empty; no great desire to urinate, but a tingling thrill running down dorsum of penis to glans. θRenal calculus.

❙Very frequent painful straining, but with discharge of so small quantity that he had to be frequently catheterized, which caused terrible pain; urine cloudy, of a somewhat bright yellow color; after standing a little, a sediment of mucus and phosphatic salts appeared: immediately on being passed was of alkaline reaction; some pus with the urine; region of bladder very sensitive to pressure; attacks of painful urination more frequent and painful at night, he slept but little. θCatarrh of bladder.

❙Every two hours an attack of very painful urging to urinate, during which, with whining or groaning, a quantity of clear urine was discharged, accompanied by pressure on rectum and passage each time of a little soft, but otherwise normal stool. θBladder complaint in an old man.

❙❙Violent tenesmus vesicæ and strangury.

❙❙Painful discharge of a few drops of bloody urine, causing very severe sharp pain, as if a red-hot iron was passed along urethra; this pain was most acutely felt at membranous portion of canal, and in meatus urinarius.

❙Cutting and contracting pains from ureters down towards penis; at times pains pass from without inward; pressure on glans relieves pain somewhat.

❙❙Violent burning, cutting pains in neck of bladder, extending to fossa navicularis, < before and after urinating.

❙❙Violent pains in bladder with frequent urging; intolerable tenesmus.

Digitized by Google

‖Heaviness in bladder, feels sore on slightest motion.
‖‖Urging to urinate from smallest quantity of urine in bladder.
‖‖Dribbling discharge, reddish, sometimes mixed with blood.
‖Urging, < when standing, and still more when walking; > when sitting.
‖With urging to urinate, stitching pain in forepart of neck of bladder; on continued urging only a few drops pass.
‖Frequent painful urination, constantly preceded by violent pain in glans.
‖‖Ardor urinæ.
‖‖Before, during and after urinating fearful cutting pains in urethra; she must double herself and scream from pains.
‖‖Burning, when urinating, and when not.
‖Urine passes in thin and divided stream. θStricture.
‖Fruitless effort to urinate.
Frequent and copious urination.
‖Enuresis.
‖‖Retention of urine, causing pain. θSuppressed gonorrhœa.
‖Urine contained (when finally passed) much albumen, was almost black. θAcute mania.
‖Urine dark colored.
‖Urine: turbid and scanty; cloudy during night, like mealy water, with white sediment; albuminous, containing cylindrical casts; deposits greyish-white granules.
Red-colored urine, as if mixed with blood.
‖Atony of bladder from long retention of urine.
Hemorrhoidal affections of bladder and enlarged prostate.
‖Intense vesical spasm.
‖Post-scarlatinal nephritis; threatening uræmia.
‖Morbus Brightii: early stage, especially when occurring from blows on loins, or sudden change of temperature.
‖Diabetes insipidus.

Male Sexual Organs. ‖‖Sexual desire: increased; disturbing sleep at night.
‖‖Frightful satyriasis; violent, painful priapism, with excessive pains.
‖Strong and persistent erections, painless and without voluptuous sensation.
‖Erections at night, with contraction and sore pain along urethra.
Frequent nocturnal emissions; spermatorrhœa from relaxed penis, early in evening, in bed, without sensation; discharge of blood in place of semen.
‖Swelling of glans, which is very painful, even to external pressure.

Digitized by Google

‖Gonorrhœal phimosis.
Burning in excretory ducts of vesiculæ seminales and in urethra, during and after coition.
‖Dropsical swelling of penis and scrotum.
πGangrene of penis.
Drawing pain in spermatic cord, while urinating.
‖Testicles drawn up.
‖Smegma præputii.
Discharge of prostatic fluid.

» **Female Sexual Organs.** Oversensitiveness of all parts.
‖Ovarian region: stitches, arresting breathing; violent pinching pains, with bearing down towards genitals; great burning pain.
‖Inflammation of ovaries after suppressed gonorrhœa.
Cysto-ovarium with urinary difficulties; hydatids.
‖Pruritus: with strong sexual desire; during climacteric period.
‖Violent itching in vagina.
Swelling of neck of uterus, with burning in bladder; pain in abdomen; constant vomiting.
‖Swelling and irritation of vulva; vaginismus.
‖Inflammatory suppuration of womb with extreme tenderness.
‖Uterine hemorrhage, with great irritation in neck of bladder.
Membranous dysmenorrhœa with dysuria.
‖Menses: too early, too profuse; blood black or scanty, breasts painful. θSterility.
Menses retarded.
‖Amenorrhœa, with fulness and pain in head.
‖Leucorrhœa: with sexual excitement; in consequence of masturbation; with prurigo.
Uterine hemorrhage, with great irritation in neck of bladder; more suitable to sterile women.

» **Pregnancy. Parturition. Lactation.** ‖Vomiting, with violent retching and severe colic; burning at pylorus.
Abortion, with constant desire to urinate.
Sterility.
‖Puerperal convulsions: presence of bright objects; sight, drinking, or sound of water, and touching larynx reproduce violent spasms.
‖Promotes fecundity; expels moles, dead fœtuses and placenta.
‖‖Retained placenta or membranes, usually with painful urination.
‖Burning pain; abdomen sensitive; peritonitis, with tenesmus of bladder.
Mammæ painful; dysuria.

Digitized by Google

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Complete loss of voice; much cough; threw himself about in bed, from anxiety. θCroup.
‖Speech very low, with sensation of weakness of vocal organs.
‖Voice: hoarse; feeble and indistinct.
‖Burning and stinging in larynx, especially when attempting to hawk up tough mucus.
‖Catarrh in larger bronchia, with profuse, yellow expectoration.

[26] **Respiration.** ‖When breathing deeply, and when speaking, she feels as if she dare not exert herself, on account of extraordinary weakness of respiratory organs; speech therefore weak and timorous.
Oppression of breathing, with sensation of constriction of pharynx.

[27] **Cough.** ‖Dry, hacking cough.
During cough: shortness of breath; pain in abdomen; erections.

[28] **Inner Chest and Lungs.** ‖Shooting pain in chest, from front towards back, impeding respiration.
‖A fine stitch extending from r. axilla into chest.
‖Stitching pain in forepart of r. chest; it then passes downward into r. lower ribs.
‖Stitches in chest, more on r. side, or first l., then r.; in lower r. chest, extending towards middle of sternum.
‖‖Burning in chest.
‖Exudation within pleura. θPleurisy.

[29] **Heart, Pulse and Circulation.** ‖Anxiety in cardiac region.
‖Stitch in heart, followed by a crawling sensation.
‖Drawing pain in region of heart.
‖Pulse: very variable, mostly hard, full and frequent, at times intermittent; frequent and small; slow, feeble and scarcely perceptible; more full and rapid in morning.

[30] **Outer Chest.** ‖Stitches in sternum.
‖Burning in chest.

[31] **Neck and Back.** ‖Stiffness of neck, with tensive pain on stooping.
Stiffness, tearing, and lancinating in nape of neck to head.
‖Tearing in cervical muscles.
‖Tearing pain in back, especially mornings.
Pressing, gnawing and tearing in back, while walking, after rising from a seat.
‖‖Pain in loins, with incessant desire to urinate.
‖‖Pain in loins, kidneys and abdomen, with such pain on urinating that he could not pass a single drop without moaning and screaming.

Digitized by Google

‖Lancinations and tearing in os coccygis, causing him to start. θCoccygodynia.
In l. lumbar region, sensation of coldness and formication, on a spot the size of a hand.
Dragging in back, as before menstruation, followed by slight show; t.
Opisthotonus.

[32] **Upper Limbs.** ‖Tearing and stitching pains in arms.
Drawing pains in shoulder joint.
‖Eczematous vesicles between fingers, itching and burning fearfully.
‖Eczematous eruption on dorsum of l. hand, between and upon fingers; burning, pricking, shallow vesicles filling with fluid and soon drying into thin crusts, which peeled off, leaving denuded spots; < from cool water, > from warmth.

[33] **Lower Limbs.** ‖Coxalgia with spasmodic pains in bladder and strangury.
‖Tearing from r., later l. hip bone, down to knees.
‖Knees totter when ascending steps.
‖Violent pains in knees; sometimes boring.
‖Pain in soles, as from an ulcer, could not step.
‖Fearful pain in soles of feet, like an ulcer; she could not step for four days.
"Going to sleep" of lower extremities.
Contraction of lower limbs.
‖Darting pain from r. foot to r. side of head in paroxysms. θNeuralgia.

[34] **Limbs in General.** ‖Weakness and trembling of limbs.
Tearing in limbs, relieved by rubbing.
‖Dropsical swelling of hands and feet.
⊼Cold extremities.
‖Cold sweat of hands and feet.

[35] **Rest. Position. Motion.** Restlessness: compelling him to move about.
Lying down: burning in sides of head.
Stooping: face hot, red and swollen; stiffness in neck.
Movement: sweat.
Rising: pressing, gnawing and tearing in back.
Walking: vertigo, staggering and fainting; burning in sides of head; pressing, gnawing and tearing in back.

[36] **Nerves.** Restlessness, compelling him to move about continually.
‖Subsultus tendinum.
‖Weakness, prostration, faintness, general coldness, collapse. θDiphtheria.
Universal tetanic spasms, trembling, fainting.
‖Convulsions, with dysuria and hydrophobic symptoms;

Digitized by Google

bright light, drink or sound of falling water, touching larynx, or painful parts, cause or renew spasm; excessive desire for sexual intercourse.

Hysteria with urinary troubles.

Paraplegia occurring in morbus Brightii.

‖Hemiplegia of r. side with aphasia.

Tetanic or epileptiform convulsions, followed by coma.

[37] **Sleep.** ‖Sleeplessness; anxious dreams; erections.

‖Sleepy, but cannot sleep soundly on account of sudden twitchings. θSequel of a burn.

[38] **Time.** General aggravation after midnight and during day.

Night: hallucinations; regurgitation of food; sexual desire.

Morning: confusion of head and pulsation in forehead; burning sides of head; coagulated blood in mouth; tearing pain in back.

Afternoon: burning sides of head.

Evening: constant dull painful sensation in region of kidneys; emissions; chill.

[39] **Temperature and Weather.** Warm applications relieve pains in knees.

Open air: lachrymation.

[40] **Fever.** ‖Chill in evening, not relieved by external warmth.

‖Burning in palms and soles.

‖Burning heat at night, which patient does not feel.

‖Heat, with thirst.

‖Sweat on genitals.

Cold sweat, especially on hands and feet. θCollapse.

‖Cold extremities.

‖Chill running up back; succeeded by thirst without heat; not relieved by external warmth.

‖Sweat smells like urine.

‖Sweat from every movement.

‖Evening fever. θCatarrh of bladder.

‖Typhoid, with difficult and scanty urination, inability to lie on l. side, palpitation and great anxiety at night, and a clot of blood comes into mouth for two or three mornings.

‖‖In third stage, when there is complete insensibility; cramps in abdominal muscles and legs; suppression of urine; hemorrhages from stomach and intestines; cold sweat on hands and feet. θYellow fever.

[41] **Attacks, Periodicity.** Some symptoms appear every seventh day.

[42] **Locality and Direction.** Sides: of head, burning.

Right: ear, tearing; mastoid process; liver painful and sensitive; axilla into chest, fine stitching; tearing in hip bone; darting pain in foot and head.

Digitized by Google

Left: lumbar region, sensation of coldness; eczematous eruption on dorsum of hand and fingers.

" **Sensations.** ‖Raw and sore pain in whole body, internally and externally.

‖Every part oversensitive, accompanied by excessive weakness.

Burning, stitching and tearing pains predominate.

As if some one was pulling a lock of hair; as if a red-hot iron was passed along urethra.

‖Darting, stinging pain on different parts of body at same time. Compare *Crot. tigl.*

Prickling: after erysipelas.

Stitching: in neck of bladder; in sides of head and occiput; in groins; from axilla into chest; in heart; in sternum; in arms.

Lancinating pain: deep in brain; nape of neck; in os coccygis.

Cutting: in both kidneys; from ureters downward towards penis; in neck of bladder; stitches along trachea; in abdomen; in groins.

Shooting: in chest.

Pain: in tip of penis; in abdomen; in loins; in knees; in soles.

Darting pain: from r. foot into head.

Boring: in knees.

Tearing: and stitching pains in anus; on vertex; in nape of neck; in back; in cervical muscles; in os coccygis; in arms; from hip bones to knees; in limbs.

Drawing: in spermatic cord; in region of heart; in shoulder joints.

Dragging: in back.

Burning: in throat; violent, in stomach; intestinal tract; in anus; in both kidneys; when urinating; excretory ducts; in larynx; in brain; in eyes; in mouth; in region of pylorus; about umbilicus; in groins; in bladder; in chest; in palms; in soles.

Biting: in anus; in eyes.

Stinging: in larynx.

Smarting: in eyes.

Scraped: sensation in throat.

Dull pressing pain: in both kidneys.

Pressure: in scrobiculum.

Dull, heavy pain: in forehead; in region of kidney.

Throbbing: in head.

Fulness: in head; in stomach, chest and abdomen.

Dryness: in mouth.

Heaviness: in bladder; of head; in occiput.

Coldness: in l. lumbar region.

Google

Formication: in lumbar region.
Itching: between fingers; violent in vagina.
Crawling sensation: in heart.

" **Tissues.** Acts on parenchyma of kidneys and destroys them.
Increased secretions from mucous membranes and ulcerated surfaces.
Hemorrhages from nose, mouth, intestinal canal, urinary and genital organs.
‖Great emaciation. θCatarrh of bladder.
Swelling, heat, redness, even gangrene of parts.
Pleurisy, particularly in morbus Brightii.
Dropsy from atony of urinary organs, with ischuria.
Skin affections, particularly of an erysipelatous, vesicular character.
‖Suppuration of internal organs.

" **Touch. Passive Motion. Injuries.** ‖On being touched or disturbed had violent attacks, so that it took four men to hold her. θAcute mania.
‖Touching the larynx or painful parts renews symptoms. θSpasms.
Pressure: on stomach produces convulsions; swelling of glans painful.
‖‖Scalds and burns. See 46.

" **Skin.** ‖Ulcerative pain in skin when touched.
‖Erythema, from exposure to rays of sun. θEczema solaris.
‖Vesicles all over body, < between toes, which are all sore and suppurating.
‖Vesicular erysipelas; blebs swell and exude much watery matter.
‖Erysipelatous inflammation of skin, followed by prickling.
‖Superficial ulcerations caused by burns, with burning pains and lachrymation.
‖‖Burns, before blisters form,* and when they have formed.
Pemphigus.
‖Psoriasis.
Pityriasis, especially in children.
‖Itching, changing place, like from lice.
Ulceration and gangrene after exanthematous disease.
Ulcers with itching, tearing and lacerating, or burning, smarting and stinging; pus copious, inodorous, slightly

* Recommended by Dr. Hering as a most valuable remedy in scalds and burns. The injured part is immersed or bathed in a few drops of the tincture in water. A potency may be given inwardly. To demonstrate the truth of *similia*, he frequently challenged skeptics to burn their fingers and then immerse the injured members in a dilution of *Cantharides*.—Eds.

Digitized by Google

yellow, sometimes tinged with blood, < from rubbing and scratching.

Carbuncle.

Immovable, firm, hard tumor, directly above symphysis pubis.

Eczema: watery vesicles, as if excoriated; burning, itching, and when touched burning and smarting; eruption mostly on r. side; early inflammatory stage.

Petechiæ.

Large burning, painful blisters on an erysipelatous base.

Variola: dysuria and bloody urine; distressing headache and backache; eruption not properly developed, or assuming an hemorrhagic hue.

[47] **Stages of Life, Constitution.** ❙A boy, æt. 6, light complexion. θSequel of a burn.

❙A woman in third month of pregnancy. θEczema of hands.

❙Woman, æt. 29, scrofulous. θKidney affection.

[48] **Relations.** Antidotes: *Acon.*, ❙❙*Camphor.*, *Kali nitr.*, *Lauroc.*, ❙❙*Pulsat.*

Canthar. antidotes *Camphor.*, vinegar and alcohol.

Compatible: *Bellad.*, *Mercur.*, *Phosphor.*, *Pulsat.*, *Sepia*, *Sulphur.*

Incompatible: *Coffea;* oil increases the pernicious effects by rendering the active principle (*Cantharidine*) more soluble, favoring greater absorption.

Compare: *Acon.*, *Apis* (renal and bladder troubles), *Bellad.*, *Bryon.* (pleurisy), *Camphor.*, *Cannab.*, *Capsic.*, *Cinchon.*, *Cochlearia armor.* (renal and bladder troubles), *Coffea*, *Colocyn.* (colic), *Doryphora decem.* (urethritis, especially children), *Equiset.* (renal and bladder troubles), *Formica rufa*, *Hydrangea arbor.* (renal and bladder troubles), *Hyosc.*, *Lauroc.*, *Ledum*, *Linaria vulg.* (renal and bladder troubles), *Lycop.*, *Mercur.* (semen mixed with blood), *Phosphor.*, *Pulsat.*, *Rhus tox.*, *Sassafras* (urine burns like fire, shreddy particles and blood in it), *Seneg.*, *Sepia*, *Stramon.*, *Sulphur.*

CAPSICUM.

Cayenne or red pepper. *Solanaceæ.*

This plant is cultivated abundantly almost everywhere. The stem is smooth, thick and branching, rising to the height of two or three feet; leaves are ovate and pointed; flowers are solitary and white, standing on long peduncles; the fruit is a pendulous pod, containing numerous flat, kidney-shaped, buff-colored seeds.

In purchasing the dry capsules and seeds as imported, from which tincture is prepared, care must be taken to avoid confusion with the smaller pods sold under the same name, and as Chillies a name applied to two or three species.

Hahnemann prepared a tincture of the powdered ripe pods, with the seeds, in the proportion of 20 grains of the powder to 400 drops of alcohol.

[1] **Mind.** ❙Coma and delirium. θTyphus. θYellow fever.
Forgetfulness.
❙Children become clumsy, awkward; especially with headache.
Cloudiness of intellect; idiocy, melancholy, hypochondriasis.
❙Haunted by a disposition to suicide.
❙He is taciturn, peevish and obstinate.
Disinclination to think and work.
❙❙He is in a contented mood, is jocose, and sings, and still he becomes angry from the slightest cause.
❙❙Homesickness: with red cheeks and sleeplessness; with hot feeling in fauces.
❙Melancholy or hypochondriasis.
Fear of censure.
❙❙Fearfulness.
❙Awakens with fright, screams, and remains full of fear.
Anxiety and fear, as though he was going to die.
Peevish, irritable, angry; easily offended, takes everything in bad part.
❙Obstinacy.
❙❙After emotions, fever, with red cheeks.

‖Skull feels bruised, on moving head, or walking.
Tinea capitis.
Chilliness of scalp, followed by burning itching of integuments of skull, > from scratching.
Biting itching on hairy scalp, as from lice, compelling him to scratch; after scratching roots of hair and scalp feel painful, as though hair was being pulled out.
Sweat on forehead; cold sweat on forehead, with sensation of fainting.
‖Swelling on mastoid process behind ear, painful to contact.
‖Periostitis and caries of mastoid process.

[5] **Sight and Eyes.** Flickering before eyes, with headache.
Objects appear black; dim vision; amblyopia amaurotica.
‖Burning in eyes, with redness and lachrymation.
‖Pressing pain in eyes, as from a foreign body.
Inflammation of eyes, with relaxation of external and internal coats.
Pupils markedly dilated or contracted.

Digitized by Google

Fine sticking pain in eyes.
Eyes very prominent, with paleness of face.
Pressure in eyelids, so that he cannot open them far enough.
Painful quivering under r. eyelid.
Eyes > after rubbing.
‖Eyes protrude from sockets, with burning and lachrymation. θPertussis.

[6] **Hearing and Ears.** ‖Cannot bear noise. θIntermittent fever.
‖Dull hearing, after previous burning and stinging in ear.
‖Catarrhal deafness.
Stitching pains in ears, with burning and stinging; hardness of hearing.
‖A pressive pain in ear with every cough, as if an abscess would open. θPertussis.
‖A pressive pain very deep in ears.
‖Pressive, later an itching pain, deep in ear.
‖Aching in one or both ears when coughing.
‖Itching pain very deep in ear. θOtitis.
‖Tympanum perforated, and cavity filled with thick, yellow pus. θOtitis.
‖‖Tearing in concha of ear.
‖Ears very hot. θPertussis.
‖Tearing pain behind l. ear.
‖Swelling behind ear, painful to touch.
‖‖Painful swelling behind ear; periostitis and caries of mastoid process.
‖Deep-seated swelling under ear. θOtitis.

[7] **Smell and Nose.** Diminished acuteness of smell.
‖Nosebleed in morning, in bed.
‖Bloody mucous discharge from nose, when coughing. θPertussis.
‖Collection of thick mucus in nose and throat. θScarlatina.
‖‖Stoppage of nose.
Coryza and influenza.
‖‖Crawling tickling in nose, as in stopped coryza.
‖Tingling, titillation in nose. θHoarseness. θCoryza.
‖Sneezing, with roughness in throat. θScarlatina.
‖Tip of nose very hot and red, < towards evening. θPertussis.
Contractive jerking pains in l. side of nose and above l. eye.
Painful acne below nostrils.
Itching, with stitches in nose.
On coughing or sneezing, cutting in one or other limb.

[8] **Upper Face.** ‖Increased heat of face.
‖Cheeks red, not hot, alternating with paleness. θScarlatina. θIntermittent.

Digitized by Google

‖Pain in face, < from touch and in evening. θProsopalgia.
‖Pain in face, partly like bone pains, excited by external touch; partly like fine pains, piercing the nerves, which are tormenting on falling asleep.
‖Pressure in zygoma, < from touch and in evening. θFaceache.
‖Neuralgia facialis. θFothergill's disease.
Swollen face, with toothache.
Painful quivering below r. eyelid.
Red dots in face and herpes on forehead, with biting and itching.
Erythematous eruption on internal surface of cheeks, and on l. side of face, with biting sensation as from salt.

[9] **Lower Face.** ‖Lips: swollen; cracked; smarting; burning. θDiarrhœa. θScarlatina.
‖Burning, painful vesicles in mouth. θCancrum oris.
Acne about lips.

[10] **Teeth and Gums.** Teeth feel elongated and dull.
Drawing pain in teeth; carious toothache with or without swelling of cheeks.
‖Teeth dirty and painful. θStomatitis.
‖Gums: hot, burning, swollen, inflamed and sensitive; spongy, retracted from teeth. θStomatitis.

[11] **Taste and Tongue.** ‖Taste: sour; flat, watery, followed by heartburn; ‖‖foul, like putrid water. θDiarrhœa. θIntermittent. θDysentery.
‖When coughing, the air from lungs causes a strange, offensive taste in mouth.
‖Small burning blisters on tongue. θScarlatina.
‖Tongue and inside of lips full of flat, sensitive, spreading ulcers, with a lardaceous centre. θStomatitis.
Feeling of dryness of tongue without thirst.

[12] **Inner Mouth.** ‖Fetid odor, unbearable, carrion-like. θStomacace.
‖Saliva: viscid, offensive, copious. θStomatitis. θScarlatina.
‖Salivation during chill. θIntermittent.
‖‖Burning blisters in mouth. θScarlatina.
‖Small, flat, burning ulcers in mouth and fauces.
‖‖Tough mucus in mouth, or dryness.
Cancrum oris.

[13] **Throat.** Pain in upper part of fauces between acts of deglutition, as if parts were sore and were being spasmodically drawn together, as in waterbrash.
‖Burning soreness with ulcers on fauces. θAngina faucium.
‖Painful pressure in hard and soft palate while swallowing. θScarlatina. θAngina aphthosa.
‖‖Tough congealed mucus in posterior nares, on rising in morning, requiring much hawking to dislodge.

Digitized by Google

Uvula elongated, feels as if pressing on something hard.
Continuous stitches in throat, exciting dry, convulsive cough. θPertussis.
Stinging, causing night cough.
Continued stitching in throat, in region of epiglottis, causing a dry cough without relief.
Tonsillitis with burning, smarting pain.
Left tonsil inflamed; right, painful. θAsthma.
Great soreness in throat, with smarting. θScarlatina.
Spasmodic contraction of throat. θAngina faucium.
Constriction of throat, with burning; whitish deposit. θScarlatina. θDiphtheria.
Burning and other pains in throat < between acts of deglutition.
Pain in throat, only when coughing, as from a single swelling.
Pressive pain in throat, as if an abscess would break, during a paroxysm of coughing. θPertussis.
Sensation of roughness in throat.
Throat inflamed, dark red, burning, pressing.
Whitish spots in throat, with a red halo.
Inflammation of throat, dark purplish-red color of velum palati, r. side, near eustachian tube, with most violent pains, causing anxiety; salivation and thirst for cold water; heat, with shuddering and cold finger-tips; pulse unchanged; < in morning and towards evening.
Relaxed sore throat with cough; subacute inflammation of throat, with dryness and smarting; relaxed uvula of smokers and drinkers.
Pain on swallowing, as in inflammation of throat, but when not swallowing, drawing pain in throat.
Difficulty in swallowing, tongue furred; haggard look.
Dysphagia paralytica.
Torpidity of fauces, pharynx and œsophagus.
Aphthous angina.
Tonsillitis.
Angina pharyngea maligna, gangrenosa.
Deposits covering a considerable portion of fauces, with smarting. θDiphtheria.
In scarlatinal anginas with redness of face as in tipplers, small red spots in face, burning vesicles in mouth and on tongue.

[14] **Appetite, Thirst. Desires, Aversions.** Appetite increased, alternating with aversion to food and complete anorexia.
Thirstlessness, or intense thirst with abdominal uneasiness, but no tenderness on pressure.
Thirst, during fever only, for large quantities.
Thirsty, as the chill comes on. θIntermittent.

Digitized by Google

‖Thirst after stool. θDysentery.
‖Desire for coffee, but it nauseates. θDiarrhœa.
‖‖Dipsomania; morning vomiting, sinking at stomach.

[15] **Eating and Drinking.** ‖Food tastes sour. θDiarrhœa.
‖Better while eating; < after.
‖After eating: burning in stomach.
‖Vegetables cause flatulence.
Water causes: purging; shuddering; tenesmus and thin stool; chills.
Drinking cold water > cough.
‖Nausea, and attacks of suffocation, after coffee, yet desire for it.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Belching, with stitch in side, while walking.
‖Heartburn; waterbrash. θCatarrh of stomach.
‖Nausea and vomiting, with headache.
‖Nervous, spasmodic vomiting.
‖Vomits phlegm, with chill. θIntermittent.
‖Vomiting in malignant fevers. θYellow fever.

[17] **Scrobiculum and Stomach.** ‖Pressing pain in scrobiculum.
‖Stitches in scrobiculum on breathing deeply, from talking and from touch.
‖Accumulation of mucus and acids in stomach.
‖Burning in stomach. θGastralgia. θColic.
‖Sensitiveness and aching in region of stomach and duodenum after colic. θDysentery.
Sensation as if cold water were in stomach.
‖‖Stomach icy cold, or burning in it.
‖Deranged stomach, with fever.
‖‖Dyspepsia from torpidity, particularly in old people.
‖Gastralgia and gastromalacia.

[18] **Hypochondria.** ‖"Catching" pain in region of liver, or in lower portion of r. lung, with each cough. θPleuropneumonia.
‖Spleen sensitive, swollen, especially after abuse of quinine.
‖Painful enlargement of spleen. θIntermittent.

[19] **Abdomen.** ‖‖Burning or cutting pains in abdomen. θHemorrhoids.
Cutting and twisting pain in bowels, as from wind; before stool. θDysentery.
‖‖Drawing and twisting in abdomen, with and without diarrhœa.
‖‖Peculiar feeling in abdomen, a sort of drawing; he must bend double.
‖Colic, with cutting-twisting pain about navel, and passage of tough mucus, like diarrhœa, at times mixed with black blood; after every stool, thirst, and after every drink, shivering.

Digitized by Google

‖Flatulence and windcolic.
‖Abdomen distended to bursting. θDysentery.
‖Sore pains in abdomen and loins.
‖A tensive pain, extending from abdomen to chest, as from distension in abdomen; cannot bear clothing.
‖‖A pressive tension in abdomen, especially in epigastric region, between pit of stomach and navel, < on motion, together with a pressive tension in lower portion of back.
‖Abdomen distended; suffocative arrest of breathing. θDysentery. θCystitis.
Pain in inguinal region.
Hernia ventosa.

[20] **Stool and Rectum.** ‖Stools: frequent, small, with tenesmus and burning in rectum and bladder; bloody, mucous, shaggy; greenish, frothy, < at night; tenacious mucus, mixed with black blood.
‖Mucous diarrhœa with tenesmus.
‖‖Dysentery: tenesmus and strangury; pain < from a current of air, even if warm.
‖After a drink, must go to stool, but was costive; only a little mucus passed.
Before stool: cutting, flatulent colic, twisting pains about umbilicus.
During stool: tenesmus; cutting and twisting.
After stool: ‖tenesmus; burning at anus; ‖‖thirst, drinking causes shuddering; drawing pains in back.
‖‖Smarting and burning pain in anus and rectum. θDiarrhœa. θDysentery.
‖Biting-stinging pain in anus, with diarrhœa-like stool.
‖‖Violent tenesmus. θDysentery.
‖‖Tenesmus of rectum and bladder at same time.
‖Hemorrhoids: burning as if pepper was sprinkled on them, swollen, itching, throbbing; with sore feeling in anus; bleeding or blind; with mucous discharge; with bloody, mucous stools; with drawing pain in small of back and cutting pain in abdomen.
‖Suppressed hemorrhoidal flow, causing melancholy.

[21] **Urinary Organs.** ‖Renal pains, with or without calculi. θNephritis.
‖‖Burning in bladder. θDysentery. θGonorrhœa.
‖Colic, with spasm of bladder.
‖Burning in orifice of urethra, immediately before, during, and for a minute after urinating.
‖Stitches, as with needles, in forepart of urethra, when not urinating.
‖Pressure towards bladder, and some stitches extending from within outward in region of neck of bladder, while coughing, and some time afterwards.

Digitized by Google

‖‖Tenesmus vesicæ; strangury. θDysentery.
‖Frequent, unsuccessful desire to urinate. θDiarrhœa.
‖Frequent micturition, scalding, smarting, sticking pain in urethra, tenesmus and even chordee; (as inflammation subsides discharge less and thinner). θGonorrhœa.
‖‖Burning, smarting after urination.
‖Burning-biting pain in urethra, after urinating.
‖Retention of urine, spasm of bladder. θCystitis, in horses.
Urine red, or bloody.
‖Inflammation of neck of bladder. θCystitis.
‖Purulent discharge from urethra, sometimes bleeding. θGonorrhœa.

Male Sexual Organs. ‖Painful erections at night; cream-like discharge from urethra; burning, when urinating; at other times cutting, stinging in urethra.
‖Discharge from urethra: purulent; bloody, urethra painful to touch; creamlike.
‖‖Gonorrhœa: second stage; white discharge, like cream; excessive sensibility of parts to contact; chordee, which can only be appeased or subdued in cold water.
‖Protracted gleet.
‖Coldness of scrotum, and impotence; dwindling of testicles and extinction of sexual instinct; shrivelling of spermatic cords; emaciation; falling off of beard and weakness of sight.
‖Prepuce swollen.
‖Crampy, testicular pains after emissions.
‖Pain in prostate gland. θGonorrhœa.
‖Coldness of scrotum, in morning on waking.

Female Sexual Organs. Discharge of fetid mucus from vagina.
‖During menstruation: nausea; pressure in epigastrium.
‖‖Disordered menstruation, with a pushing or sticking sensation in l. ovarian region.

Pregnancy. Parturition. Lactation. ‖During pregnancy: affections of ears; heartburn, vomiting; mucous diarrhœa; hemorrhoids; burning in anus.

Voice and Larynx. Trachea and Bronchia. ‖‖Hoarseness from straining voice, in singers, preachers, etc.
‖Hoarseness, nose stopped up, throat feels rough. θScarlatina.
‖Excessive tingling and tickling in larynx, < after lying down, in evening. θPertussis.
‖Crawling and tickling in larynx and trachea, with a dry, hacking cough, in evening, after lying down.
Tickling sensitiveness in trachea, causing him to sneeze violently a few times.

Digitized by Google

‖Chronic sore throat. θBronchitis maligna.

[36] **Respiration.** ‖Exhalation from lungs, on coughing, causes a strong offensive taste in mouth.

‖Seems as if she could not get air deep enough into lungs.

‖Deep breathing, almost like a sigh. θPertussis.

‖Respiration slow.

‖Asthma: with red face, eructations, chest feels distended; wheezing inspiration; breathing < when moving about, ascending or walking.

‖Sibilant râles mostly l. side posteriorly, during inspiration; spongy sound during expiration; constant dyspnœa; oppression at bifurcation of bronchia, > from successful cough. θAsthma.

‖‖Dyspnœa, which seems to rise from stomach, or from fulness of chest.

[37] **Cough.** ‖Painful cough.

‖Frequent dry, hacking cough.

‖Dry, hard evening cough, with pain in distant parts.

‖Evening and night cough, with hectic.

‖‖Nervous, spasmodic cough.

‖Cough in sudden paroxysms, convulses whole body.

‖Cough, with headache, as if head would fly to pieces.

‖Cries after coughing. θWhooping cough.

‖With every explosive cough (and at no other time) there escapes a volume of pungent, fetid air. θPleuro-pneumonia.

‖Coughing or sneezing causes a sudden pain in one or other of limbs.

‖Cough, with drawing from chest into neck.

‖Cough, with feeling of pulling upward from stomach, up chest to throat pit.

‖Stitches in suffering parts, with cough.

During cough: splitting pain in head; drawing or stinging in sides of chest; stitches in back and bladder; pressive ulcerative pain in neck or ear; bursting pain in head, chest and bladder; escape of urine; pressure about thighs; inclination to vomit, or vomiting; offensive breath; pain in knees or legs, ears and throat.

‖Cough <: after anger; after warm drinks; evening, night; when lying; after sharp winds; dry, cold weather; any draught, warm or cold.

Expectoration infrequent; particularly in morning.

‖Sputa dirty brown, not rusty. θPleuro-pneumonia.

[38] **Inner Chest and Lungs.** Stitches in side, particularly the left.

‖Pain in chest and back; during heat. θIntermittent.

‖Drawing in one or both sides of chest, up to neck. θPertussis.

Digitized by Google

‖Throbbing pain in chest.
‖Pain in chest when sitting, as if chest was too full and there was not room enough in it.
‖Pain as if chest was constricted, which arrests breathing and is < even on slight motion.
Hæmoptysis, with dyspnœa.
Pneumonia, complicated with bronchitis.
‖Pleuritic pains. θQuotidian intermittent.

[29] **Heart, Pulse and Circulation.** Pectoral anxiety.
Fatty degeneration of heart and atheroma in obese persons.
‖Pulse: irregular, often intermitting; slow, intermitting.
‖Pulse full, strong, most frequent in evening. θDysentery.
Unusually violent pulsation of arteries of abdomen.
Clucking rapid pulsations in some of larger arteries.

[30] **Outer Chest.** ‖Pains in sternum, with sweat, while walking.

[31] **Neck and Back.** ‖Jerking-tearing pain in r. cervical glands.
‖Glands of neck painful, swollen. θStomatitis.
‖Excruciating, tearing pains in back, extorting cries, cause him to double up, during chill. θIntermittent.
‖Drawing-tearing pain in back and spine.
‖Shooting in back and chest. θCough.
‖Pain in sacrum and small of back. θHemorrhoids. θDysentery.
‖Pain in back continuing after stool. θDiarrhœa.
‖Chilliness between scapulæ. θAsthma.
‖‖Coldness beginning in back. θIntermittent.
‖Sensation as if cold water was dropping down back. θIntermittent.

[32] **Upper Limbs.** ‖Drawing-tearing pain in arms.

[33] **Lower Limbs.** ‖Shooting-tearing from hip to knee and foot, especially when coughing.
‖‖Sticking-tearing pain from hip joints to feet, especially on coughing.
‖Drawing pain in hip joint (pain like a stiff neck), < from touch and bending trunk backward.
‖Caries of r. hip; l. leg atrophied and painful.
‖Tensive pain in knee.
An internal pain in l. leg made up of drawing and stitching.
Single stitches in r. great toe, produced by stamping foot.
‖Cold sweat on upper part of legs.
‖Cold feet.
‖Violent pains in l. atrophic leg. θSpinal curvature, with coxarthrocace.
Paralysis of lower extremities.

[34] **Limbs in General.** ‖Rheumatic pain in limbs. θCough.
‖Tearing in limbs; they are drawn up during chill. θIntermittent.

Digitized by Google

Weakness and heaviness of limbs, followed by trembling of upper limbs and knees; hands refused to write.
Stiffness and painfulness of all joints on beginning to walk.
Pains in joints from taking cold.

[56] **Rest. Position. Motion.** Rest: < darting pains in head; < headache.
Lying: cough worse.
Lie down: great desire.
He shuns all motion.
Inclination to bend forward.
Moving: head, headache as if skull would split, and as if bruised; asthma; chilly; joints stiff, crack on.
Talking: stitches in scrobiculum.
Walking: > darting pains in head; head as if bruised; asthma; pains in sternum.
Ascending: asthma.

[56] **Nerves.** All senses are more acute.
!Great restlessness. θMeasles.
Want of bodily irritability.
!!Lack of reactive force, especially with fat people.
!Great desire to lie down and sleep; does not want to exert himself in the least. θAngina faucium. θDiphtheria.
!Weak, exhausted; vital forces sunken. θParalysis. θGangrene. θMeteorism. θTyphus.
!Staggering when walking.
Sciatica.
Paralysis of tongue, fauces, pharynx, œsophagus, stomach and intestinal canal.

[57] **Sleep.** Great drowsiness after eating.
!Yawning. θDiarrhœa.
!Constant desire to lie down and sleep. θSore throat.
!Sleepless from emotions, from homesickness, or from cough.
!Screaming in sleep. θPertussis.
!Sleep full of dreams, restless. θPertussis.
Lethargy.
Sopor, with hospital gangrene.

[58] **Time.** Remission during day and before midnight.
Night: painful erections.
Morning: in bed, nosebleed; coldness of scrotum.
10.30 A.M.: chill.
11 A.M.: fever.
Evening: tip of nose very hot and red; pain in face; pressure in zygoma; cough <; pulse full and strong; chill; bursting headache.

[59] **Temperature and Weather.** Shuns open air; sedentary; uncleanly; chill in open air.
Dreads uncovering, even in hot stage.

Digitized by Google

Generally better in warmth.
Great sensitiveness to cool air, particularly a draught.
Elevated temperature of intestinal canal.
Cool air, especially a draught of air, becomes very unpleasant; warmth of body becomes less and less and intolerance of a cool temperature greater and greater.
In proportion as coldness of body increases, lowspiritedness and contraction of pupils increase.
Heat of hands, but not of remaining portion of body.

[40] **Fever.** ‖Fever heat, with violent burning and headache.
‖Absence of thirst during heat. θIntermittent.
‖Heat, followed by chill, with thirst.
Great sleepiness after fever; could scarcely prevent herself from going to sleep; especially after eating.
‖Heat lessened by motion.
‖Fever at 11 A.M. (following chill at 10.30 A.M.), lasting all day, without subsequent sweat.
‖Fever (after very short chill at 11 or 12 A.M.) lasts all night, with great thirst.
‖Skin cool, pulse slow, want of appetite. θDysentery.
‖Coldness over whole body; limbs are cold without shivering.
‖‖Shivering and chilliness after every drink.
‖Chilly externally; inwardly, burning.
‖Chill begins in back, with thirst, < after drinking, lessened when walking out of doors.
‖Chilly on moving.
‖Chill at 10.30 A.M., commencing between shoulders and running down back.
Evening chill.
Chilliness when airing the bed.
‖Chill in open air, particularly in a draught.
‖Thirst just before and during chill.
‖During chill, cold across chest, with a sensation as of water dropping down back.
During chill: anxiety, giddiness and dulness of head; intolerance of noise; cannot collect her thoughts and is awkward so that she runs into everything; tearing pains in back and limbs, extorting cries and causing the patient to bend up; > by putting hot things to back.
Chill, followed by sweat; or by heat, with sweat and thirst.
‖Sweat: violent, copious; lessened by motion.
‖Sweat coming on soon after fever commences, and continuing with it.
‖Profuse sweat after fever, all night.
‖Intermittent, with torpidity of abdominal nervous centres and painful enlargement of spleen.

Digitized by Google

Intermittent fever, with predominance of chill, accompanied by thirst, without much heat.

‖‖Hectic fever after emotions, and in nostalgia.

Putrid typhus, with extreme prostration and black vomit.

41 **Attacks, Periodicity.** Periodicity marked.

‖Chill spreads gradually until extreme points are reached, then as gradually declines. θIntermittent.

42 **Locality and Direction.** Shifting pains, which were very violent, now here, now there.

Right: frontal bone, drawing, tearing; painful quivering under eye; inflammation of throat; catching pain in lung; cervical glands, jerking tearing; hip, caries; great toe, stitches.

Left: side of head, drawing tearing; side of face, erythematous eruption; ovary pushing or stitching; sibilant râles; leg atrophied and painful.

43 **Sensations.** ‖‖As if Cayenne pepper was sprinkled on parts.

‖Violent pains on various places; now here, now there. θNeuralgia of children.

‖Sensation as if parts would go to sleep.

Extreme lassitude; all limbs feel bruised; all limbs affected.

As if skull was bruised, on moving; as if throat was sore and was being spasmodically drawn together; as if chest was contracted; as if cold water was dropping down back; as if skull would split; as if brain was too full or head too large; uvula feels as if pressing on something hard; as if cold water was in stomach; as if pepper was sprinkled on hemorrhoids.

Burning: gums; in throat; in stomach; in abdomen; in rectum and bladder; in anus; in urethra; after urinating; in head; in skin; in breast and face; blisters in mouth; in eyes; in ears; in lips; over whole body.

Tearing: pain in r. frontal bone; in r. cervical glands; pain in back; in arms; in limbs; behind l. ear.

Darting pains: in head.

Cutting: pain in bowels; before stool; in urethra; forward from occiput.

Shooting: in back and chest; from hip to knee and foot.

Stitches: as with needles in urethra; l. ovarian region; with cough; in back of bladder; in side of chest; breast and face; through ear and over eye; in vertex; in nose; in l. leg; in r. great toe; over whole body.

Sticking: tearing pain from hip joints to foot; in eyes; in throat; in urethra.

Stinging: in arms; in urethra; pain in head; in ears; in throat; in chest.

Digitized by Google

Jerking: pain in r. cervical glands; in nose and above eye.
Jerking-tearing: in r. cervical glands.
Drawing: pain in r. frontal bone; pain in teeth; in abdomen; in l. leg; in back; in head; in one or both sides of chest; in back and spine; in arms; in hip joint; tearing, l. side of head; in throat.
Smarting: in fauces; in anus; in lips; in throat; in urethra.
Biting: in arms; itching, on hairy scalp; of herpes on face.
Biting-stinging pain: in anus.
Scalding pain: in urethra.
Soreness: in throat.
Sore pains: in abdomen and loins; in anus.
Splitting: in head.
Bursting: in head.
Tenesmus: of rectum and bladder.
Pressive: pain in throat; in scrobiculum; tension in abdomen; pain in neck or ear; in forehead and temples; in eyes.
Pressure: towards bladder; in epigastrium; about thighs; in zygoma.
Pushing: in l. ovarian region.
Pulling: upward from stomach.
Twisting: pain in bowels; in abdomen.
Catching pain: in region of liver.
Aching: in ears.
Tensive: pain extending from abdomen to chest; in knee.
Rheumatic: pains in limbs.
Pain: in prostate gland; in chest; in sacrum; in back; in joints; drawing stitching in l. leg; in inguinal region; knees or legs; ears and throat.
Painful: enlargement of spleen.
Throbbing: headache in forehead; pain in chest; of hemorrhoids.
Trembling: upper limbs and knees.
Crampy: testicular pains after emissions.
Constriction: of throat.
Distended: chest feels.
Elongated: teeth feel.
Heaviness: of limbs.
Empty, stupid feeling: in head.
Weakness: of limbs.
Roughness: in throat.
Hot: gums.
Heat: increase of, in face; followed by chill and thirst.
Coldness: of scrotum, in morning, on waking; beginning in back; over whole body.

Digitized by Google

Chilliness: between scapulæ; shivering after every drink.
Chilly: externally on moving.
Tingling: in larynx.
Tickling: in larynx; in nose.
Crawling: in larynx; in nose.
Itching: breast and face; deep in ear; hemorrhoids; over whole body.
Dryness: on tongue.

[44] **Tissues.** Irritation and inflammation of mucous linings.
‖‖Relaxed fibre: obesity.
‖Joints: crack: stiff, painful on beginning to move; pain, as if paralyzed.
Chronic muscular rheumatism in patients of sedentary habits.
Gout, stiffness, painfulness and cracking of joints.
Glandular swellings; scrofula.
‖‖Marasmus.
Dropsy, with torpidity.
Seasickness; cholera; cachexia Africana; yellow fever; typhus ictorodes.
‖‖Intermittent fever.

[45] **Touch. Passive Motion. Injuries.** ‖Worse from touch; skin sensitive, with many internal ailments.
‖Seasickness.
Touch: pains in face <; excited by; urethra painful to.

[46] **Skin.** ‖‖Burning in skin.
Stitching, burning, itching over whole body, < on breast and face.
‖Skin bloated, flabby.
Formication.
‖Itching < from scratching.
Acne rosacea.
‖Scarlet eruption on neck and breast, face of extreme redness, sometimes alternating with a mottled appearance; lips swollen and cracked, burning blisters in mouth and on tongue; saliva very slimy and little increased in quantity; tickling and roughness in throat, with sneezing and a hacking cough. θScarlatina.
‖Herpetic-like eruption on forehead, on face itching-burning.
Herpes.
Scrofulous ulcers; carbuncle.

[47] **Stages of Life, Constitution.** ‖Light hair, blue eyes.
‖Frequently indicated in persons of lax fibre and muscles, less frequently in those of tense fibre.
‖Nervous, but full habit.
‖Phlegmatic, awkward, easily offended; indolent, melancholic; lack of reaction. θGastric troubles.

CARBO ANIMALIS.

Animal charcoal.

Burnt animal substances, porcupine, swallows, moles, human bones, etc., have been used in medicine, before and since the time of Dioscorides, for glandular affections, scirrhus, epilepsy, etc.

1708. Quesnot, Plusieurs secrets rares et curieux, p. 124. Paris.

1827. Introduced by Hahnemann in his Chronic Diseases, the symptoms numbering 190; in 1831, 191, and in 1837 they had increased to 728. The symptoms referred to Hartlaub and Trinks are from Nenning.

The preparation used by Hahnemann in his provings, and which ought, therefore, to be preferred to all others, was made by placing a thick piece of ox-hide between red-hot coals, where it was allowed to remain as long as it burned with a flame. As soon as the flame ceased the red-hot mass was extinguished by being pressed between two flat stones.

Contains several substances besides carbon, the principal one being phosphate of lime.

1840. Fueter, Schweizer Zeitschrift, makes mention of burnt mole, useful in goitre, glandular indurations and scirrhus.

1845. Dürr used human-bone coal successfully in mesenteric atrophy.

Clinical cases are reported by Payr, H. Kl., 1870, p. 158; A. E. Small, N. S. M. and S. J., April, 1871; J. Romig, Allentown Correspondenz Blatt; E. W. Berridge, H. M., 1884, p. 111, and others.

Digitized by Google

[1] **Mind.** Unclouded consciousness and great anguish with sinking of vital forces.
Sensation of stupefaction in head with dulness in occiput, < from motion in cold, damp air, > when at rest in warm room.
Confused, did not know whether he had been asleep or awake; morning.
Loss of memory, forgets word just spoken.
Desire to be alone; she is sad, reflective; avoids conversation.
Hastiness.
Variable mood; alternate cheerfulness and melancholy.
Low-spirited.
Easily frightened.
Fearful in the dark.
Anxiety and orgasm of blood at night, so severe that she was obliged to sit up.
Anxiety; apprehensive, after an emission.
Homesick.
Head heavy and dull early in morning, with irritable mood.

[2] **Sensorium.** Vertigo and confusion on sitting up; > when reclining.
Vertigo: with vibrating of all objects, staggering; with falling backward; with epistaxis; early in morning; after shaving; with nausea, on rising up after stooping.

[3] **Inner Head.** Brain feels as if loose, during motion; < after eating and in cold; > when lying in bed and in warmth.
Darting pains through head, like lightning.
She has sensation as of a tornado in head.
Roaring in head.
Sensation in forehead as if something lay above eyes, on account of which she could not look up.
Heaviness in forehead on stooping, with sensation as if brain would fall forward; vertigo on rising, so that she soon fell down.
Pain in top of head, as if skull had been split or torn asunder; < during wet weather and at night; must press head with both hands.
Tearing in r. side of head.
Pain in l. side of head.
Stupefying headache in occiput, early in morning and in forenoon.
Heaviness of head, especially in occiput, and of l. temple, with confusion.
Stupefaction in head, with vertigo; had to close her eyes, when rising after stool.

Digitized by Google

πHeadache, with red eyes and stopped nose.
‖Pressure in whole brain; on head after eating.
‖Throbbing headache after menses; < in open air.
‖In morning, head is confused, so that he does not know whether he has been sleeping or waking; sense as of splashing in l. hemisphere of brain, when walking fast; pain in vertex, as if brain had been torn to pieces, or was open.
‖In morning, his head was very much confused; did not know whether he had been asleep or awake.
‖Heaviness in head, in morning, with dim vision and watery eyes.
‖Heaviness: in head, at night; weary feet; in forehead; on stooping; especially in cerebellum; < forenoon, in cold air; > after dinner.
‖Rush of blood to head; confusion in head.
‖Nervous and congestive headache and pressure in occiput soon after eating; sensitiveness of scalp; pains with rumbling of wind in abdomen.

[4] **Outer Head.** ‖Tenseness of scalp on forehead and vertex, with great sensitiveness of these parts to dry, cold air; < from pressure and touch; > in warmth.
Cold creeps on head, before stool.
‖Eruptions on head.
Indurations on scalp in scrofulous children.
Scirrhous cancer on forehead.

[5] **Sight and Eyes.** Farsightedness with dilated pupils.
‖Dim sight, eyes feel weak.
πBegins to squint.
‖A net seems to swim before eyes.
πLeft eye becomes red and burning; can scarcely open lids; pus wells out; violent stitches preventing sleep at night; in morning, eye is closed.
‖Sensation as if eyes were lying loose in sockets.
‖Senile cataract.
‖Broken up cataract was absorbed.
‖Scirrhus of lachrymal glands.

[6] **Hearing and Ears.** ‖‖Hearing weak and confused; tones become commingled; he cannot tell from which side they come, and it seems as though they came from another world.
‖Ringing in ears when blowing nose.
Stitches in and back of ears.
‖Ichorous otorrhœa.
‖Parotid gland swollen and indurated; lancinating pains.
‖Periosteum behind ear swollen.

[7] **Smell and Nose.** ‖Nosebleed: every morning, preceded by dull feeling in head; preceded by vertigo. θEpistaxis.

Digitized by Google

‖Coryza: scraping in throat, < evening, night, and when swallowing; with lachrymation; fluent, with loss of smell, yawning and sneezing.
πFluent coryza, so that she can scarcely speak, with painful sneezing; must blow nose frequently; nostrils red.
‖Dry coryza; cannot breathe through nose in morning on waking, and for some time after.
‖Stoppage of nose.
‖Tough mucus hanging down into pharynx in strings.
Swelling of nose, with pimples inside and outside, forming scurfs which last a good while.
‖Tip of nose: red, painful to touch; skin feels tight, is chapped; little boils inside of nose; cracked, feeling tense, burning, < during menses; vesicles at r. nostril with malignant ulceration.
‖Hard, bluish tumor on end of nose.
Dry skin about nostrils, desquamating.
πPain in nasal bones and stoppage of nose, on sneezing alæ nasi remain stuck to septum.
‖Pain in nasal bones.
‖Scrofulous ozæna.
‖Carcinoma of nose.

[8] **Upper Face.** ‖Face has cachectic appearance; earthy.
θInduration of uterus and pancreas.
‖Heat in face and head, in afternoon.
‖Stitches in malar bones, lower jaw and teeth.
‖Shooting and stitches in malar bone, especially l., running towards ear.
‖Erysipelas of face.
‖Eruption of red spots on cheeks.
‖Brown or pink spots in face.
‖Saddle across nose.
‖‖Copper-colored eruption.
‖Acne; young, scrofulous persons.
‖A large number of pimples on face, without sensation.
‖Faceache.
‖Carcinoma of face.
Hair of beard falls out, with itching of chin.

[9] **Lower Face.** ‖Lips swollen, burning.
‖Vesicles, or cracks on lips.
‖Swelling of submaxillary gland.
‖Scirrhus of lips.

[10] **Teeth and Gums.** ‖Teeth loose, sensitive on chewing, and to the least cold.
‖Grumbling and jerking in eye tooth; cannot bear anything cold to touch it; > when sweating.
‖Drawing pains in teeth, > after eating salt things; easy bleeding of gums, with looseness of teeth, sensitive to cold.

Digitized by Google

Toothache in carious teeth, on waking from sleep.
Toothache on going to bed, during day and during sleep, with night-workers.
Vesicles in mouth, forming ulcers.
Gums: red, swollen, painful; bleeding. θScurvy.
Pustules on gums, and gumboils.

[11] **Taste and Tongue.** Taste: bitter, especially morning; sour.
Bitter taste in mouth, with loss of appetite. θInduration of uterus.
Bitter taste, in liver affections.
Taste of manure in mouth, in morning; soft stool with mucus looking like coagulated albumen; a viscid inodorous humor oozes from rectum and perineum.
Burning on tip of tongue, and rawness in mouth.
Burning blisters on tips and edges of tongue.
Mouth and tongue feel immovable, so as to produce slow and drawling speech.
Smooth tongue.
Tongue red with yellow coating down centre, or slimy tongue. θInduration of uterus.
Dryness of palate and tongue.
Knotty indurations in tongue.

[13] **Inner Mouth.** Blisters in mouth, which cause burning. θAphthæ.
Burning on tip of tongue, and rawness of mouth.
Mouth and tongue dry.
Biting cheeks. θEpilepsy.
Profuse tasteless, thin saliva of sweetish, putrid odor. θIndurated pancreas.
Saltish water rises from stomach and runs out of mouth. θCancer of stomach.
Sensation of coldness apparently rising from abdomen into throat and mouth. θIndurated pancreas.

[13] **Throat.** πSore, burning spots on palate.
Swelling of palate.
Burning sensation in throat.
Raw sensation in throat and œsophagus, to pit of stomach; not increased by swallowing.
Raw feeling, like heartburn, > after eating.
Pressure in throat, only when swallowing.
Mucus in throat, hawking.
Scirrhus of pharynx.

[14] **Appetite, Thirst. Desires, Aversions.** Ravenous hunger.
No appetite, aversion to food, particularly fatty food.
Loss of appetite, with bitter taste. θInduration of uterus.

[15] **Eating and Drinking.** Eating causes: fatigue; distress and burning in stomach; inflation; long-lasting nausea, after meat; vomiting (indurated pancreas).

Digitized by Google

‖Eating relieves rawness in throat.
Bad effects from spoiled fish and decayed vegetables.
‖So weak that she cannot eat.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough after meals.
‖Eructations: sudden; painful, empty; sour; tasting of food eaten long before.
‖Long-continued nausea, after eating meat, with qualmishness and many empty eructations.
‖Nausea at night.
‖‖Nausea and aversion to tobacco smoking.
Vomiting after eating.
‖Saltish water runs from mouth, retching, vomiting, hiccough, cold feet. θCancer of stomach.

[17] **Scrobiculum and Stomach.** Weak, empty feeling at pit of stomach, not > by eating.
‖Sore feeling in pit of stomach.
‖Oppression in epigastrium. θIndurated pancreas.
Sharp stitches to right of scrobiculum during inhalation when standing, > when walking.
‖Spasmodic cramps.
‖Pressing, clawing, griping, burning in stomach. θCancer of stomach.
Pressure in stomach, with nausea.
‖Like a load or weight in stomach on waking, mornings.
‖Faint, gone feeling; also from suckling child; eating does not relieve.
‖Fulness, cold feeling in stomach after slight meal, > laying hand on stomach.
‖Squalmishness with faint feeling.
‖Heartburn.
‖Saltish water rises from stomach; retching and vomiting; cold feet; hiccough; pressure, clawing, griping and burning in stomach. θCancer.
Digestive disturbances with eructation and diarrhœa.

[18] **Hypochondria.** ‖Aching, almost cutting in region of liver, even while lying down.
‖Pressing and cutting in hepatic region.
‖Pains in liver, as from incarcerated flatus.
‖‖Burning and stitches in spleen.
‖Induration of pancreas.

[19] **Abdomen.** ‖Stitching and lancinating pains in abdomen, > from urinating.
‖Labor-like pains about umbilicus extending to small of back and thighs. θInduration of uterus.
Pinching about umbilicus, with sensation as if diarrhœa would set in.
Violent pain below umbilicus extending around to back.

Digitized by Google

‖Gastralgia and painful abdominal affections.
‖Painful sensation in r. lower abdomen, as if something would be squeezed through.
‖Soreness in abdomen while coughing.
‖Sensation of coldness rising from abdomen into throat and mouth. θIndurated pancreas.
‖Abdomen greatly distended; much annoyed with flatus.
Distension of single portions of abdomen.
‖Incarcerated flatus.
‖Motions in distended abdomen, with passage of offensive flatus.
‖Rumbling in abdomen.
‖Tearing, transversely across pubes, and then through pudenda, as far as anus.
‖‖Sticking in groin, also at night, disturbing sleep and waking her.
‖Feeling in l. groin, on sitting down, as if a hard body were lying there; > from pressure and by passing flatus.
‖Inguinal hernia.
πSmall, painful boils in inguinal region.
‖Maltreated buboes, with elevated margins and offensive ichorous discharge.
‖Buboes before discharging, as large as pigeon eggs, very hard, red, painful; stitches preventing motion; sensitive to touch; pain extending into thigh, with uncomfortable chilliness; thirst with appetite; sleepless; burning during urination.
‖‖Hard buboes, begin to suppurate; or, maltreated cases with callous edges, ichorous, offensive discharge.

30 **Stool and Rectum.** Flatus cannot escape, anus seems closed.
‖Unsuccessful desire for stool; passes only offensive flatus; pain in back, and feeling across abdomen as if there was no expulsive power.
‖Stool hard, lumpy, scanty, irregular. θConstipation.
Stools smell like burnt meat.
‖Blood passes during stool.
‖Stitches in rectum and anus.
‖Severe burning in rectum and anus.
‖Tapeworm.
‖Sticky, odorless moisture oozes from anus and perineum; anus sore.
‖Piles, burn and sting, < during walking.
Rawness and chafing about perineum.
Sweat on perineum.

31 **Urinary Organs.** ‖‖Renal colic.
‖Frequent desire to urinate; urine increased, fetid; sometimes stream interrupted; more frequent at night.

Digitized by Google

‖Inefficient urging, with painful pressure in loins, groins and thighs.
‖During urination: burning soreness in urethra.
‖Urine red. θInduration of uterus.
Offensive smelling urine; sometimes discharged involuntarily.
‖Urine, after standing, deposits a copious whitish-yellow sediment. θIndurated pancreas.
‖Paralysis of bladder.

Male Sexual Organs. ‖Seminal emissions; parts feel weak; exhausted mentally and bodily.
‖Testicles seem to be growing gradually smaller, with complete relaxation of genitals and a feeling of weakness in them.
‖‖Syphilis; buboes, mostly left-sided; old maltreated buboes, cut open or cauterized, presenting large, terrible ulcers, with callous edges and a secretion of offensive ichor.
‖Scirrhus of scrotum.

Female Sexual Organs. ‖Tearing pain, transversely across pubes, and then through pudenda, as far as anus.
‖Bearing down pains, with copious discharge of slimy, discolored blood. θInduration of uterus.
‖‖Menses: too early; too long; not profuse.
‖Menses suppressed. θIndurated pancreas.
‖‖Menorrhagia from chronic induration of uterus; also in cachectic women, with glandular affections; blood black, clotted, putrid.
‖During menses: lameness in thighs; pressing in small of back, groins and thighs, with unsuccessful desire to eructate; chilly, yawning; ‖‖the flow weakens her, she can hardly speak; blood dark.
‖After menses: throbbing headache, < in open air.
‖Leucorrhœa: stains linen yellow; offensive; burning, biting, corroding; more when walking or standing; causes weak feeling in stomach.
‖Discharge of blood from vagina, with labor-like pains. θInduration of uterus.
‖Erectile tumors with burning sensation.
‖Offensive uterine discharges. θGangrene. θCarcinoma.
‖Chronic or subacute metritis.
‖Malignant ulcers of os uteri with foul discharge.
‖Induration of neck of uterus; burning.
‖Indurated, swollen uterus, after depressing emotions in delicate, weakly, pale women.
‖Burning into thighs; laborlike pains in pelvis and sacrum; slimy, bloody discharge, very weak. θCancer uteri.

Google

‖Hypertrophy of ovaries and uterus.
‖Prolapsus and induration of uterus.

[34] **Pregnancy. Parturition. Lactation.** ‖Nausea, < at night.
‖‖Lochia long lasting, thin, offensive, excoriating, with numb limbs.
Milk is thin, has a salty taste.
Secretion of milk after weaning.
Mammæ: sensation of expansion in mammæ; darting pains of nursing women arrest breathing, < from pressure; hard, painful nodes; swollen, inflamed (erysipelatous) during confinement.
‖Mammary tumor hard, uneven, skin loose; burning pains; dirty, blue red spots; pains drawing towards axilla; night sweat; low-spirited. θScirrhus mammæ.
‖Painless tumor in r. mamma, hard, as large as a hen's egg.
‖‖Hard, painful nodules and indurations in mammæ.
‖Painful induration below nipple, as large as a hazlenut.
‖Painful indurations in l. mamma, of stony hardness, uneven nodules, immovable, dirty, bluish-red; tearing, stinging pains extending to side of shoulders and through arm.
‖Scirrhous indurations in mammæ.
‖Carcinoma of mammæ; dirty, bluish and loose skin, or red spots on skin; burning and drawing towards axillæ; axillary glands indurated.

[35] **Voice and Larynx. Trachea and Bronchia.** ‖Rawness and hoarseness in morning after rising, with dry cough.
‖Hoarseness, < evenings; loss of voice during night.
‖Cough, hoarseness and night sweat very fetid and debilitating.
‖Phthisis trachealis.
‖Swelling of thyroid gland.

[36] **Respiration.** ‖Dyspnœa with anxiety and low spirits.
‖Oppression in morning and after eating.
‖Panting and rattling breathing.

[37] **Cough.** ‖Cough induced by tickling in r. side of chest, or lying on r. side; sputum green.
‖Tickling cough, with constriction of larynx and chest.
‖Severe dry cough, shakes abdomen as if all would fall out, must support bowels; loose râles until something is coughed up; morning on rising and nearly all day.
‖‖Dry cough only at night, when lying on r. side, for several nights.
‖Dry cough. θInduration of uterus.
Cough with concussion or pain in abdomen.
‖Soreness in abdomen while coughing.

Digitized by Google

πCough with expectoration, day and night; pain in throat.
ǁCough with greenish sputum. θPneumonia of r. lung. θSuppuration of r. lung.
ǁSputum dark brown, tough, syruplike, of extremely disagreeable taste. θGangræna pulmonum.

[28] **Inner Chest and Lungs.** ǁSharp burning stitches in chest.
ǁBurning in chest, with pressive pain.
ǁSensation of coldness in chest; through from front to back.
ǁPneumonia r. lung, suppuration beginning; green sputum.
ǁPhthisis pulmonalis.
ǁPleurisy, lingering; skin livid, emaciation, hectic or typhoid symptoms.
ǁSensation as though hard indurations in breast rose higher and he cannot stand pressure on it; this alternates with pain in shoulders and upper arm.

[29] **Heart, Pulse and Circulation.** ǁSensation of coldness in præcordial region, with horripilations. θIndurated pancreas.
ǁPalpitation: after eating; when singing in church; morning on awaking, must lie still with eyes closed; in evening.
ǁPulse accelerated, especially evening; beating in blood-vessels.
ǁRapid pulse. θInduration of uterus.
Cyanosis.

[30] **Outer Chest.** Violent pain in sternum.
ǁSensitive nodules on external chest.
ǁǁIndurated axillary glands.

[31] **Neck and Back.** ǁPrickling stitches in nape of neck.
ǁPainful scrofulous induration of glands of neck.
ǁBloodboils on neck.
ǁScrofulous goitre.
ǁPressing, drawing and stiffness in lumbar region, as if broken.
ǁSharp drawing across small of back, sensitive to every step.
ǁDrawing pain in small of back, and a feeling as if it was broken, when walking, standing and lying.
ǁPressive pain in small of back.
πPains in back, on coughing, ascending stairs, stepping hard, and jumping, preventing deep breathing, and causing her to have fever.
ǁColdness and aching in lumbar region and legs. θCough.
ǁTumor on inner part of r. shoulder blade, red externally, soft in centre. θScirrhus mammæ.

Digitized by Google

‖Coccyx feels bruised; burning when touched; pain like that of subcutaneous ulceration, < sitting or lying.

[32] **Upper Limbs.** Tearing pain in neighborhood of l. shoulder.

‖Swelling of axillary glands, with rash on back. θBlepharitis.

‖‖Axillary glands indurated.

‖Herpes in axilla.

πHard swelling with great itching on r. forearm, inner side, along edge of radius.

‖Wrists pain as if sprained.

‖Hands become stiffer, in connection with which finger tips became sore as though rubbed open.

‖Hands numb; fingers readily go to sleep; often with chest affections.

‖Violent trembling of hands in morning at breakfast; hands appear as if paralyzed; on grasping anything, fingers become stiff as though they had not sufficient power.

Sharp stitches in ball of r. thumb and in fingers.

‖Numbness of fingers on inside and tips, with stiffness of finger joints; they crack on bending.

‖Gouty stiffness of finger joints.

‖Swelling of bones and induration of tendons of fingers.

‖Arms painful to touch.

[33] **Lower Limbs.** ‖Stitches in l. hip, when sitting.

‖Violent drawing pains in hip, extending forward and downward.

‖Pain in hip causes limping.

‖Weakening sweats, particularly on thighs.

‖Sweat at night on thighs only.

‖Gnawing pains in shin bones, such as usually followed cold feet.

‖Cramp in forepart of lower leg near tibia, when walking.

‖Painful tension in calves, when walking.

‖Legs as far as calves go to sleep, during day.

‖Drawing and stitches in legs.

‖Painful contraction of tendo-achillis.

‖Pain in heels; feet sore.

‖Weakness and pain in ankle.

‖‖Weakness of ankles in children who try to walk.

‖Foot turns under, when walking, as from a weak ankle.

‖‖Very cold feet from 9 A.M. till 3 P.M.; also in evening in bed.

‖Corns, painful to touch.

‖Frostbitten feet and toes.

[34] **Limbs in General.** ‖Bruised feeling in limbs, especially during motion.

Numbness of limbs.

Digitized by Google

[35] **Rest. Position. Motion.** Rest: < stupefaction in head, with dulness in occiput.
Lying down: aching in region of liver; drawing pain in small of back; coccyx feels bruised.
Sitting: up, vertigo and confusion, > when reclining; coccyx feels bruised.
Rising: vertigo.
Standing: leucorrhœa.
Stooping: nausea on rising after; heaviness in forehead.
Motion: brain feels as if loose.
Walking: splashing in l. hemisphere of brain; piles burn and sting; leucorrhœa; drawing pain in small of back; painful tension in calves.
Eating: causes fatigue.

[36] **Nerves.** ‖Weak, want of energy; head confused; prostration. θCancer.
‖Great prostration. θInduration of uterus.
‖After appearance of menses such great weakness that she could scarcely speak, with yawning and stretching.
‖‖Straining and overlifting, easily produce great debility.

[37] **Sleep.** ‖Sleepy all forenoon; yawning.
‖Anxious, frightful visions and restlessness, keep him awake.
‖Sleep full of vivid fancies; talks, groans, sheds tears.

[38] **Time.** Night: heaviness in head; l. eye red and burning, preventing sleep; coryza; scraping in throat; nausea; sticking in groin; frequent desire to urinate; cough with expectoration; sweat; febrile chill; fever at night, chill without thirst; backache; heat with great thirst.
Morning: confused; head heavy, irritable mood; vertigo; epistaxis; stupefying headache; dry coryza; bitter taste; taste of manure in mouth; weight in stomach; rawness and hoarseness in throat; oppression; severe dry cough; palpitation after eating; violent trembling of hands; sweat, towards.
Forenoon: stupefying headache; sleepy.
9 A.M. till 3 P.M.: very cold feet.
Afternoon: chill.
Evening: coryza; scraping in throat; hoarseness; pulse accelerated; chill.
11 P.M.: chill.
Day: during, toothache; cough with expectoration; legs "go to sleep;" chilliness.

[39] **Temperature and Weather.** Warmth: > brain feeling as if loose, during motion.
Warm room: > stupefaction in head, with dulness in occiput.
Cold: cannot bear anything to touch teeth; teeth sensitive to cold.

Digitized by Google

In cold air: < heaviness in head, at night.
Dry, cold air: < tenseness of scalp on forehead and vertex.
Cold, damp air: < stupefaction in head, with dulness in occiput.
In open air: < throbbing headache; ‖sensitive to air.
Wet weather: < pain in top of head, as if skull had been split or torn asunder.

Fever. ‖Chill, especially in afternoon and after eating; evening chill, followed by sweat.
Chill at 11 P.M.
‖Great chilliness during day.
‖A febrile chill awoke her at night in bed.
πFever at night, chill without thirst; at night backache; mornings sweat; irregular stools.
‖Heat always after a chill, mostly at night in bed.
‖Heat with great thirst. θInduration of uterus.
Averse to uncovering during heat.
‖Sweating after eating, especially during siesta.
Sweat generally towards morning; also from slight exertion, even eating.
‖‖Night sweat fetid, debilitating, staining yellow.
‖Sweats when walking in open air.
Sweat staining brownish-yellow.
Typhus.

Locality and Direction. Left: side of head, pain; temple, heaviness; hemisphere of brain, sense of splashing; eye, becomes red and burns; shooting stitches in malar bones; feeling of a hard body in groin, on sitting down; buboes; painful induration in mamma; tearing pain near shoulder; stitches in hip.
Right: hand, tearing; nostril, malignant ulceration; painful sensation in lower abdomen; mammary tumor, hard, large as a hen's egg; cough induced by tickling in chest; dry cough when lying on side; pneumonia; tumor on inner part of shoulder blade; hard swelling, great itching on forearm; sharp stitches in ball of thumb.

Sensations. As if loose, brain; as of a tornado in head; as if skull had been split or torn asunder; as if eyes were lying loose in sockets; as if something would be squeezed through abdomen; as if there was no expulsive power in rectum; as though hard induration in breast rose higher.
Pain: in l. side of head; in top of head.
Jerking: in eye teeth.
Cutting: region of liver.
Darting: pains through head; pains of nursing women.
Lancinating: pains in parotid glands; in abdomen.

Digitized by Google

Stitches: in l. eye, preventing sleep; in and back of ears; in malar bones, lower jaw and teeth; in spleen; in abdomen; in chest; in nape of neck, to r. of scrobiculum; in rectum and anus; in l. hip; in leg.
Stinging: in mammary indurations.
Sticking: in groin.
Shooting: in malar bones.
Pinching: about umbilicus.
Tearing: in r. side of head; transversely across pubes; in mammary indurations; in l. shoulder.
Stupefying headache.
Burning: l. eye; lips; blisters on tip and edges of tongue; in throat; in stomach; in spleen; during urination; in rectum and anus; neck of uterus; pains in mammary tumor; stitches in chest.
Prickling: in nape of neck.
Aching: region of liver; in lumbar region and legs.
Gnawing pain: in shin bones.
Soreness: of abdomen; of feet.
Sore feeling: in pit of stomach.
Raw: sense in throat and œsophagus.
Sprained pain: in wrists.
Pressing: in small of back; in stomach; in hepatic region.
Pressure: in whole brain; in throat; in stomach; hepatic region; lumbar region.
Drawing: pains in teeth; in lumbar region; in hip; in legs.
Griping: in stomach.
Cramps: in lower leg.
Clawing: in stomach.
Constriction: of larynx or chest.
Splashing: l. hemisphere of brain.
Bruised: feeling in coccyx; feeling in limbs.
Pains: in liver; labor-like around umbilicus; gastralgia: in back; in nasal bones; in sternum; in hip; in heels; in ankle.
Weight: in stomach.
Throbbing: headache.
Heaviness: of head; in occiput.
Weak, empty feeling: at pit of stomach.
Stiffness: of finger joints; in lumbar region.
Tenseness: of scalp on head; skin of nose; in calves.
Contraction: of tendo-achillis.
Heat: in face and head; with great thirst.
Lameness: in thighs.
Itching: of chin; of r. forearm.
Cold: creeps on head; in stomach.
Coldness: rising from abdomen into throat and mouth;

Digitized by Google

in chest; in lumbar region and legs; in præcordial region.
Numbness: of finger tips; of limbs.
Dryness: of palate and tongue.

" **Tissues.** ‖Venous plethora; threatened stagnation of circulation, cyanosis, vital heat sinks to a minimum.
‖Struma varicosa.
‖Evil effects from loss of fluids.
‖Joints weak; easily sprained.
Arthritic stiffness and nodes.
‖Painful swelling of glands in neck, axilla, inguina and mammæ.
‖Glands indurated, swollen, inflamed, with lancinating, cutting or burning. θScirrhus.
Sycosis.
‖Scrofulous affections of glands.
Dry ulceration of external parts, following tumors; true indolent ulceration.
‖Benignant change into ichorous suppurations.
‖Gummata.
‖Hypertrophic conditions in general, and especially of genitals and abdominal glands.
‖Cartilage-like polypi undergo retrograde metamorphosis; fleshy polypi slowly, but mucous polypi not at all.
Tumors; colloid deposits in the viscera, particularly stomach.
‖Syphilis, buboes.
‖Ovarian cyst.
‖Pain in scirrhous indurations.
‖Polypus and carcinoma.

" **Touch. Passive Motion. Injuries.** ‖Worse from slightest touch: buboes; arms.
‖Easily sprained from lifting even small weights.

" **Skin.** ‖Skin dry and hanging in folds. θIndurated pancreas. θCarcinoma.
‖Itching over whole body; evening in bed.
‖Erysipelatous swellings, with burning pain, and indurations of affected parts.
‖Frost-bites: inflamed, burning.
‖Coppery eruption over whole body, especially in face, on forehead and nose.
‖Smooth and bright carmine spots showing a tendency to indurate. θLeprosy.
‖Herpes; thin, red skin, with scales on legs, in a baker, after desquamation of large pieces.
‖Irregular surface, violent burning pain.
‖Nodes in skin, with cough, in horses.
‖Stinging in scars; painful cicatrices, they break open, < in change of weather.

Digitized by Google

Indurated skin and rhagades; losing hair.
Readily bleeding ulcers.
Furuncles size of pea, which opened, have a strong smell like burnt meat.
Scrofulous skin diseases.
Hairless spots, when horses are continually losing their hair.

47 **Stages of Life, Constitution.** Young, scrofulous subjects.
Elderly persons, especially with venous plethora, blue cheeks, blue lips, debility, etc.
A girl, æt. 14; indurated mammary glands.
A young girl; goitre.
A sensitive woman, æt. 20; scirrhus mammæ.
A married woman, æt. 21, after confinement; indurated mammary gland.
A lady, æt. 32; phthisis.
A woman, æt. 35; scirrhus mammæ.
A single lady, æt. 36, narrow, flat chest; indurated pancreas.
A women, æt. 46, struma since twenty years.
Aneurismatica.
A scrofulous girl, æt. 15; indurated cervical glands.
A young, childless, married woman; indurated mammary gland.
A maiden lady, over 50 years old; indurated mammary tumor.

48 **Relations.** Antidoted by: *Arsen.*, *Camphor.*, *Nux vom.* vinegar.
It antidotes: bad effects of quinine.
Compatible: *Arsen.*, *Bellad.*, *Bryon.*, *Phosphor.*, *Pulsat.*, *Sepia*, *Silica*, *Sulphur*, *Veratr.* (especially in whooping cough).
Complementary: *Calc. phosph.*
Compare: *Badiag.* and *Bromium* (indurations, suppurations, etc.), *Calc. phosph.*, *Carb. veg.* (not so good a glandular remedy), *Cinchon.* (evil effects from loss of fluids), *Graphit.*, *Phosphor.* (nostrils adhere to the septum), *Pulsat.*, *Sepia*, *Silica*, *Sulphur* (vertigo with epistaxis), *Veratr.*

CARBO VEGETABILIS.

Vegetable charcoal.

Lowitz, a German, discovered the properties of vegetable charcoal to deoderize and arrest putrefaction. It was first employed in medicine with success, externally, to fetid ulcers and eruptions, afterwards internally for flatulence, its employment all the while being based upon its chemical properties. Hahnemann was the first who elucidated that the dynamic influence was the only curative one, by proving the triturated vegetable charcoal on healthy persons and then applying it in practice. His experiments were made on twenty or thirty different persons, who strictly observed dietetic rules and kept themselves strictly aloof from all medicinal influences. The cruder preparation failed to produce any symptoms of importance, but after potentization was carried farther on, a steadily increasing number of symptoms were produced in sensitive persons and in animals. He used the *Carbo ligni betulæ*, but assures us that well-prepared charcoal acts in the same manner, irrespective of the kind of wood used. The provings by Adams, Gersdorf and Caspari, in the Materia Medica Pura, 1827, contained 720, the Chronic Diseases, including the former, 930; the second edition, in 1837, 1,189 symptoms. We have had no provings since, excepting one by C. Neidhard, with the second centesimal trituration, which is included. The charcoal contains carbonate of potash.

For remarks on its use in yellow fever, see Chap. 40.

[1] **Mind.** Falls down insensible.

‖Stupor, collapse.

‖Memory feeble, flow of ideas slow; tendency to fixed ideas.

Periodical want of memory; headache as if integuments of head were contracted; hat presses on head as a heavy burden; when taking off hat, he feels as if a handkerchief were tied round head; creeping in integuments of occiput as if hairs were in motion.

‖Confusion of head, making thinking difficult; morning on waking; he had to make great exertion, as if arousing himself from a dream.

When it became dark in her room, frightful shapes appeared before her eyes; started from anxious dreams.

Flightiness at night.

Voluptuous fancies.

‖Quiet delirium. θTyphus.

Frequent screaming.

‖‖Indifference; heard everything without feeling pleasantly or unpleasantly, and without thinking of it.

Digitized by Google

Lack of cheerfulness in evening.
Feels unhappy with every little pain.
‖Nightly fear of ghosts. θWorm affections.
‖‖Anxiety: as if oppressed; with heat in face; accompanied by shuddering; on closing eyes; in evening after lying down; on awaking.
Great anxiety and heat with pains.
Trembling anxiety in morning.
Anxiety and uneasiness causing him to tremble all over, as if he had committed a crime, ending in weeping, even before strangers; painful hiccough in œsophagus.
‖Very irritable, excitable and inclined to anger.
‖Peevish, wrathful; child wishes to vent itself in rage, strikes, kicks, bites. θWorm affections.
Obstinacy.
Much excited in evening, with distended veins.
‖Restless, anxious; 4 to 6 P.M.
‖Easily frightened or startled. θDysentery.
Starting with fright on going to sleep.
Worse after mental exertion.

Sensorium. ‖Vertigo: with momentary attacks of fainting; had to hold on to something; from quick movements of head; with dark color of face; with nausea, particularly on looking out of window; when stooping, < walking and sitting; from flatulence; venous stasis, especially after a debauch; in bed; when sitting up after sleep.
‖Vertigo, with pain in forehead. θChronic catarrh.
‖Whirling in head, whole day.
‖Confusion of head, which makes thinking difficult.
‖‖Fainting after sleep, after rising, or while yet in bed, mornings; belching; caused by debilitating losses, or abuse of mercury.

Inner Head. ‖Violent tearing in forehead, at a small spot near temple.
‖Pain in r. side of forehead and head. θIntermittent fever.
‖Aching or beating over eyes, or in whole head, commencing at nape of neck; < evening after a meal, with congestion to head; after a debauch.
‖Pressive headache just over eyes, with tears; eyes pain on moving them.
‖Pressure across forehead, weighing down eyelids, < by weight of hat.
‖Pressure in forehead, temples and vertex.
Frontal headache with vertigo.
‖Sensation as if a strap was drawn tightly across forehead.
‖‖Pressive pain on vertex, with soreness of hair to touch.

Digitized by Google

Stitching headache extending to occiput in evening.
▮Tearing and drawing in l. side of occiput.
▮▮Dull headache in occiput; violent pressive pain in lower portion of occiput; feeling of weight.
Sensation of emptiness in head, with hunger.
▮Burning in head; head and hands hot.
▮▮Head feels heavy as lead.
Sensation of electric shocks in head.
▮Painful throbbing in head, during inspiration.
Throbbing with heat in head and fulness, after a meal and in evening.
Pulsating in head, as though he would be attacked by paralytic stroke.
▮Headache as from constriction of scalp.
Constrictive headache, with nausea.
▮Painful stitches through head, when coughing.
Headache: causing nausea; with great weakness, faintness and pain in every limb; from becoming overheated; on awaking from sleep; with burning here and there on body, in morning.
▮Rush of blood to head followed by nosebleed.
▮Congestion to head, with spasmodic constriction, nausea and pressure over eyes, feeling of coryza; from overheated rooms.
Awakes with sensation of congestion of brain.
Acute pain in head extending to upper maxilla.

Outer Head. ▮Head painfully sensitive to pressure, especially of hat; < from taking cold or chilling of head, and from getting warm in bed.
▮Scalp painful to touch.
▮▮Hat pressed upon head like a heavy weight, and he continued to feel the sensation even after taking it off, as if head was bound up with a cloth.
Pressing and burning tearing on outer head, especially in muscles of occiput and nape of neck; > from sitting quietly in warm room.
▮Sensation of contraction in integuments of head, which causes a cramplike tension in brain, < from pressure of hat and overheating, > from uncovering head.
▮Head sensitive to cold, easily becomes chilled, especially after overheating and sweating of it; affections following it are < in morning and on walking in open air, > in warm room.
▮▮Sweat on forehead, often cold.
Inclination to lie and rest with head high.
Feeling as if hair stood on end.
Falling out of hair (after severe diseases or abuse of mercury), with great sensitiveness of scalp to pressure.

Digitized by Google

‖Hair falls out, < on back of head; scalp itches in evening, when warm in bed; occasioned by severe illness or after parturition.

⁵ **Sight and Eyes.** ‖Eyes dull, lustreless, deep-set, pupils do not react to light. θTyphus.

‖Black spots floating before eyes; also flickering, flames and rings.

Objects near her constantly become narrower and smaller.

‖Eyes become weak and ache, from overwork or fine work; myopia.

‖Pressure and aching in eyeballs.

Pains in eyes after lying down.

Eyes pain in evening.

‖‖Burning in eyes.

Pressing and burning in eyes.

‖Feeling of sand in eyes. θIntermittent fever.

‖Heavy weight seems to rest on eyes; must make exertion to distinguish letters when reading.

‖Muscles of eye pain, when looking up.

On attempting to speak, motion of eyes as from stitches in them.

‖Hemorrhage from eyes, generally with burning. θCongestion to head. θWhooping cough.

Burning and pressure in canthi.

‖Itching about eyes and in margin of lids, particularly in morning.

Lids agglutinated.

‖‖Discharge of thick, flesh-colored, offensive moisture from r. eye.

Lachrymation.

πAching pain in orbits and in eyeballs passing to back of head; paroxysm passes away for a few minutes and then returns; > on walking in open air, < on lying down.

⁶ **Hearing and Ears.** Hearing very acute.

‖Ringing in ears; buzzing.

Rustling in ears, as of straw, whenever jaws are moved; discharge of a thickish, flesh-colored, badly-smelling liquid from ear; painful eruption on upper lip.

Roaring in ears accompanies vertigo; with scanty earwax.

Illusions of hearing; he thought he heard some one approaching his bed.

‖Deafness, particularly after acute exanthema or abuse of mercury; ears too dry.

Tearing and aching in ears from within outward.

‖Ulceration of internal ear and discharge of pus.

‖Something heavy seems to lie before ears; they seemed stopped, hearing not diminished.

Digitized by Google

‖Deficient or badly-smelling cerumen.
‖Yellow earwax with dryness of ears.
‖Offensive otorrhœa.
External ears swollen and hot.
‖Pain from r. ear down neck, on turning head; after itch-like eruptions.
‖Left ear hot and red every evening.
‖Parotitis, swelling grows hard. θMumps.

[7] **Smell and Nose.** ‖Nosebleed: before attack of fainting; several times daily for weeks; face pale before and after every attack; after straining at stool; small, intermittent pulse; after debauch; in old or debilitated people; after fevers.
‖Frequent copious and easy epistaxis; < at night or in forenoon, followed by pain over chest; blood thin and black, generally < at night; excited by emotions or jarring.
‖Ineffectual desire to sneeze, with crawling in l. nostril.
‖Frequent sneezing, with constant and violent crawling and tickling in nose; lachrymation and biting pain in and above nose. θHay asthma.
‖Dry nasal catarrh; nares obstructed.
‖Severe coryza, with hoarseness and rawness on chest. θHay asthma.
‖Watery fluid discharge from nose, or stoppage, < towards evening.
Stoppage of nose.
‖Nasal catarrh, with sore throat. θMeasles.
‖Drawing in root of nose.
‖Itching of nose, particularly around nostrils. θCoryza.
‖Nose pointed; hippocratic face.

[8] **Upper Face.** ‖Face: very pale; greyish-yellow; greenish; hippocratic.
‖Pale face, flushes to roots of hair after a little wine. θAsthma.
‖Drawing and aching pains in facial nerve.
‖Tearing pains in l. half of face.
‖Jerking tearing in r. upper maxilla.
‖Facial and maxillary bones sore.
‖Jerklike tearing in l. zygoma, in front of ear, in evening, in bed.
‖Drawing pain in upper and lower jaw on both sides, with drawing in head and confusion of it.
‖Soreness of facial bones of upper and lower jaws.
‖Face hippocratic. θTyphus.
‖Corpselike face.
‖Cold sweat on face.
‖Face cold; tongue cold and contracted.

Digitized by Google

Glowing redness of face with a fine network of capillaries as if marbled.
‖Swelling of upper lip and cheeks, with jerking pain.
‖Red cheeks; sometimes red and covered with cold sweat.
‖Painful eruptions on upper lip; the vermilion border is covered with pimples.
‖Acne in face of young people.
‖‖Parotitis.
Herpetic eruptions in face.
‖Lupus vorax in face.

[9] **Lower Face.** ‖Brown, or blackish-looking cracked lips.
‖Swelling of lips.
Lower lip red and swollen on inside, preventing her from speaking.
‖Quivering or twitching of upper lip.
Chattering of chin.

[10] **Teeth and Gums.** Tearing in incisor teeth.
‖Teeth feel long and are sore.
‖Drawing and tearing pain in molars.
‖Tearing in teeth from hot, cold or salt food; < when touched with tongue.
Pain in teeth on l. side, < in open air, > after eating.
Toothache: constricting; clucking; from cold and warm substances taken into mouth.
‖‖Looseness of teeth, with bleeding of gums, which are very sensitive.
‖Teeth decay rapidly.
‖Sore pain in gum during day.
‖Gum painfully sensitive when chewing.
‖Gum retracts from lower incisors.
‖When sucking gum, pure blood flows into mouth, in forenoon, returning several days at same time.
‖Bleeding of teeth when cleaning them.
‖Pustules on gum; gumboils.
‖Aphthæ or thrush.
‖Teeth and gum affections from abuse of mercury.

[11] **Taste and Tongue.** ‖Bitterness on palate, tongue dry.
‖Bitter taste before and after eating.
‖Bitter taste, with clean tongue, particularly in old women.
‖Sour taste in mouth after eating.
‖Saltish taste.
‖Tongue heavy, with difficult speech.
‖Tip of tongue raw and dry; heat in mouth.
‖Sensitiveness of tongue, with rawness in it.
‖Glossitis when tongue becomes indurated.
‖‖Tongue turns black. θTyphus. θYellow fever.
‖Tongue red and dry, or covered with dirty crust. θTyphus.

Digitized by Google

‖Tongue: white; coated with yellow-brown mucus; lead-colored; blue, sticky, moist; dry, parched, fissured; black.

‖‖Tongue cold. θAsiatic cholera. θYellow fever. θTyphus.

Small ulcers scattered through mouth; greyish color, burning like live coals; ulcers are small, grey, deep and isolated.

[13] **Inner Mouth.** ‖Mouth and breath cold. θCholera. θYellow fever.

‖Mouth hot, tongue almost immovable, saliva bloody; edges of gums yellow, indented; gums loose, receding, ulcerated.

‖Heat in mouth, especially in upper lip, with rawness and dryness of tip of tongue.

‖Dryness, or increased collection of saliva in mouth, which is often stringy.

‖Tough mucus in mouth, putrid taste and loss of appetite.

‖Foul taste and offensive odor from mouth.

‖‖Stomacace.

Foaming at mouth, or extreme sweating; animal lies down and bores head backward, towards nape of neck. θAnthrax.

‖Hemorrhage from nose and mouth; blood black.

[15] **Throat.** ‖‖Pressive pain on posterior part of palate.

‖Swelling and inflammation of uvula, with stitches in throat.

‖Burning and biting feeling in fauces.

‖Sloughing of some parts of swollen fauces; fetid ichor.

‖Sensation in pharynx as if it was swollen or contracted.

‖‖Pressive tearing in muscles of throat.

‖Scraping, rawness, burning in throat.

‖Small burning spots in throat. θStomacace.

‖Sore throat, with ptyalism.

‖On small spots in throat, sensation of something acrid and corroding, which produces suffocative cough. θStomacace.

‖Tough mucus in throat, as though lump was there which cannot be removed. θStomacace.

Hawking of much mucus from throat.

‖Throat feels as if dried with blotting paper. θStomacace.

‖Food cannot be easily swallowed; throat seems constricted; no pain.

‖Inflammation of œsophagus.

[16] **Appetite, Thirst. Desires, Aversions.** Inordinate appetite or thirst.

Hunger, with feeling of emptiness in head.

‖Want of appetite; eats only dinner; feeling of relaxation and weakness of muscles of limbs.

Digitized by Google

πThirst, with diarrhœa.
ıLonging for coffee; acids; for sweet and salt things.
ıAversion to meat and fat things; to milk, which causes flatulence.

[15] **Eating and Drinking.** ıAfter eating: headache; acidity in mouth; plainest food disagrees; heaviness, fulness (more after supper), sleepiness; nausea, vomiting; feels as if abdomen would burst; < after debauch from rich living.
Dreads to eat because of pains; burning in epigastrium and deep in abdomen.
ıEverything that he eats causes eructations of wind. θIntermittent fever.
ıAfter milk, sour eructations.
ıGastric symptoms: from wine; coffee; too much milk; excessive use of butter, or from rancid butter, from fats in general; fish, especially if tainted; from wine drinking; from mixed beverages in hot weather; from ice-water or different waters; from flatulent vegetables; abuse of salt or salt meats.
Affections after fat and fat foods, pastry, etc., which are not cured by *Pulsat.*

[16] **Hiccough, Belching, Nausea and Vomiting.** ıViolent eructations, almost constant; offensive smelling eructations; tasting of butter which was eaten; bitter; sour or rancid, after eating or drinking, with gagging, almost vomiting.
ıGulping up of food.
ıFrequent empty eructations, mostly in afternoon, also when preceded by pinching in abdomen.
ıPyrosis, great flow of water. θCatarrh of stomach.
ıPyrosis: excessive amount of gas constantly belched, which tasted hot and acrid; stomach distended and tender.
ıPyrosis at night.
ıFrequent qualmishness; he did not vomit, however.
ıNausea: and disgust for food, after eating soup; in morning, an hour after waking, with qualmishness in stomach; after breakfast, fulness in abdomen, vomiting and restlessness, so that she does not know how to lie, with pain in stomach.
ıCannot bear sun; she becomes nauseated, sick feeling in stomach and abdomen. θIntermittent fever.
Vomiting on recovering from insensible condition.
Vomiting after eating.
ıMuch vomiting at end of chill. θIntermittent fever.
ıNo vomiting; diarrhœa, spasm or pain. θCholera Asiatica.

Digitized by Google

Vomiting: of blood; of food, in evening; of sour, bilious bloody masses.
Hæmatemesis: body icy cold; breath cool; pulse thready, intermittent; fainting; hippocratic face; blood black and thick.

[17] **Scrobiculum and Stomach.** Epigastric region very sensitive; aching and griping in it, as from flatus.
Burning, lancinating in epigastrium and deep in abdomen; < from eating; with anguish, flatulency and diarrhœa.
Burning in stomach, with a creeping sensation up to throat.
Burning in stomach, spreading down to small of back and up to shoulders. θGastralgia. θCancer.
Soreness and burning in stomach, with weakness, causing dyspnœa.
Sensation of rawness in stomach, rising into œsophagus to middle of chest.
Spasmodic pain in stomach, compelling to crouch forward, and impeding respiration.
Gastralgia, especially when there is much flatus and a burning ache.
Contractive cramp, day and night, extending to chest; abdomen distended; must bend double, < lying down; pain paroxysmal, takes away breath.
Pain in stomach from nursing, or other loss of fluids.
Feels acidity in stomach while lying on back and when walking; stomach feels heavy and as if hanging down.
Great accumulation of flatus in stomach.
Acidity of stomach, with eructation of wind.
Trembling in region of stomach.
A contractive sensation beneath stomach.
Stomach feels tense and full; flatulence.
Discomfort and pressure in stomach, after eating.
Distension of stomach and abdomen.
Pain in stomach, < an hour after eating.
Cancer of stomach, with burning pains.

[18] **Hypochondria.** Right lobe of liver painful; burning pain in region of liver.
Bruised pain in liver.
Stitching pain in region of liver and epigastrium, also in spleen, and thence to both sides, increased by deep inspiration.
Tension in region of liver, as if it was too short there, on waking from midday nap.
Region of liver very sensitive and painful to touch; clothing unendurable. θJaundice.
Constant, dull, heavy feeling in liver. θIntermittent fever.

Digitized by Google

‖Pressing, pinching in region of spleen; quick lightning-like stitches; abdomen bloated.
Pain, as if beaten, in hypochondria.
Dull pain in r. hypochondrium.
‖Drawing pains around waist, half an hour after food, especially in evening; stomach feels as if full of wind; bowels loose; urine pale.
‖Pain and tenseness in hypochondria.

" **Abdomen.** ‖Colic: from flatulence, abdomen full to bursting; pain < about bladder, or left of epigastrium; < from least food; > from passing flatus, or hard stool; < or excited by riding in a carriage.
Cutting and griping in abdomen, after fainting.
Violent constrictive, laborlike colic, 3 A.M.
‖Pinching, or pressive colic in lower abdomen.
‖Dragging or griping colic, after a stool.
‖Pain in bowels, as from lifting or a sprain, as soon as she lies upon side; mostly in one side of abdomen.
‖Abdomen feels as if hanging heavily; walks bent.
‖Accumulation of flatus in r. side of upper abdomen, more towards back, with pinching pains.
‖Much flatulence and distension of abdomen, caused by things which usually digested easily.
‖Flatus collects here and there in abdomen, under short ribs, in hypogastric region, causing pinching and pressure, and very gradually passing down into rectum, with sensation of heat.
‖Meteoristic distension of abdomen. θTyphus.
‖Meteorism, with loud rumbling; fetid or odorless flatus.
‖Abdomen distended, > from passing wind upward or downward.
‖As pain decreases, gurgling begins in abdomen.
Pain above umbilicus on touch.
Burning on skin of r. side of abdomen.
‖Engorgement of portal system.

" **Stool and Rectum.** ‖Flatus hot, moist, offensive.
‖Passage of offensive, at least moist, flatus, with painful dragging towards sacrum, and thence towards abdomen.
‖Passages of great quantities of flatus.
‖Feces escape with flatus.
‖Stools: burning, light colored, fetid, watery, bloody, with tenesmus; covered with filamentous yellow mucus; last part bloody; putrid, cadaverous smelling, involuntary; dysenteric, terribly offensive; thin, pale mucous; in fragments, tough, scanty, with urging and tingling in rectum, and pressure on bladder and uterus.
‖Stools of ashy grey color, and mushy consistency. θCarditis.

Digitized by Google

Putrid stools, cold breath, after stool pressing in small of back towards bladder and in rectum, with burning in rectum; feeling of emptiness, weakness, anxiety and trembling debility. θDysentery.

Profuse diarrhœa in tuberculous patients, with great tympanitis.

Painful diarrhœa of old people.

Even soft stool passed with difficulty.

Constipation; solid stool enveloped in mucus; tough, scanty, not properly cohering stool.

Ineffectual urging to stool; only wind passes with painful pressure in rectum.

Before stool much pressure with, at same time, pressure on, bladder and in back (frequent in women); at last with pains like labor, and great straining, a soft stool is voided.

Tenesmus in rectum.

Stitch through rectum from os coccygis as if with a hot pin.

In rectum and anus, burning, both independently of, and during, the evacuation of flatus and stool.

Itching and burning, stitches and cutting pain at stool.

Burning in rectum.

Gnawing in rectum when not at stool.

Crawling in rectum; ascarides.

Acrid, corrosive moisture from rectum.

Hemorrhoids: protrude; blue; suppurating and offensive; with burning; after debauchery; cause dysuria; after abuse of sulphur, with extreme acidity of stomach and obstinate intestinal and gastric catarrh, with extreme secretion of mucus; hemorrhoidal conditions with epistaxis.

Stitches towards anus.

Burning in anus after a stool.

Sticking in anus during stool, as with needles.

Soreness of anus.

Itching of anus.

A glutinous moisture of a musty odor exudes in considerable quantity from anus, at night.

Passage of mucus, with urging in anus.

Bleeding from anus, during and after stool.

More of a relaxation than contraction of anus.

Soreness of perineum, with painful itching when touched.

Soreness, with itching and moisture of perineum at night.

Rawness and chafing of children in hot weather.

Cholera Asiatica, stage of collapse.

Intestinal ulcers, with profuse stools, resembling washings of flesh, smelling like carrion. θTyphus.

Google

‖Bowels inactive and constipated. θIntermittent fever.
‖Passage of tapeworm.

¤ **Urinary Organs.** Soreness at neck of bladder.
‖Pressure on bladder.
‖Tearing in urethra on urinating, and the last drops are like mucus.
Frequent, anxious urging to urinate, day and night.
Cutting pain on urinating.
‖Incontinence of urine; wetting bed at night.
‖Urine almost suppressed, dark in color; thick, with stale odor.
‖Urine suppressed. θCholera Asiatica.
Urine: scanty, reddish, turbid, as if mixed with blood; too dark; with red sediment; bloody, with varices of anus and bladder; copious, light yellow, diabetic; milky.
‖Blennorrhœa vesicæ; old people.
‖Morbus Brightii, from abuse of alcohol.

¤ **Male Sexual Organs.** ‖Sexual instinct suppressed.
‖Seminal discharge too early during coitus, followed by roaring in head.
‖‖After sexual excesses and onanism.
‖Onanism during sleep.
‖Too frequent pollutions, particularly in morning.
‖Prostatic discharge, while straining at stool.
‖Smooth, red, moist spots on glans penis.
Pressure in testicles.
‖Swelling of testicles from metastasis of mumps.

¤ **Female Sexual Organs.** ‖Menses: too early, too profuse; blood pale or thick, corrosive, acrid smelling; scanty; too frequent, preceded by spasmodic colic, and attended by violent headache and colic; preceded or followed by leucorrhœa.
At the time menses should appear, violent itching of old tettery eruptions.
‖Menorrhagia, burning across sacrum, passive flow.
‖Metrorrhagia from uterine atony; cold and deathly pale, wants to be fanned.
‖Burning, smarting and soreness, with abundant leucorrhœa, most abundant in early morning.
‖Corroding leucorrhœa, with swelling of female genitals. θPrurigo.
‖Leucorrhœa: thin, in morning on arising, not through day; milky, excoriating; thick yellow, preceding or following menses; intermitting, coming and going suddenly; with soreness and rawness in pudenda.
‖Vaginal fistula, burning pains.
‖Varices of vulva, itching of vulva and anus; cause dysuria.

Digitized by Google

‖Red, sore places on pudenda; aphthæ; also during leucorrhœa.
‖‖Soreness, itching, burning and swelling of pudenda. θPrurigo.
‖Erectile tumors in genitals; blue, hard, pricking.
‖Uterine cancer; paroxysmal spells of burning in uterine region; varicose veins in genitals; cold knees in bed.

[31] **Pregnancy. Parturition. Lactation.** ‖Labor-pains weak, or ceasing, with great debility; especially after severe disease or great loss of fluids.
‖Brown, foul smelling lochia.
‖‖Debility from nursing. θGastralgia.
‖Suppression of milk.
‖Erysipelatous inflammation of mammæ.
‖Lumps in mammæ, with induration of maxillary glands, with burning pains. Compare *Carb. an.* θScirrhus.
Neuralgic nodes in mammæ.
‖Intertrigo or chafing of infants.

[32] **Voice and Larynx. Trachea and Bronchia.** ‖Voice weak or extinct. θAsiatic cholera.
‖Deep voice, failing if exerted; no pain.
‖Hoarseness: and rawness, < evenings; aphonia mornings; in damp, cool weather; chronic; < from damp, evening air; warm, wet weather, and from talking; resembling a base voice.
‖Cannot speak a loud word, or voice becomes deep and rough, or fails.
‖Obstinate hoarseness; < in evening. θTracheitis. θAsthmatic affections. θHydrothorax.
‖Hoarseness early in morning; < in damp, cool weather.
‖Hoarseness; < in afternoon, evening and from speaking. θStomacace.
‖Hoarseness, following croup.
‖He is obliged to clear his throat so often in evening that larynx becomes raw and sore.
‖When coughing, severe pain in larynx and in region of thyroid cartilage, as if ulcerated.
‖Ulcerative pain or scraping, and titillation in larynx.
‖‖Great roughness in larynx, with deep, rough voice, which failed if he exerted it, though without pain in throat.
‖Tingling, tickling in larynx.
‖Irritation in larynx causes sneezing. θInfluenza.
‖Unusual feeling of dryness in trachea, not relieved by hawking.
‖Laryngeal phthisis with irritative fever; after *Bellad.*
‖Chronic bronchitis, particularly in old people.
‖Bronchial catarrh, hoarse, mucous râles; chest and ribs as if bruised; blue nails and cold extremities.

Digitized by Google

Whooping cough in beginning; spasmodic, with retching and vomiting.

In highest grade of croup: bluish color of face, pale, pulse small and intermittent; difficult breathing and whistling, with complete insensibility and no cough; rare, muffled cough, semi-comatose or constant restlessness, with clinging to persons.

[26] **Respiration.** Offensive breath. θTyphus.

Breath cold. θAsiatic cholera. θYellow fever.

Cold breath, coldness of throat, mouth and teeth.

Breathing short, with cold hands and feet.

Breathing deeply causes fatigue of back.

Loud breathing during sleep.

Loud, rattling breathing; cough ceases; œdema pulmonum impending.

Desires to be fanned, must have more air.

Loses breath on turning in bed, or when going to sleep.

Inclination to sigh, and to take a deep breath. θIntermittent fever.

Difficult breathing, fulness of chest, and palpitation on slightest motion.

Breathing laborious, quick and short; only a catching for breath.

Shortness of breath while walking.

Great dyspnœa, great anxiety, but not restless; cough in violent spells, watery, profuse expectoration. θEmphysema.

Asthma of old people and of poor, exhausted constitutions; weakness, trembling; looks as if dying; full of wind, but cannot raise it; > in cold air; < in morning.

[27] **Cough.** Cough caused by itching in larynx (with tenacious, salty expectoration), in evening on going to sleep, and in morning after waking.

Half involuntary, rough cough, caused by constant roughness and crawling in throat.

Cough; spasmodic, hollow, in short, hard spells; continuous, hard and dry; caused by a feeling as of vapor of sulphur; < evening or before midnight; at times dry, painful, at others with purulent, slimy, offensive, or salty sputa; with copious sputa night and morning; and vomiting after other symptoms of whooping cough are gone; with painful stitches through head; < going from warm to cold places; motion; walking in open air; after lying down; evening in bed from eating or drinking, especially cold food or drink; from talking; on expiration; during supper.

Cough is mostly hard and dry, and hoarse or rough sounding; is most apt to occur after a full meal, and ends in vomiting. θWhooping cough.

Digitized by Google

Pain in chest after cough; burning as from a coal of fire.
Soreness of chest and heat of body when coughing.
Every violent coughing spell either brings up a lump of phlegm, which relieves, or it is followed by retching, gagging and waterbrash.
Obstinate cough preventing sound sleep; getting < towards morning and from talking; also upon persons approaching or passing; pulse only 72; there is also dyspnœa, and is compelled to lie with head high; on percussion the whole lung gives forth a dull sound. θHydrothorax.
Spasmodic cough in three or four paroxysms daily.
Itching internally from throat down centre of chest, < when coughing.
Sputa: tough and greenish, yellow green or purulent; brown, bloody; or less often tenacious whitish mucus, or watery; of sour or saltish taste; of unpleasant odor.
Feeling of mucus in throat, at night, choking her when she coughs, > when sitting up or moving.
Much hawking of mucus.
Continual mucous expectoration, or gagging and vomiting of mucus; great exhaustion after every coughing spell, blueness of skin, > from hard fanning. θPertussis.

Inner Chest and Lungs. Cutting and aching pain in chest.
Burning under sternum; rattling of large bubbles; dyspnœa; cold kness in bed.
Burning in chest, as from glowing coals; rawness and soreness.
Hæmoptysis, burning in chest, paroxysms of violent cough, hoarse; pale face; cold skin; slow, intermittent pulse; wants to be fanned.
Dull stitches in l. side of chest, extending into short ribs.
Stitches in chest. Comp. *Kali carb.*
Oppressive tearing in l. chest.
Pressive pain in upper r. chest, through to scapula.
Aching and tearing in chest, extending to hips.
In l. middle chest painful spot size of dollar, with cough. θStomacace.
Pain in chest from drinking cold water.
Pain in l. lung, hard, heavy, constant, confined to main bronchial tubes; great susceptibility to cold; after inhalation of great heat from a fire.
A tight feeling in chest, and constant desire to cough, from a scraped feeling and a tickling in throat and trachea.
After disappearance of coryza, chest much oppressed, with wheezing and rattling; he was unable to remain

in bed on account of want of air, and cough, which affected him even to vomiting, and was difficult to loosen.

Itching from throat down centre of chest; < by coughing.

‖‖Weak, fatigued feeling of chest, particularly on waking.

‖Congestion to chest and head.

‖Pleuritic serous exudation, with hectic fever and evening aggravation.

Asthmatic affections from hydrothorax.

‖Chronic asthma: once or twice monthly; > in Summer; attacks come always during sleep, even after midnight or in afternoon sleep; patient has to get out of bed and sit by table, and so work off attack; chest feels as if walled up, and only with greatest exertion is panting breath drawn.

‖Inveterate cases of asthma in old people; < early in morning; > in cold air; increase of saliva; appearance as if dying. θAsthma.

‖Coughs day and night, with burning and pressing under sternum; expectorates yellow, purulent matter and tubercles. θPhthisis pulmonalis.

‖Phthisis tuberculosa incipiens, or septic condition with prostration, sunken features, sallow complexion, emaciation and hectic.

‖‖Pneumonia: third stage, fetid sputum; cold breath and sweat; wants to be fanned; threatened paralysis of lungs.

[20] **Heart, Pulse and Circulation.** Præcordial anguish as though he would die.

‖Burning in region of heart.

‖Palpitation: excessive, for days; after eating; when sitting.

‖Orgasm of blood, visible palpitation, internal heat, especially when sitting; anguish and great thirst. θCarditis.

‖Pulse, threadlike; weak and small; intermittent; weak and faint; hardly to be felt.

‖Pulse very irregular, intermitting, frequent. θCarditis.

‖Blood stagnates in capillaries, cyanosis; cold face and limbs; cold sweat; complete torpor; impending paralysis of heart. θYellow fever.

Aneurism; blue varicosities; fine capillary network having a marbled appearance.

[30] **Outer Chest.** Sensation of shortness of breath, with tearing, drawing, burning pains of outer chest.

‖Brown yellow blotches on chest.

‖Itching and soreness in axillæ.

[31] **Neck and Back.** ‖Tearing in cervical muscles.

Digitized by Google

‖Drawing in nape, up into head, with nausea and rush of water from mouth.
‖Stiffness of nape of neck.
‖Cervical glands swollen and painful, especially those near nape.
‖Single, scattered, red spots on neck.
‖Pain in scapular region.
πPain between shoulders, both sides of spine when moving head; > from warmth of stove.
‖Rheumatic drawing in back < when stooping.
‖Drawing pain in back, mostly when sitting.
‖Stiffness of back; spine becomes bent.
Shuddering in back.
Itching acne on back.
‖Severe pain in small of back, she was unable to sit; then sensation as of a plug in back, had to put a pillow under it.
‖Pinching, pressive pain near lowest portion of spine.
‖Pressing, crampy, laborlike colic in small of back and in bladder.
‖Pressive, sore pain beneath coccyx.
‖Burning about hips and scapulæ and aching along spine.
‖Rheumatic drawing and aching from loins to coccyx.

[32] **Upper Limbs.** ‖Burning on r. shoulder and scapula.
‖Stitches and tearing pain in shoulders, < from motion and in morning.
Drawing rheumatic pains in r. shoulder.
Cramplike tension as though shoulders would be drawn together.
Stitches and burning in r. axilla.
Pressing, drawing pain below r. axilla, < from motion.
‖Bruised pain in both elbow joints, painful to touch.
‖Drawing in arm on which he is lying at night.
‖Drawing, tearing in l. forearm, from elbow to hand.
‖Arms weary when writing.
Paralytic weakness of r. arm and shoulder.
Drawing in shafts of bones of arm painful to pressure.
‖Lacerating pain in r. wrist when trying to grasp an object; could not retain hold on account of a paralytic weakness in wrist. θGanglion.
‖Tearing: in either wrist; in fingers of l. hand.
Joints of hands, < in windy weather.
Paralytic pain in carpus from motion.
Sensation of shortening of tendons in wrist and hand.
Sprained feeling in r. hand.
‖Hands: burn; icy cold; tips of fingers covered with cold sweat; numb in morning and when washing; tearing pains in hands and fingers.

Digitized by Google

‖Burning in palms of hands, principally when working.
#Phthisis pulmonalis.
Itching in palms of hands at night.
Boring, tearing, drawing, pricking stitches and burning in fingers and finger joints.
‖Paralytic weakness of fingers when seizing anything.
‖Cramp of fingers, drawing them out of shape.
White, slightly reddened swelling of fingers, also disappearing suddenly.
‖‖Fine itching eruption on hands.
Pulsation in tips of fingers.

Lower Limbs. ‖Tearing near and beneath l. hip, extending to sacrum.
‖Drawing pain in hip joints, extending down thighs, < when walking.
‖Hip disease: third stage, ichorous, offensive discharge; great weakness.
‖Severe laming, drawing pain from abdomen down l. leg.
‖Severe paralytic drawing pain, extending from abdomen down into l. leg.
Tearing in r. hip and thigh.
Stitches in thigh, passing downward when walking.
Crampy pain on outside of l. thigh on lifting it, when ascending stairs.
Burning and rheumatic drawing in thighs.
Tension in thigh in morning.
Constrictive pain in thigh, causing leg to give way in walking.
‖‖Itching on thigh near scrotum; the place is moist.
Twitching of muscles of thigh.
Stiffness in thighs on standing up; numbness when walking.
Stitches in patella on rising after sitting.
Burning in and about knees.
Paralytic pain in knees.
Lassitude and sensation as if knees would give way when walking and standing.
Sensation as though knee was swollen.
Knees go to sleep.
‖‖Cold knees, particularly in night.
Tension in knee and hip joints on awaking.
Legs and knees were drawn up involuntarily.
Cramp in lower leg when walking.
‖Uneasy feeling in legs in evening, in bed; had to stretch them often.
‖Left lower leg feels paralyzed.
Lassitude in legs from noon until evening.

Digitized by Google

‖‖Ulcer on leg burns at night; discharge offensive; mottled, purple.
‖In ulcers on leg, gangrene, burning, but < from warmth, yet not > from cold.
Cramp in calves at night.
Stitches in l. ankle joint.
On treading, pain as though metarsi were torn apart.
‖Cramp in soles, evening after lying down; toes crooked.
Burning in soles of feet.
Pain in soles of feet as though they were too soft when walking.
Stitch in r. great toe.
Tearing pains in toes, < from walking.
‖Toes red, swollen, stinging, as if frosted.
Tearing under toe nails in evening until night.
‖Tips of toes ulcerated.
‖Very cold feet in evening.
Continual insensibility of feet to touch.
Redness and swelling of feet, with sticking pains as though frozen.
‖Feet swollen at night. θGastralgia.
Foot sweat when walking.
Tearing in legs, from collection of flatus in bowels.
‖Sensation of stiffness in legs, after an evening nap, so that he was unsteady while walking until he had walked a little.
‖Heaviness in lower limbs.
Restlessness of legs.
Limbs go to sleep.
‖Foot sweat, excoriating toes.

[84] **Limbs in General.** ‖Burning: in limbs; in hands and soles, during menses; in bones and ulcers.
‖In extremities aching and burning pains, but especially lassitude, heaviness and even numbness; generally diminished by repose, but often in the legs a restlessness, so that one knows not where to place the limbs.
Violent pressure in arms and legs.
‖Boring pain in all limbs as if in marrow of bones, before attack. θIntermittent fever.
‖Drawing pain in limbs.
‖Rheumatic pains, with flatulency.
‖Limbs: feel bruised; numb; "go to sleep" when lying on them.
Pains in limbs as though from sprain or overlifting.
‖Weariness, especially in limbs.
‖Great weariness and stretching of limbs in morning.
Bruised feeling in joints, > after rising.
Sluggish, tired trembling in limbs, and sweating easily in morning.

Digitized by Google

Twitching of single limbs during day.
Twitching in arms and legs in evening in bed.
!The limb upon which he lies goes to sleep easily.
Coldness of hands and feet, < in evening.
Carb. veg., 3d trit., helped a dog for twitching in the hind legs.

[35] **Rest. Position. Motion.** Repose: > aching, burning, lassitude, heaviness, numbness.
!Lying in bed, bending double and getting warm > gastralgia.
Lying down: anxiety; pains in eyes; cough; drawing in arm; cramp in soles; limbs feel bruised; < pain in stomach; on back and stomach.
Sitting: < vertigo; orgasm of blood; drawing pain of back; she had to loosen clothing on account of pressure in scrobiculus cordis.
Rising: after sitting, stitches in patella; heaviness and stiffness in limbs.
Standing: stiffness of thighs; lassitude in knees.
Motion: slightest, difficult breathing; stitches and tearing pain in shoulders; pressing drawing pain below r. axilla; > sleepiness.
Moving: jaws, rustling in ears.
Turning: in bed, loses breath.
Washing: tearing pains in hands and fingers.
Writing: arms weary.
Treading: down, pain in metatarsi; joints feel bruised.
Walking: < vertigo; head sensitive to cold; > aching pain in orbits; shortness of breath; drawing pains in hip joints; stitches in thighs; constrictive pain in thigh; lassitude in knees; cramp in lower legs; pain in soles; tearing pain in toes; foot sweat; stiffness of legs; weary after a short walk; most pains appear.
Lifting: thigh, going up-stairs, crampy pain in thigh.
!Effects from overlifting.
Inspiration: stitching pain in liver.

[36] **Nerves.** !Vital surfaces nearly exhausted, cold surface, especially below knees to feet; lies as if dead; breath cool; pulse intermittent, thready; cold sweat on limbs.
!Depression, not preceded by erethism or excitement.
!Faintlike weakness in attacks.
Weakness makes talking difficult.
!Indolent, weary, in morning in bed.
Sensation of great weariness in bed and in morning.
!Weary after a short walk.
!Prostration towards noon, head feels empty, sensation of hunger.
Lassitude in evening and in open air.

Sensation of weakness in body at night.
Weakness, with trembling in body.
‖Want of nervous irritability, of susceptibility to medicines.
‖Collapse. θAsiatic cholera. θYellow fever.
‖Great restlessness at night. θIntermittent fever.
After a spree.
Spasms; also before onset of menses.

Sleep. ‖Sleepiness in forenoon while sitting, and when reading; removed by motion.
‖Sleepy during day; had to sleep before and after noon; at night sleep full of fancies, weary and unrefreshed on rising.
‖Early sleepiness in the evening, but cannot go to sleep early after going to bed; anxiety, restlessness; congestion of head prevents sleep.
Drowsiness after dinner and in evening.
‖Frequent yawning and stretching, which seem to do good.
‖Sleepless, from uneasiness in body; from orgasm of blood.
‖Does not fall asleep until 1 A.M.
‖‖Awakens often from cold limbs, especially cold knees.
Could not go to sleep at night on account of itching on arms, hands, and between fingers.
Bad effects from night watching or revelling.
‖Legs drawn up during sleep, which is restless and disturbed by frequent waking.
Flying pains before going to sleep.
Trembling anxiety on awaking.
‖Night full of dreams; unrefreshed after sleep.
Restlessness; she had to go through deep water.

Time. Night: flightiness; fear of ghosts; epistaxis; cramp in stomach; moisture exuding from anus; soreness and itching; frequent urging to urinate; wetting the bed; mucus in throat; drawing in arm; palms of hand itch; cold knees; tearing under toe nail; feet swollen; weakness; great restlessness; exhausting sweats; burning in bed; sluggishness.
Morning: confusion of head; trembling anxiety; fainting after sleep; headache and nausea; head sensitive to cold; itching about eye; burning-smarting female sexual organs; cough after waking; asthma; stitches and tearing pain in shoulders; hands burn; limbs weary; tired trembling; indolent, weary; exhausting sweats; extreme lassitude.
1 A.M.: does not fall asleep until after.
3 A.M.: violent constriction; laborlike colic.
Forenoon: mouth and gums bleed; sleepiness.

Digitized by Google

Afternoon: hoarseness; drowsiness.
4 to 6 P.M.: restless, anxious.
Evening: lack of cheerfulness; anxiety, as if oppressed; much excited; throbbing in head; scalp itches; eyes pain; watery discharge from nose; jerking tearing l. zygoma; drawing pain around waist; hoarseness obstinate; cough; hectic fever; uneasy feeling in legs; lassitude of legs; tearing under toe nails; legs stiff; lassitude; sleepy; drowsiness; weariness.
Day and night: cough; itching over body.

Temperature and Weather. Ill effects from getting overheated.
Warmth: < ulcers on leg.
Warm room: > head; in bed, scalp itches.
Warm in bed: itching all over body; inclination to uncover.
From cold and warm substances taken into mouth: toothache.
Going from warm to cold places: cough.
Cold water: pain in chest.
Cold air: < head; > inveterate cases of asthma; susceptibility.
Open air: > pain in orbits and eyeballs; lassitude.
Damp evening air: < hoarseness.
Damp cold weather: < hoarseness.
Bad consequences from living in damp dwellings.
Windy weather: < joints of hands.
Worse in changes of weather, especially warm, damp weather; protracted sultry weather.

Fever. Shivering in evening, with weariness and flushes of heat before sleep.
Coldness and chilliness of body, < at night.
Before chill: throbbing in temples; tearing in bones of limbs and in teeth; cold feet.
Chill, generally with thirst; mostly evenings, at times left-sided.
Chill in morning.
Very cold hands and feet in evening.
Chill, with icy coldness of body.
Internal chilliness, with great thirst.
Chill with great thirst, then heat with slight thirst or only in beginning.
Lassitude during chill.
One-sided chills.
Heat, after or independent of chill.
Flushes of burning heat, evening; generally without thirst.
Heat, with great anxiety, in evening.

Digitized by Google

‖General burning heat in evening; at night, in bed.
‖Heat and sweat commingled.
Heat and sweat in evening.
During heat: headache, vertigo, redness of face, dimness of vision, nausea, pain in stomach, abdomen and chest, dyspnœa, pain in legs.
Sweat: over whole body after fainting; during meals.
‖Sweats easily, especially about head and face.
‖Exhausting night or morning sweats.
‖Sweat: profuse; putrid or sour; most on upper part of body.
‖Chill, with a marked degree of thirst; no thirst, or but slight during fever, but patient wishes to be fanned all the time, as if to compensate for the lack of thirst.
‖‖Adynamic and gastric fevers, occurring in hot weather from abuse of ice-water and other Summer beverages.
‖Hectic fever.
‖‖Typhoid and yellow fever patients: cyanotic, coldness of limbs, almost in agony of death; impending paralysis of heart and collapse.
‖‖Yellow fever: third stage, hemorrhages, with great paleness of face, violent headache, great heaviness in limbs and trembling of body.*

[41] **Attacks, Periodicity.** Several times daily for weeks: nosebleed.
Twice monthly: asthma.

[42] **Locality and Direction.** Left: tearing-drawing in occiput; ear hot; nostril crawling; zygoma jerklike tearing; pain in teeth; side of chest, stitches; oppressive tearing; wrist and fingers tearing; leg, laming drawing from abdomen; paralytic drawing pain in leg; ankle, stitches; sided chill.
Right: side of forehead, pain; discharge from eye; ear, pain; lobe of liver, painful; side, upper abdomen, flatus; side of abdomen, burning of skin; upper chest, pressive pain; shoulder, drawing, rheumatic pain; axilla, pressing-drawing pain; arm, paralytic pain; wrist, lacerating pain; tearing in hip.
Upper part of body: sweat.

[43] **Sensations.** ‖Pains fly all over body. θNeuralgia.
As if integuments of head were contracted; as if a strap was drawn tightly across forehead; as if hairs were in

* "Just as the milk of sulphur applied to the skin (worn in the stockings) is the best preventive of cholera, so *Carbo vegetabilis* (taken inwardly, and used about the premises) is the best preventive of yellow fever."—*C. Hg.*
"In Memphis, 1873, charcoal came much into favor as a prophylactic; out of more than fifty persons who took it and were constantly exposed to the fever, not one was attacked; the usual dose was half a teaspoonful of the crude powder two or three times a day."—Dr. L. Morse.

various parts, at night; in cervical muscles; in hands and fingers.

Drawing: l. side of occiput; in root of nose; pains in facial nerve; pain in upper and lower jaw, on both sides; in head, and confusion; in molars; pains around waist; in chest; in nape of neck; pain in back to coccyx; r. shoulder; r. axilla; in arm on which he lies; finger joints; pain in hip joint; abdomen to leg; in bones of arms.

Stinging: in toes.

Smarting: female organs.

Biting: in and above nose; in fauces.

Gnawing pain: in rectum.

Pinching: in abdomen; in region of liver; colic; hypogastric region; lower spine.

Griping: epigastric region; in abdomen; after stool.

Pressing: region of spleen; small of back; r. axilla.

Pressive: pain on vertex; pain in lower portion of occiput; aching in eyeballs; pain on posterior part of palate; colic; pain in lower spine; sore pain beneath coccyx; over eyes; in chest.

Pressure: in forehead, temples and vertex; in canthi; in stomach; hypogastric region; on bladder, before stool; on bladder; in testicles; pain in upper r. chest; arms and legs; on uterus.

Rawness: in throat; in stomach; of pudenda.

Scraping: in throat; in chest.

Bruised: pain in liver; feeling in joints; pain in both elbow joints; in limbs, on rising.

Aching: over eyes or in whole head; pain in orbits; in ears; pains in facial nerve; epigastric region; in chest; along spine to coccyx; in extremities.

Soreness: of facial bones of upper and lower jaws; in stomach; of anus; of perineum; female organs; of chest; in axillæ; at neck of bladder.

Bursting: pain < about bladder.

Spasmodic pain: in stomach.

Laming pain: from abdomen down leg.

Sprained: feeling in r. hand.

Rheumatic: drawing from loins to coccyx; r. shoulder; pain in limbs; drawing in back.

Dull pain: in occiput; in r. hypochonder.

Pain: in stomach, burning; dull, r. hypochonder; in bowels, as from lifting; above umbilicus; in chest; in scapular region; severe on small of back; in limbs, as if sprained; in eyes; in soles; in r. side of forehead; in l. lung.

Throbbing: in head; here and there in body.

Long: teeth feel.
Tenseness: in hypochondria.
Tension: region of liver, as if too short there; in chest; in thighs; in knees.
Tight feeling: in chest.
Constriction: of scalp; headache; in throat; violent colic; pain in thigh.
Contractive cramp: in stomach.
Cramp: of fingers; pain, l. thigh; in lower leg; in calves; in soles.
Cramplike: tension in shoulders; calves, at night; in soles.
Pressing, crampy, laborlike colic: in small of back and bladder.
Uneasy feeling: in legs, in bed.
Discomfort: in stomach.
Fulness: in head; after eating; in abdomen.
Emptiness: in head; after putrid stools.
Heavy: head; feeling, in liver; something seems to lie before ears; feeling, in stomach; in limbs.
Heaviness: after eating; in rectum; in lower limbs.
Whirling: in head.
Lassitude: in knees; in legs; evening, in open air; during chill.
Weariness: of limbs; great, in bed; unrefreshed.
Fatigue: of back; arms; of chest.
Dragging: after stool.
Stiffness: in thighs; in legs, after sleeping in evening.
Electric shocks: in head.
Titillation: in larynx; in chest.
Tingling: in larynx.
Paralytic: weakness of fingers; pain from abdomen down leg; pain in knees; pain in carpus; drawing pain from abdomen down leg.
Numbness: in legs; of fingers.
Creeping: in epigastrium, up to throat.
Crawling: l. nostril; in rectum; in throat.
Shuddering: in back.
Coldness: knees, in bed; hands; of body; of limbs.
Heat: in face, head and hands; l. ear; mouth; in rectum; of flatus; internal; after or independent of chill; evening, with anxiety; and sweat.
Dryness: in mouth; in trachea; in ear.
Itching: about eyes; in root of nose; pain, at stool; of anus; of perineum; of old herpetic eruptions; in throat; axillæ; acne on back; of palms; on thigh; all over body; hands and calves; of scalp.

" **Tissues.** Symptoms of imperfect oxydation of blood.

Digitized by Google

‖Blood stagnates in capillaries, causing blueness, coldness; ecchymoses.
‖Aneurisms bright red, round, flat, bleeding violently from least wound.
‖Slightest irritation causes bleeding from venous capillaries.
‖Worse from loss of fluids (hemorrhages, sweats, diarrhœas, etc.).
‖Lymphatic glands swollen, indurated, or suppurating; burning pains.
‖‖Swelling of glands, in scrofulous or syphilitic persons.
Scurvy; so weak, can scarcely walk.
Peritonitis, with tympanitis and paralysis of intestines.
Threatening paralysis of lungs in third stage of pneumonia.
‖Burning in bones and other parts.
Long-standing catarrhs in elderly people or reduced constitutions; venous capillary dilatation of pharyngo-laryngeal parts; torpor of all functions.
Organic detrition without reaction.
‖Gangrene: humid; senile; in cachectic persons; when vital powers have become weakened; great foulness of secretions; great prostration.
‖Anæmia after summer complaint; feeble, pallid, white skin.
‖Chlorosis, with itchlike rash and fluor albus; scorbutic gums; so weak, can scarcely walk.
Emaciation and withering of affected parts.
‖Atrophy, body cold, lies as if dead, yet conscious.
‖‖Sepsis, sunken features, sallow complexion, hectic, typhoid symptoms.
Cholera Asiatica; yellow fever; typhus; epilepsy; rheumatism.

" **Touch. Passive Motion. Injuries.** Touch; scalp painful; tearing in teeth <; region of liver painful; soreness of perineum, when touched; bruised pain in both elbows painful; drawing in shaft of bones painful to pressure: continual insensibility of feet to touch.
Riding aggravates: soreness in limbs; colic.
‖Effects from overlifting.
Shock from injury: stupor, want of vision and hearing, colliquative cadaverous diarrhœa, cold sweat, rattling breathing, stagnant circulation, frequent filiform pulse.

" **Skin.** ‖‖Burning in various places in skin; also at night, in bed.
Itching all over body, day and night; fugitive itching when warm in bed.
Formication in skin.
‖Skin dry and brittle. θTyphus.

Jaundice: after too much or too rich food; from abuse of mercury.

Blue color of body, with terrible cardiac anxiety and icy coldness of whole surface. θCyanosis.

Brownish spots.

External parts grow black. θGangrene.

Folds of skin become raw and ulcerated.

Fine, moist rash, with burning at spots where there is no eruption.

Nettlerash, painless papules and fine itching eruptions on hands and calves.

Sequelæ of measles, particularly hoarseness.

Scarlatina: last stage; rattling in throat, loss of vital power; foul breath and cold extremities; must have air and wants to be fanned; sticky. cold perspiration; sepsis and sloughing.

Moist herpetic eruption, especially in face.

Dry rash, like itch.

Moist itch; abuse of mercurial salves.

Certain forms of leprosy; face appears swollen, spots reddish-brown; toes appear as if frozen.

Purpura hemorrhagica, with fever and great soreness.

Asthenic variola, with cold breath and excessive prostration, livid purple eruption.

Ulcers: varicose; scorbutic; livid, easily bleeding; fetid.

Ulcers are offensive; old ones break out afresh; they burn and easily bleed.

Pressure and tension around ulcer in leg.

An ulcer which has been removed, breaks out again, and instead of pus emits a bloody lymph.

Syphilitic ulcers with high edges become irritable from topical treatment; margins sharp, ragged, undermined; discharges thin, acrid, offensive; ulcer painful and liable to bleed when touched.

Ulcerations with burning pain.

Pus from an ulcer was offensive, like asafœtida.

Telangiectasia of children.

Burns; chilblains.

Decubitus in typhus, from decomposition of blood.

[47] **Stages of Life, Constitution.** Children, after exhausting diseases.

Boy, æt. 3 years; deafness.

Vital powers low, venous system predominant.

Old people. θAsthma. θChronic bronchitis. θDyspepsia. θHemorrhoidal troubles. θBlennorrhœa.

Negro woman, æt. 40; purpura hemorrhagica.

Man, æt. 39, delicate stature and constitution; phthisis pulmonalis.

Digitized by Google

Man, æt. 43, bilious lymphatic temperament; lung trouble from inhalation of great heat of fire.

" **Relations.** Antidoted by: *Arsen.*, *Camphor.*, *Coffea*, *Laches.*, *Spir. nitr. dulc.*

It antidotes: effects of putrid meats or fish, rancid fats, salt or salt meats; *Cinchon.*, *Laches.*, *Mercur.*

Compatible: before ❙*Arsen.*, ❙❙*Cinchon.*, *Droser.*, ❙*Kali carb.*, *Phosph. ac.*; after *Bellad.* (in laryngeal phthisis, with irritative fever), ❙*Bryon.* (gastric sphere, particularly in hot weather), ❙❙*Kali carb.*, *Laches.*, *Lauroc.*, *Mercur.* (burning hemorrhoids, after every stool protrusion of bleeding piles; when itch is dry) *Nux vom.*, *Sepia*, *Sulphur* (when itch is dry), *Tabac.*, *Veratr.* (in beginning of pertussis).

Complementary: *Kali carb.*

Compare: the carbons generally; *Caustic.*, *Laches.*, *Phosphor.* and *Rumex* in hoarseness; *Camphor.* in collapse; *Cinchon.*, *Plumbum* in neglected pneumonia, etc., especially in old topers; *Natr. mur.* in paralytic weakness, when grasping things; ❙*Opium* in lack of reaction after well-indicated remedies; *Phosphor.* in easily bleeding ulcers; ❙❙*Pulsat.* in bad effects from fat food and pastry; ❙❙*Sulphur* in acrid smelling menses, erysipelatous inflammation of mammæ.

CARBOLIC ACID.

$C_6 H_5 OH.$

This collection contains, besides all clinical symptoms that could be found in the journals, the principal symptoms from the provings of Lilienthal, Bacmeister, Hoyne, Duncan, Hedges, Boyce, Williamson, Price, and Haeseler; also some toxicological symptoms, the principal ones among them being referable to a report of surgical cases by Billroth, published in Chirurgische Klinik and reprinted in vol. 99, 1879, of Allg. Hom. Zeitung; they are designated, t. The symptoms marked π were contributed by Von Tagen.

[1] **Mind.** Insensibility.
Loss of memory.
πForgetfulness, she cannot remember anything, becomes easily confused.
πShe starts to do something and forgets it.
πShe has difficulty of remembering events that have passed.
πShe has periods of mental abstraction.
Absentminded, starts when spoken to, nervous tremor.
Inability to fix mind on anything or retain what is read.
Muddled and confused.
πShe had sense of bewilderment.
Mind unusually clear, desirous for intellectual work.
Entire disinclination to study; what he had accomplished seemed very trifling.
Disinclination to mental efforts, even to read.
Disinclination for mental or bodily labor.
Constantly agitated, moaning continuously and occasionally uttering a piercing cry; recognizes no one. θAcute hydrocephalus.
Depressed; morose; irritable.
Fear of impending sickness, evening in bed.
Very irritable.
πShe became petulant and impatient although naturally good, quiet and gentle.
Mental and physical exhilaration.
Restless; cries out in sleep; t. θMeningitis.

[2] **Sensorium.** Felt as if staggering, like a drunken man.
Giddiness, not > by shutting eyes.
Vertigo: on going up and down stairs; > by walking fast in open air, < by sitting down, fear of falling; with trembling.

Digitized by Google

Inner Head. Aching and burning pain in forehead, > by pressure of cold hand.
Dull frontal headache in centre of forehead.
Dull frontal headache: with chilliness; with general lassitude; > in open air.
Feeling of tightness across forehead, directly above frontal sinuses.
Dull frontal headache, as if an india-rubber band was stretched tightly over forehead, from temple to temple.
Frontal headache and oppression of chest, going left to right.
πIntense pressing pains through temples and in top of head; even down to nape of neck, stiffness and soreness were felt.
πShe had severe semilateral headache, extending over vertex, this entire surface was sensitive to touch.
Burning pain in r. temple and vertex.
Dull, heavy pain through temples, with tight band across forehead, and tightness in nose between eyes.
Pressure in l. temple, seemingly on surface of brain.
Twitching pains through temples, neuralgic pains in left.
Jagging pain in head, < from light and noise.
Sharp, darting neuralgic pain in head, changing situation from one side to the other.
Dull pain running from forehead to occiput.
Burning pain in top of head.
Sensation as of fine electric sparks in vertex, changing to a prickling, itching, > by rubbing.
Feeling in top of head as if brain was swashing about.
Headache in upper half of head, in morning.
Dull pressure and pain in occiput and muscles of back of neck, especially just behind ears.
Expansive pains in head, with swimming before eyes.
Head felt as if enclosed in a band, which at times seemed to compress and crush in head, < in temples.
Fulness of head all over brain, with dull pains.
Head feels very heavy.
Numbness in head after reading, with pressure in temples.
Headache, with nausea, > by a cup of green tea.
Pressure or a tight bandage, > headache temporarily, also > while smoking after tea; < bending head forward.
Reading < pressure in occiput.
Severe burning in brain, over eyebrows in evening.
πHer brain throbbed and entire head ached.
Rush of blood to head, face flushed.
Congestive headache.
Basilar meningitis; acute hydrocephalus.

Digitized by Google

‖Periodical spells of sick headache, about time of catamenia.

[4] **Outer Head.** ‖Tinea capitis; vermin on head; ‖itching of scalp.
Scalp sensitive to touch, could not comb or brush hair.
Sweat on head from least exertion.
Sensation of coldness, like cold sensation experienced when nerve of tooth is touched, in one spot on head, stooping, followed by clammy sweat.
‖Cold clammy moisture on head.
Feels like rubbing head and eyes.
‖Retraction of head. θHydrocephalus.
‖Small pustulous vesicle a little to l. of vertex.

[5] **Sight and Eyes.** Cannot see across room.
‖‖Sensitive to light; headache.
Swimming before eyes.
Constant dark spot in front of l. eye.
Letters seem to run together while writing.
Things look as if they were moving backward and forward.
Pupils contracted and insensible to light; t.
‖Alternate contraction and dilatation of pupils. θHydrocephalus.
Neuralgic twitching in eyeballs.
Eyelids open, move up and down constantly; t.
‖‖Very severe orbital neuralgia over r. eye.
‖Neuralgia of r. eye and temple.
‖Slight pain over r. eyebrow; the same kind of pain, but in a milder degree, under r. patella, both of short duration.
Acute piercing pain in a small spot on l. supraorbital ridge before rising; spot remains sore to touch.
Watering of l. eye and watery discharge from nose, in evening.
Pains in head affect eye of painful side so much, it is difficult to keep it open.

[6] **Hearing and Ears.** Pressing pain in l. ear, transient.
πShe had a tingling, numb feeling in ear, followed by humming, buzzing sound.
πBeating pain with a humming sound in both ears.
πMeatus auditorius externus excoriated and covered with small pustular eruption, extending inward.
Pain from throat extends into ear.
Itching of r. ear.

[7] **Smell and Nose.** ‖Smell more acute.
‖Watery discharge from both nostrils, in open air, > indoors, returning when entering a cold room. θCoryza.
‖Fetid discharge from nose. θDiphtheria.
πSame secretion was blown from nose as was hawked from throat.

Digitized by Google

Stinging in l. nostril, with watery discharge from nose and eye.
Both nostrils plugged up.
When blowing nose, mucus bloody, or bright red blood.
‖Nasal membrane so tumefied, must breathe through mouth. θScarlatina.
Feeling of expansion in nasal passage, when walking out of doors.
Tightness in nose between eyes.
Sensation at l. wing of nose as of fine electric sparks, wants to rub the part repeatedly.
Itching of nose.
‖Nasal catarrh, ozæna, discharge very offensive.
‖Epithelioma on nose.
‖A small vesicle formed on centre of nose.

[8] **Upper Face.** ‖Face sensitive to touch of towel.
‖Face flushed and burns. θHeadache.
‖‖Face pale; and anxious.
‖White circle around mouth, rest of face dusky red. θScarlatina.
‖Sallow, soapy and bloodless complexion.
Twitching in cheeks and temples.
Drawing pain in jaw, r. side.
Sharp pain about centre of cheek, as if bitten by a mosquito.
Itching of face; of r. cheek.
A momentary chill runs from face downward, in a hot room.
Slight pustular eruption on r. side of face.
Lupus of face.
Cold sweat on face; t.

[9] **Lower Face.** Slight lividity of lips; t.
‖Lips dry, cracked, painful or black. θScarlatina.
Burning on lips.

[10] **Teeth and Gums.** ‖Aching of teeth of r. upper jaw. θToothache.
‖Grinding of teeth. θHydrocephaloid.
‖Sordes.

[11] **Taste and Tongue.** Coppery metallic taste on tongue and upper palate.
Burning and tingling of tongue, as if a thousand pins were pricking it.
Burning of tongue, especially on tip.
Biting sensation on tongue.
Not able to protrude tongue.
Tongue trembling and like raw beef.
‖‖Tongue dry and chippy; parched and fissured.
Tongue: white; dark brown; ‖thick, yellow white fur down centre (scarlatina); red papillæ project here and

Digitized by Google

there; shiny, glossy, dry coating; covered with thick yellow fur.

‖Tongue dark brown coat, sordes. θRemittent autumnal fever.

[12] **Inner Mouth.** Profuse secretion of bluish-white frothy saliva.

Foaming at mouth; t.

Mouth and throat full of thick, viscid mucus.

Swelling and soreness of inner side of l. cheek, opposite molars.

‖Thrush, aphthæ, stomatitis.

‖Mouth and tongue black, sordes and ulcerated patches on inside of lips and cheeks. θScarlatina.

‖‖Intensely bad smell from mouth. θDiphtheria. θScarlatina. θConstipation.

White hardened or corrugated patches of mucous membrane; t.

‖Breath fetid and repulsive. θScarlatina.

[13] **Throat.** ‖‖Fauces fiery red, swollen; diphtheritic patches; breath almost unbearable. θScarlatina.

Dryness of posterior nares.

Full feeling in throat, with constant desire to swallow.

‖Liquids, on being swallowed, return by nose. θScarlatina.

Choking feeling in throat, with disposition to hawk up phlegm.

Hawking of mucus from pharynx and posterior nares.

πTingling, burning, dryness in throat; later soreness, tumefaction and swelling of surrounding structures.

Sharp stitches in throat.

‖Burning in throat and œsophagus, with heat, rising up from stomach.

‖Entire pharynx, uvula and velum palati looked glazed, had reddish, pearly hue, not unlike early manifestations of diphtheria; tonsils were swollen and involved in like manner.

Diphtheria; exudation imbedded in mucous membrane with fœtor oris

‖Fauces covered with exudate, glands of neck swollen, aphonia, crouplike cough, fetid discharge from nose, violent fever, pulse 130. θDiphtheria.

‖Spasmodic contraction of œsophagus.

‖‖Mucous membrane of œsophagus dry, brownish, shrunken.

Soreness of throat, < on r. side.

Pain in throat extending to ear.

Throat > while smoking after tea (supper).

[14] **Appetite, Thirst. Desires, Aversions.** ‖Loss of all appetite.

Digitized by Google

‖Excessive thirst.
=Thirst and dryness of mouth and lips; > by cooling drinks.
Desire for whisky and tobacco.

Eating and Drinking. Felt as if she had eaten too much.
‖While eating a little breakfast, felt every now and then as if he had to get up and vomit.

Hiccough, Belching, Nausea and Vomiting. Hiccough after dinner.
Nausea: from cold water: in morning: in throat.
‖Constant belching up of wind from stomach. θConstipation.
Fruitless eructations.
‖Acid eructations and formation of gas.
=Sometimes sweetish regurgitation, at other times bitter or sour, or like buttermilk and cabbage.
Vomiting of dark olive green or black fluid: t.
Vomiting, with great restlessness: t.
‖Vomiting. #Pregnancy. #Seasickness. Cancer.
‖Vomiting: of drunkards: vomits everything taken into stomach. #Bright's disease.
‖Chronic vomiting, sarcinæ in vomit.

Scrobiculum and Stomach. Weight in epigastrium, as though burdened with flatulence: seeks relief in fruitless eructating, and pressing hand on pit of stomach.
‖Burning in stomach.
Distress in stomach, with deathly faintness and great sensitiveness to smells.
Empty gone feeling, also with sensation of weight, or with fulness in stomach, and constant desire to swallow.
‖Soreness in stomach and bowels.
‖A great deal of pain changing about from stomach to sides, especially r. side and chest.
‖Dyspepsia: aching in stomach: diarrhœa, followed by constipation: colicky pains.
‖‖Cancer of stomach.

Hypochondria. Uncomfortable feeling across stomach and liver.
Pain in r. hypochondrium: also in iliac region of both sides.
‖Sharp pain in r. hypochondrium. #Remittent autumnal fever.
Soreness of hypochondria > on motion.
Dull pressing pains in hypochondria.

Abdomen. Sinking feeling all over abdomen.
‖Rumbling and rolling in abdomen, with a sense of distension.
Sensation of distension in abdomen, as if full of wind, but does not pass any.

Digitized by Google

A burning or digging feeling low down in abdomen.
‖Frequent occurrence of colic-like pains.
‖Colic of nursing infants.
‖Great tenderness over transverse colon.
‖Bowels feel sore, when walking.
Bowels bloated and full of flatus three hours after a meal.
Rumbling in bowels, feeling as if diarrhœa would come on after walking about.
‖Flatulence of old age depending on imperfect digestion.
Jolting during riding affects unpleasantly the abdominal organs, which feel hot and sore.
Burning on outside of abdomen.
‖Abdomen retracted, with constipation. θHydrocephalus.
A crampy stitch in l. inguinal region while sitting.
Abdominal muscles feel sore.
Itching of lower part of abdomen, as if bitten by something.

[20] **Stool and Rectum.** Emission of putrid flatus.
‖Flatulence of old people. θDyspepsia.
‖Fetid stools.
Stool, like thick glue, passed in thin strips, like tape.
‖Bloody and mucous discharge, appearing like scraping of mucous membrane; tenesmus. θDysentery.
Looseness of bowels, stools of appearance as in bilious diarrhœa.
Watery evacuations, with pain and sick stomach.
‖Involuntary thin, black stools. θCollapse.
‖Involuntary stools of intolerable odor. θPuerperal fever.
‖Diarrhœa, with vomiting of everything taken; desire to drink; rice-water discharge of very offensive odor, resembling that of rotten eggs. θSummer complaint.
‖Diarrhœa, resulting from bad drainage.
‖Dysentery: bloody, mucous stools, like scrapings; tenesmus; tenderness over transverse colon; tongue dry and coated with thick, yellow fur; great thirst and high fever; pulse 110.
Involuntary stools, at night in bed.
Constant ineffectual urging to stool.
‖Periodical spells of diarrhœa, followed by constipation. θHydrocephalus.
‖Constipation.
‖Sluggishness of bowels, accompanied by offensive breath.
Great tenderness of rectum.
Disagreeable hot burning sensation in rectum.
Anus itches and feels as if skin was rubbed off.
‖Hemorrhoids, with tenderness of rectum, also external, sometimes bleeding.

[21] **Urinary Organs.** Tired sensation in renal region.
‖A dark greenish-brown color of urine.

Digitized by Google

‖Greenish urine. θAfter scarlatina.
‖Urine scanty and red. θScarlatina.
‖Urine: golden yellow; grass or olive green; very dark colored; black or blackish olive green.
‖Frequent micturition.
Straining on passing urine.
Urine increased, had a strong smell.
‖Micturated freely an excessive quantity of saccharine urine; ‖obliged to void urine three times every night, and no less than a pint each time; greatly debilitated thereby. θDiabetes.
‖Urine contained albumen; t. ‖Meningitis.
‖While urinating always an involuntary mucous discharge from anus.

Male Sexual Organs. Awakened by strong sexual excitement.
Sexual desire very much decreased; in one case lost for thirteen days.
Sexual organs relaxed and weak, lascivious dreams, with weakening seminal emissions.
Prickling pain through glans penis and urethra.
Intense burning itching of genitals.
Itching of scrotum and inside of thighs > by scratching, but it soon returns.

Female Sexual Organs. ‖Pain in region of l. ovary, when walking in open air, soon subsiding.
‖Painful swelling of l. ovary. θRemittent autumnal fever.
‖Menses irregular.
‖Menses too profuse, dark color, followed by headache and great nervous irritability.
‖Menorrhagia: sinking spells, during which she thought she would die, with cold clammy skin, sallow, soapy, bloodless complexion, irritability of stomach, food lies heavy, flatulence, sour belching, fulness in throat, swollen feeling; constant disposition to swallow, globus hystericus; alternate diarrhœa and constipation.
‖Induration of cervix uteri.
‖Ulceration on cervix uteri; < after caustics, discharge of fetid, greenish, acrid matter from vagina; < after menstruation, which was profuse and lasted six to eight days.
‖Mucous tubercles on labia and inner thighs, with vaginal discharge.
‖Copious discharge of fetid, greenish, acrid matter from vagina. θLeucorrhœa.

Pregnancy. Parturition. Lactation. ‖Vomiting of pregnancy; great irritability; violent frontal headache.
‖Puerperal fever; high fever alternating with often re-

Digitized by Google

curring chills of short duration, followed by profuse sweat with restlessness; tenderness over uterus and r. iliac fossa; pulse 160; diarrhœa, involuntary stools of intolerable odor; lochia suppressed; craving for food; thirst.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Aphonia. θDiphtheria.
Soreness of respiratory organs, with hoarseness.
Hoarseness, with stiff neck.
Hawking of clear white mucus.
Left side of larynx very sore to pressure.
Tickling in throat causing short hacking cough.
‖Catarrhal croup.
Chronic laryngitis and bronchitis.

[26] **Respiration.** πRespiration uneven and irregular.
‖Stertorous respiration.
‖Difficult respiration, with sense of oppression.
‖Desire to take long inspirations, with yawning.
Sighing or moaning expirations; t.
πHer breath was hot and feverish.
‖Shortness of breath on going up hill or up-stairs.
Dyspnœa at night.

[27] **Cough.** Constant inclination to cough.
‖Short, dry, hacking cough, with tickling in throat; can hardly retain anything on stomach.
Troublesome cough, with foul tenacious expectoration.
‖Crouplike cough. θDiphtheria.
‖Whooping cough, with redness of face, watering of eyes and frontal headache.
Expectoration of a large quantity of thick, whitish mucus.

[28] **Inner Chest and Lungs.** Dull pain through upper lobes of lungs, afternoon.
‖Slight uneasy pains in r. lung.
Dull aching in l. side of chest and abdomen, running around to scapula.
Chest feels as if compressed, or as if a load was pressing in front; desire to dilate chest.
Tight feeling in both lungs, especially in outer chest.
‖Feeling of narrowness in chest, as if diaphragm depressed lungs.
Oppression of chest and frontal headache, going from l. to right.
Feeling of expansion in lungs and nasal passages, when walking out of doors.
‡Phthisis pulmonalis.
Gangrene of lung.

[29] **Heart, Pulse and Circulation.** Stitches in region of heart.
‖Bellows murmur over mitral valves; dyspnœa and pal-

Digitized by Google

pitation, < at night; heart < after indiscretion in eating; must walk very slow on account of heart beating, is exhausted by ascending. θOrganic valvular heart disease, consequent upon inflammatory rheumatism eight years previously.

ǃViolent fever, pulse 130. θDiphtheria.

Pulse: rapid (120), feeble and flickering; intermittent, sometimes slow; feeble and flickering; small and rapid.

ǃPulse irregular. θHydrocephaloid.

ǃPulse 160. θPuerperal fever.

[30] **Outer Chest.** Transient dull pain under l. clavicle.

Sensation as of fine electric sparks on sternal end of r. clavicle.

Dull pressure under sternum, in region of sixth rib.

πSlight tingling along l. side of chest.

Cold sweat on chest; t.

ǃScirrhous cancer of l. breast. *Carb. ac.*, 2d dec., every two hours for two years.

[31] **Neck and Back.** Jerking in l. common carotid artery while walking rapidly after dinner.

Twitching in r. sterno-cleido-mastoid muscle; t. θMeningitis.

Stitching pains in r. side of neck.

Drawing in muscles of neck.

Neck feels lame and stiff, when moving head.

ǃNeck very stiff and sore; feels as if he had taken a bad cold. θRemittent fever.

Very great sense of weight on neck, with tenderness even to touch, on seventh cervical vertebra.

ǃGlands of neck swollen. θDiphtheria.

Itching of back of neck and back.

Aching pains in small of back, down to thighs.

Aching pains in small of back, < when straightening, from jolting when riding, > by pressure.

She has dragging sensation across loins and throughout pelvis.

Boring pains in small of back, with a cold.

ǃSevere pain in lumbo-sacral region, mostly during latter part of night, of long standing.

ǃSoreness of muscles of back and limbs.

[32] **Upper Limbs.** Fetid perspiration in armpits.

ǃPains in r. shoulder without suffering from moving arm.

ǃAching pains in l. shoulder, like a toothache, when lying on r. side.

ǃSevere rheumatic pains in r. shoulder; feeling as though it would be impossible to raise arm, but when effort was made it aggravated pain but very little. θRheumatism.

Drawing pain in l. arm, from shoulder and elbow.

ǃSoreness of muscles of r. arm.

Digitized by Google

πTingling, burning and numb feeling down l. arm to tips of fingers, followed by dull aching, heavy feeling.
‖Aching pain in l. forearm.
Creeping, shuddering or horripilation in l. forearm, running upward.
‖Constant tired, heavy feeling in l. arm.
‖Twitching of arms, principally right; t. θMeningitis.
Contracting pain in palm of r. hand.
Sensation as of fine electric sparks on middle finger of l. hand.
Trembling of hands; cannot write steadily.
Spasmodic flexion of hands on forearms; t.
‖Slight lividity of finger tips.
Numbness of skin of hands.
Stiffness and pricking in hand, followed by a pimple on middle finger (where the acid touched), which increased to size of a carbuncle.
‖Vesicular eruption on hands and all over body, which itches excessively; > after rubbing, but leaving a burning pain.
Tingling-itching in little finger of r. hand, soon after in left.
Pain in second phalangeal joint of middle finger of r. hand.

Lower Limbs. Aching in both hips; in r. hip and l. knee.
‖Rheumatic pain in r. hip joint.
Deep-seated muscular pain on inside of upper third of l. thigh.
A faint feeling spreading from thighs all over body.
‖Aching soreness beneath l. patella, all day up to about 4 o'clock P.M.; feels as if it would be stiff and sore to move it, but is not felt at all.
Sore, bruised feeling, or tingling-itching in leg, during motion.
‖Lower extremities feel heavy as lead.
‖Paralysis of lower extremities; t. θMeningitis.
Sensation just below knee on shin as if it was touched with a piece of ice.
‖Sharp pain in l. shin.
‖Aching pain to l. of middle of l. shin bone.
Dull pain in r. ankle and l. knee.
Bruised pain beneath l. tendo-achillis.
Pain in great toes.
Feet feel heavy, bruised.
Fetid perspiration of feet.
‖Carbuncle on hip of lady, æt. 50.
‖Œdema of both legs; t. θMeningitis.
Chronic ulcers on feet and ankles.
‖Chronic ulcers on feet and ankles, deep, emitting a strong odor and burning like fire.

Digitized by Google

[34] **Limbs in General.** ‖Numb ache in arms and legs. θRemittent fever.
‖Stiffness of limbs. θHydrocephaloid.
Cold hands and feet.

[35] **Rest. Position. Motion.** Lying: in bed, tired.
Sitting: down < vertigo; crampy stitch l. inguinal region.
Bending: head forward < headache.
Stooping: coldness in head.
Writing: letters run together.
Walking: fast > vertigo; rumbling in bowels; pain in l. ovary; up-stairs, short breath; out-doors, feeling of expansion in lungs and nasal passages; heart beats.

[36] **Nerves.** ⁊She had nervous trembling.
‖‖Trembling, uncertain, straggling walk.
Tonic spasms of arms.
Trembling and convulsions.
‖Partial convulsive movements. θHydrocephaloid.
‖Easily fatigued by least walk.
‖Complains of feeling very tired, even while lying in bed. θRemittent fever.
‖Feels as if he had taken a bad cold. θRemittent fever.
‖General malaise, great languor and weakness.
‖‖Profound prostration; physical exhaustion; surface pale, bathed in cold sweat; collapse.
Became thoroughly unfit for study, as every exercise at reading increased all symptoms, especially pressing at occiput.

[37] **Sleep.** Yawning, with desire to take long inspirations.
‖‖Constant inclination to yawn, languid and sleepy, desire to stretch.
⁊She slept by spells; sleep unsatisfactory; fitful starting.
‖Sleeps uneasily, starts; eyes half closed. θScarlatina.
‖‖Wakes often during night.
Heavy and sleepy, perplexed with dreams, wakes unrefreshed.
Somnolency, sopor, ending in coma.
‖Dreams: unable to recall; of fire; amorous; of traveling.

[38] **Time.** Night: dyspepsia <; fearful beating of heart; severe pain in lumbo-sacral region; wakes often; sweat.
Morning: headache in upper half of head; nausea.
All day up to 4 o'clock; aching pain beneath patella.

[39] **Temperature and Weather.** Room feels close and hot.
Cold: hand, pressure > aching and burning pain in forehead; water, nausea.
Open air: chilly; watery discharge from both nostrils; walking in, pain in region of l. ovary.

[40] **Fever.** Chilly sensation while in a warm room.
Chilly in open air.

Digitized by Google

A momentary chill runs from face downward, in a hot room.

‖Chill, followed by fever and very slight sweat, with numb ache in arms and legs; pulse small and rapid; < about sundown and through night; felt as if he had taken a bad cold.

‖High fever, alternating with often recurring chills of short duration, followed by profuse sweat, with restlessness. θPuerperal fever.

Was covered with perspiration.

Sweat at night.

Typhoid and low miasmatic fevers.

Fever of enteric type.

‖Remittent fever, occurring every autumn.

‖Intermittent fever, with enlargement of spleen.

‖Scarlet fever.

41 **Attacks, Periodicity.** Pains sharp, come suddenly, last a short time, disappear suddenly.

Periodical: spells of sick headache.

42 **Locality and Direction.** Symptoms go from head downward.

‖Affected r. side first and afterwards same parts of left. θRemittent fever.

From l. to r.: frontal headache.

Left: bruised pain beneath tendo-achillis; aching pain in knee; pain in thigh; sharp pain in shin; dull pain in knee; frontal headache from l. to r.; pressure in temple; small pustules on vertex; constant dark spots in front of eye; eye, watering; pressing pain in ear; nostril, stinging; wing of nose, sensation of fine electric sparks; swelling and soreness of inner side of cheek; pain in region of ovary; larynx very sore to pressure; dull aching in chest; oppression of chest and frontal headache, going from l. to r.; transient pain under clavicle; slight tingling along side of chest; jerking, common carotid; pain in shoulder like a toothache; arm, drawing pain; tingling burning in arm; aching in forearm, also creeping shuddering; constant tired heavy feeling in arm.

Right: burning pain in temple; very severe neuralgia over eye and patella; ear, itching; in jaw, drawing pain; itching of cheek; pustular eruption; aching of teeth, upper jaw; sore throat; chest, pain; pain in hypochondrium; inguinal region, crampy stitch; iliac fossa, tenderness; senses as of fine electric sparks on sternal end of clavicle; twitching in sterno-cleido-mastoid muscle; stitching pain in neck; rheumatic pain in shoulder; soreness of muscles; twitching of arm; con-

Google

tractive pain in palms of hand; tingling itching, little finger; pain in second phalangeal joint of middle finger; aching in hip and knee; dull pain in ankle.

" **Sensations.** As if an india-rubber band was stretched tightly over forehead, from temple to temple; as of fine electric sparks in vertex; as if brain was swashing about; as of fine electric sparks l. wing of nose; as if a thousand pins were pricking tongue; as if a load was pressing in front of chest; as if diaphragm depressed lungs; as if compressed, chest; of fine electric sparks on sternal end of r. clavicle; as though it would be impossible to raise arm; as of fine electric sparks on middle finger of l. hand; as if just below knee or shin had been touched with a piece of ice; as if he had taken a bad cold.

Pain: over r. eyebrow; under r. patella; from throat into ear; in r. hypochondrium; in region of l. ovary; in r. lung; severe in lumbo-sacral region; in r. shoulder; in second phalangeal joint of middle finger of r. hand; in l. thigh; in great toe.

Acute piercing pain: on l. supraorbital ridge.

Sharp: pain in head; pain centre of cheek; in r. hypochonder; in l. shin.

Darting: pain in head.

Jagging pains: in head.

Stitches: region of heart; crampy, in l. inguinal region; in r. side of neck.

Boring pains; in small of back.

Prickling: in vertex; through glans. penis, and urethra.

Twitching: pains through temples; r. sterno-cleido muscle.

Beating pain: in both ears.

Jerking: in l. common carotid artery.

Burning: pain in top of head; in brain; of lips; of tongue; in throat; in abdomen; in rectum; down l. arm; ulcer on lower extremities; in forehead; in r. temple and vertex; in stomach.

Biting: on tongue.

Stinging: in l. nostril.

Pressing: pain through temples, in top of head; pain l. ear; in hypochondrium.

Pressure: in l. temple; in occiput; in muscles of back of neck; under sternum.

Drawing: pain l. arm; pain in jaw; in muscles of neck.

Neuralgia: of eyes; of temples.

Dragging: across loins.

Bruised: feeling in leg; pain beneath l. tendo-achillis.

Rheumatic: pains in r. shoulder; in r. hip joint.

Distension: in abdomen.

Expansive: pains in head.

Digitized by Google

Sore: abdomen; feeling in legs; inside of cheek; in stomach and bowels; of respiratory organs; muscles of back and limbs.
Aching: small of back; pain in shoulders; l. forearm; in forehead; in stomach; of teeth; of l. side of chest; in both hips and knee; in l. middle of shin bone; beneath l. patella; in leg.
Dull pain: running from forehead to occiput; under l. clavicle; in r. ankle.
Throbbing: entire head.
Contracting pain: in palms.
Digging feeling: low down in abdomen.
Coliclike pains: in abdomen.
Crampy stitch: in l. inguinal region.
Uncomfortable feeling: across stomach and liver.
Narrowness: of chest.
Tight feeling: in both lungs; across forehead; in nose between eyes.
Stiff: neck; feeling in hand.
Tired: in renal region; of l. arm.
Lame: neck.
Sinking feeling: all over abdomen.
Faint feeling: spreading from thighs all over body.
Horripilation: l. forearm.
Numbness: of skin of hands; in head; in ear.
Tingling: of tongue; in throat; down l. arm; in ear; l. side of chest.
Tickling: of throat.
Full: feeling in throat; in head; in stomach.
Heavy: as lead, lower extremities; feeling in head; of l. arm.
Weight: on neck; in epigastrium; in stomach.
Shuddering: l. forearm.
Creeping: l. forearm.
Coldness: when nerve of tooth is touched.
Chilly: while in a warm room.
Hot: abdomen; in rectum.
Itching: lower abdomen; of scalp; of r. ear; of nose; of face; of anus; of genitals; of scrotum and inside of thighs; of back of neck and back; in little fingers; tingling in leg; of skin.
Dryness: in throat; of mouth and lips.

" **Tissues.** ‖Putrid discharges from mouth, throat, nostrils, ears, rectum and vagina.
Œdema of feet, hands and face, with soapy, colorless complexion; after loss of blood.
Scarlatina maligna.
Confluent variola; no secondary fever.

Digitized by Google

Carious bones; necrosis; osteosarcoma; sinuses.

[45] **Touch. Passive Motion. Injuries.** Touch: tooth, coldness; l. supraorbital spot sore to.

Reading: numbness of head; pressure in occiput.

‖Extensive scald (in glycerine externally).

‖Burns, especially if they ulcerate and discharge is offensive.

‖‖Lacerated wounds from blunt instruments; bones bare or crushed and splintered.

[46] **Skin.** ‖Offensive odor from skin.

Erysipelas.

Itching of skin of various parts of body; > by scratching, but soon returns.

Innumerable small (miliary) vesicles over whole body.

‖Eruption not diffused equitably over entire surface, interrupted in many places, and of a dusky red color. θScarlatina.

‖‖Malignant forms of scarlatina.

Pustular and vesicular eruptions.

‖Confluent variola.

‖Acne, eczema, impetigo, scabies, psoriasis inveterata, leprosy; prurigo; pityriasis versicolor; lupus, carbuncles and cancerous sores; sloughing wounds; chronic ulcers.

‖Ulcers with foul odor.

Extensive burns or scalds.

Chilblains and chapped hands.

[47] **Stages of Life, Constitution.** ‖Two children, 9 months old. θSummer complaint.

‖M. B., æt. 10; psoriasis.

‖Lad, æt. 18; variola.

‖Miss, æt. 19; hysterical vomiting.

‖Young lady, æt. 21; variola.

‖Woman, æt. 39; dyspepsia.

‖Woman, æt. 46, scrofulous diathesis; chronic ulcers on feet and ankles.

‖Woman, æt. 50; carbuncle on hip.

[48] **Relations.** Antidotes: chalk, but better *Calc. sacch.*, prepared by dissolving sixteen parts refined sugar in forty parts water, and adding five parts slaked lime; digest three days, stir occasionally, filter, and evaporate to dryness.

Huseman and Wood say, use sweet oil or castor oil as an antidote, as according to Lemaire it will cause the acid to be more slowly absorbed; emetics are generally useless.

Incompatible: glycerine and vegetable oils being solvents spread and increase its action.

Compare: ‖*Gelsem.*, *Mercur.* and *Sulphur* in bandlike headache; *Arsenic.*, *Carb. veg.*, *Cinchon.* and *Kreosot.* in burns, ulcers, etc., with unhealthy, offensive discharge.

Google

CARBONEUM SULFURATUM.

Carbon bisulphide (*Alc. sulph. Lampadii*). CS_2.

To the clinical and principal symptoms from Hering's Monograph on *Carb. sulph.*, 1870, are added those of a poisoning by Dr. Bernhardt, published in Berl. Kl. Wochenschrift in 1871, marked t.

[1] **Mind.** Defective memory; frequently she did not know what she was to do with the things she was holding in her hands; t.
Difficult thinking, ‖memory weakened.
Sought for things lying before them.
Could not find the right words.
Stares at her hands and fingers with a vacant look; t.
Behavior childish and idiotic; t.
Cheerful, free from care, after wind passed.
Surly, morose; vehement, irascible.
Want of energy.
Exhilaration bordering on drunkenness.

[2] **Sensorium.** Vertigo, sudden attacks, ‖while sitting.
‖Dull muddled feeling in forehead; as if contracting.
Great dulness of head.
‖Confusion. θHeadache.
‖Drunken, unconscious from whisky.
Frequent attacks of fainting; t.
‖Asphyxia. See 26.

[3] **Inner Head.** ‖Pressure, most in forehead.
Violent pain in head; headache increasing until it causes confusion of mind; feverish attacks; cold extremities, and spasmodic pulse.
Very sharp pains in head, through temples, nearly every day, notably after dinner; numbness through to top of her head.
‖Violent headache, increasing till mind is affected.
Penetrating pain, < by shaking head and heavy steps.
Fluctuating in head, < by moving head.
Painful heavy feeling in head, after breakfast.

[4] **Outer Head.** Brushing the hair is painful.
Itching on head.
Head sinks forward in walking.
Single nodules on head, sore to touch.

[5] **Sight and Eyes.** ‖Dim sight; objects fade away.
Vanishing of sight; t.

Digitized by Google

Reading brings tears to eyes.
Sunken eyes, with grey rings.
Staring eyes.
Small pustule on upper lid, itches and burns.
Lids heavy; sore on moving; quivering.

[6] **Hearing and Ears.** Ringing in ears.
‖Stitches in ears; after stool.
Stitches in l. ear.
Pain in l ear, when swallowing.
At intervals, feeling as if some one was quickly pressing on tympanum with a blunt instrument.
Ears as if stopped up.

[7] **Smell and Nose.** End of nose burns and is quite red, and burning as if raw.
Tickling in point of nose,with irritation to sneeze.
Sneezing, with sensitiveness in chest.
Eruption on nose.

[8] **Upper Face.** Expression bewildered and as of one demented; t.
An eruption on nose and cheeks similar to acne of drunkards.
Tetter-like eruption on l. cheek, produced through scratching with finger nails; spreads and is covered with yellowish-brown scabs, disfiguring the face; almost unbearable on account of continued itching.

[9] **Lower Face.** Pushes the lower jaw far forward, and gnashes with it against the upper one; t.
Lips dry and burning.
Contractive feeling in muscles of lower jaw.

[10] **Teeth and Gums.** πEvening, throbbing toothache, with burning in last molar, upper left, not very severe but continuing all night.
‖Toothache brought on by warm food.
‖Neuralgia of teeth.

[11] **Taste and Tongue.** Taste: sweetish, foul, bitter, sour, pappy, metallic.
Lisping, stammering speech like that of a child; t.
‖Saltish taste of phlegm hawked up from fauces.

[12] **Inner Mouth.** Great dryness of mouth, with unquenchable thirst; t.

[13] **Throat.** Tickling in posterior portion of palate after lying down, causing violent, dry cough.
Burning in throat, extending to stomach.
Sensation as if a hair had lodged in throat.
Stitching, contracting pain in upper part of œsophagus, as if a piece of bone had lodged there.
Dryness in throat; t.
Scraping feeling in throat, with fine stitches.

Digitized by Google

Swallowing: difficult; causes pain in l. ear.

[14] **Appetite, Thirst. Desires, Aversions.** Hunger, with aversion to eating.

Loss of appetite or speedy satiety when eating.

Great thirst; desire for beer.

[15] **Eating and Drinking.** After breakfast: headache; pressure in stomach; diarrhœa.

After dinner: pressure in stomach; diarrhœa; tickling in urethra; pain in thigh; pain in feet; pain in belly ceases.

After eating: painful, heavy head; belching; abdomen puffed up; bellyache.

Drinks enormous quantities of water; t.

[16] **Hiccough, Belching, Nausea and Vomiting.** Acrid burning eructations after eating.

‖Sour belching and passage of much sour flatus; > from belching.

Nausea, with fainting spells; with pressing frontal headache; with bitter taste, on awaking; with frequent eructations; with accumulation of saliva in mouth, as of fainting.

Inclination to vomit when entering a room or going into open air.

‖Vomiting of bitter water.

[17] **Scrobiculum and Stomach.** Pressing, stitching pains, of short duration in pit of stomach, beginning at one point and radiating to cardiac region, followed by loud belching.

Burning in scrobiculum and stomach.

Stabbing pains in stomach, extending to back.

Flying stitches in region of stomach.

‖Pressure in region of stomach and under sternum, with herpetic dyscrasia.

Feeling in stomach as if tied together.

Stomach painful to external pressure.

Heartburn.

[18] **Hypochondria.** Stitches under short ribs.

‖Liver complaint, with dropsical swelling of feet.

[19] **Abdomen.** ‖Cutting pains in bowels.

Pressing, crampy pain in abdomen.

Griping pains around navel, with urging to stool.

Navel drawn inward, with pain. θDiarrhœa.

Jerking and stitching pains in abdomen.

‖Rumbling and flatulent complaints; twisting, rolling, and rumbling as if diarrhœa would set in.

‖Fulness and distension of abdomen.

Abdominal walls feel bruised and sore.

‖Strangulated hernia.

Digitized by Google

[20] **Stool and Rectum.** Very offensive and frequent passage of flatus.
Stool always thin, papescent and small.
After stool: headache; stitches in ears; pressure in stomach; burning; weakness and trembling.
Diarrhœa watery or mucous, with much rumbling.
‖Chronic diarrhœa, which set in every four to six weeks and lasted for one or two days; yellowish, frothy, sour smelling fluid evacuations, with tenesmus and colicky pains, particularly in umbilical region, through which the navel was drawn inward; came on during night.
‖Stool not increased, but accompanied by tenesmus.
Considerable discharge of bright red blood, with stool.
Constipation: with belching; with herpes.
Burning and itching at anus.

[21] **Urinary Organs.** Stitchlike, cramping pain in bladder and neck of bladder, through to urethra, at same time a similar pain in anus and rectum.
Burning in urethra: with erections; when urinating.
Involuntary urination during night; t.

[22] **Male Sexual Organs.** Complete loss of sexual desire.
Tickling in forepart of urethra and sensation as if something would run out.
Burning in urethra during erections and when urinating.
πStitches in l. spermatic cord.
πLeft testicle more swollen and indurated than usual, more painful even when at rest, afterwards smaller and more comfortable.
Scrotum shrivelled and drawn up.
Impotence, with atrophied testicles.

[24] **Pregnancy. Parturition. Lactation.** ‖Labor-pains too weak.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness, irritation to hawk; heat in larynx; scratching and scraped feeling. θClergyman's sore throat.

[26] **Respiration.** ‖‖Expiration hot; breathing difficult; flying stitches and burning in chest, quickly passing over, but frequently returning.
‖Asphyxia from alcohol and from coal gas.

[27] **Cough.** Cough from irritation in larynx or at bifurcation of trachea.
Cough caused by heartburn.

[28] **Inner Chest and Lungs.** Warmth and fulness in chest, with difficult breathing. θCongestion of lungs.
‖Flying-burning and stitches in chest. θPhthisis.

[29] **Heart, Pulse and Circulation.** Palpitation of heart, with anæmic patients; nun's murmur in vessels of neck.
‖Spasmodic pulse. θHeadache.

Digitized by Google

Diminution of pulse to 52. θAnæmia.

31 **Neck and Back.** Rheumatic pains, with stiffness of neck.
ǁGoitre.
Feeling as if a heavy load was hanging on back between scapulæ.
Pains in small of back and loins.
Pains as if dislocated in region of r. loin.
Tensive feeling in small of back, < going up-stairs, with occasional jerking towards hip joint.

32 **Upper Limbs.** ǁCrackling in r. shoulder joint from every motion, connected with more or less severe stitches from shoulder joint to elbow, with every change of weather.
Jerking, stitching pain in r. shoulder joint.
ǁStitches from shoulder joint to elbow, or even to wrist, especially violent after midnight and during damp or cold weather.
Tearing pains in l. shoulder and r. elbow.
ǁWrist joint scalded with boiling water; wrist much swollen, blisters partially opened.
ǁSlight scald of l. hand; bright redness without much pain or swelling.
Sensation as if arm was being drawn up.
Vibration and trembling in hands; t.
ǁGout of hand.
ǁHerpes phlyctænoides, covering dorsal surface of hand.
Laming and pricking pain in l. arm; arm goes to sleep.
Jerking, flying stitches in wrists and in finger joints. θRheumatism.

33 **Lower Limbs.** ǁJerking, stitching rheumatic pains in lower limbs.
Inflammatory sciatica in l. thigh, from taking cold, with entire inability to walk.
ǁChronic sciatica in r. thigh, movements of limb impeded.
Pain as if dislocated in r. knee.
Pain in l. metatarsal bones as if wrenched by a misstep.
Dropsical swelling of feet. θHepatic affection.
Audible cracking of ankle when walking; ankle was sprained two years ago.
Cramps in calves and in toes.
ǁImpetigo: pimples which form scabs, in the popliteal space and on dorsum of foot and hand.
Pain in ankle joints as if broken, in morning in bed.
Stabbing, piercing pain from metatarsal bones through toes, while walking.
Painful tiredness and bruised feeling in soles.
ǁCold feet.
ǁRheumatism of lower extremities; slightest motion brings

Digitized by Google

on violent pains, particularly in hips and knees, with redness and swelling of feet.

[34] **Limbs in General.** ‖Tearing in all limbs, coming and going, now in one and again in another limb.

A sudden pain catches her and comes so quickly as to make her jump; pain begins at l. elbow and runs down l. side to foot.

‖Tearing in limbs, with herpes of face.

‖‖Jerking, stitching, tearing, flying pains, returning at regular intervals, for a long time.

‖Crackling of joints after previous gouty affections of joints.

‖Chronic rheumatic and arthritic affections.

[35] **Rest. Position. Motion.** Sitting: sudden attacks of vertigo.

Motion: slightest, < rheumatism of lower extremities.

Walking: stabbing pains from metatarsal bones through toes.

[36] **Nerves.** A feeling of vibration and trembling in whole body, particularly in the hands; t.

When placed on her feet she sinks slowly to the ground; t.

Anæsthesia of the skin and mucous membranes; t.

‖Sciatica.

[37] **Sleep.** Restless sleep, with tossing in bed.

[38] **Time.** Night: throbbing toothache; involuntary urination.

[39] **Temperature and Weather.** Warm food brought on toothache.

[40] **Fever.** ‖Feverish attacks. θHeadache.

‖Coldness. θHeadache.

After much walking: sweat, which relieved headache.

Suppression of usual perspiration.

[41] **Attacks, Periodicity.** Coming and going quickly, pain in forehead and limbs.

‖‖Short but quickly returning attacks, at regular intervals.

Every six weeks, chronic diarrhœa.

[42] **Locality and Direction.** Left: ear, stitches; pain in ear; swallowing causes pain in ear; tearing pain in shoulder; laming jerking pain in arm; pain in metatarsal bones.

Right: loin, pains as if dislocated; shoulder joint, crackling and stitching; tearing pain in elbow; sciatica in thigh; pain in knee, as if dislocated.

[43] **Sensations.** Forehead as if contracting; ears as if stopped up; as if some one was quickly pressing on tympanum with a blunt instrument; as if a hair had lodged in throat; r. loin as if dislocated; in l. metatarsal bones as if wrenched; in ankle joint as if broken; as if tied together, stomach; as if diarrhœa would set in; as if

Digitized by Google

something would run from urethra; as if a heavy load was hanging on back between scapulæ; as if arm was being drawn up; r. knee as if dislocated.

Pain: in small of back; in region of r. loin; in urethra; in bladder, rectum and anus; in l. ear; in thigh; in feet.

Violent pain: in head; in lower limbs.

Sharp pains: through temples.

Tearing pain: in l. shoulder and r. elbow; in all limbs.

Jerking: in abdomen; wrist and finger joints; lower limbs; in bladder; l. spermatic cord; in r. shoulder joint.

Flying stitches: in wrists and finger joints; in region of stomach; in chest.

Stitching: upper part of œsophagus; pit of stomach; under short ribs; in abdomen; in ears; in throat; in l. spermatic cord; in r. shoulder joint; from shoulder to elbow.

Stabbing: in stomach; from metatarsal bones through toes.

Cutting pain: in bowels.

Piercing: from metatarsal bones through toes.

Penetrating pain: in head.

Pricking: in l. arm.

Burning: end of nose; in last upper l. molar; in throat; in stomach; in anus; in urethra; in chest.

Bruised feeling: in soles.

Rheumatic pain: in lower limbs; in neck.

Neuralgia: of teeth.

Flying pains: in stomach.

Pressing: pains in pit of stomach; pain in abdomen; pain in forehead.

Pressure: in forehead; in stomach.

Contracting pain: in upper part of œsophagus; in muscles of lower jaw.

Tensive feeling: in small of back.

Throbbing: headache; toothache.

Fluctuating: in head.

Vibrating feeling: in whole body.

Dull feeling: in head.

Fulness: in chest; in abdomen.

Heavy feeling: in head.

Griping pain: around navel.

Crampy pain: in abdomen; in bladder; in anus and rectum.

Cramp: in calves and toes.

Laming pain: in l. arm.

Numbness: through top of head.

Digitized by Google

Heat: in larynx.
Warmth: in chest.
Dryness: in throat; of mouth.
Scraping feeling: in throat.
Tickling: in point of nose; palate; in urethra.
Itching: in anus; on head.

" **Tissues.** ‖Enlarged and indurated lymphatic glands.
Tetters.
‖Cold swellings.
‖Rheumatic troubles.
‖Rheumatism, either without fever or with only slight fever.
‖Rheumatism and gout; after the relief of acute and inflammatory conditions.
‖Chronic rheumatic and arthritic affections, which, of themselves, are without fever.
‖Gout, but not gouty dyscrasia.
‖Gouty swellings when not of too long standing.
‖Tuberculosis of lungs or bowels.

" **Touch. Passive Motion. Injuries.** Pressure: external, stomach painful.
A heavy step: hurts head.
Reading: brings tears to eyes.
‖Scalds and burns.

" **Skin.** ‖Itch and herpetic affections.
‖Vesicles on a red, inflamed and swollen base, partly close together, but mostly separated; they contain an opaque, yellowish fluid, which forms thick, yellowish scabs, sometimes the discharge excoriates and produces violent itching. θHerpes phlyactænoides.
‖Pimples which form scabs, in popliteal space and on dorsum of foot and hands. θImpetigo.

" **Stages of Life, Constitution.** Herpetic dyscrasia.

" **Relations.** Compare: *Carb. veg.* (flatulency); *Sulphur* (sensitiveness of abdomen).

CARDUUS MARIANUS.

Silybum Marianum Gaertno. *Compositæ.*

Radix, Herba et Semen Cardui Mariæ, in use since olden times. Revived by Rademacher in 1848.

A very complete history and some symptoms given by Reil (Clotar Müller's Quarterly, vol. iii, p. 453, 1852); proved by Lembke (Zeit. für Klin., vol.. vi., p. 18); a most excellent proving by Dr. Buchmann (Allg. Zeit. für Hom., vol. xcviii, 1879), the same who has shown by his microscopic investigations his great superiority as a scientific man, and the discoverer of the solubility of all metals and other substances, presupposed by Hahnemann.

[1] **Mind.** ‖Forgets what he has just intended to do.
Sadness with tendency to weep.
‖Fulness in head with disposition to become angry.

[3] **Inner Head.** ‖Sensation of fulness and heaviness in head.
Pressing pain on inner surface of skull, in region of coronal suture.
‖Pressure in forehead, most marked directly over eyes.
‖Pressing pain in occiput.
Transient headache in forehead and temples.
Pressive headache, as in incipient coryza.
Headache shortly before meals, disappearing after eating.

[4] **Outer Head.** Tensive pressure in scalp, as if constricted around skull.
Fulness of head, with tensive pain in scalp, over l. parietal bone.
‖Feeling of constriction over eyebrows.
‖Pain in l. parietal bone.
Drawing pain in scalp of occiput.
Great sensitiveness of head to cold.

[5] **Sight and Eyes.** ‖Burning and pressure in eyeballs.
Pressure in eyeballs as if they were pressed against side of orbits.
Pain in r. eye.
Redness of conjunctiva.
‖Burning sensation in edges of upper and lower lids.
‖Pressive, burning sensation in eyelids, with swelling and heaviness of same; more especially in l. eye, which can with difficulty be opened.
‖Pressure over l. eye.
Pain in orbits.

Digitized by Google

[6] **Hearing and Ears.** Pain in r. auricle, in circumference of meatus.

[7] **Smell and Nose.** Loss of smell.
Tickling sensation at outer edge of nostrils.
‖Tickling sensation at first in r., then in l. nostril, with watery discharge.
Burning in nostrils.
Burning in r. nostril, with watery discharge from same.
Epistaxis.

[8] **Upper Face.** Sensation of heat in face.
Complexion dirty or florid.

[10] **Teeth and Gums.** Drawing pains in carious teeth.
A hollow tooth is painful to contact of tongue.

[11] **Taste and Tongue.** Whitish coating of middle of tongue, with redness of edges.
Metallic taste, constricting palate and pharynx.
‖Bitter taste in mouth.
Soups salted as usual tasted insipid; at other times well salted food is repugnant.

[13] **Inner Mouth.** ‖Collection of water in mouth.

[15] **Throat.** ‖Feeling of roughness and dryness in palate.
‖Smooth sensation of mucous membrane of palate, as though it was covered with fat.
Sensation of dryness in palate and on lips.
Repeated eructations of air, with burning in œsophagus like heartburn.
Dysphagia.

[14] **Appetite, Thirst. Desires, Aversions.** Smoking, though usually repugnant in evening, is agreeable.
‖Want of appetite.
Voracity.

[16] **Hiccough, Belching, Nausea and Vomiting.** πSour eructations.
‖Empty eructations, after food taken with aversion.
‖Nausea, with collection of water in mouth.
Continual nausea with desire to vomit.
‖Intense nausea, painful retching and vomiting of sour, greenish fluid.

[17] **Scrobiculum and Stomach.** ‖Stitches in scrobiculum.
Pressing pains at pit of stomach.
Drawing pains from l. to r. through pit of stomach.
‖Contents of stomach and intestines sour. θEpidemic affection.
Pain in stomach, lasting for two hours, preceded by vomiting.
‖‖Pressure in stomach: with eructation of air; at night awakening; lasting all day; coming and disappearing during day.

Digitized by Google

Sensation of emptiness in stomach, as before meals.
‖Burning in stomach, as of acidity, with transient pressure in stomach.
Stitches in l. of stomach, < on inspiration.
Uncomfortable sensation in epigastric region.
Painful griping in stomach.
Colicky pains in stomach, with waterbrash.
Hæmatemesis; cardialgia; vomiting of pregnancy; melæna.

[18] **Hypochondria.** Feeling of fulness in hypochondria, necessitating deep inspiration.
‖Hepatic region sensitive to pressure.
‖Pressure, drawing pain and stitches in hepatic region.
‖Sensation of tension and pressure in liver, on lying on l. side.
Crawling sensation, like passage of a small body size of a pea through a narrow canal, on posterior side of liver from r. to l., extending to pit of stomach, on a level with border of ribs; repeated three times after a pause of one minute, and lasting three seconds each time.
Feeling of pressure as of flatus, under margin of ribs to l., lasting ten minutes, then to r., then to r. posteriorly, finally posteriorly to left.
Stitching pains in region of spleen, especially on inspiration and stooping.
Liver complaint; icterus; gall stones.
‖Plethora in portal circulation; hyperæmia of liver; catarrh of gall passages; sluggish peristalsis in colon.
‖Swelling, sensitiveness and induration of l. lobe of liver; causing, by compression, respiratory embarrassment and cough with thick expectoration.
‖Dull pain in r. hypochondrium, from time to time, with stitches; short, dry cough; difficult breathing; bitter taste and yellowish complexion; subacute fever. θLiver complaint.
‖‖The diseased liver has either already implicated the lungs, showing itself by hæmoptysis, as in simple congestion, or as inflammation of liver and lungs; vomiting of blood.

[19] **Abdomen.** ‖Typhlitis.
Painful sensations of an undefined character in abdomen, necessitating deep inspiration, increased by vigorous movements of body.
‖Drawing pain between umbilicus and pit of stomach, coming and going, in peritoneum of abdominal wall, from r. to l., followed by pain, with sensation of heat in a spot as large as a hen's egg, between umbilicus and inguinal region to left.

Google

Violent pain in r. side of abdomen, < by pressure, continuing uniform until sleep sets in.
Pressing pain in abdomen on r. side, between margin of ribs and hip, while riding in a carriage, lasting for one hour.
Drawing pain in hypogastric region.
Pulsation in abdomen.
Awakens with pains in abdomen, near r. hip bone.
Stitching pain in abdomen, one hand's breadth to l. of r. hip bone.
Pressing pain in abdomen to r.; body in a horizontal position, with sensation of heat.
Drawing pain extending through r. inguinal region.
Burning pain in small intestine, in hypogastrium.
Sensation of motion in intestines on expiration, extending breadth of a hand around umbilicus.
Pressure with sensation of warmth in small intestine, on l. side of abdomen.
Stitches in small intestine, > by pressure.
Griping pain in intestines, on l. side.
Painless flatulency in small intestine.
Distension of abdomen, especially on r. side.
Rumbling in small intestine.
Violent, painful rumbling in hypogastrium.
Cutting pain in bowels, changing from place to place.
Passage of flatus, unusually copious.
Ascites; peritonitis puerperalis; typhlitis stercorales.

20 **Stool and Rectum.** Melæna.
Stools now hard, now soft.
Constipation.
Stool hard and knotty.
Stool very hard and insufficient.
Hard stool, followed after an hour by a soft chocolate colored passage, slightly colored with bile.
Pastelike, clayey stool, without bilious coloring.
Sluggish stool.
After drinking weissbier, is taken on the way by the most violent urging to stool.
Burning pain in rectum and anus, which interferes with sitting.
Itching in anus.
Hemorrhoids, with acidity of stomach and distension of bowels.
Visceral obstruction.

21 **Urinary Organs.** Urging to urinate, without necessity of passing water.
Pressure on bladder, producing dribbling of urine, after unavailing urging to stool.

Digitized by Google

Chilliness on awakening, with vigorous urging to urinate, with voiding of only two tablespoonfuls of normally colored urine.

‖Burning at meatus after urination.

‖Burning pain in urethra, with sensation as of swelling of neighboring parts, compelling her to arise from sitting posture.

Drawing pain: with burning sensation in bladder; in bladder while sitting.

‖Awakening by pain in urethra, with pain in r. lumbar region.

Copious passage of urine of a golden yellow color, with drawing sensation in inguinal region.

Drawing sensation in r. side of abdomen during urination.

Copious passage of urine, with deposit of red sediment.

‖Urine turbid, golden yellow, and acid.

Urine like whey, yellowish-brown, and diminished in quantity.

Urine diminished in quantity; depositing sediment and containing traces of bilious coloring matter.

‖Urine scanty; brownish in color, and containing bilious coloring matter.

Strangury; calculi.

[22] **Male Sexual Organs.** ‖Erection on awakening.

Pressure in urethral portion of glans.

Drawing pains in testicles.

[23] **Female Sexual Organs.** ‖Menstruation too profuse or suppressed.

‖Chronic uterine hemorrhage, with derangement of portal circulation.

Drawing pain in vagina.

Leucorrhœa; amenorrhœa; metrorrhagia.

[24] **Pregnancy. Parturition. Lactation.** Vomiting of pregnancy.

Agalactia.

‖Simple inflammatory irritation of mammæ.

[25] **Voice and Larynx. Trachea and Bronchia.** Pressing pain in speaking and swallowing, in neighborhood of hyoid bone on l. side, increased by pressure from without, with sensation of swelling at this point.

Sensation of dryness in larynx.

‖Irritation in posterior part of larynx, causing cough.

[26] **Respiration.** Drawing pain on margin l. rib, with pain during breathing; especially during expiration.

Stitches at lower margin of ribs, between both linea mammalis, with each inspiration.

Stitches in r. side in neighborhood of seventh rib; on deep inspiration and on bending.

Google

Stitches on inspiration between linea mammalis and axillaris at sixth rib.

[27] **Cough.** Sympathetic cough, dry, hacking, < at night.
‖Cough with stitches in sides of chest, and bloody sputa. θEpidemic affection.
Hæmoptysis with frequent dry tickling.
Irritation to cough, excited by roughness in fauces.
Irritation to cough, on posterior side of larynx.
Awakened by irritation to cough, behind larynx, with chilliness.
Several attacks of short, dry cough, without tickling.
Short, dry cough; irritation proceeding from throat pit.
Scraping sensation in throat producing cough.
Cough with gastric symptoms, and painfulness of epigastrium to pressure.
Cough dependent on old hepatic or splenetic troubles.
‖Expectoration: pure blood; mucus mixed with blood. θDisease of liver.

[28] **Inner Chest and Lungs.** ‖Pains in chest going to front part, to shoulders, back, loins and abdomen, combined with urging to urinate. θEpidemic affection.
⏑Drawing pains in l. side of chest.
‖Stitches in side, with fever, cough and spitting of blood, in affections of liver, and jaundiced complexion.
Drawing pains in chest, l. side; increased by pressure in stomach.
‖Oppression in l. side of chest, with pain, especially during deep breathing.
Pleuritis; chronic bronchial catarrh; phthisis; hæmoptysis; asthma.

[29] **Heart, Pulse and Circulation.** Pain, pressure and stitches in region of heart.
Drawing pain in region of heart, with oppression on deep inspiration.

[30] **Outer Chest.** Stitching pain at a small spot in neighborhood of sixth rib; in line of axilla to l., with continued drawing pain; stitching pain passes gradually to front and interferes with inspiration.
Drawing pain on margin l. rib, with pain during breathing, especially during expiration.
‖Short stitches behind short ribs of l. side.
Stitching pain extending breadth of a hand over right nipple, on stooping and on raising right arm.
Stitches at margin of lower ribs, between both mammary lines, at each inspiration.
Stitches during inspiration, between mammary and axillary lines on sixth rib.
‖Drawing pain through l. pectoral muscle, and l. intercostal muscles, below axilla.

Digitized by Google

Drawing pain through r. pectoral muscle.
Pressure in r. pectoral muscle.
Stitches from l. nipple to r. and downward, lasting several seconds.
Stitches in r. side, near the seventh rib, on deep inspiration and on stooping.
‖Continual drawing pain in l. side of chest, extending to axilla, with stitching pain in same place near fifth rib on expiration; < after deep inspiration.
Drawing sensation from l. side of chest to back.
Pains extend over entire front of chest, and are so violent as to make motion of arms, walking and stooping, almost impossible.

31 **Neck and Back.** Pressing pain in a spot about size of a small coin in nape of neck to l., and on a level with the mastoid process; after a few moments the pain subsides and occurs on corresponding part of r. side.
Pressure in nape of neck.
‖‖Drawing pains in entire back, followed by fatigue.
‖‖Drawing pain on r. side of back, from shoulder blade to lumbar region, changing locality.
Drawing pains: in muscles of back; in lumbar region; in small of back; on inner margin of r. shoulder blade; in l. shoulder blade.
Pressure in back below shoulder blades.
Drawing sensation on outer margin of l. shoulder blade.
Tearing sensation in l. shoulder blade.
Burning and sore pain in region of l. shoulder blade, < by inspiration, pressure and reclining.
‖Sensitiveness of dorsal and cervical vertebræ.

32 **Upper Limbs.** Bruised feeling in arms.
Pain in shoulder joint on raising r. arm.
Rheumatic pain in shoulder, radiating from neck.
Pressure in shoulders.
Drawing pain in r. upper arm.
‖‖Violent pains of a rheumatic character in r. deltoid.
Pains in r. arm are at times so violent that groaning cannot be suppressed.
‖‖Tearing in l. upper arm.
Burning pain in skin, on inner side of lower half of l. forearm.
‖‖Drawing pain in muscles covering l. radius, alternating with pain in same muscles of r. side.
Cramplike pain in muscles covering l. radius.
Pressure in wrist joints.
Cramplike, drawing pains, in inner side of r. hand, extending to first two joints of fourth finger.
Burning pain on outer surface of l. index finger, in skin.

Digitized by Google

Rheumatic, drawing sensation, in first joint of fourth finger on l. hand.
Rheumatic, drawing sensation, in first joint of r. index finger.
Drawing pain in fourth finger of r. hand, on outer side.
Crmplike pain in fingers of l. hand, lasting for ten minutes.
‖Cramplike pain in second, third and fourth fingers of r. hand, on outer side.

[83] **Lower Limbs.** ‖Pain in hip joints, spreading through buttocks, causing difficulty in arising, < from stooping.
Bruised pain in buttocks and legs.
πDrawing pain in r. thigh.
Drawing pain in skin on outer side of l. knee.
‖Drawing pain in l. knee joint.
Stiffness in knees while walking, of patella and in tendons of popliteal space, with sensation of lameness in lower parts of thighs, causing unsteady and stumbling gait.
‖Sensation of coldness in knees.
Pain in hollow of knees while walking, more especially in left.
Sensation while walking as of a band around calves, or of pantaloons being too tight a few inches below knee.
Drawing pain: in superficial nerves, below patella on outer side of lower thigh, over a space of four fingers in breadth; from outer side of knees to outer malleolus; from inner side of lower thigh to inner malleolus; from l. knee into lower thigh.
Paralyzing pain in l. tibia.
‖Cramplike pain in calves.
‖Pain in dorsum of r. foot.
‖Sudden, cramplike pain in muscles of sole of r. foot, flexing the toes; after disappearance of same, intense itching in front of heel.
Pain on lower part of r. heel, < from walking.
‖Sensation of coldness in toes and soles.
Sciatica.
Rheumatism and spasms of the extremities.
Varicose ulcers.
Œdema of the feet.

[84] **Limbs in General.** ‖Lassitude in arms and legs in morning after rising, not > by walking in open air.

[85] **Rest. Position. Motion.** Lying on back: nightmare.
Sitting: drawing pain in bladder.
Stooping: stitches in r. side and over r. nipple; in hip joints.

Google

Arising: difficult, pain in hip joints.
Raising arm: stitching pain over r. nipple.
Walking: almost impossible, with pains in chest; stiffness of knees; pain in hollow of knee; as if a band around calves; pain in heel.
Motion: of arm, pains extend over the entire front of chest.
Every sudden or violent movement of body is painful, both in chest and abdomen. θCough.

[36] **Nerves.** ‖General feeling of discomfort, lassitude and malaise.
‖Great fatigue after eating, and fatigue with frequent yawning.

[37] **Sleep.** ‖Restless sleep, with frequent awakening and many dreams.
Lying on back produces nightmare.
‖Fatigue about 4 P.M., with sleep while riding, lasting ten minutes.
‖Great fatigue with frequent yawning.
‖On awakening, great fatigue with disinclination to rise.
Uncontrollable yawning in quick succession.
Irritation to cough, felt behind larynx on awakening, with chilliness.

[38] **Time.** Night: dry, hacking cough; itching of skin; coldness.
Morning: lassitude of arms and legs.
4 P.M.: fatigue with sleep while riding.
All day: pressure of stomach, with eructation of air.

[39] **Temperature and Weather.** Cold: great sensitiveness of the head.

[40] **Fever.** ‖‖Epidemic affection (see chest and stomach), lasting seven weeks, was lessened to a few days; the longest seven days.
‖Gastric, catarrhal, or rheumatic fever, with pain in stomach and region of liver, increased by pressing on it; symptoms frequent in epidemic influenza.
‖Chilliness on awakening, with strong urging to urinate.
Chill, with pulse increased from 75 to 90.
Chill, with sensation of a pulse beat in abdomen.
Chilliness at night, < by uncovering; pulse in morning 82.
General sweating and lassitude on awakening.
Sweating of forehead and back after meals.

[42] **Locality and Direction.** Left: parietal bone, pain; eyelids, difficult to open; nostril, watery discharge; tension, lying on side; pressure of flatus, under ribs; lobe of liver, swelling, sensitiveness; small intestine, pressure; chest, drawing pain; in chest, oppression; in side, stitches; pectoral region, drawing pain; in neck and shoulder blade, pressing pain; upper arm, tearing;

Digitized by Google

forearm, burning pain; in radius, drawing pain; index finger, burning pain; fourth finger, rheumatic drawing; in fingers, cramplike pain; in knee, drawing pain; in tibia, paralyzed pain.

Right: in eye, pain; auricle, pain; nostril, burning; under margin of ribs, pressure of flatus; in hypochondria, dull pain; abdominal wall, drawing pain; abdomen, near hip, pains; in lumbar region, pain; side of abdomen, drawing sensation; nipple, stitching pain; pectoral region, drawing pain; in neck, pressure, pressing pain; side of back, drawing pain; shoulder blade, drawing pain; shoulder joint, pains; in deltoid, violent pain; in arm, violent pains; in radius, drawing pain; muscles of hand, cramplike drawing; index finger, rheumatic drawing; fourth finger, drawing pain; in fingers, cramplike pain; in thigh, drawing pain; in dorsum of foot, pain; in heel, pain.

From r. to l.: crawling in liver; pain in abdominal wall.

Left to right: drawing pain through pit of stomach; stitches in nipples.

" **Sensations.** As if eyeballs were pressed against side of orbits; as though palate was covered with fat; as of a band around knees.

Stitches: in scrobiculum; in stomach; hepatic region; region of spleen; hypochondrium; small intestine; near sixth rib, l. side; over r. nipple; in abdomen; in r. side.

Cutting: in bowels.

Colicky pains: in stomach.

Griping: in stomach; in intestines.

Tearing: l. upper arm; in l. shoulder blade.

Rheumatic pains: in shoulder; fourth finger, l. hand; r. index finger; in r. deltoid.

Drawing pain: in scalp of occiput; in teeth; through pit of stomach; hepatic region; about umbilicus; through r. inguinal region; in bladder; in inguinal region; in testicles; in vagina; margin of l. rib; in hypogastric region; in chest; region of heart; through r. pectoral region; in entire back; in r. upper arm; in superficial nerves about knee; lower thigh; r. thigh; in skin of outer l. knee joint; in muscles of l. radius; inner side of r. hand; fingers; in muscles covering radius.

Burning: in eyeballs; edges of lids; in nostrils; in œsophagus; above umbilicus; pain in small intestine: in rectum and anus; in meatus, after urination; in bladder; l. shoulder blade; in skin; l. index finger; pain in urethra; in forearm.

Dull pain: in r. hypochondrium.

Digitized by Google

Pressing pain: inner surface of skull; in occiput; in stomach; in abdomen; pain in speaking; small of back.
Pressure: in forehead; in eyeballs; in eyelids; hepatic region; under ribs; small intestine; on bladder; in nape of neck; in back, below shoulder blades; in wrist joints; in glans; in r. pectoral muscle.
Tensive pressure: in scalp; pain in liver.
Bruised feeling: in arms; in buttocks and legs.
Paralyzing pain: l. tibia.
Pain: in stomach; in auricle; in urethra; in r. lumbar region; in chest; in shoulder joint; in hollow of knees; violent in abdomen; in hip joints; in dorsum of r. foot; r. heel; in l. parietal bone; in r. eye; in orbits.
Roughness: in palate.
Scraping: in throat.
Fulness: of head; in hypochondria.
Swelling: in larynx; sensation of in female urinary organs.
Heaviness: of head and eyelids.
Emptiness: in stomach.
Constriction: over eyebrows.
Band: around calves.
Cramplike: muscles l. radius; inner side r. hand; in fingers; pain in calves; r. foot.
Motion: in intestines.
Tickling: at edge of nostrils.
Crawling: in posterior side of liver.
Coldness: in knees; in toes and soles.
Uncomfortable sensation: of epigastric region.
Warmth: in small intestines.
Heat: in face; about umbilicus.
Dryness: in palate and lips; in larynx.
Itching: in anus; in front of heel.

[44] **Tissues.** Portal hyperæmia; catarrh of biliary ducts; tardy peristaltic movements in large intestines; hemorrhoids. ‖‖Dropsical diseases, depending on organic affections of the liver; frequently of long standing.
Passive hemorrhages, connected with diseased liver or spleen.

[45] **Touch. Passive Motion. Injuries.** Pressure: hepatic region, sensitive; < rheumatic pain in stomach.
Riding: fatigue; pressing pain in abdomen.

[46] **Skin.** Itching on lying down at night.

[47] **Stages of Life, Constitution.** ‖Woman who was exhausted by much suffering and repeated hemorrhages from womb after abortion, with frequent attacks of bilious colic. θTyphlitis stercoralis.

[48] **Relations.** Compare: *Bryon.*, ‖*Chelid.*, ‖‖*Mercur.*, *Nux vom.*, and ‖‖*Podoph.*, in hepatic affections, especially jaundice.

Digitized by Google

CASCARILLA.

Croton Eleuteria. *Euphorbiaceæ.*

Tincture of the bark, which is bitter, aromatic and tonic in its effect, somewhat resembling Cinchona bark.

It is mentioned as curative in hemorrhages and intermittent fever, in Tschudi's Peru, vol. ii, p. 217. The provings are from Stapf's Archives, 15, 1, 184, and by A. Zumbrock; the clinical symptoms by Hering and Lippe.

[1] **Mind.** Disinclination to think.
[3] **Inner Head.** Heat and confusion of head.
Dull drawing pain in r. temporal region.
[5] **Sight and Eyes.** Itching about eyes.
[6] **Hearing and Ears.** Burning heat of inner and outer ear.
[8] **Upper Face.** Faceache.
[11] **Taste and Tongue.** Bitter, rough taste, when smoking.
[12] **Inner Mouth.** Gangrenous aphthæ of children.
[13] **Throat.** Sensation of swelling deep down in throat.
Accumulation of mucus in throat.
[14] **Appetite, Thirst. Desires, Aversions.** ‖No appetite, especially early in the morning.
‖Thirst for hot tea during heat. θIntermittent.
‖Aversion to smell of tobacco smoke.
[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: with bitter taste; empty; ineffectual.
[17] **Scrobiculum and Stomach.** Burning pressure in pit of stomach.
Slight tensive pressure in epigastric region, as after eating too much; the concussion of every step taken is painfully felt in region of stomach.
[18] **Hypochondria.** Uncomfortable pressure and tension in hypochondria, almost like incarcerated flatus, though associated with a feeling of hardness.
[19] **Abdomen.** Pressure and rumbling in abdomen.
Griping preceding morning stool.
Boils in the inguinal region.
[20] **Stool and Rectum.** ‖Occasional diarrhœa, becoming gradually worse and more frequent, with backache and lassitude.
‖Constant slight urging, often with pain high up in rectum, gnawing in character.
‖Diarrhœa alternating with hard, lumpy stools.

Digitized by Google

Constipation; stool hard, in pieces, covered with mucus.
‖Passes bright blood with or without stool, in large quantities, causing weakness.

[21] **Urinary Organs.** Soreness and burning in orifice of urethra after urinating.
Involuntary micturition.

[22] **Male Sexual Organs.** Spermatorrhœa.

[25] **Voice and Larynx, Trachea and Bronchia.** Tickling in trachea causing short dry cough.

[27] **Cough.** Short dry cough, from tickling in trachea.
Hæmoptysis.

[28] **Inner Chest and Lungs.** Stitch upward on l. side.

[31] **Neck and Back.** ‖Backache and weakness, inclination to lie down; a distaste for business.
‖Backache, muscles of both sides pained violently.

[32] **Upper Limbs.** Pressive tensive pain in r. shoulder joint, during rest and motion.

[33] **Lower Limbs.** Formicating pain in calves.

[34] **Limbs in General.** Pain in joints.

[35] **Rest. Position. Motion.** Walking: in open air, sweat on back.
During rest and motion: pains in shoulder joint.

[36] **Nerves.** Great fatigue and lassitude, with weariness in the limbs.
‖The whole day greatest degree of lassitude, had to lie down, but was not refreshed.

[37] **Sleep.** Sleep with clear consciousness.
Horrible dreams, wakes up frightened.

[39] **Temperature and Weather.** In open air: sweat on back, while walking.

[40] **Fever.** Anxious heat of whole body and slight sweat, followed by drowsiness.
Sweat on back when walking in open air, with chilliness, > when standing still.
‖Heat, with thirst for warm drinks. θIntermittent.

[42] **Locality and Direction.** Left: stitch in side.
Right: drawing in temporal region; pain in shoulder-joint.

[43] **Sensations.** As of swelling in throat.
Stitch: on l. side.
Drawing: in temporal region.
Pain: in joints.
Burning: of ears; in orifice of urethra.
Burning pressure: in pit of stomach.
Pressive tensive pain: in r. shoulder joint.
Tensive pressure: in epigastric region; in hypochondria.
Pressure: in abdomen.
Gnawing pain: high up in rectum.

Digitized by Google

Griping: in abdomen, preceding stool.
Soreness: in orifice of urethra.
Heat: of head.
Formicating pain: in calves.
Tickling: in trachea.
Itching: about eyes; of skin.

[44] **Tissues.** Hemorrhages.
Anæmia; dropsy.

[45] **Touch, Passive Motion, Injuries.** Concussion of step is felt in region of stomach.

[46] **Skin.** Itching of skin.

[48] **Relations.** Compare: *Cinchon.* (effects of loss of blood intermittents); ‖ *Graphit.* (mucus mingled with stools).

CASTANEA VESCA.

Chestnut. *Cupuliferæ.*

Tincture of the leaves.

Symptoms marked ‖ are those italicized in Allen's Encyclopedia, from provings of Houghton and others.

Clinical use in pertussis, by Conant, Counsellor, Feb., 1880.

[13] **Throat.** ‖ Slight acrid feeling in throat.

[14] **Appetite, Thirst. Desires, Aversions.** ‖ Desire for warm drinks.

[19] **Abdomen.** ‖ Abdominal walls sensitive.
‖ An uncomfortable relaxed condition of the abdominal viscera all day, > when lying on back.

[20] **Stool and Rectum.** ‖ The soft stools consisted of short, small pieces, like chopped tape; this character of stool has continued for three years, whenever loose stools occur.
‖ 1.30 P.M., sudden and urgent desire for stool, accompanied by severe pain and rumbling; pain > by stool.

[27] **Cough.** ‖ Pertussis, early stage, with violent spasmodic, very dry, ringing cough.

[35] **Rest. Position. Motion.** Lying on back: > relaxed condition of abdominal viscera.

[40] **Fever.** ‖ Perspiration very free after drinking.

[43] **Sensations.** Acrid: in throat.
Pain: before stool.

[48] **Relations.** Compare: *Amm. brom.*, ‖ *Mephit.* and ‖ *Naphthal.* in whooping cough.

CASTOREUM.

Castor Fiber. *Rodentia.*

Tincture of secretion contained in preputial sacs of the beaver.

Mentioned by Galen, Hippocrates and Pliny, and in use among the Arabians, who gave it in hepatic and uterine troubles, and in epilepsy and convulsions. Recommended later for hysterical complaints by Pomet and Hill; for deafness, by Lemery.

The only provings are by Caspari and Nenning; the former proved the Russian, the latter the Austrian variety. See Allen's Encyclopedia, vol. iii. The original in Hartlaub and Trink's Annalen, vol. iii, p. 314.

Clinical symptoms are from Gosewisch, Siegrist, Neidhard, Trousseau and Pidoux, and H. M., 1879.

[1] **Mind.** Very peevish humor, indisposed to talk.
Very sensitive to all kinds of impressions.
Irritable in morning: cheerful abandon in evening.
‖Melancholic and full of anxious longing. θHysteria.
Angry exclamations during sleep.

[2] **Sensorium.** Giddiness and fainting.

[3] **Inner Head.** Headache, with giddiness and fainting.
Heaviness, with drawing pain in head.
Transitory pressure in forehead.
Dull headache from in outward in r. forehead.

[5] **Sight and Eyes.** ‖Dimness of vision, and lachrymation. θCatarrh.
Appearance before eyes, as though he had not slept enough.
‖Eyes are agglutinated nearly all night.

[6] **Hearing and Ears.** Earache and buzzing in ears.
Pain behind l. ear.
Otorrhœa.

[10] **Teeth and Gums.** Pain in l. lower row of molar teeth.
Swelling of gums.

[11] **Taste and Tongue.** Swelling of tongue.
‖A rounded elevation in centre of tongue, size of a pea, surrounded by an angry suspicious-looking base, size of a nickel five-cent piece, extremely sensitive to touch or food, with a drawing sensation as if a string was pulling centre of tongue towards hyoid bone, with burning in tongue.

[12] **Inner Mouth.** Bad smell from mouth.

Digitized by Google

[13] **Throat.** Dryness of œsophagus.

[14] **Appetite, Thirst. Desires, Aversions.** Want of appetite.
Thirst is so violent that she could not drink enough water, after dinner.

[16] **Hiccough, Belching, Nausea and Vomiting.** Belching, with stitches in chest.
Nausea after urinating.

[17] **Scrobiculum and Stomach.** Weight at stomach.
Griping in stomach.
Tenesmus in stomach, with constrictive pain under sternum.
Tension and heaviness in stomach.
Emptiness in stomach.
Sensation in stomach as though it would go to sleep.

[18] **Hypochondria.** Pressure in region of liver from in outward.

[19] **Abdomen.** Pain in l. side of abdomen.
Colic from flatulency.
Yawning, in abdominal complaints.
Abdomen distended, in afternoon.
Umbilical hernia, with colic, in a screaming infant.
Abdomen feels as though full and distended.
Above l. ilium in flanks, sensation of soreness as though from an internal wound.
On taking a deep breath stitching pains on both sides in abdomen, above hips to spinal column, extending to region of liver, as though he was being stuck, in various places above ilium, with needles.

[20] **Stool and Rectum.** Stools: whitish, watery; bloody mucus; greenish mucus; frequent.
Stools contain pus; patient is compelled to sit bent double; feels gagged when lying down.
Before stool: cutting or pinching colic; painful rumbling; dragging in groin.
During stool: fetid flatus; burning at anus.
After stool: burning at anus.
Accompaniments of bowel complaints: yawning; chilliness; bad smell from mouth; violent thirst.

[21] **Urinary Organs.** Scanty urine; heat and burning when urinating.
After urinating: nausea.

[22] **Male Sexual Organs.** Seminal emissions, with great excitability of sexual parts.

[23] **Female Sexual Organs.** During menses: pain commences in middle of thighs, extending over limbs, and more or less over entire body.
Dysmenorrhœa; abdomen distended; blood leaves uterus in drops, with tenesmus-like pain.

Digitized by Google

[24] **Pregnancy. Parturition. Lactation.** Nausea and vomiting in pregnancy.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness with disposition to clear throat.

[26] **Respiration.** Shortness of breathing, in forenoon; when walking fast.

Short, difficult breathing, with frequent, long inspirations.

Very deep inspirations, with heat in breast and in face.

Frequent, slow, deep inspirations, with short expirations.

[28] **Inner Chest and Lungs.** Stitches in chest, with belching.

Heat in breast, as though a fire was burning there, in evening.

[29] **Heart, Pulse and Circulation.** Feeling of oppression about heart.

[30] **Outer Chest.** Cramplike pains extending across breast.

Pain under sternum, when touching it.

On taking a deep breath, sensation as though something heavy lay under sternum.

Pressure on sides of sternum, especially on expiration.

Sensation of internal heat under sternum.

[32] **Upper Limbs.** Pain in r. shoulder when at rest and in motion, as though he had carried something heavy.

Hot hands, with distended veins.

[33] **Lower Limbs.** Great feeling of lassitude in lower limbs.

Pressure in l. flank downward through inguinal gland, when walking.

Feet are weary, cannot walk any farther.

[34] **Limbs in General.** Spasms of hands and feet.

[35] **Rest. Position. Motion.** During rest and motion: pain in shoulder.

Lying down: feels gagged.

[36] **Nerves.** Jerking of small groups of muscular fibres.

Sensation of heaviness in whole body.

Trembling of limbs.

: Chorea, epilepsy, whooping cough, nervous palpitation, cramp in various parts of body, and tetanus.

Paralysis.

[37] **Sleep.** Sleepiness.

Constant yawning, though never sleeping in daytime.

In sleep, angry exclamations.

Cannot sleep after eating.

[38] **Time.** Morning: irritable.

Night: eyes agglutinated.

Afternoon: abdomen distended.

[40] **Fever.** Shuddering of single parts, back, vertex, forehead, elbow, feet.

: Typhus.

Digitized by Google

[42] **Locality and Direction.** Left: behind ear, pain; lower row of molars pain; abdomen, pain; ilium, soreness; flank, pressure.

Right: forehead, dull headache; shoulder, pain.

Within out: dull headache; pressure in region of liver.

[43] **Sensations.** As if a string was pulling centre of tongue towards hyoid bone; as though stomach would go to sleep; as though something heavy lay under sternum.

Tearing drawing pains in various parts of body.

Burning: in tongue; at anus; in breast; as of fire.

Stitching: pains on both sides of abdomen; in chest.

Griping: in stomach.

Pain: behind l. ear; in molar teeth; under sternum; in r. shoulder.

Weight: at stomach.

Heat: in breast and face; under sternum.

Drawing pain: in head.

Pressure: on sides of sternum; in l. flank; in forehead; in region of liver.

Heaviness: in whole body; under sternum; in stomach.

Cramplike pains: across breast.

Tension: in stomach.

Emptiness: in stomach.

Dryness: of œsophagus.

[44] **Tissues.** ; Enteralgia, having its seat in small intestines, no evacuations; appearing suddenly after mental emotions, or getting cold feet; accompanied by pallor, cold sweat and fainting.

Inflammatory and spasmodic affections of digestive and sexual organs.

[47] **Stages of Life, Constitution.** Hysterical individuals.

[48] **Relations.** Antidotes: *Camphor.*, *Opium* and vegetable acids.

Compare: *Ambra gris.*, *Ignat.*, *Moschus*, *Valer.*, especially in nervous women with pains, cramps and weakness after severe illness.

Digitized by Google

CASTOR EQUORUM.

The Rudimentary Thumbnail of the Horse.

A small, flat, oblong-oval horn, wrinkled on the surface, breaking off in scales, darker than the hoof, growing on the inner side of the leg above the fetlock of horses, styled by Oken "the rudimentary thumbnail of the horse," and by Paracelsus *Verrucæ equorum genuum.*

The scales are triturated, and during the process develop a peculiar odor, thought by some to resemble Moschus, by others Castoreum. The report of a cure of epilepsy of long standing with this substance, and his high opinion of the importance of animal medicines, induced Dr. Hering, in 1836, to make the trituration and proving, in which he was assisted by Geist, Kummer, Romig and Bauer, of the Allentown Academy.

The clinical experience of Hering, Geist, Romig, Helfrich and others, has proved it a highly useful remedy in cracked and ulcerated nipples, of the worst kind, in nursing women. The symptom indicating its use in this particular was observed on one of the male provers.

Pliny, Paracelsus and Koschnitz speak of its use, by fumigation, in uterine troubles, epilepsy and stone in the bladder. This remedy needs further proving, particularly on women.

[1] **Mind.** Unusual laughter about things that are not funny.
[2] **Sensorium.** Vertigo, headache and nausea in morning.
[3] **Inner Head.** Pressure in forehead.
Headache in l. temple.
Pressing pain in both temples from in outward, as though the head was being screwed apart.
Pressure from in outward, especially in temples near ears, more on l. side.
Pressive pain in temples disappears after awaking from sleep.
Deep pressure in occiput, as though something firm was pressing against it; in forenoon.
Headache with vertigo and nausea, sour stomach and lack of appetite.
[4] **Outer Head.** Sensation as though occiput had gone to sleep.
Scalp goes to sleep from nape of neck to vertex; accompanied by sensation as though posterior half of head lay in ice.
Crawling in hair as though something was running in it.
[5] **Sight and Eyes.** Frequent twitching in r. eyelid.
Itching in canthi.

Digitized by Google

[6] **Hearing and Ears.** Disagreeable sensation of dryness in l. ear, compelling him to scratch; also slightly in r. ear.
Twitching pain internally in l. ear.
Small painless pustules behind l. ear covering an area the size of a silver dollar.

[7] **Smell and Nose.** ‖Continued fluent coryza, with constant sensation of hunger, even after eating.
Pressive pain in nasal bones.

[8] **Upper Face.** Transitory, burning, prickling pain in face and also on body, now here, now there.

[9] **Lower Face.** Prickling and heat on both cheeks.
Dry lips with thirst in evening.
πCaused a number of warts about mouth of a horse, which were cured by *Thuya*.
Sensation like trismus.

[11] **Taste and Tongue.** Burning pain on front of tongue.

[12] **Inner Mouth.** Slight painful sensation in molar teeth, r. side.
Shooting inward in cavities of hollow teeth, l. side.
Pain in hollow teeth of l. side, compelling him to pick them.
Great accumulation of saliva, especially immediately after eating.
Soon after pains in teeth, loud rumbling in abdomen; in forenoon.

[14] **Appetite, Thirst. Desires, Aversions.** Great hunger, even after eating. θCoryza.
Desire to smoke tobacco.

[16] **Hiccough, Belching, Nausea and Vomiting.** Repeated empty eructation.

[19] **Abdomen.** ‖Colic with urging waked him in morning, followed by a very thin, watery, somewhat burning stool.
Slight pain in inguinal region.
Prickling pains in l. inguinal region.

[20] **Stool and Rectum.** ‖Urgent stool, preceded by colic and passage of offensive flatus.

[24] **Pregnancy. Parturition. Lactation.** ‖Cracked, sore nipples in nursing women; excessively tender, cannot bear touch of clothing; even in neglected cases where nipple is nearly ulcerated off and only hangs by small strings.
Swelling of both mammary glands, especially r.; they are painful to touch, mostly left.
Violent internal itching in breasts, in attacks driving to despair; rubbing and scratching >, but make the skin rough; the areolæ are reddened for some distance around the nipples, which are painful and drier than usual.
Swollen mammæ are very painful on descending stairs;

Digitized by Google

sensation as though they would fall off, he was compelled to press against them with his hands to ameliorate this disagreeable sensation.

The areolæ become red as in erysipelas, and also the nipples; very painful on l. breast.

[25] **Voice and Larynx. Trachea and Bronchia.** Disagreeable sick feeling in larynx; when triturating.

[28] **Inner Chest and Lungs.** ǀStitching pain in chest.

[29] **Heart, Pulse and Circulation.** Peculiar sensation about heart as of something alive struggling; with anxiety, walking about, and fermentation in epigastrium and abdomen; in forenoon.

[30] **Outer Chest.** Burning pain on chest.

[31] **Neck and Back.** ǀWeakness of spine.

ǀPain in coccyx, < every evening while sitting.

[32] **Upper Limbs.** Pain in middle of l. forearm, in evening.

Pain in l. elbow and r. knee, followed by violent pain in r. tibia, in evening.

Right wrist joint pains as though sprained, and on allowing arm to hang down, the pain radiates into ring and little fingers.

Left wrist joint becomes painful as though sprained, and at the same time pain in little finger of r. hand.

Twitching pain, often recurring over l. wrist joint.

Drawing pain, from in outward, in ball of l. hand, extending to finger tips.

Drawing pain in r. arm and axilla.

Pain in r. arm awakes from sleep, accompanied by whimpering; arm feels as if asleep, thicker and heavier, > from rubbing; he goes to sleep again, and in morning has forgotten everything.

Frequent erratic prickling pains passing from one arm to other and also into face.

Crumbling of finger nails from slightest knock against them.

[33] **Lower Limbs.** Burning pain on side of l. knee.

Pain in knee, especially when sitting.

ǀǀRepeated pain in r. tibia.

Continuous pain in r. popliteal space, when knee is bent, especially on stooping, also on sitting down and most on rising after sitting.

Tension in l. calf.

Pains in r. tibia and in l. forearm.

Many small bloodboils on both lower legs, in a psoric, very unsusceptible individual.

Dull pain in ankle and wrist joint.

Pain in both heels.

Pain in great l. toe, as though frosted.

Digitized by Google

Some toe nails came off; new ones had already formed beneath them.

Very brittle toe nails.

Frequent single fine stitches in lower limbs, continuous burning pain in right.

[34] **Limbs in General.** Arms and legs sore as if beaten.

[35] **Rest. Position. Motion.** Sitting: pain in knee.

Stooping: pain in popliteal space.

[36] **Nerves.** Syncope.

; Epilepsy.

[37] **Sleep.** Becomes sleepy early in evening.

Restless sleep, with many dreams, with going to sleep of r. arm.

Stretches his arms up over his head and cracks his fingers during sleep.

At night dreams that his mother, who is living in Germany, is sick, without having thought of her the previous day.

In winter dreams of fresh fruit hanging on trees.

[38] **Time.** Morning: vertigo; colic; sleepy; forgetful.

Forenoon: deep pressure in occiput.

Evening: pain in l. forearm; l. elbow; r. knee; tibia pains; becomes sleepy.

[42] **Locality and Direction.** Left: temple, headache with pressure outward; ear, dryness; ear, painless pustule; hollow teeth, shooting; inguinal region, pain; forearm, pain; wrist, twitching; hand, drawing; knee, burning pain; calf, tension; great toe, pain.

Right: eyelids, twitching; ear, dryness; molars, pain; mammary gland, swells; tibia, pain; hand, pain; axilla and arm, drawing pain; popliteal space, pain; arm, goes to sleep.

From in outward: pressure in temples.

[43] **Sensations.** As though head was being screwed apart; as though occiput had gone to sleep; as though posterior half of head lay in ice; as though something was running in hair; as if arm was asleep; as though his mammæ would fall off.

Peculiar sensation about heart, as of something alive.

Stitching pain: in chest; in lower limbs.

Prickling pain: in face; in chest; from one arm to other; in face; in l. inguinal region.

Shooting: in cavities of hollow teeth.

Burning: in face; on tongue; pain l. knee; in chest.

Pressing pain: in both temples; in forehead.

Soreness: of arms and legs.

Tension: in l. calf.

Pressure: from in outward.

Digitized by Google

Drawing pain: in l. hand; r. arm and axilla.
Dull pain: in ankles and wrist joint.
Pain: in knee; in both heels; l. great toe; in nasal bones; in hollow teeth; in l. inguinal region; in coccyx; in middle of l. forearm; in l. elbow and r. knee; in r. tibia; in r. wrist.
Twitching: in l. wrist; in l. ear.
Crawling: in hair.
Dryness: in l. ear.
Itching: in canthi; internal in breasts.

[47] **Stages of Life, Constitution.** An infirm old horse became rejuvenated.

[48] **Relations.** To be thought of in comparison with *Hippomanes*, *Oxalate* of lime, and *Calc. phosph.*, and on account of a similarity of odor, with *Moschus* and *Castoreum*.
Antidotes: *Hepar* relieved sore nipples; *Thuya* removed warts which *Castor equor.* produced on mouth of a horse.

CAULOPHYLLUM THALICTROIDES.

Blue Cohosh. *Berberidaceæ.*

Grows in the woods from Canada to Carolina and Kentucky. Trituration and tincture are prepared from the brown, knotty, hard root, which is yellow inside. Called "squaw or papoose-root" by the Indians, by whom it is used in female complaints. First introduced into medicine by botanic physicians, afterwards into our school by Dr. E. M. Hale, in an article contained in N. A. Journ. of Hom., vol. vi, p. 373.

The only proving we have is by Dr. Burt, in Hale's New Remedies, 2d edition, p 171. The majority of important symptoms are from clinical experience, referable to Drs. E. J. Blake, Hale, Helmuth, W. H. Holcombe, Kebs, R. Ludlam, M. Macfarlan, G. F. Matthes, Morrison, W. McGeorge, G. B. Palmer, and many others who use it frequently in practice.

[1] **Mind.** ‖Fretful, weak of mind and memory. θMiscarriage.
‖Fretful, irritable mood; apprehension. θFalse conception.

[2] **Sensorium.** Swimming, a sort of vertigo, with dimness of sight; gulping a bitter, sour fluid.

[3] **Inner Head.** Dulness of head, with contracted feeling of skin of forehead.
Sensation as of needles being stuck in forehead.
‖Headache, pressure behind eye, dimness of sight. θUterine derangement.

Digitized by Google

Severe headache over l. eye. θMiscarriage.
Severe pains, by spells, in temples, as if they would be crushed together.
Headache aggravated: by stooping; from light; from noon until night. θMiscarriage.
Rheumatic or neuralgic headaches, dependent upon uterine or spinal troubles.

[6] **Sight and Eyes.** Eyes ache, with a feeling as of something under lids.
Lachrymation.
Pressure behind eyes; profuse flow of tears.
Heaviness of upper lids, has to raise them with fingers. θLeucorrhœa.
Severe drawing pains over l. eye.

[7] **Smell and Nose.** Drawing pains in nose.

[8] **Upper Face.** "Moth spots" on forehead. θLeucorrhœa.

[10] **Teeth and Gums.** Teeth feel sore, elongated.

[11] **Taste and Tongue.** Tongue coated white.

[12] **Inner Mouth.** Sensation of dryness in mouth; heat.
Aphthæ; stomatitis materna.

[13] **Throat.** Distress in fauces, which causes frequent inclination to swallow.

[14] **Appetite, Thirst. Desires, Aversions.** Coffee seems to aggravate.
Canine hunger, with white coated tongue.
Great thirst.

[16] **Hiccough, Belching, Nausea and Vomiting.** Empty eructations.
Frequent gulping up of sour, bitter fluid, with vertigo.
Spasmodic vomiting, cardialgia, excessive nausea.

[17] **Scrobiculum and Stomach.** Heat in stomach; fulness.
Distress in stomach and bowels, with drawing in r. hypochondrium.
Burning distress in stomach.
Dyspepsia, with spasmodic symptoms.
Spasms of stomach attending uterine irritation.

[18] **Hypochondria.** Drawing in r. hypochondrium, and over liver.

[19] **Abdomen.** Distension of abdomen, with tenderness.
Spasmodic action of muscular tissues of intestines, from irritation of motor nerves, or from rheumatism.
Distress and colicky pain in abdomen, intestines and umbilical region, > by passing flatus.
Rumbling in bowels, awaking at 1 A.M. with urgent desire for stool.
Spasmodic and flatulent colic.

[20] **Stool and Rectum.** Watery stools, great quantity, runs a perfect stream from bowels, but no pain; 1 A.M. θCholera morbus.

Digitized by Google

Soft stool, very white.
Constipation; stool every other day.

[21] **Urinary Organs.** Emission of copious, pale or straw-colored urine.

[22] **Male Sexual Organs.** ‖Every few minutes sharp, stinging pain in glans penis. θGonorrhœa.

[23] **Female Sexual Organs.** Sensation as if uterus was congested, with fulness and tension in hypogastric region.
Spasmodic pains in uterus.
Irritable vagina, spasmodic, intense pains.
Aphthous vaginitis.
‖Menses: too soon; preceded by pain in small of back; great aching and soreness of lower limbs; bad breath; bitter taste; vertigo; chilliness; flow very scanty, blood very light, with intense nausea and vomiting of yellow, bitter matter; pain unremitting for several hours; habitual cold feet became warm under action of remedy.
‖Painful menstruation, flow being normal in quantity.
‖Spasmodic dysmenorrhœa; spasmodic, intermittent pains in bladder, stomach, broad ligaments (groins), even chest and limbs; congestion and irritability of uterus; scanty flow.
‖Menstrual colic; uterus retroverted.
Amenorrhœa; spasms, cramps, or great atony.
‖‖Leucorrhœa: sharp, acrid, very weakening; with heaviness of upper eyelids, has to lift them up with the fingers; of profuse bland mucus; with "moth spots" on forehead; in little girls.
‖Leucorrhœa, with congestion of uterus and forcing down pains; tardy appearance, or absence of menses, profuse secretion of mucus from vagina, and drawing pains in lower extremities.
‖Leucorrhœa in a woman, married ten years and never had a child; in a few weeks became pregnant and was delivered in safety.
Hysteric convulsions during dysmenorrhœa.

[24] **Pregnancy. Parturition. Lactation.** Threatening abortion, spasmodic bearing down pains; vascular excitement; tremulous weakness; pains severe in back and loins, but uterine contractions feeble; slight flow.
‖Threatened abortion; all movement of child had ceased; sense of weight, and profuse hemorrhage.
‖Paroxysms of labor pains so severe, patient had to hold on to objects for support; threatened abortion at fourth month.
Habitual abortion from uterine debility.
‖Spasmodic rigidity of os, delaying labor; pains like pricking needles in cervix.

Digitized by Google

Tormenting, useless pains in beginning of labor.
‖Labor pains short, irregular, spasmodic; patient very weak and irritable; no progress being made.
‖Pains become weak, flagging from long protracted labor, causing exhaustion; thirsty, feverish.
‖Weak labor pains passing off with a shiver and causing much distress.
‖After pains: especially after exhausting lengthy labor; spasmodic, across lower abdomen; extend into groins.
Retained placenta and membranes.
Hemorrhage, particularly after hasty labor.
Passive hemorrhage after abortion or confinement.
Protracted lochia; great atony; blood oozes passively from relaxed uterine vessels.
Suppressed lochia.
‖Griping soreness of uterus, < from pressure.
‖After cessation of menses, occasional loss of blood; fugitive pains in uterus and ovaries; cervix swollen and congested; os pouting and tightly closed; feeling of tension and fulness in uterine region; bloated abdomen. θFalse conception.

[23] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness and loss of voice. θUterine disturbances. θLeucorrhœa.

[26] **Respiration.** ‖Panting breathing, oppression of chest. θUterine disturbances. θRheumatism.

[28] **Inner Chest and Lungs.** Spasmodic, intermittent pains in chest, with amenia.

[31] **Neck and Back.** Severe drawing pain in sterno-cleido-mastoid, drawing head to left.
Rheumatic stiffness of nape of neck.
Dull pain in lumbar region.
‖Severe pains in back and loins. θThreatening abortion.

[32] **Upper Limbs.** ‖Severe drawing pain in wrists and fingers.
Rheumatism of wrists and finger joints, with swelling; cutting in joints when closing hands; pains shift to nape of neck, with spasmodic rigidity; panting; oppression of chest; high fever; delirium; nervous excitement.
‖Fingers are very stiff.

[33] **Lower Limbs.** ‖Drawing pains in thighs, knees, ankles, feet and toes.
Knees weak, when walking.
Pain in feet and toes, < at night.

[34] **Limbs in General.** Rheumatism, especially of smaller joints.
All joints crack, when walking or turning.
Severe drawing pains in joints of arms and legs.

Digitized by Google

Constant flying pains in arms and legs, remain only a few minutes in any one place.
Pain in fingers, ankles, feet and toes, causing restlessness at night.

[35] **Rest. Position. Motion.** Stooping: < headache.
Walking: joints crack.
Turning: joints crack.
Closing hands: cutting in joints.

[36] **Nerves.** Great nervous excitement; spasmodic affections.
Chorea at puberty, or during establishment of menstrual function.
Sympathetic cramps and spasms of bladder, rectum or bowels, in consequence of uterine disturbances.
Hysterical or epileptiform spasms at puberty, from menstrual irregularities, especially in rheumatic females.
‖Tremulous weakness felt over entire body. θUterine hemorrhage.
‖Paraplegia, with retroversion and congestion of uterus after childbirth; partial loss of sensation; emaciation, anæmia, general debility.

[37] **Sleep.** ‖Sleepless, restless, nervous. θRheumatism. θUterine complaints.

[38] **Time.** Night: restless, fingers, ankles, feet and toes pained so much; headache.
1 A.M.: rumbling in bowels; watery stool, runs a perfect stream.
Noon until night: headache.

[40] **Fever.** Fever high, delirious, nervous excitement, rheumatism.

[41] **Attacks, Periodicity.** ‖Pains are intermittent and paroxysmal. θLabor. θDysmenorrhœa.
Every few minutes: pain in glans penis.
Pains recur daily.
Every other day: stool.
Pains in extremities change place every few minutes.

[42] **Locality and Direction.** Left: severe headache over eye; drawing pains over eye.
Right: hypogastrium, drawing.

[43] **Sensations.** As of needles being stuck in forehead, also in cervix; as if temples would be crushed together; as of something under eyelids; as if uterus was congested.
Cutting: in joints, when closing hands.
Spasmodic pain: in uterus; in vagina; in bladder; in stomach; in groins; in chest; in limbs.
Flying pains: in arms and legs; in uterus and ovaries.
Stinging: in glans penis.
Colicky pain: in abdomen, intestines, umbilical region and uterus.

Digitized by Google

Burning: distress in stomach.
Drawing: pain over l. eye; in nose; in r. hypochondrium; pain in sterno-cleido-mastoid; in wrists and fingers; in joints of arms and legs; in lower limbs.
Aching: of eyes; of limbs.
Pressure: behind eyes.
Pricking pains: in cervix.
Rheumatic stiffness: of nape of neck.
Rheumatic pain: in head.
Soreness: of uterus; of limbs; of teeth.
Dull pain: in lumbar region.
Pain: by spells in temples; severe in back and loins; in feet and toes, severe over l. eye and small of back.
Elongated: teeth feel.
Contracted: skin of forehead.
Tension and fulness: in uterine region.
Heaviness: of upper lid; in uterine region.
Fulness: in stomach.
Tremulous weakness: over entire body.
Heat: in mouth; in stomach.
Dryness: of mouth.

[41] **Tissues.** Affects principally female sexual organs; want of tonicity of womb; feeble contractions; leucorrhœa; hysteria and spasmodic affections.
Acts upon muscular tissue.
Rheumatism, particularly of small joints, which has a tendency to shift.

[47] **Stages of Life, Constitution.** Especially suited to females. Little girls subject to leucorrhœa.

[48] **Relations.** Incompatible: coffee.
Compare: *Act. rac.*, *Bellad.* (intermittent and paroxysmal pains), *Cann. ind.*, *Lilium tig.*, *Nux vom.*, *Pulsat.* (labor pains similar, but mental condition opposite), *Sepia* (reflex symptoms from uterine irregularities).

CAUSTICUM.

Tinctura acris sine Kali.

Causticum was first mentioned by Hahnemann in his Apothekerlexicon. His views are fully set forth in the first volume, published in the year 1793, under the word "Feuer," on p. 293, and in the last volume, published in 1799, under "Spiesglanztinctur," p. 256. His mode of preparation is found in Chronic Diseases, vol. iii, in the introduction to his arrangement, in which are included the symptoms of the time-honored *Tinctura acris*, which was considered by him in all respects similar. In the second volume of Materia Medica Pura, first and second editions, Hahnemann defends his views fully, and gives the indications he had collected up to that time. In the third edition the *Aetzstofftinktur* is omitted, because he placed the remedy among the antipsorics, and at the same time recommended the weaker but purer preparations of lime. In the fourth edition, 1830, vol. iv, p. 81, he not only gives a long list of the most remarkable cures, but also his provings and those of his pupils, in all 1014 symptoms.

Whatever diversity of opinion may exist theoretically in regard to the chemical nature of this substance (see Lorbacher's treatise, A. H. Z., vol. xcv), the unquestionable good results obtained by its use, in potentized form, by a majority of our best practitioners, stamp it a polychrest of the highest order.

Irrespective of the clinical cases taken from Rückert's collection, Stapf's Archives, and the older journals, the following clinical authorities from our more recent literature are mentioned, as showing the extensive and continued use of this remedy:

CLINICAL AUTHORITIES.—*Eye*, Berridge, M. H. Rev., vol. 16, p. 495; *Rheumatic fever*, Berridge, Med. Adv., vol. 4, p. 479; *Cramps in feet*, Chamberlain, N. E. M. G., 1871; *Asthenopia*, Conant, Med. Couns., vol. 1, p. 209; *Facial neuralgia*, Farrington, Hom. J. Obs., Nov. 1879; *Deafness*, Fincke, A. J. H. M. M., vol. 2, p. 220; *Agalactia*, Frost, H. Timorous anxiety and depression. θPertussis.
Ill effects of sudden emotions, fright, fear, etc. θChorea.
Fear of death. θParalysis.
Full of frightful ideas, in evening.
Great apprehension whenever anything happens; despondent, depressed, most excessive exhaustion and prostration.
Apprehension of impending danger, with urging to stool.
Had a foreboding of her attack, which interrupted her playing suddenly; she went to the sofa and assumed her peculiar position with the knees. θChorea. See 36.
Anxiety in evening, before going to sleep; the boy could not fall asleep because he constantly thought of anxious things; one could with difficulty induce him to go to bed.
Great anxiety, with flying thoughts and stammering.
Anxiety. θGastric headache.
Anxiety, with nausea.
Anxiety and red face from urging to stool. θObstruction of bowels.
Anxiety and despondency; has been subjected to night-watching, care, trouble, etc. θAgalactia.
Anxiety and uneasiness at night did not permit her to sleep.
Anxiety before falling asleep, as though attack of fainting would return and he would die.
Easily startled.
Excessive sympathy for others.
Ill humor.
Irascible mood.
Peevish, irritable, censorious mood.
Irritable temper, disposition to take everything in bad part.
Fretful and despondent, without being vexed.
Paroxysm of quarrelsome anger. θPertussis.
Very suspicious and distrustful.
Thinking of complaints aggravates them. θHemorrhoids. θHysteria.
Pain < by mental labor. θHemorrhoids.
After overexertion of mind. θTinnitus.
After seeing a case of chorea she gets it herself.
Irresistible yawning when listening or paying attention to others.
Hastiness causes short breath.
Mental and other ailments from long-lasting grief and sorrow. θChronic headache. θFace and toothache. θChorea.
Injurious effects of fear and vexation. θChorea.
After anger, stitches in upper portion of chest, when drawing a deep breath.

Digitized by Google

Mental alienation after suppression of eruptions.

[2] **Sensorium.** Sensation as if he would fall, without vertigo.
Dizzy, as from compression of head.
Vertigo: tending forward and sideways; tendency to fall backward, when stooping; at night in bed, on rising and on lying down again; on looking fixedly at an object; > in open air; with sensation of weakness in head, and anxiety; accompanying paralysis; with headache; in hemiplegia; at 11 A.M.; < in middle of day; after suppression of ulcers; from moving head; from gaslight; during and after stool, with nausea.
Vertigo and whirling in head during menstruation, < on stooping, > in afternoon.
Runs for a while in a circle, to the right, then falls down unconscious. θEpilepsy.
Fainty, qualmish feeling.
Faint, trembling, weakness; giddy in open air.

[3] **Inner Head.** Dulness of head. θCatarrh.
Pressing pain in forehead, with stoppage of nose.
Feels as if there was a ball of fire in forehead.
Sensation as of an empty space between forehead and brain, < in evening and in cold, > in warmth.
Pressive pain in r. frontal eminence.
Violent cutting pain in forehead. θEpilepsy.
Sensation of contraction in whole side of head.
Heat in r. side of head, with violent pains in stomach.
Stitches in temples, < from sitting or reading. θPertussis.
Violent stitches in r. temple, < evenings. θChronic headache.
Throbbing and stitches in vertex.
Stitches in vertex. θVertigo.
Headache in vertex. θEpilepsy.
Violent boring pain in vertex. θFistula dentalis.
Burning stinging in upper part of head.
Dull, pressive headache. θInfluenza.
Headache feels as if driven asunder, with nausea, from gaslight.
Painless digging in whole head.
Pain in different parts of head. θParalysis.
Roaring, buzzing and hissing in head. θChronic headache. θAfter epileptic attack.
Congestion to head, with roaring in head and ears. θPertussis.
Sensation of weakness in head, with vertigo.
Headache from extreme hunger.
Pain shoots from eyes into head, at intervals, < evening and night. θOphthalmia.
Constant succession of shocks or jerks in head.

‖Nightly tearing and digging headache.
Sensation as if brain was loose, when moving head.
Headache before or after spasms.
‖Rheumatic pains in head so severe as to cause nausea.
Headache with vomiting, in morning.
‖Headache and great weariness after an attack. θEpilepsy.
Apoplexy, followed by paralysis.

Outer Head. ‖Contracted skin of forehead, in frontal headache, with tremulous weakness. θAphonia.
‖Pain at a small spot on vertex, as if bruised, only to touch.
Dull pain on vertex, with pain in urethra, after urinating.
Sensation in occipital bone as if parts were numb, pithy or dead.
Tensive tearing pain in integuments of head, particularly on sides and behind ears, < from draught and cold air, > in warm bed, and in damp weather.
‖Tension of scalp.
Itching and stinging of scalp.
‖Turns head to the right. θChorea.
‖Trembling of head. θEpilepsy.
Headache begins with stinging in scalp.
‖Scalp very sore to touch. θImpetigo capitis.
‖Heat and soreness in scalp. θGastric headache.
‖Head hot and sweaty before an attack. θEpilepsy.
‖Small, round, soft nodes on scalp and glabella. θEpilepsy.
‖‖Tinea capitis in occipital region.
Spasms of head.
Chorea after retrocedent eruption on head.
Involuntary nodding of head while writing.
‖Drawing of head towards one side; frequent urging to urinate; involuntary urination during fit. θEpilepsy.

Sight and Eyes. Eyes sensitive to light and heat
‖Photophobia the whole day, constantly obliged to wink.
Sees frightful images as soon as he closes eyes.
‖Flickering, sparks or black points before eyes.
‖If he winks he sees sparks of fire before eyes, even on a bright day.
‖Flickering before eyes, as from swarms of insects.
‖Spots, at first small, then larger, round, then jagged, white, then green, first before r., then l. eye, followed by dimness and loss of vision.
‖Sight obscured: as from a gauze before eyes; as from a mist; momentarily, on blowing nose; green halo around light.
‖Eyes become dim and vision indistinct; it seems as though a thick cloud or fog was before eyes.
‖Obscuration of sight, as if a veil was drawn before eyes, when standing.

Digitized by Google

Sensation as though membrane was over eyes.
Obscuration of vision for a moment, on blowing nose.
Dimness of vision. θHeadache. θPregnancy.
Diplopia, with inability to turn l. eye outward.
Perpendicular half-sight in cataract.
Cataract; sensation as if there was a substance in eye too large, causing a kind of heaviness and distension, only in evening; also a feeling as if there was something moving in eyes, in evening.
Asthenopia; sensation as of a stick or sand in eyes; drowsiness, but does not sleep, upper lid falls, dimness of sight. θSequel to measles.
Amblyopia. θHemiplegia. θParesis.
Threatened amaurosis during confinement, with want of milk.
Looking up causes inclination to fall to the left. θVertigo.
Burning and stinging, as with needles, in eyes, with dryness and photophobia, from 6 to 8 P.M.
Burning and dryness of eyes, from 4 P.M. till evening.
Burning in eyes, without redness.
Burning of eyes, when touched.
Biting and pressure in eyes, which seem heavy, with redness of lids.
Pressing pain in eyes, > by external pressure. θOphthalmia scrofulosa.
Pressive pain in eye, < from touch.
Slight drawing in eyes.
Tenseness in r. eye, which seemed as if paralyzed.
Pain in eyes, as if sand was in them.
Dragging pain in eyes. θToothache.
Drawing in eyes. θHeadache from gaslight.
Dry sensation in eyes, with pressure in them.
At first dryness of eyes in morning, and stiffness, followed by lachrymation.
Itching of eyes, especially of lids; disappears on rubbing.
Sensation of heaviness in upper lid, as if he could not raise it easily, or as if it was agglutinated to lower lid, and could not be easily loosened.
Constant inclination to touch and rub eye, which seems to relieve a pressure in it. θCataract.
Eyes inflamed, burning, red, dry, stinging.
Inflammation of eye, with partial destruction of tissue.
Lachrymation, even in room, though < in open air. θInfluenza. θFacial hemiplegia.
Acrid tears from l. eye, with shooting pain. θOphthalmia.
Accumulation of tears, particularly in open air; they do not run from eye.
Eyes constantly open, not winking. θFacial paralysis. θHemiplegia.

‖Stitches in r. ear, paroxysmal, and in rapid succession.
‖‖Burning of ears; they get red.
‖Hot pressure in ears and whole head, so that vision became dim.
‖Feeling of obstruction in ears, with offensive purulent discharge.
Itching in inner ear.
Diseases of middle ear, especially non-suppurative, when facial branch of seventh pair is involved.
Pinching in ear.
‖Offensive otorrhœa.
‖Eruptions on ear-lobe, and behind ears. θHerpes. θImpetigo capitis.
‖‖Accumulation of earwax, sometimes offensive in odor.
‖Pain in ear, as if something was trying to force out.
‖Dragging pain in ears. θToothache.
‖Dull pain in ears. θDeafness.
Ears sensitive to the wind.

[7] **Smell and Nose.** ‖Blowing blood from nose mornings, or profuse nosebleed.
Blowing nose affects eye. See 5.
Epistaxis from l. nostril.
‖Nosebleed during attack. θEpilepsy.
‖Frequent sneezing, particularly in morning.
‖Frequent sneezing, with pain in chest. θInfluenza.
‖‖Dry coryza, with stoppage of nose.
‖Nose stopped up at night, running by day. θPertussis.
‖‖Fluent coryza, with pain in chest and limbs.
‖Acrid, burning discharge from nose. θInfluenza.
‖Coryza, with hoarseness, preventing loud speech.
‖Dryness of nose. θAcne rosacea.
Puffiness of nose; scrofulous swelling.
‖‖Itching of tip of nose and alæ, as well as inside.
‖‖Pimples, ulcers or crusts on tip of nose; inflamed, swollen and scurfy.
‖Eruptions on nose, with burning. θAcne rosacea. θEczema.
Eczema on nostrils.
Portion of l. side and tip of nose eaten by an ulcer, covered with a thick crust. θLupus of nose.
‖‖Old warts on nose.
Nose and upper lip feel thick and heavy.

[8] **Upper Face.** ‖Pains in malar bones, zygomatic arch and maxillæ.
‖Drawing pains, which extend into cheek and ear, and are most apt to occur on r. ride.
‖Burning in face.
‖Pains produce spasm of muscles, a sensation of numbness on side of face as if asleep.

Neuralgia: r. side; < at night, chilly, no thirst; scanty menses; l. side > by rubbing part with a cloth dipped in cold water.

Facial neuralgia at every stormy change of weather; attacks of unconsciousness while sitting, with set eyes and continued motion of muscles about mouth. θAnæmia.

Transient violent drawing pain in r. cheek and then in ear.

Dragging pain in muscles of face. θToothache.

Face: yellow; bluish-red; sickly looking; expression gloomy; looks dissatisfied.

Yellow complexion, particularly on temples. θHeadache. θDentition. θOphthalmia scrofulosa. θUterine troubles. θScabies.

Paleness of face. θEnuresis. θHemiplegia. θColic. θChorea.

Redness of face, with dulness in head.

Very red face during attack. θEpilepsy.

Burning as of glowing coals in small spots in face, eyes, ears, and cheeks; cannot move on account of pain.

Sudden shuddering in face, extending across chest or over back to knees.

Itching of face.

Red, erysipelatous swelling of cheek. θToothache.

Acne rosacea on cheeks and forehead; in dispersed groups.

Moist, suppurating spot in centre of tetter on cheeks, enlarges, itches and burns, and becomes covered with a thick crust.

Pimples on l. cheek with severe itching.

Hard pustules, with blackish centre, through beard. θAcne.

Eruptions in face; acne, burning and stinging.

Occasional spasmodic twitching of muscles on l. side of face.

Paralysis of one side of face. θHemiplegia. θChorea. θOtorrhœa. θAfter cold.

Prosopalgia and rheumatism in face.

Severe tearing pains in l. half of face. θFacial neuralgia.

Upper lip and nose feel heavy.

Convulsive movements in muscles of face. θChorea. θRisus sardonicus.

Contracts brows, with pain in head. θAphonia.

Her face feels to her like fur. θHemiplegia.

Shivering, beginning in face and spreading from it.

Serpiginous ulceration, with smarting and excoriation.

Warts on face.

[9] **Lower Face.** Mouth drawn to one side. θHemiplegia.

Digitized by Google

‖Swelling of lower lip.
‖Tearing in diseased root of l. lower jaw.
‖Jaws stiff and lame, not able to eat much for weeks. θBronchitis.
‖Sensation of tension and pain in jaws, could only with difficulty open mouth, and could not eat well, because a tooth seemed too long.
‖He could separate jaws only with great difficulty, and could not open mouth as usual; it seemed as if throat below jaw was swollen or tense. θTrismus. θTetanus.
‖Stitches in angle of r. lower jaw. θHemiplegia.
‖Arthritic and rheumatic pains in lower jaw.
‖Drawing pain in glenoid cavity of jaw; sensation as if jaw was contracted.
‖Warts on lips.
‖Ulcer on lower lip with burning pain, bleeds once in awhile.
‖Single red spots on chin spreading to nose and adjacent parts.
‖Froth at mouth. θSpasms.

[10] **Teeth and Gums.** ‖Dull stitches in upper back teeth, extending upward.
‖Dull stitches in lower back teeth, extending downward.
‖Boring pain in lower back tooth, extending to nose and eye.
‖A painful prickling digging in lower back teeth, extending as far as ears.
‖‖Painful looseness and elongation of teeth.
‖‖Stitching and tearing toothache.
‖Tearing in both r. rows of teeth, extending into zygoma; both jaws of this side are painful to pressure, and on chewing feel as if bruised.
‖‖Sticking toothache.
‖‖Throbbing toothache, with painful gum, so that he could not chew.
‖‖Throbbing toothache after taking cold, no fever.
‖‖Pain in sound teeth, on drawing in cold air.
‖Tootbache during and after siesta in all stumps, > from cold water, < from smoke; without violent pain, disagreeable sensation as though a foreign body was in them.
‖Long-lasting chronic toothache.
Burning pain in hollow teeth when eating and drinking.
‖Sensation as though blood would crowd into teeth, with burning stitching in fingers.
‖Grinding of teeth.
‖Offensive smell from teeth. θImpetigo capitis.
‖Gum is painfully sensitive, without pain in teeth.

Digitized by Google

‖‖Swelling of gums, readily bleeding and tedious suppuration. θFistula dentalis.
‖‖Frequently recurring abscesses of gums.

[11] **Taste and Tongue.** ‖Taste: greasy; putrid; bitter; sour; as from disordered stomach.
‖‖Stuttering, difficult, indistinct speech. θChorea. θPertussis. θHemiplegia.
‖‖Speechlessness, from paralysis of organs of speech.
‖‖Tongue coated white on both sides, red in middle. θEpilepsy.
Intolerable soreness of tongue as if scalded.
‖‖Painful vesicles on tip of tongue.
‖‖Paralysis of tongue.
Pain in tongue as if he had bitten it.
‖Bites tongue during attack. θEpilepsy.

[12] **Inner Mouth.** ‖Dryness of mouth and tongue.
‖Swelling of inner side of cheek; he bites it when chewing.
‖Induration on inside of cheek. θHerpes on cheek.
‖Saliva runs from mouth, more after eating. θToothache. θParalysis.
‖Much phlegm in mouth and throat. θPertussis.
‖‖Froth at mouth. θEpilepsy.

[13] **Throat.** Redness of uvula and fauces.
‖Soreness and burning in fauces. θAngina. θPertussis.
‖Sore, painful spot on hard palate.
Torn feeling in throat during mental exertion.
Jerking pain in throat.
‖Burning and rawness in throat, with sensation like heartburn.
‖‖Burning pain in throat; not caused by swallowing; on both sides, seemed to arise from chest.
‖‖Rawness and tickling in throat, with dry cough and some expectoration after long coughing.
‖Roughness and scraping in throat. θPertussis.
‖Pain in tonsils. θHemiplegia of face.
‖Dryness in throat, posteriorly. θAphonia.
‖Dryness in throat, noticed when swallowing, followed by scraping along down throat.
‖Tickling sensation in throat. θAphonia.
‖Sensation of a lump in throat, or as of food lodging in œsophagus.
‖Pressure in throat pit as of a foreign body.
‖‖Pain in throat, < by stooping.
Sensation as if something cold was rising in throat.
‖‖Must swallow continually, feels as if throat was too narrow.
‖Constant disposition to swallow, > while eating, < after. θDiarrhœa.

Digitized by Google

‖‖Mucus collects in throat, cannot be raised by hawking; is obliged to swallow it. θPertussis.
Constant desire to clear throat.
Hawking of mucus from pharynx and posterior nares.
‖‖Hawking of mucus, with pain in pit of throat.
‖Phlegm in throat, which she is unable to hawk up, and which sickens her. θDuring pregnancy.
‖Throat reddened, with increase of mucus. θDeafness.
‖Swelling, like goitre, on throat.
‖Rheumatic sore throat.
Sore throat, with drawing in r. leg.
‖Paralysis of œsophagus.

11 **Appetite, Thirst. Desires, Aversions.** ‖Sits down to table with some appetite, but can scarcely eat a morsel. θPregnancy.
‖Ravenous hunger, takes food in a hurried manner. θDentition.
‖Appetite either too great, or none at all. θEpilepsy.
‖No appetite. θHemiplegia. θGastric headache.
Hunger: after nausea; causes headache.
‖No appetite in the morning.
Want of appetite and thirst.
‖‖Great thirst for several days.
‖No thirst. θProsopalgia.
‖Thirst: after eating; for cold drinks; with aversion to drink; with scanty urine.
‖Desire for beer; ‖‖for smoked meat.
‖Aversion to sweet things. θDiarrhœa. θPertussis.

15 **Eating and Drinking.** ‖Eating is painful on account of sensitive gums, and in other cases difficult on account of lameness and stiffness of jaws.
After chewing meat, teeth ache as though blunt, at same time sensation as though shreds of meat were between teeth which he wishes to remove.
‖‖Bread causes pressure in stomach.
‖Fresh meat causes nausea and waterbrash and renews the trouble; smoked meat agrees. θDiarrhœa.
‖Fat food disagrees, causes offensive belching. θEpilepsy.
‖Coffee seems to aggravate every symptom. θPertussis.
‖After eating: feels relieved; much thirst; whooping cough worse; pressure in whole abdomen; sometimes disagreeable mucus in mouth; eructation.
Collection of flatus in abdomen after a small meal.
‖Violent increase of pain after the least nourishment, or after tightening her clothes around her waist. θHysteralgia.
‖‖A swallow of cold water relieves. θPertussis. θSpasms.
‖Acids cause inconvenience. θWeak stomach.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.
Eructations: frequent, empty; tasting of food; of food; burning; as if he had eaten pepper; sour; tasting like almonds; smelling like musk; tasting like rotten wood; tasting like ink.
Acidity of stomach after eating fat, saccharine, or farinaceous food. θBronchitis.
Sensation of lime being burned in stomach, with rising of air. θPregnancy. θConfinement.
Heartburn. θGastric headache. θBronchitis.
Burning and waterbrash, the water tasting salty. θConstipation.
Constant efforts to belch. θHysteralgia.
Nausea: before, during and after meals; with headache; > after eructating; with sour vomiting; with salt waterbrash after stool.
Sour vomiting, followed by sour eructations.
Vomiting: of blood, at night; with headache.
Vomiting of sour water. θPertussis.
Stomach deranged from acids and sour things.

[17] **Scrobiculum and Stomach.** Pressure in pit of stomach. θDiarrhœa.
Sensation of fulness in stomach. θHeadache.
Pinching, clawing in pit of stomach on deep breathing.
Stitches in scrobiculum.
Pit of stomach sore to touch. θGastric headache.
Cramp in stomach.
Pain in stomach in morning, increased by every quick movement; must lie down.
Violent pain in stomach, accompanied by heat in r. side of head.
Constant sensation as if lime was being burnt in stomach, with a sort of rolling rising of air.
Violent pain in stomach; at times the pain seems to be seated in stomach, at times in chest; always > by lying down, < by moving about.
Pain in stomach from ice water.
Sensation as of a disordered stomach, with distension of abdomen.
Violent pressure from pit of stomach over whole chest, making breathing difficult, > before attack. θEpilepsy.

[18] **Hypochondria.** Stitches in region of liver. θPregnancy.
Hepatic pains with distension after eating.
Heat and sweat about hypochondria and upper part of abdomen.
Necessity to loosen clothing about hypochondria. θDiarrhœa.

[19] **Abdomen.** Stitches in r. side of abdomen, in evening.

Digitized by Google

Pains in abdomen, must bend double; < after least nourishment, or from tightening clothes. θHysteralgia.
Cramps in bowels. θLeucorrhœa.
Colic: in morning; pain radiates to back and chest.
Twisting abdominal pains before stool.
Cutting colic on appearance of menses, without diarrhœa, with tearing in back and small of back, especially on motion.
Pain in r. side of abdomen, with cough.
Flatulency, loud rumbling and rolling in bowels. θPregnancy.
Painful distension of abdomen.
Abdomen swollen and hard, body wasted.
Tumid abdomen, in children. θDentition. θPertussis.
πOn abdomen, in region of bladder, itching boil, surrounded by intense circumscribed redness.
Pinching in small spot on r. side of abdomen after eating.
Rheumatic pain in abdomen and chest.
Inguinal glands swollen, pain very much on moving.

20 **Stool and Rectum.** Frequent passage of offensive flatus. θLeucorrhœa.
Involuntary escape of feces with flatus.
The stool passes better standing.
Stools: tough and shining; first hard and in pieces, the last soft; knotty, like sheep's dung; too small shaped; the size of a goose quill; fatty, oily; liquid, fecal; white, mucous; involuntary.
πChild passes with great pressure two or three tablespoonfuls of an odorless gelatinous mass, streaked with blood, towards morning. θWhooping cough.
Evacuations of mucus and bright blood with knotty, difficult feces, without any trace of hemorrhoids.
Before stool: twisting abdominal pain.
During stool: vertigo.
After stool: nausea; salt waterbrash; vertigo; burning at anus, subdued pulse and palpitation; escape of prostatic juice; pinching in hypochondria; waterbrash.
Bloody stool, with burning soreness of rectum.
Diarrhœa: from cold air striking abdomen; from eating fresh meat; with violently itching acne; in scrofulous children.
Chronic diarrhœa in dyspeptics and consumptives.
Constipation; frequent but unsuccessful desire to pass stool. θGastralgia. θLeucorrhœa.
Twisting abdominal pain before stool.
Frequent ineffectual efforts to stool, with much pain, anxiety and redness in face.
Stool is passed with great difficulty and exertion of abdominal muscles. θHemiplegia.

Digitized by Google

Spasm in rectum, which rendered walking impossible.
‖Painful spasm of rectum, which prevents evacuation or renders it very small, no larger than a goose quill.
‖‖Frequent, sudden, penetrating, pressive pain in rectum.
‖‖Itching and sticking in rectum.
‖Severe itching in rectum and in genitals.
‖Pressure in rectum.
‖Pressing in rectum, as if feces were lodged in it which want to come away.
‖Spasms in rectum with renewed desire to pass water. θAffection of prostate.
‖‖Burning in anus after stool.
Soreness and oozing of moisture from anus.
‖Excessive itching in anus, day and night.
‖Anus very sensitive to contact.
Prurigo ani, relieved by cold water.
‖Fistula in ano.
‖Fissure in anus, pains < when walking.
‖Large, painful pustule near anus, discharging pus, blood and serum.
‖‖Hemorrhoids: impeding stool; swollen, itching, stitching, moist; stinging, burning, painful when touched, when walking, when thinking of them; from preaching or straining voice.
‖Hard hemorrhoids, extremely painful when touched, when walking, when standing or sitting; > after a stool.
‖‖Pain and strong pulsation in perineum. θFistula in ano.
‖Stitching in anus before eating.
‖In morning, stool loose, with much tenesmus, voiding of gelatinous, odorless masses, somewhat streaked with blood, at the same time cold hands; child, æt. 10 months.
‖Stool seldom, after weak urging large thick lumps came, which were voided with great exertion and pain, afterwards prolapsus recti and tenesmus.
‖Sore pain in hemorrhoidal tumors, < when thinking of them.
‖Hemorrhoids after standing, as in preaching.
Sores between the nates.

[21] **Urinary Organs.** Burning in urethra: when urinating; suddenly at night.
After urinating: pain in urethra, accompanied by dull pain on vertex.
‖‖Itching of orifice of urethra.
‖Pain in urethra and bladder after a few drops pass. θProstatic affection.
‖Frequent urging to urinate, day and night. θCatarrh of bladder. θLeucorrhœa.

Digitized by Google

▮Painful retention of urine brought on by slightest exposure to cold. θCatarrh of bladder.
▮Retention of urine in young children.
▮Constant ineffectual desire to urinate; frequent evacuation of only a few drops, with spasms in rectum, and constipation.
▮Evacuation of blood, with urine, or instead of it, with great pain; all sensations < at night.
▮Ineffectual attempts to urinate; when a few drops were passed, he had violent pain in bladder, and also (after walking much in order to relieve it) cramps in rectum.
▮Urging to urinate, without passing anything; she was obliged to wait a long time, and then only a very little urine passed, but urging was soon again renewed, without pain. θCatarrh of bladder.
▮Frequent urging to urinate, without passing any; then, while sitting, involuntary flow of it.
▮▮Frequent and very much increased micturition; urine soon deposited a sediment like yeast.
▮▮He urinates so easily that he is not sensible of the stream, and scarcely believes in the dark that he is urinating, until he makes sure by sense of touch.
▮Very frequent urging to urinate, with involuntary dribbling of urine.
▮▮Involuntary passage of urine: ▮▮when coughing, sneezing or blowing nose; ▮▮at night when asleep; in walking; from paralysis; in bronchitis.
▮Cannot retain urine, and could not feel urine passing through urethra. θCataract.
▮Symptoms of paralysis of bladder from prolonged retention of urine and overdistension of bladder. θPregnancy.
▮▮Enuresis nocturna. θChorea. θDiarrhœa. θPregnancy.
▮Urine stopped at intervals, in evening.
▮Last drops of urine are delayed.
After urinating, smarting in pudendum as from salt.
▮▮Retention of urine, with frequent and urgent desire, occasionally a few drops or a small quantity may dribble away.
▮Paralysis of bladder from long retention of urine.
▮Urine: dark brown; turbid or cloudy on standing; deposits a yeasty sediment; deposits oxalate of lime.
▮Light-colored urine, like water. θLeucorrhœa.
▮Excess of uric acid. θBronchitis.
▮In evening, copious urination, always very turbid; thick, white, offensive smelling deposit.
▮Burning in urethra when urinating, especially after coitus.
Diabetes insipidus.

[22] **Male Sexual Organs.** ▮During coition blood is discharged from urethra with ejaculation of semen.

‖Worse during expiration and from talking. θPertussis.
‖Dyspnœa: with frequent sighing; in morning; with chronic cough.

[37] **Cough.** ‖Cough: violent, hollow, at times dry, with pain in chest; hollow, especially night and morning, with tightly adhering mucus in chest, and with sensation of soreness on chest; hacking, from creeping and rawness in throat; caused by crawling in larynx, or by stooping to pick up anything; always caused by speaking; ‖‖with pain over and in hip, and involuntary passage of drops of urine; dry, remaining after pertussis; frequent and tickling; for the most part in daytime without, at night with expectoration.
‖Dry, hollow cough, from five to six paroxysms, with sore sensation in a streak down along trachea, where it pains on every paroxysm of cough, and almost prevents breathing.
‖‖Cough, with a sensation as if the patient could not cough deep enough to start mucus, produced by tickling, accompanied by rawness.
‖Cough wakes her from sleep, in evening and morning; during day, little or no cough.
Cough: worse evening till midnight; from exhaling; drinking coffee; cold air; draught of air; when awaking.
Cough excited by: tickling in throat pit; creeping tickling; mucus in throat; eating.

Digitized by Google

Short cough after eating.
‖Hissing cough. θAphonia.
‖Cough only on lying down.
‖In evening, continuous cough and rattling of mucus.
‖Hollow cough without resonance, day and night. θParalysis glottidis.
‖‖Hollow racking cough. θBronchitis.
‖Cough wakens frequently, or in evening short hollow cough. θPertussis.
‖‖Cough relieved by a swallow of cold water.
‖‖Cough < by bending forward.
Tormenting cough with zona.
‖‖Cough strains every nerve in her body.
‖Cough causes soreness in abdominal muscles and bowels.
‖‖Continual annoying cough; with each cough escape of urine.
‖Cough with: burning in air passages; pain in larynx; rheumatic pain in limbs; soreness and general stiffness; pain in hips.
‖‖Influenza, with tired sensation, limbs as if beaten; rheumatic pains.
‖Whooping cough in catarrhal stage,
Expectoration: acrid, fatty tasting; ‖‖cannot be raised, but must be swallowed.

♒ **Inner Chest and Lungs.** ‖‖Anxiety in chest: after stool, in evening, with distended abdomen; with fever.
‖Burning, sticking and soreness in chest. θPertussis.
‖Stitches in chest below arms, extending to pit of stomach, with anxiety.
‖Pain in chest, as though raw, preventing him from lying down at night; has to change position.
‖Sticking pain in chest; very sore and ulcerated, with and without coughing, with stopped coryza and stoppage of nose.
‖‖Soreness in chest.
Smarting in chest while coughing.
‖Painful compression of chest, from both sides towards sternum, with oppression of breath and weakness of voice.
‖‖Tightness of chest, must frequently take a deep breath.
‖Spasmodic constriction of chest. θPertussis.
‖Sensation in chest as if clothes were too tight.
‖Oppression of chest after eating.
Sensation of fulness in chest and around heart.
‖Pain in chest, when sneezing. θInfluenza.
‖Rattling in chest. θPertussis.
Constrictive pressure in chest and region of stomach, compelling him to bend backward for relief.

Digitized by Google

Phthisis mucosa.

[29] **Heart, Pulse and Circulation.** ‖Oppression at heart, with lowness of spirits, cardiac anxiety.
‖Stitches in cardiac region. θPertussis.
Burning in region of heart, with palpitation.
‖Palpitation of heart. θPertussis.
‖Palpitation, with languor.
‖Chronic disease of heart in young girls, occasioned by overlifting.
‖‖Pulse excited towards evening, with orgasm of blood.

[30] **Outer Chest.** ‖‖Stitches in sternum, from deep breathing or lifting.
‖‖Painful compression of chest, from both sides towards sternum, with oppression of breath and weakness of voice.
‖‖Sensation as if clothing were too tight.
Rash on breast and arms, itching like scabies.
Heat in sternum.
Eruption around nipples.

[31] **Neck and Back.** ‖‖Stiffness and pain in neck and throat, with pain in occiput, muscles felt as if bound, could scarcely move head.
‖Tearing pain in back of neck, moving up and forward to frontal region.
‖Long-continued tension in r. side of neck and chest, so that it drew body towards r. side.
‖Attacks of gastric pains, once or twice daily, a small carbuncle on neck, over spine. θGastralgia.
‖An excessively itching and moist tetter on neck.
Rheumatism of nape of neck.
Enlargement of cervical glands.
Swelling, like goitre, on throat.
‖Stitches: in back; in l. lumbar region.
‖‖Painful stiffness of back and sacrum, especially when rising from chair.
‖Pain in middle of spine, on swallowing, as food goes down, as from a sharp crust there, sticking into it in an inward direction. θRheumatic fever.
‖‖Pressing, cramplike pain in small of back, in region of kidneys.
Pressing-stitching pain alongside of r. scapula, when swallowing or hawking.
Backache, especially in coccyx.
‖‖Pain in back during menstruation.
‖Complains of a sore pain in back during labor; cries "hold my back! Oh! hold my back!"
Pain in both loins, as if surrounded by bands.
‖Pinching, crampy pain in lumbar region and buttocks.

Digitized by Google

‖Tearing pains, commencing along lumbar vertebræ, running forward around l. lumbar region to linea alba. θNeuralgia.
Sensation as if a cold wind was blowing on parts between scapulæ.
‖‖Much itching on back and on calves.
‖Bloodboils on back.
‖Lameness in small of back. θLeucorrhœa.
Incipient tabes dorsalis.
Rheumatic spinal irritation.
Pinching pain in sacrum, with hysterical spasms.
Pain begins in sacrum and goes into l. hip, tensive, as if muscles were too short.
‖‖Bruised or darting pain in os coccygis.
‖‖Dull drawing pain in region of os coccygis.

Upper Limbs. ‖Tearing and drawing in shoulder blades.
Shoulder joint painful on motion.
‖Rheumatic aching in shoulder.
‖Paralysis of deltoid; cannot raise hand to head; subject to pains, < at night, causing continued motion.
‖Pains in shoulder, when dressing in morning, preventing motion. θRheumatism.
‖‖Pressure on shoulders.
‖Sensation as if cold water was running from clavicle down to toes, along a narrow line.
‖Itching on arms.
‖‖Dull drawing and tearing in arms and hands.
‖Griping clawing as from a hand around elbow, > from warmth.
‖Pressing pain above elbows.
‖Pains in elbow joints.
‖Lameness, weakness and flabby condition of muscles of arm, after scalding arm.
‖Tensive pain in l. lower arm.
‖Paralysis of one arm and muscles of deglutition. θSequel to diphtheria.
‖‖Paralysis of r. arm, with glossoplegia.
‖Torpid feeling in arms at night. θGastric headache.
‖‖Paralysis of upper extremities.
Right arm cold up to axilla.
‖Eruptions and warts on arms.
‖‖Paralytic feeling in r. hand.
‖Icy coldness of hands, with stools of gelatinous masses, accompanied by tenesmus.
‖Pain in r. wrist, as if sprained, weakness of joint.
‖‖Trembling of hands. θRheumatism. θNeuralgia.
πSweat on hands, hindering her very much in knitting.
πOn back of l. hand, between little and fourth fingers, very painful nodules on tendons; pain > from cold water.

Digitized by Google

‖‖Sensation of fulness in hand, when grasping anything.
‖Dry tetter in palms of hands.
πUlcerating spots on palms of hands, in which tendons were contracted.
‖Stitches in finger to elbow.
‖‖Drawing pains in finger joints.
‖‖In evening, sudden pain and lameness in finger tips.
‖‖Fingers feel icy cold, but warm to touch.
‖Painful numbness of thumb and index finger, appeared as if they were larger, especially when touching something; impedes free use of hand.
‖A large, oval-formed horny wart close to extremity of r. forefinger.
‖Clenching of thumbs. θEpilepsy.
‖Fingers half closed, cannot move them, excepting with the other hand.
‖‖Contraction and induration of tendons of fingers.
‖Stiffness of fingers.
‖‖Paralysis of hands.
‖Panaritium and paronychia.
‖‖Warts on tips of fingers.
‖‖Fleshy warts close to nails.

Lower Limbs. ‖Bursting pain in hips, on coughing.
‖Stitching pain in hip joint and region of hip; discharge of thin ichor.
‖Aching in hip joint, as if dislocated, when stepping. θPertussis.
Pain in l. hip joint, commencing in an instant, as if hip would be torn from her.
‖Head of femur seems to be out of acetabulum, limb is shortened. θHemiplegia.
‖Hip disease: pains in joint; fistulæ; hectic fever.
‖Coxarthrocace.
‖At night, the side, hip and thigh upon which he lay were sore, as if bruised, or as if pressed; was frequently obliged to turn over.
‖‖Soreness between thighs, high up.
‖‖Drawing and tearing in thighs and legs, knees and feet, < in open air, > in warmth of bed.
‖‖Bruised pains in thighs and legs, mornings in bed.
‖‖Distressing uneasiness in both limbs, in morning in bed, lasting one hour.
‖Painful itching on inner side of thigh along vein, extending to toes.
‖‖Marbled skin of thighs and legs.
‖‖Cracking in knees, when walking and descending.
‖Tensive pain and stiffness in hollow of knee, when walking.

Digitized by Google

A tension in hollow of knees, when sitting or beginning to walk, relieved by continued walking.
Stiffness in l. knee, when walking.
Tendons of knees seem too short.
Tension in knee and ankle joints.
Drawing from knee to malleolus, with knifelike stitching towards toes.
Gonagra.
Nightly burning tearing in shins from above downward.
Drawing on side of shins extending downward, with single stitches in edges of shin bone.
Cramp: in calf, mornings in bed; in sole of r. foot and tendo-achillis, when stretching it.
Cramp in tendo-achillis awakens from sound sleep at 2 A.M.; has to jump out of bed and scream at top of her voice.
Severe tearing in tendons beneath r. calf.
Tearing, beating, boring in lower leg and feet with every movement.
Numb pain now on malleolus, now on heel, and again on outer edge of foot.
Pain in ankle, when sitting, not when walking.
Stiffness in ankle.
Gouty tearing in region of lower leg, especially in small joints of foot, with swelling of parts.
Tension in heel and tendo-achillis.
Foot feels contracted, with tension on putting it to the ground. θLeprosy.
Itching of dorsum of foot.
Numbness of feet and toes.
Marbled skin on dorsum of foot.
Swelling of feet.
Sweaty feet. θAcne rosacea.
Cold, painless swelling, especially on back of foot, with itching.
Lower leg uniformly swollen, upon it are spots as large as a hand, which appear like a thick, uniform layer of leather.
Aching here and there in leg, with small tubercles, very hard, pale red, itching and painful.
Contraction of feet, tension when putting soles to the ground. θLeprosy.
Cramp in feet, toes and soles.
Cannot keep feet quiet, and yet moving them causes great pains.
Feet and lower leg full of acne; rubs himself whole night, especially soles and abdomen. θNursing child.
Feet hot, tense and swollen.

‖‖When rubbing feet a little they become covered with large blisters.
‖‖Emaciation of feet.
‖‖Cold feet.
‖‖Stitches, as though with penknife, in soles.
‖Crawling in both soles, as from something alive.
‖Corrosive or phagedenic blisters and ulcerations on heel.
‖‖Heels and balls of toes pain as though ulcerating, when touched and on treading down.
‖Ball of great toe: crawling, burning; severe pressive pain; burning stitches.
‖Severe pressive pain in posterior joint of great toe.
‖‖During night, round, watery vesicle forms beneath ball of great toe.
‖Crippled nails on toes, and ingrowing toenails.
‖‖Unsteady walking and easy falling of little children. θDentition. θChorea. θRheumatism. θVerrucæ. θPertussis.

[34] **Limbs in General.** ‖‖Gouty pains in limbs.
‖Tearing in limbs, now in one, now in another, at one time severe, at another slight, though constant.
‖Tearing in several limbs, < in joints, and extending from these into long bones.
‖Tearing, especially in joints, and from them through various bones in body, sometimes in several at once; pain was not aggravated by external pressure.
Soreness to touch on anterior surface of arms and legs.
‖‖Intolerable uneasiness in limbs, in evening.
‖Violent spasmodic motion of arms and legs. θEpilepsy.
‖Twisting and jerking of limbs. θChorea.
‖Hands and feet go to sleep.
Formication in limbs, with spasms.
‖Coldness of shoulder joints and ankles. θEpilepsy.
‖Unsteadiness of limbs, tottering gait of children, and liability to fall. θMeningeal tuberculosis.
‖‖Weakness and trembling of limbs.
‖‖Paralytic weakness of limbs.
‖Contraction of limbs.
‖Stiffness of limbs from gouty deposits.
‖Serous swellings of joints, with but slight inflammation; great irritation of cuticle; tendency to white swelling.
‖Crippled nails on fingers and toes.

[35] **Rest. Position. Motion.** At night cannot get a quiet position, nor lie still a minute.
‖Disposition to stretch or bend, or crack joints.
Weariness and inclination to lie down.
Lying down: > pain in stomach, and gastralgia; menses cease; cough; on l. side < toothache.

sensation in arm, then a jerk, with violent twitching in trunk and arms; anxiety.

❙Worse on awaking from sleep. θPertussis. θChorea.

❙❙Bad effects from night-watching. θLoss of milk. θDystocia.

[38] **Time.** ❙❙At night he can get no easy position; he cannot lie still a moment.

Night: arms and legs in motion during sleep; severe internal chill; torpid feeling in arms; < neuralgia of face; burning in urethra; blood with urine; menses cease; leucorrhœa; cough <; paralysis of deltoid; burning and tearing in shins; has to rub feet and legs all night; watery vesicles on toes; chorea < or >; sleepless; heat, followed by internal chilliness.

2 A.M.: cramp in tendo-achillis awakes.

4 A.M.: sweat.

8 A.M.: internal heat, without thirst, with sweat in hands.

Morning: rheumatic pains in head; first dryness and stiffness in eyes, then lachrymation; sticking in eyes; blowing blood from nose; deafness; sneezing; pain in stomach; hoarseness; rawness of throat; dyspnœa; cough; whooping cough >; bruised pain in legs; cramp in calves; spasmodic attacks, arms and legs; sweat, when walking.

Afternoon: > vertigo.

4 P.M.: burning and dryness of eyes.

6 to 8 P.M.: burning and stinging as with needles in eyes; heat.

10 to 12 P.M.: epileptic attacks.

Evening: < sensation as of an empty space between forehead and brain; pain shoots from eyes into head; as if there was a substance moving in eye; ophthalmia; nose stopped; stitches r. side of abdomen; urine stopped at intervals; urine copious; violent stitches r. temple; whooping cough <; cough short and hollow; anxiety; pain and lameness of finger tips; uneasiness of limbs; body restless; epileptic attacks.

Day: photophobia; nose running; sleepy.

Day and night: itching in anus; cough.

[39] **Temperature and Weather.** ❙Can bear neither warmth nor cold. θToothache.

She cannot cover herself too warmly, but warmth does not relieve.

After being heated by dancing, took cold and suffered with paresis of muscles of eye.

❙Worse on coming from the air into a warm room. θHeadache.

❙Getting heated, < eruption. θAcne rosacea.

Digitized by Google

Warmth: > sensation as of an empty space between forehead and brain; > tensive tearing pain in integuments of head; > griping-clawing in forearm; of bed, drawing-tearing in thighs and legs; chronic urticaria; > gout and rheumatism.

Cold water: > face by rubbing part with a cloth dipped in; toothache; > pertussis; sticking abdomen, diarrhœa; > prurigo ani; cough relieved by a swallow; > painful nodules on hand; prevents epileptic attacks; > eruptions.

❙Taking cold from scrubbing and washing. θIschias.

❙From a river bath in summer. θParalysis.

❙After bathing: cough.

Better in open air: incapacity to think after gaslight.

Open air: > lachrymation; accumulation of tears; cough < after walking in it; < drawing-tearing in thighs and legs; < gout, face and toothache; < chorea during pregnancy.

Fresh air: blepharitis.

❙Sensitive to cold air. θHeadache. θScabies.

Cold air: pain in sound teeth; < whooping cough; painful retention of urine; paralysis of single parts, caused by exposure; causes eruption to disappear; striking abdomen causes diarrhœa; < rheumatism.

Draught of cold air: < tensive tearing pain in integument of head; aphonia; cough; caused paralysis of face.

❙Worse on becoming cold. θWhooping cough.

Wind: ears sensitive to; cold winds cause paralysis.

Stormy change of weather: facial neuralgia.

Damp weather: > tensive tearing pain in integuments of head; > bleeding ulcers; rhinitis.

❙❙After getting wet. θParalysis.

Colds contracted in springtime and from sudden change of weather; coryza of profuse, transparent mucus; cough with expectoration, rawness in chest and morning hoarseness.

Worse in clear, fine weather, > in damp, wet weather.

40 **Fever.** ❙❙Shivering beginning in and spreading from face.

❙Chill and chilliness: predominating, frequently with coldness of whole l. side; of diseased parts; with prosopalgia; with pertussis; left-sided.

❙❙Much internal chilliness, immediately followed by sweat without intervening heat.

❙Severe internal chill about midnight.

❙❙Chill lessened by drinking, and in bed.

❙❙Chill passes downward.

❙Coldness of single parts.

❙Chilly, with gooseflesh, while head and face burns. θHeadache.

Dull pressive pain: in head.
Dull pain: on vertex; in ears.
Rheumatic pain: in head; in lower jaw; in abdomen; aching, in shoulder; in chest; in nape of neck.
Tensive pain: gout; in sacrum; in l. lower arm.
Bursting pain: in hips.
Sprained feeling: in r. wrist; in gout.
Undefined pain: violent, in stomach; in ear; in malar bones; in sound teeth; in throat; in stomach; in r. abdomen; and strong pulsation, in perineum; in neck; in finger tips; in l. hip; in ankle; in urethra; over eye; in chest and limbs; in tongue; in tonsils; in stomach; in urethra; in small of back; in middle of spine; in both loins; in elbow joints.
Throbbing: in vertex; toothache.
Beating: in lower leg and foot, with every movement.
Twitching: in penis.
Tension: and pain, in jaws; r. side of neck; pain, in forearm; pain and stiffness, in hollow of knees; of scalp.
Tenseness: in r. eye; in heel and tendo-achillis.
Spasm: in rectum.
Cramp: in stomach; in small of back; in feet.
Compression: of chest.
Constriction: in larynx; of chest; of feet.
Contracted: in whole side of head; in jaw; in foot.
Obstruction: feeling of, in ears.
Fulness: in stomach; of chest; in hand, on grasping anything; around heart.
Heaviness: in upper lids; upper lip and nose.
Stiffness: in neck; of l. knee, when walking; of jaws; of fingers; from head to abdomen.
‖Drawing lame feeling: of unaffected part; in paralysis.
Lameness: finger tips; of jaws; in small of back; of muscles of arm.
‖Pain in paralyzed parts increases when lameness decreases.
Torpid feeling: in arms, at night.
Crawling: in both soles; in great toe; in larynx.
Tickling: in throat.
Itching: like flea-bites, l. inner canthus; on lower eyelid; in inner ear; of tip of nose; of face; l. cheek; in eyes; in rectum; hemorrhoids; orifice of urethra; about mammæ; rash on breast and arms; on back and calves; on arms; on inner side of thighs; on dorsum of foot; of scalp; of genitals; of anus; scrotum and skin of penis; in penis; of vulva.

Digitized by Google

Numbness: of side of face; of thumb; of malleolus, heel and toes; of feet; and deadly whiteness of lamed limbs, sometimes with coldness of head or feet.
Formication: in limbs.
Heat: r. side of head; in sternum; and sweat, in hypochondria; in scalp.
Uneasiness: in both limbs; of whole body.
Coldness: of shoulder joints and ankles; in arms; of single parts; as if touched by an icicle.
‖Chilliness with pains: in prosopalgia.
Dry sensation: in eyes; in air passages; in nose; of mouth and tongue; in throat.

" **Tissues.** ‖Disposition to hyperæmia and congestion depending on diminished action of motor nerves on muscular coat of bloodvessels. θAphonia.
‖Hemorrhages of very dark blood.
‖Netlike appearance of capillaries.
‖Painful varices, ulcers, or warts.
‖‖Contraction of flexor tendons; tension and shortening of muscles.
‖Rheumatic and arthritic inflammations, with contraction of flexors and stiffness of joints.
Catarrhal affections.
Chronic arthritis; nodosities.
Synovitis.
Ill effects from debilitating loss of fluids.
‖‖Disturbed functional activity of brain and spinal nerves, resulting in paralysis.
‖Softening of brain; epilepsy; locomotor ataxia; spasmodic affections.
Affects principally oculo-motor nerves, third pair; facial nerve, seventh pair; and motor (inferior maxillary) branch of fifth pair, also spinal nerves, particularly upper.
Proud flesh; caries; scrofulosis.

45 **Touch. Passive Motion. Injuries.** ‖‖Whatever part she grasps, burns.
πChild wants to be carried all day. θWhooping cough.
Touch: pain on vertex; scalp sore; eyes burn; pressive pain in eyes; constant inclination to touch and rub eye; itching on lower lids; stomach sore to; anus sensitive; hemorrhoids stinging, burning; larynx sore; heels and balls of toes sore to; front of arms and legs sore to.
Cannot bear touch of clothing on chest.
Pressure: causes pain in eyes; tearing in teeth; painful to pressure.
Rubbing: eye, > a tight skin which comes half way down; with cold, wet towel, > neuralgia of face.

Digitized by Google

Straining: vocal organs, hoarseness.
Ichorous suppurating scalds and burns slow of healing; or patients say, "they have never been well since that burn."
Burns from nettles.
Redness of frosted limbs.
Old injuries freshen up.

" **Skin.** Yellowish looking skin, particularly about temples.
❙Intertrigo, during teething.
❙Itching: over whole body; at various parts; especially on tip and wings of nose; face; scrotum; back; arms; palms; dorsi of feet.
❙❙Subacute and chronic eruptions, similar to blisters from burns.
Chronic urticaria, coming out more fully in fresh air, with decided aggravation and itching from heat of bed.
Pemphigus.
Zona.
❙Eruption of pimples on tip of nose.
❙Excessively itching moist tetter on neck.
Itching blotches, with burning, like nettlerash.
Itching eruption preventing sleep, burns and bites, especially on sore spot on lower leg.
Scabies, after abuse of sulphur or mercury.
Eczema pustulosa.
Sensation as though touched from time to time with an icicle.
Marbled appearance of skin.
❙❙Large, jagged, often pedunculated warts exuding moisture and bleeding easily.
❙Small, non-pedunculated warts all over body, internal and external, and on eyelids.
❙❙Warts and scrofulous skin affections.
❙Lupus.
❙Injuries of skin, which had healed, become sore again.
❙❙Burns and scalds.
❙❙Varicose and fistulous ulcers.
❙Phagedenic ulcers.
Ulcers: bleeding, with blisters on surrounding skin, boring and burning; burning in edges; pain as if burnt; sensitive, surrounded by pustules; swollen, with a feeling of tenseness; pus bloody and corroding, greenish or grey, ichorous and thin as water, sometimes yellow; > in damp weather and from walking.
❙Corrosive ulceration of tubercles in skin. θSyphilis.
Ulcers on hands, fingers and toes: corroding, thin, watery, often acrid discharge, with burning pain; discolored; ichorous.

Digitized by Google

Old sores originating in burns, maltreated with lead.
Injurious effects, chorea, paralysis, epilepsy, etc., following suppressed itch or other chronic scrofulous exanthemata.

47 **Stages of Life, Constitution.** Diseases corresponding to the hydrogenoid constitution of Grauvogl.
‖‖Dark haired persons with rigid fibre most affected.
‖Lymphatic, torpid temperament; bronchitis.
‖‖Children with black hair and eyes; enuresis nocturna.
‖Especially adapted to feeble, delicate children; pertussis; enuresis.
‖Diseases incidental to old age; varicose veins.
‖Children with delicate skin; dentition.
‖During evolution of a group of teeth, intertrigo appears with occasional convulsions; dentition.
Child, æt. 18 months; diarrhœa.
Girl, æt. 9; hip disease.
Child, æt. 10; leucoma.
Boy, æt. 10; catarrh of bladder.
Girl, æt. 11; enuresis.
Boy, æt. 12; enlarged cervical glands.
Child, æt. 12; ophthalmia.
Girl æt. 12, weakly, delicate; chorea.
Girl, æt. 14, scrofulous; chorea.
Boy, æt. 15; enuresis.
Boy, æt. 15, scrofulous and miserable; epilepsy.
Girl, æt. 15, brunette; enuresis.
Slender, blonde girl, æt. 15; warts on fingers.
Boy, æt. 17; stammering from childhood.
Girl, æt. 18; epilepsy.
Girl, æt. 20, weakly, mild temper, since 16 years; rhinitis.
Girl, æt. 21; crusty nose.
Girl, æt. 24; acne rosacea on nose.
Girl, æt. 24, terribly disfigured nose; acne rosacea.
A man, æt. 25; hemiplegia of face.
Robust, choleric woman, æt. 30; aphonia.
Woman, æt. 30, well fed, choleric, full-blooded; paralysis.
A lady, æt. 32; paresis of muscles of eye.
Woman, æt. 32; hemiplegia of face.
Robust woman, æt. 36, phlegmatic temperament; rhinitis.
A man, æt. 36; wart on finger.
A weakly seamstress, æt. 37; headache.
A woman, æt. 37, appears consumptive, thin in flesh; bronchitis.
Woman, æt. 39, of a melancholy mood; toothache; prosopalgia.
Woman, æt. 39, emaciated, pale and sickly since 6 years; cephalalgia and gastritis.

Digitized by Google

Woman, æt. 40; ophthalmia.
Woman, æt. 40, mild, gentle disposition; faceache.
A man, æt. 44, strong, athletic, short neck; epilepsy.
Woman, æt. 46, full habit, dark complexion, phlegmatic; deafness.
A very strong, robust merchant, traveling much, æt. 52; headache.
Woman, æt. 55, emaciated; neuralgia.
Woman, æt. 60; paralysis.
A man, æt. 61; paralysis of bladder.
Woman, æt. 66; tetter on r. cheek.
Very much weakened woman, æt. 69; hemiplegia.
A woman, æt. 70; paralysis of the facial nerve; glossoplegia.
Old maid, æt. 75, fond of coffee; chronic headache.
During climacteric years; deafness.
Old maid, weakly, pale; prosopalgia.
"In my practice the greater number of *Causticum* patients, suffering from throat complaints, were men." Lorbacher.

[45] **Relations.** Antidoted by: *Asaf.*, *Coffea*, *Coloc.*, *Dulcam.*, *Guajac.* (rheumatic contraction of tendons of arms and legs), *Nitr. spir. dulc.*, *Nux vom.*

It antidotes: *Asaf.*, *Cinchon.*, *Coloc.*, *Euphras.*, *Plumbum*; poisoning by lead (paralysis); bad effects (paralysis of tongue) of type held between lips of a compositor; abuse of *Mercur.* and *Sulphur* in scabies.

CEANOTHUS AMERICANUS.

New Jersey Tea, or Red-root. *Rhamnaceæ.*

Extends from Canada to the Gulf, and west to Arkansas and Iowa.

The bark of this root is considered astringent by the Old School and is recommended in aphthous sore mouth and throat, accompanying scarlet fever. See Investigator, April, 1879.—J. L. Andrews.

Authorities.—L. Munyon, Am. Observ., 7, 100; clinical cases and a fragmentary proving by J. C. Burnett, in Mon. Hom. Rev., vol. 23, p. 155.

W. Geisse reported a case of chronic urinary trouble in an old man cured by the tea.

[1] **Mind.** ‖Low-spirited, fears he will become unfit for work. θChronic splenitis.

πGreat nervous excitement, with chilliness and loss of appetite; felt as if nerves were shaken; at dinner could scarcely hold knife and fork.

[3] **Inner Head.** ‖Headache in r. side, with pain in region of spleen.

[12] **Inner Mouth.** ⁞Aphthous affections of mouth and fauces.

[13] **Hypochondria.** ‖Deep-seated pain in l. hypochondrium.

‖Pain and fulness in l. side, with inability to lie on it.

‖Severe pain in region of spleen, with low spirits.

‖Pain in l. side, for a long time with leucorrhœa and chilliness.

Pain in l. side, headache r. side; severe pain in l. side, with inability (for years) to lie on that side.

‖Swelling in l. side, under ribs, with cutting pain, < in cold weather, with constant chilliness, must sit over fire. θChronic splenitis.

‖Enlarged spleen, extending to within an inch of crest of ilium, with severe pain in side.

‖Chronic hypertrophy of spleen. θAfter intermittent.

[20] **Stool and Rectum.** Diarrhœa.

⁞Dysentery.

[22] **Male Sexual Organs.** ⁞Syphilitic complaints.

[23] **Female Sexual Organs.** ‖Leucorrhœa, profuse, thick and yellow, with pain under l. ribs. θChronic splenitis.

Digitized by Google

πMenses appeared ten days too early, and very profusely.
‖Catamenia appears every two weeks.
‖Metrorrhagia, with pain in region of spleen.

[31] **Neck and Back.** πChilliness down back.

[35] **Rest. Position. Motion.** Cannot lie down, on account of pain in l. side.

[39] **Temperature and Weather.** ‖Must sit over fire. θSplenitis. Cold weather: < swelling and pain in l. side under ribs.

[40] **Fever.** πChilliness, principally down back; shivering; loss of appetite, and nervous excitement.
‖Rigors at frequent intervals, with pain in l. side. θChronic splenitis.
Intermittent, with chronic enlargement of spleen.

[41] **Attacks, Periodicity.** Every two weeks, catamenia.

[42] **Locality and Direction.** Right: headache.
Left: pain in region of spleen; deep-seated pain in hypochondrium; pain and fulness in hypochondrium, with inability to lie down, with leucorrhœa and chilliness; swelling in side under ribs; pain in side, with rigors.

[43] **Sensations.** As if nerves were shaken.
Cutting: in l. side under ribs.
Pain: in l. side.
Fulness: in l. side.

[47] **Stages of Life, Constitution.** ‖Girl, æt. 14; splenitic pain.
A young lady, æt. about 26; chronic splenitis.
A woman, æt. about 30, or 32, mother of several children, ill-fed and overworked; chronic hypertrophy of spleen.
A middle-aged, childless lady, of fresh complexion; chronic hypertrophy of spleen.
A lady, æt. about 55; chronic splenitis, chills and leucorrhœa.
A young man; chronic splenitis.

[48] **Relations.** *Berber.* helped the pain in spleen when *Ceanoth.* failed.
Conium helped in second attack of metrorrhagia when *Ceanoth.* failed.
Myr. cerif. finished the cure of icterus, after *Ceanoth.* relieved the severe pain in l. side.

CEDRON.

Simaba Cedron. *Simarubaceæ.*

The fruit of a South American tree, also growing in the West Indies.

Trituration of the seeds, or a tincture prepared from the whole fruit.

In 1699, mentioned in the history of the Buccaneers.

In 1828, seeds, grown on the Andes, offered for sale by the native Indians in Carthagena.

In 1844, discovered on the Isthmus.

In 1846, Purdie discovered the tree on the Rio Grande.

In 1851, Dr. Cazentre, Collectanea, in N. A. J. H., vol. 1, p. 272.

Considered a specific for bites of venomous serpents, hydrophobia and stings of poisonous insects, in Panama, and used for epidemic intermittents. Hellert's experiences, ibid.

In 1851, reports by Sir Wm. J. Hooker, Pharm. Journ. and Transact., 10, 344, later in Centralblatt, 1, 271.

In 1851, Lewi found the tree in the Sierras Calientes in New Granada, and says the seed is similar to the Ignatia bean and as bitter. Dumas, Journ. de Chim. Med., 282.

In 1853, Dr. Metcalf on New Provings, N. A. J. H., vol. 3, p. 99.

In 1856, cures of intermittent fever, Otto Füllgraff, N. A. J. H., 5, 179.

Casanova's pathogenetic and clinical experiments on fourteen persons, Monthly Hom. Rev., vols. 5 and 6.

Provings by Teste on three persons, in 6th dilution. Reported cures of intermittents of Martinique and Wallachia. Materia Medica, p. 575.

In 1859, provings by J. Douglas, N. A. J. M., vol. 8, p. 120.

A cure of quotidian ague by Hughes.

Provings by Stennett, W. Hom. Obs., vol. 2, p. 11.

In 1874, S. A. Jones, resume of symptoms, Am. Obs.

In 1876, article on intermittents by A. Charge, Trans. World's Hom. Convention.

[1] **Mind.** Nervous excitement, followed by depression.
- Restless, is driven from place to place; urine dark yellow and increased in quantity.
- After delirium tremens, trembling of whole body.

Nervous depression after coitus.
- Lectrophobia.
- Body is heavy, mind depressed. θIntermittent.

Mental symptoms < at night.

[2] **Sensorium.** Dulness of senses.
- Vertigo. θMenstrual epilepsy.
- Giddiness, with falling down in convulsions. θEpileptiform eclampsia.

Digitized by Google

[5] **Inner Head.** Shooting pain in orbital region.
Headache, especially deep in orbits, obliging him to shut eyes, and extending to occiput.
‖Intense pain in forehead. θEpileptiform eclampsia.
‖Pressing frontal headache, with sharp pains from above eyes to temples and occiput, < before a storm. θChoroiditis.
Throbbing pain in head, commencing in temples, extending around to forehead.
‖From temple to temple, pain across eyes.
Pressure at r. temple, dull pain in r. side of head, disappears towards noon.
Pressive headache, at noon.
Pressure on top of head.
Sharp pain in occiput.
‖‖Head felt as if swollen.
Distensive headache, < during night.
‖Sick headache every other day at 11 o'clock.
‖Congestion to head. θChill.
Attacks of headache recur with clocklike periodicity.
Headache < in open air and on rising.

[5] **Sight and Eyes.** Dimness of vision.
Objects seem red at night and yellowish during day.
‖Dilated pupils, with tumid face.
‖Flashes of light before eyes.
A peculiar, unsteady, glistening appearance of eyes, and intolerance of light.
‖Dull appearance of eyes.
Eyes ejected and sore to touch.
Alternate dryness and smarting of eyes with moisture, < when closing them.
Smarting and burning, with lachrymation.
Acrid tears which seemed to scald cheeks.
‖A ticlike pain over l. eye, for more than thirteen years, which never came except after coitus.
‖‖Severe shooting pain over l. eye.
‖Severe ciliary neuralgia, distinctly periodical. θGlaucoma. θIritis. θChoroiditis.
‖Pain across eyes, from temple to temple.
Neuralgic affections < evenings and when lying down.
‖Deep sunken eyes, during catamenia.
Spasmodic twitching of upper lid.
Burning sensation in upper lid.

[6] **Hearing and Ears.** ‖Tinnitus. θMenstrual epilepsy.
‖Deafness, at night. θIntermittent.

[7] **Smell and Nose.** Profuse discharge of thin, clear, acrid or glassy-looking mucus.
‖Point of nose cold, with chilliness and yawning, at 9 P.M.

Digitized by Google

[8] **Upper Face.** ‖Animated red face. θIntermittent fever.
Yellow face and skin.
‖Face pale, during catamenia.
‖Tumid face, with pupils much dilated. θEpileptiform eclampsia.
‖Prosopalgia, more frequently in women than in men, generally on r. side, recurring in regular paroxysms of indefinite duration, with spasmodic distortion of muscles corresponding to affected region.
Unbearable neuralgic pains, wandering from place to place, but emanating from a carious tooth; pressing or tearing pain, with occasional shooting.
‖Chronic intermittent prosopalgia, always coming on at 7 or 8 P.M., and lasting from two to four hours.
Facial neuralgia, returning with clocklike periodicity.
‖Flying heat in face, alternating with chills. θProsopalgia.
Facial neuralgia, arising from malarial influences.

[9] **Lower Face.** ‖Lips cold, bluish and dry, during catamenia.

[10] **Teeth and Gums.** πSudden toothache in l. upper molars; on inspiration, sensation as if cold touched teeth.
‖Odontalgia every night, during catamenia.
‖Bleeding of gums during catamenia.

[11] **Taste and Tongue.** ‖Difficulty of speech, during catamenia.
‖Stammering speech after coitus, in a woman. θChoreic attack.
Pricking itching of tongue.
‖Painful pricking of tongue, with sensation of heat. θDuring catamenia.
‖Tongue felt paralyzed at times, during catamenia.

[12] **Inner Mouth.** Mouth dry, great thirst for cold water.
‖Mouth and tongue very dry, during catamenia.
‖Profuse ptyalism after catamenia.
Burning and smarting in mouth.
Tingling sensation in mouth as from shock of a galvanic battery.
‖Fetid breath during catamenia.

[13] **Throat.** πPain on small spot in l. side of throat, next root of tongue, as of a foreign body, < from pressure.
‖Enlargement of tonsils, with redness of velum palati, and constant need of swallowing. See 26.
Burning in fauces, throat and stomach.
Constriction of throat; difficulty of swallowing.

[14] **Appetite, Thirst. Desires, Aversions.** Longing for cold in some, and for warm drinks in others.
‖Great thirst during catamenia.

[15] **Eating and Drinking.** ‖After meals: white, frothy, papescent evacuations, with colic and wind.
Improved by eating: suffocative fits. See 26.

Digitized by Google

[16] **Hiccough, Belching, Nausea and Vomiting.** Slight nausea.
Nausea, with distension of stomach.
[17] **Scrobiculum and Stomach.** Sensation as of a stone on stomach.
⁝Gastric affections; spasm of stomach and bowels.
[18] **Hypochondria.** Stitches in spleen and liver.
[19] **Abdomen.** Abdomen hard and distended.
Flatulence, colic and cramps.
[20] **Stool and Rectum.** ❙Semiliquid, whitish feces, somewhat like starch; white, frothy and papescent evacuations immediately after meals, accompanied by slight colic and discharge of inodorous wind.
❙Involuntary discharge of feces. θChoreic attack.
❙❙Excessive tenesmus.
⁝Cholera morbus.
[21] **Urinary Organs.** A great deal of pain in kidneys.
Burning along ureters and in urethra.
Profuse secretion of urine.
Frequent ineffectual urging to urinate.
❙Involuntary discharge of urine. θChoreic attack.
❙Discharge of inodorous urine, as clear as water, on recurring consciousness. θEpileptiform convulsions.
Urine very high colored.
Urine throws down a branlike sediment.
[22] **Male Sexual Organs.** ❙After coitus, pain over l. eye.
Gonorrhœa-like discharge, lasting three days.
Thin, gleety discharge, day and night, with formication over body.
Feeling as if a drop of urine were in urethra, or a constant dropping from it.
[23] **Female Sexual Organs.** ❙Post coitum, irregular and uncontrollable movements of l. upper and lower extremities, and of some portions of face, manifested by grimaces and contortions of different kinds; these symptoms lasted from fifteen to twenty minutes; could not speak without stammering, and respiration was very much affected; involuntary discharge of urine and feces at times during attack. ❙Choreic attack.
❙During catamenia: mouth and tongue very dry; difficulty of speech; great thirst; painful pricking of tongue, with sensation of heat; felt at times as if tongue was paralyzed; face pale; deep sunken eyes; odontalgia every night; fetid breath; lips cold, bluish, dry; now and then slight bleeding of gums.
❙After catamenia profuse ptyalism and leucorrhœal flow.
❙Leucorrhœa regularly every month, five or six days previous to catamenia, with pain in uterus and swelling of vulva.

Digitized by Google

‖Leucorrhœal discharge appearing in place of catamenia.
‖Menstrual epilepsy (epileptoid convulsions), precursory symptoms of which were manifested precisely the same day that catamenia commenced; vertigo, tinnitus aurium, and irregularity in action of heart; then aura epileptica, followed with loss of consciousness and falling; a distressing cry now and then, alternated with risus sardonicus, and slight foaming at mouth, during attack.

[24] **Pregnancy. Parturition. Lactation.** Tendency to miscarriage, repeating itself at same epoch.
‖Epileptiform eclampsia, in a primipara, in seventh month of pregnancy. See 36.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Larynx constricted and tender; difficulty of swallowing; difficult respiration, with partial loss of voice, recurring at intervals.
‖Feeling of suffocation in throat.
‖Chronic intermittent laryngitis; attack comes on every evening, with shivering chills, lasts about two hours, terminates with a profuse perspiration.

[26] **Respiration.** ‖Respiration very much affected after coitus, in a woman. θChoreic attack.
‖Hurried respiration and feeling of suffocation in throat.
‖Suffocating fits regularly every morning from 10 to 12 o'clock; there are sensations of choking or stifling; difficulty of breathing, obliging her to stand in an erect position; enlargement of tonsils during attack, with redness of velum palati, and constant need of swallowing; < after sleeping, > by eating.
‖Breath cold.

[27] **Cough.** ‖Troublesome cough, coming on regularly every morning at about 6 o'clock, and lasting from two to three hours.
‖Cough dry with oppressed and rattling breathing, > by free expectoration of viscous frothy sputa, at times streaked with blood.

[28] **Inner Chest and Lungs.** Oppression of chest; frequent inclination to sigh and draw a deep breath.
Sharp darting cutting pains under ribs.

[29] **Heart, Pulse and Circulation.** ‖Irregular action of heart. θMenstrual epilepsy.
‖Quick and full pulse, with animated red face. θIntermittent fever.
‖Irregular pulse, with palpitation. θEpileptiform eclampsia.
‖Rapid intermittent pulse, impossible to count strokes; also, palpitation of heart, rapid and intermittent.

[31] **Neck and Back.** ‖Stiff neck; pain all along spine. θCerebro-spinal meningitis.

Digitized by Google

[32] **Upper Limbs.** ‖Pain at insertion of r. deltoid, and rheumatic pain in r. side.

[33] **Lower Limbs.** Numb, dead feeling in legs; they feel enlarged.

[34] **Limbs in General.** Transient pain in joints, principally in r. elbow, which perspire.

Tearing and twitching pains in limbs.

Cramps, followed by contracting and tearing pains in extremities.

Cold sensation in hands or feet.

Icy coldness of extremities.

‡Gout.

[35] **Rest. Position. Motion.** Lying down: < neuralgic affection, in evening.

Has to stand in an erect position; suffocative attacks.

[36] **Nerves.** General debility, languor and fainting.

‖‖Chronic intermittent neuralgia, recurring in paroxysms with great regularity.

‖Trembling of whole body. θAfter delirium tremens.

‖Choreic attack, after coitus, in a woman.

‖Epileptiform eclampsia: attacks came on regularly twice a day, morning and evening, at same hours; intense pain in forehead; tumid face, with pupils much dilated; giddiness, resulting in her falling down in most distressing convulsions; insensibility, closed teeth, and frothy secretions from mouth; difficult respiration, irregular pulse, and palpitation; the whole lasting for six or eight minutes; on recovering consciousness, felt very weak, and discharged a large quantity of inodorous urine, as clear as pure water (primipara, in seventh month of utero-gestation.) θHysteria.

‖Epileptiform convulsions during catamenial period.

Entire body feels numb.

[37] **Sleep.** Yawning.

Worse after sleeping: suffocative fits. See 26.

[38] **Time.** Night: mental symptoms <; distensive headache <; objects seem red; deafness.

4 A.M.: chill, followed by sweat.

6 A.M.: troublesome cough; regular paroxysm of fever.

11 A.M.: sick headache, every other day.

10 to 12: suffocating fits, daily.

Towards noon: pressing pain in r. temple >.

Noon: pressive headache.

4 P.M.: chill after washing in cold water.

7 or 8 P.M.: chronic intermittent prosopalgia.

9 P.M.: point of nose cold, with chilliness and yawning.

Evening: neuralgic affection; epileptiform eclampsia.

Day: objects appear yellow.

Digitized by Google

[39] **Temperature and Weather.** Warm drinks: longing for.
Cold drinks: longing for.
Open air: < headache.
‖Chills and fever in persons returned from tropical countries.
‖Worse before a storm: neuralgic pains. θChoroiditis.

[40] **Fever.** Chilliness and yawning: point of nose cold.
‖Chill at 4 A.M., followed by sweat; at 4 P.M., after washing in cold water, chill alone.
‖Shivering and chill, followed by profuse perspiration, every evening. θChronic laryngitis.
Chill, with congestion to head; hands, feet and nose remain icy cold.
Chill, severe enough to shake whole body, renewed by every motion, lasting one to two hours; hands, feet and nose cold.
Regular paroxysm of fever, coming at same hour, commencing every day at 6 P.M., by chills in back and limbs, or cold feet and hands.
Heat over entire body.
Hot stage: dryness; heaviness of head; redness of face; burning heat in hands, pulse full and accelerated, thirst, with desire for warm drinks.
‖‖Profuse perspiration.
During sweat, coldness and heat and heat and coldness irregularly intermingled.
‖Bluish-red face; forearm to elbow, and hands and feet cold; sweat beneath axilla and on chest; a child.
Quotidian and tertian fever with marked periodicity.
‖‖Miasmatic fevers of low marshy regions in warm seasons and tropical countries; chill returns with clocklike regularity.

[41] **Attacks, Periodicity.** Clocklike periodicity: headache; chill.
‖‖Attacks occur with unerring periodicity to the hour. θProsopalgia. θNeuralgia. θIntermittent.
At same epoch of pregnancy: tendency to miscarriage.

[42] **Locality and Direction.** Left: eye, a ticlike pain; shooting pain over eye; toothache; pain in throat; pain in eye after coitus; upper and lower extremities, uncontrollable movements.
Right: temple, pressure; side of head, pains; face, prosopalgia; pain in deltoid; transient pain in elbow.

[43] **Sensations.** As if swollen, head; as if cold air touched teeth; as if paralyzed, tongue; as from shock of galvanic battery, in mouth; as of a stone on stomach; as if a drop of urine was in urethra, or dropping from it; as if enlarged, legs.
Intense pain: in forehead.

Digitized by Google

Stitches: in spleen and liver.
Darting cutting: under ribs.
Shooting: pain in orbital region; over l. eye; toothache.
Ticlike pain: over l. eye.
Pricking itching: of tongue.
Tearing: toothache; in limbs; in extremities.
Smarting: in eyes; in mouth.
Burning: in eyes; in upper eyelid; in mouth; in fauces, throat and stomach; along urethra; heat, in hands.
Pressure: r. temple and head; on top of head.
Pressing: frontal headache; toothache.
Rheumatic pain: in r. side.
Contused feeling.
Twitching: in limbs.
Sharp pain: in occiput; from above eyes to temples and occiput.
Tingling: in mouth.
Formication: over body, with gleet.
Numbness: in legs.
Throbbing pain: in head.
Undefined pain: in kidneys; along spine; at insertion of r. deltoid.
Heaviness: of head.
Suffocative feeling: in throat.
Cramps: in extremities.
Heat: in tongue.
Flying heat: of face.
Heat and cold: irregularly intermingled.
Dryness: of head; of eyes.

[44] **Tissues.** Affects cerebro-spinal system, kidneys and bowels.
Counteracts bites of venomous serpents and stings of poisonous insects.
Marked debility, apparently due to action on brain and nervous system.

[45] **Touch. Passive Motion. Injuries.** Pressure: < pain in throat.
Touch: eyes sore to.

[47] **Stages of Life Constitution.** Adapted to persons of a voluptuous disposition and of an excitable, nervous temperament; more especially to females.
A child; cyanosis.
Women more frequently affected with prosopalgia than men.
A woman, neuralgic headache; chronic choroiditis.
Primipara, in seventh month of pregnancy; epileptiform eclampsia.

[48] **Relations.** The debility of *Cedron* in intermittent fever appears to be due to action on brain and nervous system, not to the effect of profuse perspiration, as in *Cinchona*.

Digitized by Google

Given against bites of venomous serpents and stings of poisonous insects.
Compare *Cinchona* and *Arsen.*
Cedron removes roaring in ears, produced by *Cinchona.*
Bellad. removes "objects appear red at night and yellowish by day."

CEPA (ALLIUM.)

Common Onion. *Liliaceæ.*

In use as a medicine since time immemorial. Among the Egyptians it was hung up in noxious corners, carried about with one, taken for the consequences of bad water, used for the sting of insects, animal poisons, even the bite of the mad dog; it was applied as an irritant and to mature abscesses, even carbuncles; then it was used for frozen feet by Dioscorides, who states that it is "*efficacious when feet are rubbed sore,*" a symptom confirmed by the provings and verified in our practice. Then it was also used as a remedy for promoting the growth of hair and hoofs, as also for destroying warts and corns; it was given for the sequelæ of "white and black measles in the body." Dioscorides gave it for podagra. It was considered an eye remedy and an ear remedy, serviceable in angina and for loosening mucus if it rattled in the throat and bronchia of children and old people. It was given against flatulence and to promote the catamenia as well as the flow of urine. Dioscorides, and physicians following him, among the Arabians, had a glimpse of the truth of *similia*, for they used the onion to cure the symptoms they knew it was capable of producing; but with Galen all reasonable investigation ceased.

It is mentioned in the Old Testament under the name Bejel, which the Hebrews craved, as in our time coffee and tobacco are craved.

Homer mentions it in Iliad XI, 629, and in Odyssey, XIX, 233.

Herodotus, Hist. II, Euterpe N. 125.

Hippocrates, Dediaete, II, 359; De affect., 529; De Morbo Sacro, 302.

Theophrast, Bd. VII, 4.

Plinius XX, (5) 20.

Oribasius, Med. Coll. XI, XV.

Aëtius Tetr. I, serm. I.

Paulus Aegineta de re med. VII.

In 1847, on September 15th, C. Hg. commenced his proving with a tincture prepared from the red Connecticut onion; he was assisted by Dr. Jeanes (whose preparations were made in water up to fourth dilution), Williamson, Neidhard, Lingen, W. Wesselhœft, Geist, Eckel, Zumbrock, Alliborn and Raue. See American Drug Provings, or translations therefrom by Allen in his Encyclopedia.

To the original collection are added clinical notes from H. R. Arndt, Hempel's Mat. Med., vol. I, p. 293; C. W. Balfour, A. O., vol. 4, p 344; Blakely, H. M., vol. 4, 304; Greenleaf, Trans. N. Y. Med. Soc., 1872, p. 596; Guernsey, H. M., vol. 3, p. 209; Helmuth, Am. Homœopath., April, 1878; D. S. Kimball, M. I., vol. 3, p. 418; S. Lilienthal, N. Am. J. of Hom., Aug., 1870.

[1] **Mind.** Apathetic, mornings.

‖Very melancholy. θCatarrh.

‖Indefinable anxiety; walks about, and finally full of apprehension, throws himself on the bed and now gets up again; constant violent pains in l. side of abdomen, more in middle and lower part of abdomen and in region of bladder, with troubles in urinating and no stool; violent thirst; face expressive of anxiety and doubt; skin hot, especially in painful and sensitive places; pulse somewhat accelerated, full and hard.

‖Fears she will become distracted, from pain in suppuration of fingers.

‖Confused and absent-minded, in afternoon after wine and coffee.

Makes mistakes in spelling.

[2] **Sensorium.** Vertigo on rising.

‖Dulness, pressure, fulness, heaviness in head, most in occiput, < evenings, > in open air, and < when returning to a warm room.

‖‖Dulness and confusion of head. θCoryza. θWhooping cough.

[3] **Inner Head.** Stitches as of needles in forehead.

‖‖Dull frontal headache. θCoryza.

Dulness in forehead and whole head, as after inhaling chloroform.

‖Pain in forehead, with catarrh.

Pains deep in head, over l. brow.

‖Pains in both temples, most severe in r., < by winking; afterwards the pain extends over forehead, < on l. side.

‖Pain in temples, < after motion of eyelids.

As if swollen and heavy on crown.

‖Headache from both sides of head, downward and inward, towards middle.

‖Headache, first in occiput, then in forehead, over r. eye.

‖Intense pain in occipital region and cervical spine. θInfluenza.

Confusion in occiput, first on both sides and towards upper part, pressing down sideways, then behind ears and around whole occiput.

‖Severe headache, with slight coryza.

Whole head becomes hot.

Head full and heavy.

Fulness and heaviness in head, as if it was bound up, with flickering before eyes.

Pressive headache, with sensation as if whole head was wrapped up in warm water.

‖An electric shock passes through head.

Digitized by Google

‖‖Dull headache, with coryza; < in evening, > in open air, but aggravated when returning to a warm room.
Headache ceases during menses.
‖‖Catarrhal headache.

[4] **Outer Head.** Stitches over whole l. forehead, externally; they draw into ear, upper jaw and teeth of same side; evenings.
‖Numbness in bones of skull, as if asleep.
Tingling pain behind l. mastoid process.
Sensation as if whole head was wrapped up in warm water.
‖Prickling sweat on bald vertex after each meal.
: Falling out of hair.

[5] **Sight and Eyes.** Eyes sensitive to light, particularly left.
Cloudy vision by candlelight.
‖‖Dulness of eyes, with aversion to light. θCoryza. θPertussis.
Flickering and blinding before eyes; everything dances hither and thither.
A bright dazzling in distance and dimness near by.
‖Letters appear smaller; when getting sleepy, eyes dull, dim and sensitive to light. θCoryza.
‖‖Burning, biting and smarting of eyes as from smoke, wants to rub them.
‖Itching, burning, stinging of eyes.
Sensation as if eye was hanging by a string or torn.
Drawing pain extending into l. eye from cheek.
‖Eyes red, itching, and sensitive to touch, l. worse.
‖‖Eyes watery and suffused, capillaries injected. θCoryza.
Muco-watery discharge from eyes and nose.
‖Excessive lachrymation, with redness of eyeballs, with frequent sneezing. θCoryza.
‖Lachrymation of l. eye, with coryza, was much greater, eye was much redder and more sensitive to light than right.
‖Profuse bland lachrymation. θCoryza.
‖Lachrymation is for most part in evening in warm room; l. eye weeps most and is more sensitive to light.
‖Shooting pain in r. lachrymal duct.
‖Winks with eyes, with pain in temples.
‖Smarting of inner surface of upper lids.
‖Swelling of lids and around eyes. θCoryza.
‖Threadlike pain: over r. eye, towards root of nose; from cheek towards eye.
Needle stitches in eyebrows.
Itching in supraorbital region, more on l. side.
Heat in l. eyebrow.
Pain over r. eye to root of nose.

Digitized by Google

‖Catarrhal ophthalmia. θWhooping cough.

[6] **Hearing and Ears.** Noises in ears, buzzing and roaring; sounds appear to come from a distance.

Humming in ears on lying down.

Roaring in l. ear, as after a severe cold.

‖Tinnitus. θPertussis.

‖Hardness or dulness of hearing.

‖Stitches towards ear from l. forehead.

‖Pain, like thick threads, towards ear from deep within head.

‖Pains jerking from throat towards eustachian tube.

Chilling or burning twitching in region of r. eustachian tube near throat.

‖Earache.

‖Discharge of pus from ear.

Pain behind ears deep within head from backward and inward to ears.

Pecking behind r. ear.

Under l. ear a hard swelling, size of a hazlenut, extending from above angle of lower jaw to ear, from which pains go into ear, especially on pressure.

[7] **Smell and Nose.** ‖Epistaxis.

‖Dryness of anterior nares.

‖Nose stopped, nasal voice.

‖A feeling of tightness at root of nose.

Pain into root of nose from above r. eye.

‖Constant sneezing, with profuse acrid coryza, < on coming into a warm room. θPertussis.

‖Immediately after rising from bed in morning violent sneezing, as if it would tear her to pieces.

Crawling in r. nostril, as before sneezing; must frequently blow thin mucus out of nose.

‖Frequent sneezing, lachrymation, pain in forehead, acrid discharge from nostril, hacking cough on inspiring cold air, cold alternates with heat.

‖Profuse nasal discharge. θScarlatina.

‖‖Acrid discharge from l. nostril.

Cold begins mostly on l. side and goes to right.

‖Spring coryza.

‖‖Colds after damp northeasterly winds.

‖‖Fluent coryza, with headache, tears from eyes, feels hot and thirsty, with want of appetite; cough and trembling of hands; < evenings and in-doors; > in open air.

‖Ichor oozing out of nose. θSecond stage of scarlatina.

‖Ichorous fluid from nose, when singing. θConvalescence from scarlatina.

‖Acrid watery discharge dropping from tip of nose.

Digitized by Google

Dropping from nose, watery discharge, burning and corroding nose and upper lip.
Spring coryza; tingling and itching in r. nostril.
Every year, in August, morning coryza, with violent sneezing; very sensitive to odor of flowers and skin of peaches (lasting two or three weeks).
Coryza, at times with stoppage of nose, so that she speaks through nose, at others with profuse mucous discharge.
Catarrh, with watering and smarting eyes, with violent sneezing; he must "take a long breath," and then sneezes correspondingly.
Violent catarrh, after northeast wind and rainy weather; eyes suffused, lids very red, as from crying and rubbing them; nose dropping, throat sore, and some cough.
Coryza: after chilliness; after flushes of heat at evening.
Coryza, with burning of edges of nose, profuse discharge.
Coryza, > in open air and < in warm room. θPertussis.
With coryza, trembling of hands, in evening.
Large pieces of a mucous polypus were blown out and dropping of water ceased. θPolypus.
Nasal polypi.
Burning in edges of nose and lips. θCoryza.

[8] **Upper Face.** Expression of anxiety and despair, with pain in abdomen.
Threadlike pains about face, temples and ears. θPertussis.
Drawing pain in l. cheek going into interior of l. eye; > in cold air.
Threadlike pains in upper maxilla.
Throbbing, drawing, pressing pains, with swelling of cheek. θToothache.
Drawing stiches into upper jaw and teeth from l. forehead.
Warm spots on r. cheek.
Face hot, especially in evening.
Paralysis of l. half of face, also somewhat noticed in limbs of same side, too copious secretion of urine.
Eruption of nettlerash on face.
Upper lip red and sensitive from acrid nasal discharge.

[9] **Lower Face.** Worse when chewing. θToothache.

[10] **Teeth and Gums.** Toothache, with coryza, > when catarrh is worse, and < when catarrh ceases.
Toothache in molars, after exposure to damp cold wind, and < in warm room and from warm drinks; > from cold water and picking or sucking.
Toothache, going from l. to right.
Jerking pain in last molars.
Pressure in r. back teeth on going into a warm room.
In first upper teeth, r. side, sensitive drawing from root to crown; later same feeling in corresponding teeth on l. side.

Digitized by Google

Pressive pain in root of l. eye tooth disturbing sleep, with excessive heat in cheeks; > towards morning during sweat; cheeks feel swollen.
Feeling as if back teeth were too long, with some pain, during sleep; > on rising.
Drawing stitches into teeth from l. forehead.
‖Teeth are dirty and turn yellow.

[11] **Taste and Tongue.** ‖Disgusting taste in mouth; sweet and nauseous.
Burning taste, more on gums.
Loss of taste.
‖Tongue dirty, slimy and furred, especially in morning.
Dryness at root of tongue, on r. side.
Pains under tongue; small sore elevations at lower insertion of frænum.

[12] **Inner Mouth.** ‖Aching like a large lump on root of tongue, roof of mouth, eustachian opening, extends towards ear.
‖Sensation of fulness and soreness behind palate.
‖Dryness and smarting above palate.
‖Dryness in mouth, on root of tongue, on soft palate and in throat.
Dryness in mouth, without thirst.
Mouth and tongue as if scalded.
‖Bad odor from mouth and throat. θToothache.
‖Expectoration of a lumpy mucus from posterior nares.

[13] **Throat.** ‖Lumps of mucus from choanæ, in evening, having a nauseous taste.
‖Tough viscous mucus in fauces and throat.
Hawks up mucus of a sweetish taste.
‖Jerking pains from throat towards eustachian tube.
‖Sensation of fulness, soreness and coldness behind palate.
Drawing pain in l. side of throat, > by cold air.
Raw feeling in fauces, with tickling in region of epiglottis, first on l, then on r. side.
‖Soreness and dryness of throat. θInfluenza.
‖Pain in throat below larynx, as after swallowing too large a mouthful, or as if swollen; pain extends every little while into r. ear; whole afternoon, coming on at midday.
‖A constrictive pain in forepart of throat, low down in region of os hyoides, later low down posteriorly on r. side.
In throat and orifice of eustachian tube, chilling or burning twitching and gnawing, not painful.
A sense of nausea extending into throat.
‖Sensation as of a ball or lump in throat.
In pharynx feeling as if food remained stuck behind breast bone.

Digitized by Google

Heat low in pharynx, extending into stomach.
‖Numb feeling in posterior wall of pharynx.
Throat aches, as after taking cold.
‖Coldness in pharynx.
Dryness in throat.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Canine hunger, or loss of appetite. θPertussis. θCoryza.
‖Less appetite and increased thirst.
‖Violent thirst, with a severe cold, frequent sneezing, running of tears, pain in forehead, acrid discharge from l. nostril, hacking cough on inspiring cold air.
‖Thirst. θPertussis.
‖Desire for raw onions. θPneumonia. θYellow fever.

[15] **Eating and Drinking.** ‖Bad effects from eating spoiled fish.
‖After each meal a prickling sweat on bald vertex.
‖Stomach weak, cannot bear anything but raw onions. θYellow fever.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.
‖Sour eructations.
‖Belching, with rumbling in and puffing up of abdomen.
‖Belching, with fever heat.
‖Nausea, squeamishness, comes from stomach up throat into fauces, more when rising.
‖Nausea forced up throat, like a thrust.
Horrible deathly nausea in stomach, with slight eructations, which relieve somewhat, after eating.

[17] **Scrobiculum and Stomach.** Pain below sternum.
Pressure in epigastrium.
‖Pressure in stomach, with gaping.
‖Feels a pressure on cardia from behind.
‖Stomach feels empty, weak.
‖Pain below sternum to right, in region of pylorus.

[18] **Hypochondria.** ‖Pressure in region of liver, with crawls along back, and coldness.
‖Pains begin in hepatic region and spread over abdomen. θColic.
Stitches in l. side, > on lying.
‖Contracting sensation in spleen, with stitches while lying.

[19] **Abdomen.** ‖Colicky pain in region of navel, < on sitting, > when walking.
‖Wind colic. θPertussis.
‖Cutting in belly, like a thread, towards centre.
Colic: from catching cold by getting feet wet; ‖after eating too much; after eating cucumbers, salad, etc.; hemorrhoidal; of children.
‖Severe pains in abdomen. θPertussis.

Digitized by Google

▮Colicky pains, beginning in hepatic region and spreading over whole abdomen, worse around navel; < when sitting; > when moving about and by passing flatus.
▮Violent pain in hypogastrium, to left, with urging to urinate; burning micturition. θIncarcerated hernia.
▮Stitches in loins.
▮Deep in pelvis on a small spot to right, violent pressure and cutting as with small knives.
Flashes of heat in abdomen.
▮Abdomen puffed up, with rumbling, more to left; ineffectual urging to stool, with heat, some pains, difficult breathing, and inconvenience of clothing; > after wind passes freely.
▮Abdomen distended, dull in head, urging to stool ends with diarrhœa.
Rumbling in bowels, with stomachache, after breakfast.
▮Violent cutting pain in l. lower abdomen, with frequent desire to micturate, and burning micturition.
Heat in abdomen, with pain.
Ascites.
▮▮Annoying pains over middle of groin.
▮Pressure in l. inguinal ring.
▮Hernia in l. groin much protruded and strangulated; very severe pains from high up in l. side of hypochondrium drew towards incarcerated hernia; very restless; much fever, etc.
Periodic pains in pubic region, < on sitting.

20 **Stool and Rectum.** ▮▮Flatus very offensive, and moist; mornings.
▮Bowels loose, after midnight, or towards morning, with offensive flatus. θPertussis.
Odorless masses of wind.
Urging to stool, with rumbling in bowels, but nothing passes.
▮Constipation, following intermittents treated by quinine.
▮Difficult passing of feces; passage interrupted.
▮Urging without a passage, but stitches in rectum.
Contraction, cutting, tearing pain at anus during stool, with irritation of hemorrhoids.
▮Hemorrhoidal pains.
A very painful stitch extends along rectum downward.
▮Tearing jerks in anus: also biting and crawling.
In anus, and protruding hemorrhoids, a cold creeping, like a worm, more on l. side.
▮Itching at anus. θWorms.
▮Rhagades in anus.
Blood passes with stool.

21 **Urinary Organs.** ▮Pains in renal region and pressure in region of bladder. θPertussis.

Digitized by Google

Region of bladder very sensitive, child screams if hand is placed there.
In bladder a burning pressure, afterwards in sacrum; pain in region of kidneys, more l. side; pain in groins.
Pressing and other pains in region of bladder.
Sensation of weakness and warmth in bladder and urethra.
Frequent urinating; with burning in urethra; urine very red; all day, still oftener evenings; especially with shuddering and chilliness.
Spasmodic strangury after getting feet and bowels cold.
Dribbling or spurting of urine, in old people.
Urine frothy and iridescent.
In albuminuria it diminished urging for frequent urination and also the quantity of albumen in urine.
Polyuria.
Increased secretion of urine. θCoryza. θCatarrh. θParalysis.
Urine: frothy and clear; red; reddish-yellow, with sandy sediment.

[23] **Male Sexual Organs.** Increased sexual desire.
Erections, with painful tension, without sexual desire, in morning.
After coitus pain in bladder and prostate gland.
Weakness in hips interferes with coition.
Drawing in spermatic cords.
Pain from inguinal ring along spermatic cord.
Burning on glans penis and in urethra.
Pressive pains in bladder and prostate.
Pain in pubic region.

[23] **Female Sexual Organs.** Pain in uterine region.
During menses, headache ceases and returns when they disappear.
Amenorrhœa.

[24] **Pregnancy. Parturition. Lactation.** In childbed, panaritia on several fingers, with red streaks up arm; pains driving to despair.
After forceps delivery, swelling of whole lower limb, exceedingly painful, mostly in thigh.

[25] **Voice and Larynx. Trachea and Bronchia.** Tickling in epiglottis.
Catarrhal hoarseness. θPertussis.
Pain as if larynx would be torn when coughing. θCoryza.
Tickling in larynx, with hoarseness.
Tickling in throat, with aching in larynx. θPertussis.
Throbbing in larynx, and sensation as if it contracted.
Constant inclination to hack in order to relieve tickling in larynx.

Digitized by Google

‖‖Violent catarrhal laryngitis; hoarse cough seemed to split and tear larynx, causes watering of eyes, etc.
‖Acute bronchitis, going from l. to right.

[26] **Respiration.** ‖Oppressed breathing: from pressure in middle of chest; < in evening; in ascites. θPertussis.
‖Hacking and worrying till he cannot breathe. θCoryza.
‖He must take a long breath, and then sneezes correspondingly.
‖‖On inspiring cold air, hacking cough.
On deep inspiration, sticking in l. side.

[27] **Cough.** ‖‖Laryngeal cough, frequently repeated. θCoryza.
‖‖Severe laryngeal cough, which compels patient to grasp larynx; feels as if cough would tear it. θCoryza.
‖Hoarse, harsh, ringing, spasmodic cough; excited by constant tickling in larynx; cough produces a raw, splitting pain in larynx, so acute and so severe as to compel patient to crouch from suffering, and to make every effort to suppress cough. θPertussis.
‖Frequent cough, tension in upper part of chest, loss of appetite; < every evening.
‖Cough, with fulness in head, especially in occiput, with heat, copious fluent acrid coryza and profuse bland lachrymation. θWhooping cough.
‖Cough increases in evening.
‖Cough brought on by inhaling cold air.
‖Hacking cough from inhaling cold air.
‖Constant inclination to hack in order to relieve tickling in larynx.
‖Spasmodic cough simulating croup.

[28] **Inner Chest and Lungs.** Pain in chest as though food had lodged behind sternum.
‖Stitches, with burning, in middle of l. side of chest, when taking a deep breath.
‖Pains here and there flitting through chest.
‖‖Pressure in upper middle part of chest makes respiration difficult.
‖Tension in upper part of chest, with coryza and cough.
‖Rattling in chest.
‖Tough mucus from chest.
‖Epidemics of autumnal influenza.
‖Incipient pneumonia in children.

[29] **Heart, Pulse and Circulation.** ‖Pulse more frequent and full; or, slow and hard.
‖Pulse full and accelerated.

[31] **Neck and Back.** ‖Intense pain in cervical spine. θInfluenza.
Pain a hand-breadth below r. shoulder, more towards spine, after long sitting.

Digitized by Google

Right shoulder blade painful on lying in bed.
‖Crawls in back; after sitting, pain under r. shoulder blade.
Stitches in lumbar region.
‖Pain in small of back, if bowels did not move.
Burning pressure in small of back.
Shiverings in back.
‖Chills run up back. θPertussis.
‖Chilly crawls run down back, most at night, more frequent urination, followed by heat and thirst.
‖Rigidity of spinal column in periodic attacks, accompanied by pain through whole chest.

[21] **Upper Limbs.** ‖Sweat in axilla.
‖Pain in r. shoulder blade, when lying in bed.
Pain under r. shoulder, in belly and pubic region.
Stitch runs through r. arm, from shoulder blade to elbow, with burning pain.
Pains from a blow in r. elbow joint.
‖Numbness in l. elbow, < on slight motion.
Needle-stitches in arms.
‖Pain in arms, more l. forearm.
Weak sensation, especially in arms.
Pain in middle of l. radius, < writing, > from rubbing.
‖Lame sensation in all joints of arm.
Pain on r. wrist, on back and extensor side, evenings.
‖Hands red and dry, as if he had been in the cold.
Pain in l. middle finger, and in r. fourth and fifth fingers.
‖Sweat in palms of hands.
‖Trembling of r. hand, he can hardly write.
Whitlow, on margin of skin around finger nails, inflamed and suppurating, pains up whole arm.
Voluptuous, corrosive itching, especially on palmar side of l. thumb, from first to second phalanx, in evening.
‖Panaritium.
‖Suppuration, after a prick with a needle, under l. thumb nail; a red streak up to elbow, where a lump the size of a hazelnut is formed.

[22] **Lower Limbs.** ‖Weakness of hips. θPertussis. θInterfering with coitus.
Excessive tired feeling in region of hips, in evening, on rising from sitting, and on walking.
‖Nettlerash on thighs.
Bruised feeling in l. thigh, near knee.
Pain, almost burning pressure, in upper part of l. thigh, towards outer side.
Pain on outer side of r. thigh, above knee.
Glowing sensation on outer side and upper part of both thighs.
‖Pain above knees.

Digitized by Google

Shooting pains in l. leg and r. foot.
Stitches in r. knee, from within.
‖Lameness in knee.
Paralytic pains in knee joint.
Burning pressure in middle of l. lower leg, then on right.
‖Pains in ankle joint.
‖‖Sore and raw spots on feet, especially heel, from friction.
Painful twitching on inner side of l. heel.
‖‖Pain in most external soft parts of r. great toe, and also in l. middle finger.
‖Brittle hoofs and losing hair, with horses (tinct. in water).

[31] **Limbs in General.** ‖Soreness in limbs and aching in all bones, as after taking a cold. θCoryza.
‖Tired feeling in all limbs.
Weak sensation in limbs after flatulent troubles.
‖Neuralgia of stump (after amputation), violent burning stinging pains.

[35] **Rest. Position. Motion.** In lying: increased earache, toothache, splenic pain.
Lying: stitches in spleen; in bed, pain in shoulder blade.
Sitting: < colic in region of navel and hepatic region; < periodic pains in pubic region.
Rising: vertigo; > toothache.
Walking: > colic in region of navel.
Motion: of eyelids, pain in temple; > colic.

[36] **Nerves.** ‖Weak and tired, has to lie down.
Deathly faintness after profuse micturition.
‖Lassitude. θPertussis.
‖Traumatic chronic neuritis; pains violent and wearing out the patient.
Neuroma.

[37] **Sleep.** ‖Yawning: with headache and cramp in stomach; with sleepiness; near objects seem distant.
‖Gaping in deep sleep.
‖Restless sleep, drowsy in morning.
‖At evening, walking in street, increased dropping from nose, from both nostrils, without sensation of coryza.
‖Wakes nights at 2 A.M., with excited pulse; cannot sleep again till morning; without any chill, only heat without any thirst; disappears mornings, but is < again for a few hours after breakfast, afterwards much prostrated.
‖Dreams: of being near the water; of battles, fights, precipices and deep wells; of storms at sea, high waves; annoying, in convalescents.

[38] **Time.** 2 A.M.: awakes; heat without thirst.
Morning: apathetic, restless, drowsy; violent sneezing; pressive pain in root of eye tooth >; tongue dirty,

slimy, furred; offensive flatus; bowels loose; erections; cannot sleep till morning.

In afternoon: confused and absentminded.

‖Worse in afternoon and evening; when lying down. θPertussis.

Evening: dulness, pressure in head <; stitches l. forehead into ear; lachrymation; fluent coryza <; face hot; raises lumps of mucus from choanæ; frequent urination; pain in r. wrist; pain in fingers; dropping from nose.

In evening: after drinking beer and eating herring, excessive thirst; heat and severe coryza, with much lachrymation, headache, acrid, burning discharge from nose, so that upper lip became red and sensitive.

[39] **Temperature and Weather.** ‖Colds and toothache after damp cold wind and weather.

‖Bad effects from getting feet wet.

Warm room: < dulness, pressure, heaviness, < constant sneezing; < fluent coryza; < toothache.

‖Patient likes to wash himself frequently and is fond of being in open air. θToothache.

Cold water: > toothache.

Open air: > dulness, pressure, heaviness in head; > fluent coryza; > toothache.

Cold air: > drawing pain in l. cheek and throat; toothache; hacking cough.

Spring: coryza.

August: hay fever.

Autumnal epidemics of spasmodic cough.

[40] **Fever.** ‖Coldness alternates with heat. θCatarrh.

‖Chills, followed by fever. θInfluenza.

‖Heat in head, on head, in brows, in face, in cheeks, in throat down to stomach and bowels.

‖Heat with coryza, alternating with cold and flitting heat over whole body and thirst; evenings.

‖Attacks of flushes of heat. θCoryza.

‖Heat and thirst, with rumbling in belly. θCoryza.

‖Heat, without thirst, 2 A.M., passes off by morning, < again after breakfast.

‖Heat. θPertussis.

‖Sweats easily and copiously.

‖Yellow fever.

[41] **Attacks, Periodicity.** Periodic pain: in pubic region.

In Spring: coryza.

Every year in August: morning coryza; hay fever.

In Autumn: epidemics of spasmodic cough.

[42] **Locality and Direction.** Downward and inward: headache.

Digitized by Google

Right to left in upper half of body, left to right, in lower part, in provings.

Commencing l. side, going to right. θCoryza. θColds.

First l., then r.: nostril, acrid discharge; toothache; acute bronchitis.

Left: eye itches and is more sensitive to light and weeps more; pains deep in brow; forehead, stitches; tingling pain behind mastoid; itching in supraorbital region; heat in eyebrow; roaring in ear; ear, hard swelling; drawing in cheek, going to eye; forehead down to teeth, drawing stitches; face, paralysis; toothache; first upper teeth sensitive; pressive pain at root of eye tooth; drawing stitches in forehead; drawing pain in throat; raw feeling in fauces; stitches in hypochondria; violent cutting in lower abdomen; inguinal pressure; hernia; protruding hemorrhoids; pain in kidneys; sticking in lung on deep inspiration; elbow, numbness; pain in forearm; pain in fingers; thumb, itching; thumb nail, suppuration; bruised feeling in knee; thigh, pain; pain in leg; burning in lower leg; painful twitching in heel; pain in middle finger.

Right: pain in temple; pain over eye; shooting pain in lachrymal duct; thread pain over eye; chilling or burning-twitching in region of eustachian tube; pain in root of nose; nostril, crawling; cheek, warm spots; pressure in back teeth; first upper teeth sensitive; dryness of root of tongue; pain in ear; pain below shoulder; stitches from shoulder blade to elbow; pains in wrist; pain in fingers; hand, trembling; pain in thigh; pain in foot; knee, stitches; pain in great toe; pricking in arm.

[43] **Sensations.** As if swollen and heavy on crown; as if whole head was wrapped up in warm water; as if eye was hanging by a string or torn; as if teeth were too long; as of a ball or lump in throat; as if larynx would be torn when coughing; as though food had lodged behind sternum; as of a large, aching lump on root of tongue; mouth and tongue as if scalded.

Severe pains: in abdomen.

An intense pain: in cervical spine.

Neuralgic pains, like threads: in face, head, neck and elsewhere; < evenings; towards ear from deep within head.

Splitting pain: in larynx.

Cutting: in belly, like a thread; in anus; deep in pelvis; in lower abdomen.

Stitches: as of needles in forehead; in eyebrows; in eyes; in ears; in upper jaw; towards ear from forehead; in rectum; in l. hypochondrium; in lumbar region; runs

through arm; in skin; in l. side; in loins; in arms; in r. knee.
Sticking: in l. chest on inspiration.
Stinging: of eye
Shooting: in l. leg and r. foot; in r. lachrymal duct.
Tearing jerks: in anus.
Tingling pain: behind l. mastoid process.
Jerking: from throat to eustachian tube; in molars.
Tearing: in anus.
Pecking: behind r. ear.
Burning-stinging: in stump after amputation.
Drawing: into upper jaw; in teeth; in spermatic cords; in head; in occiput; from l. eye into cheek; in l. side of throat.
Pressure: in head; in teeth; in epigastrium; in stomach; in region of liver; in pelvis; in l. inguinal region; in region of bladder; l. thigh; on cardia.
Soreness: behind palate; in limbs; of throat.
Raw feeling: in fauces.
Smarting: of eyes; of upper lids; above palate.
Scalded: mouth and tongue.
Biting: of eyes; in anus.
Gnawing: in orifice of eustachian tube; eyelids; nose; mouth; lips.
Burning: of eyes; taste; orifice of eustachian tube; throat; in edges of nose and lips; in urethra; in bladder; on glans penis; small of back; l. thigh; skin.
Burning twitching: in region of r. eustachian tube.
Paralytic pain: in knee joint.
Colicky pains: in region of navel.
Painful twitching: on inner l. heel.
Tired feeling: in limbs.
Bruised feeling: in knee; of thigh.
Aching: on root of tongue: roof of mouth; eustachian orifice; through body; in joints; in bones; in forehead and head; in temples; in cervical spine; over r. eye; in larynx.
Undefined pain: behind ears deep in head; under tongue; in forehead; in throat; below sternum; in hepatic region; in abdomen; over middle of groin; violent, in hypogastrium; inguinal ring; uterine region; small of back; l. thigh; r. wrist; above knees; over r. eye to root of nose; in renal region; region of kidneys; in bladder and prostate gland; in chest; in r. shoulder blade; in r. elbow joint; in arms; in l. radius; in fingers; in ankle joints; in great toe.
Fulness: in head; behind palate.
Heaviness: in head; in occiput.

Throbbing: in larynx.
Empty: stomach feels.
Tension: in upper part of chest.
Tightness: at root of nose.
Constrictive: as if head was bound up; at root of nose; pain in throat.
Contraction: in spleen; at anus.
Tickling: in larynx; in epiglottis.
Itching: of eyes; in supraorbital region; at anus; in r. nostril; of thumb.
Electric shock: through head.
Numbness: in bones of skull; in posterior wall of pharynx; in l. elbow.
Lame sensation: in all joints of arms; in knee.
Crawls: in r. nostril; along back; in anus.
Coldness: behind palate; in back; in pharynx.
Chilling: orifice of eustachian tube.
Warmth: of urethra; in bladder.
Glowing: on thighs.
Heat: without thirst; in head; with coryza; in pharynx and œsophagus; in flashes in abdomen; in l. eyebrow.
Dryness: in mouth; above palate; in throat; of anterior nares; at root of tongue.

[44] **Tissues.** All joints ache.
Nephritis.
‖Inflammations and increased secretion of mucous membranes. θCoryza. θPertussis.
‖Gangræna senilis, woman, æt. 80 (externally as a salve).
‖Phlegmasia alba dolens, after instrumental delivery.
Dropsy.
‖Brittle hoofs and falling out of hair, in horses.

[45] **Touch. Passive Motion. Injuries.** Picking or sucking teeth: > toothache.
Touch: eyes sensitive to.
Rubbing: wants to rub eyes.
Pressure: < pain in swelling under l. ear.
Must grasp larynx.
‖Traumatic neuritis, pains violent and continuous, wearing out the patient.
‖After hurts and lesions, stiffness in back and periodic attacks, trismus and pain in chest.
Hurts do not heal.

[46] **Skin.** ‖Pricking, like from pins or needles, in skin, especially on head, on forehead, in brows, on throat and on r. arm.
‖Redness and itching of skin.
‖Nettlerash on thighs.
‖Measles, with strongly marked catarrhal symptoms.

Digitized by Google

‖Scarlatina, with characteristic running from nose and urinary symptoms.

[47] **Stages of Life, Constitution.** ‖Children. θCoryza. θPertussis. θPneumonia.

Woman, æt. 80; senile gangrene.

An old woman; whitlow.

[48] **Relations.** Antidoted by: *Arnic.* (toothache), *Chamom.* (bellyache), *Nux vom.* (coryza, recurring yearly in August; unpleasant sensations caused by handling peaches and some blossoming trees and plants; hay fever), *Veratr.* (colic with despondency), *Thuya* (offensive breath and diarrhœa after eating onions).

Roasted coffee will remove onion breath.

Compatible: before *Calc. ostr.* and *Silic.* in polypus.

Incompatible: *All. sct., Aloes, Scilla.*

Complementary: *Phosphor., Pulsat., Sarsap., Thuya.*

Compare: *Acon., Chlorine, Ipec.*

CETRARIA ISLANDICA.

Iceland Moss. *Lichenes.*

The well-known Iceland moss, growing in large quantities in Alaska, recommended to the Old School since 1674 by Olaf Borrichius, Hiaren and others, is prepared by decoction.

Hahnemann calls it, in Lesser Writings, translated by Dudgeon, p. 257, in comparison with the woody sexatilis, the powerful Iceland moss, and in his Apothecary's Dictionary, 1795, a work full of valuable hints, vol. ii, p. 450, he notices what is inserted in the following, marked ⁝. Dr. Theodore Rückert, our veteran, published a number of valuable cured symptoms, and introduced it in this way into our Materia Medica (Allg. Hom. Ztg., vol. iv, p. 179, 1834); his careful observations are marked ‖. Provings by intelligent persons are desirable.

[10] **Teeth and Gums.** ⁝Scurvy.

[11] **Taste and Tongue.** ‖Very bitter and slimy taste.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Increased the appetite (if not boiled too long).

[15] **Eating and Drinking.** ‖Feels full and satisfied after eating a little. θPhthisis.

[16] **Hiccough, Belching, Nausea and Vomiting.** ⁝Habitual vomiting.

In large doses it sometimes causes nausea.

[17] **Scrobiculum and Stomach.** ‖The bitterness seems generally to agree with stomach.

Digitized by Google

| | Strengthens digestive power and is very nutritive.
| Pressure in stomach, from large doses.
▮ Constricted feeling above scrobiculum, and distension; also felt in back. θPhthisis.

[20] **Stool and Rectum.** ⋮ Diarrhœa from acridity.
| It seems to open the bowels with some of the sick, more than it is wished for.
| | Rarely diarrhœa.
⋮ Chronic diarrhœa.
▮ After using it, the first formed stool and not offensive. θDiarrhœa of consumptive.

[21] **Urinary Organs.** ⋮ Ulcerated kidneys.

[23] **Female Sexual Organs.** ⋮ Ulcers of uterus.

[24] **Pregnancy. Parturition. Lactation.** | | It makes the milk of the nursing bitter.

[25] **Voice and Larynx. Trachea and Bronchia.** ⋮ Very frequent catarrhs.
⋮ Chronic catarrhs of bronchial mucous membrane.
▮ Tickling and spasmodic feeling in windpipe, on waking. θPhthisis.

[26] **Respiration.** ▮ Shortness of breath, weakness, has to stop to get breath when walking out-doors. θPhthisis.
▮ Râles. θPhthisis.

[27] **Cough.** ⋮ Tickling cough after feverish eruptive diseases.
⋮ Spitting of blood, and of pus.
⋮ Little cough of an asthenic character.
⋮ Whooping cough.
⋮ All kinds of bloody expectoration.
▮ Violent cough, beginning at breakfast and lasting several hours, with copious expectoration. θPhthisis.
▮ Violent spells of coughing during the day, none at night. θPhthisis.
▮ Copious, thick, yellow, lumpy expectoration. θPhthisis.
▮ Expectoration has a rotten taste and smell, which nauseates her. θPhthisis.

[28] **Inner Chest and Lungs.** Soreness in chest from coughing. θPhthisis.
▮ Consumptives.
⋮ Pituitous consumption.
⋮ In every case of weak lungs.
⋮ Purulent consumption.
| | Pain in chest.

[30] **Outer Chest.** ▮ Oppression of chest, particularly with morning cough. θPhthisis.

[35] **Rest. Position. Motion.** Walking out-doors: has to stop to take breath.

[38] **Time.** Towards morning: sweat.
In forenoon: chill.

Digitized by Google

In afternoon: fever.
During day: violent spells of coughing.

[40] **Fever.** ¦Putrid fevers.
¦Intermittent fevers.
¦Chill in forenoon, fever in afternoon. θPhthisis.
¦Sweat towards morning, with weakness. θPhthisis.

[43] **Sensations.** Pressure: in stomach.
Soreness: in chest.
Constriction: above scrobiculum; in back.
Tickling: in windpipe.

[44] **Tissues.** ¦Emaciated people.
¦Scrofulous emaciation.
¦Atrophy, depending on suppurative processes.

[45] **Relations.** ¦Poisoning by metallic vapors.
¦Poisoning by acrid substances.

CHAMOMILLA.

Matricaria Chamomilla. *Compositæ.*

Tincture prepared from the fresh plant when in flower; the flowers contain active principles which combine the properties of bitters and etheral oils. The plant is a native of Europe, but is occasionally cultivated in our gardens; the leaves and flowers are small, thus differing from the Anthemis nobilis, or Roman chamomile; it must not be confounded with the Anthemis cotula, or wild chamomile, growing abundantly by the wayside and in waste places in this country. A decoction of the plant in the shape of tea is much used, and abused, as a domestic medicine, particularly in Germany. Hahnemann classed Chamomilla with the polychrests. Two hundred and seventy-two symptoms observed by himself, and three by other authors, were published in his Fragmenta, and in vol. iii of his Materia Medica Pura, second edition, these had increased to four hundred and sixty-one, besides containing thirty additional symptoms observed by Stapf. For later provings of the drug, see Allen's Encyclopedia, vol. iii. Clinical observations are found scattered through our entire literature, there probably not being a physician in our ranks who has not tested the virtue of Chamomilla in either high or low preparations. Among the contributors to *Chamomilla*, we refer to:

Hoffmann, H. H., Post Partum Hemorrhage, Trans. Hom. Soc. of Pa., 2, p. 433; Van Cutsem, Mental Symptoms the result of Poisoning, Rev. Hom., p. 100, Raue's Record, 1875, marked t; Norton, Geo. J., Pustular Ophthalmia, Trans. N. Y. S, 1874, I, p. 419; Groes, W., Eclampsia, Archives, p. 104, and Intermittent, Archives 3, p. 52; Schubert, Ad., Archives, 1, 3, p. 158; Rummel, Fr., Intermittent, Archives, 8, 1, p. 34; Knemerer, etc., see A. H. Z., 83, p. 149.

[1] **Mind.** ¦Child lies senseless, completely without consciousness; frequent changes in face, distortion of eyes, contraction of facial muscles, rattling in chest, with much cough; it yawns and stretches very much.

Digitized by Google

Insensibility.
Absence of mind.
When writing or speaking, he omits whole words.
Dulness.
A joyless dulness of senses, with sleepiness, without, however, being able to sleep.
Dulness of senses, diminished power of comprehension.
Confusion of head, with transient painful pressure on eyes, in afternoon.
Imbecility.
Imagines he hears voices of absent persons, at night, cannot compose himself to sleep.
Ecstasies and delirium.
Tries to get away from her friends if they seek to comfort her.
Child cries; quiet only when carried.
Utters sudden, startling and piercing cries on waking out of sleep, vows there is some dreadful beast under his bed or in the room, and will not be appeased until the gas is lit and the room is searched; a boy, æt. 4. θNightmare.
Piteous moaning of child because he cannot have what he wants.
Moaning on account of a very trifling offence, which had happened a long time ago.
Whining restlessness; the child wants this and that, which, when offered, is refused or pushed away.
Involuntary moaning, with heat of face.
He tosses about the bed, with febrile heat and redness of cheeks, and talks confusedly, with open eyes.
Tosses anxiously about bed at night, full of fancies.
Child becomes stiff and bends itself backward, kicks with its feet when carried, screams immoderately, and throws everything off.
Averse to talking, short and snappish.
Disinclined to talk, is angry if anyone speaks to her.
Introversion, she cannot be induced to say a word.
Cannot endure being spoken to, or interrupted while speaking, especially after rising from sleep.
Child does not wish to be touched.
Patient cannot bear any one near him, and answers snappishly.
Cannot bear music.
Sadness.
Melancholia, with constant moaning and muttering to herself, walks all the time with downcast eyes.
Hopelessness.
Very anxious; everything she undertakes is very unsat-

Digitized by Google

isfactory; she is irresolute, with flushes of heat in face, and cool sweat in palms.
‖Attacks of anxiety.
‖Full of anxiety, with great uneasiness.
‖Anxiety with ineffectual urging to urinate, without much urine in bladder.
‖Thoughts of dying.
Indifference.
‖‖Peevish disposition, nothing pleases.
‖‖Peevish about everything, with dyspnœa.
‖Quarrelsome.
‖‖Peevishness; she seeks a cause for being peevish at everything; can't return a civil answer.
‖Fretful, and easily irritated.
‖Fretful, out of humor and obstinate, even to quarrelling, on appearance of menses.
‖Morose fretfulness; everything that another does is wrong; no one does anything to please him.
‖He frets internally about every trifle.
‖‖Very irritable and fretful; child must be carried.
‖Very irritable; moaning and groaning.
‖‖Irritable, impatient mood.
‖Great impatience, everything seems to go too slowly.
‖She is sleepless and cross.
‖Ill-humored and irritable, the whole day.
‖She is always out of humor, particularly at her menstrual periods, when she is headstrong even unto quarrelling.
Not applicable to persons patient under influence of pain.
‖The pains are very distressing, she feels that she can hardly bear them; she wishes to get away from herself. θLabor.
‖In all her sufferings there is a vein of ill humor; she can hardly speak pleasantly; feels like scolding about everything; she often gives vent to her ill humor in spite of all restraint.
‖She becomes almost furious about the pain; she cannot bear her clothes to touch the part affected.
‖‖Easily chagrined or excited to anger.
Insulting, cross and uncivil in temper.
Great tendency to quarrel, to speak in an obstreperous manner.
‖Obstinacy.
Mistrust.
‖‖The child can only be quieted by carrying it on the arm.
‖Great restlessness and anxiety.
‖Restless and impatient, with fever.
‖‖Excessive uneasiness, anxiety, agonizing tossing about, with tearing pains in abdomen.

Digitized by Google

Great restlessness and inward chilliness.

Oversensitiveness to pain, which seems unbearable and drives to despair.

All bad effects following anger. θConvulsions. θChill. θFever. θBilious complaints.

Jerking and twitching in its sleep, or the nurse may have had a fit of anger which causes the convulsions in the child.

Bad effects of having feelings wounded.

[2] **Sensorium.** Dulness of senses, with sleepiness, yet cannot sleep.

Vertigo: with vanishing of thoughts; after eating; after drinking coffee; staggering, in morning on rising from bed; with fainting; with dimness of sight, when sitting up in bed; in bed, with nausea; when stooping; on rising after sitting; while sitting erect; when talking.

[3] **Inner Head.** Heaviness, dulness, pressure, constriction, or burning in forehead.

Tearing headache in forehead, with sensation as if a lump was falling forward, while sitting, or turning over in bed.

Recurrent, paroxysmal, tearing headache in forehead.

Sticking-tearing headache in forehead, which extends into chest.

Jerking headache in forehead, especially after eating.

Pressive pain in both temples, like from strong pressure with thumbs, forenoon.

Pressure, extending from vertex to forehead and temples; < when thinking of it, from sudden stooping, or from mental exertion.

Pressing headache as from a stone in forehead, hot head, < evenings.

Headache, especially in temples; a pressure as from firm pressure with fingers.

Tearing pain in temples.

Tearing and stinging pain in l. side, particularly in temple, and in and around eye.

Stitches in temples.

Tearing headache, with heaviness of head, < about noon, after vexation, or an error in diet.

Violent stinging pains in l. side of head, from occiput to upper jaw, after vexation.

Pressure increasing and decreasing, especially in r. half of forehead and in r. temple, where are also felt very frequent dull stitches, which sometimes extend to occiput like electric sparks.

Pressing and burrowing headache, especially in forehead and temples.

Digitized by Google

‖Tearing and sticking, extending outward to temples.
‖Wandering pains in temples, frequently recurring, and always < at beginning.
‖Pressure and pressing from vertex extending over forehead and temples, < as soon as attention was directed to it, and by sudden stooping, or by mental exertion, as when reflecting or even reading.
‖‖Throbbing headache.
‖Stitches through head, from hard palate to vertex.
‖Headache like needle-stitches, as if eyes would fall out of head.
‖‖Transient attacks of throbbing in one-half of brain.
‖‖One-sided drawing headache.
‖Sensation of compression of brain, or as from constriction of meninges.
Heaviness in head: with dulness; with pain in temples; particularly in occiput on waking in morning; with drawing forward of head; with bruised sensation.
Confusion of head: with disinclination for mental work; with inclination to bend it backward; with sticking and boring, especially in r. temple, in morning; with pressure in paroxysms, during afternoon, particularly on waking.
‖‖Congestion to head: following anger; with pressure while lying down; on vertex; with heat in face and oppression of chest; with stitches in head and chest.
Pain in head, as if it would burst, on waking from sleep.
She has intense headache on top of head, as from pressure from within, and feeling as if top of head was blown off; t.
Sensation of fulness and heat in head.
Headache: felt even during sleep; in morning in bed; with vertigo; after eating; at night.
‖‖Megrim.

⁴ **Outer Head.** ‖Swelling of temples, with painfulness to touch.
‖Rheumatic pain in head. θDysentery.
‖Inclined to bend head backward.
‖Moves her head backward and forward.
‖‖Warm sweat on head, wetting hair.
‖Hot, sticky sweat covering forehead and hairy scalp.
‖Feeling as if hair stood on end, with shivering. θGastro-bilious fever.

⁵ **Sight and Eyes.** Staring eyes.
Aversion to light.
‖Intense photophobia, least light unbearable. θOphthalmia scrofulosa.
‖Flickering before eyes: she could not see where she was; when lying down.

Digitized by Google

Eyes dim and weak in morning; by candlelight it seemed as if rays of light passed from eyes to flame.
Obscuration of vision laterally, when fixing vision upon a white object.
Dimsightedness: with vertigo, when sitting up in bed; with chilliness.
Great burning and heat in eyes.
Severe stitches in eyes.
Sensation as if eyeball was drawn tightly backward.
‖Inflammation of eyes, lids agglutinated in morning; discharge of blood from eyes; inflammation caused by exposure to cold, damp atmosphere, or < by every cold change of weather.
‖‖Eyes swollen in morning; agglutinated with purulent mucus.
‖Yellow conjunctiva.
‖Conjunctivis, in infants.
‖Pustules on cornea, with considerable vascularity, profuse lachrymation, not much photophobia, child thirsty and peevish. θDentition.
‖Keratitis pustulosa, with considerable photophobia, moist eruption on face and head, child very cross.
‖Great dryness of edges of eyelids, or copious mucous secretion.
‖Profuse acrid discharge from eyes and nose. θOphthalmia scrofulosa.
Spasmodic closure or great heaviness of lids.
Pressive pain beneath upper lid, on moving eyes and shaking head.
Lids agglutinated after sleep.
Great dryness in Meibomean glands on margin of lids.
Great swelling and bluish redness of eyelids, first l. then r., so that child cannot open them.
On pressing lids apart, conjunctiva appears swollen and dark red.
Inner surface of lids, as well as ball of eye, covered with much, partly yellow purulent mucus, partly with bloody fluid.
Least pressure causes pure blood and large quantity of muco-pus to issue from between lids.
At canthi and along border of lids dried muco-pus.
‖Swelling and bluish redness of skin, with running of pure blood from eye.
‖Soreness of canthi.
‖Corners of eyes are filled with purulent matter, in morning.
‖Stitches in orbital region.
‖‖Violent pressure in orbital region; sensation in eyeball,

Google

as if it was tightly compressed from all sides, with momentary obstruction of vision.

‖Eyes protrude and rotate constantly in their orbits. θTetanic convulsions after measles.

‖Ophthalmia neonatorum; diarrhœic stools, chafing of genitals, flabbiness of muscles, rash, restless sleep; child wants to be carried.

‖Catarrhal and scrofulous ophthalmia in cross, peevish children during dentition.

Arthritic ophthalmia, first stage.

[8] **Hearing and Ears.** ‖Great sensitiveness to noise, especially to music. θOtalgia.

‖Illusions of hearing, at night, as though voices of absent persons were heard.

‖‖Roaring in ears, as from rushing water.

‖Ringing in ears. θPost-partum hemorrhage.

She cannot endure music.

Sensation as if ears were stopped.

Sensation as if hot water was running out of r. ear.

Dull pressure as from a blow in inner ear, on stooping.

Sharp stitches in r. meatus.

‖‖Single large stitches in ear, especially when stooping, with ill humor and peevishness about trifles.

Stitches extending into inner ear from lower jaw.

‖Frequent stitches and sudden, transient spasmodic sensation in front of r. ear, in region of tragus; this sensation sometimes extended into auditory canal.

‖Stitches in ear, especially when stooping.

‖Occasional tearing in l. ear. θHemicrania.

‖‖Pressing earache in spells, with tearing pain, extorting cries.

‖Otalgia: with hot, perspiring forehead; lancinations or tensive drawing pains extending to lobes of ears.

‖Moist earwax, or scarcity of earwax, resulting in dryness.

‖Acute inflammation of middle ear, when patient is prostrated by and intolerant of shooting, drawing pains; auricle usually hot and red; meatus red, but not swollen; membrana tympani not much congested.

‖Right ear red and painful. θIntermittent fever.

Dull stitches in r. mastoid process.

‖‖Particularly sensitive to open air about ears.

‖Swelling of parotid gland.

[9] **Smell and Nose.** ‖Extremely sensitive to all odors.

‖Nosebleed, relieving confusion of head.

‖Bleeding, coagulated or dark blood. θEpistaxis.

‖Irritation to sneeze, with crawling, dry heat and stopped up sensation in nose; feeling as if coryza would appear; also with pressure in forehead.

Digitized by Google

‖Coryza: fluent, watery; viscid; acrid; with loss of smell; with dry hacking cough.
‖Catarrh, with dry, fatiguing cough, painful bruised feeling in umbilical region, painfully sensitive to touch, and < at night. θDentition.
‖Stoppage of nose.
Dryness and sensation of fulness and heaviness in nose, followed by nosebleed.
‖Catarrhs, with ulcerated nostrils and chapped lips, one cheek pale, the other red, with chills and thirst.
‖Crawling in nose until eye waters.

[8] **Upper Face.** ‖Convulsive movements and twitching of facial muscles and lips.
‖Neuralgia of face, pain causes hot sweat about head and extorts screams; stinging pain extending to upper jaw, from occiput, l. side.
‖Burning in face.
‖Hot face, with redness of cheeks.
‖‖Redness of one cheek, returning in paroxysms, without shivering or internal heat. θHemicrania.
‖Forehead hot, but moist. θOtalgia.
‖Wrinkled forehead.
‖‖Red face, or redness and heat of one (l.) cheek, the other being pale.
‖Face pale, sunken, distorted by pain.
‖Yellow or bloated face.
‖‖One cheek red and hot, the other pale and cold.
‖Heat of face, while rest of body is cool.
‖Paleness of face, with cold cheeks.
‖‖Face sweats after eating or drinking.
Puffiness of face and cheeks.
‖Fiery red rash on face. θOphthalmia scrofulosa.
‖Facial erysipelas after toothache.
Skin of forehead wrinkled above nose.
Swelling, hardness and blueness of one cheek. θNeuralgia.
‖One-sided swelling of cheek, generally left.
‖Erysipelas, starting on l. cheek, near nose, gradually spreading over face and head.
‖Stitches in joint of r. jaw, extending into upper back teeth, severe but transient.
Exanthema on face.

[9] **Lower Face.** ‖Child draws mouth back and forth, or from side to side. θTeething. θConvulsions.
‖Single stitches in jaw, extending into inner ear.
‖Lips crack and peel; rhagades in middle of lower lip.
At night, lips become dry and stick together, without thirst.
‖Swelling of submaxillary glands. θToothache. θFacial erysipelas.
Sensation of heaviness in lower jaw.

Digitized by Google

Pain on opening jaws, as if masseter muscles were painfully cramped, which pain also extended into teeth.

Feeling of weakness in muscles of mastication, with inclination to hold mouth open, and increased saliva.

10 **Teeth and Gums.** ‖Toothache is so violent, she tosses about, moans constantly and complains of digging, gnawing pain in hollow teeth; < at night, preventing sleep; < from coffee.

‖Violent toothache in an apparently sound tooth; single stitches through l. upper jaw, with itching and crawling sensation in teeth. θAmenorrhœa.

‖Toothache: stitching; digging; gnawing; from suppressed perspiration; from taking cold; during or after eating; ‖‖if anything warm is taken into mouth, especially after coffee, < by talking; in open air; in room; getting warm in bed; during menstruation and pregnancy; most l. side and lower teeth; < at night; affecting principally women and children; after abuse of mercury.

‖Drawing toothache (without being able to locate it in any tooth); it disappears during eating, but especially rages at night, therewith teeth feel too long.

‖Drawing pain in teeth after eating and drinking.

‖A slight burrowing and sensation of heaviness in alveoli of some of back teeth; "this sensation seems intolerable, and makes him very peevish."

‖Sensation of fulness and heaviness in alveoli of first and second back teeth of both sides of upper jaw, with a slight burrowing and boring in their roots, with a sensation as if alveoli were distended and formed a hard, tense swelling.

‖Throbbing toothache, insupportable at night, < by warmth of bed, patient turns about and keeps moaning.

Grumbling drawing toothache in jaw.

‖Violent toothache in l. upper jaw, always after eating warm food.

Toothache recurring in intermittent attacks, with swelling of cheeks and accumulation of saliva; pains shoot back and forth, even extend to eye and ear; < by drinking cold water.

‖‖Toothache recommences when entering the warm room, or drinking anything warm.

‖One-sided toothache and tearing in head and jaw.

‖Toothache as from taking cold, if one exposes oneself to cold air when sweating.

‖Toothache from draught of air, extending towards ear. θOtalgia.

‖Toothache in attacks with ptyalism.

Digitized by Google

‖Paroxysms of violent pain from root of upper eye tooth to cheek, nose and temple.
‖Grumbling and crawling in teeth of upper jaw.
‖Periodical violent toothache in molar, l. lower jaw; tooth is hollow; pain is drawing and jerking; < before midnight, > after eating.
‖Rheumatic toothache: particularly one-sided, < at night; pains unendurable, red cheek, cannot designate which tooth is affected; jerking, tearing pain often extending into ear; often < after eating and drinking, often > by dipping finger into cold water and applying it to affected part; very much < from drinking cold drinks; warmth of bed unbearable.
‖Teeth sensitive to touch, especially some hollow back teeth.
‖‖Teeth feel too long.
Looseness of teeth.
Teeth covered with mucus.
‖‖Gums red and tender. θDentition.
‖Burning in swollen gums.
‖Sensation as if gums were swelling about some of back teeth.
‖Tearing toothache which extends to ear, with swelling of cheek and periosteal swelling.
‖Painful swelling of l. cheek, caused by a carious, badly plugged tooth; pain lancinating, < at night.
‖‖Teething children: with watery, greenish and also chopped diarrhœa, smelling like rotten eggs; jerking of limbs or starting; convulsions; child bends double and draws legs upon abdomen; moaning; want to be carried; dry cough; restless at night; want to drink; quick rattling breathing.

11 **Taste and Tongue.** ‖Taste: slimy, bitter; sour; like rancid fat; putrid; offensive at night.
Bread tastes sour.
‖‖Bitter taste in mouth, in morning.
‖Burning on tongue.
‖Tongue red in middle, white at sides. θTertian intermittent.
‖Tongue: coated, white; yellowish; or white at sides, red in middle; red, cracked; dry.
Severe biting on back of tongue and on roof of palate.
Tongue dry, with thirst for water, loss of appetite, flushes of heat, sweat of face and palpitation, followed by unnatural hunger.
‖‖Blisters on and beneath tongue, with stinging pain.
Convulsive movements of tongue.

13 **Inner Mouth.** ‖‖Heat in mouth, pharynx and œsophagus to stomach.

Digitized by Google

‖Dryness of mouth, in morning, followed by distension of abdomen and imperfect evacuation.
‖Extreme dryness in mouth, with lameness of limbs.
‖‖Collection of saliva, of metallic, sweetish taste.
Offensive taste in mouth, at night.
What he hawks up has an offensive taste.
Sourish odor from mouth.
‖‖Fetid smell from mouth.

[13] **Throat.** ‖Pain in l. side of fauces while swallowing; velum was somewhat reddened, and external pressure just under angle of jaw caused pain in fauces.
Spasmodic drawing pain in palate, extending into fauces.
Pain in back part of throat, < by moving throat and swallowing.
‖‖Spasmodic constriction of pharynx.
Stitches in throat, near ear.
Throbbing in back part of throat.
Stitching-burning pains in throat.
‖Inflammation of throat, with sensation as though something was sticking in it, which ought to be removed by hawking; heat in pharynx, and thirst; dark redness of affected parts.
‖Catarrhal inflammation of throat, of tonsils or pharynx, with acute stinging-burning pain in larynx; usually roughness of voice, some dyspnœa, tickling irritation to cough.
‖‖Sore throat, with swelling of parotid or submaxillary glands, or tonsils.
‖Difficult swallowing of solid food, and when lying down.
Sore throat from suppression of cutaneous action.

[14] **Appetite, Thirst. Desires, Aversions.** Unnatural hunger, in evening.
‖‖Want of appetite.
When food is set before him, it makes him shudder, it is so repugnant.
‖‖Great thirst for cold water and desire for acid drinks.
Thirst, with febrile heat and redness of cheeks.
Unquenchable thirst, with dryness of tongue.
‖Increased thirst, with evening fever and painful diarrhœa.
‖‖Likes to hold cold water to mouth a long time, when drinking. θDentition.
Desire for: acids; sauerkraut.
‖Aversion to: beer; coffee and warm drinks; to broth.

[15] **Eating and Drinking.** Fulness while eating, with nausea after eating.
‖‖After eating and drinking, heat and sweat of face.
‖After eating: vertigo; abdomen puffed up.

Digitized by Google

‖‖Thirsty and hot with the pains.
‖In morning, after drinking coffee, heat all over and sweat, with vomiting of bitter mucus, followed by bitter taste in mouth, weakness in head, and nausea.
After drinking coffee: vertigo.
‖Cutting pain and debility after drinking.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough.
‖Eructations: sour; constant, empty; ‖‖aggravate the pain.
‖Eructations of gas, smelling of bad eggs.
‖‖Eructations and passage of flatus.
The existing pain is increased by eructations.
Disgust, qualmishness, > by eating.
‖Nausea: with vertigo while lying in bed; and inclination to vomit; and bitter vomiting; after drinking coffee; after breakfast; with collection of saliva in mouth; as if she would faint.
‖Nausea after morning coffee, with attacks of suffocation.
‖Inclination to vomit: with diarrhœa and fever during night; as if one would faint.
‖‖Fruitless efforts to vomit.
‖Vomituritio, with slight stinging pains in region of liver, after vexation.
‖Vomiting: of bile; of food; of what has been drunk; slimy matter; sour.

[17] **Scrobiculum and Stomach.** ‖Severe painful pressure in epigastrium makes her toss about in despair. θIntermittens tertiana.
‖Pressive pain in stomach and beneath short ribs, which impedes breathing, especially after drinking coffee.
‖Epigastrium painfully bloated, in morning, with sensation as if contents were passing into chest; belching of wind is painful.
‖Pressing and cutting in epigastrium, with anxiety.
‖Burning or stinging pain in pit of stomach.
‖‖Pressure in stomach, as from a stone pressing down.
Pressure in stomach after eating a little.
‖Burning across stomach into each hypochondrium.
‖Gastralgia: in highly irritable persons, or following vexation; pressure as from a stone in scrobiculum and under short ribs, l. side, and short breathing, anxiety, fear, restlessness, tossing about, sometimes throbbing headache on vertex, driving patient out of bed; < after a meal or at night.
‖‖Constrictive gastralgia in coffee drinkers.
Gastralgia relieved by drinking coffee.

[18] **Hypochondria.** ‖Stitching pains in hypochondria.

Google

Stitches in region of liver, with vomiturition and frequent chilliness, after vexation. θHemicrania.
Pressure in hypochondria and in stomach after eating.
Continual tensive pain in hypochondriac region, with tension around brain.
Fulness and distension in hypochondria.
Incarceration of flatus in hypochondria.
Diaphragmitis.
Hepatitis after vexation or taking cold, with gastric troubles and icteroid symptoms.

19 **Abdomen.** Pressive colic about navel.
Griping-tearing colic in region of navel and lower down on both sides, with pain in small of back, as if it was broken.
Umbilical region sensitive.
Colicky cutting pains in abdomen, with hard chill; the pain seems insufferable, she wants to jump out of bed.
Colic, rather cutting than sticking, with accumulation of saliva in mouth.
Constant tearing colic in side of abdomen, as if parts were rolled up in a ball.
Tearing pain in abdomen.
Constricting pain in abdomen and back; she kicks, grates her teeth, and screams.
Colic returns from time to time, flatus accumulates in hypochondria, and stitches shoot through chest.
Gurgling in side extending into abdomen.
Abdominal cramps, particularly flatulent colic; flatus collects in various places and strives to force a passage; distension of hypochondria and epigastrium; patient suffers from anxiety, restlessness and clammy perspiration.
Sensation as if bowels were drawn up in a ball, and abdomen was empty.
Wind colic, abdomen distended like a drum, wind passes in small quantities without relief; > by applying warm cloths.
Wind colic, with tympanitis and vomiturition.
Wind colic, with sensation as if a hernia would appear.
Hysteric colic.
Abdominal pain, with frequent emission of pale, colorless urine in large quantities.
Colic while urinating.
Colic at sunrise.
Colic, with violent pain in l. hip, when lying on r. side.
Abdomen is distended, but soft; when pressed, patient complains of increased oppression of chest and anxiety.
Distension of abdomen after a meal or in morning.

Digitized by Google

‖‖Abdomen tympanitic and sensitive to touch. θAgalactia. θPeritonitis.

‖Abdomen sensitive to touch, particularly in inguinal region.

Sensation as if whole abdomen was hollow, with constant motion in intestines.

Compressive pain in abdomen.

Pain in abdomen, as when constipation causes a delayed passage.

Bruised pain in muscles of lower abdomen.

Pain in abdomen prevents urination.

‖Dragging towards abdominal rings, as if parts were too weak and hernia would appear.

‖Peritonitis.

Stool and Rectum. Flatus: sour smelling; stinking; putrid.

Stools: green, slimy, mucous; mixed green and white, mucous; chopped, white and yellow, mucous; green or yellowish; watery, frequent, preceded by cutting constricting bellyache, < in epigastric region; mucous, with colic and vomituritio; bilious, with burning in anus; painful, thin, green, consisting of feces and mucus; ‖‖green, watery, corroding, with colic, thirst, bitter taste and bitter eructations; like chopped or stirred eggs, smelling sour; ‖‖hot, smelling like rotten eggs; changeable; containing undigested food; mucous and bloody.

‖Violent bilious diarrhœa, with intense colic and burning in anus, after vexation.

In diarrhœa, especially of watery, mucous character, stools preceded by violent cutting pain below umbilicus; > after stool.

‖Diarrhœa, with violent colic, forcing screams.

‖Daily four or five bloody, slimy stools, preceded by bellyache and tenesmus; a child, a year old.

‖Several mucous passages, with colic and vomituritio. θSuppressed measles from taking cold.

‖Nightly diarrhœa, with colic, so that she was obliged to bend double.

‖Diarrhœa after taking cold or from anger; very painful cutting jerks from r. shoulder towards head, with thirst and debility.

‖Watery diarrhœa; six to eight passages daily, preceded by cutting, constricting bellyache, < in epigastric region.

‖Mucous diarrhœa. θScarlet rash.

‖Painless, green, watery diarrhœa, a mixture of feces and mucus.

‖Diarrhœa, green and watery, and slimy, or like chopped eggs and spinach.

Digitized by Google

▮Green, fetid stool, watery discharge.
▮Passages at first greenish, later like rice-water. θDiarrhœa.
▮Yellowish-brown stool, sour, fetid; bites everything, plays with tongue and gums; sour vomiting; sleepless. θDentition.
▮White, slimy diarrhœa, with colic.
▮Diarrhœic complaints aggravated: during dentition; after taking cold; after anger or chagrin; at night; after tobacco; in childbed; from downward motion; after suppression of perspiration.
▮Torpid stool.
▮Constipation; discharges yellow and solid, crumbling from excessive dryness. θDentition.
▮▮Constipation from inactivity of anus.
Sticking pain in rectum after every stool.
▮Hemorrhoids: blind; painful, bleeding, burning, inflamed.
Stitches in rectum after stool.
▮Soreness of anus, particularly after stool.
▮Itching pain in anus.
▮▮Ulcerating fissures at anus.
▮Chafing about anus.

[21] **Urinary Organs.** ▮Dragging towards ureters like labor pains, with very frequent urging to urinate.
▮Sticking pain in neck of bladder when not urinating.
▮Burning in neck of bladder when urinating.
▮Ineffectual urging, with anguish; sensation of smarting, or burning pain in urethra, during micturition.
▮Desire to pass water frequently, it being profuse and pale. θNervous disorders.
Biting pain in urethra when urinating.
Urination prevented on account of pain in abdomen.
Force of bladder is weakened, urine passes in a weak stream.
Involuntary passage of urine, which feels hot.
▮Involuntary urination at night.
▮Urine: hot; yellow, with flaky sediment; scanty; turbid, clay-colored soon after passing; turbid, gets thick when standing, sediment yellow; abundant and light-colored; red as blood.

[22] **Male Sexual Organs.** ▮Violent erections, and excited sexual desire; also nightly emissions.
Itching, stinging pain in margin of prepuce.
▮Swelling of prepuce and soreness of border. θSycosis.

[23] **Female Sexual Organs.** Congestion to uterus.
▮Drawing tearing in uterus, painful to touch; she feels as though she could not possibly bear the least touch. θInduration of uterus.

‖Menses: too early; too profuse; blood offensive smelling; blood coagulated, dark.
Menses suppressed.
Suppression of menses, with swelling of pit of stomach, and a pain as if heart would be pressed down, with swollen abdomen, laborlike pains and anasarca.
‖Excessive menstruation, blood dark, nearly black, clotted, with pain through from back to front, attacks of syncope, coldness of limbs, much thirst.
‖Profuse discharge of clotted blood, with severe laborlike pains in uterus; tearing pains in legs.
‖Cutting colic and drawing in thighs before menses.
‖Laborlike pains before or during menstruation.
‖During menses: swollen breasts, sore nipples, diarrhœa with colic, fainting, short, dry cough, laborlike pains.
‖Discharge of blood before proper period.
‖Passage of blood between menses.
Metrorrhagia, even in old women.
‖Metrorrhagia of dark, coagulated blood, flowing more in paroxysms; much thirst; coldness of limbs.
‖Metrorrhagia, with passage of fetid blood in lumps.
‖Pressing towards genital organs; passing of large quantities of colorless urine.
‖Drawing from small of back forward, griping and pinching in uterus, followed by discharge of large clots of blood.
‖‖Menstrual colic, following anger.
‖‖Membranous dysmenorrhœa.
‖Acrid, biting, watery discharge from vagina, particularly after a meal.
‖‖Yellow, smarting leucorrhœa.
‖Smarting burning in vagina, as if excoriated.

21 **Pregnancy. Parturition. Lactation.** ‖Toothache during pregnancy, pains render her frenzied.
Bloody discharge with laborlike pains during pregnancy.
‖Threatened abortion, with discharge of dark blood; frequent urination, urine profuse and pale; great restlessness and agony; irritability; heaviness of whole abdomen; frequent yawning, chills and shuddering.
‖Uterine hemorrhage after abortion, in spells; contracting, outward pressing pains in abdomen proceeding from back; < when lying on back; ringing in ears; frontal headache.
‖‖Labor pains press upward; she is hot and thirsty, cross and inclined to scold.
‖Labor pains spasmodic and distressing; tearing pains down legs; she is oversensitive to the pain, wishes to get away from herself; is irritable and snappish, desires fresh air; says she must and will get up.

Digitized by Google

Spasmodic distressing labor pains during pregnancy, preventing sleep; irritability.
Violent labor pains and tearing in veins of legs, with discharge of dark, coagulated blood.
Labor pains, with more or less discharge of dark blood and frequent urination, urine being profuse and pale.
Hour glass contraction; irritable; thirsty; desire for fresh air; restless.
Rigidity of os; scarcely able to endure the pains.
After pains very acute and distressing.
Constant violent after pains on second day after delivery of fourth child; become unbearable when child nurses, so that she screams out.
Too long continued after pains.
Post-partum hemorrhage: uterus outside abdomen is felt to be contracted into little knots or bunches about size of a walnut; redness of one cheek, paleness of the other.
Milk fever, after anger.
Metritis, after violent anger, especially after parturition, and lochia generally increased.
Puerperal fever, with great restlessness, excitement, sore breasts, absence of milk; mucous, greenish, watery, milky diarrhœa, profuse lochia, with laborlike pains, going through from back to front.
Puerperal convulsions, after anger; or has one red cheek, the other being pale.
Rash of lying in women and nursing infants, caused by heat or errors in diet, with watery, greenish, chopped-egg diarrhœa, corroding anus.
Lochia too profuse and bloody.
Suppression of lochia, followed by irritability, diarrhœa, colic and toothache.
Dark lochial discharge.
Excessive sweating after confinement.
Milk runs out in nursing women.
Milk is cheesy, or mixed with blood or pus.
Suppression of milk from a fit of anger.
Distress after nursing.
Mammæ hard and tender to touch, with drawing pains; is fretful, sleepless and cross.
Induration in mammary glands, very tender to touch; drawing lacerating pains. *0*Scirrhus.
Breasts are very tender, nipples inflamed and swollen.
Erysipelas of breasts, nipples excessively sore.
Infants: screaming day and night, often without cause; incipient hydrocephalus; stoppage of nose, or watery moisture running from nose; inflammation of intestines,

Digitized by Google

when stools are thin, watery, accompanied by much pain, < at night; the little sleep at night disturbed by frequent starting; incipient marasmus, frequent diarrhœic stools, occasionally swelling of glands, abdomen tense and hard; hernia; scream with colic; frequent diarrhœic stool corroding anus; screaming with great restlessness, tossing about, colic, drawing up of legs; troublesome, dry cough; pneumonia; catarrhal irritation, loose cough, rattling breathing; cardiac anguish; induration of mammary glands, tender to touch; erysipelatous inflammation and swelling of breasts; convulsive twitching of limbs, when falling asleep; incipient spasms; epileptic attacks; feverish condition with irritated nerves, anxiety and restlessness, easily startled; abrasions and chafing; rash.

‖‖Children have spasms in consequence of nursing milk vitiated by a fit of anger.

[21] **Voice and Larynx. Trachea and Bronchia.** ‖Burning in larynx.

‖‖Sensation of rawness and scraping in larynx.

‖Sensation of rawness in upper part of air passages.

‖Sensation of slight pressure on air passages, with some irritation to cough.

‖‖Tickling in pit of throat causing scraping, dry cough.

Voice hoarse.

‖Catarrhal hoarseness, with dryness of eyelids, burning or stinging sensation in larynx, painful soreness in one spot, only relieved by long coughing and raising a little phlegm.

‖Hoarseness, on account of tough mucus in larynx, which can only be relieved by strong hawking.

‖Hoarseness, with violent persistent cough, a high degree of heat every evening, with fretfulness on awaking; and child frets and scolds, asks for one thing and then for another.

‖Hoarseness after taking cold.

‖Inflammation of throat, with stinging, ulcerative pain at epiglottis, which excites cough and interferes with swallowing.

‖Whistling, wheezing and rattling in trachea, when breathing.

‖Sensation of cord around trachea, with constant desire to cough.

‖Croup of children; spasm of chest, with suffocative attacks after anger; child wants to be carried.

‖Nervous bronchial asthma.

[26] **Respiration.** Anxious breathing.

‖Oppressed breathing, as if chest was not wide enough.

Digitized by Google

‖Dyspnœa, constricted feeling at suprasternal fossa, with constant irritation to cough.
‖Dyspnœa, as from suffocative catarrh (larynx feels constricted) in region of pit of throat, a constant irritation to cough.
Suffocative dyspnœa, with sensation of being strangled by cord around trachea; constant desire to cough.
‖‖Suffocative attacks from repercussion of measles eruption, by taking cold.
Rapid, deep breathing, with great heaving of chest.
Short, panting breath.
‖Short breath, with rattling.
Short, croaking breathing.
Draws short, deep breaths, with great elevation of thorax.
‖Rattling breathing, with cough.
‖Rattling breathing, slow inspiration and rapid expiration.
‖Sour smelling or fetid breath.
‖Loud, rattling, sighing or unequal respiration.
Snoring inspirations during sleep, which are shorter than the expirations, with open mouth and hot, clammy sweat on forehead.
‖‖Asthma after a fit of anger.
‖Asthmatic attack, seemingly produced by an accumulation of flatus, > from bending head back, in cold air, and from drinking cold water; < in dry weather and from warm diet.
‖Asthma from vapors of sulphur, after *Pulsat.*

Cough. ‖The child becomes angry and then coughs.
‖Cough and hoarseness with rattling mucus in trachea, especially during winter.
‖Constant irritation to cough, beneath upper part of sternum.
‖Constant desire to cough, with sensation of cord around trachea.
‖Cough caused by irritation low down in air passages, during night.
‖Cough from tickling in chest.
‖Paroxysms of coughing about midnight, with which something seems to rise in throat, as if she would suffocate.
‖Cough, particularly at night, with tough, slimy expectoration, tasting bitter and putrid.
‖Dry cough < at night and during sleep.
Cough, with expectoration during day, without at night.
‖Dry cough from catching cold.
‖Rough, scraping cough of children in winter, with tickling in suprasternal fossa, < at night.
‖Dry cough, continuing during sleep.

Digitized by Google

‖Cough dry and hacking; child is very fretful.
‖‖Scraping, dry cough, caused by tickling in pit of throat, < at night, even in sleep, especially with children after taking cold in winter.
‖Rough, dry cough. θSequel to measles.
‖Cough, with flushes of heat in face, at same time chilliness of limbs and back.
‖Cough threatens to burst chest. θRheumatism.
‖Amelioration of cough, when getting warm in bed.
‖Expectoration bloody, dark and coagulated.
Cough, with rattling in chest.
Expectoration: acrid, blood coagulated; dark; mucous; viscous; watery.
Taste of expectoration: bitter, putrid, or sour.
‖Catarrhal stage of whooping cough, with constant irritating, dry cough.

[20] **Inner Chest and Lungs.** ‖Burning pain under sternum, and from beneath sternum to mouth.
Burning in chest, with dulness in head, as if he did not know where he was, with anxiety.
‖Constriction in upper part of chest, which hurts on coughing.
Tensive pain across chest, when breathing.
‖Sudden stitches and darts through chest, extorting screams; dyspnœa taking away voice and threatening suffocation. θRheumatism.
‖‖Single severe stitches in chest at times.
‖Stitches in chest from abdomen after each start, as in a fright, when waking or sleeping.
‖Chest painful, when coughing.
‖Stitches in sides of chest.
‖Stitches shoot from abdomen into middle of chest, as from flatulence.
Stitches in side of chest beneath ribs and shoulder blades, when breathing.
‖Pain in chest with every deep breath. θRheumatism.
Chest is sore internally as if bruised.
‖Oppression of chest as from flatus, which has accumulated in upper part of abdomen.
‖Heavy feeling in chest.
Pressive pain beneath sternum, which impedes breathing.
Drawing pain, or sensation as if r. side of chest was repeatedly drawn inward.
‖Oppression of chest, short, moaning breathing, with pain in chest, sometimes stitches, on taking a deep breath.
‖Rattling of mucus in chest.

[21] **Heart, Pulse and Circulation.** ‖Palpitation and faintness.
‖Uneasiness about heart, faints frequently; twitching of limbs; oppression of chest. θShock of injury.

Digitized by Google

‖Pain in heart, as if something weighed it down. θCardialgia.
‖A kind of faintness; he becomes sick and qualmish about heart, feet suddenly feel paralyzed, with heaviness of all limbs, as if they were worn out.
‖Shooting stitches in præcordial region, thence to various parts of body.
‖Rapid stitches about heart, on motion, interfering with breathing.
‖Pulse small, but tense and accelerated. θNeuralgia.
Pulse frequently very unequal, and for a time weak.
‖Pulse first full, then again weak and contracted.
‖Pulse small and uneven.

30 **Outer Chest.** Tearing pain in region of clavicle and throat.
‖Whole thorax feels as if beaten. θRheumatism.
A hard node beneath nipple, painful to touch, with drawing-tearing pain.
Scirrhous hardness of mammary glands.

31 **Neck and Back.** Tensive stiffness of cervical muscles.
Glands swollen and often very sensitive; painful when turning neck.
Drawing pain in scapulæ.
‖Drawing or stinging or tearing pain in back.
‖Great pain in back, sometimes extending through abdomen to front, and into genitals. θThreatened miscarriage.
‖Bruised sensation in muscles of loins and back.
‖Small of back feels bruised.
Contractive sensation in spine.
‖Pain in small of back, especially at night.
Fulness, anxiety, and tearing pain in back, after eating; afterwards extends to abdomen.
‖Backache, < when stooping and walking, and from coffee.
Unendurable pain in loins and hip joint at night, if he lies upon opposite side.
Stiff pain in loins after sitting.
‖Backache. θTertian intermittent.

32 **Upper Limbs.** Uninterrupted fine sensitive pressure in articular ligaments and periosteum of arm from shoulder to fingers, a drawing-tearing, < after midnight, when lying on back, > when lying upon painful arm.
Jerking stitches like electric sparks in l. shoulder and extending into cervical muscles.
Stitches extending through r. arm to shoulder.
‖Pain in arms, cannot bear slighest motion.
Tearing pain in muscles of arms, particularly in flexors

Digitized by Google

of forearm, in morning soon after waking, < in cool evening air.

‖Stiffness of arm, as if it would go to sleep, when one grasps anything with hand.

Crawling tearing in bones of arm, extending into fingers, as if arm was numb.

Pricking numb sensation in r. arm, waking from sleep at night.

‖‖Arms immediately go to sleep, if she grasps anything firmly; she is obliged to let them sink down.

Paralytic-like pressive sensation along nerves of arm, extending to tips of fingers.

Drawing and paralytic pain in elbows and hands.

Drawing pain in inner portion of arm, from elbow to tips of fingers, late in evening.

Pains in elbows as after carrying a heavy weight with arms bent, aggravated by extending arms, < on r. side.

Drawing pain and stitches in wrist.

Left arm went to sleep without having been lying on it.

‖Convulsions of arms, with clenching of thumbs.

‖Convulsive twitchings of fingers.

Severe stitches in arms along bones, especially in forearms and in metacarpal bones.

Stitches in hands and finger joints.

Burning pain in hand, in afternoon.

‖Fingers become cold and are inclined to "go to sleep," while sitting.

Fingers "go to sleep," in morning.

‖Cold hands, with cold perspiration in palms of hands. θRheumatism.

Pain in thumb and index finger, as from a sprain or a strain, or from too great exertion, or as if it was broken; felt when moving it.

‖Finger joints red and swollen.

[83] **Lower Limbs.** Pain in hip joint, as if sprained, on walking, after sitting, in evening.

A kind of fierce labor pain, extending from sacrum into thigh, a drawing paralytic pain.

‖Violent drawing tearing pains from l. ischium to os calcis and sole, with cramplike tension of musles. θSciatica.

Stitches in nates and thighs.

Pain on posterior surface of r. thigh when walking.

Bruised pain in thighs.

‖Tearing pains down legs.

‖‖Short attacks of exhaustion, especially of lower extremities.

An indescribable pain in thigh on rising after sitting, and when lying with thigh stretched out.

Digitized by Google

Paralytic stiffness with weariness of thigh, like a bruise.
Stitches in thighs.
Bruised pain in thighs.
‖Heaviness and lassitude in legs. θPost-partum hemorrhage.
‖Restlessness of legs and feet, at night.
He was obliged to stretch out legs from time to time in order to get rested.
‖Trembling of lower leg, when going to sleep.
Tearing pain in upper and lower legs.
‖Stitches jumping about from place to place, especially in knees and ankles, disappearing on motion.
Tension in knees.
‖Cracking of knee during motion.
She had to draw up her feet on account of pain in calves and knees, when she stretches they "go to sleep."
Drawing pain, extending from knee through lower leg, late in evening.
Drawing, tearing pain, extending from knee to ankle.
‖Violent drawing up of knees towards chest so soon as he falls asleep, dreams he is falling into the depths.
Stitches below head of fibula.
‖‖Cramp in legs and calves.
‖Crawling and heaviness of calves.
Sensation in legs as if they would fall asleep.
‖Redness and swelling around malleoli. θRheumatism.
Constrictive sensation in ankles.
Tearing pain in feet, he cannot allow them to be covered in bed.
‖Tearing pain in feet after a severe chill; must lie down and keep quiet, pain in ankle, < from every motion.
Feet seemed paralyzed, and pithy in soles on stepping on them, < at night.
Itching pain internally in side of heel.
It seems as though toes would bend up and would go to sleep, while sitting, especially great toe.
Spasmodic contraction of toes, with tearing pain in limbs.
‖Tearing pain in feet following a severe chill; she has to lie down and keep quiet, every motion brings on pain in joint of foot.
Feet feel paralyzed, with faintness. See 29.
Tension in feet and up calves.
‖‖Burning of soles, at night; puts feet out of bed.
‖Sensation of numbness in toes.

34 **Limbs in General.** ‖Pain in periosteum, with paralytic weakness.
‖Drawing and tearing pains in limbs, < at night.
‖Tearing (neuralgic) pain in all limbs; only > by constant tossing about in bed.

Google

▮Aching in all limbs, with lassitude.
▮Pain in limbs, with weakness, slow dragging gait.
Drawing tearing jerks in long bones of limbs, or in tendons.
▮Nightly lame, tearing pain in limbs, with sensation of numbness.
▮Limbs feel heavy. θThreatened miscarriage.
▮Stiffness in limbs.
▮Convulsive twitching in limbs. θThreatened miscarriage.
Convulsive, single jerks of limbs, when just falling asleep.
Hands and feet become easily stiffened in cold, as if they would be frozen.
▮Joints sore, as if bruised and tired out; no power in hands and feet.
Pains in all joints on motion, as if they were stiff and would break.
▮Cracking in joints, especially of lower limbs, with pains therein, as if bruised.
▮▮Violent rheumatic pains drive him out of bed at night, and compel him to walk about.

[35] **Rest. Position. Motion.** Inclination to lie down.
Lying: pressure in head; down, flickering before eyes; difficult swallowing; in bed, nausea with vertigo; on back, pressing pain in abdomen, proceeding from back; pressing in articular ligaments; indescribable pain in thighs, when stretched out; must lie down, tearing pain in feet; < neuralgic pain; wakeful.
Lying upon opposite side: pain in loins and hip joint.
Sitting: erect in bed, vertigo; tearing headache; in bed, dimsightedness; fingers become cold; toes bend up; drowsy; causes stiff pain in loins.
Sits stiffly on a chair, like a statue, and does not seem to notice anything.
Rising: from bed, vertigo; after sitting, vertigo; after sitting, pain in thigh; aggravates ulcers.
Stooping: pressure from vertex to forehead; dull pressure as from a blow in inner ear; stitches in ear; backache.
Bending head backward: asthmatic attack.
Shaking head: pressive pain beneath upper eyelid.
Turning: over in bed, tearing headache; neck painful.
Grasping with hand: stiffness of arm; arms "go to sleep."
Stretching: when lying, causes pain in thigh; is obliged to stretch legs to get rested; "gone-to-sleep" feeling in calves and knees.
Child stretches itself.
Tossing about in bed, < pain in all limbs.
Tosses about in bed as if desperate: colic.
She must and will get up.
Walking: backache; > rheumatic pains.

Digitized by Google

‖‖Child gets relief from being carried.
Moving: eyes, pressive pain beneath upper lid; head backward and forward, throat pains.
Motion: slightest, pain in arms; stitches in limbs, jumping from place to place; cracking of knee; tearing pain in feet; pain in all joints; aggravates ulcers; rapid, stitches about heart.

[36] **Nerves.** ‖Excessive impressionability and irritability of nervous system.
‖‖Oversensitiveness after abuse of coffee or opium.
‖Irritability, especially following anger, progressing even to most violent spasms of chest and throat.
‖Intense restlessness, and spasmodic twitching of limbs. θThreatened miscarriage.
‖‖Child suddenly stiffens body and bends backward, kicks when carried, screams immoderately and throws everything off. θDentition.
Tremulous starting up; twitches of limbs and eyelids.
Single twitches of limbs and of head during morning nap.
‖Convulsions of children: child becomes stiff, rolls its eyes, distorts face, twitches, throws its limbs about, clenches thumbs, bends body backward or sideways, has rattling breathing, with foam at mouth; moves legs up and down alternately, grasps and reaches with hands, mouth drawn from side to side, eyes staring, or eyes and face distorted; stupor. θDentition.
‖Convulsive condition of little children, with distended abdomen, greenish, whitish, chopped, frequent stools; vomiting of sour smelling fluid.
‖Tetanic convulsions following measles.
‖Twitching in eyelids, eyeballs, lips and facial muscles.
‖Pain in limbs, with weakness, and slow, dragging gait.
‖General prostration, faintness.
‖Great prostrating debility as soon as pain begins. θNeuralgia.
‖Lassitude in morning on awaking.
Syncope, particularly hysterical.
Sensation of numbness.
‖Neuralgia: patient wild and unruly, wants relief at once; heat with anxiety and restlessness; hot sweat, particularly on face and scalp; < at night, while lying down; must get up and rush about; affects principally l. side.

[37] **Sleep.** She complains of sleepiness on account of bruised feeling in limbs, with inclination to weep and ill humor.
‖Frequent yawning. θThreatened miscarriage.
‖Yawning and stretching.
‖Sleepiness, with dulness of senses.
‖Sleep, with half-open eyes.
‖Snoring breathing when asleep.

Digitized by Google

‖‖Sleepy, but cannot sleep.
‖Drowsiness, with short breathing, groaning, starts.
‖If he sits down during day he wishes to sleep, but if he lies down he is unable to sleep, and remains awake.
‖Could not sleep till 2 A.M., partly from painful weakness in limbs, partly from sensation of heat and restlessness, which makes him toss about in bed.
‖‖Sleepless and restless at night.
‖Nightly sleeplessness from anxiety and visions.
‖Restless sleep, with weeping, howling, groaning and tossing about.
‖Sleeplessness, with fever and dyspnœa.
‖Starting and jerking while asleep.
‖Scarcely sleeps, and on falling asleep is tormented by vivid, fanciful, anxious and frightening dreams.
Horrid nightmare; child awakes three or four times nightly with fearful fright, uttering sudden startling and piercing cries, and vows there is some dreadful beast under the bed or in his room; nervous, peevish and fretful.
‖During sleep: moaning; weeping and wailing; snoring inspirations with open mouth; starting up, crying out, tossing about and talking; headache and other pain are felt; hot, sticky sweat on forehead; twitching of muscles.
‖Coma vigil, or rather an inability to open eyes; slumbering without sleep, quick expiration and tearing headache in forehead, with nausea.
Lies with knees apart while sleeping.
‖Aggravation of complaints on falling asleep and awaking.
Dreams: anxious; she sees horrible apparitions and starts; about fatal accidents.

Time. At night: sensation of violent heat, with burning, unquenchable thirst, dry tongue, stupefaction.
Night: headache after eating; illusions of hearing; umbilical region sensitive to touch; toothache <; toothache before midnight; rheumatic toothache; painful swelling of cheek; children want to be carried; taste slimy, bitter, sour, rancid, putrid, offensive; inclination to vomit; gastralgia <; diarrhœa; involuntary urination; inflammation of intestines <; cough without expectoration; pain in small of back; unendurable pain in loins; legs restless; feet seem paralyzed; burning in soles; drawing tearing pains in limbs; violent rheumatic pains drive him out of bed; neuralgia <; sleepless; rheumatism; burning smarting or darting lacerating pains in ulcer; itching of rash.
Midnight: paroxysms of coughing.
After midnight: pain in arm.
2 A.M.: could not sleep.

Google

Morning: vertigo, on rising; sticking and boring in r. temple; headache; eyes dim and weak; inflammation of eyes; eyes swollen; corners of eyes filled with purulent matter; bitter taste; after drinking coffee, heat, sweat, vomiting; epigastrium painfully bloated; colic at sunrise; heaviness; fingers "go to sleep;" single twitches in limbs.

Early in morning in bed: eyes half open and directed downward, somewhat enlarged pupils, sopor.

9 to 12 A.M.: general heat, then violent sweat.

Forenoon: pressive pain in both temples.

Noon: < tearing headache.

Afternoon: pressure in head; burning pain in hand; fever paroxysms.

Evening: pressive headache; burning cheeks; flying shivers; unnatural hunger; hoarseness, with violent cough; drawing pain in inner portion of arms; pain in hip joint; drawing pain in knee; fever.

Day: cough with expectoration.

Day and night: screaming.

[39] **Temperature and Weather.** Warm things taken into mouth: < toothache.

Warm room: toothache commences in.

Getting warm in bed: < toothache; > cough.

Heat of bed: < ulcers.

‖ Pains are aggravated by heat.

Warm clothes: > abdominal colic.

Cold: > ulcers.

Cold water: < toothache; rheumatic toothache.

Draught of air: toothache.

Open air: desire for; ulcers aggravated.

‖ Oversensitive to open air, aversion to wind, particularly sensitive about ears.

Cold air: very sensitive to; chilly.

Cold change of weather: < inflammation of eyes.

Sensitiveness to moist air.

Damp cold weather: < inflammation of eyes.

‖ Great dread of wind.

Windy weather: < ulcers.

Dry weather: asthmatic attacks.

[40] **Fever.** ‖ Chilliness and coldness in general; internal coldness; one-sided chill with or without thirst.

‖ Chill and coldness of whole body, with burning heat of face and hot breath.

‖ Cold limbs, with burning heat of face, burning heat in eyes, and burning hot breath.

‖ Coldness of face, hands and feet.

Chill of posterior, with heat of anterior part of body, or vice versa.

Digitized by Google

Immediately after uncovering, violent chill.
Chill, with trembling of body, nausea and bitter vomiting.
Chill and shivering, generally of single parts only, with heat of others.
Chill, followed by heat, with biting, sour smelling sweat.
Chilliness and sensitiveness to cold air; she has to keep well covered at night.
Shivering when uncovering and from cold air.
Slight shiverings, alternating with heat, creep over back and abdomen.
Shivering on posterior portion of body, of arms, of thighs, and of back, which returns in paroxysms, without external coldness, but rather with internal and external heat, especially of forehead and face.
Shivering from draught.
Constant alternation of heat and coldness of various parts; at one time hands were cold, at another warm; at one time lower leg, at another thigh was cold, at another warm; at one time forehead was cold and cheeks hot, etc.
Alternation of cold and heat in different parts of body, especially face.
Heat and shivering intermingled, mostly with one red and one pale cheek.
Febrile excitement and oversensitiveness to twitchings and spasms.
Internal heat, with shivering.
Heat, with anxiety and sweat on face and scalp.
Burning heat in lightly covered parts, though when not covered almost cold.
Burning in cheeks, with flying shiverings, in evening.
Heat creeping over head and face continued a long time.
Heat and sweat of face, after eating and drinking.
Biting heat.
Long-lasting heat, with violent thirst and frequent startings in sleep.
Heat, flushed face, great thirst, headache, colic, abdomen sensitive to touch and tympanitic; milk disappeared.
Fever, with redness of one cheek and paleness of other.
General heat 9 to 12 A.M., then violent sweat.
Evening fever, with diarrhœa.
Great heat and sleeplessness at night.
Child is very feverish and cross. θDentition.
Hot and thirsty with the pains.
Profuse sweat of covered parts.
Hot sweat, from pain. θNeuralgia.
Sweat during sleep, most on head, usually sour smelling.
Sweat, with smarting sensation in skin.

Digitized by Google

Profuse night sweat, with sleeplessness.
Relief of pain after sweat, not during.
Revulsion of, and therefrom entire want of sweat.
Suffering on account of checked perspiration, or on account of a fit of anger.
Cold perspiration.
While sweating, severe itching of sweating parts.
Paroxysm in afternoon, usually anticipating two hours.
Intermittent fever, not produced by swamp miasm, but in Spring in nervous persons, and where large cities extend.
Intermittent fever, chill accompanied by external and internal heat.
Instead of usual fever paroxysm, violent biliary colic, with vomiting and diarrhœa, in consequence of vexation.
Gastric or bilious fever: particularly after violent outbreak of anger; hot face; unquenchable thirst; bilious taste; vomituritio; anxiety; restlessness, etc.
Worm fever, with spasms.
Gastro-rheumatic fever after taking cold, followed by gastric complaints, vomituritio, bitter taste, etc., or first gastric, then rheumatic troubles, such as tearing pain in limbs, colic, chilliness, heat, sour sweat, restlessness and sleeplessness at night.
Puerperal fever, with great restlessness and irritability; lack of milk in breasts.
Prodroma of pituitary fever.
Nervous fever.
Typhoid fever, in consequence of anger, care, grief and taking cold; spasmodic symptoms, diarrhœic stools, with fermentation in abdomen; attacks of fainting, twitching, sleeplessness, with fear, vivid fancies; body cold and face burning hot.

41 **Attacks, Periodicity.** Pains recur in evening and are worse before midnight.
Paroxysms: redness of one cheek; of toothache, with ptyalism; of pain in head; of neuralgia; of fever, which usually anticipates two hours.
Intermittent attacks of toothache.
From time to time: colic from flatulence.
Winter: rough, scraping cough.

42 **Locality and Direction.** Left: side of head, tearing and stinging pain; great swelling and bluish redness of eyelids; occasional tearing in ear; neuralgia in face; cheek red and hot; cheek swollen; erysipelas in cheek; violent stitches in upper jaw; toothache in lower jaw; violent toothache in upper jaw; periodical toothache in lower jaw; painful swelling in cheek; pain and swelling in fauces; gastralgia; pain in hip; arm went to

Digitized by Google

sleep; ischium, violent drawing tearing pains; scalp and face, neuralgia.

Right: side of head, pressure increasing and decreasing; great swelling and bluish redness of eyelids; ear, as if hot water was running over it; ear, frequent stitches; ear, red and painful; stitches in jaw joint; pain in elbow; cutting jerks in shoulder; when lying on side, pain in l. hip; temple, sticking, boring; side of chest, drawing sensation.

Right to left: pain in abdomen.

One-sided chill.

Side to side: child draws mouth from.

Back to front: pain in female sexual organs.

Backward: inclined to bend head backward; moves head backward and forward; and forward, child draws mouth; labor pains press.

Sensations. Oversensitiveness of senses, especially if produced by coffee or narcotics.

As if a lump was falling forward in head; as from firm pressure with fingers on forehead; as from a stone in forehead; as if eyes would fall out of head; as if head would burst; as if top of head was blown off; as if hair stood on end; as if eyeball was drawn tightly backward; as if orbital region was tightly compressed from all sides; as if ears were stopped; as if hot water was running over r. ear; pressure as from a blow in inner ear; as if gums were swollen about lower back teeth; as though something was sticking in throat; as if contents of stomach were passing into chest; as if small of back was broken; as if abdomen was rolled up in a ball; as if a hernia would appear; as if heart would be pressed down; as of a cord around trachea; as if she would suffocate; as from flatulence, oppression of chest; as if limbs were worn out; thorax, as if beaten; as if arms were numb; as if thumb was broken; as if sprained on walking, limbs; as if legs would "go to sleep;" as if bruised and tired out, joints; as if abdomen was hollow; teeth as if too long; as if r. side of chest was drawn inward.

Unendurable pain: in loins and hip joint.

Lancinations: in ears; in teeth: in ulcers.

Cutting: pain and debility after drinking; in epigastrium; pains in abdomen; pain below umbilicus; jerks from r. shoulder towards heart; colic before menses.

Shooting: in middle ear; in præcordial region.

Stitches: in temples; l. side of head; extending to occiput like electric sparks; from palate to vertex; in head and chest; in eyes; in r. meatus, on stooping; in r. mastoid

Digitized by Google

process; in r. joint of jaw, extending into ear; through l. upper jaw; in throat, near ear; in hypochondria; in region of liver; shoot through chest; and darts, through chest from abdomen; in sides of chest; in præcordial region; in arms along bones; in wrist; in hands and finger joints; in thighs; jumping about, from knees to ankles; in rectum; like electric sparks in l. shoulder; in nates.

Stinging: pain in temple; in face; pain beneath tongue; burning pains in larynx; pain in region of liver; pain in pit of stomach; in margin of prepuce; in larynx; in skin; at epiglottis; in back.

Sticking: tearing headache; pain in rectum after stool; pain in neck of bladder.

Tearing pain: in forehead; in temples; l. side, temple in and around eye; in l. ear; in head and jaws; toothache; colic in abdomen; in uterus; pains in veins of legs; pain in region of clavicle; beneath nipple; in back after eating; in muscles of arms from shoulder to fingers; from l. ischium to os calcis; down legs; pain in upper and lower legs; pain in feet; in back; in bones of arm.

‖‖Paralytic sensations are always accompanied by drawing or tearing pain, and drawing or tearing pains rarely occur without paralytic or numb sensation in the part.

Jerking: headache in forehead; toothache; of long bones of limbs.

Boring: in roots of teeth; in r. temple.

Burrowing; headache in forehead and temples; in head; in alveoli of lower back teeth.

Pinching: in uterus.

Digging: teeth and gums.

Gnawing: hollow teeth.

Grumbling: toothache.

Griping: tearing colic in region of navel; inside of abdomen; in uterus.

Dragging: towards abdominal rings.

Drawing: headache; in ears; toothache; in uterus; in thighs; in palate; from small of back; pain in r. side of chest; pain beneath nipple; pain in scapulæ; from shoulder to fingers; in arms and hands; in elbows and hands; in wrists; violent, from l. ischium to os calcis; pains through lower legs and ankles; in mammæ.

Biting: on back of tongue; in urethra; in eruption on nape of neck.

Smarting: in vagina; in skin; in urethra.

Burning: in forehead; in eyes; in face; in swollen gums; on tongue; stitching pain in throat; in stomach; in

Digitized by Google

anus; in neck of bladder; in urethra; in vagina; in larynx; pain under sternum; in chest; in palms; in hand; soles; face; heat in lightly covered parts; in skin; in cheeks.
Aching: in all limbs.
Scraping: in larynx.
Rawness: in larynx.
Pressive pain: in both temples; beneath upper eyelid; in stomach; beneath sternum.
Pressing: headache; from vertex over forehead; earache; in epigastrium; towards genitals.
Pressure: inner head; extending from vertex to forehead; r. half of forehead; from vertex over forehead, when lying down; in head from within out; in orbital region; in forehead; in epigastrium, severe; in stomach, after eating a little; as from a stone, in scrobiculum; in hypochondria; on air passage; in articular ligaments of arms.
Soreness: in rectum, after stool; in larynx; chest, internally; of canthi; in border of prepuce; of nipples; of joints.
Bruised: sensation in head; feeling in umbilical region; pain in muscles of lower abdomen; sensation in muscles; pain in thighs; feeling in limbs; in skin.
Wandering pains: in temples.
Neuralgic pain: in face.
Rheumatic: pain in head; toothache; pains in limbs drive him out of bed.
Sprained: pain in thumb and index finger; in hip joint.
Stiff pain: in loins.
Ulcerative: pain at epiglottis.
Indescribable: pain in thigh.
Pain: in temples; in teeth, shoots back and forth in paroxysms; in belly from side to side; in abdomen, prevents urination; in l. side of fauces; laborlike, in uterus; in chest, with every deep breath; in heart; in small of back; unendurable, in loins; in arms; in thumb; in hip joint; in calves; in periosteum of limbs; in joints.
Throbbing: headache; in one-half of brain; toothache; in back part of throat.
Heaviness: inner head; in nose; in whole abdomen; in chest; as if heart was weighed down; of limbs; of eyelids; in lower jaw; in alveoli of some of back teeth; in legs; of calves.
Stopped up feeling: in nose.
Fulness: in head; in nose; and distension in hypochon-

Digitized by Google

dria; after eating; in alveoli of first and second back teeth; of both sides of upper jaw.
Empty: abdomen.
Uneasiness: about heart.
Distended: alveoli.
Tensive: drawing in ears; pain in hypochondria; around brain; stiffness in cervical muscles; knees; feet and calves; pain across chest.
Constriction: in forehead; of meninges; of pharynx; pain in abdomen and back; at suprasternal fossa; in upper part of chest; in ankles.
Constricting: bellyache.
Contracting: outward pains in abdomen; sensation in spine.
Compressed sensation: of brain; pain in abdomen.
Cramped feeling: jaw; legs and calves.
Spasmodic sensation: in front of r. ear.
Weariness: of thigh.
Weakness: muscles of mastication; of limbs.
Numbness: of fingers; in toes; all over; with pricking in arm.
Pithy: soles feel.
Paralyzed feeling: along nerves of arm to tips of fingers; in feet; painful, from sacrum into thigh; stiffness in thigh; pain in elbows and hands; feet; weakness of limbs.
Crawling: in nose; l. upper jaw; in bones of arms; in calves.
"Going to sleep:" of arms; fingers, knees and calves.
Tickling: in pit of throat; in chest.
Itching: l. upper jaw; pain in anus; in margin of prepuce; toes; of sweating parts; of rash; of skin; in side of heel.
Coldness: inside of abdomen; of limbs; of face, hands and feet.
Chilliness: inside of abdomen.
Shuddering: through skin.
Heat: in face; in head; in eyes; in auricle; in nose; l. cheek; of face; in mouth; in pharynx; and restlessness; forehead and face; and coldness of various parts at one time; different parts of body; and shivering; and anxiety; creeping over head and face; with pain.
Dryness: of mouth; of eyelids; of nose.

" **Tissues.** Acts more on sensory than on motory sphere.
Inflammation resulting from a fit of passion.
Excessive sensibility and irritability of fibre.
Spasmodic trembling, associated with symptoms of nervous irritability.

Digitized by Google

Muscular or articular rheumatism, with great nervous excitability.

Neuralgia in paroxysms of most violent character.

Rheumatism; drawing, tearing pains, accompanied by sensation of lameness or numbness; pain more in tendons, ligaments and bones (not in muscles), without swelling of parts; pains < at night; they do not change location.

Phlegmasia alba dolens.

Ebullitions and hemorrhages.

Incipient gout; gouty ophthalmia.

Inflammation, swelling, induration, and atrophy of glands.

Indurations in mammary gland.

Serous non-suppurative inflammations, or suppuration of cellular tissue, or pus scanty, thin and corroding.

Female genitals: leucorrhœa; menstrual troubles; dysmenorrhœa; menorrhagia, etc.

Increases the secretions of the respiratory mucous membrane.

Bilious vomiting; subacute hepatitis; mucous diarrhœa.

Rheumatism, in ligaments and periosteum.

Fever arising from physical irritation, such as dentition, or indigestible foreign bodies in intestines; nervous system highly excited, yet sensorium not much perverted.

All catarrhal affections, with or without fever, especially after taking cold, occurring most frequently in children and women of nervous excitable temperament.

Catarrhal affections of eyes, ears, gastro-intestinal, urino-genital and respiratory mucous membranes.

Intestinal catarrh, with affections of liver and bladder.

Digestive canal: increased and altered secretions, accumulation of flatus during the period of dentition.

Looseness of bowels, with colic, following anger, or in children.

On the skin it produces miliary eruption, isolated papules and pustules, and an unhealthy disposition, so that wounds do not readily heal, but become very painful.

45 **Touch. Passive Motion. Injuries.** Painful to touch: outer head; umbilical region; abdomen sensitive; teeth; uterus; mammæ; hard node beneath nipple; ulcers.

Sensitive to touch: skin.

Pressure: causes pure blood to issue from eyelids; on angle of jaw causes pain in fauces; on chest, oppression.

Covering: < pain in feet.

Injuries: readily suppurate.

Shock of injury: unstrung by pain; < from talk or touch; groaning; pain burning and as if torn; pale, cold, moist skin, or general perspiration; forehead and limbs cold; > from hot applications.

Digitized by Google

‖Children obtain relief by being carried.

[46] **Skin.** Yellow skin.

‖Skin moist and burning hot.

Stinging pain leaving soreness after scratching.

Burning in skin.

Smarting in skin.

Skin creepy and sensitive to touch.

Bruising pain and smarting in skin.

‖Dryness of skin.

Itching of skin.

Shuddering felt all over skin.

‖Skin unhealthy, every injury suppurates.

‖Exanthema difficult of healing.

Miliary exanthema.

Miliary eruption on the cheeks.

‖Red rash on cheeks and forehead.

Erysipelas in the face.

‖Erysipelas accompanying toothache.

Hives in peevish, fretful children.

An eruption, only slightly elevated on nape of neck, which causes a biting sensation, compelling her to scratch.

Small red blotches on skin, which are covered with nettle-like rash.

Rash of infants and lying-in women. Small red spots on skin covered with pimples.

Red rash, consisting of thick pimples, which are crowded into a red spot in skin, on lumbar vertebræ and on side of abdomen; they itch especially at night, with some biting, shuddering is felt all about the spot from time to time.

‖Repercussion of measles after taking cold, nothing but bluish spots visible, with watery evacuations, nausea and colic.

‖Skin inclined to inflammation.

Oversensitiveness of skin in children.

‖Excoriation of children and infants between thighs.

‖Burning and smarting or darting lacerating pain in ulcer, at night, with crawling and painful oversensitiveness to touch and air, particularly to wind.

Redness and swelling of ulcers.

Lancinating and darting in ulcers.

"Proud flesh" in sensitive ulcers, with inflamed edges.

Ulcers are aggravated: at night; in open air; during menstruation; from motion of affected part; by wet poultices; by pressure on side of limb opposite to ulcer; on rising from seat or bed; from drinking coffee; from heat of bed, and in windy weather.

Ulcers are improved by cold.

Digitized by Google

Pustulous pimples on face.
‖Itching pimples covered with scurfs, and ulcerating around ulcer.
‖Severe itching of sweating parts.
Rhagades of skin.
‖Skin yellow, jaundiced.
Sequelæ of scarlatina.
Chilblains.
‖Pimples appear with itching around an ulcer, which is covered with a crust and suppurates, margin around base of ulcer very red.
‖Inflammatory swelling of glands.
Skin symptoms are aggravated: in evening and night; when the child is kept too warm; after taking cold; after scarlet fever; during menstrual flow; during pregnancy; during perspiration, and after suppressed perspiration.

47 **Stages of Life, Constitution.** ‖‖Light or brown hair, nervous, excitable temperament.
‖‖Children, newborn and during period of dentition.
‖Diseases of children, especially such as affect abdominal organs or are dependent on them.
‖‖Adults, even aged persons with arthritic or rheumatic diathesis.
A child, æt. 6 weeks; ophthalmia.
A male infant, of eight weeks, constipated since birth; dentition.
A child, æt. 9 months; eclampsia.
A child, a year old; diarrhœa.
A boy, æt. 1 year; dysentery.
A boy, æt. 4, light complexioned, blue eyed, sandy haired; nightmare of two years duration.
A girl, æt. 5; otalgia.
A boy, æt. 13; measles.
A small, robust girl, æt. 17, has not menstruated; toothache.
A young servant girl, suffering since four weeks; intermittens tertiana.
A servant girl, after vexation; bilious vomiting, diarrhœa and colic.
A girl, æt. 20, robust build, short in stature, quiet, even temperament; rheumatism.
A woman, æt. 25; tetanic convulsions after measles.
A woman, æt. 25, delicate constitution, has been nursing three months; agalactia.
A woman, æt. 26; threatened abortion.
A woman, æt. 26, robust build, in third pregnancy; threatened miscarriage.

Google

A woman, æt. 28, sensitive disposition; diarrhœa, with colic.
A woman, æt. 30, of vigorous constitution; toothache.
A widow, æt. 30; dysmenorrhœa.
A woman, æt. 34, after vexation; hemicrania.
A woman, æt. 34; post-partum hemorrhage.
A robust woman, æt. 34; ill effects of anger.
A high-tempered, thin young woman; bilious fever.
A woman, æt. 40, exhausted suffering look; neuralgic toothache.
A man, æt. 40, robust and well nourished; sciatica.
A woman, æt. 50, diarrhœa after taking cold; gastric derangement.
A man, æt. nearly 60, addicted to the use of opium; muscular twitching.
A man suffering from painful swelling of left cheek caused by a carious and badly plugged tooth.
A farmer, after intermittent fever, vexation; bilious colic.
A woman, æt. 83; diarrhœa.

[48] **Relations.** Antidoted by: ! *Acon.*, *Alum.*, *Borax*, *Camphor.*, ! *Coccul.*, ! *Coffea*, *Coloc.*, *Conium*, ! *Ignat.*, ! *Nux vom.*, !! *Pulsat.*

It antidotes; *Coffea*, *Opium*. (As long ago as 1830, I gave *Chamom.* in cases spoiled by the use of *Opium* or *Morphia*, at least as an intercurrent before giving other remedies, and mostly with brilliant results. It corresponds to the secondary symptoms of *Opium*, not at all to the primary, and acts better in the lower dilutions. C. Hg.)

Compatible: *Mere. sol.* and *Sulphur* in diarrhœa; *Pulsat.*

Complementary: *Bellad.* in diseases of children. (*Chamom.* acts more on nerves of abdomen, *Bellad.* more on the cranial nerves.)

Campare: ! *Acon.*, *Alum.*, ! *Arnic.*, *Arsen.*, !! *Bellad.*, *Borax*, *Bryon.*, *Calc. ostr.* (dentition), *Caustic.*, ! *Cina*, ! *Coccul.*, !! *Coffea* (oversensitive to pain), *Coloc.*, *Conium* (vertigo in bed), *Cypripedium* (sleeplessness), *Hepar*, *Hyosc.*, *Ignat.* (nervousness, oversensitiveness, etc.), *Lycop.*, *Magn. carb.*, *Mercur.* (diarrhœa, swollen parotid), *Nux vom.* (sour smelling breath, constrictive gastralgia in coffee drinkers), !! *Pulsat.* (gastric and intestinal symptoms, temperament and mood), *Rheum*, *Silica* (nursing children), ! *Sulphur* (burning of soles of feet at night in bed, diarrhœa).

PREFACE.

WE take pleasure in presenting to the medical profession Volume IV of THE GUIDING SYMPTOMS, which, like the preceding volumes, contains a complete collection of the prominent cured symptoms, as well as the characteristic pathogenetic ones, of each remedy, according to the original plan projected by Dr. Hering.

We have added one new feature, however, which will doubtless prove useful to the busy practitioner. At the head of each drug will be found a *clinical index*, giving a list of authorities, and designating the publication in which the full report of each case with its *cured* symptoms may be found.

To many physicians acquainted with the former volumes issued we are indebted for encouraging words of approval of our task, and we send forth this volume on its divine mission, feeling assured that it will prove as useful an aid in healing the sick as have its predecessors.

CHARLES G. RAUE,
CALVIN B. KNERR,
CHARLES MOHR,
} *Editors.*

GUIDING SYMPTOMS

OF OUR

MATERIA MEDICA.

CHELIDONIUM MAJUS.

Celandine. *Papaveraceæ.*

"A perennial plant with a sharp, bitter and burning taste, yielding, when pressed, a yellow, corrosive, milky juice; it grows in hedges and waste places, among stones and rubbish."

Tincture from the fresh root, or of the whole plant.

This remedy, famous in antiquity, preserved its repute through the Middle Ages. It was administered in serious complaints, particularly in hepatic derangement, according to the law of *signatura*, the yellow juice of the plant against the yellow bile and jaundiced look. It was proved by Hahnemann, and later more extensively by O. Buchmann, of Alvensleben (vide Encyclopedia, vol. 3). Its place in the Materia Medica is well defined by numerous clinical reports verifying the provings.

Most symptoms marked π are pathogenetic observations by Berridge.

CLINICAL AUTHORITIES.—*Mental disturbances*, Buchmann, B. J. H., vol. 25; A. C. Clifton, Mon. Hom. Rev., vol. 17, p. 153; *Headache*, Hale, Am. Hom. Obs., vol. 7, p. 536; *Sick headache*, R. Hughes, B. J. H., 1870, p. 796; *Amaurosis* (three cases), Von Schallern, B. J. H., vol. 25, p. 34; *Staphylomatous swelling of cornea*, C. G. Raue, MSS.; *Opacity of cornea* (two cases), Von Schallern, B. J. H., vol. 25, p. 34; *Grey cataract*, Buchmann, B. J. H., vol. 25, p. 35; *Hordeolum and violent inflammation of eyes*, Buchmann, B. J. H., vol. 25, p. 36; *Acute ophthalmia*, F. Ferinat, N. A. J. H., vol. 10, p. 728; *Neuralgia above eyes and in temples* (fifteen cases), Ferinat (mentioned by Buchmann), B. J. H., vol. 25, p. 29; *Prosopalgia*, Buchmann, B. J. H., vol. 25, p. 29; Kanzler (two cases), B. J. H., vol. 25, p. 29; *Facial pustular erysipelas*, Buchmann, B. J. H., vol. 25, p. 227; *Facial vesicular erysipelas*, Dommes, B. J. H., vol. 25, p. 226; *Spasmus glottidis*, Buchmann, B. J. H., vol. 25, p. 64; *Vomiting*, H. M. B., Organon, vol. 3, p. 365; *Persistent vomit-*

ing (two cases), H. M. B., Organon, vol. 3, p. 365; *Bilious vomiting*, C. Neidhard, N. A. J. H., vol. 3, p. 355; *Dyspepsia*, Hale, New Remedies, 1880; *Indigestion*, A. C. Clifton, Esq., Mon. Hom. Rev., vol. 17, p. 152; *Cardialgia*, V. Meyer, B. J. H., vol. 18, p. 268; Buchmann, B. J. H., vol. 25, p. 37; *Hepatic affections*, C. Neidhard, N. A. J. H, vol. 3, p. 354; Buchmann, B. J. H., vol. 25, p. 46; *Fatty liver*, Buchmann, B. J. H., vol. 25, p. 48; *Biliary calculi*, two cases by Creuzbauer; one case by Dommes, B. J. H., vol. 25, p. 38; E. M. Hale, N. A. J. H., 1880, p. 17; *Intestinal catarrh*, Kissel (five cases), B. J. H., vol. 25, p. 50; *Chronic diarrhœa with liver affection*, B. J. H., vol. 34, p. 736; *Helminthiasis*, (three cases), Schallern, B. J. H., vol. 25, p. 221; *Nephritis*, A. J. H. M. M., vol. 2, p. 259; Buchmann, B. J. H., vol. 25, p. 54; *Diabetes mellitus*, A. H. Z., vol. 89, p. 92; *Cases of gonorrhœa and syphilis* treated with the tincture, from Frank's Magazine; *Laryngitis*, Buchmann, B. J. H., vol. 25, p. 56; *Cough*, C. C. Smith, N. A. J. H., vol. 3, p. 354; Kissel (two cases), B. J. H., vol. 25, p. 55; *Whooping cough* (epidemic), Buchmann, B. J. H., vol. 25, p. 60; Muzzy, Organon, vol. 2, p. 116; *Influenza* (three cases), B. J. H., vol. 25, p. 58; *Pneumonia*, Buchmann (five cases), Miller, Teste, Chaillet, Schädler and Krieger, B. J. H., vol. 25, p. 66; *Hepatization of lungs*, Buchmann, B. J. H, vol. 25; *Rheumatism, also Acute rheumatism after confinement*, Buchmann, B. J. H., vol. 25, p. 222; *Rheumatism*, Heyne, A. H. Z., vol. 79, p. 146; *Neuralgia connected with injuries*, Buchmann, B. J. H., vol. 25; *Chorea*, Buchmann, B. J. H., vol. 25, p. 222; *Bilious fever*, Rademacher, and a large collection of cures by O. Buchmann, of Alvensleben, B. J. H., vol. 25; *Bilious fever with hemorrhages*, Comyn, A. H. Z., vol. 36, p. 14; *Autumn typhus*, (epidemic) *with affection of liver*, Rademacher, 1827, see Buchmann, B. J H., vol. 25, p. 206, also Kissel and Loeffler; *Intermittent fever*, Kissel, B. J. H., vol. 25, p. 216; *Icterus*, Rademacher (two cases), B. J. H., vol. 25, p. 41; Kissel (one case), B. J. H., vol. 25, p. 45; *Acne*, Von Schallern, Buchmann, B. J. H., vol. 25, p. 228; *Eczema rubrum*, Buchmann, B. J. H., vol. 23, p. 229; *Superficial ulcer of neck, chest and arms*, Kunzmann, B. J. H., vol. 25, p. 234.

[1] **Mind.** ❙Vanishing of senses.
❙❙Loses her head when she gets out of bed, could not explain why. θInfluenza.
❙Forgets what she wants to do or has done; great absence of mind.
❙❙Sudden excitement with confusion of intellect at night. θIntestinal catarrh.
❙Difficult thinking.
❙Imagines she cannot think and will lose her reason.
❙Thinks she must die.
❙❙Delirium. θInfluenza. θPneumonia.
❙❙Quiet delirium, mostly at night, followed by lethargy which continues through the day.
❙❙Talked incoherently during the fit of anxiety. θErysipelas.
❙❙Stupefaction. θValvular disease of heart.
Whimpering, with headache on l. side.
❙Weeping and despondency.
❙❙Distaste for mental exertion and conversation. θDyspepsia. θIndigestion.

Digitized by Google

▮Sadness and depression of spirits. θHepatic troubles.
▮Anxiety. θChorea. θInfluenza. θErysipelas.
▮Restlessness and uneasiness of conscience; feels that she has committed the unpardonable sin, and that she will be eternally lost.
▮Anxiety: allowing no rest at any employment; ▮▮as if she had committed a crime; fear of getting crazy, with restlessness and heat.
▮▮Anxiety, with a sense of constriction in larynx. θŒdema of lungs.
πDreadful anxiety and uneasiness. θInfluenza.
Sudden anxiety, with strong palpitation.
▮Sudden excitement and confusion of intellect. θIntestinal catarrh.
▮▮Irritability and ill humor.
▮▮Fretful mood, with inclination to weep.
▮▮Is vexed about every trifle and has violent attacks of passionate outbursts of temper.
▮▮Quarrelsomeness.

[2] **Sensorium.** ▮Giddiness in morning and headache on awaking. θIndigestion.
▮▮Vertigo: with bilious vomiting and pain in liver; with confusion of head; with stumbling, as if to fall forward; with mental disturbance; on closing eyes, as if everything was turning in a circle; on sitting up in bed; with shivering over upper part of body; on attempting to rise in morning, keeping her in bed. θInfluenza. θValvular disease. θDyspepsia. θHemorrhoids. θChorea.
▮Confusion in head. θValvular disease.
▮Loss of consciousness. θKidney disease.
▮Fainting. θValvular disease.

[3] **Inner Head.** Shooting in forehead under skin.
Shooting in frontal bone over l. eye; later on l. side of occiput.
▮Hammering, burning, stitching, or tearing pains. θSupraorbital neuralgia.
▮Tensive pain in forehead, as from a band above eyes. θAcute rheumatism.
▮▮Outward pressing pain in forehead.
▮▮Pressive pain in r. side of forehead.
▮Violent pains in forehead above eyes. θInfluenza.
▮Pressure in forehead, extending to orbits, which pain as if sore on moving eyes.
▮Pain extending to forehead and all over head; beginning at 2 or 3 P.M., at its height at 8 or 9 P.M., preventing all sleep or even lying down till nearly daybreak. θAcute inflammation of eyes.

Digitized by Google

Violent neuralgia over r. eye, extending into eye and cheek. θProsopalgia.
Dull frontal headache.
Continuous sharp frontal headache. θHepatic typhus.
Sensation of heat in forehead.
Tearing pain in r. temple, < by motion.
Neuralgic pains in temples, forehead, ears, teeth, eyes and eyebrows.
Tensive pains in temples.
Neuralgia of temple and eyebrow, particularly of r. side.
Pressive pain in r. temple, r. parietal bone and finally over r. eye.
Throbbing in temples.
Ticking like a watch in r. temple.
Violent pain in l. side of head and face.
Periodical shooting pain in l. parietal bone.
Sensation of heat in l. side of head, proceeding from ear.
Stitching pains in vertex, < when walking rapidly.
Periodical stitching, pressing pain in vertex.
Pressing on vertex.
Pinching stitching in r. side of occiput.
Painful throbbing and drawing in occiput.
Tensive sensation in back of head on r. side.
Pain in occiput and nape of neck. θHemorrhoids.
Great heaviness in occiput, with drawing in neck from above downward.
Occiput feels heavy, as if it could not be raised from pillow, at night.
Heaviness in occiput with pressing to l. ear. θHepatitis.
Coldness in occiput, rising up from nape of neck, < when moving; > during rest.
Drawing, pressing-like stitches, extending from l. side of occiput to forehead.
Violent drawing from crown to nape; she is forced to draw up her shoulders, close her eyes and tread lightly.
Violent pain in l. side of head and face, as if cut off at septum and middle of forehead. θProsopalgia.
Pressive headache, with frequently recurring heat of face. θLiver complaint.
Pressure and transient pains under bones of head, even in brain; headache > after eating.
Pulsating headache.
Pain in head with sparks before eyes. θKidney disease.
Pressure in brain, with burning over eyebrows.
Cranium feels too small.
Headache in morning on waking. θDyspepsia.
Headache < in open air, when coughing, blowing nose and stooping.

Digitized by Google

‖Megrim with lethargy. θBright's disease.
‖Heaviness like a weight in different parts of head; on vertex, extending to occipital protuberance, heavy pressure inwardly; weight in forehead as if it was falling outward; occiput seems as if fastened to pillow and broken off from rest of skull; must raise head with hand when sitting up. θLiver complaint.
‖Congestion to cerebellum. θChorea.
Congestion of blood to head; throbbing in temples with great anxiety; repeated attacks of violent throbbing pains from nape to occiput.
‖Dull pain in head.
‖Pressure in occiput.
‖Heat of head. θErysipelas.
‖Heat and confusion of head, with great thirst. θLaryngitis.
Twitching here and there in head.
‖Sick headache every fortnight, with pain in r. hypochondrium, pain < in r. forehead and temple; nausea and bilious vomiting.
‖Vertex feels as if bruised on being touched.

⁴ **Outer Head.** ‖Trembling of head.
πFeeling as if head was drawn forcibly backward. θInfluenza.
‖‖Drawing in nape and occiput. θInfluenza.
‖Scalp very sore at slightest touch. θErysipelas.
‖Head heavy as lead; during exacerbation of pain head drawn to l. side. θProsopalgia.
‖Scalp on crown painful, hot when touched; pain as if in roots of hairs when combed, as if from ulceration.
‖Sensation as if hair stood on end.
‖Falling out of hair.
‖Superficial ulcer on mastoid process subsequent to neuralgia in l. side of head and face; ulceration extends downward to shoulder and breast and across to r. shoulder, has a lardaceous appearance, bleeds readily and discharges thin fetid pus.
‖Severe itching on occiput.
‖Facial erysipelas spreading over hairy scalp; very sore to slightest touch.
Scald head.

⁵ **Sight and Eyes.** ‖Photophobia. θInfluenza. θOphthalmia. θHordeolum. θMeasles.
‖Photophobia, with pain in forehead and eyes.
Flickering before eyes; brilliant specks.
πCandlelight seems very small.
‖Sparks before eyes. θValvular heart disease. θNephritis.

Digitized by Google

‖Dazzling spot before eyes, lachrymation when looking at it. θCataract.
‖Blackness before eyes, with a sensation of fainting. θInfluenza.
‖Misty appearance before eyes. θCataract.
‖Amaurosis from rheumatic troubles, also after suppression of ringworm.
‖Objects appear double. θOpacity of lens.
When reading or writing, letters run together and seem blurred; blackish-grey specks before eyes.
‖Weak sight, cannot distinguish letters. θOpacity of lens.
Looking intently makes eyes water and produces a stupid feeling.
‖Eyes inflamed and very sensitive to light, sees very indistinctly. θProsopalgia.
‖Muscæ volitantes.
‖Amblyopia with vomiting and coma. θRetinitis apoplectica.
‖Eyes dull, dilated pupils. θIntestinal catarrh.
‖Pupils contracted, or contractility diminished.
‖Sensation of burning in eyes, as of a foreign body. θAcute inflammation of eye.
‖Feeling of sand in eyes; tears flow constantly over cheeks. θProsopalgia. θMeasles.
‖Pain in eyes as if pierced with knives. θProsopalgia.
Shooting pains in eyes, first l. then r.; pressure in upper part of eyeballs as if they were squeezed, l. worse.
‖Burning and shooting in eyes. θHordeolum.
‖Pulsating, burning, lancinating pains in eyes.
‖Repeated tearing in l. eye.
‖Tearing pain in l. eye, extending to zygoma, teeth, forehead and temple; first > by pressure, but soon cannot endure slightest touch; periodic, evening in bed. θProsopalgia.
‖Tearing, pressing and stitching in r. and afterwards in l. eye.
πA momentary biting sting in r. eye, changing its place.
‖Neuralgic pain in and above eyes, with lachrymation.
‖‖Right supraorbital neuralgia.
‖Aching in eyeballs on looking up or moving the eyes.
‖Bruised pain in r. eye, from front to back, > by pressure, < from light, air and holding down head. θNeuralgia.
‖Pressing in eyes.
‖Pressure in eyeball. θHepatitis.
‖Severe pressive pain in l. eyeball, in middle of ball, which seems to be so large that the upper lid would not cover it.
‖Sensation of heat in l. eye.

Digitized by Google

Feeling of sand in eyes.
Lamplight aggravates pains of eyes.
Tearing pain in and above eyes; stitches above left.
Pressure in orbits.
Pain in orbits as if bruised on moving eyes.
Stupefying pressure on r. orbit from without in.
Raging pain above edge of r. brow, drawing through eye to cheek and jaw.
Violent pain above eyes. θInfluenza.
Stitches above l. eye.
Pressing pain over l. eye, which seems to press down upper lid.
Pulsating pain in r. eyebrow and temple on waking, preceded by shivering; the pain slight at first increases almost to distraction.
Squinting; loss of power of r. external rectus, eye turned inward.
Distortion of eyes. θPneumonia.
Eyes distorted, with twitching of corners of mouth and diarrhœa. θIntestinal catarrh.
Eye inflamed, sensitive to light, sight indistinct.
Conjunctiva swollen, dark red, as far as cornea. θHordeolum. θWhooping cough.
Whites of eyes of a deep or dirty yellow.
Opacity of lens on r. side, with a small speck on cornea.
Opacity of cornea.
Lens uniformly grey.
Staphylomatous swelling of cornea; water gushes from eye on looking up.
Eye red, burning, protuberant, and watery. θNeuralgia.
Lachrymation. θInfluenza.
Lachrymation, with pains of eyes; from tickling in larynx.
On opening eyes, tears flow over cheek. θFistula lachrymalis.
Increased secretion of Meibomian glands.
Could not open her eyes at all. θProsopalgia.
Inclination and necessity to close lids, which > the pain, without photophobia.
Sticking pain on the inside of lower left lid.
Burning in lids.
Pressure in upper lids; sometimes painful.
Twitching of lids.
Heaviness of lids.
Weight, burning and pressive swelling of lids.
Eyelids sore and swollen, conjunctivæ much inflamed. θProsopalgia.
Lids swollen, red, could open them but little. θHordeolum.

Digitized by Google

Inflammation and nightly agglutination; the lower tarsal edges are red and swollen; dimness of eyes in morning.
‖Left eye sunken, lids separated with difficulty when tears flowed over cheek. θProsopalgia.
Catarrhal inflammation of lids with sympathetic irritation of Meibomian glands.
‖Redness and swelling of margins of lids.
‖Right eyelids inflamed and scabby, cannot open them. θInfluenza.
‖Lower lids bordered by dark blue rings. θIntestinal catarrh.
‖Itching sticking in l. inner canthus.
‖Thick, yellow mucous discharge from eyes. θHordeolum.
‖Agglutination of lids in morning. θAcute inflammation.
‖Eyelashes almost all gone on r. lower lid. θHordeolum.
Fistula lachrymalis.

[6] **Hearing and Ears.** ‖Humming in ears. θValvular disease.
‖Loud roaring in ears, as from a distant storm of wind.
‖Ringing in l. ear while walking.
‖Sensation of wind rushing out of ears.
‖Sensation as if ears were stopped.
‖Deafness associated with hepatic disorder.
Ears obstructed during cough; deafness.
‖Pressure from occiput towards l. ear. θHepatitis.
‖Burning or coldness of ears.
‖Sticking in ears.
‖Sticking and drawing in l. ear.
‖Frequent tearing, extending from r. ear into r. teeth, in afternoon.
Tearing pain in internal ears.
Long-lasting stitch in external ear, going off gradually; tearing in meatus and temporal bone; tearing behind r. ear downward.
‖Itching in r. concha.

[7] **Smell and Nose.** ‖Hallucinations of smell.
‖Dryness of nose.
‖Nose, tongue and throat dry. θInfluenza.
Coryza: dry, nose stopped; fluent, with sneezing.
Thick blood in mucus in morning when blowing nose.
‖Itching of nose and tip of nose.
Twitching and tremor of tip of nose.
Swelling and redness of tip of nose.
‖Fanlike motion of nostrils.
Soreness of nostrils and flow of water from nose, with eruption like measles.
Feeling of soreness in nostrils; dryness and itching, mostly left.

Digitized by Google

Upper Face. Expression: anxious, disturbed; sickly, suffering; collapse of features.
Face collapsed and pale. θProsopalgia. θIntestinal catarrh. θPneumonia.
Countenance sunken, blue around eyes; face pale or greyish or yellow; changed complexion; greyish-yellow complexion.
Dirty grey complexion. θCough.
Pale, dingy yellow color of face. θHepatitis.
Face red and swollen.
Redness in face did not disappear under pressure of the fingers. θErysipelas.
Face bright, then dark red; one cheek red. θPneumonia.
Red, circumscribed spot on r. cheek.
The usual redness of cheeks has a mixture of yellow, of a dark color.
Icteric, bloated face. θDiabetes mellitus.
Greyish-yellow, sallow, sunken countenance. θHepatic affections. θDyspepsia.
Yellow color of face and hands, with yellow whites of eyes. θEnlargement of liver. θJaundice.
Face puffy.
Flushes of heat in face. θMental affections.
Heat in face with dark red cheeks. θPneumonia.
Great and dry heat, most in face. θInfluenza.
Burning of cheeks.
Heat in face with red cheeks and chilliness; with eruption like measles.
Supraorbital neuralgia, < right side; eyes water; throbbing pains; shivering; pains in eyes, head, ears; temples tender on pressure; > from cold water; < from warmth, and at night in bed.
Pains in region of trigeminus, especially supraorbital. θBright's disease.
Violent tearing in maxillary antrum.
Jerking, tearing pain in r. zygoma.
Pain in r. cheek bone, and in upper part of occiput.
Pain in l. malar bone.
Pressure and transient pains in upper maxilla.
Right cheek bone feels as if swollen.
Severe pressure in r. maxilla in night on waking.
Tearing pain in r. maxilla; in antrum of Highmore.
Drawing pain from l. maxilla to l. eye and ear.
Drawing pain in l. malar bone when lying down.
Slight convulsive twitches in face and limbs. θPneumonia.
Twitching of corners of mouth, with distortion of eyes. θIntestinal catarrh.

Digitized by Google

Itching herpes, mostly on chin.
▮Burning pain like nettles, followed by red spots on face, around ears and under chin.
Red elevated spots on cheek, gradually growing larger and darker.
Inflamed sebaceous glands; comedones.
▮▮Red pimples on different parts of face.
▮Inflamed pimples on face, more on chin and cheeks. θLiver complaint.
▮▮On upper portion of r. cheek, many red, elevated pimples, with prominent centres, and rough to touch.
▮▮Vesicles on lip and alæ nasi, forming scabs.
▮Nodular eruptions on face.
▮Face covered with scabs; pale, œdematous. θPustular eruption.
▮▮Acne.

[9] **Lower Face.** Lips burning, dry, chapped, scabby; mouth dry with thirst.
▮Lips and gums pale. θIntestinal catarrh.
▮Brown and dry coating on lips and teeth. θHepatic typhus.
▮▮Herpetic exanthem on lips and alæ nasi. θIntermittent.
Vesicle full of serum on mucous membrane of lower lip.
▮Lower jaw drops. θInfluenza.

[10] **Teeth and Gums.** ▮▮Drawing in upper incisors.
▮▮Drawing pain through middle incisors of lower jaw.
▮Tearing pains from r. ear to r. teeth, afternoons.
Toothache with facial neuralgia; < from warmth and in bed at night; > from cold water; l. lower molars; jerking, tearing in antrum.
▮Toothache, chiefly in whole of l. cheek, < at night.
▮▮Pressure or transient pain in teeth.
▮Gums pale. θIntestinal catarrh.
▮Gums bleed.

[11] **Taste and Tongue.** ▮Mucous pasty taste. θProsopalgia.
Taste: bitter; insipid; pappy; acid.
Taste disgusting or bitter, but not of food or drink.
Taste in mouth bitter, food tasting natural.
▮Bitter taste in mouth. θHepatitis. θMental affections.
Metallic sour taste.
Speech difficult and unintelligible.
▮Tongue narrow, pointed. θDyspepsia.
▮Tongue dried up, brown, cracked. θInfluenza. θPneumonia.
▮▮Tongue inordinately dry or moist, of good natural color, but slightly coated white and sometimes streaky, the shape of it being narrow and pointed. θDyspepsia.
▮Tongue pale, moist, whitish. θIntestinal catarrh.

Digitized by Google

Tongue red on edges and tip.
||Tongue red and sore with raised papillæ. θTyphus.
||Tongue slimy, coated white or grey.
||Tongue thickly coated yellow, with red margin, showing imprint of teeth.
|Tongue covered with thick yellow fur. θLaryngitis. θIntestinal catarrh. θErysipelas.

12 **Inner Mouth.** |Dryness of mouth. θLiver complaint.
||Burning in mouth.
|Salivation, with nausea and giddiness.
|Bitter water collects in mouth.
||Mucus in mouth and tough mucous saliva.
|Mucus flies from mouth when coughing.
|Bad odor from mouth.
|Oozing of blood from mucous membrane of mouth; hemorrhagic vesicles, also hemorrhage from bowels and urethra. θBilious fever.

13 **Throat.** |Sore tonsils. θHepatitis.
Fauces red; uvula and tonsils swollen; shooting in tonsils.
Shooting, burning and scraping in throat.
|Nose, tongue and throat dry. θInfluenza.
|Dryness in throat, with increased thirst.
|Difficult swallowing.
||Choking sensation in throat, < by breathing.
|Choking, as from hasty swallowing.
Great sense of tightness around neck, above larynx, as if parts were constricted, hindering deglutition, but not respiration.
Sensation in throat as after swallowing too large a morsel of food; as if a foreign body was rising in throat, which must be swallowed.
|Hawking up lumps of phlegm, with sensation as if larynx was pressed upon, impeding swallowing.
||Burning in œsophagus.
||Secretion of thin mucus in œsophagus.
||Venereal ulcers in throat.

14 **Appetite, Thirst. Desires, Aversions.** |Loss of appetite. θHepatic affections. θChorea. θInfluenza. θGastralgia. θErysipelas.
|Loss of appetite, with vertigo and confusion of head. θChorea.
||Loss of appetite, with disgust and nausea.
|Great emaciation, with complete loss of appetite. θProsopalgia.
|Thirst. θInfluenza. θErysipelas. θAcute rheumatism. θPneumonia.
Thirst, with dry mouth; or thirstlessness.

Digitized by Google

▮Thirst, with dryness of mouth and throat. θLiver complaint.

▮▮Desire for sour things. θCardialgia.

Longing: for very hot drinks; for wine or vinegar; for milk; for coffee; for beer, which disagrees.

Dislike: to cheese; to meat; to coffee.

[15] **Eating and Drinking.** Milk improves; wine relieves abdominal pain; coffee agrees; hot drinks agree; cold drinks disagree.

Smoking causes burning and acidity from cardia to throat.

▮▮All complaints lessen after dinner.

▮Eating relieves pain in stomach and region of liver. θDyspepsia.

▮▮After dinner laziness and great dislike to work, with sleepiness.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.

▮Belching. θInfluenza. θHemorrhoids. θLiver complaint.

▮Empty, acid or bilious eructations.

▮Constant eructation of wind. θAffection of liver. θCardialgia.

▮Heartburn; with eructations.

▮▮Qualmishness, relieved by belching.

Nausea: after belching; with vomiturition; with heat in stomach; before stool; causes great bodily heat.

▮Great nausea succeeds the violent pain, then eructations follow, which relieve pain if she lies down and does not move. θProsopalgia.

▮Nausea and retching during an attack of anxiety.

▮▮Nausea in hepatitis and vomiting of pregnancy.

▮Retching, followed by sour vomiting. θHepatic typhus.

▮Nausea and bilious vomiting. θSick headache.

Relieved by belching: short breath and anxiety. θGastralgia.

▮Retching during bilious eructation.

▮Retching and vomiting either transient or permanent; sometimes in spells; always with distressing constriction in gastric region.

▮▮Bilious vomiting.

▮Vomiting of tough, or acid or greenish mucus.

▮Persistent vomiting; nothing can be retained but water nearly boiling.

▮Bilious vomiting, giddiness in head, nausea, choking during bilious eructations. θBilious vomiting.

▮Acute gastric or intestinal catarrh preceding pneumonia.

[17] **Scrobiculum and Stomach.** ▮Feeling of anguish in pit of stomach. θHepatic typhus.

Digitized by Google

Scrobiculum sensitive on pressure. θMental affections. θAcute rheumatism.
Awakened by a sense of tightness in scrobiculum.
Pressure in scrobiculum on stooping.
Pressure in scrobiculum, with oppression of chest and difficult breathing. θHepatic typhus.
Persistent pains in scrobiculum; < by motion; > by eructation. θCardialgia.
Griping, pressing pain in and below scrobiculum < from touch.
Throbbing, cramplike pain in pit of stomach; feeling of anguish, difficulty of breathing.
Constriction, tension and sensitiveness in pit of stomach and r. hypochondrium. θHepatic affections. θDyspepsia.
A sharp painful stitch in pit of stomach, which extends through to back.
Stitches in pit of stomach.
Aching, gnawing pain in stomach, with a sense of constriction; < from pressure; > from eating.
Sensation as of an animal wriggling in epigastric region.
Pressure, with distension of stomach.
Constant aching pain in stomach; > after food. θIndigestion.
Pressure and oppression in stomach, drawing up into chest.
Oppressive or cramplike throbbing in pit of stomach, and breathing with anguish.
Constriction, pinching, squeezing pain in stomach; > on drawing up limbs and lying on l. side.
Gnawing, grinding pain in stomach; > from eating. θCardialgia.
Digging pain in region of stomach.
Cutting in stomach; < from pressure and yawning; sour after eating.
Sensation of heat in region of stomach and slight griping.
Cold sensation in stomach.
Nothing can be kept on stomach but hot water.
Gastralgia.

[18] **Hypochondria.** Stitches in region of liver.
Shooting, stitching pains through liver to back; crampy pain in inner angle of scapula. θCongestion of liver.
Pains from region of liver, shooting towards back and shoulder.
Spasmodic pain in region of liver. θBilious vomiting.
Pressive pain in region of liver.
Pain in region of liver, extending quickly downward across navel into intestines. θBiliary colic.

Digitized by Google

▮Biliary calculi; chill; intense pain in region of gall bladder, vomiting and clay-colored stools.
▮Pain in region of liver and spleen.
▮Pain in region of liver > by eating. θHepatic fever.
Dull throbbing in region of liver.
▮Region of liver painful on pressure. θPneumonia.
▮Liver enlarged, indurated, sensitive on pressure.
Fatty liver, border of which extends to navel, with icterus.
▮A kind of numbness in muscles of hepatic region and in whole r. side of neck, face and head.
▮▮Contused pain in r. hypochondriac region.
▮Chronic pain in liver.
▮Right hypochondrium and scrobiculum cordis tense and painful to pressure. θAcute rheumatism. θLiver affections.
▮Left hypochondrium and scrobiculum cordis sensitive to pressure. θMental disturbance.
▮Sense of fulness, pressure and tension in r. hypochondrium. θLiver complaint.
Cutting pains and stitches in hypochondrium, with sense of constriction like a cord.
Clothes feel too tight, causing anxiety from accumulation of wind in throat pressing on diaphragm.

19 **Abdomen.** ▮Griping in umbilical region; then cutting in abdomen and across r. lumbar region, extending to back.
▮▮Severe pain around umbilical region.
▮▮Spasmodic contraction of umbilicus, with transient nausea.
▮▮Pain across umbilicus, as if abdomen was constricted by a string.
▮▮Painful pressure over umbilicus.
▮Retraction of umbilicus, great heat of body, nausea; violent pressing, returning periodically, > from wine.
Coldness and pressing mostly below umbilical region; body cold.
▮Constrictive sensation in hypogastrium, just before passage of turbid urine.
Spasmodic drawing pains in both inguinal regions.
Pinching pain in l. groin.
▮Colic, with nausea and retraction of navel.
▮▮Griping, extending towards chest and back: > by passing flatus.
Cutting in bowels immediately after a meal.
▮▮Jerking, cutting in intestines as from knives without relief from a thin stool.
Burning in bowels.
Pain and rumbling in cæcal region.

Digitized by Google

Rumbling, gurgling, pinching and cutting in bowels.
‖Rumbling followed by diarrhœa.
❙Abdomen distended, feels full and uncomfortable. θIntestinal catarrh.
❙❙Abdominal plethora. θHemorrhoids. θLiver affections.
❙Abdomen sensitive to pressure. θHepatic typhus.
❙Pot-belly. θWorms.
❙Ascites; urine scanty and yellow; palms yellow.
‖Contraction of abdominal walls.
❙Swelling and ulceration of inguinal glands. θSuppressed gonorrhœa. θSecondary syphilis.

[20] **Stool and Rectum.** ❙Frequent discharge of flatus.
❙Diarrhœa, with pain under inner and lower angle of r. shoulder blade. θPregnancy.
Diarrhœa without pain, without urging.
❙Fluid feces, often escape unexpectedly. θIntestinal catarrh.
❙Chronic diarrhœa with liver affection.
❙Stools: brown watery, white watery; green mucous; thin, pasty, bright yellow; pasty, light grey; like rice-water, tinged yellow; pale, slimy; mucous diarrhœa, at night; constipated, like sheep's dung; like dry clay; involuntary; white, clay colored.
❙Yellow watery passages containing flakes of mucus. θHepatic typhus.
❙Slimy, greyish-green diarrhœic stool, comes on involuntarily. θIntestinal catarrh.
❙Stools quite white like thick pap, in children. θCough.
❙Hard, white stools, every 4 or 5 days. θProsopalgia.
❙Grey stool, with slight coloring of urine and absence of icteric symptoms.
❙Flakes, strings, gelatinous lumps; deficiency of biliary coloring matter in stools. θDiarrhœa.
❙❙Diarrhœa and constipation alternately.
❙Constipation. θHepatitis.
❙Hard and whitish-yellow stools. θMental affection.
❙Stool bright yellow and consistent. θCough.
‖Stool very hard and difficult, with pains in anus in consequence.
‖Some blood follows stool.
❙With stool a sensation as if anus was contracted.
❙Round worms. θIntestinal catarrh.
Before and after stool rumbling in abdomen.
❙Burning and cutting in rectum, with constriction of anus, alternating with itching in anus.
‖Periodic straining and pressing on rectum as if before a stool, without result.
‖Drawing in rectum.

Digitized by Google

‖Crawling and itching in rectum and on perineum.
‖Sticking and itching in anus. θHemorrhoids.

21 **Urinary Organs.** ‖Spasmodic pain in r. kidney and in liver; < from 4 to 9 P.M.
Shooting in region of kidneys and of bladder; > lying on face.
Pain in region of kidneys, which are sensitive to pressure, even of clothing.
‖Tenderness in renal region. θBright's disease.
‖Violent pains in direction of ureters, preceding passage of turbid urine.
‖Violent paroxysms of pain in kidneys, with intense headache, vertigo and syncope. θNephritis.
‖Violent pain in hypogastrium and vesical region, not < by pressure. θLiver complaint.
‖Stabbing pains in region of bladder.
Spasmodic pain just above os pubis, with frequent passing of urine.
‖Dragging pain in bladder, with spasmodic, trembling pains in inguinal region.
‖Discharge of pus from urethra. θGonorrhœa.
‖Cutting pain in urethra on urinating and continuing after urinating.
‖Burning in urethra on urinating. θGonorrhœa.
‖Strangury, lasting all day, with scanty urination.
‖Frequent call to pass water, which passes away without being obliged to urinate.
‖Frequent urging to urinate.
‖Urine: profuse, whitish, foaming; red and turbid; dark yellow, clear; lemon yellow, turbid; dark; brownish-red; green.
‖Urine turbid, acid, and yellow as gold. θTyphus.
‖Urine bright yellow, clear and acid. θCough.
‖Urine bright and clear, or turbid, acid and reddish. θAcute rheumatism.
‖Urine reddish, cloudy, with reddish, slimy sediment. θLiver complaint.
‖Urine reddish, turbid, containing fibrin, flakes and sand. θNephritis.
‖Red urine. θLaryngitis.
Urine red, cloudy, with a chalky sediment.
Urine smells acid or ammoniacal.
‖Urine has a resinous odor.
‖Diabetes mellitus.

22 **Male Sexual Organs.** ‖Frequent erections, even during day.
‖Drawing pain: in spermatic cords; in testicles.
‖Sticking in urethra, especially towards orifice.

Digitized by Google

▮Pain in glans.
▮Itching and creeping on scrotum and glans.
▮Redness, heat and swelling of scrotum, with small, flat vesicles, painful to touch, they become moist, next day form dry scales.
▮▮Acne on male parts. θHemorrhoids.
▮▮Eczematous exanthemata on male parts and anus. θHemorrhoids.
Eczema rubrum on scrotum.
▮▮Painful swelling of r. testicle, with tension and drawing in spermatic cord. θSuppressed gonorrhœa.
▮▮Gonorrhœa and secondary syphilis, with ulcerated buboes.

[23] **Female Sexual Organs.** ▮Menses too late; too profuse; pain under right scapula.
Menses retarded, but continue longer than natural.
Amenorrhœa.
▮Burning in vagina, recurring each day at precisely the same hour.
▮Acrid leucorrhœa.

[24] **Pregnancy. Parturition. Lactation.** ▮Longing for unusual articles of food during pregnancy.
▮Milk diminished.
Secretion of milk grows less and less until it entirely ceases.

[25] **Voice and Larynx. Trachea and Bronchia.** ▮Hoarseness.
▮▮Voice weak. θErysipelas.
▮Spasm of glottis on expiration, with cough.
▮Spasm of glottis daily, with profuse perspiration at night.
Spasm of glottis during violent fits of coughing, with expectoration of mucus.
▮Pricking pain in larynx rendering loud speaking impossible.
▮While coughing, pain in larynx and sacrum.
▮Severe tickling in larynx.
▮▮Pressure on larynx, as if air could not pass through; as if swollen; more to the right.
▮Sticking pain in throat in region of larynx.
Shooting and burning in throat and larynx; dull throbbing from congestion.
Constriction in trachea, deadly anguish; desire for eructation.
Choking sensation in throat, < when breathing.
▮▮Sensation as if throat was constricted at larynx.
▮Sensation as if larynx was pressed back upon œsophagus, impeding swallowing.
▮▮Pressure or heat in trachea.
▮▮Irritation to cough in trachea.

Google

Sensation of dust in trachea, throat, and behind sternum, not relieved by cough.
❙Capillary bronchitis.

[26] **Respiration.** ❙Great dyspnœa. θPneumonia.
❙Dyspnœa after awaking out of frightful dreams.
❙Breathes with great difficulty and a loud mucous râle. θInfluenza.
Difficult respiration with short fits of coughing, preceded by pain, first in r. then l. side of thorax.
❙❙Short and quick breathing: with oppression, which is relieved by a few deep inspirations; with anxiety, as if he must choke.
❙Shortness of breath and tight chest. θInfluenza.
❙Respiration improved in evening in bed.
Complaints of anxiety, tightness and pains in r. side during inhalation; on inspiration thorax is not distended.
❙Every day repeated attacks of difficult breathing and constriction of chest. θProsopalgia.
❙Hindrance to breathing as if by a tight girdle.
Tightness and oppression; must loosen clothing; > in open air.
Breathes short from stitch pains in chest.
❙On inspiration it seems as though something was pressing on chest, after dinner.
Bronchial respiration in pneumonia.
Interrupted speech.
❙❙Nightly attacks of asthma with a sense of constriction in chest; region of diaphragm.
Spasm of respiratory muscles of thorax.

[27] **Cough.** ❙Cough: violent, somewhat spasmodic, dry, in paroxysms; hollow, short, exhausting, racking, as in consumption, with much expectoration from lungs, also with pain behind sternum, especially at night; morning, with copious mucous expectoration.
❙Straining cough, < in morning, with much expectoration coming from lungs.
Violent, spasmodic, straining cough, bringing tears to eyes, lasting long, even awaking them from sleep.
❙Cough, with little expectoration; hot spell every evening; great emaciation.
❙Spasmodic cough without expectoration; or, ❙❙with forcible ejection of small lumps of mucus.
❙Cough, with painful contraction of whole abdomen with every cough.
❙Repeated attacks of short cough, with stitches in r. side and difficulty of breathing.
Cough in paroxysms, with burning, shooting pains, and constant tickling in larynx.

Google

Short spells of cough with difficult breathing, with pain first in r. then l. side of thorax.

‖Short cough with a little greyish phlegm. θPneumonia.

‖Painless, racking, fatiguing cough. θHepatic typhus.

Cough, excited by tickling in larynx, bringing tears to eyes; by sensation of dust in trachea, throat, or behind sternum, not relieved by cough.

‖Cough re-echoes in stomach; flying out of detached lumps of mucus when coughing. θWhooping cough.

Cough with short breath; with spasm of glottis on expiration.

Loose, rattling cough, remaining a long time after whooping cough or measles.

‖Loose morning cough, copious mucous expectoration. θPneumonia. θCapillary bronchitis.

Cough with obstruction of ears, deafness.

‖Catarrhal cough.

‖Dry cough through day with pain and stitches in r. side, with severe hoarseness each evening at five o'clock, so that her voice could scarcely be heard.

‖Cough with blood-streaked phlegm, or brownish-bloody sputa. θPneumonia.

Inner Chest and Lungs. Stitches under l. clavicle and in region of r. mamma.

‖Constrictive pressure below l. clavicle extending to neck.

‖Pains, anxiety and tightness in upper part of chest. θPneumonia.

‖Stitches in l. side towards l. scapula.

Burning between chest and scapulæ, with internal heat and want of breath.

Shooting, jerking pains from lower part of sternum through to back.

‖Spasmodic pressure behind middle of sternum, awoke him at night; extended into bronchi, with sensation of constriction in them.

‖Spasm of diaphragm.

‖Pain in sternum, directly over cardiac region, while yawning.

‖Periodic attacks of tightness and pain in chest along sternum. θAcute rheumatism.

‖Pain internally behind sternum, especially noticed on inspiration.

Drawing from lower part of sternum towards r. side around to spine; sore pain, even touch of clothes increases it.

‖Violent stitches in lower portion of r. side of thorax on inspiration, < by motion and by cough.

Google

At 2 P.M. stitches and soreness in lungs, < by deep breathing, coughing or sneezing.
‖‖Stabbing in r. side, close under mammary gland.
‖Stitches in forepart of lower portion of thorax, extending into intestines below navel.
‖‖Stitches under heart.
Violent pain in r. side, in region of seventh and eighth ribs; < by breathing, and movement; followed by burning headache.
Painful tension on deep inspiration, all around inside of thorax at its base.
‖‖Stitches in chest, < r. side.
‖‖Deep-seated pain in whole r. side of chest.
‖Stitches in l. chest on inspiring.
Pain deep down in chest, < on stooping low, quick walking, blowing nose, and sneezing.
‖‖Contused pain in chest, < by motion.
‖Stitches in l. side prevent her from taking a deep breath.
‖‖Pressive pain in l. side.
‖‖Oppression of chest; clothing seemed too tight.
‖‖Tightness of chest during expiration.
‖‖Pressure on chest with dyspnœa.
Motion increases pains in chest.
‖Sudden, great anxiety, with palpitation.
‖‖Soreness in lower ribs, r. side.
Dull throbbing in apices of lungs.
Stinging and soreness in lungs, with sneezing and coughing, or deep inhalations.
‖Inflammation of r. lung, with persistent cough; stitches, bloody expectoration, dyspnœa, and intense headache in forehead and vertex, sleeplessness and delirium, yellow, watery diarrhœa, tongue loaded, great prostration.
‖Lungs full of mucus, great oppression, desire to change place, anxiety; loose, rattling cough; dark red face, one ear cold the other warm, one foot cold the other warm; violent motion of the alæ nasi; palpitation forcible, stools thin, bright yellow. θCapillary bronchitis. θPneumonia.
Shooting, stitch pains, through r. lung to back; short breathing; must sit upright; < during deep inspiration, movement and cough.
‖Hepatization of upper half of r. lung; pale as death; countenance sunken; constant stupor; distortion of eyes; slight convulsive twitches in face and limbs; strong rattle in throat; extreme weakness.
‖Inflammation of lower lobe of l. lung, cough and bloody sputum, dyspnœa and frontal headache. θPneumonia.
‖‖In l. lung soreness like a wound, by deep breathing, coughing and sneezing.

Digitized by Google

❙Hepatization of lungs. θPneumonia.
❙❙Hæmoptysis. θPneumonia.

[29] **Heart, Pulse and Circulation.** ❙❙Lancinating pains in heart.
❙Stitches in cardiac region, must breathe short, followed by strong palpitation and anxiety.
Violent stitches in region of heart.
❙❙Palpitation. θChorea.
❙Violent palpitation with tightness of chest. θMental affections.
❙Very irregular palpitation of heart. θHepatitis. θPneumonia.
❙Beating of heart so strong that clothing is lifted from chest. θHepatic affections.
❙Pulse: slow; small and quick; full and hard, though but slightly accelerated towards evening.
❙Pulse soft, not frequent. θCough.
❙❙Pulse irregular, 130, missed every fifth or sixth stroke. θInfluenza.
❙❙Pulse 100 and full. θAcute rheumatism.
❙Pulse 115, and small. θPneumonia.
❙Stenocardia.

[30] **Outer Chest.** ❙❙Lancinating pains in pectoral muscles.
Stitches in right mammary region.
Depression between ribs less perceptible.
❙Intercostal neuralgia.
❙Skin yellow on throat and chest.
❙❙Superficial ulceration extending downward from l. mastoid process.

[31] **Neck and Back.** ❙Drawing in nape and occiput. θInfluenza.
❙Left half of nape of neck stiff, during periods of exacerbation, head drawn across to left, nape feels as if broken. θProsopalgia.
❙Cervico-bronchial neuralgia.
Neck feels as if constricted or tied with a napkin.
Stiffness of cervical muscles.
❙Pain in r. cervical muscles, and in region of r. clavicle.
❙Sharp, shooting pain in l. side of neck and across temple and over eye; liver sore to touch, with nausea.
❙Pressive pain in muscles of l. side of neck.
❙Heaviness and tension in muscles of nape of neck and in occiput.
❙Stiffness: of neck; of muscles of r. side of neck.
❙Stiffness of neck: on moving head; with painfulness on deep breathing; with cracking of vertebræ on moving neck.
❙❙Stitches beneath r. scapula.

Digitized by Google

Constant pain under lower inner angle of r. shoulder blade, extending into chest or stomach, causing nausea and vomiting. θAmenorrhœa. θPregnancy.

Fixed pain under inner and lower angle of r. shoulder blade, with frightful cough, diarrhœa and exhaustion.

Pressing and oppression in r. scapula, extending through thorax to sternum.

Violent pains at lower angle of l. scapula.

Pain at outer margin of l. scapula.

Violent pains in r. shoulder joint, whence they have extended from scapula.

Percussion dull under l. shoulder blade, covering size of a hand.

Violent tearing pains in back and limbs; < from least touch. θAcute rheumatism.

Violent pains in back from nape to sacrum.

Pains in r. side of back, with painful feeling in occiput, pressing-aching towards l. ear. θHepatitis.

Pinching, cramplike pain in internal border of r. scapula, with a kind of pressing stitch from l. side of occiput to forehead.

Pain in spine between shoulders.

Percussion gives a dull sound on each side of spine. θPneumonia.

Drawing, stiffness and stitches in muscles of back; pain as after excessive exertion.

Burning in back.

Shivering running down back.

Violent pain in back. θInfluenza.

Sensation as if vertebræ were being torn apart when stooping forward, and then bending backward again; also when walking.

Pain like a wound in lower dorsal vertebræ and five lowest ribs on right; < by pressure and movement.

Pain as though lower lumbar vertebræ would separate, when bending forward.

Tearing in lower lumbar vertebræ, extending to iliac bones.

Drawing pain in back and sacrum. θLiver affection.

Pain in sacrum.

Painful drawing in back and limbs. θHepatic typhus.

Drawing from sacrum to r. side of scrobiculum. θGastralgia.

Aching soreness in all the vertebræ; < by motion and by pressure on spinous processes.

Red miliary eruption on neck, chest and arms. θAcute rheumatism.

[32] **Upper Limbs.** Fixed pain under inner angle of r. scap-

ula; often accompanies cough, diarrhœa, pneumonia, menses, loss of milk, exhaustion, etc.
Tearing pain in shoulder and r. arm on moving arm.
‖‖Pain in r. shoulder.
‖|Drawing pain from r. shoulder down to wrist, with coldness and stiffness of arms.
‖Pain in l. shoulder as if sprained or fractured, with cold feeling in upper arm.
‖Pain in l. shoulder, extending into deltoid muscle.
‖Paralytic pain in l. shoulder and in whole of l. arm.
Inability to use r. arm and forearm with much freedom, sometimes attended with tearing pain.
‖|Lancinating pains in upper extremities.
‖|Pain directly over l. elbow joint.
‖|Repeated twitching in r. arm.
πSwelling of elbows as in acute rheumatism. θToothache.
‖|Elbows swollen. θAcute rheumatism.
‖Stiffness in wrist.
‖|Stitches in r. wrist.
‖|Hands hot up to middle of forearm, swollen, with distension of superficial veins.
‖|Drawing pain in dorsum of l. hand.
Tearing in metacarpals and tips of fingers, r. side; < by pressure.
Joints of fingers r. hand yellow, cold, nails blue.
‖|Stabbing, drawing pain in l. index finger.
‖‖Tips of fingers cold.
‖Rheumatic attacks of upper extremities, with black jaundice. θHepatic calculus.
Paralytic heaviness of arms as if weights were hung upon them.
‖Pain in l. shoulder, with want of power in l. arm, which must be kept close to body, because any attempt to move it causes a sensation as if l. shoulder was breaking off. θProsopalgia.

[25] **Lower Limbs.** ‖Shooting pain in r. hip, extending into abdomen, with heat and anxiety. θLiver complaint.
Pains in r. hip when rising from a seat.
‖|Shooting pain in hip joint.
‖‖Drawing pain in hips, thighs, legs and feet, more r. side.
‖Bruised pain from thighs to calves; < on walking and when touched.
Paralytic weakness in l. thigh and knee when stepping.
‖‖Pain in r. knee, with burning and stiffness; < when moving.
‖|Violent pain in l. knee and popliteal space.
Hard pressure in a space of two fingers' breadth below patella.

Digitized by Google

‖Pain in knees, as after a long march.
‖Giving away of knees when standing and walking.
‖Trembling of knees.
Weight in legs as if she could not step out, as if she had to drag a burden.
|Weight in lower limbs. θBright's disease.
|Her legs appear thicker and heavier; fears dropsy.
|Right leg as if paralyzed, feels as if weights were hung upon it. θAcute rheumatism.
|Coldness of legs, with loss of sensation.
Ankles painful, especially the r.; < moving.
|Painful pressure on outside of ankle.
‖Stiffness of ankles.
|Œdematous swelling about ankles.
|Rose colored, elastic swelling of both ankle joints. θAcute rheumatism.
‖Foot highly œdematous, most around ankle; swelling a little reddened and hard over inner ankle. θAcute rheumatism.
|Eczematous eruption on r. ankle, which is swollen, hot, red, moist and itching.
|Feet feel as if paralyzed.
|Cold feet. θAffection of liver. θRheumatism.
|Right foot cold as ice, l. natural. θPneumonia.
Cramp in sole of r. foot, which with toes is bent under; < putting foot down; > by compressing calf.
|Itching in sole of r. foot.
‖Stabbing, drawing pain at under side of l. great toe.
‖Pain in fourth and fifth toes of r. foot.
Toes without sensation, feel dead.
|Intolerable pain in heels as if they had been pinched by too narrow a shoe.

[31] **Limbs in General.** |Twitching in arms and legs.
‖Neuralgia in limbs. θBright's disease.
‖Rheumatism, least touch anywhere is exceedingly painful; sweat without relief.
|Drawing and paralytic feeling in limbs. θLaryngitis.
Wandering pains in joints; < l. side and from motion.
‖Limbs: feel heavy, stiff and lame; feel paralyzed; cold.
‖Sudden uneasiness in all limbs; must move about.
‖Trembling in limbs. θMeasles.
‖Œdematous swelling of limbs. θBright's disease.
‖Limbs flabby. θIntestinal catarrh.
|Cold extremities. θValvular disease.
‖Emaciated legs. θInfluenza.
|Pain in all the limbs, with bruised sensation. θInfluenza.
|Cutting pain in calves and upper arms, alternating with headache and preventing sleep. θEpidemic typhus.

[35] **Rest. Position. Motion.** Rest: > coldness in occiput and nape; > stitch pains.
Lying down: drawing in l. malar bone.
Lying on face: > pain in kidneys and bladder.
Lying on l. side: > pain in stomach.
Standing: knees give way.
Sitting up in bed: vertigo.
Stooping: < headache; causes pressure in scrobiculum.
Stooping and bending back: cause sensation as if vertebræ were being torn apart.
Rising from a seat: pains in r. hip.
Motion: disinclined to move, does so reluctantly; < tearing in r. temple; < coldness in occiput and nape; < pain in scrobiculum; < pains in chest; < pain in lower dorsal vertebræ; < soreness in vertebræ; of r. arm < pain in shoulder and arm; causes sensation as if l. shoulder was breaking off; < pain in r. knee; < pain in ankles; > nervousness.
Walking: ringing in l. ear; < bruised pain from thighs to calves; knees give way; near falling asleep; in open air, chill.
Walking rapidly: stitching in vertex.
When stepping: paralytic weakness in l. thigh and knee.
Getting out of bed: loses her head; vertigo.
Holding down head: < pain in r. eye.
Looking up or moving eyes: causes aching in eyeballs.
Moving eyes: they pain as if sore.
Blowing nose: < headache.
Coughing: < headache.
Drawing up limbs: > pain in stomach.
Putting foot down: < cramp in sole of foot.
Slightest exertion: causes perspiration.

[36] **Nerves.** ‖Restlessness. θErysipelas. θInfluenza.
‖Sudden restlessness of limbs, must move; feet move involuntarily. θPneumonia.
‖Trembling of whole body, with faintness, nausea and anxiety.
‖‖Trembling and twitching of limbs.
‖Pricking as with needles, in different places.
Twitching in muscles on awaking.
‖Subsultus tendinum, with slight delirium. θHepatic symptoms.
‖‖Tonic spasms in flexors of fingers and toes.
General numbness with somnolence.
‖‖Lethargy. θValvular disease.
‖Prostration. θChorea.
‖‖Great debility and lassitude.
‖Great languor and faintness. θInfluenza.

Digitized by Google

Cannot raise himself in bed without assistance.
‖Great weariness and anorexia. θPneumonia. θLiver complaint.
‖‖Weariness, indolence, indisposed to work.
Fainting, with cold extremities.
Aversion to motion; tired from least exertion.
‖‖Great discomfort.
Paralytic drawing and lameness in single parts.
‖‖Neuralgia, particularly r. supraorbital.
‖Neuralgia connected with injuries. θChorea.

[37] **Sleep.** ‖Frequent yawning.
‖‖Sleepy, lethargic in daytime. θJaundice.
‖Constant sopor, with a sunken face. θPneumonia.
‖‖Sleepiness, desire to lie, without being able to sleep.
At 2 P.M. drowsiness so marked even in open air that she was near falling asleep while walking.
‖Falls asleep, while speaking, for several minutes at a time. θLaryngitis.
‖‖Unusual wakefulness towards 4 A.M. from various complaints.
Cannot go to sleep because of a cutting pain in calves and upper arms, alternating with headache.
Cannot sleep because of numbness and coldness of extremities.
‖Sleepless, with headache.
‖‖Wakes up repeatedly, feeling wretchedly.
‖Unrefreshing sleep from vivid dreams about business matters. θDyspepsia.
‖Restless sleep: full of dreams; before midnight.
‖Awakes terrified, by the usual sufferings.
Sweat during sleep, after midnight and towards morning, passing off soon after awaking.
‖Awakes in morning perspiring, after many unremembered dreams. θLiver complaint.
‖Dreams: of corpses and funerals; frequent and vivid; confused.
‖On awaking he cannot remember what he dreamt about.

[38] **Time.** At night: excitement, confusion of intellect; quiet delirium; occiput feels heavy; in bed, supraorbital neuralgia <; on waking, pressure in r. maxilla; in bed, toothache <; profuse perspiration; attacks of asthma; pain behind sternum.
After midnight: sweat during sleep.
Towards 4 A.M.: wakefulness.
4 A.M.: many symptoms <.
Towards morning: profuse general perspiration.
Morning: giddiness; headache; thick blood in nasal mucus; attacks of supraorbital neuralgia; agglutina-

tion of lids; dimness of eyes; cough, with expectoration; straining cough, with expectoration; on awaking, chilliness and cold feet; occasional perspiration; on awaking, spots on face.

Through day: lethargy.

Afternoon: tearing from r. ear into teeth; intermittent fever; dry heat.

2 P.M.: stitches and soreness in lungs; drowsiness.

2 or 3 P.M.: headache begins.

3 P.M.: complete intermission of pain in eye; attack of neuralgia in l. eyebrow and temple; shivering.

4 to 9 P.M.: pain in r. kidney and liver.

5 P.M.: hoarseness.

8 or 9 P.M.: headache at its height.

Towards evening: repeated chill, dry heat; cheeks red, head and l. eye very hot.

Evening: in bed, tearing in l. eye; hot spell; in bed, chill; rigor; after lying down, internal heat without thirst; copious sweat.

During day: frequent erections.

All day: strangury.

[39] **Temperature and Weather.** Renewal of ailments on change of weather.

Warmth: < supraorbital neuralgia; < toothache and facial neuralgia.

Cold water: > supraorbital neuralgia and toothache.

In room: chill passes off.

In open air: headache <; oppression of breathing >; drowsiness; chill, while walking.

Air: < pain in r. eye; airing room caused a chill, pneumonia.

From getting feet wet: ophthalmia.

[40] **Fever.** ▮Internal chill: with severe shaking, evening in bed; when walking in open air, passes off in room.

▮Chill and coldness of whole body; < on hands and feet, with distension of veins.

Towards evening repeated chill.

▮Chilliness, with cold feet, in morning on waking.

▮Shivering from time to time. θInflammation of eyes.

▮Shivering: without external coldness; running down back.

▮▮Shivering, with chattering of teeth.

▮Yawning and shivering before attack. θNeuralgia.

▮▮Skin cool and rough. θIntestinal catarrh.

▮▮Icy coldness of r. foot. θPneumonia.

▮Violent fit of shivering daily, 3 P.M., for a whole hour, with pains in head as from a band tightly bound around forehead and temples. θAcute rheumatism.

‖‖Attacks of rigor in evening. θLiver complaint.
‖Intermittent fever, paroxysm coming every afternoon; hot stage < than cold; bright yellow stool.
‖‖After a severe rigor vertigo and vomiting. θPneumonia.
‖‖Rigor, followed by heat and sorrowful, anxious mood. θValvular disease.
‖Great and dry heat, especially in face; in afternoon, particularly towards evening; rigors; moderate thirst. θInfluenza.
‖Constant chilliness, except towards evening, when cheeks become red and head and l. eye feel very hot; towards morning, profuse general perspiration, so that bed is wet through. θProsopalgia.
‖Violent fever. θPneumonia.
‖Heat: of head and face; on scapulæ; in hip joints.
‖Heat of head, dark red cheeks, pulsation in arteries; full pulse; faintness; difficulty of speech; nausea; short breath; cold feet.
‖High fever; pulse 110; skin burning hot and perspiring; great heat and confusion of head; great thirst; sunken countenance. θLaryngitis.
‖Internal heat without thirst, evening after lying down.
‖Internal and external heat, warm perspiration of face, neck and chest, with vertigo and nausea.
‖‖Burning heat of hands, spreading from thence over body.
Moist burning skin.
‖Skin hot, with watery, sour-smelling sweat. θAcute rheumatism.
‖Perspires from slightest exertion. θHepatic calculus.
Copious evening sweat.
‖Perspiration occasionally in morning. θIntestinal catarrh.
‖‖Sweat during sleep, after midnight and towards morning; > after awaking.
Typhous complication in epidemic bronchitis.

[41] **Attacks, Periodicity.** Periodical: anxiety; shooting in l. parietal bone; stitching, pressing pain in vertex; evening in bed, tearing pain in l. eye; pressure over umbilicus; straining and pressing on rectum; daily at same hour, burning in vagina; daily, spasm of glottis; daily, attacks of difficult breathing; nightly attacks of asthma; attacks of tightness and pains in chest; shivering fit daily 3 P.M.; intermittent, every afternoon; inflammatory swelling of ankle.
Paroxysms: of pain in kidneys; of cough; of rigor in evening; intermittent in afternoon.
Frequently recurring: heat of face.
Repeatedly: tearing in l. eye.

Digitized by Google

Repeated attacks: of short cough.
Every fortnight: sick headache.
Transient: pains under bones of head and in brain; biting sting in r. eye; pains in upper maxilla; in teeth.
Persistent pain: in scrobiculum.
Gradually increasing: supraorbital neuralgia.
Gradually decreasing: secretion of milk.
Going off gradually: stitch in external ear.

" **Locality and Direction.** Left: headache; over eye, shooting; on side of occiput, shooting; side of face and head, violent pain; parietal bone, periodical shooting; from occiput to ear, pressing; from side of occiput to forehead, stitches; head drawn to side; eye pressure <; eyeball seems too large; tearing in eye; stiches above eye; pressive pain in eyeball; heat in eye; stitches above eye; over eye, pressing pain; sticking on inside of lower lid; eye sunken; inner canthus, itching sticking; ringing in ear; sticking and drawing in ear; dryness and itching in nostril; pain in malar bone; maxilla to eye and ear, drawing pain; drawing in malar bone; pain in lower molars and in cheek; hypochondrium sensitive to pressure; pinching pain in groin; pain under shoulder blade; stitches under clavicle; pressure below clavicle to neck; stitches in side towards scapula; stitches in chest; stitches in side preventing a deep breath; pressive pain in side; inflammation of lower lobe of lung; soreness in lung like a wound; ulceration from mastoid process downward; half of neck stiff; head drawn to left; sharp shooting pain in side of neck and across temple and over eye; pressive pain in muscles of side of neck; pains at lower angle of scapula; pain at outer margin of scapula; dull percussion sound under shoulder blade; pressing, aching from occiput towards ear; pressing stitch from side of occiput to forehead; pain in shoulder as if sprained or fractured; pain in shoulder and deltoid; paralytic pain in shoulder and arm; pain above elbow joint; drawing in dorsum of hand; stabbing, drawing pain in index finger; pain in shoulder, with want of power in arm; shoulder feels as if breaking off on motion; paralytic weakness in thigh and knee; pain in knee and popliteal space; stabbing, drawing pain in under side of great toe; wandering pains in joints.

Right: forehead, pressive pain; over and in eye, violent neuralgia; in cheek, neuralgia; temple, tearing pain; temple, pressive pain; parietal bone, pressive pain; over eye, pressive pain; temple, ticking like a watch; side of occiput, pinching-stitching; back of head, r. side, ten-

sive sensation; with sick headache, pain in hypochondrium, and forehead and temple; in eye, biting sting; tearing behind ear downward; itching in concha; pressure on orbit; above edge of brow, raging pain; pulsating pain in eyebrow and temple; external rectus of eye paralyzed; opacity of lens; eyelids inflamed and scabby; lashes almost gone on lower lid; from ear into teeth, tearing; jerking, tearing in zygoma; cheek bone feels as if swollen; pressure in maxilla; red spot on cheek; pimples on upper portion of cheek; tearing pains from ear to teeth; constriction, tension and sensitiveness in pit of stomach; numbness in side of neck, face and head; contused pain in hypochondriac region; fulness and pressure in hypochondrium; cutting across lumbar region; spasmodic pain in kidney and liver; painful swelling of testicle; pain under scapula; pressure on side of larynx; stitches in region of r. mamma; drawing from lower sternum towards side around to spine; stitches in lower portion of thorax; stabbing in side under mammary gland; violent pain in region of seventh and eighth ribs; stitches in chest <; deep-seated pain in whole side; soreness in lower ribs; ▮▮inflammation of lung; shooting stitch pains through lung to back; hepatization of upper half of lung; stitches in mammary region; pain in cervical muscles and region of clavicle; stiffness of side of neck; stitches beneath scapula; constant pain under lower inner angle of shoulder blade; fixed pain under inner and lower angle of shoulder blade; pressing and oppression in scapula; violent pains in shoulder joint; pain in side of back; pinching, cramplike pain in internal border of scapula; drawing from sacrum to side of scrobiculum; pain in shoulder and arm; drawing from shoulder to wrist; inability to use arm with freedom; twitching in arm; stitches in wrist; tearing in metacarpal and finger tips; finger joints yellow, cold, nails blue; shooting pain in hip; pains in hip; drawing in hips, thighs, legs and feet; pain in knee, burning and stiffness; leg as if paralyzed; ankle painful; eczematous eruption on ankle; foot cold as ice; cramp in sole of foot; itching in sole of foot; pain in fourth and fifth toes of foot; foot, icy cold.

First l. then r.: shooting in eyes.

First r. then l.: pains in eyes; pneumonia; pain in thorax; acute rheumatism.

From above downward: tearing behind r. ear; drawing in neck; acute rheumatism.

From front to back; pain in r. eye.

Digitized by Google

From without in: pressure on r. orbit.
Changing its place: biting sting in r. eye.

" **Sensations.** As of a band tightly bound around forehead and temples; as from a band above eyes; as if head was drawn forcibly backward; as if hair stood on end; as of a foreign body in eyes; as of sand in eyes; as if pierced with knives, pain in eyes; as of wind rushing out of ears; as if ears were stopped; as if swollen in r. cheek bone; as if a foreign body was rising in throat; as if larynx was pressed upon; as of an animal wriggling in epigastric region; as if swollen, larynx; as if throat was constricted at larynx; as if larynx was pressed back upon œsophagus; as if broken, nape of neck; as if vertebræ were being torn apart; as after excessive exertion, pain in back; as if shoulder was breaking off; as if sprained or fractured, pain in l. shoulder; as if weights were hung upon arms and legs; as if r. leg was paralyzed; as if occiput could not be raised from pillow; as if cut off at septum and middle of forehead; cranium as if too small; as if forehead was falling outward; occiput as if fastened to pillow and broken off from rest of skull; as if eyeballs were squeezed; l. eyeball seems too large for lid to cover; as if abdomen was constricted by a string; as if anus was contracted; as if breathing was hindered by a tight girdle; neck as if tied with a napkin; as though lower vertebræ would separate; as if toes had been pinched by narrow shoe.

Pain: all over head; in occiput and nape; in forehead and eyes; in malar bone; in scrobiculum; in r. hypochondrium; in region of trigeminus; in region of liver and gall bladder; in region of spleen; severe around umbilical region; in cæcal region; in region of kidneys; in glans penis; under r. scapula; in sternum; over cardiac region; in chest, along sternum; internally behind sternum; deep seated in whole r. side of chest; deep down in chest; under lower inner angle of r. shoulder blade; extending into chest or stomach; at outer margin of l. scapula; in r. side of back; in spine between shoulders; in sacrum; in r. shoulder; in l. shoulder; directly over l. elbow joint; in r. hip; in r. knee; in knees, as after a long march; in ankles; in fourth and fifth toes of r. foot; intolerable in heels.

Pain as if from a deep-seated abscess.

Sharp pain: in frontal region.

External neuralgia.

Neuralgia: over r. eye; in r. eye; in r. cheek; in temples, forehead, ears, teeth, eyes and eyebrows; in limbs.

Raging pain: above r. eye.

Google

Violent pain: in forehead; in l. side of head and face; above eyes; in direction of ureters; in kidneys; in hypogastrium and vesical region; in r. side, region of seventh and eighth ribs; at lower angle of l. scapula; in r. shoulder joint; in back, from nape to sacrum; in back; in l. knee and popliteal space.

Lancinating pain: in eyes; in pectoral muscles; in upper extremities; in heart.

Stitching: in vertex; in r. side of occiput; above l. eye; in r. then l. eye; in external ear; above l. eye; in pit of stomach, through to back; in region of liver; through liver to back; in hypochondrium; in urethra; in chest; under l. clavicle; in r. side; in l. side towards scapula; in lower r. thorax; in lungs; in forepart of lower thorax extending into intestines; under heart; in chest < r. side; in l. chest; in r. lung; through r. lung to back; in r. mammary region; beneath r. scapula; in muscles of back; in r. wrist; in cardiac region.

Pressing stitch: from l. side of occiput to forehead.

Stabbing pain: in region of bladder; in r. side close under mammary gland; in l. index finger; at under side of l. great toe.

Cutting: in stomach; in hypochondrium; in abdomen; across r. lumbar region; in bowels; in intestines as from knives; in rectum; in urethra; in upper arms; in calves.

Sticking pain: on inside of l. lower lid; in ears; and drawing in l. ear; in region of larynx; in urethra.

Itching sticking: in l. inner canthus; in anus.

Stinging: in lungs.

Biting sting: in r. eye.

Pricking: pain in larynx; as with needles, in different places.

Pricking running along different parts of body, lasting half a minute at a time.

Shooting: in forehead; in frontal bone over l. eye; across temple and over eye; on l. side of occiput; in l. parietal bone; in eyes; in tonsils; in throat; through liver to back; in region of kidneys and bladder; in larynx; from lower sternum through to back; through r. lung to back; in l. side of neck; in r. hip; in hip joint.

Tearing pain: in forehead; in r. temple; in l. eye; in and above eyes; in zygoma; in teeth; in r. afterwards in l. eye; in meatus and temporal bone; behind r. ear downward; in internal ears; from r. ear into teeth; violent in maxillary antrum; in r. zygoma; in r. maxilla; violent in back and limbs; in lower lumbar vertebræ to iliac bones; in shoulder and r. arm; in r. arm and forearm; in metacarpals and tips of fingers, r. side.

CHENOPODIUM ANTHELMINTICUM.

Worm Seed. *Chenopodiaceæ.*

A rank, odorous plant, known by the names Worm seed, Stinking weed and Jerusalem oak, grows about waste places in almost all parts of the United States. The tincture is prepared from the fresh herb in flower. The seeds of this species of Chenopodium are in common use as a vermifuge. *Chenopodium ambrosoides*, sometimes confounded with *anthelminticum*, has been employed as a remedy in hysterical nervous affections, particularly chorea, and in Frank's Magazine, vol. ii, is reported a case of paralysis of the tongue, in an old woman, after apoplexy, which had lasted several years; one of aphasia in a young man suffering from nervous prostration after smallpox; one of hemiplegia in a girl, æt. 10, after scarlatina, and in vol. iii, another of paralysis of both feet in a man, æt. 52. In Oestr. Med. Wochenschrift, 1842, No. 28, is reported a cure of right-sided hemiplegia with aphasia in a primipara, æt. 35, of eight weeks' duration. Another species, Chenopodium Botrys, has been used in France in catarrh and humoral asthma.

For remarks by Jeanes (proving by chewing the seed), see Raue's Record, 1872, p. 30.

To Jacob Jeanes the profession is indebted for the principal characteristic of this remedy, the *infrascapular pain, right side;* the same was verified in his proving by olfaction, also clinically by C. Hg.

CLINICAL AUTHORITIES.—*Hemicrania and Tonsillitis*, C. Hering, MSS.; *Asthma*, Jeanes, Hahnemann Monthly, vol 6, p. 332; *Suppressed menstruation*, G. Bute, MSS.

[1] **Mind.** ǀWeeping mood. θSuppressed menses.

[2] **Sensorium.** ǀVertigo with transient vanishing of sight. θHemicrania.

Sense of giddiness in forehead accompanies infrascapular pain.

[6] **Hearing and Ears.** ǀRoaring in ears; deafness; ringing in ears.

[7] **Smell and Nose.** Papular eruption on lower portion of r. naris between ala and column.

[8] **Upper Face.** Pale face, with infrascapular pain r. side.

Digitized by Google

[13] **Throat.** ‖Subacute inflammation of tonsils.
‖Chronic enlargement of tonsils in pale, scrofulous children.
‖Caseous deposits, with painful inflammation of tonsils.
[18] **Hypochondria.** ⁝Hepatic affections.
[21] **Urinary Organs.** ‖Slight pain in region of kidneys.
[23] **Female Sexual Organs.** ‖Menses suppressed; has leucorrhœa instead.
[25] **Voice and Larynx. Trachea and Bronchia.** ‖Soreness in larynx, cannot sing. θSuppressed menses.
‖A rough furry feeling in throat. θSuppressed menses.
[26] **Respiration.** ‖Difficulty of breathing. θSuppressed menses.
[28] **Inner Chest and Lungs.** ‖Pains through breast, under r. scapula, and in r. shoulder.
‖Pain through r. chest, beginning at the attachment of the sixth rib to its cartilage and extending to inferior angle of r. scapula.
⁝Cough, with expectoration and rattling of phlegm.
[31] **Neck and Back.** ‖‖Pain beneath the point of the r. shoulder blade, with sense of giddiness in forehead, ringing in ears and pale face.
‖‖Slight dull pain a little lower down than the inferior angle of the r. scapula, but nearer the spine. θHemicrania. θAsthma.
[32] **Upper Limbs.** Pain in r. shoulder.
[40] **Fever.** ⁝Fever after a fright.
[41] **Attacks, Periodicity.** Attacks of right-sided hemicrania return at intervals of from one to five weeks.
[42] **Locality and Direction.** Right: pain in side of head; eruption in naris; pains under scapula and in shoulder; pain through chest to inferior angle of scapula.
[43] **Sensations.** Pain: in r. side of head; in region of kidneys; through breast; under r. scapula; in r. shoulder; through r. chest.
Neuralgic pain: in head and eyes.
Soreness: in larynx.
Dull pain: below inferior angle of r. scapula, near spine.
Dull pressive pain: in vertex and through head.
Rough, furry feeling in throat.
[46] **Skin.** ⁝Dropsy.
[47] **Stages of Life, Constitution.** Pale, scrofulous children, with inflamed and swollen tonsils.
Mary S., æt. about 20; suppressed menstruation.
‖A man, æt. 35; hemicrania.
Old lady; asthma.

CHENOPODII GLAUCI APHIS.

See Aphis, Vol. I.

CHENOPODIUM VULVARIA.

Stinkender Gänsefuss. *Chenopodiaceæ.*

"This plant has an odor of decaying fish, and contains a large amount of Trimethylamine (Propylamine)."—Allen's Encyclopedia.

Recommended: by Cullen; by Jahn (decoction) in uterine complaints; by Houlton (extract), in 1829, for disturbances of uterine life, insufficient menstruation, hysteria, etc.; by Helbig (the tincture), in nocturnal enuresis.

Provings, in 1846, with 10 drops of the tincture, by C. Hering on himself and son Max, ten years old, also clinical verifications.

Proving by E. W. Berridge, on Mr. J. R. Croker, Malvern, Worcestershire, with 30 to 40 grains a day of the extract from the entire plant, excepting the root, for three weeks.—Mon. Hom. Review, vol. 15, p. 297.

[2] **Sensorium.** Feeling of dulness, commencing in both sides of head behind ears, going upward.
Dulness more in back part of head, upper part of occiput, particularly behind both ears.
The dulness or fulness in head returns in waves, and is worse in back part of head.
[3] **Inner Head.** Tenderness in l. parietal region.
Pressure, first on l. parietal region, posterior portion, then on vertex.
Pain in l. parietal region.
In occiput sense of dulness coming in waves.
[6] **Hearing and Ears.** Dull feeling in ears and region of ears; sensation in r. ear as if muffled by an obstruction within.
[11] **Taste and Tongue.** Peculiar sensation in tongue as if enveloped by saliva.
[12] **Inner Mouth.** Saliva feels cold, particularly in l. side of mouth.
Constant cold saliva.
[14] **Appetite, Thirst. Desires, Aversions.** Unusual thirst.
[15] **Eating and Drinking.** Dulness and yawning, > after eating.

Digitized by Google

Better after drinking wine.

[17] **Scrobiculum and Stomach.** Sensation of fulness in stomach and scrobiculum.

Acidity with pain in stomach and epigastrium, extending to l. side into chest, while in school.

[18] **Hypochondria.** Stitches in upper part of region of spleen while walking.

[19] **Abdomen.** Cooling sensation, which is felt first in mouth, later in hypochondriac region, and finally in abdomen.

Twitching in l. abdomen, extending towards groins, followed by pain in l. forearm.

[20] **Stool and Rectum.** Increased action of bowels, not amounting to actual diarrhœa, sometimes attended with griping.

Urging to stool; stool softer than usual.

Constipation improved.

Often constipation, bowels not acting for three or four days, and then with difficulty; constipation was accompanied by external piles.

[21] **Urinary Organs.** Increased secretion of urine of offensive odor.

Urging to urinate.

Nocturnal enuresis improved the first night.

[22] **Male Sexual Organs.** Increased sexual desire, followed by diminished desire and erectile power, though secreting power of testicles was not diminished.

[23] **Female Sexual Organs.** Amenorrhœa.

[28] **Inner Chest and Lungs.** Fulness in chest in region of last ribs.

Feeling in lower lobe of r. lung, as if some fluid wanted to discharge itself into region of duodenum.

[31] **Neck and Back.** Very severe stitching-pressing in r. side of back, > on bending backward.

Sensitive spot in back, in region of l. hypochondrium, soon after having eructated.

Pain directly over spinous process of l. scapula, as if pressed by two or three fingers, well marked but transient.

Pain in middle of back, on r. side of spinal column, increasing gradually to a pressing, wedgelike pain, beneath r. scapula, < when sitting.

Painful feeling of weariness and weakness in lumbar and lower dorsal region.

[32] **Upper Limbs.** Weakness in hands and arms.

Twitching of l. forearm while sitting still.

Jerking pain through l. forearm like electric shocks, but without muscular contraction, shoots from the forearm to the fingers.

Pain on inner side of l. forearm, deep in.

Digitized by Google

Pain in middle of l. radius, particularly severe in small spot.

Stitch in second joint of r. index finger.

[33] **Lower Limbs.** Pricking here and there in legs, and also in other places, compelling him to move.

Pricking and restless feeling in legs in evening; also pricking in other parts of body, causing him to jump; this is accompanied by feeling of fulness, which makes him feel uneasy and restless.

Pain in anterior inner side of l. thigh.

Stitching pain through r. knee while walking.

Pain in r. ankle; severe stitch from within outward.

[35] **Rest. Position. Motion.** When sitting: pain in back <; twitching of l. forearm.

Bending back: > stitching-pressing in r. side of back.

While walking: stitches in spleen; stitches through r. knee.

Compelled to move: by pricking in legs and other places.

[36] **Nerves.** Lassitude and heaviness through body.

Sensation of heaviness in whole body, which goes through all the limbs, causing a feeling of dulness and languor.

[37] **Sleep.** Yawning.

Frequent yawning preceding lassitude and heaviness.

Somnolence with weakness and lassitude in entire body.

Somnolence with deep inspirations and yawning.

[38] **Time.** In evening: pricking and restless feeling in legs.

[41] **Attacks, Periodicity.** In waves: dulness or fulness in head; dulness in occiput.

[42] **Locality and Direction.** Left: tenderness in parietal region; pain and pressure in parietal region; saliva feels cold in mouth; pain in stomach and epigastrium extend into chest; twitching in abdomen; pain in forearm; sensitive spot in back, region of hypochondrium; pain over spinous process of scapula; twitching of forearm; jerking pain through forearm like electric shocks; pain on inner side of forearm; pain in middle of radius; pain in anterior side of thigh.

Right: muffled sensation in ear; as if fluid wanted to discharge from lower lobe of lung into duodenum; stitching-pressing in back, on side of spinal column, in middle of back; stitch in second joint of index finger; stitching through knee; stitch in ankle.

Both sides: dulness behind ears.

Going upward: dulness behind ears.

Within outward: stitch in r. ankle.

[43] **Sensations.** Sensation in tongue as if enveloped by saliva.

As if fluid wanted to discharge into duodenum from lower lobe of r. lung; spinous process of l. scapula as if pressed by two or three fingers.

Digitized by Google

Pain: in l. parietal region; in stomach and epigastrium, extending to l. side of chest; in l. forearm; over spinous process of l. scapula; in middle of back to r. of spine; inner side of l. forearm; in middle of l. radius; in anterior side of l. thigh; in r. ankle.
Stitch: in spleen; in second joint of r. index finger; through r. knee; from within outward in r. ankle.
Stitching-pressing: in r. side of back.
Shooting: from forearm to fingers.
Pricking: here and there in legs; in various parts.
Jerking pain: through l. forearm like electric shocks.
Twitching: in l. abdomen to groins; of l. forearm.
Griping: in bowels.
Wedgelike pain: beneath r. scapula.
Pressure: l. parietal region; on vertex; as from two or three fingers over spinous process of l. scapula.
Tenderness: in l. parietal region.
Sensitive spot: in back, region of l. hypochondrium.
Fulness: in stomach and scrobiculum; in chest, region of last ribs; in legs.
Muffled sensation: in r. ear.
Painful weariness: in lumbar and lower dorsal region.
Heaviness: through body.
Cooling sensation: in mouth; in hypochondriac region; in abdomen.
Coldness: of saliva.
Dulness: in both sides of head, behind ears; in upper part of occiput; in region of ears.

[48] **Relations.** "Exhales pure ammonia during its whole existence."
Compare: *Amm. carb.*

CHIMOPHILA MACULATA.*

Spotted Wintergreen. *Pyroleaceæ.*

Grows in the woods of North America. Proved by George H. Bute on himself and members of his family, also clinically verified by him. Provings by Dr. H. P. Gatchell, in A. O., vol. xiii, p. 75, 1876. Prof. H. C. Wood, in his Materia Medica, p. 476, pronounces it "the *inert* congener of Chimophila umbellata." The United States Dispensatory, Wood & Bache, says, "it probably possesses similar virtues." The *umbellata* and the *maculata*, although easily distinguished, have been strangely mixed up, or still more strangely separated. By some the maculata has been pronounced inert. The Indians declared it to be poisonous. If the latter opinion rests on correct observation and experience, it could only be explained by the supposition that the *maculata* has volatile properties which the other has not. Both the Chimophila maculata and umbellata are old Indian and popular medicines. They are proved by Jeanes and G. Bute as long ago as 1840 and 1856. It was particularly the latter prover who began to separate the symptoms of the two. The Indian doctors used only the umbellata and avoided the maculata, which they thought poisonous, a difference which to us would be a recommendation. Darlington, Flora Cestrica, says, "maculata possesses properties similar to the umbellata, but in a lesser degree." Rafinesque, a good authority, regards the effect in sickness, preferring maculata (mentioned in his book as a Pyrola), and gives each to a different sub genus, calling the maculata Chimophila and the umbellata Pipsissewa.

[2] **Sensorium.** Momentary unconsciousness.
‖Sudden headache with dimness of vision; she had to be led to bed; felt light-headed.

[3] **Inner Head.** ‖Sensation of lightness in head.
Pressing frontal headache; < after lying down.
‖Sudden headache above eyes; < on lying down.
‖Frontal headache with fulness in stomach and belching.
Pain in and above forehead.
Rheumatic tearing pain in temples.
Dull, heavy pain in whole front and top of head.
Sharp pains and heat in interior of head, unfitting for exertion.
Wants head pressed.
Headache with pain in bowels.

---

* It is against the genius of the Greek language to spell Kreosote with an a (see Gross' Comparative Materia Medica), and a scholar will never adopt such Ballhornian improvements (see N. J. Lucas' Dictionary of English and German language, vol. ii, p. 239), and yet we find the same blunder, in a reversed form, committed in spelling the Greek name of this dear little wintergreen.

[5] **Sight and Eyes.** Inflammation of eyes, with secretion of mucus.
Whites of eyes yellow.
[6] **Hearing and Ears.** Pressive pain, as from a swelling, extending from r. ear downward, with toothache.
[10] **Teeth and Gums.** Toothache; < during eating.
[13] **Throat.** Tensive pain in throat on swallowing.
Sore throat and swollen tonsils.
[14] **Appetite, Thirst. Desires, Aversions.** No desire for food.
Extreme gnawing hunger.
No thirst, even during fever.
[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea accompanies colic.
Nausea, with inclination to vomit without being able to do so.
[17] **Scrobiculum and Stomach.** Stitches in scrobiculum.
The acid of fruit produces pain in stomach.
Cutting pain in stomach.
Heaviness in stomach.
[19] **Abdomen.** Griping in abdomen, with nausea and lassitude in all the limbs.
Colic and flatulent distension, with drowsiness and sensation as if abdomen would burst, after supper.
Colic with nausea.
Sensation of a heavy stone in abdomen; severe griping, with repeated stabbing pains upward, followed by diarrhœa.
Coliclike pains between pubes and navel.
Pain in bowels.
Bowels hard and swollen; thinks the glands are swollen.
Bowels very painful, sore and hard.
Feels as if there was dropsy of abdomen.
[20] **Stool and Rectum.** Colicky pain after stool.
Diarrhœic stools containing air bubbles.
Grey stool.
Diarrhœa accompanying worm fever.
After colic pains, a diarrhœa, not very weakening.
[21] **Urinary Organs.** Had to rise twice a night to urinate.
Urine cloudy and red after standing.
[22] **Male Sexual Organs.** Excitement of sexual system.
[23] **Female Sexual Organs.** Stinging in labia, as if boils were there.
[25] **Voice and Larynx. Trachea and Bronchia.** Feeling of roughness in throat when talking.
Feeling of soreness and dryness in larynx.
Hawking of tough mucus from larynx in morning.
[26] **Inner Chest and Lungs.** Angina with stupor.

Digitized by Google

[29] **Heart, Pulse and Circulation.** Blood as if heated, with prickling.

[31] **Neck and Back.** Feels as if neck was tired and too small.
Sweat on back, with sensitiveness to cold air in morning.
Needlelike pains in sacrum and similar pains in hip bone.

[32] **Upper Limbs.** Sensation in armpits, as if boils were there.
Sensation of swelling in armpits; pain from armpits to scapulæ.
Pain in bones of forefinger.
Right arm as if paralyzed.

[33] **Lower Limbs.** Chilliness of knees.
Cold, damp feet in evening.
Painful stiffness in r. hip and leg as if bruised, at 5 P.M.
Pain as if beaten in calf and thigh, going downward in r. leg and coming up in left.
Pain in r. foot, extending to knee and afterwards into thigh.

[34] **Limbs in General.** Weakness in all the limbs.
Limbs feel as if distended; a feeling like that from erysipelas.
Pains as if in all the bones.

[35] **Rest. Position. Motion.** Lying down: headache <.
Exertion: < headache.

[36] **Nerves.** Very nervous; cannot bear anything at all.
Hot, irritable, restless.

[38] **Time.** At night; rose twice to urinate; dry heat.
Morning: hawking of tough mucus.
5 P.M.: painful stiffness in r. hip and leg.
Evening: cold, damp feet.

[39] **Temperature and Weather.** Feels better in a warm room without being chilly.

[40] **Fever.** Dry heat during night.
Fever, with burning hot skin and thirst.
Exceedingly hot, as if blood boiling, but cannot sweat.

[41] **Locality and Direction.** Sensation as of something passing downward on r. side of body and coming up again on l., within the space of an hour.
Beaten feeling goes down r. leg and comes up left.
Going upward: pain from r. foot to knee and thigh.
Right: pressive pain from ear downward; arm feels paralyzed; painful stiffness in hip and leg.

[43] **Sensations.** As if boils were in labia and in armpits; arm as if paralyzed; as if neck was tired and too small; as if beaten, in calf and thigh; as if distended, limbs, like erysipelas; as if blood was boiling or on fire; as of something passing down r. side of body and up left; as if abdomen would burst.
Pain: in and above forehead; in bowels, with headache;

Digitized by Google

in teeth; in throat; in stomach; in bowels; from armpits to scapulæ; in bones of forefinger; in r. foot, knee and thigh; in bones.
Sharp pain: in head.
Stitches: in scrobiculum.
Stabbing: upward in abdomen.
Cutting: in stomach.
Stinging: in labia.
Needlelike pains: in sacrum and hip bone.
Prickling: in blood.
Griping: in abdomen.
Colic pains: between pubes and navel; after stool.
Rheumatic tearing: in temples.
Pressure: frontal headache, as from a swelling from r. ear downward.
Dull, heavy pain: in front and top of head.
Soreness: in throat; in larynx.
Tensive pain: in throat.
Swelling sensation: in armpits.
Fulness: in stomach.
Lightness: in head.
Painful stiffness: in r. hip and leg as if bruised.
Heaviness: in stomach; as of a stone in abdomen.
Roughness: in throat.
Heat: in head.
Chilliness: of knees.
Paralyzed feeling: in r. arm.
Dryness: in larynx.

[45] **Touch. Passive Motion. Injuries.** Wants head pressed.

[46] **Skin.** Exceedingly hot as of blood boiling, but cannot sweat.
Thinks diseased state of the blood irritates the skin, as before the eruption of erysipelas, scarlet fever, or measles; itches terribly.

[47] **Stages of Life, Constitution.** Adapted to mild, amiable, refined, sensitive, intellectual persons.

CHIMOPHILA UMBELLATA.

Pipsissewa, Prince's Pine, Ground Holly. *Pyrolaceæ.*

Grows in all parts of the United States and in Northern Europe and Asia. The Pyrolaceæ are very similar to the Ericaceæ from which we have the three great medicines, *Ledum palustre*, proved by Hahnemann, *Rhododendron chrysanthum* by Seidel, and *Kalmia latifolia* by the Allentown College; Arbutus uva ursi (Arctostaphylos officinalis) is still waiting for a prover.

Used by the aborigines in various complaints, principally scrofula, rheumatism and kidney affections. It was also a popular remedy with European settlers.

Proved by Jeanes, in 1840; by G. Bute, 1856, and later introduced into our literature by E. M. Hale.

Dr. H. P. Gatchell (one of the provers of the maculata) has made clinical use of it.

This collection contains a few symptoms by E. P. Scales, Mass. Trans., vol. 4, p. 601.

Our learned Doctor S. A. Jones has, in his masterly way, given us the history of this plant. We annex the gist of his compilation:

In 1578, it was recommended "to heal wounds."

In 1633, "fistulas, malignant ulcers, burns, ulcers of the kidneys."

In 1640, again for ulcers of the kidneys and neck of the bladder, fluxes of blood, humors, or women's too abundant courses. "It taketh away inflammation rising upon the pains of the hurt, and hindereth any, being presently applied after the hurt received; useful also for foul ulcers hard to be cured, as also for cankers and fistulas."

In 1657, it was pronounced a principal herb for the throat.

In 1804 and 1814, it was recommended as a useful diuretic.

The authorities quoted by Dr. Jones are Dodoen's History of Plants; Girarde, General History of Plants; Parkinson, The Theatre of Plants; Cole's Paradise of Plants; Tournefort's Complete Herbal; Barton's Collection for an Essay towards Materia Medica of the United States.

The Huron and other Indian nations use it as a diuretic and in gravelly complaints.

Pursch, Flor. Amer., says it is useful in hysteria.

CLINICAL AUTHORITIES.—*Toothache*, C. Hering, MSS.; *Obstinate vesical irritability*, E. M. Hale, Am. Hom. Obs., vol. 4, p. 92; *Constant pain in region of kidneys*, Hull, Am. Hom. Obs., vol. 4, p. 116; *Dysuria*, E. M. Hale, New Remedies; *Urethral irritation*, Taber, Organ., vol. 1, p. 223; Fellger, MSS.; *Urinary difficulty*, Kendell, Am. Hom. [3] **Inner Head.** Pain in l. frontal protuberance.
[4] **Outer Head.** ; Tinea capitis.
[5] **Sight and Eyes.** Halo around the lamp flame.
Eyes painful.
πSudden stitch in front part of both eyes, from r. to l.; eyes run water.
Stabbing or shooting pain in l. eyeball.
Itching and smarting of edges of eyelids, and inside of eyelids.
Itching of l. eye.
Stinging pain in l. eye; a colored halo around the candle.
Blue rings around eyes.
Pterygium; cataract.
[6] **Hearing and Ears.** Pain in r. ear.
[8] **Upper Face.** ‖A flushing of cheeks with some general heat, and accelerated pulse.
Pain at lower edge of zygomatic process of l. superior maxillary bone, above second bicuspid tooth, sore on pressure.
[10] **Teeth and Gums.** Continuous pain in upper teeth, extending into r. eye.
Drawing in an upper and lower tooth, as if it was being gently pulled.
‖Toothache, < after eating and from exertion.
‖Cannot close teeth at night, jaws feel stiff, sleeps with open mouth. θToothache.
‖Toothache, > by cold water.
[11] **Taste and Tongue.** Pungent, bitter-sweet taste.
Smarting of tongue.
Tongue sore, full of little vesicles; great thirst and desire to cool tongue.
πTongue furred, more towards root, no appetite.
[12] **Inner Mouth.** Vesicular ulcers in mouth.
[13] **Throat.** πPalate sore, very sensitive to warm drink or food.
Rawness of upper and back part of palate.
[14] **Appetite, Thirst. Desires, Aversions.** Great increase of appetite.
Much thirst; desire to cool tongue.
[15] **Eating and Drinking.** Poor digestion.
Eating aggravates toothache.
[17] **Scrobiculum and Stomach.** ‖Agreeable sensation in stomach, soon after, followed sometimes by an extraordinary increase of appetite.
[18] **Hypochondria.** Aching pain below r. hypochondrium whilst writing.
; Hepatitis.
‖Organic disease of liver with ascites.
[19] **Abdomen.** ‖Abdominal and renal dropsies, in broken down constitutions and intemperate subjects.

Digitized by Google

‖Ascites and swelling of legs.
⁞Atonic or passive dropsies.
Abdomen bloated.
‖Ascites in consequence of organic affection of liver.
‖Scrofulous swelling of abdominal glands; enlarged mesenteries.
Worm troubles.

[20] **Stool and Rectum.** Griping after stool.
Sticking pain in rectum, l. side, deep in.
Shooting pain, deep-seated, in l. side of anus; more internal than a pile, which at times protrudes there.
Bloody mucous stools.
⁞Diarrhœa.
Inclination to stool either ineffectual or attended with great pain.
‖Obstinate constipation. θRenal disturbances. θCystitis.
‖Constipation and hemorrhoids. θDysuria.
‖Constipation, stool every third day. θVesical irritability.
‖Sensation of swelling in perineum on sitting down, as if a ball was pressing against it. θUrinary troubles.
‖Acute prostitis from sitting on a cold, wet stone; pain and dysuria, which increased to complete retention from swelling of prostate; pain and soreness in perineum, with sensation as if sitting on a ball.
‖Ineffectual urging to stool. θDysuria.

[21] **Urinary Organs.** ‖Constant pain in region of kidneys; urine scanty, dark colored, fetid, and very thick, depositing a copious sediment; obstinate constipation.
‖Frequent desire to urinate, with scanty urine. θUrinary difficulty.
‖Vesical tenesmus, from prolapsus or retroversion.
‖Pressing fulness in region of bladder. θNephritis. θCystitis.
‖Strangury.
‖Constant disposition to urinate; as often as every hour or two; passes only a small quantity.
‖Urging to urinate after voiding urine. θNephritis, etc.
⁞Retention of urine.
‖Difficult urination, cutting, scalding pain; sometimes stream is split, at other times small as a thread, or in drops. θStricture.
Inability to pass urine without standing with feet wide apart and body inclined forward.
‖Catarrhal affection of bladder.
‖Urethritis with purulent or profuse mucous discharge.
Copious, clear, limpid urine.
‖‖Great quantities of thick, ropy, bloody mucus in urine.

Digitized by Google

‖Color of urine changed from that of brickdust to green tea.
πGreenish-black color of urine. θAgue.
Urine thick, ropy, of brick color.
‖Urine scanty, frequently voided with much pressing pain before, scalding and smarting during and after, and vesical tenesmus. θDysuria.
‖Burning, pricking pain during emission of urine. θObstinate vesical irritability.
‖Urine high colored, depositing a copious mucous sediment. θDysuria.
‖Tenderness of anterior portion of vagina (bladder) and urethra. θDysuria.
‖Constant urging to urinate without sufficient discharge; catheter will not enter; < when sitting, walks about.
‖Causes mucous sediment to disappear from urine. θCystitis. θNephritis. θDropsy, etc.
‖Scanty urine, with muco-purulent sediment.
⁞Lessens lithic acid or lithates, while it increases renal secretion. θUrinary difficulty.
‖Albuminuria occurring during Bright's disease.
⁞Advanced stages of albuminuria.
‖Hæmaturia from long-lasting gonorrhœa.
‖Clots of coagulated blood pass with urine.
⁞Chronic nephritis; diabetes; gravel.
‖Dropsy from renal disease.

[22] **Male Sexual Organs.** ‖Smarting pain from neck of bladder whole length of urethra to meatus.
‖Excessive itching and painful irritation of urethra from end of penis to neck of bladder. θUrinary difficulty.
Burning in urethra.
Atrophy of testicles.
‖Sensation of swelling in perineum, as if in sitting down a ball was pressing against it. θUrinary difficulty.
‖Disease of prostate with waste of prostatic fluid.
⁞Gonorrhœa; chronic gleet; syphilis.

[23] **Female Sexual Organs.** ‖Prolapsus and slight uterine leucorrhœa. θDysuria.
⁞Leucorrhœa.
Vaginal prolapsus.
‖Rapid atrophy of breasts.
‖Atrophy or tumors of mammæ.
‖Lump in left breast broke, leaving small, irregular ulcer with ragged, everted edges, sloughing and discharging fetid pus. θCancer of breast.
‖Scirrhous tumor of r. breast, about an inch in diameter; hard, but movable; nipple drawn in; a good deal of sharp pain in tumor and in axillæ.

Digitized by Google

πTaken as tea for cancer on breast, three years after cessation of menses, she had soon a slight return, three weeks later a copious flow, and another two weeks later.

ıPainful tumor of mammæ in a young unmarried woman.

[24] **Pregnancy. Parturition. Lactation.** Undue secretion or suppression of milk.

[28] **Inner Chest and Lungs.** Dull pains under middle of sternum.

Pain in r. side, ribs, and integument below axilla.

Tuberculosis of lungs.

⁝Hydrothorax.

[31] **Neck and Back.** ııA most uncommon sensation in small of back, in region of kidneys; sometimes on one side of spine, sometimes on other, as if something was fluttering within, without occasioning pain or uneasiness of any sort.

On back and thighs painless dark red pustules which do not suppurate.

[32] **Upper Limbs.** ıAcute rheumatism of shoulder.

Pain in r. arm about upper half of biceps and shoulder joint.

Pain in lower part of l. arm.

Œdematous swelling of r. arm as in dropsy.

Stinging in swelling on arm.

Swelling in arm feels better when uncovered.

Fistulous ulcer on r. forearm, with stinging and crawling.

Paronychia.

[33] **Lower Limbs.** An opening and shutting pain, slow pulsatory, in middle of anterior part of r. thigh, very singular, and leaving a severe aching and a tenderness on pressure, whilst lying down.

Pain in flexors of l. knee, extending around thigh, immediately above patella; pain as if limb was severely grasped.

Bruised sensation in calves and thighs.

Cold feet in evening.

⁝Ischias.

[35] **Rest. Position. Motion.** Lying down: pain in thigh.

On sitting down: as if a ball was pressing against perineum; urging to urinate <.

Writing: aching below r. hypochondrium.

Exertion: < toothache.

[36] **Nerves.** ıInward trembling without mental disturbance. θToothache.

ıStrength improved. θLiver complaint.

⁝Torpor and debility with kidney affection.

Hysteria.

[37] **Sleep.** ıWould have slept well if he had not been constantly waked by calls to make water. θVesical irritability.

Google

Great drowsiness.

‖Sleeps with open mouth, cannot close the jaws. θToothache.

[38] **Time.** At night: cannot close teeth.

Worse in evening.

[39] **Temperature and Weather.** Worse in damp weather.

Shivering after washing with cold water.

Cold water: > toothache.

From sitting on a cold, wet stone: acute prostitis.

[40] **Fever.** Great heat, irritation and redness, followed by such sharp pain that profuse sweat over whole body ensued.

‖Hectic fever and night sweats. θCystitis, or renal disease.

‖Flushing of cheeks, with some general heat and accelerated pulse.

⁝Intermittent or low fevers, typhus.

[41] **Attacks, Periodicity.** Every third day, constipated stool.

Every hour: desire to urinate.

[42] **Locality and Direction.** Left: pain in frontal protuberance; stabbing or shooting pain in eyeball; itching of eye; stinging in eye; pain in superior maxillary bone; pain in rectum and anus; lumps in breast; pain in arm; pain in knee.

Right: pain in ear; pain from upper teeth into eye; aching below hypochondrium; tumor in breast; pain in side; pain in arm; pain in thigh.

Right to left: sudden stitch in eyes.

[43] **Sensations.** As if tooth was being gently pulled; as if a ball was pressing against perineum; as if sitting on a ball; as if something was fluttering within small of back; as if limb was severely grasped.

Pain: in l. frontal protuberance; in eyes; in r. ear; at lower edge of zygomatic process of l. superior maxillary bone; continuous in upper teeth; extending into r. eye; in region of kidneys; in perineum in r. side; in arms.

Sharp pain: in tumor and axillæ.

Stitch: in front part of both eyes from r. to left.

Stabbing: in l. eyeball.

Cutting, scalding pain: during urination.

Sticking: in l. side of rectum.

Shooting: in l. eyeball; in l. side of anus.

Stinging: in l. eye; in ulcer; in swelling of arm.

Burning, pricking pain: during emission of urine.

Burning: in urethra.

Smarting: of edges of lids and inside of lids; of tongue; from neck of bladder to meatus.

Soreness: of palate; of tongue; in perineum.

Bruised sensation: in calves and thighs.

Digitized by Google

Rawness: of upper and back part of palate.
Aching: below r. hypochondrium.
Dull pains: under middle of sternum.
Acute rheumatism: of shoulder.
An opening and shutting pain, slow pulsatory: in middle of anterior part of r. thigh.
Drawing: in an upper and lower tooth.
Griping: after stool.
Pressing fulness: in region of bladder.
Stiffness: in jaws.
Crawling: in ulcer.
Agreeable sensation: in stomach.
Itching: of edges of eyelids and inside of lids; of l. eye; of urethra.
Swelling: in perineum.

[44] **Tissues.** Acts in a very prominent degree on the kidneys.
Abnormal elimination of solid matters in the urine, with atrophy of glandular structures.
Dropsy from renal diseases.
Anasarca and ascites following intermittents.
†Glandular enlargement, especially of lymphatics; enlargement of mesenteric glands. θScrofulosis.
Scrofula, with ulcers of an indolent or flabby character.
Tumors in mammæ.
Useful in scrofula and chronic, rheumatic, and nephritic affections.
In strangury, chronic gonorrhœa, and catarrh of bladder; as antilithic, it is said to diminish lithic acid in urine.
In dropsy it is better adapted to cases accompanied by weakness and loss of appetite.
Enlargement of lymphatic glands in neck.
‖Enlarged lymphatic and mesenteric glands.

[45] **Touch. Passive Motion. Injuries.** Pressure: maxillary bone sore; r. thigh tender.

[46] **Skin.** Redness, vesication, or desquamation of skin.
Ulcers of an indolent and flabby character.
Malignant ulcers.
Ulcer, discharging yellowish ichor.
Crawling and stinging in ulcer.
‖Jaundice and dropsy.
Eruption of dark red spots without sensation.
Anasarca following intermittents.
Scarlet fever.

[47] **Stages of Life, Constitution.** Cachectic and scrofulous individuals.
Broken down constitutions in intemperate subjects; abdominal and renal dropsies.

Google

A woman, æt. 21; cancer of breast.
Woman, æt. 26; in a cachectic condition, menses always scant; scirrhous tumor of breast; the mother of patient had also had scirrhous tumor of breast, necessitating extirpation of gland.
Plethoric, hysterical young woman; dysuria.
Married lady, æt. 34, suffering formerly from uterine troubles; obstinate vesical irritability.
A man, æt. 38; stricture of urethra.
Sir James C.; organic disease of liver with ascites.
Old gentleman; suffered for years with "the gravel," so called by his physicians.

[48] **Relations.** Compare: *Apocynum*; (*Chimoph.* cured ascites and swelling of legs, where *Apoc.* had been of benefit but did not cure), *Coffea* (*Chimoph.* cured toothache, relieved by cold water, when *Coffea* failed), *Ledum*, *Rhodod.* and *Kalmia*, all Ericaceæ.

: Recommended as a substitute for *Uva ursi*.

CHININUM ARSENICOSUM.

Arseniate of Quinine. $2\ C_{20}\ H_{24}\ N_2 O_2 .\ As\ H_3 .\ 4\ H_2 O.$

Until proved by the Philadelphia Clinical Society, at the instigation of Dr. William H. Bigler, who cured with it a case of scrofulous ophthalmia, the only proving we had was the short one by Dr. Muhr, contained in Allen's Encyclopedia, vol. iii, here designated No. 6. The provers of the Clinical Society are: 1. Dr. W. B. Trites, 2d dec. trit.; 2. Mr. J. J. Sturges, 1st dec. trit.; 3. Mr. E. W. Le Roy, 6th dec. trit. (both under supervision of Dr. C. Mohr); 4. Dr. C. B. Knerr, 30th cent., and 5. Mr. Walter K. Furness (under supervision of Dr. Knerr) 2d dec. trit.

CLINICAL AUTHORITIES.—*Intermittent hemicrania*, Altschul, Rück. Kl. Erf., vol. 5, p. 82; *Headache*, D. F. and J. C. Moore, N. E. Med. [1] **Mind.** Depressed in spirit, with dulness of mind[3].
Listless after previous fever; no desire to do anything[2].

Digitized by Google

Desire to sit or lie in one place and not be disturbed[2].
Mental dulness, with inclination to vomit[3].
‖Anxiety and nightly delirium. θDiphtheria.
The chilly waves are brought on by thinking of them[2].
‖Anxiety, with dyspnœa. θTuberculosis.
Greatest anxiety, with unquenchable thirst; must sit up bent forward, if possible at open window. θTuberculosis.
‖Child sits up in bed lamenting. θKeratitis.
‖He believes he cannot long endure such utter prostration. θEpilepsy.
‖Irritable mood precedes headache, which is < by mental and bodily exercise. θHemicrania.
‖In consequence of fright, l. sided hemicrania.

[2] **Sensorium.** ‖Confused feeling in head. θDiphtheria.

[3] **Inner Head.** ‖Severe, darting, tortuous pains running up into head and preventing sleep.
‖Without previous aura he feels it rushing like lightning through brain and down r. side of neck into arm, which is distorted and wrenched so as to crack audibly; the facial muscles are convulsively drawn, sight and speech cease, consciousness leaves, and he falls to the ground; the attack is followed by cold sweat, loud eructations and a feeling of utter prostration. θEpileptiform spasms.
Confused headache[1].
Frontal and occipital headache[1].
Headache affecting occipital protuberance[1].
Dull headache in frontal region, not relieved by eating.[3]
Neuralgic pain in r. temple and above eye, lasting several days, with inclination to move skin over aching place with his hand[5].
‖Tearing, boring pain in l. side of head, affecting eye, with flickering, pain and lachrymation; ringing in ears, nausea and vomiting during attack, which regularly appears at midnight; is subject to furuncles and abscesses which relieve head.

[4] **Outer Head.** ‖Burning pain in l. occipital protuberance, extending down nape of neck, along shoulder blade and over l. half of thorax, producing orthopnœa; attack commences with stretching and yawning and a shaking chill, generally in morning, and lasts until after midnight.
Bruised feeling all over head after fever and sleep[2].
Neuralgic pain about head, particularly in temples; < in l. side; > by rubbing aching spots[4].
Slight painful pressure in forehead and temples[6].
Slight sudden throbbing of temporal arteries after 1 P.M.

[5] **Sight and Eyes.** ‖Intense photophobia and spasms of orbicularis muscles, gushing hot tears, large ulcers attack-

Digitized by Google

ing each eye, aggravation from midnight until 3 A.M., during which time the child sat up in bed lamenting. θKeratitis.

‖Scrofulous ophthalmia; < after 1 A.M.

‖Flickering before l. eye, with pain and lachrymation. θHemicrania.

[6] **Hearing and Ears.** ‖Ringing in ears. θHemicrania.

[7] **Smell and Nose.** Watery discharge from nose[2].

Constant running of profuse limpid and watery discharge[2].

Yellow discharge from nose[2].

Left nostril fills up when lying on that side[2].

Nostrils stop up, particularly left, on lying down, preventing breathing through nose[2].

Nose clearer when prover is in an erect posture and out of doors[2].

Sneezing, < sore throat[2].

Profuse discharge from both nostrils[2].

‖Nose stopped up with purulent and bloody substance. θDiphtheria.

‖Corners of nose excoriated. θDiphtheria.

[8] **Upper Face.** ‖Face pale, sallow and bloated. θIntermittent fever.

[9] **Lower Face.** ‖Swelling of submaxillary and parotid glands. θDiphtheria.

‖Blueness of lips. θTuberculosis.

[11] **Taste and Tongue.** Sweetish taste after clearing throat and coughing[2].

Yellow slimy coating on tongue, with bitter taste[3].

Soreness and redness of tip of tongue[4].

Metallic bitter taste in mouth[6].

‖Tongue coated thick and brown. θDiphtheria.

[12] **Inner Mouth.** Burning canker spot inside of l. upper lip[4].

‖Fœtor oris. θDiphtheritis. θScarlatina.

[13] **Throat.** Post-nasal catarrh; < on l. side[2].

‖Diphtheria, diffused blackish exudation, hoarseness, great prostration, confusion in head, nightly delirium, difficult swallowing, fetid stench from mouth, dry tongue, dry skin, pulse 130, fever assuming a putrid type[5].

Constant hacking and clearing of throat[2].

Throat feels sore and inflamed, with a good deal of cough[2].

Throat feels raw and sore; < by coughing and sneezing[2].

‖Malignant angina during scarlatina, with paleness of skin, quick exhaustion and rapid destruction of mucous membrane of fauces.

‖Diphtheria: fœtor oris, swelling of submaxillary glands, frequently also of parotids, violent fever and great prostration.

‖Diphtheria: strong fœtor oris; submaxillary glands

Google

swollen and painful; breathing through mouth because nose is stopped up with purulent and bloody substance; corners of nose excoriated; tongue coated thick and brown, both tonsils covered with a grey exudation, on right tonsil a bloody ulcer with uneven edges which corresponded to size of a membrane just retched out; lower half of uvula gangrenous, upper half covered with exudation; posterior wall of fauces completely covered with exudation; swallowing of liquids very difficult; great weakness; sleeplessness; pulse small, very frequent.

[14] **Appetite, Thirst. Desires, Aversions.** No appetite for breakfast after fever in the night[2].

No thirst with the fever[2].

!Thirst which cannot be appeased; during attacks of suffocation. θTuberculosis.

[15] **Eating and Drinking.** !Eggs and fish cause painless diarrhœa at once. θRheumatic headache.

!She does not like cold water. θRheumatic headache.

Water tastes bitter, or has a disagreeable flavor like the water found in cars[2].

[16] **Hiccough, Belching, Nausea and Vomiting.** Inclination to vomit, with mental dulness[3].

Sudden inclination to vomit at 2 P.M., lasting only a few minutes[3].

Regurgitation of food[4].

Eructations. θEpilepsy.

!Nausea and vomiting, followed by sleep. θHemicrania.

[17] **Scrobiculum and Stomach.** Sensation from stomach through entire intestinal canal as if diarrhœa would set in[4].

Burning, sore feeling in stomach; < on motion, particularly going up-stairs[4].

Uncomfortable feeling in stomach is > by expanding chest[4].

Burning in stomach[4].

[18] **Hypochondria.** !Left hypochondriac region enlarged. θIntermittent fever.

[19] **Abdomen.** !Abdomen bloated. θIntermittent fever.

Sore pain in a small spot, which could be covered with tip of a finger below and to r. of umbilicus, coming and going, but continuing all day[1].

Very severe colic[6].

Pressure in solar plexus, as if he had eaten tough meat or hard nuts, extending towards back where it changes to a pinching sensation, spine painfully sensitive to touch at this point[6].

[20] **Stool and Rectum.** Diarrhœa from malarious poisoning;

Digitized by Google

stools thin, watery, undigested, offensive, dark or light brown, sometimes with a meallike sediment.

From ten to fifteen painless, watery, very offensive stools from 6 to 10 A.M., with burning in anus after each passage; slightly emaciated, pale and weak.

‖Fetid diarrhœa with pains in bowels. θIntermittent fever.

[21] **Urinary Organs.** ‖Spasmodic retention of urine; > by application of hot cloths to chest, which, however, is followed by syncope. θOccipito-intercostal neuralgia.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness. θDiphtheria.

Aching in bronchial region; < l. side[4].

‖Seemed to prevent diphtheritic membrane from spreading to larynx. θMalignant scarlatina.

[26] **Respiration.** Respiration very free as if thorax was hollow[6].

‖Blueness of lips, hands and nails, with attacks of suffocation, which begin in morning and last until noon. θTuberculosis.

‖Must sit bent forward and if possible at an open window during attack of suffocation; < by any other position.

‖Dyspnœa with anxiety. θTuberculosis.

Every forenoon at 9 o'clock attacks of suffocating spells.

[17] **Cough.** Coughing < sore throat[2].

Cough with but little expectoration[2].

Slight cough at long intervals, seems to come from full feeling in chest[2].

[28] **Inner Chest and Lungs.** ‖Senile subacute catarrh with periodical fever, generally < at night.

Peculiar colicky pain in lower part of l. lung felt like a pain from flatulence, comes and quickly passes away, often repeated[1].

Sharp stitch in lower part of r. chest in front; < when inspiring, causing him to cry out[1].

Desire to inflate lungs to their fullest extent to relieve uncomfortable feeling in stomach while riding in open air on a raw, cold day[4].

The chest feels hollow and respiration freer[4].

Limbs icy cold; cold clammy sweat all over; greatest anxiety and unquenchable thirst; must sit up, bent forward if possible, at open window. θTuberculosis.

[29] **Heart, Pulse and Circulation.** ‖‖Angina pectoris, with dropsical symptoms, venous hyperæmia and cyanosis.

Trembling of heart, with rumbling noise, unable to distinguish pulsations, lasting one hour[6].

Palpitation; noticed on leaning against back[6].

Sensation as if heart had stopped[6].

Digitized by Google

No perception of beating of heart[6].
Beat of heart and pulse irregular, numbering 200 per minute[6].
Pulse cannot be felt on l. side[6].
Beat of heart becomes regular towards noon[6].
Pulse in radial and temporal arteries 200[6].
‖Pulse small, very frequent. θDiphtheria.
‖Pulse 130. θDiphtheria.
Pulse 98, full and strong during fever[2].

30 **Outer Chest.** ‖Paralysis of respiratory muscles on l. side. θIntercostal neuralgia.
‖Violent neuralgic pain in l. mammary region, as though that part was torn with red hot tongs. θIntercostal neuralgia.
Aching in intercostal muscles, r. side, in locality of sixth and seventh ribs on making inspiration[4].

31 **Neck and Back.** Back feels weak as after taking a long journey[2].
Pain in muscles between l. shoulder and neck, as if sprained, on rising from sleep at 4 P.M[4].

32 **Upper Limbs.** Painful weariness in shoulder and elbow joints[6].
Aching in biceps of l. arm[1].
Acute fugitive pain in l. olecranon process[1].
Pain in flexors of l. forearm on radial side near elbow[1].
Palms of hands hot and dry[1].
Sore, aching fugitive pains in first phalanx of l. thumb, the same, but in a less degree, in right[1].
‖Blueness of hands and nails. θTuberculosis.

33 **Lower Limbs.** Weariness of lower extremities.
Gooseflesh on lower extremities, with chilly feeling[2].
Sore, aching fugitive pain in l. leg near knee[1].
Aching, sore pain in anterior lower two-thirds of l. tibia[1].
Itching on internal malleolus of r. foot at 2 A.M.; on investigation discovered eruption of bright red pimples[4].
Increased tenderness of corn on l. little toe; had to remove shoe to ease pain[4].

34 **Limbs in General.** ‖Limbs icy cold. θTuberculosis.

35 **Rest. Position. Motion.** Desire to sit or lie in one place.
Desire to move skin over aching place in temple with his hand.
Lying: on l. side, nostril fills up.
Sitting: bent forward > anxiety and suffocation.
Leaning against back: palpitation noticeable.
Erect posture: nose clearer.
Expanding chest: > uncomfortable feeling in stomach.
Motion: and going up-stairs < burning soreness in stomach; < intercostal neuralgia.

Digitized by Google

Bodily exercise: headache.
Riding in open air: desire to expand lungs to relieve uncomfortable feeling in stomach.
Sneezing: < sore throat; and coughing < rawness in throat.

[35] **Nerves.** ‖Great prostration. θDiphtheria.
Lassitude and fatigue[4].
Feels as when suffering from partially developed malaria[1].
Felt sore and ached all over[1].
Felt like one having taken a long journey[2].
‖Great prostration, followed by a deep sleep after an attack of dyspnœa. θTuberculosis.
‖Epilepsy; after attack cold perspiration, eructations, and a feeling of such utter prostration that patient believes he cannot endure it long.

[37] **Sleep.** Goes to sleep after tea and sleeps heavily all night[4].
‖Deep sleep after suffocative attacks. θTuberculosis.
‖Awakes from sleep exhausted and bathed in sweat after an attack of dyspnœa. θTuberculosis.
Restless until 3 A.M., constantly changing position, particularly as soon as pillow becomes warm[6].
Sleep frequently interrupted[6].
‖Sleeplessness. θDiphtheria.

[38] **Time.** Nightly: delirium in diphtheria.
At night: senile subacute catarrh <; sleeps heavily; is more feverish.
From midnight until 3 A.M.: ophthalmia <.
From morning until after midnight: burning pain in head with chills.
At 2 A.M.: itching eruption on internal malleolus of r. foot.
Until 3 A.M.: restless.
At 4 A.M.: sprained feeling in muscles of back.
From morning to noon: suffocation, with blueness of lips, hands and nails.
In morning: broken-up feeling after fever, no appetite for breakfast.
6 to 10 A.M.: diarrhœa.
At 9 A.M.: suffocating spells.
Towards noon: beat of heart becomes regular.
Forenoon: chill at irregular hours.
Towards midnight: fever following chilliness, pulse 90.
After 1 P.M.: throbbing of temporal arteries.
At 2 P.M.: sudden inclination to vomit.
After 8.30 P.M.: chilliness with gooseflesh.

[39] **Temperature and Weather.** Hot cloths to chest: > retention of urine but cause syncope.
Warmth of pillow: < restlessness.
Open window: sits there to > anxiety and suffocation.

Digitized by Google

On a raw, cold day, while riding, desire to expand lungs to relieve uncomfortable feeling in stomach.
Damp weather: is sensitive to it, and feels chilly. θRheumatic headache.
Cool part of bed: < chilliness.
Inclination to throw off covers and open windows: with fever towards midnight.

40 **Fever.** Chilly feeling like cold waves after 8½ P.M. in bed, with gooseflesh all over body, but particularly on legs[2].
Chilliness coming in waves, with restlessness; < by moving hands and feet to a cool part of bed, also by thinking of it[2].
Chill always in forenoon, not at a regular hour, however; sometimes once every day, again every other day; sometimes paroxysms would close with perspiration, sometimes without; before the attack headache, yawning and stretching. θIntermittent fever.
After chilliness, feverish towards midnight, pulse 98, full and strong, with inclination to throw off covers and open windows, no sweat[2].
Feverish all the time, but more so at night[2].
No sweat after fever, but weak, broken-up feeling in morning and no appetite for breakfast[2].
Violent fever with great prostration. θDiphtheria. θMalignant scarlatina.

41 **Attacks, Periodicity.** Periodically: furuncles and abscesses. θHemicrania.
Like cold waves: chilliness in evening.
At long intervals: slight cough from full feeling in chest.
Coming and going quickly: peculiar colicky pain in lower part of l. lung, often repeated.
Coming and going, all day: sore pain in spot below and to r. of umbilicus.
Lasting a few minutes: inclination to vomit.
Lasting one hour: tremor of heart.
Every day or every other day: chill; attacks of suffocation.
Lasting several days: neuralgia in head.

42 **Locality and Direction.** Left: hemicrania; boring in side of head, affecting eye; burning in occipital protuberance, down nape of neck, along shoulder blade and over half of thorax; neuralgia about head; flickering before eye; nostril fills up when lying on side; canker spot inside upper lip; post-nasal catarrh <; hypochondriac region enlarged; aching in bronchial region; peculiar colicky pain in lower part of lung; pulse cannot be felt; paralysis of respiratory muscles; neuralgia in mammary region; pain as if sprained between shoulder and neck; aching in biceps; acute pain in olecra-

Digitized by Google

non process; pain in flexors of forearm; pains in thumb; pain in leg near knee; pain in anterior lower two-thirds of tibia; tender corn on little toe.

Right: rushing like lightning through brain and down side of neck into arm; neuralgia in temple and above eye; diphtheritic ulcer on tonsil; sore pain in small spot to r. of umbilicus; sharp stitch in lower part of chest, in front; aching in intercostal muscles, locality of sixth and seventh ribs; pains in thumb; itching eruption on internal malleolus of foot.

[43] **Sensations.** As if diarrhœa would set in; as if heart had stopped; as if torn with red hot tongs in l. mammary region; as after a long journey, weakness in back; as if he had eaten tough meat or hard nuts, in solar plexus; as when suffering from partially developed malaria; as if thorax was hollow.

Pains: in flexors of l. forearm.

Acute pain: in l. olecranon process.

Neuralgic pain: in r. temple and above eyes; about head, particularly in temples; in l mammary region.

Stitch: in lower r. chest.

Darting: running up into head.

Tearing: in l. side of head and eye.

Boring: in l. side of head and eye.

Burning: in l. occipital protuberance to nape of neck, along shoulder blade and over l. half of thorax; canker spot in upper lip; in stomach; in anus.

Colicky pain: in abdomen; in lower part of l. lung.

Raw feeling: in throat.

Sore pain: in a small spot below and to r. of umbilicus.

Sprained pain: in muscles of back between shoulder and neck.

Pinching: back, in region of solar plexus.

Pressure: in forehead and temples; in solar plexus.

Tenderness: of corn on l. little toe.

Aching: in bronchial region; in intercostal muscles r. side; in biceps; in phalanges of thumbs; in l. leg near knee; in anterior lower l. tibia; all over.

Dull pain: in frontal region.

Bruised feeling: all over head.

Sore feeling: in throat; in stomach; all over; tip of tongue.

Broken-up feeling: in morning after fever.

Lightning-like sensation runs through brain and down r. side of neck into arm.

Tortuous pains: run up into head.

Hollow feeling: in chest.

Uncomfortable feeling: in stomach.

Digitized by Google

Weariness, painful: in shoulder and elbow joints; in lower extremities.
Throbbing: of temporal arteries.
Chilly feeling: with gooseflesh all over body.
Itching: on internal r. malleolus.

[44] **Tissues.** Dropsical symptoms, venous hyperæmia and cyanosis.

[45] **Touch. Passive Motion. Injuries.** Touch: spine sensitive to.
Rubbing: > aching spots in head.
Pressure of shoe: < aching of corn.

[46] **Skin.** Recommended in plague by Lorbacher.
‖Dry skin. θDiphtheria.
Gooseflesh over whole body, particularly lower extremities[2].
‖Pallor of skin, with rapid exhaustion. θScarlatina.
‖Cold, clammy sweat all over. θTuberculosis.
Cold perspiration after attacks θEpilepsy.
‖Periodical furuncles and abscesses, which relieve the head. θHemicrania.

[47] **Stages of Life, Constitution.** Albert S., æt. 4; had chills for two weeks; intermittent fever.
A stout girl, æt. 10; diphtheria.
A young lady of slender build, æt. 20; diphtheria.
A tuberculous woman, æt. 30; suffocative attacks.
Strong man of sanguine temperament; intermittent hemicrania of three years' standing.
A man; epileptiform spasms of nine years' standing, caused by masturbation and use of spirituous drinks.
Woman, æt. 50; diarrhœa.
‖Lady, æt. 58, hydrogenoid constitution; rheumatic headache.

[48] **Relations.** Compare: *Apis* (diphtheria), *Arsen.* (neuralgias, diarrhœa, tuberculosis), *Cinchon.* (diarrhœa, suffocative attacks in tuberculosis).

CHININUM MURIATICUM.

Muriate of Quinia. $C_{20}\ H_{24}\ N_2\ O_2,\ HCl,\ 3H_2\ O.$

CLINICAL AUTHORITIES.—*Intermittent fever*, and *Sclerotitis rheumatica intermittens*, Frank's Mag., vol. iv.

Used by Liebold and other surgeons of the N. Y. Ophthalmic Hospital, at the instigation of Dr. Belcher, in various diseases of the eye, particularly when accompanied by severe neuralgic pains.

[5] **Sight and Eyes.** ‖Intense pain in and around eye, periodic in character and accompanied by chills.
‖Lachrymation, photophobia and violent paroxysms of pain in eye, daily, at 5 P.M. θSclerotitis rheumatica.
Pannus: severe, intermitting pains; anæmic conditions of malarial origin.
‖Ulceration of cornea of malarial origin, or dependent upon anæmia, especially when iris becomes affected, with severe pain in or above eye; periodic in character, especially when accompanied by chills.
Ulcers formed in course of pannus, with much pain in morning.
Severe neuralgic pains in iritis and other diseases of eye.
‖Trachoma with and without pannus.

[25] **Voice and Larynx. Trachea and Bronchia.** Fatiguing cough with rattling in bronchi, without expectoration. θIntermittent following broncho-pneumonia.

[38] **Time.** In morning: pain in pannus worse.
At 5 A.M., daily, shaking chill with cough.
At 5 P.M., daily, sclerotitis rheumatica worse.

[40] **Fever.** ‖Shaking chill daily at 5 A.M., accompanied by fatiguing cough, rattling in bronchi, but no expectoration, burning heat followed by sweat and great prostration.

[41] **Attacks, Periodicity.** ‖Periodic pain in and around eyes.
‖Paroxysms of pain daily at 5 P.M. θSclerotitis rheumatica.
Intermitting pains: pannus.

[43] **Sensations.** Intense pain: in and around eyes.
Neuralgic pains: in iritis and other eye affections.

[47] **Stages of Life, Constitution.** A widow, æt. 54, phlegmatic constitution; intermittent fever, following broncho-pneumonia.

[48] **Relations.** Compare: *Chin. sulph.* (*Chin. mur.* cured intermittent following broncho-pneumonia when *Chin. sulph.* failed.)

Digitized by Google

CHININUM SULFURICUM.

Sulphate of Quinine or Chinin. $C_{20}H_{24}N_2O_2,H_2SO_7+7H_2O$.

One of the earliest provings was that by A. Noack, in 1839, Journal für Arzneimittellehre, vol. ii, p. 379, who also proved Cinchoninum sulfuricum, in 1842, Hygea, vol. xvi. For other provings see Encyclopedia, vol. iii.

The pernicious and dangerous effects of crude doses of this drug, given in excess, are too well known to need mention. When indicated, as this remedy often is, in the worst forms of intermittent, there is more safety and reliability to be found in the use of the potencies, even the higher, which act promptly and well, than in the use of massive doses. In the words of Dr. H. C. Allen, the author of Therapeutics of Intermittent Fever, which should be in the hands of every homœopathic practitioner: "There is a wide difference between suppressing and curing a fever paroxysm, or any other disease; the homœopath can and ought to cure, not 'break up' the chill, 'suppress,' or 'cover up' the disease."

Miller, Allen's Therapeutics of Intermittents; J. W. Routh, 3 cases, Med. Inv., vol. 10, p. 28; Escallier and Jeans, B. J. H., vol. 32, p. 723; W. H. Holcombe, U. S.

* The same author mentions thirteen cases of cholera, giving a careful analysis of symptoms, treated, however, with Chin. sulph. in conjunction with Opium, which preparation was also used successfully as a prophylactic in two epidemics. These cases are not included in our arrangement, on account of the compound prescription.

Dr. Acgidi, an old German practitioner, says: "For the precursory stage of cholera, I gave Chin. sulph., 0.01 to 0.06, one dose every evening for eight days. None of the persons thus treated were attacked by cholera. If I ever should live to see another cholera epidemic, I would give Chin. sulph. and ozonized water."

[1] **Mind.** ||Indifference, stupid expression, vacant stare, averse to answering questions. θTyphus.
||Great mental depression. θVariola.
|Despondency.
|Semiconsciousness, she is partly insensible to pain. θSpinal irritation.
|Unconsciousness. θPuerperal convulsions.
||Unconsciousness, with red face, deep and noisy respiration, pulse full and very slow, recurring every other day at same hour. θIntermittent apoplexy.
Decrease of imaginative faculty, with inability to remain standing.
|Anxiety, downheartedness, moroseness, despondency, laziness, lassitude, and aversion to all kinds of work. θCholera.
|Recurrence of feeling of impending evil.
Anguish and general sweat.
|Loud sobbing and weeping. θSpinal irritation.
||Delirium all night while lying quietly on his back. θTyphus.
Delirium as if from intoxication, with humming in ears.
||Furious delirium, with screaming and jumping out of bed.
||Furious delirium at night, with great restlessness, followed by stupor in morning.
|Delirium during heat.

[2] **Sensorium.** ||Apathy, with stupid facial expression. θTyphus.
|Head heavy and giddy, he wants to lie down. θPeriodical cervical neuralgia.
Dizziness and enlarged feeling of head.
||Whirling in head like a mill-wheel.
||Vertigo, with buzzing in ears, difficult breathing, and sickness at stomach.

[3] **Inner Head.** Pain in temple and forehead at noon, increasing gradually till temporal arteries throb obviously, with heat in head, tingling in ears, thirst, copious micturition, anxiety and great debility.
|Frontal headache, where frontal bone verges towards top of head, a shaking pain, she feels every step, begins towards noon with chill.
|Beating in vertex. θScarlatina.
Violent headache, particularly on l. side, with throbbing of temporal arteries.

Digitized by Google

▮Heaviness in head as from a cold. θCholera.
Dull headache, with debility or with numbness.
▮▮Intermittent neuralgia at regular hours.
▮▮Intermittent headache, violent throbbing, with vertigo and heat in face, involuntary closing of eyelids from sheer prostration.
▮▮Headache with nausea, chilliness, cold feet, great prostration. θMenorrhagia.
▮▮Violent attacks of left-sided hemicrania occurring in evening.
▮Headache, the pain is not severe, but day after day, and week after week, the brain is one continued ache.

4 **Outer Head.** Sensitiveness and tightness of scalp, and soreness of roots of hair.
▮Distension of veins about head and neck. θPuerperal convulsions.

5 **Sight and Eyes.** ▮Bright lights and sparks before eyes.
▮Black spot, size of pin's head, about eighteen inches from r. eye, and moving with eye, for some weeks.
▮Dimness of vision as from a net before eyes, and once as from a dark fog. θTyphus.
▮▮Blindness; amblyopia; amaurosis.
▮Can only see objects when looking at them sideways.
▮Great sensitiveness of eye to light, with lachrymation in full glare of light.
▮Disk and retina both very anæmic.
▮Eyes staring and lustreless. θSpinal irritation.
Eyes lustreless and restless.
▮Dilatation of pupils.
▮Supraorbital neuralgia occurring daily.
▮Neuralgic twinges in supra and infraorbital nerves generally periodic in character.
▮Intermittent strabismus; child would squint one day and be entirely well on the next.
▮Conjunctiva injected, lids red and swollen, pupils contracted, lachrymation, extreme photophobia, tearing in orbit and headache, with thirst and fever; all appearing every second day.
▮▮At 12 o'clock, daily, violent paroxysms of pain in and around l. eye, conjunctiva inflamed, photophobia, pupil contracted, lachrymation, pressure > pain; aggravation lasts until 8 P.M.
▮▮A sudden attack of violent pain above l. eye, at 8 P.M., four days in succession, accompanied by slight delirium, muscular twitching and excessive sensitiveness to light and noise.
▮▮Violent stitching, throbbing pain in l. eye, extending to forehead and temple, with photophobia, lachrymation,

Digitized by Google

and inflamed conjunctiva, beginning at 1 P. M. daily, and lasting until 7, followed by perspiration. θIntermittent.

‖Lancinating pain under r. eye, commences at 7 A.M., lasting until after 3 P.M., when it disappears, leaving a sensation within cranium as if there was water dropping.

Peculiar dryness of eyes.

Eyes close from weariness.

[6] **Hearing and Ears.** Violent ringing in ears during a chill.

‖‖Ringing in ears, especially noticed in l., seldom in right.

‖Ringing as of bells. θSpinal irritation.

‖‖Buzzing in ears. θTyphus.

Deafness from concussion of brain, especially of region of auditory nerve.

Hardness of hearing, with violent headache.

Tingling in ears, continually or only during headache, with giddiness when stooping.

πTinnitus, with injection of vessels along handle of malleus, with fulness in head and giddiness.

[7] **Smell and Nose.** Frequent epistaxis.

‖Violent epistaxis of young persons.

[8] **Upper Face.** Dull and stupid expression, with flushed face.

‖While writing sudden ache above l. zygoma, also at temporal ridge.

‖Aching about l. malar bone in evening.

Flushing of face, with redness of eyes and ears.

‖Face pale and suffering, lips and nails blue.

‖‖Very pale, anxious face. θSpinal irritation.

Paleness of face, violent thirst, nausea, weakness of feet with deafness when walking, and occasional sweat over whole body.

‖Jaundiced hue of face and conjunctivæ. θIntermittent.

‖‖Face emaciated, stupid. θTyphus.

‖‖Attacks of prosopalgia, occurring at 10 A.M., 3 P.M. and 10 P.M.

‖‖Right-sided prosopalgia daily, from 7 A.M. until noon, accompanied by fever and lachrymation of r. eye; the suffering parts become moist.

‖Facial neuralgia, morning periodicity, pains usually commence on l. side, but sometimes on r. side, and occasionally on both; attacks commence every morning, and continue from 7 to 12 o'clock; pains are lancinating, commence under eye, and soon extend into and around eye, causing considerable lachrymation; pains > by pressure.

[9] **Lower Face.** ‖‖Swelling of submaxillary region. θVariola.

[11] **Taste and Tongue.** Tongue flabby, coated white or yellow in centre, pale on margin.

Digitized by Google

Bitter taste with clean tongue.
‖Tongue and mouth dry; bitter taste. θTyphus.
Inability to pronounce names, and slowness of sense.

[14] **Appetite, Thirst. Desires, Aversions.** Thirst during chill and apyrexia.
Excessive thirst, with dryness of mouth and fauces, just before and during hot stage.
❙Real thirst mostly only during sweat.
❙Excessive repugnance to all food.

[15] **Eating and Drinking.** After eating, oppression, nausea and desire to sleep.

[16] **Hiccough, Belching, Nausea and Vomiting.** ❙Nausea and loathing of food. θCholera.

[17] **Scrobiculum and Stomach.** ❙Pressure in pit of stomach up into throat, and pressure in stomach, < after drinking water. θCholera.
❙After eating, pressure in stomach, followed by cutting in upper and middle abdominal region.
❙Even the slightest food causes pressure in stomach and a return of the usual symptoms.
Pain in epigastrium, < by pressure.
Swelling and sensitiveness of epigastrium.
❙Dyspepsia or cardialgia, with nausea, loathing of food, bitter eructations, bitter taste in mouth, vomiting of bile, oppression of stomach, heartburn or burning in stomach and œsophagus, and feeling of constriction and pulling sensation in stomach.
Severe cardialgia.

[18] **Hypochondria.** ❙Pain in region of liver, shortly before going to bed.
❙Severe pain in l. hypochondrium, with shaking chill.
❙Pain in region of liver and spleen, on bending, taking a deep breath, or coughing. θIntermittent.
‖❙Painful enlargement of spleen after intermittent.
❙Enlargement of spleen with dropsy.

[19] **Abdomen.** ❙Pain in bowels, especially after eating. θCholera.
❙Griping and tearing in abdomen, extending to chest, with pressing towards groin during menses. θDysmenorrhœa.
Flatulent colic of an intermittent type.
‖Abdomen distended. θTyphus. θVariola.
❙Visceral obstructions, especially engorgement of spleen and liver.
‖Cæcal region distended, gurgling on pressure. θTyphus.
❙Relaxed condition of digestive organs of old people, under the form of dyspepsia.

[20] **Stool and Rectum.** ❙Nightly diarrhœa.

Digitized by Google

Diarrhœa; stools watery, slimy, dark, or even blackish, having an offensive smell.
‖Constipation or soft stools followed by weakness.
‖‖Involuntary diarrhœic stools. θTyphus.
Stool hard, resembling sheep dung.

[21] **Urinary Organs.** Burning in urethra during urination.
The urine soon becomes turbid, with slimy flocks and a clay-colored, greasy sediment.
‖Urine fatty and deposits a straw-yellow, brickdust sediment.
‖‖Involuntary urination. θTyphus.
Diabetes.
‖Albuminuria. θPuerperal convulsions.
Phosphates increased.
‖Urine loaded with lithates. θSupraorbital neuralgia.
Hæmaturia.

[23] **Female Sexual Organs.** Menses too early and too profuse.
Violent uterine contractions sufficient to produce abortion.
‖‖Profuse menstruation followed by headache, with nausea, chilliness, cold feet and prostration.
‖Passive metrorrhagias, with diminished irritability.

[24] **Pregnancy. Parturition. Lactation.** ‖‖Two weeks after confinement, in consequence of fright, violent uterine neuralgia, returning at same hour every afternoon, accompanied by dyspnœa, small pulse, and clammy sweat on extremities, uterine region sensitive to touch.
‖The labor pains appear like tonic spasms, and are accompanied by convulsive twitches, unconsciousness after parturition, tetanic convulsions, in intervals convulsive action of muscles of face, eyes, etc.; want of consciousness, oppressed respiration, distended veins on head and neck, weak, rapid and intermitting pulse, and albuminuria.

[25] **Voice and Larynx. Trachea and Bronchia.** Intermittent aphonia.
More or less complete loss of voice, about 4 P.M.; preceded by thirst, cough, constriction of neck, headache or neuralgia; heat in head and frequent pulse.

[26] **Respiration.** ‖Can scarcely breathe from weakness. θIntermittent.
‖‖Respirations 28. θVariola.
‖Oppressed respiration. θPuerperal convulsions.
‖Painful sense of pressure and weight on chest. θSpinal irritation.
‖Anxiety and dyspnœa with intercostal pain. θTyphus.
‖Respiration very much accelerated, abnormal rising and falling of thorax. θSpinal irritation.
Respiration slow and irregular.

Digitized by Google

[27] **Cough.** ||Troublesome, moist cough. θVariola.

[28] **Inner Chest and Lungs.** |Oppression of chest.
|Stitches in l. side, below short ribs.
Lancinations in r. half of chest, extending towards shoulder, arresting breathing, > by bending trunk forward.
||Rattling of phlegm through entire r. side of chest. θTyphus.
||Hemorrhage from lungs; with diarrhœa, fever, cold sweat and prostration.
|Pain in chest during chill.

[29] **Heart, Pulse and Circulation.** |Weak, rapid and intermitting pulse. θPuerperal convulsions.
|Pulse 100, very small, heartbeat not perceptible, sounds scarcely audible. θSpinal irritation.
||Pulse 120. θVariola.
|Palpitation from a little exercise.
Angina pectoris with marasmus.
Pulse: accelerated; large; full during chill and heat, weak and trembling at close of paroxysm, from fifty to sixty per minute; slow, particularly after eating; full or small, but weak and slow; frequent during heat.

[30] **Outer Chest.** |Stinging, tearing pain in intercostal space, between eighth and ninth ribs, r. side, extending from spine to sternum, sensitive to pressure, < from 4 to 7 P.M., produces anxiety and dyspnœa. θTyphus.

[31] **Neck and Back.** |Every day at about 4 P.M. violent pain in lateral muscles of neck, which appear to him to be swollen and contracted, his head is giddy and heavy, and he wants to lie down. θPeriodical cervical neuralgia.
||Sensitiveness of last cervical and first dorsal vertebræ to pressure.
||Spine painful on pressure in all stages of fever paroxysm.
|Three upper dorsal vertebræ are sensitive and painful to touch; pressure causes dyspnœa. θSpinal irritation.
|Periodical pain in back, returning about midnight and extending into head. θSpinal irritation.

[32] **Upper Limbs.** Rheumatism of r. shoulder.
|Hands cold and cold sweat.

[33] **Lower Limbs.** |Sciatic neuralgia, on r. side, of many weeks duration.
||Acute rheumatic pain in l. ankle joint after taking cold, accompanied by fever and profuse sweat.
||Paralysis of lower extremities, involuntary stools and urination, occurring every other day during fever epidemic.
||Paralysis of lower extremities, first occurring at 6 P.M.,

Digitized by Google

then half an hour earlier every day, with headache, chill, heat and sweat.

‖Cutting pains in feet during chill, ankles swollen.

[34] **Limbs in General.** ‖Heaviness and aching in all limbs and especially in joints. θCholera.

‖Stiffness of nearly all joints, r. wrist and knee joint very painful and much swollen. θAcute rheumatism.

‖Acute articular rheumatism.

[35] **Rest. Position. Motion.** ‖Wants to lie down. θPeriodical cervical neuralgia.

Lying on back: delirium all night.

Bending: taking a deep breath or coughing; pain in region of liver and spleen.

Bending trunk forward: > lancinations in chest.

Stooping: giddiness.

Motion: during fever produces chilliness.

While writing: sudden ache above l. zygoma and at temporal ridge.

Walking: she feels every step, frontal headache; deafness.

Exertion: the least excites sweat.

Exercise: palpitation.

[36] **Nerves.** Great irritation of whole body.

Extreme restlessness.

‖Great sensitiveness against external influences; general weakness. θCholera.

‖‖Feels weak and nervous, a little exercise gives him palpitation.

‖Lassitude and inability to attend to his duties, has lost all zest for sport and exercise.

‖‖Debility caused by considerable losses of fluids; particularly after weakening loss of blood.

‖General weakness, especially of feet.

‖Weakness and trembling in limbs and slow pulse.

‖Trembling in extremities; the power of will over them seemed to be very much hampered.

‖‖Subsultus tendinum. θTyphus.

‖Twitching, or clonic spasm in limbs. θSpinal irritation.

Epileptic attacks returning every seven days, of short duration.

‖Tetanic spasms with loss of consciousness during parturition and afterwards; swollen veins on head and neck; pulse frequent, intermittent and weak; albuminuria.

‖Tetanic convulsions; during intervals unconciousness.

Falling in streets.

Paralysis.

‖‖Intermittent neuralgia, pains return with great regularity.

[37] **Sleep.** ‖Sleeplessness from overstimulation of nervous system.

Digitized by Google

[38] **Time.** All night: delirium; high fever.
At night: furious delirium; diarrhœa.
About midnight: pain in back returns.
In morning: stupor after delirium; facial neuralgia.
8 A.M.: chill.
10 A.M.: attacks of prosopalgia.
7 A.M. until noon: right-sided prosopalgia; facial neuralgia.
Towards noon: frontal headache, with chill.
At noon: pain in temple and forehead; violent neuralgia in and about l. eye; chill.
Afternoon: uterine neuralgia.
7 A.M. until after 3 P.M.: lancinating under r. eye.
3 P.M.: prosopalgia; shaking chill.
About 4 P.M.: cervical neuralgia.
4 P.M.: aphonia; chill.
4 to 7 P.M.: intercostal neuralgia <.
6 P.M.: paralysis of lower extremities.
From 12 to 8 P.M.: neuralgia around l. eye.
1 to 7 P.M.: stitching, throbbing in l. eye.
8 P.M.: attack of pain above l. eye.
10 P.M.: prosopalgia; dull; fever reaches its height.
6 P.M. to 4 A.M.: duration of fever.
Evening: attacks of hemicrania; aching under malar bone.

[39] **Temperature and Weather.** Heat: partially > symptoms in chill.

[40] **Fever.** ‖Paroxysms ushered in with a mere transitory, at times almost imperceptible chilly feeling, principally across shoulders and nape of neck, up and down spine, lasting for a few moments only, occurring at different times throughout day.
‖‖Chill, regular paroxysms at same hour.
‖‖Decided shaking chill at 3 P.M.
‖During chill, blue lips and nails, ringing in ears, pale face.
‖Internal chilliness.
‖Chilliness, especially in back, alternating with flushes of heat. θCholera.
‖Chill every third day at 10 P.M., with intense thirst and pain in chest, followed by heat with headache, afterwards profuse perspiration; little thirst during heat and sweat.
‖Chill every third day at 10 A.M., with cutting pains in feet, and swollen ankles.
‖Quartan; chill at 4 P.M.; chilly and hot flashes in alternation for an hour, introducing a high fever, which lasts all night, with profuse sweat; during fever motion

Digitized by Google

produces chilliness; constant burning in stomach; thirst satisfied for a moment with a swallow of cold water; lips covered with colorless vesicles.

‖Quotidian; chill at 8 A.M.; chill, fever and sweat well marked, each lasting about two hours; thirst for large draughts of cold water during whole paroxysm; nausea continually and lasting till next chill.

‖Fever and ague, no symptoms during apyrexia except some lassitude; paroxysms are regular and not attended with very obvious disturbances of any organ.

‖‖Distinct cold, hot and sweating stages, and perfect apyrexia.

Paroxysm anticipates about two hours each time; apyrexia clear.

‖Tertian; chill at 12 o'clock, M.; chill illy defined, lasting one-half hour, followed by intense fever, lasting ten hours, and terminating in scanty sweat; constant frontal headache; severe aching in limbs; heat partially relieves all symptoms, particularly the chilliness.

‖Fever and ague with spinal irritation, cervical and dorsal vertebræ very tender to touch, pains in loins, thighs, and lower limbs generally, convulsive movements and jerks of single muscles, slight cramps, often only of muscles of l. side, dyspnœa and oppression of chest, noises in ears with vertigo and dulness of mind.

‖Fever sets in about 6 P.M. and reaches its height about 10, continues until about 4 A.M., when sweat usually follows, with great prostration.

‖Fever with fulness in head, ringing in ears, together with hardness of hearing, dimness of vision, jaundiced hue of face and conjunctiva. θIntermittent fever.

Fever heat with delirium, fulness of head, ringing in ears, and hardness of hearing.

Strong heat over whole skin, with accelerated pulse.

Great heat of skin and dryness of mouth and fauces.

Violent heat with frequent yawning and sneezing.

Heat gradually breaks into sweat while perfectly quiet.

Profuse perspiration, especially on back and neck, when he sleeps.

Sweat easily excited through least exertion.

‖Sweat relieves all symptoms but headache, which is increased.

‖‖Debilitating sweat.

‖Typhus with great prostration, stupid facial expression, headache, diarrhœa, nosebleed, alternate chill and fever, aversion to move.

[41] **Attacks, Periodicity.** ‖Chill comes at 10 or 11 A.M. or between 3 and 10 P.M.

Digitized by Google

Paroxysms return every other day, or anticipates one to three hours every day.

‖Stages of chill, fever and sweat well marked and distinct.

Attacks of prosopalgia: at 10 A.M., 3 P.M. and 10 P.M.

Every other day: at same hour, unconsciousness; conjunctivitis; paralysis of lower extremities; chill.

Every seven days: epileptic attacks.

Daily: supraorbital neuralgia; stitching, throbbing pain in l. eye; prosopalgia; uterine neuralgia; cervical neuralgia; paralysis of lower extremities.

At regular hours: neuralgia; chill.

Periodic: neuralgic twinges in supra and infraorbital nerves; ophthalmia; facial neuralgia; pulmonary hemorrhage; pain in back; nervous and congestive paroxysms; trismus; paraplegia.

Intermittent: neuralgia; headache; strabismus; colic; uterine neuralgia; pulse.

Anticipates about two hours each time; fever paroxysm.

Half an hour earlier every day: paralysis of lower extremities.

Four days in succession: violent pain above l. eye at 8 P.M.

For some weeks: black spot before r. eye.

Of many weeks' duration: sciatic neuralgia.

Day after day and week after week: continuous headache.

[42] **Locality and Direction.** Left: headache and throbbing of temporal arteries; hemicrania; neuralgia around eye; pain above eye; stitching, throbbing in eye; ringing in ear; sudden ache above zygoma; aching about malar bone; pain in hypochondrium, with chill; stitches below short ribs; acute rheumatic pain in ankle joint; cramp in muscles in fever and ague, with spinal irritation.

Right: black spot before eye; lancinating under eye; ringing in ear more seldom than in left; prosopalgia, with lachrymation of eye; lancinations in half of chest; stinging, tearing in intercostal space, between eighth and ninth ribs; rheumatism of shoulder; sciatic neuralgia; wrist and knee joint pain and swollen.

[43] **Sensations.** ‖Internal bad feeling, as of coming illness. θCholera.

As of water dropping in cranium; as if swollen and contracted, lateral muscles of neck.

Pain: in temple and forehead; in epigastrium; in region of liver; in l. hypochondrium; in bowels; in chest, during chill; in lateral muscles of neck; in r. wrist and knee joint; in back; in lower limbs.

Violent pains: above l. eye.

Lancinating: under r. eye; in face; in r. half of chest, towards shoulder.

Digitized by Google

Cutting: in upper and middle abdomen; in feet during chill.
Stitches: in l. eye, forehead and temple; in l. side, below short ribs.
Stinging: in intercostal space.
Tearing: in head; in orbit; in abdomen; in intercostal space.
Neuralgia: in head; in eyes; around eyes; in face; of uterus; sciatic, r. side.
Rheumatic pain: in r. shoulder; in l. ankle joint.
Shaking pain: in frontal region.
Griping: in abdomen.
Burning: in stomach; in urethra.
Soreness: of roots of hair.
Aching: in brain; above l. zygoma and at temporal ridge; about l. malar bone; in all the limbs.
Throbbing: headache; in l. eye, forehead and temple.
Beating: in vertex.
Stiffness: of joints.
Pressure: in pit of stomach up into throat; in stomach; on chest.
Constriction: in stomach; of neck.
Tightness: of scalp.
Pulling sensation: in stomach.
Heaviness: in head; in all the limbs.
Numbness: with headache.
Tingling: in ears.
Heat: in head; in face.
Dryness: of eyes; of mouth and fauces.

" Tissues. " Debility of ganglionic nutritive fibres."
"Builds up and prevents destruction of nerve tissue."*
Phthisis intestinalis, nausea, gagging, loss of appetite, distension of the abdomen, constant pressure in the umbilical region, constipation, emaciation, hectic fever and delirium.
Intermittent fever in cachectic persons by loss of blood or from continued and long prostration.
Angina pectoris, where marasmus is a prominent symptom.
Fever with regular type, complete intermissions.
Periodical recurrence of nervous and congestive parox-

* " Binz and his disciples found that Chininum sulfuricum, in solutions of one to ten thousand, acts fatally to infusoria, vibriones, etc., but not on fungi of mould and on salt water amœba, prevents the fermentation of lactic acid and of alcohol, but not the diastatic action on starch and on the digestive juices; that it destroys the movements of the white blood-globules in the protoplasma, and thus prevents their emigration in inflammations; that it diminishes the quantities of urea, and diminishes and retards the change of tissue in the animal body."

Digitized by Google

ysms, trismus, paraplegia, ophthalmia, pulmonary hemorrhage, etc.

Diminished pulse and propelling power in arterial system, injures the muscular fibres.

Fever complicated with gastric troubles and torpidity of the bowels.

Erethism of the circulatory system.

Prostration with hyperæsthesia.

[45] **Touch. Passive Motion. Injuries.** ‖Great sensitiveness against external influences. θCholera.

Pressure: > neuralgia around l. eye; > facial neuralgia; < pain in epigastrium; intercostal space sensitive; last cervical and first dorsal vertebræ sensitive; dorsal vertebræ painful; spine painful; on dorsal vertebræ causes dyspnœa.

Touch: uterine region sensitive; third dorsal vertebræ painful; three upper dorsal vertebræ painful and sensitive; skin sensitive.

[46] **Skin.** Inflammation of skin.

Skin flaccid and sensitive to touch.

Deadness and livid redness of skin, with formation of a gelatinous pseudo-membrane or thin superficial scurf.

Urticaria eruption over body.

Red rash over whole body, with severe stinging followed by desquamation.

Gangrenous and fetid suppurations.

Cancerous ulcers, thick, livid, humid crust, which becomes dry and black, with red, humid and finally yellowish dilated margins.

Recommended in plague, by Lorbacher.

Sudamina and red spots in typhus.

‖Confluent smallpox, eruption hemorrhagic; pulse 120, respiration 28, abdomen distended but painless, submaxillary region swollen, moist, troublesome cough, great mental depression.

[47] **Stages of Life, Constitution.** ‖Cachectic persons weakened by loss of blood.

Suits weakly, florid, sanguine and nervous constitutions.

Boy, æt. 10; enlargement of spleen.

A boy, æt. 13; epileptic attacks.

A boy, æt. 13; intermittent paralysis of lower limbs.

Boy, æt. 15, growing very fast, and undergoing changes incident to puberty; lassitude.

Young P., æt. 16, jeweler; periodical cervical neuralgia.

A youth, æt. 17; enlargement of spleen.

A young lady, inclined to hysteria.

A robust brunette, æt. 23; spinal irritation.

Woman, æt. 24, nervo-sanguineous temperament; intermittent fever.

Digitized by Google

Mrs. A., æt. 25, blue eyes, auburn hair, mirthful temperament; chronic intermittent.
A woman, æt. 26; intermittent cephalalgia.
A primipara, æt. 28, lymphatic, chlorotic; puerperal convulsions.
A woman; intermittent paraplegia.
A woman, two weeks after confinement; intermittent uterine neuralgia.
A woman, in first month of pregnancy; epileptiform spasms.
A very sensitive lady, in seventh month of pregnancy, subject to hysteria; intermittent ophthalmia.
A weakly, hectic woman, mother of four children, pregnant; diarrhœa, with night sweats.
Plethoric woman, æt. 30; intermittent apoplexy.
A young soldier, of middle stature, good constitution and sanguine temperament; typhus.
A man, of plethoric habit; intermittent prosopalgia.
Two men, with general dropsy and enlarged spleen.
Man, æt. 30, bilious temperament; intermittent fever.
J., æt. 30, clerk; suborbital neuralgia.
A woman, æt. 31; in sixth month pregnancy; intermittent fever.
A man, æt. 34; acute rheumatism.
Mr. B., lawyer, æt. 36, during past ten years had many attacks of intermittent fever, which have been cut short by sulphate of quinia; suborbital neuralgia.
A robust man, æt. 36; intermittent ophthalmia.
Robust man, æt. 40, choleric temperament; intermittent ophthalmia.
Man, æt. 42, blonde, weakly constitution, subject to gastric troubles; typhus.
A woman, æt. 48; menorrhagia followed headache.
A woman, æt. 48; intermittent fever.
A woman, æt. 50; intermittent prosopalgia.
A weakly, short, thick-set man, æt. 50; intermittent pulmonary hemorrhage and diarrhœa.
Man, æt. 59, choleric temperament, large and strong; intermitting colic.
Man, æt. 60, nervo-bilious temperament; intermittent fever.

[48] **Relations.** Antidotes: *Arnic.*, *Arsen.*, *Carb. veg.*, *Ferrum*, *Hepar*, *Laches.*, *Natr. mur.*, *Pulsat.*

Compare: *Apis* (chill at 3 P.M.), *Arsen.* (pyæmia, spinal irritation), *Bryon.* (sweat from least exertion), *Carb. an.* (all discharges are debilitating), *Eupat. perf.* (sweat relieves all symptoms but headache), *Nux vom.* (blue lips and nails with chill), *Pulsat.* (rheumatic, erratic pains), *Stannum* (supraorbital neuralgia), *Staphis.* (head gradually breaks into sweat while perfectly quiet).

CHIONANTHUS VIRGINICA.

Fringe Tree. *Oleaceæ.*

"A singular looking shrub, or low tree, from ten to thirty feet high, growing from Pennsylvania to Georgia, on river banks and sandy plains. It presents clusters of snow-white flowers in May and June."

The bark contains Saponin. The bark of the root, bruised, is sometimes used for healing wounds.

CLINICAL AUTHORITIES. — *Hypertrophy of liver, Obstruction of liver,* and *Jaundice,* Goss, Hale's N. R., p. 161; *Hepatic disorder,* E. Guernsey, Trans., vol. 4, p. 226.

[18] **Hypochondria.** ‖Hypertrophy of liver.
‖Obstruction of liver, in malarious districts.
‖Enormous liver, constipation, stools clay-colored, skin and urine colored as is usual in severe cases of jaundice, great emaciation.
‖Soreness in region of liver, quick, weak pulse, stools undigested and showing an absence of bile, urine almost black.
‖Chronic cases of jaundice.
‖Jaundice recurring every Summer.

[20] **Stool and Rectum.** ‖Constipation, stools clay-colored. θEnlargement of liver.
‖Stools undigested and showing an absence of bile. θHepatic disorder.

[21] **Urinary Organs.** ‖Urine colored as usual in cases of severe jaundice. θHypertrophied liver.
‖Urine almost black. θHepatic disorder.

[29] **Heart, Pulse and Circulation.** ‖Quick, weak pulse. θHepatic disorder.

[44] **Tissues.** ‖Great emaciation. θHypertrophied liver.

[45] **Skin.** ‖Jaundice of years' standing, recurring annually.

CHLORALUM.

Hydrate of Chloral. $C_2HCl_3O+H_2O$.

Discovered in 1832, by Liebig.

Proved by W. Eggert, S. Swan, D. A. Babcock, etc. See *Encyclopedia*, vol. iii.

Poisoning, by E. W. Berridge, N. Y. J. H., vol. i., p. 307.

"Prepared by passing a stream of chlorine through absolute alcohol, until it comes over unchanged. The thick fluid remaining behind is chloral. The simple addition of water converts chloral into its hydrate."

The first therapeutic application of this substance was made by O. Liebreich, of Berlin, who conceived that the transformation of chloral into chloroform might be expected when it reached the blood of a living animal. On coming into contact with its alkalis the chloral would separate into chloroform and formicic acid.

W. W. Keen, of Philadelphia, has made use of chloral as an antiseptic and deodorant in the dissecting room and in surgical practice.

CLINICAL AUTHORITIES.—*Melancholia and headache*, J. H. Sherman, N. E. M. G., vol. 9, p. 412; *Mania-a-potu*, J. C. Wilson, N. E. M. G., vol. 6, p. 160; *Ophthalmia*, Dyce Brown (2 cases), B. J. [1] **Mind.** Comatose for days, ending in cerebral congestion. Melancholia, idiocy and insanity.

Digitized by Google

Fixed despair of recovery; believes he will give his imaginary disease (syphilis) to others.

Confusion of mind, inability to concentrate thoughts, impaired memory; could not keep the thread of sermon.

; Mental diseases, and general paralysis of patients suffering from mental diseases.

| | Constantly hears voices.

! Sleeplessness at night, with restless irritability; headache, confusion in head; melancholy; inclined to wander and hide herself, avoiding shrewdly the vigilance of her friends; would then return, unable to give any account of where she had been.

! He walks hurriedly up and down the room, talking to himself in an excited manner, and holding conversation with imaginary beings. θ Acute mania induced by severe mental excitement.

Jumps out of bed with fear, cold sweat, screams as if in mortal terror; night terrors of children.

Gorgeous visions of arches, tapestry and colors pass before the eyes when shut, or open in the dark.

| | Wild delirium changing to a busy delirium; visions of fantastic objects; a great deal of fever; pulse 120 most of the time. θ Delirium tremens.

Delirious, she hurls a hot water bottle at an imaginary figure at foot of bed.

| | Boisterous mania.

; Delirium of typhus.

| | Delirium tremens, when brain is congested.

| | Puerperal mania, with sleeplessness.

Hydrophobia.

[3] **Inner Head.** | | Cephalalgia.

! Hard, full, pressing pains in head, continuing a long time without relief. θ Dysmenorrhœa.

Dull, heavy, aching pain in forehead and occiput all day, < by motion.

Severe pain in frontal region over supraorbital ridge, which nothing relieves, < by motion.

Headache in forehead, extending to occiput.

Headache over both eyes, running down into eyes, l. side <, with feeling as if eyes were constricted.

Neuralgia of temporal region.

Feeling as if a hot band was drawn across forehead from temple to temple directly over eyes, with sensation of a burning ring around each eye.

Dull, heavy headache in occiput and forehead over eyes; a feeling of weight and soreness, which seems wholly within cranium; < by moving about and lying down, slightly > by going into open air.

Digitized by Google

‖Cerebro-spinal congestion.
‖Cerebral congestion following a condition of extraordinary depression of nervous system.
Congestion of brain with some mental excitement.

Outer Head. ‖Great heaviness of head; cannot lift it.
Erythema of head and neck.

Sight and Eyes. Retinal hyperæsthesia.
Sensitive to light.
Colors are unusually bright.
Objects look white; color blindness.
Dark spots before eyes.
‖Dimness of sight.
Eyesight weak, dim, globe congested, lids swollen and sometimes partially paralyzed.
Peculiar dimness or weakness of sight; must read with one eye at a time—for a minute or two with each; if one eye was used longer than a minute the words and letters became blurred and indistinct.
If one eye only is used until objects fade, the other sees objects plainly for awhile.
Can see small objects only for a few moments, they fade away.
Eyeballs feel too large.
‖Burning in eyes and lids.
Sensation of a burning ring around each eye.
Feeling as if eyes were constricted, with headache.
Sharp pain in eyeballs.
Redness and watering of eyes.
Watery eyes, especially when looking at anything.
‖Conjunctiva congested.
‖Eyes injected and bloodshot, constantly watering.
‖‖Face and eyelids so swollen that he could hardly see. θUrticaria.
Conjunctivæ injected, face has a puffed and swollen appearance, especially below eyes.
‖Ocular and palpebral conjunctiva of l. eye much injected, with considerable pain; a small ulcer on cornea reduced to size of a pin point.
‖Right eye much injected, with great pain; l. eye also slightly injected. θConjunctivitis.
‖Conjunctivitis of r. eye, which is very red and painful, deep cut ulcer in centre of cornea; of a strumous family.
‖Conjunctivitis and corneitis on l. eye; cornea is dim; in r. eye considerable redness of palpebral and ocular conjunctiva at one point; great phophotobia.
‖Conjunctivitis of both eyes; small ulcer on l. cornea; feeling of sand in eyes, but almost no photophobia; is a very strumous patient.

Digitized by Google

‖Catarrhal ophthalmia; there are one or two phlyctenæ on r. eye, at edge of cornea; severe circumorbital pain and photophobia.
‖Intense itching of inner canthi and edges of lids.
‖Puffy swelling of lids.
Eyelids feel so heavy he can hardly lift them.
Ptosis (in a man who took it for overtaxed mind).

[6] **Hearing and Ears.** Great sensitiveness to noise.

[8] **Upper Face.** Dark scarlet flushing and heat of head and face, from roots of hair to ramus of lower jaw, neck and chest, including eyes, persistent under pressure; blotchy in places.
‖Face red and swollen. θUrticaria.
Face erysipelatous; swollen so he could not see.
⁞Neuralgia of infraorbital branch of fifth nerve.

[9] **Lower Face.** Lips covered with sordes and dried blood.
Swelling of parotid and submaxillary glands.
‖Blueness of lips.

[10] **Teeth and Gums.** ‖Neuralgia from decayed teeth.
‖Odontalgia traumatica from pressure of filling; pain unbearable; < when lying down.
‖Excruciating toothache from decayed teeth, with neuralgic affection of jaw.
‖Neuralgia of inferior dental branch of fifth nerve.

[11] **Taste and Tongue.** Deeply coated tongue.
A black streak along centre of tongue as though ink had been rubbed over it.

[12] **Inner Mouth.** Lips, mouth and fauces red and raw, gums spongy, tongue blistered and ulcerated.

[13] **Throat.** Spasm of throat.
Partial paralysis of œsophagus.
‖She could not utter a syllable and swallowed with difficulty.

[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite.
Thirst.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Vomiting and nervous irritability during course of cerebro-spinal meningitis.

[17] **Scrobiculum and Stomach.** ‖Feebleness of stomach.
‖Sense of sinking and oppression at pit of stomach.

[18] **Hypochondria.** ‖Hepatic and renal colic, dependent on passage of calculus.
‖Gall stones.
Atrophy of liver.

[19] **Abdomen.** ‖Severe colic of children, when pain threatens to cause spasms.
‖Ascites attendant upon supposed case of phthisis pulmonalis.

Digitized by Google

[20] **Stool and Rectum.** Soft, lumpy, strong smelling stools twice a day, and frequent passages of fetid flatus.
| | Diarrhœa at night with excessive nervous excitement. θDentition.
Cholera without vomiting or diarrhœa.

[21] **Urinary Organs.** | | Nephritic and hepatic colic dependent upon passage of calculus.
| | Increases urine when given for anasarca from heart disease.
| Urinated copiously in bed without knowing it.
| Nocturnal incontinence of urine; in children in latter part of night, even if they have urinated during night and drank no water.
Frequent and profuse urination of dark amber color, clear and without odor.

[22] **Male Sexual Organs.** Loss of sexual power; no desire or erections; impotence.
| Chordee during gonorrhœa.

[23] **Female Sexual Organs.** If taken immediately before onset of catamenial discharge, it entirely checks it.
| | Menses irregular. θUrticaria.
| Severe spasmodic pains in and about the uterus. θDysmenorrhœa.
| Pains very severe and laborlike. θDysmenorrhœa.
| | Thick, yellow leucorrhœa, tinged sometimes with a little blood. θUrticaria.

[24] **Pregnancy. Parturition. Lactation.** | Troublesome pruritus during pregnancy.
| Tedious labor lasting over eighteen hours; nervous, irritable, hysterical condition; the pains which are apparently normal and forcible have no effect on the uterus.
: Severe labor pains.
| | Puerperal convulsions.
| | Severe case of chorea during pregnancy.

[25] **Voice and Larynx. Trachea and Bronchia.** : Bronchitis.

[26] **Respiration.** | Gasping breathing and confusion of thought; sinking at stomach.
| Great dyspnœa, a sense of suffocation; oppression at base of chest (in front), with urgent thirst.
| | Slow respiration, with imperceptible pulse.
Laborious respiration, occasional deep inspiration, with a sighing expiration.
Wheezing respiration.
Stertorous breathing, with loud snoring during sleep, in any position.
When lying on back, the inspiration was through the nose, while the expiration was blown from the lips as in apoplexy.

Digitized by Google

‖Asthma; the nightly paroxysms are very severe; he is bent forward, can hardly catch his breath.

[27] **Cough.** ‖Hard, difficult cough. θChest affections.
Spasmodic cough accompanying last stage of phthisis.
‖Labored cough of bronchitis and phthisis.
Whooping cough.
Croup.

[28] **Inner Chest and Lungs.** Pulmonary congestion.
‖Constriction at base of chest, with dyspnœa, in organic heart affections.
Sense of weight on chest in region of sternum at night, causing expiration to be easier than inspiration.
Singular sensation of fulness of chest, not as if it was filled up as a person experiences after a meal, but rather as if all the tissues were hypertrophied, producing an indescribable sense of tightness and pressure on the lungs, causing very labored breathing and redness of face.
‖Great dyspnœa with labored action of lungs. θDropsy.
⁞Congestive bronchitis with spitting of blood; painful and audible breathing.
‖Severe attacks of typhoid pneumonia; unable to sleep from nervous irritation, dyspnœa and cough.

[29] **Heart, Pulse and Circulation.** Heart's action regular but with increased frequency and diminished force.
‖Increased action of heart and oppressed respiration.
‖Violent palpitation with dyspnœa. θHypertrophy with dilatation.
‖Palpitations so violent that they can be heard; great difficulty of respiration, patient requires constant fanning. θPhthisis.
Palpitation accompanies hyperæmic condition of skin; < from wine, beer or spirits.
Heart dilated or weakened, with peculiar fulness and lightness of chest and sense of emptiness in stomach.
⁞Angina pectoris.
Valvular disease of heart with anasarca.
‖Diminution of heart's action in organic affections, with dyspnœa and constriction of base of chest.
‖Heart beats become feeble, irregular, very rapid.
‖Heart feeble, pulse weak; could not lie down; general anasarca.
Cardiac neurosis.
‖Threatened paralysis of heart. θPericarditis.
‖Pulse frequent, irregular, weak, intermittent, heart acting regularly but with increased frequency and diminished force.
Weak, irritable pulse, threatening paralysis of heart.
Imperceptible pulse, cold extremities, slow respiration.

Digitized by Google

Pulse 88.

[31] **Neck and Back.** Erythema of head and neck.

A purple discolored band, two inches wide, along each side of vertebral column.

‖Large patches of redness with urticarious wheals about neck, trunk and extremities.

At base of skin large greenish spots.

[32] **Upper Limbs.** Upon red surface of l. arm a mass of minute points of a deeper red.

Left arm swollen and indurated.

Erythematous inflammation, desquamation and ulceration around border of nails; pain, great sensibility to touch.

[33] **Lower Limbs.** Sensation and motion paralyzed in both legs.

Foul-smelling foot sweats.

[34] **Limbs in General.** Wandering rheumatoid pains.

‖Cold extremities, with blueness of lips, slow respiration, imperceptible pulse.

‖Large red patches on arms and legs, exactly like nettle-rash, in large raised wheals, with intense irritative itching.

[35] **Rest. Position. Motion.** ‖Limbs extended, head low, appearance of impending death.

Lies in a state resembling catalepsy; hysteria.

Lying down: < headache; < toothache; impossible on account of weak action of heart.

Lying on back: inspiration through nose, expiration through lips.

In any position: stertorous breathing.

Bent forward: in asthma.

Could neither lie nor stand; chorea.

Motion: < pain in forehead and occiput; pain over supra-orbital ridge.

[36] **Nerves.** Lassitude.

Unaccountably depressed and very weak, especially in lower limbs, this weakness increasing until he is compelled to give up his daily walks from sheer inability to put one leg before the other.

‖Great muscular prostration, limbs extended, head low, appearance of impending death.

‖Tendency to weakness, feebleness of stomach, blue lips, cold extremities, slow respiration, imperceptible pulse.

‖Great exhaustion from sleeplessness. θAcute rheumatism.

Extraordinary depression of nervous system, following cerebral congestion.

Great prostration, tendency to somnolence.

‖Neuralgia.

Digitized by Google

‖Violent hysterical fit; she lies in a state resembling catalepsy.
‖Nervous irritation; mania; hysteria; mania-a-potu; epilepsy; convulsions of children.
‖Chorea: patient could neither lie nor stand, the head, limbs and body being in constant motion and each muscle apparently partaking of irregular action.
‖Long-continued and obstinate chorea.
‖Intense chorea, where constancy and severity of spasmodic movements threaten life of patient.
‖Trismus and trismus nascentium.
‖Traumatic tetanus and infantile tetanus.
‖The whole body engaged in tetanic rigidity, fits coming on at very short intervals; mouth can only be slightly opened; deglutition very difficult. θTetanus.
‖Sudden violent tetanic fit with lockjaw; weeping mood; sudden very violent pain in abdomen. θTetanus.
Motor and sensory paralysis of both legs.

[37] **Sleep.** ‖Insomnia arising from overfatigue, mental or physical.
During sleep, stertorous breathing with loud snoring in any position.
‖Night terror, especially in teething children.
Horrible dreams with frightful visions, they scream and cry out, sit up in bed and cannot be quieted.
‖Wakes from disturbed rest, cries out and screams until perfectly exhausted and in danger of general convulsion. θChorea.

[38] **Time.** At night: sleeplessness; terror of children; diarrhœa with nervous excitement; enuresis; paroxysms of asthma; sense of weight on chest, in region of sternum; irritation of skin.
Latter part of night: incontinence of urine in children.
Towards evening: itching of chin, and front and back of neck.

[39] **Temperature and Weather.** Requires constant fanning; palpitation and dyspnœa in phthisis.
Open air: > headache.

[40] **Fever.** Sensation of heat all over body, particularly in face.
High fever.
‖Fevers where cephalic symptoms do not contraindicate its use.

[41] **Attacks, Periodicity.** Paroxysms: of asthma nightly.
Lasting over eighteen hours: tedious labor.
All day: headache in forehead and occiput.
Continuing a long time: pains in head.
For days: comatose.

[42] **Locality and Direction.** Left: above and in eye, head-

Digitized by Google

ache <; conjunctiva injected; eye slightly injected; conjunctivitis and keratitis; small ulcer on cornea; bad eruption on arm; arm swollen and indurated.

Right: eye injected, painful; conjunctivitis; ulcer on cornea; redness of palpebral and ocular conjunctiva; phlyctenæ on edge of cornea.

" **Sensations.** As if a hot band was drawn across forehead; as if eyes were constricted; as of a burning ring around each eye; as if eyeballs were too large; as of sand in eyes; sinking and oppression at pit of stomach; as if tissues in chest were hypertrophied (fulness); on chin and neck like minute insects or hairs.

Excruciating pain: in teeth.
Sharp pain: in eyeballs.
Hard pains: in head.
Severe pain: in frontal region; in abdomen.
Neuralgia: of fifth nerve; from decayed teeth; from pressure of filling of jaw; of inferior dental branch of fifth nerve; of temporal region.
Rheumatoid wandering pains.
Stinging: over whole body.
Spasmodic pains: in and about uterus.
Colic: hepatic and renal; of children.
Laborlike pains: in dysmenorrhœa.
Burning: in eyes and lids; ring around each eye; stinging over whole surface.
Aching pain: in forehead and occiput.
Dull pain: in forehead and occiput; over eyes.
Full pains: in head.
Heavy pain: in forehead and occiput; over eyes.
Pressing pains: in head.
Soreness: within cranium.
Pressure: on lungs.
Oppression: at base of chest in front; at pit of stomach.
Tightness: on lungs; over whole surface.
Constriction: at base of chest.
Fulness: of chest.
Heaviness: of head; of eyelids.
Weight: within cranium; in chest in region of sternum.
Lightness: of chest.
Emptiness: in stomach shortly after eating.
Heat: of head; of face; all over body.
Itching: of inner canthi and edge of lids, of chin, and front of back and neck; over whole body.
Hardness: over whole surface.

" **Tissues.** ||Patient anæmic and emaciated. θChorea.

Acts primarily on ganglia of brain, then of spinal cord, finally on those of heart, so that paralysis of heart sets in.

Digitized by Google

Causes cessation of cardiac movements, diminishes excitability of motor centres, of respiratory and abdominal muscles, and lessens irritability of vaso-motor centres.

Produces first sleep, then more or less anæsthesia, and during both relaxation of muscles.

In muscular debility, fatty degeneration and dilatation, when there are evidences of nervous deficiency, as shown by irregularity or intermittency of action and palpitation of heart.

The temperature falls, with sinking of pulse and respiration.

Destroys coagulability of blood.

Hemorrhagic diathesis.

Typhoid cases with epistaxis; hæmoptysis; hæmatemesis.

Favors the production of hemorrhage and tends to reopen recently cicatrized ulcers of mucous membranes.

Anasarca.

Purpura hemorrhagica.

Gangrene on places exposed to pressure, especially in patients laboring under mental diseases, the gangrene spreads in depth with an intact skin.

Rheumatism and gout.

Antiseptic dressing for wounds even when there is erysipelas.

Applied to fetid ulcers it has septic properties.

Touch. Passive Motion. Injuries. Seasickness; is said to be preventive.

Touch: sensitive around border of nails.

Pressure: does not alter scarlet flush on head and face; erythema remains unchanged.

Skin. Hyperæmia of skin < from smallest quantity of wine, beer or spirits, with distressing palpitation.

An itchiness of chin and front and back of neck, coming on towards morning, sensation like minute insects or hairs.

Pruritus of whole skin and of mucous surfaces of upper outlets of body.

Violent stinging, itching sensation over whole body. Urticaria.

Burning-stinging sensations, and a feeling of tightness and hardness over whole surface.

Intense irritation and itching of skin, preventing sleep at night.

Great irritation of skin with swelling of eyelids.

Marked cutaneous anæsthesia.

Bright, scarlet eruption on face, body and limbs.

She is much flushed, and there is present over the whole body a diffuse inflammatory redness closely resembling the smooth eruption of scarlatina.

Digitized by Google

Bright red or bluish erythema over whole body, permanent under pressure, mottled with livid patches and deep red spots.

‖Eruption on arms, legs and face and subsequently over whole body in large blotches of different shapes, raised above the surface and of a deep red color; these blotches gradually coalesce, till the whole skin is in a red and blotchy state, resembling measles.

‖Blotches of redness over legs and body in distinct wheals, not much fever.

A mass of minute points or stigmata upon the red surface of l. arm, of a much deeper red, permanent under pressure.

Eruption on arms and legs, exactly like nettlerash in large raised wheals, with intense, irritating itching, œdematous swelling of face, cheeks, eyelids, ears, coming on suddenly from a chill, not from heat.

‖Wheals come on suddenly from a chill, crops of them appearing many times a day; as long as she remains in the warmth is not troubled with them.

‖Rash "like the sting of a nettle," coming out every night, and almost disappearing during the day; it is very itchy, and after washing with soap and water becomes painful, disturbing sleep at night.

‖Urticarious eruption, which disappears by day and comes out at night, with such itching as to keep child from sleeping.

Large greenish spots at base of spine.

‖Eruption rises in white blisters on being scratched, there is great pruritus. θUrticaria.

Nettlerash < at night, compelling scratching until places bleed; fever and restlessness.

Arms red and speckled, with threads of white dead epidermis partially separated from subjacent cutis.

General desquamation in round patches like blisters, from which serum had been absorbed, leaving skin beneath of a purple and in some places yellow color.

Purpura hemorrhagica; herpes circinatus.

‖Decubitus. θDropsy. θScarlatina. θErysipelas.

[47] **Stages of Life, Constitution.** "Its action is more uncertain in persons who are free livers and in those accustomed to the use of alcohol."

Children, incontinence of urine.

Peter B., æt. 6 months; already weaned; red blotches and wheals over legs and body.

Robert J., æt. 9, of a strumous family; conjunctivitis.

Girl, æt. 13; symptoms commencing at menstrual period;

Digitized by Google

the remedy also caused passage of a round worm; tetanic convulsions.

Jane W., æt. 13; taken ill with headache, sickness and vomiting, which lasted three days, when an itching urticaria developed.

Girl, æt. 18, had a previous attack; violent hysterical fit.

Mrs. S., æt. 38; catarrhal ophthalmia.

Mrs. S., æt. 38, and son, æt. 8; urticaria.

German, æt. 46; from having become wet; urticaria.

German, æt. 64; urticaria.

[48] **Relations.** Antidotes: *Ammonia*, *Atrop.*, *Digit.* (heart); *Moschus*, electricity.

Compare: | *Bellad.*, ‖ *Chlorof.*, | *Gelsem.*, | *Nux vom.*, | *Opium.*

; It may be used where opium is contraindicated, in general, after operations.

CHLOROFORMUM.

Chloroform. $CHCl_3$.

Provings by Lembke, A. H. Z., vol. 39, p. 369, and E. W. Berridge, effects of inhalation, M. H. Rev., vol. 16, p. 38.

CLINICAL AUTHORITIES.—*Arachnitis ending in convulsions*, E. E. Marcy, N. A. J. H., vol. 1, p. 337; *Mania-a-potu*, Pearce, Add. to Hom. Mat. Med.; *Sick headache*, G. A. Hall, Burt's Mat. Med.; *Biliary calculi*, C. Hering; T. H. Buckler, Hom. Times, vol. 8, p. 48; E. M. Hale, Am. Hom. Obs., vol. 7, p. 471; *Paralysis of sphincter vesicæ*, Woodward (10 drop doses), Burt's Mat. Med.; *Puerperal convulsions*, Sanford, Browne, and Talbot, Med. Inv., vol. 7, p. 169; *Puerperal convulsions (per rectum)*, W. H. Holcomb, Trans. Am. Inst., 1870, p. 446; *Tetanic spasms in typhus*, Watson, Add. to Hom. Mat. Med.

[1] **Mind.** Difficult comprehension.

Excitement quickly subsiding into stupefaction, in which, however, the will of the individual is evidently active.

Great weakness of brain, with loss of memory, retarded power of comprehension and thinking, with frequent occurrence of confusion of intellect.

Weeping.

Low moaning.

‖ Mania from intoxication (olfaction).

Delirium, sometimes quiet, sometimes violent.

Delirium tremens where excitement and violence predominate.

Digitized by Google

[3] **Sensorium.** Giddiness.
Seasickness.

[3] **Inner Head.** Pressure in brain and roaring in ears.
Headache with dizziness.
‖Sick headache with excessive nausea and vomiting.

[4] **Outer Head.** A desire to lay head upon one side, to stretch lower limbs and to let the arms hang down.
‖Head drawn down upon shoulders. θArachnitis.

[5] **Sight and Eyes.** Inclination to close the eyes.
Floating images before eyes.
Photophobia (greatly relieved by fumes of chloroform).
First contraction, then dilatation of pupils.
‖Eyes open and close with incredible rapidity, eyeballs rolled downward, pupils contracted. θArachnitis.
Exophthalmic goitre, morbus Basedowii.

[6] **Hearing and Ears.** Ringing in ears, buzzing and rumbling in ears like the noise of railroad cars or the striking of clocks.
Singing in ears, with pressure in head, as after use of tea.
Indistinct hearing.
‖Earache.

[8] **Upper Face.** Blueness of face.
‖Rapid convulsive movements of muscles of face; whole face frightfully distorted. θArachnitis.

[9] **Lower Face.** A slight stinging and burning in lips.
‖Foaming at mouth; jaws locked, lips tightly compressed. θArachnitis.

[11] **Taste and Tongue.** Sweetish taste in mouth.

[12] **Inner Mouth.** Coolness in mouth.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough of nervous form.
Nausea and vomiting, seasickness or morning sickness, with much acidity of stomach, and great distension of stomach and bowels with gas.

[17] **Scrobiculum and Stomach.** Pain in region of cardiac orifice of stomach.

[18] **Hypochondria.** ‖Cholestric gall stones and biliary colic.

[19] **Abdomen.** Enteralgia, or colic, with intense suffering, and tympanitis; especially if accompanied by great restlessness from intense pain.
‖Gastralgia, enteralgia, hepatic and renal colic.

[20] **Stool and Rectum.** Involuntary stools.
Involuntary stools of mucus and blood, with great tenesmus.

[21] **Urinary Organs.** Bladder irritable.
‖Paralysis of sphincter vesicæ. θAfter parturition.
‖Renal colic during passage of calculi.

[22] **Male Sexual Organs.** Great weakness and relaxation of sexual organs.

Digitized by Google

[25] **Female Sexual Organs.** Hysterical conditions dependent on irritability and spasm of the cervix.
Neurosis of sexual organs.
[31] **Pregnancy. Parturition. Lactation.** Prevents the shock engendered by labor, in very nervous patients.
No freedom from suffering between the pains; she complains much of her back, or of extreme pain and perhaps tenderness over whole abdominal region; she is very restless, can find rest in no position, tosses about and is very nervous.
Protracted and severe labors; rigidity of os uteri.
Women subject to convulsions during labor.
‖Complete paralysis of sphincter vesicæ following labor.
[25] **Voice and Larynx. Trachea and Bronchia.** Aphonia.
Pain in larynx.
[26] **Respiration.** Sighing or snoring breathing.
‖Stertorous breathing. θArachnitis.
Want of breath.
Respiration deeper and slower, constantly increasing retardation and weakness of action of heart and arteries; trembling of hands and feet, total cessation of motion and sensibility.
Respirations almost stopped, so few and feeble; unconsciousness; motionless features; livid lips; feeble pulse, as if dying. θShock of injury.
Neurosis of respiratory organs, as laryngismus stridulus, asthma, and pertussis.
[27] **Cough.** ‖Dry, hard, spasmodic, irritable cough.
[29] **Heart, Pulse and Circulation.** Constantly increasing retardation and weakening of action of heart and arteries.
Fluttering of heart.
[31] **Neck and Back.** Pain in region of l. kidney.
[32] **Upper Limbs.** Desire to let the arms hang down.
Pain in dorsum of hand and joint of thumb.
[33] **Lower Limbs.** Desire to stretch the lower limbs.
Pain in region of r. sciatic nerve.
[34] **Limbs in General.** A sensation of fingers and toes being asleep.
Trembling of hands and feet.
Convulsive twitching of extremities.
Rapid convulsive movements of muscles of arms and legs, blue color under the nails. θArachnitis.
Rheumatic pain about the joints.
[35] **Rest. Position. Motion.** Can find rest in no position.
A desire to lay head upon one side, to stretch lower limbs and to let the arms hang down.
Total cessation of motion.
[36] **Nerves.** Insomnia, deafness, apathy, and tremulousness of hands.

Digitized by Google

‖Sudden jerking and trembling of every muscle of body, which continues for about one minute and then passes off, without waking him from sleep. θArachnitis.
Spasms resembling hysteria, especially in females.
Tonic and clonic spasms.
‖Tetanic spasms. θTyphus fever.
Trismus.
‖Convulsions.
‖Puerperal convulsions from uræmia or reflex irritation.
Entire inactivity of all the external sensibilities, so that even considerable injury to the nerves produces no reflex motion in the periphery.
Total cessation of motion and sensibility.

[37] **Sleep.** Great sleepiness, yawning, and invincible lassitude.
Sleep commonly dreamless.
Comatose sleep.

[40] **Fever.** A general feeling of warmth flowing through whole body.
‖Typhus fever, with tetanic spasms.
Typhus fever, with great prostration, delirium, subsultus, irregular respiration and nervous restlessness.

[43] **Sensations.** As if fingers and toes were asleep; as of warmth flowing through whole body.
Pain: in region of cardiac orifice of stomach; in abdomen; in back; in larynx; in region of l. kidney; in dorsum of hand and joint of thumb; in region of r. sciatic nerve.
Stinging: in lips.
Burning: in lips.
Colic: biliary; abdominal; renal.
Rheumatic pain: about joints.
Pressure: in brain.

[46] **Skin.** Skin cold, pale.
Unhealthiness of skin, it is slow to heal.

[47] **Stages of Life, Constitution.** "Those that bear chloroform best are delicate, weakly people, reduced by disease, and women and children. The robust and healthy are more exposed to the dangerous effects of this agent. The age of the individual seems to have no special influence."
"It must not be used when there is softening of brain; severe organic heart disease, with intermittent pulse; aneurisms of aorta; extreme weakness from hemorrhages; extreme anæmia, and great tendency to syncope."
"In drunkards the stage of excitement can not be overcome without grave danger to life."
"Use contraindicated: in fatty degeneration of heart; in

Google

those addicted to the use of spirituous liquors; where there is albuminuria."

Son of J. W. Crane, M.D., æt. 13, sanguine bilious temperament, previous to attack had enjoyed good health; arachnitis ending in convulsions.

Clergyman, æt. 58, who had suffered twenty-three years from gall stones.

[48] **Relations.** Antidotes: *Nitrite of Amyl, Ipecac.* (against action on stomach); brandy ameliorates the symptoms.

In narcosis from chloroform, small pieces of ice placed in rectum produce deep inspiration soon followed by natural breathing.

It antidotes: *Strychnine.*

CHLORUM.

Chlorine. *The element.*

Introduced and first proved by C. Hering, in 1846, and published in Archives, 2, 3, p. 165, which contains his symptoms and those of another prover, Mr. Whitey, besides numerous chemical, toxicological and pharmacological observations. For later provings, including S. A. Jones' involuntary proving, from inhaling the gas, see Encyclopedia, vol. 3. It was first used in practice by Carroll Dunham.

CLINICAL AUTHORITIES.—*Hemorrhage from bowels in typhus,* Schweich, Rück. Kl. Erf., vol. 4, p. 754; *Spasmus glottidis,* C. Dunham, Hom. Rev. vol. 2, p. 20, and U. S. Med. and Surg. Jour., Oct. 1869, p. 117; *Suffocative attacks,* Searle, Rane's Path., p. 337; *Spasmodic cough,* C. Dunham, Hom. Rev., vol. 3, p. 370; *Phthisis and chronic catarrh,* a number of cases relieved and cured by inhalation, Frank's Mag., vol. 3, p. 130; *Malignant pustule,* Frank's Mag., vol. 1, p. 432.

[1] **Mind.** Mind tranquil and active.

Apprehension.

A horrible state of mind, fears he will go crazy, fears he cannot make a living.

Everything seems in confusion.

Cannot remember names if he sees people, and when seeing the names does not remember the person.

Quiet delirium in alternation with the greatest restlessness and desire to run away. θTyphus.

Restless desire to walk about, as if whole attention must be centered on act of respiration.

Intoxicated feeling with sopor and great nervous irritation; dry mouth and diarrhœa. θTyphus.

Digitized by Google

Inclined to anger.
‖After excitement. θSpasmus glottidis.

[2] **Sensorium.** ‖Disposition to faint. θTyphus.
Vertigo and stupor.
‖Coma, fainting and cold, viscous sweats. θTyphus. θScarlatina. θMeasles. θVariola.
‖Partially comatose during suffocative attack.
Partial unconsciousness, followed by free respiration and deep sleep.

[3] **Inner Head.** Rush of blood to head.
Painful aching in vertex and down l. side, with inclination to lie down.

[4] **Outer Head.** Warm sweat breaks out on forehead while coughing.

[5] **Sight and Eyes.** ‖Dull and glassy expression of eyes. θSpasmus glottidis.
‖Staring eyes.
Dimness before eyes.
‖‖Running of tears < in open air.
Eyes protrude with coryza, sunken face and spasmodic cough.
‖Purulent ophthalmia.

[6] **Hearing and Ears.** Singing in ears.
‖Deafness. θTyphus.

[7] **Smell and Nose.** Dryness in nose before coryza.
‖Nose smoky or sooty. θTyphus.
Corrosive feeling in corners of nose.
Nose completely stopped.
Sudden running in drops, of a sharp, corroding fluid, with tears in eyes, dry tongue, palate and fauces.
Nose discharged mucus freely.
Water dropped from l. nostril, did not burn or excoriate skin.
‖‖Coryza with headache.
Fluid coryza very soon changes to yellow, copious phlegm.
Evening coryza, morning sneezing.
Severe sneezing.
Nasal complaints < lying down.

[8] **Upper Face.** ‖Face pale and bloated. θSpasmus glottidis.
Pale, dirty yellow, cadaverous color; face puffed up.
Face high colored.
‖Child became livid. θSpasm of glottis.
‖Face extremely livid, blue.
‖Ash-colored face. θTyphus.
Swollen face, with protrusion of eyes, abundant discharge of mucus from nostrils.
Warm sweat broke out on forehead while coughing.

Digitized by Google

[9] **Lower Face.** ‖Lips, tongue and teeth brown, black and sooty. θTyphus.

[10] **Teeth and Gums.** Sensation as if teeth were too full, or had been injured by acids.

‖Teeth black.

[11] **Taste and Tongue.** ‖Tongue dry. θTyphus.

Sensation as if tongue had been burnt.

‖Tongue black.

[12] **Inner Mouth.** ‖Dryness of whole buccal cavity. θTyphus.

Abundant discharge of mucus from mouth and nose.

Salivation.

Soreness of mouth, fauces and œsophagus, as if tongue had been burnt; as if he had been eating vegetable acids, or as if his teeth had been injured by acids.

Sore mouth.

Increased vascularity and minute ulcerations in mouth and throat.

Opening mouth to take food or drink produced spasm of glottis.

‖Putrid odor from mouth. θStomacace.

[13] **Throat.** Dryness of throat.

Inability to swallow.

Throat sore from uvula to bronchi, including fauces and œsophagus.

Throat and chest sore, voice hoarse.

Any attempt to examine the throat produced spasm of glottis.

Reported to have had a favorable effect upon the diphtheritic process.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Loss of appetite. θSpasmus glottidis.

No thirst with coryza, but cold water is very serviceable.

[15] **Eating and Drinking.** Even tasting food was prevented by spasm of glottis; while eating, and after it, hot feelings; irritable, and disposed to get into a rage.

After eating, increase of headache with fever.

Smoking causes a dryness in mouth.

[16] **Hiccough, Belching, Nausea and Vomiting.** Disposition to vomit.

Desire to vomit when coughing, without nausea.

Violent vomiting of dark liver-colored masses of blood, without any pain, lessening pain in præcordia and sensation of suffocation.

[17] **Scrobiculum and Stomach.** Contracting sensation and pain in præcordia.

Cannot bear any pressure on pit of stomach.

Peculiar painful sensation with cough, beginning in region of stomach and extending to head.

Digitized by Google

Acidity of stomach.
Irritation of stomach.
Stomach inflamed.
Mild catarrh of stomach and chronic bronchitis, with loss of flesh, and an unhealthy color of skin.

[18] **Hypochondria.** Increased secretion of bile.

[19] **Abdomen.** Weakness in abdomen.

[20] **Stool and Rectum.** Stools of bright blood.
‖Diarrhœa with dryness of mouth, after the appearance of eruption in typhus.
‖Hemorrhage from bowels in typhus; blood black, coagulated or thin, smelling like carrion.
‖Diarrhœa in the morning.

[21] **Urinary Organs.** Urine possesses bleaching properties.
Urine does not redden litmus paper.
Frequent urging to urinate.

[22] **Male Sexual Organs.** Sudden impotence with aversion to sexual intercourse.

[25] **Voice and Larynx. Trachea and Bronchia.** Loss of voice.
‖Aphonia from damp air.
Great difficulty in articulating or breathing.
‖Spasms of vocal cords.
Sensation of warmth in respiratory passages; increased secretion from mucous membranes, and increased expectoration.
Feeling of stiffness in rima glottidis with impeded expiration.
‖Sensation of constriction in air tubes, tightness and suffocation.
Sensation as if the whole larynx was raw or would become so, with single coughs threatening a very violent attack.
Feeling as if the rima glottidis was stiff, as if composed of an iron ring.
‖Violent irritation in epiglottis, larynx, and bronchial tubes.
‖‖Violent spasms of glottis; air is admitted well enough, but its exit is prevented.
So firmly did the glottis appear to be closed, that it seemed as though air might pass through any part of the thoracic walls more readily than by way of larynx.
‖Thirty or forty attacks of spasmus glottidis occurring within twenty-four hours.
Scratching sensation in bifurcation of windpipe.
Chronic bronchitis and mild catarrh of stomach, with loss of flesh and an unhealthy color of skin (workmen exposed to fumes).
Phlegmonous inflammation of bronchial membranes.

Digitized by Google

Inflammation of air passages and lungs.
Is said to have caused croup.

[25] **Respiration.** Respiration and pulse frequent.
‖Sudden tightness of chest.
Sensation of oppression felt more in r. lung.
Dyspnœa with great physical anxiety.
‖‖Sudden and extreme dyspnœa from spasm of vocal cords.
When dyspnœa was at the worst, it was attended by a feeling as if a narrow band was drawn tightly around lower third of whole chest.
‖Dyspnœa increasing, great anxiety, not that he thinks he will die, but on account of the impeded respiration; physical, not psychical anxiety.
Sense of impending suffocation.
‖Paroxysms of suffocation followed by catarrh.
‖Inspiration easy, but could not completely fill the lungs with air.
‖Inspiration is attended by a short crackling râle.
‖Suddenly and without warning, child makes a long crowing inspiration, an attempt is made to exhale, but without success; another crowing inspiration followed by a forcible, but ineffectual effort to exhale; and this was repeated until she became blue around the mouth; and sank into partial unconsciousness, when free inspiration would take place and child would generally sink into deep sleep; frequently towards close of an attack, convulsive movements of extremities take place. θSpasmus glottidis.
Expiration easy and noiseless; inspiration difficult, with râles.
‖‖Inspiration unimpeded and can be effected in the natural manner, but expiration is absolutely impossible.
‖Gasping inhalation and expiration nearly impossible.
‖Breathing consists of a succession of crowing inspirations, each followed by an ineffectual effort at expiration, inflating the chest to a more painful extent. θSpasmus glottidis. θEmphysema pulmonum.
‖Crowing inspiration; absolutely obstructed expiration; face turgid and livid; convulsive movements of extremities; partial coma.
Expiration accompanied by prolonged, loud, whistling râles, each pulsation of heart gives a crescendo diminuendo effect to them.
‖Expiration difficult, prolonged, and seems as if insufficient, as if air cells were hardly half empty.
Whistling râles quite loud in forced expiration.

[27] **Cough.** ‖Any attempt to cough produces spasm of glottis.

Digitized by Google

Spasmodic cough.
Whistling-wheezing cough.
‖Desire to cough resulting from a tickling and a sensation of rawness behind the thyroid cartilage; when he seeks to yield to this desire he finds it impossible to expel the air from the chest; the cough is therefore abortive, although the desire grows continually more and more intense; the obstruction to cough results from an apparent constriction just below larynx, although he can draw air freely into the lungs.
‖The freedom of inhalation and impeded exhalation, together with constantly increasing tickling in larynx which compelled him to make very energetic but unavailing efforts to cough, continue until he sinks exhausted and covered with sweat upon a couch, when spasm seems to relax and he can cough and exhale with comparative freedom; paroxysms recur about every two hours. θSpasmodic cough.
‖A continuous little dry cough.
Cough seldom; no expectoration, but a little hoarseness.
At each cough, a spot in chest (region of r. bronchus) feels sore, as if cough jarred and hurt it.
Cough, tightness and sensation of pressure in chest.
Violent cough, sensation of constriction in air tubes, tightness and suffocation.
While coughing, warm sweat breaks out upon forehead.
Coughing, with a desire to vomit.
When coughing it seems as if he must surely vomit; as if effort to "raise" phlegm would also empty stomach; yet no nausea is felt.
Constant cough, bronchi apparently filled with thick, tenacious mucus.
Fits of coughing in which phlegm was always raised and ejected, but only after long and fatiguing efforts; in a minute or two phlegm would again collect, causing a fit of exhausting coughing, until it was expectorated.
Cough, with expectoration of thick, white, frothy mucus.
‖Cough, with spitting of blood, with pleuritic pains.
No relief from expectoration; chest seems to fill again at once.

[28] **Inner Chest and Lungs.** Sensation of warmth in respiratory organs.
Feeling as if a narrow band was tightly drawn around lower third of whole chest.
Lungs inflated to a most painful degree.
Sensation in lower and inner third of r. lung as if it was ruptured; there is a feeling as if air escaped from lung into pleural cavity at each inspiration, the inspirations

Digitized by Google

being attended by a separate rattling râle, confined to the quasi ruptured locality, the vibrations of which were felt by the common sensation, perceptible to the touch (hand on chest) and audible to the bystander.

Rush of blood to chest.

Hæmoptysis.

‖Inflammation of lungs and air passages. θPhthisis pulmonalis.

Increased secretion from mucous membranes and increased expectoration.

[29] **Heart, Pulse and Circulation.** Heart's action much increased.

Pulse frequent.

‖Pulse small and soft.

Pulse diminished.

‖Congestion to head and chest.

[33] **Lower Limbs.** Weakness in lower limbs.

[34] **Limbs in General.** ‖Convulsive movements of extremities.

In morning less stiffness in back than usual, but more in limbs.

[35] **Rest. Position. Motion.** ‖Inclination to lie down with pain in head and exhaustion.

Lying down: < nasal complaints.

Attempt to cough: produces spasm of glottis.

Was restless; desired to walk about; could not be easy either lying, sitting or walking; seems as though whole attention must be centered upon the act of respiration.

Walking up or down improves feverish malaise.

[36] **Nerves.** Nervous sensibility.

Great physical anxiety with dyspnœa.

‖Loss of strength and playfulness. θSpasmus glottidis.

‖Great prostration. θTyphus.

‖The nervous symptoms continually increase in third or fourth week of typhus.

‖Subsultus tendinum. θTyphus.

‖Violent spasms with the coming of eye teeth.

‖The interrupted breathing results in asphyxia with or without convulsions, during which relaxation follows and free perspiration takes place again. θLaryngismus stridulus.

‖Towards close of an attack convulsive movements. θLaryngismus stridulus.

[37] **Sleep.** ‖Attacks of spasmus glottidis occur frequently during sleep, arousing child suddenly; they are most frequent from midnight to 7 A.M.

Night sweat.

[38] **Time.** Midnight to 7 A.M.: attacks of spasmus glottidis.

‖Wakens at 3 or 4 A.M. with apprehension of a terrible disease coming on.

Digitized by Google

On waking in morning he has tears in his eyes.
In morning: ill humor; difficult to rouse; sneezing; feverish taste; weakness in abdomen; diarrhœa; stiff in all the limbs.
10 A.M. to 2 P.M.: crawling over front of arms, back and thighs.
‖Acts quicker when taken in evening.
In evening less appetite, sudden coryza, threatening cough, crawls and chilliness.

[39] **Temperature and Weather.** When sitting with the sun shining on his back, drizzling crawl, followed by febrile sensations.
Walking in open air relieves chest affections.
Warm room is suffocating to him, but cold air gave no marked relief.
In open air: running of tears.
Chilly in warm room, evenings; not in open air, mornings.
From damp air: loss of voice.

[40] **Fever.** Cold feeling in head, stomach and limbs.
Chilliness and crawls.
Crawls and shaking in evening.
From 10 A.M. to 2 P.M., crawls over front of arms, back and thighs.
Dimness of eyes, followed by fever.
‖Burning dry heat with anxiety and raving. *θ*Typhus.
Copious perspiration.
‖Cold sweat covers body.
Cold, viscous sweat in typhoid state of eruptive diseases.
‖‖A genial glow all over surface with night sweat during sleep.
‖Night sweat of consumptives.
‖‖In typhus give five drops of chlorine water every two or three hours until tongue gets moist (Goullon, Sr.).

[41] **Attacks, Periodicity.** Every two hours, attacks of spasmodic cough.
Thirty or forty attacks of spasmus glottidis within twenty-four hours.

[42] **Sensations.** As of impending suffocation; as if teeth were too full or had been injured by acids; as if tongue had been burnt; as if rima glottidis was made of an iron ring; as if larynx was raw; as if a narrow band was drawn tightly around lower third of chest; as if lower third of r. lung was ruptured and air escaped into pleural cavity; as if air cells were hardly half empty; as if an insect flitted over skin and stung it.
Pain: in præcordia; from stomach to head, with cough.
Aching: in vertex and down l. side.

Digitized by Google

Stinging: in skin, as of a nettle or minute insects.
Corrosive feeling: in corners of nose.
Rawness: of larynx; behind thyroid cartilage.
Scraping: in windpipe.
Soreness: at each cough in a spot in region of r. bronchus; of throat and chest.
Pressure: in chest.
Biting: in skin as of minute insects.
Contracting sensation: in præcordia.
Constriction: in air tubes; just below larynx.
Oppression: most in r. lung.
Weakness: in abdomen; in lower limbs.
Stiffness; in rima glottidis.
Warmth: in respiratory organs.
Cold feeling: in head, stomach and limbs.
Tickling: behind thyroid cartilage.
Dryness: in nose; of buccal cavity; of throat.
Itching: with stinging and smarting in skin.

" **Tissues.** Acts principally on the mucous membranes, particularly on those in juxtaposition with the ascending aorta.
‖Rapid emaciation. θSpasmus glottidis.
‖Loss of fat; absorption of fat.
‖Acute rheumatic pains.

" **Touch. Passive Motion. Injuries.** Cannot bear pressure in pit of stomach.

" **Skin.** ‖Excessive sensitiveness of skin.
Itchiness with greatly increased sensibility; he tries to avoid scratching; slight smarting.
Stinging, as of a nettle.
Stinging and biting here and there as of very minute insects, indescribably transient and minute, occurring at intervals on arm, back, belly and lower limbs; as if an insect flitted over the part and stung it, desires to slap the part with the palm, has no rest.
Stinging like from cantharides leaves soreness and bruised sensation, replaced by itching; cuticle comes off in white scales.
Accumulation of blood in capillaries of skin with heat.
Determination of blood to skin, with eruption of minute papillæ, so close that skin has a general red appearance at a short distance, like injected papillæ of cutis anserina; the papillæ suppurate and vesicate, or desquamate.
Eruption of minute vesicles thickly studded over skin, on shoulders their bases very nearly touch one another; on disappearing leave minute red and livid spots.
Nettlerash, wheals, white, small, in clusters surrounded by diffuse redness.

Digitized by Google

Skin red and painful, becoming tumid and swollen and thick as in facial erysipelas.
Inflammation of the cuticle and ulceration.
Cutis anserina; dry, yellow and shrivelled.
Urticaria febrilis.
Typhoid state in scarlatina, measles, variola, spotted and putrid fever. θTyphus.
Furfuration; slight desquamation.
Malignant pustule and carbuncle.

47 **Stages of Life, Constitution.** Female infant, æt. 9 months, well developed and large; spasmus glottidis.
Child, æt. 1½; spasms during dentition.
J. S., æt. 52, has suffered from follicular pharyngitis, has had larynx and fauces treated with nitrate of silver, until it became unendurable, has now much pain in throat, habitual cough and expectoration of glairy mucus; spasmodic cough.

48 **Relations.** Antidotes: Inhalation of sulphuretted hydrogen is the best chemical antidote; albumen; *Lycop.* antidotes the impotency; *Plumb. ac.* antidotes the blood spitting and pleurisy.
It antidotes: *Hydr. ac.; sulphuretted hydrogen* (suffocation from).
When *Phosphor.* had been given, without use. θTyphus.
Closely resembles *Mephitis* (suffocative feeling with inability to exhale, bloated face, convulsions).
Similar to all the halogens, particularly to *Bromine.*
Like all other constituent elements of the human body, it acts by preference on those organs in which it has a function to perform.

Digitized by Google

CHROMICUM ACIDUM.

Chromic Acid. *Or* O_3, H_2O.

Used by the old school as an escharotic in the burning away of condylomata, etc., also as a disinfectant in hospital gangrene, etc, on account of its germ-killing properties, which were found to be greater than those of any other substance in use.

The only systematic treatment it has received at the hands of the medical profession was in our ranks, from Drysdale, who proved the sesquioxide in 1842; see Hahn. Materia Medica, Part I (the symptoms are marked — in our arrangement); by Henry Duffield and Guernsey in 1852, Inaugural Thesis at Philadelphia Homœopathic Medical College, and by Oehme in 1873, N. Y. J. of Hom., vol. 1, p. 367. Clinical use of it was made in six cases of phrenitis by Pehrson.

[1] **Mind.** — Mind in a state of confusion for two days; memory aggravated at times to such a degree that he found himself at loss to know how to make several of the letters in the alphabet.

Delirious states. θPhrenitis.

Quarrelsome in delirium. θPhrenitis.

[2] **Sensorium.** — Dull confusion in head, in forenoon.

Is heavy, dull, stupid.

Sensation of lightness of head like vertigo, with heat in face; face flushed; pulse full, slightly accelerated.

At 10 o'clock, while walking, lightness in head which inclined him continually to r. side.

Giddiness when going down-stairs.

[3] **Inner Head.** Pain extends into anterior portion of brain from r. eyeball, and from aching teeth.

Fulness of head; in the evening lightness at heart as if a vacuum was there; giddiness when going down-stairs, and cold feet.

Woke at 5 A.M. with feeling of fulness in upper and forepart of head.

— Shooting pains in l. temple.

Pulsative, throbbing sensation from region of heart to l. eye and l. side of head; general fulness of forepart of head, with occasional slight pains in l. hypochondrium.

Throbbing in occiput. θPhrenitis.

Great sensitiveness of brain. θPhrenitis.

Inflammatory affections of the brain.

[4] **Outer Head.** Heavy pain along coronal suture, extending

Digitized by Google

backward and occupying all of parietal portion, at 10 A.M.; was not > by dinner, warmth, or cold, and continued without variation until 4 P.M.; walking in open air for one hour did not change the pain.

[5] **Sight and Eyes.** Diminished vision.

— Several sharp cutting pains across l. eyeball at night in bed; smarting and heaviness in eyelids in evening.

A kind of sudden jerk of both eyeballs for a second.

Throbbing in l. eye.

Pain from r. eyeball up into anterior portion of brain, with soreness of orb to touch.

— Feeling of dryness and uneasiness in r. eye and nostril.

Eyes feel sore and as if they were inflamed.

— Cutting pain across l. eyeball, with flow of tears in morning in bed.

— Smarting in eyelids; in evening accompanied by pricking in skin.

Itching and smarting around eyes, especially in inner canthi.

Dull pain over l. eye as if headache would set in, continued all day.

— Dull, pressive pain over r. eye on awaking in morning.

[6] **Hearing and Ears.** Occasionally sensation in r. ear as if water was in it, it appears and disappears suddenly.

‖Pain from toothache extends into ear.

— Sudden jerking pains in l. ear and a cold feeling in a small spot in meatus.

[7] **Smell and Nose.** Uneasy feeling in r. nostril.

Fetid, musty smell in posterior nares, chiefly perceived during expiration, after breakfast and dinner.

⁝Ozæna.

[8] **Upper Face.** Face flushed and hot.

‖Face rose red during coughing spells. θLaryngeal phthisis.

[9] **Lower Face.** — Quivering of lower lip.

Lips dry and disposed to chap.

‖‖Trismus.

[10] **Teeth and Gums.** ‖Toothache, with pain extending into ear.

Soon after going to bed, 10 P.M., two attacks of very violent toothache on r. side; each attack lasted about ten to fifteen minutes, with a free interval of several minutes; during the second attack painful teeth seemed as if too long; pain extended into forehead.

A pain between the head, l. shoulder blade and shoulder grew much better during toothache; during the pain he was frequently obliged to change his position.

After the second attack of toothache such uneasiness in

Digitized by Google

limbs that he was obliged to get up and walk about, teeth of r. side felt too long even next morning, and cold water produced pain in teeth.

Repeated toothache of short duration, especially in lower jaw, r. side; during attacks of toothache the corresponding artery beats more violently than on the other side.

In the night sudden violent pain in several undecayed teeth, l. side, especially in lower jaw; while the pain lasts the corresponding arteries beat more violently.

In morning after usual rinsing of mouth with cold water, toothache in l. lower jaw for a short time.

[11] **Taste and Tongue.** A swallow of diluted Madeira tastes singularly disagreeable.

— Metallic taste in mouth before dinner.

— Pricking in tongue.

[12] **Inner Mouth.** During the eating of food, which tastes well and natural, sensation as if exhaled air smelled putrid, almost causing nausea.

Periodical ranula with dry mouth, < afternoon, sore when chewing; at same time blind piles and costiveness.

Scorbutic diseases of gums.

[13] **Throat.** Accumulation of tough mucus in throat, with constant disposition to swallow it, because it cannot easily be hawked up.

White phlegm in throat causing hawking, especially mornings.

Ulceration of mucous membrane of mouth and pharynx.

Sore throat awakens at night, is very painful, with short cough and retching.

Angina diphtheritica, crouposa and gangrænosa.

[14] **Appetite, Thirst. Desires, Aversions.** No appetite for breakfast.

— Unusual hunger in middle of day.

[15] **Eating and Drinking.** After breakfast and dinner, musty smell in posterior nares.

After dinner, 2 P.M., a qualmishness of stomach lasting until 4 P.M.

Half an hour after a simple supper, nausea gradually increasing, with sensation as if a stool would follow.

While eating, sensation as if exhaled air smelled putrid, smells the food repeatedly to satisfy himself that it is not putrid.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea, transient at different times, especially when the stomach is empty.

Several times vomiting of food, and afterwards three times of bile, with much retching at intervals of five to ten minutes, with warm sweat and usual heat.

Digitized by Google

Sudden inclination to vomit in morning while dressing, with flow of water in mouth and dull pressure in stomach.

Retching with cough and sore throat at night.

Vomits his breakfast.

[17] **Scrobiculum and Stomach.** Frequent aching and shooting pains in epigastrium.

Pinching pain in epigastrium.

Between the attacks of vomiting a kind of pressure and fulness in stomach, so that he is obliged to loosen his clothes.

Soon after last vomiting, sleep for half an hour, after which slight heaviness or pressure in stomach.

[18] **Hypochondria.** Occasional slight pains in l. hypochondrium.

— Pressive pain in r. hypochondrium in morning on awaking.

[19] **Abdomen.** Woke at 4 A.M. with sick feeling in abdomen, which was very tender to touch, especially along colon; at 6 o'clock nausea and frequent eructations with retching, which brought up white mucus.

Awoke at 5 A.M. very restless, could not lie quiet five minutes at a time; at 6 a very sharp pain was experienced in hypogastric region and along ascending colon, growing very acute and lasting half an hour, then relieved by a profuse diarrhœa lasting three hours; when these symptoms ceased the same headache returned, and soon was followed by the same sick stomach, lasting as on the first day till 4 P.M.

Uneasiness in bowels before rising in morning, similar to premonitory symptoms of diarrhœa, > after rising.

Awoke with pain in colon, accompanied by rumbling and wind, but passed off on rising.

— Flatulence and rumbling in abdomen.

— In evening disagreeable, violent pain, like flatulence, in r. side from lumbar region round to cæcum, brought on by any movement of the trunk, or by deep inspiration; not felt in sitting or lying still.

— Pain in loins and r. side, in morning in bed, > on getting up.

[20] **Stool and Rectum.** Frequent passage of flatus for several days.

— Fulness about rectum, and difficult evacuation of a soft, scanty stool.

— After tea a sudden and pressing desire to stool, with scanty, thin, lumpy evacuation.

Diarrhœic discharge from bowels, after which the pulse rose to 75 (from 52).

Digitized by Google

Small stool of mucus and knotty feces.
‖‖Watery diarrhœa, with nausea and dizziness.
‖Blind piles with costiveness.
External piles disappeared, became internal and bleeding.
Copious discharge of hemorrhoidal blood.
Discharge of hemorrhoidal blood with weakness in small of back.

[23] **Female Sexual Organs.** ⋮Uterine hemorrhage.
⋮Leucorrhœa.

[24] **Pregnancy. Parturition. Lactation.** ‖‖Foul smelling sanious lochia.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Consumption of larynx, with very red face during attacks of coughing.
⋮Œdema of glottis.

[26] **Respiration.** During expiration, fetid, musty smell from posterior nares.

[27] **Cough.** Coughing caused very violent pain over whole upper l. part of chest, and deep coughing was impossible.
Feeling of fulness in head, with sensation of rawness or soreness in chest and a slight, dry, hacking cough.
‖Redness of face during cough. θLaryngeal phthisis.
‖Cough hard, sometimes deep; swallows sputa, vomits breakfast.

[28] **Inner Chest and Lungs.** Pressure on chest.
— In the night a severe boring pain in l. side of chest below axilla, about the fourth rib, not < by motion or respiration, goes off on turning on r. side.
— Deep-seated pain in back of l. side of chest, and corresponding place in front, with a feeling of deep inspiration as if root of lung could not expand and was painful.
In drawing a long breath, a stitch in upper l. part of chest near the shoulder.
Slight pain in l. lung with throbbing pulsation in it.
Throbbing pulsation through chest with cold feet, in daytime.
Sensation of emptiness in chest, with soreness and pressure about chest, and cold feet.
Weakness of chest and a kind of twitching in l. knee joint.

[29] **Heart, Pulse and Circulation.** Lightness at heart; as if a vacuum was there.
‖Angina waking at night, pains much, short hacking and retching.
— In evening in bed, pain in region of heart, a fine drawing, nervous pain, at times reaching through chest to shoulder and neck; on lying on heart, a sort of clucking, painful sensation on deep inspiration.
— Fixed pressive pain at apex of heart.

Digitized by Google

— Pain under apex of heart awoke him.
Suddenly a violent stitch in region of heart; pain disappears gradually after several minutes.
Pulse full and slightly accelerated.
Pulse below 50.
Normal pulse being about 52 to 56, it varied during the two weeks proving between 48 and 84.
Pulse 48, at 7 A.M., 7th and 8th days, 62 to 64 in afternoon and evening.
Pulse mostly 72 in morning, and 84 at 4 P.M.
In second proving, from 52 to 70, and from 58 to 75 in afternoon.

[31] **Neck and Back.** Turning of head towards left and backward was impossible.
Cold sensation on back of neck, at 10 A.M.
Stiffness of muscles on l. side of back and neck, with stricture in chest in region of heart.
— Heavy pains in muscles of neck and shoulders, and various parts of trunk, soon went off and were only slightly felt in back during day.
For almost three weeks an apparently deep-seated pain with distress, at times more severe, at others less, in l. shoulder, shoulder blade and l. part of back of neck up to occiput; the least pains were felt when standing and walking.
All muscles connected with the shoulder blade were more or less affected and painful to touch.
The pain moved from l. shoulder blade down to pelvis, and lumbar region was sensitive.
— Dull pain at inner angle of l. scapula in evening, and at inferior angles of both in morning.
— Rheumatic pains about r. shoulder and various parts of back.
— Superficial burning pains about middle dorsal spines, with sudden jerking pains in l. ear and cold feeling in a small spot in meatus.
— Pains in back and loins.
— Pain in loin, seems to arise in a spot which is tender to pressure, about an inch to r. of middle lumbar spine.
— Lumbar pain most painful in morning in bed.
Pain in lumbar region (lumbago) as if a change of position would ameliorate; desire to stretch out straight.
Shooting pain from small of back into l. hip bone.
Weakness and pain in small of back and sharp shooting from lumbar vertebræ to crest of ilium on r. side.

[32] **Upper Limbs.** Dull, aching pain, over the top of l. shoulder as if from great fatigue, for two hours.
— Pains in l. scapula.

Digitized by Google

— Drawing pains in l. scapula occasionally throughout day, but most in morning.
— Pain about l. scapula in morning.
— Itching in armpits at night.
—Transitory, undefined pains in the elbows, in the morning.
Short-lasting, slight pain in r. elbow.
Transient pain in l. elbow.
Several times a short-lasting, growing pain with lameness, in middle of l. brachium, in front, as from a severe blow.
Use of l. arm was impeded.
Arms fall asleep easily.
Frequent dull, deep-seated pains in the hands and fingers.
Itching in palm of r. hand, in morning.

[35] **Lower Limbs.** Drawing, deep-seated pain, as if in bone, in upper half of l. thigh, in front, extending to hip joint.
— In bed a severe quivering, boring, deep-seated pain in inner side of thighs, chiefly left.
— A dull, bruised, fatigued feeling in legs, especially above knees, with some pain on firm pressure; for several days.
— ‖Pains in knee.
A kind of twitching in l. knee joint.
In afternoon a rheumatic feeling in r. knee joint, continuing till 10 P.M.
Knee joints weak and knocking.
Weakness of l. knee joint, knocking a little when walking.
Sensation of paralysis from r. knee down.
— Occasionally indistinct pains like a strain about feet and ankles.
— Sharp drawing pains in bones and ligaments of r. foot.
— Shooting, drawing pains about balls of feet.
— Itching and drawing pains in balls of feet, at root of toes, painful on treading on ground.
— Itching in feet, toes and various parts in evening.
Burning and itching in toes like chilblains.
Cold feet, with fulness in head, giddiness, and with chest symptoms.

[36] **Limbs in General.** Uneasiness, stiffness and dull pain in muscles, in morning; chiefly in shoulder blades and back of neck, also between shoulders and in hips; coming occasionally during day until evening.
Cold hands and feet.
‖Rheumatic attacks.

[37] **Rest. Position. Motion.** In bed: severe pain in thighs.
On lying on heart: painful sensation on deep inspiration.

Digitized by Google

On lying down: cannot fall asleep.
Sitting or lying still: > pain in r. side from lumbar region round to cæcum.
Rising from a lying position caused much pain.
After rising: in morning, uneasiness in bowels >; pain in loins and r. side >.
Obliged to change position during pain between head, l. shoulder blade and shoulder.
At night sleep was impaired, as only certain positions were endurable.
Obliged to get up and walk about: after attack of toothache; in evening.
Movement of trunk brings on violent pain in r. side from lumbar region round to cæcum.
While walking: lightness in head.
Quick walking: gives relief; > the nausea which precedes each attack of vomiting.
On going down-stairs: giddiness.
On turning on r. side: pain in chest better.
The slightest motion of affected parts was very painful.

[36] **Nerves.** Tiredness and weakness.

[37] **Sleep.** Notwithstanding good sleep at night, great sleepiness in daytime; but if he lies down for a nap, cannot fall asleep.
Excessively sleepy one hour before bedtime.
Fell asleep late.
Wakes up at early dawn and cannot fall asleep.
Going to sleep late, much restlessness and very anxious dreams, dreams not recollected.
— Vivid dreams; awoke early with pains suddenly shifting to various parts of trunk; dull pain at one time at inferior angles of scapulæ, then pressure in r. hypochondrium, at edge of false ribs, then in region of bladder; pain, dull, pressive, over r. eye.
— Had a dream in morning, with pain under apex of heart, which awoke him.
Dreams much all night; he rides on horseback through a stream, and after crossing the water it freezes on him.
Dreams unpleasant; about to be put to death by poison, while innocent of crime.
Dreamed that he had an attack of strangury, which the next morning proved to be the fact, and which he did not get over for two hours.

[38] **Time.** At night: cutting pains across l. eyeball; toothache; sore throat awakens; retching cough and sore throat; itching in armpits; good sleep; dreams much.
At 2 A.M.: pulse 48.
At 4 A.M.: woke with sick feeling in abdomen.

Google

At 5 A.M.: fulness in upper and forepart of head; awoke very restless; could not lie quiet five minutes; boring pain in l. side of chest; angina.

In morning: in bed, flow of tears, with cutting pain across l. eyeball; on waking dull, pressive pain over r. eye; toothache; hawking of phlegm; nausea; pains in l. hypochondrium; uneasiness in bowels before rising; pain in loins and r. side; pulse 72; pain at inferior angles of both scapulæ; in bed, lumbar pain <; pain in l. scapula <; transitory pains in elbows; itching in palm of hand; uneasiness, stiffness and pain in muscles; had a dream.

At 6 A.M.: nausea; sharp pain in hypogastric region and along ascending colon.

In forenoon: dull confusion in head.

At 10 o'clock: lightness in head.

From 10 A.M to 4 P.M.: pain along coronal suture; cold sensation in back of neck.

Middle of day: unusual hunger.

Afternoon: ranula with dry mouth; pulse 62 to 64; 58 to 75; rheumatic feeling in r. knee.

2 to 4 P.M.: qualmishness.

All day: pain over l. eye.

In daytime: pulsation through chest with cold feet; sleepiness.

In evening: lightness at heart as of a vacuum; smarting and heaviness in eyelids; smarting in eyelids with pricking in skin; painlike flatulence; pain in region of heart; pulse 62 to 64; pain at inner angle of l. scapula; itching of feet and various parts; pricking and itching here and there; uneasiness in limbs.

10 P.M.: violent toothache.

[39] **Temperature and Weather.** The least draught of air < pain.

Warmth: does not > pain along coronal suture.

Cold: does not > pain along coronal suture.

Cold water: produced pain in teeth; pain < by.

Cold water and a strong draught of air cause or increase pain.

Walking in open air: did not > pain along coronal suture.

[40] **Fever.** Cold head and feet.

Sensation of general coldness which continued for one week; could not get warm at all.

[41] **Attacks, Periodicity.** For a second: sudden jerk of eyeballs.

Appears and disappears suddenly: sensation as of water in r. ear.

Transitory: pains in elbows.

Digitized by Google

At intervals of 5 to 10 minutes: retching and vomiting.
Lasting 10 to 15 minutes: attacks of toothache.
After several minutes: sudden stitches in region of heart gradually disappear.
Lasting half an hour: pain in hypogastric region and along ascending colon.
For two hours: pain over top of l. shoulder; attack of strangury.
Lasting three hours: morning diarrhœa.
Throughout day: pain in l. scapula; occasionally pains in muscles until evening.
For two days: mind in a state of confusion.
For one week: sensation of coldness.
For three weeks: deep-seated pain with distress, at times more severe, at others less, in l. shoulder and neck.
Periodical: ranula.

42 **Locality and Direction.** Pains < on l. side and lasting longer than on the right.
Left: shooting pains in temple; pulsative throbbing from region of heart to eye and side of head; slight pains in hypochondrium with fulness of head; cutting pains across eyeball; throbbing in eye; dull pain over eye; sudden jerking pains in ear; cold feeling in meatus; pain in undecayed teeth; toothache in lower jaw; pain over whole upper part of chest on coughing; boring pain in side of chest below axilla; deep-seated pain in back of chest; stitch in upper part of chest on drawing a long breath; slight pain in lung; twitching in knee joint; deep-seated pain with distress in shoulder, shoulder blade and neck; pain moved from shoulder blade down to pelvis; dull pain at inner angle of scapula; jerking pains in ear; shooting pain into hip bone; dull aching pain over top of shoulder; pain in scapula; transient pain in elbow; short-lasting, growing pain with lameness in brachium; drawing, deep-seated pain in upper half of thigh; twitching in knee; weakness of knee joint.
Right: lightness in head inclines him to side when walking; dull, pressive pain over eye on awaking in morning; pain from eyeball and aching teeth into anterior portion of brain; as of water in ear; dulness and uneasy feeling in eye and nostril; pressive pain over eye in morning; violent toothache after going to bed; teeth feel too long after toothache; toothache in lower jaw; from lumbar region round to cæcum, pain like flatulence; pain in loins and side; rheumatic pains about shoulder; sharp shooting to crest of ilium; short lasting pain in elbow; itching in palm of hand; rheumatic

Digitized by Google

feeling in knee; sensation of paralysis from knee down; drawing pains in bones and ligaments of foot; pressure in hypochondrium; dull, pressive pain over eye.

43 **Sensations.** As of a vacuum at heart; of tiredness and weakness; as of water in ear; as if painful teeth were too long; as if root of lung could not expand and was painful on deep inspiration; as from a severe blow in middle of l. brachium; as of paralysis from r. knee down; as if exhaled air smelled putrid.

Pain: from teeth and r. eyeball into anterior brain; in l. hypochondrium; from toothache, extends into ear and forehead; between head, l. shoulder-blade and shoulder; in teeth, from cold water; in hypogastric region and along ascending colon; in colon; like flatulence, in r. side from lumbar region round to cæcum; in loins and right side; over whole upper l. part of chest; in l. lung; under apex of heart; from l. shoulder blade down to pelvis; in back and loins; in lumbar region; in small of back; in l. scapula; in elbows; in legs, especially above knees, on firm pressure; in knee; at root of toes on treading on ground; suddenly shifting to various parts of trunk.

Cutting: across l. eyeball.

Boring: in l. side of chest below axilla; about fourth rib; in inner side of thighs, chiefly the left.

Stitch: in l chest near shoulder; in region of heart, sudden and violent.

Shooting: in l. temple; in epigastrium; from small of back into l. hip bone; from lumbar vertebræ to crest of ilium on r. side; about balls of feet.

Pricking: in tongue; in skin; in various parts.

Drawing: in l. scapula; in upper half of l. thigh; as if in the bone, extending to hip joint; in bones and ligaments of r. foot; about balls of feet.

Burning: superficial, about middle dorsal spines, in toes like chilblains.

Sudden jerking: in l. ear; of both eyeballs.

Sudden violent pain: in teeth in l. side.

Fine drawing, nervous pain in region of heart, at times reaching through chest to shoulder and neck.

Quivering pains: in inner side of thighs, chiefly the left.

Soreness: of orb to touch; of eyes as if inflamed; of mouth when chewing; of throat; in chest.

Deep-seated pain: in back and front of l. side of chest; in l. shoulder, shoulder blade, and l. part of back of neck up to occiput; in hands and fingers; in upper half of l. thigh. in front, extending to hip joint; in inner side of thighs, chiefly the left.

Google

Pressive pain: at apex of heart; in r. hypochondrium.
Dull, pressive pain: over r. eye.
Dull, aching pain: over top of l. shoulder, as if from great fatigue.
Dull pain: over l. eye as if headache would set in; at inner angle of l. scapula; at inferior angles of both scapulæ; in hands and fingers.
Heavy pain: along coronal suture; in muscles of neck and shoulders and various parts of trunk.
Pinching: in epigastrium.
Rawness: in chest.
Smarting: in eyelids; around eyes; in inner canthi.
Bruised feeling: in legs, especially above knees.
Indistinct pains like a strain about feet and ankles.
Aching: in epigastrium.
Rheumatic pains: about r. shoulder; about various parts of back.
Clucking, painful sensation on deep inspiration when lying on heart.
Growing pains: in l. brachium.
Transitory pains: in elbows; in l. brachium; in various parts.
Sensitiveness: of brain; of lumbar region.
Heaviness: in eyelids; in stomach.
Throbbing pulsation: from region of heart to l. eye and side of head; in occiput; in l. eye; in l. lung; through chest.
Pressure: in stomach; on chest; in r. hypochondrium, at edge of false ribs, then in region of bladder.
Stricture: in chest, in region of heart.
Twitching: in l. knee joint.
Stiffness: in muscles, chiefly in shoulder blades, back of neck; between shoulders and in hips.
Rheumatic feeling: in r. knee joint.
Sick feeling: in abdomen.
Fulness: of head; in upper and forepart of head; in stomach; about rectum.
Emptiness: in chest.
Lightness: of head; at heart as of a vacuum.
Dull feeling: in legs, especially above knees.
Fatigued feeling: in legs, especially above knees.
Weakness: in small of back; of chest; of knee joints; of l. knee joint.
Lameness: in l. brachium.
Falling asleep: of arms.
Uneasiness: in r. eye and nostril; in limbs; in bowels, similar to premonitory symptoms of diarrhœa; in muscles, chiefly in shoulder blades, back of neck, between shoulders and in hips.

Digitized by Google

Heat: in face.
Coldness: general, he cannot get warm.
Cold feeling: in small spot in meatus; on back of neck.
Itching: around eyes; in inner canthi; in armpits; in palm of r. hand; at balls of feet; in feet, toes and various parts.
Dryness: in r. eye and nostril; of mouth.

[44] **Tissues.** Inflammation and destruction of epithelium of mucous membranes.
Pseudo-membrane similar to that of angina faucium and croup.
Gangrene.
: For disinfection of cholera and fever stools.
: To arrest fetid discharges and correct fetid odors.

[45] **Touch. Passive Motion. Injuries.** Touch: soreness of orb to; abdomen tender to; muscles of shoulder blade painful to.
Pressure: a spot about an inch to r. of middle lumbar spine sensitive to; pain above knees on; on treading on ground feet at root of toes painful.
Obliged to loosen clothes to > pressure and fulness in stomach.
: To prevent suppuration and putrefaction in wounds.

[46] **Skin.** Mostly in evening disagreeable pricking and itching here and there, with uneasiness in limbs, so that he was obliged to get up from sitting or lying and walk about.
— Pricking in skin, in various parts, accompanies smarting in eyelids.
: Causes the disappearance of warts.
: Hospital gangrene; phagedenic ulcers; bites of rabid animals; poisoned wounds.

[47] **Stages of Life, Constitution.** Girl, æt. 14; watery diarrhœa.

[48] **Relations.** Workmen engaged in the manufacture of anhydro-chromate of potassium are liable to symptoms like secondary syphilis. Small doses of corrosive sublimate have been found the remedy.
Daphne indica cured the rheumatic pain.
Compare: *Kali bich.* derived from the same metal.

CICUTA VIROSA.

Water Hemlock, Cowbane. *Umbelliferæ.*

"Grows on the borders of ditches and rivulets, swamps, meadows, ponds, lakes, etc., all over Germany, and the north and east of France. It is apt to be mistaken for Conium maculatum. The stem of Cicuta is furrowed, that of Conium is spotted. Cicuta virosa, though called water-hemlock, should not be confounded with the true water-hemlock, which is the Phellandrium aquaticum, and belongs to the same natural order. Cicuta grows on the border of the water, Phellandrium in water. The Cicuta root is characterized by cellular, hollow spaces, which are well seen when the root is cut longitudinally."—*Sircar.*

The American water-hemlock, Cicuta maculata, is analogous in botanical character, but we have but few toxicological reports and no clinical experience from it. Old authors have frequently confounded Cicuta virosa with Conium maculatum.

With the exception of the symptoms from Hahnemann's provings and those of his followers, Hornburg and Langhammer, the symptoms are mainly toxicological (see Encyclopedia) and clinical.

CLINICAL AUTHORITIES.—*Hallucinations with convulsions during convalescence from tyhoid*, Watzke, Letter de Propag. de Dr. Y., p. 61; in *Cerebro-spinal meningitis*, sixty cases cured, within seven years, in all stages and all degrees of malignancy, J. Mind. ||Loss of consciousness and sensation.
|She knows no one, but when touched and spoken to, she answers. θPeriodical ecstasy.
||Became insensible and convulsed generally.
|Suddenly consciousness returns, and she remembers nothing of what has occurred. θPeriodical ecstasy.
Very absent-minded.
|He confounds the present with the past.
|He thinks himself a young child.
He imagined he was not living in his usual condition and circumstances; everything appears to him strange and almost terrible.
|She thinks she sees coming towards her a huge drunken man, who lies down alongside of her, she begs him to retire, falls into convulsions, and turns over on her abdomen.
|Feels as if he was in a strange place, which causes fear.
Fantastic illusions, attacks of madness.
||Delirium; crazy delirium.
|Delirium, cries, sings; loss of consciousness with open eyes, knows no one, but when touched or spoken to answers questions; consciousness returns suddenly, and she does not remember what has passed; attacks twice a day. θPeriodical ecstasy.
|Mental torpor and stupefaction.
||Loss of ideas; loss of sensation.
|Thinks of the future with anxiety, and is constantly sad.
|Strange desires, as desire to eat coal.
|Fondness for solitude; great disregard and dislike for the society of others.
|Gives short answers.
Funny gesticulations, with redness of face and heat of body.
||Aberration of mind, singing, performing the most grotesque dancing steps, shouting.
||Likes childish toys, jumps from bed in a happy, childish state.
||Weeping, moaning and howling.
||Sobbing and weeping, pain in neck, head drawn back spasmodically, with trembling of hands.
|Great agitation, child graps at one's clothing in a frightened manner. θConvulsions.
||Very violent in all his actions.
|Quiet disposition, contented, happy.
|Melancholia; indifference and sadness. θConcussion of brain.
||Anxious thoughts of the future; feels sad.
||Anxiety, excessively affected by sad stories.

Digitized by Google

‖Greatest anxiety. θWounded œsophagus.
Anxiety and fretfulness.
‖Old men fear a long spell of sickness before dying.
Is afraid of society, and wants to be alone.
‖Excited, with apprehension concerning the future; everything that could befall him seemed to be dangerous.
‖‖Mistrust and shunning of men; despises others.
Disposition to be frightened.

[2] **Sensorium.** When standing still there is a desire to hold on to something, because objects seem to approach and then to recede.
Vertigo: on rising from bed, as if everything was moving from side to side, or approached and then receded; reeling; falling on stooping; after injuries to the head.
‖Vertigo; things turn in a circle, darkness before eyes on attempting to rise. θParalysis of bladder.
‖Giddiness with falling forward.
‖Loss of sight and vertigo in walking. θOphthalmia.
‖Vertigo: buzzing in ears; deafness; eyes glassy, dim, soporous state; loss of consciousness; muttering delirium. θTyphoid.

[3] **Inner Head.** Headache above orbits.
Stupefying frontal headache, increasing when at rest.
‖Semilateral headache, as from congestion to head or external pressure; > when sitting erect.
‖Rending, cutting pain of one side, thinking of headache causes it to disappear.
‖Headache > by sitting erect, or by emission of flatus.
‖Severe headache in occiput, like a dull pressure, and as with coryza.
‖Pressure deep in brain; heaviness in front or back of head.
‖Headache in morning on waking, as if brain was loose and was shaken on walking; when thinking as to its exact nature, it ceased.
Headache, drawing from corners of eyes towards temples.
Stupid feeling of the head with chills; the neck felt stiff and the muscles too short.
‖‖Concussion of brain and chronic effects therefrom, particularly spasms.
Cerebral diseases following suppressed eruptions.
Head heavy; boring of occiput into cushion; jerking of limbs; eyes closed; on lifting lids the eyes stare upward. θMeningitis basilaris.
Cerebro-spinal meningitis; hydrops meningis acutus.

[4] **Outer Head.** ‖Sinking of head forward when looking at anything, or sitting in apparent sleep; when aroused head was bent forward and stiff.

Digitized by Google

During intervals, head falls back if she attempts to raise herself, and that with violent spasmodic pains. θHysterical spasms.

Head bent backward; with convulsions.

Head retracted; rigid spine. θCerebro-spinal meningitis.

Head bent to one side. θEpilepsy.

Jerking and twitching of head.

Violent jerking backward of head. θCholera.

Starting, trembling of head, < moving head; with this, single jerks, like electric shocks, < in cold; > at rest and from warmth.

Spasm begins in head and goes down. θEpilepsy.

Violent shocks through head, arms and legs, which cause them to jerk suddenly; head hot. θTetanus.

Burning, suppurating eruptions on hairy scalp; scald head.

Child is subject to scalp sweat when sleeping. θConvulsions from cerebral irritation.

Child rolls head from side to side, has fever and hot head, sudden convulsions with froth at mouth, eyes rolled up, dilated pupils, screamed fearfully, great agitation, convulsive movements of limbs, head and trunk, grasps at one's clothing in a frightened manner, pulse rapid. θConvulsions from cerebral irritation.

Lentil-sized pimples on forehead, causing at first burning pain, become confluent, assume a deep red color, and end in desquamation.

Sight and Eyes. Objects vacillate, appear black, double vision, iris-like circles around candle, eyes burn slightly, can scarcely see in sunlight, weak sight, lids glued in morning. θOphthalmia.

Momentary loss of sight.

Double sight, vertigo, with twitching over left eye, cutting pain.

Frequent vanishing of sight, as if by absence of mind, with vertigo, when walking. θOphthalmia.

When she attempts to stand, she wishes to hold on to something, because objects seem now to come nearer, and now to recede from her.

Letters go up and down or disappear; or colors of rainbow around them; iris-like circles around candle. θOphthalmia.

Eyes staring; she stares with unaltered look at one and the same place, and cannot help it; head inclines forward.

Staring, fixed and glassy, or upturned eyes. θEpilepsy.

Pupils dilated and insensible. θBasilar meningitis.

Pupils: dilated in concussion of brain; contracted in spas-

Digitized by Google

modic affections; contract and dilate, alternately, at intervals.

‖Eyes sensitive to light. θOphthalmia.

‖Eyes protruded. θWounded œsophagus.

‖Blue margin around eyes; eyes sunken. θOphthalmia.

‖‖Trembling and twitching of lids.

‖‖Strabismus convergens in children, if periodic and of a spasmodic character, or caused by convulsions.

Strabismus occurring after a fall or blow.

6 **Hearing and Ears.** ‖Oversensitiveness of hearing.

‖Hardness of hearing in old people.

‖Perfect deafness. θCerebro-spinal meningitis.

‖She does not hear well unless one speaks loudly to her, and she pays attention.

‖Detonation in r. ear when swallowing.

Roaring before both ears, < in room than in open air.

‖Ears very hot, at other times very cold.

‖Sore pain behind ear, as after a blow.

‖Burning, suppurating eruption on and around ears.

‖Hemorrhage from ears.

7 **Smell and Nose.** ‖Nose very sensitive to touch, slight touch causes it to bleed.

‖Yellow scurfs in nose, or yellow discharge from it.

‖Frequent sneezing, without coryza.

8 **Upper Face.** ‖Face pale, without expression. θTyphoid.

‖Rolls the eyes, hideous countenance, piercing cries. θHysterical spasms.

‖Face: pale and drawn; deathly pale and cold; red; bluish, puffed up.

‖Ashy paleness of face. θConvulsions.

‖Pale, earthy color of cheeks, scrofulous eruption about mouth. θOphthalmia.

‖Flushed face, with headache and restless sleep, later pallor and cold face. θConcussion of brain.

‖‖Convulsion of facial muscles; distortions, either horrible or ridiculous.

‖Painful, burning, ulcerated lips.

Burning and itching vesicle on upper lip, near vermilion border.

‖Eruption at corners of mouth, spreading over face and hands, and appearing on breast, resembling erysipelas, gradually forming a yellow, honey-colored crust, with burning and itching, unaccompanied by fever.

‖Thick, honey-colored scurf on chin, upper lip and lower portion of cheeks (milk crust), burning, soreness and oozing, accompanied with swelling of submaxillary glands, and insatiable appetite. θOphthalmia.

Digitized by Google

| Dark red pimples on face and hands, come with burning pain, coalesce.
| Herpes on face; acne rosacea.

[9] **Lower Face.** || Lockjaw, the teeth pressing firmly against one another. θConcussion of brain.
| Yellow scurfs on l. corner of mouth, discharging yellow, corrosive fluid, may extend over lip, chin and cheek.
| Cancer of upper and lower lip; painful ulcers on lips.
| Gradually increasing eruption upon chin, extending to both sides over parts occupied by beard; skin is red, shining, swollen; terrible itching and burning sensation; beard matted together with a yellowish-white crust, mostly dry; this had been preceded by vesicles, which exuded the fluid, and subsequently formed the scab.

[10] **Teeth and Gums.** | Grinding of teeth, with pressing of jaws together like lockjaw. θDentition. θTetanus.
| Toothache, faceache, or earache, caused by filling teeth with gold.

[11] **Taste and Tongue.** | Speech difficult; when talking he feels a jerk in head from before backward, as if he had to swallow the word as in hiccough.
|| Could not speak from having no control over movements of mouth and tongue. θChorea.
| Speechlessness. θWounded œsophagus. θCerebro-spinal meningitis.
| Tongue coated, dry.
| Swelling of tongue; white, painful, burning ulcers on edges of tongue; painful to touch.
| Bites his tongue, later lockjaw, painful ulcers on edge of tongue and inside of lips. θConcussion of brain.

[12] **Inner Mouth.** | Foam in and at mouth. θEpilepsy.
| Mouth closed, unquenchable thirst, drinks swallowed with difficulty. θHysterical spasms.

[13] **Throat.** || Dryness of throat. θOphthalmia.
| Very great difficulty in swallowing; sometimes it is impossible. θTetanus.
| Strangling when an attempt is made even to swallow medicine. θCerebro-spinal meningitis.
| The throat felt as if grown together, internally; externally painful, as if bruised, on moving, or touching it; eructations from noon till evening.
|| After swallowing a sharp piece of bone, or other injuries to œsophagus, the throat closes, and there is danger of suffocation.
| Constriction of œsophagus from intestinal irritation, particularly verminous, with spasmodic contraction of muscles of neck, almost like tetanus; tonic contraction, with intermittent clonic spasms.

Digitized by Google

‖Œsophagus hurt by a splinter of bone swallowed, this was followed by pain and swelling; six days later could not swallow a drop of fluid; three days after it was difficult for the air to get into the windpipe, and she feared suffocation every moment; throat and neck were swollen to double their natural size, stiff and hard.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Loss of appetite or almost insatiable appetite. θOphthalmia.

‖Great thirst, with inability to swallow. θTyphoid.

Violent thirst during spasms.

Great longing for charcoal; child puts coals into mouth, crunching and swallowing them with apparent relish.

Longing for wine.

[15] **Eating and Drinking.** ‖Great hunger shortly after a meal; irresistible desire to eat coal.

‖Immediately after commencing to eat, feels satisfied.

‖Immediately after eating, bellyache and sleepiness.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Loud sounding, dangerous hiccough. θCholera.

‖Violent hiccough and crying.

‖Nausea in morning and when eating.

‖Vomiting: of bile; of blood; on stooping; when trying to rise; during pregnancy; alternating with tonic spasms in pectoral muscles, and distortion of eyes.

‖Violent vomiting. θOphthalmia. θConvulsions.

‖Vomiting: aliments when swallowed, very violently; yellow, like mucus; with headache, thirst and dryness of throat. θOphthalmia.

[17] **Scrobiculum and Stomach.** ‖She feels a blow deep in epigastrium (plexus cœliaci), which passes like lightning up the back, and forces her to throw herself backward in the midst of most tormenting pains. θHysterical spasms.

‖‖Sudden shock deep in pit of stomach causes opisthotonus. θTetanic convulsions.

‖‖Burning pressure at stomach and abdomen. θOphthalmia.

‖‖Swelling and throbbing in pit of stomach.

‖Heat and burning in stomach.

‖Swelling of stomach as from violent spasm of diaphragm. θEpileptic attack.

‖Waterbrash, a quantity of saliva flowing from mouth, with sensation of heat all over.

Gastralgia with vomiting, painful distension of abdomen, and spasm of pectoral muscles.

[19] **Abdomen.** ‖Meteorism; rumbling and roaring in abdomen. θTyphoid.

‖‖Distension and painfulness of abdomen.

Digitized by Google

‖Pain at times in head, then in abdomen. θPeriodical ecstasy.
Sudden, sharp, stitching pains from navel to neck of bladder.
Tearing pains deep in abdomen.
‖Colic and borborygmi as before a stool. θOphthalmia.
Worms with fever, colic and convulsions.
‖‖Colic, with convulsions and vomiting.
‖Chronic painful hernia.

[20] **Stool and Rectum.** ‖Thin stool, with violent urging to urinate, which could not be withstood; also desire to urinate after stool.
Stools thin, slimy, expelled suddenly; sudden urging, scarcely able to retain stool, at 2 and 5 A.M.
‖Frequent liquid stools. θOphthalmia.
Cholera, when purging ceases, and congestion to brain and chest, turning eyes, difficult breathing and other symptoms set in.
‖Diarrhœic stool followed by constipation. θConvulsions.
‖Itching in rectum, with burning pain after rubbing.
‖Itching of lower part of rectum.
Prolapsus recti.

[21] **Urinary Organs.** ‖Paralysis of bladder, with great anxiety.
‖Involuntary emission of urine, with old men.
‖Frequent micturition; the urine is propelled with great force.
‖Either great quantities of urine, with great urging, or no urine at all.

[22] **Male Sexual Organs.** ‖Testicles drawn up towards external abdominal ring.
‖Sore drawing pain in urethra, as far as glans, obliging one to urinate.
‖Stitches in fossa navicularis, with nightly emissions.
‖Pollutions without lascivious dreams.
Strictures (spasmodic) sometimes after gonorrhœa.

[23] **Female Sexual Organs.** ‖Menses delayed; spasmodic symptoms.
‖Tearing and drawing in os coccygis, during menses. θCoccyodynia.

[24] **Pregnancy. Parturition. Lactation.** ‖‖Spasms during parturition; convulsions continue after delivery.
‖Puerperal convulsions, very violent and exhausting; frequent interruptions of breathing, after respiration has been restored patient remains weak and insensible, as if dead.
Puerperal spasms, with trembling of limbs, jerks as from electric shocks, borborygmus, want of breath, opisthotonus, cold, pale face, half-closed eyes with blue margins.

Digitized by Google

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Violent and loud screaming. θSpasms following injury from splinter.

[26] **Respiration.** ‖Oppression, can scarcely breathe; may arise from tonic spasm of pectoral muscles.
‖Respiration snoring. θTetanus.
‖Breathing interrupted, in spells. θEpilepsy.
‖Want of breath the whole day.
‖Difficulty of breathing, chest feels too tight.
‖Respiration suspended, at times gasping. θHysterical spasms. θConvulsions.
‖Dyspnœa. θCerebro-spinal meningitis.

[27] **Cough.** ‖Cough, with expectoration. θCholera.

[28] **Inner Chest and Lungs.** ‖Sensation in chest and throat as though something of the size of a fist was lodged there.
‖Sensation of soreness, as if bruised, at lower end of sternum, when walking.
‖Oppression of chest. θTetanus.
‖Tightness in chest; scarcely able to breathe. θParalysis of bladder.
‖Burning and great heat in chest.
‖Cold sensation in chest.

[29] **Heart, Pulse and Circulation.** ‖‖Trembling palpitation of heart.
‖‖Feels as if heart stopped beating; and sometimes faint feeling therewith.
‖Pulsation of heart weak. θTetanus.
‖Rapid pulse. θCerebro-spinal meningitis.
‖Pulse weak, slow, trembling, at times imperceptible. θTetanus.

[30] **Outer Chest.** ‖Violent tonic spasms of pectoral muscles.
‖Sensation of soreness at lower end of sternum.
Chill begins in chest.

[31] **Neck and Back.** Neuralgia at nape, with tendency to drawing of head backward and dull occipital headache.
‖The muscles of neck contract and become hard as wood. θHysterical attacks.
‖‖Tension or cramp in muscles of neck; if he turns head, he cannot easily turn it back again.
‖‖Pain in nape, spasmodic drawing of head backward, with tremor of hand.
‖Tonic spasm of cervical muscles. θTetanus.
‖Tetanic stiffness of back and legs, with drawing pains in thighs and calves. θConcussion of brain.
‖Swelling of neck, arising from wounding œsophagus with a splinter (bone) or similar sharp body.
‖‖Painful sensation on inner surface of scapulæ.

Digitized by Google

Bruised feeling on r. scapula.
The back bent backward like an arch.
Body and legs straight; head drawn back; if lying on side is straightened out upon back quick as lightning. θSpasms following injury to knee from splinter.
Tearing, jerking in os coccygis. θDysmenorrhœa.
Coccyodynia, coming on for the first time during catamenia, after parturition.

[32] **Upper Limbs.** Complete powerlessness of limbs, after spasmodic jerks.
Spasmodic jerking of arms and upper part of body. θFollowing injury to knee by splinter.
Frequent involuntary jerking and stitches in arms and fingers. θEpilepsy.
Jerking in l. arm all day.
Arms bent at elbows, fingers clenched. θSpasms following injury from splinter.
Sensation of heaviness in arm when raising it, accompanied by stitches in shoulder, so violent that patient must desist; he dare not move the fingers even; occurs more frequently in l. arm.
Veins of hands enlarged.
Trembling of hands, with pain in occiput. θHelminthiasis.
Numbness of fingers.
Creeping, trembling and starting of fingers in convalescence from typhoid.
Thumbs turned inward. θEpilepsy.
Pimples on hands, burning when first appearing, but finally blending and forming one dark red scab.
Nails blue.

[33] **Lower Limbs.** Weakness, especially in knees and in muscles of back after standing only a short time.
Frequent involuntary jerking of lower limbs.
Swelling and pain of l. knee.
Painful feeling of stiffness in muscles of lower limbs.
Trembling of l. leg.
His legs refused to carry him, and he staggered.
When walking, she does not step properly on soles of feet, they tilt inward, and the walking is done on outer edge of foot. θGressus vaccinus.
Suddenly grasped his knee with his hands and screamed fearfully and was seized with convulsions.
Drawing pain in thighs and calves with tetanic stiffness.
Violent pain in entire l. leg, later also in r., recurring periodically, ending in tetanic convulsions with unconsciousness.
Rending in muscles of lower limbs, front side down to the feet, < at night.

Digitized by Google

[34] **Limbs in General.** ‖Great weakness in arms and legs, after slight exertion.
Bruised feeling of forearms and legs.
‖Trembling in upper and lower limbs.
‖Spasmodic contortions and fearful jerking of limbs, with violent convulsions.
‖Jerking of limbs. θBasilar meningitis.
Jerking with numbness; in a tobacco smoker.
Cold extremities.

[35] **Rest. Position. Motion.** When at rest: headache <; pressive, stupefying headache; shocks in head better.
While lying: jerking of head or throwing it backward; on side, is straightened out upon back quick as lightning.
When standing still: desire to hold on to something; vertigo.
After standing: weakness in knees and muscles of back.
Lies on back unable to turn.
Sitting in apparent sleep: sinking of head forward.
On attempting to rise: darkness before eyes; falling back of head; vomiting.
On sitting erect: headache and pressure better.
On rising from bed: vertigo.
On attempting to stand: vertigo; wishes to hold on to something.
On stooping: falling; vomiting of bile; of blood, during pregnancy.
On raising arm: sensation of heaviness in arm; stitches in shoulder.
On walking: loss of sight; vertigo; as if brain was loose and was shaken; epistaxis; soreness as if bruised at lower end of sternum; does not step properly, feet tilt inward.

[36] **Nerves.** ‖Great depression and prostration of strength; he feels at noon more fatigued than at evening.
‖Lassitude and constant sleepiness.
‖Weak and powerless, muscles refuse to obey the will. θParalysis of bladder.
State of insensibility and immobility, with loss of strength and consciousness.
‖Catalepsy, limbs hang down and patient appears lifeless.
‖Dysphagia; no muscular flinching when trunk or lower extremities are pricked with pin, perfect paralysis; has not moved or winked for several days. θCerebro-spinal meningitis.
‖Tremulous movements.
‖Twitchings of extremities.
‖Sudden shocks and jerks through head, arms and legs. θConcussion of brain.

Digitized by Google

Sudden rigidity, with jerks, afterwards great relaxation and weakness. θWorm affections.

Strange contortions of upper part of body and limbs, during paroxysms, with blue face and frequent interruptions of breathing for a few moments.

Child suddenly grasped knee with his hands and screamed fearfully; immediately afterwards was seized with convulsions and insensibility, head being permanently retracted.

The attacks twist the child into most curious and frightful contortions, sometimes causing it to scream out. θChorea.

Convulsions, with loss of consciousness, frightful distortions of limbs and whole body.

Convulsions and insensibility, head permanently retracted, high fever, vomiting, dilated pupils, double vision, ashy paleness of face, one diarrhœic stool, then constipation.

Convulsions, with limbs relaxed and hanging down, or unnaturally stiffened and extended. θDentition.

Convulsions with cries.

Epilepsy, with violent contortions of limbs and upper portion of body and head, bluish face, interrupted respiration and frothing at mouth.

Epileptic attacks, with swelling of stomach, as from violent spasms of diaphragm; hiccough; screaming; redness of face; trismus; loss of consciousness and distortion of limbs.

Eclampsia, in a child of five months, from abuse of opium.

Attacks come on twice a day, and she seems to be dying when in them. θPeriodical ecstasy.

After convulsions child is unconscious and nearly lifeless.

Spasms in muscles, especially of neck and chest.

Child lies on back, not being able to turn, legs alternately contracted and extended, with severe pains in them. θSpinal curvature.

Violent tonic spasms, each muscle being perfectly rigid.

The most violent tonic spasms, so that neither the curved limbs could be straightened out nor the straight ones curved.

Tonic spasm renewed from slightest touch; from opening door, and from loud talking.

Violent spasms with opisthotonus, difficult breathing, arms bent at elbows, screaming, tongue coated and dry, thirst. θSplinter in knee two weeks before.

Spasms of pregnant or parturient females; hysterical convulsions.

Body and extremities hard as wood. θHysterical spasms.

Digitized by Google

!!Tetanus centric; cases somewhat epileptiform. θCerebro-spinal meningitis.

!Catalepsy.

[37] **Sleep.** !Soporous condition, in cholera.

!Frequent waking, with sweat all over, from which he feels invigorated.

!Dreams: vivid, about events of previous day; vivid but unremembered.

!Starts up suddenly out of sleep, raises head, stares fixedly before him, breathing ceases, turns blue in face, catches anxiously at breath and perspiration stands in great drops on forehead. θEpilepsy.

!Soporous sleep, weeps on being roused, distorts facial muscles, stares vacantly and holds head stiffly bent forward. θConcussion of brain.

!While asleep, starting and biting tongue. θHysterical spasms.

!Is roused from sleep with difficulty. θConvulsions.

!Complete sleeplessness. θHysterical spasms.

[38] **Time.** At night: sweat, most on abdomen; profuse sweat; unable to sleep.

In morning: on waking, headache; when eating, nausea; sweat, most on abdomen.

During midday: loss of appetite; more fatigued than at evening.

Worse in afternoon.

From noon till evening: eructations.

Whole day: want of breath; jerking in l. arm.

[39] **Temperature and Weather.** Warmth: > shocks in head; chilliness with desire for.

Cold: shocks in head <; generally <.

[40] **Fever.** !Chill and chilliness, with desire for warmth and warm stove.

!Chill starts in chest and runs down legs and into arms, with staring look.

!Cold internally and externally.

!Heat slight and only internal.

!In intervals she is calm, slightly feverish and face flushed. θPeriodical ecstasy.

!High fever. θConvulsions.

Typhoid fever: vertigo, buzzing in ears, deafness, glassy, dim eyes; face pale, without expression; great thirst; meteorism; soporous state; loss of consciousness; muttering delirium.

Nervous fevers, characterized by great stupidity.

Worm fevers, in children, with colic and convulsions.

!Sweat at night and in morning hours, most on abdomen.

!Sweats profusely at night without being able to sleep. θConcussion of brain.

Digitized by Google

" **Attacks, Periodicity.** Suddenly becomes stiff and immovable.

Twice a day, periodical ecstasy.

Periodic: strabismus convergens in children; pain in legs; ecstasy.

" **Locality and Direction.** Right: detonation in ear when swallowing: bruised feeling on scapula; violent pain in leg; vesicle on scapula.

Left: twitching over eye; scurfs on corner of mouth; jerking in arm; sensation of heaviness in arm, with stitches in shoulder; swelling and pain of knee; trembling of leg; violent pain in leg.

Forward: falling with giddiness; sinking of head when looking at anything; bending of head when aroused from apparent sleep; on staring, head inclines.

Backward: bending of head, with convulsions; falling of head with spasms; jerking of head; throwing of head.

" **Sensations.** As if he was in a strange place; as if brain was loose; as if muscles of neck were too short; as if throat had grown together; as of a blow deep in epigastrium which passes like lightning up back; as if something the size of a fist was lodged in chest and throat; as if heart stopped beating.

Pain: of head; of occiput; of neck; on inner surface of scapula; of l. knee; of legs.

Rending pain: in one side of head; in muscles of lower limbs.

Tearing: deep in abdomen; in os coccygis.

Cutting pain: in one side of head; over l. eye.

Neuralgia: at nape.

Jerking: in os coccygis; in arms and fingers; of limbs.

Drawing: from corners of eyes towards temples; in urethra; in os coccygis; in thighs and calves.

Stitching pains: from navel to neck of bladder.

Stitches: in fossa navicularis; in arms and fingers; in shoulder on raising arm.

Sharp pain: from navel to neck of bladder.

Burning: in eyes; in eruptions; ulcerated lips; vesicle on upper lip; ulcers on tongue; in stomach; in chest; in rectum after rubbing; in anus.

Bruised feeling; on moving or touching throat; at lower end of sternum; of forearms and legs; as from a contusion or blow; in many parts; on r. scapula.

Sudden shock; deep in pit of stomach; through head, arms and legs.

Throbbing: in pit of stomach.

Pressure: deep in brain.

Dull pressure: in occiput.

Digitized by Google

Burning pressure: at stomach and abdomen.
Compression: from both sides of head.
Heaviness: in front or back of head; of head; in arm on raising it.
Soreness: behind ear, as after a blow; in urethra; in chin, upper lip and cheeks, with milk crust; at lower end of sternum.
Tension or cramp in muscles of neck.
Tightness: in chest.
Numbness: of fingers.
Creeping: of fingers.
Itching: vesicle on upper lip; eruption on face, hands and breast; in rectum; of lower part of rectum; of skin over whole body; eruption on scalp; crusts on chin.
Heat: in stomach; all over.
Coldness: in chest.
Dryness: of throat.

"**Tissues.** Acts particularly on nervous system.
Cerebro-spinal irritant, producing tetanus, epileptic and epileptiform convulsions, trismus and local tonic and clonic spasms in general.
Congestions to brain and spinal cord, also to lungs and abdominal viscera.
Tonic spasms of extensors and flexors.
Strictures (spasmodic) following inflammations.
Affections caused by getting splinters into flesh; trismus and tetanus: injurious effects of concussions.
Worm complaints in children, with convulsions.

"**Touch. Passive Motion. Injuries.** ‖Injurious effects from concussions of the brain and spine.
Touch: nose very sensitive to; bleeding of nose from slight; tongue painful to; answers questions while unconscious when touched; causes bruised sensation of throat; tonic spasm renewed from slightest; vesicle on r. scapula painful to; causes pain in eruption on hands.
Rubbing: burning pain in anus after.

"**Skin.** ‖Skin burning hot. θWounded œsophagus.
‖Burning, itching of skin over whole body.
‖Red vesicle on r. scapula very painful to touch.
‖Elevated eruption as large as peas, on both hands, even on balls of fingers, with burning pain when touched, later it became confluent.
‖Pustules, which run together, forming thick, yellow scabs on face and other parts of body.
‖Suppurating eruptions, with yellow scurf and burning pain.
‖Eczema: no itching; the exudation dries into a hard lemon-colored scab.

Google

Impetigo; honeycomb-like crusts, which fall off and leave a bright red smooth surface.
Suppressed eruptions cause cerebral disease.
Scaly, moist, itching eruption upon scalp, with numerous hard nodes upon chin, throughout beard; these nodes give birth to a crop of vesicles which soon fill the beard with yellow crusts, matting the hair together and accompanied with burning and itching.

[47] **Stages of Life, Constitution.** Old people and children.
Scrofulous child, spinal curvature; clonic and tonic spasms.
Male child, æt. 10 months; epilepsy.
Child, æt. 22 months; has for a week or two been in the habit of eating coal.
Boy, æt. 2½, light complexion and hair, blue eyes, fleshy; convulsions from cerebral irritation.
Boy, æt. 8; convulsions.
Girl, æt. 9; ophthalmia.
Child, æt. 11; chorea.
Boy, æt. 11; helminthiasis.
Boy, æt. 13; concussion of brain.
Robust boy, æt. 15; tetanic convulsions.
Girl, æt. 17, large, strong, brown hair, red cheeks, has not menstruated; tetanic spasms.
David Gray, æt. 17, treated allopathically and unsuccessfully for five weeks; three children in family died of same disease; cerebro-spinal meningitis.
Woman, æt. 23, in second confinement; puerperal spasms.
Man, æt. 40, thin, weak constitution; tetanus.
Woman, æt. 76; wounded œsophagus.
Man, nearly 90; paralysis of bladder.
Mr. J. E. M., blonde, hair moist, oily skin, comedones upon cheeks and nose, of hypochondriacal disposition, subject to dyspepsia and vertigo; eruption upon scalp and skin.
Man, ran splinter into knee, and was then wet through by a cold rain; spasms.
Man; renewed cancer of lip after operation.

[48] **Relations.** Antidoted by: *Arnic., Opium;* tobacco for massive doses.
It antidotes: *Opium.*
Compatible: After *Laches.*, after *Arsen.* and *Conium.* (cancer of lip), *Cuprum* (aphasia in chorea).
Compare: *Hydr. ac.* and *Strychnia.*

CIMEX LECTULARIUS.

The bedbug. *Hemiptera.*

Known to Dioscorides, who mentions it in the treatment of fevers, and to Ebn Sina, who prescribed it in hysterical affections. It preserved its reputation through the Middle Ages, and is still in use among the people, especially the Italians, as a remedy for fever and ague.

Proved by W. Wahle, of Rome, in the 2d and 3d trituration, on Dr. Bertoldi, a woman past the change of life, and a girl æt. 17; also by Dr. Berridge, in the 200th dilution, on a man. Wahle made use of the 6th and 12th dilutions in the successful treatment of "most malignant and most obstinate tertian and quartan fevers, from three to four doses being sufficient."

CLINICAL AUTHORITIES.—*Headache with hiccough and dryness of throat*, proving, N. Y. J. H., vol. 2, p. 462, 1874; *Nocturnal emissions*, Jeanes, *Intermittent*, T. D. Stowe, Allen's Therapeutics of Intermittent; H. M., vol. 7, p. 162.

[1] **Mind.** ❙Anxiousness.
Anxious with the oppression of chest, pains in shoulder, and during the sweat has no rest anywhere.
❙At the setting in of the chilly stage her hands become clinched; she becomes vehement; would like to tear everything to pieces, and is scarcely able to restrain her rage. θIntermittent.
❙Sensation as if he would creep into himself, and on that account could not sufficiently crouch together.
❙His own sweat is disgusting to him.
[2] **Sensorium.** ❙Dulness of head.
[3] **Inner Head.** Confusion of head, as if headache would ensue.
❙Pressing outward in forehead, first l. then r. side.
❙Drawing headache, particularly under r. frontal bone.
❙Pain like stitches with needles in middle of vertex, and pressing pain in vertex with cough. θIntermittent.
❙Headache, almost depriving him of power of thinking.
❙❙Headache of the most violent kind. θIntermittent.
❙Violent headache caused by drinking. θAfter chill.
[4] **Outer Head.** Sweating on head and nose or on head and chest.
[7] **Smell and Nose.** ❙Annoying dryness of nostrils.
❙Fluent coryza, with pressure in frontal sinuses.
❙Constant sneezing in forenoon; sneezing for an hour, at noon.

Digitized by Google

Sweat on nose in morning, during rest.

[10] **Teeth and Gums.** Violent itching on inner side of gum of upper jaw; is compelled to rub it with tongue and finger, after which it pains as if burnt.

[11] **Taste and Tongue.** ‖Swollen feeling of tongue.

‖Tongue feels as if scalded; coated whitish.

‖Feeling as if burnt on tongue, in region of palate and upper anterior gums.

Tongue whitish furred, feels scalded.

A taste like iron to the saliva.

[13] **Throat.** ‖Pressure and gagging in œsophagus, which affects whole chest and impedes respiration; although she is not thirsty, she drinks for the purpose of stopping the gagging.

‖Pressure and choking in gullet during fever heat, spreading through chest, impeding breathing; no thirst, but when drinking to overcome the choking, the water goes down only at intervals, as if throat was contracted; or, as if she had swallowed too large a morsel.

‖Palate and upper gums feel as if scalded.

‖Dryness of throat, causing him to drink all day.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Great hunger after heat.

‖Thirst: with dryness in throat; but afraid to move to get a drink; during apyrexia; after chill; before chill and immediately after, not with it.

‖Desire to drink, without thirst.

[15] **Eating and Drinking.** Water can only be swallowed at intervals, as if œsophagus were constricted.

‖After drinking, violent headache, tickling and cough, oppressive breathing, heaviness in chest and anxiousness.

‖Drinking during chill causes headache.

‖When the patient drank she lost breath, gagged, had dyspnœa and a gagging cough. θIntermittent.

‖‖Many complaints do not appear at all if they abstain from drinking.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough slightly painful.

‖Qualmishness with fever.

‖Sour eructations; sour vomit with cough.

Vomits ingesta from day before.

‖‖Vomituritio. θDry cough.

[18] **Hypochondria.** ‖Pain in liver, as if it had been strained by bending r. side inward; the spot is painful when touching it and when coughing.

‖‖Chronic liver complaint.

[19] **Abdomen.** Abdomen puffed up with backache.

‖Colic, followed by emissions of flatus or liquid stools.

Digitized by Google

‖Colic ceases after wind passes.

[20] **Stool and Rectum.** Relief from discharge of wind.
‖Constipation, feces dry and hard, like dog stool.
‖No stool for six days. θIntermittent.
‖Urging to stool; after discharge of a small piece of white stool rectum closes firmly.
‖‖Hemorrhoidal complaints; hemorrhoidal pains with stool.

[21] **Urinary Organs.** ‖Incontinentia urinæ; ischuria.
‖During and after fever, urine very hot.
‖Urine brown, with a deposit of sediment.
‖Urine deposits a red coating on inside of vessel.
Urine less, more saturated, next day a red sediment.

[22] **Male Sexual Organs.** ‖Frequent erections in morning hours.
‖Seminal emissions.

[23] **Female Sexual Organs.** ‖Hot sensation inside the labia.

[24] **Pregnancy, Parturition, Lactation.** ⁝Expels dead fœtus and afterbirth.

[25] **Voice and Larynx. Trachea and Bronchia.** Tickling in larynx, causes a dry, continued cough as long as fever lasts.
‖Tightening pains in l. side of trachea. θDry cough.

[26] **Respiration.** Oppression of chest, shortness of breath, and frequent deep inspiration.
‖Loses breath when drinking, gags, has dyspnœa and a gagging cough. θIntermittent.
‖During chill a constriction of chest, has often to take a deep inspiration. θIntermittent.

[27] **Cough.** Constant, short, dry cough, with painfulness.
‖Gagging cough when drinking. θIntermittent.
‖Violent cough, with purulent sputa, and chill and fever in daily attacks.
Cough with a tense pain from upper l. chest across to r., causing a shock, then dry cough often repeated, shaking middle part of lower chest, extending to liver.
‖Cough, with belching, gagging, or vomiting; with perspiration; at intervals with gagging and pain in chest.
Scratching sensation behind upper part of sternum causes a continued short cough.
Scraping, paroxysmal cough, which causes retching, with pain in middle of chest after coughing; sternum painful to touch.

[28] **Inner Chest and Lungs.** ‖Concussive pain and pressure in chest behind sternum. θDry cough.
‖Chronic chest complaints.

[29] **Heart, Pulse and Circulation.** ‖Pulse feeble, intermitting.

[30] **Outer Chest.** Sternum painful to touch.

Digitized by Google

Scraping sensation beneath sternum with short cough.

[31] **Neck and Back.** Sensation of weariness and soreness in small of back.

‖Pain in small of back, extending over abdomen, with distension of abdomen.

‖Pain in small of back; < when sitting.

‖Pain in region of sacrum and loins.

[32] **Upper Limbs.** ‖Pain in r. shoulder and anterior muscles of chest, extending through whole arm down to nails; fingers feel as if they had gone to sleep.

Intermittent pricking pain in muscles at back of r. upper arm.

‖At beginning of chill draws fingers together, making a fist. θIntermittent.

[33] **Lower Limbs.** ‖Uneasiness in lower limbs as if she was tired by walking. θAfter chill.

‖Heaviness in lower limbs.

Great weariness in loins, she is obliged to sit down.

The pain in sacrum and right hip bone extends below knee; has to loosen her garter and lie down.

‖Pain in recti muscles of thighs.

‖Chill with pain in muscles of thighs, knee joints and legs.

‖Knees feel cold, like from a cold wind.

‖‖Hamstrings feel too short, knees are flexed; attempting to stretch them causes pain in thighs. θDuring chill.

‖Cold feet at beginning of fever. θIntermittent.

[34] **Limbs in General.** Great weariness in limbs, with sleepiness.

‖She must change position of limbs constantly. θAfter chill.

‖During chill hands and feet get cold and numb as if dead. θIntermittent.

‖Every attempt to stretch out arms or legs causes tensive pains in these parts, and he suffers thirst rather than move.

‖Pains in all joints as if tendons were contracted and too short. θDuring chill.

[35] **Rest. Position. Motion.** During rest: in morning, sweat on nose.

Sitting: pain in small of back <; falls asleep in morning.

‖Has to sit down; loins or limbs are weary.

Must lie down; on account of pain in sacrum and r. hip bone.

Suffers thirst rather than move.

Great restlessness of lower limbs, like from overfatigue.

Must change position of limbs constantly.

‖Every movement, especially extending a limb, gives tensive pain in extensor tendons.

Digitized by Google

Stretching: on attempting to stretch legs, pain in thighs; causes tensive pains in limbs; all day inclination to; during chill causes pains.

[36] **Nerves.** Weariness with inclination to stretch all day.

[37] **Sleep.** Frequent yawning as if he had not slept well, with a feeling of coldness on skin, and a sensation as if wind was blowing on knees for several hours.

Gaping with cold feeling of skin.

Irresistible sleepiness.

She falls asleep in morning while sitting.

Sleepy with great weariness in limbs.

Sleep very restless during fever, wakens often and falls asleep again.

[38] **Time.** In morning: sweat on nose; falls asleep while sitting; phlegm in throat; dry cough from scratching under sternum; chill and flushes on head; sweating.

In forenoon: constant sneezing.

At noon: sneezing for an hour; after aching in belly, loose stool.

3 P.M.: backache most violent.

Towards evening: urging without stool.

In evening: chilliness.

At night: night sweats.

[40] **Fever.** Before chill, thirst and heaviness in legs.

Chill, commencing with clenching of hands and violent raging.

Evening chilliness without thirst; her feet become cold first; after this she has a cold shuddering, as if cold water had been poured over her, with painful prickings in centre of vertex for two hours.

During chilliness all her joints are painful, as if tendons were too short.

Chill, attended with pain in all joints; sensation as if tendons were too short, knee joints are usually contracted, so that legs cannot be stretched; chest feels oppressed, must take a long breath, frequently; irresistible sleepiness; hands and feet as if dead.

Well-marked chill followed by thirst, no fever. θ Intermittent.

After chill thirst, drinking, however, causes violent headache; tickling in larynx, causing dry, continuous cough, which lasts through heat; oppression of breathing, heaviness in middle of chest, and anxiety; abstaining from drinking > all this.

The most violent headache, but only after chill. θ Intermittent.

During apyrexia much thirst, less with chill, during dry heat still less, none with sweat.

Digitized by Google

‖Chill terminates with a tired feeling in legs, obliging one to change position constantly.
Chilliness, followed by creeping flushes of heat on body, with sensation as if sweat would break out.
‖Chilliness over whole body, followed by dry heat, which is succeeded by some moisture over skin.
‖Heat: without thirst; with gagging; œsophagus feels constricted; respiration is impeded.
‖Sweat, mostly on head and chest, accompanied by hunger but no thirst.
‖Musty smelling sweat, the odor to him is very offensive.
‖Sweat relieves all other symptoms; during feverish affections.
‖Night sweats of several years' standing. θHemorrhoids.
‖Tertian and ‖‖quartan intermittent.

41 **Attacks, Periodicity.** Often repeated: dry cough; yawning; waking; taking a long breath.
For an hour: sneezing.
For two hours: pricking in centre of vertex.
For several hours: sensation as if wind was blowing on knees.
All day: drinking on account of dryness of throat; weariness with inclination to stretch.
Tertian and quartan intermittent.
For six days: no stool.
For several years: night sweats.

42 **Locality and Direction.** Right: pressing outward in side of forehead; headache under frontal bone; pain in liver as if he had strained side by bending inward; twitching in muscle of neck; pain in shoulder extending through whole arm down to nails; pricking pain in muscles at back of upper arm; pain in hip bone extending below knee.
Left: pressing outward in side of forehead; tightening pains in side of trachea.
From l. to r.: pain in upper chest; headache.

43 **Sensations.** As if he would creep into himself and could not sufficiently crouch together; as if tongue was swollen; as if tongue was scalded; as if burnt on tongue, in region of palate and upper anterior gums; as if throat was contracted; as if she had swallowed too large a morsel; palate and upper gums as if scalded; as if œsophagus was constricted; as if he had liver strained by bending r. side inward; as if fingers were asleep; as if hamstrings were too short; as if hands and feet were dead; as if tendons were contracted and too short; as if wind was blowing on knees; as if cold water had been poured over her, causing shuddering; as if sweat would break out.

Digitized by Google

Pain: in small of back and abdomen; in region of sacrum and loins; in r. shoulder; muscles of chest; in recti muscles of thigh.
Concussion: in chest behind sternum.
Scraping: cough causing retching; beneath sternum.
Scratching: behind upper portion of sternum, causing cough.
Constriction: of chest.
Tightening pains: in l. side of trachea; in tendons and extensor muscles on motion.
Tense pain: from l. upper chest across to r.; in arms and legs on attempting to stretch them; in extensors.
Drawing: headache.
Pricking: in muscles at back of r. upper arm; in centre of vertex.
Pain like stitches with needles: in middle of vertex.
Pressure: in forehead; in vertex with cough; in frontal sinuses; in œsophagus; in chest behind sternum.
Oppression: of chest.
Heaviness: in chest; in lower limbs.
Soreness: in small of back.
Pains: in shoulder; in liver; with stool; in chest; in middle of chest after coughing; in small of back; in region of sacrum and loins; in r. hip bone; in thighs; in all joints.
Dulness: of head.
Itching: on inner side of gum of upper jaw.
Tickling: after drinking; in larynx.
Numbness: of hands and feet.
Weariness: in small of back: in loins; in limbs.
Tiredness: in legs; at termination of chill.
Uneasiness: in lower limbs as if she had been tired by walking.
Hotness: inside labia.
Cold feeling: on skin.
Dryness: of nostrils; of throat.

[41] **Tissues.** Acts principally on portal system and liver.
The flexors are most affected; every motion or stretching of extensor muscles causes a tightening pain in tendons and extensors.

[45] **Touch. Passive Motion. Injuries.** Touch: spot on r. side painful to; sternum painful to.
Pressure lessens aching in upper and lower jaw; has to loosen her garter.
Rubbing: pain as if burnt in gum after.

[46] **Relations.** Compare: *Natr. mur.* (headache lessens the sweating stage); *Arsen.* (headache remains or increases in the sweating stage); *Bellad.* (throbbing of head in intermittents).

CINA.

Wormseed. *Compositæ.*

It is known that the drug brought to market under the name "wormseed" does not consist of seed, but of the undeveloped flowers mixed with the scales of the calyx and pedicles of different species of the genus Artemesia.

Semen Cina Levanticæ, consisting of small ovate-oblong, green-yellow flower heads, have a peculiar, nauseous aromatic odor which is somewhat like camphor, and a rough, loathsome bitterish taste.—A. H. Pharmacopœia.

Levant wormseed contains volatile oil, resinous matter and a crystalline principle, Santonin, or santonic acid.

Cina, belonging to the family Artemesiaa, was known to and used by the Greeks and Romans. Semen Cina came later under the name Semen Alexandrinum, and the Crusaders brought the Semen Sanctum from the Levant, from Syria and Palestine.

Proved by Hahnemann, Gross, Langhammer, Rückert, Stapf, etc.

[1] **Mind.** ‖Loss of consciousness and frothing from mouth.
‖Hallucinations of sight, smell and taste.
‖‖Children wake up in evening or before midnight with

Digitized by Google

fear or fright, jump up, see sights, scream, tremble and talk about it with much anxiety.

‖Delirium and crying out.

‖Child is whining and complaining; very restless even during sleep; it will not lie awake five minutes without crying; it must be rocked, carried, or dandled upon the knee constantly, day and night; does not want to be touched; cannot bear you to come near it; desires many things which it refuses when offered; is not pleased or satisfied with anything; uneasy and distressed all the time; throws away everything given it, and cries about nothing; often sullen and unwilling to play during day.

‖‖Pitiful weeping when awake. θHydrocephaloid.

‖Child cries piteously if one takes hold of it, or carries it.

‖Great earnestness and sensitiveness; he is offended at slightest joke.

‖Fretting excites cough.

‖Usually good-natured child was cross, fretful, irritable and dissatisfied with everything, and passed urine involuntarily, with prostration. θAfter remittent fever.

‖Child, though weak, was cross and obstinate, and cried when his will was not humored. θBronchitis.

‖‖Child exceedingly cross, cries and strikes at all around him.

Inner Head. ‖Weak, hollow, empty feeling in head, with inclination to vomit.

‖Stupefying headache, especially in forehead, then also in occiput; when walking in open air.

‖A slow stitch, extending from upper orbital margin deep into brain.

Swashing sensation in forehead when shaking head.

‖Drawing pain in r. temple in a vertical direction, on coughing feels as if it would burst.

‖Drawing from l. frontal eminence to root of nose, causing confusion of head.

‖Intermitting pressure, as from a heavy weight, as if brain pressed down on middle of vertex; pressure increases and renews pain.

‖Dull headache, with sensitiveness of eyes in morning.

Stupefying headache brought on by eating or mental labor.

‖Headache, before and after epileptic attacks and after attacks of intermittent fever.

Headache: with pain in chest and back; caused by fixing eyes steadily upon some object, as when sewing; < from pressure; alternating with pain in abdomen; > by stooping.

‖Heat mostly in head during fever, with yellow color of face and blue rings around eyes.

Digitized by Google

‖Hydrocephaloid and inflammation of brain.

⁴ **Outer Head.** ‖Head falls to side and is jerked backward, with twitches in limbs and cold perspiration on face.

‖Child leans its head sideways, all the time. θHydrocephaloid.

‖Turning head from one side to other. θHydrocephaloid.

‖Head very hot; could not bear to have it touched. θScarlatina.

‖Dislikes having head combed or brushed, from sensitiveness of scalp. θScarlatina.

Better by shaking head.

⁵ **Sight and Eyes.** ‖Chronic weakness of sight, with aching in eyes and photophobia. θResult of onanism.

‖Pains renewed by looking steadily at an object, as in sewing. θAmenorrhœa.

When looking at a thing steadily, reading, he sees it as through a gauze, which is relieved by wiping eyes.

Pressure in eyes as if sand had got in, especially when reading.

‖Can see more clearly for awhile after rubbing eyes.

‖On rising from bed, black before eyes, with dizziness in head and faintness, totters to and fro; > on lying down.

‖‖Optical illusions in bright colors; blue, violet, yellow or green.

Aversion to light.

Pain in eyes when using them at night by candlelight.

‖Pupils dilated.

Itching of inner canthus.

From 9 A.M. to 1 P.M., daily, soreness over and in l. eye, in l. side of nose, forehead and temples to occiput.

‖Pulsation of superciliary muscles; a kind of convulsion.

Drooping and heaviness of lids.

‖‖Looks sickly about eyes, with paleness of face.

‖Eyes staring. θChorea.

Eyeballs convulsively turned upward, showing only whites, or fixed and staring, with dilated pupils.

Spots on cornea.

‖Strabismus, dependent upon helminthiasis; child has a pale, sickly look, blue rings around eyes, pains about umbilicus, frequent urination, boring of nose, etc.

⁶ **Hearing and Ears.** ‖Boring in ears. θScarlatina.

‖Dull stitches below mastoid process; when pressed upon it feels as after a bruise or blow.

‖Cramplike jerking in external ear, like earache.

⁷ **Smell and Nose.** ‖Violent sneezing; with stitches in temples; with whooping cough; < when sneezing.

Bleeding from nose and mouth, with burning in nose.

‖Bleeding of nose, blood dark; itching, causing rubbing and boring; pain in forehead.

Digitized by Google

‖Stoppage of nose, in evening.
Running coryza with violent sneezing, makes child cry.
Fluent coryza at noon; slimy discharge from nose.
‖‖Itching of nose; child frequently bores into nose until blood comes.
‖‖Child picks its nose very much, is very restless, cries and is very unamiable.
‖Child rubs nose on pillow, on shoulders of nurse, or with hands. θHydrocephaloid.

[8] **Upper Face.** Face: pale, with sickly look about eyes; pale and cold; red; one cheek red the other pale.
‖Pale, earthy, yellowish face. θChorea.
‖Bloated, pale face, with blueness around mouth. θIntermittent fever.
Pale, cold face, with cold perspiration.
‖Pale streak down centre of face. θScarlatina.
‖Dark rings around eyes.
‖Pain, as if both malar bones were pressed together with pincers: < from external pressure.
‖Heat mainly in face. θIntermittent.
‖‖Burning heat over whole face, with redness of cheeks and thirst for cold drinks.
‖‖Rising heat and glowing redness of cheeks, without thirst, after sleep.

[9] **Lower Face.** ‖‖White and bluish appearance about mouth.
‖Frothing from mouth, with loss of consciousness.

[10] **Teeth and Gums.** ‖‖Grinding of teeth and tumbling and tossing during sleep.
Sensitiveness of teeth to cold air and cold water; feel sore.
During dentition spasmodic cough.

[11] **Taste and Tongue.** Bitter taste before chill, bread tastes bitter.
Tongue brownish-yellow, whitish; always clean.
Cylindrical contraction of tongue, which is spasmodically forced through lips.

[12] **Inner Mouth.** ‖Much frothy saliva, with rattling phlegm on chest.
‖Breath foul. θIntermittent.
Bleeding from mouth and nose.
Sensation of dryness and roughness of mouth, especially of palate.

[13] **Throat.** ‖Frequent motion, as though swallowing something.
‖Inability to swallow, especially fluids.
‖Audible gurgling noise along œsophagus. θAphonia.
Is worse when swallowing, particularly drink.
‖Choreic movements extend to tongue, œsophagus and larynx, causing a clucking noise from throat to stomach, similar to that caused by water when poured from a bottle.

Digitized by Google

[14] **Appetite, Thirst. Desires, Aversions.** ‖Little appetite. θBronchitis.
‖Unnatural hunger. θParaplegia.
‖‖Great hunger soon after a meal, with feeling of emptiness.
‖Thirst. θBronchitis. θIntermittent.
‖Desire for bread.
‖‖Desires many and different things.
Child refuses to take mother's milk.

[15] **Eating and Drinking.** ‖Shudders on drinking wine, as if it was vinegar or the strongest whisky.
Is worse from drinking quickly.
After eating or drinking, vomiting or diarrhœa.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Frequent hiccough, also during sleep. θHydrocephaloid.
Inclination to vomit, with a weak, hollow, empty feeling in head.
‖Nausea and vomiting. θIntermittent.
‖Vomiting: of mucus; and diarrhœa after drinking; of lumbrici and ascarides; of food and mucus; during fever, with clean tongue; of food and bile; violent.
‖Vomiting during chill. θIntermittent.
‖Vomiting precedes fever and heat, which are followed by a deep sleep. θAmenorrhœa.

[17] **Scrobiculum and Stomach.** ‖Pain in pericardial region, oppressing breathing.
Digging up pain in epigastrium, with a feeling of crawling of numberless worms.
‖Audible gurgling from throat into stomach when drinking.
‖Constant pressure in stomach at night, causing restlessness.
‖‖Gnawing sensation in stomach, as from hunger.
‖Pain or uneasiness below sternum, sometimes extending to navel; < on rising in morning; > after a meal.
‖Gastric disorders, with helminthiasis.

[19] **Abdomen.** ‖Constant uneasiness below sternum, sometimes extending to navel; < on rising in morning; > from eating; patient has grown thin and weak. θTapeworm.
‖Pinching, cramplike pressure, transversely across epigastric region, after a meal.
‖Cutting and pinching pain in abdomen from worms.
‖Boring pain above navel, passes off when pressing thereon.
‖Painful twisting about navel, pain also on pressing upon navel.
Pressing outward in belly.
‖Unpleasant sensation of warmth in abdomen.
‖Belly hard and distended; painful on pressure. θHelminthiasis.

Digitized by Google

‖Bloated abdomen, especially in children.
‖Feeling of emptiness in abdomen.
‖Child discharges worms; picks nose or anus; has a hacking cough; continually making attempts at deglutition, as if to swallow something; is very hard to please.
‖Pain in bowels, flashes of heat, constant motion of superficial cutaneous surface, restless sleep, moaning and starting.
‖‖Sufferings caused by worms.

[20] **Stool and Rectum.** ‖Watery diarrhœa.
‖Involuntary diarrhœic white stools. θIntermittent.
‖Diarrhœa after drinking.
Stools: watery; white; white mucous, like little pieces of popped corn; reddish mucous; greenish slimy; bloody involuntary; frequent.
‖Discharges lumbrici and ascarides.
‖Diarrhœa with discharge of round worms.
‖Constipation. θBronchitis.
‖Stool rather hard and black.
‖Itching at anus.

[21] **Urinary Organs.** ‖Enuresis. θScarlatina.
‖Frequent urging, with passage of much urine, all day.
‖Involuntary emission of urine at night, with worm symptoms and ravenous appetite.
‖Passes urine involuntarily; is irritable and prostrated. θAfter intermittent fever.
‖Urine copious and involuntary. θBronchitis.
Urine white and turbid, or white and jellylike.
‖Urine turbid, becomes semisolid on standing. θIntermittent fever.
‖Urine clear, or turns milky on standing. θChorea.

[22] **Male Sexual Organs.** ‖Bad effects from onanism. θWeakness of sight. θChorea.

[23] **Female Sexual Organs.** ‖Menses too early and profuse.
‖Hemorrhage from uterus, particularly before the age of menstruation.

[24] **Pregnancy. Parturition. Lactation.** ‖Laborlike pains in abdomen, frequently recurring, as if menses would appear.
‖Child refuses breast.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Attempting to talk causes a peculiar hoarse, soundless cough, with pain in larynx. θAphonia from exposure.
Hoarseness with much mucus in larynx and trachea.
‖Paralysis of vocal cords from catching cold, with twitching of r. hand, and pectoralis major, constriction of r. side of thorax and difficulty of breathing at every fit of coughing, followed by gurgling in œsophagus.

Digitized by Google

‖Great bronchial irritation of children, mucous râles in bronchi, moaning at night, frequent rubbing of nose.
Titillation low down in trachea, inducing cough.
‖Bronchitis: short, rapid respiration, rattling and coughing, very cross, obstinate and crying; restless sleep, constantly broken by cough; thirst, poor appetite; urine copious and involuntary; pulse 120 to 140; spasmodic twitchings with threatening collapse; pupils dilated; gnashing of teeth; deathly paleness.
‖Bronchial catarrh, with diarrhœa and helminthiasis.

[26] **Respiration.** Very short breath, as if he had much mucus in chest, without being obliged to cough.
‖‖Very short breath, at times with interruptions.
Difficult, loud respiration.
‖Respiration accelerated, short and rattling, when coughing at short intervals could not raise mucus, and was nearly suffocated in consequence. θBronchitis.
Short moaning respiration with open mouth.
‖Respiration wheezing and panting.
While inspiring, a loud whistling whoop in trachea, not audible on expiration.
‖Inhalation broken into two. θHydrocephalus.
‖Oppression of chest, as from a cramplike, contracted sensation in chest; sternum seems to lie too close and breathing becomes oppressed.
‖Suffocative attacks.

[27] **Cough.** ‖Fretting excites cough.
‖Paroxysm of violent cough from time to time.
‖Spasmodic, dry cough, returning periodically each Spring and Fall.
‖Violent, periodically recurring paroxysms of whooping cough, excited by sensation of a feather or down in throat, or by adherent mucus in larynx; in morning without expectoration, in evening with difficult expectoration of white, occasionally blood-streaked mucus, which is tasteless; < in morning and in evening; > during night; < by drinking, walking in open air, pressing on larynx, lying on r. side, in cold air, and when awaking from sleep.
‖Dry, spasmodic cough, with rigidity of body and unconsciousness. θWhooping cough. θHelminthiasis.
‖Dry cough, with sneezing, want of appetite and sleeplessness.
‖‖Gagging cough in morning, after rising; irritation thereto (as from dust) is renewed by inspiration after a long interval.
‖Hoarse gagging cough, consisting of a few shocks, which is renewed only after long intervals, in evening.

Digitized by Google

‖Hacking cough, followed immediately by an effort to swallow something.
‖Short hacking cough at night.
‖Rattling cough in spells. θHydrocephaloid.
‖Cough < in evening. θHydrocephaloid.
‖Dry cough and sneezing; baby would not nurse and cried when not coughing, with inappetency, sleeplessness and pains in throat.
‖Before coughing child raises herself suddenly, looks wildly about, the whole body becomes stiff, she loses consciousness, just as if she would have an epileptic spasm, then follows the cough.
‖After coughing, the child cries au! au! a noise like a gurgling going down is heard; she is anxious, catches her breath, and becomes very pale in face; paroxysms lasting two minutes.
‖Paroxysms of spasmodic cough at night, ending in spasms, throwing body of child backward so suddenly as to force child off nurse's lap; ravenous appetite; hard, distended abdomen; picks nose; stools of mucus and undigested food.
When coughing peculiar twitching of r. hand.
Expectoration: whitish, slimy, rarely somewhat bloody, almost tasteless, detached with difficulty.
‖In morning, after rising, mucus hangs in larynx; he is frequently obliged to hawk it up, after which it soon collects again.

[25] **Inner Chest and Lungs.** ‖Stitches in l. side.
‖Burning stitches and soreness in chest.
Chest as if pressed together from both sides.
‖Chest seemed to be full of mucus, with coarse râles; threatened collapse. θBronchitis.

[29] **Heart, Pulse and Circulation.** Anguish about heart as though he had committed some evil deed, when working in open air.
Trembling beating of heart.
‖Pulse small, but hard and accelerated.
‖Pulse 136, intermitting every seventeenth beat. θScarlatina.

[30] **Outer Chest.** Two dull piercing stitches in quick succession near sternum, beneath clavicle, during a deep inspiration; painful on pressure.
‖Right side of chest constricted, with difficult breathing. θAphonia.

[31] **Neck and Back.** ‖Drawing-tearing pain along whole spine.
‖Tearing, jerking pains in middle of spine.
‖Fatigued pain in loins, as if he had stood a long time.

Digitized by Google

Bruised pain in small of back, not < by motion.
Lancinating in upper part of spinal column towards r. scapula.

[32] **Upper Limbs.** Cramplike, drawing pains in arms and hands.
Boring, pinching pains in l. upper arm, > by motion.
Sprained feeling in wrist joint.
Single, small, jerking stitches, now in r., again in l. hand.
Spasmodic contraction of hand.
Peculiar twitching of r. hand when coughing.
Weakness of hand; he can hold nothing with it.
Twitching of fingers.

[33] **Lower Limbs.** Paralytic pain in l. thigh, near knee.
Left leg semiflexed, both upon itself and upon abdomen.
Rigidity of lower limbs; spasmodic stretching and twitching of feet.
Sudden loss of use of lower limbs, with unnatural hunger.

[34] **Limbs in General.** Twitching of limbs.
Jerking and distortion of limbs.
Pain in limbs. θIntermittent.
Coldness of hands and feet with thirst.

[35] **Rest. Position. Motion.** Lying on belly during sleep.
On lying on r. side: cough <.
On lying down: dizziness and faintness.
On rising: dizziness and faintness; pain or uneasiness below sternum, sometimes extending to navel.
On stooping: pain in head >.
Continually rolling over and about.
Motion: pain in arm >.

[36] **Nerves.** Child is very weak, pale and sick; constant restlessness; children constantly turn and twist at night, call for water, and are ravenous for food.
Child tosses about uneasily, even while awake.
Oversensitiveness of whole body to touch.
Trembling of body, with shivering sensation, while yawning.
Twitching, jerking and distortion of limbs.
Spasmodic twitchings, with threatened collapse. θBronchitis.
The child gets perfectly rigid in every coughing spell.
General rigor of whole body, and loss of consciousness. θWhooping cough.
Spasms of children, with throwing arms from side to side.
Convulsive attacks at night.
Convulsions of extensor muscles; child becomes suddenly stiff; there is a clucking noise, as though water was poured out of a bottle, from throat down to abdomen.

Google

‖‖Worm spasms, the child stiffens out straight.
Epileptic attacks, especially at night.
‖Epileptiform convulsions, with consciousness.
‖Eclampsia, especially at night, with or without consciousness; lying on back; violent screams and violent jerks of hands and feet.
Chorea; the distortions often commence with a shriek, extend to tongue, œsophagus and larynx, continue even through night; from intestinal irritation.
‖Chorea complicated with worms.
‖‖Paraplegia, with unnatural hunger.

[37] **Sleep.** ‖Spasmodic yawning; pains renewed by yawning which cannot be suppressed. θAmenorrhœa.
‖Sleeps erect, with head leaned backward or to r. side.
‖Child hangs its head to one side, is drowsy.
‖Sudden distressing cries in sleep. θHydrocephaloid.
‖Grinding of teeth during sleep.
‖Tossing about during sleep, with lamentations and cries about colic. θHydrocephaloid.
‖‖Restless sleep broken by cough. θBronchitis.
‖Lying on belly. θIntermittent.
‖Awakes from sleep trembling and frightened, with screams, and will not be pacified. θIntermittent.
‖Wakes in morning, restless and lamenting, in a start.
‖Cannot sleep; when falling asleep, starts, screams, turns over, kicks off bedclothes. θHydrocephaloid.
‖‖Child never sleeps long at a time. θIntermittent. θAtrophy.
‖Sleeplessness, with restlessness, crying and lamentations.
During sleep hiccough.
‖Child will not sleep unless rocked, or kept in constant motion.
Heat < after sleep.

[38] **Time.** In morning: sensitiveness of eyes; dull headache; pain in sternum <; paroxysms of whooping cough, without expectoration; paroxysms of whooping cough <; after rising, gagging cough, mucus in larynx, wakes restless and lamenting, in a start.
From 9 A.M. till 1 P.M.: soreness in eyes, nose, forehead, temples and occiput.
At noon: fluent coryza; chorea while at dinner.
During day: child is unwilling to play, sullen.
In evening; child awakes frightened; stoppage of nose; paroxysm of whooping cough, with difficult expectoration; paroxysm of whooping cough <; hoarse, gagging cough; cough <; chill, with great paleness of face; chorea.
At night: pain in eyes; constant pressure in stomach;

Google

involuntary emissions of urine, with worm symptoms and ravenous appetite; moaning; whooping cough >; hacking cough: spasmodic cough; children constantly turn and twist, call for water, and are ravenous for food; convulsive attacks; eclampsia; restlessness; chorea; aggravation of symptoms.

Before midnight: child wakes up frightened.

[39] **Temperature and Weather.** Open air: cough and expectoration <; anguish about heart when working in.

Warmth: does not > chill.

Cold air: teeth sensitive to; cough < by.

Cold water: teeth sensitive to.

[40] **Fever.** ‖Before chill, hunger, vomiting of food, pain in limbs. θIntermittent.

‖Chill, with shivering and shaking, even near a warm stove.

‖Chill ascends from upper part of body to head, or from back upward.

Chill without thirst.

‖Chill not relieved by external warmth, mostly in evening and with great paleness of face.

‖Chill in evening and fever all night (nursing children).

‖‖Chill, with thirst, face pale and cold; hands warm; nausea, or vomiting of bile or ingesta. θIntermittent.

‖Chill followed by convulsions and high fever; heat mostly in face and head; pain in stomach and abdomen; pupils enlarged; rubbing of nose; restlessness, with grinding of teeth; sudden starts; abdomen bloated. θHelminthiasis.

‖Shivering creeping over trunk, so that he trembles even by a warm stove.

‖Chill in P.M., not > by heat; heat is mainly in face; vomiting during chill; child pale and puny; abdomen bloated; breath foul; an occasional thin, whitish diarrhœa; rubbing of face, ears, nose, and perineum; wetting bed; starting in sleep; lying on belly; restless at night, continually rolling over and about; throws away everything given it and cries about nothing.

‖Febrile shivering over whole body, with hot cheeks, without thirst.

‖‖Rising heat and glowing redness of cheeks, without thirst, after sleep.

‖Fever: vomiting of food, followed by chill all over, and then heat with great thirst; violent, with vomiting and diarrhœa; daily at same hour; chill, followed by heat without thirst.

After remittent fever excessive prostration, with irritability and involuntary urination.

Digitized by Google

‖After fever, hunger. θIntermittent.
‖Daily fever at same hour, with very short breath.
‖Burning heat over whole face, with redness of cheeks and thirst for cold drinks.

[41] **Attacks, Periodicity.** Lasting two minutes: spasms in throat after coughing.
For an hour: chill.
All day: frequent urging, with passage of much urine.
All night: fever.
Through the night: chorea.
Each Spring and Fall: spasmodic dry cough.
Periodical: paroxysms of whooping cough; daily fever.
Alternating: headache, with pain in abdomen.
Intermitting: pressure in head.

[42] **Locality and Direction.** Right: drawing pain in temple; twitching of hand and pectoralis major; constriction of side of thorax; twitching of hand when coughing; constriction of chest; lancinating towards scapula; small, jerking stitches in hand; twitching of hand when coughing.
Left: drawing in frontal eminence to root of nose; soreness over and in eye; in side of nose and forehead; stitches in side; pinching in upper arm; small, jerking stitches in hand; paralytic pain in thigh near knee; leg semiflexed both upon itself and upon abdomen.
Backward: jerking of head; spasms throw body of a child suddenly backward.

[43] **Sensations.** As if brain pressed down on middle of vertex; as if he saw objects through gauze; as if sand had got into eyes; as if both malar bones were pressed together with pincers; as if sternum was lying too close and oppressed breathing; as of feather or down in throat; as if chest was pressed together from both sides; as if chest was full of mucus.
Pain: in chest and back; in abdomen; in eyes; about umbilicus; in forehead; in pericardial region; below sternum, sometimes extending to navel; in bowels; in larynx; in throat; in limbs; in stomach and abdomen.
Dull twinges sometimes like a pinching, at others like a pressure, or a blow, or jerk, or again like an itching, at various places, but especially at posterior portion of crest of ilium, on hip; the places are painful on pressure, as if sore or bruised.
Lancinating: in upper part of spinal column, towards r. scapula.
Tearing: along whole spine; in middle of spine.
Stitches: from upper orbital margin deep into brain; below mastoid process; in temples; in l. side; in chest;

Google

dull, piercing near sternum beneath clavicle; now in r., again in l. hand; here and there in body.
Cutting: in abdomen.
Digging up pain: in epigastrium.
Boring: in ears; above navel; in l. upper arm.
Gnawing: in stomach as from hunger.
Pinching: transversely across epigastric region; in abdomen; in l. upper arm.
Burning: in nose; in chest; over whole face.
Bursting: in r. temple on coughing.
Jerking: in external ear; in middle of spine; of limbs.
Twisting: about navel.
Drawing: in r. temple; along whole spine; in arms and hands.
Constriction: r. side of chest.
Contraction: in chest.
Laborlike pains: in abdomen.
Cramplike pains: in arms and hands.
Cramplike pressure: in abdomen; in chest.
Pressure: in head as from a heavy weight; in eyes as from sand; in stomach; transversely across epigastric region; in belly outward.
Oppression: of chest.
Anguish: about heart.
Pulsation: of superciliary muscles.
Swashing: in forehead, when shaking head.
Aching: in eyes.
Bruised pain: in small of back.
Sprained feeling: in wrist joint.
Soreness: over and in l. eye; in l. side of nose, forearm and temples to occiput; in chest; of body when touched, or when moving.
Shivering sensation: while yawning; over trunk.
Creeping: over trunk.
Crawling as of numberless worms: in epigastrium.
Itching: in inner canthus; of nose; at anus.
Titillation: low down in trachea.
Uneasiness: below sternum, sometimes extending to navel.
Heaviness: of lids.
Fatigued pain: in loins as if he had stood a long time.
Confusion: of head.
Paralytic pain: in l. thigh.
Stupefying pain: in forehead: in occiput; when walking in open air; after eating; after mental labor.
Weak feeling: in head.
Empty feeling: in head; after a meal; in abdomen.
Hollow feeling: in head.
Roughness: of mouth; of palate.

Digitized by Google

Dryness: of mouth; of palate.
Warmth: in abdomen.
Coldness: of hands and feet.

[44] **Tissues.** Cachexia of helminthiasis.
Great emaciation from impaired nutrition.
Intestinal irritation affecting brain and other organs.
The voluntary muscular system is affected, paralytic sensations and partial temporary paralysis occur in extremities, complicated with convulsive muscular contraction, the co-ordinating power in abeyance. θChorea.
Abnormal sensitiveness of individual nervous filaments.
Hyperæsthesia of laryngeal mucous membrane.
Reflex spasms in dominion of nervus vagus.

[45] **Touch. Passive Motion. Injuries.** Pressure: aggravates headache; mastoid process feels as after a bruise or blow; pain in malar bones <; boring pain in navel <; causes pain in navel; belly painful to; on larynx < cough; sternum near clavicle painful on; upon previously affected parts reproduces paroxysms of chorea; suffering renewed or aggravated by.
Child wants to be carried. θHydrocephaloid.
Touch: child cannot bear least; cannot bear to have head touched; oversensitiveness of whole body; paroxysms of chorea reproduced by.
On taking hold of child: it cries piteously.
Child dislikes having head combed or brushed.
Can see better after rubbing eyes.
On wiping eyes: sensations as if looking through a gauze >.
Child must be rocked, carried or dandled on knee constantly, day and night; will not sleep unless rocked or kept in constant motion.
When carried: child cries piteously.
Desire to remain perfectly still and in the dark. θIntermittent.

[46] **Skin.** Itching lessened or unchanged by scratching.
Furuncles or red pimples.
Ulcers with scanty discharge.
Rubbing of face, ears, nose and perineum.
Minor skin affections of infants and scrofulous children.

[48] **Relations.** Antidoted by: *Camphor.*, *Capsic.*, *Cinchon.*, *Pip. nigr.*
It antidotes ailments from *Capsic.*, *Cinchon.*, *Mercur.*
Compatible: after *Droser.* in pertussis; after *Ant. tart.* in bronchitis.
Cina cured aphonia from exposure when *Acon.*, *Carb. veg.*, *Phosphor.* and *Spongia* had failed.
Compare: *Ant. crud.* and *Ant. tart.* (irritability of children; will not be touched or looked at without crying);

Digitized by Google

Cuprum (gurgling along œsophagus when swallowing fluids); *Digit.* (white stools); the action of Santonine on eyes is comparable with that of *Atropia* and *Digit.*

CINCHONA BOLIVIANA.

A variety of Cinchona Calisaya, discovered by Weddell in Bolivia, growing somewhat further northward than Calisaya.

PROVER.—M. M. Modiedo, Bogota, La Homœopatia, vol. 1, p. 333.

[1] **Mind.** Painful sense of humiliation.
Excessive gloominess with alternations of serenity; hilarious in evening.
Great lack of moral courage; disposed to feel cowardly.
Feels sad, like shedding tears; thinks much about future.
Feels abandoned and deserted.
Fits of rage, breaks out in blasphemous and improper languge.
Alternate bad and good humor.
Calm, feels repentant, resigned.
Absent-minded while conversing.

[2] **Sensorium.** Vertigo as after a drunken fit, voracious appetite.
Head feels heavy, stupid.

[3] **Inner Head.** Dull headache in morning on awaking, leaves during day.
Violent headache on awaking in morning, continuing all day and night and following day, leaving during sleep on next night.
Headache after eating.
Pulsations in l. side of head.
Headache with pulsations over r. eye.
Head heavy and hot.

[4] **Outer Head.** Sweat on forehead.
Pain in roots of hair on crown of head.
Some of hair falls off in a spot where pain was felt.

[5] **Sight and Eyes.** Turning head to right, with eyes closed, seems to see a bright flame extending horizontally from r. to l., terminating in a point; feels as if caused by pressure on lids.
Desires to close eyes at night during fever.
Burning pain in eyes, wants to rub them.
Veins in inner angle of l. eye injected; morning.
Cramplike pain in inner angle of r. eye.

Digitized by Google

Violent pain like a stab in l. eye, followed by itching and tears.
Lids weak, drooping.

[6] **Hearing and Ears.** Sudden sounds as of a far-off landslide, and detonation of a cannon, in r. ear.
Sounds in l. ear as of ringing of bells, at night.
Sounds like humming of bees in l. ear, and as of blowing of a trumpet, at night.
Whistling sound in r. ear, at night.
Deafness in l. ear; took large ball of cerumen from it.

[7] **Smell and Nose.** Much sneezing on awaking in morning, with smell as of fresh pus or semen when sneezing first begins in head.
| | Sensation as of incipient cold with tight feeling and pain in throat.
| | Violent cold in head; coryza.
Nostrils dry, stopped up.
Mucus from posterior nares.

[8] **Upper Face.** Face: hot; pale; sweating; cadaveric.
Pulsation in l. side of face extending to ear.
Painful pustule on prominence of r. cheek bone.

[9] **Lower Face.** Aphthæ on inner surface of lips.
| | Ulceration of commissures of mouth.
Slight eruption on lower lip, much itching; pustules leave before fully forming.

[10] **Teeth and Gums.** Teeth on edge, sore on chewing, especially l. side.
Deep pulsation in decayed teeth, l. side.
Gums feel excoriated at base of teeth, < l. side.

[11] **Taste and Tongue.** Taste: saltish; acid; as of iron; insipid; as of blood.
Tip of tongue feels as if burnt.
Epithelium peels off base of tongue.
Sensation on tongue as of violent bites, seemingly extending towards l., also to right.

[12] **Inner Mouth.** Mouth bitter; morning on awaking.
| | Aphthæ.

[13] **Throat.** Feeling of constriction and burning in throat.
Tonsils painful.

[14] **Appetite, Thirst. Desires, Aversions.** Hunger, or lack of appetite; repugnance to meat.
Thirst during day; also in morning.

[15] **Eating and Drinking.** At night, after preserves, mouth suddenly fills with extremely sour liquid.
After food, feeling of weight in stomach.
After eating: cold; sneezing; sleepy, and desire to sleep early in evening.

[16] **Hiccough, Belching, Nausea and Vomiting.** | | Much gas arises from stomach.

Digitized by Google

Nausea while eating at night.

[17] **Scrobiculum and Stomach.** Heat in skin in region of stomach.

Unpleasant sensation in stomach on lying down.

[18] **Hypochondria.** Pain in hepatic region.

Pains in both hypochondria and under short ribs on awaking in morning.

Pain in splenic region.

[19] **Abdomen.** Cramplike pain in lower part of abdomen, r. side.

Great heat as from a poultice.

Pricking as from pins in pubis.

[20] **Stool and Rectum.** Hard, then soft stools, without diarrhœa.

Expulsion of gases from intestines.

Impulse to stool at night; stools hard, scanty.

‖Biting in anus as from worms; excoriated sensation.

Viscous sweat on anus.

[21] **Urinary Organs.** Pain in l. kidney on sitting down on bed, in morning.

Heavy pressure in bladder; cramp in sphincter; tenesmus on urinating.

Flow of urine bifurcated; or small stream curving to right.

Flow of urine frequent and clear.

Urine forms in nebulous flocks, smelling very strong in a few hours.

[22] **Male Sexual Organs.** Morning erections, no sexual desire.

Pollutions exceedingly debilitating.

Pricking, crawling in urethra up to sphincter.

‖Excoriation on inner and lower part of prepuce.

‖Gleet and ulceration of prepuce.

[27] **Cough.** Cough dry, then loose; sputum saline or tasting of blood; sputum of milk-white globules of mucus.

Dry cough with great pain in r. lung as from a dagger buried there; at times makes breathing laborious; burning in eyes; head very uncomfortable; extremities cold. θPneumonia.

[28] **Inner Chest and Lungs.** Pain in chest as if it was one great sore.

‖Unbearable pain in r. lung, extends to region of liver; sensitive to touch; at times takes away breath; with tenacious dry cough of a metallic ring.

Dull cramp in thoracic cavity.

‖Violent attack of pneumonia.

[29] **Heart, Pulse and Circulation.** Palpitation; heartache.

Pulse feeble and quick during nocturnal fever.

[31] **Neck and Back.** ‖Nape of neck painfully rigid, cannot turn head to right; any sudden movement of head causes a snap or crack.

Digitized by Google

Sudden violent cramp in anterior lower part of neck causing fright.
Pain in l. buttock, also in r. hip bone and l. kidney on sitting upon bed in morning.
|| Wry neck.

[33] **Upper Limbs.** Rheumatic pains in l. shoulder.
Rheumatic pains in l. arm from shoulder to hand, also in both arms.
Dull pains alternate from arm to arm.
Pains in r. arm on moving it.
Left arm and hand lose sensation of touch, followed by cramplike pain about l. thumb-nail, which impedes movement in first joint of thumb, feels as though the nail was about to fall off, and is painful to touch, all day.
Rheumatic pains from l. wrist to elbow.
Pains in joints of both hands.
Pricking pains in hands.
Lack of strength in arms and hands.
|| Hands red; vessels distended.
Hands hot even in cold and rainy weather.
Hands cold, sticky.
Considerable and prolonged hemorrhage from a small wound on inner part of joint of first phalanx, second finger of r. hand.

[33] **Lower Limbs.** Convulsive pains in muscles of l. thigh.
Pricking pains in legs.
Pains in l. knee.
|| Legs and feet icy cold as if blown on by a wintry wind.
Sudden, violent pulsating in joint of r. big toe; cramp in it at night, on lying down.
Rheumatic pains in r. foot.
|| Painful corns which grow very rapidly on both feet.

[35] **Rest. Position. Motion.** After lying down: no disposition to sleep.
On lying down: unpleasant sensation in stomach; sudden violent pulsating in joint of r. big toe; sudden and profound sleep.
On sitting down: pain in l. kidney.
On sitting up in bed: pain in l. buttock, and in r. hip bone.
Cannot turn head to right, nape rigid, any sudden movement causes a snap or crack.
Turning to right, eyes closed, seems to see a bright flame horizontally from r. to l. terminating in a point.
Pains in r. arm on moving it.

[36] **Nerves.** Feels exceedingly lazy in bed in morning, but cannot go to sleep again.
Inclination to oscillation of body after writing.

Digitized by Google

Nervous susceptibility, cannot bear noise.
Whole body uneasy.

[37] **Sleep.** No disposition to sleep after lying down.
Sudden and profound sleep on lying down.
Dreams: of the sea; of fishes seen swimming; of persons bathing; of journeys; of journeys by water; of mule driving; of death and about dead persons; of vulgar scenes; of vomiting worms; of disputes about money matters.
Drools from mouth in sleep.

[38] **Time.** In morning: dull headache on awaking; violent headache on awaking; veins in inner angle of l. eye injected; much sneezing on awaking; mouth bitter on awaking; thirst; pain in both hypochondria and under short ribs on awaking; pain in l. kidney on sitting down; erections; pain in l. buttock and r. hip bone on sitting up in bed; in bed, feels lazy but cannot go to sleep again; feels cold in bed.
Evening: hilarious; desire to sleep; fever.
At night: desire to close eyes during fever; sounds in l. ear as of a trumpet; whistling in right ear; mouth fills with a sour liquid after preserves; nausea while eating; impulse to stool; fever; sudden, violent pulsating in joints of r. big toe; cramp in r. big toe; feels cold in bed; heat of body.

[39] **Temperature and Weather.** Disinclination for a bath.
In cold rainy weather: hands hot.

[40] **Fever.** Feels cold in bed all night; also in morning.
General excessive cold during day; heat of body at night.
Fever, P.M., after dinner head heavy, burning in eyes, frequent sneezing; cold feet.
Sweat excessive on face and head; burning in eyes; veins swollen; pulse 96 to 104.
Intermittent fever.

[41] **Attacks, Periodicity.** Sudden: sounds in ears; pulsating in joints of r. big toe.
Frequent: flow of urine; sneezing.
At times: laborious breathing.
During day: thirst; general excessive cold.
All night: feet cold in bed.
Alternate: dull pains from arm to arm.
Intermittent fever.

[42] **Locality and Direction.** Right: headache, with pulsations over eye; cramplike pain in inner angle of eye; detonation of cannon in ear; whistling in ear; painful pustule on prominence of cheek bone; cramplike pain in lower part of abdomen on side; stream of urine curves; pain in r. hip bone; rheumatic pains in arm;

Digitized by Google

sudden, violent pulsating on joints of big toe; rheumatic pains in foot.

Left: pulsations in side of head; veins in inner angle of eye injected; violent pain like a stab followed by itching and tears in eye; sounds like ringing of bells in ear; sounds like humming of bees in ear, as of blowing of a trumpet; deafness in ear; pulsations in side of face, extending to ear; soreness of teeth on chewing; pulsating in decayed teeth on side; gums feel excoriated; pain in kidney; rheumatic pains in shoulder; pain in buttock; rheumatic pains in arm, front shoulder to hand; hand and arm lose sensation; convulsive pain in muscles of thigh; pains in knee.

From l. to r.: seems to see a bright flame terminating in a point; toothache.

Right then l.: crawling in ears.

[47] **Sensations.** As of a stab in l. eye; as of a far-off landslide sounding in ears; as of incipient cold; as of teeth being on edge; as if tip of tongue was burnt; as of violent bites on tongue; as of a dagger buried in r. lung; as if there was one great sore in chest; as if legs were blown on by a wintry wind.

Pain: in roots of hair on crown of head; in throat; in tonsils; in hepatic region; in both hypochondria and under short ribs; in splenic region; in l. kidney; in r. lung, with cough; in chest; in l. buttock; in r. arm on moving it; in joints of both hands; in l. knee; in corns.

Unbearable pain in r. lung, extending to region of liver.

Burning: in eyes; in throat; constriction in throat.

Excoriated feeling: of gums on l. side; in anus; on inner and lower part of prepuce.

Biting: in anus, as from worms.

Pricking: in pubis, as from pins; in urethra up to sphincter; in hands; in legs.

Convulsive pains: in muscles of l. thigh.

Soreness: of teeth on chewing.

Dull pains: alternate from arm to arm; in head.

Dull cramp: in thoracic cavity.

Sudden cramp: in anterior lower part of neck.

Cramplike pain: in inner angle of r. eye; in lower part of abdomen, r. side.

Cramp: in sphincter; about thumb-nail; in r. big toe.

Rheumatic pains: in l. shoulder; in l. arm from shoulder to hand; in both arms; from l. wrist to elbow; in r. foot.

Pulsations: in l. side of head; over r. eye; in l. side of face, extending to ear; in decayed teeth on l. side; sudden and violent in joint of r. big toe.

Digitized by Google

Tight feeling: in throat.
Heavy pressure: in bladder.
Pressure: on lids.
Heaviness: of head.
Weight: in stomach.
Uneasiness: in whole body.
Crawling: in urethra up to sphincter.
Unpleasant sensation in stomach on lying down.
Itching: in l. eye; of eruption on lower lip.
Heat: in skin; in region of stomach; in abdomen; as from a poultice; of body.
Coldness: after eating; of hands; of feet; icy coldness of legs.
Dryness: of nostrils.
Hands sticky.

45 **Touch. Passive Motion. Injuries.** Touch: unbearable; pain in r. lung, extending to region of liver, sensitive to.
Rubbing: wants to rub eyes.

CINCHONA OFFICINALIS. (China.)

Peruvian Bark. *Rubiaceæ.*

Unknown previous to middle of seventeenth century. Named after Countess El-Cinchon, wife of the vice-king of Peru. It was distributed by the Jesuits among the poor as a febrifuge. Grows on eastern range of Andes, and is being naturalized in India.

It was first proved by Hahnemann in 1790.

The yellow bark was mainly used in the provings. Those chiefly used in pharmacy are: 1. Cinchona Calisaya, also called Cinchona Regia or Cinchona Flava, Royal or genuine yellow bark. 2. Cinchona de Huanuco, grey or silver Cinchona; and, 3. Cinchona Rubra, or Red Cinchona.

Hahnemann mentions that in 1790, when proving Cortex China, the first idea of the homœopathic law of cure dawned upon his mind.

For provings, see Allen's *Encyclopedia*, vol. 3.

[1] **Mind.** Quite unconscious to pinching; loudly calling into ears arouses some momentary consciousness; answers to questions unintelligible. θComa.

Digitized by Google

‖‖Chooses wrong expressions, or misplaces them.
‖‖Delirium after depletion; on closing eyes, sees persons.
‖Head very much confused in morning, as after intoxication, with dryness of mouth.
‖He makes many plans and reflects upon their execution.
‖‖Full of projects and ideas, especially in evening and at night.
‖Excessive vividness of mind and fancy, with headache.
Slow train of ideas, as though there was a difficulty in thinking.
Mind constantly changing from one thing to another.
‖Fixed idea that he is unhappy, persecuted by enemies.
‖She thinks she is very unfortunate and constantly harassed by enemies. θPregnancy.
‖Disposition to be alone.
‖An excessively anxious solicitude about trifles.
‖Maniacal condition, says and does foolish things and runs about. θIntermittent.
‖During a cheerful mood, sudden transient screaming and tossing about bed, without any apparent cause.
‖‖Compelled to jump out of bed; wants to destroy himself, but lacks courage.
‖‖Dislike to all mental or physical exertion.
‖Disinclination to think; alternating condition of cheerfulness and gloom.
‖‖Indifference, apathy, taciturnity.
‖Indifference to his pains, great lassitude and weakness. θTyphoid.
‖What usually appears to him bright and joyous seems now unattractive, unworthy and shallow.
Fitful mood; cheerfulness alternating with sadness.
‖‖Low-spirited, gloomy, has no desire to live.
‖Excessive nervousness, with lowness of spirits and intolerance of noise.
Hypochondriacal mood and inability to work, especially after a meal.
‖In morning on waking, anxious thoughts and ideas.
‖‖Inconsolable anxiety, even to suicide.
‖‖Dread of dogs and other animals at night.
‖Ill humor; cheerful persons become cross and irritable.
‖Ill humor increased by petting and caressing.
‖‖Inclined to reproach and vex others.
‖Stubborn, disobedient, longing for dainties; face pale, or at times red; restless all night; children.
‖Dreadful feeling of excitement.
‖General excitation during attacks, followed by depression. θCiliary neuralgia.
‖Nervous irritation, with slowness of ideas.

Digitized by Google

Intolerance of sensual impressions.
Worse after exerting mind.

Sensorium. Great sensation of emptiness in head in morning, as after drunkenness, with dry mouth.
Vertigo: after loss of animal fluids; anæmia; head feels weak, can hardly hold it erect; with chill; on raising head; with nervous erethism, excitable, hysterical; with fainting; on rising as if he would fall backward; with faintness; she staggered and could not walk straight; head inclined to sink backward; < on motion and when walking; > when lying; in occiput when seated; on waking at night he does not dare to rise; dizziness and heat in head, < when lying.
Stupefaction of head, with pressure in forehead.
Dulness of head: giddiness, as from sitting up at night, sleeplessness; as from coryza or intoxication and languor in limbs in morning on awaking.
Heaviness of head, fainting, loss of sight, ringing in ears, cold surface; after hemorrhage.
Weight on head, with tendency to fall backward, while seated.

Inner Head. Rush of blood to head, with heat and fulness.
Fulness in head, sensation as if brain was rolled around, with great excitement, nervous susceptibility increased.
Sensation as if brain was balancing to and fro, and was striking against skull, occasioning great pain.
Headache, so sensitive that it seems as though skull would burst; brain beats in waves against skull.
Congestion to head, pain in temples, noise and tingling in ears, frequently deafness and confused vision, heat and redness of face and head, while rest of body is cold and chilly.
Severe headache, flushed face, full, throbbing pulse, resembling one whose brain is congested. θIntermittent.
Sensation as if head would burst, with sleeplessness; < from motion or any jar; > in room and when opening eyes.
Intense throbbing headache; carotids throb; after loss of blood.
Painful pressure towards forehead, as if something would fall out; < by firm pressure of hand.
Pressive frontal headache; on leaning back pain < in temples and again in forehead when sitting.
Pain in head as if brain was pressed into a ball, with excessive vividness of mind.
Headache, as if brain was pressed together from both sides and out at forehead, very much < by walking in open air.

Digitized by Google

Sensation of constriction as if bound with a cord, especially on r. side of forehead and occiput; < by walking, when there are violent throbbings and head feels as if it would burst.

Headache like a heaviness and heat in it; < on turning eyes, together with jerking pain in temples.

Jerking headache in temple, extending to upper jaw.

Constant, dull, cutting pain from temples to orbits and occiput; < by stooping and motion.

Stitches in head, with pulsation in temples, which can be felt by finger; > by hard pressure, but < by movement of head.

Stitches from temple to temple.

Headache, first like a cramp in vertex, followed by bruised sensation in side of head; < by slightest motion.

Tractive headache, from occiput to forehead, as if latter was compressed, which terminates in throbbing at temples; > after walking, and < on sitting still.

Headache from occiput over whole head from morning until afternoon; < lying, must stand or walk; drives to madness.

Headache in occiput after sexual excesses or onanism.

Severe pressure in occiput as if cerebellum would be forced out.

Soreness of brain as if bruised, particularly when walking in wind or making any mental effort.

Whole head feels bruised; < from exerting mind.

Brain feels bruised; < on moving, even opening his eyes; scalp sensitive; < at night.

Violent jerking-tearing in several places in head; < on motion and when walking; relieved when lying.

Violent tearing, darting pains in various parts of head; < by walking; > when sitting still; weight and darting pains in forehead, especially on moving eyes; darting pain in parietals, which descend along neck; darting pains disappear by evening.

Throbbing, hammering, tearing, pressing headache, extending to neck and teeth; < at night, with great restlessness and sleeplessness; nodes on head as large as a filbert; profuse sweat without relief; scalp painful to touch.

Periodical cephalalgia of l. side, occurring each morning; attacks commence at 1 o'clock in morning, lasting until 10, 12 and sometimes 1 o'clock P.M.; pain confined to l. side of head and is of a boring and pulsating character.

Hemicrania, l. side, affecting eye and neck.

Headache on alternate mornings, l. side into l. cervical region. θAsthmatic cough.

Digitized by Google

‖Neuralgic headache, first on l., subsequently on r. side, beginning in teeth and jaw, extending to ear, temples and vertex; < from a current of air, or taking anything cold or hot into mouth; > by external warmth; < at night during and after lactation.
‖Headache, changing from side to side.
Headache, with yawning and great weakness.
‖‖Tearing drawing, oppressive pains, as from a load on head.
Jerking-tearing in head, or tearing with pressure.
‖Pressive headache in the side which is leant upon.
Tractive pains in various parts of head; < by motion.
Lancinating pains in various parts, especially in frontal region.
‖‖Headache improved by moving head up and down.
‖‖Headache: < from draught of air; in open air; from sun; slightest touch; > from hard pressure.
‖Headache from suppressed coryza; < in open air, or from exerting mind.
‖Headache, particularly at night, with sleeplessness.
Inflammation of the brain and hydrocephaloid.

⁴**Outer Head.** ‖‖Burning in forehead, with hot sweat on it.
Distended veins on temples and forehead.
‖Pain externally on occiput: > from drinking coffee.
‖Contractive pain of scalp, as if scalp was clutched and drawn together to one point of a circle.
‖‖Scalp feels as if hair was grasped roughly.
‖‖Scalp sensitive to touch, roots of hair hurt when hair is moved; <when walking in open air and from a draught of air; > by a strong external pressure and scratching head.
‖‖Profuse sweat on head, especially when walking in open air.

⁵**Sight and Eyes.** ‖Illusion in morning of bright gold chain dangling before eyes, whether eyes are open or closed, with headache. θAsthmatic cough.
‖‖Flame of candle seems to be of a dazzling sulphur color, after a few minutes all surrounding objects appear enveloped in dazzling rosy light.
‖‖Sensitiveness of eyes to bright sunlight.
‖Letters pale, surrounded by white borders. θAmblyopia.
‖‖Scintillations, or black motes before eyes.
‖‖Dimness and weakness of sight; she can only distinguish outlines of distant objects.
‖Shortsightedness after typhus, with diarrhœa.
‖Amblyopia, consequent upon venereal excesses and intoxication; only large objects could be distinguished at six paces; letters run together and look like black spots

Digitized by Google

on a white ground; pupils dilated and sluggish; fundus of eye hazy; cornea dim; vision > in morning; with loss of strength, trembling of limbs, weak digestion and uneasy sleep; in drunkards; after masturbation; after loss of fluids, tendency of blood to head.

❙Amaurosis, first r. then l. eye, with spinal irritation.

❙❙Sudden blindness with violent pain in occiput, extending into eyes.

❙❙Nocturnal blindness, hemeralopia.

Dimness of cornea, as if eyes were filled with smoke.

❙Ulcers in course of pannus, with much pain in morning.

❙Ulceration of cornea, particularly if iris becomes involved, dependent upon malarious causes or anæmia.

❙Iritis from loss of blood, after confinement.

❙Iritis from inoculation with gonorrhœal virus, intense photophobia, with pain in forehead.

❙❙Dilated, not very sensitive pupils. θAmblyopia.

❙❙Yellow color of eyes. θFever and ague.

❙Focal distance of eyes unequal for near and far points. θMuscular asthenopia.

❙Motion of eyes painful and difficult, with sensation of mechanical hindrance. θOphthalmia.

Distortion of eyeballs, one eye being open and the other half closed.

❙❙Pressure in eyes, as from drowsiness.

Pressive pain in outer canthus; tearing in l. outer canthus.

❙Excessive pain as if a knife was thrust between orbit and ball and moved about in orbital cavity as if to scoop out eye, from 8 A.M. till 2 or 3 P.M. θCiliary neuralgia.

❙Every other day between 8 and 9 A.M. an attack of violent pain in eye which becomes inflamed; at noon all symptoms disappeared. θOphthalmia rheumatica.

❙❙Smarting, first in one, then in other eye, with lachrymation.

❙❙Pressive smarting pain in eyes as from salt; she must constantly rub them.

❙❙Eyes red, with pressive burning pains in them, much heat.

❙❙Pressure, as from sand in eyes; photophobia; eyes hot, red, or dim, as if filled with smoke.

❙❙Dry feeling betwixt lids and balls, rubbing pain on moving lids, without perceptible alteration in eye.

Formicating pains in eyes and on inner surface of lids, with lachrymation.

❙Inflammation and itching of eyes and eyelids in persons debilitated by loss of animal fluids.

Crawling inside of lids; < in evening, with running tears.

Uncontrollable twitching of r. upper eyelid.

Digitized by Google

‖‖Involuntary closing of eyelids from mere weakness.
‖Vision better in morning. θAmblyopia.
Inflammation; < at night; also in scrofulous individuals.
‖‖Worse from light; > in dark.
‖Ciliary neuralgia dependent upon iritis, following malarial disease.
‖Pressing pain in one spot at inner and upper border of orbit, extending to nose and sometimes into lid, closing it, and of an intermittent type, coming on every evening about 11 o'clock. θScrofulous ophthalmia.
‖Supraorbital neuralgia of r. side, with morning periodicity; the pains are lancinating and tearing, the parts intolerant to pressure, with redness of eyes and lachrymation.
‖Intermittent ciliary neuralgia, with painful pressure and drawing in forehead and temples every day at 10 A.M.; < from touch or motion.

[6] **Hearing and Ears.** ‖Intolerance of noise.
‖‖Ringing in ears, with headache in temples; debility.
‖Ticking sound in ear, as from a distant watch.
‖Something seems to be constantly before ear.
‖‖Hardness of hearing; humming or roaring in ears.
‖‖Tearing pains in ears, < from least touch, ears red.
‖‖Stitches in ears.
‖External ear hurts when lying on it and is hot.
‖Hemorrhage from ear, offensive, bloody, purulent discharges.
‖Hemorrhage from ears after prolonged suppuration.

[7] **Smell and Nose.** ‖‖Smell too acute.
‖‖Dry coryza, toothache, lachrymation, much sneezing.
‖Suppressed coryza, headache from it.
‖‖Nosebleed: anæmia; ringing in ears; face pale; fainting; with tendency of blood to head; after blowing it, especially morning, on arising.
‖‖Frequent bleeding from nose; hemorrhage from nose and mouth.
‖Tearing in dorsum of nose.
‖Pressive pain in root of nose, which extended to side.
‖‖Redness and heat of nose.
‖‖Cold sweat about nose and mouth.

[8] **Upper Face.** ‖Hippocratic countenance, with listlessness and apathy.
‖Face and eyes sunken and jaundiced. θBiliary colic.
‖Face quite yellow. θFever and ague.
‖‖Face: red, during fever; hollow, pale, or livid; with atrophy; pale, blue around eyes; yellow, earthy; grey, yellow, or black; hippocratic.
‖‖Face hot, when entering room from open air.

Digitized by Google

Cheeks are red, feel hot to the patient although they are not warm, while other parts are chilly and cold.
‖Bloated, red face; face intensely flushed. θComa.
Frequent change of color in face.
‖Neuralgic: periodical attacks; pains excessive, skin sensitive to least touch; part feels weak; face alternately red and pale; pains from l. to r.; mostly in infraorbital and maxillary branches.
Prosopalgia < by touch or movement.
‖Supraorbital periodical neuralgia; lancinating and tearing pains, with swelling and perspiration of face; she cannot work, speak or swallow.
‖Facial neuralgia of l. side, with morning periodicity; darting, constrictive pressure, which extends from temple and eyes to whole side of face; lachrymation; pains < by noise, movement and touch.
‖Violent, tearing, laming, burning pain in r. side of face, extending up to parietal bone and down to clavicle; < at night; > from eating, but < from touch and lying down; r. arm numb; great weakness and prostration.
‖Needlelike pains in l. face, l. chest and l. hand.
‖Right-sided faceache.
‖Faceache; nervous or rheumatic.
‖Erysipelas of face and hairy portion of scalp, with much fever and dyspnœa; somnolence alternating with delirium, constantly present; excessive weakness.
‖Enormous swelling of face, particularly of eyelids; several large vesicles filled with fluid upon the cheeks; pulse 120; temperature 39°; constant but quiet delirium. θErysipelas of face and scalp.
‖‖Veins of face distended.

[9] **Lower Face.** Lips: burning; swollen; dry, hard, cracked, blackish; shrivelled.
‖Lips deep blue. θComa.
‖‖Submaxillary glands swollen, painful during swallowing.

[10] **Teeth and Gums.** ‖‖Toothache, veins in forehead and hands distended; throbbing pain.
Tearing, drawing, jerking, boring in teeth; from every cold.
Twitching, tearing in upper molar teeth, from taking cold in a draught of air.
‖Throbbing toothache > by external warmth.
‖‖Toothache < from least contact, moving body, tea, open air, or current of air; > from pressing teeth together.
‖‖Toothache while nursing infant at breast.
‖‖Toothache during sweat.
‖Pressure in teeth as if blood was forced into teeth.
Distressing dull pain in hollow teeth.

Digitized by Google

Painful numbness in decayed teeth.
‖Teeth are loose and painful only when chewing.
‖Black coating of teeth; covered with dark sordes.
‖‖Swelling of gums; mouth dry.

[11] **Taste and Tongue.** ‖Taste: too acute; putrid, morning; bitter in back part of throat; flat, watery.
‖‖Bitter taste in mouth, even tobacco tastes bitter while smoking.
‖Slimy taste in mouth, which disgusts him with butter.
‖Taste at first sweetish, then sour; profuse saliva.
‖‖Food tastes bitter or too salt.
‖Although he had no bitter taste in his mouth by itself, yet everything tasted bitter; after swallowing food there was no bitter taste.
‖Burning stitches on tongue.
‖‖Burning as from pepper on tip of tongue, followed by ptyalism.
‖Cracked, black, or yellow coated tongue.
‖‖Tongue black, parched, or raw as if burned.
‖Tongue white, mornings; child restless all night; no appetite for breakfast.
‖‖Tongue coated white, or yellow; thick, dirty coating.
‖Mouth very moist from an unusual flow of saliva; tongue dotted here and there with yellowish vesicles, some of them broken and looking sore; fauces very red; child in bad humor, hungry but could not take the breast. ℞Nursing sore mouth.

[12] **Inner Mouth.** ‖Dryness of mouth, with thirst.
Painful sensitive swelling of uvula.
‖Much saliva in mouth, with nausea.
‖‖Salivation day and night, years after mercury, great weakness, especially of stomach.

[13] **Throat.** ‖‖Throat feels rough, scraped, producing a sore sensation on swallowing.
‖‖Difficult deglutition as from contraction of œsophagus.
Enlargement of tonsils.
‖Gangrene of throat.

[14] **Appetite, Thirst. Desires, Aversions.** ‖‖Voracious appetite; atrophy.
‖‖Canine hunger; < at night.
Longing: for spirits; sweets; sour, cooling things; roasted coffee.
‖‖Children dainty, desire various things without knowing what.
‖Morbid craving for dainties, accompanid by sexual desire and lascivious fancies.
‖‖Wants highly seasoned food.

Digitized by Google

Hunger and yet want of appetite; food tastes natural, yet seems disagreeable in mouth.
Indifference to eating and drinking; only while eating some appetite and natural taste of food return.
Loss of appetite, nausea, desire to vomit.
Loss of appetite in foggy weather.
Loathing of food as if he had overeaten; continual sense of satiety.
Aversion to all food, even when thinking of it; dread of labor; drowsy by day; yellow eyes.
Averse: to bread; to beer; to butter; to meat; to fat things; to warm food; to coffee, although food has a natural taste.
Thirst and hunger, in evening, an hour after fever, then, after he had eaten, coldness and rumbling in bowels.
Violent thirst for cold water; drinks little and often.
Thirst after chill, without subsequent heat.
Thirst after fever, during sweat on back and forehead.
Thirst only between the cold and hot stages, or during sweat. θIntermittent.

[15] **Eating and Drinking.** Feels satiated all the time; loss of appetite.
Bread tastes good while chewing, but bitter on swallowing.
The slightest portion of food causes much pain. θDebility.
After eating: weariness, desires to lie down and sleep; drowsiness, oppressive fulness of stomach and abdomen, general malaise and languor.
After a meal, fulness as if stomach and œsophagus were filled up to throat.
Sleepy after eating, during hot stage.
Worse after breakfast.
During and after dinner, pain is relieved. θProsopalgia.
Gastric symptoms from: eating fish; excessive use of tea; sour wine; new beer; impure water; fruit; eating bad meat or fish.
Shuddering and chilliness, with gooseflesh after every swallow he takes.
Drinking < chill.
Worse from drinking wine and other liquors; suitable for inveterate drunkards.
Sour eructations after milk; milk disagrees.
Beer intoxicates easily.
Warm drinks impede digestion.
Worse from smoking.

[16] **Hiccough, Belching, Nausea and Vomiting.** θHiccough. θBiliary colic.

Digitized by Google

Nausea felt in throat pit after a meal.
‖‖Belching, sour rising
‖Child belches after eating and does not care to nurse.
‖Empty eructations of air only.
‖Frequent eructation, which affords no relief.
‖‖Eructations taste of food; or are bitter.
‖Sour eructations, > a while after swallowing milk.
‖Gagging.
‖‖Frequent vomiting.
‖‖Vomiting of food, in debilitated persons, after eating.
‖Vomit: sour; mucus, water, food, blood and bile; blackish; bloody; < at night.
‖Vomiting bile. θBiliary colic.
‖‖Spitting or vomiting of blood.

[17] **Scrobiculum and Stomach.** ‖Heartburn: after milk and after every meal, with flatulency.
‖Pyrosis and heartburn; most in afternoon.
‖‖Pulsations in pit of stomach.
‖‖Rumbling, especially in epigastrium.
‖‖Cold feeling in stomach; constant satiated feeling, yet can eat, but feels < afterwards.
‖Sensation of emptiness and qualmishness in stomach.
‖Sensation of fulness in stomach takes his appetite away.
‖‖Fulness in stomach and bowels; flatulence; belching does not relieve.
‖‖Heavy pressure in stomach, after small quantity of food.
‖Sensation as if food pressed upon and hurt stomach.
‖Violent oppression in pit of stomach; < at night in recumbent position.
‖‖Stomach feels sore, as if ulcerated, cannot bear slight touch.
Spasmodic pains in stomach.
‖‖Fermentation after eating fruit; acidity.
‖Milk easily disorders stomach.
‖‖Slow digestion, food remains long in stomach, especially if eaten too late in day.
‖‖Dyspepsia from loss of animal fluids or noxious miasmata.
‖‖Hæmatemsis, great loss of blood, weak, pale, cold hands and feet; stomach very sensitive to touch.
‖‖Gastralgia: after depletion; from acidity; with bloating after food or drink; satiety; relieved by motion.

[18] **Hypochondria.** ‖Pain in hepatic region, as from subcutaneous ulceration; < from touch.
‖Shooting in region of liver; also tenderness and pain when touching the part.
‖Sensitiveness in region of liver to least pressure.
‖‖Swollen, hard liver.

Digitized by Google

Obstruction in gall bladder with colic, periodic recurrence, yellow skin and conjunctiva, constipation, with dark greenish scybala.

Biliary calculi.

Gastro-duodenal catarrh after loss of fluids or severe illness.

Aching, stitching pains in spleen when walking slowly; pains extend in direction of long axis of spleen.

Swelling and hardness of spleen; region of spleen painful and tender. θIntermittent.

Enlarged spleen.

19 **Abdomen.** Sensation of internal coldness in upper abdomen after every swallow of drink, and renewed at every inspiration.

Abdomen distended, wants to belch; eructations afford no relief.

In connection with the tightness about abdomen, she often feels as if her garters were too tight and loosens them; she must loosen waistbands also.

Tympanitic abdomen, pressure as from a hard body; or spasmodic, constrictive pains from incarcerated flatus; < at night or after depletion; also in typhus; < mornings.

Great rumbling and moving of much flatus in abdomen, with a pressive sensation in evening between 6 and 10, followed by passage of much offensive flatus.

Flatulence from excessive tea drinking.

Fermentation in abdomen from eating fruit.

Heat in abdomen as of hot water running down.

Pinching in abdomen, bending double affords relief.

Cutting pain in bowels.

Pressing aching below navel.

Colic: in region of umbilicus, with shivering; at a certain hour each afternoon; three months colic; periodical from biliary calculi, or other causes; from weakness and loss of fluids; from flatulence; before passage of flatus; before stool; followed by diarrhœa; with great thirst; with hunger; > bending double; < at night and after eating.

Griping, with violent pains in abdomen on passing flatus.

Doughy, dropsical swelling of abdomen.

Swelling of abdomen, legs and feet; oppression in chest as if from a lump; appetite very poor; on lying down, feet become less swelled but she has more oppression of chest; face puffed; albumen in urine. θAcute dropsy following parturition.

Worm troubles, < at night, fulness in abdomen, with heartburn and waterbrash.

Digitized by Google

Strangulated hernia; gut black; after operation.

[20] **Stool and Rectum.** Accumulation of much flatus, which will pass neither up nor down.

Emission of a quantity of flatulence, frequently very fetid, without relief.

Flatulent discharges.

Stools: profuse; frequent; putrid; corrosive, loose, brownish, painless, with feeling of debility; frothy, painless, diarrhœic, with fermentation in bowels; painless, black; thin, large, with passage of wind, mornings; offensive, undigested, or white, papescent, at night; yellow, watery, involuntary; cadaverous smelling, chocolate colored, < at night; bilious; greenish; bloody; yellow mucous.

Very copious stool; < every other day.

Stool loose and green in children, with great flatulence.

Dark, greenish, scybalous stools. θBiliary colic.

In swarthy persons: thin, large stools, digested or not, usually with passage of wind and sometimes colic; but always < in morning; sleep < after 3 A.M.

Soft stools, with biting, burning pain in anus and colic before and after every stool.

Diarrhœa comes on gradually, stools more and more watery, pale, pinkish, with rapid emaciation.

Diarrhœa: particularly after meals, at night, painless early in morning; in hot weather; from eating fruit; from drinking sour beer; after measles; during small-pox; after severe acute disease; after loss of fluids; on alternate days; with great flatulence; with trembling and debility.

After long-lasting attack of cholera infantum, child becomes drowsy, pupils dilated, rapid and superficial breathing, nose and tips of ears cold. θImpending hydrocephaloid.

Dysentery in marshy districts, with intermittent symptoms.

Bowels frequently constipated. θDropsy and debility.

Difficult passage of feces, even when soft or papescent, as from inactivity of the bowels; sluggish peristalsis.

Accumulation of feces in intestines, with dizziness and heat in head.

Constipation: large accumulation; stool difficult, even if soft; after long purging.

Hard, intermitting stool, with sensation of tightness and fulness in abdomen; also with burning and heat in head.

Involuntary passing of feces and urine. θComa.

Mucous discharge from rectum.

In rectum, stitches, also during stool.

Tingling in anus, and discharge of pin worms.

Digitized by Google

Bleeding piles, burning and itching; debility.

[21] **Urinary Organs.** Frequent and urgent desire to urinate.
Burning at orifice of urethra, especially painful from rubbing of clothes.
Urine: turbid, dark, scanty; white, turbid, with white sediment; pale, becoming cloudy or depositing a dingy, yellow, loose sediment; dark colored, with brick red sediment.
Scanty, greenish-yellow, brickdust or pinkish sediment.
Enuresis of weakly children.
Albuminuria.
Diabetes.

[22] **Male Sexual Organs.** Sexual desire too strong and too continuous.
Morbid sexual desire; lascivious fancies.
Impotence, with lascivious fancies.
Impotence from overindulgence.
Nocturnal emissions too frequent and debilitating; particularly after onanism.
Consequences of excessive or long-continued seminal losses.
Painful swelling of spermatic cord and testicle, especially the epididymis; tearing in l. testicle in l. side of prepuce; cramplike, contractive pain in testicles, evenings; after gonorrhœa.
Stitches or contractive pain in urethra.
Burning at orifice of urethra, especially painful if clothes rub against the parts.

[23] **Female Sexual Organs.** Ovaritis from sexual excess or hemorrhage, parts very sensitive to slight touch.
Dropsy: of ovaries; of uterus.
Congestion to uterus, fulness, pressing and heaviness, < when walking.
Metritis after great loss of blood, or excessive coitus.
Prolapsus and attendant symptoms superinduced by loss of fluids, particularly blood.
Menses: too early, profuse, black clots, with spasm in chest and abdomen; painful; profuse, with sensation of great distension of abdomen.
Menstrual colic.
During menses: spasms in chest and abdomen; congestion of blood to head.
After menses: great weakness, trembling debility, with singing in ears and fainting.
Suppression of menses from chagrin; secretion of milk in breasts.
Metrorrhagia, blood dark; fainting; convulsions.
Discharge of bloody serum, alternating with pus.

Digitized by Google

Leucorrhœa: acrid; instead of menses, with itching; with spasmodic uterine contractions, painful bearing down to vulva and anus; menses increased.

One week after menses bloody leucorrhœa, with clots; lame, sore feeling through lower bowels, dull headache, weakness and depression.

Painful induration in vagina; slightest contact causes darting, tearing pain, or tearing with pressure.

Suitable to women after climacteric period.

[24] **Pregnancy. Parturition. Lactation.** Nymphomania of lying-in women.

Threatening miscarriage.

Abortion; abdomen distended, belching does not relieve; much loss of blood.

To promote expulsion of moles.

Uterine spasms.

Labor pains cease from hemorrhage; cannot have hands touched.

Uterine hemorrhages, ringing in ears, fainting, imperceptible pulse, cold; loss of sight; discharge of dark clots; uterine spasms; twitches, jerks; wants to be fanned.

Hemorrhage from atony of uterus.

Uterine hemorrhage, after expulsion of immature fœtus; unconsciousness.

Hemorrhage from abuse of chamomile.

Lochia last too long; drawing pain about ovaries; discharge fetid or cheesy, purulent.

Asphyxia of the newborn, after great loss of blood by the mother.

Eclampsia from loss of blood.

Deterioration of health from protracted lactation.

Nursing children jaundiced; bloated or tympanitic abdomen, and enlarged spleen or liver.

Toothache of nursing mothers.

Hæmoptysis during lactation.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarse; voice rough; deep from adhering mucus.

Deep, husky voice when talking or singing.

Sore sensation in larynx and trachea.

Chronic catarrh with mucous râles, coarse and loud.

Bronchorrhœa with general malaise, simulating last stage of phthisis.

Influenza, with debility, loss of appetite, heat without thirst.

[26] **Respiration.** Asthma, looks as if dying; < Autumn, wet weather, or after depletion.

Cannot breathe with head low.

Digitized by Google

‖Wheezing, whistling inspiration, crowing, rattling, oppressed and painful.

‖Inspiration slow, difficult; expiration quick, blowing, short. θŒdema glottidis.

‖Respiration labored, loud and stertorous, with puffing, blowing out of cheeks at each inspiration. θComa.

‖Inclination to take a deep breath.

The breathing is tight, oppressed and painful, or short and hurried.

‖Oppression of chest: evenings, lying down; as from fulness in stomach; from continued talking.

‖Constant choking: every day between 6 and 7 P.M., short breath and loud wheezing, making the choking worse; must sit up and sip water; tight, stuffy cough, with very little sputa; pain in spine, like a weight there, < by lifting; sensation of fulness in abdomen while eating; all her clothes feel tight; constant tiredness, must lie down, else she has such palpitation that she cannot breathe; head dragged backward.

‖Rattling in chest; loud sounds through nose.

‖‖Suffocative catarrh and paralysis of lungs of old people.

‖Nightly suffocative fits; spasmodic cough.

‖Suffocative fits, as from mucus in larynx.

‖Breath cold.

‖Wants to be fanned, but not hard, for it takes her breath.

℣ **Cough.** ‖Continual irritation to hacking cough, in morning after rising, as from sulphur vapor, whereby nothing could be loosened, for several mornings.

‖Cough: with pain in larynx and sternum; with pain throughout whole cavity of chest; with stitches in chest; immediately after eating; spasmodic with retching; caused by a tickling in chest; first hollow, dry and painful, later bloody expectoration; dry, with a taste of blood; hacking, with blood spitting and great prostration; lactation with expectoration of blood-streaked mucus, or with difficult expectoration of clear, tenacious mucus; with granular sputa during day or evening, none night or morning; causing cutting in l. lower abdomen; caused by laughing; during or after measles.

‖‖Dry, spasmodic, or suffocative night cough, as from vapor of sulphur, with bilious vomit.

‖Constant cough, with expectoration of blood and fetid pus, loss of appetite, thickly furred tongue, constant pain in chest, and especially in gastric region, which is painful to pressure; spleen affected, splenic region painful, and peculiar irritation in chest, proceeding from l. side.

‖Asthmatic cough at 3 A.M., followed by frothy, badly tasting expectoration; sharp stitches in r. pneumo-hepatic region.

Digitized by Google

Sputa: slimy, whitish; black and difficult; striped with blood; taste like old cheese.

Cough worse: lying with head low, or on l. side; moving; deep breath, talking, laughing; eating, drinking; evening or after 12 P.M.; lightly touching larynx; least draught; loss of fluids; after being awakened.

Whooping cough.

[28] **Inner Chest and Lungs.** Pressive, drawing pain across lower portion of chest while sitting, causing anxiety; disappeared while standing and walking.

Stitches: in r. chest up to axilla, prevents bending forward and breathing; in l. chest; under sternum; < during deep breathing and sudden movements; in cartilages of third and fourth l. false ribs, without affecting inspiration or expiration.

Continuous pain in l. chest and in stomach, on touching stomach he shrinks.

Pain in side, as if beaten, or as from a blow.

Small spot below last r. ribs, in which even slightest pressure or walking causes a sticking pain.

Pressing, stinging pain in chest and windpipe.

Pressure in chest, as from violent rush of blood, violent palpitation; bloody sputa; sudden prostration.

Cannot bear percussion or even auscultation, chest so sensitive.

Loud, coarse râles, great debility, anæmia; œdema of legs.

Pneumonia after hemorrhages, with bleeding or with bilious symptoms, or incipient gangrene of lungs.

Hæmoptysis: with subsequent suppuration of lungs; stitches in chest < from slight touch; cough with dizziness in head, and eyes feel enlarged; clotted blood mixed with pus; in females exhausted by nursing; after bullet wound through lung and collapse; with saltish expectoration; pleurodynia.

Hemorrhage from lungs with coughing spells; dizziness in head; eyes feel big; feels full after eating a mouthful.

Phthisis from loss of fluids and loss of vitality; copious night sweats; phthisis of drunkards.

Pleurisy in persons who have lost much blood.

Pleuro-pneumonia with profuse exudation, prostration, emaciation and pallor during confinement.

Pneumonia, and other affections of chest, symptoms being < every other day.

Chest affections in hysterical, weakly and fidgety females.

[29] **Heart, Pulse and Circulation.** Melancholy feeling about heart, with desire to take a deep breath.

Palpitation: with rush of blood to face, heat and redness

Digitized by Google

of face, with cold hands; after loss of fluids; with distension of veins; strong, violent, with feeble pulse and cold skin.

Pulse: frequent, small, hard; more quiet after meals; feeble, rapid; unequal, intermitting; quick, hard and irregular during chill and heat; slow and feeble in apyrexia; full, throbbing.

[30] **Outer Chest.** Tearing pain in sternum with cough.

Boils on chest.

[31] **Neck and Back.** ‖Shooting pains in nape of neck, which becomes, in a measure, stiff, with constrictive pain in skin over l. occiput.

‖Drawing pain at nape of neck and each side of spine, and pains in small of back as if bruised.

‖Pressure as from a stone between scapulæ.

‖Sensitiveness of spine. θAmaurosis.

Stitches in spine and shoulders.

‖Stitches in l. side of back.

‖Tensive pain in small of back, as from a heavy load, or after long stooping.

‖Insupportable pain in small of back, like a cramp, < from least movement.

‖Pain in small of back, at night, lying on it.

‖Laming, drawing, tearing pains in back and thighs.

‖Aching pain across loins. θDropsy.

‖Spinal affections with diminished sexual desire.

‖‖Perspiration on back and neck from least motion.

[32] **Upper Limbs.** ‖Aching in shoulder blades and limbs, < from least pressure; restless, wants to change position.

‖Paralytic grinding-tearing in bones of upper limbs, < by touch.

‖Spasmodic stretching of arms, with clenched fingers.

‖Hands tremble (when writing).

‖Numbness in r. arm. θProsopalgia.

‖Paleness and coldness of hands and feet, like marble, even in a warm room.

‖One hand icy cold, the other warm.

‖Veins of hands distended; swelling of back of l. hand; nails blue.

[33] **Lower Limbs.** ‖‖Hip disease, with profuse suppuration, sweat and diarrhœa.

‖Legs feel as after a long walk; uneasiness, must move them or draw them up.

Darting and tearing pain in lower limbs, < by contact.

‖Drawing pain in bones of thighs, as if periosteum had been scraped with a dull knife.

‖Pain in r. knee, up to thigh or down towards leg; pains < from contact than from motion.

Google

Hot swelling of r. knee, painful to slight touch.
Knees weak, especially when walking.
Legs and feet swollen, can hardly walk, when she walks calves of legs smart and sting. θAcute dropsy following parturition.
Sensation in lower leg as if garters were tied too tightly, and as if leg would go to sleep and become stiff.
Hard, dark red swelling on calf of leg terminating by suppuration.
Weakness of feet, as if they were bruised.
Rheumatic pains in metatarsal bones and phalanges of toes, < from contact, not from motion.
Swelling of feet; hot, arthritic; dropsical; soft swelling of soles.
Pain with swelling of big toe, < by touch and motion, especially during evening and night.
Red swelling of toe tips.

31 **Limbs in General.** A sensible though invisible trembling of all the limbs, combined with a cooling sensation.
Sensation as of a band tightly tied around different parts of leg or arm.
Numbness and deadness of limbs, they go to sleep when lying on them.
Laxity of all the limbs and trembling of hands.
Heaviness in limbs, especially thighs.
Painful weariness of joints with pressure as of a load, particularly in morning, in bed or when sitting.
Pains in limbs, as if clothing was too tight, after a walk in open air.
Pains in limbs < from slight touch, gradually increased.
Darting, tearing, < from contact, especially in hands and feet.
Limbs pain, especially joints, as if bruised, < in rest, > moving.
Parts around swollen joints very sensitive to least touch; < at night, parts feel weak.
Parts about joints are swollen and excessively sensitive to touch; < pains at night.
Tensive, extremely sensitive drawing pain in almost all the bones, now in one, now in another, which is for the moment relieved while lying, but soon returns more violent than ever.
Stiffness of limbs.
Arthritic and rheumatic, hard, red swellings.
Cold hands and feet, < by walking, with vertigo and pale face.
Emaciation, especially of hands and feet.

35 **Rest. Position. Motion.** While resting: pain in limbs and joints <.

Digitized by Google

Standing: headache compels; > pressive, drawing pain across lower portion of chest.

While seated: vertigo in occiput; weight on head, with tendency of head to fall backward; pain in forehead; throbbing at temples <: tearing, darting in various parts of head >; pressive, drawing pain across lower portion of chest; weariness and pressure in joints <; tensive pains about swollen joints; weakness <.

Lying: vertigo >; dizziness and heat in head <; headache <; jerking, tearing in several places in head >; pains in r. side of face <; oppression in pit of stomach <; swelling of feet less but oppression of chest <; tensive pains in parts about swollen joints; bone pains momentarily >; ear pains.

Lying on back: pain in small of back.

She lies upon her back, sliding down in bed. θComa.

Lying on back with head bent backward with arms crossed over head.

Lying on l. side: cough <.

Lying with head low: cough <.

Bending double: pinching in abdomen >; colic >.

Bending forward: prevented by stitches in chest.

On rising from sitting: sensation of weakness; is much inclined to sit down, even sinks back upon a chair if he does not exert the muscles.

On rising: as if he would fall backward.

Motion: vertigo <; headache <; cutting pains from temples to orbits and occiput <; bruised feeling of brain <; jerking, tearing in several places in head <; tractive pains in various parts of head <; ciliary neuralgia <; prosopalgia <; neuralgic pains of l. side of face <; toothache <; gastralgia >; cough <; stitches in chest < from sudden; cramping pain in small of back < from least; perspiration on back and neck from least; pain with swelling of big toe <; pain in limbs and joints >; disposition to perspire during.

Walking: cannot walk straight; staggering; vertigo <; headache <; constriction in head <; throbbing at temples >; headache compels; soreness of brains <; jerking, tearing in head <; darting in various parts of head <; sensitiveness of scalp < in open air; profuse sweat on head in open air; aching, stitching pains in spleen; fulness, pressing and heaviness in uterus <; pressive, drawing pain across lower portion of chest >; sticking pain in small spot below last r. ribs; weakness of knees <; calves of legs smart and sting; cold hands and feet <; weakness <; general heat <; sweats easily in open air; sensation of lightness in body; oppression in all parts of body; pains in limbs.

Digitized by Google

Stooping: cutting pains from temples to orbits and occiput <.
Moving head: stitches in head, pulsation in temples <; headache >.
On raising head: vertigo.
Opening eyes: bruised feeling of brain <.
Moving eyes: headache <; weight and darting pains in forehead.

[36] **Nerves.** ‖Excessive sensitiveness of nervous system; special senses, sight, smell, hearing and taste seem too acute; his internal sensibility is offended, and his mind is unpleasantly affected; a morbid sensation of general weakness; mental and physical languor.
‖Sensation of weakness, especially on rising from sitting; is much inclined to sit down, and even sinks back upon a chair if he does not exert the muscles; whereupon a comfortable sensation of rest follows.
‖Weakness from loss of animal fluids (blood, etc.), or after severe and exhausting illness.
‖Weakness: with coldness of skin; with inability to undergo the least fatigue; even < while sitting, still more while walking; with excessive irritability and sensibility.
Great debility; trembling; averse to all exercise; nervous; sensitive to pain, to draughts of air; sleepless; disposition to sweat during exercise or sleep; from overstudy; from loss of blood.
‖Torpor and paralytic weakness of affected parts.
‖After continued or repeated hemorrhage (subacute), occur prostration, nervous agitation, anxious manner; can hardly respire at all; very pale and ghastly; pulse failing; hemorrhage of dark blood; sensation as if it flowed warm from the heart.
‖Twitching of limbs, and jerking of single muscles.
‖Stretching, drawing, or jerking and tearing, mostly in extremities, with lameness and weakness of affected parts.
‖Fainting after loss of blood or other animal fluids, with ringing in ears, cold skin, loss of pulse, cold perspiration.
‖Convulsions: rush of blood to head, throbbing carotids; from great loss of blood, and debilitating causes.
‖Epileptic spasms far apart: deathly pallor; relaxation of muscles.
‖Chorea from great loss of arterial blood or from masturbation.
‖Paralysis: from loss of fluids; after arsenical poisoning; after onanism.

Digitized by Google

‖Complaints from loss of animal fluids.
Neuralgia of malarious origin.
Numbness of parts on which he lies.

[37] **Sleep.** ‖Irresistible sleepiness during day and after eating.
‖Constant sopor or unrefreshing sleep; worst sleep after 3 A.M.; awakens too early.
‖Sleepless, aching in head (until 12 P.M.), anxiety on waking from frightful dreams.
‖Restless sleep, night before paroxysm. θIntermittent.
‖Sleeplessness with headache or great hunger.
‖Sleepless from crowding of ideas, making plans, one can't stop thinking.
During sleep: snoring, blowing expiration; moaning, whining.
On awaking: cannot collect one's senses; vertigo; hunger; sweat; languor; unrefreshed; head hot; oppression of chest.
Pains wake her at night; < from noise and when feet get cold.
Dreams: confused, as soon as he goes to sleep.
Frightful, heavy, anxious, confused, absurd dreams; waking only half conscious; make him anxious after awaking; confused and senseless after midnight.
‖Sweating during sleep.

[38] **Time.** In morning: confusion of head; on awaking, anxious thoughts and ideas; emptiness in head as after drunkenness; languor in limbs on awaking; periodical cephalalgia of l. side; illusion of bright gold chain dangling before eyes; vision better; great pain in ulcers in course of pannus; violent pain in eye; supraorbital neuralgia of r. side; intermittent ciliary neuralgia with painful pressure and drawing in forehead and temples; facial neuralgia of l. side; putrid taste; tongue white; pains in abdomen <; thin, large stool with passage of wind; painless diarrhœa early; after rising, continual irritation to hacking cough, as from sulphur vapor; weariness and pressure in joints <; debilitating sweat.
Between 8 and 9 A.M.: violent pain in eye, which becomes inflamed.
10 A.M.: ciliary neuralgia, with painful pressure and drawing in forehead and temples.
At noon: pain in eye >.
After 12 P.M.: cough <.
In afternoon: pyrosis and heartburn; colic in region of umbilicus; pain in big toe <; sensitive swollen joints <; chill; chill and heat alternating.
During day: drowsiness; granular sputa; irresistible sleep; debilitating sweat.

Digitized by Google

In evening: full of projects and ideas; darting pains in parietals disappear; crawling inside of lids <; pressing pain in one spot at inner and upper border of orbit; thirst and hunger; pressive sensation in abdomen, followed by passage of much offensive flatus; contractive pain in testicles: oppression of chest; granular sputa; cough <; pain in big toe <; in bed he cannot get warm; chill; heat for several hours.

At night: full of projects and ideas; dread of dogs and other animals; restlessness; on awaking he does not dare to rise; colic <; worm troubles <; offensive, undigested, or white, papescent stool; diarrhœa <; frequent nocturnal emissions; dry, spasmodic or suffocative cough, as from vapor of sulphur, with bilious vomit; copious sweats; bruised feeling of brain <; headache extending to neck and teeth <; restless and sleepless; blindness; inflammation of eyes <; pain in r. side of face <; restlessness; canine hunger; oppression in pit of stomach <; pains in abdomen <; suffocative fits; pain in small of back; pains awake her.

Between 6 and 10 P.M.: pressive sensation in abdomen.

11 P.M.: pressing pain at inner and upper border of orbit, extending to nose and sometimes to lid.

At 12 o'clock at night: coldness, followed by light fever and sweat.

After midnight: confused and senseless dreams.

At 3 A.M.: asthmatic cough, followed by frothy, badly tasting expectoration; sharp stitches in r. pneumo-hepatic region.

After 3 A.M.: sleep <.

[59] **Temperature and Weather.** Current of air: neuralgic headache <; headache <; sensitiveness of scalp <; pain in upper molar teeth from taking cold; toothache <; cough < by least; patient sensitive to; < from exposure to slightest.

Open air: headache < by walking in; headache <; sensitiveness of scalp < when walking in; toothache < from; sweats easily when walking in; oppression of all parts of body after walking in; clothing as if too tight about limbs.

Entering room from open air: face hot.

In room: headache >.

External warmth: neuralgic headache >; throbbing toothache >.

Heat: anything hot in mouth, < neuralgic headache.

Heat of stove: wants to be near; chill < by.

Hot weather: diarrhœa.

In the sun: headache <.

Digitized by Google

Cold: neuralgic headache < from anything cold in mouth; violent thirst for cold water.
Cold air: sneezing when exposed to.
Cold water: great thirst for.
Wind: soreness of brain < when walking in.
Foggy weather: loss of appetite.
Wet weather: asthma <.
!After getting wet. θNeuralgic headache.
Autumn: asthma <.

[40] **Fever.** !Shivering or chilliness, with gooseflesh, after every swallow of drink.
!Coldness over whole body as if dashed with cold water.
!In evening in bed, he cannot get warm.
!Coldness every night at 12 o'clock, followed by light fever and sweat. θIntermittent.
!!Chill preceded by palpitation, anxiety, hunger, thirst, nausea, headache, debility, sneezing when exposed to cold air, oppressive colic.
!!Internal violent chill, with icy cold hands and feet, and congestion of blood to head.
!Rigors, cold perspiration and great prostration of strength. θBiliary colic.
!!Chill over whole body, increased by drinking, thirst before or after, but not during chill.
!Chill beginning in legs below knees.
!Chills on alternate days, little fever, profuse sweat; restless sleep, abdomen bloated.
!!Chill postpones or anticipates; pain in liver, which is often greatly swollen; hunger in fever, and sleepy after having eaten.
!Chill most afternoon or evening; less forenoon; never at night; paroxysms return every fourteen days.
!Wants to be near the stove, but it increases the chill.
During chilly stage, headache, congestion of head, paleness of face; pain in liver.
!Fugitive chills in back, tendency to sweat on covering up.
!Chill and heat alternating in afternoon.
!Heat of face, with cold body.
Heat for several hours in evening, without previous chilliness, with burning thirst, and succeeded by sweat.
!General heat, < by walking; long-lasting heat with sleep.
During heat: thirst, with dry mouth, burning lips; red face, delirium; distended veins; congested head; desire to uncover, but chilly when uncovered; canine hunger or aversion to food; pain in liver, back, chest and limbs.
!Heat of whole body, externally and internally, with swollen veins of arms and hands, without sweat or thirst.
!Heat over whole body, with fine, needlelike stitches in

Digitized by Google

skin, especially of throat, together with great thirst for cold water.

Fever with thirst during chill, and vomiting after the attack.

‖Marsh intermittent, with pains in region of liver, vomiting of bile and great anguish.

‖Long-lasting heat, which frequently sets in late after chill.

‖‖Hectic fever, frequent night sweats, diarrhœa, pallor; skin dry, flaccid; sleepless; nervous, hunger; after exhausting disease, loss of fluids, etc.

Thirst follows an hour after heat.

‖‖Typhoid or putrid fever in patients much reduced by loss of blood, or by malarious poisons.

‖Acute fevers, with profuse sweats.

‖She is bathed in profuse, hot perspiration. θComa.

During apyrexia: exhausting sweats, anæmic and cachectic appearance, sensitiveness in hypochondria; scanty urine; loss of appetite; bloated abdomen.

Sweat: debilitating night or morning; profuse; partial, cold or profuse, with thirst; greasy or oily on side on which one lies; less after meals.

Cold and clammy sweat with hemorrhage; sweats easily, especially at night in sleep; or when walking in open air.

‖Copious, exhausting night sweats, especially on forehead, neck and chest, slightly staining the linen, not offensive, occurring the moment patient drops into sound sleep. #Phthisis pulmonalis.

‖Great disposition to perspire during motion and sleep.

‖‖On being covered he sweats profusely all over; this is very troublesome, yet he is so sleepy with it that he cannot collect himself and get up.

‖During sweat, increased thirst.

‖Revulsion of sweat, and therefrom want of sweat, suppressed sweat.

41 **Attacks, Periodicity.** Sudden: blindness.

Spasmodic: pains in abdomen; uterine contractions; cough.

Alternate weakness and feeling of great strength, especially in joints.

Pains in organs alternate with wandering rheumatic pains.

Frequent: bleeding from nose; nocturnal emissions.

From morning until afternoon: headache from occiput over whole head.

From 1 o'clock A.M. until 10, 12 or 1 P.M.: periodical cephalalgia.

From 8 A.M. till 2 or 3 P.M.: excessive pain in eye.

Periodical: cephalalgia of l. side each morning; pressing pain in one spot in inner and upper border of orbit,

Digitized by Google

every evening about 11 o'clock; supraorbital neuralgia on r. side; ciliary neuralgia every day at 10 A.M.; neuralgia; supraorbital neuralgia; facial neuralgia of l. side; obstruction of gall bladder with colic; colic in umbilical region at certain hour each afternoon; diseases of malarial origin.

Every night: suffocative fits; at 12 o'clock, coldness, followed by light fever and sweat.

Every other day: between 8 and 9 A.M., violent pain in eye, which becomes inflamed; copious stool <; diarrhœa; symptoms of pneumonia and other chest affections <; chills, little fever, profuse sweat; congestions; neuralgia.

On alternate mornings: headache.

Every fourteen days: paroxysms of chill and fever return.

Worse during increase of moon.

Three months colic.

Asthma < in Autumn.

Day and night for years: salivation after mercury.

[42] **Locality and Direction.** Right: constriction on side of forehead; amaurosis in eye; uncontrollable twitching of upper eyelid; supraorbital neuralgia; tearing, laming, burning pain in face; numbness of arm; faceache; stitches in pneumo-hepatic region; stitches in chest up to axilla; numbness in arm; pain in knee, up to thigh or down towards leg; hot swelling of knee.

Left: periodical cephalalgia each morning; boring, pulsating pain in head; hemicrania affecting eye and neck; headache in side of head into cervical region; amaurosis in eye; tearing in outer canthus; pain over orbit; facial neuralgia; needlelike pains in face, chest and hand; tearing in testicle and side of prepuce; irritation in chest; cutting in lower abdomen; stitches in chest; stitches in cartilages of third and fourth false ribs; continuous pain in chest; constrictive pain in skin over occiput; stitches in back and side; swelling of back of hand.

From l. to r.: neuralgic headache; neuralgic pains of face.

Backward: head inclined to sink; on rising as if he would fall; tendency of head to fall; pain in temples < on leaning.

[43] **Sensations.** Melancholy feeling about heart.

As if unhampered by a material body, causing a light and airy sensation and ease of movement; as from coryza or intoxication; as if brain was rolled round; as if brain was bruised; as if brain was balancing to and fro, and was striking against skull; as if skull would burst; as if brain was pressed into a ball; as if brain was pressed

tals which descend along neck; from l. temple and eyes to whole side of face; in vagina; in lower limbs; in hands and feet; in nape of neck and spine.
Fine, needlelike stitches in skin, especially of throat.
Stitches: in head; from temple to temple; in ears; on tongue; in spleen; in rectum, also during stool; in urethra; in chest; in spine and shoulders; in l. side of back; in r. pneumo-hepatic region; in r. chest up to axilla; in l. chest; under sternum; in l. side.
Stinging: in chest and windpipe; in calves of legs; in wounds.
Paralytic grinding-tearing in bones of upper limbs.
Tearing: in various parts of head; headache extending to neck and teeth; in l. outer canthus; supraobital neuralgia of r. side; in ears; in dorsum of nose; in r. side of face extending up to parietal bone and down to clavicle; in teeth; in upper molar teeth; in vagina; in sternum; in back and thighs; in lower limbs; in hands and feet; in extremities; in l. testicle and side of prepuce.
Drawing: in head; in forehead and temples; in teeth; about ovaries; across lower portion of chest; at nape of neck and each side of spine; in back and thighs; in bones of thighs; in joints; in almost all the bones; in extremities.
Twitching: in upper molar teeth.
Tensive pain: in small of back as from a heavy load, or after long stooping; in almost all the bones; in joints.
Tractive pain: from occiput to forehead; in various parts of head.
Stretching: in extremities.
Cramping: in testicles; in small of back.
Cramp: in vertex.
Griping: in abdomen on passing flatus.
Pinching: in abdomen.
Constriction: on r. side of forehead and occiput; from l. side of temple and eyes to whole side of face; in abdomen.
Constrictive pain: in skin over l. occiput; in abdomen.
Contractive pain: in scalp; in testicles; in urethra; in uterus; spasmodic, in inner parts.
Shooting: in region of liver; in nape of neck.
Burning: in forehead; in head; in eyes; of lips; on tongue; on tip of tongue; in r. side of face; in anus; bleeding piles; at orifice of urethra.
Congestive pains: with carbonaceous caries.
Painful bearing down to vulva and anus.
Lancing pain: in r. side of face, extending up to parietal

bone and down to clavicle; through lower bowels; in back and thighs.
Sticking: in small spot below last r. ribs.
Formicating pains: in eyes and inner surface of lids.
Biting: in anus.
Pressive: frontal headache; headache extending to neck and teeth; headache in side leant upon; pain in outer canthus; in eyes; pain in one spot at inner and upper border of orbit, extending to nose and sometimes into lid; in root of nose, which extended to side; from l. temple and eyes to whole side of face; in abdomen; across lower portion of chest; in chest and windpipe; in joints as of a load.
Pressure: in forehead; towards forehead; in occiput; in head; in eyes; in forehead and temples; in teeth; in stomach; in abdomen; below navel; in uterus; in vagina; in chest, as from a violent rush of blood; between scapulæ.
Oppression: in head; of stomach and abdomen after eating; in pit of stomach; in chest; of chest, as from fulness in stomach; of all parts of body.
Tightness: about abdomen; in abdomen.
Needlelike pains: in l. face, l. chest and l. hand.
Throbbing: headache; in temples; headache extending to neck and teeth; toothache; pains, with carbonaceous caries.
Hammering: headache extending to neck and teeth.
Pulsation: in temples; in l. side of head; in pit of stomach.
Aching: in spleen; below navel; across loins; in shoulder blades and limbs; in head.
Bruised sensation: in side of head; in whole head; in small of back; in limbs and especially in joints.
Soreness: of brain; in throat on swallowing; in stomach; through lower bowels; in larynx and trachea.
Smarting: first in one, then in other eye; in eyes; in calves of legs.
Rheumatic pains: in metatarsal bones and phalanges of toes.
Distressing dull pain: in hollow tooth.
Rubbing pain: on moving lids.
Crawling: inside of lids.
Scraped feeling: in throat.
Rawness: of tongue.
Roughness: of throat.
Irritation: in chest proceeding from l. side.
Painful weariness of joints.
Lameness: of affected parts.

Digitized by Google

Weakness: of head; of part affected by neuralgia; of feet; of parts around swollen joints; of affected parts.
Stiffness: of limbs.
Uneasiness: in legs; in affected parts, is obliged to move them constantly.
Limbs go to sleep when lying on them.
Numbness: of r. arm; in decayed teeth, painful; in r. arm; of limbs; of parts on which he lies; of single parts.
Deadness: of limbs.
Tickling: in chest.
Tingling: in ears; in anus.
Itching: of eyes; eyelids; piles; of skin; in inner parts; in wounds.
Fulness: of head; of stomach and abdomen after eating; in bowels; in abdomen; in uterus; after eating a mouthful.
Weight: on head; in forehead.
Heaviness: in head; in stomach; in uterus < when walking; in limbs, especially in thighs.
Dulness: of head.
Lightness in body when walking.
Emptiness: in head; in stomach.
Languor: in limbs.
Heat: in head; of face; of external ear; of nose; in abdomen.
Coldness: in bowels; in stomach; in upper abdomen after every swallow of drink, and renewed at every inspiration; in limbs; over whole body.
Dryness: of mouth; between lids and balls; of lips; of skin.

" **Tissues.** ‖Sufferings caused by loss of fluids, such as hemorrhage, seminal emissions, diarrhœa, diuresis, excessive sweating, overlactation, etc.
Excessive sensitiveness of nervous system.
Acts upon ganglionic nervous system, producing general depression and exhaustion.
Asthenia; exhaustion of vital powers of whole organism, or of single parts, organs, systems, accompanied by excessive sensitiveness, and irritability of the nerves, or with relaxation of the solids, deficiency of animal heat, disposition to passive hemorrhage from every orifice of body, and decomposition of organic matter.
‖Muscles lax; great emaciation.
Blood thin and watery, circulation lacks energy.
In cases threatening to become anæmic; with diarrhœa or lienteria.
Chlorosis, with tendency to œdematous swellings and to dropsical effusions, from loss of vital fluids.

Digitized by Google

‖‖Disposition to hemorrhage from every orifice of body; useful after long-continued hemorrhage.
Enlarged veins.
‖Anasarca, ascites in the aged; also from liver and spleen diseases, and in drunkards, after excessive depletion.
Diseased periosteum.
Carbonaceous caries, commencing with a black spot, scrofulous or tuberculous subjects; the pain is throbbing, of a congestive nature, or caused by abuse of mercury.
‖Caries, with profuse sweat, or excessive suppuration.
Rheumatic, hard, red, inflammatory swellings; painful to touch, not to pressure.
Has a special affinity for liver and spleen, producing hyperæmia and congestion.
Glands swollen, hot, painful.
In cholera infantum after the disease has been checked, suitable on account of loss of liquids and feebleness of digestion.
Flat ulcers with copious discharge.
‖Wounds become black and gangrenous; humid gangrene.
Collapsed states, with waxy paleness and coldness of skin.
‖‖Jaundice.
‖‖Diseases of malarial origin with marked periodicity.

[46] **Touch. Passive Motion. Injuries.** Touch: scalp painful to; headache < by slightest; ciliary neuralgia <; tearing in ears < from least; neuralgia, skin sensitive to least; prosopalgia <; neuralgic pains of l. side of face <; toothache < from least; stomach very sensitive to; pain in hepatic region <; tenderness and pain in region of liver; ovaritis, parts very sensitive to slight; painful induration in vagina < from slightest; stomach sensitive to; cannot bear percussion or auscultation; stitches in chest <; pains in upper limbs <; pains in lower limbs <; r. knee swollen and painful to slight; rheumatic pains in metatarsal bones and phalanges of toes <; pain in big toe <; pain in limbs < from slight; darting, tearing, especially in hands and feet, <; parts about swollen joints very sensitive to least; rheumatic swellings painful to; affected parts sensitive to least; during the pains she is sensitive to.
Light touch on larynx aggravates cough.
Cannot have the hands touched.
Pressure: pressure in forehead < from firm; stitches in head and pulsation in temples < by hard; headache > from hard; sensitiveness of scalp > by strong; parts affected by supraorbital neuralgia intolerant to; region of liver sensitive to least; gastric region painful to; sticking pain in small spot below last r. ribs from

Digitized by Google

slightest; aching in shoulder blades and limbs < from least.
Desire to uncover, but chilly when uncovered.
Numbness of parts upon which he lies.
Itching of parts upon which one is lying, > by lying on another part.
Pain in external ear when lying on it.
Rubbing of clothes: burning at orifice of urethra < from.
Rubbing: pain in eyes compels constant.
Scratching: sensitiveness of scalp > by; bleeding of skin after; nettlerash after.
Pinching: unconsciousness to.
Pressing teeth together > toothache.
Petting, caressing, etc.: < ill humor.
Jarring: headache < from.

46 **Skin.** ‖Excessive, almost painful sensitiveness of skin of whole body, even of palms of hands.
Skin: dry, flaccid; waxy pale or yellow; itching, bleeding after scratching; cold and blue.
The sweat parboils the skin.
‖Yellow color of skin. θJaundice.
Boils on chest; pimples on loins, arms and chest.
‖Ulcers ichorous, sensitive; ichor has a putrid smell.
‖Ulcers flat, shallow, copious discharge.
Erysipelatous swelling of whole body; nettlerash coming out after scratching.
‖Smallpox, pustules black; variola hemorrhagica, with great exhaustion from copious painful stools.
‖Psoriasis and ichthyosis.
Pemphigus.
Humid gangrene.

47 **Stages of Life, Constitution.** Persons who are highly sensitive to pain, of querulous or discontented disposition.
Suitable to persons of swarthy complexion.
Old women after menopause; pleurisy, dropsy.
Useful for weakly persons, who have lost much blood or other vital fluids.
Useful for faceaches of chlorotic, anæmic, leucophlegmatic, scrofulous subjects, and sometimes also in those of arthritic patients.
Child, æt. 2 weeks, prematurely born; jaundice.
Girl, æt. 2, good constitution, lymphatic temperament, diphtheritic laryngitis with night sweat.
Boy with hip disease; profuse suppuration.
Boy, æt. 12; intermittent fever.
Girl, æt. 12, suffering some years; chills and fever.
Young girl, æt. 15, has not menstruated; hemicrania.
M. T., æt. 17, weaver, after severe illness four years ago,

Digitized by Google

during which he was frequently bled; debility and dropsy.

Mrs. M., æt. 20, recently married: intermittent fever.

A blooming girl, now pale and thin; toothache.

M., strong, slender, blonde; neuralgic headache after getting wet.

Robust young man; mania in intermittent.

Young man, pale, cachectic appearance, suffered for ten weeks from quartan ague; enlarged spleen.

Woman, æt. 23, married one year; bloody leucorrhœa of five years standing.

Woman, æt. 23, eight days after second confinement; pleuro-pneumonia.

Woman, æt. 25, slender build, mother of two children; prosopalgia.

Man, æt. 30, strictly moral; morbid sexual desire, with morbid craving for dainties.

M. A., æt. 30, periodical cephalalgia.

Hysterical woman; jaundice.

A thin, weakly woman; rheumatic ophthalmia during confinement.

A woman in fourth month of pregnancy; miscarriage.

Woman, after confinement; ascites.

Lymphatic, scrofulous woman; rheumatic ophthalmia during lactation.

Woman, æt. 34, phthisical habit; pneumonia after venesection.

Hannah P., æt. about 35, complexion dark, medium height, had a child five weeks ago, and had for some months past pain in loins; never had rheumatism; heart normal; acute dropsy following parturition.

Woman, æt. 36, blonde, delicate, hysterical; prosopalgia after massive doses of quinine in cholera.

Woman, æt. 37, small, thin, delicately formed, of a highly nervous organization, mother of several children, operation for strangulated hernia and formation of artificial anus.

Man, æt. 40; gonorrhœal iritis.

Man, æt. 40, subject to hemorrhoids; rheumatism of thigh.

Weakly woman, æt. 40; hæmatemesis after carcinomatous ulcer in stomach.

Woman, æt. 40, nursing tenth child; hæmoptysis.

Man, æt. 43, blacksmith, tall, dark hair, had phthisis ten years; hemorrhage from lungs of four weeks duration.

Woman, æt. 45, large, weighing 180 pounds, leucophlegmatic temperament; intermittent fever.

Woman, æt. 48; typhoid fever.

Man, æt. 50; amaurosis from sexual excess and alcoholism.

Digitized by Google

A wiry, intense, active, planning, business man, æt. 50; morning diarrhœa.

Two men, one æt. 50, the other 55, both full blooded; erysipelas of face and hairy portion of head.

Woman, æt. 50, weakly constitution, lively temperament; menorrhagia.

Woman, æt. 52; rheumatism.

Woman, æt. 60, thin and emaciated, subject to gastralgia; hæmatemesis.

Married woman, æt. 64; biliary calculi.

An old woman, reduced by care and poverty; pneumonia following intermittent.

Man, æt. 70, retired farmer; diarrhœa of twenty years standing.

Man, æt. 70; nocturnal rheumatism in hip.

Lady, æt. 80; coma.

Man, æt. 81; painless diarrhœa.

Relations. Antidoted by: *Aran. diad.*, *Arnica*, *Arsen. Carb. veg.*, *Eup. perf.*, *Ferrum*, *Ipec.*, *Laches.*, *Mercur.*, *Natr. mur.*, *Nux vom.*, *Pulsat.*, *Rhus tox.*, *Sepia*, *Sulphur* and *Veratr.*

It antidotes: *Arsen.*, *Calcar.*, *Chamom.*, *Coffea*, *Ferrum*, *Helleb.*, *Iodium*, *Mercur.*, *Sulphur* and *Veratr.*

Is useful in bad effects from excessive tea drinking, and after abuse of *Chamomile* tea when hemorrhage from uterus results.

Compatible: *Calc. phos.* (follows well in hydrocephaloid); *Ferrum.*

Incompatible: after *Digit.* (increases anxiety); after *Selen.*

Complementary: *Ferrum.*

Compare: *Arsen.* (great prostration without pain, black stools); *Carb. veg.* (diarrhœa); *Coloc.* (beer intoxicates easily; *Cedron.* (intermittents); *Cupr. ac.* (black, thin, watery stools); *Pulsat.* (bitter taste, etc.); *Stramon.* (black stools); *Sulphur* and *Sulph. ac.* (sensation as if brain was balancing to and fro and was striking against skull, occasioning pains).

[1] **Mind.** Indisposition for mental labor.
Sensation of fulness of head from mental application.
Forgetfulness (forgets things he has to do.)
Fretful, easily provoked, irritable.
Desire to be alone.
I Mind clear and cheerful.
Exhilaration.

[2] **Sensorium.** I Dizziness: in morning after rising; when stooping; with nausea.

[3] **Inner Head.** Dulness and heaviness of head, with ringing in ears after dinner and late in evening.
I Fulness in head; eyes are reddened.
II Congested sensation over whole head, principally forehead.
II Congestion of blood to head, particularly to vertex; < after eating.
I Sensation as if touched by a cold metallic body, on a small space over root of nose.
Feeling like a vise or band around head, cutting, shooting pain in forehead, aching in superciliary ridge of r. eye, extending to back of head, with nausea.
I Pressing in forehead with sensation of congestion.
I Dull pain in forehead, which is cold; > by heat.
I Tearing pain in forehead, before catamenia.
I In morning, after waking, pain in forehead and top of head; < when lying on l. side and back; > and going off when turning on r. side, and after rising.

Google

Dull pain in l. temple and side of head.
Shooting pain in l. side of head, with increase of saliva and great flow of urine.
Pain from back of head to forehead with vertigo, cannot grasp ideas; shooting from occiput forward.
Intense headache; cannot raise his head from pillow; > by external pressure.
Headache with nosebleed.

Outer Head. The bones of skull, the scalp, and even the hair are painfully sensitive to touch.
Tensive, stinging pains in ears, cheeks, temples and sides of head, extending to occiput and nape of neck, with swelling of parotids and face. θCatarrh of bladder.

Sight and Eyes. Dimness and opacity of cornea.
Marked photophobia and lachrymation, with redness.
Redness of whole eye, with swelling of face.
Shooting pains through eye into head.
Sharp, stitching, stinging, or dull, aching pain above eye, extending from internal to external canthus, or runs around eye; pain may extend into eye or up into head.
Inflammation of r. eye; itching, pressing and pricking at inner angle and lower lid; constant lachrymation on looking steadily, with profuse discharge of mucus from nose.
Shooting pains in inner canthus of r. eye, with burning and itching.
Outer half of l. eye injected and puffy; pains severe, seeming to run around the eye, < at night.
Sticking pain about punctum lachrymale of upper eyelid.
Lids so heavy that they are kept open with difficulty, < in evening.
Asthenopia, with pain extending from inner canthus around eye, with soreness over exit of supraorbital nerve, < in morning.
Conjunctivitis and blepharitis, discharge < in morning.
Kerato-iritis and uncomplicated iritis, especially in syphilitic variety, and if condylomata are present on iris, or on lids; < at night; pain intermitting.
Keratitis.
Soreness along course of supraorbital nerve and corresponding side of head, < at night.
Ciliary neuralgia.

Hearing and Ears. Roaring in ears, with swelling of face (after eating).
Scurfy eruption in r. external ear.
Itching in r. ear.

Smell and Nose. Sensation on bridge of nose similar to that produced by touching it with a metallic substance.

Google

‖Uneasy creeping and pressive sensation about ossa nasi, lasting about an hour; the sensation experienced by most persons on putting on a pair of heavy spectacles, if not accustomed to wear them.

‖Sensation of weight and pressure at root of nose, zygoma and temples. θCatarrh.

Itching of nose, with bleeding (very dark blood) after blowing it.

‖Coryza, with lameness of thighs and aching pain in small of back; lumps of dirty yellow mucus are discharged from posterior nares.

[8] **Upper Face.** ‖Hot face, which is much swollen, mostly about eyes.

[9] **Lower Face.** Corners of mouth chapped.

[10] **Teeth and Gums.** ‖Right molars and bicuspids (some decayed) feel soft, heavy, and too large, at 8 P.M. and at 2 or 3 A.M.; sensation comes and goes gradually.

On biting teeth together, second r. upper decayed molar feels as if it would fly to pieces.

[11] **Taste and Tongue.** ‖Taste: metallic; bitter (in morning), putrid.

Tongue coated white in morning.

[12] **Inner Mouth.** Soreness in roof of mouth.

A small ulcer on roof of mouth, on r. side of tip of tongue.

‖Salivation; increased flow of saliva and of urine. θInflammatory affections of mouth and fauces.

‖Inflammation with great dryness in mouth and throat, < at night, which causes him to drink often.

‖Dryness and irritation of throat at night, with soreness in morning, secretion of tenacious mucus during day, inclination to empty deglutition.

Scanty, tenacious, pasty saliva in mouth, without thirst; > after drinking.

[13] **Throat.** ‖Inflammation, with great dryness of throat and mouth; < at night.

‖Contracting pain in throat during empty deglutition.

‖Fulness in throat causing a constant desire for swallowing.

‖Dryness and irritation of throat (posterior nares, tonsils, fauces) at night, with soreness during day; in morning, secretion of tenacious mucus, in lumps, from posterior nares.

‖Increased dryness of throat and mouth, being obliged to moisten and rinse mouth every time he wakes.

[14] **Appetite, Thirst. Desires, Aversions.** Want of appetite with aversion to food.

[15] **Eating and Drinking.** After eating, great discomfort and feeling of distension and pressure in upper abdomen, with flushes of heat.

Digitized by Google

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea: with waterbrash; alleviated by eructations and vomiting.

[17] **Scrobiculum and Stomach.** Soreness in stomach, with dizziness and lightness in head, and tightness in temples.

Flatulence of stomach; with irregularity of stools.

[19] **Abdomen.** Griping colic, followed by soft, mushy stools.

Tapeworm.

Syphilitic buboes, indurated, not very sensitive or inflamed; surrounding glands also swollen.

[20] **Stool and Rectum.** Irregularity of passages.

Bloody dysentery.

Green, mucous diarrhœa which stains the skin about the anus and scrotum a copper color.

Thin stools with tenesmus.

Nightly painful diarrhœa.

Sensation of formication in anus, as if from a large worm.

Little pimples around anus, with burning and itching.

Protrusion of anus during stool.

[21] **Urinary Organs.** Frequent and increased emission of watery urine; also during night.

Pain, as if from a sore in urethra when urinating; this pain wakes him up at night.

Albuminuria.

[22] **Male Sexual Organs.** Increased sexual desire with violent erections, particularly in evening.

Swelling of penis and twitching in it.

Great redness of urethra with pinching pain.

Pain in urethra on urination.

Violent itching of corona glandis, with profuse secretion of pus.

Small, shining red points on glans penis.

A lentil-sized swelling surrounded by a reddish-yellow circle, on glans penis, near urinary meatus; several reddish-yellow lentil-shaped discolorations on glans and prepuce.

Redness and swelling of prepuce with painful itching.

Warts on prepuce, frænum and inner surface, bleeding when touched.

Phimosis, with profuse, fetid, dirty, puslike discharge.

θSecondary syphilis.

Syphilitic phimosis, prepuce terribly swollen, purplish and ulcerated, with fetid, gangrenous odor.

Red, swollen chancres with hard, elevated edges, not sensitive, discharging thin pus.

Indurated or neglected chancres.

Indurated chancre on middle of penis.

Round chancre above corona glandis as large as a pea, surrounded by a red circle; three red patches on glans

Digitized by Google

penis and prepuce, resembling in color the eruptions of scarlatina.

‖Gonorrhœa of very long standing, with much pain and soreness during urination; yellowish-green discharge.

Gonorrhœa on a sycotic basis, or complicated with syphilis.

Blennorhœa of glans penis.

‖‖Sycotic excrescences.

‖Indurated testicles.

[23] **Female Sexual Organs.** ‖A few days before appearance of menses, and during their continuance, tearing pain in forehead, sensation of weakness in eyes, rending in spine, tearing pains and cramps in bowels, with diarrhœa and great prostration.

Leucorrhœa, the discharge of which causes a pressure or laborlike pain in vagina.

[24] **Pregnancy. Parturition. Lactation.** ‖Shooting across abdomen, either r. to l. or l. to r., during pregnancy.

‖Long-continued false labor pains, child's head pressed against symphisis pubis with violent tenesmus in anus.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness in evening.

‖Syphilitic laryngeal ulcers, torpid, and associated with tuberculosis.

[27] **Cough.** Cough from tickling in throat.

[28] **Inner Chest and Lungs.** Dyspnœa with heat.

Chest oppressed, feels contracted; > by stretching himself.

Oppression of chest awakens after midnight.

Pain running over ensiform cartilage from seventh rib on r. side diagonally through chest to back.

[29] **Heart, Pulse and Circulation.** Pulse slower in forepart of day, accelerated in evening.

[30] **Outer Chest.** Red spots and points on neck and chest, changing to little blotches.

[31] **Neck and Back.** The muscles of back part of neck seem as if contracted.

‖Pain in back of neck shooting to occiput, with stiffness and hard swelling of glands at back of neck.

Aching in small of back as if bruised, with coryza.

Sudden stitches and tearing pains on each side of spine, in back and lumbar region.

Pain all over back down to loins, < on drawing a long breath.

[32] **Upper Limbs.** Pain in l. shoulder, between clavicle and scapula, interiorly.

Periodical shooting pains in arms.

Pain in upper part of r. arm, as if it would break.

Sensation of lameness in r. arm.

Numbness of l. arm, from elbow to end of little finger.

Digitized by Google

Sensation as if "cazy-bone" had been struck.
Joints of fingers and knuckles are red and hot.
Œdema of r. arm.

[33] **Lower Limbs.** Shooting, drawing and aching pains in thighs, from hip joints nearly down to condyles; < at night. θIschias rheumatica and syphilitica.
Lameness of thighs with coryza.
Violent itching on inside of thighs, knees and legs; < on knees, especially at night.
Profuse, offensive sweat between thighs (when walking).
Painful twitching in leg, awakens from sleep at night.
Rheumatic pain in r. knee joint; < when walking (ascending), > at rest.
Tearing pain in legs below knees.
Coldness in joints.
Nodes on shin bones.
Pain in tendo-achillis and os calcis after walking.
Pressure and feeling of numbness in foot.
Coldness of feet, day and night.

[34] **Limbs in General.** Chilliness and lameness in arms and legs.
Wandering gout.

[35] **Rest. Position. Motion.** At rest: rheumatic pain in r. knee joint >.
Lying on back: pain in forehead and top of head <.
Lying on l. side: pain in forehead and top of head <.
Turning on r. side: > pain in forehead and top of head.
After rising: pain in forehead and top of head >.
Stretching: > oppression and contracted feeling of chest.
Stooping: dizziness.
Walking: profuse, offensive sweat between thighs; rheumatic pain in r. knee joint <.
After walking: pain in tendo-achillis and os calcis.

[36] **Nerves.** General nervous, uneasy sensation.
Great lassitude, prostration, and feeling of lameness in limbs.
Weariness, languor, tiredness and prostration; < before eating, > when riding in open air.
Sensation of lameness in all the limbs.

[37] **Sleep.** Sleepiness in daytime and sleeplessness at night; unconquerable desire to sleep after dinner and early in evening.
Restlessness and sleeplessness at night, from a constant flow of ideas changing from one thing to another.
Wakes suddenly after midnight with oppression of chest.
Restless sleep, with vivid dreams and much talking.

[38] **Time.** In morning: dizziness, after rising; pain in forehead and top of head after waking; soreness over exit of

Digitized by Google

supraorbital nerve <; discharge of blepharitis <; tongue coated white; soreness of throat; pulse slower; metallic taste.

In forenoon: flashes of heat in abdomen with great flatulency.

At noon: perspiration <.

After dinner: ringing in ears, with dulness and heaviness of head; unconquerable desire to sleep; symptoms >.

During day: secretion of tenacious mucus, inclination to empty deglutition; soreness of throat; sleepiness.

Early in evening: unconquerable desire to sleep.

In evening: heaviness of lids <; increased sexual desire with violent erections; hoarseness; pulse accelerated.

At 8 P.M.: r. molars and bicuspids feel soft, heavy and too large.

Late in evening: dulness and heaviness in head with ringing in ears.

At night: pain of l. eye <; kerato-iritis and uncomplicated iritis <; soreness along course of supraorbital nerve and corresponding side of head <; inflammation with dryness in mouth and throat <; dryness and irritation of throat; painful diarrhœa; frequent and increased emission of watery urine; pain in urethra wakes him up; pains in thighs <; violent itching on inside of thighs, knees and legs <; painful twitching in leg awakens from sleep; sleepless; restlessness and sleeplessness from a constant flow of ideas; internal and external heat of body.

After midnight: awakens suddenly with oppression of chest.

At 2 or 3 A.M.: r. molars and bicuspids feel soft, heavy and too large.

[39] **Temperature and Weather.** In open air: weariness, languor, tiredness and prostration > when riding; symptoms >.

In warm room: coldness and chilliness.

Heat: > dull pain in forehead, which is cold.

Worse in Summer.

[40] **Fever.** Coldness and chilliness in warm room.

Internal and external heat of body during whole night.

Flushes of heat confined to abdomen, with great flatulence; < in forenoon.

Nightly fever with dry mouth.

Perspiration most at noon.

[41] **Attacks, Periodicity.** Frequent emissions of watery urine.

Intermitting: pain of kerato-iritis and uncomplicated iritis.

Digitized by Google

Coming and going gradually: sensation as if r. molars and bicuspids were soft, heavy and too large.
Lasting about an hour: uneasy creeping and pressive sensation about ossa nasi.
Long continued: false labor pains.
During whole night: internal and external heat of body.
Nightly fever with dry mouth.
Periodical: shooting pains in arms.
Day and night: coldness of feet.

[42] **Locality and Direction.** Right: aching in superciliary ridge of eye; inflammation of eye; itching, pressing and pricking at inner angle and lower lid; shooting at canthus of eye, with burning and itching; scurfy eruption in external ear; itching in ear; molars and bicuspids feel soft, heavy and too large; second upper decayed molar feels as if it would fly to pieces on biting teeth together; small ulcer on side of tongue; pain in middle of upper part of arm, as if it would break; sensation of lameness in arm; œdema of arm; rheumatic pain in knee joint; itching of palm of hand; red eruption, sometimes with pustules filled with yellow matter, under knee; nostrils somewhat tumefied.
Left: dull pain in temple and side of head; shooting pain in side of head; outer half of eye injected and puffy; severe pains seeming to run around eye; pain in shoulder, between clavicle and scapula, interiorly; numbness of arm, from elbow to end of little finger; itching of side of face.
From r. to l. and from l. to r.: shooting across abdomen during pregnancy.

[43] **Sensations.** General nervous, uneasy sensation.
As if touched by a cold metallic body on a small space over root of nose; as of a vise or band around head; as of congestion in forehead; as of putting on a heavy pair of spectacles; as if r. molars and bicuspids were soft, heavy and too large; as if second r. upper decayed molar would fly to pieces on biting teeth together; as if upper abdomen was distended; as of a large worm in anus; as if a sore was in urethra when urinating; as if chest was contracted; as if muscles of back part of neck were contracted; as if bruised in small of back; as if upper part of r. arm would break; as if pimples were coming out over body; as if crazy-bone was struck.
Pain: in forehead and top of head; from back of head to forehead; severe, running around l. eye; from inner canthus around eye; in urethra on urinating; running over ensiform cartilage from seventh rib on r. side diagonally through chest to back; in back of neck

Digitized by Google

shooting to occiput; all over back down to loins; in l. shoulder, between clavicle and scapula, interiorly; in upper part of r. arm; in tendo-achillis and os calcis.
Cutting: in forehead.
Sudden stitches: on each side of spine, in back and lumbar region.
Stitching: above eye, from internal and external canthus, or runs around eye; may extend into eye, or up into head.
Sticking: about punctum lachrymale of upper eyelid.
Stinging: in ears, cheeks, temples and sides of head, extending to occiput and nape of neck; above eye, from internal to external canthus, or runs around eye; may extend into eye or up into head.
Pricking: at inner angle and lower lid of r. eye.
Shooting: in l. side of head; from occiput forward; in forehead; through eye into head; at inner canthus of r. eye; across abdomen during pregnancy; in arms; in thighs, from hip joints nearly down to condyles.
Tearing: in forehead; in bowels; on each side of spine, in back and lumbar region; in legs below knees.
Rending: in spine.
Drawing: in thighs, from hip joints nearly down to condyles.
Burning: in inner canthus of r. eye; around anus; of skin.
Soreness: over exit of supraorbital nerve; along course of supraorbital nerve and corresponding side of head; in roof of mouth; of throat; in stomach.
Sharp pains: above eye, from internal to external canthus, or runs around eye; may extend into eye or up into head.
Irritation: of throat.
Pressure: over root of nose, zygoma and temples; in upper abdomen, after eating; in vagina; in foot.
Pressing: in forehead; at inner angle and lower lid of r. eye.
Pressive sensation: about ossa nasi.
Oppression: of chest.
Pinching: in urethra.
Cramps: in bowels.
Contracting pain: in throat during empty deglutition.
Tensive pains: in ears, cheeks, temples and sides of head, extending to occiput and nape of neck.
Laborlike pain: in vagina.
Rheumatic pain: in r. knee joint.
Aching: in superciliary ridge of r. eye, extending to back of head; in small of back; in thighs, from hip joints nearly down to condyles.

Digitized by Google

Tightness: in temples.
Fulness: of head; in throat, causing constant desire for swallowing.
Heaviness: of head.
Weight: over root of nose, zygoma and temples.
Congested sensation over whole head, principally forehead.
Lightness: in head.
Dulness: of head.
Dull pain: in forehead; in l. temple and side of head.
Painful twitching: in leg.
Twitching: in penis.
Tickling: in throat.
Formication: in anus.
Creeping: about ossa nasi.
Numbness: of l. arm, from elbow to end of little finger; in foot.
Weakness: in eyes.
Lameness: of thighs; in r. arm; in arms and legs; in all limbs.
Uneasiness: about ossa nasi.
Painful itching: of prepuce.
Violent itching: of corona glandis; on inside of thighs, knees and legs; < on knees.
Itching: of eyelids, outer canthi; ears, face (l. side), palm of r. hand; inside of thighs; on knees, legs and shoulders; of skin; occasionally, in eruption under r. knee; at inner angle and lower lid of r. eye; in inner canthus of r. eye; in r. ear; of nose; around anus.
Dryness: in mouth and throat.
Coldness: of forehead; in joints of feet.

" **Tissues.** Syphilis; gonorrhœa and sycotic excrescences.
Wandering gout.

" **Touch. Passive Motion. Injuries.** Touch: bones of skull, scalp and even hair painfully sensitive to; causes bleeding of warts on prepuce, frænum and inner surface.
Pressure: > intense headache.
Scratching: < burning and itching of skin.
On biting teeth together: second r. upper decayed molar feels as if it would fly to pieces.
Riding in open air: > weariness, languor, tiredness and prostration.

" **Skin.** Itching of nose (bleeding after blowing it), of eyelids, canthi (outer), ears, face (l. side), palm of hand (right), thighs (inside), knees, legs, at anus (at night), on shoulders (evening).
Burning and itching of skin, < after scratching.
Redness of skin; red spots on skin.
Sensation as if pimples were coming out over body.

Digitized by Google

Eruption of red points, spots and pustules.
Red, papulous eruption, without itching, on both elbows.
‖Red eruption on finger, sometimes with pustules filled with yellow matter; the same under r. knee, with occasional itching.
‖Chronic impetigo, pustules and scabs on upper lip, immediately under nose; r. nostril also somewhat tumefied.
‖Gangrenous ulcerations; fiery, angry-looking ulcers.
θSycosis.
‖Honeycombed ulcers; fistulous.
Elevated ulcers, which have the appearance as if condylomata would grow out of them.

[47] **Stages of Life, Constitution.** Combination of scrofula with syphilis or sycosis, or syphilis and tuberculosis.
Syphilis complicated by scrofula, or previous mercurial treatment.
Arthritic patient addicted to spirituous liquors; prosopalgia, parotitis and vesical catarrh.
Girl, suffering from dysmenorrhœa; tapeworm.
Man, æt. 28, sanguine temperament, scrofulous; secondary syphilis.
Man, æt. 29, syphilitic phimosis.

[48] **Relations.** Antidoted by *Cinchon.*, ‖*Hepar*, ‖*Nitr. ac.*, *Opium*, ‖*Sulphur.*
Compare: *Camphor* (red spots); *Laches.; Mercur.; Nitr. ac.* and *Thuya.*

CINNAMOMUM.

Cinnamon. *Lauràceæ.*

The symptoms marked — are from the *Cinnamomum Cassia* (from Eastern Asia), the variety in general use as a spice in this country. The genuine *Cinnamomum Zeylanicum* (from Ceylon) was very rarely found in the apothecary shops of Philadelphia.

CLINICAL AUTHORITIES.—Allen's Encyclopedia, vol. 3, p. 333; E. Darwin Jones, Albany, N. Y., poisoning of a child; Ersch and Gruber; Strumpf, vol. 1, p. 666; Frank, vol. 2, p. 695, vol. 4, p. 110; Tanner, Lancet, Oct., 1853; Hirschel's Archiv, vol. 1, p. 195; Chaumier, Br. Quart, vol. 14, p. 693.

[1] **Mind.** — Anxiety.
— Child screams and weeps until midnight.
‖ Forgetfulness.

[2] **Sensorium.** ‖ Great stupor. θ Hysteria.
Vertigo, with weakness and oppression of breathing.
Fainting.

[3] **Inner Head.** ‖ Head severely affected, with oppression of chest. θ Hysteria.
— Complained bitterly of headache; child, æt. 18 months.
Headache and apoplectic attacks.

[4] **Outer Head.** — Head and face hot as an oven; feet cold.

[5] **Sight and Eyes.** ; Improves weakness of vision.
— Pain from l. eye up to vertex in a line along the middle.
Itching of the eyes.

[6] **Hearing and Ears.** — Heat around l. ear.

[7] **Smell and Nose.** Frequent attacks of nosebleed; child æt. 3; t.; tough mucus from nose.

[8] **Upper Face.** — Whole face turned red.

[10] **Teeth and Gums.** Toothache.

[11] **Taste and Tongue.** ‖ Nothing brought on the attacks more surely than talking. θ Hysteria.

[12] **Inner Mouth.** Offensive taste in mouth.
Ptyalism, particularly with pain in back.

[13] **Throat.** Sore throat.

[14] **Appetite, Thirst. Desires, Aversions.** — Canine hunger, with nausea and debility when passing the meal hour.
Want of appetite, with diarrhœa and acidity of stomach.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖ Belching, with colic.
‖ Each attack subsides with a dozen eructations, soon, however, returning. θ Hysteria.

Digitized by Google

— Nausea while riding, with gagging and vomiting of mucus.
— Nausea with weakness and vomiting of mucus, 2 to 3 P.M.
— Nausea and retching every day at same hour for four days.
Chronic vomiting.
‖Paroxysms subside as soon as vomiting sets in. θHysteria.

[17] **Scrobiculum and Stomach.** Hiccough with diarrhœa; want of appetite and acidity of stomach.
: Has a tonic effect upon stomach.
Pressure and cramps in stomach.

[18] **Hypochondria.** : Obstructions or induration of liver.

[19] **Abdomen.** Much flatulence, with colic and pain in uterus.
Metastasis of gout to stomach and intestines.

[20] **Stool and Rectum.** Diarrhœa: always < after drinking; with acidity of stomach; long-continued constipation with fever and urging to stool.
— Stool first of hard balls, then soft and easily evacuated.
Hemorrhage from bowels, occurring especially after any physical exertion, even running across the room; blood bright red and clear; child, æt. 3; t.

[21] **Urinary Organs.** Retention of urine.

[22] **Male Sexual Organs.** Excessive irritability of sexual organs; causes erections.
Impotence; sensation of weakness in legs.

[23] **Female Sexual Organs.** Uterine pains.
‖Menses regular every four weeks, each period, however, lasting eight days longer than usual, and followed by leucorrhœa.
‖Menses too early and too profuse, particularly in females troubled with itching of nose and nightly restlessness, profuse flow of red blood.
Irregular menstruation.
‖Menorrhagia depending upon chlorosis or anæmia.
‖After a false step or a strain in loins, profuse flow of bright red blood.
‖‖Chronic metrorrhagia.
‖Chronic leucorrhœa.

[24] **Pregnancy. Parturition. Lactation.** Vomiting of pregnancy.
‖Hemorrhage during or after gestation from lifting, straining, overstretching the arms, or taking a false step.
‖Hemorrhage during pregnancy, threatening abortion.
Weak, ineffectual or false labor pains, spasms, twitchings, or syncope during labor.
Complete cessation of labor pains.
Mitigates the severity of labor.
‖Severe metrorrhagia in primipara after the first few pains,

Digitized by Google

when the os had dilated about an inch; placenta descended with the head.

‖‖Repeated small hemorrhages during puerperal state.

‖‖Metrorrhagia some days after delivery, unaccompanied by plethora.

‖Three hours after birth convulsions followed the tearing of the cord; after subsidence of the spasms, violent hemorrhage.

To lessen severity of after-pains

[25] **Voice and Larynx. Trachia and Bronchia.** Hoarseness with cough.

: It clears the voice when muffled by secretions, scatters the phlegm, and is useful for tickling in larynx.

[26] **Respiration.** Oppressed breathing, with vertigo and weakness.

[28] **Inner Chest and Lungs.** ‖Pain in shoulders and side. θRheumatic catarrh.

Pain in chest.

‖Anxiety and oppression in præcordial region, causing constriction of chest. θHysteria.

[29] **Heart Pulse and Circulation.** ‖Great cardiac anxiety with attacks. θHysteria.

: Heart affections; strengthens heart.

‖Loss of pulse during attack. θHysteria.

[31] **Neck and Back.** Pains in small of back, with ptyalism.

[33] **Lower Limbs.** Sensation of weakness in feet. θImpotence.

Pain in muscles (myalgia).

Erysipelas with ruptured vesicles on r. leg.

[35] **Rest. Position. Motion.** Hemorrhage from bowels after any physical exertion; even running across room.

After a false step or a strain in loins, profuse flow of bright red blood.

Hemorrhage during or after gestation from lifting, straining, overstretching arms, or taking a false step.

[36] **Nerves.** Nervous weakness without fever; syncope, hysterical attacks after loss of fluids.

Trembling of limbs.

‖‖Insensibility occurred with each attack. θHysteria.

Spasmodic nervous affections; epilepsy; paralysis.

[37] **Sleep.** Profound sleep with attacks. θHysteria.

[38] **Time.** Canine hunger with nausea and debility when passing meal hour.

2 to 3 P.M.: nausea, with weakness and vomiting of mucus.

In evening: great fever.

Child screams and cries until midnight.

[40] **Fever.** : Chilliness with trembling of limbs.

— Great fever in evening.

— Transient heat with sweat.

Digitized by Google

Nervous and typhoid fevers, with great impairment of digestion, vomiting, diarrhœa and exhaustion.

[41] **Attacks, Periodicity.** Frequent: attacks of nosebleed; small hemorrhages during puerperal state.

Transient: heat with sweat.

Long-continued constipation with fever and urging to stool.

Every day at same hour for four days, nausea with retching.

Menses regular every four weeks, each period, however, lasting eight days longer than usual.

Chronic: vomiting; metrorrhagia; leucorrhœa.

[42] **Locality and Direction.** Right: ruptured vesicles on leg.

Left: heat around ear; from eye to vertex.

[43] **Sensations.** Pain: from l. eye to vertex in a line along middle; in back; in uterus; in shoulders and side; in chest; in small of back; in muscles; in bones.

Anxiety: in præcordial region; in heart with hysterical attacks.

Oppression: of chest; of respiration; in præcordial region.

Pressure: in stomach.

Aching: of teeth.

Cramps: in stomach.

Constriction: of chest.

Formicating pains.

Tickling: in larynx.

Weakness: in legs; in feet.

Heat: of head; face; around l. ear.

Coldness: of feet.

Itching: of eyes; of nose.

[44] **Tissues.** Hemorrhages, particularly uterine; too copious evacuations, exhaustion.

Bone pains, and caries.

Ascites and anasarca.

[45] **Touch. Passive Motion. Injuries.** — Nausea while riding, > by getting out of wagon, < by getting in.

While riding: nausea, with gagging and vomiting of mucus.

: Snake bites.

[47] **Stages of Life, Constitution.** Lymphatic, feeble, cachectic women, with lax tissues and languid circulation.

A woman advanced in years; hysterical convulsions.

[48] **Relations.** Antidoted by: *Acon.* (fever and anxiety).

It antidotes: *Opium.*

Compare: *Silic.*

CISTUS CANADENSIS.

Rockrose; Iceplant; Frostweed. *Cistaceæ.*

"It is an old, popular medicine in this country for all kinds of scrofulous diseases.

It grows on low, dry, mica slate hills and serpentine rocks. It is abundant at the foot of Pine Rock, New Haven, on the barren plains, and seems to be dependent on the presence of talc (magnesia).

It is said that in the months of November and December these plants send out near the roots broad, thin, curved ice crystals, about an inch in breadth, which wilt in the day and are renewed in the morning."

Proved under the supervision of Dr. Hering, by J. H. Bute, in 1835–6, with the tincture and first centesimal potency, and by Gosewich, with globules of the X, in 1837. See Hering's Monograph, Philadelphia, 1866, or Hale's New Remedies.

"It has been recommended in hospital gangrene, phagedenic ulcers, bites of rabid animals, poisoned wounds, etc., a wash to arrest fetid discharges, ozæna, leucorrhœa, gonorrhœa, gargle in diphtheria, etc."—U. S. D.

[1] **Mind.** ❙Cheerfulness after supper, until bedtime.
❙All mental excitement increases the suffering.
❙Bad effects of vexation; feels as if paralyzed.
❙Every mental excitement is followed by stitches in throat, producing cough.
❙Mental agitation increases cough.

[2] **Sensorium.** Vertigo.

[3] **Inner Head.** ❙Headache in sinciput after being kept waiting for dinner; > after eating, < towards evening and lasts all night; in r. side, with piercing pain in eye.
Pressure above eyes in forehead.
❙Violent pain in head; stitches from temples into ears. θIntermittent fever.
Sick headache with chilliness.

[4] **Outer Head.** Forehead cold, and sensation of coolness inside forehead, in a very warm room.

Digitized by Google

‖Pressing pain at root of nose with headache.
‖Head drawn to one side by swellings in neck.

[5] **Sight and Eyes.** Pressure above eyes and feeling of weight.
Stitches in l. eye.
Left eye most affected.
‖Scrofulous inflammation of long standing; feeling as if something was passing around in eye, with stitches.
Spasmodic, piercing pain in middle of upper rim of r. orbit, with some headache on that side.

[6] **Hearing and Ears.** Itching: in ears; intense and deep in l. ear.
‖Stitches from temples into ears, swelling below and behind ears. θIntermittent fever.
‖Discharge from ears; watery, bad smelling pus; inner swelling of ears.
‖Tetters on and around ears, extending into external meatus.
Swelling beginning at ear, and extending half way up cheek.
‖Swelling of parotids.

[7] **Smell and Nose.** ‖Cold feeling or burning in nose.
‖Frequent and violent sneezing, mostly evening and morning; chronic nasal catarrh.
‖Left side inflamed and swollen; burning sensation in l. nostril.
‖Tip of nose painful.
‖Eczema of nose.

[8] **Upper Face.** Feeling as if facial muscles would be drawn to one side.
‖Flushes of heat in face.
Heat and burning in face and bones of face.
‖Half way up cheek, swelling at ear. θParotitis.
‖Vesicular erysipelas on face.
‖Sharp shooting, intolerable itching, and thick crusts, with burning on r. zygoma.
‖Lupus on face.

[9] **Lower Face.** ‖Caries of lower jaw; with suppurating glands on neck.
‖Open, bleeding cancer on lower lip.
‖Lupus exedens about mouth and nose.
Pains in all the joints of face; drawing, tearing; < in evening.

[10] **Teeth and Gums.** Twitching, stitching toothache in an upper l. molar, which was decayed.
‖Scorbutic, swollen gums, separating from teeth; easily bleeding, putrid, disgusting.

[11] **Taste and Tongue.** ‖Dryness of tongue and roof of mouth.
Tongue sore, surface as if raw.

Digitized by Google

Sensation of coldness of tongue, larynx and trachea; saliva is cool; breath feels cold.
‖Impure breath.

[12] **Inner Mouth.** Scorbutis.

[13] **Throat.** Coolness particularly in throat, continues all day.
‖A feeling of softness in throat.
‖A feeling as if sand was in throat.
‖Continuous feeling of dryness and heat in throat, < after sleeping, eating and drinking.
‖Dryness of throat from midday until 1 till 3 A.M., then > until next noon.
‖A small dry spot in gullet; < after sleeping; must get up and drink; > after eating; throat looks glassy; on back of throat stripes of tough mucus.
‖Must swallow saliva to relieve unbearable dryness, especially during night.
‖Periodical itching in throat.
Crawling-itching in throat and fauces.
Rawness extending from chest into throat.
Burning in throat high up in cavity posterior to uvula.
‖Stitches in throat cause cough; when mentally agitated.
‖Tearing pain in throat when coughing.
‖Tickling and soreness in throat.
‖Sore throat from inhaling the least cold air, not from warm air.
‖Sore pain in throat and dryness of tongue, in morning.
‖Fauces inflamed and dry, without feeling of dryness.
‖Hawking of mucus, tough, gumlike, thick, tasteless; mostly mornings.
‖Expectoration of bitter mucus.
‖After discharging phlegm from throat he feels generally much relieved.
‖‖Scrofulous swelling and suppuration of glands of throat.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Desire for acid food and fruits, but pain and diarrhœa follow after eating them.
‖Desire for cheese.
Thirst, with fever.

[15] **Eating and Drinking.** ‖Eating and drinking relieve dry throat and pain in sinciput.
After eating: pain in stomach; cold feeling in stomach; after fruit or coffee, diarrhœa.

[16] **Hiccough, Belching, Nausea and Vomiting.** Empty and cool eructations.
Eructation, with feeling as though it would relieve.
‖Frequent nausea; nausea with diarrhœa.

[17] **Scrobiculum and Stomach.** ‖Cool feeling in stomach before and after eating.

Digitized by Google

Pain in stomach after eating, with diarrhœa.

[18] **Hypochondria.** Much flatulence and pain in hypochondria.
Bruised pain under hypochondria, with flatulence, in morning on awaking.
Stitches in l. hypochondrium.

[19] **Abdomen.** ❙Cool feeling in whole abdomen.
❙❙Flatulence and bruised pain in hypochondria; evening and night.
Belly puffed up with flatulency.
Itching of belly and umbilicus.
Colic with diarrhœa.
Pain in groin coming from back.

[20] **Stool and Rectum.** ❙Thin, greyish-yellow, hot stools, squirting out; irresistible urging; < after part of night until noon.
❙Diarrhœa: from coffee, acid fruits; with goitre; chronic; in wet weather; in scrawny, scrofulous children.
Discharge of much flatus.
Irresistible urging to stool early in morning.
Diarrhœa with desire for acid food, nausea, pain in stomach after eating, or swelling and suppuration of cervical glands.
❙Chronic dysentery.

[22] **Male Sexual Organs.** ❙Itching on scrotum.

[23] **Female Sexual Organs.** ❙Catamenia absent after erysipelas.
❙Induration and inflammation of mammæ.
❙Left mamma inflamed, suppurating, with a feeling of fulness in chest; sensibility to cold air; scrofulous.
Cancer of mammæ.

[25] **Voice and Larynx. Trachea and Bronchia.** ❙Inhaled air feels cool in larynx and trachea.
Itching and scratching in larynx at night, with anxious dreams.
Dryness in larynx.
❙Chronic itching in larynx and trachea.
❙Feeling as if windpipe had not space enough.
❙Pain in trachea.
❙❙Goitre size of a hen's egg; frequent diarrhœa.

[26] **Respiration.** ❙Impure or cold breath.
❙Asthmatic in evening after lying down and at night; loud wheezing; sensation as if trachea had not space enough.
In evening soon after lying down a sensation as if ants were running through whole body; then anxious, difficult breathing; is obliged to get up and open window; fresh air relieves him; immediately on lying down again these sensations return.

Digitized by Google

Inhaling slightest cold air causes sore throat, which he has not when inhaling in a warm room.

[27] **Cough.** Cough < by mental agitation.
Cough from stitches in throat; with painful tearing in throat; neck studded with tumors.
Expectoration of bitter mucus.
After raising phlegm he feels very much relieved.

[28] **Inner Chest and Lungs.** θPressure on chest.
Fulness in chest.
Raw feeling in upper chest, extending up into throat.
Pain in chest accompanied by desire to eructate.
Pain in chest and shoulder.

[30] **Outer Chest.** Chest hurts when touched.
Pressure on chest.
Small painful pimples, which bleed easily and heal slowly, across shoulders and on breast.

[31] **Neck and Back.** Scrofulous swelling and suppuration of glands of throat.
Itching and scratching on outside of throat near larynx.
Itching on back.
Below r. shoulder blade, extending around to front of body, a very much inflamed spot, about size of palm of hand, painfully sore to touch; soon after pimples appear on this spot in a large group, causing violent burning; later, rheumatoid pain from this spot into l. hip and groin, < from motion.
Eruption on back like zoster.
Scrofulous ulcers on back.
Burning, bruised pain in os coccygis, preventing sitting; < from touch.

[32] **Upper Limbs.** Pain in front of r. shoulder.
Violent pain in l. shoulder and chest; feels as if eructation would relieve it.
Tearing pain in nerves of shoulder, drawing pain in ulnar nerve, pain extending to point of little finger.
Periodical, sensitive, piercing, drawing pain in arm, extending to tip of little finger, drawing it up.
Right arm and back of hand painfully sensitive to least touch.
Sprained pain in wrists, drawing and scraping.
In hands, drawing, trembling feelings.
Bad pain on r. hand, in afternoon, so that he cannot use it.
Hard, thickened places on hands of workmen, with deep, oblique cracks.
Tetter on hands; blisters, oozing after scratching, with hot swelling.
Tearing in finger joints.
Pain in fingers (right hand) while writing.

Digitized by Google

Panaritium.
Tips of fingers sensitive to cold air.

[33] **Lower Limbs.** Scrofulous hip disease, with fistulous openings leading to bone, and ulcers on surface, with night sweats.
Pain as from a blow or shock in l. buttock, going down on inside of thigh bone, distinctly felt in knee joint, and spasmodic drawing together of calf of leg.
Tearing pain in sciatic nerve.
Drawing, trembling feeling in lower extremities.
Pains in knee and r. thigh, walking or sitting.
Tearing in knees; evening.
Hard swelling around mercurial, syphilitic ulcers on legs.
Piercing pain in great r. toe; evening.
Cold feet.
Swelling of l. leg, ulcer thereon; skin copper-colored.

[34] **Limbs in General.** Bruised pain, as from fatigue.
Tearing pain in joints.

[35] **Rest. Position. Motion.** After lying down in evening: asthmatic sensation as if ants were running through whole body; anxious, difficult breathing, is obliged to get up and open window.
Sitting: pains in knee and r. thigh.
While writing: pain in fingers of r. hand.
Motion: < rheumatoid pain from inflamed spot under r. shoulder blade into l. hip and groin.
Walking: pains in knee and r. thigh.

[36] **Nerves.** Neuralgia.
Involuntary drawing and trembling feeling in muscular parts of hands and lower extremities, with pain in wrists, fingers and knee joints.
Trembling with fever.
A feeling of lassitude and depression through whole body.
Very sensitive to a draught of air.

[37] **Sleep.** Restless at night; pain from flatulence.
Sleeplessness from dryness of throat, constantly swallows saliva, must get up, dryness < after sleep.
Anxious dreams.
On awaking, pain under hypochondria.

[38] **Time.** Early in morning: irresistible urging to stool.
In morning: frequent or violent sneezing; sore pain in throat and dryness of tongue; hawking of tough, gum-like, thick, tasteless mucus; on awaking, bruised pain under hypochondria, with flatulence.
In afternoon: bad pain on r. hand so that he cannot use it.
In evening: sick headache in r. side, and piercing pain in eye <; frequent and violent sneezing; pain in all

Digitized by Google

joints of face <; flatulence with bruised pain in hypochondria; after lying down, asthmatic; as if ants were running through whole body; tearing in knees; piercing in r. great toe; tearing, piercing pain <.

At night: must swallow saliva to relieve unbearable dryness of throat; flatulence and bruised pain in hypochondria; itching and scratching in larynx, with anxious dreams; asthmatic; night sweats; very restless; sensation as if ants were running through whole body.

39 **Temperature and Weather.** In a very warm room: forehead cold, and sensation of coolness inside forehead; skin grows moist.

Draught of air: very sensitive to.

Fresh air: > anxious, difficult breathing, and sensation as if ants were running through whole body.

Cold air: sore throat from inhaling least; sensibility of inflamed and suppurating l. mamma; tips of fingers sensitive; < scrofula; extremely sensitive to; pains in throat from.

In wet weather: diarrhœa.

40 **Fever.** Chilliness; chill succeeded by heat, with trembling, accompanied by a rapid swelling and great redness of glands below ear and in throat.

Cold feeling: in abdomen; in larynx.

Cold feet.

Heat in face.

Heat with thirst, causing to drink frequently.

Intermittent fever, with violent pain in head, and swelling below and behind ears.

In a warm room, skin grows moist; forehead externally cool, with an internal feeling of coolness.

Night sweats.

Sweats very easily.

41 **Attacks, Periodicity.** Frequent: sneezing; nausea; diarrhœa; drinking.

Spasmodic: piercing pain in middle of upper rim of r. orbit.

All day: coolness in throat; dryness of throat.

From noon until 3 A.M.: dryness in throat <.

After supper until bedtime: cheerfulness.

After part of night until noon: diarrhœa and urging <.

All night: sick headache in r. side, with chilliness and piercing pain in eye.

Periodical: itching in throat; pain in arm, extending to tip of little finger, drawing it up.

Intermittent fever.

Continuous: feeling of dryness and heat in throat; swallowing of saliva.

Digitized by Google

Chronic: diarrhœa; dysentery; itching in larynx and trachea; catarrh; scrofulous inflammation.

" **Locality and Direction.** Right: sick headache with piercing pain in eye; spasmodic, piercing pain in middle of upper rim of orbit, with some headache on side; sharp shooting, intolerable itching, and thick crusts, with burning on zygoma; below shoulder blade, extending around to front of body, an inflamed spot, about as large as palm of hand, painfully sore to touch; pain in front of shoulder; arm and back of hand painfully sensitive to least touch; bad pain in hand so that he cannot use it; pain in fingers of hand while writing; pain in knee and thigh, walking or sitting; piercing in great toe.

Left: eye most affected; stitches in eye; intense and deep itching in ear; side of nose inflamed and swollen; burning sensation in nostril; toothache in upper decayed molar; stitches in hypochondrium; mamma inflamed, suppurating; rheumatoid pain in hip and groin, extending from inflamed spot below r. shoulder blade; violent pain in shoulder and chest; pain as from a shock or blow in buttock, going down on inside of thigh bone, felt in knee joint, and spasmodic drawing together of calf of leg; swelling of leg, ulcer thereon, skin copper colored.

" **Sensations.** As if paralyzed; as of coolness inside of forehead; as of weight above eyes; as if something was passing around in eye; as if facial muscles would be drawn to one side; surface of tongue as if raw; as of softness, in throat; as if sand was in throat; as if windpipe had not space enough; as if ants were running through whole body; as if eructation would relieve violent pain in l. shoulder and chest; as from a blow or shock in l. buttock, going down on inside of thigh bone, distinctly felt at knee joint, and spasmodic drawing together of calf of leg; as of lassitude and depression through whole body.

Pain: in head violent; in tip of nose; in all joints of face; in sinciput, > by eating and drinking; in stomach, after eating; in hypochondria; in groin, coming from back; in trachea; in chest, with desire to eructate; in chest and shoulder; in front of r. shoulder; violent in l. shoulder and chest; on r. hand; in fingers; (r. hand) while writing; in knee and r. thigh; in wrists, fingers, and knee joints; under hypochondria on awaking; in head.

Piercing: in eye; in arm, extending to tip of little finger; in r. great toe.

Digitized by Google

Spasmodic piercing: in middle of upper rim of r. orbit.
Stitches: in throat; from temple into ears; in l. eye; in upper l. decayed molar; in l. hypochondrium; sharp shooting on r. zygoma.
Scraping: in wrists.
Scratching: in larynx; on outside of throat near larynx.
Tearing: in all joints of face; in throat when coughing; in nerves of shoulder; in finger joints; in sciatic nerve; in knees; in joints.
Drawing: in all joints of face; in ulnar nerve; pain extending to point of little finger; in wrists; in hands; in lower extremities.
Involuntary drawing feeling in muscular parts of hands and lower extremities.
Burning: in nose; in l. nostril; in face and bones of face; on r. zygoma; in throat high up in cavity posterior to uvula; in inflamed spot about as large as palm of hand below r. shoulder blade; in os coccygis.
Soreness: of tongue; in throat.
Rawness: from chest into throat.
Pressing pain: at root of nose.
Pressure: in forehead above eyes; on chest.
Sprained pain: in wrists.
Bruised pain: under hypochondria; in hypochondria at evening and at night; in os coccygis; in limbs.
Rheumatoid pain: from inflamed spot below r. shoulder blade, into l. hip and groin.
Sensitive pain: in arm, extending to tip of little finger.
Fulness: in chest, with inflammation and suppuration of l. mamma.
Twitching: in upper l. decayed molar.
Trembling feeling: in hands; in lower extremities; in muscular parts of hands and lower extremities.
Crawling-itching: in throat and fauces.
Tickling: in throat.
Itching: in ears; intense and deep in l. ear; intolerable on r. zygoma; in throat; of belly and umbilicus; of scrotum; in larynx; at night; on outside of throat near larynx; on back; all over body.
Dryness: of tongue and roof of mouth; in throat; of small spot in gullet; in larynx; in trachea.
Heat: in face and bones of face; in throat.
Cool feeling: in throat; of eructations; in stomach; in whole abdomen; of inhaled air in larynx and trachea; inside forehead.
Cold feeling: in nose; in stomach; in abdomen; in larynx; of tongue and trachea.

"**Tissues.** ‖Glands swollen, inflamed, indurated, or suppurating; scrofula; caries; old ulcers.

Digitized by Google

Chronic catarrh, with strumous disease of glands.
Chronic diarrhœa and dysentery.
Hospital gangrene, phagedenic ulcers, bites of rabid animals, poisoned wounds, etc., a wash to arrest fetid discharges, ozæna, leucorrhœa, gonorrhœa, gargle in diphtheria.

[45] **Touch. Passive Motion. Injuries.** When touched: chest hurts.
Touch: below r. shoulder blade, extending around to front of body, a very much inflamed spot, about size of palm of hand, painfully sore to; pain in os coccygis; r. arm and back of hand painfully sensitive to least.
Scratching: oozing from blisters on hand after.

[46] **Skin.** Itching all over body, without eruption; sensation as of ants running through whole body, especially at night.
Herpetic eruption on various parts.
Scrofula; extremely sensitive to cold air.
Mercurio-syphilitic ulcers, surrounded by hard swelling; on lower limbs.
Adenitis.
Panaritium.
Small, painful pimples, which bleed easily and heal slowly, across shoulders and on breast.
Vesicular erysipelas on face.
Lupus on face.
Eruptions on back like zoster.
Furuncles which commenced with a number of small blisters.

[47] **Stages of Life, Constitution.** Scrofulous subjects with great sensitiveness to cold air.
A lad, æt. 7 years; scrofulous hip disease.
Mrs. C., æt. 19, delicate constitution; cough with neck thickly studded with tumors.

[48] **Relations.** Antidotes: *Rhus tox.*, *Camphor* (?), *Sepia* (swollen nose).
Compatible: *Magnesium* (the plant requires a magnesian soil), *Bellad.*, *Carb. veg.*, *Phosphor.*
Incompatible: Coffee causes diarrhœa.
Compare: *Argent. nitr.*, *Bellad.*, *Calc. carb.*, *Carb. veg.* (cold breath), *Corydalis*, *Graphit.*, *Hepar*, *Kali bich.*, *Laches.*, *Nitr. ac.*, *Paris quad.*, *Phosphor.*, *Sulphur* (stool in morning with urging).

CITRUS LIMONUM.

Lemon. *Rutaceæ.*

A popular remedy with the Arabians.

"The Citrus Medica, like the orange-tree, is a native of Asia. It was introduced into Europe from Persia or Media, was first cultivated in Greece, afterwards in Italy, as early as the second century. It is considered almost a specific for prevention and cure of scurvy. Revillont, a French physician, recommends it as a gargle in diphtheritic affection of fauces, but states that it is without action on the white lenticular patches."—U. S. D.

CLINICAL AUTHORITIES.—*Diphtheria*, recommended by Buchner; *Dysentery*, natives of Tchian, Persia, Ausland, p. 18, 1855; *Dropsy and hydrothorax*, Schwabe, Casper's Wschrft., 1843, No. 8; *Dropsy after scarlatina*, Büttner, Pr. Med. Ztg., 1842, No. 26; *Dropsy with splenitis*, Gross, Hom. Arch., vol. 20, p. 178; *Hydrothorax* (two cases), Börner, Frank's Mag., vol. 1, p. 1; *Hydrothorax and general anasarca*, Frank's Mag., vol. 1, p. 157, *Convulsions, caused by eating the seeds of Datura Stramonium*, Rückert's Hom. Therap., p. 377; *Cancer*, Denny, B. J. H., vol. 24, p. 518; Willis and Brondini; *Sunstroke*, Med. Invea., vol. 8, p. 477.

Symptoms marked t. are toxicological symptoms. See Encyclopedia.

[1] **Mind.** ǁWomen who are generally very attentive, suddenly become averse to domestic duties.
Insensibility.

[3] **Inner Head.** ǁHeadache occurs daily, compels her to lie down. θSplenitis.

[8] **Upper Face.** Lividity of face; t.

[12] **Inner Mouth.** ǁScorbutis.

[13] **Throat.** Throat is sore posteriorly and low down, < on waking.
Diphtheria.

[11] **Appetite, Thirst. Desires, Aversions.** ǁWant of appetite. θSplenitis.

[16] **Hiccough, Belching, Nausea and Vomiting.** ǁEmpty eructations, particularly after eating. θSplenitis.

[17] **Scrobiculum and Stomach.** ǁScrobiculum painful to pressure of hand. θSplenitis.

[18] **Hypochondria.** ǁAffections of spleen.
ǁPainful enlargement of spleen.

[19] **Abdomen.** ǁAscites.

[20] **Stool and Rectum.** ǁConstipation. θSplenitis.
ǁDysentery.
Hemorrhage from bowels and death, in dropsy following intermittent; t.

Digitized by Google

Itching of anus from pin worms.

[22] **Male Sexual Organs.** Itching of scrotum.
‖Dropsy of scrotum.

[23] **Female Sexual Organs.** Itching of pudenda.

[26] **Respiration.** Breathing in the form of gasping; t.
‖Dyspnœa. θSplenitis.

[28] **Inner Chest and Lungs.** ‖Great dyspnœa, almost suffocation; sits with face bent over as far as possible; unconsciousness; dry skin; cold sweat on face and arms. θHydrothorax following metritis.
Hæmoptysis; t.
‖Hydrothorax.

[29] **Heart, Pulse and Circulation.** Heart beating very feebly; absence of pulse at wrist; t.

[33] **Lower Limbs.** Excessive dropsy of legs from ankle to knee (from eating lemons daily for months).

[34] **Limbs in General.** ‖Stiffness of joints, particularly in fingers; bruised feeling, particularly in feet; she is averse to domestic duties.

[35] **Rest. Position. Motion.** Daily headache compels lying down.
Great dyspnœa; sits with face bent over as far as possible.

[36] **Nerves.** Great prostration and collapse; t.
‖Convulsions from poisoning by Stramonium.

[40] **Fever.** ⁞Typhus.
⁞Intermittent fever (lemon-juice with coffee during the apyrexia).

[41] **Attacks, Periodicity.** Headache daily.
Intermittent fever.

[43] **Sensations.** Bruised feeling: in joints, particularly in feet.
Soreness: of throat, posteriorly and low down.
Stiffness: of joints, particularly in fingers.
Itching: of anus from pin worms; of scrotum; of pudenda.
Dryness of skin.

[41] **Tissues.** ⁞Citric acid was applied with good results to assuage pain in three cases of cancer.
⁞Malignant cancer, which commenced some years since as an enlarged submaxillary gland, supposed to be caused by a carious tooth, pain at times excessive. Lotion of citric acid, one drachm to eight ounces of water, and mouth rinsed out as often as pleased, afforded perfect relief from pain.
⁞Pain from cancer of tongue; also affords instantaneous relief in other affections; is, however, not curative.
⁞Useful as a gargle in diphtheria, causing detachment of the false membranes, decrease of the glandular enlargement and rapid recovery.

A man who was sun struck near the Dead Sea, heat being 125.5° F., was treated by a Bedouin guide, who bathed his hands, head and face with lemon-juice, after which he was able to ride two hours, to the banks of the Jordan, where he could rest for several hours, and there completely recovered.

[45] **Touch. Passive Motion. Injuries.** Scrobiculum painful to pressure of hand.

[46] **Skin.** ‖Dry skin, with cold sweat on face and arms. #Hydrothorax.

General surface of body cold.

‖Dropsy, particularly of chest, and after scarlatina.

‖Herpetic eruption.

[47] **Stages of Life, Constitution.** A woman, æt. 35; hydrothorax.

A farmer's wife, æt. 60; hydrothorax.

Innkeeper, æt. 64, drank much beer and whisky; hydrothorax and general anasarca.

Man, æt. 75; dropsy.

[48] **Relations.** Antidoted by: *Acon.*, *Asarum*, *Datura*, *Euphorb.*, ‖*Hepar*, ‖*Sepia.*

It antidotes: *Acon.* (diuresis of), *Euphorb.*, *Stramon.*, snake bites and all animal poisons.

Compatible: after *Bellad.* (increases curative effects, especially in women in childbed).

Compare: *Acet. ac.* (dropsies), *Bellad.*, *Laches.*, *Mercur.*

CLEMATIS ERECTA.

Upright Virgin's Bower. *Ranunculaceæ.*

Grows in Southern and Central Europe, on sunny hills, in bushes and on the sides of forests.

"Stœrck, before Hahnemann (1769), recommended it in cancerous ulcers of lips and mammæ; spongy excrescences; tophi; inveterate eruptions; old, foul ulcers; peculiar kinds of chronic headaches, and melancholia; arthritis and secondary syphilis."—Frank's Mag., vol. 4.

"Was known as Flammula Jovis in old pharmacy, because of its irritating action on the mucous membranes, and its power to produce inflammation and vesication when applied to the skin."—U. S. D., p. 1619.

It was extensively proved by Hahnemann and his provers, and also by the Austrian provers. See Encyclopedia, vol. 3, p. 340.

CLINICAL AUTHORITIES.—*Painful swelling of face with decayed teeth*, E. W. B., N. A. J. H., vol. 22, p. 197; *Toothache*, Berridge, Hom. Clinics, vol. 4, p. 94; *Iritis*, Madden & Hughes; *Blepharitis*, Hirsch; *Urinary difficulties* (2 women), Cooper, B. J. H., vol. 28, p. 662; *Stricture of urethra*, Hirsch, B. J. H., vol. 25, p. 612; recommended by Desterne; several cases by Jahr, in Gallican Journal; Schleicher, Rück. Kl. Erf., vol. 5, p. 503; the spasmodic form, Hirsch, B. J. H., vol. 25; Koch, Hom. Clin., vol. 1, p. 51; *Orchitis, after gonorrhœa*, Pope, B. J. H., vol. 24, p. 662; *Orchitis, after suppressed gonorrhœa*, Attomyr, Rück. Kl. Erf, vol. 1, p. 80; *Orchitis, with indurated swelling of testes, after gonorrhœa*, Stapf; *Swelling of r. testicle, after having been cured of a syphilitic ulcer a year previous*, Hartmann, B. J. H., vol. 12, p. 294; *Chronic bubo*, Rosenberg, Rück. Kl. Erf., vol. 1, p. 80; *Scirrhus mammæ*, 2 cases, Schœnfeld, Rück. Kl. Ef., vol. 5; *Enlargement of lymphatic glands*, Vienna Homœop. Hospital; *Herpes exedens*, Prager Monatschrift für Homœop.; *Crusta serpiginosa*, Arnold, B. J. H., vol. 26, p. 653; *Eczema impetiginosum*, Hirsch, B. J. H., vol. 25, p. 610; *Chronic tetter of hands*, Arnold, B. J. H., vol. 26, p. 654.

[1] **Mind.** ▮Melancholy; preoccupied by sad thoughts.
▮Despairing mood. θStricture.
Indifferent, silent, almost thoughtless.
▮Low-spirited, and fear of approaching misfortune.
▮Fear of being alone, but disinclined to meet even agreeable company.
▮Irritable, taciturn, does not want to go out.
Peevish and dissatisfied without any cause.
▮Ailments from homesickness, or contrition of spirit.
▮Difficulty in thinking, memory impaired.

Digitized by Google

‖Furious delirium and violent fever. θOrchitis.

[2] **Sensorium.** Confusion and heaviness of head in morning.
‖Dulness and cloudiness in head, with tendency to vertigo.
Giddiness on lifting head up, or when moving head.

[3] **Inner Head.** Head feels full and heavy, and drops.
‖Pressive, tensive pain in forepart of brain, < when walking than when sitting; with heaviness of head.
Headache in forehead > by pressure.
Drawing pain in l. side of forehead.
‖Boring pain in l. temple.
Grinding in r. half of brain when walking.
Tight aching in whole of l. side of head, more in bones than in brain.
Shocks in brain, from behind forward.
Hammering sensation in head in evening when lying down.
Headache < by bending head backward.

[4] **Outer Head.** Eruption of painful pimples on forehead.
‖Itching of scalp.
‖Small itching crusts and some stitches in scalp.
Tinea capitis over greater part of head, with pustular conjunctivitis.
‖Eruption on occiput, extending down neck, moist, sore, with crawling and stinging-itching; often drying up in scales; itching < when getting warm in bed; only slight, and but temporary relief by scratching.
Eruption on back of head and neck; tingling and itching; vesicles break, overflow other parts, with tendency to ulceration.

[5] **Sight and Eyes.** Staring look.
‖Burning heat and dryness in eyes as if fire was streaming from them; great sensitiveness to cold air, to light and bathing.
‖Pressing pain in eyes, photophobia and lachrymation < in open air; heat in eyes.
‖Smarting of eyes < when closing them; on re-opening them, great sensitiveness to light.
‖Complaints from bright sunlight.
Obscured sight.
While writing the letters momentarily run together; at times double vision, with flickering before eyes.
‖Inflammation of iris; posterior synechia.
‖Kerato-iritis, particularly of the ulcerative type.
Pain in eyes; pressure in middle of l. eyeball.
Pulsating, itching, burning dryness, as if fire was streaming from eyes, with biting, acrid lachrymation.
‖Eyes smart, as if raw, capillaries enlarged, lachrymation; smarting < when closing eyes; sensitive to open air, fears to open them; "gets black" before eyes.

Digitized by Google

Ulceration of cornea with burning, tingling and stitching pains, sensitive to heat and bathing.

▮Spot on l. eye caused by gonorrhœa; inflammation in opposite eye.

▮▮Pustular conjunctivitis, complicated with tinea capitis; with agglutination of lids in morning.

Whites of eyes have a yellow tint.

▮Burning and inflammation of inner canthi; dim, weak sight.

Stitches in inner canthus of l. eye, as from a sharp-pointed body, lasting some minutes.

Itching in canthi.

Smarting and burning in eyes, especially in margins of lids.

▮▮Eyes inflamed, protruded, dim; eyelids badly ulcerated and secreting acrid water. θSyphilis.

▮Chronic irritable condition of lids, with swelling of meibomian glands, in young, scrofulous subjects.

▮▮An itching pimple of the arcus ciliaris, with coryza and moroseness.

[6] **Hearing and Ears.** ▮Ringing in ears, as from bells.

▮Burning pain in auricles, with heat.

[7] **Smell and Nose.** Violent coryza, with sneezing; discharge streaked with blood.

Dryness of nose, with heat and burning.

[8] **Upper Face.** ▮Pale and sickly countenance.

▮Aching in r. side of face, which is tender to touch; > from smoking, < when lying on painful side.

Shooting, upward, in r. side of face to eye, ear and temple.

▮Burning of face; cheeks red and hot, momentary flushes.

▮Moist eruption on face, preceded by stinging pain.

White blisters on face as if burnt by the sun.

[9] **Lower Face.** ▮Burning, cutting through lower lip.

▮Vesicular eruption on lip.

Pustular eruption about lips, tender to touch.

▮Lower lip swollen, deeply ulcerated and cancerous. θSyphilis.

▮Suppurative pimples on chin.

▮▮Swelling of submaxillary glands, with hard, little tubercles, throbbing, tight as if they would ulcerate; painful when touched and exciting a toothache.

[10] **Teeth and Gums.** Toothache: stitching and drawing < at night, > for short time from cold water, > when drawing in air, > in open air; < from warmth of bed; crumb of bread starts aching; < from smoking tobacco; from syphilitic affections, when mercurialized.

▮Toothache, tolerable during day, but as soon as he lies down in bed and assumes a horizontal position, it increases to an unbearable degree.

Digitized by Google

‖Toothache in a hollow tooth, only transiently relieved by drawing in cold air.
‖Dull pain in hollow tooth > by cold water or sucking it.
‖Decayed teeth feel too long; contact extremely painful; free flow of saliva.
‖Gums of l. lower molars pain, as if sore, < while eating.

[11] **Taste and Tongue.** ‖Tongue dry in morning, on awaking.
Small blisters on tongue and in throat, which soon become ulcers.

[12] **Inner Mouth.** ‖Breath offensive to others.
Heat and burning in mouth and throat.
‖Continued salivation. #Syphilis.

[13] **Throat.** Sensation of roughness in throat.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Long-lasting satiety; can eat, and with relish, yet immediately feels it is too much.
‖Aversion to beer.

[15] **Eating and Drinking.** ‖After eating, weakness in all the limbs, with pulsation in arteries.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Nausea, with weakness in legs, from smoking tobacco.

[17] **Scrobiculum and Stomach.** Disagreeable sensation of coldness in stomach.
‖Pressure on stomach, after dinner.

[18] **Hypochondria.** ‖Bruised pain in hepatic region, when touched or bending.

[19] **Abdomen.** ‖Lancinating pains from belly to chest, < by breathing, also during micturition.
‖Increased sensitiveness of both inguinal regions.
‖Swelling and induration of inguinal gland, with jerking pains.
‖Sensation in abdominal ring and in inguinal glands as if a swelling would form.
Sensation of constriction in lower abdomen, which is hard.
‖Swelling of r. inguinal region, painful to touch.
‖‖Swelling of glands in both inguinal regions, with sensitiveness while walking; r. inguinal glands become more swollen, with prickling pain in them, < by walking and in bed; afterwards a tensive sensation in them, especially when walking.
‖‖Swelling of r. inguinal gland, < than left, not painful when rising after walking.
Large pustules about loins.

[20] **Stool and Rectum.** ‖Frequent stools, becoming more and more loose, without abdominal pain.
Loose stools, with burning at anus.
Diarrhœa and dysentery.
‖Constipation: hard stool, very difficult to discharge (in evening).

Digitized by Google

Burning heat and itching at anus.
Hemorrhoids; itching, discharging mucus.

[21] **Urinary Organs.** ‖Urine frequent but scanty.
Urgent desire to urinate, without pain.
‖Spasmodic, urging and tenesmus.
‖Vesical neuralgia; the urethra or seminal cord most affected.
‖Long-lasting contraction or constriction of urethra, urine emitted by drops, as in spasmodic stricture.
‖Burning in urethra on urinating.
‖Sharp stitches in urethra.
‖Tingling in urethra, culminating at frænum.
Urethra painful to touch, < at night and from heat of bed.
‖Urethra painful to pressure.
‖Micturition remarkably slow.
‖Urine passes slowly and in a thin stream, as if urethra was constricted.
‖Interrupted flow of urine, with burning during, but most at beginning of micturition, or during the interruptions.
‖Acute pain (ardor urinæ) and tenesmus while urinating, with aching pain in lower part of back; the forcing induces copious, involuntary lachrymation, and is most violent before 6 P.M.; not so troubled at night.
After great straining a few drops of urine pass, which is followed by a full stream without pain; after this sometimes dribbling of urine.
‖‖Involuntary flow, by drops, after micturition.
‖Heavy, aching pain in lower part of back, with sense of bearing down and heavy pain in chest; continual desire to pass water with inability to perform the act; urine comes away first in drops, as if something blocked up the passage, after this stream is full and continuous.
‖Inability to evacuate all the urine at once.
‖When beginning to urinate it burns the worst, while urinating it sticks in urethra, and after urinating it still continues to burn and bite.
‖The last drops of urine cause violent burning.
‖Flocculent, pale urine. θStricture.
Urine turbid, milky dark, with flakes of mucus and froth.
‖Urinary deposit puslike.
‖Discharge from urethra of thick pus. θGonorrhœa.

[22] **Male Sexual Organs.** ‖Sexual desire weak.
‖Involuntary erections by day.
Violent, long-continued erections, with stitches in urethra.
‖Burning in penis during seminal discharge in coitus. θStricture.
‖‖Right spermatic cord sensitive, testicles drawn up.
‖Pain in testicles, drawing to spermatic cord.

Digitized by Google

‖Swelling of l. testicle, with intolerable drawing pain in testicle and cord. θSuppressed gonorrhœa.

Drawing pain in testes and spermatic cord from below upward.

Painful sensitiveness of testes.

‖Pinching pain in testicles, < from slightest touch.

‖‖Painful, inflamed and swollen testicles.

Testes painful to touch, as if bruised, with drawing and stretching in inguinal region, l. thigh and scrotum; a clawing pain when touching it or when walking.

‖Severe and painful strangury, with enlargement and tenderness of l. testicle and swelling in groin of same side; testicle hard and tender to touch; the swelling and pain extend along cord into groin, is shooting in character and < by motion; a slight gleety discharge present; no pain in micturition. θOrchitis after mismanaged gonorrhœa.

‖Orchitis with much urethral irritation.

Swelling and induration of both testicles, or only of r.; pain as if bruised on touching the testes.

‖‖Induration of testicles.

‖‖Swelling of r. half of scrotum, which is thickened and hangs low down; testicle also relaxed and hanging down.

Itching about genitals.

[25] **Female Sexual Organs.** ‖Menses too early.

‖Softened scirrhus, with corrosive leucorrhœa and lancinating pains running upward, < by breathing and during micturition.

‖Swelling and induration of breasts; cancer of breast; glandular induration above nipple, painful when touched.

‖Scirrhus, l. mamma, with stitches in shoulder; the gland is very painful, < in cold weather and during night; < during growing moon; while perspiring she cannot bear to be uncovered.

[26] **Voice and Larynx. Trachea and Bronchia.** ‖Dryness and burning in throat.

[26] **Respiration.** ‖Respiration impeded when ascending a hill or walking over an uneven road.

[27] **Cough.** Violent cough with irregular respirations, at times too slow, at times too rapid.

Barking cough with burning pain in sternum and stitches in both sides of lungs.

Cough usually dry.

[28] **Inner Chest and Lungs.** ‖Oppression of chest.

‖Aching or stitching pains in chest.

Tearing pain in forepart of chest, above heart.

Digitized by Google

Burning pain in sternum and stitches in both sides of lungs, with barking cough.
Left side of chest seems most affected.

[29] **Heart, Pulse and Circulation.** ‖Sharp stitches in region of heart, from within outward.
Pulse unchanged; excited, with throbbing in veins.
Distinctly perceptible pulsations in whole body, especially about heart.

[31] **Neck and Back.** Small of back; burning; pressure in; bruised pain; as if broken, with tension, < when stooping.
‖Moist eruption on neck extending to head.

[32] **Upper Limbs.** ‖Swelling of axillary glands.
‖Pressing or drawing in muscles of arms and hands.
‖Rheumatic pains in hands.
‖Arthritic nodes on finger joints.
Fiddling motion of l. and r. arm; slow bass viol movement.
Hands feel as if they were too large; they are dry and hot.
Spreading blisters on swollen hands and fingers, < by cold air.

[33] **Lower Limbs.** ‖Weakness in legs from smoking tobacco.
‖Scaly herpes on thighs.
‖Burrowing, boring, or pressive pains on tibiæ.
‖Rheumatic pains in lower limbs.
‖Painful swelling in knee after gonorrhœa.
‖Violent itching of toes, evenings, after lying down; sweat between toes.
Dry, scaly tetter on legs.

[34] **Limbs in General.** ‖Weakness, heaviness, weariness and bruised sensation in limbs.
Great emaciation and relaxed muscles.

[35] **Rest. Position. Motion.** When lying down: in evening, hammering in head; toothache < to an unbearable degree.
After lying down: violent itching of toes, evenings; vibrating sensation through whole body.
Sitting: pressive, tensive pain in forepart of brain, < when walking than when sitting.
Closing eyes: < smarting in eyes.
On opening eyes: great sensitiveness to light.
Motion: < shooting along cord into groin.
When moving head: giddiness.
Bending head backward: < headache.
On lifting head up: giddiness.
While writing: letters momentarily run together.
Bending: causes bruised pain in hepatic region.
Stooping: < pain and tension in small of back.
When walking: pressive, tensive pain in forepart of head

Digitized by Google

< ; grinding in r. half of brain; sensitiveness of inguinal glands; prickling, tensive pain in r. inguinal glands: clawing pain in scrotum; over an uneven road, impeded respiration.

When ascending a hill: respiration impeded.

[36] **Nerves.** ‖Great debility.

‖Twitching of muscles.

‖Vibratory sensation through whole body after lying down.

‖After typhoid fever, while getting better, and in hydrocephalus, sudden stupor and look as if dying.

[37] **Sleep.** ‖Sleepiness, great desire to sleep during day, even mornings early.

‖Sleeplessness, evening and night.

‖Uneasy sleep, dreaming and tossing about; rises unrefreshed from sleep in morning.

Restless, tossing about, vivid, lascivious dreams; profuse perspiration after midnight.

Feels exhausted on waking.

[38] **Time.** Before 6 P.M.: forcing to urinate, inducing copious, involuntary lachrymation.

In morning: heaviness of head; pustular conjunctivitis, with agglutination of lids; on awaking, dryness of tongue; rises unrefreshed from sleep.

During day: involuntary erections; great desire to sleep.

Early in morning: great desire to sleep.

In evening: hammering in head; constipation; after lying down, violent itching of toes; sleeplessness.

At night: toothache <; pain in urethra <; scirrhus, l. mamma, with stitches in shoulder <; sleeplessness; dry heat, with general hot sensation; profuse sweat, most towards morning; herpes exedens, itching and burning <; ulcers <.

After midnight: profuse perspiration.

[39] **Temperature and Weather.** Warmth of bed: < itching in eruption on scalp and neck; < toothache; < painful urethra; < moist eczema, itching terrible.

Heat: ulceration of cornea, eye sensitive to.

When drawing in ear: toothache >; toothache in hollow tooth, transiently >.

When uncovering in bed: chilliness over whole body.

Open air: < pressing pain in eyes, photophobia, lachrymation; eyes sensitive to; > toothache.

Cold air: sensitiveness of eyes to; < spreading blisters on swollen hands and fingers.

Bathing: sensitiveness of eyes.

Cold water: > toothache for a short time; < moist eczema.

Moist poultices: < eczema and ulcers.

Cold weather: < scirrhus, l. mamma.

Digitized by Google

[40] **Fever.** ‖Chill, with shivering, followed by sweat, without intervening heat.
‖Chilliness over whole body, particularly when uncovering in bed. θOrchitis.
‖Dry heat, with general hot sensation only at night.
‖Heat of one side.
‖Profuse sweat at night, most towards morning, with aversion to uncovering.

[41] **Attacks, Periodicity.** Sudden: stupor, after typhoid and in hydrocephalus.
Spasmodic: urging and tenesmus.
Momentary: flushes to cheeks.
Lasting some minutes: stitches in inner canthus of l. eye.
Frequent: stools; urination.
At times: double vision, with flickering before eyes; respiration too slow; respiration too rapid.
Continuous: salivation; desire to pass water with inability to do so.
Long-lasting: satiety; contraction and constriction of urethra; violent erections.
During growing moon: scirrhus, l. mamma, with stitches in shoulder <; eruption looks inflamed.
During decreasing moon: eruptions look dry.
Chronic: irritable condition of lids with swollen meibomian glands; exanthematous eruption; constitutional herpes; tetter of hands.

[42] **Locality and Direction.** Right: grinding in half of brain; inflammation in eye; aching in side of face; shooting upward in side of face, to eye, ear and temple; prickling in swollen inguinal glands; swelling of inguinal gland; spermatic cord sensitive; swelling and induration of testicle; swelling of half of scrotum, which is thickened and hangs low down, testicle also relaxed and hanging down; fiddling motion of arm.
Left: drawing pain in side of forehead; boring in temple; tight aching in whole of side of head, more in bones than in brain; pressure in middle of eyeball; spot on eye caused by gonorrhœa; stitches in inner canthus of eye; gums of lower molars pain, while eating; swelling of testicle, with intolerable drawing pain in testicle and cord; drawing and stretching in thigh; enlargement and tenderness of testicle and swelling in groin, testicle hard and tender to touch; scirrhus of mamma, with stitches in shoulder, gland very painful; side of chest most affected; fiddling motion of arm; sore on side < from washing.
From behind forward: shocks in brain.
From within outward: stitches in heart.

Google

[43] **Sensations.** As if fire was streaming from eyes; as if eyes were raw; as if little tubercles of swollen submaxillary glands would ulcerate; as if decayed teeth were too long; as if gums of l. lower molars were sore; as if a swelling would form in abdominal ring and in inguinal glands; as if urethra was constricted; as if something blocked up passage of urine; as if testes were bruised; as if bruised on touching testes; as if small of back was broken; as if hands were too large; stitches in eyes as from sharp body

Pain: in pimples on forehead; in eyes; acute, while urinating; in testicles, drawing to spermatic cord.

Lancinating pains: from belly to chest; with softened scirrhus.

Cutting: through lower lip.

Boring: in l. temple; on tibiæ.

Sharp stitches: in urethra; in region of heart, from within outward.

Stitches: in scalp; as from a sharp-pointed body, in inner canthus of l. eye; in urethra; in l. shoulder.

Stitching pains: with ulceration of cornea; toothache; in chest; in both sides of lungs.

Sticking sensation when touching skin.

Stinging pain: precedes eruption on face.

Stinging-itching: in eruption on occiput and neck.

Shooting: upward, in r. side of face to eye, ears and temple; along cord into groin; in ulcer.

Jerking: in swollen and indurated inguinal gland; in ulcer.

Tearing: in forepart of chest, above heart.

Drawing: in l. side of forehead; toothache; in l. testicle and spermatic cord; in inguinal region, l. thigh and scrotum; in muscles of arms and hands.

Burning: of face; through lower lip; at anus; in urethra on urinating; during, but most at beginning of urination, or during interruptions; after urinating; last drops of urine cause violent; in penis during seminal discharge in coitus; in throat; in sternum; in small of back; in skin; herpes exedens with; miliary eruption with; in ulcer; with ulceration of cornea; of inner canthi; in eyes, especially in margins of lids; in auricles; of nose, with heat and dryness; in mouth and throat.

Burning heat: in eyes; at anus.

Burning dryness: of eyes.

Smarting: of eyes; in eyes, especially in margins of lids.

Pressive pain: in forepart of brain; on tibiæ.

Pressing pain: in eyes; in muscles of arms and hands.

Pressure: in middle of l. eyeball; on stomach, after dinner; in small of back.

Digitized by Google

Oppression: of chest.
Tensive pain: in forepart of brain; in swollen inguinal glands of r. side.
Tension: in small of back.
Stretching: in inguinal region, l. thigh and scrotum.
Clawing pain: when touching scrotum or when walking.
Pinching: in testicles.
Grinding: in r. half of brain when walking.
Burrowing: on tibiæ.
Gnawing: in skin.
Biting: lachrymation; in urethra after urinating.
Constriction: in lower abdomen.
Hammering: in head.
Shocks: in brain from behind forward.
Rheumatic pain: in hands; in lower limbs.
Bruised pain: in hepatic region; in small of back; in testes when touched; in limbs.
Dull pain: in hollow tooth.
Tight aching: in whole of l. side of head, more in bones than in brain.
Heavy aching: in lower part of back with sense of bearing down and heavy pain in chest.
Aching: in r. side of face; of tooth from crumb of bread; in lower part of back; in chest.
Throbbing: in swollen submaxillary glands; in ulcer.
Pulsating: in eyes; in arteries, after eating.
Prickling: in swollen inguinal glands of r. side.
Tingling: in eruption on back of head and neck; pains with ulceration of cornea; in urethra.
Creeping: in ulcer.
Crawling: in eruption on occiput and neck.
Itching: of scalp; of small crusts on scalp; in eruption on back of head and neck; of eyes; in canthi; in pimple over arcus ciliaris; at anus; hemorrhoids; about genitals; of toes; over whole body; terrible with eczema and chronic herpes; with miliary eruption; in and about ulcer.
Painful sensitiveness: of testes.
Sensitiveness: of both inguinal regions; of r. spermatic cord.
Vibrating sensation: through whole body.
Roughness: in throat.
Heaviness: of head; in limbs.
Fulness: of head.
Dulness: in head.
Confusion: of head.
Cloudiness: in head.

Digitized by Google

Weakness: in all the limbs, after eating; in legs, from smoking.
Weariness: in limbs.
Feels exhausted on waking.
Coldness: in stomach.
Dryness: in eyes; of nose; of tongue; in throat; of hands.
Hotness: of cheeks; of hands.
Heat: in eyes; in auricles; of nose; in mouth and throat.

[44] **Tissues.** Inflammatory variety of stricture, terminating by serous infiltration into suburethral tissue and formation of a submucous callus.
Hot, painful swelling and induration of glands.
Skin and muscles lax.
Acts especially upon skin, lymphatic glandular system, and genito-urinary organs.
Rheumatic and gouty affections of joints; catarrhal and rheumatic affections of bladder; rheumatic affections of eyes and ears.
Obscure inflammatory conditions of some glands where infiltrations are the result, causing greater or less swelling of the affected organ without much pain.
Organic strictures, formed by infiltration of corpus spongiosum at some point, by coagulable lymph, and formation of a submucous callosity.

[45] **Touch. Passive Motion. Injuries.** Touch: r. side of face tender; pustular eruption about lips, tender; swollen submaxillary glands painful; toothache excited; decayed teeth extremely painful; bruised pain in hepatic region; swelling of inguinal region sensitive; urethra painful; pinching pain in testicles < from slightest; testes painful; clawing pain in scrotum; l. testicle tender; glandular induration above nipple painful; causes shooting in ulcer.
Sticking sensation: when touching skin.
Pressure: headache in forehead >; urethra painful.
Scratching: slight and temporary relief of itching in eruption on scalp and neck; gnawing in skin not >.
Aching in r. side of face < when lying on painful side.

[46] **Skin.** Itching over whole body.
Sticking sensation when touching skin.
Gnawing sensation in skin, not > by scratching.
Skin inflamed, red, burning; eruption of blisters, which burst and form ulcers.
Eruption of vesicles and pustules, from former exuded a clear, watery secretion, from latter a purulent fluid, followed by formation of scales and scabs; this chronic exanthem, which extended almost over whole body,

Digitized by Google

was always exuding and accompanied with tormenting itching.

Vesicular eruptions on body; herpetic eruptions; chronic constitutional herpes.

‖Eruption looks inflamed during increasing, and dry during decreasing moon; moist eczema, itching terribly, < from washing in cold water, from warmth of bed and from wet poultices.

‖Head and face a solid mass of scabs, dark and rough, adhering firmly, exuding a yellowish fluid when removed, which excoriates parts with which it comes in contact; body completely covered, front and back, and legs to knees. θCrusta serpiginosa.

Chronic, red, humid herpes, with intolerable itching in warmth of bed and after washing; tendency towards rupture and ulceration of vesicles.

‖Herpes exedens, secreting an acrid, purulent fluid; itching and burning < at night.

‖Dark, burning, miliary eruption, with violent itching.

‖Eruptions following suppressed gonorrhœa.

Impetigo, especially after abuse of mercury, in psoric constitutions.

Burning, creeping, jerking, throbbing or shooting in ulcer; shooting pain in ulcer, only when touched; scabby, deep ulcers; indurated ulcers, with high, elevated edges, difficult to heal; itching in and around about ulcer; pus serous, sanious, yellow, acrid, corrosive or ichorous; scanty secretion, or total suppression of pus; at night, also from poulticing; < when washing sore, l. side.

‖Ichorous, spreading, fetid ulcers. θSyphilis.

‖Eruption on neck and occiput.

‖Chronic tetter of hands.

Tetter: painful over whole body; moist; scaly, with thick crusts.

Scald head; psoriasis; scabies; varicella; acne indurata; cancerous ulcers.

[47] **Stages of Life, Constitution.** Light hair.

Torpid, cachectic conditions; swelling and induration of glandular system; syphilitic taint.

Clara B., æt. 23, and Sarah F., æt. 25, servant; urinary difficulties.

Strong man, æt. 30, had gonorrhœa; stricture of urethra.

Woman, æt. 50, of scrofulous habit; herpes exedens.

[48] **Relations.** Antidotes: *Bryon.* (toothache, urinary symptoms), *Camphor.*

It antidotes: *Mercur.*

Compatible: *Silic.*

Digitized by Google

Compare: *Arsen., Bellad., Bryon., Calc. carb., Canthar., Capsic., Conium, Caustic., Dulcam.* (syphilitic ulcerations), *Graphit., Mercur.* (iritis, sensitive to cold), *Petrol.* (impetigo on neck and occiput), *Pulsat.* (orchitis), *Sarsap.* (syphilitic ulcers).

ERYTHROXYLON COCA.

Coca. *Lineæ (suborder Erythroxyleæ).*

Nearest related to the Malpighiaceæ and Sapindaceæ, next to the Aceripaceæ and the Rhizobolæ.

A bush six or eight feet high, small white flowers and bright green leaves. The leaves are two and half inches long and half as wide; the characteristic sign of the leaf is an arched line on each side of the midrib. Coca was first used in the United States as a tobacco antidote. It is known to have been in use with the Peruvians since the Conquest. In the time of the Incas the Coca was regarded as sacred. It is largely cultivated in Bolivia for the sake of its leaves, which are much used in that country for chewing. In 1856 the sale of the leaves secured an income to the Republic of thirteen million francs. It is now in general use among the Indians as a narcotizing beverage. The plant, which is propagated from the seed in nurseries, begins to yield in eighteen months and continues productive for half a century.

In 1856 it was proved by Clotar Müller, Hom. Viert., vol. 7, p. 443. Proving by Stokes, in Mon. Hom. Rev., vol. 3, p. 275, in 1859. Provings were suggested in 1867, by W. S. Searle, in N. A. J. of H., vol. 16, p. 1, and made in the same year by Berridge, Croker, Ray and Scheibler. Other provings were made, in 1869, by Lilienthal, Safford, Williams, Ferguson and Labeau. In 1870, C. Hering made a complete arrangement of the effects, from all available sources, in the form of a monograph, for the Journal of Materia Medica.

Clinical Authorities.—*Shocks in the head*, Searle, Organon, vol. 3, p. 359; *Chronic constipation*, Stokes, Organon, vol. 3, p. 267; *Cough*, Berridge, H. M., vol. 10, p. 110; *Phthisis pulmonalis*, E. W. Berridge, H. M., 1874, p. 110; *Heart disease*, Oehme, A. H. Z., vol. 101, p. 101; *Overexertion in ascending heights*, Richter B. J. [1] **Mind.** ▮Melancholy from nervous exhaustion.
▮Hypochondriasis. θAmenorrhœa. θDysmenorrhœa. θVeta.
▮▮Bashful, timid, ill at ease in society.
Sadness, irritability; he delights only in solitude and obscurity; frequently he gives proof of obstinacy.

Digitized by Google

‖Remarkable aversion to exertion of any kind in consequence of nervous exhaustion.
‖Loss of energy.
‖Slow in finding the words to express himself at times.
‖Mental depression with beginning of atrophy.
‖Overpowered by an indescribable anxiety. θVeta.
‖Feeling of anguish increased with failure of every effort to strive against the weariness; torment only diminishes with perfect rest. θVeta.
‖Stupidity. θVeta.
‖Brain feels so muddled that he cannot read understandingly.
Gentle excitement, followed by wakefulness.
‖Peevish temper. θVeta.
Imparts unusual buoyancy; cheers the heart, brightens the mind and renews bodily strength for the vigorous tasks of life.
Want of will power; shakiness and mental depression.

[3] **Sensorium.** Giddiness and dizziness.
‖Vertigo. θVeta.
Fear of falling when walking; vertigo with involuntary quick stepping when walking, head inclined forward, with giddiness and fear of falling; nausea and dizzy feeling make him unfit for mental work; giddiness, with pressing on back of head and weariness.
‖Fainting and violent sickness. θVeta.
‖Fainting fits from nervous weakness.

[5] **Inner Head.** Sensation of tension over forehead, as if an india-rubber band was stretched over it.
Fulness in forehead and dull feeling over whole brow.
Violent headache just over eyes, with low ringing in ears.
Headache just above eyebrows, not constant; < by elevating head or turning eyes up.
Dull frontal headache, which vanishes with the setting of the sun, followed by a state of mental exhilaration.
Slight shooting pains in r. temple.
Headache in r. temple in morning, sharp on first rising and all day when looking up, pain darts from temple in straight line to top of head, leaving a sore feeling.
Pressing headache on r. side of occiput and on r. side of forehead, with giddiness and chill after dinner; > towards evening.
‖Shocks in the head, dull, full feeling in occiput, with vertigo, < by lying down, often only possible position in bed is on face.
‖Occiput painful, tender to touch; pains < on coughing.
Headache in occiput, with chilliness and mild fever.
Occipital headache.

Digitized by Google

Headache in afternoon, with chilliness.
Headache with sensation of dryness in throat.
‖Flow of blood to head and lungs.
Headache > after eating, returning in three and a half hours and leaving at sunset.
‖Nervous sick headache; megrim.

[4] **Outer Head.** ‖Occiput painful and tender to touch, pain < on coughing. θPhthisis.

[5] **Sight and Eyes.** Great intolerance of light, with remarkable dilatation of pupils.
‖Dark cloud before eyes; eyes deeply reddened until bloody tears gushed out. θVeta.
White, dark or fiery spots before eyes; flickering or flashing; letters seem to run together.
‖Indistinct vision, soon followed by headache and nausea. θVeta.
‖Aching pain behind eyes, making them feel as if they were squinting inward.

[6] **Hearing and Ears.** Ringing in ears with fever.
‖Loud ringing, buzzing and humming in ears. θVeta.
‖Deafness of three months' duration, in an old soldier, æt. 102; complained of noise in head and inability to hear himself when he read aloud.

[7] **Smell and Nose.** ‖Epistaxis passing from r. to left.

[9] **Lower Face.** Lips blue, swollen, chapped. θVeta.
Lips and gums pale; dryness of lips and mouth.
Ulcerations at commissure of lips.

[10] **Teeth and Gums.** ‖Prevents caries of teeth.

[11] **Taste and Tongue.** ‖No taste in morning.
‖Much furred tongue.

[12] **Inner Mouth.** Dryness of lips and mouth, especially on awaking.
At night and in morning a sensation in mouth and palate as if he had eaten pepper.
Fetid breath.

[13] **Throat.** ‖A distinct feeling of swelling of uvula, difficulty of swallowing.
Early in morning, sensation of dryness in throat, very disagreeable on swallowing, as if swollen.

[14] **Appetite, Thirst. Desires, Aversions.** Great appetite.
Retards hunger and thirst.
Great satiety, without longing for nourishment, for a long time.
‖Loss of appetite, especially for solid food.
Great thirst.
‖Longing for spirituous liquors and tobacco, accustomed stimulants.

[15] **Eating and Drinking.** ‖Can eat but little at a time. θChronic constipation.

Digitized by Google

‖Ailments from salt food.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea with vertigo.

Hiccough after supper.

Frequent eructations.

‖Flatus rises with such force that it seems as if œsophagus would be rent by it. θChronic constipation.

[17] **Scrobiculum and Stomach.** Feeling of emptiness or fulness in stomach.

Weak and difficult digestion.

‖Catarrh of stomach; gastralgia; dyspepsia.

‖Confirmed dyspepsia, especially in hypochondriacs.

[18] **Hypochondria.** ‖Pressure and tension in hypochondria, after meals.

[19] **Abdomen.** ‖Flatulence.

‖Violent palpitation from incarcerated flatus, which sometimes rises with such force that it seems as if œsophagus would be rent by it. θChronic constipation.

‖Violent bellyache, with tympanitic distension of abdomen, > by frequent discharges of inodorous flatus.

‖Puffing up of abdomen.

‖Spasmodic colic; enteralgia.

‖Pituitous diseases of abdominal organs.

[20] **Stool and Rectum.** Flatus from bowels smells like burnt gunpowder.

‖Constant desire to stool. θAfter gonorrhœa.

‖Dysentery. θVeta.

Every day bowels moved one hour later.

‖Constipation from inactivity of rectum.

‖Piles painful on walking or sitting.

[21] **Urinary Organs.** Rises in night to urinate.

Urine copious, with a dark red sediment adhering to vessel.

‖Pain in perineum at end of urination; stream of urine twisted; dribbling; orange colored, flocculent sediment collects in one spot "like a sponge;" ammoniacal odor. θFollowing checked gonorrhœa.

‖Urine after standing deposits a yellow white gelatinous sediment, adhering to vessel, sometimes an iridescent oily film on surface. θPhthisis pulmonalis. θCough.

Urine becomes turbid after standing and is covered with a light pellicle.

‖Nocturnal enuresis.

[22] **Male Sexual Organs.** Nervous prostration from sexual excesses.

Spermatorrhœa and partial impotence.

[23] **Female Sexual Organs.** Menses flow in gushes, awakening from sound sleep.

Digitized by Google

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Weakness of voice.
‖Phthisis laryngea, when from irritability of pharynx stomach would retain no food.
‖Feels much stronger in voice; can sing much louder and clearer.

[26] **Respiration.** ‖Painful shortness of breathing. θVeta.
In evening in bed, most severe oppression with great anxiety and prostration.
Painful oppression of chest and continued need of deep respiration.
‖Oppression of breathing during nocturnal hours.
‖Obliged to stand still and draw breath, scarcely able to do so. θVeta.
Heaviness in chest and obstructed breathing obliged him to walk slowly.
‖Impeded respiration, violent palpitation, with feeling of weariness, making further progress impossible. θVeta.
‖Frequent spasmodic dyspnœa. θChronic constipation.
‖Dyspnœa, from emphysema, asthma or disease of heart.
‖‖Want of breath in those engaged in athletic sports; or in those using tobacco or whisky to excess.
‖‖Hæmoptysis. θVeta.

[27] **Cough.** Trifling cough, causing tingling in hands.
‖On coughing, pain in occiput.
Cough, in morning, with whitish-yellow expectoration, dense and viscous, at same time dryness of mouth and throat with thirst.
Cough dry in evening, in bed.
‖Cough from cold air and fast walking.
‖Sputa scanty, but relieving. θCough.
‖Expectoration of small lumps, like boiled starch, immediately after rising in morning.

[28] **Inner Chest and Lungs.** Vainly endeavors to fill lungs with air by full inspirations and utmost enlargement of chest. θVeta.
Pains under clavicles, more severe under left.
During the whole day, feeling of constriction in upper portion of both lungs.
Transient shooting pains in l. lung, between third and sixth ribs, < during a deep inspiration.
‖Suddenly attacked with cramp in chest; she became quite cold and could not continue the ascent. θOver-exertion in ascending heights.
‖Rush of blood to chest with slight headache. θVeta.
‖Emphysema. θPhthisis pulmonalis.

[29] **Heart, Pulse and Circulation.** ‖Throbbing of heart against ribs audible. θVeta.

Digitized by Google

‖Palpitation of heart with general weakness. θVeta.
‖Violent palpitation from incarcerated flatus. θChronic constipation.
‖Angina pectoris while climbing; she became quite cold.
‖Exhaustion of heart with irregular action.
‖‖Disease of heart, functional, from overexertion.
Increased frequency of the pulse, in one instance from 70 to 143 beats per minute.
‖Pulse 108 to 120. θVeta.
Pulse weak, quickened, small.
‖Pulse intermitting every fifth beat. θHeart disease.

[30] **Outer Chest.** ‖Spasm in chest. θFrom overfatigue while ascending a mountain.

[32] **Upper Limbs.** Pain in fourth finger of r. hand, it was cold and remained so for weeks, also affecting little finger.

[33] **Lower Limbs.** ‖Weakness in walking.
‖Impaired power of walking. θChronic constipation.

[34] **Limbs in General.** ‖Feeling of internal cold, with numbness of hands and feet. θVeta.
‖Rheumatism, coming from slightest cold.

[35] **Rest. Position. Motion.** Rest: anguish, weariness and torment only diminish with perfect rest; after every ten steps obliged to take rest.
Sitting: piles painful.
Lying down: < shocks in head, dull, full feeling in occiput.
Obliged to stand still and draw breath, scarcely able to do so.
He lays himself upon the earth, unable to drag himself any farther.
Impossible to make any exertion, lassitude, desire to remain constantly in bed.
Head inclined forward, with giddiness and fear of falling.
Only possible position in bed is on face.
Awakes at night lying on back.
Elevating head or turning eyes up < headache.
Walking: fear of falling; involuntary quick stepping; piles painful; cough; weakness.
Heaviness in chest and obstructed breathing, obliging him to walk slowly.

[36] **Nerves.** Retards hunger and imparts unusual buoyancy, enabling one to ascend great heights, carry burdens, or run rapidly without the sense of fatigue or breathlessness.
‖Erethism in the sensitive sphere.
‖Nervousness and nightly restlessness of children during dentition.
‖Can find rest nowhere. θVeta.
‖Nervous depression, result of overwork, mental anxiety, sexual excesses or abuse of tobacco.
‖Trembling; he lays himself upon the earth, physically

Digitized by Google

and mentally unable to drag himself any farther, half unconscious. θVeta.

▮Feeling of weariness amounts to an impossibility of advancing, owing to impeded respiration and violent palpitation of heart. θVeta.

▮Impossible to make any exertion, lassitude with desire to remain constantly in bed. θAfter operation for cancer.

▮▮Debility during convalescence from typhus.

▮▮Fainting fits from nervous weakness.

Hysterical complaints.

[37] **Sleep.** ▮Inclination to sleep and constant weariness, which do not induce refreshing sleep. θVeta.

▮▮Inclination to sleep, but can find no rest.

Awakes at night, lying on back.

Sleeplessness in the night, or sleep too sound and heavy.

[38] **Time.** Early in morning: sensation of dryness in throat.

In morning: on first rising, sharp headache in r. temple; no taste; sensation in mouth and palate as if he had eaten pepper; cough, with whitish-yellow expectoration, dense and viscous; dryness of mouth and throat with thirst.

In afternoon: headache with chilliness.

After dinner: giddiness and chill.

After supper: hiccough.

In evening: in bed, most severe oppression with great anxiety and prostration; in bed, dry cough.

At night: sensation in mouth and palate as if he had eaten pepper; rises to urinate; enuresis; oppression of breathing; awakes lying on back; sleeplessness, or sleep too sound and heavy, heat and sleeplessness, with throbbing in arteries.

[39] **Temperature and Weather.** Cold air: cough from.

Cold: rheumatism from slightest.

Worse in all stages of weather with a low barometer, also if remissions come during the high tides of barometer.

[40] **Fever.** Chilliness and headache in afternoon.

At night heat and sleeplessness, with throbbing in arteries.

Flushes of heat on back and burning in abdomen.

The fever distinguished by extreme weariness accompanying it.

▮Debility during convalescence from low fevers.

▮Night sweats.

[41] **Attacks, Periodicity.** Spasmodic: colic; dyspnœa.

Sudden: attack of cramp in chest.

Transient: shooting pain in l. lung.

Frequent: eructations; discharges of inodorous flatus.

Constant: desire to stool; need of deep respiration; weariness and inclination to sleep.

Digitized by Google

For a long time: great satiety.
All day: headache in r. temple when looking up; constriction in upper portion of both lungs.
Every day: bowels moved one hour later.
Dull frontal headache, which vanishes with setting of sun.
Headache > after eating, returning in three and a half hours and leaving at sunset.
Nightly: restlessness of children, during dentition.
Aggravations from midnight to 4 A.M., or from 10 A.M. till 2 P.M.
For weeks: pain and coldness in fourth finger of r. hand, also affecting little finger.
Deafness of three months duration.
Chronic: constipation; dyspepsia.

" **Locality and Direction.** Right: slight shooting pains in temple; headache in temple darting to top of head; pressing headache on side of occiput and side of forehead; pain and coldness in fourth finger of hand; also affected little finger.
Left: severe pain under clavicle; transient shooting pains in lung, between third and sixth ribs.
From r. to l.: epistaxis.

" **Sensations.** Feeling of anguish increased with failure of every effort to strive against the weariness.
As if brain was muddled; as if a rubber band was stretched over forehead; as if eyes were squinting inward; as if he had eaten pepper; as if throat was swollen; as if œsophagus would be rent by force of rising flatus.
Pain: in perineum at end of urination; in piles on walking or sitting; in occiput on coughing; under clavicles; in fourth finger of r. hand, also affecting little finger.
Violent pain: just over eyes in r. temple.
Shooting: in r. temple; in l. lung between third and sixth ribs, < during a deep inspiration.
Burning: in abdomen.
Sore feeling: from r. temple to top of head.
Tension: over forehead; in hypochondria, after meals.
Pressing: on back of head and weariness; on r. side of occiput and r. side of forehead.
Pressure: in hypochondria, after meals.
Oppression: of respiration; of chest.
Cramp: in chest.
Constriction: in upper portion of both lungs.
Spasm: in chest.
Shocks: in head.
Aching: behind eyes.
Fulness: in forehead; in occiput; in stomach.

Digitized by Google

Heaviness: in chest.
Tingling: in hands, caused by trifling cough.
Numbness: of hands and feet.
Weakness: general; in walking.
Weariness: amounting to an impossibility of advancing; extreme with fever.
Lassitude, impossible to make any exertion.
Dull feeling: over whole brow; in occiput.
Emptiness: in stomach.
Dryness: in throat; of lips and mouth.
Heat: on back, flushes of; of skin.
Coldness: in fourth finger of r. hand, also affecting little finger; feeling of internal.

[44] **Tissues.** Retards destructive metamorphosis and imparts temporary vigor.
Overexcitement of nervous and muscular systems.
In mental or physical fatigue or exhaustion; dyspepsia; hysteria; nervous erethism; protracted fevers; spinal irritation and convulsions; bad effect of stimulants, alcohol, tobacco, etc.
Diminished secretion of solid ingredients of urine.
Emaciation.
Marasmus of children.
‖Rheumatism, coming on from slightest cold.
‖Scurvy from anæmic conditions.
‖Scrofula.

[45] **Touch. Passive Motion. Injuries.** Touch: occiput painful and tender to.
Ill effects from climbing mountains or æronauting.

[46] **Skin.** ‖Increased heat of skin.
‖Dry papular eruption on back of hand.
‖Protection to cutaneous diseases.

[47] **Stages of Life, Constitution.** Suits persons who are wearing out under the mental and physical strain of a busy life, suffering from exhausted nerves and brains.
Suits bashful, timid people, ill at ease in society.
Old people, not only when losing their breath, but for other ailments.
Children with marasmus.
Weakly, nervous, fat or plethoric persons and such as have disease of heart and lungs suffer more from veta.
Miss R., æt. 24, tall, slim, black eyes and hair, very pale; sick three years after removal of mammary cancer.
Man, in consequence of dissipation; heart disease.
An old soldier, æt. 102; deafness.

[48] **Relations.** Has been used for centuries by the natives of Peru, Chili and Bolivia as a substitute for tobacco, betel, hasheesh and opium.

Compare: *Stramon.* patient likes company, *Coca* patient solitude; *Stramon.* light, *Coca*, darkness; *Arsen.*, injurious effects of climbing heights; *Paullinia, Scutellaria, Cyprip.* and *Valer.*, tea, coffee, *Cann. ind.*, and tobacco.

COCCINELLA SEPTEMPUNCTATA.

Lady bird; Sun chafer. *Coleoptera.*

A well-known and widely spread insect, living on vegetables in gardens and fields. Its head and thorax are black, flat, under body and feet black, wing-shells arched, oval, red or orange-yellow, with black dots, usually seven in number, of unequal size, the wings nearly as long again as body. When touched with hand there issues from joints of feet thickish juice, yellow, like gambogia.—Am. Hom. Pharm.

Tincture prepared from the freshly crushed beetles.

Dr. Corradori was the first who directed the attention of physicians to the value of this remedy in affections of the teeth; Dr. Hirsch confirmed his views, and made it public in 1798. (See Salzburger, Med. Ztg., vol. 3, p. 76; Roth, N. A. J. H., vol. 2, p. 45.)

Dr. Sauter states that if the insect is crushed upon the gum of a healthy person it excites a feeling of coldness in the part, without which sensation a cure is seldom effected.—N. A. J. H., vol. 2, p. 45.

According to Noak and Trinks, the Coccinella septempunctata has been used in hydrophobia.—B. J. H., vol., 15, p. 688.

CLINICAL AUTHORITIES.—Franz, Archiv f. Hom. 13, 2, 187; Sauter, Hufel. Jour., 14, 2, 91 (from Roth's Mat. Med.); Pehrson (sore throat), manuscript; *Chronic faceache; Frontal neuralgia; Periodical toothache; Nocturnal attacks of toothache;* Sauter (translated by Roth), N. A. J. H., vol. 2, pp. 45 and 474.

[2] **Sensorium.** ǁSlight vertigo after cessation of toothache.
ǁDisappearance of pain in face attended by fainting, oppressed breathing, subdued intermittent pulse. θToothache.

[3] **Inner Head.** ǁPressure and heaviness in forehead. θNeuralgia.
Tensive pressure in head of very brief duration.
One-sided headache in forepart of head, tearing, fine sticking.
Dull headache towards both temples and occiput, as if brain would become enlarged or distended at these places.

[4] **Sight and Eyes.** ǁPressure and heaviness, especially over r. eye, which is sensitive to least touch. θNeuralgia.

Digitized by Google

During whole paroxysm, cannot open eyes, pain < by any bright object. θNeuralgia.

Eyelids open with difficulty, light increases pain. θNeuralgia.

[8] **Upper Face.** Tearing pain rhythmical with pulse, extending from r. upper jaw to lobule of ear.

Redness and heat of cheeks, especially at night.

Rush of blood to face, like flushes of heat.

Pain over whole side of r. face, suddenly jumping to l. side, after use of lancet. θToothache.

Pain in course of frontal nerve, becoming more and more severe. θNeuralgia.

Pain extending over whole face, even to hairy scalp. θPeriodical toothache.

Chronic pain extending from superior molars to forehead; affected part paler; attack lasts only about one minute; but is instantly repeated; < at night, preventing sleep for many weeks.

Frontal neuralgia, attack commencing by a pressure and heaviness in forehead, especially over r. eye, which was sensitive to least touch; attack lasts six to twelve hours, ending in a general heat and sleep of two to three hours, at end of which he awoke without the least pain; paroxysms returning every eight, twelve, fourteen or twenty-one days.

[10] **Teeth and Gums.** Sensation of coldness in all the teeth.

Pleasant sensation of coldness in one tooth when touched with finger.

Painful sensation in back teeth, as if they were hollow and air was forced into them.

Dull, drawing pain in upper back teeth, extending towards r. ear while sitting.

Severe drawing, in jerks, as though tooth would be torn out with a hook.

Rhythmical, violent drawing, in both rows of teeth, while eating.

Jerking and tearing in one and tearing in the other teeth, with some stitches extending towards occiput, and warmth through whole head.

Grumbling pain in back teeth.

Violent throbbing or pulselike jerking in back teeth.

Periodical toothache, coming on every day at noon in third inferior molar, extending over whole face, even to hairy scalp.

Raging toothache during day, almost entirely disappearing at night, sleep sound and undisturbed.

Gum swollen.

[11] **Taste and Tongue.** Tobacco bites tongue severely.

Digitized by Google

[12] **Inner Mouth.** Sensation of icy coldness in entire buccal cavity.

[13] **Throat.** Is awakened by profuse accumulation of saliva; vomits and complains of sore throat.

[14] **Appetite, Thirst, Desires, Aversions.** ‖Loss of appetite. θNeuralgia.

[28] **Respiration.** ‖With disappearance of pain in face breathing becomes oppressed. θToothache.

[29] **Heart, Pulse and Circulation.** ‖Subdued, intermittent pulse, with remission of pain in face. θToothache.

‖Contracted pulse. θToothache.

[34] **Limbs in General.** ‖Icy cold extremities. θNeuralgia.

[35] **Rest. Position. Motion.** While sitting: dull, drawing pains in upper back teeth, extending towards r. ear.

[36] **Nerves.** ‖Is much weakened by long-continued suffering. θToothache.

[37] **Sleep.** ‖Nocturnal attacks of toothache, entirely preventing sleep, even when pain did not appear at night, could not sleep.

‖Attack ends in a general heat and sleep of two or three hours, from which he awakes without any pain. θNeuralgia.

[38] **Time.** At night: heat of cheeks; sleep prevented for many weeks by chronic pain in face; attacks of toothache, entirely preventing sleep, even when pain did not appear, could not sleep.

[41] **Attacks, Periodicity.** Of brief duration: tensive pressure in head.

Raging toothache during day, almost entirely disappearing at night.

Lasting six to twelve hours: attacks of frontal neuralgia.

Periodical: toothache, coming on every day at noon in third inferior molar, extending over whole face, even to hairy scalp.

Paroxysms of frontal neuralgia returning every eight, twelve, fourteen or twenty-one days.

Chronic: pain extending from superior molars to forehead; attack lasts only about one minute, but is instantly repeated, < at night, preventing sleep for many weeks.

[42] **Locality and Direction.** Right: pressure and heaviness over eye, which is sensitive to least touch; tearing pain, rhythmical with pulse, extending from upper jaw to lobule of ear; dull, drawing pains in upper back teeth extending towards ear.

From r. to l.: pain over whole side of r. face suddenly springing to l. side, after use of lancet.

[43] **Sensations.** As if brain would become enlarged or dis-

tended at temples and occiput; as if back teeth were hollow and air was forced into them; as if tooth would be torn out by a hook.
Pain: in face; in eyes < from light or any bright object: in course of frontal nerve, becoming more and more severe; extending over whole face, even to hairy scalp.
Stitches: extending towards occiput, with toothache.
Fine sticking: in forepart of head.
Jerking in one and tearing in the other teeth.
Tearing: in forepart of head; rhythmical with pulse, extending from r. upper jaw to lobule of ear.
Severe drawing, in jerks, as though tooth would be torn out by a hook.
Rhythmical, violent drawing in both rows of teeth, while eating.
Drawing: in upper back teeth extending towards r. ear.
Soreness: of throat.
Tensive pressure: in head.
Pressure: in forehead; over r. eye.
Oppression: of breathing.
Violent throbbing or pulselike jerking in back teeth.
Grumbling pain: in back teeth.
Dull: headache towards both temples and occiput; in upper back teeth, extending towards r. ear.
Heaviness: in forehead; over r. eye.
Tobacco bites tongue severely.
Heat: of cheeks; to face, flushes of.
Warmth: through whole head, with toothache.
Coldness: of skin of whole body; in teeth.
Icy coldness: in entire buccal cavity; of extremities.

[45] **Touch. Passive Motion. Injuries.** Touch: r. eye sensitive to least.

[46] **Skin.** Skin of whole body moist and cold. θNeuralgia.

[47] **Stages of Life, Constitution.** Woman, æt. 30, robust; toothache.
Young lady; frontal neuralgia.

COCCULUS.

Cocculus Indicus. *Menispermaceæ.*

Tincture of the powdered seeds, which contain a crystallizable principle, Picrotoxine, a powerful poison.

Cocculus was used by the ancients as a poison for fish, stupefying them, and rendering it easy to catch them.

It has been, and still is, extensively used for adulterating malt liquors.

It was known to the Arabian physicians, and for a long time imported into Europe from the Levant. It is now brought exclusively from the East Indies.

It was first introduced into the Materia Medica and used as a remedy by Hahnemann, who proved it on himself and his disciples. Reil employed a tincture of the seeds with success in chorea, hemiplegia from cold, and paralysis of bladder from the same cause.

Mind. Stupid feeling in head.
Loud cries of despair, and irritation, alternate with stupefaction of brain. θProsopalgia.
Memory weakened, or want of memory; head readily fatigued by mental exertion.
Distracted; he easily forgets of what he has just thought.
During the attack speech difficult, afterwards difficulty in reading and thinking. θVertigo.
Time passes too quickly.
Often failed to use right expression for thoughts, could scarcely recollect anything: mumbled, so that it was great trouble for him to pronounce his words. θTyphoid.
Thinks and answers correctly but slowly; takes a long time in reflecting.
Slowness of comprehension; cannot find the right word; what has passed he cannot remember; forgets himself, cannot talk plainly, or is irritable, speaks hastily, cannot bear least noise or contradiction.
Difficulty in understanding what is heard or read and in appreciating the lapse of time.
Thoughts fixed on one unpleasant subject; she is absorbed within herself and observes nothing about her.
She appears imbecile; at other times acts like a maniac, is wicked, talks constantly; dances and makes all kinds of gesticulations. θMental derangement following amenorrhœa.
Angry and indignant form of delirium, when roused complains of dizziness and cephalalgia, as if head was tightly compressed; soon falls into a murmuring stupor, with tossing of head and trembling of hands; has not slept an instant for seven days. θEncephalitis.
Mental derangement with vertigo, constant desire to escape; great fear and talkativeness.
Talkativeness with witty joking.
Irresistible inclination to sing and tra la; a kind of mania.
Sobbing, moaning and groaning.
Intolerance of noise or any disturbing influence.
Lies with eyes closed, regardless of what is passing around him.
Languid, shirks her work. θAmenorrhœa.
Is sad and complaining.
Great sorrowfulness, with constant inclination to sit in a corner buried in thought.

Digitized by Google

‖Changeable, hypochondriacal humor, melancholy reflections; disposition to be anxious and frightened.
‖Melancholy and sad; indulges in sad reveries; is sensitive to insults, slights and disappointment.
‖Melancholy and sadness, with weeping and constant profound absorption in sorrowful thoughts; great apprehensive anxiety of conscience, and feeling at heart as after committing a wicked deed, with desire to escape.
‖Pale, prostrated and full of despair. θMenorrhagia.
‖Apprehensive mood; fears death and unknown dangers.
‖Great fear of death. θGastritis.
Frightened look.
‖Mental terror during paroxysm. θPuerperal eclampsia.
‖Little concerned as to his own health, he is very anxious about others' sickness.
‖Mild, indolent and despondent in the face of difficulties.
Tearful chagrin about least trifle.
‖Vacillating, cannot accomplish anything at her work or finish anything; with contracted pupils.
‖Nothing pleases her, is tearful and easily discouraged. θChronic diarrhœa.
‖Very sensitive mood; everything worries him; irritable; sullen.
Excessive irritability, excited by loud talking or least increase of temperature.
‖Very easily affronted; every trifle makes him angry.
‖Angry and indignant form of delirium. θEncephalitis.
‖Startles very easily.
When her mind is turned away from herself her sufferings are forgotten.
‖Ill effects of anger and grief.

Sensorium. ‖Vertigo: as if intoxicated; with confusion of mind; with nausea; when rising from a recumbent position; whirling; πthings whirl from r. to l.; with dulness in forehead, as if there was a board across head; with pressure in forehead; with flushed hot face and head; following palpitation of heart.
‖Vertigo, occurring every two weeks and lasting several days; comes during stool, when assuming an erect position in bed, while standing, but most frequently after eating.
‖Dizziness with ringing in ears and headache. θTyphoid.
Hysterical dizziness.
Giddy, empty feeling, as if there was no head.
‖Sensation of emptiness and hollowness in head, < in open air and after eating, > when getting warm in bed.
‖Congestion of blood to head, with mental derangement. θAmenorrhœa.

Digitized by Google

Sensation of cloudiness in head, with dimsightedness and black spots before eyes after reading.
Clouded, confused feeling in head, with aching pain in forehead.
‖Dulness of head, as after being drunk.
‖Confusion of head, generally increased by eating and drinking.
‖Dulness and confusion of head, < by reading, frequently obliged to pause in order to understand what he is reading.
‖Confusion of head; giddiness when sitting up; roaring in ears; heat in head and shivering of whole body. θTyphoid.
Objects around seem to move up and down on sitting up, with nausea.
‖Constant sensation as if about to faint. θDysmenorrhœa.
Semiconsciousness.
‖Is conscious during paroxysm, but cannot move. θPuerperal eclampsia.
Syncope following any bodily exertion.
Falls down unconscious, with nausea and vertigo.
‖Falls suddenly to the ground unconscious, no restorative calls forth least sign of life.
Coma and coma vigil.
‖‖Seasickness.

[3] **Inner Head.** ‖Thinking fatigues head.
‖Painful sensation of emptiness in head.
‖Head dizzy, heavy and painful. θIntermittent fever.
Weight in head, with great weakness of muscles of neck.
‖Pressing pain in forehead, from without inward, with nausea; < by riding in a wagon; reading and thinking; from eating; drinking and sleeping; > during rest, in-doors.
Beating in forehead, evenings, < before and after eating; also when riding, especially in cold air; from talking; > in-doors.
Drawing, pulsating pain, especially in forehead, with nausea, violent vomiting and sense of contusion in hypogastrium.
Headache chiefly in forehead and temples; somewhat in vertex.
Compression, dull and undulating sensation in frontal region.
Frequent attacks of headache over r. frontal eminence, which last a few minutes, followed by a violent, lancinating, throbbing pain, then a sensation of formication felt over this part, after which headache ceases.
‖Headache as if something forcible closed eyes, or as if eyes were being torn out.

Digitized by Google

Pains pass from over r. eye into head.
Brain feels as if constricted by a ligature, throbbing in temples.
Stitches in temples and in r. frontal region.
Sensation of a blunt body forced slowly into r. temple.
‖Pressing, throbbing headache in both temples.
‖Headache in temples as if head was seized in a vise.
‖Throbbing in vertex < by motion of eyes and touch of fingers, with congestion to head.
‖Violent headache extending from vertex to l. side of forehead and nose. θApoplexy.
‖‖Headache in occiput and nape, pain as if opening and shutting like a door.
‖Headache, pain extending down spine; head hot; eyes and balls protruding.
‖Violent, dull headache, cannot lie a moment on back of head, forced to lie on side; cannot bear least light; noise excites nausea, feeling of seasickness, objects move up and down.
Violent headache, which compels patient to sit up, < by talking, laughing, noise, or bright light.
‖Sick headache, with vertigo. θSpinal irritation.
‖‖Headache, with nausea and inclination to vomit.
‖Nervous or gastric headaches, with nausea as if at sea, violent vomiting or cramps.
Painful concussion in brain when walking, moving head, or talking.
‖Feeling as if brain was rolled up or compressed into a small bulk.
Constrictive headache, tearing and boring pain, with heat and nausea.
‖Head is painful as if bound up; as if tightly bound by a cord; as if nerves in head were drawn up tightly.
Lancinating pain, especially on one side of head.
‖Pressing headache from without inward; or, as if compressed by a bandage; or, as if screwed together.
Digging and boring in head.
‖Violent, throbbing, tearing headache, < by motion and talking and in evening.
‖Headache < during heat, with heaviness in head, < on sitting up. θIntermittent.
‖Headache from working in sun, or from riding through sand in hot sun.
‖‖Sick headache from riding in a carriage, boat, train of cars, etc.
‖Headache, with colic, after catching cold.
‖Headache returns at each catamenial period.

Outer Head. ‖Sensation on l. side of occiput as if hair was rising up. θEczema capitis.

Digitized by Google

‖Convulsive trembling of head from weakness of muscles of neck; < in open air and after sleeping; from coffee and tobacco; > in warm room.
Spasmodic shaking of head.
‖Tossing of head and incessant trembling of hands. θEncephaloid.
Cramplike pain in l. temporal muscle.
‖Severe tearing pains on one side of head, especially in bones and particularly in l. jaw.
Head is most relieved by leaning it back.

Sight and Eyes. ‖Objects seem to move up and down.
‖Dark spot before eyes, though objects appear clearly.
Muscæ volitantes; a black figure seems to float before eye, moving as eye moves, yet without impairing vision.
Black spots before eyes after reading.
‖While reading, can only see l. half of line of writing.
‖Dimsightedness.
‖Light does not affect the eyes, sight being gone. θEncephalitis.
‖Pain in l. side of head and eye, then blindness and unconsciousness. θPuerperal eclampsia.
‖Sclerotic of l. eye most inflamed; a rose-colored, inflamed circle, deeper in color next cornea, diminishing towards canthi; cornea dim, as if colored with dust, surrounded by a bluish-white circle; iris of l. eye inflamed, especially towards its inner border; pupil drawn upward, angular and contracted; photophobia and contraction of upper lid, no lachrymal flux, sees as through a veil. θRheumatic ophthalmia.
‖Rheumatic glaucoma, with venous hyperæmia, dilated pupils, insensibility to light, haziness of lens and vitreous, severe pain in and around eyes; iritis, with corneal and scleral complications, pupils irregular and contracted, blue borders around cornea, photophobia, no lachrymation, tearing pains in brow and l. side of head.
Pupils dilated or contracted.
‖Eyes open and immovable. θPuerperal eclampsia.
‖Eyes closed, with balls constantly rolling; pupils dilated. θSudden unconsciousness.
‖Eyes protruding.
Headache: as if eyes would be torn out; or as if eyes were forcibly closed.
Stitches or shooting in eyes from within outward.
Pressure in both eyes, as from dust in them.
Dull pressure on outer border of orbit.
Blue margins around eyes.
‖Pressive and contused pain in eyes at night, with difficulty in opening lids.

Digitized by Google

‖Jerking of eyelids.
Eyelids feel as if paralyzed. θTyphoid.
Dryness of lids.
‖Eyelids inflamed.

[6] **Hearing and Ears.** ‖Sensitiveness of hearing; dreads sudden noise.
‖Noise in ears like rushing of water, with hardness of hearing.
‖Roaring or ringing in ears. θTyphoid.

[7] **Smell and Nose.** ‖Sense of smell either acute or weak.
Worse from strong smells.
Sneezing; coryza.
‖Discharge from nose bloody; puslike.
‖Ulcerated nostrils. θIntermittent.

[8] **Upper Face.** Countenance devoid of all signs of mental activity.
‖Red cheeks and heat of face, in cold room.
Flushed hot face and head with vertigo or unconsciousness.
‖‖Burning heat and redness of face with great thirst and small, hard pulse. θInflammation of liver.
‖Face bloated, hot and red; suffused with perspiration, which stands out in drops, and is now cold, now hot; eyes closed; unconsciousness; spasmodic jerks through whole body; face very much distorted. θConvulsions.
‖Intoxicated aspect. θIntermittent.
Face pale; blue around eyes; pinched, pale features and sharp nose; pale and sallow, puffy and bloated; yellowish-grey; eyes dull and glassy; earthy, with a very painful expression.
‖‖Leaden hue of face, anguish about heart. θPuerperal eclampsia.
‖Face puffed, sometimes bluish. θChorea.
Quivering and twitching of eyelids, facial muscles and limbs. θTyphoid.
‖Attacks of prosopalgia coming on regularly in afternoon; before occurrence of paroxysm, irritable disposition, prostration, yawning, chilliness, coldness of feet; then follows a violent jerk in affected nerve (pes anserinum); boring, stitching, crushing, lancinating pains in jaws, drawing, jerking in sympathetically affected nerves; these radiations extend very far, as far as finger points.
‖Face distorted and cold to touch. θProsopalgia.
‖Wing of nose, corner of mouth and tip of tongue distorted. θApoplexy.
‖Paralysis of one side of face.
‖Tearing pains in eyebrows and l. side of head, < in evening and at night. θRheumatic ophthalmia.
Sensation of dull pressure on l. malar bone; cramplike

Digitized by Google

pains in temporal and malar regions, < on opening mouth.
Swelling of one eye and half of nose in morning, after a violent headache during night.
‖Sweat in face, cold.

[9] **Lower Face.** ‖Quivering of lower jaw and chattering of teeth when attempting to speak. θIntermittent.
Pressive, benumbing, cramplike pain in region of malar bone and masseter muscles, < by opening jaw.
‖Lips parched and dry, slight thirst. θEncephalitis.
‖Corners of mouth sore. θIntermittent.
‖Pustule below r. angle of mouth, with tensive pain when touched.
‖Swollen, hard glands under lower jaw, and nodes on forearm, which are painful when stroked.
‖Swelling of parotid glands.

[10] **Teeth and Gums.** ‖Chilly feeling through teeth, and fine drawing in borders of teeth. θProsopalgia.
Teeth are long and loose.
‖Hollow tooth, pains only when chewing, even soft food; not when biting with empty mouth.
‖Drawing in dental nerves continues during remission of paroxysm. θProsopalgia.
Toothache in upper incisors.
‖Toothache, with headache and ringing in ears. θGastritis.

[11] **Taste and Tongue.** Taste: bitter; putrid; sour; nauseous; offensive; metallic; coppery; like sulphur; pappy.
‖Putrid, sour taste, with aversion to acid drinks. θIntermittent.
‖Foul taste in mouth. θCramps.
‖‖Metallic taste with loss of appetite.
‖Food tastes as if it lacked salt.
Sourish taste after a meal.
‖Tobacco tastes bitter.
‖Bitter taste at root of tongue.
Speaks hastily, cannot endure contradiction.
‖Talks in a muttering, mumbling manner; it requires great effort to speak the words plainly. θTyphoid. θApoplexy.
‖Speech difficult at beginning of attacks of vertigo; afterwards, difficulty in reading and thinking; attacks occur every fourteen days.
‖Tongue seems paralyzed; speech difficult.
‖Tip of tongue distorted. θApoplexy.
‖‖Peculiar sensation at root of tongue. θPuerperal eclampsia.
Sensation of swelling at root of tongue.
Pain at base of tongue when stretching tongue out.

Google

Dry, rough tongue.
‖Dryness of tongue, with a whitish-yellow coat, without thirst.
‖Complains of dryness of tongue, which is moist and clean. θIntermittent.
‖Tongue coated white and dry upon edges.
‖White coating on tongue. θTyphoid.
‖Tongue covered with white mucus. θGastritis.
‖Yellow coated tongue, with aversion to food.

12 **Inner Mouth.** ‖Dryness of mouth, at night, without thirst.
Dryness and burning of mouth and throat, œsophagus seems inflamed, with difficulty in swallowing.
‖Sensation of dryness in mouth, with frothy saliva and violent thirst.
Afflux of saliva with nausea and vertigo.
‖‖Thick saliva. θPuerperal eclampsia.

13 **Throat.** Burning in palate and dryness in fauces.
‖Paresis of deglutition and of tongue. θTyphoid.
‖Pressive pain in tonsils, < when swallowing saliva than when swallowing food.
‖Choking constriction in upper part of fauces, with difficult breathing and irritable cough, or disposition to cough.
Sensitiveness of throat and a sense of constriction as if lame.
‖Spasms in throat. θProsopalgia.
‖Dryness in pharynx and œsophagus. θIntermittent.
‖Burning in œsophagus, extending into fauces, with taste of sulphur in mouth.

14 **Appetite, Thirst. Desires, Aversions.** ‖Sensation of hunger at epigastrium, with disgust for food.
‖Will eat nothing but bread and water, at other times eats ravenously. θMental derangement from amenorrhœa.
‖‖Loss of appetite, metallic taste in mouth.
‖‖Extreme aversion to food, caused even by smell of food, although with hunger.
Sensation of hunger or of emptiness, even to fainting, or real bulimy.
Intense thirst while eating.
‖Longing for cold drink, especially beer.
‖Thirst with aversion to drink; drinking < tension in abdomen. θIntermittent.
Thirstless.
‖‖Slight thirst, lips parched and dry. θEncephalitis.
‖Aversion to sour things and to beer.

15 **Eating and Drinking.** ‖All symptoms and affections, particularly of head, < by eating or drinking.
‖Coffee aggravates headache.

Digitized by Google

Eats and drinks very little. θIntermittent fever.
After eating or drinking anything cold, tearing pains in limbs. θLeucorrhœa.
After eating, pains of contusion, of pressure, of grinding and squeezing in pit of stomach.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.
Eructations: empty; fetid; bitter; putrid, causing sore pain in epigastrium and chest; followed by pain (stitching) in stomach.
Nausea felt in head.
Marked tendency to nausea resembling seasickness, as if stomach heaved up and down, becomes sick by looking at the pitching of a vessel.
Nausea: with vertigo and muscæ volitantes; caused by tormenting dryness in pharynx, > by swallowing (θintermittent); in afternoon after every drink, it seems to be mostly in mouth; provoked by eating, drinking, motion, becoming cold, or sudden change of posture; producing fainting; to point of vomiting, with faintness and vertigo when lifting head; with inclination to vomit, in morning, can scarcely rise on account of faintness.
Nausea and inclination to vomit while riding in a carriage, boat, train of cars, etc.
Disposition to vomit, with profuse flow of saliva, on getting a chill or taking a cold.
Disposition to vomit in connection with headache and pain in bowels, as if bruised.
Ineffectual efforts to vomit. θGastritis.
Directly after rising, nausea and vomiting of food. θIntermittent fever.
Morning nausea and vomiting of food and mucus, especially at night, with sleeplessness, headache and constipation.
Vomiting of mucus and water, with distension of abdomen, pain < after vomiting. θHepatitis.
Vomiting of green mucus > oppression in chest. θIntermittent.
Unable to retain any food on stomach; vomit foul, sometimes bitter. θColic.
Vomit: sour; bitter; bilious; of bad odor.

[17] **Scrobiculum and Stomach.** Contractive pain in epigastrium, taking the breath.
Epigastrium commences to bloat with beginning of chill, increases more and more; sensitive to external touch; spasmodic internal heaving. θIntermittent.
Collection of wind in epigastrium. θProsopalgia.
Sensation in stomach as if one had been a long time without food till hunger was gone.

Digitized by Google

Sensation as though a worm were moving in stomach.
Painful sensation of fulness in stomach impeding respiration. θGastritis.
Spasms of stomach with shortness of breath, fulness with griping in stomach, followed by a sensation of emptiness.
Violent spasms of stomach, with griping, tearing pains.
In morning between 8 and 9 o'clock, after a quiet night, twisting sensation in stomach, with great pain, nausea, anxiety and perspiration; empty eructations without much relief; foul taste in mouth; attacks last three to four hours, each attack growing less severe as evening advances.
Violent attacks of gastralgia, she has to roll and twist, is thirsty, gasps for breath, sometimes wakes from sleep.
Violent cramp of stomach; griping, pinching, constrictive pain.
Pain beneath stomach immediately after eating.
Tensive feeling below stomach as if waist was constricted by a tight band, < from pressure. θIntermittent.
Pinching, constrictive pain in upper abdomen after eating, extending to l. side of abdomen and chest.
Chronic dyspepsia from abuse of stimulants or from too long study.
Acidity of stomach. θChronic prosopalgia.

[18] **Hypochondria.** Pressive pain in hepatic region, < by coughing and bending over.
Stitches in hepatic region. θGastritis.
Pain in region of spleen, at first < then > by lying on that side. θIntermittent.
Enlarged spleen. θTyphoid.
Pain as if beaten in both hypochondriæ.
Pain in r. hypochondriac region extending towards epigastrium and stomach, < by bending forward, coughing and breathing; cannot bear least touch. θAcute hepatitis.
Abdomen feels distended and tense, particularly in l. hypochondriac region, which is painful on pressure. θIntermittent.

[19] **Abdomen.** Emptiness and sensation of hollowness in abdomen.
Great distension of abdomen. θDysmenorrhœa.
Tension in abdomen oppressing chest and hindering deep inspiration and talking. θIntermittent.
Abdomen feels distended and tense, particularly in l. hypochondriac region, which is painful on pressure. θIntermittent.
Tension in abdomen < by drinking. θIntermittent.

Digitized by Google

‖Great rumbling in bowels.
‖Gurgling in abdomen with sensation of contraction near umbilicus. θTyphoid.
‖Abdomen drawn spasmodically towards vertebral column; then becoming swollen and distended, with constantly changing swellings over surface. θColic.
‖Spasmodic, flatulent colic about midnight, flatus passed without relief; belching relieves, < by coughing, pain severest in epigastric, umbilical and r. iliac regions.
‖Distension of abdomen, flatulent colic, pain in umbilical and hypogastric regions as of a heavy stone; every movement or touch pains as from an internal ulcer.
‖Spasmodic, crampy pain in abdomen, with feeling of distension followed by oppressed breathing and sensation of emptiness in bowels.
‖Sensation in abdomen as if sharp stones rubbed together at every movement.
Pressure, sticking and cutting pains in various parts of abdomen, chiefly around navel.
‖Darting pain below umbilicus through to spine. θTyphoid.
Pain in l. side of abdomen < by bending double.
‖Pain under l. ribs < from pressure, sleep disturbed when lying on that side. θIntermittent.
Several stitches through abdomen and lower part of back, from before backward, early in morning, in bed.
‖Constant pain in r. iliac region near cæcum, < from least touch; pain often remits, returning, however, very much aggravated; during paroxysm, drawing pains through whole abdomen, causing her to work the limbs constantly; can find relief in no position. θCold during catamenia.
Constricting pains in hypogastrium, with pressure towards genitals, and qualmishness in epigastrium.
‖Rupture pain < on r. side; fulness in groin, with sensation as if all would give way there.
‖‖Painful inclination to a hernia, especially after rising from sitting.
‖Protrusion takes place very slowly, as if from a paralytic state of abdominal ring. θInguinal hernia.
‖Incarcerated hernia; chill; cutting and burning in abdomen; scrotum as large as a man's fist, hot and tense; pulse full.

Stool and Rectum. Fetid or hot flatus; emission of hot flatulence before stool.
‖Incarcerated flatus; obstruction of bowels.
‖For a week, watery stools, three or four a day; but there would be a dozen if he yielded to it; none in night, but

comes on directly after rising from bed, has scarcely time to dress, diarrhœa < from standing, > by sitting down, with stool, pain in bowels, which causes dyspnœa, sweat and faintness.

Stools: yellow, soft, fecal; slimy; fetid; frequent; thin, painless.

Thin, yellowish, painless stools only by day. θChronic diarrhœa.

Diarrhœa, with sensation in abdomen as of sharp stones rubbing together.

Diarrhœa from riding but a short distance in an omnibus or car.

Soft, loose stool, sometimes yellow, with burning in rectum. θGastritis.

Diarrhœa, with bilious vomiting.

Simultaneous with vomiting, sudden, thin, black, slimy, very fetid stool. θIntermittent.

Small, frequent stools accompanied by flatus.

Urging to stool and burning in rectum, feces at first dry and fetid, later scanty, watery, offensive and weakening. θIntermittent.

Disposition to stool, but peristaltic motion in upper intestines is wanting.

Constipation. θDysmenorrhœa.

Hard stool every other day, expelled with great difficulty.

Foul-smelling stool. θColic.

Prolapsus recti after stool.

After stool, violent tenesmus, even unto fainting.

Hemorrhoidal flux.

Contractive pain in anus, preventing sitting, afternoons.

Burning and itching in anus; anus contracted.

[21] **Urinary Organs.** Frequent desire to urinate, with small discharge.

Tensive aching pain in orifice of urethra, between acts of micturition.

Itching and stinging near fossa navicularis.

Diuresis. θProsopalgia.

Watery urine.

Urine scanty, clear and smarting. θIntermittent.

Involuntary discharge of urine during an attack of epilepsy.

[22] **Male Sexual Organs.** Increased sensitiveness of genitals.

Excitement of genitals, with desire for coition.

Alternate excitement and depression of genitals.

Weakness with excitability of sexual organs, sensitiveness of testicles.

Seminal emissions at night; spermatorrhœa.

Drawing, sore pain in testicles when touched.

Digitized by Google

‖Itching of scrotum.

[23] **Female Sexual Organs.** ‖Painful pressure in uterus, with cramps in chest, fainting and nausea.

‖Cutting, cramping pains, particularly in region of uterus and ovaries, on appearance of menses. θDysmenorrhœa.

‖Uterine cramps.

‖Violent abdominal spasms caused by extreme mortification during menstrual period; howling, crying and moaning.

Cramps deep in abdomen, instead of monthly flow; pressure in chest and anxiety; is so weak she can scarcely speak.

‖Catamenia appears too early, with violent colic.

‖Catamenia two weeks before the time. θIntermittent.

‖‖Menstruation seven days too early, with distension of abdomen and cutting, contracting pains in abdomen on every motion and every breath, together with contraction of rectum.

‖Menstruation eight days too early, pain in upper region of abdomen on every motion, when stooping, and even while sitting, as if inner parts were suffering from sharp pressure of a stone; the parts painful to external touch as if there was an internal ulcer.

‖During each catamenial period, return of headache.

‖During effort to menstruate she is so weak that she is scarcely able to stand or talk.

‖Dysmenorrhœa followed by hemorrhoids.

‖Catamenia lessen during abdominal spasms and become copious with abatement of the pains.

‖Discharge coming in gushes and mixed with mucus during menstrual period.

‖Menses profuse and too often; when rising upon feet it gushes out in a stream.

‖Menses too frequent, with scanty, coagulated, dark blood, with uterine spasms, cardialgia or enteralgia in nervous, sensitive women with irregular menses, spinal irritations and disordered (hysterical) minds.

Menstruation difficult, with violent spasmodic pain in abdomen and loins, < by motion, cold and contact.

Suppression of menses, with spasms in abdomen or chest.

‖Amenorrhœa causing mental alienation.

Menses fitful, scanty and irregular.

Scanty discharge of a few drops of black, coagulated blood.

Sudden cessation of menses.

Menses become more and more scanty until they finally disappear, but the leucorrhœa is constant.

‖Leucorrhœa in place of menses or between periods.

Digitized by Google

Leucorrhœa, like serum, mixed with a purulent, ichorous liquid; leucorrhœa like the washings of meat; bloody; gushing out on bending or squatting down; with frequent urging to urinate, during pregnancy.

Shivering over the mammæ.

[24] **Pregnancy. Parturition. Lactation.** Vertigo, not allowing her to rise from bed; nausea and vomiting, faint feeling and some fever.

Bloody, serous, painless discharge from uterus during pregnancy.

Leucorrhœa, with frequent urging to urinate during pregnancy.

Third month of pregnancy, profuse discharge of bloody mucus.

Spasmodic and irregular labor pains.

Terrible pain in small of back, with hour-glass contraction of uterus.

Spasms following difficult labor, and those brought on by changing position of patient.

Shivering over mammæ.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice whimpering and tremulous. θIntermittent.

Speech difficult. θVertigo.

Talking aggravates all symptoms, particularly of head.

Tightness in larynx.

[26] **Respiration.** Respiration short, noiseless, for several hours scarcely perceptible. θSudden unconsciousness.

Respiration quick, anxious and oppressed. θConvulsions.

Respiration slow, heavy and laborious. θApoplexy.

Pants for breath. θAmenorrhœa.

Obstruction of breath at throat pit, as if throat was constricted.

Dyspnœa: as from constriction in larynx; from pain in bowels during diarrhœic stool; in amenorrhœa.

Cannot take a deep inspiration on account of tension in abdomen and oppression of chest. θIntermittent.

[27] **Cough.** Disposition to cough from irritation high up in larynx, or from constriction in trachea and chest.

Fatiguing, racking cough from oppression of chest, particularly at night.

Tickling cough.

After coughing, coppery, metallic, sour taste in mouth.

Cough < by indulging disposition to cough.

Spasmodic cough occurring in anæmic and hysterical women.

[28] **Inner Chest and Lungs.** Oppression of chest caused by tension in abdomen, which hinders deep inspiration and talking. θIntermittent.

Digitized by Google

Much oppression of chest, a stony sort of a feeling.
ǀContractive tension of r. side of chest, taking breath away.
ǀCramping pain in chest during menstrual period. θDysmenorrhœa.
Pressure under ribs > by belching.
ǀOppression in chest > by vomiting of green mucus. θIntermittent.
ǀAudible rumbling in l. side of chest, as if from emptiness, especially noticeable when walking.
Sense of emptiness or of constriction in chest, heart or stomach.
ǀCramps in chest, hysteric, with sighing and moaning.
Fine stitches in various parts of chest.

[29] **Heart, Pulse and Circulation.** ǀAnguish about heart, face leaden in hue. θPuerperal eclampsia.
ǀPalpitation. θSpinal irritation.
ǀTremulous palpitation of heart, from quick motion and mental excitement; with anxiety; dizziness and faintness and with great tendency to fall.
Palpitation after rheumatism.
ǀIrregular murmuring action of heart; pulse 100. θApoplexy.
ǀPalpitation of heart, followed immediately by vertigo, then stretching of arms, thumbs being drawn inward over palms of hands.
ǀDuring an attack of palpitation he seizes an object by which he may support himself, has vertigo and sensation as if about to faint.
ǀPulse, small, hard, frequent. θSudden unconsciousness.
ǀPulse small and spasmodic, often imperceptible, weak, seldom hard and somewhat accelerated.
Very quick pulse and beat of heart.
ǀPulse frequent, small and tense. θIntermittent.
ǀPulse 96. θTyphoid.
ǀShe feels her pulses beat through whole body during heat, at times palpitation. θIntermittent.
Endocarditis: occasional inflammatory attacks, great anxiety, distorted face; great weakness; with inflammatory swelling of knees; when there remains great fearfulness; after *Acon.*
ǀChlorosis.

[30] **Outer Chest.** ǀPainful stiffness of neck when moving it.
ǀDisabling drawing in small of back.
Red, irregular shaped spots on skin, over whole chest and on sides of neck and behind ears, without heat or itching.

[31] **Neck and Back.** Sensation of cracking or stiffness of vertebræ.

Digitized by Google

Pain in neck on moving head, as if cervical vertebræ were stiff. θIntermittent.

Stiffness of cervical muscles and great weakness. θSpinal irritation.

Weakness of cervical muscles, with heaviness of head.

Stiff pain in cervical muscles on moving neck and on yawning.

Paralytic drawing of sides of throat.

Stitches between scapulæ and in small of back. θGastritis.

Stitches in scapulæ from r. to left.

Pressure in scapulæ and nape of neck.

The pain extends down spine. θHeadache.

Trembling in back.

Paralytic pain in small of back, with spasmodic drawing across hips, which prevents walking, with anxious, fearful mood.

Sensitiveness, as if paralyzed, in back and neck.

She has a great deal of pain in back, as if menses were coming on.

Spasmodic constriction through whole length of spine, especially on motion.

Drawing, lacerating or boring pain in back.

During short intervals of consciousness, complains of great sensitiveness of back and neck and whole spine. θEncephalitis.

Sensitiveness of vertebra to touch, but cannot locate pain. θIntermittent.

Pain in lower part of spine and trembling of limbs. θSpinal irritation.

Constant pain in back, shooting through body to both sides and along spine to occiput and even to temples at times, < by walking and stooping; tenderness on pressure on vertebral spines from last dorsal vertebra to sacrum; frequent giddiness; does not fall asleep until late on account of pain.

Upper Limbs. Stitches in shoulder joint and muscles of upper arm, during rest.

When lifting arm after a meal he feels an excessive, drawing bone pain in shoulder joint and long bones of arm; when touching parts they feel bruised and contused.

Sensation as of very fine, delicate wires or fibres pulling and continually in motion, down both arms from elbow to hand.

Stitches in r. upper arm.

Sensation as if arms were asleep, which alternates with a similar feeling in back, jerking of arms with drawing in thumbs. θIntermittent.

Arms as if asleep, lame; with a crawling sensation.

Digitized by Google

‖‖Numbness and paralytic feeling in arms.
Pain with heaviness of arm.
Pain in arms felt on lifting them.
‖Arms stretched, thumbs drawn inward over palms of hands, with vertigo. θPalpitation.
‖Forearm asleep, with sensation as if hand was swollen.
‖Convulsions of arms with clenching of thumbs—a sort of epileptic paroxysm.
‖Pains radiate as far as points of fingers; paralyzed feeling in arm of that side of body corresponding to affected side of face. θProsopalgia.
‖Numbness of r. and then of l. hand. θGastritis.
‖‖Now one hand and again the other is numb as if asleep.
‖Twitching and jerks in hands and fingers.
‖Incessant trembling of hands. θEncephalitis.
‖‖Hand trembles while eating, and the more the higher it is raised.
Paralysis of hand when writing.
‖Paralysis of l. hand and fingers, particularly of extensors.
‖Hands feel pithy, lose their sensibility.
Now one hand and again the other is alternately hot or cold.
‖Hands look blue and as if frozen. θChorea.
Hard, dry blotches, surrounded by red borders, on limbs, wrists and backs of fingers.
Blister on edge of hand where finger commences.

[33] **Lower Limbs.** Paralytic immobility of lower limbs extending from sacrum.
Lameness and cracking in hip and knee joints.
‖Weakness in lower limbs as if paralyzed. θDysmenorrhœa.
Unwieldiness of lower extremities, legs cannot be lifted in walking, but are dragged along.
‖Legs become more and more useless. θChorea.
Paralysis of lower limbs, with stiffness, numbness and bruised feeling.
‖Paralysis of lower extremities: proceeding from small of back, and arising from cold; after abuse of mercury.
Anguish with convulsive motions of extremities.
Spasms and convulsions of extremities.
‖Pain as if beaten in thighs.
Boil or pimples on inner side of thigh.
‖‖Knees sink down from weakness; totters while walking and threatens to fall to one side.
Paralytic pain in knee joints.
‖Disagreeable pain in knees, cannot rest in any position, < from motion. θIntermittent.
‖Inflammatory swelling of knee, with transitory stinging pains.

Digitized by Google

Cracking in knees when moving.
Acute articular rheumatism, pain springing from joint to joint, with redness, swelling and stiffness; slightest touch or motion causes intense pain.
Sensation of heaviness of feet. θTyphoid.
Soles of both feet go to sleep while sitting.
Burning in feet. θGastritis.
Hot, itching swelling of feet.
Cold feet.
Œdema of feet, with paralysis of lower limbs, after a cold.
Superficial abscess just above root of nail of r. little toe, pain as if a hot iron went into it on raising foot from ground in walking; walks with very great difficulty.

[51] **Limbs in General.** Trembling in all the limbs with chilliness, which does not disappear, even in a warm room, especially evenings.
Trembling and jerking in limbs, occurring frequently, but not lasting long. θTyphoid.
Paralytic condition of limbs, with drawing pain in bones.
Paralytic rigidity of extremities—a sort of partial paralysis.
Paralytic weakness of r. side, numbness in r. upper and lower extremities. θSpinal irritation.
Great weakness; aching of limbs, feeling of weight in feet. θTyphoid.
Here and there in limbs, a laming-drawing, as if in bones, continuous or in attacks.
The limbs are painful when moved, as if they would be broken or crushed by bending.
Tearing pain in limbs, especially after eating or drinking anything cold. θLeucorrhœa.
Painful lameness in arms and legs; can scarcely rise from seat, with loss of power.
Upper arm and thigh cannot be moved in their joints on account of a lame pain.
Involuntary motions of r. arm and r. leg, cease during sleep.
Unable to move r. arm and r. leg, a feeling of numbness as if fallen asleep.
Violent spasms of arms and legs, which were continually shaken and pushed from the body. θConvulsions.
On rising in morning, involuntary movements of r. hand and then of r. foot. θChorea.
Now the hands and again the feet "go to sleep," alternately, in short attacks.
Paralysis of l. hand and foot. θApoplexy.
Hands and feet cold, face pale. θPalpitation.

Digitized by Google

‖Hands and feet become cold after change of position. θIntermittent.
Convulsive motions of the limbs whenever she wants to use them.
‖Cracking and creaking in joints.
‖Painful stiffness of joints.
Pain in bones as if bruised.

[35] **Rest. Position. Motion.** Rest: < pressing pain in forehead, with nausea; stitches in shoulder joint and muscles of upper arm, during.
After lying down in bed: constant yawning and stretching.
Sitting: < heaviness in head; > headache; pain in upper region of abdomen; soles of both feet go to sleep; diarrhœa >.
Standing: vertigo; < diarrhœa.
On lying on l. side: sleep disturbed on account of pain under l. ribs.
Pain in region of spleen, first < then > by lying on that side.
Cannot lie a moment on back of head, forced to lie on side.
Motion: < headache, nausea, pains in abdomen; as if sharp stones rubbed together in abdomen; tremulous palpitation of heart; spasmodic constriction through whole length of spine; disagreeable pain in knees, cannot rest in any position; cracking in knees; articular rheumatism, with intense pain from slightest; limbs painful as if they would be broken or crushed by bending; painful lameness in upper arm or thigh prevents.
On moving body: faintness, with spasmodic distortion of muscles of face.
Changing position: spasms during puerperal state from; hands and feet become cold after.
Sudden change of posture provokes nausea.
When rising from a recumbent position: vertigo.
On sitting up: giddiness; objects around seem to move up and down; headache.
Rising from sitting: painful inclination to hernia.
On rising from bed: diarrhœa.
When rising upon feet: menstrual discharge gushes out in a stream.
Bending over: pressive pain in hepatic region <; pain in r. hypochondriac region, extending towards epigastrium and stomach <.
Bending double: pain in l. side of abdomen <.
When stooping: pain in upper region of abdomen; pain in back, shooting through body to both sides and along spine to occiput and temples <.

Digitized by Google

Bending or squatting down: leucorrhœa gushes out.
When moving head: painful concussion in head.
When lifting head: faintness and vertigo.
Leaning head back: head most relieved.
From motion of eyes: throbbing in vertex.
On opening mouth: cramplike pain in temporal and malar regions.
Yawning: stiff pain in cervical muscles.
When chewing: pains in hollow tooth.
When stretching tongue out: pain at base of tongue.
On moving neck: stiffness of neck and pain.
When lifting arm: bone pain in shoulder joint and long bones of arm.
The higher the hand is raised the more it trembles.
When writing: paralysis of hand.
When walking: painful concussion in brain; audible rumbling in l. side of chest as if from emptiness; pain in back shooting through body to both sides and along spine to occiput and temples <; legs are dragged; totters and threatens to fall to one side; as if a hot iron went into r. little toe on raising foot from ground.
Convulsive motion of limbs whenever she wants to use them.
Has to roll and twist, with violent attacks of gastralgia.

[36] **Nerves.** Great hyperæsthesia of all senses and an exalted susceptibility to impressions.
Extreme irritability of nervous system, especially of spinal cord. θProsopalgia.
The least noise or jar is unbearable.
A slight noise or slight unexpected touch causes starting and trembling all over body. θIntermittent.
Sensitiveness to talking, warm air, riding and grief.
Nervousness of twelve years standing aggravated to insanity by grief; commenced while riding in a boat.
Trembling, from excitement, overexertion and pain.
Trembling over whole body. θDysmenorrhœa. θProsopalgia.
Shuddering.
Tired feeling with some headache after convulsive attacks, wants to lie down much of the time; easily startled. θPalpitation.
Weakness, with trembling; feels too weak to talk aloud; cannot give her symptoms.
Great lassitude of whole body, it is an exertion to stand firmly; faintness from slightest exertion.
Prostration and exhausting sweat over whole body from slightest exertion.
Sensation of seasickness.

Digitized by Google

Faintness on moving body, with spasmodic distortion of muscles of face.
Faintness caused by pain in bowels during diarrhœic stool.
Fainting fits, epileptiform and hysterical convulsions, paralysis.
Melancholia, nervous fevers, nervous weakness, hysteria, convulsions, syncope.
Hysteric complaints, with sadness.
Automatic movements of muscles and tendons.
Twitching of isolated groups of muscles.
Spasms through whole body, coming like electric shocks. θEpilepsy.
Spasms, occurring frequently at midnight.
Spasms, hysterical, or from cerebro-spinal irritation.
Sudden spasms from non-appearance or sudden checking of menses.
Violent convulsions and cramps, especially in lower extremities, in chest and in abdomen.
Convulsions after loss of sleep.
Puerperal eclampsia; paroxysms passing off with a sigh after several minutes; paroxysms then become more frequent, last longer and come during sleep or when awake; spells cause mental terror at the time; is conscious during paroxysm, but cannot move, eyes open and immovable.
Tetanus, chorea.
Attacks of paralytic weakness, with pain in back.
Numbness, migratory, coming and going.
Paralysis, one-sided, with numbness, bruised feeling and stiffness.
Hemiplegia, l. side, with coldness of affected part.
Apoplexy.
Paralysis of face, tongue or pharynx, paraplegia.
Paralytic affections originating in small of back after taking cold, with cold feeling of extremities and œdema of feet; likewise after apoplexy.
No reflex movement produced upon tickling sole of r. foot, while on tickling that of l., limb is drawn up. θSudden unconsciousness.
Locomotor ataxia.
Post-diphtheritic paralysis.

[37] **Sleep.** Spasmodic yawning.
Constant yawning and stretching after lying down in bed.
Sleepiness or a half waking state, with dreams. θTyphoid.
Somnolence and stupor.
Unconquerable sleepiness, least interruption of sleep is

Digitized by Google

followed by great loss of strength, eyelids heavy and shut as if paralyzed; drowsiness may increase to coma.

‖Must remain constantly in bed because of great sleepiness and weakness, on rising vertigo and dizziness. θIntermittent fever.

‖Sleep disturbed when lying on l. side on account of pain under l. ribs. θIntermittent.

‖Many thoughts of business of day prevent sleep for an hour, wide awake at about 1 o'clock, cannot go to sleep again.

‖‖Sleep disturbed by excessive anxiety and restlessness.

‖Frequent waking from sleep as from fright.

Wishes to sleep, but directly on closing eyes a frightful sensation, as of a hideous dream, comes over him, making him start up again.

‖Sleeplessness. θDysmenorrhœa.

‖‖Sleeplessness from long-continued nursing; from night watching.

‖Maniacal sleeplessness.

‖‖Anxious, frightful dreams.

‖Sleep aggravates all the symptoms, particularly of head.

‖Does not feel refreshed in morning, yawns incessantly.

‖Slightest loss of sleep tells on him.

‖‖Ill effects from loss of sleep and night watching.

[35] **Time.** Early in morning: in bed, stitches through abdomen and lower part of back.

In morning: after a violent headache during night, swelling of eye and half of nose; inclination to vomit: nausea and vomiting of food and mucus; on rising, involuntary movements of r. hand and then of r. foot; does not feel refreshed, yawns incessantly; sweat, principally on chest.

In morning between 8 and 9 o'clock: twisting in stomach, nausea, anxiety and perspiration; empty eructations, foul taste in mouth; attacks last three or four hours, each attack growing less severe as evening advances.

About 11 A.M.: chilliness, with great disgust at even smell of food.

In afternoon: prosopalgia; nausea after every drink; contractive pains in anus; internal chill, with shivering through whole body, but more in back and on legs; prosopalgia.

During day: thin, yellowish, painless stools.

In evening: beating in forehead; headache <; tearing pains in eyebrows and l. side of head <; trembling in limbs with chilliness; internal chill, with shivering through whole body, but more in back and on legs; shaking chill; chills run down back; itching of skin.

Digitized by Google

At night: pressive and contused pain in eyes with difficulty in opening lids; tearing pain in eyebrows and l. side of head; dryness of mouth without thirst; nausea and vomiting of food and mucus, with sleeplessness; seminal emissions; fatiguing, racking cough from oppression of chest; night sweats; in feather bed, much itching of skin.

About midnight: spasmodic, flatulent colic; spasms.

About 1 o'clock: wide awake, cannot go to sleep again.

[39] **Temperature and Weather.** Warmth: itching of skin from.

Warm air: is sensitive to.

Sun: headache from working in, or from riding through sand.

In-doors: pressing pain in forehead, with nausea; beating in forehead >.

In warm room: convulsive trembling of head <; trembling in limbs with chilliness.

From warmth of bed: sensation of emptiness and hollowness in head >.

Cold: spasmodic pains in abdomen during menstruation < by.

Open air: sensation of emptiness and hollowness in head; <; convulsive trembling of head <; cannot bear cold or warm air.

Cold air: beating in forehead <; sensitive to.

In cold room: red cheeks and heat of face.

Eating or drinking anything cold: tearing in limbs after.

Cold drinks: longing for.

[40] **Fever.** ‖Before chill and before shaking commences, during an hour, and while extremities were becoming cold, a great dread of the coming paroxysm. θIntermittent fever.

‖During paroxysm restless and anxious, no thirst; during chill, which was internal, great trembling, particularly of head, which she could not support. θIntermittent.

‖Chilliness began about 11 A.M., and was attended with great disgust at even smell of food. θIntermittent.

‖Internal chill in afternoon and evening, attended with shivering through whole body, but more in back and on legs; not > by external warmth.

‖Frequent shivering mingled with heat, later chill, followed by heat; skin at times moist, perspiration does not relieve. θIntermittent.

‖Shaking chill in evening, preceded by shivering and blueness of nails.

Upward and downward shaking instantly ceases when vomiting and diarrhœa set in, but coldness continues for

Digitized by Google

an hour longer when fever begins to predominate. θIntermittent.

Chills run down the back in evening.

‖Chill frequently alternating with heat. θChronic diarrhœa. θTyphoid.

‖Continuous chilliness with hot skin. θGastritis.

‖Flushes of heat, with burning heat of cheeks and cold feet.

‖Heat in head and chilliness in body. θTyphoid.

‖Dry heat the whole night through.

‖Fever setting in with giddiness, during fever a state of apparent stupor with consciousness and no confusion of thought. θIntermittent.

‖During heat: headache <; heaviness in head, < on sitting; she feels her pulse beat through whole body; at times palpitation. θIntermittent.

‖Hectic fever, with emaciation and night sweats.

Intermittent fever, with colic and lameness of small of back.

‖Low, nervous, bilious and lingering cases of gastric fever.

‖Insidious nervous fevers, particularly in cases which have been produced by frequent fits of anger, or are accompanied by great disposition to anger.

‖Febrile stage followed by general perspiration, profuse, clammy, offensive, runs off from chest in streams. θIntermittent.

‖Morning sweat principally on chest.

‖Prostration and exhausting sweat over whole body from slightest exertion.

‖Sweat, caused by pain in bowels, during diarrhœic stool.

‖Perspiration stands out in drops on face, is now cold and then again hot. θConvulsions.

Cold sweat now of one, now of the other hand.

‖Sweat of body from evening till morning, attended with cold sweat on face.

‖Sweat of affected parts.

‖Temperature very slightly affected or increased. θTyphoid.

[11] **Attacks, Periodicity.** Sudden: unconsciousness; thin, black, slimy, very fetid stool; cessation of menses; spasms from non-appearance or sudden checking of menses.

Spasmodic: shaking of head; jerks through whole body; drawing of abdomen towards vertebral column; flatulent colic; pains in abdomen; pains in abdomen and loins during menstruation; labor pains; cough; drawing across hips; constriction through whole length of spine; yawning.

Digitized by Google

Transitory: stinging pains in swollen knee.
Frequent: attacks of headache over r. frontal eminence; stools; desire to urinate; giddiness; trembling of limbs; waking from sleep as from fright; shivering mingled with heat; alternation of chill with heat.
Constant: inclination to sit in a corner buried in thought; talking; sensation as if about to faint; trembling of hands; rolling of eyeballs, eyes being closed; pain in r. iliac region, near cæcum; working of limbs, with drawing pains in abdomen; leucorrhœa; pain in back; yawning and stretching after lying down in bed; chilliness with hot skin.
Lasting a few minutes: frequent attacks of headache over r frontal eminence.
For an hour: many thoughts of business of day prevent sleep.
For several hours: respiration scarcely perceptible.
Lasting through whole night: dry heat.
From evening till morning: sweat of body, with cold sweat on face.
Lasting several days: vertigo.
For seven days: has not slept an instant; watery stools, three or four a day, but there would be a dozen if he yielded to it.
Regularly in afternoon: attacks of prosopalgia.
Every other day: hard stool.
Every two weeks: vertigo, which lasts several days; attacks of vertigo, with difficult speech and difficulty in reading and thinking.
At each catamenial period: headache returns.
Intermittent fever.
Chronic: diarrhœa; dyspepsia; prosopalgia.
For twelve years: nervousness aggravated to insanity by grief.

" **Locality and Direction.** Right: frequent attacks of headache over frontal eminence; stitches in frontal region; as if a blunt body was forced slowly into temple; pustule below angle of mouth; pain in hypochondriac region extending towards epigastrium and stomach; pain in iliac region with flatulent colic; constant pain in iliac region, near cæcum; rupture pain on side; contractive tension of side of chest, taking breath away; stitches in upper arm; superficial abscess above root of nail of little toe; paralytic weakness of side; numbness in upper and lower extremities; involuntary motions of arm and leg; unable to move arm or leg; feeling of numbness in arm and leg, as if asleep; involuntary motions of hand and then of foot.

Digitized by Google

Left: compression, dull and undulating sensation in frontal region; headache extending to side of forehead and nose, from vertex; sensation as if hair was rising up on side of occiput; cramplike pain in temporal muscle; tearing pains in jaw; pain in side of head and eye; sclerotic of eye inflamed; iris of eye inflamed; tearing pains in side of head; tearing in side of head; dull pressure on malar bone; hypochondriac region feels distended and tense, and is painful on pressure; pain in side of abdomen; pain under ribs; audible rumbling in side of chest, as if from emptiness; paralysis of hand and foot; hemiplegia of side.

From r. to l.: things whirl; stitches in scapulæ; numbness of hands.

From before backward: stitches through abdomen and lower part of back.

From within outward: stitches or shooting in eyes.

From without inward: pressing pain in forehead; pressure in glands.

[43] **Sensations.** As if her head was tightly compressed; as if there was a board across head; as if there was no head; as if about to faint; as if eyes were being torn out; as if brain was constricted by a ligature; as if a blunt body was forced slowly into r. temple; as if head was seized in a vise; as of seasickness; as if brain was rolled up or compressed into a small bulk; as if head was bound up; as if head was bound tightly by a cord; as if nerves in head were drawn up tightly; as if head was compressed by a bandage, or as if screwed together; as if hair was rising up on l. side of occiput; as if something forcibly closed eyes; as of dust in both eyes; as if eyelids were paralyzed; as if tongue was paralyzed; as of swelling at root of tongue; as if œsophagus was inflamed; as if throat was lame; as of hunger in epigastrium; as if stomach heaved up and down; as if one had been a long time without food till hunger was gone; as though a worm was moving in stomach; as if waist was constricted by a tight band; as if opening and shutting like a door, in occiput and nape; as if cervical vertebræ were stiff; as if paralyzed in back and neck; as if menses were coming on; as of very fine, delicate wires or fibres pulling and continually in motion down both arms from elbow to hand; as if arms were asleep, which alternates with a similar feeling in back; as if hand was swollen; as if forearm was asleep; as if hands were asleep; as if lower limbs were paralyzed; as if beaten, in thighs; as if a hot iron went into r. little toe; as of weight in feet; as if limbs would be broken

Google

or crushed by bending when moved; as if r. arm and leg were asleep; as if beaten, in bones; as if beaten, in both hypochondriæ; as if abdomen was distended and tense; as of a heavy stone in hypogastric region; as of an internal ulcer in abdomen; as if all would give way at groin; as of sharp stones rubbing together in abdomen; as if inner parts were suffering from sharp pressuse of a stone; as if throat was constricted; as of stiffness or cracking of vertebræ.

Pain: in head; from over r. eye into head; in l. side of head and eye; in stomach; beneath stomach immediately after eating; in region of spleen; in epigastric, umbilical and r. iliac regions with flatulent colic; in hypogastric region; in l. side of abdomen; under l. ribs; in bowels, with stool; in small of back; extending down spine; in back; in lower part of spine; in back, shooting through body to both sides and along spine to occiput and even to temples at times; in arm; in bones.

Lancinating: over r. frontal eminence; especially on one side of head; in jaw.

Cutting: in various parts of abdomen, chiefly around navel; in region of uterus and ovaries on appearance of menses; in abdomen.

Lacerating: in back.

Darting: below umbilicus through to spine.

Boring: in head; in jaws; in back.

Stitches: in temples; in r. frontal region; in eyes; in jaws; in hepatic region; through abdomen and lower part of back, from before backward; between scapulæ and in small of back; in scapula from r. to l.; in shoulder joint and muscles of upper arm; in r. upper arm.

Fine stitches: in various parts of chest.

Dull stitches: in skin.

Stitching pain: in stomach; in jaw.

Sticking: in various parts of abdomen, chiefly around navel.

Stinging: near fossa navicularis; in swollen knee; in glands.

Shooting: in eyes.

Jerking: in pes anserinum; in nerves sympathetically affected by prosopalgia; in arms.

Tearing: in head; on one side of head, especially in bones and l. jaw; in brow and l. side of head; in eyebrows and l. side of head; in limbs; in stomach; in bones.

Laming-drawing: here and there in limbs, as if in bones.

Paralytic drawing: of sides of throat.

Spasmodic drawing: across hips.

Digitized by Google

Disabling drawing: in small of back.
Fine drawing: in borders of teeth.
Drawing: in forehead; in nerves sympathetically affected by prosopalgia; in dental nerves; through whole abdomen; in testicles when touched; in back; bone pain in shoulder joint and long bones of arm; in thumbs; in bones of limbs.
Burning: of mouth and throat; in palate; in œsophagus, extending into fauces; in abdomen; in rectum; in anus; in glands; in feet.
Twisting: in stomach.
Smarting: urination.
Sore pain: in epigastrium and chest; in testicles; in bones.
Tensive pain: in pustule below r. angle of mouth; beneath stomach.
Contractive tension: of r. side of chest, taking breath away.
Pinching: in stomach; in upper abdomen, extending to l. side of abdomen and chest.
Squeezing: in pit of stomach.
Griping: in stomach.
Crushing pain: in jaws.
Grinding: in pit of stomach.
Digging: in head; in bones.
Painful concussion: in head.
Contused pain: in hypogastrium; in eyes; in pit of stomach; in shoulder joint and long bones of arm.
Compression: in l. frontal region.
Cramping pains: in abdomen; in region of uterus and ovaries on appearance of menses; in chest during menstrual period.
Cramplike pain: in l. temporal muscle; in temporal and malar regions; in region of malar bone and masseter muscles.
Cramps: of stomach; in chest; in uterus; deep in abdomen; in lower extremities.
Constriction: of throat; in larynx; in trachea; in chest; in heart; in stomach; of internal parts.
Constrictive: headache; pain in stomach; pain in upper abdomen, extending to l. side of abdomen and chest; pains in hypogastrium.
Choking constriction: in upper part of fauces.
Spasmodic constriction: through whole length of spine.
Contractive pain: in epigastrium, taking the breath; in anus; in abdomen.
Contraction: near umbilicus; of rectum.
Pressing pain: in forehead; in both temples.

Digitized by Google

Pressive pain: in eyes; in region of malar bone and masseter muscles; in tonsils; in hepatic region.
Painful pressure: in uterus.
Pressure: in forehead; in both eyes; in pit of stomach; in various parts of abdomen, chiefly about navel; towards genitals; in chest; under ribs; in scapula and nape of neck; in glands.
Dull pressure: on outer border of orbit; on l. malar bone.
Oppression: in chest; of respiration.
Anguish about heart.
Rupture pain: on r. side.
Gouty pains: in joints.
Paralytic pain: in small of back; in knee joints; in bones.
Bruised pain: in bowels; in shoulder joint and long bones of arm; in lower limbs; in bones.
Aching: in forehead; of limbs.
Sensitiveness: of throat; of genitals; of testicles; in back and neck; of whole spine.
Disagreeable pain: in knees.
Benumbing pain: in region of malar bone and masseter muscles.
Painful lameness: in arms and legs.
Painful stiffness: of neck; of joints.
Stiff pain: in cervical muscles.
Tensive aching: in orifice of urethra between acts of micturition.
Tension: in abdomen.
Tightness: in larynx.
Painful sensation of emptiness in head.
Emptiness: in head; in abdomen; in bowels: in chest; in heart; in stomach; in internal parts.
Fulness: in groin.
Painful sensation of fulness: in stomach.
Heaviness: of head; in head; of arm; of feet; of eyelids.
Weight: in head; in feet.
Throbbing: over r. frontal eminence; in temples; in vertex; in head.
Beating: in forehead; in feet; in skin.
Pulsating pain: in forehead.
Spasmodic internal heaving: in epigastrium.
Undulating sensation: in l. frontal region.
Irritation: high up in larynx.
Excitement: of genitals.
Nausea: felt in head; seems to be mostly in mouth.
Qualmishness: in epigastrium.
Faintness: from slightest exertion; from pain in bowels during diarrhœic stool.
Crawling: in arms.

Digitized by Google

Formication: over r. frontal eminence.
Numbness: in arms; of r. then of l. hand; of lower limbs; in r. upper and lower extremities.
Tickling: cough.
Stiffness: of lower limbs.
Stony sort of feeling: in chest.
Pithy feeling: of hands, with loss of sensibility.
Hollowness: in head; in abdomen.
Trembling: in back; of limbs.
Paralytic weakness: of r. side.
Weakness: of muscles of neck; of sexual organs; of cervical muscles; in lower limbs; of knees.
Paralytic feeling: in arms; in arm of that side of body corresponding to affected side of face.
Lameness: in arms; in hip and knee joints; of small of back.
Confusion: of mind; of head.
Dulness: in forehead; of head as after being drunk; in l. frontal region.
Peculiar sensation: at root of tongue.
Cloudiness: in head.
Depression: of genitals.
Dryness: of lids; of tongue; of mouth; in fauces; in pharynx and œsophagus; of lips.
Itching: in anus; near fossa navicularis; of scrotum; swelling of feet; of skin; on chest, tibiæ and in axillæ.
Burning heat: of face.
Heat: in head; in feet.
Shivering: over mammæ.
Chilly feeling: through teeth; in body.
Coldness: of feet; of face; of hands; of extremities.

" Tissues. Ill effects of loss of sleep and mental excitement.
Vomiting and intestinal spasm dependent on reflex action, such as megrim, and also in nervous women at the menstrual period.
" Acts chiefly upon those portions of nervous system which control muscular movements, found in anterior portion of cranio-spinal axis."
" It influences the voluntary muscles rather than the intellectual powers."
" While convulsions are produced in acute poisoning, paralytic symptoms abound in the continued experiments of the provers."
Violent emesis; syncope.
Ovario-uterine organs: spasms; hyperæsthesia.
Paraplegia occurring in debilitated, nervous persons.
Paralysis of inner parts.
Pain of muscles when touched.

Digitized by Google

Anæmic states; impeded, sluggish circulation giving rise to œdema.
Paralytic pain; tearing; soreness; digging; or as if beaten in bones.
Assisted the expulsion of necrosed bone after fracture of head of femur.
Gouty pains or cracking in joints.
Glands: burning; pressure from out inward; hot swelling; cold; stinging.
Emaciation.
Patient has a sunken, corpse-like appearance. θIntermittent.

45 **Touch. Passive Motion. Injuries.** Touch: throbbing in vertex < from; tensive pain in pustule below r. angle of mouth from; epigastrium sensitive to; r. hypochondriac region sensitive to least; pain as from an internal ulcer in abdomen from; constant pain in r. iliac region near cæcum < from least; drawing sore pain in testicles; upper region of abdomen painful; spasmodic pains in abdomen during menstruation <; vertebræ sensitive; bruised and contused pain in shoulder joint and long bones of arm; articular rheumatism with intense pain from slightest; starting and trembling all over body from slight, unexpected; pain in muscles; ulcers very sensitive.
Pressure: < tensive feeling below stomach; l. hypochondriac region painful on; < pain under l. ribs; vertebral spines from last dorsal vertebra to sacrum tender.
When stroked: swollen, hard glands under lower jaw, and nodes on forearm painful.
Least jar unbearable.
Riding: beating in forehead <; in a carriage, boat or train of cars, sick headache; nausea and inclination to vomit; diarrhœa; sensitiveness to.
From riding in a wagon: nausea with pressing pain in forehead worse.

46 **Skin.** Skin feels soft, is white and moist. θTyphoid.
Paleness of skin; wretched color. θIntermittent.
Skin pale and lax.
Much itching, especially in evening when undressing, or at night in a feather bed, or from warmth.
Burning and itching as from nettles.
Burning, itching stitches and dull stitches in skin.
Itching on chest, tibiæ and in axillæ.
Ulcers very sensitive to touch.
Miliary eruptions or red spots, < on undressing.
Adenitis, cold, hard glandular swellings.
Hard blotches, containing no fluid, surrounded by a red areola.

Digitized by Google

Single pimples filling with pus, and then drying up and disappearing, on nose, temple, chest and between scapulæ.
Wine-colored (red), irregular spots on chest and behind ears.

47 **Stages of Life, Constitution.** Mild and sluggish temperament; light hair.
Hypochondriacal, melancholy, timid, fearful persons.
Depression of nervous system, with little disturbance of vegetative sphere.
Women of great nervous and paralytic weakness, with suppressed or very painful menstruation.
Indicated after mental and bodily overtaxation.
Suits especially bookworms and sensitive, romantic girls with irregular menstruation; onanists, rakes and other debilitated persons; drunkards.
Chlorotic females.
Cramps of unmarried girls and childless women.
Often indicated with children and women.
Chronic prosopalgia in ladies of high rank, of ages varying from 30 to 40 years; abdominal plethora, extreme irritability of nervous system, especially of spinal cord; wind in epigastrium; acidity; obstinate constipation; diarrhœa; menstrual colic; bland, thick leucorrhœa; spinal irritation, with nocturnal pains; temperament choleric; through long-continued suffering had been brought into a state of desperation, constantly changing, and that quickly, from pusillanimity and despondency to extreme gayety.
Girl, æt. 6, small, weak; intermittent.
Robust girl, æt. 8; sudden lameness of r. arm and leg.
Girl, æt. 8; palpitation.
Boy, æt. 12; encephalitis.
Girl, æt. 12; necrosis of femur.
M. B., æt. 14; abscess of toe with diarrhœa.
Girl, æt. 15; paralysis.
Girl, æt. 16, tall, slender, blonde hair, delicate complexion; chronic diarrhœa.
Girl, nervous, delicate, addicted to much coffee drinking, and compelled to sit much; dysmenorrhœa.
Boy, æt. 16, slender; chorea.
Boy, æt. 16, strong, well nourished; typhoid.
Boy, æt. 17; vertigo every two weeks.
Girl, æt. 18, slender, has not yet menstruated; sudden attack of unconsciousness followed by hemiplegia.
J. Q., æt. 19, married, lymphatic temperament, delicate as a child, subject to headache and pain in back, menstruates regularly since 16th year; pain in back.
Girl, æt. 19; acute articular rheumatism.

Digitized by Google

Girl, æt. 20, healthy, strong, menses regular; cramps from cold during catamenia.
Miss ——, æt. 20; spinal irritation.
Man, æt. 22; incarcerated hernia.
Servant girl, æt. 24; amenorrhœa.
Woman, æt. 26; leucorrhœa during pregnancy.
Woman, æt. 26, plethoric constitution; menorrhagia.
Woman, æt. 28, sanguine temperament; leucorrhœa.
Mrs. T., æt. 29; puerperal eclampsia.
Man, æt. 30, cachectic appearance; colic.
Delicate woman of good family, married late; intermittent.
Man, æt. 34, had scabies all over, later rheumatism of l. arm, also had pneumonia; heart disease.
Man, æt. 34, formerly had itch; cramps in stomach.
Miss H., æt. 35, plethoric; headache for 15 years, came shortly after appearance of menses.
G., æt. 43, strong, muscular, formerly suffered from rheumatic pains in limbs; rheumatic ophthalmia.
Mrs. B., æt. 48, nervo-sanguine-bilious temperament, scrofulous diathesis, has prolapse of pelvic viscera; intermittent.
Woman, æt. 50, large, emaciated; apoplexy.
Mother, æt. 69, much exposed to cold; arthritic ophthalmia.
Old man, compelled to stand during his work; inguinal hernia.

COCCUS CACTI.

Cochineal. *Hemiptera.*

This insect is found wild in Mexico and Central America, inhabiting different species of cactus and allied genera of plants. It is also cultivated to some extent in Texas and New Mexico. The female insect is the one used in medicine and commerce. They are collected and killed either by immersing in boiling water or over the heat of a fire. The insect has a peculiar coloring matter or principle, called by most authorities Cochinilin.—Hale's Symptomatology.

The complete symptomatology was first published in Metcalf's New Homœopathic Provings, 1863.

The female insects perish quickly after having deposited their eggs, which are hatched in the sun and give origin to innumerable insects, which spread themselves over the plant; after fecundation, the females, which before moved about, attach themselves to the leaves and increase rapidly in size, so that in the end, legs, antennæ and proboscis are scarcely discoverable, and they appear like excrescences on the plant; they are then gathered with a blunt knife, quill or feather.—A. H. Pharmacopœia.

The trituration is the better preparation, as it contains also ethereal oil and formic acid.—Prof. Rapp, Retrospect, 1878, p. 14.

Dr. Crétin calls attention to the confusion which frequently prevails in French homœopathic literature between the Cochineal, Coccus cacti, and the lady-bird, Coccionella septempunctata, both being known in that language as Cochenille. He points out that it is Coccus cacti which is used in whooping cough, while the medicine which Dr. Jousset recommends in some cases of prosopalgia is Coccionella.—B. J. H., vol. 36, p. 184.

[1] **Mind.** Great indolence.
Depressed, apprehensive and anxious.
Fit of unconsciousness and absence of mind; urine turbid. θMorbus Brightii.
Ill-humored, fretful.
Lively, talkative mood.

[2] **Sensorium.** Great confusion of head.
Dizziness.

[3] **Inner Head.** Rush of blood to head and spitting of dark blood. θMenorrhagia.

Digitized by Google

Dull, pressive, burrowing or tearing frontal headache.
Tearing pain extending from l. eye up into forehead, in evening after lying down.
Dull headache above r. eye in morning on waking.
‖Headache in forehead and temples. θAcute desquamative nephritis.
Pressive or sticking pains in both temples and sensation of fulness of head.
Violent raging pain extending from r. eye along squamous portion of temporal bone, on its inner side, to occiput.
Pressive pain in r. side of forehead, sometimes extending to occiput.
Indefinite drawing and pressure in occiput, temples and r. eye.
Head pains as if it would split.
‖Pain in head, with aching pain through small of back. θMenorrhagia.
‖Pressive headache. θCatarrh.
‖Pain in occiput < from mental exertion. θTinnitus.

[4] **Outer Head.** Sensation as if scalp was drawn tightly over skull.
Stitches in occiput, or crawling pain in scalp, induce scratching.

[5] **Sight and Eyes.** Pressure upon l. eye and eyeball.
Pressive pain in orbits.
Smarting, biting pain between eyeballs and lids, as if a hair was between them.
Sensation as of a foreign body between lids and balls.
Inflammation of conjunctiva.

[6] **Hearing and Ears.** ‖Roaring in ears begins in evening, lasts through night and disturbs sleep.
Sensation as if external auditory passages were closed, with crackling in r. ear.
Roaring, ringing, crackling sounds in l. ear.
Tickling-itching in one or both ears.
Violent stitching in ears.
Painful, cramplike drawing, especially in r. ear.

[7] **Smell and Nose.** Dryness of nose, with inclination to sneeze.
Swelling of nose, with itching, violent sneezing and increased secretion of mucus.
Redness of edges of nostrils; crusts on edges of nostrils.
Frequent, violent sneezing.
‖Discharge of thick, yellow mucus from nose. θCatarrh.
Secretion of much mucus in nose.
Nose dry, stopped; dryness of mucous membrane of nose, posterior nares and throat.

[8] **Upper Face.** ‖Sallow complexion.
‖Face deeply red. θAcute desquamative nephritis.
Purple face, with racking cough and splitting headache.
Crawling, beginning in malar bones and extending over nose to opposite cheek.
[9] **Lower Face.** Parotitis.
[10] **Teeth and Gums.** Sudden drawing pains in teeth.
Toothache, with shooting pains in hollow roots of teeth, great sensitiveness to touch.
Great sensitiveness of teeth to cold things.
[11] **Taste and Tongue.** Offensive nauseous taste in mouth.
‖Unpleasant, sweetish, metallic taste in mouth.
‖Sweetish taste. θAcute desquamative nephritis.
‖Metallic taste, with accumulation of water in mouth; constant desire to spit.
Great dryness of tongue and of whole mouth.
Tongue rough, clean and dry.
[12] **Inner Mouth.** ‖Great sensitiveness of mouth and fauces, so that rinsing the mouth causes cough and vomiting of thick masses of mucus.
Dryness of mouth and palate, causing much thirst.
‖Accumulation of much tasteless saliva in mouth; constant desire to spit; salivation.
Odor from mouth as from a disordered stomach.
Rawness of mouth, throat and pharynx.
[13] **Throat.** ‖Arches of palate very irritable, so that loud speaking or brushing teeth causes cough and vomiting.
Sensation as if a crumb or hair was lodged in throat behind larynx.
Tickling in throat.
‖Fauces very sensitive.
Arch of palate and fauces as far as visible slightly red.
Constriction of throat.
Roughness of throat, cough and sneezing.
Burning in throat with hawking.
Frequent hawking of mucus.
Rawness and scraping in throat.
Sore throat with great dryness.
‖Throat < in warmth, especially in bed.
[14] **Appetite, Thirst. Desires, Aversions.** Great appetite or ravenous hunger with speedy satiety, or sensation of hunger even after eating.
‖Little appetite. θAcute desquamative nephritis.
‖Great thirst; drinks water often and in large quantities. θMenorrhagia.
‖Thirst. θAcute desquamative nephritis.
[15] **Eating and Drinking.** ‖Anxiety after eating, from irregular action of heart.

Digitized by Google

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations of air.

Nausea. θMenorrhagia.

Gagging and vomiting of food caused by expectoration of ropy mucus.

Hawking of mucus provokes vomiting.

Vomiting: of thick masses of mucus; and cough produced by loud speaking, rinsing mouth or brushing teeth; on account of irritability of arches of palate and sensitiveness of mouth and fauces; with copious expectoration after midnight, caused by a spasmodic cough.

Vomiting of white, bitter tasting froth. θMenorrhagia.

[17] **Scrobiculum and Stomach.** Epigastric region, especially pit of stomach, sensitive to pressure.

Distension of stomach.

Sensation of fulness and pressure in stomach.

Pain in stomach with sensation as of a ball or stone lying in it.

Severe heartburn.

Sensation as of something ascending towards stomach, which makes her think she will vomit water.

For three evenings in succession, sickness at stomach, with faintness and vomiting of white, bitter tasting froth. θMenorrhagia.

[18] **Hypochondria.** Burning and drawing in l. hypochondrium.

Constant, dull, burning pain in l. hypochondrium and pain across loins as if broken, < from lying on affected side, with loss of sexual power.

Pains in l. hypochondrium, as from incarcerated flatulence; the pains extending to l. side of back and lumbar vertebræ.

Dull stitches in region of spleen.

[19] **Abdomen.** Weak forcing across lower part of bowels. θVaginitis.

Abdomen distended. θMenorrhagia.

Distension with constant gurgling and rumbling of bowels.

Sensation of tension and constriction about abdomen.

Griping in abdomen followed by liquid stool.

Griping, cutting pain in umbilical region.

Sharp pains in lower part of abdomen drawing her double, first in r. side, then in l. θMenorrhagia.

Insufferable abdominal pains at night. θAcute desquamative nephritis.

Sticking, drawing, thrusting pain in inguinal, vesical and pubic regions, followed by a mucous leucorrhœa.

Bruised pain in groins and sacro-lumbar region.

Digitized by Google

[20] **Stool and Rectum.** Frequent ineffectual urging to stool.
Profuse, soft and pasty stools.
Hard, dry stool.
Sticking pains in rectum.
Burning, crawling or itching in anus.

[21] **Urinary Organs.** Dull pressing, sticking, cramplike, oppressive pains in kidneys, < from pressure or motion.
Spasmodic pains in kidneys.
‖Nephritis with pericarditis.
Nephritic colic, with very copious urine and dull pain in urethra.
Spasmodic pains in kidneys, with vesical tenesmus and frequent emissions of deep-colored urine.
Renal pains with spasmodic difficulties of chest.
Irregularities in urinary secretion.
‖Acute renal dropsy.
Sudden, acute, prolonged lancinations, extending from l. renal region along ureters into bladder.
Cutting pain in region of bladder.
Pressure in bladder with constant urging to urinate.
‖Urging to urinate. θAcute desquamative nephritis.
‖Urging to urinate, but can pass no urine until an enormous clot of black blood has passed. θMenorrhagia.
Frequent scanty discharges of urine, difficult and slow in coming, taking place with straining and vesical tenesmus.
‖Urine excoriates; falls over vulva drop by drop.
Urine contains mucus in the form of filaments, clouds, and flocks, and the sediment is entangled with much mucus.
Very acrid, irritating urine.
The urine seems to be thick like oil
‖Hemorrhage from the kidneys.
Brickdust sediment in urine, adhering to vessel.
‖Urine dark-colored, with white sediment, an inch deep, over which was a granular layer, half an inch thick, deeply reddened with blood. θAcute desquamative nephritis.
Odor of urine sometimes alkaline, often ammoniacal; also cadaverous when it is dark-colored and cloudy.
‖Urethral tenesmus.
Burning in urethra when urinating and continuing after.
Very violent lancinating thrusts in the anterior portion of urethra and glans, a long time after having urinated when in bed at night; they force him to groan and cry out, and last a minute and a half.
Violent pruritus and itching at orifice of urethra.
‖Gravel.

Digitized by Google

[22] **Male Sexual Organs.** Great sexual excitement with frequent erections.

‖Loss of sexual power, with constant, dull, burning pain in l. hypochondrium and pains across loins as if broken.

[23] **Female Sexual Organs.** ‖Hemorrhage from uterus with passage of large clots, which escape when quiet or when getting up to pass water.

‖Great tenderness and irritation in extreme lower part of vagina, < when urinating; can walk a long distance but is < after sitting in the house all day. θVaginitis.

‖Sudden cessation of menstrual flow on second day from exposure; non-appearance of menses for seven weeks, when she was taken with rush of blood to head and spitting of dark blood; menses lasted but a few hours; a week later flow returned with pain in head, aching pain through small of back, at times chilliness, then again fever and sweat; flow continued two weeks, but only in evening after lying down, never when stirring about; discharge pink. θMenorrhagia.

Menses too early and too abundant, of dark, thick blood, with a sensation of tension and constriction about abdomen and of something ascending towards stomach, which makes her think she will vomit water.

‖Enormous black clots pass from vagina. θMenorrhagia.

Leucorrhœa consisting of mucus, preceded by drawing, thrusting pain in inguinal, vesical and pubic regions.

Pain in vulva so severe on going to bed that she is obliged to sit up and go to sleep in that position; tumor of vulva increases, becomes hard and is sensitive to touch, throbbing and burning in tumor and excoriated feeling on walking.

‖Soreness of vulva; cannot bear pressure of clothing.

Inflammation of labia.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Fatigue of vocal organs, even after speaking without exertion; the voice becomes rough and hoarse; respiration somewhat laborious.

‖Hoarseness.

‖Sensation as though a lump as large as a walnut was sticking behind larynx, which obliged him to swallow constantly.

‖Rawness of air passages, which frequently compels him to cough.

‖‖Tickling in larynx, very violent, waking him at 11.30 P.M., causing cough with expectoration of much tenacious mucus, for ten minutes.

‖Scraping sensation in larynx, causing some paroxysms of cough, with expectoration of little balls of mucus.

Google

Scraping and dry feeling in larynx, < towards evening, with hacking cough and hawking. θCatarrh.

Laryngeal irritation.

Feeling as of mucus ascending and descending trachea, causing tickling and cough, < in a warm room, > in open air.

Constant tickling in bronchi, about their bifurcation, caused by a feeling as if a plug of mucus was moving in chest, in spite of the profuse expectoration.

Catarrh of larynx and air passages.

Chronic bronchitis complicated with gravel; acid diathesis.

Protracted bronchial catarrhs remaining after whooping cough.

[26] **Respiration.** Respiration somewhat laborious, with fatigue of vocal organs.

Difficult breathing; dyspnœa.

Shortness of breath. θCatarrh.

Asthma complicated with affection of kidneys and turbid urine.

[27] **Cough.** Frequent hacking cough.

Paroxysms of tickling cough, ending with expectoration of mucus.

Cough < at 6 or 7 in morning, or on first rising, in paroxysms, which do not cease until a quantity of tenacious mucus is raised. θWhooping cough.

Cough wakes him at 6 A.M., having remissions of a minute; it is at first dry, clear and barking; subsequently some thick mucus is detached, and the effort of doing this causes desire to vomit, with excoriated feeling in throat and pressive headache. θCatarrh.

Cough < when waking, at 6 A.M. clear, dry and barking; slight expectoration of thick, viscid mucus, < an hour after dinner, 3 P.M., so violent as to cause vomiting and expectoration of a great quantity of thick, viscous and albuminous mucus.

Attacks of barking, tickling cough, particularly night and morning, after coughing awhile, expectoration of a great quantity of mucus, which is like the white of an egg, tough, white or whitish-yellow, can be drawn into threads and has a saltish taste, with nausea and vomiting of food.

Cough most constant in morning, with expectoration of slime and yellowish mucus of a salt taste. θCatarrh.

Cough < on waking, which racks the system all over; head pains as if it would split; purple face.

Suffocative cough, with expectoration of much tough, ropy, white mucus, which accumulates in chest and

Digitized by Google

throat and is difficult to raise, nearly causing strangulation and vomiting of food, worse during night after going to bed and after remaining long in one position, when entering a heated room after having been in cold, open air.

‖Spasmodic cough after midnight causes vomiting with copious expectoration.

‖Coughing and vomiting follow loud speaking, rinsing of mouth or brushing teeth.

‖Cough more or less constant, but < when lying or during exercise. θCatarrh.

Cough caused by a feeling as of mucus ascending and descending trachea.

Expectoration: of globular mucus, some as large as a pea; of viscid, albuminous mucus; ropy; of lumpy, yellow or greyish mucus; with a feeling as if a plug of mucus was moving in chest; easy in morning; of yellow mucus of an acrid taste.

‖Spitting of dark blood. θMenorrhagia.

‖‖Whooping cough, < when first waking.

‖Catarrhal attacks, which came on early in Fall, upon first change from warm to cold weather, lasting until next Summer when weather again became warm.

‖Cough of drunkards.

[28] **Inner Chest and Lungs.** Bruised pain in l. clavicular region, < from motion.

Tensive pain in upper part of l. chest, near clavicle.

Feeling as of a plug of mucus moving in chest.

Sensation of burning, soreness or pressure beneath sternum.

Stitches in upper part of chest.

‖Soreness and pain of whole chest, < at superior portion. θCatarrh.

Oppression of lower part of chest, difficult breathing.

Pressure upon chest, with hoarseness.

Spasmodic difficulties of chest, with renal pains.

Transient, very painful stitches, at times in l., at times in r. side of chest.

‖Sudden pulmonary congestion, with profuse mucous secretion and spasmodic suffocative cough.

‖Accumulation of mucus in chest, difficult to raise, nearly causing strangulation and vomiting of food.

[29] **Heart, Pulse and Circulation.** Severe pressive pain in præcordial region, with palpitation at night.

‖Irregular beating of heart in rapid succession, causing anxiety after eating.

Tumultuous action of heart while lying down after dinner.

Pulse accelerated.

[31] **Neck and Back.** Slight sticking pain in both scapulæ.

Digitized by Google

Stitches between shoulders.
Aching pain through small of back. θMenorrhagia.
Region of kidneys painful to pressure. θAcute desquamative nephritis.
Pain across loins as if broken, with loss of sexual power.
Fleeting stitches in loins. θAcute desquamative nephritis.
Bruised pain in sacro-lumbar region and in groins.

32 **Upper Limbs.** Tension, drawing and tearing in r. shoulder.
Burning, tearing, pressive pain near l. elbow.
Severe stitches in tip of l. elbow.

33 **Lower Limbs.** Great lassitude and weariness of lower limbs.
Drawing down the thighs and calves, with great weariness in latter.
Pressive stitching pain in patellæ.
Pain and stiffness in r. leg. θMenorrhagia.
Tearing stitches along muscles of r. calf, frequently repeated.
Great weariness of feet; burning pain in soles of feet.

34 **Limbs in General.** Sensation of weakness or prostration in limbs.
Pain in limbs. θAcute desquamative nephritis.

35 **Rest. Position. Motion.** When quiet: hemorrhage from uterus, with passage of large clots.
After sitting in house all day: tenderness and irritation in extreme lower part of vagina <.
While lying down: after dinner, tumultuous action of heart.
After lying down: tearing from l. eye up into forehead; cough <.
Menstrual discharge takes place in evening and only when lying down, never when stirring about.
After remaining long in one position in bed: suffocative cough <.
Pain in l. hypochondrium and across loins < from lying on affected side.
Pain in vulva so severe on going to bed that she is obliged to sit up and go to sleep in that position.
Motion: < pains in kidneys; < bruised pain in l. clavicular region.
From least exertion: lassitude and tendency to perspire.
When getting up: hemorrhage from uterus with passage of large clots.
On walking: excoriated feeling in tumor of vulva.
During exercise: cough <.

36 **Nerves.** General lassitude. θAcute desquamative nephritis.
Lassitude, with a tendency to perspire from least exertion.
Great weariness, weakness and prostration.

Digitized by Google

‖Hemiplegia with numbness.
πSpasms of chest with renal pains.
Nervousness.
‖Spasms.

[37] **Sleep.** Inclination to yawn; great sleepiness.
Uneasy sleep, with extreme restlessness during night.
Vivid dreams.

[38] **Time.** After midnight: spasmodic cough with copious expectoration and vomiting.
At 11.30 P.M.: violent tickling in larynx, followed by cough with expectoration.
At 6 A.M.: cough wakes him.
At 6 or 7 in morning: cough <.
In morning: on awaking, dull headache above r. eye; cough < on first rising; attacks of barking, tickling cough, with vomiting and expectoration of mucus; cough most constant.
At 3 P.M.: violent cough, with vomiting and expectoration of mucus.
In evening: after lying down, tearing in l. eye up into forehead; scraping and dry feeling in larynx <; attacks of barking, tickling cough, with vomiting and expectoration of mucus.
At night: insufferable abdominal pains; in bed, very violent lancinating thrusts in anterior portion of urethra and glans; suffocative cough <; pressive pains in præcordial region with palpitation; extreme restlessness.

[39] **Temperature and Weather.** Warmth: throat <.
In warm room: tickling in trachea and cough <.
When entering heated room from cold open air: suffocative cough <.
Warmth of bed: < throat.
In open air: tickling in trachea and cough >.
‖Slightest exposure aggravates catarrh severely.
Cold things: great sensitiveness of teeth.
Catarrhal attacks come on early in Fall, upon first change from warm to cold weather, lasting until next Summer when weather again became warm.

[40] **Fever.** General heat over whole body followed by slight perspiration.
Sensation of coldness in various parts of body.
‖Chilliness, then again fever and sweat. θMenorrhagia.
Profuse sweat.

[41] **Attacks, Periodicity.** Sudden: drawing pains in teeth; lancinations from renal region along ureters into bladder; cessation of menstrual flow on second day, from exposure; pulmonary congestion, with profuse mucous secretion and spasmodic, suffocative cough.

Digitized by Google

Spasmodic: cough after midnight; pains in kidneys; difficulties of chest with renal pains; suffocative cough.
Transient: painful stitches at times in l., at times in r. side of chest; stitches in loins.
Paroxysmal: tickling cough, ending with expectoration of mucus.
Frequent: violent sneezing; hawking of mucus; ineffectual urging to stool; emissions of deep-colored urine; scanty discharges of urine, with straining and tenesmus; erections; coughing; hacking cough; tearing stitches along muscles of r. calf.
Lasting a minute and a half: violent lancinating thrusts in anterior portion of urethra and glans at night in bed.
For ten minutes: cough with expectoration of much tenacious mucus, at 11.30 P.M.
Constant: desire to spit; pain in l. hypochondrium and pain across loins; gurgling and rumbling of bowels; urging to urinate; swallowing; tickling in bronchi about their bifurcation; cough.
Beginning in evening and lasting through night: roaring in ears, disturbing sleep.
Protracted: bronchial catarrhs remaining after whooping cough.
For three evenings in succession: sickness of stomach, with faintness and vomiting.
For seven weeks: non-appearance of menses.
From early in Fall until next Summer: catarrhal attacks.
Chronic: bronchitis complicated with gravel.

[42] **Locality and Direction.** Right: dull headache above eye; pressive pain in side of forehead; indefinite drawing and pressure in eye; crackling in ear; painful, cramp-like drawing in ear; tension, drawing and tearing in shoulder; pain and stiffness in leg; tearing stitches along muscle of calf.
Left: pressure upon eye and eyeball; roaring, ringing and crackling in ear; burning and drawing in hypochondrium; constant, dull, burning pain in hypochondrium; pains in hypochondrium, as from incarcerated flatus, pains extending to side of back and lumbar vertebræ; bruised pain in clavicular region; tensive pain in upper part of chest near clavicle; burning, tearing, pressive pain near elbow; severe stitches in tip of elbow.
From r. to l.: sharp pains in lower part of abdomen.

[43] **Sensations.** As if head would split; as if scalp was drawn tightly over skull; as if a hair was between eyeballs and lids; as of a foreign body between lids and balls; as if external auditory passages were closed; as if a

Digitized by Google

crumb or hair was lodged in throat behind larynx; as of hunger even after eating; as of a ball or stone lying in stomach; as of something ascending towards stomach, which makes her think she will vomit water; as if loins were broken; as of incarcerated flatus in l. hypochondrium, pains extending to l. side of back and lumbar vertebræ; as if a crumb or large walnut was sticking behind larynx; as of mucus ascending and descending trachea; as if a plug of mucus was moving in chest; as if head would split.

Pain: in head; in occiput; in stomach; in lower part of abdomen; in head; in vulva; of whole chest; in r. leg; in limbs.

Spasmodic pains: in kidneys.

Violent lancinating thrusts in anterior portion of urethra and glans.

Lancinations: sudden, acute and prolonged, from l. renal region along ureters into bladder.

Cutting: in umbilical region; in region of bladder.

Stitches: in occiput; in region of spleen; in upper part of chest; at times in l., at times in r. side of chest; between shoulders; in loins; in tip of elbow.

Tearing stitches: along muscles of r. calf.

Stitching: in ears; in patellæ.

Sticking: in both temples; in inguinal, vesical and pubic regions; in rectum; in kidneys; in both scapulæ; in various parts of skin.

Thrusting: in inguinal, vesical and pubic regions.

Shooting: in hollow roots of teeth.

Tearing: frontal headache; from l. eye up into forehead; in r. shoulder; near l. elbow.

Drawing: in occiput, temples and r. eye; in teeth; in l. hypochondrium; in inguinal, vesical and pubic regions; in r. shoulder; down thighs and calves.

Painful cramplike drawing; especially in r. ear.

Splitting: headache.

Racking: cough.

Scraping: in throat; in larynx.

Raging pain: from r. eye along squamous portion of temporal bone, on inner side, to occiput.

Burning: in throat; in l. hypochondrium; in anus; in urethra when urinating and continuing after; in tumor of vulva; beneath sternum; near l. elbow; in soles of feet.

Soreness: of throat; of vulva; beneath sternum; of whole chest, < at superior portion.

Tensive pain: in upper part of l. chest, near clavicle.

Tension: about abdomen; in r. shoulder.

Digitized by Google

Stiffness: of r. leg.
Griping: in abdomen; in umbilical region.
Smarting: between eyeballs and lids.
Biting: between eyeballs and lids; in various parts of skin.
Burrowing: frontal headache.
Cramplike pains: in kidneys.
Constriction: of throat; about abdomen.
Bruised pain: in groins and sacro-lumbar region; in l. clavicular region.
Excoriated feeling: in tumor of vulva when walking; in throat.
Rawness: of mouth, throat and pharynx; of air passages.
Roughness: of throat.
Aching: through small of back.
Pressive pains: in orbits; in both temples; in r. side of forehead, sometimes extending to occiput; in occiput, temples and r. eye; in præcordial region with palpitation; near l. elbow; in patellæ.
Pressive: frontal headache; headache.
Pressing: in kidneys.
Pressure: upon l. eye and eyeballs; in stomach; in bladder; beneath sternum; upon chest.
Oppressive pains: in kidneys.
Oppression: of lower part of chest.
Fulness: of head; of stomach.
Throbbing: in tumor of vulva.
Tickling: in one or both ears; in throat; in larynx; in trachea; in bronchi about their bifurcation.
Crawling pain: in scalp; in malar bones, or beginning in malar bones and extending over back of nose to opposite cheek; in anus.
Numbness: with hemiplegia.
Weariness: of lower limbs; in calves; of feet.
Lassitude: of lower limbs.
Dull: frontal headache; headache above r. eye; pain in l. hypochondrium; pains in kidneys; pain in urethra.
Coldness: in various parts of body.
Dryness: of nose; of posterior nares and throat; of tongue and of whole mouth; of palate; in larynx.
Violent pruritus: at orifice of urethra.
Itching: in one or both ears; of nose; in anus; at orifice of urethra; in various parts of skin; pimples in various parts of skin.

"**Tissues.** Especially affects mucous membranes; catarrh; whooping cough, etc.
Menorrhagia with large coagula.
Renal and vesical troubles.

"**Touch. Passive Motion. Injuries.** Touch: toothache

Digitized by Google

with great sensitiveness; tumor of vulva hard and sensitive.

Pressure: epigastric region, especially pit of stomach, sensitive; pains in kidneys <; region of kidneys painful.

Pressure of clothing: vulva cannot bear.

Scratching: pains in scalp oblige.

Rinsing mouth causes cough and vomiting on account of sensitiveness of mouth and fauces.

Brushing the teeth causes cough and vomiting, arches of palate being very irritable.

[46] **Skin.** Itching, sticking and biting in various parts of skin. Here and there, small red spots and itching pimples in various parts of skin.

[47] **Stages of Life, Constitution.** Girl, æt. 2½; spasms.

Miss Smith, æt. 20, sallow complexion, comparatively healthy, never any menstrual troubles; menorrhagia.

Student, æt. 20; tinnitus.

Mrs. C., æt. 27, ailing for two years, < for six months; vaginitis.

W. P., æt. 40, married; impotence and backache.

Mrs. Smith, æt. 50; subject for years to catarrhal attacks.

[48] **Relations.** Compare: *Canthar.* (action on kidneys).

COCHLEARIA (See Amoracea Sativa).

CODEINUM.

An alkaloid of Opium. $C_{18}H_{21}NO_3$.

Provings by E. E. Marcy and others (see Encyclopedia, vol. 3).

"Discovered in 1832 by Robiquet in the muriate of morphia, prepared according to the process of Gregory. It exists in opium, combined with meconic acid, and is extracted along with morphia in the preparation of muriate of morphia."

The provings evolve many symptoms similar to those we find in the provings of morphia.

CLINICAL AUTHORITIES.—*Twitching of eyelids*, Marcy, Hale's Therap., p. 185; *Soreness of skin of face and scalp after neuralgia*, E. E. Marcy, N. A. J. [1] **Mind.** Great mental exhilaration.
Depression of spirits with dull headache.
Inability to apply the mind.
Lascivious thoughts.

[2] **Sensorium.** Confusion and heat of head.

[3] **Inner Head.** Heat in head.
▮Dull headache in morning, which gradually diminishes until noon, when it disappears.
▮Dull headache soon after getting up in morning, < on l. side, and lasting about two hours.
Headache from fatigue and excessive mental excitement.

[5] **Sight and Eyes.** Weakness of vision.
▮Involuntary twitching of l. eyelid, sometimes > by rubbing.
▮Involuntary twitching of both eyelids, whenever he attempted to read or write.

[7] **Smell and Nose.** Entire loss of smell.

[8] **Upper Face.** ▮Painful soreness of skin of face and scalp, which remained after a severe attack of neuralgia.

Digitized by Google

[9] **Lower Face.** Lips dry and parched, constant inclination to moisten skin.
[12] **Inner Mouth.** Dryness of mouth.
[13] **Throat.** Tickling sensation in throat, in afternoon and evening.
[14] **Appetite, Thirst. Desires, Aversions.** Great thirst, with a particular desire for bitter substances.
[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Empty eructations, with acute pains in stomach.
‖Nausea and vomiting.
[17] **Scrobiculum and Stomach.** Tenderness in stomach, with violent pulsations of heart and carotids.
‖Violent spasmodic pain at pit of stomach.
‖Gastralgia.
⁝Neuralgia of stomach and solar plexus.
‖Affections of stomach or abdomen, dependent on disorder of solar plexus of great sympathetic.
[19] **Abdomen.** Extreme tenderness of lower part of abdomen.
Dull pain throughout entire abdomen.
Gastric and abdominal neuralgia.
[20] **Stool and Rectum.** Constipation with tenderness of bowels, especially in transverse and descending colon.
[21] **Urinary Organs.** Increased secretion of urine, it being lighter in color.
Semiparalysis of bladder.
‖She passed five pints of urine daily, specific gravity 10.40 and sugar to the extent of 32.72 grains; < from anxiety and overwork.
‖The urine previously saccharine contained no trace of sugar.
[22] **Male Sexual Organs.** Sexual excitement during night leading to nocturnal pollutions.
[24] **Pregnancy. Parturition. Lactation.** Nausea and vomiting during pregnancy.
[27] **Cough.** ‖Short, irritating cough < during night.
‖Troublesome cough, with copious mucous and sometimes purulent expectoration.
‖Obstinate cough with expectoration and nervous excitability.
‖Night cough of phthisical patients.
[28] **Inner Chest and Lungs.** Fulness and oppression of chest.
Sharp pain in r. lung on inspiration.
Stitching pains in l. lung on breathing.
Severe pain in shoulder and chest on motion.
[29] **Heart, Pulse and Circulation.** Sympathetic palpitation of heart and irregular action from derangement of ganglionic system.
Violent palpitation of heart and carotids.

Digitized by Google

Painful pulsations of heart on attempting to study or write.
Drawing pain around heart, which beats loud and full.

[31] **Neck and Back.** Convulsions in muscles of neck.
Convulsive movements of muscles of back and neck.
Neuralgic pains from occiput to back of neck.
Painful pulsations in l. side of neck.
Sharp pains extending from stomach and chest through to back, between shoulders, < on r. side.
Acute pains in region of kidneys.

[32] **Upper Limbs.** ‖Spasmodic twitches in arms.
On moving arm, severe pain in deltoid muscles.
Pulsating pain in l. upper arm.
Numbness of hands and arms.

[33] **Lower Limbs.** Sensation and power of motion impaired.
‖Involuntary twitchings of lower limbs.
‖Painful, spasmodic jerking of legs.
‖Neuralgic pains in thighs and legs, and subacute rheumatic pains in knee and ankle joints.
Sudden pain in knee joints, making walking impossible for a few minutes.
Paralytic affections of lower extremities, with extreme restlessness, constant desire to change position, and inability to sleep.

[34] **Limbs in General.** Spasmodic twitching of upper and lower extremities.

[35] **Rest. Position. Motion.** Motion: severe pain in shoulder and chest.
On moving arm: severe pain in deltoid muscles.

[36] **Nerves.** Extreme restlessness.
‖Trembling of whole body.
‖Morbid sensitiveness of surface in nervous and hysterical females.
Frequent paroxysms of involuntary twitchings of muscles of all parts of body, indigestion and various manifestations of morbid excitability of nervous system in consequence of chronic ovaritis and suppressed menstruation.
Chorea; sleep constantly disturbed; unusual tendency to involuntary twitching of muscles of different parts of body.

[37] **Sleep.** Sleepiness, drowsy feeling.
‖Sudden twitchings during sleep, so violent as to wake up the sleeper in affright. θChorea.
‖Disturbed sleep from frightful dreams, causing patients to wake in morning exhausted and unrefreshed.
‖Sleep constantly disturbed by severe night cough. θPhthisis.

[38] **Time.** In morning: dull headache, which gradually di-

Digitized by Google

minishes until noon, when it disappears; dull headache soon after getting up, < on l. side, and lasting about two hours; awakes exhausted and unrefreshed on account of disturbed sleep.
In afternoon: tickling in throat.
In evening: tickling in throat.
During night: sexual excitement leading to nocturnal pollutions; short, irritating cough worse.
Night cough of phthisical patients.

41 **Attacks, Periodicity.** Sudden: pain in knee joints; twitchings during sleep.
Spasmodic: twitching of l. eyelid; twitches in arms; jerking of legs; twitching of upper and lower extremities.
Frequent: paroxysms of involuntary twitching of muscles of all parts of body.
For a few minutes: walking impossible on account of sudden pain in knee joints.
Constant: inclination to moisten skin; desire to change position; disturbance of sleep from chorea; disturbance of sleep by night cough.
Lasting about two hours: dull headache < on l. side, soon after getting up in morning.
Dull headache in morning, which gradually diminishes until noon, when it disappears.

42 **Locality and Direction.** Right: sharp pain in lung on inspiration; sharp pains from stomach and chest through to back, between shoulders, < on side.
Left: dull headache < on side; involuntary twitching of eyelid; stitching pains in lung on breathing; painful pulsations in side of neck; pulsating pain in upper arm.

43 **Sensations.** Pains: in stomach; in shoulder and chest; in deltoid muscles; in knee joints.
Stitching pains: in l. lung on breathing.
Painful spasmodic jerking: of legs.
Drawing pains: around heart.
Painful soreness: of skin of face and scalp, after neuralgia.
Sharp pain: in r. lung on inspiration; from stomach and chest through to back, between shoulders, < on r. side.
Acute pains: in region of kidneys; in stomach.
Neuralgic pains: from occiput to back of neck; in thighs and legs; of stomach and solar plexus.
Subacute rheumatic pains: in knee and ankle joints.
Spasmodic pain: at pit of stomach.
Pulsating pain: in l. upper arm.
Painful pulsations: of heart on attempting to study or write; in l. side of neck.
Prickling: of skin.

Digitized by Google

Dull pain: throughout entire abdomen.
Dull: headache.
Oppression: of chest.
Fulness: of chest.
Itching: of skin over whole body; of eczema and porrigo.
Tenderness: in stomach; of bowels, especially in transverse and descending colon.
Tickling: in throat.
Numbness: of hands and arms.
Dryness: of lips; of mouth.
Heat: of head.

[44] **Tissues.** Sensation of general warmth with itching of skin, over whole body.

[45] **Touch. Passive Motion. Injuries.** Rubbing: involuntary twitching of l. eyelid, sometimes > by.

[46] **Skin.** Itching of skin over whole body.
Troublesome itching of eczema and porrigo.
Prickling of skin.

[47] **Stages of Life, Constitution.** Woman, æt. 68; diabetes.

[48] **Relations.** *Codeinum* cured gastralgia, which had withstood all other remedies, *Bellad.* included.
Codeinum relieved cough and sleeplessness in phthisical patients after failure of *Hyos.*, *Ipecac.* and *Conium.*
Compare: *Agar.* (twitching of eyelids); *Arsen.* (pains in legs and nightly restlessness); *Hyos.* (twitching of eyelids after reading); *Laches.* (superficial sensitiveness); *Rhus tox.* (chorea, nightly restlessness, pains in legs); *Sulphur* (spasmodic twitching of legs); *Sulph. ac.* (trembling of whole body).

COFFEA CRUDA.

Coffee. *Rubiaceæ.*

Introduced by the Dutch into Java about 1690.

The Coffee plant is a small tree from 15 to 30 feet in height; the branches are opposite, gradually diminishing in length as they ascend, forming a pyramidal summit, which is covered with green foliage throughout the year; the leaves are opposite, smooth, dark green, oblong-ovate and four or five inches long, the flowers are white, with an odor resembling jasmine, the fruit is first green, then red, and ultimately dark purple.—U. S. D.

For medical use we take that which is imported under the name of Levantic (Mocha beans). We use the raw, not the roasted bean. When Coffee is roasted it destroys the caffein and changes it into caffeone—this is stimulating like tobacco. Hahnemann's caution in this respect is justified. His treatise on the effects of Coffee was published in Leipzig in 1803. A full proving of coffee by five persons, one of whom was Hahnemann, is recorded by Stapf in his additions to the Materia Medica, and contains 246 symptoms. Caffeine, the alkaloid of Coffea, contains the toxic principles of coffee in a very concentrated form. It was first discovered by Runge, and afterwards by Robiquet. It occurs in long, snow-white, opaque, odorless crystals, sometimes conjoined into feathery crystals, of a feeble, bitter taste.

' **Mind.** Memory active, easy comprehension; increased power to think.

Unusual activity of mind and body.

Sentimental ecstasy; excited imagination.

Full of ideas; quick to act, no sleep on this account.

Digitized by Google

Lively fancies: full of plans for the future.
Delirium at night, with dry heat.
Delirium tremens: unsteady running about; imagines he is not at home, with trembling of hands; small, frequent pulse
Great loquacity, brain feels clear and is active, he feels strong enough to do anything, feels impelled to push things; veneration for the Supreme Being and love for family; benevolence excited.
Answers short, not disposed to talk, or endless volubility when describing his ailments.
Patients cannot contain themselves, crying out in a most terrible manner; they bend the body double and throw the limbs about, grate the teeth, are covered with a cold sweat, and finally stretch themselves out in a stiff, rigid manner, with groaning and difficult respiration.
Weeping mood.
Weeping and complaining, with fear of death; thinks that she will die. θMetrorrhagia.
Excessive weeping and lamentations over trifles.
Whining and moaning; much crying.
Child cries and laughs easily; while crying it suddenly laughs quite heartily and finally cries again.
Cries and trembles, does not know what to do.
Throws things about, away, down, etc.
Cheerfulness; lively temper; mirthful.
Depression of spirits.
Weeping, complaining, disheartened mood, anxiety of mind and conscience filled with many fears. θHysteria.
Fear of death. θAsthma.
Metrorrhagia, large black lumps, < from every motion, violent pain in groins, fever, bright red face; in greatest despair, believes herself dying.
Fright from sudden pleasant surprises.
Pains unbearable, feels discouraged, cries and throws himself about; fear of fresh air and of least noise; excessive weeping and lamentations over trifles.
Great anguish; cannot be composed; is not able to hold the pen; trembles.
Exasperation, tears; tossing about in great anguish.
Pains seem insupportable, driving to despair.
Irritability; oversensitive disposition.
Fretful mood, alternately merry or whining.
Child frets and worries in an innocent manner; is not cross, but sleepless; it laughs one moment and cries the next.
Mental excitability.
Feels < when hurried.

Digitized by Google

Ailments from excessive joy, excessive laughing and playing; from disappointed love; from anger, or from vexation with vehemence or fright; from narcotic medicines, noises, strong smells.

‖Weeping from uncontrollable delight. θAfter parturition.

‖‖Affections after sudden emotions, particularly pleasant surprises.

Sensorium. ‖Cerebral erethism, with nervousness and palpitation of heart. θCardiac hyperæsthesia.

Sensorium more vivid, hence increased susceptibility to pain.

‖‖All the senses more acute, reads fine print easier, hearing, smell, taste and touch acute, particularly also an increased perception of slight passive motions.

Vertigo: with whirling sensation in head, occasionally a general faint feeling, < by thinking; with burning in stomach; with sick headache, > by a change of position or from moderate outdoor exercise; she cannot stand; with blackness before eyes; when stooping.

‖Dizzy confusion of head.

Confusion of senses.

‖‖Threatening of apoplexy; overexcited, talkative, full of fear, pangs of conscience, aversion to open air, sleepless, convulsive grinding of teeth.

Inner Head. ‖Feels and hears a cracking in vertex when sitting quietly.

Heaviness of head, particularly in forehead over eyes.

‖Head feels too small.

‖Congestion of blood to head; especially after pleasant surprise; from talking; while talking.

‖Headache like pressing with something hard on surface of brain.

Headache with great mental excitement.

‖Headache from slightest cause, from thinking, excessive joy, contradiction, vexation, catching cold, chill, eating too much, with aversion to the accustomed use of coffee, sensitive to least noise and music; pain seems unbearable, making patient tearful; they lose all self-possession, throw themselves about crying violently, dread cold air, are chilly.

Headache with whining mood.

‖Headache as if whole brain was torn and bruised, or dashed to pieces; < from motion, noise, or light.

‖Headache intolerable, head feels small and as if filled with a fluid; as if it would burst or fly to pieces if she moved.

Stinging pain in locality of amativeness on l. side.

‖Nervous, hysterical headaches in people of nervous or sanguine temperament.

Digitized by Google

‖‖One-sided headache, as from a nail driven into head; < in open air.
‖Pain drives to despair and patient runs wildly about room.
‖Sick headache, with vertigo, flushed face, burning in eyes, throbbing in temples.
‖Megrim from mental exertion, in persons who do not use coffee.
‖Headache renewed and < after eating and sleep; it disappears in open air, but returns in a short time in room.
‖Headache after intoxication.
‖Hyperæmia of brain after abuse of *Bellad.*
Threatening of apoplexy, with congestion to head.

[5] **Sight and Eyes.** Eyes reddish and shining; increased visual power, sees much more clearly in open air; reads fine print easily.
Scintillations before eyes.
‖Pupils dilated.
‖‖Eyes half open during sleep, with convulsive motion of eyes when awake. θSummer complaint.
‖Burning in eyes and throbbing in temples. θSick headache.

[6] **Hearing and Ears.** ‖Hearing more acute and sensitive; music has a shrill sound.
‖Aversion to noise; it hurts him.
‖Noises and singing in ears, with nervous people.
‖Cracking noise in head (one side), synchronous with pulse; particularly in morning and in open air; > indoors.
‖Hardness of hearing, with buzzing in l. ear as of a swarm of bees.

[7] **Smell and Nose.** ‖Acute, sensitive smell.
‖Nosebleed: with heaviness of head and ill humor; during straining at stool.
Bleeding from air passages.

[8] **Upper Face.** Transitory flushes in face.
‖Shining red face with much fever. θMetrorrhagia.
‖Dry heat of face, with red cheeks.
‖Flushed face, burning in eyes and throbbing temples. θSick headache.
‖Prosopalgia, extending to molar teeth of r. side; she is very irritable, sensitive and moaning from distressing pain; painful teeth > by contact with ice.
‖Sweat on face, with internal chilliness.

[10] **Teeth and Gums.** Convulsive grinding of teeth.
Toothache: driving the patient almost frantic; with weeping, trembling, anguish and tossing about; indescribable

Digitized by Google

pains; stinging, jerking, intermittent aching; with restlessness, anguish and weeping mood, especially at night and after a meal; < from hot or warm drink, from chewing, at night; > when holding ice or ice cold water in mouth.

‖Violent throbbing toothache; run about crying and complain of insupportable pain, though they confess that sometimes the pain is not so intense, yet they are affected very much; they behave like persons distracted.

‖‖Neuralgic toothache, entirely > by holding cold water in mouth, returning as this becomes warm.

‖Toothache during catamenia.

‖Complaints of anæmic children during dentition.

[11] **Taste and Tongue.** ‖Taste: more acute; delicate; sweetish. Loss of taste.

[12] **Inner Mouth.** Excessive dryness of mouth at night.

[13] **Throat.** ‖Uvula too long, swollen.

‖Steady pain from side of palate into œsophagus; constant desire to swallow, from sensation as of plug or phlegm in throat.

Constantly increasing pain in throat and head, with weeping mood.

‖Sore throat, < from cool air, affected parts very sensitive.

‖Swelling and painfulness of the throat; < when swallowing.

‖Influenza.

[14] **Appetite, Thirst. Desires, Aversions.** Morbid sensation of excessive hunger.

‖Increased hunger, with hurried eating.

With the headache a loathing of food and drink on account of a continuance of sickness at stomach.

‖‖Thirst: at night, wakens him; during sweat; rather infrequent during heat, almost constant after heat and during sweat.

Aversion to coffee.

[15] **Eating and Drinking.** ‖Eats and drinks hastily.

‖‖Bad effects from wine or liquor drinking.

Headache renewed, < after eating.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.

Eructations: burning; sour; like rotten eggs; violent, spasmodic, with rising of the ingesta.

Continual sickness at stomach with headache.

‖Constant inclination to vomit, felt in throat.

‖Vomiting of mucus with violent attacks of megrim.

‖Bilious vomiting and restlessness at commencement of variola.

[17] **Scrobiculum and Stomach.** Tension of epigastric region, with sensitiveness to touch.

Digitized by Google

Anguish and pressure in epigastrium.
Burning in stomach with vertigo.
Cramps in stomach.
‖Gastric derangements of infants.
‖Disordered stomach, indigestion.

[19] **Abdomen.** Flatulency.
‖Pressure in abdomen, as from incarcerated flatus.
‖‖Distended abdomen, extreme emaciation. θSummer complaint.
Excessive pains with anguish, great nervousness, loud crying and grating of teeth.
‖Colic: as if stomach had been overloaded; as if abdomen would burst; cannot suffer clothes to be tight on abdomen; exceedingly painful, driven to desperation; as if intestines were being cut; in paroxysms excessively painful and violent.
‖Terrible colic, with horripilation, anxiety and violent tossing of limbs, during paroxysm. θIntermittent fever.
‖Continuous pinching pain in iliac region.
‖Summer complaint of children.
‖Incarcerated hernia.

[20] **Stool and Rectum.** ‖Fetid flatus.
‖Diarrhœa: watery, painless, weakening, from domestic cares; during dentition, after the use of chamomile; of liquid, fecal, offensive stools, from sudden joy or taking cold in open air; painless.
Constant alternations of constipation and diarrhœa.
‖Constipation and hemorrhoids. θSick headache.
‖Hemorrhoidal conditions.
During straining of stool, nosebleed.
Spasmodic contraction of sphincter, with burning and itching in anus.

[21] **Urinary Organs.** Pressure on bladder.
‖Frequent, profuse micturition, urine colorless.
Emission of a large quantity of urine at midnight.
Urine passes off drop by drop.

[22] **Male Sexual Organs.** Excessive excitability of sexual organs.
‖Sexual organs much excited without emission of semen, and with dry heat of body.
Hypersensitiveness of sexual organs; little suffering seems unbearable; > in morning and at night, also in open air; < from cold water.
Nocturnal emissions, followed by great languor and irritability of temper.
‖Scrotum relaxed.

[23] **Female Sexual Organs.** ‖Hysteralgia; metritis; nymphomania.

Digitized by Google

‖Great sensitiveness of female genital organs, with general excitability; she is in a state of ecstasy.
‖Oversensitiveness of vagina.
Aversion to intercourse, on account of pain it produces.
‖Inflammation induced by excessive joy; she is in a state of ecstasy, and is very sensitive to contact. θMetritis.
Bearing down in genitals during and after walking, with frequent urination.
‖Uterine hemorrhage, with excessive sensitiveness of organs and voluptuous itching.
‖Metrorrhagia: large black lumps; < from every motion, with violent pain in groins and fear of death.
Menses: too profuse and of long duration; profuse, with coldness and stiffness of body; only during evening; profuse with excessive sensitiveness of organs and voluptuous itching; flowing profusely during first part of night.
‖Dysmenorrhœa.
‖Abdominal cramps during menstrual period, or at the beginning; twitching of limbs, bending the body double, crying, fear, cold perspiration, she throws herself upon the ground.
Excessively painful and violent paroxysms of colic, with profuse bloody discharge, profuse secretion of mucus, voluptuous itching and excessive sexual excitement.
‖Leucorrhœa: like mucus, or milky; more while urinating.
‖Excessive sensitiveness about vulva, with voluptuous itching, desire to rub or scratch the parts, but they are too sensitive.
‖Eruptions on female genitals.

21 **Pregnancy. Parturition. Lactation.** ‖Ptyalism of pregnancy.
She is very sleepless, wide awake, and the pains are very distressing; she feels them very acutely.
Continuous and very distressing pains, making her feel as if she would "go distracted."
Abortion; patient querulous and in great fear of death.
‖Excessive labor pains; too long continuation of after-pains.
‖Excessively severe pains from threatened abortion, or labor.
‖‖During labor or after-pains, extreme fear of death.
‖Irregular, ineffectual labor pains.
‖Ineffectual labor pains, contractions of uterus and pressure upon os uteri, causing only pain in small of back.
‖Labor pains insupportable to her feelings; she feels them intensely, weeps and laments fearfully; although the pains are severe, they are not efficacious; constant

Digitized by Google

whining, crying, lamenting; violent moving of limbs; head hot, red; face puffed, eyes glittering; complete despair, great fear of death.

‖Labor pains ceasing, with complaining loquacity.

‖Lochial discharge too profuse, exalted nervous sensibility.

Insupportably intense after-pains, or pains followed by convulsions, coldness and rigidity of body.

‖Puerperal fever from mental excitement; frequent crawling, with feverish heat, tongue moist, no thirst; delirious talking, eyes open, shining; violent abdominal pains, with oversensitiveness, despair, sleeplessness, trembling of hands.

‖Puerperal convulsions; extreme excitability.

‖Agalactia.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Rawness in larynx, with hoarseness and roughness in morning on awaking.

‖Larynx as if covered with dry mucus.

Spasmodic constriction of larynx.

‖Spasmus glottidis; starts from sleep with short inhalation or gasping, with wheezing, cold sweat, blue face; < when put into bath; mucous vomiting.

Sensation of rawness in trachea.

[26] **Respiration.** ‖Oppression of chest; short inspiration; chest heaves visibly.

Moaning.

Hot breath.

‖Child gasps for breath several times during day; then more frequently, and finally three or four times every hour.

Suffocative fits.

‖Asthmatic attacks in morning, wants to move continually.

‖Asthma.

[27] **Cough.** ‖Irritation to cough, with coryza, < in open air.

‖Irritation to cough, outdoors.

Continual inclination to cough; feels exhausted after coughing.

Cough: short, dry, hacking; spasmodic and dry, moist; single, sudden shocks, quickly following each other; from irritation in throat, phlegm in back part of throat; with dimness before eyes; during evening and midnight; when falling asleep or soon after; during measles.

‖Short, dry cough, as from constriction of larynx.

Dry, hacking cough, like whooping cough, with this difference, that the spasms are principally experienced during inspirations, not during expirations.

‖Constant cough, emaciation and cachectic appearance.

Digitized by Google

During cough: stitches in sides; anxiety; dimness before eyes and vertigo.

[28] **Inner Chest and Lungs.** Oppression of chest.
Sensation as if body would burst, with feeling of fulness and pressure, severe cramps extending into chest.
Constriction of chest, asthma at night.

[29] **Heart, Pulse and Circulation.** Palpitation of heart, violent, irregular, with trembling of limbs.
Nervous palpitation of heart.
Palpitation after excessive exaltation, joy, surprise.
Strong, quick palpitation of heart with extreme nervousness, sleeplessness and cerebral erethism, caused by unexpected news of great good fortune.
Pulse full and frequent.
Pulse: more frequent, but less vigorous, even small and weak; intermitting.

[31] **Neck and Back.** Laming pain in small of back, while sitting or standing.

[32] **Upper Limbs.** Pains extend from face down arms, even to finger ends.
Continual jerking and twitching of arms and hands, otherwise well.
The hands tremble if he tries to hold them still.
Great trembling of hands. θDelirium tremens.
Trembling of hands, with heat in palms and coldness of backs of hands.

[33] **Lower Limbs.** Crural neuralgia of gouty, rheumatic origin, tearing, stitching pain, < from motion; attacks irregular in appearance and lasting several hours, mostly at night or in afternoon.
Crural neuralgia of l. limb, > from pressure, but very much < by pressure at point of exit of nerve.
Sciatic or crural neuralgia, in attacks; rending, shooting, < by walking; > by pressure, < afternoon and night; restless and sleepless at night.

[34] **Limbs in General.** Coldness of limbs, hands and feet.
Twitching of limbs.
Pains in limbs.

[35] **Rest. Position. Motion.** While sitting: laming pain in small of back; feels and hears crackling in vertex.
Lying down: external heat, with shivering in back in evening after.
While standing: laming pain in small of back.
After walking: bearing down in genitals.
Motion: metrorrhagia < from every; headache < from; crural neuralgia < from; spasms or convulsions, renewed after every; chill increased; inclination for.
Change of position: > vertigo.

Digitized by Google

When stooping: blackness before eyes.
Worse when bending diseased part, particularly when bending it backward or forward.
Worse when moving diseased limb.
Worse when sitting down.
While walking: bearing down in genitals; sciatic or crural neuralgia <.
Exercise: vertigo > by moderate outdoor; chill increased by; inclination for.
Worse from bodily exertion.
Wants to be continually moving.
Cries and throws himself about.
Tosses about in great anguish.
Patients cannot contain themselves, they bend the body double and throw the limbs about, grate the teeth, are covered with a cold sweat and finally stretch themselves out in a stiff, rigid manner.

[36] **Nerves.** Overexcitement of entire nervous system, < outdoors.
Physical excitement through mental exaltation.
Great excitement and irritability of sensory organs and of whole nervous system, as in lying-in women, and particularly after abuse of chamomile.
Great sensibility, mental and physical; intolerance of all manipulations, which cause great agitation, interfering with treatment; rather quiet when let alone; afraid of the surgeon; sleepless, so long as any noise or light continues, at night.
Extreme excitability of nervous system when spasms are apprehended, or if spasms have actually been developed, attended with cold extremities and grinding of teeth.
The child is very excitable and weakly, and in consequence frequently suffers with spasms.
Extreme sensitiveness, especially in children.
Fear of fresh air and of least noise.
Slight pain unendurable.
Great agitation and restlessness.
Great restlessness, lying awake most of night and tossing about in bed. θAgue.
Extreme nervousness with strong, quick palpitation of heart. θCardiac hyperæsthesia.
Hysteria and nervousness; screams, weeping.
Fainting from sudden emotions.
The greatest mental and physical exhaustion, lassitude and general debility.
Headache or other nervous pains, with whining mood.
Muscular jerking.
Spasms brought on by excessive laughing and playing, in weakly, excitable children.

Digitized by Google

‖Spasms or convulsions, renewed after every emotion.
‖Convulsions of teething children, with grinding of teeth and coldness of limbs, after overexcitement.
Paralysis.

[37] **Sleep.** ‖‖Sleeplessness from overexcitement of body or mind.
Cannot get to sleep because some ideas force themselves upon the mind.
‖Sleeplessness from joy or agreeable surprise, from long watching, from excessive use of coffee.
Nervous, restless agitation, preventing all sleep.
‖Quick to act; no sleep on this account.
The child is very excitable, playful and sleepless; it seems as if it could not sleep; it frets and worries in an innocent manner; is not cross, but sleepless; it laughs at one moment and cries the next, is feverish for want of sleep, which it cannot obtain.
Wide awake; not the slightest inclination to sleep; after great mental strain, joy, night watching; acute diseases; dental irritation.
‖Sleeplessness, with palpitation and nervousness. θCardiac hyperæsthesia.
‖Sleeplessness of lying-in women.
‖Sleeplessness during reconvalescence.
‖Drowsiness with inability to go to sleep; very weary with sleep; much gaping.
On going to sleep, starts up suddenly in affright, with groans and fear of falling.
Restless sleep; frequent, sudden starting and waking.
Tossing about or turning from side to side in bed.
‖‖Imperfect sleep, with eyes half open and convulsive motion of eyes when awake. θSummer complaint.
‖Sleeps until 3 A.M., after which he only dozes, on waking does not come to his senses.
‖Very long, vivid dreams at night; pleasant dreams, even merry.

[38] **Time.** In morning: crackling noise in head; hypersensitiveness of sexual organs <; hoarseness and roughness in larynx on awaking; asthmatic attacks; slight sweat.
In afternoon: attack of crural neuralgia; sciatic or crural neuralgia <.
During evening: menses only; cough; dry heat with chilliness in back after going to bed; external heat with shivering in back, after lying down.
First part of night: profuse flow of menses.
At night: delirium, with dry heat; toothache <; excessive dryness of mouth wakens him; hypersensitiveness of sexual organs <; emissions; asthma; attack of crural neuralgia; sciatic or crural neuralgia <; restless and

Digitized by Google

sleepless; lies awake, tossing about in bed; very long, vivid dreams; pleasant dreams; dry heat, with delirium; dry heat, with measly spots on skin.
At midnight: emission of a large quantity of urine; cough.
Sleeps until 3 A.M., after which he only dozes, on waking does not come to his senses.

[39] **Temperature and Weather.** In room: headache returns in a short time.
Indoors: crackling in head >.
Feeling of heat in bed, yet avoids being uncovered.
Better after getting out of bed.
Hot or warm drinks: toothache < from.
Worse from cold: > from warmth.
Affected parts sensitive to warmth or cold air.
Generally dislikes to be uncovered.
Shunning open air.
Outdoors: irritation to cough; overexcitement of entire nervous system.
In open air: headache <; headache disappears; sees more clearly; crackling noise in head; diarrhœa from taking cold; hypersensitiveness of sexual organs <; irritation to cough, with coryza <.
Fresh air: fear of.
Cold air: dread of: sore throat < from; chilliness and shivering from least exposure to.
Liability to take cold from least change.
Cold: great sensitiveness to; prosopalgia from; pain in limbs from.
From bath: spasmus glottidis <.
Cold water: toothache > from; neuralgic toothache entirely > by; hypersensitiveness of sexual organs > from.
Ice: painful teeth > by contact with.

[40] **Fever.** Coldness and chilliness running all through limbs.
Chills running down back.
Chill increased by exercise or motion.
Chilliness and shivering from least exposure to cold air; cannot get warm, hands and feet cold, on account of easy perspiration; chills ascend from fingers and toes to nape of neck and thence to vertex.
Chill without thirst.
Internal shivering, or inward chills, with external heat of face or whole body.
Chilly feelings, with internal and external warmth.
Cold, followed by pain and a desire to weep.
Great sensitiveness to cold.
Flushes of heat or currents of cold air down back.
Flushes of heat and transitory flushes in face.

Digitized by Google

‖External heat, with shivering in back, in evening after lying down.
‖Dry heat in evening after going to bed, with chilliness in back.
Child feverish for want of sleep.
Feeling of heat when in bed, yet avoids being uncovered.
‖Dry heat at night, with delirium.
‖Feverish with pain and always ready to weep.
Heat with thirst.
‖Heat in face, with red cheeks after eating.
One cheek hot and red, with constant shuddering.
External dry heat of skin and dry warmth of face.
Hot flushes to face, hot cheeks and delirium.
Fever is not violent, but nerves are irritated, with sleeplessness.
Even with mild fever patient is very nervous and sensitive.
‖Much fever, with shining redness of face. θMetrorrhagia.
Cold, clammy perspiration over body, but chiefly in palms of hands.
Sweat occasionally follows heat.
‖Slight morning sweat.
‖Perspiration of affected parts.
Sweat with thirst.
General sweat over whole body, most on palms of hands and in face, with internal shivering.
Perspiration slight, mostly in face, with internal shivering.
‖Ague, paroxysms every fourth day, two well days intervening.
‖Intermittent.
‖Traumatic fever.

Attacks, Periodicity. Spasmodic: eructations; contraction of sphincter ani; contraction of larynx; cough.
Occasional: general faint feeling.
Transitory: flushes in face.
Frequent: profuse micturition; short, dry cough.
Constant: desire to swallow; thirst, after heat and during sweat; sickness at stomach with headache; inclination to vomit, felt in throat; pinching pain in iliac region; alternation of constipation and diarrhœa; whining, crying, lamenting; desire to move, with asthma; inclination to cough; cough, jerking and twitching of arms and hands; shuddering.
Several times during day, child gasps for breath, then more frequently and finally three or four times every hour.
Lasting several hours: attacks of crural neuralgia.
Intermittent: aching in teeth.
Every fourth day: paroxysms of ague.

Google

" **Locality and Direction.** Right: prosopalgia extending to molar teeth.

Left: stinging pain in locality of amativeness; buzzing in ear as of a swarm of bees; crural neuralgia of limb.

From without inward: as if a nail was being driven into head.

From above downward: pains extend from face down arms, even to finger ends; chills running down back.

" **Sensations.** As of something hard pressing on surface of brain; as if whole brain was torn and bruised, or dashed to pieces; as if head was small and filled with fluid; as if head would burst, or fly to pieces if she moved; as if a nail was driven into head; as of a swarm of bees in l. ear; as of a plug or phlegm in throat; as if stomach had been overloaded, with colic; as if abdomen would burst; as if intestines were being cut; as if larynx was covered with dry mucus; as of constriction of larynx; as if body would burst, with feeling of fulness and pressure.

Pain: in groins; from side of palate into œsophagus; in throat and head, constantly increasing; in small of back with ineffectual labor pains; from face down arms, even to finger ends; in limbs.

Stitching pains: with crural neuralgia; in sides.

Stinging: in locality of amativeness on l. side; toothache; on skin.

Shooting pains: of sciatic or crural neuralgia.

Jerking: toothache.

Tearing pains: with crural neuralgia; in flesh and cellular tissue, rather than in bones; in parts between articulations themselves.

Rending pain: of sciatic or crural neuralgia.

Burning: in stomach; in eyes; eructations; in anus.

Smarting: on skin.

Soreness: of throat.

Rawness: in larynx; in trachea.

Roughness: in larynx.

Pinching: in iliac region.

Whirling: in head.

Pressure: in epigastrium; in abdomen, as from incarcerated flatulence; on bladder.

Bearing down: in genitals.

Cramps: in stomach; in abdomen during menstrual period, or at the beginning; extending into chest.

Constriction: of chest; of larynx.

Bruised pain: in internal parts.

Anguish: in epigastrium.

Aching: in teeth.

Digitized by Google

Laming pain: in small of back.
Oppression: of chest.
Tension: of epigastric region.
Crackling: in vertex; in head (one side), synchronous with pulse.
Throbbing: in temples; toothache.
Dizzy confusion: of head.
Confusion: of senses.
Heaviness: of head, particularly in forehead over eyes.
Dryness: of mouth; of skin.
Sensation of warmth.
Coldness: of limbs, hands and feet; of body; running all through limbs.
Itching: in anus; of sexual organs; all over, changing to burning.

" **Tissues.** ❙Great sensitiveness and pain of affected parts.
Increased mobility of muscles, or muscles rigid.
Tearing pains in flesh and cellular tissue, rather than in bones; in parts between articulations themselves.
❙❙Extreme emaciation. θSummer complaint of children.
❙❙Affections after sudden emotions, particularly pleasant surprises.
❙Bad effects from wine drinking.

" **Touch. Passive Motion. Injuries.** Touch: epigastric region sensitive to; inflammation induced by excessive joy, she is very sensitive to.
Very sensitive to contact.
Cannot suffer clothes to be tight on abdomen.
Intolerance of all manipulations, which cause great agitation, interfering with treatment.
Pressure: crural neuralgia > by; at point of exit of nerve < crural neuralgia.
❙❙Would like to scratch or rub the part, but it is too sensitive.
Slight passive motions (rocking, etc.) startle him; are perceived as enormous.
Children at times cannot bear to be carried about.

" **Skin.** ❙Dryness of skin, but not in febrile diseases.
❙Excessive sensitiveness of skin.
Hot skin.
Itching all over changes to burning.
Stinging and smarting on skin.
❙Eruptions with overexcitability and weeping.
Purple miliary eruptions all over.
❙❙Measly spots on skin with dry heat at night; overexcitability and weeping.
❙Measles: frequent, short and dry cough, hoarse when crying; skin and all senses oversensitive; spasmodic

Google

motions, trembling, grinding of teeth; overwakefulness with heat and sweat in face.

‖Measles, with overexcitability and weeping.

‖Scarlet rash, with overwhelming pains and lamenting mood.

‖Scarlet fever; may aid in bringing out the eruption in cases of extreme wakefulness and nervous excitement.

‖Varicella; smallpox.

[47] **Stages of Life, Constitution.** Tall, lean, stooping persons, with dark complexions.

Coffee should be used by wine drinkers.

Weakly and excitable children.

Suitable to sensitive persons, and if the symptoms caused by fright do not yield to *Acon.*

Suitable to children for great restlessness, tossing about, nervousness, screams and weeping.

Sanguine choleric temperament.

‖Complaints during infancy and dentition.

Coffee drinkers are hard to cure of ague.

Minna G., æt. 20 weeks, father subject to attacks of hoarseness; spasmus glottidis.

Boy, æt. 5, broken thigh; traumatic shock.

Young girl; convulsions.

Woman, æt. 25, easy labor two years ago; ineffectual labor pains.

Mother of five children, æt. 28, well built, black hair and eyes, red cheeks, menses regular; metrorrhagia.

Mother of five children; ineffectual labor pains.

Lady unaccustomed to the use of coffee; toothache.

E. S., æt. 32; ague of eighteen months standing, contracted in army.

Landlady, æt. 45, using coffee two or three times a day; diarrhœa.

Married woman, æt. 50; sleeplessness.

[48] **Relations.** Antidoted by: *Acon.*, *Chamom.*, *Ignat.*, *Mercur.*, *Nux vom.*, *Pulsat.*, *Sulphur.*

It antidotes: *Bellad.*, *Chamom.*, *Cicuta*, *Coloc.*, *Nux vom.*, *Strychnia*, *Valer.* (See antidotal relations under *Coffea tosta*).

Compatible: *Acon.* (after *Coffea* in ineffectual labor pains); *Ignat.* (tenderness after *Coffea* relieved toothache); after *Thea* (sleeplessness); after *Chamom.* (belly-pains and diarrhœa in teething children); *Sulphur* (nervous erethism caused by coffee).

Incompatible: *Canthar.*, *Caustic.*, *Coccul.*, *Ignat.*

Compare: *Acon.*, *Agar.*, *Arsen.*, *Bellad.*, *Canthar.*, *Caustic.*, *Chamom.*, *Coca*, *Coccul.*, *Ignat.*, *Mercur.*, *Natr. mur.*, *Nux vom.*, *Opium*, *Pulsat.*, *Sepia*, *Sulphur*, *Thea.*

Digitized by Google

COFFEA TOSTA.

Infusion of the well roasted berries.

Roasting develops Methylamine or caffeone in Coffee.

The pathogenetic effects are principally such as were derived from sensitive persons upon whom strong coffee acted injuriously, and according to these the clinical results, to which we give preference in the following arrangement, were mainly obtained.

CLINICAL AUTHORITIES.—*Migraine, etc.*, Hahnemann, The injurious effects of strong coffee, Monograph; *Periodical attacks of vertigo and insensibility*, Felix, Frank's Mag., vol. 1, p. 718; *Seminal emission*, Martin, MSS.; *Mental effects and general nervous excitement; Vertigo while sleeping in a hammock after taking a very strong infusion*, C. Hg., MSS.; *Severe labor pains* (two cases), Kallenbach, Rück. Kl. Erf., vol. 5, p. 655; *Urinary troubles*, B. J. H., vol. 5, p. 444.

[1] **Mind.** Increased intellectual activity and perception of sounds, motion, etc.

‖She is greatly excited and is sure she will die. θLabor.

‖Full of apprehension of terrible things happening.

Painful anxiety, without fear of falling, during downward motion of hammock, while asleep.

‖Begs that some one might end her life. θLabor.

She does not know where she is; feels strangely in her head; palpitation, trembling and chilliness.

[2] **Sensorium.** While sleeping in a hammock the gentle swinging motion is felt to an enormous degree, increasing more and more until he seems to be swinging above the tree tops into the clouds, in rhythmic motion; the descent is intensely disagreeable and accompanied by painful anxiety, without fear of falling; when near the ground he awakes and puts his feet to the ground, which momentarily interrupts the sensation; but he is too sleepy to keep awake, and passes a horrible night.

: Attacks of vertigo with obscured vision; she is unable to distinguish surrounding objects, they seem to leave their places and follow her, or turn in a circle about her; ringing in ears and noise as of falling rain; she suddenly falls to ground insensible, with palpitation of heart; easy vomiting and paleness of face during paroxysms, which often last two hours and are followed by no troublesome symptoms.

[3] **Inner Head.** ‖Migraine comes on in morning shortly after

Digitized by Google

awaking, and increases little by little; pains become intolerable and sometimes burning; integuments of head sensitive, hurt when touched ever so slightly; body and mind excessively sensitive; looks exhausted; retires to lonely and dark places and closes eyes in order to avoid light; remains seated in an arm-chair, or stretched upon bed; least noise or motion excites pain; avoids talking or being talked to or hearing others talk; body is colder than usual, although no chills are experienced; hands and feet are especially very cold; loathes all food and drinks on account of continual sickness at stomach; if attack is very violent, vomiting of mucus takes place, which, however, does not diminish headache; there are no alvine discharges; pain scarcely ever ceases before evening; attacks come on irregularly, without premonitory symptoms.

‖ Periodic headache of hysterical women.

‖ Nervous and gastric headaches.

[5] **Sight and Eyes.** Dazzling colors, principally blue and yellow, before eyes.

‖ Eyes shining. θLabor.

: Eyes sunken; half open during sleep; convulsive movements of eyes while awake. θCholera infantum.

[6] **Hearing and Ears.** : Ringing in ears and noise as of falling rain. θVertigo.

[8] **Upper Face.** ‖ Paleness of face. θVertigo with fainting.

‖ Face hot and deeply flushed. θLabor.

‖ Excruciating facial neuralgia from decayed teeth; patient not in habit of taking coffee.

[10] **Teeth and Gums.** Intense pain in sound teeth of r. lower jaw nearly driving him crazy; no application relieves except cold water in mouth, pain returning as water becomes warm.

Causes premature decay of teeth in children.

[16] **Hiccough, Belching, Nausea and Vomiting.** : Vomits without least exertion. θVertigo with fainting.

: Vomiting of yellow, sour, slimy, offensive smelling masses, looking as if chopped; child greatly emaciated, with bloated abdomen, small and frequent pulse; eyes sunken and half open during sleep, convulsive movements of eyes while awake; great restlessness; diarrhœa. θCholera infantum.

Was found very useful in epidemic cholera of 1831 and 1836, particularly against the weakening vomiting and tormenting thirst, and it was found serviceable in subduing the premonitory symptoms.

[17] **Scrobiculum and Stomach.** Stomach feels tight after food.

‖ Cramp of stomach.

Digitized by Google

[19] **Abdomen.** ⁝Great emaciation with bloating of abdomen. θCholera infantum.
‖Cramplike drawing in umbilical region, with severe pains in small of back. θLabor.

[20] **Stool and Rectum.** Torpidity of bowels.
‖Diarrhœa from overwork and too much care.
‖Obstinate diarrhœa of old people occurring after an attack of cholera.
‖Obstinate chronic diarrhœa.
⁝Cholera infantum with copious diarrhœa.
Hemorrhoidal complaints.

[21] **Urinary Organs.** Assists the passage of gravel and small urinary calculi, and impedes their further formation in bladder.
Catarrh of bladder, particularly of old debauchees.
Diabetes mellitus.

[22] **Male Sexual Organs.** Seminal emission at 3 A.M., with voluptuous itching, followed by chill and cold, clammy perspiration.

[24] **Pregnancy. Parturition. Lactation.** ‖Very severe labor pains, patient becoming greatly excited; constant tossing about with violent movements of extremities; she complains of the severity of pains and is sure she will die; face deeply flushed and bloated; eyes shining; small and frequent pulse.
‖Twenty-four hours after rupture of bag of waters, very severe pains in small of back, with cramplike drawing in umbilical region; pulse small and frequent; face red; head and body excessively hot and dry; she tosses about, greatly excited, begging that some one would end her life.

[26] **Respiration.** Spasmodic asthma; asthma thymicum.

[27] **Cough.** Whooping cough.

[29] **Heart, Pulse and Circulation.** ‖Palpitation of heart. θVertigo with fainting.
‖‖Palpitation from irritable heart.
Pulse quick, but force lessened.
‖Small and frequent pulse. θLabor.
Arteries tense.

[31] **Neck and Back.** ‖Very severe pains in small of back, with cramplike drawing in umbilical region. θLabor.

[32] **Upper Limbs.** Pain in. l. shoulder joint.
‖Trembling of hands.

[33] **Lower Limbs.** ‖Iliac pains.
Pain in l. foot and joint of big toe.

[34] **Limbs in General.** Gout and rheumatism, where there is a disposition to the formation of chalkstones in joints.

[35] **Rest. Position. Motion.** Remains seated in arm-chair, or stretched upon bed. θMigraine.

Digitized by Google

Motion: excites pains.
Constant tossing about, with violent movements of extremities, during labor.

[36] **Nerves.** ‖ General nervous excitement.
‖ Pain in head with depression of spirits due to indigestion from weakness of nervous system produced by overexertion.

[37] **Sleep.** ‖ Obstinate sleeplessness.

[38] **Time.** At 3 A.M.: seminal emission, voluptuous itching, chill and cold, clammy perspiration.
In morning: shortly after awaking, migraine.

[39] **Temperature and Weather.** Serviceable against both cold and heat; also useful in hot climates.
Beneficial to persons who live in open air.
Cold water: > intense pain in sound teeth of r. lower jaw.

[40] **Fever.** ‖ Inflammatory fever in children, with excitability, starting and twitching in sleep, restlessness and crying.
Feels chilly, without being cold, and trembles.
Local congestions, flushes of heat.
Intermittent fever.
Continued fever, particularly when attended with a disposition to diarrhœa.
⁞ Typhus.
⁞ Typhus of children; epidemic cholera infantum; under its use the pulse becomes more frequent and fuller, the eyes shining, the face gets a fresher appearance, extremities and face regain their natural heat and the skin again shows some moisture (in cases of cerebral anæmia), when the child lies in a stupor and moans, coffee will soon quiet it.

[41] **Attacks, Periodicity.** Spasmodic asthma.
Two hours: paroxysms of vertigo and insensibility.
Migraine comes on in morning shortly after awaking, scarcely ever ceases before evening; attacks come on irregularly.
Periodic headache of hysterical women.
Chronic: diarrhœa.

[42] **Locality and Direction.** Right: intense pain in sound teeth of lower jaw.
Left: pains in shoulder joint; pain in foot and joint of big toe.

[43] **Sensations.** Pain: in sound teeth of r. lower jaw, nearly driving him crazy; in small of back; in head; iliac; in l. shoulder joint; in l. foot and joint of big toe.
Cramplike drawing: in umbilical region, with severe pains in small of back.
Burning pain: with migraine.
Cramp: of stomach.

Digitized by Google

Lightness: of stomach after food.
Voluptuous itching: of genital organs.

[44] **Tissues.** Coffee and tea are injurious to the young, but beneficial to the old, because they increase the nitrogenous bodies by diminishing tissue waste.
Useful when weary from travel in heat, with deprivation of food.
Is important as an article of diet for soldiers, on account of its invigorating properties, and is also serviceable against both cold and heat; it is also useful in hot climates.
Affects injuriously the teeth and bones of children, predisposes them to caries.
Tense fibre.

[45] **Touch. Passive Motion. Injuries.** Touch: integuments of head sensitive and painful to slightest.
During downward motion of hammock while asleep, painful anxiety without fear of falling.
Swinging motion of hammock felt to an enormous degree.

[47] **Stages of Life, Constitution.** Beneficial to persons who live in the open air and to old people of nervous and excitable temperament.
Useful during lactation, but harmful during puerperal state or during menstruation.
Relieves the last moments of the dying, particularly those suffering from abdominal complaints, dropsy and consumption.
Useful as a stimulant in apparent death, particularly in asphyxia and premature birth.
Girls, æt. 10 and 14 weeks; cholera infantum.
Primipara, æt. 23, strong, well built; has had labor pains for thirty-five hours, which have become excessively severe during last eighteen hours.
Woman, æt. 32, well built, mother of two children; irregular and excessively severe labor pains.
Marie Bouvard, married, æt. 45, has never used coffee; periodical attacks of insensibility.

[48] **Relations.** Strong, black coffee, the beans being little roasted, drunk as hot as possible, is indispensable as an antidote in a large number of poisons, especially narcotics, when causing drowsiness, intoxication, loss of consciousness, or mental derangement, delirium, etc.; in general it antidotes narcotic substances, such as Opium, Morphine, Nux vomica, Belladonna, narcotic mushrooms, poisonous Sumach, Tobacco, bitter Almonds, Prussic acid, Bellad., Coloc., Valer., Cicut. and Chamom. In case of poisoning with salts of antimony, lead, phosphorus and phosphoric acid, coffee is no less indispensable.

Digitized by Google

Coffee should be used by wine drinkers; tea by beer drinkers.
Coffee removed the symptoms produced by mesmerism.
Compare: *Acon.* (in fever).

COLCHICUM AUTUMNALE.

Meadow Saffron. *Liliaceæ.*

The Autumn Crocus, or Meadow Saffron, is found in most parts of temperate Europe, especially near Rome.

Colchicum was well known to the ancients, who possessed extensive knowledge of its properties and uses.

Alexander of Tralles, in the fifth century, says that although it speedily relieves the pain and soreness of an attack of gout, it nevertheless favors the frequent recurrence of attacks, an opinion repeated by recent authorities.

Proved by Hahnemann, Stapf, Lindeman, and others too numerous to mention. Vide Encyclopedia, vol. 3, p. 449.

CLINICAL AUTHORITIES.—*Stye*, E. W. Berridge, Raue's R., 1874, p. 71; *Ileus*, E. V. Nash, Raue's R., 1875, p. 144; *Ascites*, W. [1] **Mind.** ‖Perception entirely lost; unconscious. θTyphus. θMyelitis acuta.

‖‖Memory weakened, ideas not so clear as usual; forgetfulness; absence of mind.

Disorders in comprehension and association of ideas; he lacks words to express his ideas; when writing, he forgets syllables and entire words; he confounds objects.

Google

‖Confusion of head; intellect clouded, though he answers correctly.
‖‖Says nothing unless questioned, his condition does not seem to him dangerous. θTyphus.
‖Can read, but cannot understand even a short sentence; cannot understand the words; vision is heightened, but intellectual faculties dulled.
‖Delirium with headache.
‖Great desire for rest, and disinclination to mental exertion, or exertion of any kind.
‖Mind depressed. θDropsy. θGout.
‖Surly, ill-humored, not satisfied with anything.
‖His sufferings seem intolerable to him; external impressions, light, noise, strong smells, contact, etc., disturb his temper.
‖Pains so excessive they almost drive one mad, in the evening.
Aggravation very often, after mental exertion.
Pains < by mental exertion or by motion.
‖‖Ailments from grief or misbehavior of others.

[3] **Sensorium.** Confusion and drowsiness of the head.
Vertigo: while sitting, after walking; on rising.
Delirium, with headache.
Coma, or unconsciousness.

[3] **Inner Head.** ‖Pressive heaviness deep in cerebellum, especially on moving or stooping.
‖‖Pressing pain above, in small spots, or very severely in substance of cerebellum, and occurring on the slightest intellectual exertion.
‖Pressure in head; especially in occiput, also deep in cerebellum, excited by mental exertion, or night watching.
Boring, pressing headache, brought on by mental labor, and by entering room from open air.
‖Sensation of constriction in ciliary region, with great desire for rest, and disinclination to mental exertion. θIritis.
Spasmodic pains in head, especially over eyes.
Boring headache, especially over eyes, extending into dorsum of nose.
‖Headache over l. eye, < in open air.
‖‖Painful rending, tearing, drawing pains in l. side of head, from eyeball to occiput.
Very painful drawing-tearing in half of head, beginning at ball of eye, extending to occiput.
Hemicrania, either of r. or l. side, changing about.
Pressing pain in r. and afterwards in l. frontal region.
Tearing, wandering pains, in one half of head, in occiput, in temples, or pericranium.

Digitized by Google

‖Creeping sensation in forehead.
Pressing-tearing in occiput.
Oppressive weight in occiput, during movement and when bending the body backward.
‖Pressing headache. θDropsy.
Pulsations in head.
Very violent headache, coming in evening, and lasting until morning.
Headache > after supper, from warmth and lying quiet in bed.

4 **Outer Head.** ‖Heaviness of head.
Head bent forward upon breast, arms hang listless.
‖When raised the head falls back, mouth wide open.
‖Extreme weakness, cannot move her head from pillow without help. θHemorrhage from bowels.
‖Difficulty in moving head.
‖Hot forehead. θDropsy.
‖Forehead covered with cold sweat. θTyphus.
‖Tearing in scalp, on small spots, particularly on occiput.
Lacerating pain in scalp.
Great falling off of the hair.
‖Porrigo favosa, oozing acrid ichor.

5 **Sight and Eyes.** ‖Eyes half open; sunken, staring; hollow, congested, protruding.
Loss of sight for a minute or two on getting out of bed.
‖Drawing, digging pain, deep in orbit, like in sclerotitis.
Drawing tension deep in eye.
A slight nebulous dimness appears in posterior chamber, probably proceeding from vitreous body.
‖Soft cataract, glaucoma.
‖Complete capsulo-lenticular cataract, with increased size of lens.
Lens pressed forward against iris, then closing up pupil.
Iris first of a beautiful brown color, afterwards dim and as if blotted out.
‖Iritis, rheumatic cases, with great soreness of eyeballs.
‖Pupils much dilated, only slightly sensitive to light, or immovable and slightly dilated; l. pupil contracted, while r. is dilated. θTyphoid.
‖Pupil naturally large, is excessively sensitive to light, contracting not much but very rapidly.
‖Deposit of a purulent fluid in lower part of anterior chamber.
‖Dimness, opacity of cornea; maculæ.
‖Inflammation of eyes, dimsightedness, watering of eyes, white spot on cornea.
Soreness and pressive pain in eyes.
‖Violent, short, sharp, tearing pain, in and around eyeball.

Digitized by Google

‖Ulceration of meibomian glands of l. lower lid, which is much swollen, with great nervousness.
‖Burning and redness of edges of lids.
‖‖Smarting in the eye, especially in outer canthus, with lachrymation; feeling as if canthus was glued up.
‖Pressure and biting in canthi, with moderate lachrymation.
‖Stye on l. lower lid, near inner canthus.
‖Excoriating lachrymation, < in open air. θIritis.
Worse when looking upward.
Around the edge of the pupil, from behind the iris, a yellowish flocculent membrane appears in the pupil, and protrudes into the anterior chamber.

[6] **Hearing and Ears.** ‖Hearing generally acute.
Arthritic vertigo of auditory nerve.
‖Roaring in ears; they feel stopped up.
‖Tingling of ears, as after being frosted.
‖Earache, with stitches in ears.
Dryness of ears.
‖Discharge from ears, with tearing pain. θOtorrhœa after measles.

[7] **Smell and Nose.** ‖Smell morbidly acute; the odor of meat broth causes nausea, and that of fresh eggs nearly fainting; excessive sensitiveness of smell to cooking.
‖‖Strong odors make him quite beside himself.
‖Tingling and itching in nose. θCoryza.
‖Sneezing, with crawling sensation in nose.
‖Nostrils dry and black.
‖Sore pain in septum.
‖Nosebleed, particularly in evening.
Long-lasting coryza; discharge thin, tenacious, never watery.

[8] **Upper Face.** ‖‖Extreme anxiety of countenance. θPericarditis.
Anxious countenance; sharp features; cheeks, lips and eyelids purple.
Face: doleful, sad expression; suffering, like that of a chronic patient; hippocratic, sunken, cadaverous look; risus sardonicus; pale; pale and blue; yellow spotted; cheeks red and hot, covered with sweat; cachectic (dysentery).
‖For three or four hours each day circumscribed redness of cheeks, with marked paleness about nose and mouth.
‖Face, and especially nose, color of bleached coal ashes. θChronic asthma.
‖Tingling in skin of face as after being frosted.
‖Tearing and tensive pains in facial muscles, moving from one location to another.

Digitized by Google

‖Drawing in bones of face or nose; sensation as if they were being rent asunder.
‖Œdematous swelling of face.
‖‖Œdema of lids and face; great sensitiveness to contact, motion, and changes to damp weather; gouty diathesis. θIritis.
‖‖Pain and swelling from a decayed tooth; tongue furred.

[9] **Lower Face.** ‖Lips chapped, livid, or blue.
‖Thick, brownish coating on lips, teeth and tongue.
‖A paralytic sensation, a cramplike pain in maxillary joint. θArthritic toothache.

[10] **Teeth and Gums.** ‖Grinding of teeth; teeth feel too long.
‖Teeth very sensitive when pressed together, as in biting.
‖Toothache, < from cold and immediately after warm things.
‖Arthritic toothache, < at night.
‖Tearing in jaws and gums.

[11] **Taste and Tongue.** ‖Flat, bitterish taste, or tastelessness of food. θDysentery.
‖Inability to talk, or talks with effort. θCholera. θTyphus.
Loss of sensibility in tongue.
Tearing, burning and sticking in tongue.
‖Tongue: bright red; heavy, stiff and numb; cold; moved and projected with difficulty.
‖Tongue coated: with whitish fur; with a thick yellow fur; with brown slime. θIntestinal disturbances. θPericarditis. θDysentery.

[12] **Inner Mouth.** ‖‖Mouth open to the widest extent. θTyphus.
‖Sensation of warmth and dryness in mouth.
‖Heat in mouth, with thirst.
‖Inflammation of mucous membrane of mouth and throat.
‖‖Salivation. θCholera sporadica.
‖Profuse flow of saliva, with dryness of throat.
‖Affection of salivary glands. θBright's disease.
The saliva causes nausea and inclination to vomit when swallowing it.

[13] **Throat.** ‖Tickling in throat, as if coryza was setting in, inducing cough and clearing throat.
‖Smarting and sensation of dryness of tongue and throat.
‖Biting-tingling in throat and fauces.
‖The throat is dry, and yet there is a flow of watery saliva, accompanied by nausea and discomfort in abdomen.
‖Inflammation and redness of palate and fauces.
‖Tonsils inflamed and swollen; here and there spots covered with pus, swallowing difficult.
‖Heat in phprynx and whole length of œsophagus.
Itching in pharynx.
‖Constriction of œsophagus.

Digitized by Google

Accumulation of mucus in throat.

‖Much greenish, thin mucus in throat, sometimes comes involuntarily into mouth, or is hawked up.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Enormous appetite.

‖He has appetite for different things, but as soon as he sees them, or still more smells them, he shudders from nausea, and is unable to eat anything.

‖Appetite entirely gone. θDysentery.

‖No appetite, but intense thirst. θPericarditis. θRheumatism. θDropsy.

‖‖Aversion to food; loathing the sight, and still more the smell of it. θIleus. θHemorrhage from bowels.

‖The smell of fish, eggs, fat meats or broth, causes nausea even unto faintness. θDysentery.

‖Great thirst. θHemorrhage from bowels. θDysentery. θCholera sporadica.

‖‖No thirst.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Frequent, copious eructations of tasteles gas.

‖Eructations, with burning in stomach.

‖Gulping up of water, followed by nausea. θDropsy.

‖Nausea and inclination to vomit, caused by swallowing saliva.

‖Deathly nausea and prostration. θAcute diarrhœa.

‖Nausea, with great restlessness; on assuming upright posture, a qualmishness in stomach and inclination to vomit.

‖‖Smell of cooking nauseates to faintness; often from merely looking at food. θDropsy. θHemorrhage from bowels. θTyphilitis. θIntermittent fever.

‖‖Nausea, eructations and copious vomiting of mucus and bile.

Disposition to vomit, > by lying perfectly still; renewed, however, by every motion.

Violent and excessive retching without vomiting.

‖‖Violent retching, followed by copious and forcible vomiting of food and then of bile.

‖Vomiting first food, then fluid, finally considerable quantities of stercoraceous matter. θIleus.

Vomiting: of food; of bilious, glairy matter, of greenish mucus; the water he drank; of acrid, sour slime; of rice water; of fluid like coffee-grounds; renewed after every motion; occurring with great ease.

‖Vomiting followed by weakness and sometimes ravenous hunger. θDropsy.

‖He was obliged to bend himself up and lie quite still the whole day, without the slightest movement, else he was seized with the most violent vomiting.

Google

‖Ravenous hunger and weakness after vomiting. θDropsy.
‖Vomiting, with watery diarrhœa.
Vomiting and purging of rice-water stools, with thirst.

[17] **Scrobiculum and Stomach.** ‖Uneasiness at epigastrium; extremely sensitive to touch or pressure. θDysentery.
‖‖Violent burning in epigastrium.
Pain in epigastrium as if pierced with a knife.
‖Stomach deranged after eating too many eggs.
‖The stomach seems constantly icy cold.
‖Pressure in stomach.
Burning in stomach, or icy coldness, with great pain and debility.
‖Burning in pit of stomach. θDropsy.
Burning in pit of stomach, followed by nausea and finally vomiting, with subsequent weakness, and sometimes ravenous hunger.
‖Severe pain and tenderness over region of stomach, at times extending over bowels.
‖Fulness of stomach; swelling as if he had eaten too much, even when he had taken nothing, < after eating even light food.
Sensation of gnawing hunger in stomach.
Stitches in pit of stomach.
‖Violent burning pain in stomach.
‖Cramps in stomach.
‖Colic: aggravated by eating; after flatulent food; with great distension of belly; better when bending double.
‖Gastric affections, with a coated tongue, clammy taste, anorexia, pressure in stomach, empty eructation.
‖Gastric affections before and during an attack of rheumatism.

[18] **Hypochondria.** ‖Anxious feeling in præcordia.
‖Distension of a gas under short ribs, as after eating too much.
‖Pain in r. hypochondrium, like from incarcerated flatus.

[19] **Abdomen.** ‖Tympanitis. θColic. θDysentery.
‖Tympanitis with pain in back. θTyphoid.
‖Great distension of abdomen with gas, as if he had eaten too much.
‖Flatulent distension of abdomen, with less frequent and less copious stools.
‖Belching and great meteoristic distension of stomach and upper abdomen. θIleus.
Great swelling of lower part of abdomen.
‖Abdomen much swollen, with a fold or crease below umbilicus, extending across. θAscites.
Distended abdomen, contracts spasmodically when touched.

Digitized by Google

I No bellyache, but rumbling noise and sensation as if diarrhœa would begin every moment. θDysentery.

Surface of abdomen hotter than rest of body and extremely sensitive to touch.

I Intense intermitting pain in upper portion of small intestines, with constipation, fever, thirst and yellow tongue.

I Pain extends from stomach over abdomen, followed by large watery evacuations; each discharge with severe griping pain.

I Burning, or icy coldness in stomach and abdomen. θColic. θCholera sporadica.

Pulsation in abdomen.

I Pressing, tearing, cutting or stitching pains in abdomen.

I Spasmodic pains in lower abdomen, loss of appetite and general lassitude. θDysentery.

I Great pain, tenderness and swelling in r. ilio-cæcal and ilio-inguinal regions. θIleus.

I Tearing pain in belly, especially about sigmoid flexure of colon, < from pressure, and at night. θRheumatic diarrhœa.

I Griping in abdomen and colicky pains. θDysentery.

I Colic: < by eating; after flatulent food; until diarrhœa sets in; > from bending double.

I Painless cholera morbus, with much weakness and prostration.

I In inflammatory irritation of abdominal viscera, by metastasis from gout.

I Pain in bowels increases, towards evening, and continues until daybreak. θHemorrhage from bowels.

I Pain in belly, < on pressure and at night. θRheumatic diarrhœa.

[20] **Stool and Rectum.** I Very offensive flatus in evening.

I Urging to stool: unsatisfactory; > by frequent passages of flatus.

Ineffectual pressing to stool, feels feces in rectum but cannot expel them.

I I Very painful urging to stool; at first only a little feces passed, afterwards followed transparent, gelatinous and very membranous mucus, with some relief of pain in abdomen.

Stools scanty, discharged only by hard straining, even if soft, with pain in small of back.

I I Extremely painful stools.

Stools: changeable; mucous, jellylike; greenish; reddish; yellowish; light yellow; orange yellow; slimy; fecal; excoriating; slightly sour smelling; white, shreddy particles; with borborygmus; frequent, abundant, watery,

Digitized by Google

with flocculi; like rice water; yellowish and bloody; scanty, with tenesmus, salivation, and copious secretion of urine; copious, frequent, watery, or bilious, often without pain, sometimes with cutting colic; watery, with bright yellow flakes; scanty, difficult, of bloody mucus and shreds, with pain in anus, and violent tenesmus; green, watery, very offensive mucus; pass insensibly, involuntarily; only mucous discharges, and during night.

- Very offensive evacuations. θDysentery. θDropsy.
- Feces mixed with small, white membranes, or light bluish matter. θDysentery.
- Discharge from bowels like gelatine. θDysentery.
- Evacuated mere mucus without blood, with a good deal of tenesmus. θDysentery.
- Watery jellylike mucus passes from anus, with violent spasm in sphincter. θDysentery. θCholera sporadica.
- Bilious diarrhœa, stools afterwards mixed with white membranous pieces.
- Constant vomiting and passages of green matter, with cutting pains about umbilicus, each successive stool growing more watery. θAsiatic cholera.
- Profuse, watery stools, in hot, damp weather, or in Autumn. θDiarrhœa.
- Obstinate, acute diarrhœa, with deathly nausea and prostration.
- Diarrhœa, with violent colicky pains.
- After a few discharges from bowels of a slimy, watery substance, without relief, obstinate constipation. θIleus.
- Stools slimy, streaked with blood, and lumpy, attended with tenesmus and nocturnal fever. θRheumatism.
- Bloody stools, with scrapings from intestines and protrusion of anus. θDysentery.
- Fall dysentery, with discharges of white mucus and violent tenesmus; bloody stools, mingled with a slimy substance.
- Bloody discharge from bowels with deathly nausea from smelling cooking.
- Putrid, dark colored blood and mucus pass from bowels.
- Pain about sigmoid flexure of colon. θRheumatic diarrhœa.
- Tenesmus in rectum.
- Long-lasting, agonizing pain in rectum and anus, after stool, causing screams and crying.
- Forcing, pressing pains in rectum, with frequent scanty discharge. θDysentery.
- Tingling, itching, burning and tearing in anus.
- Protrusion of rectum. θDysentery.

Digitized by Google

‖Hemorrhage from bowels in autumnal, cold, damp weather.
‖Oozing of copious mucus from anus.
‖Spasm of sphincter during or independent of discharge, with a shuddering over back.
‖Child falls asleep on vessel as soon as tenesmus ceases. θDysentery.
Before stool: flatulency; pinching in abdomen.
During stool: stinking flatus; rending pain in anus, backache; vomiting, vertigo, faintness, cardial stitches.
After stool: remission of intestinal pains and of sensorial complaints; increase of pelvic pains; stinking flatus, feeling of diarrhœa in rectum, and sore biting in anus; renewed desire to go to stool; exhaustion.

21 **Urinary Organs.** ‖Constant burning in urinary organs, with diminished secretion.
‖‖Pain in region of kidneys.
‖Hyperæmia of kidneys; urine contains albumen.
‖Nephritis; bloody, inklike, albuminous urine. θDropsy after scarlatina.
‖Strangury with hemorrhage from bladder.
Bladder contracted and empty.
‖Vesical irritability and tenesmus, depending upon gouty diathesis.
Evacuations of urine attended and followed by tenesmus of bladder and a burning pain in urethra, as if urine was very warm.
Before urination; burning in urinary passages.
During urination: burning in urethra; constriction in neck of bladder.
After urination: tickling in fossa navicularis; tickling burning in urethra and discharge of a few drops.
‖Constant urging, scanty urine, painful discharge from spasm in neck of bladder. θHydrothorax.
‖Urging to urinate, and discharge of hot, highly-colored urine; burning and tenesmus. θDysentery.
‖Copious, involuntary urination, or suppression of urine. θTyphus.
‖Profuse secretion of urine.
Frequent micturition with diminished discharge.
Urine: copious, watery and frequent; dark and turbid, with tenesmus of bladder and burning in urethra; of sour smell and acid reaction; dark, scanty, discharged in drops, whitish sediment; pale yellow; clear; reddish; bloody; brown; albuminous; suppressed; greenish; black; inky; contains clots of putrid, decomposed blood contains phosphates and some sugar.
‖Scanty urine. θHydrothorax.

Digitized by Google

‖Urethra hurts while urine passes, as if raw.
‖Urine turbid, leaves an orange-colored ring in vessel. θNephritis. θGout.
‖Nephritis and dropsy after scarlatina.
‖‖Urine like ink. θDropsy after scarlet fever.

[22] **Male Sexual Organs.** ‖Tearing in glans and l. spermatic cord.
Itching at prepuce and orifice of urethra.
‖Œdema of scrotum. θDropsy.
‖Chordee after gonorrhœa.

[23] **Female Sexual Organs.** ‖Hemorrhage of uterus.
Menses too early and scanty.
‖Sudden suppression of menses, followed by dropsy of uterus.
Tiredness and heaviness of feet.
Lancinating tearing, deep in r. breast, through to back.

[24] **Pregnancy. Parturition. Lactation.** ‖Faint aching about navel as if she must eat, but with loathing and disgust at thought, sight or smell of food; all attempts to eat cause violent nausea and vomiting; smell of meat and eggs especially repugnant. θNausea of pregnancy.
‖Feverish restlessness in last months of pregnancy.
‖Nipples dark, brownish-red, protruding; unbearable pain on slightest touch by child; breasts full, skin hot, pulse strong (lying-in, fourth day).
‖Puerperal fever.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Voice hoarse, or deeper than usual.
Hoarseness in morning, with roughness of throat.
Itching in larynx and trachea.
Tickling in trachea with coryza and a little cough.
Trachea inflamed at its bifurcation.
‖Catarrh of air passages.

[26] **Respiration.** Cold breath.
‖Respiration: difficult; rapid and short; quick, and heart's impulse strong; accelerated and audible; slow; irregular, or intermittent; asthmatic; with moist sound; hurried, with groans. θPericarditis.
‖Breathing so oppressed she could hardly lie down, > on bending forward. θAscites.
Racking pain during respiration and oppression of chest.
‖Lies in bed gasping for breath. θPericarditis.
‖Great dyspnœa. θGastro-pleurodynia.
‖Dyspnœa at night. θDropsy.
‖Dyspnœa with palpitation of heart from 11 to 3 A.M.
‖Asthma: depending upon hydrothorax or hydropericardium; with dropsy of lower extremities, extending to knees.

Digitized by Google

[27] **Cough.** ‖Slight cough, with coryza.
‖Frequent, short, dry cough, from tickling in larynx.
‖Short, dry cough, with great exhaustion. θDysentery.
‖Night cough, with involuntary spurting out of urine.
‖Troublesome night cough, compelling him to sit up, excited by scraping in chest, with much expectoration.

[28] **Inner Chest and Lungs.** ‖Violent cutting pain in chest, interrupting breathing.
Lancinating pain, as with a knife, in r. side of chest.
‖Dull stitches in posterior part of thorax, during expiration. θHydrothorax.
‖Stinging in region of heart, with oppression.
‖Severe pain at l. side, below region of heart, shooting from behind forward; < on breathing, with rapid, sharp, irregular pulse, and great dyspnœa. θGout pleurodynia.
‖Spasms of chest.
‖‖Oppression of chest, dyspnœa, a tensive feeling in chest, sometimes high and sometimes low down. θAsthma.
‖Oppression of chest, with anxiety, > by bending forward.
‖‖Oppression of chest and violent palpitation. θMyelitis.
Frequent pressure in small spots in chest.
‖Indescribable dulness and gnawing in sternum, about midway and deep in, slightly > from constantly pressing and rubbing sternum with hand; cannot keep still, constantly tossing from side to side. θNausea of pregnancy.
‖Spitting blood, after injuries; hemorrhage of lungs.
‖‖Hydrothorax, with œdema of hands and feet.
‖Serous effusion in chest, with rheumatic and gouty persons. θArthritic pleurisy.

[29] **Heart, Pulse and Circulation.** Quick stitches in pericardial region.
Pressure and oppression in region of heart, as if an attack of apoplexy threatened; > by walking.
Pressure and anxiety in præcordial region; fulness and oppression as from stagnation of blood in heart, at night while lying on l. side, is obliged to turn to the r. side; dull, irregular, seemingly suppressed beats of heart, with a peculiar sensation in chest, pulse small, slow and weak.
Heart's impulse strong.
‖Violent palpitation with anxiety. θDropsy. θHydropericardium.
‖Palpitation of heart and dyspnœa from 11 to 3 A.M.
‖On assuming upright posture, vertigo, palpitation, stitches about heart and loss of consciousness.
‖Heart's action muffled, indistinct, very weak. θPericarditis.

Digitized by Google

‖Heart sound murmuring, weak, indistinct, whistling. θPericarditis.

‖‖Effusion into the pericardium after inflammatory affection of heart.

‖Effusion into pericardium, with sympathetic irritation of endocardium. θPericarditis.

‖Heart disease, following gout or acute rheumatism.

Pulse: accelerated and hard, or full and slow; slow and feeble; quick and thready; pulseless; 170, full bounding, incompressible; rapid, sharp, irregular (gouty pleurodynia); large, full and hard; more full and frequent (nephritis); small, weak, somewhat frequent (dysentery); rapid, weak and fluttering (pericarditis); trembling; very small, contracted, almost imperceptible; 90, soft and weak (acute rheumatism); slow, small and thready; low, 45 and very full; scarcely perceptible, occasionally intermitting (dysentery); changeable in frequency, often irregular; ‖‖threadlike, imperceptible.

30 **Outer Chest.** ‖Supramammary region dull on percussion up to about lower edge of third costal cartilage; sharp rending pains along sternum and into l. shoulder. θPericarditis.

‖Darting pains through r. side. θNephritis.

‖‖Stinging and tearing in muscles of chest.

‖Pleurodynia from catching cold or from living in damp dwellings.

‖Rheumatism of pectoral muscles.

31 **Neck and Back.** A pressing pain or tension in cervical muscles, felt even when swallowing.

‖Torticollis.

‖Rheumatic pains in neck and back.

Pains in shoulder and hip joints.

‖Stitching and tension between scapulæ.

‖Drawing, tension and stitches occurring in back, much < on motion.

Soreness in small of back when touched.

‖Frequent shudderings down the back. θDysentery.

‖Tension and pain in region of kidneys. θNephritis.

‖Violent pain in region of r. kidney, could only lie on his back, < from pressure and motion. θNephritis.

‖Pain in loins like toothache, with a feeling of weight when she stands, which makes her feel sick and good for nothing.

Pain in loins as if all power was going, and the back was turning to pulp.

‖Rheumatic pains in loins and hips, extending to l. shoulder and chest; pains most severe from 4 P.M. until 6, and lasting until 8 or 9, in evening, or returning at 1 in morning. θRheumatism.

Digitized by Google

‖Sudden tearing and shooting in loins. θMyelitis acuta.
‖Violent writhing in region of loins and urinary passages.
‖Spot on sacrum feels sore, as if ulcerated; very sensitive to touch.

31 **Upper Limbs.** ‖Rheumatic pains: in clavicle, shoulders, arms, back and neck, preventing moving head; in elbow joint, forearm, wrist, and ligaments of finger joints.
Stitches in r. shoulder.
Painful swelling, and sensitiveness to pressure of humero-cubital articulation, with burning.
Lacerating in elbows, in direction of upper arm.
Tearing in arms, hands and fingers.
‖‖Paralytic pain in arms, so violent that he cannot hold the slightest thing firmly.
Bubbling sensation in l. upper arm.
Heat of palms of hands.
Trembling of r. hand, preventing writing.
Tearing in back of r. hand.
‖Œdematous swelling of hands.
‖Cannot hold anything with hand. θRheumatism.
‖Cramps in fingers. θCholera.
Laceration of finger joints.
‖Enlarged and distorted finger joints. θGout.
‖Fingers spasmodically flexed but in constant motion.
Fingers cold; tingling in tips.
‖Lividity of nails.

35 **Lower Limbs.** Rheumatic pains in loins and legs, extending to toes.
‖Flying pains in hips.
‖Tearing: in thighs; knee joints, with swelling; in patella; in tibiæ, calves, ankles, toes, tendo-achillis.
A feeling of muscular weakness, or paralytic feeling, which interferes with locomotion; on attempting to walk thinks he shall lose the use of his limbs.
‖With pains, weariness, heaviness, and inability to move. θRheumatism.
‖Lower limbs œdematous and cold. θDysentery. θDropsy.
‖‖Constant pain in r. thigh, which has become much emaciated.
‖Œdematous swelling of lower limbs with asthma. θHydrothorax.
‖Cramps in calves. θDysentery. θCholera.
‖Knees strike together, can hardly walk.
‖‖Lameness after suddenly checked sweat, particularly on feet, by getting wet all over.
‖It is difficult to lift feet or go up-stairs; stumbles over threshold; uncertain walk. θRheumatism.

Google

Feet feel heavy.
Very painful cramps in both feet, particularly in soles.
Heels contracted, so that he fears never to be able to walk. θChronic rheumatism.
Tearing pains in feet, particularly in heel, l. tarsus, dorsa of feet, and l. sole.
Tingling in r. big toe, as if it would go to sleep.
Pain in l. big toe, as if nail would grow into flesh.
Drawing with pressure in toes.
Tingling in toes, like after being frosted.
Pain in ball of l. big toe as if inflamed. θChronic rheumatism.
Burning-itching over nail of r. big toe.

51 **Limbs in General.** All muscles of voluntary motion, especially those of arms and legs, paralyzed.
Sensation of lameness through limbs, with great weakness.
Neuralgic pains in extremities and other parts.
Violent pains in arms and legs, cannot use limbs.
Drawing, tearing pains in limbs, changing place.
Stiffness in joints, and swelling of hands and feet. θGout.
Shooting, tearing pains in suffering parts, increasing with fever.
Rheumatic tearing pains in limbs during warm weather; stitches during cold.
Attacks of rheumatism breaking forth suddenly and disappearing suddenly; pains shifting; acute attacks merging into chronic form, or during chronic form acute attacks set in.
Arthritic pains in limbs, with stiffness in joints and swelling of hands and feet. θGout.
Arthritic pains in joints, especially when knocking the joints; makes patient scream with pain, or when stubbing toes hurt exceedingly.
Articular rheumatism, particularly in young persons, when first attack makes its appearance.
At beginning of acute rheumatism, before fully developed.
Pains in shoulder and hip joints; and in all bones, with difficulty of moving head and tongue.
Joints most affected, without swelling or redness.
Now the one then the other joint affected, sore to touch and swollen, without redness. θRheumatism.
Painful flexure of joints.
Tearing and stitching pains in muscles and joints.
Muscular rheumatism with sensation of lameness and real paralysis of muscles.
Disease of periosteum, with rending, tearing pain.
Numbness of hands and feet, with prickling as if asleep.

Digitized by Google

‖Œdematous swelling of hands and feet.
‖Bloating of hands and feet. θDysentery.
‖Limbs cold; hands and feet cold.

[35] **Rest. Position. Motion.** Rest: great desire for.
Lying perfectly still: > headache; > disposition to vomit.
While sitting: after walking, vertigo.
While lying on l. side: fulness and oppression as from stagnation of blood in heart at night, must turn to r. side.
Sleepless because he cannot lie on l. side, on which he is accustomed to go to sleep.
Violent pain in region of kidney, can only lie on back.
Lies prostrate on back.
Was obliged to bend himself up and lie quite still the whole day, without slightest movement, else he was seized with most violent vomiting.
Head bent forward upon breast, arms hang listless.
Troublesome night cough compelling him to sit up.
Standing: feeling of weight in loins which makes her feel sick and good for nothing.
Motion: pains < by; pressive heaviness deep in cerebellum on; oppressive weight in occiput during; œdematous lids and face very sensitive to; disposition to vomit; vomiting renewed after every; drawing tension and stitches in back <; pain in region of kidney <.
On looking upward: eyes <.
On assuming upright posture: qualmishness in stomach and inclination to vomit; vertigo, palpitation, stitches about heart and loss of consciousness.
On rising: vertigo.
‖Difficulty to rise after sitting. θRheumatism.
Cannot rise from bed in morning but with difficulty.
Bending forward: > oppression of breath; > oppression of chest.
On stooping: pressive heaviness deep in cerebellum.
Bending double: > colic.
On bending body backward: oppressive weight in occiput.
On attempting to walk: sensation as if he would lose use of limbs.
Walking: > pressure and oppression in region of heart, as if an attack of apoplexy threatened; a feeling of muscular weakness or paralytic feeling interferes with; knees strike together.
Difficult to lift feet or go up-stairs; stumbles over threshold; uncertain walk.
Writing: trembling of hand prevents.
Inability to move.

[36] **Nerves.** ‖Great irritability with the pains; very sensitive

Digitized by Google

to slightest touch; the least vibration renders the pain unbearable.

‖Distressing restlessness and sleeplessness. θPericarditis.

‖‖Great weakness and exhaustion, as after exertion; cannot move head from pillow without help. θDysentery.

‖Sudden sinking of strength; prostration with restlessness; deep fainting.

‖Lassitude, nausea and great prostration, with anxious expression of face. θAcute rheumatism. θCholera.

‖Paralytic feeling with the pains.

Frequent starting and trembling are felt through the body.

Tingling in many parts of body as if frost-bitten, when the weather changes.

‖Sudden loss of all power. θCholera.

Tearing twitches, like electric shocks, through one side of body, with sensation of lameness.

‖Paralysis after sudden suppression of sweat, particularly foot sweat, by getting wet.

‖Loss of muscular power; all muscles of voluntary motion, especially those of arms and legs, are paralyzed.

‖Convulsions, cramps, neuralgia, paralytic conditions, and debility, in persons of gouty constitution.

‖‖Carpologia; subsultus tendinum. θTyphoid.

[87] **Sleep.** ‖Great sleepiness during day; falls asleep while reading.

‖Irresistible sleepiness, drowsiness, when not in too much pain; pains < towards evening, and do not diminish before daybreak. θHemorrhage from bowels.

‖Comatose state.

‖Lying on the back.

‖Starting and jerking in sleep.

‖Sleep disturbed or driven away by pains, or restlessness of limbs. θRheumatism.

‖Sleepless because he cannot lie on l. side, on which he is accustomed to go to sleep.

‖Sleep disturbed at night by dyspnœa, from 11 to 3 o'clock. θDropsy.

‖Sleep disturbed by frightful dreams. θDysentery.

‖Cannot rise in the morning from bed but with difficulty. θRheumatism.

[88] **Time.** In morning: hoarseness, with roughness of throat; cannot rise from bed but with difficulty.

In afternoon: exacerbation of fever.

Rheumatic pains in loins and hips, extending to l. shoulder and chest, most severe from 4 P.M. until 6, and lasting until 8 or 9 in the evening, or returning at 1 in morning.

During day: great sleepiness, falls asleep while reading.

Digitized by Google

In evening: pains so excessive they almost drive one mad; very offensive flatus; very violent headache, lasting until morning; nosebleed; pain in bowels; < exacerbation of fever and of pain.

At night: arthritic toothache <; pain in abdomen, especially about sigmoid flexure of colon <; mucous stools; dyspnœa; palpitation; cough with spirting out of urine; fulness and oppression as from stagnation of blood in heart, while lying on l. side, must turn to r. side; sleep disturbed by dyspnœa; exacerbation of pain and fever with copious sweating.

Temperature and Weather. Warmth: headache >.

Warm weather: rheumatic tearing in limbs during.

In warm weather rheumatic pains are felt principally at surface of body, as the air grows cooler they seem to penetrate the deeper tissues and the bones.

In hot, damp weather: profuse watery stools.

Warm food: toothache < immediately after.

Warm stove: constant chilly feeling even when sitting near.

Warm room: chill and shivering.

On entering room from the open air: boring, pressing headache.

In open air: headache over l. eye <; excoriating lachrymation <.

Cold: toothache < from.

Cold weather: stitches in limbs during.

Rheumatic pains excited or < by damp or cold weather.

From catching cold: pleurodynia.

After getting cold by lying down on ice when overheated: ileus.

After heating body in dancing: acute rheumatism.

From getting wet all over, or after suddenly checked sweat: lameness; paralysis.

After being drenched when sweating.

Complaints from cold bathing.

From living in damp dwelling: pleurodynia.

Changes to damp weather: œdematous lids and face very sensitive.

On change of weather: tingling in many parts of body as if frost-bitten.

In Autumn: diarrhœa.

In autumnal, cold, damp weather: hemorrhage from bowels.

Fall dysentery.

In Spring: rheumatism.

Fever. Chill and shivering: running through all the limbs; even in warm room; frequent shiverings, running down back; general coldness.

Digitized by Google

Frequent chilliness. θAcute rheumatism.
Cold sensation of head and limbs. θAcute rheumatism.
Body hot and limbs cold. θTyphus.
Constant chilly feeling, even when sitting near the stove; with flushes of heat.
Constantly increasing dry heat of whole body, with palpitation and thirst.
Hands and feet cold; trunk hot and extremities cold; skin dry; sweating; suppressed sweat; forehead covered with cold sweat. θTyphoid.
External, dry heat the whole night, with violent, unquenchable thirst.
Exacerbation of the fever in the afternoon.
Almost constant shivering, skin dry, not any thirst, urine clear and reddish. θRheumatism.
Sweat wanting, intermittent. θNephritis. θBright's disease.
After sudden suppression of general perspiration, or of sweat of feet by getting wet. θDysentery.
Copious sour sweat, without relief. θGout. θRheumatism.
Clammy sweat on whole surface, with low temperature of skin. θAcute rheumatism.
Acid reaction of sweat and urine.
Intermittent fever with sensitiveness to odor of food.

" **Attacks. Periodicity.** Frequent: eructations; stools; scanty discharge from rectum; micturition with diminished discharge; short, dry cough; pressure in small spots in chest; shudderings down back; darting and trembling through body; shiverings down back; chilliness.

Sudden: loss of all power.

Break forth suddenly and disappear suddenly: attacks of rheumatism.

Spasmodic: pains in head, especially over eyes, extending into dorsum of nose.

For a minute or two: loss of sight on getting out of bed.

Intermitting: intense pains in upper portion of small intestines.

Constant: vomiting and passages of green matter; burning in urinary organs; urging to urinate; motion of fingers; chilly feeling; increasing dry heat of body, with palpitation and thirst; shivering.

Long-lasting: coryza; agonizing pain in rectum and anus after stool.

For three or four hours each day: circumscribed redness of cheeks, with paleness about nose and mouth.

From 11 to 3 in the night: dyspnœa with palpitation of heart.

For a whole day: was obliged to bend himself up and lie quite still, else he was seized with violent vomiting.

Digitized by Google

From evening until morning: very violent headache; pain in bowels.

Whole night: external dry heat, with violent, unquenchable thirst.

Chronic: asthma.

[42] **Locality and Direction.** Right: pupil dilated; pain in hypochondriac region, like from incarcerated flatus; great pain, tenderness and swelling in ileo-cæcal and ileo-inguinal regions; lancinating-tearing deep in breast through to back; lancinating pain, as with a knife in side of chest; at side, below region of heart, severe pain, shooting from behind forward; darting pains through side; stitches in shoulder; trembling of hand, preventing writing; tearing in back of hand; constant pain in thigh which has become much emaciated; tingling in big toe, as if it would go to sleep; burning-itching over nail of big toe.

Left: headache over eye; rending, tearing, drawing pains in side of head, from eyeball to occiput; pupil contracted; ulceration of meibomian glands of lower lid, which is much swollen; stye on lower lid near inner canthus; tearing in spermatic cord; sharp rending pains along sternum and into shoulder; rheumatic pains in loins and hips extending to shoulders and back; bubbling sensation in upper arm; tearing in tarsus, in sole; pain in big toe, as if nail would grow into flesh; pain in ball of big toe as if inflamed.

From r. to l.: pressing pain in frontal region.

Pain going from l. to r., in gout.

Hemicrania, either of r. or l. side, changing about.

From behind forward: severe pain at r. side, below region of heart, shooting.

From above downward: frequent shiverings running down back.

Pains often change their location.

[43] **Sensations.** As if canthus was glued up; as if ears were stopped up; as if bones of face or nose were being rent asunder; as if teeth were too long; as if epigastrium was pierced by a knife; as if stomach was constantly icy cold; as if he had eaten too much; as of gnawing hunger, in stomach; as if diarrhœa would begin every moment; as if abdomen was icy cold; as if urine was very warm; as if urethra was raw; as if all power was going from loins, and back was turning to pulp; as if a spot on sacrum was ulcerated; as of bubbling in l. upper arm; as of muscular weakness, or paralytic feeling interfering with locomotion; as if he would lose use of limbs, on attempting to walk; as if r. big toe

Digitized by Google

would go to sleep; as if nail on l. big toe would grow into flesh; as if ball of l. big toe was inflamed; as if muscles were paralyzed; as if parts were frost-bitten.

Pain: over region of stomach; in r. hypochondriac region, like from incarcerated flatus; in back; below region of heart; in upper portion of small intestines; in small of back with stool: during stools; in region of kidneys; in shoulder and hip joints; in loins; in r. thigh; in l. big toe; in arms and legs; in all bones.

Long-lasting agonizing pain in rectum and anus after stool, causing screams and crying.

Cutting: in abdomen; about umbilicus; in chest.

Lancinating pain, as with a knife: in r. side of chest.

Lancinating-tearing: deep in r. breast, through to back.

Lacerating: on scalp: in elbows, in direction of upper arm; in finger joints.

Darting pains: through r. side; through body.

Boring: headache, especially over eyes.

Stitches: in ears; in pit of stomach; in posterior part of thorax; in pericardial region; in back; in r. shoulder; in skin.

Stitching: in abdomen; between scapulæ; in limbs during cold weather; in muscles and joints.

Sticking: in tongue.

Distressing pains in sticking shocks or jerks, felt deep in soft parts, and, as it were, upon the periosteum.

Stinging: in region of heart; in muscles of chest.

Sudden shooting: in loins.

Flying pains: in hips.

Tearing: in scalp, on small spots, particularly on occiput; short, sharp, in and around eyeball; in ears; in facial muscles, moving from one location to another; in jaws and gums; in tongue; in abdomen: about sigmoid flexure of colon; in anus; in glans and l. spermatic cord; in muscles of chest; in loins (sudden); in arms, hands and fingers; in back of r. hand; in thighs, knee joints, patella, tibiæ, calves, ankles, toes, tendo-achillis; in feet, particularly in heel, l. tarsus, dorsa of feet and l. sole; in muscles and joints.

Tearing, tensive pains: over small parts, at a time; quickly changing location.

Shooting-tearing: in suffering parts, increasing with the fever.

Rending-tearing: in l. side of head from eyeball to occiput; in periosteum.

Drawing-tearing: in limbs, changing place; in half of head.

Tearing, wandering pains: in one-half of head, in occiput, in temples, in pericranium.

Digitized by Google

Rheumatic and arthritic tearing: in extremities and other parts of body, especially when weather is hot.
Shooting-darting pains: in muscles, especially in cold weather.
Tearing twitches: through one side of body, like electric shocks, with sensation of lameness.
Rheumatic tearing: in limbs during warm weather.
Rending pain: in anus; along sternum and into left shoulder.
Drawing: in l. side of head, from eyeball to occiput; in bones of face and nose; in back; in toes.
Drawing digging: deep in orbit, like in sclerotitis.
Racking pain: during respiration.
Forcing pains: in rectum.
Burning: of edges of eyelids; in tongue; in stomach; in epigastrium; in pit of stomach; in stomach; in abdomen; in anus; in urinary organs; in urethra; in swelling of humero-cubital articulation.
Tickling burning: in urethra.
Burning itching: over nail of r. big toe.
Smarting: in eye, especially in outer canthus; of tongue and throat.
Soreness: of eyeballs; in eyes; of septum of nose; in small of back; of spot on sacrum; and sensitiveness of whole body.
Sore biting: in anus.
Biting: in canthi.
Pressing pain: in r. afterwards in l. frontal region; in occiput; in eyes; in abdomen; in rectum; in cervical muscles.
Pinching: in abdomen.
Gnawing: in sternum.
Violent writhing: in region of loins and urinary passages.
Cramps: in stomach; in fingers; in calves; in both feet, particularly in soles.
Cramplike pain: in maxillary joint.
Constriction: in ciliary region; of œsophagus; in neck of bladder.
Scraping: in chest.
Griping: in abdomen.
Colicky pains: in abdomen.
Arthritic pains: in limbs; in joints.
Rheumatic pains: in neck and back; in loins and hips, extending to r. shoulder and chest; in clavicle, shoulders, arms, elbow joint, forearm, wrist and ligaments of finger joints; in loins and legs, extending to toes; of pectoral muscles.
Paralytic pain: in arms, so violent that he cannot hold lightest string firmly.

Google

Neuralgic pains: in extremities and other parts.
Drawing tension: deep in eye.
Tensive pains: in facial muscles, moving from one location to another.
Tension: in chest; in cervical muscles; between scapulæ; in back; in region of kidneys.
Faint aching: about navel, as if she must eat.
Like toothache: pains in loins.
Fulness: of stomach.
Pressure: in head; in occiput, also deep in cerebellum, excited by mental exertion or night watching; in canthi; in stomach; in small spots in chest; in region of heart; in præcordial region; in toes.
Weight: oppression in occiput during movement; in loins while standing, makes her feel sick and good for nothing.
Pressive heaviness: deep in cerebellum.
Heaviness: of head; of feet; with the pains.
Oppression: of chest; in region of heart.
Anxiety: in præcordia.
Confusion: of head.
Dulness: in sternum.
Pulsations: in head; in abdomen.
Creeping: in forehead.
Shuddering and creeping, in isolated parts, such as are felt on getting cold from change of weather.
Crawling: in nose.
Prickling: in hands and feet, as if asleep.
Biting tingling: in throat and fauces.
Tingling: in ears, as after being frosted; in nose; in face; in anus; in tips of fingers; in r. big toe; in toes as after being frosted; in many parts of body; here and there in skin, as after being frosted.
Tickling: in throat; in fossa navicularis; in trachea.
Weakness: with the pains.
Tiredness: of feet.
Frequent trembling: through body.
Uneasiness: at epigastrium.
Paralytic sensation: in maxillary joint; with the pains.
Numbness: of tongue; of hands and feet; in small joints which are swollen and stiff.
Stiffness: in joints.
Lameness: through limbs, with great weakness.
Dryness: of ears; in mouth; of throat; of tongue.
Heat: in mouth; in pharynx and whole length of œsophagus; of palms.
Warm sensation: in mouth.
Cold sensation: of head and limbs.
Itching: in nose; in pharynx; in anus; at prepuce and

Digitized by Google

orifice of urethra; in larynx and trachea; of skin, as in nettlerash.

" **Tissues.** Metastasis to internal organs.

Dropsy of cavities and internal organs, especially hydropericardium; hydrothorax; ascites; hydrometra.

It affects the urinary and digestive tracts, and to some extent the respiratory organs.

Useful in hemorrhages from lungs, stomach and uterus.

Muscular rheumatism and loss of muscular power.

Stands in close relation to fibrous tissues; redness, swelling, heat, etc., not tending to suppuration; easily and quickly changing location.

Gout attacking many joints; muscular pains like torticollis; lumbago; tearing pains in joints; pains in all bones.

Acts markedly on periosteum; synovial membranes of joints, especially small joints; that part of the nervous system which presides over the function of voluntary motion.

General inflammation of joints, with excessive hyperæsthesia, slightest concussion of air, floor, or bed, renders pains unbearable; exacerbation of fever and of pain in evening, and at night with copious sweating; secretion of urine diminished, but urine highly saturated; excessive thirst, quickened respiration, and increased strong beating of heart; large joints intensely red and hot; smaller ones swollen and stiff, with sensation of numbness.

Acts more on small joints than on large.

When during chronic form of gout acute paroxysms set in, also in metastasis to heart.

Rheumatism: articular, acute or chronic; with or without fever; after getting thoroughly wet; complicated with gastric affections; occurring immediately after moist weather; in later stages.

It hastens relapses of gout if abused.

Secretions of all mucous surfaces altered and increased.

Gastric rheumatic genus epidemicus.

Diphtheritis of mucous membranes and submucous cellular tissue.

Emaciation, œdema, anasarca, complicated with rheumatism.

Acute dropsy, with renal affections.

Dropsy after scarlatina.

" **Touch. Passive Motion. Injuries.** Touch: lips and face œdematous with great sensitiveness; epigastrium sensitive; distended abdomen contracts spasmodically; surface of abdomen extremely sensitive; unbearable

Digitized by Google

pain in nipples from slightest; soreness in small of back; sore spot on sacrum very sensitive; affected joints sore.

Pressure: epigastrium extremely sensitive; tearing pain in abdomen, especially about sigmoid flexure of colon <; dulness and gnawing in sternum > from constant; pain in region of kidney <; painful swelling of humero-cubital articulation with sensitiveness.

Teeth very sensitive when pressed together.

Rubbing: dulness and gnawing in sternum > from constant.

When raised: head falls back, mouth wide open.

Slightest concussion of air, floor, or bed renders the pains unbearable.

Knocking joints: arthritic pains < by, making patient scream.

Stubbing toes hurts exceedingly.

Skin. Delicate skin.

Skin dry and pale; swollen; parts cold and glistening. θDropsy.

Dryness of skin, particularly when accompanied by dark, scanty urine. θDysentery.

Hot, dry skin. θPericarditis.

Skin dry, sweat suppressed, or profuse sweating.

Stitches in skin.

Tingling here and there, like after being frosted.

Itching: as in nettlerash; unchanged by scratching; with pinkish redness around joints.

Erysipelas, smooth.

Purple efflorescence on face, neck, and upper anterior part of thorax, inside of thighs, scrotum and groins in patches.

Œdematous swelling and anasarca.

Stages of Life, Constitution. Venous constitutions.

Melancholic temperament.

Cachectic appearance. θDysentery. θGout.

Uric acid diathesis.

Emaciated, sensitive individuals, disposed to rheumatism and catarrh.

Gout in persons of vigorous constitution.

Often indicated with old people.

Vesical irritability depending upon gouty diathesis.

Asthmatic people.

Those suffering from effects of night watching, and from hard study.

Boy, æt. 10, subject to frequent attacks of rheumatism, has for last fourteen days been suffering from rheumatic fever; pericarditis.

Digitized by Google

Woman, æt 22, of dissipated habits, and mother of three illegitimate children; gout.

Mr. S., caught cold by lying on ice after violent exercise while skating.

Scrofulous young man, æt. 27; dropsy.

M., æt. 30, male; rheumatism.

Mrs. N., æt. 43, renal derangement; relieved.

Woman, æt. 43, ceased menstruating half a year ago; pleurisy.

Male, æt. 46; acute articular rheumatism.

Woman, æt. 55; rheumatism.

M., male, æt. 56, of athletic build; inflammation of kidney.

M., æt. 65, coachman; rheumatism.

Mrs. M., æt. 74; hemorrhage from bowels.

Lady, æt. 85; ascites.

An old lady, to all appearances in good health, lying in bed, free from any inflammatory symptoms; prostration with an anxious expression.

[48] **Relations.** Antidoted by *Bellad., Camphor, Coccul., Nux vom., Pulsat.*, honey and vinegar. *Spigel.*, when in heart affections patient feels as if dying. Copious draughts of ice water prevent its action on the bowels. In poisoning give *Amm. caust.* in sugar water.

Compatible: useful in dropsy after failure of *Apis* and *Arsen.* *Carb. veg.* followed well in ascites. After *Lycop.*

Compare: *Acon., Arnic.* (typhus), *Arsen., Bellad., Bryon.*, (gout, effusions albuminous or serous, hence, while symptoms express less energy than *Bryon.*, they are more serious); *Cinchon., Coccul., Mercur., Natr. mur., Nux vom., Opium, Podolph.* (painless cholera morbus); *Pulsat.* (derangement of stomach from eggs); *Sepia.*

Google

COLLINSONIA CANADENSIS.

Horsebalm, Richweed, Stone-root. *Labiatæ.*

An indigenous plant, with very hard, knotty and tough root, growing in woods from Canada to the Carolinas; flowers from July to September.

A valuable remedy, of which we have but a single proving, by Burt.

CLINICAL AUTHORITIES.—*Constipation*, A. L. Carroll, N. A. J. H., vol. 5, p. 546; H. N. Martin, Trans. H. M. S. [1] **Mind.** Is gloomy all the time with a heavy expression; stool hard and difficult.

[2] **Sensorium.** Dizziness, with gastric and hemorrhoidal troubles.

[3] **Inner Head.** ‖Dull pain in head. θConstipation.

‖Dull frontal headache, with lassitude and desire to sleep, or fulness in head and throbbing. θHemorrhoids.

‖Gastric and hemorrhoidal headaches, with dizziness.

‖‖Headache from suppressed hemorrhoidal discharges.

[11] **Taste and Tongue.** ‖Whitish coating of tongue, with loss of appetite. θConstipation.

Tongue coated yellow along centre or base, with bitter taste.

[15] **Eating and Drinking.** ‖Loss of appetite. θConstipation.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Nausea, with cramplike pains in stomach.

‖Nausea, with obstinate constipation, during gestation.

Vomiting with pain and heat in stomach.

[17] **Scrobiculum and Stomach.** Constant heaviness in stomach.

‖Dyspepsia, with waterbrash and hemorrhoids, and weight in epigastrium; generally troubles of rectum.

Digitized by Google

Sharp cutting in stomach every five minutes while sitting.
Spasms of stomach, flatulence, excessive appetite.

19 **Abdomen.** ‖Heavy, dragging ache in pelvis. θConstipation.
‖‖Colic with flatulence and nausea.
Flatulence, with rumbling in stomach and bowels and distension of abdomen.
‖Cutting, colicky pains in hypogastrium, every few minutes; must sit down; becomes very faint; cannot sleep.
‖Congestion of portal system and of pelvic viscera, with flatulent rumbling in stomach and bowels; sluggish stool with distended abdomen; piles.

20 **Stool and Rectum.** ‖Pure mucous stools, or mucous stools mixed with dark substances; before stools severe pain in lower part of abdomen, during stool, tenesmus; little pain after stool; vomiting. θChronic diarrhœa of children.
‖Mucous, watery stools, with cramplike or spasmodic pains in bowels, vomiting, flatulence.
Diarrhœa of children, with colic, cramps and flatulence.
‖‖Mucous or black and fecal stools, with colic and tenesmus. θChronic diarrhœa after confinement.
Loose, papescent stool and nausea.
‖Four to twelve stools daily; two at night. θChronic diarrhœa of children.
‖Light-colored, lumpy stools, with distress in anus.
Copious, bilious, yellow stools; mucous, bloody, with tenesmus.
‖‖Hemorrhoidal dysentery with tenesmus.
‖Light-colored, lumpy stool, with hard straining, followed by dull pains in anus and hypogastrium, lasting about half an hour.
‖‖Obstinate constipation with hemorrhoids; stools very sluggish and hard, accompanied by pain and flatulence.
‖Bowels not moved for six or seven days, a feeling of constant pressure in rectum, with a heavy, dragging ache in pelvis.
Constipation and hemorrhoids from congestive inertia of lower bowel, especially in pregnancy.
Before and after stool, severe pain in hypogastrium and much tenesmus.
‖Congestive inertia of lower bowel.
Weight or pressure in rectum, with intense irritation or itching there.
‖‖Piles with constipation, or even with diarrhœa, bleeding, or blind and protruding; feeling of sticks, gravel or sand in rectum; evening and night; > in morning.
‖‖Flowing piles, hemorrhage incessant though not profuse, with alternate constipation and diarrhœa.

Google

‖‖Chronic, painful, bleeding hemorrhoids.

‖Great itching or burning in anus; tumefaction of anus and rectum.

‖Prolapsus ani, with hemorrhoids, great loss of blood and debility.

Hemorrhages from anus, blood dark and tough, enveloped in viscid phlegm.

‖‖Chronic diseases of rectum.

[21] **Urinary Organs.** ‖‖Chronic nephritis and cystitis; catarrh of the bladder.

Urine increased.

[22] **Male Sexual Organs.** ‖Varicocele, with extreme constipation.

‖‖Spermatorrhœa kept up by piles and constipation.

[23] **Female Sexual Organs.** ‖‖Uterine diseases dependent upon diseases of rectum and bowels.

Prolapsus or displacement caused by constipation.

Prolapsus in evening, with pruritus, dysmenorrhœa and constipation.

Congestion of cervix uteri, with painful hemorrhoids and aggravated constipation.

Menorrhagia, with constipation and piles.

Amenorrhœa from pelvic congestion.

Obstructive dysmenorrhœa, especially where there are loss of appetite, constipation, piles with or without pruritus; when pelvic and portal congestion are coexistent.

‖Terrible dysmenorrhœa, with hemorrhoids, constant diarrhœa, and loss of appetite.

‖Convulsions preceded by severe pain in region of womb, amounting to twenty or more, in paroxysms of fifteen to twenty minutes in duration, and requiring two or three persons to prevent patient from hurting herself; convulsions followed by stupor, lasting twenty-four hours or more, from which patient revives with a severe headache. θDysmenorrhœa.

Membranous dysmenorrhœa.

Leucorrhœa with pruritus, obstinate constipation and dysmenorrhœa.

‖Pruritus vulva, accompanied by hemorrhoids.

[24] **Pregnancy. Parturition. Lactation.** ‖Pruritus in pregnancy; violent itching; parts smell badly, are swollen, dark red and protruding; she cannot lie down.

‖Pruritus at eighth month of pregnancy, genitals considerably swollen and inflamed, very sore, so that she could neither walk, lie down, nor sit, except upon edge of chair; the itching is intolerable, making patient almost delirious.

‖Obstinate constipation during gestation.

Digitized by Google

‖Diarrhœa after confinement.

[35] **Voice and Larynx. Trachea and Bronchia.** ‖Voice reduced to a feeble, scarcely intelligible whisper; very nervous; creeping, chilly sensation, especially in afternoon; spasmodic, crampy pains in abdomen; frequent necessity to urinate, with great urgency; sometimes when bowels are lax, inability to retain feces; sensation of extreme tenderness in rectum, with copious discharge of offensive muco-purulent matter. θSympathetic aphonia.

[36] **Respiration.** ‖Dyspnœa, cough with cardiac affections.

‖Severe attacks of dyspnœa with great weakness. θIrritation of cardiac nerves.

[37] **Cough.** ‖Hard, shaking cough, with bloody expectoration.

Cough, with expectoration of lumps of coagulated blood enveloped in mucus.

[38] **Inner Chest and Lungs.** ‖Hemorrhage from lungs, with short, hacking cough; dark, tough coagula, enveloped in viscid mucus; uneasiness in chest but no pain; bleeding from rectum the first day; subsequent costiveness.

‖Pains in chest alternating with piles.

[39] **Heart, Pulse and Circulation.** ‖Irritation of cardiac nerves; cardiac hyperæsthesia.

‖Periodical spells of faintness and oppression; attacks of syncope with fulness of chest and difficult breathing; heart's action rapid, regular or irregular; pulse 130 to 140; slightest motion or excitement aggravates.

‖Heart's action persistently rapid but weak.

‖After heart is relieved, old piles reappear or suppressed menses return.

‖Palpitation in patients subject to piles, dyspepsia and flatulence.

‖Valvular disease, following a severe and prolonged attack of acute rheumatism.

‖Pulse 140 per minute, steady and quick. θIrritation of cardiac nerves.

[33] **Lower Limbs.** ‖Inability to walk, must be carried from the house to carriage. θDysmenorrhœa and convulsions.

Tearing in both knees, passing down inside of legs to feet, while sitting; dull frontal headache.

[34] **Limbs in General.** Tearing pains in arms, hands and legs; frontal headache.

[35] **Rest. Position. Motion.** While sitting: sharp cutting in stomach; tearing in knees, passing down inside of legs to feet.

Must sit down: on account of cutting, colicky pains in hypogastrium.

Can neither walk, lie down, nor sit, except upon edge of chair, parts so swollen and inflamed, during pregnancy.

Digitized by Google

Motion: syncope and oppression of chest < from slightest.

[36] **Nerves.** ‖The slightest emotion or excitement of any kind aggravates the symptoms. θIrritation of cardiac nerves.
‖Becomes very faint, from pains in hypogastric region.
‖Periodical spells of faintness and oppression. θIrritation of cardiac nerves.
‖Attacks of syncope with fulness of chest and difficulty of breathing. θIrritation of cardiac nerves.
‖Great debility. θProlapsus ani.

[37] **Sleep.** Disposition to sleep during day.
Sleep disturbed by hypogastric pains.

[38] **Time.** In morning: piles >.
In afternoon: creeping, chilly sensation.
During day: four to twelve stools; disposition to sleep.
In evening: jagging sensation in lower part of rectum and anus <; piles <; prolapsus <.
At night: two stools; piles <; sleep disturbed by hypogastric pains.

[41] **Attacks, Periodicity.** Constant: heaviness in stomach; pressure in rectum; hemorrhage from piles; diarrhœa.
Frequent: necessity to urinate.
Every few minutes: cutting, colicky pains in hypogastrium.
Every five minutes: sharp cutting in stomach.
Spasmodic: pains in bowels; crampy pains in abdomen.
Periodical: spells of faintness and oppression.
Lasting fifteen to twenty minutes: convulsions.
Lasting about half an hour: dull pains in anus and hypogastrium.
Jagging sensation in lower part of rectum and anus, < in evening, and continues so until late at night.
Lasting twenty-four hours or more: stupor following convulsions.
For six or seven days: bowels not moved.
Chronic: diarrhœa of children; diarrhœa after confinement; hemorrhoids; diseases of rectum; nephritis and cystitis.

[43] **Sensations.** As of sand in rectum; as if sticks or gravel had lodged in lower part of rectum and anus; as of extreme tenderness in rectum.
Pain: in stomach; in lower part of abdomen, before stool: in hypogastrium, before and after stool; in region of womb before convulsions; in chest, alternating with piles.
Cutting: in hypogastrium.
Sharp cutting: in stomach.
Tearing: in knees, passing down inside of legs to feet; in arms, hands and legs.
Jagging: in lower part of rectum and anus.

Digitized by Google

Burning: in anus.
Soreness: of genitals, during pregnancy.
Heavy dragging ache: in pelvis.
Colicky pains: in hypogastrium.
Cramplike pains: in stomach; in bowels; in abdomen.
Dull pain: in head; in anus and hypogastrium.
Pressure: in rectum.
Fulness: in head; of chest.
Heaviness: in stomach.
Weight: in epigastrium; in rectum.
Throbbing: in head.
Distress: in anus.
Uneasiness: in chest.
Heat: in stomach; in anus.
Creeping, chilly sensation: in afternoon.
Itching: in rectum; in anus; of parts, during pregnancy, making her almost delirious.

" **Tissues.** ‖ Pelvic and portal congestion, resulting in dysmenorrhœa and piles.
Whole gastro-intestinal canal affected, especially rectum.
‖ Dropsy from cardiac disease.

" **Skin.** Yellow around the eyes.

" **Stages of Life, Constitution.** Young lady, subject to attacks at each menstrual period, for four years; dysmenorrhœa and menstrual convulsions.
Mrs. B., at eighth month of pregnancy; pruritus.
Mrs. B., æt. 29, at sixth month of pregnancy, suffering as she had previously done, under same circumstances, from obstinate constipation.
Wm. C., æt. 36, short in stature, very scrawny and sallow, of a nervous temperament, spinner by occupation, wore a truss supporting abdomen and allowing bowels to rest upon an ivory ball; prolapsus ani.
Woman, æt. 59, suffering previously from pelvic pains, relieved by *Aloes;* constipation.
Gentleman, light-complexioned, thin, nervous and dyspeptic; flowing piles.
Engineer, extremely bilious, nervous temperament, suffering somewhat from effects of Mexican climate; varicocele.

" **Relations.** Antidoted by *Nux vom.*
Was used with benefit in a case of cardiac disease, in which *Digit., Cactus,* and other remedies failed.
With *Aloes,* cured a case of pelvic congestion.
With *Conium,* cured a case of pulmonary hemorrhage.
Compare: *Æsc. hipp.* (piles); *Aloes* (proctitis and rectal dysentery); *Coloc.* (colic); *Hamam.; Nux vom.; Sulphur,* also *Arnic., Diosc., Hydrast.* and *Ignat.*
Cured colic after *Coloc.* and *Nux vom.* failed.

COLOCYNTHIS.

Squirting Cucumber. *Cucurbitaceæ.*

An annual resembling the common watermelon; herbaceous stems, with rough hairs, trail upon the ground, or climb; flowers yellow; fruit globular, of the size of a small orange, yellow and smooth when ripe, containing within a hard coriaceous rind, a white, spongy, medullary matter, enclosing numerous ovate, compressed, white or brownish seeds. The plant is a native of Turkey, and abounds in the islands of the Archipelago. It grows also in various parts of Africa and Asia.—Hom. Pharmacopœia.

Proved by Hahnemann, Aegidi, Stapf, Rückert, Austrian provers and others. See Encyclopedia, vol. 3, p. 477.

Clinical Authorities.—*Headache*, Searle, Raue's Rec., 1871, p. 178; Attomyr, Rück. Kl. Erf., vol. 1, p. 174; Schindler, Rück. Kl. Erf., vol. 1, p. 174; Haustein, Rück. Kl. [1] **Mind.** Weak memory.
- ‖Confusion in l. side of head, with pressing, burning pain in l. orbit, temple and nose, on dorsum nasi, and in upper teeth.
- ‖Delirium alternating with sopor, with constant desire to escape, eyes half closed. θAbortion.
- Depressed and joyless; disposition to cry and weep.
- ‖Complaining bitterly day and night.
- ‖Screaming from pain. θPeritonitis.
- ‖Walks about the room in great anxiety. θHeadache.
- ‖Disinclined to talk, to answer, or see friends.
- ‖Extreme anxiety.
- Extremely irritable and impatient; nothing seems right; gets angry on being questioned.
- ‖Morose mood; becomes offended at everything.
- ‖Anger, with indignation and extreme irritability; throws things out of his hands.
- Indignation, with silent internal grief.
- ‖‖Affections from anger, with indignation, particularly vomiting and diarrhœa, also suppression of menses.

[2] **Sensorium.** Giddiness, with slight delirium and deafness.
- ‖‖Vertigo: when quickly turning head, as if he would fall; tottering of knees; from stimulants.
- ‖Intimations of vertigo and nausea.
- ‖‖Dulness of head and giddiness, at beginning of colic.
- ‖Confusion of head: in frontal region, with pressure in orbits; in l. side of head.

[3] **Inner Head.** ‖Violent shooting or stitching pain in forehead and eyes, from out in, sometimes lessening for a few minutes, but returning afterwards harder, day and night.
- ‖Sudden sticking pain in forehead, towards nose.
- Rheumatic inflammation, with terrible burning, cutting pains, which extend into head, particularly into forehead.
- Drawing pain in whole brain, becoming pressive in forehead, < on moving eyebrows.
- ‖Tearing or pressing pain in forehead and root of nose; as if a coryza would appear.

Digitized by Google

‖Pressive frontal headache, < stooping or lying on back.
‖Sensitiveness of head, during whole day, as though it was compressed; especially in forehead and temples.
‖Tensive pain in forehead.
‖Aching in forehead, < by bending forward.
‖Heaviness and stupefaction of forehead.
‖Pressure in both temples.
‖Boring stitches in r. temple, disappearing on touch.
‖Severe burning, boring pain on r. side of forehead.
‖Boring and drawing in r. side of head, in forehead.
‖Pressing and dull throbbing in l. temple, grows gradually acute and cutting.
Pulsation in l. temple with violent pressure.
‖Tearing in l. side of forehead.
‖Periodical tearing, stitching, jerking headache, occurring daily, half an hour after rising, in l. side of forehead.
Hemicrania, pains extending particularly towards forehead and l. side of head, with nausea and vomiting; attacks come in afternoon towards evening.
‖Constant horrible, gnawing pains in head. θArthritic ophthalmia.
‖Painful tearing-digging through whole brain, becoming unbearable when moving upper eyelid.
‖Intense pain through whole head, < by moving eyes.
‖Painfulness of whole head and eyes, very much < by bending forward.
‖Severe pressing, tearing headache, causing her to cry out; she must sit up, is unable to remain in lying position; bends herself double; with subsidence of pains, attacks of suffocation, constriction of chest and anxious gasping for air; hands clenched; attacks recur every hour or half hour.
‖Intermittent headache in those of a rheumatic, gouty, or nervous diathesis; the pains are violent, semilateral, tearing, drawing or crampy; aching, compressive sensation in forehead, with great anguish and restlessness, obliging one to leave the bed.
Severe headache with sweat on head and body, smelling like urine, with copious watery urine during pains, or scanty fetid urine between paroxysms.
‖Pain, tearing and screwing together.
‖Congestion to head, with constant tearing pain. θArthritic ophthalmia.
‖‖Violent periodical or intermittent headache.
‖Bilious, gouty or nervous headaches, of excruciating severity.

‘ **Outer Head.** Smarting, burning on scalp, painful to touch.
‖Right side of head very sensitive to touch, particularly about eye. θHeadache.

Digitized by Google

‖Roots of hair painful.
‖Head hot. θAbortion.

° **Sight and Eyes.** Eyes dull and swimming; vision obscured.

Rheumatic form of iritis; around cornea a bluish-white ring; photophobia; no lachrymation; tearing pain in eye and surroundings; < in evening and at night.

‖Severe burning, sticking and cutting pains, extending from eye up into head and around eye, or else an aching pain going back into head, usually < on rest at night and on stooping, > by firm pressure and walking in a warm room; sensation on stooping as if eye would fall out; lachrymation profuse and acrid. θIritis. θGlaucoma.

‖Inflammation of l. eye, with subconjunctival, venous hyperæmia, which anastomosed with the superficial conjunctival vessels, and with the deep sclerotic around cornea; pupils dilated, immovable; distant objects can be seen better than near; aqueous humor, slightly turbid, mixed with small specks from the soft and discolored iris; bulb tense, hot and protruding; copious lachrymation; at night, agonizing, tearing, palpitating and burning pains, with great photophobia, upper half of fundus seemed as if smeared over, lower half not transparent. θChoroiditis.

‖External strabismus of r. eye, with redness and lachrymation; eye diminished half in size, with flickering dimness of vision; region around eye very sensitive to touch. θHeadache.

‖Periodical pain in r. eye, vessels of conjunctiva as if injected, redness of margin of lids, lachrymation; eye appears smaller; upon stooping, sensation as if eye would fall out, the pain begins with stitches in forehead above eye, the tearing pain in eye extends to r. temple and is < from shaking head, coughing, looking at the light and touch. θRheumatic ophthalmia.

‖Sharp, cutting stabs, as from knives, in r. eyeball.

‖Cutting or burning pains in eye, with much acrid discharge from both eyes. θRheumatic inflammation.

‖Burning pressure in l. eye.

‖Painful pressure in eyeballs, especially on stooping.

Pressing pain in l. orbit along dorsum of nose, > by sitting down.

Pain as if eyeballs were pressed from above downward.

Pressive feeling in orbits near root of nose, with confusion in head and chilliness.

In evening, pressive pain in r. eyeball from above and outside, < by wiping with finger; eyeball feels harder at that part.

Digitized by Google

‖Smarting in eyes; painfulness of the balls.
Pale inflammatory redness in eyeball.
‖Violent pains in eyeball, which precede full development of arthritic ophthalmia.
Inflammation of conjunctiva, here and there tendency to ulceration.
Great itching in r. eyeball, compelling him to rub.
Dry feeling in eyes, in evening.
Prickling, burning pain in r. inner canthus.
‖Eyelids burn, even after sound sleep.
Drawing in upper r. eyelid, or annoying twitching.
‖Discharge of acrid fluid from eyes. θArthritic ophthalmia.
‖Severe, cutting, stitchlike ciliary neuralgia, > by firm pressure and while walking in warm room; < by rest at night and when stooping.

[6] **Hearing and Ears.** ‖Constant roaring and throbbing in both ears, especially the left.
Pulsation and rushing in ears.
‖Crawling, itching, stitching, cutting or aching in ears, > by putting fingers into ear.

[7] **Smell and Nose.** ‖Sense of smell impaired. θHeadache.
‖Throbbing, burrowing pain in nose, from l. side to root of nose.
Beating and digging pain, from l. side of nose to glabella.
‖Nose stopped up. θInflammation of eye.
‖Fluent coryza, < in open air, > in room. θHeadache.
‖Purulent nasal discharge. θRheumatic ophthalmia.

[8] **Upper Face.** ‖Expression of face anxious; despondent. θChronic diarrhœa.
‖Sallow complexion, with expression of suffering. θOvarian tumor.
‖Face distorted. θColic.
‖Deathly color of face, with colicky pains in bowels.
‖Face pale, hot and sunken, or red and purple. θColic.
‖Hot head, red face, glistening eyes.
‖Face dark red or pale, relaxed muscles and sunken eyes.
‖Cheeks cold. θPeritonitis.
‖Tearing in cheeks.
‖Transient stitches in upper jaw frequently recurring.
‖After feeling of heat in face and forehead, there occurs, in a small circumscribed spot below lower eyelid, an extremely tiresome, aching, pinching pain, which produces twitching in lower lid, dazzling before eyes and diplopia; attacks often lasted several hours and left behind dull frontal headache. θInfraorbital neuralgia.
‖Right side of face, temple, ear, eye and sometimes side of neck attacked. θTic douloureux.
‖Sensation as if l. side of face was being torn from r. side.

Digitized by Google

Tensive, tearing pain, with heat, swelling and redness, especially of l. side, < from touch or motion, > in perfect rest and from external application of warmth.

Neuralgia of l. face, supra and infraorbital regions exquisitely painful; attacks come suddenly at 10 P.M.; the pains shooting from these parts to l. ear and down l. side of neck; cannot lie in bed, must get up and walk about; > from walking in open air; great tenderness of affected parts; dim sight and profuse lachrymation of l. eye.

Shooting, rending pains in l. side of face, between temple, ear and jaw, at first slight and intermittent, but gradually increasing in severity and frequency, until they were accompanied by nausea, empty retching of most distressing violence, when the pains in face became almost insupportable; paroxysms lasted sometimes for twenty-four hours and sometimes longer, going off gradually as they came on, depriving her of sleep and rendering her unfit for work.

Left sided tearing, or burning and stinging pain, extending to ear and head; from catching cold; pain < from least touch; patient cries out with pain and is very restless.

Constriction and pressing in l. malar bone, extending into l. eye.

Pain from back of l. ear to eye and mouth on that side.

Neuralgia in face, from l. parotid to eye.

Pimples on face.

[10] **Teeth and Gums.** Drawing and twitching toothache.

Beating toothache, first in one, then in another tooth of l. side.

Pain extends into teeth, where it is of a throbbing, tearing, twitching nature. θHeadache.

Facial neuralgia and toothache, confined to one side, in a patient recovering from sciatica, the pains periodical and very severe, coming three to four times a day, each attack lasting about an hour; toothache, as if tension was made upon nerves and skin suddenly relaxed; pains extend over one side of face to ear.

Pain in lower teeth as if nerves were compressed or stretched.

[11] **Taste and Tongue.** Persistent, bitter, disgusting taste.

Bitter taste in mouth. θChronic diarrhœa.

Taste: bitter, of food and drink, less frequently offensive or metallic. θHeadache. θDysentery.

Tongue rough, as from sand, and feels scalded.

Burning on anterior surface of tongue.

Burning on tip of tongue.

Google

‖Tongue feels burned and scalded.
Tongue: coated white or yellow; rough.

[12] **Inner Mouth.** Stinging in velum palati as from a beard of grain sticking in it.
‖Dryness of mouth, with thirst. θLumbago.
‖Offensive smell from mouth from decayed teeth. θIschias.
Burning of under lip.

[13] **Throat.** Feeling of constriction in throat, with empty eructations and palpitation of heart.
‖Dryness, rawness, roughness, or scraping in throat.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Canine hunger, with longing for bread and beer.
‖Diminished appetite, without thirst, yet great inclination to drink, succeeded by a putrid taste in mouth.
Appetite variable, mostly poor. θOvarian tumor.
‖Aversion to food, with scraping in throat.
‖Great emaciation, though appetite is good; extreme thirst, drinking much, during night empties a pitcher of water and by morning fills a vessel with urine greater in quantity than amount of water consumed. θDiabetes.
‖Violent thirst. θDysentery.
‖Thirst great, everything tastes bitter, complete loss of appetite. θHeadache.
‖Burning thirst. θPeritonitis.
‖Thirsty, but can only take a spoonful of liquid at a time. θChronic diarrhœa.

[15] **Eating and Drinking.** ‖Griping and flatulence after eating. θSciatica.
‖After least food or drink, diarrhœa.
‖Potatoes cause bellyache.
‖‖Colic from drinking while overheated.
‖‖Coffee relieves the colic.
Beer intoxicates easily.
‖Pains < from eating or drinking least amount.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: inodorous; violent; after eating and drinking; empty.
‖Nausea rising from stomach.
‖Squeezing in intestines extends up into stomach, causing nausea.
‖Nausea, with fruitless efforts to vomit, lasting until falling asleep and returning on awaking.
‖Nausea and vomiting, with coldness of extremities. θIntestinal catarrh.
‖Nausea, with greenish vomiting. θChronic diarrhœa.
Fruitless efforts to vomit.
‖Retching and bending the body forward.
‖‖Vomiting and diarrhœa from anger, with indignation.

Digitized by Google

Serous, bilious vomiting, without nausea.
Vomiting: of food without nausea; of ingesta, afterwards of green substances, with violent colic; of bitter tasting yellow fluid; of bile and greenish substances.
‖Vomiting of a green, slimy fluid. θPeritonitis.
‖Bilious vomiting, during paroxysms of pain. θOvarian cyst.

[17] **Scrobiculum and Stomach.** ‖Feeling of fulness in epigastric region.
‖Griping in epigastrium, after each meal, < towards evening.
‖Compressive sensation in epigastrium, returning at short intervals and changing into a sharp pinching, with slight confusion of forehead.
‖Painful griping and movements in epigastric region, followed by a soft, almost diarrhœic stool.
‖Feeling of emptiness in stomach.
Pressure in stomach, with sensation of hunger.
‖Burning pain in stomach.
‖Cramp in stomach at night, relieved by belching.
‖Sleepless from cramplike pressure in pit of stomach and constrictions of stomach; this latter so sensitive that the lightest covering cannot be endured.
‖‖Violent cutting, tearing pains, which come from different parts of chest and abdomen and concentrate in pit of stomach, > from hard pressure and bending double; brought on by vexation and indignation.
Pain of stomach accompanies pain of teeth and head.
‖Pit of stomach very sensitive to touch.

[18] **Hypochondria.** ‖Transient stitches in hepatic region.
Flying pains in hepatic region.

[19] **Abdomen.** ‖Epigastrium and abdomen excessively sensitive and painful to touch. θAbdomen.
‖‖Abdomen distended and painful; tympanitic. θLead colic.
‖Constant rumbling and croaking in bowels as from frogs; borborygmus.
‖Movements are felt in abdomen.
‖Incarcerated flatus.
‖Colic preceded by discharge of flatus.
‖Each paroxysm of pain in abdomen is attended with a general agitation and a chill ascending from hypogastrium. θColic.
‖Colic preceded by pressure upon sides of abdomen, which spreads towards stomach, also pressure upon chest, going upward and spreading about neck.
Rending, tearing pain extending up to r. mamma.
Constrictive pain in upper part of abdomen, returning at short intervals and passing into sharp griping.

Digitized by Google

Contractive, twisting pains about umbilicus, spreading afterwards over whole upper part of abdomen, leaving lower portion perfectly free of pain, this lasting about an hour, and followed by a copious evacuation from bowels, with immediate relief of pains, the relief, however, is but temporary; sharp pains soon return and last until another discharge takes place, this is again followed by pains, and continues all night, stools driving her out of bed.

Violent colic around navel, with inflammation of abdomen; fulness of epigastric region, nausea and vomiting, frequent eructations and constipation. θNeuralgia of solar plexus.

Severe colicky pains, most around navel, and radiating from that point; has to bend double, being < in any other posture; great restlessness and loud screaming on changing position; < at intervals of five or ten minutes; from eating fruit.

Violent colicky pain near umbilicus, at times a small quantity of fecal matter in stools. θDysentery.

Colic, spreading from navel, > from frequent discharge of flatus.

Constant violent, bruised pain in umbilical region, in a spot as large as a hand, < by walking, not from pressure, somewhat > after eructations of gas.

Griping in umbilical region, gradually subsiding, then returning and rapidly changing into cutting, as if a chisel was thrust deep into upper abdomen, thence passing in a curve backward and downward into pelvis, and then cutting its way upward again.

Griping and cutting in umbilical region, < after stool, with chilliness over whole body.

Cutting and constrictive pain in umbilical region after eating.

Feeling at umbilicus as after taking cold.

Sensation of inflation in umbilical region, with compression in throat, and nausea.

Tenderness of umbilical region with swelling.

Pain from three inches below navel to pit of stomach, cramplike; sensitive to touch, < 4 to 9 P.M., with vomiting and sleepiness; < after eating and walking; > in morning from hot tea and pressure. θColicodynia.

Twisting stitches from umbilical region towards loins and spine.

Pinching pain in abdomen as if bowels were pressed inward, with cutting extending towards pubic region, so severe below navel that muscles of face are distorted and eyes drawn together; pain only > by pressure upon bowels with the hands and bending inward.

Digitized by Google

Isolated deep stitches, sometimes in left, at others, right flank, apparently connected with the ovaries.

Coliclike, spasmodic pain after vexation.

Cramping pain, causing her to draw her lower limbs up to abdomen, with restlessness, moaning and lamenting, < by eating or drinking.

Drawing, tearing, pinching pains in whole abdomen.

Cutting, lancinating pains flying all over abdomen.

Colic so distressing that they seek relief by pressing the corner of a table or head of bedpost against abdomen.

Neuralgic pain in bowels; obstruction as from dryness of bowels; sensation of increasing constriction.

Feeling in whole abdomen as if the intestines were being squeezed between stones and would burst.

Cutting in abdomen as from knives. #Lead colic.

Pain as if bowels were in a vise, with cutting pain downward.

Intense griping, cutting, or squeezing in intestines, coming up into stomach and causing nausea, or extending down into thighs.

Colicky pains in abdomen, constant inclination to vomit, sleeplessness, vomiting of bile without relief, violent fever, skin hot and dry, pulse hard and quick, intolerable cutting pain, first here then there in abdomen, integuments of which are very sensitive to touch, > from drawing up feet, bitter taste in mouth, dislike to water. #Acute gastritis after taking cold.

Periodical neuralgic colic, coming every morning at 6 o'clock; abdominal walls feel as if festering, and pain spreads out in rays to all sides.

Severe colic in lower part of abdomen; came on in spasms, each lasting about half a minute, between the paroxysms no pain, < when lying on either side and after eating, > when lying on back and bending double.

Paroxysmal griping pains in bowels, doubling him up, with profuse warm sweat on forehead and neck. #Colic.

Sharp, cutting abdominal pains; pain in abdomen upon straightening up; walks bent with hands pressed to painful side; attacks of excruciating pain, cutting and griping, obliging to bend double and scream with agony, during paroxysms, bilious vomiting. #Ovarian cyst.

Chronic catarrh of colon, with paroxysms of colic; usually after vexation, violent colicky pains along colon, frequent watery discharges from bowels, tenesmus, nausea, vomiting, coldness of extremities and cold perspiration; during severe spells intestines appear distended or drawn into knots.

Sudden severe pains in abdomen after catching cold.

Google

Gnawing, boring pain in abdomen, < after dinner, must sit down or lie and bend forward.

Deep-seated pulsation in abdomen when lying down.

Pains in abdomen extending to small of back. θColic.

A violent cutting like an electric shock darting through whole abdomen to anus.

After falling, abdomen large and tense, only l. side painful to touch, with sensation as if a tear had occurred there, paroxysmal pains every two hours, pain extending towards r. side of abdomen and to pubis, where a hard body as large as a nut had appeared; this tumor upon being pressed back did not again appear; menses have not appeared for some time.

Well-defined tumor in r. iliac fossa as large as a cocoanut, of elastic feel but hard and immovable; at times severe cutting pain like a stab in tumor, causing her to bend double and scream and toss about in agony, with bilious vomiting; < from heat and warm weather; > open air.

Tension in region of anterior superior spine of ilium, changing next day to a violent drawing from spine of ilium to inguinal region and upper third of inner surface of thigh.

Pain in groin, like from hernia, and on pressure, sensation as if a hernia was receding.

Tenderness over l. inguinal region, with intense cramplike pains passing around to back. θChronic diarrhœa.

Tight, cramplike pain in l. iliac and inguinal region, which is < after, not during external pressure; especially observed in women after excessive venery, after indignation, abuse of opium; > for a while by a cup of coffee.

Hemorrhoidal colic, with sensation as if bowels hung on easily tearing threads.

Pains at beginning of attack, > by pressure, later < from pressure. θLead colic.

Pain in bowels immediately on taking a few steps.

Colic only when walking.

Pains > by motion, such as twisting, turning and wriggling around, and the motion is kept up steadily while the pain lasts; child writhes in every possible direction, doubles itself up, and seems in great distress, it cries very hard.

Colicky pains > by lying on stomach.

Rheumatic colicky pains < from eating.

Coffee, and tobacco smoking, > pain in bowels.

[20] **Stool and Rectum.** Noisy emission of large quantities of flatus.

Diarrhœa from anger with indignation.

Digitized by Google

Urging to stool, with constant colic.

Excessive urging to stool, which was copious, yellowish-brown, partly thin, as from a purge, and with a sourish, offensive odor, followed by transient relief of the colic.

Urgent, almost irresistible inclination to stool, and in quick succession, two abundant, first pappy, then fluid, evacuations, with ulcerative pains in bowels, > by bending forward, < by an upright position.

Griping was relieved by straining and the consequent expulsion of a long train of slippery bubbles of wind and a small quantity of bland mucus; paroxysms at intervals of from five to fifteen minutes; finally a very painful expulsive pressure ensued, and in a short time a quantity of thin feces passed involuntarily through the sphincter at a single impulse; it was perfectly bland, causing no burning or smarting at anus, which was rather protected all about by the slippery mucus of which a great portion of passage consisted; pains in abdomen all disappeared with this passage.

Sudden tenesmus, soon followed by a copious, pappy evacuation, succeeded by griping and sensation as if taking cold in abdomen.

Violent tenesmus, with pappy, copious, strong smelling stools, which an hour later were watery, scanty, yellow, and almost inodorous.

Stools: copious, fecal, accompanied by great discharge of wind; fluid; after eating, with discharge of flatus and painful feeling in abdomen; > after getting warm in bed; thin, frothy, saffron yellow, greenish-yellow, of musty odor; slimy, bloody, like scrapings of bowels, with tenesmus during stool; relief of pain after stool; bloody; bilious, watery, sour, putrid smelling; brownish-yellow; liquid; first watery and mucous, then bilious, and lastly bloody; thin, mucous (painless), undigested; excoriating; frequent, not profuse; green, slimy, with straining; pappy; sour, putrid; musty, like brown paper, burning.

Child has colic, > by carrying on stomach; stools during or right after nursing, and undigested; stools small, bilious, frothy, frequent, preceded by severe colicky pains, coming on in paroxysms.

Frequent watery diarrhœa, becoming more colorless and watery with every new stool.

Green, yellowish, slimy, watery discharges, streaked with pure blood; afterwards burning and jerking in anus.

Bloody stools, with violent pain in bowels, extending down into thighs.

Dysenteric diarrhœa, renewed after least food or drink;

Digitized by Google

chronic, with slimy stools, or soft, with tenesmus, sedimentous urine.

‖Stools increased by taking any nourishment, with compressive, griping pains, commencing at umbilicus and passing down to rectum; stools greenish and frothy, and followed by burning at anus; tenesmus.

‖Diarrhœa after eating ever so little.

‖Fluid stool after eating, with discharge of flatus and painful feeling in abdomen, > by warmth of bed.

‖Chronic watery diarrhœa, mornings, with pain in sides of abdomen.

‖Severe cutting pain; doubles up and rolls all over bed, before stool; green, slimy stools with straining.

‖The abdomen and thighs must often be approximated as much as possible during the stool.

‖The passages are small and frequent with very much pain, causing the child to writhe and twist and double up with every stool.

Weakness, paleness and prostration after stool.

‖Stools either diarrhœic or too hard and unsatisfactory.

‖Frequent urging to stool without any evacuation.

‖Stool in single pieces of a stony hardness.

‖Intestinal canal torpid, evacuations hard and occurring once in every two or three days, contrary to usual habit.

‖Dry stool. θLumbago.

‖Retarded stool. θIschias. θHeadache.

‖Constipation, stools hard. θColic.

‖‖Bowels, after several years' use of cathartics, immovably constipated. θOvarian tumor.

‖Desire to go to stool without evacuation, quick, succeeding ulceration, cracking of bowels.

Difficulty of retaining stool.

‖Involuntary discharge of feces from anus, although hard and well formed, while child is standing or playing. θParalysis of rectum.

Darting in rectum alternating with stitches through the bladder.

Constriction of rectum during stool; discharge of blood from rectum, with stinging, burning pain in small of back and anus, < in afternoon and evening, also during rest; > from motion.

No pain or constriction except on going to stool, when the anus becomes painfully constricted, pain running up back, of a sharp, cutting, lancinating character.

‖Discharge of blood from anus, with violent sticking and burning pain in small of back and anus.

‖Terrible colic, causing cramping up double, and great restlessness, from or on account of hemorrhoids.

Digitized by Google

‖Painfully swollen hemorrhoids, in rectum and at anus.
Blood flows continuously from hemorrhoids for a long time.
‖Pricking at anus, with constant discharge of mucus.
Burning, sticking and excoriating pain in anus, with discharge of moisture from rectum; frequent pressure at anal sphincter, which ceases on escape of mucus.
Burning and darting pain in anus.
‖Frequent urging to stool, with sensation as if anus and rectum were weakened by long-continued diarrhœa.
Stools excoriate anus.
‖Chronic diarrhœa; epidemic dysentery.

[21] **Urinary Organs.** Kidney affections with dysuria or dropsy.
‖Stitching and burning in region of kidneys and loins.
‖Cutting pain extending from umbilical to ovarian region, followed by an urging to urinate with discharge of turbid, slimy urine, which quickly deposits a mucous sediment; laborlike pains in course of ureters, extending to upper part of thighs, followed by burning in urethra; constant cutting pain at region of fundus of bladder, with discharge of urine every fifteen minutes. θAcute catarrh of bladder.
Alternate stitches in bladder and rectum.
‖Urging to urinate with discharge of a great quantity of clear watery urine.
‖Frequent urination.
‖Frequent tenesmus vesicæ, with scanty emission.
‖Sudden violent pressure upon bladder, which was full, passed off suddenly on emission of flatus.
Itching of orifice of urethra, with desire to urinate.
‖Severe burning along whole urethra during stool.
Burning in urethra after micturition.
‖Difficult urination, with a brown discharge.
Retention of urine.
Pain during micturition extends all over abdomen.
‖Urine clear, like water. θLumbago.
Urine: scanty and fetid; brown; bad smelling; viscid; deposits copious sediment, which becomes jellylike; faint flesh-colored, with light brown, flocky, unequally translucent sediment, and depositing small, hard, reddish crystals, which adhere to the vessel and are not easily removed by water; gelatinous, viscid, jellylike, copious deposits, sometimes like gravel.
‖Increased secretion of urine, looking like brown beer, which becomes turbid and deposits a copious sediment when cold.
Urine viscid, looks like and has the consistency of thin glue; complaints before passing water, also after.

Digitized by Google

Tough mucous sediment in urine which can be drawn out into strings.

‖Urine when voided is white and turbid, when getting cold it coagulates and becomes a milk-white jellylike mass, which, when poured out, glides in a compact cake out of the vessel.

‖Peculiar milky urine, which coagulates when standing. θDiabetes.

[21] **Male Sexual Organs.** ‖Sexual desire strong, with erections.

Impotence.

Pain and swelling of testicles and spermatic cord.

Retraction of testicles and priapism, with retention of urine.

Retraction of prepuce behind glans during sleep.

‖Prepuce drawn behind glans, inflamed and swollen, violent pains both day and night. θParaphimosis.

[22] **Female Sexual Organs.** ‖Cramplike pain in l. ovarian region, as though the parts were squeezed in a vise.

‖Severe stitches in region of r. ovary, which afterwards becomes a burning pain. θColic.

‖Intense boring or tensive pain in ovary, causing her to draw up double, with great restlessness.

‖Deep stitches as from a needle, in ovaries.

‖Ovaritis supervening on abortion, stitches in ovaries.

‖Swelling in region of l. ovary and descending colon, becoming hard during pains; parts very sensitive to touch; pains > by warm drinks. θColic.

‖A firm, elastic tumor between uterus and vagina anteriorly and rectum posteriorly, completely occluding vagina and rendering defecation very difficult; paroxysms of acute pain across hypogastrium, in sacral region and around hip joint when attempting to walk; pain extends down groin and along femoral nerve, > by flexing thigh upon pelvis, always induced or < by extending thigh, but there are frequent and severe paroxysms without any provocation.

‖Ovarian cysts, with pain in abdomen upon straightening up; walks bent, with hands pressed to painful side.

‖Ovarian neuralgia.

‖Uterus prolapsed, inclined to l. side from pressure of tumor; difficult breathing with menses, during which must remain in bed; between periods has thick, yellow, offensive leucorrhœa. θOvarian tumor.

‖Metritis, from indignation; colicky pains bend her double; cutting, as from knives, in bowels; great distress, distension of abdomen; feeling as if intestines were being squeezed between stones.

‖Menses preceded by cutting pains beneath umbilicus,

extending towards groins and internal genital organs, > from warmth of bed; with the pains coldness of feet and pappy stool. θColic.

‖Occasionally, sharp pain like a stab in r. pelvic region, obliging her to bend double and press strongly with her hand on part. θOvarian tumor.

‖Metrorrhagia, with cramplike pain in abdomen; > by pressure and hot drinks.

‖Drawing, gnawing pain in l. ovary, extending towards stomach, before appearance of menses, which are profuse and too early.

‖Several days before each menses, sharp, darting paroxysmal pains in stomach, making her bend forward and press on painful part to get relief, with extreme nausea and vomiting; these all ceased on appearance of menses; on last day of menses pains returned, lasting to within about thirty minutes of end of menses, when an erythematous eruption appeared over seat of pain, itched intensely for thirty minutes and then suddenly disappeared; no return of symptoms till next pre-menstrual time.

‖‖Dysmenorrhœa; cramping pains, must bend double, sometimes < after eating or drinking.

‖Catamenia by one or two days too soon, dark colored, offensive, accompanied by almost constant sharp, cutting pains, obliging her to bend double, screaming and tossing about in agony. θOvarian tumor.

‖Menses regular, last two weeks, scanty and bright red, with cramplike pain.

‖Menses increased, with pain in l. foot; < before menstruation.

‖Menses increased and too frequent.

‖Difficulty of breathing during menses. θOvarian tumor.

‖‖Suppression of menses, caused by chagrin; colicky pains, with great anguish and restlessness.

‖Menses absent. θChronic diarrhœa.

‖Between menses, yellow, thick, offensive leucorrhœa.

‖Swelling of labia, with dragging pain and heat in vagina. May be indicated in some cases of very painful cancer.

[24] **Pregnancy. Parturition. Lactation.** ‖During pregnancy, frequent attacks of colic, which draw the patient nearly double.

‖Suppression of lochia: with violent colic; from anger or indignation; with tympanitic swelling of abdomen and diarrhœa; < after taking food or drink, great restlessness.

‖Suppression of lochia, after abortion, from vexation, head hot, face dark red, tongue yellow, epigastrium and abdomen painful to touch. θAbortion.

‖Childbed fever brought on by indignation or grief because of unkind treatment; the attacks commence with fainting spells and sleeplessness, followed by a febrile heat, hot, dry skin; hard, full, quick pulse; stupor alternating with delirium, open eyes, desire to escape; hot head; stitches in eyes and forehead; dark red face; pain in epigastrium when touched; marked pulsation of heart and in all the arteries.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Frequent tickling and irritation in larynx.

‖Constriction in larynx, which induces frequent deglutition, with oppression of breathing; > in open air.

[26] **Respiration.** ‖Oppression of chest, < evenings and before midnight.

‖Difficulty of breathing during menses. θOvarian tumor.

‖Respiration anxious and oppressed, with sensation as if he was about to smother; stitches in sides with each breath. θLumbago.

‖Dyspnœa, with constriction of chest and anxious respiration. θHeadache.

‖Asthmatic attacks at night, with slow, difficult breathing, which provokes cough.

[27] **Cough.** ‖Titillating cough, frequently during night.

‖Dry cough from tickling in throat.

‖Cough caused by smoking tobacco.

‖Cough with greenish expectoration and aggravation of headache.

[28] **Inner Chest and Lungs.** ‖Oppression of chest.

‖Nightly attacks of oppression, as if chest was constricted.

‖Stitching pains in r. or l. side of chest.

Cutting and shooting pains in stomach extend to chest.

[29] **Heart, Pulse and Circulation.** ‖Stitches in cardiac region.

Palpitation of heart.

‖Hard, full and hurried pulse. θAbortion.

‖Full, quick pulse; great thirst; bitter taste in mouth.

Pulse: generally full, hard and accelerated; less frequently, small and weak.
