‖Strong throbbing in all the bloodvessels.

‖Pulse weak and frequent. θPeritonitis.

‖Pulse small, scarcely perceptible. θColic. θLumbago.

‖Pulse 130, feeble. θChronic diarrhœa.

[31] **Neck and Back.** ‖Feeling of stiffness in muscles of nape, when moving head; drawing in nape.

Heat in nape of neck.

‖Violent tensive drawing in l. cervical muscles, < on motion.

‖Pressure in l. side of nape, < from turning.

‖Drawing pain, internally, in region of r. scapula, as if nerves and vessels were made tense.

Google

Rawness in r. shoulder blade during repose.

Pain in shoulder blades and back, extending into neck, with tension.

Great tenderness on pressure over posterior spinous processes of all cervical and first four dorsal vertebræ; pressure on spinous processes of first three cervical vertebræ < or brings on neuralgic attack. θNeuralgia of face.

Weakness and pains in back, with pressing headache mornings; painful lassitude in small of back and lower limbs.

Pain in small of back.

Severe stitching pain in small of back, < from motion. θSciatica.

Painful lassitude in small of back and lower extremities, in evening.

Sensation of a heavy weight in lumbo-dorsal region > by lying on l. side, with increase of temperature and sensibility of parts affected.

Pain in back and small of back, which finally locates itself in upper part of thigh and buttock, pain seems confined to a small spot covering an area of about an inch, making him limp; the pain finally becomes so severe as the disease progresses that he can neither stand nor walk. θLumbago.

Sharp, cutting or lancinating pain running up back, with constriction of anus.

Tensive stitch pain in r. loin, felt only during inspiration, and most violent when lying on back.

Stitching pains in small of back, so severe upon motion that he gets upon arms and knees in order to obtain relief, pains unendurable in any other position; stitching and cutting pain in r. hip, extending down leg to joint, when it becomes a severe tearing pain; upon remission of pain limb is numb and seems without sensation. θCoxalgia.

Aching in region of l. sacro-iliac articulation, with crawling in l. sole as though it was asleep.

Cramplike pain in hip, from kidneys to thighs, with sensation as if hip-joint was fastened by iron clamps.

Continuous drawing pains in r., also in l. hip; lying, sitting, standing and walking are all painful; she can find no comfortable position, especially at night and in bed; walking difficult, partly on account of paralytic state of leg, and partly on account of pain. θIschias.

Shooting pains in sacral region, so that he must keep perfectly quiet, < from every motion.

Severe burning along sacrum.

Google

▮Coxalgia; hip joint feels as if femur was fastened to os innominatum with iron claws, accompanied by pains which dart periodically from sacro-lumbalis muscle into thigh.

[32] **Upper Limbs.** ▮Swelling and suppuration of axillary glands.

▮▮Pain in r. shoulder joint as if it had been bruised, brought on by vexation.

▮▮Stitches in r. shoulder towards back, with pain in shoulder on motion or pressure; great restlessness in arm, patient unable to hold it quiet; patient scrofulous. #Luxatio spontanea.

▮Right shoulder and elbow joint, and the finger joints of both hands painful, stiff and swollen; pains sharp or sore. #Rheumatism.

▮Rheumatic pains through arms.

▮Hands feel stiff.

▮Tearing-drawing in l. arm, down to finger joints.

▮Pain in palms, as if muscles were contracted.

▮Tearing in joints of l. hand.

▮Tensive pain in l. thumb, impeding motion.

Violent drawing pain in r. thumb, like in the tendons, beginning in ball and passing off at tip.

Pain in palms of hands, as if muscles were contracted and hands and fingers could not be opened; < when at rest.

Exceedingly painful, long stitches in r. metacarpus, frequently repeated, embarrassing the opening of hand and stretching of fingers.

[33] **Lower Limbs.** Pain in the hips, extending from region of kidneys down to upper part of thighs.

▮Inflammation of r. hip joint, the buttock is swollen and joint very sensitive to touch, pain < from least motion, and particularly when rotating leg inward, tearing pain in limb, which has increased one inch in length.

▮Drawing, twitching, with dull throbbing in region of l. hip and r. loin, crest of ilium towards buttock.

▮Dull stitches in region of r. hip so severe that he must cease walking, > while resting and by warmth of bed; sensibility of parts affected.

▮Throbbing, boring in region of r. hip, waking him from sleep about 4 A.M.

▮Crampy pain in affected hip, as though the parts were screwed in a vise; lies upon affected side with knee bent up.

▮Constricting, pressing pain shooting from hip just behind joint into leg, with sensation as if pain was boring deep into bones, also stitching pains.

▮▮Origin of pain in sacral region, corresponding to position of plexus ischiadicus, thence is extended through

Google

the incisura ischiadica major towards hip joint down posterior portion of thigh into fossa poplitea; sensibility of parts affected.

Violent, continuous tearing, sticking, burning pains, from sacrum along course of sciatic nerve, behind great trochanter of r. leg, down as far as knee, can neither lie, sit nor walk; < from warmth of bed. θIschias.

Pain passing down outside of l. leg, from hip to ankle; pains in paroxysms every quarter of an hour, parts very painful to touch; paroxysms < at night, > from heat; movements at first < afterwards > pain; < again from long-continued motion, every two or three hours, four or five successive shocks of pain pass suddenly through affected parts; tenderness on pressure over sciatic nerve, and stiffness of knee joint; pain > from rubbing; < between 1 and 2 A.M. and 4 P.M., about quarter hour after rising; about noon. θSciatica.

Severe pain in r. leg, compelling him to lie quietly in one place; slightest attempt at motion causes great pain which is accompanied by a sensation as if marrow of bone was being crushed; want of sensation along course of sciatic nerve; occasionally, pain shooting with lightning-like rapidity from small of back to heels. θSciatica.

Severe stitching, tearing pains from hip to knee, making him cry out, pains < from motion. θIschias.

Continuous drawing and tearing pains in r. hip and thigh, with periodical exacerbations. θIschias.

Rheumatic pain which "seems to be in the bone," concentrating itself especially in r. hip and radiating thence to calf and knee; it became so violent that he whined day and night, and could not sleep a minute.

Pressure at l. sacro-iliac articulation, with tingling in sole of foot.

Pain extends down leg to knee, where it becomes tearing in character; when the pains cease, the limb feels numb and without sensation; pains > in evening and at night. θCoxalgia.

Pain in r. thigh so severe that she cannot stand upon affected limb. θPsoitis.

Pain in r. thigh only when walking, as if the psoas magnus were too short.

Stiffness of muscles of r. side of thigh.

Drawing pain in r. thigh down to knee.

Cramp in middle of l. thigh.

Drawing in inner side of l. thigh, afternoons.

Drawing in external condyle of r. femur.

Acute paroxysmal sciatic pains with headache; parts

Google

tender to touch; < at night, by motion, by heat and rubbing.

‖ Ischias with albuminuria.

Violent pains in bowels, extending down into thighs.

Tearing pain in legs, particularly in r., with cutting in abdomen, as of knives. θColic.

Heaviness of lower limbs.

Cramp in the legs.

Cannot walk much on account of weakness and trembling of legs, especially in open air; walks bent over with hand applied to r. side. θOvarian tumor.

Shooting pains in l. knee, sometimes lacerating pains running from hip inwardly down to knee, < from least attempt to move leg; walking or standing on it impossible; the nights are sleepless, especially in bed; knee not much tumefied, pale and of normal heat; tongue coated white, no appetite or thirst; lower limbs feel heavy; not much pain in it as long as she keeps it quiet, but the least motion produces it; shooting in knee with every attempt to walk; chilliness.

Stitching pains in r. knee joint, < from motion, when at rest pains extend towards hip; dragging of r. leg when walking, trochanter, buttock and knee of r. leg lower than of l. leg, which is shorter in length than right. θLuxatio spontanea.

The knees feel stiff, preventing stooping.

Sensation of coldness in knees.

Sticking-drawing along l. tibia into ankle bones, with burning pressure in l. eye.

Falling asleep of feet and knee joints.

Tearing in l. calf as far as heel.

Cramp in l. calf.

Cramps in legs and feet, calves feel as if asleep.

Ankles, toes and soles of both feet, painful, swollen and stiff; pains sharp and pricking, or sore.

Constant dull, aching, cramplike pain, as if in periosteum or dorsum of feet.

A swelling on r. edge of tarsus, soft, pale, painless, clearly circumscribed and as large as a pigeon's egg, appearing like a common lymphatic tumor.

Burning in feet at night. θLumbago.

Drawing, aching in l. foot.

Pain in l. foot, < before menstruation.

The feet go to sleep, first the l. then the right.

Crawling in l. sole as though it was asleep.

Sweating of feet.

Feet cold. θColic.

[84] **Limbs in General.** Tearing or drawing pains in all the limbs.

Digitized by Google

‖Tearing, drawing pains in both thighs and in l. arm down to finger joints.
‖Rheumatic pains in limbs and joints after catching cold.
‖Heaviness of limbs. θHeadache.
‖Extremities cold. θPeritonitis. θChronic diarrhœa.
Icy coldness of hands and feet.
‖Cold hands with warm feet. θDysentery.
Stiffness in joints; shortening of tendons.

[85] **Rest. Position. Motion.** Rest: pains extending from eye into head <; < ciliary neuralgia; > l. side of face; pain in palms of hands <; dull stitches in region of r. hip >; stitching in r. knee.
Repose: rawness in r. shoulder blade.
Lying down: pulsations in abdomen.
Lying on back: frontal headache <; tensive stitch pain in r. loin <; pain in lower part of abdomen >.
Lying on stomach: colicky pains >.
Lying on l. side: sensation of heavy weight in lumbo-dorsal region >.
Lying on either side: pain in lower part of abdomen <.
Crampy pain in affected hip, as though parts were screwed in a vise, lies upon affected side with knee bent up.
Severe pain in r. leg, compelling him to lie quietly in one place; slightest attempt at motion causes great pain.
Pain in r. thigh so severe that she cannot stand upon affected limb.
Can neither stand nor walk on account of pain in small spot in upper part of thigh and buttock.
Continuous drawing pains in hips, lying, sitting, standing and walking are all painful, can find no comfortable position, walking difficult.
Sitting: pressing pain in l. orbit along dorsum of nose >.
Must sit down or lie and bend forward: gnawing, boring in abdomen.
Headache compels her to sit up.
Upright position: ulcerative pains in bowels <.
While standing or playing: child has involuntary discharge of hard and well-formed feces.
Bending forward: aching in forehead <; painfulness of whole head and eyes <; ulcerative pains in bowels >.
Bending double: pains from different parts of chest and abdomen concentrating in pit of stomach >; pain in lower part of abdomen >.
Colicky pains compel him to bend double.
Walks bent, with hands pressed to painful side.
Abdomen and thighs approximated during stool; with cramping pains.
Drawing patient double: cramping dysmenorrhœal

Digitized by Google

pains; frequent attacks of colic during pregnancy; paroxysmal griping pains in bowels; boring, tensive pain in ovary.

Gets upon arms and knees: stitching pains in small of back.

Finds rest in no position, throws himself constantly about.

Obliged to leave the bed: headache.

Motion: head and eyes sensitive to least; pain in l. side of face <; violent tensive drawing in l. cervical muscles <; stitching pains in small of back <; shooting in sacral region <; pain in r. shoulder; tensive pain in l. thumb impeding; pain in r. hip joint <; pains down outside of l. leg from hip to ankle first <, afterwards >, then < again from long continued; stitching from hip to knee; pains from l. hip to knee <; stitching in knee joint <; intense pain in abdomen <; discharge of blood, with burning and stinging in small of back and anus >; such as twisting, turning and wriggling around > pain.

On moving eyes: pain through head <.

On moving upper eyelid: painful tearing digging through brain unbearable.

On moving eyebrows: pain in head <.

On quickly turning head: vertigo.

Turning: pressure on l. side of nape <; sciatic pains <.

On moving head: stiffness in muscles of nape.

On shaking head: pains in r. eye <.

Stooping: frontal headache <; pains in eyes extending into head <; sensation as if eye would fall out; painful pressure in eyeballs; ciliary neuralgia <; stiffness of knees prevents.

On straightening up: pains in abdomen.

Drawing up feet: colicky pains >.

When attempting to walk: paroxysms of acute pain across hypogastrium, in sacral region and around hip joint.

Walking: pain extending from eye into head >; ciliary neuralgia >; neuralgia of l. face >; about room in great anxiety; bruised pain in spot in umbilical region <; pain from three inches below navel to pit of stomach <; colic only when; paroxysms of acute pain across hypogastrium, in sacral region and around hip joint, dull stitches in region of r. hip so severe that he must cease; pain in r. thigh only when; neuralgia of l. face; cannot lie in bed, must get up and walk about; weakness and trembling of legs prevent; shooting in l. knee

Digitized by Google

on every attempt at; dragging of r. leg when; pain in bowels immediately on taking only a few steps.
When rotating leg inward: pain in r. hip joint and limb <.

[36] **Nerves.** Great restlessness and anguish, with headache.
‖Extremely restless, very weak, unable to speak except in a whisper. θChronic diarrhœa.
‖Extreme weakness and lassitude with trembling of legs, especially when walking in open air, though the other symptoms are >. θOvarian tumor.
‖‖Finds rest in no position, throws himself constantly about. θColic.
‖General lassitude and painful weariness in small of back.
‖Sensation as if all his strength was failing.
‖Great prostration. θDysentery.
‖Faint feeling, paleness and great prostration.
‖Fainting. θColic.
Fainting, with coldness of external parts.
‖Great tendency of muscles of all parts of body to become painfully cramped.
Twitching of muscles.
‖A shuddering rises from abdomen over body.
‖Sensation of formication in affected part.
‖Affected parts feel asleep.
‖Neuralgia, especially facial, and sciatica.
‖Neuralgiæ of solar and other abdominal plexuses and of lumbar and femoral nerves.
‖Neuralgia of rheumatic or gouty-rheumatic diathesis.

[37] **Sleep.** ‖Yawning and sleepiness.
‖Sleepnessness. θChronic diarrhœa.
‖‖Sleeplessness and restlessness, with pains; after anger.
‖Sleeps badly, often wakes tired. θOvarian tumor.
Dreams: disturbing sleep; vivid; anxious; voluptuous.

[38] **Time.** In morning: pain below navel to pit of stomach >; chronic watery diarrhœa.
In afternoon: attacks of hemicrania; discharge of blood, with stinging and burning in small of back and anus <.
From 4 to 9 P.M.: pain below navel to pit of stomach.
In evening: pain in eyes <; pressive pain in r. eyeball from above and outside; dry feeling in eyes; griping in epigastrium <; discharge of blood, with stinging and burning in small of back and anus <; oppression of chest <; weakness and pains in back, with piercing headache; painful lassitude in small of back and lower extremities; pains extending down leg to knee >; fever.
At night; pain in eyes <; pain in head <; pains in l. eye; ciliary neuralgia <; cramps in stomach; asth-

matic attacks; titillating cough; attacks of oppression, as if chest was constricted; pains down outside of l. leg from hip to ankle <; pains extending down leg to knee >; sciatic pains <; sleepless on account of pain in l. hip and knee; burning in feet; profuse sweat over whole body.

At 10 P.M.: sudden attacks of neuralgia in l. face.

Before midnight: oppression of chest <.

At 1 and 2 A.M.: pains passing down outside of l. leg from hips to ankle <.

At 4 A.M.: throbbing, boring in region of r. hip, waking him from sleep.

At 6 A.M.: periodical neuralgic colic every morning.

[39] **Temperature and Weather.** Warmth: > l. side of face.

Warm weather: pain in tumor in r. iliac fossa <.

Warm room: ciliary neuralgia >.

Warmth of bed: painful feeling in abdomen >; cutting beneath umbilicus before menses >; dull stitches in region of r. hip >; pains from sacrum along course of sciatic nerve.

Warm drinks: > colic.

Heat: < pain in tumor in r. iliac fossa; > pains down outside of l. leg from hip to ankle; < sciatic pains.

Hot tea: > pain from three inches below navel to pit of stomach.

Hot drinks: > cramplike pain in abdomen.

Open air: neuralgia of l. face >; fluent coryza <; pain in tumor in r. iliac fossa >; constriction in larynx, with oppression of breathing >; cannot walk much on account of weakness and trembling of legs.

From catching cold: left-sided tearing, burning and stinging in face, extending to ear and head; acute gastritis; sudden severe pains in abdomen; rheumatic pains in limbs and joints.

Pain residing in muscular fibres of stomach during the seasons when the air is cold, but the sun still powerful enough to heat the blood, likewise in Summer in consequence of sudden changes in weather.

[40] **Fever.** ▮Chill and coldness of whole body, frequently with heat of face.

▮Skin cool. θLumbago.

Internal coldness with external heat.

▮Chills proceeding from abdomen.

▮Chilliness. θHeadache.

▮Chill and shivering, with pains.

Chilliness with inclination to perspire.

▮Coldness of hands or soles of feet, rest of body warm.

▮Chill and fever. θLumbago.

Digitized by Google

Cold hands with warm feet.
Skin warm and moist. θDysentery.
Partial heat and partial coolness of skin.
Skin hot and dry. θAbortion.
External dry heat.
After chill, intense pain in abdomen, constantly increasing, < from slightest motion or touch, high fever, burning thirst, cheeks and extremities cold. θPeritonitis.
Dry heat over whole body. θHeadache.
Heat of whole body, with full, hard pulse and thirst.
Internal sensation of heat, with external flushes.
Bilious fever, with cardialgia, spasmodic colic, diarrhœic stool.
Fever in evening. θAcute catarrh of bladder.
Perspiration about head. θIschias.
Profuse warm sweat on forehead and neck. θColic.
Profuse sweat over whole body at night, towards morning.
Sweat, at night, smelling like urine, causing itching of skin.
Sweat principally on head and extremities.
Cold perspiration. θCatarrh of colon with colic. θLead colic.

" **Attacks, Periodicity.** Occasionally: pain shooting with lightning-like rapidity from small of back to heels.
Frequent: eructations; constipation; watery discharges from bowels; urging to stool without any evacuations; pressure at anal sphincter; urination; tenesmus vesicæ; attacks of colic during pregnancy; titillating cough at night.
Periodical: headache in l. side of forehead; occurring daily half an hour after rising; pain in r. eye; facial neuralgia; neuralgic colic, every morning at 6; darting from sacro-lumbalis muscle into thigh; exacerbations of pain in r. hip and thigh.
Intermittent: headache, in those of rheumatic, gouty, or nervous diathesis.
At intervals of five or ten minutes: colicky pains about navel <.
At intervals of from five to fifteen minutes: griping > by straining and consequent expulsion of wind and mucus.
Every fifteen minutes: constant cutting at region of fundus of bladder, with discharge of urine; paroxysmal pains down outside of l. leg from hip to ankle.
Every half hour: headache followed by attacks of suffocation and constriction of chest.
Every hour: headache followed by attacks of suffocation and constriction of chest.
Every two hours: paroxysmal pain in abdomen.

Google

Every four or five hours: four or five successive shocks pass suddenly through parts affected by sciatica.
Every two or three days: hard evacuation.
Sudden: stitching pain in forehead towards nose; tenesmus; violent pressure upon bladder.
Transient: stitches in upper jaw frequently recurring; stitches in hepatic region.
Lasting half a minute: colic in lower part of abdomen coming on in spasms.
For thirty minutes: intense itching of erythematous eruption on last day of menses.
Lasting an hour: periodical facial neuralgia and toothache coming three to four times a day; constriction, twisting pains about umbilicus, spreading over whole upper part of abdomen.
Lasting several hours: twitching in lower lid, dazzling before eyes and diplopia.
For a whole day: sensitiveness of head as if compressed.
Lasting all night: sharp pains in abdomen followed by discharge, stools chasing her out of bed.
Lasting 24 hours: shooting, rending pains in l. side of face, between temple, ear and jaw.
Day and night: complaining bitterly; violent shooting or stitching in forehead and eyes, from out in, sometimes lessening for a few minutes, but returning afterwards harder; paraphimosis, violent pains; whining, on account of rheumatic pain in r. hip, calf and knee.
Constant: desire to escape; horrible, gnawing pains in head; tearing pain in head; roaring and throbbing in ears; rumbling and croaking in bowels as from frogs; violent bruised pain in umbilical region in spot as large as hand; inclination to vomit; flow of blood from hemorrhoids for a long time; discharge of mucus from anus; cutting at region of fundus of bladder; sharp, cutting pains during menses; dull, aching, cramplike pain as if in periosteum or dorsum of feet.
Chronic: diarrhœa; catarrh of colon.

[42] **Locality and Direction.** Right: boring stitches in temple > from touch; burning, boring pain in side of forehead; boring and drawing in side of head; side of head, particularly about eye, very sensitive to touch; external strabismus of eye; periodical pain in eye; tearing in eye extending to temple; sharp, cutting stabs as from knives in eyeball; great itching in eyeball; prickling, burning pain in inner canthus; drawing in upper eyelid, or annoying twitching; side of face, temple, ear, eye and sometimes side of neck attacked by tic douloureux; inflammation of hip joint, buttock

Digitized by Google

swollen, joint very sensitive to touch; tearing pain in limb; dull stitches in region of hip; violent, continuous tearing, sticking, burning pains from sacrum along course of sciatic nerve behind great trochanter down as far as knee; severe pain in leg; rheumatic pains in hip radiating thence to calf and knee; pain in thigh; as if psoas magnus was too short; stiffness of muscles of side of thigh; drawing in thigh down to knee, stitching in knee joint; dragging of leg when walking; tumor in iliac fossa; severe stitches in region of ovary, which afterwards becomes a burning pain; pain like a stab in pelvic region; stitching pains in side of chest; drawing in region of scapula; rawness in shoulder blade during repose; tensive stitch pain in loin during inspiration; stitching and cutting in hip, extending down leg to joint, when it becomes a severe tearing; pain in shoulder joint as if bruised; stitches in shoulder towards back; shoulder and elbow joint painful, stiff and swollen; violent drawing in thumb like in tendons, beginning in ball and passing off at hip; tearing and drawing in hip and thigh.

Left: pressing-burning in orbit, temple and nose, on dorsum nasi and in upper teeth; confusion in side of head; pressing-throbbing in temple; pulsation and pressure in temple; tearing, stitching, jerking in side of forehead; inflammation of eye; burning pressure in eye; pressing pain in orbit along dorsum of nose; neuralgia of face, supra and infraorbital regions; shooting to ear and down side of neck; profuse lachrymation; shooting, rending pains in side of face, between temple, ear and jaw; constriction and pressing in malar bone, extending into eye; pains from back of ear to eye and mouth of same side; neuralgia in face from parotid to eye; beating toothache first in one, then in another tooth of side; side of abdomen painful to touch; tenderness over inguinal region; tight, cramplike pain in iliac and inguinal region; cramplike pain in ovarian region; swelling in region of ovary and descending colon; drawing, gnawing pain in ovary extending towards stomach, before menses, menses increased with pain in foot, < before menstruation; stitching pains in sides of chest; violent tensive drawing in cervical muscles; pressure in side of nape; aching in sacro-iliac articulation, with crawling in sole; tearing-drawing in arm to finger joints; tearing in joints of hand; tensive pain in thumb; pains down outside of leg from hip to ankle; pressure at sacro-iliac articulation, with tingling in sole of foot; shooting in knee; lacerating pains run-

Digitized by Google

ning from hip inwardly down to knee; sticking drawing in tibia into ankle bones with burning pressure in eye; drawing aching in foot.

From l. to r.: paroxysmal pains in abdomen; falling asleep of feet.

From out in: pain in forehead and eyes.

From above downward: as if eyeballs were pressed.

43 **Sensations.** As if coryza would appear; as if head was compressed; as if head was being screwed together; as if eye would fall out; as if eyeballs were pressed; as if l. side of face was being torn from r. side; as if tension was made upon nerve of face and skin suddenly relaxed; as if nerves of lower teeth were compressed or stretched; as if tongue was scalded; as if a beard of grain was sticking in velum palati; as of hunger, in stomach; as if a chisel was thrust deep into upper abdomen, thence passing in a curve backward and downward into pelvis and thence cutting its way upward again; as if umbilical region was inflated; as if bowels were pressed inward; as of increasing constriction in bowels; as after taking cold, at umbilicus; as if intestines were being squeezed between stones and would burst; as if knives were cutting in abdomen; as if bowels were in a vise; as if abdominal walls were festering; as of an electric shock darting through whole abdomen to anus; as if a tear had occurred in l. side of abdomen; as of a hernia in groin, and on pressure as if a hernia was receding; as if bowels hung on easily tearing threads; as if taking cold in abdomen; as if anus was weakened by long-continued diarrhœa; as though parts about l. ovarian region were squeezed in a vise; as of a stab in r. pelvic region; as if he was about to smother; as if chest was constricted; as if nerves and vessels in region of r. scapula were made tense; as of a heavy weight in lumbo-dorsal region; as though l. sole was asleep; as if hip joint was fastened by iron clamps; as if femur was fastened to os innominatum with iron claws; as if r. shoulder joint had been bruised; as if muscles in palms of hands were contracted; as though parts about affected hip were screwed in a vise; as if pain was boring deep into bones; as if marrow of bone was being crushed; as if psoas magnus of r. side was too short; as if calves were asleep; as if all his strength was failing.

Pain: from back of l. ear to eye and mouth; during micturition extends all over abdomen; of testicles and spermatic cord; in shoulder blades and back, extending into neck, with tension; in back; in small of back;

Digitized by Google

in upper part of thigh and buttock; in hips from region of kidneys down to upper part of thighs; in legs; in bowels, extending down into the thighs; in l. foot; in palms.

Agonizing pains: in l. eye; during menses.

Lancinating pains: flying all over abdomen; running up back during stool; running up back, with constriction of anus.

Lacerating: running from l. hip inwardly down to knee.

Cutting: extending into head, particularly into forehead; in l. temple; in eye; in ears; from eye up into head and around eye; as from knives, in bowels; in stomach, extending to chest; in bowels, downward; in intestines, coming up into stomach, or extending down into thighs; here and there in abdomen; sharp, in abdomen; darting through whole abdomen to anus; in different parts of chest and abdomen and concentrates in pit of stomach; in umbilical region; in abdomen, extending towards pubic region; flying all over abdomen; during menses; beneath umbilicus, extending towards groins and internal genital organs; before menses; like a stab, in tumor in r. iliac fossa; in abdomen; pains running up back during stool; from umbilical to ovarian region; at region of fundus of bladder.

Sharp, cutting stabs, as from knives, in r. eyeball; in abdomen.

Severe cutting, stitchlike ciliary neuralgia.

Stitches: in forehead above r. eye; in upper jaw; in hepatic region; twisting, from umbilical region towards loins and spine; isolated, deep, apparently connected with ovaries; through bladder; in region of kidneys and loins; alternate, in bladder and rectum; in region of r. ovary; as from a needle, in ovary; in eyes and forehead; in sides with each breath; in cardiac region; in r. shoulder towards back; painful, long, in r. metacarpus, frequently repeated, embarrassing opening of hand and stretching of fingers.

Stitching: in forehead and eyes; in forehead towards nose; in l. side of forehead; in ears; dull, in region of r. hip; in r. or l. side of chest; in small of back; in r. hip, extending down leg to joint; from hip to knee; in r. knee joint.

Tensive stitch pain in r. loin, during inspiration.

Piercing: headache.

Sticking: from eye up into head and around eye; in small of back and anus; from sacrum along course of sciatic nerve, behind great trochanter of r. leg, down as far as knee.

Digitized by Google

Sticking-drawing; along l. tibia into ankle bones.
Pricking: at anus; in ankles, toes and soles of feet.
Prickling: in r. inner canthus; in skin; at anus.
Stinging: in l. side of face, extending to ear and head; in velum palati; in small of back and anus.
Shooting: in forehead and eyes; in l. side of face, between temple, ear and jaw; in stomach, extending to chest; in sacral region; from small of back to heels; in l. knee.
Darting: sharp, paroxysmal, in stomach, before menses; in rectum, alternating with stitches through bladder; in anus; from sacro-lumbalis muscle into thigh.
Flying pains: in hepatic region.
Tearing: in forehead and root of nose; in l. side of forehead; through whole brain; headache; in eye and surroundings; in l. eye; in r. eye, extending to r. temple; in teeth; in cheeks; in l. side of face, extending to ear and head; in different parts of chest and abdomen and concentrates in pit of stomach; in abdomen, extending up to r. mamma; in whole abdomen; in r. knee joint; in joints of l. hand; in r. limb; from sacrum along course of sciatic nerve, behind great trochanter of r. leg down as far as knee; from hip to knee; in r. hip and thigh; in knee; in legs; in all limbs; in skin.
Tearing-drawing: in l. arm down to finger joints.
Tearing-twitching: pains in teeth.
Tensive tearing: of l. side of face.
Rending: in l. side of face between temple, ear and jaw; in abdomen, extending up to r. mamma.
Drawing: in whole brain; in r. side of head and in forehead; in r. upper eyelid; toothache; in whole abdomen; from spine of ilium to inguinal region and upper third of inner surface of thigh; in l. ovary, extending towards stomach, before menses; in nape; internally, in region of r. scapula; in hips; in r. thumb, like in tendons, beginning in ball and passing off at tip; in region of l. hip and r. loin, crest of ilium towards buttocks; in r. hip and thigh; in r. thigh down to knee; in l. foot; in all limbs.
Violent tensive drawing: in l. cervical muscles.
Jerking: in l. side of forehead; in anus; in skin.
Twisting: about umbilicus, spreading over whole upper part of abdomen.
Boring: in r. side of head and in forehead; in abdomen; in ovary; in region of r. hip; in abdomen.
Boring stitches; in r. temple; in r. side of forehead; in anus.
Burrowing: in nose, from l. side to root of nose.
Beating: toothache; from l. side of nose to glabella.

Digitized by Google

Scraping: in throat.
Digging: through whole brain; from l. side of nose to glabella.
Dragging pain: in vagina.
Burning: extending into head, particularly into forehead; in r. side of forehead; on scalp; from eye up into head and around eye; in l. eye; in eye; in r. inner canthus; of eyelids; in l. side of face, extending to ear and head; on anterior surface of tongue; on tip of tongue; of under lip; in stomach; in small of back and anus; in anus; in region of kidneys and loins; in urethra; along whole urethra; in region of r. ovary; along sacrum; from sacrum along course of sciatic nerve, behind great trochanter of r. leg down as far as knee; in feet; in ulcers; in carbuncles; on skin.
Burning pressure: in l. eye.
Cramping: headache; in stomach; from three inches below navel to pit of stomach; pains in l. inguinal region passing around to back; in l. ovarian region; in abdomen; dysmenorrhœal pains; in hip, from kidney to thighs; in affected hip; as if in periosteum or dorsum of feet.
Tight, cramplike pain: in l. iliac and inguinal region.
Cramps: in middle of thigh; in legs; in l. calf; in legs and feet.
Laborlike pains: in course of ureters, extending to upper part of thighs.
Griping: after eating; in epigastrium; sharp, in upper part of abdomen; in umbilical region; in intestines coming up into stomach, or extending down into thighs; in abdomen; commencing at umbilicus and passing down to rectum.
Gnawing pain: in head; in abdomen; in l. ovary extending towards stomach, before menses.
Pinching: in small spot below lower eyelid; sharp, in epigastrium; in abdomen.
Squeezing: in intestines extending into stomach, or down into thighs.
Compressive pain: commencing at umbilicus and passing down to rectum.
Compressive sensation: in forehead; in epigastrium; in throat.
Constriction: of chest; in l. malar bone extending into l. eye; in throat; of stomach; in upper part of abdomen; about umbilicus, spreading over whole upper part of abdomen; in umbilical region after eating; of rectum during stool; of anus during stool; in larynx; of chest; from hip just behind joint into leg.

Google

Pressure: in orbits; in temples; in l. temple; in stomach; cramplike, in pit of stomach; upon sides of abdomen, which spreads towards stomach; upon chest, going upward and spreading about neck; at anal sphincter; sudden upon bladder; in l. side of nape; in l. sacro-iliac articulation.

Pressive pain: in forehead; frontal headache; in eyeballs; in l. orbit along dorsum of nose; in r. eyeball from above and outside.

Pressing: in l. temple; headache; in l. malar bone extending into l. eye; from hip just behind joint into leg; in orbits near root of nose, with confusion in head and chilliness.

Oppression: of chest.

Ulcerative pain: in bowels.

Excoriating pain: in anus.

Rheumatic pains: through arms; "which seem to be in the bone," in r. hip, radiating thence to calf and knee; in limbs and joints after catching cold.

Colicky pains: in bowels; around navel; after vexation; in abdomen; along colon; during menses.

Tensive pain: in forehead; in ovary; in l. thumb.

Tension: in region of anterior superior spines of ilium.

Bruised pain: in umbilical region, in spot as large as hand.

Sore pain: in r. shoulder and elbow joint and finger joints of both hands; in ankles, toes and soles of both feet.

Smarting: on scalp; in eyes; in skin.

Aching: in forehead; from eye back into head; in ears; in small spot below lower eyelid extremely tiresome; in region of l. sacro-iliac articulation; dull, as if in periosteum or dorsum of feet; in l. foot.

Throbbing: in l. temple; in ears, especially in l.; pains in teeth; in nose, from l. side to root of nose; dull, in region of l. hip and r. loin, crest of ilium towards buttock; in region of r. hip.

Palpitating pains: in l. eye.

Pulsation: in l. temple; in ears; in abdomen.

Twitching: in r. upper eyelid; toothache; in region of l. hip, r. loin, crest of ilium towards buttock.

Stiffness: in muscles of nape on moving head; of hands; of l. knee joint; of muscles of r. side of thigh; of knees; of joints.

Rawness: in throat; in r. shoulder blade.

Irritation: in larynx.

Shuddering: from abdomen over body.

Confusion: in frontal region; of l. side of head; of forehead.

Digitized by Google

Dulness: of head.
Painful weariness: in small of back.
Heaviness: of forehead; of lower limbs; of limbs.
Fulness: in epigastric region.
Emptiness: in stomach.
Tingling: in sole of l. foot.
Crawling: in ears; in l. sole; in skin.
Formication: in affected parts; in skin.
Falling asleep: of feet and knee joints.
Tickling: in larynx: in throat.
Itching: in r. eyeball; in ears; of orifice of urethra; of erythematous eruption on last day of menses; of skin; of ulcers.
Roughness: of tongue as from sand in throat.
Dry feeling: in eyes; in mouth; of throat.
Heat: in face and forehead, followed by tiresome aching, pinching pain in small spot below lower eyelid; in vagina; in nape of neck; in head.
Coldness: in knees; of feet; of hands.

" **Tissues.** Inflammation, or colic which comes on in consequence of violent indignation.
Trigeminus affected, causing toothache and hemicrania.
Seldom indicated in rheumatism, is, however, useful in rheumatoid pains or pains along course of sciatic nerve, from reflex nervous action, during or after an attack of rheumatism.
Rheumatic and arthritic conditions; coxalgia.
‖Unusual inclination of muscles of all parts of body to become painfully cramped.
‖Œdema.
Dropsy after scarlet fever.
Indicated in some cases of very painful cancer.
‖Emaciation. θLumbago. θChronic diarrhœa.

" **Touch. Passive Motion. Injuries.** Touch: boring stitches in r. temple >; scalp painful to; right side of head, particularly about eye, very sensitive to; pains in r. eye <; l. side of face <; pit of stomach very sensitive to; epigastrium and abdomen excessively painful and sensitive to; swelling in region of l. ovary and descending colon, parts very sensitive to; epigastrium and abdomen painful to; r. hip joint very sensitive to; pains down outside of l. leg from hip to ankle, parts very painful to; sciatic pains, parts tender to; after chill intense pain in abdomen < from slightest.
Stomach so sensitive that lightest covering cannot be endured.
Putting fingers into ear: crawling, itching, stitching, cutting or aching in ears >.

Digitized by Google

Wiping with finger: pressing pains on r. eyeball <.
Rubbing: great itching in r. eyeball compels; sciatic pains <; pains down outside of l. leg from hip to ankle >.
Pressure: pains extending from eye into head > by firm; ciliary neuralgia >; pains from different parts of chest and abdomen concentrating in pit of stomach > by hard; pain from three inches below navel to pit of stomach >; pinching and cutting in abdomen >; sensation in groin as if a hernia was receding on; tight, cramplike pain in l. iliac and inguinal region < after, not during, external; lead colic, pains at beginning of attack >, later <; cramplike pain in abdomen >; sharp, darting, paroxysmal pains in stomach >; over posterior spinous processes of all cervical and first four dorsal vertebræ great tenderness on; on spinous processes of first three cervical vertebræ brings on or < neuralgic attack; pains in shoulder on; over sciatic nerve, tenderness on.
Colic so distressing that they seek relief by pressing corner of table or head of bedpost against abdomen.
Carrying on stomach: colic of child >.

[46] **Skin.** Dryness and heat of skin.
Itching: prickling; crawling; formication.
Burning, jerking, tearing pain.
Smarting, itching, followed by perspiration.
Herpes (scabby) on face.
Itchlike eruptions.
Itching, burning ulcers.
Carbuncles, with continuous burning pain.
Boils on neck and face.
‖ Desquamation over whole body.
Corns.

[47] **Stages of Life, Constitution.** Blonde persons.
Persons subject to violent attacks of cramp colic from fruit, lead poisoning or excessive venery.
Rheumatic or gouty rheumatic diathesis.
‖ Neuralgia of the small branches of the infraorbital nerves, in plethoric, choleric, irritable men, from 40 to 50 years of age, and disposed to hemorrhoidal and gouty affections and to congestions towards head; most frequent cause was vexation, but sometimes too close application to business; but once produced, this neuralgia was apt to recur many days successively at same hour, in forenoon.
Boy, æt. 4, feeble constitution, suffering frequently from constipation; paralysis of rectum.
Boy, æt. 13; violent headache for ninety hours.

Digitized by Google

Boy, æt. 13, after catching cold; rheumatism.
Minna G., æt. 17, had begun to menstruate; ischias.
A young countryman, æt. 18, had suffered for several weeks; rheumatic sciatica.
Servant girl, æt. about 23, healthy complexion, intelligent appearance; neuralgia of l. face.
Miss W. B., æt. about 20, after taking cold; acute gastritis.
Miss C., æt. 23; dysentery.
Mrs. L., æt. 24, fond of tea and coffee, of a venous, hemorrhoidal temperament, yellow complexion, inclined to hysterical affections, subject to cramps in stomach and pain in back, and suffering under stoppage of menses; neuralgia of solar plexus.
Young woman, æt. 25, suffering for five years; ovarian tumor.
Girl, æt. 26; scrofulous during childhood, not well developed; headache.
Woman, æt. 26, in sixth week of lactation, in consequence of catching cold; colic.
Man, æt. 27; ischias.
Woman, æt. 27, with amenorrhœa and chronic disposition to vomit; faceache.
M. E., æt. 28; diarrhœa.
W., æt. 29, well built, choleric-phlegmatic temperament, accustomed to much traveling; headache.
Woman, æt. 30, abortion at fourth month, followed by suppression of lochia.
Girl, æt. 30, tall, slender and healthy, although somewhat pale and emaciated in consequence of former abdominal troubles.
Woman, wife of an apothecary, suffered for fourteen months under unsuccessful allopathic treatment; chronic morning diarrhœa.
Girl, æt. 33, lively disposition; colic before appearance of menses.
Man, æt. 34, suffering for eight days from periodical recurrence of pain in r. eye; rheumatic inflammation of eye.
Mrs. ——, æt. 37, in consequence of taking cold; peritonitis.
Man, æt. 38; colic from vexation.
Mrs. C. E. H., æt. about 38, always been in good health, married ten years; never pregnant; ovarian tumor.
Man, æt. 40, after catching cold and heavy lifting; coxalgia.
Potter, æt. 40, had rheumatism and lead colic, suffering all Winter and Spring; lumbago.
Mrs. ——, a lady, æt. about 40, had been for two or three years suffering from chronic diarrhœa, nervous prostration and general debility; the result of mental overexertion.

Digitized by Google

Military man, æt. 40, suffering for nine months; allopathic treatment without result; coxalgia.

Woman, æt. 44, mild disposition, short in build; after having fallen twice; inflammation about the abdomen.

P. L., æt. 55, always been in good health until within four or five years, since when he has been suffering from piles; ischias.

Woman, æt. 56, suffering from gastralgia and gout, followed by inflammation of eyes; choleric temperament, venous, hemorrhoidal constitution; choroiditis.

Man, æt. 56, sanguine-choleric temperament, has been suffering for twenty years from attacks of colic.

Man, æt. 59, active; sciatica.

Man, æt. 60, otherwise healthy; faceache.

The wife of a custom clerk, æt. 64, had suffered for two years; ischias.

Woman, æt. 78, subject to attacks of vertigo for one year, otherwise healthy; dysentery.

[48] **Relations.** Antidoted by: *Camphor.*, *Caustic.*, *Chamom.*, *Coffea*, *Opium*, *Staphis.*

Large doses are counteracted by tepid milk, infusion of galls, *Camphor.* and *Opium.*

It antidotes: *Caustic.*, *Magnes.*

Compatible: *Coloc.* in alternation with *Staphis.* cured ovarian pains; after *Chamom.* in abdominal pains and first stage of cholera.

Complementary: *Mercur.* in dysentery with much tenesmus.

Compare: *Act. rac.*, *Arnic.*, *Bellad.*, *Bryon.* (closest analogue), *Canthar.*, *Caustic.*, *Chamom.*, *Chelid.*, *Cinchon.*, (beer intoxicates easily), *Coccul.*, *Coffea*, *Digit.*, *Gambog.*, *Lycop.*, *Mercur.*, *Nux vom.*, *Plumbum* (inclination to assume strange attitudes in bed), *Pulsat.*, *Staphis.* (anger with vexation, abdominal pains, neuralgia, etc.), *Veratr.*

COMOCLADIA DENTATA.

Guao. *Anacardiaceæ.*

A very common tree in the island of Cuba, where it is found growing near the coast, luxuriating mostly on barren or stony soils. It is from six to eight feet high, having beautiful dark green leaves, with a brownish border. The flowers are small, bluish-brown, and clustered like grapes. The trunk and branches contain a milky fluid that turns black on exposure to sunlight, discoloring the skin, linen, etc. A suspicion is entertained that death results from sleeping in its shade. —Hom. Pharmacopœia.

This arrangement includes the principal symptoms of J. Hyde's excellent proving published in A. O., vol. 13, p. 593, 1876, not out in time for vol. 3 of the Encyclopedia.

[2] **Sensorium.** Dizziness and heaviness of head, with shooting pains, > from motion.

Giddiness on rising from bed; everything looks dark; motion > all pains in head, < from heat.

[3] **Inner Head.** Dull aching in forehead.

Shooting pains through l. temple.

Severe pain at intervals from posterior portion of eyeballs to occipital protuberance.

Head < near warm stove, and when stooping it is almost impossible to hold the head down, > in open air.

[4] **Outer Head.** Corrosive itching of head, with shooting pains, > by movement.

[5] **Sight and Eyes.** On rising from bed, everything looks dark.

[1] Face most dreadfully swollen, eyes project far out of sockets, can see but a faint glimmer of light with left.

Sees from r. eye a red ring around light of lamp, which disappears on closing eye.

[1] Eyes feel very heavy, larger than usual, painful and pressing out of head, as if something was pressing on top of eyeballs, moving then downward and outward.

Digitized by Google

Aching soreness of eyeballs, which feel heavy and too large.
‖Right eye very painful, feeling much larger and more protruded than left.
‖Right eyeball very sore, < on moving eye.
Severe pains through eyeballs, extending to occiput.
‖Eyeballs feel < on moving them.
‖Catarrhal ophthalmia.
Erysipelatous inflammation of tissues in and around eye.
‖Ciliary neuralgia from asthenopia and chronic iritis.
‖Eyes more painful near warm stove, with profuse lachrymation.

[6] **Hearing and Ears.** Heat and fulness in interior of r. ear.
‖Left ear all cracked and desquamating a substance like powdered starch.

[7] **Smell and Nose.** Intolerable itching of nose.

[8] **Upper Face.** Burning on face and eyes, < towards evening.
‖Painful burning on face, particularly about eyes.
Excessive swelling of face, with tormenting itching and swelling.
Heat and sense of fulness in face over superior maxillary bone, and sensation as of a pimple over r. antrum.
‖Left side of face swollen; l. ear all cracked and desquamating a substance like powdered starch.
‖Very great swelling of face.

[9] **Lower Face.** Lower lip blistered and swollen.

[10] **Teeth and Gums.** Sensation as if molar teeth on r. side were loose.
Sensation as if tooth was drawing out of its socket.
Aching pains in teeth.
‖Second molar tooth r. side carious; pain commences in it at 4.30 to 5 P.M.; at times shoots down in line with larynx, leaving sore track; pain < in bed, > from external warmth and pressure.
Pains in teeth > by pressure.
When toothache stops, head feels large.
Inflammation of gums of lower jaw.

[11] **Taste and Tongue.** Tongue coated dirty yellow.

[12] **Inner Mouth.** Mouth dry.

[16] **Hiccough, Belching, Nausea and Vomiting.** Sour eructations two hours after eating.
Sickness of stomach.

[17] **Scrobiculum and Stomach.** Pressure and heaviness in region of stomach.

[19] **Abdomen.** Abdomen feels swollen.
Dull pain, gurgling and uneasiness in intestines in hypogastric region, with emission of odorless flatus.

Digitized by Google

Acute sore pains extending across abdomen above umbilicus, affecting the breathing.
Dull pain in abdomen, clothes too tight.
A pale red flush, as if an eruption would make its appearance across abdomen.

[20] **Stool and Rectum.** Severe flatulent pain in abdomen, preceding and during a diarrhœic stool; followed by a feeling of weakness and perspiration on face and neck.

[22] **Male Sexual Organs.** Intense itching on lower part of penis, also on inner side of prepuce.
Continued tingling, itching of scrotum during night.

[26] **Respiration.** Oppression of breathing.
Oppression of breath on account of sharp pains in l. side.

[27] **Cough.** Spasmodic dry cough at night, with tickling in throat and constant dull pain under l. nipple, extending through to l. scapula.
Rheumatic and pleurodynic pain in chest.
Titillating cough; hacking cough in daytime.

[28] **Inner Chest and Lungs.** Cannot draw a long breath on account of sharp pain felt at centre of thorax on l. side.
Soreness in l. lung, such as is felt during convalescence from pneumonia.
Rheumatic and pleurodynic pains in chest; pain under l. nipple through to scapula.
Constant pain across chest.

[30] **Outer Chest.** Drawing in r. anterior wall of chest.
Drawing, cramping in r. anterior of chest and axilla, extending down arm to fingers, jerking of little finger.
Acute sharp pains in l. mammary gland, about one inch above nipple and leaves a burning sensation; it goes to r. side and down r. arm.
Intermitting, throbbing, pressing pain in costal cartilage of fifth rib, r. side, leaving a burning, raw sensation, < during rest.
Sloughing ulcer on r. breast.

[31] **Neck and Back.** On moving head, sense of fulness, rigidity and lameness of muscles of neck.
Rheumatic pains and stitches in back; stitches leave a burning.

[32] **Upper Limbs.** Sharp pain through r. shoulder to scapula.
Painful burning on arms.
Crampy sensation in muscles of r. upper arm.
Numb, tensive pain in forearm, and rheumatic stiffness of shoulders and elbow joints.
Drawing, aching in forearm.
Drawing, cramping in fingers.
Frequent rheumatic pains in hands, arms and legs.
Vesicular eruption on arms and hands.

Digitized by Google

Intermittent, pressing outward pain in l. sacro-iliac articulation, sensitive to pressure, > by walking, but feels lame and sore.
Pulsating pain in neck of r. femur and in r. thigh.
Severe pains in both knees; pressing down to feet on inside of legs.
Drawing in r. knee, extending into anterior muscles of thigh.
Drawing, cramping in hollow of r. foot, passing along outer border of gastrocnemius muscle to knee, then in tibia, where it becomes a numb aching, then in tarsus, where it becomes a drawing-aching, as if foot would cramp.
Lameness and loss of strength in l. ankle.
Crampy lameness in r. leg, above instep, > by walking.
Inflammation of l. leg and foot, with violent fever; the swelling increased enormously when the pain subsided; the skin became white and covered with thin scales, cracked and discharged a sanious fluid.
Vesicular eruption on legs changing to pustules, and sometimes to deep, unhealthy ulcers.
Indolent ulcer of six years' standing, on lower third of r. leg, near external malleolus, of irregular shape and hard edges; the ulcer was deep and discharged a sanious, fetid pus.
Herpes on legs.

[84] **Limbs in General.** Lame, aching pain in r. upper arm; in r. knee.

[85] **Rest. Position. Motion.** Rest: pain in costal cartilage of fifth rib <; rheumatic pains and swellings worse.
In bed: pain in second molar of r. side worse.
Motion: dizziness and heaviness of head, with shooting pains >; all pains in head >; rheumatic pains and swellings > by continued.
On moving head: sense of fulness, rigidity and lameness of muscles of neck.
On moving eyes: r. eyeball very sore; eyeballs worse.
On rising from bed; giddiness; everything looks dark.
Stooping: almost impossible to hold head down.
Walking: intermittent, pressing outward pain in l. sacro-iliac articulation >; crampy lameness in r. leg above instep better.

[87] **Sleep.** Dreamy, refreshing sleep, with pleasant dreams, almost clairvoyant.

[88] **Time.** During day: hacking cough.
4.30 to 5 P.M.: pain commences in second molar tooth of r. side.
Towards evening: burning on face and eyes worse.

Digitized by Google

Night: continued tingling, itching of scrotum during; spasmodic dry cough with tickling in throat and constant dull pain under l. nipple extending through to l. scapula.

[39] **Temperature and Weather.** Heat: < pains in head.
Warm stove: head <; eyes more painful.
Warmth: pain in second molar of r. side > by external.
Open air: head >.

[40] **Fever.** Violent fever. θInflammation of l. leg and foot.
Sense of weakness, with heat and perspiration of face and neck.

[41] **Attacks, Periodicity.** Frequent: rheumatic pains in hands, arms and legs.
Constant: pressure and heaviness in region of stomach; dull pain under l. nipple, extending into l. scapula; pain across chest.
Of six years' standing: indolent ulcer on r. leg, near external malleolus.

[42] **Locality and Direction.** Right: sees a red ring around light of lamp; eye very painful, feeling much larger and more protruded than l.; eyeball very sore; heat and fulness in interior of ear; as of a pimple over antrum; as if molar teeth were loose; second molar tooth carious; drawing in anterior wall of chest; drawing-cramping in anterior of chest and axilla, extending down arm to fingers, jerking of little finger; intermitting, throbbing, pressing pain in costal cartilage of fifth rib, leaving a burning, raw sensation; sloughing ulcer on breast; sharp pain through shoulder to scapula; crampy sensation in muscles of upper arm; pulsating pain in neck of femur and thigh; drawing in knee, extending into anterior muscles of thigh; drawing-cramping in hollow of foot passing along outer border of gastrocnemius muscle to knee, then in tibia, where it becomes a numb aching, then in tarsus, where it becomes a drawing aching, as if foot would cramp; crampy lameness in leg above instep; indolent ulcer on lower third of leg near external malleolus; lame, aching pain in upper arm, in knee.
Left: shooting pains through temple; can see but a faint glimmer of light with eye; ear cracked and desquamating a substance like powdered starch; side of face swollen; sharp pains in side oppressing breathing; constant dull pain under nipple extending through to scapula; sharp pain at centre of thorax on side; soreness in lung; acute sharp pain in mammary gland about one inch above nipple and leaves a burning sensation, it goes to r. side and down r. arm; intermittent,

Google

pressing outward pain in sacro-iliac articulation; lameness and loss of strength in ankle; inflammation of leg and foot, skin white and covered with scales, cracked and discharging a sanious fluid.

[43] **Sensations.** As if eyes were larger than usual; as if something was pressing on top of eyeballs, moving them downward and outward; as if eyeballs were too large; as if r. eyeball was much larger and more protruded than l.; as of a pimple over r. antrum; as if molar teeth on r. side were loose; as if tooth was drawing out of socket; as if head was large, after toothache; as if abdomen was swollen; as if foot would cramp.

Pain: at intervals from posterior portion of eyeballs to occipital protuberance; in eyes; in second molar tooth of r. side, shoots down in line with larynx, leaving sore track; in teeth; dull, in intestines and hypogastric region; dull, in abdomen; sharp, in l. side, oppressing breathing; dull, under l. nipple extending through to l. scapula; sharp, in centre of thorax on l. side; acute, sharp, in l. mammary gland about one inch above nipple, and leaves a burning sensation, it goes to r. side and down r. arm; sharp, through r. shoulder to scapula; severe in both knees.

Stitches: in back, leaving a burning.

Shooting pains: in head; through l. temple.

Drawing: in r. anterior wall of chest and axilla, extending down arm to fingers; in forearm; in fingers; in r. knee, extending into anterior muscles of thigh; in hollow of r. foot, passing along outer border of gastrocnemius muscle to knee, then in tibia, then in tarsus.

Throbbing pain: in costal cartilage of fifth rib, r. side, leaving a burning, raw sensation.

Burning: on face and eyes; painful, on face and arms, and particularly about eyes; about one inch above l. nipple; in costal cartilage of fifth rib, r. side; in back; painful, on arms; over whole body.

Numb, tensive pain: of forearm, and rheumatic stiffness of shoulders and elbow joints.

Pressing pain: in costal cartilage of fifth rib, r. side, leaving a burning, raw sensation.

Cramping: in r. anterior of chest and axilla, extending down arm to fingers; in muscles of r. upper arm; in fingers; in hollow of r. foot passing along outer border of gastrocnemius muscle to knee, then in tibia, then in tarsus.

Acute sore pains: extending across abdomen above umbilicus, affecting breathing.

Aching soreness: of eyeballs.

Digitized by Google

Soreness: of r. eyeball; in l. lung.
Rheumatic pains: in chest; in back; in hands, arms and legs.
Pleurodynic pains: in chest.
Aching: dull, in forehead; in teeth; in forearm; numb, in tibia; in tarsus; in r. upper arm; in r. knee.
Pressure: constant, in region of stomach.
Pressing: down to feet on inside of legs.
Intermittent, pressing outward pain: in l. sacro-iliac articulation, > by walking, but feels lame and sore.
Crampy lameness: in r. leg above instep.
Lameness: in l. ankle; in r. upper arm; in r. knee.
Pulsating pain: in neck of r. femur and thigh.
Raw sensation: in costal cartilage of fifth rib, r. side.
Tingling: of scrotum.
Heaviness: of head; of eyes; of eyeballs; in region of stomach.
Fulness: in interior of r. ear; in face over superior maxillary bone; of head on moving head.
Itching: corrosive, of head; intolerable, of nose; excessive swelling of face with tormenting; intense, on lower part of penis, also on inner side of prepuce; of scrotum; tormenting, over whole body.
Tickling: in throat.
Heat: in interior of r. ear; in face over superior maxillary bone.

" **Tissues.** Rheumatic pains and swellings, < by rest, > by continued motion.
Affects the skin in a marked degree.

" **Touch. Passive Motion. Injuries.** Pressure: > pain in second molar of r. side; pains in teeth >; pressing outward pain in l. sacro-iliac articulation, sensitive to.

" **Skin.** ‖Tormenting itching and burning over whole body.
Painful burning on face and arms; face enormously swollen.
Violent itching burning, redness and erysipelatous swelling of face, hands and other parts of body, followed by yellow vesication and desquamation of cuticle.
‖Red color all over body, resembling scarlet fever.
‖Skin white and covered with shiny scales; cracked and discharged sanious fluid. θInflammation leg and foot.
‖Inflammation of the part, with deep, hard-edged ulcers, which discharge a thick, purulent, greenish-yellow matter, having a very peculiar, fetid smell, parts becoming in appearance similar to a piece of raw, decayed meat, while surrounding skin is covered with small shining scales.
‖Malignant erysipelas; herpes; zona; leprosy.

[47] **Stages of Life, Constitution.** Miss H., æt. 17, a student, dark, thin hair, blue eyes, fair complexion, mixed temperament; toothache.

Mrs. C., æt. 25, mother of one child, auburn hair, fair complexion, blue eyes, nervo-sanguine temperament; neuralgic pains in costal region, r. side.

Lady, æt. 38, sloughing ulcer of breast.

[48] **Relations.** Compare: *Anac., Rhus tox., Rhus rad., Rhus ven.*

CONIUM MACULATUM.

Spotted, or Poison Hemlock. *Umbelliferæ.*

A native of Europe, but naturalized in the United States. The active principle is Conia, a yellowish, oily, transparent fluid, lighter than water, of an acrid, nauseous, tobacco-like taste. It is very volatile; slightly soluble in water; its combinations with acids do not easily crystallize, and are very soluble and poisonous. It was known in ancient times, but not used until recently as an internal medicine. It was employed in the execution of political offenders, and was the means of Socrates' death. Dioscorides recommended the dried plant to be applied upon the genitals, to remedy noctural pollutions, and upon the breasts of girls, to prevent their development. Pliny and Avicenna recommended poultices of it to remove tumors of breasts and testes, and to suppress the secretion of milk.

Proved by Hahnemann and his provers; see Encyclopedia, vol. 3, p. 519.

[1] **Mind.** Obtuseness of all the senses; unconsciousness; wandering about as if half asleep.

Extremely insensible.

Weak memory. θVertigo.

Memory enfeebled, likewise the power of correctly expressing one's self; difficult comprehension.

Forgetfulness; excessive difficulty of recollecting things, particularly dates.

Dulness, like stupefaction, difficulty in understanding what he reads.

Inability to sustain any mental effort.

Tired, weary sensation in brain, with physical as well as nervous prostration.

Sensation in forehead or front part of brain like an inability to fix the mind on any subject; loses hold of the idea and gets confused.

Buried in thought; apprehensive respecting the present or future.

Insanity of a periodical or alternating type.

Imbecility more frequent than insanity.

Inclined to cry, sobs aloud when alone.

Digitized by Google

Likes to wear his best clothes, makes useless purchases, cares very little for things, wastes or ruins them; does not want to work, prefers to play.

Picks his nose, which bleeds easily; or picks his fingers; lies in bed most of the time; does not like to answer questions.

Involuntary laughing and weeping.

Dislike to society and yet a dread to be alone. θHysteria.

He is averse to being near people, and to the talk of those passing him; is inclined to seize hold of and abuse them.

Patient averse to talking, dressing himself, taking food or seeing her children; spleen enlarged. θMelancholia.

Disinclination for business.

Mood serious; unsympathizing, from indolence.

Complete indifference; takes no interest in anything, particularly walking in open air. θHypochondriasis.

Great depression of spirits preceding menstrual period.

Alternate fits of silent depression and quarrelsome liveliness. θMania.

Sad and gloomy for days, then excited.

Great unhappiness of mind, recurring every fourteen days.

Easily disturbed by trifles, moved to tears; anxious.

Solicitude concerning the future; great concern about any little thing that may happen.

Hypochondriasis and hysteria from suppression of, or too free indulgence in, sexual instinct, with lowspiritedness, anxiety and sadness.

Hypochondriasis with suppression of menses.

Great anxiety; præcordial anguish; superstitious and full of fear, with frequent thoughts of death; loss of memory.

Discouraged, despondent, and dissatisfied with herself and her surroundings.

Timid, cannot be persuaded to work; want of proper will.

Irritable, gets out of temper easily, and then his sight gets blurred, and face becomes pale. θAnæmia of brain.

Very ill-humored in afternoon, from 5 to 6, as though a great grief weighed upon him, with paralyzed feeling in all the limbs, indifference and taking no interest in anything.

Morose mood; everything about him impresses him unpleasantly.

She feels peevish, vexed and easily put out about trifles.

Very much excited, passionate, domineering, quarrelsome, scolds and will not bear contradiction.

Inclination to start, as with fright.

Cannot endure any kind of excitement, it brings on physical and mental depression, with weakness.

Ailments from grief.

Digitized by Google

Worse when idle.

[2] **Sensorium.** ‖Delirium and unconsciousness.

Continued stupefaction, with constant inclination to sleep.

‖Confused feeling in head, often sits lost in thought.

‖Constant confusion in forehead in region of eyebrows and root of nose.

Dizziness and whirling sensation in head.

Vertigo and pressure in head with unaltered pulse.

‖Cannot count up anything; vertigo, < from stooping. θUterine disorder.

Vertigo: each time when turning the head; like turning in a circle; on rising from a seat; worse when lying down, as though the bed was turning in a circle; when turning in bed or when looking around; from motion downward; when walking; with inclination to fall sideways; with black spots before eyes; from smallest quantity of spirituous liquors; depending upon paresis of third pair.

‖The slightest spirituous drink intoxicates him.

Patient wishes to keep the head perfectly still.

[3] **Inner Head.** Brain sensitive to noise.

Painful sensation of looseness (lockerheit) in head when shaking head.

‖Heaviness in head.

Sensation of a large, heavy lump in brain.

Cracking in head, wakens from siesta with fright and a start.

Stitching pain from within outward, in forehead, mornings, or at noon.

‖Pain sometimes shoots over to front of head, with sensation as if something like a fringe was falling down over eyes. θUterine disorder.

Darting, tearing pains, chiefly in forehead and vertex.

‖Throbbing from forehead to occiput.

When shaking head, feels a pain from brow to occiput, as if something had become detached.

Stupefying headache, first in forepart of head, later in back part, with coryza, < by open air, > by moving head and while stooping.

Tearing in temples and sides of head, with sensation as if brain had gone to sleep, < by contact, motion, after eating, and by a recumbent position, or while stooping.

Tightness of head as if both temples were compressed, after a meal.

‖Stitches in top of head.

‖Scorching on top of head; hot spots on back of head, > by going out into open air, and by cold water, < from excitement or overwork. θUterine disorder.

Digitized by Google

‖Lancinating pains, especially in vertex.
‖After overstudy: feeling at times of a foreign body under skull, in vertex; > during reading, < after; < on going to sleep, or from excitement or thinking of pain; > by touch; relief during reading seems to rise from diversion of mind from the pain; clicking noise in l. vertex on walking and during stool; also in occiput on walking, especially in evening when tired.
‖Pain in occiput, with every pulse, as if pierced with a knife.
‖Heaviness in occiput on bending head forward; vertigo.
‖Sensation in r. half of brain as of a large foreign body.
Semilateral, gradually increasing headache, as if the head had been bruised, and as if a load was pressing down on it; this sensation is increased by moving head towards affected side.
One-sided headache, with nausea.
‖Numbness, with sensation of coldness one side of head.
‖Tearing in head, must lie down; one-sided.
Griping and heavy fulness alternately in various parts of forehead; this sensation seems to come from stomach, at same time brain so sensitive that it is painfully shaken even by a slight noise or conversation.
Stupefying headache in outer part of head.
‖Headache as if head was too full and would burst; morning when awaking.
‖Tearing headache, with nausea.
Headache early in morning, as if head had been bruised by blows, or would fall to pieces.
Headache, with nausea and vomiting of mucus.
‖‖Sick headaches, with inability to urinate; great giddiness, < lying in bed, when everything in room seems to go round.
‖Chronic stitching headache.
‖Headache: caused by too small but frequent stools, with tenesmus; with pains all over chest; during violent coughing fits; < from least noise, during motion and from a sudden jar or shock.
‖Congestion to head, with catarrhal sensation and heat of face.
‖Hydrocephalus: pains < when awaking, after eating, in open air; > by external pressure, lying down, and closing eyes.
‖Inflammation of brain in children.

[4] **Outer Head.** Falling off of hair.
Impetigo capitis.

[5] **Sight and Eyes.** Optical illusions in dark or prismatic colors.

Digitized by Google

‖‖Objects look red; rainbow colored; striped, confused spots.
‖Black spots before eyes with vertigo. θDysentery.
Dark points and colored bands before eyes.
Flickering before eyes.
‖Sensation as if something like a fringe was falling over eyes.
‖Double vision.
‖‖Weakness of sight; amaurosis.
‖Shortsighted; asthenopia.
‖Cannot read long without letters running together; burning pain deep in eyes, with hot flushes, cannot bear either light or heat; < in a warm room; > in mornings and on a cloudy day; black spots are seen on closing eyes; distant objects appear more distant; objects are surrounded by prismatic colors out of doors; eyes perfectly normal in appearance; asthenopia.
Feeling of coldness in eyes, when walking in open air.
‖Sluggish adaptation of eye to varied range of vision.
‖Near objects are seen indistinctly.
‖Vision becomes blurred when he is irritable. θAnæmia of brain.
Vision good for fixed objects, but when put in motion before eyes, there are a haze and dull vision, producing vertigo.
Cannot bear bright light or heat.
‖‖Weakness and dazzling of eyes, together with dizziness, and debility, especially of arms and legs; on walking, staggering as if drunk.
Tremulous look as if eyes were trembling.
In room, eyes are dazzled by light of day.
‖‖Aversion to light, without inflammation of eyes.
‖Intense photophobia of both eyes, with which were associated particulary in l. eye, redness of sclerotic, dimness of cornea, swelling and redness of eyelids, great increase of secretion of mucus and tears; scrofulous constitution.
‖Photophobia, with profuse flow of tears when eyes are forcibly opened; very slight or no redness; pains < at night and in any light; > in a dark room and by pressure.
‖Severe photophobia and lachrymation; borders of eyelids red and swollen; ulcers on cornea near sclerotic where there is great vascularity; catamenia irregular.
‖Photophobia of strumous ophthalmia.
‖Conjunctival vessels injected from inner canthus of eye to margin of cornea, which appears dull and depressed in centre; pressing pain in eyeball; < from light; sensation as if eyeball was swollen; swelling of cheek and

Digitized by Google

lids of affected side; twitchings; lachrymation; ulcers; tearing pain in r. side of head. θTraumatic inflammation.

‖Keratitis punctata, with great photophobia.

‖Pupils dilated.

‖Cataract from contusion; grey cataract.

‖Scrofulous ophthalmia; sluggish cases, not much injection but excessive photophobia.

‖Inflammatory conditions of cornea (ulcers and pustules), especially if inflammation is superficial, involving only the epithelial layers, and whether caused by an injury, cold, or more frequently, a scrofulous diathesis.

‖‖Ulcers on cornea, r. to left.

‖Right eye bloodshot; aches on lying down to sleep; agglutination in morning, also lachrymation.

‖‖Burning of eyes.

Drawing pain with redness in eyes.

‖Eyes feel as if pulled outward from nose (external rectus muscle); photophobia; vertical pain in head, < in open air; must often leave school on account of a sensation of overpowering giddiness coming over her; farsighted.

Pressure in eyes as from a grain of sand; < in forenoon, with inflammation and redness of white of eye, and smarting tears.

Feeling of pressure in eyes when reading, writing, or doing any fine work; photophobia.

‖Shooting, smarting, itching in inner canthus, with lachrymation.

Pressure in outer canthus, as from a grain of sand.

Partially paralyzed condition of external muscles of eye.

Discharge of mucus or pus rarely profuse and intimately mixed with tears.

‖Induration of lids; ptosis.

‖Upper lids swollen to such an extent as to completely cover the lower ones, swelling also extends above eyebrows; lids pale red, shining, with a doughy feel and sensitive to slightest touch; margin of lids bluish-red and indurated; on attempting to open lids, the puffed, dark red conjunctiva palpebrarum tilts forward in a swollen mass; conjunctiva oculi not much inflamed; cornea clear; great photophobia; discharge of thin yellow pus; lachrymation; burning, stinging pain, < at night; patient scrofulous.

‖Lids only opened with great difficulty, and when done, a flood of hot tears spurts out.

‖‖Could scarcely raise eyelids, they seemed pressed down by a heavy weight; disposed to fall asleep.

‖‖Burning on inner surface of lids.

Digitized by Google

Lids glued up in morning.
‖Hordeola where the trouble recurs; several hordeola become indurated, and on occasion inflame again.
‖Blennorrhœa of lachrymal sac.
‖Itching below eyes and smarting, burning when rubbing them.
‖Eyes have a leaden hue. θMorning sickness.
‖Paralysis of optic nerve; amaurosis.
‖Hyperæsthesia of retina.
‖Paralysis of muscles.

[6] **Hearing and Ears.** ‖Painful sensitiveness of hearing; noise startles, deafness follows.
‖Ringing, singing, humming, buzzing and roaring in ears.
Tingling in ears.
‖Obstruction of ears; feel stopped up, when blowing nose.
‖Hardness of hearing.
In inner ear, sharp shocks from within outward when swallowing, and piercing pains and aching; painful tension behind ear, and piercing pains in mastoid process.
‖Drawing stitching in ear from within outward.
‖Tearing and stitching in and about ears.
‖Pinching pain in r. ear. θUterine disorder
‖Hardness of hearing, ceasing when wax is removed, returning as wax again accumulates.
‖‖Accumulation of earwax, looking blood red, or like decayed paper, with pus or mucus.
‖Tumors and boils behind ears.
‖Parotid glands swollen and hard.
‖Suppuration of l. parotid with profuse sweat, disturbing sleep. θDiabetes.

[7] **Smell and Nose.** ‖Excessively acute sense of smell.
Boring in nostrils; smell of animals in back part of nose.
‖Constantly picks his nose, which bleeds easily. θMental derangement.
Troublesome feeling of dryness in nose.
Tingling in nose, frequent sneezing, with watery, slimy discharge.
‖Stinging soreness and itching at tip and inside of nose.
‖Pain deep in root of nose before menses, < from panting or pressure; discharge of blood and pus from nose.
‖Ozæna, with burning in nostrils and stitching pain in nasal septum, discharge of pus and blood from nose; after abuse of mercury.
‖Fluent coryza. θCough.
‖Flow of acrid mucus from nose. θInflammation of eyes.
‖Purulent discharge from nose; also hardened crusts.
‖Epistaxis.

Digitized by Google

‖Nosebleed: with suppressed menses, from taking cold; frequent ebullitions of blood; from slightest cause; in Spring; after sneezing.
‖Frequent excessive sneezing.
‖Obstruction of nostrils of long standing.
‖Inflammation of nose with bleeding from r. side, after abuse of mercury.
‖Fibrous polypi, hard and elastic, pricking and itching after touching or handling; excessively acute smell, with purulent discharge.

[8] **Upper Face.** Sickly and pale complexion.
Face: earthy, yellow; reddish-yellow; pale; sallow; bluish; purple; bloated.
‖Face flushed. θWhooping cough.
Heat in face with congestion of blood.
Heat of face, congestion to head, with catarrhal sensation.
Itching in face.
‖Drawing, extending from jaws to ears and head.
‖Stinging tearing faceache, at night.
Lacerating in r. half of face.
‖Itching pimples in face.
‖Gnawing ulcers in face, or moist and spreading herpes.
‖Eruption of small and large pustules on r. cheek. θInflammation of eyes.
‖Ulcers on face and lips; cancer of cheek; spreading cancerous ulcers; cancerous tumors of lips and face.

[9] **Lower Face.** Pressure and compression above lips.
Lips and tongue dry and sticky.
‖Lips and teeth covered with black crusts.
Lips: burning; shooting in them; dry and scaly.
‖Blisters, or eruption on lips.
‖Induration of lymphatics of lip after contusion.
‖Cancer of lips; from pressure of pipe.
‖Submaxillary glands swollen and hard.

[10] **Teeth and Gums.** Gnashing of teeth.
‖Jerking pain in teeth; seem loose during mastication.
‖Violent drawing toothache; teeth feel loose.
Drawing pain in sound teeth when walking in open air.
‖Drawing in a hollow tooth, when eating cold things or from cold drink.
Darting pains in teeth, < from eating and drinking.
Stitching pain in teeth.
Teeth and lips covered with black crusts.
Drawing pains and fine stitches in gums and teeth.
Gums swollen, blue-red and bleed readily.

[11] **Taste and Tongue.** Bitter taste in mouth, with thirst.
Loss of speech.
‖Speech difficult; distortion of tongue and mouth.

Digitized by Google

Lisping voice.
Tongue and lips dry and sticky.
‖Tongue swollen, painful, stiff.

[12] **Inner Mouth.** Dryness of mouth and fauces.
Violent ptyalism; saliva thready.
Drawing extending from jaws to ears and head.
Parotid and submaxillary glands swollen and hard as a stone; lips and teeth are covered with black crusts; skin hot, patient delirious or senseless.

[13] **Throat.** ‖Constant inclination to swallow; involuntary swallowing, especially when walking in wind.
‖Strange rising in throat, with sense of stuffing, as if something was lodged there.
‖Sense of fulness in throat as of a lump, with involuntary attempts at swallowing.
‖Fulness in pit of throat, with suppressed eructations.
‖Pressure in œsophagus as if a round body was ascending from stomach. θGlobus hystericus.
The bread will not go down, it does not taste well.
‖Bitterness in throat.
‖Spasmodic constriction of throat.
Contraction in throat, with retching.
Spasm of œsophagus.
Tickling sensation in throat.
‖Itching in throat, with irritation to a hacking cough.
Scraping, itching and tingling in throat, causing a continual itching cough.
‖Excruciating pains in throat. θUterine polypi.
Burning in œsophagus and pharynx after a meal.
‖Exudation dirty greyish. θDiphtheria after scarlatina.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Loss of appetite. θMorning sickness
Want of appetite and disturbed digestion.
‖Appetite very poor, but with a strong craving for salt things. θChronic dysentery.
‖Appetite very poor, no thirst. θUterine disorder.
Ravenous hunger.
‖Craves coffee, salt, or sour things.
Aversion to bread.
‖Thirst. θOphthalmia.
‖Thirst, with internal heat, or burning heat through whole body.

[15] **Eating and Drinking.** ‖Sour rising from stomach, after eating.
‖After taking a small quantity of milk, sudden distension of abdomen.
Nausea and vomiting, with swelling and soreness of breasts with menstrual periods.

Digitized by Google

Worse during eating and after.

After eating, aching in back of neck, vertex and forehead, with nausea; a gentle heat seems to pass from stomach through arms to fingers, and then hands appear as if dead.

Palpitation after drinking.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: of wind; loud, tasting of ingesta; frequent and sour, with hardness and distension of abdomen; suppressed, with subsequent pain in stomach; offensive; frequent, empty; painful and acid.

Heartburn, and acidity rises from stomach after eating.

ǀSour rising of food. θSuppressed menses.

ǀSour belching, < at night. θMarasmus.

ǀNausea: frequent; with tearing headache; after eating; of pregnant women.

Retching, with contraction in throat.

ǀNausea and vomiting during pregnancy; slimy, watery.

Nausea, vomiting, eructations of wind and expectoration of phlegm, with induration and enlargement of ovary.

ǀShe wakes in morning very sick at stomach and vomits several times from 5 o'clock until breakfast; substance vomited is white and frothy, followed by something yellow, like bile; vomits several times during day.

Vomiting: violent; of mucus; of black masses, like coffee-grounds, in clear, sour water; of chocolate-colored masses, sour and acrid, bitter, slimy, watery.

[17] **Scrobiculum and Stomach.** ǀAching and pressure in epigastrium; it extends from epigastrium up to pharynx, and feels as if a ball was rising to throat.

Oppressive contraction of epigastrium.

ǀSense of fulness and repletion in stomach.

Suppressed eructations, with subsequent pain in stomach.

Heartburn, with offensive, frequent, empty eructations.

Pressure in stomach during eating, contraction in back part with sensation of coldness, griping and sore feeling.

ǀViolent pains in stomach, always two or three hours after eating, but also at night; somewhat > in knee-elbow position.

ǀSwelling in region of pylorus.

ǀPressing, burning, squeezing pain, extending from pit of stomach into back and shoulders.

A stinging seeming to come from stomach and extending under l. ribs and as far as back.

ǀPressure and sore raw feeling at pit of stomach.

Sensation of soreness and rawness of stomach and abdomen when walking on stones.

Digitized by Google

Burning in stomach, nausea and severe vomiting of mucus.
Contractive spasmodic pains in stomach.
‖Spasm of stomach.
‖Cramps in stomach with tendency to constipation, especially in those of lymphatic temperament.
‖Spasms in pit of stomach extending from r. to l., also to back, coming on in paroxysms; before attack cramp in calves; pyrosis; throbbing in forehead to occiput.
‖Painful spasm of stomach, feeling as if stomach contracted, or of a heavy burden upon stomach; she cannot bear tight clothing; pain never entirely ceased, but was sometimes moderate, and then gradually became very severe; tendency to constipation; wearisome, spasmodic cough which < gastralgia; cough < by talking, running, and by emotion.
Dyspepsia with acidity of stomach.
‖Cancer of stomach.

[18] **Hypochondria.** ‖Painful tension about hypochondria as from a constricting band.
‖Pressive, tensive pain in hypochondria; stitching pains in hepatic region; excessive colicky pains.
Aching in r. hypochondrium, < by inspiration; aching tension in l. hypochondrium, extending low down in abdomen, with sensation of heaviness throughout abdomen.
‖Stitches or painful tearing in hepatic region.
‖Pain in liver with accumulation of earwax.
‖Pressing pain in r. hypochondriac region, < from pressure, convex, hard swelling, extending towards præcordial region and nearly to r. crest of ilium. θEnlargement of liver.
‖Constant pain in liver, with hardness and œdema. θUterine polypi.
Enlarged liver with pain on pressure; jaundice.
‖Hard swelling of liver.
Chronic enlargement of liver or spleen, with torpid action of bowels.
Stitches in l. hypochondrium and in spleen.
‖Enlargement of spleen. θMelancholia.
‖Sudden attack of vomiting and diarrhœa at night; vomiting of a white substance consisting of saliva without any admixture of contents of either stomach or bowels; gouty diathesis. θAcute inflammation of pancreas.

[19] **Abdomen.** ‖Trembling of whole abdomen.
Flatulency; incarceration of flatus; rumbling and grunting in abdomen.

Digitized by Google

Fulness in abdomen, early in morning when awaking.
‖Fulness and bearing down in abdomen. θDysmenorrhœa.
Heaviness and pressure in abdomen or perineum.
‖Inflation of abdomen after meals, particularly after milk.
‖Swelling of abdomen.
Swelling in region of pylorus.
Hardness and distension of abdomen with frequent sour evacuations; < during night, > by day.
‖Hardness of abdomen from swelling of mesenteric glands.
‖Sensation as if he must take hold of abdomen when coughing; feels as if cough came from there. θAnæmia of brain.
‖Great sensitiveness of abdomen and sore feeling.
Child complains of pain in belly when coughing.
Aching pain in abdomen during pregnancy, every night, after going to bed, > by getting up and moving about.
Writhing and grinding (searching) in umbilical region.
Pressing, aching pain in abdomen, with involuntary drawing of abdomen up towards thorax.
Pain in umbilical region as if bowels were bruised by blows.
‖Stitches extending from abdomen to r. side of chest.
‖Pinching pains in abdomen, as if diarrhœa would set in.
Oft recurring, constricting pains in abdomen, coming and going at intervals, like labor pains.
Lancinations in abdomen as if knives were plunged in.
‖Griping in abdomen before discharge of leucorrhœa.
Painful abdominal spasms during menses.
Contractive laborlike colic from both sides of abdomen.
‖Colic from incarcerated flatus.
‖Cutting in abdomen before emission of flatus.
Colic during emission of flatus.
Colicky pains of a most violent kind.
Laborlike contractions; pain in iliac regions.
‖Contractive pain in lower abdomen, like after-pains, with urging to stool.
‖Constrictive pains in lower part of abdomen.
‖Pain in hypogastric region during menses, going down legs.
‖Aching pain in hypogastric region, like menstrual colic.
‖Forcing down feeling in hypogastric region, like menstrual labor pains.
‖Bearing down pain and burning in hypogastric region. θUterine derangement.
Pains in groins as if swollen.
‖Tumors in abdomen.
‖Enlargement of mesenteric glands.

Digitized by Google

[20] **Stool and Rectum.** Constant inclination to evacuate the bowels to relieve soreness.
Emissions of fetid or cold flatus.
Involuntary discharge of feces during sleep.
Diarrhœa. θVertigo.
Frequent diarrhœa and copious urination.
Slime, mixed with greenish substances and containing bloody specks; stools are very small, offensive, with tenesmus and discharge of flatus during passage, with a weak, trembling feeling after; no pain at all; eight to fourteen stools daily, the passages becoming more frequent at night. θChronic dysentery.
Stools: liquid, fecal; mingled with hard lumps; watery, undigested, and passed with loud emissions of flatus, with colic; liquid, diarrhœic, with colic, discharge of flatus and much mucus or undigested food, or even blood; undigested, painless; painful; hard, with tenesmus; very debilitating; frequent and sour; streaked with blood; with discharge of blood.
Diarrhœa only by day, not at night.
Chronic diarrhœa of old men.
Constipation and diarrhœa alternately. θUterine polypi.
Constipation alternating with bilious diarrhœa.
Stools sometimes regular, sometimes hard and tardy, or green and diarrhœic. θEnlargement of liver.
Frequent ineffectual urging to stool; or small quantity passed each time.
Constipation, with ineffectual desire for stool; constant urging, without stool.
Stools tardy, hard and dry. θCough.
Hard stool, with tenesmus, headache and discharge of prostatic fluid.
Obstinate constipation, no stool for seven days, stools large, hard, and followed by tremulous weakness; she must lie down. θProlapsus and dysmenorrhœa.
Hard stool every other day. θMental derangement.
Before stool: cutting abdominal pain.
During stool: burning, cutting and straining in rectum; flatus; prostatic juice; rigors.
During stool a foreign body protrudes from the vulva. θUterine polypi.
After every stool, trembling, weakness and palpitation.
Heat in lower portion of rectum.
Frequent stitches in anus.

[21] **Urinary Organs.** Pain in kidneys if urine is restrained.
Sharp pressing in bladder.
Pressure upon bladder as if urine would come out immediately.

Digitized by Google

Pressure in neck of bladder, with stitches, < when walking, > when sitting.
‖Great pain in bladder, constant disposition to urinate, only a few drops passing at a time. θMorning sickness.
Sharp stitches shortly after urinating in region of neck of bladder for many hours.
Shooting stitches in back part of urethra.
Burning, cutting and drawing through urethra while urinating.
‖Pain in urethra during micturition. θVertigo.
‖Immediately after urinating, burning in urethra, in morning.
‖Strangury.
Urine cannot be retained.
‖Constant urging to urinate, with heat on urinating.
‖Frequent micturition at night. θMental derangement.
Passing water does not relieve the desire to do so.
‖Urine clear as crystal and intermitting in its flow. θChronic dysentery.
‖‖Intermittent flow of urine with cutting after micturition.
Violent itching, the urine flowing and stopping alternately, at every emission.
Urine: clear as crystal; thick; white, turbid, with grey or white sediment; mucous; bloody.
‖Urine turbid, after standing, dirty grey, with a yellowish tint. θDiphtheria after scarlatina.
‖Urine scant, brown or full of sediment, containing bile, with burning on urination. θEnlarged liver.
‖Urine feels hot. θUterine disorder.
Parenchymatous nephritis after scarlet fever.
Gravel.
Diabetes: accompanied by great pain; with swelling and suppuration of l. parotid gland.

Male Sexual Organs. ‖‖Sexual desire without erection.
‖With weakness of sexual organs, much sexual erethism, amatory thoughts, even emissions provoked by mere presence of women.
‖Great sexual desire with partial or complete incapacity; emissions on slightest provocation, melancholy.
‖Emissions without dreams.
‖Nightly emissions and spermatorrhœa; urine flowing and stopping again at each passage of water.
‖Painful emission of semen.
Pollutions, with subsequent excitement of sexual desire.
‖Excessive pollutions, particularly of young people.
‖Excessive pollutions, with no history of previous excesses.
‖‖Bad effects from suppressed sexual desire, or from excessive indulgence.

Digitized by Google

‖Sexual weakness. θAnæmia of brain. θMental derangement.
‖Insufficient erection, lasting only a short time; feeble embrace; weakness after an embrace.
‖Impotence and want of erections.
‖Swelling and induration of testicles, particularly after contusion.
‖Cutting pain through scrotum to root of penis; pressing and tearing pains in testes.
Chronic prostatic disease, the gland swollen, hard as stone, firmly fixed, and much biting-itching, or biting like flea-bites, a weight like a stone in perineum.
‖‖Discharge of prostatic fluid on every change of emotion, without voluptuous thoughts, or while expelling feces; with itching of prepuce.
Very severe pains, coming on at night, waking from sleep; orchitis from contusion swelling of testes; firm hæmatocele, like a stone.
‖Recent cases of gonorrhœa with orchitis and severe nocturnal pains.
‖Indurated chancre of long standing.
‖Rheumatism after suppressed gonorrhœa.
Syphilitic sarcocele.

[22] **Female Sexual Organs.** ‖‖Ill effects of suppressed sexual instinct, or non-gratification of sexual appetite.
‖‖Induration and enlargement of ovaries or womb, with lancinating pains.
‖‖Indurations, especially of a scrofulous nature or from injuries.
‖Prolapsus uteri complicated with induration, ulceration and profuse leucorrhœa.
‖Uterus prolapsed and anteverted; bearing down as though womb would be forced from vulva; < when standing and walking, before and during menses; dysmenorrhœa.
‖Induration of cervix; sharp pains in part; prolapsus uteri; acrid leucorrhœa; swelling of breasts; stitches in breasts mostly at night.
‖Weight and lancinating pains in womb and ovaries, extending through whole lower part of abdomen, hips and back; during stool a foreign body protrudes from vulva; copious and frequent uterine hemorrhages; leucorrhœa reddish, extremely fetid. θUterine polypi.
Uterine spasms; rigidity of os uteri.
‖A grinding pain is felt above pudendum; the abdomen becomes inflated, the chest is affected and stitches are felt in l. side.
‖Uterine spasm during too early and scanty catamenia,

Google

followed by leucorrhœa, with nightly pains, hysterical paroxysms.

Laborlike contractions.

Laborlike colic from both sides of abdomen.

Stitching pains in womb, with such symptoms as accompany pregnancy; nausea and vomiting, craving sour or salt things; pain and swelling of mammæ during menses, dejection of spirits, etc.

Pinching and griping in uterus.

Stitches in uterus extend to r. side of chest.

‖ Burning, stinging, darting pains in neck of uterus, with indurations and scirrhosities.

‖ Burning, sore, aching sensation in region of uterus.

‖ Before menstruation: anxious dreams; heat without thirst; general bruised feeling, with inclination to weep; restlessness and anxious apprehensiveness; pains in breasts, with soreness and swelling; stitches in liver; distension.

‖ Great soreness of breasts precedes menstruation; < by least jar or walking.

‖ Amenorrhœa: genitals very sensitive; complicated with ovarian or uterine disease and chlorosis; with venous abdominal hyperæmia.

Brownish blood instead of menses.

‖ During menstruation: great fears when alone, but dread of strangers or company; laborlike abdominal pains, extending into thigh; stitches in chest; headache; eruption; stinging pains in neck of uterus.

‖ At every menstrual effort the breasts enlarge, become sore and painful.

Breasts relaxed, except at menstrual period.

‖ Pressure from above downward, and drawing in legs during menses.

‖ Menses too weak.

‖ Menses irregular, three months passing sometimes without appearance of menses, and then they are scanty. θ Inflammation of eyes.

‖ Dysmenorrhœa, with shooting pains in l. chest, or sharp pains about heart.

‖ Dysmenorrhœa: pains in hypogastric region and down legs; sharp pain in back; chills commencing in breasts; vertigo in bed, everything turning round; menses too soon, too profuse, natural in color; has weak spells.

‖ Catamenia too late, scanty, and of short duration.

‖ Menses: suppressed; feeble, too late and scanty, of short duration.

Delayed and scanty menstruation, with symptoms pointing to congestions in other organs, and especially when mammæ are lax and shrunken.

Google

‖Menses scant, clotted, accompanied by rash over whole body of small red pimples, which burn severely when scratched, and disappear with cessation of menstruation.
‖Menses stopped by taking cold; putting hands in cold water; sour rising of food; urine intermits; nosebleed.
‖Every four weeks, great sensitiveness of labia majora and minora; constant dry heat of body without thirst; anxious dreams; heaviness in all the limbs; tearfulness; restlessness; anxious concern about trifles; stitches in hepatic region, often lasting several days and greatly prostrating her, with entire absence of menstruation.
Violent itching of pudenda and vagina, especially after menses.
‖Leucorrhœa ten days after menses, stopping suddenly and soon flowing again, lasting several days, with much pain in bowels before discharge.
Acrid and burning leucorrhœa, white or yellow, preceded by griping and pinching pains in abdomen and lameness of small of back, followed by weariness.
‖Leucorrhœa: profuse; bloody, mucous; excoriating; thick, milky, with contractive, laborlike colic, coming from both sides; of white, acrid mucus, causing burning or smarting sensation.
‖Bearing down and stitches in vagina.
‖Severe itching deep in vagina.
‖Indurations of vulva from injuries.
‖Severe stitches in vulva.
Peculiar digging in vulva, a crampy pain.
Violent itching of vulva, followed by pressing down of uterus, especially after menses.
Sensitive pudenda and mammary glands.
Cutting pain between labia on micturition.
Sero-purulent eruption on mons veneris.
‖Large pimple on mons veneris, painful to touch.
Climaxis, with flushes of heat and sweat.
‖‖Shriveling of mammæ, without sexual desire.
‖Fibroid tumors of uterus.

" **Pregnancy. Parturition. Lactation.** Unready conception due to passive congestion.
Terrible nausea and vomiting in women suffering from scirrhosities during pregnancy.
‖Terrible nausea and vomiting during pregnancy.
‖Wakes in morning sick at stomach, vomiting several times from 5 o'clock till breakfast; the substance vomited is white and frothy, followed by something yellow, like bile, < from raising head; vomits several times during day; three months pregnant.
‖Aching pain in abdomen during pregnancy; is disturbed

between 12 and 3 o'clock at night by having to get up to urinate; has no affection for anybody.

‖Cough during pregnancy, < at night.

‖Obstinate cramps in stomach during pregnancy; sensation of constriction, or of a heavy weight pressing upon stomach; pains are constant but remittent in character, gradually growing so severe as to become unbearable; constant dry, spasmodic cough which aggravates the cramps; cough < from speaking, walking, or mental emotions.

Excessive heartburn at night while going to bed, in pregnant women.

‖Rigidity of os uteri during labor.

‖During parturition, complete sleeplessness and exhaustion; can hardly speak a few words; extreme sensibility to light, shunning the light to such a degree that smallest ray of sunlight causes great anguish.

After-pains excited by child nursing, pains extending from l. to right.

‖In first week after delivery, could not move head to turn over in bed on account of great vertigo.

‖Constant discharge of thin, watery milk from breasts for nine months after child has been weaned.

‖Induration of r. mammary gland during lactation; burning pain. θMastitis.

[25] **Voice and Larynx. Trachea and Bronchia.** Lisping voice.

‖Larynx sensitive to touch. θCough.

‖‖Dry spot in larynx, where there are crawling and almost constant irritation to cough.

Constant tickling and itching, dry, teasing cough.

‖Scraping in larynx, with irritation to cough, and dry cough in evening.

Hoarseness: cough and expectoration; after leucorrhœa.

Blennorrhœa bronchialis.

Chronic cough from enlargement of bronchial glands, with irritation of tracheal and laryngeal lining.

Nervous bronchial asthma, paroxysmal, coming on in wet weather.

[26] **Respiration.** Want of breath on taking least exercise and copious cough, with mucous discharge.

Shortness of breath when walking.

‖Constriction of chest, with dyspnœa. θCough.

‖Oppressed breathing in morning when waking.

‖Sawing, snoring breathing. θDiphtheria after scarlatina.

‖Asthmatic paroxysms come on in wet weather; face bluish-red.

‖Asthma in morning when awaking.

Digitized by Google

Nervous bronchial asthma.

‖Asthma of old people, with tickling cough.

‖Noise in larynx, which resembles very much an unarticulated "sha-li-sha-li" in sound; this so disturbing that he must cease going to school; marked spasmodic twitchings of muscles of r. side of face; these often precede the sounds; spasmodic pressing pain in region of ligam. glottid.; noise and twitchings of face < from talking, > by rest and sleep; patient scrofulous and glands are swollen. θAffection of inf. laryngeal nerve.

‖Bronchitis.

Catarrh, with dry, tickling cough, great lassitude, restlessness and thirst.

℞ **Cough.** ‖Unbearable titillation in pit of throat, with lisping voice, causing paroxysms of coughing.

Periodic, dry cough with tickling sensation in throat, or behind sternum; cough comes on in short spells, especially while lying down, talking or laughing.

‖Dry, tickling cough after catarrh, spasmodic tickling in larynx, which is very sensitive to touch; cough recurs every evening at 6 o'clock, lasting several hours, and is very annoying to patient.

‖Tickling, dry cough, annoying most at night, with violent headache, disturbing sleep; fluent coryza; oppression of chest.

‖‖Powerful, spasmodic paroxysms of cough excited by itching and tickling in chest and throat, or by a dry spot in larynx, < at night and when lying down, greatly fatiguing patient.

‖Dry cough, < towards morning, with constriction and oppression of chest.

‖Dry, teasing cough, persistent and annoying, < lying down, going out of warm room into air, and changing position in bed at night. θAnæmia of brain.

Dry, hacking, almost continuous cough; < on lying down at night; hardly any cough during day; paroxysms of cough simulating whooping cough.

Especially dry, tickling cough in children and nightly cough of adults.

‖‖Cough, when first lying down, during day or evening; is obliged to sit up and cough it out, after which rest.

‖Cough very much < by lying down; in beginning many shocks of coughing as if he would vomit; constant severe cough in evening on going to sleep.

‖Cough, wakes frequently at night out of a restless sleep, with stitching pains in sides of chest.

Dry, spasmodic, nightly, almost continually titillating cough, with violent oppression of chest and evening

Google

fever; suffocating cough in scrofulous patients; want of breath on taking least exercise and copious cough, with mucous discharge.

‖Chronic cough from enlargement of bronchial glands, or irritation of laryngeal lining; dry, hacking, laryngeal cough.

Headache during violent coughing fits.

‖‖Lying down and taking a deep breath cause cough.

‖Sensation when coughing as if he must take hold of abdomen, feels as if cough proceeded from there. θAnæmia of brain.

Child complains of pain in belly when coughing.

Cough, with flatulency, dyspnœa, pain in limbs and on different places of chest, not < by the cough.

Cough with: stitches in head or chest; shocks in head; oppression and constriction of chest; colic; vomiting of mucus; pain in abdomen.

Spasmodic cough after influenza, not ceasing until a mass of mucus is vomited.

‖After influenza: cough coming with no regularity, but more frequent at night than at any other time and continuing until retching and vomiting occur, expelling a small quantity of frothy mucus with a yellow nucleus.

‖Cough: loose, with inability to expectorate; must swallow what is raised.

Whooping cough: expectoration only during day, with attacks of suffocation; tickling in chest, shortness of breath, bloody mucus: difficulty in expectorating what has been loosened by cough, < at night.

Violent attacks of whooping cough in scrofulous children, face flushed, expectoration bloody.

‖Whooping cough if subacute bronchitis has supervened.

Expectoration: during day; difficult; bloody, purulent, sometimes hardened; of putrid taste and smell, especially after measles, scarlatina, or during pregnancy.

‖Violent cough at night, with influenza.

[28] **Inner Chest and Lungs.** ‖The clothes lie like a weight on chest and shoulders.

Tickling sensation behind sternum.

Tight feeling in chest, > by cough.

‖Oppressive constriction of chest, with dry cough.

Violent oppression of chest and evening fever.

‖Pressure on chest, with spasmodic, tickling night cough.

Pains all over chest, with headache.

Itching, scraping, titillation under sternum, or in throat, causing periodic dry cough.

‖Sharp thrusts directly through chest, from sternum to spine, while sitting.

Digitized by Google

‖Stitches: in r. chest about nipple, on everp inspiration, while walking, < from hard pressure with hand; in l. side of chest, with uterine spasms; from abdomen to r. side of chest.

Jerks in chest.

Cutting pains in both sides of chest, < by inspiration; tension and weakness in chest; visible palpitation, especially after drinking.

‖Dull pain in l. chest, tenth rib, < from coughing. θAnæmia of brain.

‖Hæmoptysis, or heinorrhage especially after masturbation, with tensive, pressing, stitching pains in chest.

[29] **Heart, Pulse and Circulation.** Præcordial anguish.

Jerking sensation about heart.

‖Violent palpitation of heart. θMorning sickness.

‖Violent palpitation after drinking, when rising from bed.

‖Palpitation after stool; intermissions in beats of heart.

Violent beating of heart, with pain at each pulsation, as if a knife was being thrust through occiput; heart beat sometimes strong, sometimes quick or vacillating.

Frequent shocks in region of heart.

Aching or sharp pains about heart, with dysmenorrhœa.

Sensible beating of arteries through whole body.

Pulse: accelerated; unequal in strength and sometimes irregular in rhythm; irregular, generally slow and full, alternating with small and frequent beats; extremely irregular, principally slow and large, but with intervening small and quick beats; pulseless.

[30] **Outer Chest.** ‖The clothes lie like a weight on chest and shoulders.

Itching of breast and nipple, with red, scaly skin, and burning after rubbing.

‖‖Stitches as with needles in l. mamma.

Stitching pain in sides of chest, with cough, which wakes him at night.

‖Violent stitches in l. side of chest above nipple, on every inspiration while walking, not > by hard pressure of hand.

‖Violent stitches in r. side, as if a knife was plunged into side, causing loud moaning. θPneumonia.

Beating stitch, with pain, in upper and l. part of chest towards centre of chest.

‖Inflammation of breast, with stitches.

The mammary glands painful in evening.

‖Pain in mammæ, which often swell and become hard.

‖Hot pains through l. breast and axilla. θUterine disorder.

‖Dull pain below l. mamma. θProlapsus and dysmenorrhœa.

Digitized by Google

Hardness of r. mamma, with painfulness to touch, and nightly stitches in it.
Mammary induration following abscess of r. mammary gland, remaining without change for two years.
Painful swelling of breast, about size of walnut.
Hard and painful lumps in mammæ.
Tumor under l. nipple as large as a hen's egg, moving freely under superficial fascia, and very hard and painful on pressure; nipple inverted and sensitive to touch; stinging, twinging pains; leaden cast of areola.
Small and painless tumor in breast near nipple.
Tumors in mammæ, with piercing pains, < at night, gland abnormally tender.
From contusion, hard lump as large as walnut on r. side of nipple of r. breast; constant, dull, heavy pain in breast; at night after spot has been irritated in any way, sharp and shooting pains.
After contusion of r. breast, an uneven swelling, hard as stone, supporting a rough, wartlike, humid elevation; axillary glands swollen; fever in evening; dull stitches in breast.
Hard, scirrhous-like tumors.
Stony-hard scirrhus of breast, sharp, shooting pains and occasional twinges.
Scirrhus in mamma, hard as cartilage and uneven, which had grown during climacteric period to size of hen's egg.
Scirrhous cancer of breast, stony, hard, large as teacup; pains shooting; sense of great heaviness in breast.
Scirrhus of l. breast; occasionally twitching in affected part, rarely pain; the mass is immovable, and skin covering it not discolored.
Hypertrophy of breast, either general or lobular, followed by atrophy.
Wasting of breasts; complete atrophy of mammary gland, leaving a flaccid, baglike skin.
Caries of sternum.

31 **Neck and Back.** Tightness in nape of neck; pain and stiffness.
Soreness in lower cervical vertebræ.
Pain as from a sprain in l. side of back and neck.
Enormously enlarged cervical glands. θCaries lower jaw.
Cervical glands hard and tender.
Indurated and swollen cervical glands in scrofulous children.
Neck twisted by hard swelling to r. shoulder. θAfter scarlatina.
Herpetic eruption on neck and behind ears, < from heat, which causes a burning sensation.

Digitized by Google

Pain between shoulders and in lumbar region.
Weakness and lameness in small of back and subsequent lassitude.
‖Dragging pain in small of back. θUterine disorder.
‖Stitches in small of back, with drawing through lumbar vertebræ, while standing.
Contraction in back, with sensation of coldness, griping and sore feeling.
‖Sharp pains in back, with chills. θDysmenorrhœa.
‖Dorsal pain between shoulders and in lumbar region.
‖Peculiar tumor in central part of back, as large as a cherry, growing on half an inch long pedicle; tumor and pedicle of a bluish color.
Pain in back, especially on bending backward, or after a short walk, with nausea and weariness.
‖Lancinating pains and weight in back, hips and lower part of abdomen, extending from womb and ovaries. θUterine polypi.
Stitches and tensive drawing pains, much increased by moving arms upward; severe aching in sacral region from walking a short distance, followed by nausea and lassitude; stitches in sacrum when standing, with drawing through lumbar vertebræ.
‖After falling from a height upon back, acute pain in lower part and in region of small of back, especially when laughing, sneezing, or taking a quick breath.
‖Ill effects of bruises and shocks to spine.
‖Coccyodynia.
‖Upon buttocks small, scattered, flat, wartlike, greyish-brown growths of hypertrophied epidermis. θEnlargement of liver.

[32] **Upper Limbs.** ‖Shoulders feel bruised and sore.
‖Axillary glands swollen. θMammary tumor.
‖Arms when lifted fall like inert masses and remain immovable.
Humid tetters on forepart of arm.
‖Ichorous, biting, burning herpes on hands and forearms.
‖Cracking in wrist joint.
Sweat of palms of hands.
‖Itching on dorsum of finger.
Yellow spots on fingers.
‖Yellow nails.

[33] **Lower Limbs.** Drawing pain in hips.
Uneasiness in lower limbs.
Dragging and weakness in legs.
Pressing downward and drawing in thighs, scanty menses.
Numbness in thighs.
‖Sensation of weakness even to trembling, in r. thigh while walking.

Google

‖Staggering gait.
Painless loss of power in lower limbs; faltering, vacillating gait; staggers as if drunk, dragging his legs after him.
Lassitude in knees.
‖Pain in knee as from fatigue.
‖Herpetic eruption over popliteal space.
‖Pain going from hypogastric region down legs. θDysmenorrhœa.
‖Cracking of knee joint.
‖Cramps of calves.
‖Red spots on calves, turning yellow or green, as from contusion, preventing movement.
‖Liability of feet to catch cold from slight exposure.
Pustule on foot.

[84] **Limbs in General.** ‖Heaviness and sense of weariness in all limbs.
Limbs feel bruised.
‖Paralyzed feeling in all limbs.
‖Difficulty in using limbs; unable to walk.
‖Unpainful lameness; trembling of limbs.
Weakness and debility, especially of arms and legs.
‖Shooting pains through arms and legs. θUterine disorder.
‖Paralysis of lower, afterward of upper extremities, or the reverse.
‖Numbness of fingers and toes, the former looking as if they were dead.
‖All the joints pain as if beaten.
‖Piercing and tearing pains through extremities and in joints, particularly in elbows and hip joints.
Coldness of hands and feet.
Sensation as if bones of upper and lower extremities were surrounded by tight bands; periostitis, with throbbing and burning pain, as if from an ulceration, < in morning and at night, also when standing, lying, or lifting the part, > when letting limb hang down and from motion; r. side, or l. upper and r. lower.

[85] **Rest. Position. Motion.** Rest: > noise in larynx and twitchings of face.
Patient wishes to keep head perfectly still.
Letting limb hang down: > pain.
Lying down: vertigo <; hydrocephalus, pains >; aching in r. eye; cough <; powerful, spasmodic paroxysms of cough <; dry, tearing cough <; dry, hacking, almost continuous cough <; pain in bones <.
Must lie down: tearing in head.
Lying in bed: sick headache <.
Lying on side: <.

Digitized by Google

Recumbent position: tearing in temple and sides of head <.
Sitting: pressure in neck of bladder, with stitches >; sharp thrusts directly through chest from sternum to spine; sweat while dozing; pain in ulcer.
Is obliged to sit up and cough it out, after which rest.
Patient < after going to bed, is obliged to sit up or walk about to get relief.
Standing: bearing down in uterus <; stitches in small of back, with drawing through lumbar vertebræ; pain in bones <; stitches in sacrum; pain in ulcer.
Knee-elbow position: violent pains in stomach better.
Motion: tearing in temples and sides of head <; headache, with pains all over chest <; aching in abdomen after going to bed, during pregnancy >; pain in bones >; pain in ulcer <; > parts affected; symptoms at first <, > by continued.
Changing position in bed: dry, tearing cough worse.
When turning in bed: vertigo worse.
When rising from bed: violent palpitation.
Rising from seat: vertigo.
Closing eyes: hydrocephalus, pains >; black spots seen.
When looking around: vertigo.
Moving head: headache, with coryza >; semilateral headache worse.
Raising head: vomiting during pregnancy worse.
On bending head forward: heaviness in occiput.
When turning head: vertigo.
When shaking head: painful sensation of looseness; pain from brow to occiput, as if something had become detached.
Moving arms upward: stitches and drawing pains in back worse.
Bending backward: pain in back.
Stooping: vertigo <; headache, with coryza >; tearing in temples and sides of head worse.
Walking: complete indifference, takes no interest in anything; vertigo <; clicking in l. vertex, also in occiput; feeling of coldness in eyes; staggers as if drunk; drawing in sound teeth; involuntary swallowing; soreness and rawness of stomach and abdomen; pressure in neck of bladder, with stitches <; bearing down in uterus <; soreness in breasts before menses <; cough during pregnancy <; shortness of breath; stitches in r. side of chest, about nipple; violent stitches in l. side of chest, above nipple; pain in back after; aching in sacral region; weakness, even to trembling in r. thigh; great weakness after; noise is felt at every step, as of the

Digitized by Google

breaking of a finger nail; as if paralyzed after; sudden loss of strength while; staggering when; after standing, > by.

Downward motion: vertigo worse.

On ascending an eminence: pains in ulcer worse.

Exercise: want of breath on taking least; urticaria from violent.

Running: cough worse.

[36] **Nerves.** Great nervousness, involuntary laughing and weeping, great weakness after least walk; urine intermits in its flow.

Inclination to start as if with fright.

Fear of noise and talking, on account of great sensitiveness of head.

At every step in walking a noise is felt, as of the breaking of a finger nail.

Restlessness and constant desire to change position.

‖Very easily overstrained.

Weakness and lassitude with desire to sit or lie down.

‖Weak spells. θDysmenorrhœa.

Weariness, with nausea and pain in back.

‖Great physical and mental debility.

Sensation of debility in morning when in bed.

‖Great prostration of nervous and muscular systems, < from excitement. θAnæmia of brain.

‖Exhausted, faint, and as if paralyzed after a short walk.

‖Sudden loss of strength while walking.

‖Complete sleeplessness and exhaustion, can hardly speak a few words.

‖Faintness; sick and faint early in morning in bed, or after stool.

Fainting fits.

‖‖Tremulous weakness after every stool, > in open air.

‖Trembling of all the limbs; muscular tremor.

Staggering when walking outdoors.

‖Hysteria; globus hystericus.

‖‖Paroxysms of hysteria and hypochondriasis from abstinence from sexual intercourse.

‖Hysterical spasms, convulsions.

‖Frequent attacks of an apoplectic nature; headache and fainting. θUterine polypi.

Apoplexy with paralysis, particularly in old people.

Paralysis of old people, especially of old women; general paralysis of voluntary muscles, paralyzing first peripheral nerves, and finally spinal cord; unpainful lameness.

‖Muscular paralysis without spasms.

‖General spinal paralysis and that which follows diphtheria.

Digitized by Google

Paraplegia, after concussion of spine.
Chorea.
Trismus.

[37] **Sleep.** ‖Drowsiness by day, stupid in morning. θVertigo.
Drowsiness in evening, with spasmodic closing of eyelids.
‖Somnolence, with constant waking and change of position, sawing snoring breathing; condition < at night. θDiphtheria after scarlatina.
‖Stuporlike, unrefreshing sleep, broken by heavy dreams.
‖Very restless sleep. θMental derangement.
Uneasy sleep, great trembling and short, rapid snoring respiration.
‖Cough disturbing sleep.
‖Falls asleep late, after midnight.
‖Complete sleeplessness and exhaustion. θPhotophobia.
‖Five minutes after falling asleep wakes up bathed in sweat, most profuse on head and upper portion of body. θDiabetes with parotitis.
‖Nocturnal pains in ulcers prevent sleep.
‖Awakes from sleep with fright and start on account of a cracking in head.
Anxious sleep, full of fancies.
‖Dreams frightful.
‖Sleep disturbed by nightmares. θAnæmia of brain.
Patient always feels < after going to bed, is obliged to sit up or walk about to get relief.

[38] **Time.** In morning: stitching in forehead; headache on awaking; asthenopia >; agglutination of r. eye; pressure in eyes <; awakens very sick at stomach and vomits several times, from 5 o'clock until breakfast; fulness in abdomen when awaking early; burning in urethra after urinating; when awaking, oppressed breathing; asthma when awaking; pain in bones <; sensation of debility when in bed; sick and faint early, in bed; stupid; chill and coldness; internal chill; sweat.
At noon: stitching in forehead.
In afternoon: very ill-humored from 5 to 6; chill and coldness, 3 to 5; shivering.
During day: vomits several times; hardness and distension of abdomen, with frequent sour evacuations >; cough; whooping cough; attacks of suffocation; expectoration only; drowsiness.
In evening: clicking in vertex, also in occiput; dry cough; constant severe cough on going to sleep; fever; mammary glands painful; drowsiness; spasmodic closing of eyelids; irresistible desire to scratch eruption.
At night: pains in eyes <; stinging-tearing faceache

Digitized by Google

sour belching <; violent pains in stomach; sudden attack of vomiting and diarrhœa; hardness and distension of abdomen, with frequent sour evacuations <; frequent micturition; orchitis; very severe pains coming on; stitches in breasts; between 12 and 3 must get up to urinate; cough during pregnancy <; excessive heartburn in pregnant women while going to bed; tickling, dry cough, with violent headache, disturbed sleep; powerful spasmodic paroxysms of cough; dry, tearing cough, < on changing position in bed; dry, hacking, almost continuous cough < on lying down; cough wakes frequently out of a restless sleep, with stitching pains in sides of chest; whooping cough <; violent cough, with influenza <; stitches in r. mamma; pains in tumors of mammæ <; sharp, shooting pains in r. breast after any irritation; pain in bones <; pains in ulcers prevent sleep; skin hot, burning in bed; sweat; pains in spine prevent sleep; marasmus, with frequent sour belching <; pain in uterus <.

Late after midnight: falls asleep.

Towards morning: dry cough, with constriction and oppression of chest <.

» **Temperature and Weather.** Heat: asthenopia <; herpetic eruption on neck and behind ears <; causes burning sensation in herpetic eruption.

Warmth: fibroids >.

In room: eyes are dazzled by light of day.

Warm room: asthenopia <.

From warm room into air: dry, tearing cough <.

Chill, with continuous desire for warmth, particularly that of sun.

Open air: complete indifference, takes no interest when walking in; headache, with coryza <; hot spots on back of head >; hydrocephalus, pains <; feeling of coldness in eyes; vertical pains in head <; drawing in sound teeth when walking; tremulous weakness >; fibroids <; aversion to.

Out of doors: objects surrounded by prismatic colors; staggering when walking.

Cold water; hot spots on back of head <; suppression of menses from putting hands in.

Cold food and drink: drawing in hollow tooth.

In wind: involuntary swallowing when walking.

Cloudy day: asthenopia >.

Wet weather: nervous bronchial asthma, paroxysmal.

From taking cold: nosebleed, with suppression of menses.

Liability of feet to catch cold from slightest exposure.

Worse from growing cold and in cold weather; > from growing warm and in warm air; < in snowy air.

Digitized by Google

Spring: nosebleed.

40 **Fever.** ‖Chill and coldness in morning and afternoon (3 to 5 o'clock).
Extremities and whole body icy cold; shivering over whole body.
Chill, with trembling in all the limbs.
‖Chill, with continuous desire for warmth, particularly that of sun.
‖Chilliness along whole of back. θAnæmia of brain.
Chilliness in back, with cold hands and blue nails.
Chilliness during stool.
‖Internal chill in morning; with shivering in afternoon.
‖Chills during pains, commencing in breasts. θDysmenorrhœa.
‖Heat, with thirst and redness of face.
‖‖Great heat, internal and external, with great nervousness.
Constant dry heat all over without thirst.
Skin is hot, and patient delirious or senseless.
Feeling of heat in whole body; perspiration general.
‖Skin hot, burning at night in bed. θAnæmia of brain.
‖Internal heat, with thirst.
‖Catarrhal fever.
‖Burning heat through whole body, with thirst.
Heat, with profuse sweat at same time.
‖Sweat on head, face and neck. θOphthalmia.
‖‖Sweat day and night, as soon as one sleeps, or even when closing eyes.
Sweat while sitting in a chair and dozing.
Sweat over whole body, with redness of face.
‖Night and morning sweat, with offensive odor and smarting in skin, or offensive odor without perspiration.
Profuse sweat on limbs, perineum and genitals.
Fecal, fetid, smarting perspiration, with pimples.

41 **Attacks, Periodicity.** Frequent: sneezing; eructations, sour evacuations; diarrhœa and copious urination; ineffectual urging to stool; stitches in anus; uterine hemorrhages; shocks in region of heart, attacks of apoplectic nature; sour belching.
Oft recurring: constricting pains in abdomen, coming and going at intervals, like labor pains.
Periodical: insanity; dry cough.
Every evening at 6: dry, tickling cough, several hours.
Every night: after going to bed, aching in abdomen.
Every other day: hard stool.
Every fourteen days: great unhappiness of mind.
Every four weeks: great sensitiveness of labia.
Constant: inclination to sleep; confusion of forehead; inclination to swallow; pain in liver; inclination to

evacuate bowels; urging, without stool; urging to urinate; dry heat of body without thirst; dry, spasmodic cough during pregnancy; discharge of thin, watery milk from breasts nine months after child has been weaned; irritation to cough in larynx; severe cough in evening; dull, heavy pain in r. breast; desire to change position.

Lasting many hours: sharp stitches after urinating, in region of neck of bladder.

Diarrhœa only by day, none at night.

Day and night: sweat.

Lasting several days: stitches in hepatic region.

Chronic: stitching headache; dysentery; enlargement of liver or spleen; diarrhœa of old men; prostatic disease; cough, from enlargement of bronchial glands.

42 **Locality and Direction.** Right: as of a large foreign body in half of brain; tearing in side of head; eye bloodshot, aches on lying down, agglutination in morning; pinching in ear; bleeding from side of nose; lacerating in half of face; small and large pustules on cheek; aching in hypochondrium; pressing in hypochondriac region, with swelling extending towards præcordial region and nearly to crest of ilium; induration of mammary gland, with burning pain; spasmodic twitchings of muscles of side of face; stitches about nipple on every inspiration; violent stitches as if a knife were plunged into side; hardness of mamma, with painfulness to touch, and nightly stitches in it, mammary induration following abscess of mammary gland; after contusion of breast, hard lump as large as walnut; constant, dull, heavy pain in breast; after contusion of breast, uneven swelling, axillary glands swollen, dull stitches in breast; neck twisted by hard swelling to shoulder; weakness, even to trembling in thigh.

Left: clicking in vertex; redness of sclerotic, dimness of cornea; in hypochondrium; stitches in side; shooting pain in chest; dull pain in chest, tenth rib; stitches as with needles in mamma; hot pains through breast and axilla; dull pain below mamma; tumor under nipple; scirrhus of breast; pain as from a sprain in side of back and neck.

Right to left: ulcers on cornea; spasms in pit of stomach.

Left to right: after-pains.

From within outward: stitching in forehead; shocks in ears; stitches in ear.

From above downward: pressure during menses.

43 **Sensations.** As though a great grief weighed upon him; as though bed was turning in a circle; as of looseness

Digitized by Google

in head; as of a large heavy lump in brain; as if something like a fringe was falling down over eyes; as if something had become detached on shaking head; as if brain had gone to sleep; as if both temples were compressed; as of a foreign body under skull; as if occiput was pierced with a knife, with every pulse; as of a large foreign body in r. half of brain; as if head had been bruised, and as if a load was pressing down on it; as if head was too full and would burst; as if head had been bruised by blows or would fall to pieces; as of catarrh in head; as if eyes were trembling; as if eyeball was swollen; as if eyes were pulled outward from nose; as of overpowering giddiness coming over her; as of a grain of sand in eyes, in outer canthus; as if eyelids were pressed down by a heavy weight; as if ears were stopped up on blowing nose; as if teeth were loose; as if a round body was ascending œsophagus, from stomach; as of a gentle heat passing from stomach through arms to fingers, and then hands appear as if dead; as if stomach contracted; of a heavy burden upon stomach; as of a constricted band about hypochondria; as if he must take hold of abdomen when coughing; as if cough came from abdomen; as if bowels were bruised by blows; as if diarrhœa would set in; as if knives were plunged into abdomen; as if groins were swollen; as if urine would come out immediately; as though womb would be forced from vulva; as of a heavy weight pressing upon stomach; as if knife was being thrust through occiput with each pulsation of heart; as if a knife was plunged into r. side; as from a sprain in l. side of back and neck; as if shoulders were bruised and sore; as from fatigue in knees; as if limbs were bruised; as if beaten, in all the joints; as if bones of upper and lower extremities were surrounded by tight bands; as from an ulceration, in limbs; as if paralyzed after a short walk; as if part affected by ulcer was beaten to pieces.

Sensation in forehead like an inability to fix mind on any subject.

Strange rising in throat, with sense of stuffing, as if something was lodged there.

Præcordial anguish.

Pain: all over chest; deep in root of nose; in stomach; in liver; in belly when coughing; in umbilical region; in iliac regions; in hypogastric region during menses, going down legs; in groin; in kidneys; in bladder; in urethra; in mammæ; sharp, about heart; in hypogastric region and down legs; sharp, in back; in bowels

Digitized by Google

before discharge of leucorrhœa; in belly when coughing; in limbs and on different places of chest; in abdomen; in l. chest; in mammæ; in nape of neck; between shoulders and in lumbar region; in back; from hypogastric region down legs; in knee.

Lancinating: in vertex; in abdomen; in womb and ovaries, extending through whole lower part of abdomen, hips and back; in tumors.

Cutting: in abdomen; in rectum; through urethra; after micturition; through scrotum to root of penis; between labia on micturition; in both sides of chest.

Lacerating: in r. half of face.

Darting: in forehead and vertex; in teeth; in neck of uterus.

Piercing pain: in inner ear; in mastoid process; in tumors of mammæ; through extremities and in joints.

Stitches: in top of head; in teeth; in hepatic region; in hypochondrium and spleen; from abdomen to r. side of chest; in anus; in neck of bladder; in breasts; in l. side; in uterus, extending to r. side of chest; in vagina; in vulva; in head; about r. nipple on every inspiration; as with needles in l. mamma; violent in l. side of chest; dull in r. breast; in small of back; in sacrum; in swollen and indurated glands; in liver.

Stitching: in forehead; headache; in and about ears; in nasal septum; in teeth; in hepatic region; in womb; in sides of chest; in chest.

Drawing-stitching: in ear.

Burning stitches: in ulcers.

Shooting stitches: in back part of urethra.

Beating stitch: in upper l. chest towards centre.

Sharp thrusts: through chest, from sternum to spine.

Stinging: in eyes; at tip and inside of nose; seeming to come from stomach and extending under l. ribs and as far as back; in neck of uterus; in tumor under l. nipple; in ulcers.

Stinging-tearing: faceache.

Pricking: in fibrous polyp of nose; in skin.

Shooting: in inner canthus; in lips; in l. chest; sharp in r. breast; sharp in breasts; in cancer of breast; through arms and legs.

Tearing: in forehead and vertex; in temples and sides of head; in head, one-sided; headache; in r. side of head; in and about ears; in hepatic region; in testes; through extremities and in joints.

Drawing: in eyes; from jaws to ears and head; toothache; in sound teeth; in hollow tooth; in gums; through urethra while urinating; in legs during men-

Digitized by Google

ses; through lumbar vertebræ; tensive, in back; in hips; in thighs; in legs.
Burning: deep in eyes; on inner surface of lids; when rubbing eyes; in nostrils; in lips; in œsophagus; from pit of stomach into back and shoulders; in stomach; in hypogastric region; in rectum; through urethra; in neck of uterus; in region of uterus; of rash; leucorrhœa causes; in r. mammary gland; of breast after rubbing; in herpetic eruption on neck and behind ears; herpes on hands and forearms; with periostitis; in ulcers; of inflammation of skin.
Digging: in vulva.
Twinging: in tumor under l. nipple; in breasts.
Sharp shocks: in inner ear.
Shocks: in head; frequent in region of heart.
Jerking: in teeth; about heart.
Jerks: in chest.
Writhing: in umbilical region.
Grinding: (searching) in umbilical region above pudendum.
Pressive pain: in hypochondria.
Tensive pain: in hypochondria; in chest; in ulcers.
Sharp pains: about heart; in back.
Dragging: in small of back; in legs.
Squeezing: from pit of stomach into back and shoulders.
Pinching: in r. ear; in abdomen; in uterus.
Griping: in various parts of forehead; in stomach; in abdomen; in uterus; in back.
Scraping: in throat; in larynx; under sternum.
Smarting: in inner canthus; when rubbing eyes; leucorrhœa causes.
Scorching: on top of head.
Excruciating pains: in throat
Biting-itching: with prostatic disease.
Biting: like flea-bites, with prostatic disease; herpes on hands and forearms.
Soreness: at tip and inside of nose; of breasts; in stomach; of abdomen; of bowels; of breasts before menses; in lower cervical vertebræ; in back; in ulcers; in shoulders.
Sore aching: in region of uterus.
General bruised feeling before menses.
Aching: in r. eye; in inner ear; in back of neck, vertex and forehead; in epigastrium up to pharynx; in r. hypochondrium; in l. hypochondrium, extending down in abdomen; in abdomen during pregnancy; in hypogastric region, like menstrual colic; about heart; in sacral region.
Straining: in rectum during stool.

Digitized by Google

Bearing down: in abdomen; in hypogastric region; in uterus; in vagina.
Laborlike pains: in abdomen during menses, extending into thigh.
Forcing-down feeling: in hypogastric region, like menstrual or labor pains.
Pressing, aching pain: in abdomen, with involuntary drawing of abdomen up towards thorax.
Pressing pain: in eyeball; from pit of stomach into back and shoulders; in r. hypochondriac region; in abdomen; sharp in bladder; in testes; spasmodic in region of ligamentum glottidis; in chest.
Pressure: in head; in eyes; in outer canthus; above lips; in œsophagus; in epigastrium up to pharynx; in stomach; in abdomen or perineum; upon bladder; in neck of bladder; from above downward during menses; downward of uterus after menses; on chest; downward in thighs.
Constricting pains: in abdomen, like labor pains; in lower part of abdomen.
Constriction: spasmodic, of throat; of stomach during pregnancy; of chest; oppressive of chest.
Contractive, laborlike colic: from both sides of abdomen.
Contraction: in throat; oppression of epigastrium; in back part of stomach; in back; spasmodic pains in stomach; in lower abdomen; like after-pains.
Cramps: in stomach; in calves.
Crampy pain: in vulva.
Tension: painful, behind ear; painful, about hypochondria; in chest.
Rawness: at pit of stomach; of stomach and abdomen.
Hot pains: through l. breast and axilla.
Tight feeling: in chest; in ulcers.
Tightness: of head; in nape of neck.
Stupefying: headache; headache in outer part of head.
Constant dull, heavy pain in r. breast.
Heaviness: in head; in occiput; throughout abdomen; in perineum; in all the limbs; in breast.
Weight: in perineum, like a stone; in womb and ovaries extending through whole lower part of abdomen, hips and back.
Clothes lie like a weight on chest and shoulders.
Oppression: of breathing; of chest.
Fulness: in various parts of forehead; in throat, as of a lump; in pit of throat; in stomach; in abdomen.
Twitching: in l. breast.
Throbbing: from forehead to occiput; with periostitis.
Creeping: in ulcer.

Digitized by Google

Crawling: in larynx.
Tingling: in ears; in nose; in throat; in swollen and indurated glands.
Tickling: in throat; in larynx; cough, in old people; behind sternum; in chest.
Sore raw feeling: at pit of stomach.
Painful sensation of looseness: in head.
Titillation: in pit of throat; under sternum.
Paralyzed feeling: in all the limbs.
Lameness: of small of back.
Weakness: in chest; in small of back; in legs; in r. thigh; in arms.
Weak, trembling feeling after stool.
Weary sensation: in brain; in all the limbs.
Whirling: dizziness in head.
Confusion: in head; of forehead in region of eyebrows and root of nose.
Cracking: in head.
Clicking: in l. vertex; in occiput.
Tired sensation: in brain.
Lassitude: in knees.
Uneasiness: in lower limbs.
Numbness: of one side of head; in thighs; of fingers and toes; from contusions.
Dryness: of nose; of lips and tongue; of mouth and fauces.
Heat: of face; in lower portion of rectum; on urinating; of hands and feet.
Coldness: side of head; in eyes; in stomach; in back.
Itching: in inner canthus; below eyes; at tip and inside of nose; in fibrous polyp of nose; in face; of pimples in face; in throat; urine flows and stops alternately, with violent; of prepuce; violent, of pudenda and vagina; severe, deep in vagina; violent, of vulva; in larynx; in chest and throat; under sternum; of breast and nipple; on dorsum of finger; erratic, as from fleas in all parts of body.

" **Tissues.** Great liability to take cold.
Swelling and induration of glands, with tingling and stitches; after contusions and bruises.
Contusions which produce a condensation of cellular tissue and induration of glandular structures, accompanied by a sensation of numbness.
Bleeding of ulcers, with secretion of fetid ichor; a portion becomes gangrenous; concealed cancer of bones; cancerous swelling and induration of glands; cancer of lips; spreading cancerous ulcers in face; cancer and cancerous ulcers after contusions, burning stitches; stinging in affected parts.

Digitized by Google

Burning, crusty, and deep ulcers; painless, hard, and fistulous ulcers; nocturnal pains in spine prevent sleep; pus fetid, watery and ichorous.
Marasmus, with frequent sour belching, < during night.
Scrofulosis, with engorgement of lymphatics.
Rachitis.
Tumors of all kinds, especially scirrhous, coming on after contusions; stony hardness of tumor, and feeling of weight; cancerous swelling and induration of glands (secondary deposit); fibroids.
Gangrene from contusions, and of one part of an ulcer.
Viscid, putrid pus.
Straining and overstraining of membranous and tendinous structures from contusions, falls, or other external injuries.

" **Touch. Passive Motion. Injuries.** Touch: tearing in temples and sides of head <; sensation as of a foreign body under skull >; swollen lids sensitive to slightest pricking and itching of fibrous polyp; large pimple on mons veneris painful; larynx sensitive; r. mamma painful; l. nipple inverted and sensitive.
Cannot bear tight clothing.
Pressure: hydrocephalus, pains > by external; pains in eyes >; pains in root of nose <; pain in r. hypochondriac region <; enlarged liver, pain; stitches in r. side of chest < from hard; tumor under l. nipple hard and painful; fibroids <.
From pressure of pipe: cancer of lips.
Rubbing: smarting, burning of eyes; burning of breast; fibroids <; pain in ulcer.
Scratching: itching <; vesicles <; pain in ulcer.
Jar or shock: headache with pains over chest <; soreness in breasts before menses, < from least.
Lifting affected part: pain <.
From injuries: indurations; indurations of vulva.
After contusion: induration of lymphatics of lip; swelling and induration of testicles; orchitis; hard lumps on r. side of nipple of r. breast, as large as walnut; swelling and induration of glands; cancerous ulcers; tumors; gangrene; blackish ulcers.
Ill effects of bruises and shocks to spine.
After falling from a height upon back, acute pain in lower part and in region of small of back.

" **Skin.** Blueness of whole body.
Yellow color of skin; jaundice.
Yellow spots on fingers; yellow nails.
Brown spots upon body.
Want of action of skin.

Digitized by Google

Erratic itching of all parts of body, as from fleas.
Itching on dorsum of finger.
Itching < by scratching.
Urticaria, from violent bodily exercise.
Eruptions developed by being overheated.
Inflammation of skin all over body; painful and burning.
White transparent pimples filled with an acrid humor, which forms scabs resembling those of scabies.
A man, æt. 73, fell out of buggy; bruises on left arm, formed a scab, left a scar, surrounded by an induration which burned and itched. *Con.*[30] reduced the induration to one-third in a week, softened the remainder, and helped markedly an involuntary mucous diarrhœa, jellylike, white, inodorous, at times slimy, almost white, a dozen or more stools daily, so that he has now regular passages, also had incontinence of urine which is >.
Glandular enlargement; moist vesicles, < by scratching, followed by pricking in skin; gluey, sticky discharge, forming hard crusts about face, arms and mons veneris; eruptions in old people suffering from vertigo, especially in bed.
Sudden herpetic eruption on forearm, beginning as a small spot and gradually spreading over arm; skin red, swollen and corrugated, lymph or blood oozing from broken places in skin, lymph drying and forming white crusts under which the exudation still continues; intense itching in affected parts, with irresistible desire to scratch, particularly in evening; surrounding lymphatics swollen and involved.
Herpetic eruption forming into scabs as large as hand in various parts of body.
Acne on face.
Tetters: humid, burning, corroding, crusty, old.
Sero-purulent eruption in aged people, and hypochondriacal old maids.
Petechia in old persons.
Tumor can be traced to a bruise; lancinating pains.
Adenitis.
Blackish ulcers, with bloody, fetid, ichorous discharges, especially after contusions.
Ulcers: cancerous; scabby; destitute of feeling; with tight, tense feeling; speckled.
Scurfy exanthema; polypus; greenish mortification; tetters in general.
Edges of ulcer become black; gangrene of parts of ulcer; creeping, with a tensive pain; ulcers which are bluish have a livid appearance and are tumid; pain in part as if it was beaten to pieces; swollen ulcers, hard to heal; inflamed ulcers, with a feeling of soreness.

Digitized by Google

Bleeding from ulcers.

Stages of Life, Constitution. Cannot take alcoholic stimulants; easily intoxicated.

Strong persons of a sedentary habit are affected more than lively and slender persons and children.

Suited to women of rigid fibre, easily excited, as well as to those of opposite temperament.

Hypochondriacal old maids; old, weak and feeble men.

Especially useful to old people, and among these to women more than to men.

Light-haired persons.

Debility of old people; diseases caused by a blow or fall; cancerous and scrofulous people, with tight rigid fibre.

Scrofulous constitutions; strumous condition, enlarged glands.

Apoplectic paralysis.

Children who are prematurely old; with marasmus, with frequent sour evacuations, < during night, > by day.

Girl, æt. 4; diphtheria after scarlatina.

H. S., æt. 4½, had jaundice two years ago; ophthalmia.

Girl, æt. 6, of scrofulous constitution, had suffered for a long time from ulcer on r. great toe, which had healed up for ten months; she had also cicatrix resulting from suppuration of glands on neck and lower jaw; seven months after healing of ulcer, inflammation of eyes.

Girl, æt. 10; cough.

Boy, æt. 13, noise in larynx, with twitching of muscles of face; allopathic treatment of no avail; *Bellad.* given without result; under old school treatment had received *Conium* without effect.

Young man, æt. 16, strong and healthy; derangement of mind.

Girl, æt. 16, tissues flabby, scrofulous, menstruated one year; swelling of lids.

Young lady, æt. 18, lymphatic, scrofulous constitution; photophobia.

Susanna F., æt. 19, robust, of slender form, perfectly developed, affected from infancy with ophthalmia; inflammation of eyes.

Robust girl, æt. 20, suffering formerly from swelling of lymphatics and eruptions on head; herpetic eruption.

Woman, æt. 22, delicate, but healthy; for five years after contusion scirrhus of l. breast.

Miss G., æt. 25, has always had dysmenorrhœa; prolapsus and dysmenorrhœa.

Girl, æt. 26; suffering since childhood from herpes.

Woman, æt. 27, pale, scrofulous appearance; cramps in stomach during pregnancy.

Digitized by Google

Miss A. P., æt. 28; dysmenorrhœa.
Woman, æt. 30, otherwise healthy; half year after contusion of r. breast, tumor.
Ammon S., æt. 32, well developed, strong looking, five feet four inches in height, sick with peritonitis after having for a year felt tired and overworked, convalescence slow and protracted; anæmic state of brain.
Woman, æt. 33, married; uterine disorder.
Mrs. B., æt. 35, fell, striking r. breast on back of chair, causing a hard tumor.
Young man, tuberculous, after attack of catarrh; dry, tickling cough.
Young man, after falling from second story upon back; pain in lower part of back and in region of small of back.
Lady, accomplished, lively; melancholia.
Strong, corpulent woman; scirrhus in mamma.
Woman, weak, excitable; galactorrhœa.
Mrs. G., æt. about 40; tumor of l. breast of six or seven years' standing.
Mrs. F., æt. 40; tumor on breast.
Edward S., a Russian, æt. 45, formerly soldier in United States army, and under allopathic treatment; dysentery of four years' standing.
Woman, æt. 48; vertigo.
Woman, æt. 48, nervous constitution; enlargement of liver.
A man, æt. 48; first threatened softening of brain, helped by *Laches.*, then right-sided paralysis, particularly facial, helped by *Caustic.*, afterwards diabetes mellitus of two years' standing, with swelling and suppuration of l. parotid and profuse sweat with insomnia.
Woman, æt. 54, plethoric; uterine polypi.
Mrs. S. R., æt. 54, and Mrs. C. N., æt. 62; scirrhous cancer of breast.
Man, æt. 60; after injury to eye by a splinter of wood, traumatic inflammation.
Woman, æt. 60; cancer of stomach.
Lady, æt. 67, unmarried; cough.
Woman, æt. 74, paralyzed many years on l. side; cough.
Mrs. ——, æt. 75; pain in chest during pneumonia.

[48] **Relations.** Antidoted by: *Coffea, Dulcam., Nitr. ac., Nitr. spir. dulc.*
It antidotes: *Mercur.* (swelling of lymphatics); *Nitr. ac., Sulphur* (swollen glands).

:Profuse, yellow and green, thick, fetid discharge from nasal passages of several years' duration; at night the discharge runs down posterior nares, causing choking and other disagreeable symptoms. θChronic nasal catarrh.

[8] **Upper Face.** ‖Flushed face, interspersed with rose-colored spots. θUrticaria.

‖Red face and urticaria over whole body; face, eyelids, lips, ears and hands swollen.

‖Acne which had for a long time disfigured face. θUrinary troubles.

[11] **Taste and Tongue.** ‖Speech embarrassed, cannot talk well. θUrticaria.

‖Tongue coated white. θBronchial and vesical catarrh.

[12] **Inner Mouth.** Pain in mouth, throat and joints.

Slight but painful swelling of lips and mouth.

Dryness of tongue, with inflammation of throat and mouth.

Increased flow of saliva.

[13] **Throat.** ‖Chronic inflammation of throat.

Marked inflammation of throat with great swelling of submaxillary glands and threatened suffocation.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Loss of appetite. θBronchial and vesical catarrh. θUrticaria.

‖Great thirst. θUrticaria.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations, excessive nausea; nausea in throat; gagging and vomiting.

Great nausea with severe colic, somewhat > by sweat.

‖Spitting up of ingesta, with large quantities of mucus; sometimes vomiting of mucus. θGastric catarrh.

[17] **Scrobiculum and Stomach.** Heartburn; pressure and uneasiness in stomach.

Pain in stomach and limbs.

‖Distension and fulness after eating; spitting up of ingesta, with large quantities of mucus; stools coated with mucus; frequent mucous diarrhœa. θGastric catarrh.

‖Gastric troubles during menstruation, or following urticaria.

[19] **Abdomen.** Borborygmus; rumbling in abdomen so loud that it is heard by others; abdomen distended as if it would burst.

Pressure and burning in abdomen in umbilical region.

Severe colic with great nausea, somewhat > by sweat.

‖Colic, with flatulency, indigestion and looseness.

Colic, with watery diarrhœa; colicky tearing pains in

Digitized by Google

abdomen, preceded by drawing pains in bones of thighs.
‖Hypogastrium sensitive. θDysentery.
Painful swelling of inguinal glands.

[20] **Stool and Rectum.** Diarrhœa, with loss of appetite; nausea and vomiting; copious, involuntary, watery stools; < in morning; colic, > by bending double.
‖White, diarrhœic stools, generally in morning, with chilliness and colic, obliging one to bend double.
‖Greenish passages, mixed mucous flocculi. θBronchial and vesical catarrh.
‖White, diarrhœic, mucous stools in morning, mucus is not tenacious or stringy, but comes away in masses. θIntestinal catarrh.
‖Stools often coated with mucus; frequent attacks of mucous diarrhœa. θGastric catarrh.
Debilitating diarrhœa, with tenesmus.
Chronic diarrhœa and dysentery, with or without fever.
Diarrhœa alternating with obstinate constipation.
‖Constipation, with large red blotches over whole body, and fever.
Stools: white, fecal; bloody; watery; copious; involuntary.
During stool: chilliness, tenesmus, drawing, tearing colic.
‖Stitches in rectum and intolerable burning at anus.
Hemorrhoidal tumors lasting for years disappeared under its use, in a case of gonorrhœa.
‖Fistula in ano of ten years standing, with a chronic cough.
Sensation of weight in perineum.
Expulsion of several yards of tapeworm.

[21] **Urinary Organs.** ‖Inflammation of kidneys. θBright's disease.
‖Chronic vesical catarrh; excessive irritation of bladder.
‖Spasmodic pains in bladder every morning, at nearly same hour. θBronchial and vesical catarrh.
‖Frequent calls to urinate, with violent pains in neck of bladder on attempting it, occasional retention of urine; after catching cold.
Pressure on bladder, with fruitless urinary tenesmus and passage of urine in drops.
Tenesmus of bladder and urethritis.
Irritation of urethra and neck of bladder, occurring in old women.
‖Burning in neck of bladder and urethra.
Induration of prostate gland, and great pain in it on urinating.
‖Inflammation of urinary organs; swelling, dilatation

Digitized by Google

and tickling at orifice of urethra, with pulsative pain throughout penis. θGonorrhœa.

Urinary difficulties with hæmaturia.

Copious secretion or retention of urine.

‖Constant ineffectual desire to urinate; contraction of urethra; emission of urine in drops.

‖Great dysuria.

‖‖Urine can only be discharged after great effort; stream thinner than usual, causing great pain under fourchette, when reaching glans penis. θDysuria after gonorrhœa.

Itching, biting and burning in urethra, both before and after urination.

‖Urine emitted in drops. θInduration of prostate.

Urine: foaming; greenish; turbid; with odor of violets.

‖Urine scant and full of sediment, with burning in urethra after micturition. θUrticaria.

‖Urine high colored and thick, depositing abundant reddish sediment. θBronchial and vesical catarrh.

‖Dark red, scanty urine, with brickdust sediment. θUrticaria.

‖Urine hot and scalding, red, depositing thick, mucous sediment. θDysentery.

‖Evacuations of thick, brown, tenacious mucus, tinged with blood; tormina and tenesmus; sensitive hypogastrium. θDysentery.

‖Large amount of viscid mucus, some blood and detached portions of mucous tissue in urine. θBronchial and vesical catarrh.

‖Hæmaturia in women.

Frequent copious discharges of urine, with diabetes.

¤ **Male Sexual Organs.** Violent emotions, with lascivious thoughts, constant excitement of sexual desire.

Long-continued weakness of sexual organs with absence of sexual desire, and irritation of the parts.

‖Chronic cystitis.

Induration of prostate with no increase in size, or slight augmentation with extreme hardness.

Burning and sensation of dryness in region of prostate gland, and in urethra.

Soreness, smarting, itching and swelling of urethra; purulent discharge; urine smells of violets; eruption like measles or urticaria with great itching.

‖Biting pain, burning and itching in urethra before and after urination; meatus swollen and inflamed, with soreness and discharge of pus. θGonorrhœa.

‖Swelling and dilatation of orifice of urethra, with pulsative pains throughout penis.

‖Gonorrhœa in the early stage, no strangury.

Digitized by Google

‖Gonorrhœa: mild cases, or in first part of second stage, when discharge is moderate; much urinary irritation, but no particular difficulty.
‖Yellow, purulent, or mucous discharge from urethra.
‖Chronic gleet with muco-purulent discharge.
‖Swelling and induration of testicles.
Aching-drawing in testicles.
Redness and acrid humor on scrotum and between it and thighs, swelling and tenderness of inguinal glands.
‖Gonorrhœal rheumatism.

[25] **Female Sexual Organs.** Throbbing and pains in ovaries.
Forcing down in bladder and uterine region; drawing in uterus, neck of bladder and vagina; burning and itching in urethra and vagina.
Wandering uterine pains.
Uterine hemorrhages.
Discharge of bloody and thick, purulent mucus from uterus with pressure.
Leucorrhœa arising from gonorrhœa; yellow, purulent gonorrhœa; hæmaturia; strangury.
Milky, acrid, sore-making discharge, with painful micturition.
‖Profuse, green gonorrhœal discharge, with distressing burning and sensation of warmth in vagina, particularly when urinating.
‖Burning red spots in vulva.
‖Itching of vulva.

[26] **Voice and Larynx. Trachea and Bronchia.** Dryness and roughness in larynx.
Constant irritation in larynx, exciting cough.
Hoarseness, especially in morning.
Excoriating pain in larynx.
Bronchial catarrh, soreness of chest and cough.
Bronchitis, with profuse expectoration.
Chronic bronchorrhœa (dilated bronchi), with profuse expectoration of greenish, purulent, fetid mucus.

[26] **Respiration.** Oppression of chest, with labored breathing, while working in a stooping position, as when digging; pressure on sternum; slow respiration.
‖Respiration quick and panting; could breathe easily when bolstered up in bed, mucous râles in whole chest, most in l. lung. θBronchial and vesical catarrh.

[27] **Cough.** Cough, with soreness of chest.
Mucous cough; cough, with shortness of breath.
‖Dry, painful cough, with dryness in larynx and huskiness.
‖Cough during measles.
‡Chronic cough, with fistula in ano.

Digitized by Google

Profuse expectoration of greenish-grey, purulent mucus, of a disgusting odor, sometimes mixed with blood.

‖Severe, harassing cough, with profuse expectoration of thick, heavy masses of yellow or greenish and putrid tasting mucus, sometimes bloody and in such quantities as to cause choking and vomiting. θBronchial and vesical catarrh.

Increased expectoration in phthisis pulmonalis.

‖Spitting of blood.

[28] **Inner Chest and Lungs.** Oppression of chest, with labored breathing as if respiratory passage was filled with mucus.

Pressure and anxiety in chest, with transient flushes of heat to face and burning in palms of hands and soles of feet.

‖Burning in chest; soreness and cough.

‖Dyspnœa, soreness and rawness in chest and occasional stitches in l. side. θBronchial and vesical catarrh.

‖Mucous râles in whole chest, most in l. lung; dulness under l. clavicle and want of normal resonance on whole of l. side. θBronchial and vesical catarrh.

Chronic pulmonary catarrh, with profuse expectoration of a greenish-grey, purulent mucus, of a disgusting odor, sometimes mixed with blood.

‖Hæmoptysis.

[29] **Heart, Pulse and Circulation.** Palpitation.

‖Heart's action tumultuous, pulse irritable and 100 per minute. θBronchial and vesical catarrh.

Quick pulse.

[33] **Lower Limbs.** ‖Pain and swelling of knees and malleoli.

Gonorrhœal rheumatism, especially if located in fibrous part of knee joint.

‖Neuralgia of nervus pudendus internus, in consequence of gonorrhœa; pains begin in scrotum and anus, and extend down to r. side of foot, with severe cramps.

[31] **Limbs in General.** ‖Great restlessness of extremities. θUrticaria.

Pain in limbs, stomach and joints.

[35] **Rest. Position. Motion.** When bolstered up in bed: can breathe easily.

Unable to sit up: weariness, debility.

Bending double: colic >.

While working in stooping position: pressure on sternum, slow respiration.

[36] **Nerves.** ‖Greatly excited during night. θUrticaria.

‖General malaise. θNettlerash.

‖Weariness; debility, unable to sit up. θBronchial and vesical catarrh.

Digitized by Google

Involuntary trembling and movements of head, trunk and extremities.

Hemiplegia after disappearance of a measlelike eruption which had covered whole body.

[37] **Sleep.** ‖Drowsiness or sleepiness. θUrticaria.

‖Restless nights. θBronchial and vesical catarrh.

[38] **Time.** In morning: diarrhœa <; white diarrhœic stools, with chilliness and colic; hoarseness; chilliness.

In afternoon: heat and thirst.

At night: discharge runs down posterior nares, causing choking and other disagreeable symptoms; greatly excited; restless; sweating.

[39] **Temperature and Weather.** After catching cold: pains in neck of bladder on attempting to urinate, occasional retention of urine.

[40] **Fever.** ‖Violent chills, with headache and general malaise. θNettlerash.

‖Chilliness and coldness in forenoon, with pain in dorsa of feet; in afternoon, heat and thirst for water.

‖Uneasiness during two days, followed by a very hard chill, which is succeeded by heat and an eruption; on third day, fever subsides and eruption grows paler.

‖Fever and burning sensation, insomnia and nocturnal agitation. θUrticaria.

‖Fever with large red blotches over body, constipation.

‖Perspiration profuse, of a pungent smell.

Sweat somewhat relieves nausea and colic.

‖Night sweats. θBronchial and vesical catarrh.

‖‖Febrile disturbance during inflammatory stage of gonorrhœa.

[41] **Attacks, Periodicity.** Frequent: mucous diarrhœa; calls to urinate.

Spasmodic: pains in bladder, every morning at same hour.

Occasional: stitches in l. side of chest.

Long-continued: weakness of sexual organs.

During two days: uneasiness, followed by chill, heat and eruption, which sub-ide on third day.

Constant: ineffectual desire to urinate; excitement of sexual desire; irritation in larynx, exciting cough.

Lasting several days: epistaxis of small boys.

Chronic: nasal catarrh; inflammation of throat; diarrhœa and dysentery; hemorrhoidal tumors; cough with fistula in ano; vesical catarrh; cystitis; gleet; bronchorrhœa; pulmonary catarrh.

[42] **Locality and Direction.** Right: pains from scrotum and anus extend down to side of foot.

Left: mucous râles in lung; occasional stitches in side of chest; dulness under clavicle and want of normal resonance on whole side.

Digitized by Google

" **Sensations.** As if abdomen would burst; as if respiratory passage was filled with mucus.
Pain: in mouth, throat and joints; in stomach and limbs; in bladder every morning; in neck of bladder on attempting to urinate; in prostate gland on urinating; under fourchette when urine reaches glans penis; in knees; in scrotum and anus, extending down r. side of foot, with severe cramps; in dorsa of feet; in ovaries.
Stitches: in rectum; in l. side of chest.
Tearing: colicky pains in abdomen.
Drawing-tearing: colic during stool; in abdomen; in thighs.
Drawing: in bones of thighs; in uterus, mouth of bladder and vagina.
Aching-drawing: in testicles.
Itching-drawing: in testicles.
Burning: in abdomen and umbilical region; intolerable, at anus; in neck of bladder and urethra; in urethra; in region of prostate gland; in vagina; red spots in vulva; in palms of hands and soles of feet; in chest.
Forcing down: in bladder and uterine region.
Throbbing: in ovaries.
Pulsative: pain throughout penis.
Twitching: in skin, urethra.
Biting: in urethra; of skin.
Pricking: in skin.
Excoriating pain: in larynx.
Smarting: of urethra.
Soreness: of urethra; of meatus urinarius; of chest.
Rawness: in chest.
Roughness: in larynx.
Wandering uterine pains.
Pressure: in stomach; in abdomen and umbilical region; on bladder; in uterus; on sternum; in chest.
Trembling: in head.
Fulness: after eating.
Oppression: of chest.
Weight: in perineum.
Anxiety: in chest.
Uneasiness: in stomach.
Tickling: at orifice of urethra.
Dryness: of tongue; in region of prostate gland, and in urethra; in larynx.
Warmth: in vagina.
Itching: of eyes; in urethra; of measlelike eruption; in vagina; of vulva; of skin; of nettlerash.
" **Tissues.** Blennorrhagia or profuse discharges from various mucous surfaces; chronic catarrh.

Digitized by Google

Inflammatory affections of intestinal canal, genital and urinary systems.
Vesical and urethral catarrh of both sexes.
‖Emaciation. θBronchial and vesical catarrh.
Post-scarlatinal dropsy.
Dropsy from liver and heart.
Ascites, general anasarca from renal disease, especially albuminuria after scarlatina.
‖Gonorrhœal rheumatism.

[45] **Touch. Passive Motion. Injuries.** Touch: urticaria, skin disagreeable.

[46] **Skin.** Jaundice.
‖Violent itching. θUrticaria.
Itching and pricking in skin; annoying itching with severe inflammation in parts denuded of epithelium.
‖Chilblains.
‖Nettlerash, isolated patches, pale red or bright red, with violent itching.
‖Urticaria over whole body, face red; dry, hot and biting skin (calor mordax), especially disagreeable to touch. θUrticaria.
‖‖Urticaria from gastric irritation with fever and intolerable itching.
Acne of long duration, with much disfigurement of face.
Papular or pustular skin eruption occurring in groups, with pain in limbs and disordered stomach.
‖Large red blotches all over body, with constipation and some fever.
Dark-colored or bright red, elevated, intolerably itching, lentil-sized, measle-shaped exanthema, in clusters, flowing one into another.
‖Uneasiness during two days, followed by a very hard chill, which is succeeded by heat and an eruption of very circumscribed lenticular patches; this eruption gives rise to intense itching and pricking of skin; it is like measles, but without any catarrhal symptoms; on third day fever subsides, and eruption grows paler; on seventh skin has a mottled appearance; the eruption does not wholly disappear for five days; no desquamation.
Violent chill, headache and general malaise; red, hot skin, nettlerash all over body, delirium, drowsiness, scanty urine, which is dark, with brickdust sediment.
Eczema, consisting of small vesicles, smaller and flatter than the mercurial eczema.
Tormenting eruptions only between fingers, and on both forearms as far as bend of elbow; pustules like the itch, with red areolæ, containing a red, watery fluid, with itching pain, desquamation after a few days.

Google

Measles, scarlet rash, roseola; miliary eruption; itch.

[47] **Stages of Life, Constitution.** Girl, æt. 4, scrofulous; dysuria.

Boy, æt. 12; urticaria.

Mr. R., æt. 12; urticaria.

Miss G., æt. 15; lymphatic-sanguine temperament; caught severe cold; bronchial and vesical catarrh.

Miss B., æt. 24; urticaria and gastric disturbances.

M. S., æt., 25; teacher, delicate health, and frequently suffering from throat affections, neuralgic toothache, gastralgia, with constipation; all her ailments are more on r. side; urticaria.

Young German girl; gonorrhœa.

A mason, suffering a year with urinary difficulties arising from catching cold and indulgence in beer and spirits.

Man, æt. 48, with tendency to hemorrhoids, had gonorrhœa several times, in consequence of which he suffered from strictures and dysuria, he was relieved by caustics, nevertheless great irritability of urethra remained; dysuria.

Man, æt. 50, suffering ten years from fistula in ano conjoined with a chronic cough; had an attack of gonorrhœa, for which large doses of balsam copaiva were given, which resulted in curing the fistula and cough.

Mrs. B., æt. 62; nettlerash.

[48] **Relations.** Antidoted by: *Bellad.*, *Calcar.*, *Mercur.*, *Sulphur.*

Compatible: After *Acon.*, when acute symptoms of gonorrhœa have been subdued.

Compare: *Cannab.*, *Canthar.*, *Cubeba*, *Erig.*, *Kali brom.*, *Pulsat.*, *Kali jod.*, *Sepia*, *Senec. grac.*, all of which cause analogous symptoms of mucous membrane, especially of urinary organs.

[1] **Mind.** Peevish and ill-humored, very complaining; scolds and swears at the pains.

[3] **Inner Head.** ‖When moving head quickly, or shaking it, sensation as if wind was blowing through skull.

‖Head feels very large, three times its natural size.

‖Sensation of emptiness and hollowness of head.

Extremely violent headache pressing out at forehead, obliging him to move head from one side to other, but without relief; not > by sitting; > for a short time by almost complete uncovering of burning, hot body.

Sensation as if forehead was flattened by pressure.

‖Pressing headache in forehead; she cannot keep eyes open; > by walking in open air.

‖Violent headache, as if parietal bones were forced asunder; < by stooping.

‖Congestion of blood to head on stooping.

Meningeal inflammation threatening in yellow fever, especially in children.

[5] **Sight and Eyes.** ‖Enlarged pupils. θWhooping cough.

Eyes hot and painful, with sensation as if swimming in tears.

Burning of eyes from candlelight.

Extremely sensitive drawing pain in external wall of l. orbit, whence pain extends down beneath cheek bone, apparently along course of nervus malaris.

‖Pressure, as from sand, in reddened eyes (evening).

‖On closing eyes, they feel hot, as if bathed in tears.

‖‖Eyes pain violently during every motion. θGonorrhœal ophthalmia.

[7] **Smell and Nose.** Subjective odors of smoke, onions, etc.

Great dryness of mucous membrane of nose and throat.

Digitized by Google

Dry coryza, nose stopped up, ulcerated nostrils.
‖ Profuse secretion of mucus dropping through posterior nares, obliging frequent hawking; inspired air feels cold.
‖ Violent, fluent catarrh of odorless mucus, looking like melted tallow, leaving greasy looking spots on linen.
Bleeding of nose, one nostril at a time, especially at night.
Ulceration of nose.
‖ Painful ulcer in r. nostril and on inner side of wing of nose, affecting nasal bones, with a sensation as if they were pressed asunder.

[8] **Upper Face.** ‖ Grows purple and black in face. θ Whooping cough.
Left zygoma painful, as if bruised; < when touched.
‖ Heat in face on bending head forward.

[9] **Lower Face.** Pain in l. articulation of lower jaw, as if sprained, on drawing jaw far downward, and also when biting and yawning.
‖ The lips are chapped, swollen and painful.

[10] **Teeth and Gums.** ‖ Every tooth on l. side feels as if set on edge; as if teeth were too close to one another, or as if a tenacious body was lodged between them.

[11] **Taste and Tongue.** ‖ White coated tongue. θ Whooping cough.

[12] **Inner Mouth.** ‖ Painful swelling of l. submaxillary gland; < when swallowing or bending head forward.

[13] **Throat.** ‖ Mucous membrane of throat and chest very sensitive, any change of air sets patient coughing. θ Whooping cough.
‖ Constant hawking, owing to an accumulation of mucus in posterior nares; inhaled air feels cold. θ Catarrh.
‖ Great dryness of fauces.

[14] **Appetite Thirst. Desires, Aversions.** ‖ Violent thirst, no appetite. θ Whooping cough.
‖ Longing for acids and salt food.

[15] **Eating and Drinking.** ‖ After dinner, hot cheeks and forehead, with cold feet.
Food tastes insipid, like sawdust; farinaceous food tastes like straw; beer tastes sweet.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖ Nausea, with dryness of tongue and violent headache, < when sitting up.
Severe fit of coughing, followed by a loose cough, with vomiting of quantities of tough, ropy, stringy mucus.

[20] **Stool and Rectum.** ‖ Constipation (for six days), followed by copious papescent stool.
Profuse discharge of mucus from anus at night.

[21] **Urinary Organs.** ‖ Burning urine.

Digitized by Google

ǁLoam-colored urine, with similar sediment.

[32] **Male Sexual Organs.** ǁWeakened sexual power, with spermatorrhœa. θBalanitis.

ǁInvoluntary seminal emissions during sleep (without dreams or erections).

ǁRed, flat ulcers on glans and inner surface of prepuce, with profuse yellow, ichorous discharge.

ǁSuperficial, lardaceous ulcers, or, more commonly, red ulcers, on glans penis or prepuce, with copious, thin, offensive smelling discharge, which can be easily removed. θChancre.

ǁUlcers flat and extremely sensitive to touch, sometimes bleeding; chancres on any part of penis or scrotum very sensitive to touch.

ǁThe whole glans and inner surface of prepuce secrete a yellowish-green offensive matter; great sensitiveness, redness and swelling.

ǁSwelling of prepuce; margin of prepuce feels sore when linen touches it.

ǁThe frænum is painful, as if pricked by needles.

ǁProfuse perspiration of genitals.

ǁBalanitis.

ǁVery painful soft chancres.

ǁSyphilitic erosions, exuding a thin, badly smelling ichor; constant trickling of mucus from posterior nares into fauces; smooth, copper-colored spots on palm of hand and finger.

[35] **Voice and Larynx. Trachea and Bronchia.** Laryngismus stridulus.

[36] **Respiration.** ǁOn deep inspiration, sensation as if air passing through air passages was icy cold; inclination to cough, with difficult hawking up of bronchial mucus, in morning.

Difficult, oppressed respiration.

ǁCrowing during inspiration. θWhooping cough.

ǁLaryngismus stridulus resembling whooping cough.

Asthma.

[37] **Cough.** Convulsive spasmodic cough, occurring in paroxysms.

ǁIn some forms of violent spasmodic cough; "firing minute guns" of short, barking cough, all day, and for half an hour or so towards evening, increasing to a violent spasmodic paroxysm.

ǁNervous and spasmodic cough; so violent that children lose their breath and become purple and black in face; during deep inspiration, sensation as if air passing through air passages was icy cold, inclination to cough and difficult hawking up of bronchial mucus; every atmospheric change causes coughing. θTuberculosis.

Google

‖Fits of violent spasmodic cough, commencing with gasping for breath and continuing with repeated crowing inspirations until he grows purple and black in face and is quite exhausted; < in latter part of night and mornings; larynx and trachea more involved than chest; mucous membrane of throat and chest very sensitive, and change of air sets patient coughing; loss of appetite and thirst; severe fit of coughing followed by a loose cough, with vomiting of quantities of tough, ropy, stringy mucus. θWhooping cough.

‖Whooping cough or any other kind of cough, when attack comes on with a very rapid cough, and attacks follow so closely as to almost run into each other; cough until patient falls back as limber as a rag.

‖Whooping cough, with bleeding from mouth and nose.

‖Cough, with morning aggravation, smothering sensation before paroxysms.

‖Frequent paroxysms of violent coughing; spasms of glottis and larynx so severe as to produce a sound, in coughing, similar to spasmodic croup; paroxysms of cough every ten or fifteen minutes, with occasional intervals lasting an hour; cough < latter part of night and forenoon; > in afternoon and evening; she seems quite weak, with quick pulse, white coated tongue, considerable thirst, no appetite, enlarged pupils and rapid loss of flesh. θWhooping cough.

Nervous cough, asthma Millari and endemic whooping cough.

‖Cough, with great sensitiveness of air passages.

‖Cold expectoration.

[28] **Inner Chest and Lungs.** Tuberculosis; spasmodic cough; cold expectoration.

[29] **Heart, Pulse and Circulation.** Pulse full and hard.

‖Quick pulse. θWhooping cough.

[30] **Outer Chest** Pains in sternum, with cough.

[31] **Neck and Back.** Neck stiff.

Pressing pains in shoulder blades with cough.

Small of back pains as if broken.

[32] **Upper Limbs.** ‖Red, itching, miliary eruption rough, feeling like a grater to the touch, on both elbows.

Pain in wrists as after writing much and rapidly.

‖Smooth, copper-colored spots on palm of hand and finger. θSyphilis.

[33] **Lower Limbs.** Pain in knees, tibiæ and tarsal joints as after walking a great deal.

[34] **Limbs in General.** After a short walk in evening, great lassitude in all the limbs.

[35] **Rest. Position. Motion.** Standing: falls asleep.

Google

Motion: eyes pain violently during.
Sitting up: nausea and headache <.
When shaking head or quickly moving it: sensation as if wind was blowing through skull.
Violent headache, obliging him to move head from side to side, but without relief, not > by sitting.
Bending head forward: heat in face; pain in l. submaxillary gland <.
On closing eyes: they feel hot, as if bathed in tears.
On drawing jaw far downward: pain in l. articulation, also when biting or yawning.
Stooping: headache <; congestion of blood to head.
Walking: headache >; lassitude in all the limbs after; great fatigue after.

[36] **Nerves.** ‖Great weakness. θWhooping cough.
Great fatigue after a walk.
Hysteria.

[37] **Sleep.** Drowsiness; yawning; the joint of the jaw pains.
Very sleepy; falls asleep while standing.
Cannot sleep before midnight; tosses about.
Starts as soon as she falls asleep, from a frightened dream.

[38] **Time.** In morning: inclination to cough, difficult hawking of mucus; spasmodic cough <.
In afternoon: cough >.
Evening: pressure in eyes; cough >; lassitude in limbs.
At night: bleeding of nose; profuse discharge of mucus from anus; cannot fall asleep before midnight.
Latter part of night: spasmodic cough <.

[39] **Temperature and Weather.** Heat: chill > by outward.
Uncovering of body: headache > for a short time; hot parts feel cold.
Feels cold uncovered and too hot when covered.
Open air: headache >.
Change of air: sets patient coughing.

[40] **Fever.** Heat without thirst or sweat; full, hard pulse.
Chill, but skin of usual warmth, with headache and violent thirst.
Chill relieved by outward heat.
Hot parts feel cold when uncovered.
Dry heat, no thirst, no sweat.
Tertian or quartan intermittent; dropsy following suppression of chills.

[41] **Attacks, Periodicity.** Frequent: paroxysms of violent coughing.
Constant: hawking; trickling of mucus from posterior nares into fauces.
Every ten or fifteen minutes: paroxysms of cough, with occasional intervals lasting an hour.

Digitized by Google

For half an hour: towards evening, spasmodic paroxysms of coughing.
All day: short barking cough.
For six days: constipation.
Tertian or quartan intermittent.

[42] **Locality and Direction.** Right: painful ulcer in nostril, affecting nasal bones.
Left: drawing in external wall of orbit, extending down beneath cheek bone; zygoma painful; pain in articulation of lower jaw; every tooth on side as if set on edge; painful swelling of submaxillary gland.

[43] **Sensations.** As if wind was blowing through skull; as if head was very large, three times its natural size; as if forehead was flattened by pressure; as if parietal bones were forced asunder; as if eyes were swimming in tears; as of sand in eyes; as if nasal bones were pressed asunder; as if l. zygoma was bruised; as if sprained in l. articulation of lower jaw; as if teeth on l. side were set on edge; as if teeth were too close to one another, or as if a tenacious body was lodged between them; as if frænum was pricked by needles; as if air passing through air passages was icy cold; as if smothering before cough; as if small of back was broken.
Pain: in abdomen with coughing; in knees, tibiæ and tarsal joints, as if after walking a great deal; in joint of jaw; in sternum; in wrists.
Drawing: in external wall of l. orbit, extending down beneath cheek bone.
Burning: of body; of eyes from candlelight.
Pressing out: at forehead.
Pressing: in forehead; in shoulder blades.
Pressure: in eyes.
Hollowness: in head.
Emptiness: in head.
Dryness: of fauces; of tongue; of nose and throat.
Itching: miliary eruption on elbows.

[44] **Tissues.** Difficult breathing and spasmodic cough.
‖Rapid loss of flesh. θWhooping cough.
Scrofula; syphilis complicated with psora.

[45] **Touch. Passive Motion. Injuries.** Touch: pain in l. zygoma <; ulcers on scrotum or penis very sensitive; eruption on elbows feels like a grater.
From touch of linen: margin of prepuce feels sore.

[46] **Skin.** ‖Copper-colored spots on skin.
Smooth, red spots on skin and palms of hands, at first coral color, then darker red, and finally coppery.
Pustular eruption resembling varioloid.

Digitized by Google

Measles; purpura; psoriasis.

[47] **Stages of Life, Constitution.** May be found useful for a combination of syphilis and psora.

Carrie, æt. 2; whooping cough.

Girl, æt. 13, nervous temperament, has several times manifested hysterical symptoms; has not yet menstruated; cough.

Woman, æt. 45; suffering for three years from cough.

Woman, æt. 52; suffering for two weeks; eruption on elbows.

[48] **Relations.** It antidotes: *Mercur.*

Complementary: *Sulphur.*

Compare: *Bellad., Caustic., Coffea, Droser., Hyos., Lyssin,* (inhaled air feels cold); *Nitr. ac., Nux vom., Mephitis; Staphis.* (gastralgia).

CORNUS CIRCINATA AND FLORIDA.

Dogwood. *Cornaceæ.*

From the numerous indigenous species of dogwood, the *Circinata* and *Florida* are the only ones proved. Cornus sericea has been given clinically in intermittent fever by the old school.

The *Circinata* was proved by Marcy, Crane, Füllgraff and Freeman (see Encyclopedia, vol. 3, p. 565), and the *Florida* (potentized to the 30th in pure snow water) by G. H. Bute in the Summer of 1838; also proved and used by J. Walker, M. B. Roche and M. Macfarlan.

The symptoms of the *Florida* are marked —, and are not in the Encyclopedia.

CLINICAL AUTHORITIES:— —*Inflammation of chest*, MSS.; —*Cough with stitches in chest*, Bute, MSS.; *Ague* (three cases), E. J. Bates, Am. Hom. Obs., vol. 1, p. 29; —*Intermittent fever* (four cases reported), A. A. Roth, Raue's Rec., 1875, p. 270.

[1] **Mind.** Forgetful of familiar matters.

Indifference with respect to subjects which usually interest.

Drowsiness with indifference.

Feeling of indolence and loss of mental and physical energy.

Inability to fix mind upon any subject; reads without being able to appreciate the ideas of the subject.

Mind confused; particularly on rising in morning.

Depression of spirits and petulance.

Digitized by Google

[2] **Sensorium.** —‖Constant dizziness. θInflammation of chest.
Dulness and sense of fulness in head, with distension of stomach > after stool.
Dulness and weight in head, particularly in temples, > by coffee.
Heaviness of head, with nausea.

[3] **Inner Head.** Aching and throbbing pain over r. eyebrow.
Dull pains over eyeballs; unusual pulsations, extending from front to back of head.
‖Pulsating headache in temples.
‖Throbbing headache mostly in temples, > by coffee.
Drawing sensation from back of head to nose.
Deep seated pulsating pains in occipital and parietal regions.
Heaviness of head, with great disposition to sleep, succeeded by severe cutting pains in whole head, and extreme mental and physical prostration, > by cup of strong coffee.
‖Headaches, with drowsiness and confusion of ideas; semilateral headaches; deep seated pains under vertex; dull heavy pains over whole head, with drowsiness, lassitude, nausea and general sweat.
‖‖Shooting, aching or throbbing pains in head.
Tensive, aching pains throughout whole head.
—Severe headache, with quick pulse and violent pains in bowels.
—Fulness and pains in head, with gastric derangement.
—Cerebral fulness, with constant tendency to sleep.
Congestion of blood to head and face.
‖‖Bilious cephalalgia.
Headache < by walking, stooping or shaking head.

[5] **Sight and Eyes.** —‖Left eye weak, like a cloud over it; elbows and wrists painful; pains at waist, as if she would break in two; sighs very often; gagged, as if to vomit, very often in morning; chilly sensations come on frequently, although she is warm; pains run up side of trunk or body like lightning, seems as if they would give her a twist while running up.
Eyes sunken, hollow; dull and heavy as after a debauch; dark circles under them; yellowish tinge of conjunctiva.
Sense of weight or a feeling of contraction around eyes.
‖Soreness of eyeballs; aching pains through them.
Eyeballs and lids feel heavy, as if pressed down by a weight; great inclination to close eyes in sleep.
Scrofulous ophthalmia, herpes of eyelids.

[6] **Hearing and Ears.** Ringing in ears.

[7] **Smell and Nose.** ‖Pricking in nose and nasal bones.
Drawing sensation from back of head to nose.

Digitized by Google

Itching of nasal mucous membrane.
Coryza early in morning.

[8] **Upper Face.** Heat and burning in face.
‖Burning of cheeks without redness, but feel flushed.
‖Countenance yellow or pale, sallow, sunken, and indicative of suffering and debility.

[11] **Taste and Tongue.** Pungent, bitter or insipid taste; yellowish or white fur upon tongue.
Ulceration of tongue, gums and mouth.

[12] **Inner Mouth.** Smarting in mouth and throat.
Aphthous ulceration of mouth in children.
Ulceration of buccal mucous membrane from a cold or gastric derangement.

[13] **Throat.** Smarting and burning in mouth, throat and stomach, with desire for stool.

[14] **Appetite, Thirst. Desires, Aversions.** Thirst for cold drinks.
— ‖Drinks little and often; hunger soon after eating; desire for sour things, pickles, pastry, cakes, etc. θInflammation of lungs.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations.
‖‖Acid pyrosis; painful and slow digestion.
‖Gagging as if to vomit, in morning.
Nausea with confused and heavy pain in head.
‖Nausea, with bitter taste, and aversion to all kinds of food, and desire for sour drinks.
Nausea, sticky sweat and feeling of exhaustion.
— Nausea, vomiting and pain in stomach, with headache.
— Nausea, vomiting and violent pains in bowels.

[17] **Scrobiculum and Stomach.** Sensation of faintness in stomach and bowels.
‖Sense of emptiness in stomach.
‖Distension of stomach and bowels with wind.
‖Burning sensation in stomach.
Fulness and oppression in stomach, with bad taste and dry mouth.
‖Pulsative pains in stomach, head and bowels.
‖Pain in pit of stomach.
— ‖Indigestion and heartburn.

[18] **Hypochondria.** ‖Chronic hepatitis and bilious derangements; jaundice.

[19] **Abdomen.** Constant working of bowels, as if they were all in motion.
Borborygmus; large emission of very offensive flatus.
Distension of bowels from wind, > by a loose fecal discharge.

Digitized by Google

‖Griping in umbilical region, with much rumbling of wind.

Contraction and shooting pains from centre of chest (thoracic muscles) down to lower part of abdomen, pains coming on severely at intervals and then remitting.

Bearing down feeling in abdomen and rectum; creating an urgent desire for stool.

— Violent pain in bowels, with purging.

Abdominal pains more acute during stool.

[20] **Stool and Rectum.** ‖Urging to stool; early in morning in bed; with fulness and uneasiness of bowels; frequent but ineffectual.

‖Diarrhœa, with excessive debility and nervous excitability.

‖Diarrhœa of a dark and bilious, or watery and mucous character, with griping, burning and tenesmus, nausea, drowsiness, dulness of head and general perspiration.

Stools: dark, bilious, very offensive; dark green, thin and offensive; greenish, slimy; mucous, bilious or watery; frequent and scanty; discharge of offensive flatus.

‖Bearing down pains in rectum and bowels, with urgent desire to go to stool.

Hard, dry and scanty stool with pressing in rectum.

Ulceration of mucus membrane of rectum.

‖Bowel complaints generally, with pains in bowels before, during and after discharges.

‖Dysenteries and diarrhœas, accompanied by inactivity of liver.

Cholera infantum, bowel complaints of infants while teething; bilious diarrhœa; bilious colic; jaundice; biliary derangements generally.

Chronic diarrhœa.

[21] **Urinary Organs.** Frequent inclination to pass water.

— Difficult urination in morning in old men.

‖Urine scanty and high colored.

[22] **Male Sexual Organs.** ‖Increased sexual desire, but lack of power.

Frequent strong and persistent erections during night.

[23] **Female Sexual Organs.** ‖Leucorrhœa.

[26] **Respiration.** Frequent inclination to expand chest by taking a long breath.

[27] **Cough.** ‖Cough with sharp stitches in chest.

‖Dry, spasmodic cough, or tedious chronic cough, with mucous expectoration. θScrofulosis.

[28] **Inner Chest and Lungs.** — ‖Stitches in region of l. clavicle extending towards r. side, < by taking a deep breath; constant tickling in chest compelling him to

Digitized by Google

cough, with difficult expectoration; constant dizziness; chilliness followed by heat with thirst and finally sweat; drinks little and often; hunger soon after eating. θInflammation of lungs.

Choking sensation in upper part of thorax.

Soreness of chest on rising in morning.

—Stitch in r. chest as from a knife thrust, with vertigo.

Sore, bruised feeling or stitches in chest or back.

Sensation of dragging, or bearing down, on each side of chest.

Shooting pains from centre of thorax to lower part of abdomen.

‖Intermittent shooting pains in chest and abdomen.

‖Rheumatic or neuralgic pains in chest, back and limbs.

—Ineffectual urging to stool, followed by cutting pains in ribs of l. side, with pain under l. scapula as if a piece of flesh was being forcibly twisted out; later, copious stool.

Perceptible pulsations in chest.

[29] **Heart, Pulse and Circulation.** Palpitation of heart.

—Increased strength and frequency of pulse, with fever heat; pulse quick and hard.

‖Acceleration of circulation.

[30] **Outer Chest.** ‖Dragging pains in sides of thorax and in lumbar region, < by motion, bending over and turning in bed.

Griping and shooting pains from centre of chest (thoracic muscles) to lower part of abdomen, pains severe at intervals.

Fine scarlet rash upon chest, with itching.

[31] **Neck and Back.** —Sensation like a jerk or shock in nape of neck.

‖Pains at the waist as if she would break in two; pains run up whole l. side of trunk or body like lightning, seems as if they would give her a twist while running up; pain in elbows and wrist.

Boring pain in shoulder blades.

Dull pain in small of back, with drowsiness and lassitude.

Sore pain in lumbar region, < when bending over, or to either side.

[32] **Upper Limbs.** —Neuralgic sharp pains begin in r. elbow, extending to hand and shoulder, passing down r. side and then up l.; pain settled about heart, causing feeling of pressure and palpitation; could not use arm because of pain and lameness; hands and feet swollen, pains of a darting, needlelike kind, very severe; difficulty of passing water.

Sense of weakness and fatigue of arms.

Digitized by Google

Burning and itching sensation in hands and arms.
—Numbness and stitches in wrist joints.
Coldness of hands, following a loose stool.
—Blueness of fingers.

[33] **Lower Limbs.** Pain in r. hip while lying in bed.
Legs weak and tremulous, particularly when ascending; sensation of weariness in legs.
Itching on legs and thighs; burning sensation in feet.
Coldness of feet following a loose stool.

[34] **Limbs in General.** Weakness of extremities.
—Cramps in popliteal spaces, with tension in flexor muscles, also in l. arm.

[35] **Rest. Position. Motion.** Lying: pain in r. hip.
Motion: pain in sides of thorax and lumbar region <.
Turning in bed: pains in sides of thorax and lumbar region <.
Shaking head: headache <.
Bending over: pains in sides of thorax and lumbar region <; pain in lumbar region <.
Bending to either side: soreness in lumbar region <.
Stooping: headache <.
Walking: headache <.
When ascending: legs weak and tremulous.
Exercise: sweat and great fatigue from slight.

[36] **Nerves.** ‡General debility and impaired mental energy, with great drowsiness; in heat of Summer.

[37] **Sleep.** ‡Great disposition to sleep, with entire loss of mental and physical energy; heavy feeling in head.
‡Drowsiness, with great depression of spirits and deep-seated pains in head; disposition to perspire.
Sleepy and weak during day, with dull pains in head, back and limbs.
‡Sleep unrefreshing and disturbed by unpleasant dreams.

[38] **Time.** In morning: on rising, mind confused; gagging; coryza early; urging to stool, early in bed; difficult urination, in old men; soreness of chest on rising.
‡Symptoms generally < on waking in morning.
During day: sleepy and weak, with dull pains in head, back and limbs.
At night: frequent erections; sleepy but cannot sleep, must get up and look out of window; itching in paroxysms <.

[39] **Temperature and Weather.** Cold drinks: thirst for.
From catching cold: ulceration of buccal mucous membrane; inflammation of chest.
Summer: debility, impaired mental energy, and great drowsiness in heat of.

[40] **Fever.** Chilliness, accompanied by nausea, dull pain in head and feelings of debility and languor.

Digitized by Google

—Chill with cold, clammy skin.

Chilly sensation, succeeded by transient flushes of heat.

—Chilliness, followed by heat with thirst and finally sweat. θInflammation of lungs.

—Chill followed by heat with thirst, drinks often, but not much at a time, then sweat; constant giddiness; hungry soon after eating; desire for sour things, later for sweets.

—First moderate heat, then light perspiration, ending with a crawling sort of chill, beginning in back and going upward. θIntermittent fever.

—Increased temperature of body, hot sweat, fulness in head.

Flushes of heat and coldness in alternation, followed by cold perspiration.

Transient flushes of heat, pervading whole body, with shooting pains through brain.

—Heat: with violent headache; thirst; hot, but moist skin; stupor.

Paroxysm preceded for days by sleepiness, dull, heavy headache, sluggish flow of ideas; slight exercise causes sweat and great fatigue; during apyrexia, debility and painful diarrhœa; first moderate heat, then light perspiration, ending with a crawling sort of chill; when all the stages seem aborted and the patient says his chills amount to nothing; weak, languid, loss of appetite.

General perspiration, with nausea, drowsiness and heavy pain in head.

General clammy sweat, with headache, nausea, pain in back, lassitude and confusion of ideas.

—Sweat rolls down from her; chilly but warm; cramps from sides of her waist, running towards pubes; sleepy, but couldn't sleep all night; had to get up and look out of window, she was so sleepless; could not sleep in daytime, sweating all the time.

Bilious remittents, and the characteristic gastric and intestinal symptoms present.

41 **Attacks, Periodicity.** Frequent: sighing; gagging; chilly sensations; ineffectual urging to stool; diarrhœa; inclination to urinate; erections; inclination to expand chest, by taking a long breath.

Constant: dizziness; tendency to sleep; working of bowels; tickling in chest; sweating.

Daily: paroxysms of ague.

Chronic: hepatitis and bilious derangement; diarrhœa; cough.

" **Locality and Direction.** Right: aching and throbbing over eyebrow; stitch in chest; pain in hip.

Digitized by Google

Left: eye weak; stitches in region of clavicle extending towards r. side; cutting in ribs, with pain under scapula; tension in arm.

From front to back: pulsations in head.

" **Sensations.** As if a cloud was over l. eye; as if she would break in two at waist; as if pains would give her a twist while running up body; as if eyeballs and lids were pressed down by a weight; as if bowels were all in motion; as if a knife was thrust into r. chest; as if a piece of flesh was being forcibly twisted out under l. scapula; as of a jerk or shock in nape of neck.

Pain: deep seated, under vertex; in bowels; in elbows and wrists; in stomach; in pit of stomach; in r. hip; in back; in chest, abdomen and legs; at waist.

Stitches: sharp, in chest, in region of l. clavicle extending towards r. side; in r. chest; in wrist joints.

Darting, needlelike pain: in arm.

Prickling: in nose and nasal bones; heat of whole surface with; in skin.

Cutting: in whole head; in l. ribs.

Shooting: in head; from centre of chest down to lower part of abdomen; in brain.

Lightning-like pains: run up side of trunk or body.

Boring: in shoulder blades.

Drawing: from back of head to nose.

Tensive pain: throughout whole head.

Tension: in flexor muscles, also in l. arm.

Burning: in face; of cheeks; in mouth, throat and stomach; in hands and arms; in feet; heat of whole surface with; in skin.

Contraction: around eyes; from centre of chest down to lower part of abdomen.

Bearing down: in abdomen and rectum; on each side of chest.

Dragging: on each side of chest; in lumbar region; in sides of thorax.

Rheumatic or neuralgic pains: in chest, back and limbs.

Neuralgic pains: begin in elbow, extend to hand and shoulder, pass down r. side, then up l. and settle about heart.

Throbbing: over r. eyebrow; in temples; in head.

Pulsating: headache in temples; deep-seated pains in occipital and parietal regions; pains in head, stomach and bowels.

Pulsations: from front to back of head; in chest.

Griping: in umbilical region; from centre of chest to lower part of abdomen.

Cramps: in popliteal spaces; from sides of waist running towards pubes.

Digitized by Google

Colic: pains.
Smarting: in mouth and throat; stomach.
Bruised feeling: in chest and back.
Soreness: of eyeballs; of chest; in chest and back; in lumbar region.
Aching: over r. eyebrow; in head; through eyeballs.
Choking: in upper part of thorax.
Confused pain: in head.
Dull pain: over eyeballs; over whole head; in small of back; in back and limbs.
Heavy pain: in head.
Pressure: about heart.
Pressing: in rectum.
Oppression: in stomach.
Weight: in head, particularly in temples; around eyes.
Heaviness: of head; of eyeballs and lids.
Dulness: within head.
Weakness: of arms.
Weariness: of legs.
Faintness: in stomach and bowels.
Uneasiness: of bowels.
Fulness: within head; in stomach; of bowels.
Emptiness: in stomach.
Numbness: in wrist joints.
Tickling: in chest.
Itching: of nasal mucous membrane; of rash upon chest; in hands and arms; on legs and thighs; heat of whole surface with; in skin; of scalp, legs and feet; of external genitals.

[41] **Tissues.** Its chief action appears to be upon the liver and the intestinal canal; a marked influence is likewise exerted upon the brain.
Accelerated action of heart and arteries, accompanied by hot skin, burning of face, great drowsiness, headache, inability to fix the mind, nausea, depression of spirits, pains in back, chest, abdomen and legs, lassitude, debility, sunken eyes, yellow tinge of conjunctiva, sallow countenance, diarrhœa of dark, bilious matter, or slimy and watery fluid, tenesmus, colic pains, throbbing pains in temples, distressing dreams, tympanitic distension of abdomen, constant desire to sleep.
‖Intermittent fevers, with chills and sweat predominating; the last stages of remittent and typhoid fevers, when diarrhœa sets in, with profuse sweats and general physical and mental exhaustion.

[45] **Touch. Passive Motion. Injuries.** Scratching or rubbing: < itching.

[46] **Skin.** ‖Yellow or earthy appearance of skin.

Digitized by Google

Heat of whole surface, with itching, burning or prickling sensations.
Prickling, burning and itching sensation of skin.
Itching of scalp, legs and feet, < by scratching or rubbing.
Itching in paroxysms, < at night.
Eczema, pruritis or similar affections of external genitals.
Skin covered with copious clammy perspiration.
Fine scarlet rash on breast, with itching.
Dry or moist eruption; scrofulosis with cough.
Dry or moist tinea; itching of scalp.
Vesicular eruptions; urticaria; miliaria; roseola.

47 **Stages of Life, Constitution.** Young man, æt. 18; daily paroxysms of ague.
Young man, æt. 20, sick seven or eight weeks, had taken usual remedies without effect; ague.
—George Schafer, after catching cold; inflammation of chest.
Man, æt. 35, sick seven weeks with chills, fever and vomiting of blood; remedy given in alternation with *Tart. emet.*

48 **Relations.** Compare: *Cinchon., Eup. perf., Hydrast.* and *Nux vom.*

CREOSOTE. (See Kreosotum).

[1] **Mind.** ‖Child sits or stands up in bed making various quick movements without being conscious of what he is doing; this is followed by a short interval of quietness, in which he may regain consciousness, but without any knowledge of what has passed; this remission followed by another attack, and so on; febrile condition with congestion to head; eyes fixed and bright; redness and heat of face; urine pale and scant; desires neither food nor drink.

‖On attempting to write something down, cannot, on account of loss of recollection.

‖Greatly concerned about his life, believes that he will die, is no longer fit for business. θEpistaxis.

Extravagant ideas and great loquacity.

‖Sings involuntarily, on hearing even a single note sung; laughs at herself, but soon sings again in spite of her determination to stop.

‖Jumping, dancing, laughing, whistling; very affectionate, wants to kiss everybody.

Gayety; uncommon mirth and cheerfulness; witty.

‖Changeable disposition, depression and hilarity.

Alternations of excessive happy affectionate tenderness and rage.

Digitized by Google

‖Restless, anxious, sorrowful mood; deep melancholy.
Excessive timidity.
‖Vexation, contradicted by bursts of laughter.
‖He takes everything in anger and suddenly repents of having injured others.
‖Great ill humor; behavior of relatives and friends excites her to anger, and she is at the point of permitting an outbreak of passion towards them, but at this moment she feels calm; at next moment this calmness seems a weakness; she is vexed with herself, and her anger becomes greater than ever; this very unusual vacillation of mood lasts several hours.

[2] **Sensorium.** Giddiness with fainting.
Vertigo: as if intoxicated, in forehead; in room, but not in open air; with confusion; and heat of whole body; staggering and giddiness when raising head after lying down at night.
‖Congestion of head, with nosebleed.

[3] **Inner Head.** Sudden shock in forehead and temples.
Pain in forehead in evening by candlelight, with burning and pressure in eyes.
‖Sudden broad thrust in r. temple, extending deep into brain, causing him to start; above l. frontal eminence, extending deep into brain.
Pulsating pains in l. side of head extending into eye.
Sudden cold sensation on l. parietal bone, as if a drop of cold water had fallen on it.
When moving head, sensation as if brain was loose.
‖Congestion of head; violent throbbing.
Nervous or menstrual headache.
‖Headache during climacteric period with throbbing, pulsating pains in various parts of head, pressure in eyes, dilatation of vessels of head and of other parts of body; < during period in which she was accustomed to have menstrual flow, pain continuing at that time two or three days without remission, preventing sleep.

[4] **Outer Head.** Vertigo when raising head, with heat of body.

[5] **Sight and Eyes.** ‖Eyes fixed and shining. θCerebral disturbance.
‖Sudden flashes before eyes like electric sparks.
‖Appearance of a spot jumping up and down before sight.
On reading, the paper looks pale red or rose color, shines.
‖The light seems dim, as if obscured by a veil.
Acute tearing pain in head and r. eye, with dimness of vision, and a sensation as if cold air was rushing through eye.
‖Sore burning in eyes after reading awhile; also dimness, must wink frequently.

Digitized by Google

‖Pupils much dilated.

‖Pain in eye to top of head, pain in l. eye darting to r.; sensation of cold wind blowing across eyes. θSclerochoroiditis post. θAsthenopia.

‖A few moments' use of eyes causes feeling in them as if room was filled with smoke; feeling of dryness and burning, very soon succeeded by lachrymation; pressure on closed lids relieves somewhat.

‖Feeling in eyes as if she had been violently weeping, with corresponding appearance of weeping; beginning in l. and extending to r. eye; feeling of something alive and moving in abdomen (r. side). θConjunctivitis.

‖Feeling as though water was constantly coming into eyes, only in room.

‖Sensation as if she had been looking through too sharp spectacles.

‖Feeling as of biting smoke in eyes.

Worse from looking fixedly at an object, cannot even thread a needle.

Ophthalmia menstrualis in patients of a sanguine temperament, subject to attacks of congestion and inclination to spasms (hysterical) at climacteric period.

‖Extreme photophobia and most copious lachrymation; impossible to read without a torrent of tears inundating eyes, so that light gets confused and veiled.

Lachrymation in room; not in open air.

‖Constant winking, with tearful suffusion of eyes.

‖Must wink and wipe eyes frequently, as though a film of mucus was over them.

Twitching of eyelids.

‖Jerking, twitching and itching in upper lid.

Nightly spasms of lids.

‖Sensation as if eyelids were swollen.

‖Inclined to press lids tightly together from time to time.

‖Heating and lancinating pains in eyes after surgical operations.

[6] **Hearing and Ears.** ‖Humming and roaring in ears, causing impairment of hearing, < when stooping.

[7] **Smell and Nose.** ‖Mild pressure in forehead precedes attack of nosebleed; he is very anxious, believing that he will die, constant coldness of hands and feet; towards evening, congestion of blood to head, with warmth of face, quivering in l. eyelid, sour taste in mouth, pulse full and quick.

‖‖Epistaxis of very tenacious, thick, black blood, every drop drawn into a thread, with cold sweat in large drops on forehead.

‖Violent sneezing; coryza with stringy mucus.

Digitized by Google

‖Bloody mucus, or dark, stringy blood from nose.

[8] **Upper Face.** ‖Yellowish, sallow color of face. θEpistaxis. θMetrorrhagia.

‖Livid complexion, or circumscribed, burning red spots.

‖Red, hot face, or alternate redness and paleness.

‖Redness and heat of face, with congestion to head. θCerebral disturbance.

‖Sensation of warmth in face, with congestion to head and twitching in l. eyelid. θEpistaxis.

[9] **Lower Face.** ‖Lips cracked.

[11] **Taste and Tongue.** ‖Tongue moist, dirty and coated in centre. θMetrorrhagia.

‖Tongue coated white, papillæ elevated, > after breakfast.

[12] **Inner Mouth.** Unusual warmth in mouth.

‖Sour taste in mouth. θEpistaxis.

‖Foul odor from mouth. θMetrorrhagia.

[13] **Throat.** ‖Feeling as if uvula was elongated, during and when not swallowing.

‖Elongation of uvula.

‖Sensation in œsophagus as from a plug.

‖Scraping in throat in evening before and after, but not during time he takes his food.

‖Scraping rough throat.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Excessive thirst for cold drinks; thirst in evening.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Eructations, tasteless.

‖Violent heartburn.

‖Feeling of nausea in chest and throat.

‖Nausea, disappearing in open air.

[17] **Scrobiculum and Stomach.** ‖Great feeling of emptiness in pit of stomach.

‖Distension of stomach and abdomen.

‖Sensation of fermentation in stomach, or of motion upward and downward, hither and thither.

‖‖Sensation as if something living was jumping about in pit of stomach.

‖Fulness and bloatedness of stomach; eructations and rancid pyrosis; nausea and difficult vomiting of decomposed fluids; fine cutting pain beginning in cardiac region, extending to and fixing itself in stomach; abdomen sunken; no stools during paroxysms; pulse about 60, intermittent, as also beat of heart; great dyspnœa; icteric symptoms. θAfter operation for hemorrhoids.

Very violent heartburn.

[19] **Abdomen.** Bloated abdomen.

‖‖Sensation in abdomen as if something living was jumping about, with nausea, faintness and shivering.

Digitized by Google

In night when waking she experiences repeated kicks in l. side of abdomen as from a fœtus.

‖Stitches in abdomen arresting respiration, with uterine inflammation.

‖Sensation of heaviness in abdomen, with pressing towards uterus.

‖Cutting pains deep in lower abdomen extending towards small of back. θUterine hemorrhage.

Pain in groins.

[20] **Stool and Rectum.** ‖Obstinate constipation caused by stagnation in portal system; costiveness of newborn children when based on venous disturbances.

‖Stools contain dark, stringy blood.

‖Sensitive, dull, long stitch near l. side of anus, from time to time.

‖Stitches and itching at anus; stitch extending from anus through small of back into l. groin, < during an inspiration.

‖Crawling in anus, as from thread worms.

‖Intolerable writhing in anus affecting whole nervous system painfully.

[21] **Urinary Organs.** ‖Urine scant and pale. θCerebral disturbance.

[22] **Male Sexual Organs.** ‖Excitement of sexual desire.

[23] **Female Sexual Organs.** ‖Sensation as if menses would appear, with colic and pressing towards genitals.

‖Menstruation too early and too profuse.

‖Uterine flow during new or full moon.

‖Menses profuse and lasting too long, but come at proper time; blood dark, clotted, stringy, viscid.

‖Dysmenorrhœa, with dark, stringy blood; sensation of commotion in stomach upward and downward, hither and thither, during painful menstruation.

‖After non-appearance of menses for ten weeks, sudden severe bearing down pains in abdomen and small of back with severe hemorrhage; blood flowing in large, black, coagulated masses from uterus, greatly exhausting patient.

‖Menses suppressed; sensation of rolling or tumbling in abdomen.

‖After dancing or a long walk during catamenia, with or without pain, when there is a discharge of dark, stringy blood; it comes away in dark or black strings; sense of rolling or bounding in stomach or abdomen; violent cephalic throbbing.

Nervous excitement; palpitation of heart; fearfulness.

‖‖Metrorrhagia of dark, viscid, stringy blood, in black clots, or after overheating, straining or lifting, also after abortion or delivery; < from slightest motion.

Google

‖Daily discharge of bright red blood, viscid, slimy, coagulated, with vertigo, pains in head, stitches in both sides under false ribs, frequent palpitation; small and frequent pulse, pains in back and great exhaustion.

Leucorrhœa with paroxysms of acute stitches from pudendum to r. thigh, as if a knife was suddenly thrust into these parts every now and then, gradually penetrating into the parts and with increasing pain.

[24] **Pregnancy. Parturition. Lactation.** Imaginary pregnancy.

Motions of child are felt too violently, and are painful.

‖Threatened abortion, especially when there is a hemorrhage of dark, stringy blood; miscarriage third month.

‖Quarter of an hour after delivery, placenta still remaining, blood in large clots; womb dilated, soft; fainting; pale as death; pulseless, extremities cold as ice. θPostpartum hemorrhage.

‖Lochia dark, stringy; abdomen distended.

‖Discharge composed of black strings; as fast as blood flows from vulva it is formed into black, stringlike masses.

‖Offensive smelling uterine hemorrhage; or when the patient, in consequence of long-continued hemorrhage, has fallen into a state of nervous erethism.

[26] **Respiration.** Oppression of chest, with desire to draw a long breath, > by yawning.

‖Offensive, sickly odor of breath.

[27] **Cough.** ‖Violent attack of exhausting dry cough, relieved by laying hand on pit of stomach.

‖Cough, with spitting of dark, stringy blood.

[28] **Inner Chest and Lungs.** ‖Heaviness of chest, must frequently take a deep breath.

‖Sensation as if something living was hopping in chest.

‖Jumping, as if from something living in lower portion of r. chest, as if beneath the ribs.

‖Dull stitches in l. chest.

[29] **Heart, Pulse and Circulation.** ‖Anxious palpitation of heart. θUterine hemorrhage.

‖Palpitation of heart on going up-stairs; great debility.

Pulse: feverish, accelerated; full and quick (epistaxis); slow, scarcely 60 (cerebral disturbance); weak and intermitting, hardly accelerated (metrorrhagia); pulseless.

‖Excited circulation. θHemorrhages.

[30] **Outer Chest.** Peculiar jerking pain in interior of l. breast, as if drawn towards the back by means of a thread.

[31] **Neck and Back.** Swelling of neck.

Sensation of coldness in back.

[32] **Upper Limbs.** ‖Pain on moving upper arm, as if head of humerus was loose and easily dislocated; cracking.

Digitized by Google

Sensation as if arms and hands had gone to sleep.
The arms (forearm) feel heavy, as if bruised.
Burning, tingling and tension in tips of fingers.
‖Chilblains on hands and fingers.

[83] **Lower Limbs.** Sudden concussion in buttocks as from a fall, while sitting.
‖Violent cracking of hip or knee joint, when stooping.
Great sensation of weariness in knee joint and lower legs.
Knees give way.
Trembling of feet on falling asleep.
Burning and tingling of feet.
Aching of soles from standing.
‖Chilblains on toes.

[84] **Limbs in General.** Limbs go to sleep (at night).
‖Constant coldness of hands and feet. θEpistaxis.
‖Extremities cold as ice. θMetrorrhagia.

[85] **Rest. Position. Motion.** Sitting: sudden concussion in buttocks, as from a fall.
Motion: metrorrhagia < from slightest.
Raising head after lying down: staggering and giddiness; vertigo.
On moving head: as if brain was loose.
On moving upper arm: pain, as if head of humerus was loose and easily dislocated.
Stooping: < humming and roaring in ears; violent cracking of hip or knee joint.
On going up-stairs: palpitation of heart.
Child sits or stands up in bed, making various quick movements, without being conscious of what he is doing.
After dancing or long walk during catamenia, blood dark and stringy, bounding in stomach or abdomen, violent cephalic throbbing.

[86] **Nerves.** Great nervous exaltation and depression.
‖Excessive prostration and weariness in evening, as from severe physical exertion, accompanied by great sleepiness, with feeling as if eyelids were swollen; literary occupation relieves.
‖Fainting. θEpistaxis. θMetrorrhagia.
Hysteria; excessive mirth and cheerfulness alternating with melancholy; childish follies; pleasant dementia, with paleness and headache.
‖Jerking in muscles.
‖Spasmodic contractions of single sets of muscles.
Chorea, every seven days, with great hilarity, singing and dancing.

[87] **Sleep.** Continuous yawning and desire to sleep.
Drowsiness; somnolency; sleepiness daytime, after meals.

Digitized by Google

ISings in sleep.
IDreams; confused; frightful.

[38] **Time.** In daytime: sleepiness.
In afternoon: chill, growing < towards evening, with shivering and trembling.
Towards evening: violent heat over whole body, great thirst, chill <.
In evening: pain in forehead; when reading, sees as through a gauze; congestion of blood to head, quivering in l. eyelid, sour taste in mouth, pulse full and quick; scraping in throat; thirst; excessive prostration, weariness and sleepiness.
At night: staggering and giddiness when raising head after lying down; when waking, as of kicking of fœtus in l. side of abdomen; limbs go to sleep; sweat.

[39] **Temperature and Weather.** In room: vertigo; lachrymation.
In hot weather: epistaxis.
Open air: nausea >; desire for.
Cold drinks: excessive thirst for.

[40] **Fever.** IChill in afternoon, growing < towards evening, with shivering from back down legs; trembling.
Chilliness, only on back part of body.
IThirst, with chill and heat.
IFlushes of internal heat, prickling and crawling in skin.
IHeat, principally of head and face, with paleness of cheeks and thirst.
IHeat in face and in front of head.
IHeat, intense redness of face, distension of bloodvessels.
IViolent heat over whole body, chiefly in head, with redness of face and great thirst, without much dryness of mouth; towards evening.
IInternal heat and great anguish. θMetrorrhagia.
ISweat scant, only at night, and then cold and debilitating.
ISweat only on lower half of body.
IContinual foul-smelling sweat, which aggravates the debility. θHemorrhage after confinement.

[41] **Attacks, Periodicity.** Sudden: shock in forehead and temples; broad thrust in r. temple, or above l. frontal eminence; cold sensation on l. parietal bone; flashes before eyes like electric sparks; severe bearing down pains in abdomen and small of back, after non-appearance of menses.
Frequent: winking; palpitation; drawing a long breath; changes in sensations.
Constant: winking; coldness of hands and feet; yawning and desire to sleep; foul-smelling sweat.
Nightly: spasms of lids.

Digitized by Google

Every seven days: chorea.
During new or full moon: uterine flow.
For two or three days: headache during climacteric period.
For twenty-two days: hemorrhage from uterus.
For six weeks: daily discharge of blood, with disturbed menses.
For three months: discharge of blood from uterus.

" **Locality and Direction.** Right: sudden broad thrust in temple; acute tearing pain in eye, and sensation as if cold air was rushing through eye; as if something was alive and moving in side of abdomen; stitches from pudendum to thigh; jumping, as from something living in lower portion of chest, as if beneath ribs.

Left: sudden broad thrust above frontal eminence; pulsating pains in side of head, extending into eye; sudden cold sensation in parietal bone; quivering in eyelid; as of kicking of fœtus in side of abdomen; stitch near side of anus; stitch from anus through small of back into groin; dull stitches in chest; jerking in interior of breast.

From l. to r. eye: pains darting; feeling as if she had been weeping, with corresponding appearances.

" **Sensations.** As if a drop of cold water had fallen on l. parietal bone; as if brain was loose; as if cold air was rushing through r. eye; as if cold wind was blowing across eyes; as if room was filled with smoke; as if she had been violently weeping; as if something was alive and moving in abdomen; as though water was coming constantly into eyes; as if she had been looking through too sharp spectacles; as of biting smoke in eyes; as though a film of mucus was over eyes; as if eyelids were swollen; as if uvula was elongated; as of a plug in œsophagus; as of fermentation in stomach, or of motion upward and downward, hither and thither; as if something living was jumping about in pit of stomach, or in abdomen; as of kicking of fœtus in l. side of abdomen; as if menses would appear, with colic or pressing towards genitals; as of rolling and tumbling in abdomen; as if a knife was suddenly thrust into pudendum and r. thigh, gradually penetrating into these parts with increasing pain; as of something living and hopping in chest, also in lower portion of r. chest, as if beneath ribs; as if l. breast was drawn towards back by means of thread; as if head of humerus was loose and would be easily dislocated; as if hands and arms were gone to sleep; arms as if bruised.

Pain: in forehead; in eye to top of head; in groins; in head; in back.

Digitized by Google

Stitches: in abdomen; sensitive, dull, long, near l. side of anus; in anus; from anus through small of back into l. groin; in both sides under false ribs; from pudendum to r. thigh; dull in l. chest.
Thrust: sudden broad, in r. temple, extending deep into brain; above l. frontal eminence.
Lancinating: in eyes.
Cutting: in cardiac region, extending to and fixing itself in stomach; in lower abdomen extending towards small of back.
Jerking: in upper lid; in interior of l. breast; in muscles.
Tearing: in head and r. eye.
Concussion: sudden, in buttocks as from a fall.
Shock: sudden, in forehead and temples.
Burning: in eyes; red spots on face; of feet; in skin.
Burning-tingling: in tips of fingers.
Sore burning: in eyes.
Pulsating pains: in l. side of head extending into eye; in various parts of head.
Throbbing: in various parts of head.
Writhing: intolerable, in anus, affecting whole nervous system painfully.
Twitching: in upper lid.
Quivering: in l. eyelid.
Scraping: in throat.
Bearing down: in abdomen and small of back.
Aching: of soles from standing.
Tension: in tips of fingers.
Oppression: of chest.
Pressure: in eyes; in forehead; towards uterus.
Heaviness: in abdomen; of chest; of arms as if bruised.
Weariness: in knee joints and lower legs.
Heartburn: violent.
Tingling: of feet; in skin.
Crawling: in anus, as from thread worms; in skin.
Prickling: in skin.
Itching: in upper lid; in anus.
Dryness: in eyes.
Fulness: of stomach.
Emptiness: in pit of stomach.
Nausea: in chest and throat.
Warmth: in face; in mouth.
Heat: in eyes; in face and head.
Coldness: on l. parietal bone; in back; of hands and feet.

" **Tissues.** Irritation and congestion of brain, causing hysterical mania, congestion of womb and metrorrhagia.

" Hemorrhage from various parts, blood black, viscid, clotting, forming itself into long, black strings, hanging from the bleeding orifice.

Google

Tumors, with ulceration and characteristic bleeding.

[45] **Touch. Passive Motion. Injuries.** Laying hand on pit of stomach: > attacks of exhausting dry cough.
Pressure: on closed lids > dryness and burning in eyes.
Inclined to press lids tightly together from time to time.
Bruised parts: painful suppuration.

[46] **Skin.** ‖Pricking, crawling, burning and tingling in skin.
‖Scarlet redness of whole body, or scarlet spots on skin.
‖Painful suppuration of bruised parts, old, cicatrized wounds reopen and suppurate.
‖Lipoma and encephaloma of scalp.
‖Chilblains.

[47] **Stages of Life, Constitution.** Frequent and great changes in sensations; the feelings changing suddenly from greatest hilarity to deepest despondency.
Especially suitable for women.
Headache during climacteric period.
Epistaxis in children who develop too rapidly or slowly.
Boy, æt. 10, whose father died suddenly in insane asylum; a febrile condition with congestion to head, followed by cerebral disturbances, after awaking from a sleep.
Girl, æt. 10, lively disposition; chorea.
Girl, æt 20, hemorrhagic diathesis; bright red epistaxis, particularly in hot weather.
Woman, æt. 36, haggard and weak; for three months discharge of blood from uterus.
Woman, æt. 36, good constitution, poorly nourished, after an apparent abortion; hemorrhage from uterus for 22 days.
Woman, æt. 38, pale, thin, of slender build, menstrual function disturbed, menses lasting three weeks; for six weeks daily discharge of blood.
Woman, æt. 40, with tendency to hemorrhoids, after non-appearance of menses for ten weeks in consequence of which she imagines herself pregnant; uterine hemorrhage.
Mrs. M., æt. 48, medium size, fair skin, blue eyes, light hair, mild and sensitive disposition; hæmoptysis.
Man, æt. 50, subject to hemorrhoids, for which he had undergone an operation; icteric symptoms, with gastric disturbance.
Man, æt. 56, strongly built, able; epistaxis.
Man, æt. 70; epistaxis, in spells, without apparent cause.

[48] **Relations.** Antidoted by *Acon.*, *Bellad.*, *Opium.*
Compatible: with *Cinchon.* at intervals has cured many cases of menorrhagia; *Nux vom.*, *Pulsat.*, *Sulphur.*
Compare: *Acon.*, *Act. rac.*, *Bellad.*, *Calcar.*, *Fluor. ac.* (sensation of cold wind blowing across eyes), *Ipec.*, *Ignat.*, *Laches.* (pains in eye to top of head), *Nux vom.*, *Opium*, *Platin.*, *Pulsat.*, *Rhus tox.*, *Ruta*, *Sabina*, *Sepia* and *Sulphur.*

CROTALUS HORRIDUS.

Rattlesnake poison. *Crotalidæ.*

The first regular provings of the poison were made by C. Hg., and his provers, who proved the first and second triturations; see Hering's Monograph on the Effects of Snake Poisons, 1837; a single proving with the third dilution on an unmarried lady, æt. 35, by Stokes, is recorded among the aforementioned, and the effects of the bite, from various sources, recorded in vol. 3 of Encyclopedia. The Monograph on *Crotalus*, by J. W. Hayward, of Liverpool, published 1884, is the most complete record of the effects of Crotalus virus on the sick and well we have had hitherto. We have drawn from it largely to complete our collection of clinical and guiding symptoms, rendering due thanks to the author of the valuable monograph who thereby enriched our literature.

CLINICAL AUTHORITIES.—*Delirium tremens*, Mackechnie, Raue's Rec., 1874, p. 62; *Delusions during incipient stage of senile dementia*, Hayward's Mon., p. 255; *Sensorial disturbance*, Hayward's Mon., p. 260; *Headache*, Neidhard, Hayward's Mon., pp. 267, 268; *Sick headache, with vertigo*, C. Hg., MSS; *Affection of eyes*, Neidhard, Hayward's Mon., p. 272; *Amblyopia*, Decran, Rück. Kl. Erf., vol. 5, p. 147; *Ciliary neuralgia*, Decran, Rück. Kl. Erf., vol. 5, p. 141; *Otorrhœa*, Hayward's Mon.; *Ozæna*, Nankivell, Hayward's Mon., p. 276; *Distortion of face*, Hayward's Mon., p. 280; *Papular eruption on face*, Hayward's Mon., p. 280; *Diphtheria*, Hayward's Mon., p. 287; Cushing, Organon, vol. 1, p. 223; *Spasm of œsophagus*, S. P. Burdick, Hayward's Mon., p. 296; *Bilious vomiting*, Hayward's Mon., p. 367; *Atonic dyspepsia*, Hayward's Mon., p. 296; *Hepatic disorder* (2 cases), Neidhard, Hayward's Mon., p. 301; *Peritoneal inflammation*, Hayward's Mon., p. 300; *Perityphlitis*, Hayward's Mon., p. 300; *Intestinal hemorrhage*, Hayward's Mon., p. 305; *Hæmaturia* (4 cases), Hayward's Mon., p. 310; *Dysmenorrhœa*, Hayward's Mon., p. 310; *Mastitis and milk leg in a primipara*, C. Hg., MSS.; *Pertussis*, Hayward's Mon., p. 317; *Palpitation of heart*, Hayward's Mon., p. 327; *Tubercle on wrist*, Hayward's Mon., p. 337; *Red spot on finger*, Hayward's Mon., p. 337; *Ecchymoses on lower limbs*, Hayward's Mon., p. 342; *Tingling and prickling in hands and l. leg*, Hayward's Mon., p. 338; *Paralysis of extensors of l. foot after typhus*, C. Hg., MSS.; *Neuralgia*, Neidhard, Hayward's Mon., p. 268; *Apoplexy*, Weber, Rück. Kl. Erf., vol. 1, p. 91; *Chronic sleeplessness*, Hayward's Mon., p. 357; *Bilious fever*, W. Jackson Simon, Hayward's Mon., p. 368; *Bilious remittent fever*, Neidhard's Mon., p. 49; Hayward's Mon., p. 366; *Yellow fever*, Neidhard's Mon., Hayward's Mon.; (2 cases), Plate, Rück. Kl. Erf., vol. 4, p. 664; also used successfully by Hardenstein in an epidemic; *Pyæmia*, Bryce, Hayward's Mon., p. 369; *Petechia*, Hayward's Mon., p. 352; *Erysipelas after vaccination*, Hayward's Mon., p. 352; *Scarlatina maligna* (2 cases), Hayward's Mon., p. 362; *Morbilli* (4 cases), Hayward's Mon., p. 365; *Pustular eruption after vaccination*, Bryce, Hayward's Mon., p. 353; *Furuncle*, Weber, Rück. Kl. Erf., vol. 4, p. 183.

[1] **Mind.** Memory weak; obtuse, stupid, cannot express himself correctly; makes ridiculous mistakes in spelling.

Digitized by Google

Perception diminished.
Confused speech; disconnected answers, with coldness of skin and rapid pulse.
Torpor, sluggishness, incoherency, hesitation and quiet indifference.
‖Mental delusions, such as mistakes in keeping his accounts and in writing letters, forgetfulness of figures, names and places; awaking in the night struggling with imaginary foes; imagines himself surrounded by enemies or hideous animals; taking antipathies to members of family. θIncipient stage of senile dementia.
‖Delirium: with languor, drowsiness, stupor; at night; with moans; with wide open eyes; in yellow fever.
‖Loquacious delirium, with desire to escape from bed.
‖Muttering delirium of typhus.
‖Delirium tremens, nearly constant drowsiness, but with inability to sleep; trembling; numbness of extremities; repeated attacks; broken down constitutions.
Mania in zymotic diseases and when connected with puerperal or ovario-uterine disease.
Moaning and groaning.
‖Pains in head, with oppression of chest, burning fever and accelerated pulse; loss of speech, sopor from which he cannot be aroused, muttering and lockjaw. θApoplexy.
Marked indifference, seems only half alive; utter apathy.
‖Sadness, her thoughts dwell on death continually.
Oppression, as if brain had been intoxicated by carbonic acid, or by degraded or non-oxygenated blood.
‖Depression, anxiety and lowness of spirits. θIntestinal hemorrhage.
‖Nervousness and depression of spirits. θHeadache.
‖Excessive sensitiveness; moved to tears by reading.
Weeping mood, agony and despair.
‖Melancholy, with timidity, fear; anxiety; weeping; or snappish temper.
Melancholia, with timidity, fear, distress and anguish.
Suspicion and snappishness, or quiet indifference.
‖Anxious and pale, with cold sweat.
Anxiety and distress, mental and bodily.
Great anxiety, intense restlessness, much delirium.
Anguish, moaning and groaning, with sleeplessness.
‖Snappish temper; irritable, cross, infuriated by least annoyance.
Intense restlessness, twitching and nervous agitation.
Lethargy, weakness, debility, powerlessness, staggering, trembling, vertigo, numbness, loss of co-ordination of movements.
Fits of drowsiness or coma.

Google

[2] **Sensorium.** Vertigo: with faintness, weakness, nervous trembling; with pale face; with falling and loss of consciousness; epileptic; auditory; cardiac, with soft, weak pulse; anæmic, > resting head; with venous congestion and degraded blood; with dilated pupils; from lightning or sunstroke; from fright.

Fainting: on assuming an upright position; in attacks; and falling.

Attacks of dizziness, fainting and weakness, with occipital headache, several times a day.

Apoplectic convulsions, especially at onset of some zymotic disease.

Apoplexy in hemorrhagic or broken down constitutions, or in inebriates.

[3] **Inner Head.** Severe frontal headache, with coma and delirium, difficult deglutition, nausea and bilious vomiting.

Awakes in morning with headache over eyes. θDysmenorrhœa.

Headache extending into eyes.

Dull, heavy pain and heat over eyes and in sides of nose, also dull, pressing pain at back of ear, heat in forehead, lightness of head in open air, sickness of stomach in morning, nausea and vomiting, with nervousness and depression of spirits.

Headache in forehead above eyes, in temples, < in r., with vertigo, nausea and vomiting of bile; is obliged to lie down; constipation; > from walking in open air.

Pressure and oppression above eyes.

Bilious headache every few days, beginning behind l. ear and passing around lower forehead as a pressing down on eyes, with nausea and vomiting. θDistortion of face.

Severe pain at centre of forehead; dilated pupils; profuse menses.

Dull, heavy, congested feeling in front of brain, < from exerting intellect.

Frontal headache in l. anterior lobe, particularly at its under surface.

Pressure and heavy pain on top of head from 6 A.M. until evening.

Very severe pain in r. eye and top of head, on r. side down back of neck, at intervals, for twenty years.

Sick headache, with vertigo, heat on top of head and general sweat.

Throbbing and heat in l. side of head, with nausea before menstruation; vomiting green bile; urine high colored.

Head aches all over, with high fever, < at night, with great drowsiness; aching in all the bones; heat in forehead and burning in chest, < from motion.

Digitized by Google

‖Frightful headache. θDiphtheria.

‖Dull, heavy, throbbing occipital headache, faint spells; hunger and general trembling.

‖Terrible headache; pain as from a blow in occiput. θCerebro-spinal meningitis.

Headache: especially of a dull, heavy, aching, drawing, pressing, compressive, or pulsating character; shooting, or stinging; in morning on awaking, generally going off while dressing; after mental exertion; confusion and loss of memory, especially for words and figures; vertigo, nausea, vomiting and malaise.

Headache as if constricted, then sensitiveness of brain; pulsations; sensitiveness of heart when lying on l. side.

Cerebral congestion; severe headache, vertigo, nausea or vomiting; accompanying zymotic or septic diseases.

Meningitis resulting from extension of ear disease; toxæmic, alcoholic, albuminuric, scarlatinoid, varioloid, particularly at period of effusion, accompanied by paralytic symptoms or mental deficiency.

Softening of brain, hydrocephaloid, or apoplexy following toxæmic states in broken down constitutions.

Outer Head. ‖Violent itching of scalp; eruptions, pustules, boils, carbuncles, with tendency to unhealthy hemorrhagic contents, or recurrent, or slow, or with œdematous surroundings.

Falling off of hair, especially as a result of toxæmia, such as scarlatina, typhus, variola, etc.

Sight and Eyes. Illusions, blue colors, dimness, or loss of vision; vanishing of sight while reading.

Momentary disappearance of vision, with profuse lachrymation.

‖Amblyopia, caused by grief and overuse of eyes in sewing; cutting pains around eyes; muscæ volitantes and various colored flames.

Retinal hyperæsthesia in debilitated, broken down strumous and hemorrhagic constitutions.

Hemorrhages into retina, whether occurring during course of retinitis albuminurica and other diseases, or when it seems to be of spontaneous origin.

Retinitis, especially albuminuric and syphilitic.

Amblyopia, amaurosis, especially from hemorrhage, debility and exhaustion.

Diplopia; glaucoma.

Ecchymosis, chemosis, conjunctival hemorrhage, especially in course of zymotic disease, menstrual irregularities and in hemorrhagic states of body.

Ophthalmia, conjunctivitis, iritis, especially as occurring in eruptive diseases, variola, morbilli and syphilis, or other blood diseases.

Digitized by Google

Exopthalmic goitre; when traceable to any exhausting or toxæmic cause, such as overlactation, excessive or suppressed menstruation.
Dilated pupils; blue rings around eyes.
Outward distortion of eyes.
Paralysis of ocular muscles.
‖Yellow color of eyes.
‖Blood exudes from eye.
‖Tearing, boring pain, as if a cut had been made around eye, sometimes sticking in character and < morning and evening; great sensitiveness to light, especially lamplight; lids swollen in morning, with pains in forehead and occiput; palpitation of heart, especially at menstrual periods. θCiliary neuralgia.
Sensation of dryness and burning; redness with a zone around cornea.
‖Burning in eyes; redness with lachrymation.
‖Pressure and oppression above eyes.
‖Eyes weak and very red, with agglutination of lids, sight very weak; photophobia.
Blepharitis; œdema of, or hemorrhage into eyelids, especially when of an erysipelatous character and when occurring in the course of septic or zymotic diseases.
Ptosis.
To clear up the vision after an attack of keratitis or kerato-iritis.

[6] **Hearing and Ears.** Sensitive to noises.
‖Feeling of fulness in ears.
Deafness; illusions of hearing; auditory vertigo.
Otorrhœa the result of exanthemata, menstrual irregularities, alcoholism, albuminuria, naso-pharyngeal catarrh, diphtheria, typhoid, syphilis, etc.
Erysipelas of external ear, in broken down or hemorrhagic constitutions.
Abscess and furuncle in meatus, or external ear; frostbite.
‖Severe otorrhœa after scarlatina, offensive and sanguinolent, with considerable deafness.
‖‖Blood oozes from ears.

[7] **Smell and Nose.** Epistaxis; at onset or during course of zymotic and septic diseases; or in broken down constitutions, or depraved state of blood and where blood appears thin, degraded, uncoagulable, dark; also with flushes of face, vertigo or fainting.
Catarrh; with sanguinolent discharge.
‖Ozæna; especially left by exanthemata or syphilis, discharge sanguinolent rather than offensive.
‖Redness and blueness of point of nose; with swelling and coldness. θOld inebriates. θZymosis.

Digitized by Google

‖‖Bleeding from nose and all the orifices of body.

[8] **Upper Face.** Expression: besotted; anxious, pale; excited, flushed; of indifference.

Paleness of face, as in faintness.

‖Yellow color of face.

‖Flushes of face.

Color: livid, bloated; purple, face tumid; blue around sunken eyes; chalky; deathlike pallor; leaden.

Red, puffed face.

‖Distended red face with delirium tremens and fever.

‖Wakes up during night grinding her teeth and face much distorted, mouth and nose drawn to l. side.

‖Frequently recurring erysipelas of face.

Cold sweat, drawn features, formication, trembling and quivering of lips and eyelids.

‖Face swollen, puffiness at angles of lower jaw; swelling of parotid and submaxillary glands.

‖Acne: all varieties; of masturbators; of drunkards.

‖Discoloration, blueness, varicosis of nose and lips. θHeart disease. θAsthma.

Neuralgia of a dull character, chronic or periodic.

‖Parotitis.

[9] **Lower Face.** ‖Lips swollen; stiff and numb.

‖Lockjaw. θApoplexy.

‖Copious, red, itching, papular eruption on face, especially chin, which has existed for some months since menstruation has been delayed.

[10] **Teeth and Gums.** ‖For years subject to grinding of teeth during sleep, most of molars broken; mouth and nose drawn towards l. side. θDistortion.

‖Gums: white; swollen; painful; borders reddened.

[11] **Taste and Tongue.** ‖Complete loss of taste. θHepatic disorder.

‖Tongue and all around throat feel tied up, he cannot speak a word.

‖Tongue very red, smooth and polished, feels swollen. θAtonic dyspepsia.

‖Tongue: red and sore; yellow; stiff and numb.

‖Tongue yellowish-brown, dry in centre. θRemittent.

‖Foul tongue having red tip. θPerityphlitis.

‖Swelling of tongue till there is no more room in mouth, with inflammation.

‖Tongue swollen to nearly twice the normal size.

‖‖Tongue protruded.

Œdema of tongue; after sting of insects.

Glossitis; erysipelatous or gangrenous symptoms.

Syphilis of tongue.

Cancer of tongue, with much tendency to hemorrhage.

Google

[13] **Inner Mouth.** ‖Fetid breath; peculiar mouldy smell from mouth. θBilious remittent. θMalignant intermittent. θYellow fever.

‖Mouth feels foul and sticky on awaking. θDyspepsia.

‖Stomacace or putrid sore mouth; cancrum oris.

‖Salivation; flow bloody or frothy.

[13] **Throat.** ‖Sensation of tight constriction of throat.

Throat dry and swollen, with thirst; connective tissue greatly infiltrated; glands enlarged.

Scraping, rancid sensation down œsophagus to stomach.

Sensation of a plug in throat to be swallowed, or sensation of contraction or choking, or as if uvula or velum was elongated or stiff, or as of a dry spot or a tickling in throat, especially l. side, < on awaking from sleep.

Sore, raw or pricking pain, especially at l. side, near root of tongue, or extends to ear, or is as if proceeding from ear; < from empty deglutition and from swallowing fluids rather than solids.

Neuralgic drawing in fauces, < l. side, near root of tongue, almost causing choking.

‖Deglutition of any solid substance quite impossible; soup must be strained in order to remove all meat fibre and solid particles. θSpasm of œsophagus.

‖Fauces much swollen and dark red; pulse 120, very small and weak; skin hot but perspiring; frightful headache; great prostration, can hardly raise himself in bed; great thirst. θDiphtheria.

Nervous sore throat; pain out of all proportion to the visible trouble; fauces dry, great irritability and sensitiveness to dry or cold air.

Sudden sore throat as if uvula and velum were swelling, with dry mouth; preceded by palpitation and trembling of heart.

Quinsy; with much venous congestion, dark, bluish color of surrounding parts, much œdema, tonsils bulge and are tender to pressure at angles of lower jaw; pain < from empty deglutition; especially with scarlatina or diphtheria.

‖Angina tonsillaris; constriction of throat; tongue yellow.

‖Diphtheria, throat swelling fast; difficult swallowing.

‖Malignant diphtheria, life threatened by blood poisoning, much œdema or gangrene of fauces or tonsils, or much swelling at angles of lower jaw, head thrown up and backward, difficult respiration, dark, swollen, puffy countenance; great prostration, much tremulousness, very soft, scarcely perceptible pulse; or if vomiting or diarrhœa be present.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Hunger with trembling, weakness and occipital headache.

Digitized by Google

‖No appetite, extreme thirst. θPerityphlitis.
‖Unquenchable burning thirst. θDiphtheria.

[16] **Hiccough, Belching, Nausea and Vomiting.** Heartburn; œsophagus as if full of a rancid fluid.
Eructations sharp, sour; acrid or rancid.
Sickness of stomach in morning.
Nausea and malaise, anxiety; deathly sickness.
Ineffectual retching, with feebleness.
‖Nausea and vomiting. θHeadache.
Vomiting: and giddiness; incessant with thirst; preceded by faintness; violent, of food; green; of bile; of blood; on least exertion.
‖Nausea on movement; bilious vomiting every month after menstruation. θHepatic disorder.
‖Bilious vomiting, with violent fever and delirium; dulness of head, with great apathy and forgetfulness; everything tastes bitter, and sometimes acid; very fetid diarrhœa; tongue dark brown; constant drowsiness; dryness of skin; urine high colored.
‖Bilious vomiting, with anxiety, palpitation, weak pulse.
‖Cannot lie on r. side or back without instantly producing dark green vomiting; soreness in back part of head on pressure, < on motion or sitting up in bed; drawing in r. side of head, < after eating and producing great dizziness in back part of head; sleeps only in middle of night, after which she feels better; feels sick if she sleeps in daytime; light hurts the eyes and everything looks yellow (at first everything looked blue).
‖‖Black vomit. θYellow fever.

[17] **Scrobiculum and Stomach.** ‖Frequent faint, sinking, hungry sensation about epigastrium, with trembling and fluttering sensation a little lower down, followed by flushes of heat over whole body; extreme weakness; tongue very red, smooth and polished, and feels swollen; mouth foul and sticky on awaking.
‖Weight on stomach, tremulous weakness, as from impending evil; soreness, tenderness.
Violent cramp in stomach after eating.
‖Agonizing pain, restlessness, coldness, weak pulse.
Pylorus constricted; lining of stomach turgid.
‖Cannot bear clothes around stomach and hypochondria.
‖Painfulness in pit of stomach.
‖Stomach irritable, unable to retain anything.
‖Hæmatemesis from ulceration.
‖Distressing sensation of sinking, craving for stimulants.
Gastric disturbances of nervous origin, cerebral, sensorial, or reflex, and such as occur on invasion of zymotic or septic diseases, or in connection with menstrual or uterine complaints, jaundice, nephritis, albuminuria, etc.

Digitized by Google

Hæmatemesis; blood has little or no tendency to coagulate, or is dark, as if from passive congestion or malignant disease, or atonic ulcer, or when disease is sympathetic, as in vicarious menstruation.

Cancer: much hemorrhage or much vomiting of mucus, slimy or sanguinolent.

[18] **Hypochondria.** ‖Intolerance of clothing about epigastric region and hypochondria.

Shooting in region of liver.

‖Stitches in region of liver on drawing a long breath, < by pressure; complete loss of taste; constipation; urine jellylike and red like blood.

‖Pain in region of liver, also on top of shoulder; pulsating in ascending aorta, nausea on movement, stools white; bilious vomiting every month after menstruation.

‖Aching in liver; great heaviness in stomach, with vomiting of everything she eats in morning, can eat better in afternoon, feels sometimes as if she could eat fat pork; continual acid taste on tongue; constipation; menses too early and too sparse, dark at first; roaring in ears; great numbness of arms and legs, with coldness at times; skin very dark brown. θBilious vomiting.

Passive hepatic congestion; especially when from heart disease, or from imperfect performance of uterine functions, or if a sequel of malarial fever.

Acute atrophy of liver.

‖Violent pain in l. side near last ribs, as if in diaphragm.

‖‖Jaundice; malignant jaundice; dark hemorrhages from nose, mouth, etc.; dark, scanty urine.

[19] **Abdomen.** ‖Heat and tenderness of abdomen, can scarcely bear her clothes on. θPeritoneal inflammation.

‖Swelling of whole abdomen.

‖Violent pain in course of colon.

‖Pulse 140, skin hot and dry, extreme pain in region of appendix, with frequent paroxysmal aggravations, great tenderness on pressure in a spot size of small orange, with some feeling of hardness; cannot bear r. leg straightened, but lies with it bent and supported by pillow. θPerityphlitis.

‖Typhlitis and perityphlitis; low type, red-tipped tongue, prostration; no stool, or discharges very offensive.

Peritonitis; in course of septic or zymotic disease; temperature below normal; low, debilitated or hemorrhagic condition; effusion of bloody serum.

‖Enlarged inguinal glands; sloughing, unhealthy pus.

Swelling of inguinal glands, bubo; from septic absorption, as from sloughing sores on genitals, or gangrenous affection of toes, etc.

Digitized by Google

[20] **Stool and Rectum.** Violent purging, with disagreeable sensation through whole body and nauseous taste.

Stools: black, thin, like coffee-grounds; offensive.

Liquid, dark green stools, followed by debility; yellow, watery, with stinging in abdomen; a number of liquid stools, with colic, or with nausea and colic, or with scraping in posterior wall of rectum; lowness of spirits and indifference to everything.

Nausea and diarrhœa; shuddering with diarrhœa; pulse feeble and quick, then slow; aphonia.

Diarrhœa: from noxious effluvia; imbibition of septic matters in food or drink; from "high game;" summer diarrhœa; cholera, etc.

Dysentery: of septic origin; from foul water, food, etc.; excessive flow of dark, fluid blood, or involuntary evacuations; great debility and faintness.

Bowels irregular, either diarrhœa or constipation. θDistortion of face.

Constipation, with congestion to head and headache.

Vomiting, purging and micturition simultaneously caused by spasmodic contraction, with tenesmus and strangury.

Stools white. θHepatic disorder.

Bleeding from anus and other orifices.

Bloody passages from bowels, sometimes involuntary.

Intestinal hemorrhage; when occurring during course of septic or zymotic disease; when of hepatic, splenic, or cardiac origin; or from cancer, atonic ulcer, menstrual irregularities, or if blood is dark, fluid and uncoagulable.

Dark, fluid hemorrhage with stool, with oozing of blood on standing or walking; debility, faintness, and aching in l. iliac region; with depression, anxiety and lowness of spirits; bowels relaxed.

Cholera; sudden and extreme coldness and blueness; collapse, cramps, diarrhœa, vomiting; embarrassed respiration, scarcely perceptible pulse, suppression of urine.

Varicosis of anus and lower bowels; idiopathic hemorrhoids, with great tendency to bleed on using paper, or straining a little at stool, or on standing.

Hemorrhoids; bleeding piles; blood dark, thin, and little disposed to coagulate; also in pregnant women, and with menstrual irregularities, and connected with heart disease, liver disease, or the hemorrhagic diathesis, in broken down constitutions, in chronic inebriates.

[21] **Urinary Organs.** Passive renal congestion; when from embarrassed circulation, as from obstructive heart disease, asthma, chronic bronchitis, etc., particularly during a course, or as sequelæ, of zymotic disease.

Digitized by Google

Nephritis albuminosa; when occurring in course of any of the toxæmia, or in pregnancy; urine dark, smoky from admixture of fluid blood.

Hemorrhage from urethra.

Suppression, or painful retention of urine.

Urine: extremely scanty, dark red with blood; jelly-like; green-yellow from much bile; copious and light colored.

Hæmaturia; with cancer of bladder or prostate.

Male Sexual Organs. Sexual instinct increased with entire relaxation of penis.

Female Sexual Organs. Ovaritis; in hemorrhagic constitutions, or connected with menorrhagia or puerperal septicæmia; ovarian abscess.

Ovarian neuralgia; in form of pure neurosis, and at climacteric, with flushings, or pressing pain in vertex.

Menorrhagia; during course of septic or zymotic disease, or other toxæmic states, as Bright's disease; or in hemorrhagic diathesis; blood dark, fluid, offensive.

Sharp neuralgic pains, intermittent, from l. side of womb to transverse colon, thence cutting across as if from both sides towards centre; thence up to face and temple; dull frontal headache.

Menstruation delayed, dark and scant. θPapular eruption of face.

Menstruation late, six to eight weeks interval, scanty and dark, very painful at beginning. θDistortion of face.

Catamenia a week too soon; very profuse with severe frontal headache, weight in head and ears, with pains in abdomen and back, cold extremities; yellowness of skin.

Five days before menstruation, much pain in hypogastrium and down thighs, lasting during first two days of flow; flow very copious first three days and then lingers on and off for four days more; much dull, continuous, aching pain in region of heart, down l. arm and through to l. shoulder blade, < on drawing deep breath and going up-stairs or a hill; feet cold. θDysmenorrhœa.

Vicarious menstruation; in debilitated, depraved states.

Leucorrhœa offensive, bloody.

Menopause; flushings, perspirations; head troubles (throbbing, noises, giddiness); cardiac troubles, as sudden palpitations; "sinking at stomach;" fainting at epigastrium; weak, debilitated constitutions; or when there is metrorrhagia or other hemorrhagic phenomena, blood being dark, fluid and offensive.

Cancer uteri, fungoid, malignant sarcoma, cauliflower excrescence, with much tendency to hemorrhage; in very degraded states of system.

Digitized by Google

[31] **Pregnancy. Parturition. Lactation.** Miscarriage during course of septic or zymotic disease; and in nurses exhausted by long nursing of zymotic or septic patients; and from other blood-poisoning causes.

Puerperal fever or convulsions; in connection with albuminuria; torpidity, coma; blue, bloated countenance; septic or zymotic influence, or in hemorrhagic or broken down constitutions.

‖Lochia very offensive, from retained and decomposing matter; also after-pains with such lochia.

‖After parturition, l. breast inflamed and hard, with fever and prostration, yellow spots on face; trembling tongue; breast discharges thin, milky pus and masses of broken down tissue from an opening beneath the nipple; pulse small and rapid; stitching pain in a hard lump which formed in the lower outer part of breast.

Phlegmasia alba dolens; l. leg swollen to twice its size, grinding pain in leg, < from slightest touch.

[32] **Voice and Larynx. Trachea and Bronchia.** ‖Loss of speech. θApoplexy.

Laryngismus stridulus, spasmus glottidis: from local nervous irritability, or from central irritation, being a part of a general convulsive condition; during course of zymotic disease; hysteria.

‖Hoarseness, with weak, rough voice.

Paralysis glottidis (paralytic aphonia) from muscular or nervous irritability, as in hysteria.

Laryngitis acuta; œdema glottidis; acute catarrhal aphonia, especially erysipelatous and scarlatinal; from scalds, stings of insects; irritating vapors, with great sensitiveness and irritability on talking, or to contact of dry, cold air, or to pressure (which also induces coughing); sore, raw, pricking pain, < on l. side; or as if in a small dry spot; much tickling irritability and hawking, as if from presence of a little sticky mucus, which had to be got up; also during course of scarlatina, morbilli, variola, etc.

Ulceration from necrosis of cartilages of larynx.

Bronchiectasis, putrid bronchitis, chronic bronchorrhœa, especially in broken down or hemorrhagic constitutions, with tendency to gangrene.

[33] **Respiration.** ‖Dyspnœa, anxiety, thirst, nausea, diarrhœa.

Breathing: anxious; embarrassed, with constriction of throat; jerking; quick, labored, with weak pulse and nervous agitation; slow, labored, imperceptible pulse; difficult, as if lungs would not expand.

‖Asthma; especially with cardiac disease; great debility and prostration, blue, puffy countenance, cold sweat.

Digitized by Google

[27] **Cough.** Nervous cough, especially laryngeal; dry, tickling, constant, choking, as if from dry, irritating vapor, or salt or pepper, or as if from dry spot in larynx, < on l. side; or as if provoked by dry or cold air, or by deep inspiration, by speaking and particularly by external pressure on larynx which cannot be borne; or is very apt to occur on awaking from sleep.

Extreme sensitiveness and irritability; dry cough on speaking, < in dry or cold air; much hawking; hoarseness or loss of voice; sudden tickling causing choking, spasmodic cough.

Pertussis: with great debility, much cardiac weakness, blueness or pallor of countenance after an attack and tardy return to natural color; attacks followed by puffiness of face or hemorrhagic spots, purple lips, bloodshot eyes, epistaxis, or much frothy, stringy, sanguineous expectoration; when there is any threatening of pulmonary œdema or paralysis.

Cough; in phthisis when incessant and apparently from nervous sensitiveness and irritability.

Cough with stitch in l. side and bloody expectoration.

Spitting of blood.

[25] **Inner Chest and Lungs.** Excessive oppression of chest: in old people affected with hydrothorax; in fever and ague; in apoplexy.

Burning in chest, with heat in forehead.

Stitch pains in chest; pleurisy with remittent fever.

Hæmoptysis.

Hydrothorax: in broken down constitutions; whether secondary dropsy or left by pleurisy; with weak heart, albuminuria, menstrual irregularities or hepatic disease.

Œdema pulmonum; gangrena pulmonum; in inebriates and old persons; in course of septic or zymotic diseases.

Abscessus or cancer pulmonum; tendency to gangrene; with typhoid symptoms; with hemorrhage or fetor.

Pneumonia; with tendency to gangrene or hemorrhage.

[29] **Heart, Pulse and Circulation.** Much dull, continuous, aching pain in region of heart, down l. arm and through to l. shoulder blade, < on drawing deep breath and going up stairs or a hill. θDysmenorrhœa.

Heart tender when lying on l. side.

Pain in heart; heart beat rapid, sometimes intermittent.

Palpitation, with sore pain in and about heart, feeling as if heart tumbled over, or trembling of heart.

Palpitation of debility, obesity, or fatty heart; nervous palpitation, angina pectoris, and the imitation of the latter occurring in hysterical women.

Heart beat feeble, or imperceptible.

Digitized by Google

Pulse: rapid; slower than natural (sixty beats), or intermitting and scarcely perceptible; feeble and quick, then slow; feeble, fluttering, frequent, small, quick, thread-like, weak, scarcely perceptible, trembling, wavy, or slow; irregular.

Pulse 120, very small and weak. *θ* Diphtheria.

Passive and venous congestions in low states of vitality and in broken down constitutions, where there is a tendency to general or local venous relaxation or torpidity, such as liability to chilblains, frost-bite, etc.

Pernicious anæmia, leucocythæmia; in constitutions broken down by gonorrhœa, syphilis, alcohol, etc., tendency to hemorrhages from gums, mucous membranes and skin; blood non-coagulable.

Hæmophilia, hemorrhagic diathesis, softening in vascular walls, or disorganization of blood; blood indisposed to coagulate, even though arterial, or is dark in color.

Passive hemorrhages, where blood appears to ooze through vascular walls and escapes into surrounding tissues, or over or from free surfaces, mucous membranes, etc., as if blood was dissolved, or as if vessels had no power to retain within them the circulating fluid, as if whole system was in a state of dissolution.

Phlebitis; in low, debilitated, erysipelatous state of system.

Varicosis, varicose veins, varicocele, venous torpidity, especially resulting from alcohol.

Lymphangitis, angioleucitis; from septic absorption, pyæmia, etc.

[31] **Neck and Back.** Drawing, tensive pain from r. shoulder along neck, as from a tense tendon, < from pressure and moving arm.

Carbuncles, boils, pustules, pimples or bed sores owing to a degenerate state of blood.

Pain in top of shoulder; also in ascending aorta. *θ* Hepatic disorder.

Aching pain in r. kidney and in stomach. *θ* Headache.

Softening of spinal cord, bed sores, spinal congestion, or irritation, spinal meningitis, myelitis, or spinal paralysis.

[32] **Upper Limbs.** Left axillary glands swollen and tender.

Paroxysms of bruised pains in bones of shoulder.

Throbbing pains in finger tips, etc.

Paralyzed sensation, trembling, jerking, cramps and neuralgia in arms.

Large inflamed furuncle on r. upper arm near elbow.

Tight, cordlike feeling extending from front of l. elbow down front of forearm, with "round spots" of pain here and there along front of forearm; the "spots of pain" remain only for a few minutes and then pass away, but

Digitized by Google

recur frequently during both day and night, cannot grasp with l. forefinger and thumb, cannot extend l. arm without pain. θPyæmia resulting from injury to r. middle finger.

▮Right middle finger swollen, hard, tense and of a glossy blue-grey color, quite rigid and incapable of any movement; the other fingers also more or less involved; blush of redness on back of hand, with pain extending to elbow; loss of appetite; she feels low, miserable, weak; finally angioleucitis of palm, then three red lines and an abscess in r. axilla discharging. θPyæmia.

▮Tubercle on wrist, near end of radius, size of a large split pea and rather blue, resulting from sting of insect several years ago, had existed ever since, being more pronounced during Summer months.

▮Vesicular and pustular eruption about wrists.

▮Trembling of hands.

▮Tingling and prickling, "going to sleep" of hands, especially of l. one, on least exertion, "they become quite dead" when she sews; l. leg similarly affected.

▮Coldness and blueness of hands and fingers connected with weak nervous system and heart.

▮▮Violent, spasmodic pain in l. palm as from a bee-sting.

▮▮Itching and heat of palms.

Parchment-like condition of skin of hands.

▮Burning, itching red spot on back of l. third finger, originally resulting from bite of insect twenty years ago; had returned regularly at same time every year since, each time lasting about a week.

▮Oozing of blood from under nails.

▮Chilblains, especially when threatened with gangrene, and when chronic or occurring in not very cold weather, thus indicating a low nervous and vascular vitality.

Psoriasis palmaris, pimples, pustules, boils, suppurating axillary glands, tubercles, petechiæ and numbness.

[33] **Lower Limbs.** Starting; jerking; trembling and cramps of lower extremities.

▮Legs "go to sleep" and tingle while sitting, or when crossing them.

▮▮Drawing suddenly from l. hip to foot.

▮▮During and after walking feels as if a tendon was drawing from sole of r. foot through bone of leg.

▮Cramplike pains in calf, heels and toes.

▮▮Sore pain in calf; in sole of foot.

▮▮Swelling of feet every evening.

▮Paralysis of extensors in l. foot after typhus; drags toes.

Itching of skin on lower extremities.

Pimples; pustules; boils; tubercles; petechiæ; hemor-

Digitized by Google

rhagic spots; varicose veins; ulcers, especially varicose, hemorrhagic, gangrenous; chilblains.

▮Small purple spots appearing on legs and very soon both legs, from knees to ankles, became covered with ecchymosis; some bleeding with stools and general circulation very languid.

[34] **Limbs in General.** Painful paralytic sensation.

Starting, jerking, trembling and unsteadiness of limbs.

▮Rheumatic and neuralgic pains.

▮Bruised pain in joints and bones.

▮▮Heaviness, as if bones were made of heavy wood.

▮▮Numb pain, as after cramp, in anterior of fingers and in toes.

Drawing pains in knee, tibia, back, etc.

▮Contraction of flexors.

▮Gonorrhœal rheumatism; in chronic syphilitics and inebriates.

[35] **Rest. Position. Motion.** Resting head: > vertigo.

Lying down: headache compels.

Cannot lie on l. side.

On lying on r. side or back: dark green vomiting.

When lying on l. side; sensitiveness of heart.

Cannot bear r. leg straightened; lies with it bent and supported by a pillow.

Head thrown up and backward, with diphtheria.

Sinking down towards foot of bed.

Sitting: legs go to sleep.

Standing: oozing of blood from anus; great tendency of hemorrhoids to bleed.

Motion: vomiting; soreness in back part of head <; nausea; heat in forehead and burning in chest <.

Can hardly raise himself in bed.

Sitting up in bed: soreness in back part of head <.

On assuming upright position: fainting.

Legs go to sleep when crossing them.

On moving arm: pain from r. shoulder along neck <.

On sewing: going to sleep of hands.

Walking: headache, with vertigo, nausea and vomiting >; oozing of blood from anus; as if a tendon was drawing from sole of r. foot through bone of leg during and after.

Going up stairs: aching in region of heart, down l. arm and through to l. shoulder blade, also on ascending hill.

Exertion: vomiting on least; going to sleep of hands from least; easily tired by slightest.

[36] **Nerves.** ▮Tremulous weakness all over, as if some evil was apprehended.

▮General loss of power; muscles refuse their service.

Digitized by Google

Easily tired by slightest exertion. θDysmenorrhœa.
Sudden and great prostration of vital force.
Great prostration, can hardly raise himself in bed. θDiphtheria.
Frequent fainting spells, with imperceptible pulse and inclination to vomit.
Palsy, old rheumatisms.
Paralysis: following apoplexy, particularly of r. side glosso-pharyngeal; post-diphtherical; of the insane; general.
Myelomalachia, with entire absence of, or very little local pain; pain only < from pressure, weakness of back, impaired mental activity, difficult speech, oppression of chest, convulsions, painless paralysis of extremities, with numbness and great coldness of affected limb.
Multiple sclerosis, lateral sclerosis, locomotor ataxy, progressive muscular atrophy, tetanus, etc.
Hysteria: especially when convulsive or apoplectiform.
Neuralgia: when occurring as a sequel of septic, toxæmic or even miasmatic disease, or chronic bilious, climacteric or albuminuric conditions.
Local spasms, cramps, trismus, etc.; when occurring as a sequel of toxæmia, or in broken down constitutions.
Convulsions, with trembling of limbs, without foaming at mouth; loss of senses; indifference, seems only half alive; paleness of face as in faintness; sensation of tight constriction of throat. θEpilepsy.
Convulsions: occurring at onset of exanthemata; also puerperal, and particularly if there be albuminuria, coma, blue, bloated countenance, with frothy, sanguinolent saliva, or tendency to hemorrhage.
Convulsions and paralysis. θCerebro-spinal meningitis.
Cramps and convulsions, with shrieking or delirium.
Convulsions resulting from extension of disease of ear, after the exanthemata and in whooping cough.
Epileptic convulsions, occurring at onset of septic or zymotic disease.
Chorea: especially when it can be traced to anything septic or toxæmic, and even if autogenetic, as in rheumatic, gouty, albuminuric, or amenorrhœic subjects.
Tremblings and twitchings, especially if resulting from alcoholism, or septic or zymotic disease.
Hydrophobia.

Sleep. Yawning, with oppressed nervous system, or degraded blood supply.
Torpor and drowsiness of invasion, or termination of zymotic or septic disease or other toxæmia, such as albuminuria, menstrual irregularities, hepatic or cardiac disease, etc.

Digitized by Google

‖Sopor, from which he cannot be aroused. θApoplexy.
‖Constant drowsiness, with inability to sleep. θDelirium tremens.
‖Sleeplessness from nervous and mental distress connected with bodily suffering, but out of all proportion to the suffering.
‖Chronic sleeplessness.
‖Starts in sleep.
‖Symptoms < after sleep.
‖Dreams: of traveling; of quarrels; of the dead.

[38] **Time.** In morning: on awaking, headache over eyes; sickness of stomach; headache, going off while dressing; pain around eyes <; lids swollen, with pains in forehead and occiput; sickness of stomach; vomits everything she eats.
In afternoon: can eat better.
During day: feels sick if she sleeps.
In evening: pains around eyes <; swelling of feet.
At night: awakes struggling with imaginary foes; delirium; headache with fever <; wakes up grinding teeth, face much distorted; sleeps only in middle of night.

[39] **Temperature and Weather.** Open air: lightness of head; headache with vertigo, nausea and vomiting better.
Cold air: great irritability and sensitiveness of throat to dry or; laryngitis acuta with great sensitiveness to dry or; dry cough < in dry or.
Summer: diarrhœa; tubercle on wrist more pronounced.

[40] **Fever.** ‖Surface cold, especially extremities.
‖Chilliness every afternoon; a kind of crawling up and down back and afterwards all over for five or six hours; severe pressure on top of head, running to ears, with lightheadedness and confusion and heat from head to feet; shooting pain from occiput down spine and arms; foul breath; tongue coated yellow; bitter taste in mouth and nausea; soreness r. side of pit of stomach through to shoulders; aching in middle of chest to back; dull pain across hips and also in back and l. shoulder; constant inclination to stool, with dark brown, blackish discharges.
‖Chilliness alternately with heat, occasionally sudden cold perspiration, pulse full and 100; eyes sunken, with dark brown rings; tongue dry in centre and yellow, point red; constant vain efforts to evacuate bowels, nausea, sick stomach; passages black, slight and pappy; soreness in chest and stomach, pain on touching them; cannot lie on l. side; great drowsiness and excessive weakness. θBilious remittent fever.
‖Flushes of heat all over.

Digitized by Google

Tongue dry and cracked, dark brown streak down centre, edges of a deep red color; occasional bilious discharges; no appetite; cold, clammy perspiration on forehead and temples; skin yellow; would speak when roused by shaking, seemed entirely unconscious of everything; urine dark red, depositing a dark, yellowish-red sediment; pulse 50 and weak. θBilious fever.

Intense fever, copious, dark, confluent eruption, considerable œdema of face; ophthalmic and nasal symptoms very severe, throat and chest symptoms moderately so; some delirium. θMorbilli.

Burning fever, accelerated pulse. θApoplexy.

Skin hot and dry, pulse 140. θPerityphlitis.

No sweat; patient sometimes cold, but it is a dry cold.

Sweat cold; sudden attacks of cold sweat.

Sweat colored, especially axillary; bloody sweat.

Malignant scarlet fever, with great infiltration of connective tissue, especially at throat.

Bilious remittents of the South; low type, tendency to hemorrhage.

Fevers with hemorrhagic symptoms, or tendency to putrescence.

Yellow fever; hemorrhagic tendency, oozing of blood from every orifice and even pores; skin yellow; vomiting of bile or blood; fetid, bilious or bloody stools; liver tender; heart weak; fainting.

Fevers resulting from septic absorption and in purpuric cases of zymotic diseases; puerperal fever.

Pyæmia; hectic fever; attending suppuration, ulceration, burns, scalds, maturition stage of variola, compound fractures, lacerated wounds, dissection wounds, cellulitis, erysipelas, malignant pustule, carbuncle, stings of insects, phagedæna, etc.; for that attending diphtherial and scarlatinal absorption; or that of secondary or tertiary syphilis; cholera.

Typhus; oppression of nervous centres; eyes congested, countenance heavy, dull, bloated, besotted; eruption dark, purple, copious; during second week, heart becomes markedly soft, systolic sound nearly inaudible, pulse soft, flagging, tremulous; great and distressing restlessness, much stupor, twitching, jerking, tremulousness, sinking down towards foot of bed, or deafness; pneumonia or œdema glottidis supervenes; swelling of salivary glands, diarrhœa, albuminuria, or suppression of urine.

Relapsing fever; tendency to syncope, hemorrhage, epistaxis, menorrhagia, petechial eruption or œdema of lungs or legs, effusion into joints, ophthalmia, diarrhœa, dysentery; in old or intemperate subjects.

Google

Cerebro-spinal fever; glanders; plague.

" **Attacks, Periodicity.** Sudden: sore throat; extreme coldness and blueness; palpitations; tickling, causing choking; great prostration of vital force; cold perspiration.

Frequent: erysipelas of face; faint sensation about epigastrium, with trembling above umbilicus, followed by flushing of heat; paroxysmal aggravations of pain in region of appendix; fainting spells.

Constant: drowsiness, with inability to sleep; vomiting; acid taste on tongue; cough; inclination to stool; vain efforts to evacuate bowels.

Several times a day: attacks of dizziness, fainting and weakness, with occipital headache.

Every afternoon: chilliness and crawling sensation for five or six hours.

From 6 A.M. until evening: pressure and heavy pain on top of head.

Every few days: bilious headache.

Every month: vomiting after menstruation.

For some months: eruption on face.

Periodic: neuralgia.

Marked periodicity: pains come and go suddenly or reappear every three months, every year, etc.

For years: grinding of teeth during sleep, with distortion of face; tubercle on wrist.

Chronic: neuralgia; chilblains; sleeplessness; bronchitis; bronchorrhœa.

For twenty years: severe pain in r. eye and top of head, on r. side down back of neck, at intervals.

Burning, itching red spot on finger resulting from bite of insect twenty years ago, returning regularly at same time every year since, each time lasting about a week.

" **Locality and Direction.** Acts more on r. side.

Right: headache < in temple; severe pain in eye and top of head, on side down back of neck; drawing in side of head; cannot bear leg straightened, lies with it bent and supported by a pillow; drawing, tensive pain from shoulder along neck; aching in kidney; large inflamed furuncle on upper arm near elbow; middle finger swollen, incapable of movement, other fingers also involved, pain extends to elbow, abscess in axilla; as if a tendon was drawing from sole of foot through bone of leg; paralysis of side.

Left: bilious headache beginning behind ear; frontal headache in anterior lobe; throbbing and heat in side of head; throat < on side; neuralgic drawing in fauces < on side; pain in side, near last ribs as if in diaphragm; aching in iliac region; aching in region of

Digitized by Google

heart, down arm and through to shoulder blade; neuralgic pains from side of womb to transverse colon; breast inflamed and hard; leg swollen twice its natural size; laryngitis acuta < on side; stitch in side with cough; tight, cordlike feeling from elbow down forearm; round spots of pain along front of forearm, cannot grasp with forefinger and thumb, cannot extend arm without pain; going to sleep of hand and leg; violent spasmodic pain in palm; red spot on back of finger; drawing from hip to foot; paralysis of extensors of foot; dull pain in shoulder.

" **Sensations.** As if brain had been intoxicated by carbonic acid, or by degraded blood; as from a blow in occiput; as if head was constricted; as if a cut had been made around eyes; as if tongue and all around throat were tied up; as if tongue was swollen; as of a plug in throat to be swallowed, or of contraction or choking, or as if uvula or velum was elongated or stiff, or as of a dry spot or tickling in throat; as if uvula and velum were swelling; as if œsophagus was full of rancid fluid; as if lungs would not expand; as of a dry spot in larynx; as if heart tumbled over; as of a tense tendon from r. shoulder along neck; as if arms were paralyzed; as from a bee-sting in l. palm; as if a tendon was drawing from sole of r. foot through bone of leg; as if bones were made of heavy wood.

Pain: in head; at centre of forehead; in r. eye and top of head, on r. side down back of neck; in forehead and occiput; in pit of stomach; in region of liver; on top of shoulder; in l. side, near last ribs, as if in diaphragm; in course of colon; in region of appendix; in abdomen and back; in hypogastrium and down thighs; in heart; in top of shoulder; in ascending aorta; violent, spasmodic in l. palm.

Tremulous weakness, as from impending evil.

Distressing sensation of sinking.

Agonizing pain: in stomach.

Cutting: around eyes.

Boring: around eyes.

Grinding: in l. leg.

Stitches: in region of liver; in hard lump in lower outer part of breast; in l. side; in chest.

Stinging: headache; in abdomen; all over.

Pricking: in throat, especially l. side, near root of tongue, or extends to ear, or as if proceeding from ear with; laryngitis acuta; of hands.

Shooting: headache; from occiput down spine and arms; in region of liver.

Digitized by Google

Tearing: around eyes.
Jerking: in arms.
Drawing: headache; neuralgic, in fauces; in r. side of head; from r. shoulder along neck; from l. hip to foot; in knees, tibia, back; in bones.
Scraping: down œsophagus to stomach; in posterior wall of anus.
Burning: in chest; in eyes; in spot on back of l. third finger.
Raw pain: in throat, especially l. side, or extends to ear, or as if proceeding from ear; with laryngitis acuta.
Sore pain: especially at l. side of throat, near root of tongue, or extends to ear, or as if proceeding from ear; with laryngitis acuta; in and about heart; in calf; in sole of foot.
Soreness: of throat; in back part of head; of r. side of pit of stomach through to shoulders; in chest and stomach.
Pressing: dull, at back of ear; down on eyes; headache; in vertex.
Tensive pain: from r. shoulder along neck.
Constriction: tight, of throat.
Contraction: in throat.
Compressive: headache.
Cramps: in stomach; in arms; of legs; in calf, heels and toes.
Neuralgic pains: sharp, from l. side of womb to transverse colon, thence cutting across as if from both sides towards centre, thence up to face and temples; in arms; in limbs.
Rheumatic pains: in limbs.
Paralytic pain: in extremities; in bones.
Numb pain: as after cramp, in anterior of fingers and in toes.
Bruised pain: in bones of shoulder; in joints and bones.
Dull pain: across hips, in back, in l. shoulder.
Heavy pain: dull, over eyes and in sides of nose; on top of head.
Aching: in bones; dull, heavy in head; in liver; in l. iliac region; dull, continuous, in region of heart, down l. arm and through to l. shoulder blade; in r. kidney and in stomach; in middle of chest to back.
Pulsating: headache; in brain.
Throbbing: in l. side of head; dull, heavy, in occiput; in finger tips.
Fluttering: above umbilicus.
Oppression: of chest; above eyes.
Pressure: above eyes; on top of head.
Weight: on stomach; in head and ears.

Digitized by Google

Heaviness: in stomach; of limbs.
Congested feeling; dull, heavy, in front of brain.
Fulness: in ears.
Dulness: of head.
Lightness: of head.
Dizziness: in back part of head.
Sinking: about epigastrium; at stomach.
Faintness: about epigastrium.
Weakness: of back.
Numbness: of arms and legs; of affected limb.
Crawling: up and down back.
Tingling: of hands; in legs.
Tickling: in throat; with laryngitis acuta; cough.
Choking: in throat.
Heartburn.
Hungry sensation: about epigastrium.
Heat: over eyes and in sides of nose; in forehead; on top of head; in l. side of head.
Dryness: in eyes; of fauces; of mouth; of skin.
Itching: of scalp; eruption on face; of palms; in red spot on back of l. third finger; of skin on lower extremities; all over.

" **Tissues.** Very rapid and direct depressing influence on sensorium and medulla oblongata, deranging both circulation and nutrition; after death, in subacute and chronic cases, the cerebrum, cerebellum and medulla are found in a state of engorgement, with dark, fluid, degraded blood, and apparently threatened with softening.

Cortical substance of brain, and membranes of brain in a state of engorgement, with dark, fluid, degraded blood; the cortex highly congested and stained a deep brown color; the arachnoid thickened, tough, opaque and adherent to the pia mater, and the meshes of the latter distended with serum; extravasation and ecchymosis.

Seems to act primarily upon cerebro-spinal nerve centres, producing secondarily decomposition of blood and destruction of blood fibrin, hemorrhages, ecchymoses.

Affects principally the blood, the solar plexus and pneumogastric nerves; also the cerebro-spinal system.

Organs of vision profoundly affected, even to extent of annihilating their functions.

Hemorrhages from all orifices of body, eyes, ears, nose, mouth and urethra, even bloody sweat; blood flows suddenly from eyes, ears, nose, gums and beneath nails.

Œdematous swelling of whole body.

Indicated in diseases of an adynamic character, whether caused by previous low states of system, or by zymotic

Digitized by Google

and septic poisoning, abuse of alcohol, etc.; especially characteristic are evidences of cardiac debility, feeble pulse, sluggish circulation, bluish skin, faintness, general debility.

Bruised, drawing, or paralytic pains in bones, < on awaking.

45 **Touch. Passive Motion. Injuries.** Touch: left leg < from slightest; laryngitis acuta, with great sensitiveness to; pain in chest and stomach.

Cannot bear clothing around stomach, hypochondria, epigastric region or abdomen.

Pressure: at angles of lower jaw, tonsils sensitive; soreness in back part of head; stitches in region of liver <; region of appendix very tender; laryngitis acuta with great sensitiveness; laryngeal cough; pain from r. shoulder along neck; < myelomalacia, pains <.

Shaking: seemed entirely unconscious, would speak when roused by.

Great tendency of hemorrhoids to bleed on using paper.

From irritating vapors: laryngitis acuta.

After sting of insects: œdema of tongue; laryngitis acuta; tubercle on wrist; burning, itching red spot on back of l. third finger.

From scalds: laryngitis acuta.

Burns, scalds, compound fracture, lacerated wounds, dissecting wounds.

Compound fractures; in course of septic or zymotic disease, in broken down constitutions, old inebriates or other states of low vitality or degraded blood; tendency to gangrene or unhealthy suppuration, threatening septic absorption.

46 **Skin.** Itching, stinging, all over; urticaria.

Skin dry, stiff, like thin parchment; usually cold.

Skin hot, perspiring. θDiphtheria.

Yellow color of whole body.

Acute jaundice, of hæmatic rather than hepatic origin.

Petechia, little blotches, or ecchymosed purple spots.

Yellow-greenish and bluish spots, with decreased swelling.

Yellow and black spots all over.

Purpura hemorrhagica.

Scarlet erythema or scarlet redness with rashlike vesicles.

Blisters and livid spots on body.

Small blisters around eyes.

Vesicular eruption on septum narium.

Swelling on wrist containing serum.

Pimples on face.

Eruption around mouth.

Herpes on scrotum.

Digitized by Google

Swelling of whole body and of submaxillary glands and tonsils especially.

Suppuration of glands; in broken down constitutions, with low fever, tendency to slough, and discharge of dirty or hemorrhagic matter.

‖Burns and scalds, threatening erysipelas or gangrene.

Ulceration; especially phagedenic, sloughing, varicose, irritable, bubo, "soft sore," mercurio-syphilitic, with offensive discharge, etc., in constitutions broken down by previous disease or bad living; in inebriates.

‖Stings of insects, when they assume an erysipelatous or gangrenous character.

‖On eighth day after vaccination, centres of insertion blackish, and circles filled with dark lymph and surrounded by a patch of inflammation; small, red, raised papules on arm and forearm; on ninth day skin of nearly whole upper extremity inflamed, dark red and thickened, skin of shoulder, neck, chest, abdomen and back in similar condition, and on lower extremities eruption in small patches; about the elbow blackish. θErysipelas.

‖Pustular eruption after vaccination.

Abscesses on elbow discharging a red brown matter, with shiny particles.

‖Felons, pemphigus, pustules, boils, carbuncle, furuncle, gangrene, abscesses, etc., when fever is low, parts bluish and discharges scanty, tardy, or dark fluid, unhealthy; diarrhœa with gangrene.

‖Old cicatrices break open again.

‖Hot swellings, with cold skin and sickly appearance.

‖Obstinate ulcers, even malignant, with yellow complexion and great indifference.

‖Anthrax, malignant pustule; especially if of a dark color, with much fever or threatening gangrene, or if there be several of them, or if occurring in a constitution already broken down by disease or bad living; sloughing, hemorrhage, fever of a low type.

Dissection wounds; symptoms those of phlegmonous erysipelas; accumulation of dirty pus in distant parts, typhous condition supervening.

Eschoriæ, dry and finally black.

Malignant ulcer where bite was inflicted (fourteen years before), with swelling of the parts.

‖Chilblains, gangrene pending; circulation sluggish.

‖Gangrene, skin separated from muscles by a fetid fluid; black spots with red areola and dark blackish redness of adjacent tissues.

‖General local phlegmonous, phlyctenous or œdematous

Digitized by Google

erysipelas; skin bluish-red, low fever; during zymoses or in the enfeebled; also in wounds; more frequent in face.

Morbilli: especially malignant or purpuric form; and for such sequelæ as gangrene of mouth or genitals; and for retrocession of eruption; also in later stages when eruption remains too long or reappears as a mottling.

Scarlatina; when in primary invasion there is evidence of great toxication, vomiting, general collapse and coldness, or brain greatly oppressed, coma, convulsions; throat livid and rapidly swelling, much œdematous swelling at angles of lower jaw, chin raised and head thrown back, eruption patchy, dark or petechial, pulse extremely quick and feeble, frequent epistaxis, face dusky; moaning and tossing about, or heavy, dull and stupid; swelling of fauces and tonsils seem to threaten suffocation or gangrene, much puffiness around neck, tenacious, sanguineous mucus from mouth and nostrils, breathing irregular and jerky; secondary infection by absorption from gangrenous and sloughing fauces, inducing a low typhoid state; also for complications, œdema glottidis, laryngitis, meningitis, etc.; and for succeeding dropsy, when urine is of dark, smoky color, bloody or albuminous.

Syphilis; primary, if chancre becomes gangrenous or phagedenic; secondary, for mucous tubercles and phagedenic and deeply penetrating ulceration of mucous membranes, necrosis of cartilages, etc.; tertiary, for fetid and hemorrhagic ulceration, and if brain, liver or kidneys become implicated.

Pemphigus; with low typhoid conditions, and, when contained fluid, assumes a dark or sanguineous character, or gangrene threatens.

Peliosis rheumatica; with œdema, large purpuric spots and bullæ in which black purpuric patches, covered with a flaccid envelope of bullæ after serum had escaped, were like patches of skin which had mortified.

Dropsy: cardiac; hepatic; renal; also general dropsy not dependent on organic disease of any of great central organs, but rather an expression of a debilitated, softened state of capillaries, or a general break down of vital powers, and particularly if it has resulted from chronic alcoholism, or from septic or zymotic or other depraving or debilitating diseases.

[47] **Stages of Life, Constitution.** Hemorrhagic diathesis.

Diseases caused by previous low states of system, or by zymotic or septic poisoning, abuse of alcohol, etc.

Low typhoid states.

Digitized by Google

Oppressed nervous system; degraded blood supply.
Neuralgia: occurring as a sequel of septic, toxæmic or even miasmatic disease; or chronic bilious, climacteric or albuminuric conditions.
Convulsions of puerperal women, and children.
Rheumatic, gouty, albuminuric, or amenorrhœic subjects.
Broken down constitutions.
M. T., æt. 4 mos., healthy and of a healthy family; erysipelas after vaccination.
W. G., æt. 7½, weakly constitution and eruptive skin, whose father died of heart disease and alcoholism, had severe scarlatina, followed by otorrhœa.
Miss H., æt. 9, and her brother, J. D. H., æt. 13; scarlatina maligna.
Boy, æt. 10; furuncle.
Girl, æt. 12; diphtheria.
G. K., æt. 16, whose father was a bonvivant and had liver disease, is a weak, pale, bloodless boy, subject to bronchitis and asthma; after a nervous shock and grief; perityphlitis.
Miss D., æt. 19, sorter and ripper, working in a small, confined room connected with dye works, has been in low state of health for some time; peritoneal inflammation.
A girl, æt. 20, paralysis of l. foot after typhus.
Miss K., æt. 22; tubercle on wrist.
Miss M. S., æt. 22; bilious remittent fever.
Mr. W., æt. 23, weakly, strumous, lately married, very closely worked, constantly exposed to exhalations from leather; sensorial disturbances.
Woman, æt. 25, weak menstruation; ciliary neuralgia.
Miss K., æt. 25, of dirty, yellow, bilious appearance, subject to severe bilious headaches, of an epileptic family; distortion of face.
A primipara; mastitis and milk leg.
K. D., æt. 27, in good health, but weak with overwork and anxiety, was exposed during day to exhalations of night soil; diphtheria.
Miss D., æt. 28, pale, weak and strumous looking; dysmenorrhœa.
Wm. W., æt. 28, constitution remarkably good, never been sick until two months previous, at which time he was in the West and had fever and ague, temperament bilious, sanguine; bilious fever.
Mr. M., went with volunteers into Maryland, and was encamped on a small stream; bilious fever.
Man; suddenly seized with apoplexy.
Mr. G. had lived freely in youth, and suffered from syphilis, mercurialization, polypus, etc., had taken alcohol freely all his life; chronic sleeplessness.

Digitized by Google

Lieutenant W., of Commodore Wilkes' expedition, contracted yellow fever on coast of Cuba.

Hannah H., mother of four children, sews much and does housework; for three years, throbbing in l. side of head, etc., before menstruation.

Mrs. S., æt. about 30, has suffered for many years from spasm of œsophagus, seems to be hysterical in origin.

Miss R., æt. 33, very weak and low after much nursing, and the loss of her mother; some years previously had syphilitic affection with revaccination, got her clothes damped, followed by catarrh; affection of eyes.

Mrs. J., æt. 33, married six years, no children, but several miscarriages; husband has chronic syphilis and has lately become impotent, for last twelve months she has had ozæna; tingling and pricking in hands and l. leg.

Mr. B., æt., 48, lived freely in his youth and had syphilis; petechiæ.

Mrs. S., æt. 57, suffered from chronic hemorrhoids; red, itching spot on finger.

Mrs. E., æt., 57, had gastritis two years ago, now much exhausted from nursing sick family, is debilitated and bloodless; atonic dyspepsia.

Mr. S., æt., 58, subject to asthma and with weak heart; after chill had bronchitis, with hæmaturia.

Mr. S., æt. 60, after unsuccessful allopathic treatment; intestinal hemorrhage.

Mr. L., æt. 62, bachelor, of irregular habits, especially as to alcohol, living in an isolated way; ecchymoses on lower limbs.

H. D., æt. 69, during incipient stage of senile dementia, delusions, etc.

" **Relations.** Antidoted by: *Laches.;* its effects modified by *Ammon., Camphor; Opium, Coffea, Alcohol,* and radiated heat.

Compare: *Laches., Naja,* and *Elaps.; Crotal.* is preferable in fluid hemorrhages, yellow skin (hence in yellow fever with black vomit, etc.), epistaxis of diphtheria. *Naja* has more nervous phenomena. *Laches.* has skin cold and clammy, rather than cold and dry; hemorrhages with charred straw sediment; and more markedly, ailments of the l. side. *Elaps.* is preferable in otorrhœa, and in affections of the r. lung. The Cobra poison coagulates blood into long strings. The Crotalus poison is acid; the Viper neutral. The " Rotten-Snake " causes more sloughing than any other.

Compare also: *C. Cascar.* (thoughts dwell on death and dreams of the dead), *Tarent. cub., Arsen., Lauroc.* (tetanus, whooping cough), *Apis, Carb. veg., Silic.* (vaccina-

Digitized by Google

tion), *Camphor.* (in coldness; probably *Crotal.* has more marked genuine collapse, with confused speech, etc.), *Hyosc.* (sleeplessness in delirium tremens), *Opium*, *Nux vom.* and *Cuprum* (cerebral congestion).

CROTON TIGLIUM.

Croton Oil Seeds. *Euphorbiaceæ.*

The Croton seed is spoken of by Avicenna and Serapion. Christoph d'Acosta is the first European who described it, which was in the year 1578. The physicians of the seventeenth century used it very little. In modern times, on account of its medicinal oil, it was brought more to the notice of physicians.

The effects of the oil taken or applied are recorded in the Encyclopedia, vol. 3, p. 606, the principal symptoms being from J. Buchner's collection of provings published in Archiv. f. Hom., vol. 19, p. 113.

CLINICAL AUTHORITIES.—*Diarrhœa*, Martin, Rück. Kl. Erf., vol. 5, p. 413; J. Loyd Martin, N. A. J. H., vol. 4, p. 355; Cushing, Organon, vol. 3, p. 304; Goodno, Hom. Clinics, vol. 4, p. 132; E. W. Erf., vol. 5, p. 897; *Eczema*, Bœhr, B. J. H., vol. 16, p. 420-29; v. d. Heyden, Raue's R., 1870, p. 323; *Poisoning by Rhus tox.*, E. A. Farrington, Hom. Clinics, vol. 4, pp. 107-128.

[1] **Mind.** Not disposed to work.
Feeling of anxiety, as though some personal misfortune would befall him.
Morose, dissatisfied.
Deep depression, peevish and restless.
Feeling as though one cannot think outside of himself, "feels all pent up" inside, and no chance for thoughts to flow out; as if hide-bound.

[2] **Sensorium.** Dulness, heaviness, or confusion of head.
Dizziness and faintness, < in open air, with drowsiness, nausea, pale complexion, exhaustion and diarrhœa.

[3] **Inner Head.** Sensitiveness of head; weight of hat causes headache.

Digitized by Google

‖Heat and heaviness in head, soreness in eyeballs when turning eyes; bad taste in mouth, feels clammy and nasty; thirst; weak, faint spells; flushes of heat.
Sticking pain in head, eyes and forehead.
‖Headache worse in morning.

Outer Head. ‖Sensitiveness of head to pressure of hat.
‖Boring of head into pillow; fontanelles sunken. θCholera infantum.
‖Crusta lactea.

Sight and Eyes. ‖Opacity of cornea.
‖Keratitis pustulosa: with much eruption on lids and face; with excessive photophobia.
‖Ulceration of conjunctiva, contraction of pupil, profuse lachrymation and dimness of cornea.
‖Conjunctivitis pustulosa, eyes feel hot and burning, especially at night; face red and burning; feverish; marked photophobia, ciliary injection, with considerable pain in and around eye, usually worse at night.
‖Pustules terminating in ulcers and ulceration of cornea, with much pain in supraciliary region and eruption on face; much pain in eye, whenever a movement from bowels occurred.
‖Iritis with pustular eruption on face.
‖Irritation and inflammatory redness of conjunctiva.
‖Violent ophthalmia; on second day, ulceration of conjunctiva over cornea and sclera, irritation of sclera and iris; contraction of pupil; injected state of vessels of conjunctiva, sclera and eyelids, profuse lachrymation, photophobia, violent pains disturbing night's rest; burning and violent pain of eye.
‖Pain which seemed to extend from pupil of l. eye to back part of head. θNeuralgia.
‖Sensation as of a string pulling eyeball back into head.
Sticking pain in eyes; eyes swollen; veil before eyes.
‖Stinging in eyeball.
‖Soreness in eyeballs when turning eyes.
‖Burning pain in inflamed eye, with burning in ear, vertigo and fainting.
Blepharitis with vesicular eruption on lids and face.
‖Itching of eyelids.
‖Œdematous swelling of eyelids (eyelids look puffed).
‖Twitching of eyelids.
‖Copious lachrymation.

Hearing and Ears. ‖Spasmodic twinging pains, deep within l. ear.
Otorrhœa, with great itching.
‖Deafness.

Digitized by Google

[7] **Smell and Nose.** ‖Burning in nostrils; inflamed nose.
Eruption upon septum of nose plugging nostril.
[8] **Upper Face.** Swelling and redness of face and eyelids, which are covered with small vesicles.
‖Sensation as though insects were creeping on face.
[9] **Lower Face.** ‖Lips dry and parched. θCholera infantum.
‖Burning of lips.
[11] **Taste and Tongue.** ‖Bad taste in mouth, clammy and nasty.
‖Sensitiveness of tip of tongue.
Tongue coated white; generally dry, red and shining.
[12] **Inner Mouth.** Burning and smarting in mouth.
Irritation of salivary glands.
‖Painful swelling of submaxillary glands and tonsils.
[13] **Throat.** Burning and scraping in fauces and throat.
‖General irritation in fauces, redness, swelling and elongation of uvula.
‖Constrictive sensation in throat.
[14] **Appetite, Thirst. Desires, Aversions.** ‖Constant thirst.
[15] **Eating and Drinking.** Vomiting and purging, as soon as patient takes a drink.
Hot milk relieves colic.
[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea, much water in mouth.
‖Excessive nausea, with vanishing of sight, sweat on forehead, distension of abdomen, excessive gagging, vertigo, < after drinking, with frequent discharge of greenish or yellowish water from bowels.
Vomiting immediately after drinking.
Violent vomiting of ingesta; of yellowish-white frothy fluids.
[17] **Scrobiculum and Stomach.** Anguish, oppression and pressure in stomach.
‖Sinking in stomach, with sensation of weakness.
‖Sensation of emptiness in stomach.
‖Burning in stomach.
‖Sensitiveness of region of stomach to touch.
[19] **Abdomen.** ‖Abdomen distended; coldness.
‖Unpleasant sensation of emptiness and hunger; rumbling in abdomen.
‖Extreme coldness, amounting to chilliness along spinal column downward and through entire abdomen, with nausea and vomiting, subsequently flushed feeling in head and face, with writhing pain, commencing in region of transverse colon and gradually extending downward through whole intestinal canal; very copious paplike and watery discharges, generally of light grey color, but varying; slight tenesmus, anxious countenance, depression of spirits, great restlessness. θDiarrhœa.

Digitized by Google

‖Colicky pain in transverse colon before every stool.
‖Griping colic and writhing around umbilicus.
‖Abdomen full and distended, griping pain about navel.
‖Bearing down in abdomen, as if everything was relaxed.
‖On pressing on umbilicus with hand, painful sensation is felt all along intestinal canal to termination of rectum, causing latter to protrude.
‖Colic > from hot milk.
‖Gurgling in intestines, as though nothing but water was in them, mostly on l. side.
‖‖Swashing in intestines as from water.

Stool and Rectum. ‖Flatulence, soon followed by urgent desire for stool.
‖‖Evacuation sudden, and with much flatus.
‖Stools occur suddenly, one gush and it is finished, great prostration after a passage. θCholera infantum.
‖‖Constant urging to stool, followed by sudden, pasty evacuation, which is shot out of rectum, of a dirty green color and offensive.
‖Watery, yellow, at times slightly green passages, passed in a single gush; each stool seems to "drain child dry," but notwithstanding, very little prostration, passages every half hour, from 8 A.M. till evening, none at night.
‖Pasty, light brown stool covered with mucus, with frequent urging, followed by rumbling, gurgling in l. side of abdomen.
‖Stool: dark green; tenacious, mucous; watery, mixed with whitish flakes; watery, painless; coming out like a shot; < from drink and food.
During stool: sweat, nausea; colic; scraping of posterior wall of rectum; disagreeable sensation through whole body; nauseous taste; protrusion of rectum.
After stool: sweat on forehead; pressing in epigastrium and umbilicus, with protrusion of rectum and constant urging to stool; nausea, with fainting; great pallor, weakness and prostration.
‖Stools preceded by colic and borborygmus; during stool cutting in abdomen with sensitiveness; after stool, burning in anus; greatest prostration, patient even fainting; coldness of body; dizziness; face sunken and altered in expression. θCholerine.
‖Vomiting and diarrhœa after taking least nourishment; stools profuse, watery, yellow and at times yellowish-green; stool passed with a single gush; has about twenty-five stools during day, none at night; extreme prostration and emaciation; symptoms of hydrocephaloid already developed; boring of head in pillow; fontanelles sunken; body and extremities cool; convulsions. θCholera infantum.

Digitized by Google

‖Diarrhœa coming on suddenly; pain in abdomen, faint feeling before, during and after stool; sweat on face after stool.

Gushing, sudden discharge of watery stool, mixed with undigested food, immediately after feeding, with great weakness and pallor, vomiting at same time.

‖Diarrhœic attack during night, very copious fecal evacuations, gradually losing their natural color and consistence with each successive stool; swashing feeling and sound in abdomen; great apprehension of a serious termination. θDiarrhœa.

‖Every movement of body renews discharges, producing at first very violent pain in bowels with tenesmus; discharges frequent and small.

Intermittent diarrhœa, with great and sudden weakness.

‖Diarrhœic stool accompanied by sweat, tenesmus, or with nausea and colic.

‖Diarrhœa: worse after drinking; while nursing; while eating; during Summer; from fruit and sweetmeats.

‖‖Upon pressure at umbilicus, a painful sensation is felt down to anus, where there is constant pressure outward.

‖Dragging in anus, as if diarrhœa would easily ensue.

‖Burning in anus.

‖Pain in anus, as if a plug was forcing outward.

At anus: itching; pulsations; constrictive sensation; stitches.

[21] **Urinary Organs.** Burning in urethra when urinating.

Increased secretion of (turbid) urine.

Urine dark and fiery, flocculent with greasy particles floating on top; turbid sediment which is somewhat lighter colored at bottom of vessel.

Night urine is foaming, pale, orange-colored, with a slightly turbid appearance at bottom of vessel, first part of urine being a little flocculent.

Blood-red urine, exhibiting a quantity of mucus at bottom of vessel, which is drawn into threads by shaking.

After lapse of twenty-four hours, brownish crystals form, floating about at spot where the cloud was seen and deposited on walls of vessel.

[22] **Male Sexual Organs.** ‖‖Frequent corrosive itching on glans and scrotum.

‖Scrotum shrivelled, itching severely, disturbing sleep; > from scratching, which, however, causes a voluptuous sensation.

‖Corrosive itching pain on scrotum, < while walking; redness of part.

Left testicle drawn up; r. testicle relaxed.

‖‖Vesicular eruption on scrotum and penis.

Digitized by Google

‖Eczema of scrotum, itching excessively, < at night.

[23] **Female Sexual Organs.** Catamenia too scanty.

‖Intense itching of genitals, > by very gentle scratching.

[24] **Pregnancy. Parturition. Lactation.** ‖Inflamed, hard, swollen breasts, threatening to gather; pain from nipple through to back.

‖‖Nipple very sore to touch, excruciating pain running from nipple through to scapula of same side, when child nurses.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness and hollow voice, obliging him to hawk constantly.

‖Complete loss of voice after drinking cold water while overheated.

Accumulation of rattling mucus in larynx.

[26] **Respiration.** ‖‖Feels as though he could not expand lungs.

‖Tightness of chest and inability to make a deep inspiration and inhale as much air as usual. θCold.

‖Asthma with cough, causing drawing pain through l. pectoral region into back.

‖Sense of suffocation, compelling him to jump out of bed and sleep in a chair. θCough.

[27] **Cough.** Cough, with violent, sore, drawing pain through chest into back; < on l. side; when coughing, soreness of abdomen; accumulation of rattling mucus in chest, which is painful to touch.

‖Obstinate cough, < at night when lying in bed, compelling her to jump out of bed and walk about, on account of sense of suffocation; is compelled to lie in bed in a partly sitting posture, for fear of suffocation.

Cough, morning and evening.

[28] **Inner Chest and Lungs.** Sensation of hollowness in chest, as if everything was hanging down.

‖Feeling of fulness in both sides of chest, with burning stitches in l. side of thorax and towards both scapulæ.

Drawing pain through l. pectoral region into back.

[29] **Heart, Pulse and Circulation.** Palpitation of heart, with difficulty of breathing, especially on going up stairs.

Stitches in region of heart during an expiration.

Pulse frequent and full.

[30] **Outer Chest.** Chest painful when touched.

[31] **Neck and Back.** Stitches in region of kidneys, arresting breathing.

[32] **Upper Limbs.** Sticking or aching pains in shoulder joints.

‖Tearing, shooting pain in l. arm, from shoulder to elbow and back of hand, with swelling of shoulder and whole arm; inability to move the limb or lie down; < at night, preventing sleep, but if rest be obtained, he

Digitized by Google

awakes relieved, but least attempt to stir causes pain to reappear with great violence; arm becomes paralyzed and feels like a very heavy weight. θBrachial neuralgia.

[35] **Lower Limbs.** ‖Pain in soles of feet spreading towards great toe, with sensation as if it had been sprained; < in afternoons and from touch; veins on dorsum of foot swollen; between swollen veins, red patches which do not disappear on pressure. θRheumatism.

Lancinations in big toes; pricking in toes.

[36] **Rest. Position. Motion.** Lying: cough <.

Obstinate cough < when lying in bed, compelled to jump up and walk about; compelled to lie in bed in partly sitting posture.

Sense of suffocation, compelling him to jump out of bed and sleep in a chair.

Motion: discharges renewed by every.

Inability to move l. arm or lie down; least attempt to stir causes pain to reappear.

Turning eyes: soreness in eyeballs.

Walking: corrosive itching pain on scrotum <; red moist spot on l. thigh painfully sore, troublesome smarting.

On going up stairs: palpitation of heart, with difficult breathing.

[37] **Nerves.** Weakness and bruised feeling through whole body.

‖Very great debility.

‖Weak, faint spells, with flushes of heat.

[38] **Sleep.** Weariness; feeling ill and irresistible desire to sleep.

Drowsiness; palpitation of heart prevents sleep.

[39] **Time.** Morning: headache <; cough.

In afternoon: pain in soles of feet, spreading towards great toe <.

During day: about twenty-five stools, none at night.

Evening: cough.

Night: eyes <; violent pains in eye disturb sleep; diarrhœic attack during; urine foaming, turbid at bottom; eczema on scrotum itching excessively; cough <; pain in l. arm <.

[40] **Temperature and Weather.** Open air: dizziness and faintness <.

Cold water: while overheated, complete loss of voice from drinking.

Hot milk: colic >.

Summer: diarrhœa <.

[41] **Fever.** Chilliness of back.

‖Coldness of feet, extending as far up as calves.

‖Great coldness and chilliness along spinal column and

Digitized by Google

through whole body; nausea and vomiting, followed by flying heat in head and face. θDiarrhœa.
Ascension of heat on body.
Flushes of heat.
Heat and fever accompanying cutaneous eruption.
Perspiration on forehead.

" **Attacks, Periodicity.** Sudden: evacuation.
Frequent: corrosive itching on glans and scrotum.
Constant: thirst; urging to stool; outward pressure at anus.
Every half hour: watery passages, from 8 A.M. till evening.

" **Locality and Direction.** Right: testicle relaxed.
Left: pain from pupil of eye to back part of head; twinging deep within ear; gurgling in abdomen mostly on side; testicle drawn up; drawing through pectoral region into back; burning stitches in side of thorax and towards scapula; tearing, shooting pain in arm, from shoulder to elbow and back of hand, with swelling of shoulder and whole arm; red, moist spot on thigh.
From r. to l.: Rhus poisoning in face.

" **Sensations.** As if hide-bound; as of a string pulling eyeball back into head; as though insects were creeping on face; as if a plug was forcing outward, at anus; as though he could not expand lungs; as if suffocating; as if everything was hanging down in chest; as if great toe had been sprained; as if everything in abdomen was relaxed.
Pain: in and around eyes; in supraciliary region; from pupil of l. eye to back part of head; in abdomen; from nipple to back; in soles of feet, spreading towards great toe.
Anguish: in stomach.
Lancinations: in big toes.
Cutting: in abdomen.
Stitches: at anus; burning, in l. side of thorax and towards scapulæ; in region of heart; in region of kidneys.
Sticking: in head, eyes and forehead; in shoulder joints.
Stinging: in eyeball; here and there in skin; of vesicular eruption; in septum nasi with pustular eruption.
Pricking: in big toes.
Shooting: in l. arm, from shoulder to elbow and back of hand.
Tearing: in l. arm, shoulder to elbow, and back of hand.
Drawing: through l. pectoral region into back.
Dragging: at anus, as if diarrhœa would easily ensue.
Scraping: in fauces and throat; of posterior wall of rectum.

Digitized by Google

Twinging: deep within l. ear.
Writhing: in region of transverse colon, extending downward through whole intestinal canal; around umbilicus.
Constriction: in throat; at anus.
Burning: in eyes; of face; in ear; in nostrils; in mouth; of lips; in fauces and throat; in stomach; in anus; in urethra; painful, in skin; of vesicular eruption.
Soreness: in eyeballs; throughout chest into back; of abdomen.
Smarting: in mouth; in red moist spot on l. thigh.
Bruised feeling: through whole body.
Aching: in shoulder joints.
Colic: with stool; in transvere colon.
Griping: colic, around umbilicus.
Bearing down: in abdomen.
Pressure: in stomach; in epigastrium and umbilicus; outward, at anus.
Oppression: in stomach.
Tightness: of chest.
Pulsations: at anus.
Swashing feeling: in abdomen.
Sinking: in stomach.
Hollowness: in chest.
Emptiness: in stomach.
Weakness: in stomach.
Confusion: of head.
Dulness: of head.
Heaviness: of head.
Fulness: in both sides of chest.
Itching: of eyelids, with otorrhœa; at anus; corrosive on glans and scrotum; of eczema on scrotum; of genitals; of eruptions; erysipelas with excessive; followed by painful burning; of skin; eczema over whole body with excessive; of vesicles; in septum nasi with pustular eruption.
Flying heat: in head and face.
Hot feeling: in eyes.

" **Tissues.** Acts especially upon mucous lining of intestinal tract and upon skin, in the former producing a transudation of watery portions of the blood, causing copious watery diarrhœa, and on the other developing a true eczema.

" **Touch. Passive Motion. Injuries.** Touch: region of stomach sensitive; nipples very sore; chest painful; pain in soles of feet spreading towards great toe <; red moist spot on l. thigh painfully sore.
Pressure: head sensitive to hat; on umbilicus, causes painful sensation all along intestinal canal to termination of rectum, causing latter to protrude.

Google

Weight of hat causes headache.
Rubbing: vesicles > by gentle.
Scratching: itching on scrotum >, followed by a voluptuous sensation; itching of genitals > by very gentle; itching of eruptions > by gentle, < from hard.

[46] **Skin.** ‖Sensation as if hide-bound.
Eruptions itch very much, patient, however, is not able to scratch very hard as it hurts; a very slight scratch, a mere rub suffices to allay the itching.
Erysipelas, with excessive itching.
‖Itching followed by painful burning.
‖Intense itching, > by very gentle scratching.
‖Scarlet redness of skin (with vesicles).
‖Redness, warmth, stinging here and there; pustules running into one, oozing and forming a grey brown crust, which finally falls off.
‖Red moist spot, exuding offensive moisture, on l. thigh opposite scrotum; it is painfully sore to touch and on walking; troublesome smarting when walking.
‖Itching and painful burning, with redness of skin; formation of vesicles and pustules; desiccation of pustules; desquamation and falling off of pustules.
‖Eczema over whole body to soles of feet, with violent itching.
Eczema on face and genitals.
Erysipelas of face; œdematous indented eyelid and large water blisters on chin.
‖Pure idiopathic eczema, such as usually appears in children.
Vesicular eruption, with itching, burning, stinging, and redness of skin, and speedy development of sero-purulent exudation.
Vesicles, especially on abdomen, confluent and form large brown scabs, < after eating, > after sleep, > by gentle rubbing; swelling of the glands.
‖Herpetic eruption on scrotum.
Pustules, first size of millet seeds, growing larger, oozing and forming a grey brown crust.
Pustular eruption upon an inflamed base on septum nasi, plugging nostril; with itching and stinging pain.
‖Itching pustules.
‖Right face first affected, then l., or it may go downward, involving scrotum. θRhus poisoning.
Impetigo; prurigo; pustules.

[47] **Stages of Life, Constitution.** In eczema, not so beneficial in adults as in children.
Dan. C., æt. 6 mos., cholera infantum.
Annie K., æt. 7 mos., had diarrhœa for a week.

Digitized by Google

Boy, æt. 3, attacked when 6 months old with diarrhœa, which had continued more or less until present time.
Girl, æt. 8, after drinking cold water while overheated, for four years; aphonia.
Abram L., butcher, native of France, robust, large and deep chest, dark complexion, black hair, lungs normal, caught cold while working in an ice-house; cough.
Miss J. H., æt. about 30, light hair, blue eyes, slender build; cough.
Farmer, æt. 40, formerly healthy; rheumatism.

[46] **Relations.** Antidoted by: *Ant. tart.*
It antidotes: *Rhus tox.*
Compatible: with *Kali brom.* cured chronic infantile diarrhœa.
Compare: *Anac., Apis, Colchic., Mezer., Rhus tox., Veratr., Phelland, Phosphor., Silic.* (pain from the nipple through to the back).

CUBEBA.

Cubebs. *Piperaceæ.*

The unripe berries of the Piper Cubeba, a climbing plant of Java and other portions of the East Indies.

CLINICAL AUTHORITIES.—*Pressure and pain in region of femoral ring*, E. M. Hale, B. J. H., vol. 26, p. 496; *Dysentery*, Bachmeister, Organon, vol. 3, p. 357; *Nocturnal enuresis*, Battmann, Rück. Kl. Erf., vol. 5, p. 513; *Gonorrhœa* (six cases), Hirsch, Rück. Kl. Erf., vol. 2, p. 83; *Cattell*, B. J. H., vol. 11, p. 176; *Gleet*, Rosenberg, Rück. Kl. Erf., vol. 2, p. 83; *Urethro-vaginitis*, Cattell, B. J. H., vol. 11, p. 176; *Croup*, Emil Tietze, H. M., vol. 2, p. 363.

[1] **Mind.** Exaltation of temper and mental faculties, or weakness and loss of memory.
Uneasiness, anxiety, cannot remain in bed.

[3] **Inner Head.** ||Sensation as if head was choked up; with heaviness of head and danger of suffocation. θCroup.
Contractive and pressive headache, with drowsiness, but without sleep.
Deep-seated headache; dulness.

[5] **Sight and Eyes.** Fulness in eyes, turgid and watery.
Rheumatic or gonorrhœal ophthalmia.

[8] **Upper Face.** Fulness of face which is occasionally florid and flushed, or red and pale by turns.

Digitized by Google

[9] **Lower Face.** Lips puffed, dry and shining.
Extraordinary twist of mouth to one side every time he attempts to speak or smile.
[10] **Teeth and Gums.** Aphthæ of lips and gums.
[11] **Taste and Tongue.** Tongue furred and moist or very white.
[12] **Inner Mouth.** Feeling of dryness of mouth, though moistened with an oily saliva, great thirst.
[13] **Throat.** Constant need to swallow saliva to relieve dryness and burning in throat and larynx.
Throat dry and parched.
[14] **Appetite, Thirst. Desires, Aversions.** Increased appetite.
Desire for delicacies; oranges; acid fruits; spirits; brandy; fresh bread; onions; almonds; nuts.
Unquenchable thirst, with feeling of dryness of mouth, and burning in throat.
[16] **Hiccough, Belching, Nausea and Vomiting.** Disagreeable or acid eructations.
‖Nausea and vomiting.
[17] **Scrobiculum and Stomach.** Uneasiness, heat at pit of stomach, and fever.
Burning pain in stomach; feeling of warmth in epigastric region.
:Dyspepsia of long standing; sourness after eating, and distress of stomach from food.
[19] **Abdomen.** Abdomen distended and very sensitive.
‖Burning in abdomen. θCroup.
Burning and pressure about navel.
‖Sensation of weight, pressure, and pain in region of femoral ring, similar to that which precedes occurrence of femoral hernia; downward pressure and weight < after walking, riding, lifting, and especially before and during menstrual period.
Hernia femoralis.
[20] **Stool and Rectum.** Before stool: cutting pains in hypogastrium.
During stool: tenesmus; cutting pain; loud discharges of flatus.
Distressing diarrhœa, with headache and griping.
Stools: blackish, yellowish, fecal; bilious; yellow, transparent, mucous; mingled with whitish, shining particles, looking like kernels of rice; bloody mucus; frequent (dysenteric); copious; bilious and fecal; involuntary; < at night in bed; > from rising from bed and moving about (colic).
‖Countenance fallen, indicating great suffering; discharges every half hour of transparent slime mixed with blood; before stool severe griping pains in bowels, with back-

Digitized by Google

ache; with stool, the same, and urging to urinate; after stool, long-continued tenesmus, and relief of pains, except heavy dull pain in back and bowels; tongue flabby, white, furred; throat dry; little thirst; < from food or drink. θDysentery.

Stools of colorless, transparent slime, mixed with bright blood, and plentifully interspersed with shining, white bodies, the shape of rice kernels. θDysentery.

Diarrhœa, with rumbling and cutting in abdomen and burning in rectum.

Constipation; hemorrhoids; perineum tender.

Suppuration of rectum.

Burning and itching of anus.

[21] **Urinary Organs.** Chronic cystitis; cutting and constriction after micturition; urine increased in quantity, deepened in color; hæmaturia.

Urethritis (accompanied by vesical irritability) of females, especially of married women; feeling of fulness in bladder with desire to urinate every ten or fifteen minutes, with smarting in urethra during micturition, which is very scanty, but a few drops passing at a time, and followed by vesical tenesmus; filaments of ropy mucus escaping with first or last drops of urine.

Irritation of urinary passages; cutting and constriction after micturition; hæmaturia.

After micturition, sensation as if bladder still contained water.

Last drops of urine passed with pain.

Urine: foaming; bloody; smells of violets.

Nocturnal enuresis.

Burning and itching in fossa navicularis.

[22] **Male Sexual Organs.** Sexual excitement.

Testicles swollen.

Inflammation of urethra.

Prostatitis.

Secretion of mucus from urethra greatly increased.

Discharge from urethra of a dark reddish color.

Inflammation of penis, pressure and heaviness.

Gonorrhœa, with profuse discharge and scalding pain whilst urinating; pus very thick and glutinous; excessive ardor urinæ and frequent desire to empty bladder.

Pale, copious, slimy discharge, causing soiled linen to become stiff; sometimes, particularly after coitus, or use of spirituous liquors, sensation of warmth and slight burning in urethra on urinating. θGleet.

After six weeks, thick, yellow, puslike discharge from urethra. θGonorrhœa.

After two months, profuse puslike discharge, with pain-

Digitized by Google

less urination, slight redness of meatus, no swelling of glans. θChronic gonorrhœa.

‖Thick, yellowish-green discharge, with frequent obstruction of urethra. θGonorrhœa.

[23] **Female Sexual Organs.** ‖Urethro-vaginitis, severe and of long standing, with acute pains and abundant discharge.

Leucorrhœa profuse, yellow, greenish, very acrid, and of a very offensive odor; erythema at inner surface of thighs and pruritus of vulva, with intense desire for coition; small, burning pimples; womb swollen and painful, as if from a tumor; menses too soon, often preceded and followed by leucorrhœa, or in small quantity, and consisting mostly of leucorrhœa.

Acrid leucorrhœa of children.

[25] **Voice and Larynx. Trachea and Bronchia.** False membranes, thick and of a dark shade, principally in larynx; respiration noisy and panting; sensation as if throat was choked up, with heaviness of head; danger of suffocation; voice harsh and wheezing.

[26] **Respiration.** Respiration hurried and noisy.

‖Respiration impeded, difficult, with crepitant râles; great fulness of chest; dyspnœa and sense of suffocation.

[27] **Cough.** Incessant bronchial cough; < evening, by heat, and in open air; throat dry and parched; hurried and noisy respiration.

Harsh cough, which seems to tear and rupture the bronchi; expectoration difficult and painful, or yellow-greenish, rusty, streaked with blood; hæmoptysis, especially evenings.

Barking and croupy cough, with feeling as of a foreign body in larynx.

Cough with coryza and hoarseness, during and after cough cold sweat upon breast and back, burning in abdomen.

[28] **Inner Chest and Lungs.** Burning and tearing pain in chest; severe cough.

Pulmonary catarrh; hæmoptysis, particulary in evenings. θPhthisis pulmonalis.

[29] **Heart, Pulse and Circulation.** Pulse full, frequent.

Soft, slow pulse, weak and small.

Pulse irregular, suspending two or three beats each minute, sometimes slow, at intervals hurried, not exceeding 84.

[32] **Upper Limbs.** Acute, deep-seated pain in wrists, speedily followed by redness and swelling; stiffness of wrist and thickening around joint.

[33] **Lower Limbs.** Pricking sensation in soles of feet.

[34] **Limbs in General.** Sensation of heat in palms of hands and soles of feet.

Numbness of fingers and toes.

Digitized by Google

[36] **Rest. Position. Motion.** Stools and colic < at night in bed, > by getting up and moving about.
Walking, riding, lifting: downward pressure and weight in region of femoral ring <.
[38] **Nerves.** ‖Great restlessness; extreme weakness.
Convulsive movements, and partial paralysis.
[38] **Time.** Evening: bronchial cough <; hæmoptysis <.
At night: stools < in bed; enuresis.
[39] **Temperature and Weather.** Heat: bronchial cough <.
Open air: bronchial cough <.
[40] **Fever.** Heat, flushes in face, soles of feet and palms of hands.
Increased heat with thirst.
Feverish, tingling and heat over whole surface of body.
Fever with heat at pit of stomach.
‖Cold sweat upon chest and back; burning in abdomen.
θCroup.
[41] **Attacks, Periodicity.** Frequent: stools; desire to empty bladder.
Constant: need of swallowing saliva; bronchial cough.
Every ten or fifteen minutes: desire to urinate.
Every half hour: discharge of transparent slime mixed with blood.
Chronic: cystitis; results of gonorrhœa.
[43] **Sensations.** As if head was choked up; as if bladder still contained water, after micturition; as if cough would tear and rupture bronchi; as of a foreign body in larynx.
Pain: in region of femoral ring similar to that preceding occurrence of femoral hernia.
Cutting: in hypogastrium; during stool; in abdomen; after micturition.
Tearing: in chest.
Burning: in throat and larynx; in stomach; in abdomen; about navel; in rectum; of anus; in fossa navicularis; in urethra; in pimples upon vulva; in chest.
Constriction: after micturition.
Contractive: headache.
Griping: with diarrhœa; in bowels before stool.
Scalding: while urinating.
Smarting: in urethra.
Pricking: in soles of feet.
Tingling: over whole surface of body.
Deep seated: headache; acute pain in wrists.
Heavy dull pain in back and bowels, with dysentery.
Pressure: about navel; in region of femoral ring; with inflammation of penis.
Pressive: headache.
Weight: in region of femoral ring.

Digitized by Google

Heaviness: of head; with inflammation of penis.
Fulness: in eyes; of face; in bladder; of chest.
Uneasiness: at pit of stomach.
Dulness: of head.
Itching: of anus; in fossa navicularis; of vulva; of skin.
Numbness: of fingers and toes.
Dryness: of mouth; in throat and larynx.
Heat: at pit of stomach; in palms and soles.
Warmth: in epigastric region; in urethra.

[44] **Tissues.** Skin diseases with kidney affection; catarrh of bladder and urethra; paralysis of sensation, with affections of urinary organs.
Makes the urine albuminous and bloody, and increases the uroxanthine.
Emaciation.

[46] **Skin.** A flush of red over whole body.
Intense itching.
General eruption of roseolous papules without fever or itching, confluent on face, buttocks and upper limbs, more scant on lower.
Severe urticaria febrilis.

[47] **Stages of Life, Constitution.** Acts particularly well in persons of bilious temperament with tendency to constipation.
An apprentice, æt. 15, healthy, suffering for three months; nocturnal enuresis.
Man, æt. 26, otherwise healthy; gleet.
Man, æt. 28; gonorrhœa.
H., æt. 32, choleric temperament; gonorrhœa.
Man, æt. 34, hemorrhoidal constitution; gonorrhœa.

[48] **Relations.** Compatible: *Copaiba* (gonorrhœa, gastric urticaria), Oil of Sandal Wood (gonorrhœa).
Botanically related to: *Piper meth., Matico, Piper nigrum.*
Compare: *Capsic., Canthar.* (irritable bladder in females), *Tereb., Cann. sat., Iod.* (membranous croup).

PREFACE.

AFTER unavoidable delays, Volume V of THE GUIDING SYMPTOMS is presented to the medical profession, published by the heirs of Constantine Hering.

The American Homœopathic Publishing Society, which had contracted to publish the complete work, through lack of business facilities, was compelled to relinquish the pleasant task after the publication of the fourth volume, but has made provision for the completion of the work by the Hering heirs, the editorship remaining the same.

The editors take pleasure in acknowledging the clerical labors of Drs. Rudolph Bauer and Edwin H. Kistler, who have worked assiduously on the present volume, and who have been induced to continue their aid so as to insure the rapid completion of the remaining volumes.

GUIDING SYMPTOMS

OF OUR

MATERIA MEDICA.

CUNDURANGO.

Condorplant. *Asclepiadaceæ.*

The bark of a climbing plant or shrub, found growing in a high altitude in Ecuador, South America. Provings by J. C. Burnett and J. P. Dinsmore.

The tincture is prepared from the dried bark, finely powdered.

CLINICAL AUTHORITIES.—*Headache, etc.*, Dinsmore, Hah. Mo., v. 8, p. 67; *Cancer on l. side of nose, on eyelid*, Friedreich, B. J. H., vol. 33, p. 188; *Eruption on face*, Burnett, B. J. H., v. 33, p. 408; *Cracks in angles of mouth*, Burnett, B. J. H., v. 33, p. 407; Organon, v. 3, p. 88; *Carcinomatous ulcer of lip*, Cl. Müller, B. J. H., v. 30, p. 639; *Fistulous ulcer on chin* (greatly benefited), Farrington, Hom. Clin., v. 4, p. 127; *Cancer of breast, face, nose*, Humphreys, J. T. Smith, N. E. M. G., v. 6, p. 536; *Disease of stomach*, Fischer, B. J. H., v. 33, p. 551; *Cancer of stomach*, Sænger, N. A. J. H., v. 26, p. 132; Friederich, N. A. J. H., v. 22, p. 555; *Rhagades at anus*, Burnett, B. J. H., v. 33, p. 407; *Incontinence of urine*, Burnett, B. J. H., v. 33, p. 408; *Carcinomatous ulcer on thorax* (2 cases), Cl. Müller, B. J. H., v. 30, p. 647; *Tumor in breast*, Burnett, Organon, v. 3, p. 88; *Scirrhus of r. breast* (much improved), Miller, Hah. Mo., v. 11, p. 353.

[1] **Mind.** Feels miserable.
[2] **Sensorium.** Great dizziness on stooping, or turning head.
[3] **Inner Head.** Sensation as if forehead was very broad and high.
Dull feeling in forehead.
Slight heaviness in l. half of forehead, while r. half is clear; sensation as if l. half were higher than r. half.
Violent pain in l. temple.
Sharp, cutting pain in l. temple, and through ball of l. eye.

Digitized by Google

Violent pain in l. temple, spreading over upper part of brain to r. side of head; as if upper part of skull was being pulled up, with one-half of brain.

[4] **Outer Head.** Large pimple on scalp.

[5] **Sight and Eyes.** In evening, objects before r. eye resembling black serpents, jumping in all directions; could not see from l. eye, seemed to be looking through a dense fog.

Appearance before eye like two black horns, with large black balls on upper ends, and a mound of crystals between them, their tops tapering off, and tipped with black.

On awaking in morning, pear-shaped obstruction before eye, with large end up; looking towards light, it appeared red, on looking from light, it appeared purple.

As of curled hair before r. eye, and a blur before l. eye, causing letters to run together.

Retina very much congested.

Superficial ulceration of cornea, with varying amount of redness, photophobia and pain, accompanied by sores or cracking of corners of mouth.

Flat epithelial cancer (ulcus rodens) about as large as a farthing on lower eyelid.

[7] **Smell and Nose.** Slight pressive or full feeling on bridge of nose.

Profuse discharge of glairy mucus from nostrils, alternating with a sensation of great dryness of Schneiderian membrane.

Flat epithelial cancer about size of bean on l. side of nose.

[8] **Upper Face.** Eruption on face, arising from angles of mouth; anatomical character of eruption obscured by dirt, saliva and scabs.

Carcinoma of lip, an unclean and sinuous ulcer, about size of a dime, with surrounding hardness and swelling; burning pains; lip inverted; emaciation.

[9] **Lower Face.** Painful crack in r. corner of mouth.

Sores or cracking of corners of mouth.

Deep cracks in corners of mouth, warty growths occupying the edges, one as large as split pea, and the other as large as a three penny piece, both flat and exuding a dirty juice; tongue very tender.

Ulcer on chin, r. side, perforating to gums, so that fluids taken in the mouth, run out through the opening; pain in "the leaders" down the throat; lumps on chin; bleeding.

[11] **Taste and Tongue.** Slight pain in l. half of tongue.

Small, painful pustule on r. side of tip of tongue, on upper surface towards edge.

Digitized by Google

; Cancer of tongue.

[13] **Throat.** Aching in throat extending to stomach, with great burning in stomach.

Persistent sore throat.

Sore throat with burning and aching, and a husky feeling, which causes a dry hacking cough.

[16] **Hiccough, Belching, Nausea, Vomiting.** ‖Vomits everything eaten; hard lumps in l. hypochondrium and epigastrium; constant burning pain; great emaciation.

[17] **Scrobiculum and Stomach.** ‖Loss of appetite, epigastric pressure, especially after meals, sometimes so severe as to radiate towards l. shoulder, stitching pains in l. epigastrium, dyspepsia, < by use of vegetables, with vomiting of a clear, watery, acid fluid; anæmia and emaciation, cachectic features, dry, scaly skin; between processus xiphoideus and umbilicus, especially towards left, hard, knobby, confluent tumors, sensitive to least pressure, percussion-sound dull over tumors, clear and tympanitic over other parts of abdomen; r. lobe of liver smooth, painless, can be felt reaching over arch of ribs; l. lobe cannot be separated from tumors; l. fossa supraclavicularis filled by a conglomeration of swollen, hard, but painless lymphatic glands; constipation. θCarcinoma ventriculi with co-affection of epigastric and supraclavicular lymphatic glands.

‖Severe pains in stomach; vomiting of coffee-ground masses; hard, knobby, large swelling in pyloric region; complete loss of appetite; emaciation and cachectic look. θCancer of stomach.

[18] **Hypochondria.** Pain in r. hypochondrium.

[20] **Stool and Rectum.** ‖Rhagades at anus; terrible pains when bowels are moved; cracks at angles of mouth.

Painful foul-smelling flatus.

‖Constipation. θCarcinoma ventriculi.

[21] **Urinary Organs.** ‖Incontinence of urine; cracks in corners of mouth; pustules on face. θIncipient paralysis.

[22] **Heart, Pulse and Circulation.** Constrictive pain at heart.

On rising in morning, sharp, distinct pain in heart, followed by passage of flatus.

[30] **Outer Chest.** ‖Ulcer on false ribs, as large as hand, carcinomatous in appearance, with high, uneven edges, and deep, small islets of half destroyed cellular tissue and muscular fibre as base; ichorous, acrid secretion; severe pain.

On r. wall of thorax, especially around nipple, several swellings, in size from a pigeon's to a hen's egg, two of which had suppurated and formed uneven, discolored, fetid ulcers, with elevated borders, the nipple itself lay

Digitized by Google

upon a hard and painful swelling; axillary glands swollen; whole body emaciated and cachectic.

‖Crack in l. angle of mouth, surrounded by warty excrescences, the whole being covered with a nasty secretion (probably epithelioma), accompanying a very hard, often very painful, tumor in l. breast (probably cancer).

Scirrhus of r. breast; whole breast, skin and axillary glands involved; tumor very hard, incompressible, knobby, immovable, with severe lancinating pains; nipple retracted; skin purple in spots and wrinkled; patient emaciated and cachectic; ulceration, with fetid, sanious discharge, and much sloughing.

[31] **Neck and Back.** Dull, heavy, continuous pain in l. scapula.

Dull pain across small of back.

[32] **Upper Limbs.** ‖Pain in l. shoulder, and through side, with burning under scapula.

Tingling in fingers of l. hand while writing.

[33] **Lower Limbs.** Rhagades on hips and in bends of knees, discharging an ichorous fluid, irritating the surrounding parts.

Pimples on thighs.

[34] **Limbs in General.** Soreness all over body, like rheumatism, < through l. shoulder and under l. scapula.

[35] **Rest, Position, Motion.** Turning head: dizziness.

Stooping: dizziness.

[36] **Time.** Morning: on awaking, pear-shaped obstruction before eyes; on rising, sharp, distinct pain at heart.

Evening: objects before r. eye resembling serpents.

[40] **Fever.** Vertigo and painful oppression of head, red face, violent pain in small of back, with nausea and fever.

[42] **Locality and Direction.** Left: slight heaviness in half of forehead; half of forehead feels higher than r.; pain in temple; pain in eye; cancer on side of nose; pain in half of tongue; hard lumps in hypochondrium; pain radiates to shoulder; pain in epigastrium; lobe of liver attached to tumors; fossa supraclavicularis, indurated lymphatic glands; crack in angle of mouth; tumor in breast; dull, heavy pain in scapula; pain in shoulders; tingling in fingers while writing; pimples side of nose.

Right: objects before eye resembling serpents; as of curled hair before eye; painful crack in corner of mouth; ulcer on side of chin; painful pustule side of tip of tongue; pain in hypochondrium; swellings on side of thorax; scirrhus of breast; pustules side of nose on cheek.

[43] **Sensations.** As if forehead was very broad and high; as if l. half of forehead were higher than r. half; as if

Digitized by Google

upper part of skull was being pulled up with one-half of brain.
Pain: in l. half of tongue; in r. hypochondrium; in tumor; in l. shoulder; through side; in leaders down throat.
Terrible pains: when bowels are moved.
Violent pain: in l. temple; spreading from l. temple over upper part of brain to r. side of head; in small of back.
Severe pain: in stomach; in outer chest.
Lancinating pain: in tumor.
Cutting pain: in l. temple; through ball of l. eye.
Sharp, distinct pain: at heart.
Stitching pain: in l. epigastrium.
Stinging pain: in epithelioma.
Burning pain: of lip; in stomach; in epigastrium; in epithelioma.
Aching: in throat, extending to stomach.
Constrictive pain: at heart.
Burning: under scapula.
Tingling: in fingers of l. hand.
Painful oppression: of head.
Soreness: all over body.
Heavy pain: in l. scapula.
Dull pain: in l. scapula; across small of back.
Pressure: in epigastrium radiates towards l. shoulder
Pressive feeling: on bridge of nose.
Dull feeling: in forehead.
Heaviness: in forehead.

" **Tissues.** Increases the growth of granulations and hastens the cicatrization of ulcers.
Open cancer, and cancerous ulcers; it effectually moderates the severity of the pains; it does not act so well on scirrhous and indurated parts.

" **Touch, Passive Motion, Injuries.** Slight pressure: tumors on abdomen sensitive to.

" **Skin.** Erythematous blotches on face and body.
Eczema, especially when rhagades are present, oozing out a fetid fluid; cachectic or syphilitic dyscrasia.
Pimples: on tip of nose, l. side of nose; on chest; on thighs.
Pustules: between eyebrows; on r. side of nose; on border of tip of tongue; on r. cheek; on abdomen.
Indolent ulcers, with hard callous edges, fetid sanious smell.
Old indolent ulcers, appearing cancerous.
Old, obstinate, foul, ichorous, ulcers.
Varicose ulcers, with granulating hypertrophy, with a syphilitic dyscrasia; also some improvement in lupus.

Google

Scirrhus and open carcinoma; open epithelioma; stinging, burning pains.

Pustular eruption; erysipelas; salt rheum; rhagades discharging an ichorous fluid, irritating the surrounding parts; scrofulosis, small-pox; syphilis; teleangiectasis.

[47] **Stages of Life, Constitution.** Cachectic state of system, ordinary wounds and ulcers tend to take on a bad appearance.

Scrofulous girl, æt. 3½, probably suffering from iodism; eruption on face.

Man, æt. 42; carcinomatous ulcer on thorax.

Miss W., æt. 42; rhagades at anus.

Nurse, æt. 45; cracks in corners of mouth.

Man, æt. 48; cancer of stomach.

Woman, æt. 50, another, æt. 80; epithelial cancer.

J. S., æt. 54; carcinoma of stomach.

Woman, æt. 65, ill for years; disease of stomach.

Mrs. N., æt. 65; incipient paralysis, incontinence of urine, cracks in angles of mouth.

Woman, æt. 50; cancer on l. side of nose.

Woman, æt. 80; cancer on eyelid.

[48] **Relations.** Compare: *Ant. tart.* (pimples and pustular eruptions); *Arum triph.* (corner of mouth cracked, sore throat); *Baptis.* (sore throat, open cancers with very offensive discharges); *Arsen., Conium, Hydrast., Phytol., Trif. prat., Kreos.* (cancer, especially of the mammary gland); *Hydrast.* (rodent ulcer, lupus, carcinoma ventriculi); *Thuja* (epithelial cancer, fissures at muco-cutaneous outlets); *Silic.* (fistulous ulcers).

J. H., vol. 31, p. 413.

Mind. Memory weak; brain functions in general decreased; must frequently think long before he finds the right expression; temperature low; hands always cold; in winter, hands become bluish-black.

Great absence of mind; tendency to start; eyes sunken, staring, as if riveted in sockets; cold sweat; spasmodic distortion of face. θIrritation of brain.

Loud speaking arouses them from their fancies, they are obliged, however, to think a long time before they can answer.

Fixed idea that he sees persons connected with the law who are about to seize him, causing great anxiety, and making him cry like a child; at times sees thieves in the room, spirits, and various other immaterial objects; although he describes some of his symptoms truly, others are misrepresented or cannot be expressed by him; great despondency and anxiety; seems in despair;

Google

attacks of unconsciousness; pulse weak; skin cool and covered with a cold sweat.

‖Hallucinations of all kinds of figures and grimaces, especially in evening when going to bed and shutting eyes; at one time saw these appearances also through day, and heard them talk; headache; glimmering before eyes; whizzing and drumming in ears; chronic bronchial catarrh; frequent vertigo while walking on street.

‖Delirium.

‖Attacks of mania, with full, rapid, hard pulse, inflamed eyes, wild look, and disconnected talking, ending with sweat.

‖Crying like a child.

‖Awoke suddenly from sleep and ran about room crying, scolding and screaming, and wished to escape; thinks she is about to die and desires to see the pastor; pain in head; pulse small, soft, 100; has not menstruated for several months.

‖Unexpectedly jumps out of bed, it requiring at times great force to retain her; eyes staring, look vacantly fixed upon some object; temperature slightly elevated in head, and lessened in extremities. θMania after labor.

‖Great anxiety; tossing about bed.

‖Attacks of anxiety; cannot control herself; cries, is in despair; coldness of the body, very slightly affected by external heat.

‖Slightest exertion brings on profuse and exhausting perspiration; no appetite; pulse weak, accelerated, irregular; skin moist; feet cold; at times a feeling of anxiety which cannot be resisted; giddiness in head, with internal pain, sometimes causing insensibility; sleep restless and unrefreshing, with distracted and annoying dreams; diarrhœa; rapid decline of strength. θEffects of over-study.

‖Afraid of falling; holds on to his nurse's hair, hugs up to her, afraid of being injured, would not stay in bed. θScarlatina.

‖Afraid of everyone who approaches him, shrinking away from them. θScarlatina

‖Feared bedclothes or house would catch fire. θScarlatina.

‖Fear of death. θCholera.

‖Restless, cross and full of fear; respiration, sobbing, short and anxious; face pale and bloated; when drinking, child bites into glass or spoon; strength gradually sinking. θIrritation of brain, due to dentition.

‖Disconnected delirious talking; talks all the time.

Digitized by Google

[2] **Sensorium.** ‖Vertigo, marked and persistent, with stupefaction.

‖‖Great confusion and heaviness of head.

[3] **Inner Head.** ‖Agonizing headache at distinct intervals like paroxysms, lancinating pains, sometimes in forehead, sometimes in top of head, sometimes in temples or occiput, < from slightest pressure.

‖Inflammation of brain; prostration, breathing short and anxious, face puffed and pale; when drinking child bit on the glass or spoon.

[5] **Sight and Eyes.** Eyes staring, fixed, sunken.

‖After riding several hours in railroad car, sudden indistinct and double vision. θParalysis of l. nervus abducentis.

‖‖Insufficiency of external recti muscles.

[6] **Upper Face.** Distorted, pale, deathly face.

‖Face puffed and pale. θInflammation of brain.

‖Flushed features, face cyanotic. θCholera.

‖Facial neuralgia, behind r. ear, in cheekbone and upper jaw, < morning, none at night; pain < from mental emotions; pain in upper and lower extremities, tingling in fingers, jerks and drawing in limbs; pain in face, > by chewing and external pressure; feeling of coldness in head; pain > from wrapping parts up warmly; when there is no pain she cannot bear warm things around head; brain is void and absent, mental activity much impaired; inclined to gape and cry; appetite poor; sleeps well lying on affected side.

[13] **Throat.** ‖Inflammation of tonsils, or when they are enlarged will favor suppuration and cause rapid healing.

[15] **Eating and Drinking.** ‖When drinking child bites at glass or spoon. θInflammation of brain.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Rice-watery vomiting and purging. θCholera.

‖Ineffectual attempts at vomiting, with distressing feeling of constriction in course of œsophagus, and across chest, in direction of diaphragm.

‖‖Vomiting with burning nausea rising from stomach to throat.

‖Nausea and vomiting of greenish liquid, or yellowish-green vomiting.

‖Violent vomiting of greenish water, coming on suddenly and attended by copious greenish diarrhœa and violent pain in bowels.

‖Very frequent vomiting, usually after drinking.

‖About every ten days has an attack of vomiting, preceded by headache in forehead, heat of head, and soreness or pain in eyes; attacks come on when awaking in morn-

Digitized by Google

ing, and consist only of frothy saliva; < from slightest movement, > lying still; attacks last one or two days, during which time he can take no solid food and scarcely any liquid; during intervals of attacks, tenderness of epigastrium to pressure, creeping or fluttering sensation between shoulders and at back of neck.

▮Constant fruitless attempts at vomiting, after which, nearly unconscious, he fell back into bed; at first, vomiting of food followed by vomiting of murky water mixed with green slimy strings; every swallow of water or food sets him vomiting; no appetite; excessive thirst, burning pain in stomach, great lassitude. θUræmic vomiting.

17 **Scrobiculum and Stomach.** ▮▮Violent griping and pressure in stomach, followed by vomiting.

▮▮Violent pains and cramps in stomach and bowels.

19 **Abdomen.** ▮Severe griping and colicky pains in stomach and bowels.

▮▮Retracted abdomen.

20 **Stool and Rectum.** ▮Great irritability of stomach, every kind of nourishment being rejected; continual desire to vomit with most distressing retching; bowels irritable; frequent, small, papescent stools, often mixed with mucus and blood; nervous depression; fretting, despondent. θAfter suppression of eczema.

▮Black stools, copious, painful, bloody, with tenesmus, and weakness.

▮Rice-watery purging; inelastic cold skin. θCholera.

▮Sudden severe constricting pains in abdomen, with nausea, profuse, spurting diarrhœa, and cramps in muscles of legs; lies in an apathetic condition; twitchings; groaning; clonic spasm of muscles of leg; difficult respiration; cyanosis; is conscious, but desires nothing but water to quench the burning thirst; eyes dim, fixed, retracted, and surrounded by dark circles; face sunken and cold; tongue, breath, hands and feet icy cold; voice hollow, feeble; impulse beat of heart extremely weak, radial pulse lost; stool less frequent, ashy gray, with grayish flakes; forcible vomiting; urine suppressed. θCholera paralytica.

▮Severe cases of summer diarrhœa, with griping pains and cramps of extremities.

▮Diarrhœa with irregular pulse, twitchings, startings, and jerks in limbs, subsultus tendinum, and fainting.

▮Summer complaint of children, with brain affections.

▮▮Constipation.

▮Tape worm.

21 **Urinary Organs.** ▮Suppression of urine.

Digitized by Google

[25] **Respiration.** ‖Difficult respiration.
‖Breathing short and anxious. θInflammation of brain.
‖Suffocative loss of breath.
‖Chest spasmodically constricted, impeding respiration, and increasing her anxiety.

[27] **Cough.** ‖Frequent, violent, dry cough, with tearing pain in head; cough followed by violent pulsation of heart, lasting several minutes; anxiety and pressure in chest, < sitting; cough comes on at night between 11 and 1.
‖Redness of face; blueness around mouth and lips during attack; rapid, wheezing respiration, with groaning; rattling of phlegm; starting in sleep; great fretfulness; distinct whoop after each paroxysm of cough, and crying. θWhooping cough.
‖Whooping cough; when spasmodic condition becomes manifest.
‖Whooping cough, in most obstinate cases, particularly where there is a chronic cough, and a tendency to consumption of lungs.

[29] **Heart, Pulse and Circulation.** ‖Deathly feeling behind ensiform cartilage. θCholera.
‖Frequent attacks of angina pectoris, coming on when exerting herself, or when excited.

[32] **Upper Limbs.** ‖Numbness and lameness of l. hand, especially of fingers as far as they are supplied with the nervus ulnaris.

[33] **Lower Limbs.** ‖Cramps in lower extremities, especially in calves.
‖Cramps of legs, particularly in old people.
‖Dragging of l. foot in walking; numbness and lameness in sole of l. foot gradually extending up to knee; walking and standing very difficult; no noticeable atrophy, but skin, subcutaneous tissues, muscles and ligaments considerably relaxed; sense of feeling much decreased; constant cold foot, scarcely changed by application of hot bricks; at times dull pain from hip down to knee.

[34] **Limbs in General.** ‖Violent drawing and tension in limbs, with frequent shuddering and chilliness, though skin is not cold.
‖Periodic, spasmodic, painful contraction of fingers and toes, frequently so severe that fingers could scarcely be extended by any force.
‖Cramps in extremities, and convulsive movements of limbs.
‖Coldness and severe cramp in extremities.
‖Coldness of extremities.

[35] **Rest, Position, Motion.** Lying down: chorea >.
Sitting: anxiety and pressure of chest <.

Digitized by Google

Change of posture: frequent.
Chewing: facial neuralgia >.
Motion: chorea <.
Walking: dragging of l. foot.
Throwing body about: great restlessness.

* **Nerves.** ‖Affects specifically spinal cord; congestion of brain, with convulsive motions of extremities; cannot hold head up; eyes dim, lustreless, sunken, with blue rings; sad, depressed features; dry mouth, great thirst for cooling drinks; nausea, vomiting; torpid stool; nervous trembling, with very great acuteness and sensitiveness of senses; clonic spasms beginning at periphery; deep sleep or coma; paralysis of all muscles of back up to neck. θMeningitis cerebro-spinalis.

‖Convulsions before eruption breaks out, or when eruption suddenly disappears, with tendency to metastasis to brain; quick, small, irregular pulse; low temperature; sopor; rolling of eyes; facial distortion, and also of all flexor muscles; great restlessness, throwing body about; spasmodic action of heart; vomiting; cold face, blue lips, coldness all over; < from contact. θScarlatina.

‖Metastasis during an attack of catarrhal or exanthemic fever; stage of exudation; delirium, with loud screaming, precede the sopor; convulsions begin at periphery and extend upwards; great stiffness of neck, with remarkable paleness of skin; pressure in præcordial region and sunken abdomen; great irregularity of pulse, sinking sometimes far below normal; trismus; tetanus; cramps; grinding of teeth; inability to hold up head; bloodshot eyes; insatiable thirst; cold hands and feet. θHydrocephalus acutus.

‖Convulsions coming on in lower extremities, or in fingers or toes, with much throwing about of limbs, frothing at mouth, and choking in throat; spasms preceded by violent vomiting of mucus.

‖Convulsions; limbs and body stiff, jaws clenched.

‖Consciousness lost; face distorted with convulsions; mouth drawn to one side; tongue partially paralyzed and awry; speech impeded or completely lost; one extremity, generally an arm, moved with greater difficulty than the other. θApoplexia nervosa.

‖Periodical chorea; irregular movements commencing in fingers or toes, or in one arm, and spreading all over body; twitchings often confined to one side; terrible contortions and awkward movements, accompanied by laughter, grimaces, exaltation and ecstacies; melancholy and dread of society; attacks often painful; cramps in calves; inability to speak, or only imperfectly; sudden

Digitized by Google

piercing cries; distortion of mouth and eyes; at times risus sardonicus; < after fright, and from motion; > lying down.

[37] **Sleep.** On falling asleep begins to talk, scold, scream, turn and twist; when awakened is rational.

[38] **Time.** Morning: facial neuralgia <; attack of vomiting on awaking.

Night: cough comes on between 11 and 1.

[39] **Temperature and Weather.** Warmly wrapped: facial neuralgia >.

Hot bricks: do not > cold feet.

[40] **Fever.** ‖Measles with bronchitis; delirium, wants to go home; expectoration only during night; on falling asleep, begins to talk, scold, turn, twist and screams; on being aroused, perfectly rational; tongue and mouth red.

‖Spotted fever with clonic spasms.

[41] **Attacks, Periodicity.** Sudden: attacks of vomiting; disappearance of eruptions.

At times: dull pain from hip to knee; risus sardonicus.

Lasting several minutes: cough and violent pulsation of heart.

Frequent: vomiting; violent cough; attacks of angina pectoris; change of posture.

Paroxysm: of cough.

Periodic: contraction of fingers and toes; chorea.

Distinct intervals: agonizing headache.

Every ten days: attack of vomiting.

[42] **Locality and Direction.** Left: paralysis of nervus abducentis; numbness and lameness of hand; dragging of foot in walking; numbness and lameness of sole of foot.

Right: neuralgia behind ear.

[43] **Sensations.** Pain: in upper and lower extremities; in eyes.

Agonizing: headache.

Lancinating pains: in forehead; in top of head; in temples; in occiput.

Tearing pain: in head.

Violent pain: in bowels; in stomach.

Griping: in stomach; in bowels.

Colicky pains: in stomach; in bowels.

Cramps: in stomach; in bowels; in muscles of legs; of extremities; in calves.

Spasms: clonic, of muscles of legs.

Neuralgia: behind r. ear; in cheekbone; in upper jaw.

Constricting pain: in abdomen.

Contraction: painful spasmodic of fingers; of fingers and toes.

Burning pain: in stomach.

Deathly feeling: behind ensiform cartilage.

Digitized by Google

Dull pain: from hip to knee.
Soreness: in eyes.
Distressing feeling of constriction: in œsophagus; across chest in direction of diaphragm.
Drawing: in limbs.
Tension: in limbs.
Jerks: in limbs.
Pressure: in stomach.
Numbness: of l. hand; of fingers; of sole of l. foot; extending to knee.
Lameness: of l. hand; of sole of l. foot; extending to knee.
Heaviness: of head.
Tingling: in fingers.
Creeping sensation: between shoulders; at back of neck.
Coldness: of extremities; of head.

" **Touch, Passive Motion, Injuries.** Pressure: slightest, headache <; pain in face >.
After riding in railroad car: sudden indistinct and double vision.

" **Skin.** ‖Surface of body cyanotic in a high degree. θCholera.
‖Acute exanthemata when checked in stage of eruption, or suddenly disappear in stage of florescence; pulse quick, small, weak, irregular; temperature of skin greatly reduced; skin chilly and covered with perspiration; affections of nervous system present, as convulsive movements of various parts of body, distortion of eyes, face, mouth, head, etc.; spasmodic affections of chest; sometimes eclampsia; great restlessness, frequent change of posture, sopor, or delirium.
‖Scarlatina, miliary rash, measles, smallpox, purpura, erysipelas of face, disappear suddenly and are followed by symptoms threatening paralysis of brain.
Leprous eruption, consisting of spots, without itching.
‖Inelastic cold skin. θCholera.

" **Stages of Life, Constitution.** Carbo-nitrogenoid constitution.
Child, æt. 22 months; whooping cough.
Girl, æt. 3½ years; irritation of brain.
Boy, æt. 9 years; scarlatina.
Girl, æt. 19, robust; cholera.
Girl, æt. 23; mania.
Man, æt. 29; paralysis of nervus abducentis.
A young soldier in Louisiana; cholera.
Woman, æt. 30, married, no children; diarrhœa after suppression of eczema.
Woman, æt. 32, a year ago had intermittent fever, for which she took quinine, after this chlorosis, for which she took iron; facial neuralgia.

[1] **Mind.** A kind of intoxication.
‖Confusion of ideas.
‖Intense anguish of mind and body.

[2] **Sensorium.** ‖Vertigo, confusion of ideas, and headache between temples.
Dulness and fulness of head.
Fulness in head; brain seems to expand and press against frontal bone.
Cerebro-spinal irritation; staggering gait.

[5] **Inner Head.** Very severe headache all over forehead, but especially in temples.
Dull pain in forehead, but most severe in r. temple.
Headache spreads over entire forehead, and finally settles in r. side of forehead and over temporal bone, and becomes dull and throbbing.
Throbbing in r. temple.
Soreness of r. temple when pressed against pillow.
‖Sharp pain in temples, < in left.
Persistent boring pain in small spot above l. superior orbital arch, with soreness to touch.
Severe sharp pain in superior arch of r. orbital bone.
Pain seems to meet in centre of forehead and pass down the nose.
Headache, particularly in forehead, but entire head feels as if bruised, < from motion, > from rest.
‖Headache between the temples.
Dull, heavy pain in head; bones of face very sore.

Digitized by Google

[1] Dulness and soreness of head in morning, after waking.
Dull, heavy aching in back part of head.
Dull soreness in r. occipital bone, < from pressure.

[4] **Outer Head.** Soreness of bones of l. side of head and face.
Itching of scalp.

[5] **Sight and Eyes.** Dark specks before eyes; eyes very sensitive.
Sparks before eyes.
Dimness of eyes, with profuse lachrymation.

[6] **Hearing and Ears.** Boring pain in r. ear; sharp pain in temples, < in l.; pain in lumbar region, and in anterior portion of r. thigh; chilly feeling over entire body; skin sensitive to contact of clothing, which produces a chilly sensation.
Dull soreness in r. internal ear.

[7] **Smell and Nose.** Irritability of mucous membrane of nose with fluid discharge; abundant salivation.
Bones of nose very sore, especially on pressure.

[8] **Upper Face.** Face: pale; anxious; sunken; œdematous.
Violent twitching and jerking of facial muscles of l. side, between eye and corner of mouth.
Soreness of bones of face.
Intermittent, throbbing, shooting pains in upper jaw.

[9] **Lower Face.** Intermittent and throbbing pain in r. half of inferior maxillary bone.
Lips bluish.

[10] **Teeth and Gums.** Shooting pain in upper molars of l. side, extending upward into superior maxillary bone.
Twitches of pain in r. upper and l. lower posterior molars, more protracted in former, but more acute in latter.
Tenderness of gums.

[11] **Taste and Tongue.** Taste: bitter; metallic.
Tongue: coated white; brownish-white; tremulous, covered with mucus; cool.
Back part of tongue thickly coated.

[12] **Inner Mouth.** Bad breath.

[13] **Throat.** Burning along œsophagus from stomach to mouth.
Rolling about floor in intense pain, which she described as burning her throat and bowels.
Soreness of throat.

[14] **Appetite, Thirst.** No appetite.
Intense thirst.

[15] **Eating and Drinking.** Child refuses to take anything, probably from inability to swallow.

[16] **Hiccough, Belching, Nausea and Vomiting.** Much eructation of wind.
Nausea: constant, violent; on awaking, with bitter taste; with headache between temples; with lameness of back; with unsteadiness of head, < after study.

Google

‖Nausea, with burning pain in stomach and bowels; palpitation of heart with trembling of limbs; headache, particularly in forehead, but whole head feels bruised; jerking in limbs.

Suddenly seized with violent sickness, and vomiting of a light green substance, like bile diluted with water.

‖For five days, persistent vomiting of watery greenish fluid, accompanied by chills and thirst for cold water; < eating or drinking.

Violent vomiting.

[17] **Scrobiculum and Stomach.** Great sensitiveness of epigastric region to slightest touch.

‖Dull aching pain over epigastric and r. hypochondriac regions, with nausea and paroxysmal vomiting; vomiting frequently a glairy froth.

Empty, vacant feeling in stomach.

‖Burning in stomach.

Stomach sore as if bruised.

Cutting pain in stomach while eating.

‖Cramps in stomach and bowels, followed by tonsillitis.

[19] **Abdomen.** Whole abdomen meteoric, very painful to touch, but especially over region of liver.

Pains in abdomen like those of flatulent colic.

Rumbling in bowels; sharp, quick pains in lower bowels.

Sharp, cutting pains in abdomen, afterwards subsiding into a dull soreness, followed by an unpleasant warmth in abdomen, and a severe burning in stomach.

‖Severe burning, cramping pains in abdomen.

‖Violent colic; frequent vomiting, with purging; cold sweats; intense thirst.

‖Spasmodic and neuralgic pains in bowels, accompanied by screams, and cramps in fingers and toes; great debility and threatened collapse.

‖Crampy pains in lower bowels, accompanied by extreme vesical and rectal tenesmus; micturition frequent, causing great suffering.

‖Attacks of excruciating pains in bowels, occurring every two or three weeks.

Pains in hypogastrium.

Squeezed his abdomen with both hands.

[20] **Stool and Rectum.** ‖Vomiting and purging, with cramps and collapse.

‖Pain in sacral region, with frequent urging to urinate; rectal tenesmus, with mucous discharges, so constant as to require a cloth to receive them as they flowed from the bowel. θDiarrhœa.

‖Chronic, slimy diarrhœa, during summer, with cramps in abdomen; tenesmus recti et vesicæ; frequent and painful urination; pain in sacral region.

Digitized by Google

‖Choleraic diarrhœa during summer; also useful in disturbed state of bowels during convalescence.

‖‖Asiatic cholera, with cramps in hands and feet.

[21] **Urinary Organs.** Dark red urine; burning pain during and after urination.

Strong-smelling urine; urine has the odor of garlic.

[22] **Male Sexual Organs.** White, purulent discharge from urethra; soreness of penis, with pain in prostate gland; tingling and burning in urethra.

Perspiration of scrotum, which is constantly moist and damp.

Boils frequently forming on scrotum.

[23] **Female Sexual Organs.** ‖About close of catamenia, worked out of doors during a moist, drizzly day; during night agonizing pain in lower abdominal region; tender spot over l. ovary; tongue heavily coated white.

[24] **Pregnancy, Parturition.** ‖Constant nausea, rejects everything; so weak can hardly sit up; very nervous; pulse quick and feeble; spasmodic uterine pain; at one time tenesmus and dysenteric stools. θVomiting during pregnancy.

‖Spasmodic uterine pains during pregnancy, with general debility.

[25] **Voice and Larynx.** Difficulty of speech.

[26] **Inner Chest and Lungs.** Oppression of chest, as if constricted.

Sense of weight on chest and difficult breathing.

Soreness of a small spot in l. scapula, extending into l. lung, followed by dull sticking pain in l. chest, between sixth and seventh ribs, < on deep inspiration; weak, numb feeling in l. chest, l. side of back, l. shoulder and arm.

Dull soreness in r. side of chest, with dull pains in back; < from deep inspirations.

[27] **Heart, Pulse and Circulation.** Sudden debility, with dull pain in heart, and sensation of oppression; l. chest feels too small; long involuntary inspirations; empty feeling in stomach, with vertigo, confusion of ideas, and headache between temples.

Palpitation of heart, with trembling of limbs.

‖Aberrations in rhythm of heart's action; at one time beats are very irregular and feeble, at another violent and irregular; attacks appear in paroxysms, with intermissions, during which nothing abnormal in action of heart can be detected. θCardiac chorea.

Pulsation of heart moving wall of chest up and down.

‖‖Angina pectoris.

Pulse: frequent; small, rapid, very irritable; very feeble.

Digitized by Google

[31] **Neck and Back.** Soreness of glands of neck, with stiffness of neck; pain < on moving head.
Severe pain under lower angle of l. scapula, < from motion or breathing; cannot take full breath.
Stiffness and lameness of back, < from motion, > during rest; returns after sitting awhile.
Lameness of lumbar region.
Pain in r. lumbar region, and in anterior portion of r. thigh.

[32] **Upper Limbs.** Numb, weak feeling in l. shoulder and arm.
Peculiar numb feeling in l. arm and hand, with pain in internal surface of arm, and tingling of palm of hand and of fingers, < on motion.
Constantly moving arms up and down and from side to side, with trembling of fingers.

[33] **Lower Limbs.** Limbs ache while walking; gait unsteady; increasing debility.
Pain in anterior porion of r. thigh.

[34] **Limbs in General.** Left arm feels numb and powerless, and soon a similar sensation in l. leg.
Spasms in extremities.
Extremities very cold.
Pustular tumors on wrists and ankles, and excessive sensitiveness and irritability of skin.
Itching of arms and legs.

[35] **Rest, Position, Motion.** Rest: > headache; > lameness and stiffness of back.
Motion: < headache; soreness and stiffness of neck < on moving head; > stiffness and lameness of back; tingling of hand and fingers <.
Rolling about floor: with intense pain in throat and bowels.
Walking: limbs ache.

[36] **Nerves.** General debility, want of energy, indisposition to do anything.
Feeling of weakness and extreme prostration.
Very restless; nervous.
Chorea; syncope; spasms; severe convulsions.
Epilepsy; death-like syncope.

[37] **Sleep.** Sleep disturbed and unrefreshing.
Persistent sleeplessness.

[38] **Time.** Morning: soreness of head after waking.

[39] **Temperature and Weather.** Moist, drizzly day: agonizing pain in lower abdominal region.

[40] **Fever.** Chilly feeling over entire body.
Creeping sensation produced by contact of clothing.
Cold and drowsy; skin cold.
Covered with a cold, clammy perspiration.

Google

" **Attacks, Periodicity.** Frequent: vomiting of glairy froth; micturition.

Attacks: of irregular and feeble, or irregular and violent beats of heart.

Intermittent: pain in r. half of inferior maxillary bone.

For five days: persistent vomiting.

Every two or three weeks: attacks of excruciating pain in bowels.

During summer: chronic diarrhœa; choleraic diarrhœa.

" **Locality and Direction.** Left: sharp pain in temple; boring pain in small spot above l. superior orbital arch; soreness of bones of face and side of head; twitching of muscles of side of face; pain in upper molars; pain in lower posterior molars; tender spot over ovary; soreness of small spot in scapula, extending to lung; dull, sticking pain in chest; numb feeling in chest, side of back, shoulder and arm; chest feels too small; pain under lower angle of scapula; numb feeling in shoulder and arm; numb feeling in hand; pain in arm; tingling of palm of hand; tingling of fingers; numb feeling in leg.

Right: pain in temple; side of forehead; soreness of temple; pain in superior arch of orbital bone; pain in ear; pain in anterior portion of thigh; soreness in internal ear; pain in half of inferior maxillary bone; pain in upper posterior molars; pain in hypochondriac region; soreness in side of chest; pain in lumbar region; pain in anterior portion of thigh.

" **Sensations.** As if brain expanded and pressed against frontal bone; sense of weight on chest; l. chest feels too small.

Pain: between temples; seems to meet in centre of forehead and pass down nose; in lumbar region; in anterior portion of r. thigh; in abdomen as of colic; in hypogastrium; in sacral region; in internal surface of arm.

Agonizing pain: in lower abdomen.

Excruciating pain: in bowels.

Violent colic: in abdomen.

Sharp pains: in temples; in superior arch of r. orbital bone; in lower bowels.

Severe pain: all over forehead; in temples; under lower angle of l. scapula.

Cutting pain: in stomach; in abdomen.

Cramping pains: in bowels.

Cramps: in stomach; in bowels; in fingers and toes.

Constricted feeling: of chest.

Shooting pains: in upper jaw; in upper molars of l. side, extending into superior maxillary bone.

Digitized by Google

Neuralgic pain: in abdomen.
Throbbing pain: r. side of forehead; over temporal bone; in r. temple; in upper jaw; in r. half of inferior maxillary bone.
Twitches of pain: in r. upper and l. lower posterior molars.
Sticking pain: in l. chest.
Boring pain: persistent above l. superior orbital arch; in r. ear.
Burning: along œsophagus from stomach to mouth; in bowels; in urethra.
Bruised feeling: in head; in stomach.
Dull pain: in forehead; in r. temple; in back part of head; over epigastric and r. hypochondriac regions; in l. chest, between sixth and seventh ribs; in back; in heart.
Soreness: of r. temple; of bones of face; of head; in r. occipital bone; of bones of l. side of head and face; in r. internal ear; of bones of nose; of throat; in abdomen; of penis; of small spot in l. scapula, extending into l. lung; in r. side of chest; of glands of neck.
Tingling: in urethra; of palm of hand; of fingers.
Numb feeling: in l. chest; in l. side of back; in l. shoulder and arm; in l. hand; in l. leg.
Stiffness: of neck; of back.
Lameness of head; of back; of lumbar region.
Trembling: of limbs.
Dulness: of head.
Fulness: of head.
Creeping sensation: over body.
Itching: of arms and legs.
Chilly feeling: all over body.

[45] **Touch, Passive Motion, Injuries.** Contact of clothing: skin sensitive to.
Touch: great sensitiveness in epigastric region; abdomen sensitive to; over region of liver, sensitive to.
Pressing against pillow: soreness of r. temple.
Pressure: < dull soreness in r. occipital bone; soreness of bones of nose <.

[46] **Skin.** Skin sensitive to contact of clothing, which produce chilly creeping sensation.
Severe itching of skin.
Pustular tumors on wrists and ankles, and excessive sensitiveness and irritability of skin.
Vesicular and pustular eruptions, sometimes followed by very painful ulcers, and finally by erythematous swellings.

[47] **Stages of Life, Constitution.** Miss M., æt. 20; pain in l. ovary.

Digitized by Google

Young married woman, with one child; diarrhœa.

Mrs. M., has three young children, second month of gestation; vomiting.

Mrs. W., æt. 30; vomiting.

[42] **Relations.** See under *Arsen.* (Vol. II, p. 96) for suitable antidotes in cases of poisoning. Compare: *Arsen., Cuprum,* and other arsenical and copper preparations. *Acon., Act. rac.* (angina pectoris, numbness of left side of body and powerlessness of left arm); *Merc. corr.* (diarrhœa and rectal tenesmus).

CUPRUM METALLICUM.

Copper. *Cu.*

A substance little known as a remedy before Hahnemann, although used by Mediæval physicians, after its introduction by Hohenheim (called Paracelsus) in the sixteenth century, and later (1845) in an empiric way by the Rademacherian School, in which it ranked as a polychrest.

A comprehensive monograph, including the provings and observations of Hahnemann and his provers, Bönninghausen, Stapf, Rückert, etc., with results of poisoning and curative symptoms, was published by C. Hering. In it the effects of the metal and the *acetate* are conjoined, on account of their similarity, but separated here, for the sake of individuality. See *Cuprum aceticum.*

[1] **Mind.** ❙Marked lessening of memory. θScarlatina.

Weakness of memory, as well as cerebral functions in general; in speaking he frequently has to think for the right word.

Delirium, even paralysis of brain, with symptoms of collapse.

Incoherent delirious talk.

❙Delirium: afraid of every one who approached him, shrinking away from them; tries to escape; in evening and in the dark.

Craziness; attacks with savage malice, with proud bearing, at times interrupted by clonic spasms.

Attacks of rage, wants to bite the bystanders.

Mania characterized by a wild look and fear; tries to escape.

❙Attacked suddenly with convulsions, with biting; after attack, malicious disposition towards nurse, biting, and striking and doing everything to annoy her, passed her excrements on floor.

❙Mania with biting, beating, and tearing things to pieces; insane foolish gestures of imitation and mimicry; full of insane spiteful tricks, illusions of imagination, does not recognize his own family; unhappy, apprehensive, anxious, and despairing; præcordial anguish, pale, miserable look, general chilliness, not > by heat; attacks end in sweat.

❙Bellows like a calf during delirium; periodical uttering of shrill screams.

❙Whining, tremulous voice and manner.

❙Convulsive laughter.

❙Laughing; grimaces; exaltation and ecstacies; melancholy and dread of society. θPeriodical chorea.

❙Violent weeping, anxiety, ludicrous gesticulations, and desire to hide one's self. θChorea.

❙Shuns everyone; cannot be induced to go among people in evening; very restless at night. θAsthma.

❙Alternation of gaiety and depression, before attack. θWhooping cough.

❙Unconquerable sadness, constant restlessness, as if some misfortune were approaching; fears he will lose his reason.

❙Sadness while walking in open air, must stand still or sit down.

Google

‖The child is afraid of strangers, while teething.

‖Afraid of and shrinking away from everyone who approaches him; afraid of falling; clinging tightly to nurse; won't stay in bed, but in lap; conscious, knows people; tongue darting forth and back with great rapidity, like a snake's. θCatarrhal or exanthematic fevers; scarlet fever without eruption; during dentition.

‖Unusual quickness and briskness in erroneous ideas, one following the other quickly, all of an anxious character; a staring look fixed on objects; pulse quick, unequal; profuse weakening sweat; timid, bashful woman, eighth day after confinement.

‖Paroxysms of anxiety; full of fears.

‖Attacks preceded by great anxiety. θWhooping cough.

‖Attacks of deathly anxiety without heat.

‖Loss of spirits; anxiety; fits of anguish and fear of death.

‖Restless tossing about and constant restlessness.

‖Irritable and changeable, at times gentle and sensitive, at others very contrary. θChorea.

‖Changeable mood; children cross and irritable, or indifferent and dull, in brain affections.

‖Mental and bodily exhaustion, from overexertion of mind or loss of sleep; pulse feeble, somewhat frequent, unequal; skin moist, feet generally cold; attacks of unconquerable anxiety; head giddy and internally painful, feels as if he would lose his senses; sleep full of dreams, restless, unrefreshing.

‖Restless tossing about.

Sensorium. Deep sopor, with twitching and jerking of limbs.

‖Total loss of consciousness. θSpasms.

‖Vertigo: on looking up, with dimness of sight, as though a veil were before eyes; violent and long lasting, > by an evacuation of bowels; with stupor; reeling; head giddy, cannot sit up in bed; with weariness.

‖Vertigo of old people and slight apoplectic attacks.

‖While sitting, suddenly places head upon pillow of sofa, gently shakes head from side to side, about sixty times to the minute; eyes closed; expression of face pleasant; twitching of eyelids with spasmodic rolling of eyeballs. θEpilepsy.

‖Vomiting of watery substance from stomach, colic and spasms; heat in forehead; intense thirst; cold water temporarily prevents vomiting, but not a distressing hiccough that seemed certain to end in a convulsion, after which child lay in a comatose state for twenty-four hours; heat of head is great, and while child was in a deep sopor, there were twitching and jerking of

limbs, coldness of hands, and blueness of fingers. θCerebral meningitis.

[3] **Inner Head.** ‖Pain in head, which feels hollow.

‖Violent pain in forehead, < over l. eye; sensation of pressure over l. eye and root of nose; nose seems stuffed up, yet there is a discharge of coryza; loss of smell, taste imperfect; heaviness of head as if brain would press out of forehead, with violent, almost unbearable headache, < in l. side and from motion, > when lying down; she thinks an abscess is forming in brain, and pain will set her crazy. θCatarrh of frontal sinus.

Violent agonizing headache, at distinct intervals, in paroxysms, lancinating pains, sometimes in forehead, sometimes in temple or occiput, < by slightest pressure.

Headache below os frontis, feels as if head would be torn asunder.

πPainful tearing in forepart of head, with a sensation of pressing outwards; great dulness and stupidity; < when touched.

‖Stitches in temples, with redness of eyes.

‖Bruised pain in brain, and in orbit on turning eye.

‖Crawling sensation in vertex.

‖Strange tingling pain in vertex; menses omitting.

‖‖Violent dull headache over glabella.

‖Violent continuous headache, increased periodically, with sensation as if cold water was poured on head; cold hands and feet when headache subsides.

‖Chronic headache beginning in afternoon and continuing into night; pain in region of l. parietal bone, extending down neck and arms, and across chest, with spasmodic drawings, amounting almost to convulsions; vertigo; nausea; chilliness, and frequent desire to urinate.

‖Dulness and heaviness of head, with increasing anxiety.

‖‖Congestion to brain, with convulsive motions of extremities and of muscles of face; eyes turned up, fixed; half-closed lids; pupils unaltered, insensible; skin flabby and cool; pulse small, and could not be counted; slow, heavy inspiration; quick, moaning expiration.

‖Brain affections of children, with catarrhal fever, difficult dentition, or exanthematic diseases; they cannot hold head up.

‖After meningitis, extreme weakness, want of appetite, fever in evening, sweat in morning, pulse thread-like, skin flabby, cold and moist.

‖Apoplexia nervosa; loss of consciousness; distortion of mouth and face, tongue partially paralyzed and curved to one side; unable to speak; paralysis of one or other of limbs.

Digitized by Google

Exacerbation in brain affections, evenings.
‖Headache after epileptic attacks.
‖Paralysis of brain with symptoms of collapse.
‖Metastasis to brain from other organs.

[4] **Outer Head.** Crawling sensation on top of head, as of something moving there.
‖Tossing about of head.
‖Convulsions of head; head moves from side to side, is drawn to one side, or falls forward; < or renewed by contact. θHydrocephalus.
‖Children cannot hold the head up. θBrain affections. θWhooping cough.
‖‖Purplish-red swelling of head; face purple red, and lips blue; convulsions and twitches in limbs; < when touched, which causes the swelling to pain.

[5] **Sight and Eyes.** Eyes: dim; fixed and staring; protruding, glistening; turned upward; lustreless; sunken, with blue rings; feel so weak that they close.
Immobility of pupils.
‖Pressing pain in eyes.
‖Bruised pain in orbits when moving eyes.
‖‖Violent itching in eyes toward evening.
‖Eyes red, inflamed. θEpilepsy.
‖Eyeballs red, move like a pendulum from side to side.
‖Quick rotation of balls, with lids closed; severe pain in eye-balls during attacks.
‖Frequent twitching of lids of l. eye, blepharospasm and photophobia. θAsthma.
‖Inflammation: of periosteum and cellular tissue in orbita; of lachrymal glands; spots on cornea.

[6] **Hearing and Ears.** ‖Distant drumming in ear, upon which he is lying, in morning, disappears on rising.
‖Difficult hearing.
‖Boring in and behind ears, pressing pain in front.
Itching in ear.
‖Swelling of meatus externus.

[7] **Smell and Nose.** ‖Loss of smell.
‖‖Sensation of great congestion of blood to nose.
‖Affection of frontal sinuses, with pain in forehead, < over l. eye and root of nose, < from motion, > when lying; nose feels stuffed, yet sometimes discharges yellow and again watery matter; smell gone; taste imperfect.
‖Nosebleed; sometimes on right side only. θPneumonia.
‖Copious fluent coryza.
‖Stoppage of nose.

[8] **Upper Face.** Expression: sad, depressed; of suffering; of prostration; full of anguish.
‖Spasmodic distortion of face; rolling of eyes. θEpilepsy.

Digitized by Google

Face: very red, eyelids closed and balls constantly rotating; pale; grayish, dirty; sunken, pinched; icy cold.
Face red, puffed, covered with hot sweat. θAsthma.
Face and lips blue.
Erysipelas of face disappears suddenly.

9 **Lower Face.** Distortion of mouth, and of eyes; at times risus sardonicus. θPeriodical chorea.
Mouth firmly closed; spasmodic contraction of jaw.
Lips blue.
Froth from mouth.

10 **Teeth and Gums.** Rending pain from teeth to temples.
Difficult dentition, with convulsions.
Gums ulcerated.
Trismus. θCholera asiatica.

11 **Taste and Tongue.** Taste: sweet, or sweetish metallic, coppery; bitter.
Sudden metallic-sour taste in mouth, with flow of saliva, before outbreak. θSpasms.
All food tasts like clear water.
Tongue darting forth and back with great rapidity.
Paralysis of tongue, stuttering, imperfect speech.
Tongue: red; dry and rough, papillæ enlarged; coated white, yellowish or brown; trembling. θChorea.
Tip of tongue cold.
Chronic glossitis.

12 **Inner Mouth.** Dry mouth. θBrain affections.
Induration of salivary gland, with or without fistula.
Profuse salivation; mercurial.
Saliva: sweet, stringy; frothy, with cough.

13 **Throat.** Palate red, fauces and tonsils inflamed.
Dull, piercing pain in l. tonsil, < by external touch.
Feeling of constriction, and acute pain in throat.
Sensation as if constricted on swallowing.
Spasms of throat, preventing speech.
Burning in throat and dryness, with thirst.
Singultus and spasm of œsophagus.
Gurgling noise of drink passing down œsophagus.

14 **Appetite, Thirst, Desires, Aversions.** Loss of appetite.
Great thirst for cooling drink; a swallow of cold water > cough and vomiting.
Desire for warm food and drinks; eats hastily.

15 **Eating and Drinking.** Gurgling noise of drink passing down œsophagus.
A swallow of cold water > cough, or vomiting.
Milk brings on water-brash.

16 **Hiccough, Belching, Nausea and Vomiting.** Hiccough: precedes vomiting and spasms; begins attack of asthma.
Constant eructations; rumbling in abdomen.

Digitized by Google

Nausea: ascending from stomach into throat; excessive; repeated but useless efforts at vomiting; retching and throwing up of phlegm.

Nausea and vomiting after taking cold.

Nausea, vomiting and cramps during catamenia, or catamenia omitting.

Nausea, vomiting and torpid stool, with brain affections.

Severe retching with the stool. θDysentery.

Vomiting of water containing flakes, with violent colic and cramps.

Vomiting: in gushes of whey-like fluid; frothy mucus; bilious; green; forcible; > by drinking cold water.

Vomiting of blood. θYellow fever.

Vomiting with the cough; with convulsions.

Spasms preceded by violent vomiting of mucus.

Periodical attacks of vomiting.

[17] **Scrobiculum and Stomach.** Burning in epigastric region.

Sensitiveness of epigastrium; it is sore to touch; clothes feel uncomfortable.

Deathly feeling of constriction beneath sternum; with pain behind ensiform cartilage. θCholera.

Pressure in pit of stomach, < from touch or pressure.

Nausea, pressure in stomach, distress in chest, trembling of heart, arms and legs, with feeling of prostration. θCardialgia.

Sensation as of a round ball going to and fro under ribs, with various sounds, < from fluid food; > from tight clothing or bandage around abdomen, and lying quiet.

Sensation as though something bitter were in stomach.

Gnawing and corroding sensation in stomach.

Violent pressure at stomach, with contractive pains at intervals.

Excessive tormenting pains in stomach and epigastric region.

Cramps in stomach and chest, cramps extending upward, with violent diarrhœa.

Spasms of stomach.

Bluish color of pit of stomach and chest during spell. θEpilepsy.

[18] **Hypochondria.** Drawing pain from l. hypochondrium to hip.

Cirrhosis of liver; hepatitis syphilitica.

[19] **Abdomen.** Pressure in abdomen as from a stone; < from contact.

Pressure at stomach, nausea, eructations, rumbling in abdomen, sensation as of a round ball going to and fro under ribs, with various sounds; < from fluid food, > by tight clothing or bandage around abdomen; sleeplessness; > from lying quiet.

Digitized by Google

Abdomen tense, or contracted, hot, and tender to touch.
Big belly, of children.
Cutting pains in umbilical region, as if a knife were thrust through to back, with piercing screams.
Cutting pains below navel, abdomen painful on touch, with diarrhœa.
Violent colicky, cutting, drawing pains in abdomen; abdomen drawn in; colic not increased by pressure; great anxiety.
Violent intermittent colic.
Cramps in abdomen. θEpilepsy.
Violent spasms in abdomen and upper and lower limbs, with piercing, distressing screams.
Intussusception of bowels, with singultus, violent colic, stercoraceous vomiting and great agony
Ulcers in intestines, with corroding, stinging pain.
Spasmodic movements of abdominal muscles.
Inguinal gland swollen.

[20] **Stool and Rectum.** Stools: watery, with flakes; bloody; black; watery; green; gray, with flocculent matter in cholera, also masses of whey-like fluid; frequent; not very copious; in pernicious intermittents; suppressed with general heat.
Painful green stools, with violent cutting and tenesmus.
Involuntary thin stool. θEclampsia during dentition.
Diarrhœa: violent; profuse squirting out; with much wind passing; with cramps.
Summer complaint of children, with brain affections.
Cholera morbus; cold perspiration, pulse 120, frequent retching, occasional vomiting of a substance resembling coffee grounds, and frequent stools.
Chronic diarrhœa, especially in cachectic persons.
Cholera asiatica, spasmodic stage; violent spasms, peculiar contractions of fingers and toes; painful pressure in scrobiculum, < by touch; audible gurgling noise of drink passing down; contraction of chest before vomiting.
Much cramping of muscles, or cramps appearing after vomiting has ceased, in place of it; icy coldness, pulselessness. θCholera asiatica.
From the beginning drawing and tension in muscles, slight convulsive starts, or later more continued cramps, particularly in calves. θCholera asiatica.
Spasmodic cramp with coldness, anxiety, thirst, gagging and diarrhœa. θCholera asiatica.
Frequent vomiting and stools of copious masses of whey-like fluids, with continuous pains in stomach and abdomen; constant cramps with convulsive motions of

lower limbs; eyes sunken, face small, nose pointed, dark blue color of face, blue all over body, tongue cold, aphonia; heart-beat weak, pulse scarcely perceptible. θCholera asiatica.

▮Painful twitching and slight playing motions of muscles; trismus; painful contraction of chest; painful cramps of calves; painful convulsions of fingers and toes; difficult, painful vomiting; pressure in pit of stomach, < from touch; constant restlessness; fear of death; light delirium. θCholera asiatica.

▮Deathly anxiety without heat, restless tossing; staring, sunken eyes; pale bluish face, features changed and anxious; hands cold, cold sweat; violent thirst, hiccough, nausea in whole abdomen, but most in pit of stomach rising up into throat; continuous, violent vomiting > by drinking cold water; aphonia, difficult breathing; drawing, spasmodic or digging pain in calves. θCholera asiatica.

▮In second stage: cramps, cold sweats, hoarseness, blue lips and nails, thirst, no urine, cold limbs, weak pulse, face and tongue cold, skin dough-like, in folds. θCholera.

▮In third stage: discharges of whitish fluid, thirst violent· sudden cries with violent clonic spasms of lower limbs on lying down; fingers stiff and drawn crooked, eyes sunken, with dark or livid circles; skin blue, slate-colored, and inelastic; pulse imperceptible. θCholera.

▮Constipation, alternating with diarrhœa.

▮Thread-worms; round worms; tape-worms.

[31] **Urinary Organs.** Ineffectual desire to urinate, with diarrhœa. θPregnancy.

▮Frequent desire to urinate. θNeuralgia in head.

▮Must urinate during night.

▮Profuse discharge of a clear, watery urine during or after spell. θEpilepsy.

▮Urine: acid; straw-colored, turbid after standing; a reddish, thin sediment adheres to vessel; dark red, turbid, with yellowish sediment; viscous, offensive; bloody; scanty or suppressed.

▮Great and slowly progressing emaciation; suppurating tuberculosis of lungs, and evident signs of depression of brain; very great thirst; increased hunger; sweetish taste of mouth; increased urination, especially at night; dry, very infrequent stool; decrease of sexual desire. θDiabetes.

▮Scanty urine in brain affections.

▮Uræmic convulsions.

[32] **Male Sexual Organs.** ▮Great nervousness in young men, who are prematurely old and have cramps in calves of legs and feet on attempting coition.

Digitized by Google

Secondary gonorrhœa; discharge variable as to quantity; orifice of urethra sticking together.

[23] **Female Sexual Organs.** Before menses: spasmodic dyspnœa; convulsions; violent palpitation.

Menstruation too late; protracted.

Before or during menses, or after suppression, violent unbearable cramps in abdomen, extending up into chest, causing nausea, vomiting; sometimes convulsions of limbs and piercing shrieks.

Frequent epileptic spasms during menstruation.

Menses not appearing after suppression of foot-sweat.

Torpid chlorosis.

[24] **Pregnancy, Parturition, Lactation.** Violent and distressing cramps in uterine region, in pit of stomach, fingers and toes, or violent general spasms during pregnancy.

Spasms during parturition, with violent vomiting; opisthotonos, or spreading of limbs and opening mouth.

Clonic spasms during pregnancy or parturition, when attack commences in one part, as in fingers or toes, or in a limb, and gradually spreads all over body; great restlessness between the attacks.

During lying-in-time: sour-smelling sweat; miliary eruption; anxiety; easily frightened; heaviness of head; soreness of abdomen to pressure; burning in small of back; numbness of arms. Spasms commence with cramps in fingers and toes; hands and feet turned outward.

Violent spasmodic labor pains appearing at irregular intervals, often with violent cramps in lower extremities, or cramps may be confined to fingers and toes; great restlessness between the pains.

Most distressing after-pains, particularly in women who have borne many children.

Cramping after-pains often produce cramp in extremities.

Swelling and induration of mammæ.

[25] **Voice, Larynx, Trachea, Bronchia.** Speechlessness continues after consciousness is restored, after hysterical, epileptic, or other convulsions; reflex aphonia from cerebral or other sympathetic causes; spasmodic cough, or dyspnœa, due to spasm of larynx, diaphragm, or intercostal muscles, with cyanotic state of lips, nails, etc.

Spasm of glottis, preventing speech.

Intermittent aphonia in a professional singer.

Continued hoarseness, so that he cannot speak a word, with desire to lie down.

Hoarseness as soon as he breathes dry cold air.

Hoarse crying, like a child.

Digitized by Google

‖Contraction of larynx with cough.

‖Head thrown far back on pillow; mouth wide open; cheeks dark red, almost purple; eyes partly closed; trachea hard as a bone and nearly even with chin; breathing crowing and very difficult; hands and feet cramped and rigid but not cold; every effort to swallow increases the spasms of glottis. θLaryngeal spasm.

‖Croup, numerous cases.

» **Respiration.** Sighing; rolling from one side to another; at intervals trying to take a deep inspiration.

‖Respirations deep and snoring, twelve to a minute.

‖Respiration hurried and noisy. θSpasms.

‖Very rapid respiration, with rattling in bronchi, as if they were full of mucus.

‖Whistling breathing, with whooping cough.

‖Quick rattling breathing, with cough.

‖Between attacks of whooping cough, rattling on chest.

‖Constant spasmodic jerking motion of diaphragm, making breathing short; muscles of chest and abdomen in constant motion, as after running fast; talks like one out of breath, < from motion; > on lying down.

‖Difficult, labored respiration; much rattling of mucus.

‖Dyspnœa; short, superficial, quick respirations, < by coughing, laughing, bending upper part of body backward, walking quickly, or inhaling acrid vapors.

‖When trying to take a deep breath, cough with whistling breathing; dyspnœa in spasmodic fits, almost suffocating. θAsthma.

‖Dyspnœa so intense, that he cannot bear a handkerchief before face.

‖Spasmodic dyspnœa after fright or vexation.

‖Asthma Millari; violent attacks, without any cough, in children.

‖Violent asthmatic attacks come on suddenly, and cease suddenly; during attacks, great dyspnœa, patient sitting in a bent position; loud wheezing respiration; cannot speak above a whisper; dark red face; eyes red and protruding; trembling of limbs; profuse sweat; attacks particularly < by long continued walking against the wind.

‖Quick, anxious respiration; contraction of muscles in hypochondriac region during inspiration; rattling of mucus deep in chest; great restlessness, throwing herself about in bed; face blue; eyes wide open; larynx drawn upward; presses hands violently against bed; visible cramps of respiratory muscles; predominant abdominal respiration; difficult, hollow, hoarse cough, sometimes with a whistling or metallic ringing sound;

Digitized by Google

hands cold; cold sweat on forehead; spasmodic, small, and very frequent pulse; attacks followed by great prostration. θAsthma Millari.

‖Beginning paralysis of lungs; indicated by sudden difficulty of breathing, followed by great prostration.

Cough. ‖‖Cough with interrupted, almost suppressed respiration.

‖Cough increases dyspnœa.

‖Dry, suffocating cough, with gagging, < at night, not permitting sleep.

‖‖Cough in children; threatening to suffocate.

‖With every paroxysm of cough, child coughs itself into a fit; appears as if it were dead.

‖Cough, with regular inhalation, but sighing exhalation.

‖Cough, < at night, with sensation of great dryness in pit of stomach.

‖Sound when coughing as if cough re-echoed in stomach.

‖Fatiguing cough with blowing of blood from nose.

‖Trembling after coughing.

‖Metastatic cough, with the characteristic sound of croup.

Nervous and spasmodic cough.

‖Dry cough with measles.

‖Difficult expectoration, with cough.

‖Blood in coughing is dark, mixed with phlegm.

‖Cough dry in evening, slight expectoration morning; phlegm mixed with dark blood, of putrid taste and smell.

‖Cough after sea wind.

‖Cough: < by inhaling cold air; taking deep breath; laughing; after eating solid food; when bending backward; on coming from cold air into warm room.

‖‖Cough > by drinking cold water.

‖Before the attacks, great anxiety; attacks promoted by eating solid food; they vomit particularly solid food. θWhooping cough.

‖Three attacks in quick succession, most at night, with loss of breath. θWhooping cough.

‖Paroxysm excited by phlegm in larynx, or a feeling of cramp in pharynx. θWhooping cough.

‖Whooping cough, in long attacks, uninterrupted until breath is gone.

‖Attacks severe, with entire loss of breath, slight twitchings, rigidity; do not recover for some time; between attacks, perceptible rattling of mucus in chest. θWhooping cough.

‖Whooping cough in most malignant form, > by swallowing cold water.

‖Children get stiff, breathing ceases, spasmodic twitchings, after awhile consciousness returns, they vomit, and recover but slowly. θWhooping cough.

Digitized by Google

‖Child has a complete cataleptic spasm with each paroxysm of whooping cough.
‖Stadium nervosum of pertussis, each attack ending in convulsions.
‖Putrid phlegm. θWhooping cough.
‖Pertussis, when vomiting follows each paroxysm of coughing.
‖Convulsive throwing up of tough, gelatinous mucus, during paroxysms; afterwards constant rattling on chest; convulsions of flexor muscles. θPertussis.

[28] **Inner Chest and Lungs.** ‖Spasmodic constriction of chest, obstructing breathing and preventing speech; after fright or anger.
‖Spasmodic contraction of chest: after drinking; before vomiting, in cholera Asiatica; with inclination to urinate; with cough.
‖Nausea, pressure on stomach, and anxious contraction of chest; trembling at heart; trembling of arms and feet; can't walk; great weakness; changed expression and paleness of face.
‖Pain behind ensiform cartilage, with a deathly feeling; attacks of dyspnœa unto suffocation, cold face, blue lips, coldness all over.
‖Shooting pains in sides of chest, must cry out.
‖Feeling of a rush of blood to the chest.
Violent palpitation of heart, and slow, small, weak pulse. θParalysis after cholera, apoplexy, etc.
Rattling of mucus, deep in chest. θAsthma Millari.
‖Lobular pneumonia, when formation of abscess threatens; beginning paralysis of lungs, indicated by a sudden difficulty of breathing, followed by great prostration; complication with whooping cough; face earthy, dirty, bluish; roof of mouth red; sweat sour-smelling; diarrhœa.
‖Epidemic pneumonia; after a few days' dry coughing or a diarrhœa, either stitches, mostly in left side of chest, or a pressure behind sternum, or neither, but bronchitic symptoms by auscultation, with headache, fever or great prostration; cannot take a deep breath, the shooting pain prevents it; in some cases dyspnœa, *sudden* feeling of suffocation, has to sit up, with a pale, collapsed face.

[29] **Heart.** ‖Anxious feeling about heart.
‖Boring pain in region of heart; stitches below it.
‖Palpitation and spasms of heart.
‖Disturbed innervation of heart; nervous palpitation with blueness of face, dyspnœa; sudden death impending.
‖Attacks when excited or when exciting herself; deathly feeling with pain behind ensiform cartilage; cold face,

Digitized by Google

blue lips, coldness all over; sudden attack of dyspnœa unto suffocation. θAngina pectoris.

‖Nausea, pressure in stomach, anxious oppression of chest, trembling of heart; also trembling in hands and feet, so that she cannot walk; great lassitude; paleness of face with altered expression; constipation; disturbed mind and sleep; great nervousness. θAffection of heart.

‖Angina pectoris, attacks coming on from excitement and exertion; slow pulse.

Pulse generally small, almost imperceptible, weak and very slow; less frequently full, hard, and accelerated.

‖Pulse very changeable; thready, tense; small, hard and moderately frequent; irritable in brain affections.

‖Pulse thready, tense, 100 per minute. θMeasles, with pneumonic symptoms.

‖Pulse quick, small. θScarlatina.

‖A strong pulse and a wild look.

30 **Outer Chest.** ‖Chest and epigastric region become blue. θEpilepsy.

31 **Neck and Back.** ‖Throbbing carotids. θSpasms.

‖Glands of neck indurated.

‖Paralysis of muscles of back up to neck; also of the limbs; lower limbs œdematous, but retain sensibility.

‖Hyperæsthesia and great sensitiveness of spinal column from sixth cervical vertebra to small of back, slightest touch intolerable; tearing, jerking pains in limbs.

Broad stitches as with a knife, under l. scapula, near spinal column, independent of breathing.

Lancination in small of back in a transverse direction.

Burning and tearing in small of back.

Stiff, lame feeling in back and lumbar region.

Backache, top of sacrum; griping and spasm about region of heart; head troubles him a great deal.

32 **Upper Limbs.** ‖Anchylosis of shoulder-joint.

‖After overwork and mental anxiety, twitching in fingers, extending into hands, arms and body, to diaphragm; upper portion of body and arms affected by a remittent convulsive shaking; flushed face, hot head; alternate laughing and crying, ending in profuse sweat; paroxysms excited by laughing, talking, or any exciting emotion; at no time did the convulsive shaking or trembling extend below waist.

‖Jerking of arms and hands.

‖Left arm convulsively jerked as by an electric shock.

‖Drawing pains in both arms. θHeadache.

‖Drawing sensation in l. arm, arm drawn involuntarily close to body; formication and tearing in r. hand. θEpilepsy.

Digitized by Google

Sensation in r. arm and forearm, as of constriction of different parts, and of great increase in size, it seeming to him at times to be larger than his whole body, and its motions not fully under control of will.

Numbness and lameness of arms and hands.

Inflammation of lymphatic vessels from hand to shoulder, with swelling of hand.

Tetter in bend of elbow, with yellow scabs; itching violently, particularly in evening.

Frequent falling asleep of the hands, oppression of chest, and palpitation. θSpinal irritation.

Can hold nothing in hand, the objects fall to the ground.

Clutches air with hands, unable to speak or swallow. θAsthma.

Long-lasting trembling and shaking of r. hand.

Coldness of hands, and bluish appearance of fingers.

Twitching in hands and fingers.

Stitching, rending or drawing pains in upper limbs.

Stiffened and inflamed hands and fingers.

Pain in middle finger as if pricked with a needle, followed the next day by jerking of finger, which soon extended to all the fingers, to first one arm then the other, and finally, ere eight weeks elapsed, there was not a muscle in body which did not occasionally jerk involuntarily. θChorea minor.

Fingers as if dead. θCholera.

Little vesicles on tips of fingers, oozing watery fluid.

Ringworm on point of r. elbow, and crusts in bend of left.

Lower Limbs. Paralysis of lower limbs. θPsoas abscess.

Violent cramps in legs and feet

Twitching in lower limbs, drawing them backward.

Lameness of lower limbs, with contraction of muscles.

Great weakness of legs, knees give way.

Weakness of knees, with painful drawing when walking and standing, which is very difficult, knees give way.

Frequent involuntary doubling up of knees in walking, bringing him to the ground; with whining, tremulous voice and manner.

Weakness in knee-joint, pain as if broken.

Spasms and cramps in calves.

Drawing and digging pain in calf.

Muscles of calf contracted in knots; convulsive twitching of fingers and toes; cramping, colicky pains; no vomiting or diarrhœa. θCholera.

Cramp in leg, from ankle up into calf.

Painful heaviness in ankle.

Child draws feet spasmodically upwards and backwards upon nates. θConvulsions.

Google

ǃIcy coldness of feet, or burning in soles; suppressed foot-sweat, or sweating of feet.

[34] **Limbs in General.** ǃSevere cramps in muscles of extremities, making her cry out with pain; flexors strongly contracted, she imagines every moment the joints will break; limbs hot and very sensitive to touch.

ǃCramps in limbs, fingers and toes.

ǃWeakness and weariness of limbs.

ǃColdness of limbs and hands, bluish appearance of fingers; low temperature, prostration.

ǃContraction of joints, particularly knees.

ǃTwitching and jerking of arms and legs. θSpasms.

π Itching and tearing in limbs, and muscles of back, can hardly bear it.

ǃTingling in extremities; twitching and jerking of limbs.

ǃPeculiar contractions of fingers and toes. θCholera.

ǃConvulsions beginning with cramps in lower extremities, and drawing in of fingers and toes, throwing about of limbs, frothing at mouth, and choking in throat.

ǃLameness, dragging of l. leg; twitching of l. arm; imperfect speech, tongue trembling; inability to grasp and hold anything. θChorea.

[35] **Rest. Position. Motion.** Lying: headache >; drumming in ear upon which he lies; pain in forehead >; sensation as of a ball going to and fro under ribs >; spasmodic jerking of diaphragm >; twitchings >.

Sitting: sadness while walking compels; sudden attack of epilepsy.

Standing: sadness while walking compels quiet; painful drawing in knees.

Sitting in bent position: during asthmatic attack.

Motion: headache <; pain in forehead <; spasmodic jerking of diaphragm <; twitching in arms and upper part of body brought on.

On opening eyes: eyeballs move about.

On moving eyes: pain in orbit.

Looking up: vertigo, with dimness of sight.

Lying down: sudden cries, clonic spasms of lower limbs.

Sitting up: giddiness of head while in bed, prevents; sudden suffocation compels.

Rising: drumming in ear >.

Bending backward: dyspnœa <; cough <.

Walking: sadness while; dyspnœa < by quick; asthma <; painful drawing in knees; involuntary doubling up of knees.

Exertion: angina pectoris coming on.

[36] **Nerves.** ǃSenses less acute, in cholera.

ǃRestless tossing about and constant uneasiness.

Digitized by Google

Nervous trembling, with very great acuteness and sensitiveness of all the senses.
Weariness of long duration.
Great weakness of muscles and relaxation of body.
Great prostration, with nervous excitability, constant restlessness driving out of bed.
Twitching, jerking or starting during sleep.
Starting, grinding of teeth, in brain affections.
Twitching of limbs, followed by unconsciousness.
Twitchings and jerkings, which commence in fingers; spasms often affect only one side, are painful, spread over whole body. θChorea.
Periodical chorea, muscular contortions, with laughter, grimaces, exaltation and ecstasies; irregular movements commencing in fingers and toes; twitchings, often confined to one side; > when lying.
Involuntary motions of l. arm and leg resulting from fright, and finally developing into chorea, so that she is unable to keep limbs quiet while awake; control of tongue lost, and for a long time speech absent.
St. Vitus' dance in a girl of 7 years, after seeing a child in convulsions; attack begins with shooting and burning in l. arm; arm convulsed, tossed about, so that whole body has to follow; horrible distortion of eyes and face; neck drawn to r. shoulder; face red, sweating; fever and thirst; ends with making fun—creeping under table—irritable, changing from a mild, sentimental mood to most stubborn obstinacy.
Chorea, or other clonic spasms, during pregnancy, when attacks commence in one part—the fingers, or a limb—and gradually extend until the whole frame is involved.
Face deathly; lips cyanotic; breathing only as it were by voluntary efforts; rolling alternately each time the chest heaved, from r. side to back, from back to r. side again; pulse thready, tense, 120 per minute.
Spasmodic affections in general; whooping cough where attacks run into catalepsy; epilepsy; spasms, particularly which begin in fingers and toes, then spread all over body; clonic spasms.
Spasms preceded by violent vomiting of mucus; after spasm child screams, turns and twists until another occurs; all troubles seem inclined to be translated to brain, threatening that organ with paralysis or dropsy.
Spasms with blue face and thumbs clenched across palms of hands.
Spasms come on in paroxysms, grouped with other symptoms which always appear with these paroxysms. θChorea.

Digitized by Google

Before outbreak, she feels a sudden metallic-sour taste in mouth, with flow of saliva; dulness and heaviness of head, and an increasing anxiety which drives her to bed; face grows red; carotids pulsate; reddened bulbi become distorted; throat and chest feel constricted; she cannot speak; respiration hurried and noisy, arms and legs jerk; especially l. arm is convulsively jerked as by an electric shock; total loss of consciousness; spell lasts from twenty to twenty-five minutes; body breaks out in sweat of an unpleasant odor; urine flows involuntarily; gradually pulse grows slower, and moaning child falls into a comatose sleep, from which she awakes with dulness of head, slow remembrance, and excessive prostration; spasms every fourteen days. θSpasms from fright after operation.

Spasms after vexation or fright.

Stiffness of whole body; sometimes body bent forward.

Spasms from metastasis from other organs to brain.

Tonic spasms, throwing patient about bed with such violence, as to require several persons to hold her, sometimes body is bent backward like a bow; unconsciousness; constant trickling of saliva from mouth; constipation; frequent scanty, turbid urine.

In anæmic conditions; shrill cries during attack; drowsy and stupid condition during intervals, with nausea and vomiting of slime; bloated abdomen, with involuntary, thin discharges from bowels; also when child loses its breath from crying, and draws its feet spasmodically upwards and backwards upon nates. θConvulsions of children.

General convulsions, with continued vomiting and violent colic, uræmic eclampsia with loquacious delirium, followed by apathy, tongue and breath cold; face distorted, often red; eyes projecting, staring; long, shrill screams; finally exhaustion, sweat, torpor, and cessation of convulsions.

Eclampsia of children, during dentition; violent spasms, similar to epilepsy; red face; head and face puffed up; shrill shrieks before attack; nausea, violent retching with vomiting of mucus; lethargy; twisting, turning, screaming; belly distended and hard; involuntary thin stools; sometimes convulsive twitching of limbs, followed by senselessness.

Child lies on belly and spasmodically thrusts breech up.

Convulsions with biting.

Epileptic convulsions: trembling, tottering and falling unconscious, without a scream; preceded by drawing in l. arm; aura epileptica; followed by headache; during sleep at night; each new moon.

Digitized by Google

‖She becomes suddenly pale; loses consciousness; muscles of face and limbs jerk; at last whole body becomes stiff; falls down sometimes; two or three attacks every week θEpilepsy.

‖Epileptiform convulsions; he trembled, staggered, and fell down unconscious, without crying.

Before attack: nausea, retching and throwing up of phlegm, bloated abdomen, drawing sensation in l. arm, arm is drawn involuntarily close to body, formication and tearing in r. hand, shuddering, goose-flesh, palpitation of heart, or sudden shriek and falling down, without any premonitory signs.

During attack: fingers become dead; involuntary discharge of urine; bluish color of pit of stomach and chest; chest and head covered with perspiration.

After attack: weeping; headache; profuse discharge of clear, watery urine; long trembling and shaking of r. hand; sleep.

During intervals: anxiety; tendency to be frightened; burning in chest and abdomen, with chilliness of remainder of body; burning and tearing in small of back; numbness of arms.

‖In clearly idiopathic cases of epilepsy, with no organic lesions; < about new moon; after mental excitement; fright.

‖Nocturnal epilepsy, or when the fits return at regular intervals (menses), beginning with a sudden scream; unconsciousness; loss of sensibility and throwing the body upwards and forwards; coldness of hands and feet; lividity of face; clinching the thumbs; suffocative paroxysms; frequent emission of urine; turbid urine; piercing, violent screaming; difficult comprehension or stupor; convulsions of children during dentition or from retrocession of exanthemata.

‖Epileptic attacks in consequence of getting wet; drew herself up in bed like a ball, began to scream at slightest touch, or distorted her face as if from pain, and tried in every way to prevent feeling the pulse.

‖One or two days after cessation of menses, during night, unconsciousness, moaning, rattling in throat, frothing at the mouth, clinching of thumbs, with cramps in abdomen, loss of appetite, and yellowish-white coating of tongue. θEpilepsy after falling upon head.

πOpisthotonic spasms, body arched, resting on occiput and heels.

‖Tetanus, with bending head back, and escape of urine.

Rigidity of limbs and trunk; jaws closed, with loss of consciousness, redness of eyes, ptyalism and frequent micturition.

Digitized by Google

Nervous apoplexy, with convulsions, distortions of face, and palsy of speech. Atrophy of paralyzed parts, with paralysis of motor nerves, while sensation is normal; paralysis of tongue; choreic movement.

After apoplexy, when there is congestion in chest, strong palpitation of heart, or slow, weak and small pulse; eyelids keep closed and twitch; when opening eyes, eyeballs move about; paralysis after cholera and typhus; paralysis commencing at periphery, and progressing towards centre.

Paralysis of tongue, stuttering, deficient speech; the paralyzed limbs grow thinner, but preserve sensation; frequently complicated with unyielding contractions or chorea like contractions.

Paralysis, could only turn head and neck; feet insensible, bladder and rectum paralyzed.

[37] **Sleep.** Frequent yawning. θDiarrhœa.

Sleepy, without being able to sleep.

Sleeplessness; tossing about.

Sleep heavy, even to comatose state.

Comatose sleep after vomiting.

During sleep: constant grumbling in abdomen; jerking.

Sleep full of dreams.

[38] **Time.** In morning: sweat; drumming in ear; slight expectoration with cough.

In evening: delirium; cannot be induced to go among people; fever; exacerbation in brain affections; itching in eyes; cough dry; tetter in bend of elbow with violent itching <.

Night: restless; increased urination; cough <; three attacks of whooping cough in quick succession; epileptic convulsions during sleep.

[39] **Temperature and Weather.** Heat: chilliness not >; desire for warm drinks and food.

Cold air: hoarseness; cough < by inhaling.

Cold water: prevents vomiting; great thirst for; cough and vomiting > by a swallow; cough > by drinking; whooping cough >.

From cold air into warm room: cough <.

Wind: asthma < by long continued walking against; cough after sea wind; cough < by north wind; cough < by land wind.

Getting wet: epileptic attacks.

[40] **Fever.** Shaking chill, with icy coldness, and severe cramps in extremities, and cold, clammy sweat.

Intense coldness and blueness of surface, with long continued, general cold sweat and great prostration.

Chilliness before the coughing attack. θWhooping cough.

Digitized by Google

Chill over whole body, most severe on extremities.
Chill after every attack of indisposition.
Icy coldness of the whole body.
Skin: moist and cool, particularly extremities; dry, burning hot; warm, dry and withered.
‖Feverish sensation, as if cold wind was blowing out from the skin. θDiarrhœa.
‖Cold shuddering with flushes of heat. θBrain affections.
‖Either slight heat or burning. θBrain affections.
Flushes of heat.
Fever, with thirst, frequent pulse and heat.
‖Skin, in beginning, dry, burning hot; later, moderately warm, dry and withered, or moist and cool, particularly on extremities. θPneumonia.
Typhus, without high fever, but excessive weakness; dissolution of blood; nosebleed and petechiæ; great prostration, with nervous excitability; restless tossing about; eyes dim, lustreless; difficult hearing; paralysis of heart.
‖Yellow fever; attack of vomiting, mostly vomiting of blood.
‖Burning in the soles of the feet.
‖During spell, chest and head covered with perspiration; during interval, burning in chest and abdomen, with chilliness of rest of body θEpilepsy.
Debilitating, exhausting internal heat.
Cold sweat at night.
‖Cold sweat on forehead. θCough.
‖Sweat, sour-smelling θConvulsions.
Many attacks end in sweat.
‖Foot-sweat; also suppressed foot-sweat.

41 **Attacks, Periodicity.** Sudden: convulsions; cries with clonic spasms of lower limbs; asthmatic attacks; feeling of suffocation; metallic-sour taste in mouth; paleness; sinking of swelling in erysipelas of scalp.
Constant: restlessness; rotating of eyeballs; eructations; cramps with convulsive motions of lower limbs; rattling on chest; spasmodic jerking of diaphragm; motion of muscles of chest and abdomen; trickling of saliva from mouth; grumbling in abdomen during sleep.
Continuous: pains in stomach and abdomen; violent vomiting; hoarseness.
Intermittent: colic; aphonia.
Paroxysmal: headache.
Periodical: uttering of shrill screams; chorea; headache; attacks of vomiting.
Every fifteen, thirty, or sixty minutes: convulsions after confinement.
Every fourteen days: spasms.

Digitized by Google

Two or three times a week: epileptic attacks.
From twenty to twenty-five minutes: attack of spasms.
Beginning in afternoon and continuing into night: chronic headache.
For twenty-four hours: coma.
New moon: epileptic convulsions.
Chronic: headache; glossitis; diarrhœa.

[43] **Locality and Direction.** Right: bleeding from side of nose; formication and tearing in hand; sense of constriction in arm and forearm and of great increase in size; trembling and shaking of hand; neck drawn to shoulder.

Left: pain over eye; pressure over eye; headache < in side; pain in region of parietal bone; extending down neck and arms and across chest; twitching of lids of eye; pain in tonsil; drawing pain from hypochondrium to hip; stitches in side of chest; broad stitches under scapula; convulsive jerking of arm; drawing in arm, arm drawn close to body; lameness and dragging of leg; twitching of arm; involuntary motions of arm and leg; shooting and burning in arm; drawing in arm before epileptic convulsion; blisters on foot.

[43] **Sensations.** As if some misfortune was approaching; as of a veil before eyes; as if an abscess were forming in brain; as if he would lose his senses; as if nose was stuffed up; as if brain would press out of forehead; as if head would be torn asunder; as if cold water was poured on head; as of something moving on top of head; as of congestion of blood to nose; as if throat was constricted on swallowing; as of a round ball going to and fro under ribs; as though something bitter were in the stomach; as of a stone in abdomen; as if a knife were thrust from umbilical region through to back; as of great dryness in pit of stomach; as of rush of blood to chest; as if he would suffocate; as of constriction in r. arm and forearm and of great increase in size; as if r. arm and forearm were larger than whole body, and not under control of will; as if middle finger were pricked with a needle; as if knee-joint was broken; as if cold wind was blowing out from skin; as if bones would break.

Pain: in head; in forehead, < over l. eye; in region of l. parietal bone, extending down neck and arms, and across chest; in eyeballs; acute, in throat; behind ensiform cartilage; tormenting, in stomach and epigastric region; spasmodic in calves; behind ensiform cartilage, with deathly feeling; in middle finger; in bones.

Agonizing: headache.

Google

Anguish: præcordial.
Cutting: in umbilical region; below navel; in abdomen; with stool.
Rending pain: from teeth to temples; in upper limbs.
Tearing: in forepart of head; in limbs; in small of back; in r. hand; in limbs and muscles of back.
Boring pain: in and behind ears; in region of heart.
Piercing pain: in l. tonsil.
Shooting pain: in sides of chest; preventing breathing; in l. arm.
Lancinating: in forehead, temples or occiput; in small of back.
Stitches: in temples; < in l. side of chest; below heart; broad, as with a knife, under l. scapula.
Stitching: in upper limbs.
Stinging pain: with intestinal ulcers.
Jerking pains: in limbs; in ulcers.
Digging pain: in calves.
Drawing pain: from l. hypochondrium to hip; in abdomen; in calves; in arms; in l. arm; in knees.
Constriction: in throat; deathly beneath sternum; in throat and chest.
Contractive pain in stomach; in chest.
Cramping: after-pains; feeling in pharynx exciting cough.
Griping: about region of heart.
Colicky pain: in abdomen.
Gnawing: in stomach.
Corroding: sensation, in stomach; pain, with intestinal ulcers.
Bruised pain: in brain, and in orbit on turning eye.
Burning: in throat; in epigastric region; in small of back; in soles; in l. arm; in chest and abdomen; in sacrum.
Shocks: in sacrum.
Pressing: pain in eyes; in front of ears.
Pressure: over l. eyes and root of nose; outward, in forepart of head; in pit of stomach; in stomach; in abdomen; painful, in scrobiculum; on stomach; behind sternum.
Oppression: of chest.
Aching: top of sacrum.
Dull pain: in l. tonsil.
Dulness: of head.
Distress: in chest.
Anxious feeling: about heart.
Numbness: of arms; of hands.
Tingling: pain in vertex; in extremities.
Formication: in r. hand.

Digitized by Google

Crawling: in vertex; on top of head.
Heaviness: of head; painful, in ankle.
Lame feeling: in back and lumbar region; in arms and hands.
Hollow feeling: in head.
Itching: in eyes; in ear; tetter in bend of elbow; in limbs and muscles of back; of skin; with eruption of blisters.

" **Tissues.** Acts prominently upon alimentary canal, producing symptoms of gastro-intestinal inflammation, colic, diarrhœa, vomiting, etc. Secondarily, it affects profoundly the nerve centres, giving rise to spasmodic affections, cramps, convulsions and paralysis. The chief characteristic of the drug is that its symptoms are disposed to appear periodically and in groups.
Hæmatemesis. θ Yellow fever.
Muscles are knotted and remain so.
Emaciation.
Pain in bones, as if they would break.
Promotes suppuration in swellings.
Inflammation of the cellular tissue.
Caries.
Gangrena senilis of foot in a man.

" **Touch, Passive Motion, Injuries.** Touch: headache < from; convulsions of head < or renewed by; swelling on head painful to; pain in l. tonsil <; epigastrium sore to; pressure in pit of stomach <; of clothing over epigastrium uncomfortable; pressure in abdomen <; abdomen tender to; abdomen painful on; pressure in scrobiculum <; spinal column from sixth cervical vertebra to small of back intolerable to slightest; screams at slightest.
Pressure: headache < from slightest; pressure in pit of stomach <; of tight clothing or bandage around abdomen >; colic not < by; abdomen sore to.

" **Skin.** Skin over-sensitive, particularly in the region of the stomach and fourth and fifth dorsal vertebræ.
Skin: inelastic; dough-like; cold.
Unbearable itching, without eruption.
Prurigo, in children.
Rash on chest and hands.
Rash, on the third day after confinement; copious, sour sweat; anxiety; starting at everything; head heavy; pressure in stomach; abdomen sore on pressure; great thirst; shocks and burning in sacrum; numbness of arms; convulsions every 15, 30, or 60 minutes.
Measles; brings out the eruption, ameliorating the dry cough quickly.

Digitized by Google

Spots on arms.
‖Repercussion of eruption, with convulsions, vomiting or gagging; pale face and twitching of limbs.
Watery vesicles on tips of fingers.
‖Tetters: spreading, oozing; in the bend of the elbow, forming yellowish scabs.
πMany red points, with minute blisters; much itching, mostly during the day; on the left foot, blisters filled with matter; in cases of leprosy.
‖‖Sudden sinking of the swelling changing into a bluish color; violent brain symptoms. θErysipelas of scalp and face.
Blackness of outer parts; cyanosis or morbus cœruleus.
Eruptions resembling lepra, dry itch, measles and scarlatina.
Herpes, with yellow scales.
Hard inflamed ulcers, with jerking pain; sensitive ulcers, with redness around edges; pus scanty and corroding.
‖Old ulcers.
Lepra vulgaris.
Inflammation of lymphatic vessels from hand to shoulder, with violent swelling of the hand.

[47] **States of Life, Constitution.** ‖Light hair.
Corresponds to the carbo-nitrogenoid constitution of Grauvogl.
Girl, æt. 9 months, weak; asthma Millari.
A very delicate child, about one year old; asthma Millari.
Child, æt. 2; cerebral meningitis.
Boy, æt. 4, very irritable and easily angered, father healthy and robust, with inclination to asthma, of which the grandfather of boy suffers severely; asthma.
Boy, æt. 10, small, weak, pale, blonde complexion; epilepsy.
Boy, æt. 10, delicate, sensitive, excitable, of earnest disposition, easily excited to nausea; cholera.
Boy, æt. 10; epilepsy.
Girl, æt. 10, for two years; spasms from fright, after operation for harelip.
Girl, æt. 10, since five years; epilepsy.
Girl, æt. 11; cramps.
A young soldier; knees giving way.
A young soldier; spasms after measles, with pneumonic symptoms.
Girl, æt. 13; ileus.
Girl, æt. 14, otherwise healthy, not menstruated, has suffered for three years; epilepsy.
Girl, æt. 16; epilepsy.

Digitized by Google

Girl, æt. 18, delicate, with dark hair, brown eyes, and pleasant expression of face; spinal irritation.
Girl, æt. 19, healthy; menses scanty, but regular; spasms.
Miss A., æt. 20; laryngeal spasms.
Girl, æt. 20, blonde; epilepsy.
Young lady, before attack, courses suddenly suppressed by getting wet; chorea minor.
Girl, æt. 23, robust, suffering for five years; epilepsy.
Lady, about to be married, became very nervous from overwork and mental anxiety; hysteria.
Woman, æt. 24, stout, after parturition; convulsions.
Woman, married 7 years, childless; disposition to fainting.
Young soldier on Mississippi; measles and pneumonic symptoms.
Large, strong farmer; asthma.
Woman, æt. 33, rather delicate and nervous; dyspnœa.
Lady, æt. 43, tall, spare, delicate and nervous, had suffered for a long time; neuralgia of head.
Man, æt. 47, small, lively disposition; epilepsy.
Woman, æt. 48, weak; cramps.

[48] **Relations.** Antidoted by: Sugar or white-of-egg mixed with milk, and given freely. *Hepar*, or potash soap, may be used after poisoning from food prepared in copper utensils. Aggravations of *Cuprum* are lessened by smelling alcoholic solution of Camphor. Dynamic antidotes: ‖*Bellad*, *Chamom.*, *Cinchona*, *Conium*, *Cicuta*, *Dulcam.*, ‖‖*Hepar*, *Ipec*, *Mercur.*, ‖*Nux vom.*
It antidotes: *Aurum*, *Mercur.*, *Opium.*
Compatible: After *Act. rac.*, *Agaric.*, *Stramon.*, in chronic affections; *Calc. ostr.*, *Caustic.* and *Nitrum* act well after *Cuprum* in epilepsy; *Arsen.* follows well in cholera and other affections; *Veratr.* follows well in whooping cough and cholera.
Complementary: *Calc. ostr.*
Compare: Copper preparations generally; *Calc. ostr.*, *Gelsem.* (overworked brain); *Cicuta*, and Solanaceæ (mental symptoms); *Bellad.* (inflammation of brain); *Silic.* (pains about head better from wrapping up warmly); *Nux vom.*, *Phosphor.* (vomiting, diarrhœa); *Coloc.* (colic); *Camphor*, *Secale*, *Veratr.* (cholera, cramps); *Arnic.*, *Ant. tart.*, *Bryon.*, *Cina*, *Ipec.* (whooping cough); *Apis*, *Zincum* (hydrocephalus, or convulsions from suppressed exanthems); *Plumbum* (paralysis); *Cina* (chorea); *Pulsat.* (malarial neuralgia after Quinine and Iron); *Arsen.* (suppression of urine, uræmia).

CUPRUM SULFURICUM.

Sulphate of Copper. $Cu\,SO_4 5H_2O$.

The pure sulphate of copper is prepared by trituration.

Fragmentary proving by Berridge.

Observation of a case of poisoning by Cup. sulph. made by Guerard, Allg. Hom. Ztg., v. 36, p. 14.

CLINICAL AUTHORITIES.—*Baldness*, Kissel, Frank's Mag., v. 4, p. 137; *Syphilis*, 50 cases, Martin and Oberlin, Gaz. Med. de Paris, April 10, 1880; *Inveterate itch*, Bayes.

[1] **Mind.** Anxiety, or great apathy.
Remarkable disturbance of mind; every utterance distorted.

[2] **Sensorium.** All senses vanish.
Vertigo, with prostration of strength, and dim sight.

[3] **Inner Head.** Violent pain in forehead, with severe tensive pain at root of nose.
After rising from bed, pain like a tight, narrow band all round head (on a level with upper part of forehead) and feeling as if top of head would come off; < laughing or stooping; > by cold wind; desire to be quiet.
Shooting inwards in temples at short intervals, the left being first affected, > by pressing temples with hands; irritability of temper.
Crawling, dull sensation in vertex, as if going to sleep, with a pressing-down sensation, and stupefaction.
Throbbing and roaring in head.
Severe headache, in morning.

[4] **Outer Head.** : Bald spot over r. parietal bone, not depending upon any discoverable cause.

[5] **Sight and Eyes.** Eyes stiff and dim.
Eyes moving to and fro.
Icteric color of conjunctivæ.
Twitching of closed lids.
: Trachoma; granular lids; catarrhal and purulent conjunctivitis.

[6] **Upper Face.** : Face pale: emaciated, eyes sunken; puffy, red, covered with great drops of sweat.

[7] **Lower Face.** Lips pale, bluish, at corners and internal edges.

[10] **Teeth and Gums.** Greenish tint along free borders of gums.

Google

[11] **Taste and Tongue.** Taste: sweetish; bitter; coppery; metallic on waking.
Tongue: white furred; coated, bluish, cold; swollen, stiff, as if paralyzed.
Tongue small, white, rough.
[12] **Inner Mouth.** Burning in mouth and œsophagus in morning.
Sharp biting heat in mouth and throat.
Ulcer in the mouth, after fever.
[13] **Throat.** Tensive pain in mouth, pharynx, root of nose, and stomach.
Choking and contracting sensation in pharynx.
Throat painful and as if burnt.
[14] **Appetite, Thirst, Desires, Aversions.** Loss of appetite.
Great thirst; want of thirst with sweat.
Thirst with sweat and oppression of chest.
[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.
‖Excessive nausea; qualmish nausea.
‖Vomiting forcible, returning from time to time.
Vomiting: of greenish-brown mucus; of a bluish matter.
Nausea; vomiting < after 5 A.M.
[17] **Scrobiculum and Stomach.** ‖Pressure in pit of stomach.
Distension and fulness of stomach rather than pain.
Burning in stomach.
Violent pain in stomach followed by faintness.
[18] **Hypochondria.** Tearing pains in hypochondria, on inspiration, painful on touch as if bruised.
‖Liver enlarged.
[19] **Abdomen.** Pain in epigastrium, sensitive to pressure.
Abdomen swollen, tender, and painful; flat and painful; drawn in.
Constant cutting, burning pain in bowels.
Enteritis.
[20] **Stool and Rectum.** Urging to stool.
‖Four pultaceous, greenish-yellow stools.
Vomiting, soon followed by paleness and cold sweat; severe efforts at stool, alternating with vomiting, frequent attacks of unconsciousness, copious stools.
Diarrhœa of children.
⁞Chronic diarrhœa with ulceration.
[21] **Urinary Organs.** No stool nor passage of urine for twelve hours.
Urine scanty and bloody.
[23] **Female Sexual Organs.** πProfuse catamenia with violent pains; induced three successive times by bathing frosted feet in the solution.
[25] **Voice, Larynx, Trachea, Bronchia.** Voice husky or veiled.
[26] **Respiration.** Rapid sobbing respiration; breathing short and labored.

Digitized by Google

Respirations anxious and frequent; 48–50 per minute.
Anxious and interrupted breathing.

[27] **Cough.** Hacking cough impeding respiration.
Croupy cough with very tenacious mucus.

[28] **Inner Chest and Lungs.** Anxiety and oppression in chest.
Pressive pain in chest.
Painful contraction of chest, < after drinking.
Tearing pains behind sternum, extending over several parts of chest.
Hæmoptysis.

[29] **Heart, Pulse and Circulation.** Feeling as of a throbbing lump in heart internally, beating of heart seemed louder; lasted five minutes, and went away gradually.
Sounds of heart weak and limited; slight friction-sound at base.
Pulse: small, soft, or hard; quick and small; full and hard.

[31] **Neck and Back.** Uneasiness between shoulders.
Collection of wind pressing against back; stiffness and pain on moving.

[33] **Lower Limbs.** Dull aching soreness in middle of tibia, when walking; > at rest; tenderness on pressure.
Formication in legs.
Great coldness of feet.

[34] **Limbs in General.** Extremities cold, nails cyanotic.

[35] **Rest, Position, Motion.** Rest: > pain in tibia.
Desire to be quiet: with headache.
Stooping: as if top of head would come off.
After rising from bed: pain as of tight band around head; as if top of head would come off.
Inspiration: tearing pain in hypochondria.
Laughing: as if top of head would come off.
Moving: pain in back.
Walking: dull aching pain in tibia.

[36] **Nerves.** Restless, throws himself about in bed.
Restlessness at night; twitchings; trembling in the limbs; copious stools.
Frequent subsultus tendinum.
Lassitude, debility.

[37] **Sleep.** Drowsiness, frequently interrupted by abdominal pains.

[38] **Time.** Morning: headache; burning in mouth and œsophagus.
After 5 A.M., vomiting.
5 P.M.: pains < with restlessness.
Night: restlessness.

[39] **Temperature and Weather.** Fire: sat near to > shivering.
Cold wind: > head.

[40] **Fever.** Coldness beginning in small of back, going all over

Digitized by Google

body, then suddenly going into legs, first l., then l., with shivering so that she sat near fire for a few minutes.
Skin cold; shivering.
Internal, debilitating, exhausting heat.
Flashes of heat, with burning of soles.
Heat beginning on dorsa of feet, first l. then r., then extending up anterior part of legs as far as knees; lasted thirty minutes, then went off, leaving a sensation as if needles were pricking the parts for five minutes.
Chilliness, shuddering, heat and sweat rapidly following each other.
Cold sweat on forehead and extremities.
Copious sweat, without thirst.

41 **Attacks, Periodicity.** Lasting five minutes: palpitation; pricking in feet and legs.
Lasting thirty minutes: heat of feet and legs.
Three successive times: profuse catamenia, induced by bathing feet in solution.
Rapidly following each other: stages of fever.
Frequent: subsultus tendinum.
At short intervals: shooting in temples.
From time to time: vomiting.
Chronic: diarrhœa.

42 **Locality and Direction.** Left: shooting in temple.
Left to right: coldness in legs; heat on feet and shins.
Right: bald spot on parietal bone.
Inward: shooting in temples.

43 **Sensations.** As of a tight narrow band round head; as if top of head would come off; as of going to sleep in vertex; as if paralyzed, tongue; as if burnt, throat; as if bruised, hypochondria; as of a throbbing lump in heart; as if needles were pricking on feet and legs.
Pain: violent in forehead; violent in stomach; in epigastrium; in abdomen; in back.
Tearing: in hypochondria; behind sternum.
Shooting: in temples.
Cutting: in bowels.
Pricking: as of needles on feet and legs.
Burning: in mouth and œsophagus; in stomach; in bowels; of soles.
Dull aching: in tibia.
Pressure: in pit of stomach; in chest.
Pressing down: in vertex.
Soreness: in tibia.
Tensive pain: at root of nose; in mouth; in pharynx; in stomach.
Contraction: in pharynx; of chest.
Choking: in pharynx.

Digitized by Google

Twitching: of closed lids.
Throbbing: in head.
Roaring: in head.
Dull sensation: in vertex.
Uneasiness: between shoulders.
Formication: in legs.
Crawling: in vertex.
Itching: nodules on shoulders; on skin.
Heat: sharp biting, mouth and throat; on dorsa of feet, up anterior part of legs to knees.
Coldness: of tongue; of feet; in small of back; in legs; of skin.

" **Tissues.** : Destroys flabby granulations and exerts a powerful excitant influence; its solution acts more feebly, and is sometimes employed as a dressing for indolent ulcers.
: Fifty patients, who showed various manifestations of syphilis, were cured by the copper sulphate; the copper salt proved more efficacious and required less time for its beneficial action than did the mercury salts; in a case of very grave syphilis, where mercury had proved useless, copper effected a rapid and complete cure.

" **Touch, Passive Motion, Injuries.** Touch: hypochondria painful.
Pressure: epigastrium sensitive; tenderness in tibia.
Pressing temples: > shooting.

" **Skin.** Skin pale; icteric.
Itching nodules on shoulders.
Considerable itchiness; a kind of dry itch.

" **Stages of Life, Constitution.** Man, æt. 38, strong, healthy, had thick, shining, black hair; baldness.

" **Relations.** Antidoted by: milk, eggs; pure yellow prussiate of potash.
Compare: *Kali bichr.* in croupy cough, with tenacious mucous expectoration; *Mercur.* in syphilis.

Google

CURARA.

A powerful poison used by the South American Indians upon their arrows. Supposed to have been first introduced into Europe by Sir Walter Raleigh, in 1595, who became acquainted with it in Guiana.

"Authorities differ as to the composition of this poison. Probably several totally different kinds of poison are designated by the same name. According to M. Goudot, who learned the mode of preparation from an Indian tribe, it is made by adding to the concentrated juice of a creeping plant called Curari, the poison obtained from the virus bags of some of the most venomous serpents. Another author and traveller, M. de Castelnau, who witnessed the preparation of the poison by another tribe, says that it is composed of the inspissated juice of the Cocculus toxicoferus, and of a new species of Strychnos. Further observations will doubtless show that there is a great difference in the effects of different specimens of curara poison. M. Roulin asserts that the poison is obtained from a species of toad by half roasting the animal over a slow fire, when the venom exudes from the pores of its skin and is carefully collected on small wooden knives and preserved in small earthenware vessels.

The curara poison, which has found its way to Europe, is usually a brownish-black, resinous looking substance, something like the extract of liquorice. It seems to keep well for an indefinite length of time. A heat of 212° does not seem to destroy its power. The active principle is soluble in all animal fluids whether acid or alkaline. The aqueous and alcoholic solutions are of a fine red color, the former the darkest. A peculiar substance called Curarine has been obtained from it."—Bernard, *B. J. H.*, vol. 16.

Fragmentary proving of the 500th by McFarland.

Proving in the Nouvelles Données, par L. T. Houat, translated by S. Lilienthal, *H. M.*, Vol. 4, pp. 137 and 177.

[1] **Mind.** Indecision, no longer wishes to think and act for herself. Nervous debility.

Digitized by Google

‖Very much depressed about herself, desire only to shut herself up away from people. θNervous debility.
‖Despairing. θUlcer of os uteri.
‖Hydrophobia.

[2] **Sensorium.** Instant giddiness; falling down in a swoon or fainting while standing or walking.

[3] **Inner Head.** Nervous headache; lancinating, piercing pains all over head, forcing him to lie down and stretch himself; head drawn backward, with stiffness of neck; painful oscillation of brain, as if it were full of fluid; neuralgic pains, starting in front and radiating to neck and face; violent blows in region of cerebellum.
‖Sharp sticking pains over r. eye, extending backwards over r. side of head. θNervous debility.
Head beats like a hammer, with vomiting of bile.
‖Vertical and frontal headache. θParalysis.
‖Occasional rush of blood to head. θNervous debility.
Congestion of blood to head, with pulsative vibrative pains and loss of consciousness.

[4] **Outer Head.** ‖Head drawn backward, with stiffness of neck, swinging and trembling of hands. θHeadache.

[5] **Sight and Eyes.** ‖Eyes haggard, sunken. θNervous debilty.
‖Black spots before vision (patient quite myopic), especially < from reading. θNervous debility.
‖Ptosis on r. side.

[6] **Hearing and Ears.** Different noises in ears, as of whistling, or crying of animals.
Unbearable earache; loses consciousness.
Lancinating nervous pains, starting from ears, and reaching down to legs, obliged to lie down.
Internal otitis, driving one crazy; purulent discharge.

[7] **Smell and Nose.** ‖Ozæna, with fetid lumps of pus, of six years standing.

[8] **Upper Face.** ‖Dull, anxious expression, with clay-colored skin. θUlcer of os uteri.
Redness of face, head beats like a hammer, after fever.
‖Aching of r. side of face. θParalysis.
‖Facial and buccal paralysis; in some cases with difficulty in swallowing.

[9] **Lower Face.** Blueness of lips, body purple, with fever.

[11] **Taste and Tongue.** Tongue deep red, cracked and bleeding.
‖Tongue and mouth drawn to r. side. θParalysis.

[12] **Inner Mouth.** ‖Dry mouth. θDiabetes.

[13] **Throat.** Paralytic failure of power to swallow.

[14] **Appetite, Thirst.** ‖Appetite variable. θParalysis.
Thirst and great hunger with the fever.
‖Great thirst, especially evenings and at night. θDiabetes.

[15] **Eating and Drinking.** Amelioration after first mouthful of food.

Digitized by Google

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough frequent and annoying. θNervous debility.
‖Nausea in morning. θNervous debility. θParalysis.
‖Gastric troubles, nausea after eating, or in morning. Dry, spasmodic cough provokes vomiting.
Vomits green bile all night, nasty taste; bad feeling in stomach; so weak, cannot stand on her feet.

[17] **Scrobiculum and Stomach.** ‖Rheumatic pain in pit of stomach, at times quite sharp, followed by nausea. ‖Shooting in stomach. θDiabetes.
‖Digestive functions entirely prostrate, cannot bear anything on stomach, pyrosis, pain and distension after eating ever so little; can eat only cornmeal mush and drink coffee. θUlcer of os uteri.

[19] **Abdomen.** ‖Wearing ache from throat to l. hip. θParalysis.

[20] **Stool and Rectum.** ‖Diarrhœa, with constant urging, fetid, thin, mush-like feces, excessive pain in hæmorrhoidal tumors. θUlcer of os uteri.
Extreme watery diarrhœa.

[21] **Urinary Organs.** Clear and frequent urine, with digging, crampy pains in kidneys; shooting in stomach; dry mouth; great thirst, especially evenings and at night; sugar in urine, with great emaciation.
Diabetes, acute cases.

[23] **Female Sexual Organs.** ‖Ulcer of os uteri, funnel-shaped, upper diameter one inch; whole neck of womb of a horny-like character, dark red, purplish, gnawed as if from mice all over surface of ulcer; two small opaque pustules of size of pea on inner edge, containing in middle a translucent bloody fluid. Ichorous discharge, corroding, fetid; indurations of abdominal parietes towards inguinal and ovarian regions, excessively painful to touch. Vaginal corrugations tumefied, reddish, inflamed; very sensitive hæmorrhoidal fissures and swelling of rectum and anus. General appearance of scirrhous cachexia. Digestive functions entirely prostrate. Diarrhœa with constant urging. Excessive pain in hæmorrhoidal tumors; bearing down of womb, pains and shocks, sharp shooting stitches; quivering in womb; burning in womb and all around it; dull, anxious expression; aching in all the limbs and body; rigors at 2 A.M., no more sleep; some fever; seldom moisture, except under arms; despairing.
Ulcerations on os uteri; smarting in vulva and thighs; shooting and digging pains in womb.
‖Indolence, does not like to work or move about; night sweats; repugnance to sexual intercourse. θVaginitis.
Menses very capricious, either too soon or too late.

Digitized by Google

During menses colic, headache, pains in kidneys, general malaise and hypochondriasis.

Scanty, thick, purulent, foul smelling leucorrhœa, in clots.

[25] **Voice, Larynx, Trachea, Bronchia.** ‖Frequent hoarseness; suffocating attacks, with sensation as if larynx were stopped up. θCough.

‖Burning and shooting in larynx; hoarseness which occasions almost complete loss of voice. θCough.

Sensation of roughness and dryness in whole course of respiratory passages.

[26] **Respiration.** ‖Shortness of breath. θNervous debility.

‖Respiration difficult, stitching pains in r. side. θCough.

‖Dyspnœa from weakness of respiratory motor nerves, as in phthisis and emphysema.

[27] **Cough.** ‖Short, hacking cough, no expectoration, always dry, with soreness of walls of chest, < in damp weather, or laughing. θNervous debility.

Cough, dry, spasmodic, shakes whole body, provokes vomiting, and is often followed by fainting.

‖Chronic cough, always troublesome in morning. θNervous debility.

Cough < by breathing cold air, laughing, moving and eating.

‖Cough with white gelatinous expectoration. θParalysis.

‖Debility and cough, with free gray expectoration, in phthisical patient.

Expectoration yellow, gray, greenish, bordering upon black.

Expectoration of red blood, often without cough.

[28] **Inner Chest and Lungs.** ‖Burning heat in chest with sensation of distension. θCough.

‖Severe pains in lungs, especially l.; sharp piercing pain through chest, always much < in damp weather; shortness of breath; chronic cough. θNervous debility.

[29] **Heart, Pulse and Circulation.** ‖Præcordial anguish, with palpitation and stinging pains in heart. θCough.

[30] **Outer Chest.** ‖Great soreness of chest, can hardly bear pressure of stethoscope. θNervous debility.

[31] **Neck and Back.** ‖Dull, tired ache in shoulders and across back; numb, tired pains up and down spine and in head. θNervous debility.

‖Pain in loins. Paralysis.

[32] **Upper Limbs.** ‖Complete paralysis of r. deltoid muscle; no pain; after an apoplectic attack.

‖Pain and numbness on l. side of chest and l. arm; tongue and mouth both drawn to r. side; both eyes and both ears fairly good; grasp of l. hand fair; vertical and frontal headache; r. face aches at times; fear of falling forward

Digitized by Google

on rising; nausea in morning; appetite variable; perspires with every exertion; pain in loins; prolapse of uterus for several years; wearing ache from throat to l. hip; cough with white gelatinous expectoration.

‖Arms and fingers weak, as after a long illness; arms become numb, and as if sprained or broken at elbows; this pain extends to shoulders and across back, a dull tired ache; feeling as if heavy weights were hanging to arms; same pains up and down spine and in head, numb tired pains; similar pains in knees; desire to stretch elbows, but muscles of arm are sore; feeling along arm as if it had been burnt; pains much < in damp weather. θNervous debility.

‖Leaden heaviness in arms, with increasing difficulty in playing piano. θNervous debility.

‖In evenings, arms and hands swollen, more painful and heavy. θNervous debility.

‖Great weakness especially of wrists and hands. θNervous debility.

[33] **Lower Limbs.** Legs tremble and give way in walking.

Sciatica, with great stiffness.

‖Corns. θNervous debility.

[34] **Limbs in General.** ‖Aching in all the limbs and body. θUlcer of os uteri.

Paralysis of extremities with burning heat and chills.

[35] **Rest. Position. Motion.** Lying: in bed < aching in feet and back.

Lie down and stretch: pain in head forcing him to.

Always desires to put her feet out of bed.

Cannot stand: so weak.

Standing: fainting.

Laughing: cough, soreness of chest <.

Rising: fear of falling forward.

Stretch: desire to stretch elbows.

Moving: cough <; crampy pains.

Does not like to move.

Motion: perspires.

On least movement: crampy pains in hips.

Walking: fainting while walking; legs give way.

[36] **Nerves.** ‖Nervous debility.

‖Debility of the aged, great failure of strength; no cough, pain, or disordered digestion.

‖After being bitten by a dog suspected to be rabid, muscular restlessness, spasms, hydrophobia, and photophobia, and instead of the anguish she was in good humor; (cured by injections, which were followed by symptoms of paralysis, from which patient had not entirely recovered even after a few months).

Digitized by Google

Great weakness and prostration, burning in hips, and crampy pains on least movement.

⁝Frequent epileptic fits with convulsions, loss of consciousness, lasting from a quarter to half an hour, followed by somnolence of many hours, or even mental disturbance for two days.

⁝For four years fits of "petit mal," and for the last five months, seven fits of complete epilepsy of great intensity.

⁝Two brothers, suffering from a disease intermediate between raging mania, chorea major, and epilepsy, had fits twice a day, of one to three hours, in which partial loss of consciousness and delirium were present, but generally with retention of consciousness, involuntary movements, springing, pirouetting, creeping, scratching on the floor, etc., between which intervened paralytic symptoms, numbness, aphonia; besides these fits, there was general weakness, especially in morning.

‖Pure paralysis; nervous debility, from loss of fluids, or exhausting illness.

‖Double facial and right lateral paralysis (in consequence of repeated epileptic attacks), swallowing and articulation also affected.

Instant giddiness; paralysis of the lower extremities and in fact everywhere.

‖Considerable general motor paralysis, no pain.

‖‖Paralysis from mechanical injury.

⁝Traumatic tetanus.

Progressive locomotor ataxyia.

[37] **Sleep.** ‖Nights restless, always desires to put feet out of bed, especially towards morning.

‖‖Cannot sleep late enough to obtain a good night's rest; dreams of fire and of the business of the day; < from lying long in bed, must get up as her feet and back ache.

θNervous debility.

[38] **Time.** 2 A.M.: rigors.

Morning: nausea; cough troublesome; heat >; general weakness.

2 or 3 P.M.: fever continuing into night; 4 P.M., fever.

In evenings: arms and hands swollen; great thirst.

At night: restless; great thirst; heat <; cold and bloody sweat.

All night: vomits green bile.

[39] **Temperature and Weather.** Aggravation by dampness, damp weather, change of weather, or cold wind.

Open air: heat <.

Cold air: cough < by breathing.

Damp weather: cough and soreness of chest <; soreness and pains in arms <.

Digitized by Google

[40] **Fever.** Sensation of shivering, starting from stomach and spreading over whole body.
Chill: without thirst; commencing on abdomen and spreading all over.
‖Rigors at night, about 2 o'clock; no more sleep; some fever; seldom moisture, except under arms. θUlcer of os uteri.
Burning heat accompanied by partial and transient chills, incoherent speech, and often by paralysis of extremities.
Pernicious fever, with constant chilliness.
Incoherent speech, with burning heat and chills.
Yawning and stretching, hot head and hands, convulsive paroxysms and fainting.
Burning in hips, great weakness and prostration, crampy pains on least movement.
Lips get blue, and body purple, with fever; after fever (every day at 4 P.M.), gets very red in face, and head beats like a hammer.
Daily fever, commencing at 2 or 3 P.M., and continuing well into night.
Fever with thirst and great hunger.
Heat: with thirst; especially in head, on back and legs.
Heat < at night or in open air, less in morning.
‖Perspires with every exertion. θParalysis.
‖Sweat cold and bloody, especially at night.

[41] **Attacks, Periodicity.** Attacks: suffocating.
Apoplectic attack followed by paralysis of r. deltoid.
Acute spasmodic affections.
Instant: giddiness and falling.
Frequent: annoying hiccough; clear urine; hoarseness; epileptic fits with convulsions.
Occasional rush of blood to head.
At times: r. face aches; quite sharp rheumatic pains in pit of stomach.
Quarter to half hour: duration of epileptic fits.
One to three hours: duration of fits.
Many hours: somnolence following epileptic fits.
Twice a day: fits.
Two days: mental disturbance after epileptic fits.
In five months: seven fits of complete epilepsy.
Several years: prolapse of uterus.
Four years: fits of "petit mal."
Six years: ozæna.

[42] **Locality and Direction.** Left: ache from throat to hip; pains in lung; numbness and pain side of chest and arm.
Right: sharp sticking pains over eye, extending backwards over side of head; ptosis; aching side of face; tongue and mouth drawn; stitching pains in side; paralysis; complete paralysis of deltoid muscle.

Digitized by Google

Both sides: facial paralysis.
From ears reaching to leg: lancinating nervous pains.
Radiating to neck and face: neuralgic pains.
Spreading from abdomen: chilliness.

[a] **Sensations.** As if brain were full of fluid; noise in ears as of whistling or crying animals; as if larynx were stopped up; as if broken or sprained at elbows, extending to shoulders and across back; as if weights were hanging to arms, spine and head; feeling along arm as if it had been burnt.

Pain: in ears; l. side of chest and arm; in loins; in hæmorrhoidal tumors.
Anguish: in præcordial region.
Driving one crazy: internal otitis.
Lancinating: all over head; ears to legs.
Piercing: all over head; in chest.
Sharp sticking: in r. eye.
Sharp shooting stitches: in womb.
Shooting: in stomach; in larynx.
Severe pain: in lungs.
Sharp pain: in chest.
Blows: violent in region of cerebellum.
Pulsative pain: in head.
Beating: in head, like hammer.
Stitching: in r. side.
Stinging: in heart.
Smarting: vulva and thighs.
Crampy pains: in kidneys; in hips.
Rheumatic pains: in pit of stomach.
Digging pains: in kidneys; in womb.
Nervous pains: ears to legs.
Aching: in limbs and body.
Dull tired ache: in shoulders and back; in knees.
Wearing ache: from throat to l. hip.
Soreness: walls of chest; muscles of arms.
Burning: in larynx; in womb; in limbs; in chest; in hips.
Heat: in head; in chest; in back; on legs; in limbs.
Dryness: in respiratory passages.
Roughness: in respiratory passages.
Distension: in chest, with burning heat.
Bearing down: of womb.
Weakness: especially of wrists and hands.
Heaviness: in arms.
Numbness: of arms.
Numb tired pains: up and down spine and in head.
Swinging, trembling: of hands.
Quivering: in womb.

Digitized by Google

Vibrative feeling: in head.
Oscillation: of brain, painful.
Shocks: in womb.
Shivering: starting from stomach, spreading over whole body.

[44] **Tissues.** Acute spasmodic affections of a very severe character; tetanus.
Paralyzes motor portion of nervous system from periphery towards centre.
Paralyzes vaso-motor as well as musculo-motor nerves.

[45] **Touch, Passive Motion, Injuries.** Touch: induration on abdomen painful.
Pressure: can hardly bear stethoscope.
After being bitten by dog: muscular restlessness, spasms, hydrophobia; photophobia.
Mechanical injury; paralysis.

[46] **Skin.** Body blue and yet fever.
Eczema.

[47] **Stages of Life, Constitution.** In older, scrofulous children.
Boy, æt. 12, and another, æt. 16, also two brothers, æt. respectively, 12 and 10; epilepsy.
Anna M., æt. 20, married 3 months, pregnant in seventh month; vaginitis.
Stone cutter, æt. 20, for nine years; epileptic fits.
Girl, æt. 24, eighty days after being bitten by a dog suspected to be rabid, lyssa humana (injections 0.2 grammes in 7 doses during five hours).
Lady, graduate of Conservatory of Stuttgart, where she practised excessively; nervous debility.
Laundress, æt. 30; paralysis of r. deltoid after an apoplectic attack.
Mrs. Van N., æt. 30, three children, blond, blue eyes; ulcer of os uteri.
Woman, æt. 35, had phthisis for many years; debility and cough, with expectoration.
Mrs. J., suffering from scanty menstruation, pains in os uteri, watery, starchy leucorrhœa; ozæna.

[48] **Relations.** Antidoted by: Artificial respiration. *Bromine* and *Chlorine* destroy the poisonous effects. Tobacco or salt, applied topically, neutralize effects of Curara wounds.
It antidotes: *Strychnia*, but *Chloral* is better. Probably antidotal to *Lyssin*.
Compatible: after *Arnica* in paralysis from injury; after *Bellad.* in paralysis after apoplexy; *Baryt. carb.* is often indicated after Curara in nervous debility of the aged.
Compare: *Nux vom.; Aranea* in fevers, < from damp or wet weather; *Ferrum* in hammering pains in head.

CYCLAMEN EUROPÆUM.

Sow-bread. *Primulaceæ.*

A plant indigenous in the south of Europe. The tincture is made from the fresh root gathered in Autumn.

"The Cyclamen Europæum, or Sow-bread, was extensively used in medicine by the ancients. Their descriptions of its properties are vague enough, but it is remarkable that they ascribe to it a power to affect the uterus and its appendages—which ascription was not physiologically verified until the most recent provings.

It used to be considered that the root of Cyclamen, applied externally, hastened difficult labors, and assuaged the pains. Also, that to touch Cyclamen, or take it internally, would produce abortion, or bring on premature labor."

The remedy was introduced into our Materia Medica by Hahnemann, and proved by members of the Austrian Society of Homœopathic Physicians at Vienna.

CLINICAL AUTHORITIES.—*Mental derangement at climacteric*, Merryman, Med. Inv., vol. 4 (n. s), p. 576; *Headache*, Marenzeller, Rück. Kl. Erf., vol. 5, p. 84; *Diplopia* (2 cases), Eidherr, Hom. J. H., vol. 19, 144; Rück. Kl. Erf., vol. 5, p. 601.

[1] **Mind.** Consciousness almost extinct.

Very active memory, which alternates with weak memory.

Mental labor impossible on account of dullness or stupefaction.

Absorbed in deep thought, seeks solitude, thinks about his future.

Confusion of head; questions answered incoherently.

‖Loss of former cheerfulness; love of solitude; aversion to work and to open air; sensation as if room was too small, with reluctance to going into open air; solitude and weeping give relief. θSuppression of menses.

‖Disinclined to work, with weakness.

Digitized by Google

Taciturn, depressed, out of humor.
Joyful feeling with trembling; exuberant spirits.
Joyous feeling, alternating with irritability.
Serene humor changes suddenly into seriousness or peevishness.
Great sadness, as if he had committed a bad action or not done his duty.
Great sadness and peevishness; menses suppressed, or scanty and painful.
Melancholy; inclined to tears, and silent grief.
‖Vertigo, with pain in head and nausea; vomits nearly every day, and often all the food taken, with slime and bile; greatly reduced, can scarcely walk across floor; pains in head continuous, but very much worse at times; < in r. temple; but extend all over head; mind so affected as to make her indifferent to what transpired about her, and rendered her incompetent to describe her own case; finally consciousness almost extinct; questions answered incoherently; feces and urine pass involuntarily and unconsciously. θMental derangement at climacteric period.
‖On awaking, weariness, clammy mouth and irritable mood.
‖Ill humor; disposition to weep; fear of death, or an illusion of being deserted or persecuted by every one.
Anxiety, with nausea, at night.
Ill humor, after vomiting.
‖Ill humored, morose mood; could easily take offence at every trifle.
Obstinate, irritable, fault-finding disposition.
Solitude and weeping give relief.
Ailments from inward grief and terrors of conscience.

[2] **Sensorium.** Insensibility; rush of blood with anxiety; impaired sight and diminished intellectual powers.
‖Attacks of faintness, cloudiness or obscuration of sight.
Sensation as if brain were moving within cranium, or as it does when riding in a wagon with closed eyes.
‖Feels as if brain was in motion when leaning against something.
Vertigo with dyspepsia when lying down, > by motion, in nervous subjects.
‖‖Vertigo: objects turn in a circle, or about her, or make a see-saw motion; when walking in open air; > in a room and when sitting; with dimness before eyes.
‖Confusion of head, with obscuration of vision.
‖Dizzy, fulness and heat of head; congestion of blood.
‖Dulness of all the senses.

[3] **Inner Head.** ‖Pressing pain in forehead, vertigo, and frequently unconsciousness, with chilliness over whole body. θDysmenorrhœa.

Digitized by Google

Pains violent, pressing, darting, stitching, boring, chiefly in forehead, temples and vertex, accompanied by sadness and melancholy; chilliness and nausea; obstinate, irritable, fault finding disposition.

❙Pain in forehead towards evening, with vertigo.

❙Violent frontal headache.

❙Stinging pain in forehead and temples.

Stitches in temples; in forehead when stooping.

❙Stitching, darting or boring pains in temples.

Stitches in head disappear by touch; some complaints < when lying on back or on painful side.

Pains one sided, generally l. temple.

❙Headache on rising and again in evening; < l. side, increasing till patient vomits, then >; < by motion and open air. θClimaxis.

❙❙Vertigo, with pain in head and nausea; pains continuous, but very much worse at times; < in r. temple, but extend all over head. θMental derangement.

❙Slight pressure in vertex, as if brain was enveloped in a cloth, which would deprive him of his senses.

❙Oppressive stupefaction of whole head, with obscuration of vision; it seems as though a fog were before sight, and as though eyes were about to close.

❙Headache with obscuration of vision; pale complexion, rings around eyes, depraved appetite, enfeebled digestion and menstrual irregularities. θAnæmia.

❙❙Headache with flickering before eyes on rising in morning.

❙Sensation as if brain wobbled about while walking; menses suppressed or scanty; patient chlorotic.

Attacks of heat and throbbing in head.

❙Rush of blood to head with anxiety and confusion; obscuration of vision; dizziness; general coldness, after dinner.

❙Periodical congestion to head, with paleness of face.

Headache < in evening or in morning when rising; > by applications of cold water.

Gastric headache.

[4] **Outer Head.** ❙Tearing pressing, externally in head.

❙Fine, sharp, formicating stinging on scalp, changing place when scratching; < evenings, at rest; > walking about.

❙Papulous eruption on scalp.

❙Head feels bound.

[5] **Sight and Eyes.** ❙Eyes sunken and dim, have a weary look, and are surrounded by blue rings.

❙❙Dimness of vision and spots before eyes, especially on waking; dim vision with headache.

❙Fog before eyes, was obliged to stop knitting in afternoon.

Digitized by Google

Sight: as if looking through dark blue glass; like mist before eyes; figures cannot be clearly distinguished.
‖Dimness of sight, with fiery sparks before eyes.
‖‖Flickering before eyes, as of various colors, glittering needles, visions of smoke or fog.
‖Burning in eyes and flickering of light on attempting to read in evening in bed.
‖Vision of colors before eyes, now yellow and again green, or fiery specks and sparks; halo around light.
‖Muscæ volitantes.
‖Diplopia; especially if dependent on convergent squint, arising from helminthiasis, convulsions, falls, etc.
‖‖Dilated pupils; or contracted and dilated alternately.
‖‖Amblyopia after suppression of an eruption; has never menstruated, though has much headache and vertigo at time menses ought to appear.
‖‖Hemiopia, only l. half of object is visible.
‖Heat in eyes.
Strabismus; after convulsions, or measles.
‖‖Convergent strabismus.
‖Left eye drawn toward inner canthus.
‖Lids slightly œdematous. θDysmenorrhœa.
‖Swelling of upper eyelids.
‖Dryness and pressure in lids, as if swollen, with violent formicating stitches therein, and in eyeball.
Itching of eyelids.

6 **Hearing and Ears.** ‖Roaring, humming or ringing in ears.
‖Dulness of hearing, as if cotton was in ear or something lying before (right) ear.
‖Drawing pain in r. internal ear; hearing impaired.
‖Itching of ears, with increase of cerumen.

7 **Smell and Nose.** ‖Sense of smell diminished. θChronic coryza.
‖Dryness of nose, or fluent coryza (morning).
‖Frequent sneezing, with profuse discharge from nose, and loss of smell and taste; various nervous symptoms of head and ears present; itching in ears. θCoryza.
Catarrh with excessive sneezing and rheumatic pains in head and ears.
‖Pressing pain over nasal bones. θCoryza.

8 **Upper Face.** Pale face, eyes sunken, with blue rings; great weakness; anæmic women.
Red face with headache.
‖Contraction of forehead.
‖Pimples soon filling with whitish-yellow lymph and then shrivelling.
Facial eruptions of children.

9 **Lower Face.** Itching on lower jaw.

Digitized by Google

Sensation of numbness of upper lip or as of an induration.
Dry lips, without thirst.

[10] **Teeth and Gums.** ‖Gums and lips pale. θDysmenorrhœa.
‖Tearing, stitching, boring in teeth (more right).
‖Dull jerking, especially at night, in arthritic patients.

[11] **Taste and Tongue.** Taste: flat; offensive; putrid; fatty; bitter.
‖Food tastes flat, or is almost tasteless.
‖‖Salty taste of all food.
Tongue coated yellowish-white; white.
Fine stitches on tongue.
Tip of tongue red, with small burning blister thereon, impeding speech and chewing; saliva increased.
Burning on tip of tongue (evening).

[12] **Inner Mouth.** ‖Accumulation of watery saliva in mouth, pasty taste.
‖‖Saliva has a salty taste, which is communicated to all the food eaten.
Viscid mucus in mouth.
Heightened redness of mouth.

[13] **Throat.** Dryness of palate evenings, with thirst and hunger.
Tonsils and palate are shrivelled and white.
Scraping and dryness in pharynx, suffocative cough.
Dryness in throat.
Sensation of painful constriction in throat.
Burning and scraping in throat.
Nausea in throat.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Entire loss of appetite.
‖After eating but little, aversion to food, with nausea in throat.
‖‖No thirst all day, but it occurs in evening as face and hands become warm.
‖Thirst during night. θIntermittent.
‖Thirstlessness.
Desire for lemonade.
‖Aversion: to bread and butter; to beer; to fatty things; to ordinary food, and desire for inedible things.
‖Constant disgust for meat; craving for sardines; frequent vomiting in morning. θDysmenorrhœa.

[15] **Eating and Drinking.** ‖Feeling of satiety after a few mouthfuls of food, the rest becomes repugnant and nauseates him; nausea felt in throat and palate.
‖Complete loss of appetite, on taking a little beef-tea or a cup of tea, indescribable pain in scrobiculum cordis, which seldom went off until she threw up what she had taken; melancholy, could not engage in any occupation.
After eating: nausea; sleepiness; hiccough, rumbling in bowels.

Google

‖‖Pork disagrees.
Aggravation after coffee.

[15] **Hiccough, Belching, Nausea, Vomiting.** ‖Violent hiccough.
‖While eating, and for some time afterwards, hiccough or hiccough-like eructations, particularly in pregnant women.
‖Eructations: with oppressive sensation in stomach; frequent, sometimes sour tasting; of food; of a fatty taste.
‖Qualmish nausea after dinner and supper, and an uneasiness and qualmishness in epigastric region, as after eating too much fat.
‖Nausea: after eating or drinking, except from lemonade.
Nausea and fulness in chest, with unusual hunger.
‖Nausea and accumulation of water in mouth.
‖Vomiting: of watery mucus; of food; of greenish fluid; of blood.
‖Vomiting in morning. θDysmenorrhœa.
‖Every day, vomiting of food with slime and bile. θMental derangement.
Vomiting of mucus followed by sleep.

[17] **Scrobiculum and Stomach.** Uneasiness in stomach, with eructations, nausea and hiccough.
‖Burning in œsophagus, and aching pains in stomach, extending through to back, coming on when at rest, > by motion.
Fulness and pressure in pit of stomach, as if he had eaten too much.
Stitches in stomach.

[18] **Hypochondria.** Stitches in region of liver.
Ball-like distension in bowels, on r. side below liver.

[19] **Abdomen.** Digestion retarded.
‖‖Tearing, piercing, through and through stitches in upper abdomen beneath stomach, on moving about.
Hypogastrium sensitive to pressure.
‖Full feeling and distension of abdomen.
‖Intestines painful to touch.
Abdomen sensitive to pressure and motion.
Pain and uneasiness in bowels in evening, with nausea; > by motion.
‖‖Discomfort and nausea in lower abdomen.
‖Constant gnawing pain in bowels; all food caused great discomfort and swelling, with frequent eructations; debility, consequent upon lack of nourishment; stools infrequent and hard, expelled with great effort. θEnteralgia.
‖Painful restlessness in bed; must get up and walk about for relief; gurgling in intestines combined with malaise; always > by moving about. θEnteralgia.

Digitized by Google

Painful gurgling in intestines every night, with general malaise, > abstaining from food after noon and from walking about; gnawing pains in the abdomen at 7 P.M., extending thence over whole body, > from walking till tired; pale, herpetic face and red nose.

‖ Rumbling of flatus.

‖ Stitches in umbilical region.

‖ Stitches, or pinching in abdomen; cramp-like pains.

‖ Running and crawling in bowels, as of something alive.

‖ Paroxysms of colic coming on during night, especially after late supper; > by getting up and walking about.

‖ In left inguinal canal: stitches; itching.

[20] **Stool and Rectum.** Urging to stool; watery diarrhœa; stool expelled forcibly.

Stool: odorless, brownish-yellow, mixed with some mucus.

Watery, papescent stool, with vomiting at night.

‖ Diarrhœa renewed after every cup of coffee.

‖ Diarrhœa of chlorotic women subject to sick headaches and menstrual irregularities.

Mucous diarrhœa; in evening.

‖ Constipation. θ Menstrual irregularities.

‖ Frequent passage of hard stool (hard lumps).

Before stool: nausea; pinching colic; urging.

During stool: straining and burning in anus; colic; palpitation; tenesmus.

After stool: ineffectual straining; pinching in abdomen, dulness and forgetfulness.

‖ Heat in rectum, with swelling of hemorrhoidal veins.

‖ Pressure in rectum or anus; tenesmus.

‖ Drawing pressive pain in and about anus and perineum, as if a spot was suppurating; when walking or sitting.

‖ Hemorrhoidal flow.

[21] **Urinary Organs.** Frequent micturition, with pressure on bladder and rectum.

‖ Urine profuse, watery and frequent.

‖ Frequent urination or fruitless desire to urinate.

Frequent copious emission of whitish urine.

‖ Frequent urging, with scanty discharge; also seldom and scanty.

‖ Urine dark red, containing much flocculent matter; acid; iridescent cuticle.

Stitches in urethra with desire to urinate, followed by a sudden discharge of dark red-yellow urine.

Pricking at end of urethra while urinating.

[22] **Male Sexual Organs.** Sexual desire diminished.

Erections at night, without exciting dreams.

Stitches in urethra.

Phymosis.

Google

Prepuce and corona glandis feel sore, from slight rubbing.
Prostatic troubles, with stitches and pressure, urging to stool and micturition.

Female Sexual Organs. Menses: too profuse and frequent; too early, black and clotted; membranous.
Abdomen bloated and swollen before menses, with labor-like pains; flow when established, black and clotted.
Menstruation too early, with some relief of melancholy mood and heaviness of feet.
Labor-like, constricting pains commencing in small of back and running down each side of abdomen to pubes; attacks every few minutes, during which time no discharge occurs; after the attacks, blood more watery; vertigo; headache; after cessation of menses, great soreness in abdomen. θDysmenorrhœa.
Menses troublesome for two months; flow had continued all through each month; discharge pale and watery, at first dark and clotted; general appearance somewhat exsanguined; mouth, tongue and lips pale; she always felt best when moving about; flow almost ceased as long as she was moving about at work, but as soon as she sat down quietly in the evening, the flow reappeared and continued after she went to bed.
Menorrhagia, with stupefaction of head and vision obscured, as from a fog.
Menses suppressed or scanty, and painful; dread of fresh air; vertigo; headache; swollen eyelids; pale face, lips and gums; loss of appetite; no thirst; constipation; palpitation; constant chilliness; disinclination to move and to work; constant drowsiness; wants to be alone, and weeping does her no good.
No appearance of menses for 2½ months, loss of former cheerfulness; love of solitude; offended at every trifle; aversion to work; sleeps late in morning; face, lips and gums pale; lids swollen; tumultuous action of heart; great lassitude; great anxiety; sensation as if room was too small, with reluctance to going into open air; solitude and weeping relieve; in morning frequent pressing pain in forehead, with vertigo; appetite poor; stool tardy.
In a young woman of thirty who has never menstruated, every 3 to 4 weeks rush of blood to head, headache, pressing vertigo; heaviness, frequent trembling of lower limbs, and pressure towards vulva.
Scanty or suppressed menstruation with headache and vertigo. θChlorosis.
Suppression of menses after excessive dancing or being overheated.
Menstrual irregularities, attended by megrim and blindness.

Google

‖Leucorrhœa in blonde, leucophlegmatic subjects, with retarded or scanty menstruation; chlorosis and anæmia, fits of fainting and constant chilliness of whole body.
Before menses: melancholy; straining and warmth in abdomen with sleeplessness.
During menses: improvement in temper and of the heaviness of the feet; labor-like pains in back and abdomen; headache; vertigo; darkness before eyes.
After menses: swelling of mammæ, with secretion like milk.

[24] **Pregnancy, Parturition, Lactation.** ‖Hiccough during pregnancy.
‖Loathing and nausea in mouth and throat.
‖Complaints after weaning.

[25] **Voice, Larynx, Trachea, Bronchia.** ‖Voice weak when reading aloud.
‖Tickling in larynx at night, with violent cough.
‖Much scraping in larynx, pain in fauces with violent and thick expectoration at night.

[26] **Respiration.** ‖Oppression of chest, with impeded breathing.
Breathing accelerated.

[27] **Cough.** ‖Violent cough, with tickling in larynx at night.
‖Violent cough at night, with much scraping in larynx, pain in fauces, and thick mucus.
‖Suffocative cough, caused by scraping and dryness in trachea.
‖Cough which was usually most violent during sleep, was never caused by talking, or walking, even against a cold wind.

[28] **Inner Chest and Lungs.** ‖Pressure in middle of sternum.
Sensation of great weakness in chest, as if there was not strength enough to breathe.
Stitches in l. side of chest, later in r. side.
Stitch about apex of heart.
Tearing stitches, with oppression and shortness of breath, during motion and rest.

[29] **Heart, Pulse and Circulation.** ‖Buzzing in region of heart. θChlorosis.
‖Palpitation, with a murmur; severe headache and vertigo, great indolence. θChlorosis.
‖Tumultuous action of heart; great lassitude; frequent palpitation. θSuppression of menses.
‖Sensation as of something alive, running in heart.
‖Stitches about apex of heart.
Pulse: double beat, very rapid; scarcely perceptible.
‖Chlorosis, with paleness of skin and mucous surfaces; clamminess of skin, flabbiness of muscles, great lassitude, severe headache and vertigo; palpitation and venous murmurs.

Digitized by Google

▮Chlorosis from checked menstruation, with headache, dizziness and obscuration of sight.

[30] **Outer Chest.** Pressure in middle of sternum.
Contractive sensation of chest.
Sensation as if air streamed from nipples.
Mammæ swollen; tension and stitches therein; hard and painful; discharge of milky fluid, staining the linen.

[31] **Neck and Back.** Stiffness of neck, with laming pain.
Drawing rheumatic pain in left side of neck.
Twinges up back > by drawing the shoulders backwards, < by the reverse.
Deep penetrating dull stitches in region of r. kidney, < during inhalation.
Pain in small of back, ceases when rising from a seat.

[32] **Upper Limbs.** ▮Tearing terminating in a stitch, over scapulæ, with laming pain in arms.
▮▮Itching on shoulder and in axilla.
▮▮Laming hard pressure in r. arm, as if in periosteum and deep seated muscles; extending to fingers, impedes writing.
▮Bruised pain above elbow-joint, outside; < from motion of arm and touch.
Tearing pain in elbow and wrist-joints.
▮▮Painful drawings in inner surface of ulna and in wrist.
▮Feels as if she must let fall that which is in hands.
Cramp-like slow contraction of r. thumb and index finger, tips approach each other and can only be extended by force.
Numbness in r. hand.
Fine prickling between fingers, ceasing after scratching.
Red blisters, preceded by severe itching on ring and little fingers, l. hand.
Distension of veins on dorsum of hand.
▮Writer's spasm, cannot open thumb and index-finger.

[33] **Lower Limbs.** ▮Rheumatic drawing in l. gluteus maximus near spine, while sitting; ceases when standing.
▮▮Cramp-like pain on r. thigh above popliteal space.
▮Drawing pain in flexors of leg, seeming to start from hollow of knee and draw to tips of toes.
Itching on r. calf, with swelling of bloodvessels.
▮▮Pain in bottom of foot, as if sprained, more at heel.
▮Burning sore pain in heels, when walking in open air; also when standing or sitting.
After walking, toes feel dead.
Sensation in l. foot as if sprained.
Feet and toes frost-bitten, looking red.

[34] **Limbs in General.** Hyperæsthesia of extremities, with hysterical vertigo.

Digitized by Google

Slight tremor in all the joints.
Limbs feel as if their mobility were impaired.
‖Muscles have a doughy feeling and are powerless. θChlorosis.
Drawing and pressure in muscles and bones.
Pressing, drawing in periosteum where skin covers bones.

[35] **Rest. Position. Motion.** Rest: headache <; burning in œsophagus <; pain in stomach <; tearing stitches in chest; aggravation of pains; great desire for.
During inhalation: stitches in r. kidney.
Lying down: vertigo; dyspepsia; on back or painful side <.
Rising: headache; flickering before eyes; from a seat, pain in small of back >.
Sitting: in a room, vertigo >; drawing pain in anus and perineum; flow < during menstruation; rheumatic drawing in gluteus maximus; pain in heel.
Drawing shoulders forward: twinges up back <.
Drawing shoulders backward: twinges up back >.
Stooping: stitches in forehead.
Standing: rheumatic drawing in gluteus maximus ceases; pain in heel.
Walking: vertigo; feeling as if brain wobbled; headache >; painful restlessness >; gurgling in intestines >; pain in abdomen >; drawing pain in anus and perineum; pain in heel; after walking, toes feel dead.
Fatigue: from slightest cause; can scarcely walk across floor; aversion to move a single limb.
Motion: vertigo <; headache <; burning in œsophagus >; aching pain in stomach >; stitches in abdomen; pain in bowels >; gurgling in intestines >; during menstruation >; stitches in chest; bruised pain above elbow-joints <; weakness >; aversion to move.
Dancing: suppressed menses.

[36] **Nerves.** Hysterical vertigo with general nervous erethism.
Hyperæsthesia of cutaneous nerves of extremities.
‖Extremely restless and uneasy at night.
Weakness in evening, with ill humor and sleepiness; > when moving about.
‖Weakness, relaxation and prostration of whole body.
‖Weakness, paleness of face, eyes sunken, pulse 108.
‖Great lassitude of body, particularly of knees, though spirits may be good.
‖Fatigue from slight cause. θChlorosis.
‖Enervation of whole body, burdensome to move even a limb.

[37] **Sleep.** ‖Frequent yawning.
‖Great inclination to slumber, mornings.

Digitized by Google

Sleepiness and chilliness.
‡Snoring, deep sleep, or sleep disturbed by anxious dreams.
‡Great restlessness, sleep unrefreshing and disturbed by frightful dreams. θDysmenorrhœa.
‡Night restless, interrupted by dreams.
Falls asleep late and awakens early, with feeling of great lassitude and weakness.
‡Restless sleep, dreams of money.
‡Nightmare soon after falling asleep.
‡Sleep disturbed, and toward morning full of dreams; also a pollution.
‡Dreams: lascivious; frightening; vivid.
‡Early awaking, yet so tired and sleepy, cannot arise.

[38] **Time.** Towards morning: sleep full of dreams; pollution.
Morning: headache; flickering before eyes; dryness of nose; fluent coryza; vomiting; sleeps late; pressing pain in forehead; vertigo; chill.
Towards evening: pain in forehead.
7 P.M.: gnawing pains in abdomen.
Evening: headache <; burning in eyes; burning on tip of tongue; dryness of palate; thirst; hunger; pain and uneasiness in bowels; diarrhœa; during menstruation flow <; weakness; chill.
Night: anxiety; nausea; jerking in teeth; thirst; painful gurgling in intestines; vomiting; colic; erections; tickling in larynx; violent cough; scraping in larynx; pain in fauces; expectoration; restless; uneasy; sweat; pricking of skin <; itching <.
After falling asleep: nightmare.

[39] **Temperature and Weather.** Open air: dread of; vertigo; headache <; pain in heel; increase of symptoms; > in-doors.
Overheated: suppressed menses.
Cold air: sensitiveness.
Cold water: > headache; > from moistening diseased parts and from bathing.
Clothing: does not > chilliness.
‡Chilblains.

[40] **Fever.** ‡Chilliness all over body, not relieved by any amount of clothing.
‡Chilliness with irregularities in menstrual function, in chlorotic conditions.
Chill forenoon or evening.
With evening chill, great sensitiveness to cold air and uncovering, chill predominates.
Heat principally of face, but without thirst, succeeds chill; hands continue cold a long time.
Heat and chill alternately.

Digitized by Google

Sensation of heat through whole body, particularly in face and on hands.
Heat of various parts with swelling of veins of hands.
Heat of various parts, but not of face.
General heat after eating.
Sweat at night during sleep, moderate, of offensive odor.
Sweat sometimes only on lower part of body.

[41] **Attacks, Periodicity.** Attacks: heat; throbbing in head.
Frequently: unconsciousness; sneezing; vomiting; sour taste of food; eructations; passage of hard stools; micturition; copious emission of whitish urine; urging with scanty discharge of urine; trembling of lower limbs; palpitation during menses; yawning.
Every few minutes: attacks of labor-like pains.
Nearly every day: vomiting.
Every three or four weeks: rush of blood to head; headache; pressing vertigo.
Worse during full moon.
Two months and a half: no appearance of menses.
Ten months: suppression of menses.

[42] **Locality and Direction.** Left: pain in temple; side of head <; eye drawn toward inner canthus; half of object visible; stitches and itching in inguinal canal; stitches in side of chest; rheumatic pain in side of neck; red blisters and itching on fingers; rheumatic drawing in gluteus maximus; foot feels sprained.
Right: headache < in temple; dulness of hearing; drawing pain in ear; pain in teeth; distension below liver; stitches in side; stitches in kidney; laming pressure in arm; cramp-like slow contraction of thumb and index-finger; numbness in hand; writer's spasm; cramp-like pain in thigh; itching on calf; < side of head.
Lower part of body: sweat.
Changing locality: itching after scratching.

[43] **Sensations.** Sensation of fulness in internal parts; sore and bruised pain in external parts; as if room was too small; as if brain were moving within cranium, or as it does when riding in a wagon with closed eyes; as if brain was in motion when leaning against something; as if brain was enveloped in a cloth, which would deprive him of his senses; as though fog were before sight and as though eyes were about to close; as if brain wobbled about while walking; as if looking through dark blue glass, like mist before eyes; eyelids as if swollen; dulness of hearing, as if cotton was in ear or something lying before ear; as of an induration on upper lip; qualmishness as after eating too much fat; as if he had eaten too much; crawling as of something alive in

Digitized by Google

bowels; as if a spot was suppurating; as if room was too small; as if there was not strength enough to breathe; as of something alive running in heart; as if air streamed from nipples; as if she must let fall that which is in hands; as if sprained in foot; limbs feel as if their mobility were impaired.

Pain: in head, with nausea; in forehead; one-sided; l. temple; in bowels; in fauces; in small of back; in bottom of foot.

Indescribable pain: in scrobiculum cordis.

Violent pain: in forehead, temple and vertex.

Tearing: externally in head; in teeth; in abdomen; over scapulæ; elbow; in wrist-joint.

Piercing: in upper abdomen.

Stitches: in temples; in eyes; in eyeballs; in inguinal canal; in chest; about apex of heart; in r. side; in mammæ; penetrating, deep and dull in kidney.

Stitching pains: in forehead; in temples; in vertex; in teeth; on tongue; in stomach; in region of liver; in abdomen; in umbilical region; in urethra.

Darting pain: in forehead; in temples; in vertex.

Stinging pain: in forehead and temples.

Pricking: at end of urethra; between fingers.

Sticking: in scalp.

Gnawing pain: in bowels; in abdomen, thence all over body.

Boring pains: in temples; in teeth.

Pinching: in abdomen.

Cramp-like pains: in abdomen; in thumb; in index-finger; on thigh.

Twinges: up back.

Labor-like pains: in abdomen; commencing in small of back and running down each side of abdomen to pubes.

Drawing pain: in r. internal ear; in and about anus and perineum; in l. side of neck; in ulna; in wrist; in l. gluteus maximus; in flexors of legs; muscles; in bones; in periosteum.

Rheumatic pains: in head and ears; in l. side of neck; drawing in l. gluteus maximus.

Aching pains: in stomach, extending through to back.

Formicating: on scalp.

Throbbing: in head.

Bruised pain: above elbow-joint.

" **Tissues.** Acts upon the cerebro-spinal system, affecting sensorium, eyes, gastrointestinal canal, and more especially the female sexual organs.

Pressive, drawing or tearing pains at parts where bones lie near surface.

Digitized by Google

[46] **Skin.** Itching, leaving a numb sensation.
Itching, pricking, < at night, in bed; > by scratching, but re-appearing at once at another place.
Pressing, drawing pains, where the skin covers bones.
Papulous, scurfy or pricking eruptions.
Bright red spots, like burns, on thighs.
Painless eruptions.
Scars from varicelli, which have nearly disappeared, become dark red, and the forehead is covered with similar spots

[47] **Stages of Life, Constitution.** Phlegmatic temperament.
Suitable for blonde leuco-phlegmatic subjects with chlorotic condition; disinclination for any kind of labor, easily fatigued; special senses enfeebled or with functions suspended.
Patient pale, chlorotic, with disturbed menstrual function, accompanied by vertigo and headache.
Girl, æt. 3, lively disposition; strabismus.
Hebrew, æt. 16, of lively disposition; suppression of menses.
Young lady, æt. 18; pain in scrobiculum cordis, and vomiting.
Girl, æt. 18, menstruation not yet established, poorly developed; headache.
Girl, æt. 20, blonde, menstruating since 16th year, at 17 had chlorosis, since which time menses have been very scanty, although regular; headache, palpitation.
A woman, æt. 30; amblyopia.
Young woman, æt. 24, blonde, pale, delicate skin, menstruating since 19th year; two years ago was drenched (by rain) during menstruation, whereupon menses ceased to appear for 10 months, at 11th month, after use of household remedies, menses appeared; dysmenorrhœa.
Girl, æt. 28, blonde, chlorotic; non-appearance of menses for ten months.
Man, æt. 35, suffering for years; different mineral waters taken, on advice of allopathic physicians, with no benefit; enteralgia.
Man, æt. 40; enteralgia.
Coachman, æt. 40, strong and hearty; diplopia.
Mrs. ——, æt. 44, of rather large frame, has in former years had good health and has always worked hard; excessive menstruation.
Mrs. B., æt. 51, strong, healthy Irish woman; mental derangement during climacteric.
Woman, æt. 60, after ten years' unsuccessful use of various remedies; coryza; malaise.
Weakly old man, with pale, herpetic face and red nose; enteralgia.

[46] **Relations.** Antidoted by: *Camphor, Coffea, Pulsat.*
Compare: *Pulsat.*, which is its nearest analogue; *Ferrum* and *Cinchona* are similar in chlorosis; *Crocus* and *Thuja* like it, have sensation as of something alive in abdomen; *Ammon. mur.* similar in menses, < at night; *Cocc. cact.* has leucorrhœa, < sitting, > walking; *Cyclam.* menses, < sitting, > walking; *Rhus tox.* is similar in enteralgia; *Gelsem.* and *Senega* in diplopia; *Arnica* in effects of falls; *Baryt. carb., Calc. ost., Canthar,* in chills and fever.

CYPRIPEDIUM.

Lady's Slipper. *Orchidaceæ.*

The yellow lady's slipper, Cypripedium pubescens, grows wild in abundance in woods that are moist throughout the United States. The tincture is prepared from the fresh root gathered in Autumn. It has been used by the Old School as a substitute for Valerian.

A fragmentary proving of the Tincture of *Cypripedium humile*, by Jacob Kummer, in MSS., is added; the symptoms are marked ——.

CLINICAL AUTHORITIES.—*Mental despondency*, spermatorrhœa; *Delirium tremens*, mild attacks; *Debility and Sleeplessness*, Mitchell, Raue's Rec., 1875, p. 256; *Sleeplessness*, Moore, M. I., vol. 6, p. 342.

[1] **Mind.** Irascibility and fitfulness; hysterical symptoms; sleeplessness; agitation.
Profound indifference to everything, even to his studies, duties, and common courtesies of life.
Mental despondency. θSpermatorrhœa.
Delirium tremens, mild attacks.

[2] **Sensorium.**—Vertigo, had to sit down, followed by heaviness and dragging of l. foot.

[5] **Eyes.** Stye on r. lower lid.

[17] **Stomach.** Dyspepsia, the result of mental overexertion, anxiety, or grief.

[22] **Male Sexual Organs.** Spermatorrhœa, with great nervous prostration and dejection of spirits.

[23] **Female Sexual Organs.** Amenorrhœa, with hysteria; great nervous debility and despondency.
Irritability of vagina; hysterical symptoms, sleeplessness and agitation.

[31] **Neck, Back.** A small blood boil on l. side of neck.

Digitized by Google

[36] **Lower Limbs.** ‖Twitching of limbs, sleeplessness and restlessness.
—Severe pain in r. foot, along inner margin, an hour later, very severe in front part of left.
—Acute stitches in under part of toes in r. foot.
—Dragging of l. foot, following vertigo.

[36] **Nerves.** Sleepless from nervous exhaustion, especially where system has been debilitated by long sickness, especially from uterine complaints.
‖Nervous debility, with sleeplessness of nervo-bilious temperaments.
‖‖Jactitation and trembling in typhoid fevers.
‖‖Hysterical complaints.
‖‖Chorea and reflex epilepsy.
Convulsions of children, premonitory stage, when there is morbid irritability of brain, in consequence of which child is very excitable, laughs and plays at unwonted hours; is very wakeful, and laughs even in sleep.
Epilepsy from reflex nervous irritation, from exhaustion of nerve forces, from irritability of brain in children.

[37] **Sleep.** ‖Sleeplessness: with desire to talk, or with constant crowding of pleasant ideas; with restlessness of body; twitching of limbs; after miscarriage, for several nights in succession.

[38] **Time.** Night: child laughs and plays.

[41] **Attacks, Periodicity.** Mild attacks: delirium tremens.
Several nights: restlessness of body; twitching of limbs.

[42] **Locality and Direction.** Left: blood boil on side of neck; heaviness of foot; dragging of foot; severe pain in foot.
Right: stye on lower eyelid; pain in foot; stitches in toes.

[43] **Sensations.** Severe pain: in r. foot.
Stitches: in toes.
Twitching: of limbs.
Irritability: of vagina; of brain.
Heaviness: of l. foot.

[44] **Tissues.** ‖‖Disorders of gray nerve matter from mental overexertion, or reflex nervous excitement.
‖‖Incipient cerebral disorder, when child is sleepless, laughs and plays in night.
‖‖Functional irritation of brain, especially in very young children from teething, or intestinal irritation.

[47] **Stages and States.** Lady teacher in seminary, after miscarriage; sleeplessness.

[48] **Relations.** Compare: *Ambra gris., Coca, Coffea, Ignat., Kali brom., Paullinia, Thea, Scutellaria, Valerian, Zincum.* May be useful after failure of *Opium* in hysteria, chorea, nervous headache, neuralgia, hypochondriasis.

DAPHNE ODORA.

Daphne Indica (Sweet scented Spurge laurel). *Thymolaceæ.*

This remedy, not to be confounded with Daphne mezereum, another species from the same natural order (see Mezereum), was introduced by Dr. G. Bute, whose symptoms, pathogenetic and clinical, were first published in the Correspondenz-Blatt, the journal of the Allentown Academy, in 1837.

This evergreen is a native of the West Indies and China (not India), while the Daphne mezereum grows in Great Britain.

The tincture is prepared from the fresh bark.

[1] **Mind.** Despondency.
Very peevish, absent-minded, he walks about the room, cannot make up his mind to anything.
Timorous and trembling, with pain about heart.
Fearfulness.
Agitation.
Any effort at thinking causes pain or soreness in brain.
[2] **Sensorium.** Vertigo.
[3] **Inner Head.** Sensation as if external portion of brain was inflamed and beating painfully against skull.
Feeling of fulness in head, as if head would burst.
Pain in head on rising in bed, as if head would burst.
Sensation as if head was separated from body.
Head feels as if screwed together, from below upward, as if chin and vertex were in a vise, with great heat in head.
Head feels as if too thick, with dull sticking in l. temple.
Painful pulsation in temples, with soreness when touched.
Violent pain in l. temple.
Pain in temples extending to back part of eyes.
Sharp momentary pains in l. side of head and under l. scapula.
Pain in vertex, extending toward forehead.
Heat in head, especially in vertex.
Pain from nape of neck to forehead.
Pain in back part of head.
[4] **Outer Head.** Soreness on pressure with painful throbbing of temples.
Pain and burning on vertex.
Heat on back part of vertex.
Nodular swellings on bones of head about vertex, soft as if containing water; pain < at night preventing sleep; < from touch.

Digitized by Google

‖Hard swelling of whole l. side of upper portion of head, as if in the bone, with numbness and sharp, transitory, shooting pains.
Itching on scalp.

[5] **Eyes.** ‖Sensation as if a membrane extended across eye.
Black spots float before eyes.
‖Weakness of eyes; while reading, the letters fade and appear as a black line.
‖Diplopia.
‖Contraction of pupils.
Eyes dim and watery, weak, inflamed, without lustre; filled with tears.
Glassy appearance of eyes.
Pain in eyes; sensation as if they were forcibly pressed out, or were too large.
Severe pains in eyeball, with great nervous excitement, in evening.
‖Scratching in eyes.
Pain above r. eye.
Itching in l. eye.
Indescribable sensation about eyes and lids; the latter feel heavy next morning and have a dry appearance.

[6] **Ears.** Roaring and humming in ears.
Burning about ears and on vertex, with constant inclination to yawn.

[7] **Nose.** Nostrils scurfy, with some heat.

[8] **Face.** Heat and burning of cheeks, extending to ears and hands.
Sensation of swelling; rigidity and tension in articulation of jaw.

[9] **Lower Face.** Sensation of tension and swelling in region of maxillary joint, with severe burning in skin.
Stiffness of maxillary joint on chewing.

[10] **Teeth.** Pulsation in roots of teeth; in gums.
Tearing, gnawing pain in all the teeth.
Toothache: with chilliness; with tendency to sweat; with erections; after coitus; with or without salivation.
Pressure upon swollen gums causes crackling, as if a collection of air had formed there.

[11] **Tongue.** ‖Dryness of tongue as if burnt; after sleep.
‖Foul-smelling tongue.
Tongue coated on one side.

[12] **Mouth.** Ptyalism; saliva hot.
Salivation with toothache.

[13] **Throat.** Inflammation of throat and suppuration of tonsils.

[14] **Desires, Aversions.** Loss of appetite, moderate thirst.
Great desire for tobacco.

[15] **After Meals.** ‖After each meal burning in stomach and

Digitized by Google

sensation of soreness, with much belching of wind, the pain often extends through l. hypochondriac region and around to back; frequent cramps in stomach.
Nausea and vomiting after breakfast; vomiting with cough.
Pressure in stomach after drinking.
‖Gouty pains, < by drinking of alcohol.

[16] **Belching.** ‖Pyrosis and sour vomiting.

[17] **Stomach.** Burning and soreness in stomach.
‖Sensation of fulness and heaving in pit of stomach.
Pit of stomach as if contracted.
Qualmishness in stomach.
Gastralgia.

[18] **Hypochondria.** Sensation as if something smooth was gliding from r. to l. hypochondrium, lying on back.
Pain under l. floating ribs.
Sudden stitch in region of spleen.

[19] **Abdomen.** Arthritic pains, which suddenly wander from extremities to abdomen.
Colic with chilliness.
Trembling in abdominal muscles.
Painfulness of l. groin.

[20] **Stool.** ‖Stool scant, at termination bloody.
‖Constipation.

[21] **Urine.** Cutting pains in kidneys.
Soreness of urethra; at beginning of micturition.
Frequent desire to urinate with forcible passage of large, clear stream.
‖Frequent and copious micturition.
‖Frequent urination at night.
‖The urine is turbid, thick, yellowish, contains pus.
Red sediment of urine, which adheres to sides of vessel.
‖Fetid smell of urine, like rotten eggs.
Urging to urinate, with mucous discharge.

[22] **Male Sexual Organs.** ‖Discharge of prostatic fluid after urination, < by smoking.
Sweating of scrotum.
‖Disorders resulting from suppression of gonorrhœa.

[25] **Larynx.** Feeble voice.

[26] **Breathing.** Offensive breath.
Suffocating feeling with throat complaints.

[27] **Cough.** ‖Cough from tickling in throat, with yellow, often frothy, blood-streaked expectoration, accompanied by retching and vomiting; coughs until he sinks down completely exhausted; causes sleeplessness at night.
Cough, with pain in sternum.
Copious, thin, slimy expectoration.

[28] **Heart, Pulse.** Stitches in heart and cardiac region going through to back.

Digitized by Google

Palpitation and fluttering; cannot lie on l. side; pains about heart.
Timorous and trembling, with pain about the heart.
Pulse: quick, frequent; accelerated, often 100 or more; very slow.

[30] **Outer Chest.** Pain in pectoral muscles.

[31] **Neck. Back.** At night sensation as if cervical glands were greatly swollen, and arteries distended with blood; a suffocative feeling, as if head were separated from body.
Soreness in l. side of throat on pressure.
Screwing pain from ear to shoulder.
Beating in nape of neck, with painfulness to touch.
Pain in nape of neck, with headache.
Sharp pain under l. scapula.
Pain and downward drawing in spinal cord, < stooping or bending.
Burning and itching down back.
Cold feeling on buttocks.

[32] **Upper Limbs.** Lightning-like pain in r. shoulder.
Small vesicles on hands and arms itching violently.
Burning of hands.
Sudden violent painful boring in bones of fingers.
Gouty pains flying about in hands.
Sticking-tearing pain in throat and fingers of r. hand.

[33] **Lower Limbs.** Itching of legs every evening; they are covered with a red rash.
Sharp pain down r. hip, spreading towards back, and lasting about ten minutes.
Screwing pain in r. hip, and from hip to knee.
Rheumatic pain in muscles of l. thigh, just above knee, as after catching cold, < walking.
Dull pain in thighs.
Pain in thighs and knees.
Sensation of coldness of knees; cold knees, cold feet.
After pain leaves foot it is insensible to touch, and feels very large.
Toes and forepart of foot extremely cold.
Sensation as of a bruised pain in l. toes.
Empty feeling in big toe.
Ball of r. great toe swollen and very painful; the pain suddenly shoots into the body, to region of heart, or some other part of body.

[34] **Limbs.** Gout-like, pinching pain on back of l. hand, mostly on side of little finger; after five minutes the pain darted to outer side of r. hand, and so for several hours alternately went from hand to hand, after lasting 4–5 minutes; the pain then suddenly changed to ball of l. great toe, soon passed to back of toe, from thence to back of r.

Digitized by Google

great toe, and then back again to l.; after passing from one foot to the other several times, it went to the muscles of r. arm, just above elbow, thence to inner side of l. thigh, just above knee, and from there to abdomen, below præcordial region.

Sticking-shooting pains, first in one, then in other arm, which seem to go into hands and feet, where they end suddenly with a slight electric shock; when he thinks they have passed by, he suddenly feels same pain in l. foot, which, however, remains in no one place for any length of time; in the great toe (in which he formerly had gouty pains), sensation as if there were an emptiness, then lightning-like, shooting pains in l. great toe, in balls of toe and soles of feet; the same in r. foot, but less severe; the l. foot, after pains have become very violent, is quite insensible to touch, and feels as large as whole body.

Stiffness of limbs.

‖ Great weakness, a bruised feeling in limbs.

[35] **Motion. Rest.** As soon as he lies down: gouty pains.

Lying down: < backache.

Rising: pain in head.

Stooping or bending: < pain in spinal cord.

Walks: about room.

Walking: rheumatic pain in thigh <; coughs until he sinks down completely exhausted.

[36] **Nerves.** Great lassitude and weakness, limbs feel bruised.

Great restlessness, with nervous headache; sharp pains sweep over whole body, appear at times to rest in the joints, the same were felt in cardiac region causing trembling and fearfulness.

Great nervous excitability with the pains in eyes.

[37] **Sleep.** ‖ Entire sleeplessness: from pains in bone-swellings; from cough.

Great drowsiness, but complains of being unable to sleep.

‖ Restlessness, unrefreshing sleep.

Starting on falling asleep, with chilliness and clammy sweat.

‖ Dreams: of black cats; of a vicious black cat seizing him by the hand; of fire.

[38] **Time.** Morning: eyes feel heavy; lids feel heavy.

Evening: pain in eyeballs; itching of legs; red rash in spots on legs; pains <.

Night: pains <; nodular swellings on bones of head <; sleeplessness; sensation as if cervical glands were greatly swollen; as if arteries were distended with blood; exostoses with stitching, pressing dull pain <.

[39] **Temperature and Weather.** Cold air: wandering gout <.

Warmth of bed: pains <.

Digitized by Google

[40] **Fever.** Toothache, with attacks of chilliness and sweat.
Violent shaking chill, lasting 12 hours, followed by heat of moderate duration, as in typhoid, with clammy sweat over whole body, followed by some thirst and complete loss of appetite.
Glowing sensation in cheeks, followed by burning, extending to ears and vertex, hands and tips of fingers.
Stretching and yawning, with chilliness.
Heat and sweat at short intervals.
Tendency to sweat.
Viscid perspiration, sometimes having a putrid smell.
Gastric nervous fever.

[41] **Attacks, Periodicity.** Sudden lightning-like dull jerkings in different parts of the body.
Erratic stitches.
Attacks: of chilliness.
Frequent: cramps in stomach; desire to urinate; urination at night.
Short intervals: heat and sweat.
10 minutes: pain in r. hip.
12 hours: chill lasts.
Feels worse while the moon is on the wane.

[42] **Locality and Direction.** Left: sticking in temple; hard swelling side of upper portion of head; itching in eye; burning pain in hypochondriac region; pain under floating ribs; painfulness of groin; cannot lie on side; heart symptoms < lying on side; soreness of throat; sharp pain under scapula; rheumatic pains in thigh; bruised pain in toes; gouty pain on back of hand; gouty pain on side of little finger; pain in ball of great toe; shooting pain in foot; after pain ceases, foot is insensible to touch; foot feels as large as whole body.
Right: pain above eyes; pain in shoulder; tearing pain in fingers; pain down hip; great toe swollen; pain in great toe; pain in arm.
From right to left: sensation as if something smooth was gliding from r. to l. hypochondrium.
One side: tongue coated.
From below upward: head feels screwed.
Extremities to abdomen: arthritic pains suddenly wander.
Changing locality: pains in limbs.

[43] **Sensations.** As if external portion of brain was inflamed and beating painfully against skull; as if head would burst; as if there was not enough room in head; as if head were separated from body; as if head were screwed together; as if chin and vertex were in a vise; head feels as if too thick; as if a membrane extended across

Google

eye; as if eyes were forcibly pressed out; as if eyes were too large; as if face were swollen; pressure upon swollen gums causes crackling as if collection of air had formed there; tongue as if burnt; pit of stomach as if contracted; as if something smooth was gliding from r. to l. hypochondrium; as if cervical glands were greatly swollen; as if arteries were distended with blood; as if there were an emptiness in foot; foot feels as large as whole body.

Pain: about heart; in brain; in head; in temples, extending to back part of eyes; in vertex; from nape of neck to forehead; in back part of head; in eyes; in eyeballs; above eyes; in teeth; through l. hypochondriac region and around to back; under l. floating ribs; in l. groin; in sternum; in pectoral muscles: in nape of neck; in spinal cord; in knees; in thighs; in r. great toe; pain suddenly goes into body to region of heart or some other part of body; in bone swellings; in teeth.

Indescribable feeling: about eyes and lids.

Violent pain: in l. temple.

Cutting pain: in kidneys.

Tearing pain: in teeth; in throat; in fingers.

Bursting: headache.

Sharp momentary pain: in side of head; under scapula; down hip to back.

Shooting pains: in head; arms; hands; feet; l. great toe.

Stitch: in region of spleen; in heart; in cardiac region, through to back.

Lightning-like pain: in r. shoulder; in l. great toe; soles of feet.

Pinching pain: in back of l. hand; in little finger; in r. hand.

Gnawing pain: in all the teeth.

Screwing pain: from ear to shoulder; in hip to knee.

Boring pain: in bones of fingers.

Gouty pains: in hands; on back of l. hand; toes; arms; thigh; knee; abdomen; from extremities to abdomen.

Rheumatic pains: in thigh.

Burning: on vertex; about ears; cheeks; in skin of jaw; in stomach; down back; of hands.

Soreness: of brain; in temples; of stomach; of urethra; l. side of throat.

Heat: in head; in vertex.

Dull sticking: in l. temple; in throat; in fingers.

Dull pain: in thighs.

Throbbing painful: in temples; in roots of teeth; in gums.

Beating: in nape of neck.

Bruised feeling: in limbs; in l. foot.

Pressure: in stomach.
Heavy feeling: in eyelids.
Fulness: in head; in pit of stomach.
Drawing down: in spinal cord.
Tension: in region of maxillary joint.
Roaring: in ears.
Humming: in ears.
Cold feeling: on buttocks.
Scratching: in eyes.
Tickling: in throat.
Itching: on scalp; in l. eye; down back; of legs.

[44] **Tissues.** Erratic stitches in muscles.
‖Rheumatic and arthritic pains, especially after suppressed gonorrhœa.
Wandering gout, < from cold air.
‖Rheumatic and gouty affections in muscles and bones.
‖Exostoses with stitching, pressing, or dull pain, especially < at night.

[45] **Touch. Passive Motion.** Touch: pain < in bones of head; painfulness in nape of neck; foot insensible to, after pain ceases.
Pressure: on temple, soreness; on gums causes crackling; soreness of l. side of throat.

[46] **Skin.** Clammy skin.
Red rash in spots on legs, in evening.
Leprosy (Daphne oleoides).

[47] **Stages and States.** ‖Mercurio-syphilitic affections.

[48] **Relations.** Antidoted by: *Bryon.*, *Digit.*, *Rhus tox.*, *Silica*, *Sepia*, and *Zincum*.
It antidotes: pains of *Chrom. acid*, and *Mercurius*.
Compare: *Mezer.* its side relation; *Aurum* and *Mercur.* in bone affections; *Staphis.* in mercurio-syphilitic affections; *Thuja* in results of suppressed gonorrhœa; *Benz. ac.* in fetid urine; *Jambos* in desire for tobacco; *Pulsat.* in erratic pains; *Veratr.* in electric-like pains.

DIADEMA ARANEA.

The Cross Spider. *Arachnida.*

A large spider found in Europe and America, its body ovoid, a longitudinal line on back, of yellow and white points, intersected by three similar lines. Used as a remedy by Wm. Gross as early as 1833, and mentioned in the older homœopathic works, but not proved until later by Grauvogl, see his Text Book, 2d edition, 1866, and Allen's Encyclopedia, vol. 4.

The symptoms are mainly based on clinical experience.

The tincture is prepared by maceration of the insect in alcohol.

CLINICAL AUTHORITIES — *Headache*, Grauvogl, p. 43; (2 cases), Hencke, Rück. Kl. Erf., vol. 5, p. 70; *Chronic headache*, Grauvogl; *Toothache*, Grauvogl; *Colic*, Howard, Hom. Fevers, p. 18; *Quotidian chill*, Grauvogl.

[1] **Mind.** Dejected, pale face; dark circles under eyes; melancholy, will not leave the bed.
‖ Deep melancholy. θDysmenorrhœa.
| Morose and despondent, longing for death. θIntermittent.

[2] **Sensorium.** | Vertigo before headache; when sitting up; must lie down; with weakness before eyes.
Confusion of head; after eating; with relaxation (lassitude).
Dulness and pressure in head, > when pillowing head.

[3] **Inner Head.** Confusion of head; with lassitude; after eating; evening, when studying, with pressive pains, as if on bones of r. temple; while resting head on hand.
| Headache and confusion of head, both > by smoking and by going into open air.
Long-lasting confusion of head, with pressing pain in forehead and temples, > by pressure of hand, > in evening, after eating.
Headache in forehead, > by smoking.
Heat in forehead and eyes.
Headache, with burning in eyes and heat in head.
| Pressing in temples; vertigo on rising from a recumbent position; head and hands feel swollen.

Digitized by Google

Continued headache spreading from forehead on vertex and occiput, only at times < on top of head; cannot receive company because talking or listening produces vomiting; she must lie quietly in bed for three or four days.

‖Chronic headache, preceded by flickering before eyes and vertigo, which forces her to lie down; headache attended with dulness, cannot think well, great heat in forehead and face, weariness, loss of strength; lasts one day.

Headache coming on at regular hours; < by speaking, or when others speak; > by less smoking, or going out into open air.

‖Stitching and shooting pains in head with chill. θIntermittent.

‖Nervous headache; periodical.

4 **Outer Head.** ‖Unpleasant sensation as if head and hands were greatly swollen. θHeadache.

Dulness of head: with tightness; after a meal; during evening studies; with pressure on right temporal bone, upper part of forehead, > on leaning head.

Drawing in head to lower jaw.

5 **Sight and Eyes.** ‖Glimmering and glittering before eyes when reading or writing, which < headache.

Flickering before eyes; precedes attack of headache.

Thick mist before eyes; so tired she thought she would drop.

Disagreeable trembling in eyes; reading, writing, < headache, with heat in eyes and forehead.

‖Burning in eyes, with heat in face and headache.

‖Stinging in eyes after the heat. θIntermittent.

‖Shooting in eyes. θIntermittent.

‖Large black circles under eyes. θDysmenorrhœa.

6 **Hearing and Ears.** Pinching pressure in r. ear and parotid gland, shifting to r. side, from up-down.

‖Affection of ears in dogs; they shake their heads until the ears are bloody.

7 **Smell and Nose.** Coryza with thirst; tertian coryza.

Epistaxis.

8 **Upper Face.** ‖Dejected countenance and pale face; dark circles under eyes; lips blanched; dull expression of eyes; confusion of head; deep melancholy; malaise, with constant desire to lie down. θSpasmodic pains in stomach.

‖Face pale and sunken. θDysmenorrhœa.

‖Cheeks feel as if swollen. θToothache.

‖Heat in forehead and face. θHeadache.

‖Burning heat in face, forehead and eyes, with headache.

9 **Lower Face.** ‖Lips colorless. θDysmenorrhœa.

10 **Teeth and Gums.** ‖Right lower incisors feel cold and

Digitized by Google

are sensitive, especially on drawing in air; returns each day at same hour.

ǁPinching, pressing pain in upper incisors, regularly from 9 A.M. to 7 P.M.; leaving a sensitiveness and cold feeling on drawing in air; sensation as if gum or cheek were swollen.

ǁSudden violent pains in teeth of upper and lower jaw at night, immediately after lying down.

Toothache > by smoking tobacco; < by humidity, at night, and after lying down.

[11] **Taste and Tongue.** Taste: bitter, > by smoking; nauseous, bitter, with coated tongue; unpleasant after milk.

ǁTip of tongue slightly red. θAgue.

[13] **Throat.** Stitches in palate and larynx.

[14] **Appetite, Thirst, Desires, Aversions.** ǁAnorexia. θIntermittent.

Thirst during fever and with all other symptoms.

[15] **Eating and Drinking.** After eating: confusion of head, with lassitude.

After eating a few spoonfuls of soup, a crawling sensation over whole body.

ǁAt dinner, after first spoonful of soup, violent spasmodic bellyache with anxiety; oppression of chest and repeated gaping. θDysmenorrhœa.

ǁShe had no appetite and was afraid to eat, as it increased the complaints in the night.

After milk, unpleasant taste.

[16] **Hiccough, Belching, Nausea and Vomiting.** Vomits everything; has passed no urine in two days; backache, preventing sleep.

ǁVomiting after chill and after heat. θIntermittent.

[17] **Scrobiculum and Stomach.** ǁCutting in stomach, and spasmodic pain, with vomiting before chill. θIntermittent.

ǁBurning in stomach during chill. θAgue.

ǁAfter eating a very little food, violent convulsive pains in stomach, nausea, oppression of chest and repeated gaping.

ǁCramps in stomach, commencing during a meal, with great anxiety, pressure in chest, and frequent yawning; spasm at first confined to stomach, gradually becomes general, with trembling of whole body, spasmodic motions, and desire to keep constantly moving when sitting.

[18] **Hypochondria.** ǁEpigastrium painful to pressure. θAgue.

ǁSwelling of spleen, after checked intermittent fever with quinine; < in damp weather and exposure to damp walls.

Google

‖Enlarged spleen, in man subject to ague, constantly chilly, < when it rained.

[19] **Abdomen.** Sensation of heaviness and fulness in lower bowels as if a stone was lying there, with an unpleasant feeling of faintness in pit of stomach; gnawing and griping in abdomen; returns daily at the same hour.

Abdominal complaints with shuddering, towards evening; sensation of heaviness, snapping in belly, with unpleasant squeamishness in pit of stomach.

‖Colic, griping pains, sensation of heaviness in lower abdomen and feeling of faintness in epigastrium.

‖Colic recurs daily at same hour, with feeling as if arms and legs were asleep.

‖Every morning about 4 o'clock severe abdominal pains with loud borborygmi, followed by two or three small liquid stools, with sensation of numbness in upper and lower extremities, after that sleeps quietly until about 8 A.M., but feels tired and used up all day; no appetite, and fear of eating on account of pains during digestion. θColic after a cold.

Intermitting colic; flatulency.

Violent pain in abdomen with great rumbling.

Flatulency, with heaviness in thighs, each day at same hour.

[20] **Stool and Rectum.** Bowels which were bound 4 or 5 days, move daily.

Diarrhœa, stools occur with great violence.

‖Diarrhœa, stools thin fluid, with pain in abdomen, > by rubbing with hand; stool passed only partly with straining, and a half hour later, fermentation in abdomen.

‖Pain in bowels and diarrhœa regularly every morning at 2 o'clock, with colicky pains and great rumbling in belly. θDiarrhœa.

‖Diarrhœa, arms and legs feel as if asleep.

[21] **Urinary Organs.** Waits long to urinate; no energy; sore on either side of bladder.

Awakens with desire to urinate, but nothing passes; no burning or urging, but sometimes severe pain from perineum to glans penis.

Constant desire to pass water, but cannot; fearful pain along urethra from glans.

Urine dark colored.

[22] **Male Sexual Organs.** Produced a boil on l. side of penis, near pubes.

[23] **Female Sexual Organs.** Metrorrhagia; bright red.

Dysmenorrhœa; spasms commencing in stomach.

‖Menses 8 days too early, too long lasting and too copious.

‖Courses irregular; either too late or too early; face pale

Digitized by Google

and sunken; dark circles under eyes; dull expression of eyes; bloodless lips; melancholy features; general debility with constant desire to lie in bed; sensation of formication all over body; about noon, after eating only a few spoonfuls of soup, violent convulsive pains in stomach, with anxiety, nausea, oppression of chest, and constant yawning. Spasmodic affection of stomach soon spreads all over body, with trembling, so that she could not remain quiet in any position; confusion of mind; pains return with less intensity on going to bed and when rising in morning.

Irregular menstruation; too often; too profuse, with colic three times every day.

Menses omit four weeks, then copious and red.

Slimy mucus from vagina; viscous leucorrhœa.

[26] **Respiration.** ‖Chest feels constantly so oppressed that a walk across his room puts him out of breath. θEnlarged spleen.

‖Respiration very short, raised the r. side of thorax only, 30 in minute, could be heard at the very apex of the lung only.

[27] **Cough.** Cough with bloody sputa.

‖Cough. θIntermittent.

[28] **Inner Chest and Lungs.** ‖Oppression of chest, nausea and gaping, with convulsive pains in stomach after eating.

Expectoration bloody; hæmoptysis among subjects weak and anæmic through privation of all kinds, and dyspeptics.

Violent hemorrhages from lungs.

[29] **Heart, Pulse and Circulation.** ‖The heart was pressed to the right, beat feebly, 98 in a minute. θEnlargement of spleen.

[31] **Neck and Back.** Excruciating neuralgia along spinal nerves.

Jerking in back and l. arm with vertigo, blackness before eyes and falling down.

Back so painful she cannot sleep; passes no urine.

‖‖Pain in back before and after chill. θIntermittent fever.

[32] **Upper Limbs.** ‖Every night for several years, distressing sensation as if hands and arms were enormously swollen, in very nervous woman; apprehension so strong that she often struck a light to ascertain whether it was so or not.

Forearms and hands so heavy that he imagines he cannot lift them.

Pains in bones, dull, digging in all parts of body, more in humerus, forearm and fingers.

‖Ring and little fingers of both hands feel as if they had gone to sleep; formication.

Digitized by Google

Fibrillar twitching in muscles of l. upper arm.
Quivering, twitching in muscles of l. upper arm, afternoon.

[33] **Lower Limbs.** Heavy feeling in thighs, they can hardly be carried forward; confusion of head; heaviness in abdomen.
‖Stitches through knee with the chill, coming and going suddenly. θAgue.
Feet feel heavy, with weariness.
‖Boring in r. os calcis when first moving foot; disappears from continued motion.
‖Ulcer on l. heel.
‖Caries or gangrene; pains < and > periodically.

[34] **Limbs in General.** ‖Arms and legs feel as if asleep. θDiarrhœa.
At times dull, digging bone-pains.
Early in morning and at intervals during day, dull digging pains in r. humerus, radius, ulna and tibia.
‖Pains in limbs, great inward soreness with chill; pain from r. side up into shoulder-blade. θIntermittent fever.

[35] **Rest. Position. Motion.** Lying down: desire to lie down; vertigo >; dullness and pressure in head >; toothache <; pain in stomach >; aversion to leaving bed; must lie down; lies as if dead.
Rising from recumbent position, vertigo; pain in stomach >.
Rests head on hand: confusion in head.
Leaning head: > pressure in forehead.
Shaking head: in dogs till ears are bloody.
Walking across room; puts him out of breath.
Moving: desire to keep constantly moving when sitting; first moving foot < boring in r. os calcis, > from continued motion; obliged to move on her feet during colic.

[36] **Nerves.** ‖Great exhaustion, lassitude. θIntermittent fever.
‖Weary and thirsty.
Weariness, with headache; with heavy arms and feet; thirst.
‖‖Languor and lassitude.
‖Must lie down; weak as if dead, after heat. θIntermittent.
‖Feels as if she would drop.
Numb feeling in periphery of ulnar nerve, also in ring and small finger of both hands.
Trembling, lameness, spasm; subsultus tendinum.
‖‖Menses irregular, too often and too profuse, with colic three times every day; melancholy; will not leave bed; creeping as of ants all over body; about noon with first spoonful of soup, cramp pains in abdomen; great anguish in chest and yawning; soon afterwards general spasms.
‖Spasms in abdomen changing into general convulsions

Digitized by Google

of whole body, during which she was obliged to move to and fro on her feet continuously, while the pain in belly continued and her consciousness was slightly depressed. θDysmenorrhœa.

‖Catalepsy; periodical headache; < from damp weather, or the use of baths; constantly chilly, cold hands and feet, even in a warm room.

[37] **Sleep.** ‖Sleeplessness. θIntermittent.

‖As soon as she lies down at night, a sudden violent pain in all the teeth, lasting one hour.

‖Sleep unquiet, with frequent awaking.

‖Sleep restless; on awaking, hands and forearms feel as if greatly swollen and as strong and large again as natural; they feel so heavy he imagines he can hardly lift them.

‖Deep sleep during heat. θIntermittent fever.

‖Frightful dreams, screams out and cannot sleep again.

[38] **Time.** Early morning: dull pain in r. arm.

Noon: violent convulsive pains in stomach.

All day: tired feeling.

9 A.M. to 7 P.M: pain in upper incisors; 9 A.M. chill.

Evening: confusion of head; pressing pain in head >; abdominal complaints >; heat.

Night: pain in teeth; complaints <.

[39] **Temperature and Weather.** Summer: bones feel like ice.

Open air: headache >; confusion in head >.

Warm room: cold hands and feet.

Chill not > by external warmth.

Fever: from sleeping on cold floor.

Drawing in air: incisors sensitive.

Damp air and rain: swelling of spleen <; headache <; chilly as if bones were of ice; all symptoms <.

Damp walls: < swelling of spleen.

On the water: return of chills.

Rough weather: chills return.

Rainy weather: spleen trouble <.

Cold weather: symptoms <.

‖Worse from bathing.

‖‖Cannot tolerate damp or wet weather, or damp habitations, even being on the water.

[40] **Fever.** ‖Before chill: cutting cramp in stomach; backache.

‖Cold all the time, cannot get warm; chilly as if bones were made of ice, even during summer; < during rain.

‖‖Chill returns daily at same hour or every other day with sleeplessness, but neither heat nor sweat.

‖Chill returns after each cold or in rough weather.

‖Constant chilliness from being on the water.

‖Chilly day and night. θEnlargement of spleen.

‖Felt stiff in limbs, tired and sick; chill began at 7 A.M.

Digitized by Google

and lasted till precisely 8 in morning, every day at same hour, without heat or sweat, with cough, loss of appetite sleeplessness, and great exhaustion.

‖Sudden violent attacks of chills at 9 A.M., in March.

‖During chill: stinging in head; stitches in knees.

‖Chill, no heat; sweat with thirst; headache; hemorrages from uterus or lungs.

‖Chill at regular hours; thirst during attack.

The paroxysm often unattended by either heat or sweat, consisting only of coldness, which is persistent and severe, and not > by anything; it is usually without thirst in any stage; if any, usually during the heat.

Quotidian fevers of paludal origin; chill occurs precisely at same hour daily; lasting chill, either without any heat or sweat, or with little or short heat, not followed by sweat; great lassitude and disinclination to work; liver and especially spleen enlarged; urine dark colored; after a while ascites, loss of strength, lassitude, irritability, or more often apathy; great thirst during chill.

‖Fever coming twice a day; at sunrise, and about 5 P.M.

Chill lasts from an hour and a half to three hours.

Before chill: cramp-like pain in stomach and vomiting.

During chill: stinging and shooting pains in head; stitches through knees, coming and going suddenly; pain in limbs and great soreness; pain going from r. side into r. shoulder-blade; burning in stomach.

After chill: vomiting.

Heat lasts two hours.

Before heat: vomiting.

During heat: headache, but not so violent as during chill, with great drowsiness.

After heat: vomiting and great prostration; lies as if dead; stinging in eyes.

‖No sweat.

‖Chill, preceded by stretching and yawning.

Backache before and after chill.

Very little heat and no sweat.

Poor appetite and great weakness.

‖Emaciation, yellow skin, malaise, moroseness, anorexia, epigastrium painful to pressure, slight redness of tip of tongue, despondent, longs for death. θIntermittent.

‖Chill and other symptoms are < every other day, at precisely same hour.

‖Great regularity of paroxysm.

‖Violent shaking chill, lasting uninterruptedly for 24 hours, without being followed by heat or sweat, or anything else.

‖Continuing chill, not alleviated by external warmth.

Digitized by Google

‖Fever from sleeping on a cold floor. θIntermittent.
Heat in evening, with heaviness in hypogastrium, as from a stone; qualmishness; rumbling; thighs heavy; can scarely drag limbs along.
‖Sweat absent; or sweat without thirst.

41 **Attacks, Periodicity.** Coming and going suddenly: stitches through knees.
Attacks of chills: 7 to 8 A.M.; at 9 A.M.
At times: headache on top of head; dull digging bone-pains.
At intervals: dull digging pains in r. humerus, radius and ulna.
Repeated: gaping.
Frequent: awakening.
Periodical: nervous headache.
Regular hours: headache; sensitiveness of r. incisors; gnawing and griping in abdomen; flatulency; chills.
Three times every day: colic.
Twice a day: fever at sunrise and 5 P.M.
Every morning 4 A.M., severe abdominal pains; 2 A.M., diarrhœa; colicky pains; rumbling; chill at 7 A.M. until 8 A.M.; chill at 9 A.M. lasting one hour, followed by heat lasting two hours.
Daily: movement of bowels which were bound for four or five days; chill at same hour.
Every night for several years: sensation as if hands and arm were swollen; chilly.
Every other day: at same hour, chill; attacks of pain in ulcerated foot.
One hour to three hours: chill lasts.
One hour: toothache lasts.
Two hours: heat lasts.
Afternoon: twitching in muscles of l. upper arm.
One day: headache lasts.
Two days: no urine.
Three or four days: headache > by lying in bed.
In midsummer: chilly day and night.

42 **Locality and Direction.** Left: boil on side of penis; jerking in arm; twitching in muscles of upper arm; ulcer on heel.
Right: pinching pressure in ear shifting to side; lower incisors feel cold; respiration raises side of thorax only; heart pressed to r. side; boring in os calcis; digging pain in humerus, radius and ulna; pain from side up into shoulder-blade.
From up down: pinching pressure from ear to side.

43 **Sensation.** As if in bone of temple, headache; as if head and hands were greatly swollen; cheeks and gums as if

Digitized by Google

swollen; as if a stone was lying in lower bowels; as if arms and legs were asleep; as if arms were greatly swollen; as if he could not lift forearms and hands; ring and little fingers feel as if they had gone to sleep; feels as if she would drop; hands and forearms feel as strong and large again as natural; as if bones were made of ice.

Pain: in bowels; in back; in bones; in limbs; from r. side up into shoulder-blade; in joints.

Excruciating neuralgia: along spinal nerves.

Fearful pain: along urethra from glans.

Sudden violent pain: of teeth in upper and lower jaw; in abdomen.

Severe pain: in abdomen; from perineum to glans penis.

Cutting: in stomach.

Anguish: in chest.

Shooting pain: in head; in eyes.

Stitching pains: in head.

Stitches: in palate; in larynx; through knee.

Cramps: in stomach.

Gnawing: in abdomen.

Griping: in abdomen.

Boring: in r. os calcis.

Spasmodic pains: in stomach; in whole body; in abdomen.

Convulsive pain: in stomach.

Burning: in eyes; in face; in forehead; in stomach.

Ache: in head, spreading from forehead to vertex and occiput; in back.

Pinching pressure: in r. ear; in parotid gland; in r. side; in upper incisors.

Pressive pain: in head; in forehead; in temples.

Pressure: in head; in temples; on r. temporal bone; in chest.

Stinging: in eyes; in head.

Soreness: either side of bladder; in limbs.

Digging: in all parts of body; in humerus; in forearms; in fingers; in limbs; r. humerus; radius; in ulna; in tibia.

Sensitiveness: of incisors.

Distressing sensation: in hands and arms.

Confusion: of head.

Oppression: of chest.

Drawing: in head to lower jaw.

Tightness: in head.

Heaviness: in lower bowels; in thighs; in forearms; in hands; in feet.

Dulness: in head; in all parts of body; humerus; forearms; fingers.

Digitized by Google

Faintness: in pit of stomach; in epigastrium.
Jerking: in back and l. arm.
Twitching: in muscles of l. upper arm.
Stiff feeling: in limbs.
Crawling sensation: over whole body.
Formication: all over body.
Snapping: in belly.
Heat: in forehead; in eyes; in head; in face.
Fulness: in lower bowels.
Weariness: in head; in feet.
Tired feeling.
Numbness: in extremities; in periphery of ulnar nerve; in ring finger; in little finger.
Cold feeling: of r. lower incisors; in upper incisors.

" **Tissues.** Hemorrhages; hemorrhagic disposition; bleeders; bleedings from all the orifices of body.
Scorbutic dyscrasia.
Pains in bones and joints.
Dull digging bone-pains.
‖Emaciation. θIntermittent.
Insufficient calorification, great sensibility to cold; symptoms < by damp or cold weather, as well as by cold or warm baths.

" **Touch, Passive Motion, Injuries.** Pressure: > headache; painful in epigastrium.
Rubbing: pain in abdomen >.
Wounds which bleed.

" **Skin.** ‖Yellow skin. θIntermittent fever.
Eruption of pimples, nodes and tubercles; ulcers on heel.

" **Stages of Life, Constitution.** Anæmia from privations; with hæmoptysis.
Hydrogenoid constitution, when attacks come at regular hours.
‖‖Suitable to those who cannot live in damp places or on the water; ague dyscrasia, dyspeptics.
Miss L., who formerly lived in a miasmatic locality, has had repeated attacks of intermittent fever during last year, which were always suppressed by quinine; the attacks returned after each cold, or in rough weather.
Mrs. G., æt. 22, lymphatic temperament and weakly constitution, large blue eyes; spasmodic pains in stomach and irregularity in menstrual function.
Woman, æt. 22; spasms.
‖A man, æt. 23, pupil at the School of Fine Arts, lived in a damp house close to the water; enormously enlarged spleen after suppressing chill with frequent 20 gr. doses of quinine.
E. Manson, æt. 24, athletic build, courier, followed a course

Digitized by Google

of allopathic treatment for two months at home, and subsequently in a Paris hospital, without least benefit; intermittent fever.

Mrs. P., suffering with chronic liver complaint, was taken suddenly with violent chills at 9 A.M. on 21st of March.

A lady, æt. 40, slender, erethistic, hydræmic constitution, after taking cold; chills.

Teamster, æt. 43, 6 feet 2 inches in height, and well developed, never sick before, slept on some straw on barroom floor, on a winter night; quotidian chill.

Mrs. G. M., æt. 48, sanguine temperament, strong constitution, copiously menstruating, mother of nine children, has always enjoyed good health; in consequence of catching cold, abdominal pains.

Woman, æt 50, unmarried, graceful, nervous; headache.

Woman, æt. 54, intermittent fever every fall, which was suppressed by quinine; the fever returned this time in spring; she tried allopathy for three weeks without any relief.

[48] **Relations.** Antidoted by smoking tobacco; relieves headache.

It antidotes: *Cinchona, Mercur.*

Compatible: after *Ipec., Nux vom., Rhus tox.*, and *Sambuc.*, in intermittent fevers; after *Silica, Calc. ostr.*, and *Arsen.*, in caries of os calcis (Grauvogl's case); with *Nux vom.* in pneumonia.

Compare: *Arnica, Arsen., Cedron, Cinchona, Dulcam., Lycop., Mercur., Mygale, Nux vom., Pulsat., Rhus tox., Tarantula, Theridion.*

DIGITALIS PURPUREA.

Foxglove. *Scrophulariaceæ.*

Digitalis is cultivated in gardens, and is found wild throughout Europe, where it prefers siliceous soil, generally avoiding limestone districts. This fact was mentioned by Wm. Lewis, as early as 1768, in his *Materia Medica*, where he remarks: "It is observable of this plant that it grows only on gravelly soils; rarely or never on those where there are strata of calcareous earths or stones underneath."

This drug was extensively proved by Hahnemann and his provers (See *Chronische Krankheiten*, v. 3), as well as by later provers. Toxicological reports and effects on the sick are numerous, but, as usual in our arrangement, symptoms verified by cures are given the preference.

The symptoms of Digitaline and Digitoxinum, active principles of Digitalis, are so similar, that a separate classification is not attempted; of the latter we have a fragmentary proving by Kopfe, see Allen's *Encyclopedia*, v. 4, p. 121, and the former was proved by Baehr (see Baehr's *Monograph*), whose symptoms are included, with others from general experiment and poisonings, in Allen's arrangement, *Encyclopedia*, v. 4, p. 75.

The tincture is prepared from the fresh leaves of the uncultivated plant.

[1] **Mind.** ❙Weakness of memory.
❙Thinking difficult, forgets everything immediately.
❙Dulness of head like from inebriation, with increased mental activity.
❙Delirium tremens; in cases which come on slowly with gradually increasing pain in pit of stomach, continuous nausea, thirst, palpitation of heart, headache, vertigo, and paleness of face.
❙Paroxysmal mania with rage, attended by high degree of delirium, indigestion and melancholy, followed by headache.
⁝Epileptic mania; given at beginning of excitation, frequently cuts short attack.
Lascivious fancies day and night.
❙Wants to be alone; indisposed to speak; inclination to lassitude.
❙Tearfulness, low spirits.
❙Profound melancholy, < by music, with frequent sighing and weeping, which bring relief; gloomy, morose, ill-humor, great fear of future; insane obstinacy and disobedience, with desire to escape.
❙Melancholic, despondent, and constantly tortured by fear of death or loss of reason. θTertian intermittent.
❙Desponding and irresolute.
❙❙Great anxiety, like from troubled conscience.
Gloomy, peevish, and distrustful.

[2] **Sensorium.** ❙Sopor; unconsciousness; pupils dilated, insensible to light; blindness; one-half of face convulsed; pulse very slow, often hard, with a corresponding powerful stroke of heart, sometimes intermittent and small; breathing heavy, slow and deep; sleep with frequent startings, and dreams of falling; general convulsions.
❙❙Fainting, with slow, irregular pulse; cold sweat; death-like appearance of countenance.
❙❙General weakness, with fainting fits.
❙Weak action of heart, so that it is unable to stimulate

Google

sufficiently the brain, which feels fatigued and weak; severe vertigo.

‖Vertigo, with anxious sensation as though faintness would occur while standing or leaning against a chair.

‖Vertigo: on rising from sitting, and noticeable weakness of limbs when walking or riding; with trembling; with very slow pulse.

‖Constant dizziness of head and ringing in ears. θAngina.

‖Confusion of head.

Dulness of head, with limited power of thinking.

‖Every night on going to sleep he is suddenly awakened with a start by a loud metallic crash in head; occurs several times before he can fall into quiet sleep.

[5] **Inner Head.** ‖Throbbing headache in forehead, or at bottom of orbits.

‖Pressure: in forehead when exerting mind; in paroxysms, at times in temples, at times in whole head.

Stitches: in forehead, extending into nose, especially after drinking something cold; in temples (evening and night).

‖Head heavy, confused, as if full.

‖Headache, pressure and weight, as if caused by congestion of blood to head.

Headache like waves beating from side, < by lying down, blood rushes in, bubbles and swashes, but is not hot.

Drawing in sides of head which makes one feel giddy.

Brain feels loose.

Sensation as if something fell forward in head, when stooping.

‖Sudden cracking noise in head during mid-day nap, with frightened starting up.

‖Wakened from sleep in fright by a crash in head as if brain were made of fine glass, and shattered at a blow.

‖Report in head, like the firing of a pistol.

Sensation of itching in head (inside, one-sided).

Violent, lancinating headache, especially in occiput and vertex.

‖Sudden and sharp crying with clutching of hair or nurse's face, squinting of eyes and desire to get head back as far as possible; can take no nourishment without vomiting; frequent distressing and exceedingly offensive stool; abdomen flat and shaped like a boat; extremities cold, and if not constantly wrapped up, coldness extends to trunk. θCerebro-spinal meningitis.

‖Face pale; eyes sunken, dim; pupils very much dilated; vision entirely gone; lids closed, at rare intervals half-opened; hearing impaired; lachrymation and discharge of thick mucus from l. eye; sudden sharp cries with much tossing about, < at night; skin hot and dry; in-

Digitized by Google

voluntary urination; entire absence of stool; pulse quick, jerking, intermittent; tongue brown, dry towards base; lips and teeth covered with brown sordes. θHydrocephalus acutus.

Sensation as if waves of water were beating on skull; < while standing, talking, shaking head, and bending head backward; > when lying down or bending head forward.

ǁHydrocephalus with scanty urine; head falls back from weak neck; squints; pulls hair; slow, weak pulse; cold surface and cold sweat; bores head into pillow; peculiar sharp cry; vomits easily, especially on taking anything into stomach.

Apoplexia nervosa, or serosa; apoplexy oftener than paralysis.

Outer Head. ǁHead constantly falls backward while sitting or walking, as if anterior cervical muscles were paralyzed and powerless. θHydrocephalus.

Sight and Eyes. Dimsightedness.

Painless obscuration of lens; cataract.

Amaurotic blindness for three days.

ǁObjects appear paler and have a greenish look; green, red, or yellow; hemiopia, as if upper part of field of vision were covered by a dark cloud, evenings while walking.

In morning on waking all objects appear to him covered with snow; faces appear deadly pale; a sort of twinkling light composed of red, green and yellow.

ǁ Optical illusions in bright or prismatic colors; sees hairs before his eyes, or dark bodies, like flies.

Both eyes incline to turn to left, when turning them to right they feel painful, and he sees all things double or threefold.

ǁDiplopia.

ǁPupils dilated and insensible.

ǁPupils not very active; generally contracted.

ǁDetachment of retina; wavering, everything appears green or yellow.

ǁSuperficial inflammation of eye and its appendages; blepharoadenitis.

ǁCatarrhal inflammation of eye after disappearance of coryza; conjunctiva red, lids swollen, great photophobia, constant lachrymation, < in light, or cold air, copious secretion of purulent mucus accumulating in canthi during night, burning in eyes, feeling of sand in them and stitches darting through, with stoppage and dryness of nose.

ǁMeibomian glands inflamed.

Digitized by Google

Lachrymation < in a room; eyes are dim, hot, congested, with pressive pain; mucus in canthi.
Lid margins slightly swollen and pale red; inside of lids yellowish-red; burning of lid margin; photophobia; lachrymation and mucous discharge.
Blueness of eyelids.
Yellowish redness of conjunctiva palpebrarum.
Agglutination of lids in morning.
Chronic inflammation of conjunctiva.
Worse when looking into distance.
Burning pain in r. eyebrow.

[6] **Hearing and Ears.** Noise before ears like boiling water.
Hissing before ears, with hardness of hearing.
Suddden crashing noise in head, on falling asleep, awaking with a frightened start.
Single stitches behind ears.
Painful swelling of parotid gland and behind ear.

[7] **Smell and Nose.** Smell of food excites violent nausea, with clean tongue, thirst for water, without any fever.
Pain above root of nose.
Coryza: with hoarseness; dry oftener than fluent.
Nosebleed.

[8] **Upper Face.** Expression of face remarkably sickly.
Face pale; of death-like appearance; bluish-red.
Pale face; bluish hue under pale skin; blue lips and eyelids.
Cold blue skin. θGastritis.
Bloating and paleness of face.
Yellow color of face and conjunctiva.
Convulsions on left side of face.
Black pores in skin, suppurate and ulcerate.

[9] **Lower Face.** Lips dry, parched.

[10] **Teeth and Gums.** Horrid toothache in a hollow tooth, lasting three days.

[11] **Taste and Tongue.** Taste: flat, slimy; sweetish, with constant ptyalism; bread tastes bitter.
Bitter taste. θIcterus.
Clean tongue with nausea from smelling food.
Tongue covered with white slime; nausea, even after vomiting. θIcterus.
Tongue coated white.
Blueness of tongue; swelling; ulcer.

[12] **Inner Mouth.** Mouth and throat sore; scraped feeling.
Profuse flow of frothy saliva; nocturnal flow of saliva.
Violent fetid ptyalism; ptyalism during nervous fever.
Fetid or sweetish ptyalism with soreness of mouth, gums and tongue; aphthæ; stomatitis.

[13] **Throat.** Choking when he tries to swallow, spasm of glottis, diarrhœa and thirst.

Google

Stinging in throat between acts of swallowing.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Loss of appetite.

‖No appetite, tongue clean, stomach empty

‖Thirst; continuous, with dry lips.

Desire for sour drinks and bitter food; for beer.

[15] **Eating and Drinking.** Better on an empty stomach; < after breakfast.

Worse: after meals; from cold diet; after drinking; from spirituous liquors.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Nausea: deathly, as if she would die; continuous, and not > by vomiting; with anguish and great despondency.

|Smell of food excites violent nausea and gagging, with clean tongue, thirst for water, and absence of fever.

|Nausea, disposition to vomit, with frequent empty retching. θIcterus.

|Nausea early on rising; bitter taste in mouth; thirst; slimy vomiting; diarrhœic stool, and great debility.

|Persistent nausea even after vomiting.

‖Vomiting: in morning; of food; of bile; of mucus.

Nausea and vomiting of food as soon as he eats.

Nausea; convulsive efforts to vomit.

If she expectorates, she has to vomit what she has eaten.

Gulping of an acrid or tasteless fluid.

Appetite for food, but as soon as he eats he commences to spit it up by mouthfuls, "sourer than any vinegar;" after stomach was emptied, terrible pain and uneasiness for one or two hours; bowels not costive; slow pulse.

Vomiting sometimes accompanied by external heat, mingled with chills, and followed by perspiration with chilliness.

[17] **Scrobiculum and Stomach.** |Sense of extreme anxiety, referred to epigastrium.

|Extreme sensitiveness in epigastric region, producing frequent deep sighs.

‖Faintness or sinking at stomach, as if he would die, with deathly nausea and vomiting.

|Soreness and bloatedness of pit of stomach.

‖Stitches in pit of stomach, extending to sides and back.

|Burning in stomach, extending up œsophagus.

‖Pains in stomach.

|Want of appetite; discomfort after eating even a small quantity of light food; distension and tenderness of region of stomach; gradual decline of strength and natural heat of body; restless, unrefreshing sleep; mental depression; intense jaundice; disgust for food, fre-

Digitized by Google

quent nausea, retching and even vomiting of small quantities of tasteless watery fluid; bowels confined; urine scanty and dark; great prostration of strength and coldness of body; melancholy, disposed to cry.

‖Gastric catarrh, with sensation of extreme lassitude.

‖Dyspepsia, with slow pulse, or quick, trembling and weak pulse.

Weakness (sinking) at stomach, feels as if dying.

[18] **Hypochondria.** ‖Tenderness and pressure in præcordium and region of liver. θIcterus.

‖‖Soreness and hardness in region of liver.

‖Sensitiveness to pressure in region of liver.

‖Enlarged liver from organic heart disease.

[19] **Abdomen.** ‖‖Fulness of abdomen.

‖Distension of abdomen. θAscites. θIcterus.

‖Cutting and contractive pain in abdomen.

Colic, with nausea and vomiting.

‖Dropsy, with dull percussion as high as third intercostal space, commenced in feet.

‖Incarcerated hernia; caused a relaxation of abdominal ring.

[20] **Stool and Rectum.** ‖Constipation; stools gray, clay-like.

‖Frequent, distressing and exceedingly offensive stools; bowels perfectly flat and shaped like a boat. θCerebro-spinal meningitis.

‖Frequent desire to evacuate bowels, accompanying urging to urinate; very small, soft stools, without relief.

‖Every other day at same hour, early in morning, coldness, slight chills, followed instantly by exhaustive, watery, grayish-colored stools, changing towards brown and curdled, resembling coffee settlings; no synchronism between radial artery and heart, or between the larger arteries themselves; pulse slow and intermitting; cold, profuse, thin perspiration all over body; chest and bowel symptoms seem to alternate, cough of one fit of sickness followed by diarrhœa in next, and *vice versa*. θDropsy.

‖Violent diarrhœa of watery, ash-gray stools, with cutting and tearing pains, and sensation of sinking in stomach as if one would die.

Diarrhœa accompanied by violent beating of heart, not rapid, but too violent.

‖Diarrhœa: watery; consisting of feces and mucus.

Stools: ash-colored, or very light; delayed, chalky; very light, almost white; yellowish-white fecal; involuntary.

‖White evacuations, with bilious vomiting, jaundice and sinking in stomach.

‖Stool in evening, passing great quantities of thread worms.

Digitized by Google

Before stool: cutting or tearing colic; chilliness; fainting; vomiting.
During stool: cutting pain in abdomen.
After stool: renewed desire; urging in rectum; faintness.

[21] **Urinary Organs.** ‖Nephritis after desquamation, with anasarca and œdema of lungs. θScarlatina.
‖Throbbing pain in region of neck of bladder, during straining efforts to pass water.
‖Pressure on bladder, with sensation as if it were too full, continuing after micturition.
Contractive pain in bladder during micturition; urine more easily retained in recumbent posture.
‖Micturition difficult, as though there were almost no urine in bladder, and yet, great urging to urinate; after micturition, pressure in bladder and burning in urethra for half an hour.
Inflammation of bladder (neck of bladder).
‖Fruitless effort to urinate.
‖Constant urging to urinate, with scanty discharge.
‖Difficult micturition, as if urethra were constricted.
‖Feeling of fulness, continuing after urination.
‖Increased desire to urinate after a few drops have passed, causing patient to walk about in distress, although motion increases desire; frequent desire to defecate at same time; very small soft stools passed without relief.
‖Constant urging to urinate at night.
‖Profuse and frequent emission of clear pale urine.
‖After profuse discharge of urine there follows retention with nausea, vomiting and diarrhœa.
Alternation of diminished secretion of urine, with copious secretion of watery urine; enuresis, vomiting and diarrhœa.
‖Urine: thick, turbid, yellowish-brown, blackish, acrid.
‖Brick-dust sediment in urine.
‖Continual desire to urinate; each time only a few drops are emitted; urine dark brown, hot and burning.
‖‖Dribbling discharge of urine. θEnlarged prostate.
Heavy specific gravity of urine.
‖‖Dropsy with suppression of urine.
‖Uræmic poisoning with drowsiness, insensibility and frightful convulsions. θContracted kidney.
‖Bright's disease; general nervous prostration; effusions from weakness of vessels, and diminished force of circulation; jaundice and easy vomiting; slow and intermittent pulse.

[22] **Male Sexual Organs.** ‖Amorous desires without ability to perform coitus.
‖Great irritability and weakness of genitals; after an

emission a sensation in urethra as if something were running out of it; frequent palpitation and trembling of limbs; in conversation with strangers he commences to stammer and becomes embarrassed. θProstatic troubles.

‖Great irritability of genital organs; frequent, debilitating pollutions; muscular power diminished; memory impaired; appetite lost; constipation; palpitation of heart; even delirium and convulsions; oppressed respiration; restless sleep; pain in præcordial region; flushes of heat; weak pulse.

‖Spermatorrhœa; irritation of sexual organs, with painful erections, night and day; pollutions always accompanied by lewd dreams and subsequent pains in penis; violent beating of heart at least movement; despondency and fear of future.

‖Senile hypertrophy of prostate; cardiac symptoms marked.

‖‖Nightly emissions, with great weakness of genitals.

‖Excessive pollutions in consequence of onanism; pollutions at night, three or four times every week; prostration and ill-humor on following day; patient wasted.

‖After coitus, nightly pollutions for 8–12 nights.

‖From excessive indulgence in coitus and life of debauchery, great debility, impaired digestion, foul taste in mouth; complete loss of appetite; palpitation of heart, transient flushes of heat, fainting, ringing and roaring in ears, dyspnœa at night, severe pain in præcordial region with febrile disturbance; pollutions day and night.

‖In consequence of onanism, pain in chest, palpitation of heart, headache, disinclination to work, impairment of memory, weakness of legs.

‖Several pollutions during night; great prostration of strength; appetite completely lost; pain in back; sleep disturbed by nightmare. θSpermatorrhœa.

‖‖Gonorrhœa.

‖Balanitis, phymosis, with great burning on urinating; dropsy of prepuce.

‖Dropsical swelling of genitals.

Contusive pain in right testicle; testicles swollen.

‖‖Hydrocele; the scrotum looks like a bladder filled with water.

‖Hydrocele; l. side most affected; pulse very slow.

[25] **Female Sexual Organs.** ‖Lascivious state of fancy day and night; remarkably slow pulse; stools of a very light color. θNymphomania.

‖Dropsy of uterus; heart sympathizes very much; pulse accelerated or intermittent; light-colored stools.

Google

‖Menorrhagia.
‖Labor-like pains in abdomen and back, before menses.
Catamenia scanty and too late.
‖‖Suppressed menses with cough and vicarious menstruation from lungs.
‖For several years menses irregular, being half normal then again very profuse, persisting sometimes for weeks as a hemorrhage; anorexia, bad taste in mouth, extreme thirst, debility, emaciation; face waxy, pale, yellowish and expressive of greatest anxiety and suffering; respiration quick, oppressed, voice scarcely audible, speech very fatiguing; pulse very quick and scarcely perceptible; greatest lassitude; constant icy coldness despite warm coverings and high temperature of room; urine diminished; stools watery, diarrhœic; severe indefinable pains through whole body; constant restlessness; fear of death; œdema, marked ascites, enormous swelling of labia so that bladder can scarcely be evacuated; strong pulsations of jugular veins, loud venous murmurs, marked organic changes present in heart.
‖Face dark red, merging into a bluish color; veins about eyes, ears, lips and tongue distended; hands blue and swollen as if frozen; warmth of skin diminished, chilliness; pulse small, feeble, 60–70; a cut or wound is followed by an extremely sluggish escape of dark, thick blood; head heavy, dull, confused, with frequent throbbing, pressing pain in forehead, which can only be > by lying quietly on back; dry, tickling cough in chest; spasmodic constriction in chest with dyspnœa, slow and labored breathing, constant yawning and violent pulsations of heart, particularly at night, when the great anxiety and fear of suffocation drive her out of bed; appetite diminished; nausea, occasionally vomiting in morning; pressing cramps and sensation as of a weight attached to stomach; stools irregular, sometimes hard, at other times diarrhœic; frequent urging to urinate; profuse, acrid leucorrhœa; no menstrual molimina; tearing in limbs; great weakness; paralytic sensation in thighs; feet and ankles swollen. θEmansio mensium.
‖Leucorrhœa.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness early in morning.
‖Frequent painless hoarseness.
Hurried, abrupt speech.
Voice hoarse or screeching, rarely failing.
‖Choking when trying to swallow (spasm of glottis).

[26] **Respiration.** ‖‖Respiration irregular, and performed by frequent deep sighs.

Digitized by Google

Constant desire to take a very deep breath, but on attempting to do so, it seemed as though chest could be only half-filled, or as though some impediment existed deep in chest; dry cough on deep inspiration.

Respiration difficult, slow and deep.

Respiration slow, asthmatic; paroxysm early in morning, especially in cold weather.

Oppressed breathing when walking and in a recumbent position.

Distressing dyspnœa.

Respiratory murmur feeble.

When she goes to sleep the breath fades away and seems to be gone, then she wakes up with a gasp to catch it; legs œdomatous, especially the left.

Fear of suffocation at night with desire for open air.

Between 10 and 12 A.M., and 4 and 6 P.M., sudden oppression of respiration and sensation as if walls of chest were being constricted; great anxiety and restlessness; no heat; at times when paroxysm is at its height, sensation as if sternum were torn to pieces; quiet horizontal position finally brings relief. *θ* Asthma.

Could only breathe in gasps, each one seeming as though it would be the last; must sit up. *θ* Dropsy.

Asthma, with much rattling mucus in lungs.

Painful asthma, worse when walking.

Asthma, particularly if dependent upon heart disease.

Inflammation of serous membranes, especially pleurisy, resulting in anæmia; vomiturition or vomiting; oppression in centre of chest; difficult breathing; pulse in beginning suppressed, quick; nails blue; face pinched and cold; in spite of anæmia patient cannot bear a high temperature, even during reaction; prefers to sit rather than lie down. *θ* Diaphragmitis.

Cough. Hollow, deep, spasmodic cough, excited by roughness and scratching in roof of mouth and in trachea; morning without, evening with scanty, yellow, jelly-like mucus, expectorated with difficulty.

Cough < about midnight and toward morning; from getting heated; from eating; from drinking cold fluids; talking or walking in open air.

Expectoration like boiled starch; great prostration after cough.

Cough caused by talking, walking, drinking anything cold, bending the body forward, or after eating.

Cough, with profuse loose purulent sputa.

During cough: contracting pain in chest; asthma; tensive pressure in arm and shoulder; vomiting; heat; perspiration.

Digitized by Google

Expectoration of sweetish taste; sometimes with a little dark blood.

Tenacious mucus in throat, detached by coughing.

Peculiar cough and strangulation, which seemed almost to choke her; paroxysm lasted an hour or more, and resulted in expectoration of a liver-colored mass of sputa; attacks repeat themselves frequently, and usually come before catamenia, with pains in chest, difficulty of using arms, pain in hepatic region and through back, extending to knees; pain in scapular region and r. hand, with paralytic sensations; cough at night, choking and spasmodic, compelling her to jump out of bed, with attacks of choking, and a valvular constriction in throat before discharging sputa; expectoration of a solid, bloody mass of mucus, which, when discharged, affords immediate relief; occasionally leucorrhœa before catamenia, also nasal hemorrhage; changes of weather bring on attack, followed by expectoration of tough, ropy mucus at night; cough at times like whooping cough; sore throat and soreness of œsophagus; great difficulty in detaching mucus; oftentimes presenting a rusty, black and clot-like appearance. θVicarious menstruation.

Whooping cough with persistent fever, which causes patient to be in a state of constant nervous excitement, skin being hot and dry; expectoration bloody; scraping sensation extending to larynx, and feeling of constriction in chest and throat.

[18] **Inner Chest and Lungs.** Trembling in chest.

Great weakness in chest, can't bear to talk.

Heaviness and dyspnœa in chest.

Suffocative painful constriction of chest, as if internal parts were grown together.

Sensation of soreness in chest.

Hæmoptysis: before menstruation with pain in chest, back and thighs; from obstruction of pulmonary circulation in consequence of heart disease and tuberculosis; engorged veins about head, pale, livid complexion, coldness of skin with cold sweats, irregular pulse and palpitation of heart.

Passive congestion of lungs, depending on a weakened, dilated heart.

Peculiar, seemingly rheumatic pains and catarrhal affections of lungs, with serous exudation.

Sudden severe attack of asthma during night; patient propped up in bed, afraid to move or speak; severe pain across front of chest; frequent retching, at times so severe as, with the painfully laborious breathing, to

Digitized by Google

threaten almost instant death; pulse almost imperceptible; cardiac action so tumultuous as to render it difficult to distinguish between first and second sounds; both sounds sharper than natural; no cardiac murmurs; face bedewed with cold sweat; feet and legs cold; comparative dulness over lower half of r. side of lung; bronchial breathing in upper half of lung; respiratory sounds in lower half heard only on attempting to take a deep inspiration; extensive congestion present, and clearly traceable to impeded circulation; cough with hæmoptysis; all food refused or rejected; urine scanty, not albuminous; legs œdematous; ascites.

Chronic catarrhs in tubercular patients, in phthisical subjects, and particularly in phthisis florida; shortness of breath, anxiety and oppression of chest, with pressing pains in chest; cannot sit in a stooping posture; dry cough, or scanty expectoration containing small particles of hard, yellow phlegm; also bloody expectoration with stitching pains in chest; abnormalities in heart's action; > in open air.

Senile pneumonia; broncho-pneumonia, with paralysis of pneumogastric; moist râles all over chest, yet cough dry, fatiguing, and unsatisfactory; small thready pulse; sometimes purple expectoration; surface (especially face and extremities) blue and cold; intense weakness and prostration; lungs feel constricted and tied up in bundles.

Emphysema, in complication with heart disease, feels > while lying perfectly quiet in horizontal position, paroxysms early in morning, especially in cold weather; < when walking.

Pleuritis, serous form; especially in a rheumatic case, accompanied by Bright's disease from hyperæmia of kidneys.

Hydrothorax.

Heart, Pulse and Circulation. Dull uneasiness in various parts of region of heart, with sensation of weakness in forearm.

Abnormal action of heart; a sense of oppression, with tendency to fainting; feeble or spasmodic pulse, with anguish; oppression of chest; pain extending to head and l. arm.

Constant pain or anguish in region of heart, with more or less palpitation, at times pain and palpitation greatly aggravated, < from exercise of body and mental emotion; but at times sufferings were greatly < without any apparent cause, while sitting perfectly at rest; paroxysms accompanied by sinking sensation, face pur-

Google

ple; syncope, believes she is dying; constant dizziness of head and ringing in ears; sharp pain in l. shoulder and l. arm, tingling in arm and fingers; creeping all over skin; sometimes paroxysms come on at night, when it seems as if she were suffocating, wakes up in great anguish; terrifying dreams.

‖Pressing constrictive heartbeats, with anxiety and spasmodic pain in sternum and between ribs.

‖Strong pulsations of heart, with an indistinct and muffled sound of heart; hurried respiration. θRheumatism.

Metallic sounding heart-beat.

Violent, audible palpitation of heart, with anxiety and contractive pains under sternum.

‖‖Violent but not very rapid beating of heart.

‖Rapid, bounding, intermittent beating of heart; vertigo when walking or rising; pulse 90, intermittent; sleeplessness, and feeling of great anxiety at night.

‖‖Suddenly violent beating of heart, with disturbed rhythm; a feeling of impending death, with terror and anxiety, slightest motion increases anxiety and palpitation.

‖Palpitation of heart, with great depression of mind and constant fear of losing her reason; anxious, self-reproachful; attacks short and not very severe, but anxiety.

‖Palpitation of heart originating in grief; pain in l. chest and arm; enlargement of heart.

‖Increased activity of heart, with slow pulse.

‖Heart-beats strong from twelve to twenty times, and then very weak for four or five times.

‖‖Sudden sensation as though heart stood still, with great anxiety, and necessity for holding breath.

‖Three or four rapid small beats followed by several slow, strong and full beats.

‖Fluttering at heart after sudden and energetic motions, especially of arms in an upward direction, or lying on l. side.

‖‖Heart has lost its force; its beats are more frequent and intermittent, sometimes irregular.

‖Beating of heart smaller and less energetic, or scarcely perceptible.

‖Breathlessness with cough; heart's action irregular and weak, no cardiac murmurs or other signs of structural change.

‖The least muscular exertion renders the heart's action labored and intermittent.

The heart is so weakened that fatal syncope has been produced by patient changing his position, or being raised to an upright posture.

Digitized by Google

Enfeebled heart without valvular complications.

Muscular angina, with flabby dilatation of heart.

Drawing tearing pains in l. side of chest and l. border of sternum, extending to nape of neck and shoulder; great anxiety and fear of death; slow pulse. θAngina.

Sudden attack of angina pectoris brought on by careless, quick movements, particularly of arms in an upward direction, or traceable to no particular cause; inexpressible anxiety, with fainting; for a moment heart seems to stand still, and then several rapid and violent pulsations occur, with sensation as if heart had torn itself loose and were swaying to and fro by a thin thread; these sensations are repeated at irregular intervals, and attack finally ends in prostration which almost amounts to unconsciousness; no organic lesion.

Heart's action more vigorous than pulse; deathly anguish felt in pit of stomach; vertigo and fainting; pulse feeble, irregular, slow. θAngina pectoris.

Frequent attacks of unconsciousness; pulse full, strong, but beating only 28 to the minute; no apoplectic symptoms present. θHypertrophy of heart.

Dilatation of ventricle due to valvular lesions, with palpitation.

Cardiac dropsy and great anasarca; extremities cold and blue; sinking feeling at heart.

Great difficulty in breathing, at times approaching orthopnœa, with short, dry, tickling cough; frequent fainting fits; great anasarca, legs, penis and scrotum particularly swollen; feet cold and dark; legs and thighs pit deeply on pressure; tongue white and moist; urine scanty; pulse cannot be felt; heart's action very weak and irregular, the usual sounds inaudible; distressing sinking feeling in cardiac region; face pale and anxious; lips livid; can scarcely speak; no appetite; great thirst; respiratory sounds feeble. θCardiac dropsy.

Rheumatic endocarditis, rhythm of heart irregular, symptoms of hydrothorax present, urine deposits a brick-dust sediment.

Rushing, blowing regurgitant murmurs synchronous with impulse beat of heart; every four weeks after menstruation œdematous swelling of face and lower extremities, with almost complete apnœa, least motion threatening suffocation and causing face to become blue and yellow; great anxiety and suffering; urine scanty, dark and turbid; pulse weak, intermittent and very quick, so that it cannot be counted; compelled to lie with head high; can scarcely speak; sleeplessness; stools infrequent; on percussion, area of heart dulness increased; pulsation almost inaudible.

Digitized by Google

‖Rheumatism of heart with irregular pulse.
‖Pneumonia senilis, heart's action failing; passive hyperæmia of brain, passive congestions of lungs, depending upon a weakened, dilated heart.
‖Pulse at first slow, afterwards quicker and proportionately weaker.
‖‖Thready, slow and intermittent pulse.
‖‖Pulse very slow and weak.
‖‖Irregular, small pulse.
Pulse very slow, often hard, with a correspondent powerful stroke of heart, sometimes intermittent and small; respiration heavy, slow and deep; sleeps with frequent startings and dreams of falling.
While moving about, pulse is accelerated, and soon sinks down again to its accustomed slowness when at rest.
‖Slightest motion immediately makes pulse more rapid; on rising from reclining into sitting posture, pulse became in a moment jerky and very much smaller and weaker.
‖No synchronism between radial artery and heart, nor synchronous pulsation between larger arteries (crural, carotid and radial) themselves; pulse low and intermitting. θDiarrhœa.
Ebullition in chest and audible palpitation.
‖Venous, passive congestion, with pale or livid color of face; coldness of skin; swelling and painfulness of feet; all in consequence of cardiac anomalies.
‖Cyanosis from non-closure of foramen ovale; > symptoms.
‖Child can hardly be turned or its position changed without causing fainting, or nearly so, and almost always causing vomiting; eyelids, lips, tongue and nails become very blue; pulse unequal, or very slow. θCyanosis.
‖Distended veins on eyes, ears, lips and tongue; dark red, bluish color of face; irregular action of heart; at puberty.

[30] **Outer Chest.** Dull, clawing stitches along lower border of ribs, below r. axilla.

[31] **Neck and Back.** Tearing sharp stitches, aching and cutting pains in nape of neck.
Drawing with pressure in nape of neck.
Stiffness in nape and side of neck.
Lacerating, and sharp stitches in small of back.

[32] **Upper Limbs.** ‖Sharp pain in l. shoulder and arm, tingling in arm and fingers. θAngina pectoris.
‖‖Heaviness or paralytic weakness of l. arm.
‖Swelling of r. hand and fingers, with scanty high-colored urine. θPost-scarlatinal dropsy.
‖‖The fingers "go to sleep" frequently and easily.

[33] **Lower Limbs.** Pain in hip-joint.

Google

‖Paralytic feeling in limbs.
Weakness and lassitude of lower extremities.
‖Staggering.
‖Lassitude in legs and knees.
Tightness in bends of knees; swelling of knee, with stinging pain.
‖Infiltration of lower extremities.
‖Swelling and painfulness of feet.
Swelling of feet during day, diminished at night.

[24] **Limbs in General.** ‖Pains in chest; difficulty of using arms; pain in hepatic region, and through back, and extending to knees; pain in scapular region and r. hand, with paralytic sensations. #Vicarious menstruation.
Neuralgic pains after scarlet fever.
Prickling pain in muscles of upper and lower extremities.
‖‖Coldness of limbs.
Elastic swelling of legs, and then of hands and arms.
Coldness of hands and feet.

[25] **Rest. Position. Motion.** Sitting: head constantly falls backward; dyspnœa >; pain in region of heart and palpitation at times greatly <.
Lying: headache <; sensation as if waves of water were beating on skull >; urine more easily retained; asthmatic attacks >; palpitation <.
Lying on back: pains in forehead only >; prefers to lie on back with head low, or is compelled to lie with head high.
Recumbent posture: oppressed breathing; emphysema >.
Standing: vertigo, with anxious sensation; sensation as if waves of water were beating on skull <.
Leaning: vertigo, with anxious sensation.
Change of position: fatal syncope.
Motion: violent beating of heart; palpitation and anxiety <; fluttering of heart after sudden and energetic; suffocation threatened; pulse accelerated; cyanosis <; motion brings on angina pectoris.
Stooping: as if something fell forward in head; cannot sit.
Bending head forward: sensation as if waves of water were beating on skull >.
Bending head back: sensation as if waves of water were beating on skull <.
Shaking head: sensation as if waves of water were beating on skull <.
Bending body forward: causes cough.
On rising from sitting: vertigo and weakness of limbs.
On rising from reclining posture: pulse becomes jerky, smaller and weaker.
Walking: vertigo; head constantly falls backward; as if

Digitized by Google

upper part of field of vision were covered by a dark cloud in evening; desire to urinate and defecate compels walking; desire to urinate and defecate <; oppressed breathing; painful asthma <; cough <; emphysematous attacks <.

Exercise: pain in region of heart and palpitation <.

Moving arms in upward direction: fluttering of heart; angina pectoris brought on by.

Riding: vertigo.

[35] **Nerves.** ‖Restlessness and great nervous weakness.

‖Lassitude, mental and bodily.

Faintness and debility, with perspiration.

Attacks of great debility, especially after breakfast and dinner.

‖‖Faintness; exhaustion; extreme prostration.

‖Convulsions, with retraction of head, syncope, and collapse of vital powers. θSpotted fever.

Epilepsy caused by onanism.

Shock: very slow pulse; faintness and weakness with sweat; bluish paleness; inactivity of pupil; optical illusions.

‖Syncope.

[37] **Sleep.** ‖Lethargy, great sleepiness.

Feeling of great emptiness of stomach, frequently previous to falling asleep.

Uneasy sleep at night, on account of constant desire to urinate; nervous persons.

‖Frequent waking at night in fright, by dreams of falling from a height or into water.

‖‖Frequent startled awaking, at night.

‖Frequent awaking, as from anxiety, and as if it were time to rise.

‖Sleep uneasy and unrefreshing.

‖Prefers to lie on back with head low.

[38] **Time.** Morning: on waking, all objects appear as if covered with snow, faces appear pale; twinkling light before eyes; agglutination of lids; nausea on rising; vomiting; diarrhœa; hoarseness early; asthmatic paroxysm early; dry cough; paroxysms in emphysema early.

During day: swelling of feet.

Mid-day: sudden cracking noise in head during nap.

Between 10 and 12 A.M., and 4 and 6 P.M.: asthma.

Evening: stitches in temples; as if upper part of field of vision were covered by a dark cloud; stool and passage of worms; cough with expectoration.

At night: suddenly awakened by crash in head; stitches in temples; symptoms in hydrocephalus acutus <; accumulation of purulent mucus in eye; flow of saliva;

Digitized by Google

constant urging to urinate; pollutions; dyspnœa; yawning, and violent pulsations of heart <; anxiety and fear of suffocation drive her out of bed; expectoration of tough, ropy mucus; sudden asthmatic attack; attacks of palpitation and pain about heart; sleeplessness and feeling of great anxiety; uneasy sleep; frequent awaking in fright, dreams of falling; frequent startled awaking; cold sweat.

Towards midnight: cough <.

Temperature and Weather. Getting heated: cough <.

In room: lachrymation <.

Open air: fear of suffocation with desire for; cough < walking in; symptoms of catarrh >.

Cold: great sensitiveness to.

Cold food: < after.

Cold drinks: stitches in forehead extending into nose < after; cough <;

Cold air: lachrymation <.

Cold weather: asthmatic paroxysms <; paroxysms in emphysema <.

Changes of weather: cough brought on by.

Fever. Chilliness and shivering over whole back.

Chill commencing in fingers, palms of hands and soles of feet, spreading thence over whole body.

Coldness first of hands and arms.

Cold extremities.

Excessive coldness of hands and feet, with cold sweat.

Internal coldness of whole body.

Great coldness of skin.

Chill early in morning and lasting until 10 o'clock, followed by heat and offensive smelling sweat towards noon; complete loss of appetite, with disgust for food, foul eructations, bitter taste, yellow coated tongue and difficult stool; sleep restless and unrefreshing; pulse weak and slow; face yellow; lips and eyelids bluish. θTertian intermittent.

Great sensitiveness to cold.

Chill more internal, with warmth of face, beginning with cold extremities, then spreading over body.

Internal chill, with external heat.

Chill, with heat and redness of face.

Shivering alternating with heat. θIcterus.

One hand hot, the other cold.

Heat of body, with cold sweat of face.

Sudden flushes of heat, followed by great debility.

Heat without thirst.

General violent heat, with swollen veins and rapid pulse.

Heat, with profuse sweat at same time.

Digitized by Google

Sweat immediately after chill, no heat intervening.
Covered with copious perspiration, without relief of heart symptoms.
Sweat at night, generally cold and somewhat clammy.
Cold sweat on body, warm sweat on palms of hands.
Sweat: on upper part of body; on face.
Typhus, with bad smell from nose and hardness of hearing.

41 **Attacks, Periodicity.** Paroxysmal: mania with rage; pressure in temples and in head; thirst.
Transient: flushes of heat.
For half an hour: pressure in bladder and burning in urethra after micturition.
For an hour: paroxysm of cough.
For one or two hours: terrible pain and uneasiness in stomach after vomiting.
Constant: fears of death or loss of reason; dizziness of head and ringing in ears; falling backward of head; lachrymation; nausea; urging to urinate; icy coldness; restlessness; yawning and violent pulsations of heart; desire to take deep breath; nervous excitement; pain or anguish in region of heart; fear of losing reason; hacking cough with dyspnœa.
Day and night: lascivious fancies; painful erections; pollutions.
For three days: amaurotic blindness; toothache.
For eight to twelve nights: after coitus, pollutions.
Sudden: awakening at night by crash in head; cracking noise in head during mid-day nap; sharp crying, and clutching of hair or face of nurse, with squinting and retraction of head; asthmatic attacks; violent beating of heart; sensation as though heart stood still; attack of angina pectoris; flushes of heat.
Gradual: increasing pain in pit of stomach; decline of strength and heat of body.
Every night: awakened by crash in head; emissions.
Every other day: at same hour in morning, diarrhœa.
Tertian: intermittent.
Three or four times a week: pollutions.
Every four weeks: after menstruation, œdematous swelling of face and lower extremities.
For several years: menorrhagia.
Chronic: inflammation of conjunctiva; catarrhs in tubercular patients.

42 **Locality and Direction.** Right: painful feeling on turning eyes to r.; burning in eyebrow; contusive pain in testicle; pain in scapular region and hand; dulness over lower half of lung; stitches along lower border of ribs below axilla; swelling of hands and fingers.

Digitized by Google

Left: lachrymation and discharge of mucus from eye; both eyes inclined to turn to l.; convulsions on side of face; testicle most affected with hydrocele; leg especially affected with œdema; oppression of chest extending to arm; sharp pain in shoulder and arm, tingling in arm and fingers; pain in chest and arm; palpitation < lying on side; drawing, tearing in side of chest and border of sternum, extending to nape of neck and shoulder; sharp pain in shoulder and arm; tingling in arm and fingers; heaviness or paralytic weakness of arm.

One-half: of face convulsed.

One-sided: itching in head.

Sensations. As if faintness would occur; as if head was full; as if waves were beating from side to side in head; as if blood bubbled and swashed in head; as if brain was loose; as if something fell forward in head on stooping; as if brain were made of fine glass and shattered at a blow; as if waves of water were beating on skull; as if sand were in eyes; as if bladder were too full; as if urethra were constricted; as if something were running out of urethra; as of a weight attached to stomach; as if chest could only be half filled on breathing, or as though some impediment existed deep in chest; as if walls of chest were being constricted; as if sternum were torn to pieces; as if each breath would be the last; as if internal parts were grown together; as if lungs were constricted and tied up in bundles; as though heart stood still; as if heart had torn itself loose and were swaying to and fro by a thin thread; as if stomach would sink into abdomen.

Pain: above root of nose; terrible, after vomiting; in stomach; in præcordial region; in penis; in chest; in back; severe, indefinable, through whole body; in hepatic region and through back, extending to knees; in scapular region and r. hand; across front of chest; in region of heart; spasmodic, in sternum and between ribs; in l. chest and arm; sharp, in l. shoulder and arm; in hip-joint; in hepatic region and through back, extending to knees; in scapular region and r. hand.

Anguish: in region of heart.

Cutting: in abdomen; with diarrhœa; colic before stool; in abdomen during stool; in nape of neck.

Tearing: with diarrhœa; colic before stool; in limbs; in l. side of chest and border of sternum, extending to nape of neck and shoulder.

Lacerating: in small of back.

Piercing pain: in joints.

Digitized by Google

Lancinating: headache in occiput and vertex.
Stitches: in forehead, extending into nose; in temples; darting through eyes; behind ears; in pit of stomach, extending to sides and back; in chest; dull, clawing, along lower border of ribs, below r. axilla; tearing, sharp, in nape of neck; sharp, in small of back.
Stinging: in throat.
Drawing: in sides of head; in l. side of chest and border of sternum, extending to nape of neck and shoulder; in nape of neck.
Gnawing: in external parts.
Constriction: in chest and throat; suffocative, painful, of chest.
Pressing constrictive heart-beats.
Pressing cramps: in stomach.
Contracting pain: in chest.
Contractive pain: in abdomen, in bladder; under sternum.
Labor-like pains: in abdomen; back.
Neuralgic pains: after scarlet fever.
Horrid pain: in hollow tooth.
Throbbing: in forehead, or at bottom of orbits; in region of neck of bladder; in every part of body when touched.
Crashing: in head.
Contusive pain: in r. testicle.
Prickling: in muscles of upper and lower extremities.
Burning, prickling: in skin.
Burning: in eyes; of margin of lid; in r. eyebrow; in stomach; in urethra; on urinating.
Pressive pain: in eyes.
Pressing pain: in chest.
Tensive pressure: in arm and shoulder.
Pressure: in forehead; in temples; in head; in præcordium and region of liver; on bladder; in nape of neck.
Soreness: of mouth and throat; gums and tongue; of pit of stomach; in region of liver; of œsophagus; in chest.
Rheumatic pains: in chest.
Aching: in nape of neck.
Creeping: all over skin.
Roughness: in roof of mouth and trachea.
Scraped feeling: in mouth and throat.
Scraping sensation: extending to larynx.
Scratching: in roof of mouth and trachea.
Oppression: in centre of chest; about heart; of chest, extending to head and l. arm.
Weight: in head.
Heaviness: of head; in chest
Uneasiness: in stomach after vomiting.
Dull uneasiness: in various parts of region of heart.

Google

Confusion: of head.
Anxiety: in epigastrium.
Sinking sensation: at stomach, as if he would die; with palpitation and pain about heart; at heart.
Emptiness: in stomach before falling asleep.
Weakness: in forearm.
Lassitude: in lower extremities; in legs and knees.
Discomfort: after eating little.
Dulness: of head.
Paralytic sensation: in thighs; in scapular region and r. hand; in limbs.
Itching: in head; of skin; corrosive, darting, in skin; gnawing, in skin.
Titillation: in affected parts.

"**Tissues.** Discharged blood coagulates slowly or not at all.
Skin and muscles lax.
Strengthens and regulates action of heart, when it has lost its energy and becomes irregular.
: It is a cardiac tonic and useful in delirium tremens, from anæmia of brain, or from weakened action of heart; in hysterical fainting from same causes; in shock, with collapse.
It is not a diuretic per se, but by increased activity of l. ventricle it produces increased fluxion to kidneys and thus diuresis.
Acts profoundly upon muscular substance of heart and arteries through pneumogastric and vasomotor nerves, producing debility of these tissues even to paralysis, causing a depression of circulation, and an intermission of beats of pulse; it also secondarily produces functional derangements of brain, kidneys and digestive apparatus; chief characteristic is its extremely slow, intermittent pulse.
: Valvular defects, where, in stage of compensatory disturbance, radial arteries show an abnormally low tension; but it must only be given till the tension is increased; normal diuresis then sets in, and dropsy with its concomitants are removed.
Distended veins on eyes, ears, lips and tongue.
Blueness of skin, especially of eyelids, lips, tongue and nails; cyanosis.
With drunkards congestion of blood to head and heart.
Has a specific venous relation to kidneys, and may act as a palliative in morbus Brightii.
Urine frequent, scanty and black-colored; lower eyelids puffed, abdomen distended and legs œdematous; pulse 120, and small; tongue dirty white; constant hacking cough with dyspnœa; œdema pulmonum. θScarlatinal dropsy.

Digitized by Google

All kinds of dropsies, with difficult micturition, pale face, intermitting pulse, doughy swelling, which easily yields to pressure of finger; cyanotic symptoms, with fainting, when there are organic affections of heart.
Dropsy of internal and external parts.
Flabby, œdematous swelling all over.
Piercing pains in joints.
Scrofulous glandular enlargements.
Gouty nodosities.

45 **Touch. Passive Motion. Injuries.** Touch: skin painful to; throbbing in body on.
Pressure: region of liver sensitive to; legs and thighs pit.
On being raised to upright posture: fatal syncope.
Riding: vertigo.
After cut or wound: sluggish escape of dark, thick blood.

46 **Skin.** ‖Surface, especially of extremities, cold; slow pulse.
‖General paleness of skin.
‖Yellowness of body, particularly of conjunctivæ.
‖‖Stools almost white; scanty brown urine, frequent and empty retching; much debility. θJaundice.
‖‖Cyanosis.
Elastic white swelling of whole body.
‖Itching of skin.
Corrosive itching darting; gnawing itching increasing to intolerable burning pricking, alternately increasing and decreasing; skin painful to touch; titillation in affected parts.
‖Creeping all over skin. θAngina pectoris.
Black pores in skin; sebaceous follicles ulcerate.
Pimples on back; rash on hands; desquamation.

47 **Stages of Life. Constitution.** ‖During climacteric period, sudden flushes of heat, followed by great debility, irregular pulse; weak action of the heart; least motion brings on palpitation.
Nervous lymphatic constitutions.
Children with very white complexion, light hair and more or less tendency to scrofula; post-scarlatinal dropsy.
Girl, æt. 1½ years, scrofulous; post-scarlatinal dropsy.
Girl, æt. 3, well nourished and healthy, after suffering for 8 days from general malaise; acute hydrocephalus.
Man, æt. 18; frequent nocturnal pollutions.
Young lady, æt. 19, strong, well built; emansio mensium.
Man, æt. 20, results of excessive coitus and debauchery.
Man, æt. 20, sculptor, small in stature but strong, otherwise well; asthma.
Mrs. R. R., æt. 26, blonde, good physique, pulmonary tendencies hereditary; vicarious menstruation.

Digitized by Google

Mrs. B., young married lady, subject to frequent attacks of palpitation of heart, was exposed to wet and cold, was taken with acute pain in hip-joint, which lasted about twelve hours, and then, as she expressed herself, "went to her head," and for following 6 or 8 weeks was afflicted with angina pectoris.

Josepha N., æt. 30; gastric disturbance.

Woman, æt. 30, lymphatic temperament; intermittent.

Woman, æt. 41, married twice within 5 years, one child by first marriage, second childless, has hypertrophy of heart and dilatation of r. ventricle, with mitral and tricuspid insufficiency; metrorrhagia.

Woman, æt. 48, unmarried, gouty diathesis, had two attacks of gout, in consequence of which abnormalities in tricuspid areas developed.

Woman, æt. 50, unmarried, sentimental and very excitable, rheumatic tendency; palpitation of heart.

Man, æt. 60; hypertrophy of heart.

John F. C., æt. 65, enfeebled from frequent illness; diarrhœa.

J. T., æt. 65, of intemperate habits, has been confined to house for 3 months, and subjected to much allopathic treatment; cardiac dropsy.

Woman, æt. 66; cyanosis of one month's standing.

Woman, æt. 66, ill 6 weeks; morbus cœruleus.

Sarah H., æt 66; palpitation of heart originating in grief.

Mrs. F., æt. 69; heart disease, with extensive congestion to lung.

[48] **Relations.** Antidoted by: Sweet milk with Fœnum græcum; vegetable acids, vinegar, infusion of galls, ether, *Camphor.*, *Serpentaria.* Keep the patient recumbent and give alcohol. Tannin has been recommended, in order to precipitate Digitalin in the stomach. Effects of small doses may be removed by *Nux vom.*, *Opium.*

It antidotes: Wine; *Myrica cerifera* (the jaundice caused thereby).

Compatible: *Bellad.*, *Bryon.*, *Chamom.*, *Cinchon.*, *Lycop.*, *Nux vom.*, *Opium*, *Phosphor.*, *Pulsat.*, *Sepia*, *Sulphur*, *Veratr.*

Incompatible; *Cinchon.* (increases the anxiety), Spir. nitr. dulc.

Compare: Alkaloids which have similar action, such as Oleandrin, Scilliain, Adonidin, Neriin, Convalamarin, Antiarin, Helleborein. *Acon.* (anxiety, pulse); *Ant. tart.* (deathly nausea); *Apocynum* (cardiac dropsy); *Arsen.* (anxiety, weakness); *Bellad.* (throbbing headache, dilated pupils); *Bryon.* (stomach, thirst); *Camphor.* (coldness); *Cinchon.* (anxiety, respiration); *Conium* (heart intermittent and frequent); *Ferrum* (bladder); *Kalmia* (heart,

rheumatism); *Laches.* (sleep); *Lobelia, Lycop.* (feeble heart); *Natr. mur.* (frequent and intermittent heart); *Nux vom.* (antidotal); *Phosphor.* (genitals); *Pulsat.* (sadness and depression); *Spigel.* (heart); *Sulphur* (vertigo, eyes); *Tabac.* (deathly nausea); *Veratr.* (weakness, coldness).

DIOSCOREA VILLOSA.

Wild Yam. *Dioscoreaceæ.*

A perennial creeper, growing wild in this country, principally in Southern States, on bushes and fences. Introduced and proved extensively by Cushing (see Monograph); also proved by Woods, Burt and Nichols (see Allen's Encyclopedia, vol. 4, p. 123.)

The tincture is prepared from the root. *Dioscorein* is obtained by precipitating the tincture with water. Both preparations have been proved and used clinically, in various potencies.

[1] **Mind.** Calls things by wrong names; writes down r. arm or leg when he means l., and must correct it in evening.

Digitized by Google

Feels tired; yet still keeps walking around room.
Company is disagreeable, conversation troublesome.
Great depression of spirits.
Irritable; feels cross and troubled.

[2] **Sensorium.** Vertigo: with heat in head; with great faintness at stomach; from onanism.
Dull, confused, dizzy; mouth dry and bitter.
Dizzy, dull feeling; goes to r. while walking; inclined to fall backwards.
Faintness < by sitting up in bed; numbness < by lying down.

[3] **Inner Head.** ||Dull frontal headache.
Pain in front of head and temples as if top of head was lifted up.
Sharp pains over eyes.
Pains in temples, and occiput, dull pressure or sharp stabbing, causing a dull stupid sensation; neuralgia in temples, < from least change of position.
||Vertigo and giddiness, with heat in head; with sharp cutting pains in r. side of forehead, extending to ears; a remittent pain, < by pressure.
Violent throbbing in temples and forehead; 9 A.M.
Squeezing pains in head; temples as if in a vise; nausea, dry mouth, belching of wind.
Headache in vertex and down into both shoulders.
Vertex pains seem to be deep-seated, all but central.
Dragging pain in r. side of occiput, making him feel quite stupid.
Dull pain in back of head down into shoulders and back.
||Fulness in head, speedily followed by spasmodic pain in abdomen.
Head feels as if tied with a band.

[5] **Sight and Eyes.** Feeling as of a round or a large smooth substance, or as of sticks, dust or lashes in eyes.
Sharp pain from r. eye to occiput.
Lachrymation, hot tears, eyes fill in open air, smarting; wants to keep eyes closed.
Eyes weak, sore, smart; r. eye smarts <; seems as if hot air streamed out, evening; lids glued together.
Eyelids stiff or gummed in morning.

[6] **Hearing and Ears.** Ringing, buzzing in ears with headache.
Small balls of wax drop out of r. ear almost daily.
Both ears feel suddenly stopped up, and are sore to touch.
Pains in ears, < blowing nose.
Hard pain in front of both ears, and behind l. ear.
Itching of r. internal ear, < than in left.

[7] **Smell and Nose.** Nose stopped up, dry, or watery discharge.

Digitized by Google

Bright red blood from l. nostril, followed by a dark clot, while sitting writing.
Watery discharge from l. nostril and eyes, with smarting in fauces.
‖Bad smell in nose, as from bilious fever or bilious dysentery; dryness of nose.
Nostrils sore inside.

[8] **Upper Face.** Sharp pain in l. cheek or lower portion of temporal region.
Hard aching in l. side of face (parotid), extending to neck.
‖Little pimples with black heads.

[9] **Lower Face.** Corners of mouth sore.
‖Lips dry.
Spasmodic closing of jaws, biting tongue, when neither eating nor drinking.
Stiffness of jaw; sore pain at angle, l. side.

[10] **Teeth and Gums.** Pain in front teeth and burning in mouth and fauces.
Sharp aching in an upper r. molar, a filled tooth, as if the bare nerve was touched.
Soreness of gums, extending to roof of mouth.
Gums on inner side of front upper teeth swollen.

[11] **Taste and Tongue.** Taste: bitter, nasty; rough; sweetish or flat, pappy.
‖Awakes 4 A.M., with bitter taste, dry mouth and dizziness.
Dry tongue, in morning, with heavy brown coating, without thirst, and with bitter taste.
Tongue white, dry; yellowish white; brown and sore on tip, < in morning.
Tongue sore on sides, or as if burnt.
Bites tongue, spasmodic closure of jaw.

[12] **Inner Mouth.** ‖Mouth bitter and clammy; dry in morning.
Dry, yet full of sticky mucus; no thirst.
‖Mouth dry and bitter, tongue heavily coated, no thirst.
Saliva runs out while asleep.

[13] **Throat.** Fauces dry, burning, smarting, sore.
Fauces rough, dry; frequent inclination to swallow.
Left tonsil smarts and itches, with inclination to cough.
Pain on back and r. side of throat causing choking sensation.
Constant desire to swallow, but it causes nausea and irritated feeling in throat, l. side.
Sharp stitching pains seemingly in tonsil up to ear.
Constricted feeling in throat as from something tight about neck, makes breathing difficult.

[14] **Appetite, Thirst, Desires, Aversions.** ‖Disgust for food, with flat clammy, bitter or sweet taste.

Digitized by Google

[15] **Eating and Drinking.** After eating: nausea, faint, distressed at stomach, it burns; dull, heavy pain, > by belching; can taste food eaten; relief of symptoms.

Eating > sharp pain in stomach.

Flatulence after meals; wind colic, with little or no hepatic derangement.

Several hours after eating patient is attacked with violent colicky pains, causing desire to bend double, which makes him <; must walk erect; distension of stomach, tasteless eructations (except after long attack when they may be sour); cold extremities; pulse feeble.

Dull pains in head, < after dinner.

After excess in eating, errors in diet, or in tea drinkers, excessive flatulent colic.

[16] **Hiccough, Belching, Nausea and Vomiting.** Sharp cramping pain in pit of stomach, followed by raising, belching and gulping enormous quantities of tasteless wind, for fifteen minutes, followed by hiccough and discharge of flatulence from bowels.

Belching large quantities of wind, tasteless, sour, bitter, or like rotten eggs, with only partial relief of pains.

Inordinate belching of gases.

Nausea.

Vomiting and purging; watery stools, painful cramps in stomach, bowels and extremities.

[17] **Scrobiculum and Stomach.** Faintness at epigastrium.

Distressing pain at epigastrium, > by raising sour, bitter wind; with shuddering.

Sharp pain in epigastrium > by standing erect, < from stooping.

Sharp pain in epigastrium, extending to l. hypochondrium.

Dull, heavy pain in pit of stomach, < after eating, > by frequent eructations of air; pains radiate from stomach in all directions, and at times appear suddenly in head and feet; belching large quantities of wind, with sensation as if both temples were in a vise; must unfasten clothing, > by stretching body or by walking about; sharp, prickling pains in stomach, faintness; flatulent distension after meals in persons of weak digestion.

Sharp cramping pain in pit of stomach, followed by raising, belching and gulping of enormous quantities of wind, then hiccough and discharge of flatulence from bowels.

Constant, dull, weary pain in cardiac region of stomach, extending to l. side and dorsal region.

Stomach painful on pressure, faintness; burning distress with sharp, pricking pains; forenoon and evening.

Digitized by Google

‖Cutting pains in stomach; gastrodynia.
‖Distress at stomach all day, at times so sharp he had to walk around room to get breath.
Burning, jerking pains in stomach, with faintness.
‖Distress and burning at stomach.
Sensation as of a stone in stomach.
‖Continued distress at stomach, with frequent very sharp pains, at 7 A.M., must unfasten clothing.
‖Hard pain in region of stomach.
‖Neuralgic pain in stomach. θAngina pectoris.
‖‖Gastralgia; cramps in stomach.
‖‖Pyrosis in pregnant women.
‖‖Stomach painful on pressure, with faintness.

[18] **Hypochondria.** ‖‖Sharp pain in l. hypochondrium.
‖Hard dull pain in region of gall-bladder, at 7 A.M.
‖Dull, heavy, grinding pain in region of liver, quite severe, in evening.
‖Cutting, squeezing and twisting pain in region of liver.
‖Sharp pains in liver, extending to nipple.
Aching in l. hypochondrium, with faint feeling in stomach.
‖‖Neuralgia and spasmodic affections of liver and gall-ducts.
Digging in l. hypochondrium.

[19] **Abdomen.** ‖‖Rumbling of bowels and discharge of large quantities of flatulence.
‖Tenderness or soreness of bowels on pressure; much belching.
‖Constant aching distress in whole of bowels, with frequent sharp cutting pains in stomach and small intestines.
Remitting, griping pain in epigastric and umbilical region.
‖Severe cramping pain just above umbilicus.
Pain and spasm arising from umbilical region and radiating all over abdomen, extending into stomach, pelvic organs, and even extremities.
‖Constant, dull, aching pains in whole umbilical region, with frequent sharp, cutting pains all through small intestines.
‖‖Constant distress in umbilical and hypogastric regions, with severe cutting, colic-like pains every few minutes in stomach and small intestines.
‖Severe remitting, griping pains above and near umbilicus; constipation; vomiting; abdomen tympanitic and very sensitive to pressure; great prostration; pale, cold, clammy skin; pulse 30; respiration 5 per minute.
‖Intense cutting, twisting, agonizing pains in abdomen, commencing in umbilical region radiating all over abdomen, > or not by pressure, with distension, soreness and sensitiveness of abdomen; vomiting, cramps.

Griping pain in bowels; < at umbilicus; in lower portion.

Severe cramping pains beginning just below umbilicus, extending into back, thence flying to fingers and toes, where the pain is intense (in pregnant women).

Sudden attack of constant heavy pressing pain, two inches below umbilicus.

Violent, cutting, lancinating, pains in bowels, eliciting shrieks from patient. θDysentery.

Sharp cutting pain in bowels, < by walking.

Severe pain in bowels, with discharge of large quantities of flatulence.

Violent twisting colic, occurring in regular paroxysms, with remissions.

Twisting pain in all parts of bowels, < in lower part, continually changing.

Constant pains, worse in paroxysms, of a violent twisting character, with constipation, thirst, and sensitiveness of r. side of abdomen. θEnteralgia.

Twisting pains, < by lying down, > by pressure, unless abdomen is tender. θEnteralgia.

Severe colic and heat in stomach and abdomen, < from doubling up and at rest, pains compel him to keep in constant motion.

Severe pain in l. iliac region, running upwards to l. kidney, > from crouching together with hands clasping knees. θColic.

Pain beginning suddenly at a small spot in r. iliac region, continuing sometimes for two days, ending always in an attack of vomiting, and leaving as suddenly as it commenced. θFlatulency.

Crampy, spasmodic pain, commencing near crest of ilium (r. side) extending into lumbar region and hypogastrium; gradually increasing for days; ending in an attack of vomiting or headache; < by physical or mental labor, and by lying on affected side; > lying on back, and l. side; always leaving suddenly.

Spasmodic, very sharp pains in umbilical and r. iliac regions, not modified by pressure, although pressure causes rumbling.

Pain in both sides of bowels, going round and back to lumbar region, with much rumbling of wind; pain < as soon as lying down at night, when going to sleep, when it becomes acute; > by gentle rubbing and passage of inodorous flatus; gets still more relief by walking about room; pain in region of ascending, transverse, and descending colon; bowels loose. θColicodynia.

Severe constant pain, greatly aggravated every three or

Digitized by Google

five minutes, near head of colon; pain in a small spot, which feels as if it were drawn forcibly upward and backward to spine; constant desire to defecate and urinate, but without accomplishing much; cannot remain in any one position. θColic.

▮Cramp-like pain in region of sigmoid flexure of colon, extending to back, with vomiting.

▮Pain in l. inguinal region.

▮Pain in both inguinal regions extending to testicles.

▮Bilious colic, pain extremely severe and remitting.

▮▮Flatulent colic, occurring every night.

Flatulent colic, chiefly in persons of feeble digestive power.

▮Spasmodic colic.

▮▮Hyperæsthesia of the abdominal nerves; neuralgia of the bowels.

▮Abdominal pains suddenly shift and appear in distant localities, as the fingers or toes.

Pains begin in a small spot and radiate, may early in attack extend to stomach, liver, spleen or uterus; pains often jump from place to place, especially to a distant part.

With the colic patient has a tendency to bend double, and feels as if pressure would >, but, as a matter of fact, it <, and most solace is obtained by stretching body out.

Colic < by sitting, or lying, or bending double; > by currant-wine, pressure, and walking.

[2] **Stool and Rectum.** ▮▮Very offensive flatulence from bowels.

Expulsion of flatus difficult and with violence; often with watery evacuations, but with only partial relief of pains.

Sudden urging to stool, especially early in morning.

Driven hurriedly out of bed in morning, with hurried desire for stool, which is loose and offensive and followed by straining and burning at anus.

▮Painful diarrhœa with much straining early in morning.

▮Morning diarrhœa with profuse, deep yellow, thin stools, followed by very weak, faint feeling, without relieving the constant twisting pains in bowels.

Bilious colic and diarrhœa early in morning.

▮Loose stools, with much straining.

▮Constant desire to defecate and urinate, without accomplishing much. θColic.

Stools: profuse, deep yellow, thin, bilious, watery; white, slimy, jelly-like.

Black, hard, dry, lumpy stool, last part of it soft, white and mushy, followed by prolapsus. θPiles.

▮Only about once during week, desire for stool, although she eats heartily; abdomen feels full and distended;

Digitized by Google

face red; eyes heavy; confusion of head. θConstipation and dysmenorrhœa.

Sensation as if feces were hot; hot flatus.

‖All the abnormal alvine discharges are attended by twisting writhing, severe pain around, and extending from region of umbilicus.

❙During pregnancy, alternate constipation and relaxation of bowels; pyrosis, and burning, aching pain in stomach; just before and during each fecal evacuation, severe pain in sacral region of bowels, of a writhing, drawing character, which radiates upward and downward until whole body and extremities become involved, the fingers, hands, feet and toes feeling as if they were about to be cramped, from the severe, drawing, darting pains in them; great anxiety, faintness and palpitation of heart.

Spasmodic pains in bowels, with unusually severe tenesmus; stools like albumen, but lumpy, with straining and burning in rectum, and sensation as if feces were hot; during the stool nearly fainting.

Before stool: much straining even with loose stool; sudden urging, hurried out of bed in morning; burning in rectum; severe writhing pain in sacrum and back, radiating up and down until the whole body and extremities are involved (also during stool).

During stool: severe tenesmus; burning in rectum; emission of much offensive flatus.

After stool: hæmorrhoids; prolapsus ani; weak, faint feeling in abdomen; colic.

❙Stool in morning, followed by protrusion of four hæmorrhoidal tumors, size of large red cherries, with great pain and distress in anus.

❙Piles, like grapes, around anus, not bleeding; involuntary discharge of slimy mucus from anus; darting pain, from old hæmorrhoidal tumor, to liver; hæmorrhoidal tumors of livid color prolapsed, with great pain and distress in them.

‖Itching of rectum.

❙Griping and tenesmus of dysentery.

❙Spasmodic pains in abdomen, with severe tenesmus in dysentery.

❙Cholera morbus with vomiting, diarrhœa, painful cramps in stomach, bowels and extremities.

‖Cholera morbus, cholera infantum; dysentery; diarrhœa.

Urinary Organs. ❙Writhing, twitching and crampy pains with passage of renal calculus.

❙Agonizing pain in small spot over crest of r. ilium; pains radiate from this spot up to renal region, and down r.

Digitized by Google

leg and into r. testicle; patient writhes about in bed, with loud, tremulous moaning; skin bathed with cold, clammy sweat; pulse feeble and quick; retching; frequent desire to urinate. θRenal colic.

‖Spasmodic stricture of urethra, with pain about umbilicus, > by pressure; pressure on rectum, paroxysmal colic pains.

[23] **Male Sexual Organs.** ‖Constant excitement of genital organs, with frequent erections night and day, amorous dreams.

‖‖Emission of semen during sleep, sometimes without erections.

‖Sexual desire greatly diminished; no erections for many days.

‖Nocturnal emissions, with erections and amorous dreams when asleep, or without erections, sensations, or dreams, but with great weakness of knees; depression of spirits; pain in lumbar and inguinal region, extending to testicles; desire to be alone.

‖Nocturnal emissions, with lameness of back; weakness of knees; can appear happy, but looks down when on street.

‖Amorous dreams and erections when asleep; no torpidity of the genitals.

‖Frequent nocturnal emissions, with great despondency.

‖Nocturnal emissions, with vivid dreams of women all night; great despondency; knees very weak.

‖Frequent emissions in sleep, without erections or dreams.

‖Frequent involuntary emissions, without dreams or excitement, by day as well as night; memory impaired and energy gone.

Pain and spasm of spermatic cord when the pains commence in inguinal region, and extend to testicles and penis.

‖Genitals relaxed and cold; cold and almost insensible.

‖Strong-smelling perspiration on scrotum and pubes.

[25] **Female Sexual Organs.** ‖Dysmenorrhœa; spasmodic uterine colic; pains suddenly fly to distant parts.

[26] **Pregnancy, Parturition, Lactation.** Vomiting, pyrosis and gastralgia of pregnant women, or when occurring during menses.

‖‖Severe pains with cramp in flexor tendons of fingers and toes, alternating with false labor pains.

After pains: false pains of pregnancy.

[25] **Voice, Larynx, Trachea, Bronchia.** Constant tickling in larynx causing cough.

[26] **Respiration.** ‖Laborious breathing. θAngina pectoris.

[27] **Cough.** ‖Irritating hacking cough, caused by constant tickling sensation in larynx and bronchia.

Digitized by Google

‖Cough with pain in epigastrium; dull pain in temples, brownish-yellow tongue, weak knees.

Frothy, profuse expectoration seemingly from posterior nares.

[18] **Inner Chest and Lungs.** Tightness across upper part of chest; distressed feeling.

Pain in region of nipples.

Sharp pain in l. lung near nipple, with an occasional stitch in region of heart, with numbness of l. arm, extending whole length as if asleep; l. leg also numb.

Pains through lungs to back and vice versa.

‖Pains through side of chest, with headache in temples.

[19] **Heart, Pulse and Circulation.** ‖Sharp cutting pain in region of heart arresting breathing and motion, with faintness. θAngina pectoris.

‖Neuralgic pain in stomach; cannot speak; laborious breathing; sudden severe pain in middle of sternum, extending to both arms and hands; cannot move; cold clammy sweat all over; impulse very feeble; pulseless. θAngina pectoris.

Angina pectoris; sharp pain in l. chest, region of heart, takes his breath, < lying on l. side.

‖Pulse intermitting every eight or ten minutes after the attack for weeks. θAngina pectoris.

[20] **Outer Chest.** ‖Sharp pains, cutting in region of nipples, arrest breathing; > by pressure.

‖Pain through from back to front of both lungs, or vice versa.

‖Sharp cutting from l. axilla to nipple and down side deep in lung.

Burning behind top of sternum.

[21] **Neck and Back.** Lame and stiff; weakness in small of back.

Back, in region of liver so lame it is almost impossible to turn in bed; > by motion.

Dull pain in back of neck, extending to head and shoulders.

‖Sharp deep pain in lower portion of l. scapula, followed by sharp pain through centre of r. lung.

Dull pain in lumbar region, < bending spine; sharp, extending to testicles.

Lameness of back, cannot sit up without support.

‖Severe, drawing, writhing pains in sacral region and bowels, radiating upward and downward, until whole body and even fingers and toes become enveloped in spasms, so severe as to elicit shrieks.

Itching over r. scapula and over l. ribs.

‖Hyperæsthesia of spinal cord, or reflex irritation.

Drawing pains in sacrum.

Digitized by Google

Dull, heavy pain in region of sacro-iliac symphisis and a dull pain in region of liver.

Upper Limbs. ‖Pain in l. shoulder.
Sharp jerking pains in shoulders, l. elbow stiff.
Numbness of l. hand and forearm, < in little finger as if asleep, arms and hands numb.
Dull grinding in middle of l. forearm, at intervals during evening.
Grinding in elbows.
‖Panaritium, early when pains are sharp and agonizing, or when pricking is felt; nails brittle.
Disposition to paronychia.

Lower Limbs. ‖Painful affection of r. hip completely impairing use of r. leg; pain only during motion, rest bringing complete relief. θSciatica.
While lying, sharp pain like an electric shock from l. hip to head.
‖Pain about region of exit and along course of sciatic nerve down r. leg; pain only when moving limb, or on sitting up; entire relief when lying still. θSciatica.
Cramping pain in back side of legs; dull pain whole length of r. leg posteriorly < at buttock and heel.
Pain in l. popliteal space, then r. knee, then r. popliteal space.
Right hip lame as if gluteal muscles were too short.
Neuralgic rheumatism of extremities.
‖Knees weak and trembling; painful walking, but > from continued walking; weak in morning.
Feet and legs feel numb and strange.
Pains in legs and knees, > by motion, and by rubbing.
Sharp pain in l. knee while r. feels lame and stiff; both feel weak, walking is difficult, but is compelled to walk.
Sharp pain in r. ankle joint, soon drifting into toes; > from motion; < evenings.
‖Pain and soreness in fourth toe of r. foot.
Toes stiff, especially in morning, fourth toe of r. foot sore, painful.
Jumping darting in corns.

Limbs in General. ‖Rheumatic pains < at night and early morning.
Sharp pains in various parts of body and limbs; darting from place to place.
‖Severe pains, with cramp in flexor tendons of fingers and toes and pregnant woman, alternating with false labor pains.
Aching pain in elbow, alternating with pain in knees.
Limbs feel weak, especially knees.
Sharp pain in ankles and wrists on awaking, shifting to toes and fingers.

Google

Nails seem unusually brittle.

[35] **Rest, Position, Motion.** Rest: pain in hip and leg >.
Lying down: numbness <; twisting pain in abdomen <; on affected side, pain in ilium <; pain in both sides of bowels <; colic <; sharp pain in l. hip to head; pain along sciatic nerve down r. leg >.
Lying on l. side: pain in r. ilium >; sharp pain in l. chest; region of heart <.
Lying on back: pain in ilium >.
Rising: chill, could not get warm.
Sitting up: in bed, faintness <; colic <; impossible from lameness of back; pain in sciatic nerve down r. leg <.
Standing erect: pain in epigastrium >.
Change of position: neuralgia <; desire to change position.
Pains except headache are usually > by motion.
Motion: constant, compelled by pain; lameness of back >; pain in hip and leg during; pain in legs and knees >; pain in r. ankle joint >; must move, yet hurts him.
Cannot turn in bed: back so lame.
Blowing nose: pain in ears <.
Crouching: with hands clasping knees >; pain in l. iliac region.
Desire to bend double: < colic.
Stooping: pain in epigastrium <; dull pain in lumbar region <.
Stretching body > pain in pit of stomach.
Walking: keeps on even though tired; erect > pains; distress at stomach >; cutting pain in bowels <; pain in both sides of bowels >; colic >; continued walking >; difficult walking on account of weak knees, but is compelled to walk.
Physical labor: cramp pain in ilium <.
Writhes in bed.

[36] **Nerves.** Strengthens nerves; later trembling, languor, faintness, numbness and tingling.
Great weariness and loss of strength.
Chorea, with seminal emissions.
Many cases of reflex nerve action, neuralgia, colic, etc.
Disorders of male genitals.
Paralyzed, numb sensations.

[37] **Sleep.** Could not sleep from too intent thinking.
Went to sleep in his room in the afternoon; awoke with bitter mouth and pains in the bowels.
Sleep heavy, full of dreams awoke; lame and weary.
Restless sleep; dry, bitter mouth on awaking.
Aroused suddenly with slow, but hard beating of the heart.
Restless after 2 A.M.; must move, yet hurts, he is so sore.
Goes to sleep late, awakens early.

Google

Very sleepy after dinner, but on lying down could sleep but a few minutes; tired and lame, < after the nap.

Awoke 2 A.M., with sharp piercing deep in vertex, with frequent cutting cramp, like pain in epigastrium down to navel, with a faint distressed feeling as if diarrhœa would come on; bitter taste: mouth dry.

‖Worse on awaking; mouth dry, bitter; urging to stool and eyes gummed, etc.

[38] **Time.** 2 A.M.: restless after; sharp, piercing pain in vertex.

4 A.M.: wakes with bitter taste, dry mouth and dizziness; chill; slimy stool.

7 A.M.: distress at stomach; pain in region of gall-bladder.

9 A.M.: throbbing in temples.

Morning: eyes stiff or gummed; dry tongue; tongue sore on tip <; dry mouth; sharp pains in stomach; sudden urging to stool; driven out of bed; painful diarrhœa; bilious colic; after stool, protrusion of tumors, pain in anus; rheumatic pains <; toes stiff.

Evening: eyes feel as if hot air streamed out; sharp pain in stomach; pain in region of liver; dull grinding in middle of l. forearm; pain in r. ankle joint <.

At night: pain in both sides of bowels < when lying down; flatulent colic; emissions with erections and amorous dreams; rheumatic pains <.

[39] **Temperature and Weather.** Generally > in open air.

Open air: eyes fill with tears.

Chills: could not get warm.

[40] **Fever.** Chill commences over l. scapula, spreading over back.

Chilliness: with bitter mouth; with aching bones, backache, pains in lungs, sore throat, etc.; pains in bones of legs.

Chill 4 A.M., with slimy stools; could not sleep again because of chills running down back; on rising, chills, could not get warm.

Cold extremities, feeble pulse, but no fever; with colic.

Sweats easily while chilly, from least exertion.

‖Cold, clammy sweat all over. θAngina pectoris.

[41] **Attacks, Periodicity.** Pains remit, are spasmodic.

Sudden attack: constant heavy pain below umbilicus.

Every few minutes: colic-like pains in stomach; pain near head of colon <.

Frequent: sharp pain in intestines; desire to urinate; erections night and day; nocturnal emissions; emissions without erections; cutting cramp-like pains in epigastrium.

Regular paroxysms: violent colic.

Attacks: of vomiting and headache following pain in r. iliac region.

Google

At intervals: dull grinding in middle of l. forearm.
Fifteen minutes: belching lasts.
Daily: small balls of wax drop out of r. ear.
Two days: pain in r. iliac region.
For days: pain in r. side of ilium.
Once a week: desire for stool.

42 **Locality and Direction.** Left: pain behind ear; itching in internal ear; watery discharge from nostril; sharp pain in cheek; aching in side of face; sore pain at angle of jaw; tonsil smarts and itches; irritating feeling in side of throat; pain in hypochondrium; dull, heavy pain in side; severe pain in iliac region extending to kidney; pain in r. side of ilium > from lying on side; pain in inguinal region; sharp pain in lung; numbness of arm and leg; sharp pain in chest; sharp cutting from axilla to nipple; sharp, deep pain in lower portion of scapula; itching over ribs; pain in shoulder; elbow stiff; numbness of forearm and hand; dull grinding in forearm; sharp pain from hip to head; pain in popliteal space; sharp pain in knee; chill commencing over scapula.

Right: he goes to side while walking; sharp pain side of forehead; pain in side of occiput; pain from eye to occiput; eye smarts; small balls of wax drop out of ear; itching in internal ear; pain in upper molar; pain side of throat; side of abdomen sensitive; pain in small spot in iliac region; crampy pain in side of ilium; pain in testicle; sharp pain through lung, following pain in l. scapula; itching over scapula; pain in leg; painful affection of hip, impairing use of leg; lameness of hip; pain along sciatic nerve down leg; pain in knee; pain in popliteal space; knee feels lame and stiff; sharp pain in ankle joint; pain and soreness in fourth toe of r. foot.

Frequent sharp darting pains from one part to another.
Pains spread, especially from abdomen to distant parts.
Pains go downwards; often fly to remote parts.
Both sides: pain in bowels; pain in inguinal regions; in testicles.
Radiating upward and downward: severe writhing pain in sacral region.
Changes position: pain in bowels; pains suddenly shift and appear in different localities.

43 **Sensations.** As if top of head was lifted up; temples as if in a vise; head feels as if tied with a band; feeling as of a round, or a large smooth substance, or as of sticks, dust, or lashes in eyes; seems as if hot air streamed out of eyes; ears feel suddenly stopped up; tooth feels as if

Digitized by Google

bare nerve was touched; tongue feels as if burnt; as if something tight were about neck; as of a stone in stomach; in a small spot in abdomen, feels as if it were drawn forcibly upward and backward to spine; as if feces were hot; arm as if asleep; little finger as if asleep; as if gluteal muscles were too short; fingers, hands, feet and toes as if they were about to be cramped.

Pain: in front of head and temples; in occiput; in vertex, deep-seated; into both shoulders; in ears; in front teeth; on back and r. side of throat; radiates from stomach in all directions, suddenly into hands and feet; in l. hypochondrium; in epigastrium; from umbilical region and radiating all over abdomen, into stomach, pelvic organs and extremities; beginning at a small spot in r. iliac region; in both sides of bowels to lumbar region; in region of ascending, transverse and descending colon; l. inguinal region; in both inguinal regions, extending to testicles; in anus, with diarrhœa; of spermatic cord; in penis; in region of nipples; through lungs to back, and vice versa; through side of chest; in l. shoulder; in r. hip; about region of exit, along course of sciatic nerve down r. leg; in l. popliteal space, and r. knee; in legs and knees; in fourth toe of r. foot; in joints.

Agonizing pain: in abdomen; in small spot over crest of r. ilium, radiates to renal region down r. leg and into r. testicle.

Cutting pain: in stomach; in region of liver; in small intestines; in abdomen; in region of heart; in region of nipples; from l. axilla to nipple and down side deep in lung.

Stabbing pain: in head.

Writhing pain: extending from region of umbilicus; in sacrum and back extending through body and extremities.

Lancinating pain: in bowels.

Severe pain: in bowels; in l. iliac region running up to l. kidney; near head of colon; in sacral region of bowels extending to extremities; with cramp in flexor tendons of fingers and toes; in middle of sternum, extending to both arms and hands.

Sharp pain: over eyes; in head; in r. side of forehead, extending to ears; from r. eye to occiput; in l. cheek; in upper r. molar; in tonsil and ear; in stomach; in pit of stomach; extending from epigastrium to l. hypochondrium; in liver, extending to nipple; in l. lung near nipple; in l. chest; in region of heart; in lower portion of l. scapula; through centre of r. lung; in

Digitized by Google

shoulders; like an electric shock from l. hip to head; in l. knee; in r. ankle joint, extending to toes; in ankles; in wrists; to toes and fingers; deep in vertex.
Grinding pain: in region of liver; in middle of forearm; in elbows.
Darting pain: from old hæmorrhoidal tumor to liver; in corns.
Stitch: occasionally in region of heart.
Twisting pain: in region of liver; in abdomen.
Cramp-like pain: in region of sigmoid flexure to colon.
Cramping pain: in pit of stomach; in bowels and extremities; just above umbilicus; extending to back, flying to fingers and toes; near crest of ilium, extending into lumbar region and hypogastrium; in back part of legs.
Colicky pain: with flatulency; in stomach and small intestines; spasmodic uterine colic.
Griping pain: in epigastric and umbilical region; in bowels.
Digging: in l. hypochondrium.
Squeezing pain: in head; in region of liver.
Jerking pain: in shoulders.
Burning, jerking pain: in stomach.
Dragging pain: in r. side of occiput.
Drawing pain: in sacrum.
Distressing pain: at epigastrium; in whole of bowels; in umbilical and hypogastric region.
Hard pain: in front of both ears; behind l. ear; l. side of face; extending to neck; in region of stomach; in region of gall-bladder.
False labor pains.
Neuralgia: in temples; in stomach; in liver; in gall ducts; of bowels; of extremities.
Spasmodic pain: in abdomen; from abdomen to stomach, pelvic organs and extremities; near crest of ilium, extending into lumbar region and epigastrium; umbilical and r. iliac region; in abdomen.
Paroxysmal pains: in urethra.
Aching pain: in elbow.
Violent throbbing: in temples and forehead.
Prickling pain: in stomach.
Burning: in mouth; in fauces; in stomach; in rectum; behind top of sternum.
Smarting: in eyes; in fauces; l. tonsil.
Rheumatic pain: in limbs.
Dull pain: in head; in temples; in back of head, shoulders and back; in stomach; in pit of stomach; in cardiac region of stomach, extending to l. side and dorsal

Digitized by Google

region; in region of liver; in umbilical region; in back of neck, extending to head and shoulders; in lumbar region; in region of sacro-iliac symphisis; along r. leg.
Heavy pain: in pit of stomach; in region of liver; two inches below umbilicus.
Dull pressure: in head; on rectum.
Soreness: of nostrils; corners of mouth; at l. angle of jaw; of gums, extending to roof of mouth; on tip and sides of tongue; of fauces; of abdomen; of fourth toe of r. foot.
Heat: in head; in stomach; in abdomen.
Constricted feeling: in throat.
Tightness: across upper part of chest.
Irritated feeling: in l. side of throat.
Distressed feeling: at stomach.
Faintness: in stomach.
Lame feeling: in back; r. hip; r. knee.
Stiffness: of toes.
Numbness: of l. arm; l. leg; l. hand; of feet and legs.
Weakness: in small of back; of limbs; of knees.
Fulness: in head; in abdomen.
Ringing, buzzing: in ears.
Tickling: in larynx.
Dizzy, dull feeling.
Itching: r. internal ear; l. tonsil; of rectum; over r. scapula and over l. ribs.

"**Tissues.** Acts through the ganglionic nervous system, particularly affecting the umbilical region, giving, as its most characteristic effect, severe pain, simulating a so-called bilious colic.
Acts, probably, chiefly upon the nerves, especially upon solar plexus and upon spinal nerves, causing pain over body and in viscera, also reflex pains.
Myalgic and neuralgic pains.
Joints painful; weak, especially knees.

"**Touch. Passive Motion. Injuries.** Touch: ears sore to.
Rubbing: gently, > pain in both sides of bowels; pain in legs and knees >.
Pressure: pain in forehead <; stomach painful; bowels sensitive to; abdomen sensitive; intense pain >; pain <; twisting pain in abdomen >; pain in umbilical and r. iliac region not modified by pressure; causes rumbling; colic >; pain about umbilicus >; sharp pain in region of nipples >.

"**Skin.** Little pimples with black heads.
Itching and burning of various parts.

"**Stages of Life, Constitution.** Persons of feeble digestive powers, old or young, with flatulence after meals, in

Digitized by Google

stomach or bowels, but unattended with any hepatic derangement or irregularity of bowels; these persons, from some excess in eating, or from fasting, or from some error in diet, as eating old cheese, uncooked fruit, pastry, etc., especially if they are great tea-drinkers, may be suddenly seized with violent colic.

Biliousness with neuralgic pains as reflex symptoms.

Disposition to felons, possibly with a tendency to colic.

Young man; involuntary emissions.

Man, æt. 22, onanist; nocturnal emissions.

Young lady, æt. 23; constipation and dysmenorrhœa.

Man, æt. 25; nocturnal emissions.

Mrs. C., æt. 25, worn out by nursing sick child; constant pain in cardiac portion of stomach.

Mrs. D., æt. 30, has phthisis pulmonalis, with hectic night-sweats, etc.; dull, heavy pain in pit of stomach.

Mrs. A. V., æt. 30, nervous temperament; flatulent colic coming every night, except during summer, when attacks are not so regular or severe.

Widower; nocturnal emissions.

Man, æt. 35, married, father of three children; nocturnal emissions.

Mrs. D., æt. about 35, five months pregnant, has been lying in bed for a month on account of pain; sciatica.

Man, æt. 50; cholera morbus.

Man, æt. 50; renal colic.

Old lady, æt. between 50 and 60, who had been walking with crutches for nearly a year; sciatica.

Mrs. B., an old lady, æt. 78; colicodynia.

DOLICHOS PRURIENS.

Cowhage, or Cowitch. *Leguminosæ.*

A climbing plant, native to the West Indies and tropical America, synonymous with Mucuna pruriens, bears a fruit pod, about four inches long, covered with bristly hairs, from which the alcoholic tincture is prepared.

Introduced and proved by Jacob Jeanes.

CLINICAL AUTHORITIES.—*Sensation as of a splinter below angle of r. lower jaw,* Jeanes, Rück. Kl. Erf., vol. 5, p. 238; *Cough,* Jeanes, Rück. Kl. Erf., vol. 5, p. 680; *Chronic neuralgic pains in gums,* Jeanes, Rück. Kl. Erf., vol. 5, p. 206; *Skin disease,* Lippe, Rück. Kl. Erf., vol. 4, p. 239; *Dry, tettery eruption on limbs, resembling zona,* Williamson, Raue's Rec., 1873, p. 28; *Herpes zoster,* Baikie, Raue's Rec., 1871, p. 210.

[2] **Sensorium.** Sensation as of a blow on head, feels stunned.
[3] **Inner Head.** Head feels as if it would separate, it pains so.
Aching pain in r. temple.
[5] **Sight and Eyes.** ‖Eyes yellow. θJaundice.
Pain in r. eye.
Eruption on margin of eyelids.
[6] **Hearing and Ears.** Pain in neighborhood of r. ear.
Sudden dart of pain in r. ear, later in left.
[8] **Upper Face.** ‖Face yellow. θJaundice.
Circumscribed redness of one cheek.
‖Swelling of face, most of lips.
Prickling itching of face.
Pain in r. maxilla.
[10] **Teeth and Gums.** ‖Soreness and tenderness of gums, even in teething children.
Dull aching in a carious tooth, r. side.
‖Gums exceedingly sensitive, but not sore.
‖Gums swollen; neuralgic pains in them, < at night.
‖Gums swollen, red, painful, can scarcely eat or drink.
‖Pain in gums, preventing her sleep half the night.
‖Gums irritated, wants them continually rubbed; dentition.
[11] **Taste and Tongue.** Strong taste of blood in mouth, with cough.
[12] **Throat.** Slight fulness just behind posterior palatine arch.
Sudden sensation of choking lump in pit of throat.
Roughness of throat.
‖‖Painful sensation in throat below angle of lower jaw on

r. side, as if a splinter three quarters of an inch in length was imbedded vertically in that spot; pain < by swallowing.

‖Pain in r. throat, a subdued, contracting sensation, went to l. side.

[16] **Hiccough, Belching, Nausea and Vomiting.** Flatulent eructation.

‖Vomits bile. θLiver complaint.

[17] **Scrobiculum and Stomach.** Noisy movement of flatus in stomach.

[18] **Hypochondria.** Swelling of liver; pain goes through from l. lobe; pains in spleen with gravel.

[19] **Abdomen.** Bloated, swollen abdomen, with constipation.

‖At intervals fearful cramps in abdomen, off and on for 4 or 5 years; attacks come on 2 or 3 times a day; sudden movement would bring it on. θSpine disease.

Colic from getting feet wet.

Pain in abdomen in r. lumbar region.

Bruised pain below umbilicus.

Bruised pain in l. inguinal region.

[20] **Stool and Rectum.** ‖Constipation during teething or pregnancy.

‖White stools. θJaundice.

Tenesmus with looseness of bowels.

Pain in anus, with stool.

‖Costiveness. θDentition. θWorms.

‖Thread worms and complaints therefrom.

‖Constipation with liver complaint and itching.

[21] **Urinary Organs.** ‖Enuresis with gravel.

‖Small calculi pass away.

‖Ischuria, with or without gravel.

[22] **Male Sexual Organs.** Impotence.

[24] **Pregnancy. Parturition. Lactation.** ‖Intolerable itching all over body, in pregnant women, < at night, preventing sleep; < from scratching; no perceptible eruption on the skin.

[26] **Respiration.** Sudden sensation of a choking lump in throat.

‖Orthopnœa. θWorms.

[27] **Cough.** ‖Cough: on lying down at night; with wheezing and dyspnœa; 4 P.M. till morning.

‖Loud ringing, incessant cough. θWorms.

Slight cough with easy expectoration, and strong taste of blood in mouth.

Easy, mucous expectoration.

[28] **Inner Chest and Lungs.** Pains through the apices of both lungs.

[30] **Outer Chest.** ‖Eruption appeared on l. axilla, spreading in rings forward to sternum and back to spine, with much burning and smarting. θHerpes zoster.

Digitized by Google

[31] **Neck and Back.** Pain over r. carotid artery, as if a splinter was sticking there.
Pain in muscles on r. side of neck.
Pain under l. scapula continuing till zona broke out.
[33] **Upper Limbs.** Pain on the top of r. shoulder.
Aching pain in r. arm and shoulder.
Aching soreness in last phalanx of r. middle finger.
Pain at root of nail of r. index finger.
[34] **Limbs in General.** ‖Dry, tettery eruptions on arms and legs, resembling zona.
[35] **Rest. Position. Motion.** Lying down: at night, cough with wheezing.
Swallowing: < pain as if from a splinter in jaw.
Sudden movement: brings on fearful cramps in abdomen.
[36] **Nerves.** ‖Twitching of muscles.
‖Clonic spasms of extremities, with loss of consciousness; eyes fixed; lids open.
Convulsions of children.
‖‖Nervous affections of children during dentition.
‖‖Neuralgia following herpes zoster.
[37] **Sleep.** ‖At night in bed burning in skin is intolerable.
‖Night without sleep. θLiver complaint.
[38] **Time.** Night: neuralgic pain in gums <; pain in gums prevents sleep; terrible itching <; lying down from 4 P.M. till morning; cough with wheezing; skin burns; cannot sleep on account of itching.
[39] **Temperature and Weather.** Warmth: < itching at night.
‖Cold water burns on the itching skin.
‖Cold water lessens itching but causes great trembling.
‖Getting feet wet: colic.
[40] **Fever.** Skin burns at night, in bed.
[41] **Attacks, Periodicity.** At intervals: fearful cramps in abdomen, off and on for 4 or 5 years.
Two or three times a day: attacks of cramps in abdomen.
Three days: pain under l. scapula.
Seven to ten days: itching lasts; after desquamation itching and swelling returns.
For seven years every winter: itching.
[42] **Locality and Direction.** Left: pain through liver from lobe; pain in inguinal region; eruption on axilla; pain under scapula.
Right: aching pain in temple, in eye, near ear; pain in maxilla; dull aching in tooth r. side; painful sensation in side of jaw as of a splinter imbedded there; pain in throat; pain in abdomen, lumbar region; pain in carotid artery as of a splinter; pain in muscles in side of neck, on top of shoulder; aching in last phalanx of middle finger; pain at root of nail of index finger.

Digitized by Google

Right to left: pain passing from r. side of throat to left; dart of pain in r. ear then l. ear.

Upwards: itching first on feet, every winter higher up, until it reaches hip and abdomen.

Spreading in rings forward and back: eruption on axilla.

" **Sensations.** Sensation as of a blow on head; head feels as if it would separate; sensation of choking lump in pit of throat; in throat below angle of lower jaw on r. side, as if a splinter three-quarters of an inch in length was imbedded vertically in that spot.

Pain: in head; in r. eye; in neighborhood of r. ear; in r. maxilla; in gums; in r. throat; goes through liver from l. lobe; in spleen, with gravel; in abdomen; in r. lumbar region; in anus, with stool; through the apices of both lungs; over r. carotid artery as if a splinter was sticking there; in muscles of r. side of neck; under l. scapula till zona broke out; on top of r. shoulder; at root of nail of r. index finger.

Fearful cramps: in abdomen at intervals.

Sudden dart: in ears.

Aching: in r. temple; dull, in a carious tooth, r. side; in r. arm and shoulder.

Neuralgia: in gums; following herpes zoster.

Bruised pain: below umbilicus; in l. inguinal region.

Burning and smarting: with eruption on l. axilla, spreading in rings forward to sternum and back to spine; in skin is intolerable.

Soreness: of gums; with aching in last phalanx of r. middle finger.

Sensitiveness: of gums.

Contracting sensation: from r. side of throat to left.

Irritation of skin.

Prickling itching: of face.

Itching: constipation with liver complaints all over body intolerable.

" **Tissues.** Acts upon cerebro-spinal system, producing muscular twitchings and convulsions.

Irritation of skin in jaundice, liver complaint, and during pregnancy.

" **Touch. Passive Motion. Injuries.** Rubbing: > irritated gums.

Scratching: < itching.

" **Skin.** ‖ Violent itching all over body, without any visible eruption. θConstipation during pregnancy. θJaundice.

‖Intolerable itching all over body; worse at night, preventing sleep; scratching increases itching; there is nothing perceptible on skin; nor is there any swelling.

Jaundice; skin yellow in spots or all over, and itching excessively at night.

Digitized by Google

‖Terrible itching over whole body, with swelling of face and particularly of lips; she is compelled to scratch incessantly, but without relief; < at night; in bed; from warmth; cold water applied to skin causes burning; hands and face wounded by violent scratching; lasts 7–10 days, when desquamation of small scales from surface of whole body occurs; as soon as desquamation is completed, itching and swelling again return.

‖Pain under l. scapula, which continued three days, when an eruption made its appearance on axilla of affected side, and assumed the herpetic form, spreading in rings forward to sternum, and backward to spine, attended with much burning and smarting. θHerpes zoster.

‖Dry tettery eruption on arms and limbs, resembling zona.

‖Itching, without eruption, first on feet, every winter higher up, after 7 years reaches hips and abdomen.

[47] **Stages of Life, Constitution.** ‖‖Teething children.

A child, 5 or 6 years old; jaundice.

Woman, unmarried, æt. 36, suffered from chronic rheumatism; skin disease.

Lady, æt. 45; herpes zoster.

Woman, æt. 45, formerly asthmatic; painful sensation of splinter in r. side of neck, below lower jaw.

[48] **Relations.** Antidoted by: *Acon.*, which must be given preceding *Dolich.*, in cases of dentition attended by fever, to prevent convulsions.

Cured herpes zoster, after failure of *Rhus tox.*

DORYPHORA DECEMLINEATA.

The Colorado Potato Bug. *Coleoptera.*

"This insect belongs to the same family as the squash bug, the black potato bug, and the Cantharides—all possess the power of blistering the skin if bruised upon it. The Colorado potato bug has its original home in the Rocky Mountains, where it fed on a species of Solanum indigenous to that locality. It got a taste of the Solanum tuberosum, the common potato, and rapidly travelled East, until it reached the Atlantic." *Hale's Symptomatology.*

The tincture is prepared by crushing the live beetle and covering it with alcohol. Provings by Ruden and Jenkins, see *Allen's Encyclopædia*, v. 4, p. 167.

CLINICAL AUTHORITIES. — *Parotitis*, Ruden; *Gastric derangement*, Ruden, Hom. Clin., v. 3, p. 73; *Gonorrhœa*, Ruden, Hom. Clin., v. 3, p. 85; *Gleet*, Ruden, Hom. Clin., v. 3, p. 71.

[1] **Mind.** Stupor, with muttering and loud rumbling in bowels.
Delirious; talking and muttering about business matters.
Delirium, with red bloated face, protruding eyes, and pulse one hundred and twenty-four.
Irritable temper.

[2] **Sensorium.** Dizziness in head, with nausea and vomiting.
Congestion of blood to head; meningitis.

[3] **Inner Head.** Dull, heavy headache.

[4] **Sight and Eyes.** Sight much impaired.
Sensation of dimness and blackness before eyes.
Pupils dilated.
Eyes red, congested and very much protruded.
Eyes feel sore, as from overwork.
Inflammation of the eyes.

[5] **Upper Face.** Face bloated, red, like that of a confirmed drunkard.
Face mottled, puffed, eyes congested, staring; high fever, with delirium, vomiting and stupor.
Erysipelas of head and face.

[11] **Taste and Tongue.** Dark brown coating on tongue.

[12] **Inner Mouth.** ♀Violent heat; severe pain across kidneys, < by pressure and motion; full, hard pulse; face red and bloated; staring eyes; constipation and retention of urine. θParotitis.

[13] **Throat.** Burning in throat down œsophagus, with pain in stomach.
Throat feels sore, raw and constricted.

Digitized by Google

[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite; great thirst; craving for something sour; symptoms < by smoking.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Nausea and vomiting.

Vomiting: with stupor and delirium; of dark, grumous, acrid matter; of dirty brown fluid, with diarrhœa.

[17] **Scrobiculum and Stomach.** Pain in stomach.

‖Nausea, at times vomiting; faint feeling; very tired; trembling in all her limbs, especially hands; cramp-like constriction in pit of stomach; stools hard; difficult, painful urination. θGastric derangement.

[18] **Hypochondria.** Pain all over body, especially in region of spleen.

[19] **Abdomen.** Loud rumbling in abdomen, with stupor.

Abdomen feels very sore and tender.

Abdomen feels heavy, as if it were full; severe burning.

Burning pain in abdomen about umbilicus.

Pain in bowels, in hypogastric region.

Violent pain in bowels in r. side, passing downward to rectum.

Pain in bowels < by eating and drinking and taking a long breath.

[20] **Stool and Rectum.** ‖Stools hard. θGastric derangement.

Diarrhœa in morning, with intense pain in abdomen and burning in rectum.

Profuse and persistent diarrhœa.

Continued bloody, slimy diarrhœa.

‖Dysentery, with intense pain in rectum.

Feeling of heaviness in rectum.

[21] **Urinary Organs.** Retention of urine.

‖Difficult urination.

‖Dysuria, with burning, stinging pain.

Profuse dark red urine, with dirty sediment, and voided with much pain.

[22] **Male Sexual Organs.** ‖Itching and burning in glans penis, which is swollen and bluish-red; urethra inflamed, with excruciating pain, especially when urinating. θGonorrhœa.

‖Gleet and gonorrhœa.

[28] **Inner Chest and Lungs.** Soreness and oppression of chest.

[29] **Heart, Pulse and Circulation.** Pulse very weak, with coldness and collapse.

Pulse 120 to 140.

[31] **Neck and Back.** ‖Pain in back, in lumbar region.

[32] **Upper Limbs.** Swelling of whole arm, very painful; abraded spot on wrist developed into a deep ulcer, angry, red, with sticking, stinging pains through arms; ulcer

Digitized by Google

assumed a malignant character, eating until bones of wrist were exposed. (Local effects through an abraded surface.)
Could not guide pen while endeavoring to write.

[33] **Lower Limbs.** Swelling of feet, with burning and stinging; sensation as if full of pins.

[34] **Limbs in General.** ‖Great trembling in extremities. θGastric derangement.
Trembling in r. arm and leg.
Icy coldness of hands and feet.

[35] **Rest. Position. Motion.** Lie down: inclination to.
Slightest exercise: causes fatigue.
Talking: weakness <.
Walking: causes fainting sensation.
Motion: pain across kidneys <.

[36] **Nerves.** Restlessness without weariness.
Nervous restlessness; twitching and spasms.
Trembling in r. arm and leg as if a galvanic battery were attached to the extremity.
‖Great trembling in extremities. θGastric derangement.
Fatigued by slightest exercise.
Weak, languid; after sleeping.
Great weakness and heaviness, with inclination to lie down, weakness < by talking.
Great weariness increased by talking.
Sensation as if he would fall at every step, with dimness of sight.
Fainting sensation when walking.
Great, general prostration, ending in collapse.

[37] **Sleep.** Restless during night; constant tossing about.
Sleeplessness untill 12 at night, then restless sleep, with terrifying dreams.
Comatose slumber; wild dreams and screams as if in great distress.

[38] **Time.** 8 A.M. to 2 P.M.: violent fever.
Morning: diarrhœa.
Until 12 at night: sleepless, then restless sleep.
Night: restlessness.

[40] **Fever.** Coldness of hands and feet.
Fever; skin alternately cold and clammy, then hot and burning.
Violent fever, with cerebral congestion, vomiting and delirium; pulse 120 to 140.
Fever of typhoid character.
Violent fever from 8 A.M. to 2 P.M.

[41] **Attacks, Periodicity.** At times: vomiting.

[42] **Locality and Direction.** Right: pain in side of bowels; trembling in arm and leg.

Digitized by Google

[43] **Sensations.** Eyes feel sore, as from overwork; abdomen feels heavy, as if it were full; sensation in feet as if full of pins; trembling in r. arm and leg as if a galvanic battery were attached to them; as if he would fall at every step.

Pain: in stomach; all over body; in region of spleen; in bowels; in hypogastric region; in lumbar region; in arm.

Excruciating pain: in urethra.

Intense pain: in abdomen; in rectum.

Violent pains: in bowels; in r. side down to rectum.

Severe pain: across kidneys.

Burning pain: in abdomen.

Stinging pain: through arms.

Burning: in throat; down œsophagus; in abdomen; in rectum; in glans penis; in feet.

Cramplike constriction: in pit of stomach.

Sore feeling: in throat; in abdomen; in chest.

Dull: headache.

Heavy: headache.

Constrictive feeling: in throat.

Oppression: of chest.

Heaviness: feeling of, in rectum.

Trembling: in extremities.

Itching: in glans penis.

Coldness: of hands and feet.

[44] **Tissues.** The blood will not coagulate; blood globules disorganized as after serpent poisoning.

Enormous swelling of whole body, with the mental and cerebral symptoms.

General elastic swelling of whole body, which will not pit on pressure.

[45] **Touch. Passive Motion. Injuries.** Pressure: pain in kidneys <.

[47] **Stages of Life, Constitution.** T. M. Joliet, little girl, æt. 5; parotitis.

Mrs. B.; gastric derangement.

Robust young man, light hair, sanguine temperament; gleet.

Mr. G. L., æt. 25, weakly constitution, single, light hair, yellow complexion; gonorrhœa.

[48] **Relations.** Antidoted by: earth, which absorbs and neutralizes the poison; vinegar, or other vegetable acids; *Stramon.*

Compare: *Agar., Ailanth., Apis, Bellad., Canthar., Crotal., Laches., Stramon.*

DROSERA ROTUNDIFOLIA.

Round leaved Sundew. *Droseraceæ.*

Grows in mossy, turfy bogs in Europe, Northern Asia, and America.

The tincture is prepared from the active, fresh plant.

Used empirically by physicians in the sixteenth century (Dodoens), principally outwardly against skin eruptions.

Introduced into our Materia Medica by Hahnemann, and proved by himself and others. See *Allen's Encyclopedia*, vol. 4, p. 170.

Became famous as a remedy in whooping cough at Hahnemann's own recommendation based on observations of Wislicenus, one of the provers.

CLINICAL AUTHORITIES.—*Laryngitis*, Macfarlan, Raue's Rec., 1870, p. 156; *Hoarseness after catarrh*, Hartmann, Rück. Kl. Erf., vol. 3, p. 167; *Irritation in larynx with cough*, Baumann, Raue's Path., p. 319; *Cough*, Pemerl., Rück. Kl. Erf., vol 3, p. 12; *Spasmodic cough*, Hannes, Allg. Hom. [1] **Mind.** [1] Mental restlessness; when reading cannot dwell long on one subject, must change to something else.

[1] Depressed by persecutions of others on all sides, and also discouraged and solicitous about future.

[1] Anxiety: with flushes of heat; when alone, especially in evening, also when awaking at night; as if it would impel him to commit suicide by drowning.

Dread of ghosts and of being alone.

[1] Great mistrust.

Very irritable; a trifle will disturb; irascible, getting beside one's self with anger.

Selfwilled; obstinate; insists upon carrying out his plans.

Digitized by Google

[2] **Sensorium.** ‖Dulness and heaviness of head.
‖Vertigo when walking in open air, tendency to fall to left.
[3] **Inner Head.** ‖Lancinating pain in fore part of brain, < moving eyes, > from supporting head on hands.
‖Lancinating, tensive, frontal headache, < from stooping.
| |Pressive pain in forehead and zygoma, within outward.
Boring pain in forehead.
Headache above orbit when stooping, disappearing on walking.
| |Pressing headache (temples), with stupefaction and nausea (morning); < when stooping and from heat; > from motion and in cold air.
Aching pain above r. temple.
Soreness in temples.
‖Drawing pain in l. side of head.
‖Pressive headache.
Brain painfully affected by stepping.
[4] **Outer Head.** ‖Smarting, burning pain in scalp.
| |Sore feeling in skin of r. temple.
‖Itching, gnawing on fore part of scalp, > by rubbing.
‖Corrosive itching on scalp.
[5] **Sight and Eyes.** Frequent vanishing of sight, especially when reading, letters look pale and blurred; photophobia; eyes dazzled by light or glare of fire; they are very dry; nose dry and stopped up, stitches in eyes.
‖Like gauze before eyes; when reading letters run together. θAmblyopia.
Far-sighted; weakness of eyes when looking carefully at small objects; quivering before eyes; dazzling; < from light, daylight, candle-light.
| |Pupils first contracted, later dilated.
‖Protrusion of eyes.
‖Severe stitches, from within outward, in eyes.
Eyelids livid.
[6] **Hearing and Ears.** ‖Difficult hearing, with increased humming before ears.
‖Roaring, humming, and drumming in ears.
‖Pain in right internal ear, as if pressed together.
| |Sticking pain and aching, especially when swallowing.
Otalgia, with sticking pain in inner ear.
‖Stitches in ears.
[7] **Smell and Nose.** Nose dry and stopped up.
Nosebleed, < morning or evening, and on stooping.
‖Bleeding from nose and mouth. θPertussis.
Profuse fluent coryza, particularly in morning.
| |Frequent sneezing, with or without fluent coryza; < from sneezing.
[8] **Upper Face.** ‖Pale face, with sunken eyes; puffed and livid.

Digitized by Google

Cheeks and eyes sunken.
| | Prickling, burning pain in skin of cheek below l. eyelid.
| | Coldness of l. half of face, with stinging pain and dry heat on r. half of face.
| Heat of face, with cold hands.
| | Face-ache, aggravated by pressure and contact.
| | Small pustules, here and there, on face, with fine stitching sensation, < when touched.
Cold sweat on forehead.

[9] **Lower Face.** | Stitching, tearing pain on l. inferior maxilla, as in periosteum.
| | Burning in skin, at r. angle of mouth.
| | Lower lip cracked in the middle.
| Dryness of the lips and little sense of taste.
| | Black pores on the chin.

[10] **Teeth and Gums.** | Cold sensation in the body of an incisor.
| Stitching toothache, mornings, after warm drink.

[11] **Taste and Tongue.** Taste: bitter, in throat, after eating; putrid; bread tastes bitter; food seems tasteless.
| | Fine prickings on dorsum of tongue.
| Stitching, smarting pain in r. side and tip of tongue.
| Small, round, painless swelling in middle of tongue.
| | Whitish ulcer on tip of tongue.

[12] **Inner Mouth.** | | Smarting pain on inside of left cheek, like from pepper.
| Putrid, pus-like taste in mouth. θPhthisis.
| | Profuse discharge of watery saliva (water-brash).
| Bloody saliva.
| | Hemorrhage from the mouth.

[13] **Throat.** | Difficulty of swallowing solid food; œsophagus as if contracted.
| | Ulceration of velum.
| Sensation of dryness in fauces and throat with thirst.
| | Sensation in pharynx as if crumbs of bread had remained behind.
| Stinging in throat during deglutition.
| | Burning, rough sensation deep in throat, immediately after dinner.
| | Scraping in throat from eating salt food.
| | Hawking up of green or yellow mucus.
| Rough, scraping feeling of dryness deep in fauces and in region of soft palate, producing a short, hacking cough, accompanied by expectoration of yellow mucus, and hoarse voice, having a deep bass sound. θLaryngeal phthisis.
Throat dark, coppery, red, dry, but not shining; muscles of pharynx swollen. deglutition most painful; incessant cough, sometimes ending in vomiting.

[14] **Appetite, Thirst. Desires, Aversions.** ||Morning thirst.
|Aversion to pork.

[15] **Eating and Drinking.** ||Mouth in a bitter state when eating. θPregnancy.
|Right after dinner, burning raw feeling.
|Cough, < after drinking; after tobacco smoke. θPertussis.

[16] **Hiccough, Belching, Nausea and Vomiting.** ||Frequent hiccough.
||Eructations tasting bitter or sour; water-brash.
Nausea, with stupefying pressure in forehead.
||Nausea after fatty food; < after midnight till morning.
Nausea and retching.
Vomiting: of blood, of bile, in morning; of mucus, water, or food when coughing; after drinking; especially at night or before dinner; first food then mucus, at the end of the attack (pertussis).
Vomiting of slimy matter.
Worse after vomiting.

[17] **Scrobiculum and Stomach.** Clawing sensation in pit of stomach.
|Contractive tension at pit of stomach, as if everything would be drawn inwards, especially during deep inhalation, and with cough.

[18] **Hypochondria.** Anxious feeling in the hypochondria.
|Painful to touch, and when coughing.
||Must support the hypochondria with the hands when coughing. θPertussis.
|Constrictive pain in both hypochondria, impeding coughing; unable to cough on account of pain, unless hand is pressed upon pit of stomach.

[19] **Abdomen.** |Painful constriction of epigastrium.
|Dull stitch from r. to l. across abdomen, almost taking the breath, while walking.
||Stitches in r. side of abdomen while sitting.
||Stitch from left loin into penis.
|Constriction in abdomen, with vomiting. θPertussis.
|Bellyache after sour food.

[20] **Stool and Rectum.** |Outward pressing pain, independent of stool.
Frequent stool, with colic.
Stools: soft, fluid; loose; papescent; white, slimy and stinking, with watery, odorless urine.
Loose stool almost continually, but rather < after midnight; bloody, mucous or offensive stools, followed by pains in abdomen and small of back.
Before and after stool: tensive pain in upper part of abdomen while holding breath.

Google

After stool: ineffectual straining; constant inclination to stool; abdominal and dorsal pains.

[21] **Urinary Organs.** ‖Frequent urging to urinate, with scanty discharge, frequently only by drops.

‖Frequent, profuse urination.

‖Urine dark and of strong smell.

Urine watery, inodorous, with fetid mucous stool.

[22] **Male Sexual Organs.** Drawing stitches from l. loin into penis.

‖Itching stitches in the glans penis.

[23] **Female Sexual Organs.** ‖Delay of the first menses.

Menses too late; too scanty; suppression of menses; blood dark.

‖Leucorrhœa, with labor-like pain.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖‖Voice: hoarse, deep, requires exertion to speak; husky; hollow, toneless; cracked.

‖Catarrhal hoarseness, with or without coryza or cough; is only able to speak in a bass voice; hoarseness after measles.

‖Chronic persistent hoarseness resulting from repeated catarrhal attacks.

‖Great hoarseness, with spasmodic cough, after measles.

‖‖Epiglottis in constant motion to and fro, constant endeavor to cough; larynx very dry; patient involuntarily supports thyroid cartilage on swallowing or coughing, and there appears to be a constant strain in box of larynx, with disposition to vomit. θLaryngitis.

‖Constant tickling in larynx, causing cough and preventing sleep at night.

‖‖Sensation like from a feather in larynx, exciting cough.

‖‖Crawling in larynx, which provokes hacking cough, with sensation as if a soft substance were in it, with fine stitches extending thence to r. side of pharynx.

‖Bruised feeling in larynx whilst inhaling.

‖Constriction of the larynx when talking.

‖Mucus in the larynx, either hard or soft.

‖Chest and throat symptoms worse from talking or singing.

‖Laryngeal phthisis, with hoarseness, rapid emaciation.

[26] **Respiration.** ‖‖Oppression, with every word he speaks the throat contracts; not so when walking.

Respiration slow; predominant with moist sound.

Intolerable stitches when coughing and taking a deep inspiration, in the upper part of the chest near the axilla, > by pressing on affected part with the hand, with purulent expectoration mixed with blood.

Whilst inhaling, felt severe aching pains in and below both clavicles, over a small space in lungs; the infra-

Google

clavicular pain afterwards extended round to the scapulæ; also a bruised feeling of the larynx.

‖Sensation as if something in chest prevented exhalation when talking or coughing.

‖‖Oppressive sensation in chest as if expiration were prevented by coughing or talking.

‖‖During an expiration in evening, when lying in bed, sudden contraction of abdomen occasioning a heaving as if he would vomit and bringing on cough.

‖Difficult breathing, < after midnight.

‖Dyspnœa, especially on talking, with every word throat becomes constricted; no dyspnœa while walking.

‖Severe dyspnœa threatening suffocation; blueness of face and lips; cold sweat on forehead; vomiting of tough mucus. θWhooping cough.

‖Oppression of chest as if from holding back the breath.

‖Attack of suffocation; cannot recover the breath; gasping.

‖Asthma, particularly when talking, with contraction of throat at every word that is uttered.

‖‖Bad, offensive-smelling breath when coughing.

* **Cough.** ‖‖Deep sounding, hoarse barking cough.

‖‖Rough, scraping, dry sensation deep in fauces and soft palate, causing hacking cough, with yellow mucous expectoration and hoarseness, speaks only with exertion, and in a deep bass voice; oppression of chest as if air was withheld on talking and coughing, so that breath could not be expired.

‖Whooping cough; attacks, every one to three hours, with barking or dull-sounding coughs, choking breathing, caused by tickling or dryness in throat, or from a sensation of a soft feather in larynx; expectoration, only in morning, yellow and bitter; has to swallow the mucus.

‖Attacks of coughing preceded, fifteen or twenty minutes, by rattling of mucus in bronchial tubes to which patient solely ascribes attack of coughing. θWhooping cough.

‖‖Whooping cough, with feeling of constriction in chest and hypochondria, so that patient tries to support these parts with hands; < after midnight; perspires on waking from sleep.

‖Cough comes in fits, at long intervals; cough during intervals is short, not exhausting, and he considers it trifling in comparison with the tormenting attacks; the fits begin mildly, are short, but increase during course of disease, until cough becomes unceasing, the attacks occur in quick succession, and forces to sit up, always beginning with titillation and renewed inspiration, until finally vomiting of mucus (rarely of food) sets in, which finishes the paroxysm; great exhaustion after the

Digitized by Google

fit; frequently < at night on lying down. θWhooping cough.

Paroxysmal dry cough, exciting cause of which seems to be in abdomen with copious perspiration over whole body and culminating in an attack of severe nausea.

Spasmodic, nervous, and sympathetic cough.

Spasmodic cough of phthisical girls..

When coughing a feeling as if something kept the air in the chest, cannot cough right, cannot speak.

Whooping cough, with hemorrhage from mouth and nose, anguish, blue face, wheezing breathing, suffocation.

During cough: face pale or bluish; efforts to vomit; vomiting of water, mucus and food; stitches in muscles of chest; bleeding from nose or mouth; has to support chest and hypochondria; hoarseness; offensive breath; rising up in bed with fear and trembling.

Attacks characterized by certain typhoid conditions, with severe spasmodic retraction of abdomen, followed by vomiting of food, mucus and water. θWhooping cough.

Cough which marks the sequelæ of measles, especially when it occurs in paroxysms, and is < in afternoon and evening; even when cough is attended by bloody and purulent expectoration.

Very hoarse cough, < after midnight, during or after measles.

Spasmodic cough, attended by retching and vomiting.

Cough when singing, causing smarting in larynx.

Harassing, titillating cough in children, not at all during day, but commences as soon as head touches pillow at night.

Cough, in evening, immediately after lying down.

The fever and cough, which is very hoarse, are worse after twelve at night. θBronchitis infantum.

Awakes at night about 2 o'clock, coughs for a short time and then falls asleep again.

Nocturnal cough of phthisical patients.

Severe cough of young phthisical subjects, with bloody and purulent expectoration.

Cough sounds loose, nothing comes up. θCatarrh.

Cough, with expectoration of bright red frothy or of black clotted blood.

Bloody and purulent expectoration after measles.

Very violent cough; spitting of blood and pus, with violent pains in chest. θPhthisis.

Expectoration: yellow; bitter; offensive; bloody; pus-like; salty; has to be swallowed.

Cough aggravated: by warmth; drinking; tobacco smoke; laughing; singing; weeping; after lying down; after midnight or in the morning.

Google

[28] **Inner Chest and Lungs.** ‖Constriction of chest and hypochondria.
‖Cough with sense of constriction in chest, which seems to hold breath back and prevent coughing, with pain in ribs, so that he is compelled to support the parts with hands; vomiting of food, then of mucus and water.
‖‖Tightness of chest, especially when talking, or even uttering a single word; > while walking; the throat seems to contract.
‖‖Severe stitches in chest when sneezing or coughing, must press on chest with hands, for relief.
‖Violent oppressive stitching pain across chest, passing off during motion.
‖Sensation of oppression in chest as if the air were retained when coughing, and as if breath could not be expelled.
‖Burning sensation in centre of chest.
‖Bronchitis of old age, in connection with emphysema or bronchiectasie; nocturnal paroxysms; < lying down; cough seems to come from abdomen, shaking all the muscles of chest and body, with much exhaustion after attack; expectoration of yellow mucus or pus; paroxysms of cough from one to two hours apart.
‖Phthisis with severe pains in chest, purulent expectoration and foul pus-like taste in mouth.
‖Tuberculosis.

[30] **Outer Chest.** ‖Stitches in muscles of chest, when breathing or coughing.
‖‖Sternum painful when pressing on it, as from festering under skin.
‖Black pores on chest and shoulder.

[31] **Neck and Back.** ‖Neck stiff and painful on motion.
Nape of neck painful to touch.
‖Pain between scapulæ drawing to small of back.
‖‖Stitching tearing from spine to anterior spinous process of l. ilium, when sitting.
‖Back pains as if bruised, in the morning.
‖‖Itching stitch in coccyx when sitting.

[32] **Upper Limbs.** ‖‖Quivering on r. shoulder when at rest.
‖‖Nightly pains in humerus, going off by day during motion.
‖Coldness of the hands.
Deep ulcer on back of r. hand discharging bloody water.
Red spots on back of hand and behind wrist.
‖Fingers spasmodically contracted, rigid in grasping.

[33] **Lower Limbs.** ‖‖Laming pain in r. hip-joint and thigh, with pain in ankle, as if sprained; limp when walking.
‖‖Violent stitch in os ischium on rising from a seat.
‖Pressing pain in posterior muscles of thigh, < from

Digitized by Google

pressure and stooping; could not lie thereon at night, passes off after rising.

‖ Occasional stitches in middle of l. thigh anteriorly.

‖ Fine cutting stitch in r. calf, coming on when sitting, passing off when walking.

‖ Tearing pain in r. ankle, as if sprained, only when walking.

‖ Stiffness of ankles.

‖ Feet feel chilly, covered with a cold sweat.

Limbs in General. ‖ All the limbs feel lame and bruised as if beaten, and are outwardly painful. θ Catarrhal fever.

‖ Gnawing and stitching pain in bones of limbs, especially severe at joints; severe stitches in joints; less painful during motion than during rest.

‖ Painful stitching pressure in muscles of upper and lower limbs, in every position.

Rest. Position. Motion. During rest: quivering in r. shoulder; stitches in joints <; shivering; internal chill.

Lying: in bed, during expiration sudden contraction of abdomen; great exhaustion after fit of coughing; on side < pain in muscles of thigh; on back, snoring; forced to lie down from chilliness; at night, brings on titillating cough in children; cough in evening <; pain in ulcers < when lying on sore side.

Rising from seat: violent stitching in os ischium.

Sitting: pain in side of abdomen; cough forces him to sit up; tearing from spine to anterior spinous process of l. ilium; itching stitch in coccyx; fine cutting stitch in r. calf <; pain in ulcers <.

Supporting: head on hands > pains in brain; hypochondria with hands while coughing; thyroid cartilage when swallowing.

Stooping: frontal headache <; pain in temples <; nosebleed <; pain in muscles of thigh <.

Stepping: affects brain painfully.

Walking: vertigo; tendency to fall; headache >; pain across abdomen; > oppression and contraction of throat; dyspnœa >; causes perspiration; pain in ankle <; > stitches in r. calf; pain in ankle only when walking; pain in ulcers.

Singing: < throat and chest symptoms.

Cough: causes smarting in larynx.

Talking: constriction of larynx; < chest and throat symptoms; sensation as if something prevented exhalation; oppressive sensation in chest; dyspnœa; constriction of throat; asthma.

Motion: of eyes < pains in brain; pain in temples >; of epiglottis constantly to and fro; > violent stitching

Digitized by Google

pains across chest; neck painful; pain in humerus >; stitches in joints >; > shivering.

[36] **Nerves.** ‖Weakness of whole body with sunken eyes and cheeks.

‖Great exhaustion after coughing fits. θWhooping cough.

Torpidity; attacks, with numbness.

‖Epileptic attacks: with rigidity; with twitching of limbs; after attack, hæmoptysis and sleep.

[37] **Sleep.** ‖Frequent yawning and stretching.

Sleepiness immediately after sunset.

Frequent starting from sleep, at night, as from fright, yet when awake is not fearful.

‖Sleeplessness or frequent waking from sleep.

Snoring when lying on back, asleep.

Dreams: vivid; partly pleasant, partly anxious; vexatious, over wrong doing of others; of thirst and drinking, awakes, is thirsty and must drink.

On waking, great weariness.

‖Perspires immediately on waking from sleep. θPertussis.

[38] **Time.** Morning: headache in temples; nosebleed <; profuse fluent coryza; toothache; thirst; vomiting; expectoration; pain in back; pain in ulcers <.

2 A.M.: wakes coughing.

Forenoon: chill.

Afternoon: cough <; towards evening warmth of upper portion of body.

Lasting till 3 P.M.: thirst after chilliness; headache; heat of face.

By day: pain in humerus >; chill.

Immediately after sunset: sleepiness.

Evening: anxiety; flushes of heat; nosebleed <; during expiration sudden contraction of abdomen; cough <; thirst, headache and heat of face after chilliness >.

Night: anxiety; flushes of heat; vomiting after drinking; great exhaustion after fit of coughing; paroxysms of bronchitis; pain in humerus; frequent starting from sleep; in bed, chilliness; internal chill; heat; only at night, in children, harassing, titillating cough; cough of phthisical patients; warm sweat.

After midnight: nausea after fatty food; stools <; difficult breathing <; cough <; hoarse cough <; coldness of l. side of face, r. half hot and dry; fever and cough <; heat <; warm sweat <; cutting pains in ulcers <.

[39] **Temperature and Weather.** Open air: vertigo when walking.

Warm drink: produces toothache.

Warmth: < cough; < pain in ulcers.

Digitized by Google

On getting warm in bed: cough; pain in long bones.
Heat: pain in temples <.
Cold air: > pain in temples; >pain in ulcers.
After undressing: itching.

[40] **Fever.** Rigors or shuddering spells.
Chill with icy-cold hands, blue nails, cold, pale face, and cold extremities; must lie down.
Chill in forenoon.
Always feels too cold, cannot get warm; feels cold at night in bed; shivering during rest, none during motion.
Frequent crawls over body with cold hands and hot face.
Cannot keep from shivering and feeling cold, although body is warm to touch.
Internal chill at night, in bed and during rest.
Chill during the day, heat at night.
One-sided chill or coldness, principally left side.
Whooping cough with chills and disposition to sink in the chill.
After chilliness, slight thirst, heaviness of head, throbbing pain in occiput, and heat of face, usual warmth of rest of body, lasting till 3 P.M.; feels well in evening.
After midnight, coldness of l. half of face, with sticking pains in it; r. half hot and dry.
Febrile shivers over whole body, with heat of face and icy coldness of hands, no thirst.
Warmth of upper portion of body towards evening.
Heat and redness of face.
Heat almost exclusively on face and head.
Painful heaviness and lameness in all the limbs, frequent shudderings over whole body, coldness of hands with heat of face. θCatarrhal fever.
Profuse discharge of watery saliva during febrile stage.
Heat, without thirst.
Heat, worse after midnight.
Cold sweat on forehead, feet, face and abdomen.
Warm sweat at night, particularly after midnight and in morning hours, most profuse on face and abdomen.
Sweat over whole body, with a cough which brought on violent retching.
Severe chill with cold face, icy coldness of hands and feet, and bilious vomiting; heat accompanied by violent pressing and throbbing pains in head, and spasmodic cough; apyrexia accompanied by gastric symptoms.
Intermittent fever, with sore throat and nausea.
Paroxysm before 9 A.M. every morning. θIntermittent.
Fevers occurring when whooping cough is epidemic.

[41] **Attacks, Periodicity.** Fifteen or twenty minutes before attacks of coughing rattling of mucus in bronchial tubes.

Digitized by Google

Frequent: vanishing of sight; sneezing; hiccough; stool with colic; urging to urinate; profuse urination; great exhaustion, after fit of coughing, yawning; stretching; starting from sleep; waking from sleep; crawls over body; shuddering over whole body.

Attacks: of vomiting; of cough at long intervals; of cough occur in quick succession; of severe nausea after cough; of torpidity with numbness; epileptic.

Evening one to three hours: attacks of whooping cough.

Paroxysms: of cough; of nocturnal bronchitis.

[42] **Locality and Direction.** Left: tendency to fall to side; pain in side of head; pain in skin of cheek below eyelid; coldness of half of face; pain in inferior maxilla; pain on inside of cheek; pain from loin to penis; tearing from spine to anterior spinous process of ilium; stitches in middle of thigh; chill principally l. side; side of face cold.

Right: pain above temple; soreness of skin of temple; pain in internal ear; pain and heat on side of face; burning in angle of mouth; pain in side and tip of tongue; in side of abdomen; stitches to side of pharynx; quivering on shoulder; deep ulcer on back of hand; laming pain in hip joint and thigh; cutting stitch in calf; tearing pain in ankle; side of face hot and dry.

From r. to l.: stitches across abdomen.

From within outward: pain in forehead; stitches in eyes.

Outward: pain in rectum.

[43] **Sensations.** Pain in ear as if pressed together; œsophagus as if contracted; in pharynx as if crumbs of bread were left behind; sensation in pit of stomach as if everything would be drawn inwards; sensation like from a feather in throat; sensation as if a soft substance were in larynx; as if something in chest prevented exhalation; oppression of chest as if from holding back the breath; as if something kept the air in the chest; limbs feel as if beaten and sore, as from too hard a bed.

Pain: in r. internal ear; in throat when swallowing; in abdomen; in small of back; in ribs; between scapulæ drawing to small of back; in humerus; in ankle.

Tearing pain: in l. inferior maxilla; from spine to anterior spinous process of l. ilium; in r. ankle.

Violent pains: in chest.

Lancinating pain: in fore part of brain.

Cutting stitch: in r. calf.

Stitches: in eyes; in ears; in r. side of abdomen; from l. loin into penis; from larynx to pharynx; in upper part of chest; in muscles of chest; in chest; in middle of l. thigh; in joints.

Digitized by Google

Stitching pain: in l. inferior maxilla; in teeth; in r. side and tip of tongue; across chest; from spine to anterior spinous process of l. ilium; in os ischium; in bones of limbs; in joints; in muscles of upper and lower limbs.
Stinging pain: on r. side of face; in throat; in joints; in long bones; in skin.
Drawing pain in l. side of head.
Gnawing: on fore part of scalp; in bones of limbs; in joints; in skin.
Constrictive pain: in both hypochondria; of epigastrium.
Clawing: in pit of stomach.
Labor-like pains: in abdomen.
Pressing pain: in temples; in head; in rectum; in posterior muscles of thigh.
Pressive pain: in forehead.
Sticking pain: in ear; in face.
Throbbing pain: in occiput.
Boring pain: in forehead.
Burning pain: in scalp; in skin of cheek.
Prickling pain: in skin of l. cheek; on dorsum of tongue.
Smarting pain: in scalp; in side and base of tongue; on inside of cheek.
Itching stitches: in the glans penis; in coccyx.
Dull stitch: across abdomen.
Bruised feeling: in larynx; in back.
Sprained feeling: in ankle.
Aching pain: above r. temple; in ear; in face; in belly; in and below both clavicles, extending to scapulæ.
Soreness: in temples; in skin of r. temple.
Scraping: in throat; in region of soft palate.
Stitching sensation: in pustules on face.
Burning: in skin at angle of mouth; deep in throat; in centre of chest.
Laming pain: in r. hip joint; in thigh.
Tensive pain: in upper part of abdomen.
Contraction: of abdomen; of epigastrium.
Lameness: in all the limbs.
Heaviness: of head; of all the limbs.
Dulness of head.
Tension in head; at pit of stomach.
Stiffness: of neck; of ankles.
Oppression: in throat; in chest.
Constriction: in abdomen; in larynx; of throat; in chest; in hypochondria.
Pressure: in forehead; in muscles of upper and lower limbs.
Dry heat: on r. side of face.
Humming: in ears.

Digitized by Google

Drumming in ears.
Roaring: in ears.
Quivering: on r. shoulder.
Dryness: of lips; in fauces; in throat; of larynx.
Rough feeling: in throat; in region of soft palate.
Itching: in fore part of scalp; in skin.
Crawling: in larynx.
Tickling: in larynx.
Coldness: of l. half of face; of hands; of the body of an incisor.

[44] **Tissues.** Acts powerfully upon the respiratory system, through its influence on the pneumogastric nerve, producing a spasmodic dry cough, simulating that of whooping cough.
The attacks of cough are of a spastic character, depending on irritation of the vagus, and affect the bronchi; whooping cough, bronchial catarrh, bronchitis in senility, emphysema and bronchiectasie.
Hemorrhages, blood light-red.
Rapid emaciation, with acute phthisis laryngealis.
Gnawing, stinging pains in joints and long bones.

[45] **Touch. Passive Motion. Injuries.** Touch: stitching sensation in pustules on face <; hypochondria painful; nape of neck painful.
Pressure: faceache <; of hand on pit of stomach > pain when coughing; > stitches in chest; on chest when coughing or sneezing > stitches; pain in muscles of thigh <.
Rubbing: itching on scalp >; > pain in ulcers.

[46] **Skin.** ‖Prickling, burning, stinging, itching, gnawing in skin.
‖Itching > by scratching, rubbing or wiping with hand.
‖Violent itching while undressing; when scratching, skin readily peels off.
▮Eruption, like measles.
‖Eruption, with painful soreness or stinging.
Black pores on chest, shoulder and chin.
▮Bleeding, burning ulcers; cutting pains; pus bloody, thin and watery, ichorous; < in morning and during latter part of night; also when lying on sore side, when sitting, when getting warm in bed; > from cold, rubbing and while walking; r. side.
▮▮Measles; very hoarse cough follows or accompanies the disease, < after midnight.

[47] **Stages of Life, Constitution.** Boy, æt. 1, after having been cured of dysenteric diarrhœa by *Chamom.*; whooping cough.
Girl, æt. 1½, has been suffering for half a year from cough which has grown gradually more severe.

Digitized by Google

DULCAMARA.

Bittersweet. *Solanaceæ.*

A climbing shrub, from six to eight feet high, flowering in clusters, berries oval, bright scarlet; grows in moist places through Europe and North America.

The tincture is prepared from the fresh stems and leaves, gathered before flowering.

Introduced by Hahnemann, and extensively proved by him and others, among whom were Gross, Nenning, Rückert, and Stapf, later by Rockwith (tincture), Berrige and Robinson (high potencies). See Allen's Encyclopedia, vol. 4, p. 178.

[1] **Mind.** ‖Cannot find the right word.
‖Mental confusion, cannot concentrate his thoughts.
‖‖Delirium at night with the pain, and during fever-heat. Imbecility more frequent than insanity.
‖Asks for one thing or another, rejecting it when proffered.
‖Depressed; solicitude concerning the future.
‖Quarrelsome, irritable mood; easily angered.
‖Great restlessness and impatience.
‖Inclination to scold, without being angry.

[2] **Sensorium.** Momentary vertigo; vertigo when walking, with darkness before eyes.
‖On awaking in morning, dizzy, dark before eyes.
‖‖Dulness of senses.
‖Dulness and painful stupefaction of head.
‖Heaviness of head.

[3] **Inner Head.** ‖‖Sensation as of a board pressing against the forehead.
‖Boring, burning in forehead, with digging in brain; < from motion, even talking; head heavy; increased flow of saliva, with dryness of tongue and thirst; pulse hard and tense; great weakness and prostration in limbs.
‖‖Boring headache from within to without, in the temples and forehead; < before midnight and when lying quiet.
‖‖Pressing, stupefying pain in forehead, with obstruction of nose.
‖‖Bursting pains extending from forehead to bridge of nose.
‖Stupefying ache in occiput, ascending from nape of neck.
‖Chilliness in cerebellum and over back, returning every evening; cerebellum as if enlarged; < in cold, damp weather; < until 2 P.M; > better lying down.
‖Congestion to head, buzzing in ears, dull hearing; < from getting feet wet.

Digitized by Google

‖Feeling as if head was enlarged.
‖Continual dull pain in head, chest, and stomach, with great uneasiness, depression of spirits, labored respiration, mental confusion, and inability to concentrate thoughts. θChronic headache.
‖‖Catarrhal and rheumatic headaches, < in damp, cold weather.

[4] **Outer Head.** ‖Sensation of chilliness in cerebellum and over back; feeling as if hair stood on end; recurs every evening.
‖Ringworm of scalp; glands about throat swollen.
‖Thick crusts on scalp, causing hair to fall out.
‖‖Scald-head, thick, brown crusts with reddish borders on forehead, temples, and chin, bleeding when scratched.
‖Tinea capitis, crusta lactea and dandruff, < by change of weather.

[5] **Sight and Eyes.** ‖‖Aching in eyes when reading; sight dim; scintillations; < at rest.
‖‖Threatened amaurosis in scrofulous children.
‖Dim sight, sees as through a gauze.
‖‖Sparks before eyes.
‖‖Sensation as if fire were darting out of eyes, when walking in sun or in room.
‖‖Pupils greatly dilated.
‖Idiopathic iritis after exposure in damp weather; < at night, also in cold air; > during motion and from warmth.
‖Ophthalmia; scrofulous, from every exposure to cold.
‖‖Ophthalmia neonatorum (often accompanied by constipation), with chemosis of conjunctiva.
‖Scrofulous blepharophthalmia and adenitis; crusty eruption on margin of eyelids and swelling and induration of cervical glands.
‖‖Twitching of eyelids in cold air.
‖‖Paralysis of upper lids.
‖Eruption of yellow vesicles under eyes; bluish-red cheeks.

[6] **Hearing and Ears.** ‖Buzzing in the ears.
‖Dull pains, humming in ears, obtuse hearing.
‖‖Earache; nausea; buzzing; < at night and when still.
‖‖Earache the whole night, preventing sleep.
‖Stitches in auditory meatus and parotid gland.
‖Swelling of parotids; also after measles.

[7] **Smell and Nose.** ‖Nosebleed, hot, clear blood; pressure above nose; < after getting wet.
‖Coryza, dry; > during motion; < during rest; renewed by slightest exposure, and < in cold air.
‖Severe coryza, skin hot, dry; limbs cold, stiff, numb and painful; general offensive sweat; coryza with children.

Digitized by Google

‖Nostrils entirely filled up, preventing breathing through nose, constant sneezing, profuse discharge of water from nose and eyes, < in open air, > in closed room, < on awaking in morning, in evening, eyes sometimes swelled and full, at one time nose most affected, then again eyes, cannot be near cut grass or newly mown hay, > at seaside. θHay fever.

‖Stoppage of nose; discharge suppressed from least contact with cold air.

‖‖Nasal catarrh dry, in a dry atmosphere.

[8] **Upper Face.** ‖Complexion pale, watery or milky.

‖‖Face pale, with circumscribed red cheeks.

‖Face bloated; dropsy.

‖Facial neuralgia on l. side, involving temple, ear, orbit and jaws; usually seemed to start from malar bone; paroxysms preceded by the parts becoming very cold, and attended by canine hunger; < or excited by slightest exposure to cold; > by external warmth.

‖Faceache and asthma, after disappearance of tetters in face.

‖‖Humid eruptions on cheeks.

‖‖Pimples and little ulcers around mouth, with tearing pains when moving the parts.

‖‖Thick brown-yellow crusts on face, forehead, temples and chin; crusta lactea.

‖Thick brown herpetic crusts on face, with reddish borders, bleeding when scratched.

‖Impetigo faciei.

‖‖Warts and eruptions on face.

‖‖Convulsions beginning in face.

[9] **Lower Face.** ‖‖Twitchings of lips when in the cold air.

‖Toothache with salivation.

Teeth feel blunt.

‖Mouth distorted; drawn to one side.

[10] **Teeth and Gums.** ‖Toothache from cold, especially with diarrhœa; confusion in head; profuse salivation; teeth feel blunt, or as if asleep.

‖Scurvy from cold.

‖Receding, spongy gums; ptyalism.

[11] **Taste and Tongue.** ‖Bitter taste.

‖‖Itching, crawling on tip of tongue.

‖Mouth and tongue dry; dry, swollen tongue.

‖‖Dryness and roughness of tongue, with much thirst and increased flow of saliva.

‖Swelling of tongue, hindering speech and impeding breathing.

‖‖Inarticulate speech from a swollen tongue, but talks incessantly.

Digitized by Google

‖Tongue and jaws become lame, if cold air or water chills him.

‖‖Tongue paralyzed from cold.

12 **Inner Mouth.** ‖Saliva tenacious, soap-like; gums spongy.

‖Increased flow of saliva; rheumatic.

‖‖Mouth dry, without thirst.

‖Stomacace, rheumatic, also after abuse of mercury, with ptyalism and swollen cervical glands.

‖Mucous membrane of mouth greatly swollen and very red; throughout its whole extent here and there raw, excoriated and very painful spots denuded of epithelium; talking, chewing, and swallowing greatly impeded; teeth thickly coated with tenacious, foul mucus, deeply imprinting cheeks and edges of tongue; constant flow of saliva, which as well as the breath, has a fetid, putrefactive odor; attack preceded by paleness of face, heaviness of eyes, and lassitude of limbs. θStomacace.

‖Ulceration trivial, but swelling extreme, with spongy, loose gums and swollen tongue; holds cold water constantly in mouth, as pain and heat is > thereby. θCancrum oris.

13 **Throat.** ‖‖Much mucus in fauces.

‖‖Continual hawking up of very tough saliva, with much rawness in fauces.

‖Tonsillitis from every cold change.

‖Pressure, as if uvula were too long.

‖Catarrhal angina after catching cold; hyperæmia of soft palate and uvula; swelling of tonsils; difficult deglutition.

14 **Appetite, Thirst. Desires, Aversions.** ‖Hunger, without appetite. θPemphigus.

Hunger, after the fever.

‖Great thirst for cold drinks.

‖Unquenchable thirst.

‖Aversion to food; shuddering as though he would vomit.

16 **Hiccough, Belching, Nausea and Vomiting.** ‖‖Empty eructations, with shuddering as from disgust.

‖‖Frequent eructations while eating.

‖‖Nausea, loss of appetite. θCholerine.

‖Nausea, vomiting, disgust for coffee, great thirst.

‖Nausea accompanies the desire for stool; general prostration. θDiarrhœa from cool change of weather.

‖Great chilliness during vomiting.

‖Vomiting, early in morning, of tenacious mucus.

‖Vomiting: of greenish, yellow, slimy substances, together with the liquid drank; after cold drinks.

17 **Scrobiculum and Stomach.** ‖Retraction and burning in epigastric region.

Digitized by Google

Sensation of inflation in pit of stomach, with disagreeable sensation of emptiness in abdomen.

Diaphragmitis, with simultaneous rheumatic affections of spinal cord.

Indigestion with chilliness, < every cool change of weather.

19 **Abdomen.** Cutting pain about navel.

Violent pinching in abdomen, as if worms were crawling up and down in it and were gnawing and pinching the parts.

Colic, as if diarrhœa would occur, with rumbling in bowels and pain in small of back.

Colic after a cold; griping, nausea, followed by diarrhœa.

Colic, such as is usually caused by cold and wet weather.

Dropsy of the abdomen.

Swelling of inguinal glands from a cold.

20 **Stool and Rectum.** Vomiting and diarrhœa, with great inclination to chilliness during vomiting; copious mucous, or watery yellowish evacuations, expelled with much force; faintness when at stool. θInfluenza.

Desire for stool, in evening, with griping in whole lower abdomen, followed by a large, moist, at last very thin, sour smelling stool, after which relief, but feeling of weakness.

Nightly stools with colic, especially in umbilical region; loss of appetite, thirst, nausea, vomiting, pale face, languor, restlessness.

Severe cutting in abdomen, < about umbilicus, followed by nausea, cold sweat, watery diarrhœa and occasional vomiting; at night, stools follow each other in rapid succession, nausea is constant, with eructations and violent thirst; biting in rectum as from salt; evacuations often green, bilious. θAfter exposure.

Alternately watery, or slimy, or dark-brown fecal diarrhœa, preceded by cutting in abdomen and followed by burning in anus; tongue coated, no appetite; abdomen bloated. θDiarrhœa and catarrh of stomach.

Bloody diarrhœa of fifteen months duration, brought on by exposure to cold and dampness; violent cutting around navel, < at night; unceasing, unquenchable thirst; pain and diarrhœa allow no sleep at night; rectum protrudes; biting at anus, as from pepper.

Diarrhœa with great prostration or colicky pains around umbilicus; < after every change of cold weather.

Drawing and tearing in limbs, stiffness of limbs; painful stiffness of nape of neck; pain in small of back; diarrhœa without much pain; little urging; slimy, bloody discharges. θDysentery.

Digitized by Google

‖Profuse diarrhœa with severe cutting in abdomen; evacuations mucous and bloody with tenesmus and pain in back; chilliness alternating with heat, great thirst.

‖Patient lies in a constant drowsy condition, cheeks slightly flushed, soft and painless bloating of abdomen, great emaciation of body, aversion to all food; painless, thin, yellowish, greenish, watery stools, sometimes passing involuntarily, and containing flakes of mucus; urine turbid with white sediment; neither speaks nor eats; at night, moaning and restless tossing about.

‖Patient pale, weak, emaciated and without least desire for food; after eating, morning, and frequently in evening, and particularly in damp weather, watery, slimy, lienteric stool, preceded by pains in abdomen and followed by tenesmus. θChronic diarrhœa.

‖Thin stools, several afternoons in succession, with flatulence.

‖‖Yellow watery diarrhœa twice a day, with tearing cutting colic before each evacuation, as after taking cold.

‖‖Slimy diarrhœa with faintness.

‖Slimy, alternate yellow and greenish diarrhœa.

‖Slimy, brown, liquid stools. θPemphigus.

‖Intestinal catarrh with mucous stools and tenesmus.

‖‖Chronic, bloody diarrhœa, with biting at anus, or with vomiting, eructations and thirst.

‖Stools: frequent; scanty; corrosive; whitish, watery; with flocculi; slimy, mucous, watery, yellow-green; changeable, white, yellow or green; watery; sour smelling; nausea, with desire to evacuate; < at night and in wet weather.

‖‖Diarrhœa: from cold, or change from warm to cold, especially cold, damp weather; in morning, profuse thin stools; of rheumatic origin; during dentition; with colic, particularly in summer; with prolapsus recti.

‖Dysentery, from cold, damp weather; increased flow of saliva; burning, itching of rectum; heat of skin; thirst.

‖Cholera infantum, relapse from an unusually cold night or caused thereby.

‖Constipation and painful strangury.

Urinary Organs. ‖Dropsy, with pain in region of kidneys, and albumen in urine.

‖‖Bright's disease from exposure to cold and dampness.

‖Constant desire to urinate, felt deep in abdomen. θCystitis.

‖Constant desire to urinate, with an unpleasant sensation of bearing down towards the vesical region and urethra.

‖Retention of urine; strangury from cold, or cold drinks.

‖‖Urine passed involuntarily. θParalysis of bladder.

‖Catarrh with strangury, followed after six weeks by in-

Digitized by Google

continence of urine; very impatient, scolding and irritable mood.

‖Painful pressing about bladder and urethra, discharge of a few drops of urine, with mucous sediment.

‖Burning in meatus urinarius while urinating.

‖Urine: scanty, fetid, turbid; on standing, oily; containing a tough, jelly-like, white or red mucus mixed with blood; milky; fetid or muco-purulent; reddish, burning.

‖Emission of urine, drop by drop; slimy sediment.

‖Urine offensive, turbid when passed, and excoriating the skin. θPemphigus.

‖Catarrh of the bladder from taking cold in damp weather.

[22] **Male Sexual Organs.** ‖Impotence; herpes on genitals. Herpes: preputialis, bleeding; brown, dry, humid or furfuraceous; painful; red, pale-red, or with a red areola; round, scaly and small; suppurating, yellow.

[23] **Female Sexual Organs.** ‖Heat and itching in genitals, with desire for an embrace, < by a cold change in the weather.

‖Menses too late and too short; blood watery, thin; suppressed by cold.

‖Dysmenorrhœa in those taking cold easily; has blotches all over, especially in cold, damp weather; liable to take cold in head.

‖Rash before menses.

‖As a forerunner of catamenia, a rash appearing on skin, with extraordinary sexual excitement during rash and catamenia.

‖Herpetic eruptions on vulva, < by every cold change of weather, or by exposure in cold, damp situations.

‖Catarrhal ailments in damp, cold weather.

‖Mammæ engorged, hard, sore and painful, with leucorrhœa or amenorrhœa.

[24] **Pregnancy. Parturition. Lactation.** ‖Threatened miscarriage induced by exposure in a damp, cold place, as in a spring-house or cellar.

‖Lochia suppressed by cold or damp.

‖Mammæ swollen, inactive, painless, itching, in consequence of a cold which seems to have settled in them.

‖‖Suppression of milk or lochia, from taking cold.

‖‖Herpes on mammæ; nursing women.

‖‖After weaning, mother has eruptions on the skin; sore nipples.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖‖Rough, hoarse voice. θCatarrh after measles.

‖Constant titillation in larynx, with desire to cough.

‖Trachea full of mucus, tough, greenish expectoration with moderate cough. θLaryngo tracheitis.

Digitized by Google

‖Influenza.
‖Bronchitis of children, caused by cold, damp air, with offensive smelling night-sweats.

[26] **Respiration.** ‖Labored respiration.
‖Asthma, with faceache, after disappearance of tetters in face.
‖Asthma humidum, dyspnœa, loose rattling cough, copious sputa; < during wet weather.
‖Oppression of chest, from mucus.

[27] **Cough.** ‖Cough dry, hoarse, and rough, or, loose, with copious expectoration of mucus, and dull hearing. θCatarrhal fever.
‖‖Cough from damp, cold atmosphere, or from getting wet; must cough a long time to expel phlegm, especially infants and old people; threatened paralysis of vagi.
‖Spasmodic cough, with profuse secretion of mucus in larynx and trachea.
‖Barking cough after a deep breath.
‖Panting cough, like whooping cough, < from each deep inspiration.
‖‖Whooping cough; attacks excited by excessive secretion of mucus in larynx and trachea; during each attack easy expectoration of tasteless mucus, often streaked with blood.
‖‖Chronic mucous cough after measles.
‖Cough: < lying down, from warmth of room, or deep inspiration; > in open air.
During cough: stitches in sides; hoarseness.
‖Tough, greenish expectoration, with moderate cough; diarrhœa; great disposition to catch cold. θPhthisis.
‖‖Easy expectoration of tasteless mucus, often streaked with blood.
‖‖Expectoration of bright blood.

[28] **Inner Chest and Lungs.** ‖Mucus on chest, must cough long before raising it; suffocative catarrh.
‖Bronchitis; offensive smelling night-sweats.
‖Catarrhal affections of chest, with or without mucous rales; cough with either easy or difficult expectoration; pulse excited.
‖Tuberculosis in scrofulous subjects; < in changes from warm to cold; sputa tough, green; cough moderate; stitches here and there in chest; diarrhœa.
‖Phthisis mucosa.
‖Rheumatic pleuritis and pleuro-pneumonia, with tough, difficult, discolored sputa.
‖Continuous irritable states from rheumatic pleuritis and pleuro-pneumonia, with tough, difficult, discolored expectoration; simultaneously hyperæmia of cord.

Digitized by Google

‖Pneumonia notha, when the morbid condition has lasted some time, and has almost developed into a chronic affection, a preponderance of inflammatory symptoms being present.

‖Hydrothorax, < in wet weather.

‖Hæmoptysis, bright red; tickling in larynx; < at rest; caused by a cold or protracted loose cough.

| |Deep cutting pain in l. side of chest, close below clavicle, > by pressing on part.

‖Dull stitch in chest below r. clavicle from within outward.

‖Pain in l. chest, as if lung moved in waves.

| |Dull stitching pain in r. side of chest, in region of third rib, especially when pressing on part, when the pain went to small of back and extended between the shoulders; with stitches in border of l. scapula, during inspiration.

| |Pain in l. side of chest in region of fifth and sixth ribs, as if a blunt knife were thrust in.

| |Lancinating pain from middle of sternum to the dorsal spine, when sitting, goes off when rising.

[29] **Heart, Pulse and Circulation.** | |Palpitation at night.

Pulse: small, hard and tense, especially at night; soft, full, slow, bounding; slower than beat of heart; frequent at night, slow during day, collapsed.

‖Pulse full, hard, somewhat accelerated. θDiarrhœa.

[30] **Outer Chest.** Stitching pains here and there in chest.

Small pimples on chest and abdomen.

[31] **Neck and Back.** ‖Neck stiff, back painful, loins lame, after taking cold.

‖Pain in nape, as if head had been lying in an uncomfortable position.

‖Swelling of glands on neck.

‖Adenitis, glands swollen, often very painful and sensitive; cervical and submaxillary lymphatic glands (with a sub-inflammatory condition), painful every turn of head.

‖Chilliness with dull pain in region of lower cervical and upper dorsal vertebræ; difficulty in raising head or turning about in bed; at night, fever, sleeplessness; in morning motion of arms greatly impaired, as if they were of wood, numbness and formication in r. hand, cannot close the hand; pulse 100, hard; temperature of skin elevated; tongue dry; loss of appetite; urine scanty, dark, offensive, ammoniacal; stool absent; spine not sensitive to pressure; cervical portion of spinal column stiff, any motion thereof causing disagreeable tension and dull pain deep in, which extends toward both shoulders. θMyelitis.

‖Lassitude, pains like those brought on by a cold; dryness,

Digitized by Google

heat and burning of skin; restlessness; delirium at night; nausea and vomiting of mucus; sensation of inflation at pit of stomach; white mucous diarrhœa; diarrhœa with faintness; oppression or tightness of chest; pinching or deep cutting pain in chest; constrictive pain as if in muscles of back; drawing in muscles of thigh; bloatedness and swelling of leg; burning in feet; < at night, from cold, while lying down and from washing. θMyelitis.

▮Spinal meningitis during scarlatina or measles, eruption does not develop.

▮▮Myelitis after taking cold during menstruation.

▮Hyperæmia of the spinal cord.

▮Rheumatic affections of spinal cord.

▮▮Dull stitches in both loins, with sensation as of squeezing from within outward, at every inspiration, while sitting bent (after a short walk.)

▮Deeply cutting pain in r. loin, transiently disappearing upon pressure.

▮Drawing pain from small of back down thighs, during rest; stitches when moving, > by pressure.

▮▮Pain in small of back, as after stooping a long time.

▮Severe rheumatic stitching pressing pains in arms and back, after catching cold while sweating; pains < at night and while resting; > from motion; slight fever, much thirst.

▮Burning in head, with stupefying headache, red face, dry tongue, burning heat in gums, unquenchable thirst for extremely cold drinks; anorexia; urine very red, with painful burning on urination; sleepless; skin dry and hot, burning sensation in skin; severe rheumatic stitching, drawing in small of back, shoulders, and arms; after getting wet whilst warm.

▮▮Lameness in the small of the back, from a cold.

▮Cold chilly feeling in small of back.

▮Sacrum feels cold.

[42] **Upper Limbs.** ▮Paralysis of arms; they are icy cold, especially during rest.

▮Paralytic, bruised pain in l. arm.

▮▮Herpes on arms and hands.

▮Exostosis on the arm, from suppressed itch.

▮▮Warts on hands, on backs of fingers.

▮Sweat in palms of hands.

[43] **Lower Limbs.** ▮Drawing-tearing pain, or constant pain, at one time sticking, at another pinching, in both thighs, disappearing on walking, then changing to weariness, and immediately returning while sitting.

▮Drawing from small of back through thighs, during rest,

Digitized by Google

with stitches in parts during motion, which are > by pressure.

‖ Herpetic eruption on knee.

❙ Exostosis on upper part of r. tibia, with bluish-red spots; suppurating lumps.

❙ Intolerable (non-syphilitic) pains in shin-bones, < at night, from rest, obliging him to walk the floor, and in damp weather.

❙ Swelling of calf of leg; scrofula.

❙ Gout in big toe; first left, then right.

‖ Tingling and burning in feet.

‖ Erysipelas of feet; skin peels off; itching.

[34] **Limbs in General.** ❙ Cold limbs.

❙ Rheumatism after acute eruptions, or when chronic forms alternate with attacks of diarrhœa.

❙ After getting wet, tearing in limbs, particularly in feet; restless sleep, profuse sweat.

❙ Stitching-drawing and tearing pains in limbs after an acute eruption or after catching cold; < at night, or during evening, when there is an exacerbation of fever.

❙ Rheumatism after exposure to wet; parts as if beaten; severe pains when remaining in one position, subside only when he moves about.

❙ Pains in the joints on exposure to cold.

‖ Sharp shooting pains in l. toes and thumb.

❙ Sudden swelling of body and puffiness of limbs, at times painful, or accompanied by a sensation as if going to sleep.

‖ White blotches with red areola on arms and thighs.

[35] **Rest. Position. Motion.** Worse lying on back, > on side.

Worse when stooping, > when erect.

Worse bending diseased part backwards.

Worse dancing.

At rest: scintillations <; buzzing in ears < dry coryza <; tickling in larynx <; drawing pain from small of back down thighs; arms icy cold; intolerable pains in shin bones; rheumatism <.

Lying quiet: headache <; cerebellum as if enlarged, >; cough <; myelitis <.

Sitting: pain from sternum to spine; dull stitches in both loins; drawing tearing pain in thighs.

Rising: pain from sternum to spine >.

Walking: vertigo; sensation as if fire were darting out of eyes; after short walk dull stitches in both loins; drawing tearing pain in thighs disappears; pain in shin bones forces him to walk; must get up and walk at night.

Motion: headache <; iritis >; dry coryza >; pimples

Digitized by Google

and ulcers around mouth painful; cervical and submaxillary lymphatic glands painful; stitches in back; pain in back >; stitches in thighs; drawing in small of back; rheumatism >.

[36] **Nerves.** ‖Great general uneasiness, restlessness.
‖Weariness, prostration, languor.
‖Trembling, particularly of r. arm. θUrinary difficulty.
‖One-sided spasms; speechlessness.
‖Convulsions beginning in face.
‖Paralysis: of different, single parts; from suppressed eruptions; from cold; of upper and lower limbs and tongue; the paralyzed arm feels icy cold.

[37] **Sleep.** ‖On falling asleep in evening, starts as in affright.
‖During sleep, mouth open, snoring.
‖Uneasy sleep, confused dreams, frequent sweat; tosses from side to side.
‖Sleep restless after 12 A.M.; worst after 3 A.M.
‖Uneasy sleep after 4 A.M., no matter how he lay.
‖Sleeplessness.
‖Fearfully confused dreams; she has to get up at night and walk about the room; a sinking sensation all over; she fancied she would sink through the bed.
‖On awaking in morning giddy and dizzy; dark before eyes, trembling and weakness.

[38] **Time.** Morning: on awaking dizzy, dark before eyes; hay fever <; vomiting; watery, slimy stools; profuse thin stools; motion of arms greatly impaired; offensive sweat.
Day: pulse slow; sweat on back; sweat in axillæ; sweat on palms.
Until 2 P.M.: cerebellum as if enlarged.
Evening: hay fever <; desire for stool; watery, slimy stools, preceded by pains in abdomen and followed by tenesmus; tearing drawing pains in limbs <; on falling asleep, starts as if in affright; chilliness over back towards evening; cold shuddering up back.
Night: delirium; idiopathic iritis <; buzzing in ears <; earache the whole night; stools with colic; stools follow each other in rapid succession; violent cutting around navel <; pain prevents sleep; moaning; restless tossing about; palpitation; pulse small, hard and tense; pulse frequent; fever; sleeplessness; myelitis <; pain in back <; intolerable pain in shin bones; stitching drawing pains in limbs <; must get up and walk about the room; sleeplessness; offensive sweat.
Before midnight: headache <.
After midnight: sleep restless.
After 3 A.M.: sleep very restless.

Digitized by Google

[39] **Temperature and Weather.** Warmth: idiopathic iritis >; facial neuralgia >; cough <; chill not >; nettle rash <.

Cannot get warm near hot stove.

Closed room: nostrils stopped up; constant sneezing <; profuse discharge of water from nose and eyes <.

Dry air: nasal catarrh dry.

Open air: nostrils stopped up; constant sneezing; profuse discharge of water from nose and eyes; cough >; chilliness.

Cold: ophthalmia from exposure; twitching of eyelids; dry coryza <; discharge from nose suppressed from least contact with cold air; facial neuralgia <; twitching of lips; toothache; diarrhœa; scurvy; tongue and jaws become lame from contact; tongue paralyzed by; ulceration in mouth > by holding cold water in it; tonsillitis from cold change of weather; great thirst for cold drinks; diarrhœa from cool change of weather; vomiting after cold drinks; dysentery <; strangury from cold drinks; pains in joints; paralysis of different parts from cold; exposure causes urticaria; nettle rash>; herpetic eruptions < by applications of cold water.

Damp weather: watery, slimy stools, preceded by pain in abdomen and followed by tenesmus; asthma <; hydrothorax <; intolerable pain in shin bones.

Change of weather: tinea capitis, crusta lactea, and dandruff <; tonsillitis; diarrhœa from cool change; indigestion with chilliness <; diarrhœa and colic < by cold change; heat and itching on genitals <; herpetic eruption on vulva <; cold change, tuberculosis <; insensible painless ulcers <.

Getting wet feet: dull hearing <; pressure above nose <; cough; rheumatic pains in small of back getting wet whilst warm; tearing in limbs; rheumatism.

Cold, damp weather: cerebellum as if enlarged; catarrhal and rheumatic headache <; idiopathic iritis; bloody diarrhœa brought on by exposure; dysentery; Bright's disease; catarrh of bladder; dysmenorrhœa with blotches all over <; herpetic eruptions on vulva <; catarrhal ailments (female sexual organs); threatened miscarriage by exposure; bronchitis of children; cough; fever caused by exposure; dropsical affections; retrocession of eruptions from exposure; insensible painless ulcers <;

[40] **Fever.** Chilliness of back, without thirst, in open air, but especially in a draft.

Chilliness, mostly towards evening, over back, nape of neck, occiput, with sensation as if hair stood on end.

Digitized by Google

Shaking, with a feeling of coldness, or actual coldness over whole body, cannot get warm near hot stove, with shuddering from time to time.

‖Chill commencing in or spreading from back, not > by warmth; mostly towards evening.

Chill: with pains; with violent thirst; without thirst.

‖Chilliness alternating with fever, mind dull, face red, skin dry and hot; nausea with anxiety; sleeplessness at night; pulse feels hard, somewhat accelerated; general prostration. θDiarrhœa.

‖General dry burning heat all over.

‖Heat: burning in back; with delirium; without thirst.

Burning in skin of whole back as if he were sitting by a hot stove, with sweat in face and moderate heat.

Double tertian fever.

‖Scarlet fever, particularly in scrofulous subjects, pain in limbs, cold shuddering up back in evening, vomiting followed in many cases by sopor; dry burning heat of skin; frequently, suppression of urine. As the case progresses, the pains become particularly severe in head and feet; eruption assumes a miliary character, although light-red spots can also be detected; redness of gums and throat, with difficult deglutition; great swelling of the glands of neck and of those about ears; at times the inflammation extends to larynx, causing a croupous cough; high fever with delirium and thirst; urine turbid and offensive. Cases where the eruption is scanty and does not develop properly, looking very much like a nettlerash, with slight anginose symptoms, but severe pains in limbs, which often cause crying and are frequently followed by œdematous swelling of whole body; extremely tardy desquamation.

‖Typhoid fever, when patient distinctly remembers having taken cold; tongue clean, stools yellow, liquid, with rumbling, cutting, digging and griping pain in umbilical region or whole abdomen.

‖Fevers caused by exposure; living in damp rooms, sleeping in a damp bed; during cold, rainy, changeable weather.

‖Fetid sweat, with skin diseases; copious limpid urine.

‖Offensive sweat, night and morning, over whole body; during day, more over back, in axillæ and palms.

‖Sweat suppressed and entirely wanting.

‖Conditions arising from sudden cooling of body whilst sweating.

Attacks, Periodicity. Frequent: sweat; suppression of urine.

Attacks: of whooping cough.

Digitized by Google

Twice a day: yellow watery diarrhœa.
From time to time: shuddering.
Every evening: chilliness in cerebellum; feeling as if hair stood on end.
Several afternoons in succession: thin stools, with flatulency.
Six weeks: incontinence of urine.
Fifteen months: bloody diarrhœa.

[a] **Locality and Direction.** Left: facial neuralgia on side; deep cutting pain in side of chest; pain in chest as if lung moved in waves; stitches in border of scapula; pain in chest as if knife were thrust in; bruised pain in arm; sharp shooting pains in toes and thumb.
Right: dull stitch in chest below clavicle; dull stitching pain in chest; numbness and formication in hand; deeply cutting pain in loin; exostosis on upper part of tibia; trembling of arm.
From left to right: gout in big toe.
From within to without: headache; dull stitch in chest below r. clavicle; dull stitches in loins with sensation of squeezing from within outward.
‖Rending pains upward. θRheumatism.

[a] **Sensations.** ‖Pains in many parts, as if from cold; bruised feeling.
Sensation as of a board pressing against forehead; as if head were enlarged; as if hair stood on end; as if fire were darting out of eyes; teeth as if asleep; pressure as if uvula were too large; shuddering as though he would vomit; sensation of inflation in pit of stomach; sensation of emptiness in abdomen; as if worms were crawling up and down in abdomen; as if diarrhœa would occur; biting in rectum as from salt; as if lung moved in waves; as if a blunt knife were thrust into chest; as if head were lying in an uncomfortable position; as if arms were of wood; sensation in loins as of squeezing from within outward; pain in back as after stooping a long time; limbs as if beaten; limbs as if going to sleep; heat in back as if he were sitting by hot stove; as of needles over whole body; burning itching like crawling of insects.
Pain: in limbs; in spots in mouth; in small of back; in back; in abdomen; in region of kidneys; in chest; in l. side of chest; in nape of neck; in cervical glands; in shin-bones; in joints.
Lancinating pain: from middle of sternum to dorsal spine.
Tearing pains: around mouth; in limbs; in abdomen; in thighs.
Cutting pain: about navel; in abdomen; in chest; in r. loin.

Digitized by Google

Shooting pains: in l. toes and thumb.
Stitching pain: in r. side of chest; here and there in chest; in arms and back; in thighs.
Stitching sensation: over whole body.
Stitches: in auditory meatus; in sides; in chest; in one border of l. scapula; in both loins; in thighs.
Constrictive pain: in muscles of back.
Pinching: violent, in abdomen; in chest; in thighs.
Colic: in umbilical region.
Griping: in abdomen.
Bursting pains: from forehead to bridge of nose.
Drawing pain: from small of back down thighs.
Boring: in forehead; in temples.
Neuralgia: of face; temple; ear; jaws.
Tensive pain: in cervical and inguinal glands.
Bruised pain: in l. arm.
Rooting digging pains: in brain; in abdomen.
Burning: in forehead; in epigastric region; in anus; in rectum; in meatus urinarius; in feet; in gums; in back; in skin of back.
Tingling: in feet.
Pressing pain: in forehead; about bladder and urethra; in arms; in back.
Aching: in eyes; in ears; in teeth.
Dull pain: in head; in chest; in stomach; in ears; in region of liver; deep in spinal column.
Rheumatic affection: of spinal cord.
Stupefying ache: in occiput from nape of neck.
Stupefaction: painful, of head.
Pressure: above nose.
Bearing down: towards vesical region and urethra.
Rawness: in fauces.
Dryness: of tongue.
Roughness: of tongue.
Drawing: in limbs; in muscles of thigh.
Heaviness: of head; of eyes.
Dulness: of senses; of head.
Heat: dry and burning all over; in genitals.
Biting: in rectum, as from salt; in anus.
Sinking sensation; all through body.
Prostration: of limbs.
Lassitude: of limbs.
Blunt feeling: in teeth.
Stiffness: in limbs; of nape of neck; in cervical portion of spinal column.
Lameness: of loins; in small of back.
Numbness: in limbs; in r. hand.
Oppression: of chest.

Digitized by Google

Buzzing: in ears.
Formication: of r. hand.
Crawling: on tip of tongue.
Titillation: in larynx.
Tickling: in larynx.
Itching: on tip of tongue; of rectum; in genitals; in mammæ; over skin of body.
Chilly feeling: in cerebellum.

" **Tissues.** ‖Hemorrhages; blood watery, or bright red.
‖Skin inactive; mucous surfaces overactive, especially from suppression of eruptions by cold.
‖‖Catarrhal troubles, caused by exposure to damp, cold weather.
Acts especially on mucous membranes and muscular tissues, giving rise to catarrhal inflammations, the symptoms like those which result from exposure to damp, rainy weather; it also acts upon lymphatics and skin, producing glandular enlargements, cellular effusions and eruptions.
Chronic rheumatism, < from a little exposure to cold, or any change of temperature from warm to cold; rheumatic pains after acute cutaneous eruptions, or when chronic form alternates with attacks of intestinal catarrh.
‖Cold swelling of glands, also inflammation and induration of cervical and inguinal glands; tensive pain.
Induration of cellular tissue.
‖Dropsical affections after suppression of sweat by damp, cold air, and from taking cold; the neck stiff, the back painful, the loins lame.
‖Paralysis of tongue, internal organs, and of limbs.
‖Anasarca after fever and ague, scarlatina, or rheumatic fever.
‖Scrofula; exostoses; emaciation.

" **Touch. Passive Motion. Injuries.** Touch: eruption sensitive.
Pressure: pain on l. side of chest >; dull stitching in r. side of chest <; dull stitches in loins >; stitches in back >; drawing in small of back >; stitches in thighs and small of back >.
‖‖Small furuncles on places hurt by concussion.

" **Skin.** ‖Skin hot and dry.
‖Sticking itching in various parts of body.
‖Sticking sensation as of needles, over whole surface of body. θUrticaria.
Burning itching, like the rapid crawling of insects.
Skin delicate and sensitive to cold; has urticaria or some other eruption every time she takes cold, or is long exposed to cold.

Google

‖Vesicular eruption, large as a pea, containing yellow, translucent fluid, and on a red, inflamed base, covering whole body, except face. θPemphigus.
‖Vesicular eruption on face and extremities, oozing a watery fluid.
‖Tetter, oozing a watery fluid, bleeds after scratching.
‖Eruption of itching pustules, ceasing to itch after scabbing over; sensitive to touch; < from washing.
Bright red acuminated pimples, filling with pus.
‖Small furuncles on places formerly injured by concussion.
‖Red spots, as from flea-bites.
‖‖Nettle-rash over whole body, without fever.
‖Nettle-rash: with much itching; after scratching it burns; < in warmth, > in cold; with gastric fever.
Eczema scrofulosum; tettery crusts over whole body; glandular enlargements; exudating vesicles on face and extremities; eruption of itching vesicles, which pass into suppuration, and become covered with a crust, especially on lower limbs and posterior surface of body.
‖Impetiginous eczema of scrofulous children.
‖Thick brown herpes, red border; glands swollen.
‖‖Thick crusts all over body.
‖Round, scaly and small herpes; suppurating yellow herpes.
‖Herpetic eruptions associated with fetid perspiration; skin affection < by application of cold water.
Herpes preputialis, easily bleeding, brown, dry, humid or furfuraceous, red, pale-red or with a red areola.
‖Lichen (mehlflechte) on knee; old, obstinate, size of a dollar.
‖‖Retrocession of eruptions, from exposure to damp, cold air.
‖Suppressed itch.
‖Skin callous.
‖‖Warts, fleshy, or large, smooth; on dorsa of hands and on face.
‖Insensible, painless ulcers, hard, sensitive; < at night, from wet or cold and when weather changes.
‖‖Painful ulcers; discharge scanty.
‖Swelling and induration of glands.

[47] **Stages of Life, Constitution.** ‖Phlegmatic, torpid, scrofulous patients, who are restless and irritable; take cold in cold damp changes.
Dark hair: skin delicate, sensitive to cold; liable to eruptions from being exposed to cold.
Child, æt. 13 mos., no teeth, old-looking face, great emaciation; pemphigus.
Boy, æt. 13 mos., delicate, weak; pemphigus.
Girl, æt. 5; diarrhœa and catarrh of stomach.
Boy, æt. 12; weak, pale, ill-nourished, poorly developed, with constant tendency to diarrhœa; severe diarrhœa.

Digitized by Google

Girl, æt. 16, not yet menstruated; strangury followed by incontinence of urine.
Wm. Baker, æt. about 18; hay fever.
Girl, æt. 20, choleric temperament, sparely built, but strong; diarrhœa after cold.
Man, æt. 24; urticaria.
Man, æt. 27, headache for two years.
Woman, frail constitution; diarrhœa.
Woman, cook, slender build, after exposure of heated body to cold; cholerine with urticaria.
Shepherd, who had been in habit of watching flocks by night; bloody diarrhœa.
Man, æt. 30, choleric temperament, energetic, strong; diarrhœa for 3¼ years.
Woman, æt. 35, another, æt. 63; muscular rheumatism.
Unmarried woman, æt. 36; for six days, severe diarrhœa.
Healthy woman, æt. 40, during a damp, rainy day, sudden loss of consciousness, from which she recovered with a severe headache; headache.
Woman, æt. 40, choleric temperament, strong, after catching cold from washing during a cold day; diarrhœa.
Man, æt. 60, after catching cold; urinary difficulties.
Man, æt. 72, gouty, with tendency to marasmus, after catching cold; myelitis.

ELAPS CORALLINUS.

The Coral Viper. *Elapidæ.*

The poison of the Brazilian Coral Snake was first proved by Mure, who used the 3d trit. of the venom, and again by Lippe, on a woman who took 4th dilution.

The poison is pressed from the venom sac of the living reptile, and triturated with sugar of milk. The cures reported by S. B. Higgins, however, were made with a preparation made from the gall of the snake, *Fel Elaps Corallinus.* Higgins, N. A. J. H., v. 24, p. 115, remarks: "The pathogenetic action of *Fel E. C.* is in many respects similar to *Elaps Corallinus*, but in almost every case its action will probably be found to be much more strongly marked than that of the latter." These symptoms are marked ——.

[1] **Mind.** Absence of mind.
Imagines he hears some one talking.
Depression of spirits, and desire for solitude.
Fearful and apprehensive of some fatal disease.
Fear of being left alone, as if something horrible might happen; horror of rain.
Angry about one's self, does not wish to be spoken to.
At the least contrariety, body shudders, blood boils, with prickling.

[2] **Sensorium.** Vertigo, with tendency to fall forward.

Digitized by Google

Fainting, with vomiting of mucus, or fainting on stooping.
Fulness in the head, as if all blood were collected in it; cold hands; fears apoplexy.
Congestion of blood to head on stooping.

[3] **Inner Head.** ‖Severe stitching pains in forehead, with heaviness of head; occasionally pain intermits from 8–10 days; rumbling in l. ear as of thunder, with impairment of hearing; lachrymation of eyes, pain and redness of l. eye.
Weight and pain in forehead.
Pain in cerebellum, right side.
Lancinating headache, l. then r. side.
Violent pain in vertex (afternoon), as if brain were shaking, with nausea, which prevents her from keeping head quiet.
Frontal and occipital headache, < from motion and stooping.
‖Headache in occiput after mental exertion. θChronic naso-pharyngeal catarrh.
Stinging headache, with sleeplessness.
‖Frequent headache. θOzæna.

[4] **Sight and Eyes.** Aversion to light, desire to close eyes. Everything seems white, even at night; grey veil before eyes; on stooping, rush of blood to head with vertigo and pain at root of nose; can scarcely distinguish light from dark.
Large red, fiery spots before eyes.
Red bar before eyes when opening them.
When closing the eyes everything looks red; dotted black points.
Sometimes dark spots, as large as a penny, before open eyes, which gradually diminish and disappear by keeping eyes still; they do not move with the eye, last two or three seconds at a time.
Dirty red spot before eyes, half the size of hand; sometimes, when eyes are closed, a dirty red appearance, covered with black spots.
‖Completely blind in l. eye for three years, and nearly so in r. for three months, following headache; now has severe headache with drawing, sometimes sticking pains from forehead to occiput; pain at root of nose, with vertigo; even with r. eye can scarcely tell light from dark; everything seems white, even at night; some old rheumatic symptoms in legs. θAmaurosis.
Eyes red and inflamed; blear-eyed; glassy look.
‖Eyeballs feel sticky under lids and as if rough.
Dryness and burning in both eyes on waking; bloated around the eyes in the morning.

Digitized by Google

Violent itching in l. eye.
Stye on l. eye, with lancination.

[6] **Hearing and Ears.** Illusions of hearing; hears whistles and ringing.
Continued buzzing, as if a fly were enclosed in auditory meatus.
Crackling in ears on swallowing.
Dulness of hearing with buzzing in ears; no pain; slight discharge from ears, which leaves a green spot upon bed-linen; consequent upon otorrhœa, from which he suffered during childhood.
Sudden deafness of r. ear, after catching cold; no pain, no tinnitus; secretion of wax profuse but dry.
Hearing of both ears impaired; otalgia of r. ear.
Sudden painless attack of marked deafness at night, with constant roaring and cracking in ears.
Offensive discharge from r. ear, with deafness on that side; constant buzzing noise in diseased ear, subject to epistaxis and eruptions about nose and face; skin hot and dry, but constantly complains of feeling cold; pulse 120. θChronic otorrhœa.
Watery, yellow or yellow-green discharge with deafness.
Discharge of blood from ear.
Cerumen black and hardened.
Intolerable itching in ears; watery yellowish discharge.
Crusty eruption on ear and cheek.

[7] **Smell and Nose.** Stoppage of both nostrils.
Nostrils plugged up with lumps of dry mucus; sleeps with mouth open.
Partial stoppage and stuffiness high up in nostrils, with dull aching in forehead; < in wet weather; occasionally bad smell from nose; offensive discharge; posterior wall of throat covered with a dry, greenish-yellow scab, wrinkled and fissured, extending up to nose; nose-bleed; pains from root of nose to ears on swallowing; sneezing at night; sense of smell gone; profuse and dark catamenia. θOzæna.
Offensive discharge from nose; subject to epistaxis and eruption about nose and face; snuffles and pain from root of nose to forehead.
Discharge smelling like putrid herring pickle.
Coryza from least draft of air.
White and watery mucus discharged from nose.
Blood black, flows in a steady stream, copious.
Epistaxis: sudden, profuse, while walking; after a blow.
Nose bleeds when violently blown. θNasal catarrh.
Arterial blood gushes from nose and ears.

[8] **Upper Face.** Dark complexion.

Google

‖Face of a dull yellowish color. θOzæna.
Redness and swelling of r. cheek, chilliness all over body.
Redness, heat and formication in r. cheek.
Swelling of face, extending to r. side of nose.
Red blotches on bloated face.

[11] **Taste and Tongue.** Taste as of blood; before hæmoptysis.
Salty tasting saliva.
Tongue deep red, clean, black or dark red; swollen; whitish in morning; pricking at tip.

[13] **Throat.** Sensation as if food turned like a corkscrew, on swallowing.
Constriction in pharynx, with pressure in throat.
The beverage is arrested in œsophagus as from a spasmodic contraction.
‖Irritable throat, broken out with red blotches, about as large as half of a split pea; blotches also extended over soft palate and sides of cheeks, and bled upon slightest irritation; intolerable itching in ears.
‖Ulceration of throat, < l. side, difficulty of swallowing liquids, occurring five or six times a year, lasting two or three weeks at a time; attacks brought on by exposure to rain or wind; dislikes wet weather apart from the throat affection, never feels happy in wet weather.
‖Exceedingly painful deglutition of both solids and liquids; sharp pain and soreness to touch across chest from r. to l. axilla; frontal cephalalgia; sides of throat sore to touch; sides of buccal cavity above fauces covered with numerous dark-red points, like incipient pustules.
‖Deglutition of solids or liquids almost impossible; throat exceedingly sensitive to touch; tonsils swollen so that no passage is visible.
‖Dull pain from nares to ears; when swallowing, pain goes to ears; posterior wall of pharynx dry, mucous membrane fissured and covered with crusts; offensive discharge from nose; skin dry and hot, but always complains of feeling cold.
‖Sore throat, offensive discharge from nose, epistaxis, discharge offensive, smelling like putrid herring pickle; posterior wall of throat covered with a dry, greenish-yellow membrane, wrinkled and fissured, extending to nares; occasionally portions are detached and expelled from nose or mouth, leaving a raw, corrugated surface; membrane dry and corrugated; stuffiness about root of nose, and dull aching from there to forehead; on swallowing, pain extends to ears; sense of smell gone; frequent headaches; face dull yellowish; catamenia early, profuse, dark; skin hot and dry, pulse 140. θChronic inflammation of naso-pharyngeal mucous membrane.

Digitized by Google

[14] **Appetite, Thirst, Desires, Aversions.** ‖Canine hunger, yet unable to eat.
Hunger with violent headache if not satisfied at once.
‖Violent thirst; desire for sweetened buttermilk.

[15] **Eating and Drinking.** After eating: weight in stomach with nausea; oppression; fruit lies like ice.
‖After drinking cold drinks lie like ice in stomach, and cause cold feeling in chest.

[16] **Hiccough, Belching, Nausea and Vomiting.** Acidity of stomach, with nausea and faint feeling.
Sour belching.
Vomiting: of mucus, with fainting; of green bile; followed by diarrhœa.

[17] **Scrobiculum and Stomach.** ‖Cold drinks feel like ice in stomach; weight at stomach after eating; sinking, faint feeling at pit of stomach; pain in stomach > by lying upon abdomen; desire for sweetened buttermilk; fearful and apprehensive of some fatal disease; constipation.
‖Fruits and cold drinks lie like ice on stomach.
‖Burning in stomach. θPhthisis.
Sudden pain in stomach, as if she must sink down, < while sitting, > walking about.

[18] **Hypochondria.** ‖Painful pressure in right side of liver.

[19] **Abdomen.** Sensation as if blood in abdomen were flowing backwards.
Intestines feel twisted, as if by a cord and strung together in a knot, with strangulating sensation and black stool.
Lancinating from both groins to symphisis pubis.
Colic with urging to stool.

[20] **Stool and Rectum.** Diarrhœa: blackish, frothy; yellow, watery; mucous and rumbling; bile; bloody mucus; in phthisis, black, liquid blood.
‖Bowels constipated.
Constriction of sphincter after bloody stools.
Formication at anus as from worms.
Prolapsus ani.

[21] **Urinary Organs.** ‖Red urine, with cloudy sediment.
Thick urine, with red sediment.
Suppression of urine; strangury.
‖‖Discharge of mucus from urethra. θPhthisis.

[22] **Male Sexual Organs.** Impotence.
Weight and swelling of testes.
Discharge of prostatic fluid.
Skin of prepuce thick and inflamed.

[23] **Female Sexual Organs.** Weight at uterus and vagina after an hysteric attack.
‖Menses every 2 or 3 weeks; flow profuse dark. θOzæna.
‖Black blood between menses.

Google

‖Metrorrhagia; discharge of very dark colored liquid and clots, but mostly liquid, and varies from half a pound to two or three pounds in twenty-four hours; is so weak cannot rise from bed or hold anything in hand; has the appearance of a corpse; sensation of soreness across lower abdomen; slight pain to urinate; dragging pain in both temples; at times slight pain in l. pleura, almost always > by chewing a small piece of gum camphor.

‖Sensation as if something burst in womb, followed by a continuous stream of dark-colored blood, on attempting to urinate; flow very profuse, venous, and containing some clots. θCancer uteri.

Itching in vagina; formication at vulva.

[20] **Voice and Larynx. Trachea and Bronchia.** ‖Complete aphonia; sibilant râles, wheezing; at night chokes and turns pale while sleeping; soreness in throat below fauces on swallowing; no respiratory sound in l. lung, dull by percussion; râles very distinct in r. lung at each inspiration; pulse 90, skin dry, but not hot.

‖‖Laryngeal phthisis.

[24] **Respiration.** ‖Oppressed breathing in evening < on going up stairs.

Constriction of the chest.

‖‖Feeling of a heavy load on chest. θPhthisis.

[27] **Cough.** ‖Dry cough, frequent and constantly recurring paroxysms, after suddenly catching cold.

Very violent attacks of dry cough, followed by expectoration of black blood, with severe tearing pains throughout whole chest and principally at apex of r. lung.

Constant cough, with frightful pains throughout lungs, as if they were torn out, < upper part of r. chest.

Cough with expectoration of masses of black blood, and often with sensation of laceration in region of heart; before cough, taste of blood in mouth.

[28] **Inner Chest and Lungs.** Stitches in upper part of each lung; > when walking.

Stitches in l. side of chest; < when breathing.

‖Very violent attacks of dry cough which terminate with expectoration of black blood, with severe tearing pain; throughout chest, and principally at apex of r. lungs oppression after having eaten. θPhthisis.

‖Pain in r. lung for eight days; cannot turn to either side nor sit up without assistance; sleeplessness; sibilant râles with crepitation in both lungs; r. lung sounds dull under mamma and near armpit to percussion; each inspiration causes a crackling sound; respiration very difficult, almost agonizing; vomiting all forenoon; diarrhœa all day; constant cough; urine like blood. θPneumonia.

Digitized by Google

‖Pulmonary pathisis; < in r. lung; rush of blood to chest and throat in morning.
Hæmoptysis, expectoration of black blood, with sensation of laceration in region of heart.

[29] **Heart, Pulse and Circulation.** Tearing as from region of heart; hæmoptysis.
Palpitation with anxiety and trembling of hands.
‖Pulse 120. θOzæna.

[30] **Outer Chest.** ‖Sharp pain and soreness to touch across chest, from r. to l. axilla. θSore throat.

[31] **Neck and Back.** Stiffness in r. side of neck.
Lancinations in l. side of neck, also whole spinal marrow.
Painful pressure at nape of neck.
‖Weight as of an iron bar pressing on small of back.
Pain in back with chilliness, cold feet and strangury.

[32] **Upper Limbs.** Itching under axilla, with tetter.
Arms and hands are swollen, bluish, covered with red spots; also r. leg and foot.
Arms cold by putting hand in cold water.
Yellow spots on hands and fingers.
Crampy constriction at bend of elbow, extending to hand, as if one had carried a heavy weight.
Pricking in l. upper arm.
Hot rash on r. wrist.
Right hand feels as if paralyzed.
Tips of fingers peel off.

[33] **Lower Limbs.** ‖Transient stitching pains at one time above, at another below r. knee; < from motion or warmth of bed.
Sensation of spraining and stiffness in knee-joint.
Cramps in the calves.
Icy coldness of r. leg.
Rheumatic pains in l. leg.
‖Icy cold feet.
Left foot swollen and blue, with red spots.
Picking under toe nail.
Vesicles on feet.

[34] **Limbs in General.** ‖Soreness of limbs < at night. θRheumatism.

[35] **Rest. Position. Motion.** Lying on abdomen: pain in stomach >; change of position painful.
Breathing: stitches in l. side of chest <.
Sitting: pains in stomach <.
Stooping: fainting; headache <; rush of blood to head; vertigo; pain at root of nose.
Cannot keep head quiet: with pain.
Cannot turn on either side without assistance.
Motion: < headache; pain about knee <.

Digitized by Google

Walking: sudden, profuse epistaxis; pain in stomach >; stitches in lungs >.
Going up stairs: oppressed breathing <.

[36] **Nerves.** Sensation of numbness, with great weakness and coldness in whole l. side of body; deglutition impaired; at times, darkness before eyes with vertigo; dimness of vision; lachrymation of r. eye; menses very scanty; pain in r. side of chest and r. shoulder. θHemiplegia.

[37] **Sleep.** Drowsy all day; no sleep at night.
During sleep bites hand.
Sleeplessness from lancinating headache.
Dreams of business, of dead persons.

[38] **Time.** Morning: bloated around eyes; rush of blood to chest and throat; inability to rise.
All day: diarrhœa; drowsy.
10 A.M.: fever lasts all night until.
Forenoon: vomiting.
Noon: chill.
Afternoon: pain in vertex; dry heat.
Evening: oppressed breathing; flushes of heat.
7 P.M.: fever.
From 7 to 9 P.M.: dry heat.
8 P.M.: chilliness and heat alternately.
From 9 to 10 P.M.: chill.
Night: Everything seems white; sudden attack of deafness; sneezing; chokes and turns pale while sleeping; soreness of limbs <; no sleep; fever lasting all night.
At midnight: dry heat.

[39] **Temperature and Weather.** Horror of rain.
Warmth of bed: pain about head <.
Draft of air: coryza; sensitive to; chilly, with otorrhœa.
Wind: exposure causes ulceration of throat.
Wet weather: dull aching in forehead <; never feels happy during.
Rain: exposure to, causes ulceration of throat.
Cold water: arms cold by putting hands in; coldness < from drinking.
Great sensitiveness to cold.

[40] **Fever.** Coldness in the back.
Terrible coldness after drinking, and as if ice water were rising and falling through a cylindrical opening in l. lung.
Coldness < drinking cold water; shivering from head to foot with chattering of teeth after a drink.
Shaking chill, felt internally as if in bones, followed in half an hour by burning heat; skin hot, thirst, fever lasting whole night, and until 10 A.M. next day.
Chill followed by dry heat and burning redness of face.

Digitized by Google

Chill at noon, without thirst, followed by dry heat in afternoon, without perspiration.
‖Skin hot and dry, but constantly complains of feeling cold; pulse 120. θChronic otorrhœa.
Chilliness and heat alternately at 8 P.M.; chilly for a few minutes, then heat for a quarter of an hour.
Heat: with thirst; alternating with chilliness.
‖Flushes of heat in evening, with redness and heat of face and ears.
With the fever, oppression of breathing.
Fever at 7 P.M., with less chill, more violent heat, but little sweat; sleep interrupted by heavy dreams (of bad people), with difficult breathing the whole night.
Dry heat from 7 to 9 P.M., followed by chill till 10 P.M.
Dry heat, at midnight; cannot endure any cover.
‖Skin hot and dry; pulse 140. θOzæna.
Sweat: cold; profuse; all over body; on forehead and nape of neck.
Intermittent fever; attacks 8 to 10 P.M., every day.

[41] **Attacks, Periodicity.** Constantly recurring paroxysms of cough.
Frequent: headache; attacks of cough.
At times: slight pain in l. pleura; darkness before eyes; vertigo.
For 2 or 3 seconds at a time: dark spots before eyes.
For a few minutes: chill.
For quarter of an hour: heat.
Half hour: after chill, burning heat.
Every day: attacks of intermittent fever, from 8 to 10 P.M.
For 8 days: pain in r. lung.
From 8 to 10 days: pain intermits.
Every two or three weeks: menses.
For two or three weeks at a time: ulceration of throat.
Five or six times a year: ulceration of throat.
Three months: blindness in r. eye.
Three years: blindness of l. eye.

[42] **Locality and Direction.** Left: rumbling in ear; redness and pain in eye; blindness in eye; itching in eye; stye on eye; ulceration on side of throat; pain in pleura; no respiratory sound in lung; stitches in side of chest; lancinations in side of neck; pricking in upper arm; rheumatic pains in leg; foot swollen and blue, with red spots; numbness, weakness and coldness of whole side of body; as if ice water were rising and falling through cylindrical opening in lung; rheumatic pains commence on side.
Right: pain in side of cerebellum; blindness of eye; eye can scarcely tell light from dark; sudden deafness; otal-

Digitized by Google

gia; offensive discharge from ear; buzzing in ear; redness and swelling of cheek; heat of cheek; formication in cheek; swelling of side of nose; painful pressure in side of liver; rattling in lung; pain at apex of lung; upper part of chest lungs feel torn out; lung sounds dead; pulmonary phthisis < in r. lung; stiffness in side of neck; leg and foot swollen, bluish, covered with red spots; hot rash on wrist; hand feels as if paralyzed; stitching pain about knee; icy coldness of leg; lachrymation of eye; pain in side of chest; pain in shoulder; phthisis < r. side; side feels sensitive.

From l. to r. lancinating headache.

From r. to l. pain from one axilla to the other.

Rheumatic pains commencing on l. side.

"**Sensations.** As if all the blood were collected in head; rumbling in ear as of thunder; as if brain were shaken, with nausea; eyeball as if rough; as if a fly were enclosed in auditory meatus; as if food turned like a corkscrew on swallowing; pain in stomach as if she must sink down; as if blood were flowing backwards in abdomen; intestines feel twisted as if by a cord and strung together in a knot; formication at anus as from worms; of a heavy load on chest; as if lungs were torn out; as of an iron bar pressing on small of back; constriction at elbow as if one had carried a heavy weight; hand feels as if paralyzed.

Pain: l. eye; in forehead; in cerebellum; at root of nose; from root of nose to forehead; in stomach; in r. lung; in back; in r. side of chest; in r. shoulder.

Frightful pain: throughout lungs.

Violent pain: in vertex.

Severe tearing pains: throughout whole chest; at apex of r. lung.

Tearing: as from the region of the heart.

Sensation of laceration: at region of heart.

Lancinating: headache; pain in l. eye; from both groins; l. side of neck; spinal marrow.

Sharp pain: across chest.

Stitches: upper part of each lung; in l. side of chest.

Stitching pain: in forehead; about r. knee.

Pricking: at tip of tongue; in l. upper arm.

Sticking pain: from forehead to occiput.

Stinging: headache.

Picking: under toe nail.

Constriction: in pharynx; of the chest.

Crampy constriction: at bend of elbow, extending to hand.

Cramps: in the calves.

Drawing pain: from forehead to occiput.

Digitized by Google

Dragging pain: in both temples.
Burning: in eyes; in stomach.
Painful pressure: in r. side of liver; at nape of neck.
Pressure: in throat.
Soreness: across lower abdomen; in throat.
Rheumatic pain: in l. leg.
Dull pain: from nares to ears.
Dull aching: in forehead; from root of nose to forehead.
Slight pain: in l. pleura.
Weight: in forehead; in stomach; of testes; at uterus; in vagina; on small of back.
Heaviness: of head.
Heat: on r. cheek.
Faint, sinking feeling: at pit of stomach.
Sticky feeling: in eyeballs under lids.
Dryness: in eyes.
Crackling: in ears.
Spraining: in knee joint.
Stiffness: in r. side of neck; in knee joint.
Roaring: in ears.
Rumbling: in l. ear.
Buzzing: in ears.
Numbness: in l. side of body.
Weakness: of l. side of body.
Formication: on r. cheek; at anus.
Itching on l. eye; in ears; under l. axilla; chill felt as if in bones.
Coldness: of l. side of body.

" **Tissues.** Hemorrhages black, often fluid.

" **Touch. Passive Motion. Injuries.** From a blow: sudden profuse epistaxis.
Touch: soreness to, across chest; sides of throat sore.

" **Skin.** Red pimples on tips of fingers.
The tips of the fingers peel off.
Little pimples, followed by desquamation.
Yellow spots on hands and fingers.
Red tetter from corner of r. nostril to cheek.
Phlyctenæ especially on extremities.

" **Stages of Life, Constitution.** Woman, æt. 30, suffering for nine years; hemiplegia.
H., æt. 6, white, full habit, rosy-cheeked, after a blow upon nose; epistaxis.
Girl, æt. 7; croup.
Girl, æt. 16, for three years; otorrhœa.
Girl, æt. 18, consequent upon an otorrhœa occurring in her fifth year; dulness of hearing and otorrhœa.
Man, æt. 18, after otorrhœa, when he was two years old; otorrhœa with deafness.

Woman, æt. 22, tall, robust, seamstress; sore throat with œdema.
Man, æt. 24; chronic stuffing of nose.
Man, æt. 25, after catching cold; sudden deafness of r. ear.
Man, æt. 26, foundryman, after sudden catching cold; cough.
Miss H., æt. 27, blonde; epistaxis.
Woman, suffered several years; inflammation of naso-pharyngeal mucous membrane.
Mrs. H., white, æt. 36, above medium size, full habit; sore throat.
Man, æt. 36, another, æt. 48; chronic ulceration of throat.
Woman, æt. 38, suffering for ten years; impaired hearing of both ears, with otalgia of r. ear.
Woman, æt. 39, white, unmarried; confined to bed for a year with cancer uteri; uterine hemorrhage.
Man, æt. 44, pain about r. knee.
Woman, æt. 44, suffering for 8 years; cephalalgia.
Octoroon, æt. 47, married, but childless, has been suffering for a year past; metrorrhagia.
Woman, æt. 49, black, has had lung trouble for three years; pneumonia.
Mr. B., æt. 50, mother and sister supposed to have died from cancer, believes himself to be troubled with a cancerous humor; itching in ears, blotches in throat.
Man, æt. 61, rheumatic symptoms in legs; amaurosis.
Man, æt. 61; sudden impairment of hearing.

ELATERIUM.

Squirting Cucumber. *Cucurbitaceæ.*

A species of Momordica used by the ancients in angina, dropsy, gout, sciatica and rheumatism, and applied as a cataplasm in hemicrania. Mesue, the Arabian, speaks highly of it.

The tincture is prepared from the fruit.

Provings by Matthews and Cooper. See Allen's Encycl., vol. 4, p. 200.

CLINICAL AUTHORITIES.—*Flatulent colic*, Matthews, Allg. Hom. Ztg., vol. 83, p. 127; *Diarrhœa*, Matthews, Allg. Hom. Ztg., vol. 83, p. 126; *Dysenteria biliosa*, Matthews, Allg. Hom. Hom. Ztg., vol. 83, p. 126.

[1] **Mind.** Depression of spirits.
‖Irresistible propensity to wander from home, even in the night, and range in woods. θIntermittent.
Fear of some approaching disaster.

[2] **Sensorium.** ‖Head feels heavy with heat in forehead.
‖In the fever violent tearing pains throughout head, but most in the region of benevolence.

[3] **Inner Head.** Pains in the temples.
‖Headache preceding paroxysms. θIntermittent.
‖Pains in head, especially in region of combativeness on both sides, with dull pain in temples. θIndigestion.

[5] **Sight and Eyes.** Sticking as of a splinter, in inner canthus of l. eye.
‖Whites of eyes tinged deeply yellow. θJaundice of new born.

[6] **Hearing and Ears.** Sticking pain near rim of cartilage of l. ear.

[7] **Smell and Nose.** ‖Running at the nose. θIntermittent.

[8] **Upper Face.** Heat in forehead.

[11] **Taste and Tongue.** ‖Bitter taste in the mouth. θIndigestion.
Tongue coated with a dirty brown fur; bitter taste.

Digitized by Google

[12] **Inner Mouth.** πSpitting large lumps of yellow matter, apparently from the stomach.

[13] **Throat.** A feeling as if posterior nares and upper part of œsophagus were enlarged.

Angina aretaeus.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Much thirst with the paroxysms. θIntermittent.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations of flatus.

‖Nausea. θIndigestion.

‖Constant nausea and disposition to vomit. θBilious fever.

‖Nausea; vomiting of a watery substance, or of greenish, bilious matter, with great weakness.

‖Nausea and vomiting, with fluid stool. θCholera sporadica.

[17] **Scrobiculum and Stomach.** ‖Oppression and constriction in epigastrium. θCholera morbus.

‖Dull pain and oppression in epigastrium. θIndigestion.

[18] **Hypochondria.** ‖Dull pain in r. hypochondrium. θBiliary calculi.

‖Pain in left side. θIntermittent. θFlatulent colic.

[19] **Abdomen.** ‖Cramping, tearing, gnawing pains in abdomen and chest with constipation. θFlatulent colic.

‖‖Violent cutting pain in the bowels, recurring at intervals of 10 or 15 minutes. θCholera morbus.

‖Cutting, griping pains in bowels.

Awoke in night with violent pains in stomach and bowels, with cramps in abdomen, in many places drawn up in knots; frequent vomiting; in the morning weakness.

‖Cutting pains in bowels. θBilious fever.

‖Flatulent colic, supervening on obstinate diarrhœa, attended by borborygmus and severe pain in lower belly.

‖‖Pain in the abdomen. θIntermittent.

Pain of a dull aching, pressing kind, over crest of r. ilium, round to back, extending deep into pelvis.

Rumbling of flatus in course of cæcum and colon.

[20] **Stool and Rectum.** Costiveness with colicky pains.

‖Dull olive-green discharges.

‖Frequent dark-green mucous stools, in masses mixed with whitish mucus, streaked with blood; great pain in abdomen; constant urging to stool. θDysenteria biliosa.

Discharge of dark masses of bilious mucus.

‖Stools bilious. θJaundice of new born.

‖Frequent and copious stool, with cutting pain in abdomen, after taking cold by standing on damp ground after exertion.

‖Severe and copious discharge of a frothy fluid matter, fre-

Google

quently dejected, with cutting pains at intervals and vomiting. θIntermittent.
‖‖Watery discharges from bowels of a frothy character.
‖‖Copious liquid stools.
‖Frequent stools of a watery nature, with vomiting.
‖Squirting diarrhœa.
Itching in anus, with worms.
Bleeding of hemorrhoidal tumors.
‖‖Sporadic and Asiatic cholera.

[31] **Urinary Organs.** Constant heat at neck of bladder, with extremely painful micturition, inducing even convulsions.
‖Suppression of urine, with cramps and neuralgic pains.
Increased flow of limpid urine.
‖Urine stains the diaper. θJaundice of the new born.

[26] **Respiration.** ‖Difficult breathing. θCholera sporadica.

[28] **Inner Chest and Lungs.** Sharp pains at lower part of sternum, passing through to spine or lower angle of r. shoulder blade.

[29] **Heart, Pulse and Circulation.** Stitch-like pain in region of heart.
⁝Cardiac dropsy.

[31] **Neck and Back.** Pains in l. sterno-mastoid muscle near its insertion at sternum.
πGreat heat under shoulder blades.
‖Pains under shoulder blades and in small of back.
Fugitive stitching pains in lumbar region, more on r. side.

[32] **Upper Limbs.** Sharp shooting pains in l. axilla, near insertion of pectoralis major muscle.
Pains extending from shoulder to ends of fingers and shooting back up to elbow.
Dull pain in r. shoulder, forearm and hand, extending to fingers.
Sharp stitching pains in fingers of l. hand to their extremities.
Sharp stitching pains in muscular parts of thumb.

[33] **Lower Limbs.** ‖Tearing and gnawing pains in hips and thighs, deeply seated. θSciatica.
Shooting and dull aching pains in l. thigh, in course of sciatic nerve, extending down to instep and extremities of toes.
Pain in r. knee, extending into instep and toes.
‖Cramps in legs and soles of feet. θIntermittent.
Arthritic pain in great toe.

[34] **Limbs in General.** ‖Neuralgic pains involving whole of r. side of body, from temples to foot, with swelling of r. knee, suppression of urine and bitter taste in mouth.
‖‖Soreness of limbs precedes the paroxysm. θIntermittent.

Digitized by Google

‖Great pain in limbs, darting down into fingers and toes.

[36] **Nerves.** Great prostration.

[37] **Sleep.** Incessant gaping, lasting for nearly an hour.

‖Continued gaping and stretching before the attack. θIntermittent.

‖Yawning and gaping with a sound resembling the neighing of a horse. θIntermittent.

[38] **Time.** Morning: weakness.

7 A.M.: chill lasting one to two hours.

12 M. and 1 P.M.: paroxysms of ague.

5 P.M.: severe chill, lasting one hour.

Night: desire to wander from home; awoke with violent pain in stomach and bowels.

[39] **Temperature and Weather.** From exposure to damp weather after measles: bilious dysentery.

Standing on damp ground after great bodily exertion: cholera morbus.

Damp ground: caused cutting pain in abdomen and copious stools.

[40] **Fever.** Chilliness with continued gaping and quivering; headache and soreness of limbs; pains in bowels.

Chills and fever, when chill comes on with excessive yawning and stretching, which lasts all through chill.

‖Obstinate ague for five years, suppressed by *Chin. sulph.*, in large doses, but always recurring at longer or shorter periods; when chills were suppressed urticaria developed over whole surface, with a disordered state of mind, characterized by an irresistible propensity to wander from home even in the night, and range the woods. Chill occurred every third day, twice in the day, continuing two hours; pains in head, under shoulder blades, in l. side, in calves of legs and small of back; yawning and gaping with a sound resembling the neighing of a horse; lachrymation; profuse coryza; cramps in legs and soles of feet. Chill followed by high fever, which ended in copious perspiration.

‖Quotidian ague, which was repeatedly suppressed for a few days and then became tertian; paroxysms preceded by much gaping and attended by much thirst, pain in abdomen and great pain in extremities, darting down into fingers.

‖Intermittent fever suppressed by abuse of quinine; paroxysm at 1 P.M., preceded by headache; pains in bowels; soreness of limbs; continual gaping and stretching; during chill, slightly increased pain in head and limbs; during heat, violent tearing pains throughout head, < on vertex; increased pain in bowels and extremities; pains shooting to very tips of fingers and toes, and then

Digitized by Google

shooting back into body; intense thirst; nausea, vomiting and copious discharges from bowels of a frothy character.

‖Quartan ague of six weeks' standing, paroxysms occurring about 12 M., when an attack resembling cholera morbus supervened; after this period severe and copious discharges of frothy fluid matter, frequently ejected from bowels, with cutting pains at intervals and vomiting.

‖At 5 P. M., severe chill preceded by gaping and yawning, and lasting about an hour, followed by nausea, vomiting, fever, cephalalgia, violent pains in abdomen and in all the muscles of the body, and liquid stools, this condition continued until early next morning, when it disappeared after a profuse perspiration.

‖Infant has chill every other day, commencing at 7 A.M., and lasting one to two hours; heat till noon; diarrhœa, dark green, slimy, stringy stools most frequent in afternoon, smelling like decayed meat; starts in sleep; mother had ague before and after birth of child.

‖Fever, followed by cutting pains in abdomen, watery evacuations, with nausea and vomiting. θFebris biliosa.

‖‖Burning fever, with vomiting.

Copious perspiration, with gradual relief of all the symptoms.

‖During apyrexia, tongue white, taste bitter, skin of body and sclerotica of a deep yellow color, much pruritus of whole body, urine dark colored, frequent watery stools, accompanied by violent pains in abdomen, perspiration staining linen yellow. θQuotidian intermittent with icterus.

During apyrexia urticaria, > by rubbing.

Intermittents: quotidian; double quotidian; tertian; double tertian; when suppressed by quinine or "ague cures," prone to appear under some other type, or even assuming the double type; frequent change of type.

Time: 12 M.; 1 P.M.; twice a day, every third day.

" **Attacks, Periodicity.** At intervals: cutting pain in abdomen.

Intervals of 10 or 15 minutes: violent pain in bowels.

Frequent: vomiting; dark green stools.

Attacks: of yawning and stretching before chill; cholera morbus.

For one hour: gaping.

Twice in the day: chill lasting two hours.

Every other day: chill.

Of six weeks' standing: quartan ague.

Five years: obstinate ague.

Digitized by Google

[42] **Locality and Direction.** Left: sticking as of splinter in eye; pain in side; pain in sterno-mastoid muscle; pain in axilla; pain in fingers of hand; pain in thigh.

Right: dull pain in hypochondrium; pain over crest of ilium; pain in shoulder blade; pain in side of lumbar region; pain in shoulder; pain in knee; pain in side of body from temples to foot; swelling of knee.

[43] **Sensations.** As of a splinter in l. eye; as if posterior nares and upper part of œsophagus were enlarged.

Pain: in temples; in head; in region of combativeness; in l. side; in abdomen; in l. sterno-mastoid muscle; under shoulder blade; in small of back; from shoulder to ends of fingers and shooting up to elbow; in r. knee to instep and toes; in calves.

Violent pain: in stomach; in bowels; in lower belly.

Violent tearing pains: throughout head.

Tearing pain: in abdomen; in chest; in hip; in thighs.

Cutting pain: in bowels.

Shooting pain: in l. axilla near insertion of pectoralis major muscle; from fingers to elbow; in l. thigh to instep and toes.

Stitching pain: in lumbar region; in fingers of l. hand; in muscular part of thumb.

Stitch-like pain in region of heart.

Sticking pain: in l. eye; near rim of cartilage of ear.

Great pain: in limbs.

Griping pain: in bowels.

Cramps: in legs; in soles of feet.

Cramping pain: in abdomen; in chest.

Gnawing pain: in abdomen; in chest; in hips; in thighs;

Constriction: in epigastrium.

Neuralgic pains: in urinary organs; in whole r. side of body.

Sharp pain: at lower part of sternum; through to spine or shoulder blade.

Dull aching pain: over crest of r. ilium round to back; in l. thigh; to instep and toes.

Arthritic pain: in great toe.

Burning: over whole body.

Soreness: of limbs.

Dull pain: in temples; in epigastrium; in r. hypochondrium; in r. shoulder; in forearm; in hand, extending to fingers.

Heat: in forehead; at neck of bladder; under shoulder blade.

Heavy feeling: of head.

Oppression: in epigastrium.

Itching: in anus; over whole body.

[44] **Tissues.** Causes profuse flow of watery serum from mucous membranes, especially from that of stomach and intestinal tract.

‖‖Chills and fever.

‖Hydrops; post-scarlatinal dropsy.

Promotes opening of abscesses and boils.

[45] **Touch. Passive Motion. Injuries.** Rubbing: urticaria >.

[46] **Skin.** ‖Whole surface of body of an orange yellow color, whites of eyes deeply tinged; urine stains the diaper; bilious stools. θIcterus neonatorum.

‖‖Skin and conjunctiva yellow; much burning and itching over the body. θIntermittent fever.

‖Urticaria with intolerable itching, > by rubbing.

‖Urticaria over whole surface of body when chills of tertian intermittent were suppressed.

‖Measles followed by dysentery.

Erysipelas.

[47] **Stages of Life, Constitution.** Child, æt. 3 days; icterus.

Child, æt. 5, after worry from an attack of measles caught cold from exposure to damp weather; dysentery.

E. C. Griffith, aged 6 years, dark hair and eyes, brunette skin and strong constitution; colic.

Girl, æt. 10; intermittent fever with icterus.

Girl, æt. 25; cholera morbus.

Th. Myers; cholera morbus.

Mrs. N.; tertian intermittent for five years.

Captain of a canal boat, and one of the hands, during August; febris biliosa.

Man, æt. 56, suffering four weeks; quartan intermittent.

[48] **Relations.** Compare: *Bryon.* and *Colocyn.* in sciatica; *Veratr.* in neuralgic affections; *Colchic., Croton tig.* and *Veratr.* in choleraic symptoms; *Secale* in olive-green diarrhœa; *Canthar.* in dysenteric diarrhœa, with painful micturition; *Apis, Hepar, Ignat.* and *Rhus tox.*, which have urticaria during different stages of intermittent fever.

EQUISETUM HYEMALE.

Scouring Rush. *Equisetaceæ.*

A rush, growing in damp soil in Europe and North America.

The tincture is prepared from the fresh plant, chopped and pounded to a pulp.

A popular remedy for dropsy, suppression of urine, gravel, hæmaturia, gonorrhœa and gleet.

Proved by Smith, De Korth, and Chapin. See Allen's Encyclopedia, vol. 4, p. 204.

CLINICAL AUTHORITIES.—*Enuresis of children*, Conant, Allg. Hom. Ztg., vol. 101, p. 23; *Enuresis*, Mitchell, Organon, vol. 2, p. 233; *Dysuria* (Infusion), Marsden, Hale's Therap., p. 223; *Enuresis* (20 cases mentioned), Carmichael, B. J. H., vol. 34, p. 392; *General paralysis*, Heath, Hahn. Monthly, Sept., 1877.

[17] **Scrobiculum and Stomach.** : Dyspepsia, with obstinate acidity of stomach.

[21] **Urinary Organs.** ❙Dull pain in region of r. kidney, with urgent desire to urinate.

❙Pain and tenderness in region of bladder, with soreness of testicles, extending up spermatic cords.

❙Tenderness in region of bladder on pressure.

❙Tenderness in region of bladder, and r. side of lower abdomen, extending upward from groin; same in l. but more on r., in forenoon.

❙❙Pain in bladder, as from distension.

❙❙Severe and dull pain in bladder, not > after urinating.

❙Dysuria of women, with extreme and frequent urging to urinate, with severe pain, especially immediately after urine is voided.

❙Sharp cutting pain in urethra.

❙Excessive burning in urethra while urinating.

Extreme and frequent urging to urinate, with severe pain, especially immediately after urine is voided.

❙Frequent desire to urinate, during afternoon, with biting sensation in urethra during and after urination.

❙❙Constant desire to urinate, and pass large quantities of clear light-colored urine without relief.

Profuse flow of urine night and day, pain after urination; involuntary urination without pain.

❙Enuresis diurna et nocturna of children.

❙❙Enuresis nocturna, when there is no tangible cause, except a habit.

Digitized by Google

Obliged to get up several times during night to urinate.
Great desire to urinate, but only a small amount passed each time.
Amount of urine grows less each time he urinates, but the desire increases.
Passed small amount of urine, but felt as though had not urinated for hours.
Urine high-colored and scanty.
Urine on standing shows great excess of mucus, otherwise normal.
Painful urination with albuminous urine.
Cystitis.
General paralysis in an old woman, in whom control over stools and urine, long completely lost, was rapidly restored.

[34] **Pregnancy. Parturition. Lactation.** Dysuria, especially in women during pregnancy and after confinement.

[37] **Sleep.** Wets bed at night; when he dreams, he always sees crowds of people.

[38] **Time.** Day: profuse flow of urine.
Forenoon: more tenderness of abdomen r. side.
Afternoon: frequent urging to urinate.
Night: profuse flow of urine; obliged to get up several times to urinate; wets bed.

[42] **Locality and Direction.** Left: tenderness of lower abdomen.
Right: dull pain in region of kidney; tenderness of side of lower abdomen.

[43] **Sensations.** Pain: in bladder.
Severe pain: in bladder.
Sharp cutting pain: in urethra.
Biting sensation: in urethra.
Burning: in urethra.
Soreness: of testicles.
Tenderness: in region of bladder; r. side of lower abdomen extending upward from groin.
Dull pain: in region of r. kidney; in region of bladder; in bladder.

[45] **Touch. Passive Motion. Injuries.** Pressure: tenderness of bladder.

[46] **Relations.** Compare in bladder troubles *Apis, Cannab., Canthar., Ferr. phos., Pulsat.*

ERIGERON.

Canada Flea Bane. *Compositæ.*

Grows in Canada and the United States as a weed. The tincture is prepared from the fresh plant when in bloom in July and August.

Used by the aborigines as an application to wounds.

Proved by W. H. Burt. See Allen's Encyclopedia, vol. 4, p. 211. A fragmentary proving of the Erigeron philadelphicum, by A. Lippe, not published, is here inserted, the symptoms marked ——.

CLINICAL AUTHORITIES.—*Dysuria in teething children* (2 *cases*), Ring, N. A. J. H., vol. 5, p. 282; *Uterine flow*, Warren, Med. Inv., vol. 5, p. 35; *Cough*, Wright, Hom. Times, vol. 2, p. 10; *Hemorrhages*, Palmer, Raue's Rec., 1871, p. 121.

[1] **Mind.** Lowness of spirits, with a feeling of great languor.

[3] **Inner Head.** ‖Congestion of head, red face, nosebleed; febrile action.

Dull frontal headache on waking in morning.

Dull headache, with ringing in r. ear.

Headache, with pain in forehead and r. eye, and pain in large joints.

[5] **Sight and Eyes.** Smarting of eyes all day.

Redness, swelling, inflammation, with profuse muco purulent discharges from eyes.

‖Echymoses upon eyeballs or around eye, from a blow.

[7] **Smell and Nose.** Increased secretion of mucus in nostrils all forenoon.

‖Epistaxis of bright red blood.

[10] **Teeth and Gums.** ‖Profuse bleeding from gums.

[13] **Throat.** Dryness of pharynx; roughness, with sensation as if something had lodged in upper part of œsophagus.

Sore throat all night, with frequent inclination to swallow.

‖Inflammation and ulceration of throat.

‖Tonsillitis.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea, with frequent eructations.

‖Violent retching and burning in stomach, with vomiting of blood.

[17] **Scrobiculum and Stomach.** Sharp cutting pains in region of stomach every few minutes.

Violent retching, with burning in stomach.

‖Hæmatemesis, from ulceration and rupture of blood-vessels.

Digitized by Google

[18] **Hypochondria.** Dull pains in hypochondria.
[19] **Abdomen.** Frequent dull pains in bowels.
Sudden, severe pains in hypogastrium, followed by mushy stool.
‖Flatulent colic.
‖Tympanites. θTyphoid fever. θDysentery.
[20] **Stool and Rectum.** Stools, bloody or mucous; small, streaked with blood; tormina; burning in bowels and rectum; hard lumps of feces mixed with the discharges; mushy, undigested.
Sudden pain in hypogastrium followed by papescent stools.
‖Dysentery, with burning in any part of alimentary canal; extreme tenesmus, with frequent small stools, streaked with blood or bloody, and great irritation of urinary organs; urination painful or suppressed.
‖Scybala, with dysentery.
Inflammation of mucous coats of colon and rectum.
Thin papescent stool, with burning in bowels and rectum.
Natural stool, followed by severe neuralgic pains in anus, with tenesmus.
‖Hemorrhoids: bleeding; with hard lumpy stools; burning in margin of anus; it feels as if torn.
‖Bleeding of hemorrhoidal tumors, and hemorrhage of bowels.
[21] **Urinary Organs.** Sharp stinging pains in region of l. kidney; complete suppression of urine, and pain in renal region, followed by urging to urinate, with emission of only a few burning drops.
‖Vesical catarrh, with pain and irritation; also vesical irritation from calculi.
Inclination to urinate about every hour, with aching distress in bladder.
‖Urination painful or suppressed.
Urging to urinate, with emission of only a few burning drops at a time.
‖Dysuria of teething children; frequent desire, crying when urinating; urine profuse, of very strong odor; external parts (female) inflamed or irritated, with considerable mucous discharge.
Urine dark, afterwards pale, double in quantity.
Hemorrhages from bladder or urethra.
Hæmaturia, with metrorrhagia.
[22] **Male Sexual Organs.** —— Sticky sweat on the male genitals.
Pain in right lumbar region, passing down to testicle.
‖Gonorrhœa and gleet.
[23] **Female Sexual Organs.** ‖Premature and profuse menses.
‖‖Metrorrhagia: with violent irritation of rectum and

Google

bladder; after abortion, with diarrhœa and dysuria; with prolapsus uteri.

‖‖Very profuse flow of bright red blood; every movement of patient increases the flow; pallor and weakness.

‖‖Dysmenorrhœa, with menorrhagia.

‖‖Menorrhagia, with spasmodic pains.

‖Steady painless flow occurring during pregnancy, at 6th month, caused by overexertion.

‖Leucorrhœa profuse, with spasmodic pains, and irritation of bladder and rectum, usually scanty menses.

‖‖Chronic uterine leucorrhœa.

[24] **Pregnancy. Parturition. Lactation.** ‖‖Abortion, with profuse hemorrhage, diarrhœa and dysuria.

‖‖Post-partum hemorrhage.

‖Bloody lochia return after least motion; > by rest.

‖‖Profuse lochia.

[26] **Voice and Larynx. Trachea and Bronchia.** ‖‖Chronic bronchial affections.

[27] **Cough.** ‖Cough, with expectoration of blood-streaked matter; hard pains in lungs; cannot lie on side.

‖Bloody expectoration, incipient phthisis.

‖Hæmoptysis, dark coagula, passive hemorrhage.

[28] **Inner Chest and Lungs.** ‖‖Incipient stages of phthisis, with bloody expectoration.

[29] **Heart, Pulse and Circulation.** Palpitation of heart.

[31] **Neck and Back.** Dull aching distress in whole dorsal region.

Severe, drawing pains in lumbar region.

[32] **Upper Limbs.** —— Rheumatic pains in l. shoulder, hand and thumb.

Great aching distress in elbows and wrists during rainy weather.

Rheumatic pains in thumb all evening.

[33] **Lower Limbs.** —— Rheumatic pain in right hip.

Dull pains in knees.

Severe drawing pains in ankle joint, < walking.

[35] **Rest. Position. Motion.** Rest: bloody lochia >.

Cannot lie on painful side.

Every movement: increases flow; bloody lochia return.

Walking: pain in ankle joint <.

[37] **Sleep.** —— Very drowsy early in the evening; soon after falling asleep wakes up feeling numb and unable to move, lies in this way, suffering painful agony for half an hour.

[38] **Time.** Morning: dull headache on awakening.

Forenoon: secretion of mucus in nostrils.

Evening: rheumatic pains in thumbs; very drowsy early.

Night: sore throat.

Digitized by Google

[39] **Temperature and Weather.** All symptoms < during rainy weather.
Rainy weather: great aching distress in elbows and wrists.
[41] **Attacks, Periodicity.** Frequent: inclination to swallow; eructations; dull pains in bowels; small stools; desire to urinate.
Every few minutes: pains in region of stomach.
Half hour: lies awake suffering.
Every hour: inclination to urinate.
[42] **Locality and Direction.** Right: pain in eye; pain in lumbar region; rheumatic pain in hip.
Left: sharp stinging pains in kidney; rheumatic pain in shoulder.
[43] **Sensations.** As if something had lodged in upper part of œsophagus; anus feels as if torn.
Pain: in forehead; in r. eye; in large joints; in renal region; in r. lumbar region to testicles.
Severe pains: in hypogastrium.
Sharp cutting pains: in region of stomach.
Sharp stinging pains: in region of kidney.
Neuralgic pains: in anus.
Spasmodic pains: in female sexual organs.
Sudden pain: in hypogastrium.
Hard pains: in lungs.
Drawing pains: in lumbar region; in ankle.
Aching distress: of bladder; in dorsal region; in elbows; in wrists.
Burning: in stomach; in bowels; in rectum; in alimentary canal; in anus.
Rheumatic pains: in l. shoulder; in hand; in thumb; in r. hip.
Dull pain: in forehead; in hypochondria; in bowels; in knees.
Dryness: of pharynx.
Smarting: of eyes.
Irritation: of rectum; of bladder.
[44] **Tissues.** Produces active congestion of various organs, with a tendency to hemorrhage therefrom.
Useful in hæmatocele in the first stages.
‖ Hemorrhages.
[45] **Touch. Passive Motion. Injuries.** From a blow: ecchymosis upon eyeball.
[46] **Skin.** Slightly elevated, sharply defined vesicles on skin.
[47] **Stages of Life, Constitution.** Small, frail, delicate woman, from overexertion at 6th month of pregnancy; uterine flow.
[48] **Relations.** *Canthar., Copaiba, Cubeba, Sabina, Terebinth.*

Digitized by Google

ERYNGIUM AQUATICUM.

Button Snakeroot. *Umbelliferæ.*

An indigenous plant, growing in low, wet places; flowers in August.

The tincture is prepared from the fresh root.

Provings by C. H. McClelland, Coggswell and Jones. See Allen's Encyclopedia, vol. 4, p. 213.

CLINICAL AUTHORITIES.—*Incontinence of urine*, Barenburg, Organon, vol. 3, p. 367; *Spermatorrhœa* (2 cases), Parks, Thomas' Add. to Mat. Med., p. 49.

[1] **Mind.** Very sober and depressed in spirits; very dull at night.

Not able to think steadily on any subject.

Thoughts confused; cannot concentrate them upon any subject without much exertion; causes heavy full pain if persisted in.

[2] **Sensorium.** Vertigo.

[3] **Inner Head.** Expanding sensation in frontal region above eyes, < stooping.

Continual dull heavy pain in frontal portion of brain.

Severe pain in frontal region, causing dimness of sight.

Frontal headache on rising.

Reading or writing causes hard, heavy pain in forehead; < stooping.

Pain in head, < by lowering it or thinking intently upon any subject; pain especially in frontal region and more particularly over l. eye, of a sharp and shooting character; when sitting in stooping posture it leaves eye, passes into neck and along muscles of shoulder, and beneath scapula, where it remains for some time.

Shooting pains in coronary region, and in r. side of face, from eyes to teeth, in morning.

Dull dragging pain in occiput, neck and shoulders.

[4] **Outer Head.** Scalp sore to touch, combing hair causes pain.

[5] **Sight and Eyes.** Dull expression of eyes, great inclination to sleep.

Eyes sensitive to light.

Burning pain in eyes, they feel heavy and slightly congested.

Sclerotitis; smarting burning sensation, with heavy aching pains, produced by strong light; squinting on exposure to strong light; tearing burning pains in eyes; watery or purulent discharge.

Digitized by Google

Purulent inflammation of l. eye; congested, red, swollen, tender to pressure; constant dull aching, > by heat; profuse discharge of purulent, sticky fluid, glueing lids together, and flowing on cheek from all parts of eyelid; conjunctiva granulated and rough.

Muscles of eye feel stiff, pain on turning them quickly.

Severe tearing, boring pain over l. eye.

[6] **Hearing and Ears.** Continued ringing, singing with cracking sound in l. ear.

Bruised tearing pain about ears, as if they were being torn from their location.

Inflammation of Eustachian tube; l. ear swollen in and out, tender to pressure, constant aching pain, bleeding readily, thick, white, bloody, foul-smelling pus.

[7] **Smell and Nose.** Profuse thick, yellow, mucous discharge from nose.

[8] **Upper Face.** Shooting pains in r. side of face from eye to teeth.

[12] **Inner Mouth.** Thick, tenacious, disagreeable mucus in mouth.

[13] **Throat.** Smarting raw pain along l. side of throat; dry tongue.

Intense redness and congestion of mucous membrane of throat, slight swelling without pain, profuse secretion of thick, whitish mucus.

[14] **Appetite, Thirst. Desires, Aversions.** Partial anorexia.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea followed by acrid eructations.

[17] **Scrobiculum and Stomach.** Hollowness or emptiness in stomach, with heavy, dragging pain.

‖Spitting up of bright arterial blood, mixed with black clots, with burning in epigastrium, after a blow on stomach.

[19] **Abdomen.** Severe colicky or cramping pain in small intestines.

Severe pain in l. groin and testicle.

[20] **Stool and Rectum.** Bowels constipated.

‖Mucous diarrhœa of children.

Tenesmus at stool; fæces seem to be cut as they pass through anus.

‖Hemorrhoids and prolapsus ani.

[21] **Urinary Organs.** Frequent desire to urinate; stinging burning pain in urethra, behind glans during urination.

‖Must urinate every five minutes; urine dripping away all the time, and burning like fire.

[22] **Male Sexual Organs.** ‖Sexual desire suppressed, then excited, with lewd dreams and pollutions.

‖Discharge of prostatic fluid from slightest causes.

Digitized by Google

‖Involuntary emissions occasioned by onanism or excessive sexual indulgence.

‖Emissions at night with erections; semen also passed by day with urine; loss of semen followed by great lassitude and depression, lasting from twelve to forty-eight hours; partial impotence.

‖Emissions of semen without erections, day and night, and followed by great lassitude; after injury to testicles.

‖Gonorrhœa with painful erections.

‖Gleet.

[25] **Female Sexual Organs.** ‖Leucorrhœa.

[26] **Voice and Larynx. Trachea and Bronchia.** ‖Laryngeal irritations; short, hacking cough.

‖Chronic laryngitis.

[27] **Cough.** ‖Cough, with sensation of constriction in throat.

[28] **Inner Chest and Lungs.** Oppression of chest, feeling of fulness, inability to take a full breath.

[31] **Neck and Back.** When pain in head is less severe, it is worse in neck and shoulders.

Weakness and heavy dragging pain in lumbar region.

[33] **Lower Limbs.** Lower extremities languid and heavy, with profuse perspiration on walking.

[34] **Limbs in General.** Transient rheumatic pains in l. shoulder and arm, also r. wrist and hand.

[35] **Rest. Position. Motion.** Sitting in stooping posture: pain leaves eye and passes to neck and shoulders.

Stooping: expanding sensation above eyes <; heavy pain in forehead <.

Lowering head: < pain in head.

Rising: frontal headache.

Turning eyes: causes pain in them.

Walking: causes profuse perspiration.

[36] **Nerves.** Slight erethism of nervous system

Loss of energy.

[38] **Time.** Morning: shooting pains in r. side of face.

By day: semen passes; emissions without erections.

Night: very dull in spirits; emissions without erections.

[39] **Temperature and Weather.** Heat: < dull aching in l. eye.

[40] **Fever.** Flashes of heat.

[41] **Attacks, Periodicity.** Every five minutes: must urinate.

From twelve to forty-eight hours: great lassitude after loss of semen.

[42] **Locality and Direction.** Left: pain over eye; inflammation of eye; severe tearing boring pain over eye; constant ringing, singing and cracking sound in ear; ear swollen; ear tender to pressure; pain along side of throat; pain in groin and testicle; rheumatic pains in shoulder.

Digitized by Google

Right: pain in face; pain in side of face; rheumatic pain in wrist and hand.

[45] **Sensations.** As if ears were being torn from their location.
Pain: in head; in forehead; over l. eye.
Erratic pains: all over body.
Tearing pain: in eyes; about ears.
Severe pain: in frontal region; in l. groin; in testicle.
Severe boring pain: over l. eye.
Hard pain: in forehead.
Sharp shooting pain: over l. eye; extending to neck and shoulders; in coronary region; r. side of face from eye to teeth.
Stinging pain: in urethra.
Colicky pain: in small intestines.
Cramping pain: in small intestines.
Constriction: of throat.
Burning pain: in eyes; in epigastrium; in urethra.
Bruised pain: about ears.
Dull dragging pain in occiput; in neck; in shoulders; in stomach; in lumbar region.
Rheumatic pains: in l. shoulder; in l. arm; in wrist; in r. hand.
Aching pain: in l. ear.
Dull, heavy pain: in frontal part of brain.
Heavy aching: in eye.
Smarting: in eyes; along l. side of throat.
Soreness: of scalp.
Oppression: of chest.
Ringing: in ears.
Singing: in ears.
Cracking sound in l. ear.
Expanding sensation in frontal region.

[46] **Tissues.** Dropsy of an asthenic character.

[45] **Touch. Passive Motion. Injuries.** Touch: scalp sore.
Pressure: l. eye tender; l. ear tender to pressure.
After a blow; burning in epigastrium.
After injury to testicles: emissions without erections, followed by lassitude.

[47] **Stages of Life, Constitution.** Married man, after injury to testicles by jumping upon a horse, for fifteen years; spermatorrhœa.
Married man, not conscious of having sustained any injury, seminal emissions for eight or ten years.
Man, æt. 82; incontinence of urine.

[48] **Relations.** Compare in pollutions *Cinchona, Gelsem., Phosphor.*

EUCALYPTUS GLOBULUS.

Australian Fever or Gum Tree. *Myrtaceæ.*

A tree of great height, native to Australia, transplanted to marshy districts in mild climates on account of its capability for absorbing water and alleged power to destroy malarious poisons. The tincture is prepared from the fresh leaves.

Eucalyptol is the essential oil.

Experiments by Maurin, Hale, Faucett, Siegen and Ringer. See Allen's Encyclopedia, vol. 4, p. 228.

CLINICAL AUTHORITIES.—*Dysuria*, Bahrenburg, Allg. Hom. Ztg., vol. 107, p. 59; *Vascular tumors of female urethra* (2 cases), Woodbury, B. J. H., vol. 34, p. 376; *Intermittent fever* (310 cases reported cured), see N. A. J. H., vol. 21, p. 124; *Use as a disinfectant*, Pigneduprítier, See Hale's Symptomatology, p. 287.

[1] **Mind.** Mental exhiliration.
Irresistible desire to move about, with a feeling of buoyancy and increased strength.
Stimulation, intoxication; excitement even unto fever.
Drunkenness, followed by mental depression and exhaustion.
Drowsy and dull.

[2] **Sensorium.** Vertigo.

[3] **Inner Head.** Cerebral congestion, with much excitement.
General full feeling in head; congestive headache.
Congestive headache, in plethoric subjects, followed by actual fever.
Dull frontal headache.
‖Nervous headache and other pains of head, which are not exactly periodic.
‖Headache in anæmic persons; relieves the pain and causes sleep.

[5] **Sight and Eyes.** Dimness of vision.
Eyes hot, burning, smarting.
‖Catarrhal and gonorrhœal ophthalmia.
Eyelids heavy.

[7] **Smell and Nose.** Stiffness of nose.
Stuffed up sensation in nose.
Considerable coryza; cold in head.
Thin, watery coryza.
‖Chronic catarrh of nasal passages, even when purulent and fetid.

[8] **Upper Face.** Flushed face, congested appearance.

Digitized by Google

[12] **Inner Mouth.** Relaxed, aphthous condition.
‖Excessive secretion of saliva.

[13] **Throat.** Burning sensation, extending to pharynx and œsophagus, with thirst.
Feeling of fulness and soreness in throat on swallowing; burning in throat.
Constant sensation of phlegm in throat, with expectoration of slightly thick white frothy mucus, not profuse.
Throat relaxed and pale.

[14] **Appetite, Thirst. Desires, Aversions.** Increased appetite; tormenting thirst.

[16] **Hiccough, Belching, Nausea and Vomiting.** Burning, strong smelling eructations.

[17] **Scrobiculum and Stomach.** Hot burning sensation in stomach.
Fulness, pressure and weight in stomach; as if he had eaten too much.
Faintness and goneness at stomach, accompanied by a distinct sensation of beating synchronous with heart.
‖Difficult and painful digestion.
Slow digestion; eructations and bloating.
Atonic dyspepsia; chronic, gastric and intestinal catarrh.

[18] **Hypochondria.** Produces contraction of spleen, which, under its use, becomes more resistant and hard, its surface granulated and the whole organ diminished in size.

[19] **Abdomen.** Feeling of weight in epigastrium.
Burning in epigastric and umbilical regions, with tormenting thirst, vertigo, dimness of vision, sense of fulness in head, with dull frontal headache, and tightness across bridge of nose, as if profuse epistaxis would occur.
Uncomfortable pressure and fulness in umbilical region.
Uncomfortable, uneasy feeling in umbilical region, extending through bowels; skirmishing, aching pains in upper portions of bowels; sensation as if he would have diarrhœa.
Sharp, aching pain in hypogastric region after dinner.
Gastro-intestinal derangements; sleeplessness and restlessness.

[20] **Stool and Rectum.** ‖Sharp, aching pains in lower part of bowels, with thin, watery yellow diarrhœa, on rising in morning.
Violent purgation and hemorrhage from bowels.
‖Chronic diarrhœa, mucous and bloody.
‖Dysentery, with heat in rectum, tenesmus, discharge of mucus, great prostration; hemorrhage from bowels.
‖Typhoid diarrhœa and dysentery.

Digitized by Google

[21] **Urinary Organs.** ⁝ Chronic desquamative nephritis, granular degeneration of kidneys, pyelonephritis, aud hydronephrosis.
‖ Vesical catarrh.
Sensation as if the bladder had lost its expulsive force.
‖ Suppressed urine.
‖ Severe pain on urinating; burning and tenesmus, with fever; urine loaded with mucus.
‖ Spasmodic stricture of urethra.
‖ Diuresis, nocturnal and diurnal.
‖ Incontinence of urine.
Urine smells of violets.
Greatly increased the elimination of urea.

[22] **Male Sexual Organs.** Increased sexual appetite.
Gonorrhœa, subacute and chronic form.
‖ Recent cases of syphilitic chancres.
‖ Gonorrhœa syphilitica.

[23] **Female Sexual Organs.** ‖ Vascular tumors of the urethra.
‖ Ulcer around orifice of female urethra.
‖ Leucorrhœa, of acrid, fetid mucus.
Swellings in different parts of the body; one below nipple on r. side, size of filbert, with stabbing darting pains.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖ Bronchitis in old and feeble persons.

[26] **Respiration.** Breathing quickened.
⁝ Asthma, in debilitated anæmic subjects, with terrible dyspnœa, the heart sympathizing strongly.
‖ Asthma humidum in bronchitic patients; relieves bronchial cough, and aids in expelling thick sputa.
‖ Cardiac asthma; allays the terrible dyspnœa.
Asthmatic neuralgic states from organic and mechanical causes, with orthopnœa and nocturnal paroxysms.

[27] **Cough.** Expectoration of white, thick, frothy mucus.

[28] **Inner Chest and Lungs.** ⁝ Chronic catarrhal affections of broncho-pulmonary mucous membrane, accompanied by free muco-purulent expectoration; bronchorrhœa.

[29] **Heart, Pulse and Circulation.** Painful palpitation.
⁝ At the climacteric, in women who suffer much from flatulence, palpitation of heart, and sudden flushings of face.
‖ Strong beating of abdominal aorta synchronous with beating of heart.
‖ Aneurisms involving pressure on vagus and its branches.
Pulse accelerated.

[34] **Limbs in General.** Pricking sensation, followed by painful aching, in arms and legs, with sense of fulness in veins, and a stiff, weary sensation, as if too lazy to move.
Pains rheumatic, jerking, tearing, stitchlike, < at night.

Digitized by Google

Can neither walk nor carry anything without great pain.
Nodular swellings over metacarpal and metatarsal joints.

[35] **Rest. Position. Motion.** Raising arm to mouth is painful.
Irresistible desire to move about.
Can neither walk nor carry anything without great pain.

[36] **Nerves.** General excitement and desire for exercise.
Malaise; faintness; great prostration.
Intermittent neuralgia.

[37] **Sleep.** Sleeplessness.

[38] **Time.** Morning: on rising pains in bowels with watery diarrhœa.
By day: diuresis.
By night: diuresis; asthmatic paroxysms; pains in limbs.

[40] **Fever.** Fall of temperature.
Fevers of a relapsing, obstinate and prolonged character, of a miasmatic origin, in which spleen becomes affected early in disease; it is at first swollen and sensitive, then becomes more resistant, harder, bunchy on its surface; vertigo is pronounced in all its stages; dull congestive headache; malaise; rheumatic pains of a jerking, tearing, stitching character, < at night.
Tuberculous hectic fevers, with profuse, exhaustive sweats.
Is very serviceable in convalescence from intermittent and remittent fevers; and in chronic malarial poisoning it has a high degree of utility.
Intermittent fever, quotidian tertian and double tertian.
Typhoid fevers.
Odorous sweat.

[41] **Attacks. Periodicity.** Paroxysms of asthmatics.
Nervous headache not exactly periodic.

[42] **Locality and Direction.** Right: swelling below nipples size of filbert.

[43] **Sensations.** Feels as if he had taken cold.
Nose as if stuffed up; weight in stomach as if he had eaten too much; feels as if he would have diarrhœa; as if bladder had lost its expulsive force; as if too lazy to move.
Pains in head: painful palpitation.
Severe pain: on urinating.
Tearing pains: in limbs.
Stabbing darting pains: in swelling below nipple.
Jerking pains: in limbs.
Pricking: in arms and legs.
Sharp aching pains: in hypogastric region; in lower part of bowels
Painful aching: in arms and legs.
Skirmishing, aching pains: in upper portion of bowels.
Burning: of eyes; in pharynx and œsophagus; in throat; in stomach; in epigastrium; in umbilical region.

Digitized by Google

Rheumatic pains: in limbs.
Dull frontal headache.
Dull feeling: in head; in throat; in stomach; in umbilical region; in veins of arms and legs.
Pressure: in stomach; in umbilical region.
Heat: in rectum.
Nervous: headache.
Smarting: in eyes.
Soreness: of throat.
Tightness: across bridge of nose.
Weight: in stomach; in epigastrium.
Faintness: in stomach.
Goneness: in stomach.

[44] **Tissues.** Cord and medulla paralyzed.
: It possesses decided anti-periodic powers.
Violent palpitation of heart; blood pressure lessened.
Temperature greatly lowered; asthenic fever.
! Remittent fevers and ague.
Spleen contracted; fatty degeneration.
: Muscular weakness extreme, so that raising arm to mouth is painful; sensations blunted, but mind absolutely unaffected.
: Is a diuretic of rare virtue, showing notably restorative effects in low states of the system, as in typhoid fever, typhoid diarrhœa, and dysentery; it relieves spasmodic strictures, vesical catarrh, and cures gonorrhœa.
Diuresis, with enormous increase of urea.
: The condition of the mucous membrane which favors production of intestinal parasites is removed.
: Is a powerful diaphoretic; has been used with fine results in exhaustive night sweats, also for herpetic eruptions, glandular enlargements, and indolent ulcers.
!! Fistulous ulcers, discharging ichorous matter, of a fetid odor; wounds and ulcers of a putrid septic character.
: Externally, the tincture and distilled water are used as disinfectant applications, to foul-smelling and ill-conditioned ulcers and wounds.

[46] **Skin.** Eruptions of a herpetic character, glandular enlargement, and development of foul and indolent ulcers.
!! Ulcers from a varix, of a year's duration.

[47] **Stages of Life, Constitution.** !! Quinine cachexia.
Miss M., æt. 6, after recovery from attack of meningitis; dysuria.

[48] **Relations.** Compare: *Ant. crud.* (condition of mucous membranes favoring worms); *Ant. tart.* (bronchial asthma, bronchorrhœa); *Arsen.* (malarial fevers; suits after *Arsen.* in relapsing fever); *Cinchona* (intermittent fevers); *Silica* (fistulous ulcers); *Terebinth* (urinary symptoms).

EUGENIA JAMBOS.

(See Jambos.)

EUPATORIUM PERFOLIATUM.

Boneset; Thoroughwort. *Compositæ.*

It was recommended by Dioscorides for ill-conditioned ulcers, dysentery, and the stings of reptiles; chronic fevers, obstructions of liver.—Leadam., B. J. H., vol. 8, p. 381.

CLINICAL AUTHORITIES.—*Ophthalmia*, Miller, Raue's Rec., 1873, p. 66; *Cracks in corners of mouth*, Williamson, Raue's Rec., 1874, p. 104; *Cough* (2 cases), Berridge, Organon, vol. 3, p. 114; *Intermittent fever*, Neidhard, Lippe, Williamson, Frost, Fisher, Allen, Miller, Allen's Int. Fever, p. 124–7; (3 cases) Ingersoll and Goodno, Organon, vol. 3, p. 370; Dunham, see Lectures on Mat. Med.; Swan, Raue's Rec., 1871, p. 195; Williamson, Raue's Rec., 1872, p. 21, and 1873, p. 20; Landesmann, Raue's Rec., 1873, p. 213; (3 cases) Frost, Raue's Rec., 1873, p. 213, and 1875, p. 271; (23 cases) Raue's Rec., 1875, p. 269; *Bilious fever*, Dunham, Hughes' Pharm., p. 359.

[1] **Mind.** ❙Feels at night as if he was going out of his mind.
❙Moaning: with the aching pain; during cold stage.
❙Anxious countenance.
❙Despondency, with fever.
Anxiety, despair, depression.
Headache > by conversation.

[2] **Sensorium.** ❙Faintness from motion, during fever.
❙Early in morning an attack of whirling around in brain, or, as he described it, "as if he had been placed in a coal screen and whirled around two or three times, repeated after a short cessation."
❙Sensation as if falling to the left.
❙❙Vertigo on attempting to rise in bed.

[3] **Inner Head.** ❙Aching in forehead.
Throbbing headache, pain extending from forehead to occiput, < l. side.
Beating pain in forehead and occiput, > after rising.
❙Darting pains through temples, with sensation of blood rushing across head.

ǁShooting from left to right side of head.
ǁThumping in side of head above r. ear.
Painful soreness in r. parietal protuberance.
ǁHeat on top of head, with pain, > by pressure.
ǁDistress on top and in back part of head.
ǁǁSoreness and pulsation in back part of head.
ǁIntense pain in occiput; distress.
Beating pain in nape and occiput; > after rising.
ǁPain in occiput after lying, with sense of weight, must aid with hand in lifting head.
ǁHeadache, with sensation of soreness internally, > in the house, < when first going into open air, > by conversation.
ǁViolent pain in head and back before chill or during chill.
ǁThrobbing headache during chill and heat.
ǁHeadache and trembling during hot stage. θIntermittent.
ǁHeadache and nausea every other morning, when awaking.
ǁNervous headache; hemicrania.
ǁSick headache: when first awaking, continuing all day: every other morning.
Suitable to bilious headache; also headaches of persons suffering from ague.
ǁHeadache arising from disordered stomach.

[4] **Outer Head.** ǁHeat on top of head, with buzzing in ears.
ǁRight parietal protuberance sore.
ǁInsupportable heaviness in head.
ǁHead drawn spasmodically backwards. θSpotted fever.
ǁTinea capitis.

[5] **Sight and Eyes.** ǁGreat aversion to light.
πDimness over eyes when looking at small things; could not sew for a whole week, all being dark.
Intense pain darting through eyes, as from needles; eyes not inflamed.
ǁǁPainful soreness of eyeballs.
ǁEyes glistened.
ǁSclerotica yellowish red.
ǁIncreased lachrymation, with cough.
ǁǁRedness of margins of lids, with glutinous secretion from Meibomean glands.
ǁLachrymation and photophobia, l. eye worse. θConjunctivitis.

[6] **Hearing and Ears.** ǁBuzzing in ears; heat on top of head.
Could hear everything while seemingly in profound sleep, but could not speak.

[7] **Smell and Nose.** ǁThe smell of food, odors and cooking produced qualmishness.
πNose very dry and stopped up.

‖Fluent coryza; sneezing; hoarseness.
‖‖Coryza, with aching in every bone.
‖Catarrh, with sore fauces; with costiveness.
‖‖Influenza: with weakness of pulse and great prostration; with pain in bones; with pain in back and limbs; lassitude; skin bathed in perspiration; surface pale and morbidly sensitive; of old people and inebriates.
‖Epidemic influenza.

[8] **Upper Face.** Anxious countenance with difficulty of breathing.
‖Sickly, sallow countenance.
‖Pale and stretchy.
Face: pale, sunken; cholera like.
‖‖Cough, with flushed face and painful eyes.
‖Flushed face: with dry, hot skin; during the fever; with cough; flushes of heat.
‖Redness of cheeks, with dry skin.
‖Face of a dull red color.
‖During heat face is of a dull mahogany-red color, and eyes glisten; sclerotica yellow.
‖Sudden severe contraction of muscles of right cheek.

[9] **Lower Face.** Cracks in corners of mouth: yellow-coated tongue; thirst.

[11] **Taste and Tongue.** Taste: bitter; insipid.
Tastelessness of food; want of appetite.
‖Tongue coated yellow, or covered with white fur.

[12] **Inner Mouth.** ‖Paleness of mucous membrane of mouth.
‖Breath smells mouldy, sourish.

[13] **Throat.** Fauces sore, dryness of throat.
‖Soreness of fauces, with catarrh.
Throat dry; at times becomes hoarse and loses her voice.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Good appetite every intervening day; other days sick headache.
‖Canine hunger with or before ague, or after quinine.
‖Longs for ice-cream.
Disgust for food.
‖Anorexia of drunkards.
Very thirsty during chill and heat; took only a little sip of water at a time.
‖‖Thirst for cold water.
‖‖Thirst throughout night before paroxysm. θTertian ague.
‖‖Thirst a long time before chill, continues during chill and heat; no thirst during sweat.
‖Thirst, sometimes for warm drinks, from one to three hours before chill; knows chill is coming because he cannot drink enough.
Desire for acid drinks.

[15] **Eating and Drinking.** After eating: violent distressing pains; no ease until all is vomited.
Insatiable thirst, but drinking causes nausea and vomiting, and hastens the chill.
After drinking cold water: shuddering; vomiting bile.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: of bitter, tasteless wind, with feeling of obstruction in epigastrium.
Qualmishness from odors, the smell of food, cooking, etc.
Sick stomach, with headache.
Nausea from least motion, with chilliness.
Nausea with excessive trembling and chilliness.
Sick stomach, night before ague paroxysm.
Nausea and sense of extreme prostration, not real.
Distressing disposition to vomit, and weakness of stomach.
Nausea as the chill goes off.
Nausea and vomiting of food.
Nausea and sickness of stomach (in one case vomiting) at beginning of heat, with violent, throbbing headache.
Nausea and vomiting, with free perspiration and copious expectoration.
Vomiting preceded by thirst.
Vomiting immediately after drinking.
Vomiting: of whatever is taken into stomach, and of bile or mucus.
Vomiting of bile with great tenderness in epigastrium, and trembling.
Vomiting: preceding, during, or at conclusion of chill; during fever; of bile at close of hot stage.
Retching and vomiting of bile.

[17] **Scrobiculum and Stomach.** Extreme tenderness in epigastrium.
Beating in epigastrium at night.
Distressing pain in scrobiculum during chill and heat.
Sensation of something in stomach that ought to come up, without ability to raise it.
Weakness of stomach after the chill.
Sensation of fulness in stomach.
General shuddering proceeding from stomach.
Heat in the stomach.
Most violent pains in stomach after eating something; no rest until all is vomited up again, aided by drinking warm water.
Indigestion consequent on the use of alcoholic drinks.
Indigestion of old people.

[18] **Hypochondria.** Soreness in region of liver.
Fulness and tenderness in hepatic region, with stitches and soreness on moving and coughing.

Digitized by Google

Tightness in l. hypochondrium.
‖Tight clothing is oppressive.

[19] **Abdomen.** ‖Soreness around waist; tight clothing oppressive.
Violent colicky pains in upper abdomen, with headache and other pains.
‖Abdomen full and tympanitic.

[20] **Stool and Rectum.** Tenesmus, with small discharge of loose stool.
‖Purging stools, with smarting and heat in anus.
‖Considerable griping, < after stool, with tenesmus.
Emission of fetid flatus, with relief.
Morning diarrhœa.
‖Frequent green, watery stools.
Profuse bilious, watery stools, with nausea and severe colic; prostration.
‖Constipation, with catarrh.
‖Smarting and heat in anus. θCholera asiatica, after subsidence of urgent symptoms.
‖‖Herpetic eruption, affecting anus and surrounding parts, scrotum and thighs.

[21] **Urinary Organs.** ‖Dark colored clear urine.
Urine: dark brown, scanty, depositing a whitish, clay-like sediment; profuse, pale, with gout; dark, in bilious disorders; watery, during intermittents.
‖‖Inflammation of meatus urinarius, in a woman.

[22] **Male Sexual Organs.** ‖Itching of the mons veneris.
‖‖Herpes on scrotum and thighs.

[25] **Voice and Larynx. Trachea and Bronchia.** Throat dry, sore, hoarse; can hardly talk; < mornings, when he gets up.
‖‖Hoarseness; roughness of voice; cough < evenings; aching in all the bones; much sweat; lassitude; pale; sensitive; secretion passive. θNasal catarrh.
‖Soreness, scraping and heat in bronchi, with cough.

[26] **Respiration.** ‖Great oppression of chest; a full breath hurts; rattling on chest.
‖Difficulty of breathing, attended with perspiration and anxious countenance.
‖‖Dyspnœa very great, obliging patient to lie with head and shoulders high.
‖‖Dyspnœa, with hard, dry cough.
With a deep inspiration, grating in chest; on full inspiration, soreness.

[27] **Cough.** ‖Disposition to cough, with dyspnœa.
‖‖Hoarse, rough cough, with scraping in bronchia.
‖Cough with soreness and heat in bronchia; flushed face; tearful eyes.
‖Rough, scraping cough, chest sore; must support it with hands; flushed face, tearful eyes.

Digitized by Google

‖Violent cough, with soreness in chest.
‖After catching cold, cough, < 2 to 4 A.M.; excited by tickling in chest, causing tightness of chest; cough < lying on back, > kneeling with face towards pillow; scanty expectoration; painful fulness in head on coughing or blowing nose; lowness of spirits.
Stitches in liver when coughing.
‖Hacking cough in evening.
‖Cough at night with headache.
‖Nocturnal loose cough; particularly after eruptive stage of measles.
‖Cough preceding or following measles.
Fatiguing cough with heat.
During apyrexia, loose cough.
‖Hectic cough from suppressed intermittent fever.

[28] **Inner Chest and Lungs.** Soreness and grating sensation in chest, at every deep inspiration.
‖Soreness in chest; worse from inspiration.
‖Pain and soreness behind sternum; heart feels as if in too small a place.
‖Oppression in middle of sternum; feels as if something was pressing against his heart; palpitation.
‖Cannot take a natural inspiration, or twist body either to r. or l., because of soreness behind sternum.
‖Soreness in chest, with cough.
Pain through r. nipple when breathing.
Aching pain under l. breast, cannot lie on l. side.
‖Deep-seated pain in l. side and in r. shoulder.
‖Supports chest with his hands during cough.
‖Painful irritation of pulmonary organs, with heat in chest.

[29] **Heart, Pulse and Circulation.** Pain, soreness and heaviness behind sternum and in cardiac region; < by least motion or turning body around.
Palpitation of heart.
Heart feels as if in too small a place; as if something was pressing against it.
‖Beating pain in occiput, < by motion; pain and soreness of eyeballs.

[30] **Outer Chest.** Aching pain under l. breast, and inability to lie on l. side.
Pain through r. nipple when he breathes.

[31] **Neck and Back.** ‖Beating pain in neck and occiput; > after rising.
‖Pain in back of neck and between shoulders.
‖‖Creeping chills, principally on back.
‖Trembling in back during fever.
‖Weakness in small of back.
Intolerable aching soreness, as if beaten, in small of back.

Digitized by Google

‖‖Pain in back as from a bruise.
‖Pain in back before and during chill.
‖‖Intense aching in back and limbs; extremities as if broken.
Deep-seated pains in loins, with soreness from motion.
‖‖Severe pain and bruised sensation in sacrum and extremities; copious sweat without relief; spasms. θIntermittent.

Upper Limbs. ‖‖Stiffness of arms and fingers during chill.
‖‖Aching pain and soreness, as from having been beaten in arms, above and below elbows.
‖‖Soreness and aching in arms and forearms; painful soreness in both wrists, as if broken or dislocated.
‖Hands icy cold.
‖Heat in palms of hands; sometimes with moisture.
Moisture of hands with chill.
Stiffness of fingers, with obtuseness of sense of touch.

Lower Limbs. Aching pain in r. hip while sitting.
‖‖Lameness in r. hip and leg when walking.
‖‖Pain above r. ilium before chill.
‖‖Pain in spot not larger than a pea, over l. hip, with soreness.
Pain with extreme sensitiveness in l. glutei muscles, passing around in front of trochanter major.
‖‖Flagging of muscles of l. thigh, as if they were falling off the bone.
‖‖Burning in skin on inner side of thighs.
‖‖Herpes on thighs.
‖‖Rheumatic pain on inside of l. knee.
‖‖Soreness and aching of lower limbs; stiffness and general soreness when rising to walk.
Pains in joints of lower extremities.
‖Severe pains, like cramps, waken out of sleep; cold sweat follows.
‖‖Calves of legs feel as though they had been beaten.
‖‖Sprained ankle-joint.
Pain and soreness of upper part of l. foot, with increased sensibility of big toe.
Pain in foot < by standing upon it.
‖Stinging in feet, as from pins, at beginning of chill.
Sharp burning pain in feet, could not keep her shoes on while pain in feet lasted; feet seemed swollen.
πSoreness and swelling of both feet when standing on them, in a gouty subject.
‖Throbbing in r. foot.
Pricking in soles of feet.
‖Feet icy cold.
Heat in soles of feet in morning.

Digitized by Google

Pain in heel, as if stabbed.
‖Dropsical swelling of feet and ankles.
Gouty swelling of big toe; profuse pale urine; dropsical swelling of ankles and feet, after gout, with profuse urinary discharge.
‖Pain in first joint of l. great toe, which suddenly moves to corresponding joint of right one.
‖‖Intolerable pain under toe nails of both feet. θIntermittent.

[34] **Limbs in General.** ‖Gouty inflammation of l. knee and r. elbow; pains < from 10 A.M. until 4 P.M.
Sharp pain in l. ankle, hip and shoulder, came on instantly and went away as quickly.
‖‖Intense aching in limbs and back, as if bones were broken. θInfluenza. θAgue.
‖Aching pain and soreness, as if beaten, in calves of legs, small of back, and in arms, above and below elbows.
‖Pain in bones early in morning, before paroxysm. θIntermittent.
‖Pains in bones accompanying influenza.
‖‖Aching in bones of extremities, with soreness of flesh; soreness in bones.
‖‖Aching pain, with moaning throughout cold stage.
‖Bones of extremities ache in latter part of chill, and beginning of heat.
‖Rheumatic affections, accompanied by perspiration and soreness of bones.
‖Syphilitic pains.
‖Stretching and pale, 9 A.M., before chill.
‖Walks about crouched up.
‖Cramps.

[35] **Rest. Position. Motion.** Must lie high with head and shoulders, on account of dyspnœa.
After lying: pain in occiput.
While in great pain he lies quiet.
Lying on back: cough <.
Could not raise head from pillow.
Kneeling with face towards pillow: cough >.
While sitting, aching in hips.
Must support chest with hands during cough.
Cannot lie on l. side.
Rising: in bed, vertigo; pain in forehead >; pain in neck and occiput >; stiffness and general soreness when rising.
Standing on foot: pain <; soreness.
Walks about crouched up.
Walking: lameness of r. hip and leg.
Motion: faintness; nausea; stitches and soreness in hepatic

Digitized by Google

region; pains in cardiac region and behind sternum; pain in occiput <; pains in loins and soreness; chilliness; sweat <.
Cannot turn body because of soreness behind sternum.
Cannot keep still, although there is great desire to do so.

[36] **Nerves.** Very restless, cannot keep still, although there is great desire to do so.
Trembling: with vomiting; with chill; internal; with external heat; during heat; in back; during fever.
Great weakness and prostration during fever, with faintness from motion.
‖During fever, weak, faint, nervous, trembling.
‖Hands have to assist the head in lifting it; with headache.
‖Weakness during fever; could not raise head from pillow.
General debility from intemperance.
‖General lassitude with influenza.
‖Great prostration, almost syncope.
‖Faintness from motion, during fever.
‖Cerebro-spinal meningitis, with intense soreness and aching all over, vomiting, pain in back of head and neck.

[37] **Sleep.** ‖Stretching and yawning. θIntermittent fever.
‖Disposed to yawn before chill.
‖Sleepiness with difficult breathing.
Profound sleep at noon; could hear everything, but could not speak.
‖During sleep, some sweat in evening.
‖Has to lie with his head high.
‖Headache on awaking.

[38] **Time.** Morning: attack of whirling around in brain; attacks of chills; diarrhœa; sore throat <; heat in soles of feet; pains in bones; chilliness; slight perspiration.
2 to 4 A.M.: cough.
7 A.M.: chill.
9 A.M.: stretchy and pale; chill.
Forenoon: fever.
2 P.M.: severe headache with chill.
10 A.M. to 4 P.M.: pains <.
All day: sick headache.
Evenings: cough <; during sleep some sweat.
Night: feels as if he was going out of his mind; thirst; sick stomach; beating in epigastrium; cough with headache; chilliness; coldness during sweat; pungent heat and sweat.

[39] **Temperature and Weather.** Wants to be warmly covered during chill.
From uncovering: chilliness.
Better in house: headache.

Google

Aggravated when first going in open air: headache.
After being in an ice-house: chill and fever.

Fever. Chilliness in morning, heat throughout rest of day, no perspiration, or slight in morning.
Attacks of chills in morning, no fever; so chilly, could not get warm; throat dry, becomes hoarse at times and loses her voice; very great oppression in chest; sharp burning pain in feet, could not keep her shoes on while pain in feet lasted, feet seemed swollen; cough short and dry; sharp pains in l. ankle, hip and shoulder, come on instantly and go away as quickly.
Chilliness through night and in morning, with nausea from least motion.
Chilliness, with excessive trembling and nausea.
A greater amount of shivering during chill than is warranted by the degree of coldness.
Coldness during nocturnal perspiration.
Alternate chilliness and flushes of heat.
Sick stomach, night before paroxysm.
Cough in night previous to paroxysm.
Paroxysm generally commences in morning.
Thirst several hours before chill, continues during chill and heat.
Chill preceded by pain above r. ilium, with thirst and a disposition to yawn.
Pain in all the bones, as if broken, before commencement of chill.
Coldness and stinging or pricking, as from pins, in both feet at commencement of chill.
Violent pain in head and back before chill.
Chill induced or hastened by drinking cold water.
Chill at 7 A.M., preceded by thirst, and attended with moisture of hands.
Chill at 9 o'clock in morning.
Intermittent fever with a heavy chill, early in morning of one day, and a light chill about noon next day, and so on successively.
Chill spreads from back; begins between 7 and 9 A.M.
Severe headache, with slight chill at 2 P.M.
During chill: thirst, headache and backache; aching all over, as if in bones; more shivering than degree of coldness warrants; trembling, nausea; moaning with pains; wants to be covered.
Thirst during chill and heat, with vomiting after least drink of water. θIntermittent.
Distressing pain in scrobiculus cordis, throughout chill and heat.
At conclusion of chill: vomiting of bile; loose cough.

Google

‖ Fever, with despondency, morbid sensitiveness of skin, and sleeplessness.

Fever preceded by thirst, cannot raise head; cheeks red; throbbing headache; sleep and moaning; trembling, faint from motion.

‖ Vomiting of bile at end of hot stage, followed by slight sweat and sleep.

During heat: trembling in back; headache; thirst continues; patient is very sensitive to the aggravation from drinking, "a swallow of water will make him shiver;" the less thirst the more severe the cephalalgia and bone pains; great weakness, cannot raise head; faintness from motion; cheeks mahogany red; dry, hot skin.

‖ Fever in forenoon, preceded by thirst early in morning, but no chill; attended by fatiguing cough, and not followed by perspiration.

Pungent heat attending the perspiration at night.

‖ During apyrexia, loose cough.

Sweat: light or wanting; > all pains but headache, which is <; profuse at night in old cases, < by uncovering or least motion, rarely debilitating.

‖ Pains did not abate with the occurrence of the sweat.

Copious sweat with rheumatism.

Skin bathed in sweat; or sweat scanty.

‖ Nightly sweat, with chilliness, from moving or uncovering.

‖ Anteponing chill, with congestive throbbing, thirst and aching in bones.

‖ Cold stage in afternoon each alternate day an hour earlier, never amounted to a chill; thirst before and during cold stage, which lasted three hours; vomiting much bile after drinking; muscles painful, < in cold stage, followed by intense heat, with perspiration; hot stage lasting six to eight hours, with thirst; during attack she would be warmly covered, then profuse perspiration, without heat, continuing during sleep all night; great debility even when free from fever; liver much enlarged and very sensitive to touch; urine extremely scanty, turbid, and of an offensive odor; no appetite.

‖ Exceedingly severe chill followed by burning fever; face of a dull red color; glistening eyes, sclerotic æ yellowish red; tongue covered with thick, yellowish fur; intense headache in occiput and insupportable heaviness; nausea and frequent effort to vomit; extreme tenderness in epigastrium; fulness and tenderness in hepatic region, with stitches and soreness on moving and coughing; intolerable aching in back and limbs, "as if bones were broken;" urine scanty and of a dark mahogany color;

Digitized by Google

hard, dry cough and some dyspnœa. θIntermittent fever.

‖Intense headache with soreness of scalp, soreness of eyes, redness of face, nausea and prostration, soreness in region of liver, constipation, high colored urine, violent bone-pains. θBilious fever.

‖Remittent fever, bilious and malarial; with severe gastric and intestinal irritation.

‖In first stage of yellow fever as an intercurrent remedy, when the bones ache as if broken, with headache and backache, thirst and vomiting.

‖Intermittent fever, quotidian, tertian and quartan.

‖Chill and fever after staying in an ice-house.

‖Fevers attended with gastric derangement.

‖Hectic cough from suppressed intermittent.

Bilious fever; remittent fever; dengue; typhoid.

[41] **Attacks, Periodicity.** Frequent: green watery stools; effort to vomit.

At times: becomes hoarse.

Intermittents of any type, but especially the tertian.

Pains come quickly and go quickly.

Every other morning: headache and nausea; good appetite; alternate heavy and light chill.

Alternate afternoons: cold stage each day an hour earlier.

[42] **Locality and Direction.** Right: thumping in head above ear; soreness of parietal protuberance; pain through nipple; pain in shoulder; pain in hip; lameness in hip and leg; pain above ilium; rheumatic pain on inside of knee; throbbing in foot; pain in joint of great toe; gouty inflammation of elbow; foot throbbing.

Left: as if falling to side; throbbing headache; eyeball, pain and soreness; lachrymation and photophobia; tightness in hypochondrium; aching pain under breast; pain in side; pain over hip; pain and extreme sensitiveness of glutei muscles; flagging of muscles of thigh; pain and soreness of upper part of foot; pain in joint of great toe; gouty inflammation of knee; sharp pain in ankle, hip and shoulder.

Left to right: shooting pain in head.

Left great toe to right toe: moving pain.

[43] **Sensations.** Feels as if he was going out of his mind; as if he had been placed in a coal screen and whirled around two or three times; as if falling to left; as if blood was rushing across head; sensation of weight; inner head feels sore; pain as if from needles; feeling of obstruction in epigastrium; as if extremely prostrated, not real; as if something were in stomach that ought to come up; heart as if in too small a place: as if something was

Google

pressing against heart; back as if beaten; pain in back as if from a bruise; extremities as if broken; wrists as if dislocated or broken; as if muscles were falling off bones of l. thigh; calves of legs feel as if beaten; heel as if stabbed.

Bruised feeling, as if broken, all over body.

Pain: in occiput; in eyeballs; in bones; in back; in limbs; behind sternum; through r. nipple; in cardiac region; in back of neck and between shoulders; in back; in r. ilium; in small spot over l. hip; in l. glutei muscles, passing round in front of trochanter major; in joints; in upper part of l. foot; in foot; in heel; in first joint of great toe.

Numbness: as if flesh was falling from bones.

Intolerable pain: under toe nails.

Intense pain: in occiput; darting through eyes.

Violent pain: in head and back; after eating; in stomach; in abdomen.

Severe pain: in sacrum; in extremities.

Sharp pain: in l. ankle; in hip; in shoulder.

Shooting: from l. to r. side of head.

Darting pains: through temples.

Stitches: in hepatic region; in liver.

Colicky pains: in abdomen.

Griping: in abdomen.

Burning pain: in feet.

Pricking: in soles of feet.

Painful soreness: in r. parietal protuberance; of eyeballs; in small of back; of wrists.

Distressing pain: after eating; in scrobiculum.

Deep-seated pain: in l. side and r. shoulder; in loins.

Beating pain: in forehead and occiput; in nape.

Throbbing: headache; pain from forehead to occiput; in r. foot.

Beating: in epigastrium.

Thumping: in side of head above ear.

Aching: in forehead; in every bone; under l. breast; in back and limbs; in arms above and below elbows; in r. hip; of lower limbs.

Rheumatic pain: on inside of l. knee.

Bruised sensation: in sacrum; in extremities.

Grating: in chest.

Scraping: in bronchi.

Stinging: in feet, as from pins.

Distress: on top and on back part of head; occiput; with pain after eating.

Heat: on top of head; in stomach; in anus; in bronchi; in palms of hands; in soles of feet.

Digitized by Google

Burning: in skin; on inner side of thighs.
Soreness: in back part of head; of scalp; in eyeballs; of fauces; in region of liver; around waist; in bronchi; of chest; behind sternum; in cardiac region; in arms above and below elbows; above l. hip; of lower limbs; general; of upper part of l. foot; of feet.
Smarting: in anus.
Painful irritation of pulmonary organs.
Sensitiveness: of big toe on l. foot; of l. glutei muscles.
Tenderness: of epigastrium; in hepatic region.
Pulsation in back part of head.
Trembling: in back.
Shuddering.
Buzzing in ear.
Stiffness: of arms; of fingers.
Faintness.
Lameness: in r. hip and leg.
Tightness: in l. hypochondrium; of chest.
Fulness: in head; in stomach; in hepatic region.
Oppression: of chest; in middle of sternum.
Heaviness: in head; behind sternum; in cardiac region.
Weakness: in small of back.
Itching: of mons veneris.

" **Tissues.** Acts upon gastro-hepatic system, fibrous tissues and bronchial mucous membranes, its most characteristic condition being a bilious derangement partaking of a malarial character.
Rheumatism and gouty affection.

" **Touch. Passive Motion. Injuries.** Pressure: heat on top of head >.
Tight clothing is oppressive.
Standing upon it, increases pain in foot; soreness and swelling of feet.

" **Skin.** ‖Jaundiced color. θIntermittent and bilious fevers.
‖Anasarcous swellings of extremities, depending on general debility.
‖Surface pale and morbidly sensitive; morbid sensitiveness of skin, with fever.
‖Tardy development of eruptive diseases, and especially measles.
‖Measles preceding or following cough.
‖Petechial or spotted fever; head drawn spasmodically backward.
‖Spotted fever, with severe aching and soreness of limbs.
‖Ringworms and herpetic eruptions.

" **Stages of Life, Constitution.** ‖Cachectic condition of system from long continued or frequent attacks of bilious and intermittent fevers.

Digitized by Google

Adapted to diseases of old people; worn-out constitutions, especially from inebriety.
Old people suffering from indigestion.
Boy, æt. 8; tertian intermittent.
Boy, æt. 14, sallow face, sickly aspect; tertian ague.
Boy, æt. 18; intermittent fever.
Mrs. A. T., æt. 22; intermittent fever.
Strong man, æt. 27; second attack of tertian ague.
Miss ——, caught cold ten days previously; cough.
Mrs. A., four months pregnant; intermittent fever.
R. D., æt. 35, stout mechanic, dark complexion, after remaining in an ice-house for quarter of an hour, during a warm August morning; intermittent fever.
Miss W., æt. 50, corpulent; intermittent fever.

[48] **Relations.** Compatible: *Natr. mur.* and *Sepia*, which follow well.

Compare: *Chelid.*, *Podoph.* and *Lycop.*, but especially *Bryon*, which is its closest analogue. These may be distinguished by *Bryon.* having free sweat, and pains keep patient quiet, and by *Eupat.* having deficient sweat, and pains make the patient restless.

EUPATOREUM PURPUREUM.

Queen of the Meadow. *Compositæ.*

An old Indian medicine, used by herb doctors, particularly in gravel and other diseases of the kidney and bladder.

Proved by Mrs. H. H. Dresser, whose excellent proving appears in full in Allen's Encyclopedia, vol. 4, p. 237.

For a full arrangement of the symptoms see Hering's Monograph.

CLINICAL AUTHORITIES.—*Cystitis* (2 cases), B. L. Dresser, Am. Hom. Obs., vol. 3, p. 405; *Retention of urine*, B. L. Dresser, Am. Hom. Obs., vol. 3, p. 405; *Intermittent fever* (105 cases reported cured), Von Tagen, Hom. Clinics, vol. 4, p. 126; Hom. Clinics, vol. 1, pp. 3 and 52; Howard, Hom. Clinics, vol. 1, p. 16; (2 cases), Raue's Rec., 1871, p. 195; Raue's Rec., 1872, p. 244; Gardiner, Raue's Rec., 1870, p. 52; Analytical Therap., vol. 1, p. 266; *Dropsy*, Hale, A. H. O., vol. 1, p. 133.

[1] **Mind.** ||Stupid, dull. θDropsy. θIntermittent.
Confusion with falling to l. side.
The mind encompassed by various delusions.
Talkative; exclamations; delusions of sight and hearing.
Sighing every few minutes, with gnawing at stomach.
||Moaning; suffering expressed by peculiar cries.
Hysterical mood, weeping, sighing, and a feeling like home sickness, though occupying her own home and surrounded by her own family, with fluttering of heart and a disagreeable fulness in throat.
Feels extremely depressed and sleepy.
Has a great fear of sickness.

[2] **Sensorium.** |Head feels light and dizzy, as though flying round and round; cannot get rid of the sensation as if falling towards the left side; the whole body seems to participate.
Lightness of head < in morning, disappearing at 12 o'clock.
Sensation as if her head were moving in all directions.
Illusions of sight and hearing, with vertigo.
Confused, heavy; cannot seem to prevent falling.
Dull, sleepy; great effort required in order to move about.

[3] **Inner Head.** ||Dull, heavy pain in head; most severe in forehead.
|Much headache and constriction over frontal region, with chill.

Digitized by Google

Dizzy, with deep, dull, aching pain through temporal region on l. side.
Vertex full, pressing, as though lifting up from adjoining parts.
‖Head feels as though she had a bad cold.
Hard thumping pain on l. occipital bone.
Pain from l. shoulder extends to occiput.
Sick headache; dull hammering, beating, stitching, or boring pain in l. side of head; pressing from r. to l.; beginning in morning and increasing during afternoon and evening; < in cold air; > while walking slowly in fresh air.
‖Violent headache: before the chill; during morning; with fever.

[4] **Outer Head.** Fine pricking sensation on scalp, rather pleasurable than otherwise.
‖Soreness, tenderness, and itching of scalp.
‖Sweat, principally on head, particularly profuse about forehead.

[5] **Sight and Eyes.** ‖Staring; looking with fixed eyes, wide open.
Cannot see as far as usual, with sleepy feeling.
Eyes weeping; copious flow of tears.
‖Copious flow of tears, filling eyes, making constant wiping necessary.
‖ Eyes red and swollen; violent headache.
‖Conjunctiva yellow, with the chill.

[6] **Hearing and Ears.** ‖Ears feel as though they were full.
Squeaking sound in ears; reports; illusions of hearing.
‖Crackling, like burning of birch-bark; very much < upon swallowing anything.

[7] **Smell and Nose.** ‖Fluent coryza; great heat, sneezing.
Abundant discharge of a thin, watery fluid, making nose sore and irritable.

[8] **Upper Face.** Congestion to face, with burning heat, dry and hot to touch.
‖Face flushed, with fever.
Shining appearance of face, as when having used a large quantity of soap in washing.

[9] **Lower Face.** ‖Lips blue. θIntermittent.

[10] **Teeth and Gums.** Gums red and hot.

[11] **Taste and Tongue.** ‖Tongue furred, brown along centre; bitter, pappy taste, with chill.
Pricking and stinging in end of tongue.
Fine pricking sensation on posterior part of tongue.
Numb feeling of tongue, as if caused by aconite.

[12] **Inner Mouth.** Increased action of all the glands of the mouth; abundance of saliva.

Digitized by Google

[13] **Throat.** Fluttering in throat-pit; extends upward from heart.
Disagreeable fulness in throat; can hardly prevent crying.
‖Choking fulness of throat, must swallow often.
‖Swallowing: < crackling in ears; causes pain.
Soreness, roughness and dryness in throat.
Sensation in throat as if having swallowed tobacco.
Burning, smarting, as if having been scalded by swallowing some hot substance.
‖Continued smarting and burning, most severe in posterior part of throat.
‖Pain in left side of throat, causing pain in swallowing; before chill.

[14] **Appetite, Thirst. Desires, Aversions.** No appetite: much thirst.
Loss of appetite with fever; desire to eat immediately after.
‖Thirst before the chill, none during.
‖Constant thirst with fever.
‖Thirst, in a case of dropsy.
Longing for lemonade, or cold acid drinks, with violent bone pains, blue lips and nails, extremities cold, and frontal headache.
Longing for hot drinks.

[16] **Hiccough, Belching, Nausea and Vomiting.** Great quantity of wind in stomach; eructations almost constant.
‖Great nausea and sickness of stomach, but no vomiting with the chill.
‖Nausea; vomiting with fever.
‖Vomiting, with sick headache.

[17] **Scrobiculum and Stomach.** Great nausea, swelling, and fulness, mostly on l. side.
Crampy pains in pit of stomach, with weak, sick feeling.
‖Crampy pain in stomach; gnawing and sighing.

[19] **Abdomen.** Bowels hard as a rock.
Fulness and pain in bowels.
Swelling and fulness, mostly on l. side.
‖Rumbling, rolling, and twisting pain in bowels.
Crampy, windy bowels.
‖Severe colic pain over whole abdomen, after voiding urine.
Pain and soreness of whole abdomen, much < on l. side.
‖Hypogastric region swollen and hot. θSuppression of urine.

[20] **Stool and Rectum.** ‖Bowels inclined to be loose. θIntermittent.
‖Bilious diarrhœa.
Feeling as though bowels must be moved immediately, without being able to do so.
Pressure and heaviness upon rectum.

Digitized by Google

[21] **Urinary Organs.** ||Dull, deep pain in kidneys; also cutting pain.
|Chronic nephritis.
|Suppression of urine.
Hard, aching pressure upon bladder; evacuated bladder every half hour during day, still it is full and tense.
|Smarting and burning very intense in bladder and urethra, so much so that she could not stand.
|Severe, deep, dull aching in bladder.
Cutting pain, pressure, fulness in bladder.
||Chronic irritation of bladder, with increased mucous secretion.
|Excessive irritation of bladder, with large deposits of lithates.
|Uneasiness in region of bladder while suffering from a violent cold; continued to increase until it became a confirmed chronic inflammation.
|Incontinence of urine; especially with children.
|Restless tossing about; constant moaning, expressed by peculiar cries; lower belly swollen and hot.
|Violent headache, soreness all over, aching, gnawing in joints; eyes red and swollen; violent cutting pain in back; labor-like pains in back; constant desire to void urine; most excruciating, smarting and burning in urethra upon voiding urine; passes a few drops at a time, and is obliged to make the effort very often; numbness of legs; deep, dull aching in kidneys; also in bladder; great emaciation; hectic fever; night sweats; rheumatic pains shifting from place to place. θChronic cystitis.
|Catarrhus vesicæ, attended by ulceration.
|After riding four miles a very rough road, with much jolting and shaking, seven months pregnant, and taking a bad cold, violent dysuria.
|Strangury, due to uterine displacement.
|Ischuria with child two weeks old.
Constant urging to urinate all day; has passed twice as much urine during the day as usual.
Felt an uncontrollable desire to void urine, after which she experienced a severe colic pain, occupying whole extent of abdomen.
Constant desire to pass water accompanied by a cutting, aching pain in bladder.
Voiding urine as often as once an hour during whole day.
|Passes a few drops of urine at a time, and is obliged to make the effort very often.
Profuse flow of clear, limpid urine; weak, tired and faint after urinary symptoms.

Digitized by Google

‖Urine scanty, albuminous, and frequent.
Stream of urine smaller than natural.
Mucous sediment in urine in excess, indicating inflammation.
Diabetes insipidus; albuminuria; dropsy due to renal disease, with severe dyspnœa and œdema all over body.
‖Renal and vesical calculi.
Diuresis and vesical irritation; hyperæmia and vesical inflammation.
‖Dysuria, enuresis nocturna, and other conditions of irritation of bladder from direct or reflex causes.
‖Vesical irritability in women.

[31] **Male Sexual Organs.** ‖Impotency, from exhaustion or abuse of the generative functions.

[32] **Female Sexual Organs.** Tense cutting pain two inches above l. ovary.
A smart, quick, jerking motion in l. ovary.
Heavy pressure during day directly above l. ovary.
‖Sterility, from atony of ovaries.
Strangury from uterine displacement, or during pregnancy.
Leucorrhœa quite abundant, leaving no stain upon linen.
‖Uterine leucorrhœa caused by exhaustion of uterus and chronic metritis.
‖The external generative organs feel as though wet, though a delusion.
‖Inflammation of meatus urinarius.
‖Numbness, worse in groin.

[34] **Pregnancy. Parturition. Lactation.** ‖Threatened abortion.
‖Habitual abortion at third or fourth month.
‖Insufficient labor pains.

[35] **Voice and Larynx. Trachea and Bronchia.** Flowing coryza; sneezing; hoarseness, with roughness of voice; hacking cough in evening; cough with soreness and heat in bronchi; difficult breathing; grating sensation in chest at every deep inspiration.

[36] **Respiration.** ‖Difficult breathing; distressing dyspnœa.
Choking compels to swallow.
‖Grating sensation in chest at every deep inspiration.

[37] **Cough.** Hacking cough in evening.
Cough, with soreness and heat in bronchia.
‖Spell of dry, hacking cough previous to attack, continuing throughout paroxysm.

[38] **Inner Chest and Lungs.** Strong desire to inflate lungs, which she continued to do from time to time, without noticing particularly that she was doing so; sighing.

[39] **Heart, Pulse and Circulation.** Palpitation of heart; fluttering of heart and fulness in throat.
‖Pulse accelerated and full. θAgue.

Digitized by Google

Pulse 80 to 100, full and bounding.

[31] **Neck and Back.** Lame feeling in nape of neck.
Stiff, wry neck.
Cutting pain in neck, running from l. shoulder to occiput.
‖Between shoulder blades chilly feeling.
Sore pain directly within spine, its whole extent, from below upwards.
‖Violent cutting pain in back.
‖Labor-like pains in back.
‖‖Chill begins in lower dorsal region and runs up the back.
‖Neuralgic pains from below upwards, mostly l. side of back and hip.
‖Distressing pain in lumbar region before chill.
Rheumatic pains in lumbar region.
Dull, aching pain in sacrum, running upward into kidneys.

[32] **Upper Limbs.** ‖Arms perspire most; hands are cold; finger-nails blue.

[33] **Lower Limbs.** Pain from hip and back upwards.
‖‖Gnawing in hip-bone.
Legs feel weak, tired; l. leg weak, worse than r., in which she has a severe numbness.
Numbness of legs, after or in conjunction with the severe bone-pains.
Feet feel as if she had walked a long journey.
It seems to her as though her heels were crowding through her boots; the delusion so marked that she felt compelled to look and see if it was really the case.
‖Thighs perspiring most; feet cold.

[34] **Limbs in General.** Tired, weak, uneasiness in limbs, with numbness and gnawing pain.
‖Rheumatic pains shifting from place to place, always from below upwards.
‖Pains in arms and legs before chill.
‖Limbs cold, during fever.
Ischias sinistra; severe shooting pains in course of l. sciatic nerve, producing a palsied sensation, especially after motion; neuralgia of r. shoulder, or of r. knee, passing over to l. side; neuralgic pains from below upwards, mostly in l. side of back and hip; gnawing in hip-bone, legs feel weak and tired, l. leg more.
Rheumatism, especially in aged persons, with sensation of soreness of bones, leaving ankles and feet swollen; profuse discharge of clear urine; intense aching in limbs, as if bones were broken; pains come and go suddenly; very restless, cannot keep still, though there is great desire to do so, and the pains are not > by motion.

[35] **Rest. Position. Motion.** Unable to lie down.
Great effort required to move about.

Digitized by Google

Changing position ever so little, chilly down back.
Walking slowly: pressing in head >.
Motion: shooting pain in sciatic nerve produces palsied sensation, < after motion; pains in limbs not > by motion.

[36] **Nerves.** Suffers from unusual weakness; with a staring look of eyes.
Faint, dizzy feeling, pervading whole body.
Tired, weak feeling in every organ of body; general prostration.
Faintness, languor, sickness; cannot move about.
A weak, tired, wearied, faint feeling, almost insupportable accompanies symptoms of urinary organs.
‖Restlessness, tossing, constant moaning.
‖Unable to lie down.
Nervous, restless, hysterical mood.

[37] **Sleep.** ‖Yawning, gaping, sighing.
Sleepy and depressed.
‖Sleep restless and much disturbed, frightful dreams.
Sleeplessness, with wild, staring eyes.

[38] **Time.** Morning: lightness of head <, disappearing at 12 o'clock; pressing in head; violent headache; pain in lumbar region; in arms; in legs; l. side of throat.
At 10 A.M.: yawning, gaping, stretching out, then shake.
During day: voiding urine every hour; heavy pressure directly above l. ovary.
Afternoon: pressing in head <.
After 3 P.M.: chilly feeling in lumbar region.
Evening: pressing in head <; hacking cough.

[39] **Temperature and Weather.** Hot drinks: longing for.
Fresh air: pressing in head >.
Cold drinks: longing for.
Cold air: pressing in head <.

[40] **Fever.** ‖Chilly down back, when changing position ever so little.
‖General coldness of whole body.
‖‖Chill begins in small of back, and spreads over body; violent shaking, with comparatively little coldness; bone pains; thirst in chill and heat; nails blue.
‖‖Skin hot and dry with fever; hot to touch in face.
‖‖Fever protracted, with bone pains, nausea and vomiting, followed by slight sweat, mostly about forehead and head.
Heat with thirst.
‖Sweat: principally about forehead; chilly when attempting to shift position.
‖Hectic fever, with night sweats; pulse feeble but regular.
‖‖Pulse ranged from 80 to 100; full and bounding.

Digitized by Google

Chill commences in small of back and extends from this point up and down body simultaneously; slightest movement while covered, or draft of air blowing upon patient, produces a transient return of chill after it has apparently passed away, and after the fever has set in; this is also the case during the sweat, but not so marked, severe bone pains. θIntermittent fever.

During morning, headache, pain in lumbar region, arms, legs, and l. side of throat; after 3 P.M., chilly feeling in lumbar region, extending up as far as between shoulder-blades, cold hands and feet, finger-nails blue, general coldness; after from one to three hours, fever, flushed face, suffused eyes, lachrymation, running at nose; constant thirst; desire for cold and acid drinks; loss of appetite; restless sleep, with frightful dreams.

At 10 A.M., every other day, begins to yawn, gape, stretch out, and then to shake; coldness appears to commence about trunk first, while hands and feet become so in half or three-quarters of an hour afterwards; finger and toe-nails become blue; child does not shake continually during the chill, but appears to shudder at intervals for a moment or so; after two hours slight fever with thirst, both continuing about an hour and followed by perspiration, particularly about upper portion of body. θQuotidian intermittent.

[41] **Attacks, Periodicity.** Chill at different times of day.
At intervals for a moment or so: child shakes.
Every few minutes: sighing.
Every half hour during day: evacuates bladder.
Every hour during day: voiding urine.
Every other day: chills.

[42] **Locality and Direction.** Left: falling to side; dull, aching pain through temporal region; thumping pain on occipital bone; pain from shoulder to occiput; boring pain on side of head; pain in side of throat; swelling and fulness in stomach; soreness of whole abdomen < on side; cutting pain two inches above ovary; a smart, quick, jerking motion in ovary; heavy pressure above ovary; cutting pain in neck, from shoulder to occiput; neuralgic pains side of hip and back; leg weak; shooting pain in course of sciatic nerve.
Right: leg numb; neuralgia of knee or shoulder.
Right to left: pressing in head; neuralgia of knee or shoulder.
From below upwards: sore pain directly within spine; neuralgic pains hip and back.

[43] **Sensations.** As though tendons flying round and round; as if falling to l. side; as if head were moving in all

Digitized by Google

directions; vertex as though lifting up from adjoining parts; head feels as though she had a bad cold; ears feel as though they were full; numb feeling of tongue, as if caused by aconite; throat feels as if having swallowed tobacco; throat feels as if having been scalded by swallowing some hot substance; bowels hard as a rock; feeling as though bowels must be moved immediately without being able to do so; external generative organs feel as though wet; grating sensation in chest; as if she had walked a long journey; as though her heels were crowding through her boots; as if bones were broken.

Pain: from l. shoulder to occiput; in l. side of throat; in bowels; from hip and back upwards; in arms and legs.
Violent: headache; bone pains.
Cutting pain: in kidneys; in bladder; in back; two inches above l. ovary; in neck.
Shooting pain: in course of l. sciatic nerve.
Boring pain: in l. side of head.
Stitching pain: in l. side of head.
Gnawing: at stomach; in joints; in hip bone; in limbs.
Neuralgic pains: l. side of hip and back; of r. shoulder; of r. knee.
Dull, deep pain: in kidneys.
Rolling and twisting pain: in bowels.
Distressing pain: in lumbar region.
Crampy pains: in pit of stomach; in stomach.
Colic pain: over whole abdomen.
Rheumatic pains: from place to place; in lumbar region.
Labor-like pains: in back.
Burning heat: in face; in throat; in bladder; in urethra.
Sore pain: directly within spine.
Smarting: in throat; in bladder; in urethra.
Fine pricking sensation: on scalp; in end of tongue; on posterior part of tongue.
Soreness: of scalp; of throat; over whole abdomen; all over; in bronchi.
Dull pain: in head.
Dull aching: in bladder; in kidneys; in sacrum.
Dull, hammering pain: in l. side of head.
Beating: in l. side of head.
Heavy pain: in head.
Constriction: over frontal region.
Tense pain: over l. ovary.
Pressure: upon rectum; upon bladder; above l. ovary.
Heaviness: upon rectum.
Heat: in bronchi.
Roughness: in throat.
Dryness: in throat.

Digitized by Google

Fluttering: in throat-pit; of heart.
Fulness: in throat; in bowels; in bladder.
Dizzy feeling: in head; over whole body.
Light feeling: in head.
Uneasiness: in region of bladder; in limbs.
Tenderness: of scalp.
Chronic irritation: of bladder.
Squeaking: in ears.
Rumbling: in bowels.
Lame feeling: in nape of neck.
Numbness: of legs; < in groin; in limbs.
Numb feeling: of tongue.
Itching: of scalp.

[44] **Tissues.** Through the spinal nervous system it produces a state of muscular system similar to rheumatism; it probably affects the anterior portion of spinal cord the most.

Through the renal plexus, this remedy has a specific and special action upon the kidneys, acting as a powerful diuretic, producing great increase of urinary secretion; large doses produce vesical irritation, with frequent desire to urinate, which is very urgent and painful; urine loaded with mucus, and high-colored and scanty.

‖Distressing dyspnœa; whole body and extremities extremely œdematous; secretion of urine very scanty, only 3 or 4 ounces in twenty-four hours; no organic disease discernible; urine however slightly albuminous; pulse feeble but regular; extremities cold; considerable general prostration. θDropsy.

[45] **Touch. Passive Motion. Injuries.** After riding four miles a very rough road, with much jolting and shaking, while pregnant, violent dysuria.

[47] **Stages of Life, Constitution.** Infant, æt. 2 weeks; retention of urine.

Babe, æt. 11 months, living in a miasmatic district, is pale, wan, debilitated; intermittent fever.

Girl, æt. 2½ years, delicate, pale, frail, living in a miasmatic district, was seized with convulsions, followed by paroxysm of intermittent fever.

Girl, æt. 6 years; intermittent fever.

Miss C., æt. 20; intermittent fever.

Mrs. P., pregnant 7 months, after riding over a rough road and being greatly jolted and shaken; cystitis.

Elias Stafford, after enlisting in army took violent cold; chronic cystitis.

Old gentleman; twice had attacks of dropsy; dropsy.

[48] **Relations.** Compare: *Apocyn.* (dropsy), *Cann. sat., Canthar., Copaiba, Ferrum and Senecio* (renal symptoms).

Digitized by Google

EUPHORBIUM.

Gum Euphorbium. *Euphorbiaceæ.*

The acrid resinous exudation of a plant native to Morocco.

Was strongly recommended by Mesue in diseases of the joints, and for noises in the ears.

CLINICAL AUTHORITIES.—*Headache*, Berridge, Raue's Rec., 1875, p. 208; *Cataract*, Bojanus, Allen & Norton, Ophth. Therap.; *Crumbling of teeth*, Hartmann, Rück. Kl. [1] **Mind.** Earnest, quiet, reflective mood; seeks quiet, though with inclination to work.

Anxious, apprehensive, solicitous mood.

Temporary attacks of craziness, insists upon saying his prayers at the tail of his horse; knows his freaks and wants to be by himself and in silence.

Imagines he sees the same man walking after him that he sees walking before him.

[2] **Sensorium.** Vertigo when standing or walking in open air.

[3] **Inner Head.** Dull, stupefying, pressive pain in forehead.

Sticking headache, especially in forehead.

Tensive pressure in head, especially in forehead and cervical muscles.

Screwed-in sensation in whole of brain and in zygomata, with toothache.

Headache as though head would be pressed asunder.

Bruised pain in head, especially in occiput and forehead, < in morning, > by cold applications.

Sensation of soreness, as if beaten, in back part of head; < in morning; when lying; from heat; sitting; in rest; > by motion and cooling head.

[4] **Outer Head.** Erysipelas of head and face, with digging, boring, and gnawing pains, followed, when ameliorated, by creeping and itching of parts; considerable swelling of affected parts, with small vesicles discharging a yellowish fluid.

Erysipelatous inflammation of face and external head.

[5] **Sight and Eyes.** Everything appears larger than it really

Digitized by Google

is; even in walking he raises his legs more than is necessary, because he imagines he has to step over elevations.
Diplopia; seeing a person walk before him he imagines he sees the same man walking after him.
‖Lens milk white; cannot see to go alone, though sees better on a dark day. θCataract.
‖Biting and smarting of eyes, with lachrymation.
Inflammation of eyes, with itching of eyelids and canthi, which are excoriated.
Feeling of great dryness in eyes with profuse discharge.
Purulent discharge from eyes.
‖Chronic ophthalmia; lids pain and itch severely, are wet and agglutinated.
Pale-red inflammation of eyelids; with nightly secretion of matter which agglutinates them.
Swelling of lids, with tearing above eyebrows, on opening eyes.
Upper lids sink down; they close irresistibly, with reeling in head.

[8] **Hearing and Ears.** Roaring in ears, at night.
Ringing in the ear.
‖Buzzing in r. ear, cannot sleep at night.

[7] **Smell and Nose.** Sneezing.
Fluent coryza, without sneezing.
Discharge of a quantity of mucus from posterior nares.

[9] **Upper Face.** Paleness of face; sickly look.
White, œdema-like swelling of the cheeks.
‖Red, inflamed swelling of cheek, with boring, gnawing, and digging from gum into ear; itching and crawling in cheek when the pain is relieved.
‖Red inflammatory swelling of cheek, with sensation of burning heat.
‖Excessive red swelling of cheek, with many yellow vesicles upon it, which open and discharge a yellowish moisture.
‖Erysipelas of cheeks, preceded by alternating chills and heat; constrictive headache, especially in occiput; and burning, stinging and itching of parts; yellow blisters.
‖‖Erysipelatous inflamed swelling of cheek, with vesicles as large as peas filled with yellow liquid.

[10] **Teeth and Gums.** ‖Throbbing, beating pains, and sensation as if teeth were being screwed together; under eye-tooth a swelling extremely sensitive to touch, which ultimately developed into an abscess; cheek greatly swollen and inflamed. θToothache.
‖Aching, stitching, or boring pains, with erysipelatous swelling of cheek; crumbling of teeth. θToothache.
‖‖Toothache, as if screwed in, in a hollow tooth, with jerking, as if it would be torn out.

Digitized by Google

‖Toothache < when touched or when masticating.
‖The teeth crumble off.

[11] **Taste and Tongue.** Flat taste in mouth, after breakfast; white-coated tongue.

[12] **Inner Mouth.** Dryness of the mouth without thirst.
Taste in mouth as if it was lined with rancid grease.
Much tenacious mucus in mouth, after midday sleep.
Ptyalism preceded by shivering or with inclination to vomit; shuddering and griping in stomach; saliva tastes salt.

[13] **Throat.** Scraping and rawness in throat.
Burning in throat as from hot coal, extending to stomach, with pain and anxiousness.
Burning in the throat and stomach as if a flame were rushing out.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Great hunger, the stomach hanging down relaxed and abdomen feeling hollow.
Great thirst for cold drinks.

[15] **Eating and Drinking.** Chilly when beginning to eat.
Drowsiness after dinner.

[16] **Hiccough, Belching, Nausea and Vomiting.** Profuse empty eructations.
Nausea with shuddering.
Vomiting with diarrhœa.

[17] **Scrobiculum and Stomach.** ‖Relaxation of stomach, it hangs down loose.
Spasmodic constriction in stomach.
‖Burning like fire in stomach and abdomen.
‖‖Inflammation of stomach; erysipelatous gastritis.

[19] **Abdomen.** Sensation of emptiness in abdomen as after an emetic; in morning.
Spasmodic flatulent colic, in morning in bed, with pain as if abdomen was pressed asunder, > by leaning his head upon elbows and knees.
Excessive colic and tympanitis.
Griping through whole intestinal canal, followed by thin stool, with burning itching about rectum.
Anxious sore aching in lower abdomen.
Pinching pain on posterior portion of ilium.
Pressive pain in inguinal region.
Affections of l. abdominal ring.
Violent sprained and lame pain in l. side of pubis, extending to thigh, on stretching the limb after sitting.
Tearing pain in l. groin, as from a sprain, while standing.

[20] **Stool and Rectum.** Diarrhœa, with tenesmus, burning at anus, and soreness in abdomen.
Stools like glue, painful and flatulent, after previous itching of rectum.

Digitized by Google

Stool first thin, then knotty.
Constipation from torpidity of bowels; hard stool, difficult to pass.
Violent itching of rectum during urgent desire for stool, and after evacuation.
Burning sore pain around anus.

[21] **Urinary Organs.** Hemorrhoids of the bladder.
Frequent desire to urinate with slight discharge of urine.
Strangury.
Itching stitch in external portion of urethra between acts of urinating.
White sediment in the urine.

[22] **Male Sexual Organs.** Erections without sexual desire.
Voluptuous itching of prepuce.
Discharge of prostatic fluid from a relaxed penis.
‖Chronic gonorrhœa when the discharge is mixed with blood.

[23] **Female Sexual Organs.** Ovaritis.
Itching of the mons veneris.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Chills, headache, frontal and occipital, with stiffness of cervical muscles; pains in back and limbs; general malaise; prostration; watery discharge from eyes and nose, with burning and smarting; also burning and smarting in trachea, with profuse secretion of mucus; tickling in larynx with cough. θInfluenza.
Cough, caused by burning tickling in upper part of trachea.

[26] **Respiration.** Oppression of breathing, as if chest were not wide enough.

[27] **Cough.** Dry, hollow cough, from tickling in chest and throat
Constant, dry, titillating, hacking cough, day and night with lachrymation.
‖Severe spasmodic cough, day and night, interrupting sleep, and greatly wearing him out; cough dry, with stitches which seem to proceed from pit of stomach to both sides of chest.
Dry cough day and night; sputa copious only in morning.
‖Cough with asthma.

[28] **Inner Chest and Lungs.** Warm feeling in middle of chest, as if hot food had been swallowed.
Sensation as if left lobe of lung was adhering.
Burning and stitching in l. side of chest, during rest, > by motion.

[29] **Heart, Pulse and Circulation.** Sinking pulse.

[30] **Outer Chest.** Stitch-like pressure upon sternum while sitting and standing.
Heaviness in pectoral muscles especially when turning body to the right side.

Digitized by Google

[31] **Neck and Back.** Pain in back; a pressure in the muscles.
Sensation in lumbar region or joints, as if paralyzed.
‖Painfulness of coccyx as if in the bone, < on rising from sitting and beginning to move; sensitive to touch; three times daily diarrhœic stools, which < pain in coccyx.

[32] **Upper Limbs.** Scarlet red streaks on l. forearm, itching when touched.
Paralytic tightness in shoulder-joint, mornings, from moving arm.
Pressive pain in upper arm, on outer side above elbow; in ball of r. thumb.
Scarlet streaks on l. forearm, disappearing when passing finger over them.
Cramp pain in muscles of r. hand when writing.
Paralytic pain in wrist on moving it.

[33] **Lower Limbs.** ‖Burning pain at night in bones of hip and thigh; frequently awakened thereby several nights in succession.
‖Pains in hip joint on moving, as if sprained; burning pain at night in femur and hip joint.
‖‖Tearing, stinging, pressing pains, > by motion, < during rest; paralytic sensation, with difficulty of rising from seat. θIschias.
Pain as of a sprain in l. thigh, < walking, > standing.
Great weakness of legs.
Cold perspiration on legs in morning.
Feet go to sleep when sitting.
Sore pains in r. heel when walking out doors.

[34] **Limbs in General.** Rheumatic pains in limbs.

[35] **Rest. Position. Motion.** Rest: soreness in head <; burning and stitching in l. side of chest; tearing pain <; rheumatic pains <.
Sleeps with arms over head.
Lying: soreness in head <; ulcers <.
Sitting: soreness in head <; stitch-like pressure upon sternum; feet go to sleep; ulcers <.
Leaning head on elbows and knees > pain in abdomen.
Standing: vertigo; tearing pain in groin; stitch-like pressure; pain in thigh >.
Motion: soreness in head >; burning in chest >; heaviness in muscles when turning body; of wrist, paralytic pain; pain in hip joints; tearing pains >; ulcers >.
Beginning to move: paralytic weakness in joints <; ulcers <.
Opening eyes: tearing above eyebrows.
Changing position: ulcers <.
Rising from sitting: painfulness of coccyx <.
Writing: cramp pain in r. hand.

Digitized by Google

Stretching limb after sitting: violent pain.
Walking: vertigo; pain in thigh <; ulcers >.

[36] **Nerves.** Weariness, faintness; whole body seems relaxed and tired.
Prostration; fainting spells.
Periodic attacks of cramps.
Writers' cramp.
Convulsions, with loss of consciousness and congestion of blood to head; hot skin; slow, full pulse.

[37] **Sleep.** Sleepiness during the day.
Sleeplessness, with tremulous tossing about before midnight, roaring in ears, unable to close eyes.
Sudden starting up as from an electric shock at night, while lying awake in bed.
Anxious, vivid dreams at night, causing him to cry out, whereupon he awakes.

[38] **Time.** Morning: headache <; sensation of soreness <; sensation of emptiness in abdomen; flatulent colic in bed; sputa copious; cold perspiration on legs; chill of whole body; sweat over whole body; sweat over neck, thighs and legs; sweat in bed; ulcers <.
Day: spasmodic cough; sleepiness; great heat.
Before midnight: sleeplessness.
Night: roaring at night; cannot sleep; spasmodic cough; burning pain in bones of hip and thigh; awakened by pain; burning pain in femur and hip joint; sudden starting up in bed; vivid dreams.

[39] **Temperature and Weather.** Heat: soreness in head <; near fire < ulcers.
Open air: vertigo when walking; walking, sore pains in heel; chill when walking.
Cooling head > soreness.
Cold application: headache >.

[40] **Fever.** Chill: of whole body in morning; while walking in open air; when beginning to eat.
Constant chilliness, with constant sweat.
Chill with sweat at the same time.
Shivering over whole body; over back, with glowing cheeks and cold hands.
The body is cold, with internal burning heat
Great heat the whole day; all the clothes seem burdensome, even his whole body is too heavy for him, as if he had carried a great load.
Heat with aversion to be dressed, the clothing feels too heavy.
Heat only on the head.
Sweat: in morning, extending from feet over whole body; some thirst.

Google

Morning-sweat, on neck, thighs and legs.
Sweat only on thighs.
Cold sweat on legs.
Sweat in morning in bed.
Usually a morning paroxysm.

" **Attacks, Periodicity.** Three times daily: diarrhœic stools.

" **Locality and Direction.** Left: affections of abdominal ring; sprained and lame pain in side of pubis; tearing pain in groin; as if lobe of lung was adhering; burning, stitching in side of chest; scarlet streaks on forearm; pain as from a sprain in thigh; burning heat on either cheek, generally left.

Right: buzzing in ear; turning body to side; heaviness of muscles; cramp pain in muscle of hand; sore pains in heel.

" **Sensations.** As though head would be pressed asunder; soreness as if beaten in back part of head; as if teeth were being screwed together; jerking in tooth as if it would be torn out; taste as if mouth was lined with rancid grease; burning in throat as from a hot coal; as if flames were rushing out of stomach and throat; emptiness as if after an emetic; as if abdomen was pressed asunder; as if chest were not wide enough; feeling in middle of chest as if hot food had been swallowed; as if left lobe of lung was adhering; in lumbar region or joints as if paralyzed; pain in hip joint as if sprained; pain as of a sprain in l. thigh; sudden starting up in bed as from an electric shock; as if a thin cord lay under skin.

Pain: in eyelids; in stomach; in back and limbs; painfulness of coccyx; in hip joint.
Lancinating pains: on skin.
Tearing: above eyebrows; in l. groin; in limbs.
Beating pain: in teeth.
Gnawing pain: in head; from gum to ear.
Stitching pains: in cheek; from pit of stomach to sides of chest; in l. side of chest.
Sticking pain: in forehead.
Throbbing pains: in teeth.
Digging pain: in head; from gum to ear.
Boring: in head; from gum to ear; in cheek.
Pinching pain: on posterior portion of ilium.
Griping: in stomach; through intestinal canal.
Cramp pain: in muscles of r. hand; writers' cramp.
Screwed-in sensation: in brain; in zygomata.
Spasmodic: flatulent colic.
Stich-like pressure: upon sternum.
Stinging pain: in limbs.

Burning: in head; in throat; in stomach and abdomen; about rectum at anus; in side of chest; in bones of hip and thigh; in femur and hip joint; in bones.
Stinging: in head; in inner organs; in bones.
Heat: on head.
Biting and stinging: on skin.
Biting: of eyes.
Smarting of eyes.
Soreness: in abdomen; in r. heel.
Pressive pain: in forehead; in inguinal region; in limbs.
Tensive pressure: in head; in forehead; in cervical muscles.
Anxious sore aching: in lower abdomen.
Dull, stupefying pain: in forehead.
Bruised pain: in head.
Rheumatic pains: in limbs.
Sprained lame pain: in l. side of pubis.
Scraping: in throat.
Feeling of dryness: of eyes.
Rawness: in throat.
Pressure: in muscles.
Paralytic tightness: in shoulder joint; pain in wrist; in joints.
Heaviness: in pectoral muscles.
Shuddering: in stomach.
Reeling: in head.
Buzzing: in r. ear.
Roaring and ringing in ears.
Crawling: in cheek.
Tickling: in larynx; in upper part of trachea; in chest; in throat.
Feet go to sleep when sitting.
Itching: of head; of eyelids; in cheek; about rectum; of prepuce; of mons veneris; of l. forearm.

" **Tissues.** Chronic inflammatory conditions of mucous membrane.
Burning in the bones.
Paralytic weakness in joints, < when beginning to move.
Caries and other diseases of bones.
Inflammation and swelling, followed by cold gangrene; chilliness and shuddering; gangrene of old persons.
Old, torpid ulcers; warts; blood-boils; facial erysipelas.

" **Touch. Passive Motion. Injuries.** Touch: < toothache; coccyx sensitive to touch; < ulcers.

Digitized by Google

Clothes too heavy.

[46] **Skin.** Sensation as if a thin cord lay under skin.
Biting, stinging, gnawing and burning itching.
Burning itching which induces scratching.
Biting and stinging on skin; biting exanthema; red inflammatory swelling; sensation of burning heat on either cheek, generally l. side.
Eruptions on hairy and covered parts.
‖Erysipelas bullosa.
Blood-boils; chronic and erysipelatous eruptions; warts.
Swelling of face with pea-sized yellow vesicles; old, indolent ulcers; blood-boils.
Old, torpid ulcers; lancinating and lacerating pains; ulcers turning black; insensible ulcers; biting in ulcer; gangrenous ulcers; < in morning; on getting heated near fire; lying down; changing position; beginning to move; while sitting; when touching them; > from motion and walking.

[47] **Stages of Life, Constitution.** Secondary syphilis.
Girl; toothache.
Girl, æt. 18; affection of coccyx and diarrhœa.
Man, æt. 55; cataract.

[48] **Relations.** Antidoted by *Camphor, Opium*, large quantities of lemon juice.
It antidotes: *Arsen., Nux vom.*
Compatible: after *Arum triph.* (in hay fever); after *Graphit.* (in erysipelas); *Laches., Pulsat., Sepia, Sulphur.*
Compare: *Colchic., Elat., Tart. em., Veratr.*

[1] **Mind.** Weakness of memory; confusion of the head.
Inert hypochondriacal mood, takes no interest in his surroundings.
Taciturn, disinclined to talk.

[2] **Sensorium.** Vertigo: with heaviness of head; with tendency to fall.

[3] **Inner Head.** Dull frontal headache.

Digitized by Google

Aching pain in outer part of head, especially forehead.
Dulness of head, with pressure on vertex.
Painful bewilderment in head.
Confusion and bruised pain in head.
‖Headache in evening as if bruised, with coryza.
Pulsating of head which is felt externally.
‖Violent beating headache. θMeasles.
‖Headache, as if head would burst, with dazzling of eyes, from sunlight.
Headache, light of candle seems to be dark and to flicker.
‖Stitches in brain.
‖‖Catarrhal headache, accompanied by profuse, watery discharge from eyes and nose.

[5] **Sight and Eyes.** Dreams of fire, lightning, flames, etc.
‖Eyes very sensitive to light, and candlelight.
‖Vision somewhat dim, as through a veil, in evening.
Obscuration of vision for distant objects; while walking in open air.
Dimness of vision, the result of an hysterical condition; profuse lachrymation.
Dimness of vision by candlelight; the light seems to vary, sometimes burning brightly, sometimes dimly.
Right eye so weak and obscured that she feared she would not be able to sew; after some minutes a stitch extending from forehead out of same eye, followed by disappearance of obscuration.
Obscuration of eyes, so that for half an hour he was unable to clearly distinguish objects; everything seemed enveloped in a mist and to move; these disappeared after three-quarters of an hour, and gave place to the usual burning.
Amblyopia, with inflammation of conjunctiva and lids.
Sudden and momentary obscuration of vision, > by winking, caused by presence of opaque mucus upon surface of cornea.
Diseased eyes, he was made almost blind.
Stitches in eyeballs from bright light.
‖Pressive cutting pain in eyes, extending to frontal sinuses.
Pressure and tension of the globe.
Contractive pressure in eye, whilst walking in open air.
‖‖Painful pressure in inner angle of l. eye; lachrymation.
‖Violent pressure in l. eye, with lachrymation, it seems smaller and weaker.
‖Pressure in eyes, on looking at candlelight.
‖‖Dry pressure in eyes, as if sleepy.
‖Stitching pressure in eyes.
‖Burning stitches in eyes.

Digitized by Google

Burning in eyes, with lachrymation.
Frequent burning biting in eyes, obliging frequent winking; acrid water runs from them.
Sensation as if dust or sand were in eyes.
Sensation as if a hair hung over eyes, and must be wiped away. θKeratitis.
Disagreeable dryness in eyes.
Itching of eyes on going out, obliging frequent winking and wiping of eyes, with increased lachrymation in afternoon.
Pain in eye, alternating with pain in abdomen.
Cataract.
Pupils much contracted.
Violent pressure in r. eye, extending from inner canthus, with much lachrymation; lids seem smaller, pupil dimmer, and eye seems cold.
Pains in l. eye, diminished vision; sclerotica shows injected vessels, singly or in bundles; conjunctiva slightly reddened; cornea turbid, ash-colored; iris discolored; eye looks as if dead; lachrymation; sees as through a fog; violent periodical pains. θIritis.
Rheumatic iritis, with constant aching and occasional darting pain in eye, always < at night; ciliary injection, photophobia, aqueous humor cloudy, and iris discolored and bound down by adhesion.
Kerato-iritis after injuries and surgical operations upon eye; stitching pains; burning, smarting lachrymation, very excoriating, causing varnished appearance of tissues with which it comes in contact; fluent coryza; intense photophobia.
Feeling as though cornea was covered with much mucus; it obscures his vision and obliges him to frequently close and press lids together; lids swollen and red.
Sudden and momentary obscuration of vision, > by winking, and caused by pressure of opaque mucus upon surface of cornea.
Hydrophthalmia anterior; irritation of conjunctiva, resulting from bulging of cornea and circumjacent sclerotic.
Meibomian glands much inflamed and swollen; on albuginea an inflammatory focus of a deep red color, whence proceeded fasciculi of vessels running towards middle of cornea and converging at a deep ulcer; cornea dim and conical in form; iris lighter in color than that of sound eye; pupil greatly contracted but perfectly round; no photophobia nor morbid secretions; pressure in eye when looking at light.
Cornea ulcerated; ulceration red and puffy; lids swollen,

Digitized by Google

thickened, deprived of their ciliæ, and covered with small ulcerations; large quantities of mucus, clear as tears, or thick like pus, flows constantly from eyes; intense photophobia; eye only painful when exposed to light, producing burning sensation with flow of corrosive tears, and a feeling of a foreign substance in eyes; affected eyes look smaller by half than other eyes.

‖Ulcer and pannus extending from above downward to centre of cornea; slight dimness of cornea with profuse smarting lachrymation; profuse, thick, acrid discharge; lids thick and red; photophobia and pains < in daylight; blurring of eyes, > by wiping.

‖Keratitis pustulosa, border of cornea surrounded by small superficial ulcers.

‖‖Keratitis pustulosa, with intense photophobia and profuse purulent discharge; hot, scalding lachrymation.

‖Pustules on cornea, which are very vascular; eyes feel heavy and sleepy.

‖Recurrent pustular inflammation of cornea, moderate photophobia, lids covered with matter.

‖Inflammation of eyes, with formation of opaque spots on cornea; great photophobia.

‖Opacity of the cornea after mechanical injuries; bluish.

‖Spots, vesicles and ulcers of cornea; pannus.

‖Catarrhal or strumous inflammation of cornea and conjunctiva.

‖Inflammation of r. eye, with complete obscuration of cornea; after attack of gout.

‖For four months, considerable photophobia of both eyes, greater in evening; redness of sclerotic and conjunctiva; blood vessels very numerous; wounded by a straw.

‖After an injury, severe pain, inflammation, excessive lachrymation and burning; tears felt burning; intense fluent coryza; thick masses accumulated in inner corner of eye; pains < from contact of air; surface of eye felt as if studded with warts.

‖Conjunctiva reddened, vesicles enlarged, mucous secretion at first diminished, but speedily increased, finally becoming purulent in character.

‖Chemosis, acrid tears and coryza.

Acute conjunctivitis; after first stage, lax or ecchymosed tissue, watery mucus, or milky secretion.

‖Photophobia: in day and sunlight; < in evening; must remain in darkened room; even to spasm of lids; with swollen, agglutinated lids; thick yellow discharge between lids.

‖Conjunctiva of lids and eyeballs red; injected vessels running from outer and inner canthi to cornea, resem-

bling a vascular network; continual itching and painful sensation as of a grain of sand at outer angle; lachrymation; photophobia; pain < in r. eye; coryza, < on r. side. θOphthalmia after a chill.

Conjunctivitis pustulosa, lids much swollen, eruption on head and profuse fluent coryza.

Catarrhal ophthalmia, with lachrymation and considerable mucous discharge, injection of conjunctiva, phlyctenulæ near cornea, at same time coryza and pain in forehead.

Ophthalmia with agglutination in morning; burning, itching and smarting pain; cold air and wind cause lachrymation, < by gaslight.

Fluent coryza with scalding tears; aversion to light; < in evening or during night when lying down, from glare of daylight or sun; > in the dark.

Streaming of hot, burning tears from eyes, with great photophobia; profuse running from nose without burning; cough only during day. θMeasles.

Ophthalmia, eyes suffused with tears; painful, dry ulcer on r. side of bridge of nose. θAmenorrhœa.

Granular ophthalmia, with or without pannus; profuse lachrymation and thick discharge, excoriating lids and cheeks.

Rheumatic inflammation of eyes, almost blinding him.

Pterygium extending from inner canthus.

Ophthalmia of the new born.

Great dryness of lids and nose, so that for last five days has not been obliged to use handkerchief.

Margins of lids red, with sensation of dryness in them.

Burning and swelling of margins of lids; distressing sensation of dryness.

Lids sensitive and swollen.

Redness and swelling of margins of lids, especially of l.; at times itching burning in them with increased watery secretion.

Lids itch and burn with profuse acrid lachrymation.

Lids much swollen, with a fluent coryza. θBlepharitis.

Suppurating lid-margins; constant winking of lids.

Acute inflammation of lids, with acrid muco-purulent discharge. θBlepharitis.

Inflammation and ulceration of margin of lids.

Violent itching of lids, with catarrhal ophthalmia.

Constant desire to wink, which relieves any blurring of vision. θBlepharitis.

Inflammation and swelling of Meibomian glands.

Secretion of tears greatly increased, eyes constantly suffused, tears overflow upon face and run down cheek.

Digitized by Google

Burning, smarting lachrymation, particularly in the wind.
‖Troublesome lachrymation, remaining after affection of eyes have been cured.
‖Fine eruption around eyes, parts look red and puffy.
Paralysis of muscles of eyes from cold.
‖Paralysis of third nerve.
‖Blurring of eyes, > by winking. θParalysis of motor oculi.

[6] **Hearing and Ears.** Ringing in ears.
Earache.

[7] **Smell and Nose.** ‖Violent irritation to sneeze, without cold or apparent cause.
‖Sneezing, with profuse fluent coryza.
‖Acute coryza, in stage of serous secretion, where there is redness of conjunctiva, swelling of lids and watery eyes.
‖Nasal mucous membrane swollen, with abundant secretion of water, and later of a muco-purulent substance, with sneezing and some degree of dyspnœa.
Profuse coryza, with smarting, lachrymation and photophobia, or with sneezing and discharge of mucus from anterior and posterior nares; profuse, fluent coryza, with cough and expectoration in morning; soreness and painfulness of inner nose; eruptions on wings of nose; < in open air; head and eye symptoms < on r. side.
‖Profuse, bland, fluent coryza, with scalding tears and aversion to light; < evening and during night, while lying down; after windy weather.
‖‖Profuse fluent coryza, in morning, with much cough and expectoration.
‖Cough with coryza, heat and sensitiveness of nose; redness of eyes; photophobia and lachrymation; no cough at night, but severe in morning; < in fresh air; r. side of head not affected. θBronchitis.
Pain from r. to l. over bridge of nose; l. half of face and forehead and l. eye inflamed; earache.
Small red spots, like pimples, on upper r. side of nose, twinging, darting pain in nose.
Flat cancer on r. side of nose.

[8] **Upper Face.** Redness and heat of face.
Stiffness of l. cheek when talking or chewing, with sensation of heat and stitches therein.
Rash in face, itching in warmth, becoming red and burning when moistened.

[9] **Lower Face.** ‖Stiffness of upper lip, as if made of wood.

[11] **Taste and Tongue.** Impeded speech from lameness and stiffness of tongue.

[19] **Abdomen.** Frequent colic.

[20] **Stool and Rectum.** ‖Fluent, profuse coryza, with slight flow of tears and a bright red eruption upon cheek, <

Digitized by Google

in afternoon and after crying; persistent constipation; stools in large balls, which are dry, hard, voided with great difficulty and almost tearing anal passage.

Severe coryza; much sneezing, profuse bland discharge from nose, watery excoriating discharge from eyes, photophobia, slight cough; five days after administration of Euphrasia coryza had entirely subsided, but a profuse painless diarrhœa set in lasting all day, after last stool, a prolapsus ani from which she had been suffering for nine months disappeared and did not again return.

Daily stool, but it is hard and scanty.

Pressure in anus while sitting; hemorrhoids.

Old, flat condylomata at anus, with severe burning; < at night.

21 **Urinary Organs.** Frequent micturition.

Urine too often and copious.

22 **Male Sexual Organs.** Genital organs appear drawn in; pressure above pubes, evenings.

23 **Female Sexual Organs.** Menses late, scant, and of short duration.

Menses painful, lasting only one hour, time regular.

Amenorrhœa, with inflammation of eyes and ulcer on r. side of bridge of nose.

Condylomata, with stitching and itching, especially when walking.

24 **Voice and Larynx. Trachea and Bronchia.** Voice somewhat hoarse, in morning.

Catarrhal hoarseness.

Irritation of larynx, impelling him to cough, followed by tensive pressure beneath sternum.

Abundant mucous secretion, with loose cough, and a loud bronchial râle.

25 **Respiration.** Deep inspiration difficult, even while sitting.

27 **Cough.** Cough with severe coryza, eyes also affected, during day a scanty expectoration with occasional difficult respiration, > at night, < again in morning with copious expectoration.

Sudden violent cough, caused by tickling in larynx, ceasing after a few seconds.

No cough at night; as soon as he rises from bed cough begins and is so continuous he can scarcely get his breath, > when he again lies down; constant tickling in larynx; < from tobacco smoke; > from eating; can be suppressed by a sip of water.

Cough: from mucous or watery vomiting; came on after hemorrhoids had disappeared; with severe coryza; eyes affected; difficult expectoration during day; interruption of breath; no cough at night; from smoke of wood.

Digitized by Google

Cough after influenza, early in morning and during day.
Whooping-cough with constant mild, watery exudation from eyes, whether inflamed or not; < during paroxysm.
Cough on rising in morning, with abundant expectoration of mucus.
Profuse expectoration of mucus by voluntary hawking.

[30] **Inner Chest and Lungs.** Pressive pain beneath sternum, especially in forenoon, with transient stickings here and there in chest.

[31] **Neck and Back.** Swelling of cervical glands.
Cramp-like pain in back.

[32] **Upper Limbs.** Sensation in arms as if they had gone to sleep.
Numbness of fingers.

[33] **Lower Limbs.** Cramp in calf, particularly when standing.

[34] **Limbs in General.** Crawling as of a fly in one or other of limbs, from below upward in a straight line, with numbness of part.

[35] **Rest. Position. Motion.** Lying down: fluent coryza <; cough >.
Sitting: deep inspiration difficult.
Standing: cramp in calf.
Rising: cough begins.
Walking: stitching and itching in female sexual organs; in open air, unusual yawning.
Tosses about in bed.

[37] **Sleep.** Unusual yawning while walking in open air.
Tosses about in bed and cannot get warm.
Frequent waking as from fright, at night.
Sleeplessness after midnight.
Awakes too late.
Usually < after sleep.

[38] **Time.** Morning: ophthalmia with agglutination; cough and expectoration; coryza <; voice somewhat hoarse; cough <.
Forenoon: pressive pain beneath sternum.
Day: cough; scanty expectoration; difficult expectoration; attacks of heat.
Afternoon: lachrymation; fluent coryza; external chill and coldness of arms.
Evening: headache; photophobia <; fluent coryza <; pressure above pubes.
After midnight: sleeplessness.
Night: darting pain in eye <; fluent coryza <; severe burning at anus <; cough >; frequent waking as from fright; sweat during sleep; agglutination of lids.

[39] **Temperature and Weather.** Generally < in bed; > after getting out of bed.

Digitized by Google

Better out-doors; worse in-doors.
Open air: pain in eye <; profuse coryza <; cough <; walking, unusual yawning.
Windy weather: fluent coryza <.
Cold air and wind cause lachrymation.
Cannot get warm in bed.

[40] **Fever.** Chill and internal chilliness in forenoon; external chill and coldness on arms, in afternoon.
Chill predominating.
Attacks of heat during day, with redness of face and cold hands.
Heat descending.
Sweat often confined to front part of body.
Sweat during sleep at night, of very strong, offensive odor, most profuse on chest.
Catarrhal fever when chilliness and coldness predominates, inflammation of conjunctiva with lachrymation; hardness of hearing; photophobia; nightly agglutination of lids; painful dulness and heat in head, as if head would burst; fluent coryza; inner nose painful; sneezing and copious expectoration; cough, particularly in morning.
Symptoms of incipient measles for two weeks, but no appearance of an eruption; tendency to a typhoid condition, with danger of inflammation of brain. θMeasles.
Chill followed by fever, pain in bones, eyes red and sensitive to light; face and neck covered with dark spots looking like petechiæ. θMeasles.
Streaming of hot, burning tears from eyes, with great photophobia; profuse running from nose, without burning; cough only during day. θScarlatina.

[41] **Attacks, Periodicity.** One hour: menses lasting.
For five days: great dryness of lids and nose.
For two weeks: symptoms of incipient measles.
For four months: photophobia of both eyes.

[42] **Locality and Direction.** Right: violent pressure in eye; inflammation of eye; pain in eye; coryza <; head and eye symptoms <; small red spots like pimples on upper side of nose; flat cancer on side of nose; ulcer on side of bridge of nose.
Left: painful pressure in inner angle of eye; violent pressure in eye; pain in eye, with diminished vision, redness and swelling of margins of lid; half of face and forehead inflamed; stiffness of cheek.
From above downward: ulcer and pannus, extending to centre of cornea.

[43] **Sensations.** As if head would burst; as if dust or sand were in eyes; as if a hair hung over eyes; eye looks as

Digitized by Google

if dead; as though cornea was covered with mucus; surface of eye felt as if studded with warts; as if grain of sand were at outer angle; upper lip as if made of wood; as if arms had gone to sleep; as of a fly crawling in either limb.
Pain: in eye; in abdomen; in l. eye; in forehead; in inner nose; over bridge of nose; in ears; in bones.
Severe pains: in eyes.
Pressive cutting pain: in eyes, extending to frontal sinuses.
Darting pain: in eye.
Stitching pain: in eye.
Burning stitches: in eyes.
Stitches: in brain; in eyeballs; in cheek; in female sexual organs.
Stitching pressure: in eyes.
Sticking: here and there in chest.
Violent beating: headache.
Cramp: in calf.
Cramp-like pains: in back.
Twinging pain: in nose.
Burning biting: in eyes.
Bruised pain: in head.
Aching pain: in outer part of head; in forehead; in eye.
Violent pressure: in l. eye; in r. eye.
Dry pressure: of eyes.
Painful pressure: in forehead; in inner angle of l. eye; beneath sternum.
Pressure: on vertex; on globe of eye; in anus while sitting; above pubes; beneath sternum.
Dull frontal headache.
Painful bewilderment of head.
Smarting: in eye.
Burning: in eyes; in anus.
Soreness: of inner nose.
Sensitiveness: of nose.
Heat: of head; of nose; of l. cheek.
Pulsating: of head.
Tension: of the eyeball; beneath sternum.
Dazzling: of eyes.
Dryness: of eyes; of eyelids and nose.
Lameness: of tongue.
Stiffness: of l. cheek; of upper lip; of tongue.
Numbness: of fingers; of limb.
Tickling: in larynx.
Ringing: in ears.
Crawling: in one or other limb.
Itching: of eyes, of outer angle; of eyelids; of rash on face; female sexual organs.

Digitized by Google

Coldness: on arms.

" **Tissues.** Affects principally the eyes.
Emaciation.

" **Touch. Passive Motion. Injuries.** Touching skin produces aggravation.
Bad effects from falls, contusions, or other mechanical injuries of external parts.

" **Skin.** Burning, formication and numbness of parts.
Shooting itching, stitches here and there all night.
Fine eruption around eyes and on nose.
‖First stage of measles; catarrhal symptoms marked; eyes inflamed, with photophobia and profuse discharge; severe coryza with pressing pain in forehead; cough during day.
‖Measles with eye symptoms, and more or less nasal and bronchial catarrh.
‖Intense throbbing headache, redness of eyes, photophobia, least light being intolerable, high fever, constant dry cough, evident signs of eruption about forehead and temples but no tendency to develop. θMeasles.
Warts.
Aggravation: in evening; when touched.

" **Stages of Life, Constitution.** Boy, æt. six months; ophthalmia.
Child, æt. 1 year, Calc. carb. constitution, suffered for six months; constipation.
Girl, æt. 2 years, treated for coryza; prolapsus ani.
Child, æt. 3 years, whose recovery had been despaired of; measles.
Girl, æt. 6 years, daughter of peasants, not been well since she was vaccinated, in her tenth month, nodosities and tumors on head, followed by swelling and suppuration of glands of neck; ophthalmia.
Robust boy, æt. 14; ophthalmia.
Girl, æt. 16, blonde, nervous; measles.
Girl, æt. 20, strong, brunette, menses regular; ophthalmia.
Woman, æt. 22, married, robust constitution, phlegmatic sanguine temperament, after a chill; ophthalmia.
Girl, æt. 22, light hair, blue eyes, generally nervous; measles.
Schoolmaster, æt. 26, scrofulous during childhood, suffers from glandular swellings which occasionally suppurate; hard swelling of nose and lip.
Gardener, æt. 50, otherwise healthy; ulcer on cornea.
Man, æt. 52; paralysis of motor oculi.
Woman, æt. 53; ophthalmia.
Man, æt. 54; iritis.
Old woman, gouty; obscuration of cornea.

[1] **Mind.** ‖Mind confused, cannot collect his thoughts.
‖Prone to weep or laugh immoderately; with a choking sensation in throat, as if swollen outside.
‖‖Lively in evening.
‖Not inclined to talk or study; nervous, restless.
Great indifference.
Changeable disposition, one evening low-spirited and melancholy, next excessively cheerful.
‖Depression of spirits; also after menses.
‖Mental depression, gloomy foreboding thoughts.
‖Mind in highest degree oppressed; despondent; great solicitude about those belonging to him, with constant thoughts of death. θAphonia.
‖‖Anxiety as after committing a crime.
‖From slightest cause, anxiety, with throbbing in pit of stomach.
‖Nervous, hysterical feeling; fear of apoplexy.
‖Irritability; little noises, such as crackling of a newspaper, drive him to despair.
Pettish, quarrelsome, disputative, easily excited, least contradiction angers.
‖Excited by slightest opposition; everything irritates or depresses her.
Vehement; quarrelsome; anxious.
Haughtiness; proud, self-contented look.
Ailments from anger.
‖Moderate mental exertion improves many symptoms.

[2] **Sensorium.** Head confused, muddled; with cold feet and stiff fingers.
Gloomy feeling in head, which feels heavy and confused.
Dulness of head, want of disposition to think.
‖Confusion of head.
‖‖Vertigo: on rising suddenly, things grew black, had to

lean against something or fall; with nausea, prostration, lethargy; as if balancing to and fro; as when on water; when walking over water, like when crossing a bridge; when descending, with disposition to fall forward.

¶Whilst walking, giddy as if drunk, as though she would fall over obstacles.

¶On looking at running water dizzy and giddy in head, as if everything went round with her.

Staggering in walking, as if intoxicated; reeling sensation and vertigo on seeing flowing water; vertigo with sickness at stomach in walking; momentary shock, with giddiness in brain.

Sensation as if head would constantly incline to r. side.

[3] **Inner Head.** ¶Pressive headache in forehead as if it would burst.

¶Pressure in frontal eminences, after rising and dressing, in morning, after quarter of an hour, extending over whole forehead to vertex and becoming more intense, and after twenty minutes changing to a pressive pain from within outward; on going down stairs pain <, involuntarily presses palm of hand on painful spot, which momentarily > the pain, but it is only decidedly > in open air.

¶Dull, pressive sensation in frontal eminence, afterwards spreading over whole forehead and finally to vertex; > by pressure of hands; in open air; < descending.

¶Severe frontal headache all day, with cold feet.

Lancination in forehead.

¶Awake 3 A.M. with severe stitches, as from a pen-knife, in both temples, gradually extending over whole forehead, with chilliness, rendering her unable to go to sleep again.

Headache every evening above root of nose.

Sticking pain over l. eye, coming suddenly.

¶Hammering, boring pain beginning mostly in l. temple, with sensation of expansion of blood-vessels in the temples.

¶Violent shooting headache in l. side, in afternoon.

¶Headache: occupying l. side of head; with coryza; after menses.

Tearing from lambda to temporal bone.

¶Headache on top of head, as if skull was pushed upward.

¶Throbbing pain in top of head when moving suddenly.

¶Beating in back of head and neck, gradually extending to sides and forehead, < stooping or moving.

Drawing from nape of neck into head, with stinging, hammering and roaring in head.

¶Drawing, from nape upward into head, in which there is then shooting, roaring and humming.

Digitized by Google

‖Pain in back of head when coughing.
‖Weight in back of head, from ear to ear.
Confusion of mind, with hammering, beating sensation in head.
‖Sensation in head as of the beatings of the pulse, with slight sticking.
‖Rush of blood to head, with swelling of veins of head, and slight flushes of heat.
‖Rush of blood to head, with throbbing pains, roaring, buzzing and prickling in brain.
Hammering and throbbing headache, obliging one to lie down, or as if brain were rent asunder.
‖Hammering, pulsating pain; humming in ears; congestion of head, with pale face; intolerance of all spirituous liquors; dread of movement, with loss of muscular tone and debility.
‖‖Headache: for two, three, or four days, every two or three weeks; hammering, beating, pulsating pains, must lie down in bed; with aversion to eating and drinking.
‖Hammering, pulsating headache; ulcerative pain of scalp, with loss of hair; bruit du diable in vessels of neck; paleness of mucous membranes of mouth and eyes; vigorous, healthy appearance, the general condition simulating a plethoric rather than an anæmic habit. θMegrim.
‖Congestion of blood to head, with pulsation and hammering in head, heat and redness of face, enlarged veins, sensitiveness of head to touch; < after midnight and towards morning; returning periodically; > external pressure.
‖Head dull and full, eyelids heavy, apt to sleep, while sitting reading.
‖Writing causes headache to re-appear.
‖Headaches of anæmic, debilitated persons, especially with congestion of head or chest.
‖Head hot, feet cold.
Apoplexia sanguinea.
‖Hydrocephalus with open fontanelles and great anæmia.

[4] **Outer Head.** ‖Pressure on top of head when cold air touched it.
‖Great sensitiveness of scalp to touch.
‖Scalp and hair feel sore; falling out of hair.
‖Formication or slight itching in scalp; cold feet.
Cannot keep head quiet.
Distended veins on temples.

[5] **Sight and Eyes.** ‖At night capability to see in dark, with hysteric persons; pupils can be dilated but little; red eyes with burning pains.

Digitized by Google

‖Dark before eyes; giddy.
Darkness before eyes in evening, with aching pains and slight epistaxis.
‖Amaurosis.
‖Letters run together when reading or writing.
‖Weak eyes with lachrymation.
Pupils contracted.
‖Blue rings around eyes, which are dull, lustreless.
‖Bloated appearance about eyes; face pale. θIntermittent.
‖Face fiery red; red spots on cheeks; puffiness of face around eyes; livid, jaundiced complexion; pale face and lips.
‖Inflamed eyes, burning, stinging; suppurating sties.
Pressure in eye as of a grain of sand.
‖Pressure in eyes as if they would protrude; the r. worse.
‖Sticking pain over l. eye coming very suddenly and lasting a short time.
‖Can scarcely open eyes; lids pressed down.
‖Redness and swelling of both lids.
‖Marked muscular debility; redness of eyes, swelling of lids; slimy pus-like discharge from Meibomian glands; sweet taste in mouth; circumscribed dark or violet spots on skin. θIntermittent.
Suppurating stye on upper lid and nightly agglutination.
‖‖Morbus Basedowii; especially after suppression of menses; protruding eyes; enlarged thyroid; palpitation of heart; excessive nervousness.

[6] **Hearing and Ears.** ‖Over-sensitive to sounds.
♂Discharge from l. ear; chlorotic complexion; impaired hearing; murmur in l. jugular vein; palpitation of heart.
‖Ringing in ears, particularly the right.
‖Stitches in ears in morning.
Ulcerative pain in outer ear; singing, humming in ears; > laying head on table.

[7] **Smell and Nose.** ‖Bleeding from nose in morning on stooping.
‖‖Epistaxis in anæmic children, with frequent changing of color of face.
‖Epistaxis in anæmic patients subject to ebullitions.
‖Epistaxis alternating with spitting of blood.
‖Nose continuously filled with clotted blood; especially with coryza.
‖Dropping of fluid from posterior nares or frontal sinuses; headache. θNasal catarrh.
‖Bloody, purulold greenish, whey-like, slimy, acrid discharge; cold in head.
‖Scabs come out of nose or are coughed up every few weeks.

Digitized by Google

[8] **Upper Face.** ‖‖Extreme paleness of face, which becomes red and flushed on least emotion, pain or exertion.
‖Face pale, collapsed, or expressionless, stiff and stupid.
‖Face ashy pale or greenish; pale and wan.
‖Pale, earthy color of face. θAphonia.
‖Pale, livid face, sometimes bloated, with blue margins around eyes.
‖Pale face, with red spots on each cheek.
‖Livid, or pale face and lips.
‖Cadaverous, jaundiced complexion.
‖Face yellow, or yellow in spots.
‖‖Face flushes easily on least excitement or exertion.
‖Flushed face with burning cheeks.
‖Face fiery red, veins large; congestion to head.
‖Face becomes suddenly fiery red, with vertigo; ringing in ears; great palpitation of heart, and dyspnœa.
‖‖Very red face of children.
‖Face feels as if swollen and bloated.
‖Œdema of feet and face, especially upper and lower eyelids.
‖Pain in face < to an intense degree by lying down; > sitting up. θNeuralgia.
‖Neuralgia after cold washing and overheating; during paroxysm face fiery red, sometimes only in one spot; cannot keep head quiet; at intervals face looks pale and earthy.
Eruption on face followed by bluish spots.

[9] **Lower Face.** ‖Lips pale, dry. θIntermittent fever.
‖‖Swelling of gums and cheeks; with bleeding; pale lips.

[10] **Teeth and Gums.** ‖Great paleness of gums. θIntermittent fever.
‖Toothache all morning.
‖Toothache, momentarily > by cold water.
‖Persistent diarrhœa the result of morbid dentition; stools composed of mucus and undigested food; face flushed or has a red spot on each side; dentition advances slowly.

[11] **Taste and Tongue.** ‖Unbearable taste of blood; children complain of it.
‖Taste like rotten eggs.
‖‖Sweet or bitter taste in mouth. θIntermittent fever.
Bread tastes dry and bitter.
‖Earthy, putrid taste; all food has a dry, woody, insipid taste; no appetite; no thirst; vomiting of blood.
‖Bad taste, mouth dry, tongue coated white.
‖‖Numb and pithy feeling of tongue, as if burned.
Burnt sensation on back and middle portion of tongue.

[12] **Inner Mouth.** ‖Lips, gums, tongue and mucous membrane of entire buccal cavity pale and bloodless.

Digitized by Google

Mouth dry in the morning.
Cankered sore mouth; mucous membrane very pale; vomiting after coughing.

[13] **Throat.** Sensation of a lump in l. side of throat below tonsil; < when swallowing empty, not when eating or drinking.
Aching, pressing pain in throat during deglutition, with heat in fauces.
Constrictive sensation in throat.
Throat sore; feels dull and heavy all day; lively in evening.
Exophthalmic goitre, especially after suppression of menses; protruding eyes, enlargement of thyroid, palpitation of heart and excessive nervousness.

[14] **Appetite, Thirst. Desires, Aversions.** Appetite voracious, double amount of an ordinary meal in evening hardly sufficient.
Canine hunger, alternating with loss of appetite.
Anorexia; extreme dislike to all food.
Anorexia, without bad taste or thirst.
Has no appetite, always feels full; drinks are relished.
Unquenchable thirst or thirstlessness.
Insatiable thirst. θIntestinal catarrh.
Appetite for bread.
Improved by wine, except such as are termed acid wines.
Desire for raw tomatoes.
Can only eat bread and butter; meat disagrees; children accustomed to meat suddenly become disgusted with it.
Aversion to: meat, which disagrees; eggs; beer and ale; hot things; sour things.

[15] **Eating and Drinking.** All food tastes bitter.
Solid food is dry and insipid while masticating.
After eating eructation and regurgitation of food, without nausea or inclination to vomit.
Taste putrid, bitter, or dry and insipid; loss of appetite, owing to a constant feeling of repletion; meat disagrees; after eating, heat and anxiety, dulness of head, preventing mental exertion; vomiting after eating.
After eating: heat in stomach; nausea; regurgitation of food.
After least food or drink, especially after meat, spasmodic pressure at stomach.
After fat food, bitter eructations.
After eggs, vomiting.
Worse from meat; sour fruit; drinking milk; tobacco, tea and beer.
Beer rises to head; stomach disordered after drinking beer.
Wine agrees, if not acid.

Digitized by Google

Bad effects from drinking tea; toothache, etc.
Worse on an empty stomach, better after breakfast.

[15] **Hiccough, Belching, Nausea and Vomiting.** ‖Constant eructation as soon as she has eaten.
Eructations: sour; foul; burning; relieving burning in stomach.
Regurgitation of food.
Nausea: with headache; with nightly diarrhœa; with vertigo.
Reeling and staggering as if intoxicated, with sickness in stomach when walking.
‖Vomiting of food, and a flow of water from mouth.
‖Vomiting after breakfast.
‖Vomiting after eating, coming each time with new force; vomiting of infants.
‖Spasmodic vomiting of food during pregnancy.
‖Vomiting as often as food has been taken, never at other times; not as a symptom of other disease, nor depending on organic affections of stomach.
Vomiting of ingesta with constant pressure in pit of stomach and weariness of feet.
Vomiting with pain in stomach.
‖Vomiting of everything eaten without being digested.
‖Vomiting of food, particularly after breakfast.
‖‖Vomiting of food immediately after midnight, followed by aversion to food and dread of open air.
‖Everything vomited tasted sour and acid.
‖Frequent vomiting of food with children; easy vomiting.
‖Vomiting of food with a fiery red face.
Vomiting of ingesta after every cough; after exercise.
Better after vomiting.
‖Hæmatemesis.

[17] **Scrobiculum and Stomach.** Distension of epigastric region.
Anxiety from slight causes, with throbbing in pit of stomach.
‖Palpitating in stomach and through œsophagus, as if a nerve was quivering, with an occasional suffocating feeling, as if a valve rose in throat.
‖Pit of stomach sensitive to touch.
‖Feeling of fulness and pressure in pit of stomach.
‖Stomach feels full and bloated after eating a few mouthfuls, with burning heat in it.
‖Spasmodic pressure at stomach after taking least food or drink, especially after eating meat.
‖Pressure in stomach after eating. θIntermittent fever.
‖Pressure at stomach with vomiting of food, followed by nausea and vomiting of water; pain in stomach > after vomiting; < drinking milk. θChlorosis.

Digitized by Google

‖Pressure in stomach and acidity. θChronic diarrhœa.
Pressure in stomach and head.
Heat rising from pit of stomach.
‖Heat and burning in stomach, with momentary, cramp-like pain in splenic region.
‖Occasional uneasiness at splenic end of stomach.
‖Cramp-like stomachache.
‖Neuralgic and anæmic cardialgia; atony of digestion; vomiting of food immediately after eating, without any preceding nausea, also when coughing or moving about; cardiac uneasiness.
‖Gastralgia after drinking.
‖Pit of stomach sensitive to touch, and soreness all over abdomen; pulse full, excited; face pale; greatly exhausted. θHæmatemesis.
‖Hemorrhage from stomach and pain in stomach through to spine.

[18] **Hypochondria.** Swelling and hardness in hypochondriac regions.
‖Tightness in r. hypochondriac region and shooting pains in left.
‖Fulness in region of liver.
‖Liver enlarged, sensitive to pressure.
‖Marked swelling of liver which is very sensitive to touch; pains along back particularly in places upon which she must lie; cannot lie long upon either side.
‖Pain in small of back and liver, all day.
‖Dropsy of liver.
‖Cramp-like sensation in splenic region.
‖Splenic region swollen and sore on pressure; spleen large.
‖Chronic affections, and swellings of spleen and liver, with infarctions of liver.

[19] **Abdomen.** Painful weight of viscera when walking, as if they would drop.
‖Congestion to head, blood-vessels dilated; swelling about eyes; pressure in stomach and abdomen after smallest quantity of food, vomiting of food, tension in abdomen causing shortness of breath, weakness almost to paralysis, hardness and fulness in r. side of abdomen, beginning dropsy, swelling of feet. θIntermittent.
‖Bowels feel sore when touched, as if bruised, or weakened by cathartics.
‖On feeling abdomen and on coughing, bowels are sore as if beaten, or as if they had been acted upon by purgatives.
‖Abdomen feels sore and bruised when walking.
‖Soreness all over abdomen; > by warmth. θIntestinal catarrh.
Stitching in abdomen.

Digitized by Google

Hardness and distension of abdomen, without flatulence.
Rumbling, with pain in small of back and kidneys, and slight urethral soreness when urinating.
Rumbling in bowels, with constant feeling as though they were going to move.
Flatulent colic at night; violent rumbling.
Colic with watery diarrhœa.
Pale face and lips, or fiery redness, with scanty discharge of pale blood with violent colic. θDysmenorrhœa.

» **Stool and Rectum.** At 8 A.M. very sudden discharge from bowels, watery, painless and odorless.
Diarrhœa < mornings; bad sleep before midnight.
Sudden, gushing diarrhœa.
Sudden, watery, painless stool, without smell.
Frequent diarrhœa; stools watery, with or without tenesmus, and preceded or not by pain, but always with much flatulence and more frequent after taking food or water.
Acrid watery diarrhœa, excoriating the anus, with vomiting of food soon after eating.
Frequent diarrhœic stools, corroding the anus, face being fiery red.
Watery diarrhœa with burning at anus.
Obstinate diarrhœa, stools composed of slime and undigested food; painless, excoriating and exhausting.
Chronic, watery, painless diarrhœa, coming regularly every afternoon.
Painless diarrhœa, involuntary during a meal.
Painless stools like from a spout. θIntestinal catarrh.
Chronic watery diarrhœa in children, usually soon after eating and drinking, without pain or effort, mostly containing undigested substances.
Undigested stools at night, or while eating or drinking.
Diarrhœa; pale, miserable complexion; emaciation; abdomen hard and distended without flatulency; bulimia alternating with anorexia; thirst.
Slimy, watery, painless diarrhœa, < at night; abdomen painless to pressure; face pale; marked swelling of body which pits upon pressure; skin cold; no appetite; great thirst; great weakness: slight fever towards evening; peevish and tearful.
Painless, large, watery discharge, with a good appetite.
Watery diarrhœa, brown, painless and weakening.
Colliquative diarrhœa in phthisical subjects; passages very frequent and finally become almost involuntary; great debility.
Diarrhœa during pregnancy.
Summer complaint of children with emaciation.

Google

‖Rice-water discharges; cold, with cold, sour sweat.
‖Profuse discharge of flakes of mucus, or formed into lumpy balls.
‖Cholerine where the enteric symptoms are particularly severe; extreme sensitiveness of intestinal tract, so that the least motion, or smallest amount of food or drink, renews or < diarrhœa; intestinal scrapings discharged in large quantities; vox cholera present; blue rings around eyes; pulse beginning to fail.
‖Slimy, bloody stools with tenesmus.
‖Straining for stool all day, sick at stomach, disagreeable taste, worse drinking cold water.
Constipation from intestinal atony.
‖Costive: stools hard and difficult, followed by backache.
‖Chronic constipation; ineffectual urging; anæmia; easily flushed head and face, with cold hands and feet.
‖Hard, difficult stools, followed for hours by cramping pain in rectum. θIntermittent.
‖Constipation with hot urine.
‖Contractive spasm in the rectum.
‖Prolapsus recti, particularly with children.
‖Itching at anus at night, from ascarides; tænia.
‖Discharge of ascarides with slimy stool.
‖Helminthiasis; wretched complexion; itching in anus at night, from seat worms.
‖Piles, copious bleeding or ichorous oozing; tearing pains with itching and gnawing.
‖Protrusion of large varices at anus.
‖Profuse hemorrhoidal flux from anus and bladder.
Aggravation: after abuse of cinchona; while eating or drinking; at night.

[n] **Urinary Organs.** ‖Pains in bladder.
‖Urging to urinate, with tickling in urethra extending to neck of bladder.
‖Continual desire to urinate, with pain in liver, chest and kidneys.
‖‖Involuntary urination at night, and also when walking about by day.
‖Incontinence of urine, more frequent by day than by night, but floods bed five or six times at night; urine smells like strong ammonia, stains sheets very dark; yellowish clay-colored sediment sticks to sides and bottom of vessel.
‖Nocturnal enuresis; urine dark red, sometimes with mucous sediment.
‖Urine blood-red, and plentifully charged with blood corpuscles.
‖Urine clear as water. θAnæmia.

Digitized by Google

‖Urine more copious and clear; with relaxation and prostration, making him very nervous.
‖Urine alkaline.
‖Hot urine; metrorrhagia.
Burning in urethra during micturition, as if urine were hot.
‖Slight soreness in urethra.
Diabetes.
‖‖Albuminuria, with chronic fatty degeneration, much anæmia and excessive prostration, with anasarca.
‖Chronic vesical catarrh and gleet.

[22] **Male Sexual Organs.** Erections night and day; nocturnal emissions; sterility; sexual desire increased.
‖Impotence.
Discharge of mucus from urethra after a cold.
‖Copious, slimy, painless discharge from urethra, remaining after an attack of gonorrhœa.
‖Gonorrhœa of long standing with milky discharge.
‖‖Chronic gleet with anæmia.

[23] **Female Sexual Organs.** ‖Sexual desire lessened, sterility.
‖Anæmia of ovaries, with amenorrhœa and general anæmia.
‖Dropsy of uterus; face flushes red; great debility.
‖Sticking, shooting pains in uterus.
‖Pain in os tincæ on lying down; bearing down feeling, at same time dryness in vagina.
‖Sharp pains in abdomen, bearing down in uterus, with aching below it.
‖Before menses, stinging headache, ringing in ears, discharge of long pieces of mucus from uterus.
‖Labor-like colicky pains.
‖Anæmia, with uterine congestion, burning pain or pressure and weight in sacrum; dragging pains in loins, pelvis and thighs; cold hands and feet.
Menses: too late, long lasting and profuse; flow watery, or in lumps; preceded by labor-like pains; varices in legs <; intermit two or three days, then return; uterus displaced; come on with a physical languor and mental depression unfitting her for work, could overcome them by forced exertion; followed by hysterical symptoms.
‖‖Menses: too soon, too profuse, too long lasting, with fiery red face, ringing in ears; flow pale, watery, debilitating.
‖During menses, must keep perfectly still, least movement greatly < the flow.
‖Copious discharge of partly fluid and partly black and coagulated blood, with pains in loins and labor-like colic in weakly persons, with fiery red face and vascular excitement; headache and vertigo; constipation and hot urine. θHemorrhage.

Digitized by Google

‖Uterine hemorrhage with labor-like pains in abdomen and small of back, and hard, full pulse.
‖Passive hemorrhage dark grumous in character. θMenorrhagia.
‖Metrorrhagia, especially when accompanied by a very red face; menses profuse; acrid leucorrhœa; miscarriage; sterility; painfulness of vagina during an embrace.
‖Face pale and bloated in appearance; skin cold and pits upon pressure, especially about ankles, great lassitude, cries easily, want of appetite, aversion to food, indication of acidity of stomach, constipation, stool often absent a whole week, menses too frequent and too copious. θAfter severe hemorrhages.
‖The menses intermit and then re-appear.
‖Scanty pale catamenial discharge, with violent colic.
‖‖Menses pale, watery, debilitating.
‖Amenorrhœa or watery menses; women who flush easily, especially after drinking wine, with dyspnœa and palpitation.
‖Amenorrhœa with chlorosis; congestive headache; fiery red face; they feel weary and tired all the time, with desire to lie down.
‖Suppression of menses with extreme nervousness.
‖Mucous discharge in place of menses. θChlorosis.
‖Headache and singing in ears after menses.
Displacement of uterus; hysteralgia; metritis.
‖‖Swellings and indurations in vagina.
‖Prolapsus of vagina.
‖Vagina too dry.
‖Insensible or painful during coitus.
‖Much itching of vulva in weakly, delicate women with red face.
‖‖Leucorrhœa before menses.
‖Leucorrhœa resembling watery milk, smarting and corroding when first appearing, not afterwards; dragging pains in loins, pelvis and thighs.
‖Leucorrhœa mild and milky, or acrid and sharp, with soreness. θChlorosis.
Eruption on genitals or inflamed; ascarides in vulvæ.
‖‖Gonorrhœa of women.

Pregnancy. Parturition. Lactation. ‖Sterility; insensibility during coition.
‖Prevents abortion; promotes expulsion of moles.
‖‖Prolapsus of vagina, only during pregnancy.
‖‖Suddenly leaves table and with one effort vomits all the food taken, appetite not thereby impaired, can sit down and eat again. θPregnancy.
‖Varicose veins during pregnancy.

Digitized by Google

‖Great nervous erethism, flowing, and pain, with fiery red face; she is weak and pale. θMiscarriage.
‖Uterine hemorrhage with threatened premature labor, at end of eighth month.
‖Uterine hemorrhage with labor-like pains, glowing face; flow watery, or containing lumps; pulse full, hard.
‖Spasmodic labor pains.
‖Violent pains in loins and abdomen, like those of labor, with discharge of partly fluid and partly clotted blood; full, hard pulse; frequent short shuddering; headache and vertigo; hot urine; feeble; fiery red face. θExcessive or too long lasting after-pains.

Voice and Larynx. Trachea and Bronchia. ‖Voice hoarse, almost extinct, utterance difficult and panting. θIntermittent.
‖Complete aphonia, causing much anxiety.
‖Can talk only in a toneless whisper, and only that which is absolutely required from him; pain in larynx and trachea; after talking, burning; sensation as if something was in larynx, which he wished to remove by hawking or coughing; sensation, externally, as if throat was being squeezed; tickling in larynx, producing violent attacks of cough, loses breath, blood mounts to head, tears run from eyes, he sinks down exhausted; easily vexed; least thing excites him; pulse accelerated toward evening; cannot get to sleep in evening, and after he does fall asleep, sweat awakens him; some nights, congestion to chest; palpitation of heart; pulsations in all the arteries, and anxiousness; despondent; solicitude about those belonging to him, with constant thoughts of death; pale, earthy color of face. θAphonia.
‖Low tone of voice; pain in larynx and trachea; burning sensation after talking; laryngeal hemorrhages; asthmatic symptoms with hæmoptysis. θAphonia.
‖Hoarseness, with sensation of roughness in larynx.
‖General weakness, caused by speaking.
‖Influenza, cough and vomiting of food immediately after eating.

Respiration. ‖Hot breath.
‖Uneasy breathing, from pain across chest.
‖Breathing dry, loud, anxious; sometimes rattling in children.
‖Oppressed, short breathing.
‖Continued shortness of breath.
‖Difficult inspiration, as from heaviness of chest.
‖‖Difficult breathing, oppression of chest, as if some one pressed with hand upon it.
‖Cannot get any air; even when seated his breathing is difficult.

Digitized by Google

‖Oppression from orgasm of blood; chest scarcely moves when breathing; nostrils dilated during expiration.
‖Difficult inspiration, want of air in coughing out, want of air in drawing in.
‖Breath fails at end of coughing fit.
‖Suffocative fits in evening, in bed, with warmth of neck and trunk, limbs cold. θSpasmodic asthma.
‖Asthma, with oppression of chest and anxiety at pit of stomach, preventing free respiration.
‖Catarrhal asthma every morning from 10 to 11.
‖Asthma worse after 12 P.M., must sit up; > walking about slowly and talking; > uncovering chest; after itch.
‖Asthma, with difficult, slow breathing, > by walking and talking or by constant reading or writing; < when sitting still, and most violent when lying down, especially in evening.
‖‖Dyspnœa increases slowly. θPneumonia.
‖Pneumonia epidemica: dyspnœa gradually increased; no pressure under sternum; pale face; stupid; roof of mouth white; skin neither burning nor cold and damp; pulse never hard and full.
‖Dyspnœa. θIntermittent fever.

ᵻ **Cough.** ‖Spasmodic, from tickling in trachea; at night, must sit up to raise sputa; spasmodic, after eating, with vomiting of food; after drinking; with stitches in chest and soreness.
‖‖Cough with expectoration only in morning of blood-streaked, purulent, albuminous mucous, greenish or frothy, tasting sweetish, putrid or sour.
‖Constant tickling irritation to cough, with copious, greenish, blood-streaked, purulent expectoration, great debility, emaciation and hectic fever; complete cessation of menstrual flow which is replaced by a blenorrhagia.
‖‖Catarrhal cough, with aching pain in upper part of sternum.
‖Spasmodic cough with expectoration of transparent, tenacious mucous, and vomiting of ingesta.
‖‖Spasmodic cough after meals with vomiting of all the food taken.
‖‖Cough with gagging and vomiting.
‖Spasmodic cough, in evening without, in morning with blood-streaked, purulent, slimy, sometimes frothy expectoration, of a sweetish, putrid or sour taste, < in evening till midnight; during this period the sputa are not dislodged, but in daytime, during motion, they are loosened; suitable for drinkers of brandy, excessive tea-drinkers, or for persons who have taken much Cinchona.

Digitized by Google

Spasmodic whooping cough, dry in evening, in morning, copious, purulent, blood-streaked expectoration, and sour vomiting of food; at once > by eating a small quantity of food.

Whooping cough; child vomits food with every coughing spell; great pallor and weakness.

Cough: worse from abuse of tea, quinine, brandy; tobacco smoke; loss of fluids; when moving; violent exertion; after talking; at night.

Cough with oppression of chest and pale face.

Cough excited by drinking, often > by eating.

Cough only in daytime.

Gastric cough, eased by vomiting.

So-called galloping consumption with pus-like expectoration; vomiting of ingesta; swollen feet; leucorrhœa; diarrhœa.

Chronic blenorrhœa pulmonum.

Sputa: copious, putrid, purulent, greenish or frothy, bloody; < morning; copious when moving; scanty, thin, frothy, with streaks of blood.

Hawking up of bloody phlegm.

Scanty, thin, frothy expectoration, with streaks of blood.

Coughing up of blood in morning on rising from bed.

Dry, tickling cough with blood-spitting.

Cough with expectoration of blood, in lean people with yellowish color of face, who cannot sleep well at night.

Patients of venous constitution, who have for some time had bloody expectoration and complain of shortness of breath without any particular pain in chest, and suffer occasionally from palpitation of heart.

Hæmoptysis: of onanists and consumptives; from severe exertion; after loss of fluids; from suppressed menses.

Hæmoptysis in a laborer whose work compelled him to receive constant light blows on pit of stomach; blood watery and coagulated; præcordial region sensitive to touch and painful, pain spreading from thence over nearly whole abdomen; pulse full, hard and excited; face pale; great weakness.

Blood scanty, clear and bright red, escaping with an easy effort at vomiting; pain between shoulders; constriction of chest, < at night; cannot sit, but is > by slowly walking about, must frequently lie down, is very weak, particularly after talking; must cough after any exertion. θHæmoptysis.

Hæmoptysis morning and night; blood bright, coagulated, scanty during slight cough with interscapular pains; heavy breathing; must sit up; > walking slowly about, notwithstanding weakness obliges lying down; palpitation.

Digitized by Google

Inner Chest and Lungs. ‖Slight heaviness in upper part of l. lung, making breathing rather difficult; sore feeling below clavicle and l. nipple, cannot take a long breath.

‖Slight, dull, heavy pain across upper part of chest, rendering breathing uneasy.

Fulness and tightness in chest as if constricted, < walking.

‖Pain in l. side with dyspnœa. θIntermittent fever.

‖Fugitive pains in chest, flying from one point to another.

‖Women who blush easily; < after wine; epistaxis in alternation with spitting of blood; pains in chest fugitive, cannot be located; menses watery or absent. θPulmonary consumption.

‖Shooting stinging in chest.

‖Sticking and bruised sensation in chest.

‖When coughing, stitches in chest; sensation of soreness.

‖Feeling of dryness and heat in chest.

‖Burning in upper part of sternum after coughing.

‖Pressure superiorly under sternum, with catarrh and cough.

‖Contractive cramp in chest, and cough only when moving and walking.

‖Constriction of chest at night due to erethism of vascular system and congestion of blood to chest; < from least covering of bed clothing; > lying with chest elevated; boring in chest; not noticeable during day while going about.

‖Congestion to chest. θAphonia.

‖Congestion of blood to lungs, with hæmoptysis, attended by palpitation of heart, obliging patient to sit up.

‖Rush of blood to head and chest, with cold hands and feet, followed by debility.

‖Hæmoptysis, especially when tickling cough and oppression of chest are present.

‖Hæmoptysis; morning and at night; > by walking slowly.

‖Incipient tuberculosis, with transient pains in chest and discolored sputa; in later stages when there is vomiting of food; constant pressure in epigastrium, and crowded sensation in chest.

‖Tuberculosis with flying pain in chest, and hectic fever.

‖Pulmonary tuberculosis; especially in young, florid subjects, with a remarkable erethism of vascular system, and inclination to congestion to chest.

‖Anæmia in chlorotic, or tuberculous subjects with profuse serous effusion, with ascites and œdematous feet, scanty urination; bruised feeling in chest, orthopnœa; want of air; < in walking, preventing inspiration and compel-

Digitized by Google

ling them to sit up in bed; < after midnight; pains in chest, with stitching and tension between shoulders, allowing no motion.

‖Consumption in consequence of erethic chlorosis.

‖Whole body emaciated and covered with a clammy colliquative, sweat; face hippocratic, sunken, earthy in color with circumscribed redness of r. cheek; eyes sunken, dull, yellowish and filled with tears; pale lips; tongue pale and flabby; whole throat and pharynx sore and ulcerated; voice rough, hoarse, scarcely audible; constriction of chest; difficult respiration (mainly accomplished by abdominal muscles, the thorax being motionless, with great expansion of alæ nasi during expiration); stitching pain in chest extending back into shoulder blades; tickling in larynx with anxious irritation to cough, copious, greenish, blood-streaked, foul-tasting expectoration; great debility and lassitude; stitching pain here and there in limbs; colliquative diarrhœa excoriating the rectum; chilliness, particularly over back, < evenings, with cold extremities and hot palms of hands; loss of appetite; thirst and sleeplessness; scalp painful to touch with falling out of the hair. θPhthisis florida after pneumonia.

‖No ailments previous to chill; dyspnœa increases slowly; face pale, and in adults collapsed, hippocratic or expressionless, stiff and stupid; roof of mouth always white; skin neither cold nor burning hot; pulse neither full nor hard; stool consistent, brown. θPneumonia.

‖Inflammation of lungs with roof of mouth white; dry skin and gradually increasing oppression.

‖Pneumonia senilis; laxity of fibre; pulse soft and quick, occasionally slow and easily compressible; dyspnœa slowly increasing; bloody expectoration.

‖Neglected pleuropneumonia; absorbs exudation.

[20] **Heart, Pulse and Circulation.** Drawing constrictive pain in region of heart.

‖Congestion to chest; anxiety; palpitation of heart; pulsation in all the arteries. θAphonia.

‖Palpitation, with fear; has to move about, can neither sit nor stand.

‖Palpitation; beats of heart < from least motion.

‖Palpitation: > walking slowly; in onanists; after loss of fluids; with blood-spitting; in chlorosis.

‖Anxiety in chest, heat rising from pit of stomach upward, after bodily exercise; palpitation. θHeart disease.

‖Rapid action of heart.

‖Hard, strong beating of heart; pseudo-plethora.

‖Bellows-sound of heart, and anæmic murmur of the

Digitized by Google

arteries and veins; muscles feeble, and easily exhausted from slight exertion; œdema of body. θAnæmia

‖Consecutive heart disease; chlorosis.

‖Hypertrophy of heart.

‖‖Endocarditis with chlorotic symptoms.

‖Fatty degeneration of heart.

‖Pulse accelerated towards evening. θAphonia.

‖Violent ebullitions.

‖Pulse full, hard; increased by exertion.

‖‖Pulse hard and full at beginning of paroxysm; or weak, small and scarcely perceptible during apyrexia. θIntermittent fever.

‖Soft, quick, occasionally slow pulse; weak, easily compressible. θPneumonia.

‖Small, weak pulse, sometimes intermittent, sometimes uneven.

‖Chlorosis with vertigo on moving, stooping, etc., pressing pain in forepart of head and in stomach, anorexia, constipation, skin of face and body of waxy appearance, lips and tongue pale, menses scanty, watery and at times entirely absent, emaciation, great debility, as if her knees would sink under her, occasionally swelling of face, hands and particularly of feet, urine clear as water, constant chilliness and coldness, pulse weak.

‖Chlorosis in consequence of retarded puberty; after loss of blood.

‖‖Erethic chlorosis, < in winter.

‖‖Anæmia masked behind plethora and congestions; pale color of mucous membranes, with nun's murmur.

‖Great erethism of the circulation; red face and full pulse; blood partly fluid and partly clotted, with labor-like pains in abdomen; feels < in the night, particularly after midnight, from fat food, abuse of Peruvian bark; very weak. θHemorrhage.

‖Throbbing in all the blood-vessels; soft bellows-sound at apex.

‖‖Nun's murmur in the veins.

[30] **Outer Chest.** Sensation in clavicle as if gone to sleep.

Pain in outer parts of chest.

‖Drawing in chest and around heart; scalp sore.

[31] **Neck and Back.** ‖Neck sore as if bruised; stiff.

‖Neck and shoulder painful when lying on r. side.

‖Pains between shoulders.

‖Constant pains along back, < in those parts she had to lie on. θEnlargement of liver.

‖Lumbago all night, goes off on rising.

‖Pain in region of kidneys, with desire to make water; urine albuminous, feet and legs dropsical.

Digitized by Google

‖Stitch-like jerks in small of back when walking, extending toward hips rather than upper parts; more painful after sitting or standing (almost as after straining the parts by lifting).

Upper Limbs. ‖Paralytic heaviness in shoulder-joint.

‖Omodynia, either side; pain especially in deltoid muscle, of a constant, drawing, tearing, laming nature, < in bed, must get up and slowly move about; also < from being too lightly covered for any length of time; face pale, flushing easily; no swelling.

‖Omodynia in Spring, affecting both deltoid muscles; in Fall a recurrence, but only in l. deltoid; violent lancinating pain when moving arm, making her cry out.

‖Constant dull tearing or quick darting pain in deltoid, particularly at insertion of biceps muscle, and extending with decreasing severity to elbow; < holding arm quiet, warmth of bed, uncovering for any length of time; cannot move elbow from body without severe pain; lifting arm, or lifting hand to head, or putting hand behind back utterly impossible.

‖Pain, shooting and tearing, from shoulder-joint into upper arm and farther downward, which makes it impossible to raise it.

‖Downward shooting pains (in shoulders and arms) more severe than the shooting upward.

‖Slight gnawing pain in l. arm, finally becoming so severe as to compel her to keep arm quietly at side; pain constant, preventing sleep; least movement of fingers causes pain in arm; arm heavy as lead; pressure upon head of humerus very painful; chilliness, heat, thirst and sweat present. θRheumatismus humeri.

Flesh of r. arm and shoulder sore to touch, feels bruised, < from motion, pain > by external heat.

‖Pinching in r. deltoid.

‖Boring in r shoulder, and from biceps to elbow; < from motion; > from heat; < from weight of bedclothes.

‖Paralytic tearing pain from shoulder-joint into upper arm (left); he cannot raise arm; slow movement improves it gradually.

‖Nightly tearing and stinging in arms.

‖Cracking in shoulder-joint.

‖Right arm lame.

‖Arms nearly rigid.

‖Irresistible desire to bend arm, with intense pain; drives out of bed, 2 A.M.; > walking slowly about.

‖Swelling and stiffness of arm and hand.

‖When writing hand trembles, > when writing fast.

‖Hands cold, stiff, numb; palms hot.

Digitized by Google

Fingers stiff, numb, contracted.

[33] **Lower Limbs.** Violent pain in hip-joint, < evening until 12 P.M.; must get out of bed and walk about; can hardly put foot down, but pain lessens while walking.

Shooting and tearing in hip-joint, which pains as if bruised when touched; down along tibia; < evening, in bed; must get up and walk about.

Remitting pains; < in night; although at first scarcely able to stand on affected limb, by continued motion and walking about, pain gradually becomes milder; pain in l. shoulder; face pale, emaciated, but flushes easily. θSciatica.

Numbness of thighs.

Varicose veins inside of r. thigh, then of l.

Neuralgia, throbbing at night; < in rest; > moving.

Painful drawing in legs, with heaviness and stiffness.

Legs feel weak.

Great weakness of knees, almost sinks to the ground.

Calves weak as if bruised.

Cramps in calves, < at rest, especially at night.

Sore throat and chronic enlargement of tonsils; great weakness in joints, especially in ankles; ligaments became so relaxed that she could not walk or stand, on attempting to do so her legs seemed to slip off the feet and she would drop upon her external ankles. θAnæmia.

Feet cold, numb, stiff.

Œdema of feet. θIntermittent fever.

Varices on feet.

Shooting pricking in r. instep.

Cramps in soles of feet and toes, with painful contraction of toes; cramps in calves of legs at night.

Soles feel hot.

Heel pains.

Easily fatigued by walking; better from moving and walking slowly about, but weakness obliges to lie down.

[34] **Limbs in General.** Nightly tearing in arms and legs.

Stitching tearing pains, < at night; must constantly change position of limbs; face pale and emaciated.

Neuralgia in limbs, throbbing, < at night, by lying down, in rest, in sitting; > on moving.

Restlessness in limbs.

Contraction of limbs.

Cramps in limbs (during the day).

Cracking in joints.

Swelling of hands and of legs up to knees.

Hands and feet almost continually cold.

[35] **Rest. Position. Motion.** Rest: neuralgia <; cramps in calves <.

Digitized by Google

Laying head on table: > singing and humming in ears.
Holding arm quiet: < pain.
Lying with chest elevated: constriction >.
Lying down: desire to; hammering pain in head compels one to; pain in face <; pain in os tincæ; asthma <; weakness obliges.
Pain < from lying down, > from rising.
Sitting up: > pain in face; asthma >; cough compels him to sit up to raise sputa; congestion of blood to lungs, with palpitation, obliges patient to sit up.
Sitting up after sleeping: sweat goes off suddenly.
Pain < in part of back she lies on.
Can only lie on back at night.
Cannot lie long on either side.
Must change position to relieve pains in limbs.
Sitting still: asthma <; stitch-like jerks in back <; falls asleep.
Standing: stitch-like jerks in back <.
Better walking slowly about.
Motion: sudden, brings on throbbing headache; beating pain in head <; the least renews diarrhœa; least < flow of menses; sputa dislodged during; cough <; cramp and cough; boring in chest >; pains in chest and between shoulders allow no motion; must move about, cannot sit or stand; palpitation <; vertigo with chlorosis; of arm, lancinating pains; the least of fingers causes pain; bruised feeling in r. arm and shoulder <; boring in shoulder <; slow motion > pain in arm; > pain in lower limbs; neuralgia >; heat >; sweat <.
Talking: burning in larynx; asthma >; cough <.
Rising: vertigo; after rising and dressing pressure in frontal eminence; coughing up blood on rising from bed; lumbago >.
Cannot keep head quiet.
Cannot move elbow from body without severe pain; cannot raise arm.
Irresistible desire to bend arm.
Stooping: < beating pain in head; nosebleed; vertigo with chlorosis.
Must get up and slowly move about.
After getting out of bed: chill >.
Going down stairs: headache <.
Fall forward: must lean against something to prevent falling; danger of falling when descending.
Walking: giddy, as if drunk; vertigo, with sickness of stomach; painful weight of viscera; abdomen feels sore and bruised; involuntary urination; asthma >; heavy breathing >; tightness in chest <; cramp and cough;

Digitized by Google

slowly, hæmoptysis >; palpitation > from slow; stitch-like jerks in small of back; slowly > pain in arms; pain in hip-joint >; must get out of bed and walk slowly.

[36] **Nerves.** ‖Over-sensitiveness to pain.
‖Nervous excitability and anxiety.
‖Increased bodily irritability.
‖‖Restless, must walk slowly about.
‖Great nervousness and debility; great disposition to lie or sit; red face; weak, chlorotic.
‖Weak and nervous, suffers much, has very red cheeks.
‖Very weak and tired, but always > walking slowly about.
‖Tired, aching, as from lying long in one position.
Relaxation and debility after excitation which might be mistaken for exuberance of life.
‖After an attack of pneumonia, debility and chlorosis; paleness of face and mucous membranes; swelling of spleen; want of muscular power; anæmic murmurs.
‖Great weakness and prostration; very easily fatigued.
‖Laxness and weakness of whole musculature, with emaciation, weakness of digestion, and coldness of extremities.
‖General weakness, even from talking.
‖Great languor, with emaciation.
‖Prostration, debility and great loss of muscular power.
‖Prostration, with slow, weak pulse.
‖‖Prostration, lethargic dulness, vertigo.
‖Weakness of body almost paralytic; she is so weak that she must lie down.
‖Paralysis from loss of fluids.
Consecutive paralysis; generally one-sided.
‖Frequent attacks of tremor, alternating with a sensation of weakness, as if very weary; trembling of whole body.
‖‖Frequent and sudden attacks of trembling throughout body, with great weakness, lassitude and desire to sleep, which does not relieve.
‖Fainting spells, with subsequent weakness.
‖‖Light spasms, with numbness of limbs.
‖‖Tetanic spasms with cataleptic condition of upper portion of body.
‖Chorea.
‖Catalepsy.

[37] **Sleep.** Falls asleep: from weariness or debility; while sewing; sitting and studying.
‖Excessive and drowsy fatigue, with restless sleep at night.
‖Sleepy at night, with inability to sleep.
‖Restless sleep at night; cannot get to sleep in evening: after he does fall asleep, a sweat breaks out which awakens him, and he has to lie a long time before he

Digitized by Google

can go to sleep again, and so on until morning; some nights, congestion to chest; palpitation of heart; pulsation in all the arteries, with anxiousness. θAphonia.

Bad sleep before midnight.

Anxious tossing in bed before 12 P.M.; has to get up and walk.

Child does not sleep because of itching from ascarides.

Can lie only on back at night.

The pain forces him to get up out of bed at night and walk slowly about.

Is worse from being too lightly covered for any length of time.

Weariness and drowsiness in daytime, with light sleep at night, full of dreams, attended with seminal emissions; vivid dreams of being engaged in war, or that he fell into water.

Disturbed by dreams; much weariness on rising in morning.

Dreams: vivid; confused; unpleasant.

Nightmare.

Time. Morning: pressure in frontal eminence, extending over whole forehead to vertex and becoming more intense; headache < towards; stitches in ears; nosebleed; toothache; mouth dry; diarrhœa <; cough with expectoration of blood-streaked mucus; whooping cough; copious blood-streaked expectoration; coughing up of blood; hæmoptysis; much uneasiness on rising; loose stool early in; chilliness with headache; sweat <.

2 A.M.: driven out of bed by pain.

3 A.M.: severe stitches in temples.

8 A.M.: sudden discharge from bowels.

12 P.M.: asthma < after.

All day: frontal headache; dull and heavy; pain in small of back and liver; straining for stool.

By day: involuntary urination; incontinence of urine more frequent; erections; sputa dislodged; cough and boring in chest >; sweat <.

Afternoon: shooting headache; violent chill lasting half hour.

Evening: lively; headache; darkness before eyes; appetite voracious; fever towards; pulse accelerated towards; cannot get to sleep; suffocating fits; asthma <; spasmodic cough; putrid or sour taste <; till midnight sputa not dislodged; whooping cough dry; hæmoptysis; chilliness <; violent pain in hip joint < till midnight; chilly; general coldness; heat <; can only sit up short time.

Night: capability to see in dark; diarrhœic flatulent colic;

Digitized by Google

undigested stool; slimy, watery diarrhœa <; itching in anus; hemorrhoidal flux from anus and bladder <; involuntary urination; incontinence of urine, floods bed five or six times; erections; nocturnal emissions; congestion to chest; must sit up to raise sputa; cough <; constriction of chest; after abuse of Peruvian bark, from fat food feels <; lumbago; tearing and stinging in arms; remitting pains in lower limbs <; cramps in calves <; tearing in arms and legs; restless sleep at night; can only lie on back; chilly; general coldness; feet cold and numb; sweat.

Midnight: headache < after; vomiting of food immediately after; bad sleep before; after, anæmia <; after abuse of Peruvian bark, or from fat food feels <.

[39] **Temperature and Weather.** Overheating produces neuralgia.

External heat: > pain in arms; boring in shoulder <.
Warmth of bed: pain in arm <.
Warmth: > soreness of abdomen.
Uncovering chest: asthma >.
Too lightly covered: omodynia <.
Least covering: constriction <.
After getting out of bed: chill >.
Open air: > headache; dread of.
Cold water: > momentarily toothache; taste in mouth <.
Cold washing produces neuralgia.
Cold air: pressure on top of head caused by.
In July, sleeping with window open: intestinal catarrh.
Generally < in cold weather, > in warm air.
Winter: erethic chlorosis <.

[40] **Fever.** Vomiting of ingesta as chill is coming on; loose stool in early morning.

Frequent short attacks of shivering or shuddering.
Chilliness with trembling all over.
Chilly; want of animal heat.
Chilliness, with headache in morning.
Chill with thirst; headache; hot, red face; chilly all night.
Chilliness, with great thirst, preceded and succeeded by headache.
During chill face is glowing hot.
Chilly every evening; hectic fever.
General coldness of body, hands and feet very cold.
General coldness in evening, in bed, often lasting all night.
Hands and feet cold and numb, chilly all over, not > by walking.
Feet very cold, toes cold as ice, fingers stiff.

Digitized by Google

Feet cold and numb all night, as after skating.
Chill, lessened after getting out of bed.
Chill better after eating.
Sensation of heat all over body, which is cold to touch, with sensation in face and around eyes, as if swollen and bloated.
Heat, with very red face and inclination to uncover.
Heat in body, with red cheeks, but head is free.
Head hot, feet cold.
Great heat of palms of hands and soles of feet.
Heat in stomach (> by eating), vomiting of ingesta.
Dry heat, < towards evening; inclination to uncover; > by moving about, eating and speaking.
Heat, without thirst.
Fever, without chill, 3 to 8 P.M.
Heat abating when moving about.
Flushes over body as if perspiration would break out.
The perspiration is immediately preceded by headache.
Sweat profuse, long lasting and debilitating, by day at every motion, at night and morning in bed.
Sweat from early morning until noon, every other day, preceded by headache.
At times anxious cold sweat (with cramps of different parts).
Nausea during sweat.
Clammy, generally debilitating sweat.
Strong smelling night-sweat.
Sweat stains yellow, is fetid on going to sleep.
Viscid, exhausting sweats.
Sweat often confined to lower part of body.
Sweat lessened: while speaking; after meals.
All the symptoms < while sweating.
Cold perspiration with convulsions.
During apyrexia profound disturbance of digestive organs, fulness and pressure in stomach, regurgitation and vomiting of food, slimy or watery diarrhœa; oppression of chest, tendency to mucorrhœa and hemorrhage, palpitation of heart, vertigo and headache, great paleness of lips and gums; anæmic murmur; paroxysms not severe but protracted and irregular; sweat profuse and debilitating; type of fever easily changing; marked swelling of spleen. θIntermittent.
Prostration, debility and great loss of muscular power; anæmia; œdema of feet and face, especially upper and lower eyelids; headache; vertigo; swelling of cutaneous veins; splenic region swollen and sore on pressure; vomiting of everything eaten; constipation or chronic diarrhœa with lienteria; cadaverous, jaundiced com-

Digitized by Google

plexion; yellow spots on face; very weak and tired, but always > walking slowly about; cases maltreated by quinine. θIntermittent.

▮Chill lasting one hour, 7 to 8 A.M., one day, and from 9 to 10 the next, first in feet, extending to back, < r. side; nails blue; very little thirst, nausea or pain; slight temporal headache; paroxysm preceded by one loose stool early in morning, and great nervousness; ill-humor, scolds about everything and everybody; fever lasts two hours, feet continuing cold some time after fever sets in; sweat profuse and debilitating on falling asleep, but goes off suddenly on sitting up; dreads sweat more than chill or fever; nausea during sweat; sleep restless and disturbed; no appetite; face sallow, light leather-color; r. cheek slightly swollen, though not sore; weak, can only sit up a short time in evening. θIntermittent.

▮Complete aphonia, great prostration, skin pale, puffiness about eyes, lips and gums colorless, anæmic murmur, constant dyspnœa, œdema of feet, loss of appetite with pressure in stomach after least food, hard, difficult stool followed by cramping pains in rectum, lasting several hours, profuse, offensive smelling sweat on going to sleep; cough; spleen enlarged. θTertian intermittent.

▮Paroxysm every other day; headache; pressing in forehead, followed by violent chilliness, lasting three-quarters of an hour, with increased headache and much thirst, afterwards moderate heat and sweat; bitter taste, loss of appetite, constipation, yellowish complexion; great weakness; moderate headache during apyrexia. θIntermittent.

▮In afternoon violent chill for half an hour, then thirst, must go to bed, followed by heat with perspiration.

▮Intermittent fever after abuse of quinine; congestion to head; veins distended; vomiting ingesta; swelling of spleen; anæmia, masked by pseudo-plethora; skin transparent when it is not earthy.

▮Intermittent fever of long duration and maltreated by quinine, where there is complete prostration with great anæmia, face and lips pale, body cold, particularly extremities, digestion impaired, lassitude and weakness of whole musculature, and great emaciation, lungs affected, circulation disturbed and tendency to hemorrhages; tuberculosis threatens.

▮Œdematous swelling of body; cool skin; constant chilliness, evening fever, simulating hectic fever.

▮The skin becomes paler and paler; well-marked black or dark purplish spots on skin. θIntermittent.

Digitized by Google

Type: tertian; morning chill; afternoon fever.

41 **Attacks, Periodicity.** Frequent short shuddering.
Periodical headaches.
Quarter of an hour: headache in morning, grows <.
20 minutes: headache changing to pressive pain from within outward.
Three quarters of an hour: chilliness.
Stools followed for hours by cramping pain in rectum.
Chill lasting one hour from 7 to 8 A.M., one day, and from 8 to 10 the next.
Every morning from 10 to 11: catarrhal asthma.
Every afternoon: chronic watery, painless diarrhœa.
Every evening: chilly.
Every other day, from early morning until noon: sweat, preceded by headache; paroxysm.
Every two or three days: menses intermit and then return.
Every two weeks: for a few days headache.
Every few weeks: scabs come out of nose or are coughed up.

42 **Locality and Direction.** Right: as if head would incline to side; eye feels as though it would protrude; ringing in ear; tightness in hypochondriac region; hardness and fulness on side of abdomen; circumscribed redness of cheek; neck and shoulder painful when lying on side; flesh of arm and shoulder sore to touch; pinching in deltoid; boring in shoulder; arm lame; varicose veins inside of thigh; pricking in instep; chill < r. side; cheek slightly swollen.
Left: sticking pain over eye; hammering boring pain in temple; shooting headache in side; headache on side; sudden pain over eye; discharge from ear; murmur in jugular vein; sensation of lump in side of throat; shooting pains in hypochondriac region; heaviness in upper part of lung; sore feeling below nipple; pain in side; omodynia in deltoid; gnawing pain in arm; paralytic tearing pain from shoulder-joint to upper arm; varicose veins inside of thigh.
From within outward: headache.

43 **Sensations.** Giddy, as if drunk; as if everything went around with her; as if balancing to and fro; staggering as if intoxicated; as if head would constantly incline to r. side; as if skull were pushed upward; as if brain were rent asunder; as if grain of sand were in eyes; pressure in eyes as if they would protrude; face as if swollen or bloated; tongue as if burnt; as of a lump in l. side of throat; throat as if swollen outside; as if a nerve was quivering in stomach; as if a valve rose in throat; as if viscera would drop; bowels as if bruised; bowels as if beaten, as if they had been acted upon by purgatives;

Google

bowels as though they were going to move; as if something was in larynx; as if throat was being squeezed; chest as if constricted; clavicles as if gone to sleep.

Pain: in back of head; in face; in stomach; in stomach through to spine; in back; small of back and liver; in kidneys; in chest; in bladder; in os tincæ; in loins; in vagina; in larynx and trachea; across chest; between shoulders; in l. shoulder; between scapulæ; in l. side; in outer parts of chest; in neck and shoulders; in deltoid muscle; in heels.

Intense pain: in arms.

Severe frontal headache.

Violent pains: in loins and abdomen; in hip-joint.

Violent shooting: headache in l. side.

Lancinating: in forehead; when moving arm.

Tearing: from lambda to temporal bone; at anus; in deltoid, extending to elbow; from shoulder-joint to upper arm; from shoulder-joint into upper arm; in arms; in hip-joint; in legs.

Shooting pains: in l. hypochondriac region; in uterus; in chest; from shoulder-joint into upper arm; downward in shoulder and arms; in hip-joint; in r. instep.

Stitches: severe in both temples; in ears; in abdomen; in chest.

Stitch-like jerks: in small of back; to hips.

Stitching pain: between shoulders; in chest; into shoulder-blades; in limbs.

Sticking pain: over l. eye; in head; in uterus; in chest.

Stinging: in head; in eyes; in chest; in arms.

Pulsating pain: in head.

Beating: in back of head and neck, extending to sides and forehead; of pulse in head.

Hammering: in temples; in head.

Throbbing: in pit of stomach; pain in top of head; in brain; in all arteries; in limbs.

Boring: in l. temple; in chest; in r. shoulder; from biceps to elbow.

Pinching: in r. deltoid.

Sharp pains: in abdomen.

Labor-like pains: in abdomen.

Remitting pains: in lower limbs.

Fugitive pains: in chest.

Flying pains: in chest.

Darting: in deltoid, extending to elbow.

Neuralgia: in face; neuralgic cardialgia in limbs.

Cramps: in calves; in soles of feet and toes; in limbs.

Cramping pain: in rectum.

Contractive cramp: in chest.

Google

Cramp-like pains: in splenic region; stomachache.
Constrictive pain: in region of heart.
Colicky pains: in abdomen.
Gnawing: at anus; in l. arm.
Burning pains: in eyes; in sacrum.
Constant pains along back.
Aching pains: in eyes; in throat; below uterus; upper part of sternum.
Paralytic pain from shoulder-joint to upper arm.
Ulcerative pain: of scalp; in outer ear.
Pressing pain: in forehead; in throat; in forepart of head; in stomach; in head of humerus.
Dragging pain: in loins; in pelvis; in thigh.
Heavy pain: across upper part of chest.
Headache: above root of nose, l. side; on top of head.
Dull pain: across upper part of chest.
Burning: in stomach; at anus; in urethra; in larynx; in upper part of sternum.
Heat: of face; of head; in stomach; in chest; in soles; all over body.
Flushes of heat: in head.
Anxiety: at pit of stomach; in chest.
Bruised feeling: of abdomen; in chest; in neck; in hip-joint; in calves.
Constriction: of chest.
Contraction: of limbs.
Drawing: from nape of neck to heel; in region of heart; in chest; painful in legs.
Choking sensation: in throat.
Tickling: in urethra; in larynx; in trachea.
Prickling: in brain.
Pricking: in r. instep.
Soreness: of throat; of abdomen; of bowels; of urethra; in chest; below clavicle; below l. nipple; of pharynx.
Roughness: in larynx.
Dryness: of mouth; of vagina; in chest.
Crowded sensation: in chest.
Heavy feeling in head; in eyelids; in upper part of l. lung; in legs.
Paralytic heaviness: in shoulder-joint.
Fulness: in pit of stomach; in region of liver; in r. side of abdomen; in chest.
Bearing down feeling: in uterus.
Painful weight: of viscera.
Weight: in back of head; in sacrum.
Pressure: on top of head; in eyes; at stomach; in pit of stomach; in abdomen; in sacrum; under sternum.
Tension: in abdomen; between shoulders.

Digitized by Google

Tightness: in r. hypochondriac region; in chest.
Oppression: of chest.
Palpitation: in stomach.
Trembling: of whole body.
Restlessness: of limbs.
Uneasiness: at splenic end of stomach.
Weakness: of legs; of knees; of calves; of whole body.
Weariness: of feet.
Dulness: of head.
Roaring: in head; in brain.
Murmur: in l. jugular vein.
Humming: in ears.
Singing or ringing: in ears.
Buzzing: in brain.
Cracking: in shoulder-joint; in limbs.
Rumbling: in abdomen.
Burnt sensation: on back and middle of tongue.
Pithy feeling: of tongue.
Stiffness: of legs.
Numb feeling: of tongue; in arms; in fingers; in feet; in thighs.
Formication: of scalp.
Itching: on scalp; at anus; of vulva.

" **Tissues.** ❙A cachectic state from faulty nutrition and assimilation.
Tendency to get fat.
❙❙Emaciation.
❙Relaxation and weakness of entire musculature with emaciation; muscles feeble and easily exhausted from slight exertion.
❙Pseudo-plethora; congestions, etc., yet anæmic; face is earthy, flushing easily.
❙Hemorrhages; blood light or lumpy; coagulates easily.
❙Blood-vessels distended, especially those of head, face and feet.
❙❙Red parts become white.
❙Increase of watery elements of blood and decrease of solids.
❙❙Anæmia, from whatever cause; chlorosis of defective menstruation, or simple poverty of blood induced by hemorrhages, deficiency of air, light, and suitable food, or of exhausting diseases.
❙After severe hemorrhages; pale, bloated appearance; skin cool, and pitting upon pressure, particularly about joints; great lassitude and debility; cries easily; loss of appetite with aversion to food; indications of acidity of stomach; constipation; menses too frequent and too profuse. θAnæmia.
❙❙Erethic chlorosis, worse during cold weather.

Digitized by Google

‖‖Chlorosis after great loss of blood.
‖Anæmia and asthenia of Addison's disease.
‖Dropsy after loss of fluids, abuse of Cinchona, intermittent fever; anasarca.
Dropsy of scrotum, legs and feet.
Dropsy acute or chronic in liver complaints.
Body bloated; pressure with finger leaves indentations.
‖Swelling of cutaneous veins; varices.
‖Glands swollen, with rending, tearing pains.
‖Bonds disposed to soften or bend; fracture unites slowly.
Scrofulosis.
‖Atrophy of children.
‖Cracking in joints.
‖Sudden emaciation; muscles lax, limbs cold; weak digestion.

[45] **Touch. Passive Motion. Injuries.** Touch: head sensitive to; scalp very sensitive; pit of stomach very sensitive; bowels sore to; flesh of r. arm and shoulder sore to touch; burning sensation with pain in skin when touched.
Pressure: > headache; liver sensitive to; splenic region sore on pressure; abdomen painless; swelling of body pits upon pressure; upon head of humerus very painful.
Weight of bedclothes: boring in shoulder <.
Constant light blows on pit of stomach: cause hæmoptysis.

[46] **Skin.** ‖Dry skin. θPneumonia.
‖Skin pale, yellow, sallow, dirty, withered, flabby.
‖Burning sensation, with pain as if excoriated when touched.
‖Yellow-brown spots, sore to touch.
‖Inflammation and suppuration of dark hepatic spots.
‖Dirty brownish discoloration of skin.
‖Sharply defined black, or dark violet spots on skin.
‖Skin peels off on shoulders and left hand.
‖Scarlatina during desquamation.
‖Swelling of cutaneous veins.
‖Anasarca.
‖Ulcers pale, œdematous.
‖Warts on fingers and backs of hands.

[47] **Stages of Life, Constitution.** ‖‖Adapted to persons of sanguine, choleric temperament; pettish, quarrelsome, disputative, easily excited, least contradiction angers; women are weak, delicate, chlorotic, yet have a very red face.
‖Very weak and thin.
‖‖General hemorrhagic diathesis.
‖‖Hemorrhophilia.
Dark hair.

FERRUM IODATUM.

Iodide of Iron. FeI_2.

Trituration of freshly prepared crystals.

Proven by Fr. Müller, of New York, in 1851, and by Gosewisch, of Wilmington, Del., in 1854. The latter proving (not contained in Allen's Encyclopedia) was made with two half-drop doses of "Iodide of Ferri potency," taken four days apart.

A proving conducted by E. A. Farrington, with Ferri Iod. 6th, upon a female prover (not in Allen's Encyclopedia), has also been inserted. For record of proving see Trans. Hom. Med. Soc. of Penna., 1874–78, p. 254.

CLINICAL AUTHORITIES.—*Scrofulous inflammation of eyes*, Fischer, Raue's Rec. 1874, p. 74; *Scrofulous affection of nose*, Raue's Rec., 1870, p. 119; *Ovarian dropsy*, Forcke, Frank's Mag., vol. 1, p. 225; *Uterine displacements*, Preston, B. J. H., vol. 25, p. 497; *Cough*, Müller, Rück. Kl. Erf., vol. 5, p. 681; *Tuberculosis*, Altschul, Rück. Kl. Erf., vol. 5, p. 839; *Scoliosis, distortion of spine* (3 cases), Forcke, Frank's Mag., vol. 1, p. 226; *Cancer*, Schneider, Frank's Mag., vol. 1, p 227.

[1] **Mind.** Dulness of mind and general thickness in head, < when reading aloud.

[2] **Sensorium.** Dizzy; < moving.

[3] **Inner Head.** Headache, a confused sensation, with feeling of heaviness and pressure, especially in forehead, more on r. side, < in warm room, by smoking, hat, reading, writing, motion; > in open air, sitting down or standing in a draft of air.

Sharp pain from below eye up through head to vertex.

Headache beginning under l. eye and passing up through to top of head.

On going to bed slight throbbing pain in head on r. side and upper part of forehead, also at back part on l. side at junction of head and neck.

Headache felt as a cutting from bridge of nose through the occiput.

[4] **Sight and Eyes.** A phenomenon similar to nebula before eyes, except that the objects floating before eyes are bright as sparks of fire, instead of dark specks; after breakfast.

[5] Eyes shut on account of pain and photophobia; lids swollen, discharging copious quantities of pus when forcibly opened; conjunctiva bluish-red and swollen; skin pale; nose thick; eczema of face; submaxillary and

cervical glands swollen and hard; periostitis of one finger and two toes; body emaciated; abdomen large; no appetite. θScrofulous inflammation of eyes.

‖After suppression of menses, protrusion of eyes, enlargement of thyroid gland, palpitation of heart and excessive nervousness. θExophthalmic goitre.

Burning in eyelids.

Trachoma.

[6] **Hearing and Ears.** ‖Roaring in ears.

[7] **Smell and Nose.** Nose dry, stopped as in coryza, more free towards noon.

Coryza, profuse discharge of mucus from nose, and frequent expectoration of mucus from larynx and trachea.

A chronic nasal catarrh becomes worse; discharge usually in mornings, now lasts all day, with a stuffed-up feeling at night; blowing nose gives no relief; discharge thick, yellow or green.

‖Nose thick. θScrofula.

‖Scrofulous swelling of nose, with ulcers and crusts inside.

[8] **Upper Face.** Injected, red face.

Cheek (right) itches, reddens when rubbed.

Vesicles form, which, when rubbed, become raw.

[11] **Taste and Tongue.** Offensive taste in mouth; burning on tongue.

Tongue coated thickly yellow.

[12] **Inner Mouth.** Taste: metallic; bitter; flat, insipid; bad in morning; of peppermint.

Increase of saliva.

Unpleasant dryness of mouth and throat; burning.

Sudden bleeding of gums at 3 P.M.

Mucous membrane of mouth and pharynx bright red or dotted with red, presenting a fine, dense, bright red papular eruption.

‖Submaxillary and cervical glands swollen and hard. θScrofula.

[13] **Throat.** Violent tickling and scraping in throat and nose, with sensation as though he would suffocate; hawking of mucus and cough.

Frequent rattling of mucus in throat and expectoration.

Food seems to push up to throat as if it had not been swallowed.

[14] **Appetite, Thirst. Desires, Aversions.** ‖No appetite. θScrofula.

Very thirsty.

[16] **Hiccough, Belching, Nausea and Vomiting.** Sour and bitter rising from stomach.

Rising up in throat of greasy, acrid, stinging taste.

Violent eructations, some nausea and a qualmish sensation; nausea and vomiting.

Digitized by Google

[17] **Scrobiculum and Stomach.** Tenderness in pit of stomach; at same time a pinching pain in back, over spine, directly behind pit of stomach.

Fulness even after a little food, as if she had eaten too much, a sort of upward pressure; stuffed feeling as if she could not lean forwards.

Stomach full of wind; every breath gives pain as from a weight in epigastrium.

On rising, or at night when turning in bed, heart beats violently, with pain in epigastrium or lower end of sternum.

Uncomfortable feeling in epigastrium, with nausea and headache.

Digestion impaired; dyspepsia atonica.

[18] **Hypochondria.** Dull pain under short ribs.

[19] **Abdomen.** Stuffed feeling in abdomen as if she could not lean forward.

Abdomen swollen. θScrofula.

Abdomen bloated after food or drink; it seems to push upward; even a small quantity of food causes it; may or may not feel hungry, but food soon satisfies her.

Rumbling in abdomen, with slight colicky pains, before stool.

Abdomen when pressed feels like a rubber ball.

A feeling as of a cord drawn connecting anus and navel, with cutting pain every time he straightens up from bent position.

If she happens to pinch abdominal walls, or to crease them, the parts feel sore for a long time.

A feeling of numbness in fleshy part of abdomen, as if asleep, but without the tingling.

Inguinal pains extending across hypogastrium, sides feel stiff, as after a strain.

Feeling in sides, low down, as of needles pricking her; < raising arms and walking; inguinal region sore on walking.

Stitches in r. inguinal region when walking.

[20] **Stool and Rectum.** Bowels not moved for a week; then stools loose; may have two movements, first costive, second sudden and loose, preceded by griping.

Small, hard stool, with sticking and pain as from constriction in anus on passage of feces through it.

Feeling in rectum and especially in anus as if it were compressed, a constriction, as if worms were in it; the stool is easy and painless.

A peculiar feeling in rectum and anus, as if something twisted and turned about in a circle, and something like drops of water flowed down, and as if a screw were boring upward and downward.

Digitized by Google

Urinary Organs. Pain in both kidneys, principally left.

A feeling in fossa navicularis as though the water remained in it and could not be forced out any further, in morning.

‖Urine dark-colored, depositing a thick, white sediment; urine scalds.

Frequent and profuse emission of light yellow urine, having a sweetish smell, and slight milky sediment.

‖Albuminuria with œdema of lower extremities was in some cases temporarily relieved, in other cases entirely cured.

A hard drinker, æt. 45, after catching cold, who had, next day, fever, headache, nausea, vertigo, oppression of chest, œdema of feet, and much albumen in urine, was entirely cured.

‖Albuminuria; diabetes.

Male Sexual Organs. Erections at night, with violent pain and burning in urethra; unable to urinate; tenesmus of neck of bladder.

Prickling itching in urethra, especially in forepart, with frequent urging to urinate, but very little flow.

Crawling tickling in urethra and rectum.

‖Gonorrhœa.

Female Sexual Organs. ‡Severe hysterical attacks, with frequent spasms and syncope; great debility, cachectic appearance, leucorrhœa, anorexia; finally hydrops of r. ovary set in; enormous swelling under border of r. ribs; menses scanty, preceded by painful swelling of r. breast, and followed by an aggravation of the constant and profuse leucorrhœa; three weeks after beginning of treatment there occurred sudden loss of consciousness and discharge of about two quarts of yellowish fluid from vagina, after which swelling subsided and health was entirely restored. θHydrops ovarii.

‖Constant bearing down as if something was coming away; while sitting feels as if pushing something up; she can touch the cervix uteri.

‖On standing erect, disagreeable sensation of pressure and protrusion of rectum; could not walk across room, subject to dysenteric attacks with severe neuralgic and hysteric spasms, constant tenesmus, and white, slimy evacuations every four or five hours; sympathetic fever, tenderness of abdomen, urine high-colored and scanty, disagreeable and painful pressure high up in rectum; fundus and os tincæ on a level. θRetroversion.

‖Complete prolapsus and inversion of uterus after mechanical replacement.

‖Uterine displacements, including ante and retroversion and prolapsus.

Digitized by Google

‖‖Amenorrhœa.

‖Itching and soreness of vulva and vagina; parts much swollen.

Leucorrhœa like boiled starch; when the bowels move the discharge is stringy.

[26] **Respiration.** Shortness of breath: obliged to take a deep breath, with sensation of oppression of chest, and a pressure beneath sternum.

[27] **Cough.** ‖Short hacking cough, with yellowish-white, rather thick expectoration, and at times with pains in chest.

Cough with expectoration of greyish-white, rather tenacious mucus drawn out in threads.

‖Hæmoptysis.

[28] **Inner Chest and Lungs.** Great oppression of chest; is obliged to take a deep breath, which causes feeling of soreness in chest, together with a feeling of oppression, as though expansion of thorax were prevented.

‖Great debility and emaciation; in evening chilliness followed by heat and sweat all night; cough at first dry, later accompanied by greenish, purulent expectoration, containing small, cheesy particles; oppression of chest; inclination to lie on back; sides of chest tympanitic; under clavicle rales and bronchial breathing. ♂Tuberculosis.

‖Phthisis pulmonalis in subjects of relaxed fibre, especially in third stage.

‖Bronchorrœa and chronic pneumonia.

[29] **Heart, Pulse and Circulation.** Running up stairs causes violent beating of heart and pain on top of head.

Heartbeat so violent, it awoke her from sleep; throbbing all over.

Circulation excited; heart beats quickly and seems to force the blood violently through whole body.

Blood-vessels throb all over, even when quiet.

‖Chlorosis.

[30] **Outer Chest.** ⁝Indurated, painless swelling near r. nipple as large as a hazel nut, finally becoming as large as a fist, scirrhous in character, with sharp, lancinating pains spreading from breast to axilla; pain in epigastrium; emaciation; swelling sensitive to touch, and threatens to develope from a cancer occultus to a cancer apertus.

⁝Scoliosis and paralysis of muscles of inspiration on r. side.

[31] **Neck and Back.** Sides of neck feel sore when touched or on moving.

‖Bronchocele.

Small of back as if broken; felt only at night; as if lying in a cramped position.

Dull pain in back on each side about six inches above kidneys, extending through chest.

Digitized by Google

Painful sensation in back and kidneys and lower portion of spine, starting from lumbar vertebræ.

[32] **Upper Limbs.** A rheumatic, bruised, paralyzed feeling in r. upper arm and shoulder.

Painful drawing in tendons and back of r. hand and l. foot.

Right arm weary and as if paralyzed, has to stop writing, in evening.

[33] **Lower Limbs.** Rheumatic pain extending upward from back of l. foot to pelvis, in evening.

Paralyzed and bruised feeling in all the limbs, especially in legs.

Bruised, paralytic sensation in thighs, extending to knees, which are heavy.

[34] **Limbs in General.** Weakness and bruised sensation in all the limbs, with great aversion to moving about.

‖Periostitis on one finger and two toes. θScrofula.

[35] **Rest. Position. Motion.** As if lying in a cramped position.

Inclination to lie on back.

Turning in bed: heart beats violently.

Straightening from bent position: cutting pain from anus to navel.

Standing: in draft, heaviness in head >; erect, sensation of pressure and protrusion of rectum.

Sitting down: heaviness and pressure in head >; feels as if pushing something up.

Raising arms: < feeling in sides as if needle pricking her.

Rising: heart beats violently; abdomen feels sore; back stiff.

Motion: dizziness; heaviness in head <; side of neck feels sore.

Walking: as of needles pricking her <; inguinal region sore on walking; stitches in r. inguinal region; weak, trembling feeling in limbs.

Could not walk across room.

Running up stairs: violent beating of heart and pain on top of head.

[36] **Nerves.** Nervous; hand shakes while sewing; heart beats violently; each beat seems to go into stomach, and cause a nervous, trembling feeling across epigastrium; weak, trembling feeling in limbs on using hands and on walking.

‖Great weakness.

⁝Epilepsy with dementia and paresis of r. arm; bones of skull hypertrophied; scrofula.

[37] **Sleep.** Frequent starting in sleep and waking with a feeling as though paralyzed, the hands and feet could not rest.

Night restless, with frequent waking, many dreams, with easy erections.

Digitized by Google

Dreams: of long past events; of thieves and of fighting with them.

In his sleep it seemed as if he had grown exceedingly large and was thirty to fifty feet high; everything about him seemed small and insignificant.

At night in bed, feels as if back would break; on getting up, abdomen feels sore.

Back stiff on getting up from bed, but > during day.

[38] **Time.** Morning: discharge from nose; bad taste in morning; a feeling in fossa navicularis as though the water remained in it and could not be forced out any further.

All day: discharge from nose; stiffness of back >.

3 P.M: sudden bleeding of gums.

Evening: chilliness followed by heat and sweat and has to stop writing; rheumatic pain from foot to pelvis.

Night: stuffed up feeling; cheek itches; heart beats violently; erections; violent pain and burning in urethra; heat and sweat; small of back feels as if broken; restless; frequent waking; easy erections; as if back would break.

[39] **Temperature and Weather.** Warm room: heaviness in head <.

Open air: heaviness in head >.

Draft of air: heaviness and pressure in head >.

[41] **Attacks, Periodicity.** Every four or five hours: white slimy evacuations.

[42] **Locality and Direction.** Right: feeling of heaviness and soreness; throbbing pain in side of head; stitches in inguinal region; hydrops of ovary; enormous swelling under border of ribs; painless swelling near nipple; scoliosis and paralysis of muscles of inspiration on side; rheumatic feeling in upper arm and shoulder; drawing of tendons and back of hand; arm weary as if paralyzed; paresis of arm.

Left: pain under eye; throbbing pain in back part of head on side; pain in l. kidney; drawing of tendons of foot; rheumatic pain from back of foot to pelvis.

[43] **Sensations.** Sensation as though he would suffocate; food seems to push up in throat as if it had not been swallowed; as if she had eaten too much; stuffed feeling as if she could not lean forwards; pain in stomach as from a weight in epigastrium; abdomen when pressed feels like a rubber ball; as of a cord drawn connecting anus and navel; abdomen as if asleep; sides feel stiff as after a strain; in side as of needles pricking her; as if lying in a cramped position; feeling in anus as if it were compressed; as if worms were in anus; feeling in rectum and anus as if something twisted and turned about in a

circle, something like drops of water flowed down; as if a screw were boring in anus; feeling in fossa navicularis as though the water remained in it; constant bearing down in vagina as if something was coming away, while sitting as if pushing something up; small of back as if broken; as though paralyzed; as if back would break.

Pain: in eyes; in stomach; in epigastrium; in lower end of sternum; in both kidneys; in chest; in top of head; painful sensation in kidneys; in back; in lower part of spine.

Violent pain in urethra.

Sharp pains: through head to vertex.

Lancinating pain: spreading from heart to axilla.

Cutting pain: from bridge of nose through occiput; from anus to navel.

Pinching pain: in back.

Griping: in abdomen.

Colicky pains: in abdomen.

Stitches; in r. inguinal region.

Sticking: in anus.

Severe: neuralgic spasms.

Throbbing pain: in head; upper part of forehead; back part on side at junction of head and neck; all over.

Rheumatic feeling: in arm; in shoulder.

Bruised feeling: in upper arm; in shoulder; in thighs.

Inguinal pains: across hypogastrium.

Burning: in eyelids; in tongue; of mouth; of throat; in urethra.

Dull pain: under short ribs; in back.

Paralyzed feeling: in all the limbs.

Heaviness: in head; in knees.

Soreness: of abdominal walls; of inguinal cord; of vulva; of vagina; of abdomen.

Tenderness: at pit of stomach; of abdomen.

Uncomfortable feeling: in epigastrium.

Confused sensation in head.

Thickness: in head.

Pressure: in forehead; in rectum beneath sternum.

Oppression: of chest.

Scraping: in throat; in nose.

Dryness: of mouth; of throat.

Roaring: in ears.

Numbness: in fleshy part of abdomen.

Tickling; in throat; in nose; in urethra.

Crawling: in urethra; in rectum.

Itching: of cheek; in urethra; of vulva and vagina.

Digitized by Google

" **Tissues.** Symptoms of plethora; general turgescence of peripheric capillary system.
Body emaciated. θScrofula.
Rheumatism without fever.
Scirrhus; early.
Anæmic people, with indurated glands; constitutional syphilis.
Chlorosis, particularly in scrofulous subjects.
Scrofulous affections; rhachitis; exostoses; periostitis; spinal curvature.

" **Touch. Passive Motion. Injuries.** Touch: swelling sensitive; sides of neck feel sore when touched.
Pressure: abdomen feels like a rubber ball.
Rubbing: reddens cheek; vesicles become raw.
Pinching: makes walls of abdomen feel sore for a long time.

" **Skin.** Skin pale. θScrofula.
Short lasting cutaneous eruptions, like urticaria; eczema; lichen.

" **Stages of Life, Constitution.** Scrofulous diathesis.
Mercurial cachexia.
Girl, weak and scrofulous; scoliosis.
Boy, æt. 11; scrofulous epilepsy.
Delicate woman, æt. 36, has only been pregnant once and then aborted, after coitus; ovarian dropsy.
Woman, æt. 44, widow, of psoric constitution; retroversion.
Woman, æt. 48, mother of several children, sanguine temperament, of slender, graceful build, during youth had three times inflammation of lungs, subject to epistaxis, catarrhal diarrhœa, in thirty-second year cessation of menstruation, chest barrel-shaped and elongated, supra and infra-clavicular regions sunken; tuberculosis.
Single lady, æt. 50, suffered from metrorrhagia during climaxis; cancer of breast.

" **Relations.** Compare: *Alumina* (anæmia, profuse leucorrhœa, prolapsus uteri); *Alumen* (swollen vagina, prolapsus uteri); *Caulophyl.* (prolapsus uteri and leucorrhœa from atony; fitful, crampy pains); *Helonias* (vulva itching, prolapsus, leucorrhœa, albuminuria); *Hydrast.* (debility and atony; tenacious profuse leucorrhœa; palpitation); *Graphit.* (chlorosis, leucorrhœa profuse but watery); *Iodum* (red face, irritability; corroding leucorrhœa, emaciation marked); *Kali bich.* (stringy, albuminous leucorrhœa).

FERRUM MURIATICUM.

Chloride or Muriate of Iron. $Fe_2Cl_6 12H_2O$.

The tincture is prepared by dissolving one part by weight in nine parts of alcohol.

CLINICAL AUTHORITIES.—*Enlargement of spleen* (2 cases), Rück. Kl. Erf., vol. 4, p. 917; Schleicher, Rück. Kl. Erf., vol. 5, p. 343; *Chronic diarrhœa*, Michaelis, Frank's Mag., vol. 1, p. 483; *Ascarides* (2 cases), Dixon, Raue's Rec., 1875, p. 163; *Pleurisy*, Schleicher, Rück. Kl. Erf., vol. 5, p. 819; *Omodynia* (2 cases), Plate, Rück. Kl. Erf., vol. 5, p. 898; *Chronic ulcers*, Warren, Times Retros., 1877, p. 25; observations by Bönninghausen.

[1] **Mind.** Loquacity.
Much depressed in spirits.
[2] **Sensorium.** ‖Vertigo. θEnlargement of spleen.
[3] **Inner Head.** ‖Severe neuralgic pains in r. temple and r. side of face.
‖Headache. θAscarides.
Pain in back part of head when coughing.
[4] **Sight and Eyes.** Eyes injected.
Bright redness of margin of lids.
[7] **Smell and Nose.** ‖Itching of nose. θAscarides.
‖Constantly coagulated blood in nose.
[8] **Upper Face.** ‖Face pale. θEnlargement of spleen.
‖Paleness of face, red spots upon pale cheeks.
Face somewhat flushed; cheeks flushed.
Face swollen and livid.
[11] **Taste and Tongue.** ‖Insipid, flat taste in mouth. θEnlargement of spleen.
‖Solid food tastes dry and insipid.
Tongue very much coated.
Tongue swollen and protruded, with ropy mucus from mouth.
Dryness of tongue.
[12] **Inner Mouth.** Palate and interior of mouth burnt, presenting a parboiled appearance.
[13] **Throat.** Extremely severe sense of burning and constriction in throat.
‖Angina tonsillaris.
[14] **Appetite, Thirst. Desires, Aversions.** ‖Anorexia. θEnlargement of spleen.
‖No appetite in morning.

Digitized by Google

‖Unquenchable thirst, or thirstlessness.
‖Longing for acids.
‖Aversion to meat, or anything sour.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Sour belching; particularly after solid food.
‖Bitter eructations after fat food.
‖Vomiting: after eating; after eating eggs.

[17] **Scrobiculum and Stomach.** ‖Stomach somewhat distended. θEnlargement of spleen.
‖Hand riveted to region of stomach, as the principal seat of pain. θGastralgia.
‖Dyspepsia; gastromalacia.

[18] **Hypochondria.** ‖Severe pains in l. hypochondrium; at times in night. θEnlargement of spleen.
‖Spleen enlarged and sensitive to pressure. θIntermittent.

[19] **Abdomen.** ‖Spasmodic constriction of abdominal muscles, as if abdomen were constricted, especially when stooping, so that he can only straighten himself slowly.
Great pain along whole length of colon, < by pressure and any movement of body.
Hypogastrium swollen and very sensitive, especially above pubes.
Piercing pains in hypogastrium.
⁝Typhus abdominalis with extensive ulceration, meteorism, and debilitating fetid discharges.

[20] **Stool and Rectum.** Diarrhœa with pain in limbs.
⁝Chronic diarrhœa with loss of appetite and rapid emaciation.
⁝Diarrhœa with intestinal catarrh in typhoid fevers, also fetid debilitating discharges.
Dysenteric diarrhœa, with considerable pain and tenesmus, evacuations consist of blood and membranous shreds.
Stools dark; two quarts of inky evacuations at one stool.
‖Dysentery, last stage.
Obstinate constipation.
‖Dry cough ending in retching; itching of nose and anus, enuresis, headache, neuralgia, nervousness; ascarides.
‖Ascarides, coincident with bleeding piles.

[21] **Urinary Organs.** ‖Diabetes mellitus.
‖Chronic affections of bladder.
‖Hæmaturia, the hemorrhage occurring from urethra or kidneys.
‖Habitual discharge of phosphates in urine.
‖Enuresis. θAscarides.
Almost complete retention of urine.
Urine scanty.
Deposition of bright red crystals in urine.

[22] **Male Sexual Organs.** ‖Enlarged prostate.

Digitized by Google

[23] **Female Sexual Organs.** ‖During coition soreness and cutting pain in vagina; want of pleasurable sensation.
‖Troublesome metrorrhagia; dysmenorrhœa; leucorrhœa.
[25] **Voice and Larynx. Trachea and Bronchia.** ‖Bronchitis.
[26] **Respiration.** ‖While sitting, loud breathing as if asleep.
Respiration noisy and stertorous; suffocation impending.
Respiration noisy, as in a bad case of croup.
Breathing, especially inspirations, oppressed.
[27] **Cough.** ‖In morning, spasmodic cough with expectoration of transparent, tough mucus, at once > by eating small quantity of food.
‖When coughing: pain in occiput; bruised pain in chest; stitches in chest
‖Spasmodic cough > by eating.
‖Dry cough ending in retching. θAscarides.
[28] **Inner Chest and Lungs.** ‖Stitches in chest with the cough.
‖Bruised pain in chest on coughing.
‖High fever, severe cough, with scanty expectoration, stitching pains in sides of chest, constriction of chest; severe diarrhœa; exudation four fingers in height, with no tendency to decrease.
‖Great weakness and emaciation. θPleurisy.
[29] **Heart, Pulse and Circulation.** ‖Heart affections with hectic; quick, superficial breathing; cough; involuntary sighing; dyspnœa from slight exertion; painful drawing and expansion about apex; tumultuous and fluttering heart-beat; anxiety almost insupportable; small, almost thread-like pulse, occasionally beating double, sometimes intermitting when the heart's action is accelerated.
Pulse small, accelerated; very feeble.
‖Chlorosis; muscular debility; weak circulation.
[32] **Upper Limbs.** ‖Paralytic tearing pain in shoulder-joint, arm, clavicle and muscles, making it impossible to lift arm, > by gentle motion.
‖Slight drawing pain in shoulder, followed by tearing, stitching pains extending to elbow; paralytic lameness of upper arm; pain < from least motion; < at night driving him out of bed; slight > walking about; no swelling.
‖Acute inflammatory rheumatism of r. shoulder-joint, pain deep in socket preventing motion.
‖Mechanical injury to shoulder-joint with rheumatic lameness.
[33] **Lower Limbs.** ‖During day, frequent sudden cramps in limbs.
‖Cramps in calves of legs, particularly at night in bed.
‖Large deep ulcer upon calf of leg, centre black and hard.

Google

‖After gunshot wound received seven years previously, several open sores, involving all the soft parts from knee to ankle; pus thick, greenish, and somewhat offensive; sensibility of parts much deadened.

‖Œdematous feet, drawing, tearing pain, particularly on beginning to walk; after metrorrhagia.

[34] **Limbs in General.** ‖Great weakness and debility in all the limbs, compelling her to lie down. θEnlargement of spleen.

Sudden cramps in limbs.

‖Distortion of limbs.

[35] **Rest. Position. Motion.** Compelled to lie down on account of great weakness.

Sitting: loud breathing as if asleep.

Stooping: spasmodic constriction of abdominal muscles.

Motion: pain in colon <; tearing pain in shoulder-joint >; pain to elbow <; pain in shoulder-joint and socket prevents motion.

Lifting arm impossible on account of tearing pain in shoulder-joint.

Walking: > pain; < tearing pain in feet.

[36] **Nerves.** Exceedingly weak, with an anxious, feverish countenance.

Restlessness.

‖Nervousness and neuralgia. θAscarides.

Unable to speak; apparently unconscious.

‖Irritability of circulatory and nervous system after hemorrhages.

Violent convulsions affecting whole body, which was much contorted; muscles of extremities contracted violently, teeth clenched and ground together; must be restrained upon the couch, and her hold upon those near could not be unloosed until spasm suddenly ceased; duration of attacks about two minutes, that of the intervals three.

[37] **Sleep.** ‖Sleeplessness, or light and restless sleep. θEnlargement of spleen.

[38] **Time.** Morning: no appetite; spasmodic cough.

Day: sudden cramps in limbs.

Night: pain drives him out of bed; cramps in calves.

[40] **Fever.** Skin cold and clammy.

‖Sensation of coldness, alternating with heat, and lasting for hours. θEnlargement of spleen.

‖Dry heat, with tendency to uncover.

Skin hot and disposed to be clammy.

‖Cold anxious sweat with muscular cramps.

‖Strong-smelling night-sweat.

[41] **Attacks, Periodicity.** Convulsions lasting two minutes, intervals three minutes.

Digitized by Google

Coldness lasting for hours.

42 **Locality and Direction.** Right: severe neuralgic pains in temple and in side of face; inflammatory rheumatism in shoulder-joint.

Left: severe pains in hypochondrium.

43 **Sensations.** Pain: in limbs; in abdomen; in occiput; in socket of shoulder-joint.

Great pain: along whole length of colon.

Severe pain: in l. hypochondrium.

Piercing pain: in hypogastrium.

Tearing pain: extending from shoulder to elbow; in feet.

Paralytic tearing pain in shoulder-joint; in arm; in clavicle; in muscles.

Cutting pains: in vagina.

Stitches: in chest.

Stitching pain: in sides of chest, extending from shoulder to elbow.

Neuralgic pains: in r. temple; in r. side of face.

Painful drawing and expansion about apex of heart.

Drawing pain: in shoulder; in feet.

Rheumatism: of r. shoulder-joint.

Cramps: in limbs; in calves of legs.

Bruised pain in chest.

Burning: in throat.

Anxiety almost insupportable.

Soreness: of vagina.

Dry heat.

Constriction: of throat; of chest; of abdomen.

Paralytic lameness of upper arm.

Dryness: of tongue.

Weakness: in all the limbs.

Itching: of nose; of anus.

44 **Tissues.** Hemorrhages of all kinds.

Irritability of the circulatory and nervous systems after hemorrhage.

Scrofula; rheumatism; rachitis and marasmus.

45 **Touch. Passive Motion. Injuries.** Pressure: spleen sensitive; pain in colon <.

Mechanical injury to shoulder-joint.

46 **Skin.** Typhoid eruption.

Phagadenic ulcers.

47 **Stages of Life, Constitution.** Scrofulous boy, æt. 2 years; chronic diarrhœa.

Girl, æt. 19; strong constitution, tendency to nervous affections, after catching cold; enlargement of spleen.

Girl, æt. 20, weakly, pale; pleurisy.

Man, æt. 33, large, strong; omodynia.

Man, æt. 52, laborer; omodynia.

Large, fleshy woman, æt. 60: ulcer on calf of leg.

FERRUM PHOSPHORICUM.

Phosphate of Iron. $Fe_3 2PO4$, $FePO_4$, $12H_2O$.

One of the organic tissue-salts introduced by Schuessler. Needs proving.

This arrangement includes all of Schuessler's Third American edition, with additions from the current literature.

Prepared by trituration.

Good results with the 200th potency have been obtained.

CLINICAL AUTHORITIES.—*Congestion of blood to head*, Raue's Rec., 1875, p. 6; *Headache* (5 cases), Raue's Rec., 1875, pp. 5-6; *Attacks of nausea*, Raue's Rec., 1875, p. 6; *Dyspepsia with vomiting*, Mossa, Allg. Hom. Ztg., vol. 104, p. 51; *Summer complaint with bloody stools*, Goodno, MSS., 1877; *Irritability of neck of bladder*, Hunt, Raue's Rec., 1872, p. 164; *Incontinence of urine*, Parsons, Trans. Am. Mo., vol. 10, p. 466; *Dyspareunia*, Sulzer, Times Retros., 1875, p. 18; *Diphtheria* (2 cases), Morgan, Hah. Mo., 1885, p. 231; *Pneumonia in phthisis*, Goodno, MSS.; *Cough*, Cooper, Raue's Rec., 1871, p. 132; *Cough*, Fischer, Times Retros., 1875, p. 18; *Acute bronchial catarrh*, Goodno, MSS.; *Hæmoptysis of phthisis*, Knerr, MSS.; *Sugillation of foot*, Fischer, Times Retros., 1875, p. 18; *Articular rheumatism*, Plate, Raue's Rec., 1874, p. 253; *Acute synovitis*, C. R. Norton, MSS.; *Debility of children*, Cooper, Raue's Rec., 1872, p. 206; *Measles* (35 cases), Koeck; *Intermittent*, Curtis, MSS.

[1] **Mind.** Very talkative and hilarious; unnatural excitement. Delirium tremens.

‖Sows eat up their young; a transient mania depending upon hyperæmia of brain.

[2] **Sensorium.** Dizziness with constant feeling as if head were being suddenly pushed forward, with danger of falling.

Great dizziness; every thing swims around him; his muscles seemed so weak he could hardly move about.

‖Vertigo caused by congestion to various parts of brain or head.

Relieved symptoms supposed to be due to cerebral venous congestions.

[3] **Inner Head.** ‖Hammering pain in forehead and temples, so severe that she fears an apoplectic stroke; < in r. side, formerly < on l. θDyspepsia.

‖Frontal headache, followed and relieved by nosebleed.

‖Scarcely endurable, dull, heavy pain on top of head during menses which are very profuse.

Digitized by Google

‖Top of head sensitive to cold air, noise and any jar; on stooping, sharp pain through head, from back to front; at times, a feeling as if head were being pushed forward, with danger of falling.

‖Severe headache, soreness in vertex, general soreness of scalp, cannot bear to have hair touched, great nervousness at night.

‖On stooping a sharp pain through head, from back to front.

‖Headache or neuralgia of face with stinging, pressing or throbbing, < from shaking head, stooping and all motion.

‖"Blind headache," in a lady who had at the same time a bearing down sensation in uterus, with a constant dull pain in either ovarian region.

‖Headache with hot, red face and vomiting of food.

‖Rush of blood to head with vertigo.

‖Congestion of brain in children and grown persons; meningitis.

‖Congestion to head with epilepsy.

[4] **Outer Head.** ‖Soreness in vertex, general soreness of scalp, cannot bear to have the hair touched. θHeadache.

‖Top of head sensitive to cold and noise or any jar.

[5] **Sight and Eyes.** ‖On stooping cannot see; seems as if all blood ran into eyes.

‖Blinding headache.

Acute conjunctivitis without suppuration, or discharge of mucus.

Ophthalmia, first stage; marked redness with great pain, and without mucus or pus.

Traumatic conjunctivitis from a bad wound, after case had been badly treated; it lessened the burning, redness and trickling of tears.

Eyes inflamed during dentition.

‖Conjunctivitis and photophobia. θMeasles.

πStye on lower lid of r. eye.

[6] **Hearing and Ears.** Sensitive to noise.

Roaring or buzzing from rush of blood to head.

Inflammatory pain in ear; otitis.

Catarrhal affection of Eustachian tube and ear, often combined with catarrh in chest, or bowels, or both.

‖Painful red swelling of parotids, one side or both. θMeasles.

[7] **Smell and Nose.** ‖Nosebleed of bright blood. θSummer complaint.

Nosebleed: with blood spitting; following and relieving headache; a concomitant of other complaints.

‖Bleeding of nose in children.

Digitized by Google

‖Coryza; at the very beginning.

[8] **Upper Face.** Face earthy, pale, sallow.
Red face, with dysmenorrhœa.
Pain with heat and redness of face.
Hot cheeks with toothache.
Neuralgia in face.

[10] **Teeth and Gums.** Toothache, with hot cheeks.
Congestive or inflammatory toothache or faceache.
Toothache always appearing after eating food; > by cold.
‖Caries dentium.
Complaints during dentition, with fever.
Toothache < by warm, and > by cold drinks.

[11] **Taste and Tongue.** Tongue swollen and dark red.
Inflammation of tongue, fauces and tonsils; redness, pain without exudation.

[13] **Throat.** Constant inflammation of palate, tonsils and pharynx, with dryness, redness and pain.
‖Fever; glistening, flushed eyes; red cheeks; tonsils red and swollen, especially r., on which was a tuft-like exudation, about its centre, and about one-fourth inch in diameter, hanging downwards, the upper attachment looking blackish, next to the tonsils; fetid breath; next day tonsil clear, fever gone, but a similar mass of exudation on posterior wall of pharynx; on day following apparently well, but next morning another patch of exudation appeared on l. side, which finally disappeared on resumption of remedy.
‖Soreness of throat; tonsils red and moderately swollen; some fever; diphtheritic membrane on part of r. tonsil.

[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite.
Poor appetite with attacks of sickness; could hardly get enough to eat after attacks of nausea.
‖Great thirst for much water. θSummer complaint.
Aversion to meat.
‖Aversion to milk. θDyspepsia.
Better from drinking tea.
‖Worse after meat, herring, coffee, cake. θDyspepsia.

[15] **Eating and Drinking.** While eating at table, chill.
After warm food or drinks, toothache, > by cold.
Eating aggravates gastralgia

[16] **Hiccough, Belching, Nausea and Vomiting.** Sudden attacks of "deathly sickness at stomach," coming on at no particular time, sometimes even awaking her out of sleep, and lasting from a half to one hour; appetite poor.
‖After eating, nausea and vomiting of food; vomited matter very sour, setting teeth on edge; vomiting in morning before eating. θDyspepsia.
‖Vomiting. θGastritis. θWhooping cough. θSummer complaint. θIntermittent fever.

Google

Vomiting with the pains.
‖Green vomiting. θPneumonia.
▮Vomiting of blood.

17 **Scrobiculum and Stomach.** Puffed up in region of stomach and hypochondria.
Pain in stomach < after eating.
Acute and chronic gastralgia < by eating and pressure on stomach; vomiting of food.
Acute gastritis with violent pain in region of stomach which is distended; vomiting and fever.
▮Anorexia; aversion to milk; nausea and vomiting after eating; vomited matter so sour that it sets the teeth on edge; < from meat, herring, coffee and cake, particularly sour things; sometimes vomiting in morning before food has been taken; cephalalgia, hammering in forehead and temples, formerly < on l. side, now < on r. side, so severe that she fears she will have an apoplectic stroke; menses profuse and early; stool regular; sleep restless, with anxious dreams; greatly depressed in morning; in evening sensation of constriction, must loosen her clothing. θDyspepsia.
Catarrh of stomach and bowels.

19 **Abdomen.** Colic before stool.
Bellyache with watery diarrhœa.
Inflammatory colic of horses.
Peritonitis.
Abdominal herniæ in persons otherwise robust.
Inflamed and incarcerated hernia.

20 **Stool and Rectum.** ▮Yellow, watery diarrhœa. θPneumonia.
‖Chronic diarrhœa.
Lienterie from relaxation of pyloric muscles.
Stools contain undigested food in consequence of disturbance in the muscular fibres of the stomach.
Lienterie after a catarrh.
Dysentery commencing with violent fever; pain depends upon inflammatory condition, does not intermit and is < from pressure on stomach.
Before stool: colic; no tenesmus or but slight.
During stool: no tenesmus or only slight.
▮Frequent stools, green, watery or hashed, mixed with mucus, scanty; straining at stool, also retching; child rolls its head and moans; eyes half open; face pinched; urine scanty; pulse and respiration accelerated; starting in sleep. θSummer complaint.
▮Stools: of pure blood, bloody mucus, or bloody scum; yellowish, whitish, brown with blood; like bloody fish-brine; green watery or green mucous, with blood, no pain; blood dark or light. θSummer complaint.

Digitized by Google

‖Aggravation: midnight till morning (bloody serous stools); bloody mucus mixed with watery discharges day or night. θSummer complaint.
Cholera depending on an inflammatory state.
Habitual constipation.
Constipation caused by atony of muscular fibres of intestines.
Disposition to prolapsus recti.
Hemorrhoidal troubles and obstinate constipation.
Hemorrhoids, with catarrh of stomach and bowels.

[21] **Urinary Organs.** ‖Bright's disease; diabetes.
‖Hemorrhage from bladder or from urethra.
Cystitis, with violent fever.
‖Frequent desire to urinate, urgent, with pain in neck of bladder and end of penis; must urinate immediately, which > the pain; the above only, or chiefly during day, not at night; < the more he stands.
Enuresis nocturna from weakness of sphincter.
‖Diurnal enuresis, depending on an irritability of trigone and cervix vesicæ, > when pressure of urine is taken off by recumbent posture.
Urine spurts out with every cough.
Retention of urine, with fever in little children.
Complaints before making water.

[22] **Male Sexual Organs.** Seminal emissions.
‖Inflammatory stage of gonorrhœa.

[23] **Female Sexual Organs.** ‖Bearing down sensation in uterus with constant dull pain in either ovarian region.
‖Vaginismus, pain in vagina during coitus; cannot bear examination.
Dysmenorrhœa with accelerated pulse and red face.
‖Menses every three weeks, profuse, with pressure in abdomen and small of back. θDyspepsia.
During profuse menses pain on top of head.
‖Chlorosis.

[24] **Pregnancy. Parturition. Lactation.** ‖During the third month of pregnancy. θHeadache.
‖Cough with ejection of urine; during pregnancy.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Laryngitis and hoarseness from overstraining voice.
‖Much mucus in throat and rattling in chest.
‖Acute bronchial catarrh affecting larger and smaller bronchi.
‖Bronchitis of young children.
Violent fever in beginning of croup.

[26] **Respiration.** Pleuritic stitch with a deep inspiration or cough.

[27] **Cough.** Acute, short, spasmodic and very painful cough.

Google

Tormenting cough when bending head over or touching larynx.

‖Short, dry, hacking cough, with involuntary spurting of urine. θDuring pregnancy.

‖Spasmodic cough every morning when dressing, greatly < by going into open air; fits of coughing produce involuntary micturition.

‖Cough in paroxysms, most at night or during day when asleep.

‖Cough < at night with much rattling of mucus in chest which is also most marked at night; slight fever.

Whooping cough with retching and vomiting.

‖Inflammatory or catarrhal stage of whooping cough.

‖Expectoration of clear blood. θPneumonia.

Hæmoptysis, after concussion or a fall.

[28] **Inner Chest and Lungs.** ‖Catarrhs on chest of children, similar to *Aconite*.

‖Right-sided pleuritic stitch < when coughing and on deep inspiration.

‖Pleuritis and pneumonia, first stage.

Pneumonia, the hyperæmia depending on relaxation of muscular fibres of blood-vessels as long as no exudation has taken place; general heat of body; very little thirst; first stage.

‖Coughs up clear blood; nosebleed at same time. θPneumonia.

‖In a tuberculous woman, æt. 49, pneumonia of l. upper lobe, with well marked crepitation and profuse expectoration of frothy, pink mucus, patient almost moribund.

‖Full, round pulse; congestion; inflammation before any exudation; sputa blood-streaked, caused by least exertion or cold air, when congestion comes in opposite lung. θPhthisis pulmonalis.

‖Hæmoptysis of phthisis.

Phthisis florida.

[29] **Heart, Pulse and Circulation.** Palpitation from congestion. It will not cure thoroughly unless there is a full pulse, but a pulse less bounding than in *Acon.*, and not so flowing as in *Gelsem.* (Farrington.)

‖Pulse full, from 120 to 160. θSummer complaint.

‖Accelerated pulse. θDysmenorrhœa.

Quick pulse.

Anæmia incidental to climacteric period.

[30] **Outer Chest.** Rheumatism in upper thorax.

[31] **Neck and Back.** Crick in neck or back.

[32] **Upper Limbs.** ‖Violent pain in r. shoulder and upper arm, of a drawing tearing character, < by violent motion of arm, > by gentle motion, and so the patient hardly kept

Digitized by Google

the arm still at all; the affected part somewhat sensitive to touch; feeling of deadness in r. hand and loss of strength so that she could not lift heavy things. θRheumatism.

‖Acute rheumatism of r. shoulder-joint; red, swollen and very sensitive to touch.

‖Rheumatism of r. deltoid; unable to work, even to wear his cloak.

‖Swelling of elbow after a sprain, horribly maltreated by leeches and an incision, with general weakness, loss of appetite, fever and earthy, pale face; on upper part of forearm and lower part of upper arm a large swelling, red and hot, not allowing the least motion · insufferable pains, burning; sleepless.

‖‖Rheumatism in wrist.

‖Palms of hands are hot, with children. θRheumatic complaints.

‖Fingers contracted by acute articular rheumatism.

[33] **Lower Limbs.** Inflammation of hip-joint.

‖Severe pain in both knees, shooting down the legs; every motion painful; high fever, quick pulse and increased temperature; sleepless at night from severity of pains; in addition to the knees one joint after another was attacked; joints puffy, very little redness; finally swelling in shoulder-joints and upper thorax; (after *Ferr. phos.* it went downwards from one joint to the other, to the knees and then passed off).

‖Skin on outer side of ankle pale red; foot greatly swollen and sensitive to touch · toes feel as if they were burning. θAcute synovitis.

‖Steady terrible pain all over foot and ankle; cries with the pain; occasional shooting pains up inside of leg; once in a minute or two a shooting pain in foot around ankle. θAcute synovitis.

‖‖An acute very painful sugillation on dorsum of foot.

[34] **Limbs in General.** ‖‖Acute articular rheumatism.

‖Rheumatism attacking one joint after another; joints puffy but little red; high fever.

‖‖Wrist and knee affected by rheumatism.

‖Articular rheumatism < from slightest motion.

Rachitis with no pains in the epipheses.

[35] **Rest. Position. Motion.** Desire to lie down.

Recumbent position: > diurnal enuresis.

Standing: desire to urinate <.

Stooping: sharp pain through head; cannot see; faceache <; produces tormenting cough.

Motion: causes headache; < pain in arm and shoulder; gentle motion > pain in upper arm and shoulder;

Digitized by Google

swelling in arm allows no motion; pain in knees <; articular rheumatism <.
Exertion: sputa blood-streaket.
Desire to get out of bed and run about.
Can hardly move about.

[36] **Nerves.** ‖Great nervousness at night. θHeadache.
‖A general feeling of weakness and desire to lie down. θRheumatism of shoulder.
‖He desired to get out of bed, and wished to run around, but he was so weak that he fell over; very talkative and hilarious.
‖Muscles so weak could hardly move about.
‖Great prostration. θSummer complaint.
Debility of children, with no organic lesion, save a carious condition of teeth; flesh fairly firm, complexion delicate, hair light and curly.
Convulsions with fever.
Epilepsy with congestion to head.
Acute cases of rheumatic paralysis.

[37] **Sleep.** ‖Restless at night. θSummer complaint.
‖Restless sleep at night, with anxious dreams; great depression in morning. θDyspepsia.
Sleepless from severity of pains.
‖Restlessness and sleeplessness. θMeasles.
Cough in day time when asleep.

[38] **Time.** Between 4 and 6 A.M.: sweat.
Morning: vomiting; greatly depressed.
By day: bloody and watery discharges; frequent desire to urinate; cough.
Evening: sensation of constriction, must loosen her clothes.
Night: great nervousness; bloody and watery discharges; cough <; more rattling of mucus on chest; sleepless.
Midnight till morning: bloody serous stools.

[39] **Temperature and Weather.** Open air: < cough.
Warm drinks: toothache <.
Cold air: top of head sensitive to: sputa blood-streaked.
Cold and cold drinks: > toothache.

[40] **Fever.** ‖Chill returning at same time (1 o'clock) every day, while sitting at table.
‖General heat with very little thirst.
‖Fever with vomiting and puffed up stomach.
‖High fever, quick pulse and increased temperature.
‖Skin hot and dry. θSummer complaint.
Fever: with complaints accompanying teething; with gastritis; with cystitis; retention of urine; beginning of croup; with cough; with rheumatism; with convulsions.
‖Intermittent fever with vomiting of food.
In beginning of typhus.

Digitized by Google

Copious night sweats, not relieving the great pains of rheumatism, driving out of bed.
Sweat between 4 and 6 A.M., with increase of pains.
Rheumatism of shoulder.

Attacks, Periodicity. Sudden attacks of sick stomach.
Once in a minute or two: shooting pain in foot and around ankle.
Half an hour: deathly sickness at stomach.
Every morning: spasmodic cough.
Every day at same time: chill.
Every three weeks: menses.
Cough in paroxysms.
Headache at intervals for many years.

Locality and Direction. Right: pain in head < r. side; stye on lower lid of eye; tonsil red and swollen; diphtheritic membrane on tonsil; hammering in side of head; pleuritic stitch; violent pain in shoulder and upper arm; hand numb.
Left: pneumonia of lobe; exudation on side of throat: hammering on side of head.
Shooting: up inside of leg; down legs.
From back to front: pain in head.

Sensations. As if head were being suddenly pushed forward; as if all the blood ran into eyes; toes feel as if they were burning.
As if bursting: toes.
Pain: in eyes; of face; of palate; of tonsils; of pharynx; in stomach; in neck of bladder; in end of penis; in vagina; on top of head.
Insufferable pains: in upper limbs.
Violent pain: in region of stomach; in r. shoulder; in upper arm.
Steady terrible pain: all over foot and ankle.
Tearing pain: in r. shoulder; in upper arm.
Severe pain: in both knees; in head; cries because the pain is so bad.
Sharp pain: through head.
Shooting pains: from knees to legs; up inside of leg; in foot; around ankle.
Pleuritic stitch.
Neuralgia: of face.
Blinding headache.
Hammering pain: in forehead; in temples.
Throbbing in head.
Stinging: in head.
Acute rheumatism: of r. shoulder joint; of r. deltoid; in wrist; in fingers; in knee; in shoulder.
Heavy pain: on top of head.

Digitized by Google

Bearing down sensation: in uterus.
Inflammatory pain: in ear.
Inflammation: of tongue; palate; of tonsils; of pharynx; of fauces; of hip-joint.
Burning: of eyes; of upper limbs.
Heat: of face.
Soreness: in vertex; of scalp; of throat.
Constriction: in region of stomach.
Pressing: in head; in abdomen; in small of back.
Painful swelling: of parotids.
Dull pain: on top of head; in either ovarian region.
Roaring buzzing: from rush of blood to head.
Dryness: of tonsils; of palate; of pharynx.
Dead feeling: in r. hand.

" **Tissues.** Hyperæmia dependent upon relaxation of muscular fibres of blood-vessels.
All kinds of inflammation as long as no exudation has taken place.
First stage of all inflammations as long as there is no suppuration.
In first stage of inflammation, hyperæmia, to the abatement of fever and beginning of sweat.
Relaxation of muscular fibres presiding over voluntary motion.
Diarrhœa from disturbed function of molecules of iron in the muscles of the villi.
‖Bleeding (bright red) from any orifice of body.
Blood red, easily coagulating to a gelatinous mass.
Leukemia; the blood corpuscles are normal as to quantity but lack color.
To be given in true chlorosis as soon as the general condition has been improved by *Calc. phosph.* (Schüssler.)
Varicose veins, in young persons.
Rheumatic fevers; acute articular rheumatism.
‖Scrofula; rachitis; periostitis; cancer.
In the beginning of inflammation of the skin or connective tissue.
Telangiectasy; nævus.
‖Dropsy from loss of blood or other fluids.

" **Touch. Passive Motion. Injuries.** Top of head sensitive to every jar.
Touch: scalp sensitive; on larynx produces tormenting cough; rheumatic shoulder and arm sensitive; foot sensitive.
Pressure: on stomach < gastralgia; diurnal enuresis > when pressure of urine is taken off by recumnent position.
Hyperæmia following mechanical injuries.

Digitized by Google

Injuries: to the eye.
After concussion or a fall: hæmoptysis.
After a sprain of elbow.
In fractures: at the beginning for injury to the soft parts; the adjacent parts are red, hot and painful.

[46] **Skin.** ‖Capillary congestion, with burning of skin, < from severe exercise or in warm room.
Telangiectasy, nævus.
In beginning of measles.
‖Measles with conjunctivitis and photophobia (35 cases).
‖In beginning of small-pox, with violent fever and cerebral congestion.
Erysipelas with intense fever and inflammatory symptoms.

[47] **Stages of Life, Constitution.** Leucophlegmatic temperament.
Young people, varicose veins.
Boy, æt. 5 years, very bright and shrewd; diphtheria.
Boy, æt. 5, very fair; pleurisy and rheumatism.
Girl, æt. 12, mother, æt. 20; headache.
Girl, æt. 17; attacks of nausea.
Young lady, nervo-sanguine temperament; diphtheria.
Miss C., æt. 22; headache during catamenia.
Woman, æt. 29; sanguine temperament, after drinking cold water while overheated, five years ago; dyspepsia.
Mrs. Z., æt. 35; rushes of blood to head.
Woman, æt. 37; nervous temperament; acute rheumatism.
Woman, in third month of pregnancy, has suffered at times for many years; headache.
Workman, æt. 39; unable for a long while to raise up his arm.
A woman, æt. 49; left-sided pneumonia.
Old maid, æt. 75; chronic diarrhœa.

[48] **Relations.** Compare: in fevers *Acon.* (more bounding pulse) and *Gelsem.* (more flowing pulse); ‖in cough with spurting urine.
Compatible: *Kali mur.* (croup, pneumonia, palpitation, typhus; *Kali phosph.* (colic, threatened gangrene); *Calc. sulph.* (hip joint disease); *Calc. phosph.* (chlorosis, hæmorrhoids); *Calc. fluor.* (hæmorrhoids); *Natr. sulph.* (diabetes); *Ant. tart.* (capillary bronchitis).

Google

FERRUM SULPHURICUM.

Sulphate of Iron; Copperas. $FeSO_4, 7H_2O$.

The pure sulphate of iron prepared by trituration.

CLINICAL AUTHORITIES.—*Diarrhœa*, Kafka, Rück. Kl. Erf., vol. 5. p. 414; *Menorrhagia*, Bojanus, Raue's Rec., 1871, p. 155.

[2] **Sensorium.** ‖Severe vertigo. θDiarrhœa.

[3] **Inner Head.** Confusion of head and dull pain through head.
Heaviness and dull pain in upper part of forehead.
Severe burning and pain in head, with thirst.
‖Pressing, throbbing headache, < in forehead, with ringing in ears, and sensation as if all the blood were rushing into head and face; face scarlet red, glowing; > in fresh, open air; < in warm room; toothache. θMenorrhagia.

[6] **Hearing and Ears.** Pain apparently in walls of meatus auditorius externus.

[10] **Teeth and Gums.** ‖Violent, tearing toothache; teeth all sound; > from cold air, or application of ice upon cheek; headache. θMenorrhagia.

[12] **Inner Mouth.** Very troublesome soreness of soft palate.

[13] **Throat.** Taste of salt with smarting in throat.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Bulimia, cannot be satisfied, thirst not marked. θDiarrhœa.
‖Loss of appetite; aversion to meat. θMenorrhagia.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructation of flatus and food with acidity.
Sickness, with vomiting.

[17] **Scrobiculum and Stomach.** Sensation of fermentation or of a noise or movement like purring of a cat in region of stomach.
Cardialgia.
Gastritis with pain after eating and regurgitation of food by mouthfuls.
Inflammatory condition of membranes of stomach.

[18] **Hypochondria.** ‖Pain in region of gall-bladder.

[19] **Abdomen.** Colicky pains in abdomen.
Abdominal pains with flatulence and diarrhœa.

[20] **Stool and Rectum.** ‖Watery, reddish-brown, odorless, painless diarrhœa, with great paleness of skin, emaciation, vertigo, œdema of scrotum and lower limbs, bulimia without thirst, venous murmurs.

Digitized by Google

Diarrhœa, with pains in abdomen.
‖Constipation. θMenorrhagia.
| |Helminthiasis; tapeworm; ascarides.

[31] **Urinary Organs.** Great weakness accompanying Bright's disease.
| |Bloody urine with albuminuria.

[32] **Male Sexual Organs.** ‖Œdema of scrotum and lower limbs.
| |Secondary gonorrhœa.

[33] **Female Sexual Organs.** ‖Menstruation copious, of five to six days' duration, with colic before and during time; headache frequently between menstrual periods; headache pressing, throbbing, especially in forehead, with ringing in ears, and sensation as if all the blood was rushing into head and face; face scarlet red, glowing; > in fresh, open air; < in warm room; often accompanied by violent, tearing toothache, teeth all sound; > in cold air, or from ice upon cheek; < in warmth; loss of appetite; aversion to meat; constipation. θMenorrhagia.
‖Metrorrhagia; leucorrhœa.

[39] **Heart, Pulse and Circulation.** ‖Marked venous murmurs. θChlorosis. θDiarrhœa.

[31] **Neck and Back.** Sensation on skin of back as if he wore a stout woolen flannel shirt.
Pain shooting down r. side of back.

[32] **Upper Limbs.** Arms bent at elbows, and fingers drawn towards forearm by flexure of wrist.
Hands yield to forcible extension, but immediately return to same condition.

[33] **Lower Limbs.** ‖Paralysis of lower extremities.
Knees slightly flexed; toes drawn upwards rigidly.
Pain in sole of l. foot in middle of thick, fleshy, anterior part and at same time an aching pain through lower part of leg.

[34] **Limbs in General.** Limbs very painful, especially feet and calves, where the pain is distracting.
Contractions in arms, hands and feet.

[36] **Nerves.** | |Chorea.

[39] **Temperature and Weather.** Warmth: toothache <.
Warm room: face red and glowing.
Cold air: toothache >.
Ice: toothache >.
Fresh open air: face red and glowing, >.

[40] **Fever.** Feeling of general heat and disposition to sweat with a sensation on skin of back as if he wore a stout woolen flannel shirt.

[42] **Locality and Direction.** Right: pain shooting down side of back.
Left: pain in sole of foot.

Digitized by Google

[45] **Sensations.** As if all the blood were rushing into head and face; sensation of fermentation, or of a noise or movement like purring of a cat in region of stomach; sensation on skin of back as if he wore a stout woolen shirt.
Pain: in head; in walls of meatus auditorius externus: after eating; in region of gall-bladder; in abdomen; shooting down r. side of back; in sole of foot; in middle of thick, fleshy part; in lower limbs.
Distracting pain: in feet and calves.
Tearing pain: in tooth.
Colicky pains: in abdomen.
Throbbing: forehead.
Aching pain: through lower part of leg.
Smarting: in throat.
Burning: in head.
Soreness: of soft palate.
Feeling of general heat.
Dull pain: through head; in upper part of forehead.
Contractions: in arms; hands; in feet.
Pressing: forehead.
Confusion: of head.
Ringing: in ears.
Heaviness: in upper part of forehead.

[46] **Tissues.** ‖Emaciation. θDiarrhœa.
:Local atony; disposition to congestions, nettle-rash, aphthæ.
;Relaxed condition of ligaments; joints easily dislocated; hernia.
Passive bloody or mucous flux, from genitals or alimentary canal.
Hydrops; scrofula.

[47] **Skin.** ‖Great paleness of skin. θDiarrhœa.

[47] **Stages of Life, Constitution.** Boy, æt. thirteen months; diarrhœa.

[48] **Relations.** Compare: *Phosphor.* (regurgitation of food in particles); *Caustic.* (fermentation in abdomen); *Cina* (worms).

FILIX MAS.

Male Fern. *Filices.*

"Galen, Theophrastus, and Avicenna speak of it as a vermifuge medicine. Dioscorides adds to this its capability to induce sterility and abortion."

Fragmentary provings by Berridge, Med. Inv., N. S., vol. 3, p. 282.

The tincture must be prepared from the fresh root; "old preparations and tinctures won't do. The best time for curing tapeworm is, therefore, the summer season, when the root of Filix mas may be obtained in a fresh state. It is grated and taken in the course of the forenoon, to the amount of an ounce. Usually in the afternoon, the tapeworm, rolled up in a lump, takes its departure." (A. H. Z., 80, p. 141.)

CLINICAL AUTHORITIES.—*Tape-worm*, (100 cases reported), B. J. H., vol. 22, p. 322; (24 cases), Ogle, B. J. H., vol. 23, p. 273; (2 cases), Lobeth, Rück. Kl. Erf., vol. 1, p. 804; Müller, Rück. Kl. Erf., vol. 5, p. 388; *Worms*, Werber, Rück. Kl. Erf., vol. 1, p. 804.

[1] **Mind.** ‖Irritable and cross. θWorms.
Great anxiety; loss of consciousness.
[7] **Smell and Nose.** ‖Itching of nose. θWorms.
[8] **Upper Face.** ‖Pale face; blue rings around eyes. θWorms.
[11] **Taste and Tongue.** Furred tongue. θWorms.
[14] **Appetite, Thirst. Desires, Aversions.** ‖Loss of appetite. θWorms.
[15] **Eating and Drinking.** Coffee > the numbness in r. arm.
[16] **Hiccough, Belching, Nausea and Vomiting.** Painless hiccough, starts 10 minutes after meal, lasting 15 to 30 minutes.
Nausea, vomiting and diarrhœa.
[18] **Hypochondria.** Tightness in l. hypochondrium, extending forward to middle line, causing difficulty of breathing, in a warm room, in the evening after sunset; > walking in open air; kept her awake in bed till 1 A.M., on awaking next morning, the same; > after a Turkish bath.
[19] **Abdomen.** Bloating of abdomen.
‖Gnawing and boring in bowels, < eating sweet things.
Abdominal pains.
[20] **Stool and Rectum.** Ineffectual urging to stool.
Pappy stools.
‖Gnawing and boring in bowels, < eating sweet things; constipation; loss of appetite; furred tongue; pale face;

Digitized by Google

blue rings around eyes; itching of nose; irritable and cross. θ Worms.

‖Symptoms indicative of worms, particularly when constipation is present.

‖A woman who had repeatedly passed segments of tapeworm was seized with severe colic which quickly disappeared under Filix mas, and was followed eight days later by discharge of tape-worm, 50 inches in length.

[25] **Female Sexual Organs.** Menstrual function stimulated.

[31] **Pregnancy. Parturition. Lactation.** Causes abortion.

‖Sterility.

[32] **Upper Limbs.** Numbness of back of r. wrist, extending up radial side of arm to just above elbow; felt as if the use of the limb would go; then the same feeling in l. wrist, but transient and slighter; afterwards the same in a small spot on r. vertex, rather anteriorly; afterward in anterior r. shoulder; the numbness seemed to be in the bone in every case.

[37] **Sleep.** Restless and sleepless at night.

[38] **Time.** Evening after sunset: tightness of l. hypochondrium.

[39] **Temperature and Weather.** Warm room: tightness of l. hypochondrium.

Open air: > tightness of hypochondrium.

Turkish bath: > tightness of l. hypochondrium.

[40] **Fever** ‖Worm fever.

[41] **Attacks, Periodicity.** 15 or 30 minutes: hiccough.

[42] **Locality and Direction.** Right: numbness in arm; numbness of wrist, extending up arm; numbness in small spot on vertex; numbness in shoulder.

Left hypochondrium: tightness in; wrist numb.

[43] **Sensations.** As if the use of the limb would go.

Abdominal pains.

Gnawing: in bowels.

Boring: in bowels.

Tightness: of l. hypochondrium.

Bloating: of abdomen.

Numbness: of r. arm; of back; of r. wrist, extending up arm; l. wrist; r. vertex; r. shoulder.

Itching: of nose.

[47] **Stages of Life, Constitution.** A large majority of the patients cured were young girls or women.

FLUORICUM ACIDUM.

Hydrofluoric acid. *HF.*

"This acid is prepared by distilling pure fluor spar (Calcium fluoride) in a state of fine powder with sulphuric acid. As the acid dissolves glass, the distillation must be performed in platinum vessels, and the acid can only be preserved in bottles of the same, or in bottles made of gutta percha."—Amer. Hom. Pharm., 1882, p. 83.

Fluorine appears to be the predominant healing agent in the Missisquoi Springs. The real cures reported to have been made by the waters and clay correspond to the symptoms obtained by the provings, as well as to the clinical results obtained since by the guidance of these symptoms.

Introduced and proved in low and high dilutions (30th), by Hering, assisted by Jeanes, Williamson, Neidhard, Behlert, Campos, Freitag, Geist, Gosewich, Husman, Lippe, Peterson, Kreiner and Thénard. See Résumé, Neue Archiv., 2, 1, 100, and Trans. of Am. Institute, 1846.

CLINICAL AUTHORITIES.—*Alopecia*, Williamson, Raue's Rec., 1872, p. 7; *Caries of temporal bone*, C. Hg., Rück. Kl. Erf., vol. 4, p. 434; *Sensation of cold wind blowing in eye*, Allen and Norton's Oph. Therap., p. 84; Martin, Organon, vol. 3, p. 374; *Lachrymal fistula*, Müller, Rück. Kl. Erf., vol. 5, p. 119; C. Hering, Allen and Norton's Oph. Ther., p. 84; Rück. Kl. Erf., vol. 5, p. 119; *Hardness of hearing*, Gross, Rück. Kl. Erf., vol. 5, p. 159; *Aural itching*, Cochran, Raue's Rec., 1872, p. 81; *Ulceration of ala nasi*, Kirsch, Rück. Kl. Erf., vol. 5, p. 172; *Fistula dentalis*, Hrg., Rück. Kl. Erf., vol. 1, p. 461; *Ulceration of uvula*, Haubold, Rück. Kl. Erf., vol. 5, p. 239; *Disease of liver and dropsy*, Haubold, Rück. Kl. Erf, vol. 2, p. 85; *Ulcerations, necrosis, joint affections*, Rück. Kl. Erf., vol. 4, p. 434; *Diseases of bone*, Rück. Kl. Erf., vol. 4, p. 434; *Syphilis* (2 cases), Laurie, B. J. H., vol. 24, p. 154; (6 cases), Beyer, Rück. Kl. Erf., vol. 5, p. 559; *Coccyodynia*, Mohr, Trans. State Soc. Penna., 1886, p. 158.

[1] **Mind.** Great loss of memory; forgets almost everything.
Forgetfulness every evening; good memory in the morning.
Forgetfulness: in his daily employment; of dates; on making notes he mistakes "right" for "left."
Mental weakness. θAscites.
Mental excitability.
Feeling of indifference towards those he loves best; has no objection to their presence but does not care to converse with them, yet if strangers or mere acquaintaces come in will enter into animated conversation.
Aversion to his own family, bordering on insanity

Digitized by Google

‖Gay disposition, everything is satisfactory.
‖Excessive hilarity; great buoyancy of mind, happy, serene.
‖Greatly depressed in mind. θAscites.
Disposition to be exceedingly anxious, causing sweat; > in morning than in evening.
‖Sensation as if danger menaced him, but without fear.
Felt certain that something dreadful would happen, with dulness in head, mostly in front, l. side, extending into middle of brain.
Fear of apoplexy.
‖Anxiety. θAscites.
Irritable, disagreeable mood.
Moodiness in evening, > in morning.
‖Very ill humored. θAscites.
Discontent and excessive ill humor followed by indifference and forgetfulness, and finally by perfect contentment and uncommonly gay disposition of mind.

[3] **Sensorium.** ‖Congestion of blood mostly to forehead, with dulness in occiput toward night.
Feeling in brain as if on the verge of being struck with apoplexy.
Vertigo with sickness of stomach.
A kind of sinking weakness, has to sit down.
‖Feeling as if in an earthquake.
‖Sensation of weakness, like numbness in head, same in hands.

[3] **Inner Head.** Sensation of numbness in forehead
Congestion of blood to forehead with dulness in occiput towards night.
Heaviness above eyes, with nausea, < by motion.
‖Severe pressing in both temples, from within outward.
‖Compressing pain in temples.
Slight pain in r. temple, five hours after in left.
‖Headache in sutures behind ears at 3 P.M.
‖Headache accompanied by congestion of blood to head, sensation of numbness, with heaviness and compressive pains.
Headache every morning > by micturition.
Sensation of weakness, like numbness in head.
Numbness in head and hands.
‖Dull, heavy headache. θDyspepsia.
‖Congestive headache.
Dulness and pressure in occiput.
‖Dulness of occiput; towards right in occiput.
‖‖Pressure on both sides of occiput.
‖Headache in occiput, with fulness in head.
Headache from nape, extending through centre of head to forehead; also dull feeling in head.
Atrophy of brain.

Google

Outer Head. Sensation of numbness in forehead.
Scalp sensitive.
Pain along the sutures.
Itching of head; baldness.
Congestion of blood to scalp; hair becomes dry, breaks off and falls out.
Falling off of hair.
Hair falling out after typhoid fever.
Alopecia areata.
Must comb hair frequently, it mats so at the end. θPlica polonica.
Scaly eruptions on head.
Crusta lactea, dry, scaly, itches very much, makes bald.
Caries of temporal bone, discharging offensive-smelling pus periodically; whole l. side of head retarded in growth, l. eye seems smaller.
Syphilitic caries of bones of skull.

Sight and Eyes. Clearness of sight and increased power of vision.
Pleasant sensation as though the eyelids were opened wider, or eyes more prominent, whereby circle of vision becomes enlarged, the sight clearer and he feels a luxurious enjoyment in looking at the same things he is accustomed to see every day.
Retinal excitement with red photopsia.
Flashes like lightning before the eyes.
Amaurosis; dreaming of fire.
Dark spot before eye, < from reading.
Heaviness above eyes, with nausea; < on motion.
Pressure, as if behind right ball.
Burning in the eyes.
Pain in l. inner canthus.
Sensation as of a cold wind blowing under lids, even in a warm room, must tie them up and keep them warm.
Sensation of sand in eyes, or as if a fresh wind was blowing on them.
Chronic ophthalmia; feeling of sand in eye, must wink constantly.
Feeling as if he must wink, as if something was in eye that could be rubbed out.
Increased lachrymation.
Itching in canthi.
Fistula lachrymalis.
Lachrymal fistula on l. side, of one year's duration; a clear yellow scab on cheek near inner angle, which is but slightly red and painful to pressure; every three or four days it begins to itch and grow moist, then heals again; sometimes painful before it opens.

Digitized by Google

[6] **Hearing and Ears.** ‖Great sensitiveness in morning to little noises.
‖Hardness of hearing with rheumatism; constant disagreeable ringing in ears and sensation of numbness in bones of face around r. ear.
Hardness of hearing > on bending head back; falling out of hair with sensitiveness of scalp.
‖Difficulty in hearing human voices; numbness of bones around ear.
‖Singing in ears.
‖Ringing in ears and numb feeling in bones of face near r. ear.
‖Intolerable itching in both ears.
‖Itching momentarily > from scratching, but followed by burning.
‖Otorrhœa; discharge copious.
‖Otitis externa; chronic diffuse otitis.

[7] **Smell and Nose.** ‖Fluent coryza.
Cold water produces coryza.
‖Posterior nares feel expanded, during a walk.
Chronic nasitis, with pain; chronic obstruction of nose, with dull, heavy pain in forehead, followed by semi-fluent coryza.
‖Chronic nasal catarrh, with ulceration of septum.
‖Pimple on l. wing of nose perforated and left an opening as large as a pea.
Pimple with extensive inflamed base on top of nose.
‖Red, swollen, inflamed nose. θRhinitis.
‖‖Itching on right side of nose.

[8] **Upper Face.** ‖Pale face.
‖Heat in face, wants to wash it with cold water.
Perspiration, particularly in face.
‖Tubercles in skin of forehead and face, suppurating. θSyphilis infantum.

[9] **Lower Face.** ‖Right lower jaw swollen.

[10] **Teeth and Gums.** ‖The teeth feel warm (left side, upper jaw).
‖Heaviness of the teeth.
Sensation of roughness (lower incisor teeth).
‖Great sensitiveness of teeth; cannot be plugged.
‖Toothache < from cold drink; or > until water becomes warm in mouth.
‖Mouth and teeth coated with mucus in morning.
‖Violent pains at root of r. eye-tooth, with frequent discharge of pus.
‖Fistula at root of tooth, or of gum; teeth exceedingly sensitive.
‖Acrid, foul taste from roots of teeth.

Google

‖‖Rapid caries of teeth.
‖The teeth come late in children; wisdom teeth come late.
‖Great sensitiveness to pressure on gum over r. eye-tooth.
θFistula dentalis.

[11] **Taste and Tongue.** ‖Acrid foul taste from roots of teeth.
‖Tongue always more or less tender, feeling of rigidity in it, with restricted mobility. θSecondary syphilis.
‖Tongue painful when talking.
‖Tingling and numbness of tongue.
‖Tongue vivid red at tip and edges, coated yellow in centre.
‖Tongue whitish and dry. θAscites.
‖Tongue deeply and widely fissured in all directions, with a large, deep, phagadenic looking ulcer in centre.
‖Ulcer on and under tongue.

[13] **Inner Mouth.** ‖Increased flow of saliva; with sneezing; with pricking of tongue.
‖Mouth and teeth are full of mucus, in morning.
‖Teeth and mouth covered with dark mucus. θTyphus.
Viscid, tasteless saliva in mouth; before stool; at night on waking.
‖‖A very painful little ulcer in back part of mouth, on r. side, in angle of upper and lower jaw; very troublesome during mastication and otherwise.

[15] **Throat.** ‖Constriction in throat with difficult deglutition; in the morning, hawking of phlegm mixed with blood.
‖Red blotches, size of half pea, over palate and sides of cheeks, bleeding easily.
‖Tonsils, uvula and soft palate of a livid red color, and greatly swollen.
‖Excessive suffering on swallowing or talking.
‖Sleep disturbed by accumulation of mucus in fauces.
‖Throat irritable and peculiarly sensitive to cold, slightest exposure resulting in inflammatory action with increase of pain and impeded deglutition.
‖Syphilitic affections of fauces and tongue.
‖Soft palate and uvula intensely red and much tumefied; breath fetid, voice nasal, articulation indistinct and unintelligible. θSecondary syphilis.
‖Ulceration of uvula a portion of which seems only attached by a thread; ulceration of nose; fetid smell from nose and mouth; hardness of hearing; stubborn exanthema.
‖Chronic catarrhal inflammation of pharynx and fauces, with ptyalism; especially if syphilitic.

[16] **Appetite, Thirst. Desires, Aversions.** ‖Hunger predominates; great appetite in evening.
‖Loss of appetite. θDropsy.
‖‖Speedy satiety.
‖Thirst; craves refreshing drinks.

Google

Craves cold water, and is continually hungry.
Desire: for highly seasoned and piquant things; for wine.
Aversion to coffee.

[15] **Eating and Drinking.** Complaints worse from sweet things and from coffee.
After eating salmon. θBilious diarrhœa.
During the day, mainly soon after drinking, especially warm drinks, such as tea, cocoa, beef tea, bilious diarrhœa.
Sweat lessened after meals.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea and eructations, with lassitude.
Heartburn and offensive smelling eructations.
Frequent eructations and discharge of flatulency.
Constant nausea, with heat, vertigo and headache.
Sickness and nausea, combined with general heat and heat at stomach.
Bilious vomiting: after slight errors in diet; with increased alvine discharges, preceded by tormina. θChronic diarrhœa.

[17] **Scrobiculum and Stomach.** Feeling of fulness and pressure in epigastrium. θDropsy.
Feeling of weight in stomach between meals.
Heat in stomach before a meal.
Chronic gastritis.

[18] **Hypochondria.** Sensitive to pressure in r. hypochondrium.
Pressing pain in region of spleen and l. arm.
Pinching in region of spleen.
Itching under ribs l. side.
Liver very sensitive to pressure; ulceration of liver; ascites from hepatic induration and portal congestion.
Skin pale, grayish, dry; emaciation; great weakness, can hardly walk across room; mind impaired; anorexia; tongue white and dry; fulness and pressure in epigastrium; great tension and dropsical swelling of abdomen; stools tardy and hard; scanty, dark-red urine; painful urination; scrotum swollen as large as a child's head; penis *S* shaped and terribly swollen, prepuce so œdematous as to completely hide orifice of urethra; dry cough with occasional frothy expectoration; dyspnœa, can only lie in an elevated position; anxiety; sleeps little and but for a short time; violent, unquenchable thirst; longs for refreshing drinks; great œdema of lower limbs, extending from feet to abdomen; great depression of spirits; pulse small and frequent; speech listless; liver enlarged and indurated, particularly l. lobe. θAffection of liver with dropsy.

[19] **Abdomen.** Sensation of distension from flatulence before stool.

Digitized by Google

Sensation of emptiness in region of navel, with desire to take a deep breath; > from bandaging or tightening the clothing.

Burning, pinching pain in stomach and about navel.

Pinching in region of spleen, extending to hip.

Pain from l. side of chest to groin, < by deep inspiration, particularly in groin and back, like a stitch.

Great tension and dropsical swelling of abdomen.

Ascites from hepatic disorder.

Ascites from enlarged and indurated liver, in consequence of drinking whisky.

[20] **Stool and Rectum.** Frequent passage of flatus, and belching, with constriction of anus.

Watery diarrhœa in morning after rising, protrusion of anus during stool.

Offensive, watery, yellowish-brown stools, in the morning after coffee.

Soft, small stools in morning after drinking coffee, and again in evening, with protrusion of hemorrhoids.

Stools pappy, yellowish-brown, fetid, with tenesmus and prolapsus ani.

Very loose, bright yellow stools, with a quantity of mucus, preceded by considerable griping.

Bilious diarrhœa < during day, soon after drinking, especially warm drinks.

Diarrhœa and bilious vomiting.

Before stool: viscid, tasteless saliva in mouth; burning, pinching pain in stomach and about navel; sensation of distension from flatulence.

During stool: protrusion of hemorrhoids; prolapsus ani; pain about navel.

After stool: tenesmus; abdominal pain.

Aggravation: in morning; after coffee; on alternate days, a later hour each time.

Tongue vivid red at tip and margins and coated yellow in centre; appetite good; evacuations never less than twice a day of liquid, bilious fecal matter, intermixed with frothy mucus; no griping and no tenesmus; some sensibility to external pressure in r. hypochondrium; face pale; muscles soft and flabby; bilious vomiting after trivial errors in diet, with aggravation of the diarrhœa, stools on such occasions being preceded by tormina. θChronic looseness of bowels and bilious vomiting.

Six to eight evacuations in twenty-four hours, consisting of "very loose, bright yellow matter and a quantity of mucus," each relief being preceded by considerable griping; dejections occur chiefly during night, or early

Digitized by Google

in morning; during day they mainly occur soon after drinking, especially warm fluids. θBilio-mucous diarrhœa.

Severe pain in lower part of abdomen, with desire to evacuate; rumbling pain most acute in l. side; followed by a free discharge of yellow, bilious matter about 4 A.M., recurring daily for a week at same hour.

‖Tardy, infrequent and hard stools. θDropsy.

‖Constipation, with great varicosis of hemorrhoidal veins.

‖Copious hemorrhage after constipated stool.

‖Protrusion of anus during defecation.

‖Itching within and around anus, in perineum.

‖‖Pruritus ani.

[21] **Urinary Organs.** ‖Frequent and free discharge of light-colored urine, with increased thirst.

πFrequent urging to make water, if he cannot immediately it causes pressing pain on vertex, at other times pressing in temples.

‖Involuntary discharge of urine in night.

‖Urine scanty and dark, painful in passing. θDropsy.

Urine pungent and fetid.

‖Urine alkaline.

‖Whitish or purple-colored sediment.

‖Burning before and after urination, with aching in bladder.

After urination: elastic feeling in urinary organs, with subsequent pleasurable sensation.

[22] **Male Sexual Organs.** ‖Satyriasis.

‖Sexual passion increased, with erections at night during sleep.

‖Sexual passion strong, with violent erections all night, and desire to cohabit.

‖Highly excessive enjoyment and pleasure during coition, which was not the case before.

‖Seminal discharge not so quick and early as usual, but free and without any bad after-feeling.

‖Increased sexual desire in old men, with violent erections at night.

Pollutions without erection.

‖Sudden loss of sexual power; impotence.

Sensation of fulness in both spermatic cords.

‖Yellow drop from urethra in morning.

‖Gleety discharge at night, staining linen yellow.

‖Fulness of glans penis and lower part of scrotum.

‖Dropsical swelling of penis.

Penis curved in the shape of an *S*, and swollen at least four inches in circumference, the prepuce œdematous to such a degree as to hide the orifice of the urethra.

‖Hydrocele.

Digitized by Google

‖Oily, pungent smelling sweat on genitals.
‖Gonorrhœa.

[23] **Female Sexual Organs.** ‖Nymphomania.
‖Obstinate cases of ulcerated os uteri; sharp, darting pains about half an inch in length, like streaks of lightning.
‖Too frequent appearance of menses.
Much congestion of sexual organs.
‖Menses too early; too copious; blood thick and coagulated.
Metrorrhagia with, or in alternation with, difficulty of breathing.
‖Leucorrhœa acrid, excoriating, with itching.
Itching on l. breast and r. side of nose.

[24] **Pregnancy. Parturition. Lactation.** During pregnancy has much congestion of blood to head.
‖Itching, redness and swelling of r. nipple.
‖Nipples very red, sore and cracked.

[25] **Voice and Larynx. Trachea and Bronchia.** Weak, hoarse voice.
Dryness in larynx and trachea.
Itching in larynx, causing hawking and swallowing.
Soreness and increased irritability in larynx, with impeded respiration and wheezing.
A sore, raw feeling in trachea.
‖Goitre.

[26] **Respiration.** Oppression of chest, > when bending backwards.
‖Difficult breathing, afternoon and evening.
‖Wheezing respiration. θHydrothorax.
‖Great dyspnœa, has to be propped up in bed. θAscites.

[27] **Cough.** ‖Short, frequent cough, mostly dry, occasionally some whitish, frothy, mucous expectoration. θDropsy.
Hawking of phlegm mixed with blood, especially in morning.

[28] **Inner Chest and Lungs.** Upper part of chest seems most affected.
‖Phthisis pulmonalis.
‖Dropsy of chest; pulse frequent, small and often irregular; cannot lie down; dyspnœa.
‖Hydrothorax.

[29] **Heart, Pulse and Circulation.** ‖Sore pain at heart; soreness and jerking.
‖Small, frequent pulse. θDropsy.
Pulse somewhat accelerated, only during exercise.

[30] **Outer Chest.** ‖Scaly eruption on chest and arms.

[31] **Neck and Back.** ‖Pain in third cervical vertebra.
‖Pain from nape of neck, extending through centre of head to forehead.
‖Rigidity of nape.

Digitized by Google

Lameness in back, hips and legs.
Aching in os sacrum and lumbar region, > by stretching and bending backwards, especially by pressure.
πPain in os coccygis, sore to touch, on pressure pain extends through to bladder, < from motion and exercise.
‖Bruised pain in sacrum.

Upper Limbs. ‖Pain in r. shoulder-joint; shoulder-joints stiffened by rheumatism.
‖Pain in r. shoulder-joint extending towards fingers, as if air was passing down.
‖Rheumatism, especially venereal; arms and shoulders are very lame and painful.
‖Rheumatic pains in l. arm, from shoulder to elbow, with lameness.
‖Slight lameness in r. arm; has some difficulty in writing.
Trembling in biceps and triceps of r. arm.
‖Numbness and powerlessness of hands.
‖Constant redness of hands, especially palms.
‖Burning in hands.
‖‖Heat and sweat of palms of hands; moist palms regain their healthy condition.
‖Acute pricking, as with needles, in fingers.
‖Pain in l. index finger, as if in bone, now and then during day; whole finger painful internally, particularly in evening.
‖First and second phalanx of l. index finger swollen to four times natural size; first phalanx particularly swollen so that finger is pear-shaped; on dorsum of finger an opening occasionally occurs from which an ichorous, purulent discharge takes place.
Sharp sticking pain at root of thumb-nail.
‖Whitlow.
‖Panaritium; also simple onychia, ulceration having set in.
‖Nails grow more rapidly; crumpled, or longitudinal ridges in them.
‖Sharp sticking pain at root of right thumb nail.

Lower Limbs. ‖Acute stitches in right hip-bone.
‖Lameness in left hip.
‖Coxalgia.
‖Œdematous swelling of legs up to abdomen. θAscites.
‖‖Left leg goes "to sleep" easily.
‖‖Varicosis of lower limbs.
‖Varicose veins upon legs, tend to ulceration.
‖‖Pain in right knee-joint.
‖Synovitis of knee-joint; much pain, followed by dropsy.
‖‖Top of foot œdematous; instep.
‖Chronic ulcerations on feet, particularly about joints and on tibia; bones more or less affected.

Digitized by Google

‖Burning stitches in soles.
‖Feet hot and burn much.
‖Soreness between toes.
‖Soreness of all the corns.

[34] **Limbs in General.** ‖Pain in all the limbs, with weakness and numbness.
‖Limbs go to sleep, although he does not lie on them.
‖Feet and hands excessively moist.

[35] **Rest. Position. Motion.** ‖Many symptoms < when standing, though > when standing than when sitting.
Can only lie in an elevated position.
Cannot lie down.
Has to be propped up in bed.
Limbs go to sleep, although he does not lie on them.
Vertigo compels her to sit down.
Motion: heaviness above eyes with nausea <; accelerates pulse; pain in os coccygis <; nausea; clammy sweat.
Bending backwards: oppression of chest >; aching in os sacrum and lumbar region >.
Bending head back: hardness of hearing >.
Talking: tongue painful.
Can hardly walk across room.

[36] **Nerves.** ‖Increased ability to exercise his muscles without fatigue; is less affected by excessive heat in summer or cold in winter.
‖Sensation of going to sleep of side not lain on.
‖Limbs go to sleep, although he does not lie on them.
‖Lassitude.
‖Great diurnal languor. θSecondary syphilis.
‖Loss of strength; great prostration and fear of death.
‖Coccyodynia, with excessive aching, especially in rheumatic subjects.
Progressive locomotor ataxia.
‖Tabes dorsalis with great excitement of sexual system.

[37] **Sleep.** ‖Drowsiness.
‖Sleep earlier in evening; sudden sleepiness.
‖Loss of sleep in evening, from crowding of thoughts.
‖Sleeplessness, without inclination to sleep; a short sleep suffices and refreshes him.
‖Sleep restless and unrefreshing. θDropsy.
‖Dreams towards morning.

[38] **Time.** Morning: good memory; anxiety >; moodiness >, headache; great sensitiveness to noise; mouth and teeth coated with mucus; viscid, tasteless saliva in mouth; constriction of throat; watery diarrhœa with protrusion of anus; offensive yellowish-brown stools; soft small stools; early, dejections; yellow drops from urethra; hawking of phlegm; dreams.

Digitized by Google

4 A.M.: discharge of yellow bilious matter.
During day: diarrhœa; bilious diarrhœa <; pain in index-finger.
3 P.M.: headache behind ears.
Afternoon: difficult breathing; clammy sweat.
Evening: forgets everything; anxiety <; moodiness; great appetite; soft small stools; protrusion of hemorrhoids; difficult breathing; sleep earlier; loss of sleep from crowding of thoughts; clammy sweat.
Night: congestion of blood to forehead and dulness in occiput towards night; dejections; involuntary discharge of urine; erections; gleety discharge; pains in bones; pains <.

[39] **Temperature and Weather.** Is less susceptible to extreme heat of summer and cold of winter.
Worse in wet, cold weather.
Must keep eyes tied up and warm.
Warm drinks cause bilious diarrhœa.
Teeth feel warm.
Desire to wash hot face with cold water.
Cold drink: toothache <.
Ulcers > by washing or sponging them with cold water, < from heat applied. (*Silic.* has reverse).

[40] **Fever.** Chill entirely wanting.
General heat, with nausea from slightest motion, with inclination to uncover, and to wash with cold water.
Face constantly hot, wants to bathe it continually in cold water.
Heat returns every evening with frequent pulse and thirst, lasting 3 to 4 hours. θIntermittent.
Hectic fever, with sour sweat, emaciation and great debility.
Rheumatic fever, or gout, with sour, clammy, fetid sweat.
Decubitus. θTyphoid fever.
Clammy, sour and unpleasant smelling sweat, mostly on upper body, particularly during exercise in afternoon and evening.
Heat and sweat of palms of hands.
Perspiration particularly in face.
Sweat excessive on feet.
The sweat promotes excoriation and decubitus.
One-sided sweat, left side; sweat on diseased part.
Better during sweat.
Symptoms following typhus fever.

[41] **Attacks, Periodicity.** Frequent urging to make water.
Twice a day: evacuations.
Twenty-four hours: six to eight evacuations.
Every day for a week at same hour: discharge of yellow bilious matter.

Digitized by Google

Every morning: headache.
Every evening: heat returns lasting three to four hours.
Alternate days: aggravation an hour later each time.
Every three or four days: scar begins to itch.

" **Locality and Direction.** Right: pain in temples; numbness of bones around ear; itching on side of nose; lower jaw swollen; violent pains at root of eye-tooth; pressure on gum over eye-tooth; back part of mouth, painful little ulcer; hypochondrium sensitive to pressure; itching on side of nose; pain in shoulder-joint; slight lameness of arm; trembling of biceps and triceps of arm.

Left: dulness in side of head; pain in temple; side of head retarded in growth; eye seems smaller; pain in inner canthus; lachrymal fistula on side; pimple on wing of nose; pressing pain in arm; itching under ribs; lobe of liver enlarged and indurated; pain from side of chest to groin; rumbling pain most acute in side; itching on breast; itching of nipple; rheumatic pains in arm; pain in index-finger; first and second phalanx of index-finger swollen; one-sided sweat.

Right to left: pain in temples.

Symptoms seem to go from below up.

Within outward: pressing in temples.

" **Sensations.** As if danger menaced him; brain feels as if on the verge of being struck with apoplexy; as if in an earthquake; as of a cold wind blowing under lids even in a warm room; as if sand were in eyes; as if he must wink; as if something were in eye that could be rubbed out; as if air was passing down from shoulder-joint to fingers; pain as if in bone of l. index-finger; as if a burning vapor was emitted from pores of whole body.

Pain: in r. temple; in sutures behind ears; from nape extending through centre of head to forehead; in l. inner canthus; in chronic nasitis; in tongue; from l. side of chest to groin; about navel; in abdomen; urine painful in passing; in third cervical verterbra; in os coccygis; in r. shoulder-joint; in r. knee-joint; in all the limbs; in bones.

Violent pains at root of r. eye-tooth.

Severe pain: in lower abdomen.

Stitches: in r. hip-bone; in soles.

Sharp darting pains about half an inch in length, like streaks of lightning

Sticking pains at root of thumb-nail.

Pinching in region of spleen; in stomach; about navel.

Griping in abdomen.

Burning pain: on small spots of skin.

Bruised pain: in sacrum.

Google

Pressing pain: in region of spleen; in l. arm; in vertex.
Compressing pain: in temples.
Rumbling pain: in l. side.
Rheumatism: in arms and shoulders.
Dull heavy headache: in forehead.
Sore pain: at heart.
Aching: in bladder; in os sacrum; in lumbar region.
Burning: in eyes; in ears; in stomach; about navel; before and after urination; in hands.
Soreness: of larynx; at heart; between toes; of all the corns.
Raw feeling: of trachea.
Irritability: of throat; of larynx.
Sensitiveness: of teeth.
Constriction: in throat; of anus.
Oppression: of chest.
Heat: at stomach.
Distension: of abdomen.
Fulness: in head; in epigastrium; in both spermatic cords; of glans penis; lower part of scrotum.
Pricking: of tongue; in fingers.
Tingling: of tongue.
Emptiness: in region of navel.
Singing: in ears.
Ringing: in ears.
Roughness: of teeth.
Dryness: of larynx; of trachea.
Dulness: of head; in occiput.
Pressing: in both temples; in occiput; as if behind r. eyeball; in epigastrium.
Heaviness: above eyes; of teeth.
Weight: in stomach.
Lameness: in back; in hip; in legs; in arms; in shoulders; in l. hip.
Elastic feeling: in urinary organs.
Sinking weakness: in head.
Numbness: in forehead; in hands; in bones around ear; of tongue; of hands.
Sensation of going to sleep of side lain on; legs go to sleep easily.
Itching: of head; in canthi; of fistula on l. side of cheek; in both ears; on r. side of nose; under ribs; within and around anus; on l. breast; on r. side of nose; of r. nipple; in larynx; of skin; of ulcers.

" **Tissues.** Atrophy of brain.
Chronic irritation of mucous membranes.
ǀEmaciation. θDropsy.
ǀMuscles soft and flabby. θChronic diarrhœa.

Alopecia.
Goitre.
Liver enlarged and indurated.
Dropsy of drunkards.
Acute suppurations.
Threatening gangrene in swollen scrotum and penis.
Varicose veins of legs.
Nævus, flat.
Varicose veins, obstinate and long standing cases, especially in women who have borne many children.
Varicose ulcers.
Pains in the bones.
Swelling of bones.
Osteitis.
Exostoses and nightly pains in bones.
Diseases of bones, particularly of long bones; suppurate and get better and worse periodically; pains < at night, with great prostration.
Diseases of bones; particularly of long bones; caries and necrosis, especially when they are of a psoric or syphilitic nature; or from abuse of mercury.
Promotes expulsion of necrotic bones.
Syphilis.

Touch. Passive Motion. Injuries. Touch: sore pain in os coccygis.
Pressure: scab on cheek painful to; r. hypochondrium sensitive; liver sensitive; of clothes >; emptiness in region of navel; > aching in os sacrum and lumbar region; makes pain extend from os coccygis through to bladder.
Bedsores on parts which do not sweat much.
Decubitus. θTyphus.

Skin. Sallow skin.
Skin grayish-white. θDropsy.
Burning pains on small spots of skin.
Itching of skin.
Sensation as if a burning vapor was emitted from the pores of the whole body.
Elevated red blotches.
Several small round blood-vesicles, elevated, of a light carmine color, soft and compressible and resembling little flesh warts.
Skin tubercles on forehead and face, even when ulcerating; elevated red blotches on palm of hands; squamous eruptions on body (psoriasis guttata); syphilitic erosions, mucous tubercles; exostoses and nightly pains in bones.
Frequent small boils; carbuncles.

Digitized by Google

Pustules.
▮Dry cutaneous eruptions.
▮Squamous eruptions on body.
▮Nævus of children (on right temple); capillary aneurism.
▮Erosions, mucous tubercles.
▮Varicose veins and ulcers.
▮Ulcers: painful; < from warmth, > from cold; with copious discharge; with red borders and vesicles.
▮Old cicatrices become red around edges, covered or surrounded by itching vesicles or they itch violently.
▮Bedsores; nævi materni; pimples.
Carious ulcers becoming < from too large or too frequently repeated doses of *Silic.*

[47] **Stages of Life, Constitution.** ▮Complaints of old age, also premature old age, in consequence of syphilitic-mercurial dyscrasia.
Young people look very old.
▮Weakly constitutions, sallow skin, emaciation.
▮Secondary syphilis; syphilis infantum.
Boy, æt. 9, after scarlet fever; caries of temporal bone.
Man, æt. 24, primary sore two years ago which disappeared under use of blue pill, and topical application of black wash, four months afterwards had secondary ulceration of throat, which also temporarily healed under blue pill; syphilis.
Mrs. G., suffering for a month; diarrhœa.
Man, æt. 30, secondary symptoms for five or six months; syphilis.
Man, æt. 32, formerly much troubled with scrofulous eruptions; ulceration of uvula.
Man, æt. 40, subject to indigestion and attacks of bilious vomiting and diarrhœa nearly all his life; diarrhœa and vomiting.
Mr. B., æt. 50; aural itching.
Man, æt. 59, weak constitution, hard drinker, has enlargement of liver; dropsy.

[48] **Relations.** Compatible: after *Arsen.* in ascites from gin-drinker's liver; after *Kali carb.* in hip disease; after *Phos. ac.* in diabetes; after *Silic.* in bone affections.
Compare: *Coca* in increased ability to exercise; *Coffea* in toothache; *Citr. ac.* and *Sepia* in aversion to one's family; *Oxal. ac.* in diarrhœa, < from coffee; *Rhus tox.* and *Ruta* in coccygodynia; *Silic.* in dental fistula, onychia, bone diseases and coccygodynia; *Spongia* and *Kali carb.* in goitre; *Staphis.* in sensitive teeth.

FORMICA RUFA.

The Ant. *Hymenoptera.*

"The name Formica was used by Linnæus as a generic name for a large number of species, all of which appear to common people to be ants. Later entomologists had to separate the species and arrange them under different names, as different genera. The genus to which the old name, Formica, was left by Latrielle, is the one from which we have reports of cures, and from which we made our provings. Ants belonging to the genus Formica, as Latrielle has it, when attacked defend themselves by biting with their mandibulæ, or jaws, and bending at the same time their abdomen downward and forward, they eject from the anus a sharp, sour fluid towards the place which they tried to wound with their pincers. The fluid reddens litmus paper, and contains Formyl acid (Formica or Formic acid) CH_2O_2."

For historical data see N. Amer. J. of H., Aug., 1870, article by C. Hering.

The tincture is prepared from crushed live ants.

The provings were principally made and conducted by Lippe and Hering. See Hering's Monograph, and Allen's Encyclopedia, vol. 4, p. 355. The preparations used were the formic ether, formyl acid, spiritus formicarum, formica rufa and subsericea.

CLINICAL AUTHORITIES.—See Hering's Monograph.

[1] **Mind.** Want of memory; forgetful in evening.
Indisposed, forgetful, morose, fearful and apprehensive.
Exhilarated condition after pain in vertex had abated.

[2] **Sensorium.** Vertigo; all things seem to move to and fro, and reeling of body.
Inclined to be dizzy while eating; giddiness after dressing in morning or on attempting to rise; pain in l. supra-orbital region when going to bed, with dizziness; blackness before eyes, > by sitting down.
Giddy on attempting to rise.
Fulness in head; stupid feeling in head, with sensation of stiffness of neck.
Heaviness of head; sensation as if brain was too heavy and large; congestion to head; pulsations in head.
Dull, sleepy feeling, with heaviness of eyelids, and inability to study.
Dull, uncomfortable feeling in forehead, with heat, fulness and pulsations.
Dulness of head; pressure on both sides between temples and ears.
In all kinds of apoplectic diseases.
Strengthens the brain.

Digitized by Google

[3] **Inner Head.** Forepart of head aches, with the cough.
Sensation like a bubble bursting in forehead, running around l. side of head.
Dull frontal headache, with occasional shooting pains from r. temple into head, in afternoon.
‖Headache in l. forepart of head and temple back to occiput, beginning earlier every day, with a sore pain over eye, increasing gradually, with cutting, extending into ear.
‖Headache with cracking in l. ear, followed by pain in l. temple, then in vertex, with nausea, and abatement of pain in forehead.
‖Sick headache, with shooting, neuralgic pains in temples.
Lancinating in r. temple, from within out.
Dull pain in whole head, with occasional boring in r. temporal region.
Severe pain in vertex, like a stitch from a dull instrument, as from a pressing nail.
Pain on top of head shifting from epigastrium.
Headache on top of head and forehead, particularly through temples.
In morning headache in posterior upper and inner part of head; < drinking coffee; each time during and after washing with cold water.
Tearing pain in occiput.
πPain from neck up to back of head.
πSensation running up into head from body like lightning.
When waking in morning, headache with vomiting, stitches in r. side of chest.
Headache: with nausea; < sitting up in bed; with nausea and vomiting; in afternoon, with occasional fluttering of heart; daily from 12 A.M. to 10 P.M.; < stooping; all day, > after combing hair.
‖Nervous headache.

[4] **Outer Head.** ‖Itching of scalp and head.
‖Hair on head ceased falling out when combing.
‖Contusions of head.

[5] **Sight and Eyes.** Pain in l. supraorbital and l. temporal region, the seat of pain being tender to touch; pain and aching over l. eye; objects appear as if seen through a mist; blackness before eyes, must sit down for a few moments.
‖Dimness of sight.
πAlthough improved, she cannot see, has flickering before eyes, and eyes are very weak.
‖Nebula; leucoma; pterygium.
‖Maculæ and ulcers on cornea.
πPain in eyes mornings when awaking, > by washing.

Digitized by Google

‖Rheumatic inflammation of eyes and sequelæ.
Spasmodic twitching of upper eyelid of r. eye.

[4] **Hearing and Ears.** ‖Ringing, buzzing in ears.
‖Cracking in l. ear, with headache.
‖Difficult hearing; deafness.
‖Earache in both ears, morning getting up.
Pressing pain in ears, with heat.
Slight stitches in l. ear, followed by a small abscess in external portion of meatus auditorius.
πExternal sensitiveness of r. ear and temple.
πAll the parts around ear feel swollen and uncomfortable; slight pain in (right) deaf ear, extending up into temple, with external sensitiveness.
πBehind the ear, pain from neck.
πAll ear symptoms, like cold in head, have been on r. side, where ear is deaf; l. ear occasionally sympathizing.

[7] **Smell and Nose.** Sneezing and fluent coryza.
‖Catarrh.

[8] **Upper Face.** Entire l. side of face and cheek feel as if paralyzed.
πAfter taking first powder, the blister on face, for which the medicine was given, seemed rather smaller and harder; after the second, it was softer and felt sore, and a small pimple appeared on face; the morning after the third, surface of blister was irregular.

[10] **Teeth and Gums.** ‖Grumbling in teeth during afternoon, from draught.
‖Pain in decayed last molar, l. side.

[11] **Taste and Tongue.** πWatery taste in mouth, very offensive to him.
πWater tastes badly, sweetish and insipid.
πRoot of tongue sore; at the tip stinging.

[13] **Throat.** Dry throat all night, could scarcely speak; when she got into a position in which she could sleep a little, the dryness of throat awoke her.
πIn morning on rising very sore throat and earache in both ears.
‖Sore throat in morning with much mucus.
‖Sore throat < l. side.
πPain in neck when hawking and gargling.

[14] **Appetite, Thirst. Desires, Aversions.** πMuch thirst all day, but water tasted badly, sweetish and insipid.

[15] **Eating and Drinking.** πWhile eating and drinking, especially when closing jaws, severe pain in neck.
πAfter drinking tea, copious sweat.

[16] **Hiccough, Belching, Nausea and Vomiting.** πFrequent belching without any relief.
‖Nausea and vomiting.

Digitized by Google

‖Nausea with headache, and vomiting of yellowish, bitter mucus.

℞Vomiting: with diarrhœa, in evening; with cough.

[17] **Scrobiculum and Stomach.** ℞Warmth and burning in stomach, acceleration of pulse, increased urination, increased transpiration, excitement of sexual organs, viscous, stinking urine, with gouty patients.

Burning pain in stomach, with oppression and weight.

‖Constant pressure at cardiac end of stomach, and a burning pain there.

[18] **Hypochondria.** Dull pain in region of spleen.

[19] **Abdomen.** ℞Severe pain in belly, and shuddering chilliness.

Sensation across abdomen as if bruised below navel, also tired feeling in back.

‖Flatulency.

‖Hardening of mesenteric glands.

[20] **Stool and Rectum.** ℞After having a thin evacuation with bellyache, every morning for a week, without much relief from the eruption, there appeared in the evening, at 8 or 9 o'clock, violent diarrhœa and vomiting.

‖Diarrhœa after meals, or only during day, not at night, or day and night, or before midnight.

‖Diarrhœa, with tenesmus; pain in bowels before stool.

Loose diarrhœic stool, which left a desire for another stool, with an uncomfortable feeling in anus, as if the passage was not all through, and more must pass.

Difficult passage of small quantities of flatus in morning; afterwards diarrhœa-like urging in rectum.

‖Diarrhœa of children.

℞In the morning second stool.

‖White stools.

‖Constipation and sensation of constriction of sphincter ani.

Pressure in rectum, < evening and in bed.

Painful desire in anus and rectum for stool, which, however, will not pass.

‖Tapeworm.

[21] **Urinary Organs.** Paralysis of bladder.

[22] **Male Sexual Organs.** Long-lasting erections after urinating in morning.

‖Seminal emissions.

‖Weakness of sexual organs.

‖Scanty ejaculation with incomplete erection.

A kind of nervous, floating and jerking pain in l. half of penis and region of prostate, frequently repeated.

On ascending stairs feeling as if several parts had gone to sleep.

Itching on scrotum.

[23] **Female Sexual Organs.** ‖Uterine complaints.

Digitized by Google

Menses scanty and pale, with bearing down pain in back; 3d day; darker 4th day; crampy pain through hip-joint and pelvis.

Menses appear eight days too soon.

[24] **Pregnancy. Parturition. Lactation.** ‖Lack of milk with nursing women.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Hoarseness with sore throat.

‖Small piece of phlegm in larynx which cannot be brought up by coughing.

[27] **Cough.** ‖Tedious and long lasting; < at night and from motion; with an aching in forehead and a constrictive pain in chest.

‖Violent attacks of cough with vomiting, day and night.

[28] **Inner Chest and Lungs.** ‖Pleuritic pains.

[29] **Heart, Pulse and Circulation.** Uneasy pain in region of heart.

Palpitation of heart; fluttering of heart.

[30] **Outer Chest.** ‖‖Violent penetrating itching at r. nipple.

‖‖Violent prickling, pressing stitches in region of l. nipple; later on l. side of back, but more violent; still later, the same sensation on other parts of body.

[31] **Neck and Back.** πSoreness in neck and up into head; > by external pressure.

πWhile eating and chewing food, especially when closing her jaws, severe pain in l. side of neck, which extended into back of head and particularly behind ear.

πIn morning, on gargling her throat, when hawking, suddenly a violent pain in l. side of nape of neck, extending down l. arm, can scarcely move it, < above elbow; > in evening in l. arm, but it went to r., where it was < than before; on bending head back, could scarcely bring it forward again, on account of pain; whole neck stiff, and very painful up to back of head, < from least motion; on wishing to rise from bed, must press both hands behind ears, cries out on least motion.

πInto the neck pain with least turn or twist.

πAfter sitting up pain in neck < again, > by application of a hot iron.

‖‖Violent itching on l. shoulder-blade.

‖Pain in back.

Severe pain across sacrum and dorsum of each hand, < on motion.

‖‖Affection of spinal cord.

[32] **Upper Limbs.** ‖‖Itching in armpits in morning.

πPain from neck down l. arm; in evening to r.; could scarcely move her arm.

‖‖Severe pain above r. elbow.

Digitized by Google

πPain < in upper arm, above l. elbow.
Rheumatic pain: in r. elbow-joint; in r. forearm and wrist; along course of ulna.
Pain leaves l. arm and goes to right.

[33] **Lower Limbs.** Severe pain through pelvis, as if from one acetabulum to the other.
Bruised pain in hips at night in bed, causing him to change from side to side.
Legs felt as if she had no power in them, sore and tired; sensation across abdomen as if bruised below navel, also tired feeling in back; felt a little giddy.
Lancinating pain in l. knee-joint, waking him from sleep.
Rheumatic pains in knee-joints, < walking.
Cramp in both feet, especially in soles near toes.
‖Gout; gouty pain in limbs.
‖Arthritis vaga.
‖Chronic gout and stiffness of joints.
‖Old atonic gout.
‖Checked foot-sweat. θChorea.

[34] **Limbs in General.** Sensation as if muscles were strained and being torn from attachment.
‖‖Rheumatism appearing suddenly, mostly in joints, with restlessness; patients desire motion, although it makes pain more acute; pains > by pressure; sweat without relief; r. side principally and more severely affected than left.
‖Old local or general rheumatic affections; internal or external.
‖Rheumatic or gouty pains.
‖Stiffness and contraction of joints.

[35] **Rest. Position. Motion.** Sitting: upon bed, headache with nausea <; pain in neck <.
Stooping: headache with nausea.
Sitting down: blackness before eyes >.
Bending head: could scarcely bring it forward again on account of pain.
Could get to sleep if she could get right position.
Pain in hip compels him to change from side to side.
Closing jaws: severe pain in neck.
Attempting to rise: giddiness; pain in neck.
Can scarcely move arm for pain.
Walking: pain in knee-joints.
Ascending stairs: feeling as if sexual parts had gone to sleep.
Motion: cough <; pain in back of neck <; pain across sacrum and dorsum of each hand <; < pain, but patient desires it.

[36] **Nerves.** Languid feeling of whole system, with pain in all

Digitized by Google

the limbs, accompanied by chills and horripilations along spine.
Legs felt as if she had no power in them.
‖Great lassitude and prostration.
General weakness of the whole muscular system.
‖Faintings.
‖Limbs lame; paralyzed.
‖Paralysis.
‖Spasms.
‖A long, horribly maltreated chorea lessened as soon as the foot-sweat, which had been checked, was brought on again by putting feet in a bag with living ants and creating steam with hot stones.
‖Epilepsy.
‖Affections of the spinal cord.
‖Strengthens the nerves.

[37] **Sleep.** πAll night dry throat, woke her out of sleep.
πDisagreeable sweat during night, awoke with clammy skin.
πPassed a dreadful night; pains suddenly return with violence, only lessening somewhat after midnight.
πCould get to sleep if she could get the right position.
‖Wakes up early and feels that she has had sufficient sleep.
‖When awaking in morning: headache; vomiting, with headache; pain in eyes; stitches in ear.

[38] **Time.** Morning: after dressing, giddiness; headache; headache with vomiting; pain in eyes; earache; dry throat; sore throat; difficult passage of small quantities of flatus; second stool; long-lasting erections after urinating; violent pain in l. side of neck; itching in armpits; sweat.
Day: headache; diarrhœa; cough with vomiting.
Afternoon: shooting pain in r. temple; headache with nausea and fluttering of heart; grumbling in teeth.
Evening: forgetful; vomiting with diarrhœa; pressure in rectum <; pain in arm >; pain goes from l. to r. arm.
Night: dry throat; diarrhœa; cough <; cough with vomiting; bruised pain in hip.
After midnight: pains >.

[39] **Temperature and Weather.** Creating steam with hot stones in a bag of live ants brought back foot-sweat.
Hot iron > pain in neck.
Cold water: headache < during and when washing with cold water; renews burning pains.
‖Great liability to take cold.
‖Consequences of cold and wet; cold bathing; damp weather.

[40] **Fever.** πShuddering chilliness with pain in belly.
πClammy skin, awaking her.

Digitized by Google

πDisagreeable sweat during night.
πPerspired for about half an hour, but without slightest amelioration of pain in arm.
πAt noon, after drinking tea, copious sweat without relief.
‖Sweat without relief.

41 **Attacks, Periodicity.** Frequently repeated pains in l. half of penis.
Attacks: of violent cough with vomiting.
Every morning: thin evacuation with bellyache.
Earlier every day: headache.
Daily from 12 M. to 10 P.M.: headache with nausea.
Third day: menses pale and scanty with bearing down pain in back.
Fourth day: menses darker.

42 **Locality and Direction.** Right: shooting pains in temple; lancinating in temple; boring in temple; stitches in side of chest; spasmodic twitching of upper eyelid sensitiveness of ear and temple; violent penetrating itching at r. nipple; pain from neck down arm; severe pain above elbow; rheumatic pain in elbow-joint, in forearm, in wrist, along course of ulna.
Left: pain in supraorbital region; sensation of bubble bursting in side of head; headache in forepart of head and temple; cracking in ear; pain in temple; pain and aching over eye; stitches in ear; small abscess on external portion of meatus auditorius; side of face and cheek feel as if paralyzed; pain in decayed molar; side of throat sore; a kind of nervous, floating, jerking pain in half of penis; prickling stitches at nipple; on side of back; closing jaws severe pain in neck; severe pain down arm; violent itching of shoulder-blade; pain from neck down arm; pain in upper arm above elbow; lancinating pain in knee-joint.
‖Pains l. then r.; r. then left.

43 **Sensations.** As if brain was too heavy and large; sensation like a bubble bursting in forehead; like a stitch from a dull instrument in vertex; as from a pressing nail in vertex; l. side of face and cheek as if paralyzed; as if bruised below navel; as if male sexual organs had gone to sleep; as if muscles were strained and being torn from attachments; legs feel as if she had no power in them.
Pain: in l. supraorbital region; in forepart of head; in l. temple; in forehead; in vertex; from neck up to back of head; over l. eye; in both ears; in r. ear extending up into temple; from neck behind ear; in decayed last molar l. side; in neck; in bowels; down l. arm; in back; in upper arm above l. elbow; from l. arm to r.; in all limbs.

Digitized by Google

Severe pain: in vertex; in neck; in belly; across sacrum and dorsum of each hand; above r. elbow; through pelvis as if from one acetabulum to the other.
Lancinating: in r. temple; in l. knee-joint.
Tearing pain: in occiput.
Cutting pain: in head; into ear.
Shooting pains: from r. temple into head.
Boring: in r. temporal region.
Stitches: in r. side of chest; in l. ear; in region of l. nipple.
Prickling stitches: in region of l. nipple; in l. side of back; on other parts of body.
Pleuritic pains: inner chest and lungs.
Crampy pain: through hip-joint and pelvis.
Cramp: in both feet; in soles.
Neuralgic pains: in temples.
Rheumatic pain: in r. elbow-joint; in r. forearm; in r. wrist; along course of ulna; in knee-joints.
Gouty pain: in limbs.
Bearing down pain: in back.
Pressing pain: in ears.
Bruised pain: in hips.
Burning pain: in stomach.
Stinging: at tip of tongue.
Sore pain: over eye.
Jerking pain: in l. half of penis; region of prostate.
Nervous floating pain: in l. half of penis; in region of prostate.
Constrictive pain: in chest.
Dull pain: in whole head; in region of spleen.
Uneasy pains: in region of heart.
Soreness: at root of tongue; of throat; in neck up into head; of legs.
Burning: of stomach.
Grumbling: in teeth.
Constriction: of sphincter ani.
Spasmodic twitching: of upper eyelid of r. eye.
Dull frontal headache.
Dull feeling: in head; in forehead.
Dulness: of head.
Fulness: in head.
Pressure: at cardiac end of stomach; in rectum.
Stupid feeling: in head.
Dryness: of throat.
Heaviness: of head; of eyelids.
Stiffness: of neck; of joints.
Fluttering: of heart.
Cracking: in l. ear.
Buzzing: in ears.

Digitized by Google

Ringing: in ears.
Tired feeling: in back; in legs.
Lameness: of limbs.
Itching: of scalp; of head; on scrotum; at r. nipple; on l. shoulder-blade; in armpits.

" **Tissues.** Rheumatic affections; so-called rheumatic inflammation of eyes; aural affections and sequelæ.
Nervous and spasmodic affections.
Nodes around joints, internally and externally.
Watery swellings; dropsy; cachexies.

" **Touch. Passive Motion. Injuries.** Touch: seat of pain tender.
Pressure: soreness in neck and up into head >; of both hands behind ears; > pain in neck.
Contusions; dislocations.
Atrophy after wounds.
Complaints from overlifting.

" **Skin.** Itch; cold tumors; goitre; leprosy.

" **Relations.** Compatible: after *Chamom.*
Compare: *Apis*, *Bryon.* (rheumatism), *Chloral* and *Urtica urens* (nettle-rash), *Dulcam.* (rheumatism), *Frag. ves.* (lack of mammary secretion), *Thrombid.* (diarrhœa.)

GAMBOGIA (Gummi Gutti).

Gamboge. *Guttiferæ.*

Tincture of the resinous gum obtained from a tree native to China.

Proved by Nenning, see Allen's Encyclopedia, vol. 4, p. 373, and Jacob Jeanes in 1840 (not included in Allen's Encyclopædia), also by Hering and Husmann.

CLINICAL AUTHORITIES.—*Diarrhœa*, Berridge, Raue's Rec., 1871, p. 114; Knerr, Organon, vol. 2, p. 115; (2 cases) Conant, Times Retros., 1877, p. 25; *Chronic diarrhœa*, Boyce, Raue's Rec., 1875, p. 147; (5 cases) Hilberger, Kafka, Rück. Kl. Erf., vol. 5, p. 416; *Lienteria*, Brigham, Organon, vol. 2, p. 134; *Cholera infantum*, Hunt, Raue's Rec., 1871, p. 119; Wells, Raue's Rec., 1873, p. 122.

[1] **Mind.** Irritable mood.
Cheerful, talkative, feeling of ease, great lightness of all his motions.
Despondency; sadness.

[2] **Sensorium.** Vertigo during rest or motion; morning when rising.
Confusion of head with a feeling of reeling or motion from side to side.
Heaviness in whole head, with dulness, sleepiness and pain in back.

[3] **Inner Head.** Pain in whole head and beating in forehead towards nose.
Oppressive headache with heaviness in forehead, > in open air, or with heat in whole head and body.
Transitory tearing in l. temple.
Feeling of great coldness in l. temple as from a wet cloth.
Sharp stitches in r. side of head and in temples.
Compressive pain in head from both sides.
Pain in vertex, as if bruised, in forenoon; > in open air.
Heaviness in whole head, with inertia, drowsiness, and pain in small of back.
Heat rises to head, with perspiration.
Gastric headaches.

[4] **Outer Head.** Pain in the coronal suture.

[5] **Sight and Eyes.** Violent burning of eyes and photophobia, evening or afternoon, > from walking in open air, but returning in morning.
Pain in l. eye succeeded immediately by sickness of stomach, and dull, heavy aching and pain in tibia below in-

Digitized by Google

sertion of tendon from patella, then by pain above patella on l. side.
‖Violent itching of eyes in evening.
‖Itching of inner canthi, with discharge of acrid, corrosive tears after rubbing; > in open air.
Smarting of eyes with increased flow of tears.
Pain in both eyes; very severe in eyeballs; sometimes < in one eye, with severe pain in adjoining temple, most in left.
Catarrhal affection of eyes.
Feeling of stickiness and dryness of eyes.
‖Nightly agglutination of lids, burning in morning, photophobia through day, and frequent stitching pain in eyes.
Frequent itching on skin over outer and lower edge of orbit of l. eye.

[6] **Hearing and Ears.** ‖Ringing in l. ear all the time; sometimes hissing.
Lancination in ears.
Pain in both ears, most in l.; also in l. molars, afterwards in r. and in region of articulation of jaw.

[7] **Smell and Nose.** Tendency to hemorrhages from nose and lungs.
‖Violent chronic sneezing in daytime only; feeling of coldness in points of incisor teeth; extremely painful burning in region of liver.
‖Dryness of r. nostril.
Smarting as if a sore pimple existed immediately below r. nostril.
Ulceration of r. nostril, with burning pain.
Much mucus in nose, smelling like pus.

[8] **Upper Face.** Smarting, itching on r. cheek, chin and upper lip.
Swelling of face, especially of eyelids, nose and lips; upper lip remained swollen for twelve hours.

[10] **Teeth and Gums.** ‖Tearing in all the right molars.
‖Sensation of coldness at edge of incisors.

[11] **Taste and Tongue.** ‖Bitter taste in mouth.
Tongue and gums sensitive.
Smarting of tongue; raw, sore feeling.
‖Burning of tongue.
Burning of anterior half or only of tip of tongue, which feels hard.

[12] **Inner Mouth.** ‖Dryness of mouth; clammy, adhesive state of mouth.
Burning vesicles on inner side of lips.
Aphthæ; deep ulcers in mouth, inner side of lips and cheek.
Raw, rough feeling in fauces and at root of tongue.

[13] **Throat.** ▮Pain as from soreness in throat.
▮▮Sore pain in throat, which is felt when even touching outer side of neck.
▮Rawness and burning in throat, constant hawking.
▮Violent stitches in r. side of throat.
▮▮Stinging in r. side of throat during and between acts of deglutition.
▮▮The throat feels swollen.
Difficulty in swallowing.

[14] **Appetite, Thirst. Desires, Aversions.** Appetite good, but a little food satisfies.
Diminished appetite; aversion to food.
▮Thirst after dinner, and especially evenings.

[16] **Hiccough, Belching, Nausea and Vomiting.** ▮Frequent violent empty eructations.
▮Nausea from stomach, when walking in open air.
▮▮Nausea, inclination to vomit, accumulation of saliva in mouth; gulping up of sour water.
Nausea and vomiting, after taking drink or food.
▮▮Frightful vomiting and purging, with fainting.

[17] **Scrobiculum and Stomach.** ▮Empty feeling in stomach and abdomen.
▮Gnawing in stomach.
▮Constant sore pain in stomach.
▮▮Ulcerative pain in stomach, passing off after eating.
▮Acute stitches in stomach.
Cutting pain in stomach.
▮▮Dartings in stomach, causing one to start.
Sticking pains in region of and below cardiac orifice.
Sensation of heat in stomach and abdomen, also at times a feeling similar to a cool and refreshing wind blowing on face when overheated.

[18] **Hypochondria.** ▮▮Burning in region of liver.
Sharp cutting in l. hypochondrium.

[19] **Abdomen.** ▮Pinching in abdomen immediately after eating.
▮Frequent severe pinching in entire abdomen without urging, or, with diarrhœa and burning in anus, with relief of pain.
▮▮Gnawing in a small spot below umbilicus.
Feeling of fermentation in abdomen.
▮▮Rumbling and rolling in bowels.
▮Gurgling in abdomen, as of fluid running from a bottle.
▮▮Rushing sounds in abdomen as from motions of air and fluid feces, as occurs before diarrhœic stools.
▮Inflation and tension of abdomen, with pinching in umbilical region.
Peculiar itching sensation in umbilicus.
▮Ileo-cœcal region painful and sensitive to pressure.

Digitized by Google

In groins sticking, tension; pinching.
Pressing pain at l. inguinal ring.

Stool and Rectum. Profuse discharge of flatus, especially evening and night.
Yellow and green diarrhœic stool, mixed with mucus, preceded by excessive cutting around umbilicus.
Diarrhœa of watery mucus, with colicky pains in umbilicus during stool.
Profuse watery diarrhœa, with colic and tenesmus.
Stool expelled all at once, with a single, somewhat prolonged effort.
Stools of dark green mucus, offensive, corrosive.
Stools very fetid, and come away with a gush all at once; or mucus and blood, with great tenesmus.
Fecal diarrhœa, stools evacuated with great force.
Great relief after stool as though an irritating substance were removed from bowels.
Diarrhœa: < forenoon, or during day; after drinking ale; > from pressing abdomen (cutting pains).
Profuse yellow watery diarrhœa in hot weather, particularly old people.
Acute and chronic diarrhœa; infantile diarrhœa; dysentery.
Summer complaint.
Bloody stools in dysentery.
Lienteric stools.
Diarrhœa, with burning pain and tenesmus of rectum protrusion of anus and constant pinching around umbilicus, sometimes with mucous stools.
Burning in anus after stool; anus sore and excoriated.
Diarrhœa alternating with constipation.
Hard, insufficient stool, with strong urging, pressing and protrusion of rectum.
Hard stool, succeded by burning at anus.
Before stool: sudden urging, with hot pinching throughout abdomen; darting stitches in anus; sensation of fulness in abdomen.
During stool: strong urging, causing stool to pass quickly; much flatus; burning and heat in anus; tenesmus; prolapsus ani; cutting about navel; cold sweat on limbs.
After stool: great relief, thinks she is well, but is soon seized with urging again and stool.
Thin, watery, yellow stool, coming out all at once; < morning and forenoon; before and during stool some pain and urging; after stool great relief. θDiarrhœa.
Stools copious, watery, yellow, or like curdled milk, of offensive, sickening smell, expelled with much force; vomits food undigested. θDiarrhœa during hot weather.

Digitized by Google

Soon after eating irresistible desire to evacuate bowels, which continued as long as there was anything to pass; after these passages great pain in lower bowels, lasting an hour; emaciation; prostration; stools consist of yellow mucus and undigested food. θChronic diarrhœa.

Chronic diarrhœa consequent upon exposure; evacuations occur principally at night, if they occur earlier they are preceded by colicky pains and much rumbling in abdomen; finds relief only after four or five passages; stools are of a chocolate-brown color, containing lumps of mucus, often streaked with blood or mixed with undigested food; great lassitude.

Constant urging to stool with colicky pains; abdomen distended with flatus, and very painful and sensitive to pressure, particularly in ileo-cæcal region; food passes undigested, diarrhœa watery and often mucous; fever towards evening; night sweats; anorexia; great thirst; mind much depressed; twelve to fifteen stools occur daily. θChronic diarrhœa.

Painful, muco-serous, odorless diarrhœa; evacuations occur every hour, preceded and followed by severe pains, causing him to draw up limbs and cry out; tenesmus during each stool causes rectum to protrude about one inch, which, however, returns again in ten or fifteen minutes, after which he is free of pain for about twenty minutes and can sleep; face pale, showing evidences of suffering; skin cool; meteorism; hypogastrium sensitive to pressure; during attack limbs are cool and covered with cold sweat, face red, head hot. θDiarrhœa.

Diarrhœa coming on at night; stools mixed with lumps of mucus and blood.

Watery, greenish stools mixed with mucus; griping before forcible and profuse stool. θCholera infantum.

Lienteria for a month; emaciated almost to a skeleton; bowels seemed to hold nothing; stools very fetid, and come away with a gush, nearly all of stool at a time; often gurgling sounds are heard as if water were passing through a bunghole.

Dysentery with tarlike discharge; dark blood with menses; general weakness of whole body.

Itching, smarting, as from a pustule three-quarters of an inch from anus on left.

Urinary Organs. Stitches in l. kidney.

Increased secretion of urine, or diminished in dropsy, with emission of a few drops at a time.

Emission of a few drops of urine at a time, then intermitting, and finally returning, with burning at orifice.

Urine smells like onions, scenting the room.

Digitized by Google

[28] **Male Sexual Organs.** Gleety discharge agglutinating orifice of urethra.

[29] **Female Sexual Organs.** ||Menses too early and too profuse; long lasting.
||Leucorrhœa.

[25] **Voice and Larynx. Trachea and Bronchia.** Tickling in larynx and trachea from epiglottis to pit of throat.
Sensation of scratching in larynx.

[26] **Cough.** Dry cough, hoarseness and hawking of phlegm.
Severe cough at night, compelling him to sit up, with easy expectoration of mucus.

[28] **Inner Chest and Lungs.** ‖Pressure in middle of chest.
Sensation of pressure and weight in chest, dull pains or sharp stitches in chest, oppression of chest.
Repeated, extremely painful, stitches in sternum.
Feeling of fulness and soreness under upper third of sternum.
||Stitches going from both sides of chest towards each other.
||Pain in chest as if it were all raw.
||Sensation of soreness in every part of chest.
Congestion of blood to chest; expectoration of blood.

[30] **Outer Chest.** Pain in r. clavicle.
‖Weight on chest, causing sleeplessness.
‖Repeated extremely painful stitches in sternum.
Painful stitch from ribs to axilla, arresting the breathing.
Pain cutting and heavy in r. side, about the sixth rib, apparently in integuments.
Pain about fourth and tenth dorsal vertebræ and cutting pain in r. side below edge of pectoralis major, before it leaves the thorax to pass to humerus, subsequently in nearly same situation on l. side.

[31] **Neck and Back.** Pain down r. side of neck.
Pain and itching between the shoulders.
Stitches in left kidney.
||Pain in small of back, as if bruised or as if sprained.
Pain across lumbar vertebræ.
Cutting pain across top of sacrum and in l. hip, also in muscles just above sacro-iliac symphysis on l. side.
‖Repeated gnawing in coccyx. #Coccyodynia.

[32] **Upper Limbs.** ‖Pain in shoulders; tearing.
||Stitch on top of r. shoulder.
Pain in r. shoulder, clavicular junction.
||Stitching pains in upper limbs, come on or are < in evening.
Aching of r. arm and biceps flexor cubiti.
||Stinging and numb feeling in ball of r. thumb.
Severe aching pain in upper joint of little finger of l. hand.
Papulæ on both hands, at first pale, afterwards red.

Google

[35] **Lower Limbs.** Severe aching pain deep in hip, and severe cutting pain about trochanter major.
Aching in and about the knees.
Sharp cutting pain in r. shin, midlength of tibia.
Pain in r. fibula just above ankle-joint.
‖Cramp in calf, with contraction of toes.
‖Heaviness and languor of feet.
Pulsating pains in three middle toes at night in bed.
Sticking pains and soreness in integuments over large joint of great toe l. side, and afterwards of skin on back of great toe, same side.

[36] **Rest. Position. Motion.** Many symptoms come on while sitting, and pass off during motion in open air.
Rest: vertigo.
Cough compels him to sit up.
Pain causes him to draw up limbs.
Motion: vertigo.

[36] **Nerves.** ‖Much lassitude and debility; emaciation.

[37] **Sleep.** ‖Sleepiness, great inclination to sleep.
‖Sleep broken by anxious dreams.
‖Anxious, vexatious dreams.

[38] **Time.** ‖The conditions are especially apt to occur toward evening or at night.
Day: photophobia; chronic sneezing; diarrhœa <.
Morning: vertigo when rising; burning of eyes; sharp cutting in hypochondrium: thin, watery stools <.
Forenoon: diarrhœa <; thin, watery stools <.
Afternoon: burning of eyes.
From 6 to 8 P.M.: internal and external coldness lasting from a quarter to two hours.
7 P.M.: paroxysm of intermittent fever.
7 P.M. till 4 A.M.: violent shaking.
Evening: burning of eyes; itching of eyes; thirst; profuse discharge of flatus towards evening; fever; stitching in limbs <; violent itching.
Night: agglutination of lids; profuse discharge of flatus; evacuations; sweats; diarrhœa comes on at night; severe cough; pulsating pains in toes in bed; biting as of ants; coldness lasting all night; shaking chill at night; paroxysm of fever; violent itching.

[39] **Temperature and Weather.** Open air: headache >; pain in vertex >; burning in eyes >; itching of inner canthi >; nausea when walking.

[40] **Fever.** Chilliness is accompanied by empty eructations, yawning, thirst, pain in small of back, biting as of ants over whole body (by night), excessive stitches in ears, sensation of elongation of incisors.
Internal and external coldness from 7 to 8 P.M., lasting from a quarter to two hours, or whole night to 5 A.M.

Google

‖Violent chill, beginning in back.
‖Violent shaking at 7 P.M., beginning in back, with external coldness of whole body, continues till 4 A.M.
Sudden shaking chill at night, waking him from sleep, and as suddenly disappearing.
Chill for two hours with chattering of teeth and violent thirst; skin is warm to touch.
‖Increased heat with anxiety, flushes and perspiration.
‖Heat always slight, often wanting. θIntermittent fever.
Sweat over whole body on awaking at 4 A.M.
‖Night-sweat all over.
Intermittent occurs while diarrhœa is prevalent; paroxysm consists almost wholly of cold stage; the others being light or wanting.
Fevers of intermittent or remittent type, consisting of chill, fever and sweat.
‖Paroxysm 7 P.M.; evening 6 to 8 P.M., lasting all night.
Type.—Quotidian; tertian; double tertian; intermittent often becomes remittent; postponing oftener than anticipating.

41 **Attacks, Periodicity.** At times: feeling of cool wind blowing on face.
Every hour: evacuations.
Every day: twelve to fifteen stools.
For one hour: great pain in bowels, after stool.
For two hours: chill.
For twelve hours: upper lip swollen.
For one month: lienteria.

42 **Locality and Direction.** Right: sharp stitches in temple and side of head; pain in molars; dryness of nostril; smarting as of a pimple below nostril; ulceration of nostril; smarting, itching of cheek; tearing in molars; violent stitches in side of throat; stinging in side of throat; pain in clavicle; pain in side; pain below pectoralis major; pain down side of neck; pain in muscles just above sacro-iliac symphysis; stitch on shoulder; pain in shoulder, clavicular junctures, aching of arm; cutting pain in shin; pain in fibula.
Left: tearing in temple; coldness in temple; pain in eye; pain above patella on l. side; itching of orbit of eye; pain in eye and temple; ringing in ear; pain in ear; pain in molars; pressing pain in inguinal ring; stitches in kidney; pain on side; cutting pain in hip; aching pain in upper joint of little finger; sticking pains in joint of great toe.

43 **Sensations.** Feeling as of reeling; vertex as if bruised; coldness in temple as from a wet cloth; as if a sore pimple existed immediately below nostril; pain as from

Digitized by Google

soreness in throat; gurgling as of fluid running from a bottle; rushing sounds in abdomen as from motions of air and fluid feces; as if chest were raw; small of back as if bruised or sprained; biting as of ants over whole body; incisors as if elongated.

Pain: in back; in whole head; in vertex; in coronal suture; in l. eye; in tibia; above patella on l. side; in both eyes; in both ears; in molars; in region of articulation of jaw; in throat; in ileo-cæcal region; in chest; in r. clavicle; about fourth and tenth dorsal vertebræ; down r. side of neck; between shoulders; small of back; across lumbar vertebræ; in fibulæ.

Severe pain: in eyeballs; in temple; in bowels; before and after evacuations.

Lancinating: in both ears.

Cutting pain: in stomach; in l. hypochondrium; around umbilicus; in r. side; across top of sacrum; in l. hip; about trochanter.

Tearing: in temple; in r. molars; in shoulders.

Pinching: in abdomen; in groins; around umbilicus.

Dartings: in stomach.

Sharp stitches: on side of head; in temples; in chest.

Stitches: in ears; in r. side of throat; in stomach; in anus; in l. kidney; in sternum; from both sides of chest towards each other; from ribs to axilla; on top of r. shoulder.

Stitching pain: in eyes; in mouth; in upper limbs.

Sticking pains: in region of and below cardiac orifice; in groins; in integuments over great toe.

Stinging: in r. side of throat; in ball of thumb.

Gnawing in stomach: below umbilicus.

Colicky pains: in umbilicus; before evacuations.

Griping: before stools.

Cramp: in calf.

Ulcerative pain: in stomach.

Violent burning: of eyes.

Burning: in eyes; very painful in region of liver; ulceration of r. nostril; of tongue; of anterior half or only of tip of tongue; in vesicles: on inner side of lips; in region of liver; in rectum; in anus; at orifice of urethra when urinating.

Pressing pain: at l. inguinal ring.

Dull pains: in chest.

Aching: in tibiæ; in r. arm; upper joint of little finger; deep in hip; in and about knees.

Pulsating pains: in three middle toes.

Beating: in forehead.

Compressive pain: in head.

Digitized by Google

Smarting: of eyes; below r. nostril; of r. cheek; of chin; of upper lip; of tongue; on left of anus.
Sore feeling: of tongue; in throat; at stomach; in anus; under sternum; in every part of chest.
Sensitiveness: of tongue; of gums.
Heat: in whole head and body; in stomach.
Raw feeling: in fauces; at root of tongue.
Stickiness: of eyes.
Dryness: of eyes; of nostril.
Ringing and hissing: in ears.
Pressure: in middle of chest; in chest.
Weight: in chest.
Heaviness: in whole head; in forehead; of feet.
Oppression: of chest.
Fulness: under sternum.
Tension: of abdomen; in groins.
Contraction: of toes.
Empty feeling: in stomach and abdomen.
Weakness: of whole body.
Numb feeling in ball of r. thumb.
Tickling: in larynx; in trachea, from epiglottis to pit of throat.
Biting as of ants: over whole body.
Scratching: in larynx.
Itching: on skin over outer and lower edge of orbit of l. eye; of eyes; of inner canthi; of cheek; of chin; upper lip; in umbilicus; on l. of anus; between shoulders.
Coldness: in temple; in points of incisor teeth.

" **Tissues.** Emaciation.
Feeling of soreness all over body; rheumatism.
Pain as if bruised.
Congestion to head, lungs and female sexual organs.
Profuse watery diarrhœa, particularly with old people.
Anasarca; ascites.
Swelling and redness of affected parts.

" **Touch. Passive Motion. Injuries.** Touch: outer neck sensitive; abdomen sensitive.
Pressing abdomen: > cutting pains; abdomen sensitive to pressure.
Gentle rubbing: > itching.

" **Skin.** Itching on various parts of surface pleasantly > by gentle friction.
Violent itching on various parts of body; burning after scratching, < evenings and nights.
Itching and formication here and there all night.
After scratching, burning and ulcerative pain, with swelling and redness of parts, < evening and night.
Biting like from ants over whole body < evening and night.

Digitized by Google

Itching blisters on both hands, first pale, then red. Pemphigus.

[47] **Stages of Life, Constitution.** Diarrhœa of old people.
Boy, æt. 14 months, suffering for four days; diarrhœa.
Boy, æt. 2, has suffered 10 days; diarrhœa.
Woman, æt. 30, slight build, has suffered 8 months; diarrhœa.
Man, æt. 30, has suffered a year; diarrhœa.
Fisherman, has suffered 1½ years after being drenched in a storm; diarrhœa.
Captain, æt. 46, strong, well built, after a long ride during which he caught cold; chronic diarrhœa of six months' standing.

[48] **Relations.** Antidoted by: *Camphor., Coffea, Coloc., Kali carb., Opium.*
Compare: *Aloes, Podoph., Pulsat.* (cough, > sitting up; general symptoms, > open air).

GELSEMIUM.

Yellow Jasmine. *Loganiaceæ.*

A climbing plant native to the Southern States; flowers in early Spring.

Tincture prepared from the root.

Introduced by John H. Henry, in 1852, proved by Douglas, Payne, Hering, Kemper, Morgan, Hare and others. See Allen's Encyclopædia, vol. 4, p. 385.

CLINICAL AUTHORITIES.—*Acute mania*, Hart, Raue's Rec., 1874, p. 60; *Sleeplessness in delirium tremens*, Blakely, Raue's Rec., 1873, p. 54; *Fright from thunder storm*, Lippe, Analyt. [1] **Mind.** Cataleptic immobility, with dilated pupils, closed eyes, but conscious.

‖Stupid, comatose condition attending typhoid fever.

‖Torpor, sleepiness, and dread of movement.

‖Stupor, cannot open the eyes.

‖Unconsciousness.

‖After losing son, inclined to brood over her loss; at times becomes unconscious, or, rather, "rapt;" in imagination thinks herself at the grave; smothered pressure on chest after the spell.

‖Dulness of all the mental faculties.

‖Dulness of mind, > after profuse emission of watery urine.

‖Incapacity to think or fix the attention.

‖Unconnected ideas, cannot follow any idea for any length of time; if he attempts to think consecutively, he is attacked by a painful, vacant feeling of the mind. θYellow fever.

‖Delirium in sleep, half waking, with incoherent talk.

‖‖Sensation of intoxication with diarrhœa.

‖Confusion; when attempting to move, the muscles refuse to obey the will; head giddy.

‖Paroxysms of frenzy; eyes red, protruding and ghastly, hair dishevelled and wild demeanor; talking and singing alternately; hands, feet and head alternately hot and cold; tongue much coated; constipation; appetite capricious. θAcute mania after melancholia.

‖Loquacity; brilliant eyes; shooting through temples and nasal sinuses; fever.

‖Starts up screaming.

‖‖Desires to be let alone; irritable, sensitive.

‖‖Desires to be quiet, does not wish to speak, nor have any one near her for company, even if the person be silent.

‖Depression of spirits; anxiety following a somewhat cheerful, careless mood.

Digitized by Google

Great depression of spirits in onanists, with confusion of mind and excessive languor.
Melancholy and desponding mood.
Solicitude about the present and the future.
Fear of death; has no courage.
Anxiety; incoherency of thought, aversion to study.
Great irritability, does not wish to be spoken to.
Nervous, irritable, easily angered.
Mental exertions cause a sense of helplessness from brain-weakness; inability to attend to anything requiring thought.
Great lack of courage.
Every exciting news causes diarrhœa; bad effects from fright and fear.
Bad effects from suddenly hearing bad news; from fright; diarrhœa, abortion, etc.
Nervous dread of appearing in public; singers and speakers.
Complaints: from exciting or bad news; sudden emotions; the anticipation of any unusual ordeal; general depression from heat of sun or summer.
Effects of grief; cannot cry; < when thinking of his symptoms, also when spoken to of his loss; > from diverting talk; oppression and palpitation of heart; feels a sense of peril; face flushed; sleeplessness; subdued manner; sensation of soreness about heart.

Sensorium. Head feels light and large, with vertigo.
Lightness of head: with vertigo; with dimness of vision; < by sudden movement of head and walking.
Heaviness of head, with dulness of mind, dimness of sight and vertigo; swimming sensation in head, vertigo on rapid movement.
Heaviness of head, > after profuse emission of watery urine.
Fulness in head, with heat in face and chilliness.
Dizziness of head and blurring of vision, gradually increasing, all objects appear very indistinct.
Vertigo, confusion of head, spreading from occiput over whole head; pupils dilated, dim sight; general depression from heat of sun or summer.
Vertigo, dim vision, fever; seems as if intoxicated when trying to move; < from smoking.
Giddy, with loss of sight, chilliness, accelerated pulse; dulness of sight, double sight.
When attempting to move, the muscles refuse to obey the will; giddy, confused, lack of muscular co-ordination.
Child dizzy, when carried seizes hold of nurse, fearing that it will fall.

Digitized by Google

Patient appears intoxicated.
Staggering as if intoxicated when trying to move.
Sensation of falling, in children; child starts and grasps nurse or crib, and screams out from fear of falling.
Serious attacks of vertigo, with dimness of vision and fever, appears like one intoxicated.

Inner Head. Pain most frequently in forehead and temples.
Pain in head, over eyes and across forehead.
Severe pain in forehead and vertex, dim sight, roaring in ears; head feels enlarged; wild feeling; alternating with uterine pains.
Severe and continued pain, day and night, accompanied by dizziness when stooping, and a sensation as if he would fall headlong; tongue coated; appetite poor; pain < in frontal region, but at times extended over entire head.
Hyperæmia of brain; dull feeling in forehead and vertex, and a fulness in region of medulla before spasms.
Fulness in head, heat of face, chilliness; pulsation of carotids; thick speech; brain feels as if bruised; eyeballs feel sore when moving them; double vision.
Heaviness of head: slightly > by shaking head; > after profuse micturition.
Sick headache, principally in r. temple, beginning in morning and increasing during day; < from motion and light; > after lying down, and > by sleep or vomiting.
Tightness of brain.
Pain as from a tape around head.
Band-like pain surrounds head, with shooting pain in each jaw.
Sensation of weight and pressure in head.
Pain in head constant, dull, stupefying and pressive.
Cramp-like pains of drawing or tearing character, < by study or exertion, following fever and ague.
Sensitive, bruised sensation of brain.
Excruciating headache, accompanied by slight nausea; pain slightly > by shaking head.
In morning on rising, dull pain in head and a slight tendency to throbbing in r. side of head.
Blind headache, shooting pain into ears when swallowing, cannot sit or lie, must stand or walk.
Headache coming on suddenly, with dimness of sight or double vision; with vertigo, great heaviness of head, it feels too big, and often too light, semi-stupor, bright red face; dull, heavy expression of countenance; full pulse, general malaise.
Nervous headache, from emotional excitement.
Hemicrania with dim sight or double vision, or preceded by great sensibility to noise.

Digitized by Google

Excruciating pains in head preceding or following intermittent fever.

Headache especially of a remittent or intermittent character.

Headache all over head, extending into bones of face; head feels very sore, as from a bruise; sharp neuralgic pains running around edges of the teeth; shooting pains extending into ears when swallowing; roof of mouth feels terribly, as if swollen and as if cavity were closing up, but upon examination, it did not appear swollen or even inflamed; constant burning, stinging sensation in mouth; burning and stinging pains occurring suddenly in various parts of body, as if a bee had stung her; urination frequent and scanty, with scalding; burning pains in urethra while passing urine, and temporary prostration after it; cannot sit or lie, has to stand or walk.

Constant, gradually increasing headache for three or four months; dull, heavy pain, extending to nape of neck, frequent throbbing in temples, and vertigo on rapid movement.

Nervous headache, pain begins in cervical portion of spinal column, and from thence extends over whole head.

Dull aching in occipital region, occasionally extending into os frontis.

Dull pain in back part of head after breakfast, < when moving and stooping.

Headache, principally in occiput, > by reclining head and shoulders on a high pillow.

Settled, dull, heavy headache, mainly in occiput, mastoid or upper cervical region, extending to shoulders; > when sitting by reclining head high on a pillow.

Patient finds himself getting blind before headache; they faint away in consequence of their suffering, or have to lie down and be quiet all day; swimming-tearing sensation as in sea-sickness; headache principally in occiput; > reclining head and shoulders on a high pillow; staggering, as if drunken, when trying to move; double vision; squinting; great heaviness of head; > by profuse micturition or shaking head; severe pain in forehead and vertex; dim sight; roaring in ears; head feels enlarged; wild feeling, alternating with uterine pains; sensation as if brain were bruised; passive venous congestion.

Terrible neuralgia, commencing in upper portion of spinal cord, proceeding thence gradually through upper portion of cerebrum, and terminating in a bursting pain in forehead and eyeballs, < about 10 A.M.; < lying down,

Digitized by Google

with nausea, vomiting, cold sweat on forehead, and cold feet; vertigo and obscuration of sight on stooping; sensation of a band drawn tightly around head above ears, and soreness in scalp and brain; vertebra prominens and cervical vertebræ sensitive to pressure; lameness and stiffness of neck; on waking at night retraction of head backward, > bending head forward; frequent urging to urinate, with partial loss of power in sphincter vesicæ; heat in palms of hands and itching all over body, preventing sleep; after scratching, a raw sore, surrounded by blisters. θNeuralgic headache after cerebro-spinal meningitis.

‖Neuralgic headache beginning in upper cervical spine; vertebra prominens sensitive; pains extend over head, causing a bursting pain in forehead and eyeballs; < at 10 A.M., when lying; with nausea, vomit, cold sweat, cold feet.

‖Neuralgic headache with cramp-like drawing, tearing pains in upper cervical and occipital region, extending upward and forward; or in forehead, over one or both eyes; < by exertion or study.

‖With headache, giddiness, faintness, pain in neck, pulsation of carotid arteries, pain in limbs, great drowsiness, sneezing, double vision, loss of sight.

Pain < by anything around head.

Headache > when sitting and reclining head and shoulders on a high pillow.

Smoking tobacco aggravates headache.

‖Symptoms of depression from heat, with vertigo, dilatation of pupils, dimness of sight, dull, confused headache, spreading from occiput over whole head; no thirst; no appetite; feels completely played out.

‖Stupor attending the fevers of children.

‖Intense congestion of brain in children during dentition.

Active congestion of brain, when occurring during fevers, from unusual exertion, or from exposure to sun.

Meningitis, especially in children.

‖Threatened or actual apoplexy, with stupor, coma and nearly general paralysis (rarely useful in hemipleiga or paraplegia); headache, with nausea, lightness of brain; giddiness; tendency to stagger, with imperfect vision; vertigo with falling; intense passive congestion to head with nervous exhaustion.

‖Dull burning pain in occiput, coming in forenoon, feeble gait, twitching of single muscles, starting in sleep; double vision followed by burning pain in occiput, < by anything light around head; > pressure on vertex; θBrain affection.

Digitized by Google

‖Irritation of mucous surfaces; lower jaw wagging sideways, has no control over it; jerking of whole l. side on falling asleep; disposition to squint; sudden shrill cries on awakening; frantic spells from pain; fear of falling; pulsating fontanelle; red or sometimes sickly face. θMeningitis.

‖Cerebro-spinal meningitis, stage of congestion; severe chill, dilated pupils; congestion of spine and brain.

‖Meningitis cerebro-spinalis, at very onset of disease, severe chill followed by congestion of brain and spinal cord, livid cheeks, dilated pupils, little or no thirst; loss of strength and great exhaustion, staggering gait, dulness of speech, icy-coldness of hands and feet, pulse very weak or hardly perceptible; laborious and weak respiration, nausea, vomiting; eyelids close involuntarily in spite of all he can do; itching of head, face and neck; sweating relieves; mental faculties retain their activity though power over muscles is impaired, cannot direct movements of limbs with precision; coma.

‖Child wants to be let alone, wants to lie still; head hot, hands and feet cool; face red; eyes dull; tongue coated yellowish-white; no thirst; breath hot, sometimes offensive; sleepy and drowsy, sometimes comatose; during sleep, convulsive motions; creeps and flushes run up back; more or less moisture of skin, especially on palms of hands and in axillæ; pulse depressed at first, later frequent and soft; during summer or warm weather with southerly or southeasterly winds. θMeningitis.

Outer Head. Sensation of contraction of skin in middle of forehead.

Itching on head (face, neck, shoulders), preventing sleep.

‖‖Sensation of a band around head above ears; scalp sore.

‖Dull dragging pain in occiput, mastoid and upper cervical regions, extending to shoulders; > quietly resting head on a high pillow, with eyes half closed; eyes heavy, sleepy, red.

‖Pressure on vertex so great as to extend into shoulders; head feels very heavy.

‖‖Cramp-like drawing and tearing, < from study and exertion; after fever and ague.

‖Cannot hold head erect.

Sight and Eyes. ‖‖Aversion to light, particularly to candlelight.

‖Sees double, when inclining head towards shoulder, or looking sideways.

‖Double vision controllable by strength of will.

‖‖Paralysis of oculo-motor and abducens. θDiplopia.

‖Diplopia with spasm of various muscles throughout body, without thirst.

Digitized by Google

Diplopia and dim vision during pregnancy.
Swimming black specks before eyes, vision dim, can neither read nor write, words run together, cannot recognize one across room, with heat in eyes extending to forehead.
As if a snake were before vision, with pain over eyes.
Blindness with dilated pupils.
Photophobia.
Black and bright specks before eyes. θAfter ague.
Thirst for light.
Sense of sight tardy in following movements of objects.
Disturbance of power of accommodation.
Confused vision, eyes look heavy.
Misty or glimmering appearance before eyes.
Smoky appearance before eyes, with pain above them.
Dimness of sight and vertigo.
Distant objects seem indistinct, riding or walking.
Amaurosis from masturbation; mind and body prostrated.
Pupils dilated, iris sluggish, vision nearly lost; palate slightly paralyzed and uvula deviated to left. θAmaurosis after an attack of putrid sore throat.
Amaurosis of congestive origin; after apoplexy; caused by quinine.
Confusion of sight; blindness.
Blindness: with violent dizziness; with ptosis; with vertigo and dilated pupils.
Cloud over outer half of field of vision of l. eye, due to sub-retinal effusion.
Increased tension, balls sore.
Glaucoma from increased secretion rather than from obstructed secretion.
Hazy vitreous, very fine.
Serous choroiditis; iritic complications; vision varies from day to day or from hour to hour; sometimes fever, with thirstlessness.
Serous choroiditis with dull pain in or about eye extending to back of head, > by hot application, but not by cold; impairment of vision gradually developed and not characterized by sudden changes, either for > or or <; heaviness of lids; inability to accommodate eye quickly for varying distances; asthenopic symptoms not marked, but great irritability of eye, resulting from want of tone or energy of muscular structures, constituting a passive rather than an active asthenopia; general feeling of depression and lassitude, not > by food or stimulants.
Inflammatory affections of retina and choroid.

Digitized by Google

Retinitis albuminurica, sudden dimness of vision during pregnancy, < after delivery; no pain, only an itching of eyes; white patches and extravasations of blood in retina; outer part of optic nerve whiter than usual.

Retino-choroiditis, in which there seemed to be a bluish snake before vision.

Vitreous so hazy fundus cannot be seen; vision nearly lost; eyes red and irritable; pupils slightly dilated; constant sore, aching pain in eyes and around, with sharp sticking pain on moving eyes; finally small transparent points; elevations of epithelium appeared on r. cornea, looking like swollen ends of nerve filaments; they were excessively sensitive to touch or movement of lids. θSerous choroiditis.

Disseminate choroiditis and retino-choroiditis, with no outside symptom.

Choroidal and venous congestions, either with or without serous effusion; amaurotic symptoms, with dilatation of pupils, disturbed accommodation, pain in eyes, with or without lachrymation.

Detachment of retina dependent upon an injury, with diffuse haziness of vitreous and serous inflammation of choroid and retina.

Right vision $\frac{20}{100}$ with difficulty; left vision, counted fingers at 20 feet; serous inflammation of iris and choroid, deposits on membrane of Descemet, aqueous and vitreous hazy in both eyes, l. pupil dilated and sluggish; sensation of pressure over both eyes and headache in temples.

Detachment of retina from myopia; severe attacks of neuralgia.

Serous iritis; serous choroiditis; dull pain to back of head; > from hot applications.

Astigmatism.

Pupils dilated.

Deposits on lower posterior portion of l. cornea, pupil dilated, vitreous hazy with floating opacities, moderate ciliary injection; no pain; vision.

Heat in eyes and forehead.

Bruised pain above and behind eyes.

Soreness as from a foreign body, with photophobia and lachrymation.

Aggravation of eye symptoms from the use of wine.

Heaviness of eyes, as after night-watching.

Soreness of eyeballs; drawing over eyes.

Dull, full feeling with aching in whole of orbits.

Eyes feel bruised.

Pain in both eyes, < l., with dimness of sight.

Digitized by Google

‖Constant inclination to squint.
‖Asthenopia, with insufficiency of external rectus; edges of lids red, as if from crying, with hypermetropia; photophobia from sun or gas-light.
‖Asthenopia dependent upon weakness of external recti muscles.
‖‖Paresis or paralysis of any of ocular muscles; also paralysis following diphtheria, and when associated with paralysis of muscles of throat.
‖Eyeballs oscillate laterally when using them.
‖Fulness and congestion of lids.
‖‖Drooping of eyelids; ptosis.
‖Eyelids heavy; eyes close when looking steadily.
‖‖Great heaviness of lids; difficulty of opening or keeping them open.
‖Ptosis due to congestion of brain coming on after an attack of ophthalmia.
Eyes red and watery; lachrymation.
‖Inflammation with great flow of tears at intervals.
‖Blepharitis and conjunctival hyperæmia due to refractive errors.
‖Eyes feel sore in evening, sensitive to light, with lachrymation; lids feel full and congested.
‖Yellow color of eyes.
‖Orbital neuralgia, periodic, every day at same hour.
Rarely found of benefit in superficial affections of eye, but especially adapted to diseases of fundus and paralysis of nerves.

[6] **Hearing and Ears.** Great sensitiveness to all sounds.
‖Rushing and roaring in ears.
‖Sudden, temporary loss of hearing.
‖Neuralgia; nearly deaf; spasms of throat, sometimes extending to upper part of chest; loss of consciousness; < towards night. θDeafness with loss of speech produced by massive doses of Quinine.
‖Catarrhal deafness, with pain from throat into middle ear.
Digging in r. ear; also stitches.
‖Neuralgic otalgia, especially when periodical.
‖Earache from cold.
‖Catarrhal inflammation, at beginning; cold in head and closure of Eustachian tube; tense, dull, bound, giddy sensation in head, with chilliness; stupor, drowsiness. θOtitis media.
‖Pains ascending from back to occiput, affect the ears.
Stitches behind ear.
Left ear seems to matter which it never did before.

[7] **Smell and Nose.** ‖Violent morning paroxysms of sneezing; tingling in nose.

Digitized by Google

‖Fulness at root of nose; pains extending to neck and clavicles.
‖Watery, excoriating discharge; a feeling from throat up into l. nostril, like a stream of scalding water; r. nostril stopped up; nasal voice.
‖Hay fever, with morning sneezing.
‖Acute coryza, with dull headache and fever.
‖Coryza in changeable weather, with inflammation of upper part of throat and shooting pain into ear when swallowing, also hard hearing.
‖Summer colds with violent sneezing in morning; edges of nostrils red and sore; pharyngeal inflammation with pain on swallowing, shooting up into ear; deafness; hands and feet cold in P.M.; then drowsy; fever until morning; disposition to catch cold, with every change in weather.
‖Tingling in nose; bloody, mucous discharge.
‖Coryza in spring and summer weather.
‖Edges of nostrils red, sore.
‖Epistaxis with suppressed menses.

[8] **Upper Face.** ‖Expression heavy, dull, drowsy.
‖Face flushed and hot to touch.
‖Heavy besotted appearance of face.
‖Heat of face with fulness in head and cold feet.
‖Crimson flush of whole face in all positions.
‖Face dark red, mahogany color.
‖Erythema of face and neck.
‖Pale face; sickly look; paleness and nausea.
‖Face yellow; jaundiced.
Sensation as though skin on middle of forehead and about face, was contracted.
‖Muscles of face, especially around mouth, seem contracted, making speech difficult.
‖Orbital neuralgia in distinct paroxysms, with contractions and twitchings of muscles on affected side.
‖Facial neuralgia in nervous women; jaws affected spasmodically.
‖Congestive facial neuralgia; grumbling or shooting pains; < on pressure; especially if malarial.
‖Neuralgic affections of fifth pair, particularly when pain is traceable along one of its three divisions at a time.
‖Pain in r. temple gradually growing more severe and extending into ear, and spreading from thence to eye and side of head; these parts affected alternately, finally pain settles in r. wing of nose where the paroxysms become extremely severe. θProsopalgia.
‖Sudden darting, acute pains, traceable from region of ear and side of head to supra-orbital region, and again to

Digitized by Google

infra-orbital region, still at other times to chin and front of lower jaw; pain flying from one branch of fifth pair to another, without any regular order as to succession, pain however being more or less constantly present and starting from region of temple or ear. ℔Facial neuralgia.

ℓSharp shooting pains through face, eyes and head, which feel like rheumatic pains; face congested and of a dark or dusky hue; headache commences in neck quite suddenly, spreads from thence over head, or vice versa; dimness of vision; heaviness of head; vertigo; stupor; dull expression of countenance; powerlessness of muscles.

ℓSevere pain increasing for past two years, in region of infra-orbital nerve; < from motion, as eating, laughing or crying.

ℓSore, acute, red pimples on face.

Papular eruption on face.

[9] **Lower Face.** ℓLips dry; coated with dark mucus.

ℓMuscles of face seem to be contracted, especially around mouth, making it difficult to speak.

ℓShooting pains in jaws.

ℓℓLower jaw wagging sideways, has no control over it.

ℓSensation of stiffness in muscles of jaws.

ℓStiffness of jaws; difficulty of opening mouth; trismus.

[10] **Teeth and Gums.** ℓToothache from a cold, or purely neuralgic; pains from teeth to temple.

ℓToothache with general nervous excitement or weak and trembling condition; pains come in paroxysms, are decidedly neuralgic, and dart through jaws and face; congestion of head and face.

ℓTic douleureux after exposure on a cold damp day; seat of irritation located at root of l. canine tooth of upper jaw; gum, upper lip and infra-orbital region swollen and very sensitive to touch; tooth exquisitely tender and loose in its socket; constant pain, at times shooting and darting and then changing to a grumbling toothache.

ℓDentition; child frantic, awakens with fierce and sudden screams; face deep red; fontanelle pulsates too strongly; pain about ear.

Gums swollen and tender.

ℓChild frantic at times, especially when gums are examined.

[11] **Taste and Tongue.** Taste: foul, putrid, with blood-colored saliva; seldom bitter; clammy and feverish during the sweat.

ℓℓNumbness of tongue.

ℓCan hardly put tongue out, it trembles so; red, raw, painful, inflamed in middle.

ℓℓTongue felt very thick; could hardly speak.

Digitized by Google

Irritation or paralysis of tongue or glottis.

‖Tongue and glottis partially paralyzed; speech thick, as if drunk, from congestion of base of brain.

‖Tongue: yellowish-white, breath fetid; coated thick, brown; nearly clean; margin red, centre white.

[13] **Inner Mouth.** Dryness of mouth and throat, with disposition to swallow frequently.

‖Dryness of mouth; thickly coated tongue.

‖Sticky feverish feeling in mouth.

‖Saliva colored yellow as from blood.

‖Partial paralysis of glottis and tongue.

‖Irritation and soreness of fauces.

‖Sore mouth, coincident with febrile and catarrhal states, intermittent or remittent type.

‖Tonsils much swollen, high fever, intense heat of skin, photophobia, pain shooting in r. ear, thirst, partial delirium.

‖Tonsils swollen and very red; crimson flush of face; cold hands and feet; great nervous excitement. θScarlatina.

‖Tonsillitis, from acute catarrh.

‖Aphthous looking spot on r. tonsil, and another on pharynx; no swelling; throat sore; deglutition painful; vomiting. θMiliary fever.

[13] **Throat.** ‖Fauces dry, burning, irritated, sore.

‖Inability to swallow or speak. θParalysis.

‖Tried to swallow but could not.

‖Warm or spirituous fluids can partially be swallowed; cold drinks come up immediately. θStenosis œsophagi.

‖Paralytic dysphagia.

‖Spasmodic affections of throat.

‖Swallowing causes shooting in ear.

‖Dryness and burning in throat.

‖Dry roughness in throat when coughing.

‖Dryness of throat with hoarseness.

‖Sensation of heat and constriction in throat.

‖Throat feels filled up; tonsils inflamed, swollen, frequently, or at beginning, in right.

‖Throat red, raw, tonsils swollen; tongue white or yellowish-white; tickling, tearing cough preventing sleep.

‖Soreness of throat felt at upper part of l. tonsil, extending thence across soft palate, along l. nostril, attended by a sensation at every inspiration as if a stream of scalding water rushed along nasal passage of that side, the other nostril at same time being stopped up; continuous accumulation of irritating mucus about throat, with hard, painful cough; shooting pain in ear, when swallowing; hard hearing; thirstlessness with the fever; < at night. θInfluenza.

Google

Inflammation of upper part of throat and shooting pain into ear when swallowing; hardness of hearing. θCoryza, after changeable weather.

Chilly creepings up spine; sore throat, headache, fever, intense thirst, earache; tonsils much swollen and covered with diphtheritic patches; nausea, extreme nervousness, partial delirium.

Tonsillitis and inflammation of throat, palate and uvula.

Catarrhal inflammation of pharynx and tonsils.

Local tingling of parts during fever; incipient paralysis or anæsthesia; defective or impaired vision; objects appear a long way off, are seen double or inverted. θDiphtheria.

Painful sensation of a lump in œsophagus that cannot be swallowed in hysterical women.

Painful sensation of something having lodged in œsophagus.

Spasmodic sensations and cramp-like feeling in gullet.

Œsophagitis (catarrhal).

Burning in œsophagus extending to stomach.

Inflammation and irritation of throat from acid secretion of stomach.

14 **Appetite, Thirst. Desires, Aversions.** Great hunger; eructation; nausea.

Increased appetite, or easily satisfied with small quantities of food.

Increased appetite from active hyperæmia of mucous lining of stomach.

Little appetite and thirst, but can take food or drink.

Want of appetite and weakness of stomach, or paralytic state of masticating organs.

Thirst, but does not drink much; it hurts to swallow. θProdromal stage of intermittent fever.

Thirst during perspiration.

Little or no thirst.

Thirstlessness, with sticky sweat, especially about genitals.

15 **Eating and Drinking.** Wine aggravates, especially headache and eye symptoms.

Thirst absent or slight.

Worse from smoking tobacco.

16 **Hiccough, Belching, Nausea and Vomiting.** Sour eructations.

Nausea, giddiness, headache.

Nausea, vomiting, cold sweat on forehead and cold feet. θNeuralgic headache.

Slow, intermittent pulse, slightly furred tongue, wild, protruding eye, dilated pupil; had been drinking hard for two or three weeks; stomach rejects everything, even water; sleepless, feels as if he would become delirious.

Digitized by Google

[17] **Scrobiculum and Stomach.** ‖Sensation of a heavy load, with weight, tension and dull pain; empty, faint sensation in epigastrium; a false hunger, a kind of gnawing; nervous exhaustion, as found in persons of dissolute habits.

‖Rumbling and dull pain in epigastrium, > by passage of flatus.

‖Great sensation of weakness, emptiness of stomach, as if it were quite gone.

‖Feeling of emptiness and weakness in stomach and bowels.

‖Sensation of weight in stomach, with dull pain.

‖Oppression and fulness in stomach, < from pressure of clothing.

Distension, with pain and nausea.

‖Flatulence of stomach, swelling, eructation and dull pain, probably caused by want of elasticity in muscular fibres of this organ.

‖Cramp in stomach, > riding and sitting erect.

‖‖Burning in stomach, extending to mouth.

‖Congestion of stomach, with hyperæmia of its mucous lining.

‖Gastralgia, cardialgia, cramps in stomach and other cramp-like conditions of this organ.

[18] **Hypochondria.** ‖Passive congestion of liver, with vertigo, dim sight and fulness of head.

Deficient secretion of bile.

‖Passive congestion of liver, bilious diarrhœa and relaxed gall ducts.

Jaundice, with prostration; clay-colored stools.

[19] **Abdomen.** ‖Rumbling and roaring in abdomen, with discharge of wind up and down.

‖Sudden spasmodic pain in upper part of abdomen, leaving a sensation of contraction causing him to cry out.

‖Gnawing pain in transverse colon.

‖Periodical colic, with yellow diarrhœa in evening.

‖Griping in lower abdomen, > by copious bilious stools.

‖Spasmodic and flatulent colic.

‖Wandering, pinching wind colic, > when sitting erect; < beginning to move, > during continual motion.

‖‖Tenderness in right iliac region during typhus.

‖Neuralgia of intestines periodic, malarial; sharp, lancinating pains, with great excitement and restlessness, cold hands and feet, rapid pulse, and tendency to general cramps.

Intestinal obstructions.

‖Acute enteritis (catarrhal) during damp weather, warm or cold.

Google

‖Sensation of soreness of abdominal walls.
‖In strangulated hernia, at the very first; applied internally and externally.

[20] **Stool and Rectum.** ‖Disposition to go to stool whenever anything startles her.
‖‖Diarrhœa, or threatening of same, after excitement, especially after fright.
‖Diarrhœa: in nervous persons, subject to nervous chills; after sudden emotions, as grief, fright, bad news, the anticipation of any unusual ordeal; of soldiers before a battle; during dentition; with intermittent fever.
‖Sudden depressing emotions cause yellow fecal stools with colic and flatus.
Before stool: colic; passage of flatus.
Frequent discharge of flatus.
Loose, papescent stool.
Bowels loose, with great difficulty in discharging anything, as if sphincter resisted passage by contraction.
‖Stools: yellow fecal; bilious; cream-colored; clay-colored; color of green tea; involuntary.
‖Diarrhœa, bilious, fermented, with much wind and great nervous weakness, more than the evacuations could cause.
‖Chronic diarrhœa, with watery, thin, dark brown, or dark green stools; little or no pain; brought on or made < by any exciting news, emotion, or mental irritation; chilliness in back, every day during diarrhœa, but not at any fixed hour; became much tired by a short walk; sank into a chair and appeared quite unconscious for about two minutes, during which time her eyes were closed, her arms when lifted dropped down heavily; she did not hear when spoken to or see when her eyelids were opened; when conscious, said that she could not open eyelids; very nervous and prostrated.
Catarrhal diarrhœa, with spasmodic colic and tenesmus.
Acute catarrhal enteritis, mucous diarrhœa, mucous dysentery; discharges almost involuntary; intense spasmodic colic and tenesmus.
‖Dysentery (epidemic), malarial or catarrhal.
‖Slow stool, leaving a sensation of more remaining to be passed, and of abdominal repletion.
‖Constipation, when the motion is retained in consequence of want of tone in muscles of bowels.
‖Acts specifically on nerves and muscles of rectum.
Difficult passage of stool, as though sphincter ani were spasmodically closed.
‖Paralysis of sphincter ani, with involuntary diarrhœa, the result of nervous excitement.

Google

‖Paralysis of sphincter ani, with disposition to prolapsus.

" **Urinary Organs.** ‖Spasmodic affection of ureters from passage of calculi.

‖Spasm of bladder, with alternate dysuria and enuresis.

‖Spasm of bladder; in women, often combined with uterine spasm; in men, with colic.

Tenesmus of bladder.

‖Paralytic conditions of sphincter muscles of bladder: following diphtheria; in old people.

‖Acute catarrhal conditions of bladder and uterus.

‖Detrusor and sphincter muscles paralyzed.

‖Bladder distended up to navel; constant dribbling of urine, but not a drop flows on making the greatest effort; no pain, not even on pressure. θParalysis of bladder.

‖Frequent urging, with scanty emission and tenesmus of bladder.

‖Dysuria, with frequent urging, scanty urine and vesical tenesmus; spasmodic retention of urine.

‖Alternate dysuria and enuresis; spasm of bladder.

‖Sensation as if something remained behind when urinating; the stream stops and commences again.

‖Involuntary micturition from excitement.

‖Constant involuntary discharge of urine every fifteen minutes.

‖Enuresis, from paralysis of sphincter, in nervous children at night.

‖‖Frequent emission of copious, clear, limpid urine, relieving dulness and heaviness of head.

Urine much increased in quantity.

Albuminuria.

Painful redness of urethra.

" **Male Sexual Organs.** ‖Involuntary emissions of semen without an erection.

‖Seminal emissions from excessive irritation of organs of generation, either from emotional or local congestive causes, with a condition similar to satyriasis.

‖Seminal weakness from irritability of seminal vesicles.

‖Spermatorrhœa from relaxation and debility.

‖Sexual organs irritable, weak; involuntary emissions without erections; spermatorrhœa; emissions of semen during stool.

‖Flaccidity and coldness of genitals, with great languor and depression of spirits; nocturnal emissions, with sexual dreams, followed next day by great languor and irritability, with pain in base of brain.

‖Excitable sexual desire; depression of spirits; heavy dragging gait; pale face, sunken eyes. θSpermatorrhœa.

‖Sexual power completely exhausted, so that most power-

Digitized by Google

ful stimuli fail to cause an erection; after marriage, slightest caress produced an emission; face pale and emaciated, dark circles around eyes; mind weak, memory defective, haunted by thoughts of suicide; emission while straining at stool; penis flaccid; both testicles had become small. θSpermatorrhœa due to onanism.

❙Blue rings around eyes; discharge of liquor seminis with micturition; during coition too early discharge of semen.

❙Gonorrhœa, in acute stage; great pain, inflammation, fever and scanty discharge.

❙Gonorrhœa; last part of incubation, and first part of inflammatory stage, when discharge is rather moderate; little pain but much heat, and urine is voided in sufficient quantities, rather frequent, with smarting at meatus.

❙Whitish discharge; severe erections; burning when urinating; rheumatism; orchitis. θGonorrhœa.

❙Suppressed gonorrhœa, with fever, rheumatism, orchitis.

❙Painful redness at urethra. θSecondary gonorrhœa.

❙Spasmodic stricture of urethra.

❙Genitals cold, relaxed; dragging pains in testicles.

❙Testicles very much relaxed, bag continually sweating.

❙Profuse warm sweat on scrotum.

Female Sexual Organs. ❙Ovarian irritation with characteristic headache.

❙Uterus, as if squeezed by a hand; anteflexion.

❙Sensation of heaviness in uterine region, with increase of white leucorrhœal discharge; nervous, excitable, hysterical females, given to masturbation, with great depression of spirits and excessive languor; feeling of fulness in hypogastrium, and aching across sacrum.

❙Congestion of uterus; pains spasmodic; neuralgic pains with cramps in uterus and legs; cramps in uterine ligaments.

❙Uterine pains shoot up back and compel her to sit up. θLabor. θDysmenorrhœa. θHemorrhage during menopause.

❙❙Severe, sharp labor-like pains in uterine region, extending to back and hips.

❙Languid aching in back and limbs day before appearance of menses.

❙Loss of voice during menses.

❙Amenia.

❙Dysmenorrhœa: vertigo; sick headache; faintness at stomach, vomiting; congestion to head; deep red face; bearing down in abdomen; spasmodic neuralgic pains; cramps in uterus and legs; general hysterical condition.

Digitized by Google

‖Menses suppressed, with congestion to head; sharp darting, twitching pains in face and head; convulsions every evening.

‖Menorrhagia, almost continuous flow, without any pain.

‖After menorrhagia, low, quick, intermittent pulse, cold extremities, extreme restlessness, tossing of hands; intolerable nausea, vomits everything taken into stomach.

‖Vaginismus of purely nervous character with uterine irritation.

‖White leucorrhœa with fulness in uterine region, in nervous, excitable, hysterical females, old maids and students.

‖Leucorrhœa white, with aching across lower part of back; heavy fulness in uterine region; amenorrhœa.

‖Leucorrhœa in gushes, day and night; constipation.

Pregnancy. Parturition. Lactation. ‖During pregnancy: dimness of sight; double vision, headache, drowsiness, vertigo, pulsating carotids, small, slow pulse; cannot walk, for muscles will not obey the will; cramps in abdomen and legs; convulsions, with complete unconsciousness.

‖Threatened abortion from sudden depressing emotions.

‖Severe vomiting; pain in uterus; severe pain across small of back, and a burning pain up the spine to head, which ached; confused feeling in head affecting mental operations. θThreatened abortion from fright.

‖False pains before parturition.

‖Severe pains in abdomen, which run directly upward, or backward and upward; feeling as if muscular power was weakened, which arises from a weakness of will power. θFalse labor pains.

‖False labor pain, so severe as to interrupt true pains which seem utterly inefficient; sometimes cramping pain in various parts of abdomen; os rounded and hard, and feels as if it would not dilate.

‖Cutting pains in abdomen from before backward and upward, rendering labor pain useless; these come on with every pain, are very distressing, and may be felt throughout body.

‖Nervous chills, "chatters," in first stage of labor.

‖Pains in uterus going through to back and then up back.

‖With every pain child seems to ascend instead of descend.

‖Pains leave uterus and fly all over body.

‖Sensation like a wave, from uterus to throat, ending with a choking feeling; this seems to impede labor; impending spasms.

‖Hysterical women, with rigid unyielding os during labor, attended with much nervous excitement.

Digitized by Google

‖Atony of uterus, loss of contractility; passive hemorrhage.
‖Labor pains gone, os widely dilated, complete atony; face flushed; patient drowsy, dull.
‖Insufficient labor pains from uterine inertia.
‖Everything seems relaxed; neck of uterus flabby, os open, no pains, bag of waters bulging, patient grows more and more drowsy, speech thicker, convulsions seem threatening.
‖Albumen in urine during pregnancy; at beginning of labor patient sank into a semi-stupid state, out of which she could be aroused by shaking, but would soon relapse; if an answer could be forced from her, it was spoken with a thick tongue like one intoxicated; no labor pains, but os dilated and membranes protruding; face pinkish as if uniformly flushed; pulse slow, full.
‖Albuminuria; thirstless; erratic pains.
‖Threatened convulsions during confinement; pulse large and soft; face puffed and expression heavy.
‖Convulsions (apoplectic form) during labor.
‖A convulsion every fifteen minutes, lasting from one to ten minutes; during intervals rational, knew every one but her child; did not know she had been confined, and when questioned, insisted angrily to the contrary; would have every one in the house with her; rather disposed to expose herself; very anxious to know what was the matter with her; burning heat in head with flushed face; palms of hands very hot, bathing them in cold water somewhat modified a convulsion; would cry if not talked to constantly; could not endure gaslight. θPuerperal convulsions.
‖Afterpains; cramps in uterus, commencing in front and extending upward and backward.
‖Afterpains too severe and lasting too long; sensitive women, who cannot compose themselves to sleep; sleep with half-waking and murmuring.

* **Voice and Larynx. Trachea and Bronchia.** ‖Hoarse in paroxysms, with dry, rough throat; rawness of chest, catarrh.
‖Voice weak, thick.
‖Nervous aphonia, with dryness and burning in throat, restless sleep and twitching of muscles.
‖Aphonia from catarrhal paralysis.
‖Paralytic aphonia during menstruation; voice returning when catamenia stops.
‖Paralysis of the glottis.
‖Spasm of glottis, evening, threatening suffocation.
‖Laryngismus stridulus, Miller's asthma, or spasm of glottis, in children.

Digitized by Google

‖Burning in larynx, descending into trachea.
‖Roughness of throat, raw, as if ulcerated. θLaryngitis.
‖‖Acute catarrhal bronchitis.
‖‖Hawking bloody water.

[26] **Respiration.** ‖Sudden sensation of suffocation, as in hysteria; respiration almost imperceptible; sighing respiration.
‖Sudden and severe attacks of dyspnœa, with crowing noise, profuse perspiration and darkly flushed face.
‖Spasmodic asthma; asthma Millari.
‖Slow breathing and slow pulse; heavy, labored breathing; congestion to chest.
‖Long crowing inspiration, sudden and forcible expiration; spasm of glottis.
‖‖Breathing frequent.

[27] **Cough.** Excessive excitability of respiratory centre, with small secretion of mucus and violent, frequent cough.
‖Convulsive, spasmodic cough, especially in hysterical women; irritative cough without expectoration.
‖Severe cough, with much pain in chest in places; tenderness of epigastrium with vomiting, in paroxysms.
‖Cough from tickling or roughness of fauces; hoarse; rawness and soreness of chest; coryza; bronchial catarrh.
‖‖Burning in larynx and chest when coughing.
Coughs a good deal during the night.
‖Croupy cough; measles.
‖‖Spasmodic croup.
‖Catarrhal affections growing out of relaxed and debilitated condition of system on return of warm weather at close of Winter; Spring fever; hoarseness, with dryness of throat; burning in larynx, descending into trachea; cough from tickling and dryness of fauces; sensation of soreness in chest when coughing.
‖Catarrhal affections, especially if motor disturbances occur, such as spasm of larynx, pharynx and glottis, or so-called spasmodic asthma.

[28] **Inner Chest and Lungs.** Paroxysmal pain in upper part of r. lung, when taking a long breath.
Stitches in lungs from above downward.
‖Stitches in chest in region of heart.
‖Constrictive pain around lower part of chest.
‖Soreness in chest when coughing.
‖‖Dry cough with soreness of chest and fluent coryza.
‖‖Heaviness in middle of chest (afternoon).
‖Severe chill, with great weariness and prostration, pains in back, head and limbs; extreme oppression of chest.
‖Extreme and alarming difficulty of breathing, with distressing sense of fulness and oppression of chest, great chilliness; extremities cold; pulse slow, sluggish, labor-

Digitized by Google

ing; extreme restlessness from threatened suffocation; continual demand for fresh air; respiratory murmurs feeble and obscure.

‖Paralysis or debility of lungs of nervous origin.

‖Affections of lungs and pleura marked by erethism or vascular irritation, or when congestion is to be feared, or is already present.

‖Spasmodic affections of lungs and diaphragm, such as convulsive hiccough, certain forms of asthma, spasms of passages, convulsive cough.

‖First stage of pneumonia.

‖Congestive pneumonia, with suffering under scapulæ, both sides; caused by checked sweat; short paroxysms of pain superior part of r. lung, on taking a deep breath; pulse slow, full.

Heart, Pulse and Circulation. Stitching sensation in region of heart.

‖Pain in heart when rising from a seat.

‖Oppression and palpitation of heart, < when thinking of it, or when spoken to of his loss; sensation of soreness about heart. θEffects of grief.

‖Excessive action of heart from plethora, congestion, neuralgic or rheumatic irritation, or hysterical palpitation.

‖Irregular beating of heart; palpitation.

‖Cardiac neurosis, with deficient power and action; hysterical palpitation in plethoric women.

‖Action of heart and arteries much depressed, with cold hands and feet; chills with pain in head.

‖‖Heart's action slow and feeble; beats cannot be felt.

‖A peculiar action of heart, as though it attempted its beat which it failed fully to accomplish, the pulse intermitting each time; < lying, especially on l. side.

‖‖Fears that unless constantly on move, her heart will cease beating, with fear of death.

‖Nervous chill, yet skin is warm; wants to be held that she may not shake so. θHeart disease.

‖After a violent fit of anger and a quick run, the beating of the heart omits every tenth beat; with the intermission he feels faint, sinks backwards, feels as if he would die, without fear.

‖Full, round, soft, flowing pulse, with slight fever.

‖‖Pulse frequent, soft, weak, almost imperceptible; slow and full.

‖Pulse quick, soft, irregular. θIntermittent fever.

Pulse irregular, intermitting, yet full.

Fluttering pulse; pulse full, 120; pulse slow and full, or slow and soft.

‖Marked decrease in frequency of pulse.

Google

Sensation as though blood had ceased to circulate.
‖Heart's action: feeble, slow; depressed; hands and feet cold.

[30] **Outer Chest.** ‖Periodical pains in pectoral muscles.

[31] **Neck and Back.** ‖‖Pains in neck like those of cerebro-spinal congestion.
‖Lameness and stiffness of neck; on waking at night retraction of head backward, > bending head forward. θNeuralgic headache.
‖Contractive sensation in r. side of nape.
‖Pains in neck, myalgic, mostly in upper part of sterno-cleido muscles, back of parotid glands.
‖‖Pain in neck and under L. shoulder-blade.
‖The muscles of the neck feel bruised.
‖Vertebra prominens and cervical vertebræ sensitive to pressure. θNeuralgic headache.
‖Dull, aching pain in back, extending up to occiput.
‖Pains from spine to head and shoulders.
‖Chills run up back from sacrum to base of occiput.
‖Creeps and chills running up back.
‖Feeling of lightness in body from spinal exhaustion, in onanists and hysterical subjects.
‖Congestion of spinal cord and cerebellum; prostration, languor; muscles feel bruised and will not obey the will.
‖Spinal congestion; with incipient aphasia.
‖Paralytic condition of lumbar and sacral muscles.
‖‖Dull aching in lumbar and sacral region; cannot walk, muscles will not obey.
‖Sharp cutting pains from back down to hips.
‖Severe pain in hip, < at rest and when beginning to walk; burning pain during forepart of night, preventing sleep. θIschias.
‖‖Pain in back and loins and lower part of thigh; in evening, when entering warm room; thirst.
‖Paraplegia.
‖Locomotor ataxia.
‖Early stage of myelitis of anterior horns; spinal weakness from exhaustion; confusion of head, spreading from occiput to forehead; dim sight; expression of face heavy, dull, drowsy; paresis of tongue and glottis; incontinence of urine; muscles feel bruised and will not obey the will; loss of voluntary motion.

[32] **Upper Limbs.** ‖‖Pain in shoulders during night.
‖Deep-seated muscular pains in both arms.
‖Arms weak, numb.
‖Arms become powerless; loss of voluntary motion.
‖Tired sensation in arms when playing piano, steadily increasing; vague pains from tips of fingers to scapulæ.

Digitized by Google

‖Severe aching pain in l. elbow.
‖Pain as if sprained in r. wrist and elbow.
|Coldness of wrists and hands.
‖Trembling of hands when lifting them up.
‖Hot, dry hands, especially the palms.

[33] **Lower Limbs.** ‖Fatigue of lower limbs, after slight exercise.
|Difficulty of walking or inability to stand, due to inability to control muscular movements.
|Heaviness, weight; loss of voluntary motion, muscles not obeying will; calves feel bruised; pain at night.
|Unsteady gait; staggers as if drunk, on attempting to walk.
|Obstinate sciatica; pains < at rest and particularly when beginning to walk; burning pains, < at night, compelling her to lie awake; pain in sole of foot when walking.
|Deep-seated muscular pains in legs, > by motion.
|Shooting pains in paroxysms.
|Paroxysmal pain in lower extremities.
|Drawing, contracting, crampy pains in legs, from thighs into toes; < on motion or walking.
|Coldness of extremities, especially of feet, as if in cold water, with anguish and pain in legs.
‖Violent lancinating pain in thigh.
|She was so sore on her thighs, touch felt like a boil; pains were all > when in a sweat.
‖Rheumatic pains during night in knees.
‖Feeling when walking, as in a partial luxation of patella.
Sudden dislocation or slipping of patella (during breakfast).
‖Excessive drawing and contractive pains in gastrocnemius muscle of l. leg.
|The calves of the legs feel bruised, and pain at night.
Rheumatic pain in r. knee and l. side of neck.
Pains in l. foot and ankle; spasmodic contraction of toes.
|Cold feet.

[34] **Limbs in General.** |Trembling in all the limbs.
|Control of limbs gradually lost, could not direct their movements with precision.
|Great soreness of thighs, < l., sore as a boil to touch; pains > while sweating; almost total paralysis, < l. side; head drawn to l. side; can move thigh but slightly; cannot raise hands to head.
|Neuralgic and rheumatic pains in extremities.
|Neuralgic pains in limbs. θSequel to scarlatina.
|Deep-seated, dull aching in limbs and joints generally, induced by cold, and attended by loss of motion.
Deep-seated, aching pains in bones and joints of extremities.
|Numbness, feeling as if limbs were going to sleep, in nervous, hysterical subjects.

Digitized by Google

Limbs cold, with oppressed breathing; cold hands and feet.

Rest. Position. Motion. At rest: pain in hip <.
Wants to lie still and rest; wants to keep quiet.
Lying down: sick headache >; neuralgia <; bursting pain in eyeballs <; pulse intermitting.
Cannot lie or sit, must stand or walk.
Sitting: > dull heavy pain in back part of head; cramp in stomach >; pinching wind colic >.
Compelled to sit down by pains up back.
Wants to be held that he may not shake so much.
Reclining head on high pillow: < headache.
Bending head forward: > retraction of head backward.
Stooping: headache and dizziness; dull pain in back part of head <: obscuration of sight.
Motion: sick headache <; dull pain in back part of head <; of eyelids < elevation of epithelium on cornea; pain in region of infra-orbital nerve <; colic > from continued motion; fears heart will stop beating unless constantly in motion; slight exercise, fatigue of lower limbs; muscular pains >; drawing crampy pains in legs <; loss of motion with deep-seated pains in limbs and joints; of arms and legs makes them tremble.
Dread of movement.
Slight exertion: causes sweat.
When attempting to move: muscles refuse to obey will; seems as if intoxicated; eyeballs feel sore; colic <; to walk, staggers as if drunk.
Sudden movement of head: lightness of head <; vertigo.
Can move thigh but slightly.
Rising from a seat: pain in heart.
Shaking head: > heaviness of head.
Cannot open eyes: cannot raise hand to head.
Lifting arms: trembling of hands.
Playing piano: tired sensation in arms.
Walking: distant objects seem indistinct; causes complete exhaustion; impossible, for muscles will not obey will; pain in hip <; difficult; pain in sole of foot; crampy, drawing pain in legs <; feeling as in a partial luxation of patella.

Nerves. Hyperæsthesia.
Excessive irritability of mind and body; vascular excitement.
Nervous excitement of hysterical patients.
Nervous chills in very sensitive subjects.
Nervous chill, yet skin is warm; wants to be held that she may not shake so.
Great distress and apprehensive feeling at approach of

thunder-storm, after having seen a house struck by lightning in a previous storm.

‖Pain from occiput through to forehead, as if a knife were thrust through; pain across root of nose; pain in eyes as if they were jumping out of head; pain through chest below heart, from l. side to r.; complete blindness. θHysteria, from grief.

‖Hysterical women, with spasms; feeling as of a lump in throat which cannot be swallowed; general numbness of extremities.

Hysteria, with spasms, palpitation of heart, great nervous excitability, a copious flow of nervous urine.

‖A nervous young lady, uneasy before a thunder-storm, set up a terrific scream after a heavy thunder-bolt, and continued it without cessation in spite of all efforts to quiet her.

‖Hysterical convulsions, with spasms of glottis; hysterical epilepsy; excessive irritability of mind and body, with vascular excitement; semi-stupor, with languor and prostration; nervous headache, commencing in neck and spreading over whole head; migraine; dysmenorrhœa of a neuralgic or spasmodic character.

‖Hysterical epilepsy, after suppressed menses, lasting an hour or two; so severe was the spasm of glottis that asphyxia seemed inevitable.

‖Hysterical condition in plethoric subjects.

‖Sudden hysterical spasms.

‖Spasmodic croup; laryngismus stridulus.

‖Jactitation of muscles.

‖Convulsions from reflex irritation; spasms of one leg.

‖To prevent convulsions, before development of eruptive disorders.

‖Puerperal spasms, preceded by great lassitude, dull feeling in forehead and vertex, fulness in region of medulla; head feels "big;" heavy, with half stupid look; face deep red; speech thick; pulse slow, full; from protracted labor; rigid os uteri; albuminuria.

‖Epilepsy of ten years' standing, preceded by dull feeling in head and vertex, and some pain and fulness in region of medulla oblongata.

Epileptiform convulsions after suppressed menses, with severe spasm of glottis.

‖Tetanic spasms; jaws locked.

Hydrophobia.

‖Acute, sudden, darting pains, evidently along single nerve branches, in almost any part of body or limbs, sometimes so sudden and acute as to cause starting.

Neuralgia; shooting, tearing along tracks of nerves, especially if < by changes in weather.

Digitized by Google

Neuralgia; absence of organic lesion, with indistinct or double periodicity.
Listless and languid.
Great lassitude; general fatigue.
Feeling of relaxation of whole body, especially of hands and feet, with indisposition to move.
Becomes easily tired and exhausted; especially lower limbs.
Curious sensation of falling. θAgue.
Weakness and trembling through whole system.
Great weakness, with paleness of face, nausea, and trembling of lower extremities.
Tremulousness with profuse urination.
Intense prostration of whole muscular system.
Great feebleness; complete loss of muscular power.
Complete relaxation and prostration of whole muscular system, with entire motor paralysis.
Insulatio; feels "played out;" hot, damp, stifling weather.
Coup de soleil.
Overpowering fear, with fatigue; tendency to diarrhœa; exhaustion, drowsiness; anxious, unconscious muttering; pale and languid face; aching in back and limbs; fear of injury. θTraumatic shock.
Numbness and coldness.
Paralysis of motion; muscles will not obey will; feel bruised; tingling, pricking, crawling.
Muscles lose power to contract at will of patient, without loss of sensation or slightest change in temperature.
Periodic aphonia; loss of voice only during menses.
Suddenly an inability to raise eyelid which increased until eye was completely closed.
Numbness and coldness of r. hand, r. side of face, and r. half of tongue; speech thick as if drunk.
In a case of long-standing diarrhœa, child fell down without power to raise her arms or legs, mind, however, remained bright and clear.
Infantile paralysis, complete relaxation of whole muscular system, with enteric motor paralysis; giddiness and faintness, with pain in neck; great drowsiness; loss of sight; muscles weak and will not obey the will, feel bruised; tingling, pricking, crawling; limbs cold; locomotor ataxia; paraplegia, unsteady gait; trembling of hands when lifting them up; mental exertions cause a sense of helplessness from brain weakness; no loss of sensation.
Paralytic symptoms throughout entire muscular system.
Paralytic symptoms in throat, in limbs; spasms from reflex irritation; cataleptic immobility, with dilated pupils, closed eyes, but consciousness.

Digitized by Google

‖Coma and apoplexy, subarachnoid, arising from passive congestion with nervous exhaustion.

[37] **Sleep.** ‖Yawning, chilly.

Languor and drowsiness when trying to study.

‖Peculiar stupor or sleepiness in students, or persons of sedentary life, especially in hot weather.

‖Disposition to sleep, a sort of stupor.

Drowsiness and long, sound sleep.

Unusually sound morning sleep, with difficult, weary waking.

‖Drowsy; dim sight; a kind of drunken stupor.

‖Stupor in beginning of fevers; especially with children.

‖Cannot get to sleep on going to bed at night, on account of thinking, which she cannot control.

‖Sleeplessness from nervous irritation.

‖Sleeplessness; a wide awake feeling.

‖Wakeful or lies in a half awake state; incoherent talk.

‖Languid, drowsy, but cannot compose mind for sleep.

‖Sleeplessness during dentition.

‖Sleeplessness in delirium tremens.

‖Sleepless from violent itching of face, head and shoulders; also from exhaustion.

‖Very restless during night, especially towards morning; unpleasant dreams after midnight.

‖‖Jerking of whole l. side on falling asleep; sudden shrill cries on awaking. #Meningitis.

Night terrors, on account of his nose being stopped up and dry.

Delirium in sleep, half waking, with incoherent talk; delirium as soon as he falls asleep.

Awakens from sleep with headache or colic.

[38] **Time.** Morning: sick headache; dull pain in head; sneezing; fever until morning; unusually sound morning sleep; decline of heat without perspiration; decline of fever; crimson flush of whole face; chill.

10 A.M: < bursting pain in forehead and eyeballs; fever without chill.

Forenoon: dull burning pain in occiput.

Day: sick headache; leucorrhœa in gushes.

Afternoon: hands and feet cold; heaviness in middle of chest.

Evening: eyes feel sore; spasm of glottis; pain in back, loins and lower part of thigh; crimson flush of whole face.

Night: on waking, retraction of head backwards; neuralgia; fever; sore throat <; enuresis; leucorrhœa in gushes; cough; burning pain in hip; pain in shoulders; pain in limbs; rheumatic pain in knees; calves pain;

Digitized by Google

cannot sleep on going to bed; very restless; terrors; heat long lasting; sweats; marked exacerbation of fever.
After midnight: unpleasant dreams.

[39] **Temperature and Weather.** ‖Heat of sun or summer: general depression; insulatio; stupor; sleepiness.
Hot application: > dull pain back of head.
Must be covered in all stages of paroxysm.
Cannot move away from fire without chilliness.
Complaints from sudden change from hot or dry to damp air.
Warm or spirituous fluids can partially be swallowed.
Continual demand for fresh air.
Changeable weather: coryza.
Atmospheric changes cause bilious remittent fevers.
Damp weather: acute enteritis; insulatio.
Cold open air: relieves.
Cold damp day: tic douleureux.
Cold damp atmosphere: causes catarrhal fevers.
Cold water: on hands modified a convulsion; feet feel as if in cold water.
Cold drinks: come up immediately.

[40] **Fever** ‖Chilliness, languid aching in back and limbs; sense of fatigue, desire to avoid all muscular exertion; every day, 4 to 5 P.M.
‖Sudden mental emotions hasten onset of chill.
‖Chilliness, especially along spine.
‖Chills begin in hands; chills running up back; hands and feet cold, as if they were in cold water; hot head and face.
‖Shaking begins in hands, with thirst, headache, vertigo; pains in back, limbs, knee, with cramps. ℞Intermittent fever.
‖Chill ascending from feet; chill and chilliness, especially along spine; running up back from loins to nape of neck, and following each other in rapid wave-like successions from sacrum to occiput.
‖Transient chilliness, with profuse urination.
‖Chill preceded by incontinence of urine. ℞Intermittent.
‖Nervous chills, in which, with shivering and chattering of teeth, there is no sensation of chilliness.
‖Nervous chill, skin warm; wants to be held that he may not shake so much.
Chill: mostly during morning; every day at same hour; with or without thirst; with weak pulse.
‖Chill every day, 4 or 5 P.M.; slight with "goose-flesh;" lasts three-quarters of an hour; with thirst.
‖Limbs cold, with oppressed breathing.
Coldness so severe as to be painful.

Digitized by Google

After chill: sleepy; flying heat and pricking in skin, rapidly followed by profuse perspiration; heat, principally of head and face.

‖Heat, with some thirst, begins in head; headache, vertigo; heat and chill together, shivers up back; red cheeks, hot face. θIntermittent fever.

‖Warmth over whole body, as if sweat would break out, then chilly down back.

‖Slight fever, with full, round, soft, flowing pulse.

General heat, mostly about head and face.

‖Heat: with nervous restlessness; with languor or drowsiness.

‖Fever without thirst; wants to lie still and rest; tonsils inflamed, r. side.

‖Flushed, crimson face during fever.

‖Heat, with intense burning.

‖Fever, with shooting, pressive pains through temples and nasal sinuses, with brilliancy of eyes and loquacity.

‖Heat in face; sleepy, stupid, besotted; with half-waking, muttering delirium; tired, wants to lie still, or great nervous restlessness; sensation of falling in children; child starts and grasps attendant or crib, and screams out from fear of falling.

‖Fever heat, with drowsiness; sleep, with half-waking and murmuring frequently; little thirst; feels very languid, and wants to be still; chill beginning in hands and feet; throat feels thickened, filled up and sore; tonsils slightly swelled; throat somewhat red.

‖With the heat, semi-stupor; cannot open eyes or think correctly; vertigo; staggers as if intoxicated; sensitive to light or noise.

Long-lasting heat, far into night; pain in one leg; jerking of limbs.

‖Heat in palms of hands. θNeuralgic headache.

Fever without chill at 10 A.M.

‖Slight occasional moisture; sweat coming gradually and moderately, always relieving the pains.

Thirst during sweat, clammy, feverish taste.

‖Perspiration, sometimes profuse and lasting from a few hours to twenty-four, with languor and prostration.

‖Sweat most profuse on genitals.

‖Thirstlessness, with sticky sweat, especially about genitals.

‖Sweats freely from slight exertion.

‖Night-sweats, especially those of phthisis.

‖Intermittents, in which nervous symptoms predominate; severe chill and fever, but not much sweat; paroxysms occur daily, with great restlessness.

Google

‖Intermittent or remittent fevers contracted at summer watering places and "wintered over," making their appearance in early Spring.

‖Fevers characterized by severe chill, little shaking, followed by fever.

‖Intermittent fever with sick stomach and vomiting during paroxysm; thirst during sweat; sleeping throughout heat; muttering on half waking up; wants to be held so that he will not shake so much; heavy eyelids; great prostration; drowsy, stupid condition, with little thirst.

‖Cold, chilly, congestive stage with depressed pulse, dull headache, etc.; the reactive stage with hot, dry skin, flushed face, acute pain of head and quickened pulse, followed by sweats; headache mostly in temples.

‖Heat long, severe, may last till nearly time for next chill; the sweating short, most marked; much debility during apyrexia; attacks had been suppressed by quinine, but always reappeared, preceded by enuresis.

‖Intermittent fever (tertian type); fever lasts five hours, very hot, with delirium, jerking of limbs, violent headache; aching in one leg.

‖Intermittent fever (tertian type); pain in head and pain over body when he has no chill; tongue not much coated.

‖Intermittent, where there is want of distinctness in its several stages, and the whole presenting an adynamic condition of the system.

‖Fever coming on every evening after supper, which gradually increased and went off before morning, the patient continuing asleep.

Regular periodic fever, without chill.

Type: quotidian; tertian; same hour of day with every paroxysm; periodicity well marked; fevers of regular type, but characterized by disorders of innervation.

Time: afternoon and evening paroxysm 2, 4, 5 and 9 P.M.; fever without chill at 10 A.M.

‖She must be covered in all stages of paroxysm. θIntermittent fever.

‖As soon as reaction takes place after chill, pulse rises as much above normal as it was depressed below it.

‖Intermittent of children; burning fever and restlessness, no thirst, no fear of falling, great regularity of paroxysm.

‖Convulsions in children with ague; "dumb ague," from abuse of quinine; "masked ague," choreaic or neuralgic manifestations being present.

‖Intermittent fever; malarial, generally quotidian.

‖Suppressed intermittents, with general prostration, aching and soreness in body; "dumb ague."

Digitized by Google

Simple, uncomplicated cases of intermittent fever.

Post-typhoid intermittents.

Apyrexia often wanting or very short; great prostration of whole muscular system during apyrexia.

Heat and perspiration are so extended that many fevers are more remitting than intermitting.

When the remittent takes on the intermittent type, or vice versa.

Irritative, remittent and intermittent fevers in very nervous, sensitive people and children, with excessive erethism and no gastric, hepatic, or visceral complications.

Infantile remittents, due to irritation of teething, intestinal troubles, worms, or malarial influences.

Bilious remittent fevers, caused by atmospheric changes in Spring, or due to miasmatic influences in Autumn; intense frontal or occipital headache, puffed face, slimy, bitter taste in mouth; tongue white or yellow; breath foul.

Marked exacerbation of fever towards night, and decline of heat without perspiration towards morning; heaviness of head, with vertigo and blindness; loss of appetite, with bitter taste; large, deeply bilious stools, asthma and stupor.

Simple fever, without functional disturbance.

Irritable, sensitive children, sometimes wakeful; nervous, even threatened with convulsions, or drowsy; eyelids heavy; want to remain perfectly quiet; chills up and down back; followed by fever, with increased drowsiness; pulse full, soft; sweat moderate, with relief.

When fever develops under circumstances which favor a paresis of motor nerves of both voluntary and involuntary muscles; it corresponds to that stage in which the blood-vessels are dilated and full, but lack the firmness and resistance of a fully developed sthenic inflammation; such a fever is accompanied by languor, muscular weakness, desire for absolute rest and drowsiness.

Nausea and disgust; confusion of head with dull pain; drowsiness; indisposition and almost inability to exert mind or body; sense of debility; pains in region of kidneys, as if produced by pressure of a blunt instrument as large as end of thumb; dull, heavy, pressing pains in bones of upper and lower limbs, becoming cramp-like in muscles; pains < in shin-bones; malaise.

For a week, languor, loss of appetite, confusion of head, etc.; finally confused headache; pains in back and limbs; no appetite; bad taste in mouth; nausea; thick dirty-white coat on tongue; languid, listless, prostrated; pulse quick; skin hot and dry.

Digitized by Google

‖Violent pains in limbs, back and head; wants to be quiet and let alone; does not want to talk or have persons about her in the room. θFebrile conditions.

‖‖Nervous chills, with shivering and chattering of teeth, depending upon some irritation of nerves of motion, in very sensitive subjects; from fear or fright; they often attend relaxation of os uteri in labor, or occur after labor has just been completed.

‖Fevers of children during dentition.

‖Low fevers when pulse is slow, and by lifting or turning patient it becomes accelerated.

‖Incipient typhoid, with severe pains in head, back and limbs; extreme lassitude; fever; chilliness; thick, brown coated tongue.

‖First stage of typhoid, when patient seems to have "taken cold;" sudden onset; non-complication by drugs; patient of an afternoon gets "very tired," with languid aching in back, extending down limbs; wants to rest, even to sleep; hands and feet become cold; general chilliness, then hot fever, with crimson flush of whole face; occasional moisture here or there; sleeps frequently half waking and talking incoherently; morning decline of fever; throat feels sore and filled up; tongue clean or yellow; head feels "big as a bushel;" tremulous; vertigo; blind spells; epistaxis; iliac tenderness.

‖Pulse full, weak, vacillating, about 100; tongue red and dry; hands and tongue tremulous; when a little drowsy, mind wanders and he reaches after imaginary objects; lips dry and parched, teeth covered with sordes.

‖Typhoid fever; nervous symptoms predominate; patient drowsy and stupid, with great debility; legs and arms tremble when moving, with some chilliness.

‖Typhoid fever in a child, nervous movements, every night, like spasms; oscillation of eyeballs.

‖Dull, heavy headache; drowsy and stupid; he is so weak that he can hardly control his movements; feeling of great prostration; tongue slightly coated, can hardly put it out, it trembles so; mouth sticky, no thirst, no appetite; skin hot and dry; pulse 120 and full; eyes look dull, eyelids drooping; hands tremble violently when trying to lift or move them; legs also tremble very much when trying to walk. θTyphoid.

‖Great prostration of all vital forces, with strange sensation in head and continued jactitation of muscles. θTyphoid.

‖Unconnected ideas, cannot follow up any idea; painful vacant feeling in mind on attempting to think; giddiness with loss of sight; indistinctness of vision, or double

Digitized by Google

vision; fulness of head, with heat in face, and cold feet; pain in back of neck; heavy, dull expression of countenance and yellow face, or nausea and paleness; sticky feeling in mouth; fetid breath; tongue whitish or yellow; dryness and burning in throat; sour eructations; pulse frequent, full, but soft; as soon as he goes to sleep, is oblivious. θYellow fever.

- Cerebro-spinal fevers, especially if caused by malaria, with stupor and tendency to convulsions; intense passive congestion; wild, incoherent delirium; sweating relieves; trembling, weak limbs; bruised pain in muscles.
- Cerebro-spinal meningitis, ushered in by a severe chill, accompanied by evident congestion of spine and brain.
- In forming and inflammatory stage of measles, with chilliness, watery discharge from nose, etc.
- Eruptive fevers: especially children, tendency to convulsions at time of eruption; intense fever, heat, erethism, but less restlessness than *Acon.;* less violence and suddenness of aggravation than *Bellad.;* languid; asthenic fever; stupor.
- Catarrhal fevers, from influence of cold, damp atmosphere, or sudden change from hot and dry to damp air.
- Chilliness up back, cannot move away from fire without chilliness; head hot before fever sets in; torpid, heavy condition during fever; head feels heavy and big, face scarlet, eyes suffused, nose runs a watery mucus, but little sore throat, pulse large, full and quick, but not very hard, febrile motions remittent; < about same hour every day. θInfluenza.
- Heat with languor and drowsiness; aching in back and limbs; little thirst; sleep interrupted by half-waking and muttering; evening or early morning crimson flush of whole face, sometimes preceded by cold hands and feet; distant objects look confused, as if outlines were shaded with some colors; eyes heavy looking, suffused, sometimes oscillating; wants to keep very still; pulse full, frequent, not tense. θInflammatory fever.
- Rheumatic fever, especially in muscular rheumatism.
- Irritative fevers due to some local irritation, such as ulceration, suppuration, abscess, presence of a foreign body, etc.
- Hectic fever, even when shaking chills, followed by great heat, and drenching sweats occur.

" **Attacks, Periodicity.** Fevers remit or intermit.

Periodical attacks; every day at same hour.

Sudden: loss of hearing.

Rapid wave-like succession: chills follow each other.

Every fifteen minutes: constant involuntary discharge of urine; convulsions.

Digitized by Google

Lasting an hour or so: hysterical epilepsy.
From hour to hour: vision varies.
From a few hours to twenty-four: profuse perspiration.
Five hours: fever lasts.
Three-quarters of an hour: chill lasts.
Every afternoon from 4 to 5: chilliness.
Every day at same hour: orbital neuralgia; chilliness in back during diarrhœa; chill; chills and fever, and restlessness; chilliness <.
From day to day: vision varies.
2, 4, 5, 9 P.M.: paroxysm.
Evening: periodical colic with diarrhœa; convulsions; after supper, fever.
Every night: nervous movements like spasms.
Regular periodic fever without chill.
For a week: languor, loss of appetite.
Return of complaints when the year comes round.
Three or four months constantly increasing headache.
Ten years' standing: epilepsy.

" **Locality and Direction.** Right: temple, sick headache; throbbing in side of head; elevations of epithelium appeared on cornea; digging in ear; nostril stopped up; pain in temple; pain in wing of nose; shooting pain into ear; aphthous looking spot on tonsil; tonsil swollen and inflamed; pain in upper part of lung; side of nape contractive feeling; sprained pain in wrist and elbow; rheumatic pain in knee; numbness and coldness of hand, face and half of tongue; tonsil inflamed.

Left: jerking of side; uvula deviating to left; cloud over outer half of fluid of vision of eye; pupil dilated; deposits on lower posterior portion of cornea; pain in eye; feeling up into nostril as of a stream of scalding water; pain at root of canine tooth, upper jaw; tonsil sore; soreness extends to nostril; tenderness in iliac region; lying on side pulse intermits; pain under shoulder-blade; severe pain in elbow; drawing pain in gastrocnemius muscle of leg; rheumatic pain in side of neck; pain in foot, in ankle; thigh sore as a boil; side of head drawn to side; jerking of whole side on falling asleep.

From l. to r.: pain through chest below heart.
From above downward: stitches in lung.
Pains in abdomen: run upward or backward and upward.

" **Sensations.** Rheumatic pains (wandering) in bones and joints.

Bruised sensation all over body, as if from severe bodily exertion.
Local tingling of parts during fever.
As if intoxicated; head as if enlarged; as if he would fall

Digitized by Google

headlong; brain as if bruised; pain as from a tape around head; roof of mouth feels as if swollen; as if a bee had stung her; as if skin was contracted in middle of forehead; as if a snake were before vision; from throat up into l. nostril like stream of scalding water; as if a lump were in œsophagus; as if something had lodged in œsophagus; feels as if he would become delirious; sensation of a heavy load in stomach; as if stomach were quite gone; as if sphincter resisted passage by contraction; as if something remained behind when urinating; uterus as if squeezed by a hand; as if muscular power weakened; like a wave from uterus to throat, ending with a choking feeling; throat as if ulcerated; feels as if he would die; os feels as if it would not dilate; as though blood had ceased to circulate; as if sprained in r. wrist and elbow; as if feet were in cold water; when walking as in a partial luxation of patella; as if limbs were going to sleep; as if a knife were thrust through from occiput to forehead; as if eyes were jumping out of head; as of a lump in throat which cannot be swallowed; head feels big as a bushel; distant objects feel as if outlines were shaded by colors; pain in kidney as if produced by pressure of a blunt instrument as large as the end of a thumb.

Pain: in forehead; in temples; in head; over eyes; across forehead; in base of brain; in uterus; in bones of face; begins in cervical portion of spinal column, extends over whole body; in neck; in back of neck; in limbs; in eyes; from throat to middle ear; from back to ear; from nose to neck and clavicles; in r. temple then to ears, eye and side of head, then to nose; in teeth, about ear, in tongue; in urethra; uterus into back; leave uterus and fly all over body; in chest; in heart; in neck; in upper part of sterno-cleido muscles; under l. shoulder-blade; from spine to head and shoulders; in back and loins and lower part of thigh; in shoulders; in muscles of arms; in legs; in l. foot and ankle; across root of nose; through chest below heart; over body; in region of kidneys; in shin-bones.

Anguish of legs.

Violent pains in limbs, back and head.

Acute pains: flying from one part of head and face to another; in almost any part of body; in head.

Excruciating pain: in head.

Sharp pains: in uterine region; from back down to hips.

Severe pain: in forehead; in vertex; in region of infra-orbital nerve; in uterine region; across small of back; in abdomen; in hip; in l. elbow; in limbs; in head; in back.

Digitized by Google

Tearing sensation: in head; in upper cervical region; in occipital region; cough; along tracks of nerves.
Sudden spasmodic pain: in upper part of abdomen; colic; in uterus.
Lancinating pain: in abdomen; in thigh.
Darting pains: flying from one part of head and face to another; in tooth; in almost any part of body.
Cutting pain: in abdomen; from back down to hips.
Stitches: in ear; behind ear; in lungs; in chest; in region of heart.
Stitching pains: on moving eyes.
Stinging: in mouth; in various parts of body.
Shooting: through temples; through nasal sinuses; in each jaw; into ears; in face; in tooth; along track of nerves.
Stitching sensation: in region of heart.
Pricking: in skin.
Prickling: in muscles.
Burning: in mouth; in urethra; in occiput; in œsophagus; in stomach; when urinating; up the spine in back; in head; in throat; in larynx; in trachea; in chest; in hip.
Smarting: at meatus.
Digging: in r. ear.
Gnawing pain: in transverse colon.
Bursting pain: in forehead and eyeballs.
Cramp-like pain: in gullet; in legs; in thighs; in toes; in muscles.
Cramps: in stomach; in uterus; in legs; in abdomen.
Constrictive pain: around lower part of chest.
Contractive pains: in legs; in gastrocnemius muscle of l. leg.
Contraction: of abdomen; in r. side of neck.
Labor-like pains: in uterine region.
Griping: in lower abdomen.
Rumbling pain: in epigastrium; in abdomen.
Grumbling pain: in face; in tooth.
Pinching colic.
Band-like pain: around head.
Bearing down: in abdomen.
Dragging pain: in occiput; mastoid and upper cervical regions; in testicles.
Drawing pain: in upper cervical region; in occipital region; over eyes; in legs; thighs; toes.
Deep-seated, dull, aching pains in bones and points of extremities.
Aching: in occipital region; in os frontis; in eyes; in orbits; across sacrum; in back; in limbs; in lumbar and sacral region; in l. elbow; in body.

Digitized by Google

Languid aching: in back; in limbs.
Soreness: of heart; of eyeballs; of head; in scalp; in brain; of eyes; of edges of nostrils; of throat; of abdominal walls; of chest; of thighs; in body.
Bruised pain: above and behind eyes; in muscles of neck; in calves; in muscles.
Pressing pain: in bones of upper and lower limbs.
Pressive pains: through temples and nasal sinuses.
Pressure: of chest; in head; on vertex; over both eyes.
Throbbing: in r. side of head.
Sudden pains: in almost any part of body.
Paroxysmal pain in upper part of r. lung.
Twitching pains: in face and head.
Neuralgic pains: around edges of teeth; in upper portion of spinal cord; upper portion of cerebrum; in forehead; in eyeballs; in face; in teeth; in intestines; in uterus; in limbs.
Rheumatic pains: l. side of neck; in knees; in limbs.
Suffering: under scapulæ.
Dull pain: in head; in back part of head; in occiput, mastoid or upper cervical region extending to shoulders; in or about the eye; feeling in orbits; in stomach.
Vague pains from tips of fingers to scapulæ.
False pains before parturition.
Rawness: of chest.
Roughness: of throat.
Sticky feeling in mouth.
Periodical pains: in pectoral muscles.
Stiffness: in muscles of jaws; of neck.
Stiffness: of neck.
Tightness: of brain.
Tension: in stomach.
Pressure: on chest.
Excitability: of respiratory centre.
Irritability: of eye; of throat; of organs of generation; of seminal vesicles; ovarian; of mind and body.
Sensitiveness: to sounds.
Tenderness in r. iliac region; of epigastrium.
Strange sensation: in head; falling sensation.
Lightness: of head; in body.
Vacant feeling: in mind.
Empty sensation: at epigastrium; of bowels.
Big feeling of head.
Distension: of stomach; of bladder.
Swimming sensation: in head.
Depression: from heat of sun.
Faintness: at epigastrium; of body.
Flaccidity: of genitals.

Digitized by Google

Relaxation: of whole body; hands and feet.
Weakness: of stomach; of bowels; of spine; of arms; of whole system; of brain.
Sense of fatigue.
Tired sensation: in arms.
Confusion: of head; blind headache.
Weight: in head; in stomach.
Heaviness: of head; of eyelids; of eyes; in uterine region; in middle of chest.
Oppression: of heart; of chest.
Dulness: of all mental faculties; of sight; in forehead; in vertex.
Wandering colic.
Fulness: in head; in region of medulla; of lids; at root of nose; in hypogastrium; in uterine region; of chest.
Congestion: to chest; of stomach; of spinal cord; of cerebellum.
Roaring: in ears; in abdomen.
Rushing: in ears.
Suffocation: sensation of.
Palpitation: of heart.
Twitching: of single muscles.
Jerking: of whole l. side; of limbs.
Trembling: of hands; in all the limbs; of whole body.
Spasms: of bladder; of glottis; of one leg.
Paralytic condition: of lumbar and sacral muscles.
Lameness: of neck.
Crawling: in muscles.
Numbness: of tongue; of limbs; of extremities.
Tingling: in nose; of throat; in muscles.
Tickling: cough; of fauces.
Itching: all over body; of head; of face; of neck; of eyes; of shoulders.
Heat: in face; in palms of hands; in eyes; in forehead; of skin; in head.
Coldness: of genitals; of wrists and hands; of r. hand; r. side of face; r. half of tongue.
Dryness: of mouth; of throat.

" **Tissues.** Active or passive congestion of brain, spinal cord, lungs, liver and other organs.
Paralysis, general and special, of voluntary and involuntary nerves.
Acts principally upon motor side of spinal cord, upon brain and the mucous membranes.
Affects principally the nerves of motion; causes muscular prostration through the nerves.
Partial paralysis of all involuntary muscles.
Myalgia from over-exertion; lameness and stiffness.

Digitized by Google

Pains in back, shoulders, neck and occiput, preceding or following attacks of ague; also when these or similar pains are of a neuralgic nature, arising from some form of spinal irritation, or come on as the result of a cold, having something of a rheumatic character.

Congestions, arterial or venous, with sluggish circulation.

Hemorrhages, blood in drops, crimson.

Septicæmia; during the drowsiness fever and great prostration.

In scarlet fever it determines the eruption to the surface, controls the pulse, calms the nervous erethism, and lessens the cerebral congestion.

At first arrests secretion of glands and afterwards increases it.

Catarrh of eyes, nose, mouth, particularly in flabby, lax-fibred persons, or from conditions of atmosphere favoring relaxation of body.

Colds in Spring; soreness over body, great tiredness, as if he could not move; spasmodic sneezing, < in morning; thin, excoriating discharge; nose red, inflamed; mucous membrane dark; co-existing neuralgia.

Catarrh of mucous membranes; watery mucous, never purulent discharges.

Suppressed or undeveloped catarrh.

Touch. Passive Motion. Injuries. Touch: elevations on epithelium appeared on touch; r. cornea, gum, upper lip and infra-orbital region very sensitive; great soreness of thigh.

Pressure: vertebræ sensitive; on head < pain; on vertex > burning pain in occiput; facial neuralgia <; oppression of stomach < from pressure of clothing; causes no flow of urine; vertebra prominens and cervical vertebræ sensitive.

Lifting or turning patient accelerates pulse.

Riding: distant objects seem indistinct; cramp in stomach >.

Skin. Erythema of face and neck.

Itching all over body, preventing sleep; after scratching, a raw sore, surrounded by blisters. θNeuralgic headache.

Itching on head, face, neck and shoulders.

Itching of skin, without eruption, < at night and from warmth.

Skin hot, dry; gastric and nervous fevers.

Pimples on forehead and neck.

Vesico-pustules not itching; pimples like small cutaneous indurations.

Papulous eruption like measles, especially on face.

Digitized by Google

‖Measles: catarrhal symptoms predominant; watery, excoriating discharge; spasmodic sneezing; dry, teasing cough; fever with drowsiness, dulness; clinging to crib.
‖Erysipelas, not vesicular or phlegmonous, but a milder variety, with erythema or papular eruption.
‖Measles, with torpor, sleepiness and dread of movement.
‖Rubeola; it seems to prevent chronic catarrhal affections and bronchitis.
‖After *Acon.;* great deal of coryza; drowsy with fever heat, no thirst; when the eruption turns livid, with cerebral symptoms. θMeasles.
‖In retrocedent measles, with livid spots; dulness of brain or abdominal or thoracic congestion; fever heat, with drowsiness.
‖Scarlet fever, with stupor and flushed red face.
‖Asthenic forms of scarlet fever; intense fever, with nervous erethism during prodromal stage, followed by profound prostration of muscular power; cerebral intoxication; pulse frequent, soft, weak, sometimes filiform; impaired vision; heat, with languor and drowsiness; crimson flush of face in all positions; heavy-looking, suffused eyes; throat feels as if swelled or filled up, is diffusely red; tonsils red and slightly swelled; delirious mutterings when asleep or half awake; spasms and paralysis; when eruption recedes, viscera are threatened.

[47] **Stages of Life, Constitution.** ‖Adapted to children; young people; women of a nervous, hysterical temperament; irritable, sensitive, excitable; people; onanists, both sexes.
Girl, æt. 3, "has always had ague," many times suppressed by quinine, only to re-appear; intermittent fever.
Girl, æt. 12; sciatica.
Miss, æt. 16; acute mania.
Girl, æt. 16; affection of throat.
Mrs. ——; rigid os uteri.
Girl, æt. 18, after exposure; miliary fever.
Boy, æt. 19; fever.
Miss ——, æt. 19, had two years ago severe attack of congestive intermittent fever, quotidian type; facial neuralgia.
Lady, æt 19, red hair; quotidian intermittent every afternoon at 1 o'clock.
Man, æt. 21; chest affection.
Man, æt. 21; nervous headache.
Man, æt. 21, sanguine temperament, ailing for some weeks; febrile disturbance.
Girl, æt. 21, thin and spare, dark eyes, black hair, bilious temperament; intermittent fever.

Man, æt. 22; irido-choroiditis.
Man, æt. 22, bilious temperament; spermatorrhœa.
Man, æt. 24, lymphatic temperament, subject to epistaxis; gonorrhœa.
Piano teacher, observed for two years tired sensation in arms when playing.
Man, bilious temperament; febrile attack.
Man, nervous-bilious temperament; fever.
Woman, æt. 30, spare, of dark complexion, in third month, after fright; threatened abortion.
Miss S., æt. 30, was afflicted with neuralgia, for which massive doses of quinine and morphia were given; aphonia and deafness.
Man, æt. 30; febrile attack.
Miss B., æt. 30; chronic diarrhœa.
Woman, æt. 32, seamstress; irido-choroiditis.
Mrs. ——, æt. 35; brain affection.
Primipara, æt. 35; rigidity of os uteri.
Mrs. H., æt. 36; menorrhagia.
Woman, æt. 40 dystocia.
Woman, æt. 45; after exposure on a cold, damp day; tic douleureux.
Mrs. R., æt. 46, subject to quinsy; affection of throat.
Mrs. E., æt. 50, after losing son; bad effects of grief.
Man, æt. 52, light hair, blue eyes, had cerebro-spinal meningitis; neuralgic headache.
Mrs. T., æt. 56, dark complexion, bilious temperament; serous choroiditis.
Man, æt. 69; typhoid.
Mrs. M., æt. 74; febrile disturbance.

Relations. Antidoted by: *Atrop.*, *Cinchon.*, *Coffea*, *Digit.*, *Nux mosch.*, salt, stimulants, galvanism. In cases of poisoning, resort to artificial respiration, and faradism of muscles of respiration.
It antagonizes: *Atrop. and Opium.*
Compatible: *Baptis.* in typhoid fever; *Ipecac.* in dumb ague.
Compare: *Bellad.* in labor; *Cauloph.* and *Caustic.* in complaints of women; *Coccul.* and *Conium* in paralysis; *Ferr. phosph.* in fever; *Quillaia* in catarrhs; *Oleum an.* and *Veratr.* in headaches.

GLONOINUM.

Nitro-glycerine. $C_3H_5(NO_2)O3$.

Nitro-glycerine was discovered by Sobrero, in 1847, but none could be obtained for physiological experiment until Morris Davis, a Philadelphia chemist, in the same year, after long and laborious trial, under direction of Hering, succeeded to produce the substance in sufficient quantity for proving. It was extensively proven here and abroad (See Allen's Encyclopædia, vol. 4, p. 425), and the symptoms have received abundant clinical verification.

CLINICAL AUTHORITIES.—*Mania*, Field, B. J. H., vol. 16, p. 519; *Loss of location*, Cochran, Hah. Mo., vol. 5, p. 23; *Affection of brain*, Lippe, Raue's Rec., 1874, p. 63; *Hyperæmia of brain*, Mossa, Raue's Rec., 1874, p. 62; *Congestion to head*, Okie, B. J. [1] **Mind.** ‖Loses senses, sinks down unconscious; congestion alternately to head and heart.

‖Recognized no one; repulsed her husband and children; raved, screamed, and wished to rush from house; jumped out of bed, but fell because her knees gave way.

‖She could not remember which side of the street her house was on.

‖‖Well-known streets seem strange; way home too long.

‖Loses his way in the known streets.

The chin feels too long.

‖Loss of location; commenced about ten years ago; loses himself, even when walking in streets that he has traveled in for years; all right in regard to everything else.

Long forgotten old offences come back to him.

‖Frantic; attempted to jump from the window. θHeadache.

‖After an attack of epilepsy patient awoke in a state of violent mania, struggling with great violence; eyeballs projecting, mouth half open, looked as if he were contemplating some afflicting sight, while he rapidly reiterated an unmeaning monosyllable, doe-doe-doe, in a painfully plaintive voice.

‖‖Unusually bright and loquacious, with great flow of ideas.

‖‖Great mental agitation; attempts to run away; attempted to spring from window.

‖‖During intermissions of pain, she shudders and weeps bitterly.

‖‖Disinclined to speak; would scarcely answer.

Fear; throat feels swollen; chest as if screwed together; apprehensive of approaching death; fears she has been poisoned.

‖Bad effects of mental excitement, fright, fear, mechanical contusions and their later consequences.

[2] **Sensorium.** ‖‖Heaviness in head, principally in forehead.

‖Fulness in head, as if all blood had mounted to head; very disagreeable sensation, but without pain.

Fulness in head, as if brain was expanding itself, were moving in waves.

‖Sensation in head as if he were hanging with head downwards, and as if there was a great rush of blood to head in consequence.

‖Determination of blood to head sometimes preceding apoplexy, also for that which often occurs in softening and tumors of brain.

‖Could not allow his head to be on a level with his body, but must have it elevated, it felt full, could not see objects distinctly; dizzy.

‖‖Giddiness when the head is moved.

Digitized by Google

Confusion and vertigo; after stooping.
Throbbing, pulsation and confusion of all senses; sensation of balancing, requiring a constant effort to keep head erect, which inclined to droop as on going to sleep.
Undulating sensation in head.
Head feels larger.
Vertigo; confusion, faintness, black spots before eyes; < stooping or moving head; < in open air; with headache; with nausea; in sunstroke; after a violent fall on head; when rising in morning.
Congestive vertigo; forerunner of apoplexy; intoxication and heaviness of head, with bending head forward; reeling, trembling, falling; headache; heat in head; redness of face; photophobia; injection of conjunctivæ; flickering before eyes; buzzing in ears; pulsation of carotids; < sitting up.
Nausea, then unconsciousness, with convulsive action of facial muscles; face pale, breathing stertorous, feeble pulse.
Sinking down unconscious, with congestion, alternating to head and heart.
Syncope, nausea, face pale or livid; beating in head.

[3] **Inner Head.** Severe pain in forehead; throbbing in temples, < from walking.
Dull headache in forehead over eyes; < by use of eyes and mental effort; becomes a throbbing pain after rapid motion, felt both front and back of head; action of heart very easily excited.
Tensive pain over eyes and nose, also behind ears, followed by choking sensation about throat.
Headache beginning at root of nose.
Crushing weight across forehead.
Piercing pain from within outward, towards middle of forehead, more upward.
Pain in vertex and sides of head, as if pressed together.
Headache in forepart of head with nausea; in l. side, with vomiting.
Throbbing in front of head.
Painful pulsation from forehead to vertex.
When walking every step is felt in neck, when moving the head.
Great heat and congestion in head with severe pains in forehead, throbbing in temples.
Pain in forehead, < shaking head.
Dull headache in forehead, with warm sweat.
Front of head and vertex excessively hot.
Feels as if ice-cold sweat were on forehead, which, however, is not there.

Digitized by Google

Head felt throbbing and bursting, especially above ears and at temples; choking sensation, as if ligature were tied around neck, which prevented blood from returning from head.

Throbbing in whole head, especially in temples and over eyes, with excessive heat in head; < morning; > sitting still and lying, also by pressure upon it.

Pain most intense from 5 to 10 minutes, during which she shudders and weeps bitterly; during intermissions throbbing in temples; while pain is raging, sight impaired.

Violent pressing pain in temples, which went undulating and raging throughout whole head, especially at last in region of saggital suture.

Neuralgia, nervous temperament; sudden pain starting from decayed inferior molar tooth and concentrates in temple; head feels heavy but cannot lay it on pillow.

Stitches in temples or r. side of forehead.

Pressure and throbbing in temples.

Pressure and pain from within out in both temples.

Fulness in head, feels pulse in head, especially in temples, could count the beats.

Sharp, piercing pain in l. temple, daily for several months.

Temporal and carotid arteries beating violently.

Throbbing in temporal arteries, and sense of constriction about neck.

Throbbing in temporal arteries, which were raised and felt like whip-cords.

Heat in head, with throbbing.

Flushes of heat and congestion to head.

Suddenly sensation as if whole head were crowded with blood.

Constant sensation of fulness in vertex, increasing all the time as if something were pumped in.

Sensation of weight, or painful fulness at vertex.

Brain feels as if too heavy and too large for skull, with raving headache.

Sensation as if skull were too small; as if brain were attempting to burst it.

Cracking sensation in brain, obliging him to hold on to head during every movement, to prevent an apparent threatened rupture of cranium.

Feels every pulsation in head.

Shocks in brain, synchronous with every pulsation of arteries.

Intense throbbing pain over whole head, flushed face.

Painless throbbing in head, extending under frontal bone to temple.

Digitized by Google

Throbbing: in temples; in vertex; in occiput; in whole head.

Most violent throbbing, tearing pains, before, during, after or instead of menstruation.

Old nurse with chronic heart disease frequently suffered from severe headaches in attacks that lasted all day, especially during wet, dull weather; the pain is tearing, and extends from nape to vertex, where it is throbbing; < from motion or stooping; > lying still; full sensation like rush of blood in nape, neck and head.

Throbbing beginning in l. breast, suddenly darting up into head, throbbing as if something were moving in waves to head, < from motion.

Throbbing headache, with vertigo and flushes of heat to the face and head; she felt as if sore inside of her head when she moved it.

Headache in vertex and crown, like waves rising and falling; excessive, so that she longs for death, with small, weak pulse.

Brain as if moving in waves.

Undulating, dull pain in middle of brain.

A lady could not lie upon back or either side, because "the pillow would beat;" she could not remember which side of street her house was on.

Pressive, throbbing headache, with obvious enlargement of cutaneous veins of head and face.

Pulsating headache, with sensation of soreness when moving head, and drowsiness with vertigo after stooping.

Headache on top of head, which, without being throbbing, increased and diminished just as waves rise and fall, yet it was not an undulating pain, and in these fluxes and refluxes it increased to such a terrible height that death would have been welcome to her; cold water gave some relief.

Racking pain with raving, heat in head, redness of face, red, protruding eyes, wiry pulse of 92.

Head began to throb, and for an hour all arteries in head felt as distinct as though they had been dissected out, and were on exhibition; head was full of blood; motion < throbbing and pain; this condition lasted all day.

Children scream with pain in head, exclaiming, "My head! my head!"

Holds head with both hands; presses sinciput.

Burning pain in middle of head after brain fever, > by pressure; every excitement causes it.

Pain deep in brain, shaking is without influence.

Sore and bruised feeling in brain, < when shaking head.

Face purple, vertex hot, bloodshot eyes, knew no one.

Digitized by Google

Headache with red face, accelerated pulse, sweat on face, unconsciousness; > in open air, after sleep, after vomiting.

Sensation of soreness through whole head, is afraid to shake head; it seems to him as if head would drop to pieces.

Congestive headache, sensation of fluttering in head, sensation of constriction in vessels of head, expansive pressure, flushed face, drowsiness, venous congestion to abdomen.

Congestion to head in pregnant women, with pale face, loss of senses, and falling down unconscious, cold sweat.

Frequent congestion to head in an old woman, causing a sensation of coldness.

Congestion to head alternates with congestion to heart.

Hyperæmia from excessive cold or heat.

Habitual hemicrania; as if focus of r. eye were suddenly displaced; sees everything half light and half dark, with a sensation as if he must die; nausea, is obliged to sit down, dimness before eyes like a cloud, followed by most violent headache, with repeated vomiting, after which it grows better.

Hemicrania from excessive use of wine.

Eyeballs protrude during headache; red capillaries in eye, as if injected.

Feels deadly sick with headache, like sea-sickness.

Headache: with heat in face; with nausea and vomiting; with increased secretion of urine.

Violent, heavy beating in head, from back to front, as if it would crowd everything out at forehead.

First, pain in occiput, then in vertex.

Headache beginning in occiput and spreading from there over whole head.

Pressure and throbbing extends to back of neck.

Congestion to occiput like pressure; such excessive determination to occiput that it seems as if he would lose his reason.

Congestion to head, sudden, violent; throbbing felt with every pulse, at every step, or jarring; blood mounts from neck, throat or chest; from occiput toward eyes.

Flushes of heat rising from chest to head, then throbbing in head.

Pain, heat and fulness in head ascend from chest, neck or back part of head.

Pains seem to ascend from chest and neck to occiput; pain the whole length of spine; oppression of chest; blindness, with faintness and nausea; congestion to head with sense of expansion; can't bear heat about head. θCerebro-spinal meningitis.

Digitized by Google

Violent throbbing headache with sense of expansion; blindness with faintness and nausea; pale face; pain through whole length of spine.

Great rigidity of occipito-frontalis.

During day a cataleptic state of occipito-frontalis muscle, and a degree of obtuseness of brain.

After overheating, with copious sweat, headache.

The rays of the sun on his head were not to be borne, and his head would not allow the hat to touch it.

Headache begins with warm weather, and lasts all summer, increases and decreases every day with the sun; great sensitiveness to rays of sun, and to pressure from covering of head.

After working in sun: throbbing headache gradually growing more severe; fever; face yellowish-red; eyes staring, dull, glassy, pupil contracted; pulse small and quick; would not speak, would scarcely give a reply; frequent retching.

Headaches produced by powerful rays of sun.

Troubles of head in type-setters, and in men who work under gas-light steadily, so that heat falls on head; bad results from sunstroke; can't bear any heat about head; can't walk in sun, must walk in shade or carry an umbrella; can't bear heat from stove.

Headache on damp, rainy days, after taking cold, much sitting and mental exertion.

Apoplexia serosa with small, thread-like, very quick pulse.

Hydrocephalus; cri encephalique.

Symptoms of cerebro-spinal meningitis, with confusion and loss of memory; in one case temporary blindness; intense pain in cervical and occipital regions, and in eyes; tingling pulsation in fingers; irregular pulse; tightening around neck.

Headache worse: from shaking or jarring head; stooping; bending it backwards; after lying down; when ascending steps; in damp weather; in sun; while working under gas-light; after overheating, with copious sweat; from touch of hat; cold water (even causing spasms); reading; writing; wine.

Frightful headache, runs about room with head pressed between hands; as if head would burst; sometimes knocks head against wall; pulse hard, full, quick; face red; occasionally violent shoots in head making him cry out; jerkings through body.

Headache of a chlorotic patient, pain so intense that she attempted to spring from window.

Violent headache after romping, overheating, sweat and taking cold.

Digitized by Google

Violent congestive headache, eyes painful and bloodshot; never relieved under 24 hours; had taken cathartics; these attacks every twelve or fifteen days for many years; found her lying on a bench holding head with both hands; face and head very hot; eyes much inflamed; vertigo preventing rising; urine high-colored, with a reddish sediment, and mucus of dirty, reddish-yellow tint; moaned much, and complained that brain was forcing itself out front; that it was too large and had grown.

Violent headache; face flushed and very hot, whole head extremely hot; eyes much inflamed and with a wild expression; trembling of knees and lower extremities; slight quiver in wrists and hands, only now and then perceptible; pulse only 86, but full and tense.

Congestion to head, as if warm water were running upwards from nape of neck; turns very red in face and then pale; very little headache but a painless throbbing; frequent attacks during day, < in morning when moving; conjunctiva injected, cannot see well, like a mist before eyes; hot feet.

Some months after being violently jarred by being thrown from carriage, a sensitiveness of upper part of back and neck came on, painful to touch, or from lying upon it, with swelling, heat; sharp, cutting pains into occiput, and from across shoulder-blades to anterior part of chest; when lying down she had frequent attacks of constriction around neck, as if it were gripped by a hand; < from wine.

Congestive headache, pain beginning in forehead and sides of head, slowly passing to vertex and occiput, when it becomes a throbbing pain, < from motion and least noise, from lying with the head low and after sleeping; > from application of cold water and from external pressure; vertex burning hot, likewise the upper part of back; face bluish, with a heavy, stupid expression; lips swollen, frequent deep inspirations; pit of stomach sensitive to touch; frequent and profuse flow of pale urine.

Headache; every pulse is felt, as if head would burst; stupefaction; sunken eyes; bluish pallor under eyes; red eyes, with photophobia; optical illusions; lightning; black spots before eyes; blindness; in ears, pain, fulness, pulsation, ringing, deafness; face pale in spite of high fever, or red and hot; temporal arteries pulsate violently; heart beats strong and laborious; pulse mostly accelerated, often changing suddenly to slow, and back again; nausea, vomiting with the headache; sudden spasms. θMeningitis.

Digitized by Google

Hyperæmia of brain caused by influence of excessive cold or heat.

Burning pain in cerebrum and violent chills, vertigo in morning; < from light; had been exposed to sun till sparks flashed before eyes, and a sense of heaviness and enlargement of head came over him.

Sunstroke: loss of consciousness, sensation and motion; countenance expressionless; pulse full, slow and intermittent; respiration slow and labored; pupils dilated, with eyes turned up; jaws firmly clenched; limbs relaxed and motionless; occasional muscular tremors.

Unconscious; excessive trembling and jactitation of muscles, more or less through entire body; jaws set; eyes relaxed; pupils dilated; skin cold, clammy, and covered with profuse sweat; pulseless at wrist and ankles; only a faint fluttering at breast; breathing rapid and almost imperceptible; did not respond to loud calls near ear, nor to gentle shaking; tendency to vomiting, shortly followed by vomiting of bile and mucus, succeeded by involuntary stool, with escape of much flatus and urine; could not swallow. θSunstroke.

Sunstroke: vertigo, violent pain; pale face, feeble pulse; labored breathing, nausea; comatose; or, throbbing in head; face yellowish-red, or livid; eyes fixed; pulse full, slow; tongue coated, no appetite.

Severe headache, pulsation in temples, fulness and heavy aching on vertex; she had her hair cut off to within two inches of scalp, because heaviness and heat of it almost distracted her; pain < from least motion; has not slept for three nights; keeps eyes closed because light is disagreeable, though not painful; tongue coated heavily on back part; moderate thirst, putrid taste; perspiration alternately with chilliness, which causes her to cover herself up very heavily, till perspiration breaks out again; oppressed breathing caused by sense of weight in chest, and occasional light cough; pulse 106, small and empty; hands hot; aversion to food; on attempting to rise, such weakness of limbs she could not stand. θAffection of brain.

Threatened meningeal inflammation. θYellow fever.

Outer Head. Bad consequences of cutting hair.

Rigidity of occipito-frontalis.

Head felt too large; larger than usual; enormously large. Constant inclination to throw head backward.

Sight and Eyes. Flashes of lightning, sparks, mist or black spots before eyes.

Photophobia.

As if focus of r. eye were suddenly displaced; sees everything half light and half dark.

Digitized by Google

Letters appear smaller.
Objects dance with every pulsation.
Sensation of whirling, of confused vision, of objects dancing before eyes.
Black spots before eyes during headache, especially when turning quickly.
Dim sight with vertigo, or fainting.
Pupils contracted. θSunstroke.
Pupils dilated; eyes upturned; sunstroke; eyes rolled outwards and up; convulsions.
Eyes dull, staring, sunken.
Red injected eyes during headache; reddened with wild expression.
Staring, wild look, protrusion of eyes.
Eyes very painful, bloodshot.
Face flushed, eyes inflamed.
Said her eyes were falling out.
Eyes feel as if some one were pulling them from within outward.
Drawing, pressing, aching, bursting pain in eyes; soreness, quivering and twitching.
In eyeballs: stitches; twitchings; soreness; pressure; pain as if protruding.
Pressing downward towards eyes.
Heat in eyeballs, lids and around eyes.
Beating over orbits.
Throbbing contracting the eyelids.
Supra-orbital neuralgia; pain usually commences at 6 A.M. and continues till 11 or 12.
Pain under l. eye.

Hearing and Ears. Ringing in ears; audible pulse.
Noise in l. ear, as if it came from heart, every evening while reading, sometimes prevents falling asleep, but gets better during sleep.
Deafness, ears as if stopped up; deafness followed by blurred vision.
Heaviness, deafness, and sensation of being stopped up, in ears.
Hardness of hearing.
Paralysis of auditory nerve.
Stitches in ears; ears feel as if closed.
Throbbing piercing from within outward, in r. ear.
Throbbing: above ears; from occiput to ears.
Sensation of fulness in and around ears.
Ears red.

Smell and Nose. Pains in root of nose, headache extends to nose.
Sudden sneezing; fluent coryza.

❙Pulsating toothache with headache.
❙Pulsating, throbbing pains; teeth feel elongated.
❙Toothache from taking cold, after having been overheated; beating of pulse felt in all the teeth, or a drawing; pain extending to whole r. side of face, having waves of spontaneous exacerbation, without being influenced by anything in particular.
❙Toothache; after hitting, in chewing a hard substance, a bad tooth, a pain extends from that tooth into whole row

Digitized by Google

of teeth, into whole r. lower jaw and cheek, and here especially in nervus infra orbitalis, also into r. ear, temple and parietal bone; pain is continual, with sudden spasmodic exacerbations; it has no rhythm, nor is it influenced by cold or warm air, rest or motion; gums swollen and sensitive to touch.

▮Pain in decayed teeth, l. side, after falling asleep; pain felt only at night, awakens her; malar bone sore to touch; pain under l. eye and on side of neck.

▮Rooting pain in one upper and one lower molar tooth, r. side; both were carious; they feel longer, the gums are swollen; pain extends into r. temple, ear and parietal bone; nothing seems to influence the pain. θToothache.

▮Sudden pain from decayed inferior molar, concentrates in temple.

▮Severe pain from decayed tooth, lasting several hours.

▮Stabbing pain in gums, r. side passing to l., without ceasing in r.; < from hot, > from cold applications.

▮Teeth decay: after mercury; catamenia scanty; following exposure to sun.

[11] **Taste and Tongue.** Taste: bitter, with nausea; aromatic; sweet; warm; leaves fatty taste.

▮Tongue milk-white, without coating; violent headache; wants head pressed or bound; cannot eat; very weak and miserable.

▮▮Tongue coated heavily on back part; putrid taste. θBrain affection.

▮▮Tongue feels swelled and raw, with spasmodic twitchings.

▮Tongue numb, as if burnt; prickling, stinging.

▮Difficulty in conversing, from diminished power of tongue and confusion of ideas.

[12] **Inner Mouth.** ▮Saliva increased, slimy.

▮Froth about mouth; convulsions.

▮Sensation of soreness and swelling on roof of mouth, with pulsation.

[13] **Throat.** Soft palate: dry; feels as if drawn up.

▮Itching of soft palate and throat.

▮Swollen sensation in fauces.

▮Throat feels as if swelling; full sensation in both sides of neck.

▮Constriction at top of larynx; in throat, as if throttled.

▮Tickling, heat and soreness in throat.

[14] **Appetite, Thirst. Desires, Aversions.** ▮Coated tongue, no appetite. θSunstroke.

▮Wants cold water; also from dry, parched feeling.

▮▮Increased desire to smoke.

[15] **Eating and Drinking.** ▮Wine aggravates all symptoms.

▮Alcoholic stimulants cause delirium, congestion, stupor, etc.

[16] **Hiccough, Belching, Nausea and Vomiting.** ‖Nausea: with congestion; and retching, during sunstroke; with faint feeling; causing sweat, which relieves.
‖‖Nausea with, and caused by, headache, with colic; congestion of blood to head and chest, and pale face.
‖Faint, warm, sickening sensation in chest and stomach, resembling threatening of sea-sickness; also slight giddiness, especially on moving about.
‖Vomiting: spasmodic, in hydrocephalus; in sunstroke.
‖Sea-sickness.

[17] **Scrobiculum and Stomach.** ‖Gnawing in epigastrium.
‖Attack begins suddenly with violent pain in epigastrium.
‖Sensation of emptiness in pit of stomach.
‖Faint feeling at pit of stomach; also with throbbing there.
‖‖Sensitiveness of pit of stomach, especially on stooping.
‖Pain in pit of stomach, as if sore, when touched; < when stooping.
‖Respiration labored; pit of stomach the seat of distress.
θSunstroke.
‖Dull, heavy pain in stomach.
‖Stomach and head feel as if he had been out in hot sun.

[18] **Hypochondria.** Pain in l. hypochondrium, half-way between pit of stomach and side.

[19] **Abdomen.** ‖Rumbling in bowels, belching, passing offensive flatus.
‖Cutting, mostly below navel (wakens one in morning).
‖Venous congestion to abdomen.

[20] **Stool and Rectum.** ‖Stools: loose, scanty, with much rumbling; copious, loose, dark, lumpy, with colic, heat in anus, nausea and sudden urging.
‖‖Diarrhœic stools with rumbling and discharges of flatus, beginning in morning and lasting all day.
‖Diarrhœa, with sudden cessation of menses.
Frequent passage of flatus during stools, with a loud, sharp noise.
‖Inclined to be costive.
After 10 in evening, an unaccustomed time, a hard and unusual stool, pinching in abdomen before and after it, till going to sleep.

[21] **Urinary Organs.** ‖Urine: abundant, highly albuminous; must rise often at night to pass it; high-colored, burning while passing; with red sediment and muddy, reddish-yellow slime.

[22] **Female Sexual Organs.** During menstruation: congestion of blood to head and chest; headache; fainting.
‖‖Menstrual period three days every six weeks, accompanied by lumbar pain; pupils dilated; < at night; some relief from hot fomentations.

Digitized by Google

‖Catamenia had not appeared for six weeks; throbbing pains through temples and pressure and heaviness on head; feels sick; constipation; restless at night.

‖‖Intense congestion of brain induced in plethoric constitutions by sudden suppression of menses, or appearing in place of the menses.

‖Disturbances in intercranial circulation at time of menopause.

Instead of menses: headache; congestion to head; pale face: < in warm room, > when walking in cold air; diarrhœa; fainting.

‖Before, during, or at end of menstruation, or when it does not appear at all, fulness in head, with or without redness of face and eyes, especially with throbbing, sometimes with excessive tearing, throbbing pains.

‖‖Headaches occurring after profuse uterine hemorrhage.

‖Flushings to head during climacteric period.

‖During climacteric: flushes of heat daily in frequent attacks, with pressure in head, nausea, loss of senses; cannot go alone in street; vertigo; swelling and numbness in feet.

‖Since first menstruation, congestion to head, with loss of consciousness; face became deep red or purple color; hands clenched, thumbs thrown into the palms; froth before mouth; attacks became more frequent and severe, so that instead of appearing only at times of menstruation, they had for several years occurred three or four times in twenty-four hours; menstruation scanty, constant fear of attack; < from mental or physical effort; after attack, palpitation violent, subsiding after an hour; constant sensation of tremulousness in cardiac region; pulse quick, small, irregular; heart's impulse increased, action rapid, irregular and tumultuous, blending of first and second sounds, so that they were indistinguishable; numbness in l. extremities.

[24] **Pregnancy. Parturition. Lactation.** ‖During pregnancy: headache; congestion of blood to head and chest.

‖‖Rush of blood to head in pregnant women, especially with paleness of face, loss of consciousness, falling down insensible, sometimes with cold sweat, especially in face.

‖Face bright red, unconsciousness, extraordinary full, quick pulse; strikes about her with hands and feet, can scarcely be kept in bed, throws herself wildly about, foams at mouth, eyeballs roll convulsively about, or stare straight in front, or are drawn upwards, convulsions last four or five minutes, during intervals turns about restlessly in bed; violent throbbing of heart and carotids. θConvulsions after labor.

Digitized by Google

‖Eclampsia: unconscious; face bright red; puffed; pulse full, hard; urine copious and albuminous.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Acute irritation of cerebral nerves, vertigo; slight bronchial irritation with frequent expectoration of thick mucus. θLaryngo-trachitis.

[26] **Respiration.** ‖Breathing: heavy, labored, stertorous; oppressed from feeling of weight; accelerated; must often breathe deeply; sighing.

Sensation of constriction and oppression of chest, with perceptible palpitation, compelling to draw deep breath.

‖Oppressed breathing, caused by sense of weight in chest; occasional light cough. θAffection of brain.

[28] **Inner Chest and Lungs.** ‖Constriction of chest; chest feels as if laced.

‖Pain in chest like tension, and frequent inclination to deep respiration.

‖Oppression of chest alternating with headache.

‖Congestion alternating between chest and head.

‖Sinking feeling in head and chest, as from working in hot room.

‖Sensation of flying heat, rising from chest to face and head.

‖Sharp, cutting pains across shoulder-blades to anterior part of chest.

‖Numb sensation moving upwards in chest and down l. arm.

[29] **Heart, Pulse and Circulation.** ‖Sharp pains in the heart.

‖Fulness in the heart.

‖Violent action of heart, distinct pulsation over whole body.

‖‖Violent palpitation of heart, with throbbing carotids, pulsating headache in forehead and between temples.

‖Violent palpitation of heart; frequency of pulse; stitches in l. hypochondrium; feeling as if she would die; numbness in whole l. arm.

‖Violent palpitation; constant tremulous sensation in cardiac region; heart's impulse increased; pulse quick, small.

‖Palpitation of heart with heat in face, accelerated pulse and pulsation of carotid arteries.

After several minutes, violent and rapid palpitation; felt also in head like a hammer, especially when stooping, so that stooping seemed impossible to him; several times when stooping, stitching pain in region of heart, so violent that he feared to bend forward again.

‖Heart's action easily excited; violent palpitation, throbbing carotids, pulsating headache; < stooping.

‖‖Laborious action of heart; oppression; frequent pulse.

Digitized by Google

Pressure in heart, as if it was being contracted.

Sensation of fulness about heart, almost increased to pain; it seems as if it would rise to throat; pulse decreased.

In heart sensation of fulness, heaviness and heat, with labored beating of heart.

Blood seems to rush to heart and mount rapidly into head.

Alternate congestion to heart and to head.

Sharp pains in heart.

Severe stitches from heart extending into back, between shoulders.

Anxiety in præcordia; weakness.

Purring noise in region of heart when lying; pulse intermittent; must have head high; < when lying on l. side; > on right.

Blending of first and second sounds so that they were indistinguishable.

Accelerated pulse; beats increased.

Pulse accelerated while the headache lasts.

Pulse full, slow and intermittent. θSunstroke.

Pulse accelerated to 100 by walking; soon fell to 38.

Pulse mostly accelerated, often changing suddenly to slow and back again.

Pulse: irregular, intermitting; quick, small, irregular, with violent action of heart; small and rapid; weak and slow; low and feeble, in sunstroke.

Arteries in head become distinct.

Throbbing of carotid arteries, both seen and felt.

Temporal and carotid arteries beating violently.

Plethoric female had, since she began to menstruate, attacks of blood to head alternately with rush of blood to heart, with pale or red face, five or six times in day; at same time she lost her consciousness and fell down; alternate palpitation and cerebral congestion, with loss of consciousness, convulsions and foam before mouth.

As an intercurrent remedy in angina pectoris, to prevent the organism from getting accustomed to the influence of *Aur. mur.*

[20] **Outer Chest.** Sweat on the chest.

[21] **Neck and Back.** The neck feels weak and tired, cannot support the head.

When lying down, sensation as if neck were grasped.

Constriction around lower part of neck.

Sensation of stiffness or tension about head and neck as if they had been laced in; clothing seems too tight, was obliged to ease his coat and necktie.

On neck sensation of fulness, tension, pulsation.

Digitized by Google

‖Nape of neck stiff, with headache.
When throwing back his head, he felt a pain like cramp in back of his neck, to the left, in region of sixth and seventh cervical vertebræ.
‖Sensitiveness and pain in occiput, upper back and upper chest, coming on a few months after violent jarring from being thrown from a carriage.
‖Severe neuralgic pain in lower part of cervical region of spine and r. arm.
‖Sharp cutting across scapulæ.
‖Hot sensation down back; burning between scapulæ.
‖Pain down entire spine, after constriction in chest; shiverings downward.
‖Old contusions and jars.

[32] **Upper Limbs.** ‖Arms: nervous, uneasy; heavy, as if circulation was checked; numbness, heaviness following throbbing; restlessness, weakness, want of circulation.
‖Numbness and sensation of weariness of l. arm, so that it requires great effort to raise the arm; stiffness of middle joints of fingers.
‖Pain from shoulder to back of r. hand.
‖Weakness of wrists after headache.
‖Quivering in hands and wrists during headache.
‖Hands clenched, thumbs thrown into palms. θConvulsions.
‖Beating of pulse is perceptible in all fingers.
‖Trembling of fingers.
‖Rheumatic pains in fingers of l. hand.

[33] **Lower Limbs.** ‖‖On attempting to rise, such weakness of limbs could not stand. θAffection of brain.
Restlessness in limbs causes him to rise.
‖Jerking of limbs with loss of consciousness.
‖Limbs relaxed and motionless. θSunstroke.
‖Thighs weak during headache.
‖‖Weakness and numbness of thigh.
‖Unsteady gait.
‖‖Weakness of legs, knees and ankles give way.
‖The knees give (when getting up from bed) on account of headache; weakness of knee-joints afterwards for an hour.
‖Knocking of knees and thighs together during headache.
‖Acute pain in l. knee on moving, seemed to be deep in joint, without much heat or swelling; sudden twinges or pricks, while at rest, is obliged to rise and straighten limb. θAcute rheumatism.
‖Cold feet, with nausea, palpitation.

[34] **Limbs in General.** Great weakness in middle portion of thighs and arms.

Digitized by Google

Sensation of weakness and trembling in limbs.
Extremities feel bloated.
Sharp pricking pain in arms and legs.
ǂNumbness in left extremities.

[35] **Rest. Position. Motion.** While at rest pain in knee <, must rise and straighten limb.
When lying down sensation as if neck were grasped.
Lying still: > headache.
Lying: on back or side causes "pillow to beat;" purring noise in region of heart.
Lying on l. side: purring in region of heart.
After lying down: headache <.
Must have his head elevated.
Cannot lay head on pillow, head is so heavy.
Sitting still: > headache.
Sitting up: vertigo <.
Bending head backwards: < headache.
Bends head forward: from heaviness.
Stooping: vertigo; < headache; pit of stomach sensitive; stitching pain in region of heart; palpitation <.
Motion: of head, giddiness; < headache.
Using eyes: < headache.
Restlessness in limbs causes him to rise.
Shaking head: < pains in forehead; < sore and bruised feeling in brain.
Turning quickly during headache: black spots before eyes.
Ascending steps: headache <.
Walking: < headache; every step felt in neck; in cold air > headache; accelerates pulse to 100.
Knocks head against wall with headache.
Attempts to spring from window.
Runs about room: with headache.
Romping: causes headache.

[36] **Nerves.** ǂFeeling as after inhaling ether.
ǂRestlessness in limbs, must rise and walk.
ǂFeeling as after fright, not mental, but bodily.
ǂSensation as of throbbing throughout body, with heat and sweat.
Painless pulsation all over body; circulation easily quickened.
Feeling of fulness throughout body.
Pulsations, tingling, thrills, and a peculiar sensation of warmth through body, extending from above downward.
Weakness as from loss of sleep.
ǂFeeling of prostration. θSunstroke.
ǂUnconscious falling down, or fainting with consciousness.
ǂJerkings through body.
ǂConvulsions: epileptiform, cerebral congestion, scanty or

Digitized by Google

suppressed menses; hands clenched, thumbs in palms, face red, eyes rolled upward, then sopor; left-sided, with fingers spread; face alternately red and pale; each attack occurs regularly every three hours, begins suddenly with violent pain in epigastrium, upward in chest and down l. arm, with uterine derangement. θConvulsions.

‖Strong, healthy-looking child subject to convulsions at intervals of a few months; attacks preceded by drowsiness, soon after which child fell into a convulsive state, with clenching and jerking upward of fists and legs; face red; eyes rolled outward and upward; then followed a soporific condition, lasting several hours, followed by another convulsion.

‖Great congestion of head and heart; during spasms he spreads his fingers and toes asunder.

‖Convulsions, especially l. fingers spread apart.

‖Convulsions after mental or physical effort.

‖Epileptic attacks with aura epileptica.

‖Epileptiform attack in young lady æt. 20; congestion to head, loss of consciousness, jerking of limbs; no foam at mouth; dysmenorrhœa with scanty menstruation.

‖‖Epileptic convulsions with congestion to head and heart.

‖Unable to speak, although usually a very noisy child; mouth drawn to l. side; cannot protrude tongue in a straight line.

‖Loss of power to articulate, also has no memory for words. θAphasia.

‖Effects of alcoholic stimulants, intoxication, delirium tremens, congestions, sleepiness and subsequent depression.

‖Spasmodic and neuralgic affections.

[37] **Sleep.** ‖Drowsy, yawning; inclination to deep inspiration; face hot and pale.

‖Yawning with headache, congestion of blood to head.

Sleepiness early in evening.

‖Restless sleep; awakes with fear of apoplexy.

‖Sleepless.

‖Dreams: confused; of homesickness, with tears; of comical heads.

Difficult to awaken.

[38] **Time.** Worse morning and forenoon: headache, languor, colic.

Worse afternoon and evening: headache; diarrhœa.

Morning: on rising, vertigo; throbbing in head <; congestion to head; vertigo; cutting pains below navel wakes one; diarrhœic stools.

During day: cataleptic state of occipito-frontalis muscle.

Digitized by Google

From 6 A.M. until 11 or 12: supra-orbital neuralgia.
After 10 in evening: a hard, unusual stool.
Night: pain in decayed teeth; must rise to pass urine, lumbar pains <; restless.

[39] **Temperature and Weather.** ‖Children get sick in the night after sitting opposite an open coal fire, or falling asleep there.
|Bad effects from having the hair cut.
‖Bad effects from being exposed inordinately to the sun's rays.
Open air: vertigo <; headache with unconsciousness >.
Damp, rainy days: headache.
Wet, dull weather: attacks of headache.
Gas-light: causes headache.
Warm weather: brings back headache.
Warm room: headache <.
Heat of bed: faceache <.
Taking cold from overheating: causes headache.
Overheating: causes headache.
Hot applications: < pain in gums.
Heat: head will not bear it.
Cannot walk in sun nor bear heat from stove.
Rays of sun cannot be borne on head.
|Bad results from sunstroke.
Cold applications: > pains in gums.
Cold air: > headache.
Cold water: < headache; causes spasms; > congestive headache.
Excessive cold and heat: cause hyperæmia of brain.

[40] **Fever.** |Chill: after getting heated; alternates with sweat; with vomiting; head as if screwed up; in intermittent fever.
|Chill after getting heated; drawing pain and heat in head, vertigo, buzzing in ears, flushed face.
|Perspiration alternately with chilliness, which causes her to cover herself up very heavily, till perspiration breaks out again. θAffection of brain.
‖Flushes of heat; waves of heat upward.
|Heat, especially in face, ascending from pit of stomach to head.
|As if warm water were running upward from nape of neck.
|Sensation of warmth throughout body.
|Fever heat, and small, quick pulse. θSunstroke.
|Feeling as if perspiration would break out all over.
‖Sweat especially on forehead.
|Cold sweat, especially on face, during congestion to head.
‖Perspiration principally on face, after sleeping.

Digitized by Google

‖Very profuse perspiration, especially on face and chest.
‖Perspiration in the hands.
Perspiration relieves nausea.
‖Sweat alternates with chill.
‖Typhoid fever; very violent headache; wants head squeezed; tongue is not furred, but as white as milk; can't eat, feels weak and miserable.

[41] **Attacks, Periodicity.** Frequent: congestion to head; constriction around neck after a jar; flow of pale urine; passages of flatus during stools; attacks of flushes of heat.
Gradually: headache growing more severe after working in sun.
Periodical attacks: of facial neuralgia.
Waves of spontaneous exacerbation: toothache.
Four or five minutes: convulsions.
From five to ten minutes: intense pain in head.
For an hour: arteries in head became distinct.
Lasting several hours: pain from decayed tooth.
Five or six times a day: congestion to head accompanied by unconsciousness and convulsions.
Every 3 hours: convulsions.
Lasting 24 hours: congestive headache.
Daily for several months: sharp pain in l. temple.
All day: attacks of headache; congestion to head; diarrhœic stools.
Every evening: while reading noise in l. ear.
Every 12 or 15 days: attacks of headache.
For 3 nights: has not slept from headache.
Three days every six weeks: menstrual period.
All summer: headache < every day with the sun.
Every day during climacteric period: flushes of heat.

[42] **Locality and Direction.** Right: stitches in temple and forehead; focus of eyes displaced; piercing, throbbing in ear; toothache, lower jaw and cheek; neuralgic pain in arm; pain from shoulder to back of hand.
Left: headache with vomiting; sharp pain in temples; pain under eye; noise in ear; tic douleureux of side of face; pain in decayed teeth; pain under eye and on side of neck; pain in hypogastrium; numbness in extremities; numbness down arm; stitches in hypochondrium; weariness and numbness of arm; rheumatic pains through fingers; pain in knee; convulsions on side; fingers spread apart in convulsions; mouth drawn to side in convulsions
From right to left: stabbing pains in gums.
From within outward: piercing pain in forehead; pain in temples; eyes feel as if pulled; throbbing piercing in r. ear.

Digitized by Google

From back to front: beating in head.
From above downward: sensation of warmth through body.
From l. breast into head: throbbing moving in waves.
Rising and falling: like waves, headache; fulness in brain.
Alternating to head and heart: congestion.

Sensations. Chin feels as if too long; chest feels as if screwed together; as if brain was expanding, were moving in waves; as if all the blood had mounted to head; as if he were hanging with head downwards; as if there was a great rush of blood to head; head feels large; as if head were pressed together; as if cold sweat were on forehead; arteries felt like whip-cords; as if whole head were crowded with blood; as if something were pumped into vertex; brain feels as if too heavy and too large for skull; as if brain were attempting to burst skull; as if something were moving in waves to head; as if inside of head were sore; as if head would drop to pieces; as if focus of r. eye were suddenly displaced; as if he must die; red capillaries in eye as if injected; as if everything were crowded out at forehead; pressure in occiput, seems as if he would lose his reason; as if head would burst; as if warm water were running upwards from nape of neck; as if neck were gripped by a hand; as if some one were pulling eyes from within outward; noise in l. ear as if it came from the heart; ears as if stopped up; lower lip as if swollen; teeth feel as if elongated; teeth feel as if loose; tongue feels swollen; tongue as if burnt; palate feels as if drawn up; fauces as if swollen; throat feels as if swelling; in throat as if throttled; pit of stomach as if sore; stomach and head feel as if he had been put out in hot sun; chest feels as if laced; palpitation in head like a hammer; as if heart was being contracted; as if heart would rise to throat; as if neck were grasped; as if head and neck were laced in; arms as if circulation was checked; as after inhaling ether; as after fright; weakness as from loss of sleep; as if screwed up during chill; as if warm water were running; as if perspiration would break out.

Pain: beginning at root of nose; in vertex and sides of head; in forehead; starts from decayed inferior molar tooth, concentrates in temples; in vertex and crown; deep in brain; in occiput; the whole length of spine; in ears; in eyes; under l. eye; in jaw; from teeth to r. side of face; in decayed tooth; under l. eye; on side of neck; in pit of stomach; in l. hypochondrium; in lumbar region; in chest; in occiput; upper back; upper chest; down spine from shoulder to back of r. hand.

Digitized by Google

Intense pain: in cervical and occipital regions; in eyes.
Frightful headache.
Raving headache.
Raging pain: in whole head; in saggital suture.
Violent pain: in epigastrium; in chest; in l. arm before convulsion.
Violent shoots: into head.
Violent: headache; pain in epigastrium.
Severe pain: in forehead; in tooth.
Tearing pain: through head.
Sharp cutting: across scapulæ.
Piercing pain: in forehead; in l. temple; in r. ear.
Racking: in head.
Cutting pains: into occiput; across shoulder-blades to anterior part of chest; below navel.
Acute pain: in l. knee-joint.
Stabbing pain: in gums.
Sharp pain: in l. temple; into occiput; across shoulder-blades to anterior part of chest; in the heart.
Stitching pain in region of heart.
Stitches: in temples; r. side of forehead; in eyeballs; in ears; in l. hypochondrium; from heart to back.
Bursting: in head; above ears; in temples; in eyes.
Cracking sensation in brain.
Burning pain: in middle of head, in cerebrum.
Rooting pain: in one upper and one lower molar tooth.
Pinching: in abdomen.
Pressing pain: in temples; in eyes.
Shoots: in head.
Neuralgia: in head; in eyes; in face; in lower cervical region; in spine; in r. arm.
Crampy pain: in back of neck.
Drawing pain: in eyes; in teeth; in head.
Tensive pain: over eyes and nose; behind ears.
Shocks: in brain synchronous with pulsation of arteries.
Violent beating: in head.
Beating: in head; in temporal and carotid arteries; across orbits.
Throbbing: in head; in temples; in front of head; over eyes; in temporal arteries; under frontal bone; in l. breast, then in head; back of neck; contracting eyelids; in ears; in all the teeth; heart and carotids; in arms; throughout body.
Pulsating: in head; in carotids; from forehead to vertex; in teeth; over whole body.
Painless pulsation: all over body.
Gnawing sensation: in masseter muscles; in epigastrium.
Aching: in vertex; in eyes; in teeth; in ear; in temple; in parietal bone.

Digitized by Google

Twinges: in l. knee.
Tingling: throughout body.
Stinging: of tongue.
Prickling: of tongue.
Pricking: in l. knee; in arms; in legs.
Violent palpitation of heart.
Thrills: throughout body.
Jerkings: through body.
Bruised feeling: in brain.
Rheumatic pains: in fingers of l. hand.
Anxiety: in præcordia.
Burning: on lips; between scapulæ.
Sore feeling: in brain; in eyeballs; in roof of mouth; in throat.
Choking sensation: about throat.
Dull: headache; in forehead; pain in stomach.
Undulating sensation: in head.
Pressure: in temples; extends to back of neck; in eyeballs; in heart.
Heaviness: of head; in ears; in heart; in arms.
Oppression: of chest.
Tickling: in throat.
Fluttering: in head.
Flickering: before eyes.
Ringing: in ears.
Buzzing: in ears.
Confusion: of all senses.
Balancing sensation: in head.
Waves of heat: going upward.
Peculiar warmth: through body.
Heat: in head; in eyeballs; in lids; around eyes; in throat; in anus; in heart; in face; from pit of stomach upward.
Hot sensation: down back.
Warmth: throughout body.
Constriction: in vessels of head; around neck.
Congestion: in head; to occiput.
Tension: of head and neck.
Fulness: in head: in vertex; in ears; around ears; in the heart; in neck; throughout body.
Swollen: throat feels.
Bloated feeling: in extremities.
Expansive pressure: in head.
Uneasy feeling: in arms.
Sensitiveness of upper part of back and neck.
Restlessness: in arms; in limbs.
Twitching: of eyes; in eyeballs.
Quivering: of eyes; in hands; in wrists.

Digitized by Google

Trembling: of fingers; in limbs.
Crushing weight: across forehead.
Weight: at vertex.
Stiffness: of articulation of jaw; of neck and head; of middle joints of fingers.
Numbness: in lower lip; of tongue; in extremities; in chest; in l. arm; in arms; of thigh; in l. extremities.
Rigidity: of occipito-frontalis.
Faint feeling: in stomach; in chest.
Sinking feeling: in head and chest.
Tired feeling: in neck.
Emptiness: at pit of stomach.
Weariness: of l. arm.
Weakness: in neck; in arms; of wrists; of thighs; of legs; of knee-joints; in middle portions of thighs and arms; in limbs.
Itching: in middle of face; of soft palate and throat.
Shivering: down spine.

" **Tissues.** ‖Congestions; blood tends upward; vessels pulsate; veins (jugular, temporal) enlarged.
‖Seeming plethora, rapid deviations in distribution of blood; useful as a substitute for bleeding.
‖Bad effects from mental excitement, fright, fear, mechanical contusions and their later consequences, from having hair cut and exposure to rays of sun.

" **Touch. Passive Motion. Injuries.** ‖Sea-sickness, or bad effects of too much riding or driving.
Pressure: > headache; cannot bear weight of hair; clothing seems too tight.
Touch: pit of stomach sensitive; malar bone sore.
Reading: causes headache.
Old contusions and jars.
From hurting a bad tooth in chewing, toothache.
After jarring chin by a fall twenty years before, chin feels elongated.
Shaking or jarring: causes headache.
After being thrown from carriage: sensitiveness of cervical region; cutting pains into occiput through chest; constrictions around neck.
After violent fall on head: vertigo.

" **Stages of Life, Constitution.** ‖Florid, plethoric, sensitive women.
‖Nervous, sanguine, readily affected persons.
Girl, æt. 2, had convulsions, which yielded to *Bellad.*; paralytic symptoms.
S. A. C., girl, æt. 8, bilious nervous temperament, high-tempered; occasional attacks of epistaxis; headache.
L. S., boy, æt. 12, bilious nervous temperament, slightly lymphatic; headache.

Digitized by Google

Woman, æt. 17, healthy, but weak and thin; convulsions after labor.
Girl, æt. 19; palpitation of heart.
Girl, æt. 20, decayed teeth; toothache.
Man, æt. 24, epileptic eight years; mania.
Lady, æt. 25; congestion to head and convulsions during menstrual period.
Girl, æt. 26; suppression of menses.
Miss, æt. 28, subject to nervous headaches; headache from fright.
Lady, æt. 28, extremely nervous temperament; affection of brain.
Woman, æt. 28, weak from undue lactation and neglect of air and exercise; supra-orbital neuralgia.
Patient, æt. 30, has suffered since childhood; violent headaches.
Man, æt. 30, after having retired in ordinary health; aphasia.
B. M. S., æt. 32, large, full-formed man, bilious sanguine temperament; caught a violent cold by overheating and standing in a draft of air with his coat off; had drank large quantities of cold water; had eaten nothing in twenty-four hours; violent headache.
Mrs. M. J. C., æt. 35, bilious sanguine temperament; has had four children and four miscarriages; congestion to head.
Woman, æt. 35; congestive headaches.
Woman, æt. 36, dyspeptic; hemicrania.
Woman, colored cook, æt. 40, widow, one child, æt. 15; violent headache and congestion to brain.
Clergyman, æt. 44, large and fleshy, and in enjoyment of perfect health; loss of location.
Laborer in iron foundry; congestion to head.

GNAPHALIUM POLYCEPHALUM.

Common Life Everlasting. *Compositæ.*

A fragrant, bitterish, aromatic annual, growing in fields and woods; flowers in summer and autumn.

Tincture from the fresh plant, chopped and pounded to a pulp.

Provings by Banks, Fuller and Woodbury. See Allen's Encyclopædia, vol. 4, p. 456.

CLINICAL AUTHORITIES.—*Sciatica*, Cate, Raue's Rec., 1874, p. 261; Dudley, McCourt, Trans. Hom. Med. Soc. Penna., 1882, p. 161.

[3] **Sensorium.** Giddiness, especially after rising from recumbent position.

[5] **Inner Head.** Fulness about temples.

Dull, continuous pain in back of head, with shooting pain in eyeballs.

[8] **Upper Face.** Dull, heavy expression; face appears bloated.

Neuralgic pain, of an intermittent form, of superior maxillary of both sides.

[11] **Taste and Tongue.** Flat, sweetish, sickening taste in mouth.

Tongue covered with long, white fur.

[12] **Inner Mouth.** Mouth feels parched and tastes badly.

[16] **Hiccough, Belching, Nausea and Vomiting.** Flatus of stomach, windy eructations, nausea and hiccough.

[19] **Abdomen.** Colic pains in various parts of abdomen, which is sensitive to pressure, in cæcum.

Borborygmus, with emission of much flatus.

[20] **Stool and Rectum.** Rumbling in bowels with stool before breakfast.

Looseness of bowels, with passage of pale-colored feces.

Diarrhœic discharges in morning and during day, with irritable temper; pains in bowels in children.

Copious, watery stool at night, with much prostration, nausea, pain and rumbling in bowels.

Dark-colored, liquid, offensive stool in morning, afterwards pain in bowels all day.

Vomiting and purging, like cholera morbus, in the night and all next day.

Constipation for three days after the diarrhœa.

[21] **Urinary Organs.** Pain in kidneys, with frequent slight pain in prostate gland.

Sensation of fulness and tension in bladder, even when just emptied.

Digitized by Google

[29] **Male Sexual Organs.** Increase of sexual passion, waking with an erection and urgent desire for an embrace; the desire was rather mechanical than passional.
‖ Irritation of prostate gland.

[30] **Inner Chest and Lungs.** Pains in chest, darting from side to side.

[31] **Neck and Back.** Numbness of lower part of back, with lumbago.
Sensation of weight in pelvis.

[32] **Upper Limbs.** Feeling of debility in anus, with rheumatic pains.

[33] **Lower Limbs.** Pains dull or darting, or cutting from r. hip-joint posteriorly downward to foot; < lying down, from motion, stepping; > sitting in chair.
‖ Intense pain along sciatic nerve, following its larger ramifications.
‖ Sciatica.
‖ Feeling of numbness occasionally taking place of sciatic pains, making exercise very fatiguing.
Rheumatic pains in knee and ankle-joints.
Frequent cramps of calves of legs.
Cramps of feet in bed.
‖ Gouty pains in big toes.

[36] **Rest. Position. Motion.** Lying down: pain from hip-joint to foot <.
Sitting in chair: pain from hip-joint to foot >.
After rising from recumbent position: giddiness.
Motion: pain from hip-joint to foot <.
Stepping: pain from hip-joint to foot <.
Exercise very fatiguing: from numbness in lower limbs.

[38] **Time.** Morning: diarrhœic discharges; dark-colored, liquid, offensive stool.
During day: diarrhœic discharges; pain in bowels.
Night: copious, watery stool; vomiting and purging.

[41] **Attacks, Periodicity.** Intermittent: neuralgic pains in face.
Three days: constipation.

[42] **Locality and Direction.** Right: dull, or darting, or cutting pain from hip-joint to foot.

[43] **Sensations.** Pain: in bowels; in kidneys; in prostate gland; in chest.
Intense pain: along sciatic nerve.
Cutting pain: from r. hip-joint to foot.
Darting pains: from side to side in chest; from r. hip-joint to foot.
Shooting pain: in eyeballs.
Neuralgic pain: of superior maxillary.
Gouty pains: in big toes.

Digitized by Google

Rheumatic pains: in limbs; in knees and ankle-joints.
Colic pains: in various parts of abdomen.
Cramps: of calves of legs; of feet.
Dull, continuous pain: in back of head, from r. hip-joint to foot.
Lumbago.
Irritation: of prostate gland.
Weight: in pelvis.
Fulness: about temples; in bladder.
Tension: in bladder.
Debility: in arms.
Numbness: of lower part of back; in limbs.

[45] **Touch. Passive Motion. Injuries.** Pressure: abdomen sensitive.

[48] **Relations.** Compare: *Anis. stel., Chamom., Ipec., Mercur., Pulsat., Xanthox.*

GOSSYPIUM HERBACEUM.

Cotton Plant. *Malvaceæ.*

The cotton producing plant of the South; a native of Asia. The root possesses the medical virtues, and the tincture is prepared from the fresh inner root-bark, chopped and pounded to a pulp.

Proved by Williamson. See Allen's Encyclopædia, vol. 4, p. 458.

[3] **Sensorium.** ‖Giddiness of head.

[5] **Inner Head.** Stinging pain in head, going from forehead to vertex.

‖Pain, first burning, then stinging, extending from both temporal bones to middle of frontal bone.

‖Drawing pain over eyes, with stinging pain in pupils.

Knocking pain in r. parietal bone.

[7] **Smell and Nose.** Nostrils swollen and inflamed, l. <.

[11] **Taste and Tongue.** Taste of bad eggs, > after breakfast.

[12] **Inner Mouth.** Tonsils swollen, r. <.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea, with accumulation of saliva in mouth.

‖Nausea with inclination to vomit in morning before breakfast.

‖Morning sickness. θPregnancy.

[17] **Scrobiculum and Stomach.** Rotating sensation in pit of stomach, with uneasiness, anxiety and sighing.

‖Anorexia, with uneasy, depressed feeling at scrobiculum cordis, at time of menses.

Digitized by Google

[18] **Hypochondria.** Stitching in r. hypochondrium, lasting for a few minutes, and then drawing pain from both hypochondriac regions to pit of stomach.

[25] **Female Sexual Organs.** Stinging pain in both ovarian regions, and at the same time drawing towards uterus, lasting about ten minutes at a time.

Soreness between thigh and vulva, with a watery secretion.

Soft tumor between l. thigh and vulva, first as large as pea, and increasing to size of pigeon's egg, secreting a watery fluid, with sticking pain as if caused by a needle, < at night.

Swelling of outer part of l. labium, accompanied by intolerable itching; some swelling in r. labium.

Outer skin of both labia studded with innumerable pale, somewhat reddish granules.

‖Amenorrhœa; dysmenorrhœa; menorrhagia.

‖Scanty and painful or painless menses.

‖Amenorrhœa, with anæmia, and dyspeptic symptoms.

‖Menstrual flow lasts about twenty-four hours, and then becomes very sparse and painful.

Menses too watery and nineteen days too late.

‖Sterility, from uterine torpor.

[21] **Pregnancy. Parturition. Lactation.** ‖Morning sickness during early months of pregnancy; sensitiveness over hypogastric region; prostration of nervous system almost to syncope; nausea from least motion in morning soon after waking, with distress in pit of stomach; and, immediately on raising head, retching and violent efforts to vomit; at first very little comes up, except wind, with a loud noise; soon after, saliva and some thick fluid is discharged, and, occasionally, after much retching, a little bilious matter, but rarely any ingesta; wind is often discharged from bowels during efforts to vomit.

‖Morning vomiting, followed by faintness; she was unable to rise from bed.

‖Great distress, weakness and prostration. θMorning sickness.

Miscarriage.

In cases of lingering almost painless labors, where the uterine contractions are feeble or entirely inefficient. The case presents negative rather than positive symptoms.

‖Retained placenta.

[22] **Upper Limbs.** Tearing pains in r. arm and hand, and jumping pain from one finger to another.

Pale, red, papular eruption on back of both hands, with intense itching and watery exudation.

Heavy feeling in both hands, > when hanging them down, < in warmth of bed.

Digitized by Google

Crawling sensation in all the fingers, as if from worms.

[33] **Lower Limbs.** Stinging, drawing, tearing, and burning pain in lower extremities.

Trembling, twitching, and weary sensation in legs.

Small, round, dark red spots, with pale red spots around patella, on shins and ankles, itching intensely.

[35] **Rest. Position. Motion.** On raising head: retching and violent efforts to vomit.

Unable to rise from bed: from faintness and nausea.

When hanging hands down: heavy feeling >.

Motion: nausea from least motion.

[36] **Nerves.** General lassitude, with pains as if beaten.

[38] **Time.** Morning: nausea with inclination to vomit.

Night: sticking pain in tumor <.

[39] **Temperature and Weather.** Warmth of bed: < heavy feeling in hands.

[40] **Fever.** General external chilliness, with internal heat.

[41] **Attacks, Periodicity.** The pains are wandering, come and go.

A few minutes: itching in hypochondrium.

About ten minutes at a time: drawing towards uterus.

Twenty-four hours: menstrual flow.

Menses nineteen days too late.

During early months of pregnancy: morning sickness.

[42] **Locality and Direction.** Right: knocking pain in parietal bone; tonsil swollen; itching in hypochondrium; some swelling of labium; tearing pains in arm and hand.

Left: soft tumor between thigh and vulva; swelling of outer part of labium; itching of labium.

Pains are generally from above downward; < by motion; > by rest.

[43] **Sensations.** As if caused by a needle; pain in soft tumor; crawling sensation in fingers as if from worms; as if beaten.

Painful menses: pains as if beaten.

Tearing pains: in r. arm; in hand; in lower extremities.

Stinging pain: in head from forehead to vertex; from both temporal bones to middle of frontal bone; in pupils; in both ovarian regions; in lower extremities.

Sticking pain: in soft tumor between l. thigh and vulva.

Burning pain: from both temporal bones to middle of frontal bone; in lower extremities.

Jumping pain: from one finger to another.

Knocking pain: in r. parietal bone.

Drawing pain: over eyes; from both hypochondriac regions to pit of stomach; in lower extremities.

Soreness: between thighs and vulva.

Digitized by Google

Anxiety: in pit of stomach.
Sensitiveness: over hypogastric region.
Uneasiness: in pit of stomach.
Uneasy, depressed feeling at scrobiculum cordis at time of menses.
Drawing: towards uterus.
Twitching sensation: in legs.
Trembling sensation: in legs.
Rotating sensation: in pit of stomach.
Crawling sensation: in all fingers.
Distress: in pit of stomach.
Heavy feeling: in both hands.
Weary sensation: in legs.
Weakness.
Itching: in r. hypochondrium; in outer part of l. labium; intense on backs of both hands; intense on red spots on shins and ankles; of skin all over body.
Itching changes to burning after scratching.

" **Tissues.** Sympathetic symptoms of stomach, heart, bowels and nervous system, arising from disturbance of uterine functions, connected with menstruation or pregnancy.

" **Skin.** Itching of skin over whole body.
Itching changes to burning after scratching.

" **Relations.** Compare: *Act. rac., Apis, Asar., Bellad., Bryon., Lil. tig., Pulsat., Sabina, Secale, Sepia, Ustil.*

[1] **Mind.** Forgetfulness; dim recollection of recent events.
Weakness in head, can scarcely think.
Slow in thought; absent minded.
Dread of work.
Mood: changeable; forlorn; depressed; dejected.
Sadness, with thoughts of nothing but death.
Sad, despondent; she must weep; music makes her weep.
Oppression.

Digitized by Google

‖‖Feels miserable, unhappy.
‖Grief about slightest occurrences, even to despair.
‖‖Apprehensiveness, with inclination to weep, in frequent attacks.
‖Extreme apprehensiveness, so that she did not know how to overcome it.
‖It frequently seemed to him as though his end was near, or the greatest misfortunes were impending.
‖Full of fear in the mornings.
‖Solicitude concerning spiritual welfare.
‖Great anxiety.
‖‖Fidgety while sitting at work.
‖Desperate state of mind. #Ophthalmia after syphilis.
‖Extreme hesitation; she is unable to make up her mind about anything; timidity.
‖Irritability. #Gastrodynia.
‖Fretful; ill-humored; easily vexed; irritable.
‖Extremely fretful; everything angers and offends him.
‖Impudent, teasing, laughs at reprimands. #Cough after pertussis.
‖‖Very easily excited; hot hands even from speaking.
‖Scientific labor fatigues him.
‖Thoughts of many things at night prevent sleep.
‖Ailments from grief (or fright).

Sensorium. ‖‖Weakness of head down to neck.
‖Desolate, empty feeling in head.
‖Dulness of head.
‖Beclouded feeling in forehead.
‖‖Confusion of head, in morning, with nausea and sour vomiting.
‖Feels as if drunken when rising from bed in morning.
‖Attacks of dizziness, with inclination to fall forward.
‖Vertigo: during and after stooping: on looking upwards; in the morning on awaking; in evening; was obliged to lie down; with inclination to fall forward; venous stagnation.
‖Rush of blood with feeling of heat in head.
‖‖Congestion to head with roaring in ears, in young people.
‖‖Frequently feels faint, with partial loss of senses.
‖Forehead: pressure deep in; drawing; tearing; bursting. Lancinating pain in right temple, with flickering before eyes and lassitude; heaviness of eyelids.
‖Transient stitches in l. temple.
‖‖Stinging or stitching pains in temples.
‖Pain from l. temple down side of face to shoulder; face distorted; l. corner of mouth drawn inward and downward.
‖Periodical, unilateral headache; numbness in l. side of

head; violent nausea with straining and retching; obstinate constipation. θAmenorrhœa.

‖Semilateral headache, early in morning, in bed, with inclination to vomit.

❙Tearing pain in one side of head, in teeth and glands of throat.

❙Throbbing in sides of head.

‖Oppressive headache on top of head.

❙Pressive pain: in vertex; in occiput.

❙❙Pain as if constricted, especially in occiput, extending to nape of neck, which pains on looking up, as if broken.

❙❙Pain as if head were numb and pithy.

❙Pressive pain in head.

❙Violent headache, with eructations and nausea, during menstruation.

❙Frequent congestions to head and chest, dark red cheeks, oppression and anguish when lying down. θAmenorrhœa.

‖Headache, in morning on waking.

Outer Head. ❙Sensation as if skin of forehead was drawn into folds.

❙Scalp feels bruised.

‖Coldness of scalp.

❙❙Itching on scalp.

❙Sweat on head when walking in open air.

❙❙Burning round spot on top of head.

‖Lumpy patches on vertex, red and painful.

❙❙Humid eruption on vertex, painful to touch.

❙❙Scurfy spots on vertex, with violent sore pain when touched.

❙❙Much scaliness on head, causing distressing itching, becomes scurf, which disappears on washing, and is then humid.

❙Humid eruption on head, pains as if suppurating, only when touched.

❙Intolerable itching all over body, followed by a moist eruption behind r. ear; crept gradually upwards on r. side of scalp, forming pustules, which discharged an acrid, sticky fluid, by which hair stuck together, and finally fell off, leaving a bare spot behind, covered with a mealy dust and small crusts; felt < after washing; is very sensitive to cold air; has chronic lachrymation and fluor albus.

❙❙Eczema capitis, of entire scalp, forming massive, dirty crusts, which mat the hair together; painful and sore to touch.

❙Fissured eruption back of and above ears, on cheeks, and about region of posterior fontanelle, exuding a glutinous

Digitized by Google

secretion, forming a scab, and cracking open, itching a little all the time, but excessively before a storm; perfectly indifferent to any one touching the sore places.

‖Tinea capitis; eruption dry and scabby, large and confluent, color dark; cervical glands swollen and hard.

‖Eczema capitis in scrofulous child, infesting entire hairy scalp, and forming massive, dirty crusts, which mat the hair together.

‖‖Falling out of hair of scalp.

‖Bald places on head perfectly smooth and shining.

‖‖Circumscribed bald spot on front of head covered with herpes.

‖Porrigo decalvans.

‖Hair falls out, even on sides of head.

Sight and Eyes. ‖Photophobia; great sensitiveness of eyes to day-light; more than gas-light.

‖Photophobia usually intense and lachrymation profuse; child cannot open eyes before 9 or 10 A.M.; redness of eye generally marked; muco-puruleut discharges, constant, thin and excoriating; pains sticking, burning, aching or itching.

‖Light blinds or dazzles the eyes.

‖Eyes very sensitive to sun-light; it causes lachrymation.

‖‖Sun-light causes lancinating pains in eyes.

‖Hyperæsthesia of eyes; venous stagnation; constipation; incarceration of flatus.

‖From overexertion of eyes by reading, sewing, etc. θVertigo.

‖‖Weakness of eyes.

‖Short-sightedness.

‖Letters: appear double when writing; run together when reading.

‖Sees fiery zigzags around outside of field of vision, in evening, with open eyes.

‖Flickering before eyes. θHeadache.

‖Sees as through a mist.

‖Everything turns black before eyes when stooping.

‖During menstruation sight vanishes; blackness before eyes; l. hand becomes numb and dead; with crawling in it extending up arm, and also with crawling in lips.

‖Tiredness of eyes.

‖‖Pressing pain in eyes, morning and evening.

‖Drawing, extending from eyes up into head.

‖Stitches from temple through eye to inner canthus, on looking at anything white or red, or at sun.

‖Smarting in eyes, with heat in them.

‖Biting in eyes

‖Burning and aching in eyes.

Digitized by Google

Burning pain around eyes.
Ulcer on cornea: with a few small vessels running into it; with moist fissured eczematous eruptions.
Pustules on cornea and conjunctiva, with much lachrymation.
Pustule on cornea, of reddish appearance, with white halo around it; corners of lids raw and bleed easily.
Arthritic ophthalmia, with contraction and irregularity of pupils.
Deep ulcers on cornea, even with hypopyon; more particularly adapted to superficial ulcerations, especially if resulting from pustules, often with considerable vascularity of cornea; pustules on cornea or conjunctiva, especially on former; attacks may be acute or chronic, but it is particularly called for in chronic recurrent forms.
Chronic pustular inflammation of cornea; recovery from one attack quickly followed by another; great photophobia, could not open eyes to see his way, profuse lachrymation, burning and aching in eyes, sneezing upon opening them, external canthi cracked and easily bleeding, both corneæ pannused, thin, acrid discharge from eyes, nose sore and surrounded by thick, moist scabs.
Keratitis pustulosa in children, who cry whenever light comes to eye, so must be kept in a dark room, corners of eyes cracked and bleed easily, eruption on face.
Conjunctivitis pustulosa and ciliary blepharitis, with cracks behind ears.
Keratitis pustulosa, corners of lids crack and bleed easily, great photophobia and lachrymation, with some yellowish discharge.
Superficial keratitis with pustules of r. eye and pustules on lower borders of corner of l. eye, outer canthi cracked, also cracks behind ears and eruption on face.
Pustule on conjunctiva of a child, nose sore and excoriated, prickly heat.
Pustular conjunctivitis with old, ciliary blepharitis after measles; thick, heavy scabs on lashes.
Old, recurrent pustular keratitis with no pain or photophobia.
Recurrent pustular keratitis, no photophobia or pain, eye some red and agglutinated in morning, lids red and margin covered with scurfs.
Small pustules on edge of cornea, photophobia and redness, and characteristic eruption behind ears and on face.
Pustule on cornea of a reddish appearance and with a white halo around it, canthi cracked, great photophobia and lachrymation.

Digitized by Google

Keratitis pustulosa with vascular cornea and pannus.
Pustules on cornea and conjunctiva, much lachrymation, slight photophobia, and the child acts as if it had pain, which is < about noon and in afternoon.
Herpes corneæ, when combined with a chronic eczema, which covers face and eyelids like a mask.
Frequent lachrymation of eyes.
Lachrymation: in open air; chronic.
Thin, acrid discharge from eyes.
Pus-like discharge from eyes.
Internal canthi: itching; burning; stitches; sore.
External canthi: sore and fissured; fissured and bleed easily.
Stillicidium lachrymarum, from obstruction of nasal duct.
Right eye waters constantly, especially in damp, sultry weather, and skin underneath inner half of lower eyelid sore and excoriated, from constant irritation of tears trickling over it; projection underneath inner canthus (mucocele), arising from obstruction to duct; lachrymal sac not much inflamed.
Catarrhal or scrofulous ophthalmia, characterized by ulcers and pustules.
Intense photophobia, with nightly sticking together of lids; obstinate constipation; rhagadic places running like radii towards corners of mouth; outside on cheek an infiltrated spot covered with dry scales.
Syndesmitis exanthematica, especially with crusta lactea.
Conjunctiva swollen and red, puffed about edge of cornea; constant purulent discharge, with agglutination of lids at night; great photophobia; burning pain about region of eyes; sensation of foreign body in throat on swallowing, as if ulcerated; constipation; despairing mood.
Redness of whites of eyes, lachrymation and photophobia.
Heat in eyes and about lids.
Heat in eyes and some pus in canthi.
Swelling of eyelids and lachrymal gland.
Red, painful inflammation of lower lid and inner canthus.
Sensation of dryness in lids and pressure.
Heaviness of eyelids; cannot open his eyes. θHemicrania.
Edges of lids much inflamed.
Chronic ciliary blepharitis; edges of lids slightly swollen, and of a pale red color; inflammation may be confined to canthi (blepharitis angularis), especially to outer, which have a great tendency to crack, and bleed easily upon any attempt to open lids; margins ulcerated; dry scurfs on ciliæ; burning and dryness in lids, and biting and itching, which cause a constant desire to rub the eyes.

Digitized by Google

‖‖Eczema of lids, eruption moist and fissured, margins of lids covered with scales or crusts.
‖Agglutination of lids: at night; in morning.
‖‖Lids red and margins covered with scurfs.
‖‖Left lower lid hangs down.
‖Inverted lids (margins), wild hairs.
‖Slight roughness of integument of lids, intense itching.
‖‖Dry mucus in lashes.
‖Styes on lower lid, with drawing pain.
‖Prevents recurrence of successive crops of styes.
‖Cystic tumors of eyelids; wens on lids.
‖On both eyes hordeolæ and chalazonæ in all stages.
‖‖Coldness over eyes.
‖‖Twitchings beneath eyes.

Hearing and Ears. ‖Music makes her weep.
‖Reverberations in ear, even his own words and every step.
‖Humming, hissing, ringing, rushing, roaring, cracking, or clucking sounds in ears.
‖Violent nocturnal roaring, ears feel stuffed at times (during full moon).
‖Thundering, rolling sound before ears.
‖Cracking in ear: when eating in evening; on moving jaw, but only in morning while lying in bed; when sneezing.
‖Snapping in ear after every eructation, as if air penetrated the Eustachian tube.
‖‖A sound in vertex like the ticking of a watch.
Sensation as if l. ear were filled with water.
‖Sensation as if skin were before the ear.
‖Loss of hearing, with dryness of ears.
‖Deafness, with dry external meatus.
‖Deafness after scarlet fever; cannot hear watch held close to ear, nor ordinary conversation; thin, watery, offensive discharge from both ears; mucous membrane of meatus red and excoriated; moist eczematous rash on face; tympani not perforated, but appear covered with a white coating.
‖‖Hears better when in a noise; when riding in a carriage.
‖Acute pressure in inner ear, like otalgia.
‖Stitches in ears.
‖Distended capillaries on membrane of r. drum.
‖Both tympani covered with a white coating, but not perforated.
‖Moisture in ears.
‖Gluey, sticky discharge at external meatus.
‖Pus runs out of ear.
‖Bloody discharge from ear.
‖Bad odor from ear.

Digitized by Google

‖Copper-colored nodes on ears.
‖‖Swelling of both ears, with moist eruption behind ears.
‖‖Behind the ears: moisture; fissures; sore places; scabs; itching.
‖Eczema impetiginoides; began at first as a moisture behind l. ear, spread over cheeks and neck; child moved continually on account of severe itching.
‖Sensation as if a hard body as large as an egg were behind ear.
‖Swelling of glands beneath ears, with tensive pain.
Affections of l. ear, particularly if r. ear becomes affected; generally spreads from l. to r.

Smell and Nose. ‖‖Smell abnormally acute; she cannot tolerate flowers.
‖Loss of smell: with dryness of nose; with coryza.
‖Nosebleed: in evening, preceding afternoon rush of blood to head and heat of face; at night; in morning; with running coryza.
‖Bloody mucous discharge from nose.
‖Blowing of blood from nose.
‖Offensive purulent discharge from nose.
‖Frequent discharge of thick, yellowish, fetid mucus from nose.
‖Discharge of bloody, fetid slime or purulent secretion; bad smell from nose, as from burnt hair or sulphur vapors; ulcerative nostrils covered with crusts; herpetic eruption. θOzæna.
‖Ozæna; discharge more offensive during menstruation; eruption about anus and genitals; takes cold very readily.
‖Chronic nasal catarrh.
‖‖Dryness of nose, sometimes painful.
‖‖Sore sensation in nose on blowing it.
‖Soreness of mucous membrane of nose; injections of iodine in water had made it worse, and caused obstruction of nose and an erysipelatous redness upon l. cheek.
‖‖Violent stopped catarrh, with great nausea and headache, without vomiting; was obliged to lie down.
‖‖Sneezing: on opening eyes; with very dry nose or running coryza.
‖Periodical attacks of fluent coryza of short duration with continual stoppage and breathing through mouth; dulness with heat in head and face, especially nose; soreness and roughness of larynx with tickling cough; smell in nose as from an old cold; hawking up of phlegm; nausea; < in cold and in open air.
‖‖Stoppage of nose, with secretion of tough, badly-smelling mucus.

Digitized by Google

Thin, acrid discharge from nose accompanying ophthalmia.
Coryza on getting cold.
Excoriation of nose.
Mucus often forms hard masses or crusts in coryza.
Dry scabs in nose, with sore, cracked and ulcerated nostrils.
Swelling of nose.
Nose painful internally.
Red nose, with black pores.
Black, watery pores on nose.
Ulcerated nostrils covered with scurf.
Nose sore, surrounded by thick, moist scabs.

Upper Face. Face: pale and haggard; pale and bloated; pale and yellow; chlorotic; flushed; eyes sunken.
Flushes of heat in face.
Dulness with heat in face and head, especially of nose.
Constant sensation as of a cobweb on face.
Itching blotches on face and other parts of body.
Itching pimples on face, becoming moist after scratching.
Scabs on face, skin dry; constipated, large stools.
Moist eczema on face.
Eczema squamosum on face of fifteen years' duration; applications had caused the external eruption to recede, the patient suffered with headache, vertigo and a general feeling of debility and loss of appetite.
Whole surface of forehead and cheeks red and scurfy; after vaccination in a child eighteen months old.
Rhagades on cheek, running like radii toward corners of mouth; an infiltrated spot on cheek, is covered with dry scales.
Annular raised spots on face.
Erysipelas, eruption appearing on cheeks, preceded by chills and heat alternating; constrictive headache, especially in occiput; burning, stinging and itching of parts.
Erysipelas: of both sides of face, with burning, stinging pain; of cheeks, preceded by alternating chills and heat; of left cheek, after mal-application of Iodum for sore of inner nose; of face, from smell of wood; commencing on r. side and going to left.
Freckles.
Very painful tearing in l. zygoma, so that she had to cry out, in evening in bed.
Pain from l. temple down l. side of face to l. shoulder; face distorted; l. corner of mouth drawn inward and downward, and l. lower eyelid hangs down; after catching cold.
Muscles on one side of face contracted; speech difficult.

Digitized by Google

‖Rheumatic, peripheric paralysis of face.
‖Hair of whiskers or beard falls out.

[9] **Lower Face.** ‖Upper lip: twitching; stinging; swollen; painful pimples.
‖Heaviness in lower lip.
‖Formication in lips during menses.
‖Dryness of lips, with constant burning; they crack.
‖‖Soreness and cracking of lips and nostrils as from cold.
‖Lips chap; corners of mouth ulcerate and are the seat of eruptions.
‖Chin covered with eruptions.
‖Scabby eruptions on chin and around mouth.
‖Painful nodules on lower jaw.
‖Indurated swelling of submaxillary glands, painful to touch.

[10] **Teeth and Gums.** ‖Pressing pain in teeth, < from touch or biting.
‖Drawing pain in molars while walking in wind.
Tearing pain, < by warmth; renewed by going to bed.
‖Drawing or sticking toothache.
‖Stinging toothache after cold drinks.
‖Toothache, < at night, with heat in face.
‖Ulcerations on inside of lips.
‖Painful soreness on inner side of gums.
‖Swelling of gums and dryness of mouth.
‖Gums bleed readily when rubbing them.
‖Fetid odor from gums and mouth.

[11] **Taste and Tongue.** ‖Sour taste after a meal.
‖Bitter taste in mouth, with sour eructations.
‖Salty taste.
‖‖Taste in mouth as of rotten eggs every morning, which nauseates her.
‖Tongue coated white.
‖The tongue after a meal is rough, raw and scraping; the papillæ are very sensitive, as if they were rubbed against the teeth.
Sore pain on l. side of tongue when moving it.
‖Whitish, painful ulcer on lower surface of tongue.
‖‖Burning blisters on lower side and tip of tongue.
‖Painful vesicles and tubercles on back part of tongue.

[12] **Inner Mouth.** ‖Rotten odor from mouth and gums.
‖Acid, foul odor from mouth.
‖Breath smells like urine.
‖‖Saliva increased, much spitting.
‖‖Saliva runs from mouth in morning on stooping.
‖Dryness of mouth in morning.

[13] **Throat.** Palate: feels sore.
‖Palate and fauces somewhat reddened. θDeafness.

Digitized by Google

Violent catarrh in fauces, with sensation as though food had to pass over a lump in throat; roughness and rawness in throat; hoarseness in evening. θOzæna scrofulosa.
Swelling of tonsils, with pain when swallowing.
Ulcerative pain in throat.
Roughness and rawness in throat.
Hawking of phlegm; throat seems full of gurgling mucus.
Sensation on l. side of throat as though he had to swallow over an elevation, with scraping in it.
On swallowing sensation of lump in throat, and especially on empty swallowing a constrictive retching from œsophagus up to larynx.
Constant spasm in throat, obliging him to swallow as if he were choking, as if food would not go down.
Constant cramp in throat, causing him to retch, as if the food would not go down.
Nightly pains in throat like a plug, as if the food filled him to the top.

[14] **Appetite, Thirst. Desires, Aversions.** Excessive hunger.
Canine hunger with acidity of stomach.
Appetite excessive or wanting, with much thirst, or with fulness of abdomen.
Violent thirst, early in morning.
Desire for drink to cool one's self internally, without thirst.
Aversion: to animal food, when thinking of it; to fish; to cooked food.
Great aversion to salt.
Sweet things are disgusting and nauseous.

[15] **Eating and Drinking.** Worse when hungry.
Food will not go down.
Pains in stomach necessitate eating.
Is obliged to eat on account of burning in stomach.
Must quickly eat a piece of bread, to σ > suffocative paroxysm.
Hot things disagree with the stomach.
Abdomen becomes inflated after eating.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough after meals.
Eructations: sour; bitter or sour green water; putrid; tasting of the food eaten; > pressure in stomach; constant; ineffectual; while walking.
Cramp in stomach, with nausea, collection of water in mouth in such quantities that she cannot speak, but has to keep the mouth open; vertigo, at times has neuralgia of face (region of os zygomaticum), and intense headache (clavus); during first day of menses cramp-pain in legs, costiveness, cold feet.

Digitized by Google

Rancid heartburn, particularly after eating.

Qualmishness, as from abdomen, with contractive pain below umbilicus, and much mucus in throat, especially in morning, and for several hours after a meal.

Nausea: and vertigo; and sweat, with anxiety; like faintness, preventing sleep; with spasm in throat; with eructations; with headache; with inclination to vomit; and sour vomiting; in morning; after eating.

Nausea, in morning, with weakness and trembling during day, during menstruation.

Vomiting: of all food taken; with pressure in stomach; sour; of food.

Vomiting, purging, and icy-cold sweat, with headache.

" **Scrobiculum and Stomach.** Sickening, painful feeling at pit of stomach.

Insipid and "spoiled" sensation in stomach, though a good appetite.

Pressure in pit of stomach: whole forenoon, > by eructation; night and morning.

Binding, constricting pain in gastric region.

Constrictive pain in stomach.

Sensation of lump in stomach, with constant beating, as of two hammers. θHysteria.

Pain in stomach: necessitates eating; > from warm milk, < from boiled meat and cold drinks.

Nightly pinching pain in stomach and rooting pain in chest.

Griping in stomach, with flatulency.

Griping in stomach, with nausea; she was constantly obliged to spit, as in water-brash.

Fulness in stomach and abdomen.

Burning in stomach, causing hunger.

Crampy, spasmodic, or clawing pains, or pressure, with vomiting of ingesta, > by lying down, and warmth of bed, returning when rising, with vomiting; acidity; constipation; pain in hepatic region; > from warm food or drinks; nervous cardialgia, with anæmia; chlorotic color of face; dysmenorrhœa; herpetic constitution.

Gastralgia a few hours after dinner; < by cold drinks and boiled meats; > by warm milk; furry taste; pain is to l. of stomach and of great severity, with absence of usual gastric symptoms as acidity, water-brash, nausea, vomiting; constant yawning with bloatedness of gastric region. θChlorosis.

Periodical gastralgia with vomiting of food immediately after eating; the pains are burning and radiate into abdomen.

Gastrodynia with anæmia; chlorotic color of face; dysmenorrhœa; constipation; irritability.

Digitized by Google

Cardialgia or gastric catarrh; in women during climacteric period.
Chronic catarrh of stomach, with frequent eructations; frequently feels faint with partial loss of senses.
Chronic gastritis, with thirst, especially after abuse of alcoholic drinks.

[18] **Hypochondria.** Stitches in both hypochondria.
Hardness in region of liver.
Burning in l. hypochondrium, internally, < when lying on it.
Cannot bear tight clothing around hypochondria.
Cutting, bearing down pains in hypochondria and hips.

[19] **Abdomen.** Pain in upper abdomen, as if everything would be torn to pieces during menstruation.
Cramp in lower abdomen. θDysmenorrhœa.
Pain below navel, as if intestines were torn.
Burning pains radiating through abdomen. θGastralgia.
Burning in a small spot on l. side of abdomen.
Pain in belly, in l. side, when lying on r., and vice versa.
Stitches in l. side of abdomen.
Colic immediately after eating.
Griping, digging pains in abdomen.
Zona; large blisters on raised ground, from umbilicus to spine; all blisters opened by scratching; excruciating burning.
Rumbling in abdomen.
Croaking, as of frogs, in abdomen.
Cannot endure anything tight about abdomen after eating.
Heaviness in abdomen.
Distension of abdomen, with rush of blood to head, heaviness of head, vertigo and confusion.
Great distension of abdomen, with dulness and heaviness of head.
Distended abdomen: after eating; with diarrhœa.
Abdomen tense, with menses delaying, scanty and pale.
Abdomen distended, tense, hard.
Hardness in lower part of abdomen.
Full abdomen, as from accumulation and incarceration of flatus; she cannot bear anything tight about hypochondria.
Incarcerated flatus, painfully pressing towards groins and anus.
First two weeks after birth, colic, arising from excessive accumulation of inodorous gas; during paroxysm of pain, which occurs mostly in evening, child throws itself back and straightens body.
Flatulence suddenly appears and presses painfully towards abdominal ring.

Digitized by Google

Passage of much offensive flatus, which constantly collects anew.
Griping in abdomen every time before passage of flatus.
Œdema of external abdomen.
Ascites progressing steadily and apparently to a fatal termination; great accumulation of serum in abdominal cavity, and great œdema of extremities, chiefly lower, which were elephantine in size; profuse and constant watery exudation from skin below knees; epidermis exfoliated; exudation glutinous in character.
Ascites in conjunction with moist tetter, with glutinous exudation. θHerpes zoster.
Itching of abdomen.
Pain in inguinal regions.
Swelling and great sensitiveness of one inguinal gland.
Herpetic eruption in groins.
Glandular swellings in groins.

Stool and Rectum. Excessive discharge of flatus.
Frequent discharge of offensive flatus, with distension of abdomen.
Stools brown, fluid, mixed with undigested substances, and of an intolerable fetor.
Thin, scalding stools, light brown.
Diarrhœa, almost without colic, followed by great prostration, of short duration.
Watery stools.
Mucous diarrhœa.
Continuous soft stools of too small a size.
Chronic softness of stool.
Stool pasty, like mud, adhering to vessel.
A quantity of white mucus is expelled with the stool, or the hard feces are covered with slime.
Stools knotty, the lumps being united by mucous threads; even after stool there is still mucus coming from anus.
Much inclination to stool; though not hard, still it is evacuated with much exertion, on account of total inactivity of rectum.
Constipation; stool large, knotty.
Feces very large and difficult of passage.
Hard stool, with much urging and sticking in anus.
Obstipation from hardened stool or from inactivity of bowels; stools knotty and large.
Obstinate constipation and delayed menstruation occur together.
Hard, lumpy stool, with slime and blood. θHemorrhoids.
Sensation of heaviness in abdomen; chronic constipation with hardness in region of liver; hard, knotty stool, with

Digitized by Google

pain in hemorrhoids and discharge of mucus and blood; prolapsus of rectum without any urging to stool, as if anus were paralyzed; menses late; thin, watery leucorrhœa.

Constipation with dryness of mucous membrane of rectum and fissure of anus.

Constipation in women who are inclined to erysipelatous inflammation and ulcerative processes of lower extremities on a rheumatic basis, and who are of a timid, morose and dejected disposition.

Constipation in subjects of herpetic diathesis or with scrofulous cachexia; in hypochondriacal subjects with marked abdominal symptoms.

Constipation; menses irregular; a cough and a fixed pain in l. side, just above cardiac region; she was dejected and had lost her natural vivacity and spirits.

Stools: rarely diarrhœic and then usually painless; purging and vomiting, with icy-cold sweat; insufficient; hard, lumpy, with slime and blood.

Sour-smelling stool with burning at rectum.

Stools very thin, like a round worm.

During stool: burning in rectum; tenesmus.

With the stool discharge of a little blood; of tape-worm.

After stool: smarting and soreness in anus; much mucus remains about anus; great but transient prostration.

Prolapsus of rectum with its hemorrhoids, even without urging to stool, as if anus had lost its contractility and was paralyzed.

Easy prolapse of rectum, as though parts had lost their tonicity; it becomes prolapsed without even a desire for stool.

Discharge of mucus from rectum.

Piles of twelve years' duration, with frequent attacks of hemorrhage, which caused anæmia; she was daily getting weaker from loss of blood and restless nights; pulse low and feeble; rectum partially prolapsed with two filbert-shaped piles, as large as little finger, knotty and fissured, from which a sanious fluid oozed with an odor like that which is characteristic of cancer.

Hemorrhoids of rectum, with burning rhagades at anus.

Hemorrhoids, with pain on sitting down, or on taking a wide step as if split with a knife, also violent itching, and very sore to touch.

Varices feel very sore after an evacuation; painful burning fissures between varices.

Large hemorrhoidal tumors.

Fissura ani; severe, sharp, cutting pain during stool, followed by constriction and aching for several hours, < at night.

Digitized by Google

Severe pain during evacuation, sharp, cutting, followed by constriction and aching for several hours, and especially severe at night. #Fissures of anus.

Burning and bleeding during stool; pressure and burning and sharp, cutting stitches in anus; soreness at anus, and smarting on contact; bleeding from rectum, with sharp, stitching pains; prolapsus ani, with sensation as though sphincter had lost its contractile power and was paralyzed. #Fissures of anus.

Hemorrhoids in anus, causing burning.

Swelling of anus.

Cutting and stitches in anus.

Smarting, sore pain in anus on wiping it.

Itching of anus.

Tape-worm.

Urinary Organs. Cutting and downward pressure in both kidneys before urinating.

Anxious pressure in bladder, with sudden desire to urinate, but scanty emission.

Frequent urination, particularly at night.

Urging to urinate, with scanty discharge.

Urging to urinate, with dribbling after the usual discharge.

Urine clear, but after four or five hours, covered with an iridescent film.

Urine becomes turbid and deposits a white sediment.

Urine becomes very turbid after two hours, with reddish sediment; biting in urethra while passing it.

Urine: dark brown; fetid; sour.

Stitches or smarting in urethra when urinating.

Urinary troubles, with burning in urethra between acts of micturition.

Very thin stream of urine, as if urethra were contracted.

Pain in sacrum or coccygis when urinating.

Nocturnal enuresis.

Male Sexual Organs. Uncontrollable sexual excitement; violent erections.

Voluptuous irritability of genitals.

Tension and lascivious feeling in genitals.

Revival of sexual desire and fantasies.

Pollutions with weakness and pain in sacrum; neuralgic pains in back of neck.

Seminal emissions at night, with flaccid penis; they wake him, but no voluptuous feelings; sensation of great weakness in genitals; costiveness; from previous sexual abuse.

Emissions with amorous dreams.

Sexual weaknesses, consisting of lively desire with incom-

Google

plete erection and too rapid or too early discharge of semen, such as sometimes follows the habit of masturbation, acquired in boyhood and abandoned early.

‖‖Almost involuntary emission, without much erection, during an embrace.

‖‖Sexual debility from sexual abuse.

‖‖Decided aversion to coition.

‖Impotence, with dislike to coition.

‖Want of proper sensation during coition.

‖Painful cramps in calves during an embrace.

‖No ejaculation follows coition in spite of every exertion.

‖After an embrace coldness of legs, exhaustion, heat of body and perspiration.

‖‖Dropsical swelling of prepuce and scrotum.

‖Herpetic eruptions on penis.

‖Prepuce swells to a large water blister without pain.

‖Vesicular eruption on prepuce.

‖Testes swollen.

‖Hydrocele (l. side), herpetic eruption on scrotum, in groins, or on lower extremities either preceding or accompanying the disease, or when arising from suppression of cutaneous disease.

‖‖Itching and moist eruption on scrotum.

‖Itching on scrotum.

‖‖Gonorrhœa.

‖Stricture of urethra with sudden arrest of flow, then oozing of snuff-colored slime in a long thread, or, instead, a few drops of bloody water; after micturition sudden peremptory urging near glans, or seems to run back when costive.

‖Gluey, sticky discharge at meatus urinarius, blocking up urethra. θGleet.

♀ **Female Sexual Organs.** ‖Great aversion to coitus.

‖Enlarged ovaries, which become more tender and more enlarged every time she takes cold or gets her feet damp.

‖Swelling and hardness of ovaries after menses.

‖‖Tearing, grinding, twisting pains in r. ovary, as if it would burst, before or during menses.

‖The indurated left ovary swells and becomes very hard; violent pains on touch, respiration or hawking, when violent stitches shoot into it; profuse general sweat; continual loss of sleep.

‖Tumor, size of an orange, in r. iliac fossa, also similar one in l.; both hard, round, slightly movable; not painful to pressure, nor producing inconvenience from weight.

‖Bearing down pain in uterus to back, with weakness and sickness. θDysmenorrhœa.

‖Pain in uterus when reaching high with arms.

Digitized by Google

Os uteri standing backwards, can only be reached with difficulty.

Cauliflower excrescences; cancer uteri; severe lancinating, stitching pains through uterus down to lower extremities; heaviness of abdomen with increased pain when standing.

Hot and painful vagina; swelling of lymphatic vessels and mucous follicles; neck of uterus hard and swollen, with tuberculous nodes and cauliflower excrescences; great weight in abdomen on rising, with fainting sort of weakness and < of pains; delaying menses, with < of pains shortly before and at appearance of menses; discharge of black, lumpy, fetid blood; stitches shooting through abdomen as far as thighs; burning and stitching pains; constipation; livid complexion; sad and anxious mood. θCancer uteri.

Bearing down pain in womb, with weakness and sinking; pain over eyes; pain in middle of breast, with cough, scraping, rawness and soreness. θDysmenorrhœa.

Retarded, deficient menstruation; discharge watery, thin, and in small quantities; pulse thin; constitution feeble; sick headache, with pain over eyes and numb pain from sacrum down legs; cold hands and feet; acne solare in face. θDysmenorrhœa.

After mental trouble during menstruation suffered for five years from dysmenorrhœa.

Great emaciation with paleness of face; terrible pain in small of back and abdomen, which compel her to stay in bed; for next five days constant discharge of coagula with continuous cramps, so severe that she cries out aloud with pain; want of appetite; stools scanty and painful; spasmodic urination.

Dysmenorrhœa with severe and obstinate megrim.

Menses delayed, scanty, thick and dark, or else serous pale blood, with griping and abdominal spasms, headache, nausea and pain in chest.

Occasional show of menses which are very pale and very scanty, with abdominal pains and pains in limbs; swelling of hands and feet.

Menses: too scanty and too pale; too late, with violent colic; irregular, lasting only for a few days; blood dark; delayed from getting feet wet.

Menses very irregular, appear after 8 or 10 weeks, are very scanty and last but a short time; discharge pitchy black; constant pressing headache; cutting, bearing down pains in hypochondria and hips; backache; swelling of abdomen and of upper and lower limbs, with sensation of numbness, crawling and stitching, as if they

Digitized by Google

were asleep; chilliness; coldness of hands and particularly of feet; rapid obesity.

Sensation of lassitude, heaviness and tiredness; small, round, red, itching, herpetic patches on forearms, neck and throat.

Menses too late and scanty, sometimes black, often pale, with stitches, burning and dryness of vagina.

Scanty menses with congestion to brain.

Scanty catamenia preceded by menstrual colic. θGastralgia.

Menses keep postponing, discharge scanty and pale.

Menses suppressed, with weight in arms and legs.

Suppression of menses, with heaviness of limbs and congestion of blood to head.

Eruptions appear during menses.

Non-appearance of menses for five months; severe congestion to head and chest, with dark redness of cheeks, anxiety and oppression of chest when lying down.

Tendency to spasms; menses have not appeared for six months; chronic catarrh of stomach, with frequent eructations; frequently feels faint, with partial loss of senses; os uteri standing backwards, and can only be reached with difficulty.

Young woman, chlorotic, irregular menses; became pregnant, recovery after labor very slow; œdema of eyelids, vulva and abdominal walls; menses very late, pale and scanty; yellowish tint of skin; vagina cold; abdominal walls thick, doughy, pitting on pressure; great aversion to coitus.

Lassitude and heaviness in lower extremities, and chronic hoarseness, a forerunner of tuberculosis; no menses for three months.

Menostasis.

Anæmia, with dryness of vagina.

First menses delayed.

Instead of regular period has leucorrhœa and suffers with constipation; has grown very fat; as a child had tettery eruption on both forearms, of which, however, no trace is left.

Œdema pedum from amenorrhœa.

Before and during menstruation fatiguing cough.

Before and during menses cough throughout day, fatiguing chest; no cough at night.

Leucorrhœic discharge occurs in gushes day or night.

Pain in epigastrium during catamenia, as if everything would be torn to pieces, with labor-like pains; persistent and stinging toothache. θDysmenorrhœa.

During menses: dry cough and profuse sweats, morning

Google

sickness, swelling of feet and painless swelling of face; hoarseness, violent coryza and catarrhal fever; colic; violent headache with nausea; morning sickness; chafing between legs; swelling of feet; chilliness; pain in varices; hoarseness with dry cough, headache evenings; painless swelling of cheeks; colic-like labor pains; backache; heat in abdomen; urging, pressing, like labor pains; itching in abdomen; weakness in feet, that she cannot walk; pain in abdomen; growing dark before eyes.

After menses, jerking in arms; at other times, pain below navel, as if intestines were torn; lying upon r. side, pain is in l., and vice versa; reaching with arms high, pain in region of womb; constipation.

❙Lassitude and weakness with the catamenia.

❙Morning sickness of pregnancy or during menses.

❙Vagina cold. θChlorosis.

❙Biting or smarting in vagina.

❙❙Vesicles or excoriations in vagina. θPruritus.

❙❙Itching, smarting, painful vesicle on vulva; itching pimples on vulva.

❙❙Itching vesicles and pimples on labia, which smart and are painful; painless pimples on inside of labia.

❙Painful pressure towards pudenda.

❙❙Itching of pudenda before menstruation.

❙Excoriations in perineum, vulva and between thighs.

❙Soreness between thighs, near pudenda, during menstruation.

❙Feeling of external irritation at genitals as if the parts were swollen.

❙Œdema of pudenda. θChlorosis.

❙❙Acrid, excoriating leucorrhœa, in gushes, day and night, before and after menses.

❙Profuse leucorrhœa, with weakness of back and sacrum, when walking and sitting.

❙Yellowish-white leucorrhœa, excoriating skin; uterus indurated, swollen and sore; straining in anus, with protruding piles, and bearing down in bowels long after an evacuation.

❙❙Leucorrhœa; profuse, perfectly white, especially on rising in morning; weakness of back when walking or sitting, with distension of abdomen, and painful pressure towards pudenda; discharges occur in gushes day and night; turbid urine; frequent micturition, especially at night; difficult stool; great lassitude.

❙Copious, thin leucorrhœa, causing a biting, smarting sensation in vagina.

❙❙During climaxis: cardialgia; gastric catarrh.

‖Tendency to obesity. θUterine complaints.

[24] **Pregnancy. Parturition. Lactation.** ‖Large and corpulent women of venous constitution, who are subject to tettery eruptions, which itch and emit glutinous fluid.
‖Labor pains weak or have ceased entirely.
‖Nipples painful and cracked.
‖Sore nipples of nursing women, end of nipple cracked and fissured, exuding a limpid serum.
‖‖Hard cicatrices remaining after mammary abscess, retarding flow of milk.
‖‖Cancer of mammæ, from old cicatrices, which had remained after repeated abscesses.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Voice: impaired; not clear, in singing; cracked, in singing.
‖Hoarseness in evening. θCoryza.
‖Chronic hoarseness.
‖‖Soreness and roughness of larynx, with tickling cough.
‖Laryngeal region sensitive to touch.

[26] **Respiration.** ‖Respiration has a dry sound.
‖Constriction of chest, as if about to suffocate when falling asleep.
‖‖Constriction of the chest, as if too narrow.
‖Suffocative paroxysm at night, awakens him out of sleep, usually after midnight, must quickly jump out of bed, hold himself firmly to something, and quickly eats whatever is on hand, which gives relief; very hoarse cough. θAsthma spasmodicum.
‖Cough, caused by taking a deep inspiration in evening and at night.

[27] **Cough.** Cough: caused by deep inspiration; loose, from tickling deep in chest.
‖‖Cough at night.
‖Whooping-cough with strangling, red face, watery eyes; strains all over; sometimes wind comes from anus; raises phlegm; morning much hard coughing, throat feels full of gurgling mucus; impudent, teasing; laughs at reprimands; several hard straining small stools daily.
‖Expectoration: salty; day and evening.

[28] **Inner Chest and Lungs.** ‖Cramps of chest.
‖Pains in chest.
‖Pain in middle of chest, with cough, scraping, rawness and soreness.
‖Raw pain in chest, like raw flesh.
‖Stitching pains in chest.
‖Stitches in chest and palpitation of heart from least exercise.

[29] **Heart, Pulse and Circulation.** Region of heart: constriction; pressure; stitches.

Digitized by Google

‖Sensation like an electric shock, from heart toward front of neck.
‖Strong pulsation of blood in whole body, but especially about heart, < by every motion.
‖Palpitation of heart: with anxiety; with nosebleed.
‖Pulse full and hard, somewhat accelerated in morning, slow during day and evening

[50] **Outer Chest.** ‖Stinging in fleshy part of chest.
‖Pimples and herpes on chest.
‖Zona on l. side, with pain in thoracic muscles on motion.
‖Itching vesicles and restlessness at night.
‖Perspiration on sternum every morning.
‖Nipples painful and cracked.
πAching soreness and bleeding of male nipples.
‖Soreness of nipples, with small, corrosive blisters or ulcers, oozing a limpid serum, or a thick, glutinous fluid, which forms a crust that is removed by nursing, when the same formation again occurs, and so on; disposition to fissure and crack.
‖Small bluish blisters on nipple, with fluid discharge.
‖Threatened suppuration, when breasts are marked with many cicatrices from former ulcerations.
‖‖Hard scars remaining after mammary abscesses.
‖Mammary cancer developed from old cicatrices formed from repeated abscesses in mammæ.

[51] **Neck and Back.** ‖Pain in nape of neck.
‖‖Stiffness of back of neck; also with headache.
‖Glands on side of neck down to shoulder, swollen and painful when bending neck to one side, or lying upon it; as if tense and stiff.
‖Glandular swellings on l. side of neck.
‖‖Painless swollen glands on side of neck.
‖Small boils on neck, back and arms.
‖Eruption on nape of neck dry, peeling in fine, mealy scales, without itching.
‖Chronic eruption on scalp and nape of neck; falling out of hair; dandruff; terrible itching and burning; skin on nape of neck hard, nodulous and rough; habitual constipation; in a woman past climacteric age.
‖Small of back aches, as if bruised or broken.
‖Pain in small of back, as if broken, especially on touching; pressing, grasping and twitching, with sensation in arms and feet as if they were turned outward.
‖Tabes dorsalis, especially in women, with great weakness in legs and back, palpitation; dulness of sense; numbness or torpor of genital organs and pains in chest.
‖Contracting pains in back.
‖Weakness in back and loins on walking; back aches.

Digitized by Google

Sacral pains, with sensation of crawling and stitching.
Numb pain, from sacrum down legs.
Dull drawing in coccyx in evening.
Pain in os coccygis while urinating.
Violent itching of coccygeal region, the part becoming moist with scurfy formations.

[32] **Upper Limbs.** Shoulder and neck painful.
Tearing in l. shoulder-joint, on moving arm.
Rheumatic or burning pains, especially in l. shoulder.
Violent sticking in l. shoulder.
Burning pressure beneath armpit.
Right upper arm sore, tender and swollen.
Arms feel "asleep."
Jerking in arms.
Herpes circinatus hard to touch and wrinkled looking, itching terribly, in bend of elbow.
Cramp in hand.
Tearing in hands like rheumatism.
Left hand numb and dead, with formication extending up arm.
Horny callosities in hands.
Skin of hands hard and cracked.
Eczema upon back of l. hand; commencing in a small place with vesicles; spreads, forms crusts, and finally fissures, especially upon knuckles of first phalanges.
Gouty swellings of fingers; in joints.
Raw, moist places between fingers.
Constant chafed soreness between fingers.
Pain in thumb-joint, as if sprained.
Rheumatic pressive tearing in first joint of r. thumb.
Vesicle on little finger itches, suppurates and discharges much matter, with burning and sticking, which, like the suppuration, continues a long time.
Finger-nails black and rough, matrix inflamed, with soreness, throbbing and numbness, no suppuration; < from water.
Finger-nails become thick.

[33] **Lower Limbs.** Smarting soreness between nates.
Eruption over nates and posterior part of thighs; no diffused redness, but numerous small, brown scabs, with slight moisture; occasional paroxysms of itching; troublesome at night; some small, red, itching spots on arms.
Painful soreness between pudendum and thigh, covered with pimples, vesicles and ulcers.
Red, raw spot like a tetter on upper part of thigh, opposite scrotum, itching somewhat in morning.
Painful soreness between upper part of thighs near genitals.

| | Pains extending from pudenda to thighs.
|| Soreness high up between thighs, during and after walking.
| Tearing or bruised pains in thighs.
| Numbness of thighs.
| Ulcers on lower limbs, with acrid pus, dryness of skin and constipation.
| Restlessness in legs.
| Heaviness of legs.
| Legs and feet heavy and swollen; she thought her feet must burst.
| | Swelling of legs, even while lying in bed.
| Great œdema of limbs, chiefly lower, which are very large, with profuse, constant, watery exudation from skin below knees, epidermis exfoliated. θ Ascites.
| | Bruised pain in knees.
| Stiff feeling in hollow of knee, as if tendons were too short.
|| Tetters in hollow of knee.
| | Jerking in all the muscles of l. calf.
| Cramp in calves.
| Weakness of feet, cannot walk.
| | Sometimes feet are icy-cold, again quite burning.
|| Cold feet in evening in bed.
| | Coldness of dorsum of foot.
| Feet sweat profusely (not so offensive as under *Silica*), but moderate walking causes soreness between toes, so that the parts become raw.
| | Profuse sweat on feet; they begin to smell.
| Ulcers on feet, form purulent pustules, always inflamed and very painful.
| Callous ulcers of the feet.
| Œdema pedum, with solitary itching papulæ; erysipelatous redness of face; menses scanty.
|| Œdema pedum from amenorrhœa.
| Rheumatic tearing in feet and toes.
| Burning of heels with crawling, especially in morning in bed.
| Stitches in heel, when putting it down.
| Gouty tearing in toes.
| Stiffness and contraction of toes.
| Ulcers, or spreading blisters on toes.
| Horny skin on toes.
| Sore pains of corns. θ Lung disease.
| Thick and crippled toe-nails.
| Hypertrophied nail of l. big toe; it was formed almost like a horn, and so hard, that only by repeated and long-continued operations with a file, it could be diminished.

Digitized by Google

‖Pain in nail of great toe.
‖Ingrowing toe-nail.

[34] **Limbs in General.** ‖Drawing pains in limbs.
‖Tearing pain in feet and hands; in all the limbs.
‖Falling asleep of arms and legs while sitting; while walking, crawling in them.
‖Limbs go "to sleep."
‖Weakness of all the limbs.
‖Startings of hands and feet.
‖Heaviness in limbs.
‖Paralyzed sensation of all the limbs.
‖‖Hands and feet either hot or cold.
Limbs drawn together, crooked, from bones being bent.
‖Back of both forearms and dorsum of hand covered with corroding, herpetic exanthema, consisting partly of a kind of cortical crusts, partly of red fissures, looking like raw meat, partly of elevated islets; the exanthem was spreading and painfully itching, especially at night; discharge of turbid matter and acrid water; lips and skin of fingers fissured; upper arm nearly free; on lower extremities flexors are affected, and especially bend of knee and external surface, with same discharge and same burning itching, which becomes < when eruption is dry; < during fall; > during summer; pale, slightly œdematous face; sluggishness of all secretions and excretions; spontaneous fissures in skin; cannot bear damp atmosphere; when a youth had measles, and in consequence of bathing too soon had paralysis of face; mouth drawn sideways; cannot close l. eye, which looks smaller than right.
‖Eczema chronica on dorsal region of both forearms and hands, and on bends of knees and calves of legs; eruption composed partly of thick crusts and partly of a raw surface, with deep rhagades, constantly secreting eczematous fluid; intolerable itching, < at night and from warmth of bed; lips chapped, fingers full of rhagades; face pale, bloated; bowels torpid, constipated; all < in damp and wet.

[35] **Rest. Position Motion.** Obliged to lie down: vertigo headache.
Pains in back compel her to stay in bed.
Inclination to sit down.
Lying in bed: swelling of legs, soreness from.
Lying down: > crampy, spasmodic, clawing pain in stomach; on l. hypochondrium, pain <; anxiety and oppression of chest.
Lying on neck: causes pain.
‖Lying: on r. side, pain in belly, in l.; lying upon l. pain in r. side. θBetween catamenial periods.

Google

While sitting: falling asleep of arms and legs.
Sitting down: pain in hemorrhoids; profuse leucorrhœa; weakness of back.
Stooping: during and after, vertigo; everything turns black before eyes; saliva runs from mouth.
Standing: < pain with heaviness of abdomen.
Looking upward: vertigo.
Putting down heel: causes stitches.
Bending neck: causes pain.
Stiffness on first beginning to move.
Motion: causes pain in thoracic muscles.
Motion during eating, talking, laughing or yawning: brings on attacks of convulsions of l. side of body.
Every motion: < strong pulsation of blood; causes sweat.
Least exertion: stitches in chest and palpitation of heart.
Rising: from bed feels as if drunken; < crampy pain in stomach; weight in abdomen.
Moving jaw: cracking in ear.
Walking: eructations; profuse leucorrhœa; weakness in back and loins; soreness high up between thighs during and after; causes soreness between toes.
Every step makes reverberations in ear.
Reaching high with arms: pain in uterus.
Child throws itself back and straightens body.

[36] **Nerves.** ‖Tremulous sensation through whole body.
❙Tired feeling; lassitude; inclination to sit down.
‖Amazingly weary and sleepy.
Debility, without pain, compelling him to groan.
Frequently feels faint, with partial loss of senses.
❙❙Weak exhaustion of whole body.
❙Sudden sinking of strength.
❙Binding, constricting pain in different parts, especially in gastric region; sensation of lump in stomach, with constant beating as of two hammers; great desire to vomit; feels so tired that death would be a relief; hates to be addressed, or to work, feels indifferent to everybody and everything; constant chilliness as if skin were tightened over body; great anguish before menses; obstinate constipation.
❙Full of spasms. θAmenorrhœa.
❙Contractions of muscles.
❙After local treatment of erysipelas, twitching of eyelids, which gradually spread to muscles of l. side of face, and in course of two years developed into general convulsions of whole l. side; any motion during eating, talking, laughing or yawning, brought on an attack which often lasted a quarter of an hour.
❙❙Cataleptic condition; conscious, but without power to move or speak.

‖‖Numbness and deadness, with coldness of fingers of both hands, extending as far as middle of upper arm; coldness and numbness of face, < l. side; great vertigo and blindness, with prostration of strength; face pale and haggard; much emaciation without perceptible cause; both kidneys sore, with ischuria. θParalysis.

[37] **Sleep.** ‖‖Constant yawning, with bloatedness of gastric region.

‖Inclination to stretch, without being able to satisfy it sufficiently.

‖Excessively tired and sleepy.

‖‖Sleepiness: during day, must lie down; after dinner.

‖‖Perspiration about head, when falling asleep.

‖Night-sweat.

‖‖Constant talking during sleep.

‖Wetting the bed at night while asleep.

‖Wakens at night with a suffocative attack.

‖‖Bleeding from nose at night.

‖Light slumber or unrefreshing sleep; starting; wandering fancies.

‖Nightly pains felt in sleep.

‖Stupid morning sleep.

‖Cannot go to sleep till late.

‖Unable to fall asleep before midnight on account of a fixed idea.

‖Sleeplessness.

‖Great sleepiness by day, goes to sleep early in evening, but during night there is wakefulness, tossing about, heat and anxiety; dreams anxious and terrifying; at last sinks into a profound and dull morning sleep.

‖Great agitation at night; anxious, frightful dreams.

‖‖Sleep disturbed by dreams.

‖‖Numerous dreams, with distorted images.

‖‖Disturbed sleep.

‖‖Dreams: vivid; anxious; horrible; vexatious; about fatal accidents.

[38] **Time.** Morning: full of fear; confusion in head; feels as if drunken when rising from bed; vertigo; semilateral headache; headache; pressing pain in eyes; eye red and agglutinated; lying in bed cracking in ear; nosebleed; saliva runs from mouth; dryness of mouth; violent thirst; qualmishness; much mucus in throat; nausea; pressure at pit of stomach; much hard coughing; accelerated pulse; perspiration on sternum; itching in spots on thigh; burning of heels with crawling; stupid sleep; chilliness.

9 or 10 A.M.: child cannot open eyes.

Till noon: headache on vertex and nape of neck.

Digitized by Google

Forenoon: pressure in pit of stomach.
Afternoon: child acts as if it had pain; rush of blood to head.
4 P.M. till evening: chill.
5 P.M.: chilliness and coldness of whole body.
During day: trembling; cough; leucorrhœa; salty expectoration; slow pulse; must lie down; great sleepiness.
Evening: vertigo; sees fiery zigzags around outside of field of vision; pressing pain in eyes; cracking in ears when eating; nosebleed in bed; had to cry out on account of tearing in zygoma; hoarseness; paroxysms of pain from accumulation of gas; headache; cough; salty expectoration; slow pulse; dull drawing in coccyx; cold feet in bed; goes to sleep early; heat.
Night: thoughts prevent sleep; agglutination of lids; nosebleed; toothache <; pains in throat like a plug; pressure at pit of stomach; pain in fissura ani; after an evacuation sharp cutting followed by constriction and aching for several hours; frequent urination; seminal emissions; leucorrhœic discharge; frequent micturition; suffocating paroxysm; cough; itching vesicles and restlessness at night; itching troublesome; painful itching of exanthema on back of forearms and dorsum of hand; wakens with a suffocating attack; pains felt in sleep; unable to fall asleep before midnight; wakefulness; great agitation; heat, with scrofulous affections of bones.
After midnight: profuse perspiration lasting till morning; dry heat.

Temperature and Weather. Open air: sweat on head when walking; lachrymation; fluent coryza <; chill >.
Warmth: tearing pain in teeth <; > crampy pain in stomach; > scrofulous affection of bones.
Warmth of bed: < itching.
Warm drinks: pain in stomach >; pain in hepatic region >.
Wind: while walking, drawing pain in molars.
Water: inflamed matrix <.
Bathing after measles: paralysis of face.
Washing: scurf disappears; feels < after.
Wet feet: delayed menses.
Damp, wet atmosphere: < symptoms.
Cold drinks: stinging toothache; pain in stomach <.
Cold air: very sensitive to; fluent coryza <; scrofulous affections of bones <.

Fever. Chilliness in morning, in bed.
Shaking chill every day, in evening; after an hour, hot face and cold feet without subsequent sweat.

Digitized by Google

Chill in evening, with headache and tearing in limbs, great thirst and profuse perspiration after midnight, lasting till morning.
‖Chill and chilliness, most in evening.
Chill from 4 P.M. till evening.
Chilliness and coldness of whole body at 5 P.M., with icy-cold feet.
‖Chill < after meals, > after drinking, > in open air.
‖Sometimes feet are icy-cold, again quite burning.
‖Flushes of heat.
Violent febrile chilliness morning and evening, the heat followed by sweat.
Dry heat every evening and night, lasting till morning, with headache on vertex and in nape of neck till noon.
Heat evening and night; with restlessness; unable to sleep, or remain in bed on account of it.
‖Hands and soles of feet hot and burning.
Heat when riding in a carriage.
‖Sweats from slightest motion.
‖Sweat often on front of body only.
‖Sweat on front of body and centre of chest (sternum).
‖Sweat stains yellow, is sour and offensive smelling, and frequently cold.
‖Fetid sweat.
‖Profuse sweat on feet; they swell and become sore.
‖Profuse night-sweat.
‖Entire inability to sweat.
Type: quotidian; double quotidian.
Time: 6 or 7 A.M.; morning in bed; afternoon, 4, 5, 6, 7, 8 P.M.
‖Glands are affected, along with hectic; discharge gluey; chills and fever (P.M); cold feet; hot, red face or pale face; sweat absent, or else offensive. θIrritative fever.

41 **Attacks, Periodicity.** Recovery from one attack quickly followed by another.
At times: neuralgia of face.
Attacks of convulsions last quarter of an hour.
Periodical attacks: of fluent coryza of short duration with continual stoppage and breathing through mouth.
Daily: small stools.
Every morning: violent febrile chilliness.
Every evening: shaking chill; chill with headache and tearing in limbs; violent febrile chilliness; dry heat.
Every night: eyelids stick together; violent roaring in ears; pinching pains in stomach; rooting pain in chest.
During Summer: discharge and burning of eruptions >.
During Fall: discharge and burning eruption on limbs <.
During full moon: ears feel stuffed.

Digitized by Google

One hour after chill: hot face, cold feet.
For several hours after a meal: qualmishness.
For five days: constant discharge of coagula.
Eight or ten weeks: menses appear.
Five months: non-appearance of menses.
Six months: menses have not appeared.
In two years: twitching of face developed into convulsions of whole l. side.
Five years: dysmenorrhœa.
Twelve years' duration: piles.
Fifteen years' duration: eczema squamosum.

" **Locality and Direction.** Right: lancinating pain in temple; moist eruption behind ear crept gradually upwards on side of scalp; pustules of eye; tearing, grinding, twisting pains in ovary; tumor in iliac fossa; lying upon r. side pain is in l.; upper arm sore; rheumatic pressive tearing in first joint of thumb.

Left: stitches in temple; pain from temple down side of face to shoulder; corner of mouth drawn inward and downward; numbness on side of head; hand becomes numb; crawling into arm; pustules on lower borders of corner of eye; lower lid hangs down; as if ear was filled with water; moisture behind ear; erysipelatous redness upon cheek; tearing in zygoma; pain from temple down side of face to shoulder; corner of mouth drawn downward and inward; lower eyelid hangs down; sore pain on side of tongue when moving it; as though he had to swallow over an elevation on side of throat, with scraping in it; pain is to l. of stomach; burning in hypochondrium; burning in small spot on side of abdomen; pain in side of belly; stitches in side of abdomen; fixed pain in side just above cardiac region; hydrocele (l. side); herpetic eruption on scrotum; tumor in iliac fossa; lying upon l. side pain in r.; zona on side; glandular swellings on side of neck; tearing in shoulder-joint; rheumatic pain or burning in shoulder; violent sticking in shoulder; hand numb and dead; eczema on back of hand; jerking in all muscles of calf; hypertrophied nail of great toe; cannot close eye on account of paralysis; twitching of muscles of side of face; convulsions of whole side; coldness and numbness of face < on side; circular herpes at bend of elbow.

" **Sensations.** Great sensitiveness of internal parts.
Numbness in various parts.
Drawing pain in whole body.
As if drunken when rising from bed; pain as if constricted in occiput extending to nape of neck, which pains as if broken; as if head were numb and pithy; as if skin of

forehead was drawn into folds; humid eruption as if suppurating; sensation of foreign body in throat; throat feels as if ulcerated; as if air penetrated Eustachian tube; a sound in vertigo like ticking of a watch; as if l. ear were filled with water; as if a skin were before ear; as if hard body as large as an egg were behind ear; as of a cobweb over face; papillæ of tongue sensitive as if it were rubbed against teeth; as though food had to pass over a lump in throat; throat as if full of gurgling mucus; sensation on l. side of throat as though he had to swallow over an elevation, as if he were choking; as if food would not go down; as if food filled him to the top; sensation of lump in stomach with beating as of two hammers; as if everything would be torn to pieces during menstruation; as if intestines were torn; croaking, as of frogs, in abdomen; full abdomen as from accumulation of wind; incarceration of flatus; as if arms were paralyzed; hemorrhoids as if split with a knife; as if sphincter had lost its contractile power and was paralyzed; as if urethra were contracted; as if r. ovary would burst; as if everything would be torn to pieces during catamenia; as if genitals were swollen; constriction of chest as if about to suffocate; chest as if too narrow; like an electric shock from heart to front of neck; glands of neck tense and stiff; small of back aches as if bruised or broken; in arms and feet as if they were turned outward; arm feels "asleep;" pain in thumb-joint as if sprained; she thought her feet must burst; as if tendons of knees were too short; sensation of lump in stomach; as if skin were tightened over body; itching as though fecal matter would pass through skin; nails as if ulcerated; itching as if she must tear with her nails.

Pain: from l. temple down side of face to shoulder; in head; in lumpy patches on vertex; in eczema; from l. temple down l. side of face to l. shoulder; in ulcer on lower surface of tongue; in vesicles; in nodules on lower jaw; when swallowing; in throat; in stomach; in hepatic region; on l. of stomach; in upper abdomen; below navel; in belly; in inguinal region; in hemorrhoids; in sacrum; in coccyx; in uterus when reaching high with arms; over eyes; in middle of breast; in chest; in limbs; in epigastrium; in varices; in pimples and vesicles, on vulva; in nipples; in chest; in thoracic muscles; in nape of neck; in glands of neck; os coccygis while urinating; in shoulder and neck; in thumb-joint; in ulcers on feet; in nail of great toes; in periosteum.

Terrible pain in small of back and abdomen.
Violent pain in head; in l. ovary.
Intense headache.
Great anguish before menses.
Very painful tearing in l. zygoma.
Tearing: in forehead; in one side of head; in teeth; glands of throat; in teeth and gums; in r. ovary; in l. shoulder-joint; in hands; pains in thighs, in limbs; in feet.
Gouty tearing in toes.
Lancinating: in r. temples; in eyes; through uterus down to lower extremities.
Severe, sharp, cutting pain during stool.
Cutting stitches: in anus.
Stitching: in upper and lower limbs; in sacrum.
Cutting pains: in hypochondria; in both kidneys.
Ulcerative pain in throat.
Pinching pain: in stomach.
Stitches: from temple through eye to inner canthus; in ears; in both hypochondria; in l. side of abdomen; in urethra; in l. ovary; shooting through abdomen; in vagina; in chest; in region of heart.
Transient stitches: in l. temple.
Stitching pains: in temples; in anus; through uterus down to lower extremities; through abdomen; in chest; in fleshy part of chest.
Stitching pains: in eyes; in teeth; in gums; in l. shoulder; in vesicle on little finger.
Stinging pains: in temples; on cheeks; both sides of face; in upper lip; in teeth; in old ulcers.
Violent colic.
Gnawing pain: in bones of forearm.
Severe cramps: in abdomen.
Griping: in stomach; in abdomen.
Cramp pain: in legs; in stomach; in varices.
Labor-like pains: during catamenia.
Cramp: in stomach; in lower abdomen; in calves; in chest; in hand.
Constant cramp: in throat.
Spasmodic pains.
Bearing down pains: in hypochondria; in hips; in uterus to back; in womb; in bowels.
Colic: after eating.
Neuralgia: of face; in back of neck.
Twisting pain; in r. ovary.
Clawing pain: in stomach.
Digging pains: in abdomen.
Rooting pain: in chest.

Digitized by Google

Drawing pain: in molars; in limbs; in thigh bones; in forehead; from eyes up into head.
Tensive pain: beneath ears.
Fixed pain: in l. side, just above cardiac region.
Twitching: in arms; in feet; in eyelids; of muscles of l. side of face.
Starting: of hands and feet.
Throbbing: in sides of head; in matrix.
Grasping: in arms and feet.
Bursting: in forehead.
Burning: round spot on top of head; in eyes; around eyes; on cheeks; both sides of face; of lips; in blisters on lower side and tip of tongue; in stomach; in l. hypochondrium; in a small spot on l. side of abdomen; through abdomen; of vagina; of scalp and nape of neck; in vesicles on little finger; of heels, hands and soles of feet; in small red pimples; in fissures between varices; in shoulder; in old cicatrices.
Burning pressure: beneath armpit.
Rheumatic pressive tearing: in first joint of r. thumb; in feet and toes.
Binding, constrictive pain: in gastric region; in different parts.
Constrictive headache: in occiput; pain in stomach.
Constrictive pain: below umbilicus; in back.
Aching: in eyes; in male nipples.
Pressive pain: in vertex; in occiput; in head; in eyes; in teeth; from incarcerated flatus towards groins and anus; in head.
Pressure: deep in forehead; in lids; in stomach; in pit of stomach; in anus; in both kidneys; in bladder towards pudenda; in region of heart; in abdomen; in arms and feet.
Raw pain: in chest.
Numb pain: from sacrum down legs.
Sickening, painful feeling: at pit of stomach.
Violent sore pain: in spots on vertex.
Painful soreness: between pudenda and thigh; between upper part of thighs near genitals; of corns.
Soreness: of larynx; of lips; on l. side of tongue; in arms; of breast; between thighs; of male nipples; of r. upper arm; between fingers; of matrix; between nates; between toes; in both kidneys; in nose.
Smarting: in eyes; in urethra; between nates; in vagina.
Biting: in eyes; in eyelids; in urethra while urinating; in vagina.
Bruised feeling: in scalp; in thighs; in knees.
Sensitiveness: of one inguinal gland.

Digitized by Google

Oppressive headache: on top of head.
Constriction: in region of heart.
Beating: in stomach.
Fulness: of abdomen; in stomach.
Hardness: in lower part of abdomen.
Irritation: of genitals.
Jerking: in arms; in all muscles of l. calf.
Constant spasm: in throat.
Heat: in head; in eyes; in abdomen.
"Spoiled," insipid sensation in stomach.
Rawness: of mouth; of breast.
Scraping: of tongue; of breast.
Roughness: of larynx; of tongue; of mouth.
Dryness: in lids; of ears; of nose; of lips; of mouth; of mucous membrane of rectum; of vagina.
Urging: in abdomen.
Straining: in anus.
Weakness: of head down to neck; in back; in legs.
Sinking feeling: in back.
Torpor: of genital organs.
Stiff feeling: in hollow of knees.
Stiffness: of neck; of toes.
Tremulous sensation through whole body.
Flickering: before eyes.
Tiredness: of eyes; of forearms.
Heaviness: of eyelids; in lower lip; in abdomen; of head; of limbs; of legs.
Desolate, empty feeling: in head.
Numbness: in l. side of head; of l. hand; of matrix; in various parts.
Dulness: of head; in face; in head.
Beclouded feeling: in head.
Confusion of head.
Paralyzed sensation: of all limbs.
Restlessness: of legs.
Tickling: deep in chest.
Crawling: in l. hand and arm; in lips; in upper and lower limbs; in sacrum; in heels.
Formication: in lips; in hand extending up arm.
Itching: on scalp; all over body; in eyes; of eyelids; in ears; blotches on face and other parts of body; pimples on face; on cheeks; of abdomen; violent itching in hemorrhoids; on arms; on scrotum; of small herpetic patches on forearms, neck and throat; vesicles on vulva; pimples on vulva; vesicles on labia; of pudenda; of scalp and nape of neck; violent itching of coccygeal region; herpes circinatus, itching terribly in bend of elbow; in eruption over nates; small spots on arms; of

Google

red spot on upper part of thigh; papulæ; on various parts of body; violent on face and genitals.
Coldness: of scalp; of legs.

" **Tissues.** Contraction of muscles.
Hemorrhages, blood light red.
Anæmia; chlorosis. θGastrodynia. θGastralgia. θAmenorrhœa.
Pain in periosteum; gnawing pains in bones of forearm; drawing pain in thigh bones; malleoli painful to touch; exostosis and osteo-sarcoma; scrofulous affections of bones; < at night and from cold draught of air; > from warmth.
Soreness from lying in bed.
Very offensive exhalations from body.
Dyscrasiæ, especially when caused by a suppression of habitual secretions and excretions.
Scrofulosis; swelling and induration of glands.
Tumors in persons of herpetic dyscrasia; wens, smooth and shining, on scalp; sebaceous cysts, particularly when atheromatous; pus scanty and smelling like herring-brine.
Emaciation.
Emaciation of suffering parts.
Burning pain in old cicatrices.
General dropsy after an acute exanthem; was so swollen that he looked like a corpse about to be decomposed; could not move a limb, and did not even emit a groan; large round blister that seemed about to burst, on prepuce; legs and scrotum shone like a mirror.
Œdematous complaints.

" **Touch. Passive Motion. Injuries.** Touch: humid eruption on vertex painful; scurfy spots on vertex painful; pain in teeth <; hemorrhoids sore; violent pains in ovary; laryngeal region sensitive; causes pain in small of back; circular herpes feels hard.
Cannot bear tight clothing around hypochondria.
Rubbing makes gums bleed.
When riding in carriage: hears better; heat.
Overlifting, easily.

" **Skin.** Itching over various parts of body.
Itching becomes general and very violent, even on face and genitals.
Great itching, as though foreign matter would pass through skin.
Continual itching, < at night; nothing visible upon skin before scratching, which produces nodules and long welts.
Violent itching and burning, with eruptions.

GRATIOLA OFFICINALIS.

Hedge Hyssop. *Scrophulariaceæ.*

A plant growing in moist places in Central and Southern Europe.

The tincture is prepared from the fresh plant before flowering.

Extensively proved by German provers; also by Nicol and Spearman. See Allen's Encyclopedia., vol. 4, p. 491.

CLINICAL AUTHORITIES.—*Throbbing in temples*, Berridge, Raue's Rec., 1872, p. 24; *Pain in occiput*, Berridge, Hom. Clinics, vol. 4, p. 111; *Hydrocephalus*, Altdorfer, Raue's Rec., 1872, p. 63; *Cardialgia*, Raue's Rec., 1872, p. 134; *Swelling of mesenteric glands*, Hartung, Hom. Clinics, vol. 3, p. 35; *Cholera*, Würzler, Rück. Kl. Erf., vol. 5, p. 475; *Cholera infantum*, Miller, Raue's Rec., 1873, p. 122.

[1] **Mind.** Irresolute; want of perseverance.

Serious, taciturn, absorbed in reverie.

‖Hypochondriacal affections; melancholia.

‖Great depression and disinclination to do anything.

Peevish; capricious; constipation; oppression of stomach after a meal, etc. θHypochondriasis.

Ill humor, tired of life, apprehensive of the future.

‖Delirium tremens, when the delirium assumes the character of anger rather than of anxiety, in subjects not yet greatly exhausted.

‖Hypochondriasis and hysteria arising from abdominal troubles.

⁝Mental troubles from overweening pride.

[2] **Sensorium.** Intoxicated feeling during and after a meal.

Vertigo: with heat in head; on closing eyes; while reading; on rising from a seat.

‖‖Vertigo during and after a meal.

Violent rush of blood, with throbbing in forehead; vertigo and blackness before eyes; < by motion.

‖Determination of blood to head, heat and somnolence.

Fulness and congestion of blood to head with peculiar biting, burning in face and other parts; languor; nausea; disgust for food and vertigo; > in open air.

[3] **Inner Head.** Sensation as if brain contracted and as if head grew smaller.

Sensation of heaviness in forehead, as if brain would fall forward, with stoppage of nose.

Pressure in forehead, with vertigo.

‖Throbbing in temples.

Digitized by Google

Heat in head after rising from stooping.
Heaviness in head with nausea.
‖Headaches with peculiar biting and burning in face and other parts, languor in arms and legs, nausea, disgust for food, vertigo; > in open air.
Pain in occiput on early waking, > by rising or lying prone.
Pain in l. occiput on sneezing.
‖After several days' headache, weakness, loss of appetite, etc., convulsions, followed by sopor and occasional screaming; unconsciousness; lies upon back, with low respiration; occasional sighing; gnashing of teeth; eyes shut; pupils enlarged; slow pulse; unconscious discharge of feces and urine. θHydrocephalus.
‖Sick headache with mental depression; nausea, disgust for food; giddiness > in open air; sensation of heaviness in head and constriction of forehead.

[4] **Outer Head.** Tightness in forehead with wrinkles in skin.
Itching of scalp.
Peculiar coldness in and about head.
Frequent feeling of coldness on vertex, painful, and changing to a feeling of warmth when moving head.
Head very sensitive to cold.

[5] **Sight and Eyes.** Objects, even green ones, appear white.
Mist before eyes, when reading or writing.
Short-sightedness, with burning heat in face.
‖Eyes shut; pupils enlarged. θHydrocephalus.
Eyes feel dry as if sand were in them.
Itching about the eyelashes.

[6] **Hearing and Ears.** Itching of ears.

[7] **Smell and Nose.** Pressure at upper part of nose.
Smarting itching in l. nostril.

[8] **Upper Face.** Redness of face.
‖Sensation of tension and tingling in face; it feels swollen.
Tingling burning in malar bones.
Burning heat in face, while it feels cold to hand.
Every morning, for weeks, swelling of upper lip, disappearing after a few hours.

[10] **Teeth and Gums.** Teeth ache from cold.
‖Gnashing of teeth. θMeningitis.

[11] **Taste and Tongue.** ‖Tongue rough, coated with mucus.

[12] **Inner Mouth.** Fetid breath on waking.
Accumulation of clear water in mouth, causing frequent spitting.

[13] **Throat.** Pain in throat obliging one to swallow constantly; swallowing is difficult, as if throat were contracted; < during empty deglutition.
Stinging in throat (l. side).

Digitized by Google

Phlegm in throat, with inability to throw it off.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Hunger after eating, with feeling of emptiness; without appetite.
Appetite for nothing but bread.
Violent thirst.
Aversion to smoking.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.
Gulping up of bitter substances; empty retching.
Nausea: > after eating, and by eructations; in afternoon.
‖Two attacks of vomiting in quick succession, of yellow, bitter, sour water.
‖Vomiting of mucous and bilious matter.

[17] **Scrobiculum and Stomach.** Feeling of anxiety in epigastrium and stomach.
‖Gnawing at pit of stomach after eating, as of hunger.
‖Pressure at pit of stomach, as from a stone rolling from side to side, with cramp-like drawing which mounts into chest; at same time frequent urging to vomit and eructations; < after food.
Pain in pit of stomach, spreads to upper abdomen, back, and especially kidneys; nausea and vomiting; peculiar sensation in abdomen and stomach.
‖Great distension of stomach after meals.
Pressure in stomach after every meal.
Cold feeling of stomach, as if full of water.
Empty or cold feeling in stomach.
‖Pain in stomach, with nausea and general discomfort.
‖‖Cramps in stomach.
‖Cardialgia; pain commences in pit of stomach, and spreads to upper abdomen, back, and especially kidneys; vomiting; constipation; urine scanty, reddish, turbid, and painful to discharge.
‖Gastralgia.

[18] **Hypochondria.** Heating pain and burning in l. hypochondrium.

[19] **Abdomen.** Distension of abdomen in afternoon and evening.
Rumbling, with nausea, eructations and vertigo; much flatulence.
‖Cold feeling in abdomen.
Burning in abdomen.
Gnawing about umbilicus, as of worms.
Tingling in hypogastrium and around umbilicus.
Sticking pain about umbilicus.
Pinching in umbilical region, > by emission of flatus.
‖Colic, violent bellyache with nausea.
‖‖Blenorrhœa of the intestines with great depression and greatest disinclination to do anything.
‖Swelling of mesenteric glands after abuse of Iodine preparations.

Digitized by Google

[20] **Stool and Rectum.** ‖‖Frequent discharge of yellow, watery feces.

‖‖Diarrhœa-like stools of thin, fluid, bright yellow feces, followed by chilliness.

‖‖Diarrhœa, consisting only of yellow-greenish water, followed by burning in anus.

‖‖Diarrhœa of green, frothy water, forcibly evacuated without pain.

‖Yellow, watery evacuations upwards and downwards, with much flatus.

‖Frequent stools, consisting of thin, watery feces, with soreness in anus.

‖Stools frequent, gushing out with force.

‖‖Brown fetid mucous stools.

‖Stools: watery; yellow; green; frothy.

Diarrhœa: < in open air; < after drinking too freely of water.

‖‖Cholera morbus from drinking excessive quantities of water of moderate coldness; the quantity and not the coldness, being the cause.

‖‖Fully developed, rapid, Asiatic cholera.

‖Vomiting particularly severe, and often accompanied by pains in head; cramps beginning in solar plexus and spreading thence over whole body; the evacuations from above and below were always green, and gradually changed into a colorless fluid.

‖Unconscious passage of feces. θHydrocephalus.

Stools hard, scanty, tenacious, expelled with difficulty.

Before stool: nausea; rumbling in abdomen; cutting around umbilicus; pressing and ineffectual desire; repeated tenesmus and rumbling, as if diarrhœa would come on.

During stool: nausea; burning pain in rectum; straining.

After stool: burning pains in rectum; tenesmus; wrenching pain in coccyx; creeping chills; painful pressure in abdomen when walking, > by sitting down.

Pain not > by stool, but by escape of flatus.

Soreness in the rectum, burning during and after stool.

Stools with burning and protrusion of large, stinging-burning tumors; varices of rectum.

Tearing in rectum, or prickling in anus.

‖Great rectal and anal irritation, with passage of fetid mucus.

Constriction of anus.

Itching of anus.

Discharge of ascarides.

[21] **Urinary Organs.** Burning in urethra during and after micturition.

Digitized by Google

‖Urine diminished.
‖Urine scant, reddish, becomes turbid on standing.
‖Unconscious discharge of urine. θHydrocephalus.
Flocculent sediment in urine.

[28] **Male Sexual Organs.** Involuntary emission succeeded by a painful erection.
Stitches in l. spermatic cord, ascending through abdomen up to chest.

[29] **Female Sexual Organs.** Nymphomania.
Irritable condition of sexual organs with congestions.
Menses too early and too profuse.
Leucorrhœa with pains in small of back.
Darting in r. mamma when stooping < on rising, during menses.

[30] **Respiration.** ‖Respiration feeble; occasional sighing. θHydrocephalus.

[31] **Inner Chest and Lungs.** Oppression of chest, r. side.
Burning in l. side of chest.
Heat in chest, then in head and hands, with redness of face.

[32] **Heart, Pulse and Circulation.** Violent palpitation of heart, particularly immediately after stool, and with oppression of chest.
Pulse small, intermittent.

[33] **Outer Chest.** Darting in r. mamma.

[34] **Neck and Back.** Sensation as if neck were seized with hand.
Darting from l. scapula to shoulder and mamma.
Painful cramps in os coccygis.
Wrenching pain in coccyx after stool.

[35] **Upper Limbs.** Rheumatic pains in shoulders, arms, fingers, particularly in elbow and wrist-joint.
Itching in palm of r. hand.

[36] **Lower Limbs.** Bruised pain in thigh, after a short walk.
Lancinating tearing in tibia when sitting, disappearing when walking.
Smarting itching on tibia.

[37] **Rest. Position. Motion.** Lies upon back: with low respiration.
Lying prone: pain in occiput; tetanic condition.
Sitting down: pressure in abdomen >; lancinating tearing in tibia.
Stooping: darting in r. mamma.
Rising from stooping: heat in head; darting in r. mamma <.
Rising from a seat: vertigo; pain in occiput >.
Motion: < vertigo and blackness before eyes.
Walking: pressure in abdomen; bruised pain in thigh; lancinating tearing in tibia >.

Google

[36] **Nerves.** Physical and mental depression.
Great languor and prostration.
Tetanic condition, without loss of consciousness, while lying down after a meal, followed by deep sleep with emission of semen; bruised feeling of body, back and l. arm on waking.
Nervous diseases, such as mania, nymphomania, etc., and neuralgic affections caused by prolonged abuse of coffee.

[37] **Sleep.** Irresistible drowsiness with yawning, and involuntary closing of eyes.
Great somnolence and lassitude after meals.
Deep sleep, like stupor.

[38] **Time.** Afternoon: nausea > after eating and eructations; distension of abdomen.
Evening: distension of abdomen.

[39] **Temperature and Weather.** Open air: > fulness and congestion of blood to head; languor in arms and legs, nausea, disgust for food, vertigo >; diarrhœa <.
Warm room: chilliness.
Cold: head sensitive to cold; toothache.

[40] **Fever.** Chilliness in a warm room, during sleep, after an evacuation; with hair standing on end.
‖Coldness; shuddering when entering a room. θDiarrhœa.
Heat, ascending to face, with redness and increased external warmth.

[41] **Attacks, Periodicity.** Two attacks: of vomiting, in quick succession, of yellow, bitter, sour water.
After every meal: pressure in stomach.
Every morning: for several weeks swelling of upper lip disappearing after a few hours.

[42] **Locality and Direction.** Right: darting in mamma; oppression in chest; itching in palms.
Left: smarting, itching of nostril; stinging in throat; heating pain and burning in l. hypochondrium; stitches in spermatic cord; burning in side of chest; darting in scapula; bruised feeling in arm; itch-like pustules below buttock.

[43] **Sensations.** As if brain contracted; as if head grew smaller; as if brain would fall forward; eyes feel as if sand were in them; as if throat were contracted; as from a stone rolling from side to side in stomach; as if stomach was full of water; gnawing as from worms in abdomen; rumbling and tenesmus as if diarrhœa would come on; as if neck were seized with hand.
Pain: in occiput; in throat; in pit of stomach, spreads to upper abdomen; in back; in kidneys; in stomach; in head; in small of back.

[3] **Inner Head.** Terrible fulness in head, as though he had taken ten or more grains of quinine.
[5] **Sight and Eyes.** Conjunctiva injected, eyes presenting appearance noticed in congestion of brain.
Pain in eyeballs running directly back to brain, < from moving eyes.
Pain in l. eye and r. knee-joint, like rheumatism; pain in knee did not last longer than half an hour; pain in eye

Digitized by Google

became more intense, pupil becoming dilated; two hours afterward r. eye became affected.

‖Conjunctivitis and purulent ophthalmia.

‖Iritis, traumatic, or arising from cold or a metastasis of rheumatism; the pain is intense and the fever runs high.

[18] **Hypochondria.** Unbearable pain in region of liver and spleen, so severe that he cannot lie still a moment; soreness like that of acute rheumatism.

[23] **Female Sexual Organs.** ⁝Pruritus affecting vulva and vagina; whether arising from leucorrhœa, or of venous origin, or aphthæ.

[26] **Respiration.** ‖‖Fear of going to sleep on account of loss of breath, which awakens him.

‖‖On falling asleep respiratory movement ceases, and is not resumed until awakened by the suffocation resulting.

‖‖Mucous asthma depending on an abnormal accumulation of mucus in the smaller bronchi, tenacious and difficult to detach; patient feels and knows that expectoration brings relief.

‖Humid asthma, originating in catarrhal bronchitis.

‖After an attack of pneumonia vital forces so greatly reduced that recovery was despaired of; patient almost in a sitting position in bed, with a peculiar interrupted breathing, which entirely prevented sleep; every time he dropped into a doze breathing would become so interrupted that he would have to be aroused; pneumogastric nerve appeared half paralyzed and action of heart was very weak.

‖Cardiac asthma.

[27] **Cough.** Cough from reflex causes; a cough maintained by habit; chronic bronchitis and bronchorrhœa.

Mucus tenacious and difficult to detach.

[28] **Inner Chest and Lungs.** Chronic bronchitis, and cough with muco-purulent expectoration after pneumonia.

‖Bronchitis accompanying heart disease.

‖‖Severe cough with considerable purulent expectoration; on examination, flatness of entire l. lung; dyspnœa. θChronic pneumonia.

‖Cough, dyspnœa; flatness of r. lung and partial consolidation at base of lung.

Asthma; chronic bronchitis; hay-fever; pneumonia.

[31] **Lower Limbs.** ‖Leg greatly swollen, especially about ankle-joint; purplish-black color; two large ulcers over tibia, two and three inches long and half an inch in depth; abundant fetid secretion; severe pain; can hardly get about. θChronic ulceration of leg.

[35] **Rest. Position. Motion.** Sitting position in bed: on account of difficulty of breathing.

Digitized by Google

Cannot lie still a moment on account of pain.
Can hardly move on account of pain in legs.
Moving eyes: < pain.

[42] **Locality and Direction.** Right: pain in knee-joint; flatness of lung.
Left: pain in eye; flatness of lung.

[43] **Sensations.** As though he had taken ten or more grains of quinine, such terrible fulness in head.
Pain: in eyeballs; in l. eye and r. knee-joint.
Pains with soreness, like that of rheumatism.
Unbearable pain: in region of liver and spleen.
Severe pain: in limbs.
Burning: of chin.
Terrible fulness: in head.
Soreness: in region of liver.
Itching: of skin.

[46] **Skin.** ‖Epidemic rash like roseola, suffusing face, neck and often whole body, with severe burning and itching.
‖Irritable eruptions, papular or vesicular.
‖Rhus tox. poisoning.
Bites of insects; flea-bites.

[47] **Stages of Life, Constitution.** Woman, æt. 48, for two years; chronic pneumonia.
Man, æt. 60, after injury to l. eye; iritis.
Man, æt. 60, suffering for twenty years; ulceration of leg.
Old man, broken down with years of sickness, with organic disease of heart, just rallying from an attack of pneumonia; paresis of pneumogastric.

[48] **Relations.** It antidotes: *Rhus tox.*
Compare: *Amm. mur., Ant. tart., Kali. bich.*

GUAIACUM.

Gum Resin of Lignum Vitæ. *Zygophilleæ.*

A large tree growing in the West Indies.

The tincture is prepared from the resin.

Introduced by Hahnemann (Chr. Krankheiten) and proved by himself, Hartmann, Langhammer, Teuthorn, etc.

CLINICAL AUTHORITIES.—*Neuralgia*, Rück. Kl. Erf., vol. 5, p. 88; Sharp, Rück. Kl. Erf., vol. 5, p. 186; *Diphtheria*, Couch, B. J. H., vol. 23, p. 513; *Affection of stomach*, Rück. [1] **Mind.** ||Weakness of memory; excessive forgetfulness, especially of names.
|Thoughtless staring; during the morning.
|Disinclination to labor.
|Very sad and depressed. θConsumption.
Fretful; obstinate.

[2] **Sensorium.** |Dizziness on rising.

[3] **Inner Head.** ||Headache across forehead.
Drawing and lacerating in occiput and forehead.
Headache at night, like a pressure in brain, from below upward.
||Violent, sharp stitches in brain.
Sensation as if brain were detached and loose.
|Megrim.
|Rheumatic pains in one side of head, extending to face.
|Attacks of gout in head.

[4] **Outer Head.** |Neuralgia of l. side of head and face, extending to neck.
||Lacerating in whole l. side of head.
|External headache, with sensation as if blood-vessels were overfilled; extends to face and neck. θNeuralgia.
|Pulsative throbbing in outer parts of head, with stitches in temples; removed for a short time by external pressure and by walking, < by sitting and standing.

Digitized by Google

|Perspiration, principally on head and forehead (when walking in open air).
|Tearing pains in skull.

[5] **Sight and Eyes.** |Dilated pupils.
|Swelling of eyes.
||Sensation of swelling and protrusion of eyes; eyelids appear too short to cover them.
||Hard pimples around eyes.

[6] **Hearing and Ears.** |Painful dragging and tearing in l. ear. θOtalgia.
||Spasmodic earache.

[7] **Smell and Nose.** Pains in bones of nose.
Pains from head to nose.
Nose swollen.
Fluent coryza.

[8] **Upper Face.** |Heat in face, especially in evening.
|Face: red and painfully swollen; gets spotted, eyes, nose, cheeks swell; looks old.
|Lancinating painful stitches in r. malar bone and cheek.
|Severe neuralgia l. side of face, head and nape of neck; paroxysms appear every day at 6 P.M., and last till 4 A.M.

[9] **Lower Face.** |Dull ache in l. side of jaw.

[10] **Teeth and Gums.** |Toothache when biting jaws together.
|Tearing in teeth, ending with stitches.

[11] **Taste and Tongue.** |Food does not taste right.
|Tongue thickly furred; thick, white fur.
|Tongue brown, much furred. θConsumption.

[12] **Inner Mouth.** Inflammation of mouth.

[13] **Throat.** |Violent burning in throat.
||Threatened tonsillitis; quinsy; diphtheria.

[14] **Appetite, Thirst. Desires, Aversions.** |Violent hunger, afternoon and evening.
||No appetite.
|Much thirst. θConsumption.
|Desire for apples, which > gastric symptoms.
|Aversion to milk.
|Aversion to food, could not eat anything. θConsumption.

[15] **Eating and Drinking.** ||After eating without appetite, she gets sick.

[16] **Hiccough, Belching, Nausea and Vomiting.** ||Frequent empty eructations.
||Nausea from sensation of phlegm in throat.
|Every morning vomits a mass of watery phlegm with great exertion, followed by great exhaustion. θConsumption.

[17] **Scrobiculum and Stomach.** ||Burning in stomach and abdomen.
||Cramps and pains in stomach.

Digitized by Google

|Every Summer for many years recurrence of affection of stomach, which at times becomes very severe, vomiting of blood occurring.

[18] **Hypochondria.** |Constrictive sensation in epigastric region, with anguish and difficult breathing.

[19] **Abdomen.** |Great accumulation of wind in whole abdomen; pinching in abdomen from incarcerated flatulence, receding towards rectum until emitted.

||Twitches in abdominal muscles.

|Inguinal hernia.

[20] **Stool and Rectum.** |Diarrhœa commencing in morning; skin dry; chilly.

Thin mucous stool.

||Soft stool, in pieces.

||Cholera infantum, emaciation; face like that of an old person.

|Costive; stool hard, crumbling; very offensive.

[21] **Urinary Organs.** |Continuous urging even after urination, with profuse, fetid urine.

|Stitches in neck of bladder after ineffectual pressure to urinate.

|Cutting in urethra while urinating, as from something biting passing.

[22] **Male Sexual Organs.** ||Nocturnal emissions without dreams.

||Gonorrhœa-like discharge.

[23] **Female Sexual Organs.** |Subacute and chronic ovaritis, especially in rheumatic women.

|Amenorrhœa.

||Membranous dysmenorrhœa.

[24] **Pregnancy. Parturition. Lactation.** |Chilly crawls over mammæ.

[25] **Voice and Larynx. Trachea and Bronchia.** |Violent, spasmodic, inflammatory affection in windpipe, most in larynx, with such palpitation of heart could not get out of bed, nor call for help; feels as if suffocating.

[26] **Respiration.** |Sudden stuffed feeling in præcordia, like arrest of breathing; often attacks her suddenly even at night in sleep, causing dry cough, frequently repeated until expectoration appears.

[27] **Cough.** |Cough tight and dry, with burning fever; hot face.

|Dry cough with shortness of breathing till expectoration sets in.

|Dry cough, > by detaching and raising a little mucus; rheumatic patients.

|Cough with copious spitting of phlegm, and later of stinking pus; coughing up blood. θConsumption.

|Sputa and all excretions had such a horrible odor that

the relatives could hardly come into the sick room. θConsumption.

[28] **Inner Chest and Lungs.** ‖Intense pain in upper part of chest, from motion of head; expectoration of fetid pus.

‖Continued stitches, finally terminating in one, close below r. scapula; they seem to come from middle of r. half of chest, and are < by an inspiration.

‖Pleuritic stitches; l. side, < from breathing deeply.

‖Severe pleuritic stitches of phthisis, especially when in region of third or fourth rib, l. side.

‖Pseudo-pleuritic pains; frequently attending tuberculosis pulmonum in stage of softening and suppuration; intense pain in upper part of chest, from motion of head; expectoration of fetid pus.

‖Chronic pulmonary catarrh, even simulating phthisis, beginning as a metastasis, or extension of rheumatism or gout to fibrous portion of bronchial mucous membrane, with expectoration of blood and fetid pus.

[29] **Heart, Pulse and Circulation.** ‖Palpitation.

‖Pulse soft, small and very frequent. θConsumption.

[30] **Outer Chest.** After riding in open car, rheumatic stiffness of l. side of neck and shoulders, and pleuritic stitches in chest and between scapulæ, < by each inspiration; sharp stitches from scapulæ to occiput.

‖Sharp, stitching pains from third rib up on either side.

[31] **Neck and Back.** ‖Pain from head to neck.

‖Frequent stitches on l. side of nape, extending from scapula to occiput.

‖Aching in nape of neck, right and left of vertebræ.

‖Stiff neck due to cold, muscles of shoulders and spine affected.

‖Excessive stiffness of one side of neck, from neck extending to small of back, < when moving.

‖‖Contractive pain between scapulæ.

‖Rheumatic stiffness of whole l. side of back, from nape down to sacrum, with intolerable pain on slightest motion, not noticed on touch or during rest.

‖Stitches in l. side below true ribs, rather towards the back.

‖‖Chilliness in back in afternoon.

‖‖Shuddering and feverish chill in back.

‖‖Corrosive itching on back (by day).

[32] **Upper Limbs.** ‖Sharp stitches in top of r. shoulder.

‖Rheumatic pains in l. arm, from shoulder or elbow to wrist.

‖Painful drawing and lacerating in arm.

‖Lancinating rheumatic pains from elbow to wrist, l. arm.

‖Rheumatic pains in l. wrist-joint.

‖Pains first in knuckles, then in whole hand.

Digitized by Google

Every day: pain in foot more violent.
Every Summer for many years: recurrence of affection of the stomach.

Locality and Direction. Right: lancinating stitches in malar bone; stitch below scapulæ; stitches come from middle of half of chest; sharp stitches in top of shoulder; stitches in thumb; tension in thigh; lancinations in leg from tarsus to knee; leg swollen, contracted, stiff, immovable; drawn close to thigh; violent stitches from outside of calf to ankle.

Left: neuralgia of side of head; lacerating in whole side of head; dragging and tearing in ear; neuralgia on side of face; dull ache in side of jaw; pleuritic stitches; stiffness of neck; frequent stitches on side of nape; rheumatic stiffness of side of back; stitches in side, below true ribs; rheumatic pains in arm; rheumatic pains in wrist-joint; leg cramped.

From above downward: stiffness from neck to back; rheumatic pain in limbs.

From below upward: headache; pain from tarsus to knee; pains in knuckles, then in hand.

Sensations. Pressive, drawing, tearing pains; often ending in a stitch, especially the head-pains.

Like a pressure in brain; sensation as if brain were detached and loose; as if blood-vessels were overfilled; sensation of swelling and protrusion of eyes, eyelids appear too short to cover them; cutting in urethra as from something biting passing; feels as if suffocating; as if sitting on needles; as if muscles of thighs were too short; limbs feel as if swelled.

Pain: in head across forehead; in bones of nose; from head to nose; in stomach; from head to neck; in knuckles; in whole hand; in legs; in foot extending to thigh; arms down to fingers and to side of head; as from fatigue and weakness in arms and thighs; after abuse of mercury; in all joints even chest.

Anguish: in epigastric region.

Violent pain: in knee.

Intolerable pain: in back.

Intense pain: in upper part of chest.

Violent sharp stitches: in brain; from scapulæ to occiput; from outside of r. calf to ankle.

Stitches: in temples; in r. malar bone and cheek; in teeth; in neck of bladder; on l. side of nape; in l. side below true ribs; in r. thumb.

Pleuritic stitches in l. side of chest; in region of third and fourth rib, l. side; in chest between scapulæ.

Continued stitches: in middle of r. half of chest terminating in one close below r. scapula.

Digitized by Google

Sharp stitches: in top of r. shoulder.
Sharp, stitching pains: from third rib up on either side; in limbs.
Tearing pains: in skull; in l. ear; in teeth; in limbs.
Gouty, tearing pains: in limbs.
Lancinating: in r. malar bone and cheek, from elbow to wrist.
Arthritic lancinations: of limbs.
Cutting: in urethra while urinating.
Shooting pains: through limbs and head.
Lacerating: in occiput; in forehead; in whole side of head; in arm.
Stinging pains: in limbs.
Darting pains: from feet to knees.
Twitches: in abdominal muscles.
Pseudo-pleuritic pains.
Violent burning: in throat; in stomach; in abdomen.
Painful dragging: in l. ear.
Drawing: in occiput; in forehead; in l. arm.
Cramps: in stomach.
Pinching: in abdomen.
Contractive pain: between scapulæ.
Crawling pains: in thighs.
Pressing pains: in thighs; in bones.
Pricking: in nates; in muscles of extremities.
Rheumatic pains: in one side of head extending to face; in l. arm; in l. wrist; in extremities.
Neuralgia: of l. side of head and face extending to neck.
Gout: in head.
Aching: in nape of neck.
Dull ache: in l. side of jaw.
Pulsative throbbing: in outer parts of head.
Heat: in face; in painful limbs.
Rheumatic stiffness: of l. side of neck and shoulders; of whole l. side of back from nape down to sacrum.
Tension: in thighs.
Constrictive sensation in epigastric region.
Sudden stuffed feeling in præcordia.
Stiffness: of one side of neck extending to small of back.
Itching: in thighs when sitting.
Corrosive itching: on back.
Chilly crawls: over mammæ.

" **Tissues.** ‖Excretions are all intolerably offensive.
‖Great emaciation.
‖‖Acts especially upon muscular tissues, producing rheumatic and arthritic pains.
‖Acts on fibrous tissues.
‖Contraction of limbs; stiffness and immobility.

Digitized by Google

❙Contractions, with pain from slightest motion.
❙Joints swollen, painful and intolerant of pressure; can bear no heat.
❙Rheumatic swelling of joints.
❙Pain in all the joints, even on chest.
❙Softness of joints (after *Caustic.* in rheumatism).
❙Aching in bones, with swelling. θSyphilis.
❙Pressing pain in bones.
❙Swelling and softening of bones.
Suppuration of bone, with hectic, in men of dry habit.
❙Caries and spongious affection of bones; tibia and tarsal bones spongious, cannot bear slightest touch.
❙Promotes the spontaneous breaking of gouty abscesses, greatly relieving sufferings of patient.
❙Gout.

[45] **Touch. Passive Motion. Injuries.** The affected parts are very sensitive to touch.
Touch: tension in thighs <; osteomalacea of tibia and tarsus <; cannot bear slightest touch in carious affections of bones.
Pressure: > throbbing in head; intolerant on swollen joints.
Everything seems too tight.
After riding in open air: rheumatic stiffness of side of neck; shoulders.
After a fall: gouty inflammation and abscess at knee.

[46] **Skin.** ❙❙Itching, tetter-like eruptions.
Scratching improves.

[47] **Stages of Life, Constitution.** ❙Rheumatic affections, especially in syphilitic and mercurial patients.
❙Syphilides.
❙Old women.
❙Dark hair and eyes.
Children; growing pains.
❙Girl, æt., 23, sanguine, choleric; after being overheated got a violent cold, followed by consumption.
❙Woman, æt. 40, every Summer for many years; affection of stomach.

GUARANA.

Paullinia Sorbilis; Brazilian Cocoa. *Sapindaceæ.*

A climbing shrub, native to Brazil, the seeds of which contain *Caffeine*, and are used by the aborigines as a beverage.

Alcoholic solution of the dried paste made from the seeds.

Introduced by Gavrelle, who found it useful "in diarrhœa of phthisis, sick headache, paralysis, tedious convalescence, and as a general tonic." U. S. D.

Proving by Macdowell, see Allen's Encyclopedia, vol. 4, p. 511.

CLINICAL AUTHORITIES.—*Headache*, Bradley, Hom. Rev., vol. 16, p. 504; *Megrim*, Raue's Rec., 1873, p. 34; *Palliative use in megrim*, Müller, Trinks, B. J. H., vol. 21, p. 20, 284; *Diarrhœa, dysentery*, Raue's Rec., 1873, p. 34.

[1] **Mind.** Gayety; extravagant behavior.
Mental hyperæsthesia; intellectual excitement.

[3] **Inner Head.** ‖Sick headache in persons who have used tea and coffee to excess, or in whom nervous headaches, followed by vomiting, are excited by any error in diet or depression of mind.
‖Frequent attacks of sick headache.
‖Megrim.

[4] **Outer Head.** ‖Throbbing, congestive headache after excessive use of liquor.

[8] **Sight and Eyes.** Persistent twitching of eyelids.

[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite.

[20] **Stool and Rectum.** ‖Profuse, green, odorless, mucous stools. θInfantile diarrhœa.
‖Summer complaints of children; diarrhœa from teething; diarrhœa and vomiting from improper food.
‖Cholera infantum.
‖Chronic diarrhœa, nearly to marasmus, in a child.
‖Diarrhœa of phthisis.

[21] **Urinary Organs.** Spasm of the bladder.

[29] **Heart, Pulse and Circulation.** Diminution of the heart-beats.

[36] **Nerves.** Restlessness.
‖Nervousness and weariness.
‖Neuralgia.
‖Rheumatic neuralgia.
Reduced vital powers; grief; depression of spirits; anorexia; nervous hemicrania.
‖Convalescence from prostrating diseases.

Digitized by Google

‖Paralysis.

[37] **Sleep.** Unpleasant and uncontrollable sleepiness, drowsiness and heaviness of head, with flushed face, in persons of sedentary habits, after eating.

Sleeplessness.

[41] **Attacks, Periodicity.** Frequent attacks of sick headache.

[43] **Sensations.** Rheumatic neuralgia.

Throbbing, congestive headache.

Twitching: of eyelids

Spasm of bladder.

[44] **Tissues.** ‖Chlorosis.

[45] **Skin.** Urticaria; prurigo.

[48] **Relations.** Compare: *Agar.* (in twitching of eyelids); *Ignat., Nux vom.*, especially latter, in sick headache, etc.

GUAREA TRICHILIOIDES.

Red-wood; Ball-wood. *Meliaceæ.*

Tincture and triturations of the bark.

Symptoms, pathogenetic and clinical, by Petroz. See Allen's Encyclopedia, vol. 4, p. 512.

[1] **Mind.** Weak memory.

Indifference.

Mental anxiety.

Fear of losing her reason.

[2] **Sensorium.** ‖Vertigo, on stooping; reeling on seeing objects in confusion.

Buzzing and sensation as if brain were falling forward.

Sensation as of blow on head, leaving a sort of stupefaction, with diminution of power of thought for several days.

[4] **Outer Head.** Immobility of head; heaviness.

Yellowish spots on temples; acne rosacea.

[5] **Sight and Eyes.** Objects appear greyish.

Dilatation of pupils.

Sensation as if eyeballs were being pushed out.

‖Chemosis where the pad was so extended and so thick that nothing of eye could be seen but pupil, at the bottom of a veritable tunnel. θAfter cataract extraction.

Paralysis of eyelids.

Digitized by Google

[6] **Hearing and Ears.** Sensation as if ears were stopped up, with pressure outwards.
Eruption behind ears.
[7] **Smell and Nose.** Coryza with indurated excretion; heat, and ineffectual effort to sneeze.
[8] **Upper Face.** Pain as if burnt; puffiness below eyes; swellings which suppurate
[9] **Lower Face.** Twitchings of mouth.
Swelling of upper lip; pimples, scabs, chaps on lips and at commissures.
[10] **Teeth and Gums.** Compressive, corrosive pain of teeth.
[11] **Taste and Tongue.** Tearing pain in tongue; lancinations; paralysis of tongue.
Tongue heavy, swelled, bleeding; greenish-yellow fur.
Tongue feels cold and dry.
[12] **Inner Mouth.** ‖Roughness, with caries of palate-bone.
Dryness of mouth, with absence of thirst.
[13] **Throat.** Swelling of tonsils, rendering swallowing difficult.
Sensation of constriction and burning heat in throat.
Throat > from warm drinks.
[14] **Hiccough, Belching, Nausea and Vomiting.** Bitter risings, with distension and pressure at stomach.
Vomiting of bitter, greenish matter.
[17] **Scrobiculum and Stomach.** Sensation of rupture at præcordial region; < after supper.
‖Sensation as if bruised; itching; constriction.
[19] **Abdomen.** Pressure in region of umbilicus.
‖Pain, tensive as if contused, in abdominal walls.
‖Lancination in groins and inguinal rings.
‖Ailments from flatulence.
[20] **Stool and Rectum.** Dysentery.
Constipation during dentition.
‖Chronic constipation.
‖During stool, pain in rectum.
[21] **Urinary Organs.** Inflammation of bladder.
‖Involuntary urination.
‖Frequent desire to urinate in evening.
Urine clay-colored.
[23] **Female Sexual Organs.** Menorrhagia.
‖Fetid leucorrhœa after menses.
[24] **Pregnancy. Parturition. Lactation.** ‖Labor pains too feeble; suppression of labor pains.
Lochia scanty.
[26] **Respiration.** ‖Asthma of Miller; attacks of suffocation; burning; sobbing respiration; intermittent constriction of chest; respiratory symptoms < from putting hand to throat.
[27] **Cough.** ‖Whooping cough, with bloody sputa; dry, hack-

Digitized by Google

ing-cough; cough deep, suffocating, violent, with expectoration.

[28] **Inner Chest and Lungs.** ‖Sense of anxiety; emptiness; distension of chest; heaviness.
‖Lancinations in r. side of chest < by deep inspirations.

[31] **Neck and Back.** Weak back.
Cutting pain in back.
Constricted feeling in back; burning in loins.
Cutting pain in sacrum.

[32] **Upper Limbs.** Violent shocks in arms; cramps in arms; burning heat in arms; brown spots under arms; boils.
Trembling of hands.
Paralysis of metacarpus.
Swelling of hands.

[33] **Lower Limbs.** Cutting pains in legs; jerking motions.
Red spots on legs.
Contraction of feet and toes.

[34] **Limbs in General.** Cutting pain in joints; burning heat.

[35] **Rest. Position. Motion.** Stooping: vertigo.
Putting hand to throat: respiratory symptoms <.

[36] **Nerves.** ‖Weakness; sensation of distension.
Weakness of the muscles.
‖Cramps and convulsions of children.
‖Cramps when touched.
‖Convulsions during vomiting.
‖Hysterical tetanus.
‖Paralysis subsultus.

[37] **Sleep.** Somnolence, with dreams.
Frequent waking; sad dreams full of graves.

[38] **Time.** Evening: frequent desire to urinate.

[39] **Temperature and Weather.** Warm drinks: throat >.

[40] **Fever.** Heat of upper part and coolness of lower part of body.
‖During fever, anxiety, forgetfulness, pain in eyes, coated tongue, desire to vomit, oppression of chest, chest painful.
‖Intermittent fever, principally before noon; cold followed by heat with sweat; shivering, with flushes of heat; horripilation in affected parts.
‖Sweat, principally when eating or after eating.

[42] **Locality and Direction.** Right: lancinations in side of chest.

[43] **Sensations.** As if brain were falling forward; sensation as of blow on head; as if eyeballs were being pushed out; as if ears were stopped up; pain in face as if burnt; sensation of rupture at præcordial region; as if bruised at scrobiculum and stomach; as if contused in abdominal walls.
Pain: in rectum; in eyes; in chest; in bones.

Lancinations: of tongue; in groins and inguinal rings; in r. side of chest.
Tearing pain: in tongue.
Cutting pain: in back; in sacrum; in legs; in joints.
Cramps: in arms; of children.
Compressive, corrosive pain: of teeth.
Tensive pain: in abdominal walls.
Burning heat: in throat; in loins; in arms; in limbs.
Heat: of upper part of body.
Constriction: in throat; of stomach; of chest; in back.
Pressure: at stomach; in region of umbilicus.
Emptiness: of chest.
Heaviness: of chest.
Dryness: of mouth.
Roughness: of palate-bone.
Tongue feels cold and dry.
Twitchings of mouth.
Itching: at stomach.

" **Tissues.** ‖Steatoma; hot swelling; swelling of affected parts.
Suppuration of glands.
‖Caries of bones; nocturnal pain in bones.

" **Skin.** ‖Itching.
‖Itching eruptions; dry eruptions; eruptions of burning vesicles.
‖Lupus of an ochre-red color.

" **Relations.** Compare: *Apis* (chemosis, asthma Millari, etc.); *Arnic.* (injuries); *Phosphor.* (steatoma); *Ignat.* (nerves; *Mercur.* and *Silica* (bone pains, suppuration, etc.).

GUMMI GUTTI. (See Gambogia.)

Digitized by Google

GYMNOCLADUS CANADENSIS.

Chicot, American coffee-tree. *Leguminosæ.*

Introduced by Hering and proved under his supervision. See Allen's Encyclopedia, vol. 4, p. 519.

Tincture of the fresh pulp in the pods.

[1] **Mind.** Cannot think, comprehend or study; forgets everything.

Indifference to what happens around him.

[2] **Sensorium.** Dizziness with dimness of sight; nausea, belching.

Head feels full, tight, as if bound up.

[3] **Inner Head.** Intense frontal headache, eyes feel as if pushed forward.

Fulness and pressure in and over eyes, extending to top of head.

Throbbing headache over l. eye.

Pain in l. temple to ear and top of head, shooting through to r. side.

Bruised feeling of head, l. side.

Pain in head and back.

Intense headache, with stitches in bowels; in umbilical region at times.

Catarrhal headaches, premonitory stages; feeling of fulness in head, with throbbing in temples and forehead, with vertigo, heat of face, numbness and tired feeling.

[4] **Outer Head.** Desire to lean the head on something.

[5] **Sight and Eyes.** Eyes feel as if pushed forward.

Pain in l. eyeball and temple.

Burning heat and pain through eyes.

Eyes feel sore in morning.

[7] **Smell and Nose.** Frequent violent sneezing, originating very high up in nose.

[8] **Upper Face.** Sensation as if flies were crawling over r. side of face.

Erysipelatous swelling of face and head; hot face; it feels swollen; is compelled to rub the eyes.

[10] **Teeth and Gums.** Great sensibility of teeth; < on l. side and in upper teeth; slightest draught of cold air causes toothache; cold drink very painful.

[11] **Taste and Tongue.** Tongue coated bluish-white.

[12] **Inner Mouth.** Burning, drawing and scraping; burning in roof of mouth, extending to uvula and tonsils.

Google

[13] **Throat.** Inflammation and purple color of r. tonsil.
Sore throat, dark livid redness of fauces and tonsils.
Sticking and shooting in throat.
Mucus in throat and frequent hawking.
[16] **Hiccough, Belching, Nausea and Vomiting.** Belching of sour water.
Nausea after eating, with pain and fulness in stomach, and belching.
[17] **Scrobiculum and Stomach.** Burning in œsophagus and stomach.
Heat in stomach and sour, watery eructations.
Circumscribed burning in stomach, the size of a dollar.
[18] **Hypochondria.** Pain in l. side, as if spleen were swollen.
[19] **Abdomen.** Soreness and tenderness of abdomen.
Stitches in bowels and umbilical region.
[20] **Stool and Rectum.** Constipation, with ineffectual disposition to go to stool.
After stool, aching fulness in rectum.
[21] **Urinary Organs.** Pressure on bladder and frequent desire to urinate; urine passed in a small stream.
[22] **Male Sexual Organs.** Itching of glans penis and prepuce.
[25] **Voice and Larynx. Trachea and Bronchia.** Smarting in larynx.
[27] **Cough.** Tickling in throat in morning, causing cough, increasing through day; cough dry, hard and racking.
[28] **Inner Chest and Lungs.** Pressure on chest and sternum.
[29] **Heart, Pulse and Circulation.** Pulse small and weak.
[30] **Outer Chest.** Stitches in r. breast and intercostal muscles.
[31] **Upper Limbs.** Violent pain in l. forearm, in radius, as if bones were crushed and broken.
Pulsation in l. index, as if panaritium were forming.
[33] **Lower Limbs.** Stinging pain in l. knee-joint.
[35] **Rest. Position. Motion.** Desire to lean head on something.
Repugnance to motion.
Easily fatigued.
[36] **Nerves.** Repugnance to motion; a short walk in afternoon fatigues him much.
[38] **Time.** Morning: eyes feel sore; tickling in throat.
Afternoon: short walk fatigues him much.
Aggravation in evening.
[39] **Temperature and Weather.** Desire for heat; wants to be near fire.
Cold drinks very painful.
Cold draughts of air cause toothache.
[40] **Fever.** Desire for heat; wants to be near the fire.
Cold chills and pains in bowels (in descending colon).
Perspiration of axillary region and palms of hands.

Digitized by Google

Epidemic fevers, typhoid in character.

41 **Attacks, Periodicity.** At times stitches in umbilical region. Frequent sneezing.

42 **Locality and Direction.** Right: sensation as if flies were crawling on side of face; inflammation and purple color of tonsil; stitches in breast.

Left: throbbing headache over eye; pain in temple to ear; bruised feeling of head; pain in eyeball; sensibility of teeth; pain in side as if spleen were swollen; violent pain in forearm; pulsation in index finger; stinging pain in knee-joint.

43 **Sensations.** Head feels as if bound up; eyes feel as if pushed forward; as if flies were crawling over r. side of face; as if spleen were swollen; as if bones of forearm were crushed and broken; pulsation in l. index as if panisitium were forming.

Pain: in l. temple to ear and top of head; in head and back; in l. eyeball; in temple; through eyes; in stomach; in l. side; in bowels.

Violent pain: in l. forearm; in radius.

Intense frontal headache.

Stitches: in bowels; in umbilical region; in breast and intercostal muscles.

Sticking: in throat.

Stinging pain: in l. knee-joint.

Shooting: through head to r. side; in throat.

Throbbing headache: over l. eye; in temples.

Burning heat: in eyes; in roof of mouth; in œsophagus; in stomach.

Circumscribed burning: in stomach.

Heat: in face; in stomach.

Aching fulness: in rectum.

Drawing: in roof of mouth.

Bruised feeling: of head; l. side.

Tenderness: of abdomen.

Great sensibility of teeth.

Sore feeling: in eyes; in throat; in abdomen.

Smarting: in larynx.

Tickling: in throat.

Scraping: in roof of mouth.

Swollen feeling of face.

Fulness: in and over eyes; in stomach.

Head feels full, tight.

Pressure: in and over eyes; on bladder; on chest and sternum.

Numbness and tired feeling.

Itching: of glans penis and prepuce.

48 **Relations.** Compare: *Agar.*, *Æthusa*, *Bellad.*, *Cicuta*, *Hyosc.*, *Laches.*, *Lachnanth.*, *Solan. nigr.*, *Stramon.*

HAMAMELIS VIRGINICA.

Witch-Hazel. *Hamamelaceæ.*

A shrub growing in all parts of the United States, in damp woods or along streams; flowers in the Fall, the seeds ripen the year following.

The tincture is prepared from the fresh bark of the twigs and root.

Introduced by C. Hering, in 1850.

Provings by Preston, Burt and McGeorge. See Allen's Encyclopedia, vol. 4, p. 528.

[1] **Mind.** Forgetful, especially of words when talking.
No desire to study or work; ideas confused, could not compose.
Depressed in mind; also after emissions, with regretful mind.
Irritable; gloomy; depressed; stupid.
Felt as if he was going out of his mind.
Hemorrhages with tranquil mind.

[2] **Sensorium.** Vertigo when stooping.
Swimming sensation on rising.
Nausea and vertigo, with desire to lie down.
Fulness in head.
Stupor, headache, crowding fulness in head and neck, also in forehead.
General stupor.

[3] **Inner Head.** Fulness in forehead, with pressing in root of tongue.
Hammering over l. eye, as if he would go out of his mind.
Feeling as if a bolt was passing from temple to temple, and tightly screwed.
Sharp pains in temples.
Dull throbbing pain in back and top of head.
Dulness and fulness in head all day.
Distressing throbbing, aching and sense of fulness in head; head feels as if it would burst; face flushed.
Bursting headache on awaking, insupportable on bending downward.
Headache after an emission; depressed in mind.
Headache on rising.
Congestive headaches with cool skin.
Headaches accompanying venous congestion of brain,

Digitized by Google

lungs, portal or general venous systems; especially if followed by epistaxis.

Passive congestion or venous stagnation.

[4] **Outer Head.** After injury of head and face, great ecchymosis, with disposition to loose bowels and uneasy stomach; fainting on walking.

[5] **Sight and Eyes.** Eyes feel weak; painful weakness of eyes.

Headache from straining the eyes.

Feeling as if both eyes would be forced out of head, > by pressing them with fingers, but < a few moments afterwards.

Sore pain in eyes; eyes painful under slight pressure.

Traumatic iritis with hemorrhage into iris.

After injury to l. eye, abrasion of cornea, some blood in anterior chamber, vitreous so dark from hemorrhage that fundus could not be illuminated; there was only perception of light.

Inflammation and ulceration of conjunctiva and cornea, if caused by a blow or burn.

Traumatic conjunctivitis from burn of a flame; excruciating pain, great photophobia, constant acrid lachrymation and great vascularity of conjunctiva.

Conjunctivitis traumatica from a piece of splinter under upper lid.

Eyes inflamed; vessels greatly injected; intense soreness caused by a foreign substance.

Eyes inflamed and burning, from being on the water fishing, in the hot sun.

Traumatic ophthalmia, caused by a drop of boiling sugar getting into eye.

Extravasations in whooping-cough, eyeball congested from violence of concussion, and small vessels are ruptured.

Swelling of eyeballs and lids, with bloodshot appearance of eye.

Excessive congestion of conjunctiva.

Painful inflammation of eyes.

Spontaneous eversion of upper lid during course of severe conjunctivitis.

Blepharitis granulosa; catarrhal conjunctivitis with great pain and hyperæmia.

Black eye from a bruise.

[6] **Hearing and Ears.** Deafness in r. ear, passes off by noon.

Bleeding at r. ear, also nosebleed, which clears her head, relieving her.

Buzzing, ringing in ears.

[7] **Smell and Nose.** Oversensitive smell.

Digitized by Google

▮Bad odor from nose.
▮▮Sneezing spells, watery, excoriating, burning discharge.
▮Nose feels stopped up.
▮▮Profuse epistaxis.
▮▮Epistaxis, flow passive, non-coagulable.
▮Bleeding of nose, which clears her head, and affords great relief.
▮Nosebleed > headache and tightness across bridge of nose.
▮Idiopathic or vicarious epistaxis.
▮Epistaxis; bleeding commenced on l. side; child weak from loss of blood.
▮▮Epistaxis in morning, with feeling of tightness of bridge of nose, and considerable crowding pressure in forehead between eyes, and a benumbed sensation over whole os frontis.
▮Epistaxis occurring in a strong man suffering from a fever, with a miliary eruption; hemorrhage dark; pulse quick; respiration oppressed; lips and mouth dry; conjunctivitis.
▮Epistaxis at irregular intervals of from six to twenty-four hours; pale, enfeebled.
▮Oozing of very dark blood from nose of hemiplegic old man.
▮Epistaxis of childhood, passive, venous.

[8] **Upper Face.** ▮▮Burning in right cheek.
▮Occasional shooting pains along r. superior maxillary to malar bone; muscles feel sore and stiff.

[9] **Lower Face.** ▮▮Lips dry; sore, cracked.

[10] **Teeth and Gums.** ▮Sharp lancinating along molar teeth, extending to malar bone; also in temporal region.
▮Teeth ache, yet not decayed; can scarcely sleep; pains < in warm room.
▮Gums: sore, painful, swollen; bleed easily; passive, dark fluid bleeding; hemorrhage after extraction of teeth.
▮Bleeding and spongy gums.

[11] **Taste and Tongue.** Taste: flat; rough; metallic.
Tongue coated white.
▮Scalding sensation on tongue; feels as if burnt.
▮Blisters on sides of tongue; canker spots near tip.
▮Burns of tongue and lips.

[12] **Inner Mouth.** Dryness of mouth.
▮▮Scalding of tongue and mucous membrane of mouth and fauces.

[13] **Throat.** ▮▮Severe stinging in uvula, as if it would break, when he coughs.
▮▮Dryness of lips and fauces; must drink large quantities of water to assist deglutition.

Digitized by Google

‖Dryness of throat not > by water.
‖Feeling as if something had lodged in fauces.
|Tonsils and fauces congested.
|Chronic inflammation of throat; deglutition painful, even empty swallowing; nasal voice; dry, short cough with sensation of dryness in throat; mucous membrane of pharynx very red and permeated by enlarged blood-vessels; great swelling and redness of tonsils; catarrh of upper part of larynx and vocal cords.
|Varicosis of throat, the parts look bluish from distended veins, and there is more or less discomfort, with pain on swallowing, and hawking of mucus with blood.
|Sore throat in those predisposed to fulness of veins; < in warm, moist air.
|Sore throat, < r. side; r. tonsil more swollen, reddened, and veins enlarged, varicose.
‖Sore throat, preventing sleep.
|Varicosis of throat in gouty subjects.
|Hemorrhage from throat and fauces.
‖Hawks considerably.

[14] **Appetite, Thirst. Desires, Aversions.** |No appetite for breakfast; considerable thirst, > by small quantities of water.
|Great thirst.
‖Very thirsty, afternoon and evening; throat dry.
‖Averse to water, makes him sick to think of it.

[15] **Eating and Drinking.** After eating: nausea, must keep quiet, eructations; hiccough.
‖Pork nauseates.

[16] **Hiccough, Belching, Nausea and Vomiting.** |Eructations after a meal tasting of food.
‖Nausea, eructations and violent hiccough after pork, followed by burning in stomach and œsophagus; later, cramp pains in stomach and chest.
‖Nausea and vertigo, must lie still to prevent vomiting.
‖Nausea; with headache in frontal bone on awaking.
‖Nausea and inclination to vomit after a meal.
|Nausea, from pain in testicles.
|Painful, bloody vomiting.
|After fulness and constant pains in abdomen with irregular chills, sudden vomiting of blood and hemorrhage from bowels; great prostration; profuse cold sweat; weak, quick pulse; restlessness; fulness and gurgling in abdomen.
‖|Hæmatemesis.

[17] **Scrobiculum and Stomach.** ‖Burning in epigastrium; sharp pains in stomach.
|Violent throbbing in stomach.

Digitized by Google

‖Heaviness and pain back of stomach, along spinal column.
‖Cramp in stomach; after eating.
‖Hæmatemesis, blood black; sensation of trembling in stomach, or fulness and gurgling in abdomen; feverish by spells; restless; weak, cold; quick pulse; profuse sweat.
‖Hæmatemesis, very profuse, dark, clotted; slight bloody discharge from bowels.

[18] **Hypochondria.** Dull pain in hypochondriac region.
Sharp pains in l. hypochondrium, in region of spleen.

[19] **Abdomen.** ‖Flatulence.
Constant distress or drawing pains in umbilicus.
‖Burning in epigastrium and umbilicus.
‖Cramps in stomach and transverse colon two hours after a hearty dinner.
‖Soreness of abdomen.
‖Angioleucitis, surface of abdomen covered with distended lymphatic sacculi, filled with amber fluid, varying in size from pin's head to Spanish nut; inguinal glands tender and enlarged.
‖‖Varicose veins of abdomen.

[20] **Stool and Rectum.** Great desire for stool without being able to accomplish it.
Tenesmus or nervous pressure when at stool so intense that it appeared to strain out to tips of fingers.
‖From 12 to 15 stools every day with violent tenesmus, must often get up at night, stool of blood mixed with masses of mucus, entirely scentless, violent colicky pains; some fecal lumps in stools; only region of anus and rectum painful; great loss of spirit. θHemorrhoidal affection.
‖Dysentery consisting of profuse flow of clear blood, amounting almost to a hemorrhage, with no pain or tenesmus.
‖‖Dysentery; when amount of blood is unusual in quantity and amounts to an actual hemorrhage, generally of dark blood; or when there are clots or patches of blood scattered through the mucus; soreness of abdomen.
‖Every fifteen minutes discharge of pure blood, with severe tenesmus; crampy pain around umbilicus before stool; no appetite; great thirst; tongue coated brown and parched; hippocratic countenance; emaciation; desire for sour pickles. θDysentery.
‖Hemorrhoidal dysentery.
‖Stools: costive; hard, coated with mucus; hard, dry, dark colored.
‖Discharge of blood from anus in large quantities, of a tar-like consistency.

Google

Hemorrhage from ulceration of bowels.
Profuse hemorrhage of dark, grumous blood from bowels.
Dark, fetid diarrhœa, large, hemorrhagic discharges of black, grumous, fetid blood; rapid sinking; pale and excited; slight delirium; fearful of death.
Fulness in hypochondriac region followed by diarrhœa; great weakness; pale, dark red face; thirst; quick pulse; every three or four hours, thin, dark, rose-colored, offensive passages. θMelæna.
Hemorrhage from bowels of fluid, dark, fetid blood.
Hemorrhage from portal congestion.
Pulsation in rectum, as if piles would protrude.
Before stool difficult to defecate, anus spasmodically closed; great pains in anus during stool; after passage intense burning at orifice; at times, when he had no stool for several days, heavy frontal headache, low-spirited; thinks constantly of his ailment; nausea after eating. θFissure ani.
Hemorrhage from piles, in which the loss of a small quantity of blood was followed by prostration out of proportion to the loss.
Hemorrhoids, with hemorrhage, more or less profuse, occurring with every evacuation for months or years, with other symptoms of piles.
Bleeding hemorrhoids in which the blood flows with a certain regularity and without much expulsive effort.
Piles: bleeding profusely; with burning soreness, fulness and weight; back as if it would break; urging to stool.
Congestion of liver, with bleeding piles; pale from constant daily loss of blood.
Tumid hemorrhoidal veins of bluish color, the anus surrounded with red erythematous circle.
Protrusion of varices, anus feels sore as if raw.
Itching at anus.

[21] **Urinary Organs.** Hæmaturia; passive congestion of kidneys; dull pain in renal region.
Hemorrhoids of bladder; passive congestions.
Vesical catarrh.
Increased desire to urinate.
Ardor urinæ in females.
Urine clear, copious.
Urine more copious lying down.
Scanty, high-colored urine.
Irritation of urethra, followed by a discharge and ardor urinæ.
Catarrh of urethra, with disease of prostate gland.

Digitized by Google

Much urging to urinate, violent pains, thick mucous urine, discharge of blood from bladder, either in drops or in lumps, by the half-pint.

Hæmaturia, after blow in r. iliac region; blood bright red; face pale; pulse feeble; partial shock.

♂ **Male Sexual Organs.** Amorous dreams, with emissions, followed by lassitude, gloomy, depressing mood, dull pain in lumbar region.

Sexual dreams, with emissions; feels in morning as if he had not slept.

Emissions at night, without being aware of it; headache, depression of mind.

Erections; great desire for an embrace.

Great prostration of animal passions.

Impotence, organs greatly relaxed and constantly sweating.

Pain running down spermatic cords into testes.

Enlargement of l. spermatic vein, first noticed after violent exercise; four years previously tumor, from that time constantly increasing in size; dull aching pain in groin, sometimes extending into back, < horseback riding. θVaricocele.

For three months drawing pain in l. spermatic cord, which is painful, swollen and inflamed; l. testicle painful, swollen and hard.

Dull aching; severe drawing or excruciating pains in testicles.

Drawing pains in testicles day and night, extending from groins.

Severe dull pains in testicles.

Enlargement of r. testicle; hot and painful; following gonorrhœa.

Severe neuralgic pains in testicles, suddenly shifting to bowels, causing nausea and faintness; profuse cold sweat on scrotum; capillary stasis.

Severe neuralgic pains in testicles, pains dart from testicles to stomach, < nights and during rainy weather.

Awoke at 3 A.M. with severe neuralgic pains in testicles, preventing further sleep.

Pain in testicles < after midnight, until morning.

Orchitis; intense soreness and swelling; gonorrhœal orchitis.

Gonorrhœal epididymitis, especially in those cases where the disease partakes of a congestive or sub-acute character rather than the inflammatory.

Varicocele; circocele.

Varicosis of spermatic veins.

Fluid blood in hæmatocele.

Digitized by Google

‖Urethritis, with discharge of transparent mucus, with pain.
‖Phimosis.
Profuse cold sweat of scrotum at night.

[21] **Female Sexual Organs.** Congestion, inflammation and neuralgia of ovaries, with cutting, tearing pains in ovary, which is swollen and very tender.
Ovarian affections with swelling and tenderness, < at menses; retention of urine.
‖Ovarian soreness and painfulness.
‖Paroxysm of pain in r. groin; pain commences in region of r. ovary and passes down broad ligament to uterus, resembling labor pains; swelling in r. groin half as large as a hen's egg, very tender to pressure; pain in epigastrium and lumbar region; no appetite; tongue furred white; quite weak; confined to bed; constipation; pale, chlorotic appearance.
‖After a blow, ovary swollen; diffuse, agonizing soreness over whole abdomen; menses irregular, very painful, with exacerbation of all sufferings at catamenial epoch; retention of urine.
‖Frequent paroxysm of pain in l. ovary, passing down to uterus, with anæmia; every day or two ovarian region becomes much swollen.
‖Ovaritis, l. side, following miscarriage.
‖Subacute ovaritis incident to pregnancy and menstruation.
‖‖Congestion and inflammation of internal genitals, after blow in region of l. ovary.
‖Vicarious menstruation from ovarian irritation.
‖‖Gonorrhœal ovaritis.
‖Chronic parenchymatous metritis after subinvolution, with lumbo-abdominal neuralgia and painful sensation of heaviness in lower abdomen when standing and walking; uterus hypertrophied, anteverted, prolapsed and immovable; vaginal portion blue, hard and hypertrophied with œdematous, pouting lips; debility.
‖Uterine disturbance and tenderness, with retention of urine, tumefaction of os uteri, and diffused agonized soreness over whole abdomen, after violent blow in ovarian region.
‖‖Menses very dark and profuse, with soreness in abdomen.
‖Dysmenorrhœa: from ovarian irritation; inflammatory or neuralgic.
‖‖Amenorrhœa; vicarious bleeding from nose or stomach; costive; varices on legs.
‖Severe pains in lumbar and hypogastric regions and down

Digitized by Google

legs when menses should have appeared; fulness of bowels and brain, with severe pain through whole head, resulting in stupor and deep sleep lasting 12 to 36 hours, from which it was impossible to arouse her. θAmenorrhœa.

Amenorrhœa in a girl, æt. 18; has never menstruated, but had suffered instead with hæmatemesis, constant constipation and varices on legs.

Vicarious menstruation

Active or passive uterine hemorrhage.

Profuse, bright arterial hemorrhage; face and extremities cold and clammy; skin shrivelled and blue, as in collapse of cholera; said her tongue was cold, and that it felt like her hands and feet, as though it were dead; pulse feeble, thread-like, almost imperceptible, respiration slightly labored.

Bright red uterine hemorrhage, no clots; bearing-down pain in back.

Uterine hemorrhage, had been flowing for twenty-four hours, and lost over a quart of blood, bright and fresh, and not coagulable.

Uterine hemorrhage, with aching, boring pain in back, and sensation of bearing-down pain in either ovarian region.

Menorrhagia; feels very weak; "weak" pain in back; pain in l. ovarian region.

Uterine hemorrhage in an unmarried woman, brought on by jolting while riding in a heavy wagon over rough road.

Active uterine hemorrhage caused by fall.

Uterine hemorrhage; menses regular up to three weeks ago, since when the discharge has not left her.

Menorrhagia, profuse discharge of dark-colored blood; ceases at night, occurring only in daytime.

Metrorrhagia, passive flow; anæmia.

Uterine hemorrhage, flow steady and slow; blood dark colored, no uterine pains.

Acute vaginitis with spasmodic action and pain, fulness of vagina.

Great tenderness of vagina, causing pain during coition; leucorrhœa.

Vaginismus, intense soreness; prurigo of vulva.

Pruritus.

Profuse, persistent leucorrhœa, with great sensitiveness of parts; vagina raw and sore during an embrace; vulva itches; vaginitis.

Leucorrhœa, with much relaxation of vaginal walls; profuse fluor albus, constituting a drain on system as severe as a bleeding.

Digitized by Google

‖Leucorrhœa; great tenderness of vagina; flow bloody.

Pregnancy. Parturition. Lactation. Threatened abortion: in consequence of ovarian irritation and inflammation; after a fall.

‖In threatened abortion when the hemorrhage continues after uterine pains have been controlled by other remedies.

‖Hemorrhage of lying-in women.

‖Painful stiffness and sensation of swelling and weakness in l. leg during pregnancy.

‖Varicose veins on both legs during pregnancy so painful that she could neither stand nor walk; veins of feet appeared as if blood were dried up.

‖During pregnancy, varicose enlargement of veins of lower limbs with cramping pains at night, preventing sleep; cannot move about; three days after labor, three hemorrhoids forming a tumor as large as a child's head, of dark leaden color, painful, and very sensitive to touch.

‖Milk-leg, with swelling of l. labium, groin and thigh; difficulty of moving leg; painful but benumbed sensation of limb; swelling white and opaque, extending downwards, and in three days occupying whole of l. leg.

‖Milk-leg, swelling commencing in ankle, with difficult motion of limb from stiffness and pain in l. hip.

‖Two weeks after confinement, feverish, thirsty, sleepless, very weak, intensely nervous; pain in r. groin, about Poupart's ligament; next day upper part of thigh swollen, hard, white, very painful on pressure, especially along tract of femoral vein; the breast-milk left a faint pink stain upon a napkin. θPhlegmasia alba dolens.

‖Hemorrhoids after confinement; also after miscarriage, painful, but not bleeding; great prostration from small loss of blood.

‖Bleeding nipples, with great soreness.

‖Sore nipples.

Voice and Larynx. Trachea and Bronchia. ‖Hoarse on arising; awoke hoarse.

‖Long-lasting affections of vocal cords.

‖Granulations and redness of l. vocal cord with varicose enlargement of blood-vessels.

Tickling in larynx, with constant inclination to cough.

‖Catarrh of upper part of larynx and vocal cords.

Respiration. ‖Labored inspiration; oppressive tightness of lower part of thorax, with inability to take a deep and full inspiration; breathing impossible in recumbent posture; crowded fulness in neck and head; sensation

of suffocation so as to prevent him lying down; cannot take a deep inspiration when standing up. θDiaphragmitis.

‖When lying, felt a smothering sensation.

[37] **Cough.** ‖Tickling cough, tastes of blood on awaking.

‖Dry cough, severe in uvula, as if it would break; stitching.

‖Slight hacking cough, with blood-spitting.

‖Cough; hæmoptysis, with dull frontal headache; taste of sulphur in mouth.

‖Cough from a varicose condition of throat.

‖Expectoration thick, yellowish or greenish-gray, tasting putrid.

‖Spitting of blood by day without cough, with great relaxation of nerves, and weariness.

‖Hæmoptysis, active or passive, blood venous and comes up into mouth without coughing or scarcely any effort.

‖Hæmoptysis in consumption.

‖Hemorrhages; blood venous, raised with little effort, like a simple, warm current, established from within outwards.

‖Hemorrhages from lungs, sometimes every month, for over twenty years.

[38] **Inner Chest and Lungs.** ‖Hæmoptysis, tickling cough, with taste of blood or of sulphur; dull frontal headache; tightness of chest; cannot lie down, because of difficult breathing from congestion; fulness in head; mind calm.

‖Sensation of constriction across chest, increased by a long or deep breath.

‖Severe pleuritic stitches with phthisis.

Stitches in lower part of lungs.

[39] **Heart, Pulse and Circulation.** ‖Palpitation.

‖Pricking pain in region of heart and superficial veins of both arms.

Femoral pulse beats faster than radial.

[50] **Outer Chest.** ‖Dull aching pain constantly in muscles of l. chest, < using arms, afternoon and evening.

[51] **Neck and Back.** ‖Sore pain down cervical vertebræ.

Fulness in neck; had to sleep with neck free of any covering.

‖Small of back feels as if it would break; tearing pains.

After sensation of heat, tearing pains across small of back, with fulness of joints of legs, extending to all parts of body.

‖Severe headache all day, after an emission.

‖Dull, dragging pain in lumbar region.

‖Severe pains in lumbar and hypogastric regions, extending down legs.

Digitized by Google

Dull pains in sacrum and hips.

Upper Limbs. Bruised feeling in upper arms and shoulders, < from motion.

Stiffness in arms and shoulders.

Soreness in head of humerus extending down arm to elbow-joint; continuing for days. θRheumatism.

Sore pain in head of r. humerus (glenoid cavity), continuing for hours.

Tenderness of r. biceps, increased by pressure.

Dull pains in r. elbow-joint.

Stiffness of elbow-joint.

Rheumatic pain, constant aching in l. arm.

Severe drawing pains in flexor muscles, wrists, hands and fingers.

Lancinating in l. wrist-joint.

Prickling pain from wrist to shoulder, along superficial veins.

Violent pain in back of r. hand to shoulder-joint.

Palms of hands hot and dry.

Hands chapped.

Stiffness in hands and fingers.

Thumb-nail becomes sore, pus discharges after a slight knock.

Lower Limbs. Intense aching and soreness in thighs. θMuscular rheumatism.

Sore pain in r. femur; muscles of thighs sore as if bruised.

Soreness in femoral vessels to middle of thigh.

Inflammation of femoral vein, with erysipelatous spot near groin and over the vein, spreading over nearly one-half of thigh with flexure of leg; swelling of entire leg and foot, with tension; heat and pale appearance of limb; scanty urine, stiffening the linen; tympanitis; œdema of whole body, limbs and face.

Great pain and swelling in r. leg from knee to hip, very sensitive to touch; cutaneous veins hard, swollen, knotty and painful, finally involving veins of abdomen; skin erysipelatous; pulse 120, small and wiry; great thirst; no appetite; constipation; urine red and scanty, later suppressed; pain in kidneys, < from motion; great debility. θPhlebitis.

Varicose veins above knee.

Weakness of knees, afternoon.

Forcing feeling in varices; veins sensitive; dilated.

Varicose veins, very lame, great pain, can scarcely move about.

Varicose veins of legs; varicose ulcers.

Dull, dragging pains in legs.

Dull, heavy, drawing pains in feet and toes.

Digitized by Google

[34] **Limbs in General.** ‖Tired feeling in arms and legs.
‖Painful fulness of joints of legs, as if they would burst, which soon extends to all the joints of body.
‖Great soreness of affected parts, especially muscles; bruised feeling in muscles of upper and lower extremities; < from motion.
‖‖Rheumatism, with great soreness of muscles.
‖‖Articular rheumatism, with swollen and painful joints.

[35] **Rest. Position. Motion.** Must lie still to prevent vomiting.
Rising: swimming sensation; headache; hoarseness.
Lying down: urine more copious; felt a smothering sensation; at night sweats freely.
Recumbent position: makes breathing impossible.
Desire to lie down.
Standing: painful heaviness of abdomen; cannot take a deep inspiration.
Stooping: vertigo; insupportable headache.
Motion: bruised feeling in upper arms and shoulders <; pains in kidneys <.
Violent exercise: caused enlargement of l. spermatic vein.
Horseback riding: < dull aching pain in groin.
Walking: fainting caused by; painful heaviness of abdomen.
Using arms: pains in muscles of l. chest <.
Can scarcely move about: on account of painfulness of lower limbs; from varicose veins in limbs.
Can neither walk nor stand: legs so painful during pregnancy.

[36] **Nerves.** ‖General lassitude and feeling of weariness.
‖Easily becomes tired.
‖‖Prostration out of proportion to loss of blood. θBleeding piles.

[37] **Sleep.** Restlessness at night.
‖Uneasy, restless morning sleep.
‖Emissions of semen during sleep.

[38] **Time.** Morning: epistaxis; feels as if he had not slept; restless sleep.
After 3 A.M.: severe pain in testicles.
Noon: deafness passed off.
Day: drawing pain in testicles; discharge of blood; spitting of blood; severe headache.
Afternoon: very thirsty; throat dry; dull aching pain in muscles of l. chest <; weakness of knees.
Evening: very thirsty; throat dry; dull aching pain in muscles of l. chest <.
Night: stools of blood mixed with mucus; emissions; drawing pain in testicles; pains dart from testicle to

Google

stomach <; profuse cold sweat of scrotum; discharge of blood ceases; cramping pains in lower limbs; restlessness; whole body dry and hot; fever; sweats freely.
After midnight: pain in testicles.
24 hours: uterine hemorrhage flowing.
12 to 36 hours: slept.

[39] **Temperature and Weather.** ‖Takes cold easily from every exposure, but especially to warm, moist air; subject to varicose veins.
‖Cold creeps in open air, chills run up legs, head stopped up, dull pain over orbit.
Rainy weather: pains in testicles <.

[40] **Fever** ‖Chilly on going to bed; dreaded an attack of fever.
‖Chilliness over back and hips, extending down extremities.
Whole body dry and hot, at night.
Fever at night; hands hot, burning in eyelids on closing them.
Sweats freely at night, after lying down.
Pulse accelerated; fever.
Pulse 60 to 70 and full.
‖Typho-malarial fever; seventeenth day bloody stools, on twentieth day, profuse stool, consisting almost entirely of black, partly coagulated, offensive blood; six profuse hemorrhages occurred on this day and night; temperature fell; respiration hurried; surface circulation poor; skin cool, pulse weak, 140; anxious look on face; bruised sore feeling in abdomen and hips.
‖Hemorrhagic variola; blood dark, venous; oozing of dark blood from nose; bleeding gums, hæmatemesis, bloody stools; uterine hemorrhage, petechiæ; tearing pains across small of back, with fulness of joints of legs; typhoid condition.
‖Uterine hemorrhages, with or without abortion, in yellow fever.

[41] **Attacks, Periodicity.** At irregular intervals: epistaxis of from six to twenty-four hours.
Every fifteen minutes: discharge of pure blood.
Two hours after a hearty meal: cramps in stomach.
Every three or four hours: thin, dark, rose-colored, offensive stools.
For hours: severe pain in head of r. humerus.
Every day: from 10 to 15 stools; ovarian region becomes swollen.
For days: soreness in head of humerus, extending down arms to elbow-joint.
In three days: swelling spread from thigh to whole l. leg.
Seventeenth day: typhoid malarial fever; bloody stools.
Twentieth day: profuse stools; six profuse hemorrhages occurred.

Digitized by Google

Two weeks after confinement: feverish, thirsty, sleepless.
Every month for twenty years: hemorrhage from lungs.
For months or years: hemorrhoids with hemorrhage with every evacuation.
For three months: drawing pain in l. spermatic cord.

" **Locality and Direction.** Right: deafness in ear; bleeding at ear; burning in cheek; shooting along superior maxillary to malar bone; sore throat r. side; tonsil more swollen; enlargement of testicle; paroxysm of pain in groin; pain commences in region of ovary; swelling in groin; pain in groin; severe pain in head of humerus; tenderness of r. biceps; dull pains in elbow-joint; violent pain in back of hand to shoulder-joint; sore pain in femur and muscles of thigh; great pain and swelling in leg from knee to hip.

Left: hammering over eye; after injury to eye abrasion of cornea; bleeding of nose commenced in side of nose; sharp pains in hypochondrium; enlargement of spermatic vein; drawing pain in spermatic cord; testicle painful; paroxysms of pain in ovary; ovaritis; stiffness and weakness of leg; swelling of labium, groin and thigh, then of whole leg; pain in hip; granulations and redness of vocal cord; dull aching pain in muscles of chest; rheumatic pains in arm; lancinating in wrist-joint.

From within outwards: blood venous, raised with little effort, like a simple warm current.

" **Sensations.** ‖ Prickling stinging: veins, muscles, skin.
‖ Bruised, soreness.

Felt as if he were going out of his mind; as if a bolt were passing from temple to temple and tightly screwed; as if head would burst; as if both eyes would be forced out of head; tongue feels as if burnt; as if uvula would break when he coughs; feeling as if something had lodged in fauces; as if piles would protrude; back as if it would break; anus as if raw; as if he had not slept; tongue as though dead; veins of feet appeared as though blood was dried up; the muscles of thighs sore as if bruised; legs feel full as if they would burst.

Pains: in teeth in warm room; on swallowing; in testicles; back of stomach; running down spermatic cords into testes; in l. testicle; dart from testicles to stomach; in r. groin; in epigastrium; in lumbar region; in l. ovarian region; in hemorrhoids; in l. hip; in r. groin; in kidneys.

Excruciating pain: in eyes; in testicles.

Violent pain: in back of r. hand to shoulder-joint: at bladder.

Digitized by Google

Severe pain: in head; in lumbar and hypogastric region; in head of humerus.
Great pains: in anus; in r. leg.
Sharp lancinating: along molar teeth extending to malar bone; in temporal region; in l. wrist-joint.
Bursting headache.
Cutting, tearing pains: in ovary.
Tearing pains: across small of back.
Shooting pains: along r. maxillary to malar bone.
Sharp pains: in temple; in stomach; in l. hypochondrium.
Severe pleuritic stitches: with phthisis.
Stitching: in lower part of lungs.
Severe stinging: in uvula.
Severe neuralgic pain: in testicles; of ovaries.
Burning pain: in back.
Pricking pain: in region of heart and veins of arms.
Prickling pain: from wrist to shoulder.
Violent colicky pains.
Cramp pains: in stomach and chest; around umbilicus; of lower limbs.
Cramp: in stomach; in transverse colon.
Intense aching: in thighs.
Bearing down pain: in back; in ovaries.
Severe drawing pains: in flexor muscles, wrists, hands and fingers.
Drawing pains: about umbilicus; in l. spermatic cord; in testicles.
Rheumatic pain: in l. arm.
Agonizing soreness: over whole abdomen.
Burning: in eyes; in r. cheek; in stomach; in œsophagus; in epigastrium; in umbilicus; at orifice of anus; of piles; of eyelids.
Sore pain: in eyes; in gums; down cervical vertebræ; in r. femur and muscles of thighs.
Soreness: of abdomen; of anus; of nipples; in head of humerus; of thumb-nail; in femoral vessels; of affected parts; of skin.
Scalding sensation: on tongue.
Bruised feeling: in upper arms and shoulders; in abdomen and hips.
Aching: in head; in groin.
Violent throbbing: in stomach.
Distressing throbbing: in head.
Dull throbbing pains: in back and top of head.
Dull, heavy, drawing pains: in feet and toes.
Dull, dragging pain: in lumbar region; in legs.
Dull frontal headache.
Heavy frontal headache.

Digitized by Google

Dull pain: in hypochondriac region; in renal region; in lumbar region; in testicles; in sacrum; in hips; in r. elbow-joint.
Dull aching pain: in muscles of l. chest.
Painful fulness: of joints; of legs.
Painful weakness: of eyes.
Constant pains: in abdomen.
Painful sensation of heaviness: in lower abdomen.
Painful but benumbed sensation of limb.
Weak pain: in back.
Sore, stiff feeling: in muscles.
Stiffness: in arms and shoulders; of hands and fingers.
Crowding fulness: in head, in neck, in forehead.
Fulness: in head; in hypochondriac region; of vagina; in neck; of joints of legs.
Forcing feeling: in varices.
Stopped up feeling: in nose.
Tightness: across bridge of nose; across lower part of thorax; of chest.
Dulness: in head.
Tired feeling: in arms and legs.
Hammering: over l. eye.
Pulsation: in rectum.
Trembling: in stomach.
Benumbed sensation: over whole os frontis.
Tickling: in larynx.
Itching: at anus; of vulva.

" **Tissues.** ‖Venous congestions; hemorrhages.
‖Passive congestion, or venous stagnation of skin and mucous membranes.
‖Venous congestion, hemorrhoids, conjunctival vascularity, ciliary neuralgia, photophobia, lachrymation.
Hemorrhages from all mucous membranes.
Hemorrhages with asthenia or anæmia.
Profuse discharges, which simulate a hemorrhage, and constitute a drain upon system as severe as a loss of blood.
Evil effects from loss of blood.
Phlegmasia alba dolens.
‖Hemorrhagic purpura.
‖Phlebitis; prickling pains.
Varices, knotted appearance, extreme thinness of skin, blueness, almost blackness of pouches, parts feel soft and fluctuating.
‖‖Varicose veins and ulcers with stinging or pricking.
Varicose ulcers deep, circular, flat; ulcers that are very dark, almost black at base; surrounding skin bluish-black; oozing of blood; burning, stinging, or biting in

Digitized by Google

ulcer; edges sharp cut and on level with surrounding skin; pus thin, watery, bad smelling.
Very sensitive varices.
Purpura hemorrhagica with epistaxis and congestion of conjunctiva.
Articular and muscular rheumatism.
Rheumatism with great soreness of affected parts.
Incised, lacerated or contused wounds; checks hemorrhage, removes pain and soreness and promotes healing.
Dissecting wounds.
Burns.

" **Touch. Passive Motion. Injuries.** The pains are often unbearable, with great sensitiveness to touch, and fear of exciting new pain on moving.
Touch: hemorrhoids very sensitive; swollen leg sensitive.
Had to sleep with neck free from all covering.
Pressure: swelling in r. groin tender; upper part of thigh very painful; tenderness of r. biceps <.
Slight pressure: sore pain in eyes.
Pressing eyes with fingers: > feeling of being pushed out for a few moments.
Jolting while riding in a heavy wagon over a rough road brought on uterine hemorrhage.
After a slight knock: thumb-nail becomes sore; pus discharges.
After injury of head and face: great ecchymosis.
Blow or burn: inflammation and ulceration of conjunctiva and cornea.
Blow: r. iliac region caused hæmaturia; ovary swollen.
Bruise: causes black eye.
Caused by a fall: active uterine hemorrhage.
After a fall: threatened abortion.

" **Skin.** Soreness and smarting on small spots, not very sensitive to touch.
Ulcers with very thin and watery pus, bad smelling; more an ichor than pus.
Carbuncles; boils; abscesses; injuries resulting from falls.
Chilblains always bluish.

" **Stages of Life, Constitution.** Hemorrhages in patients of nervo-sanguine temperament.
Boy, æt. 14, growing rapidly; epistaxis.
Boy, after a blow; hæmaturia.
Colored boy, after injury; intraocular hemorrhage.
Irish girl, æt. 18; amenorrhœa.
Man, æt. 21, light complexioned, in good health; varicocele.
Young married woman; vaginismus.
Miss S., æt. 28; uterine hemorrhage.
Man, æt. 30, scrofulous; orchitis.

Digitized by Google

Woman, æt. 30, bilious-lymphatic temperament, nursing a babe; ovarian disease.
Woman, æt. 30, six months pregnant; varicose veins.
Man, æt. 30, well built, strong; hæmatemesis.
Colored woman, æt. 35; amenorrhœa.
Woman, had miscarriage during typhoid fever, subinvolution of uterus probably present; angioleucitis.
Married woman, whose menses have always been profuse, has been suffering from dysenteric diarrhœa for day or two; uterine hemorrhage.
Woman, plethoric habit; epistaxis.
Married woman, mother of two children; vaginismus.
Middle-aged man, with congested liver; bleeding piles.
Man, æt. 40, thin; melæna.
Woman, æt. 40, mother of six children; varices and hemorrhoids.
Woman, æt. 60, hemorrhages for over twenty years.
Woman, æt. 60, nervous temperament, was taken suddenly with a severe chill followed by fever; phlebitis.
Old man, hemiplegic; epistaxis.

Relations. Antidoted by: *Arnic., Camphor., Cinchon., Pulsat.* (toothache).
Complementary: to *Ferrum* (hemorrhages).
Compare: *Arnica* and *Calend.* (better than either in hastening absorption of intraocular hemorrhage); *Chloral, Sul. ac., Clemat. vitalba* (purpura); *Æscul., Bovista, Collin., Eriger., Galium, Lycopus, Senec., Trillium* (hemorrhages, etc.

HEKLA LAVA.

The lava and scoriæ thrown out from Mount Hekla, in Iceland.

It is described in a letter of J. Garth Wilkinson, of London, to Wm. H. Holcombe, of New Orleans. He writes: "Its known pathological effects on the sheep in the vicinity of Hekla are immense exostosis of the jaws. It also produces drying up of the milk in both sheep and cows. The finer ash, which fell on the pastures in distant localities was particularly deleterious, while the gross ash near the mountain was inert. In cows, post-mortem examination showed intestines filled with ashes hardened to a mass, and stomach coated over with a pitch-black membrane, spotted with brown, and difficult to remove by washing; the jaw teeth were covered with a shining metallic crust. Several young horses died from lumps on the jaw-bones, so large as to cause dislocation. The sheep, when butchered, were found to be of a bluish hue internally, and the intestines were friable. In many cases worms from two to three inches long, with pale gray bodies and brown heads, and a little thicker than a horsehair, were found in the bronchiæ. In sheep the osseous and dental systems were much affected. The head-bones, and especially the jaw-bones swelled and became so friable, that when boiled they fell to pieces. The thigh, and especially the shin-bones swelled and bulged. The jaws were sometimes covered with large swellings, which spread and were loose of texture, and darker in color than the bone; these could be separated from the bone without injuring it; but in some fatal cases a hole in the bone going down to the marrow, was discovered under the swelling.

These particulars are from a Danish account of the eruptions of Hekla, and their consequences to nature, to man, beast and vegetable.

Hekla lava, according to Prof. Morris, of University College, London, has for general constituents, combination of Silica, Alumina, Lime, Magnesia, with some Oxide of Iron. Sometimes it contains anorthite and other minerals. In this imperfect pathogenesy we have undoubtedly symptoms pointing to diseases of teeth and bone. I have used the lava in toothache and in swellings about the jaws, with magical effect in several cases; also, in gum-abscess from decayed teeth, and with apparently good results in difficult teething."—Raue's Rec., 1872, p. 6.

[2] **Sensorium.** ||Vertigo, everything goes up, down and sidewise.

[3] **Inner Head.** ||Chronic headache.

Digitized by Google

[7] **Smell and Nose.** ‖Destructive (syphilitic) ulceration of nasal bones.

[8] **Upper Face.** ‖Facial neuralgia or headache dependent on derangement of dental nerves, or where the irritating cause is a carious tooth.

‖Polypoid growth commencing in antrum Highmorii and from thence encroaching upon adjacent structure so as to deform face, forcing eyeball upwards and everting lid, and obstructing nostrils; downward into mouth, so that breathing and mastication were seriously impeded; epistaxis; headache.

[10] **Teeth and Gums.** ‖Toothache, particularly if teeth are very sensitive to pressure.

‖Toothache with swelling about jaws.

‖After extraction of carious wisdom tooth pain in wound, and at times in various localities in head and face, so severe that he cannot eat or sleep.

‖Neuralgia, when irritating cause is a carious tooth.

‖Neuralgic pains in cavities from which teeth had been extracted.

‖After extraction of molar tooth violent pain in upper jaw which is sore, swollen and painful to touch.

‖Since extraction of inferior molar of r. maxilla two years ago, tissues have not healed; continuous slight discharge of bad tasting pus, at times containing small particles of a soft, gritty substance.

‖Right cuspid of upper jaw very sensitive to slight pressure on crown; swelling, and indurated tumor as large as a pea under r. alæ nasi very sensitive to touch; conjunctivitis of r. eye.

‖After extraction of sore tooth gradual enlargement of lower jaw near cavity of tooth finally becoming as large as a hickory nut, causing cheek to bulge.

‖Gum abscesses from decayed teeth.

‖Toothache caused by abscesses of gums, injuries to alveolar process, or diseases of antrum Highmorii.

‖Enlargement of maxillary bone from injury.

‖Injury to inferior maxillary of a scrofulous girl, which produced an immense abscess, and afterwards great enlargement of maxillary bone.

‖Difficult dentition in scrofulous or rachitic children.

[30] **Outer Chest.** ‖Myalgia, especially of intercostal muscles.

[31] **Neck and Back.** ‖Induration and infiltration of cervical glands, studding neck like a row of pearls.

[33] **Lower Limbs.** ‖Hip disease.

‖Exostoses of tibia; nodosities very large; severe, continuous pain, incapacitating him from work; the exostoses and portion of periosteum, which had become carious

Digitized by Google

and soft, were removed by operation; necrosis of whole bone had been diagnosed; three days after administration of Hekla lava the pain, which still continued after operation, subsided, and by end of second week wound had healed.

Caries of bones of feet.

42 **Locality and Direction.** Right: cuspid of upper jaw very sensitive to slight pressure; swelling under alæ nasi; conjunctivitis.

43 **Sensations.** Pain in wound when tooth has been extracted.

Violent pain: in upper jaw.

Severe continuous pain: in lower limbs.

Neuralgia: of face; in cavities where teeth have been extracted.

Headache: dependent on derangement of dental nerves.

44 **Tissues.** It affects mostly the bones of the head, jaws, teeth and legs.

In five or six cases of osteo-sarcoma, exostosis, and osteitis it arrested the development and prevented recurrence.

Scrofulous ostitis or periostitis, resting on a syphilitic basis, and especially affecting bones of face and antrum Highmorii.

Osteitis; periostitis; exostosis; osteo-sarcoma; rachitis.

White swelling.

Whitlow and gumboil.

Syphilis.

45 **Touch. Passive Motion. Injuries.** Painful to touch: upper jaw; swelling under r. alæ nasi sensitive.

Slight pressure: right cuspid of upper jaw sensitive.

From injury to jaw: had enlargement of maxillary bone.

47 **Stages of Life, Constitution.** Girl, æt. 10, after falling upon an upright stick; enlargement of maxillary bone; Hekla lava 3d given for several days had no effect, but disappeared rapidly after Lava 31st.

Colored boy, æt. 15; exostoses of lower jaw.

Scrofulous girl, after injury to inferior maxillary; abscess and enlargement of maxillary bone.

Miss ——, æt. 27; affection of r. maxilla.

Man, æt. 35; neuralgia after extraction of tooth.

48 **Relations.** Compare: *Mercur., Phytol., Phosphor., Silica, Stilling., Sulphur.*

Erf., vol. 4, p. 50; Newton, Raue's Rec., 1871, p. 218; *Post-scarlatinal dropsy*, Miller, Raue's Rec., 1873, p. 226.

' **Mind.** ‖Total unconsciousness.

‖Weak memory.

‖When questioned answers slowly; stupefaction bordering on insensibility.

‖Diminished power of mind over body; cannot fix ideas; slow in answering, stares unintelligently; muscles do not act properly if will is not strongly fixed upon their action, as when spoken to, the attention being thereby diverted, she drops things.

‖A perfect picture of acute idiocy.

‖Idiocy and cretinismus.

‖Dull, says nothing.

‖Delirium.

‖Mania demonica; sees evil spirits at night.

‖Mania of a melancholy type, with fixed ideas.

Psychical conditions occupying a place between melancholia and mania, and in conditions where true depression and weakness is present, in which the patient is governed by a fixed idea.

‖An old woman having been accused of theft by the

women around, took it so much to heart that she hanged herself. This suicide produced a profound effect upon the women of the village. One after another accused herself of having caused the death of the old woman by their insinuations; they wept and howled, ran about day and night wringing their hands and despairing of salvation on account of their sin; they became quite irrepressible and deranged. In this way twenty-four or twenty-five women were affected, every fresh case being followed by another. θHysterical mania.

‖‖Thoughtless staring.

‖Stares at her surroundings in a strange, stupid manner, and, if questioned, stares in the same way at one, or glances wildly about grasping her head; when walking reels about, allowing her head to hang; the sensorial apathy and constant staring at one spot alternates occasionally with unintelligible muttering; constipation. θMelancholia after typhoid.

‖Constantly picking his lips and clothes.

‖‖Much lamenting, moaning.

‖‖Involuntary sighing.

‖Frequent screams in meningitis, or hydrocephalus.

‖‖Tries to escape, to throw herself into the river.

‖After typhoid, great mental dejection and apathy; dull and indifferent to all external impressions; will not speak; sits quietly in bed and seems lost in brooding; face pale, disturbed; languid, unsteady glance of eye; pupils dilated; pulse slow and weak; will take proffered food but never expresses desire for anything; sleep infrequent, restless; constantly seeks to escape, but is not violent; without a word quietly climbs out of window, and if she succeeds in escaping, goes in direction of river; finally threw herself into privy, from which she was rescued.

‖Stubborn silence.

‖Excessive anxiety and anguish.

‖Restless and anxious.

‖‖Dread of dying; feels unhappy in presence of cheerful faces.

‖Melancholia in girls at puberty before menstruation has been established, or if menses have appeared and then failed to return.

‖‖Melancholy; silent; during puberty; with anguish.

‖‖Homesickness.

‖‖Woeful, despairing mood.

‖‖Indifferent.

‖‖Irritable; easily made angry; < from consolation, does not want to be disturbed.

Digitized by Google

‖A noise or shock shortens the attack. θEclampsia.
‖Thinking about symptoms lessens them.

[2] **Sensorium.** Confusion of head, as if bruised, with fluent coryza.
‖Vertigo: with nausea, watery vomit and loose bowels; while stooping, ceasing when becoming erect.
‖Dull and heavy in head.
Brain feels too large and occiput empty; afterwards reverse in forehead; occiput feels as if it would fall forward; wants to lie down and roll head from side to side; feels helpless as an infant.
‖Sensorial apathy.
‖Stupefied; head hot, heavy; boring head in pillows, chilly; fingers cold.
‖‖Stupor, blunting of general sensibility; vision unimpaired, nevertheless sees imperfectly and does not regard the objects he sees; apparatus of hearing intact, yet hears nothing distinctly nor comprehends; organs of taste in working order, yet finds not the proper taste in anything; often distraught, hardly remembers the past or what has just happened; has no pleasure in anything; slumber light and unrefreshing; undertakes to work without having the power or strength.
‖All perceptions by the senses grow but slowly or not at all conscious. θTyphoid fever.
‖Obtuseness of sensory nervous system. θBrain disease in children.
‖Thorough unconsciousness; all impressions on senses and all expressions of will wanting; heart beat and pulse very slow; skin only moderately warm; bowels inactive; involuntary micturition; difficult swallowing; constantly picking his lips and clothes.
‖Sopor and coma.

[3] **Inner Head.** Violent pains in head, especially pushing out at forehead; > only in getting head down and remaining perfectly quiet.
‖Heat deep within head.
‖Burning heat in head; pale face; cold hands.
‖Intense and intolerable pain in head. θSpasms of children.
‖Shooting pains in whole head with giddiness. θAnasarca after scarlatina.
‖A shock passes through brain, as from electricity, followed by spasms. θPuerperal convulsions.
‖‖Pain in vertex as if a nail were driven in.
‖Pressing headache from within outward, with stupefaction and heaviness of head; < on moving head, from exertion; > in open air and from distraction of mind.

Digitized by Google

Stupefying headache: with coryza (4 to 8 P.M.); < from stooping; > at rest and in open air.

Violent pressive headache, with great heaviness, < in occiput, on awaking.

Headache, stupefying, mostly in occiput. θAfter scarlet fever.

Sensation in occiput as from a blow. θMeningitis.

Stupefying headache in occiput, < on stooping, from nape of neck to vertex, changing to burning pain on rising to erect posture, > only by lying quiet with closed eyes.

Headache from nape to vertex.

Headache nearly always with scalp symptoms.

Congestion of brain.

Chills with vomiting; sensation in occiput as from receiving a blow; then flushed face, unconsciousness, delirium; livid spots on body and limbs; head thrown back; neck rigid; eyes rolled upward; pulse 120; frequent convulsions. θCerebro-spinal meningitis.

Inflammation of brain, with stupefaction; heat and heaviness of head; boring with head in pillow, with chilliness of whole body; coldness of fingers; < from thinking of pain.

Acute meningitis when exudation is completed; reaction almost nothing; paralysis more or less complete.

Hydrocephalus when fever has abated and following symptoms set in: difficult breathing, want of sensation, trembling and moving of hands towards head, squinting of eyes with insensibility to light, chewing motion of mouth, and sopor.

For a whole week has lain only upon back in apparent slumber, eyes half closed, pupils contracted, cornea and albuginea dim and dull, as if covered with dust, with dry mucus in corners of eyes; eyes sunken, surrounded by blue circles, with squinting towards nose; face pale and emaciated; nose pointed, orifices sooty; lips dry and cracked; body emaciated, with dry, flaccid skin; epigastrium sunken; lower limbs spread apart, legs flexed upon thighs; on endeavoring to change this position, moaning, anxious, complaining outcries; face distorted with pain; head sinks helplessly back; on forcing eyes open dilatation of pupils, spasmodic action of iris, the light falling into the eye making as little impression upon him as calling or speaking to him; drinks eagerly, bites spoon without being aroused from apathetic condition; distorts face; chewing motion of mouth; grasps head with hands; grinding of teeth; cramps in muscles of back; constipation; involuntary urination; partial

Digitized by Google

sweat on scalp; pulse slow, soft and intermittent. θBrain affection.

‖Inflammation of brain with moderate fever, pulse weak, not accelerated, with occasional deep sighing; patient lies in an apathetic condition, cannot raise himself; involuntary trembling of hands and grasping of head; on being raised head sinks back; frequent rubbing of nose; eyes half open, pupils dilated, eyeballs turned to side or rolled upward; convulsive twitching of eyelids; forehead wrinkled and covered with cold sweat; no appetite; desires only drink, which is eagerly taken in large quantities, and is preceded and followed by chewing motion of mouth; easily angered, especially after being kindly spoken to; strikes about him; face pale and bloated; dulness and drowsiness; frequently starts up shrieking and crying; nostrils dry and dirty; dropping of lower jaw.

‖No sign of having sight or hearing, utters no articulate sound for two weeks. θAcute hydrocephalus.

‖Concussion of brain from a blow on head; pupils dilated, almost inactive to light; pulse full, easily compressed; could arouse him, but he would become drowsy again at once; breathing heavy and slow; especially < at 3 to 6 P.M.; after *Arnica* failed.

‖Dropsy of brain: post-scarlatinal, acute or chronic; mostly in scrofulous subjects.

‖Serous apoplexy.

Outer Head. ‖Boring with head in pillows, with sensation as if scalp on occiput were pulled down tight.

‖Rolls head night and day, moaning. θHydrocephalus. θTyphoid.

‖Throws head back, and from side to side. θBrain affections.

‖Sore feeling, as if bruised, < in back part of head; > on stooping.

‖Occiput sore to touch.

‖Partial sweat on scalp. θHydrocephalus.

‖Hair falls off, with pricking on scalp, < on occiput; face and body œdematous.

‖Humid scurf on scalp.

‖Scald head; moist scales, with engorgement of glands of neck.

Sight and Eyes. ‖Vacant look, pupils dilated, eyes wide open or half closed. θTyphoid. θHydrocephalus.

‖Eyeballs turned upwards, squinting. θHydrocephalus.

‖Eyes sunken, blue edges.

‖Nyctalopia.

‖Photophobia without inflammation.

Google

Worse from light, particularly daylight.
| Insensible to light. θHydrocephalus.
| Hippus; alternate contraction and dilatation of pupil, tremor iridis, after every attempt to arouse patient from stupor and especially if we move the head. θHydrocephalus.
| Early stage of gutta serena.
| Pupils: contracted; dilated; alternately contracted and dilated.
| Eyeballs red, glassy. θHydrocephalus.
| Cornea and albuginea dim, as if covered with dust. θHydrocephalus.
Cannot keep eyes open on account of heaviness.
| Lids, sticky, dry, sensation as if they were pressed down.
|| Loses hair, from eyebrows.
| Twitching in elevator of brows.

[6] **Hearing and Ears.** | Roaring and ringing in ears.

[7] **Smell and Nose.** | Smell diminished.
| Nostrils look as if smoked, sooty. θHydrocephalus.
| Nose pointed; nostrils dirty, dry. θHydrocephalus.
| Frequently rubs nose. θHydrocephalus.
|| Sneezing.

[8] **Upper Face.** || Stupid expression. θTyphoid.
| Forehead or face wrinkled. θHydrocephalus.
| Wrinkled forehead, bathed in cold sweat. θHydrocephalus.
| Face: red; hot, but pale; flushes red and then becomes pale; pale, œdematous; distorted; yellowish; pale, sunken, icy-cold; livid, with cold sweat.
| Paleness of face with heat of head.
| Twitching in levatores palpebrarum and cheeks, with heat in face.
| Left-sided neuralgia; parts so tender, cannot chew.
|| Dull pain in r. malar bone.

[9] **Lower Face.** | Constant chewing motion.
| Corners of mouth sore; steady flow of saliva; upper lips cracked; lips dry, cracked.
| White blisters on swollen lips.
| Sore lips.
| Lower jaw hangs down.

[10] **Teeth and Gums.** | Grinds the teeth.
When biting teeth together feels a pain near the roots in third molars, opposite each other.
| Pricking toothache in molars, evening and night, can bear neither cold nor heat.
|| Toothache during the chill.

[11] **Taste and Tongue.** | Taste bitter.
| Tongue: dry; white mornings; dry and red, previously

Digitized by Google

black, in typhus; slightly protruded and oscillating; trembling; feels stiff; numb, insensible; swollen; full of vesicles; pimples on tip; yellow with red edges.

[12] **Inner Mouth.** ||Mouth and palate dry, with cutting, scraping in palate on moving mouth to swallow.

Vesicles in mouth.

|Mouth, gums and tongue full of flat yellow ulcers, with elevated gray edges, or red, swollen bases; carrion-like odor; salivation; will take no food except drink; glands of neck and under chin swollen; eruption of blisters around mouth; face red and hot; stool watery and slimy, with tenesmus; pulse feverish; restlessness; moaning and crying. θAphthæ.

|Aphthæ, with lienteria.

Painless ulcer in mouth.

[13] **Throat.** |Water rattles down throat.

[14] **Appetite, Thirst. Desires, Aversions.** |Hunger: child nurses greedily; with disgust for food.

Wants food occasionally, but rejects it when offered.

||Thirst.

|Greedily swallows cold water; bites spoon, but remains unconscious. θHydrocephalus.

||Thirst with disgust for drink.

||Absence of thirst in all complaints.

Aversion to vegetables.

[16] **Hiccough, Belching, Nausea and Vomiting.** |Nausea. θCystitis. θHydrothorax.

|Nausea, yet hungry; still food is repulsive although taste is natural.

|Nausea during pregnancy.

|Vomiting.

Nausea and violent vomiting, with much heat in stomach.

Vomiting of a greenish, slimy substance.

|Vomiting of greenish-black substances, with colic.

[17] **Scrobiculum and Stomach.** Intense burning in œsophagus.

|Intense painful burning in stomach extending into œsophagus. θDuring pregnancy.

|Pit of stomach sunken. θHydrocephalus.

||Fulness and distension of pit of stomach.

|Pressing in region of stomach. θAnasarca.

Burning and scraping in stomach.

||Stomach painful when coughing or walking.

[18] **Hypochondria.** Liver complaint, particularly after abuse of Cinchona.

[19] **Abdomen.** |Sensation of coldness in abdomen.

|Rumbling in abdomen.

Much rumbling in abdomen, excessive colic, debility.

|Gurgling, as if bowels were full of water.

Digitized by Google

Excessive distension of abdomen.
Abdomen swollen, distended, painful to touch.
Griping, pinching about navel, followed by gelatinous stools. θAscites.
Excessive colic; weakness, features sunken, face cold, pale, covered with clammy sweat; pulse thready; thin diarrhœa.
Ascites: especially after scarlet fever; in scrofulous children.

30 **Stool and Rectum.** Watery diarrhœa, nausea, colic and great debility.
Stool consisting solely of clear, tenacious, colorless mucus.
White, jelly-like mucus, with burning and smarting in anus; diarrhœa preceded by colic, which is > after every stool.
White, gelatinous stool, like frog spawn is passed three or four times a day, with much pressure.
White, jelly-like stools with tenesmus.
Diarrhœa: during pregnancy; during dentition; during acute hydrocephalus.
Involuntary stools.
Diarrhœa and vomiting, with cramps in extremities, coldness of whole body, great thirst, altered features, weak, hoarse voice. θCholera.
Cholera acuta with heaviness and dulness of head, cramps in abdomen, fever, slow pulse, vertigo, nausea, watery vomiting and diarrhœa.
Feeling as if intestines had no power to evacuate feces, during soft stool.
Constipation.
Before stool: nausea and colic.
During stool: urging; tenesmus; nausea.
After stool: burning, smarting, at anus; relief of colic.
Blenorrhœa of rectum, with spasm of bladder.
Hemorrhoids.

31 **Urinary Organs.** Congestion of kidneys with extensive effusion of serum in abdominal cavity and tissue of lower extremities.
Dropsy after scarlet fever with albumen and fibrin casts in urine.
Suppression of urine, or urine highly albuminous, dark color, no sediment; breathes easier lying down; acute dropsies.
Nephritis causing dropsical symptoms. θSyphilis infantum.
Bladder overdistended; retention of urine from atony of muscular coats.
Cystitis; the inflammatory process increases slowly to

Digitized by Google

greatest violence, with constant desire to urinate, causing spasms; little urine is voided; constant nausea; distended abdomen.

‖Yellowness of whole body, nausea with aversion to food, dry tongue, great thirst, abdomen painful and distended on account of enormous swelling of bladder, discharge of urine gradually became less, and for last three days ceased entirely; after great pressure he passes, with much pain, a few drops of blood; lower limbs swollen and œdematous, swelling finally extending to abdomen; whole body cold to touch, and in many places covered with clammy sweat; pulse small and quick; great restlessness; introduction of catheter difficult on account of great pain and sensitiveness of parts. θCystitis.

‖Bladder becomes paralyzed and greatly distended during pregnancy.

‖Irritation of neck of bladder threatening inflammation.

‖Passes blood and slime, with burning and stinging. θUterine complaints.

‖‖Frequent urging to urinate, with scanty discharge.

‖Constant desire to urinate, passing very little and of dark color. θDuring pregnancy.

‖Spasmodic urging to urinate causing spasms.

‖Suppressed urinary secretion with dropsy.

‖‖Urine: scanty, dark, with floating, dark specks; like coffee-grounds; albuminous, scanty.

‖‖Dark urine, feeble stream.

‖Urine with dark sediment like coffee-grounds, top part is clear.

‖‖Coffee-grounds sediment. θDuring complaints of pregnancy. θDiarrhœa. θAmenorrhœa. θUterine dropsy. θSpasms of children. θHydrocephalus. θScarlatina. θDropsy after scarlatina. θAnasarca.

πLarge quantity of pale, watery urine.

‖Unconscious discharge of urine. θHydrocephalus. θTyphoid.

Male Sexual Organs. ‖Sexual desire suppressed; genitals relaxed; no erections.

‖Hydrocele after suppressed eruptions, either side.

Female Sexual Organs. ‖Uterine dropsy; secretion of urine almost suppressed.

Pain under l. nipple, pains all over her, forced her menses on; had to get up at night to make water.

‖Suppression of menses.

‖Amenorrhœa from disappointed love.

‖Amenorrhœa consequent upon getting feet damp, and getting wet through.

‖Menses absent for many months.

Digitized by Google

‖Voice weak; speech unintelligible. θHydrocephalus.
Loses hair from pudenda.

[31] **Pregnancy. Parturition. Lactation.** ‖Puerperal convulsions.

[36] **Respiration.** ‖Sighing.
‖Breathing difficult, with anxiety, < every evening; must sit up.
‖Chest constricted, gasps for breath, with open mouth; propped up in bed. θHydrothorax.
‖Constriction of throat, nose and chest.
‖‖Suffocative attacks, as from constriction of lungs.
‖‖Maltreated pneumonia, with moderate fever; breathing very difficult, anxiety; torments most towards evening; patient has to sit up.

[37] **Cough.** ‖Dry, < at night, with gagging; dry, while smoking tobacco.
‖‖Constant hacking cough, appearing suddenly while smoking.
‖Tension in region of l. short ribs during cough.

[38] **Inner Chest and Lungs.** Sharp cutting in region of lowermost true ribs across chest, from within outward, < by inspiration.
‖‖Hydrothorax.

[39] **Heart, Pulse and Circulation.** Anxiousness about heart, which prevents him from resting anywhere.
‖Pulse: often slower than beating of heart; frequent, soft, intermittent in hydrocephalus; small, wiry, in hydrothorax; almost imperceptible; rapid, small and tremulous; slow.

[41] **Neck and Back.** ‖Neck rigid, in spotted fever.
‖Cervical muscles stiff as far as occiput.
‖Cervical glands swollen.
‖Severe pain down neck, in l. side of face and in teeth.
‖Cramp in spinal muscles. θHydrocephalus.
Pain as from stagnation of flatulence; contractive pains.
‖‖Sudden amelioration in myelitis, with cold sweats which do not relieve, followed by symptoms of paralysis.

[42] **Upper Limbs.** ‖Arms moving continually, automatically, except when asleep.
πFrequent twitching in r. arm. θHydrocephalus.
Complete loss of power of muscles in both hands, with numbness in arms.
‖Thumb drawn in to palm.
‖Boring, sticking in wrist and finger-joints.
Small vesicles on fingers of r. hand, humid for a long time, and then covered with scurf.
‖Humid, painless vesicles between fingers.
‖‖Ulceration around the nails.

Digitized by Google

[33] **Lower Limbs.** ||Hip and knee-joints stiff.
||Pricking in l. hip.
||Violent, somewhat slow stitches, as with several pins.
Needle-like stitches in l. hip.
Inflammation of psoas muscle in a scrofulous case; spasms in bladder; burning and stinging when urinating.
|Legs œdematous.
|Legs drawn up, with every attempt to change her position. θHydrocephalus.
|Boring, stinging in knee and foot-joints.
|Weakness of feet; tottering of knees; he could only walk slowly; numbness of both feet; prickling in toes.
||Humid, painless vesicles between toes.

[34] **Limbs in General.** |Involuntary throwing or whirling about of one arm and one leg.
|Piercing in limbs, with uterine dropsy.

[35] **Rest. Position. Motion.** |Slides down in bed. θTyphoid.
|Lies on back, limbs drawn up. θTyphoid.
||Worse from bodily exertion.
Cannot rest anywhere on account of anxiousness about heart.
Has lain upon back for a whole week.
Lying quiet with closed eyes.
Lying down: breathes easier; heat with sweat.
Wants to lie down and roll head from side to side.
Getting head down and remaining perfectly quiet: > violent pain in head.
Propped up in bed: chest constricted, gasps for breath.
Must sit up: on account of difficult breathing.
Legs drawn up: with every attempt to change her position.
Stooping: vertigo with nausea; stupefying headache <; sore feeling in back part of head <.
Standing erect: vertigo ceases; headache >.
Motion: of head, < pain; external head painfully sensitive; chill <.
Moving head: hippus; alternate contraction and dilatation of pupils.
Arms and hands moving continually.
Chewing motion of mouth.
Grasps head with hands.
Involuntary throwing or whirling about of one arm and one leg.
Boring head in pillow.
Throws or rolls head from side to side.
Can walk but slowly on account of weakness of feet.
Walking: reels about allowing her head to hang; stomach painful.

Digitized by Google

[36] **Nerves.** ‖Great debility.
‖Heaviness of parts.
‖Sudden relaxation of muscles.
‖‖Want of bodily irritability.
‖Muscles refuse their service when not governed by strong attention and will.
‖Automatic motion of one arm and leg in hydrocephalus.
‖Convulsive twitching of muscles.
‖Spasmodic twitching in muscles of lower limbs.
‖Horrible convulsions, with extreme coldness.
‖‖Convulsions of sucklings.
‖Epilepsy, with consciousness, followed by deep sleep.
‖Rigidity of muscles of neck and limbs.
‖Traumatic tetanus.
‖Chiefly indicated when all reaction is past and we deal with the consequent paralysis.
‖Paralysis of detrusor; œdema of legs; vomiting of all he eats; constipation; sleeplessness; despair of getting well.

[37] **Sleep.** ‖Drowsy; when left alone, he goes to sleep.
‖Constant somnolence; can be aroused, but not to full consciousness. θTyphoid fever.
‖Soporous sleep, with shrieks and starts.
πStarting with fright in sleep. θHydrocephalus.
‖During sleep muscles twitch.
‖Dreams: confused, anxious, cannot be remembered.

[38] **Time.** Morning: tongue dry, white; chill commences; sweat with heat <.
Day: rolls head.
4 to 8 P.M.: headache with coryza.
Evening: pricking toothache in molars; difficult breathing <; burning heat all over body between 5 and 6; hot head and cold body.
Night: sees evil spirits; rolls head; pricking toothache in molars; had to get up to make water; dry cough <.

[39] **Temperature and Weather.** Worse from uncovering; > in warm air or wrapping up.
Feels better in open air; sensation as after a long illness.
Open air: headache >.
Getting feet wet and getting wet through: amenorhœa.
Aversion to uncovering.
After getting out of bed: chill <.
Cold to touch: whole body.
Can bear neither heat nor cold.

[40] **Fever.** ‖Coldness over whole body, with cold hands and feet.
‖‖Pale, sunken face, loss of pulse, icy-coldness, cold sweat all over, so that a drop is on the end of every hair.
‖‖Chill in alternation with pain in joints.
‖‖General shaking chill, with goose-flesh; painful sensi-

Digitized by Google

tiveness of external head to touch and motion; drawing tearing in limbs, and frequent sticking in joints, especially in elbows and shoulders; without thirst; commences in morning.

Chill spreads from arms; goose-flesh, pains in joints; face hot; drowsy; < after getting out of bed, and from motion.

Heat with shuddering.

Repeated attacks of, first heat, then chill with pains in abdomen.

Burning heat, followed by chill and colic.

Burning heat over whole body, especially violent in head, with internal shivering and chilliness, without thirst, in evening between five and six, and especially after lying down; when he desires to drink, it becomes repugnant to him, and can drink only a little at a time.

Internal heat of head with coldness of hands.

Hot head with cold body, towards evening.

Heat principally in head.

Fever with painful sensibility of head to touch and motion; with drawing, tearing pains in limbs and stitches in joints.

After lying down in bed, heat generally with sweat.

Heat in evening and through day, as soon as he lies down, generally with sweat.

Heat or sweat, with aversion to uncover.

Sweat with heat, in bed, < toward morning.

Cold sweat.

Whole body covered with cold, clammy sweat.

Sweat: sticky; less after sleep; towards morning, temperature unchanged.

In consequence of catching cold after scarlet fever: stitching pains in head; vertigo; pale swollen face unrecognizable; loss of appetite, bitter taste in mouth, nausea after eating and drinking, gagging and vomiting with relief; constipation; urine very scanty and brown; no sweat; skin hot and dry; abdomen swollen, but soft; great depression of mind, fears she will die; sits about despondent the whole day.

Stupid expression, though face is not collapsed; vacant look of eyes with dilated pupils; constant somnolence, out of which patient may be roused, but does not gain full consciousness; he stares at physician, is slow in comprehending and answering questions; all perception by senses grow only slowly or not at all conscious; utters no desire; when left alone sinks into slumber; lies upon back with limbs drawn up; sliding down in bed; mucous membranes but little or not at all affected; ab-

Google

domen not bloated, unpainful; no diarrhœa; sometimes unconscious discharge of urine; slow action of heart; pulse only 80; respiration slow; temperature of skin nearly normal; no miliary eruption; no sign of putrid dissolution of blood; loss of flesh trifling; only brain seems to be invaded. θTyphoid.

‖Temperature 106. θTyphoid.

41 **Attacks, Periodicity.** Repeated attacks of first heat, then chill, with pain in abdomen.

Three or four times a day: white, gelatinous stool, like frog spawn.

For two weeks: no sign of having sight or hearing, uttered no articulate sounds.

42 **Locality and Direction.** Right: dull pain in malar bone; frequent twitching in arm; small vesicles on fingers of hand.

Left: neuralgia of face; pain under nipple; tension in short ribs; severe pain side of face; pricking in hip; needle-like stitches in hip.

Within outward: pressing headache; sharp cutting in region of lower end of true ribs; pain in forehead.

43 **Sensations.** Confusion of head, as if bruised; occiput feels as if it would fall forward; brain as if too large; shock as from electricity passes through brain; as if a nail was driven into vertex; sensation in occiput as from a blow; cornea as if covered with dust; as if scalp on occiput were pulled down tight; as if eyelids were pressed down; nostrils look as if smoked; gurgling as if bowels were full of water; as if intestines had no power to evacuate feces.

Pain: under roots in third molars; under l. nipple; all over patient; pain as from stagnation of flatus; in joints; in abdomen.

Violent pains: in head, especially in forehead.

Intense and intolerable pain: in head.

Severe pain: down neck; in l. side of face; in teeth.

Great pain: in urinary organs.

Violent pressive pain: in head.

Drawing tearing: in limbs.

Sharp cutting: in region of lowermost true ribs across chest.

Shooting pains: in whole head.

Cutting scraping: in palate.

Piercing: in limbs.

Violent slow stitches: in lower limbs.

Needle-like stitches: in l. hip.

Stitching pains: in head.

Stitching: in wrist and finger-joints; in joints.

Digitized by Google

Pricking, tearing, pressing pains, running across affected parts.
Pricking: about navel.
Pricking pain: in molars; in l. hip.
Boring: in wrist and finger-joints; in knee and foot-joints.
Cramps: in muscles of back; in extremities; in spinal muscles.
Griping: about navel.
Neuralgia: left side of face.
Contractive pains: neck and back.
Pressing pain: in head; in region of stomach.
Burning pain: in head.
Smarting: in anus.
Scraping: in stomach.
Dull pain: in r. malar bone.
Stupefying headache.
Burning heat: in head; in œsophagus; with pain in stomach; in anus; in urinary organs; all over.
Sore feeling: in head.
Soreness: of corners of mouth; of lips.
Sensitiveness: of urinary organs; of external head.
Stinging: of urinary organs.
Prickling: in toes.
Dull and heavy: in head.
Constriction: of chest; of throat; of nose.
Tension: in l. rib.
Heat: deep within head.
Anxiousness: about heart.
Heaviness: of head; of limbs.
Numbness: of both feet.
Twitching: in r. arm.

" **Tissues.** Red parts become white; anæmia.
Great emaciation.
Loss of flesh; aphthæ.
Hydrocephalus and kidney troubles after exanthema.
Diseases of serous membranes, approaching insidiously, rather as a sequel from some other diseases than as a natural termination of an inflammation of brain.
Acts especially upon kidneys and serous membranes, giving rise to dropsical effusions of brain, thorax, peritoneum and cellular tissue.
Dropsy: of brain, chest, or abdomen; sudden swellings; anasarca; after scarlatina, nephritis, intermittents, etc. Concomitants: debility, fever, pains in limbs, diarrhœa, suppressed urine, etc.
Anasarca and effusion into pericardium and pleura; black urine.
Scarlatinal dropsy without much fever or pain in kidneys.

Digitized by Google

Face swollen; respiration difficult; urine blood-red. θAfter scarlet fever.

Anasarca, ascites, hydrothorax, etc., and especially for acute dropsies where there is great weakness, drowsiness, fever, stitching pains in limbs, diarrhœa and suppressed urine.

Syphilitis infantum.

Stinging boring, in periosteum; < in cool air.

" **Touch. Passive Motion. Injuries.** Touch: occiput sore; abdomen painful; painful sensitiveness of external head.

From a blow: concussion of brain.

" **Skin.** Skin: pale; yellow; cold and clammy.

Skin peels off; hair and nails fall out.

Livid spots on skin.

Miliary or humid eruptions.

Elephantiasis.

Repercussion of exanthemata.

Sudden dropsical swelling of skin.

Sudden severe chill, burning fever, headache, pain in all the limbs, pressure on chest, dry cough, unquenchable thirst; after 36 hours face and body greatly swollen, pitting upon pressure; dull headache, difficulty in answering questions, cannot concentrate his mind, low-spirited; want of appetite, pressure in region of stomach; frequent griping in umbilical region followed by urging to stool, with bilious mucous discharges; frequent urging to urinate with scanty discharge; great weakness; pulse small and slow. θAnasarca.

Anasarca after scarlet fever; urine dark, frequent and scanty; stupefying headache, < in occiput; pupils dilated.

Whole body enormously swollen on account of the œdematous infiltration of the connective tissue; cannot sit up, lies in a drowsy condition; complaining, dissatisfied when he is disturbed; urine greatly diminished; paleness of face and body. θAfter purpura.

Painless ulcers.

Itching unchanged by scratching.

" **Stages of Life, Constitution.** During dentition, brain symptoms.

Weakly, scrofulous children.

Girl, æt. 5 weeks; eclampsia.

Boy, æt. 15 months; ascites.

Child, æt. 18 months; aphthæ.

Child, æt. 2; aphthæ.

Boy, æt. 2½; hydrocephalus.

Girl, æt. 2½; brain affection.

Girl, æt. 2½, weak and scrofulous, after purpura; dropsy.

Digitized by Google

Small, weak, emaciated child; aphthæ.
Boy, æt. 3, another 4; hydrocephalus.
Girl, æt. 6; cerebro-spinal meningitis.
Girl, æt. 8, brunette, brown eyes, lively temperament; dropsy after scarlet fever.
Girl, æt. 17; amenorrhœa.
Girl, æt. 19, suffering for five weeks; melancholia after typhoid.
Girl, æt. 20, after typhoid; melancholia.
Girl, æt. 22; amenorrhœa.
Phlegmatic patient; amenorrhœa.
Man, æt. 40, dwarfed, hunchbacked; anasarca.
Nervous woman, æt. 42; neuralgia.
Man, æt. 47; sanguine temperament, three weeks ago had fever, which was treated with *China*; cystitis.
Woman, æt. 50; anasarca and ascites.

[1] **Mind.** ❙Great weakness of memory.
❙Dull, inactive and gloomy.
❙Restless, wants to be continually moving about.
❙Desire to be let alone; conversation is unpleasant.
❙Irritable; cannot endure the least contradiction or receive suggestions in relation to any subject.
❙Fault finding.
❙Always better when doing something, when the mind is engaged.
❙Profound melancholy; deep, undefined depression of mind.

[2] **Sensorium.** Dizziness; fretful; everything turns in a circle; anæmia.
❙Pain in head is < by stooping, and attended by increased vertigo.

[3] **Inner Head.** ❙Fulness and pressure in forehead or vertex; < or renewed when thinking thereof.
Pain in forehead as if a band about an inch wide were drawn across it from temple to temple.
Pressing pain in one or both temples (in a small spot); "a burning sensation" in top and front of head, > by motion and mental exertion, < when either is desisted from.
Pressure from within upwards to vertex, < by looking steadily at any fixed point.
Pain in occiput, with pulsative pain in vertex, vertigo, < stooping.
❙Uterine and hysterical headache.

[8] **Upper Face.** ❙❙Expression of suffering.
❙Pale, earthy face.
❙❙Face swollen.

[11] **Taste and Tongue.** ❙Bitter, disagreeable taste, every morning, 5 A.M., on awaking; lips, tongue and fauces dry.
❙❙Tongue white. θDiabetes.
Tongue red at tip and borders, white in centre.

[13] **Inner Mouth.** ❙Salivation of pregnant women and teething children.
❙Mouth gets sore; stomatitis materna.

[14] **Appetite, Thirst. Desires, Aversions.** ❙Loss of appetite, eructations, fulness, cramp, and painful congestion of stomach.

Digitized by Google

‖Appetite poor, food tasteless; "bilious;" sleepy during day.

[16] **Hiccough, Belching, Nausea and Vomiting.** Empty eructations.

‖Tasteless eructations and flatulence, causing nausea.

‖Nausea at supper.

‖Vomiting of food. θDropsy.

‖Obstinate vomiting in Bright's disease.

[17] **Scrobiculum and Stomach.** Constricting, pressing pain in stomach.

‖Cramp-like pain in stomach.

‖Burning in stomach; burning and aching in spine; eructations.

‖Irritable stomach, with general dropsy.

‖Idiopathic diseases of stomach, or sympathetic gastric disorders which accompany uterine and renal diseases; loss of appetite, eructations, fulness, cramp and painful congestion, with depression of spirits.

[18] **Hypochondria.** ‖Pain in l. side, as if in spleen, which feels as if distended, causing a dull ache.

[19] **Abdomen.** ‖Motion and rumbling in abdomen, as if diarrhœa would come on; cramps in stomach.

‖Colic-like pains in hypogastric region, off and on all day

‖Burning in lower third of abdomen.

[20] **Stool and Rectum.** ‖Stool: loose; yellow in morning, lumps of feces in evening.

[21] **Urinary Organs.** ‖Burning sensation at kidneys; can trace their outlines by burning; at 2.30 P.M., dull heat and pressure in vertex, as if skull were too full.

‖Weariness, languor, weight in region of kidneys; mind dull, inactive; afternoon and evening.

‖Pain in kidneys with albuminous urine.

‖Congestion of kidneys with albuminuria from amenorrhœa.

‖Right kidney sensitive.

‖Burning scalding when urinating; desire frequent and urging.

‖Strangury.

‖Involuntary discharge of urine after bladder seemed to be emptied.

Urine: profuse, clear, light colored; albuminous; diabetic.

‖Great emaciation and debility; can walk but a few steps at a time; complete loss of appetite; pale, chlorotic skin; tongue red at tip and edges, white in centre; headache in occiput in morning; immediate vomiting of animal food unless some acid was taken with it; constant aching and extreme tenderness in region of kidneys, especially the right; aching in region of bladder; intense cutting,

Digitized by Google

tearing pain in urethra when urinating; very frequent desire to urinate; urine limpid when first voided, but depositing after a time, a lead-colored, flocky sediment, adhering to vessel; the amount of urine reached nearly three quarts a day.

❙Restlessness, constant "fidgetty" desire to be doing something, low spirits, burning aching in lumbar spine, frequent profuse urination, urine pale yellow, sp. gr. 1,013, reaction faintly acid; must get up several times at night to urinate; debility, easily fatigued, palpitation from going up stairs; feels her weakness less when she is at work; in evening, sensation as if cold wind was blowing up limbs from heel to popliteal space; appetite poor; bowels relaxed; sleep difficult and unrefreshing. θAnte-desquamative stage of Bright's disease.

❙Pain in region of kidneys; painful stiffness of back; burning, scalding pain when urinating; frequent and urgent desire to urinate, with emission of large quantities of red urine; complete impotence.

❙Scanty menstruation, heaviness, languor, drowsiness, albuminous urine. θAlbuminuria.

❙Chronic albuminuria.

❙❙First stage of diabetes insipidus and nervosus of women, with congestion of lower third of medulla spinalis.

❙Dull, gloomy and irritable; melancholy; complete impotence; pain and lame feeling in back; numbness in feet, going off by motion. θDiabetes.

❙Lips stick together; thirst; restlessness; emaciation; urine profuse, clear; linen coming in contact with urine becomes stiff; large quantities of sugar in urine.

❙❙Saccharine diabetes.

♂ **Male Sexual Organs.** Sexual desire and power increased. Unusually strong and frequent erections at night.

❙Impotence, complete or partial.

♀ **Female Sexual Organs.** ❙Loss of sexual desire with or without sterility.

❙Profound melancholy, deep, undefined depression, with a sensation of soreness and weight in womb; a "consciousness" of a womb.

❙Ovarian pains; soreness and heaviness in hypogastrium.

❙Dragging weakness in sacral region, with prolapsus; also at climaxis, with marked debility; profound mental gloom.

❙Uterine displacement in weak patient; dyspeptic, lethargic, or indisposed to move about; aches and feels tired all the time; uterus sensitive; feels uterus move when she moves, it is so sore and tender; miscarries easily; depressed spirits.

Digitized by Google

Prolapsus uteri and ulceration of cervix; discharge constant, dark, badly smelling; flooding on lifting a weight, and on least exertion; face sallow, having an expression of suffering; great vaginal irritation; pain in small of back.

Uterus low down, fundus tilted forwards; finger passes with difficulty between os and rectum.

Prolapsus uteri, leucorrhœa; os protrudes externally.

Prolapsus uteri dependent upon want of tonicity.

Feeble women, with prolapsus or other displacements; aqueous, abundant leucorrhœa.

Prolapsus uteri with tendency to miscarriage.

Pain in lower part of back, through to uterus, piercing, drawing.

Great uterine hemorrhage all through proving; pain in back, through to uterus.

Profuse flooding, with serous leucorrhœa, much uterine and ovarian pain; climaxis.

Excessive uterine hemorrhage.

Menorrhagia from active congestion.

Menorrhagia from ulcerated os or cervix, blood dark and bad smelling, and continuing a long while; very profuse flow at every period, so that her strength is exhausted, and she suffers from debility; flow increased by least exertion; complexion pale, sallow, earthy-looking.

Menstrual flow too profuse; from atony of uterus; passive flow; < from slightest motion; dark colored, coagulated, of bad odor; face pale; face earthy color; feeble from loss of blood.

Menses too frequent and profuse in women who are feeble from loss of blood; flow passive, dark, coagulated, offensive.

Frequent and profuse menstruation when patients lose more blood than is made in inter-menstrual period, with pain in back, and frequent palpitation of heart.

Atonic and passive menorrhagia.

Dysmenorrhœa occurring in delicate women, of lax fibre, or who are chlorotic; sharp cutting and drawing pains during period, passing from back through uterus; swelling of mammæ, with considerable tenderness of mammæ and nipples; painful soreness over the ovaries.

During menses, weakness, weariness, lassitude.

Scanty menstrual flow, with heaviness, languor, drowsiness and albuminous urine.

General weariness and languor; gloominess and dulness of mind; amenorrhœa from general atony and torpid condition of whole body.

Google

Amenia, arising from or accompanied by disordered digestive apparatus and anæmia.

Atrophic ovarian amenorrhœa, with anæmia, considerable impairment of digestion and assimilation, sterility, extinguished sexual impulses, little or no pain in uterus or its appendages, except some congestion at menstrual period, with heaviness, fulness and pressure in hypogastrium.

Pain in back, with irritation of vagina.

Aphthous vaginitis, and erythema of external genitals.

Intense pruritus of vulva and vagina, with curdy secretion from vulva.

Labia and pudendum hot, red, swollen, burning and itching terribly; epidermis falls off in thin, transparent exfoliations; mucous surface of labia red, swollen, covered with a curdy deposit, like aphthæ.

Leucorrhœa, with pain in lower part of back; soreness and tenderness of breasts and nipples, particularly at catamenial period.

Leucorrhœa, with atony and anæmia.

Leucorrhœa in old people, atrophied, cancer cachexia.

Breasts swollen, nipples painful and tender, cannot bear least pressure of dress.

[34] **Pregnancy. Parturition. Lactation.** Threatened abortion, from atonic conditions; especially in habitual abortion; slightest overexertion or irritating emotion tends to cause loss of fœtus.

Had been flowing for several days; severe bearing down pains preventing sleep, great pain in small of back; walking about excites pains. Threatened abortion.

Useful for many of the consequences of miscarriage.

Intense pain in stomach, with burning pains; vomiting and salivation during pregnancy.

Subacute gastritis and vomiting in pregnancy.

Albuminuria during pregnancy; great weakness, drowsiness.

Chronic parenchymatous nephritis in connection with pregnancy and symptoms of approaching convulsions.

Pruritus vulva during pregnancy.

Nipples sensitive, painful, breasts swollen; cannot bear pressure of ordinary dress.

[29] **Heart, Pulse and Circulation.** Palpitation.

[30] **Outer Chest.** Chest sensitive to air.

Aching as if front of chest had been compressed in a vice.

[31] **Neck and Back.** Burning and heat in dorsal region, mostly between lower half of scapulæ, while sitting reading, at night.

Pains in back, with lameness, stiffness, and weight.

Digitized by Google

Pains in back, more troublesome during night.
Feeling of weight and uneasiness in region of kidneys.
Pain in lower part of back, through to uterus; piercing, drawing.
Sharp, spasmodic pain in back, running to crest of l. ilium.
Pain about upper part of sacrum and pelvis; more severe at night.
Back aches across lumbar region; feels tired and weak; burning and tired aching in lumbar and sacral region on sitting down.
Pains in sacro-lumbar region, with lameness, stiffness.
Dragging, aching pains in sacral region attending prolapsus uteri.
Aching pain in sacrum, also down into each buttock.

[33] **Lower Limbs.** Severe pains in r. hip-joint, < during motion.
Numbness in feet, going off by motion, only felt when sitting still.

[34] **Rest. Position. Motion.** Stooping: < pain in head; pain in occiput <.
Sitting down: tired aching in sacral and lumbar region.
Motion: burning sensation in top of head >; numbness in feet>; feels uterus move; menstrual flow <; pain in hip-joint <; profound debility >; of arms causes chills.
Wants to be continually moving about.
Least exertion: causes loss of fœtus.
Going up stairs: palpitation.
Can walk but a few steps at a time.
Walking: excites pain during pregnancy.

[36] **Nerves.** Tired, weary, drowsy.
General feeling of malaise.
Languor, unusually tired, yet knows no reason.
Great weariness, with copious acid urination.
Sense of profound debility is lost upon exercising.
Profound debility, as after severe acute diseases.
Debility after diphtheria.

[37] **Sleep.** Drowsy, heavy, sleepy during day.

[38] **Time.** Morning: yellow stools; headache in occiput.
During day: sleepy; colic-like pain in hypogastric region.
Afternoon: weariness, languor, weight in region of kidneys; mind dull, inactive.
2.30 P.M.: dull heat and pressure in vertex.
Evening: weariness, languor; mind inactive; sensation as if cold wind was blowing up her limbs.
Night: must get up several times to urinate; frequent erections; burning and heat in dorsal region; pain in back <; in upper part of sacrum and pelvis <.

Digitized by Google

[39] **Temperature and Weather.** Air: chest sensitive to.
Warm room: < toothache.
Warm moist air: < sore throat.
From being in hot sun: eyes inflamed and burning.

[40] **Fever.** Chill, seemingly radiating from solar plexus all over body; caused by motion of arms.
Flushes of heat pass over him on every movement while in a room.

[41] **Attacks, Periodicity.** Every morning, 5 A.M.: bitter taste.

[42] **Locality and Direction.** Right: severe pains in hip-joint.
Left: pain in side; sharp, spasmodic pain in back running to crest of ilium.
From within upwards: pressure into vertex.

[43] **Sensations.** As if band about an inch wide were drawn across from temple to temple; spleen as if distended; as if diarrhœa would come on; as if skull was too full; as if cold wind was blowing up limbs from heel to popliteal space; as if front of chest had been compressed in a vice.
Pain: in head; in occiput; in l. side; in kidneys; in back; in ovaries; in small of back; in lower part of back; about upper part of sacrum and pelvis.
Intense pain: in stomach.
Severe pains: in r. hip-joint.
Piercing, tearing pain: in back.
Intense cutting, tearing pain: in urethra when urinating.
Sharp cutting and drawing pains: during menstrual period.
Sharp spasmodic pain: in back, running to crest of l. ilium.
Colic-like pain: in hypogastric region.
Cramp: of stomach.
Bearing down pains: in abdomen.
Burning, scalding: when urinating.
Painful soreness: over ovaries.
Pressing pain: in one or both temples; in stomach.
Pulsative pain: in vertex.
Painful congestion: of stomach.
Constricting pain: in stomach.
Soreness: in womb; in hypogastrium: over ovaries.
Irritation: of vagina.
Burning: in top and front of head; in kidneys, can trace their outlines by burning; in dorsal region; in stomach; in spine; in lower third of abdomen; labia and pudendum.
Burning aching: in lumbar spine.
Aching: in spine; in kidneys; in region of bladder; in chest; in sacrum also down into each buttock.
Dull ache: in spleen.

Digitized by Google

Painful stiffness: of back.
Pressure: in hypogastrium.
Dragging weakness: in sacral region.
Lameness: of back.
Fulness: in forehead; in vertex; of stomach; in hypogastrium.
Numbness: in feet.
Pressure: in forehead; in vertex.
Heaviness: in hypogastrium.
Weight: in region of kidneys; in womb.
Terrible itching: in labia and pudendum.

" **Tissues.** ‖Chlorosis.
‖Anæmia, atony, from prolonged hemorrhage.
‖Dropsy from albuminuria, general debility, uterine atony or after uterine hemorrhage.
‖‖Rheumatism.

" **Touch. Passive Motion. Injuries.** Cannot bear least pressure of dress.
Extreme tenderness: of kidneys; mammæ and nipples.
Sensitiveness: of uterus.
Consciousness of a womb; feels it move when she moves.

" **Skin.** ‖‖Paleness and icteric color of skin.
‖‖Jaundice.

" **Stages of Life, Constitution.** ‖Women: with prolapsus from atony, enervated by indolence and luxury, > when attention is engaged, hence when doctor comes; worn out with hard work, do not care for sleep, so tired, and strained muscles burn and ache so.
‖Climaxis.
Girl, æt. 15; albuminuria.
Young woman, after getting feet wet; threatened abortion.
Man, previously in good health, ill six weeks; disease of kidneys.
Man, æt. 50, troubled occasionally for several years; affection of kidneys.
Woman, æt. 65; diabetes mellitus.

" **Relations.** It antidotes: *Kali brom.* (mental depression); *Lil. tig.* (prolapsus uteri).
Compare: *Aletris, Ferrum, Phos. ac., Senec., Stannum.*

PREFACE.

IN giving Volume VI to the profession, we recognize that our labor has been one of unusual pleasure and satisfaction, for it contains, besides a large number of valuable medicines, LACHESIS TRIGONOCEPHALUS, the pet child of Dr. Hering.

We quote a circular he issued in 1878, addressed "To All Friends of Lachesis:"

"Be it known that next 28th of July it will be fifty years since the first trituration and first dilution in alcohol of the snake poison Trigonocephalus Lachesis was made.

"We intend to celebrate that day by closing a collection of reports, consisting of provings, toxicological effects, cures, characteristics, corroborations, etc., etc. Quotations from books or journals where *Lachesis* has been mentioned are solicited, since it is possible that some may have escaped the author's notice.

"In the life of the author the order of the Parcæ or Fates has been reversed. Atropos, the inevitable, who cuts the thread, came to him first when a little boy in the form of a caterpillar on his father's grapevine and gave the incentive to the study of natural history.

"Then came Lachesis, the disposer of destinies; and Clotho comes last and holds the distaff while the author spins the fabric of symptoms.

"The son and daughter of *Lachesis*, by name *Psorinum* and *Lyssinum*, heretofore called *Hydrophobinum*, are receiving a careful revision and will be printed before long. The several brothers and sisters of *Lachesis* are waiting to be acknowledged and proved, particularly the Naja of East India, and the

Digitized by Google

Lance viper of Martinique. We do not even have a complete collection of the effects of the bite of any of these snakes.

"The *Lachesis Jubilee* could not be better celebrated than by sending contributions to such a collection; also cured cases, provings, etc., etc., all of which will be gratefully acknowledged by the author and embodied in the monograph.

"CONSTANTINE HERING."

To all who responded to the invitation (their names are printed in the list of Clinical Authorities heading *Lachesis*) the editors return thanks in the name of the author, who did not live to publish his monograph.

In collecting the clinically verified symptoms of *Lac Caninum* and *Lac Defloratum*, remedies that are fast growing in usefulness and popularity, we are indebted for valuable assistance to Drs. S. Swan, of New York, and E. W. Berridge, of London, besides others in the profession.

GUIDING SYMPTOMS

OF OUR

MATERIA MEDICA.

HEPAR SULPH. CALC.

Sulphuret of Lime. *Ca. S.*

Introduced by Hahnemann, who used the white interior of oyster shells and pure flowers of sulphur, from which are prepared the triturations.

Provings by Hahnemann, Stapf, etc. See Allen's Encyclopedia, vol. 4, p. 572.

CLINICAL AUTHORITIES.—*Mania with scabies*, Sztaraveszki, Hom. Clinics, vol. 1, p. 56; *Affection of mind*, Dulac, Med. [1] **Mind.** ||Great weakness of memory with the irritability.
|Dementia, with complete stupidity, sits silent and speechless in a corner.
|Delirious mutterings, with burning heat of body.
||Frightful imaginings.

Digitized by Google

Frightful visions of fire and of dead persons.
Hasty speech and hasty drinking.
Violent, fretful, passionate; spoke with great volubility, would not listen to any remarks offered. θMind affection.
On awaking, rushed home with frightful gestures, threatened to murder wife and children, attempted to set house on fire, and was with difficulty controlled; after being received in an asylum, sat in corner of room silent and motionless; urine and feces passed involuntarily; whole surface of body covered with scabious eruption; restless at night. θScabies.
Malicious mood; feels as if he could murder some one with pleasure.
Repulsive mood, with desire to be left alone.
Child does not incline to play or to amuse itself in any way; does not laugh.
Depressed or irritable mood.
Sad mood for hours; must cry vehemently.
Low spirited, even to thoughts of suicide.
Great anxiety in the evening.
Melancholy humor, cries bitterly; unreasonably anxious.
Impelled by unaccountable attacks of internal anguish, which sometimes come on quite suddenly, to attempt suicide.
Violent fright on slumbering.
The slightest cause irritates him and makes him extremely vehement.
Violent, passionate fretfulness; she spoke with such volubility that one could not always get a chance to reason with her, and she would not listen to the most just remarks. θAffection of mind.
Hypochondriasis.
Temper obstinate and cross, a ferocious spleen which would lead to cold blooded murder even among those habitually gay and benevolent.
Wrathful irritability, even to most extreme violence, threatening to end in murder and arson.
Extreme discontent, indisposition to everything.
Peevish; angry at least trifle.

Sensorium. Vertigo: mornings; when closing eyes, at siesta; evening, with nausea; when riding in a carriage; during dinner, after belching, with blackness before eyes, when shaking head.
Short attacks of stupidity, vertigo, dulness of mind and want of memory.
Forepart of head feels stupefied and heavy.
Fainty giddiness when riding in a carriage or when shaking head, with headache and obscuration of sight.

Digitized by Google

‖‖Fainting from slightest pains; evenings.

[5] **Inner Head.** ‖Aching in forehead: as if bruised; like a boil; from midnight till morning.

‖‖Burrowing headache in frontal region as if an abscess were forming.

‖‖Violent headache, at night, as if forehead would be torn out, with general heat, without thirst.

‖Headache with a feeling as if eyes would be drawn back into head.

‖Tensive, aching pain above nose.

‖Headache over eyes pressing down upon eyes.

‖‖Pressure and drawing in temples by day.

‖Painful throbbing in r. temple.

‖Aching in vertex, with palpitation of heart, in evening.

‖Stitches in head, when stooping; sensation as if skull would burst, waking him at night.

‖Sticking headache.

‖Hammering sensation in head.

‖Burrowing, sharp headache, neuralgic in character.

‖Boring headache: at root of nose, every morning; in r. temple, from without inwards; < from motion or stooping.

‖Pressure in head, semi-lateral, as from a plug or dull nail, at night, and when waking in morning; < when moving eyes and on stooping; > when rising and from binding head up tight.

‖‖Constant pressive pain in one-half of brain, as from a plug or nail.

‖Wabbling as of water in brain.

‖Sense of swashing in head.

‖Headache when shaking head.

‖Headache > by tying something tightly around head.

‖Dull headache every morning in bed, > after rising.

‖Morning headache, < from every concussion.

‖Lancinating headache, > when walking in open air.

‖‖Headache from abuse of mercury.

‖Traumatic cerebritis, in infants and children, with spasms.

‖‖Pulse-like stitches in lower portion of occiput.

‖Pressive pain externally right of occiput, gradually extending to nape, throat and shoulder blades.

‖Severe stitches in occiput and both temples, as if a plug or nail were being driven in.

[6] **Outer Head.** ‖Head bent backward, with swelling below larynx; violent pulsation of carotids, rattling breathing.

‖Sensitiveness of scalp to touch, with burning and itching in morning after rising (after abuse of mercury).

‖Extreme sensitiveness of scalp, could hardly bear to comb her hair or have anything touch the head.

Digitized by Google

‖‖Disposed to take cold from uncovering head.
‖Burning itching on scalp, from forehead to occiput.
‖Nightly pain in skull bones.
‖Nodosities on head, sore to touch, > by covering head warmly and from sweat.
‖Painful tumors on head; sebaceous tumors inflamed and ready to discharge.
‖Boils on head and neck, very sore on contact.
‖Falling off of hair, with very sore, painful pimples, and large bald spots on scalp.
‖Loss of hair following mercurialization or chronic headache.
‖Cold, clammy perspiration, smelling sour, principally on head and face, with aversion to being uncovered; < from least exercise and during night; > from warmth and when at rest.
‖Fissured eruption behind and on both ears, exuding a thick, gluey secretion, which mats hair; resents with force an attempt to place finger on head; utter abhorrence to be bathed, during which she would scream and fight.
‖‖Humid eruptions: feel sore; of fetid odor; itching violently on rising in morning; burning and feeling sore on scratching; scabs easily torn off, leaving a raw, bleeding surface.
‖Favus, extending to nape of neck or face.

Sight and Eyes. ‖Photophobia.
‖Objects appear to be red.
‖Feeling of blindness before eyes on rising and standing up after sitting bent over.
‖Sight becomes dim when reading.
‖Eyes become dim, cannot see well in evening by candle light.
‖Anæsthesia of retina, the result of looking at an eclipse; sees a light spot in centre of field of vision, surrounded by a dark ring, and again by a lighter ring, all of which were constantly turning and changing into various colors, especially green; < coming into room from bright sunlight; feeling as if eyes were being pulled back into head, with photophobia; vision $\frac{21}{100}$; field of vision very much contracted.
‖Flickering before eyes; pupils dilated and insensible to light; after abuse of mercury.
‖‖Inflammation of ciliary body.
‖Purulent capsulitis after extraction of cataract.
‖Prolapsus iridis.
‖Iritis with hypopyon or associated with small abscesses in iris (suppurative iritis).

Digitized by Google

Anterior chamber about half filled with pus; eye sensitive to light and air, and must be covered; no syphilitic origin. θIritis with hypopyon.

After injury to eye, violent inflammation; sclerotica looks like raw beef; light intolerable; feeling as of sand in eye; in anterior chamber a collection of pus apparently about two lines in diameter; meditates suicide, especially in evening. θHypopyon.

Onyx.

Cornea dim, opaque and bulging, with a blister-like elevation, as large as end of knitting needle, in centre, forming base of an open ulcer; hypopyon; fever with pressing, burning, bruised pain in eyes, extending into head. θHypopyon.

For three months l. cornea so hazy that iris could hardly be seen, and for two months r. cornea had gradually become involved from periphery toward centre; both corneæ opaque and vision lost; considerable pain in eyes and head, with iritis; great ciliary injection and excessive dread of light; lachrymation; no history of syphilis.

Severe inflammation in cornea and iris of l. eye; cornea ulcerated superficially, much ciliary injection, pupil contracted, iris sluggish, great photophobia and lachrymation, much pain extending from eye into corresponding side of head, < at night, especially about 2 or 3 A.M.; seat of pain in head, as well as eye, quite sore to touch; lids considerably swollen and slight discharge. θKerato-iritis.

Kerato-iritis with ulceration of cornea, hypopyon, sensitiveness to air and touch.

Ulcers and abscesses of cornea, especially for deep sloughing form and when hypopyon is present; intense photophobia; profuse lachrymation; great redness of cornea and conjunctiva, even chemosis; pains severe, of a throbbing, aching, stinging character; > from warmth, so that he constantly wishes to keep eye covered; < from any draught of air; at night or in evening lids often swollen, spasmodically closed and very sensitive to touch, or may be red, swollen and bleed easily upon opening.

Sclerotic violet red, cornea dim; great photophobia and lachrymation; lower lids swollen. θUlceration of cornea.

Recurring ulceration of cornea in ophthalmia scrofulosa.

Torpid ulceration of cornea; where there is a want of lachrymal secretion.

Red, vascular, elevated ulcer, like a piece of red flesh, at margin of cornea.

Opacities of cornea.

Digitized by Google

Acute aggravation of pannus, which tends toward ulceration, especially in mercurialized subjects.

Epithelioma of cornea.

Herpes conjunctivæ bulbi; enlarged veins, run nearly horizontally towards cornea, and terminating in little blisters near edge of cornea; < from crying.

Eyes very red, great photophobia, lids red and swollen, with burning pain in affected parts. θOphthalmia.

Inflammation of eyes and lids; sore to touch; lachrymation.

Catarrhal inflammation and blenorrhœa of eyes; lids inflamed, excoriated, running, as if corroded, especially at inner canthus; internal surface of lids, especially of lower, of deep red color and inflamed; heat, especially in morning on waking; pain, as of a burn, smarting, itching in lids; lids and angles agglutinated in morning by purulent mucus; conjunctiva red, traversed by large vessels; photophobia; in evening, vision of colored and dim halos around candle, with pressive pain forcing her to shut eyes occasionally.

Inflammation of eye, small ulcer on l. cornea; eyeballs slightly swollen; eyes closed by swelling at night, and discharging much purulent mucus; hair fell off profusely, leaving bald places on scalp; scabs on head, face and neck, painful when touched; itching in scalp; frequent calls to stool, with difficult evacuations; sour smelling sweat at night; peevish, fretful humor.

Violent pain over r. eyebrow; excessive lachrymation of l. eye; photophobia alternating with unusually clear and distinct vision in dark part of room; everything appearing illuminated; at times objects appeared red; l. pupil much dilated, not sensitive even to strong light; r. pupil normal; conjunctiva reddened from canthi, but not on cornea; sensation as if eyes projected; painful pressure in eyeball as if bruised; acute bruised pain on slightest touch. θForeign body in eye.

Purulent conjunctivitis with profuse discharge and excessive sensitiveness to air and touch.

Catarrhal conjunctivitis after inflammatory stage has passed.

Scrofulous inflammation of eyes, especially in phlegmatic, fat, large bellied children, with fine white skin, light hair, thick neck and swollen glands, subject to eruptions and ulcerations of skin.

Chronic inflammation of eyes, with great photophobia, lachrymation and mucous discharge; formation of ulcers with pressing, burning pains as if eyes were bruised.

Symptomatic forms of chronic catarrh of conjunctiva with

Digitized by Google

infarction of Meibomian glands and purulent secretion, in scrofulous subjects.

‖Stitches in the eyes.

‖Pressure in eyes, especially on moving them, with redness.

‖Eyes ache from bright daylight, when moving them.

‖Pain in eye at each step.

‖Eyeballs sore to touch; pain as if they would be drawn back into head.

‖Pressing pain in eyeballs, feel bruised when touched.

‖Pressure in eyes as from sand.

‖Eyes are protruded. θCroup.

‖Dacryo-cystitis and orbital cellulitis, especially if pus has formed and there is great sensitiveness to touch, with throbbing pain; prevents formation of pus or accelerates its discharge.

‖Inflammation of lachrymal sac after pus has formed; blenorrhœa, with great sensitiveness to touch and to cold, with profuse discharge.

‖Lachrymal duct closed by an exudative swelling; constant lachrymation; had existed a long time.

‖Burning pains in bones above orbits.

‖Smarting pain in external canthus, with accumulation of hardened mucus.

‖Cutting pain in outer canthus.

‖Anchylops.

‖Redness, inflammation and swelling of upper lid, with pain more pressing than sticking.

‖Redness, inflammation and swelling of upper lid, with pressive pain.

‖Lids closed in morning on waking, cannot open them for a long time.

‖Blepharophthalmia when Meibomian glands are involved, and when little pimples surround the inflamed eye.

‖After frequent straining of eyes, inflammation of glands of both eyelids; lids swollen, palpebral conjunctiva inflamed, erysipelatous; at outer canthi lids as if corroded and ulcerated; secretion of glands increased; eyes agglutinated in morning; every effort and light cause pain.

‖Upper lid margins unevenly rounded, swollen and red; tough mucus in lashes and canthi; scleral conjunctiva injected with red vessels running towards cornea, where they form little vesicles with turbid secretion; lachrymation; pain in evening, agglutination in morning; r. eye worse; small pimples or little furuncles on face, or elsewhere, in complication with tinea.

‖Acute phlegmonous inflammation of lids, which tends toward suppuration; lids swollen, tense and shining, as

Digitized by Google

if erysipelas had invaded them, with throbbing, aching, stinging pain and sensitiveness to touch; pains < cold, > warmth.

‖Blepharitis; after the first stage, when suppuration threatens; lids inflamed, throbbing, aching, stinging, very sensitive to touch; ameliorated by heat.

‖Chronic ciliary blepharitis complicated with swelling of Meibomian glands, or ulcers and swellings on margin of lid, which are painful in evening and upon touch.

‖Palpebral tumors.

‖Spasmodically closed eyelids (at night).

‖Eczema palpebrarum, where scabs are thick and honeycombed.

‖Little pimples surround inflamed eyes.

6 **Hearing and Ears.** ‖Whizzing and throbbing in ears, with hardness of hearing.

‖Cracking in ear when blowing nose.

‖Darting pain in ears.

‖Increase of earwax.

‖Discharge of fetid pus from ears.

‖Canal filled with white, cheesy, bloody pus, and surrounding skin scurfy and irritated; little pustules in meatus and auricle, wherever pus touched; hemorrhage from slightest touch; > from hot applications, cannot bear anything cold.

‖Itching of ears, green discharge; liquid wax.

‖Itching in ears.

7 **Smell and Nose.** ‖Hyperæsthesia of smell.

‖Sense of smell acute, also with vertigo.

‖Loss of smell.

‖Nosebleed (after singing).

‖On blowing nose unpleasant sensation in l. side of nose with whizzing and snapping in ear.

‖Blowing nose causes a raw feeling in side of nose.

‖The nose feels sore as if bruised.

‖Contractive sensation in nose.

‖Itching in nose, causing sneezing.

‖Nose stopped up in morning.

‖Febrile fluent coryza if it gets dry, especially with scrofulous and rachitic children; hoarseness, or hollow, croupy cough.

‖Heat and burning in nose; ulcerative pain in nostrils; drawing pain in nose passing into eyes, becoming a smarting there; pain lasts far into night; annoying occlusion of nostrils; crusts and scabs; interior of nose painful and sensitive to air and touch.

‖Fluent coryza, with continual necessity to blow nose, which yields a thin, badly smelling slime; sometimes yellowish, sticky matter drops out of one nostril.

Digitized by Google

‖‖Coryza, with inflammatory swelling of nose, painful like from a boil; also with cough.
‖Blowing of offensive mucus from nose.
‖Mucus from posterior nares mixed with blood.
‖Nasal discharge thick and purulent, sometimes tinged with blood.
‖Offensive smelling discharge from nose, which is swollen and red; scabs in nose; loss of smell; eyes inflamed, lids red, excoriated and burning, as if raw; photophobia.
‖Violent pain in bony part of nose with thick mucopurulent discharge from one nostril; > in dry weather; < on approach of rain, or in changeable weather; after abuse of mercury.
‖Four years ago discharge of bone as large as pea from l. nostril, preceded by severe neuralgic pains in region of l. orbit, followed by discharge of mucus, which, after a few months became very profuse and purulent; dizziness and headache.
‖Scurfy formation in r. half of nose, extending down upon lip with a deep fissure, very sore and sensitive to touch.
‖Scrofulous inflammation of nose with loss of sense of smell.
‖Scrofulous coryza with formation of crusts and painful inflammation of alæ nasi.
‖‖Ozæna scrofulosa.
‖Bones of nose painful to touch.
‖Sore pain on dorsum of nose, when touching it.
‖Inflammation (redness and heat) of nose.

[8] **Upper Face.** ‖Yellow color of face, with blue rings around eyes.
‖Yellowness of face and skin.
‖Heat and fiery redness of face.
‖‖Heat of face, night and morning, on waking at 7 P.M.
‖‖Erysipelatous color of face.
‖Chronic neuralgia of face, extending in streaks into temple, ear, alæ nasi and upper lip; particularly if < in open air, and > wrapping up warmly.
‖Spasmus facialis, especially if caused by diseased bones or teeth.
‖Hard swollen cheek, and upon it an outgrowth size of walnut, as hard as cheek.
‖Pains in malar bones, < from touch, extending to ears and temples, < in fresh air, and > by wrapping up face; at same time coryza, hoarseness, much sweating and rheumatic pains
‖Bones of face painful to touch.
‖Erysipelatous swelling of cheeks in morning.
‖Nettlerash eruption on face.

Digitized by Google

‖Humid herpes, especially on face.
‖Eruptions scurfy and very painful to touch.
‖Crusty pimples on face of young people.
‖Boils very painful to touch.
‖Lupoid ulceration of face, intolerance of touch, every breath of air caused pain.

[9] **Lower Face.** ‖‖Great swelling of upper lip, painful to touch, but otherwise only tense.
‖Sore smarting pimple on vermilion border of upper lip.
‖Middle of lower lip cracked.
‖Eruption, with sensation of heat in corners of mouth.
‖Ulcer at corner of mouth.
‖Hydroa around mouth. θTertian ague.
‖Itching around mouth.
‖Red, itching spot beneath lower lip, soon becoming covered with many yellow blisters, which change to a scurf.
‖Boils on lips and chin, very painful to touch.
‖‖White blisters on lips, chin and neck.
‖Itching pimples on chin.
‖Acute inflammation of r. parotid gland; threatened suppuration; a few pimples appeared on face
‖High fever, eyes inflamed and half open; involuntary discharges from bowels and bladder; great restlessness. θParotitis after scarlet fever.
‖Fungous growth on inferior maxillary, with necrosis.

[10] **Teeth and Gums.** ‖Throbbing pain as if blood were entering tooth, or a drawing pain; pains < after eating and in a warm room, or at night.
‖Toothache in all teeth, immediately after drinking cold things, or opening mouth.
‖Toothache, < in warm room, and when biting teeth together.
‖Hollow teeth feel too long and painful.
‖Loose molar teeth; mouth sore; breath offensive; small aphthæ on gums and roof of mouth.
‖Looseness of teeth; gums tender.
‖‖Gums and mouth very painful to touch, bleed easily.
‖Gums ulcerated, tender and painful.
‖‖Mercurio-syphilitic diseases of gums.

[11] **Taste and Tongue.** Taste: putrid; sour; metallic; bitter; of rotten eggs in morning.
‖Bitterness in back of throat, with natural taste of food.
‖Coating on back of tongue resembling dry clay.
‖Tip of tongue very painful, and feels sore.
‖‖Hasty speech.

[12] **Inner Mouth.** ‖Offensive odor from mouth, as from disordered stomach, which he himself notices.
‖White aphthous pustules on inside of lips and cheeks and on tongue.

Digitized by Google

‖Thrush < on inside of lower lip.
‖Ulcers on gums and in mouth, base resembling lard.

[13] **Throat.** ‖Elongated flabby uvula, with tickling sensation in back of throat and enlargement and inflammation of mucous follicles.
‖Roughness of fauces.
‖Swollen tonsils and hard glandular swellings on neck, with sticking, when swallowing, coughing, breathing, or turning neck.
‖Sore throat; tonsils so much swollen as to leave no opening visible; pulse high, about 100; intense pain, could neither speak, move nor swallow; extreme uneasiness. θQuinsy.
‖Tonsils enlarged, red; throat and pharynx raw, and studded over with enlarged reddish follicles; could not venture out in slightest damp without being in fear of inflammation of throat, which at last produced a nervous sort of terror of being choked; incapacitated from work, as the damp from the clay affects him with hoarseness and irritability of chest.
‖Tonsillitis recurring regularly every two or three years; difficult deglutition; severe pain; r. tonsil particularly red and swollen; twenty days after beginning of attack pus is discharged.
‖‖Chronic tonsillitis, especially when accompanied by hardness of hearing.
‖Dryness of throat.
‖Scraping in throat when swallowing saliva.
‖Scraping sore throat, impeding speech but not swallowing.
‖Smarting, rawness and scraping in throat, < swallowing solid food.
‖Violent pressure in throat, believes that it is quite constricted and that she must suffocate.
‖Pain in throat, on swallowing, as from an intense swelling; sensation as if he had to swallow over a swelling.
‖A feeling in throat as of a plug of mucus or an internal swelling at entrance of throat.
‖Sticking in throat, extending to ear on turning head.
‖‖Sticking in throat as from a splinter, on swallowing, extending towards ear on yawning.
‖Stitches in throat, extending to ear, < when swallowing food.
‖Sore ulcerative pain in throat as of a splinter, very severe from afternoon to midnight, preventing sleep.
‖‖Sensation as if a fish bone or splinter were sticking in throat.
‖Hawking up of mucus.
‖After violent inflammation of throat when there still re-

Digitized by Google

mains some redness, dryness and swelling of mucous membranes.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Unusual hunger in forenoon.
‖Excessive thirst from morning till evening.
|Craving for condiments, sour, highly flavored, pungent articles.
‖Great desire for vinegar.
|Longing: for acids; wine; sour and strong tasting things.
|Appetite for something at times, and when he gets it he does not like it.
|Aversion to fat.

[15] **Eating and Drinking.** ‖Strong and comfortable feeling after a meal.
‖Child seems to be better after eating.
|Heaviness and pressure in stomach after moderate eating.
‖Hasty speech and hasty drinking.
Better from tobacco.

[16] **Hiccough, Belching, Nausea and Vomiting.** |Constant sensation of water rising in œsophagus, as if she had eaten sour things
‖Eructations frequent, odorless and tasteless.
|Fetid eructations, with sensation of burning in throat.
|Eructations after eating.
|Hot, sour regurgitation of food.
|Heartburn.
|Inclination to vomit, with flow of saliva from mouth.
‖Frequent but momentary attacks of nausea.
|Attacks of nausea, with coldness and paleness.
|Vomiting of green, acrid water.
|Sour vomiting.
Vomiting of bile, in morning, after long, violent retching.
‖Vomiting every morning.

[17] **Scrobiculum and Stomach.** ‖A feeling of hard body in epigastrium, immediately followed by hæmoptysis.
|Tension across pit of stomach; is obliged to loosen his clothes, and then cannot tolerate sitting.
|Empty sinking feeling of stomach, > by eating.
‖Pressure in stomach after moderate eating, as if lead were in it.
|Pressure and pain in stomach, > by eating, eructation, and by passing flatus.
|Frequent desire to loosen clothing about stomach after a meal.
|Dull aching pain in stomach after moderate eating.
|Stomach painful when walking, as if it hung loose.
‖Drawing pain from region of stomach to back.
|Burning in stomach.

Digitized by Google

Gnawing in stomach, as from acids, which also rise up into throat.
Acrid feeling in stomach during digestion.
Distension of pit of stomach, has to loosen clothing.
Swelling and pressure in region of stomach.
Stomach frequently and easily disordered.
Stomach inclined to be out of order; longing for sour or strong tasting things.
Indigestion with burning pain in stomach and up œsophagus, palpitation of heart when pain is severe.
Indigestion characterized by eructation of quantities of wine, especially in nervous persons, with craving for condiments.
Dyspepsia of herpetic and hemorrhoidal subjects, with flatulency and even tympanitis.

[18] **Hypochondria.** Sticking in hepatic region when walking.
Stitches: in region of liver; in region of spleen, when walking.
Hepatitis with jaundice, stools white or greenish.
Frequent bilious attacks especially in Spring and Autumn; engorgement of liver with jaundice; lassitude, inability for work, want of appetite and obstinate constipation; everything, even cold water, has a bitter taste; skin and sclerotic yellow; urine dark; stools whitish; overfatigue or chill in damp weather brings on attacks of white, frothy diarrhœa; exposure to rays of July sun followed by intense colic which was > by copious and perfectly white stools; paroxysms of ungovernable irritability; enlargement of l. lobe of liver; in Autumn attacks are accompanied by great sexual weakness; is extremely sensitive in change of weather to rain; predicts the approach of rain; very sensitive to damp winds.
Liver enlarged, extending two or three inches beyond ribs; every kind of food disagrees; chronic constipation; skin dirty yellow, like the hue of malignant disease; uterus enlarged and anteverted with congestion of ovaries; coitus intolerable; ovum could not be retained. θ After abuse of mercury.
Hepatogenous jaundice, mercurial history.
Chronic engorgement of liver.
Hepatic abscesses.
During inflammatory process in cirrhosis of liver.

[19] **Abdomen.** Abdomen distended, tense.
Abdomen swollen and somewhat tender.
Rumbling in abdomen.
Fermentation above navel, with eructation of hot air.
Sensation of soreness, as if bruised, in abdomen, morning.
Contractive pain in abdomen.

Digitized by Google

‖Spasmodic contraction in abdomen.
‖Cutting pains in abdomen.
‖Clawing in umbilical region, extending from both sides of abdomen towards middle, and sometimes up to pit of stomach, causing nausea, with anxious heat of cheeks, by paroxysms; almost like the effects of taking cold, or the preliminaries of menstruation.
‖Colic, with dry, rough cough.
‖Deep, circumscribed swelling in ileo-cæcal region; lies on back, with r. knee drawn up.
‖Decreased peristaltic motion.
‖Mesenteric tubercles.
‖Chronic abdominal affections.
‖‖Swelling and suppuration of inguinal glands.

Stool and Rectum. ‖Stools: white and fetid, child has a sour smell; sour smelling and whitish; clay colored; green, slimy, of sour smell; light yellow fecal; greenish; black; thin or papescent; watery; undigested; painless.
Diarrhœa: < during day; after eating, and after drinking cold water; with colic; with every cutting of teeth; in morning; colliquative.
‖Cholera infantum from irritation of teeth, chiefly with morning aggravation.
‖Dysenteric stools; difficult evacuation of soft stool or of bloody mucus with tenesmus.
‖Chronic diarrhœa: after abuse of mercury or quinine; after suppression of scabies.
‖‖Stools soft, yet passed with great exertion.
‖Difficult expulsion of a small quantity of soft excrement with great efforts and tenesmus.
‖Sluggishness and inactivity of bowels, in consequence of which abdominal muscles must bear down in order to effect an evacuation.
‖Constipation: stools hard and dry; with eruption in bend of elbows, or in popliteal space, from congestion and inaction of rectum.
Before stool: pinching in abdomen.
During stool: abdominal pain, straining, pressing, rumbling and nauseous feeling in abdomen; succus prostaticus; heat in hands and cheeks; inclination to lie down.
After stool: sore pain in anus and sanious secretion; soreness of rectum with ichor; tympanitis; obstruction of nose.
‖Burning in rectum, swelling of anus.
‖Creeping in rectum.
‖Promotes speedy suppuration in periproctitis, the swelling being hard and inflamed.
‖Prolapsus of rectum, which protruded at every stool about

Digitized by Google

two inches, with slight oozing of blood; bowel very difficult to return; engorgement of veins but no distinct piles; mercurial history.

‖Hemorrhoids from engorgement of liver, with great abdominal distress; preventing abdominal respiration.

‖Hemorrhoids with engorged liver from abuse of mercury.

‖Inflammation and suppuration of hemorrhoidal tumors.

‖Hemorrhage from rectum, with soft stool.

‖Sweat on perineum.

[21] **Urinary Organs.** ‖Pain in kidneys with constant urging to urinate, later purulent sediment in urine; emaciated; renal region sensitive to slightest touch; incessant, painful urging to urinate, voiding of few drops of purulent urine; violent fever with unquenchable thirst; colliquative diarrhœa and night sweats. θKidney disease.

‖Croupous nephritis passing into suppurative stage, with fever, chills, alternating with burning heat.

‖Albuminuria accompanying and following diphtheria.

‖Enuresis; hot, acrid discharge; head thrown back during sleep.

‖‖Micturition impeded; is obliged to wait awhile before urine passes, and then it flows slowly.

‖‖Weakness of bladder; urine drops vertically down, is obliged to wait awhile before any passes.

‖Urine passed tardily and without force, feels as if bladder could not be emptied thoroughly.

‖‖Is never able to finish urinating; it seems as though some urine always remains behind in bladder.

‖Painful micturition.

‖Urine: dark red and hot; bloody; sharp, burning, corroding prepuce and pudenda; dark yellow, scalding whilst discharged; brown red, the last drops mixed with blood; blood red; pale, clear, on standing, turbid and thick, and deposits a white sediment; pale, with flocculent, muddy sediment; milky, turbid, even while passing, with a white sediment.

‖Greasy pellicle on urine, or glistening with various colors.

During urination: sensation in r. shoulder-blade as if something were running or creeping.

‖‖Burning and soreness in urethra.

Stitches in urethra.

‖Inflammation and redness of orifice of urethra.

‖Discharge of mucus from urethra.

‖Wetting the bed at night.

[22] **Male Sexual Organs.** ‖Sexual desire increased, but erections feeble.

‖‖Diminished sexual instinct; feeble erections.

‖Nocturnal emissions; sudden appearance of furuncles;

Digitized by Google

attacks of blindness during day; waterbrash, with brown coated tongue.
‖Discharge of prostatic fluid, also after micturition and during hard stool.
‖Prostatitis.
‖Discharge of mucus from urethra.
‖Ulcer similar to a chancre, externally on prepuce.
‖Chancres not painful but disposed to bleed readily.
‖Easily bleeding chancres with lardaceous edges and fetid discharge.
‖Chancres secreting watery pus with diffuse borders and red bottoms, elevated above surface.
‖Mercurialized chancres.
‖Itching on penis and at frænum preputii.
‖Phimosis with discharge of pus, accompanied by throbbing.
‖Figwarts, smelling like old cheese or herring brine.
‖Herpes præputialis; small vesicles in groups, whitish, with red bases, and intolerable itching of parts; eruption exceedingly sensitive to touch.
‖Long standing hydrocele; large swelling of scrotum, containing dark, thick fluid; throbbing in scrotum.
‖Large bubo, stony hard, in r. groin. θSyphilis.
‖Bubo in l. groin as large as a hen's egg, stony hard.
‖‖Buboes after mercurial treatment.
‖Scrofulous buboes.
‖‖Humid soreness on genitals, scrotum, and folds between scrotum and thigh.
‖Secondary syphilis.

♂ **Female Sexual Organs.** ‖Uterus enlarged and anteverted, with congestion of ovaries; coitus intolerable; frequent abortions.
‖Uterine ulcers, with bloody suppuration, smelling like old cheese; edges of ulcer sensitive, frequently a pulsative sensation in ulcers.
‖Metritis, with burning, throbbing pains.
‖Congestion of blood to uterus.
‖Hemorrhage from uterus.
‖Menorrhagia, in women with chapped skin and rhagades of hands and feet.
‖Menses delayed and too scanty.
Before menses: constricting headache.
During menses: itching of vulva.
‖‖Discharge of blood between menses.
‖Discharge of white, yellowish, or discolored pus, attended with fetid smell, particularly when occasioned by scrofulous leucorrhœa, or after repeated attacks.
‖Leucorrhœa, with smarting of vulva.

Digitized by Google

‖Pruritus pudendi during menses.
‖Mastitis in hysterical and nervous patients; pain as if in bones of arms and thighs; suppuration preceded by frequent crawls in affected part, which remains hard, with scanty discharge.
‖Scirrhous ulcer on mamma, with stinging burning of edges, smelling like old cheese.
‖Much itching, or little pimples around ulcer on mammæ.
‖Itching nipples.

[24] **Pregnancy. Parturition. Lactation.** ‖Frequent momentary attacks of nausea.
‖Mammæ swollen, not sensitive to touch, but she cannot walk up or down stairs.
‖Cancer of breast, with stinging burning of edges; smells like old cheese.
‖Little pimples, or smooth ulcers, surround scirrhous, or principal ulceration.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Weakness of organs of speech and of chest, she cannot speak aloud.
‖Hoarseness, roughness in throat.
‖Obstinate hoarseness; scraping in throat causing rough, barking cough; voice toneless, weak; scarcely audible in evening; pale swelling of tonsils and uvula; lassitude in limbs.
‖Hoarseness, grating, irritation in larynx or lower part of fauces; mucous râles.
‖Sensation of down in larynx.
‖Scraping in larynx.
‖Pressure beneath larynx, immediately after supper, as if something were sticking in throat.
‖Pain in one spot of larynx, < by pressure, speech, cough and breathing.
‖Sensitiveness of larynx to cold air.
‖Wheezing in larynx, and painfulness of a small spot in larynx.
‖Sudden attacks of suffocation; child looks anxiously about and attempts to cry without being able to do so; loud, whistling inspiration; face dark red; lips bluish; bends head back and gasps for breath; after attacks have lasted ten minutes, they end with a whistling, crowing sound, and are followed by hoarseness.
‖Spasmodic croup; violent fever, face indicating great anguish; weeping; restless; cough hoarse and rough without sputa.
‖Lies with head thrown back, buried in pillow, face swollen, neck stretched; mucous and sibilant râles; clucking noise in glottis; respiration noisy; cough loud and

Digitized by Google

harsh, with distinct croupy tone; exhaustion; pulse 140, hard and full. θCroup.

Assumes a sitting posture, on account of anxiety which sets in when lying down; somnolence, with restless tossing about; respiration snoring, hoarse, whistling, and often so short and oppressed that he starts from sleep with violent, dry, hoarse cough, which causes retching; grasps at larynx, in the greatest fear; begins to cry; red face, protruding eyes, and frequent throwing back of head; after several minutes the paroxysms again return; frequent drinking; great heat; sweat; pulse quick and hard; hasty speech; frequent passages of dark urine. θCroup.

Respiration somewhat whistling; on every inspiration great retraction of diaphragm, abdominal muscles and ribs, so that a large concavity is formed; hoarse cough, occasionally croupy in tone; voice hoarse, at times entirely lost; clammy sweat on head, rest of body dry and hot; color of face changing constantly; pulse hard, cannot be counted; tossing about, or sits up hastily. θCroup.

Croup with great dryness of larynx and respiratory passages, whistling respiration, dry cough with ineffectual retching, nothing but a slight quantity of frothy saliva being discharged; cough ending with a short sneeze.

Lies upon his mother's arm with head thrown back, mouth open, bluish redness of face, protruding eyes; body bathed in sweat; fearful anxiety and dyspnœa; cannot speak. θCroup.

Frequently recurring paroxysms of violent croupy cough with great dyspnœa, grasps at larynx; great thirst; pulse 120; respiration anxious and noisy. θCroup.

Croup after exposure to dry, cold wind, with swelling below larynx; great sensitiveness to cold air; red face, high fever, hoarseness and rattling of moist mucus, which child is unable to get rid of, but still little or no difficulty in breathing; after midnight or towards morning; sensation as if there was a fishbone in throat, or of internal swelling, when swallowing.

Croup: with deep, rough, barking cough, hoarseness or loss of voice with slight suffocating spasms, some rattling of mucus; with swelling below larynx; with great sensitiveness to cold air or water; cough < before midnight, or toward morning.

Croupy cough, with continual hoarseness.

Catarrhal croup with or without fever.

Croup, when panaritiæ, anginæ, urticaria or erysipelas prevail.

Digitized by Google

Light attacks of croup in teething children.

Violent attacks of croup from time to time, as if suffocation or vomiting would ensue.

After influenza violent attack of croup; restless; tossing back of head; anxious, sawing, metallic cough.

Violent respiratory efforts, during which chest scarcely moves; anxious throwing back of head; convulsive twitchings; irritation of gums and Schneiderian membrane; vomiting of mucus, mixed with portions of membrane. θCroup.

Much green mucus in larynx.

Severe laryngeal catarrh, with roughness and pain in upper part of throat; sensation as of a clot of mucus or internal swelling when swallowing; stitches and pain extending from ear to ear.

Laryngeal catarrh, grafted on an organism of tubercular disposition; scanty, tenacious, muco-purulent secretion, with difficulty of expectoration; hoarseness remains some time.

Acute catarrh of larynx and bronchi with tickling and roughness in larynx, and hoarseness or aphonia; also acute catarrh of lungs with scratching, tickling sensation in air tubes, pressure and heaviness under sternum, and frequent, dry, tearing cough; rough, whistling, respiratory sounds, indicating a dry condition of mucous membranes; such inflammations are usually of long duration; constant oppression of chest and irritation to cough, which become < by long continued and fatiguing coughing, finally gasping for breath, and expectorating very little sputa; < sitting and bending over, must lean back or get up and walk about; < breathing cool air.

After catching cold, cough next day, tickling and dryness in air passages, followed by hoarseness and finally aphonia; redness and swelling of posterior wall of pharynx; rough, whistling sound in trachea, extending to large bronchi; larynx and trachea sensitive to touch; on forced inspiration stitching in larynx and cough.

Chronic tracheitis (the beginning of tracheal or laryngotracheal phthisis); voice hoarse, and if exerted for any length of time accompanied by stitching pain in larynx; in morning on rising, severe cough with stitching pain in larynx and scanty expectoration of mucus; when walking, particularly against wind, and when eating warm food, stitching and burning in throat; no fever.

Tracheal and bronchial inflammation in children, with continual fever and headache, difficult, short, anxious breathing, hoarse voice, violent, dry, painful, alternating rough and hollow sounding cough, < by eating and drinking anything cold, by cold air, talking or crying.

Digitized by Google

26 **Respiration.** ‖Breathing: rattling; anxious, wheezing; frequent deep breaths, like after running; anxious, short, wheezing, threatening to suffocate; must bend head back and sit up.

Involuntary deep inspirations.

‖Attacks of asthma, awaking patient from sleep, face becomes blue, saliva increased; sensation as of dust in lungs; smoking and throwing head back >; after attack, expectoration frothy.

‖Difficult respiration, preventing sleep at night; whistling, wheezing, with copious mucous expectoration; just as he has fallen asleep is aroused and startled by threatened suffocation; must get up to relieve dyspnœa; > during day. θAsthma after suppressed eruption of skin.

‖Suffocative attacks, compelling him to raise himself up and bend the head backwards.

‖Dyspnœa.

27 **Cough.** ‖Spasmodic cough in paroxysms, with titillation in larynx and efforts of vomiting.

‖Violent, deep cough, consisting of several impulses which strike painfully against larynx and occasion retching.

‖Almost uninterrupted cough, from tickling in upper part of l. side of throat, < talking and stooping, constantly getting < till late in evening, and then suddenly ceasing.

‖Titillation, as from dust in throat, inducing cough, which is deep, wheezing; expectoration only in morning of mucus, bloody or like pus, generally tasting sour or sweet.

‖Chronic laryngeal cough, very distressing, especially at night, compelling her to spring up in bed, from a feeling of choking or suffocation.

‖Deep, dry cough, with obstructed breathing on inspiring, and pain in top of chest at every cough.

‖Dry cough, < taking deep inspiration, or speaking any length of time; roughness in throat; pressure under sternum; difficult respiration; pressive headache.

‖Suffocative cough, simply caused by tightness of breath.

‖Subdued cough from oppression of chest.

‖Dry cough with tightness of chest and sore throat.

‖Deep, dull, whistling cough, in evening without, in morning with expectoration of masses of mucus, purulent and bloody, sour, or of a sweet taste and offensive odor.

‖Deep, dry, wheezing, hoarse cough; bloody, pus-like, mucous expectoration; rheumatic pains in limbs and joints; pulse hard, full, acelerated, and at times intermitting; symptoms < at night and from cold air; > by wrapping up and keeping warm. θChest troubles succeeding repelled itch.

Digitized by Google

Cough so aggravated by deep breathing that it caused vomiting.

Troublesome hacking cough as soon as he was about to fall asleep, continuing all night, coughs even on shutting eyes; > during sleep; < 1 P.M. to 1 A.M. θTyphoid.

Dry, nervous cough all night.

Paroxysms of cough, as from taking cold, with excessive sensitiveness of nervous system, as soon as slightest portion of body becomes cold.

Coughs when any part of body is uncovered.

Cough < from exposure to chilly night air, and from drinking cold water.

Paroxysms of dry cough, in evening.

Hacking cough, immediately after eating.

The child cries when coughing.

Cough with expectoration during day, no expectoration at night.

Croup or cough from exposure to dry West wind.

Croupy cough, with rattling in chest, but without expectoration.

Rattling, choking, moist cough, depending on an organic or catarrhal basis; < towards morning and after eating.

Cough: croupish, hoarse; scraping, rough; suffocative; loose and choking; with bloody expectoration; whooping, croupish sound, pain in larynx, choking from mucus in larynx, < in morning; spasmodic; deep, wheezing; deep and dry; deep, dull, whistling; hacking; dry, nervous; barking, after measles.

Cough caused by: limb getting cold; eating or drinking; anything cold; cold air; lying in bed; talking; crying; drinking.

During cough: stitches, burning and swelling in throat; burning in chest and stomach; catching of breath; nausea, retching, vomiting; reverberation in head, throbbing in forehead and temples; dulness; sneezing; chills; anxiety and bending backwards of body in lying.

After cough: sneezing; crying.

Cough < from evening till midnight.

Abundant expectoration of tenacious mucus with relief to the rattling breathing.

Dirty yellowish, purulent, badly smelling expectoration.

[28] **Inner Chest and Lungs.** Sensation as if hot water were floating in chest; as of drops of hot water in l. chest.

Soreness in chest.

Shattering shocks and soreness in chest.

Weakness of chest; cannot talk, from weakness.

Spasmodic constriction of chest, after talking.

Digitized by Google

Stitching pain in r. side of chest, in direction of back.

Tenacious mucus in chest.

Constant rattling of mucus in chest of infants, threatening suffocation at times.

Extreme emaciation, skin cadaverous and dry, countenance of yellowish hue, eyes deeply sunken in sockets, dull and feverish; tongue dry and yellow in middle; thirst, disgust for food, distended epigastrium; hard stool; urine scanty, brownish red; night sweats; alternations of rigor and heat; pulse small, 136; sleeplessness on account of stitches in anterior, inferior and posterior part of chest to shoulder-blade; cough, internal uneasiness, fearful disposition; delirium of frightened character; great inclination to cry; lies immovable on r. side, with knees drawn up to chest; on r. hip-joint commencing bedsore; great fear of being touched, as every movement causes pain in chest, cough and dyspnœa; r. side of chest, arched like a barrel from axilla downwards; intercostal spaces prominent, motionless during respiration; dull sound to percussion; entire absence of respiratory sounds and vocal fremitus; dull sound on percussion over large surface at base of heart; heart's sounds and impulse diminished. θPleuritis with plastic exudation.

Pleurisy, croupous exudation, with a yellow or yellowish-brown tint in face, in scrofulous and lymphatic persons.

Pleurisy with fibrinous exudation.

Diaphragmitis (after *Bryon.*), in fibrinosis; promotes resorption.

Bronchitis.

On r. side of chest in nipple line, in fifth intercostal space, dull percussion sound and weak respiratory murmur; after coughing and profuse expectoration, there was on that place tympanitic percussion sound and bronchial breathing; other portions of chest revealed catarrhal symptoms; expectoration of dirty yellowish masses, badly smelling; respiration accelerated; no fever; cough < in morning. θBronchial catarrh.

Bronchitis from repelled eruptions.

Subacute catarrhal processes; characterized by incipient collection of glutinous, sticky mucus in air cells, giving rise to violent and suffocative paroxysms of coughing, often attended by retching preceding its expulsion.

Habitual bronchial catarrhs, with loud rattling of mucus.

Chronic catarrh of scrofulous subjects, especially when morbid process shows a tendency to invade pulmonary vesicles.

Digitized by Google

‖Great emaciation; slight hectic fever; constantly troubled by cough, sometimes spasmodic, with purulent and fetid expectoration, diarrhœa and loss of appetite; r. side of thorax considerably hollowed, with perfectly empty sound on percussion, and intense bronchial respiration and slight râles; l. side abnormally bulging. θPleuro-pneumonia.

‖Pneumonia, mild suppurative stage, extending only over small part of a lung, with lentescent fever.

‖Pneumonia, during stage of resolution.

‖Chronic pneumonia, with profuse purulent expectoration.

‖‖Pulmonary abscess; empyema; pyothorax.

‖Pain in r. occipital protuberance; fluent, acrid, nasal coryza, swelling at root of nose, upper eyelid, upper lip; white ulcers in mouth; uvula elongated, pale; appetite for fat meat and sweet food; thirst for cold water at night; stomach distended after eating; eructations of fluid, then of food; more at night; constipation alternating with diarrhœa; cough constant, moist; moist râles in l. lung; feeble, vesicular respiration; upper part of l. side of thorax dilated backward; curvature of spine between shoulders; agonizing dyspnœa, could not lie in a recumbent position; cough constant from 12 M. till morning; sleeps with head thrown back, restless; the least exposure aggravates all the symptoms. θEmphysema.

‖Bronchiectasia.

‖In tuberculosis when there is oppression of breathing; periodic stitches; cough before midnight and in morning, dry at first but finally accompanied by a serous expectoration containing small flocculi; occasionally patient will spring up and after coughing expectorate a mass as large as a pea which when crushed between fingers emits a carrion-like odor; in affected parts (particularly upper portions of chest) faint respiratory murmur, with percussion dulness.

‖Tubercles of lungs in herpetic patients, especially after suppression of exanthems, in scrofulous and in hemorrhoidal subjects.

» **Heart, Pulse and Circulation.** ‖Palpitation, with fine stitches in heart and l. half of chest.

‖‖Anxious feeling of debility about heart with palpitation. θHypertrophy.

‖Dyspnœa, pain in neck, faintness and inability to recline; dry, nervous cough, commencing towards evening and lasting all night. θAngina pectoris.

‖Sequelæ of angina pectoris; dyspnœa after attack; dry, nervous cough from evening all through night; pain in

neck after attack; faintness and inability to recline after attack.

‖Pulse hard, full, accelerated; at times intermitting.

30 **Outer Chest.** ‖Tettery eruption on chest.

‖Suppurating pimples on sternum.

| |Ulcer on last rib of r. side.

31 **Neck and Back.** ‖Violent pulsation of carotids.

‖Hard, glandular swellings around neck.

‖Carbuncle on back of neck; surrounding tissues highly inflamed and extremely sensitive to touch.

‖Carbuncle on l. side of back, extending from upper border of scapula downward about six inches, surrounded by small pustules; pus offensive and scanty; pain intense, depriving him of sleep; great weakness and prostration.

‖Drawing between scapulæ.

Great weakness in whole of spine.

‖Sensation as if bruised, in small of back and thighs.

| |Sharp pressure and pain, as from bruises; in small of back and lumbar vertebra, especially in region of sacro-iliac symphysis, extending into lower limbs; the pain is felt when sitting, standing or lying, and causes a sort of limping when walking.

‖Stitches and rheumatic pains in back.

‖Blood boils on the back.

| |Red tubercle on r. buttock.

| |Boil on buttock.

= **Upper Limbs.** | |Pain in shoulder as if a weight were resting on it.

‖Suppuration of axillary glands.

‖Offensive sweat in axillæ.

‖Tearing in arms, extending toward the suppuration in breast.

| |Pain as if bruised in os humeri.

‖Encysted tumor or steatoma at point of elbow.

‖Violent itching in bend of elbow.

| |Intensely violent itching in bends of elbows, on hands, wrists and in palms.

‖Carbuncle, size of silver half-dollar, on forearm; very painful, with three spots, like boils, near it.

Swelling of r. hand.

| |Itching, with rough, dry, shrivelled or scaling skin on hands.

| |Itching in palms.

‖Red and hot swelling of joints of hands and fingers.

Swelling of fingers of both hands, with stiffness, while lying.

‖Cold perspiration of hands.

Digitized by Google

Fingers as if dead.
Tingling in tips of fingers.
Corrosive blister on thumb, stinging when pressed.
Thumb livid; violent throbbing, cutting, burning pain; lymphatics inflamed; lump in axilla.
Whitlow in palmar surface of ungual phalanx of r. thumb; skin yellow, matter could be seen and felt under it; throbbing, burning pain; cannot bear weight of poultice; pain kept her awake.
Inside of r. thumb swollen, livid, with beating, cutting, burning pain, so violent that it drove her to madness.
Whitlow on middle finger of r. hand; severe throbbing pain in last joint; hard, red, swollen state of pulp; lymphatics of arm inflamed, lump in axilla; fever and irritation.
Whitlow; violent, throbbing, "gathering pain;" accelerates suppuration.
Whitlows occurring every winter for several years.
Panaritium.
After injury, suppuration of middle joint of r. index finger; whole finger involved in phlegmonous inflammation.
Superficial erysipelatous inflammation around root of nail.
Onychia.

[33] **Lower Limbs.** Left hip pains as if sprained, when walking in open air.
Buttocks and posterior thighs painful when sitting.
Hip disease, suppurative stage, patient wants to be tightly covered.
Caries of hip-joint.
Sensation of soreness in thighs.
Bruised pain in anterior muscles of thighs.
Raised, flat, purplish swelling on l. thigh; it had a doughy feel for a space larger than a silver dollar; small openings; pus ichorous; for a considerable distance around was red, swollen and painful, with two prominent, indurated and painful spots, like boils; pain intense, no sleep for several nights; when this had healed, a second carbuncle, or at least a flat, purplish and painful swelling showed itself, about six inches from first, which *Hepar* healed without suppuration.
Carbuncle of r. thigh, nearly three inches in diameter; had it for a week; exceedingly painful and leg swollen; no evidence of boils or pustules; several openings and centre looking gangrenous.
Knee pains as if bruised.
Swelling of knee.
Severe pains in lower extremities; pain described as a

Digitized by Google

terrible corroding itching "as from salt water;" both legs swollen round ankles, with watery discharge; color of legs either red or bluish.

‖Cramp in calves.

‖Swelling of feet around ankles, with difficult breathing.

‖After catching cold, pains in foot as after taking a misstep; pains occasionally wander up to thigh; no redness nor swelling; depression of mind.

‖Tickling in soles of feet.

‖Cramps: in soles and toes.

‖Pricking in both heels.

‖‖Coldness of feet.

‖Cracked skin of feet.

‖Tingling in toes.

‖Burning, stinging pains in toes.

‖Violent stitch extending into great toe.

[34] **Limbs in General.** ‖Weakness in limbs; they feel bruised.

‖Drawing pains in limbs, especially in morning, when awaking.

‖Mercurial rheumatism, especially in scrofulous subjects; tearing and shooting in limbs and joints, < at night, especially during a chill; excessive nervous excitability, so that all impressions on body or mind cause internal trembling.

‖Rheumatic pains in limbs and stitches in joints.

‖Dry, herpetic eruption in bends of joints, greatly itching.

‖Chapped skin and rhagades of hands and feet.

‖The limb upon which the ulcer has healed cannot bear its own weight by suspension.

‖Continued dull itching of soles of feet and palms of hands.

[35] **Rest. Position. Motion.** Rest: cold perspiration >.

Lies immovably on r. side with knees drawn up to chest.

Side on which he lies becomes painfully sore, must change his position.

Lies with head thrown back to escape suffocation.

Lying in bed: causes cough; pain in back and limbs.

Lies on back with r. knee drawn up.

Inclination to lie down.

Inability to recline; could not lie in recumbent position.

Head thrown back, sitting up >.

Sitting: cannot tolerate it from tension of stomach; acute catarrh of larynx <; pain in back and limbs; buttocks and posterior thighs pain; falls asleep.

Stooping: stitches in head; boring headache <; pressure in head <; cough < from tickling in throat.

Standing up after sitting bent over: feeling of blindness.

Rising: pressure in head >; feeling of blindness; great difficulty from feeling of stiffness of limbs.

Digitized by Google

Moving: pressure in eyes; headache during fever.
Shaking head: headache.
From slightest motion: sweats easily.
Every movement: causes pain in chest.
Walking: stomach painful; stitches in region of liver; > catarrh of larynx; against wind, itching and burning in throat; pain in thigh, back and lower limbs; causes limping; in open air l. hip pains.
Cannot walk up and down stairs.
Exercise: cold perspiration <; attacks of debility <.
Springs up in bed: from cough.
Child throws itself about unconsciously.

[36] **Nerves.** ‖Disinclination for mental or bodily exertion.
‖Oversensitiveness to pain; fainting from slight pains.
Every impression upon body or mind is followed by tremulousness.
Nervous trembling.
‖Excessive nervousness from abuse of mercury.
‖Trembling weakness, after tobacco smoking.
‖Daily attacks of indescribable sudden debility, commencing with a chilly and creeping sensation in r. leg, traveling slowly upward to chest, with profuse perspiration on head; suddenly and soon after a feeling of weakness, as if he was dying, with trembling of limbs so that he is unable to stand or sit; consciousness retained; attack lasts two or three hours, when strength gradually returns, coupled with a dull, pressing headache about vertex, which continues for some hours; < in Summer, after cooling rains, and after bodily exertions and walking; about every four months scabby eruption, moist at base, of yellowish color, on scalp and forehead, as far down as eyes, and sometimes on chest.
‖General exhaustion.
‖Paroxysms of fainting in evening, preceded by vertigo.
‖Coldness of head, chiefly forehead; severe headaches, with sensation of weight at back of eyeballs, and a feeling as though eyes would be drawn back into head; stiffness of nape of neck; on rising from seat great difficulty from a feeling of stiffness of limbs; pain in bottom of back, around waist, also around shoulders and nape of neck; numbness of r. arm and hand; burning sensation from pit of stomach to throat and ears, > by eating; fixed coldness at pit of stomach, felt occasionally when burning sensation was not present; fatigue from least exercise. θSpinal irritation.
‖Cramp in l. hand which becomes spasmodically closed, with formication and creeping up arm, extending to throat, with sensation as if something was sticking there

Digitized by Google

and that he would choke; face bluish red; mouth drawn to l. side; complete consciousness; after half-hour, another, less violent attack, accompanied by tickling in arm and paralysis of l. side; after four weeks a very violent attack occurred followed by complete paralysis of arms and legs, so that he could not move; lameness of tongue, speech unintelligible. θAfter suppressed eruption and abuse of mercury.

Traumatic convulsions, caused by excessive pressure on brain during delivery; trismus of newborn babes.

Paralysis from suppressed eruptions, or after mercurial poisoning.

[37] **Sleep.** So sleepy and fatigued, in evening, that he falls asleep while sitting.

Great, irresistible inclination to sleep in evening; must lie down immediately after supper and sleeps till morning.

Sleepiness during day, < toward evening, with frequent, almost spasmodic yawning.

Restless, soporous slumber, with head bent backwards.

Side on which he lies at night becomes painfully sore; must change his position.

Fright during sleep.

Starts from sleep, feeling as if about to suffocate.

Violent starts, when falling asleep.

Loss of sleep after midnight.

Excess of thoughts prevent sleep, after midnight.

Wakes at night, with erection and desire to urinate.

Dreams: anxious; of fire.

[38] **Time.** Morning: vertigo; on awakening pressure in head as from a nail; burning and itching of scalp; violent itching of humid eruption on head; heat in eyes on awaking; lids and angles agglutinated; lids closed; nose stopped up; heat of face; erysipelatous swelling of cheeks; putrid taste; excessive thirst from morning till evening; vomiting of bile; sensation of soreness in abdomen; chronic tracheitis; expectoration only; rattling, choking moist cough <; croupy cough <; eczema. <.

2 A.M.: chill.

Day: pressing and drawing in temples; diarrhœa; attacks of blindness; dyspnœa >; cough with expectoration; sleepiness; chill; sweats easily; restless; stools <.

From 4 P.M. all night: heat, delirium, thirst.

From 4 to 8 P.M.: febrile chill.

7 P.M.: heat of face.

8 P. M.: violent chill.

Evening: great anxiety; vertigo with nausea; fainting; aching in vertex; meditates suicide; lids swollen; pain

Digitized by Google

in eyes; swellings on lids painful; voice almost inaudible; cough < till late; deep whistling cough; dry cough; cough < till midnight; cough commencing toward evening and lasting all night; irresistible inclination to sleep.

Night: violent headache; sensation as if skull would burst wakes him; pressure in head; cold perspiration <; photophobia and lachrymation <, about 2 or 3 A.M.; lids swollen; vision of colored and dim halos around candle; eyes closed by swelling; sour smelling sweat; spasmodically closed eyelids; pain in nose lasts far into night; heat of face; toothache <; wetting bed; difficult respiration prevents sleep; chronic laryngeal cough; deep wheezing cough <; dry, nervous cough; thirst for cold water; eructations <; wakes with erection and desire to urinate; febrile chill; pain <; dry heat of body; sweat; sleepless; restless; pains in tumors <; burning and throbbing in ulcers.

Midnight: aching in forehead till morning; croup < before; cough constant from 12 M. till morning; loss of sleep after midnight; excess of thought prevents sleep; sweat before midnight.

[39] **Temperature and Weather.** Exquisite sensitiveness to open air.

Better from warmth; desire to be warmly covered, even during hot weather or in a warm place; < from wrapping up warmly.

‖‖Cannot bear to be uncovered; coughs when any part of body is uncovered.

‖‖Ailments from West or Northwest wind (dry, cold wind), or soon after it; improved by warmth.

‖‖Great chilliness in open air.

‖Extremely sensitive to cold air; must be wrapped up to face even in hot weather; cannot bear to be uncovered.

Warmth: cold perspiration >; pains in eyes >; ears >; neuralgia >; pains in malar bones >; toothache <; cough >; chilliness >; nettlerash >.

Covering head warmly: > soreness of head.

Patient with hip disease wants to be warmly covered.

Summer: attacks of debility <.

Dry weather: pain in nose >.

Air: eyes sensitive; eyes < from draught; interior of nose painful and sensitive.

Open air: lancinating headache >; neuralgia of face <; pains in malar bones <; l. hip pains as if bruised when walking; sensitive to; great chilliness in open air.

Least exposure < all symptoms; chill returns.

Dampness: < throat; overfatigue or chill in damp weather brings on attacks of white frothy diarrhœa.

Digitized by Google

On approach of rain: pains in nose <.
Damp winds: sensitive to.
After cooling rains: attacks of debility <.
Changeable weather: pain in nose <.
Cool air: acute catarrh of larynx <; cough <.
Cold: pain in eyes <; great sensitiveness; cough <; any part of body exposed causes cough; skin very sensitive; pains in tumors.
Cold air: deep, wheezing cough <; least draught causes catarrh.
Cold drink: causes toothache; cough <; causes cough.
Dry, cold wind: causes croup.
Exposure to chilly night: cough <.

[40] **Fever.** ‖Sensitiveness to open air, with chilliness and frequent nausea.
|Great chilliness in open air; must get to warm stove; heat feels agreeable but does not relieve.
‖Desire to be covered even in a warm room.
|Internal chill, with weariness and soreness in all the limbs.
|Internal shivering from below upwards.
|Violent shaking chill with chattering of teeth, icy coldness and paleness of face, hands and feet, unconsciousness and coma.
|Violent chill every morning, at 6 or 7 o'clock, without subsequent heat.
|Chill during day, alternating with heat and photophobia.
|Excessive shivering followed by feverishness.
|Chill at 2 A.M., with febrile shivering and hot, dry skin.
|Febrile chill from 4 to 8 P.M., or in night, could not get warm, with aggravation of all complaints; without subsequent heat.
|Pain < during febrile chill at night.
|Nightly chill in bed, with aggravation of all complaints.
‖Nettlerash, with violent itching and stinging, disappears as heat begins.
|Burning, febrile heat, with almost unquenchable thirst, distressing headache and slight delirium, lasting from 4 P.M. all night, without chilliness.
|Violent fever with flushing heat in face and head.
|Dry heat of body at night, with sweaty hands, which cannot tolerate being uncovered.
|Dry burning heat, with redness of face and violent thirst, all night.
|Fever blisters around mouth during pyrexia.
|During heat larynx much affected, hoarse, weak voice.
||Morning fever preceded by bitter taste in mouth, returning twice a day.
||Fever, without chill, 4 P.M., lasting all night.

Digitized by Google

Heat very slight in comparison with chill.
Flushes of heat, with sweat.
Patient sweats easily from least exertion and turns pale, afterwards burning redness of face and heat and dryness of palms of hands.
Sweats easily during day, from every exertion of mind or after slight motion.
Sweats easily, by every, even slight motion.
Frequent breaking out of sweat over body, only momentary and without heat.
Sweat on perineum, groins and inside of thighs.
Cold, clammy, frequently sour, offensive smelling sweat.
Night or morning sweat, with thirst.
Sweats day and night, without relief; or first can't sweat at all, and then sweats profusely.
Profuse, sour smelling sweat at night.
Sweat before midnight.
Itching nettlerash precedes paroxysm; chill of three hours' duration followed by heat; during fever headache when moving; loss of consciousness preceded by vertigo; bitter taste in mouth; white coated tongue; vomiting of food; pain and rumbling in abdomen; then follows sweat which covers whole body; thirst in all stages. θTertian ague.
Paroxysm preceded by an itching urticaria; chill; fever with thirst, diarrhœa, rumbling in abdomen, bilious vomiting, formication in arms and dark urine; by the time fever has passed eruption has disappeared. θQuotidian ague.
One hour before chill, thirst; after chill, fine, stinging nettlerash, with bleeding at nose, bitter taste in mouth, and greenish diarrhœa; chill followed by heat with sweat and discharge of reddish urine; during termination of latter stage eruption disappeared; during apyrexia great debility, yellow color of face. θTertian intermittent.
Chill generally in evening, preceded by bitter taste in mouth; itching, stinging nettlerash before and during chill, when he constantly desires to be covered; sweat and from the least uncovering chill again.
Violent chill, 8 P.M., with chattering of teeth; hands and feet cold; followed by heat with perspiration, especially on chest and forehead, with slight thirst.
After catching cold, heat and sweat, with thirst; pain in l. hypochondrium and arm; sweats again at night. θTertian ague.
Pain in limbs, then sweat with thirst, followed by shaking chill with thirst; after chill belching, bitter taste, yellow tongue. θTertian intermittent fever.

Digitized by Google

‖Chill, then thirst; one hour later, much heat, with interrupted sleep. θIntermittent.

Apyrexia never clear, constitutional symptoms always present.

Type: simple, quotidian; period the same every day.

‖Hectic fever with intermittent paroxysms.

‖Catarrhal fever; general exhaustion, with great sensitiveness of skin to touch and to slightest cold; constant chilliness, with sore throat, as if raw, painful on swallowing saliva; muscles of nape of neck, especially at sides beneath ears very painful to touch; dry cough; no appetite; no thirst; sleepless the whole night, with groaning and moaning.

‖Scarlatina preceded by cerebral symptoms and parotitis; restlessness day and night; mouth could not be opened, eyes injected and half open; continuous fever; involuntary evacuations; temperature low; child throws itself about unconsciously; dysuria; puffing under lower eyelids.

‖Scarlet fever with hydrops and albumen in urine; convulsions, bloated face; nosebleed.

‖After scarlet fever, anasarca and ascites; urine suppressed; tongue clean; next day convulsions followed by vomiting; conscious, but complains of a sensation as if a veil were hanging over eyes; urine very scanty; legs and scrotum greatly swollen; skin cool, pulse little accelerated and pretty full; next day recurrence of convulsions with more or less unconsciousness and complete blindness; deafness.

‖Scarlatina; sequela retarding convalescence; croupy inflammation of nasal mucous membrane; swelling of parotid and submaxillary glands; early decrease of urinary secretion, with traces of albumen and cylindrical tubuli; fully developed dropsy from Bright's disease.

‖After scarlet fever, anasarca and convulsions.

‖Measles, characterized by croupy cough < in morning, without expectoration and rattling in chest.

[a] **Attacks, Periodicity.** Attacks: last ten minutes then end in hoarseness; of debility last two or three hours.

After scarlet fever: anasarca and ascites, urine suppressed, tongue clean; next day convulsions and vomiting; next day recurrence of convulsions.

One hour before chill: thirst.

For three hours: chill followed by heat.

Twice a day: fever and bitter taste.

Every morning: boring headache; dull headache; vomiting; violent chill at six or seven o'clock.

Daily attacks: of sudden indescribable debility.

Digitized by Google

Every night: pain in skull bones; chill.
Four weeks after slight paralysis another attack of complete paralysis of arms and legs.
Every four months: scabby eruptions on head.
Every Winter: whitlows.
Spring and Autumn: bilious attacks.
For three months: l. cornea so hazy that iris could hardly be seen.
Repeated attacks: tonsillitis.

Locality and Direction. Right: painful throbbing in temple; headache in temple; pressive pain in occiput; cornea involved from periphery toward centre; violent pain over eyebrow; pain in eye <; scurvy formation in half of nose; acute inflammation of parotid gland; sensation in shoulder as of something creeping; large bubo, stony hard in groin; stitching pain in chest; lies immovable on side; lies on hip-joint; side of chest arched like a barrel from axilla downward; side of chest dull percussion sound; side of thorax considerably hollowed; pain in occipital protuberance; ulcer on last rib; red tubercle on buttock; swelling of hand; inside of thumb swollen, livid; whitlow on middle finger; suppuration of middle joint of index finger; carbuncle on thigh; chilly creeping sensation in leg; numbness of arm and hand.

Left: cornea so hazy that iris could hardly be seen; severe inflammation in cornea and iris; small ulcer on cornea; excessive lachrymation of eye; pupil much dilated; unpleasant sensation in side of nose; discharge of bone as large as pea from nostril; severe neuralgic pain in region of orbit; bubo in groin; upper part of side of throat tickling causing cough; as of drops of hot water in chest, side of thorax abnormally bulging; moist râles in lung; upper part of side of thorax dilated backwards; fine stitches in half of chest; carbuncle on side of back; hip pains as if sprained; raised, flat, purplish swelling on thigh; cramp in hand ; mouth drawn to side; paralysis of side; pain in hypochondrium and arm.

From below upwards: internal shivering.

Sensations. Bruised sore feeling of body, < from any motion.
Burning, throbbing pain, with chilliness.
Fainting with the pains.
Painful throbbing in different parts.
As if he could murder some one; forehead as if bruised; as if an abscess was forming in head; as if forehead would be torn out; as if eyes would be drawn back into

Digitized by Google

head; as if skull would burst; as from a plug in head; wabbling as from water in brain; sense of swashing in head; as if a nail was driven into occiput; as of sand in eye; eyelids as if corroded; as of a burn in eyelids; as if eyes projected; as if eyeballs were bruised; nose as if bruised; as if blood was entering tooth; tooth as if too long; pain in throat as from an intense swelling; as of a plug in throat; sensation of water rising in œsophagus; as if she had eaten sour things; as of a hard body in epigastrium; as if stomach hung loose; abdomen as if bruised; as if bladder could not be emptied thoroughly; as if something were running or creeping in r. shoulder-blade; pain as if in bones of arms and thighs; as if there was a fishbone in throat; as of dust in lungs; nose as if bruised; as from a splinter in throat; as if hot water was floating in chest; as of drops of hot water in l. chest; as if bruised in small of back and thighs; as if a weight was resting on it; pain as if bruised in os humeri; fingers as if dead; left hip pains as if sprained; knee pains as if bruised; pain in foot as after taking a misstep; as if something was sticking in throat; as if he would suffocate; throat as if raw; as if a veil was hanging over eyes.

Pain: in skull bones; in tumors on head; in pimples; in eyes and head; on inside of nose; malar bones; in tooth; in tip of tongue; in throat; in abdomen; in kidneys; in one spot of larynx; in upper part of throat; extending from ear to ear; in top of chest; in r. occipital protuberance; in neck; in small of back and lumbar vertebra; in shoulder; in bottom of back; around waist and shoulders; in abdomen; in l. hypochondrium and arm; in limbs; in bones.

Intense pain: in throat; in carbuncle on back.

Violent pain in head; over r. eyebrow; in bony part of nose; in thumb.

Sharp pain: in head.

Severe pain: in r. tonsil; in lower extremities.

Tearing: in arms extending toward suppuration in breast; in limbs and joints.

Cutting pain: in outer canthus; in abdomen; in thumb.

Lancinating pain: in head; in tumors.

Violent stitch: extending into great toe.

Stitches: in head; in eyes; in region of liver; in region of spleen; in urethra; extending from ear to ear; in larynx; in throat; in lungs; in heart; in back; in joints.

Pulse-like stitches: in lower portion of occiput.

Burning stinging pains: on toes.

Digitized by Google

Stinging pain: in lids.
Stinging: of ulcers on breast; of blister on thumb.
Stitching: in head; in throat; in hepatic region; in larynx; in r. side of chest.
Severe neuralgic pains: in region of l. orbit; of face, extending in streaks into temple, ear, alæ nasi, upper lip.
Darting pain: in ears.
Ulcerative pain: in nostril; in throat.
Drawing pain: in nose; in tooth; from region of stomach to back; between scapulæ; in limbs.
Throbbing pain: in r. temple; in eyes; in ears; in tooth; in scrotum; in thumb; in last joint of middle finger, r. hand; in abscess.
Clawing: in umbilical region.
Gnawing: in stomach.
Cramp: in calves; in soles and toes; in l. hand.
Pinching: in abdomen.
Burrowing: headache.
Boring: headache; at root of nose; in r. temple.
Burning, bruised pain: in eye.
Burning pain: in eyes; in bones above orbits; in nose; in thumb.
Burning itching: on scalp.
Burning: of body; in throat; in stomach; in rectum; prepuce and pudenda; in urethra; on edges of ulcers; in throat; from pit of stomach to throat and ears; in ulcers.
Smarting pain: in eyelids; in pimple on upper lip; in throat; of vulva.
Pressive pain: in eyes; in lids.
Aching: in forehead; in vertex; in eyes.
Constriction: of chest.
Contractive sensation: in abdomen.
Tensive aching pain: above nose.
Dull aching pain: in stomach.
Rheumatic pains: in limbs and joints; in back.
Acute bruised pain: in eyeballs.
Bruised pain: in anterior muscles of thighs; in limbs.
Oversensitiveness to pain.
Sore pain: on dorsum of nose; in anus; in rectum.
Soreness: of urethra; on genitals; of scrotum; of folds between scrotum and thigh; in chest; in thighs; of all limbs.
Hammering: in head.
Throbbing: in ears; in forehead and temples.
Pulsative sensation: in ulcers on female sexual organs.
Violent pressure: in throat.
Anxious feeling: about heart.

Digitized by Google

Pressure: in head; in eyes; in stomach; beneath larynx; under sternum; sharp in small of back and lumbar vertebræ; on brain during delivery.
Distressing headache.
Dull headache.
Empty, sinking feeling: in stomach.
Scraping: in throat.
Raw feeling: in side of nose.
Scratching: in air tubes.
Acrid feeling: in stomach.
Unpleasant sensation: in l. side of nose.
Heaviness: in stomach.
Sensation of weight: at back of eyeballs.
Numbness: of r. arm and hand.
Stiffness: of nape of neck; in limbs.
Pricking: in both heels; in tumors.
Tickling sensation: in back of throat; in air tubes; in soles of feet; in arm.
Tingling: in toes; in tips of fingers.
Dry heat: of body.
Dryness: of palms of hands.
Creeping: in rectum; in r. leg; from l. hand up arm.
Formication: in arms.
Intensely violent itching: in bend of elbows; on hands, wrists and in palms; in lower extremities.
Itching: on scalp; in ears; in nose; around mouth; on spot beneath lower lip; on penis; of vulva; of nipples; in throat; of ears; violent at bend of elbow; on hands; in palms; of eruption in bends of joints; dull itching of soles of feet and palms of hands.

" **Tissues.** Child looks plump, yet the flesh is flabby, the muscles withered, digestion weak; intolerant of pressure about stomach after eating; food temporarily > the debility; stools green, watery, undigested, or white, sour smelling and painless; < during day; little tendency to cerebral symptoms; glands swollen and child subject to catarrhs from least draught of cold air; eczema, < morning, when it itches, burns and smarts.
Chlorosis with flatulent dyspepsia, delayed menses and leucorrhœa.
Hard, burning nodosities.
Pains in bones; caries.
Caries with watery, foul smelling pus.
Rheumatic swelling, with heat, redness and sensation as if sprained.
Useful in promoting suppuration when a former acute pain suddenly ceases after a chilly feeling, and is followed by a beating pain, or throbbing, indicating formation of pus.

Digitized by Google

‖Strumous patients, where suppurative process has not been arrested by *Mercur.*, or where suppuration seems inevitable; it hastens formation of abscess.
‖For elimination of foreign bodies by process of suppuration.
‖Suppuration of soft parts, of carious bones, of ulcers, of fistulous tracts, of exanthems.
‖Lacerating and pricking pains in tumors; throbbing and beating in abscess; skin over abscess highly inflamed, hard, hot and swelling; pus scanty, bloody, corroding, smelling like old cheese; pains < night, and by exposure to cold.
‖Felons.
‖Tendency to formation of abscesses.
‖Suppurative adenitis of armpit and of groin.
‖Suppurating buboes in inguinal and axillary regions.
‖Open buboes, which do not heal, especially after mercury or iodine.
‖Glandular swellings, particularly when obstinate and after abuse of mercury; suppuration of axillary and inguinal glands; strumous suppuration of joints with profuse sweats day and night.
‖Absorption of old glandular swellings.
‖Anasarca with tendency to formation of boils, on hairy scalp; tonsils and submaxillary glands enlarged; albuminous urine. θAfter scarlet fever.
‖Anasarca from Bright's disease, especially after so-called light cases of scarlatina.
‖Preventive of dropsy after scarlet fever as soon as traces of albumen are discovered in urine.
‖The child has a sour smell, and white, fetid evacuations.
‖Sour smell of the excretions.
‖‖Scrofulosis.
‖Gout with arthritis, without tophus.
‖Secondary syphilis, especially after mercury and iodide of potassium.

[45] **Touch. Passive Motion. Injuries.** ‖‖Extreme sensitiveness to contact; dread of contact, out of proportion to actual pain.

Touch: scalp sensitive; nodosities sore; boils on head and neck; head and eye; cornea sensitive; slightest touch acute bruised pain; swelling in lids painful; hemorrhage from ear on slightest touch; interior of nose sensitive; nose very sensitive; bones of nose sensitive; pains in malar bones <; bones of face painful; boils very sensitive; ulceration of face, intolerance of touch; great swelling of upper lip; gums and mouth very painful; renal region sensitive to slightest touch; eruption

Digitized by Google

on male sexual organs sensitive; larynx and trachea sensitive; skin very sensitive; muscles of nape of neck sore.

Pressure: < pain in one spot in throat; on corrosive blister causes stinging.

Binding head up tight: > pressure.

Has to loosen clothing.

Riding in a carriage: vertigo.

When shaking head: vertigo.

From concussion: morning headache <.

After injury: to eye violent inflammation; suppuration of middle joint of r. index finger.

" **Skin.** Yellowness of the skin.

‖‖Constant offensive exhalations from body.

‖Child smells sour.

‖Great sensitiveness of skin to touch and to slightest cold.

‖‖Unhealthy, suppurating skin; even slight injuries maturate; every cut or hurt suppurates.

‖Cracking of skin and smarting of hands and feet.

‖Bruised sensation, or as of subcutaneous ulceration, < by contact.

‖Suppression of exanthems, followed by mania; melancholia; ophthalmia; laryngismus stridulus, with epileptiform convulsions.

‖‖Erysipelatous inflammation on external parts.

‖Suppuration of long inflamed boils on body, or on limbs, commencing with blisters.

‖Burning itching on body, with white vesicles, after scratching.

‖Itching rash in bend of knees and elbows.

‖‖Eczema, spreading by means of new pimples appearing just beyond the old parts.

‖Humid soreness on genitals, scrotum and folds between scrotum and thighs.

‖Herpes zoster, from spine around l. side to median line; vesicles, bullæ, some containing dark pus; acute neuralgic pains in seat of eruption; vesicles on an inflamed base, with severe itching and scratching, and nightly aggravation.

‖Dry and slightly cracked condition in both axillæ, especially left; much itching, < when body becomes heated; rash generally dry; occasionally slight moisture exuded; similar eruption about mouth; severe headache, pain < back of eyeballs, which felt as if they would be drawn back into head.

‖‖Nettlerash.

‖Chronic urticaria, eruption chiefly in hands and fingers.

‖Crusta lactea; tetters; rhagades; excoriations.

Digitized by Google

Fat, pustular and crusty itch.
Dry, pimply eruptions.
Miliary rash in circles.
Adenitis; acne punctata; boils; crusta lactea and serpiginosa; herpes; intertrigo; scurvy; encysted tumors; varices.
Eruption after mercurialism.
Eruptions very sensitive and sore to touch.
Skin inclined to ulcerate; the large sore surrounded by small pustules.
Ulcers very sensitive to contact, easily bleeding, burning or stinging, with corrosive pains.
Bleeding of an ulcer, even on slight wiping.
Ulcers: discharge bloody pus, smelling like old cheese; edges very sensitive, and have a pulsating sensation; discharge corroding; burning in ulcers; burning in night only; pains resembling recent excoriations; throbbing and shooting; jagged edges, and surrounded with pustules; bluish, bleeding ulcers; pus laudable, acrid or sanguineous; fetid and ichorous.
Margins of ulcers elevated and spongy, without granulations in centre.
Little pimples or smooth ulcers surrounding principal ulceration.
Severe stitching pain in ulcers when laughing; burning and throbbing at night.
The ulcer itches very much.
Stinging burning of edges of ulcers.
Mercurial ulcers.
Warts become inflamed and stinging, as if ulceration would set in.
Scabs easily torn off, leaving a raw and bleeding surface.

47 **Stages of Life, Constitution.** Torpid, lymphatic constitutions; persons with light hair and complexion, slow to act, muscles soft and flabby.
Slow, torpid constitutions, with lax fibre and light hair; great sensitiveness to slightest contact of ulcers, eruptions and parts affected.
Figure lean, complexion bilious; pimply and subject to erysipelatous inflammation; pallor of face when excited by movement, or very red and flushed.
Suitable to scrofulous and debilitated subjects.
Psoric scrofulous diathesis.
Psora of children.
Strumous, outrageously cross children.
Purulent diathesis, great tendency to suppuration.
Child, æt. 4½ months; crusta lactea.
Girl, æt. ½ year, weak, scrofulous; laryngismus stridulus.

Digitized by Google

Boy, æt. ½ year; croup.
Strong boy, æt. 8 months, since birth has had an eczema of face and head, which five weeks ago began to get better of itself, as eruption was nearly healed, epileptiform spasms set in; laryngismus stridulus.
Boy, æt. 21 months; dropsy after scarlet fever.
Boy, æt. 2, had tinea capitis, for which *Sabad.* was given; inflammation of eyes.
Boy, æt. 2½; croup.
Boy, æt. 2½; croup.
Boy, æt. 3; parotitis.
Boy, æt. 3; scarlet fever.
Child, æt. 3½; parotitis.
Boy, æt. 4; croup.
Girl, æt. 4, lively temperament; croup.
Boy, æt. 4½, light hair, blue eyes, pale face, of mild, mischievous disposition, had pneumonia when an infant; emphysema.
Boy, æt. 5, healthy and strong; pleurisy.
Boy, æt. 5; croup.
Boy, æt. 5, weak, excitable, after a catarrh which had lasted eight days; croup.
Boy, æt. 6, delicate, weak, muscles flabby, face puffed, upper lip swollen, eyes sunken, frequent swelling of glands of neck; abnormal passages from bowels. *θ* Ophthalmia.
Boy, æt. 6, twenty weeks after pneumonia, treated allopathically; pleuro-pneumonia of r. side, with absorption of pleuritic exudation, but continued presence of pneumonic infiltration in a state of purulent dissolution.
Boy, æt. 7, scrofulous constitution; ulceration of cornea.
Boy, æt. 8; anasarca and convulsions.
Boy, æt. 12; anasarca and convulsions.
Boy, æt. 13, suffering one year; ozæna.
Boy, æt. 16, robust, blonde, exposed to chills and must frequently strain his sight; inflammation of glands of eyelids.
Girl; whitlow.
Young girl, three months after puberty; mind affection.
Mr. K., æt. 18, fast-living, German; affection of cheek.
Girl, æt. 18, strong, healthy, very excitable and has been suffering three months; affection of throat.
Girl, æt. 18, after catching cold; laryngitis.
Miss M., æt. 18; chest troubles succeeding repelled itch.
Needle-woman, æt. 19; whitlows.
Young man, while fencing, received small, scarcely visible fragment of steel in eye, which stuck into cornea; traumatic ophthalmia.

Digitized by Google

Housemaid, æt. 22; whitlow.
Miss S., æt. 24, dark hair and eyes, pale face; angina pectoris.
Woman, single, æt. 25, menstruation scanty, suffering for three years; skin eruption.
Tenor singer, three years ago had an herpetic eruption in epigastric region which returned after the asthma had been cured; asthma.
Stonecutter, gonorrhœa one year ago, had taken much mercury, struck in eye by small piece of stone; hypopyon.
Waiter, after catching cold when going into cellar; pains in foot.
Mr. R., had been suffering for two weeks, *Arsen.* and *Laches.* without benefit; carbuncle.
Man, after drinking iced milk while in a heated condition; sensation as if a splinter or fishbone were sticking in throat.
Woman, psoric constitution; catarrhal inflammation of eyes.
Woman, suffering for years; indigestion.
Professional man, afflicted for twenty years, has frequently taken mercury; bilious attacks.
Sculptor, suffering for twenty-five years, has been overdosed with mercury; chronic tonsillitis.
Man, æt. 30; kidney disease.
Man, æt. 30; syphilitic bubo.
Man, æt. 30; bubo.
Woman, æt. 33, suffered severely from rheumatic pains, no history of syphilis; keratitis parenchymatosa.
Man, æt. 34, married, tall, slender, dark complexion, lymphatic, torpid temperament, has epilepsy and heart disease, also a recurring eruption which he treated with binoxide of mercury; attacks of debility.
Man, æt. 36, phlegmatic temperament, healthy, strong constitution, for half a year had itch, after bodily exhaustion slept upon ground; affection of brain.
Unmarried woman, æt. 36, has had repeated attacks since eighteenth year; father affected same way; tonsillitis.
Man, æt. 36, another æt. 45; chronic tracheitis.
Miss H., æt. 37, supposed she was bitten by some insect on forearm; carbuncle.
Man, æt. 37, big, strong, after suppressed syphilitic eruption; paralysis.
Woman, æt. 38, weak and flabby, scrofulous during youth, corneitis; hypopyon.
Mrs. P., æt. 40; affection of nose.
Scrofulous woman, æt. 40, subject to suppurating sore throat; tonsillitis.

Digitized by Google

Mr. W., æt. 40; carbuncle.
Woman, æt. 44, has suffered for many years, has taken large doses of quinine and mercury; hepatic and uterine disease.
Man, æt. 45; ill effects of *Merc. sol.*
Man, æt. 47, carbuncle.
Widow, æt. 52, suffering six years; spinal irritation.
Mrs. H., æt. about 60, large, fleshy woman with frequent attacks of jaundice; carbuncle.
Patient, æt. 63, sick since five years; bronchial catarrh.
Man, æt. 67, has spent much of his life in foreign stations, mercurial history; hepatogenous jaundice.

[46] **Relations.** Antidoted by: *Acet. ac., Bellad., Chamom., Silic.*
It antidotes: mercurial and other metallic preparations; iodine, and especially the iodide of potash; cod-liver oil.
Removes weakening effects of ether.
Compatible: *Acon., Arnic., Bellad., Laches., Mercur., Nitr. ac., Silic., Spongia, Zincum.*
Compare: *Alumina* (constipation); *Calc. ost., Jodum, Kali bich., Mercur., Rheum, Sulphur.*
Complementary: to *Calend.*, in injuries.

HIPPOMANES.

A normally white, usually dark olive green, soft, glutinous, mucous substance, of a urinous odor, which floats in the allantois fluid, or is attached to the allantois membrane of the mare or cow chiefly during the last months of pregnancy.

Triturations were made from the dried substance obtained from Rev. John Helfrich (one of the provers and an associate of the Allentown Academy) who took it from the tongue of a newly born filly.

The provings are by Hering, Helfrich, Floto, Reichhelm, Husman and Neidhard. See Allen's Encyclopedia, vol. 4, p. 589.

As the remedy has not, thus far, had frequent clinical application, we give but a condensed extract from the provings.

[1] **Mind.** [11] Melancholy; a young man sits in the corner and does not want to have anything to do with the world.
Restlessness; must move from place to place.
[2] **Sensorium.** Sensation of lightness in head.
[3] **Inner Head.** Pressive pain in temples.
Headache, with giddiness, heat in head, sleepiness, yawning, thirst.
Violent headache; heaviness on vertex; when walking it feels as if head would fall forward.

Digitized by Google

Headache > when lying on painful side; < when walking in sun.

4 **Outer Head.** The head feels so heavy that it falls forward if he raises himself.

The hair becomes nearly dry; falling off of hair.

5 **Sight and Eyes.** The light of the candle looks blue.

Stitches in eyes (with headache).

Painfulness of eyes when moving them, with headache.

7 **Smell and Nose.** Sensation of coldness, when drawing the air in.

Bleeding of nose in morning.

9 **Lower Face.** Involuntary twitching of under lip.

11 **Taste and Tongue.** Bitter taste in mouth.

Tongue coated white, with redness of tip.

12 **Inner Mouth.** Increased secretion of saliva, with headache or sore throat.

13 **Throat.** Painfulness of l. tonsil.

Sensation of plug in throat (l. side).

14 **Appetite, Thirst. Desires, Aversions.** Desire for acids, and aversion to sweet things.

16 **Hiccough, Belching, Nausea and Vomiting.** Nausea, especially in a draft of air, with headache.

17 **Scrobiculum and Stomach.** Icy coldness in stomach.

Sensation of emptiness in stomach (and head).

20 **Stool and Rectum.** Soft stool, with vomiting; discharge of prostatic fluid after micturition.

Hard stool, in balls.

Spasmodic contraction of sphincter ani.

21 **Urinary Organs.** Frequent discharge of watery urine.

Urine discharged in a small stream, with straining—it feels as if a swelling retarded it; prostatitis.

Drawing pain from anus through urethra.

22 **Male Sexual Organs.** Sexual desire increased.

Prostatitis.

Drawing pain in testicles.

23 **Female Sexual Organs.** Menstruation too early.

25 **Voice and Larynx. Trachea and Bronchia.** Larynx feels raw, as if air were too cold.

26 **Respiration.** Tickling in throat when breathing.

27 **Cough.** Cough, barking, during sleep.

28 **Inner Chest and Lungs.** Stitches in l. side of chest.

32 **Upper Limbs.** Left arm feels as if paralyzed.

Violent pain in wrists. θChorea.

Paralysis of wrist, every morning in bed.

Sensation in wrist as if sprained, especially left.

Great weakness of hands and fingers, so that he cannot hold anything.

Formication on r. hand.

Digitized by Google

[33] **Lower Limbs.** Weakness, and as if sprained, in knees.
Weakness and sensation of dryness in foot joints and soles of feet.
Cramps in soles of feet, in evening.
Cold feet.
[34] **Limbs in General.** Heaviness in limbs.
[35] **Rest. Position. Motion.** Lying: on painful side, headache >.
Desire to lie down, with no relief in doing so.
If he raises himself: head feels heavy.
Must move from place to place.
Walking: head feels as if it would fall forward; in sun headache <.
[36] **Nerves.** †Great weakness of body and mind.
Great weakness and debility, with pale face.
Desire to lie down, with no relief on doing so.
†Chorea.
[38] **Time.** Morning: bleeding of nose.
Evening: cramps in soles of feet; heat, with dull headache.
[39] **Temperature and Weather.** Sun: < headache.
Draft of air: nausea.
Chill: > being warmly covered in bed.
[40] **Fever.** Chill, beginning in back.
Chill, > being warmly covered in bed.
Heat in evening, with dull headache.
[41] **Attacks, Periodicity.** Every morning in bed: paralysis of wrists.
[42] **Locality and Direction.** Right: formication on hand.
Left: painfulness of tonsil; sensation of plug in throat; stitches in side of chest; arm feels paralyzed.
[43] **Sensations.** As if head would fall forward when walking; as of a plug in throat; as if a swelling retarded urine; as if air was too cold for larynx; left arm feels as if paralyzed; left wrist as if sprained.
Violent pain: in head; in wrists.
Stitches: in eyes; in l. side of chest.
Drawing pain: in testicles; from anus through urethra.
Cramps: in soles of feet.
Dull headache.
Painfulness: of eyes; of l. tonsil.
Heat: in head.
Heaviness: on vertex; in limbs.
Raw feeling: in larynx.
Sensation of dryness: in foot joints and soles of feet.
Sensation of emptiness: in stomach.
Great weakness: of hands and fingers; of foot joints and soles of feet; of body and mind.
Lightness: in head.

Digitized by Google

Tickling: in throat.
Formication: on r. hand.
Itching: on skin, especially on chest, between shoulders.
Coldness: in nose when drawing air in; in stomach.

[46] **Skin.** ||Itching as from flannel on skin, especially on chest and between shoulders.

[47] **Stages of Life, Constitution.** ‡After growing too fast. θChorea.

[48] **Relations.** Antidoted by coffee.
Caustic. relieved paralysis of wrist.

HIPPOZÆNIN.

Glanderine and Farcine. *A Nosode.*

Introduced by Drysdale.

The extracts (made by Hering) are from Wilkinson, Spinola, Bollinger (Ziemsen) and Virchow. They are the effects observed on horses and men affected with this disease.

Gl. = Glanderine. F. = Farcine. Symptoms so marked are suggested for clinical use by Wilkinson.

CLINICAL AUTHORITIES.—*Ozæna*, Wilkinson, B. J. H., vol. 15, p. 627; Morgan, Raue's Rec., 1873, p. 79; *Chronic ozæna*, Hiller, Organon, vol. 2, p. 381; *Diphtheria*, Wilkinson, B. J. H., vol. 15, p. 627; *Bronchitis*, Wilkinson, B. J. H., vol. 15, p. 625; *Putrid fever*, Wilkinson, B. J. H., vol. 15, p. 627; *Glanderoid influenza*, Baer, Raue's Rec., 1873, p. 108; *Scrofulous swelling of parotid gland*, Nichols, Organon, vol. 3, p. 345.

Cases by Berridge not found.

[1] **Sensorium.** Fainting turns with headache.

[3] **Inner Head.** Inflammation of membranes of brain.
Purulent collections between bones of skull and dura mater.
Scattered abscesses in brain substance.
Tubercles may appear in periosteum of skull, in dura mater, in plexus choroides.
A diffused myelitis malleosa, attributable to infiltration.

[4] **Outer Head.** Bones of skull and face, most frontal, necrosed.
Hair loses its glisten. Gl.

[5] **Sight and Eyes.** Eyes full of tears or slime.
Pupils dilated, with collapse.
Papules on choroid coat of eye.

[6] **Hearing and Ears.** Tinkling sounds in ears.
Hoarse and deaf, before fatal termination.

Digitized by Google

Inflammation of parotid gland.

[7] **Smell and Nose.** Swelling and redness of nose and adjacent parts, with severe pain.

Diffused redness of nose spreading over forehead and face.

Upper portion of nose specially sensitive to touch, exhibiting a diffuse, erysipelatous swelling.

Erysipelas especially upon nose and face.

Gangrenous erysipelas of external integuments of nose, discharge of pus and viscid mucus down one or both nostrils. Gl.

Discharge of a thin, viscid, light colored mucus from nose.

Offensive muco-purulent discharge from nose.

Nasal secretions have a foul appearance, before fatal termination.

Nasal discharge often from one side only.

Discharge from nose becomes later of a thicker consistency, more purulent, often of a brownish-yellow color, sanguineous and offensive.

‖Catarrh: nose inflamed with thick and tinged defluxion; tonsils swollen, fauces gorged. Gl.

‖Obstinate catarrh. Gl.

Ozæna; ulcers inside of nose.

Discharge: often one-sided, albuminous, tough, viscous, discolored, gray, greenish, even bloody and offensive; acrid, corroding.

One nostril appears smaller from swelling.

Little yellow pustules size of a hemp seed on nose.

Ulcers deep, lard-like fundus; edges pectinated, elevated, viscous secretion, no scurfs, most in groups at first size of a lentil, running together.

Ulcerations progress from below upwards.

‖Chronic ozæna.

Small papules of yellowish color are seated upon mucous membrane of nose.

Distinct tubercles situated mostly upon alæ nasi.

Pustules and ulcers on mucous membrane of nose, terminating in erosion of perichondrium and perforation of septum and vomer.

Nostrils covered with foul, crustaceous deposits.

Nostrils covered with a viscous phlegm. Gl.

‖Nose and mouth ulcerated. θCatarrh. Gl.

‖‖Malignant ozæna.

Gangrene of swollen root of nose.

Cartilages of nose become exposed and necrosed, septum, vomer and palatebone disorganized.

Cartilages of the nose are destroyed. Gl.

⁝Caries of nasal bones.

Catarrhal, inflammatory, ulcerative processes in other mu-

Digitized by Google

cous membranes than of nose, conjunctiva of eyes, mucous membranes of mouth, gums, fauces and entire respiratory canal.

‖Checks the liability to catarrhal affection. Gl.

[9] **Lower Face.** Maxillary gland swollen, like a distinct ball or sausage, firmly attached to the maxilla, uneven, rugged, tuberculated; mostly painless, burning only at times.

Submaxillary and sublingual glands swollen and painful at times; abscesses are formed which open externally.

[10] **Teeth and Gums.** Gums show a tendency to bleed.

Gums covered with a black, sooty deposit.

[11] **Taste and Tongue.** Act of speaking difficult.

Tongue dry, thickly covered with a black, sooty deposit.

[12] **Inner Mouth.** Dryness of mucous membranes of mouth and pharynx, before fatal termination.

Stomatitis.

Ulcers appear in mouth.

⁞Buccal passages filled with tenacious lymph and mucus. θScarlatina. Gl.

Croupous exudation upon mucous membrane of mouth and throat.

‖Apparently suffocating from diphtheritis in mouth and nose, agonized with buccal ulcerations. θDiphtheria. Gl.

⁞Odor of breath putrid. θScarlatina. Gl.

‖Scrofulous swelling of l. parotid gland in a child.

[13] **Throat.** Ulcerations upon velum of palate.

⁞Swollen tonsils closing posterior channels. θScarlatina.

Increased difficulty in swallowing, before fatal termination.

Mucous membrane of fauces ulcerated, yellow, like bacon.

Upon mucous membrane of pharynx ecchymoses, redness, swelling, eruptions and foul ulcers.

Inflamed condition of pharynx makes swallowing difficult.

‖Patient apparently suffocating from diphtheritis in mouth and nose; buccal ulceration present.

[14] **Appetite, Thirst. Desires, Aversions.** Appetite failing; loss of appetite. Gl.

Thirst excessive, especially with diarrhœa.

[17] **Scrobiculum and Stomach.** Gastro-intestinal catarrh; loss of appetite, indigestion, constipation, in later stage diarrhœa.

Large ecchymoses on mucous lining of stomach.

Papula shaped formations in substance of lining membrane of stomach.

[18] **Hypochondria.** Liver greatly enlarged, often showing signs of fatty degeneration.

Hepatitis with gangrenous and ulcerative inflammation of gall ducts.

Enlargement of spleen.

Digitized by Google

Spleen enlarged, filled with blood; softened and liquified, of a grayish-red or dark color; wedge-shaped abscesses in spleen.

[19] **Abdomen.** Inguinal glands swollen.

[20] **Stool and Rectum.** Colliquative diarrhœa with a general cachexia and exhaustion precede the fatal termination.

Involuntary evacuations with collapse.

Constipation.

[21] **Urinary Organs.** Tubercles and abscesses in kidneys.

Suppuration in one kidney. Gl.

Albumen in urine, also leucine and tyrosine.

[22] **Male Sexual Organs.** Tubercles and abscesses: of glans penis; of testicles; in kidneys.

Sarcocele malleosa.

Swelling and inflammation of testicles. Gl.

; Syphilis.

[23] **Female Sexual Organs.** Slimy discharge from vagina.

; Uterine phlebitis. F.

[24] **Pregnancy. Parturition. Lactation.** Abortion.

[25] **Voice and Larynx. Trachea and Bronchia.** Papules and ulcerations in frontal sinuses, pharynx, larynx and trachea.

Extensive lesions in larynx, subsequent œdema of glottis.

Hoarseness from the altered condition of larynx.

‖Neglected cases of bronchitis.

‖‖Bronchitis: in the worst forms; especially in elderly persons; where suffocation from excessive secretion is imminent. Gl.

[26] **Respiration** Noisy breathing; loud snoring respiration before fatal termination; breath fetid.

Respiration short and irregular, with collapse.

Slight difficulty in breathing.

‖Cough and obstructed respiration, resulting from cicatricial contraction of mucous membrane of nose and larynx; had lasted eleven years; patient presented picture of decided cachexia.

Respiration at first partially impeded, later absolute dyspnœa.

Actual dyspnœa from affection of larynx or lungs.

‖‖Suffocation from excessive secretions. θBronchitis. Gl.

‖Bronchial asthma. Gl.

[27] **Cough.** Irritative cough.

Slight cough and hoarseness, sputa often bloody.

‖Cough comenced at Christmas and lasted till June. Gl.

‖Whooping cough. Gl.

Patients cough severely and expectorate profusely, sputa usually bearing a strong resemblance to the discharge from the nostrils.

Digitized by Google

[28] **Inner Chest and Lungs.** Extensive rhonchi are heard over walls of chest.

Large sections of lungs in a state of gray hepatization and purulent infiltration, while other portions are in a state of collateral hyperæmia.

Pneumonia with rusty sputa. Gl.

Pneumonia malleosa; nodules larger, forming isolated hepatizations and abscesses.

One or two infarctions in lungs, size of a bean developed in one lobe, distinctly circumscribed dark red color, in and around which lie small abscesses.

Nodules in lung size of a pea, of a gray whitish appearance and a firm, lardaceous consistence.

Tubercles in lungs.

Tubercles, size of millet seed to a pea, of a firm texture and of a gray, yellowish or reddish color.

Tubercles in lungs are never missed in glanders, rarely in farcy.

Tubercles in lungs, nodules and specific inflammatory processes.

Small tubercles upon pleura; subpleural ecchymoses.

Pulmonary abscesses with pleuritis.

⁝Given in phthisis, it diminishes expectoration, abates constantly recurring aggravations of inflammation, and checks liability to catarrhal affections.

Suppuration of lungs. Gl.

⁝Lung diseases of cattle. F.

[29] **Heart, Pulse and Circulation.** Pulse very frequent and small in volume, 110 to 120; in some cases retarded.

[32] **Upper Limbs.** With sore finger, swelling of arm, phlegmonous and erysipelatous with pustules and ulcers.

[33] **Lower Limbs.** ⁝Hip disease.

⁝Psoas and lumbar abscesses. F.

⁝Old bad legs (ulcers). Gl.

Suppuration in each knee-joint; a large quantity of pus in bursa of knee-joint. Gl.

⁝Anasarca of lower limbs. F.

[34] **Limbs in General.** Obscure pain in limbs, most in muscles and joints.

[35] **Nerves.** Weakness, fatigue, general discomfort; they give up their business (not in carbuncle).

Malaise, fatigue, prostration, accompanied by headache and chills.

General prostration with considerable emaciation.

[37] **Sleep.** Insomnia and great restlessness.

Nocturnal delirium.

[40] **Fever.** Frequent chilliness. Gl.

Chills and fever in cases of abscesses or ulcers.

Digitized by Google

Skin becomes cool with collapse.
Symptoms like the early stage of typhoid fever.
Fever exacerbations irregular or of a regular intermittent character.
Febrile disturbances constantly increasing.
As the pains become more severe, regular fever turns often supervene or a continued fever prevails.
Fever when a series of abscesses follow in rapid succession.
Temperature reaches 104° F. and over.
Fever raging without intermission, even in morning, temperature 106° F.
Fever increases, pulse grows weaker, delirium sets in, stupor.
Putrid fever. Gl.
Plague. Gl.
May be tried in scarlatina, where odor of breath is putrid, buccal passages filled with tenacious lymph and mucus, tonsils greatly swollen.

41 **Attacks, Periodicity.** At times: burning in maxillary glands; pain in submaxillary and sublingual glands.
Cough commenced at Christmas and lasted till June.
Lasted eleven years: cough and obstructed respiration.

42 **Locality and Direction.** Left: scrofulous swelling of parotid gland.

43 **Sensations.** Pain is excessive in acute articular rheumatism.
Attacks of muscular cramps before fatal termination.
Violent pains: in joints and muscles.
Severe pain: in nose and adjacent parts.
Obscure pain: in limbs; in muscles and joints.
Painfulness: of tumors and abscesses; of submaxillary and sublingual glands.
Painful swelling: of joints.
Burning: in maxillary glands.
Dryness: of mucous membranes of mouth and pharynx.

44 **Tissues.** Greatly debilitated and emaciated, presenting a very similar appearance to that seen in chronic tuberculosis with hectic fever.
Extrusion of contents overbalances supply of nutrition.
Numerous ecchymoses in internal organs.
Inflammation of lymphatic vessels and swelling of glands.
Lymphatic swellings and inflammation.
On legs, head, sides, chest, near genitals, in long strings, hard swellings from size of a pea to that of a hazel or walnut; after enlarging they break open and discharge a viscous, yellow brownish ichor.
Phlegmasia dolens.
Entire process presents a strong resemblance to certain forms of pyæmia.

Digitized by Google

Pyæmia and inflammation of veins and lymphatics, particularly when pus is formed.
The mucous membranes (first of all that of the nose) manifest symptoms of inflammatory and ulcerative disease.
Inflammatory affection of mucous membrane of mouth followed by swelling of tongue, salivation, ulcers upon gums and throat, finally angina.
Purulent inflammation in serous membranes, especially lining membrane of joints, particularly of knee, hips and hand.
Painful swelling of joints.
Pain in joints and muscles become violent.
Enlarged joints.
Periarticular nonfluctuating tumefactions.
Large projecting tumors and abscesses becoming extremely painful and hard, then gradually changing to a doughy consistence; fluctuating; after opening, appear as extensive ulcers with irregular edges covered with a white deposit.
The specific nodules mostly in biceps, flexors of forearm, rectus, pectoralis and at point of insertion of deltoid.
Beneath larger blebs well defined sloughs of a dull gray color.
Putrescence, destructive, quasi malignant ulcerative tendency to decomposition of tissues. Gl.
Malignant erysipelas, particularly if attended with large formation of pus, destruction of parts. Gl.
Dropsy.
All the attacked parts swell, get œdematous.
Beneath œdema are small nodules, varying in size and filled with reddish pus.
Skin cracks in bend of joints, a brownish fluid oozes out, and gets ulcerous.
Purulent infiltrations of skin and cellular tissues, especially upon forehead and eyelids and in vicinity of joints.
Abscesses in various parts of body in course of absorbents.
Carbuncle.
Plague.
Cancer.
Elephantiasis.
Obstinate syphilitic sores, with great fetor.
Scrofula.
Abates recurring aggravation of inflammation.
Murrain of cattle.

[45] **Touch. Passive Motion. Injuries.** Touch: upper portion of nose sensitive.

Digitized by Google

: Putrid bedsores. Gl.

" **Skin.** Erythema, erysipelatous or phlegmonous processes, abscesses, pustules and ulcers are spread so extensively over surface of body that hardly any part remains free.

! Malignant erysipelas, particularly if attended by large formations of pus, and destruction of parts. Gl.

: Scarlatina. Gl.

Sensation of pain on part of inoculation followed by a redness and inflammation, fever, finally swollen, inflamed lymphatic vessels.

On different parts of skin red spots, changing into pustules like those of small-pox, less often into pemphigus blebs.

Pustules of size of pea often arise in large numbers, bursting by discharging a thick, mucous, sanguineous pus, often emitting an offensive odor.

Surrounding subfascial abscesses the numerous layers are pale, discolored and readily torn.

Large abscesses upon different regions of the body, with inflamed lymphatic vessels and glands.

New abscesses are constantly forming in vicinity of the ulcers, especially about joints.

Contents of abscesses often tinged with blood, have a more viscous consistence, while connective tissue or muscular substance is softened.

: Malignant pustule. Gl.

: Carbuncle. Gl.

Boils and ulcers.

: Confluent small-pox. Gl.

: Malignant external ulcerations; putrid bedsores; obstinate syphilitic sores attended with great fetor.

Ulcers often penetrate so deep as to lay bare the tendons and bone.

Ulcers deep, lard-like fundus, elevated, pectinated edges, slow healing, leaving a star-shaped white scar.

: Putrescence, destructive or quasi malignant ulceration, and tendency to decomposition of tissues.

! Malignant external ulcerations. Gl.

Ulcers have no disposition to heal, livid appearance.

Ulcers assume a corroded, chancroid character and a dirty white hue.

Ulcers enlarge, edges and base acquire an unhealthy aspect, pus offensive.

Sinuous and fistulous ulcers, secreting an offensive, watery pus, showing no tendency to throw out granulations.

Pustules appear gradually on every part of body.

Pustules contain caseous purulent contents.

Digitized by Google

Malignant, phagedenic skin diseases. Gl.
Pustular ringworm. Gl.
Lupus exedens.
Circumscribed or diffused lesions on skin.
Fluctuating tumors in muscular tissue.
Frequently upon the limbs nodular tumors discharging, on being opened, thick, purulent masses mixed with blood and serum.
Icterus appears before fatal termination.
Here and there healing by forming cicatricial tissue.

HYDRASTIS CANADENSIS.

Golden Seal; Orange Root. *Ranunculaceæ.*

Grows in most parts of the United States, in rich woodlands, most abundantly in the states of Ohio, Indiana, Kentucky and West Virginia.

The tincture is prepared from the fresh root.

This plant was first mentioned by Linnæus, in 1753. The first provings were made under Hale, by Nichols, Burt and others. (See Hale's New Rem.) About the year 1866, provings were made by Whitesides, Weaver and others (see Am. Hom. Obs.), and a year or two later Hydrastis was proved under Lippe by a class of students of the Hahnemann College of Philadelphia, with different dilutions, mostly the 30th.

A monograph on Hydrastis, by Chas. Mohr, was printed in the Hah. Mo., November, 1886.

CLINICAL AUTHORITIES.—*Ophthalmia*, A. H. O., vol. 3, p. 467; *Nasal catarrh*, Palmer, Raue's Rec., 1871, p. 65; Webster, Raue's Rec., 1871, p. 84; Moore, Times Retros., 1877, p. 26; *Diphtheritic deposit in nose and vagina*, Smith, A. H. [1] **Mind.** ‖Forgetful; cannot remember what he is reading or talking about.
‖Irritable; disposed to be spiteful.
‖Moaning, with occasional outcries from pain.
‖Despondency.
‖Depression of spirits, sure of death and desires it.

[2] **Sensorium.** ‖Feeling as if intoxicated; headache; weakness.

[3] **Inner Head.** ‖Dull, heavy frontal headache over eyes; catarrhal.
‖Dull frontal headache, with dull pain in hypogastrium and small of back.
‖Severe frontal headache.
‖Sharp cutting in temples and over eyes; < over left; > from pressing with hand.
‖Dull, pressing pain on top of head, pressing outward from ears, at 10.30 A.M.
‖Vertex headache in paroxysms, every other day, commencing about 11 A.M., with excessive nausea, retching and anguish.
‖Headache of a nervous gastric character, almost constant.
‖Frontal headaches; headaches arising from catarrh, gastric difficulties, indigestion, dyspepsia, acidity of stomach, as well as from bilious disorder, constipation, piles, uterine disorder, etc.

[4] **Outer Head.** ‖Myalgic headache, in integuments of scalp and muscles of neck.
‖Weeping eruption on forehead along margin of hair, after taking cold; < from warmth of room after having been in cold air; itching when warm; < washing. θEczema.

Digitized by Google

‖Scalp and face covered with thick crusts, which upon removal, expose red, raw and infiltrated patches. θEczema.
‖Scalp caked over with a thick, sebaceous secretion; hair dry and lustreless; debility and insufficient nourishment after typhoid fever. θSeborrhœa sicca.
‖Laceration of scalp above l. temple, several inches in length, crescentic in shape; wound suppurated and became a troublesome sore.

[5] **Sight and Eyes.** ‖Dark greenish yellow colored conjunctiva.
‖Jaundiced eyes.
‖Lack of accommodative power of eyes and asthenopia.
‖Opacity of cornea; scrofulous ophthalmia, with or without ulceration; thick mucous discharge.
‖Profuse secretion of tears; smarting of eyes; burning of eyes and lids.
‖Pain and burning in eyes.
‖Inflammation and ulceration of conjunctiva.
‖Acute catarrhal ophthalmia, the result of daily exposure to harsh dry winds; inflammation nearly extended to border of iris; lids greatly swollen and excoriated; profuse catarrhal secretion.
‖‖Ophthalmia: catarrhal; scrofulous; thick mucous discharge.
‖Chronic inflammation of eyes.
‖Mucous membrane of eyelids much congested; profuse, thick, white mucous discharge.
‖Discharge of matter from eyes, resulting from catarrhal inflammation.
‖Conjunctivitis siccus with sensation of dryness and scratching, and feeling of weight and heaviness of upper lids.
‖Blepharitis marginalis.
Large painful stye on l. lid.

[6] **Hearing and Ears.** ‖Deafness.
‖Roaring in ears, like from machinery.
‖Tinnitus aurium, from catarrh of inner ear.
‖Membrana tympani purplish and bulging.
‖Perforation of membrani tympani.
‖Mucous membrane of middle ear eroded, granular and exuberant with polypoid growths.
‖Purulent inflammation of middle ear, with thick, tenacious discharge, more mucus than pus.
‖Bland mucous discharge, associated with dropping in posterior nares.
‖Thick, offensive, irritating catarrhal and purulent discharges from external auditory meatus.

Digitized by Google

‖Otorrhœa, thick mucous discharge.
‖Ears red, thickened and covered with scales; skin back of each pinna red, thickened and fissured at their connection with side of head.

Smell and Nose. ‖Tickling, like a hair, in r. nostril.
‖The air feels cold in nose.
‖Stuffed up, smarting sensation in posterior nares, with discharge of thin, clear mucus.
‖Stuffiness of nares, and discharge of thick, white or yellow tenacious and stringy mucus, or frequent dropping down of mucus from posterior nares into throat.
‖Sharp, raw, excoriated feeling in both nares, with constant inclination to blow nose; hoarseness.
‖Posterior nares clogged with mucus.
‖Secretion, more from posterior nares, thick, tenacious.
‖Sneezing, with fulness over eyes, dull frontal headache, pain in r. breast and down arms.
‖Coryza watery, excoriating; burning in nose, more r. nostril; discharge scanty in room, profuse out of doors; rawness in throat and chest.
‖Coryza, with copious secretion of white mucus and tears.
‖Fluent coryza, followed by thick catarrhal discharge.
‖Bloody purulent discharge from nose.
‖Influenza in cold, weak, debilitated persons.
‖Catarrhal influenza.
‖Secretions so profuse as to be removed in long tenacious shreds or pieces.
‖Constant thick white mucous discharge, with frontal headache; discharge of yellowish stringy mucus into throat.
‖Constant discharge of thick white mucus from nose; coryza with frontal headache. θNasal catarrh.
‖Discharge of thick white mucus from nose; lachrymation; thickening of membrane of posterior nares; swelling of turbinated bones; large crusts forming in nasal fossæ; occasional thin mucous discharge; raw, smarting sensation in nostrils; pains in ears. θNasal catarrh.
‖Profuse discharge of thick, yellowish, stringy mucus from nasal passages.
‖Discharge of thick yellow matter from nose.
‖Chronic nasal catarrh.
‖Ozæna, with bloody, purulent discharge.
‖Obstruction of nasal passages.
‖Soreness of cartilaginous septum, bleeding when touched; inner edge of r. ala sore and thickened.
‖Nosebleed, l. nostril, with burning rawness; followed by itching.
‖After apparent recovery from diphtheria, formation of a

Digitized by Google

diphtheritic membrane in l. nostril and in vagina, the former being completely plugged up.

Diphtheritic affections of nose.

[8] **Upper Face.** Expression weary, dull, skin pale, or yellow-white.

Pale face, worn, weary expression.

Yellow complexion.

Erysipelatous eruption following flushes of heat.

Chills passing down back, followed by burning fever; pulse 120; headache in supraorbital region, excruciating pain in lumbar region; face red, l. side of nose swollen; great tenderness of cervical glands, urine high colored; inflammation passed from l. side of nose to r. ear, eye, scalp and whole face, r. eye being closed; extreme restlessness, disturbed by least noise; urine suppressed for twenty-four hours; delirium. θErysipelas erratica.

Left cheek swollen; l. eye closed; pain and burning, chills, flushes; pulse 100. θErysipelas.

Forehead, cheeks and nose slightly red and very greasy; follicles plugged with comedones; skin dirty in patches. θSeborrhœa oleosa.

Forehead, cheeks and chin covered with small red elevations with black points—acne punctata—and papulo-pustules; digestion feeble, bowels torpid.

Ulcer on nose and eyelid; base of ulcer of a dingy, reddish-yellow color, dry, glazed and free from granulations, and discharge but slight.

Itching, tingling and swelling of face. θSmallpox.

[9] **Lower Face.** Aphthæ on lips; tongue swollen.

Pimples about mouth and chin.

Epithelial cancer of lip.

Tenacious mucus hangs in shreds from mouth.

[10] **Teeth and Gums.** Gums dark red and swollen.

[11] **Taste and Tongue.** Taste: flat; peppery; bitter or saltish.

Tongue and lips parched, red and dry.

Dryness of tongue, with sensation as if it had been burned.

Tongue as if burned or scalded, later a vesicle on tip.

Tongue coated yellowish-white.

Tongue foul and coated with thick white fur.

Large, flabby, slimy looking tongue.

Tongue large and flabby, showing imprint of teeth. θStomatitis.

Tongue: swollen, showing marks of teeth; coated white, or with a yellow stripe.

Tongue raw, dark red, with raised papillæ.

Cancerous affections of tongue.

Digitized by Google

[12] **Inner Mouth.** ❙Excessive secretion of thick, tenacious mucus.

❙Gums and mucous membrane of mouth dark red and swollen; uvula relaxed and sore; hawking of large quantities of yellow tenacious mucus from throat, leaving a sensation of rawness.

❙Mucous membrane of fauces studded with round, protuberant spots of a red color, as if injected with blood, < from least exposure to cold.

❙Soreness and rawness of mouth, with raised papillæ and dark red appearance of mucous membranes.

❙Follicular and catarrhal ulcers with exceedingly tenacious mucus in mouth.

❙❙Stomatitis: after mercury or chlorate of potash; in nursing women or weakly children; with peppery taste; tongue as if burned, or raw, with dark red appearance and raised papillæ; during course of eruptive fevers.

❙Aphthous sore mouth.

❙Jaws set; liquids swallowed with difficulty; power of articulation lost; ulceration of mouth. θMercurial salivation.

❙Gangrenous sore mouth after abuse of mercury and chlorate of potash.

❙Syphilitic affections of mouth, throat and nares.

❙Syphilitic angina.

❙Dense, irregular tumor in hard palate, painful to touch, and somewhat elastic, disposed to bleed and to discharge offensive matter; climacteric. θCancer.

[13] **Throat.** ❙Uvula sore and relaxed.

❙Hawking of yellow tenacious mucus from posterior nares and fauces; rawness of fauces; ulcers in throat; after mercury and chlorate of potash.

❙❙Pain on swallowing as from excoriation.

❙Sensation of rawness in throat, after hawking up large quantities of tenacious mucus.

❙❙Tingling and smarting in throat.

❙Soreness of neck and throat, with relaxation of palate.

❙❙Great swelling, redness and itching, and great soreness of throat.

❙Sore throat arising from irritation of stomach and lower portion of œsophagus.

❙Sore throat from gastric derangement.

❙Ulcerated sore throat: with putrid odor; from salivation by mercury or after chlorate of potash.

❙Angina with ulceration, accompanying scarlatina.

❙Chronic angina, with round, protuberant red spots in throat, with sensation of roughness and stiffness when swallowing.

‖Chilliness although well covered; headache of a beating or darting character, and not confined to any one locality; stools consist entirely of blood; epistaxis. θDiphtheria.

‖Pseudo-membranes, or tenacious mucous secretions, resembling dipthheria, with or without ulceration.

‖Diphtheritic sore throat.

‖Syphilitic angina.

‖Syphilitic sore throat.

‖Results of mercurial salivation.

‖Chronic catarrhal affections of throat.

‖Follicular pharyngitis.

14 **Appetite, Thirst. Desires, Aversions.** ‖Anorexia.

‖Poor appetite, with constipation of seven or eight weeks' standing.

‖Little thirst, with loathing of food.

15 **Eating and Drinking.** ‖Indigestion from atony of stomach.

‖Bread, or vegetables cause acidity, weakness, indigestion.

16 **Hiccough, Belching, Nausea and Vomiting.** ‖Eructations putrid, or more commonly sour.

‖Vomits all she eats, except milk and water.

17 **Scrobiculum and Stomach.** ‖Sinking at epigastrium and palpitation of heart.

‖Violent pulsations in epigastrium, and palpitation of heart, with heavy, dull, hard thumping, fulness of chest and dyspnœa.

‖Even slight pressure of hand reveals strong pulsations in pit of stomach.

‖Feeling of weight in stomach and epigastrium.

‖Anorexia with dyspeptic feeling in epigastrium.

‖Pain at pit of stomach and extreme emaciation, with vomiting of all food save milk and water. θCancer of stomach.

‖Pains in stomach five or six years, then loss of strength, great sensitiveness of epigastric region, in which pulsations isochronous with pulse were perceived, and a flattened, resistant tumor of some two inches in diameter; in a few months pains became insufferable, loss of appetite and sleep alarming, frequent vomiting and great anguish about heart almost permanent; tumor pronounced scirrhous. θEpigastric tumor with marasmus.

‖Flat, resistant tumor, two inches in diameter in epigastrium, sensitive to pressure, pulsations synchronous with pulse, insufferable pains, frequent vomiting, loss of appetite, anguish about heart, sleeplessness, loss of strength. θCancer.

‖Faintness at stomach; sinking, gone feeling, with continued violent palpitation of heart.
‖Dull, aching pain in stomach, which causes a very weak faintish feeling, goneness in epigastric region; acidity; constipation.
‖Stomach actually sunken; weak, faint. θMarasmus.
‖Weight and fulness in stomach, or an empty, aching, "gone" feeling, more or less constant, < by a meal.
‖Food seems to lie heavy in stomach.
‖Pain in pit of stomach.
‖Acute, distressing, cutting pains in stomach.
‖Weakness of digestion, with heavy, dull, hard, thumping fulness of chest and dyspnœa.
‖Weakness of digestion, pale tongue, fulness and uneasiness in stomach after eating, weakness of body and limbs, with depression of spirits.
‖Weakness of digestion with debility, particularly in diseases from exhaustion, and in latter stages of nervous fevers.
‖‖Indigestion from an atonic state of stomach, with debility.
‖Indigestion, with acidity and general weakness.
‖Constant acid mucous vomitings; obstinate constipation; wretched nights; tongue coated; looks ill and pale; is thin and hysterical; pulse quiet; faintings every day from exhaustion; appetite good, but nearly all food returning intensely acid; no actual disease could be detected about her; has taken great quantities of acid and alkaline mixtures and has habitually used purgatives. θMucous irritation et morbus medicinalis.
‖Sympathetic affections of digestive organs arising from uterine disease.
‖Gastric disorders of intemperate people.
‖Flatulency, distension and painful digestion of dyspeptics.
‖Chronic gastric catarrh; chronic dyspepsia.
‖Gastro-duodenal catarrh; sense of sinking and prostration at epigastrium, with violent and continued palpitation of heart.
‖Chronic ulceration of mucous membrane of stomach.
‖Chronic affections of stomach, especially of mucous membrane.
‖Chronic inflammation of stomach.
‖‖Carcinoma, with emaciation; goneness.

" **Hypochondria.** ‖‖Fulness and dull aching in r. hypochondrium.
‖Torpor of liver, with pale, scanty stools.
‖Jaundice, with catarrh of stomach and duodenum.
‖Skin very yellow; stools white and frequent; urine very

Digitized by Google

dark; skin hot; tongue coated; great weariness and depression; legs anasarcous; bad nights; no appetite; slight difficulty of breathing; much fulness and tenderness over hepatic region; great aching in shoulder-blades. θSubacute inflammation of liver.

‖Severe pain in stomach and bowels; skin and eyes dark, greenish-yellow; urine very dark; feces light colored; great debility. θJaundice.

‖Jaundice from structural disease of liver.

‖Catarrhal inflammation of mucous lining of gall bladder and biliary ducts.

‖Functional disorders of liver in connection with intermittent fever.

‖Chronic derangement of liver.

‖Liver enlarged, indurated, nodulated, and sensitive to pressure; tumor in epigastrium as large as a hen's egg, doughy in consistency, and in centre a small spot as if filled with fluid; after eating, vomiting of food incorporated with sour, putrid mucus; thirst, loss of appetite, diarrhœa, weakness, emaciation, sleeplessness.

‖Liver atrophied. θMarasmus.

‖Sharp pain in region of spleen, with constant dull pain in stomach and bowels, with hot, burning sensation.

‖Severe cutting pains in splenic and cæcal regions, and in hypogastrium.

[19] **Abdomen.** Burning in region of navel, with goneness and faintness in epigastrium.

‖Severe cutting pain in hypogastric region, extending into testicle, occurring after stool, with faint feeling.

‖Sense of constriction in hypogastric region.

‖Loud rumbling, with dull aching in hypogastrium and small of back; < moving.

‖Flatulent colic, accompanied by faintness.

‖Flatulent colic; sensation of a lump of the size of a hen's egg, rising and falling in r. iliac and lumbar regions; sharp pains around umbilicus extending to l. ovarian and splenic regions; moaning with occasional outcries; very restless, no sleep; abdominal walls painful on pressure; discharge of flatulency, sounding like the report of a pistol; tongue and lips parched and dry; little thirst and loathing of food; constipation of bowels; offensive pus-like discharge from vagina; great tenderness of os uteri; countenance pale and haggard; hiccough; hectic fever; cold sweats and bedsores.

‖Cutting, colicky pains, with heat and faintness; constipation; > after passing flatus.

‖Colicky pains, with fainting turns and heat in bowels, following constipation.

Digitized by Google

‖Griping, with profuse light colored diarrhœa.
‖Griping, with light acrid stools.
‖Sharp pain in region of spleen, with dull pain and burning in stomach and bowels.
Pain in large intestines and rectum.
‖Sharp pain in cæcal region.
‖Sensation of great fulness in l. iliac region.
‖Dull dragging in groins, cutting pains extending into testicles.
‖Pains in groin, as if he had strained himself; clothing uncomfortable.
‖Intestinal catarrh, followed by ulceration.
‖Blenorrhœa of the intestines.
‖Chronic intestinal catarrh.
‖Chronic catarrhal or croupous enteritis.

[20] **Stool and Rectum.** ‖Urging to urinate, and sensation as if bowels would move, but only wind passes.
‖Discharge of flatus with great noise.
‖Fetid flatus.
‖Stools loose, soft, light colored, with flatus.
‖Soft stool, followed by severe cutting pain in hypogastrium, with dull aching in testicles and faintness.
‖Slimy, tenacious discharges with tenesmus; or when feces are in form of hard balls coated over with yellowish, tough mucus. θChronic enteritis
‖Stool: light colored, soft; acrid; greenish; lumpy, covered with mucus; hard, knotty.
‖Stools hard and nodulated, of a gray or brown color.
‖Constipation; feces like bullets.
‖One or two stools a week, very hard but of natural color.
‖Scanty stools occasionally, alternating with discharge of membranous casts.
‖Torpidity and want of desire for stool.
‖Constipation more from sluggish state of bowels than from diseased condition of system.
‖Obstinate constipation where catarrhal indigestion is coincident.
‖Obstinate constipation and its attendant dull headache in forehead; weak feeling in epigastric region; sour eructations and "dyspeptic cough," with copious expectoration of thick mucus.
‖Constipation of long standing, aggravated by cathartic medicines; patients weak and feeble; complexion sallow; tongue foul; pain in lower bowels and rectum; indigestion; stools hard and nodulated.
‖Constipation, one or two stools a week for eight years, and then only after use of purgatives; continual pain in head, especially in morning; bad taste in mouth with

Digitized by Google

coated tongue; pain in back and shoulders; sensation of constriction in hypogastric region, > only by purgation; yellow or rather bilious tint of face, skin smooth and dry; severe pain after each stool, which is hard and knotty, and of a brown color.

Constipation: headache and piles; after stools, for hours severe pain in rectum and anus; colic pains with fainting turns and heat in bowels; anæmia; remittent fever; after purgative medicines.

Three weeks after confinement was seized, while at stool, with severe burning, stinging pains in rectum and anus, lasting six to eight hours after each evacuation; and accompanied with a sensation of heat in intestines, colic pains and fainting; every week one or two very hard, but natural colored stools.

Sore neck, sore throat which is much relaxed and inflamed; headache; cough and expectoration; pain in side while stooping and rising from recumbent position; foul breath; tongue foul and coated with a thick white fur; appetite poor; constipated; after purgatives.

Constipation and hemorrhoids during pregnancy, with severe pain during stool, no hemorrhage.

Constipated habit since birth, after failure of cathartics and enemas.

Constipation: with piles; of hepatic origin; following rheumatic fever; the cause of other ailments.

After stool: long lasting pain in rectum; hemorrhoids and fainting; exhaustion.

Smarting, burning pains in rectum, during and after each stool.

Proctitis.

Ulceration of rectum, after bad cases of dysentery.

Prolapsus of rectum; simple prolapsus in children, with congestion and swelling of mucous membrane, and marked constipation.

Fistula ani with constipation, piles and ulceration.

Fissures and excoriations of anus.

Hemorrhoids, when a small loss of blood is followed by excessive weakness.

Painful hemorrhoids, with paroxysms of headache and constipation; severe burning, smarting pains in rectum, before and after each stool; colic pains, with attacks of faintness and heat in intestines, often follow evacuations, after a constipation of several days.

Hemorrhoidal swellings which bleed profusely at times; much prolapsus recti; offensive, dirty-looking, hemorrhoidal discharge from anus, obliging him to wear a bandage.

‖Piles and headache with constipation.

[21] **Urinary Organs.** ‖Dull aching in region of kidneys.
‖Catarrh of bladder, with thick, ropy, mucous sediment in urine.
‖Chronic cystitis; diabetes; gravel.
‖Symptoms of ulceration of bladder.
‖Difficulty in making water.
‖Suppression of urine.
‖Incontinence of urine.
Urine increased and of neutral reaction.
High colored urine which deposits a cloudy sediment while standing.
‖Urine smells as if decomposed.

[22] **Male Sexual Organs.** ‖Debility, after spermatorrhœa.
‖Spermatorrhœa, incipient stricture, chronic gonorrhœa, gleet, inflammation and ulceration of whole internal coat of bladder.
‖Gonorrhœa, second stage, thick, yellow discharge.
‖Long lasting gonorrhœa, accompanied by great moral and physical depression.
‖Acute or chronic gonorrhœa; feeling of debility and faintness after each passage from bowels.
‖Catarrh of urethra; after acute gonorrhœa, a gleety discharge remains; copious, painless, urethral discharge; spurious gonorrhœa; relaxation of urethral mucous membrane, and a consequent weeping, the discharge being almost watery in character.
‖Gleet with debility; copious, painless, sometimes thick discharge.
‖Dragging in r. groin to testicle, thence to l. testicle, thence to l. groin.

[23] **Female Sexual Organs.** ‖Aching pains in small of back at change of life; uterine affections, accompanied by debility and disorder of digestive functions.
‖Offensive, pus-like discharges from vagina.
‖Great tenderness of os uteri.
‖Discharge of tough, stringy mucus from os uteri.
‖Mucous leucorrhœa; uterine and vaginal catarrh.
‖Epithelial abrasion of os and cervix uteri and vagina, with superficial ulceration of parts.
‖Cervix uteri swollen, indurated and eroded.
‖Ulceration of os, cervix and vagina; leucorrhœa; debility; prolapsus uteri.
‖Hot, watery discharge from uterus.
‖Uterine diseases with sympathetic affections of digestive organs.
‖Uterine hemorrhage, menorrhagic form; bleeding excessive for ten days during each period, attended with

Digitized by Google

pain and anæmia; hemorrhage from fibroid tumor; congestive dysmenorrhœa; subinvolution of uterus; metritis; endometritis; menopause.

Metrorrhagia: consequent upon fibroid tumors; in girls fifteen to eighteen years of age; puerperal hemorrhages; endometritis.

Profuse menses for a year, flowing ten days or more; dysmenorrhœa; great prostration and anæmia.

After catching cold by getting feet wet during menstruation, severe pains in bowels and uterine region, "it felt like wind;" a lump, size of a hen's egg, rises and falls in r. iliac and lumbar regions; sharp pains around umbilicus, extending to l. ovarian and splenic region; continual moaning and distressing outcries; very restless; sleepless; abdominal walls painful to pressure; discharge of flatus which sounds like report of pistol.

Tongue and lips parched and dry; little thirst; loathing of food; constipation; injections per anum followed by bullet-shaped feces; offensive, pus-like discharge from vagina; great tenderness of os uteri; pale and haggard; hiccough; hectic fever; cold sweats; bedsores. ♂Uterine affections.

Regurgitation of food by mouthful, without nausea, which, however, affords relief; despondent and gloomy; when food is retained suffers from headache, palpitation of heart and nervousness, or restlessness; bad taste in throat from breath; mouth very dry in morning, and tongue thickly coated; sour risings from stomach; great quantities of wind in stomach causing distress until discharged; after eating must keep quiet or she becomes feverish and distressed; pain in bowels three or four hours after eating with inclination to stool; pain and soreness of liver; after dinner nervous and irritable, cannot bear to be spoken to; becomes so nervous that to hear any one speak is unbearable and head aches intensely; on closing eyes sees sparks and light spots; pain in and over eyeballs; pain on opening eyes; cannot sleep until after midnight; epigastric region very tender to touch; sensation as of a tight band around waist, < at night; constant coldness of hands, feet and limbs while head is hot; constipation, feces at first dry and lumpy, afterwards like white of egg; great straining at stool; nosebleed before menses; menses delayed, preceded and accompanied by severe pains in back and headache; constant, acrid, corroding leucorrhœa < ten days after menses cease; when standing feels as if everything would fall out; very tender about vulva; discharge like white of egg, coming on immediately after

Digitized by Google

menses cease, lasting ten days or longer, profuse and debilitating; severe pain in small of back and in back part of legs; pain in inside of legs above knees; coition very painful, with almost constant desire, especially during the time she has "white of egg" discharge, amounting to furor uterinus; after coition prostration and distress in stomach; commences at once to spit up the last meal, or has taste of it in mouth; the "white of egg" discharge usually becomes red, bloody fluid, and soon as it ceases she becomes irritable and angry with every one, and cannot endure idea of coition, any reference to it making her angry; constant desire to pass water, and when a little is passed she is relieved, and it seems to her that if she could pass a great quantity of water she would feel still better; in morning this desire is less; at times, discharges of hot water from womb, which is so profuse as to wet bed and all her clothes; uterus prolapsed; os indurated and congested; all symptoms > by lifting womb into place and holding it there; > in recumbent posture.

‖Tenacious, viscid leucorrhœa, uterine or vaginal.

‖Mucous leucorrhœa, discharge hanging from os in long viscid strings.

‖Yellow, tenacious leucorrhœa, long threads or pieces in it; sometimes offensive.

‖‖Leucorrhœa tenacious, ropy, thick, yellow.

‖Leucorrhœa complicated with hepatic derangement and constipation.

‖Pruritus vulvæ, with profuse leucorrhœa; sexual excitement.

‖Lancinating pain in breast, extending up to shoulder and down arms.

‖Pain in l. breast, so bad as to prevent all rest at night.

‖Pain in breast, almost unbearable, causing a worn and haggard appearance of countenance.

‖Pains accompanying cancer in breast.

‖Scirrhous tumor of l. breast; hard, heavy and adherent to skin, which is dark, mottled and very much puckered, the nipple being retracted; pains like knives thrust into the part; cachectic appearance of face.

‖Stony hard, nodulated tumor in l. breast, unattached to skin, perfectly movable and as large as a filbert; lancinating pains.

‖Cancer of l. breast as large as a small egg, with retraction of nipple.

‖Hard, irregular enlargement of l. breast; nipple retracted, and glands of l. axilla enlarged and painful; mother had died of cancer of tongue. θCancer.

Digitized by Google

‖Irregular nodule of scirrhus of mamma, with retraction of nipple; enlargement of axillary glands; health poor; sallow complexion.

‖Epithelioma of mamma.

In a case of open cancer of l. breast, which had been ulcerated for four or five years, it diminished the ulcerated surface, which was as large as half crown, to a size not as large as a pea.

‖In open cancer of r. mamma, relieved the constant burning pain and favored healing, healthy granulations making their appearance.

[24] **Pregnancy. Parturition. Lactation.** ‖Sore mouth of nursing women; tongue large, and retains the impression made by teeth.

‖Abraded, cracked and sore nipples of nursing women.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Scraping in larynx.

‖Cough, with rawness of larynx; tingling and smarting in throat; hawks up tenacious, yellow or white mucus; pain on swallowing as if throat were excoriated; cough rough, harsh and rattling, and continued day and night; abdominal congestion. θLaryngo-tracheitis. θBronchitis.

‖Bronchial catarrh of old people, with debility, loss of appetite, and a general cachectic condition.

‖Catarrhal cough of long standing, with febrile symptoms in evening and night, with debility in children.

‖Rough, harsh and rattling cough, day and night.

[27] **Cough.** ‖Dry, harsh cough, from tickling in larynx.

‖Chronic catarrhal cough, with febrile paroxysms in evening and night, with debility; cough rough, harsh and rattling, continued day and night.

‖Chronic cough, accompanied by febrile paroxysms evenings and night, and excessive prostration; sputa thick, yellowish, very tenacious, stringy and profuse.

‖Old man's cough; senile catarrh.

[28] **Inner Chest and Lungs.** ‖Rawness, soreness and burning in chest.

‖Bronchitis of old, exhausted people; thick, yellow, tenacious, stringy sputa.

‖Phthisis, to relieve goneness in stomach, emaciation, loss of appetite.

‖Cancer of r. lung, with nodules in external walls of chest (relieved).

[29] **Heart, Pulse and Circulation.** ‖Palpitation, with faintness.

‖Dyspnœa, with heavy beating of heart.

‖Intermittent pulsation of heart.

‖Palpitation of heart, with heavy, dull, hard, thumping

Digitized by Google

fulness of chest and dyspnœa, in connection with dyspepsia.

‖Palpitation, pain shooting from chest to l. shoulder, with numbness of arm; irregular, and at times labored action of heart; cannot lie on either side; feeling of immediate suffocation on attempting to lie on l. side; unable from weakness and dizziness to sit in erect posture; sounds of chest dull on percussion; heart has a muffled sound, as if laboring in a sac of water; a blowing and rushing sound in under portion, and peculiar noise at each stroke, like striking knuckle against a hard substance; swelling of abdomen, particularly upper portion; œdema of legs; urine scanty and turbid; constipation; tongue yellowish-white; no appetite; food causes nausea; frequent sinking spells. θHeart disease.

‖Pulse slow, during the chill.

30 **Outer Chest.** ‖Pain in r. breast and down arm.

‖Thoracic or intercostal myalgia.

31 **Neck and Back.** ‖Ulcers under r. and l. inferior maxilla from broken down lymphatic glands.

‖Chronic suppuration and swelling of cervical glands; great weakness. θScrofula.

‖Excoriations in folds of skin of neck. θIntertrigo.

‖Muscles of neck feel sore.

‖Pain in back and shoulders.

‖Aching pain in small of back in women, at change of life.

‖Debility and weakness in back and lower limbs, > by walking about.

‖Tired aching across small of back and in limbs; knees ache.

‖Stiffness in muscles of lumbar region while bending over for a short time, causing great difficulty when assuming an erect posture; dull, heavy, dragging pain and stiffness of back, especially across lumbar region, necessitating use of arms to rise from a seat; must walk about some time before being able to straighten up.

32 **Upper Limbs.** ‖Pain from head to shoulders, with aching in both, more the left.

‖Rheumatic pains in elbow, forearms, right shoulder and first finger of l. hand.

‖Right arm, from tips of fingers to shoulder, greatly swollen, and one mass of sores, discharging fetid pus; glands in axilla tender and swollen; elbow enlarged and full of sores; exceedingly weak and nervous, owing to severe pain and constant loss of sleep; emaciation.

Small boils, two or three inches apart on hands, arms and shoulders, some papular with inflamed area, others pustular.

Digitized by Google

Ulcer from a burn, on back of hand, greatly inflamed and very painful; could hardly move wrist.

[35] **Lower Limbs.** Pain from r. hip to knee, while walking; cannot stand or bear one's weight.

Legs feel weak; knees weak; aching.

Outer part of l. knee aches while sitting, < when walking.

Erysipelas of lower extremities.

Bright efflorescence from patella to bend of foot; scaly skin slightly broken here and there, having in some places a jagged and cracked appearance; slight serous moisture; intolerable itching.

Irritable and indolent ulcers on legs.

Atonic old ulcers on legs.

Scrofulous ulcers on leg and foot.

Ulcers on both legs resulting from injuries.

Dry, superficial, angry looking ulcers on legs; covered by a yellow scab; stinging burning pain; areola inflamed, and covered by pimples, which frequently degenerate into ulcers; faint fetid odor; circular shape with flat edges; one of ulcers had high and thick edges; no pus; < at night also from warmth of bed, on motion, or on touching them; l. side.

Three large ulcers each one of which seems to belong to a separate class, around r. ankle; one in front is circular with high elevated edges slightly rounded, surrounded by inflamed skin; irregular base, bleeds readily and discharges a thin corrosive ichor; one on outside is circular, with clean, sharp cut edges, deep, smooth, shining base, but with ichorous discharge; inside one is largest, ragged, irregular and deep; rough base; high, rounded and swollen edges at upper part, well defined at the lower; discharge of grayish, putrid, thick pus and has one or two patches of large, flabby, pale granulations; pain from motion and from warmth of bed; on stepping on ground pricking sensation in sores, and on sitting down to rest after motion, shooting or lancinating ain in ulcers.

Extensive œdema of foot and ankle.

Aching in sole of l. foot; no > from change of position.

Dorsal surface of feet red, infiltrated, especially about toes, between which are deep fissures; aggravations from ointments; poor digestion; constipation alternating with diarrhœa.

Hard, nodulated tumor as large as a walnut on dorsum of foot; occasionally painful.

Scrofulous ulcers in hollow of sole of foot, and over tarsal and metatarsal bones, discharging pus and sanious matter; loss of appetite; pale face; melancholia.

Digitized by Google

[34] **Limbs in General.** ‖Limbs tired and aching. θCoryza. ‖Shifting pains in r. arm and leg, then l. leg.

[35] **Rest. Position. Motion.** Lying: on l. side causes feeling of immediate suffocation; cannot lie on either side.
Recumbent position: > womb complaints.
Sitting: outer part of l. knee aches after motion; shooting pains in ulcers; in erect posture, dizziness.
Standing: feels as if everything would fall out.
Dull, heavy, dragging pain and stiffness of back especially across lumbar region, necessitating use of arms to rise from a seat; must walk about some time before being able to straighten up.
Rising from recumbent position: pain in side.
Stooping: pain in side; causes stiffness of muscles in lumbar region.
Walking: weakness in back and lower limbs; pain in r. hip and knee; outer part of l. knee aches.
Moving: < rumbling in abdomen with dull aching in hypogastrium and small of back; can hardly move wrist on account of ulcers; ulcers on legs <.

[36] **Nerves.** ‖Frequent sudden attacks of fainty spells, with profuse cold sweat all over. θCancerous ulcers on l. side of throat, inside.
‖Cachectic condition with loss of appetite and fainting.
‖After measles, great emaciation, depression of spirits; easily excited to anger; liver reduced in size; urine scanty and high colored. θMarasmus.
‖General debility.
‖Debility from gastric, bilious and typhoid fevers.
‖Faintness, goneness, great weakness and physical prostration.

[37] **Sleep.** ‖Awakened by backache and dull pains in navel and hypogastric region.
‖Dreams worrisome; restless sleep.
‖‖Difficulty in awaking.

[38] **Time.** Morning: continual pain in head; mouth very dry; desire to pass water >; chill.
10.30 A.M.: dull, piercing pain on top of head, outward from ears.
Day: cough.
Evening: febrile symptoms; chill; dull, burning pain.
10 P.M.: great heat of whole body.
Night: feeling of tight band around waist <; cannot sleep on account of pain in l. breast; cough; febrile symptoms; ulcers on legs <; chilliness; delirium; erysipelatous rash; pains <.
Before midnight: cannot sleep.

[39] **Temperature and Weather.** Warmth: < weeping erup-

tion on forehead after having been in cold air; causes itching; ulcers on legs.
In room: discharge scanty from nose.
Washing: < eruption on forehead.
Getting feet wet during menses: severe pain in bowels.
Harsh, dry winds: cause acute catarrhal ophthalmia.
Out of doors: discharge from nose profuse.

[40] **Fever.** ‖Chill morning or evening; chilliness, especially in back or thighs, with aching, or around shoulders and chest; pulse slow.
‖Chilliness at night.
‖Heat, in flushes, over face, neck and hands.
‖Great heat of whole body, dull, burning pain all evening.
‖Great heat of whole body, at 10 P.M., followed by great debility.
‖Profuse, offensive sweat of genitals.
‖Gastric, bilious or typhoid forms of fever, with gastric disturbances, jaundice and great debility following.
‖Fevers which do not reach a high grade of inflammatory action, but which are attended with gastric and bilious disturbances, or complicated with jaundice, and the deleterious effects of mercury or quinine.
‖Intermittent fever: cachectic subjects; gastric and hepatic symptoms, showing atony and torpor; vertex headache in paroxysms every other day, commencing at 11 A.M., with excessive nausea, retching and anguish.
‖Quotidian fevers, with gastric disturbance; jaundice.
‖Catarrhal symptoms which frequently precede measles; also favors development of eruption.
‖Typhoid fever with characteristic temperature; for days before attack feeling of entire goneness in pit of stomach, with no desire for food; abdominal tenderness, gurgling in ileo-cæcal region, with bloated abdomen; delirium at night; a feeling that he could not recover.
‖Typhoid fever; retarded convalescence; will eat nothing; tongue large, flabby, thickly coated, and shows imprint of teeth; bowels constipated; urine scanty; copious sweats; sleeplessness.
‖Hectic fever.

[41] **Attacks, Periodicity.** Every day: faintings.
For hours: after stool, severe pain in rectum.
Three or four hours after eating: pains in bowels.
Twenty-four hours: urine suppressed.
Every other day: vertex headache at 11 A.M.
For days before attack of typhoid fever: feeling of entire goneness in pit of stomach.
For ten days: excessive bleeding, uterine hemorrhage; after menses leucorrhœa <.

Digitized by Google

Three weeks after confinement: seized after stool with severe burning, stinging pains in rectum and anus, lasting six or eight hours after each evacuation.
For a year: profuse menses flowing for ten days.
For four or five years: open cancer of l. breast.
For eight years: one or two stools a week.

" **Locality and Direction.** Right: tickling like a hair in nostril; pain in breast; burning in nostril; inner edge of ala nasi sore and thickened; inflammation in ear; eye closed from inflammation; dragging in groin to testicle; lump rising and falling in iliac and lumbar region; fulness and dull aching in hypochondrium; open cancer of mamma; cancer of lung; pain in breast and down arms; ulcer under inferior maxilla; rheumatic pains in shoulder; arm greatly swollen; pain from hip to knee; three large ulcers around ankle; shifting pains in leg and arm.

Left: sharp cutting over eyes <; laceration of scalp above temple; stye on lid; nosebleed l. nostril; formation of diphtheritic membrane in nostril; side of nose swollen; inflammation from nostril to r. ear; dragging in testicle to groin; sharp pain extending to ovarian region; fulness in iliac region; scirrhous tumor of breast; stony hard nodulated tumor in breast; cancer of breast; hard, irregular enlargement of breast; glands of axilla enlarged and painful; open cancer of breast; pain shooting from chest to shoulder; ulcer under inferior maxilla; aching in shoulder; rheumatic pains in first finger of hand; outer part of knee aches; ulcers on legs; aching in sole of foot; cancerous ulcer on side of throat.

Shifting pains from r. leg to left.

" **Sensations.** As if intoxicated; tickling like a hair in r. nostril; as if tongue had been burned; pain on swallowing as from excoriation; food seems to lie heavy on stomach; small spot in epigastric tumor as if filled with fluid; as if a lump of size of a hen's egg rising and falling on r. iliac and lumbar regions; pains in groins as if he had strained himself; pain in uterine region felt like wind; as of a tight band around waist; as if everything would fall out when standing; as if knives were thrust into breast; as if throat was excoriated.

Pain: in eyes; over eyeballs; in r. breast and down arms; in ears; at pit of stomach; in large intestines; in rectum; in groin; in back; in shoulders; in bowels; in liver; on opening eyes; in l. breast; from head to shoulders; from r. hip to knee.

Insupportable pains: in epigastric region.

Excruciating pain: in lumbar region.

Digitized by Google

Intense pain: in head.
Severe pain: in forehead; in stomach and bowels; in abdomen after stool; in rectum and anus; in uterine region; in back; in small of back; in back part of legs.
Lancinating pain: in breast extending up to shoulder and down arms; in ulcers.
Cutting pains: from groins into testicles.
Acute, distressing, cutting pains: in stomach.
Sharp cutting: in temples; in splenic and cæcal regions; in hypogastric region, extending into testicle; in lower bowels and rectum; on inside of legs above knees.
Cutting, colicky pains: in abdomen.
Sharp pains: in region of spleen; around umbilicus; extending to l. ovarian and splenic regions; in cæcal region; around umbilicus.
Great anguish: about heart.
Shooting pains: from chest to l. shoulder; in ulcers.
Darting pain: in head.
Griping: in abdomen.
Beating pain: in head.
Stinging pains: in rectum and anus; in ulcers on legs.
Severe burning pain: in rectum.
Pricking pains: in ulcers.
Rheumatic pains: in elbow, forearm, r. shoulder and first finger of l. hand.
Shifting pains: in r. arm and leg, then l. leg.
Continual pain: in head.
Tired aching: across small of back; in limbs.
Aching: in shoulder-blades; in small of back; in knees; in head and shoulders; in outer part of l. knee; in soles of l. foot.
Dull dragging: in groins; from groin to r. then to l. testicles across lumbar region.
Dull, aching pains: at stomach; in r. hypogastrium; in hypogastrium and small of back; in region of kidneys.
Dull, burning pains: all over body.
Dull, heavy frontal headache.
Dull pain in hypogastrium; in small of back; on top of head; in stomach and bowels; in navel.
Fulness: over eyes; of chest; of stomach; of r. hypogastrium; in hepatic region; in l. iliac region.
Great sensitiveness: of epigastric region.
Tenderness: of cervical glands; over hepatic region; of os uteri; of abdomen.
Soreness: of cartilaginous septum; of inner edge of r. ala; of uvula; of mouth; of neck and throat; of liver; of nipple; in chest.
Pricking sensation: in ears.,
Burning heat: of skin.

Digitized by Google

Burning: of eyes and lids; in nose; in r. nostril; l. nostril; in stomach; in bowels; in region of navel; in rectum and anus; in chest; in ulcers; on legs.
Heat: in intestines; of whole body.
Smarting: of eyes: in posterior nares; in nostrils; in throat; in rectum.
Sharp, raw, excoriated feeling: in both nares.
Sensation of roughness and stiffness: on swallowing.
Scraping: in larynx.
Rawness: in nares; in throat and chest; of l. nostril; of mouth; of fauces; of larynx; in chest.
Tickling: in r. nostril.
Tingling: of throat.
Dryness: of upper lids; of tongue.
Constriction: in hypogastric region.
Stuffed up sensation: in posterior nares.
Heaviness: of upper lids.
Weight: in stomach and epigastrium.
Roaring: in ears.
Stiffness: in muscles of lumbar region.
Numbness: of arm.
Faintness: at stomach; in hypogastrium.
Goneness: at epigastrium; in pit of stomach.
Debility: in back and lower limbs.
Weakness: of body and limbs.
Itching: of l. nostril; of face; of throat; of foot; of skin.

" **Tissues.** ‖Great emaciation; weight reduced 70 pounds; very moody and depressed in mind; averse to conversing; at times so excited as to curse his mother for the least thing, and throwing food or medicine across room; liver atrophied, not more than two-thirds the natural size; kidneys affected, urine scanty and high colored. θGeneral marasmus.
‖Small wounds bleed much.
‖General anasarca; great difficulty in passing water, which is high colored and deposits a cloudy sediment on standing; constipation.
Mucous membranes: secretions increased, tenacious, ropy; erosions.
‖Catarrhal affections: in patients of a cachectic habit.
‖‖Muscles greatly weakened; atony.
‖Marasmus; scrofula; cancer cachexia.
‖Cancers: hard, adherent, skin mottled, puckered; cutting like knives; in mammæ.
In cancer it removes the pain, modifies the discharge, depriving it of its offensiveness, and improves the general health in a marked degree.
In early stage of scirrhus, and chiefly when its situation is in a gland or in the immediate vicinity of a gland.

Digitized by Google

Stage of degenerative softening in scirrhus.

45 **Touch. Passive Motion. Injuries.** Touch: causes bleeding of cartilaginous septum which is sore; epigastric region very tender; ulcers on legs <.

Pressure: cutting over eyes >; abdominal walls painful; liver sensitive; of hand > head; clothing feels uncomfortable about groins.

46 **Skin.** Skin jaundiced, of a dark greenish-yellow color.

Skin of a dark purplish hue, with heat and tingling, < from motion.

Hot, dry skin, with fever.

Burning heat and itching of skin.

Itching in small-pox.

Yellowish looking vesicles, filled with a limpid fluid.

Hyperidrosis; excessive sweat of axillæ or about genitals; offensive.

Obstinate excoriations of skin, intertrigo, in children.

Nettlerash from head to foot, next day face affected, and through scratching became much swollen; lids puffed; itching, burning and stinging, < at night; rash resembled scarlatina, both in color and in disappearing a long time on pressure.

Erysipelatoid rash on face, neck, palms, joints of fingers and wrist, with maddening, burning heat, later skin exfoliates; pains < at night.

Fissures around mucous outlets, as on lips, about anus, or on flexor surfaces, and between fingers and toes of syphilitic subjects, who have used too much mercury or iodide of potash; debilitated subjects, broken down by excessive use of alcohol.

Margins around anus thickened and fissured, fissures extending into mucous membrane.

Ulcers with indolent granulations; unhealthy and scanty pus; scrofulous or cachectic persons.

Chronic ulcers arising from contusions, incised and lacerated wounds, burns, scalds, or some disease of skin.

Ulcers following removal of tumors, pricking pain on motion of part.

Bedsores.

Small-pox; itching; tingling of skin; great redness, swelling and aching of skin; very sore throat; intense aching in small of back and legs; pustules dark; ulcers in mouth and fauces; sleeplessness.

Variola, itching tingling of eruption: face swollen; throat raw; pustules dark; great prostration.

Face greatly swollen, eyes closed, nose enormously large and entirely stopped up; throat very sore; pustules dark; almost unconscious, having no hope of recovery θSmall-pox.

Digitized by Google

Face covered with a fine rash which subsequently proved to be confluent small-pox; face greatly swollen, eyes closed; throat sore.

In small-pox it relieves the irritation almost instantly, removes the swelling, diminishes the odor, obviates secondary fever, prevents pitting to very great degree, and destroys the contagious character of the disease.

Lupus; lupus exedens and ulcerative stage of leprosy.

Stages of Life, Constitution. Weakened, debilitated subjects, with mucous discharges.

Cachectic persons, with marked disturbance of gastric and hepatic functions.

Scrofulous diathesis.

Old people.

Child, æt. 1; constipation.

Boy, æt. 6, light complexion, light curly hair, had not been vaccinated; small-pox.

Girl, æt. 8, after a fall; lacerated wound of scalp.

Little girl, after burn; ulcer on back of hand.

Girl, æt. 14, as she was about recovering from an attack of diphtheria; diphtheritic deposit in nose and vagina.

Man, æt. 18, cachectic, consumptive appearance; scrofulous ulcers on leg.

Woman, æt. 20, brunette, black eyes, delicate features, but strong and energetic, two months pregnant with third child; constipation and hemorrhoids.

Woman, æt. 21, mother of one child, nervous temperament, blue eyes, light hair, has prolapsus uteri and leucorrhœa of several years standing; uterine affection.

Unmarried woman, æt. 22; cancer of breast.

Man, æt. 22, after measles two and one-half years ago; marasmus.

Miss ——, æt. 25, a teacher, was given up by the old school; cancer of stomach.

Married woman, æt. 26, light hair, pale complexion, feeble constitution, tea drinker, has suffered for twelve years; headache and constipation.

Young unmarried woman, for two years under allopathic treatment; cancer of breast.

Sanguine young lady, after confinement; sore mouth.

Unmarried woman; erysipelas.

Man, suffering from itch, for which corrosive sublimate was used; salivation.

Man, æt. 28, blue eyes, light hair, unmarried, of dissipated habits, has had three epileptic seizures, has had gonorrhœa three times; gonorrhœa.

Man, æt. 29, after habitual use of purgatives; constipation.

Woman, æt. 29, mother of two children, habitually takes castor oil and senna; constipation.

Digitized by Google

Colored woman, æt. 30, next day after confinement; small-pox.

Woman, æt. 32, blue eyes, light hair, delicate skin, mother of two children, has used tea and coffee for fifteen years; suffering for three years; hemorrhoids.

Man, æt. 32, mason, three years ago fell from a scaffold and injured r. arm; ulceration of arm.

Man, æt. 35, mill operator, habits moderately temperate; ulcers on leg.

Mrs. J., æt. 37, laundress, health good; tumor in l. breast.

Woman, æt 38, bilous temperament, dark hair, suffering eight years, has taken much purgative medicine· constipation.

Man, æt. 40; jaundice.

Man, æt. 40, railroad engineer; small-pox.

Woman, æt. 45; cancerous tumor.

Man, æt. 46, during Crimean campaign was attacked with rheumatic fever, consequent upon exposure; anasarca and constipation.

Woman, æt 50, has suffered many years; cancer (improved).

Woman, single, æt. 52, of phthisical family, ill fourteen years, but always delicate; dyspepsia.

Mrs. D., æt. 55, suffering two years; tumor on foot.

Woman, æt 60, widow, seven children, previously stout and healthy, after getting wet one year ago, affection of liver for which she was leeched, blistered and salivated, since which she has not been well; subacute inflammation of liver.

Woman, æt. 70; sore leg.

Man, æt. 70; epigastric tumor.

[48] **Relations.** Antidoted by: *Sulphur* (head symptoms and sciatic pains).

It antidotes: *Mercur.* and chlorate of potash.

Compare: *Amm. mur., Ant. crud., Kali bich., Pulsat.* (action on mucous membranes); *Aloes., Collin., Sepia, Sulphur* (action on lower bowels); *Berber., Digit., Gelsem.* (gastro-duodenal catarrh involving bile ducts); *Nux vom.* (gastric catarrh of alcoholism); *Amm. mur., Graphit., Nux vom.* (constipation); *Ant. crud.* (indigestion); *Kali bich.* (otorrhœa); *Arsen., Merc. corr., Euphras.* (ophthalmia); *Arg. nitr., Kali bich.* (nasal catarrh); *Hepar* (syphilitic ozæna after abuse of mercury or iodide of potash); *Aloes, Sulphur* (cough with abdominal congestion); *Arsen., Aurum mur., Hydrocotyle, Kali bich.* (lupus); *Ant. tart., Baptis, Thuja* (variola); *Thuja* (epithelioma); *Arsen., Baptis., Conium, Condur., Kreos., Phytol., Trifol. prat.* (cancer of mammary glands); *Cinchon.* (intermittents); *Strychnia* (action on spinal cord).

HYDROCOTYLE ASIATICA.

Indian Pennywort. *Umbelliferæ.*

A small plant long known as an Indian remedy, growing in India and Southern Africa. First employed by Boileau in the treatment of leprosy.

Experiments by Andouit; see Allen's Encyclopedia, vol. 4, p. 625.

CLINICAL AUTHORITIES.—*Lupus exedens of nose*, Andouit, B. J. H., vol. 16, p. 585; *Lupus, tuberculous, erythematic*, Martin, Hom. Rec., vol. 2, p. 177; *Ulceration cervix uteri*, Andouit, B. J. H., vol. 16, p. 588; *Pruritus vaginæ*, Andouit, B. J. H., vol. 16, p. 588; *Eczema*, Andouit, B. J. H., vol. 16, pp. 586–87; *Lepra tuberculosa*, Andouit, B. J. [1] **Mind.** Gayety or gloomy thoughts.
[2] **Sensorium.** ‖Vertigo.
[4] **Outer Head.** Intense pain with some tumefaction in posterior portion of skull; occiput acutely sensitive, especially to touch.
Tinea favosa; painful constriction of posterior and superior integuments of skull; general lassitude and prostration.
[5] **Sight and Eyes.** ‖Tumors of lid, especially in epithelioma.
[6] **Upper Face.** ‖Copper colored eruption on face; large tubercle on r. alæ nasi, as large as sixpence, and covered with a thick crust, under which yellowish matter mixed with blood; edges of ulcer irregular and livid; five other tubercles, as large as lentils, near root of nose at both sides, and painless. θLupus exedens.
‖Papular eruption on face.
‖Neuralgic affections of supra and infraorbital nerves.
[10] **Inner Mouth.** ‖Stomatitis aphthosa.
‖Syphilitic patches in mouth.
[11] **Appetite, Thirst. Desires, Aversions.** ‖Loathing of food.
[13] **Hypochondria.** ‖Cirrhosis of liver; hypertrophy and induration of connective tissue; obstruction in whole hepatic region; slight pain in upper portion of liver: crampy pains in stomach, without nausea.
[19] **Abdomen.** ‖Flatulent colic.
[20] **Stool and Rectum.** ‖Constipation.
[21] **Male Sexual Organs.** ‖Acute and secondary gonorrhœa.
‖Gonorrhœa, which had been suppressed for fifteen years.
[23] **Female Sexual Organs.** Dull pain in region of ovary.

Digitized by Google

Pains in uterus, especially of l. side.
Violent pains in uterus and neighborhood, like labor pains.
‖ Uterus feels heavy.
‖ Redness of os uteri and cervix.
❙ Partly fungous, partly granular ulcer on upper lip of neck of uterus, with profuse leucorrhœa.
❙ Granular ulceration of entire neck of uterus, which is very red; prolapsus of uterus; profuse leucorrhœa.
Menses too early.
❙ Deep seated heat in vagina; shooting and itching in orifice.
❙ Insupportable itching of vagina.
‖ Heat and redness of vagina and vulva.
❙ Profuse leucorrhœa.

[29] **Heart, Pulse and Circulation.** ‖ Alleviated the sufferings in stenosis of aorta.

[30] **Outer Chest.** ❙ Two small pustules on chest.

[31] **Neck and Back.** ‖ Swelling of lymphatic vessels of neck.
❙ On lower third of inner surface of l. loin a large oval patch, about four and three-fourths inches in length, covered with a powder resembling pulverized chalk; the edges of a yellowish color; small eruption having the appearance of millet.

[33] **Lower Limbs.** ❙ Yellowish spots on legs.
❙ Insupportable itching of soles of feet.
❙ Back of r. foot, over a space of two inches in diameter, was covered with small indurations, having a large thick crust, some grayish-white, others light yellow, the whole resting on a purple base. *θ* Tuberculous, erythematic lupus.

[36] **Nerves.** ❙ General weariness.
❙ Depression, heaviness and dull feeling.
❙ Bruised feeling in all the muscles.
Hyperæmia of nervous centres.
Acts especially upon nervus trigeminus.

[42] **Locality and Direction.** Right: large tubercle on alæ nasi; back of foot covered with small indurations.
Left: pains in side of uterus.

[41] **Sensations.** Pains: in uterus.
Intense pain: in posterior portion of skull.
Violent pains: in uterus and neighborhood.
Shooting: in orifice of vagina.
Crampy pains: in stomach.
Neuralgic affections: of supra and infraorbital nerves.
Gout: with very severe paroxysms.
Dull pain: in region of ovary.
Slight pain: in upper part of liver.
Painful constriction: of posterior and superior integuments of skull.

Digitized by Google

Acute sensitiveness: of occiput.
Bruised feeling: in all muscles.
Deep seated heat: in vagina.
Heavy feeling: of uterus.
Insupportable itching: in orifice of vagina; of vagina; of soles of feet.

" **Tissues.** ‖Rheumatic disorders.
‖Gout with very severe paroxysms.
‖Gangrene in newly formed flap on little finger.
‖Syphilitic affections of skin and mucous membranes.

" **Touch. Passive Motion. Injuries.** Touch: occiput acutely sensitive.

" **Skin.** ‖Intolerable itching in several places.
‖Pricking on different parts.
‖Erysipelatous redness.
‖Eczema.
‖Three spots, almost completely circular, with slightly raised, scaly edges.
‖Pemphigus benignus.
‖Lepra tuberculosa, especially in face, abdomen, thighs and genitals; in latter there was a large tubercle, secreting a reddish pus.
‖Arabian elephantiasis.

" **Stages of Life, Constitution.** It had a beneficial effect in fifty-seven cases of leprosy treated by Boileau.
Boy, æt. 15; lupus, tuberculous and erythematic, on r. foot and l. loin.
Man, æt. 16, has never suffered either from syphilis or scrofula, has lived for a long time in a damp dwelling, suffering about six months; lepra tuberculosa.
Young woman, æt 20, delicate, weakly, during childhood suffered frequently from swelling of glands, mother has a copper colored eruption on face; suffered for eight years; lupus exedens of nose.
Man, æt 22, after an operation; gangrene of flap.
Lady, æt. 30, suffering for two months; pruritus vaginæ.
Woman, æt. 34, childless, tolerably robust constitution, melancholic, skin yellow, has suffered much from grief; ulceration of cervix uteri.
Woman, æt. 40, melancholic temperament, mother of three children; affection of uterus.
Married woman, æt. 46, delicate, has had nine children, and much anxiety; ulcer on neck of uterus.

" **Relations.** Compare *Hydrast.* (in lupus exedens).

Digitized by Google

HYDROCYANIC ACID.

Prussic Acid. *HCy.*

Provings by Jœrg and pupils, see Allen's Encyclopedia, vol. 5, p. 1.
Most of the symptoms are toxicological, clinically verified.

CLINICAL AUTHORITIES.—*Catarrh of stomach and small intestines*, Moore, Allg. Hom. Ztg., vol. 105, p. 46; *Chronic dyspepsia*, Hendricks, Allg. Hom. Ztg., vol. 105, p. 144; *Asthma* (3 cases), Frank, N. A. J. H., vol. 8, p. 89; *Varicose ulcers on legs*, Schüssler, Raue's Rec., 1870, p. 330; *Nervous exhaustion*, Chapman, B. J. H., vol. 7, p. 387; *Hysteria*, Payne, N. E. M. G., vol. 6, p. 432; *Convulsions*, Gallagher, N. E. M. G., vol. 4, p. 447; *Epileptiform seizures*, Cooper, B. J. H., vol. 29, p. 783; *Hemiplegia* (benefited), Swan, Hah. Mo., vol. 10, p. 322; *Traumatic tetanus*, Moore, B. J. H., vol. 24, p. 506.

[1] **Mind.** Inability to think.
Vexed mood, despondency, oppression.
Could not remain in middle of road when he saw a vehicle approaching him even at a considerable distance, but was forced, as it were against his will, to stand aside without waiting for it to come nearer. (After recovering from poisoning.)
Insanity, when there is much excitement present, as shown in gesture or speech.
Hysteria. See Chap. 36.

[2] **Sensorium.** Loss of consciousness.
Dizziness with feeling of intoxication.
Sudden feeling as though everything about him moved slowly; dizzy without reeling; slight pressure l. side of occiput over l. half of head to frontal region.
Vertigo with reeling; with headache.
Insufficiency of arterial contraction, with frequent headaches, stupefaction and falling down; cloudiness of senses, objects seem to move; he sees through a gauze; is scarcely able to keep on his feet after raising head when stooping, or rising from one's seat, < in open air.

[3] **Inner Head.** Pressure from vertex towards forehead on both sides and to orbits where it became fixed, while from occiput it extended down nape of neck; it caused confusion of head.
Violent pressure in occiput and forehead, < r. side; pressure soon leaves, but confusion lasts.
Headache with giddiness.
Stupefying headache.
Pricking in various parts of head.

Digitized by Google

‖Sudden and desperate cases of cerebro-spinal meningitis; insensibility, with protruded, half open eyes; dilated, immovable pupils, with blindness; roaring and deafness in ears; distorted, bloated and bluish face; tongue paralyzed and protruded; loss of speech; retention of or involuntary urine and stool; rattling, slow respiration; irregular, feeble beating of heart; general coldness with heat in head.

Sudden cerebral congestion, with profound coma; preceded by vertigo, weight and great pain in back of head.

[5] **Sight and Eyes.** ‖Open eyes, with fixed eyeballs.

‖Distorted, half open eyes.

‖Dimness of sight; gauze before eyes.

Pupils dilated, immovable, insensible to light; paralysis of lids; protrusion of eyes.

[6] **Hearing and Ears.** Roaring and buzzing in ears; hardness of hearing.

[7] **Smell and Nose.** Dryness of nose.

Stinging high up in nose, discharge of disorganized, greenish brown looking fetid pieces of hardened mucus.

Enlarged, bluish wings of nose.

[8] **Upper Face.** Sallow and gray complexion.

‖Pale, bluish face, looks old.

Face bloated; distorted.

Sudden supraorbital neuralgia, with much flushing of same side of face.

[9] **Lower Face.** ‖Pale, bluish lips.

Distortion of corners of mouth.

‖Jaws firmly clenched in rigid spasm.

‖Froth at mouth.

[11] **Taste and Tongue.** Taste acrid, sweet or fetid.

Tongue coated white.

Lameness and stiffness of tongue.

Cold feeling of tongue.

Burning on tip of tongue.

[13] **Inner Mouth.** Increased secretion of saliva.

[15] **Throat.** Scraping sensation in throat, followed by secretion of mucus in bronchia.

Heat and inflammation of throat.

‖‖Drink which is swallowed rolls audibly down throat, as though it were poured into an empty barrel.

‖Spasm in pharynx and œsophagus.

‖Paralysis of œsophagus.

[14] **Appetite, Thirst. Desires, Aversions.** Absence of thirst, with heat of whole body, or violent thirst.

[15] **Eating and Drinking.** ‖Gurgling noise on drinking, like fluid running into a barrel.

[16] **Hiccough, Belching, Nausea and Vomiting.** Vomiting of a black fluid.

Digitized by Google

Acidity and heartburn.

[17] **Scrobiculum and Stomach.** Anguish in pit of stomach.
Great sinking sensation at epigastrium and stomach.
Spasmodic contraction of stomach.
Fluids enter stomach with gurgling noise.
Gastrodynia.
Attacks of indisposition coming on particularly in evening, about two hours after a delayed dinner; during attack refuses all food; intense sourness, sometimes preceded by waterbrash; loss of flesh and depression of spirits. θCatarrh of stomach and small intestines.
Burning pain in region of navel, extending to œsophagus and throat, two or three hours after eating; loss of appetite; white coated tongue; pyrosis; bitter eructations; flatulency and constipation; region of navel sensitive to touch, and upon deep pressure there is a sensation as of a resistant body; this condition frequently alternates with hepatic disturbance, which manifests itself by attacks of colic; there is also present vomiting of food, or of a slimy, bilious matter, < evening and night; emaciation. θChronic dyspepsia.
Intense gastrodynia and enterodynia, with much flatulence, especially when heart sympathizes with the dyspeptic symptoms.
Dyspepsia dependent upon chronic inflammation of stomach and bowels.
Inflammation of stomach and bowels.

[19] **Abdomen.** Coldness of abdomen alternating with burning.
Cold feeling in abdomen with stitches.
Enteralgia, with distension of abdomen.
Yellow or brownish spots on abdomen.

[20] **Stool and Rectum.** Involuntary stools, hiccough and great prostration.
Involuntary stool in bed.
Sudden prostration; long lasting fainting spells resembling apoplectic attacks. θCholera Asiatica.
Sudden cessation of all discharges. θCholera.
Rapid progress towards asphyxia; marble coldness of whole body; pulselessness; cessation of vomiting and diarrhœa; hiccough; paralysis of œsophagus; when drinking, fluid runs gurgling down the œsophagus; long fainting spells; trismus; tetanus. θCholera.
Last stage of Asiatic cholera, when diarrhœa has ceased and the vomiting has decreased, when there is anguish with pressure on chest, and the patient becomes cold, with gradual extinction of pulse.
Dry cholera.

[21] **Urinary Organs.** Uræmia, action of heart diminished; pulse accelerated, soft; stagnation of circulation in heart

Digitized by Google

and lungs; palpitation, with indescribable anguish and dyspnœa; depression of sensibility; first convulsions and afterwards paralysis; extreme apathy; slow moaning breathing; rattling in trachea; paralysis of larynx or sudden paralysis of heart. θAsphyctic form of uræmia.
Retention of urine.
Copious emission of watery urine.
Involuntary urination.

[25] **Female Sexual Organs.** Gone or sinking sensation in epigastrium, with frequent hot flashes, at climacteric period.

[26] **Voice and Larynx. Trachea and Bronchia.** Loss of speech.
Tickling and scraping in larynx and bronchial tubes, with expectoration of yellowish or whitish mucus.
‖Scraping and burning in larynx.
‖Sensation as if larynx were swollen.

[27] **Respiration.** ‖Noisy and agitated breathing.
‖Rattling, moaning, slow breathing.
Arrest of breathing caused by stitches in larynx.
Tightness in chest, sensation of suffocation.
Feeling of suffocation with torturing pains in chest.
Asthma, especially when the minute bronchial tubes are chiefly involved, with puffy face and feeble action of heart; or heart's action may be violent.
‖Periodical asthma, and violent attacks of suffocative, spasmodic cough.
‖Spasmodic asthma; asthma Millari.

[27] **Cough.** Violent paroxysms of cough, or frequent cough excited by a pricking sensation, which begins in larynx and extends down into trachea, followed by dryness of mouth and larynx; slow, enfeebled and anxious respiration, with much rattling of mucus.
‖Dry, tickling cough in consumptives, especially if reflex from heart disease.
Nervous cough with dyspnœa.
‖Whooping cough; dry, spasmodic, suffocating cough.

[28] **Inner Chest and Lungs.** Threatened pulmonary apoplexy.

[29] **Heart, Pulse and Circulation.** ‖Heart's action very weak.
‖Irregular feeble beating of heart.
‖Heart's action irregular, pulse hardly to be felt.
‖Palpitation and other functional irregularities of organ, of no very energetic character, whether purely nervous or associated with organic disease.
‖Sudden outcry; spasmodic sensations; long fainting spells; heart disease with violent palpitations; feeling of suffocation with torturing pains in chest; irregularity of motions of heart; feeble beating of heart. θAngina.
‖Pulse sometimes ceases.

Digitized by Google

‖Pulselessness; cold, clammy sweat; involuntary stools; staring, fixed look, with dilated pupils; breathing slow, deep, gasping, difficult and spasmodic, at long intervals; apparently dead.

[30] **Outer Chest.** Brownish spots on chest and abdomen.

[31] **Neck and Back.** ‖Muscles of back and face are principally affected.

[33] **Lower Limbs.** ‖Varicose ulcers on legs.

[34] **Limbs in General.** Languor and weakness of limbs.

[35] **Rest. Position. Motion.** Lies on bed: with head fixed and thrown backwards, and legs fixed and rigid; no distinct bend backwards or sideways of trunk and leg.

Lies in an apparently unconscious state, limbs and jaws rigid, forearms flexed on arms, which are firmly pressed on side.

Lies like one dead.

Frequently rises in bed, gazes vacantly about for a minute, then throws herself forcibly upon pillow, or flings herself from one side to the other.

Can scarcely stand: after raising head from stooping; on rising from one's seat.

Falls down with vertigo.

[36] **Nerves.** ‖General weakness; loss of power; great exhaustion.

Languor and weakness of limbs, especially of thighs.

‖Long lasting fainting spells.

‖Nervous exhaustion, the result of overwork and anxiety; loss of appetite; circulation languid; at times is forced to scream out suddenly, she knows not why; this scream is followed by faintness, sometimes even swooning; at such times either before or subsequent to faintness, tightness of chest and acute pain as of spasm of heart; at times is wakened out of sleep by this scream and the overpowering sensations. θNervous dyspepsia.

‖Lies in an apparently unconscious state, limbs and jaws rigid, forearms flexed on arms, which are firmly pressed to sides; eyes fixed and drawn somewhat to the right; eyeballs slightly sensitive to touch; constant succession of tears roll down cheeks; beat of heart very irregular and feeble; occasionally utters a groan or a sigh, and presses hand forcibly over region of heart, as if suffering pain there; at these times limbs become more relaxed, and she frequently rises in bed and gazes vacantly about for a minute, then throws herself forcibly upon pillow, or flings herself from one side of bed to the other; at times great force has to be exercised to prevent her from injuring herself; if any means are used to extend the contracted arms, or open clenched teeth, she exerts greater power to prevent it; after twenty-four hours this form of attack ceased, and she became very busy

Digitized by Google

packing and folding bedclothes, and placing them carefully under head, or elsewhere about bed, at same time guarding them with watchful eyes, allowing no one to touch or take them; if this is attempted, she strikes with her full strength; seems to notice no person in room, unless they interfere with her plans, but if any one enters, she seizes a pillow or anything within reach, and throws it forcibly at the intruder: at other times fixes eyes on a particular spot on wall, or on a picture, or follows an imaginary figure or object with her eyes, as if watching its motions; frequently talking, laughing loudly, or scolding vehemently; imagines herself surrounded by many friends, shaking hands with them, and calling them by name as they appear before her; she asks no questions and returns no answers; during this time, which lasted four days, she took no nourishment voluntarily. θHysteria.

Anxious feeling and fretfulness; uneasy confusion of head; hysterical spasms; semi-consciousness; limbs and jaws rigid; eyes fixed.

‖Convulsions when muscles of back, face and jaws are principally affected, and the body assumes a bluish tint.

‖Convulsions complicated with whooping cough.

‖Infantile convulsions.

Tonic spasms; catalepsy.

‖Affects upper spine, especially medulla oblongata; blueness of surface; marked trismus, face blue, threatened suffocation; paralytic weakness quickly developed; water runs down œsophagus like through a pipe.

‖Sudden complete loss of consciousness and sensation; extreme coma for several hours, only interrupted by occasional sudden convulsive movements; confusion of head and vertigo; jaws clenched, teeth firmly set, froth at mouth, forming large bubbles; unable to swallow; involuntary discharge of urine and feces; upper extremities contracted and hands clenched; unusual stiffness of legs; spasms commencing in toes, followed by distortion of eyes, towards right and upwards, afterwards general spasms; distortion of limbs and frightful distortion of face; trunk spasmodically bent forward; great exhaustion, prostration and aversion to all work, mental or physical.

‖Sudden epileptiform seizures coming on about every three months, lasting for two or three weeks and leaving him completely prostrated; falls down with vertigo accompanied by vomiting of food; lies like one dead; in some attacks the patient remains about for several days, in which case he vomits quantities of green fetid fluid, accompanied by green motions from bowels; dur-

Digitized by Google

ing attacks can drink, but cannot eat; lies in a drowsy, semi-comatose state, at times being plunged into convulsions, during which he grinds his teeth.

‖Epileptic form of hysteria.

‖Tetanic grin; jaws firmly fixed; masseters hard; lies on bed with head fixed and thrown backwards, and legs fixed and rigid; no distinct bend backwards or sideways of trunk and legs; abdominal muscles firmly contracted and hard as a board, severe spasms of all muscles, during which breathing becomes hurried and labored, < at night, when dropping off to sleep; feels on verge of suffocation; can hardly be kept in bed; paroxysms come on without any apparent provocation and leave him prostrate with exhaustion and apprehension; dreads their approach, and cannot sleep for fear of these attacks seizing him just as he closes his eyes; has not slept for several days; fluids can be swallowed when poured into mouth, but the act is painful and difficult; pulse 80; constipated. θTraumatic tetanus.

‖Cyanotic appearance; cold; heart beats slower and slower, until it almost ceases, then suddenly rises in frequency, with each return of spasms. θTetanus.

‖Traumatic tetanus.

‖Tetanic convulsions during course of diarrhœa and dysentery.

‖General coldness, long lasting syncope; anguish and pressure on chest; hiccough; rattling, moaning, slow breathing; distorted features; pupils dilated; eyelids paralyzed; filiform pulse. θShock.

‖Darting pains; inability to think; feeling of approaching paralysis; unsteadiness of gait.

Loss of sensation in limbs, with stiffness of same.

Staggering and trembling; immobility; insensibility; stiffness of body.

Paralysis first of lower, then of upper limbs.

‖Paralysis of l. side; could recognize persons, but was unable to speak; intermittent pulse and heartbeat; fingers cold; nose pinched, eyes turned up. θHemiplegia.

‖Diseases of cerebro-spinal system that come on with great suddenness and severity; mind depressed and very irritable.

[37] **Sleep.** Irresistible, constant drowsiness.

Prolonged sleeplessness, or very heavy sleep; fear and great anxiety.

[38] **Time.** For several hours: extreme coma.

Two or three hours after eating: burning pain in region of navel, extending to œsophagus and throat.

For several days: in some attacks the sickness remains; has not slept.

Digitized by Google

Evening: attacks of indisposition; two hours after delayed dinner; vomiting of food or slimy, bilious matter <.
Night: vomiting of food or slimy, bilious matter; severe spasms of all muscles, during which breathing becomes hurried and labored <.

[39] **Temperature and Weather.** Open air: vertigo <.

[40] **Fever.** ‖Coldness within and without, like marble.
‖Cold extremities.
‖Heat in head with coldness of extremities.
Heat and perspiration over whole body.
‖Body covered with sweat.
‖Scarlatina, when the eruption in its early appearance is dark colored and soon becomes livid, only slowly regaining its color when this is expelled by pressure of finger; rapid, feeble pulse; coma and great prostration.
‖Bad cases of small-pox.

[41] **Attacks, Periodicity.** Attacks last four days.
At times: is forced to scream out suddenly, she knows not why; tightness of chest; acute pain at heart; is awakened out of sleep by this scream; plunges in convulsions.
About every month: sudden epileptiform seizures lasting for two or three weeks.

[42] **Locality and Direction.** Right: side of head violent pressure.
Left: slight pressure of occiput over l. half of head to frontal region, paralysis of side.
Towards right and upwards: distortion of eyes.

[43] **Sensations.** As though everything about him moved slowly; as if drink was poured down throat like an empty barrel; as if a resistant body in region of navel; as if larynx was swollen.
Torturing pains: in chest.
Acute pain: of heart.
Great pain: in back of head.
Darting pains: general.
Stitches: in abdomen; in larynx.
Anguish: in pit of stomach; in chest.
Stupefying headache.
Supraorbital neuralgia.
Stinging: high up in nose.
Burning pain: in region of navel.
Burning: on tip of tongue; on larynx.
Scraping sensation: in throat; in larynx; in bronchial tubes.
Pricking sensation: from larynx to trachea.
Pricking: in various parts of head.
Tickling: in larynx.
Violent pressure: in occiput and forehead.
Slight pressure: l. side of occiput over l. half of head to

Digitized by Google

frontal region; from vertex towards forehead on both sides and to orbits, where it became fixed, while from occiput it extended down nape of neck.
Heat: in head; in throat.
Confusion: of head.
Gone sensation: in epigastrium.
Weight: in back of head.
Tightness: in chest.
Stiffness: of tongue; of legs.
Lameness: of tongue.
Weakness: of limbs.
Dryness: of nose; of mouth; of larynx.
Roaring and deafness: in ears.
Buzzing: in ears.
Coldness: in body.
Cold feeling: of tongue; of abdomen.

[44] **Tissues.** Acts upon cerebral veins, producing congestion; secondarily upon heart, nerves, etc.

[45] **Touch. Passive Motion. Injuries.** Touch: region of navel sensitive; eyeballs slightly sensitive.
Pressure of finger: scarlatina, when eruption, in its early appearance, is dark colored and soon becomes livid, only slowly regaining its color when this is expelled by pressure of finger.

[46] **Skin.** Paleness with a blue tinge.
Dryness of skin.
Itching; formication; erythema.

[47] **Stages of Life, Constitution.** Boy, æt. 3; epileptiform seizure.
Joiner, æt. 20, after scalding legs; traumatic tetanus.
Married woman, æt. 23, after undergoing the most heroic treatment, even to trephining, two months after abortion; hysteria.
Woman, æt. 30, drawing teacher; nervous exhaustion.
Man, æt. 39, bilious temperament, dark complexioned, married; catarrh of stomach and small intestines.
Woman, æt. 80; hemiplegia (benefited).

[48] **Relations.** Antidoted by: *Ammonia, Camphor., Coffea, Ipec., Nux vom., Opium, Verat. vir.*
Compare: *Camphor.* (first stage of cholera); *Acon., Cicuta* (action on spinal cord); *Œnanthe crocata* (in epilepsy).

HYDROPHOBINUM. (See Lyssin.)

[1] **Mind**. ‖Stupor, unconsciousness; does not reply to questions; does not recognize any one; answers properly, but immediately stupor returns.
‖Stupefaction: depressing mental influences; hypochondriacal; from smell of flowers, gas, etheric oils, etc.
‖Imbecility, or illusions of imagination and senses.
‖‖Inability to think; cannot direct or control thoughts.
‖Loss of memory.
‖Quiet, reflective mood; no complaints; no wants.
‖‖Answers no questions; cannot bear to be talked to.
‖Makes irrelevant answers.
‖While reading, interpolates improper words and sentences.
‖Raises head from pillow and gazes about.
‖Thinks he is in the wrong place.
‖Sees persons who are not and have not been present.
‖‖Does not know whether or not to take what is offered.
‖Dread of drinks; of water.
‖Anxious apprehension; chronic fearfulness.
‖‖Fears: being left alone; poison, or being bitten; being poisoned or sold; being betrayed, or injured; wishes to run away.
‖Complains of having been poisoned.
‖Horrid anguish, fits of anxiety.
‖Very suspicious.
‖Reproaches others, complains of supposed injury done him.
‖Quarrelsomeness; indomitable rage.
‖Impatience, precipitate liveliness, talkativeness, tells everything.
‖‖Picking at bedclothes; mutters and prattles.
‖Mutters absurd things to himself.
‖Makes abrupt, short answers to imaginary questions.
‖Cries out suddenly.
‖While awake talks irrationally, as if a man were present.
‖‖Talks more than usual, and more animatedly and hurriedly.
‖Constant unintelligible chattering.
‖‖Lies naked in bed and prattles.
‖‖Delirium: talks of business · of imaginary wrongs.
‖Loves smutty talk.

Google

Frequently breaks out into a loud laugh.
Scolds; raves; abuses those about him.
Cries and laughs alternately, gesticulations lively.
Whines, but knows not why.
Silly, smiling, laughs at everything, silly expression.
Foolish laughter.
Talks in an absurd way.
Does foolish things, behaves like one mad.
Comical alienation of mind; ludicrous actions like monkeys; makes ridiculous gestures like a dancing clown; like one intoxicated.
Plays with his fingers (not picking bedclothes).
Catches at air, or at some imaginary appearance, and pulls bedclothes about.
Carphologia and muttering.
Sings constantly and talks hastily, but indistinctly.
Sings amorous and obscene songs.
Excessive animation, restless hurry.
Insulting, shouting, brawling, ungovernable rage, with exhibition of unusual strength.
Insane passion for work.
Tendency to action; wants to kill somebody or himself.
Is violent, and beats people.
Bite, scratch and nip everyone interfering with them.
Child makes violent exertions to get out of bed, tries to bite, and raves.
Tries to injure those around him; convulsions after trying to swallow.
Working and clutching of hands, strikes his attendants; movements very quick, with difficulty held upon lap; wants to fight, attempts to bite; at intervals would sing and at times burst out laughing; when anything is offered him clinches hold of it with both hands greedily.
Delirium: with physical restlessness; would not stay in bed; moves from one place to another; complete: lively; wild; busy, with constant muttering or talking, and meddling with hands; about usual employments; wants to get up and attend to business or go home; without apparent heat; face pale, limbs cold, though temperature is high; with jerking of limbs, and diarrhœa, red face, wild, staring look, and throbbing of carotids; comes back to consciousness when spoken to; continued while awake; from jealousy or vexation; murmurings; incoherent talk; from pain.
Delirium tremens: with clonic spasms; averse to light and company; visions, as if persecuted; preceded by an epileptic attack; constant talking at night; seeks to escape from men by whom he imagines himself sur-

Digitized by Google

rounded and who are trying to capture him; does not recognize his wife who is standing by his side, but imagines he sees her under a distant bed.

Insanity brought on by drinking; will neither eat nor drink; face flushed, expression wild; tears clothes; wanders up and down room during night; strikes at keepers, and can scarcely be restrained.

Trembling all over, looking very wild, and constantly pointing to serpents which she saw creeping up towards her, and fancied they were in bed approaching her; had to be held to be kept quiet; metrorrhagia. θDelirium tremens.

Epileptiform fit precedes the attack; continuous talking at night; wants to run away for fear of being persecuted by police; tremor of limbs. θDelirium tremens.

Loquacious and quarrelsome mania, especially inclined to unseemly and immodest acts, gestures and expressions.

Jealousy: with rage and delirium; with attempt to murder.

Erotic mania accompanied by jealousy.

Serious illness from jealousy and grief about a faithless lover; fever <after midnight; high redness of face, with constant delirium and desire to run away; continual throbbing toothache.

Violent and threatening nervous symptoms, even spasms; hectic fever; sleepless nights; mind nearly deranged; disturbed by unfounded jealousy.

A gentle, lovable woman became extremely jealous of her husband, and although fully realizing that she did him injustice, she was so filled with grief that she found no rest day nor night, and could neither eat nor drink.

Amativeness; nymphomania; erotomania.

Onanism since childhood; has always been greatly attracted by opposite sex and prematurely busied himself with thoughts of marriage; for last half year has been very ill humored and irritable; memory impaired; reserved; secretly wrote his love affairs; speech incoherent; restlessness and sleeplessness; attacks of mania with profuse sweating, hasty and vehement talking, one idea rapidly following another, all in some way concerning love; masturbates at every opportunity, and is full of obscene talk; constant walking about; strikes at and destroys everything; spits in face of attendant and raves; face pale and sunken; eyes wild, piercing, shining; severe pain in nape of neck and small of back.

Lascivious mania, uncovers body, especially sexual parts; sings amorous songs.

Goes about nearly naked; will not be covered.

Digitized by Google

Constantly throwing off bedcovers or clothes; entire loss of modesty.

He lies in bed nude and chatters; walks about insane, naked, wrapped in a skin during summer heat.

Desires to be naked (hyperæsthesia of cutaneous nerves).

Disappointed love followed by: epilepsy; melancholy; rage or inclination to laugh at everything; despair and propensity to drown himself.

Morose dejection, despair.

After a fit of passion, melancholia, gradually developing into true madness; appetite gone; nights restless; continual delirium attended with timorousness; loss of strength; complains of frequent shudderings and rigors in spine going up into head during lucid intervals; hard, constipated stool.

After fit of passion and sudden fear, became so melancholy and timorous as to hide himself in every corner, and even to dread and run away from flies; speechless, could not get a word out of him; no appetite; sleepless; loss of strength; seemed as one out of his senses.

Groundless suspicion of being watched by members of family with whom he had some slight misunderstanding; to avoid being recognized by them, clothed himself differently every day, and seldom left his house; this monomania gradually developed into insanity; recognized his physician but at once went off again into delusions; uncovered and exposed himself; continually counting, at one time in French, at another in English, and at another in both; continually fixing himself to correspond with the points of the compass and looking through his fingers; tracing the pattern of carpet with his feet and twisting his legs till he nearly fell down; grasping at imaginary objects; watching his relations suspiciously and imagining he might be poisoned; talking to himself. θInsanity.

After being harshly accused of theft, continual delirium; fancies herself surrounded by objects of a terrifying nature; not a moment quiet, continual calling out that she saw the devil; denies herself guilty of theft, or that she has any concern with witches; tremor all over body; struggles with such violence to escape, that she must be tied to bed; pulse and respiration shift according to the various phantoms which offer themselves to her imagination; tongue extremely moist; eyes stern, grim, wrathful; involuntary stool and urine in bed.

Mania during lactation; extreme irritability; raving; when thwarted in anything scolds and strikes indiscriminately at persons; talkative, irrational speech; crying,

Digitized by Google

alternating with a merry humor; anxiety with trembling in limbs; very profuse secretion of milk.

Great restlessness, piercing, staring look; jerking motion of head with rapid glances here and there; face pale; pulse slow and soft; attempts to escape from room; frightful hallucinations of figures coming to seize him, hens bound with chains, numbers of large crabs being driven into room; general epileptic convulsions; θInsanity.

Raving, scolding, singing; chatters day and night; will not eat, drink or sleep; seeks to escape; breaks the window; use of straight-jacket necessary. θMania.

Restless, talking delirium, yet when spoken to answering rationally; imagining that her deceased sister was sitting by her bedside, and talking to this imaginary person; pulse 80, full; head ached, but not hot; hearing decreased; loquacious. θHallucinations.

Face earthy pale; wild, strange expression; constant talking, particularly on religious subjects; believes himself poisoned, or that there is a stinking odor from his mouth; occasionally scolds and cries, and declares that he hears loud noises. θInsanity.

Could not bear the light, nor to be spoken to; repelled with rage and seeming disgust his mother, of whom, in his natural state, he was doatingly fond, did not know her, said she was not his mamma; talked wildly and could with difficulty be kept covered. θManiacal fury.

Face red and hot; wild expression of eye; respiration quick and impeded; constant scolding and cursing; tears her clothes; walks about room at night; strikes viciously at those about her and can scarcely be restrained; will neither eat nor drink. θMania.

Refused to rise from bed and dress herself; assigned no reason; after a few hours insisted on rising, but would not wear a single garment of any kind; received her physician without any apparent consciousness of her singular condition, conversed intelligently, but would not admit that she needed any advice to clothe herself; refused medicine, and cunningly evaded all stratagems to give it; escaped from room, went through house, and sought to escape into street. θMania.

Frequent looking at hands because they seem too large.

Considers the stove a tree and wants to climb it.

Looks at men as hogs.

Does not know her relatives.

Puerperal mania, with desire to be uncovered and nude.

Nervous irritability without hyperæmia.

Consequences of fright.

Digitized by Google

‖Syphilophobia.

[2] **Sensorium.** ‖‖Complete loss of consciousness.

‖Unconsciousness, from congestion of blood to head, with delirium; answering all questions properly; pupils dilated.

Stupor, loss of consciousness, delirium, patient talking of his domestic affairs.

Stupor, with incoherent speech; patient is unconscious of severity of his case.

‖Sopor with loud snoring, from which she can only be partially aroused by hard shaking or loud calling; does not answer any questions; unable to swallow; involuntary stool and urine; face red; bloodvessels of body swollen; pulse quick and full; this condition lasted several days and was accompanied by numbnes of hands. θApoplexy.

‖Sudden falling, with a shriek, sopor.

‖Apoplexy, snoring; involuntary stool and urine.

‖Rolls head, stertor, hiccough. θConcussion of brain.

‖Repeated attacks of fainting.

‖‖Stupefaction.

‖Confusion of head.

‖‖Vertigo; giddiness.

‖Vertigo, with drunkenness.

‖Vertigo from smell of flowers, gas, etc.

[3] **Inner Head.** Constrictive, stupefying headache in upper part of forehead, and general malaise, alternating with absence of all pain.

Pressing, stupefying pain in forehead.

Aching, stupefying pains over eyes.

Pressure in vertex and drawing in nape of neck, when turning head.

Heaviness of head and violent pains, alternating with pains in nape of neck.

‖Heaviness, vacant feeling, confusion, severe pain; pains in meninges; pressure in l. side of forehead, changing to shooting.

‖‖Brain feels as if loose.

‖Sensation as if water was swashing in head.

‖Shakes head to and fro; swashing sensation in brain.

Undulating sensation in brain, as if from throbbing in arteries.

‖Heat and tingling in head: violent pulsations, like waves, head shakes; < becoming cold, after eating; > bending head forward, and from heat.

‖Congestion of blood to head; red, sparkling eyes; face purple red; < in evening.

‖Cerebral hyperæmia, unconscious, blue red face; red, sparkling eyes.

Digitized by Google

Nervous headaches.
‖Pain and heat in head, after a meal.
‖Headache, better walking.
‖Inflammation of brain, with unconsciousness; heat and tingling in head; violent pulsations in head, like waves; head shakes; < from becoming cold and after eating; > bending head forward (stooping) and from heat.
‖Hydrocephalus, with stupor; head is shaken to and fro; twitching motions.

Outer Head. ‖Catches cold in head, especially from dry, cold air.
‖Rolling the head.
‖Head sinks on one or other side.

Sight and Eyes. ‖Farsighted, clearsighted; pupils dilated.
‖Illusions; objects look red as fire.
‖‖Illusions of vision; small objects seem very large.
‖Deceptive vision; flame of one light seems smaller, that of another larger, though both were of equal size.
‖Double sight.
‖When reading the letters move about, from mydriasis.
‖Dimness of vision, as though a veil were before eyes; could scarcely see three steps.
‖Obscuration of vision; objects seem indistinct; is near-sighted and obliged to hold book nearer when reading.
‖‖Momentary loss of sight.
‖Amblyopia. θEpilepsy.
‖Night blindness.
‖Hemeralopia in a myopic eye, with shooting pains from eyes into nose and head; headache > closing eyes.
‖‖Eyes become shortsighted; distorted, stare and protrude.
‖Eyes open; distorted; rolling about in orbits; squinting.
‖Spasmodic action of internal rectus.
‖Eyes red, wild, sparkling.
‖‖Constant staring at surrounding objects, self-forgetful.
‖Stupid staring, distorted eyes.
‖‖Brilliant lustre to eyes.
‖‖Pupils dilated; insensible.
‖‖Albugineæ red, and pupils so widely dilated that irides seemed like a narrow circle; they were also insensible to light.
‖Pupils altered, dilated or contracted; slow respiration.
‖Conjunctiva red.
‖Excesssive photophobia of scrofulous ophthalmia.
‖Tearing, beating in r. eye, which waters and seems projected.
Twitching in eyes; dim vision, as if a veil before eyes.
‖Quivering of eyeball.

Digitized by Google

[6] **Hearing and Ears.** ‖Buzzing, singing, rushing in ears.
‖Hard hearing, as if stupefied, especially after apoplexy.
‖Hardness of hearing from paralyzed auditory nerves.
‖‖Deafness.

[7] **Smell and Nose.** ‖‖Sense of smell weak, or lost.
‖Sudden jerking from above downwards in root of nose.
‖Pressing pinching in root of nose and in zygomata.
‖Cramp pressure at root of nose and malar bones.
‖Nostrils sooty, smoky.
‖Nosebleed bright red, with salivation.
‖‖Dryness of nose.
Liability to catch cold in head, principally from dry, cold air.

[8] **Upper Face.** ‖Heat and redness of face.
‖Flushed and excited countenance.
‖Face: flushed; dark red, bloated; cold and pale; distorted; stupid expression; muscles twitch, makes grimaces.
‖Distorted, bluish face, with wide open mouth; approaching cerebral paralysis. θTyphoid.
‖Twitching of muscles of face.

[9] **Lower Face.** ‖‖Foam at the mouth.
‖Lips, dry.
Large pustules on chin.
‖Lockjaw; fully conscious.

[10] **Teeth and Gums.** ‖Closes the teeth tightly together.
‖Toothache, driving to despair; tearing, throbbing, extending to cheeks and along lower jaw.
‖Violent attacks of toothache with sense of strangulation and difficult deglutition; cramps; sense of mental fatigue.
‖Violent tearing and pulsating pain, causing spasmodic jerks of fingers, hands, arms and facial muscles.
‖Toothache, driving to despair, in sensitive, nervous, excitable persons.
‖Tearing in teeth as if blood was forced into them, flushes of heat, congestion to head; < from cold air, morning.
‖Toothache, jerking, throbbing, tearing, drawing, extending into forehead.
‖Throbbing toothache, appearing generally in morning, usually due to a cold; throbbing in tooth, tearing sensation in gums, and in masticating the tooth seems loose as if it would fall out; congestion to head, with great heat all over body.
‖Teeth feel loose when chewing; also, too long.
Tearing raging pain in gums, with buzzing sensation in tooth.
‖‖Intense pain in gums after extraction of a tooth.
‖‖Presssing of gums together, putting hands to jaws, fingers into mouth; during dentition.

Digitized by Google

‖‖Sordes on teeth and in mouth.
‖‖Grating the teeth.

11 **Taste and Tongue.** ‖Putrid or salt taste.
‖Parching dryness of tongue.
‖‖Tongue: red or brown, dry, cracked, hard; looks like burnt leather; clean, parched; white; tremulous.
‖‖Tongue shaken to and fro, with a trembling movement.
‖Tongue does not obey, difficult mobility.
‖Tongue protruded with difficulty, can hardly draw it in.
‖Biting the tongue when talking.
‖Paralysis of tongue.
‖After fright complete loss of speech; motions of tongue much impaired with sensation of numbness and lameness; chewing and swallowing unaffected; frequent stitching headaches.
‖Loss of speech; utters inarticulate sounds.
‖‖Speech impaired, difficult and unintelligible, from arrest of secretion.
‖Speech embarrassed.
‖Very talkative.

12 **Inner Mouth.** ‖Soft and hard palate dry and glazed.
‖Dryness of mouth, lips and fauces.
Soreness of soft parts between gums and cheeks.
‖Salivation.
‖Foaming, bloody saliva, tasting salty.
‖Cadaverous smell from mouth, < morning and evening.

13 **Throat.** ‖Elongated palate.
‖Throat and mouth dry, parched and red, inability to swallow.
‖Throat dry, burning; shooting, pricking pains, difficult swallowing, as from constriction; dread of liquors.
‖Constriction of throat, with inability to swallow fluids.
‖Spasms of throat; an attempt to swallow renews spasm.
‖Spasmodic contraction of œsophagus after injury; solid and warm food swallowed best; fluids cause spasm; hiccough, nausea, stiff neck.

14 **Appetite, Thirst. Desires, Aversions.** ‖‖Unusually great appetite; hungry gnawing.
‖Voracious appetite and thirst, with inability to swallow.
‖Unquenchable thirst.
‖‖Much thirst with tenderness of stomach.
‖‖Thirst, drinks but little at a time.
‖‖Dread of water.

15 **Eating and Drinking.** Solid and warm food are swallowed best; fluids cause spasm.

16 **Hiccough, Belching, Nausea and Vomiting.** ‖‖Hiccough: with spasms and rumbling; after eating and at night; with inflammation of intestinal organs.

Digitized by Google

Eructations: empty; incomplete; bitter.
Nausea: with vertigo and vomiting; with stiff neck.
‖Vomiting and retching: with colic, extorting cries; after coughing.
‖Vomiting: of food and drink; of blood, with convulsions; of bloody mucus, with dark red blood.

[17] **Scrobiculum and Stomach.** ‖Pit of stomach tender to touch.
‖Violent pain in stomach with vomiting and hiccough.
‖Cramps in stomach, with loud shrieks, vomiting, convulsions; cramps > after vomiting.
‖‖Burning and inflammation of stomach.
‖‖Inflammation of stomach, or peritonitis, with hiccough.
‖Hæmatemesis, pit of stomach sensitive; dull aching about liver; abdomen bloated.

[18] **Hypochondria.** ‖Stitches or dull pain in region of liver.

[19] **Abdomen.** ‖Abdomen distended, sore to touch, tympanitic.
‖‖Pinching in abdomen.
‖Colic, as if abdomen would burst; presses fists into sides; cutting, vomiting, belching, hiccough, screaming.
‖Colic > by vomiting.
‖Hysterical colic.
‖‖Abdominal muscles sore.
‖Pain, as from soreness in abdominal walls, when coughing.
‖Pains in abdominal muscles: as if he had fallen upon them; while sitting; as after excessive exertion or a strain.
‖Sticking in umbilical region, during inspiration.
‖‖Umbilicus open, urine oozing through.
‖‖Cutting low down in abdomen.
‖Distension of hypogastrium, which is painful to touch.
‖Enteritis or peritonitis, with typhoid symptoms.
‖Roseola on abdomen.

[20] **Stool and Rectum.** ‖‖Frequent desire for stool; with small discharges.
‖Watery diarrhœa.
‖Stools: painless; watery; mucous; nearly odorless; yellow, watery, involuntary during sleep, in old men.
‖Stools involuntary, unconscious, painless, yellowish, watery; attack coming on suddenly and without apparent cause. θDiarrhœa in lying-in women.
‖Hysterical females and young girls whose bowels are apt to bloat, and who are subject to attacks of diarrhœa, with colicky pains and frequent urging to stool, or where sphincters are weak, causing great difficulty in retaining the feces, and where excitement or mental trouble produces the attack.
‖Relaxed state of bowels dependent on or connected with irritation of uterine system.

Digitized by Google

‖Involuntary stool while urinating.
‖Diarrhœa: during pregnancy; in childbed; at night; during typhoid fever.
‖Bright, staring eyes; muttering delirium; flushed face; dry tongue; teeth incrusted with brown mucus; scanty urine; rolling of head; dilated pupils; difficulty in swallowing liquids; involuntary stools; night cough. θCholera infantum.
‖Typhoid symptoms after the vomiting diarrhœa and coldness have ceased, with dulness of sense, wandering looks; red and hot face; spasms and rumbling in abdomen; hiccough, with involuntary micturition and foaming at mouth. θCholera.
‖Stool small in size.
‖Constipation, with epilepsy.
‖Paralysis of rectum, or sphincter ani.
‖Paralysis of sphincter ani and vesicæ; involuntary stool and urine.
‖Piles bleed profusely; fulness of veins, full pulse, skin and muscles lax.

Urinary Organs. ‖Paralysis of bladder; after labor, and in children with affections of head.
‖Retention of urine with constant pressure in bladder; atony or apparent paralysis of bladder.
Urination: frequent, scanty; difficult, from spasmodic or inflammatory condition of neck of bladder; involuntary; has no will to urinate, difficult, with pressing.
Urine: scanty; retained or suppressed; turbid, with mucopurulent deposit; with red, sandy sediment.
‖Frequent emission of urine as clear as water.
‖Frequent urination at night, so that his rest was broken to such a degree as to make him miserable; prostate slightly enlarged.

Male Sexual Organs. ‖Sexual desire excessive; lascivious, exposes his person.
‖Impotence.

Female Sexual Organs. ‖Lascivious, uncovers sexual parts.
‖Lascivious furor without modesty.
‖Excited sexual desire without excitement of fancy.
‖Metritis, especially if inflammation is developed by emotional disturbances; typhoid state.
‖Uterine cramps, with pulling in loins and small of back; irritable uterus.
‖Metrorrhagia, accompanied by cramps of whole body, interrupted by jerks and starts of entire frame, or of single parts, succeeded by general stiffness of limbs.
‖Metrorrhagia in patients who have been subject to

Digitized by Google

cramps during pregnancy; blood bright red, and issues more and more freely at every jerk of body, while action of pulse diminishes.

‖Continuous bright red flow, with spasmodic jerkings, great vascular excitement. θMetrorrhagia.

‖Metrorrhagia, blood pale, with convulsions.

‖Labor-like pains, previous to menstruation, with drawings in loins and small of back.

‖Menses preceded by hysterical or epileptic spasms; loud, uninterrupted laughing; profuse sweat and nausea.

‖During menses: convulsive trembling of hands and feet, headache, profuse sweat; lockjaw; enuresis.

‖Profuse menses, with delirium; convulsive trembling of hands and feet; silly manners, rage.

‖Menstruation appears with profuse perspiration, headache and nausea.

‖‖Irregular menses.

‖Suppressed menstruation; suppressed lochia.

* **Pregnancy. Parturition. Lactation.** ‖Twitching in cheeks; cramp-like pains in abdomen; violent pain in pit of stomach. θPregnancy.

‖Cold perspiration; pale face; suffocating spells and convulsions; facial muscles greatly agitated. θDuring parturition.

‖Spasms during parturition with much nervous irritability.

‖Every ten or fifteen minutes an attack of twitching of limbs and muscles of face; unconsciousness. θParturition.

‖‖Puerperal spasms, shrieks, anguish; chest oppressed, unconscious.

‖After miscarriage or labor, hemorrhage of bright red blood, flowing steadily; commences with spasms, single shocks, twitchings and startings, with every start more blood comes.

‖Puerperal fever.

‖‖No will to make water, in child-bed.

‖Watery, painless diarrhœa of lying-in women.

‖Total suppression of milk or lochia.

‖Children at breast have singultus.

* **Voice and Larynx. Trachea and Bronchia.** ‖Loss of speech with aphonia, although she makes great efforts to speak cannot produce a sound or syllable.

‖Hysterical aphonia.

‖Speech impaired; confused; difficult and irrational.

‖Hoarseness, with dry and inflamed throat; hysteria.

‖Voice husky, as from mucus.

‖Constriction of larynx.

‖‖Much mucus in larynx and air passages, which makes speech and voice rough.

Digitized by Google

[26] **Respiration.** Spasms of chest with arrest of breathing, compelling one to lean forward.
- Loss of breath, as from rapid running.
- Oppression of chest, with internal stinging, < during inspiration.
- Slow rattling breathing.
- Mucous râles during stupor or furious delirium.

[27] **Cough.** Tickling sensation in throat causing an incessant cough, < when lying down, > when sitting up.
- Dry, tickling, hacking cough, which seems to come from air passages.
- Violent spasmodic cough; short consecutive coughs, caused by tickling in throat, as if palate was too long, or as if some mucus was lodged there.
- Shattering spasmodic cough, with frequent, rapidly succeeding coughs, excited by tickling, as from adherent mucus, at night without, in daytime with expectoration of saltish mucus, or of bright red blood mixed with coagula.
- Tickling cough, with anxiety at night and expectoration of blood streaked mucus. θChest affection.
- Dry, hacking or spasmodic cough, < lying down, > sitting up; < at night, also after eating, drinking, talking or singing; velum palati elongated.
- Dry, spasmodic, persistent cough. θBronchitis.
- Frequent cough at night, which always wakes him, after which he again falls asleep.
- Paroxysms of dry cough come on more frequently at night; during cough face reddens and respiration may be arrested; vomiting of white mucus; after cough, exhaustion. θPertussis.
- Paroxysmal cough, severely shaking chest, abdomen, whole body, and causing a sense of excoriation in abdominal muscles.
- During cough: spasms of larynx; painful epigastrium and hypochondria.
- Cough < after midnight, when at rest, during sleep, in cold air, and from eating and drinking.
- Cough in incurable cases of pulmonary and laryngeal phthisis.
- Cough after measles.
- Expectoration of saltish mucus, or bright red blood, mixed with coagula.

[28] **Inner Chest and Lungs.** Tight feeling across chest, as from overexertion, running.
- Spasms of chest, arrest of breathing, must lean forward.
- Alternate difficult breathing with anxiety or oppression; continual strong convulsive twitchings of abdomen;

Digitized by Google

diaphragm apparently affected in same manner, for breast seemed suddenly to become strongly dilated and ribs to rise and sink suddenly; at intervals violent hiccough and risus sardonicus; loss of voice; difficult deglutition; pulse full, strong and quick; restless at night; feels as if heart and breast were torn to pieces; after paroxysms great weakness. θSpasms of chest.

‖Exhausted from long talking, body, and especially chest, weak; green sputum, weak pulse.

‖Stitches in sides of chest.

‖Restless, delirious; tongue and lips dry, brownish; great heat and great thirst; watery, yellowish diarrhœa; intense spasmodic cough, causing him to jump up; dull percussion sound from lower edge of scapula downwards on l. side; bronchial breathing; bronchophony. θCatarrhal pneumonia.

‖Pneumonia: cerebral symptoms, delirium, sopor; dry, fatiguing night cough, or rattling in chest; senilis, with acute œdema of lungs; of drunkards; complicated with typhus; hypostatic, in course of chronic affections.

‖Atelectasis pulmonum; bluish color of face; great difficulty in inspiring; must be raised up.

‖Hæmoptysis, bright red, with spasms, also in drunkards.

[29] **Heart, Pulse and Circulation.** ‖Chronic palpitation of heart so that she could not move body without greatest anxiety, or apprehension of suffocation or swooning; unquenchable thirst in morning; frequent, copious discharge of limpid urine; appetite impaired.

Pulse: accelerated, full, hard and strong; rapid, intermitting; slow and small; weak and irregular; small, weak, scarcely perceptible.

‖Parotids beat violently.

‖‖Inflammation of bloodvessels.

[30] **Outer Chest.** ‖Muscles of chest sore.

‖Roseola on chest.

‖Spasms of muscles of chest.

[31] **Neck and Back.** ‖‖Stiffness of cervical muscles, with tension as if too short, on bending neck.

‖Contraction of muscles on one side of neck, twisting neck to one side; neck turned obliquely.

‖‖Herpetic spots on nape of neck.

‖‖Abscesses on l. side of neck.

‖Spinal meningitis, with convulsions, jerks of muscles; after injury.

[32] **Upper Limbs.** ‖Trembling of arms and hands.

‖Arms tremble, especially in evening and after exercise. Two pimples at elbow.

‖‖Painful numbness of hands.

Digitized by Google

‖Rigor of hands.
‖Fingers look and feel too thick.

[33] **Lower Limbs.** Weakness of legs; staggering gait.
‖Cramps in thigh.
‖Gangrenous spots and vesicles here and there on lower limbs.
‖Convulsive tremor in r. foot, can neither lie, sit, nor walk; constipation, stool hard and discharged with much straining; urine limpid, watery and inodorous.
‖Coldness and swelling of feet.
‖Toes spasmodically contracted, in walking or going up stairs.

[34] **Limbs in General.** ‖Trembling of limbs.
‖‖Frequent twitching of hands and feet.
‖Cramps and spasms of extremities.
‖Lancinating pains in joints, especially on motion.
‖Cold hands and feet.

[35] **Rest. Position. Motion.** When at rest: cough <.
Lying down: cough <.
Lying on back: suddenly sits up, then lies down again.
Lies on back: eyes wide open, staring and immovable.
Bending head forward; > violent pulsation.
Spasm of chest compels one to lean forward.
Pressing gums together, hands to jaws, fingers into mouth, during dentition; presses fists into sides with colic.
Must be raised up: great difficulty in inspiring.
While sitting: pain in abdominal muscles; cough >.
Motion: lancinating pains in joints; bruised feeling.
Movements quick.
Moves from place to place.
Turns from one place to another.
Turning head: pressure in vertex and drawing in nape of neck.
Walking: headache >; toes spasmodically contracted.
Attempts to jump out of bed and run away.
Jump up: cough causes patient to.
Could not move body without greatest anxiety.
Can neither lie, sit, nor walk on account of convulsive tremor in r. foot.
Going up stairs: toes spasmodically contracted.

[36] **Nerves.** ‖Blunted sensibility.
‖Loss of smell and taste.
‖Weakness; uncommon sinking of strength.
‖Long talking exhausts patient.
‖Wants to get away, but cannot stand alone.
‖Repeated attacks of fainting.
‖Restless, turns from one place to another.
‖Contraction of stomach with difficult breathing; can

Digitized by Google

hardly swallow anything, even a few spoonfuls of broth cause great fatigue; pulse unequal; urine limpid; restless day and night; perpetually watchful. θHysteria.

About 10 A.M., chilliness in extremities, followed by heat, first in head, then descending to extremities; sings; bawls out aloud; covers face with handkerchief; stands in awe of those about her; this continued for two hours and was followed by sleep which lasted three hours, during which body was very hot, with much sweat, and short, quick respiration; on awakening does not remember. θHysteria.

Constant state of erethism; not a single part of whole body nor a solitary muscle in a quiet state for a moment; general uninterrupted, irregular motion full of impetuosity; eyelids opened and closed with a sudden force, features fairly grinned, made grimaces, rubbed head steadily on pillow, and whole body twisted and turned continually; unceasing spitting, but without saliva; answers no questions, as if it was impossible for him to collect his senses. θEndocarditis rheumatica.

Hysteric and asthenic delirium, with attempts to run away, prompted by fear.

Concussive startings, alternating with tremblings and convulsions.

Angular motions; jerks of single muscles or sets of muscles.

Convulsive jerks; long lasting spasms.

Subsultus tendinum.

Violent tearing and pulsating pains causing spasmodic jerks of fingers, hands, arms, and facial muscles.

Convulsions, beginning with twitchings of muscles of face, especially about eyes; dark colored, bloated appearance of face and deep sleep after spasm goes off.

Violent convulsions, not all over body but wandering, at one time affecting breast, belly, feet, arms, etc.; great pain; strength and appetite impaired; sleepless; vomiting of large quantities of bile; while convulsions seized abdomen, strong contraction of sphincter ani followed by strangury with continual and very painful tenesmus.

Falls suddenly to ground, with cries and convulsions.

Every muscle in body convulsed; frothing at mouth.

Eyes staring and distorted, with spasmodic closure of lids, bluish face, clenching of teeth, foaming at mouth, constriction of throat.

Alternate convulsions of upper and lower extremities.

Convulsions: of children, especially from fright; after meals; child sickens after eating, vomits or shows distress at stomach, sudden shriek, and then insensible; from intestinal worms; puerperal.

Digitized by Google

‖Convulsion during deep, heavy sleep.
‖‖Suffocating spells and convulsions during labor.
‖Rigid all over, as in tetanus.
‖The forces sink quickly; patient gets easily fatigued; syncope is readily produced; limbs become cold and tremble; these symptoms, with those of sleep, paralysis of sphincters, point to its use in some conditions occurring in course of continued fevers.
‖‖Fell down unconscious with whole body cold and stiff like a piece of wood.
‖The spasms flex the limbs, and the bent body is tossed upward.
‖Toes becomes spasmodically flexed, as from cramps, when walking or carrying foot forward, and ascending.
‖‖Stiffness of arms and legs, jerking of hands and feet.
After attack: sopor, snoring, dark colored, bloated appearance of countenance.
‖Chorea, the result or consequence of long and debilitating diseases; every muscle of body from eyes to toes twitches; great agitation and loquacity; tendency to laugh at everything.
‖Throws arms about, misses what is reached for, gait tottering. θChorea.
‖Epileptiform spasms, hyperæsthesia of skin.
‖‖Epilepsy; before the attack, vertigo, sparks before eyes, ringing in ears, hungry gnawing; during attack, face purple, eyes projecting, shrieks, grinding teeth, urination.
‖Epileptic fits, almost daily; convulsions so violent that it seemed as if joints or spine would be broken.
‖‖Epileptoid spasms.
‖Epilepsy: from grief, after emotion; in consequence of drinking.
‖Nervous apoplexy with somnolency; paralysis of œsophagus and numb feeling; paralysis of sphincter muscles.
‖Paralysis after spasms, or after diphtheria.
‖Paralysis agitans.
‖Lockjaw.
Hydrophobia.

Sleep. Sleepiness; falls asleep while answering.
‖‖Very deep slumber.
‖Constant slumber, with picking.
‖Deep sleep, with convulsions.
‖Deep sleep which continued without interruption at least three days; only by hard shaking and loud calling she could be awakened sufficiently to take hold of breast, but before she had drawn a few swallows she went off again. θLethargy.
‖Stupid and drowsy, or excitable and sleepless.

Digitized by Google

Drowsy or sleepless; wild expression; delirious; after chloroform.
Laughing expression during sleep.
Child sobs and cries in sleep.
Sleep, with outcries.
Drowsy, jerks in sleep, cries out, grates his teeth.
Starts up from sleep in affright, or after a fright.
Awakening with screams.
Restless sleep.
Frequent micturition at night, preventing sleep.
Lying on back, suddenly sits up, then lies down again.
Unable to sleep whole night; tried lying upon one side then the other, yet he was unable to get quiet; only shortly before daybreak sleeps a little from time to time; during short naps perspiration all over, especially about neck.
Sleeplessness from nervous irritation.
Intense sleeplessness of irritable, excitable persons, from business embarrassments, often imaginary.
Sleepless, on account of a quiet mental activity.
Sleeplessness or dozing, with brain full of ideas, figures and bewildering images.
Excessive wakefulness, alternating with drowsiness.
Sleepless, or constant sleep, with muttering.
Sleeplessness, after violent disease.
Sleeplessness from renal affections; very excitable.
Long continued sleeplessness.
Dreams: anxious; lascivious.

[20] **Time.** Morning: toothache <; cadaverous smell from mouth; unquenchable thirst.
10 A.M.: chilliness in extremities.
Afternoon: fever.
Day: chatters; cough; restless.
Evening: congestion of blood to head <; cadaverous smell from mouth <; arms tremble; external heat, coldness ceases, thirst commences; inflamed ulcers <.
Night: constant talking; tears clothes; sleepless; chatters; walks about room; hiccough; frequent urination; cough without expectoration; anxiety; cough <; dry fatiguing cough; restless; cold; burning heat, with tearing cough.
After midnight: fever <; cough <.

[30] **Temperature and Weather.** Cannot get warm in bed.
Cold: < violent pulsations in head.
Cold air: toothache <; cough <.
Cold dry air: catches cold in head.
Will not be covered; throws off bed clothes.
Getting warm: inflamed ulcers >.
Heat: pressure in vertex >.

Digitized by Google

Bad effects from cold air.

[60] **Fever.** ‖Cold at night, up back from small of back; cannot get warm in bed.

‖Chill commencing in feet and running up spine to nape of neck.

‖Sudden chilliness; coldness of spine; body cold and stiff, cannot get warm in bed.

‖Chill from feet upward; shivering, heat of face.

‖‖Cannot bear to be talked to, or least noise during chill.

Chill without thirst; alternate days, 11 A.M.

‖Congestive chill with cold extremities.

‖‖Chill, alternating with heat.

‖Whole body cold, with burning redness of face.

Afternoon fever, coldness predominates; pain in back.

‖Heat of head and face, with general coldness of body, without thirst, followed in evening by external heat, coldness ceases, thirst commences.

‖‖Heat of head and face, with coldness and loss of sensibility of external surface of body.

‖Burning heat all over, every evening congestion to head; putrid taste.

‖Burning heat of body every evening, always with thirst.

‖‖Skin burning hot to examining hand, which leaves a burning in place touched.

‖Burning heat, no external redness; blood burns in veins.

‖‖Burning heat all over, skin hot and dry to touch, with distended veins.

‖‖Burning heat all through night, with tearing cough.

Heat: over whole body, much thirst, or no desire to drink; lips sticky; along whole spine; runs up back; ascending from feet to face.

During heat: pain in region of liver; epileptiform convulsions; sleeplessness.

‖They throw the bedclothes entirely off, not because they are too warm, but they will not remain covered. θFever.

Sweat: cold; sour; weakening; during sleep; on back and pit of stomach; mostly on legs.

Violent sweat after thirst.

‖Dry nocturnal cough, disturbs sleep; extreme nervous excitement, epileptic attacks, or other spasmodic affections; hot stage without much sweat; after each paroxysm pressure in head, vertigo, apyrexia, extreme weakness, luminous spots before eyes, dryness in mouth and frequent hiccough; pulse small. θIntermittent.

‖Intermittent fever, quartan, with short, dry, hacking cough at night.

‖Pulse 100; temperature 104° F.; tongue red and cracked; heavy, sour sweats; troublesome dreams; bronchial

Digitized by Google

complications, with difficult, frothy, hemorrhagic expectoration. θRemittent fever.

Entire loss of consciousness and of functions of organs of sense; does not recognize relatives or friends; illusions of imagination and senses; delirium continued while awake; sees persons who are not and have not been present; indistinct and muttering loquacity; muttering with picking of bedclothes; inability to think, thoughts cannot be directed or controlled; constant staring at surrounding objects, with apparent entire self-forgetfulness. θTyphoid fever.

Great agitation; restlessness; jumping out of bed; attempts to run away; eyes red and sparkling, staring, rolling about in orbits; squinting; deafness; distorted face, stupid expression; tongue red or brown, dry and cracked, paralyzed; loss of speech, or indistinct speech; cadaverous smell from mouth; involuntary or unnoticed stools in bed; suppressed secretion or retention of urine; involuntary discharge of urine, leaving streaks of red sand on sheet; paralysis of spincter ani and vesicæ; convulsive motions; grating of teeth; jerkings; subsultus tendinum; trembling; sleeplessness, or constant sleep with muttering; coma vigil; roseola spots on chest and abdomen; cold extremities. θTyphoid fever.

Delirium, with attempt to jump out of bed and run away, sometimes with fear, sometimes without; when spoken to answers correctly in whole or in part, and then is gone again, muttering to himself; loquacity; talks nonsense continually with his eyes open, but does not pay attention to any one; thinks he is in the wrong place but does not want to go home; picking at bedclothes and playing with hands; throws off bedclothes so as to leave the genitals uncovered; plays with the genitals. θTyphoid fever.

Staring or squinting, either with one or both eyes; involuntary stools in bed and involuntary urination; paralysis of sphincter ani and vesicæ; marked subsultus tendinum. θTyphoid fever.

In typhoid and typhus fevers, especially typhus, when brain is active but wandering, patient laboring under hallucination of various kinds, but all centering in a desire to escape from room or from those around.

Lies on back, eyes wide open, staring and immovable; unconscious; face red, lips black, tongue dry and black; lower jaw hangs down; urine involuntary, it leaves large streaks of red sand on sheet; skin dry; pulse over 200; ill nine days. θTyphus.

Digitized by Google

Fever cases in which torpor of entire organism predominates; dull, fixed expression of face, delirium is lacking, or if present it consists of a confused farrago of complex images; the perceptive faculty is almost suspended.

Convulsions, mania, delirium, cough, and sleeplessness, all occur almost absolutely without any manifestations of fever.

[41] **Attacks, Periodicity.** Chill and heat: last two hours, followed by sleep which lasts three.

Every ten or fifteen minutes: an attack of twitching of limbs and muscles of face.

Every evening: congestion to head; burning heat of body.

Alternate days, 11 A.M.: chill without thirst.

Almost daily epileptic fits.

Three days: sleeps without interruption.

[42] **Locality and Direction.** Right: beating in eye; convulsive tremor in foot.

Left: pressure in side of forehead changing to shooting; dull percussion sound from lower edge of scapula downwards on side; abscesses on side of neck; inflamed ulcers.

From above downwards: sudden jerking in root of nose.

From within outward: pricking stitches.

[43] **Sensations.** Brain as if loose; as if water was swashing in head; undulating sensation in brain, as if from throbbing in arteries; as though a veil was before eyes; hands as if too large; hard hearing, as if stupefied; as if strangling; as if blood was forced into teeth; as if tooth would fall out; teeth feel loose and too long; as if abdomen would burst; as if he had fallen on abdominal muscles; as if heart and breast were torn to pieces; as if cervical muscles were too short; fingers feel too thick; as if palate was too long; as if mucus was lodged in throat.

Pain: in nape of neck; in meninges; in head; in teeth; in back; in region of liver.

Intense pain: in gums.

Severe pain: in head; in nape of neck.

Violent pains: in head; in teeth; in stomach; in pit of stomach.

Tearing raging pain: in teeth; toothache driving to despair.

Violent tearing and pulsating pains.

Great pain: during convulsion.

Very painful tenesmus.

Tearing: in r. eye; in teeth, extending to cheeks and lower jaw.

Beating: in r. eye.

Cutting: low down in abdomen.

Digitized by Google

Lancinating pain: in joints.
Stitches: in sides of chest.
Stitching pain: in head; in region of liver.
Shooting: in l. side of forehead; from eyes into nose and head; in throat.
Stinging: in internal chest.
Sticking: in umbilical region.
Pricking pains: in throat.
Pinching: in root of nose; in zygomata; in abdomen.
Throbbing pain: in teeth.
Jerking: in teeth.
Labor-like pains: previous to menstruation.
Cramp pressure: at root of nose and malar bone.
Cramps: in stomach; of whole body; in thigh; of extremities.
Cramp-like pain: in abdomen.
Hysterical colic.
Pulsating pain: in teeth.
Painful epigastrium and hypochondria.
Burning heat: all over.
Burning: in throat; in stomach.
Heat: in head; over whole body.
Painful warmth: after applying hands to parts.
Soreness: of soft parts between gums and cheeks; of abdominal muscles; of muscles of chest; of throat.
Constrictive, stupefying pain: in upper part of forehead.
Pressing, stupefying pain: in forehead.
Aching, stupefying pain: over eyes.
Dull pain: in region of liver.
Dull aching: about liver.
Bruised feeling: on moving parts.
Pulling: in loins; in small of back.
Drawing: in nape of neck; in teeth; in loins; in small of back.
Contraction: of stomach; of sphincter ani.
Painful numbness: of hands.
Vacant feeling: in head.
Tickling: in throat.
Pressure: in vertex; in l. side of forehead; in root of nose and zygomata; in bladder; in head.
Heaviness: of head.
Oppression: of chest.
Constriction: of throat.
Tight feeling: across chest.
Stiffness: of cervical muscles; of arms and legs.
Numbness: of hands; of tongue; of œsophagus.
Weakness: after paroxysms; of legs.
Tingling: in head.

Digitized by Google

Buzzing sensation: in teeth.
Buzzing, singing, rushing: in ears.
Parching dryness: of tongue.
Dryness: of mouth; of throat.
Violent pulsation, like waves: in head.
Tremor: of limbs; all through body.
Quivering: in eyes.
Twitching: in eyes; of muscles of face; in cheeks; of limbs; convulsive, of abdomen.
Shudderings and rigors: in spine going up into head.
Trembling: of arms and hands; of limbs.
Convulsive trembling: of hands and feet; in r. foot.
Itching: around part.
Coldness: of hands and feet; of spine.

" **Tissues.** ‖Convulsions, spasms, cramps, epilepsy, chorea and other spasmodic affections; in women and children.
‖Expanded and puffed up veins; full pulse.
‖Hemorrhages usually light red.
A constant flow of bright red blood, with bluish face.
Obesity.
Skin and muscles lax.
Obstinate dropsy.

" **Touch. Passive Motion. Injuries.** Touch: pit of stomach tender; abdomen sore; hypogastrium painful; inflamed ulcers <.
After applying hand to parts: painful warmth.

" **Skin.** ‖Great sensitiveness of skin.
‖Hot, dry, brittle skin, want of sensation.
‖Painful warmth after applying hand to parts.
‖Skin often pale, with delirium; body hot.
‖Skin red, or with red rash.
‖Skin of bright red hue, resembling scarlet fever, with dry, sore throat and much nervousness.
‖Scarlatina, with marked mental symptoms.
‖Stupid drowsiness, or else great nervous excitability and sleeplessness; utter stupidity, or else illusions of imagination and senses; vacant staring at things, or else sparkling red, prominent eyes; embarrassed, indistinct speech; answers no questions, or else indistinct muttering loquacity; mouth and throat dry and red; inability to swallow; abdomen distended, tympanitic; watery, involuntary and unnoticed stools in bed. θScarlatina.
‖Scarlatina with acute inflammatory affections of brain, or when there is a condition between erethism and torpor.
‖Miliary eruption especially after abuse of *Bellad.*
‖Varicella; vesicles in crops, sleepless; nervous, dry cough, must sit up.
‖Large pustules, clustering from hips to knees.

Digitized by Google

‖Eruption of dry pimples like confluent small-pox.
‖Repelled eruptions, with tendency to diarrhœa.
‖Frequent large blood boils.
‖Ulcers painful, bleeding; bruised feeling on moving part.
‖Inflamed ulcers, surrounding skin being of a bright vermilion redness; large pustules around ulcers; < evening, during menses, from touch; > when getting warm; l. side.
‖Anthrax in nervous and hysterical persons; coma vigil; great restlessness caused by excessive nervous excitement, shaking of head in all directions; constriction of pharynx; itching around part.
‖Gangrene, with nervous restlessness.
‖Brown or gangrenous spots.

Stages of Life, Constitution. ‖Nervous, irritable, excitable, sanguine temperaments.
Light haired people.
‖Hysterical women and young girls; old men; drunkards.
Child, æt. 6 weeks, without any premonitory symptoms; lethargy.
Boy, æt. 2, sudden attack; maniacal fury.
Boy, æt. 6; catarrhal pneumonia.
Boy, æt. 13; rheumatic endocarditis.
Boy, æt. 14; insanity.
Girl, æt. 15; chronic palpitation of heart.
Girl, æt. 18; epilepsy.
Girl, æt. 20; spasms of chest.
Woman, æt. 21, strong and healthy, after fright; loss of speech.
Man, æt. 23, previous good health, sudden insanity.
Woman, æt. 24, suffering five weeks; convulsive tremor in foot.
Woman, æt. 25, quiet and peaceable disposition, after some mental shock, epileptic attacks, which, five days after childbirth, were followed by mania.
Woman, æt. 27, suffering four weeks; hysteria.
Young woman, apparently well, except recently had irregular menses; mania.
Very irritable lady; effects of jealousy.
Mrs. R., weak, nervous temperament, three weeks after confinement; diarrhœa.
Woman, after having been cured of a previous fit of insanity, after drinking; insanity.
Brandy drinker, within six years has had attacks; delirium tremens.
Woman, æt. 30, after being accused of theft; affection of mind.

Digitized by Google

Man, æt. 30, after fit of passion; melancholia followed by madness.
Man, æt. 33, suffering several weeks; chest affection.
Woman, æt. 36, tradesman's wife, lymphatic temperament; delirium tremens.
Woman, æt. 37, drunkard; mania.
Woman, æt. 37, suffering from daily paroxysms for more than a year; convulsions.
Man, æt. 38; frequent micturition.
Man, æt. 48; insanity.
Man, æt. 50, for some years monomania; insanity.
Woman, æt. 59, unmarried; apoplexy.
Old man; diarrhœa.
Man, æt. 70, suffering a year; frequent micturition.
Mrs. P., æt. 85, health has been failing for several weeks, less activity of mind and body, restless at night, fearing to be alone in the dark; hallucinations.

[46] **Relations.** Antidoted by: Vinegar, *Bellad.*, *Citric acid*, *Cinchon.*, *Stramon.*
It antidotes: *Bellad.*, effects of ether, *Plumbum*, *Stramon.*
Compatible: *Bellad.*, *Pulsat.*, *Stramon.*, *Veratr.*, all follow well when indicated; *Phosphor.* often cures lasciviousness when *Hyosc.* fails; *Hyosc.* follows *Bellad.* well in deafness after apoplexy; *Nux vom.* or *Opium* in hæmoptysis of drunkards; *Bellad.* and *Opium* in congestive chills.

[1] **Mind.** ||Makes mistakes in writing; omits letters; forgets what she wanted to say; confused.

Increase of intellectual power.

||Erotic ideas; brain excited, as after tea.

Sees spirits; spectres; delirium.

‖Talking nonsense in her sleep at 4 o'clock in morning; disturbed look, stares at people; head hot, carotids throbbing; flushed and bloated face; eyes fixed, pupils dilated; frequent pulse; hair moist, rest of body burning hot; great anxiety; singing, followed by weeping and loud screaming, with gasping for breath; beating headache, especially in vertex; tearing stitches in brain; crawling in hands and feet, as if they were numb; great thirst; white coated tongue.

||Great anxiety. θMeningitis.

Melancholy.

Irritable, inclined to speak sharply; slept badly, languid on waking.

‖Consequences of fright; effects of shock.

[2] **Sensorium.** Heaviness and dizziness in head.

‖Vertigo: at night, with urging to urinate; with loathing on waking; with pain in temples; in afternoon, with feeling of weakness and trembling of limbs; sensation as if head became suddenly elongated.

Digitized by Google

‖Sensation as if being lifted up high into air; tormented by anxiety that the slightest touch or motion would make her fall down from this height; with headache after a fall on occiput.

‖Confused sensation in vertex with buzzing sensation at night, as if something living were in brain.

‖Asphyxia after a fall; when jerkings or shooting pains appear.

[3] **Inner Head.** ‖Tearing stitches in brain; beating, mostly on vertex. θMeningitis.

‖Burning in vertex, pulsation and heat.

‖Dull headache, only on vertex, gradually increasing as if whole brain would be pressed asunder, with inability to perform any kind of labor; loathing; tingling, drawing pains in cheeks and chin.

‖Violent headache after puerperal rash; throbbing in vertex, moves to cheeks and chin, where it changes to tingling, drawing pains; brain feels compressed, becomes stupefied.

‖Throbbing in vertex, and heat in head in afternoon.

‖Headache as if brain would be torn to pieces.

‖Sensation as if head became elongated.

‖Dull headache, head heavy; morning.

‖Headache after breakfast.

‖Headache, with sore eyes, after a fall.

‖Headache, extending into zygoma or cheeks.

‖Pressive pain in occiput on motion; also with drawing stitches; tearing; back of head feels "bothered;" severe scalp headache l. side of occiput, after breakfast, at other times dull; shoot of dull pain up l. occipital nerve.

‖Headache after a fall upon occiput, combined with a sensation as if being lifted up high into air; she was tormented by the greatest anxiety that the slightest touch or motion would make her fall down from this height.

[4] **Outer Head.** Sensation in forehead as if touched by an icy cold hand, in afternoon, after which a spasmodic contraction is felt in r. eye.

‖Pressure in l. temple, after breakfast.

‖Curling sensation on vertex.

‖Head hot, carotids throbbing.

‖Hair moist, rest of body burning hot.

‖Heat and pressure on vertex.

‖Severe bone pains in cranium.

‖Fractured skull; bone splintered.

‖Humid eruption on scalp with children.

[5] **Sight and Eyes.** ‖Disturbed look, stares at people, eyes fixed; pupils dilated.

‖Pain and irritation of eye, from an anterior synechia re-

Digitized by Google

sulting from an injury several years previously; healthy eye also irritable.
‖Stitches in r. eye.
‖Stye on lower left lid.

[6] **Hearing and Ears.** ‖Sensitiveness of hearing; during catamenia.
‖‖Shooting through the ear.
‖‖Ears hot; scurf on ear.

[7] **Smell and Nose.** ‖Exceedingly fine sense of smell.
‖‖Nose dry, very annoying.
‖‖Sneezing, leaving a raw sore feeling in throat.
‖Sores inside nose, itching; all the time picking nose.
‖‖Dryness of nostrils; crusts in it.

[8] **Upper Face.** Suffering expression.
‖Face hot, bloated. θMeningitis.
‖‖Cheeks red; erysipelatous redness.
‖‖Dull faceache, aching in brows; afternoon, evening; < at night, disturbing sleep.
‖Headache extending into zygoma or cheek.
‖Red eruption on both cheeks, chin and nose; sometimes dry, with thin crusts; sometimes fiery red, oozing yellow drops.

[9] **Lower Face.** Tension in the cheek.
‖‖Lips dry, feel hot.
‖Eruption around mouth and on r. ear.
‖Yellow-greenish scabs, with cracking and moisture.

[10] **Teeth and Gums.** ‖Severe aching in decayed tooth at night; restless, wakeful; > lying on affected side, and keeping quiet.
Injuries to dental nerves.

[11] **Taste and Tongue.** Taste: insipid; of blood.
‖Tongue coated white or yellow; great thirst. θMeningitis.
‖Great soreness of tongue, from lacerated wounds, with inability to speak, not from stiffness or swelling, but extreme soreness.

[12] **Inner Mouth.** ‖Dry, burning heat in mouth and on lips.

[13] **Throat.** Expansion of throat and abdomen.
‖‖Sensation as if a worm was moving in throat.
‖‖Hot rising in œsophagus after a fright, or with anxious feelings.
‖‖With hemming, some bright, red blood comes up.

[14] **Appetite, Thirst. Desires, Aversions.** ‖Desire for warm drinks. θMeningitis.
‖‖Great thirst, white tongue; in morning after heat and delirium.
‖Thirst with feeling of heat in mouth; violent thirst.
‖‖Desire for wine; for pickles.
‖‖Appetite increased morning and evening.

Digitized by Google

[15] **Eating and Drinking.** Tastelessness.
‖Belching, when drinking water.
‖Smoking tobacco does not taste well.
After breakfast: headache, eructations, gastric symptoms, pressure in stomach toward back; pains in limbs.
After supper; flatulence and diarrhœa.

[16] **Hiccough, Belching, Nausea and Vomiting.** Eructations: tasteless; bitter; preventing sleep at night; < after drinking water.
‖Nausea: weakness every morning; abdomen distended, pains in bowels, awaking in night; with headache on vertex.
‖Vomiting.

[17] **Scrobiculum and Stomach.** Pressure at stomach on eating but little.
Sticking in stomach.
Pain in stomach, nausea, diarrhœa and chill after eating.

[18] **Hypochondria.** Sticking or dragging pain in r. hypochondrium.

[19] **Abdomen.** ‖Tympanitic distension of abdomen; relieved by a stool.
‖Cutting in belly, in region of navel.
‖Pinching pains; diarrhœa; catamenia.
‖Colic.
‖Pain after operation for incarcerated hernia.

[20] **Stool and Rectum.** Awakes with distended abdomen, relieved by stool.
‖Diarrhœa driving out of bed in morning.
‖Loose, bilious, yellow stools evening or morning.
‖Summer diarrhœa, with eruptions on skin.
‖Cholera morbus, slimy stools; afterward constipation; flesh sore all over; feet swollen, urine lessened.
‖Constipation; violent tenesmus, with discharge of a hard little ball; with nausea.
‖Rectum feels dry, morning.
⁞Hemorrhoids.

[21] **Urinary Organs.** Vesical tenesmus.
‖Swelling and hardness of female urethra, with burning, soreness and sensitiveness; especially if caused by instruments for uterine prolapsus.
‖Nightly urging to urinate, with vertigo.
Retention of urine.
Urine: much diminished; bloody; turbid; of peculiar odor.

[22] **Male Sexual Organs.** Sexual functions excited.
Tearing in genital organs, with desire to urinate.

[23] **Female Sexual Organs.** Inflammatory conditions of mucous membranes of uterus and vagina.

Digitized by Google

Menses: delay a fortnight; too late, with tension in uterine region, as from a tight bandage; increased in quantity; three days before their appearance, pinching in abdomen, diarrhœa, cold feet; headache, wrenching pain over eyes, > in motion; severe headache; attended by sickening pain in belly and sensitiveness of hearing.

Leucorrhœa: with delayed menses, palpitation, pressure in small of back; with heaviness in lower bowels; in a child, milky, but corroding.

⁞Chlorosis of marriageable girls.

⁞Scirrhus of breast caused by injury.

[24] **Pregnancy. Parturition. Lactation.** Labor pains tardy.

ǀAfterpains violent, in sacrum and hips, with severe headache; after instrumental delivery.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness, with scraping and roughness in larynx, upper part of pharynx and nares, in a foggy atmosphere.

[26] **Respiration.** ǀSpasmodic asthmatic attacks: with changes of weather from clear to damp, or before storms; cannot lie for any length of time upon back; attacks > by copious expectoration from bronchial tubes; after lesion of spinal cord, by a fall, years before.

[27] **Cough.** ǀSpells of short, barking cough. θMeningitis.

ǀFrequent dry, hacking cough.

ǀǀHacking cough, from irritation in throat, < by heat and cold air.

Dry cough and prostration in morning.

ǀWhooping cough, worse from 6 to 10 P.M.; great nervous prostration.

[28] **Inner Chest and Lungs.** Anxiety in chest, in forenoon, with short breath, dizziness and bitter belching.

ǀTightness in chest.

Pressure and burning in chest.

Stitches in chest between breasts.

Stinging in left chest, < when moving.

Cutting in upper right chest, then in lower left.

⁞Consumption with hæmoptysis.

[29] **Heart, Pulse and Circulation.** Violent beating of heart.

Pulse: quick and hard; frequent.

Local congestions, and capillary erethism, with or without hemorrhages and great nervous depression, following wounds.

[30] **Outer Chest.** Stitches under mammæ.

Continual stitches from within outward, through l. breast and sternum, < from motion.

Stinging burning pain on one edge of l. pectoral muscles.

Dull pressure, r. chest, from seventh rib downwards, after breakfast.

Digitized by Google

[81] **Neck and Back.** ‖Cervical vertebræ very sensitive to touch.
‖Stinging near edge of right scapula near spine; morning.
‖Cutting between scapulæ.
‖Back lame and painful.
‖Stitches in small of back.
‖Aching pain and sensation of lameness in small of back.
‖Backache after confinement.
‖After falling out of hammock, great pain in spine, growing daily more severe; she could not sit except upon an air cushion.
‖Every four weeks attack of illness lasting 4 to 8 days, beginning with chill, followed by long continued fever, with dry, parched skin, headache, especially towards evening, restlessness, jactitation, supersensibility of surface of neck and of superior extremities, great dread of motion, would not walk and screamed outright if any one proposed to lift her from one place to another, insisting all the while that she should be held in lap; face pale and anxious, white around mouth, and expression of suffering and uneasiness; anorexia; slight thirst for warm drinks; dry, hacking cough from irritation in throat, < from least exposure to cold air; tongue white, taste insipid; cervical vertebræ very sensitive to touch. θAfter a fall.
‖After a fall: slightest motion of arms or of neck extorts cries; cervical vertebræ very sensitive to touch; headache; desire for warm drinks; asthmatic spells, or spells of short, hacking cough.
‖An ice-man struck back violently against curbstone by being thrown from wagon; he felt a momentary intense pain shoot down both legs, but was afterwards able to get up, and serve out the rest of his route; in afternoon was unable to hold urine, which dribbled away without his being aware of it; next morning on attempting to rise legs seemed "as if drunk;" pulse feeble; temperature normal; breathing slightly labored, no pain along spine, nor any spasmodic movement; sphincter muscles partially paralyzed; walks with a rolling motion; legs felt "as if dead." θConcussion of spine.
‖Boy fell from shed, but did not seem much hurt; next night, however, began vomiting; in morning was slightly delirious, but could easily be aroused to answer questions; severe pain in head and down spine, greatly intensified by attempting to move arms or legs; pupils dilated; face puffed and hot; tongue coated yellowish; mouth dry, but did not wish to drink water, desired warm milk; pulse 140, full and hard, temperature 104½ F.; constipated, stools consisting of small, hard

Digitized by Google

lumps; urine thick and muddy, and had the appearance of beer. ♂Traumatic meningitis.

‖Boy, æt. 14, fair, of lively temperament, was attacked while husking corn with numbness of limbs, and pain in upper part of spinal cord; spinal column from cervical vertebræ to region of kidneys, tender to touch; paroxysms of pain with symptoms of mania, pains principally in joints and changing about; almost constant dull headache; least touch on spine between cervical and lumbar regions made him shrink.

‖Violent pains and inability to walk, or to stoop after a fall on coccyx; feet feel pithy, as if pricked with needles.

‖Lies on back jerking head backward.

‖‖Consequences of spinal concussion.

Upper Limbs. Flying pains in r. shoulder.

Cutting under left scapula.

Pressure at insertion of right deltoid.

Stitches on top of shoulder at every inspiration.

Hard pain running down left median nerve.

Numbness in l. arm; > from rubbing.

Dry herpetic eruption on outer side of arms, < on right.

‖Excruciating pain after amputation of arm; fainting.

Tension in both arms and in hands.

Cutting in fleshy ends of fingers.

‖Compound dislocation of two fingers, with severe laceration and tearing of external structure, the members being severed except by a narrow bridge of skin uniting them to the body (applied locally).

Pain in last phalanges of fingers, < in thumb, fore and little fingers.

‖Panaritium.

Lower Limbs. ‖After severe injury to sciatic nerve, sharp, cutting pains, darting along course of nerve and terminating in a twisting or wrenching sensation in foot.

‖‖Sciatica, rheumatism.

‖‖Coxalgia after confinement.

‖Left leg numb, cold while sitting.

Weakening drawing, over front of legs; shoots of pain, as if in periosteum.

Fearful pains in knees, sharp, could hardly touch them.

‖‖Articular rheumatism in knee; effusion around joint; muddy urine, looking like settlings of beer; pains sharp, < least touch; tearing pains.

‖The feet feel pithy, as if pricked with needles.

‖Lying in bed the feet tingle.

Sensation as if l. foot was strained or dislocated.

‖Same evening, after running pin into foot, intense pain at seat of injury; toes became rigid, ankle stiffened,

Digitized by Google

chills chased each other down back, followed by nausea and vomiting; she fainted, and on coming to, still complained of the agonizing pain; strange expression of face, eyes set, lips drawn tightly across teeth.

After running pins in r. foot pain runs up limb through spine to neck and face; muscles of neck and jaw become rigid, < r. side, and also muscles of abdomen and thorax. θTetanic symptoms.

Toes of r. foot crushed by heavy iron shutter, and almost severed from foot, the bones protruding in several places; considerable hemorrhage; excruciating pain; depressed and cold.

Gout.

Bunions excruciatingly painful (locally).

Cannot walk, spine affected.

[34] **Limbs in General.** Feeling of weakness and trembling of all the limbs.

Bruised sensation in all the joints.

Rheumatoid inflammation of joints.

Crawling in hands and feet, as if they were numb.

Sensation of lameness of l. arm and right foot.

Crawling in hands and feet, they felt fuzzy.

Compound fractures of hands and feet, with great laceration of soft parts.

Affections of joints.

[35] **Rest. Position. Motion.** Keeping quiet: toothache >.

Lying in bed: feet tingle.

Lying on affected side: toothache >.

Lies on back: jerking head backwards.

Sitting: l. leg cold.

On rising: languor.

Cannot lie for any length of time upon back.

Could not sit except on air cushion; screamed when it was proposed to lift her to another place.

Motion: pressive pain in occiput; wrenching pain over eyes >; continual stitches through l. breast and sternum.

Slightest motions of arms or neck extorts cries, after a fall.

Great dread of motion.

Physical effort causes fainting.

Would not walk.

Cannot walk or stoop: after a fall on coccyx.

[36] **Nerves.** Effects of nervous shock.

Great weakness.

Weariness on awaking; goes off by noon.

Great nervous depression following wounds.

After being frightened by a practical joke, became very pale and hysterical; pulse 54, very weak and compressible; respiration 15 and sighing; temperature 96°; skin cold and clammy; slight vomiting. θShock.

Digitized by Google

Jerks in limbs.

‖Convulsions from blows upon head or concussion; dull headache, on vertex, or severe headache, with throbbing on top of head.

‖Spasms after slight injuries, in children.

‖Epileptiform spasms after hard knocks.

‖‖Tetanus after traumatic injuries.

‖‖Opisthotonos.

‖Prevents lockjaw from wounds in soles of feet, fingers, or palms of hands.

‖Removes ill effects of local shock, prevents in a great measure sympathetic irritation of system from local derangement and modifies subsequent inflammation and sloughing. θGunshot wounds.

‖‖Injuries to nerves, attended by great pain.

‖Especially adapted to mechanical injuries of spinal cord, and nerves at their peripheral extremities.

‖Nervous disorders arising from falls and hurts.

‖Lacerated nerves, causing excruciating pain.

[37] **Sleep.** Constant drowsiness.

Spasmodic jerks of arms or legs on going to sleep; twitchings.

On awaking: weary, > by noon; feels refreshed; bowels distended.

Dreams: with activity, traveling; vivid; distressing.

[38] **Time.** 4 A.M.: talking nonsense in sleep.

Morning: dull headache, head heavy; great thirst, white tongue; appetite increased; diarrhœa drives out of bed; loose, bilious, yellow stools; rectum feels dry; dry cough and prostration; stinging near scapula; after a fall slightly delirious.

After breakfast: headache; severe scalp headache; pressure in l. temple; eructations; gastric symptoms; pressure in stomach; pains in limbs; dull pressure in r. chest.

Noon: weariness >.

Afternoon: feeling of weakness and trembling of limbs; throbbing in vertex; sensation as if forehead was touched by an icy cold hand, after which contraction of r. eye; dull faceache; brows ache; unable to hold urine.

4 P.M.: eruption like nettlerash on both hands.

Evening: dull faceache, brows ache; appetite increased; loose, bilious, yellow stools; dry, parched skin, headache; intense pain at seat of injury; eruption on both hands.

After supper: flatulence and diarrhœa.

Night: vertigo; urging to urinate; dull faceache <; severe aching in decayed tooth; eructations preventing sleep; awakening at night from pain in bowels; vomiting, after a fall.

Digitized by Google

[39] **Temperature and Weather.** Sensitiveness to cold.
Attacks return with changes of weather from clear to damp, or before storms; after lesion of spine by a fall, spasmodic asthma.
Foggy atmosphere: hoarseness, with scraping and roughness of larynx, upper part of pharynx and nares.
Heat: hacking cough <.
Cold air: hacking cough <; least exposure < symptoms.

[40] **Fever.** Shuddering over whole body, with desire to urinate.
Heat, with delirium, wild staring look, hot head, throbbing of carotids, bright red bloated face, moist hair on head, burning heat of skin, great oppression and anguish.
Chill followed by heat, with sweat on hands and feet.

[41] **Attacks, Periodicity.** Every morning: nausea, weakness.
From 6 to 10 P.M.: whooping cough <.
Three days before menses: pinching in abdomen.
Every four weeks: attacks of illness, lasting 4 to 8 days.
Summer: diarrhœa.

[42] **Locality and Direction.** Right: spasmodic contraction of eye; stitches in eye; dull depression in chest; stinging near edge of scapula near spine; flying pains in shoulder; pressure at insertion of deltoid; dry, herpetic eruption on outer side of arm; pains through limb, spine, neck and face; excruciating pain in crushed toes; lameness of foot.
Left: severe scalp headache in side of occiput; shoot of dull pain up cervical nerve; pressure in temple; stye on lower lid; continual stitches through breast and sternum; stinging burning pain on one edge of pectoral muscles; cutting under scapula; hard pain running down median nerve; numbness in arm; leg numb; leg cold while sitting; sensation as if foot was strained or dislocated.
Before backward: pressure in stomach.
Upper r. to lower l.: cutting in chest.
Left upper and r. lower: sensation of lameness of arm and foot.
Above downward: pain down l. median nerve; pain down from vertex to face.

[43] **Sensations.** Brain excited as after tea; as if hands and feet were numb; as if head became suddenly elongated; as if being lifted up high into air; as if something alive was in brain; as if whole brain would be pressed asunder; brain feels compressed; as if brain would be torn to pieces; as if forehead was touched by icy cold hand; as if a worm was moving in throat; as from a tight

Digitized by Google

bandage in uterine region; legs as if dead; feet feel pithy as if pricked with needles, as if l. foot was strained and dislocated; hands and feet as if numb; skin as if full of knots.

Pain: in temples; in head; in head extending to zygoma or cheeks; in eye; in limbs; in bowels; in stomach; after operation for incarcerated hernia; in back; in upper part of spinal cord; in joints; in last phalanges of fingers; in old cicatrices.

Intense pain: in momentary shoots down both legs.

Excruciating pain: after amputating arm; in r. foot, after crushing toes with heavy iron shutter; in bunions.

Fearful pains: in knees.

Agonizing pain: in foot after running in a pin.

Sickening pain: in belly.

Violent pain: in head.

Great pain: in spine.

Severe pain: in head; in spine; in cranial bones.

Severe headache: in scalp; l. side of occiput.

Sharp pain: in knees.

Sharp, cutting pain, darting along course of sciatic nerve terminating in a wrenching, twisting sensation in foot.

Cutting: in belly and in region of navel; between scapula; under l. scapula; in fleshy ends of fingers.

Beating: headache; in vertex.

Tearing: in male genitals.

Tearing stitches: in brain.

Wrenching pain: over eyes; in foot.

Pinching pain: in abdomen.

Stitches: in r. eye; under mammæ; through l. breast and sternum; in small of back; on top of shoulder at every inspiration

Drawing stitches: in occiput.

Shooting: through ear.

Flying pains: in r. shoulder.

Tingling, drawing pain: in cheeks and chin.

Dragging pain: in hypochondrium.

Sticking: in stomach; in hypochondrium.

Stinging: near edge of r. scapula.

Throbbing: in vertex, moves to cheeks and chin.

Severe aching: in decayed tooth.

Aching pain: in small of back.

Pressive pain: in occiput.

Hard pain: running down l. median nerve.

Stinging, burning pain: on one edge of l. pectoral muscle.

Burning soreness: of female urethra.

Burning heat: in whole body; in mouth; in lips.

Burning in vertex.

Digitized by Google

Dull pressure: in r. chest.
Shoot of dull pain: up l. occipital nerve; in legs.
Dull pain: in head; in face; in brows.
Soreness: of eyes; of inside of nose; of tongue; all over.
Bruised sensation: in all joints.
Sensitiveness: of female urethra.
Raw, sore feeling: in throat after sneezing.
Heat: in vertex; in ears; in lips.
Weakening drawing: over front of legs.
"Bothered" sensation back of head.
Confused sensation: in vertex.
Spasmodic contraction in r. eye.
Pressure: in l.temple; on vertex; in stomach toward back; in small of back; at insertion of r. deltoid.
Tension: in cheek; in both arms and both hands.
Lame feeling: in back.
Weakness: of limbs.
Heaviness: in head; in lower bowels.
Pulsation: in vertex.
Shuddering: over whole body.
Hot rising: in œsophagus.
Scraping and roughness: in larynx; upper part of pharynx; of nares.
Dryness: of nostrils; of rectum.
Fuzzy feeling: in hands and feet.
Buzzing sensation: in head.
Curling sensation: on vertex.
Tingling: in carotids; in feet.
Trembling: of limb.
Crawling: in hands and feet.
Numbness: of limbs; in l. arm.
Violent itching: of skin; of tetter.
Itching: of nose; in sacral region.

"Tissues. ‖Local congestions; nervous erethism, with or without hemorrhage; great nervous depression following wounds.

Congestion to head, lungs or heart.

‖Next to nervous tissues, the joints are affected; all articulations feel bruised.

‖Injuries of parts rich in sentient nerves, particularly fingers and toes, and matrices of nails; open, painful wounds, with general prostration from loss of blood, and great nervous depression; lacerated wounds.

‖Mashed, punctured and torn wounds, when nervous tissues are mainly concerned; lacerations of skin; injuries of vertebral region, of tissues of animal life, as hands and feet.

‖Lacerated wounds, or other injuries to nerves, in which there is much soreness, with jerking in the muscles.

Digitized by Google

‖Violent, excruciating pains from laceration of nerves.
‖Excessive painfulness of affected parts, showing nerves to be attacked.
‖Preserves vitality of torn and lacerated members when almost entirely separated from the body.
‖Lacerations when intolerable pain shows nerves are severely involved.
‖In slighter forms of lacerated wounds, if applied early, will sometimes arrest, and always modify the occurrence of ulceration and sloughing.
‖Gunshot wounds when the parts have been extensively lacerated and torn, with engorgement of the capillaries, attended with more or less discharge of bloody serum.
‖Piercing wounds from pointed instruments.
‖‖Punctured, incised, contused or lacerated wounds, when pains are extremely severe, and particularly if they are of long duration; pains like those of a severe toothache; pains spread to neighboring parts and extend up limb.
‖Open, painful wounds, with general prostration from loss of blood, feeling of weakness and trembling in all the limbs; languor on rising, fainting from physical effort, thirst and heaviness of head.
‖Mechanical injuries, wounds by nails or splinters in feet; needles under nails; squeezing or hammering of toes and fingers; when the nerves have been lacerated, wounded, or torn, with excruciating pains. It prevents lockjaw from wounds in soles of feet, or of fingers and palms of hands.
Always modifies and sometimes arrests ulceration and sloughing.
‖‖Hard, yellow crusts form on the healing wound.
‖Pain in old cicatrices.
‖‖Stings of insects and bug bites; burns.

40 **Touch. Passive Motion. Injuries.** ‖‖Punctured wounds feel very sore: from treading on nails, needles, pins, splinters, rat bites, etc.; prevents lockjaw.
‖Wounds from crushing, as mashed fingers, especially tips.
‖Nerves lacerated, pains excruciating.
‖‖Painful wounds before suppuration.
‖Rheumatism, bunions, corns, etc., when pains are so disproportionately severe as to show nerves are attacked.
After a knock or blow on head: spasms.
‖‖Consequences of spinal concussion. See chaps. 31 and 44.
Touch: cervical vertebræ sensitive; on spine between cervical and lumbar region made him shrink; < sharp pains in knees.
Rubbing: > numbness of arm.

Digitized by Google

After using instruments for uterine prolapsus: burning soreness of female urethra.
After a fall: asphyxia; headache with sore eyes; lesion of spinal cord; asthmatic attacks; great pain in spine; unable to hold urine; sphincter muscles partially paralyzed; vomiting at night; slightly delirious in morning; severe pain in head and down spine.
After a fall upon occiput: headache with sensation as if she was being lifted high up into air.
After a fall on coccyx: violent pains and inability to walk or stoop.
After hard knock: epileptiform spasms.
Blows upon head: convulsions.
Following wounds: great nervous depression.
Gunshot wounds.
Piercing wounds: from sharp instruments.
Compound fracture of hands and feet.
After severe injury to sciatic nerve: sharp cutting pains darting along course of nerve.
Slight injuries in children: cause spasms.
Injuries to dental nerves.
Injury several years ago: pain and irritation of eye from anterior synechia.
After running pins into foot: intense pain; toes rigid, ankle stiffened, chills in back; pains run up limb, through spine to neck and face; muscles of neck and jaw become rigid.

[46] **Skin.** Great itching when undressing, most in sacral region.
Violent itching; smarting.
Skin rough, as if full of small knots.
Pimples on forehead, throat, back, hips.
Eruption like nettlerash on both hands, at 4 P.M. and in evening.
Smarting eruption, like nettlerash, on hands.
Tetters, beginning with sore places, and forming hard, yellow crusts, with violent itching.
Eruptions accompanying diarrhœa in Summer time.
Hard, dry, yellow crusts form on wounds or open sores.
Foul, torpid and phagedenic ulcers.

[47] **Stages of Life, Constitution.** Girl, æt. 6, three years ago fell down steps, since which time she has been in poor health; affection of spine.
Boy, æt. 7, after falling from roof of shed; traumatic meningitis.
Girl, æt. 14, timid and impressionable, after being greatly frightened by a practical joke; shock.
Robust young lady, after fall upon occiput; headache.
Mason, æt. 29; crushing of r. foot.

Digitized by Google

Mrs. E. M. C., æt. 32, after falling from hammock; pain in spine.
Ice-man, æt. 32, after being thrown from wagon; concussion of spine.
Woman, æt. 40, stepped upon a paper of pins, a number of which penetrated sole of r. foot quite deeply; tetanic symptoms.
Strong woman, æt. 45, mother of five children, in fifteenth year fell down steps and injured spine, has suffered with chest affection for ten years; spasmodic asthma.

[45] **Relations.** Antidoted by: *Arsen.* (weakness or sickness in the morning); *Chamom.* (pains in face).
Antidotes: Effects of mesmerism (*Sulphur*).
Compare: *Acon.*, *Agar.*, ‖ *Arnic.*, *Arsen.*, ‖ *Callend.*, *Chamom.*, *Coccul.*, *Ruta*, *Staphis.*, *Sulphur.*

IBERIS AMARA.

Bitter Candy Tuft. *Cruciferæ.*

Provings by Sabin and Dodge, under supervision of Hale. See Allen's Encyclopedia, vol. 5, p. 60.

CLINICAL AUTHORITIES.—*Heart affections*, Williams and Sylvester. See Note, Allen's Encyclopedia, vol. 5, p. 61.

[1] **Mind.** Sad, downhearted, oppressed, with desire to sigh.
‖ Very irritable, with dulness of mind and lack of memory.
Nervous and irritable on rising in morning.
Feels as if frightened; an indefinable dread with trembling.
An excited, frightened feeling, with cold sweat on face.
Peculiar inability to fix mind on any one thing.

[2] **Sensorium.** Vertigo: with dull pain and chilliness; when rising, morning, had to lie down; when making any exertion, with nausea; when standing, < on stooping; in back part of head, as if occiput was turning around.
Entering the house after walking felt faint.
Heat and fulness in neck and head, with flushed face and cold feet and hands.
Heaviness of head, with roaring in ears.

[3] **Inner Head.** Pain in r. side of head.
‖ Frontal headache: on rising in morning; with nausea and loss of appetite.
Heat in head and neck and flushed face.

Digitized by Google

Dull pain in head, with vertigo and feverish chilliness.

[5] **Sight and Eyes.** Red eyes with flushed face.

| | Feeling in eyes as if being forced outward.

Flashes before eyes, with dull headache and palpitation of heart.

[7] **Hearing and Ears.** Dulness of hearing and comprehension.

Dull hearing and labored breathing.

Roaring in ears, with heaviness of head, slight nausea and palpitation of heart.

[8] **Upper Face.** Looks as if he had been ill a long while.

Flushed hot face and red eyes, with palpitation.

Cold sweat on face, with fearfulness.

[13] **Throat.** Throat dry as if filled with dust.

Throat feels as if both tonsils were enlarged.

| | Constant hawking up of thick, viscid, stringy mucus > after a meal.

Choking sensation: in throat, with fulness and heat; just above cricoid cartilage.

Constrictive sensation in throat, with stabbing pains in heart, dyspnœa and palpitation.

[14] **Appetite, Thirst. Desires, Aversions.** Loss of appetite, with feeling of indigestion.

Desire for stimulants.

[15] **Eating and Drinking.** After eating: sour belching; hawking of stringy mucus >.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea, with cold, chilly feelings over body.

[18] **Hypochondria.** Fulness and oppression in r. hypochondriac region.

Pain in region of liver with clay colored stool.

[19] **Abdomen.** Fulness and distension of bowels.

Tenderness of bowels, with thin, whitish stool.

[20] **Stool and Rectum.** Stool: clay colored; thin, whitish; large, white.

[21] **Urinary Organs.** Frequent but scanty urination.

Excessive evacuation of urine.

[25] **Voice and Larynx. Trachea and Bronchia.** Choking sensation just above cricoid cartilage.

Dryness in larynx and throat, with hawking up of thin, stringy mucus, for many hours; > after eating.

Tickling in throat, with expectoration of stringy mucus.

Tightness and constrictive feeling in larynx.

[26] **Respiration.** | | Dyspnœa and palpitation on going up stairs.

Constant desire to draw a long breath, without relief.

Respiration more frequent and labored.

[28] **Inner Chest and Lungs.** Slight pain under sternum, at articulation of third rib.

Digitized by Google

Fulness and constriction under sternum, with lancinating pain through chest.

Continued feeling of weight and anxiety in chest.

Fulness in chest, with fulness and heat in head and neck, and flushed face.

Heart, Pulse and Circulation. Increased action of heart, full feeling in neck and head.

Palpitation: with flushed hot face and red eyes; with dull headache and flashes before eyes; with heaviness of head, roaring, slight nausea; on going up stairs.

Stabbing pains in heart with constriction in throat.

Palpitation, with vertigo and choking in throat after walking, and on entering house felt faint; tingling and numbness commencing in fingers of l. hand, gradually extending up arm, with irregular, tremulous and not well defined pulse; dull, heavy aching in l. arm.

Increase of heart's action from 72 to 88, after fifteen minutes.

A wavy, tremulous sensation in radial artery, felt by finger, pulse intermitting every third beat, easily compressible.

Pulse has peculiar double beats, which seem to run into each other, full, soft and easily compressed.

Palpitation of heart on slight exertion (pulling down a window).

Palpitation plainly visible over whole chest, < by walking, > sitting still, but renewed by slightest exertion.

Much pain over base of heart with dull, heavy pain in l. arm, and tingling and numbness in tips of fingers.

Sensation of weight and pressure in region of heart, with occasional sharp, stinging pains, passing from before backwards; heart's action from 70 to 96.

Hypertrophy of heart.

Pulse rises from 60 to 94 after fifteen minutes, with slight pains in region of heart.

Pains darting through heart at night, in bed; < lying on l. side.

Dull, dragging pain in heart not > by any position nor by pressing with hand.

Sharp, sticking pain in heart, with constriction in throat, red eyes, flushed face.

Pain as if needle were crosswise in ventricles, and pricked at each contraction.

Palpitation with marked increase of force of apex beat, with irregular, jerking pulse, and a peculiar thrill under finger.

Strong palpitation, with forcible impulse; hand placed on heart was visibly moved.

Digitized by Google

Palpitation when going up stairs, obliged to lie down, with dyspnœa and weak feeling.
Constant dull pain in heart < lying down.
Distressing palpitation with increase of dull pain, caused by coughing, laughing or slight exertion.
With the full, intermittently irregular pulse auscultation revealed great excitement of heart.
Contractions at intervals of three or four beats, after which there was a much longer interval.
Near end of proving sounds of heart increased in intensity, especially region of semilunar valves.
Force of apex beat visibly increased, heart impulse raised the touching hand; pulse hard, jerking, intermitting every third beat; rising from 70–90.
Heart's action apparently weakened for the first few moments, in ten minutes pulse rose to 100, full, strong, somewhat irregular.
Heart's action weak and fluttering, with small weak pulse.

[31] **Neck and Back.** Sensation of fulness in neck and head.

[32] **Upper Limbs.** Tingling and numbness commencing in fingers of l. hand, gradually extending up l. arm, with irregular, tremulous pulse, not well defined.
Dull, heavy aching in l. arm.
Tingling and numbness in finger tips, < lying on l. side.
Dull aching in l. arm, as if he had slept on it all night.
Rheumatic pains in r. shoulder.

[33] **Lower Limbs.** Trembling of lower limbs after exercise.

[34] **Limbs in General.** Cold feet and hands.

[35] **Rest. Position. Motion.** Any position: does not > pain in heart.
Lying down: dull pain at heart <.
Lying on l. side: darting pains through heart <; tingling and numbness in finger tips <.
Had to lie down: on rising in morning.
Desire to lie down.
Sitting still: palpitation passes off.
When stooping or standing: vertigo.
When making any exertion: vertigo with nausea; palpitation; trembling of lower limbs.
Walking causes indescribable sensation under the sternum.
After walking: faint feeling; choking sensation in throat; palpitation <.
On going up stairs: dyspnœa and palpitation.
Feeling of inability to move even a finger.

[36] **Nerves.** Feels weary, with desire to lie down.
Feeling of general nervous excitement.
Feeling of inability to move even a finger; great weakness and debility.

Digitized by Google

Nervous and irritable on rising in morning.
Feeling of lameness and soreness through whole body, as from a cold.
Looks as if he had been ill a long while.
Trembling sensation all over, had to lie down.
Desire for stimulants.

[37] **Sleep.** At night in bed darting through heart.
‖Sleep at night disturbed by all sorts of dreams.
Restless, turning in bed, with ludicrous dreams.
‖Restless nights with horrid dreams.

[38] **Time.** Morning: on rising nervous and irritable; dull pain, chilliness, vertigo; frontal headache.
Night: darting pain through heart; sleep disturbed by all sorts of dreams; restless with horrid dreams.

[40] **Fever.** Heat and fulness in neck and head with flushed face and cold feet and hands.
Feverish chilliness.
Cold, chilly feeling with nausea.
Quickly passing febrile paroxysms.

[41] **Attacks, Periodicity.** Quickly passing febrile attacks.
After ten minutes: pulse rose from weak to 100.
After fifteen minutes: a wavy, tremulous sensation in radial artery, with pulse intermitting every third beat; pulse rises from 60 to 94.
For many hours: dryness of larynx and throat, with hawking up of thin, stringy mucus.

[42] **Locality and Direction.** Right: pain in side of head; fulness and oppression in hypochondriac region; rheumatic pain in shoulder.
Left: tingling and numbness commencing in fingers, extending up arm; dull, heavy aching in arm.
From before backward: sharp, stinging pains in heart.

[43] **Sensations.** As if frightened; as if occiput was turning around; as if eyes were being forced out; as if throat was filled with dust; as if both tonsils were enlarged; as if needles were crosswise in ventricles; as if he had been asleep on l. arm all night.
Pain: in r. side of head; in region of liver.
Much pain: over base of heart.
Stabbing pains: in heart.
Lancinating pain: through chest.
Darting pains: through heart.
Sharp, sticking pain: in heart.
Sharp, stinging pain: passing from before heart backwards.
Pricking pain: at each contraction of heart.
Dull, dragging pain: in heart.
Dull, heavy aching: in l. arm.
Dull pain: in head; in heart.

Digitized by Google

Rheumatic pains: in r. shoulder.
Slight pain: under sternum at articulation of third rib; in region of heart.
Feeling of lameness and soreness: all over body.
Heat and fulness: in neck and head; in throat.
Fulness and distension: of bowels.
Fulness and constriction: under sternum.
Fulness and oppression: in r. hypochondriac region.
Fulness: in chest.
Tenderness of bowels.
Great weakness and debility.
Faint feeling: after walking.
Weary feeling.
Choking sensation: in throat.
Constrictive sensation: in throat; in larynx.
Tightness: in larynx.
Tickling: in throat.
Dryness: in larynx and throat.
Sensation of weight and pressure: in region of heart.
Continued feeling of weight and anxiety: in chest.
Heaviness: of head.
Roaring: in ears.
Tingling and numbness: commencing in fingers of l. hand, extending up arm.
Wavy, tremulous sensation: in radial artery.
Trembling: of lower limbs; all over.
Chilly feelings: over body.

[44] **Tissues.** Cardiac affections; bronchitis; asthma; dropsy.

[45] **Touch. Passive Motion. Injuries.** Pressure: by hand does not > pain in heart.

[46] **Relations.** Compare: *Amyg. amara, Bellad., Cact. grand., Digit.*

ICTODES FŒTIDA.

Skunk Cabbage. *Araceæ.*

Experiment by Bigelow, Amer. Med. Botany, vol. 2, p. 48. Symptoms in Jahr's Symptomatology are from provings by C. Hering and others.

[1] **Mind.** Cross; impetuous; inclined to contradict.
Absence of mind and inattention; enters sick-room without knocking, does not listen to patient.
[2] **Sensorium.** Vertigo and dimness of sight.
[3] **Inner Head.** Headache on single places, lasting a short while, then changing place; dulness; pressing in temples now more in one, then more in the other, with violent pulsation of arteries.
Drawing in forehead in two lines from protuberances to glabella, where it draws outward as from a magnet.
[8] **Sight and Eyes.** Dimness of sight, with vertigo.
[7] **Smell and Nose.** The nose is swollen as far as the nasal bones extend, red like a saddle, sore to touch, < l. side.
Cartilage cold and bloodless, with red spots on cheeks and small pimples on l. side of face.
Violent sneezing, with pains in palate, fauces and œsophagus to stomach, hurting for a while after in cardiac end of stomach.
[9] **Lower Face.** Swollen submaxillary glands.
[10] **Teeth and Gums.** Scurvy.
[11] **Taste and Tongue.** Numbness of tongue, cannot touch teeth with it.
Papillæ elevated.
Tongue red and sore on tip and edges.
[12] **Throat.** Burning from fauces downwards through chest.
Œsophagus painful on sneezing.
[14] **Appetite, Thirst. Desires, Aversions.** Inclined so smoke, but it does not taste good.
[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea and vomiting.
[17] **Scrobiculum and Stomach.** With every firm step, pain in pit of stomach as from something breaking loose.
[19] **Abdomen.** Expansion and tension in abdomen.
Pain in abdomen here and there, in single spots.
When walking sensation as if the entrails were hanging loose and flabby, without any pain.

Digitized by Google

[21] **Urinary Organs.** Great urging; urine darker.
[22] **Male Sexual Organs.** ‖Titillation voluptuous, but painful, around corona glandis.
[23] **Female Sexual Organs.** Amenorrhœa.
[26] **Respiration.** ‖Spasmodic asthma.
‖Sudden anxiety, with dyspnœa and sweat, followed by stool and relief of that and other complaints.
Inclined to take a deep breath; with hollowness of chest; with constriction in fauces and chest.
‖‖Asthma, aggravated or caused by dust. θHeaves in horses from dusty hay.
[27] **Cough.** ‖Spasmodic cough.
‖‖Senile catarrh.
[28] **Inner Chest and Lungs.** Pain in chest and in axillæ; seems to have a connection with burning in œsophagus.
[30] **Outer Chest.** Pressing pain on sternum.
[31] **Neck and Back.** Glands on throat swollen.
[33] **Lower Limbs.** Aching along r. cresta tibiæ.
[35] **Rest. Position. Motion.** With every firm step: pain in pit of stomach as from something breaking loose.
When walking: sensation as if entrails were hanging loose and flabby.
On sneezing: Painfulness in œsophagus.
[36] **Nerves.** ‖Hysterics.
‖Epilepsy.
[37] **Sleep.** Sleepiness early in evening.
[39] **Temperature and Weather.** All complaints disappear in open air.
[42] **Locality and Direction.** Right: aching along cresta tibiæ.
Left: small pimples on side of face.
Outward: drawing in forehead.
[43] **Sensations.** Erratic and spasmodic pains.
Drawing as if from a magnet in forehead; pain in pit of stomach as from something breaking loose; as if entrails were hanging loose and flabby, without pain.
Pain: in palate; in fauces; in œsophagus to stomach; in pit of stomach; in abdomen here and there in single spots; in chest and in axillæ.
Painful titillation: around corona glandis.
Pressing pain: in sternum.
Drawing: in forehead, in two lines from protuberances to glabella, where it draws outward as from a magnet.
Pressing: in temples, now in one, then in the other.
Aching: along r. cresta tibiæ.
Burning: extends from fauces downwards through chest.
Soreness: of tip and edges of tongue.
Violent pulsation: of arteries of temples.
Expansion and tension: of abdomen.

[1] **Mind.** [1]Memory weak and untrustworthy.

[1]Heaviness of head; very great weakness of memory; forgets everything except dreams; hardness of hearing; sees everything as if through a fog; sits quietly, with a vacant gaze, always thinking of the mortification endured, and knowing nothing of what passes around him; prefers to be alone; thinking of the past mortification prevents him from going to sleep as early as usual; restless sleep, starts during sleep, much dreaming; pain in l. hypochondrium < by pressure and continuous walking; loses hair; face colorless, hollow; voice low, trembling, with distortion of muscles of face; does not like to talk; no desire to eat or drink; appetite is soon satisfied; feels cold, especially in evening; very weak; staggering walk; walks carefully; increased stool and urine. [θ]Melancholy after mortification.

[1]Absent-mindedness.

[1]Difficult comprehension; mental dulness; mental effort is irksome.

Digitized by Google

Incapacity for thought in evening.
Brooding over imaginary or real troubles; is wrapt in thought.
Hurry of mind, after exerting brain, especially in morning; is unable to talk, write or do anything else as rapidly as he wishes, whereupon there occur anxious behavior, mistakes in talking and writing and awkward actions requiring constant corrections.
A torrent of words pours out of mind, and confusion of writing is caused by profusion of thought.
Fancies; delirium; insanity.
Spasms and insanity after fright; imagines her soul cannot be saved and cries very much; at times rages and tears clothes, can scarcely be restrained by four strong persons.
After catamenia, which came at night time, symptoms of insanity; believes herself married and pregnant; is tormented by remorse for imagined crimes; seeks constantly to escape to drown herself; terrible anxiety from rush of blood to head and heart; is only quiet when lying undisturbed and brooding over her troubles, which she rehearses in a doleful tone; if disturbed, screams, strikes and tears things, crying all the while "I am neglecting my duty, breaking my vow;" face pale and distorted; desire for sour things; difficulty to get her to eat; conscientious scruples after eating; menses suppressed.
Desire to be alone.
Sighs and sobs; will not be comforted.
Inclined to be very secretive and passive.
Changeable disposition, laughing and crying almost in same breath.
Looks about bed as if to find something.
Taciturn, with continuous sad thoughts; still, serious melancholy, with moaning.
Aversion to being alone.
Incredible changes of mood; at one time jokes and makes merry, at another is lachrymose, alternating every three or four hours.
Apprehensive feeling.
Sadness and sighing, empty feeling in pit of stomach.
Melancholia from suppressed mental sufferings, with much sighing; desire to be alone so as to give way to her real or imaginary grief; weeps bitterly.
Silent melancholy; twitching of one muscle at a time.
Melancholy after disappointed love, always combined with spinal symptoms.
Fright is followed by grief.

Digitized by Google

Great grief after losing persons or objects very dear.
Unhappy love with silent grief.
Senseless staring at one object, with sighing and moaning; remorse about imaginary crimes, intolerance to noise; great inclination to have fixed ideas.
Appetite and digestion left him . θMorbid grief.
Became bilious, nervous, depressed, and would scarce move from the fire, for days together. θMorbid grief.
A peculiar trembling of hands disturbs her very much in writing, most when she has to write in any one's presence, gets worse as soon as she fancies any one might notice it.
Unusual tendency to be frightened.
Dread of every trifle, especially of things coming near him.
Fear of thieves, on waking after midnight.
Fearfulness; does not like to talk; prefers to be alone.
Anxiety as though something terrible had happened; cannot speak because of it; hurry, fearfulness, terror, alternating with irresolution and inertness.
Tears wept inwardly, the pain and penalty of unrequited love; desires solitude so that one may nourish inward grief; great anxiousness at night or when awaking in morning, with taciturnity; aversion to every amusement.
Anxiety, as if he had committed some crime.
Anxiety and disquiet as if she had done something wrong, or as if some great misfortune were about to happen, this so overpowers her, that she can with difficulty refrain from weeping; has oppression of breathing, but feels distinctly that oppression begins at stomach and spreads up into throat; becomes very weak, incapable of work, and disinclined to company; no appetite; bowels torpid and insufficiently moved; paroxysms about twice a day, one lasting often for hours.
Anxiety, sleeplessness, despair; severe palpitation; loss of appetite; constipation.
Altered appearance; made an unsuccessful attempt to end his almost unendurable sufferings, by eating the phosphorus from matches; after business embarrassments.
A state of anguish in which she shrieks for help, with suffocating constriction of throat, difficult deglutition; comes out of spasms with deep sighing. θParturition.
Indifferent to everything; seemed to live without his usual good humor.
Suppressed menstruation with melancholy; indifference to things she loved best; sits alone and weeps, imagines things, especially that she might go crazy; in all parts crawling sensation as if gone to sleep, as if she had no

feeling in epigastrium; sleep unrefreshing and disturbed by dreams.

‖‖Sensitive disposition and hyperacute feeling.

‖‖Tender mood, with very clear consciousness.

‖‖Finely sensitive mood, delicate conscientiousness.

‖Amiable disposition if feeling well; every little emotion disturbs her.

‖Mild disposition; bears suffering, even outrage, without complaining. θLeucorrhœa.

‖‖Jealousy, disappointed love.

‖‖Inconstant, impatient, irresolute, quarrelsome.

‖The slightest contradiction irritates.

‖‖Slight blame or contradiction excites him to anger, and this makes him angry with himself.

Peevish, capricious and quarrelsome; impatient.

‖Anger, followed by quiet grief or sorrow.

‖Fright; inclination to start.

Headache < from reading and writing.

‖Palpitation while engaged in deep thought.

‖Spasmodic affections of children, consequent on being put to sleep soon after punishment.

‖After fright: disturbed, introspective, taciturn; insomnia and great restlessness; anorexia.

‖Melancholia after great grief and much domestic trouble; complete sleeplessness; suicidal thoughts and desire to escape.

‖Ill effects from hearing bad news; from vexation with reserved displeasure; from grief, or suppressed mental sufferings; of shame and disappointed love.

[3] **Sensorium.** ‖‖Vertigo.

‖Periodical fits of vertigo, with intolerable pain in back following; slightest motion of head, especially stooping, increases vertigo; gastric symptoms; gaping; coated tongue; anæmia; tingling as of ants; jerkings; heaviness of r. arm, which had been paralyzed.

‖‖Epileptic vertigo.

‖‖Heaviness of head.

[3] **Inner Head.** ‖Pressive pain in frontal region; above root of nose, must bend head forward, followed by qualmishness.

‖Pressive headache in r. side of forehead, extending down into r. eye; it seems as though eyeball would be pressed out; burning in eyes and increased lachrymation, with much mucus.

‖Pressive, drawing headache above r. orbit at root of nose, renewed by stooping low down.

‖Pressure in r. frontal region, above eyebrow.

‖Intense pain over r. eye and seemingly through supra-

Digitized by Google

orbital foramen; pains as though needle were pushed through into brain, pressure from without inward; appetite disordered; sometimes mad delirium; nausea and vomiting; eyes red, swollen and protruding; pains come on about 9 A.M, generally stopping at 2 P.M.; < from noise, washing hands in cold water, dropping head forward, stepping heavily; > from soft pressure, lying on back, and heat.

Throbbing pains in r. side of forehead beginning at inner end of r. eyebrow and running around eye, at 8 A.M. every morning, gradually < until 10.30 when gradually >, and entirely disappear about 1 P.M.; when attack is at its height, must lie down; lachrymation and redness of eye.

Pain beginning in forehead, drawing, extending down one-half of nose; pain extends to middle of vertex, where there is a pressure as of a weight, with nausea and tendency to vomit; < morning till afternoon, then gradually getting better until evening; sensitive to least noise or loud talking; pale face; suffering expression; great lassitude of limbs.

Pressing pain over nose, > leaning forward; pressure from within outward; twitching, throbbing, tearing pain in forehead, or as if a nail was being driven in; lancinating, boring, deep in brain, with nausea, darkness before eyes, photophobia, pale face, copious, watery urine; pains often > by change of position, come again after eating, in evening after lying down, or early in morning while rising; patient anxious, fickle, or silent and depressed.

Periodical headache, weekly, fortnightly or monthly; gradual increase with sudden abatement; unilateral headache, which affects chiefly the eye, eyebrow or side of head, with general chilliness; crisis with secretion of copious limpid urine; momentary disappearance of pain by change of position.

Anxious suffering expression of face, eyes almost fear the light, frown across brow, from frequent closure of eyes in pain; extreme pain in both temples, with pain in back and nape of neck; great mental and physical prostration; bowels relaxed; tongue covered with white fur; skin cold; pain > from pressure and rest; < from light, sound and thinking; pulse thin and weak.

Dull headache, confined to r. half of forehead and involving r. eye, which was very sensitive.

Pain extending from head into l. eye; burning in eyes and lachrymation.

Pressing, stinging pain from within to without, in forehead and root of nose.

Digitized by Google

Pressure in temples sometimes with deep sleep.
Headache as if temples would be pressed out.
When lying in bed on the side, furious headache as if pressing through temples, > by lying on back.
‖Pain as if a nail was driven out through side of head, > by lying on it.
Aching in one half of head, when walking in open air, < by talking and reflecting.
‖Headache in morning on awaking, as if brain was beaten and bruised; on rising it disappears and a toothache takes its place, as if nerve of tooth was shattered and crushed, changes to a similar pain in small of back; headache always renewed on thinking.
‖Jerking headache; on ascending steps; < by raising eyes.
‖Headache like a pressure with something hard on upper surface of brain; in paroxysms.
‖Sudden pressure in head, now in one place, now in another, in evening.
Throbbing headache; pain with every throb of arteries.
‖Congestion to head, from being spoken to harshly.
‖‖Heat in head.
‖‖Talking aloud excites a headache, as if head would burst, going off entirely when reading to himself or writing.
‖Deep sighing and sobbing with a strange compressed feeling in brain.
Headache with heaviness and heat in head.
‖Head feels sore, bruised.
‖Headache in highly nervous and sensitive temperaments, or in those whose nervous system has given way to anxiety, grief, or mental work.
‖Periodical headache increases gradually in severity, and then suddenly abates.
‖Headache passes off with a flow of pale, limpid urine.
‖Nervous headaches in hysterical women, suddenly appearing and disappearing.
‖Headache: from abuse of coffee; from smoking, or abuse of snuff; from inhaling smoke; from being where others smoke; from tobacco or alcohol; from close attention.
‖Headache > by warmth, rest, and sometimes by stimulants; < by cold winds, turning head suddenly, at stool, stooping, change of position, running, looking up long, from moving eyes; noise and light.
‖Throbbing pain in occiput, < when pressing at stool.
‖Pain in occiput; < from cold, snuffing or smelling tobacco; > from external heat; good appetite, even keener than usual; headache > whilst eating, but < soon after.

Digitized by Google

‖Weight at back of head; tendency of head to incline backward.

‖Stabbing pain, deep seated, in eyes, going to occiput and nape of neck, and finally to vertex; pain very acute, driving him almost frantic; pain generally begins on rising in morning, is at its height at 4 P.M., and passes off with a night's rest; > from warmth, < from sound; irritability of disposition day before headache; scalp tender to touch, and dull, uncomfortable feeling as if headache might return, day after; headaches occur every month.

‖Nervous headaches coming at same hour and day, weekly lasting forty-eight hours; come and go at 11 A.M.; their coming is preceded by a sense of vacuity in stomach and chest, stiffness of nuchæ and muscles (trapezius) on each side of this ligament; at end of twelve hours from attack, pain extends to vertex and remains there several hours, being of a compressive and burning character; after some time they continue their course towards sinciput and eyes, latter feeling hot and heavy; nausea and salivation, but without vomiting; first night of attack cannot sleep, though with eyes closed perceives figures and objects moving about; in acute stage cannot lie down, but must, with closed eyes, remain in a dark room; sleeplessness, profuse diuresis of pale urine, melancholia, and much sighing succeed each attack.

‖Sudden metastasis from bowels to brain during dentition, with sudden pale face; rolling, tossing of head; difficult swallowing; delirium, with convulsive motions of eyes and lids. θHydrocephaloid.

Cerebro-spinal meningitis; hysterical symptoms or complications, or rapid alternation of symptoms.

Threatenings of apoplexy; head feels empty, face is pale.

Nervous apoplexy.

[4] **Outer Head.** ‖Trembling and shaking of head.

‖Pain in a spot in r. parietal bone, < by stooping, with pain in r. breast.

‖Pain in outer part of head, which is painful on feeling it.

‖Weight in back of head, tendency of head to incline backward against back of chair, probably from congestion to cerebellum.

‖Head bent backward, during spasms.

‖Inclines head forward; lays head forward upon table.

[5] **Sight and Eyes.** ‖Hyperæsthesia of retina with hysteria; intense photophobia; ciliary neuralgia; general nervous symptoms.

‖Cannot bear glare of light; sunlight causes headache.

‖Zigzag and serpentine white flickering at one side of field of vision.

Digitized by Google

Dim-sighted.
Asthenopia and amblyopia in females, due to onanism or ciliary neuralgia; hysterical subjects.
Dimness before one eye while reading, as if tears were in it, which is not the case.
Two "chipping ulcers" at upper margin of r. cornea, with periorbital pains, sharp sticking generally in one spot in superciliary ridge, temple or side of head; sleep disturbed; digestion poor.
In commencement before pimples have formed, where there is only slight injection, pain, dacryorrhœa, and photophobia. θHerpes cornea.
Intense but fitful photophobia.
Sensation as of sand in eyes.
Excessively nervous, starts at slightest noise; after working late at night, feeling as of sand under eyelid, with great dryness. θConjunctivitis.
Catarrhal inflammation of eyes when subjective symptoms are particularly marked, rather than objective; pressive pain in eyes; photophobia; lachrymation; coryza.
Upper part of eyeball, as far as covered by lid, inflamed.
Traumatic ophthalmia, with violent pains and sensation as if sand was rolling around beneath lids.
Catarrhal ophthalmia, with sensation of sand in eye and great dryness, lachrymation only in sunlight.
Ophthalmia of newborn infants.
Convulsive movements of eyes and lids.
Pain under upper lid, as if it was too dry.
Swelling of upper lid.
Nightly agglutination of lids.
Morbid nictation, with spasmodic action of various muscles of face.
Eyelid turned upward.
Occasionally l. eye appears smaller than r. in consequence marked ptosis of upper lid; lachrymation, < when exerting eye in open air; vision impaired; occasional twitching pain and sensation of pressure and heaviness as if eye would fall out, < reading, sewing, etc.; loss of sense of smell; diminished sense of taste; foul odors seem to be perceived in mouth.
Very nervous and restless at night, walking and talking in her sleep; "swelling of eyes," lachrymation and pain in eyes, with headache for six months, after having had tooth drawn; moderate amount of exophthalmus present, together with palpitation of heart; pulse 120; congestive headaches; no enlargement of thyroid gland; menses regular.
Sensation as if a particle were in l. external canthus.

Digitized by Google

‖Acrid tears in eyes, during day.

‖Ciliary neuralgia; severe pains extending from eye to top of head, producing nausea, and often alternating with swelling in throat (globus hystericus); pains begin very slightly, increase gradually until they become very severe, and only cease when she became exhausted.

‖Pain from head into l. eye; latter burns and waters.

[7] **Smell and Nose.** ‖Stoppage of one nostril; dry coryza.

‖Fluent coryza.

‖Coryza in nervous persons; general hysterical irritability; dull pain in forehead.

‖Soreness and sensitiveness of inner nose, with swelling.

‖Nostrils ulcerated.

‖Itching of nose.

[8] **Upper Face.** ‖Convulsive twitchings of muscles of face.

‖Face distorted, deathly pale and sunken.

‖Face clay colored and sunken, blue rings around eyes.

‖Redness and heat of one cheek and ear.

‖Alternate redness and paleness of face.

Sweat on face while eating.

‖Prosopalgia coming on suddenly without any warning, or preceded by slight premonitory symptoms, such as bruised feeling, tension, twitching in face; duration of paroxysm, and time of occurrence very various; exciting causes chiefly mental emotions; but sometimes they were excesses in mental work, in musical performances, in venere and in baccho; also suppressed perspiration, blenorrhœa and hemorrhoidal fluxes, were frequently remote causes; seat of pain usually in smaller twigs of facial nerves, and having no tendency to radiation; the attacks by day are preceded by uneasy sleep, waking with a bruised feeling, pandiculations and ill humor; pains boring, dart-like shoots, giving quite a shock, dull drawing, twisting, formication, being borne in dull resignation; partial convulsions of facial muscles; trismus; paleness and coolness of face; lachrymation and photophobia; spasms in cheek; yawning; shuddering; diuresis; urinary tenesmus; pulse quickened, small; cutaneous temperature cool; quiet weeping; pusillanimity.

‖Prosopalgia: in women of the upper ranks, delicate, soft fibred, anæmic, nervous, of melancholic or melancholic-sanguine temperament; in those suffering from special irritation due to sexual excesses or to inordinate mechanical irritation of spinal nerves, as in case of some musical virtuosi; due to presence of ascarides; arthritic form; in course of typhoid and miliary fevers; in roués during prolonged course of gonorrhœa; due to prolonged

Digitized by Google

nursing, pollutions, musical excesses, etc.; during pregnancy; after diuresis; after lancinating uterine pains; after attacks of proctalgia.

[9] **Lower Face.** ‖Twitching of corners of mouth.
‖Spasmodic closing of jaws.
‖Every evening, about half an hour after going to bed, pains in r. lower jaw, which continue until she falls asleep; pains last one to one and a half hours, with exacerbations, and are followed by quiet sleep and sweating.
‖Lips dry, cracked, bleeding.
| |Ulceration of one of corners of mouth.
‖Inside of lower lip painful, as if raw and sore.
‖Eruption on lips and corners of mouth. θIntermittent.
‖Pain in submaxillary glands, when moving neck.

[10] **Teeth and Gums.** ‖Jaws feel as if crushed.
‖Soreness and tenderness in teeth, felt more between meals than when eating.
‖Boring pain in front teeth.
| |Odontalgia as if teeth were crushed into fragments.
‖Toothache from cold in molars, as if they were crushed.
‖Toothache: < after drinking coffee, after smoking tobacco; after dinner; in evening; after lying down; in morning on awaking; < in intervals between meals.
| |Difficult dentition, with convulsions.

[11] **Taste and Tongue.** ‖‖Sour taste in mouth; with sour eructations; saliva tastes sour.
Taste: flat, like chalk.
‖Food has a bitter, repulsive taste, or no taste.
| |Tongue white, flabby, shows marks of teeth, trembles protruded.
‖‖When talking or chewing, bites cheek or tongue.

[12] **Inner Mouth.** | |Sticking in palate extending to inner ear.
‖Putrid odor from mouth.
‖Inner mouth inflamed and sore.
‖Copious secretion of saliva.
| |Accumulation of acid saliva.
‖Sudden attack of ptyalism without any apparent cause; < from every motion of tongue, as in talking, chewing, etc.; after eating, sensation as if food lodged over orifice of stomach and could not get down; fluids taste bitter; bitter belching and regurgitation of food; loss of strength; pulse small, quick; slight fever in evening; papillæ of tongue enlarged and turgescent; mucous membrane of mouth very red and in several places corroded, with raw pain; orifices of salivary glands swollen; constant flow of saliva prevents sleep; inner surface of lower lip pain as if raw and sore; anterior half of tongue

Digitized by Google

as if numb; when eating tongue feels as if burnt or raw; painful swelling of orifice of salivary duct; sensation as if whole mucous membrane of mouth was about to become raw; difficult deglutition; mouth constantly full of mucus; constant discharge of white, frothy mucus; increased secretion of saliva with constant spitting of frothy saliva; everything eaten, and especially beer, tastes bitter or putrid; loss of appetite, could not swallow bread, as if it was too dry; pain in epigastrium on pressure, as if it was raw inside.

[13] **Throat.** ▮Stitches in soft palate, extending to ear.

▮▮Crawling in pharynx.

▮Hysterical spasm of throat and gullet, result of suppressed grief; cannot swallow either liquids or solids.

▮Retching (constrictive) sensation in middle of throat, as if a large morsel of food or plug was sticking there; felt more when not swallowing; disappears on continuing to swallow but returns.

▮▮Choking sensation from stomach up into throat.

▮▮Sensation as from a lump in throat, when not swallowing.

▮Stinging in throat between acts of deglutition; sensation when swallowing as if swallowing over a bone, with a rolling around.

▮Stitches in throat, only between acts of swallowing.

▮▮Sore throat; sticking in it when not swallowing, and even somewhat while swallowing; the more he swallows, however, the more it disappears; if he swallows anything solid, like bread, it seems as though the sticking entirely disappeared.

▮Unable to swallow bread, it seems too dry.

▮Both tonsils greatly swollen and inflamed; several small openings filled with pus on tonsils; pharynx red, inflamed; stitching pains in throat < swallowing; stitches extend to ear when swallowing; r. parotid, swollen, hard to touch, but painless; stitches in parotid; tongue covered with tenacious white mucus; foul taste in mouth; offensive odor from same; chilliness, in afternoon fever with red cheeks, and at same time chilliness and coldness of feet; despondent, depressed, tearful. θAngina.

▮Inflamed, hard, swollen tonsils, with small ulcers.

▮Acute paroxysms in chronic tonsillitis, with feeling of swelling in throat; painful soreness during deglutition.

▮▮Follicular tonsillitis.

▮Whitish tough mucus in spots on tonsils, simulating diphtheria.

▮Green vomiting, substance scum-like or membranous; putrid throat, seldom painful (the painful cases were less likely to prove fatal); greenish-yellow patches; de-

Digitized by Google

lirium; headache; pain in limbs; nosebleed; dilated pupils; diarrhœa; green stools; suppression of urine; chilliness; high fever. θDiphtheria.

‖Commences on r. side; high fever; delirium characterized by fearfulness or dread; soreness of throat greatest between acts of deglutition; pains in back of head, nuchæ and sometimes in ears. θDiphtheria.

‖Throat < when not swallowing, and when swallowing liquids; > when swallowing food.

11 **Appetite, Thirst. Desires, Aversions.** ‖Hunger and nausea at same time.

‖Feeling of hunger in evening, prevents sleep.

‖‖Good appetite: headache > while eating, < soon after.

‖Appetite for: sour things; bread, particularly rye bread.

‖‖Thirst, with a chill.

‖Desire for various things, but when offered appetite fails.

‖‖Fanciful aversion to special articles of food, or craving for a particular article, and after a small portion has been enjoyed, sudden and great aversion to it.

‖‖Extreme aversion to tobacco smoke.

‖Aversion to: tobacco; warm food; meat; spirituous liquors.

15 **Eating and Drinking.** ‖It is difficult to persuade her to eat; after doing so she is tormented with conscientious scruples.

Sweat on face while eating.

Symptoms renewed after dinner.

Headache < from coffee, tobacco and alcohol.

Better from partaking of sour things.

Worse from drinking coffee.

16 **Hiccough, Belching, Nausea and Vomiting.** ‖Hiccough: after emotions; after eating and drinking; from smoking; especially in children.

‖‖Eructations: of food into mouth; of bitter fluid; with pressure in cardia.

‖Spasmodic ructus and singultus, occurring periodically every afternoon, and lasting for hours; after violent mental excitement.

‖Qualmishness from smoking.

‖‖Nausea, without vomiting.

‖Empty retching, better by eating.

‖‖Vomit: bitter; of food.

17 **Scrobiculum and Stomach.** ‖‖Weak, empty feeling at pit of stomach, not > by eating; involuntary sighing; must take a long breath.

‖Sensation of weakness, sinking, or "goneness" in pit of stomach, with qualmishness and flat taste.

‖Feeling of weakness in epigastrium, and pain as if sprained, with great depression.

Digitized by Google

Fulness, heaviness or pressure in pit of stomach.
Fulness and swelling in epigastrium.
Burning, darting in epigastrium.
Anxious feeling in præcordia.
Feeling in stomach as from fasting, with physical exhaustion.
Feeling of flabbiness in stomach; stomach and intestines seem to hang down relaxed.
Feeling of emptiness or goneness in stomach, with sensation as if a number of pins were sticking in it; not > by eating.
Sensation as if stomach was shortened.
Painful pressure as from a stone, especially after eating or at night, in region of pylorus; sensitiveness to contact, and burning in stomach.
Bloated stomach.
Stitches in region of stomach.
Burning in stomach, especially after brandy.
Gnawing, cutting pain in stomach.
Spasmodic pains in stomach; > when eating.
Gastralgia, with sticking pains, brought on by starvation.
Gnawing sensation in stomach in morning, > by eating; swelling in region of stomach, cannot button, or is frequently obliged to unloosen clothing; frequent sensation of rawness in throat, a little below larynx, and on l. side of throat when swallowing; ptyalism and accumulation of saliva in throat; constipation.
Pressure in stomach after eating, < at night, with nausea and sensation of rawness in stomach; on moving pain becomes cutting in character; trembling in stomach.
Twitching in pit of stomach, with periodical attacks of weakness and qualmishness, so severe that she becomes pale and almost faints, accompanied by a sensation of hunger.
Attacks of extremely severe pains in stomach 7 to 8 P.M., but more frequently about midnight, lasting two to three hours; vomiting of slime; can only eat broths or other fluid food with any comfort; digestion greatly impaired; stools regular; urine pale, watery, profuse; nausea with great restlessness and anxiety; pressing pains; sensation in region of stomach as if he would like to vomit, with oppression and spasmodic constriction of chest; < from pressure over stomach; frequent vomiting of food with great restlessness and anxiety; hemorrhoidal pains in anus and pressure in sacrum.
Periodical attacks of cramps in stomach, coming on usually at night, or after eating; < by slightest contact, mitigated by change of position. θGastralgia.

Digitized by Google

Catarrh of stomach from grief and worriment.
Dyspepsia with great nervous prostration, caused by mental depression.

[18] **Hypochondria.** Great distension of hypochondria, pit of stomach and small of back; unable to breathe on account of fulness and tension under ribs.
Jaundice, with silent melancholy, twitching of one muscle at a time.
Swelling and induration of spleen.
Painful pressure in region of spleen and pit of stomach.
Pain in l. hypochondrium; < from pressure.

[19] **Abdomen.** Peculiar sensation of weakness in upper abdomen and pit of stomach.
An anxious feeling mounts up from abdomen, after breakfast.
Pulsation (throbbing) in abdomen.
Drawing and pinching in umbilical region.
Sensation of protrusion in umbilical region.
Stitching and lancinating in sides of abdomen.
Sharp sticking, above and to left of umbilicus.
Colic pains, first griping, then stitching, in one or other side of abdomen.
Drawing and griping in abdomen; in rectum it occurred like a pressure, with qualmishness and weakness in pit of stomach, and paleness of face.
Periodical abdominal spasms, colic particularly at night, waking out of sleep, with stitches running up into chest and to sides; pains > passing wind, which, however, is difficult.
Spasmodic pains, cutting stinging, like labor pains; spasmodic colic.
The colic pains are < by brandy, coffee and sweet things.
Flatulent colic; flatus incarcerated, rumbling and rolling about, making a loud noise; rumbling as from hunger.
Wind presses on bladder.
Excessive flatulence; hysterical females.
Protrusions on various parts of abdomen.
Unsatisfactory, short and abrupt emissions of flatus, of offensive odor, not without exertion of abdominal muscles.

[20] **Stool and Rectum.** Bowels inclined to be loose; with stabbing pains in rectum.
Diarrhœa: painless, with rumbling of wind; < at night and from fright, with great timidity; with smarting in rectum; stools frequent; but scanty.
Copious diarrhœa, < at night, painless, with much wind; emaciated; great nervousness; in a little girl, after a great fright which almost produced convulsions.
Great nervous erethism and tenesmus, occurring only after stool. θDysentery.

Digitized by Google

Pale, cold, fixed, staring look, occasional screams, vomiting food. θCholera infantum.
Stools large and soft, but passed with difficulty.
Excessive desire for stool, more in upper intestines and upper abdomen; it causes great urging, nevertheless stool is insufficient, though soft.
Great urgency and desire for stool, in evening, felt mostly in middle of abdomen, but no stool follows, only rectum protrudes.
Constant urging to stool, which causes smarting pain.
Ineffectual urging to stool with erections.
Difficult stool, causing prolapse of rectum.
Hard stools, tries often, but in vain.
Constipation: from taking cold; of a paralytic origin.
Alternate diarrhœa and constipation following inflammation of bowels; tenesmus only after a discharge.
Stools: whitish, yellowish white, slimy; thin; pasty; mucous; bloody mucus; acrid; mucous, with colic.
Before stool: rumbling; urging, felt mostly in middle and upper abdomen.
Sharp, pressive pain in rectum.
Frequent cutting deep in rectum.
Sudden sharp stitches in rectum, extending upwards into body; < from excessive grief.
Spasmodic tension in rectum.
Contractive sore pain in rectum, like from blind hemorrhoids, one or two hours after stool.
Sensation of excoriation and contraction in rectum.
Neuralgia of rectum; pains in anus, returning regularly every day; < walking or standing; > sitting.
Dull pain in rectum as if distended with gas, after stool.
Unpleasant crawling low down in rectum, near anus, as from thread worms.
Violent itching in rectum, in evening, in bed.
Passive hemorrhage from rectum, after stool (of long standing); flow bright red; stools regular; bowels flatulent; faintness when hemorrhage is profuse; must lie down after stool.
Bleeding during and after stool; hemorrhage and pain are < when stool is loose.
Ennervation of longitudinal and circular muscles of rectum, causing a semi-paralyzed state of bowel and allowing feces to accumulate.
Anxious desire for stool, with inactivity of rectum; is unable to evacuate feces without danger of eversion and prolapsus of rectum.
Prolapsus of rectum from moderate straining at stool.
Tenesmus; prolapsus recti after stool.

Digitized by Google

Prolapsus of rectum, with a male child, æt. 4; parents have to return the bowel after each stool, sometimes twice a day and with great difficulty.

Severe, constant, stitching and sore, burning pains in rectum, completely robbing her of sleep; prolapsus of rectum; hard, bloody stools greatly aggravating the pains; ulcerated hemorrhoids in rectum.

Hemorrhoids: after confinement, with sharp, painful pressure in rectum after stool, even a soft stool; also sharp stitches from anus to rectum; bleeding slightly and protruding at stool, followed by severe contractive pain in anus and stitches up rectum, lasting until exactly 5 P.M. each day, when pain suddenly ceases; with sensation of excoriation or contraction of anus; tumors prolapse with every stool, and have to be replaced; they are sore as if excoriated; hemorrhage and pain < when stool is loose; dragging pains around pelvis.

Blind piles, pressure and soreness in anus and rectum; painful while sitting and standing, less while walking, though renewed and < after taking fresh air.

Stitches in hemorrhoidal tumors during cough.

Pain in anus as from blind piles, sore pain after soft stool.

Sore pain in anus, without reference to stool.

A coarse stitch extending from anus deep into rectum.

Pain in anus returning at same hour each day, < walking and still < standing, > on sitting down.

Constriction of anus after stool, < while standing.

Painless contraction of anus for many days.

Itching and tingling in anus. θPruritus.

Itching of anus: at night; child is nervous and spasmodic; from seat worms.

Fissures of anus.

Blotches at anus.

Stitches, itching and a creeping sensation in lower part of rectum. θAscarides.

Ascarides causing itching in rectum and anus.

Thread worms in rectum, especially when there are traces of blood in stools.

Convulsions; suddenly fell prostrate and remained unconscious for half an hour; after which she was unable to speak for several minutes; after *Ignat.* passed tapeworm, and convulsions did not recur.

Increased accumulation of flatus and increased discharge of it.

[21] **Urinary Organs.** Sudden, irresistible desire to urinate.

Painful pressure, with a scraping sensation in neck of bladder, especially when walking; turbid urine.

Pressure to urinate, from drinking coffee.

Digitized by Google

‖‖Frequent discharge of much watery urine. θHysteria.
Urine: nervous, watery; clear, lemon colored; scanty, dark and acrid.
‖‖Involuntary discharge of urine.
‖Burning, smarting or soreness during urination.
‖‖Itching in forepart of urethra.

[22] **Male Sexual Organs.** Lasciviousness without erections.
‖Sexual desire weak, or sexual desire with impotence.
‖Erections during stool; emission of prostatic fluid.
‖Hysterical spasmodic stricture.
‖‖Contraction of penis, it becomes quite small.
‖Itching around genitals and on penis, in evening after lying down; passes off after scratching.
‖‖Soreness and ulcerative pain, combined with itching, at margin of prepuce.
‖‖Sweat on scrotum.

[23] **Female Sexual Organs.** ‖Cramp pains in uterus, with lancinations, < from touching parts.
‖Uterine spasms with lancinations or labor-like pains.
‖Metrorrhagia from chamomile tea.
‖Menses: too soon and profuse; scanty, delayed.
‖Menses too early and profuse, appearing every 10–14 days; before and during menses heat and heaviness in head, severe pressing pain in forehead, eyes sensitive to light, ringing in ears, loss of appetite, sensation of emptiness in stomach, cramping pains in abdomen, chilliness alternating with heat, anxiety, palpitation, extreme prostration of whole body and especially of extremities.
‖Menstruation profuse and irregular; leucorrhœa, with bearing-down pain.
‖Menorrhagia with sighing and sobbing, faint feeling at pit of stomach; great despondency, seems full of suppressed grief.
‖Brought on a flow in a lady, æt. 62, who had suffered from grief; also in a lady, æt. 30, whose menses had been suppressed for three months.
‖Menstrual blood black, of putrid odor, in clots.
‖Irregular menstruation, especially dysmenorrhœa, originating in irritation of nervous system, and not in uterine congestion.
‖Menses scanty, attended by violent spasms and pains, lasting several days, and resembling pains of parturition; nervous system in very excitable state. θDysmenorrhœa.
‖‖Amenorrhœa; ulcers on feet; anæmic; region of liver and spleen swollen.
‖Suppression of menses caused by suppressed grief; much

Digitized by Google

involuntary sighing and sobbing; præcordial anguish; weak and empty feeling in pit of stomach.

‖During menstruation uterine spasms, with crampy pressing, > by pressure and in a recumbent posture.

‖During menses: photophobia; contractive colic; anguish; palpitation of heart; backache; lassitude approaching faintness.

‖Pain from sacral region through to front, followed by leucorrhœa and a numb and stupid feeling in brain; difficulty in answering questions.

‖Violent labor-like pain; purulent, corrosive leucorrhœa..

‖Chronic leucorrhœa, with excited sexual desire.

‖Menses scanty, stringy, with dark clots; great dysmenia both before and after; fearful griping and cutting uterine colic; milky whites; constant burning heat in vagina, < before menses; very acute darting pains in vulva, only during day; intensely sore pain at entrance of vagina during coitus, almost driving her frantic; heavy and sleepy after meals, must lie down after dinner; pain and sickness at stomach while standing, > sitting down; sinking and emptiness at epigastrium; total loss of appetite except at supper time; stitches in breasts; feet burning hot, or cold; feels as if stockings were cold and damp; one cheek generally hot, the other not so; hysteria; constipation with great pain, dreads to go to closet; deep sighing inspiration; inflammation of vagina and vulva. θVaginismus.

‖Pruritus of young girls, with leucorrhœa and associated with ascaris vermicularis.

Pregnancy. Parturition. Lactation. ‖Emptiness, qualmishness and weakness in region of stomach, with flat taste; distension of abdomen after eating; hiccough; sour eructations; frequent regurgitation of food, and of bitter liquid; vomiting at night of food taken in evening; empty retching, > by eating. θMorning sickness.

‖After great fright, during seventh month of pregnancy, severe pain in epigastrium; undefined anxiety; restlessness; falls asleep late at night; also pain low down in l. side of abdomen.

‖After fright during pregnancy, trembling, followed next day by labor pains and hemorrhage, > lying on back without pillow and with lower end of mattress elevated.

‖Deep sighing and sobbing with strange, compressed feeling in brain; groaning and stretching of limbs at termination of each spasm. θSpasms during labor.

‖Spasms with twitching of muscles of mouth and eyes; wild expression; eyes upturned; constant attempt to tear her hair; laughing and crying; nervous and excitable. θPuerperal convulsions.

Digitized by Google

‖Puerperal convulsions commence and terminate with groaning and stretching of limbs; vomiting.
‖The labor does not progress.
‖Afterpains with much sighing, sadness and despondency.
‖Infantile colic after taking breast of mother or nurse, who suffers from grief.
‖Milk diminished.

[25] **Voice and Larynx. Trachea and Bronchia.** Voice: low; trembling; hoarseness from cold.
‖Subdued, low voice; is unable to talk loud.
‖Hysterical aphonia, mental anxiety, spinal symptoms.
‖Sensation of soreness in larynx.
‖Constrictive sensation in trachea and larynx.
‖Uninterrupted provocation to a hacking cough in larynx (not tickling) in evening after lying down; it does not disappear on coughing, only on suppressing cough.

[26] **Respiration.** ‖Frequent sighing.
‖Sighing and sobbing continue long after crying.
‖Snoring inspiration during sleep.
‖‖Desire to take a deep breath. θHysteria. θDyspepsia.
‖Frequently obliged to take a deep breath, which momentarily relieves pressure upon chest.
‖Impeded inspiration, like from a weight on chest.
‖Oppressed breathing, alternating with convulsions.
‖Oppression of chest at night, < after midnight.
‖‖Slow breathing.
‖Inspiration slow; expiration quick.
‖Loses breath when running.

[27] **Cough.** ‖Tickling cough which may be suppressed by an effort of will.
‖Constant, dry cough, excited by tickling in suprasternal fossa; as from inspired feathery dust, not < by coughing, but more excited the more he allows himself to cough; especially < towards evening.
‖Cough caused by constrictive sensation above throat pit.
‖Constant hacking cough in evening in bed.
‖Dry, spasmodic cough.
‖Hollow, spasmodic cough, caused, in evening, by a sensation like from fumes of sulphur, or from dust in pit of throat; in morning, from a tickling above pit of stomach.
‖Hollow, spasmodic cough, < evening, with but little expectoration, leaving pain in trachea.
‖‖Cough dry and rough, with fluent coryza, headache and weak voice.
‖Nervous cough and oppression frequently accompanying catarrhal affections in young people and women.
Spasmodic cough in nervous, sensitive persons.
‖‖Cough every time he stands still during a walk.

Digitized by Google

‖Cough after warm drink.
‖The longer the cough, the more irritation to cough.
‖Sleepy after each coughing spell.
During cough: nauseous feeling in epigastrium; concussions in hypogastrium; pain in penis; convulsions.
‖Expectoration: in evening, rarely in morning; difficult, in evening; tasting and smelling like old catarrh.

[28] **Inner Chest and Lungs.** ‖Stitches: in chest, from flatulent colic; in l. side of chest.
‖‖Spasmodic constriction of chest.
‖Chest feels as if too small; spasmodic yawning.

[29] **Heart, Pulse and Circulation.** ‖‖Anxious feeling in præcordia.
‖After excessive anxiety followed by sudden joy; uncertain, weak, weary sensation in chest; sinking sensation and emptiness in pit of stomach; heart's impulse feeble; pulse small, soft and 100 to 110 per minute. θCardiac hyperæsthesia.
‖Constriction at heart, with anxiety and disposition to cry; loss of appetite; pressure in stomach; palpitation; menses more profuse than usual; sleepiness; weakness of eyes; after grief.
‖Palpitation: at night, and in morning, in bed; at night, with stitches in heart; during deep meditation.
‖Pulse: generally hard, full and frequent, with throbbing in bloodvessels; less frequently small and slow; variable, very changeable; frequent in morning, slower during day and evening.

[30] **Outer Chest.** ‖‖Stitches in nipple on deep inspiration.

[31] **Neck and Back.** ‖‖Stiffness of nape of neck. θDiphtheria.
‖‖Stitch in nape of neck.
‖‖Pressive pain in cervical glands.
‖Painless glandular swellings on neck.
Tensive pains in back on standing erect.
Simple pains which are apt to become excessive when touched; jerks through whole body.
Pains in back during chill.
‖‖Stitches in small of back.
‖Lancinating stitches as from a sharp knife, in back through loins, extending to legs.
Pain in sacrum, also when lying on back, morning in bed.
‖Spine disease, with gressus gallinaceus.
‖‖The back is bent forward.

[32] **Upper Limbs.** ‖Quivering jerks in deltoid muscle.
‖After anxiety sudden stroke as if r. shoulder had been paralyzed by a stroke of lightning, which extended through whole arm, extending to tips of thumb, index and middle fingers; use of arm completely lost, can

Digitized by Google

hardly raise it; sensation as if arm did not belong to her; on touching objects it seems as if they were covered with fine felt. θHysterical paraplegia.

‖Pain in shoulder-joint as if dislocated, on moving arm.

‖Lancinating, cutting pain in shoulder-joint when bending arm forward.

‖Numb feeling of arms at night, in bed, with it a sensation as if something living were running in arm.

‖Pains in joints of arms, when bending them backwards, like from overexertion, or as if bruised.

‖Warm sweat in palms and on fingers.

Lower Limbs. ‖Lancinating, cutting pains in hip-joint.

‖Pains, incisive, throbbing, intermittent; at first every other day, then daily; chilliness; mild, melancholic temperament; fever, but no thirst; returns every winter. θSciatica.

‖Paroxysms of excruciating neuralgia of sciatic nerve and its perineal branches preceded by intense coldness and shivering, < at night, obliging her to get up and walk about room; pain acute, of a tearing, digging, boring character, and lasts sixty to ninety minutes, when it slowly departs.

‖Ischias: intermitting, chronic; > in summer, < in winter; beating as though it would burst hip-joint, accompanied by chilliness, with thirst, flushes of heat, particularly in face, without thirst.

Boil on inner side of thigh.

‖Tumor large as an egg, a short distance above knee, quite movable, hard upon pressure; great nervousness, continually sighing, afraid she would die; great fear of coming sorrow or trouble; very despondent; slight twitching of muscles; drawing limbs to body.

‖Knees are involuntarily drawn upwards when walking; gressus gallinaceus.

‖Heat of knees, with coldness of nose.

Cracking of knees.

‖Tearing pains in back of legs.

‖Tearing pain in tendo achillis and calf, as though parts would be cut off; < standing, walking, or exerting muscles.

Numbness of feet, legs, and sometimes of lower limbs.

‖Coldness of feet and legs, extending above knee.

‖Heaviness of feet.

‖Burning in heels, at night; when they come in contact, however, they feel cold.

‖Bruised or stinging sensation in soles of feet.

‖Corns painful as if sore.

‖Convulsive jerking of lower limbs.

Digitized by Google

!Staggering walk.

31 **Limbs in General.** !Trembling of limbs; languor.
!Single jerks of limbs, when falling asleep.
!Sudden spasmodic action of a muscle; limbs jerk;
!Crawling, asleep sensation in limbs.
!Tingling in limbs.
!Pain as if sprained or dislocated, in shoulder, hip and knee-joints.
!Neuralgic pain in r. shoulder when raising arm or when turning it towards chest; loss of sensation in r. knee and tension in same when stretching leg.
!!Painfulness of limbs on going to sleep.
!Cold hands, and cold feet up to knees.

38 **Rest. Position. Motion.** Rest: pains >: headache >.
!Change of position > pain.
Lying: pains in head >; vertigo.
Lying down: pains come again; toothache; itching around genitals; uterine pains >; hacking cough; jerking in forearm.
Lying on back: > headache; labor pains and trembling >; pains in sacrum; chorea >.
Lying on side: headache <; pain as if nail was driven in head >.
Must lie down: when pain in head is bad; after hemorrhage from rectum; after dinner.
Must bend head forward; lays it upon table.
Inclines head backward, or is drawn powerfully back.
Leaning forward: pain over nose >.
Bends himself backward, so that he rests on head and feet.
Sitting: pain in anus >; blind piles painful; pain and sickness at stomach >; tremor of legs <.
Sitting and standing very difficult: on account of chorea.
Drawing limbs to body.
Lower jaw thrust forward.
When fingers are extended: trembling of hands.
Change of position: often > pains; headache <; cramps in stomach >; frequent at night in bed.
Moving: pressure in stomach becomes cutting; pain in shoulder-joint on moving arm.
Slightest motion: of head < vertigo; of tongue < ptyalism.
Slight motion: knees give way.
Exerting muscles: < tearing in tendo achilles and calf.
Bending arm forward: lancinating pain in shoulder-joint.
Bending arms backward: pains in joints.
Turning arm to chest: neuralgic pain in r. shoulder.
Raising arm: neuralgic pain in r. shoulder.
Stretching leg: tension in it.
Dropping head forward: < headache.

Digitized by Google

Turning head suddenly: headache <.
Tossing head: during dentition.
Trembling and shaking: of head.
Stooping: < vertigo; renews pain at root of nose; headache >; pain in a spot in r. parietal bone <.
Walking: pain in anus <; blind piles less painful; painful pressure in neck of bladder <; knees involuntarily drawn upwards; tearing pain in tendo achilles and calf <; as though breath would fail, becomes qualmish.
Standing: pain in anus <; blind piles painful; pain and sickness at stomach; tensive pain in back; tearing pain in tendo achilles and calf <; goes to sleep.
Obliging her to get up and walk about rooms: pain in sciatic nerve.
On ascending steps: jerking headache.
Stepping heavily: headache <.
Stands still during walk: on account of cough.
Running: headache <.
Throws himself wildly about in bed.

[35] **Nerves.** ‖Persons mentally and physically exhausted by long concentrated grief.
‖Oversensitive to pain.
|Trembling and languor of limbs.
|Trembling of hands when writing, most in anyone's presence, and getting < as soon as she fancies any one might notice it; appears also when fingers are extended.
|Her trembling does not make much difference to her writing, but shows itself when she extends her fingers, more marked on r. side.
‖Great languor or deep sleep, with stertorous breathing after or during fever.
‖Sensation as if she had been fasting a long time with flat taste and languor in limbs.
|Faint feeling; false hunger; nausea and vomiting of mucus; habitual smoking.
|Great weakness of whole body; on walking seems as though breath would fail, becomes qualmish in pit of stomach, and then coughs.
|Great weakness and exhaustion of whole body; lassitude in evening.
|Debility after arrest of hemorrhage, with disposition to be vehement or vexed.
|A simple violent pain here and there in a small spot, as for example, on ribs, only noticed on touch.
‖Emotional hyperæsthesia ending in depression and torpor; sexual desire with impotence.
|Hysterical debility and fainting fits.
|Mind very irritable; easily becomes sad; frequent attacks

Digitized by Google

of pressing, cramping pain in forehead and occiput, face red, lachrymation; spasmodic constriction of throat, with difficult deglutition; much belching, hiccough; constriction of chest, respiration impeded, trembling of head, twitching of arms and legs with semi-consciousness, finally a deep sigh followed by profound sleep. θHysteria.

After a quarrel with her husband, awoke next morning with a rhythmical tremor of entire l. leg which gradually involved both legs; < sitting, did not interfere with walking; on following day was accompanied by choreic jerking of head from l. to r., and slightly from above downwards. θHysteria.

Anguish, shrieks for help, with suffocating constriction of throat; difficult deglutition; comes out of spasm with deep sighing. θHysteria.

Hysteria characterized by a mental character which is mild, gentle, yielding though whimsical and introverted.

Hemicrania, globus hystericus, or sudden toothache attacking a healthy tooth, in hysterical subjects.

Great tendency to start.

Jerkings and twitchings in various parts of muscles.

Jerking, as if a mouse was crawling under skin, in one part of muscles of forearm, in evening after lying down.

Convulsive twitchings, especially after fright or grief.

Screaming with violent trembling all over; single parts seem to be convulsed.

Children are convulsed in sleep after punishment.

Convulsions in children in first period of dentition, with pale complexion, or in consequence of irregular innervation of capillaries, with remarkable redness of one cheek and cold nose; increased temperature of body transient; skin cool to touch.

Spasms in children: from fright or from worms; child pale, cold; fixed, staring look; occasional screams; vomits food; preceded by hasty drinking.

Spasms with cries or involuntary laughter.

Convulsions alternating with oppressed breathing.

Convulsions, with loss of consciousness, and temporary inability to speak.

Convulsions: during dentition, with frothing at mouth, kicking with legs; during commencement of exanthematic fevers; of children, after punishment; after fear or fright; return at same hour, daily.

Suddenly feels sleepy and lies down, or goes to sleep standing and falls; lies quietly and unconsciously for half an hour, or several hours; eyes closed; makes fists; hides under bedcover, and peeps timidly from under it; ex-

Digitized by Google

tremities jerking upwards; body thrown upward and lower jaw thrust forward; suddenly wakes up gasping, and complains of hunger. #Spasms after fright.

Loss of consciousness, sudden or preceded by headache, especially at night; bends himself backward so that he rests on head and feet, throws himself wildly about and tumbles out of bed if not prevented; violent shocks affect the body and particularly chest; froth mixed with blood escapes from mouth; after ten or fifteen minutes spasms pass off but unconsciousness lasts for five or six hours; confused speech of which later he remembers nothing; passes stool or urine in every corner of room if not prevented; severe chill, during which body is cold as ice, ends the attack, which is followed by great mental and physical prostration.

Children during dentition, or even at an earlier or later period, are suddenly seized with spasms resembling epilepsy; they often occur without apparent cause or come on after child has been reprimanded for a fault and then put to bed; twitchings begin at corners of mouth so that child appears to smile, then spasms rapidly affect muscles of face, forehead, eyes, and often eyeballs, or eyes may be open, fixed and staring, with dilated pupils; frothing at mouth, biting of tongue or cheeks, teeth firmly clenched and immovable, trismus, twitching of arms, less often of feet, attacks last from five minutes to half an hour, after which child is covered with sweat and presents all the symptoms of congestion of brain, followed by soporous sleep, from which they are awakened by renewed spasms, or spasms return after a complete intermission; pulse frequent, often delirium and involuntary urination.

Clonic convulsions, in hysterical, fitful women.

Violent convulsions; often tonic spasms predominate.

Tetanic convulsions, with frequent inclination to yawn.

Tetanus after fright.

Spasms and tetanic convulsions in hysterical women and children; especially when falling asleep.

Catalepsy with bending backwards.

After fright, cataleptic attacks, lasting several hours and returning regularly every two months; gradually attacks became epileptiform in character, with violent convulsions and loss of consciousness; attacks also became more frequent, occurring every month, just before or after menstruation, and finally occurring after any accidental excitement; spasms and pain during menstruation.

Emotional trismus or opisthotonos; head drawn power-

Digitized by Google

fully back, countenance livid, pupils dilated, respiration and deglutition of fluids difficult.

▮Children with pale complexion and blue rings around eyes; there gradually ensues a great degree of timidity and tendency to start, followed by involuntary movements of facial muscles, and of upper and lower extremities, gradually attaining the intensity of chorea.

▮Chorea: after fright or grief; < after eating; > lying on back.

▮Emotional chorea, especially after fright, grief, or other mental excitement, with sighing and sobbing; vacillating gait; liability to stumble and fall over small objects; trembling and twitching of various muscles; precipitancy of volition; patient expresses anxiety in his movements; < after eating, especially after dinner; after deep grief; > while lying on back.

▮Chorea in girls who have been frightened by threats or punishment; constant and involuntary twitching and throwing about of arms; objects are dropped from hands; twitching of eyes and shaking of head.

▮Sudden and severe chorea after being frightened by mouse running up arm; twitching in facial muscles and active movements in upper extremities, so that hands seemed always to be engaged in some sort of voluntary work; at one time put her hand to hair, at another to ear, now quickly extended arm as if to smooth dress, and so on the whole day; voluntary movements of hands so far lost that she could neither eat nor drink unassisted.

▮All sorts of motions and contortions of extremities, head also being affected; cannot walk nor use hands even to eat. θChorea after fright.

▮Cries out when any one approaches bed, and at intervals repeats her crying, but is not capable of speaking a single word; hands and feet thrown violently about; convulsive distortion of muscles of face; head one moment bent backward, at another to side, and whole body is thrown violently about, tophi on hands and feet. θChorea.

▮Chorea in such aggravated form that sitting and standing is extremely difficult; previous bright and active mind degenerated almost to a condition of idiocy.

▮Chorea; convulsions are greatest in mouth, producing much distortion of face; globus hystericus.

▮Nervous condition in influenza, with general convulsions and frothing at mouth; attacks resembling epilepsy.

▮Emotional epilepsy; caused by fright and suppressed grief; especially suitable for children; recent cases.

Digitized by Google

Convulsive movements in limbs with spasmodic closure of jaws; attacks lasted about half an hour, and recurred every four to seven days; they came on at all hours of day and night, and were occasioned by any mental excitement; finally attacks became more violent; fell down, became unconscious, thumbs turned into palms, convulsions and foaming at mouth, terminating in sleep; the longer the attacks were delayed the more violent they were; expression of face one of extreme melancholy. θEpilepsy after fright.

Face red; pulse full, 100; loss of consciousness; eyes fixed; convulsions of extremities with frothing at mouth; thumbs clenched; great thirst after consciousness is restored.

Silent, stupid state, with jerking of body, partial spasms of extremities, one limb or only certain muscles at a time; lassitude after a fit. θEpilepsy.

Chorea-like and epileptiform convulsions; paresis; anæsthesia combined often with hyperæsthesia of legs; subsultus tendinum; jerking of limbs; trembling of tongue; delirium tremens.

Paralysis after great mental emotion and night watching in sick chamber.

Hysterical paraplegia.

Perversion of co-ordinations of function; clavus hystericus.

Great mobility in nervous phenomena.

Sleep. Sleeplessness: from grief, care, sadness; anxious thoughts and depressing emotions; after overstraining mind by racking business cares; before midnight; from ebullition of blood; with starting when falling asleep; inward restlessness, thirst, fever with anxiety from 2 to 5 A.M.

Sleep very light, hears everything, even distant sounds.

Restless sleep.

Spasmodic yawning: with pain in lower jaw, as if dislocated; so that water runs from eyes.

Hiccough in children; restlessness at night, and screaming during sleep.

When going to sleep jerks through whole body, or in a single limb, or a single muscle.

Very restless at night in bed; hysterical subjects.

Frequently changes his position at night in bed.

Snoring inspiration during sleep.

During sleep of children: chewing motion of mouth and startings (flexors); stamping feet and grinding teeth.

Child awakens from sleep: with piercing cries and trembles all over; in spasms after being punished and sent to bed.

Digitized by Google

‖Somnambulism; describes clearly the interior of brain; again sees everything that passes in street, but recollects nothing of it when awake. θEffects of wounded honor.

‖In his dream is occupied thinking of the same object throughout whole night; a fixed idea, which does not leave him on waking.

‖Dreams with reflections and deliberations.

[38] **Time.** The morning is the best time to give this remedy. H.

Aggravation at 4 A.M. and 4 P.M., lasting till evening.

Morning: pains come on at 9 o'clock and last till 2 P.M.; pain < till afternoon; when rising pains <; on awakening, headache which disappears on rising; headache <; stabbing pain in head begins on rising; toothache; gnawing pain in stomach; hurry of brain; great anxiousness, hollow, spasmodic cough; palpitation; pulse frequent; pains in sacrum, lying in bed; general heat.

From 2 to 5 A.M., inward restlessness, thirst, fever with anxiety.

11 A.M.: hungry.

During day: acrid tears; darting pains in vulva; pulse slow.

Afternoon: pain gradually > till evening; fever; heat of whole body; severe shaking chill.

4 P.M.: stabbing pain in head at its height.

At sunset: chilly.

Evening: incapacity for thought; hacking cough; hollow, spasmodic cough <; expectoration difficult; pulse slower; lassitude; jerking as if a mouse was crawling under skin in forearm; shaking chill, with redness of face; warm sweat in hands; when lying down, pains come on again; sudden pressure in head now in one place, now in another; toothache; slight fever; feeling of hunger; desire for stool; violent itching in rectum; itching around genitals; chilliness.

Night: agglutination of lids; nervous and restless painful pressure in region of pylorus; pressure in stomach <; cramps in stomach; colic; rumbling of wind <; diarrhœa <; itching of anus; anxiousness; vomiting; falls asleep late; oppression of chest; palpitation with stitches in breast; numb feeling in arms; sciatica; burning of heels; loss of consciousness; restlessness; frequently changes position in bed; fever.

After midnight: fear of thieves on waking; oppression of chest <.

[39] **Temperature and Weather.** Open air: walking in, aching in one-half of head; lachrymation < when exerting eye; itching > when getting heated, out doors.

Fresh air: blind piles <.

Warmth: headache >; stabbing pains in head; chills <.

Digitized by Google

Warm room: > chilliness.
Warm drink: cough.
Warm food: aversion to.
External warmth is intolerable; must be uncovered as soon as heat begins.
Heat: > headache.
Lying on a hot bed: > chill.
As soon as back is the least uncovered: chill begins.
Cold: pain in occiput <; pain in teeth.
Cold air: causes chilliness.
Cold winds: headache <.
Cold water: washing hands < pain.

Fever. ▮Chill and chilliness, with increased pains.
▮▮Chilliness in face and on arms, with chattering of teeth and gooseflesh.
▮▮Chill commences in upper arms, spreads to back and chest, with heat of ears.
▮Coldness and chilliness of whole body, or only of posterior portions, > in warm room, or by a warm stove.
▮Chill proceeding from abdomen.
▮Chilliness about knees, which are not cold externally.
▮Chill of single parts only.
▮▮Shaking chill, with redness of face, in evening.
▮▮Chill: with great thirst for large quantities of water; > from external warmth.
▮Chilly at sunset or in cool air; very cold all over, with one-sided headache.
During chill: ill humor; violent thirst; colic; nausea; vomiting of food, bile or mucus; great paleness of face; pain in back; lameness of lower limbs; urticaria.
▮Chill > after eating.
▮Internal chill, with external heat.
▮External coldness, with internal heat.
▮Continuous quick alternations from heat to cold.
▮Hot knees, with cold nose.
▮One ear and one cheek red and burning; the other cold and pale.
▮Heat with cold feet.
▮Heat or coldness of single parts.
▮One-sided burning heat of face.
▮External warmth is intolerable, must be uncovered as soon as heat begins.
▮▮External heat and redness, without internal heat; flushes.
▮▮Heat of whole body, in afternoon, without thirst, with sensation of dryness of skin, though with some perspiration on face.
▮▮General heat in morning in bed, with thirst, does not wish to be uncovered.

Digitized by Google

‖Frequent flushes of heat with sweat.
‖Fainting during the heat or sweat.
‖Sudden attack of continued fever, consequence of reverse of fortune.
During heat: deep snoring sleep; frequent sighing; beating headache; vertigo; delirium; pain in stomach and bowels; no thirst; vomiting of ingesta, with coldness of feet and spasmodic twitching of extremities; nettlerash over whole body, with violent itching, easily relieved by scratching, disappears with sweat.
‖Hunger after fever.
‖Sweat slight, or only on face.
‖Sensation as if sweat would break out, which, however, does not follow.
‖Warm perspiration of extremities.
‖Warm sweat on hands, or on inner surface of hands and fingers, in evening.
‖Sweat: at times cold, but generally warm and somewhat sour smelling; without thirst; during a meal; when eating, only on small spot on face; often confined to upper part of body; in hands.
‖Paroxysm preceded by much yawning and stretching; in afternoon severe shaking chill, particularly on back and arms, with thirst, lasting about an hour, followed by heat of whole body, with cold feet; internal shuddering with red cheeks and warm skin which is only > by onset of sweat, which usually lasts several hours; during heat and sweat no thirst; short periodical attacks of pressing pains in head from within out; accompanied by tearing in forehead, both > lying; dull, pressing pain in epigastrium; oppression of chest; appetite increased; ineffectual urging to stool followed by hard stool; heaviness in limbs with pain in joints; during apyrexia great lassitude; knees give way on slight motion; sound sleep with snoring respiration; taciturn, indifferent, startled when spoken to; tongue white and moist; lips cracked and dry; face pale; pulse small, and somewhat increased during fever. θTertian ague.
‖Slight chilliness gradually extending over whole body, and finally becoming a shaking chill with chattering teeth; stretching, yawning, tearing in limbs, and great thirst; nausea with vomiting; vomits the water she drinks, mixed with slime; oppression of chest; vomiting at end of chill, followed by heat without thirst; headache; sweat without thirst; chilliness of long duration, heat and sweat being much shorter. θTertian ague.
‖Paroxysm assuming all types—quotidian, tertian, quartan, anticipating or postponing, and coming on at all

Digitized by Google

hours of day or night; chill severe and pronounced, lasting usually about an hour, with intense thirst only during chill; chill > by external warmth; as soon as chill began, although temperature was over 90, would go at once to stove, and "over a hot fire drink the hydrant dry;" fever well developed, with much headache and vertigo, but no thirst; rarely any perspiration, and with exception of some vertigo felt well during apyrexia.

Slight chill lasting about half an hour, and accompanied by violent thirst and vomiting; after chill pains in breast, followed by heat with headache; no sweat.

During paroxysm: vertigo on lying; palpitation of heart; chilliness with thirst; chilliness > by external warmth; heat and sweat without thirst; chill > by lying in a hot bed; great weakness during fever.

Severe chill followed by dry heat, sweating stage absent; thirst before, during and after chill, with pains and lassitude in lower limbs and diarrhœa. θQuartan ague.

Chill > by wrapping up warm; begins as soon as back is least uncovered; jerking of limbs; jactitation.

Ague recurring each Spring for several years and annually suppressed by Quinine; thirst during chill.

Quotidian fever with violent thirst at commencement of violent and continuous chills; is quiet and taciturn.

Return of chill in one month, in a boy, æt. 7, of mild, quiet disposition, very laconic in speech; headache between paroxysms, chill with thirst > from external warmth; fever with heavy sleep, perspiration light.

Strumming sensation in body. θIntermittent.

Apyrexia: heaviness in head; throbbing in temples; sensation as if head was smaller; burning in head with cold hands and feet; face pale; eruption on lips and in corners of mouth; lips dry and chapped; pappy taste in mouth; hungry about 11 A.M, but little or no appetite at time of meals; aching pain in pit of stomach; colic, with hard stools and ineffectual urging; pain in back and limbs; irritation to cough in larynx, sensation as of a foreign body lying over it; languor, apathy, giving away of knees, starting in sleep, or sound sleep with snoring; sleep usually continues from heat through sweating stage into apyrexia.

Type: quotidian; tertian; quartan; irregular; continually changing, especially after abuse of quinine; paroxysms accompanied by spasmodic symptoms.

Time: irregularity of hour; paroxysm at sunset, late in afternoon or evening, then fever heat all night; anteponing paroxysms, usually postponing.

Attacks irregular both in periodicity and evolution of their stages.

Digitized by Google

Typhoid fever in women or in young men; for some time before attack patient does not feel well, then suddenly and without any gradual exacerbations the paroxysm sets in and is usually very severe; fever begins in afternoon and continues through whole night; patient although suffering greatly cannot clearly describe his symptoms, and does not know where he is ailing or what is the matter with him; almost beside himself with impatience and despair, and cries out for help to those standing about; easily frightened, fears this or that may hurt him; sensation as if swung to and fro in a swing or cradle; least noise or jar aggravates the complaints; during first five days paroxysms begin with slight chilliness and coldness, with or without thirst, followed by heat with chilly creepings and thirstlessnness; as the disease progresses chilliness precedes fever; yawning and stretching; severe throbbing headache in forehead and over eyes, < from light; pain in nape of neck, neck as if stiff; bitter taste and dryness in mouth, without thirst, latter being only present during chill; choking sensation from stomach up into throat with oppression of chest, > from belching; pressure as from a stone in pit of stomach; indescribable sensation in pit of stomach over which there is a feeling of constriction accompanied by shortness of breath, as if lower part was tightly laced; severe palpitation of heart, patient often losing consciousness, eyes are closed and respiration seems suspended; trembling and shaking of single parts; attacks begin and end with stretching and yawning; pressure, or weak and empty feeling in stomach, which is somewhat painful to touch; constipation; severe, indescribable pains in back and limbs; strumming through limbs; jerking of tendons; at no time sweat, skin generally dry; great sleeplessness; on falling into a doze starts up, affrighted by various visions; troublesome dreams.

" **Attacks, Periodicity.** Complaints return at precisely the same hour.

Acute paroxysms: chronic tonsillitis.

Momentary disappearance of pain by change of position.

Periodical: fits of vertigo; headache weekly, fortnightly or monthly; headache gradually increases, suddenly abates; attacks of weakness; attacks of cramps in stomach; abdominal spasms; attacks of pressing pain in head; convulsions.

Irregularity of hour: paroxysm at sunset, late in afternoon or evening.

Every 3 to 4 hours: merry and lachrymose moods alternate.

Google

Twice a day: bowel must be returned after stool; paroxysms of anxiety lasting for hours.
Every morning at 8 A.M.: < until 10.30, when gradually > and entirely disappears at about 1 P.M.
Every day: pain in anus; pains in lower limbs; at same hour, convulsions.
Periodically every afternoon: spasmodic ructus and singultus.
7 to 8 P.M. attacks of extremely severe pains in stomach, more frequently at midnight, lasting 2 to 3 hours.
Every evening: half hour after going to bed, pain in r. lower jaw lasting from one to one and a half hours.
Every other day: incisive pains in lower limbs.
Day before headache: irritable disposition.
Day after headache: feels as though it might return.
Every four to seven days: attacks of convulsive movements in limbs.
Weekly: same hour (11 A.M.) and day, nervous headache.
Every ten to fourteen days: nausea.
Every month: headache; just before or after menstruation, cataleptic attacks.
Every two months: cataleptic attacks.
Every Spring: ague recurs.
Every Winter: pains in lower limbs.
During dentition: metastasis from bowels to brain; spasms.
During menstruation: spasms and pain.
Five minutes to half an hour: duration of spasms.
Lasting sixty to ninety minutes: pain in sciatic nerve.
Chill lasts one hour, sweat lasts several hours.
Lasting till 5 P.M. every day: contractive pain in anus and stitches up rectum.
Lasting several hours: cataleptic attacks.
Lasts from five to six hours: spasms.
For many days: painless contraction of anus.
For six months: lachrymation; pain in eyes with headache.

Locality and Direction. Right: heaviness of arm; pressive headache in side of forehead extending to eye; headache above orbit at root of nose; pressure in frontal region; intense pain over eye; throbbing pains on side of forehead from eyebrow around eye; pain in a spot in parietal bone; pain in breast; two chipping ulcers at upper margin of cornea; pain in lower jaw; parotid swollen; diphtheria commences r. side; shoulder as if paralyzed; neuralgic pain in shoulder; loss of sensation in knee; trembling of hands < r. side.
Left: pains from head into eye; eye smaller; as if a particle was in external canthus; pain in eye; burning

Digitized by Google

and watering of eye; rawness on side of throat; pain in hypochondrium; sharp sticking left of umbilicus; pain low down side of abdomen; stitches side of chest; rhythmical tremor of entire leg.

From l. to r.: choreic jerking of head.

From above downward: jerking of head.

From within outward: pain over nose in forehead; pressing pain in head.

From without inward: in brain.

Sensations. ‖ Oversensitiveness to pain.

‖ Pressing pain from in out, like from a hard, pointed body.

‖ Tension in internal parts.

‖ Pain in small, circumscribed spots.

Pain as from dislocations in joints; cutting as from a knife; tingling as of ants; as though eyeball would be pressed out; as though needles were pushed through into brain; pressure as of a weight on vertex; as if a nail was being driven out through side of head; as if temples would be pressed out; as if brain was beaten and bruised; as if nerve of tooth was shattered and crushed; as if head would burst; as if headache might return; as if tears were in one eye; as of sand in eyes; as if upper lid was too dry; as if eye would fall out; as if a foreign particle was in l. external canthus; as if inside of under lip was raw and sore; jaws feel as if crushed; as if teeth were crushed into fragments; as if food lodged over orifice of stomach and could not get down; anterior half of tongue as if numb; tongue as if burnt or raw; bread feels as if too dry; as if epigastrium was raw inside; as if large morsel of food or plug was sticking in middle of throat; as from a lump in throat; as if swallowing over a bone; feeling in stomach as from fasting; as if stomach and intestines were hanging down relaxed; as if a number of pins were sticking in stomach; as if stomach was shortened; as if a stone was pressing in region of pylorus; as if he would like to vomit; as if rectum was distended with gas; hemorrhoidals as if excoriated; sees everything as through a fog; as if all parts were asleep; as if she had no feeling in epigastrium; as if stockings were cold and damp; chest as if too small; pains as from a sharp cutting knife through back; as if r. shoulder had been paralyzed; as if arm did not belong to her; as if objects touched were covered with fine felt; looks around bed as if to find something; as if he had committed some crime; as if she had done something wrong; as if some great misfortune was about to happen; as if shoulder-joint was dislocated; as if something living was running

Digitized by Google

in arm; pain in joints of arms as if bruised; beating as though hip-joint would burst; as if back of leg would be cut off; corns as if sore; hip and knee-joints as if dislocated; as if she had been fasting a long time; as if a mouse was crawling under skin in forearm; as if jaw was dislocated; as if sweat would break out; as if head was smaller; as of a foreign body lying over larynx; as if swung to and fro in a swing or cradle; neck as if stiff; pressure as from a stone in pit of stomach; as if lower part of stomach was tightly laced; as if flesh was loose on bones on account of blows.

Pain: from forehead to middle of vertex; in back and nape of neck; from head to l. eye; in head with every throb of arteries; in occiput; in a spot in r. parietal bone; in r. breast; in outer part of head; in periorbital region; in upper part of lid; in eyes; from head into l. eye; in smaller twigs of facial nerves; in r. lower jaw; in submaxillary glands; in teeth; in limbs; in back of head, nuchæ; in ears; in l. hypochondrium; in anus; from sacral region through to front; at stomach low down l. side of abdomen; in trachea; in penis; in back; in sacrum; in shoulder-joint; in joints of arms; in lower jaw; in back; in stomach and bowels; in joints; in breast; in lower limbs.

Intolerable pain: in back.

Furious headache.

Intense pain: over r. eye and seemingly through supra-orbital foramen.

Extreme pain: in both temples; from eye to top of head; in epigastrium; in stomach.

Intensely sore pain: at entrance to vagina.

Indescribable pain: in back and limbs.

Excruciating neuralgia: of sciatic nerve and its branches.

Simple violent pain: in small spots.

Pain very acute, driving him almost frantic: through eyes to head.

Tearing pain: in forehead; in back of legs; in tendo achilles; in calf; in limbs.

Acute, tearing, digging, boring pain: in sciatic nerve.

Lancinating: in sides of abdomen; in uterus.

Lancinating, cutting pain: in shoulder-joint; in hip-joint.

Lancinating boring: deep in brain.

Lancinating stitches: in back through loins to legs.

Stabbing pain: deep seated in eyes, going to occiput and nape of neck finally to vertex; in rectum.

Darting: in face; in epigastrium; in vulva.

Cutting: deep in rectum.

Cutting stinging: in abdomen.

Digitized by Google

Gnawing cutting: in stomach.
Stitches: in soft palate extending to ear; in throat; in parotid; in stomach; from abdomen into chest; in sides of abdomen; up rectum; in hemorrhoidal tumors; in lower part of rectum; in breast; in l. side of chest; in nipple; in nape of neck; in small of back.
Sharp sticking: generally in one spot; in superciliary ridge, temple or side of head; above and to l. of umbilicus.
Sticking: in palate to inner ear; in throat; in stomach.
Stinging pain: in forehead; in throat.
Twisting pain: in face.
Fearful griping and cutting: in uterus.
Drawing and griping: in abdomen.
Pinching: in umbilical region.
Boring pain: in face; in front teeth.
Pressing, cramping pain: in forehead; in occiput.
Cramp pains: in stomach; in abdomen; in uterus.
Twitching pain: in forehead; in eye; in stomach.
Incisive, throbbing pains: in lower limbs.
Throbbing pain: in r. side of forehead; in head; in occiput; in temples.
Labor-like pains: in uterus.
Bearing-down pain: in abdomen.
Neuralgic pain: in head; in eyes; in rectum; in r. shoulder.
Beating: in hip-joint; in head.
Ulcerative pain: on margin of prepuce.
Severe contractive pain: in anus.
Contractive colic.
Contractive sore pain: in rectum.
Dragging pains: about pelvis.
Crampy pressure: in uterus.
Pressing pain: in head; in forehead; in stomach.
Pressive pain: in frontal region; above root of nose; in r. side of forehead, extending down into r. eye; in eyes; in rectum; in cervical glands.
Pressive, drawing pain: above r. orbit at root of nose.
Painful pressure: on upper surface of brain; in region of pylorus; in region of spleen; at pit of stomach; in rectum; with scraping sensation in neck of bladder.
Dull, pressing pain: in epigastrium.
Sudden pressure: in head, now in one place, now in another.
Pressure: in r. frontal region above eyebrow; from without inward in head; as of a weight on vertex; in temples; in eye; in pit of stomach; in stomach; over stomach; in sacrum; in rectum; in anus; on chest.
Drawing pain: beginning at forehead, extending down one-half of nose; in face; in umbilical region.

Spasmodic pains: in stomach; in abdomen.
Jerking: of head; through whole body when going to sleep; in a single limb; in a single muscle; of tendons.
Bruised pain: in small of back; in soles of feet.
Dull pain: in head, confined to r. half of forehead and r. eye; in forehead; in face; in rectum.
Aching: in one half of head; in pit of stomach.
Raw pain: in mucous membrane of mouth.
Soreness: of inner nose; in teeth; of inner mouth; of throat; of anus and rectum; in urethra; on margin of prepuce; in larynx.
Sore, burning pain: in rectum.
Burning heat: in vagina; in feet.
Burning: in head; in eyes; in epigastrium; in stomach; in urethra; in heels; in one ear and cheek.
Heat: in head; of whole body; of knees.
Stinging: in soles of feet.
Smarting: in rectum; in urethra.
Sore and bruised feeling: of head; of face.
Tenderness: of teeth.
Tensive pain: in back.
Tension: under ribs; in rectum; in r. knee.
Compressive, burning pain: extending through sinciput and eyes.
Suffocating constriction: of throat.
Constrictive sensation: in trachea and larynx; above throat pit; of chest; of anus; at heart.
Spasmodic constriction: of throat.
Choking sensation: from stomach up into throat, with oppression of chest.
Anxious feeling: in præcordia; mounts up to abdomen.
Hemorrhoidal pains: in anus.
Indescribable sensation: in pit of stomach over which there is a feeling of constriction.
Fulness: in pit of stomach; in epigastrium; under ribs.
Sensation of protrusion: in umbilical region.
Weight: at back of head.
Heaviness: of head; of r. arm; of eye; in pit of stomach; of feet; in limbs.
Oppression: begins at stomach spreads to throat; of chest.
Lameness: of lower limbs.
Weakness: in pit of stomach; of whole body.
Lassitude: of limbs.
Sinking sensation: in pit of stomach.
Peculiar sensation of weakness: in upper abdomen and pit of stomach.
Weary sensation: in chest.
Empty feeling: of head; of stomach and chest; at pit of stomach; at epigastrium.

Digitized by Google

Faint feeling: at pit of stomach.
Sinking: in pit of stomach.
Flabby feeling: in stomach.
Stiffness: of nape of neck; of nuchæ and muscles (trapezius) on each side of this ligament.
Dryness: of skin; of mouth.
Strumming: through limbs.
Quivering jerks: in deltoid muscle.
Trembling: in stomach.
Ringing: in ears.
Numb feeling: of arms; of feet; of legs.
Numb and stupid feeling: in brain.
Trickling: above pit of stomach.
Tingling: in anus; in limbs.
Crawling, asleep sensation: in limbs.
Crawling: in pharynx; low down in rectum.
Creeping sensation: in lower part of rectum.
Formication: in face.
Itching: of nose; of anus; in lower part of rectum; in forepart of urethra; on genitals; on margin of prepuce.
Violent itching: over whole body; in rectum.
Chilliness: in face; on anus spreads to back; of whole body or of posterior portions; about knees.
Coldness: of nose; of feet and legs; of hands and feet up to knees.

"**Tissues.** Inflammation of external parts.
External parts become black.
Hemorrhages, blood dark.
Anæmia.
Painless swelling of glands.
Sensation as of dislocation in joints.
Chlorosis in sensitive, nervous and hysteric women, inclined to spasmodic and intermittent complaints; induced by mental emotions, such as grief, fright, disappointed love.
Chlorosis; stomach very delicate; œdema of lower limbs; globus hystericus.
Suitable to persons who had been starving either from want or other causes.
Pains as if contused or sprained, or sensation as if flesh was loose on bones in consequence of blows.

"**Touch. Passive Motion. Injuries.** Generally < from slight touch; > from hard pressure; > from scratching.
Worse during passive motion, riding and after it.
Touch: scalp tender; head painful; region of pylorus sensitive; cramp pains in uterus <; heels when they come in contact feel cold; simple, violent pain in small spot

Digitized by Google

here and there, only noticed on touch; stomach painful; ulcers <.

Pressure: soft, > headache; pains >; pain in epigastrium; pain in stomach <; pain in l. hypochondrium <; uterine pains >; ulcers > from hard pressure.

Slightest contact < cramps in stomach.

Frequently obliged to loosen clothing.

[46] **Skin.** ‖Great sensitiveness of the skin to a draft of air.

Itching: better from gentle scratching; when getting heated in open air.

Fine pricking like flea bites.

Eruption on face.

Skin chafed, sore.

Chilblains, excoriation and vesicles.

Ulcers: painless; discharge scanty; burning; generally < from slight touch, > from hard pressure.

[47] **Stages of Life, Constitution.** ‖Especially adapted to nervous temperament; women of a sensitive, easily excited nature; dark hair and skin, but mild disposition; quick to perceive, rapid in execution.

‖The patient is sensitive, peevish, excitable, hysterical, with sanguine, nervous temperament; is delicate; falls easily in love; is romantic; bears trials meekly; readily falls into clonic spasms after mental agitation.

Stands in same relation to children and women that *Nux vom.* does to sanguine, bilious men.*

Healthy child, æt. 9 months; mother suffering from nervous disorders; spasms.

Child, æt. 1½, mother had severe fright during pregnancy; epileptiform spasms.

Boy, æt. 4, girl, æt. 6; epilepsy.

Boy, æt. 7, mild, quiet disposition, laconic in speech; intermittent.

Girl, æt. 9, after fright; spasms..

Boy, after fright; spasmodic affection.

Girl, æt. 10, blonde, graceful; after fright; epilepsy.

Boy, æt. 10, robust, but pale, had tapeworm after fright; spasms.

Girl, æt. 10, after catching cold, pain in limbs, followed by gouty swellings of joints; chorea.

Girl, æt. 11, sick eight days; angina.

Girl, æt. 11; chorea.

Boy, æt. 12, suffering seven months; chorea.

Girl, æt. 12, after being frightened by a fire; spasms.

---

* There are many more *Ignatia* persons in North America than *Nux vom.* persons, at least this side of Mason and Dixon's line.—C. Hg.

Girl, æt. 14; hysterical cramps.
Girl, æt. 17, weak; affection of mind.
Man, æt. 17; tertian ague.
Colored girl, æt. 17; exophthalmus.
Girl, æt. 18, delicate appearance, white skin, somewhat pale face, menses regular, has suffered several years; hysteria.
Italian girl, æt. 18, commenced menstruating at 12; four years ago in consequence of fright, epilepsy.
Girl, when five years old was pushed into a stream, the chill and fright bringing on violent fever; followed a fortnight later by attacks from which she has since suffered; menstruation set in at 14 without bringing relief; epilepsy.
Man, æt. 19; quartan ague.
Girl, æt. 19; amenorrhœa.
Man, æt. 20, sanguine, choleric temperament, strong and well nourished, after deep mortification; melancholy.
Girl, æt. 20, deformed; affection of stomach.
Girl, æt. 20, sanguine temperament, very sensitive to joy or sorrow; melancholy.
Girl, æt. 20; affection of mind.
Man, æt. 21, cheerful disposition, after fright; epilepsy.
Woman, æt. 24, since fifteenth year suffering from attacks of headache, vertigo and vomiting; for last two years after least mental disturbance, convulsions.
Nursing woman, æt. 24, after fright; convulsions.
Woman, æt. 24, has conceived four times within the last seven months; headaches.
Girl, æt. 25; after grief; affection of stomach.
Woman, æt. 25, married eight years, but had never borne children; hysteria.
Woman, æt. 26, very irritable, dark hair, delicate build, well educated, childless, has suffered since first appearance of menses; dysmenorrhœa.
Woman, æt. 26, had ague three years ago, delicate, yellow skin, spleen enlarged, suffering four days; intermittent fever.
Married woman, æt. 27, strumous, leuco-phlegmatic diathesis; vaginismus.
Man, æt. 28, soldier, strong and healthy, coming from a swampy district; tertian ague.
Woman, æt. 28, half year ago was greatly frightened by a cat which tore to pieces her canary bird; affection of mind.
Woman, æt. 29, mother of two children, has suffered for several years; hemorrhoids.
Woman, æt. 30, nervous temperament, irritable, lively and

responsive disposition, after long nursing; hysterical paraplegia.
Strong man, æt. 30, gardener; facial neuralgia.
Delicate lady, has had children in rapid succession; prosopalgia.
Lady artist, dark complexion, excessively nervous; conjunctivitis.
Young widow, tall, slender, dark hair, eyes and skin; affection of stomach.
Woman, after being cured of headache, pains in stomach and fluor albus, by *Pulsat.*; affection of stomach.
Woman, suffering eleven years, since birth of first child; hemorrhoids.
Woman, æt. 33, seven months pregnant with her fifth child; puerperal convulsions.
Man, æt. 33, carpenter, after great mental excitement, eight years previously; epilepsy.
Woman, æt. 34, during lactation; affection of shoulder and knee.
Plethoric lady, æt. 35, mother of eleven children; prosopalgia.
Woman, æt. 35, mother of three children, for three years; tumor above knee.
Man, æt. 36, weak, after quarrelsome life; epilepsy.
Woman, æt. 36, thin, weak, confined three weeks ago; hemorrhoids.
Woman, æt. 37, corpulent, twelve years ago gave birth to child, since which time has been suffering; affection of eyes.
Woman, æt. 39, unmarried, spare habit, bilious temperament; headache.
Woman, æt. 40; affection of mind.
Patient, æt. 40; prosopalgia.
Woman, æt. 40, pregnant, after fright; pain in epigastrium and abdomen.
Woman, æt. 42, from the country; affection of mind.
Woman, æt. 42, subject to attacks of migraine, after typhoid fever; ptyalism.
Woman, æt. 42; after being greatly frightened by seeing grandson carried into house apparently drowned; affection of mind.
Woman, æt. 44, wife of inn keeper, after grief and much trouble; melancholy.
Strong woman, æt. 46; ague.
Strong woman, æt. 46, blonde, after being angered and overheated; spasms.
Strong, healthy woman, æt. 46; neuralgia of face.
Man, æt. 48, married, red hair, blue eyes; headache.

[11] **Taste and Tongue.** Rye bread tastes good, its odor is refreshing.
!Tongue covered with aphthæ; most on edges.
!Edges of tongue folded like little bags.
[13] **Throat.** !Tough, viscid phlegm from stomach; with old drunkards.
[15] **Eating and Drinking.** Satiety, after eating but little.
All food, except rye bread, tastes too salty or bitter, yet appetite is good.
[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea in stomach, extends to chest, then ceases.
Nausea, with gagging and inclination to vomit.
[17] **Scrobiculum and Stomach.** Bloating of stomach; acidity.
[18] **Hypochondria.** Pain in splenic region.
[19] **Abdomen.** !Three months' colic, especially if it recurs at regular hours; bowels disturbed.
!Violent wind colic.
Rumbling in abdomen.
[20] **Stool and Rectum.** Stools: bilious; compact and dark colored.
[21] **Urinary Organs.** Retention of urine.
[26] **Respiration.** !Dyspnœa in old asthmatics.
[27] **Cough.** After coughing, feeling of emptiness.
!Frequent cough, with pain.
Spitting blood in small quantities and with pus-like phlegm, pain in r. chest.
Whitish expectoration.
[28] **Inner Chest and Lungs.** !Tough, viscous phlegm, with old drunkards.
Pain in region of third rib, about one or two inches from sternum, generally on r. side, but occasionally left.
Pain about junction of third r. rib with its cartilage; hemorrhage; cough; congestion; enlarged liver.
[29] **Heart, Pulse and Circulation.** !Palpitation, with aphthæ and weakness.
[31] **Neck and Back.** Cramp-like drawing, as from a cold, in l. side of dorsal vertebræ.
[33] **Lower Limbs.** Left thigh feels as if broken at middle, when sitting, ceases on rising.
[35] **Rest. Position. Motion.** Sitting: l. thigh feels as if broken at middle.
Rising: sensation as if l. thigh was broken ceases.
[38] **Time.** Morning: pains in head <.
Evenings: pains in head >.
[41] **Attacks, Periodicity.** Three months' colic, especially if it recurs at regular hours.
[42] **Locality and Direction.** Right: pain in chest; pain in region of third rib; pain about junction of third rib with its cartilage.

Digitized by Google

Left: itching over ear; occasionally pain in region of third rib; cramps like drawing in side of dorsal vertebræ; l. thigh feels as if broken at middle.

[45] **Sensations.** As if blood would press out of upper lip; as if lower lip had gone to sleep; cramp-like drawing as from a cold in l. side of dorsal vertebræ; l. thigh feels as if broken at middle.

Pain: in head; in splenic region; in r. chest; in region of third rib; generally on r. side, but occasionally left; about junction of third rib.

Sharp stitches: in tip of nose.

Violent wind colic.

Warm smarting sensation: in nose.

Stinging sensation: in upper lip.

Burning: in inner surface of lower lip.

Rumbling: in abdomen.

Dryness: of upper lip.

Itching: over l. ear.

[46] **Touch. Passive Motion. Injuries.** Touch: itching ceases when touching place; stinging sensation in upper lip.

[47] **Stages of Life, Constitution.** Babies with three months' colic.

Old drunkards, catarrh of stomach.

Old asthmatics.

[48] **Relations.** Compatible: after *Acon.* and *Bryon.* in hæmoptysis.

INDIGO.

Indigo. *Leguminosæ.*

Proved extensively by German provers. See Allen's Encyclopedia, vol. 5, p. 92.

CLINICAL AUTHORITIES.—*Prolapsus ani*, Schüssler, Raue's Rec., 1871, p. 123; *Sciatica*, Preston, T. H. M. Soc. Pa., 1872, p. 120; *Epilepsy*, four cases, Kenyon, Raue's Rec., 1875, p. 254-255.

[1] **Mind.** Melancholy, sadness.

‖Sad, discontented, ill humored, introverted.

‖Gloomy; endeavors to hide it, has spent many nights alone crying. θEpileptic convulsions.

[2] **Sensorium.** Excessive giddiness with headache.

Vertigo with headache, fulness of abdomen, great discharge of flatus, and nausea, going off in evening after remaining some time in open air.

Undulating sensation through whole head from behind forward.

Digitized by Google

[3] **Inner Head.** Sensation as if head were tightly bandaged around forehead.
Constant pain in sinciput, attended with an aching pain in r. hypochondrium.
Tearing in vertex.
Heaviness of head, as from a heavy load on vertex, when stooping.
Beating, with painful stinging in occiput.
Beating in whole head.
Feeling as if brain was distending at centre.
Headache with redness and heat of face.
Severe, lacerating pain in head.
‖Sick headache, originating in a state of debility.
‖Migraine.
Pains are characterized by great intensity, are < during rest and when sitting, and can frequently be entirely suppressed by rubbing and pressure, or by motion, or alleviated, so as to reappear with less intensity.
[4] **Outer Head.** Sensation as if a bunch of hair was pulled from vertex.
[5] **Sight and Eyes.** Pressure in ball of eye.
Inflammation of meibomian glands on lower lids.
Violent jerking and twitching in lids.
[7] **Smell and Nose.** ‖Excessive continued sneezing, succeeded by violent bleeding of nose.
Nose bleeding, with dry cough.
Epistaxis.
[8] **Upper Face.** Pricking in r. malar bone.
Small blisters on l. side of face, from forehead to neck.
[10] **Teeth and Gums.** Toothache, of a rheumatic character.
[11] **Taste and Tongue.** ‖Metallic taste in tongue, with contracted feeling in pharynx.
Vesicles on tip of tongue.
[12] **Inner Mouth.** Numbness of inner mouth.
Pain in submaxillary glands, extending to teeth.
[16] **Hiccough, Belching, Nausea and Vomiting.** Retching and vomiting of watery fluid.
Vomiting of glue-like mucus.
[17] **Scrobiculum and Stomach.** Tingling pain in pit of stomach.
Bloating of stomach.
Catarrh of stomach and intestines, with colic.
[20] **Stool and Rectum.** Emission of excessive quantity of flatus.
Diarrhœa; stool liquid, with flatulence; creeping over skin, cold hands and colic.
‖Prolapsus ani after each stool.
Pin worms.
[21] **Urinary Organs.** Inflammation of kidneys.
Renal colic.

Digitized by Google

Catarrh of bladder with pustules and boils on body, menses often appearing too early.
Chronic catarrh of bladder.
Frequent desire to urinate, burning in fundus of bladder; painful emissions of small quantities of turbid urine.
Increased emission of turbid urine, containing much mucus, without thirst, with violent contraction of urethra and pain in bladder.

[24] **Male Sexual Organs.** Depressed sexual desire.
‖Urethral stricture following gonorrhœa.
Itching of urethra, glans and scrotum.

[25] **Female Sexual Organs.** Menstruation too early.
Burning in mammæ during menses.
Stinging in mammæ, going off momentarily by rubbing.

[27] **Cough.** ‖Dry cough, always attended by nosebleed.
Violent cough; inducing vomiting; bleeding of nose.
Suffocative cough in evening and after going to bed.
‖Cough dry, always accompanied with expectoration.
Spasmodic cough with tough, mucous expectoration.

[28] **Inner Chest and Lungs.** Severe sharp stitch in middle of sternum, passing through chest, when sitting.

[30] **Outer Chest.** Painful spot, size of hand, in region of r. lower ribs, with stitch extending to shoulder joint when sitting, going off by motion.
Stitch in region of lower false ribs, toward small of back.

[31] **Neck and Back.** Drawing, lancinating pains, following course of l. rhomboideus muscle.
Boils on neck and buttocks.
Stitch between scapulæ.
Stitch in small of back, > after an evacuation.

[32] **Upper Limbs.** Excessive itching (preceded by a dull headache), especially on r. elbow joint.
Blotches on hands.

[33] **Lower Limbs.** ‖Intense aching, stinging and bruised pain in middle of the posterior of thigh, extending to knee; boring pain in knee-joint; sharp tearing, stinging or pricking in calf above ankle; < sitting; > by motion, though motion also painful; < afternoon and evening; much pricking in calf just below knee and in popliteal space; must lie down. θSciatica.
‖Indescribable pain, extending from middle of thigh to knee, in the bone, > walking, returning during rest, in afternoon.
‖Tearing pain four fingers' breadth above l. knee joint, extending to a hand's breadth above ankle; in afternoon while sitting, > rising and walking about.

[35] **Rest. Position. Motion.** Rest: pain <; pain in thigh bone <.

Digitized by Google

Must lie down: pain in calf so severe.
Sitting: pain <; stitch in middle of sternum; stitch extending to shoulder joint; sharp tearing, stinging in calf <; tearing above knee joint.
Stooping: heaviness of head.
Motion: pains >.
Rising: tearing above knee-joint >.
Walking: indescribable pain in thigh bone >; tearing above knee-joint >.

[38] **Nerves.** Excessive nervous irritation.
Illusory sensations.
Subsultus tendinum.
Paroxysms come suddenly; falls down or out of chair, becomes convulsed all over; frothing at mouth; convulsive movements followed by a rigid condition of body; before attacks he had a furious disposition, excitable, easily angered, since then had become mild and even timid. θEpilepsy.
Paroxysms lasting five minutes, clonic and very violent; occur every nine or ten days; very melancholy, exceedingly timid; did not want to live. θEpilepsy.
Convulsions regularly once a week; gloomy, but endeavors to hide it, has spent many nights alone crying. θEpilepsy.
Fits every day; exceeding melancholic. θEpilepsy.
Flushes of heat from abdomen to head, with sensation as if head was tightly bandaged around forehead; fits begin with dizziness. θEpilepsy.
Epilepsy, originating from plexus solaris, or from abdominal ganglia, or from a cold or fright.

[39] **Time.** Afternoon: sharp tearing in calf <; pain in thigh bone returns; tearing above knee joint.
Evening: vertigo with headache >: suffocative cough; sharp tearing in calf <.

[39] **Temperature and Weather.** Open air: vertigo with headache.

[40] **Fever.** Chilliness, with cold hands and violent headache, with constant desire to urinate; urine turbid.
Flushes of heat from abdomen to head.
Great heat, particularly in face, with increased secretion of urine.
Worm fevers in children.

[41] **Attacks, Periodicity.** Paroxysms: come suddenly.
Last five minutes: paroxysms.
Every day: fits.
Once a week: convulsions.
Every nine or ten days: paroxysms.

drium; pricking in malar bone; painful spot in region of lower ribs; excessive itching on elbow joint.

Left: small blisters on side of face, from forehead to neck; drawing, lancinating pains following course of rhomboideus muscle; tearing pain in knee joint.

From behind forward: undulating sensation through whole head.

" **Sensations.** As if head was tightly bandaged around forehead; as if a heavy load was on vertex; as if brain was distending at centre; as if a bunch of hair was pulled from vertex.

Pain: in submaxillary glands; in bladder.

Pains: characterized by great intensity.

Constant pain: in sinciput.

Painful spot: size of hand in region of r. lower ribs, with stitch extending to shoulder joint.

Indescribable pain: extending from middle of thigh to knee.

Severe lacerating pain: in head.

Sharp tearing, stinging or pricking: in calf above ankle.

Tearing: in vertex; four fingers' breadth above l. knee-joint, extending to a hand's breadth above ankle.

Drawing, lancinating pains: following course of l. rhomboideus muscle.

Severe sharp stitch: in middle of sternum.

Stitch: extending from ribs to shoulder-joint; in region of lower false ribs; between scapulæ; in small of back.

Boring pain: in knee joint.

Intense aching, stinging and bruised pain: in middle of the posterior of thigh.

Stinging: in mammæ.

Aching pain: in r. hypochondrium.

Beating, with painful stinging: in occiput.

Beating: in whole head.

Tingling pain: in pit of stomach.

Toothache: of rheumatic character.

Painful emissions: of small quantities of turbid urine.

Picking: in calf just below knee and in popliteal space.

Pricking: in r. malar bone.

Burning: in fundus of bladder; in mammæ.

Heat: of face.

Contracted feeling: in pharynx.

Pressure: in ball of eye.

Heaviness: of head.

Fulness: of abdomen.

Undulating sensation: through whole head.

Creeping: over chin.

Numbness: of inner mouth.

Excessive itching: especially on r. elbow joint.

Google

Itching: of urethra, glans and scrotum; of skin.

[44] **Tissues.** Congestive condition of head and lungs, with palpitation of heart.
Rheumatic and gouty affections of nerves and joints, accompanied by slight fever and great debility.

[45] **Touch. Passive Motion. Injuries.** Pressure: pains >.
Rubbing: pains >; stinging in mammæ, going off momentarily.

[46] **Skin.** Itching of skin with constipation (improved).
Pimples on face and body.

[47] **Stages of Life, Constitution.** Little boy; prolapsus ani.
Boy, æt. 9, suffering three years; epileptic fits.
Boy, æt. 12, has had fits ever since he could remember.
Boy, æt. 17; epileptic fits.
Woman, æt. 33, unmarried; epilepsy.
Married woman, æt. 35, tall, slender build, phthisical habit, nervo-bilious temperament; sciatica.

[48] **Relations.** Compare *Sulphur* in epilepsy, hot flushes, and worm fever.

INDIUM METALLICUM.

Trituration of the pure metal. *In.*

"This metal was discovered by Reich and Richter in the zinc-blende of Freiberg. Its spectrum is characterized by two indigo colored lines, one very bright and more refrangible than the blue lines of Strontium, the other fainter but still more refrangible, approaching the blue line of Potassium. It was the production of this peculiar spectrum that led to the discovery of the metal. The ore, consisting chiefly of blende, galena and arsenical pyrites, was roasted to expel sulphur and arsenic, then treated with hydrochloric acid, and the solution was evaporated to dryness. The impure zinc chloride thus obtained, exhibited, when examined by the spectroscope, the first of the indigo lines above mentioned. The chloride was afterwards obtained in a state of greater purity, and from this the hydrate and the metal itself were prepared. The first line then came out with much greater brilliancy and the second was likewise observed."—*Am. Hom. Pharm.*

The provings, under the direction of Bell (See Allen's Encyclopedia, vol. 5, p. 107), were mostly made with the higher dilutions, as was also the one by C. Mohr.

[1] **Mind.** Mental depression.
Mind feels tired; does not care to work.
Feels stupid and careless; cannot fix thoughts on anything.
Restless, cannot sit still, must walk about.
Sleepy and irritable with headache.

Digitized by Google

Feels almost crazed when attempting to study, with headache.

[1] **Sensorium.** Vertigo: on rising from a seat; after retiring, with nausea; when sitting and stooping slightly; between 3 and 4 A.M., < on turning and on rising, cannot sit up.

[2] **Inner Head.** Dull headache in temples and forehead, with sleepiness and nausea.

Headache beginning at night and continuing all next day; pain mostly on r. side of occiput; occasional pains over l. eye, with a tired, sick feeling.

Very distressing headache in forenoon; pains commence on r. side of occiput and extend over head to l. eye.

Pain at 8 A.M., extending over r. side of head from occiput, leaving a bruised spot on vertex.

Pain in r. occipital region, with occasional dull, aching pain in forehead.

Severe l. sided headache in evening.

Beating, throbbing pain in head, with much heat, and a stupid, cross feeling; > washing in cold water.

Beating, throbbing headache at 3 P.M., lasting till bedtime; head very hot; face red.

Slight throbbing headache, lasting two hours, with hot head and cold, clammy hands; afterwards, bruised feeling of brain in vertex, > in cold air.

Headache, in morning, on rising, > eating; an hour afterwards headache returns and lasts till noon.

[3] **Outer Head.** Severe itching of scalp on vertex lasting several days, < in morning.

[4] **Sight and Eyes.** People and things look ghastly and pale or saffron colored.

Mist before eyes, in evening.

Sharp pain in eyeball from before backward, on turning or moving eyes.

Irritation in l. eye, as if heavy with sleep, coming and going, not affected by daylight, < from artificial light, and from closing eye, with a desire to close it; in evening r. eye affected in same way.

Spasmodic twitching at outer angle of l. eye.

[5] **Hearing and Ears.** Throbbing in ears, in evening.

Bright redness of whole r. ear, with a row of very sore pimples on helix.

[6] **Smell and Nose.** Violent attacks of sneezing.

Epistaxis; nose bleeds whenever blown or touched.

Nasal discharge: green; bloody; then watery; thin, yellowish.

[7] **Upper Face.** Very painful suppurating pimples on forehead; feel as though pierced with a needle; skin very red far around each pustule.

Digitized by Google

Sore pustules all over face; burning and stinging.
Face: red during headache; red and hot; complexion sallow.
Fiery red places about an inch long over l. eye.

[9] **Lower Face.** Patches of small vesicles on mucous membrane of lower lip; vesicles contain a colorless, limpid fluid.
Corners of mouth cracked and very sore.

[13] **Throat.** Uvula greatly enlarged, back part of pharynx covered with thick yellow mucus, very tough and hard to remove.
‖Destructive ulceration of uvula, soft palate and tonsils, with thick yellow secretion in ulcers.
Left tonsil swollen; pain and difficulty in swallowing.
Throat sore on r. side.
Tickling in throat inducing continual hawking.
Dryness, throbbing, stinging soreness; swallowing painful.
Throat: < in evening; > eating and drinking cold water.

[15] **Eating and Drinking.** After eating lobster: taste of iodide of potash.

[16] **Hiccough, Belching, Nausea and Vomiting.** Qualmishness.
‖Nausea: with headache; during breakfast; with faintness at 11 A.M. and on rising; after retiring, with dizziness and pain in liver.
Sick feeling at stomach for two days; felt as if vomiting would relieve.

[17] **Scrobiculum and Stomach.** Fulness and pressure at stomach with soreness.

[18] **Hypochondria.** Stitches in region of liver.

[19] **Abdomen.** Colic: griping; from umbilicus downward; as if diarrhœa would set in.

[20] **Stool and Rectum.** Stool: pasty, brownish-yellow, fetid, with particles of undigested food, preceded by colic; involuntary, slight, when urinating; small and hard, afterwards pappy; hard, with blood.
Diarrhœa: < by drinking beer; with headache on r. side.
Burning tenesmus and pain in anus, after stool.
Violent pain in head when straining at stool.

[21] **Urinary Organs.** Painful urination.
When urinating: loss of power over sphincter ani.
‖‖Horribly offensive smell of urine after standing a short time.

[22] **Male Sexual Organs.** Sexual desire and power diminished, emission too soon, thrill deficient.
‖Increase of sexual desire.
Emissions: twice the same night; four nights in succession; at night without knowledge.

Digitized by Google

Itching of glans penis.
Severe pain in r. testicle.
‖Testicles tumefied and very tender to touch; drawing pains along spermatic cords upwards; l. testicle much <.

[23] **Female Sexual Organs.** Menses two weeks too soon; bearing down pains, with cross temper and weeping mood; face very red.

[25] **Voice and Larynx. Trachea and Bronchia.** Hoarseness: on rising; with sore throat.
Habitual bronchial expectoration freer, but a little blood appeared in mucus.

[26] **Respiration.** ‖Frequent desire to take a deep breath, when lying down; < lying on l. side, > lying on back.

[28] **Inner Chest and Lungs.** Severe pain behind lower r. portion of sternum.
Sharp pains through upper part of chest.
Burning pain on l. side of chest near sternum, which feels as if drawn towards back.
‖Dull pain in l. pectoral region.

[30] **Outer Chest.** Dull pain in l. axilla.

[31] **Neck and Back.** ‖Stiffness of neck and shoulders.
Drawing through side of head and neck to clavicle, first r. side, next day left.
Pressing pain in upper scapular region, with stiffness on sitting still, pain < on beginning to move.
Severe pain under scapula of l. side.
Dull pain under r. shoulder blade.
Rheumatic drawing across shoulders up to head; < in riding, turning in bed, flexure or rotation of head, and morning and evening.
Dull, aching pain in back and lumbar regions.

[32] **Upper Limbs.** Constant pain in l. shoulder, as if bruised.
Intermitting pains in l. shoulder.
Pain in l. shoulder, with soreness extending down arm.
Severe pain in l. shoulder; pain runs down to elbow, at times so severe as to disable arm.
Shooting pains in fingers.
Muscles of l. arm and shoulder feel flabby and soft; no power in arm.
Severe lancinating pains in biceps of l. arm, extending into shoulder; pains < extending arm; paralytic weakness.
Left elbow feels sore.
Slight pains in l. arm.
Palms of hands sweat continually.
Itching in palms.

[33] **Lower Limbs.** ‖Tired feeling, weariness in legs.
Drawing, strained feeling of muscles of inside of r. thigh, while walking.

Digitized by Google

Sharp, shooting pains in r. leg.
A narrow streak of severe pressing pain in back of l. thigh, sudden, when sitting.
Severe pain and lameness in lower r. leg.
Legs from knees downward and feet feel heavy as if loaded.
Peculiar hot tingling in legs.
Dull, boring pain in l. great toe joint, almost unbearable, must move foot to > it, for three evenings, from 8 to 9.
Burning and intense itching of all the toes the whole day.
Itching of toes in evening.
Feet sweat easily and feel cold.
Profuse foot sweat.

[35] **Rest. Position. Motion.** Walking: causes weak feeling, particularly in legs.
Restless, cannot sit still, must walk about.
Lying on back: desire to take long breath >; nightmare.
Lying on l. side: desire to take a long breath <.
Sitting: vertigo; stiffness in scapular region; a narrow streak of severe pain in back of l. thigh.
Rising from a seat: vertigo.
Stooping slightly: vertigo.
Cannot sit up: on account of vertigo.
On rising: vertigo; headache; hoarseness.
Beginning to move: pressing pain in upper scapular region <.
Moving: high fever with chilliness.
Must move foot to > pain in great toe joint.
Turning: vertigo; rheumatic drawing across shoulders <.
Moving eyes: < pain.
Closing eye: irritation <.
Rotation of head: rheumatic drawing across shoulders <.
Walking: strained feeling in muscles of r. thigh.

[36] **Nerves.** Felt as though he was his natural size, during fever.
Tired feeling, weariness and restlessness in legs; tremor of thighs.

[37] **Sleep.** Sleepiness: with headache and nausea; with irritability; in morning; from 4 to 6 P.M.; in evening, in a warm room.
Dreams: lascivious; amorous; of having unsuccessful intercourse with men; vivid, of what had occupied his mind during day; of annoying accidents; of being in foreign countries; chased by mad bulls; lost in mountains.
Nightmare: from lying on back; very stupid on awaking.

[38] **Time.** 3.30 A.M.: wakes with great restlessness, especially in legs.
3 to 4 A.M.: awake with vertigo.
Morning: headache on rising; itching of scalp <; rheumatic drawing across shoulders; sleepiness.

Digitized by Google

8 A.M.: pain in r. side of head.
11 A.M.: faintness.
Forenoon: very distressing headache.
The whole day: burning and itching of toes.
3 P.M.: pain in head lasting till bedtime.
From 4 to 6 P.M.: sleepiness.
Evening: l. sided headache; mist before eyes; irritation in r. eye; throbbing in ears; throat <; rheumatic drawing across shoulders; itching of toes; sleepiness.
Night: headache begins lasts all next day; emission without knowledge.

[39] **Temperature and Weather.** In a warm room: sleepiness.
Out doors: fever >.
Cold air: headache >.
Working in cold water: pain in head >.
Cold water: throat >.

[40] **Fever.** Sensitive to cold.
High fever with chilliness on moving, great weakness, sore throat; thirst, stretching, violent headache and backache.
Fever: with nausea, after eating; > out doors.
Easy perspirations.

[41] **Attacks, Periodicity.** One hour after eating: headache returns and lasts till noon.
For two hours: throbbing headache.
For two days: sick feeling in stomach.
For several days: itching of scalp.
Twice the same night: emissions.
For three evenings from 8 to 9: severe pain in toe joint.
Four nights in succession: emissions.
Two weeks too soon: menses.

[42] **Locality and Direction.** Right: pain mostly on side of occiput; from occiput to side of head; in occipital region; eye as if heavy with sleep; bright redness of whole ear; side of throat sore; headache; severe pain in testicle; severe pain behind lower portion of sternum; dull pain under shoulder blade; strained feeling of muscles of side of thigh; sharp shooting pains in leg; severe pain and lameness in leg.
Left: occasional pains over eye; headache in side; irritation in eye, as if heavy with sleep; spasmodic twitching of outer angle of eye; fiery red place about an inch long over eye; tonsil swollen: testicle tender to touch; lying on side desires to take long breath <; burning pain along side of chest; dull pain in pectoral region; dull pain in axilla; severe pain under scapula; constant pain in shoulder; intermitting pains in shoulder; severe pain from shoulder to elbow; severe lanci-

nating pain in biceps of arm; elbow sore; slight pains in arm; a narrow streak of severe pressing pain in back of thigh; dull, boring pain in great toe joint.
Right then left: drawing through side of head and neck to clavicle.
From before backwards: sharp pain in eyeball.

" **Sensations.** Frequent pressing pain here and there, all over.
Soreness of whole l. side of body.
Soreness all over body; severe pain in l. side, making it difficult to move; > after continued motion.
Body feels sore all over; sickish feeling and sensation as though bones would crush through flesh.
Irritation in l. eye as if heavy with sleep; pimples on forehead feel as though pierced with a needle; felt as if vomiting would relieve; as if diarrhœa would set in; sternum feels as if drawn towards back; l. shoulder as if bruised; legs feel as if loaded.
Pain: in liver; in anus; in l. shoulder.
Violent pain: in head.
Severe pain: in r. testicle; behind lower r. portion of sternum; under l. scapula; in l. shoulder down to elbow; in lower r. leg.
Severe lancinating pains: in biceps of l. arm, extending into shoulder.
Sharp pains: through upper part of chest; in eyeballs.
Shooting pains: in fingers; in r. leg.
Stitches: in region of liver.
Beating, throbbing pain: in head.
Griping: from umbilicus downwards.
Pressing pain: in back of l. thigh.
Burning pain: on l. side of chest near sternum.
Burning, stinging: in pustules all over face.
Burning tenesmus.
Drawing pain: along spermatic cords upwards; through side of head and neck to clavicle.
Drawing strained feeling: of muscles of side of r. thigh.
Dull, almost unbearable boring pain: in l. great toe joint.
Bearing down pains: during menses.
Pressing pain: in upper scapular region.
Rheumatic drawing: across shoulders.
Dull aching: in forehead; in back and lumbar region.
Dull pain: in l. pectoral region; in l. axilla; under r. shoulder blade.
Dull headache: in temples and forehead.
Bruised feeling: in vertex after pain in head.
Constant pain: in l. shoulder.
Intermitting pains: in l. shoulder.
Slight throbbing: headache.

Digitized by Google

Slight pains: in l. arm.
Dryness, throbbing, stinging soreness: in throat.
Sore pimples: on helix of ear.
Soreness: of corners of mouth; of throat; of stomach; down arm; of l. elbow.
Burning and intense itching: of toes.
Hot tingling: in legs.
Throbbing: in ears.
Tickling: in throat.
Spasmodic twitching: in outer angle of l. eye.
Fulness: at stomach.
Pressure: at stomach.
Tired feeling: in legs.
Sick feeling: at stomach.
Faintness: on rising.
Stiffness: of neck and shoulders; in scapular region.
Lameness: in lower r. leg.
Itching: of scalp; of glans penis; in palms; of toes.

" **Touch. Passive Motion. Injuries.** Touch: makes nose bleed; testicle tender.
Riding: rheumatic drawing across shoulders <.

" **Skin.** Itching of scalp, toes, etc.
Very painful sore pimples on various parts of body.

" **Relations.** Compare: *Bellad.* (headache, menses); *Asparagus* (offensive urine); *Sanguin.* (headache, rheumatism); *Ferrum* (headache, ebullitions, lameness of shoulder muscles).

INULA.

Elecampane; Scabwort. *Corymbiferæ.*

An ancient medicine known to Hippocrates, Dioscorides, Eben Sina, etc.

The plant is a native of Europe, Central Asia and Siberia, but grows wild along roadsides in the Northern part of the United States.

The tincture is prepared from the fresh root dug in Autumn of its second year.

Proving with the juice of the root on a female prover, by Fischer. See Allen's Encyclopedia, vol. 5, p. 112.

CLINICAL AUTHORITIES.—*Bronchitis*, Chargé, Hahn. Mo., vol. 10, p. 228; *Laryngitis*, Lingen, MSS.

[1] **Mind.** Excessive anxiety and trembling of whole body, chattering of teeth from cold, during menstruation.

[2] **Sensorium.** Vertigo, on stooping.
Confusion of head with nausea, in evening.
Headache, in r. side, afterward in left.
Sticking headache in r. side.
Jerking, tearing pain in occiput.

[3] **Inner Head.** Rush of blood to head with sleeplessness.
Tearing, throbbing pain in forehead and vertex, after eating.
Burning headache in l. temple, in a spot as large as a silver dollar, in evening.

[5] **Sight and Eyes.** Twitching in upper lids.
Burning in l. eyeball.
Swimming before eyes and pressure in temples and forehead.

[6] **Hearing and Ears.** Dull stitches in l. ear, with transient sticking above r. eyebrow, in evening.

[7] **Smell and Nose.** Stitches in r. side of middle of nose.
Sticking, crawling in root of nose, extending to eyebrows.

[8] **Upper Face.** Left side of face red and hot, a white spot near nose.
Flushes of heat; l. cheek glowing.

[10] **Teeth and Gums.** Pain in decayed teeth, < at night.

[12] **Inner Mouth.** Dryness of mouth with scraping and tickling in throat, swallowing difficult.

[13] **Throat.** Pain in throat on swallowing; tickling causing cough.

[16] **Hiccough, Belching, Nausea and Vomiting.** Nausea in morning coming from stomach.

[17] **Scrobiculum and Stomach.** Twisting as of a ball in epigastric region, above umbilicus.

Digitized by Google

Sticking pain in epigastric region.

[18] **Hypochondria.** Violent motion beneath r. hypochondrium, as though something living were moving about, during menstruation.

[19] **Abdomen.** Sticking: as with two pins to r. of umbilicus; as from a knife between umbilicus and r. groin.

Stitches in l. side of abdomen, towards l. groin.

[20] **Stool and Rectum.** Pressing dragging towards rectum and genitals, as in labor; as if a substance would come out, occurring repeatedly.

[21] **Urinary Organs.** Urging to urinate ten times in one hour; urine passes by drops.

Urine smells of violets.

[23] **Female Sexual Organs.** Movings about in abdomen, as at appearance of menstruation, followed by yellowish leucorrhœa.

Pain in uterus, with pain in small of back, very violent, with pressure as in labor; urging to stool, which she dreads; is obliged to remain lying.

Dragging in genitals, with more violent backache than she had ever had before.

Stitches in region of uterus and genitals.

Menses too early and painful.

[25] **Voice and Larynx. Trachea and Bronchia.** ‖Violent tickling in larynx, producing dry cough, < lying down, < at night; larynx painful.

‖Cough with abundant thick expectoration; accompanied by weakness of digestive tract, general languor and debility and much leucorrhœa; skin has been the seat of psoric manifestations; engorged glands. θChronic bronchitis.

[26] **Respiration.** Difficult breathing with dry, tickling cough.

[27] **Cough.** Dry, tickling cough.

[28] **Inner Chest and Lungs.** Stitches behind sternum and beneath l. seventh and eighth ribs.

Throbbing, jerking pain as from suppuration, in middle of chest.

[31] **Neck and Back.** ‖Pain through back and chest, on inspiration.

Transient pain in r. scapula.

Violent backache during menstruation.

[33] **Upper Limbs.** Stitches and tearing pain in r. shoulder and wrist.

Tearing, cramp-like pain in tip of l. shoulder; in scaleni muscles on l. side of neck, as if pulled by pincers.

Tearing, jerking in r. arm.

Upper arms as far as elbow fall asleep.

Tearing in palm of l. hand, unable to double fingers.

Digitized by Google

Fine stitches in index finger.
Tearing in r. little finger, it seems dead.

[33] **Lower Limbs.** Tensive drawing in hips extending to nates.
Sticking in r. hip extending to groin; in middle toes of r. foot; in r. heel.
Stitches: in thighs; in left ankle, when walking; as if sprained; in r. heel.
Spasmodic sticking beneath bend of r. knee, hot face and chilliness.
Cramp in calves at night during sleep.

[35] **Rest. Position. Motion.** Lying down: tickling in larynx.
Obliged to remain lying: on account of pain in uterus.
Stooping: vertigo.

[37] **Sleep.** Sleep restless, starting and crying out.
Dreams: lascivious; disgusting.

[38] **Time.** Morning: nausea.
Evening: confusion in head with nausea; burning in l. temple; sticking above r. eyebrow.
Night: toothache <; tickling in larynx <; cramp in calves.

[40] **Fever.** Coldness, shaking in bed, cold, blue hands and nails.

[41] **Attacks. Periodicity.** Ten times in one hour: urging to urinate.

[42] **Locality and Direction.** Right: sticking headache; transient sticking above eyebrow; stitches in side of middle of nose; sticking side of umbilicus; cutting between umbilicus and groin; transient pain in scapula; stitches and tearing pain in shoulder; tearing, jerking in arm; tearing in little finger; sticking in hip, in toes, in heel; spasmodic sticking beneath bend of knee.
Left: burning in temple and eyeball; dull stitches in ear; side of face red and hot; cheek glowing; stitches between seventh and eighth rib; tearing, cramp-like pain in tip of shoulder, in muscles of side of neck; tearing in palm of hand.
Right then left: headache.

[43] **Sensations.** As though some one was poking him with finger, in various parts of body, especially in diaphragm, so painful he awoke and clenched his teeth; as of a ball twisting in epigastric region; as though something living was moving about beneath hypochondrium; sticking as with two pins to r. of umbilicus; as from a knife between umbilicus and r. groin; as if a substance would come out of rectum and genitals; pain as from suppuration in middle of chest; neck as if pulled with pincers; itching as from fleas.
Pain: in decayed teeth; in throat; in uterus; in small of back; through back and chest.
Violent pain: in back.

Digitized by Google

Tearing pain: in r. shoulder and wrist; in palm of l. hand; in r. little finger.
Tearing, throbbing pain: in forehead and vertex.
Tearing, cramp-like pain: in tip of l. shoulder; in scaleni muscles on l. side of neck.
Throbbing, jerking pain: in middle of chest.
Sticking pain: on r. side of head; in epigastric region; to r. of umbilicus; in r. hip to groin; in middle toes of r. foot.
Jerking, tearing pain: in occiput; in r. arm.
Sticking, crawling: in nose, extending to eyebrows; in r. heel.
Spasmodic sticking: beneath bend of r. knee.
Stitches: in r. side of middle of nose; in l. side of abdomen; in region of uterus and genitals; behind sternum and beneath l. seventh and eighth ribs, in r. shoulder and wrist, in thighs; in l. ankle; in r. heel.
Fine stitches: in index finger.
Burning pain: in l. temple; in l. eyeball.
Transient stitching: above r. eyebrow.
Transient pain: in r. scapula.
Dull stitches: in l. ear.
Burning: on skin.
Headache: in r. side, then in left.
Cramp: in calves.
Twisting: as of a ball in epigastric region.
Pressing and dragging: towards rectum and genitals.
Tensive drawing: in hips.
Pressure: in temples and forehead.
Violent tickling: in larynx.
Scraping and tickling: in throat.
Dryness: of mouth.
Confusion: of head.
Twitching: in upper lids.
Trembling: of whole body.
Itching: on legs.

" **Skin.** Itching: as from fleas; violent on legs during menses, with burning after scratching, in bed.

" **Relations.** Compare: *Crocus* and *Thuja* (movements as of something alive in abdomen); *Tereb.* (urinary symptons); *Ignat.* (cough < lying down and in evening); *Sulphur* (psora).

IODOFORMUM.

Iodoform. CHI_3

Provings by Underwood and Haines. See Allen's Encyclopedia, vol. 5, p. 116.

CLINICAL AUTHORITIES.—*Sphacelous chancre*, Windelband, B. J. H., vol. 36, p. 367.

[1] **Mind.** Feels happy and elated.
[2] **Sensorium.** Confusion of head, with slight nausea.
Head feels as if he had been intoxicated the day previous.
[3] **Inner Head.** Dull pain in forehead, with shooting in r. ear; < coming down stairs.
Sharp, neuralgic pains in forehead, < stooping.
Dull, pressing pain in both temples, following the pain in r. maxillary bone; temples felt as if something heavy was pressing on them.
Sharp, neuralgic pain in temples, < r. side, extending to back of head, behind ears.
Stitches in temples.
Stitch pain in r. side of head.
Heavy feeling in head, and a dull aching in top of head.
Stitching pains in head.
Head felt heavy, as if he could not lift it from pillow.
Headache on awakening.
[4] **Outer Head.** Violent itching of occiput.
[5] **Sight and Eyes.** Eyes sensitive to light.
Objects appear tesselated, red.
Pain in eyes; eyes bloodshot.
Smarting, burning, stinging in eyes.
Right eye felt sore and as if bruised.
[6] **Hearing and Ears.** Hearing dull; must be spoken to quite loudly.
Ears feel full, dry and feverish.
Shooting in r. ear.
Stitches in r. ear.
Neuralgic pain in l. ear.
[7] **Smell and Nose.** Sensation as of smelling fumes of Iodine.
Peculiar smell, like the odor arising from decaying leaves in a swamp.
Membrane of nose feels full and dry; constant snuffing, yet no discharge.
[8] **Upper Face.** Dull pain in malar bones.

Digitized by Google

Drawing and pressing in malar bone.

9 **Lower Face.** Feeling of stiffness in zygomatic muscles.

Slight pain in zygomatic muscles, < from motion and bending forward.

Dryness and stinging of lips.

Dull aching, increasing to a heavy pain, like something pressing heavily in r. lower maxillary bone.

10 **Teeth and Gums.** Teeth feel sore and as if too long.

Toothache; pain leaving teeth and going quickly to temples.

Sharp pains in upper teeth.

| |Toothache in decayed teeth.

11 **Taste and Tongue.** Metallic taste in mouth.

12 **Throat.** Dryness of throat and lips.

Dryness of throat, with rawness on swallowing; with bitter taste.

Stitch pain in r. side of throat.

13 **Hiccough, Belching, Nausea and Vomiting.** | |Nausea.

14 **Abdomen.** Rumbling in bowels.

Flatulent colic.

| |Cutting pain in bowels.

Feeling of warmth in bowels and rectum, with slight nausea and desire for stool.

Sharp cutting in r. inguinal region, with desire for stool.

Sore pain in r. inguinal region.

15 **Stool and Rectum.** Desire for stool with cutting in r. inguinal region.

Desire as for a liquid stool.

Bowels not moved as usual; anus felt as if drawn up into rectum.

16 **Urinary Organs.** Urine very yellow and smelling like saffron tea.

17 **Respiration.** Felt as if something heavy was resting on chest, preventing free expansion; after half an hour less intense, and appeared to diffuse itself to extremities.

Felt as though smothering; room felt too close, although freely ventilated.

18 **Cough.** Cough from dryness of throat.

Cough and wheezing from mucus in throat, going to bed.

19 **Inner Chest and Lungs.** Chest feels sore when taking a long breath.

Dull sore pain in apex of r. lung; on breathing lung felt as though two ulcerated surfaces were in contact.

Both lungs felt as if a heavy cold had settled there.

Severe pain concentrated in l. breast, a little to right of nipple; at first felt as if a deep ulcer had formed there, then became like a hand grasping base of heart; aching in l. breast at times, < night.

Digitized by Google

Sharp pain in r. chest.
Stitch in r. chest, through to angle of shoulder blade.

[29] **Heart, Pulse and Circulation.** Occasional stitches through heart.

[31] **Neck and Back.** Back of neck sore as if bruised.
Sharp pain in angle of shoulder blade.
Pain in back along spine.
Spine feels sore, does not wish it touched.
Pain along r. side of dorsal vertebræ.
Continued pains in lumbar region, with weakness when straining.

[32] **Upper Limbs.** Stitching pain in l. arm and shoulder.
Severe aching in l. humerus; muscles around bone feel as if severely bruised; < from touch.
Pain in course of median nerve of l. arm.
Sharp pains in nerves of l. arm and back.
Rheumatic pain in r. arm, < when using it.
Pain in l. elbow.
Sharp pain in nerves of l. hand.

[33] **Lower Limbs.** Rheumatism in flexor muscles of legs.
Pain along course of l. crural nerve.
Weakness of knees when going up stairs.
Weakness and pain in knees, < standing.
Pain in inside of knees.
Neuralgic pain in l. knee.
Rheumatic pain in both gastrocnemii.
Cutting pain in l. ankle, when walking in open air.
Pain in l. foot, < walking.
Stitch pain in r. instep.

[34] **Limbs in General.** Left arm and leg pain as if bruised; as pain increases muscles feel as if ulcerated.
Severe pain in l. arm and leg, < at lower half of tibia and fibula, extending into foot.

[35] **Rest. Position. Motion.** Pain renewed in bed: r. side of head, r. shoulder, r. arm, hand and fingers, thigh, leg, foot and toes.
Stooping: neuralgic pain in forehead <.
Bending forwards: pain in zygomatic muscles.
Standing: weakness and pain in knees <.
Motion: pain in zygomatic muscles <; perspires easily.
When using r. arm: rheumatic pain <.
Coming down stairs: dull pain in forehead and shooting in ear <.
Going up stairs: weakness of knees.
Going to bed: cough and wheezing from mucus.
Walking: cutting pain in l. ankle; pain in l. foot.

[36] **Nerves.** Jerks and shocks in nerves when trying to sleep.
Susceptible to the heat of the weather.

Digitized by Google

Feeling of faintness.
Pain seems to sharply define course of nerves.
Neuralgic pains in various parts of body.
Neuralgic pains flying all over him at times.

[37] **Sleep.** Very drowsy.
Slept soundly until 1.30 A.M., then awakened suddenly; restless and unable to sleep any more till 4.30; then slept about an hour and a half, being partially conscious, and then followed a deep, heavy sleep; on awaking it seemed as though he could not get aroused.
Wakefulness.
Restless sleep, tossing, turning, full of dreams.
Dreams: confused; of accident.

[38] **Time.** Night: aching in l. breast <.
1.30 A.M.: awakened suddenly, restless and unable to sleep until 4.30.

[39] **Temperature and Weather.** Lays covers off the bed.
Open air: when walking, cutting pains in l. ankle.
Heat of weather: susceptible to.

[40] **Fever.** Shuddering after urination.
Heat, lays covers off the bed.
Perspiration on head.
Perspires easily from motion.

[41] **Attacks, Periodicity.** At times: neuralgic pains flying all over him.

[42] **Locality and Direction.** Right: pain in maxillary bone; pain in temple <; stitch pain in side of head; shooting in ear; stitches in ear; heavy pain in maxilla; stitch pain in r. side of throat; sharp cutting in inguinal region; sore pain in inguinal region; cutting in r. inguinal region; dull, sore pain in apex of lung; sharp pain in chest; stitch in chest; pain alongside of dorsal vertebræ; rheumatic pain in arm; stitch pain in instep.
Left: neuralgic pain in ear; severe pain in breast; aching in breast; stitching pain in arm and shoulder; severe aching in humerus; pain in course of median nerve of arm; sharp pain in nerves of arm; pain in elbow; sharp pain in nerves of hand; pain along course of crural nerve; neuralgic pain in knee; cutting pain in ankle; pain in foot; arm and leg pain as if bruised; severe pain in arm and leg.

[43] **Sensations.** Feels strangely.
Thinks he has taken a bad cold.
Fine, sharp pains all over.
Head feels as if he had been intoxicated the day previous; temples feel as if something heavy was pressing on them; head as if he could not lift it from pillow; r. eye felt sore as if bruised; sensation as of smelling fumes of

Iodine; as if something was pressing heavily on r. lower maxillary bone; teeth as if too long; anus felt as if drawn up into rectum; as if something heavy was resting on chest; felt as though smothering; on breathing lung felt as though two ulcerated surfaces were in contact; both lungs felt as if a heavy cold had been taken; breast felt as if a deep ulcer had formed there; as if a hand was grasping base of heart; base of neck sore as if bruised; muscles around bone feel as if severely bruised; l. arm and leg as if bruised; muscles of l. arm and leg feel as if ulcerated.

Pain: in r. maxillary bone; in eyes; in teeth extending to temples; in decayed teeth; in back along spine; along r. side of dorsal vertebræ; in lumbar region; in l. elbow; in course of median nerve of l. arm; along course of l. crural nerve; in knees; in inside of knees; in l. foot; in l. arm and leg.

Severe pain: concentrated in l. breast; in l. arm and leg.

Sharp cutting: in r. inguinal region.

Cutting pain: in bowels; in r. inguinal region; in pharynx; in l. ankle.

Sharp pain: in upper teeth; in r. chest; in angle of shoulder blade; in nerves of l. arm and back; in nerves of l. hand.

Shooting: in ear.

Sharp, neuralgic pains: in forehead; in temples, extending to back of head behind ears.

Stitches: in temples; in r. ear; in r. chest through to angle of shoulder blade; through heart.

Stitching pains: in head; in l. arm and shoulder.

Stitch-like pain: in r. side of head; in r. side of throat; in r. instep.

Severe aching in l. humerus.

Neuralgic pain: in l. ear; in l. knee.

Rheumatic pain: in r. arm; in flexor muscles of legs; in both gastrocnemii.

Aching in l. breast.

Drawing and pressing: in malar bones.

Dull, pressing pain: in both temples.

Smarting, burning, stinging: in eyes.

Dull pain: in forehead; in malar bones.

Sore pain: in r. inguinal region.

Heavy pain: in r. lower maxillary bone.

Slight pain: in zygomatic muscles.

Dull, sore pain: in apex of r. lung.

Dull aching: in top of head; in r. lower maxillary bone.

Sore feeling: in teeth; in chest; in base of neck; in spine.

Dryness and stinging: of lips.

Digitized by Google

Feeling of stiffness: in zygomatic muscles.
Weakness: in knees.
Rawness: of throat.
Dryness: of throat and lips.
Feeling of warmth: in bowels and rectum.
Heavy feeling: in head.
Violent itching: of occiput.

[44] **Tissues.** [1]Relieves pain of cancerous tumors, (locally).
[1]Sphacelous chancre (locally).

[45] **Touch. Passive Motion. Injuries.** Touch: muscles around bone feel as if severely bruised.
Pains renewed: when riding in cars.

[46] **Relations.** Antidoted by: *Hepar.*
Compare: *Iodum,* and the iodides; *Mercur.*

IODUM.

Iodine. *The element.*

Obtained principally from the ashes of seaweeds.

Provings by Hahnemann, Jorg, Hering, Macfarlan, Robinson, etc. See Allen's Encyclopedia, vol. 5, p. 119.

[1] **Mind.** ▮Feeling as of having forgotten something and does not know what.

Fixed, immovable thoughts.

▮Must keep in motion day and night, brain felt as if it was stirred up, felt as if going crazy.

Restless, inclined to move about, not permitting to sit or sleep; thought she could tear everything to pieces.

▮Melancholy mood, low spirited.

▮Despondency, with disposition to weep.

Apprehends an accident from every trifle.

▮Fear of evil, with overcarefulness.

Fear and anxiety, shuns even the doctor.

▮Mind very sensitive during digestion, felt like crying.

▮Irritability and sensitiveness.

Cross, with excessive nervous excitability.

▮Excessive kind of impatience, she is running about all the time and never sits down or sleeps at night.

▮Consequences of amorousness.

▮At night, especially when thinking of real or imaginary wrongs, heart palpitates "like lightning," pulsations being felt also at pit of stomach and in petrous portion of temporal bone, being especially violent in latter locality; the violent palpitation and accompanying arterial excitement drives him out of bed; by use of cold baths and friction obtains temporary relief; at times most terrible thoughts take possession of him, and

Digitized by Google

he hardly dares go home for fear of doing some dreadful deed; on one occasion was seized with an almost irresistible impulse to murder a woman who was acting as a guide for him, he having lost his way; these attacks of mania come on at most unexpected times; troubles all < by quiet and meditation; must be constantly in action, in some laborious occupation. θMania.

[2] **Sensorium.** ‖Confusion of head, with great aversion to earnest work.

❙Vertigo: only on l. side, < from stooping; weakness in morning; with throbbing headache; very weak and tremulous; rising aggravates it, and produces faintness; with throbbing all over body; tremor at heart and fainting, < after just rising from a seat or bed, or on sitting or lying down after slight exercise; very sickly look of patient.

❙Goitre; hypertrophy of l. ventricle, with great congestions to head and face; hysteria and nervousness. θVertigo.

[3] **Inner Head.** ‖Sharp pressive pain in upper part of l. side of forehead.

❙Headache: l. side and top; as if a tape or band was tightly drawn around head; so violent it almost makes him crazy; with paralytic feeling of arms.

❙Pressure on a small spot above root of nose.

❙Pressive pains in vertex.

❙Congestions to and pulsations in head.

‖Throbbing in head at every motion; < in warm air.

❙Brain feels as if stirred around with a spoon; must keep in motion day and night.

Violent aching at base of occiput, in afternoon.

❙Persistent, annoying, but not very violent headache; head feels heavy, as though a foreign substance was inside of brain, < by fatigue; oppressive, dull feeling, inclining head to seek a support.

❙Chronic headache; dizziness on active exertion; carelessly loquacious; languid, uneasy, and of fitful humor.

❙Chronic congestive headache, in old people with dark hair and eyes.

Headache <: in warm air; when riding a long time in a carriage; from walking fast.

❙During course of acute articular rheumatism inflammation in hands subsided and brain symptoms developed; became delirious and very restless, sat up in bed and then threw himself upon it.

‖Cholera encephalitica.

❙Acute hydrocephalus of scrofulous children.

Atrophy of brain; apoplexy.

[4] **Outer Head.** Falling off of hair.

Digitized by Google

Scald head.

[5] **Sight and Eyes.** Small sparks before eyes while sewing.
‖Optical illusions in bright colors; flimmering; double vision; obscuration of sight, like a veil before eyes.
‖Dilatation of pupils with constant motion of balls.
‖White of eye dirty yellow.
‖Constant tearing pain around r. eye, passing backwards from inner canthus to articulation of jaw.
‖Smarting in eyes; pain as from excoriation.
‖Inflamed eyes.
‖Scrofulous conjunctivitis, with induration of glands.
‖Protrusion of balls; or feeling of protrusion.
Sarcoma conjunctivæ.
‖Staring with wide, open eyes; lids seem to be retracted.
‖Twitching of eyes; lower lids.
Œdematous swelling of lids; dark rings.
‖Trembling of lids.

[6] **Hearing and Ears.** ‖Sensitiveness to noise.
‖Hearing first sensitive, then dull.
‖Buzzing in ears.
‖Deafness, due to morbid condition of Eustachian mucous membrane; catarrhal deafness; scrofulous subjects.
‖Adhesions in middle ear.
‖Painful glandular enlargement in front of tragus, with indolent ulcers of membrana tympani and a pinched, dried up look of face.

[7] **Smell and Nose.** ‖Loss of sense of smell.
Crowing in nares, like the vibrations of a string.
‖Loss of smell; nose dry and stuffed up, cannot breathe through it; or painful and swollen, with chronic fetid discharge.
‖Sensation as if alæ were spread wide open and nose dry; loss of smell; sneezing in evening.
‖Dry coryza, becoming fluent in the open air.
‖Nose running a clear, continuous stream.
‖Fluent coryza, hot water drops out; general heat.
‖Irritation of mucous membrane and secretion of a great deal of glassy mucus; same state of Eustachian tube, with dulness of hearing and noises in ears; stoppage of nose by mucus, especially in evening; loss of smell; itching, stinging in front part of septum narium; watery, fluent coryza in night, and with much sneezing; dulness of head, with great disinclination to serious labor; thinking is difficult; dull pressure in frontal sinuses.
‖Severe coryza, attended by fever, severe headache and excessive secretion with much sneezing.
‖Fever, fluent coryza and continual tickling in middle of chest.

Digitized by Google

‖Nose runs a clear stream, hot fever, no appetite, hot, dry skin all day long, creepy sensation, face fiery red, pain in occiput and temples, teeth sticky with yellow phlegm.
‖‖Nasal catarrh thin, excoriating.
‖Ulceration of Schneiderian membrane; great fetor.
‖Small scab in r. nostril.
‖Small yellow scurf at each nostril and concha.
‖Chronic fetid discharge from nose; nose painful and swollen.
‖Large discharge of yellow mucus from nose.
‖Hard and red condition of mucous surfaces; scrofulous subjects; enlargement of cervical and subcutaneous glands. θNasal catarrh.
‖Nose bleeding.

[8] **Upper Face.** Face: pale or alternately red; sallow, distressed; yellowish, or greenish; pale yellow or soon changing to brown.
Brown color of face, and copious and papescent stools; seems to be > after eating.
‖Coldness of face in very fleshy children.
‖Convulsive twitchings of facial muscles.
‖‖Facial paralysis following reduction of goitre.
‖Red, burning spot on nose; under eyes; itching protuberance on nose.

[9] **Lower Face.** ‖Bluish lips, swelling of superficial veins.
‖Lips peel off.
‖‖Suppurating ulcer on l. cheek.
‖Swelling of submaxillary glands.
Pain from inner canthus to articulation of jaw.

[10] **Teeth and Gums.** ‖Teeth yellow, covered with much mucus in morning, and more easily blunted than usual by vegetable acids.
‖Toothache, gums swollen and bleeding.
‖Little blisters form on gums.
‖Gums puffed, red, inflamed, painful to touch, bleed easily.
‖Softening and bleeding of gums.
‖‖Absorption of gums and alveolar processes.

[11] **Taste and Tongue.** Taste: salty; sourish; sweetish; on tip of tongue.
Soapy taste.
Tongue: dry; brown and dry; thickly coated; brown in centre, white at edges.
‖‖Tongue hypertrophied, painful, nodular or fissured.

[12] **Inner Mouth.** ‖Mouth filled with mucus on awaking in morning, with putrid taste, not > by washing mouth.
‖‖Increase of saliva; mercurial salivation.
‖Offensive odor from mouth.

Digitized by Google

Aphthous ulcers in mouth with putrid smell; profuse fetid ptyalism.

Gums red and swollen, receding from teeth, bleeding slightly; small ash colored, painful ulcers; abuse of mercury.

Croupous inflammation of pharynx, affecting also tonsils and softened gums; thick, grayish white deposit; difficult deglutition; ptyalism; very offensive odor from mouth.

Thick, brown, croup-like exudation in mouth and fauces.

Glands on inside of cheeks intensely painful as though he had sharp vinegar in the mouth.

Discharge of mucus from posterior nares.

[13] **Throat.** Swelling and elongation of uvula.

Deglutition: so difficult that a considerable pause is required between each act; impeded from ulceration of œsophagus.

Ulcers in throat, with swelling of glands of neck.

Mercurial cachexia; salivation and ulcers in the throat.

Follicular catarrh with ulceration.

Inflammation of throat, with burning pain.

Early stage of diphtheria; much glandular irritation; disease threatens to attack larynx; formation of speck; or patches of exudation, with sore throat; enlargement of tonsils and of glands of neck; disinclination for food; difficulty of breathing; cough and alteration of voice.

Velum palatinum and tonsils covered with thick, grayish white exudate; much pain in throat, painful swallowing; salivation; strong fetor oris. θDiphtheritis.

Pain in œsophagus increased by pressure.

Inflammation and ulceration of œsophagus.

[14] **Appetite, Thirst. Desires, Aversions.** Remarkable and continued increase of appetite.

Suffers from hunger, must eat every few hours; gets anxious and worried if he does not eat; feels > after eating.

Eats too often and too much; loses flesh all the while.

Great longing for food, about 11 A.M.; can scarcely wait for his meals.

Ravenous hunger, cannot be satisfied.

Alternate canine hunger and want of appetite.

Appetite for meat.

Thirst; desire for spirituous liquors.

[15] **Eating and Drinking.** Fasting causes pain in chest.

Most symptoms are better after eating.

Food distresses her.

Spasmodic pains in stomach > by eating.

[16] **Hiccough, Belching, Nausea and Vomiting.** Hiccough.

Digitized by Google

‖‖Empty eructations from morning till evening, as if every particle of food was turned into air.
‖Sour eructations, with burning therefrom.
‖Heartburn, after heavy food.
‖Qualmishness, nausea, with spasmodic pain in stomach.
‖Vomiting: of bile, with violent colic; of milk; first water, then food; of saltish tasting, oily or greasy substances.
‖Violent vomiting renewed by eating.

17 **Scrobiculum and Stomach.** ‖Tenderness of epigastrium; pulsations in pit of stomach.
Spasmodic pains in stomach, renewed by eating.
‖‖Pains in stomach, gnawing or corroding, > after eating.
‖Dyspepsia with great weakness and loss of energy.
‖Gastric derangement, with constipation.

18 **Hypochondria.** ‖Region of liver sore to pressure.
‖Jaundice with much pain in liver through to shoulder-blade, no appetite, constant nausea; sluggish, clay colored stools, porter colored urine, debility, emaciation; skin brownish yellow; tenderness about hepatic region.
‖Pain in hepatic region, loss of appetite, emaciation, excessive weakness, diarrhœa; pressure and stitches in hepatic region, painful to touch. θCirrhotic liver.
‖Jaundice: dirty, yellowish skin; great emaciation; depressed, irritable mood; yellow, almost dark brown color of face; thickly coated tongue; great thirst; nausea; constipation alternating with white diarrhœic stools; dark, greenish yellow, corroding urine; after abuse of mercury; in organic lesions of liver; dyscratic states of system accompanied by hectic fever.
‖Eyes, skin and nails completely jaundiced; nausea and vomiting after eating almost any kind of food; intense canine hunger; every third day attacks of gastrodynia; frequent eructations; heartburn; distension of stomach; pain when pressing on epigastrium; pain in r. hypochondrium; constipation; urine scanty, dark and turbid; menses absent six months. θChronic jaundice.
‖Swelling and hypertrophy of liver.
‖‖Left hypochondriac region hard and acutely painful to pressure; enlarged spleen after intermittent.
‖Pressure in region of stomach, with much empty belching, occasionally vomiting of small quantity of tough, sour mucus; no actual pyrosis; constipation; ptyalism, constant expectoration; tongue moist, with mucous streak at sides; great thirst; appetite appeased by smallest quantity of food; urine scanty, brown; sallow face; depressed, irritable; constant profuse sweat; from pit of stomach to navel and in a corresponding region

Digitized by Google

in back, sensitiveness to pressure; pancreas enlarged; abdominal pulsations. θChronic inflammation of pancreas.

19 **Abdomen.** ‖Swelling and distension, or emaciation and sinking in of abdomen.

‖Pulsations in abdomen; throbbing of abdominal aorta.

‖Incarceration of flatus in l. side of abdomen.

‖‖Rumbling in abdomen with gnawing hunger.

‖Swelling of mesenteric glands.

‖Marked irritability of mind; exceedingly cross, screamed in anger when simply looked at, talked to, or touched; large, tumid, doughy abdomen; loss of appetite; emaciation; diarrhœa, with copious, slimy, fetid stools. θTabes mesenterica.

‖Tabes mesenterica, with rapid emaciation, night sweats, slow fever, dry laryngeal cough and diarrhœa.

‖Inflammation and swelling of mesenteric glands, with bloating and distension of abdomen, which does not permit one to lie down; painful pressure and tension in abdomen, with incarceration of gas in l. side, < after eating; stools in beginning hard, knotty and dark; then alternate constipation and diarrhœa and finally profuse, frothy, bloody, even purulent diarrhœa, with itching and burning in anus, especially at night; ptyalism, constriction of throat, ulcers in mouth and putrid breath; constant and tormenting thirst with canine hunger, which cannot be satisfied; child wants to eat all the time; eats a large quantity and frequently without indigestion, yet becomes more and more emaciated; occasionally canine hunger is alternated with anorexia; burning heat after eating heavy food, with nausea or vomiting, pressure and hiccough. θTuberculosis mesenterica.

‖Swelling of inguinal glands.

20 **Stool and Rectum.** ‖‖Brown color of face, with copious papescent stools.

‖Diarrhœa in morning; stools watery, foaming, whitish; pinching around navel and pressive pain in vertex.

‖Purulent stools, with cutting pains in intestines, nausea, vomiting and sour taste in mouth.

‖Stools: blackish, watery; brownish; frothy; bloody; whitish, mucous; thick, mucous; purulent; copious; fetid; of mucus and blood; whey-like; fatty.

‖Chronic diarrhœa of an exhausting character, with constant desire for change of place.

‖Morning: diarrhœa of scrofulous children.

‖Diarrhœa adiposa from pancreatic affections.

‖Summer complaint with swollen glands on neck.

Digitized by Google

‖Dysenteric mucous stools without feces.
‖Discharges of thick mucus, or purulent matter; part of feces being retained.
‖Constipation, alternating with diarrhœa.
‖Stools hard, knotty, dark colored.
‖Constipation with ineffectual urging > by drinking cold milk.
During stool: cutting pain in bowels; bearing down in genitals; painful pressure on vertex.
After stool: burning in anus; soreness in rectum; pressing in hypogastrium.
‖Itching and burning of anus in evening.
‖Piles protrude and burn; < from heat.

[21] **Urinary Organs.** ‖Uræmia; croupy exudation in mouth and fauces; tongue covered with thick brown, leather-like coating. θSenile hypertrophy and induration of prostate, stricture of urethra and ammonæmia.
‖Bright's disease, with albuminous urine; much emaciation and debility.
‖Obstinate retention of urine.
‖Copious and frequent or involuntary micturition.
‖Continued desire to urinate; nocturnal urination.
‖Incontinence of urine in the aged.
‖Urine: dark, thick, ammoniacal; dark yellowish green; acrid; milky; with a variegated cuticle on its surface; red and turbid.

[22] **Male Sexual Organs.** ‖Complete loss of sexual power; testicles atrophied.
‖Bearing down, or twisting sensation in seminal cord.
‖Aching, pressing or forcing pain in spermatic cords and testicles, after sexual dalliance.
‖Testicles hypertrophied, with sexual excitement.
‖Testicles swollen and hard, as large as hen's eggs, with pressure and tension extending into abdomen; on scrotum several swollen and inflamed openings, from which escapes a constant turbid, watery discharge; several of these openings penetrate through scrotum, others form canals running in different directions through skin.
‖Painless swelling of testicles, with offensive sweat.
‖Swelling and induration of testicles and prostate gland.
‖After stool a milk-like fluid runs from urethra.
‖Chancre with torpid, watery discharge.
‖Hydrocele.
‖Offensive sweating of genitals.

[23] **Female Sexual Organs.** ‖Atrophy of ovaries and mammary glands, with sterility.
‖Induration and swelling of uterus and ovaries.
‖Pain commencing in r. ovary, passing down broad ligament to uterus.

Digitized by Google

Great sensitiveness of r. ovarian region during or after menses.

Pain in ovaries and back during menses.

Dull, pressing, wedge-like pain, as if a dull plug was driven from r. ovary toward womb.

Pain in lower part of abdomen; < l. ovarian region; comes on about 3 A.M.; > by motion and eating; likes acid things; l. ovary tender to pressure; pains before, during and after stool; leucorrhœa thick, yellow, burning; vertigo, staggering when walking; faint on getting up in morning; has to lie with head high on account of shortness of breath; menses too early; stoppage of urine, or it flows, stops, and flows again. θChronic ovaritis.

Abdomen as large as in pregnancy at sixth month from accumulation of fluid; rapid, irritable pulse; thirst; general prostration, able to sit up only part of day; loss of appetite; pain and tenderness in r. ovarian region, and fluid rapidly accumulating. θOvarian cyst.

Pressing, bearing down towards genitals; constipation; acrid leucorrhœa, corroding linen; dwindling and falling away of mammæ; strumous constitution. θOvarian dropsy.

Swelling and induration of uterus.

Uterine leucorrhœa with swelling of cervix, os uteri feeling hard and indurated; uterus enlarged; tendency to menorrhagia; corroding leucorrhœa, rendering thighs sore.

During course of inflammatory disease affecting uterus and surrounding parts; colliquative sweats; great emaciation and weakness; catarrh of chest, constantly growing more severe; sudden appearance of menses, very profuse and accompanied by severe abdominal pains, particularly in region of ovary.

Cancerous degeneration at neck of uterus.

Metrorrhagia: with acute pain in mammæ, or mammæ dwindle away and become flabby; at every stool, with cutting in abdomen, pain in loins and small of back; long lasting; after abuse of mercury. θCancer of womb.

Menses: sometimes too early, at others too late; premature, violent and copious.

Chronic menorrhagia in thin, delicate women, subject to corrosive leucorrhœa, with other indications of congested uterus and ovaries.

Premature and too copious menses, with goitre; dwindling away of breasts, and great weakness on going up stairs.

Violent dysmenorrhœa with very scanty discharge.

Digitized by Google

‖Irregular menses; delaying eight days, with vertigo and palpitation of heart.

‖Chronic amenorrhœa of long standing.

Before menses: flashes of heat, with palpitation; tension and swelling of neck; abdominal pains.

During menses: pains in back and ovaries; lassitude; coughing up of blood; great weakness and loss of breath.

After menses: palpitation.

‖Thin, yellow leucorrhœa in scrofulous women, with induration and swelling of os uteri, and engorgement of vagina.

‖‖Chronic leucorrhœa most abundant at time of menses, rendering thighs sore and corroding linen.

‖Mammary hyperæsthesia.

‖‖Heaviness of mammæ, as if they would fall off.

‖Acute pain and soreness in mammæ, with metritis; cachectic state of system, with feeble pulse.

‖Bluish red nodosities, size of a hazel nut; in both mammæ; dry, black points at tips.

[31] **Pregnancy. Parturition. Lactation.** Abortion.

‖Excessive flow of very thin, watery milk; great weakness and rapid emaciation. θGalactorrhœa.

‖Suppression of milk; atrophy and relaxation of mammæ.*

[32] **Voice and Larynx. Trachea and Bronchia.** ‖Voice: nasal, hoarse; has a deep, hoarse, rough sound, becoming continually deeper.

‖Hoarseness: in morning and insupportable tickling and tingling in larynx; lasts all day, phlegm in small quantities and tough, constant hemining and hawking.

‖Sensation of constriction (fulness or pressure) in larynx, with impeded deglution.

‖Tightness and constriction about larynx, with soreness and hoarseness.

‖Swelling and contraction of larynx.

‖‖Contraction and heat in larynx.

‖Spasm of glottis in rachitic children; cannot bear warmth.

‖Enlargement and induration of cervical and mesenteric glands; loss of appetite, utter indifference to food; scanty, high colored urine; clayey evacuations; emaciation; yellow skin; action of heart feeble and much increased by motion. θSpasm of glottis.

‖Region of trachea smarting, accompanied by frequent lancinating pain.

‖Pains in larynx: with great hoarseness, or complete aphonia; with desire to cough; with discharge of hardened mucus.

---

* *Iodum* should not be given during lying-in period, except in high potencies. C. Hg.

Digitized by Google

‖Painful pressure mingled with stitches in region of larynx and sublingual glands, returning several times during day.

Roughness, painful pressure and stitches in larynx and pharynx, as if swollen; increased secretion of mucus in trachea; dry, short and hacking cough.

Soreness of throat and chest; wheezing; drawing pains in lungs; child grasps throat and chest with its hands.

‖Chronic laryngitis in scrofulous subjects; more or less hectic fever, especially serviceable when the trachea is implicated.

‖Intense membranous laryngitis; head and face hot; paroxysmal, dry, short, barking cough; respiration irregular, short and quick; active motion of alæ nasi.

‖Increased secretion of mucus in trachea; long lasting laryngeal catarrh.

Paralysis of throat.

‖Membranous croup, with wheezing and sawing respiration, dry, barking cough, especially in children with dark eyes and dark hair; child grasps throat with hand.

‖Violent attack of cough threatening suffocation, with whistling tone and great anguish. θMembranous croup.

‖Tracheal and bronchial croup, with tendency to torpor; extensive membrane; jerking breathing.

‖Cough is peculiar in that it has lost the metallic, loud timbre, so characteristic of croup, and has become muffled and indistinct; the more plastic the exudation, the more *Iodum* is indicated. θCroup.

‖Suffocating cough, can hardly get her breath for it; > by expectorating, sputa very scanty; weight and tightness at stomach after food; cough exhausts and chokes her, and causes retching and pain in forehead; < in a warm room; during day chilly, cold chills run up back; at night when in bed subjective dry heat, especially of head; bitter taste of solid food, not of drinks; burning pain below r. hip from back to front. θBronchitis.

‖Delicate constitutions, with quick pulse, tendency to bronchial and pulmonary congestion and hemorrhage; overgrown young people, with weak chest and dry cough, subject to spitting of blood and cardiac palpitation; swelling of cervical and bronchial glands; nocturnal sweats and progressive emaciation, notwithstanding good appetite and regular function of bowels; cough from every effort to expand chest; much dry cough; suffocative feeling; shortness of breath at least exertion. θBronchitis.

‖Chronic bronchitis in a scrofulous subject; dyspnœa at night, compelling him to sit up; raw sensation in l.

Digitized by Google

bronchus, particularly in morning; early in day cough dry, later transparent, occasionally grayish sputa; exacerbation after every cold.

Respiration. ‖An effort to expand chest produced cough but no pain.

‖Breath comes in wave-like expansions.

‖Shortness of breath, palpitation and feeling of weakness on going up stairs.

‖Tightness of respiration; out of breath from least exercise.

‖Respiration, especially inspiration, difficult; constriction of throat prevents swallowing.

‖Asthma, breathes heavily even when quiet.

‖Rachitic children, swelling of bronchial glands; tightness and constriction about larynx, with soreness, hoarse voice; enlarged glands may cause paralysis of laryngeal, tracheal and bronchial nerves; mesenteric glands enlarged and indurated; tendency to marasmus; excellent appetite and yet grows thin, or indifferent to food; stools clayey; urine high colored, scanty; skin yellow; heart's action feeble and increased by any motion; unbearably irritable; well marked, painless goitre.

‖Swelling and distension of abdomen; when assuming a wrong position he is threatened with suffocation (has to lie on back).

Cough. ‖‖Dry morning cough, from tickling in larynx.

‖Constant tickling, in trachea and under sternum, with inclination to cough.

‖Unendurable tickling through whole chest, causing cough; during attack undulating inspiration; cough preceded by great anxiety and followed by depression; emaciation.

‖Cough as from a feather in throat, especially in morning; sneezing; vomiting; stitches in chest and side, dyspnœa and great weakness. θLiver complaint.

‖Annoying, tickling cough in phthisical persons.

‖Expansion of chest produces cough but no pain.

‖‖Dry cough, with stitches and burning in chest.

‖Cough with copious collection of mucus in bronchi and inability to expectorate; moderate amount of fever.

‖Dry, croupy cough, with titillation; sensation of soreness in larynx; barking, with gray or white salty, sweetish expectoration; shrill whistling and rattling in chest; sawing, hissing respiration; oppression; hoarseness, difficult speech; expectoration of tough mucus; soreness and pain extending to upper third of sternum.

‖Cough moist but harsh as from tickling all over chest; wheezing, metallic cough; tough or slimy sputa; constriction of larynx; < in wet weather; < in morning.

‖Cough often coming on in Fall, constant tickling in pit of

Google

throat; < by expiration; frequent paroxysms of severe, short, but continuous coughs, one rapidly following the other, can scarcely utter a word; cough sounds as if mucus was deep down in chest; expectoration of yellow pieces, tasteless, or during day salty.

‖Cough caused and aggravated by tobacco; often accompanied by retching; could not lie down, sat bent forward.

Cough: after catching cold on damp day; > by expectoration; sputa very scanty; cough suffocating, can hardly get breath; weight and tightness at stomach after food; cough exhausts and chokes her, and causes retching and pain in forehead; < in warm room; during day chilly, cold chill runs up back; at night in bed subjective, dry heat, especially of head; bitter taste of solid food, not of drinks; burning pain below r. hip from back to front.

‖Chronic cough excited by pressure in throat, < at night, in a very nervous, tall, thin and careworn old lady.

‖Dry, croupy cough; mucous membrane of larynx and trachea dry; mucus hard and tough.

‖Croupy, hoarse cough, < in warm, wet weather.

‖Patients are weak, sallow, short of breath, emaciated and have enormous appetites. θTussis convulsiva.

‖Great weakness with the cough.

During cough: tickling and burning pain in throat; oppression, pressing, burning and stitches in chest; rattling; anxiety; nausea; vomiting; sneezing.

‖Cough, with expectoration of large quantities of mucus, frequently blood streaked.

‖Short, loose cough, with thick mucus and puriform expectoration, often bloody.

‖Cough < towards morning. θTuberculosis.

Dyspnœa, cough, palpitation and pains < by movement.

‖Expectoration: salty; sweetish; sourish; putrid; gray or white; yellow; blood streaked.

Inner Chest and Lungs. ‖A feeling of great weakness in chest; can hardly walk up stairs.

‖Constriction of chest.

‖Sharp, quick, piercing pains in chest.

‖‖Itching: low down in lungs, behind sternum; causing cough; extends through bronchi to nasal cavity.

‖Rattling in chest: yet nothing seems to loosen; with roughness under sternum and oppression.

‖Tendency to bronchial and pulmonary congestion and hemorrhage.

‖Violent chills, followed by fever and pain in chest; short, anxious breathing, violent cough; lip and chin sore; urine high colored and scanty; creaking, leathery noise over middle and lower third of r. lung. θPneumonia.

Digitized by Google

Violent chill, followed by violent dry heat, pain in back and r. side, from cough and dyspnœa; rust colored sputum and fresh blood, crepitant râles, pulse 120, skin hot and dry. θPneumonia.

Violent chill followed by great pressure on chest; respiration impeded, interrupted, imperfect and rapid; pulse 110; urine scanty and red; frequent short cough, with expectoration of tenacious, yellowish matter, occasionally tinged with blood; troublesome "cold sore" on lips and nose; lower lobes of r. lung affected. θPneumonia.

Sensation of weakness in chest, with anxiety, oppression, and burning, tearing, stabbing pains; sensation as if something resisted expansion; cough, with dyspnœa and blood streaked expectoration; also during third stage, where slow suppuration sets in without marked febrile symptoms in tuberculous patients, and causes a slowly progressing hectic condition, entirely confined to lungs. θCroupous pneumonia.

Continuous delirium; great dyspnœa; respiration 60; unquenchable thirst, tongue dry; great prostration; sputa gluey, rusty yellow, mingled with blood streaks, is dislodged with difficulty and sticks fast to handkerchief. θPneumonia.

Pneumonia, when the disease localizes.

Pleuritic effusions.

Neck long and thin; clavicular region, particularly r. side, sunken; empty percussion sound in upper portion of chest, but especially on r. side; bronchial respiration on r. side; chest flat, sunken; respiration short and accomplished only by lower portion of chest and diaphragm; strong impulse of heart; anæmic murmurs; voice hoarse, toneless, weak; irritation in larynx; constant pressure and burning in throat; sensation of rawness in larynx and bronchial tubes extending into chest, causing hawking and coughing; disagreeable tickling in throat at night, causing severe and violent cough; short, dry, irritating cough, < at night, followed in morning by sweat; occasionally severe attacks of spasmodic cough, greatly prostrating patient, and causing loss of breath and glowing heat in head and face; scanty, tough, slimy expectoration, often streaked with blood; pressure and heaviness on chest; loss of breath after least exertion or talking. θConsumption.

Face pale, anxious, earthy; cheeks red, eyes languid, appetite greatly impaired; pressure at stomach, particularly after eating; abdomen sunken; frequent colicky pains; diarrhœa, or scanty and delayed stool;

Digitized by Google

menses scanty and delayed; pulse small, frequent, particularly in evening; fever; every afternoon dry heat, thirst, confusion of head; restless and sleepless at night, sweat towards morning; skin dry, hot, pale, dirty gray in color; anæmia; great emaciation, lassitude and debility. θConsumption.

‖Voice weak, rough, hoarse; face pale; respiration impeded; pain in chest. θTuberculosis.

‖Tickling all over chest; tough, stringy, blood streaked sputa; hunger, yet emaciation; cannot bear a warm room. θPhthisis.

‖Phthisis pulmonalis, with constant tickling and inclination to cough, in trachea and under sternum; expectoration of transparent mucus streaked with blood; morning sweats; emaciation; wasting fever; rapid pulse; diarrhœa; amenorrhœa.

‖Emaciated almost to a skeleton; for several months has been compelled to stay in bed; decubitus; almost continual fever, remitting only for two or three hours in afternoon; profuse night sweats; continuous cough with copious expectoration. θConsumption.

‖For several years obstinate leucorrhœa, alternating with a cough which greatly reduced her strength and threatened to develop into consumption.

‖Advanced stage of tuberculosis, when glands and lymphatics are affected; much expectoration of blood, or even hemorrhages.

‖Swelling of cervical and bronchial glands.

» **Heart, Pulse and Circulation.** ‖Great præcordial anxiety, obliging constant change of position.

‖Sensation of weakness in heart.

‖Constant, heavy, oppressive pain, in region of heart.

‖Sharp, quick, piercing, and movable, but heavy, oppressive pain in region of heart.

‖‖Sensation as if heart was squeezed together.

‖Feeling as if heart was grasped by an iron hand.

‖‖Palpitation of heart: < from least exertion; with faintness.

‖‖Tumultuous, irregular or intermitting action of heart.

‖Cardiac action excessive. θExophthalmic goitre.

‖Pericarditis in complication with croupous pneumonia.

‖Mitral insufficiency and periodical attacks of pain about heart, following long fit of sickness with typhoid endocarditis; ventral dilatation of heart, with marked projection of l. second and third ribs; loss of strength; difficult breathing; violent palpitations.

‖Dilatation of heart, after scarlatina.

‖Darker color of skin, with sensation of heat; skin turns

Digitized by Google

brown, grows parchment-like, peels off, and shows underneath the loosened scales a fatty transpiration; thickening of epidermis; sudden turning of yellowish color into brown, as if smoked; excessive weakness and debility; muscular weakness and trembling; sadness and depression of spirits; mental torpor; dulness and pain in head; vertigo; nausea; violent, continuous vomiting; violent, excruciating pain in stomach; constipation; frequent attacks of gastralgia; drawing and pressing in region of kidneys; twitchings, convulsions; epilepsy; paralysis; the formerly yellow face turns brown; red hair turns to chestnut brown. θAddison's disease.

Pulse: large, hard and accelerated, with orgasm of blood and beating in bloodvessels; rapid, but weak and thread-like; small, very quick, irregular; weak, thread-like; accelerated, by every slight exertion.

Extremely troublesome pulsations in larger arterial trunks.

Pulsation in arteries at every muscular effort.

Ebullition in chest and audible palpitation.

[80] **Outer Chest.** Burning stinging tension in integuments of chest.

[81] **Neck and Back.** Redness on neck and chest as if ecchymosed.

Yellow spots on neck.

Neck swells up when talking.

Swelling and induration of cervical glands.

Hard and red condition of mucous surfaces, scrofulous subjects; enlargement of cervical and subcutaneous glands.

Enlargement and induration of glands, cervical and mesenteric; want of appetite; utter indifference to food; scanty, high colored urine; clayey evacuations; emaciation; yellow skin; action of heart feebler and much < by motion.

Gradual increase in size of neck, especially on r. side, until it measured fourteen and a half inches over isthmus of thyroid body; soft and without any fluctuation. θGoitre.

Marked increase of thyroid gland, which had been already slightly enlarged; acute pain in gland upon pressure or on slightest movement of head.

Non-lobulated tumor in anterior and median portion of neck as large as a child's head; rosy red color heavy in weight and of soft consistency; voice for past, two years slightly rough, and respiration difficult, especially when he lies on back. θGoitre.

Hypertrophy of two lobes of thyroid gland; tumor becoming more swollen and painful at each return of menses, which were irregular and painful. θGoitre.

Digitized by Google

‖Sensation of constriction in goitre.
‖Goitre: recent and soft; with marked hardness; hard and nodulated.
| |Large boil between scapulæ, with gangrene of legs.
Stitches in small of back; pains like rheumatism.
Pain in sacrum and coccyx.
‖Spinal complaints, with gressus vaccinus.

Upper Limbs. ‖Swelling of axillary glands.
‖Hot, dark red, lymphatic swelling in r. axilla, size of a walnut, discharging a cheesy pus.
‖Weariness of arms, as if paralyzed, in morning, in bed.
‖Trembling of arms and hands.
‖Pain in bones of arm on which he lies at night.
| |Small boil on posterior surface of r. upper arm.
| |Tearing in l. elbow.
‖Pains in elbow.
‖Painful weakness in extensors.
| |Subsultus tendinum.
| |Back of l. hand painful, as if swollen, painful to pressure and when turning hand, not when closing fingers.
| |Brown discoloration on back of hand.
‖Sweating in palms of hands.
‖Coldness of hands and feet.
‖Fingers "go to sleep."
Round spot between thumb and index finger covered with two whitish vesicles.

Lower Limbs. ‖Intermittent, sharp, tearing pains between l. hip and head of femur, < by moving joint; ear swellings; abuse of mercury.
| |Jerking pain in legs each time after taking cold, following pressure in pit of stomach. θJaundice.
| |Numb feeling in thighs and legs.
‖Violent itching nettlerash on thigh and inside of l. knee.
Flat blister on knee looks as if full of bile.
‖After neglected injury, large, elastic and fluctuating swelling of knee; pale redness of skin upon which there are several very red, hot and painful spots; temperature at knee elevated; dull pain deep in knee-joint when lying quietly with leg stretched out, becoming very severe upon least motion or pressure; foot must be kept very quiet; febrile attacks; finally small opening over patella through which oozed laudable pus, later followed by a profuse, clear, yellow, serous discharge, particularly early in evening.
‖Knee greatly swollen, puffed and round on both sides; sensation of fluctuation; temperature elevated; pain when stretching leg or when attempting to stand; limps when attempting to walk and can only place tip of foot

Digitized by Google

upon floor; pressure upon patella causes great pain; no pain during rest.

Hot, bright red, shining swelling of knee, with shooting stitches and burning; in several places, small, highly inflamed openings through which oozes a watery, bloody pus; least motion of body or foot, or least touch or pressure upon swelling cause very severe pain. θScrofulous inflammation.

Hot, bright red swelling of knee, with inflammation, pricking and burning; < by touch or pressure.

White swelling of knee; dropsical swelling of knee joint.

Second and third stage; fistulous openings, discharging a thin, watery ichor, and surrounded by pale, spongy edges, which bleed easily; feverish; emaciation. θGonarthrocace.

Much swelling, with erratic tearing pains. θSynovitis.

Chronic hydrarthrosis of knee joint.

Violent itching nettlerash, particularly around knee; on outer side of l. knee especially.

Subsultus tendinum of feet.

Œdematous swelling of feet.

Acrid, corrosive sweat of feet.

Painful corns.

[34] **Limbs in General.** Great weariness of arms and legs from excessive debility.

Subsultus tendinum of both hands and feet.

Trembling of limbs.

Acute articular rheumatism, with violent pericarditis and pleuro-pneumonia.

Chronic arthritic affections, with violent nightly pains in joints, no swelling.

Subsultus tendinum of hands and feet; great drowsiness and continual dreaming of eating, with great prostration on rising from bed; picking of bedclothes and short, dry cough.

Much coldness of hands and feet.

[35] **Rest. Position. Motion.** Rest: no pain in knee.

Lying down: < tremor at heart and fainting.

Lying quietly with leg stretched out: pain in knee.

Has to lie with head high on account of shortness of breath.

Pain in bones of arms on which he lies.

Has to lie on back: on account of swelling of abdomen.

When lying on back: respiration difficult.

Cannot lie down: on account of bloating and distension of abdomen; on account of cough.

Sat up in bed, then threw himself upon it.

Able to sit up only part of day.

Is compelled to sit up: by dyspnœa.

Digitized by Google

Sitting: < tremor at heart and fainting; anxiety after mental labor >.
Stooping: < vertigo.
Hardly able to stand: child two years old.
Attempting to stand: pain in knee <.
Head inclined to seek support: caused by oppressive, dull feeling in head.
Desire to change position continually.
Præcordial anxiety obliging constant change of position.
When assuming a wrong position he is threatened with suffocation.
Inclination to move about: not permitting one to eat or to sleep.
Grasps throat and chest with his hand.
Slightest movement of head: acute pain in thyroid gland.
Least motion: pain in knee <.
Least exertion: palpitation of heart <; accelerates pulse.
At every muscular effort: pulsations in arteries.
After slight exercise when lying down: tremor at heart and fainting <; out of breath.
Every motion: throbbing in head; increases heart's action.
Rising: < headache; produces faintness; tremor at heart and fainting <.
Rising from bed: great prostration.
When moving hip joint: pain <.
Stretching leg: pain in knee <.
When turning l. hand: painful.
Attempting to walk: knee causes limping; can only place tip of foot on floor.
Walking: vertigo, staggering.
Can hardly walk up stairs: weakness of chest.
Walking fast: < headache.
Active exertion: causes dizziness.
Running about, never sits down or sleeps at night.
Motion: > pain in lower part of abdomen; dyspnœa, cough, palpitation and pains <; action of heart feeble, much <.
Must keep in motion day and night.
Restless, inclined to move, not permitting her to sit or sleep.
Violent palpitations drive him out of bed.

[36] **Nerves.** ‖Excessive excitability; irritability and sensitiveness.
‖Restlessness, with inclination to move about, not permitting one to sit or to sleep.
‖‖Great weakness and loss of breath, on going up stairs.
‖Remarkable and unaccountable sense of weakness and loss of breath on going up stairs; leucorrhœa corroding the linen; food does not nourish or strengthen her.
‖Great debility; sweats, even from talking.

Digitized by Google

‖Trembling of limbs or whole body.
‖Twitching of muscles.
‖Abdominal reflex chorea; the stomach, liver, pancreas, abdominal glands, being at fault.
‖Facial paralysis or epilepsy, following suppression of goitre.

[37] **Sleep.** ‖Sleeplessness after midnight.
‖Restless sleep, with vivid or anxious dreams.

[38] **Time.** Towards morning: cough <.
Morning: weakness; teeth yellow, covered with much mucus; much mucus in mouth; diarrhœa; faint on getting up; hoarseness, and tickling and tingling in larynx; raw sensation in l. bronchus; dry cough; cough as from a feather; cough moist but harsh; sweat following cough; weariness of arms; debilitating sweat.
From morning till evening: empty eructations.
3 A.M.: pain in lower part of abdomen.
11 A.M.: longs for food.
Early in day: dry cough.
During day: chilly; salty expectoration.
All day: hot, dry skin; hoarseness and tickling in larynx.
Afternoon: violent aching at base of occiput; for several hours fever remits.
Evening: sneezing; stoppage of nose; itching and burning of anus; pulse small and frequent; discharge from knee <.
Night: heart palpitates "like lightning;" pulsations felt at pit of stomach; watery, fluent coryza; burning and itching at anus; subjective dry heat; sweats; dyspnœa; chronic cough <; disagreeable tickling in throat; cough <; restless; sleepless; pain in bones of arms; pains in joints; cold feet; very profuse sweats.
After midnight: sleeplessness.

[39] **Temperature and Weather.** Aggravation: warmth; wrapping up head; cannot bear hat on.
Amelioration: cold air; washing in cold water.
Rachitic children cannot bear warmth.
Warm room: cough <; shaking chill.
Warm air: < throbbing in head.
Warm weather: great tendency to take cold.
External warmth: relaxed mammæ <.
Cannot bear warmth or a warm room.
Heat: < piles.
Inclination to uncover.
Open air: dry coryza becomes fluent.
Wet weather: cough <.
Damp day: caught cold, cough.
Drinking cold milk: constipation >.

Digitized by Google

Cold baths: < violent palpitations.

40 **Fever.** Shaking chill, or chilliness, in a warm room.
Hands, nose, feet icy cold; cold feet the whole night.
Chill predominates, is cold most of the time.
‖Chill, frequently, alternating with heat.
‖Fever with dry skin, weak and rapid pulse, twitching of muscles, and more coldness than heat of skin.
‖Internal heat, with coldness of skin.
| |Flushes of heat; ebullitions and pulsations.
| |Heat or sweat, with inclination to uncover.
‖Burning heat of hands.
‖Quartan fever, with diarrhœa on days free from fever.
‖Sallow, distressed countenance. ℞Intermittent.
‖Left hypochondriac region hard and acutely painful to pressure. ℞Intermittent fever.
‖Intense pain in ileo-cæcal region; bloody, watery diarrhœa; great irritation of nervous system; picking at flocks; delirium. ℞Typhoid.
‖Palms of hands sweat continually.
‖Cold feet sweat easily; so acrid that it corrodes skin.
‖Debilitating, sour sweat in morning, with great weakness of limbs; much thirst.
| |Sweat with thirst.
‖Very profuse night sweat; profuse, cold, viscid sweat.
‖Profuse night sweats, with great emaciation and debility, and tendency to take cold, especially in warm weather.

41 **Attacks, Periodicity.** Frequent paroxysms of severe short but continuous coughs, one rapidly following the other.
Periodical attacks of pain about heart.
Occasional severe attacks of spasmodic cough.
Every time after taking cold: jerking pains in legs.
Every few hours: must eat.
For several hours in afternoon: fever remits.
Every afternoon: dry heat; thirst; confusion of head.
Several times during day: pressure in region of larynx.
Every third day: attacks of gastrodynia.
Menses delayed eight days.
At each return of menses: thyroid gland painful.
For several months: has been compelled to stay in bed.
Six months: menses absent.
Often in Fall: cough.
For several years: leucorrhœa alternating with cough.

42 **Locality and Direction.** Right: constant tearing pains around eye; small scab in nostril; pain in hypochondrium; pain in ovary; sensitiveness of ovarian region; tenderness and pain in ovarian region; burning pain below hip; creaking, leathery noise, over middle and lower third of lung; pain in side; lower lobes of lung

Digitized by Google

affected; clavical region sunken; empty percussion sound on side of chest; bronchial respiration; increase of size of neck; swelling of axilla; small boil on posterior surface of upper arm.

Left: vertigo on side; hypertrophy of ventricle; sharp, pressive pain in upper part of side of forehead; headache on side; suppurating ulcer on cheek; hypochondriac region hard and acutely painful to pressure; incarceration of flatus in side of abdomen; pain in ovarian region; ovary tender to pressure; raw sensation in bronchus; marked projection of second and third ribs; tearing in elbow; back of hand painful; sharp pain between hip and head of femur; violent, itching nettlerash, inside of knee; outer side of knee nettlerash; hypochondriac region painful to pressure and hard.

Hard boil on forearm near wrist.

From back to front: burning pain below r. hip.

[43] **Sensations.** Brain felt as if it was stirred up; as if going crazy; as if a tape or band was tightly drawn around head; brain feels as if stirred around with a spoon; as though a foreign substance was inside of brain; like a veil before eyes; pain in eyes as from excoriation; as if alæ nasi were spread wide open; as though he had sharp vinegar in mouth; as if every particle of food was turned into air; as if a plug was driven from r. ovary to womb; as if mammæ would fall off; pharynx as if swollen; cough as from a feather in throat; as if something resisted expansion in chest; as if heart was squeezed together; as if heart was grasped by an iron hand; arm as if paralyzed; l. hand as if swollen; blister on knee looks as if full of bile.

Pain: in eyes; in occiput and temples; from inner canthus to articulation of jaw; in throat; in œsophagus; in chest; in liver through to shoulder blade; in hepatic region; in r. hypochondrium; in r. ovary passing down broad ligament to uterus; in ovaries and back during menses; in lower part of abdomen; in l. ovarian region; in r. ovarian region; in loins and small of back; in larynx; in forehead; extending to upper third of sternum; in r. side, about heart; in head; in sacrum and coccyx; in bones of arm on which he lies; in elbows; in bones.

Violent, excruciating pain in stomach.

Intense pain: in ileo-cæcal region.

Acute pain: in mammæ; in thyroid gland.

Violent nightly pain: in joints.

Great anguish: with cough; præcordial.

Sharp, tearing pain: between l. hip and head of femur.

Digitized by Google

Constant tearing pain: around r. eye, passing backwards from inner canthus to articulation of jaw.
Tearing: in l. elbow; in chest.
Lancinating pain: in region of trachea.
Sharp, quick, piercing pains: in chest; in region of heart.
Cutting pains: in intestines; in abdomen.
Erratic tearing: in knee.
Stabbing: in chest.
Shooting stitches: in knee.
Stitches: in hepatic region; in region of larynx; in region of pharynx; in chest and side; in small of back.
Sharp, pressive pain: in upper part of side of forehead.
Throbbing pain: in head.
Burning pain: in throat; in chest; below r. hip.
Burning, stinging tension: in integuments of chest.
Corroding pains: in stomach.
Severe abdominal pain: in region of ovary.
Violent colic and colicky pains.
Drawing pains: in lungs; in region of kidneys.
Gnawing pains: in stomach.
Jerking pains: in legs.
Spasmodic pains: in stomach.
Forcing pain: in spermatic cord and testicles.
Pinching: around navel.
Pricking: in knee.
Dull, pressing, wedge-like pain: from ovary to womb.
Dull pain: deep in knee joint.
Pain like rheumatisms: in back.
Violent aching: at base of occiput.
Aching, pressing pain: in spermatic cords and testicles.
Pressive pains: in vertex.
Heavy, oppressive pain: in region of heart.
Painful pressure: in abdomen; in vertex; in region of larynx; of pharynx.
Smarting: in eyes; in region of trachea.
Soreness: in rectum; of mammæ; about larynx; of throat and chest; in larynx; extending to upper third of sternum; of lip and chin.
Burning heat: of hands.
Glowing heat: in head and face.
Burning: in anus; in piles; in throat; in chest; in knee.
Heat: in larynx.
Bearing down: in genitals; in seminal cord.
Painfulness: of tongue; of ulcers on gums; in corns.
Painful weakness: of extensors.
Intense painfulness: of glands on inside of cheek.
Sensitiveness: of r. ovarian region.
Raw sensation: in l. bronchus; in larynx and bronchial tubes to chest.

Digitized by Google

Tenderness: of epigastrium; about hepatic region.
Dull pressure in frontal sinuses.
Dulness: in head.
Pressure: on a small spot above root of nose; in hepatic region; in region of stomach; in testicles extending to abdomen; in throat; on chest; in region of kidneys; in pit of stomach.
Oppressive, dull feeling: in head; in chest; under sternum.
Heaviness: of both mammæ; on chest.
Confusion: of head.
Twisting sensation: in seminal cord.
Tightness: about larynx; at stomach.
Tension: in abdomen; in testicles; of neck.
Constriction: about larynx; of throat; of chest; in goitre.
Contraction: of larynx.
Throbbing: all over body; in head at every motion; of abdominal aorta.
Palpitation: felt at pit of stomach.
Pulsations: in pit of stomach; in abdomen.
Sensation of fluctuation: in knee.
Unendurable tickling: through whole chest.
Continual tickling: in middle of chest.
Tingling: in larynx.
Tickling: in larynx; in throat; in pit of throat.
Irritation: in larynx.
Roughness: under sternum.
Numb feeling: in thighs and legs.
Paralytic feeling: of arms.
Great weariness: of arms and legs.
Great weakness: in chest; in heart.
Weight: at stomach.
Creepy sensation: in skin.
Violent itching nettlerash on thigh and inside of l. knee.
Itching, stinging: in front part of septum narium; in protuberance on nose; of anus; low down in lungs behind sternum, extending to bronchi and nasal cavity; of scars.

" **Tissues.** Gradual or rapid emaciation, almost to a skeleton.
Atrophy of children, with inordinate appetite; restless; desires to change position continually; face yellow, or brownish and shrunken; copious and papescent stools; glands swollen and painless, especially mesenteric ones.
Marasmus with intolerable irritability, child will be approached by no one.
Scrofulosis with emaciation, in spite of necessity of eating every few hours; swelling and induration of glands, the whole of lymphatic system being involved; rachitic

Digitized by Google

affections; inflammation of eyes and eyelids; otitis and otorrhœa; swelling of mesenteric glands; frequent catarrhs; bronchocele; scrofulous women with dwindling of and falling away of mammæ.

‖A colored child, two years old, with the face of an old man, dry skin, large head and stomach, very large genitals, thin arms and legs, is hardly able to stand, sits by preference out doors in the burning sun of the tropics; is always hungry; has a blood boil on l. forearm near the wrist; *Iodum* was followed by a fine eruption, resembling itch when the child began to improve and got well.

‖Low cachectic state of the system, with feeble pulse.

‖In strumous habits, if expectoration or leucorrhœal discharge corrode the linen.

Syphilis: mercurial cachexia; salivation; ulcers in throat; skin and muscles lax; nightly bone pain; very hard chronic buboes.

‖Arthritic affections.

‖‖Hypertrophy and induration of glands.

Inveterate cases of goitre; the harder they feel, and the more other symptoms are wanting, the better indicated.

‖Felons.

‖Bleeding ulcers, destitute of feeling; hard, spongy, and sensitive ulcers, with feeling of tenseness and soreness; pus copious, bloody, and corroding, or thin, watery, and yellow.

‖Very profuse suppuration; enormous quantities of pus with hectic.

[45] **Touch. Passive Motion. Injuries.** Touch: gums painful; hepatic region painful; knee <.

Pressure: < pain in œsophagus; region of liver sore; epigastrium painful; l. hypochondriac region very painful; from pit of stomach to navel and in corresponding region in back sensitiveness; l. ovary tender; causes acute pain in thyroid gland; back of l. hand painful; pain in knee <; on patella causes great pain; l. hychondriac region painful.

Friction: > violent palpitations.

When riding long time in open carriage.

After neglected injury: large swelling of knee.

[46] **Skin.** ‖Skin: rough; dry; dirty yellow; clammy; moist; cool.

Eruption: furfuraceous; humid; like scarlet rash; herpes; ringworm; acne; urticaria; inveterate impetigo scrofulosa.

‖High fever with great weakness; for some days slight eruption, not distinctly characteristic; frequent attacks of anxiety and oppression of breathing, with faintness,

Digitized by Google

especially in night; weakness always increasing, so that fatal paralysis of heart was apprehended; developed the eruption. θSmall-pox.

‖Scarlatina: ulcers in throat; glands swollen, suppurating; everything appears bright blue to him in the distance.

Small, dry, red pimples on arms, chest and back.

‖Scars itch, break open, or pimples break out on them.

‖Tendency to papulæ, small boils and abscesses.

‖Nodosities.

‖‖Morbus maculosus.

Fungus articularis after measles.

Tertiary syphilis, with ulceration of skin.

" Stages of Life, Constitution. ‖‖Dark hair and eyes.

‖Overgrown boys with weak chest; aged persons.

‖‖Scrofulous diathesis.

‖‖Low cachectic condition with profound debility and great emaciation.

Boy, æt. 6 months, affection of eyes; hydrocele.

Infant, æt. 10 months, early in life had marasmus; spasms of glottis.

Boy, æt. 14 months, dark eyes, light hair, rickets; laryngismus stridulus.

Colored boy, æt. 2, old face and wise look; marasmus.

Girl, æt. 2½, vigorous constitution; membranous laryngitis.

Boy, æt. 4; diphtheria.

Boy, æt. 8, scrofulous; inflammation of knee.

Girl, æt. 10, scrofulous, had swollen submaxillary glands for several months; diphtheritis.

Girl, æt. 10, scrofulous; croupous inflammation of pharynx.

Girl, æt. 11; inflammation of knee.

Girl, æt. 12, lymphatic temperament, fair complexion, delicate constitution, general health feeble, and menses not yet appeared, suffering one year; goitre.

Girl, æt. 12, during attack of rheumatism; threatened inflammation of brain.

Girl, æt. 16, bilious-lymphatic temperament, suffering one year, since date of first menstruation; goitre.

Girl, æt. 18, slender form, after exposure on ice, while skating; pneumonia.

Girl, æt. 18, brunette, features regular but pale, mild, peaceful disposition, almost phlegmatic, menses regular for some years and of general good health; goitre.

Girl, æt. 20, after neglected injury; inflammation of knee.

Girl, æt. 20, large, thin, phthisical habits; threatened tuberculosis.

Woman, æt. 20, after a long illness; heart disease.

Miss L., æt. 21; deafness.

Man, æt. 21, tailor, poor and ill nourished, lymphatic

Digitized by Google

temperament and scrofulous, suffering several months; goitre.

Woman, æt. 22, medium height, blue eyes, light auburn hair, sanguine-nervous temperament, predisposed to consumption; galactorrhœa.

Young man, lymphatic temperament, full habit, suffering two years; headache.

Young man, swollen nose, enlarged thyroid; chronic bronchitis.

Girl, æt. 22, of phthisical family; consumption.

Woman, æt. 25, married for three months, general health good, sudden attack; goitre.

Man, æt. 27, after muscular exertion and subsequent exposure to cold; pneumonia.

Man, slender, nervous-bilious temperament, of strong likes and dislikes; mania.

Woman, æt. 28, after being delivered of a healthy child, was found to be as large as at full term, from dropsical effusion; a month afterwards four and a half gallons of a thick, dark and highly albuminous fluid were removed by ordinary paracentesis; about a year afterwards, at seventh month of a second pregnancy, four and a half gallons of fluid were drawn off, and six weeks later a normal labor occurred, and again, in about three months, four gallons of fluid were removed by aspiration; the effusion, however, continued, and ovariotomy was believed to be the only remedy; ovarian cyst.

Pregnant woman, æt. 30; small-pox.

Man, æt. 32, small and weak, dark hair, mild disposition, works much in cold water; has suffered from cardiac and hemorrhoidal troubles; affection of testicles.

Man, æt. 34; pneumonia.

Woman, suffering for one and a half years; chronic jaundice.

Man, æt. 40, innkeeper; affection of pancreas.

Colored woman, æt. 42, suffered for twenty years; chronic ovaritis.

Woman, æt. 50, has suffered very much for several years; leucorrhœa.

Man, æt. 58, general health good, could not remember when tumor first came; goitre.

Man, æt. 58, suffering 15 years; goitre.

Man, æt. 62, six years ago had itch; inflammation of knee.

Man, æt. 64; jaundice.

Woman, æt. 70, two months ago caught cold on a damp day; bronchitis.

Woman, æt. 70, after catching cold; cough.

[45] **Relations.** Antidoted by: starch or wheat flour mixed

with water in case of large doses; small doses by: *Ant. tart., Arsen., Bellad., Camphor., Cinch. sulph., Cinchona, Coffea, Hepar, Opium, Phosphor., Spongia, Sulphur.*

It antidotes: *Mercur.*

Compatible: after *Mercur.*, after *Hepar* in croup, after *Arsen.; Acon., Argent. nitr., Calc. ostr., Merc. sol., Phosphor., Pulsat.* frequently follow well.
